**Q.1 Choose the correct alternatives from the options. 14**

- 1) The physical layer is concerned with the movement of \_\_\_\_\_ over the physical medium.
 

a) programs	b) dialogs
c) protocols	d) bits
- 2) In the OSI model, as a data packet moves from the lower to the upper layers, headers are \_\_\_\_\_.
 

a) added	b) removed
c) rearranged	d) modified
- 3) Which of the following is an application layer service?
 

a) network virtual terminal
b) file transfer, access, and management
c) mail service
d) all of the above
- 4) IPv6 has \_\_\_\_\_ bit addresses.
 

a) 32	b) 64
c) 128	d) variable
- 5) The \_\_\_\_\_ layer adds a header to the packet coming from the upper layer that includes the logical addresses of the sender and receiver.
 

a) physical	b) data link
c) network	d) none of the above
- 6) \_\_\_\_\_ is a process-to-process protocol that adds only port addresses, checksum error control, and length information to the data from the upper layer.
 

a) TCP	b) UDP
c) IP	d) none of the above
- 7) A port address in TCP/IP is \_\_\_\_\_ bits long.
 

a) 32	b) 48
c) 16	d) none of the above

- 8) Routers function in the \_\_\_\_\_ layers.
- a) physical and data link
  - b) physical, data link, and network
  - c) data link and network
  - d) none of the above
- 9) Identify the class of the following IP address: 191.1.2.3.
- a) class A
  - b) class B
  - c) class C
  - d) none of the above
- 10) The number of addresses in a class C block is \_\_\_\_\_.
- a) 65,534
  - b) 16,777,216
  - c) 256
  - d) none of the above
- 11) \_\_\_\_\_ is a dynamic mapping protocol in which a physical address is found for a given logical address.
- a) ARP
  - b) RARP
  - c) both a and b
  - d) none of the above
- 12) The IP header size \_\_\_\_\_.
- a) is 20 to 60 bytes long
  - b) is 20 bytes long
  - c) is 60 bytes long
  - d) none of the above
- 13) ICMP messages are divided into two broad categories:
- a) query and error reporting messages
  - b) request and response messages
  - c) request and reply messages
  - d) none of the above
- 14) UDP is an acronym for \_\_\_\_\_.
- a) User Delivery Protocol
  - b) User Datagram Procedure
  - c) User Datagram Protocol
  - d) none of the above

**Fourth Year (B.Tech) (Sem-I) (New) (CBCS) Examination: Oct/Nov-2022**  
**ELECTRONICS & TELECOMMUNICATION ENGINEERING**  
**Data Communication**

Day & Date: Tuesday, 31-01-2023  
 Time: 02:00 PM To 05:00 PM

Max. Marks: 56

**Instructions:** 1) All questions are compulsory.  
 2) Figures to the right indicates full marks.

**Section – I**

**Q.2 Solve any four of the following questions. 16**

- What do you mean by network topology? Discuss star and Ring topology with its advantages and disadvantages.
- Why we require framing? Explain any one technique for framing of data.
- Draw and Explain Mode transition diagram for HDLC station.
- What is the advantage of piggybacking of the acknowledgement?
- Discuss stop and wait protocol for flow control.
- Differentiate between circuit switching and packet switching.

**Q.3 Solve any two of the following questions. 12**

- With the help of frame format explain in detail IEEE 802.3 Ethernet Lan standard.
- Draw OSI Layer model and discuss the function of each layer.
- How CRC is used for Error control. A bit stream 1101011011 is transmitted using the standard CRC method. The generator polynomial is  $x^4+x+1$ . What is the actual bit string transmitted?

**Section – II**

**Q.4 Solve any four of the following questions. 16**

- Discuss count to infinity problem in Link state routing.
- State optimality principle in routing and explain it with suitable example.
- What is the use of subnet mask?
- Draw and explain UDP header fields.
- Explain Classful IP address representation.
- List and explain different ICMP Error messages.

**Q.5 Solve any two of the following questions. 12**

- Discuss shortest path routing algorithm with suitable example.
- Draw IPV4 header format and discuss the fields related to fragmentation and reassembly.
- Explain FTP Protocol in detail.

Duration: 30 Minutes

Marks: 14

**Q.1 Choose the correct alternatives from the given options.**

**14**

- 1) \_\_\_\_\_ When processor is fully powered up and doing everything that embedded system was design to do
  - a) Sleep mode
  - b) Run mode
  - c) Deep Sleep mode
  - d) Fault Mode
- 2) Market window is the period during which the product would have \_\_\_\_\_.
  - a) No Sale
  - b) Low Sale
  - c) Moderate Sale
  - d) Highest sale
- 3) The ability to change the functionality of the system without incurring heavy NRE cost is called as \_\_\_\_\_.
  - a) Performance
  - b) Time-to-prototype
  - c) Flexibility
  - d) Time-to-market
- 4) After Execution of MUL r4,r3,r2 result will be stored in \_\_\_\_\_.
  - a) R1
  - b) R2
  - c) R3
  - d) R4
- 5) MVN is \_\_\_\_\_ type of instruction used in ARM.
  - a) Arithmetic
  - b) Data Processing
  - c) Logical
  - d) Branch
- 6) The special purpose register R15 is the PC contains \_\_\_\_\_.
  - a) Address at the next instruction to be fetched by the processor
  - b) Address at the current instruction to be fetched by the processor
  - c) Address at the previous instruction to be fetched by the processor
  - d) none of the above
- 7) The \_\_\_\_\_ can shift or rotate operand by specified number of bits prior to arithmetic or logical operations
  - a) Barrel shifter
  - b) SP
  - c) LR
  - d) GPIO
- 8) The \_\_\_\_\_ provides the connectivity between individual tags and the tracking/management system.
  - a) RFID Tag
  - b) RFID Reader
  - c) RFID Scanner
  - d) None of the above

- 9) \_\_\_\_\_ which responds to advertising packet with "CONNECT\_REQ" packet.
- a) Initialization Phase
  - b) Discovery Phase
  - c) Connecting Phase
  - d) Initiator Phase
- 10) \_\_\_\_\_ is designed for control an sensor network.
- a) Bluetooth
  - b) RFID
  - c) Zigbee
  - d) All of the above
- 11) In the star topology, communication is established between devices and a single central controller, called the \_\_\_\_\_.
- a) Reduce Function Devices
  - b) Full Function Devices
  - c) PAN coordinator
  - d) None of the Above
- 12) Which one of the following protocols is lightweight?
- a) HTTP
  - b) IP
  - c) CoAP
  - d) MQTT
- 13) Which of the following is the example of a short-range wireless network?
- a) Wi-Fi
  - b) SPI
  - c) I2C
  - d) VPN
- 14) What are the key components of a M2M system?
- a) Protocols
  - b) Vortex DDS
  - c) Sensors and Wi-Fi
  - d) Smart Homes

c) PAN coordinator
d) None of the Above
- 5) Which one of the following protocols is lightweight?
 

a) HTTP	b) IP
c) CoAP	d) MQTT
- 6) Which of the following is the example of a short-range wireless network?
 

a) Wi-Fi	b) SPI
c) I2C	d) VPN
- 7) What are the key components of a M2M system?
 

a) Protocols	b) Vortex DDS
c) Sensors and Wi-Fi	d) Smart Homes
- 8) \_\_\_\_\_ When processor is fully powered up and doing everything that embedded system was design to do
 

a) Sleep mode	b) Run mode
c) Deep Sleep mode	d) Fault Mode

<b>Seat No.</b>

<b>Set</b>	<b>Q</b>
------------	----------

**Fourth Year (B. Tech) (Sem-I) (New) (CBCS) Examination: Oct/Nov - 2022**  
**ELECTRONICS & TELECOMMUNICATION ENGINEERING**  
**Internet of Things**

Day & Date: Friday, 17-02-2023  
 Time: 02:00 PM To 05:00 PM

Max. Marks: 56

**Instructions:** 1) All questions are compulsory.  
 2) Figures to the right indicate full mark.

**Section – I**

**Q.2 Attempt any Four.** **16**

- a) What are the architectural layers in a modified OSI model for IoT systems?
- b) Discuss the ARM Cortex-M3 special registers in details with neat diagrams.
- c) Explain various IDE's for embedded development.
- d) Explain Register Mapping of Cortex M-3 with function of each register.
- e) State various applications of IoT. Describe different components of IoT.

**Q.3 Attempt any Two.** **12**

- a) Give example with necessary block/connection diagram of IoT's used in a smart home with sensors, actuators and smart home automation software.
- b) Describe Cortex M-3 Architecture with block diagram.
- c) Draw state diagram and explain each state of Operating Modes of Cortex M-3. State features of NVIC

**Section – II**

**Q.4 Attempt any Four** **16**

- a) Write short note on RFID tags and RFID controllers.
- b) How Bluetooth Low Energy establishes connection for data exchange. Draw connection establishment phases and explain each phase in detail. Explain Active states of BLE in detail.
- c) Explain working of ZigBee protocol in detail.
- d) State and explain different components of RFID Communication technology with neat block diagrams.
- e) State and explain various internet connection types in detail.

**Q.5 Attempt any Two.** **12**

- a) Describe MQTT Components with architecture in detail.
- b) Draw IPV4 Packet Structure. Explain Addressing modes of IPV4.
- c) Write a note on IOT- Cloud Platforms and Performance Metrics.

-----	---

**Fourth Year (B. Tech) (Sem-I) (New) (CBCS) Examination: Oct/Nov - 2022**  
**ELECTRONICS & TELECOMMUNICATION ENGINEERING**  
**Internet of Things**

Day & Date: Friday, 17-02-2023  
 Time: 02:00 PM To 05:00 PM

Max. Marks: 70

- Instructions:** 1) Q. No. 1 is compulsory. It should be solved in the first 30 minutes in answer book. Page no 03 (Starting page of the Answer Book). Each question carries one mark.  
 2) Don't forget to Mention question paper set (P/Q/R/S) on top of page.  
 3) Figures to the right indicates full marks.

**MCQ/Objective Type Questions**

Duration: 30 Minutes

Marks: 14

**Q.1 Choose the correct alternatives from the given options. 14**

- 1) In the star topology, communication is established between devices and a single central controller, called the \_\_\_\_\_.  
 a) Reduce Function Devices  
 b) Full Function Devices  
 c) PAN coordinator  
 d) None of the Above
- 2) Which one of the following protocols is lightweight?  
 a) HTTP  
 b) IP  
 c) CoAP  
 d) MQTT
- 3) Which of the following is the example of a short-range wireless network?  
 a) Wi-Fi  
 b) SPI  
 c) I2C  
 d) VPN
- 4) What are the key components of a M2M system?  
 a) Protocols  
 b) Vortex DDS  
 c) Sensors and Wi-Fi  
 d) Smart Homes
- 5) \_\_\_\_\_ When processor is fully powered up and doing everything that embedded system was design to do  
 a) Sleep mode  
 b) Run mode  
 c) Deep Sleep mode  
 d) Fault Mode
- 6) Market window is the period during which the product would have \_\_\_\_\_.  
 a) No Sale  
 b) Low Sale  
 c) Moderate Sale  
 d) Highest sale
- 7) The ability to change the functionality of the system without incurring heavy NRE cost is called as \_\_\_\_\_.  
 a) Performance  
 b) Time-to-prototype  
 c) Flexibility  
 d) Time-to-market
- 8) After Execution of MUL r4,r3,r2 result will be stored in \_\_\_\_\_.  
 a) R1  
 b) R2  
 c) R3  
 d) R4

 3) Figures to the right indicates full marks.

**MCQ/Objective Type Questions**

Duration: 03 Hours

Marks: 14

**Q.1 Choose the correct alternatives from the options. 14**

- 1) Which type of data can be stored in the database?
 

a) Image oriented data	b) Text, files containing data
c) Data in the form of audio or video	d) All of the above
- 2) Which of the following is not a function of the database?
 

a) Managing stored data	b) Manipulating data
c) Security for stored data	d) Analysing code
- 3) Which of the following is known as a set of entities of the same type that share same properties, or attributes?
 

a) Relation set	b) Tuples
c) Entity set	d) Entity Relation model
- 4) What does an RDBMS consist of?
 

a) Collection of Records	b) Collection of Keys
c) Collection of Tables	d) Collection of Fields
- 5) Which command is used to remove a relation from an SQL?
 

a) Drop table	b) Delete
c) Purge	d) Remove
- 6) The top level of the hierarchy consists of \_\_\_\_\_ each of which can obtain \_\_\_\_\_.
 

a) Schemas, Catalogs	b) Schemas, Environment
c) Environment, Schemas	d) Catalogs, Schemas
- 7) Which of the following is not the utility of DBMS?
 

i) Backup    ii) Loading    iii) Process Organization    iv) File organization	
a) i, ii, and iv only	b) i, ii and iii only
c) i, iii and iv only	d) All i, ii, iii, and iv
- 8) Which of the following is the subset of SQL commands used to manipulate Oracle Structures, including tables?
 

a) Data Described Language	b) Data Retrieval Language
c) Data Manipulation Language	d) Data Definition Language

- 9) Course(course\_id,sec\_id,semester)  
Here the course\_id,sec\_id and semester are \_\_\_\_ and course is a \_\_\_\_
- a) Relations, Attribute                      b) Attributes, Relation  
c) Tuple, Relation                          d) Tuple, Attributes
- 10) The attribute name could be structured as an attribute consisting of first name, middle initial, and last name. This type of attribute is called \_\_\_\_
- a) Simple attribute                          b) Composite attribute  
c) Multivalued attribute                      d) Derived attribute
- 11) If h is any hashing function and is used to hash n keys in to a table of size m, where  $n \leq m$ , the expected number of collisions involving a particular key x is:
- a) Less than 1                                  b) Less than n  
c) Less than m                                  d) Less than  $n/2$
- 12) A transaction is delimited by statements (or function calls) of the form \_\_\_\_
- a) Begin transaction and end transaction  
b) Start transaction and stop transaction  
c) Get transaction and post transaction  
d) Read transaction and write transaction
- 13) What are the ways of dealing with deadlock?
- a) Deadlock prevention                      b) Deadlock recovery  
c) Deadlock detection                          d) All of the mentioned
- 14) Which utilities can we use to export data from sql server to a text file?
- a) DTS export wizard                          b) BCP  
c) ISQL    d) DTS export wizard and BCP

**Instructions:** 1) All questions are compulsory.  
 2) Figures to the right indicates full marks

**Section – I**

**Q.2 Attempt any three.** **12**

- a) What are different data models? Explain any one.
- b) What are the different components of DBMS?
- c) Explain in detail Entity relationship model.
- d) Explain data abstraction or 3 schema architecture.

**Q.3 Attempt any two.** **16**

- a) Explain Fundamental and additional relational algebra operations with example.
- b) Explain basic notations of ER diagrams and also explain degree of relationship.
- c) Define SQL data. What are different SQL data types explain in detail.

**Section – II**

**Q.4 Attempt any three.** **12**

- a) What is Normalization? Explain Boyce-Codd Normal Form.
- b) Explain concurrency control with locking method. Explain with example.
- c) Give comparison in between Indexing and hashing.
- d) What is Bigdata? What are the Characteristics of Bigdata?

**Q.5 Attempt any two.** **16**

- a) Write short note on conflict and view serializability.
- b) What is mean by hashing? Explain static hashing and dynamic hashing.
- c) Explain concurrency control with time stamping method. Explain with examples.

  - b) BCP
  - c) ISQL
  - d) DTS export wizard and BCP
- 10) Which type of data can be stored in the database?
- a) Image oriented data
  - b) Text, files containing data
  - c) Data in the form of audio or video
  - d) All of the above
- 11) Which of the following is not a function of the database?
- a) Managing stored data
  - b) Manipulating data
  - c) Security for stored data
  - d) Analysing code
- 12) Which of the following is known as a set of entities of the same type that share same properties, or attributes?
- a) Relation set
  - b) Tuples
  - c) Entity set
  - d) Entity Relation model
- 13) What does an RDBMS consist of?
- a) Collection of Records
  - b) Collection of Keys
  - c) Collection of Tables
  - d) Collection of Fields
- 14) Which command is used to remove a relation from an SQL?
- a) Drop table
  - b) Delete
  - c) Purge
  - d) Remove

**Fourth.Y. (B. Tech) (Sem – I) (New)(CBCS) Examination: Oct/Nov-2022**  
**ELECTRONICS AND TELECOMMUNICATION ENGINEERING**  
**Database Management System**

Day & Date: Tuesday, 07-02-2023  
 Time: 02:00 PM To 05:00 PM

Max. Marks: 70

**Instructions:** 1) All questions are compulsory.  
 2) Figures to the right indicates full marks

**Section – I**

**Q.2 Attempt any three.** **12**

- a) What are different data models? Explain any one.
- b) What are the different components of DBMS?
- c) Explain in detail Entity relationship model.
- d) Explain data abstraction or 3 schema architecture.

**Q.3 Attempt any two.** **16**

- a) Explain Fundamental and additional relational algebra operations with example.
- b) Explain basic notations of ER diagrams and also explain degree of relationship.
- c) Define SQL data. What are different SQL data types explain in detail.

**Section – II**

**Q.4 Attempt any three.** **12**

- a) What is Normalization? Explain Boyce-Codd Normal Form.
- b) Explain concurrency control with locking method. Explain with example.
- c) Give comparison in between Indexing and hashing.
- d) What is Bigdata? What are the Characteristics of Bigdata?

**Q.5 Attempt any two.** **16**

- a) Write short note on conflict and view serializability.
- b) What is mean by hashing? Explain static hashing and dynamic hashing.
- c) Explain concurrency control with time stamping method. Explain with examples.

-----	---

**Fourth Year (B. Tech) (Sem-I) (New) (CBCS) Examination: Oct/Nov-2022**  
**Electronics & Telecommunication Engineering**  
**Image & Video Processing**

Day & Date: Thursday, 09-02-2023  
 Time: 02:00 PM To 05:00 PM

Max. Marks: 70

- Instructions:** 1) Q. No. 1 is compulsory. It should be solved in the first 30 minutes in answer book. Page no 03 (Starting page of the Answer Book). Each question carries one mark.  
 2) Don't forget to Mention question paper set (P/Q/R/S) on top of page.  
 3) Figures to the right indicates full marks  
 4) Assume suitable data wherever needed and mention it clearly.

**MCQ/Objective Type Questions**

Duration: 30 Minutes

Marks: 14

**Q.1 Choose the correct alternatives from the given option: 14**

- 1) Which of the following color model is suitable from the perception point of view?
 

a) RGB	b) HIS
c) CMY	d) CMYK
- 2) In frequency domain, what is the equivalent operation of product of two functions in spatial domain?
 

a) Correlation	b) Convolution
c) Fourier transform	d) Fast Fourier transform
- 3) Process that increases the dynamic range of gray levels in an image is called as \_\_\_\_\_.
 

a) Linear stretching	b) Contrast stretching
c) Contrast matching	d) All of above
- 4) Process used to correct the power law response is called as \_\_\_\_\_.
 

a) Alpha correction	b) Luminance correction
c) Gamma correction	d) None of the above
- 5) Histogram matching is also called as \_\_\_\_\_.
 

a) Histogram equalization
b) Contrast stretching
c) Histogram specification
d) None of the above
- 6) Which of the method is not related to region based segmentation?
 

a) Thresholding	b) Merging & splitting
c) Region growing	d) Hough transform
- 7) Which of the following second order operator is most robust to noise in edge filtering?
 

a) Sobel operator
b) Laplacian operator
c) Laplacian of Gaussian operator
d) Prewitt operator

- 8) Which of the following requires less number of bits for encoding?
- a) I frames
  - b) P frames
  - c) B frames
  - d) I and P frames
- 9) Which scanning method is used for Television signal
- a) Progressive
  - b) Interlaced
  - c) Progressive or interlaced
  - d) None of above
- 10) Block motion model can't handle \_\_\_\_\_ motion.
- a) Translational
  - b) Rotational
  - c) Translational and rotational
  - d) None of above
- 11) Which of the following is implementation issue of phase correlation method?
- a) Boundary effects
  - b) Spectral leakage due to non integer motion vectors
  - c) Range of displacement estimates
  - d) All of above
- 12) Which of the following is most popular method for practical motion estimation?
- a) Phase correlation method
  - b) Block motion
  - c) Block matching method
  - d) Cross search method
- 13) Which of the following is method of estimating the degradation function?
- a) Image observation
  - b) Experimentation
  - c) Mathematical modeling
  - d) All of above
- 14) Video resolution of NTSC is
- a) 720 x 576
  - b) 720 x 480
  - c) 1024 x 820
  - d) 800 x 600

Day & Date: Thursday, 09-02-2023  
 Time: 02:00 PM To 05:00 PM

Max. Marks: 56

- Instructions:**
- 1) All Questions are compulsory.
  - 2) Figures to the right indicate full marks.
  - 3) Assume suitable data if necessary.

**Section – I**

**Q.2 Answer any four of following** **16**

- a) What is RGB color model and how it can be obtained using HSI color model?
- b) What is contrast stretching of an image and how it can be achieved?
- c) What is histogram of image? What is histogram equalization?
- d) How global thresholding is used for detecting edge from an image?
- e) What are applications of Dilation and Erosion in image morphology?

**Q.3 Answer any two of following** **12**

- a) What is gray level slicing and bit plane slicing? What are its applications
- b) Equalize the given histogram of an image

Gray Levels	0	1	2	3	4	5	6	7	
No. of pixels	790	1023	850	656	329	245	122	81	

- c) How Boundary Extraction and hole filling operations are carried out?

**Section – II**

**Q.4 Answer any four of following** **16**

- a) Draw block diagram of image degradation/restoration model and explain.
- b) What are I, P & B frames in digital video?
- c) Explain interlaced scanning in video signals.
- d) What is Aperture problem in 2D motion estimation?
- e) What are implementation issues in Phase Correlation method?

**Q.5 Answer any two of following** **12**

- a) What is image restoration? How image restoration is done using Weiner filter?
- b) What are sampling structures for Digital Video?
- c) What is Block matching method for motion estimation?

**Wireless Sensor Network**

Day & Date: Thursday, 09-02-2023  
 Time: 02:00 PM To 05:00 PM

Max. Marks: 70

- Instructions:** 1) Q. No. 1 is compulsory and should be solved in first 30 minutes in Answer Book. Page No.3 (starting page of the Answer Book). Each questions carry one mark.  
 2) Don't forget to mention Question Paper Set (P/Q/R/S) at the top of the same page.  
 3) Figures to the right indicates full marks.

**MCQ/Objective Type Questions**

Duration: 30 Minutes

Marks: 70

**Q.1 Choose the correct alternatives from the options.**

- 1) Similarities between WSNs and MANETs networks is.
  - a) nodes are densely deployed
  - b) the nodes communicate with each other using multi-hop communication
  - c) topology changes very frequently
  - d) have global unique identification for nodes
- 2) In which network access point is not required?
  - a) ad hoc network
  - b) infrastructure network
  - c) both a and b
  - d) none of the above
- 3) As the number of nodes \_\_\_\_\_ every node spends almost all of its time forwarding packets of other nodes.
  - a) decrease
  - b) increases
  - c) constant
  - d) none of the above
- 4) In wireless sensor networks, some of the information defining the objective function and constraints is available only at \_\_\_\_\_.
  - a) compile time
  - b) run time
  - c) ideal time
  - d) setup time
- 5) Which of the following are the applications of WSN?
  - a) Health monitoring
  - b) Industrial process monitoring and control
  - c) Military
  - d) All the above
- 6) The following characteristics of wireless sensor networks point to the need for a specialized MAC protocol
  - a) the issues of fairness of the node level are much less important than overall application performance
  - b) most sensor nodes are idle much of the time
  - c) in-network processing can greatly improve bandwidth utilization
  - d) all of above

- 7) The S-MAC protocol includes the following major components
- a) periodic listen and sleep
  - b) collision avoidance
  - c) overheating avoidance
  - d) all of above
- 8) \_\_\_\_\_ assigns a unique number to each IP network adapter called the MAC address.
- a) media access control
  - b) metro access control
  - c) metropolitan access control
  - d) both b and c above
- 9) In wireless distribution system \_\_\_\_\_.
- a) multiple access points are inter-connected with each other
  - b) there is no access point
  - c) only one access point exists
  - d) access points are not required
- 10) A wireless network interface controller can work in \_\_\_\_\_
- a) infrastructure mode
  - b) ad-hoc mode
  - c) both infrastructure mode and ad-hoc mode
  - d) WDS mode
- 11) The energy source used in WSN are \_\_\_\_\_.
- a) Battery
  - b) Inverter
  - c) Capacitor
  - d) None of the above
- 12) A sensor network is designed to perform a set of high-level information processing tasks such as \_\_\_\_\_.
- a) detection
  - b) tracking
  - c) classification
  - d) All of the above
- 13) A transducer that converts a physical phenomenon that maybe further manipulated by other apparatus
- a) sensor
  - b) sensor node
  - c) Protocols
  - d) None of the above
- 14) The process of determining a network path from a packet source node to its destination.
- a) Routing
  - b) Network topology
  - c) sensor
  - d) sensor node

**Fourth Year (B. Tech) (Sem-I) (New) (CBCS) Examination: Oct/Nov-2022**  
**Electronic & Telecommunication Engineering**  
**Wireless Sensor Network**

Day & Date: Thursday, 09-02-2023  
 Time: 02:00 PM To 05:00 PM

Max. Marks: 56

**Instructions:** 1) All questions are compulsory.  
 2) Figures to the right indicate full marks.

**Section – I**

**Q.2 Attempt any four of the following.** **16**

- a) What are the challenges and the required mechanisms of a Wireless Sensor network?
- b) Briefly discuss the applications of WSNs.
- c) Compare MANET and WSN
- d) Explain in detail about Gateway concepts.
- e) With a neat diagram, Explain sensor network architecture
- f) Explain various clustering mechanisms in WSN.

**Q.3 Attempt any two of the following questions** **12**

- a) Write notes on
  - i) Dynamic Energy and power management
  - ii) TinyOS
- b) Explain Time Synchronization, Localization, and positioning.
- c) Explain the optimization goals and figure of merit of WSN.

**Section – II**

**Q.4 Attempt any four of the following** **16**

- a) What are the Issues and Challenges in providing QoS in WSN?
- b) Discuss the characteristic requirements of WSN.
- c) Differentiate between contention-based protocols and schedule-based protocols
- d) Explain how the sensor networks are deployed for various applications.
- e) Define clustering and explain in detail its types.
- f) What is the need for energy management?

**Q.5 Attempt any two of the following questions** **12**

- a) Explain Energy Consumption of Sensor Nodes.
- b) Explain any two applications of a wireless sensor network in detail.
- c) What are the Enabling Technologies for Wireless Sensor Networks?

Set Q
-------

**Fourth Year (B. Tech) (Sem-I) (New) (CBCS) Examination: Oct/Nov-2022**  
**Electronic & Telecommunication Engineering**  
**Wireless Sensor Network**

Day & Date: Thursday, 09-02-2023  
 Time: 02:00 PM To 05:00 PM

Max. Marks: 70

- Instructions:** 1) Q. No. 1 is compulsory and should be solved in first 30 minutes in Answer Book. Page No.3 (starting page of the Answer Book). Each questions carry one mark.  
 2) Don't forget to mention Question Paper Set (P/Q/R/S) at the top of the same page.  
 3) Figures to the right indicates full marks.

**MCQ/Objective Type Questions**

Duration: 30 Minutes

Marks: 70

**Q.1 Choose the correct alternatives from the options.**

- 1) \_\_\_\_\_ assigns a unique number to each IP network adapter called the MAC address.
  - a) media access control
  - b) metro access control
  - c) metropolitan access control
  - d) both b and c above
- 2) In wireless distribution system \_\_\_\_\_.
  - a) multiple access points are inter-connected with each other
  - b) there is no access point
  - c) only one access point exists
  - d) access points are not required
- 3) A wireless network interface controller can work in \_\_\_\_\_.
  - a) infrastructure mode
  - b) ad-hoc mode
  - c) both infrastructure mode and ad-hoc mode
  - d) WDS mode
- 4) The energy source used in WSN are \_\_\_\_\_.
  - a) Battery
  - b) Inverter
  - c) Capacitor
  - d) None of the above
- 5) A sensor network is designed to perform a set of high-level information processing tasks such as \_\_\_\_\_.
  - a) detection
  - b) tracking
  - c) classification
  - d) All of the above
- 6) A transducer that converts a physical phenomenon that maybe further manipulated by other apparatus
  - a) sensor
  - b) sensor node
  - c) Protocols
  - d) None of the above
- 7) The process of determining a network path from a packet source node to its destination.
  - a) Routing
  - b) Network topology
  - c) sensor
  - d) sensor node

- 8) Similarities between WSNs and MANETs networks is.
- a) nodes are densely deployed
  - b) the nodes communicate with each other using multi-hop communication
  - c) topology changes very frequently
  - d) have global unique identification for nodes
- 9) In which network access point is not required?
- a) ad hoc network
  - b) infrastructure network
  - c) both a and b
  - d) none of the above
- 10) As the number of nodes \_\_\_\_\_ every node spends almost all of its time forwarding packets of other nodes.
- a) decrease
  - b) increases
  - c) constant
  - d) none of the above
- 11) In wireless sensor networks, some of the information defining the objective function and constraints is available only at \_\_\_\_\_.
- a) compile time
  - b) run time
  - c) ideal time
  - d) setup time
- 12) Which of the following are the applications of WSN?
- a) Health monitoring
  - b) Industrial process monitoring and control
  - c) Military
  - d) All the above
- 13) The following characteristics of wireless sensor networks point to the need for a specialized MAC protocol
- a) the issues of fairness of the node level are much less important than overall application performance
  - b) most sensor nodes are idle much of the time
  - c) in-network processing can greatly improve bandwidth utilization
  - d) all of above
- 14) The S-MAC protocol includes the following major components
- a) periodic listen and sleep
  - b) collision avoidance
  - c) overheating avoidance
  - d) all of above

Q
---

**Fourth Year (B. Tech) (Sem-I) (New) (CBCS) Examination: Oct/Nov-2022**  
**Electronic & Telecommunication Engineering**  
**Wireless Sensor Network**

Day & Date: Thursday, 09-02-2023  
 Time: 02:00 PM To 05:00 PM

Max. Marks: 56

**Instructions:** 1) All questions are compulsory.  
 2) Figures to the right indicate full marks.

**Section – I**

**Q.2 Attempt any four of the following.** **16**

- a) What are the challenges and the required mechanisms of a Wireless Sensor network?
- b) Briefly discuss the applications of WSNs.
- c) Compare MANET and WSN
- d) Explain in detail about Gateway concepts.
- e) With a neat diagram, Explain sensor network architecture
- f) Explain various clustering mechanisms in WSN.

**Q.3 Attempt any two of the following questions** **12**

- a) Write notes on
  - i) Dynamic Energy and power management
  - ii) TinyOS
- b) Explain Time Synchronization, Localization, and positioning.
- c) Explain the optimization goals and figure of merit of WSN.

**Section – II**

**Q.4 Attempt any four of the following** **16**

- a) What are the Issues and Challenges in providing QoS in WSN?
- b) Discuss the characteristic requirements of WSN.
- c) Differentiate between contention-based protocols and schedule-based protocols
- d) Explain how the sensor networks are deployed for various applications.
- e) Define clustering and explain in detail its types.
- f) What is the need for energy management?

**Q.5 Attempt any two of the following questions** **12**

- a) Explain Energy Consumption of Sensor Nodes.
- b) Explain any two applications of a wireless sensor network in detail.
- c) What are the Enabling Technologies for Wireless Sensor Networks?

<b>Seat No.</b>	
-----------------	--

- 8) In wireless sensor networks, some of the information defining the objective function and constraints is available only at \_\_\_\_\_.
  - a) compile time
  - b) run time
  - c) ideal time
  - d) setup time
- 9) Which of the following are the applications of WSN?
  - a) Health monitoring
  - b) Industrial process monitoring and control
  - c) Military
  - d) All the above
- 10) The following characteristics of wireless sensor networks point to the need for a specialized MAC protocol
  - a) the issues of fairness of the node level are much less important than overall application performance
  - b) most sensor nodes are idle much of the time
  - c) in-network processing can greatly improve bandwidth utilization
  - d) all of above
- 11) The S-MAC protocol includes the following major components
  - a) periodic listen and sleep
  - b) collision avoidance
  - c) overheating avoidance
  - d) all of above
- 12) \_\_\_\_\_ assigns a unique number to each IP network adapter called the MAC address.
  - a) media access control
  - b) metro access control
  - c) metropolitan access control
  - d) both b and c above

**MCQ/Objective Type Questions**

Duration: 30 Minutes

Marks: 14

**Q.1 Choose the correct alternatives.**

**14**

- 1) Which TM mode in rectangular waveguide has lowest cut off frequency?
  - a) TM<sub>11</sub>
  - b) TM<sub>01</sub>
  - c) TM<sub>10</sub>
  - d) TM<sub>21</sub>
- 2) The modes in a reflex Klystron
  - a) Give the same frequency but different transit times
  - b) Result from excessive transit time across the resonator gap
  - c) Are caused by spurious frequency modulation
  - d) Are just for theoretical consideration
- 3) The ratio of magnitudes of electric field intensity to the magnetic field intensity is regarded as
 

a) Characteristic impedance	b) Intrinsic impedance
c) Both a and b	d) None of these
- 4) Which one of the following is a transferred electron device?
 

a) Gunn diode	b) Tunnel diode
c) IMPATT diode	d) PIN diode
- 5) The losses that occur in a transmission line is:
 

a) Conduction losses	b) Di-electric loss
c) Both of the mentioned	d) none of the mentioned
- 6) The maximum theoretical efficiency of two cavity klystron is
 

a) 22%	b) 58%
c) 85%	d) 48%
- 7) In case of Magnetron frequency pushing takes place due to \_\_\_\_\_ variations.
 

a) Supply	b) Load
c) Frequency	d) Amplitude

- 8) The characteristic impedance of a parallel plate waveguide is given by:
- a)  $\eta \cdot D/W$
  - b)  $\eta \cdot W/D$
  - c)  $D/\eta \cdot W$
  - d)  $\eta \cdot \sqrt{D/W}$
- 9) The modes of propagation supported by a rectangular wave guide is:
- a) TM, TEM, TE modes
  - b) TM, TE
  - c) TM, TEM
  - d) TE, TEM
- 10) Dominant mode is defined as:
- a) Any TEM mode is called a dominant mode
  - b) Mode with the highest cut off frequency
  - c) Mode with the lowest cut off frequency
  - d) None of the mentioned
- 11) S parameters are expressed as a ratio of:
- a) Voltage and current
  - b) Impedance at different ports
  - c) Incident and the reflected voltage waves
  - d) None of the mentioned
- 12) Ferrite isolators are \_\_\_\_\_ port microwave devices.
- a) Two
  - b) Three
  - c) Four
  - d) None of the mentioned
- 13) Micro strip can be fabricated using:
- a) Photo lithographic process
  - b) Electrochemical process
  - c) Mechanical methods
  - d) none of the mentioned
- 14) Microstrip line can support a pure TEM wave
- a) True
  - b) False
  - c) Microstrip supports only TM mode
  - d) Microstrip supports only TE mode

<b>Seat No.</b>

Time: 02:00 PM To 05:00 PM

Max. Marks: 56

- Instructions:** 1) Figures to the right indicate full marks.  
2) All questions are compulsory.  
3) Assume suitable data wherever needed and mention it clearly.

**Section – I**

**Q.2 Attempt any Four of the following question. 16**

- a) Derive the expression for field components of TM mode in rectangular waveguide.
- b) Explain working of two-hole Directional Coupler.
- c) What is the purpose of slow wave structures used in TWT amplifiers?
- d) Define the following terms
  - a) S Matrix
  - b) Radiation efficiency
  - c) VSWR
  - d) Isolator
- e) Justify the characteristic impedance of transmission line remains constant through line.

**Q.3 Attempt any Two of the following question. 12**

- a) Why tee is called as magic tee? Derive expression for scattering matrix. Also, explain how unknown impedance is measured using magic tee.
- b) Derive S matrix for E plane tee. Justify the statement "E plane tee acts as a 3 dB splitter".
- c) Determine the cut-off wavelength for the dominant mode in a rectangular waveguide of breadth 12 cms. For 2 GHz signal propagated in this waveguide in the dominant mode calculate the guide wavelength in the dominant mode, group, and phase velocities

**Section – II**

**Q.4 Write a note on any Four of the following. 16**

- a) What is Gunn effect? Explain how negative resistance is to be achieved in Gunn diode.
- b) Derive the relation between repeller voltage and the accelerating voltage for reflex Klystron.
- c) Explain any one method for measurement of VSWR.
- d) Explain the two-cavity klystron amplifier with neat diagram.
- e) How do you measure microwave frequency?

**Q.5 Write a note on any Two of the following.**

- a)** Derive velocity modulation, transit time of reflex klystron oscillator.
- b)** Two cavity klystron amplifier has following parameters Anode to cathode voltage = 1000 V  
Beam current = 20 mA  
Frequency = 4 GHz  
Gap spacing in either cavity = 1 mm  
Spacing between two cavities = 2 cm  
Effective shunt impedance = 20 kohm (Excluding beam loading)  
Calculate:
  - i) Electron velocity
  - ii) Input gap voltage to give maximum voltage across input cavity
  - iii) Voltage Gain in decibels
- c)** Explain any two methods for measurement of wavelength and frequency using slotted line method.

**Q.3 Attempt any Two of the following question. 12**

- a) Why tee is called as magic tee? Derive expression for scattering matrix. Also, explain how unknown impedance is measured using magic tee.
- b) Derive S matrix for E plane tee. Justify the statement "E plane tee acts as a 3 dB splitter".
- c) Determine the cut-off wavelength for the dominant mode in a rectangular waveguide of breadth 12 cms. For 2 GHz signal propagated in this waveguide in the dominant mode calculate the guide wavelength in the dominant mode, group, and phase velocities

**Section – II**

**Q.4 Write a note on any Four of the following. 16**

- a) What is Gunn effect? Explain how negative resistance is to be achieved in Gunn diode.
- b) Derive the relation between repeller voltage and the accelerating voltage for reflex Klystron.
- c) Explain any one method for measurement of VSWR.
- d) Explain the two-cavity klystron amplifier with neat diagram.
- e) How do you measure microwave frequency?

**Q.5 Write a note on any Two of the following.**

- a)** Derive velocity modulation, transit time of reflex klystron oscillator.
- b)** Two cavity klystron amplifier has following parameters Anode to cathode voltage = 1000 V  
Beam current = 20 mA  
Frequency = 4 GHz  
Gap spacing in either cavity = 1 mm  
Spacing between two cavities = 2 cm  
Effective shunt impedance = 20 kohm (Excluding beam loading)  
Calculate:
  - i) Electron velocity
  - ii) Input gap voltage to give maximum voltage across input cavity
  - iii) Voltage Gain in decibels
- c)** Explain any two methods for measurement of wavelength and frequency using slotted line method.

**Fourth Y. (B.Tech) (Sem - II) (New) (CBCS) Examination: Oct/Nov-2022**  
**ELECTRONICS & TELECOMMUNICATION ENGINEERING**  
**Microwave Engineering**

Day & Date: Tuesday, 14-02-2023

Max. Marks: 70

Time: 02:00 PM To 05:00 PM

- Instructions:** 1) Q. No. 1 is compulsory and should be solved in first 30 minutes in answer book. Don't forget to mention Q.P. Set (P, Q, R, S) on top of page.  
 2) Figures to the right indicate full marks  
 3) Assume suitable data wherever needed and mention it clearly.

**MCQ/Objective Type Questions**

Duration: 30 Minutes

Marks: 14

**Q.1 Choose the correct alternatives.**

**14**

- 1) The maximum theoretical efficiency of two cavity klystron is
 

a) 22%	b) 58%
c) 85%	d) 48%
- 2) In case of Magnetron frequency pushing takes place due to \_\_\_\_\_ variations.
 

a) Supply	b) Load
c) Frequency	d) Amplitude
- 3) The characteristic impedance of a parallel plate waveguide is given by:
 

a) $\eta \cdot D/W$	b) $\eta \cdot W/D$
c) $D/\eta \cdot W$	d) $\eta \cdot \sqrt{D/W}$
- 4) The modes of propagation supported by a rectangular wave guide is:
 

a) TM, TEM, TE modes	b) TM, TE
c) TM, TEM	d) TE, TEM
- 5) Dominant mode is defined as:
 

a) Any TEM mode is called a dominant mode
b) Mode with the highest cut off frequency
c) Mode with the lowest cut off frequency
d) None of the mentioned
- 6) S parameters are expressed as a ratio of:
 

a) Voltage and current
b) Impedance at different ports
c) Incident and the reflected voltage waves
d) None of the mentioned
- 7) Ferrite isolators are \_\_\_\_\_ port microwave devices.
 

a) Two	b) Three
c) Four	d) None of the mentioned
- 8) Micro strip can be fabricated using:
 

a) Photo lithographic process	b) Electrochemical process
c) Mechanical methods	d) none of the mentioned

 Time: 02:00 PM To 05:00 PM

Max. Marks: 70

- Instructions:** 1) Q. No. 1 is compulsory. It should be solved in the first 30 minutes in answer book. Page no 03 (Starting page of the Answer Book). Each question carries one mark.  
 2) Don't forget to Mention question paper set (P/Q/R/S) on top of page.  
 3) Assume suitable data if required and state it clearly.

**MCQ/Objective Type Questions**

Duration: 30 Minutes

Marks: 14

**Q.1 Choose the correct alternatives from the options. 14**

- 1) For n-MOS to operate in inversion mode, which of the following condition is true.
 

a) $V_{GS} < V_T$	b) $V_{GS} = V_T$
c) $V_{GS} > V_T$	d) None
- 2) Which of the following power dissipation is smallest for CMOS inverter?
 

a) Static	b) Dynamic
c) Short circuit	d) None
- 3) If frequency of input to CMOS inverter is doubled keeping other parameters same, what will be effect on dynamic power dissipation?
 

a) It is uncharged	b) It will be doubled
c) It will be four times	d) It will be eight times
- 4) Static CMOS design of  $Y=A \text{ XOR } B$  requires \_\_\_\_\_ number of NMOS & \_\_\_\_\_ number of PMOS transistors.
 

a) 4,4	b) 6,6
c) 8,8	d) 2,2
- 5) For N input dynamic gate, it requires \_\_\_\_\_ number of MOS transistors.
 

a) N	b) N+1
c) 2N	d) N+2
- 6) For CMOS layout, which of the following layer is used for gate?
 

a) P <sup>+</sup> diffusion	b) N <sup>+</sup> diffusion
c) Polysilicon	d) Metal-1
- 7) For four input dynamic NAND gate, which of the following parameter is zero?
 

a) $N_{MH}$	b) $N_{ML}$
c) $t_{PHL}$	d) $t_{PLH}$
- 8) For positive edge triggered register, which sequence of cascading the latches is correct?
 

a) positive, negative	b) negative, positive
c) negative, negative	d) positive, positive

- 9) For SR flipflop using NAND gates, which of the condition of S R inputs is forbidden?
- a) 0,0
  - b) 0,1
  - c) 1,0
  - d) 1,1
- 10) A C<sup>2</sup>MOS register with CLK-CLK' clocking is insensitive to \_\_\_\_\_ overlap, as long as the rise and fall times of the clock edges are sufficiently small.
- a) (0,0)
  - b) (1,1)
  - c) (0,0) & (1,1)
  - d) None
- 11) Clock skew is caused by static mismatches in the \_\_\_\_\_ paths and differences in the \_\_\_\_\_ load.
- a) Ground, Vcc
  - b) Vcc, ground
  - c) Signal, Vcc
  - d) Clock, clock
- 12) Which of the following statement is false
- a) Clock skew does not result in clock period variation
  - b) Clock jitter produces variation in clock period
  - c) Clock skew produces variation in clock period
  - d) None
- 13) Ripple carry adders has a performance that is \_\_\_\_\_ proportional to the number of bits
- a) Linearly
  - b) Square
  - c) Square root
  - d) Logarithmic
- 14) Which of the following statement is wrong?
- a) Low voltage operation around 1.0 V or below is one of the solutions being employed in state of the art memories
  - b) Memory cell should be designed so that a maximum signal is obtained in a minimum area
  - c) A memory must operate correctly over a variety of operating and manufacturing condition
  - d) None

- Instructions:** 1) All questions are compulsory.  
 2) Figures to the right indicate full marks.  
 3) Assume suitable data if necessary.

**Section – I**

**Q.2 Attempt any Four.** **16**

- a) Draw structure of n channel Enhancement MOSFET. What is Accumulation, depletion & inversion modes?
- b) What is static power dissipation of CMOS inverter?
- c) Draw stick diagram of two input NOR gate.
- d) Draw layout of two input CMOS AND gate.
- e) Design half subtractor using complimentary CMOS logic.
- f) What is pass transistor logic? Design two input XNOR gate using this logic.

**Q.3 Attempt any two.** **12**

- a) What is DC characteristic of CMOS inverter? How it is affected by Bn/Bp ratio? What are various regions of this DC characteristic?
- b) What is dynamic CMOS logic? Draw and analyze three input XOR gate using this logic.
- c) What are issues in design of dynamic CMOS logic and how to overcome them?

**Section – II**

**Q.4 Attempt any four.** **16**

- a) What is bistability principle? Draw and explain positive latch using transmission gates & inverters.
- b) What are problems in designing low voltage static latch? How these problems are resolved?
- c) What is Asynchronous interconnect? Explain in detail.
- d) How PLL can be used for clock synchronization?
- e) Draw any one structure for 4 bit full adder and explain.
- f) Draw and explain 4 x 4 ROM cell.

**Q.5 Attempt any two.** **12**

- a) What are sources of clock skew & jitter? Explain in detail.
- b) What is necessity of TSPCR? Draw & explain positive edge triggered register in TSPC.
- c) What are problems in ripple carry adders? Draw any one structure of fast full adder and explain.

- a) Low voltage operation around 1.0 V or below is one of the solutions being employed in state of the art memories
  - b) Memory cell should be designed so that a maximum signal is obtained in a minimum area
  - c) A memory must operate correctly over a variety of operating and manufacturing condition
  - d) None
- 10) For n-MOS to operate in inversion mode, which of the following condition is true.
- a)  $V_{GS} < V_T$
  - b)  $V_{GS} = V_T$
  - c)  $V_{GS} > V_T$
  - d) None
- 11) Which of the following power dissipation is smallest for CMOS inverter?
- a) Static
  - b) Dynamic
  - c) Short circuit
  - d) None
- 12) If frequency of input to CMOS inverter is doubled keeping other parameters same, what will be effect on dynamic power dissipation?
- a) It is unchanged
  - b) It will be doubled
  - c) It will be four times
  - d) It will be eight times
- 13) Static CMOS design of  $Y=A \text{ XOR } B$  requires \_\_\_\_\_ number of NMOS & \_\_\_\_\_ number of PMOS transistors.
- a) 4,4
  - b) 6,6
  - c) 8,8
  - d) 2,2
- 14) For N input dynamic gate, it requires \_\_\_\_\_ number of MOS transistors.
- a) N
  - b) N+1
  - c) 2N
  - d) N+2

<b>Seat No.</b>	
-----------------	--

**Fourth Y. (B. Tech) (Sem - II) (New) (CBCS) Examination: Oct/Nov - 2022**  
**ELECTRONICS & TELECOMMUNICATION ENGINEERING**  
**CMOS VLSI Design**

Day & Date: Thursday, 16-02-2023  
 Time: 02:00 PM To 05:00 PM

Max. Marks: 56

- Instructions:** 1) All questions are compulsory.  
 2) Figures to the right indicate full marks.  
 3) Assume suitable data if necessary.

**Section – I**

**Q.2 Attempt any Four.** **16**

- a) Draw structure of n channel Enhancement MOSFET. What is Accumulation, depletion & inversion modes?
- b) What is static power dissipation of CMOS inverter?
- c) Draw stick diagram of two input NOR gate.
- d) Draw layout of two input CMOS AND gate.
- e) Design half subtractor using complimentary CMOS logic.
- f) What is pass transistor logic? Design two input XNOR gate using this logic.

**Q.3 Attempt any two.** **12**

- a) What is DC characteristic of CMOS inverter? How it is affected by Bn/Bp ratio? What are various regions of this DC characteristic?
- b) What is dynamic CMOS logic? Draw and analyze three input XOR gate using this logic.
- c) What are issues in design of dynamic CMOS logic and how to overcome them?

**Section – II**

**Q.4 Attempt any four.** **16**

- a) What is bistability principle? Draw and explain positive latch using transmission gates & inverters.
- b) What are problems in designing low voltage static latch? How these problems are resolved?
- c) What is Asynchronous interconnect? Explain in detail.
- d) How PLL can be used for clock synchronization?
- e) Draw any one structure for 4 bit full adder and explain.
- f) Draw and explain 4 x 4 ROM cell.

**Q.5 Attempt any two.** **12**

- a) What are sources of clock skew & jitter? Explain in detail.
- b) What is necessity of TSPCR? Draw & explain positive edge triggered register in TSPC.
- c) What are problems in ripple carry adders? Draw any one structure of fast full adder and explain.

-----	---

**Fourth Y. (B. Tech) (Sem - II) (New) (CBCS) Examination: Oct/Nov-2022**  
**ELECTRONIC & TELECOMMUNICATION ENGINEERING**  
**Industrial IOT**

Day & Date: Monday, 20-02-2023  
 Time: 02:00 PM To 05:00 PM

Max. Marks: 70

- Instructions:** 1) Q. No. 1 is compulsory. It should be solved in the first 30 minutes in answer book. Page no 03 (Starting page of the Answer Book). Each question carries one mark.  
 2) Don't forget to Mention question paper set (P/Q/R/S) on top of page.  
 3) Figures to the right indicates full marks.

**MCQ/Objective Type Questions**

Duration: 30 Minutes

Marks: 14

**Q.1 Choose the correct alternatives from the options.**

**14**

- 1) Which of the following connects an IoT LAN with a WAN, and to the Internet?
 

a) IoT node	b) IoT proxy
c) IoT gateway	d) IoT Network
- 2) Which of the following is/are the IIoT requirements in industry 4.0?
 

a) Achieve greater production
b) Deeper insights of analysis and prediction
c) Connected world of machines
d) All of the above
- 3) What are the benefits of IIoT?
 

a) Improves productivity	b) Enables remote diagnosis
c) Reduces operation time	d) All of the above
- 4) How many key elements are there in the industrial internet?
 

a) 5	b) 3
c) 2	d) None of these
- 5) Which of the following best describes a smart sensor?
 

a) Sensor with smart memory, processor and communication interface
b) Sensor with only memory
c) Sensor with LED
d) Sensor with buzzer
- 6) What is the frequency range in which 6LoWPAN works worldwide?
 

a) 2400- 2483.5 MHz	b) 2300- 2345 MHz
c) 2400-2843.5 MHz	d) 2400- 2583.5 MHz
- 7) Mention some characteristics of iot devices.
 

a) Low processing power	b) Smart in size
c) Energy constrained in nature	d) All of these
- 8) The data to be loaded into the BigQuery from the cloud storage can be of \_\_\_\_\_ format.
 

a) ORC	b) All of these
c) JSON	d) Parquet

- 9) BigQuery utilizes \_\_\_\_\_ storage.
- a) Graph
  - b) Document
  - c) Key-value
  - d) Columnar
- 10) How are cloud datastore and cloud bigtable alike?
- a) both are highly scalable
  - b) both are highly scalable and nosql databases
  - c) both are nosql databases
  - d) None of these
- 11) Which of the following disk formats is/are supported by Glance?
- a) RAW
  - b) VHD
  - c) RAW and VHD
  - d) None of these
- 12) In OpenStack which of the following components take care of user authentication?
- a) Nova
  - b) Horizon
  - c) Keystone
  - d) None of these
- 13) Which of the following connects an IoT LAN with a WAN, and to the Internet?
- a) IoT node
  - b) IoT proxy
  - c) IoT gateway
  - d) IoT Network
- 14) Which of the following is/are the IIoT requirements in industry 4.0?
- a) Achieve greater production
  - b) Deeper insights of analysis and prediction
  - c) Connected world of machines
  - d) All of the above

Day & Date: Monday, 20-02-2023  
 Time: 02:00 PM To 05:00 PM

Max. Marks: 56

**Instructions:** 1) All questions are compulsory.  
 2) Figures to the right indicates full marks

**Section – I**

**Q.2 Attempt any THREE.** **12**

- a) Explain how utilizing IIoT technology can unlock and deliver value to the HealthCare industry.
- b) Explain how IIAF based on ISO/IEC/IEEE 42010:2011 standard codifies the conventions and common practices of architect design.
- c) Explain the evolution of IIoT layers from the OSI model.
- d) Write a short note on IPv6 over low-power personal area networks.

**Q.3 Attempt any TWO.** **16**

- a) Explain the types and methods of analytics in IIoT.
- b) Discuss in detail the Industrial Internet Consortium Three-Tier Topology in IIoT.
- c) Discuss in detail the potential security issues at network level of IIoT.

**Section – II**

**Q.4 Attempt any THREE.** **12**

- a) Explain the process of Storing data on AWS.
- b) What are the two main components of Google Cloud IoT core, explain with suitable example.
- c) Write note on the following components:
  - 1) Bare Metal
  - 2) Virtual Machine
- d) Explain the following core projects of Open Stack ecosystem:
  - 1) imaging
  - 2) dashboard
  - 3) networking

**Q.5 Attempt any TWO.** **16**

- a) Explain the four types of VPC architectures available in AWS with suitable diagram.
- b) Briefly explain the modern architecture of open stack with appropriate diagram.
- c) Explain why Bigtable is ideal for applications that need very high throughput and scalability for key/value data?

 3) Figures to the right indicates full marks.

**MCQ/Objective Type Questions**

Duration: 30 Minutes

Marks: 14

**Q.1 Choose the correct alternatives from the options.**

**14**

- 1) Artificial Intelligence is about \_\_\_\_\_.  
 a) Playing a game on Computer  
 b) Making a machine Intelligent  
 c) Programming on Machine with your Own Intelligence  
 d) Putting your intelligence in Machine
- 2) If a robot is able to change its own trajectory as per the external conditions, then the robot is considered as the \_\_\_\_\_.  
 a) Mobile  
 b) Non-Servo  
 c) Open Loop  
 d) Intelligent
- 3) Which algorithm is used in the Game tree to make decisions of Win/Lose?  
 a) Heuristic Search Algorithm  
 b) DFS/BFS algorithm  
 c) Greedy Search Algorithm  
 d) Min/Max algorithm
- 4) The search algorithm which is similar to the minimax search, but removes the branches that don't affect the final output is known as \_\_\_\_\_.  
 a) Depth-first search  
 b) Breadth-first search  
 c) Alpha-beta pruning  
 d) None of the above
- 5) Among the given options, which search algorithm requires less memory?  
 a) Optimal Search  
 b) Depth First Search  
 c) Breadth-First Search  
 d) Linear Search
- 6) Which term describes the common-sense of the judgmental part of problem-solving?  
 a) Values-based  
 b) Critical  
 c) Analytical  
 d) Heuristic
- 7) Which search is implemented with an empty first in first out Queue?  
 a) Depth First search  
 b) Breadth first search  
 c) Bidirectional search  
 d) None of the above
- 8) What is the space complexity of Depth First Search?  
 a)  $O(b)$   
 b)  $O(bl)$   
 c)  $O(m)$   
 d)  $O(bm)$

- 9) Computer programs, directions and recipes are the examples of \_\_\_\_\_.  
a) Inheritable knowledge                      b) Relational knowledge  
c) Inferential knowledge                      d) Procedural knowledge
- 10) In which of the following applications can we use deep learning to solve the problem?  
a) Protein structure prediction                      b) Prediction of chemical reactions  
c) Detection of exotic particles                      d) All of the above
- 11) CNN is mostly used when there is an?  
a) structured data                      b) unstructured data  
c) Both A and B                      d) None of the above
- 12) What are the difficulties in NLU?  
a) Lexical ambiguity                      b) Syntax Level ambiguity  
c) Referential ambiguity                      d) All of the Above
- 13) Which of the following is not the functionality of the Robot?  
a) Reprogrammability                      b) Multifunctionality  
c) Efficient Performance                      d) Responsibility
- 14) How many layers Deep learning algorithms are constructed?  
a) 2                      b) 3  
c) 4                      d) 5

------------	----------

**Fourth Y. (B. Tech) (Sem - II) (New) (CBCS) Examination: Oct/Nov-2022**  
**ELECTRONIC & TELECOMMUNICATION ENGINEERING**  
**Artificial Intelligence and Applications**

Day & Date: Monday, 20-02-2023  
Time: 02:00 PM To 05:00 PM

Max. Marks: 56

**Instructions:** 1) All questions are compulsory.  
2) Figures to the right indicates full marks

**Section – I**

- Q.2 Solve any THREE.** **12**
- a) Discuss Problems and Approaches of AI.
  - b) What is Intelligent Agent? Explain any one of the Intelligent Agents?
  - c) Explain Heuristic Search Techniques.
  - d) Explain Event and Situation Calculus.
- Q.3 Solve any TWO.** **16**
- a) What is minimax Algorithm? How Alpha Beta Pruning overcomes the drawbacks of Minimax?
  - b) Explain in details about Knowledge Representations and Reasoning with examples.
  - c) Explain First Order Logic and Description Logic.

**Section – II**

- Q.4 Solve any THREE.** **12**
- a) What is NL and Why NL?
  - b) Explain Industrial Manipulators.
  - c) Explain Probabilistic Language Models.
  - d) What is Machine Making Intelligent?
- Q.5 Solve any TWO.** **16**
- a) What is Deep learning Network and explain CNN in detail?
  - b) Explain applications of Deep Learning in computer Vision.
  - c) Explain use of Robots and Space Robotics with AI approach.

<b>Seat No.</b>	
-----------------	--

Day & Date: Monday, 20-02-2023  
Time: 02:00 PM To 05:00 PM

**Instructions:** 1) Q. No. 1 is compulsory. It should be solved in the first 30 minutes in answer book. Page no 03 (Starting page of the Answer Book). Each question carries one mark.  
2) Don't forget to Mention question paper set (P/Q/R/S) on top of page.  
3) Figures to the right indicates full marks.

Marks: 14

14

- Page 4 of 12

- 9) If a robot is able to change its own trajectory as per the external conditions, then the robot is considered as the \_\_\_\_\_.  
a) Mobile                                      b) Non-Servo  
c) Open Loop                                  d) Intelligent
- 10) Which algorithm is used in the Game tree to make decisions of Win/Lose?  
a) Heuristic Search Algorithm            b) DFS/BFS algorithm  
c) Greedy Search Algorithm               d) Min/Max algorithm
- 11) The search algorithm which is similar to the minimax search, but removes the branches that don't affect the final output is known as \_\_\_\_\_.  
a) Depth-first search                        b) Breadth-first search  
c) Alpha-beta pruning                       d) None of the above
- 12) Among the given options, which search algorithm requires less memory?  
a) Optimal Search                            b) Depth First Search  
c) Breadth-First Search                    d) Linear Search
- 13) Which term describes the common-sense of the judgmental part of problem-solving?  
a) Values-based                                b) Critical  
c) Analytical                                    d) Heuristic
- 14) Which search is implemented with an empty first in first out Queue?  
a) Depth First search                        b) Breadth first search  
c) Bidirectional search                     d) None of the above

Max. Marks: 70

- Instructions:** 1) Q. No. 1 is compulsory. It should be solved in the first 30 minutes in answer book. Page no 03 (Starting page of the Answer Book). Each question carries one mark.  
 2) Don't forget to Mention question paper set (P/Q/R/S) on top of page.  
 3) Figures to the right indicates full marks.

**MCQ/Objective Type Questions**

Duration: 30 Minutes

Marks: 14

**Q.1 Choose the correct alternatives from the options.**

**14**

- 1) CNN is mostly used when there is an?
  - a) structured data
  - b) unstructured data
  - c) Both A and B
  - d) None of the above
- 2) What are the difficulties in NLU?
  - a) Lexical ambiguity
  - b) Syntax Level ambiguity
  - c) Referential ambiguity
  - d) All of the Above
- 3) Which of the following is not the functionality of the Robot?
  - a) Reprogramability
  - b) Multifunctionality
  - c) Efficient Performance
  - d) Responsibility
- 4) How many layers Deep learning algorithms are constructed?
  - a) 2
  - b) 3
  - c) 4
  - d) 5
- 5) Artificial Intelligence is about \_\_\_\_\_.
  - a) Playing a game on Computer
  - b) Making a machine Intelligent
  - c) Programming on Machine with your Own Intelligence
  - d) Putting your intelligence in Machine
- 6) If a robot is able to change its own trajectory as per the external conditions, then the robot is considered as the \_\_\_\_\_.
  - a) Mobile
  - b) Non-Servo
  - c) Open Loop
  - d) Intelligent
- 7) Which algorithm is used in the Game tree to make decisions of Win/Lose?
  - a) Heuristic Search Algorithm
  - b) DFS/BFS algorithm
  - c) Greedy Search Algorithm
  - d) Min/Max algorithm
- 8) The search algorithm which is similar to the minimax search, but removes the branches that don't affect the final output is known as \_\_\_\_\_.
  - a) Depth-first search
  - b) Breadth-first search
  - c) Alpha-beta pruning
  - d) None of the above

- 9) Among the given options, which search algorithm requires less memory?

Time: 02:00 PM To 05:00 PM

Max. Marks: 70

**Instructions:** 1) Q. No. 1 is compulsory. It should be solved in the first 30 minutes in answer book. Page no 03 (Starting page of the Answer Book). Each question carries one mark.  
2) Don't forget to Mention question paper set (P/Q/R/S) on top of page.  
3) Figures to the right indicates full marks.

Duration: 30 Minutes

Marks: 14

**Q.1 Choose the correct alternatives from the options.**

14

- 1) In Big Data environments, Veracity makes sure that the data is \_\_\_\_\_.  
a) Accurate                                      b) Inconsistence  
c) Variant                                        d) None of the mentioned
- 2) The Big Data architecture is designed in such a way so that it can handle \_\_\_\_\_.  
a) Data ingestion                                  b) Data processing  
c) Data analysis                                  d) All
- 3) Diagnostic analytics answers the question.  
a) What happened?  
b) What is the best course of action?  
c) What is likely to happen?  
d) Why did it happen?
- 4) The type of a Nominal attribute depends on which of the following properties:  
a) Distinctness & order                          b) Order  
c) Distinctness                                    d) None
- 5) \_\_\_\_\_ is the graphical representation of data where data is grouped into continuous number ranges and each range corresponds to a vertical bar.  
a) Line Chart                                      b) Bar Chart  
c) Histogram                                      d) Pie Chart
- 6) Which of the following is true about outliers?  
a) Data points that deviate a lot from normal observations  
b) Can reduce the accuracy of the model  
c) Both a and b  
d) None
- 7) Which of the following(s) is/are features scaling techniques?  
a) Standardization                                b) Min-Max Scaling  
c) Both a & b                                      d) None
- 8) R files has an extension \_\_\_\_\_.  
a) .R     b) .S  
c) .Rp    d) .c

**Fourth Y. (B.Tech) (Sem – II) (New) (CBCS) Examination: Oct/Nov -2022**  
**ELECTRONIC AND TELECOMMUNICATION ENGINEERING**  
**Data Analytics**

Day & Date: Wednesday, 22-02-2023  
 Time: 02:00 PM To 05:00 PM

Max. Marks: 56

**Instructions:** 1) All questions are compulsory  
 2) Figures to the right indicates full marks.

**Section – I**

**Q.2 Solve any FOUR of the following:** **16**

- a) Explain the types of data analytics.
- b) Describe the Descriptive Qualitative & Quantitative scale types in details.
- c) Find the mean absolute deviation (MAD) and standard deviation of the following data set:  
3, 5, 6, 8, 11, 14, 17, and 24.
- d) What are the different kinds of problems in data quality? Explain any two with an example.
- e) Write a short note on Univariate Location and Dispersion statistics.

**Q.3 Solve any TWO of the following:** **12**

- a) Draw and explain the CRISP-DM Process.
- b) Consider a data set of the following numbers: 23, 13, 37, 16, 26, 35, 26, and 35. Calculate Mean, 1st Quartile, 2nd Quartile (Median) and 3rd Quartile. Also plot it graphically.
- c) Describe three Univariate Data Visualization charts with an example.

**Section – II**

**Q.4 Solve any FOUR of the following:** **16**

- a) Explain the features of R Programming.
- b) Write an R program to create a data frame having elements student\_name, student\_id, city\_name.
- c) Explain the differences between BI and Data Science.
- d) What are the challenges to big data visualization?
- e)

**Q.5 Solve any TWO of the following:** **12**

- a) Explain the data types in R.
- b) Write a short note on: Vectors, Arrays and Lists in R.
- c) Describe the challenges of the current analytical architecture for data scientists.

**MCQ/Objective Type Questions**

Duration: 30 Minutes

Marks: 14

**Q.1 Choose the correct alternatives from the options.**

**14**

- 1) Which of the following is true about outliers?
  - a) Data points that deviate a lot from normal observations
  - b) Can reduce the accuracy of the model
  - c) Both a and b
  - d) None
- 2) Which of the following(s) is/are features scaling techniques?
  - a) Standardization
  - b) Min-Max Scaling
  - c) Both a & b
  - d) None
- 3) R files has an extension \_\_\_\_\_.
  - a) .R
  - b) .S
  - c) .Rp
  - d) .c
- 4) In the expression `x <- 4L` in R, what is the class of 'x' as determined by the 'class()' function?
  - a) Complex
  - b) Numeric
  - c) Integer
  - d) Word
- 5) What will be the output of the following R function?  

```
ab <- list(1, 2, 3, "X", "Y", "Z")
dim(ab) <- c(3,2)
print(ab)
```

  - a) 1 "X"  
2 "Y"  
3 "Z"
  - b) 1 "X"  
2 "Y"  
3 "Y"
  - c) 1 "W"  
2 "Y"  
3 "Z"
  - d) Error
- 6) Data that has no inherent structure, which may include text documents, PDFs, images, and video known as \_\_\_\_\_.
  - a) Structured data
  - b) Semi-structured data
  - c) Unstructured data
  - d) Quasi-structured data

- 7) Data scientists are generally thought of as having sets of skills and behavioral characteristics: \_\_\_\_\_.  
a) Quantitative skill                      b) Technical aptitude  
c) Communicative & collaborative      d) All of the mentioned
- 8) Which one of the following is not a problem for big data visualization?  
a) Visual noise                              b) Large image perception  
c) Low rate of image                      d) None of these
- 9) \_\_\_\_\_ used to plot individual data elements across many dimensions.  
a) Tree map                                  b) Cone tree  
c) Parallel coordinates                  d) Venn Diagram
- 10) In Big Data environments, Veracity makes sure that the data is \_\_\_\_\_.  
a) Accurate                                  b) Inconsistence  
c) Variant                                    d) None of the mentioned
- 11) The Big Data architecture is designed in such a way so that it can handle \_\_\_\_\_.  
a) Data ingestion                          b) Data processing  
c) Data analysis                          d) All
- 12) Diagnostic analytics answers the question.  
a) What happened?  
b) What is the best course of action?  
c) What is likely to happen?  
d) Why did it happen?
- 13) The type of a Nominal attribute depends on which of the following properties:  
a) Distinctness & order                  b) Order  
c) Distinctness                              d) None
- 14) \_\_\_\_\_ is the graphical representation of data where data is grouped into continuous number ranges and each range corresponds to a vertical bar.  
a) Line Chart                                  b) Bar Chart

 2) Don't forget to Mention question paper set (P/Q/R/S) on top of page.

**MCQ/Objective Type Questions**

Duration: 30 Minutes

Marks:14

**Q.1 Choose the correct alternatives from the given options.**

**14**

- 1) Analysis which determines the meaning of a statement once its grammatical structure becomes known is termed as
  - a) Semantic analysis
  - b) Syntax analysis
  - c) Regular analysis
  - d) General analysis
- 2) Issues in lexical analysis.
  - a) Code optimization
  - b) Compiler portability and efficiency
  - c) Both
  - d) None
- 3) "less than 3" is
  - a) Literal token
  - b) Num token
  - c) Relation token
  - d) None
- 4) A parser which is a variant of top-down parsing without backtracking
  - a) Recursive Descend
  - b) Operator Precedence
  - c) LL (1) parser
  - d) LALR Parser
- 5) An assembler is
  - a) programming language dependent
  - b) syntax dependant
  - c) machine dependant
  - d) data dependant
- 6) The translator which perform macro expansion is called a
  - a) Macro processor
  - b) Macro pre-processor
  - c) Micro pre-processor
  - d) Assembler
- 7) Load address for the first word of the program is called
  - a) Linker address origin
  - b) Load address origin
  - c) Phase library
  - d) Absolute library
- 8) Which of the following statement is true
  - a) SLR parser is more powerful than LALR
  - b) LALR parser is more powerful than canonical LR parser
  - c) canonical LR parser is more powerful than LALR parser
  - d) parser SLR, canonical CR and LALR have the same power

- 9) Which of the following is used for grouping of characteristics into tokens
- a) Parser
  - b) Code optimization
  - c) Code generator
  - d) Lexical analyzer
- 10) Pee hole optimization is a form of
- a) Loop optimization
  - b) Local optimization
  - c) Constant folding
  - d) None of these
- 11) Loading come in picture at
- a) Compile time
  - b) Translation time
  - c) Execution
  - d) None
- 12) In rightmost derivation the rightmost \_\_\_\_\_ is replaced at each step.
- a) Terminal
  - b) Non-terminal
  - c) Both
  - d) None
- 13) In rightmost derivation the rightmost \_\_\_\_\_ is replaced at each step.
- a) Terminal
  - b) Non-terminal
  - c) Both
  - d) None
- 14) A linker program
- a) places the program in the memory for the purpose of execution
  - b) relocates the program to execute from the specific memory area
  - c) links the program with other programs needed for its execution
  - d) interfaces the program with the entities generating its input data

**Q.1 Choose the correct alternatives from the given options.**

**14**

- 1) Loading come in picture at
  - a) Compile time
  - b) Translation time
  - c) Execution
  - d) None
- 2) In rightmost derivation the rightmost \_\_\_\_\_ is replaced at each step.
  - a) Terminal
  - b) Non-terminal
  - c) Both
  - d) None
- 3) In rightmost derivation the rightmost \_\_\_\_\_ is replaced at each step.
  - a) Terminal
  - b) Non-terminal
  - c) Both
  - d) None
- 4) A linker program
  - a) places the program in the memory for the purpose of execution
  - b) relocates the program to execute from the specific memory area
  - c) links the program with other programs needed for its execution
  - d) interfaces the program with the entities generating its input data
- 5) Analysis which determines the meaning of a statement once its grammatical structure becomes known is termed as
  - a) Semantic analysis
  - b) Syntax analysis
  - c) Regular analysis
  - d) General analysis
- 6) Issues in lexical analysis.
  - a) Code optimization
  - b) Compiler portability and efficiency
  - c) Both
  - d) None
- 7) "less than 3" is
  - a) Literal token
  - b) Num token
  - c) Relation token
  - d) None
- 8) A parser which is a variant of top-down parsing without backtracking
  - a) Recursive Descend
  - b) Operator Precedence
  - c) LL (1) parser
  - d) LALR Parser

- 9) An assembler is
- a) programming language dependent
  - b) syntax dependant
  - c) machine dependant
  - d) data dependant
- 10) The translator which perform macro expansion is called a
- a) Macro processor
  - b) Macro pre-processor
  - c) Micro pre-processor
  - d) Assembler
- 11) Load address for the first word of the program is called
- a) Linker address origin
  - b) Load address origin
  - c) Phase library
  - d) Absolute library
- 12) Which of the following statement is true
- a) SLR parser is more powerful than LALR
  - b) LALR parser is more powerful than canonical LR parser
  - c) canonical LR parser is more powerful than LALR parser
  - d) parser SLR, canonical CR and LALR have the same power
- 13) Which of the following is used for grouping of characteristics into tokens
- a) Parser
  - b) Code optimization
  - c) Code generator
  - d) Lexical analyzer
- 14) Pee hole optimization is a form of
- a) Loop optimization
  - b) Local optimization
  - c) Constant folding
  - d) None of these

**Set R**

**T.Y. (B.Tech.) (Sem - I) (New) (CBCS) Examination: Oct/Nov-2022**  
**INFORMATION TECHNOLOGY**  
**System Software**

Day & Date: Wednesday 25-01-2023  
Time: 10:00 AM To 01:00 PM

Max. Marks: 56

**Instructions:** 1) All questions are compulsory.  
2) Figures to the right indicate full marks.

**Section – I**

- Q.2 Answer the following. (Any Three) 12**
- a) What are the language processor tools?
  - b) Discuss different parameter passing methods in MACRO.
  - c) Explain START, END, ORIGIN, EQU, LTORG with example.
  - d) What are token and symbol concepts in language processor?
- Q.3 Answer the following. (Any Two) 16**
- a) Explain Different ways of parsing.
  - b) Explain design of macro processor.
  - c) Write pass I process of two pass assembler with its data structure and files.

**Section – II**

- Q.4 Answer the following. (Any Three) 12**
- a) What are sources of optimization?
  - b) Compare 3 code optimization techniques.
  - c) Explain code generation from Dags and the dynamic code generation algorithm.
  - d) With example explain different files in linkers.
- Q.5 Answer the following (Any Two) 16**
- a) Explain in detail Subroutine linkages in loader.
  - b) Explain self relocating program.
  - c) With example explain linking for overlays

Day & Date: Tuesday, 31-01-2023  
 Time: 10:00 AM To 01:00 PM

Max. Marks: 70

- Instructions:** 1) Q. No. 1 is compulsory and should be solved in first 30 minutes in Answer Book. Page No.3 (starting page of the Answer Book). Each question carry one mark.  
 2) Don't forget to mention Question Paper Set (P/Q/R/S) at the top of the same page.

**MCQ/Objective Type Questions**

Duration: 30 Minutes

Marks: 14

**Q.1 Choose the correct alternatives from the options.**

**14**

- 1) What is the main function of the command interpreter?
  - a) to handle the files in operating system
  - b) to provide the interface between the API and application program
  - c) to get and execute the next user-specified command
  - d) none of these
- 2) The systems which allow only one process execution at a time, are called \_\_\_\_\_.
  - a) Uniprogramming systems
  - b) Unitasking systems
  - c) Uniprocessing systems
  - d) none of these
- 3) A process stack does not contain \_\_\_\_\_.
  - a) Function parameters
  - b) Local variables
  - c) PID of child process
  - d) Return addresses
- 4) The state of a process is defined by the \_\_\_\_\_.
  - a) current activity of the process
  - b) activity just executed by the process
  - c) activity to next be executed by the process
  - d) final activity of the process
- 5) A semaphore is a shared integer variable that can not \_\_\_\_\_.
  - a) be more than one
  - b) be more than zero
  - c) drop below one
  - d) drop below zero
- 6) Process synchronization can be done on \_\_\_\_\_.
  - a) hardware level
  - b) software level
  - c) both a & b
  - d) none of these
- 7) Which module gives control of the CPU to the process selected by the short term scheduler?
  - a) interrupt
  - b) dispatcher
  - c) scheduler
  - d) none of these

- 8) A process is selected from the \_\_\_\_\_ queue by the \_\_\_\_\_ scheduler, to be executed
- a) ready, short term
  - b) wait, long term
  - c) blocked, short term
  - d) ready, long term
- 9) Semaphores are mostly used to implement \_\_\_\_\_.
- a) System calls
  - b) System protection
  - c) IPC mechanisms
  - d) None of these
- 10) An edge from process  $P_i$  to  $P_j$  in a wait for graph indicates that \_\_\_\_\_.
- a)  $P_j$  is waiting for  $P_i$  to leave the system
  - b)  $P_j$  is waiting for  $P_i$  to release a resource that  $P_j$  needs
  - c)  $P_i$  is waiting for  $P_j$  to leave the system
  - d)  $P_i$  is waiting for  $P_j$  to release a resource that  $P_i$  needs
- 11) Memory management technique in which system stores and retrieves data from secondary storage for use in main memory is called?
- a) paging
  - b) fragmentation
  - c) mapping
  - d) none of these
- 12) The operating system maintains a \_\_\_\_\_ table that keeps track of how many frames have been allocated, how many are there, and how many are available.
- a) page
  - b) mapping
  - c) memory
  - d) frame
- 13) The interrupt vector contains the \_\_\_\_\_.
- a) Interrupts
  - b) device addresses
  - c) identifiers of interrupts
  - d) memory addresses of specialized interrupt handlers
- 14) In paging the user provides only \_\_\_\_\_ which is partitioned by the hardware into \_\_\_\_\_ and \_\_\_\_\_.
- a) one address, page number, offset
  - b) one offset, page number, address
  - c) page number, offset, address
  - d) none of these

**Operating Systems**

Day & Date: Tuesday, 31-01-2023  
 Time: 10:00 AM To 01:00 PM

Max. Marks: 56

- Instructions:** 1) Both Sections are compulsory.  
 2) Figures to the right indicate full marks.  
 3) Assume suitable data if necessary.  
 4) Figure must be draw wherever necessary.

**Section – I**

- Q.2 Attempt any three.** **12**
- Illustrate the multi-programmed Batch System and time sharing system?
  - Extend the following w.r.t. to process.
    - Process states
    - Process control block
  - Explain in detail the Inter-Process communication?
  - Identify with example dining philosopher's solution using semaphore?
- Q.3 Attempt any one** **08**
- Examine with example the Critical-Section Problem with Peterson's Solution.
- OR**
- Illustrate the Multilevel Queue Scheduling and Multilevel Feedback Queue Scheduling with example.
- Q.4 Write short note on. (Any two)** **08**
- The Reader-writers problem
  - Threads
  - Operations on processes

**Section – II**

- Q.5 Attempt any three.** **12**
- Extend with example the single and multiple instance resource type.
  - What is thrashing? Explain with example.
  - State and explain the necessary conditions for preventing the deadlock.
  - Explain with figure interrupt driven I/O cycle.
- Q.6 Attempt any one** **08**
- Examine the need for page replacement with FIFO, Optimal and LRU page replacement algorithms.
- OR**
- Explain the following w.r.t. memory management.
    - Basic hardware
    - Address binding
    - Logical vs physical address space

- Q.7 Attempt the following. (Any Two).**
- a)** Unix commands ls, cat and cp
  - b)** Resource allocation graph
  - c)** Segmentation

| <b>Seat No.</b> |  |
|-----------------|--|

- 8) The interrupt vector contains the \_\_\_\_\_.  
a) Interrupts  
b) device addresses  
c) identifiers of interrupts  
d) memory addresses of specialized interrupt handlers
- 9) In paging the user provides only \_\_\_\_\_ which is partitioned by the hardware into \_\_\_\_\_ and \_\_\_\_\_.  
a) one address, page number, offset  
b) one offset, page number, address  
c) page number, offset, address  
d) none of these
- 10) What is the main function of the command interpreter?  
a) to handle the files in operating system  
b) to provide the interface between the API and application program  
c) to get and execute the next user-specified command  
d) none of these
- 11) The systems which allow only one process execution at a time, are called \_\_\_\_\_.  
a) Uniprogramming systems      b) Unitasking systems  
c) Uniprocessing systems      d) none of these
- 12) A process stack does not contain \_\_\_\_\_.  
a) Function parameters      b) Local variables  
c) PID of child process      d) Return addresses
- 13) The state of a process is defined by the \_\_\_\_\_.  
a) current activity of the process  
b) activity just executed by the process  
c) activity to next be executed by the process  
d) final activity of the process
- 14) A semaphore is a shared integer variable that can not \_\_\_\_\_.  
a) be more than one      b) be more than zero  
c) drop below one      d) drop below zero

**T.Y (B.Tech.) (Sem- I) (New) (CBCS) Examination: Oct/Nov-2022**  
**INFORMATION TECHNOLOGY**  
**Operating Systems**

Day & Date: Tuesday, 31-01-2023  
 Time: 10:00 AM To 01:00 PM

Max. Marks: 56

- Instructions:** 1) Both Sections are compulsory.  
 2) Figures to the right indicate full marks.  
 3) Assume suitable data if necessary.  
 4) Figure must be draw wherever necessary.

**Section – I**

- Q.2 Attempt any three.** **12**
- Illustrate the multi-programmed Batch System and time sharing system?
  - Extend the following w.r.t. to process.
    - Process states
    - Process control block
  - Explain in detail the Inter-Process communication?
  - Identify with example dining philosopher's solution using semaphore?
- Q.3 Attempt any one** **08**
- Examine with example the Critical-Section Problem with Peterson's Solution.
- OR**
- Illustrate the Multilevel Queue Scheduling and Multilevel Feedback Queue Scheduling with example.
- Q.4 Write short note on. (Any two)** **08**
- The Reader-writers problem
  - Threads
  - Operations on processes

**Section – II**

- Q.5 Attempt any three.** **12**
- Extend with example the single and multiple instance resource type.
  - What is thrashing? Explain with example.
  - State and explain the necessary conditions for preventing the deadlock.
  - Explain with figure interrupt driven I/O cycle.
- Q.6 Attempt any one** **08**
- Examine the need for page replacement with FIFO, Optimal and LRU page replacement algorithms.
- OR**
- Explain the following w.r.t. memory management.
    - Basic hardware
    - Address binding
    - Logical vs physical address space

**Q.7 Attempt the following. (Any Two).**

- a)** Unix commands ls, cat and cp
- b)** Resource allocation graph
- c)** Segmentation

|                 |  |
|-----------------|--|
| <b>Seat No.</b> |  |
|-----------------|--|

Day & Date: Friday, 24-02-2023  
Time: 10:00 AM To 01:00 PM

**Instructions:** 1) Q. No. 1 is compulsory and should be solved in first 30 minutes in Answer Book. Page No.3 (starting page of the Answer Book). Each question carry one mark.  
2) Don't forget to mention Question Paper Set (P/Q/R/S) at the top of the same page.

Marks: 14

14

- 1) A functional dependency is a relationship between or among \_\_\_\_\_.  
a) Attributes                                      b) Tables  
c) Entities                                         d) Rows
- 2) Which of the following statement is TRUE regarding CREATE TABLE statement?  
a) CREATE table replaces the existing table if it already exists  
b) Attributes default to NUMBER data type if data type is not provided  
c) Attributes allow NULL values unless NOT NULL clause is provided  
d) DEFAULT clause can only be provided for NOT NULL attributes
- 3) Given the employee table as input, choose the query that displays department wise average salaries sorted in descending order.

| ID | ENAME         | DEPT | SALARY |
|----|---------------|------|--------|
| 1  | James Potter  | FSI  | 75000  |
| 2  | Ethan McCarty | ETA  | 90000  |
| 3  | Emily Rayner  | ETA  | 25000  |
| 4  | Jack Abraham  | ETA  | 30000  |

- `SELECT AVG (Salary) AvgSal, Dept FROM Employee GROUP BY Dept ORDER BY 1;`
- `SELECT AVG(Salary) AvgSal, Dept FROM Employee ORDER BY AVG(Salary) GROUP BY Dept;`
- `SELECT AVG(Salary) as AvgSal, Dept FROM Employee GROUP BY Dept ORDER BY AvgSal DESC;`
- `SELECT Dept, AVG(Salary) AvgSal FROM Employee GROUP BY 1 ORDER BY 2 DESC;`

Which of the following statement is true?

- a) The above schedule is irrecoverable.
- b) The above schedule is recoverable with cascading rollback.
- c) The above schedule is cascadeless recoverable.
- d) It cannot be determined from the given schedule whether cascading roll back is required in case it is recoverable.

**12)** Identify the correct mechanism to ensure the isolation property of a set of transactions.

- a) Recovery manager
- b) Concurrency control system
- c) Security management system
- d) Query optimization techniques

**13)** When a transaction completes the execution of its final statement, it enters \_\_\_\_\_ state.

- a) partially Committed
- b) Committed
- c) Failed
- d) Aborted

**14)** Consider the relation scheme  $R = \{E, F, G, H, I, J, K, L, M, N\}$  and the set of functional dependencies

$\{ \{E, F\} \rightarrow \{G\}, \{F\} \rightarrow \{I, J\}, \{E, H\} \rightarrow \{K, L\}, K \rightarrow \{M\}, L \rightarrow \{N\} \}$  on R.

What is the candidate key for R?

- a)  $\{E, F\}$
- b)  $\{E, F, H\}$
- c)  $\{E, F, H, K, L\}$
- d)  $\{E\}$

**Database Engineering**

Day & Date: Friday, 24-02-2023  
Time: 10:00 AM To 01:00 PM

Max. Marks: 56

**Instructions:** Both Section are compulsory.

**Section – I**

- Q.2 Answer any three questions. 12**
- a) What are constraints? Discuss with respect to Domain Constraints, Referential Integrity, Assertions and Authorization.
  - b) What are aggregate functions? Give examples.
  - c) Define mapping cardinalities. What are the possible mapping cardinalities for a binary relationship? Explain with example.
  - d) Describe types of attributes with example.
- Q.3 What are the different types of SQL joins? Describe Inner Join & Full Outer Join with example. 08**
- Q.4 What is Normalization? Describe 3NF in detail. 08**

**Section – II**

- Q.5 Answer any three questions. 12**
- a) Describe ACID properties of a transaction with example.
  - b) Describe the advantages of concurrent execution of schedules over serial execution.
  - c) Discuss the concept of conflict and view serializability.
  - d) What is lock? Describe the types of locks in concurrency control.
- Q.6 Describe Recoverable Schedules and Cascadeless Schedules in detail. 08**
- Q.7 What is Deadlock? Discuss in detail the different ways of preventing deadlocks and detecting deadlock. 08**

**INFORMATION TECHNOLOGY**  
**Database Engineering**

Day & Date: Friday, 24-02-2023  
 Time: 10:00 AM To 01:00 PM

Max. Marks: 70

- Instructions:** 1) Q. No. 1 is compulsory and should be solved in first 30 minutes in Answer Book. Page No.3 (starting page of the Answer Book). Each question carry one mark.  
 2) Don't forget to mention Question Paper Set (P/Q/R/S) at the top of the same page.

**MCQ/Objective Type Questions**

Duration: 30 Minutes

Marks: 14

**Q.1 Choose the correct alternatives from the options.**

**14**

- 1) In a \_\_\_\_\_ clustering index, the index record contains the search-key value and a pointer to the first data record with that search-key value. The rest of the records with the same search-key value would be stored sequentially after the first record.
  - a) Dense
  - b) Sparse
  - c) Straight
  - d) Continuous
- 2) The assumption that hardware errors and bugs in the software bring the system to a halt, but do not corrupt the nonvolatile storage contents, is known as \_\_\_\_\_.
  - a) Fails-stop assumption
  - b) System crash
  - c) Disk failure
  - d) All of the mentioned
- 3) \_\_\_\_\_ is either all operations of the transaction are reflected properly in the database, or none are.
  - a) Atomicity
  - b) Consistency
  - c) Isolation
  - d) Durability
- 4) Consider the following schedule involving two transactions:

| T1     | T2     |
|--------|--------|
| R(x)   |        |
|        | R(y)   |
| W(x)   |        |
| commit |        |
|        | R(x)   |
|        | commit |

Which of the following statement is true?

- a) The above schedule is irrecoverable.
- b) The above schedule is recoverable with cascading rollback.
- c) The above schedule is cascadeless recoverable.
- d) It cannot be determined from the given schedule whether cascading roll back is required in case it is recoverable.

- 5) Identify the correct mechanism to ensure the isolation property of a set of transactions.
- a) Recovery manager                      b) Concurrency control system  
c) Security management system      d) Query optimization techniques
- 6) When a transaction completes the execution of its final statement, it enters \_\_\_\_\_ state.
- a) partially Committed                      b) Committed  
c) Failed                                          d) Aborted
- 7) Consider the relation scheme  $R = \{E, F, G, H, I, J, K, L, M, N\}$  and the set of functional dependencies  $\{ \{E, F\} \rightarrow \{G\}, \{F\} \rightarrow \{I, J\}, \{E, H\} \rightarrow \{K, L\}, K \rightarrow \{M\}, L \rightarrow \{N\} \}$  on R. What is the candidate key for R?
- a)  $\{E, F\}$                                           b)  $\{E, F, H\}$   
c)  $\{E, F, H, K, L\}$                               d)  $\{E\}$
- 8) A functional dependency is a relationship between or among \_\_\_\_\_.
- a) Attributes                                      b) Tables  
c) Entities                                          d) Rows
- 9) Which of the following statement is TRUE regarding CREATE TABLE statement?
- a) CREATE table replaces the existing table if it already exists  
b) Attributes default to NUMBER data type if data type is not provided  
c) Attributes allow NULL values unless NOT NULL clause is provided  
d) DEFAULT clause can only be provided for NOT NULL attributes
- 10) Given the employee table as input, choose the query that displays department wise average salaries sorted in descending order.

| ID | ENAME         | DEPT | SALARY |
|----|---------------|------|--------|
| 1  | James Potter  | FSI  | 75000  |
| 2  | Ethan McCarty | ETA  | 90000  |
| 3  | Emily Rayner  | ETA  | 25000  |
| 4  | Jack Abraham  | ETA  | 30000  |

- a) SELECT AVG (Salary) AvgSal, Dept FROM Employee GROUP BY Dept ORDER BY 1;  
b) SELECT AVG(Salary) AvgSal, Dept FROM Employee ORDER BY AVG(Salary) GROUP BY Dept;  
c) SELECT AVG(Salary) as AvgSal, Dept FROM Employee GROUP BY Dept ORDER BY AvgSal DESC;  
d) SELECT Dept, AVG(Salary) AvgSal FROM Employee GROUP BY 1 ORDER BY 2 DESC;
- 11) An entity set that does not have sufficient attributes to form a primary key is a \_\_\_\_\_.
- a) Strong entity set                              b) Weak entity set  
c) Simple entity set                              d) Primary entity set
- 12) The relationship between the two tables is created using \_\_\_\_\_.
- a) Candidate Key                                  b) Primary Key  
c) Foreign Key                                      d) Constraint

**13)** Which of the following statement(s) is/are FALSE about order by clause?

- a) Order by can be used with DATE attributes
- b) Order by default sort is ascending order
- c) Where clause can be used after order by clause
- d) All of these

**14)** Consider the following schedule for transactions T1, T2 and T3:

| T1        | T2        | T3        |
|-----------|-----------|-----------|
| Read (X)  |           |           |
|           | Read (Y)  |           |
|           |           | Read (Y)  |
|           | Write (Y) |           |
| Write (X) |           |           |
|           |           | Write (X) |
|           | Read (X)  |           |
|           | Write (X) |           |

Which option is the correct serialization of the above schedule?

- a) T1 → T3 → T2
- b) T2 → T1 → T3
- c) T2 → T3 → T1
- d) T3 → T1 → T2

 2) Don't forget to mention Question Paper Set (P/Q/R/S) at the top of the same page.

**MCQ/Objective Type Questions**

Duration: 30 Minutes

Marks: 14

**Q.1 Choose the correct alternatives from the options.**

**14**

- 1) Consider the following schedule involving two transactions:

| T1     | T2     |
|--------|--------|
| R(x)   |        |
|        | R(y)   |
| W(x)   |        |
| commit |        |
|        | R(x)   |
|        | commit |

Which of the following statement is true?

- The above schedule is irrecoverable.
  - The above schedule is recoverable with cascading rollback.
  - The above schedule is cascadeless recoverable.
  - It cannot be determined from the given schedule whether cascading roll back is required in case it is recoverable.
- 2) Identify the correct mechanism to ensure the isolation property of a set of transactions.
- Recovery manager
  - Concurrency control system
  - Security management system
  - Query optimization techniques
- 3) When a transaction completes the execution of its final statement, it enters \_\_\_\_\_ state.
- partially Committed
  - Committed
  - Failed
  - Aborted
- 4) Consider the relation scheme  $R = \{E, F, G, H, I, J, K, L, M, N\}$  and the set of functional dependencies  $\{ \{E, F\} \rightarrow \{G\}, \{F\} \rightarrow \{I, J\}, \{E, H\} \rightarrow \{K, L\}, K \rightarrow \{M\}, L \rightarrow \{N\} \}$  on R. What is the candidate key for R?
- $\{E, F\}$
  - $\{E, F, H\}$
  - $\{E, F, H, K, L\}$
  - $\{E\}$
- 5) A functional dependency is a relationship between or among \_\_\_\_\_.
- Attributes
  - Tables
  - Entities
  - Rows

- 6) Which of the following statement is TRUE regarding CREATE TABLE statement?
- CREATE table replaces the existing table if it already exists
  - Attributes default to NUMBER data type if data type is not provided
  - Attributes allow NULL values unless NOT NULL clause is provided
  - DEFAULT clause can only be provided for NOT NULL attributes
- 7) Given the employee table as input, choose the query that displays department wise average salaries sorted in descending order.

| ID | ENAME         | DEPT | SALARY |
|----|---------------|------|--------|
| 1  | James Potter  | FSI  | 75000  |
| 2  | Ethan McCarty | ETA  | 90000  |
| 3  | Emily Rayner  | ETA  | 25000  |
| 4  | Jack Abraham  | ETA  | 30000  |

- SELECT AVG (Salary) AvgSal, Dept FROM Employee GROUP BY Dept ORDER BY 1;
  - SELECT AVG(Salary) AvgSal, Dept FROM Employee ORDER BY AVG(Salary) GROUP BY Dept;
  - SELECT AVG(Salary) as AvgSal, Dept FROM Employee GROUP BY Dept ORDER BY AvgSal DESC;
  - SELECT Dept, AVG(Salary) AvgSal FROM Employee GROUP BY 1 ORDER BY 2 DESC;
- 8) An entity set that does not have sufficient attributes to form a primary key is a \_\_\_\_\_.  
  - Strong entity set
  - Weak entity set
  - Simple entity set
  - Primary entity set
- 9) The relationship between the two tables is created using \_\_\_\_\_.  
  - Candidate Key
  - Primary Key
  - Foreign Key
  - Constraint
- 10) Which of the following statement(s) is/are FALSE about order by clause?  
  - Order by can be used with DATE attributes
  - Order by default sort is ascending order
  - Where clause can be used after order by clause
  - All of these
- 11) Consider the following schedule for transactions T1, T2 and T3:

| T1        | T2        | T3        |
|-----------|-----------|-----------|
| Read (X)  |           |           |
|           | Read (Y)  |           |
|           |           | Read (Y)  |
|           | Write (Y) |           |
| Write (X) |           |           |
|           |           | Write (X) |
|           | Read (X)  |           |
|           | Write (X) |           |

Which option is the correct serialization of the above schedule?

- |                                       |                                       |
|---------------------------------------|---------------------------------------|
| a) $T1 \rightarrow T3 \rightarrow T2$ | b) $T2 \rightarrow T1 \rightarrow T3$ |
| c) $T2 \rightarrow T3 \rightarrow T1$ | d) $T3 \rightarrow T1 \rightarrow T2$ |

- 12)** In a \_\_\_\_\_ clustering index, the index record contains the search-key value and a pointer to the first data record with that search-key value. The rest of the records with the same search-key value would be stored sequentially after the first record.

- |             |               |
|-------------|---------------|

|           |           | Write (X) |
|           | Read (X)  |           |
|           | Write (X) |           |

Which option is the correct serialization of the above schedule?

- a) T1 → T3 → T2                      b) T2 → T1 → T3  
 c) T2 → T3 → T1                      d) T3 → T1 → T2
- 3) In a \_\_\_\_\_ clustering index, the index record contains the search-key value and a pointer to the first data record with that search-key value. The rest of the records with the same search-key value would be stored sequentially after the first record.  
 a) Dense                                      b) Sparse  
 c) Straight                                      d) Continuous
- 4) The assumption that hardware errors and bugs in the software bring the system to a halt, but do not corrupt the nonvolatile storage contents, is known as \_\_\_\_\_.  
 a) Fails-stop assumption                      b) System crash  
 c) Disk failure                                      d) All of the mentioned

- 5) \_\_\_\_\_ is either all operations of the transaction are reflected properly in the database, or none are.
- |              |                |
|--------------|----------------|
| a) Atomicity | b) Consistency |
| c) Isolation | d) Durability  |

- 6)** Consider the following schedule involving two transactions:

|        |        |
|--------|--------|
| T1     | T2     |
| R(x)   |        |
|        | R(y)   |
| W(x)   |        |
| commit |        |
|        | R(x)   |
|        | commit |

Which of the following statement is true?

- a) The above schedule is irrecoverable.
  - b) The above schedule is recoverable with cascading rollback.
  - c) The above schedule is cascadeless recoverable.
  - d) It cannot be determined from the given schedule whether cascading roll back is required in case it is recoverable.
- 7) Identify the correct mechanism to ensure the isolation property of a set of transactions.
- a) Recovery manager
  - b) Concurrency control system
  - c) Security management system
  - d) Query optimization techniques
- 8) When a transaction completes the execution of its final statement, it enters \_\_\_\_\_ state.
- a) partially Committed
  - b) Committed
  - c) Failed
  - d) Aborted
- 9) Consider the relation scheme  $R = \{E, F, G, H, I, J, K, L, M, N\}$  and the set of functional dependencies  $\{E, F\} \rightarrow \{G\}, \{F\} \rightarrow \{I, J\}, \{E, H\} \rightarrow \{K, L\}, K \rightarrow \{M\}, L \rightarrow \{N\}$  on R. What is the candidate key for R?
- a)  $\{E, F\}$
  - b)  $\{E, F, H\}$
  - c)  $\{E, F, H, K, L\}$
  - d)  $\{E\}$
- 10) A functional dependency is a relationship between or among \_\_\_\_\_.
- a) Attributes
  - b) Tables
  - c) Entities
  - d) Rows
- 11) Which of the following statement is TRUE regarding CREATE TABLE statement?
- a) CREATE table replaces the existing table if it already exists
  - b) Attributes default to NUMBER data type if data type is not provided
  - c) Attributes allow NULL values unless NOT NULL clause is provided
  - d) DEFAULT clause can only be provided for NOT NULL attributes

12) Given the employee table as input, choose the query that displays department wise average salaries sorted in descending order.

| ID | ENAME         | DEPT | SALARY |
|----|---------------|------|--------|
| 1  | James Potter  | FSI  | 75000  |
| 2  | Ethan McCarty | ETA  | 90000  |
| 3  | Emily Rayner  | ETA  | 25000  |
| 4  | Jack Abraham  | ETA  | 30000  |

- a) SELECT AVG (Salary) AvgSal, Dept FROM Employee GROUP BY Dept ORDER BY 1;
  - b) SELECT AVG(Salary) AvgSal, Dept FROM Employee ORDER BY AVG(Salary) GROUP BY Dept;
  - c) SELECT AVG(Salary) as AvgSal, Dept FROM Employee GROUP BY Dept ORDER BY AvgSal DESC;
  - d) SELECT Dept, AVG(Salary) AvgSal FROM Employee GROUP BY 1 ORDER BY 2 DESC;
- 13)** An entity set that does not have sufficient attributes to form a primary key is a \_\_\_\_\_.
- a) Strong entity set
  - b) Weak entity set
  - c) Simple entity set
  - d) Primary entity set
- 14)** The relationship between the two tables is created using \_\_\_\_\_.
- a) Candidate Key
  - b) Primary Key
  - c) Foreign Key
  - d) Constraint

**T.Y (B.Tech.) (Sem-I) (New) (CBCS) Examination: Oct/Nov-2022**  
**INFORMATION TECHNOLOGY**  
**Database Engineering**

Day & Date: Friday, 24-02-2023  
Time: 10:00 AM To 01:00 PM

Max. Marks: 56

**Instructions:** Both Section are compulsory.

**Section – I**

- Q.2 Answer any three questions. 12**
- a) What are constraints? Discuss with respect to Domain Constraints, Referential Integrity, Assertions and Authorization.
  - b) What are aggregate functions? Give examples.
  - c) Define mapping cardinalities. What are the possible mapping cardinalities for a binary relationship? Explain with example.
  - d) Describe types of attributes with example.
- Q.3 What are the different types of SQL joins? Describe Inner Join & Full Outer Join with example. 08**
- Q.4 What is Normalization? Describe 3NF in detail. 08**

**Section – II**

- Q.5 Answer any three questions. 12**
- a) Describe ACID properties of a transaction with example.
  - b) Describe the advantages of concurrent execution of schedules over serial execution.
  - c) Discuss the concept of conflict and view serializability.
  - d) What is lock? Describe the types of locks in concurrency control.
- Q.6 Describe Recoverable Schedules and Cascadeless Schedules in detail. 08**
- Q.7 What is Deadlock? Discuss in detail the different ways of preventing deadlocks and detecting deadlock. 08**

**Seat  
No.**

Max. Marks: 70

- Instructions:**
- 1) Q. No. 1 is compulsory and should be solved in first 30 minutes in Answer Book. Page No.3 (starting page of the Answer Book). Each question carry one mark.
  - 2) Don't forget to mention Question Paper Set (P/Q/R/S) at the top of the same page.
  - 3) Figures to the right indicates full marks.
  - 4) Assume suitable data wherever needed and mention it clearly.

### MCQ/Objective Type Questions

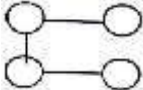

Duration: 30 Minutes

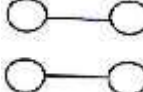

Marks: 14

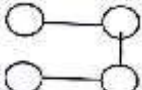

**Q.1 Choose the correct alternatives from the options.**

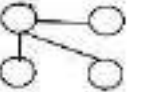

14

- 1)** Asymptotic behaviour of the given function  $f(n) = 4n^2 + 97n + 1000$  is \_\_\_\_\_.
  - a)  $O(2^n)$
  - b)  $O(n \log n)$
  - c)  $O(n)$
  - d)  $O(n^2)$
  
- 2)** Two main measures for the efficiency of an algorithm are \_\_\_\_\_.
  - a) Processor and memory
  - b) Complexity and capacity
  - c) Time and space
  - d) Data and space
  
- 3)** If Deadlines are (2, 2, 3, 3, 3) of 5 jobs, how many maximum jobs can be completed?
  - a) 2
  - b) 3
  - c) 4
  - d) 5
  
- 4)** Kruskal's algorithm is for finding \_\_\_\_\_.
  - a) All pairs shortest path
  - b) Single source shortest path
  - c) Minimum cost spanning tree
  - d) Minimum cost tour
  
- 5)** Which of the following statement shows correct relationship?
  - a)  $O(\log n) < O(n) < o(n \log n) < O(2^n) < O(n^2)$
  - b)  $O(n) < O(\log n) < o(n \log n) < O(n^2) < O(2^n)$
  - c)  $O(n) < O(\log n) < o(n \log n) < O(2^n) < O(n^2)$
  - d)  $O(\log n) < O(n) < o(n \log n) < O(n^2) < O(2^n)$
  
- 6)** Which of the following is not spanning tree for a graph with 4 vertices?
 

a) 

c) 

b) 

d)

**T.Y (B.Tech.) (Sem-I) (New) (CBCS) Examination: Oct/Nov- 2022**  
**INFORMATION TECHNOLOGY**  
**Design and Analysis of Algorithms**

Day & Date: Tuesday, 07-02-2023  
 Time: 10:00 AM To 01:00 PM

Max. Marks: 56

- Instructions:** 1) All questions are compulsory.  
 2) Figures to the right indicate full marks.  
 3) Assume suitable data wherever needed and mention it clearly.

**Section – I**

**Q.2 Attempt any three.**

**12**

- Sort the following array using merge sort.  
100, 200, 50, 90, 150, 50, 20, 80
- Show that following equality is incorrect  
 $10n^2 + 9 = O(n)$
- Find 3<sup>rd</sup> smallest element from the array using divide and conquer.  
310, 285, 179, 652, 351, 423, 8561, 254, 450, 520
- Plot the behavioral graph for  $\log n$ ,  $n$ ,  $n \log n$ ,  $n^2$  for different values of  $n = 0, 1, 2, 3, 4, 5$ .

**Q.3 Attempt any one**

**08**

- Devise an algorithm that inputs three integers and outputs them in increasing order. Find time and space complexity of the algorithm.
- Find step count and time complexity of the following algorithms  
 Algorithm Mult (a, b, c, n)  

```

{
  for i:= 1 to n do
    for j= 1 to n do
      {
        c[i,j] := 0;
        for k= 1 to n do
          c[i,j] := c[i,j] + a[i,j] * b[i,j]
      }
    }
  }

```
  - Algorithm sum(A[],n)  

```

{
  sum = 0;
  for i = 1 to n step 2
    sum = sum + A[i];
  return sum;
}

```

- Q.4** For the messages with relative frequencies (1,1, 2, 2, 4, 4, 4, 4), obtain Huffman codes and calculate decode time.

**08**

## Section – II

**Q.5 Attempt any three.****12**

- Find possible binary trees for the identifier set  $(a_1, a_2, a_3) = (\text{cout}, \text{for}, \text{if})$ .
- Explain explicit and implicit constraints w.r.t. n-queens problem and Hamilton Cycle.
- Find maximum profit for  $n = 3$ ,  $(w_1, w_2, w_3) = (10, 3, 5)$  and  $(p_1, p_2, p_3) = (40, 20, 30)$  using dynamic programming.
- Explain P, NP, NP-hard and NP-complete problems.

**Q.6 Attempt any one****08**

- State graph coloring problem and write an algorithm for graph coloring. Find how many colors are required to color the following graph.

- let  $w = \{8, 9, 14, 15, 16, 22, 26, 32\}$  and  $m = 53$ . Find all possible subsets of  $w$  that sum to  $m$  using backtracking. Draw portion of tree that is generated.

**MCQ/Objective Type Questions**

Duration: 30 Minutes

Marks: 14

**Q.1 Choose the correct alternatives from the options.**

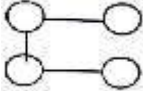

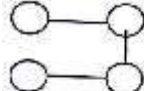

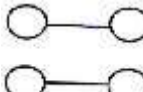

**14**

- 1) Best case complexity for successful search in Binary search is
  - a)  $\theta(1)$
  - b)  $\theta(n \log m)$
  - c)  $\theta(n)$
  - d)  $O(\log n)$
- 2) for  $i = 1$  to  $n-2$   
 $a = a + 1;$   
 How many times for statement will execute?
  - a)  $n-1$
  - b)  $n-2$
  - c)  $n$
  - d)  $n+1$
- 3) In what manner is a state-space tree for a backtracking algorithm constructed?
  - a) Depth-first search
  - b) Breadth-first search
  - c) Twice around the tree
  - d) Nearest neighbour first
- 4) If there are three programs to be stored on tape then how many orderings are possible?
  - a) 1
  - b) 3
  - c) 6
  - d) cannot predict
- 5) What will be the chromatic number for colouring following graph?

- a) 1
  - b) 2
  - c) 3
  - d) 4
- 6) A node which has been generated and all of whose children have not yet been generated is called \_\_\_\_\_.
  - a) Live node
  - b) E-node
  - c) Dead node
  - d) None of these

- 7) Let X be a problem that belongs to the class NP. Then which one of the following is TRUE?
- There is no polynomial time algorithm for X
  - If X can be solved deterministically in polynomial time, then  $P = NP$
  - If X is NP-hard, then it is NP-complete
  - X may be undecidable
- 8) Asymptotic behaviour of the given function  $f(n) = 4n^2 + 97n + 1000$  is \_\_\_\_.
- $O(2^n)$
  - $O(n \log n)$
  - $O(n)$
  - $O(n^2)$
- 9) Two main measures for the efficiency of an algorithm are \_\_\_\_.
- Processor and memory
  - Complexity and capacity
  - Time and space
  - Data and space
- 10) If Deadlines are (2, 2, 3, 3, 3) of 5 jobs, how many maximum jobs can be completed?
- 2
  - 3
  - 4
  - 5
- 11) Kruskal's algorithm is for finding \_\_\_\_.
- All pairs shortest path
  - Single source shortest path
  - Minimum cost spanning tree
  - Minimum cost tour
- 12) Which of the following statement shows correct relationship?
- $O(\log n) < O(n) < o(n \log n) < O(2^n) < O(n^2)$
  - $O(n) < O(\log n) < o(n \log n) < O(n^2) < O(2^n)$
  - $O(n) < O(\log n) < o(n \log n) < O(2^n) < O(n^2)$
  - $O(\log n) < O(n) < o(n \log n) < O(n^2) < O(2^n)$
- 13) Which of the following is not spanning tree for a graph with 4 vertices?
- 
  - 
  - 
  - 
- 14) Recurrence relation of Min Max algorithm using divide & conquer method is \_\_\_\_.
- $T(n/2) + 2$
  - $T(n/2) + 4$
  - $2T(n/2) + 2$
  - $2T(n/2) + 4$

Max. Marks: 70

- Instructions:** 1) Q. No. 1 is compulsory and should be solved in first 30 minutes in Answer Book. Page No.3 (starting page of the Answer Book). Each question carry one mark.  
 2) Don't forget to mention Question Paper Set (P/Q/R/S) at the top of the same page.  
 3) Figures to the right indicates full marks.  
 4) Assume suitable data wherever needed and mention it clearly.

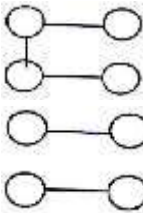

**MCQ/Objective Type Questions**

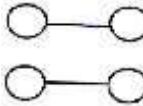

Duration: 30 Minutes

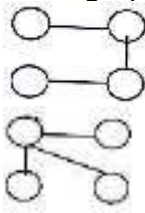

Marks: 14

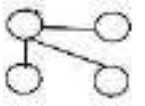

**Q.1 Choose the correct alternatives from the options.**

**14**

- 1) Which of the following is not spanning tree for a graph with 4 vertices?
- a) 

c) 

b) 

d) 
- 2) Recurrence relation of Min Max algorithm using divide & conquer method is \_\_\_\_.
- a)  $T(n/2)+2$

b)  $T(n/2)+4$

c)  $2T(n/2)+2$

d)  $2T(n/2)+4$
- 3) Best case complexity for successful search in Binary search is
- a)  $\theta(1)$

b)  $\theta(n \log n)$

c)  $\theta(n)$

d)  $O(\log n)$
- 4) for  $i = 1$  to  $n-2$   
      $a=a+1$ ;  
 How many times for statement will execute?
- a)  $n-1$

b)  $n-2$

c)  $n$

d)  $n+1$
- 5) In what manner is a state-space tree for a backtracking algorithm constructed?
- a) Depth-first search

b) Breadth-first search

c) Twice around the tree

d) Nearest neighbour first
- 6) If there are three programs to be stored on tape then how many orderings are possible?
- a) 1

b) 3

c) 6

d) cannot predict

A diagram of a square graph with four vertices and four edges. The vertices are arranged in a square, with two vertices on the left and two on the right. The edges connect the top-left vertex to the top-right vertex, the bottom-left vertex to the bottom-right vertex, the top-left vertex to the bottom-left vertex, and the top-right vertex to the bottom-right vertex.

**T.Y (B.Tech.) (Sem-I) (New) (CBCS) Examination: Oct/Nov- 2022**  
**INFORMATION TECHNOLOGY**  
**Design and Analysis of Algorithms**

Day & Date: Tuesday, 07-02-2023  
 Time: 10:00 AM To 01:00 PM

Max. Marks: 56

- Instructions:** 1) All questions are compulsory.  
 2) Figures to the right indicate full marks.  
 3) Assume suitable data wherever needed and mention it clearly.

**Section – I**

**Q.2 Attempt any three.** **12**

- a) Sort the following array using merge sort.  
 100, 200, 50, 90, 150, 50, 20, 80
- b) Show that following equality is incorrect  
 $10n^2 + 9 = O(n)$
- c) Find 3<sup>rd</sup> smallest element from the array using divide and conquer.  
 310, 285, 179, 652, 351, 423, 8561, 254, 450, 520
- d) Plot the behavioral graph for  $\log n$ ,  $n$ ,  $n \log n$ ,  $n^2$  for different values of  $n = 0, 1, 2, 3, 4, 5$ .

**Q.3 Attempt any one** **08**

- a) Devise an algorithm that inputs three integers and outputs them in increasing order. Find time and space complexity of the algorithm.
- b) i) Find step count and time complexity of the following algorithms  
 Algorithm Mult (a, b, c, n)  

```

{
  for i:= 1 to n do
    for j= 1 to n do
      {
        c[i,j] := 0;
        for k= 1 to n do
          c[i,j] := c[i,j] + a[i,j] * b[i,j]
      }
    }
  }

```
- ii) Algorithm sum(A[],n)  

```

{
  sum = 0;
  for i = 1 to n step 2
    sum = sum + A[i];
  return sum;
}

```

**Q.4** For the messages with relative frequencies (1,1, 2, 2, 4, 4, 4, 4), obtain Huffman codes and calculate decode time. **08**

## Section – II

**Q.5 Attempt any three.****12**

- Find possible binary trees for the identifier set  $(a_1, a_2, a_3) = (\text{cout}, \text{for}, \text{if})$ .
- Explain explicit and implicit constraints w.r.t. n-queens problem and Hamilton Cycle.
- Find maximum profit for  $n = 3$ ,  $(w_1, w_2, w_3) = (10, 3, 5)$  and  $(p_1, p_2, p_3) = (40, 20, 30)$  using dynamic programming.
- Explain P, NP, NP-hard and NP-complete problems.

**Q.6 Attempt any one****08**

- State graph coloring problem and write an algorithm for graph coloring. Find how many colors are required to color the following graph.

- let  $w = \{8, 9, 14, 15, 16, 22, 26, 32\}$  and  $m = 53$ . Find all possible subsets of  $w$  that sum to  $m$  using backtracking. Draw portion of tree that is generated.

**Q.7 Find optimal tour in following Graph using dynamic programming.****08**

**MCQ/Objective Type Questions**

Duration: 30 Minutes

Marks: 14

**Q.1 Choose the correct alternatives from the options.**

**14**

- 1) Reinforcement learning is \_\_\_\_\_.  
 a) Unsupervised learning                      b) Supervised learning  
 c) Award based learning                      d) None of the above
- 2) Which of the following is an application of reinforcement learning?  
 a) Topic modeling                                  b) Recommendation system  
 c) Pattern recognition                              d) Image classification
- 3) Upper confidence bound is a \_\_\_\_\_.  
 a) Reinforcement algorithm                      b) Supervised algorithm  
 c) Unsupervised algorithm                      d) None of the above
- 4) Which of the following is true about reinforcement learning?  
 a) The agent gets rewards or penalty according to the action  
 b) It's an online learning  
 c) The target of an agent is to maximize the rewards  
 d) All of the above
- 5) You have a task which is to show relative ads to target users. Which algorithm you should use for this task?  
 a) K means clustering                              b) Naive Bayes  
 c) Support vector machine                      d) Upper confidence bound
- 6) Hidden Markov Model is used in- \_\_\_\_\_.  
 a) Supervised learning                              b) Unsupervised learning  
 c) Reinforcement learning                      d) All of the above
- 7) Reinforcement learning is a \_\_\_\_\_ directed computational approach where a computer learns to perform a task by interacting with an uncertain dynamic environment.  
 a) State                                                  b) Goal  
 c) Space                                                  d) Map

- 8) In Bandit problem we Pull arms sequentially so as to \_\_\_\_\_ the total expected reward.
- |                |             |
|----------------|-------------|
| a) minimize    | b) maximize |
| c) average out | d) select   |
- 9) MAB deal with '\_\_\_\_\_' of the core ideas in RL.
- |                                 |                  |
|---------------------------------|------------------|
| a) exploitation                 | b) exploration   |
| c) exploration and exploitation | d) None of these |
- 10) armed Testbed has 10 \_\_\_\_\_ distributions.
- |                        |                  |
|------------------------|------------------|
| a) Actions             | b) rewards       |
| c) actions and rewards | d) None of these |
- 11) Softmax idea: grade action probs. By \_\_\_\_\_ values.
- |              |            |
|--------------|------------|
| a) Estimated | b) Assumed |
| c) average   | d) bound   |
- 12) Subsequence of interaction between agent environment.
- |              |          |
|--------------|----------|
| a) Episodes: | b) Terms |
| c) States    | d) Steps |
- 13) Greediest action – action with the \_\_\_\_\_ estimated reward.
- |            |                   |
|------------|-------------------|
| a) Lowest  | b) Highest        |
| c) Average | d) Not applicable |

**T.Y (B.Tech.) (Sem - I) (New) (CBCS) Examination: Oct/Nov-2022**  
**INFORMATION TECHNOLOGY**  
**Reinforcement Learning**

Day & Date: Thursday, 16-02-2023  
 Time: 10:00 AM To 01:00 PM

Max. Marks: 56

**Instructions:** 1) All questions are compulsory.  
 2) Figures to the right indicate full marks.

**Section – I**

- Q.2 Attempt any THREE.** **12**
- What are the different kinds of Learning? Show how Reinforcement Learning is different.
  - What is Temporal Difference Learning?
  - What are the basic exploration strategies w.r.t Reinforcement Learning?
  - Explain the use of action- value methods with examples.
- Q.3 Attempt any ONE.** **08**
- With a neat diagram explain the basic elements of a Reinforcement Learning System.
  - Discuss the 10 armed bandit test-bed with associated results.
- Q.4** How can the k-Armed bandit problem be solved by Markov Decision Process? **08**

**Section – II**

- Q.5 Attempt any THREE..** **12**
- How is Dynamic Programming used to solve problems?
  - Compare between Direct and Indirect Reinforcement Learning.
  - Develop a solution to Maze problem using Dyna-Q.
  - What is Thermal soaring? Illustrate how Reinforcement Learning can be used to solve this problem.
- Q.6 Attempt any ONE.** **08**
- How is iterative policy evaluated in Dynamic Programming?
  - With examples Illustrate the efficiency of Dynamic Programming.
- Q.7** Illustrate the working of Sarsa and explain its functionality using a pseudo code. **08**

|                 |  |

| <b>Seat No.</b> |  |
|-----------------|--|

Day & Date: Thursday, 16-02-2023  
Time: 10:00 AM To 01:00 PM

**Instructions:** 1) Q. No. 1 is compulsory. It should be solved in the first 30 minutes in answer book. Page no 03 (Starting page of the Answer Book). Each question carries one mark.  
2) Don't forget to Mention question paper set (P/Q/R/S) on top of page.  
3) Figures to the right indicates full marks.

Marks: 14

## 14

- Which of the measures given here are based on every item of the series (uses all Observations)?
  - Range
  - Standard Deviation
  - Quartile Deviation
  - All of the above
- Find the median of the following data:  
160, 180, 200, 280, 300, 320, 400
  - 140
  - 300
  - 180
  - 280
- A feature F1 can take certain value: A, B, C, D, E, & F and represents grade of students from a college. Which of the following statement is true in following case?
  - Feature F1 is an example of nominal variable.
  - Feature F1 is an example of ordinal variable.
  - It doesn't belong to any of the above category
  - Both of these
- What are the benefits of Data Visualizations?
  - Better Analysis
  - Identifying patterns
  - Exploring Business Insights
  - All of the above
- "The sum of squares of deviations of the values is least" when deviations are taken from \_\_\_\_\_.
  - Median
  - Mode
  - Arithmetic Mean
  - Geometric Mean
- In a week the prices of a bag of rice were 350, 280, 340, 290, 320, 310, 300. The range is \_\_\_\_\_.
  - 60
  - 90
  - 70
  - 100

- 7) Taking mean centring for a given variable is achieved by:
- Taking the mean of all scores (ignoring from which variable they come) and subtracting each score from it.
  - Taking each score and subtracting from it the mean of all scores (for that variable).
  - Taking each score and dividing it by the mean of all scores (for that variable).
  - Taking each score, subtracting the mean and then dividing by the standard deviation.
- 8) The combined effect of two variables on another is known conceptually as \_\_\_\_\_, and in statistical terms as \_\_\_\_\_.
- Mediation, an interaction effect
  - Moderation, a direct effect
  - Moderation, an interaction effect
  - Mediation, a direct effect
- 9) Which of the following quantities does not affect the width of the confidence interval for a population proportion?
- Sample Proportion
  - Population Size
  - Sample size
  - Confidence level
- 10) Which of the following is true about hypothesis testing?
- Hypothesis are statements about the population(s)
  - Results are said to be statistically significant when the p-value is greater than the alpha level.
  - The test statistic is a population parameter
  - None of the above
- 11) What will be printed?
- ```
import numpy as np
a = np.array([1,2,3,5,8])
b = np.array([0,3,4,2,1])
c = a + b
c = c*a
print (c[2])
```
- 7
  - 12
  - 10
  - 21
- 12) A Tabular arrangement for classifying data into different groups is called \_\_\_\_.
- Standard deviation
  - frequency distribution
  - Secondary data
  - Arithmetic Mean
- 13) Which of the following ways to create a MultiIndex (multi-level index)?
- From a list of arrays using MultiIndex.from\_arrays()
  - From an array of tuples using MultiIndex.from\_tuples()
  - From a crossed set of iterables using MultiIndex.from\_product()
  - All of the above
- 14) Amongst which of the following is a correct syntax for panda's dataframe?
- Pandas.DataFrame(data, index, dtype, copy)
  - pandas.DataFrame( data, index, columns, dtype, copy)
  - pandas.DataFrame(data, index, dtype, copy)
  - pandas.DataFrame( data, index, rows, dtype, copy)

**Data Preprocessing & Visualization**

Day & Date: Thursday, 16-02-2023  
Time: 10:00 AM To 01:00 PM

Max. Marks: 56

**Instructions:** 1) All question are compulsory.  
2) Figures to the right indicates full marks.

**Section – I**

- Q.2 Attempt Any FOUR:** **16**
- a) Write a program to create an empty array of 3X4 and full array of 3X3 of INTEGER type?
  - b) What type of plot would you use if you need to demonstrate “relationship” between variables/parameters?
  - c) What is nominal variable and ordinal variable? Explain with examples.
  - d) What are ways of creating 1D, 2D and 3D arrays in NumPy?
  - e) How do you convert Pandas DataFrame to a NumPy array?
- Q.3 a) Define a Range? What are the Applications of Range? Explain the method of How to Find Range with example?** **06**
- b) Find the standard deviation of the average temperatures recorded over a five-day period last winter:** **06**
- 18,22,19,25,12

**Section – II**

- Q.4 Attempt Any FOUR:** **16**
- a) What is Data visualization? What are the advantages of Data Visualization?
  - b) Draw a diagram of Box plot representing multi-variate categorical variables.
  - c) Define a scatter plot? Write syntax of scatter plot and explain its parameter in the syntax.
  - d) Name any 4 libraries in Python used for Data Analysis and Scientific computations?
  - e) How can we visualize more than three dimensions of data in a single chart?
- Q.5 Attempt Any ONE:** **12**
- a) Describe in detail Three-Dimensional Plotting in Matplotlib.
  - b) What is a dynamic technique in data visualization? explain with Example.

Duration: 20 Minutes

Marks:10

**Q.1 Choose the correct alternatives from the given options. 10**

- 1) Microeconomic theory deals with \_\_\_\_\_.
  - a) Economic behavior of individual economic decision-making units
  - b) Economy as whole
  - c) Trade relations
  - d) Economic growth of the society
- 2) In a mixed economy which sector (s) is / are found \_\_\_\_\_.
  - a) Private only
  - b) Public only
  - c) None
  - d) Both (a) public and (b) private
- 3) Who is known as father of economics?
  - a) Adam Smith
  - b) Prof. A. Samuelson
  - c) Alfred Marshall
  - d) J. R. Hicks
- 4) Which of these is an economic activity?
  - a) Father teaching his son at home instead of spending on coaching
  - b) A housewife making food for the family on her own
  - c) A hair dresser doing hair cut designing on payment
  - d) A singer giving a show on his son's wedding anniversary
- 5) Market system means: \_\_\_\_\_.
  - a) Socialism
  - b) Capitalism
  - c) A place where goods are traded
  - d) All of the above
- 6) Micro and Macro are not two independent approaches to economic analysis but they are complementary to each other.
  - a) False
  - b) True
  - c) Partly true
  - d) Partly False
- 7) Variable factor means those factors of production \_\_\_\_\_.
  - a) which can be only changed in the long run
  - b) which can be changed in the short run
  - c) which can be never be changed
  - d) All of the above

- 8)** Which one of the following is not the function of money?
- a) Medium of exchange
  - b) Measure of Happiness
  - c) Standard of deferred payment
  - d) Store of value
- 9)** Which one of the following is the objective of the RBI?
- a) To maintain term deposits of the households
  - b) To ensure price stability
  - c) To arrange loans for the businessmen
  - d) None of the above
- 10)** Which one of the following cost can never become zero?
- |                  |                  |
|------------------|------------------|
| a) Average cost  | b) Fixed cost    |

 Time: 10:00 AM To 12:00 PM

Max. Marks: 50

- Instructions:** 1) Q. No. 1 is compulsory. It should be solved in the first 20 minutes in answer book. Page no 03 (Starting page of the Answer Book). Each question carries one mark.  
 2) Don't forget to Mention question paper set (P/Q/R/S) on top of page.  
 3) Figures to the right indicates full marks

**MCQ/Objective Type Questions**

Duration: 20 Minutes

Marks:10

**Q.1 Choose the correct alternatives from the given options. 10**

- 1) Micro and Macro are not two independent approaches to economic analysis but they are complementary to each other.
  - a) False
  - b) True
  - c) Partly true
  - d) Partly False
- 2) Variable factor means those factors of production \_\_\_\_\_.
  - a) which can be only changed in the long run
  - b) which can be changed in the short run
  - c) which can be never be changed
  - d) All of the above
- 3) Which one of the following is not the function of money?
  - a) Medium of exchange
  - b) Measure of Happiness
  - c) Standard of deferred payment
  - d) Store of value
- 4) Which one of the following is the objective of the RBI?
  - a) To maintain term deposits of the households
  - b) To ensure price stability
  - c) To arrange loans for the businessmen
  - d) None of the above
- 5) Which one of the following cost can never become zero?
  - a) Average cost
  - b) Fixed cost
  - c) Marginal cost
  - d) Variable cost
- 6) Microeconomic theory deals with \_\_\_\_\_.
  - a) Economic behavior of individual economic decision-making units
  - b) Economy as whole
  - c) Trade relations
  - d) Economic growth of the society
- 7) In a mixed economy which sector (s) is / are found \_\_\_\_\_.
  - a) Private only
  - b) Public only
  - c) None
  - d) Both (a) public and (b) private

- 8)** Who is known as father of economics?
- a) Adam Smith
  - b) Prof. A. Samuelson
  - c) Alfred Marshall
  - d) J. R. Hicks
- 9)** Which of these is an economic activity?
- a) Father teaching his son at home instead of spending on coaching
  - b) A housewife making food for the family on her own
  - c) A hair dresser doing hair cut designing on payment
  - d) A singer giving a show on his son's wedding anniversary
- 10)** Market system means: \_\_\_\_\_.
- a) Socialism
  - b) Capitalism
  - c) A place where goods are traded
  - d) All of the above

 3) Figures to the right indicates full marks.

**MCQ/Objective Type Questions**

Duration: 20 Minutes

Marks: 10

**Q.1 Choose the correct alternatives from the options. 10**

- 1) A good way to prevent stress is \_\_\_\_\_.  
 a) Drinking beverages high in caffeine  
 b) Sitting ideal doing nothing  
 c) Overeating  
 d) Taking time out for relaxation
- 2) \_\_\_\_\_ is referred as a stressful event.  
 a) Birthday  
 b) Studying  
 c) Spouse death  
 d) Vacation
- 3) Anxiety can cause the following moods \_\_\_\_\_.  
 a) Irritable  
 b) Nervous  
 c) Anxious  
 d) All of the above
- 4) \_\_\_\_\_ is the confusion about the expectation of the role one occupies.  
 a) Role stagnation  
 b) Role Isolation  
 c) Role erosion  
 d) Role ambiguity
- 5) Stress is \_\_\_\_\_ related to performance.  
 a) Positively  
 b) Negatively  
 c) Proportionately  
 d) None of these
- 6) Which one is not considered as Environmental stressors?  
 a) Weather  
 b) Traffic  
 c) Financial problems  
 d) Substandard housing
- 7) The following are the characteristics of Positive Stress.  
 a) It improves performance  
 b) It feels exciting  
 c) It motivates  
 d) All of the above
- 8) The word Stress is derived from Latin word 'Stringere' which means \_\_\_\_\_.  
 a) Draw tight  
 b) Stimulus  
 c) Force  
 d) Attitude
- 9) Absenteeism, turnover and less productivity are \_\_\_\_\_ symptoms of stress.  
 a) Medical  
 b) Psychological  
 c) Behavioral  
 d) None of these

- 10)** When a task appears overwhelming, it is best to \_\_\_\_\_.  
a) Put it aside till later      b) Drink alcohol to relax  
c) Break it down into smaller task      d) Avoid the task

**Software Engineering**

Day & Date: Tuesday, 14-02-2023  
 Time: 10:00 AM To 01:00 PM

Max. Marks: 70

- Instructions:** 1) Q. No. 1 is compulsory and should be solved in first 30 minutes in Answer Book. Page No.3 (starting page of the Answer Book). Each question carry one mark.  
 2) Don't forget to mention Question Paper Set (P/Q/R/S) at the top of the same page.

**MCQ/Objective Type Questions**

Duration: 30 Minutes

Marks: 14

**Q.1 Choose the correct alternatives from the options .**

**14**

- 1) The software life cycle can be said to consist of a series of phases. The classical model is referred to as the waterfall model. Which phase defined as "The concept is explored and refined, and the client's requirements are elicited?"
  - a) Requirements
  - b) Specification
  - c) Design
  - d) Implementation
- 2) In the maintenance phase the product must be tested against previous test cases. This is known as \_\_\_\_\_ testing.
  - a) Unit
  - b) Integration
  - c) Regression
  - d) Module
- 3) The relationship between a derived class (or subclass) and base class is referred to as \_\_\_\_\_.
  - a) Association
  - b) Inheritance
  - c) Polymorphism
  - d) Instantiation
- 4) What is the essence of software engineering?
  - a) Requirements Definition, Design Representation, Knowledge Capture and Quality factors
  - b) Maintaining Configurations, Organizing Teams, Channeling Creativity and Planning resource Use
  - c) Time/Space Trade-offs, Optimizing Process, Minimizing Communication and Problem decomposition
  - d) Managing Complexity, Managing Personnel Resources, Managing Time and Money and Producing Useful Products
- 5) What are the major activities of the spiral model of software engineering?
  - a) Planning, Risk Analysis, Engineering, Customer Evaluation
  - b) Defining, Prototyping, Testing, Delivery
  - c) Requirements
  - d) Quick Design, Build Prototype, Evaluate Prototype, Refine Prototype
- 6) A process view in software engineering would consider which of the following?
  - a) Product performance
  - b) Staffing
  - c) Functionality
  - d) Reliability

- 7) What do you call, when the elements of a module, all operate on the same data?
- a) Functional cohesion
  - b) Temporal cohesion
  - c) Procedural cohesion
  - d) Communicational cohesion
- 8) A design is said to be a good design if the components are \_\_\_\_\_.  
a) Strongly coupled  
b) Weakly cohesive  
c) Strongly coupled and weakly cohesive  
d) Strongly cohesive and weakly coupled
- 9) In choosing a development life-cycle model, one would consider the \_\_\_\_\_.  
a) Development Group Expertise, Problem Characteristics, User Expectations  
b) Languages, Development Schedule, Competition  
c) System Context, User Population, Platforms  
d) Organizational Structure, User Tasks, Performance Criteria
- 10) Black box testing is also called \_\_\_\_\_.  
a) Specification-based testing- b) Structural testing
- c) Verification
- d) Unit testing

11) Prototyping is appropriate for \_\_\_\_\_.  
a) Data-oriented applications  
b) Applications with emphasis on the user interface  
c) Applications which are highly interactive  
d) All of these

12) What are the factors to be considered when planning a software development effort?  
a) Performance, Problem, Product, Planning  
b) People, Problem, Product, Process  
c) People, Problem, Productivity, Performance  
d) People, Problem, Product, Portability

13) A simple way of looking at the spiral software life-cycle model is as a waterfall model with each phase proceeded by \_\_\_\_\_.  
a) Build-and-fix- b) Freezing
- c) Synchronization
- d) Risk analysis

14) Problems with using Lines of Code to measure the size of a product include(s) \_\_\_\_\_.  
a) The creation of source code is only part of the development effort  
b) The Lines of Code (LOC) will differ between languages and cannot be measured for some languages  
c) The final size (KLOC) can only be determined once the product is delivered  
d) All of the above

Max. Marks: 56

- Instructions:** 1) All questions are compulsory.  
 2) Figures to the right indicate full marks.  
 3) Assume suitable data if necessary.  
 4) Figures must be drawn wherever necessary.

**Section – I**

- Q.2 Attempt any Three** **12**
- What is Software Process? Explain the Characteristics of Software Process.
  - Illustrate in detail the software requirement process.
  - Construct a DFD for ATM payment system also identify the data dictionary of the system.
  - What is the role of Architecture in design? Also explain the component & connector view.
- Q.3 Attempt any One** **08**
- For specification and analysis explain with example DFD & ER diagrams.
  - Illustrate the Object Oriented Design w.r.t. design concepts with example.
- Q.4 Write short note on. (Any Two)** **08**
- Spiral model
  - Functional specification with use cases
  - Coupling and Cohesion

**Section – II**

- Q.5 Attempt any Three** **12**
- Differentiate between black box and white box testing.
  - Explain the project management process & inspection process.
  - Draw and extend the Iterative Project Management Life Cycle.
  - Justify with example Effort estimation, Project Schedule and Staffing.
- Q.6 Attempt any one** **08**
- Explain in detail Quality Concepts, Qualitative quality management planning, and CMM project management process w.r.t. project management.
  - Explain the most common techniques for structuring page table.
- Q.7 Attempt any Two** **08**
- Scrum Methodology
  - Project Monitoring Plan
  - Unit & System Testing

Marks: 14

**Q.1 Choose the correct alternatives from the options . 14**

- 1) A design is said to be a good design if the components are \_\_\_\_\_.
  - a) Strongly coupled
  - b) Weakly cohesive
  - c) Strongly coupled and weakly cohesive
  - d) Strongly cohesive and weakly coupled
- 2) In choosing a development life-cycle model, one would consider the \_\_\_\_\_.
  - a) Development Group Expertise, Problem Characteristics, User Expectations
  - b) Languages, Development Schedule, Competition
  - c) System Context, User Population, Platforms
  - d) Organizational Structure, User Tasks, Performance Criteria
- 3) Black box testing is also called \_\_\_\_\_.
  - a) Specification-based testing
  - b) Structural testing
  - c) Verification
  - d) Unit testing
- 4) Prototyping is appropriate for \_\_\_\_\_.
  - a) Data-oriented applications
  - b) Applications with emphasis on the user interface
  - c) Applications which are highly interactive
  - d) All of these
- 5) What are the factors to be considered when planning a software development effort?
  - a) Performance, Problem, Product, Planning
  - b) People, Problem, Product, Process
  - c) People, Problem, Productivity, Performance
  - d) People, Problem, Product, Portability
- 6) A simple way of looking at the spiral software life-cycle model is as a waterfall model with each phase proceeded by \_\_\_\_\_.
  - a) Build-and-fix
  - b) Freezing
  - c) Synchronization
  - d) Risk analysis

- 7) Problems with using Lines of Code to measure the size of a product include(s) \_\_\_\_\_.  
a) The creation of source code is only part of the development effort  
b) The Lines of Code (LOC) will differ between languages and cannot be measured for some languages  
c) The final size (KLOC) can only be determined once the product is delivered  
d) All of the above
- 8) The software life cycle can be said to consist of a series of phases. The classical model is referred to as the waterfall model. Which phase defined as "The concept is explored and refined, and the client's requirements are elicited?"  
a) Requirements  
b) Specification  
c) Design  
d) Implementation
- 9) In the maintenance phase the product must be tested against previous test cases. This is known as \_\_\_\_\_ testing.  
a) Unit  
b) Integration  
c) Regression  
d) Module
- 10) The relationship between a derived class (or subclass) and base class is referred to as \_\_\_\_\_.  
a) Association  
b) Inheritance  
c) Polymorphism  
d) Instantiation
- 11) What is the essence of software engineering?  
a) Requirements Definition, Design Representation, Knowledge Capture and Quality factors  
b) Maintaining Configurations, Organizing Teams, Channeling Creativity and Planning resource Use  
c) Time/Space Trade-offs, Optimizing Process, Minimizing Communication and Problem decomposition  
d) Managing Complexity, Managing Personnel Resources, Managing Time and Money and Producing Useful Products
- 12) What are the major activities of the spiral model of software engineering?  
a) Planning, Risk Analysis, Engineering, Customer Evaluation  
b) Defining, Prototyping, Testing, Delivery  
c) Requirements  
d) Quick Design, Build Prototype, Evaluate Prototype, Refine Prototype
- 13) A process view in software engineering would consider which of the following?  
a) Product performance  
b) Staffing  
c) Functionality  
d) Reliability
- 14) What do you call, when the elements of a module, all operate on the same data?  
a) Functional cohesion  
b) Temporal cohesion  
c) Procedural cohesion  
d) Communicational cohesion

Set	Q
-----	---

**T. Y. (B.Tech) (Sem – II) (New) (CBCS) Examination: Oct/Nov - 2022**  
**INFORMATION TECHNOLOGY**  
**Software Engineering**

Day & Date: Tuesday, 14-02-2023  
 Time: 10:00 AM To 01:00 PM

Max. Marks: 56

- Instructions:** 1) All questions are compulsory.  
 2) Figures to the right indicate full marks.  
 3) Assume suitable data if necessary.  
 4) Figures must be drawn wherever necessary.

**Section – I**

- Q.2 Attempt any Three** **12**
- What is Software Process? Explain the Characteristics of Software Process.
  - Illustrate in detail the software requirement process.
  - Construct a DFD for ATM payment system also identify the data dictionary of the system.
  - What is the role of Architecture in design? Also explain the component & connector view.
- Q.3 Attempt any One** **08**
- For specification and analysis explain with example DFD & ER diagrams.
  - Illustrate the Object Oriented Design w.r.t. design concepts with example.
- Q.4 Write short note on. (Any Two)** **08**
- Spiral model
  - Functional specification with use cases
  - Coupling and Cohesion

**Section – II**

- Q.5 Attempt any Three** **12**
- Differentiate between black box and white box testing.
  - Explain the project management process & inspection process.
  - Draw and extend the Iterative Project Management Life Cycle.
  - Justify with example Effort estimation, Project Schedule and Staffing.
- Q.6 Attempt any one** **08**
- Explain in detail Quality Concepts, Qualitative quality management planning, and CMM project management process w.r.t. project management.
  - Explain the most common techniques for structuring page table.
- Q.7 Attempt any Two** **08**
- Scrum Methodology
  - Project Monitoring Plan
  - Unit & System Testing

**Q.1 Choose the correct alternatives from the options.**

**14**

- 1) \_\_\_\_\_ is used as a variable in Breadth - First search.
  - a) NODE-LIST
  - b) SUCCESSER-LIST
  - c) CHILD-LIST
  - d) ALL
- 2) A \_\_\_\_\_ is an area of the search space that is higher than surrounding areas and that itself has a slope.
  - a) Ridge
  - b) local maximum
  - c) plateau
  - d) All
- 3) \_\_\_\_\_ Graphs are used in problem reduction.
  - a) NOT
  - b) AND-NOT
  - c) AND-OR
  - d) INVERSE
- 4) \_\_\_\_\_ is the task domain at AI.
  - a) Formal tasks
  - b) Informal tasks
  - c) Objective tasks
  - d) None of these
- 5) \_\_\_\_\_ rules are applied for water-jug problem.
  - a) System
  - b) Production
  - c) Symbolic
  - d) All
- 6) A \_\_\_\_\_ is a technique that improves the efficiency of a search process.
  - a) Production system
  - b) Problem system
  - c) Heuristic
  - d) None of these
- 7) All the moves from the current state and selected the best one as the next state, is called as \_\_\_\_\_.
  - a) Steepest-ascent hill climbing
  - b) Simple hill climbing
  - c) Generate and test
  - d) None of these
- 8) \_\_\_\_\_ is a search procedure that operate in a space of constraint sets.
  - a) Constraint validation
  - b) Constriction verification
  - c) Constraint satisfaction
  - d) None of these
- 9) "V" logical symbol means \_\_\_\_\_.
  - a) there exists
  - b) or
  - c) note
  - d) for all

- 10)** Artificial Intelligences is the study of how to make computers do things which, at the moment \_\_\_\_\_ do better.
- |            |           |
|------------|-----------|
| a) Human   | b) People |
| c) machine | d) all    |
- 11)** \_\_\_\_\_ is one of the Mundane task.

**T. Y. (B. Tech) (Sem - II) (New) (CBCS) Examination: Oct/Nov-2022**  
**INFORMATION TECHNOLOGY ENGINEERING**  
**Artificial Intelligence**

Day & Date: Monday, 20-02-2023  
Time: 10:00 AM To 01:00 PM

Max. Marks: 56

**Instructions:** 1) Figures to the right indicates full marks  
2) All questions are compulsory.

**Section – I**

**Q.2 Attempt any THREE.** **12**

- a) What is AI? What makes a problem a candidate to be solved by AI?
- b) What are Heuristics? How are they used in search?
- c) Give the advantage of using 'Breadth first search' method of search.
- d) What are the related issues in the designing of search programs?
- e) Compare between Breadth first search and Best first search algorithms.

**Q.3 Attempt any TWO.** **08**

- a) Which of the following problems are candidates to be solved by AI? Justify the same.
  - 1) Chess
  - 2) Water Jug
  - 3) Raining in India
- b) State and explain the A\* algorithm.
- c) Compare between beam search and Taboo search algorithms.

**Q.4 Attempt any ONE.** **08**

- a) List the properties of a good Knowledge representation system? Illustrate each property with an example.
- b) What Search algorithms would you use to solve a "Monkey and Banana" problem? Justify your answer.

The problem is stated as - A monkey is in a room. Suspended from the ceiling is a bunch of bananas, beyond the monkey's reach. However, in the room there are also a chair and a stick. The ceiling is just the right height so that a monkey standing on a chair could knock the bananas down with the stick. The monkey knows how to move around, carry other things around, reach for the bananas, and wave a stick in the air. Find the best sequence of actions for the monkey?

**Section – II**

**Q.5 Attempt any FOUR.** **12**

- a) What is a rule-based system? Give its architecture.
- b) Give the semantic network for 'Postmen dress in Khaki'.
- c) What is default reasoning? Illustrate.
- d) Illustrate the terms 'Measures of belief and disbelief'.
- e) State the characteristics that an expert system should possess.

**Q.6 Attempt any TWO.**

- a) What is backward chaining? Illustrate the steps involved.
- b) List the requirements of CD theory? Illustrate each with an example.
- c) Illustrate the working of cut operator in Prolog with an example.

**Q.7 Attempt any ONE.**

- a) What are the components of an expert system? Elaborate on each component.
- b) What is planning? How is it carried out?

**T. Y. (B. Tech) (Sem - II) (New) (CBCS) Examination: Oct/Nov-2022**  
**INFORMATION TECHNOLOGY ENGINEERING**  
**Artificial Intelligence**

Day & Date: Monday, 20-02-2023  
 Time: 10:00 AM To 01:00 PM

Max. Marks: 70

- Instructions:** 1) Q. No. 1 is compulsory. It should be solved in the first 30 minutes in answer book. Page no 03 (Starting page of the Answer Book). Each question carries one mark.  
 2) Don't forget to Mention question paper set (P/Q/R/S) on top of page.  
 3) Figures to the right indicates full marks.

**MCQ/Objective Type Questions**

Duration: 30 Minutes

Marks: 14

**Q.1 Choose the correct alternatives from the options.**

**14**

- 1) \_\_\_\_\_ is one of the Mundane task.
 

a) Perception	b) Games
c) Mathematics	d) Engineering
- 2) AI research is that \_\_\_\_\_ requires knowledge.
 

a) Talent	b) smartness
c) intelligence	d) all
- 3) The first requirement of a good control strategy is that it causes \_\_\_\_\_.
 

a) Speed	b) motion
c) failure	d) None of these
- 4) \_\_\_\_\_ search requires less memory since only the nodes on the current path are stored.
 

a) Breadth-first	b) Heuristic
c) Depth-first	d) None of these
- 5) \_\_\_\_\_ is used as a variable in Breadth - First search.
 

a) NODE-LIST	b) SUCCESSER-LIST
c) CHILD-LIST	d) ALL
- 6) A \_\_\_\_\_ is an area of the search space that is higher than surrounding areas and that itself has a slope.
 

a) Ridge	b) local maximum
c) plateau	d) All
- 7) \_\_\_\_\_ Graphs are used in problem reduction.
 

a) NOT	b) AND-NOT
c) AND-OR	d) INVERSE
- 8) \_\_\_\_\_ is the task domain at AI.
 

a) Formal tasks	b) Informal tasks
c) Objective tasks	d) None of these
- 9) \_\_\_\_\_ rules are applied for water-jug problem.
 

a) System	b) Production
c) Symbolic	d) All

- 10) A \_\_\_\_\_ is a technique that improves the efficiency of a search process.
- a) Production system
  - b) Problem system
  - c) Heuristic
  - d) None of these
- 11) All the moves from the current state and selected the best one as the next state, is called as \_\_\_\_\_.
- a) Steepest-ascent hill climbing
  - b) Simple hill climbing
  - c) Generate and test
  - d) None of these
- 12) \_\_\_\_\_ is a search procedure that operate in a space of constraint sets.
- a) Constraint validation
  - b) Constriction verification
  - c) Constraint satisfaction
  - d) None of these
- 13) "∀" logical symbol means \_\_\_\_\_.
- a) there exists
  - b) or
  - c) not
  - d) for all
- 14) Artificial Intelligences is the study of how to make computers do things which, at the moment \_\_\_\_\_ do better.
- a) Human
  - b) People
  - c) machine
  - d) all

<b>Seat No.</b>

<b>Set</b>	<b>R</b>
------------	----------

**T. Y. (B. Tech) (Sem - II) (New) (CBCS) Examination: Oct/Nov-2022**  
**INFORMATION TECHNOLOGY ENGINEERING**  
**Artificial Intelligence**

Day & Date: Monday, 20-02-2023  
 Time: 10:00 AM To 01:00 PM

Max. Marks: 56

**Instructions:** 1) Figures to the right indicates full marks  
 2) All questions are compulsory.

**Section – I**

**Q.2 Attempt any THREE.** **12**

- a) What is AI? What makes a problem a candidate to be solved by AI?
- b) What are Heuristics? How are they used in search?
- c) Give the advantage of using 'Breadth first search' method of search.
- d) What are the related issues in the designing of search programs?
- e) Compare between Breadth first search and Best first search algorithms.

**Q.3 Attempt any TWO.** **08**

- a) Which of the following problems are candidates to be solved by AI? Justify the same.
  - 1) Chess
  - 2) Water Jug
  - 3) Raining in India
- b) State and explain the A\* algorithm.
- c) Compare between beam search and Taboo search algorithms.

**Q.4 Attempt any ONE.** **08**

- a) List the properties of a good Knowledge representation system? Illustrate each property with an example.
- b) What Search algorithms would you use to solve a "Monkey and Banana" problem? Justify your answer.  
 The problem is stated as - A monkey is in a room. Suspended from the ceiling is a bunch of bananas, beyond the monkey's reach. However, in the room there are also a chair and a stick. The ceiling is just the right height so that a monkey standing on a chair could knock the bananas down with the stick. The monkey knows how to move around, carry other things around, reach for the bananas, and wave a stick in the air. Find the best sequence of actions for the monkey?

**Section – II**

**Q.5 Attempt any FOUR.** **12**

- a) What is a rule-based system? Give its architecture.
- b) Give the semantic network for 'Postmen dress in Khaki'.
- c) What is default reasoning? Illustrate.
- d) Illustrate the terms 'Measures of belief and disbelief'.
- e) State the characteristics that an expert system should possess.

**Q.6 Attempt any TWO.**

- a) What is backward chaining? Illustrate the steps involved.
- b) List the requirements of CD theory? Illustrate each with an example.
- c) Illustrate the working of cut operator in Prolog with an example.

**Q.7 Attempt any ONE.**

- a) What are the components of an expert system? Elaborate on each component.
- b) What is planning? How is it carried out?

- 7) Which of the following is an unsupervised task?
- a) Learning to play chess
  - b) Predicting if a new edible item is sweet or spicy based on the information of the ingredients, their quantities, and labels (sweet or spicy) for many other similar dishes.
  - c) Grouping related documents from an unannotated corpus.
  - d) All of the above

- 8) Which of the following is a categorical feature?
- a) Number of hours you study in a day
  - b) Branch of an engineering student
  - c) Your weekly expenditure in rupees
  - d) Height of a person in inches

- 9) For a binary classification problem, the decision boundary resulting from the use of logistic regression is \_\_\_\_.
- a) linear
  - b) sigmoid
  - c) parabolic
  - d) exponential

- 10) Consider following confusion matrix, calculate the number of participants that have been wrongly classified as female?

	Actual Male	Actual Female
Predicted Male	950	50
Predicted Female	15	985

- a) 15
  - b) 50
  - c) 950
  - d) 985
- 11) Which of the following functions can be used to split the data into train and test?
- a) `Pandas.train_test_split()`
  - b) `numpy.train_test_split()`
  - c) `sklearn.model_selection.train_test_split()`
  - d) `sklearn.train_test_split()`
- 12) To find the \_\_\_\_ you put all numbers in order from least to greatest and find the number that is in the middle.
- a) mean
  - b) median
  - c) mode
  - d) range

**T.Y. (B.Tech.) (Sem - II) (New) CBCS Examination: Oct/Nov-2022**  
**INFORMATION TECHNOLOGY ENGINEERING**  
**Data Science**

Day & Date: Wednesday, 22-02-2023  
 Time: 10:00 AM To 01:00 PM

Max. Marks: 70

**Instructions:** 1) Figures to the right indicates full marks.  
 2) All questions are compulsory.

**Section-I**

**Q.2 Attempt any three of the following questions.**

**12**

1) Find Inverse of Given matrix A

A=

2	0	3
-2	3	-4
-3	1	-4

- 2) A booklet has 12 pages with the following numbers of words:  
 271, 354, 296, 301, 333, 326, 285, 298, 327, 316, 287 and 314  
 What is the standard deviation number of words per page?
- 3) Define Various types of variables. Give one example of each type.
- 4) Explain Simpson's Paradox and Central Limit Theorem.

**Q.3 Attempt any one of the following questions.**

**08**

1) What is correlation & Causation?

John is an investor. His portfolio primarily tracks the performance of the S&P 500 and John wants to add the stock of Apple Inc. Before adding Apple to his portfolio, he wants to assess the correlation between the stock and the S&P 500 to ensure that adding the stock won't increase the systematic risk of his portfolio. Find correlation the stock and the S&P 500

	S&P 500	Apple
2013	1691.75	68.96
2014	1977.80	100.11
2015	1884.09	109.06
2016	2151.13	112.18
2017	2519.36	154.12

- 2) Find mode, mean, median, range and 25% quantile, 75% quantile for following data.

Year	Income (in million Rs.)
2001-2002	50.9
2002-2003	127.2
2003-2004	189.9
2004-2005	536.6
2005-2006	768.7
2006-2007	1084.5
2007-2008	1235.6
2008-2009	2064.5
2009-2010	2456.8
2001-2002	3090.4

- Q.4** Consider the experiment: Two dice are tossed.

08

The Random Variable is  $X = \text{"The product of the scores on the two dice"}$ .

Write down sample space and probability for  $x = 36, 12, 6$ .

Also find the value of  $X$  for which probability will be  $1/9$ .

### Section – II

- Q.5** Attempt any three of the following questions.

12

- 1) Explain following terms w.r.t. Support Vector Machine.
  - a) Hyperplane
  - b) Support vectors
  - c) Linear SVM
  - d) Kernel Functions
- 2) Compare types of machine learning.
- 3) Explain working of decision tree algorithm.
- 4) What is regression? Explain various types of regression.

- Q.6** Attempt any one of the following questions.

08

- 1) For the given confusion matrix, compute accuracy, recall, precision and F2-score.

	Apple	Orange	Mango
Apple	7	8	9
Orange	1	2	3
Mango	3	2	1

- 2) Consider following dataset for given instance  $X = (\text{Childless, old, and High})$ , what will be the prediction of Naive bays algorithm?

Type of family structure	Age group	Income status	Will they buy a car?
Nuclear	Young	Low	Yes
Extended	Old	Low	No
Childless	Middle-aged	Low	No
Childless	Young	Medium	Yes
Single Parent	Middle-aged	Medium	Yes
Childless	Young	Low	No
Nuclear	Old	High	Yes
Nuclear	Middle-aged	Medium	Yes
Extended	Middle-aged	High	Yes
Single Parent	Old	Low	No

- Q.7** Explain working of KNN algorithm. Consider following dataset and Predict class of instance (55,165) using KNN algorithm for  $k = 3$ .

**08**

Weight(x2)	Height(y2)	Class
51	167	Underweight
62	182	Normal
69	176	Normal
64	173	Normal
65	172	Normal
56	174	Underweight
58	169	Normal
57	173	Normal
55	170	Normal

  - a) Pandas.train\_test\_split()
  - b) numpy.train\_test\_split()
  - c) sklearn.model\_selection.train\_test\_split()
  - d) sklearn.train\_test\_split()
- 5) To find the \_\_\_\_ you put all numbers in order from least to greatest and find the number that is in the middle.
  - a) mean
  - b) median
  - c) mode
  - d) range

- 10)** Which of the package is used for visualization in Python?

  - a) ggplot
  - b) matplotlib
  - c) seaborn
  - d) All of the above
- 11)** The command used for reading a text file in python is \_\_\_\_.

  - a) read\_csv
  - b) read\_table
  - c) read\_excel
  - d) both a and b
- 12)** The probability of two different events occurring at the same time is known as \_\_\_\_.

  - a) Marginal probability
  - b) Conditional probability
  - c) Joint probability
  - d) Marginal and joint probability
- 13)** Package that deals with dataframe is \_\_\_\_.

  - a) numpy
  - b) dataframe
  - c) pandas
  - d) math
- 14)** Which of the following is an unsupervised task?

  - a) Learning to play chess
  - b) Predicting if a new edible item is sweet or spicy based on the information of the ingredients, their quantities, and labels (sweet or spicy) for many other similar dishes.
  - c) Grouping related documents from an unannotated corpus.
  - d) All of the above

2008-2009	2064.5
2009-2010	2456.8
2001-2002	3090.4

- Q.4** Consider the experiment: Two dice are tossed.

08

The Random Variable is  $X = \text{"The product of the scores on the two dice"}$ .

Write down sample space and probability for  $x = 36, 12, 6$ .

Also find the value of  $X$  for which probability will be  $1/9$ .

### Section – II

- Q.5** Attempt any three of the following questions.

12

- 1) Explain following terms w.r.t. Support Vector Machine.
  - a) Hyperplane
  - b) Support vectors
  - c) Linear SVM
  - d) Kernel Functions
- 2) Compare types of machine learning.
- 3) Explain working of decision tree algorithm.
- 4) What is regression? Explain various types of regression.

- Q.6** Attempt any one of the following questions.

08

- 1) For the given confusion matrix, compute accuracy, recall, precision and F2-score.

	Apple	Orange	Mango
Apple	7	8	9
Orange	1	2	3
Mango	3	2	1

- 2) Consider following dataset for given instance X= (Childless, old, and High), what will be the prediction of Naive bays algorithm?

Type of family structure	Age group	Income status	Will they buy a car?
Nuclear	Young	Low	Yes
Extended	Old	Low	No
Childless	Middle-aged	Low	No
Childless	Young	Medium	Yes
Single Parent	Middle-aged	Medium	Yes
Childless	Young	Low	No
Nuclear	Old	High	Yes
Nuclear	Middle-aged	Medium	Yes
Extended	Middle-aged	High	Yes
Single Parent	Old	Low	No

- Q.7** Explain working of KNN algorithm. Consider following dataset and Predict class of instance (55,165) using KNN algorithm for k =3.

**08**

Weight(x2)	Height(y2)	Class
51	167	Underweight
62	182	Normal
69	176	Normal
64	173	Normal
65	172	Normal

  - a) mean
  - b) median
  - c) mode
  - d) range
- 3) The scatterplot shows the price of a hot dog and a small drink at seventeen different baseball stadiums. Based on the scatterplot, which of the following statements is true?

- |   |   |   |
|---|---|---|
| 1 | 2 | 3 |
| 2 | 3 | 5 |
| 3 | 4 | 7 |
| 4 | 5 | 9 |

- |   |    |    |
|---|----|----|
| 4 | 9  | 6  |
| 2 | 8  | 4  |
| 5 | 10 | 15 |

- a) numpy                      b) dataframe  
c) pandas                     d) math

- 11) Which of the following is an unsupervised task?
- a) Learning to play chess
  - b) Predicting if a new edible item is sweet or spicy based on the information of the ingredients, their quantities, and labels (sweet or spicy) for many other similar dishes.
  - c) Grouping related documents from an unannotated corpus.
  - d) All of the above
- 12) Which of the following is a categorical feature?
- a) Number of hours you study in a day
  - b) Branch of an engineering student
  - c) Your weekly expenditure in rupees
  - d) Height of a person in inches
- 13) For a binary classification problem, the decision boundary resulting from the use of logistic regression is \_\_\_\_\_.
- a) linear
  - b) sigmoid
  - c) parabolic
  - d) exponential
- 14) Consider following confusion matrix, calculate the number of participants that have been wrongly classified as female?

	Actual Male	Actual Female
Predicted Male	950	50
Predicted Female	15	985

- a) 15
- b) 50
- c) 950
- d) 985

Set **R**

**T.Y. (B.Tech.) (Sem - II) (New) CBCS Examination: Oct/Nov-2022**  
**INFORMATION TECHNOLOGY ENGINEERING**  
**Data Science**

Day & Date: Wednesday, 22-02-2023  
 Time: 10:00 AM To 01:00 PM

Max. Marks: 70

**Instructions:** 1) Figures to the right indicates full marks.  
 2) All questions are compulsory.

**Section-I****Q.2 Attempt any three of the following questions.****12****1) Find Inverse of Given matrix A**

A=

2	0	3
-2	3	-4
-3	1	-4

- 2)** A booklet has 12 pages with the following numbers of words:  
 271, 354, 296, 301, 333, 326, 285, 298, 327, 316, 287 and 314  
 What is the standard deviation number of words per page?
- 3)** Define Various types of variables. Give one example of each type.
- 4)** Explain Simpson's Paradox and Central Limit Theorem.

**Q.3 Attempt any one of the following questions.****08****1) What is correlation & Causation?**

John is an investor. His portfolio primarily tracks the performance of the S&P 500 and John wants to add the stock of Apple Inc. Before adding Apple to his portfolio, he wants to assess the correlation between the stock and the S&P 500 to ensure that adding the stock won't increase the systematic risk of his portfolio. Find correlation the stock and the S&P 500

	S&P 500	Apple
2013	1691.75	68.96
2014	1977.80	100.11
2015	1884.09	109.06
2016	2151.13	112.18
2017	2519.36	154.12

- 2) Find mode, mean, median, range and 25% quantile, 75% quantile for following data.

Year	Income (in million Rs.)
2001-2002	50.9
2002-2003	127.2
2003-2004	189.9
2004-2005	536.6
2005-2006	768.7
2006-2007	1084.5
2007-2008	1235.6
2008-2009	2064.5
2009-2010	2456.8
2001-2002	3090.4

- Q.4** Consider the experiment: Two dice are tossed.

08

The Random Variable is  $X = \text{"The product of the scores on the two dice"}$ .

Write down sample space and probability for  $x = 36, 12, 6$ .

Also find the value of  $X$  for which probability will be  $1/9$ .

### Section – II

- Q.5** Attempt any three of the following questions.

12

- 1) Explain following terms w.r.t. Support Vector Machine.
  - a) Hyperplane
  - b) Support vectors
  - c) Linear SVM
  - d) Kernel Functions
- 2) Compare types of machine learning.
- 3) Explain working of decision tree algorithm.
- 4) What is regression? Explain various types of regression.

- Q.6** Attempt any one of the following questions.

08

- 1) For the given confusion matrix, compute accuracy, recall, precision and F2-score.

	Apple	Orange	Mango
Apple	7	8	9
Orange	1	2	3
Mango	3	2	1

- 2) Consider following dataset for given instance  $X = (\text{Childless, old, and High})$ , what will be the prediction of Naive bays algorithm?

Type of family structure	Age group	Income status	Will they buy a car?
Nuclear	Young	Low	Yes
Extended	Old	Low	No
Childless	Middle-aged	Low	No
Childless	Young	Medium	Yes
Single Parent	Middle-aged	Medium	Yes
Childless	Young	Low	No
Nuclear	Old	High	Yes
Nuclear	Middle-aged	Medium	Yes
Extended	Middle-aged	High	Yes
Single Parent	Old	Low	No

- Q.7** Explain working of KNN algorithm. Consider following dataset and Predict class of instance (55,165) using KNN algorithm for  $k = 3$ .

**08**

Weight(x2)	Height(y2)	Class
51	167	Underweight
62	182	Normal
69	176	Normal
64	173	Normal
65	172	Normal
56	174	Underweight
58	169	Normal
57	173	Normal
55	170	Normal

<b>Seat No.</b>	
-----------------	--

- 11) Determinant of matrix, rounded off to zeroth decimal place is \_\_\_\_\_.

4	9	6
2	8	4
5	10	15

- a) 110                                      b) 120  
c) 0                                         d) 1
- 12) Which of the package is used for visualization in Python?  
a) ggplot                                      b) matplotlib  
c) seaborn                                    d) All of the above
- 13) The command used for reading a text file in python is \_\_\_\_\_.  
a) read\_csv                                    b) read\_table  
c) read\_excel                                 d) both a and b
- 14) The probability of two different events occurring at the same time is known as \_\_\_\_\_.  
a) Marginal probability                      b) Conditional probability  
c) Joint probability                            d) Marginal and joint probability

Max. Marks: 50

Time: 10:00 AM To 12:00 PM

- Instructions:** 1) Q. No. 1 is compulsory. It should be solved in the first 20 minutes in answer book. Page no 03 (Starting page of the Answer Book). Each question carries one mark.  
 2) Don't forget to Mention question paper set (P/Q/R/S) on top of page.  
 3) Figures to the right indicates full marks  
 4) Assume suitable data wherever needed and mention it clearly.

**MCQ/Objective Type Questions**

Duration: 20 Minutes

Marks: 10

**Q.1 Choose the correct alternatives from the options.**

**10**

- 1) In the network HTTP resources are located by \_\_\_\_\_.  
 a) uniform resource identifier      b) unique resource locator  
 c) unique resource identifier      d) none of the mentioned
- 2) HTTP client requests by establishing a \_\_\_\_\_ connection to a particular port on the server.  
 a) user datagram protocol  
 b) transmission control protocol  
 c) broader gateway protocol  
 d) none of the mentioned
- 3) In FTP protocol, client contacts server using \_\_\_\_\_ as the transport protocol.  
 a) Transmission control protocol  
 b) user datagram protocol  
 c) datagram congestion control protocol  
 d) stream control transmission protocol
- 4) <b> tag makes the enclosed text bold. What is other tag to make text bold?  
 a) <strong>      b) <dar>  
 c) <black>      d) <emp>
- 5) What is the correct HTML for making a hyperlink?  
 a) <a href="http:// abc.com">ICT Trends Quiz</a>  
 b) <a name="https://abc.com">ICT Trends Quiz</a>  
 c) <https:// abc.com</a>  
 d) url="https:// abc.com">ICT Trends Quiz
- 6) To create a combo box (drop down box) which tag will you use?  
 a) <select>      b) <list>  
 c) <input type="dropdown">      d) all of above

- 7) FTP uses One port number (21) is used for \_\_\_\_\_ and another one for \_\_\_\_\_ Direct sequence.
- a) data transfer, control connection
  - b) socket connection, data transfer
  - c) control connection, data transfer
  - d) control connection, socket connection
- 8) Which attribute is used to name an element uniquely?
- a) class
  - b) id
  - c) dot
  - d) all of above
- 9) HTML (Hyper Text Markup Language) to specify \_\_\_\_\_ of web pages.
- a) style
  - b) the content and structure
  - c) both
  - d) none
- 10) JavaScript is a language that helps you build \_\_\_\_\_ web pages.
- a) dynamic
  - b) coloring
  - c) positioning

- Instructions:** 1) Q. No. 1 is compulsory. It should be solved in the first 20 minutes in answer book. Page no 03 (Starting page of the Answer Book). Each question carries one mark.  
 2) Don't forget to Mention question paper set (P/Q/R/S) on top of page.  
 3) Figures to the right indicates full marks  
 4) Assume suitable data wherever needed and mention it clearly.

**MCQ/Objective Type Questions**

Duration: 20 Minutes

Marks: 10

**Q.1 Choose the correct alternatives from the options and rewrite the sentence. 10**

- 1) Select the option that suits the Manifesto for Agile Software Development
  - a) Individuals and interactions      b) Working software
  - c) Customer collaboration      d) All of the mentioned
- 2) Agile Software Development is based on
  - a) Incremental Development
  - b) Iterative Development
  - c) Linear Development
  - d) Both incremental and iterative Development
- 3) When forming an Agile project team it is BEST to use
  - a) Generalized specialists
  - b) Top management officials
  - c) Highly specialized developers
  - d) All of the above
- 4) Which Agile methodology advocates the use of problem domain?
  - a) Extreme programming (XP)
  - b) Future Driven Development (FDD)
  - c) Scrum
  - d) Evo
- 5) Scrum Teams are
  - a) Self organizing, cross functional
  - b) Cross productive, self organizing
  - c) Self-destructive, self-motivating
  - d) Non-productive, Selfish
- 6) Agile software engineering demonstrated to deliver successful systems quickly.
  - a) True      b) False
- 7) Amongst which of the following is/are the type of agile methodologies.
  - a) Scrum      b) FDD
  - c) DSDM      d) All of these

- 8)** Which of the following option is used to measure the size of a user story for an agile Project?
- |                   |                         |
|-------------------|-------------------------|
| a) Story points   | b) Functional point     |
| c) Velocity point | d) Work breakdown point |
- 9)** How many phases are there in Scrum?
- |         |                            |
|---------|----------------------------|
| a) Two  | b) Three                   |
| c) Four | d) It does not have phases |
- 10)** The-Driven Development (TDD) required a developer to write the test cases before writing the actual production code.
- |         |          |
|---------|----------|
| a) True | b) False |

**T.Y (B. Tech) (Sem-II) (New) (CBCS) Examination: Oct/Nov-2022**  
**INFORMATION TECHNOLOGY ENGINEERING**  
**Agile Project Management**

Day & Date: Friday, 24-02-2023  
Time: 10:00 AM To 12:00 PM

Max. Marks: 40

**Instructions:** 1) All questions are compulsory.  
2) Figures to the right indicate full marks.  
3) Assume data wherever necessary.

**Q.2 Attempt any Four.** **20**

- a) What is Agile Manifesto? Describe in short, Agile manifesto principles?
- b) What is Feature Drive development? What are the Goals of it?
- c) What is product backlog? Describe features of product backlog.
- d) What do you understand by Test-Driven Development (TDD)? What are the tools used for Test-Driven Development in agile?
- e) How the dependency inversion principle is used in agile design methodology?

**Q.3 Attempt any two.** **20**

- a) What are the key responsibilities of a Scrum Master in a Scrum project?  
Who does the Scrum Master report? Explain any one Scrum case study.
- b) What are the characteristics and content of user stories? Describe in detail how do you write acceptance criteria for user stories in Agile?
- c) What is ALM? Why is ALM so important? Explain ALM with example from industry?

<b>Seat No.</b>

Day & Date: Wednesday, 25-01-2023  
 Time: 02:00 PM To 05:00 PM

Max. Marks: 70

- Instructions:** 1) Q. No. 1 is compulsory it should be solved in first 30 minutes in answer Book. Page No.3 (starting page of the Answer Book) Each question carries one mark.  
 2) Don't forget to mention the question paper Set (P/Q/R/S) at the top of the Same page.  
 3) Assume suitable data wherever necessary.

**MCQ/Objective Type Questions**

Duration: 30 Minutes

Marks: 14

**Q.1 Choose the correct alternatives from the given options.** **14**

- 1) What can be major issue in Leave-One-Out-Cross-Validation (LOOCV)?
  - a) high variance
  - b) low variance
  - c) faster runtime compared to K-fold cross
  - d) slower runtime compared to normal validation
- 2) A measurable property or parameter of the data-set is \_\_\_\_\_.
  - a) training data
  - b) test data
  - c) feature
  - d) validation data
- 3) In regression analysis, the variable that is being predicted is;
  - a) the independent variable
  - b) the dependent variable
  - c) usually denoted by x
  - d) usually denoted by r
- 4) If the slope of the regression equation  $y = mx + c$  is positive, then;
  - a) as x increases y decreases
  - b) as x increases so does y
  - c) either a or b is correct
  - d) As x decreases y increases
- 5) Averaging the output of multiple decision trees helps \_\_\_\_\_.
  - a) Increase bias
  - b) Decrease bias
  - c) Increase variance
  - d) Decrease variance
- 6) Which of the following algorithm is not an example of an ensemble method?
  - a) Averaging Model
  - b) Random Forest
  - c) Stacking Model
  - d) Decision Tree
- 7) What is true about an ensembled classifier?
  - 1) Classifiers that are "surer" can vote with more conviction
  - 2) Classifiers as be "surer" about a particular part of the space
  - 3) Most of the times, it performs better than a single classifier
  - a) 1 and 2
  - b) 1 and 3
  - c) 2 and 3
  - d) All of the above

- 8) Which of the following are advantages of stacking model?
- a) More robust model
  - b) Better prediction
  - c) Lower time of execution
  - a) 1 and 2
  - b) 1 and 3
  - c) 2 and 3
  - d) All of the above
- 9) How do you handle missing or corrupted data in a dataset?
- a) Drop missing row or columns
  - b) Replace missing values with mean/median/mode
  - c) Assign a unique category to missing values
  - d) All of these
- 10) Which among the below options are types of Feature engineering? (May choose multiple answers)
- a) Replace missing values
  - b) Getting mean value from a group of entities
  - c) Extracting city from home address
  - d) Changing Hyperparameter values
- 11) What is Overfitting?
- a) When a predictive model is accurate but takes too long to run
  - b) When the model learns specifics of the training data that can't be Generalized to a larger data set
  - c) When you perform hyperparameter tuning and performance degrades
  - d) When you apply a powerful deep learning algorithm to a simple machine learning problem
- 12) Artificial Intelligence is the process that allows computers to learn and make decisions like Humans.
- a) True
  - b) False
- 13) Fraud Detection, Image Classification, Diagnostic and Customer Retention are applications in \_\_\_\_.
- a) Unsupervised Learning: Clustering
  - b) Supervised Learning: Classification
  - c) Reinforcement Learning
  - d) Unsupervised Learning: Regression
- 14) How do you choose the root node while constructing a Decision Tree?
- a) An attribute having high Entropy
  - b) An attribute having high Entropy and Information gain
  - c) An attribute having largest Information gain
  - d) None of the mentioned

Day & Date: Wednesday, 25-01-2023  
 Time: 02:00 PM To 05:00 PM

Max. Marks: 56

- Instructions:** 1) All questions are compulsory.  
 2) Figures to the right indicate full marks.  
 3) Assume suitable data wherever needed and mention it clearly.

**Section – I**

- Q.2 Attempt any four** **16**
- What are the different types of Machine Learning?
  - What is the difference between Gini Impurity and Entropy in a Decision Tree?
  - What is bagging in Machine Learning?
  - How do you Determining the Best Learning Model?
  - Describing the Use of Statistics in machine learning.
- Q.3** **12**
- How Naive Bayes Algorithm Works? Explain with example.
  - How Machine Learning Can Help on the Business Problem, Explain with example.

**Section – II**

- Q.4 Answer the following questions. (Any Four)** **12**
- How dose cross-validation works in machine learning?
  - What is model stacking in machine learning? What are the main purposes of stacking?
  - What is the best way of avoiding bias in machine learning? Explain.
  - What is the use of learning curves in machine learning? Explain with example.
  - What is Hyper parameter? How do you search for the best hyper parameter?
- Q.5 Answer the following (Any One)** **06**
- Describe in detail Testing Multiple Models in Machine Learning.
  - What is Average and stacking model explain each with example.

**Q.6 Solve the following.**

For Bayesian algorithm, Using following Dataset. Calculate the posterior probability for each class. What is the outcome of prediction?

Outlook	Temp	Humidity	Windy	Play Golf
Rainy	Hot	High	False	No
Rainy	Hot	High	True	No
Overcast	Hot	High	False	Yes

  - d) When you apply a powerful deep learning algorithm to a simple machine learning problem
- 2) Artificial Intelligence is the process that allows computers to learn and make decisions like Humans.
  - a) True
  - b) False
- 3) Fraud Detection, Image Classification, Diagnostic and Customer Retention are applications in \_\_\_\_\_.
  - a) Unsupervised Learning: Clustering
  - b) Supervised Learning: Classification
  - c) Reinforcement Learning
  - d) Unsupervised Learning: Regression
- 4) How do you choose the root node while constructing a Decision Tree?
  - a) An attribute having high Entropy
  - b) An attribute having high Entropy and Information gain
  - c) An attribute having largest Information gain
  - d) None of the mentioned
- 5) What can be major issue in Leave-One-Out-Cross-Validation (LOOCV)?
  - a) high variance
  - b) low variance
  - c) faster runtime compared to K-fold cross
  - d) slower runtime compared to normal validation
- 6) A measurable property or parameter of the data-set is \_\_\_\_\_.
  - a) training data
  - b) test data
  - c) feature
  - d) validation data

- 7) In regression analysis, the variable that is being predicted is;  
a) the independent variable                      b) the dependent variable  
c) usually denoted by x                              d) usually denoted by r
- 8) If the slope of the regression equation  $y = mx + c$  is positive, then;  
a) as x increases y decreases                      b) as x increases so does y  
c) either a or b is correct                              d) As x decreases y increases
- 9) Averaging the output of multiple decision trees helps \_\_\_\_\_.  
a) Increase bias    b) Decrease bias  
c) Increase variance    d) Decrease variance
- 10) Which of the following algorithm is not an example of an ensemble method?  
a) Averaging Model    b) Random Forest  
c) Stacking Model    d) Decision Tree
- 11) What is true about an ensembled classifier?  
1) Classifiers that are "surer" can vote with more conviction  
2) Classifiers as be "surer" about a particular part of the space  
3) Most of the times, it performs better than a single classifier  
a) 1 and 2    b) 1 and 3  
c) 2 and 3    d) All of the above
- 12) Which of the following are advantages of stacking model?  
a) More robust model  
b) Better prediction  
c) Lower time of execution  
a) 1 and 2    b) 1 and 3  
c) 2 and 3    d) All of the above
- 13) How do you handle missing or corrupted data in a dataset?  
a) Drop missing row or columns  
b) Replace missing values with mean/median/mode  
c) Assign a unique category to missing values  
d) All of these
- 14) Which among the below options are types of Feature engineering? (May choose multiple answers)  
a) Replace missing values  
b) Getting mean value from a group of entities  
c) Extracting city from home address  
d) Changing Hyperparameter values

Set	R
-----	---

**Fourth Year (B.Tech) (Sem - I) (New) (CBCS) Examination: Oct/Nov-2022**  
**INFORMATION TECHNOLOGY ENGINEERING**  
**Machine Learning**

Day & Date: Wednesday, 25-01-2023  
 Time: 02:00 PM To 05:00 PM

Max. Marks: 56

- Instructions:** 1) All questions are compulsory.  
 2) Figures to the right indicate full marks.  
 3) Assume suitable data wherever needed and mention it clearly.

**Section – I**

- Q.2 Attempt any four** **16**
- What are the different types of Machine Learning?
  - What is the difference between Gini Impurity and Entropy in a Decision Tree?
  - What is bagging in Machine Learning?
  - How do you Determine the Best Learning Model?
  - Describe the Use of Statistics in machine learning.
- Q.3** **12**
- How Naive Bayes Algorithm Works? Explain with example.
  - How Machine Learning Can Help on the Business Problem, Explain with example.

**Section – II**

- Q.4 Answer the following questions. (Any Four)** **12**
- How does cross-validation work in machine learning?
  - What is model stacking in machine learning? What are the main purposes of stacking?
  - What is the best way of avoiding bias in machine learning? Explain.
  - What is the use of learning curves in machine learning? Explain with example.
  - What is Hyper parameter? How do you search for the best hyper parameter?
- Q.5 Answer the following (Any One)** **06**
- Describe in detail Testing Multiple Models in Machine Learning.
  - What is Average and stacking model explain each with example.

**Q.6 Solve the following.**

For Bayesian algorithm, Using following Dataset. Calculate the posterior probability for each class. What is the outcome of prediction?

Outlook	Temp	Humidity	Windy	Play Golf
Rainy	Hot	High	False	No
Rainy	Hot	High	True	No
Overcast	Hot	High	False	Yes
Sunny	Mild	High	False	Yes
Sunny	Cool	Normal	False	Yes
Sunny	Cool	Normal	True	No
Overcast	Cool	Normal	True	Yes
Rainy	Mild	High	False	No
Rainy	Cool	Normal	False	Yes
Sunny	Mild	Normal	False	Yes
Rainy	Mild	Normal	True	Yes

**Machine Learning**

Day & Date: Wednesday, 25-01-2023  
 Time: 02:00 PM To 05:00 PM

Max. Marks: 70

- Instructions:** 1) Q. No. 1 is compulsory it should be solved in first 30 minutes in answer Book. Page No.3 (starting page of the Answer Book) Each question carries one mark.  
 2) Don't forget to mention the question paper Set (P/Q/R/S) at the top of the Same page.  
 3) Assume suitable data wherever necessary.

**MCQ/Objective Type Questions**

Duration: 30 Minutes

Marks: 14

**Q.1 Choose the correct alternatives from the given options.**

**14**

- 1) Which of the following algorithm is not an example of an ensemble method?
  - a) Averaging Model
  - b) Random Forest
  - c) Stacking Model
  - d) Decision Tree
- 2) What is true about an ensembled classifier?
  - 1) Classifiers that are "surer" can vote with more conviction
  - 2) Classifiers as be "surer" about a particular part of the space
  - 3) Most of the times, it performs better than a single classifier
  - a) 1 and 2
  - b) 1 and 3
  - c) 2 and 3
  - d) All of the above
- 3) Which of the following are advantages of stacking model?
  - a) More robust model
  - b) Better prediction
  - c) Lower time of execution
  - a) 1 and 2
  - b) 1 and 3
  - c) 2 and 3
  - d) All of the above
- 4) How do you handle missing or corrupted data in a dataset?
  - a) Drop missing row or columns
  - b) Replace missing values with mean/median/mode
  - c) Assign a unique category to missing values
  - d) All of these
- 5) Which among the below options are types of Feature engineering? (May choose multiple answers)
  - a) Replace missing values
  - b) Getting mean value from a group of entities
  - c) Extracting city from home address
  - d) Changing Hyperparameter values

- 6) What is Overfitting?
- a) When a predictive model is accurate but takes too long to run
  - b) When the model learns specifics of the training data that can't be Generalized to a larger data set
  - c) When you perform hyperparameter tuning and performance degrades
  - d) When you apply a powerful deep learning algorithm to a simple machine learning problem
- 7) Artificial Intelligence is the process that allows computers to learn and make decisions like Humans.
- a) True
  - b) False
- 8) Fraud Detection, Image Classification, Diagnostic and Customer Retention are applications in \_\_\_\_.
- a) Unsupervised Learning: Clustering
  - b) Supervised Learning: Classification
  - c) Reinforcement Learning
  - d) Unsupervised Learning: Regression
- 9) How do you choose the root node while constructing a Decision Tree?
- a) An attribute having high Entropy
  - b) An attribute having high Entropy and Information gain
  - c) An attribute having largest Information gain
  - d) None of the mentioned
- 10) What can be major issue in Leave-One-Out-Cross-Validation (LOOCV)?
- a) high variance
  - b) low variance
  - c) faster runtime compared to K-fold cross
  - d) slower runtime compared to normal validation
- 11) A measurable property or parameter of the data-set is \_\_\_\_.
- a) training data
  - b) test data
  - c) feature
  - d) validation data
- 12) In regression analysis, the variable that is being predicted is;
- a) the independent variable
  - b) the dependent variable
  - c) usually denoted by x
  - d) usually denoted by r
- 13) If the slope of the regression equation  $y = mx + c$  is positive, then;
- a) as x increases y decreases
  - b) as x increases so does y
  - c) either a or b is correct
  - d) As x decreases y increases
- 14) Averaging the output of multiple decision trees helps \_\_\_\_.
- a) Increase bias
  - b) Decrease bias
  - c) Increase variance
  - d) Decrease variance

Duration: 30 Minutes

Marks: 14

**Q.1 Choose the correct alternatives from the options.**

**14**

- 1) Which of the following task is performed by Transaction Coordinator in distributed database?
  - a) Starts execution of transactions
  - b) Break transaction into number of sub transactions
  - c) Coordinates termination of transaction
  - d) All of the above
- 2) Some of the attributes and records of the relation are stored in different tables at different sites is termed as \_\_\_\_\_.
  - a) Horizontal fragmentation
  - b) Replication
  - c) Vertical fragmentation
  - d) Mixed fragmentation
- 3) Which of the following is true concerning global transaction?
  - a) The required data are at one local site and the distributed DBMS routes requests as necessary
  - b) The required data are located in at least one nonlocal site and the distributed DBMS routes requests as necessary.
  - c) The required data are at one local site and the distributed DBMS passes the request to only the local DBMS.
  - d) The required data are located in at least one nonlocal site and the distributed DBMS passes the request to only the local DBMS.
- 4) All groupings of {(pid,locid,timeid), (pid,locid), (locid,timeid), (pid,timeid), (pid), (locid), (timeid), () } in one query can be achieved by using which of the following?
  - a) group by
  - b) rollup
  - c) cube
  - d) slice
- 5) Decision support system is used in making \_\_\_\_\_.
  - a) Transaction decisions
  - b) query decisions
  - c) Business Decisions
  - d) Table Decisions

- 6) Hadoop is a framework that works with a variety of related tools. Common cohorts include: \_\_\_\_\_.  
 a) MapReduce, Hive and HBase  
 b) MapReduce, MySQL and Google Apps  
 c) MapReduce, Hummer and Iguana  
 d) MapReduce, Heron and Trumpet
- 7) Following two queries are executed in parallel.  
 Select \* from department  
 Select dept\_id , count(student\_id) from admission group by dept\_id  
 This is example of \_\_\_\_\_.  
 a) Interquery  
 b) Intraoperation  
 c) Interoperation  
 d) None of these
- 8) With n relations, there are \_\_\_\_\_ different join orderings.  
 a) n  
 b)  $n^2$   
 c)  $(2*(n-1))/n!$   
 d)  $(2*(n-1))/(n-1)!$
- 9) A miner is \_\_\_\_\_.  
 a) cryptographic algorithm  
 b) A secured distributed ledger  
 c) A person doing calculation  
 d) Computers that validate and process blockchain transactions
- 10) Which of the following is true equivalence?  
 a)  $\sigma_{\theta_1 \wedge \theta_2}(E) = \sigma_{\theta_1}(\sigma_{\theta_2}(E))$   
 b)  $\sigma_{\theta_1}(\sigma_{\theta_2}(E) = \sigma_{\theta_2}(\sigma_{\theta_1}(E))$   
 c)  $E_1 X_{\theta} E_2 = E_2 X_{\theta} E_1$   
 d) All of the above
- 11) In blockchain, \_\_\_\_\_ tree stores all transactions in a block by producing a digital fingerprint of entire set of transactions.  
 a) Binary  
 b) Merkel  
 c) AVL  
 d) Red Black
- 12) Which of the following is not a blockchain component?  
 a) Ledger  
 b) Wallet  
 c) Certificate authority  
 d) Hash
- 13) What is the genesis block?  
 a) Any block created by the founder  
 b) The last block created in the Blockchain  
 c) The first block of a Blockchain  
 d) The first transaction in each block
- 14) A collection and a document in MongoDB are equivalent to \_\_\_\_\_ concepts respectively.  
 a) Table and Row  
 b) Table and Column  
 c) Column and Row  
 d) Database and Table

Day & Date: Tuesday, 31-01-2023  
 Time: 02:00 PM To 05:00 PM

Max. Marks: 56

- Instructions:** 1) Both Sections are compulsory.  
 2) Figures to the right indicate full marks.

**Section – I**

**Q.2 Attempt any three.**

**12**

- Explain various processes in transaction-server system.
- Explain pipelined parallelism and independent parallelism.
- A database table T1 has 2000 records and occupies 80 disk blocks. Another table T2 has 400 records and occupies 20 disk blocks. If Nested-loop join algorithm is employed to perform the join, with the most appropriate choice of table to be used in outer loop, how many numbers of block accesses and seek operation required for performing join operation?
- How to estimate the size of the results of a join operation?

**Q.3 Attempt any one.**

**08**

- Explain external sort-merge algorithm and show stepwise result for the following relation using external merge sort to sort relation on name.

b. Name	c. Score
d. G	e. 24
f. A	g. 19
h. D	i. 31
j. C	k. 33
l. B	m. 14
n. E	o. 16
p. R	q. 16
r. D	s. 21
t. M	u. 3
v. P	w. 2
x. D	y. 7
z. A	aa. 14

- How new coordinator is selected in distributed database in case of coordinator failure.

- Q.4** Explain various partitioning techniques in parallel database. Show stepwise result for join operation of following two tables using asymmetric fragment and join if two processors are available. **08**

product_name	product_id
orange juice	101
white bread	102
coffee	103
eggs	105
cereals	106
chocolate	107

product_id	quantity
100	7
102	4
104	1
105	13
107	35

### Section – II

- Q.5 Attempt any three.**

**12**

- Explain Collaborative filtering with example.
- Define bigdata and explain various properties of bigdata.
- Explain types of blockchain technology with advantages and disadvantages.
- Explain different types of nodes and their functions in Hadoop.

- Q.6 Attempt any one.**

**08**

- Explain various components of a blockchain architecture and any one consensus algorithm.
- Consider the below table and find result for following queries.
  - Select item\_id, colour, size, count(\*) from r group by rollup (item\_id, colour, size)
  - Select item\_id, size, count(\*) from r group by cube (item\_id, size)
  - Select colour, size, count(\*) from r group by colour, size
  - Select colour, size, count(\*) from r group by colour, size

item id	Color	Size	quantity
Skirt	dark	Small	2
Skirt	dark	Medium	5
Skirt	dark	Large	1
Skirt	Pastel	Small	11
Skirt	Pastel	Medium	9
Skirt	Pastel	Large	15

 3) Figures to the right indicates full marks.

**MCQ/Objective Type Questions**

Duration: 30 Minutes

Marks: 14

**Q.1 Choose the correct alternatives from the options.**

**14**

- 1) With  $n$  relations, there are \_\_\_\_\_ different join orderings.
  - a)  $n$
  - b)  $n^2$
  - c)  $(2^{*(n-1)})!/n!$
  - d)  $(2^{*(n-1)})!/(n-1)!$
- 2) A miner is \_\_\_\_\_.
  - a) cryptographic algorithm
  - b) A secured distributed ledger
  - c) A person doing calculation
  - d) Computers that validate and process blockchain transactions
- 3) Which of the following is true equivalence?
  - a)  $\sigma_{\theta_1 \wedge \theta_2}(E) = \sigma_{\theta_1}(\sigma_{\theta_2}(E))$
  - b)  $\sigma_{\theta_1}(\sigma_{\theta_2}(E) = \sigma_{\theta_2}(\sigma_{\theta_1}(E))$
  - c)  $E_1 X_{\theta} E_2 = E_2 X_{\theta} E_1$
  - d) All of the above
- 4) In blockchain, \_\_\_\_\_ tree stores all transactions in a block by producing a digital fingerprint of entire set of transactions.
  - a) Binary
  - b) Merkel
  - c) AVL
  - d) Red Black
- 5) Which of the following is not a blockchain component?
  - a) Ledger
  - b) Wallet
  - c) Certificate authority
  - d) Hash
- 6) What is the genesis block?
  - a) Any block created by the founder
  - b) The last block created in the Blockchain
  - c) The first block of a Blockchain
  - d) The first transaction in each block
- 7) A collection and a document in MongoDB are equivalent to \_\_\_\_\_ concepts respectively.
  - a) Table and Row
  - b) Table and Column
  - c) Column and Row
  - d) Database and Table

- 8) Which of the following task is performed by Transaction Coordinator in distributed database?
- Starts execution of transactions
  - Break transaction into number of sub transactions
  - Coordinates termination of transaction
  - All of the above
- 9) Some of the attributes and records of the relation are stored in different tables at different sites is termed as \_\_\_\_.

**Fourth Year (B.Tech.) (Sem-I) (New) (CBCS) Examination: Oct/Nov-2022**  
**INFORMATION TECHNOLOGY ENGINEERING**  
**Advanced Database System**

Day & Date: Tuesday, 31-01-2023  
 Time: 02:00 PM To 05:00 PM

Max. Marks: 70

- Instructions:** 1) Q. No. 1 is compulsory and should be solved in first 30 minutes in Answer Book. Page No.3 (starting page of the Answer Book). Each question carry one mark.  
 2) Don't forget to mention Question Paper Set (P/Q/R/S) at the top of the same page.  
 3) Figures to the right indicates full marks.

**MCQ/Objective Type Questions**

Duration: 30 Minutes

Marks: 14

**Q.1 Choose the correct alternatives from the options.** **14**

- 1) In blockchain, \_\_\_\_\_ tree stores all transactions in a block by producing a digital fingerprint of entire set of transactions.
 

a) Binary	b) Merkel
c) AVL	d) Red Black
- 2) Which of the following is not a blockchain component?
 

a) Ledger	b) Wallet
c) Certificate authority	d) Hash
- 3) What is the genesis block?
 

a) Any block created by the founder
b) The last block created in the Blockchain
c) The first block of a Blockchain
d) The first transaction in each block
- 4) A collection and a document in MongoDB are equivalent to \_\_\_\_\_ concepts respectively.
 

a) Table and Row	b) Table and Column
c) Column and Row	d) Database and Table
- 5) Which of the following task is performed by Transaction Coordinator in distributed database?
 

a) Starts execution of transactions
b) Break transaction into number of sub transactions
c) Coordinates termination of transaction
d) All of the above
- 6) Some of the attributes and records of the relation are stored in different tables at different sites is termed as \_\_\_\_\_.
 

a) Horizontal fragmentation	b) Replication
c) Vertical fragmentation	d) Mixed fragmentation

- 7) Which of the following is true concerning global transaction?
- The required data are at one local site and the distributed DBMS routes requests as necessary
  - The required data are located in at least one nonlocal site and the distributed DBMS routes requests as necessary.
  - The required data are at one local site and the distributed DBMS passes the request to only the local DBMS.
  - The required data are located in at least one nonlocal site and the distributed DBMS passes the request to only the local DBMS.
- 8) All groupings of  $\{(pid, locid, timeid), (pid, locid), (locid, timeid), (pid, timeid), (pid), (locid), (timeid), ()\}$  in one query can be achieved by using which of the following?
- group by
  - rollup
  - cube
  - slice
- 9) Decision support system is used in making \_\_\_\_\_.  
  - Transaction decisions
  - query decisions
  - Business Decisions
  - Table Decisions
- 10) Hadoop is a framework that works with a variety of related tools. Common cohorts include: \_\_\_\_\_.  
  - MapReduce, Hive and HBase
  - MapReduce, MySQL and Google Apps
  - MapReduce, Hummer and Iguana
  - MapReduce, Heron and Trumpet
- 11) Following two queries are executed in parallel.  
 Select \* from department  
 Select dept\_id, count(student\_id) from admission group by dept\_id  
 This is example of \_\_\_\_\_.  
  - Interquery
  - Intraoperation
  - Interoperation
  - None of these
- 12) With n relations, there are \_\_\_\_\_ different join orderings.  
  - n
  - $n^2$
  - $(2^{*(n-1)})!/n!$
  - $(2^{*(n-1)})!/(n-1)!$
- 13) A miner is \_\_\_\_\_.  
  - cryptographic algorithm
  - A secured distributed ledger
  - A person doing calculation
  - Computers that validate and process blockchain transactions
- 14) Which of the following is true equivalence?  
  - $\sigma_{\theta_1 \wedge \theta_2}(E) = \sigma_{\theta_1}(\sigma_{\theta_2}(E))$
  - $\sigma_{\theta_1}(\sigma_{\theta_2}(E)) = \sigma_{\theta_2}(\sigma_{\theta_1}(E))$
  - $E_1 X_{\theta} E_2 = E_2 X_{\theta} E_1$
  - All of the above

**Fourth Year (B.Tech.) (Sem-I) (New) (CBCS) Examination: Oct/Nov-2022**  
**INFORMATION TECHNOLOGY ENGINEERING**  
**Advanced Database System**

Day & Date: Tuesday, 31-01-2023  
 Time: 02:00 PM To 05:00 PM

Max. Marks: 56

**Instructions:** 1) Both Sections are compulsory.  
 2) Figures to the right indicate full marks.

**Section – I**

**Q.2 Attempt any three.**

**12**

- Explain various processes in transaction-server system.
- Explain pipelined parallelism and independent parallelism.
- A database table T1 has 2000 records and occupies 80 disk blocks. Another table T2 has 400 records and occupies 20 disk blocks. If Nested-loop join algorithm is employed to perform the join, with the most appropriate choice of table to be used in outer loop, how many numbers of block accesses and seek operation required for performing join operation?
- How to estimate the size of the results of a join operation?

**Q.3 Attempt any one.**

**08**

- Explain external sort-merge algorithm and show stepwise result for the following relation using external merge sort to sort relation on name.

b. Name	c. Score
d. G	e. 24
f. A	g. 19
h. D	i. 31
j. C	k. 33
l. B	m. 14
n. E	o. 16
p. R	q. 16
r. D	s. 21
t. M	u. 3
v. P	w. 2
x. D	y. 7
z. A	aa. 14

- How new coordinator is selected in distributed database in case of coordinator failure.

- Q.4** Explain various partitioning techniques in parallel database. Show stepwise result for join operation of following two tables using asymmetric fragment and join if two processors are available. **08**

product_name	product_id
orange juice	101
white bread	102
coffee	103
eggs	105
cereals	106
chocolate	107

product_id	quantity
100	7
102	4
104	1
105	13
107	35

### Section – II

- Q.5 Attempt any three.**

**12**

- Explain Collaborative filtering with example.
- Define bigdata and explain various properties of bigdata.
- Explain types of blockchain technology with advantages and disadvantages.
- Explain different types of nodes and their functions in Hadoop.

- Q.6 Attempt any one.**

**08**

- Explain various components of a blockchain architecture and any one consensus algorithm.
- Consider the below table and find result for following queries.
  - Select item\_id, colour, size, count(\*) from r group by rollup (item\_id, colour, size)
  - Select item\_id, size, count(\*) from r group by cube (item\_id, size)
  - Select colour, size, count(\*) from r group by colour, size
  - Select colour, size, count(\*) from r group by colour, size

item id	Color	Size	quantity

Day & Date: Friday, 17-02-2023  
Time: 02:00 PM To 05:00 PM

Max. Marks: 70

- Instructions:** 1) Q. No. 1 is compulsory and should be solved in first 30 minutes in Answer Book. Page No.3 (starting page of the Answer Book). Each question carry one mark.  
2) Don't forget to mention Question Paper Set (P/Q/R/S) at the top of the same page.

**MCQ/Objective Type Questions**

Duration: 30 Minutes

Marks: 14

- Q.1 Choose the correct alternatives from the options. 14**
- 1) Quality also can be looked at in terms of user satisfaction which includes \_\_\_\_\_.
    - a) A compliant product
    - b) Good quality output
    - c) Delivery within budget and schedule
    - d) All of these
  - 2) Which of the following is not a main phase in Configuration Management Process?
    - a) CM Planning
    - b) Executing the CM process
    - c) CM audits
    - d) None of these
  - 3) Which of the following lasts for the duration of the project and covers the development process?
    - a) Taking corrective actions when needed
    - b) Monitoring all key parameters like cost, schedule, risks
    - c) Providing information on the development process in terms of metrics
    - d) All of these
  - 4) Which is a black box testing technique appropriate to all levels of testing?
    - a) Acceptance testing
    - b) Equivalence partitioning
    - c) Regression testing
    - d) Quality assurance
  - 5) Which of the following is a common pointer problem?
    - a) Data sharing errors
    - b) Accessing data elements of the wrong type
    - c) Attempting to use memory areas after freeing them
    - d) All of these
  - 6) The architecture of object-oriented software results in a series of layered subsystems that encapsulate collaborating classes.
    - a) True
    - b) False
  - 7) Which of the following is not an example of a business process?
    - a) Testing software
    - b) Hiring an employee
    - c) Purchasing services
    - d) Designing a new product

- 8) Which of the following statements are incorrect with reference to web-based systems? Web-based systems.
- a) must be secure
  - b) must be able to cope with uncertain, random heavy demands on services
  - c) should be unscalable
  - d) are subject to assorted legal, social, and ethical scrutiny
- 9) The \_\_\_\_\_ is connected to servers [typically powerful workstations or PCs] that play a dual role.
- a) Database
  - b) Software
  - c) Hardware
  - d) None of these
- 10) An event in an executing program where the advice associated with an aspect may be executed is known as \_\_\_\_\_.
- a) aspect
  - b) pointcut
  - c) join point model
  - d) join point
- 11) Which of the following is an essential principle of an architecture?
- a) Consistency
  - b) Reliability
  - c) Scalability
  - d) All of these
- 12) Which of the following is not a dimension of scalability?
- a) Interception
  - b) Distribution
  - c) Manageability
  - d) Size
- 13) Which architecture is used when there is a high volume of transactions to be processed by the server?
- a) Master-Slave architecture
  - b) Multi-tier client-server architecture
  - c) Distributed component architecture
  - d) Peer-to-peer architecture
- 14) Which of the following term is best defined by the statement: "The names of the operations in the 'provides' and 'requires' interfaces are different."?
- a) Operation incompatibility
  - b) Operation incompleteness
  - c) Parameter incompatibility
  - d) None of these

<b>Seat No.</b>

**Fourth Year (B.Tech.) (Sem-I) (New) (CBCS) Examination: Oct/Nov-2022**  
**INFORMATION TECHNOLOGY ENGINEERING**  
**Software Testing and Quality Assurance**

Day & Date: Friday, 17-02-2023  
Time: 02:00 PM To 05:00 PM

Max. Marks: 56

**Instructions:** 1) All questions are compulsory.  
2) Assume suitable data if necessary.

**Section – I**

**Q.2 Attempt any three.** **12**

- a) Illustrate with example the various skills required by Tester.
- b) List and justify the challenges in testing, also extend the challenges in defect classification.
- c) Identify and explain the testing process with attitude towards testing with example.
- d) Illustrate in detail all the white box testing techniques.

**Q.3 Attempt any one.** **08**

- a) State and explain all the challenges of testing also explain test team approach.

**OR**

- b) Extend with example module, integration and system testing with example.

**Q.4 Write a note on.** **08**

- a) Defect life cycle and defect management Process
- b) Big-Bang and Sandwich testing

**Section – II**

**Q.5 Solve any three.** **12**

- a) What is data flow testing? Illustrate the feasible paths and test selection criteria in data flow testing.
- b) Extend with example the statistical of test case organization and tracking.
- c) State and outline the benefits of automation and tools.
- d) What is open source testing tools, justify with example?

**Q.6 What are the essential items a system test plan should include extend in detail with example?** **08**

**OR**

Explain with example elements of software quality assurance, process and products and reliability.

**Q.7 Write note on.** **08**

- a) Software quality plan
- b) Differentiate between failure, error and fault

 Time: 02:00 PM To 05:00 PM

Max. Marks: 56

**Instructions:** 1) All questions are compulsory.  
 2) Assume suitable data if necessary.

**Section – I**

**Q.2 Attempt any three.** **12**

- a) Illustrate with example the various skills required by Tester.
- b) List and justify the challenges in testing, also extend the challenges in defect classification.
- c) Identify and explain the testing process with attitude towards testing with example.
- d) Illustrate in detail all the white box testing techniques.

**Q.3 Attempt any one.** **08**

- a) State and explain all the challenges of testing also explain test team approach.

**OR**

- b) Extend with example module, integration and system testing with example.

**Q.4 Write a note on.** **08**

- a) Defect life cycle and defect management Process
- b) Big-Bang and Sandwich testing

**Section – II**

**Q.5 Solve any three.** **12**

- a) What is data flow testing? Illustrate the feasible paths and test selection criteria in data flow testing.
- b) Extend with example the statistical of test case organization and tracking.
- c) State and outline the benefits of automation and tools.
- d) What is open source testing tools, justify with example?

**Q.6 What are the essential items a system test plan should include extend in detail with example?** **08**

**OR**

Explain with example elements of software quality assurance, process and products and reliability.

**Q.7 Write note on.** **08**

- a) Software quality plan
- b) Differentiate between failure, error and fault

<b>Seat No.</b>	
-----------------	--

- 8) Which is a black box testing technique appropriate to all levels of testing?
- a) Acceptance testing
  - b) Equivalence partitioning
  - c) Regression testing
  - d) Quality assurance
- 9) Which of the following is a common pointer problem?
- a) Data sharing errors
  - b) Accessing data elements of the wrong type
  - c) Attempting to use memory areas after freeing them
  - d) All of these
- 10) The architecture of object-oriented software results in a series of layered subsystems that encapsulate collaborating classes.
- a) True
  - b) False
- 11) Which of the following is not an example of a business process?
- a) Testing software
  - b) Hiring an employee
  - c) Purchasing services
  - d) Designing a new product
- 12) Which of the following statements are incorrect with reference to web-based systems? Web-based systems.
- a) must be secure
  - b) must be able to cope with uncertain, random heavy demands on services
  - c) should be unscalable
  - d) are subject to assorted legal, social, and ethical scrutiny
- 13) The \_\_\_\_\_ is connected to servers [typically powerful workstations or PCs] that play a dual role.
- a) Database
  - b) Software
  - c) Hardware
  - d) None of these
- 14) An event in an executing program where the advice associated with an aspect may be executed is known as \_\_\_\_\_.
- a) aspect
  - b) pointcut
  - c) join point model
  - d) join point

- 8) Which architecture is used when there is a high volume of transactions to be processed by the server?
- a) Master-Slave architecture
  - b) Multi-tier client-server architecture
  - c) Distributed component architecture
  - d) Peer-to-peer architecture
- 9) Which of the following term is best defined by the statement: "The names of the operations in the 'provides' and 'requires' interfaces are different."?
- a) Operation incompatibility
  - b) Operation incompleteness
  - c) Parameter incompatibility
  - d) None of these
- 10) Quality also can be looked at in terms of user satisfaction which includes \_\_\_\_.
- a) A compliant product
  - b) Good quality output
  - c) Delivery within budget and schedule
  - d) All of these
- 11) Which of the following is not a main phase in Configuration Management Process?
- a) CM Planning
  - b) Executing the CM process
  - c) CM audits
  - d) None of these
- 12) Which of the following lasts for the duration of the project and covers the development process?
- a) Taking corrective actions when needed
  - b) Monitoring all key parameters like cost, schedule, risks
  - c) Providing information on the development process in terms of metrics
  - d) All of these
- 13) Which is a black box testing technique appropriate to all levels of testing?
- a) Acceptance testing
  - b) Equivalence partitioning
  - c) Regression testing
  - d) Quality assurance
- 14) Which of the following is a common pointer problem?
- a) Data sharing errors
  - b) Accessing data elements of the wrong type
  - c) Attempting to use memory areas after freeing them
  - d) All of these

**Fourth Year (B.Tech.) (Sem-I) (New) (CBCS) Examination: Oct/Nov-2022**  
**INFORMATION TECHNOLOGY**  
**Distributed Systems**

Day & Date: Tuesday, 07-02-2023  
 Time: 02:00 PM To 05:00 PM

Max. Marks: 70

- Instructions:** 1) Q. No. 1 is compulsory. It should be solved in the first 30 minutes in answer book. Page no 03 (Starting page of the Answer Book). Each question carries one mark.  
 2) Don't forget to Mention question paper set (P/Q/R/S) on top of page.  
 3) Figures to the right indicates full marks  
 4) Assume suitable data wherever needed and mention it clearly.

**MCQ/Objective Type Questions**

Duration: 30 Minutes

Marks: 14

**Q.1 Choose the correct alternatives from the options.**

**14**

- 1) What are the characteristics of tightly coupled system?
 

i) Different clock	ii) Use communication links
iii) Same clock	iv) Distributed systems
a) i	b) i and iv
c) i, ii and iii	d) ii, iii and iv
- 2) What is not a major reason for building distributed systems?
 

a) Resource sharing	b) Computation speedup
c) Simplicity	d) Reliability
- 3) What is not true about distributed system?
 

a) All processors are synchronized
b) It is a collection of processor
c) They do not share memory
d) None of these
- 4) What are the advantages of token ring passing approach?
 

i) One processor as coordinator which handles all requests	
ii) No starvation if the ring is unidirectional	
iii) There are many messages passed per section entered if few users want to get in section	
iv) One processor as coordinator which handles all requests	
v) Only one message/entry if everyone wants to get in	
a) i	b) i, ii and iv
c) i, ii and iii	d) ii and iii
- 5) Which one of the following hides the location where in the network the file is stored?
 

a) Spy distributed file system
b) Hidden distributed file system
c) Escaped distribution file system
d) Transparent distributed file system

- 6) Which of the following two operations are provided by the IPC facility?
- a) write & delete message
  - b) receive & send message
  - c) send & delete message
  - d) delete & receive message
- 7) In the non blocking send the sending process \_\_\_\_\_.  
a) sends the message and resumes operation  
b) keeps sending until the message is received  
c) keeps sending until it receives a message  
d) none of these
- 8) The capability of a system to adapt the increased service load is called \_\_\_\_\_.  
a) Capacity  
b) Tolerance  
c) Scalability  
d) None of these
- 9) Which routing technique is used in a distributed system?  
a) fixed routing  
b) virtual routing  
c) dynamic routing  
d) All of these
- 10) If timestamps of two events are same, then the events are \_\_\_\_\_.  
a) Non-concurrent  
b) Concurrent  
c) Monotonic  
d) Non-monotonic
- 11) What are the different ways in which clients and servers are dispersed across machines?  
a) Servers may not run on dedicated machines  
b) OS cannot be distributed with the file system a part of that distribution  
c) Distribution cannot be interposed between an OS and the file system  
d) Servers and clients can be on same machines
- 12) Single coordinator approach has the following disadvantages \_\_\_\_\_.  
a) Deadlock  
b) Slow response  
c) Bottleneck  
d) One request per second
- 13) What are the characteristics of Distributed Operating system?  
a) Access is done like local resources  
b) Users are aware of multiplicity of machines  
c) They have multiple zones to access files  
d) None of these
- 14) Which are the two complementary deadlock-prevention schemes using timestamps?  
a) The wait-n-watch scheme  
b) The wait-die & wound-wait scheme  
c) The wound-wait scheme  
d) The wait-wound & wound-wait scheme

- 1) Which of the following is not a data mining functionality?
  - a) Characterization and Discrimination
  - b) Classification and regression
  - c) Selection and interpretation
  - d) Clustering and Analysis
- 2) \_\_\_\_\_ is a summarization of the general characteristics or features of a target class of data.
  - a) Data Characterization
  - b) Data Classification
  - c) Data discrimination
  - d) Data selection
- 3) The various aspects of data mining methodologies is/are \_\_\_\_\_.
  - i) Mining various and new kinds of knowledge
  - ii) Mining knowledge in multidimensional space
  - iii) Pattern evaluation and pattern or constraint-guided mining
  - iv) Handling uncertainty, noise, or incompleteness of data
  - a) i, ii and iv only
  - b) ii, iii and iv only
  - c) i, ii and iii only
  - d) All i, ii, iii and iv
- 4) The full form of KDD is \_\_\_\_\_.
  - a) Knowledge Database
  - b) Knowledge Discovery Database
  - c) Knowledge Data House
  - d) Knowledge Data Definition
- 5) Which of the following activities is NOT a data mining task?
  - a) Predicting the future stock price of a company using historical records
  - b) Monitoring and predicting failures in a hydropower plant
  - c) Extracting the frequencies of a sound wave
  - d) Monitoring the heart rate of a patient for abnormalities

c) Data discrimination                      d) Data selection
- 10) The various aspects of data mining methodologies is/are \_\_\_\_\_.  
i) Mining various and new kinds of knowledge  
ii) Mining knowledge in multidimensional space  
iii) Pattern evaluation and pattern or constraint-guided mining  
iv) Handling uncertainty, noise, or incompleteness of data  
a) i, ii and iv only                              b) ii, iii and iv only  
c) i, ii and iii only                              d) All i, ii, iii and iv
- 11) The full form of KDD is \_\_\_\_\_.  
a) Knowledge Database  
b) Knowledge Discovery Database  
c) Knowledge Data House  
d) Knowledge Data Definition
- 12) Which of the following activities is NOT a data mining task?  
a) Predicting the future stock price of a company using historical records  
b) Monitoring and predicting failures in a hydropower plant  
c) Extracting the frequencies of a sound wave  
d) Monitoring the heart rate of a patient for abnormalities
- 13) Which of the following is not a data pre-processing methods?  
a) Data Visualization                      b) Data Discretization  
c) Data Cleaning                          d) Data Reduction
- 14) The difference between supervised learning and unsupervised learning is given by \_\_\_\_\_.  
a) unlike unsupervised learning, supervised learning needs labeled data  
b) unlike unsupervised learning, supervised learning can be used to detect outliers  
c) there is no difference  
d) unlike supervised learning, unsupervised learning can form new classes

Set	Q
-----	---

**Fourth Year (B.Tech.) (Sem-I) (New) (CBCS) Examination: Oct/Nov-2022**  
**INFORMATION TECHNOLOGY ENGINEERING**  
**Data Mining**

Day & Date: Thursday, 09-02-2023  
 Time: 02:00 PM To 05:00 PM

Max. Marks: 56

**Instructions:** 1) All question are compulsory.  
 2) Figures to right indicates full marks.

**Section – I**

**Q.2 Attempt any three.** **12**

- a) What are major issues in data mining?
- b) What are major tasks in Data Preprocessing?
- c) What are the issues in classification? Explain with example.
- d) Explain frequent pattern mining.

**Q.3 Attempt any two.** **16**

- a) Use a flowchart to summarize the following procedures for attribute subset selection:
  - 1) stepwise forward selection
  - 2) stepwise backward elimination
  - 3) a combination of forward selection and backward elimination
- b) Give an example of classification using prediction.
- c) Explain KDD in detail.

**Section – II**

**Q.4 Attempt any three.** **12**

- a) How do you measure the quality of rules?
- b) What are advanced association rule techniques?
- c) Explain – BIRCH
- d) What is cluster analysis?

**Q.5 Attempt any two.** **16**

- a) What do you mean by partitioning?
- b) Describe web content mining.
- c) Elaborate the types of outliers. Identify an outlier using clustering-based outlier detection method with suitable example.

Set	R
-----	---

**Fourth Year (B.Tech.) (Sem-I) (New) (CBCS) Examination: Oct/Nov-2022**  
**INFORMATION TECHNOLOGY ENGINEERING**  
**Data Mining**

Day & Date: Thursday, 09-02-2023  
 Time: 02:00 PM To 05:00 PM

Max. Marks: 70

- Instructions:** 1) Q. No. 1 is compulsory and should be solved in first 30 minutes in Answer Book. Page No.3 (starting page of the Answer Book). Each question carry one mark.  
 2) Don't forget to mention Question Paper Set (P/Q/R/S) at the top of the same page.  
 3) Figures to the right indicates full marks.  
 4) Assume suitable data wherever needed and mention it clearly.

**MCQ/Objective Type Questions**

Duration: 30 Minutes

Marks: 14

**Q.1 Choose the correct alternatives from the options.**

**14**

- 1) This clustering algorithm terminates when mean values computed for the current iteration of the algorithm are identical to the computed mean values for the previous iteration \_\_\_\_\_.  
 a) K-Means clustering                      b) conceptual clustering  
 c) expectation maximization              d) agglomerative clustering
- 2) If a customer is spending more than expected, the customer's intrinsic value is \_\_\_\_\_ their actual value.  
 a) greater than                                  b) less than  
 c) less than or equal to                      d) equal to
- 3) A data mining algorithm is unstable if \_\_\_\_\_.  
 a) test set accuracy depends on the ordering of test set instances  
 b) the algorithm builds models unable to classify outliers  
 c) the algorithm is highly sensitive to small changes in the training data  
 d) test set accuracy depends on the choice of input attributes
- 4) This step of the KDD process model deals with noisy data \_\_\_\_\_.  
 a) creating a target dataset                  b) data preprocessing  
 c) data transformation                      d) data mining
- 5) Which of the following is not a data mining functionality?  
 a) Characterization and Discrimination  
 b) Classification and regression  
 c) Selection and interpretation  
 d) Clustering and Analysis
- 6) \_\_\_\_\_ is a summarization of the general characteristics or features of a target class of data.  
 a) Data Characterization                      b) Data Classification  
 c) Data discrimination                      d) Data selection

-----	---

**Fourth Y. (B.Tech) (Sem - II) (New) (CBCS) Examination: Oct/Nov-2022**  
**INFORMATION TECHNOLOGY ENGINEERING**  
**Information Assurance and Security**

Day & Date: Thursday, 16-02-2023  
 Time: 02:00 PM To 05:00 PM

Max. Marks: 70

- Instructions:** 1) Q. No. 1 is compulsory. It should be solved in the first 30 minutes in answer book page No. 03 (Starting page of the Answer Book). Each question carries one mark.  
 2) Don't forget to Mention question paper set (P/Q/R/S) on top of page  
 3) Assume suitable data wherever needed and mention it clearly.

**MCQ/Objective Type Questions**

Duration: 30 Minutes

Marks: 14

**Q.1 Choose the correct alternative from the options.**

**14**

- 1) A \_\_\_\_\_ is difficult to detect, because they do not allow any alteration of data.
  - i) Active attack
  - ii) Passive attack
  - iii) Network attack
  - iv) Cyber attack
- a) Only I
  - b) Only II
  - c) I and II both
  - d) I, II, IV
- 2) \_\_\_\_\_ is the protection of data from unauthorized disclosure.
  - a) Message Authentication
  - b) Data Confidentiality
  - c) Access Control
  - d) Data integrity
- 3) Encryption protects against:
  - a) Attacks
  - b) Viruses
  - c) Manipulation of data
  - d) All of the above
- 4) What is an advantage of RSA over DES?
  - a) It can provide digital signature and encryption functionality
  - b) It uses fewer resources and encrypts quicker because it uses symmetric keys
  - c) It is a block cipher versus a stream cipher
  - d) It employs a one-time encryption pad
- 5) \_\_\_\_\_ defines public key infrastructure
  - a) RFC 2822
  - b) RFA 3024
  - c) RFC 2228
  - d) None of these
- 6) Which of the following field in digital certificate is/are optional?
  - a) Certificate validity period
  - b) Subject's common name
  - c) Issuer public key
  - d) Issuer office address
- a) 1 & 2
  - b) 2 & 3
  - c) 1,3 & 4
  - d) 3 & 4

- 7) In IPSec Security association, before two parties can communicate securely, they need to establish \_\_\_\_\_.  
a) security association(SA)  
b) authentication header(AH)  
c) encapsulating security payload(ESEP)  
d) none of above
- 8) The method of cracking the password by noting the key strokes of keyboard is called \_\_\_\_\_.  
a) phishing  
b) spyware  
c) keylogging  
d) all the above
- 9) Which of these is not a type of malware?  
a) Worm  
b) Horses  
c) Virus  
d) Botnets
- 10) What are the examples of malware spreads?  
a) Social Network  
b) Pirated Software  
c) Removable Media  
d) All the above
- 11) \_\_\_\_\_ is a computer on a network which acts as an intermediary for connections with other computers on that network.  
a) Hot Spot  
b) Proxy Server  
c) Host machine  
d) Main Server machine
- 12) IP Level security encompasses three functional areas: \_\_\_\_\_, \_\_\_\_\_ and \_\_\_\_\_.  
a) Authentication confidentiality and integrity  
b) Confidentiality, integrity and Peer Authentication  
c) Authentication, confidentiality and Key Management  
d) Access Control, Resource availability and Key management
- 13) The classes of intruders identified by Anderson are:  
1. Masquerader  
2. Criminal  
3. Misfeasor  
4. Culprit  
5. Clandestine User  
a) 1,3,4, 5  
b) 1,2,3  
c) 1,3,5  
d) All of the above
- 14) The advantage of Internet of Key Exchange (IKE) Phase 1 main mode over IKE Phase 1 aggressive mode is \_\_\_\_\_.  
a) main mode uses fewer messages  
b) main mode provides greater security  
c) main mode hides the identities of the communicating entities  
d) main mode has a larger suite of options for key exchange right

**Information Assurance and Security**

Day & Date: Thursday, 16-02-2023  
 Time: 02:00 PM To 05:00 PM

Max. Marks: 56

- Instructions:** 1) All questions are compulsory.  
 2) Figures to the right indicate full marks.  
 3) Do not use pen to draw and label the diagrams.

**Section – I**

**Q.2 Attempt any three of the following** **12**

- a) Describe the model for network security stating the basic tasks in designing a particular security service.
- b) Discuss the X.509 Certificates
- c) Explain in detail with diagram:
  - i) SSL Architecture
  - ii) SSL Record Protocol and its Operation
- d) Elaborate transposition cipher and substitution cipher with an example each.

**Q.3 Answer any one** **08**

- a) Elaborate the depiction of DES Encryption Algorithm with diagram. Also highlight the strengths of DES.

**OR**

- b) Elaborate the working of Classical Feistel Network and state the parameters and design choices that determine the actual algorithm of a Feistel cipher structure.

**Q.4 Answer the following** **08**

Describe RSA algorithm for keys generation. Using RSA algorithm perform encryption and decryption for  $p=3$ ;  $q=11$ ,  $e=7$ ;  $M=5$

**Section - II**

**Q.5 Attempt any three of the following** **12**

- a) Describe the five principles services provided by PGP.
- b) Compare Kerberos 4 Vs Kerberos 5
- c) Difference between Proxy server and an anonymizer.
- d) Differentiate MIME and S/MIME.

**Q.6 Answer any one** **08**

- a) State the services provides by IPSec. Give application of IP Sec.

**OR**

- b) Define Virus. How do viruses get disseminated? Explain with diagrams.

**Q.7 Answer the following**

Describe the following:

- a) Social Engineering
- b) Cyber stalking
- c) Steganography
- d) Botnets

### MCQ/Objective Type Questions

Duration: 30 Minutes

Marks: 14

**Q.1 Choose the correct alternatives from the options.**

14

- 1) Specify the category of consumer complaints and feedback \_\_\_\_\_.  
a) Structured                                      b) Semi-structured  
c) Unstructured                                    d) Relational data
- 2) The term NoSQL was first coined by \_\_\_\_\_.  
a) Doug Laney                                     b) Carlo Strozzi  
c) Brewer    d) Gartner
- 3) In CAP Theorem, every read fetches the most recent write is \_\_\_\_\_.  
a) Consistency                                    b) Availability  
c) Partition Tolerant                            d) None of the above
- 4) "Heartbeat" message is sent by \_\_\_\_\_ node to \_\_\_\_\_ node.  
a) Data, Name                                    b) Name, Data  
c) Secondary Name, Name                    d) Name, Secondary Name
- 5) The real time processing is deals with which of the following characteristics?  
a) Volume                                         b) Volatility  
c) Variability                                      d) Velocity
- 6) The \_\_\_\_\_ technology helps query data that resides in a computer's RAM rather than data stored on physical disks.  
a) Massively Parallel Processing  
b) In-Memory analytics  
c) Symmetric Multiprocessing System  
d) Distributed Systems
- 7) Analytics 3.0 provides \_\_\_\_\_.  
a) Descriptive Statistics                      b) Predictive Statistics  
c) Prescriptive Statistics                      d) All
- 8) Which of the following command is correct when we want to fetch documents from a collection for "only those employees whose salary is either 8500 or 10000"?  
a) db.employees.find.sort({"salary": {\$in:[8500,1000]}})  
b) db.employees.find({"salary": {\$in:[8500,1000]}})  
c) db.employees.find({"salary": {"\$in:[8500,1000]"}})  
d) db.employees.find({"salary": {\$in:{8500,1000}}})

- 9) Which of the following statement is true about Cassandra?
- a) Cassandra does not have master-slave architecture
  - b) Cassandra was born at Facebook
  - c) Cassandra is highly scalable, high performance distributed database
  - d) All
- 10) Cassandra is a column-oriented database designed to supports \_\_\_\_\_ symmetric node architecture.
- a) Peer-to-peer
  - b) Master-slave
  - c) Both a & b
  - d) None of above
- 11) Pig is \_\_\_\_\_.
- a) Data Flow language
  - b) NoSQL database
  - c) Import Export tool
  - d) Scheduling engine
- 12) Hive is a \_\_\_\_\_ tool.
- a) Data Flow
  - b) Data transfer
  - c) Column-oriented
  - d) Data Warehousing
- 13) \_\_\_\_\_ analytics is used to drive direct business revenue.
- a) Basic Analytics
  - b) Operationalized Analytics
  - c) Advanced Analytics
  - d) Monetized Analytics
- 14) The most commonly used interface to interact with Hive is \_\_\_\_\_.
- a) Command Line Interface
  - b) Graphical User Interface
  - c) Both a and b
  - d) None

**Forth. Y (B. Tech) (Sem– II) (New) (CBCS) Examination: Oct/Nov-2022**  
**INFORMATION TECHNOLOGY ENGINEERING**  
**Big Data Analytics**

Day & Date: Monday, 20-02-2023  
Time: 02:00 PM To 05:00 PM

Max. Marks: 56

**Instructions:** 1) Figures to the right indicates full marks  
2) All questions are compulsory.

**Section – I**

**Q.2 Attempt any THREE.** **12**

- a) What is Big Data Analytics? Explain second schools of thought of Big Data Analytics.
- b) What are the Sources of Structured data? Why it is easy to work with structured data?
- c) Explain Hadoop Ecosystem.
- d) Discuss the challenges in Big data.

**Q.3 Attempt any TWO.** **16**

- a) Analyze anatomy of File read and File Write operations in HDFS Daemons and write steps with the diagram.
- b) Write a short note on Data Science, and CAP Theorem.
- c) What are the limitations of Hadoop 1.0 architecture? Explain YARN Architecture in detail.

**Section – II**

**Q.4 Attempt any THREE.** **12**

- a) Explain Map Reduce programming in MongoDB with suitable example.
- b) Explain Hinted Handoffs feature of Cassandra with diagram.
- c) Write difference between SQL and MongoDB.
- d) Write mongodb queries for the following operations
  - 1) Create a collection for Results with fields as: \_id, Name, Percentage, Grade.
  - 2) Insert 5 students' documents in the Results collection.
  - 3) Display the collection according to the percentage from highest to lowest.

**Q.5 Attempt any TWO.** **16**

- a) What is Pig and Pig philosophy? Describe anatomy of Pig.
- b) Explain the features of Cassandra. What are the collections in CQLSH?
- c) What is Hive? Explain Hive Architecture in detail.

Day & Date: Monday, 20-02-2023  
 Time: 02:00 PM To 05:00 PM

Max. Marks: 70

**Instructions:** 1) Q. No. 1 is compulsory and should be solved in first 30 minutes in Answer book page no.3. each question carries one marks.  
 2) Figures to the right indicates full marks.

**MCQ/Objective Type Questions**

Duration: 30 Minutes

Marks: 14

**Q.1 Choose the correct alternatives from the options.**

**14**

- 1) Which of the following command is correct when we want to fetch documents from a collection for “only those employees whose salary is either 8500 or 10000”?
  - a) db.employees.find.sort({"salary": {"\$in":[8500,1000]}})
  - b) db.employees.find({"salary": {"\$in":[8500,1000]}})
  - c) db.employees.find({"salary": {"\$in:[8500,1000]}})
  - d) db.employees.find({"salary": {"\$in:{8500,1000}}})
- 2) Which of the following statement is true about Cassandra?
  - a) Cassandra does not have master-slave architecture
  - b) Cassandra was born at Facebook
  - c) Cassandra is highly scalable, high performance distributed database
  - d) All
- 3) Cassandra is a column-oriented database designed to supports \_\_\_\_\_ symmetric node architecture.
  - a) Peer-to-peer
  - b) Master-slave
  - c) Both a & b
  - d) None of above
- 4) Pig is \_\_\_\_\_.
  - a) Data Flow language
  - b) NoSQL database
  - c) Import Export tool
  - d) Scheduling engine
- 5) Hive is a \_\_\_\_\_ tool.
  - a) Data Flow
  - b) Data transfer
  - c) Column-oriented
  - d) Data Warehousing
- 6) \_\_\_\_\_ analytics is used to drive direct business revenue.
  - a) Basic Analytics
  - b) Operationalized Analytics
  - c) Advanced Analytics
  - d) Monetized Analytics
- 7) The most commonly used interface to interact with Hive is \_\_\_\_\_.
  - a) Command Line Interface
  - b) Graphical User Interface
  - c) Both a and b
  - d) None
- 8) Specify the category of consumer complaints and feedback \_\_\_\_\_.
  - a) Structured
  - b) Semi-structured
  - c) Unstructured
  - d) Relational data

- 9) The term NoSQL was first coined by \_\_\_\_\_.
  - a) Doug Laney
  - b) Carlo Strozzi
  - c) Brewer
  - d) Gartner
- 10) In CAP Theorem, every read fetches the most recent write is \_\_\_\_\_.
  - a) Consistency
  - b) Availability
  - c) Partition Tolerant
  - d) None of the above
- 11) "Heartbeat" message is sent by \_\_\_\_\_ node to \_\_\_\_\_ node.
  - a) Data, Name
  - b) Name, Data
  - c) Secondary Name, Name
  - d) Name, Secondary Name
- 12) The real time processing is deals with which of the following characteristics?
  - a) Volume
  - b) Volatility
  - c) Variability
  - d) Velocity
- 13) The \_\_\_\_\_ technology helps query data that resides in a computer's RAM rather than data stored on physical disks.
  - a) Massively Parallel Processing
  - b) In-Memory analytics
  - c) Symmetric Multiprocessing System
  - d) Distributed Systems
- 14) Analytics 3.0 provides \_\_\_\_\_.
  - a) Descriptive Statistics
  - b) Predictive Statistics
  - c) Prescriptive Statistics
  - d) All

 2) Don't forget to Mention question paper set (P/Q/R/S) on top of page.  
 3) Figures to the right indicates full marks.

**MCQ/Objective Type Questions**

Duration: 30 Minutes

Marks: 14

**Q.1 Choose the correct alternatives from the options.**

**14**

- 1) Which of the following is considered an essential element in cloud computing by CSA?
  - a) Multi-tenancy
  - b) Identity and access management
  - c) Virtualization
  - d) All of these
- 2) Which of the following mechanisms are contained by Cloud API for accessing cloud services?
  - a) Abstraction
  - b) Authentication
  - c) Replication
  - d) All of these
- 3) Which of the following object database has the ability to create rich data objects and create relationships between them?
  - a) Presentation Builder
  - b) Business Objects Build
  - c) Business Process Designer
  - d) None of these
- 4) The technology used to distribute service requests to resources is referred to as \_\_\_\_\_.
  - a) Load performing
  - b) Load scheduling
  - c) Load balancing
  - d) All of these
- 5) Which of the following can be considered PaaS offering?
  - a) Google Maps
  - b) Gmail
  - c) Google Earth
  - d) All of these
- 6) Point out the wrong statement.
  - a) A cloud is defined as the combination of the infrastructure of a datacentre with the ability to provision hardware and software
  - b) High touch applications are best done on-premises
  - c) The Google App Engine follows IaaS
  - d) None of the mentioned
- 7) All cloud computing applications suffer from the inherent \_\_\_\_\_ that is intrinsic in their WAN connectivity.
  - a) Propagation
  - b) Latency
  - c) Noise
  - d) All of these

- 8) \_\_\_\_\_ as a utility is a dream that dates from the beginning of the computing industry itself.
- a) Model
  - b) Computing
  - c) Software
  - d) All of these
- 9) Which of the following is essential concept related to Cloud?
- a) Reliability
  - b) Productivity
  - c) Abstraction
  - d) All of these
- 10) \_\_\_\_\_ is a complete operating environment with applications, management and user interface.
- a) IaaS
  - b) SaaS
  - c) PaaS
  - d) All of these
- 11) Point out the correct statement.
- a) Identities are not tied to the concept of accounts and can be used for contacts or "ID cards"
  - b) Identities are important from a reliability standpoint
  - c) Presence is important in cloud computing because it adds context that can modify services and service delivery
  - d) All of the mentioned
- 12) Which of the following standard is the key to creating Single Sign-On (SSO) systems?
- a) OpenID 2.0
  - b) CHAP
  - c) SMAL
  - d) All of these
- 13) Which of the following is required by Cloud Computing?
- a) That you establish an identity
  - b) That the identity be authenticated
  - c) That the authentication be portable
  - d) All of these
- 14) Point out the wrong statement.
- a) You can use proxy and brokerage services to separate clients from direct access to shared cloud storage
  - b) Any distributed application has a much greater attack surface than an application that is closely held on a Local Area Network
  - c) Cloud computing doesn't have vulnerabilities associated with Internet applications
  - d) All of these

Set **Q**

**Fourth Y. (B. Tech) (Sem - II) (New) (CBCS) Examination: Oct/Nov-2022**  
**INFORMATION TECHNOLOGY ENGINEERING**  
**Cloud Computing**

Day & Date: Monday, 20-02-2023  
 Time: 02:00 PM To 05:00 PM

Max. Marks: 70

**Instructions:** 1) All questions are compulsory.  
 2) Figures to the right indicates full marks.

**Section – I**

**Q.2 Attempt any THREE.** **12**

- a) Draw & illustrate the cloud deployment models?
- b) Explain in detail CloudStack architecture and its compute, storage, networking, and IAM services?
- c) Define IAM. Explain in detail the cloud service provider IAM.
- d) Explain Financial and technological implications of running an application on public cloud.

**Q.3** Explain in detail the designing elastic, highly available and resilient infrastructure using OpenStack w.r.t. private cloud? **08**

**OR**

Explain with example the IaaS, PaaS and SaaS availability management & the role of virtualization?

**Q.4 Attempt any TWO.** **08**

- a) Benefits and Challenges of Cloud Computing.
- b) Characteristics of Private Cloud & its deployment models.
- c) Why Public Cloud, When to opt for Public Cloud?

**Section – II**

**Q.5 Attempt any THREE.** **12**

- a) Explain the security concerns in Traditional IT. Also illustrate the challenges in Cloud Computing in terms of Application Security.
- b) Explain in detail Abuse and Nefarious use of Cloud Computing.
- c) Explain the compliance relation to the cloud computing.
- d) Explain the international laws and regulations for cloud privacy.

**Q.6** Explain with example establishing your Cloud Vision, Buying Cloud Services understanding cloud risk? **08**

**OR**

Explain in detail Selection criteria for cloud deployment, issues/risks in migrating to cloud computing?

**Q.7 Attempt any TWO.** **08**

- a) Migration paths for cloud
- b) Building ROI from Cloud Computing
- c) Security reference model

Day & Date: Monday, 20-02-2023  
 Time: 02:00 PM To 05:00 PM

Max. Marks: 70

- Instructions:** 1) Q. No. 1 is compulsory. It should be solved in the first 30 minutes in answer book. Page no 03 (Starting page of the Answer Book). Each question carries one mark.  
 2) Don't forget to Mention question paper set (P/Q/R/S) on top of page.  
 3) Figures to the right indicates full marks.

**MCQ/Objective Type Questions**

Duration: 30 Minutes

Marks: 14

**Q.1 Choose the correct alternatives from the options.**

**14**

- 1) Point out the correct statement.
  - a) Identities are not tied to the concept of accounts and can be used for contacts or "ID cards"
  - b) Identities are important from a reliability standpoint
  - c) Presence is important in cloud computing because it adds context that can modify services and service delivery
  - d) All of the mentioned
- 2) Which of the following standard is the key to creating Single Sign-On (SSO) systems?
 

a) OpenID 2.0	b) CHAP
c) SMAL	d) All of these
- 3) Which of the following is required by Cloud Computing?
  - a) That you establish an identity
  - b) That the identity be authenticated
  - c) That the authentication be portable
  - d) All of these
- 4) Point out the wrong statement.
  - a) You can use proxy and brokerage services to separate clients from direct access to shared cloud storage
  - b) Any distributed application has a much greater attack surface than an application that is closely held on a Local Area Network
  - c) Cloud computing doesn't have vulnerabilities associated with Internet applications
  - d) All of these
- 5) Which of the following is considered an essential element in cloud computing by CSA?
  - a) Multi-tenancy
  - b) Identity and access management
  - c) Virtualization
  - d) All of these

- 6) Which of the following mechanisms are contained by Cloud API for accessing cloud services?
- a) Abstraction
  - b) Authentication
  - c) Replication
  - d) All of these
- 7) Which of the following object database has the ability to create rich data objects and create relationships between them?
- a) Presentation Builder
  - b) Business Objects Build
  - c) Business Process Designer
  - d) None of these
- 8) The technology used to distribute service requests to resources is referred to as \_\_\_\_\_.
- a) Load performing
  - b) Load scheduling
  - c) Load balancing
  - d) All of these
- 9) Which of the following can be considered PaaS offering?
- a) Google Maps
  - b) Gmail
  - c) Google Earth
  - d) All of these
- 10) Point out the wrong statement.
- a) A cloud is defined as the combination of the infrastructure of a datacentre with the ability to provision hardware and software
  - b) High touch applications are best done on-premises
  - c) The Google App Engine follows IaaS
  - d) None of the mentioned
- 11) All cloud computing applications suffer from the inherent \_\_\_\_\_ that is intrinsic in their WAN connectivity.
- a) Propagation
  - b) Latency
  - c) Noise
  - d) All of these
- 12) \_\_\_\_\_ as a utility is a dream that dates from the beginning of the computing industry itself.
- a) Model
  - b) Computing
  - c) Software
  - d) All of these
- 13) Which of the following is essential concept related to Cloud?
- a) Reliability
  - b) Productivity
  - c) Abstraction
  - d) All of these
- 14) \_\_\_\_\_ is a complete operating environment with applications, management and user interface.
- a) IaaS
  - b) SaaS
  - c) PaaS
  - d) All of these

- Instructions:** 1) Figures to the right indicates full marks  
 2) All questions are compulsory.  
 3) Assume appropriate data if necessary.

**Section – I**

**Q.2 Attempt any Three**

**12**

- Which words will be retrieved from the given set allowing edit distance of 2? Justify the answer.
  - Words = {pink, pinky, panthor, patt, prank}
  - Entered word = pank
- Define Information Retrieval Model. Define ranking function for three classic text retrieval models.
- Define pattern and explain different patterns used for matching with example.
- Explain how queries are expanded with vector model using user relevance feedback.

**Q.3 Attempt any one**

**08**

- Explain steps of document preprocessing with neat diagram.
- Suppose you have a collection of 50 documents, of which you know 10 are relevant to a specific query Q. Consider the following results from a search of this collection using this query Q, which retrieved a total of 30 documents. Calculate Precision and Recall and plot a graph. Dot indicates relevant documents

Doc 10	Doc20	Doc30

- Q.4** Find Logical View for each document using full text and Create weight vectors using vector model. **08**

D1: You say goodbye, I say hello

D2: You say stop, I say go

D3: Hello, hello, you say goodbye

D4: I say high, you say low

### Section – II

- Q.5 Attempt any three** **12**

- Create suffix Trie and suffix tree for following words  
cup, cat, captain, casserole, dog, goat, duck
- Define crawler. Explain different techniques used in crawling.
- Find the occurrences of pattern in the text using BM algorithm. Show stepwise result.  
Text: aabababacba                      Pattern: abbab
- What do you mean by Ranking? Explain ranking algorithm used by Google search engine.

- Q.6 Attempt any one** **08**

- Explain MULTOS model in detail with example. How image data is dealt in MULTOS model.
- Bit masks for words are

data : 0000 0000 0000 0010 0000

base : 0000 0001 0000 0000 0000

management : 0000 1000 0000 0000 0000

system : 0000 0000 0000 0000 1000

software : 1000 0000 0000 0000 0000

Construct signature file for the following text:

Data base management system is used to manage data base. This System is software for storing and retrieving users' data by considering appropriate data.

Find search results for following queries using constructed signature file:

- data base management
- software

- Q.7 Construct inverted index file using word position.** **08**

Doc1: A query is a formulation of a user information need. In its simplest form, a query is composed of keywords and the documents containing such keywords are searched for.

Doc2: Information retrieval (IR) is the activity of obtaining information system resources that are relevant to an information need from a collection of those resources.

Which documents will be retrieved for the query: Information need (as Phrase)?

- Q.4** Find Logical View for each document using full text and Create weight vectors using vector model. **08**

D1: You say goodbye, I say hello

D2: You say stop, I say go

D3: Hello, hello, you say goodbye

D4: I say high, you say low

### Section – II

- Q.5 Attempt any three** **12**

- Create suffix Trie and suffix tree for following words  
cup, cat, captain, casserole, dog, goat, duck
- Define crawler. Explain different techniques used in crawling.
- Find the occurrences of pattern in the text using BM algorithm. Show stepwise result.  
Text: aabababacba                      Pattern: abbab
- What do you mean by Ranking? Explain ranking algorithm used by Google search engine.

- Q.6 Attempt any one** **08**

- Explain MULTOS model in detail with example. How image data is dealt in MULTOS model.
- Bit masks for words are

data : 0000 0000 0000 0010 0000

base : 0000 0001 0000 0000 0000

management : 0000 1000 0000 0000 0000

system : 0000 0000 0000 0000 1000

software : 1000 0000 0000 0000 0000

Construct signature file for the following text:

Data base management system is used to manage data base. This System is software for storing and retrieving users' data by considering appropriate data.

Find search results for following queries using constructed signature file:

- data base management
- software

- Q.7 Construct inverted index file using word position.** **08**

Doc1: A query is a formulation of a user information need. In its simplest form, a query is composed of keywords and the documents containing such keywords are searched for.

Doc2: Information retrieval (IR) is the activity of obtaining information system resources that are relevant to an information need from a collection of those resources.

Which documents will be retrieved for the query: Information need (as Phrase)?

**Fourth Y. (B.Tech.) (Sem - II) (New) (CBCS) Examination: Oct/Nov-2022**  
**INFORMATION TECHNOLOGY ENGINEERING**  
**Information Retrieval**

Day & Date: Wednesday, 22-02-2023  
 Time: 02:00 PM To 05:00 PM

Max. Marks: 70

- Instructions:** 1) Q. No. 1 is compulsory. It should be solved in the first 30 minutes in answer book. Page no 03 (Starting page of the Answer Book). Each question carries one mark.  
 2) Don't forget to Mention question paper set (P/Q/R/S) on top of page.  
 3) Figures to the right indicates full marks  
 4) Assume suitable data wherever needed and mention it clearly.

**MCQ/Objective Type Questions**

Duration: 30 Minutes

Marks: 14

**Q.1 Choose the correct alternatives from the options.**

**14**

- 1) Exact match retrieval is same as \_\_\_\_\_.  
 a) Attribute predicate                      b) structural predicate  
 c) semantic predicate                      d) none of these
- 2) Find Euclidean distance between two objects.  
 O1= (1,2,3,4,5,6,7)  
 O2= (2,4,5,7,1,3,6)  
 a) 6.63    b) 0.00  
 c) 16.00    d) 4.00
- 3) Articles, prepositions are removed this step is \_\_\_\_\_ in logical view.  
 a) Removing stop-words                      b) creating noun groups  
 c) Stemming                                      d) structure recognition
- 4) While searching keywords in \_\_\_\_\_ retrieval small errors are likely to go unnoticed.  
 a) Multimedia                                      b) Information  
 c) data    d) all
- 5) Prefix Value for **a (underlined)** in pattern ababaca is \_\_\_\_\_.  
 a) 0    b) 1  
 c) 2    d) 3
- 6) \_\_\_\_\_ indexing structure takes sampling of words instead of complete words to reduce space and external accesses.  
 a) inverted index                                      b) suffix array  
 c) suffix tree    d) supra-index
- 7) Drawback of crawler-indexer architecture is problem in gathering data due to \_\_\_\_\_.  
 a) Highly dynamic data                      b) High load at server  
 c) Saturated communication links      d) All of the above
- 8) In \_\_\_\_\_ algorithm Match and occurrence heuristic combined while sequential searching.  
 a) KMP    b) BM  
 c) BDM    d) Shift-Or

## Marks:14

14

- Page 1 of 16

- 8) What is the main purpose of reactance diagram?
- a) Load flow analysis
  - b) Fault analysis
  - c) Calculation of ratings of Alternators Transformers
  - d) Calculation of rating of
- 9) A 3-ph system is called balanced, when it consists of ---
- a) Zero and Negative sequence current only
  - b) Negative and Positive sequence current only
  - c) Positive sequence current only
  - d) Zero sequence current only
- 10) The line currents in a 3-ph unbalanced load are  $I_a = 4 + j6$ ,  $I_b = 2 - j2$  and  $I_c = -3 + j2$  then zero sequence component of current will be
- a)  $3 + j6$
  - b)  $9 + j10$
  - c)  $1 + j2$
  - d)  $3 - j6$
- 11) What do you mean by fault level?
- a) Fault Current
  - b) Fault MVA
  - c) Fault Power Factor
  - d) Voltage at fault point
- 12) The magnitude of fault current depends upon
- a) Total impedance up to fault
  - b) Voltage at the fault
  - c) Load current supplied before fault
  - d) a and b both
- 13) Transient stability can be improved by
- a) Introducing series reactance
  - b) Introducing series capacitance
  - c) Both a and b
  - d) None of the above
- 14) The plot between power angle and time is ----
- a) Swing curve
  - b) Power curve
  - c) Critical clearing angle
  - d) Time curve

Day & Date: Wednesday, 25-01-2023  
 Time: 10:00 AM To 01:00 PM

Max. Marks: 56

**Instructions:** 1) All question are compulsory.  
 2) Figures to the right indicate full marks.

**Section – I**

**Q.2 Solve any Four of the following.**

16

- a) Express the representation of transformer model in per unit system  
 b) Form the  $Y_{bus}$  for given data

Line	R	X
1-2	0.05	0.15
1-3	0.10	0.20
2-3	0.15	0.30
2-4	0.05	0.25
3-4	0.10	0.35

- c) Explain with sequence network various open circuit faults on the power system.  
 d) A 25 MVA, 13.2 kV alternators with solidly grounded neutral has a sub transient reactance of 0.25 p.u. The negative and zero sequence reactance's are 0.35 and 0.1 p.u. respectively. A single line to ground fault occurs at the terminals of an Unloaded alternator; determine the fault current and the line-to-line voltages. Neglect resistance.  
 e) Explain with suitable example how admittance matrix is derived  
 f) Explain per unit representation of 3-ph supply system.

**Q.3 Solve any Two of the following.**

12

- a) Explain in detail the computational procedure for load flow solution using N-R method when system contains all type buses.  
 b) For a power system the system data for load flow solution is as below. Determine the voltages at the end of first iteration using Gauss-Seidel method. ( $\alpha = 1.6$ )

Bus	Admittance	Bus	P	Q	V	Remark
1 - 2	2 - j8.0	1	--	--	1.06	Slack
1 - 3	1 - j4.0	2	0.5	0.2	--	PQ
2 - 3	0.66 - j0.66	3	0.4	0.3	--	PQ
2 - 4	1-j4.0	4	0.3	0.1	--	PQ
3 - 4	2 - j8.0					

- c) Draw the reactance diagram for the system shown in figure. Where component ratings are given as G: 20 MVA, 6.6 kV,  $X'' = 12\%$ ,  $T_1$ : 20 MVA, 6.6 kV/66kV,  $x = 08\%$ ,  $T_2$ : 66/6.6kV,  $X = 08\%$ ,  $M_1$  and  $M_2 = 5$  MVA, 6.6kV,  $X'' = 20\%$ ,  $X_{TL} = j60 \text{ Ohms}$ .

### Section - II

#### Q.4 Solve Any Three of the following.

12

- Explain the terms
  - Swing curve
  - Critical clearing time
- Derive an expression for the system for line to line fault on generator.
- Derive an expression for symmetrical components in terms of phase voltages.
- Compare symmetrical and unsymmetrical faults

#### Q.5 Solve Any Two of the following.

16

- Derive an expression with sequence network of the system for
  - L-L fault on generator
  - L-L-G fault on generator
- Derive an expression for load flow analysis by Gauss-Seidal method.
- A salient pole synchronous machine having  $X_d = 0.6 \text{ P.U.}$  and  $X_q = 0.4 \text{ P.U.}$  per phase, is operated from an infinite bus of voltage 1 P.U. if the excitation voltage is 1.1 P.U. find the steady state stability limit and the angle at which it occurs.

2 - 4	1-j4.0	4	0.3	0.1	--	PQ
3 - 4	2 - j8.0					

- c) Draw the reactance diagram for the system shown in figure. Where component ratings are given as G: 20 MVA, 6.6 kV,  $X'' = 12\%$ ,  $T_1$ : 20 MVA, 6.6 kV/66kV,  $x = 08\%$ ,  $T_2$ : 66/6.6kV,  $X = 08\%$ ,  $M_1$  and  $M_2 = 5$  MVA, 6.6kV,  $X'' = 20\%$ ,  $X_{TL} = j60 \text{ Ohms}$ .

### Section - II

#### Q.4 Solve Any Three of the following.

12

- Explain the terms
  - Swing curve
  - Critical clearing time
- Derive an expression for the system for line to line fault on generator.
- Derive an expression for symmetrical components in terms of phase voltages.
- Compare symmetrical and unsymmetrical faults

#### Q.5 Solve Any Two of the following.

16

- Derive an expression with sequence network of the system for
  - L-L fault on generator
  - L-L-G fault on generator
- Derive an expression for load flow analysis by Gauss-Seidal method.
- A salient pole synchronous machine having  $X_d = 0.6 \text{ P.U.}$  and  $X_q = 0.4 \text{ P.U.}$  per phase, is operated from an infinite bus of voltage 1 P.U. if the excitation voltage is 1.1 P.U. find the steady state stability limit and the angle at which it occurs.

**T.Y. (B.Tech.) (Sem - I) (New) (CBCS) Examination: Oct/Nov-2022**  
**ELECTRICAL ENGINEERING**  
**Power System - III**

Day & Date: Wednesday, 25-01-2023  
 Time: 10:00 AM To 01:00 PM

Max. Marks: 70

**Instructions:** 1) Q. No. 1 is compulsory. It should be solved in the first 30 minutes in answer book. Page no 03 (Starting page of the Answer Book). Each question carries one mark.  
 2) Don't forget to Mention question paper set (P/Q/R/S) on top of page.

**MCQ/Objective Type Questions**

Duration: 30 Minutes

Marks:14

**Q.1 Choose the correct alternatives from the given options.**

**14**

- 1) What will be the base impedance for a 10kV, 10MVA 3-Ph System?
  - a) 7 Ohms
  - b) 10 Ohms
  - c) 01 kilo Ohms
  - d) 100 Ohms
- 2) Which of the following formula is correct?
  - a)  $kVA = \sqrt{(kW)^2 + (kVAR)^2}$
  - b)  $kW = kVA \cos\phi$
  - c)  $kVAR = kVA \sin\phi$
  - d) All above
- 3) What is the main purpose of reactance diagram?
  - a) Load flow analysis
  - b) Fault analysis
  - c) Calculation of ratings of Alternators Transformers
  - d) Calculation of rating of
- 4) A 3-ph system is called balanced, when it consists of ---
  - a) Zero and Negative sequence current only
  - b) Negative and Positive sequence current only
  - c) Positive sequence current only
  - d) Zero sequence current only
- 5) The line currents in a 3-ph unbalanced load are  $I_a = 4 + j6$ ,  $I_b = 2 - j2$  and  $I_c = -3 + j2$  then zero sequence component of current will be
  - a)  $3 + j6$
  - b)  $9 + j10$
  - c)  $1 + j2$
  - d)  $3 - j6$
- 6) What do you mean by fault level?
  - a) Fault Current
  - b) Fault MVA
  - c) Fault Power Factor
  - d) Voltage at fault point
- 7) The magnitude of fault current depends upon
  - a) Total impedance up to fault
  - b) Voltage at the fault
  - c) Load current supplied before fault
  - d) a and b both
- 8) Transient stability can be improved by
  - a) Introducing series reactance
  - b) Introducing series capacitance
  - c) Both a and b
  - d) None of the above

**Power System - III**

Day & Date: Wednesday, 25-01-2023  
 Time: 10:00 AM To 01:00 PM

Max. Marks: 56

**Instructions:** 1) All question are compulsory.  
 2) Figures to the right indicate full marks.

**Section – I**

**Q.2 Solve any Four of the following.**

16

- a) Express the representation of transformer model in per unit system  
 b) Form the  $Y_{bus}$  for given data

Line	R	X
1-2	0.05	0.15
1-3	0.10	0.20
2-3	0.15	0.30
2-4	0.05	0.25
3-4	0.10	0.35

- c) Explain with sequence network various open circuit faults on the power system.  
 d) A 25 MVA, 13.2 kV alternators with solidly grounded neutral has a sub transient reactance of 0.25 p.u. The negative and zero sequence reactance's are 0.35 and 0.1 p.u. respectively. A single line to ground fault occurs at the terminals of an Unloaded alternator; determine the fault current and the line-to-line voltages. Neglect resistance.  
 e) Explain with suitable example how admittance matrix is derived  
 f) Explain per unit representation of 3-ph supply system.

**Q.3 Solve any Two of the following.**

12

- a) Explain in detail the computational procedure for load flow solution using N-R method when system contains all type buses.  
 b) For a power system the system data for load flow solution is as below. Determine the voltages at the end of first iteration using Gauss-Seidel method. ( $\alpha = 1.6$ )

Bus	Admittance	Bus	P	Q	V	Remark
1 - 2	2 - j8.0	1	--	--	1.06	Slack
1 - 3	1 - j4.0	2	0.5	0.2	--	PQ
2 - 3	0.66 - j0.66	3	0.4	0.3	--	PQ
2 - 4	1-j4.0	4	0.3	0.1	--	PQ
3 - 4	2 - j8.0					

- c) Draw the reactance diagram for the system shown in figure. Where component ratings are given as G: 20 MVA, 6.6 kV,  $X'' = 12\%$ ,  $T_1$ : 20 MVA, 6.6 kV/66kV,  $x = 08\%$ ,  $T_2$ : 66/6.6kV,  $X = 08\%$ ,  $M_1$  and  $M_2 = 5$  MVA, 6.6kV,  $X'' = 20\%$ ,  $X_{TL} = j60 \text{ Ohms}$ .

### Section - II

#### Q.4 Solve Any Three of the following.

12

- Explain the terms
  - Swing curve
  - Critical clearing time
- Derive an expression for the system for line to line fault on generator.
- Derive an expression for symmetrical components in terms of phase voltages.
- Compare symmetrical and unsymmetrical faults

#### Q.5 Solve Any Two of the following.

16

- Derive an expression with sequence network of the system for
  - L-L fault on generator
  - L-L-G fault on generator
- Derive an expression for load flow analysis by Gauss-Seidal method.
- A salient pole synchronous machine having  $X_d = 0.6 \text{ P.U.}$  and  $X_q = 0.4 \text{ P.U.}$  per phase, is operated from an infinite bus of voltage 1 P.U. if the excitation voltage is 1.1 P.U. find the steady state stability limit and the angle at which it occurs.

**P**

- 9) The position and velocity errors of a type-2 system are \_\_\_\_\_.  
a) constant, constant                      b) constant, infinity  
c) zero, constant                            d) zero, zero
- 10) Velocity error constant of a system is measured when the input to the system is unit \_\_\_\_\_ function.  
a) parabolic                                      b) ramp  
c) impulse                                        d) step
- 11) Which of the following is the best method for determining the stability & transient response?  
a) Root locus                                      b) Bode plot  
c) Nyquist plot                                    d) None of the above
- 12) Phase margin of a system is used to specify which of the following?  
a) Frequency response                        b) Absolute stability  
c) Relative stability                            d) Time response
- 13) In case of type-1 system steady state acceleration is \_\_\_\_\_.  
a) unity    b) infinity  
c) zero    d) 10
- 14) \_\_\_\_\_ technique gives quick transient and stability response.  
a) Root locus                                      b) Bode  
c) Nyquist    d) Nichols

 2) Figure to the right indicates full marks.

**Section – I**

**Q.2 Solve any four.**

**16**

a) Using block diagram reduction technique, find the Transfer function.

- b) Explain the sensitivity of the control system. Derive it for open loop control system.
- c) Derive the expression for transfer function of simple feedback system.
- d) Explain terminologies used in signal flow graph.
- e) Define transfer function. Find the transfer function of below system.

**Q.3 Solve any two.**

- a) By using Mason's Gain formula find the transfer function of the system below

- b) Explain Force Voltage (F-V) Analogy with neat diagram.  
c) Derive the transfer function of the system shown below.

**Section – II****Q.4 Solve Any Four.**

16

- a) Explain the Angle criteria and magnitude criteria for root locus.  
b) Define The following terms.  
1) Phase margin  
2) Phase cross over frequency  
3) Gain margin  
4) gain cross over frequency  
c) A second order system is given by  $\frac{C(s)}{R(s)} = \frac{25}{s^2 + 5s + 25}$   
Find damping factor, damped frequency of oscillations.  
d) Determine the stability of the system having characteristic equation as  $s^3 + 6s^2 + 12s + 8 = 0$   
e) What are the different types of controllers?

**Q.5 Solve Any Two.**

12

- a) Draw the root locus for the unity feedback system with  
$$G(s) = \frac{k}{s(s+1)(s+3)}$$
  
comment on stability.

- b)** A unity feedback system has  $G(s) = \frac{2(s+3)}{(s+1)(s+6)}$

Determine:

- 1) Type of system
- 2) All error constants
- 3) Steady state Error Error when subjected to a step of magnitude '2'

- c)** Construct The Bode Plot For The System Below.

Determine:

- 1) Gain crossover frequency
- 2) The phase crossover frequency
- 3) Gain margin
- 4) Phase margin

$$G(S)H(S) = \frac{10}{s(1 + s)(10 + s)}$$

**MCQ/Objective Type Questions**

Duration: 30 Minutes

Marks: 14

**Q.1 Choose the correct alternatives from the options.**

**14**

- 1) The type 2 system has \_\_\_\_\_ at the origin.
  - a) no net pole
  - b) net pole
  - c) simple pole
  - d) two poles
- 2) The position and velocity errors of a type-2 system are \_\_\_\_\_.
  - a) constant, constant
  - b) constant, infinity
  - c) zero, constant
  - d) zero, zero
- 3) Velocity error constant of a system is measured when the input to the system is unit \_\_\_\_\_ function.
  - a) parabolic
  - b) ramp
  - c) impulse
  - d) step
- 4) Which of the following is the best method for determining the stability & transient response?
  - a) Root locus
  - b) Bode plot
  - c) Nyquist plot
  - d) None of the above
- 5) Phase margin of a system is used to specify which of the following?
  - a) Frequency response
  - b) Absolute stability
  - c) Relative stability
  - d) Time response
- 6) In case of type-1 system steady state acceleration is \_\_\_\_\_.
  - a) unity
  - b) infinity
  - c) zero
  - d) 10
- 7) \_\_\_\_\_ technique gives quick transient and stability response.
  - a) Root locus
  - b) Bode
  - c) Nyquist
  - d) Nichols
- 8) The transient response of a system is mainly due to \_\_\_\_\_.
  - a) inertia forces
  - b) internal forces
  - c) stored energy
  - d) friction
- 9) \_\_\_\_\_ signal will become zero when the feedback signal and reference signs are equal.
  - a) Input
  - b) Actuating
  - c) Feedback
  - d) Reference

- 10)** The transfer function is applicable to which of the following?
- a) Linear and time-invariant systems
  - b) Linear and time-variant systems
  - c) Linear systems
  - d) Non-linear systems
  - e) None of the above
- 11)** With feedback \_\_\_\_\_ increases.
- a) system stability
  - b) sensitivity
  - c) gain
  - d) effects of disturbing signals
- 12)** By which of the following the system response can be tested better?
- a) Ramp input signal
  - b) Sinusoidal input signal
  - c) Unit impulse input signal
  - d) Exponentially decaying signal
- 13)** Spring constant in force-voltage analogy is analogous to \_\_\_\_\_.
- a) capacitance
  - b) reciprocal of capacitance
  - c) current
  - d) resistance
- 14)** Static error co-efficients are used as a measure of the effectiveness of closed loop systems for specified \_\_\_\_\_ input signal.
- a) acceleration
  - b) velocity
  - c) position
  - d) all of the above

**T.Y (B.Tech.) (Semester -I) (New) (CBCS) Examination: Oct/Nov-2022**  
**ELECTRICAL ENGINEERING**  
**Advanced Microcontroller System**

Day & Date: Friday, 24-02-2023  
 Time: 10:00 AM To 01:00 PM

Max. Marks: 56

- Instructions:** 1) Both Section are compulsory.  
 2) Figures to the right indicates full marks.  
 3) Assume suitable data if necessary.

**Section – I**

**Q.2 Attempt any Four questions:** **16**

- a) Draw and explain the block diagram of digital computer.
- b) Compare Microprocessor and Microcontroller.
- c) Explain different addressing modes of instructions of 8051 microcontroller.
- d) Write an ALP to transfer 10 bytes of data from RAM location 40H to location 50H in 8051 microcontroller.
- e) Mention and explain serial port special function registers of 8051 microcontroller.

**Q.3 Attempt any two questions:** **12**

- a) Draw and explain architecture of 8051 microcontroller in detail.
- b) Explain the following instruction mnemonics of 8051 with examples: MOVX, ANL, RRC, ADC, DJNZ, ACALL
- c) Explain different types of memories of micro-computer systems.

**Section - II**

**Q.4 Attempt any four questions.** **16**

- a) Draw the interfacing diagram of Program ROM of 8KB and Data ROM of 8KB to 8051 microcontroller and also mention the address range of interfaced memory.
- b) Mention the features of PIC 16F877A microcontroller.
- c) Explain the following:
  - 1) Register file of ARM processor
  - 2) cpsr register of ARM processor
- d) Write an assembly language program to generate square wave using DAC 0808 and also draw the interfacing diagram.
- e) Explain memory organization of PIC 16F877A microcontroller.

**Q.5 Attempt any two questions.** **12**

- a) Draw the interfacing diagram of 16 x 2 LCD display with 8051 microcontroller and write ALP to display "SAVE EARTH" on lcd display.
- b) Draw the interfacing of DC motor with 8051 microcontroller. Write, an ALP; SW switch is connected at P2.7 and if SW=0, rotate DC motor in clockwise and if SW=1, rotate DC motor in counter clockwise.
- c) Explain pipelining concept in ARM processor.

**Seat  
No.**

Max. Marks: 70

- 8) How many bytes of bit addressable memory is present in 8051 based microcontroller?
  - a) 8 bytes
  - b) 32 bytes
  - c) 16 bytes
  - d) 128 bytes
- 9) If TMOD=10H, choose the correct alternative \_\_\_\_\_.
  - a) Timer0 in mode1
  - b) Timer1 in mode0
  - c) Timer1 in mode1
  - d) Timer0 in mode 2
- 10) Which architecture provides separate buses for program and data memory?
  - a) Harvard Architecture
  - b) Von Neumann Architecture
  - c) RISC architecture
  - d) None of these
- 11) Microprocessor 8085 has internal memory; State whether True or False.
  - a) True
  - b) False
- 12) DPTR stores \_\_\_\_\_ bit memory address in it.
  - a) 8
  - b) 12
  - c) 16
  - d) 32
- 13) On reset ports of 8051 microcontroller are initialized to \_\_\_\_\_ data.
  - a) 07h
  - b) 09h
  - c) 00h
  - d) FFh
- 14) MUL AB instruction, in A register \_\_\_\_\_ byte of result is stored and in B register \_\_\_\_\_ byte of result is stored.
  - a) higher, lower
  - b) lower, higher
  - c) lower, lower
  - d) None

## Marks:14

14

- Page 1 of 17

- 9) Biot Savart law in magnetic field is analogous to \_\_\_\_\_ in electric field.
- a) Gauss law
  - b) Faraday law
  - c) Coulomb law
  - d) Ampere law
- 10) Maxwell equation that is valid in any conductor is \_\_\_\_\_.
- a)  $\text{Curl}(\mathbf{H}) = \mathbf{Jc}$
  - b)  $\text{Curl}(\mathbf{E}) = \mathbf{Jc}$
  - c)  $\text{Curl}(\mathbf{E}) = \mathbf{Jd}$
  - d)  $\text{Curl}(\mathbf{H}) = \mathbf{Jd}$
- 11) In the conversion of line integral of  $\mathbf{H}$  into surface integral, \_\_\_\_\_ theorem is used.
- a) Divergence Theorem
  - b) Gauss Theorem
  - c) Stokes Theorem
  - d) It cannot be converted
- 12) The curl of  $\mathbf{E}$  when  $\mathbf{B}$  is given as  $15t$  is \_\_\_\_\_.
- a) 15
  - b) -15
  - c) 7.5
  - d) - 7.5
- 13) Energy density of magnetic field is \_\_\_\_\_.
- a)  $\frac{1}{2} \mu H^2$
  - b)  $\mu H^2$
  - c)  $\mu H$
  - d)  $\frac{1}{2} \mu^2 H$
- 14)  $\text{Curl}(\mathbf{H}) = \mathbf{J}$  is known as \_\_\_\_\_
- a) Faraday's law
  - b) Ampere's law
  - c) Ohm's law
  - d) Gauss law

P

**T.Y. (B. Tech) (Sem - I) (New) (CBCS) Examination: Oct/Nov-2022**  
**ELECTRICAL ENGINEERING**  
**Electromagnetic Engineering**

Day & Date: Tuesday, 07-02-2023  
 Time: 10:00 AM To 1:00 PM

Max. Marks: 56

**Instructions:** 1) Figures to the right indicate full marks.  
 2) All questions are compulsory.

**Section – I**

**Q.2 Solve Any Three**

12

- State and prove Gauss law.
- For given vector  $\vec{A} = 5\hat{a}_x + 4\hat{a}_y + 3\hat{a}_z$  and  $\vec{B} = 2\hat{a}_x + 3\hat{a}_y + 4\hat{a}_z$   
 Find:
  - Dot product
  - Angle between two vectors
- A scalar potential is given by  $V = 7x + 8y^2 + 4z^3$ . Find electric field intensity at (1, 3, 5).
- Derive the expression for Poisson's equation. Write Laplace's equation from Poisson's.

**Q.3 Solve Any Two**

16

- Transform vector  $\vec{A} = 8\hat{a}_x + 12\hat{a}_y + 3\hat{a}_z$  to cylindrical coordinate at point P (5, -3, 4).
- Calculate electric field intensity at (1, 4, 3) due to
  - A point charge  $Q=3mc$  located at (2, -1, 4)
  - A line density  $\rho_l = 10nc/m$  at  $X = 1$  and  $z = 4$ .
  - A plane  $y=3$  carrying a surface charge density  $\rho_s = 10 nc/m^2$ .
- Define capacitance of capacitor. Prove that capacitance of parallel plate capacitor is given as  $C = \frac{\epsilon A}{d}$  where  $\epsilon$  is permittivity, A is plate area and d is distance between plates.

**Section – II**

**Q.4 Solve Any Three**

12

- State and explain Biot -Savarts's law
- A radial field  $\vec{H} = \frac{2.39 \times 10^6}{\rho} \cos \varphi \hat{a}_\rho$  exist in free space. Find the flux crossing surface area defined by  $0 \leq \varphi \leq \frac{\pi}{4}$  and  $0 \leq z \leq 1$ .
- A lossy dielectric has  $\mu_r = 1, \epsilon_r = 1, \sigma = 2 \times 10^{-8}$  and  $\vec{E} = 100 \sin \omega t \hat{a}_z$  then find
  - Conduction current density
  - Displacement current density
- Derive expression for energy stored in inductor

**Q.5 Solve Any Two**

- a) Derive Maxwell's four equations in point form and Integral form. Also write word statement of each.
- b) Verify stroke's theorem for given field  
 $\vec{H} = 6xy \hat{a}_x - 3y^2 \hat{a}_y$  A/m in a rectangular path around a region  $2 \leq x \leq 5$  and  $-1 \leq y \leq 1, z = 0$  plane.
- c) Define Inductance of Inductor. Derive expression for inductance of solenoid.

## Marks:14

14

- Page 5 of 17

- 10) Electric field intensity due to infinite sheet charge is \_\_\_\_\_.  
a) Zero  
b) Unity  
c)  $\frac{\rho_s}{\epsilon}$   
d)  $\frac{\rho_s}{2\epsilon}$
- 11) The electric flux density for free space is equal to \_\_\_\_\_.  
a)  $\epsilon E$   
b)  $\epsilon_0 E$   
c)  $\frac{E}{\epsilon}$   
d)  $\frac{E}{\epsilon_0}$
- 12) Surface area is enclosed by charge  $2nc$  and  $4nc$  then flux crossing the area is \_\_\_\_\_.  
a)  $2nc$   
b)  $4nc$   
c)  $6nc$   
d)  $8nc$
- 13) A capacitor stores 0.24 coulombs at 10 volts. Its capacitance is \_\_\_\_\_.  
a) 0.024 F  
b) 0.12 F  
c) 0.6 F  
d) 0.8 F
- 14) Boundary condition for electric field for tangential component is \_\_\_\_\_.  
a)  $E_{t1} = E_{t2}$   
b)  $D_{t1} = D_{t2}$   
c)  $E_{n1} = E_{n2}$   
d)  $D_{n1} = D_{n2}$

Set **Q**

**T.Y. (B. Tech) (Sem - I) (New) (CBCS) Examination: Oct/Nov-2022**  
**ELECTRICAL ENGINEERING**  
**Electromagnetic Engineering**

Day & Date: Tuesday, 07-02-2023  
 Time: 10:00 AM To 1:00 PM

Max. Marks: 56

**Instructions:** 1) Figures to the right indicate full marks.  
 2) All questions are compulsory.

**Section – I****Q.2 Solve Any Three** **12**

- a) State and prove Gauss law.
- b) For given vector  $\vec{A} = 5\hat{a}_x + 4\hat{a}_y + 3\hat{a}_z$  and  $\vec{B} = 2\hat{a}_x + 3\hat{a}_y + 4\hat{a}_z$   
 Find:
  - a) Dot product
  - b) Angle between two vectors
- c) A scalar potential is given by  $V = 7x + 8y^2 + 4z^3$ . Find electric field intensity at (1, 3, 5).
- d) Derive the expression for Poisson's equation. Write Laplace's equation from Poisson's.

**Q.3 Solve Any Two** **16**

- a) Transform vector  $\vec{A} = 8\hat{a}_x + 12\hat{a}_y + 3\hat{a}_z$  to cylindrical coordinate at point P (5, -3, 4).
- b) Calculate electric field intensity at (1, 4, 3) due to
  - a) A point charge  $Q=3mc$  located at (2, -1, 4)
  - b) A line density  $\rho_l = 10nc/m$  at  $X = 1$  and  $z = 4$ .
  - c) A plane  $y=3$  carrying a surface charge density  $\rho_s = 10 nc/m^2$ .
- c) Define capacitance of capacitor. Prove that capacitance of parallel plate capacitor is given as  $C = \frac{\epsilon A}{d}$  where  $\epsilon$  is permittivity, A is plate area and d is distance between plates.

**Section – II****Q.4 Solve Any Three** **12**

- a) State and explain Biot -Savarts's law
- b) A radial field  $\vec{H} = \frac{2.39 \times 10^6}{\rho} \cos \varphi \hat{a}_\rho$  exist in free space. Find the flux crossing surface area defined by  $0 \leq \varphi \leq \frac{\pi}{4}$  and  $0 \leq z \leq 1$ .
- c) A lossy dielectric has  $\mu_r = 1, \epsilon_r = 1, \sigma = 2 \times 10^{-8}$  and  $\vec{E} = 100 \sin \omega t \hat{a}_z$  then find
  - i) Conduction current density
  - ii) Displacement current density
- d) Derive expression for energy stored in inductor

**Q.5 Solve Any Two**

- a) Derive Maxwell's four equations in point form and Integral form. Also write word statement of each.
- b) Verify stroke's theorem for given field  
 $\vec{H} = 6xy \hat{a}_x - 3y^2 \hat{a}_y$  A/m in a rectangular path around a region  $2 \leq x \leq 5$  and  $-1 \leq y \leq 1, z = 0$  plane.
- c) Define Inductance of Inductor. Derive expression for inductance of solenoid.

Max. Marks: 70

- Instructions:** 1) Q. No. 1 is compulsory and should be solved in first 30 minutes in answer Book. Page No.3 (starting page of the Answer Book). Each questions carry one mark.  
 2) Don't forget to mention Question Paper Set (P/Q/R/S) at the top of the same page.  
 3) Figures to the right indicates full marks.

**MCQ/Objective Type Questions**

Duration: 30 Minutes

Marks:14

**Q.1 Choose the correct alternatives from the given options. 14**

- 1) In the conversion of line integral of H into surface integral, \_\_\_\_\_ theorem is used.
 

|                       |                           |
|-----------------------|---------------------------|
| a) Divergence Theorem | b) Gauss Theorem          |
| c) Stokes Theorem     | d) It cannot be converted |
- 2) The curl of E when B is given as  $15t$  is \_\_\_\_\_.
 

|        |          |
|--------|----------|
| a) 15  | b) -15   |
| c) 7.5 | d) - 7.5 |
- 3) Energy density of magnetic field is \_\_\_\_\_.
 

|                          |                          |
|--------------------------|--------------------------|
| a) $\frac{1}{2} \mu H^2$ | b) $\mu H^2$             |
| c) $\mu H$               | d) $\frac{1}{2} \mu^2 H$ |
- 4)  $\text{Curl}(H) = J$  is known as \_\_\_\_\_.
 

|                  |                 |
|------------------|-----------------|
| a) Faraday's law | b) Ampere's law |
| c) Ohm's law     | d) Gauss law    |
- 5) Gradient is applied on \_\_\_\_\_ and resultant is \_\_\_\_\_.
 

|                   |                   |
|-------------------|-------------------|
| a) Scalar, Scalar | b) Scalar, Vector |
| c) Vector, Scalar | d) Vector, Vector |
- 6) The vectors  $\vec{A}$  and  $\vec{B}$  are perpendicular to each other when \_\_\_\_\_.
 

|                                 |                                    |
|---------------------------------|------------------------------------|
| a) $\vec{A} \cdot \vec{B} = 0$  | b) $\vec{A} \cdot \vec{B} \neq 0$  |
| c) $\vec{A} \times \vec{B} = 0$ | d) $\vec{A} \times \vec{B} \neq 0$ |
- 7) Electric field intensity due to infinite sheet charge is \_\_\_\_\_.
 

|                              |                               |
|------------------------------|-------------------------------|
| a) Zero                      | b) Unity                      |
| c) $\frac{\rho_s}{\epsilon}$ | d) $\frac{\rho_s}{2\epsilon}$ |
- 8) The electric flux density for free space is equal to \_\_\_\_\_.
 

|                         |                           |
|-------------------------|---------------------------|
| a) $\epsilon E$         | b) $\epsilon_0 E$         |
| c) $\frac{E}{\epsilon}$ | d) $\frac{E}{\epsilon_0}$ |

### MCQ/Objective Type Questions

Duration: 30 Minutes

Marks:14

**Q.1 Choose the correct alternatives from the given options.**

14

- 1) A capacitor stores 0.24 coulombs at 10 volts. Its capacitance is \_\_\_\_\_.  
a) 0.024 F                      b) 0.12 F  
c) 0.6 F                         d) 0.8 F
- 2) Boundary condition for electric field for tangential component is \_\_\_\_\_.  
a)  $E_{t1} = E_{t2}$                   b)  $D_{t1} = D_{t2}$   
c)  $E_{n1} = E_{n2}$                   d)  $D_{n1} = D_{n2}$
- 3) The divergence of magnetic field intensity is \_\_\_\_\_.  
a) 1                                b) -1  
c) Infinity                        d) Zero
- 4) Biot Savart law in magnetic field is analogous to \_\_\_\_\_ in electric field.  
a) Gauss law                      b) Faraday law  
c) Coulomb law                   d) Ampere law
- 5) Maxwell equation that is valid in any conductor is \_\_\_\_\_.  
a)  $\text{Curl}(H) = J_c$                   b)  $\text{Curl}(E) = J_c$   
c)  $\text{Curl}(E) = J_d$                   d)  $\text{Curl}(H) = J_d$
- 6) In the conversion of line integral of H into surface integral, \_\_\_\_\_ theorem is used.  
a) Divergence Theorem              b) Gauss Theorem  
c) Stokes Theorem                    d) It cannot be converted
- 7) The curl of E when B is given as  $15t$  is \_\_\_\_\_.  
a) 15                                b) -15  
c) 7.5                                d) -7.5
- 8) Energy density of magnetic field is \_\_\_\_\_.  
a)  $\frac{1}{2} \mu H^2$                       b)  $\mu H^2$   
c)  $\mu H$                               d)  $\frac{1}{2} \mu^2 H$
- 9)  $\text{Curl}(H) = J$  is known as \_\_\_\_\_.  
a) Faraday's law                      b) Ampere's law  
c) Ohm's law                         d) Gauss law

Duration: 30 Minutes

Marks: 14

**Q.1 Choose the correct alternatives from the options.**

**14**

- 1) What is at the heart of any ERP system?
 

|                |              |
|----------------|--------------|
| a) Information | b) Employees |
| c) Customers   | d) Database  |
- 2) Which command is used to remove a relation from an SQL?
 

|               |           |
|---------------|-----------|
| a) Drop table | b) Delete |
| c) Purge      | d) Remove |
- 3) Which of the following is a reason for ERPs explosive growth?
 

|                                                                        |
|------------------------------------------------------------------------|
| a) ERP is a logical solution to the mess of incompatible applications  |
| b) ERP addresses the need for global information sharing and reporting |
| c) ERP is used to avoid the pain and expense of fixing legacy systems  |
| d) All of the above                                                    |
- 4) Which forms have a relation that contains information about a single entity?
 

|        |        |
|--------|--------|
| a) 4NF | b) 2NF |
| c) 5NF | d) 3NF |
- 5) \_\_\_\_\_ is a set of one or more attributes taken collectively to uniquely identify a record.
 

|                |                  |
|----------------|------------------|
| a) Primary Key | b) Foreign key   |
| c) Super key   | d) Candidate key |
- 6) What is the iron and steel constitute of e-waste?
 

|       |       |
|-------|-------|
| a) 20 | b) 30 |
| c) 40 | d) 50 |
- 7) What is the hazardous pollutant released from LED's?
 

|            |            |
|------------|------------|
| a) Arsenic | b) Barium  |
| c) Cobalt  | d) Cadmium |
- 8) \_\_\_\_\_ is one of the fastest growing components of waste stream in the world.
 

|               |                    |
|---------------|--------------------|
| a) e-learning | b) e-shopping      |
| c) e-waste    | d) use of internet |

- 9)** Following person/persons are entitled to apply for patents \_\_\_\_\_.  
a) A person claiming to be first inventor of the invention  
b) A Legal representative of the first inventor of the invention (If he deceased)  
c) Any person who is the assignee of the first inventor of the invention  
d) All of the above
- 10)** Which of the following is (are) project(s)?  
a) building a new house  
b) creating a new computer software  
c) launching a new product for a business  
d) All of the above
- 11)** Which of the following principles is applicable to trademarks?  
a) A trademark should be distinctive  
b) A trademark should be capable of distinguishing goods or services  
c) A trademark should not cause confusion with previous trademarks  
d) A trademark should not be deceptive  
e) All of the above
- 12)** What is the first step in the software development lifecycle?  
a) System Design  
b) Coding  
c) System Testing  
d) Preliminary Investigation and Analysis
- 13)** The extended Project life cycle adds two more phases to the sequence, which are \_\_\_\_\_.  
a) concept and operations  
b) operations and termination  
c) handover and operations  
d) implementation and operations
- 14)** Which of the following is true for Project Management?  
a) It is a formal discipline for managing projects  
b) There is no single life cycle that applies to all projects  
c) Every project has some elements that are unique  
d) All of the above

Time: 10:00 AM To 01:00 PM

**Instructions:** 1) All questions are compulsory.  
2) Figures to right indicate full marks.

**Section – I****Q.2 Solve Any Five****20**

- a) Explain various Application of E-Business?
- b) What is Information system and describe various types of information system?
- c) Draw and Explain Architecture of database management System.
- d) Compare E-Business and E-Commerce
- e) How IT provides support to business processes?
- f) What is E-Payment System?

**Q.3 Solve Any One.****08**

- a) Explain Components of Database Management System.
- b) Differentiate the concept of Data warehouse, Data marts and Data Centers.

**Section – II****Q.4 Solve Any Five****20**

- a) Write various features of organization & organizational structure.
- b) Write the importance of data visualization and explain its applications.
- c) Enlist applications of OLAP and TPS (any 4 each)
- d) Explain phases of SDLC
- e) Discuss various ethical and social issues evolved because of IT and IS.
- f) What is the concept of green IT?

**Q.5 Solve Any one.****08**

- a) Draw and Explain SDLC Life Cycle.
- b) Explain following terms:
  - 1) Copyrights
  - 2) Patents
  - 3) E-Waste
  - 4) Intellectual property rights

a) It is a formal discipline for managing projects  
b) There is no single life cycle that applies to all projects  
c) Every project has some elements that are unique  
d) All of the above
- 8) What is at the heart of any ERP system?  
a) Information  
b) Employees  
c) Customers  
d) Database
- 9) Which command is used to remove a relation from an SQL?  
a) Drop table  
b) Delete  
c) Purge  
d) Remove
- 10) Which of the following is a reason for ERPs explosive growth?  
a) ERP is a logical solution to the mess of incompatible applications  
b) ERP addresses the need for global information sharing and reporting  
c) ERP is used to avoid the pain and expense of fixing legacy systems  
d) All of the above
- 11) Which forms have a relation that contains information about a single entity?  
a) 4NF  
b) 2NF  
c) 5NF  
d) 3NF
- 12) \_\_\_\_\_ is a set of one or more attributes taken collectively to uniquely identify a record.  
a) Primary Key  
b) Foreign key  
c) Super key  
d) Candidate key
- 13) What is the iron and steel constitute of e-waste?  
a) 20  
b) 30  
c) 40  
d) 50
- 14) What is the hazardous pollutant released from LED's?  
a) Arsenic  
b) Barium  
c) Cobalt  
d) Cadmium

Day & Date: Thursday, 09-02-2023

Max. Marks: 56

Time: 10:00 AM To 01:00 PM

**Instructions:** 1) All questions are compulsory.  
2) Figures to right indicate full marks.

**Section – I**

**Q.2 Solve Any Five** **20**

- a) Explain various Application of E-Business?
- b) What is Information system and describe various types of information system?
- c) Draw and Explain Architecture of database management System.
- d) Compare E-Business and E-Commerce
- e) How IT provides support to business processes?
- f) What is E-Payment System?

**Q.3 Solve Any One.** **08**

- a) Explain Components of Database Management System.
- b) Differentiate the concept of Data warehouse, Data marts and Data Centers.

**Section – II**

**Q.4 Solve Any Five** **20**

- a) Write various features of organization & organizational structure.
- b) Write the importance of data visualization and explain its applications.
- c) Enlist applications of OLAP and TPS (any 4 each)
- d) Explain phases of SDLC
- e) Discuss various ethical and social issues evolved because of IT and IS.
- f) What is the concept of green IT?

**Q.5 Solve Any one.** **08**

- a) Draw and Explain SDLC Life Cycle.
- b) Explain following terms:
  - 1) Copyrights
  - 2) Patents
  - 3) E-Waste
  - 4) Intellectual property rights

**MCQ/Objective Type Questions**

Duration: 30 Minutes

Marks: 14

**Q.1 Choose the correct alternatives from the options.**

**14**

- 1) Which of the following is considered production Economics?
  - a) Tilling of Soil
  - b) Singing a song before friends
  - c) Preventing a child from falling into a manhole on the road
  - d) Painting a Picture for Pleasure
- 2) Macroeconomics is also called \_\_\_\_\_ Economics.
  - a) Applied
  - b) Aggregate
  - c) Experimental
  - d) None of the above
- 3) In Economics we use the term scarcity to mean \_\_\_\_\_.
  - a) Abstract scarcity and lack of resource in less developed countries.
  - b) Relative scarcity i.e. scarcity in relation to the wants of the society
  - c) Scarcity during times of business failure and natural calamities
  - d) Scarcity caused on account of excessive consumption by the rich
- 4) The Short run, as economists use the phrase, is characterized by \_\_\_\_\_.
  - a) At least one fixed factor of production and firms neither leaving nor entering the industry.
  - b) Generally a period which, is shorter than one year.
  - c) All factors of production are fixed and no variable inputs
  - d) All inputs are variable and production is done in less than one year
- 5) Tie Marginal, Average and Total Product Curves encountered by the firm production in the short run exhibit all of the following relationship except: \_\_\_\_\_.
  - a) When total product rising, average and marginal product may be either rising or falling
  - b) When marginal product is negative, total product and average product are falling
  - c) When average product is at a maximum, marginal product equals average product, and total product, is rising.
  - d) When marginal product is at a maximum, average product equals marginal product, and total product is rising.

- 6) Business economics is \_\_\_\_\_.  
a) Abstract and applies the tools of Microeconomics  
b) Involves practice application of economic theory in business decision making.  
c) Incorporates tools from multiple disciplines  
d) (b) and (c) above
- 7) An example of 'Positive' Economic analysis would be: \_\_\_\_\_.  
a) An Analysis of the relationship between the price of food and the quantity purchased  
b) Determining how much income each person should be Guaranteed  
c) Determining the 'Fair' Price for food  
d) Deciding how to distribute the output of the economy
- 8) Which of the following pairs of goods is an example of substitutes?  
a) Tea and sugar  
b) Tea and coffee  
c) Pen and ink  
d) Shirts trousers
- 9) Which of the following does not suggest a Macro Approach for India?  
a) Determining the GNP of India  
b) Finding the causes of; failure of ABC Ltd.  
c) Identifying the causes of inflation in India  
d) Analyze the causes of failure of Industry in providing large scale employment
- 10) The Law of Demand, assuming other things to remain constant, establishes the relationship between:  
a) Income of the consumer and the quantity of a good demanded by him  
b) Price of a good and the Quantity demanded  
c) Price of a Good and the demand for its substitute  
d) Quantity demanded of a Good and the relative Prices of its complementary goods
- 11) Identify the Factor which Generally keeps the Price-Elasticity of demand for a Good low:  
a) Variety of uses for that good  
b) Very low Price of a Commodity  
c) Close Substitute for that Good  
d) High Proportion of the Consumer's Income spent on it.
- 12) Which of the following is a normative statement?  
a) Planned economies allocate resources via government department  
b) Most transitional economies have experienced problems of falling output and rising prices over past decade.  
c) There is a greater degree of consumer sovereignty in market economies than planned ' economies  
d) Reducing inequality should be major priority for mixed economies
- 13) In the case of an inferior good, the Income elasticity of demand is:  
a) Positive  
b) Zero  
c) Negative  
d) Infinite
- 14) In the case of a straight line demand curve meeting the two axes, the price elasticity of demand at the mid-point of the line would be:  
a) 0  
b) 1  
c) 1.5  
d) 2

**Managerial Economics**

Day & Date: Thursday, 09-02-2023  
 Time: 10:00 AM To 01:00 PM

Max. Marks: 70

- Instructions:** 1) Q. No. 1 is compulsory and should be solved in first 30 minutes in Answer Book. Page No.3 (starting page of the Answer Book). Each questions carry one mark.  
 2) Don't forget to mention Question Paper Set (P/Q/R/S) at the top of the same page.  
 3) Figures to the right indicates full marks.  
 4) Assume suitable data wherever needed and mention it clearly.

**MCQ/Objective Type Questions**

Duration: 30 Minutes

Marks: 14

**Q.1 Choose the correct alternatives from the options.**

**14**

- 1) Identify the Factor which Generally keeps the Price-Elasticity of demand for a Good low:
  - a) Variety of uses for that good
  - b) Very low Price of a Commodity
  - c) Close Substitute for that Good
  - d) High Proportion of the Consumer's Income spent on it.
- 2) Which of the following is a normative statement?
  - a) Planned economies allocate resources via government department
  - b) Most transitional economies have experienced problems of falling output and rising prices over past decade.
  - c) There is a greater degree of consumer sovereignty in market economies than planned ' economies
  - d) Reducing in inequality should be major priority for mixed economies
- 3) In the case of an inferior good, the Income elasticity of demand is:
  - a) Positive
  - b) Zero
  - c) Negative
  - d) Infinite
- 4) In the case of a straight line demand curve meeting the two axes, the price elasticity of demand at the mid-point of the line would be:
  - a) 0
  - b) 1
  - c) 1.5
  - d) 2
- 5) Which of the following is considered production Economics?
  - a) Tilling of Soil
  - b) Singing a song before friends
  - c) Preventing a child from falling into a manhole on the road
  - d) Painting a Picture for Pleasure
- 6) Macroeconomics is also called \_\_\_\_\_ Economics.
  - a) Applied
  - b) Aggregate
  - c) Experimental
  - d) None of the above

- 7) In Economics we use the term scarcity to mean \_\_\_\_\_.  
a) Abstract scarcity and lack of resource in less developed countries.  
b) Relative scarcity i.e. scarcity in relation to the wants of the society  
c) Scarcity during times of business failure and natural calamities  
d) Scarcity caused on account of excessive consumption by the rich
- 8) The Short run, as economists use the phrase, is characterized by \_\_\_\_\_.  
a) At least one fixed factor of production and firms neither leaving nor entering the industry.  
b) Generally a period which, is shorter than one year.  
c) All factors of production are fixed and no variable inputs  
d) All inputs are variable and production is done in less than one year
- 9) The Marginal, Average and Total Product Curves encountered by the firm production in the short run exhibit all of the following relationship except: \_\_\_\_\_.  
a) When total product rising, average and marginal product may be either rising or falling  
b) When marginal product is negative, total product and average product are falling  
c) When average product is at a maximum, marginal product equals average product, and total product, is rising.  
d) When marginal product is at a maximum, average product equals marginal product, and total product is rising.
- 10) Business economics is \_\_\_\_\_.  
a) Abstract and applies the tools of Microeconomics  
b) Involves practice application of economic theory in business decision making.  
c) Incorporates tools from multiple disciplines  
d) (b) and (c) above
- 11) An example of 'Positive' Economic analysis would be: \_\_\_\_\_.  
a) An Analysis of the relationship between the price of food and the quantity purchased  
b) Determining how much income each person should be Guaranteed  
c) Determining the 'Fair' Price for food  
d) Deciding how to distribute the output of the economy
- 12) Which of the following pairs of goods is an example of substitutes?  
a) Tea and sugar  
b) Tea and coffee  
c) Pen and ink  
d) Shirts trousers
- 13) Which of the following does not suggest a Macro Approach for India?  
a) Determining the GNP of India  
b) Finding the causes of; failure of ABC Ltd.  
c) Identifying the causes of inflation in India  
d) Analyze the causes of failure of Industry in providing large scale employment
- 14) The Law of Demand, assuming other things to remain constant, establishes the relationship between:  
a) Income of the consumer and the quantity of a good demanded by him  
b) Price of a good and the Quantity demanded  
c) Price of a Good and the demand for its substitute  
d) Quantity demanded of a Good and the relative Prices of its complementary goods

Set **R**

**T.Y (B.Tech.) (Sem-I) (New) (CBCS) Examination: Oct/Nov-2022**  
**ELECTRICAL ENGINEERING**  
**Managerial Economics**

Day & Date: Thursday, 09-02-2023  
 Time: 10:00 AM To 01:00 PM

Max. Marks: 56

**Instructions:** 1) All questions are compulsory.  
 2) Figures to right indicate full marks.

**Section – I**

**Q.2 Solve any four.** **16**

- a) What are the Basic Functions of Business Managers? How does Economics help Business managers in Performing their Functions?
- b) Define Managerial Economics and Discuss its Scope, what is the importance of Managerial Economics.
- c) What is the condition for Consumer Equilibrium under Ordinal utility approach to consumer analysis? Explain and Illustrate Graphically.
- d) What is the Major Area of Business Decision Making? How does Economic theory Contribute to Managerial decisions?
- e) Explain Arc elasticity graph and discuss Problems in using Arc elasticity.

**Q.3 Solve Any Two.** **12**

- a) What is meant by Elasticity of Demand? How is the Elasticity of Demand measured?
- b) What is the expectation in law of demand? Explain "Griffin Goods"
- c) What is meant by Utility? What are the Conditions for Application of Law of Diminishing Utility?

**Section – II**

**Q.4 Solve any four.** **16**

- a) Define and Distinguish between Arc Elasticity and Point Elasticity.
- b) What are the opinion Poll method and Delphi Method?
- c) State and Illustrate Cobb-Douglas Production Function. What are the properties of Cobb-Douglas Production Function?
- d) What is Opportunity Cost? Give some examples of Opportunity Cost.
- e) What is Linear Programming? Discuss usefulness of its application to Practical Business problems.
- f) What is Opportunity Cost? Give some examples of Opportunity Cost.

**Q.5 Solve Any Two.** **12**

- a) Explain and illustrate the relationship Between Marginal Cost, Average Cost and Total Cost Assuming a short run non linear cost function?
- b) Explain the assumptions and Limitations at breakeven Analysis.
- c) Explain Following Cost Concepts with examples.
 

|                  |                  |
|------------------|------------------|
| 1) Variable cost | 3) Explicit cost |

Marks:10

**Q.1 Choose the correct alternatives from the given options. 10**

- 1) Microeconomic theory deals with \_\_\_\_\_.
  - a) Economic behavior of individual economic decision-making units
  - b) Economy as whole
  - c) Trade relations
  - d) Economic growth of the society
- 2) In a mixed economy which sector (s) is / are found \_\_\_\_\_.
  - a) Private only
  - b) Public only
  - c) None
  - d) Both (a) public and (b) private
- 3) Who is known as father of economics?
  - a) Adam Smith
  - b) Prof. A. Samuelson
  - c) Alfred Marshall
  - d) J. R. Hicks
- 4) Which of these is an economic activity?
  - a) Father teaching his son at home instead of spending on coaching
  - b) A housewife making food for the family on her own
  - c) A hair dresser doing hair cut designing on payment
  - d) A singer giving a show on his son's wedding anniversary
- 5) Market system means: \_\_\_\_\_.
  - a) Socialism
  - b) Capitalism
  - c) A place where goods are traded
  - d) All of the above
- 6) Micro and Macro are not two independent approaches to economic analysis but they are complementary to each other.
  - a) False
  - b) True
  - c) Partly true
  - d) Partly False
- 7) Variable factor means those factors of production \_\_\_\_\_.
  - a) which can be only changed in the long run
  - b) which can be changed in the short run
  - c) which can be never be changed
  - d) All of the above

- 8)** Which one of the following is not the function of money?
- a) Medium of exchange
  - b) Measure of Happiness
  - c) Standard of deferred payment
  - d) Store of value
- 9)** Which one of the following is the objective of the RBI?
- a) To maintain term deposits of the households
  - b) To ensure price stability
  - c) To arrange loans for the businessmen
  - d) None of the above
- 10)** Which one of the following cost can never become zero?

Time: 10:00 AM To 01:00 PM

**Instructions:** 1) Q. No. 1 is compulsory it should be solved in first 30 minutes in answer Book. Page No.3 (starting page of the Answer Book) Each question carries on mark.

- 1) Range of accelerating factor is \_\_\_\_\_.  
a) 50 to 100                      b) 1 to 10  
c) 1.6 to 1.8                     d) 10.8 to 11.2
- 2) For n bus power system size of Y bus matrix is \_\_\_\_\_.  
a)  $(n-1) \times (n-1)$                 b)  $(n-2) \times (n-2)$   
c)  $n \times n$                               d)  $(n-1) \times (n-2)$
- 3) Which among the following methods are generally used for the calculation of symmetrical faults?  
a) Norton theorem                  b) Thevenin's theorem  
c) Kirchhoff's laws                d) Only (b) and (c)
- 4) Which of the following fault results into a three phase faults?  
a) Single line to ground fault  
b) Double line to ground fault  
c) Line to line fault  
d) Fault due to all the three phases to earth
- 5) In what direction does the phasor get rotated if it is multiplied by the operator 'a'?  
a) Anti-clockwise  
b) Clockwise  
c) gets rotated by  $90^\circ$  in the clockwise direction  
d) gets rotated by  $90^\circ$  in the anticlockwise direction
- 6) The Critical Clearance time of a fault in the power system is related to \_\_\_\_\_.  
a) Reactive power limit            b) Short Circuit limit  
c) Steady state stability limit      d) Transient stability limit
- 7) Fault level means \_\_\_\_\_.  
a) Fault Current                      b) Voltage at the point of fault  
c) Fault MVA                         d) Fault power factor

**T. Y. (B.Tech.) (Sem - I) (Old) (CBCS) Examination: Oct/Nov-2022**  
**ELECTRICAL ENGINEERING**  
**Power System – III**

Day & Date: Wednesday, 25-01-2023  
 Time: 10:00 AM To 01:00 PM

Max. Marks: 56

**Instructions:** 1) All questions are compulsory.  
 2) Figures to the right indicate full marks.

**Section – I**

**Q.2 Answer any four from following question.**

**16**

- A generating station has five section bus-bar connected with a tie-bar through 7-5% reactors rated at 3000 kVA. Each generator is of 3000 kVA. with 10% reactance and is connected to one section of the bus-bar. Find the total steady input to a dead short-circuit between the lines on one of the sections of the bus-bars with reactors.
- Explain clearly the computational procedure for load flow solution using Decoupled method.
- With the help of sample power system explain step by step method for formation of Y bus using singular Transformation.
- Derive and explain static load flow equation.
- Three generators are rated as follows: Generator 1-100 MVA, 35 kV, reactance 10%; Generator 2- 200 MVA, 32 kV, reactance 8%; Generator 3-200 MVA, 35 kV, and reactance 12%. Determine the reactance of the generator corresponding to base Values of 200 MVA, 35 kV.
- A 3-phase, 20 MVA, 11 kV alternator has internal reactance of 5% and negligible resistance. Find the external reactance per phase to be connected in series with the alternator so that steady current on short circuit does not exceed six times the full load current.

**Q.3 Attempt any two of the following questions.**

**12**

- Explain clearly the computational procedure for load flow solution using NR method when the system contains all type of buses.
- The following is the system data for a load flow solution: The line admittances:

| Bus code | Admittance   |
|----------|--------------|
| 1-2      | 2-j8.0       |
| 1-3      | 1-j4.0       |
| 2-3      | 0.666-j2.664 |
| 2-4      | 1-j4.0       |
| 3-4      | 2-j8.0       |

The schedule of active and reactive powers:

| Bus code | P   | Q   | V      | Remarks |
|----------|-----|-----|--------|---------|
| 1        | -   | -   | 1.06   | Slack   |
| 2        | 0.5 | 0.2 | 1+j0.0 | PQ      |
| 3        | 0.4 | 0.3 | 1+j0.0 | PQ      |
| 4        | 0.3 | 0.1 | 1+j0.0 | PQ      |

Determine the voltage at the end of first iteration using Gauss-Seidel method. Take  $\alpha = 1.6$ .

- c) Obtain a step by step programmable technique for building a complete Z bus of the given system.

### Section – II

**Q.4 Answer any four of the following question.**

- a) The current from neutral to ground connection is 12 A. Calculate the zero phase sequence components in phases. 16
- b) The zero sequence reactances (in p.u) are indicated in the network shown in the figure. Determine the value of zero sequence driving – point reactance at node 3 shown in fig.

- c) Determine the fault currents in each phase following a double line-to-ground short circuit at the terminals of a star-connected synchronous generator operating initially on an open circuit voltage of 1 pu. The positive, negative and zero sequence reactance of the generator are, respectively,  $j0.35$ ,  $j0.25$  and  $j0.20$ , and its star point is isolated from ground.
- d) Explain with sequence network various open conductor faults on the power system.
- e) Prove That
- 1)  $\frac{1 - a^2}{a - a^2} = -a$
  - 2)  $\frac{1 - a}{a + a^2} = 1 - a^2$

Where  $a$  and  $a^2$  are vector operators.

- f) Derive swing equation and discuss its importance in power system stability.

**Q.5 Answer any two of the following question.**

- a)** Three 6.6 kV, 12 MVA, 3-phase alternators are connected to a common set of busbars. The positive, negative and zero sequence impedances of each alternator are 15%, 12% and 4.5% respectively. If an earth fault occurs on one busbar, determine the fault current: **12**
- 1) If all the alternator neutrals are solidly grounded
  - 2) If only one of the alternator neutrals is solidly earthed and the others are isolated
  - 3) If one of the alternator neutrals is earthed through a reactance of 0.5 ohm and the others are isolated.
- b)** Derive an expression with sequence network of the system when
- 1) line to line (LL) fault on generator
  - 2) LLG fault on generator
- c)** Three resistors of  $5\Omega$ ,  $10\Omega$  and  $20\Omega$  are connected in delta across the three phases of a balanced 100 volts supply. What are the sequence components in the resistors and in supply lines?

**Seat  
No.**

Max. Marks: 70

- 2) Don't forget to mention the question paper Set (P/Q/R/S) at the top of the Same page.
- 3) Figures to the right indicate full marks.
- 4) Assume suitable data if necessary and mention it clearly.

### MCQ/Objective Type Questions

Duration: 30 Minutes

Marks: 14

**Q.1 Choose the correct alternatives from the options and rewrite the sentence. 14**

- 1) The impedance per phase of 3-phase transmission line on a base of 100 MV A, 100 kV is 2 PV, the value of this impedance on a base of 400 MVA and 400 kV would be \_\_\_\_\_.  
a) 1.5 pu                      b) 1.0 pu  
c) 0.5 pu                     d) 0.25 pu
- 2) In a circuit the voltage and current are given by  $v = (10 + j5)$  and  $I = (6 + j4)$ . The circuit is \_\_\_\_\_.  
a) inductive                  b) Capacitive  
c) resistive                d) it could be any of the above
- 3) If a new line is added between the buses 2 and 3 in a system, the elements of Y Bus affected by addition of this line are \_\_\_\_\_.  
a) Y22, Y33,                  b) Y22, Y23, Y32, Y33  
c) Y23, Y32,                d) None of the above
- 4) At a particular unbalanced node, the real powers specified are: Leaving the node 20 MW, 25 MW Entering the node 60 MW, 30 MW The balancing power will be:  
a) 30 MW leaving the node  
b) 45 MW leaving the node  
c) 45 MW entering the node  
d) 22.5 MW entering the node and 22.5 MW leaving the node
- 5) For a 15-bus power system with 3 voltage controlled bus, the size of Jacobian matrix is \_\_\_\_\_.  
a)  $11 \times 11$                       b)  $12 \times 12$   
c)  $24 \times 24$                      d)  $28 \times 28$
- 6) A three-phase, 33 kV oil circuit breaker is rated 1200 A, 2000 MVA, 3 s. The symmetrical breaking current is \_\_\_\_\_.  
a) 1200 A                      b) 3600 A  
c) 35 KA                      d) 104.8 KA

**T. Y. (B.Tech.) (Sem - I) (Old) (CBCS) Examination: Oct/Nov-2022**  
**ELECTRICAL ENGINEERING**  
**Power System – III**

Day & Date: Wednesday, 25-01-2023  
 Time: 10:00 AM To 01:00 PM

Max. Marks: 56

**Instructions:** 1) All questions are compulsory.  
 2) Figures to the right indicate full marks.

**Section – I**

**Q.2 Answer any four from following question.**

**16**

- A generating station has five section bus-bar connected with a tie-bar through 7-5% reactors rated at 3000 kVA. Each generator is of 3000 kVA. with 10% reactance and is connected to one section of the bus-bar. Find the total steady input to a dead short-circuit between the lines on one of the sections of the bus-bars with reactors.
- Explain clearly the computational procedure for load flow solution using Decoupled method.
- With the help of sample power system explain step by step method for formation of Y bus using singular Transformation.
- Derive and explain static load flow equation.
- Three generators are rated as follows: Generator 1-100 MVA, 35 kV, reactance 10%; Generator 2- 200 MVA, 32 kV, reactance 8%; Generator 3-200 MVA, 35 kV, and reactance 12%. Determine the reactance of the generator corresponding to base Values of 200 MVA, 35 kV.
- A 3-phase, 20 MVA, 11 kV alternator has internal reactance of 5% and negligible resistance. Find the external reactance per phase to be connected in series with the alternator so that steady current on short circuit does not exceed six times the full load current.

**Q.3 Attempt any two of the following questions.**

**12**

- Explain clearly the computational procedure for load flow solution using NR method when the system contains all type of buses.
- The following is the system data for a load flow solution: The line admittances:

| Bus code | Admittance   |
|----------|--------------|
| 1-2      | 2-j8.0       |
| 1-3      | 1-j4.0       |
| 2-3      | 0.666-j2.664 |
| 2-4      | 1-j4.0       |
| 3-4      | 2-j8.0       |

The schedule of active and reactive powers:

| Bus code | P   | Q   | V        | Remarks |
|----------|-----|-----|----------|---------|
| 1        | -   | -   | 1.06     | Slack   |
| 2        | 0.5 | 0.2 | $1+j0.0$ | PQ      |
| 3        | 0.4 | 0.3 | $1+j0.0$ | PQ      |
| 4        | 0.3 | 0.1 | $1+j0.0$ | PQ      |

Determine the voltage at the end of first iteration using Gauss-Seidel method. Take  $\alpha = 1.6$ .

- c) Obtain a step by step programmable technique for building a complete Z bus of the given system.

### Section – II

**Q.4 Answer any four of the following question.**

- a) The current from neutral to ground connection is 12 A. Calculate the zero phase sequence components in phases. **16**
- b) The zero sequence reactances (in p.u) are indicated in the network shown in the figure. Determine the value of zero sequence driving – point reactance at node 3 shown in fig.

- c) Determine the fault currents in each phase following a double line-to-ground short circuit at the terminals of a star-connected synchronous generator operating initially on an open circuit voltage of 1 pu. The positive, negative and zero sequence reactance of the generator are, respectively,  $j0.35$ ,  $j0.25$  and  $j0.20$ , and its star point is isolated from ground.
- d) Explain with sequence network various open conductor faults on the power system.
- e) Prove That
- 1)  $\frac{1 - a^2}{a - a^2} = -a$
  - 2)  $\frac{1 - a}{a + a^2} = 1 - a^2$

Where  $a$  and  $a^2$  are vector operators.

- f) Derive swing equation and discuss its importance in power system stability.

**Q.5 Answer any two of the following question.**

- a)** Three 6.6 kV, 12 MVA, 3-phase alternators are connected to a common set of busbars. The positive, negative and zero sequence impedances of each alternator are 15%, 12% and 4.5% respectively. If an earth fault occurs on one busbar, determine the fault current: **12**
- 1) If all the alternator neutrals are solidly grounded
  - 2) If only one of the alternator neutrals is solidly earthed and the others are isolated
  - 3) If one of the alternator neutrals is earthed through a reactance of 0.5 ohm and the others are isolated.
- b)** Derive an expression with sequence network of the system when
- 1) line to line (LL) fault on generator
  - 2) LLG fault on generator
- c)** Three resistors of  $5\Omega$ ,  $10\Omega$  and  $20\Omega$  are connected in delta across the three phases of a balanced 100 volts supply. What are the sequence components in the resistors and in supply lines?

Day & Date: Wednesday, 25-01-2023  
 Time: 10:00 AM To 01:00 PM

Max. Marks: 70

- Instructions:** 1) Q. No. 1 is compulsory it should be solved in first 30 minutes in answer Book. Page No.3 (starting page of the Answer Book) Each question carries on mark.  
 2) Don't forget to mention the question paper Set (P/Q/R/S) at the top of the Same page.  
 3) Figures to the right indicate full marks.  
 4) Assume suitable data if necessary and mention it clearly.

**MCQ/Objective Type Questions**

Duration: 30 Minutes

Marks: 14

**Q.1 Choose the correct alternatives from the options and rewrite the sentence. 14**

- 1) At a particular unbalanced node, the real powers specified are: Leaving the node 20 MW, 25 MW Entering the node 60 MW, 30 MW The balancing power will be:
  - a) 30 MW leaving the node
  - b) 45 MW leaving the node
  - c) 45 MW entering the node
  - d) 22.5 MW entering the node and 22.5 MW leaving the node
- 2) For a 15-bus power system with 3 voltage controlled bus, the size of Jacobian matrix is \_\_\_\_\_.
  - a)  $11 \times 11$
  - b)  $12 \times 12$
  - c)  $24 \times 24$
  - d)  $28 \times 28$
- 3) A three-phase, 33 kV oil circuit breaker is rated 1200 A, 2000 MVA, 3 s. The symmetrical breaking current is \_\_\_\_\_.
  - a) 1200 A
  - b) 3600 A
  - c) 35 KA
  - d) 104.8 KA
- 4) The bus-bars of each of the two alternators of 15% reactance each, are interconnected through tie-bar reactors of 15% each. The equivalent impedance to fault current for a 3-phase fault in any alternator bus-bar will be \_\_\_\_\_.
  - a) 75%
  - b) 10%
  - c) 11.25%
  - d) 15%
- 5) Range of accelerating factor is \_\_\_\_\_.
  - a) 50 to 100
  - b) 1 to 10
  - c) 1.6 to 1.8
  - d) 10.8 to 11.2
- 6) For n bus power system size of Y bus matrix is \_\_\_\_\_.
  - a)  $(n-1) \times (n-1)$
  - b)  $(n-2) \times (n-2)$
  - c)  $n \times n$
  - d)  $(n-1) \times (n-2)$

- 7) Which among the following methods are generally used for the calculation of symmetrical faults?
- Norton theorem
  - Thevenin's theorem
  - Kirchhoff's laws
  - Only (b) and (c)
- 8) Which of the following fault results into a three phase faults?
- Single line to ground fault
  - Double line to ground fault
  - Line to line fault
  - Fault due to all the three phases to earth
- 9) In what direction does the phasor get rotated if it is multiplied by the operator 'a'?
- Anti-clockwise
  - Clockwise
  - gets rotated by  $90^\circ$  in the clockwise direction
  - gets rotated by  $90^\circ$  in the anticlockwise direction
- 10) The Critical Clearance time of a fault in the power system is related to \_\_\_\_.
- Reactive power limit
  - Short Circuit limit
  - Steady state stability limit
  - Transient stability limit
- 11) Fault level means \_\_\_\_.
- Fault Current
  - Voltage at the point of fault
  - Fault MVA
  - Fault power factor
- 12) The impedance per phase of 3-phase transmission line on a base of 100 MV A, 100 kV is 2 PV, the value of this impedance on a base of 400 MVA and 400 kV would be \_\_\_\_.
- 1.5 pu
  - 1.0 pu
  - 0.5 pu
  - 0.25 pu
- 13) In a circuit the voltage and current are given by  $v = (10 + j5)$  and  $I = (6 + j4)$ . The circuit is \_\_\_\_.
- inductive
  - Capacitive
  - resistive
  - it could be any of the above
- 14) If a new line is added between the buses 2 and 3 in a system, the elements of Y Bus affected by addition of this line are \_\_\_\_.
- Y22, Y33,
  - Y22, Y23, Y32, Y33
  - Y23, Y32,
  - None of the above

**T.Y. (B. Tech) (Sem - I) (Old) (CBCS) Examination: Oct/Nov - 2022**  
**ELECTRICAL ENGINEERING**  
**Linear Control System**

Day & Date: Tuesday, 31-01-2023  
 Time: 10:00 AM To 01:00 PM

Max. Marks: 56

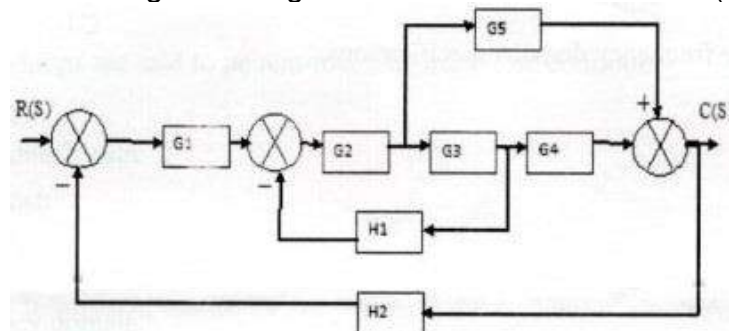

**Instructions:** 1) Section I and Section II are compulsory.  
 2) Figures to the right indicate full marks.

**Section – I****Q.2 Solve any four of the following questions.****16**

a) Define transfer function. Find the transfer function of below system.

- b) Explain different types of control systems.
- c) Explain terminologies used in signal flow graph.
- d) Explain any four block diagram reduction rules.
- e) Explain F-V analogy.

**Q.3 Solve any two of the following questions.****12**a) Reduce the block diagram using reduction rules and obtain  $C(s)/R(s)$ .

- b) Explain the effect of feedback on system parameter variations of control system.
- c) Find the transfer function of the system shown by SFG as below.

## Section – II

**Q.4 Solve any four of the following questions. 16**

- a) Explain the Angle criteria and magnitude criteria for root locus.
- b) Name the test signals used in control system and explain.
- c) Explain the Time domain specifications.
- d) How stability is related to location of pole? Explain in detail
- e) A second order system is given by  $C(s)/R(s) = \frac{25}{s^2 + 6s + 25}$  Find its rise time, peak time, peak overshoot and settling time.

**Q.5 Solve any two of the following questions. 12**

- a) For a unity feedback system  $G(s) = \frac{K}{s(s+4)(s+2)}$   
Sketch the rough nature of the root locus showing all details on it.
- b) For unity feedback system having  

$$G(s) = \frac{10(s+1)}{s^2(s+2)(s+10)}$$
Determine
  - i) Type of System
  - ii) Error coefficient
  - iii) steady state error for input as  $1+4t+t^2/2$
- c) Explain the frequency domain specifications.

**MCQ/Objective Type Questions**

Duration: 30 Minutes

Marks: 14

**Q.1 Choose the correct alternatives from the options and rewrite the sentence. 14**

- 1) Transfer function of a system is defined as the ratio of output to input in
  - a) Z-transform
  - b) Fourier transform
  - c) Laplace transform
  - d) All of these
- 2) Electrical resistance is analogous to
  - a) Inertia
  - b) Dampers
  - c) Spring
  - d) Fluid capacity
- 3) Transient response in the system is basically due to
  - a) Forces
  - b) Friction
  - c) Stored energy
  - d) Coupling
- 4) Physical meaning of zero initial condition is that the
  - a) System is at rest and stores no energy
  - b) System is at rest but stores energy
  - c) Reference input to working system is zero
  - d) System is working but stores no energy
- 5) Bode plot approach is applied to
  - a) Minimum phase network
  - b) Non minimum phase network
  - c) Any network
  - d) None of these
- 6) Which among the following represents an illustration of closed loop system?
  - a) Automatic washing machine
  - b) Automatic electric iron
  - c) Bread toaster
  - d) Electric hand drier
- 7) The initial response when the output is not equal to input is called
  - a) Transient response
  - b) Error response
  - c) Dynamic response
  - d) Either of the above
- 8) Which type of node comprises incoming as well as outgoing branches?
  - a) Source node
  - b) Sink node
  - c) Chain node
  - d) Main node
- 9) What is the value of step input in Laplace domain?
  - a) 1
  - b) A/s
  - c) A/s<sup>2</sup>
  - d) A/s<sup>3</sup>

- 10) If a system is subjected to step input, which type of static error coefficient performs the function of controlling steady state error?
- a) Position
  - b) Velocity
  - c) Acceleration
  - d) Retardation
- 11) For the transfer function given below, where does the zero of the system lie?
- $$G(s) = 5s - 1 / s^2 + 5s + 4$$
- a)  $s = -1$  &  $s = -1/4$
  - b)  $s = -4$  &  $s = -1$
  - c)  $s = 1/5$
  - d)  $s = -1/5$
- 12) Two loops are said to be non-touching only if no common \_\_\_\_\_ exists between them.
- a) Loop
  - b) Feedback path
  - c) Branch
  - d) Node
- 13) How is the sinusoidal transfer function obtained from the system transfer function in frequency domain?
- a) Replacement of ' $j\omega$ ' by ' $s$ '
  - b) Replacement of ' $s$ ' by ' $\omega$ '
  - c) Replacement of ' $s$ ' by ' $j\omega$ '
  - d) Replacement of ' $\omega$ ' by ' $s$ '
- 14) The frequency at which the phase of the system acquires \_\_\_\_\_ is known as 'Phase crossover frequency'.
- a)  $90^\circ$
  - b)  $-90^\circ$
  - c)  $180^\circ$
  - d)  $-180^\circ$

**MCQ/Objective Type Questions**

Duration: 30 Minutes

Marks: 14

**Q.1 Choose the correct alternatives from the options and rewrite the sentence. 14**

- 1) Which of the following circuit is used as a special signal to demultiplex the address bus and data bus?
 

|                         |                  |
|-------------------------|------------------|
| a) Priority Encoder     | b) Decoder       |
| c) Address Latch Enable | d) Demultiplexer |
- 2) Which of the following is a non-vectored input?
 

|            |            |
|------------|------------|
| a) TRAP    | b) RST-7.5 |
| c) RST-6.5 | d) INTR    |
- 3) Conditional instructions are independent of which of the following flag?
 

|       |       |
|-------|-------|
| a) Z  | b) AC |
| c) CY | d) P  |
- 4) How many bytes of bit addressable memory is present in 8051 based microcontrollers?
 

|             |              |
|-------------|--------------|
| a) 8 bytes  | b) 32 bytes  |
| c) 16 bytes | d) 128 bytes |
- 5) LCALL instruction takes
 

|            |            |
|------------|------------|
| a) 2 bytes | b) 4 bytes |
| c) 3 bytes | d) 1 byte  |
- 6) Which out of the four ports of 8051 needs a pull-up resistor for using it is as an input or an output port?
 

|           |            |
|-----------|------------|
| a) PORT 0 | b) PORTS 1 |
| c) PORT 2 | d) PORT 3  |
- 7) MOVC A, @ A + PC is a example of \_\_\_\_\_ addressing mode.
 

|              |                  |
|--------------|------------------|
| a) Immediate | b) Direct        |
| c) Indexed   | d) None of these |
- 8) \_\_\_\_\_ SFR is not bit addressable.
 

|         |           |
|---------|-----------|
| a) TCON | b) PSW    |
| c) SBUF | d) Port 0 |
- 9) When 8051 wakes up then 0x00 is loaded to which register?
 

|        |                          |
|--------|--------------------------|
| a) PSW | b) SP                    |
| c) PC  | d) None of the mentioned |

- 10) Which instructions have no effect on the flags of PSW?
  - a) ANL
  - b) ORL
  - c) XRL
  - d) All of the mentioned
- 11) Which register is used to make the interrupt level or an edge triggered pulse?
  - a) TCON
  - b) IE
  - c) IP
  - d) SCON
- 12) For writing commands on an LCD, RS bit is
  - a) set
  - b) reset
  - c) set & reset
  - d) none of the mentioned
- 13) In ADC0808/0809 IC which pin is used to select Step Size?
  - a) Vref
  - b) Vin
  - c) Vref/2 & Vin
  - d) None of the mentioned
- 14) Number of steps to rotate stepper motor for 360 degree at a step angle of 1.8 degree is \_\_\_\_\_.
  - a) 200
  - b) 100
  - c) 300
  - d) 150

**T.Y. (B.Tech) (Sem-I) (Old) (CBCS) Examination: Oct/Nov-2022**  
**ELECTRICAL ENGINEERING**  
**Microprocessor and Microcontroller**

Day & Date: Friday, 24-02-2023  
Time: 10:00 AM To 01:00 PM

Max. Marks: 56

**Instructions:** 1) All questions are compulsory.  
2) Figures to the right indicate full marks.

**Section – I**

**Q.2 Solve any four of the following questions. 16**

- a) Explain features of 8051 microcontroller.
- b) Draw and explain demultiplexing of address and data Bus in 8085 microprocessor.
- c) Explain any four Arithmetic instruction of 8051 microcontroller.
- d) Explain following pins of 8051 microcontroller.
  - 1) EA
  - 2) PSEN
  - 3) ALE
  - 4) RESET
- e) Write an ALP to perform multiplication of two 8-bit numbers stored at 20H and 21H memory location. Store result at 50H and 51H memory location.

**Q.3 Solve any two of the following questions. 12**

- a) Explain the working of
  - 1) Stack and Stack Pointer
  - 2) Program Counter and Data Pointer
- b) Draw and explain internal memory Structure of RAM in 8051 microcontroller.
- c) Draw the interfacing diagram of 8KB data ROM with 8051 microcontroller also mention starting and ending addresses of interfaces memory.

**Section – II**

**Q.4 Solve any four of the following questions. 16**

- a) Explain the alternate functions of Port-3 of 8051 microcontroller.
- b) Draw and explain TCON special function register of 8051 microcontroller.
- c) Compare between RAM and ROM (any four point).
- d) Explain following pins of LCD
  - 1) RS
  - 2) R/W
  - 3) Enable
  - 4) VEE
- e) Draw and explain interfacing diagram of 8051 microcontroller with ADC 0809.

**Q.5 Solve any two of the following questions.**

- a)** Write a program to generate square wave of 1KHZ frequency on pin P1.4 using timer 0 in mode 1. Assuming XTAL=11.0592MHZ.
- b)** Draw and explain interfacing diagram of 8051 microcontroller with 4x4 matrix Key Board.
- c)** Draw the interfacing of stepper motor with 8051 microcontroller. Write an ALP to rotate the stepper motor in anticlockwise direction, 90 degree apart with a step angle of 1.8 degree.

Day & Date: Friday, 24-02-2023  
 Time: 10:00 AM To 01:00 PM

Max. Marks: 70

- Instructions:** 1) Q. No. 1 is compulsory. It should be solved in the first 30 minutes in answer book. Page no 03 (Starting page of the Answer Book). Each question carries one mark.  
 2) Don't forget to Mention question paper set (P/Q/R/S) on top of page.

**MCQ/Objective Type Questions**

Duration: 30 Minutes

Marks: 14

**Q.1 Choose the correct alternatives from the options and rewrite the sentence. 14**

- 1) \_\_\_\_\_ SFR is not bit addressable.
 

|         |           |
|---------|-----------|
| a) TCON | b) PSW    |
| c) SBUF | d) Port 0 |
- 2) When 8051 wakes up then 0x00 is loaded to which register?
 

|        |                          |
|--------|--------------------------|
| a) PSW | b) SP                    |
| c) PC  | d) None of the mentioned |
- 3) Which instructions have no effect on the flags of PSW?
 

|        |                         |
|--------|-------------------------|
| a) ANL | b) ORL                  |
| c) XRL | d) All of the mentioned |
- 4) Which register is used to make the interrupt level or an edge triggered pulse?
 

|         |         |
|---------|---------|
| a) TCON | b) IE   |
| c) IP   | d) SCON |
- 5) For writing commands on an LCD, RS bit is
 

|                |                          |
|----------------|--------------------------|
| a) set         | b) reset                 |
| c) set & reset | d) none of the mentioned |
- 6) In ADC0808/0809 IC which pin is used to select Step Size?
 

|                 |                          |
|-----------------|--------------------------|
| a) Vref         | b) Vin                   |
| c) Vref/2 & Vin | d) None of the mentioned |
- 7) Number of steps to rotate stepper motor for 360 degree at a step angle of 1.8 degree is \_\_\_\_\_.
 

|        |        |
|--------|--------|
| a) 200 | b) 100 |
| c) 300 | d) 150 |
- 8) Which of the following circuit is used as a special signal to demultiplex the address bus and data bus?
 

|                         |                  |
|-------------------------|------------------|
| a) Priority Encoder     | b) Decoder       |
| c) Address Latch Enable | d) Demultiplexer |
- 9) Which of the following is a non-vectored input?
 

|            |            |
|------------|------------|
| a) TRAP    | b) RST-7.5 |
| c) RST-6.5 | d) INTR    |

- 10) Conditional instructions are independent of which of the following flag?

|       |       |
|-------|-------|
| a) Z  | b) AC |
| c) CY | d) P  |
- 11) How many bytes of bit addressable memory is present in 8051 based microcontrollers?

|             |              |
|-------------|--------------|
| a) 8 bytes  | b) 32 bytes  |
| c) 16 bytes | d) 128 bytes |
- 12) LCALL instruction takes

|            |            |
|------------|------------|
| a) 2 bytes | b) 4 bytes |
| c) 3 bytes | d) 1 byte  |
- 13) Which out of the four ports of 8051 needs a pull-up resistor for using it as an input or an output port?

|           |            |
|-----------|------------|
| a) PORT 0 | b) PORTS 1 |
| c) PORT 2 | d) PORT 3  |
- 17) MOV C A,@ A + PC is a example of \_\_\_\_\_ addressing mode.

|              |                  |
|--------------|------------------|
| a) Immediate | b) Direct        |
| c) Indexed   | d) None of these |

 2) Don't forget to mention Question Paper Set (P/Q/R/S) at the top of the same page.

**MCQ/Objective Type Questions**

Duration: 30 Minutes

Marks: 14

**Q.1 Choose the correct alternative from the given option:** **14**

- 1) The quantity which has the only magnitude is called\_\_\_\_\_.  
 a) A scalar quantity  
 b) A vector quantity  
 c) A chemical quantity  
 d) A magnitude quantity
- 2) A polar vector is one which?  
 a) Gives the position of an object  
 b) Tells how much and in which direction an object has changed its position  
 c) Represents rotational effect  
 d) Has a starting point of application
- 3) What is the magnitude of a unit vector?  
 a) It has no magnitude  
 b) Zero  
 c) Constant but not zero  
 d) Unity
- 4) Which of the following has zero magnitude?  
 a) Fixed vector  
 b) Zero vector  
 c) Modulus of a vector  
 d) Unit vector
- 5) For motion in two or three dimensions, what is the angle between velocity and acceleration vectors?  
 a) 0°  
 b) 180°  
 c) Between 0° and 180°  
 d) 90°
- 6) An object thrown from an aeroplane is an example for\_\_\_\_\_.  
 a) Projectile motion  
 b) Resolution of forces  
 c) Composition of vectors c Addition  
 d) Addition of vectors

- 7) In Gauss law formula, Q stands for?  
a) the electric constant  
b) total charge within the given surface  
c) magnetic field  
d) None of the above
- 8) The Cartesian system is also called as  
a) Circular coordinate system  
b) Rectangular coordinate system  
c) Spherical coordinate system  
d) Space coordinate system
- 9) Unit vector is having \_\_\_\_\_.  
a) Direction with one magnitude  
b) Magnitude is one but not direction  
c) Not both magnitude and direction  
d) None of above
- 10) The volume of a parallelepiped in Cartesian is  
a)  $dV = dx \, dy \, dz$   
b)  $dV = dx \, dy$   
c)  $dV = dy \, dz$   
d)  $dV = dx \, dz$
- 11) Which of the following criteria is used to choose a coordinate system?  
a) Distance  
b) Intensity  
c) Magnitude  
d) Geometry
- 12) Vector transformation followed by coordinate point substitution and vice-versa, both given the same result. Choose the best answer.  
a) Possible, when the vector is constant  
b) Possible, when the vector is variable  
c) Possible in all cases  
d) Not possible
- 13) The cylindrical coordinate system is also referred to as  
a) Cartesian system  
b) Circular system  
c) Spherical system  
d) Space system
- 14) The pressure inside a piston cylinder is a variable of  
a) Radius  
b) Plane angle  
c) Z plane distance  
d) Constant, not a variable

**Instructions:** 1) All questions are compulsory.  
 2) Figures to the right indicate full marks.

**Section – I**

**Q.2 Solve any four:** **16**

- 1) Points P and Q are located at (1,-2,4) and (-5,4,2). Determine the position of vector P
- 2) Find the scalar component of  $6a_x + 2a_y - 3a_z$  along  $3a_x - 4a_y$ .
- 3) Explain Relationship between Cartesian and Cylindrical Co-ordinates.
- 4) Explain Conditions of Gauss's Law.
- 5) Explain Dielectrics in an Electric Field.

**Q.3 Solve any Two:** **12**

- 1) Explain Electric Field Intensity due to Dipole.
- 2) Explain Poisson's and Laplace's Equations.
- 3) Explain Electric Field Intensity.

**Section – II**

**Q.4 Solve any Four:** **16**

- 1) Explain Biot-Savart's Law.
- 2) Explain Magnetic Flux Density.
- 3) Explain Magnetic Dipole.
- 4) Find H at center of an Equilateral triangular loop of side 4m carrying current of 5A.
- 5) Write a short note on Inductors and Inductances.

**Q.5 Solve any Two:** **12**

- 1) Derive Energy density in the magnetic field.
- 2) Derive Displacement current.
- 3) A single turn rectangular loop of enclosed area 1 sq. m is situated in air with its plane normal to a magnetic field which varies at the rate of  $\text{wb/m}^2 \text{ sec}$ . Estimate emf induced in the loop.

  - b) Rectangular coordinate system
  - c) Spherical coordinate system
  - d) Space coordinate system
- 2) Unit vector is having \_\_\_\_\_.
  - a) Direction with one magnitude
  - b) Magnitude is one but not direction
  - c) Not both magnitude and direction
  - d) None of above
- 3) The volume of a parallelepiped in Cartesian is
  - a)  $dV = dx \, dy \, dz$
  - b)  $dV = dx \, dy$
  - c)  $dV = dy \, dz$
  - d)  $dV = dx \, dz$
- 4) Which of the following criteria is used to choose a coordinate system?
  - a) Distance
  - b) Intensity
  - c) Magnitude
  - d) Geometry
- 5) Vector transformation followed by coordinate point substitution and vice-versa, both given the same result. Choose the best answer.
  - a) Possible, when the vector is constant
  - b) Possible, when the vector is variable
  - c) Possible in all cases
  - d) Not possible

- 6) The cylindrical coordinate system is also referred to as
- Cartesian system
  - Circular system
  - Spherical system
  - Space system
- 7) The pressure inside a piston cylinder is a variable of
- Radius
  - Plane angle
  - Z plane distance
  - Constant, not a variable
- 8) The quantity which has the only magnitude is called\_\_\_\_\_.
- A scalar quantity
  - A vector quantity
  - A chemical quantity
  - A magnitude quantity
- 9) A polar vector is one which?
- Gives the position of an object
  - Tells how much and in which direction an object has changed its position
  - Represents rotational effect
  - Has a starting point of application
- 10) What is the magnitude of a unit vector?
- It has no magnitude
  - Zero
  - Constant but not zero
  - Unity
- 11) Which of the following has zero magnitude?
- |                        |                |
|------------------------|----------------|
| a) Fixed vector        | b) Zero vector |
| c) Modulus of a vector | d) Unit vector |
- 12) For motion in two or three dimensions, what is the angle between velocity and acceleration vectors?
- 0°
  - 180°
  - Between 0° and 180°
  - 90°
- 13) An object thrown from an aeroplane is an example for\_\_\_\_\_.
- Projectile motion
  - Resolution of forces
  - Composition of vectors c Addition
  - Addition of vectors
- 14) In Gauss law formula, Q stands for?
- the electric constant
  - total charge within the given surface
  - magnetic field
  - None of the above

T.Y. (B.Tech.) (Sem – I) (Old) (CBCS) Examination: Oct/Nov-2022

**ELECTRICAL ENGINEERING****Electromagnetic Engineering**

Day &amp; Date: Tuesday, 07-02-2023

Max. Marks: 56

Time: 10:00 AM To 01:00 PM

**Instructions:** 1) All questions are compulsory.  
2) Figures to the right indicate full marks.

**Section – I****Q.2 Solve any four:** 16

- 1) Points P and Q are located at (1,-2,4) and (-5,4,2). Determine the position of vector P
- 2) Find the scalar component of  $6a_x + 2a_y - 3a_z$  along  $3a_x - 4a_y$ .
- 3) Explain Relationship between Cartesian and Cylindrical Co-ordinates.
- 4) Explain Conditions of Gauss's Law.
- 5) Explain Dielectrics in an Electric Field.

**Q.3 Solve any Two:** 12

- 1) Explain Electric Field Intensity due to Dipole.
- 2) Explain Poisson's and Laplace's Equations.
- 3) Explain Electric Field Intensity.

**Section – II****Q.4 Solve any Four:** 16

- 1) Explain Biot-Savart's Law.
- 2) Explain Magnetic Flux Density.
- 3) Explain Magnetic Dipole.
- 4) Find H at center of an Equilateral triangular loop of side 4m carrying current of 5A.
- 5) Write a short note on Inductors and Inductances.

**Q.5 Solve any Two:** 12

- 1) Derive Energy density in the magnetic field.
- 2) Derive Displacement current.
- 3) A single turn rectangular loop of enclosed area 1 sq. m is situated in air with its plane normal to a magnetic field which varies at the rate of  $\text{wb/m}^2 \text{ sec}$ . Estimate emf induced in the loop.

**Q.1 Choose the correct alternatives from the options and rewrite the sentence. 14**

- 1) An IT project can produce \_\_\_\_\_.  
 a) a system  
 b) a software package  
 c) recommendation based on study  
 d) all of these
- 2) Select appropriate sequence \_\_\_\_\_.  
 a) database, data, knowledge, information  
 b) data, database, knowledge, information  
 c) data, database, information, knowledge  
 d) information, database, knowledge, data
- 3) Which of below is an example of TPS \_\_\_\_\_.  
 a) business intelligence                      b) payroll  
 c) ERP                                              d) expert system
- 4) \_\_\_\_\_ and \_\_\_\_\_ are the two views of database  
 a) action, query                                      b) partitioned, replicated  
 c) information, knowledge                      d) physical, logical
- 5) The processes required to ensure that the project includes all the work required, is part of project \_\_\_\_\_ management.  
 a) integration                                      b) scope  
 c) cost                                              d) quality
- 6) A \_\_\_\_\_ query is simply a data retrieval query.  
 a) action                                              b) get  
 c) select                                              d) all of these
- 7) Two types of decision support systems are  
 a) model driven, data driven                      b) data based, information based  
 c) middle, upper                                      d) TPS, ERP

Duration: 30 Minutes

Marks: 14

**Q.1 Choose the correct alternatives from the options and rewrite the sentence. 14**

- 1) Take odd man out – NEFT, ERP, RTGS, UPI
  - a) NEFT
  - b) ERP
  - c) RTGS
  - d) UPI
- 2) In \_\_\_\_\_ model, typically, the outcome of one phase acts as the input for the next phase sequentially.
  - a) RAD
  - b) Waterfall
  - c) Prototyping
  - d) SDLC
- 3) Which of below is not true about organizations?
  - a) closed system
  - b) social unit
  - c) interact with environment
  - d) have a structure
- 4) Which of below is a component of an IS?
  - a) Purpose
  - b) Context
  - c) Hardware
  - d) All of these
- 5) What for IS & IT are used in Digital Enterprises?
  - a) Research
  - b) Boost employee productive
  - c) Customer support
  - d) All of these
- 6) \_\_\_\_\_ are software system designed to support machine to machine interaction over a network
  - a) Information technology
  - b) Cloud computing
  - c) Web services
  - d) Apps
- 7) Take odd man out - MS Project, MS Access, DB2, Oracle
  - a) MS Word
  - b) MS Access
  - c) DB2
  - d) Oracle

|---------------------------|--------------------|
| a) Information technology | b) Cloud computing |
| c) Web services           | d) Apps            |
  
- 4) Take odd man out - MS Project, MS Access, DB2, Oracle
 

|            |              |
|------------|--------------|
| a) MS Word | b) MS Access |
| c) DB2     | d) Oracle    |
  
- 5) An IT project can produce \_\_\_\_\_.
 

|                                  |
|----------------------------------|
| a) a system                      |
| b) a software package            |
| c) recommendation based on study |
| d) all of these                  |
  
- 6) Select appropriate sequence \_\_\_\_\_.
 

|                                           |
|-------------------------------------------|
| a) database, data, knowledge, information |
| b) data, database, knowledge, information |
| c) data, database, information, knowledge |
| d) information, database, knowledge, data |
  
- 7) Which of below is an example of TPS \_\_\_\_\_.
 

|                          |                  |
|--------------------------|------------------|
| a) business intelligence | b) payroll       |
| c) ERP                   | d) expert system |

T.Y. (B.Tech.) (Sem-I) (Old) (CBCS) Examination: Oct/Nov-2022

**ELECTRICAL ENGINEERING****Information Technology and Management**

Day &amp; Date: Thursday, 09-02-2023

Max. Marks: 56

Time: 10:00 AM To 01:00 PM

**Instructions:** 1) All questions are compulsory.  
2) Figures to right indicate full marks.

**Section – I****Q.2 Attempt any Two.** **12**

- a) Explain partitioned database with – diagram, advantages and disadvantages
- b) With suitable examples explain any two e - payment systems used in India.
- c) What are components of information system? Discuss with suitable diagram.

**Q.3 Attempt any Four.** **16**

- a) Differentiate – data mart Vs data warehouse
- b) Justify with example – IT flattens organization structure
- c) To whom IT supports in a typical organization?
- d) Discuss Cloud Computing - SAAS model
- e) How IT infrastructure for a typical organization is decided?

**Section – II****Q.4 Attempt any Two.** **12**

- a) Justify : IT projects are as complex as other engineering projects.
- b) Discuss need of and how supply chain management system is being implemented.
- c) Explain economical impact of IS on organization.

**Q.5 Attempt any Four.** **16**

- a) Discuss ethical issues related to information systems.
- b) With a typical example explain decision support system
- c) Compare OLAP and OLTP
- d) What is deskilling and alienation? Comment on how it is rising because of IT.
- e) What are the types of IPR?

|                 |  |
|-----------------|--|
| <b>Seat No.</b> |  |
|-----------------|--|

Day & Date: Thursday, 09-02-2023  
Time: 10:00 AM To 01:00 PM

**Instructions:**

- 1) Q. No. 1 is compulsory and should be solved in first 30 minutes in Answer Book. Page No.3 (starting page of the Answer Book). Each question carry one mark.
- 2) Don't forget to mention Question Paper Set (P/Q/R/S) at the top of the same page.
- 3) Figures to the right indicates full marks.
- 4) Assume suitable data wherever needed and mention it clearly.

Marks: 14

- 1) A \_\_\_\_\_ query is simply a data retrieval query.

|           |                 |
|-----------|-----------------|
| a) action | b) get          |
| c) select | d) all of these |
- 2) Two types of decision support systems are

|                              |                                  |
|------------------------------|----------------------------------|
| a) model driven, data driven | b) data based, information based |
| c) middle, upper             | d) TPS, ERP                      |
- 3) Take odd man out – NEFT, ERP, RTGS, UPI

|         |        |
|---------|--------|
| a) NEFT | b) ERP |
| c) RTGS | d) UPI |
- 4) In \_\_\_\_\_ model, typically, the outcome of one phase acts as the input for the next phase sequentially.

|                |              |
|----------------|--------------|
| a) RAD         | b) Waterfall |
| c) Prototyping | d) SDLC      |
- 5) Which of below is not true about organizations?

|                              |                     |
|------------------------------|---------------------|
| a) closed system             | b) social unit      |
| c) interact with environment | d) have a structure |
- 6) Which of below is a component of an IS?

|             |                 |
|-------------|-----------------|
| a) Purpose  | b) Context      |
| c) Hardware | d) All of these |
- 7) What for IS & IT are used in Digital Enterprises?

|                     |                              |
|---------------------|------------------------------|
| a) Research         | b) Boost employee productive |
| c) Customer support | d) All of these              |
- 8) \_\_\_\_\_ are software system designed to support machine to machine interaction over a network

|                           |                    |
|---------------------------|--------------------|
| a) Information technology | b) Cloud computing |
| c) Web services           | d) Apps            |

- 9) Take odd man out - MS Project, MS Access, DB2, Oracle
  - a) MS Word
  - b) MS Access
  - c) DB2
  - d) Oracle
- 10) An IT project can produce \_\_\_\_\_.
  - a) a system
  - b) a software package
  - c) recommendation based on study
  - d) all of these
- 11) Select appropriate sequence \_\_\_\_\_.
  - a) database, data, knowledge, information
  - b) data, database, knowledge, information
  - c) data, database, information, knowledge
  - d) information, database, knowledge, data
- 12) Which of below is an example of TPS \_\_\_\_\_.
  - a) business intelligence
  - b) payroll
  - c) ERP
  - d) expert system
- 13) \_\_\_\_\_ and \_\_\_\_\_ are the two views of database
  - a) action, query
  - b) partitioned, replicated
  - c) information, knowledge
  - d) physical, logical
- 14) The processes required to ensure that the project includes all the work required, is part of project \_\_\_\_\_ management.
  - a) integration
  - b) scope
  - c) cost
  - d) quality

|          |  |

Marks: 14

## 14

- 1) Electric vehicle & Hybrid vehicle is having following components common except \_\_\_\_\_.  
a) Battery  
b) ECU  
c) Generator  
d) Internal Combustion Engine
- 2) \_\_\_\_\_ hybrid vehicle is propelled by ICE or Battery.  
a) Parallel  
b) Series  
c) Split  
d) Mild
- 3) Lowest Degree of Hybridization is observed in \_\_\_\_\_.  
a) Full hybrid  
b) Mild hybrid  
c) Split hybrid  
d) Micro hybrid
- 4) Mild hybrid uses \_\_\_\_\_ volt battery.  
a) 12  
b) 24  
c) 48  
d) 60
- 5) Objective behind using hybrid vehicle is \_\_\_\_\_.  
a) Reduction in fuel consumption  
b) Reduction in emission  
c) Increased Power & torque  
d) All
- 6) A plug-in hybrid is different from conventional hybrid vehicle \_\_\_\_\_.  
a) Built in battery charger  
b) More batteries  
c) Conventional batteries  
d) Bigger motor generator
- 7) EVSE stands for \_\_\_\_\_.  
a) Electric vehicle supply equipment  
b) Could be AC or DC  
c) Used for charging  
d) All
- 8) Hybrid vehicle normally have \_\_\_\_\_ km range only electric mode.  
a) 10-20km  
b) 30-70km  
c) 100-km  
d) No limit

Day & Date: Thursday, 09-02-2023  
 Time: 10:00 AM To 01:00 PM

Max. Marks: 56

**Instructions:** 1) All questions are compulsory.  
 2) Figures to the right indicates full marks.

**Section – I**

- Q.2 Solve any four** **16**
- Explain about the history of hybrid & electric vehicle.
  - Explain about the social and environmental importance of EV & HEV.
  - Under what condition a pure EV can be chosen as a best option compared to hybrid vehicles considering the impact on climate change.
  - Explain about vehicle power plant characteristics.
  - What are the supporting systems in an electric/ hybrid vehicle.
- Q.3 Solve any Two** **12**
- Explain the components of HEV & its types?
  - Explain the impact of modern drive trains on energy supply?
  - What is its typical value for Induction Motors used in HEV?

**Section – II**

- Q.4 Solve any four** **16**
- Why energy management control system is required in an HEV?
  - With the help of block diagram explain battery management supporting system of HEV?
  - Explain briefly the electrical & mechanical constraints to be considered while sizing an electrical machine for HEV?
  - Draw the typical: torque speed envelopes curves of drive train motors and how the continuous, intermittent and peak overloading ratings?
  - What are the desired features of motors used in the HEV?
- Q.5 Solve any Two** **12**
- Explain the operation, the advantages & disadvantages of flywheel energy storage?
  - Explain the working of fuel cell and state its limitations?
  - Explain the fundamentals of regenerative braking system used in HEV?

**Hybrid Electric Vehicle Design**

Day & Date: Thursday, 09-02-2023  
 Time: 10:00 AM To 01:00 PM

Max. Marks: 70

- Instructions:** 1) Q. No. 1 is compulsory and should be solved in first 30 minutes in Answer Book. Page No.3 (starting page of the Answer Book). Each questions carry one mark.  
 2) Don't forget to mention Question Paper Set (P/Q/R/S) at the top of the same page.  
 3) Figures to the right indicates full marks.  
 4) Assume suitable data wherever needed and mention it clearly.

**MCQ/Objective Type Questions**

Duration: 30 Minutes

Marks: 14

**Q.1 Choose the correct alternatives from the options.**

**14**

- 1) Hybrid vehicle normally have \_\_\_\_\_ km range only electric mode.
 

|            |             |
|------------|-------------|
| a) 10-20km | b) 30-70km  |
| c) 100-km  | d) No limit |
- 2) The main sources of electricity for hybrids are \_\_\_\_\_.
 

|               |              |
|---------------|--------------|
| a) Batteries  | b) FCs       |
| c) Capacitors | d) All these |
- 3) Regenerative braking involves \_\_\_\_\_.
 

|                                                              |
|--------------------------------------------------------------|
| a) Nano fibres that repair the surface of the brake pad      |
| b) Reduce the amount of friction necessary to slower the car |
| c) Reclaiming heat from the brakes and using it for power    |
| d) None of these                                             |
- 4) Select the cycle used in the hybrid Engine \_\_\_\_\_.
 

|             |               |
|-------------|---------------|
| a) Otto     | b) Diesel     |
| c) Atkinson | d) Isentropic |
- 5) Select the features of hybrid electric vehicle \_\_\_\_\_.
 

|                         |                 |
|-------------------------|-----------------|
| a) Idle stop & EV drive | b) Motor assist |
| c) Regenerative braking | d) All of these |
- 6) Breaking and idling loses are \_\_\_\_\_ in urban driving & even more in congested driving.
 

|                    |                   |
|--------------------|-------------------|
| a) Moderately high | b) Moderately low |
| c) Extremely high  | d) Extremely low  |
- 7) Which of the following is Not the type of hybrid vehicle?
 

|                             |                    |
|-----------------------------|--------------------|
| a) Plug -in hybrid          | b) Parallel hybrid |
| c) Natural gas for vehicles | d) Series hybrid   |
- 8) Electric vehicle & Hybrid vehicle is having following components common except \_\_\_\_\_.
 

|              |                               |
|--------------|-------------------------------|
| a) Battery   | b) ECU                        |
| c) Generator | d) Internal Combustion Engine |

- 9) \_\_\_\_\_ hybrid vehicle is propelled by ICE or Battery.
- a) Parallel
  - b) Series
  - c) Split
  - d) Mild
- 10) Lowest Degree of Hybridization is observed in \_\_\_\_\_.
- a) Full hybrid
  - b) Mild hybrid
  - c) Split hybrid
  - d) Micro hybrid
- 11) Mild hybrid uses \_\_\_\_\_ volt battery.
- a) 12
  - b) 24
  - c) 48
  - d) 60
- 12) Objective behind using hybrid vehicle is \_\_\_\_\_.
- a) Reduction in fuel consumption
  - b) Reduction in emission

**14**

- 1) A plug-in hybrid is different from conventional hybrid vehicle \_\_\_\_\_.  
 a) Built in battery charger                      b) More batteries  
 c) Conventional batteries                      d) Bigger motor generator
- 2) EVSE stands for \_\_\_\_\_.  
 a) Electric vehicle supply equipment  
 b) Could be AC or DC  
 c) Used for charging  
 d) All
- 3) Hybrid vehicle normally have \_\_\_\_\_ km range only electric mode.  
 a) 10-20km                                              b) 30-70km  
 c) 100-km                                              d) No limit
- 4) The main sources of electricity for hybrids are \_\_\_\_\_.  
 a) Batteries                                              b) FCs  
 c) Capacitors                                              d) All these
- 5) Regenerative braking involves \_\_\_\_\_.  
 a) Nano fibres that repair the surface of the brake pad  
 b) Reduce the amount of friction necessary to slower the car  
 c) Reclaiming heat from the brakes and using it for power  
 d) None of these
- 6) Select the cycle used in the hybrid Engine \_\_\_\_\_.  
 a) Otto                                                      b) Diesel  
 c) Atkinson                                              d) Isentropic
- 7) Select the features of hybrid electric vehicle \_\_\_\_\_.  
 a) Idle stop & EV drive                              b) Motor assist  
 c) Regenerative braking                              d) All of these
- 8) Breaking and idling loses are \_\_\_\_\_ in urban driving & even more in congested driving.  
 a) Moderately high                                      b) Moderately low  
 c) Extremely high                                      d) Extremely low

- 9) Which of the following is Not the type of hybrid vehicle?  
a) Plug -in hybrid                      b) Parallel hybrid  
c) Natural gas for vehicles              d) Series hybrid
- 10) Electric vehicle & Hybrid vehicle is having following components common except \_\_\_\_\_.  
a) Battery                                      b) ECU  
c) Generator                                  d) Internal Combustion Engine
- 11) \_\_\_\_\_ hybrid vehicle is propelled by ICE or Battery.  
a) Parallel                                      b) Series  
c) Split                                          d) Mild
- 12) Lowest Degree of Hybridization is observed in \_\_\_\_\_.  
a) Full hybrid                                  b) Mild hybrid  
c) Split hybrid                                d) Micro hybrid
- 13) Mild hybrid uses \_\_\_\_\_ volt battery.  
a) 12                                              b) 24  
c) 48                                              d) 60
- 14) Objective behind using hybrid vehicle is \_\_\_\_\_.  
a) Reduction in fuel consumption      b) Reduction in emission  
c) Increased Power & torque              d) All

**T.Y (B.Tech.) (Sem-I) (Old) (CBCS) Examination: Oct/Nov-2022**  
**ELECTRICAL ENGINEERING**  
**Hybrid Electric Vehicle Design**

Day & Date: Thursday, 09-02-2023  
Time: 10:00 AM To 01:00 PM

Max. Marks: 56

**Instructions:** 1) All questions are compulsory.  
2) Figures to the right indicates full marks.

**Section – I**

**Q.2 Solve any four** **16**

- a) Explain about the history of hybrid & electric vehicle.
- b) Explain about the social and environmental importance of EV & HEV.
- c) Under what condition a pure EV can be chosen as a best option compared to hybrid vehicles considering the impact on climate change.
- d) Explain about vehicle power plant characteristics.
- e) What are the supporting systems in an electric/ hybrid vehicle.

**Q.3 Solve any Two** **12**

- a) Explain the components of HEV & its types?
- b) Explain the impact of modern drive trains on energy supply?
- c) What is its typical value for Induction Motors used in HEV?

**Section – II**

**Q.4 Solve any four** **16**

- a) Why energy management control system is required in an HEV?
- b) With the help of block diagram explain battery management supporting system of HEV?
- c) Explain briefly the electrical & mechanical constraints to be considered while sizing an electrical machine for HEV?
- d) Draw the typical: torque speed envelopes curves of drive train motors and how the continuous, intermittent and peak overloading ratings?
- e) What are the desired features of motors used in the HEV?

**Q.5 Solve any Two** **12**

- a) Explain the operation, the advantages & disadvantages of flywheel energy storage?
- b) Explain the working of fuel cell and state its limitations?
- c) Explain the fundamentals of regenerative braking system used in HEV?

**T.Y. (B.Tech.) (Sem-I) (Old) (CBCS) Examination: Oct/Nov-2022**  
**ELECTRICAL ENGINEERING**  
**Business Ethics**

Day & Date: Thursday, 09-02-2023  
 Time: 10:00 AM To 01:00 PM

Max. Marks: 70

- Instructions:** 1) Q. No. 1 is compulsory and should be solved in first 30 minutes in Answer Book. Page No.3 (starting page of the Answer Book). Each questions carry one mark.  
 2) Don't forget to mention Question Paper Set (P/Q/R/S) at the top of the same page.  
 3) Figures to the right indicates full marks.  
 4) Assume suitable data wherever needed and mention it clearly.

**MCQ/Objective Type Questions**

Duration: 30 Minutes

Marks: 14

**Q.1 Choose the correct alternative from the options.**

**14**

- 1) Which is not one of the natures of ethics?
  - a) Focus on human values
  - b) Social work
  - c) Branch of philosophy
  - d) Applies moral principles
- 2) Why business ethics are important?
  - a) It formulates the firm's image and builds the brand
  - b) It influences the buying decision of the customers
  - c) Build confidence within employees
  - d) All of the above
- 3) Which one of the following is not principle business ethics?
  - a) Principle of universality
  - b) Principle of humanity
  - c) Principle of autonomy
  - d) Principle of dissatisfaction
- 4) Code of conduct does not include \_\_\_\_\_.
 

|               |              |
|---------------|--------------|
| a) Dishonesty | b) Rules     |
| c) Morality   | d) Integrity |
- 5) What is meant by the phrase CSR?
  - a) Corporate Social Responsibility
  - b) Company Social Responsibility
  - c) Corporate Society Responsibility
  - d) Company Society Responsibility
- 6) Ethics should guide the technology towards \_\_\_\_\_.
  - a) Political justice
  - b) Cultural justice
  - c) Social justice
  - d) None of the Above

- 7) The factor which affects ethical and unethical behavior is \_\_\_\_\_
- a) Ethical dilemma
  - b) Diversity
  - c) Teamwork
  - d) Open communication
- 8) The hand-of-government refers to the \_\_\_\_\_
- a) ability of the government to interfere in business negotiations
  - b) role of corporations to be profitable within the law
  - c) effect of national politics on business decisions
  - d) impact of changing government regulations
- 9) Which of the following relating to CSR theories is correct?
- a) Institutional theory is based on the shareholder concept.
  - b) Social contract is the key concept of legitimacy theory.
  - c) The key concept of enlightened self-interest is stakeholder relations.
  - d) Stakeholder theory requires organizations to manage community perceptions to survive.
- 10) The moral principles, standards of behavior, or set of values that guide a person's actions in the workplace is called-
- a) Office place ethics
  - b) Factory place ethics
  - c) Behavioral ethics
  - d) Workplace ethics
- 11) Codes of conduct and codes of ethics \_\_\_\_\_
- a) are formal statements that describe what an organization expects of its employees.
  - b) become necessary only after a company has been in legal trouble.
  - c) are designed for top executives and managers, not regular employees.
  - d) rarely become an effective component of the ethics and compliance program.
- 12) Which of the following is not one the underlying principles of the corporate governance Combined Code of Practice?
- a) Integrity
  - b) Accountability
  - c) Openness
  - d) Acceptability
- 13) Which of the following would most effectively act as the primary objective of a business organization?
- a) To make a profit
  - b) To procure resources
  - c) To communicate with shareholders
  - d) To mediate between the organization and the environment
- 14) The four types of social responsibility include:
- a) legal, philanthropic, economic, and ethical
  - b) ethical, moral, social, and economic
  - c) philanthropic, justice, economic, and ethical
  - d) legal, moral, ethical, and economic

**T.Y. (B.Tech.) (Sem-I) (Old) (CBCS) Examination: Oct/Nov-2022**  
**ELECTRICAL ENGINEERING**  
**Managerial Economics**

Day & Date: Thursday, 09-02-2023  
 Time: 10:00 AM To 01:00 PM

Max. Marks: 70

- Instructions:** 1) Q. No. 1 is compulsory and should be solved in first 30 minutes in Answer Book. Page No.3 (starting page of the Answer Book). Each questions carry one mark.  
 2) Don't forget to mention Question Paper Set (P/Q/R/S) at the top of the same page.  
 3) Figures to the right indicates full marks.

**MCQ/Objective Type Questions**

Duration: 30 Minutes

Marks: 14

**Q.1 Choose the correct alternatives from the options.**

**14**

- 1) Which of the following areas of economic theory is the single most important element of managerial economics?
  - a) Mathematical economics
  - b) Econometrics
  - c) Macroeconomics
  - d) Microeconomics
- 2) Which of the following is defined as the study of the aggregate economy studied as a whole?
  - a) Mathematical economics
  - b) Econometrics
  - c) Macroeconomics
  - d) Microeconomics
- 3) "Capitalism" refers to:
  - a) the use of markets
  - b) government ownership of capital goods
  - c) private ownership of capital goods
  - d) private ownership of homes & cars
- 4) What will happen in the rice market if buyers are expecting higher prices in the near future?
  - a) The demand for rice will increase.
  - b) The demand for rice will decrease.
  - c) The demand for rice will be unaffected.
  - d) The supply of rice will increase.
- 5) When there is a shortage in a market
  - a) there is downward pressure on price
  - b) there is upward pressure on price
  - c) the market could still be in equilibrium
  - d) the price must be above equilibrium
- 6) A positive cross elasticity of demand coefficient indicates that:
  - a) a product is an inferior good
  - b) a product is a normal good
  - c) two products are substitute goods
  - d) two products are complementary goods

- 7) Total revenue falls as the price of a good increases if price elasticity of demand is:
- a) Elastic
  - b) Inelastic
  - c) unitary elastic
  - d) perfectly elastic
- 8) Which of the following is not a qualitative forecasting technique?
- a) Surveys of consumer expenditure plans
  - b) Perspectives of foreign advisory councils
  - c) Consumer intention polling
  - d) Time-series analysis
- 9) The best use of linear programming is to find optimal use of
- a) Money
  - b) Manpower
  - c) Machine
  - d) All of the above
- 10) Theory of production includes:
- a) Manufacturing
  - b) Packaging
  - c) Storing
  - d) All of these
- 11) Implicit costs are:
- a) equal to total fixed costs.
  - b) comprised entirely of variable costs.
  - c) "payments" for self-employed resources.
  - d) always greater in the short run than in the long run.
- 12) Which of the following costs are expenses that change in proportion to the activity of a business?
- a) Variable cost
  - b) Fixed cost
  - c) Material cost
  - d) All the above
- 13) Under which of the following forms of market structure does a firm has no control over the price of its product?
- a) Monopoly
  - b) Oligopoly
  - c) Monopolistic competition
  - d) Perfect competition
- 14) In perfect competition, a firm maximizes profit in the short run by deciding
- a) how much output to produce
  - b) whether or not to enter a market
  - c) what price to charge
  - d) how much capital to use

**Instructions:** 1) All questions are compulsory.  
2) Figures to the right indicates full marks.

**Section – I**

**Q.2 Solve Any Four** **16**

- 1) Explain scope of managerial economics for business decision.
- 2) Explain the following terms
  - a) Microeconomics
  - b) Macroeconomics
- 3) State & explain the law of demand and law of supply.
- 4) Explain the concept of price ceilings and price floors.
- 5) Describe price elasticity of demand in detail.
- 6) Explain the concept income elasticity of demand.

**Q.3 Solve Any Two** **12**

- 1) Explain economics contribution to managerial decision.
- 2) State and explain the determinants of demand.
- 3) Explain elasticity of supply. Also state the factors affecting the elasticity of supply.

**Section – II**

**Q.4 Solve Any Four** **16**

- 1) Explain barometric method for demand forecasting.
- 2) State and explain the applications of linear programming techniques.
- 3) Describe breakeven analysis. Also state the limitations of breakeven analysis.
- 4) Explain the concept profit margin of safety.
- 5) What is market? Explain the various types of market.
- 6) State and explain the characteristics of market structure.

**Q.5 Solve Any Two** **12**

- 1) Explain trend projection method for demand forecasting.
- 2) Explain pricing decision and monopoly power in detail.
- 3) Explain following costs of production:
  - a) Fixed and Variable Costs
  - b) Total, Average, and Marginal Costs
  - c) Short-Run and Long-Run Costs

**MCQ/Objective Type Questions**

Duration: 20 Minutes

Marks:10

**Q.1 Choose the correct alternatives from the given options. 10**

- 1) Microeconomic theory deals with \_\_\_\_\_.
  - a) Economic behavior of individual economic decision-making units
  - b) Economy as whole
  - c) Trade relations
  - d) Economic growth of the society
- 2) In a mixed economy which sector (s) is / are found \_\_\_\_\_.
  - a) Private only
  - b) Public only
  - c) None
  - d) Both (a) public and (b) private
- 3) Who is known as father of economics?
  - a) Adam Smith
  - b) Prof. A. Samuelson
  - c) Alfred Marshall
  - d) J. R. Hicks
- 4) Which of these is an economic activity?
  - a) Father teaching his son at home instead of spending on coaching
  - b) A housewife making food for the family on her own
  - c) A hair dresser doing hair cut designing on payment
  - d) A singer giving a show on his son's wedding anniversary
- 5) Market system means: \_\_\_\_\_.
  - a) Socialism
  - b) Capitalism
  - c) A place where goods are traded
  - d) All of the above
- 6) Micro and Macro are not two independent approaches to economic analysis but they are complementary to each other.
  - a) False
  - b) True
  - c) Partly true
  - d) Partly False
- 7) Variable factor means those factors of production \_\_\_\_\_.
  - a) which can be only changed in the long run
  - b) which can be changed in the short run
  - c) which can be never be changed
  - d) All of the above

- 8)** Which one of the following is not the function of money?
- a) Medium of exchange
  - b) Measure of Happiness
  - c) Standard of deferred payment
  - d) Store of value
- 9)** Which one of the following is the objective of the RBI?
- a) To maintain term deposits of the households
  - b) To ensure price stability
  - c) To arrange loans for the businessmen
  - d) None of the above
- 10)** Which one of the following cost can never become zero?
- |                  |                  |
|------------------|------------------|
| a) Average cost  | b) Fixed cost    |

**T.Y. (B. Tech) (Sem - I) (Old) (CBCS) Examination: Oct/Nov-2022**  
**ELECTRICAL ENGINEERING**  
**Professional Ethics & Human Value**

Day & Date: Monday 20-02-2023  
Time: 10:00 AM To 12:00 PM

Max. Marks: 40

**Instructions:** 1) All questions are compulsory.  
2) Figures to the right indicate full marks.

- Q.2** List the human values and explain any two in detail. **10**  
**OR**  
Distinguish between Kohlberg's and Gilligan's approach to ethical (moral) judgments.
- Q.3** Discuss in detail risk benefit analysis and reducing risk. **10**  
**OR**  
Explain the role of engineers as manager.
- Q.4 Write short notes on any four** **20**  
a) Objectives of Engineering Ethics  
b) Self confidence  
c) Commitment  
d) Difference between moral and ethics  
e) Intellectual property rights  
f) Code of ethics

**Electrical Machine Design**

Day & Date: Tuesday, 14-02-2023  
 Time: 10:00 AM To 1:00 PM

Max. Marks: 70

- Instructions:** 1) Q. No. 1 is compulsory and should be solved in first 30 minutes in Answer Book. Page No.3 (starting page of the Answer Book). Each question carry one mark.  
 2) Don't forget to mention Question Paper Set (P/Q/R/S) at the top of the same page.

**MCQ/Objective Type Questions**

Duration: 30 Minutes

Marks:14

**Q.1 Choose the correct alternatives from the given options. 14**

- 1) Which of the following could be lamina-proximately the thickness of laminations of D.C. machine?
 

|              |            |
|--------------|------------|
| a) 0.0005 mm | b) 0.05 mm |
| c) 0.5 mm    | d) 5 mm    |
- 2) The commutators segments are connected to the armature conductors by means of
 

|                    |                     |
|--------------------|---------------------|
| a) Copper lugs     | b) Resistance wires |
| c) Insulation pads | d) Brazing          |
- 3) A separately excited generator as compared to a self-excited generator
 

|                                                     |
|-----------------------------------------------------|
| a) is amenable to better voltage control            |
| b) is more stable                                   |
| c) has exciting current independent of load current |
| d) has all above features                           |
- 4) The permissible flux density in case of cold rolled grain oriented steel is around
 

|                          |                          |
|--------------------------|--------------------------|
| a) 1.7 Wb/m <sup>2</sup> | b) 2.7 Wb/m <sup>2</sup> |
| c) 3.7 Wb/m <sup>2</sup> | d) 4.7 Wb/m <sup>2</sup> |
- 5) The condition for a transformer to be designed for the minimum volume is
 

|                                      |
|--------------------------------------|
| a) Iron loss = copper loss           |
| b) Volume of iron = volume of copper |
| c) Weight of iron = weight of copper |
| d) The volume of iron is minimum     |
- 6) No-load current in a large sized transformer is about
 

|                             |                            |
|-----------------------------|----------------------------|
| a) 10% of full-load current | b) 7% of full-load current |
| c) 4% of full-load current  | d) 1% of full load current |
- 7) Transformer breaths in when
 

|                          |                         |
|--------------------------|-------------------------|
| a) Load on it increases  | b) Load on it decreases |
| c) Load remains constant | d) None of the above    |

- 8) In a dc machines "contraction coefficient" is used to take into account the reduction of
- a) Air-gap area due to armature slots
  - b) Iron losses in the teeth due to lower tooth density
  - c) Armature mmf due to armature slots
  - d) Torque due to ventilating duct
- 9) A lap wound dc machines has 400 conductor and 8 poles. The voltage induced per conductor is 2 volts. The machines generates a voltage of
- a) 100 V
  - b) 200 V
  - c) 400 V
  - d) 800 V
- 10) If the stator winding of a 3 phase induction motor is delta connected, the rotor winding
- a) Should be delta connected
  - b) Should be star connected
  - c) Should not be delta connected
  - d) May be star or delta connected
- 11) When 3 phase induction motor is designed with higher value of  $B_{av}$  it will give
- a) Better full load power factor
  - b) A higher starting torque
  - c) Higher full load efficiency
  - d) Higher overload capacity
- 12) In squirrel cage induction motors, the rotor slots are usually given slight skew in order to
- a) reduce windage losses
  - b) reduce eddy currents
  - c) reduce accumulation of dirt and dust
  - d) reduce magnetic hum
- 13) In turbo-alternator the rotor diameter is limited to about 1.2 m due to
- a) Centrifugal forces
  - b) Deflection
  - c) Critical speed
  - d) All of the above
- 14) Multiple inlet system of air cooling of turbo-alternator can be employed for machine of rating up to
- a) 20 MW
  - b) 100 MW
  - c) 60 MW
  - d) 250 MW

**T.Y.(B.Tech) (Semester - II) (New) (CBCS) Examination: Oct/Nov - 2022**

**ELECTRIC ENGINEERING**

**Electrical Machine Design**

Day & Date: Tuesday, 14-02-2023  
Time: 10:00 AM To 1:00 PM

Max. Marks: 56

**Instructions:** 1) All questions are compulsory.  
2) Figures to the right indicate full marks.

**Section – I**

**Q.2 Answer any Four questions.**

**16**

- Explain the principles of machines.
- Explain the difference between the core & shell type transformer.
- Explain the separation of D&L of dc machine.
- A 350KW, 500V, 450RPM 6 pole dc generator is built with an armature diameter of 0.87m and core length of 0.32m the lap wound armature has 660 conductors. Calculate the specific electric & magnetic loadings
- The ratio and flux to full load mmf in a 400 KVA, 50 Hz, 1 phase core type power transformer is  $2.4 \times 10^{-6}$ , calculate the net iron area and the window area of the transformer. max. flux density in the core is  $1.3 \text{ wb/m}^2$ , current density  $2.7 \text{ A/mm}^2$  and window space factor 0.26. also, calculate the full load mmf.

**Q.3 Attempt any Two of the following**

**12**

- Derive an expression for output equation-EMF/tum of winding.
- Derive an expression for core length for dc machine.
- Estimate the main dimensions including winding conductor area of a 3-ph. Delta-star core type transformer rated at 300kva, 6600/440v, 0Hz a suitable core with 3 steps having a circumscribing circle of 0.2m diameter and leg spacing of 0.4m is available  $\text{emf/tum} = 8.5\text{v}$ , current density  $= 2.5 \text{ A/mm}^2$   
 $K_w = 0.28$ ,  $S_f = 0.9$

**Section – II**

**Q.4 Attempt Any Four of the following.**

**16**

- Explain the specific loadings for induction machine.
- Explain factors affecting the size of rotating machines.
- Derive the separation of D&L for induction machine.
- The output coefficient of 1250kva, 300rpm synchronous generator is  $200 \text{ kva/m-rps}$   $L/D = 0.2$  find the values of main dimensions.
- A 20hp, 440v, 4pole 50hz, 3ph. Induction machine is built with a stator diameter of 0.25m core length of 0.16m the specific electric loading is 23000 amp. Cond. find the specific magnetic loading.

**Q.5 Attempt Any Two of the following**

- a)** Derive an expression for length of the air gap for synchronous machine.
- b)** Derive an expression for design of end rings of induction machine.
- c)** Calculate the specific electric and magnetic loading of 100hp, 300v, 3-ph. 50hz, 8pole, star connected IM having stator core length = 0.5m and diameter = 0.66m turns/ph. = 286 assume full load efficiency = 0.938 & p.f = 0.86

| c) 4% of full-load current  | d) 1% of full load current |
- 2) Transformer breaths in when
 

|                          |                         |
|--------------------------|-------------------------|
| a) Load on it increases  | b) Load on it decreases |
| c) Load remains constant | d) None of the above    |
- 3) In a dc machines "contraction coefficient" is used to take into account the reduction of
 

|                                                        |
|--------------------------------------------------------|
| a) Air-gap area due to armature slots                  |
| b) Iron losses in the teeth due to lower tooth density |
| c) Armature mmf due to armature slots                  |
| d) Torque due to ventilating duct                      |
- 4) A lap wound dc machines has 400 conductor and 8 poles. The voltage induced per conductor is 2 volts. The machines generates a voltage of
 

|          |          |
|----------|----------|
| a) 100 V | b) 200 V |
| c) 400 V | d) 800 V |
- 5) If the stator winding of a 3 phase induction motor is delta connected, the rotor winding
 

|                                   |
|-----------------------------------|
| a) Should be delta connected      |
| b) Should be star connected       |
| c) Should not be delta connected  |
| d) May be star or delta connected |
- 6) When 3 phase induction motor is designed with higher value of  $B_{av}$  it will give
 

|                                  |
|----------------------------------|
| a) Better full load power factor |
| b) A higher starting torque      |
| c) Higher full load efficiency   |
| d) Higher overload capacity      |

- 7) In squirrel cage induction motors, the rotor slots are usually given slight skew in order to
- a) reduce windage losses
  - b) reduce eddy currents
  - c) reduce accumulation of dirt and dust
  - d) reduce magnetic hum
- 8) In turbo-alternator the rotor diameter is limited to about 1.2 m due to
- a) Centrifugal forces
  - b) Deflection
  - c) Critical speed
  - d) All of the above
- 9) Multiple inlet system of air cooling of turbo-alternator can be employed for machine of rating up to
- a) 20 MW
  - b) 100 MW
  - c) 60 MW
  - d) 250 MW
- 10) Which of the following could be lamina-proximately the thickness of laminations of D.C. machine?
- a) 0.0005 mm
  - b) 0.05 mm
  - c) 0.5 mm
  - d) 5 mm
- 11) The commutators segments are connected to the armature conductors by means of
- a) Copper lugs
  - b) Resistance wires
  - c) Insulation pads
  - d) Brazing
- 12) A separately excited generator as compared to a self-excited generator
- a) is amenable to better voltage control
  - b) is more stable
  - c) has exciting current independent of load current
  - d) has all above features
- 13) The permissible flux density in case of cold rolled grain oriented steel is around
- a) 1.7 Wb/m<sup>2</sup>
  - b) 2.7 Wb/m<sup>2</sup>
  - c) 3.7 Wb/m<sup>2</sup>
  - d) 4.7 Wb/m<sup>2</sup>
- 14) The condition for a transformer to be designed for the minimum volume is
- a) Iron loss = copper loss
  - b) Volume of iron = volume of copper
  - c) Weight of iron = weight of copper
  - d) The volume of iron is minimum

Set **S**

T.Y.(B.Tech) (Semester - II) (New) (CBCS) Examination: Oct/Nov - 2022

**ELECTRIC ENGINEERING****Electrical Machine Design**

Day & Date: Tuesday, 14-02-2023  
Time: 10:00 AM To 1:00 PM

Max. Marks: 56

**Instructions:** 1) All questions are compulsory.  
2) Figures to the right indicate full marks.

**Section – I****Q.2 Answer any Four questions.****16**

- Explain the principles of machines.
- Explain the difference between the core & shell type transformer.
- Explain the separation of D&L of dc machine.
- A 350KW, 500V, 450RPM 6 pole dc generator is built with an armature diameter of 0.87m and core length of 0.32m the lap wound armature has 660 conductors. Calculate the specific electric & magnetic loadings
- The ratio and flux to full load mmf in a 400 KVA, 50 Hz, 1 phase core type power transformer is  $2.4 \times 10^{-6}$ , calculate the net iron area and the window area of the transformer. max. flux density in the core is  $1.3 \text{ wb/m}^2$ , current density  $2.7 \text{ A/mm}^2$  and window space factor 0.26. also, calculate the full load mmf.

**Q.3 Attempt any Two of the following****12**

- Derive an expression for output equation-EMF/tum of winding.
- Derive an expression for core length for dc machine.
- Estimate the main dimensions including winding conductor area of a 3-ph. Delta-star core type transformer rated at 300kva, 6600/440v, 0Hz a suitable core with 3 steps having a circumscribing circle of 0.2m diameter and leg spacing of 0.4m is available  $\text{emf/tum} = 8.5 \text{ v}$ , current density  $= 2.5 \text{ A/mm}^2$   
 $K_w = 0.28$ ,  $S_f = 0.9$

**Section – II****Q.4 Attempt Any Four of the following.****16**

- Explain the specific loadings for induction machine.
- Explain factors affecting the size of rotating machines.
- Derive the separation of D&L for induction machine.
- The output coefficient of 1250kva, 300rpm synchronous generator is  $200 \text{ kva/m-rps}$   $L/D = 0.2$  find the values of main dimensions.
- A 20hp, 440v, 4pole 50hz, 3ph. Induction machine is built with a stator diameter of 0.25m core length of 0.16m the specific electric loading is 23000 amp. Cond. find the specific magnetic loading.

**Q.5 Attempt Any Two of the following**

- a)** Derive an expression for length of the air gap for synchronous machine.
- b)** Derive an expression for design of end rings of induction machine.
- c)** Calculate the specific electric and magnetic loading of 100hp, 300v, 3-ph. 50hz, 8pole, star connected IM having stator core length = 0.5m and diameter = 0.66m turns/ph. = 286 assume full load efficiency = 0.938 & p.f = 0.86

Day & Date: Thursday, 16-02-2023  
 Time: 10:00 AM To 01:00 PM

Max. Marks: 70

- Instructions:** 1) Q. No. 1 is compulsory. It should be solved in the first 30 minutes in answer book page No. 03 (Starting page of the Answer Book). Each question carries one mark.  
 2) Don't forget to Mention question paper set (P/Q/R/S) on top of page.

**MCQ/Objective Type Questions**

Duration: 30 Minutes

Marks: 14

**Q.1 Choose the correct alternatives from the options.**

**14**

- 1) Candela is the unit of which of the following?
  - a) Wavelength
  - b) Luminous intensity
  - c) Luminous Flux
  - d) Frequency
- 2) Desired illumination level of the working plane depends upon
  - a) Whether the object is stationary or moving
  - b) Size of the object to seen and its distance from the observer
  - c) Whether the object is to be seen for longer duration or shorter duration of time
  - d) All of above
- 3) \_\_\_\_\_ is used for heating non-conducting materials
  - a) Eddy current heating
  - b) Arc heating
  - c) Induction heating
  - d) Dielectric heating
- 4) In induction heating \_\_\_\_\_ is abnormally high.
  - a) Phase angle
  - b) Frequency
  - c) Current
  - d) Voltage
- 5) In an arc welded joint poor fusion is due to which of the following?
  - a) Improper current
  - b) High welding speed
  - c) Uncleaned metal surface
  - d) Lack of flux
- 6) Spot welding is used for \_\_\_\_\_.
  - a) Thin metal sheets
  - b) Rough and irregular surfaces
  - c) Costing only
  - d) Thick sections
- 7) \_\_\_\_\_ welding is no a resistance welding process.
  - a) Projection
  - b) Seam
  - c) Flush
  - d) Carbon arc
- 8) Which of the following is an advantage of electric traction over other method of traction?
  - a) Faster acceleration
  - b) No pollution problems
  - c) Better braking action
  - d) All of the above
- 9) Which of the following is the voltage for single phase AC system?
  - a) 22V
  - b) 440V
  - c) 5KV
  - d) 15KV

- 10)** Which of the following is the advantage of electric braking?
- a) It avoids wear of track
  - b) Motor continues to remain loaded during braking
  - c) It is instantaneous
  - d) More heat is generated during braking
- 11)** Quadrilateral speed time curve pertains to which of the following services?
- a) Main line service
  - b) Urban service
  - c) Sub-urban service
  - d) Urban and sub-urban service
- 12)** Speed time curve of main line service differs from those of urban and sub-urban services on following account
- a) It has longer free running period
  - b) It has longer coasting period
  - c) Accelerating and braking periods are comparatively smaller
  - d) All of above
- 13)** The specific energy consumption of a train depends on which of the following
- a) Acceleration and retardation
  - b) Gradient
  - c) Distance covered
  - d) All of above
- 14)** Energy consumption in propelling the train is required for which of the following?
- a) Work against the resistance to motion
  - b) Work against gravity while moving up the gradient
  - c) Acceleration
  - d) All of above

Set **P**

**T.Y. (B. Tech) (Sem - II) (New) (CBCS) Examination: Oct/Nov - 2022**  
**ELECTRICAL ENGINEERING**  
**Electrical Utilisation**

Day & Date: Thursday, 16-02-2023  
 Time: 10:00 AM To 01:00 PM

Max. Marks: 56

**Instructions:** 1) Section I and Section II are compulsory.  
 2) Figures to the right indicates full marks.

**Section – I**

**Q.2 Solve any four questions.** **16**

- a) Describe with the help of a neat diagram the construction and working of a high pressure mercury vapour lamp.
- b) What do you understand by direct, indirect and semi-indirect lighting?
- c) Explain the method of induction heating and describe coreless type of induction furnaces.
- d) Explain with a neat sketch how the spot welding is carried out by a spot welding machine.
- e) A 250 V lamp has a total flux of 3000 lumens and takes a current of 0.8 A. Calculate
  - a) lumens/watt
  - b) M.S.C.P./watt

**Q.3 Solve any two questions.** **12**

- a) What is dielectric heating? Explain the factors on which the dielectric loss in a dielectric material depends.
- b) A hall measuring 27.5m x 45.75m is to be illuminated using 200 watt filament lamps. The luminous efficiency of the 200 watt filament lamp is 14.4 lumens/watt. Inside the hall an average illumination of 108 lumens/m<sup>2</sup> is to be provided on the working plane. The walls and ceiling are brightly painted. Take coefficient of utilization as 0.35 and depreciation factor as 0.9. Calculate the number of lamps required for this.
- c) Discuss in detail the principle of operation of (i) Ultrasonic welding and (ii) Laser welding.

**Section – II**

**Q.4 Solve any four questions.** **16**

- a) What do you mean by "Electric traction"? What are the requirements of an ideal traction system? How are they met in an electric traction system?
- b) What are the various traction systems in practice in our country? Give the advantages of electric drives with its limitations and discuss briefly the factors governing the final choice of traction system.
- c) What do you understand by speed-time curves? What is its use in practice? Explain clearly 'free running', 'coasting' and 'braking' with reference to electric traction systems.
- d) Explain speed-time curve of a train running on main line. Define 'crest speed', 'average speed' and 'schedule speed'.
- e) Derive a suitable equation to determine  $V_m$  from a simplified speed-time curve.

**Q.5 Solve any two questions.****12**

- a)** Describe the procedure of calculating the specific energy consumption of an electric train.
- b)** Write short notes on the following.
  - i) Factors affecting energy consumption in propelling a train.
  - ii) Mechanics of 'train movement'
  - iii) Dead weight, accelerating weight and adhesive weight of a train
  - iv) Tractive effort for propulsion of train
- c)** A schedule speed of 45km/h is required between two stops 1.5 km apart. Find the maximum speed over the run if the stop is of 20 second duration. The values of acceleration and retardation are 2.4 km/h/s and 3.2 km/h/s respectively. Assume a simplified trapezoidal speed time curve.

**Q.4 Solve any four questions. 16**

- What do you mean by "Electric traction"? What are the requirements of an ideal traction system? How are they met in an electric traction system?
- What are the various traction systems in practice in our country? Give the advantages of electric drives with its limitations and discuss briefly the factors governing the final choice of traction system.
- What do you understand by speed-time curves? What is its use in practice? Explain clearly 'free running', 'coasting' and 'braking' with reference to electric traction systems.
- Explain speed-time curve of a train running on main line. Define 'crest speed', 'average speed' and 'schedule speed'.
- Derive a suitable equation to determine  $V_m$  from a simplified speed-time curve.

**Q.5 Solve any two questions.****12**

- a)** Describe the procedure of calculating the specific energy consumption of an electric train.
- b)** Write short notes on the following.
  - i) Factors affecting energy consumption in propelling a train.
  - ii) Mechanics of 'train movement'
  - iii) Dead weight, accelerating weight and adhesive weight of a train
  - iv) Tractive effort for propulsion of train
- c)** A schedule speed of 45km/h is required between two stops 1.5 km apart. Find the maximum speed over the run if the stop is of 20 second duration. The values of acceleration and retardation are 2.4 km/h/s and 3.2 km/h/s respectively. Assume a simplified trapezoidal speed time curve.

Day & Date: Thursday, 16-02-2023  
 Time: 10:00 AM To 01:00 PM

Max. Marks: 70

**Instructions:** 1) Q. No. 1 is compulsory. It should be solved in the first 30 minutes in answer book page No. 03 (Starting page of the Answer Book). Each question carries one mark.  
 2) Don't forget to Mention question paper set (P/Q/R/S) on top of page.

**MCQ/Objective Type Questions**

Duration: 30 Minutes

Marks: 14

**Q.1 Choose the correct alternatives from the options.**

**14**

- 1) Spot welding is used for \_\_\_\_\_.  
 a) Thin metal sheets                      b) Rough and irregular surfaces  
 c) Costing only                                d) Thick sections
- 2) \_\_\_\_\_ welding is no a resistance welding process.  
 a) Projection                                    b) Seam  
 c) Flush                                            d) Carbon arc
- 3) Which of the following is an advantage of electric traction over other method of traction?  
 a) Faster acceleration                      b) No pollution problems  
 c) Better braking action                      d) All of the above
- 4) Which of the following is the voltage for single phase AC system?  
 a) 22V                                              b) 440V  
 c) 5KV                                                d) 15KV
- 5) Which of the following is the advantage of electric braking?  
 a) It avoids wear of track  
 b) Motor continues to remain loaded during braking  
 c) It is instantaneous  
 d) More heat is generated during braking
- 6) Quadrilateral speed time curve pertains to which of the following services?  
 a) Main line service                            b) Urban service  
 c) Sub-urban service                            d) Urban and sub-urban service
- 7) Speed time curve of main line service differs from those of urban and sub-urban services on following account  
 a) It has longer free running period  
 b) It has longer coasting period  
 c) Accelerating and braking periods are comparatively smaller  
 d) All of above

- 8) The specific energy consumption of a train depends on which of the following
- a) Acceleration and retardation
  - b) Gradient
  - c) Distance covered
  - d) All of above
- 9) Energy consumption in propelling the train is required for which of the following?
- a) Work against the resistance to motion
  - b) Work against gravity while moving up the gradient
  - c) Acceleration
  - d) All of above
- 10) Candela is the unit of which of the following?
- a) Wavelength
  - b) Luminous intensity
  - c) Luminous Flux
  - d) Frequency
- 11) Desired illumination level of the working plane depends upon
- a) Whether the object is stationary or moving
  - b) Size of the object to seen and its distance from the observer
  - c) Whether the object is to be seen for longer duration or shorter duration of time
  - d) All of above
- 12) \_\_\_\_\_ is used for heating non-conducting materials
- a) Eddy current heating
  - b) Arc heating
  - c) Induction heating
  - d) Dielectric heating
- 13) In induction heating \_\_\_\_\_ is abnormally high.
- a) Phase angle
  - b) Frequency
  - c) Current
  - d) Voltage
- 14) In an arc welded joint poor fusion is due to which of the following?
- a) Improper current
  - b) High welding speed
  - c) Uncleaned metal surface
  - d) Lack of flux

**T.Y. (B. Tech) (Sem - II) (New) (CBCS) Examination: Oct/Nov - 2022**  
**ELECTRICAL ENGINEERING**  
**Electrical Utilisation**

Day & Date: Thursday, 16-02-2023  
 Time: 10:00 AM To 01:00 PM

Max. Marks: 56

**Instructions:** 1) Section I and Section II are compulsory.  
 2) Figures to the right indicates full marks.

**Section – I**

**Q.2 Solve any four questions. 16**

- Describe with the help of a neat diagram the construction and working of a high pressure mercury vapour lamp.
- What do you understand by direct, indirect and semi-indirect lighting?
- Explain the method of induction heating and describe coreless type of induction furnaces.
- Explain with a neat sketch how the spot welding is carried out by a spot welding machine.
- A 250 V lamp has a total flux of 3000 lumens and takes a current of 0.8 A. Calculate
  - lumens/watt
  - M.S.C.P./watt

**Q.3 Solve any two questions. 12**

- What is dielectric heating? Explain the factors on which the dielectric loss in a dielectric material depends.
- A hall measuring 27.5m x 45.75m is to be illuminated using 200 watt filament lamps. The luminous efficiency of the 200 watt filament lamp is 14.4 lumens/watt. Inside the hall an average illumination of 108 lumens/m<sup>2</sup> is to be provided on the working plane. The walls and ceiling are brightly painted. Take coefficient of utilization as 0.35 and depreciation factor as 0.9. Calculate the number of lamps required for this.
- Discuss in detail the principle of operation of (i) Ultrasonic welding and (ii) Laser welding.

**Section – II**

**Q.4 Solve any four questions. 16**

- What do you mean by "Electric traction"? What are the requirements of an ideal traction system? How are they met in an electric traction system?
- What are the various traction systems in practice in our country? Give the advantages of electric drives with its limitations and discuss briefly the factors governing the final choice of traction system.

**MCQ/Objective Type Questions**

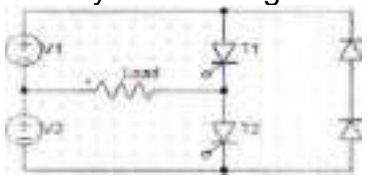

Duration: 30 Minutes

Marks: 14

**Q.1 Choose the correct alternatives from the options.**

**14**

- 1) An SCR is a \_\_\_\_\_.  
 a) four layer, four junction device    b) four layer, three junction device  
 c) four layer, two junction device    d) three layer, single junction device
- 2) The static V-I curve for the SCR is plotted for \_\_\_\_\_.  
 a)  $I_a$  (anode current) vs  $I_g$  (gate current),  $V_a$  (anode - cathode voltage) as a parameter  
 b)  $I_a$  vs  $V_a$  with  $I_g$  as a parameter  
 c)  $V_a$  vs  $I_g$  with  $I_a$  as a parameter  
 d)  $I_g$  vs  $V_g$  with  $I_a$  as a parameter
- 3) For an SCR in the reverse blocking mode, (practically) \_\_\_\_\_.  
 a) leakage current does not flow  
 b) leakage current flows from anode to cathode  
 c) leakage current flows from cathode to anode  
 d) leakage current flows from gate to anode
- 4) Higher the magnitude of the gate pulse \_\_\_\_\_.  
 a) lesser is the time required to inject the charges.  
 b) greater is the time required to inject the charges.  
 c) greater is the value of anode current  
 d) lesser is the value of anode current
- 5) The DIAC can be represented by \_\_\_\_\_.  
 a) two SCRs in anti-parallel    b) two SCRs in parallel  
 c) two diodes in anti-parallel    d) two diodes in parallel
- 6) The GTO can be turned off \_\_\_\_\_.  
 a) by a positive gate pulse  
 b) by a negative gate pulse  
 c) by a negative anode-cathode voltage  
 d) by removing the gate pulse
- 7) The average output voltage is maximum when SCR is triggered at  $\omega t =$  \_\_\_\_\_.  
 a)  $\pi$     b) 0  
 c)  $\pi/2$     d)  $\pi/4$

- 8) A single-phase half-wave thyristor circuit with R load is triggered at an angle of  $\alpha = 0^\circ$ . As such, the maximum value of the average output voltage would be given by Consider  $V_s = V_m \sin \omega t$
- $V_m/\pi$
  - $2V_m/\pi$
  - $V_m$
  - $V_m/\alpha$
- 9) A single-phase half wave circuit has  $V_s = 230$  V with a R load of  $100 \Omega$ . Find the average load current at  $\alpha = 30^\circ$ .
- 0.96 A
  - 0.57 A
  - 1.45 A
  - 2.3 A
- 10) For a single phase half-wave thyristor circuit with R load, the input power factor is given by \_\_\_\_\_.
- rms source voltage/total rms line current
  - rms input power/power delivered to the load
  - $\cos \alpha$
  - power delivered to load/input VA
- 11) Choppers convert from \_\_\_\_\_.
- fixed AC to fixed DC
  - fixed DC to variable AC
  - fixed DC to variable DC
  - constant AC to variable AC
- 12) In a VSI (Voltage source inverter) \_\_\_\_\_.
- the internal impedance of the DC source is negligible
  - the internal impedance of the DC source is very very high
  - the internal impedance of the AC source is negligible
  - All of the above
- 13) Identify the circuit given below.
- 
- Half wave series inverter
  - Full wave series inverter
  - 1-ph Half bridge inverter
  - Half wave parallel inverter
- 14) Earlier than the semiconductor technology, \_\_\_\_\_ devices were used for voltage control applications.
- cycloconverters
  - vacuum tubes
  - tap changing transformer
  - induction machine

**T. Y. (B. Tech) (Sem - II) (New) (CBCS) Examination: Oct/Nov-2022**  
**ELECTRICAL ENGINEERING**  
**Power Electronics**

Day & Date: Monday, 20-02-2023  
 Time: 10:00 AM To 01:00 PM

Max. Marks: 56

**Instructions:** 1) Figures to the right indicates full marks  
 2) All questions are compulsory.

**Section – I**

**Q.2 Answer the following. (Any Four)**

16

- In how many stages the SCR will operates and explain with neat I-V characteristics.
- What is Natural commutation? And explain with neat circuit diagram and waveforms.
- Explain the principle of operation of n- channel MOSFET with its V-I Characteristics.
- What is necessity of Freewheeling Diode and explain with example?
- A1-Ph halfwave-controlled rectifier with resistive load, if firing angle  $\alpha = \pi/4$  rad/sec,  $V_s = 230$  V,  $R = 5\Omega$  Find
  - Average output voltage
  - RMS output voltage
  - Power delivered to load

**Q.3 Answer the following. (Any Two)**

12

- Define the following.
  - Peak working forward voltage ( $V_{DWM}$ )
  - Peak working reverse voltage ( $V_{RWM}$ )
  - Peak Surge forward Voltage ( $V_{DSM}$ )
  - Forward  $dv/dt$  Rating of SCR
- Explain four mode operation of TRIAC with V-I characteristic.
- Explain the principle of operation of 3- phase semi converter for R load, also draw the waveforms for firing angle  $\alpha = 60^\circ$ .

**Section – II**

**Q.4 Answer the following. (Any Four)**

16

- Draw and Explain step up chopper. Also derive expression of average output voltage.
- Explain various methods of voltage control in inverter.
- What are the classifications of Inverters and explain?
- Draw & explain with neat waveforms of single-phase full bridge inverter for R load.
- What is Integral cycle control and Phase control of A.C. Voltage controller and explain?

**Q.5 Answer the following. (Any Two)**

- a)** A Step up chopper has input voltage of 220 V and output voltage of 660V. If the conducting time of thyristor-chopper is 100 $\mu$ sec, compute the pulse width of output voltage. In case output-voltage pulse width is halved for constant frequency operation, find the average value of new output voltage.
- b)** Explain 3-ph full bridge inverter for 120° mode of operation and draw the phase and line voltage waveforms. Assume load is star connected balanced load.
- c)** What is UPS? And explain with neat circuit diagrams.

**T. Y. (B. Tech) (Sem - II) (New) (CBCS) Examination: Oct/Nov-2022**  
**ELECTRICAL ENGINEERING**  
**Power Electronics**

Day & Date: Monday, 20-02-2023  
 Time: 10:00 AM To 01:00 PM

Max. Marks: 56

**Instructions:** 1) Figures to the right indicates full marks  
 2) All questions are compulsory.

**Section – I**

**Q.2 Answer the following. (Any Four)** **16**

- In how many stages the SCR will operates and explain with neat I-V characteristics.
- What is Natural commutation? And explain with neat circuit diagram and waveforms.
- Explain the principle of operation of n- channel MOSFET with its V-I Characteristics.
- What is necessity of Freewheeling Diode and explain with example?
- A1-Ph halfwave-controlled rectifier with resistive load, if firing angle  $\alpha = \pi/4$  rad/sec,  $V_s = 230$  V,  $R = 5\Omega$  Find
  - Average output voltage
  - RMS output voltage
  - Power delivered to load

**Q.3 Answer the following. (Any Two)** **12**

- Define the following.
  - Peak working forward voltage ( $V_{DWM}$ )
  - Peak working reverse voltage ( $V_{RWM}$ )
  - Peak Surge forward Voltage ( $V_{DSM}$ )
  - Forward  $dv/dt$  Rating of SCR
- Explain four mode operation of TRIAC with V-I characteristic.
- Explain the principle of operation of 3- phase semi converter for R load, also draw the waveforms for firing angle  $\alpha = 60^\circ$ .

**Section – II**

**Q.4 Answer the following. (Any Four)** **16**

- Draw and Explain step up chopper. Also derive expression of average output voltage.
- Explain various methods of voltage control in inverter.
- What are the classifications of Inverters and explain?
- Draw & explain with neat waveforms of single-phase full bridge inverter for R load.
- What is Integral cycle control and Phase control of A.C. Voltage controller and explain?

**Q.5 Answer the following. (Any Two)**

- a)** A Step up chopper has input voltage of 220 V and output voltage of 660V. If the conducting time of thyristor-chopper is  $100\mu\text{sec}$ , compute the pulse width of output voltage. In case output-voltage pulse width is halved for constant frequency operation, find the average value of new output voltage.
- b)** Explain 3-ph full bridge inverter for  $120^\circ$  mode of operation and draw the phase and line voltage waveforms. Assume load is star connected balanced load.
- c)** What is UPS? And explain with neat circuit diagrams.

Day & Date: Monday, 20-02-2023  
 Time: 10:00 AM To 01:00 PM

Max. Marks: 70

- Instructions:** 1) Q. No. 1 is compulsory. It should be solved in the first 30 minutes in answer book. Page no 03 (Starting page of the Answer Book). Each question carries one mark.  
 2) Don't forget to Mention question paper set (P/Q/R/S) on top of page.  
 3) Figures to the right indicates full marks  
 4) Assume suitable data wherever needed and mention it clearly.

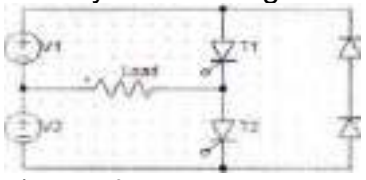

**MCQ/Objective Type Questions**

Duration: 30 Minutes

Marks: 14

**Q.1 Choose the correct alternatives from the options.**

**14**

- 1) The GTO can be turned off \_\_\_\_\_.  
 a) by a positive gate pulse  
 b) by a negative gate pulse  
 c) by a negative anode-cathode voltage  
 d) by removing the gate pulse
- 2) The average output voltage is maximum when SCR is triggered at  $\omega t =$  \_\_\_\_\_.  
 a)  $\pi$   
 b) 0  
 c)  $\pi/2$   
 d)  $\pi/4$
- 3) A single-phase half-wave thyristor circuit with R load is triggered at an angle of  $\alpha = 0^\circ$ . As such, the maximum value of the average output voltage would be given by Consider  $V_s = V_m \sin \omega t$   
 a)  $V_m/\pi$   
 b)  $2V_m/\pi$   
 c)  $V_m$   
 d)  $V_m/\alpha$
- 4) A single-phase half wave circuit has  $V_s = 230$  V with a R load of  $100 \Omega$ . Find the average load current at  $\alpha = 30^\circ$ .  
 a) 0.96 A  
 b) 0.57 A  
 c) 1.45 A  
 d) 2.3 A
- 5) For a single phase half-wave thyristor circuit with R load, the input power factor is given by \_\_\_\_\_.  
 a) rms source voltage/total rms line current  
 b) rms input power/power delivered to the load  
 c)  $\cos \alpha$   
 d) power delivered to load/input VA
- 6) Choppers convert from \_\_\_\_\_.  
 a) fixed AC to fixed DC  
 b) fixed DC to variable AC  
 c) fixed DC to variable DC  
 d) constant AC to variable AC

- 7) In a VSI (Voltage source inverter) \_\_\_\_\_.  
 a) the internal impedance of the DC source is negligible  
 b) the internal impedance of the DC source is very very high  
 c) the internal impedance of the AC source is negligible  
 d) All of the above

- 8) Identify the circuit given below.

- a) Half wave series inverter      b) Full wave series inverter  
 c) 1-ph Half bridge inverter      d) Half wave parallel inverter
- 9) Earlier than the semiconductor technology, \_\_\_\_\_ devices were used for voltage control applications.  
 a) cycloconverters      b) vacuum tubes  
 c) tap changing transformer      d) induction machine
- 10) An SCR is a \_\_\_\_\_.  
 a) four layer, four junction device      b) four layer, three junction device  
 c) four layer, two junction device      d) three layer, single junction device
- 11) The static V-I curve for the SCR is plotted for \_\_\_\_\_.  
 a)  $I_a$  (anode current) vs  $I_g$  (gate current),  $V_a$  (anode - cathode voltage) as a parameter  
 b)  $I_a$  vs  $V_a$  with  $I_g$  as a parameter  
 c)  $V_a$  vs  $I_g$  with  $I_a$  as a parameter  
 d)  $I_g$  vs  $V_g$  with  $I_a$  as a parameter
- 12) For an SCR in the reverse blocking mode, (practically) \_\_\_\_\_.  
 a) leakage current does not flow  
 b) leakage current flows from anode to cathode  
 c) leakage current flows from cathode to anode  
 d) leakage current flows from gate to anode
- 13) Higher the magnitude of the gate pulse \_\_\_\_\_.  
 a) lesser is the time required to inject the charges.  
 b) greater is the time required to inject the charges.  
 c) greater is the value of anode current  
 d) lesser is the value of anode current
- 14) The DIAC can be represented by \_\_\_\_\_.  
 a) two SCRs in anti-parallel      b) two SCRs in parallel  
 c) two diodes in anti-parallel      d) two diodes in parallel

 2) All questions are compulsory.

**Section – I**

**Q.2 Answer the following. (Any Four)** **16**

- a) In how many stages the SCR will operates and explain with neat I-V characteristics.
- b) What is Natural commutation? And explain with neat circuit diagram and waveforms.
- c) Explain the principle of operation of n- channel MOSFET with its V-I Characteristics.
- d) What is necessity of Freewheeling Diode and explain with example?
- e) A1-Ph halfwave-controlled rectifier with resistive load, if firing angle  $\alpha = \pi/4$  rad/sec,  $V_s = 230$  V,  $R = 5\Omega$  Find
  - 1) Average output voltage
  - 2) RMS output voltage
  - 3) Power delivered to load

**Q.3 Answer the following. (Any Two)** **12**

- a) Define the following.
  - 1) Peak working forward voltage ( $V_{DWM}$ )
  - 2) Peak working reverse voltage ( $V_{RWM}$ )
  - 3) Peak Surge forward Voltage ( $V_{DSM}$ )
  - 4) Forward  $dv/dt$  Rating of SCR
- b) Explain four mode operation of TRIAC with V-I characteristic.
- c) Explain the principle of operation of 3- phase semi converter for R load, also draw the waveforms for firing angle  $\alpha = 60^\circ$ .

**Section – II**

**Q.4 Answer the following. (Any Four)** **16**

- a) Draw and Explain step up chopper. Also derive expression of average output voltage.
- b) Explain various methods of voltage control in inverter.
- c) What are the classifications of Inverters and explain?
- d) Draw & explain with neat waveforms of single-phase full bridge inverter for R load.
- e) What is Integral cycle control and Phase control of A.C. Voltage controller and explain?

**Q.5 Answer the following. (Any Two)**

- a)** A Step up chopper has input voltage of 220 V and output voltage of 660V. If the conducting time of thyristor-chopper is 100 $\mu$ sec, compute the pulse width of output voltage. In case output-voltage pulse width is halved for constant frequency operation, find the average value of new output voltage.
- b)** Explain 3-ph full bridge inverter for 120° mode of operation and draw the phase and line voltage waveforms. Assume load is star connected balanced load.
- c)** What is UPS? And explain with neat circuit diagrams.

**Instructions:** 1) All questions are compulsory.  
 2) Figures to the right indicate full marks.

**Section – I**

**Q.2 Solve Any Four**

**16**

- a) Explain different types of signals.  
 b) Find Even and Odd signal for following signal

- c) Subtract following signal  $x_1(t) - x_2(t) = y(t)$

- d) Multiply signals  $x_1(t) \cdot x_2(t) = y(t)$  for following signal.

- e) Draw following Discrete time signal in Graphical form -  
 $x(-3) = -1, x(-2) = 2, x(-1) = 0, x(0) = 1, x(1) = 2, x(2) = 3, x(3) = 2$

12

**Q.3 Solve Any Two**

- a) Determine the power and energy of the signal  $A \sin(\omega_0 t + \varphi) = x(t)$   
 b) Multiply Following signals

- c) Check given signal is Linear or Non- Linear.

$$\frac{d^2 y(+)}{dt^2} + 3ty(t) = t^2 x(t)$$

**Section – II****Q.4 Solve Any Four**

16

- a) Explain following properties for Continuous Time Fourier Transform.  
 i) Linearity  
 ii) Frequency shifting  
 iii) Time shifting  
 iv) Time scaling  
 b) Find magnitude and phase spectrum for  $x(t) = \delta(t)$   
 c) Find Z transform and ROC for signal  $x[n] = b^n u[-n - 1]$   
 d) Explain Linearity and Time shifting Property for Z transform  
 e) Give the Property of Region of Conversion

**Q.5 Solve Any Two**

12

- a) Find Z transform & ROC of  $x[n] = \sin(\omega_0 n)u[n]$   
 b) Explain magnitude and phase spectrum for Fourier transform  
 c) Determine Fourier Transform of Gaussian pulse  $x(t) = e^{-b^2 t^2}$

2) Don't forget to Mention question paper set (P/Q/R/S) on top of page.  
3) Figures to the right indicates full marks.

## Marks:14

14

- 1) For even signal  $b_n = \underline{\hspace{2cm}}$ .  
a) 1  
b) 0  
c) Infinity  
d) None
- 2) The Convolution Property states that,  $\underline{\hspace{2cm}}$ .  
a)  $Fs\{x_1(t) \times x_2(t)\} = To.Cn.Dn$   
b)  $Fs\{x_1(t) \times x_2(t)\} = Cn.Dn$   
c)  $Fs\{x_1(t) \times x_2(t)\} = To.Cn.$   
d) None
- 3) For Odd Signal,  $a_0 = \underline{\hspace{2cm}}$   $a_n = \underline{\hspace{2cm}}$ .  
a) 0,0  
b) 0,1  
c) 1,1  
d) None
- 4) ROC of Z-transform is  $\underline{\hspace{2cm}}$  in Z-plane centered at  $\underline{\hspace{2cm}}$ .  
a) Circular Disk, Origin  
b) Concentric ring, one  
c) Circular Disk, infinity  
d) Concentric ring, infinity
- 5) ROC of LT1 stable system contains  $\underline{\hspace{2cm}}$ .  
a) Circle  
b) Unit circle  
c) Square  
d) None
- 6) Parseval's theorem states that,  $\underline{\hspace{2cm}}$  of signal may be defined in terms of its Fourier Series coefficients.  
a) Energy  
b) Strength  
c) Power  
d) All
- 7) The Z transform of Discrete Time sequence  $x[n]$  is  $\underline{\hspace{2cm}}$ .  
a)  $x[z] = \sum_{n=0}^{\infty} x[n].z^n$   
b)  $x[z] = x[n].z^n$   
c)  $x[z] = \sum_{n=-\infty}^{\infty} x[n].z^{-n}$   
d)  $x[z] = \sum_{n=-\infty}^{\infty} x[n].z^n$
- 8) The signals  $x(t) = e^{-5t}$   $\underline{\hspace{2cm}}$ .  
a) Odd  
b) Even  
c) Neither odd nor even  
d) Both

- 9) Which mathematical notation specifies the condition of periodicity for a continuous time signal?
- a)  $x(t) = x(t + T_0)$                       b)  $x(n) = x(n + N)$   
c)  $x(t) = e^{-\alpha t}$                       d) None of the above
- 10) The signal  $x(t) = \sin 5t u(t)$  is \_\_\_\_\_.  
a) Casual                      b) Non casual  
c) Anti-casual                      d) None
- 11) The systems  $y(t) = x(t - 4)$  is \_\_\_\_\_.  
a) Static                      b) Dynamic  
c) Both a and b                      d) None
- 12) The signal  $x(t) = \cos 3t$  is \_\_\_\_\_.  
a) Causal                      b) Non causal  
c) Anti causal                      d) None
- 13) The given system  $y(t) = 3 + x(t)$  is \_\_\_\_\_.  
a) Invertible                      b) Non-invertible  
c) Both a and b                      d) None
- 14) The given systems  $y(t) = 5 + x(t)$  is \_\_\_\_\_.  
a) Invertible                      b) Non-invertible  
c) Both a and b                      d) None

Day & Date: Wednesday 22-02-2023  
 Time: 10:00 AM To 01:00 PM

Max. Marks: 56

**Instructions:** 1) All questions are compulsory.  
 2) Figures to the right indicate full marks.

**Section – I**

**Q.2 Solve Any Four**

**16**

- a) Explain different types of signals.  
 b) Find Even and Odd signal for following signal

- c) Subtract following signal  $x_1(t) - x_2(t) = y(t)$

- d) Multiply signals  $x_1(t) \cdot x_2(t) = y(t)$  for following signal.

- e) Draw following Discrete time signal in Graphical form -  
 $x(-3) = -1, x(-2) = 2, x(-1) = 0, x(0) = 1, x(1) = 2, x(2) = 3, x(3) = 2$

**Q.3 Solve Any Two**

- a) Determine the power and energy of the signal  $A \sin(\omega_0 t + \varphi) = x(t)$   
 b) Multiply Following signals

- c) Check given signal is Linear or Non-Linear.

$$\frac{d^2 y(+)}{dt^2} + 3ty(t) = t^2 x(t)$$

**Section – II****Q.4 Solve Any Four**

- a) Explain following properties for Continuous Time Fourier Transform.  
 i) Linearity  
 ii) Frequency shifting  
 iii) Time shifting  
 iv) Time scaling  
 b) Find magnitude and phase spectrum for  $x(t) = \delta(t)$   
 c) Find Z transform and ROC for signal  $x[n] = b^n u[-n - 1]$   
 d) Explain Linearity and Time shifting Property for Z transform  
 e) Give the Property of Region of Conversion

**Q.5 Solve Any Two**

- a) Find Z transform & ROC of  $x[n] = \sin(\omega_0 n)u[n]$   
 b) Explain magnitude and phase spectrum for Fourier transform  
 c) Determine Fourier Transform of Gaussian pulse  $x(t) = e^{-b^2 t^2}$

Day & Date: Friday, 24-02-2023  
 Time: 10:00 AM To 01:00 PM

Max. Marks: 70

- Instructions:** 1) Q. No. 1 is compulsory. It should be solved in the first 30 minutes in answer book. Page no 03 (Starting page of the Answer Book). Each question carries one mark.  
 2) Don't forget to Mention question paper set (P/Q/R/S) on top of page.  
 3) Figures to the right indicates full marks  
 4) Assume suitable data wherever needed and mention it clearly.

**MCQ/Objective Type Questions**

Duration: 30 Minutes

Marks: 14

**Q.1 Choose the correct alternatives from the options and rewrite the sentence. 14**

- 1) The right hand plane of s-plane, when mapped into z-plane
  - a) Covers the entire portion of inside of the unit circle
  - b) Covers the entire portion of Outside of the unit circle
  - c) It falls on the unit circle
  - d) It covers the entire portion except the unit circle
- 2) Lag compensation network normally consists of \_\_\_\_\_.
  - a) R and L elements
  - b) L and C elements
  - c) R and C elements
  - d) R, L and C elements
- 3) Leading compensator network is \_\_\_\_\_.
  - a) Equalizer
  - b) high pass filter
  - c) low pass filter
  - d) None of above
- 4) The transfer function of a lead compensator is  $G_C(s) = \frac{1+0.12s}{1+0.04s}$   
 The maximum phase shift that can be obtained from this compensator is \_\_\_\_\_.
  - a)  $60^\circ$
  - b)  $45^\circ$
  - c)  $30^\circ$
  - d)  $15^\circ$
- 5) \_\_\_\_\_ is used for improving both transient and steady state responses of the control system.
  - a) Integrator
  - b) Comparator
  - c) lag-lead compensator
  - d) None of these
- 6) In bode plot the gain cross over frequency is the frequency at which \_\_\_\_\_.
  - a)  $|(G(j\omega)H(j\omega))| = 1$
  - b)  $|(G(j\omega)H(j\omega))| = 0$
  - c)  $|(G(j\omega)H(j\omega))| = \infty$
  - d)  $\frac{1}{|(G(j\omega)H(j\omega))|} = K$
- 7) The system matrix of a discrete system is given by  $A = \begin{bmatrix} 0 & 1 \\ -3 & -5 \end{bmatrix}$ . The characteristic equation is given by
  - a)  $z^2 + 5z + 3 = 0$
  - b)  $z^2 - 3z - 5 = 0$
  - c)  $z^2 + 3z + 5 = 0$
  - d)  $z^2 + z + 2 = 0$

Day & Date: Friday, 24-02-2023  
 Time: 10:00 AM To 01:00 PM

Max. Marks: 56

**Instructions:** 1) Figures to the right indicates full marks.  
 2) All questions are compulsory.

**Section – I**

**Q.2 Attempt any Four of the following question. 16**

- Explain realization of lag compensator.
- Consider the system having transfer function  $G(s) = k / s(s + 8)$  with unity feedback. Design a lead compensator to meet following specifications.
  - Damping ratio = 0.6
  - Natural frequency of oscillation  $\omega_n = 12$  rad/sec
  - $K_v \geq 10$
- Obtain state model for the system described in phase variable form.  

$$d^3y / d t^3 - 6 d^2y / d t^2 + 11 \frac{dy}{dt} + 6y + u(t) = 0$$
- Write the properties of state transition matrix.
- A system is represented by the following state and output equations find Transfer function of the system.

$$\dot{x}(t) = \begin{bmatrix} -2 & -3 \\ 4 & 2 \end{bmatrix} x(t) + \begin{bmatrix} 3 \\ 5 \end{bmatrix} U(t)$$

$$Y = [1 \quad 1] x(t)$$

**Q.3 Attempt any Two of the following question. 12**

- Obtain state Transition matrix whose system matrix is given by  $\begin{bmatrix} 0 & 1 \\ -2 & -3 \end{bmatrix}$
- Test the controllability & observability of the system whose state space representation is given as

$$\dot{x}(t) = \begin{bmatrix} -1 & 0 \\ 0 & -2 \end{bmatrix} x(t) + \begin{bmatrix} 0 \\ 1 \end{bmatrix} U(t)$$

$$Y = [1 \quad 2] x(t)$$

- Explain the Limitations of Transfer function Approach and advantages of state variable Analysis.

**Section – II**

**Q.4 Solve any four. 16**

- Explain common physical nonlinearities.
- Derive pulse transfer function of cascaded elements.
- Derive describing function of saturation.
- Determine the type of the singularity for the differential equation.  

$$y'' + 3y' + 2y = 0$$
- Explain Jump resonance phenomenon in nonlinear systems.

**Q.5 Solve any two.**

- a) Examine the stability of the system given by equation by Jury's test

$$Z^4 - 1.2 Z^3 + 0.07 Z^2 + 0.3 Z - 0.08 = 0$$

- b) Explain in short mapping between s-plane and z-plane.

- c) Consider the system  $\dot{x} = Ax, y = Cx$

$$A = \begin{bmatrix} -1 & 1 \\ 1 & 2 \end{bmatrix}$$

$$\text{And } C = [1 \quad 0]$$

Design a full order observer. The desired pole locations for the observer matrix are at -5, -5.

**Seat  
No.**

Max. Marks: 70

Marks: 14

1) The phase-lead network function  $G_C(s) = \frac{s + \frac{1}{T}}{s + \frac{1}{aT}}$ , where  $a < 1$  would

provide maximum phase –lead at a frequency of  $\omega_1$

- a)  $\frac{1}{T}$
- b)  $\frac{1}{aT}$
- c)  $\frac{1}{T\sqrt{a}}$
- d)  $\frac{1}{a\sqrt{T}}$

**2)** Observable matrix is given by

- $$\begin{array}{ll} \text{a)} & \begin{bmatrix} B \\ BA \\ \vdots \\ BA^{n-1} \end{bmatrix} \\ \text{b)} & \begin{bmatrix} A \\ AC \\ \vdots \\ AC^{n-1} \end{bmatrix} \\ \text{c)} & \begin{bmatrix} C \\ CA \\ \vdots \\ CA^{n-1} \end{bmatrix} \\ \text{d)} & \begin{bmatrix} D \\ DA \\ \vdots \\ DA^{n-1} \end{bmatrix} \end{array}$$

3) The state model of a linear time invariant system is given by  $\dot{X}(t) = AX(t) + BU(t)$  and  $Y(t) = CX(t) + DU(t)$ . The expression for transfer function of the system is \_\_\_\_\_.

- $C(sI - A)^{-1}BU(s) + D$
- $(sI - A)^{-1}BU(s) + D$
- $(sI - A)^{-1}BU(s)$
- $C(sI - A)^{-1}B$

4) Non-linearity caused by servo motor is \_\_\_\_\_.

- a) static friction                      b) back lash  
c) saturation                              d) none of these

- Page 6 of 16

- 4) Assume suitable data wherever needed and mention it clearly.

Marks: 14

1) Non-linearity caused by servo motor is \_\_\_\_\_.

- a) static friction                      b) back lash  
c) saturation                          d) none of these
- In non-linear control system limit cycle is self-sustained oscillations of \_\_\_\_.
- a) Variable amplitude                      b) variable frequency  
c) fixed frequency                          d) fixed frequency and amplitude
- The information contained in a signal is preserved in the sampled version if \_\_\_\_.
- a)  $\omega_s = \omega_m$                           b)  $\omega_s = 0.5 \omega_m$   
c)  $\omega_s = 0.1 \omega_m$                       d)  $\omega_s \geq 2\omega_m$

4) The transfer function of zero order hold is \_\_\_\_\_.

- a)  $\frac{1 - e^{Ts}}{s}$       b)  $\frac{1 - e^{-Ts}}{s}$   
 c)  $\frac{1 - e^{Ts}}{s}$       d)  $\frac{1 - e^{-Ts}}{s}$

**5)** The right hand plane of s-plane, when mapped into z-plane

- a) Covers the entire portion of inside of the unit circle

 Time: 10:00 AM To 01:00 PM

Max. Marks: 70

- Instructions:** 1) Q. No. 1 is compulsory. It should be solved in the first 30 minutes in answer book. Page no 03 (Starting page of the Answer Book). Each question carries one mark.  
 2) Don't forget to Mention question paper set (P/Q/R/S) on top of page.  
 3) Figures to the right indicates full marks  
 4) Assume suitable data wherever needed and mention it clearly.

**MCQ/Objective Type Questions**

Duration: 30 Minutes

Marks: 14

**Q.1 Choose the correct alternatives from the options.**

**14**

- 1) Index grading may be achieved through the \_\_\_\_\_ of mobile ions across the core cladding interface within molten glass.
  - a) Doping
  - b) Diffusion
  - c) Separation
  - d) Combination
- 2) N.A is useful measure of
  - a) Light scattering ability
  - b) Dispersion
  - c) Attenuation
  - d) Light gathering capability
- 3) Multimode graded index fibers have \_\_\_\_\_ core diameters than multimode step index fibers.
  - a) Large
  - b) Varying
  - c) Smaller
  - d) Constant
- 4) Meridional ray is the ray which passes through \_\_\_\_\_ of the fiber core.
  - a) All angles
  - b) The axis
  - c) N.A.
  - d) Structure
- 5) The principle determining factor for the link designers to consider are the transmission distance, required bit rate and the \_\_\_\_\_.
  - a) Coupler
  - b) Fiber used
  - c) Data Rate
  - d) SNR
- 6) Electrical devices in optical network are basically used for \_\_\_\_\_.
  - a) Signal degradation
  - b) Node transfer
  - c) Signal control
  - d) Amplification
- 7) \_\_\_\_\_ is a multiplexing technique used to combine optical signals.
  - a) WDM
  - b) FDM
  - c) TDM
  - d) None of these

- 8) The rainbow pattern seen on a CD is an example of
  - a) Reflection
  - b) Refraction
  - c) Diffraction
  - d) None
- 9) OTDM stand for
  - a) Orthogonal Time Duplex Multiplexing
  - b) Orthogonal Time Division Multiplexing
  - c) Orthogonal Time Division Multiplexing
  - d) Optical Time Division Multiplexing
- 10) The requirement of detector is
  - a) High Fidelity
  - b) Large size
  - c) More N.A.
  - d) All
- 11) Impact ionization phenomenon occur in \_\_\_\_\_ Photodiode.
  - a) PN
  - b) Avalanche
  - c) PIN
  - d) None
- 12) LASER is \_\_\_\_\_ type of optical output power.
  - a) Coherent
  - b) Incoherent
  - c) Spontaneous type
  - d) Both a & b
- 13) Injection laser will generally supply \_\_\_\_\_ of optical output power.
  - a) Lower
  - b) Higher
  - c) Same
  - d) None
- 14) Attenuation per Km expressed in
  - a) Db per km
  - b) Ampere
  - c) Watt
  - d) None

**T.Y. (B.Tech.) (Sem - II) (New) (CBCS) Examination: Oct/Nov-2022**  
**ELECTRICAL ENGINEERING**  
**Optical Communication**

Day & Date: Friday, 24-02-2023

Max. Marks: 56

Time: 10:00 AM To 01:00 PM

**Instructions:** 1) All question are compulsory.  
 2) Assume suitable data wherever needed and mention it clearly.

**SECTION – I**

**Q.2 Attempt any Four.** **16**

- a) Using simple ray theory, describe the mechanism for the transmission of light within an optical fiber.
- b) Explain the different type of rays in optical fiber.
- c) Explain intrinsic and extrinsic absorption mechanism in fiber optics.
- d) Explain the principle operation/concept of double heterojunction LED.
- e) With suitable sketches explain working principle of LASER.

**Q.3 Attempt any two.** **12**

- a) A long single mode optical fiber has an attenuation of  $0.5 \text{ dB km}^{-1}$  when operating at a wavelength of  $1.3 \mu\text{m}$ . The fiber core diameter is  $6\mu\text{m}$  and laser source bandwidth is 600 MHz. Compare the threshold optical powers for stimulated Brillouin and Raman scattering within the fiber at the wavelength specified.
- b) An optical fiber has a core refractive index of 1.50 and a cladding refractive index of 1.47 Determine a. Critical angle at the core cladding interface b. NA for the fiber c. Acceptance angle.
- c) Explain fiber alignment and joint loss with Fresnel reflection.

**SECTION – II**

**Q.4 Attempt any four.** **16**

- a) Explain Quantum Efficiency & Responsivity.
- b) Explain the principle of p-i-n photodiode.
- c) Write a short note on OTDM.
- d) Write a short note on Li-Fi
- e) Explain SONET and SDH networks.

**Q.5 Attempt any two.** **12**

- a) Explain in detail the receiver design for optical communication.
- b) Explain types of Optical Amplifiers.
- c) Explain the various parameters effecting the speed of response of detectors.

**Q.1 Solve All MCQ Questions.**

**14**

- 1) Dead zone of an instrument is \_\_\_\_\_.
  - a) The largest change of input quantity for which there is no output of the instrument.
  - b) The time required by an instrument to begin to respond to a change in measurand.
  - c) The unmeasured quantity which exceeds the maximum range of the instrument.
  - d) The time required by an instrument to warm up initial.
- 2) The sensors are classified on the basis of \_\_\_\_\_.
  - a) Functions
  - b) Performance
  - c) Output
  - d) All of the above
- 3) Which of the following represents the output of Hall Effect transducer?
  - a) Hall potential
  - b) Emf
  - c) Applied voltage
  - d) Lorentz Voltage
- 4) Piezoelectric effect is when materials produce electric charges when \_\_\_\_\_.
  - a) Voltage is applied
  - b) Mechanical Stress is applied
  - c) Electric field is applied
  - d) Magnetic field is applied
- 5) The smallest change which a sensor can detect is termed \_\_\_\_\_.
  - a) Accuracy
  - b) Precision
  - c) Resolution
  - d) Scale
- 6) What is signal conditioning?
  - a) To analyse any signal
  - b) Conversion or modification is referred to as conditioning
  - c) Conversion from analog to digital is signal conditioning
  - d) Conversion from digital to analog is signal conditioning

Day & Date: Friday, 24-02-2023  
Time: 10:00 AM To 01:00 PM

Max. Marks: 56

**Instructions:** 1) All question are compulsory.  
2) Figures to the right indicates full marks.

**Section – I**

**Q.2 Attempt Any Four** **16**

- 1) Define and explain the sensor with one example.
- 2) Explain the principle of working of Hall effect sensor.
- 3) State and explain the methods of data transmission.
- 4) Explain with neat sketch thermal expansion property of material.
- 5) What is a voltage follower? Give a practical use of a voltage follower.
- 6) Give classification of sensor and explain active and passive sensor.

**Q.3 Attempt Any Two** **12**

- 1) Define the temperature and explain the thermal properties of material.
- 2) State characteristics of sensor and explain the transfer function characteristics.
- 3) Explain the basic concept of analog to digital converter. Also explain the V/F Analog to digital converter.

**Section – II**

**Q.4 Attempt Any Four** **16**

- 1) State the different types of pressure sensor and explain any one of them.
- 2) State the different types of temperature sensor and explain any one of them.
- 3) With neat sketch explain spin casting method of surface processing.
- 4) Explain the wet etching MEMS Technology.
- 5) State and explain the principle of operation of Electrical actuators.
- 6) Write the Selection criteria of Actuators.

**Q.5 Attempt Any Two** **12**

- 1) State the sensors used for Velocity and Acceleration application and explain any one of them.
- 2) State the different types of material used for fabrication of sensor and explain any one of them.
- 3) State and explain the principle of operation of micro and nano actuator with advantages and disadvantages.

**14**

- 1) Potentiometer as a displacement sensor works on the principle of \_\_\_\_\_.  
 a) Mutual Inductance  
 b) Self Inductance  
 c) Variable Resistance Transduction  
 d) Hall Effect
- 2) Proximity sensor is a \_\_\_\_\_ type of position sensor.  
 a) Contact  
 b) Non - contact  
 c) Eddy current  
 d) Resistive
- 3) In wet etching material is removed by \_\_\_\_\_.  
 a) Absorption  
 b) Sublimation  
 c) Chemical reaction  
 d) The force exerted due to flow of solvent
- 4) What is the main principle of electroplating?  
 a) Hydrolysis  
 b) Neutralization  
 c) Esterification  
 d) Saturation
- 5) The force developed in hydraulic systems is high due to \_\_\_\_\_.  
 a) High pressure  
 b) More oil  
 c) Less pressure  
 d) Less oil
- 6) In which type of system does power transmission takes place through compressed air?  
 a) Fluid power system  
 b) Hydraulic system  
 c) Pneumatic system  
 d) stepper motors
- 7) The direction control valve controls \_\_\_\_\_.  
 a) Direction of flow  
 b) Rate of flow  
 c) Moisture  
 d) Force and motion

- 8) Dead zone of an instrument is \_\_\_\_\_.  
a) The largest change of input quantity for which there is no output of the instrument.  
b) The time required by an instrument to begin to respond to a change in measurand.  
c) The unmeasured quantity which exceeds the maximum range of the instrument.  
d) The time required by an instrument to warm up initial.
- 9) The sensors are classified on the basis of \_\_\_\_\_.  
a) Functions  
b) Performance  
c) Output  
d) All of the above
- 10) Which of the following represents the output of Hall Effect transducer?  
a) Hall potential  
b) Emf  
c) Applied voltage  
d) Lorentz Voltage
- 11) Piezoelectric effect is when materials produce electric charges when \_\_\_\_\_.  
a) Voltage is applied  
b) Mechanical Stress is applied  
c) Electric field is applied  
d) Magnetic field is applied
- 12) The smallest change which a sensor can detect is termed \_\_\_\_\_.  
a) Accuracy  
b) Precision  
c) Resolution  
d) Scale
- 13) What is signal conditioning?  
a) To analyse any signal  
b) Conversion or modification is referred to as conditioning  
c) Conversion from analog to digital is signal conditioning  
d) Conversion from digital to analog is signal conditioning
- 14) Dynamic range of ADC is depended on \_\_\_\_\_.  
a) Resolution  
b) Linearity  
c) Accuracy  
d) All of the mentioned

**T.Y. (B.Tech.) (Sem – II) (New) (CBCS) Examination: Oct/Nov - 2022**  
**ELECTRICAL ENGINEERING**  
**Sensors & Applications**

Day & Date: Friday, 24-02-2023  
Time: 10:00 AM To 01:00 PM

Max. Marks: 56

**Instructions:** 1) All question are compulsory.  
2) Figures to the right indicates full marks.

**Section – I**

**Q.2 Attempt Any Four** **16**

- 1) Define and explain the sensor with one example.
- 2) Explain the principle of working of Hall effect sensor.
- 3) State and explain the methods of data transmission.
- 4) Explain with neat sketch thermal expansion property of material.
- 5) What is a voltage follower? Give a practical use of a voltage follower.
- 6) Give classification of sensor and explain active and passive sensor.

**Q.3 Attempt Any Two** **12**

- 1) Define the temperature and explain the thermal properties of material.
- 2) State characteristics of sensor and explain the transfer function characteristics.
- 3) Explain the basic concept of analog to digital converter. Also explain the V/F Analog to digital converter.

**Section – II**

**Q.4 Attempt Any Four** **16**

- 1) State the different types of pressure sensor and explain any one of them.
- 2) State the different types of temperature sensor and explain any one of them.
- 3) With neat sketch explain spin casting method of surface processing.
- 4) Explain the wet etching MEMS Technology.
- 5) State and explain the principle of operation of Electrical actuators.
- 6) Write the Selection criteria of Actuators.

**Q.5 Attempt Any Two** **12**

- 1) State the sensors used for Velocity and Acceleration application and explain any one of them.
- 2) State the different types of material used for fabrication of sensor and explain any one of them.
- 3) State and explain the principle of operation of micro and nano actuator with advantages and disadvantages.

Day & Date: Friday, 24-02-2023  
 Time: 10:00 AM To 01:00 PM

Max. Marks: 70

- Instructions:** 1) Q. No. 1 is compulsory. It should be solved in the first 30 minutes in answer book. Page no 03 (Starting page of the Answer Book). Each question carries one mark.  
 2) Don't forget to Mention question paper set (P/Q/R/S) on top of page.  
 3) Figures to the right indicates full marks.

**MCQ/Objective Type Questions**

Duration: 30 Minutes

Marks: 14

**Q.1 Solve All MCQ Questions.**

**14**

- 1) What is the main principle of electroplating?
  - a) Hydrolysis
  - b) Neutralization
  - c) Esterification
  - d) Saturation
- 2) The force developed in hydraulic systems is high due to \_\_\_\_\_.
  - a) High pressure
  - b) More oil
  - c) Less pressure
  - d) Less oil
- 3) In which type of system does power transmission takes place through compressed air?
  - a) Fluid power system
  - b) Hydraulic system
  - c) Pneumatic system
  - d) stepper motors
- 4) The direction control valve controls \_\_\_\_\_.
  - a) Direction of flow
  - b) Rate of flow
  - c) Moisture
  - d) Force and motion
- 5) Dead zone of an instrument is \_\_\_\_\_.
  - a) The largest change of input quantity for which there is no output of the instrument.
  - b) The time required by an instrument to begin to respond to a change in measurand.
  - c) The unmeasured quantity which exceeds the maximum range of the instrument.
  - d) The time required by an instrument to warm up initial.
- 6) The sensors are classified on the basis of \_\_\_\_\_.
  - a) Functions
  - b) Performance
  - c) Output
  - d) All of the above
- 7) Which of the following represents the output of Hall Effect transducer?
  - a) Hall potential
  - b) Emf
  - c) Applied voltage
  - d) Lorentz Voltage

- 8) Piezoelectric effect is when materials produce electric charges when \_\_\_\_\_.  
a) Voltage is applied                      b) Mechanical Stress is applied  
c) Electric field is applied                d) Magnetic field is applied
- 9) The smallest change which a sensor can detect is termed \_\_\_\_\_.  
a) Accuracy                                    b) Precision  
c) Resolution                                  d) Scale
- 10) What is signal conditioning?  
a) To analyse any signal  
b) Conversion or modification is referred to as conditioning  
c) Conversion from analog to digital is signal conditioning  
d) Conversion from digital to analog is signal conditioning
- 11) Dynamic range of ADC is depended on \_\_\_\_\_.  
a) Resolution                                  b) Linearity  
c) Accuracy                                    d) All of the mentioned
- 12) Potentiometer as a displacement sensor works on the principle of \_\_\_\_\_.  
a) Mutual Inductance  
b) Self Inductance  
c) Variable Resistance Transduction  
d) Hall Effect
- 13) Proximity sensor is a \_\_\_\_\_ type of position sensor.  
a) Contact                                        b) Non - contact  
c) Eddy current                                d) Resistive
- 14) In wet etching material is removed by \_\_\_\_\_.  
a) Absorption                                  b) Sublimation  
c) Chemical reaction                        d) The force exerted due to flow of solvent

 2) Don't forget to Mention question paper set (P/Q/R/S) on top of page.  
 3) Figures to the right indicate full marks.

**MCQ/Objective Type Questions**

Duration: 20 Minutes

Marks: 10

**Q.1 Choose the correct alternatives from the options.**

**10**

- 1) Which of the following is not an advantage of BLDC motor over conventional DC motor?
 

|                         |              |
|-------------------------|--------------|
| a) Less maintenance     | b) Long life |
| c) No risk of explosion | d) Low cost  |
- 2) In BLDC motor driver module, we do not require \_\_\_\_\_.
 

|         |                      |
|---------|----------------------|
| a) SCRs | b) Power transistors |
| c) FETs | d) Transistors       |
- 3) Construction of BLDC is exactly similar to the \_\_\_\_\_.
 

|                                       |
|---------------------------------------|
| a) Conventional DC motor              |
| b) Induction motor                    |
| c) Permanent magnet synchronous motor |
| d) Totally different construction     |
- 4) Typical brush less motor doesn't have \_\_\_\_\_.
 

|                          |                     |
|--------------------------|---------------------|
| a) Commutator            | b) Permanent magnet |
| c) Electronic controller | d) Fixed armature   |
- 5) BLDC can be used instead \_\_\_\_\_.
 

|                      |                            |
|----------------------|----------------------------|
| a) Synchronous motor | b) Normal brushed DC motor |
| c) Induction motor   | d) Air motor               |
- 6) In a three-stack 12/8-pole VR motor, the rotor pole pitch is \_\_\_\_\_.
 

|        |        |
|--------|--------|
| a) 15° | b) 30° |
| c) 45° | d) 60° |
- 7) For a reluctance motor, the maximum average torque occurs when  $\delta =$  \_\_\_\_
 

|        |         |
|--------|---------|
| a) 45° | b) 90°  |
| c) 0°  | d) 180° |
- 8) If a hybrid stepper motor has a rotor pitch of 36° and a step angle of 9°, the number of its phases must be \_\_\_\_\_.
 

|      |      |
|------|------|
| a) 4 | b) 2 |
| c) 3 | d) 6 |

- 9)** Reluctance motor can produce torque at \_\_\_\_\_
- a) any speed less than synchronous speed
  - b) synchronous speed only
  - c) any speed greater than synchronous speed
  - d) any of the mentioned
- 10)** A stepper motor may be considered as a \_\_\_\_\_ converter.
- a) Dc to dc
  - b) Ac to ac
  - c) Dc to ac
  - d) Digital-to-analogue

**Special Purpose Machines**

Day & Date: Monday, 27-02-2023  
Time: 10:00 AM To 12:00 PM

Max. Marks: 40

**Instructions:** 1) Attempt any FOUR questions from Q.No.2.  
2) Figures to the right indicate full marks.

**Q.2 Attempt any Four.**

**40**

- a) Explain with phasor diagram torque speed characteristics of synchronous reluctance motor.
- b) Explain with neat sketch Constructional feature, Principle of operation permanent magnet DC Motor.
- c) Explain with neat sketch operation of single stack variable reluctance stepper motor.
- d) Derive voltage and torque equation of switched reluctance motor.
- e) Explain with neat sketch static and dynamic characteristics of stepper motor.
- f) Explain with neat sketch construction and operating principle of synchronous reluctance motor.

Day & Date: Monday, 27-02-2023  
 Time: 10:00 AM To 12:00 PM

Max. Marks: 50

- Instructions:** 1) Q. No.1 is compulsory. It should be solved in the first 20 minutes in answer book. Page no 03 (Starting page of the Answer Book). Each question carries one mark.  
 2) Don't forget to Mention question paper set (P/Q/R/S) on top of page.  
 3) Figures to the right indicates full marks.

**MCQ/Objective Type Questions**

Duration: 20 Minutes

Marks: 10

**Q.1 Choose the correct alternatives from the options.**

**10**

- 1) If electric wires and appliances are overheated due to high voltage of electric current, they can
 

|               |                 |
|---------------|-----------------|
| a) catch fire | b) burn         |
| c) freeze     | d) both a and b |
- 2) Do not use appliances, if
 

|                     |                  |
|---------------------|------------------|
| a) damaged          | b) wires exposed |
| c) working properly | d) both a and b  |
- 3) A short thin piece of wire which is heated up and melt by the flowing of electric current in it, is called
 

|            |             |
|------------|-------------|
| a) circuit | b) fuse     |
| c) cell    | d) resistor |
- 4) Electricity flows through any
 

|              |                    |
|--------------|--------------------|
| a) material  | b) insulator       |
| c) conductor | d) state of matter |
- 5) Safety Electrical One Line Diagram should be used to \_\_\_\_\_ all sources of electrical energy.
 

|             |              |
|-------------|--------------|
| a) Identify | b) Castigate |
| c) Evaluate | d) Modify    |
- 6) Work performed on an electrical system within reaching distance of energized components is \_\_\_\_\_ work.
 

|              |                |
|--------------|----------------|
| a) Energized | b) Essential   |
| c) Safe      | d) Unavoidable |
- 7) The secondary of a current transformer must never be \_\_\_\_\_ while energized.
 

|             |              |
|-------------|--------------|
| a) Grounded | b) Opened    |
| c) Examined | d) Shortened |
- 8) One of the three generally recognized hazards of electrical work is \_\_\_\_\_
 

|          |               |
|----------|---------------|
| a) Arc   | b) Cuts       |

**MCQ/Objective Type Questions**

Duration: 20 Minutes

Marks: 10

**Q.1 Choose the correct alternatives from the options.**

**10**

- 1) Which of the following is a main disadvantage of a solar PV system?
 

|                     |                    |
|---------------------|--------------------|
| a) Capital cost     | b) Operation cost  |
| c) Maintenance cost | d) Life cycle cost |
- 2) In India PV panel should be \_\_\_\_\_.
 

|                 |                          |
|-----------------|--------------------------|
| a) North Facing | b) North and East facing |
| c) East facing  | d) South facing          |
- 3) Which is not a part of Site feasibility study?
 

|                 |                               |
|-----------------|-------------------------------|
| a) Soil quality | b) Population of nearest city |
| c) Wind speed   | d) Location                   |
- 4) In a residential roof-top PV system, which is not taken in to the consideration?
 

|                              |                              |
|------------------------------|------------------------------|
| a) Nearest transmission grid | b) Load & load flow analysis |
| c) Roof area                 | d) Back up Hours             |
- 5) In Solar PV system, what does PR stands for \_\_\_\_\_.
 

|                      |                       |
|----------------------|-----------------------|
| a) Project Report    | b) Project Review     |
| c) Performance ratio | d) Performance review |
- 6) Efficiency of practically used solar cell is approximately \_\_\_\_\_.
 

|        |        |
|--------|--------|
| a) 25% | b) 15% |
| c) 40% | d) 20% |
- 7) Battery bank should not be installed in a location?
 

|                      |                             |
|----------------------|-----------------------------|
| a) Near PV array     | b) Well ventilated room     |
| c) Near control room | d) At high temperature area |
- 8) If the orientation of PV module changes from horizontal to vertical, Tilt angle will?
 

|            |                |
|------------|----------------|
| a) Change  | b) Remain same |
| c) Depends | d) Can't say   |

- 9)** Which is the key of efficiency in PV plant?
- a) Well design
  - b) Proper Cleaning & maintenance
  - c) Procurement
  - d) All of the above
- 10)** MPPT Stands for?
- a) Maximum Power Point Temperature
  - b) Maximum Power Produce Temperature
  - c) Maximum Power Point Tracker

**T.Y (B.Tech.) (Sem-II) (New) (CBCS) Examination: Oct/Nov-2022****ELECTRICAL ENGINEERING****Solar Photovoltaic System Design & Installation**

Day &amp; Date: Monday, 27-02-2023

Max. Marks: 40

Time: 10:00 AM To 12:00 PM

**Instructions:** 1) Solve any Four questions from Q.No.2 to Q.No.6.  
2) Figures to the right indicates full marks.

- Q.2 Answer the following questions. 10**  
a) Explain the basic concept of Solar Energy.  
b) Write advantages of Renewable Energy.
- Q.3 Answer the following questions. 10**  
a) Explain PV module name plate specifications.  
b) Explain factors affecting output of PV module.
- Q.4 Answer the following questions. 10**  
a) Explain stand alone, Grid & Hybrid configurations of PV power system.  
b) Explain different components of PV system.
- Q.5 Answer the following questions. 10**  
a) Explain installation process of solar power plant.  
b) Explain inverter, its types and operation in solar PV system.
- Q.6 Answer the following questions. 10**  
a) Explain steps involved in PV system sizing.  
b) Explain different types of batteries used in solar PV system.

# Solar Photovoltaic System Design & Installation

Max. Marks: 50

**Instructions:** 1) Q. No. 1 is compulsory. It should be solved in the first 20 minutes in answer book. Page no 03 (Starting page of the Answer Book). Each question carries one mark.  
2) Don't forget to Mention question paper set (P/Q/R/S) on top of page.  
3) Figures to the right indicates full marks.

Marks: 10

10

- 1) Efficiency of practically used solar cell is approximately \_\_\_\_\_.  
a) 25%                                      b) 15%  
c) 40%                                      d) 20%
- 2) Battery bank should not be installed in a location?  
a) Near PV array                          b) Well ventilated room  
c) Near control room                    d) At high temperature area
- 3) If the orientation of PV module changes from horizontal to vertical, Tilt angle will?  
a) Change                                      b) Remain same  
c) Depends                                    d) Can't say
- 4) Which is the key of efficiency in PV plant?  
a) Well design  
b) Proper Cleaning & maintenance  
c) Procurement  
d) All of the above
- 5) MPPT Stands for?  
a) Maximum Power Point Temperature  
b) Maximum Power Produce Temperature  
c) Maximum Power Point Tracker  
d) Minimum Power Produce Temperature
- 6) Which of the following is a main disadvantage of a solar PV system?  
a) Capital cost                                b) Operation cost  
c) Maintenance cost                        d) Life cycle cost
- 7) In India PV panel should be \_\_\_\_\_.  
a) North Facing                                b) North and East facing  
c) East facing                                    d) South facing
- 8) Which is not a part of Site feasibility study?  
a) Soil quality                                    b) Population of nearest city  
c) Wind speed                                    d) Location

- 9)** In a residential roof-top PV system, which is not taken in to the consideration?
- |                              |                              |
|------------------------------|------------------------------|
| a) Nearest transmission grid | b) Load & load flow analysis |
| c) Roof area                 | d) Back up Hours             |
- 10)** In Solar PV system, what does PR stands for \_\_\_\_\_.
- |                      |                       |
|----------------------|-----------------------|

2) Don't forget to mention the question paper Set (P/Q/R/S) at the top of the Same page.  
3) Assume suitable data if necessary.

**MCQ/Objective Type Questions**

Duration: 30 Minutes

Marks: 14

**Q.1 Choose the correct alternatives from the given options.**

**14**

- 1) A synchronous motor is a useful industrial machine due to its property of
  - a) Improving the power factor
  - b) Speed is constant
  - c) Can always be adjusted to operate at unity power factor
  - d) All of the above
- 2) When load on a synchronous motor is increased, its armature currents in increased provided it
  - a) Normally-Excited
  - b) Over-Excited
  - c) Under-Excited
  - d) All of the above
- 3) A synchronous motor can be started by
  - a) Pony Motor
  - b) D.C. compound winding
  - c) Providing damper winding
  - d) None of the above
- 4) The motor normally used for crane travel is
  - a) AC slip ring motor
  - b) Ward Leonard controlled DC shunt motor
  - c) Synchronous motor
  - d) DC differentially compound motor
- 5) The maximum horse power up to which 440 V electric motors are used, is
  - a) 200 HP
  - b) 50 HP
  - c) 20 HP
  - d) 10 HP.
- 6) Pole changing method of speed control is used in
  - a) Slip ring induction motor
  - b) DC shunt motor
  - c) DC series motor
  - d) Squirrel cage induction motor

- 7) Rotor resistance speed control is used in  
a) Squirrel cage induction motor  
b) Synchronous motor  
c) Slip ring induction motor  
d) DC shunt motor
- 8) Which electromagnet is preferred for noiseless operation?  
a) DC operated  
b) AC Operated  
c) Any of the above  
d) None of the above
- 9) For high frequency choppers the device that is preferred is  
a) Thyristor  
b) TRIAC  
c) Transistor  
d) GTO
- 10) Ward-Leonard controlled dc drives are generally used for  
a) Light duty excavators  
b) Medium duty excavators  
c) Heavy duty Excavators  
d) All of the above
- 11) The equilibrium speed of a motor load system is obtained  
a) When motor torque equals the load torque  
b) When motor torque is less than the load torque  
c) When motor torque is more than the load torque  
d) None of these
- 12) In a constant power type load  
a) Torque is proportional to speed  
b) Torque is proportional to square of speed  
c) Torque is inversely proportional to speed  
d) Torque is independent to speed.
- 13) According to fan laws  
a)  $V_1 / V_2 = (d_1 / d_2) (RPM_1 / RPM_2)$   
b)  $V_1 / V_2 = (d_1 / d_2)^2 (RPM_1 / RPM_2)$   
c)  $V_1 / V_2 = (d_1 / d_2)^3 (RPM_1 / RPM_2)$   
d) None of these
- 14) \_\_\_\_\_ duty cycle consists of frequent on load and off-load period.  
a) Continuous Duty with constant Load  
b) Continuous Duty With the variable load  
c) Short Time duty  
d) Intermittent duty

**Fourth Year (B.Tech) (Sem - I) (New) (CBCS) Examination: Oct/Nov-2022**  
**ELECTRICAL ENGINEERING**  
**Industrial Drives Control**

Day & Date: Wednesday, 25-01-2023  
Time: 02:00 PM To 05:00 PM

Max. Marks: 56

- Instructions:** 1) All questions are compulsory.  
2) Figure to right indicate full marks.  
3) Assume suitable data if necessary.

**Section – I**

**Q.2 Solve any four of the following.** **16**

- a) Draw the block diagram of electrical drive system and explain.
- b) Explain the closed loop control of electrical drives.
- c) Explain the multi quadrant operation with neat diagram.
- d) Draw and explain single phase half controlled rectifier fed separately excited D.C. motor.
- e) Write the classification of drives with examples.

**Q.3 Solve the following.** **12**

- a) Explain the chopper control DC separately excited motor in motoring and regenerative braking modes.

**OR**

- a) For D.C series motor and shunt motor draw & explain
  - i) Speed load characteristics
  - ii) Speed torque characteristics
- c) Explain Regenerative braking of DC series motor

**Section - II**

**Q.4 Solve any four of the following.** **16**

- a) Explain the operation of slip ring IM by static rotor resistance control.
- b) Explain Stepper motor drives operation & converter circuit.
- c) Explain the converter circuit for battery operated drives.
- d) Explain the converter circuit for switched reluctance motor drives.
- e) Discuss the speed control of AC motors by using three phase AC Voltage regulators.

**Q.5 Solve any two of the following.** **12**

- a) Explain the static Kramer method and static schrebius method of speed control of three phase induction motor.
- b) What are the different types of stepper motors are there? Explain their operation.
- c) Explain the V/f control method of AC drive with neat sketches.

**Fourth Year (B.Tech) (Sem - I) (New) (CBCS) Examination: Oct/Nov-2022**  
**ELECTRICAL ENGINEERING**  
**Industrial Drives Control**

Day & Date: Wednesday, 25-01-2023  
 Time: 02:00 PM To 05:00 PM

Max. Marks: 70

- Instructions:** 1) Q. No. 1 is compulsory it should be solved in first 30 minutes in answer Book. Page No.3 (starting page of the Answer Book) Each question carries one mark.  
 2) Don't forget to mention the question paper Set (P/Q/R/S) at the top of the Same page.  
 3) Assume suitable data if necessary.

**MCQ/Objective Type Questions**

Duration: 30 Minutes

Marks: 14

**Q.1 Choose the correct alternatives from the given options.**

**14**

- 1) The equilibrium speed of a motor load system is obtained
  - a) When motor torque equals the load torque
  - b) When motor torque is less than the load torque
  - c) When motor torque is more than the load torque
  - d) None of these
- 2) In a constant power type load
  - a) Torque is proportional to speed
  - b) Torque is proportional to square of speed
  - c) Torque is inversely proportional to speed
  - d) Torque is independent to speed.
- 3) According to fan laws
  - a)  $V_1 / V_2 = (d_1 / d_2) (RPM_1 / RPM_2)$
  - b)  $V_1 / V_2 = (d_1 / d_2)^2 (RPM_1 / RPM_2)$
  - c)  $V_1 / V_2 = (d_1 / d_2)^3 (RPM_1 / RPM_2)$
  - d) None of these
- 4) \_\_\_\_\_ duty cycle consists of frequent on load and off-load period.
  - a) Continuous Duty with constant Load
  - b) Continuous Duty With the variable load
  - c) Short Time duty
  - d) Intermittent duty
- 5) A synchronous motor is a useful industrial machine due to its property of
  - a) Improving the power factor
  - b) Speed is constant
  - c) Can always be adjusted to operate at unity power factor
  - d) All of the above

- 6) When load on a synchronous motor is increased, its armature currents in increased provided it
- a) Normally-Excited
  - b) Over-Excited
  - c) Under-Excited
  - d) All of the above
- 7) A synchronous motor can be started by
- a) Pony Motor
  - b) D.C. compound winding
  - c) Providing damper winding
  - d) None of the above
- 8) The motor normally used for crane travel is
- a) AC slip ring motor
  - b) Ward Leonard controlled DC shunt motor
  - c) Synchronous motor
  - d) DC differentially compound motor
- 9) The maximum horse power up to which 440 V electric motors are used, is
- a) 200 HP
  - b) 50 HP
  - c) 20 HP
  - d) 10 HP.
- 10) Pole changing method of speed control is used in
- a) Slip ring induction motor
  - b) DC shunt motor
  - c) DC series motor
  - d) Squirrel cage induction motor
- 11) Rotor resistance speed control is used in
- a) Squirrel cage induction motor
  - b) Synchronous motor
  - c) Slip ring induction motor
  - d) DC shunt motor
- 12) Which electromagnet is preferred for noiseless operation?
- a) DC operated
  - b) AC Operated
  - c) Any of the above
  - d) None of the above
- 13) For high frequency choppers the device that is preferred is
- a) Thyristor
  - b) TRIAC
  - c) Transistor
  - d) GTO
- 14) Ward-Leonard controlled dc drives are generally used for
- a) Light duty excavators
  - b) Medium duty excavators
  - c) Heavy duty Excavators
  - d) All of the above

**Set R**

**Fourth Year (B.Tech) (Sem - I) (New) (CBCS) Examination: Oct/Nov-2022**  
**ELECTRICAL ENGINEERING**  
**Industrial Drives Control**

Day & Date: Wednesday, 25-01-2023  
Time: 02:00 PM To 05:00 PM

Max. Marks: 56

- Instructions:** 1) All questions are compulsory.  
2) Figure to right indicate full marks.  
3) Assume suitable data if necessary.

**Section – I**

**Q.2 Solve any four of the following.** **16**

- a) Draw the block diagram of electrical drive system and explain.
- b) Explain the closed loop control of electrical drives.
- c) Explain the multi quadrant operation with neat diagram.
- d) Draw and explain single phase half controlled rectifier fed separately excited D.C. motor.
- e) Write the classification of drives with examples.

**Q.3 Solve the following.** **12**

- a) Explain the chopper control DC separately excited motor in motoring and regenerative braking modes.

**OR**

- a) For D.C series motor and shunt motor draw & explain
  - i) Speed load characteristics
  - ii) Speed torque characteristics
- c) Explain Regenerative braking of DC series motor

**Section - II**

**Q.4 Solve any four of the following.** **16**

- a) Explain the operation of slip ring IM by static rotor resistance control.
- b) Explain Stepper motor drives operation & converter circuit.
- c) Explain the converter circuit for battery operated drives.
- d) Explain the converter circuit for switched reluctance motor drives.
- e) Discuss the speed control of AC motors by using three phase AC Voltage regulators.

**Q.5 Solve any two of the following.** **12**

- a) Explain the static Kramer method and static schrebius method of speed control of three phase induction motor.
- b) What are the different types of stepper motors are there? Explain their operation.
- c) Explain the V/f control method of AC drive with neat sketches.

 2) Don't forget to mention Question Paper Set (P/Q/R/S) at the top of the same page.

**MCQ/Objective Type Questions**

Duration: 30 Minutes

Marks: 14

**Q.1 Multiple choice questions.**

**14**

- 1) Economic dispatch problem \_\_\_\_\_.  
 a) To minimize the operating cost  
 b) To minimize fuel cost only  
 c) To minimize the load demand  
 d) To minimize the cost of transportation
- 2) Heat rate is defined as \_\_\_\_\_.  
 a) Ratio of fuel input to the corresponding power output  
 b) Ratio of fuel output to the corresponding power output  
 c) Ratio of heat input to the corresponding power output  
 d) Ratio of heat output to the corresponding power input
- 3) What will be the penalty factor for a unit, if the generating station is located very close to load Centre?  
 a) Zero  
 b) Almost equal to unity  
 c) The penalty factor is negative  
 d) The value is very high
- 4) What is the unit of transmission loss coefficient?  
 a) MW  
 b)  $(MW)^{-1}$   
 c) Unit less  
 d)  $(MW)^2$
- 5) The units for heat rate are \_\_\_\_\_.  
 a) Kcal/KWh  
 b) KWh/kcal  
 c) Kcal/hour  
 d) KW
- 6) In dynamic programming method the cost function  $F_N(y)$  represents  
 a) Cost of generation of N MW by y number of unit  
 b) Cost of generation of y MW by N number of unit  
 c) Cost of generation of y MW by  $N^{th}$  unit  
 d) Cost of generation of N MW by  $y^{th}$  unit
- 7) The one of unit commitment solution method \_\_\_\_\_.  
 a) Priority list method  
 b) Dynamic programming method  
 c) Lagrange relaxation method  
 d) All of these

- 8) To commit the generating unit is \_\_\_\_\_.  
a) To bring it up to the speed  
b) To synchronize to the system  
c) To connect it so that it can deliver the power to the network  
d) All of these
- 9) The frequency controlled from both side is known as \_\_\_\_\_.  
a) Parallel frequency control  
b) Flat frequency control  
c) Selective frequency control  
d) flat tie line control
- 10) What is the condition for uncontrolled case in two area system?  
a)  $\Delta P_{c1} = 0$   
b)  $\Delta P_{c2} = 0$   
c)  $\Delta P_{c1} = \Delta P_{c2} = 0$   
d) None
- 11) Load frequency control uses \_\_\_\_\_.  
a) Proportional integral controller  
b) Proportional derivative control  
c) Both proportional derivative & Integral controller  
d) Either proportional or integral
- 12) The unit of speed regulation of governor is \_\_\_\_\_.  
a) Hz  
b) Hz/MVA  
c) Hz/MW  
d) None
- 13) Energy Management System contains \_\_\_\_\_.  
a) Secure  
b) Correctable Emergency  
c) Restoration  
d) All of the above
- 14) Security assessment involves \_\_\_\_\_.  
a) System monitoring  
b) Contingency analysis  
c) Both of above  
d) Not divided

Set **P**

**Fourth Year (B.Tech) (Sem-I) (New) (CBCS) Examination: Oct/Nov - 2022**  
**ELECTRICAL ENGINEERING**  
**Power System and Operation Control**

Day & Date: Tuesday, 31-01-2023  
 Time: 02:00 PM To 05:00 PM

Max. Marks: 56

**Instructions:** 1) All questions are compulsory.  
 2) Figures to the right indicate full marks.

**Section – I**

**Q.2 Solve any four** **16**

- a) Explain the following
  - i) Incremental fuel cost
  - ii) Incremental production cost
- b) Explain with mathematical formulation the economic load dispatch including transmission losses and penalty factor.
- c) What is mean by unit commitment? Explain the necessity of it.
- d) Write a short note on spinning reserve.
- e) Explain the thermal unit constraint.

**Q.3 Solve any Two** **12**

- a) What are the different methods of unit commitment? Explain the priority list method for unit commitment with suitable example.
- b) Explain the load frequency control of single area system with neat diagram.
- c) The fuel cost of two units are given by

$$C_1 = 0.1 P_{G_1}^2 + 25 P_{G_1} + 1.6 \text{ Rs/hr}$$

$$C_2 = 0.1 P_{G_2}^2 + 32 P_{G_2} + 2.1 \text{ Rs/hr}$$

If the total demand on the generators is 250 MW, find the economical load distribution of the two units

**Section – II**

**Q.4 Solve any four** **16**

- a) Explain the different methods of improving voltage stability.
- b) What is mean by load compensation? Explain briefly.
- c) Explain system state classification with neat diagram.
- d) Give the difference between voltage angle and voltage stability.
- e) Explain specifications of Load compensator.

**Q.5 Solve any Two** **12**

- a) Explain compensation of reactive power in power system in detail.
- b) Give the advantages and dis-advantages of different types of compensating equipment for the transmission system.
- c) Explain the necessity of power system security.

c) Lagrange relaxation method  
d) All of these
- 12) To commit the generating unit is \_\_\_\_\_.  
a) To bring it up to the speed  
b) To synchronize to the system  
c) To connect it so that it can deliver the power to the network  
d) All of these
- 13) The frequency controlled from both side is known as \_\_\_\_\_.  
a) Parallel frequency control  
b) Flat frequency control  
c) Selective frequency control  
d) flat tie line control
- 14) What is the condition for uncontrolled case in two area system?  
a)  $\Delta P_{c1} = 0$   
b)  $\Delta P_{c2} = 0$   
c)  $\Delta P_{c1} = \Delta P_{c2} = 0$   
d) None

Set **R**

**Fourth Year (B.Tech) (Sem-I) (New) (CBCS) Examination: Oct/Nov - 2022**  
**ELECTRICAL ENGINEERING**

**Power System and Operation Control**

Day &amp; Date: Tuesday, 31-01-2023

Max. Marks: 56

Time: 02:00 PM To 05:00 PM

**Instructions:** 1) All questions are compulsory.  
 2) Figures to the right indicate full marks.

**Section – I**

**Q.2 Solve any four** **16**

- a) Explain the following
  - i) Incremental fuel cost
  - ii) Incremental production cost
- b) Explain with mathematical formulation the economic load dispatch including transmission losses and penalty factor.
- c) What is mean by unit commitment? Explain the necessity of it.
- d) Write a short note on spinning reserve.
- e) Explain the thermal unit constraint.

**Q.3 Solve any Two** **12**

- a) What are the different methods of unit commitment? Explain the priority list method for unit commitment with suitable example.
- b) Explain the load frequency control of single area system with neat diagram.
- c) The fuel cost of two units are given by

$$C_1 = 0.1 P_{G_1}^2 + 25 P_{G_1} + 1.6 \text{ Rs/hr}$$

$$C_2 = 0.1 P_{G_2}^2 + 32 P_{G_2} + 2.1 \text{ Rs/hr}$$

If the total demand on the generators is 250 MW, find the economical load distribution of the two units

**Section – II**

**Q.4 Solve any four** **16**

- a) Explain the different methods of improving voltage stability.
- b) What is mean by load compensation? Explain briefly.
- c) Explain system state classification with neat diagram.
- d) Give the difference between voltage angle and voltage stability.
- e) Explain specifications of Load compensator.

**Q.5 Solve any Two** **12**

- a) Explain compensation of reactive power in power system in detail.
- b) Give the advantages and dis-advantages of different types of compensating equipment for the transmission system.
- c) Explain the necessity of power system security.

**Power System and Operation Control**

Day & Date: Tuesday, 31-01-2023  
 Time: 02:00 PM To 05:00 PM

Max. Marks: 70

- Instructions:** 1) Q. No. 1 is compulsory and should be solved in first 30 minutes in Answer Book. Page No.3 (starting page of the Answer Book). Each question carry one mark.  
 2) Don't forget to mention Question Paper Set (P/Q/R/S) at the top of the same page.

**MCQ/Objective Type Questions**

Duration: 30 Minutes

Marks: 14

**Q.1 Multiple choice questions.**

**14**

- 1) In dynamic programming method the cost function  $F_N(y)$  represents
  - a) Cost of generation of N MW by y number of unit
  - b) Cost of generation of y MW by N number of unit
  - c) Cost of generation of y MW by  $N^{\text{th}}$  unit
  - d) Cost of generation of N MW by  $y^{\text{th}}$  unit
- 2) The one of unit commitment solution method \_\_\_\_\_.
  - a) Priority list method
  - b) Dynamic programming method
  - c) Lagrange relaxation method
  - d) All of these
- 3) To commit the generating unit is \_\_\_\_\_.
  - a) To bring it up to the speed
  - b) To synchronize to the system
  - c) To connect it so that it can deliver the power to the network
  - d) All of these
- 4) The frequency controlled from both side is known as \_\_\_\_\_.
  - a) Parallel frequency control
  - b) Flat frequency control
  - c) Selective frequency control
  - d) flat tie line control
- 5) What is the condition for uncontrolled case in two area system?
  - a)  $\Delta P_{c1} = 0$
  - b)  $\Delta P_{c2} = 0$
  - c)  $\Delta P_{c1} = \Delta P_{c2} = 0$
  - d) None
- 6) Load frequency control uses \_\_\_\_\_.
  - a) Proportional integral controller
  - b) Proportional derivative control
  - c) Both proportional derivative & Integral controller
  - d) Either proportional or integral
- 7) The unit of speed regulation of governor is \_\_\_\_\_.
  - a) Hz
  - b) Hz/MVA
  - c) Hz/MW
  - d) None

- 8) Energy Management System contains \_\_\_\_\_.  
a) Secure  
b) Correctable Emergency  
c) Restoration  
d) All of the above
- 9) Security assessment involves \_\_\_\_\_.  
a) System monitoring  
b) Contingency analysis  
c) Both of above  
d) Not divided
- 10) Economic dispatch problem \_\_\_\_\_.  
a) To minimize the operating cost  
b) To minimize fuel cost only  
c) To minimize the load demand  
d) To minimize the cost of transportation
- 11) Heat rate is defined as \_\_\_\_\_.  
a) Ratio of fuel input to the corresponding power output  
b) Ratio of fuel output to the corresponding power output  
c) Ratio of heat input to the corresponding power output  
d) Ratio of heat output to the corresponding power input
- 12) What will be the penalty factor for a unit, if the generating station is located very close to load Centre?  
a) Zero  
b) Almost equal to unity  
c) The penalty factor is negative  
d) The value is very high
- 13) What is the unit of transmission loss coefficient?  
a) MW  
b)  $(MW)^{-1}$   
c) Unit less  
d)  $(MW)^2$
- 14) The units for heat rate are \_\_\_\_\_.  
a) Kcal/KWh  
b) KWh/kcal  
c) Kcal/hour  
d) KW

 3) Figures to the right indicates full marks.

**MCQ/Objective Type Questions**

Duration: 30 Minutes

Marks: 14

**Q.1 Choose the correct alternatives from the options. 14**

- 1) Which Process is responsible for production of energy in the sun?
  - a) Nuclear fission reaction
  - b) Nuclear fusion reaction
  - c) Exothermal chemical reaction
  - d) All of the above
- 2) The charge carrier available in a semi-conductor material has \_\_\_\_\_.
  - a) Free electrons & holes
  - b) Only electrons
  - c) Only holes
  - d) Positively charged ions
- 3) The concentration-type solar collector \_\_\_\_\_.
  - a) First absorbs the radiation and then increases its concentration
  - b) Increases the density of solar radiation before absorbing it
  - c) Dilutes the density of solar radiation before absorbing it
  - d) Increases the intensity of solar radiation and then reflects it back
- 4) What does FPC stand for in solar energy?
  - a) Fluid plate circuit
  - b) Fixed plate collectors
  - c) Flat plate collectors
  - d) None of the above
- 5) Which of the following methods can be called passive solar energy collection?
  - a) Using heat absorbing construction materials
  - b) Rooftop solar panels
  - c) Photovoltaic cells
  - d) Rooftop flat plate solar collectors
- 6) Solar represents a minuscule portion of U.S. energy production because of \_\_\_\_\_.
  - a) Technological limitations
  - b) Lack of investment
  - c) Lack of scientific interest
  - d) Poor outlook for potential for this energy source
- 7) The wind speed is measured using an instrument called
  - a) Pyranometer
  - b) Manometer
  - c) Anemometer
  - d) Wind vane

- 8) Turbines blades have \_\_\_\_\_ type cross-section to extract energy from wind.
- |                |                     |
|----------------|---------------------|
| a) Aero foil   | b) Elliptical       |
| c) Rectangular | d) All of the above |

**Set P**

**Fourth Year (B. Tech) (Sem -I) (New) (CBCS) Examination: Oct/Nov-2022**  
**ELECTRICAL ENGINEERING**  
**Renewable Energy Sources**

Day & Date: Friday, 17-02-2023  
Time: 02:00 PM To 05:00 PM

Max. Marks: 56

**Instructions:** 1) Both Section are compulsory.  
2) Figures to the right indicates full marks.

**Section – I**

**Q.2 Solve any four.** **16**

- a) Write short note on role and potential of new and renewable sources.
- b) Write a note on solar radiation data.
- c) What are the advantages and disadvantages of flat plate collector?
- d) Draw and Explain Advanced Solar Collector.
- e) Write short note on solar distillation system.
- f) Write a note on sensible heat storage & Latent heat storage.

**Q.3 Solve any two** **12**

- a) Define the terms:
  - 1) Tip speed ratio
  - 2) Swept area
  - 3) Solidity
  - 4) Cut-in speed
  - 5) Cut- out speed
  - 6) Rated speed
- b) Draw the neat diagrams of Savonious and Darrieus Wind Mills and explain their working.
- c) Describe solar Photovoltaic Technology with diagram.

**Section – II**

**Q.4 Solve any four** **16**

- a) What are the different sources of Biomass?
- b) With the help of block diagram explain utilization of biogas for cooking.
- c) Write short note on potential of geothermal resources in India.
- d) Write short note on Types of Geothermal wells.
- e) Explain the need for DEC.
- f) Explain tidal and wave energy.

**Q.5 Solve any two** **12**

- a) Draw and describe the working of Hybrid cycle OTEC system.
- b) Explain Carnot cycle and What are the limitations of DEC.
- c) Explain Tidal Energy Conversion System with proper diagram.

 Time: 02:00 PM To 05:00 PM

Max. Marks: 70

- Instructions:** 1) Q. No. 1 is compulsory and should be solved in first 30 minutes in Answer Book. Page No.3 (starting page of the Answer Book). Each questions carry one mark.  
 2) Don't forget to mention Question Paper Set (P/Q/R/S) at the top of the same page.  
 3) Figures to the right indicates full marks.

**MCQ/Objective Type Questions**

Duration: 30 Minutes

Marks: 14

**Q.1 Choose the correct alternatives from the options. 14**

- 1) Solar represents a minuscule portion of U.S. energy production because of \_\_\_\_\_.  
 a) Technological limitations  
 b) Lack of investment  
 c) Lack of scientific interest  
 d) Poor outlook for potential for this energy source
- 2) The wind speed is measured using an instrument called  
 a) Pyranometer  
 b) Manometer  
 c) Anemometer  
 d) Wind vane
- 3) Turbines blades have \_\_\_\_\_ type cross-section to extract energy from wind.  
 a) Aero foil  
 b) Elliptical  
 c) Rectangular  
 d) All of the above
- 4) \_\_\_\_\_ is called as the bio gas.  
 a) Bio ethanol  
 b) Bio methane  
 c) Bio diesel  
 d) Bio butanol
- 5) The production of bio ethanol is by fermenting the \_\_\_\_\_ and starch components.  
 a) Acid  
 b) Milk  
 c) Sugar  
 d) Alcohol
- 6) The geothermal energy is the \_\_\_\_\_ from the earth.  
 a) Heat  
 b) Light  
 c) Photons  
 d) Protons
- 7) Flash geothermal power plants turns the high-pressure hot water into \_\_\_\_\_.  
 a) Low pressure hot water  
 b) Low pressure cool water  
 c) High pressure hot water  
 d) High pressure cool water

- 8) OTEC stands for \_\_\_\_\_.  
a) Ocean Thermal Energy Conversion  
b) Ocean Thermal Energy Component  
c) Ocean Thermodynamic Energy Conversion  
d) Ocean Thermodynamic Energy Component
- 9) The use of propeller turbine is desirable for the conditions of \_\_\_\_\_.  
a) Low head and high discharge  
b) High head and low discharge  
c) High head and high discharge  
d) Low head and low discharge
- 10) Which Process is responsible for production of energy in the sun?  
a) Nuclear fission reaction                      b) Nuclear fusion reaction  
c) Exothermal chemical reaction              d) All of the above
- 11) The charge carrier available in a semi-conductor material has \_\_\_\_\_.  
a) Free electrons & holes                      b) Only electrons  
c) Only holes                                      d) Positively charged ions
- 12) The concentration-type solar collector \_\_\_\_\_.  
a) First absorbs the radiation and then increases its concentration  
b) Increases the density of solar radiation before absorbing it  
c) Dilutes the density of solar radiation before absorbing it  
d) Increases the intensity of solar radiation and then reflects it back
- 13) What does FPC stand for in solar energy?  
a) Fluid plate circuit                              b) Fixed plate collectors  
c) Flat plate collectors                              d) None of the above
- 14) Which of the following methods can be called passive solar energy collection?  
a) Using heat absorbing construction materials  
b) Rooftop solar panels  
c) Photovoltaic cells  
d) Rooftop flat plate solar collectors

**Fourth Year (B. Tech) (Sem -I) (New) (CBCS) Examination: Oct/Nov-2022**  
**ELECTRICAL ENGINEERING**  
**Renewable Energy Sources**

Day & Date: Friday, 17-02-2023  
Time: 02:00 PM To 05:00 PM

Max. Marks: 56

**Instructions:** 1) Both Section are compulsory.  
2) Figures to the right indicates full marks.

**Section – I**

**Q.2 Solve any four.** **16**

- a) Write short note on role and potential of new and renewable sources.
- b) Write a note on solar radiation data.
- c) What are the advantages and disadvantages of flat plate collector?
- d) Draw and Explain Advanced Solar Collector.
- e) Write short note on solar distillation system.
- f) Write a note on sensible heat storage & Latent heat storage.

**Q.3 Solve any two** **12**

- a) Define the terms:
  - 1) Tip speed ratio
  - 2) Swept area
  - 3) Solidity
  - 4) Cut-in speed
  - 5) Cut- out speed
  - 6) Rated speed
- b) Draw the neat diagrams of Savonious and Darrieus Wind Mills and explain their working.
- c) Describe solar Photovoltaic Technology with diagram.

**Section – II**

**Q.4 Solve any four** **16**

- a) What are the different sources of Biomass?
- b) With the help of block diagram explain utilization of biogas for cooking.
- c) Write short note on potential of geothermal resources in India.
- d) Write short note on Types of Geothermal wells.
- e) Explain the need for DEC.
- f) Explain tidal and wave energy.

**Q.5 Solve any two** **12**

- a) Draw and describe the working of Hybrid cycle OTEC system.
- b) Explain Carnot cycle and What are the limitations of DEC.
- c) Explain Tidal Energy Conversion System with proper diagram.

**Switchgear & Protection**

Day & Date: Tuesday, 07-02-2023  
Time: 02:00 PM To 05:00 PM

Max. Marks: 70

- Instructions:** 1) Q. No. 1 is compulsory and should be solved in first 30 minutes in answer Book. Page No.3 (starting page of the Answer Book). Each questions carry one mark.  
2) Don't forget to mention Question Paper Set (P/Q/R/S) at the top of the same page.

**MCQ/Objective Type Questions**

Duration: 30 Minutes

Marks: 14

**Q.1 Choose the correct alternatives from the given options.**

**14**

- 1) The most efficient torque producing actuating structure for the induction type relays is
  - a) Shaded pole structure
  - b) Watt hour meter structure
  - c) Induction cup structure
  - d) Single induction loop structure
- 2) What is the purpose of back up protection?
  - a) To increase the speed
  - b) To increase the reach
  - c) To leave no blind spot
  - d) To guard against failure of primary
- 3) Interruption of large currents by relay require
  - a) Arc suppressing blow out coils
  - b) Wide separation of the opened contacts
  - c) High speed opening of contacts
  - d) All of the above
- 4) Plug setting of an electromagnetic relay can be altered by varying
  - a) Number of ampere turns
  - b) Air gap of magnetic path
  - c) Adjustable back stop
  - d) None of these
- 5) The material used for fuse must have
  - a) Low melting point and high resistance
  - b) Low melting point and low resistance
  - c) High melting point and low resistance
  - d) Low melting point and any resistance
- 6) The relay best suited for phase fault relaying for medium transmission lines is:
  - a) Mho relay
  - b) Reactance relay
  - c) Impedance relay
  - d) None of the above
- 7) A differential relay measures the vector difference between
  - a) Two currents
  - b) Two voltages
  - c) Two or more similar electrical quantities
  - d) None of the above

**Fourth Y. (B. Tech) (Sem-I) (New) (CBCS) Examination: Oct/Nov-2022**  
**ELECTRICAL ENGINEERING**  
**Switchgear & Protection**

Day & Date: Tuesday, 07-02-2023  
 Time: 02:00 PM To 05:00 PM

Max. Marks: 56

**Instructions:** 1) All questions are compulsory.  
 2) Figures to the right indicate full marks.

**Section – I**

**Q.2 Solve any four (4x4=16) 16**

- State the desirable qualities of protective scheme?
- Explain static overcurrent relay with neat diagram.
- What are the different types of fuse? Explain construction and operation of HRC fuse with neat diagram.
- Explain the following terms
  - Pick up current
  - Current Setting
  - Plug setting Multiplier
  - Time setting multiplier
- Explain how impedance relay is used for distance protection? Draw its characteristics on R-X diagram.
- Describe microprocessor based impedance relay with block diagram.

**Q.3 Solve any two (6x2=12) 12**

- Determine the time of operation of an IDMT relay rating 5A and having setting of 125% and TSM=0.5. The relay is connected through C.T. of 400/5A. The fault current is 4000A. The operating time for PSM of 8 is 3.2 Second.
- With a neat sketch explain electromagnetic attraction relay.
- Explain how admittance relay is used for distance protection? Draw its characteristics on R-X diagram.

**Section – II**

**Q.4 Solve any four (4x4=16) 16**

- Explain construction & operation of buchholz relay with neat diagram.
- Explain protection of generator against motoring action.
- Explain high resistance interruption method of arc in circuit breaker.
- Explain the following terms in case of circuit breaker
  - Restriking voltage
  - Recovery voltage
- With neat sketch explain construction & operation of air blast circuit breaker.
- With neat sketch explain metal oxide ZnO arrestors.

**Q.5 Solve any two (6x2=12) 12**

- Explain protection of induction motor for different faults.
- Explain construction, principle and operation of oil circuit breaker with neat diagram.
- Explain the phenomenon of current chopping in circuit breaker.

### MCQ/Objective Type Questions

Duration: 30 Minutes

Marks: 14

**Q.1 Choose the correct alternatives from the given options.**

14

- 1) The delay fuses are used for the protection of \_\_\_\_\_.  
a) Motors  
b) Power outlet circuits  
c) Fluorescent lamps  
d) Light circuits
- 2) For which of the following protection from negative sequence currents is provided?  
a) Generators  
b) Motors  
c) Transmission line  
d) Transformers
- 3) Why is it difficult to interrupt a capacitive circuit?  
a) The current has a leading power factor  
b) The restriking voltage can be high  
c) Current magnitude is very small  
d) Stored energy in the capacitor is very high
- 4) By using low resistance method for arc extension what is the value of arc resistance?  
a) Arc resistance is zero  
b) Arc resistance is high  
c) Arc resistance is low  
d) Arc resistance is very high
- 5) What are the main disadvantages of using oil as the quenching medium in circuit breakers?  
a) Need periodical replacement.  
b) Risk of formation of explosive mixture with air  
c) Possibility of causing fire hazards  
d) All of the above
- 6) In axial blast type of CB, expansion of air takes place from \_\_\_\_\_.  
a) High pressure to low pressure  
b) Low pressure to high pressure  
c) Always in high pressure  
d) Always in low pressure

Set **Q**

**Fourth Y. (B. Tech) (Sem-I) (New) (CBCS) Examination: Oct/Nov-2022**  
**ELECTRICAL ENGINEERING**  
**Switchgear & Protection**

Day & Date: Tuesday, 07-02-2023  
 Time: 02:00 PM To 05:00 PM

Max. Marks: 56

**Instructions:** 1) All questions are compulsory.  
 2) Figures to the right indicate full marks.

**Section – I**

**Q.2 Solve any four (4x4=16) 16**

- State the desirable qualities of protective scheme?
- Explain static overcurrent relay with neat diagram.
- What are the different types of fuse? Explain construction and operation of HRC fuse with neat diagram.
- Explain the following terms
  - Pick up current
  - Current Setting
  - Plug setting Multiplier
  - Time setting multiplier
- Explain how impedance relay is used for distance protection? Draw its characteristics on R-X diagram.
- Describe microprocessor based impedance relay with block diagram.

**Q.3 Solve any two (6x2=12) 12**

- Determine the time of operation of an IDMT relay rating 5A and having setting of 125% and TSM=0.5. The relay is connected through C.T. of 400/5A. The fault current is 4000A. The operating time for PSM of 8 is 3.2 Second.
- With a neat sketch explain electromagnetic attraction relay.
- Explain how admittance relay is used for distance protection? Draw its characteristics on R-X diagram.

**Section – II**

**Q.4 Solve any four (4x4=16) 16**

- Explain construction & operation of buchholz relay with neat diagram.
- Explain protection of generator against motoring action.
- Explain high resistance interruption method of arc in circuit breaker.
- Explain the following terms in case of circuit breaker
  - Restriking voltage
  - Recovery voltage
- With neat sketch explain construction & operation of air blast circuit breaker.
- With neat sketch explain metal oxide ZnO arrestors.

**Q.5 Solve any two (6x2=12) 12**

- Explain protection of induction motor for different faults.
- Explain construction, principle and operation of oil circuit breaker with neat diagram.
- Explain the phenomenon of current chopping in circuit breaker.

**Energy Audit and Management**

Day & Date: Thursday, 09-02-2023  
 Time: 02:00 PM To 05:00 PM

Max. Marks: 70

- Instructions:** 1) Q. No. 1 is compulsory. It should be solved in the first 30 minutes in answer book. Page no 03 (Starting page of the Answer Book). Each question carries one mark.  
 2) Don't forget to Mention question paper set (P/Q/R/S) on top of page.  
 3) Figures to the right indicates full marks  
 4) Assume suitable data wherever needed and mention it clearly.

**MCQ/Objective Type Questions**

Duration: 30 Minutes

Marks: 14

**Q.1 Choose the correct alternative from the options.**

**14**

- 1) Infrared thermometer is used to measure \_\_\_\_\_.  
 a) Surface temperature                      b) Flame temperature  
 c) Flue gas temperature                      d) Hot water temperature
- 2) Phase advancers are used to improve the power factor of \_\_\_\_\_.  
 a) Induction motors                      b) Induction generators  
 c) Synchronous motors                      d) Synchronous generators
- 3) Reactive power is measured in terms of \_\_\_\_\_.  
 a) kW                      b) kVA  
 c) kVAR                      d) None of these
- 4) Sankey diagram is an useful tool to represent \_\_\_\_\_.  
 a) Financial strength of the company  
 b) management philosophy  
 c) Input and output energy flow  
 d) human resource strength of the company
- 5) Particles that participate in the strong nuclear interaction are called \_\_\_\_\_.  
 a) Neutrinos                      b) Hadrons  
 c) Leptons                      d) Electrons  
 e) Photons
- 6) Which one is a secondary form of energy?  
 a) Furnace oil                      b) natural gas  
 c) Electricity                      d) Coal
- 7) The objective of material and energy balance is to assess the \_\_\_\_\_.  
 a) input-output                      b) conversion efficiency  
 c) Losses                      d) all the above
- 8) Energy supplied by electricity, Q in kCal is equal to \_\_\_\_\_.  
 a) kWh x 8.6                      b) kWh x 86  
 c) kWh x 860                      d) None

**Set P**

**Fourth Year (B. Tech) (Sem - I) (New) (CBCS) Examination: Oct/Nov-2022**  
**ELECTRICAL ENGINEERING**  
**Energy Audit and Management**

Day & Date: Thursday, 09-02-2023  
Time: 02:00 PM To 05:00 PM

Max. Marks: 56

**Instructions:** 1) All questions are compulsory.  
2) Figures to the right indicate full marks.

**Section – I**

**Q.2 Attempt any four.** **16**

- a) What do you mean by energy security? Explain few strategies to ensure energy security of our country.
- b) Write the notes on force field analysis.
- c) With suitable examples explain various options available for load curve wave shaping in demand side management.
- d) Explain the role of automatic meter reading in utility energy management.
- e) Short note on SCADA.

**Q.3 Attempt any two.** **12**

- a) What is necessity of energy audit? Explain phases of energy audit.
- b) Explain working of automatic meter in utility energy management
- c) Discuss United Nations Framework Convention on Climate Change.

**Section - II**

**Q.4 Attempt any four.** **16**

- a) What are the principles of writing a report of energy audit?
- b) Enlist energy conservation opportunities in pumping system.
- c) What are the various costing techniques?
- d) Give the format of energy audit.
- e) Explain various energy conservation opportunities in diesel generator.

**Q.5 Attempt any two.** **12**

- a) What are the objectives of carrying out sensitivity analysis? And what are the different factors that are considered for the sensitivity analysis?
- b) Why it is important to reduce T and D losses? Discuss various methods for reducing technical losses
- c) Explain step wise procedure to carry out a detail energy audit.

**Fourth Year (B. Tech) (Sem - I) (New) (CBCS) Examination: Oct/Nov-2022**  
**ELECTRICAL ENGINEERING**  
**Energy Audit and Management**

Max. Marks: 70

**Instructions:**

- 1) Q. No. 1 is compulsory. It should be solved in the first 30 minutes in answer book. Page no 03 (Starting page of the Answer Book). Each question carries one mark.
- 2) Don't forget to Mention question paper set (P/Q/R/S) on top of page.
- 3) Figures to the right indicates full marks
- 4) Assume suitable data wherever needed and mention it clearly.

Marks: 14

14

- Page 4 of 12

- 8) Infrared thermometer is used to measure \_\_\_\_\_.  
a) Surface temperature                      b) Flame temperature  
c) Flue gas temperature                      d) Hot water temperature
- 9) Phase advancers are used to improve the power factor of \_\_\_\_\_.  
a) Induction motors                      b) Induction generators  
c) Synchronous motors                      d) Synchronous generators
- 10) Reactive power is measured in terms of \_\_\_\_\_.  
a) kW                      b) kVA  
c) kVAR                      d) None of these
- 11) Sankey diagram is an useful tool to represent \_\_\_\_\_.  
a) Financial strength of the company  
b) management philosophy  
c) Input and output energy flow  
d) human resource strength of the company
- 12) Particles that participate in the strong nuclear interaction are called \_\_\_\_\_.  
a) Neutrinos                      b) Hadrons  
c) Leptons                      d) Electrons  
e) Photons
- 13) Which one is a secondary form of energy?  
a) Furnace oil                      b) natural gas  
c) Electricity                      d) Coal
- 14) The objective of material and energy balance is to assess the \_\_\_\_\_.  
a) input-output                      b) conversion efficiency  
c) Losses                      d) all the above

**Set Q**

**Fourth Year (B. Tech) (Sem - I) (New) (CBCS) Examination: Oct/Nov-2022**  
**ELECTRICAL ENGINEERING**  
**Energy Audit and Management**

Day & Date: Thursday, 09-02-2023  
Time: 02:00 PM To 05:00 PM

Max. Marks: 56

**Instructions:** 1) All questions are compulsory.  
2) Figures to the right indicate full marks.

**Section – I**

**Q.2 Attempt any four.** **16**

- a) What do you mean by energy security? Explain few strategies to ensure energy security of our country.
- b) Write the notes on force field analysis.
- c) With suitable examples explain various options available for load curve wave shaping in demand side management.
- d) Explain the role of automatic meter reading in utility energy management.
- e) Short note on SCADA.

**Q.3 Attempt any two.** **12**

- a) What is necessity of energy audit? Explain phases of energy audit.
- b) Explain working of automatic meter in utility energy management
- c) Discuss United Nations Framework Convention on Climate Change.

**Section - II**

**Q.4 Attempt any four.** **16**

- a) What are the principles of writing a report of energy audit?
- b) Enlist energy conservation opportunities in pumping system.
- c) What are the various costing techniques?
- d) Give the format of energy audit.
- e) Explain various energy conservation opportunities in diesel generator.

**Q.5 Attempt any two.** **12**

- a) What are the objectives of carrying out sensitivity analysis? And what are the different factors that are considered for the sensitivity analysis?
- b) Why it is important to reduce T and D losses? Discuss various methods for reducing technical losses
- c) Explain step wise procedure to carry out a detail energy audit.

- 10) Which one is a secondary form of energy?  
a) Furnace oil  
b) natural gas  
c) Electricity  
d) Coal
- 11) The objective of material and energy balance is to assess the \_\_\_\_\_.  
a) input-output  
b) conversion efficiency  
c) Losses  
d) all the above
- 12) Energy supplied by electricity, Q in kCal is equal to \_\_\_\_\_.  
a) kWh x 8.6  
b) kWh x 86  
c) kWh x 860  
d) None
- 13) A moderator is used to slow \_\_\_\_\_.  
a) Proton  
b) Alpha particles  
c) Neutron  
d) Beta particle
- 14) The force field analysis in energy action planning deals with barrier having \_\_\_\_\_.  
a) Positive force only  
b) Negative force only  
c) Both negative and positive force  
d) No force

 3) Figures to the right indicates full marks  
 4) Assume suitable data wherever needed and mention it clearly.

**MCQ/Objective Type Questions**

Duration: 30 Minutes

Marks: 14

**Q.1 Choose the correct alternative from the options.**

**14**

- 1) Which one is a secondary form of energy?
  - a) Furnace oil
  - b) natural gas
  - c) Electricity
  - d) Coal
- 2) The objective of material and energy balance is to assess the \_\_\_\_\_.
  - a) input-output
  - b) conversion efficiency
  - c) Losses
  - d) all the above
- 3) Energy supplied by electricity, Q in kCal is equal to \_\_\_\_\_.
  - a) kWh x 8.6
  - b) kWh x 86
  - c) kWh x 860
  - d) None
- 4) A moderator is used to slow \_\_\_\_\_.
  - a) Proton
  - b) Alpha particles
  - c) Neutron
  - d) Beta particle
- 5) The force field analysis in energy action planning deals with barrier having \_\_\_\_\_.
  - a) Positive force only
  - b) Negative force only
  - c) Both negative and positive force
  - d) No force
- 6) The various types of the instruments, which requires during audit need to be \_\_\_\_\_.
  - a) Easy to carry
  - b) easy to operate
  - c) Inexpensive
  - d) all a) to c)
- 7) The current flowing through the resistance is given by \_\_\_\_\_.
  - a)  $I \cos \phi$
  - b)  $I \sin \phi$
  - c)  $I \tan \phi$
  - d)  $I \cot \phi$
- 8) Acid rain is caused by the release of the following components from combustion of fuels \_\_\_\_\_.
  - a) SO<sub>x</sub> and NO<sub>x</sub>
  - b) SO<sub>x</sub> and CO<sub>2</sub>
  - c) CO<sub>2</sub> and NO<sub>x</sub>
  - d) H<sub>2</sub>O

- 9) Find out the 'odd' among the following choices for fuel substitution for industrial sector of India \_\_\_\_\_.  
a) LDO with LSHS  
b) Coal with rice husk  
c) Natural gas for fertilizer plant  
d) LPG for soft coke
- 10) Infrared thermometer is used to measure \_\_\_\_\_.  
a) Surface temperature  
b) Flame temperature  
c) Flue gas temperature  
d) Hot water temperature
- 11) Phase advancers are used to improve the power factor of \_\_\_\_\_.  
a) Induction motors  
b) Induction generators  
c) Synchronous motors  
d) Synchronous generators
- 12) Reactive power is measured in terms of \_\_\_\_\_.  
a) kW  
b) kVA  
c) kVAR  
d) None of these
- 13) Sankey diagram is an useful tool to represent \_\_\_\_\_.  
a) Financial strength of the company  
b) management philosophy  
c) Input and output energy flow  
d) human resource strength of the company
- 14) Particles that participate in the strong nuclear interaction are called \_\_\_\_\_.  
a) Neutrinos  
b) Hadrons  
c) Leptons  
d) Electrons  
e) Photons

2) Figures to the right indicates full marks.

**Section – I**

**Q.2 Attempt any four of the following. 16**

- a) What is the relation between DFT and z transform?
- b) Explain DFT as linear transformation.
- c) Discuss the properties of DFT.
- d) Compare DIT and DIF.
- e) Discuss the properties of Discrete wavelet Transform.

**Q.3 Attempt any two of the following. 12**

- a) Explain frequency analysis of signals using DFT.
- b) Explain Discrete wavelet Transform in detail.
- c) Explain DSP architecture.

**Section – II**

**Q.4 Attempt any four of the following. 16**

- a) What are the advantages of FIR filter?
- b) Why rectangular window are not used in FIR filter design using window method?
- c) What is Bilinear Transformation?
- d) Distinguish between FIR and IIR Filters.
- e) Compare Digital and analog filters.

**Q.5 Attempt any two of the following. 12**

- a) Explain LMS algorithm.
- b) Explain the method of design of IIR filters using bilinear transform method.
- c) Why Kaiser window is most used for designing FIR Filter?

**MCQ/Objective Type Questions**

Duration: 30 Minutes

Marks: 14

**Q.1 Choose the correct alternatives from the options.**

**14**

- 1) When analog Butterworth filter is converted to DT filter using impulse invariant technique then \_\_\_\_\_.  
 a) Aliasing can be eliminated  
 b) Aliasing is always present  
 c) Aliasing can be reduced by reducing T  
 d) Aliasing cannot be reduced by reducing T
- 2) Poles of Butterworth filter lies on \_\_\_\_\_.  
 a) Ellipse  
 b) Circle  
 c) Parabola  
 d) None
- 3) For same set of specifications \_\_\_\_\_.  
 a) FIR filter requires less filter coefficients than that of IIR filters  
 b) IIR filter requires less filter coefficients than that of FIR filter  
 c) Both require same filter coefficients  
 d) None of above
- 4) The linear phase realization structure is used to represent \_\_\_\_\_.  
 a) FIR System  
 b) IIR System  
 c) Both  
 d) None
- 5) DIT algorithm is related to \_\_\_\_\_.  
 a)  $X(k)$  shuffled  
 b)  $x(n)$  shuffled  
 c) Both  
 d) None of the above
- 6) In DIT, the data  $x(n)$  is stored in \_\_\_\_\_ order.  
 a) Reversed order  
 b) Bit reversal  
 c) Non-shuffled  
 d) None
- 7) FFT algorithm calculates \_\_\_\_\_.  
 a) DTFT  
 b) DFT  
 c) DCT  
 d) DST
- 8) The number of multiplication needed in FFT calculation of 32 point sequence are \_\_\_\_\_.  
 a) 80  
 b) 1024  
 c) 32  
 d) 100

- 9) For DIF FFT algorithm \_\_\_\_\_.
  - a) Input sequence is in natural order
  - b) Input sequence is in bit reversal order
  - c) Output sequence is in natural order
  - d) Both a & c
- 10) The number of multiplications needed in DFT calculation of 64 point sequence is \_\_\_\_\_.
  - a) 4096
  - b) 192
  - c) 64
  - d) 1000
- 11) The FFT becomes more efficient because of \_\_\_\_\_ property of twiddle factor \_\_\_\_\_.
  - a) Symmetry
  - b) Periodicity
  - c) Both
  - d) None
- 12) A casual and stable IIR filter cannot have linear phase.
  - a) True
  - b) False
- 13) In Butterworth filter transition band is \_\_\_\_\_.
  - a) High
  - b) Less
  - c) Can not be defined
  - d) None
- 14) IIR filter design is based on \_\_\_\_\_ filter design.
  - a) Analog
  - b) Discrete Time
  - c) Digital
  - d) None

- a) Explain frequency analysis of signals using DFT.
- b) Explain Discrete wavelet Transform in detail.
- c) Explain DSP architecture.

**Section – II**

**Q.4 Attempt any four of the following. 16**

- a) What are the advantages of FIR filter?
- b) Why rectangular window are not used in FIR filter design using window method?
- c) What is Bilinear Transformation?
- d) Distinguish between FIR and IIR Filters.
- e) Compare Digital and analog filters.

**Q.5 Attempt any two of the following. 12**

- a) Explain LMS algorithm.
- b) Explain the method of design of IIR filters using bilinear transform method.
- c) Why Kaiser window is most used for designing FIR Filter?

**Fourth. Year (B.Tech.) (Sem-I) (New) (CBCS) Examination: Oct/Nov-2022**  
**ELECTRICAL ENGINEERING**  
**Programmable Logic Control and SCADA**

Day & Date: Thursday 09-02-2023  
Time: 02:00 PM To 05:00 PM

Max. Marks: 70

- Instructions:** 1) Q. No. 1 is compulsory. It should be solved in the first 30 minutes in answer book. Page no 03 (Starting page of the Answer Book). Each question carries one mark.  
2) Don't forget to Mention question paper set (P/Q/R/S) on top of page.  
3) Figures to the right indicates full marks.

**MCQ/Objective Type Questions**

Duration: 30 Minutes

Marks: 14

**Q.1 Choose the correct alternatives from the options.**

**14**

- 1) The PLC was invented by \_\_\_\_\_.
  - a) Bills Gates
  - b) Dick Morley
  - c) Bill Landis
  - d) Tod Cunningham
- 2) PLCs are designed for use in the control of a wide variety of manufacturing machines and systems \_\_\_\_\_.
  - a) Special-Purpose Industrial Computers
  - b) Personal computers
  - c) Electromechanical systems
  - d) All of the above
- 3) PLC stands for \_\_\_\_\_.
  - a) Programmable Logo Controller
  - b) Programmed Latching Circuit
  - c) Programmable Logic Controller
  - d) Pneumatic Latching Circuit
- 4) SCADA system is \_\_\_\_\_.
  - a) Software
  - b) Hardware
  - c) Combination of Software and Hardware
  - d) None of the above
- 5) The current generation of SCADA uses \_\_\_\_\_ architecture.
  - a) Networked
  - b) Monolithic
  - c) Distributed
  - d) All of the above
- 6) Data Collection and Data Transfer is the function of \_\_\_\_\_.
  - a) SCADA software
  - b) SCADA hardware
  - c) a) and b)
  - d) None of the above

The diagram shows a series circuit. It starts with a vertical line on the left labeled  $L_1$ . This line connects to a horizontal line. On this horizontal line, there is a switch labeled 'A' (represented by two parallel diagonal lines). To the right of switch 'A' is a segment of the wire labeled '1'. This segment leads to another switch labeled 'B' (also represented by two parallel diagonal lines). To the right of switch 'B' is a segment of the wire labeled '2'. This segment leads to a lamp, represented by a circle with a cross inside. Finally, the circuit completes by connecting to a vertical line on the right labeled  $L_2$ .

Day & Date: Thursday 09-02-2023  
Time: 02:00 PM To 05:00 PM

Max. Marks: 56

**Instructions:** 1) All questions are compulsory.  
2) Figures to the right indicate full marks.

**Section – I**

**Q.2 Solve any four.** **16**

- a) State and explain advantages and disadvantages of PLC.
- b) Explain Central Processing Unit of PLC.
- c) What is ladder diagram? How it is different than the normal circuit diagram?
- d) Explain scan cycle in detail.
- e) Write a short note on input module.
- f) Explain Variable Speed (Variable Frequency) AC motor drive.

**Q.3 Solve any two.** **12**

- a) What is tuning of PID controller? Explain PID tuning methods in detail.
- b) This is an alarm system. There are four hazard inputs to the alarm system A,B,C,D that go on as some operational malfunction occurs.  
The system operates as follow:
  - i) If any one inputs are ON, nothing happen.
  - ii) If any two inputs are ON, a red pilot light goes on.
  - iii) If any three inputs are ON, an alarm siren sounds.
  - iv) If all four are ON, the fire department is notified.Develop Gate Logic, PLC Ladder logic and Relay Logic for alarm system.
- c) Explain input on/off Switching devices & analog input devices.

**Section – II**

**Q.4 Solve any four.** **16**

- a) Explain Device Net Protocol in detail.
- b) Explain Profibus Protocol System.
- c) Explain IEC61850 layered architecture protocol.
- d) State advantages and disadvantages of SCADA System.
- e) Draw and explain SCADA architecture in detail.
- f) Explain:
  - 1) Human Machine Interface
  - 2) Master terminal Unit
  - 3) Remote Terminal Unit

**Q.5 Solve any two.** **12**

- a) Explain how SCADA system is used in electric power generation.
- b) Draw and explain SCADA system in water purification system.
- c) Explain seven layers of OSI model and their functions. Compare OSI Model with TCP/IP Model.

Duration: 30 Minutes

Marks: 14

**Q.1 Choose the correct alternatives from the options.**

**14**

- 1) The integral control \_\_\_\_\_.
  - a) Increases the steady state error
  - b) Decreases the steady state error
  - c) Increases the noise and stability
  - d) Decreases the damping coefficient
- 2) In TCP/IP model layer No. 2 consist of \_\_\_\_\_.
  - a) Application
  - b) Transport
  - c) Internet
  - d) Network Access
- 3) The important function of SCADA is \_\_\_\_\_.
  - a) Data Acquisition
  - b) Alarm processing
  - c) Information Display
  - d) All the above
- 4) \_\_\_\_\_ who monitor the SCADA system and perform supervisory control functions for the remote plant.
  - a) Operator
  - b) MTU
  - c) RTU
  - d) Communications
- 5) The PLC was invented by \_\_\_\_\_.
  - a) Bills Gates
  - b) Dick Morley
  - c) Bill Landis
  - d) Tod Cunningham
- 6) PLCs are designed for use in the control of a wide variety of manufacturing machines and systems \_\_\_\_\_.
  - a) Special-Purpose Industrial Computers
  - b) Personal computers
  - c) Electromechanical systems
  - d) All of the above
- 7) PLC stands for \_\_\_\_\_.
  - a) Programmable Logo Controller
  - b) Programmed Latching Circuit
  - c) Programmable Logic Controller
  - d) Pneumatic Latching Circuit

- 8) SCADA system is \_\_\_\_\_.  
 a) Software  
 b) Hardware  
 c) Combination of Software and Hardware  
 d) None of the above
- 9) The current generation of SCADA uses \_\_\_\_\_ architecture.  
 a) Networked  
 b) Monolithic  
 c) Distributed  
 d) All of the above
- 10) Data Collection and Data Transfer is the function of \_\_\_\_\_.  
 a) SCADA software  
 b) SCADA hardware  
 c) a) and b)  
 d) None of the above
- 11) Figure shows the ladder logic for \_\_\_\_\_.

- a) NOR Gate  
 b) EX-NOR Gate  
 c) EX-OR Gate  
 d) NAND Gate
- 12) Which layer 4 protocols is used for a Telnet connection?  
 a) IP  
 b) TCP  
 c) TCP/IP  
 d) UDP
- 13) OSI stands for \_\_\_\_\_.  
 a) Open system interconnection  
 b) Operating system interface  
 c) Optical service implementation  
 d) None of the above
- 14) Where is a hub specified in the OSI model?  
 a) Session layer  
 b) Physical layer  
 c) Data Link layer  
 d) Application layer

 3) Figures to the right indicates full marks  
 4) Assume suitable data wherever needed and mention it clearly.

**MCQ/Objective Type Questions**

Duration: 30 Minutes

Marks:14

**Q.1 Choose the correct alternatives from the given options.**

**14**

- 1) The conventional direction of electric field is \_\_\_\_\_.  
 a) Positive to negative                      b) Negative to positive  
 c) No specific direction                      d) Direction cannot be determined
- 2) As compared to air the relative dielectric strength of Sulphur hexafluoride is nearly  
 a) 1.5 times                                      b) 2.5 times  
 c) 4.0 times                                      d) 5.0 times
- 3) Formative time lag depends on the mechanism of the avalanche growth in gap the formative time lag is usually  
 a) Much shorter than the statistical time lag  
 b) Much greater than the statistical time lag  
 c) Equal to the statistical time lag  
 d) None of these
- 4) For the high voltage conductors at high pressures, if the voltage is positive then the corona appears as a  
 a) Uniform bluish white sheath              b) Reddish glowing spots  
 c) Uniform greenish spots                      d) None of these
- 5) The intrinsic breakdown strength of solid dielectrics is about  
 a) 50 to 100 kV/mm                              b) 500 to 1000 kV/mm  
 c) 5 to 10 kV/mm                                  d) 1 to 5 kV/mm
- 6) Electrochemical breakdown & deterioration of insulating material is due to  
 a) Temperature rise  
 b) oxidation, hydrolysis or some other chemical action  
 c) Only due to hydrolysis and moisture effects  
 d) None of the above
- 7) The necessary condition for performing sphere gap test is  
 a) Should be between 0.7 and 0.8?  
 b) The length of gap should be smaller than radius of sphere  
 c) The length of gap should be 4 times greater than radius of sphere  
 d) An impulse wave of 50000 kV should be applied Wave front time

- 8) Van de Graff generators are useful for
- a) Very high voltage and low current applications
  - b) Very high voltage and high current applications
  - c) High voltage pulses only
  - d) Constant high voltage and current applications
- 9) The generating voltmeter is driven by \_\_\_\_\_ which \_\_\_\_\_ energy from measuring source:
- a) Constant speed motor, absorbs
  - b) Variable speed motor, doesn't absorb
  - c) Constant speed motor, doesn't absorb
  - d) Variable speed motor, absorbs
- 10) For the measurement of radio interference voltages, the detector circuit is provided with a measuring device to measure:
- a) Quasi-peak value
  - b) Peak value
  - c) Average value
  - d) All of the above
- 11) Impulse testing of transformers is done using
- a) Full wave standard impulse
  - b) Chopped wave standard impulse
  - c) Half wave standard impulse
  - d) only (a) and (b)
- 12) A small high-voltage laboratory usually will have
- a) ac, dc test sources with ratings less than 100 KV, 10kVA /KW and impulse of voltage 400 KV, 5 kJ
  - b) ac, dc test sources of 500 kV, 100 kVA/kW, and impulse of 1 MV 10 KJ
  - c) Ac voltage sources of 300 kV, 10 kVA, and impulse voltage of 1 MV, 15 KJ
  - d) Ac, dc sources only
- 13) The clearances normally adopted in by laboratories for ac and impulse voltages are
- a) 100 to 200 kv/m for ac and 500 kV/m for impulse
  - b) 300 kv/ m for ac and 500 kV/m for impulse
  - c) 30 kV/m for ac and 50 kV/m for impulse
  - d) 10 kV/m for ac and 50 kV/m for impulse
- 14) In routine test, the cable is tested by applying an ac voltage
- a) 2 times the rated value
  - b) 2.5 times the rated value
  - c) 3 times the rated value
  - d) 3.5 times the rated value

**Fourth Year (B.Tech) (Sem - I) (New) (CBCS) Examination: Oct/Nov-2022**  
**ELECTRICAL ENGINEERING**  
**High Voltage Engineering**

Day & Date: Thursday 09-02-2023  
Time: 02:00 PM To 5:00 PM

Max. Marks: 56

**Instructions:** 1) All question are compulsory.  
2) Figures to the right indicate full marks.

**Section – I**

**Q.2 Solve Any Four** **16**

- a) Explain estimation and control of electric stresses.
- b) Write a short note on Gas/Vacuum as insulators.
- c) State & derive Paschen's law and equation along with Explanations of V and Pd.
- d) Explain post breakdown phenomena in gases along with glow arc discharge from neat drawn figure.
- e) Describe characteristics and applications of the following three solid dielectrics
  - i) Paper and Board;
  - ii) Ceramic;
  - iii) Polyvinyl Chloride (PVC)
- f) Explain electrochemical breakdown and thermal breakdown.

**Q.3 Solve Any Two** **12**

- a) Explain post breakdown phenomena and applications.
- b) Write short note on Townsend's current growth equation and its secondary ionization process with current equation.
- c) Write short note on breakdown in solid dielectrics due to treeing and tracking.

**Section – II**

**Q.4 Solve Any Four** **16**

- a) Explain cockroft-walton multiplier.
- b) Explain resonant transformer, its principle and operation.
- c) Write a short note on Hall generators.
- d) Explain briefly various tests to be carried out on a bushing.
- e) Discuss the test facilities, activity and studies in high voltage laboratories.
- f) Write a short note on grounding of impulse testing laboratories.

**Q.5 Solve Any Two** **12**

- a) Define the terms impulse voltage, impulse flash over voltage, impulse puncture voltage, impulse ratio for flash over, impulse ratio for puncture.
- b) Write short note on analysis of impulse generator circuit of series R-L-C circuit.
- c) What is the necessary arrangement required for arrangement required for testing of insulators.

**Fourth Year (B.Tech) (Sem - I) (New) (CBCS) Examination: Oct/Nov-2022**  
**ELECTRICAL ENGINEERING**  
**High Voltage Engineering**

Day & Date: Thursday 09-02-2023  
Time: 02:00 PM To 5:00 PM

Max. Marks: 70

- Instructions:** 1) Q. No. 1 is compulsory. It should be solved in the first 30 minutes in answer book. Page no 03 (Starting page of the Answer Book). Each question carries one mark.  
2) Don't forget to Mention question paper set (P/Q/R/S) on top of page.  
3) Figures to the right indicates full marks  
4) Assume suitable data wherever needed and mention it clearly.

**MCQ/Objective Type Questions**

Duration: 30 Minutes

Marks:14

**Q.1 Choose the correct alternatives from the given options.**

**14**

- 1) Van de Graff generators are useful for
  - a) Very high voltage and low current applications
  - b) Very high voltage and high current applications
  - c) High voltage pulses only
  - d) Constant high voltage and current applications
- 2) The generating voltmeter is driven by \_\_\_\_\_ which \_\_\_\_\_ energy from measuring source:
  - a) Constant speed motor, absorbs
  - b) Variable speed motor, doesn't absorb
  - c) Constant speed motor, doesn't absorb
  - d) Variable speed motor, absorbs
- 3) For the measurement of radio interference voltages, the detector circuit is provided with a measuring device to measure:
  - a) Quasi-peak value
  - b) Peak value
  - c) Average value
  - d) All of the above
- 4) Impulse testing of transformers is done using
  - a) Full wave standard impulse
  - b) Chopped wave standard impulse
  - c) Half wave standard impulse
  - d) only (a) and (b)
- 5) A small high-voltage laboratory usually will have
  - a) ac, dc test sources with ratings less than 100 KV, 10kVA /KW and impulse of voltage 400 KV, 5 kJ
  - b) ac, dc test sources of 500 kV, 100 kVA/kW, and impulse of 1 MV 10 KJ
  - c) Ac voltage sources of 300 kV, 10 kVA, and impulse voltage of 1 MV, 15 KJ
  - d) Ac, dc sources only

- 6) The clearances normally adopted in by laboratories for ac and impulse voltages are
- a) 100 to 200 kV/m for ac and 500 kV/m for impulse
  - b) 300 kV/ m for ac and 500 kV/m for impulse
  - c) 30 kV/m for ac and 50 kV/m for impulse
  - d) 10 kV/m for ac and 50 kV/m for impulse
- 7) In routine test, the cable is tested by applying an ac voltage
- a) 2 times the rated value
  - b) 2.5 times the rated value
  - c) 3 times the rated value
  - d) 3.5 times the rated value
- 8) The conventional direction of electric field is \_\_\_\_.
- a) Positive to negative
  - b) Negative to positive
  - c) No specific direction
  - d) Direction cannot be determined
- 9) As compared to air the relative dielectric strength of Sulphur hexafluoride is nearly
- a) 1.5 times
  - b) 2.5 times
  - c) 4.0 times
  - d) 5.0 times
- 10) Formative time lag depends on the mechanism of the avalanche growth in gap the formative time lag is usually
- a) Much shorter than the statistical time lag
  - b) Much greater than the statistical time lag
  - c) Equal to the statistical time lag
  - d) None of these
- 11) For the high voltage conductors at high pressures, if the voltage is positive then the corona appears as a
- a) Uniform bluish white sheath
  - b) Reddish glowing spots
  - c) Uniform greenish spots
  - d) None of these
- 12) The intrinsic breakdown strength of solid dielectrics is about
- a) 50 to 100 kV/mm
  - b) 500 to 1000 kV/mm
  - c) 5 to 10 kV/mm
  - d) 1 to 5 kV/mm
- 13) Electrochemical breakdown & deterioration of insulating material is due to
- a) Temperature rise
  - b) oxidation, hydrolysis or some other chemical action
  - c) Only due to hydrolysis and moisture effects
  - d) None of the above
- 14) The necessary condition for performing sphere gap test is
- a) Should be between 0.7 and 0.8?
  - b) The length of gap should be smaller than radius of sphere
  - c) The length of gap should be 4 times greater than radius of sphere
  - d) An impulse wave of 50000 kV should be applied Wave front time

**Fourth Year (B.Tech) (Sem - I) (New) (CBCS) Examination: Oct/Nov-2022**  
**ELECTRICAL ENGINEERING**  
**High Voltage Engineering**

Day & Date: Thursday 09-02-2023  
Time: 02:00 PM To 5:00 PM

Max. Marks: 56

**Instructions:** 1) All question are compulsory.  
2) Figures to the right indicate full marks.

**Section – I**

**Q.2 Solve Any Four** **16**

- a) Explain estimation and control of electric stresses.
- b) Write a short note on Gas/Vacuum as insulators.
- c) State & derive Paschen's law and equation along with Explanations of V and Pd.
- d) Explain post breakdown phenomena in gases along with glow arc discharge from neat drawn figure.
- e) Describe characteristics and applications of the following three solid dielectrics
  - i) Paper and Board;
  - ii) Ceramic;
  - iii) Polyvinyl Chloride (PVC)
- f) Explain electrochemical breakdown and thermal breakdown.

**Q.3 Solve Any Two** **12**

- a) Explain post breakdown phenomena and applications.
- b) Write short note on Townsend's current growth equation and its secondary ionization process with current equation.
- c) Write short note on breakdown in solid dielectrics due to treeing and tracking.

**Section – II**

**Q.4 Solve Any Four** **16**

- a) Explain cockroft-walton multiplier.
- b) Explain resonant transformer, its principle and operation.
- c) Write a short note on Hall generators.
- d) Explain briefly various tests to be carried out on a bushing.
- e) Discuss the test facilities, activity and studies in high voltage laboratories.
- f) Write a short note on grounding of impulse testing laboratories.

**Q.5 Solve Any Two** **12**

- a) Define the terms impulse voltage, impulse flash over voltage, impulse puncture voltage, impulse ratio for flash over, impulse ratio for puncture.
- b) Write short note on analysis of impulse generator circuit of series R-L-C circuit.
- c) What is the necessary arrangement required for arrangement required for testing of insulators.

|-----|---|

**Fourth Y. (B.Tech) (Sem - II) (New) (CBCS) Examination: Oct/Nov-2022**  
**ELECTRICAL ENGINEERING**  
**Power Quality & FACTS**

Day & Date: Tuesday, 14-02-2023  
 Time: 02:00 PM To 05:00 PM

Max. Marks: 70

- Instructions:** 1) Q. No. 1 is compulsory and should be solved in first 30 minutes in Answer Book. Page No.3 (starting page of the Answer Book). Each question carry one mark.  
 2) Don't forget to mention Question Paper Set (P/Q/R/S) at the top of the same page.

**MCQ/Objective Type Questions**

Duration: 30 Minutes

Marks: 14

**Q.1 Choose the correct alternatives from the options and rewrite the sentence. 14**

- 1) TCSC is a \_\_\_\_\_.  
 a) Shunt compensation device      b) Series compensation device  
 c) Both a & b      d) None of the above
- 2) The Unified Power Flow Controller (UPFC) concept was proposed by \_\_\_\_\_.  
 a) Gyugyi      b) Hingorani  
 c) Ravichandrudu      d) Smith
- 3) The UPFC can control \_\_\_\_\_.  
 a) Voltage      b) Impedance  
 c) Phase angle      d) All the above
- 4) Control attributes of UPFC are \_\_\_\_\_.  
 a) Active and reactive power control  
 b) Voltage control  
 c) VAR compensation  
 d) All the above
- 5) Swell is an increase in the rms voltage or current between \_\_\_\_\_.  
 a) 1.1 and 1.8 pu      b) 1.2 and 2.8 pu  
 c) 3.1 and 1.3 pu      d) 2.1 and 5.8 pu
- 6) The duration of voltage sag is less than \_\_\_\_\_.  
 a) 20 min      b) 1 min  
 c) 20 sec      d) 60 min
- 7) To describe the voltage harmonic distortion is used to \_\_\_\_\_.  
 a) THD      b) TDD  
 c) UTD      d) None of these
- 8) Fluorescent light are a popular choice of energy \_\_\_\_\_.  
 a) saving      b) wasting  
 c) Both a & b      d) None of these
- 9) Ballast is \_\_\_\_\_ limiting device.  
 a) voltage      b) frequency  
 c) current      d) None of these

- 10) Passive filter is used to control \_\_\_\_\_.
  - a) voltage
  - b) frequency
  - c) current
  - d) harmonics
- 11) Monitoring as part of an enhanced power quality service is the objective of power quality monitoring.
  - a) True
  - b) False
- 12) Which are the shunt compensation devices?
  - a) TCSC
  - b) SSSC
  - c) UPFC
  - d) SVC
- 13) STATCOM stands for \_\_\_\_\_.
  - a) Static series controller
  - b) Static Shunt var converter
  - c) Static Synchronous Compensator
  - d) None of these
- 14) The main objective of series compensation \_\_\_\_\_.
  - a) It improves the power factor
  - b) It reduces the fault currents
  - c) Reduce the voltage drop over long distance
  - d) None

**Fourth Y. (B.Tech) (Sem - II) (New) (CBCS) Examination: Oct/Nov-2022**  
**ELECTRICAL ENGINEERING**  
**Power Quality & FACTS**

Day & Date: Tuesday, 14-02-2023  
Time: 02:00 PM To 05:00 PM

Max. Marks: 56

- Instructions:** 1) All questions are compulsory.  
2) Figures to the right indicates full marks  
2) Assume suitable data wherever needed and mention it clearly.

**Section – I**

- Q.2 Answer any four** **16**
- a) Write short notes on harmonics and Inter-harmonics.
  - b) Explain Transients and Voltage Imbalance.
  - c) Explain the active filter to control harmonic distortion.
  - d) Computer Tools for Transients Analysis.
  - e) What are the International Standards of power quality?
- Q.3 Answer any Two** **12**
- a) With a neat diagram explain the CBEMA and ITI curve.
  - b) Explain Harmonic sources from Industrial loads.
  - c) With a neat diagram explain IEC flicker meter.

**Section – II**

- Q.4 Answer any four** **16**
- a) Explain Transient Stability Improvement.
  - b) Explain the hybrid phase angle regulator.
  - c) Explain the basic control of TCBR.
  - d) Explain the construction and working of TSC-TCR.
  - e) Explain the basic types of FACTS Controllers.
- Q.5 Answer any two** **12**
- a) Explain the working of SSSC with a diagram and waveforms.
  - b) Explain the UPFC back to back voltage source converter.
  - c) Differentiate between STATCOM and SVC.

Day & Date: Tuesday, 14-02-2023  
Time: 02:00 PM To 05:00 PM

**Instructions:** 1) Q. No. 1 is compulsory and should be solved in first 30 minutes in Answer Book. Page No.3 (starting page of the Answer Book). Each question carry one mark.  
2) Don't forget to mention Question Paper Set (P/Q/R/S) at the top of the same page.

Marks: 14

- 1) Passive filter is used to control \_\_\_\_\_.  
a) voltage  
b) frequency  
c) current  
d) harmonics
- 2) Monitoring as part of an enhanced power quality service is the objective of power quality monitoring.  
a) True  
b) False
- 3) Which are the shunt compensation devices?  
a) TCSC  
b) SSSC  
c) UPFC  
d) SVC
- 4) STATCOM stands for \_\_\_\_\_.  
a) Static series controller  
b) Static Shunt var converter  
c) Static Synchronous Compensator  
d) None of these
- 5) The main objective of series compensation \_\_\_\_\_.  
a) It improves the power factor  
b) It reduces the fault currents  
c) Reduce the voltage drop over long distance  
d) None
- 6) TCSC is a \_\_\_\_\_.  
a) Shunt compensation device  
b) Series compensation device  
c) Both a & b  
d) None of the above
- 7) The Unified Power Flow Controller (UPFC) concept was proposed by \_\_\_\_\_.  
a) Gyugyi  
b) Hingorani  
c) Ravichandrudu  
d) Smith
- 8) The UPFC can control \_\_\_\_\_.  
a) Voltage  
b) Impedance  
c) Phase angle

**Extra High Voltage AC Transmission**

Day & Date: Thursday, 16-02-2023  
 Time: 02:00 PM To 05:00 PM

Max. Marks: 56

**Instructions:** 1) Section I and Section II are compulsory  
 2) Figures to the right indicate full marks.

**Section – I**

**Q.2 Solve any four of the following questions. 16**

- Explain the different mechanical considerations in EHV line performance.
- How the audible noise is generated and what are the characteristics?
- Explain attenuation of travelling waves on transmission line.
- Explain in detail advantages and disadvantages of high voltage.
- Derive equation for line energization with trapped charge voltage.
- Derive differential equations for general case in travelling waves.

**Q.3 Solve any two of the following questions. 12**

- A power of 11500 MW is required to be transmitted over a distance of 900 km. At voltage levels of 750 kV determine:
  - Possible no. of circuits required with equal magnitudes for sending and receiving, end voltages with 30° phase difference.
  - The total currents transmitted
  - The total line losses
 Assume the value of  $x = 0.272 \text{ ohm/km}$  and  $r = 0.0136 \text{ ohm/km}$  for 750 kV.
- Derive the expressions for reflection and refraction of travelling waves.
- Derive the expression  $P_c = \frac{1}{2} KC(V_m^2 - V_0^2)$  for the energy loss from charge voltage diagram.

**Section – II**

**Q.4 Solve any four of the following questions. 16**

- Write a short note on ferro-resonance over voltages.
- Explain the methods for reduction of switching surge over voltages in EHV systems.
- Explain the term power circle diagram and its use.
- Explain sub-synchronous resonance problem and counter measures.
- Explain line insulation design based upon transient over voltages in detail.
- Explain the factors under steady state in design of EHV lines.

**Q.5 Solve any two of the following questions. 12**

- Derive the expression for single frequency lumped parameter circuit.
- Explain conductor-tower, conductor-ground and conductor-conductor clearances for EHV transmission line.
- Derive the expressions for generalized constants of transmission line.

**MCQ/Objective Type Questions**

Duration: 30 Minutes

Marks: 14

**Q.1 Choose the correct alternatives from the options.**

**14**

- 1) On a lightly loaded transmission line
  - a) Receiving end voltage can exceed sending end voltage
  - b) Receiving end voltage can't exceed sending end voltage
  - c) Capacitive charging current is reduced
  - d) None of these
- 2) Charging current of a line is more at
 

|                  |                      |
|------------------|----------------------|
| a) Mid-point     | b) Sending end       |
| c) Receiving end | d) One-third of line |
- 3) Switching over-voltages are more hazardous than lightning surges in case of
 

|                        |                        |
|------------------------|------------------------|
| a) Low voltage systems | b) 11 kV systems       |
| c) Unbalanced systems  | d) EHV and UHV systems |
- 4) The entire line performance can be determined by
  - a) Sending end power circle diagram
  - b) Receiving end power circle diagram
  - c) Universal power circle diagram
  - d) (a) or (c)
- 5) Which of the following statement is true?
  - a) Shunt reactors are used for power factors improvement
  - b) Shunt reactor are used to control the line voltage
  - c) Shunt reactors are used to reduce the line impedance
  - d) Shunt reactors are used to eliminate line to ground capacitance
- 6) Which among these is/are the fundamental economical principles that influence/s the design of transmission lines?
  - a) Economic choice of conductor size
  - b) Economic choice of transmission voltage
  - c) Both (a) and (b)
  - d) Economic choice of transmission line length
- 7) The power loss is important for the design of
 

|              |                      |
|--------------|----------------------|
| a) Generator | b) Motor             |
| c) Feeder    | d) Transmission line |

- 8) The function of steel wire in an ACSR conductor is to \_\_\_\_\_.  
a) Compensate for skin effect  
b) Take care of surges  
c) Provide additional mechanical strength  
d) Reduce inductance
- 9) The percentage power loss in 750 kV transmission line is nearly equal to \_\_\_\_\_.  
a) 3.27  
b) 4.76  
c) 0.78  
d) 2.5
- 10) Galloping in transmission line conductors arises due to \_\_\_\_\_.  
a) Asymmetrical layers of ice formation  
b) Vortex phenomenon in light winds  
c) Heavy weight of the line conductors  
d) Adoption of horizontal conductor configuration
- 11) Which type of corona discharge gives interference to radio broadcast  
a) Pulse type  
b) Pulse less type  
c) Glow corona  
d) None of the above
- 12) The effect of high voltage gradient on bundled conductors are evaluated all over the world by \_\_\_\_\_.  
a) Drums  
b) Solid cylinders  
c) Cages  
d) None of the above
- 13) Draining of trapped charge of line is done by  
a) Main breaker  
b) Auxiliary breaker  
c) Air circuit breaker  
d) Shunt reactors
- 14) The cause of reflected and refracted wave is  
a) Discontinuity at the junction  
b) Lighting effect  
c) Switching surge  
d) None of these

  - a) Asymmetrical layers of ice formation
  - b) Vortex phenomenon in light winds
  - c) Heavy weight of the line conductors
  - d) Adoption of horizontal conductor configuration
- 13) Which type of corona discharge gives interference to radio broadcast
  - a) Pulse type
  - b) Pulse less type
  - c) Glow corona
  - d) None of the above
- 14) The effect of high voltage gradient on bundled conductors are evaluated all over the world by \_\_\_\_\_.
  - a) Drums
  - b) Solid cylinders
  - c) Cages
  - d) None of the above

**Fourth Y. (B.Tech) (Sem - II) (New) (CBCS) Examination: Oct/Nov-2022**  
**ELECTRICAL ENGINEERING**  
**Extra High Voltage AC Transmission**

Day & Date: Thursday, 16-02-2023  
 Time: 02:00 PM To 05:00 PM

Max. Marks: 56

**Instructions:** 1) Section I and Section II are compulsory  
 2) Figures to the right indicate full marks.

**Section – I**

**Q.2 Solve any four of the following questions. 16**

- Explain the different mechanical considerations in EHV line performance.
- How the audible noise is generated and what are the characteristics?
- Explain attenuation of travelling waves on transmission line.
- Explain in detail advantages and disadvantages of high voltage.
- Derive equation for line energization with trapped charge voltage.
- Derive differential equations for general case in travelling waves.

**Q.3 Solve any two of the following questions. 12**

- A power of 11500 MW is required to be transmitted over a distance of 900 km. At voltage levels of 750 kV determine:
  - Possible no. of circuits required with equal magnitudes for sending and receiving, end voltages with 30° phase difference.
  - The total currents transmitted
  - The total line losses
 Assume the value of  $x = 0.272 \text{ ohm/km}$  and  $r = 0.0136 \text{ ohm/km}$  for 750 kV.
- Derive the expressions for reflection and refraction of travelling waves.
- Derive the expression  $P_c = \frac{1}{2} KC(V_m^2 - V_0^2)$  for the energy loss from charge voltage diagram.

**Section – II**

**Q.4 Solve any four of the following questions. 16**

- Write a short note on ferro-resonance over voltages.
- Explain the methods for reduction of switching surge over voltages in EHV systems.
- Explain the term power circle diagram and its use.
- Explain sub-synchronous resonance problem and counter measures.
- Explain line insulation design based upon transient over voltages in detail.
- Explain the factors under steady state in design of EHV lines.

**Q.5 Solve any two of the following questions. 12**

- Derive the expression for single frequency lumped parameter circuit.
- Explain conductor-tower, conductor-ground and conductor-conductor clearances for EHV transmission line.
- Derive the expressions for generalized constants of transmission line.

Day & Date: Monday, 20-02-2023  
 Time: 02:00 PM To 05:00 PM

Max. Marks: 70

- Instructions:** 1) Q. No. 1 is compulsory. It should be solved in the first 30 minutes in answer book. Page no 03 (Starting page of the Answer Book). Each question carries one mark.  
 2) Don't forget to Mention question paper set (P/Q/R/S) on top of page.  
 3) Figures to the right indicates full marks.

**MCQ/Objective Type Questions**

Duration: 30 Minutes

Marks: 14

**Q.1 Choose the correct alternatives from the given options.**

**14**

- 1) The load forecasting is method to predict \_\_\_\_\_.  
 a) Past loads  
 b) Present loads  
 c) Future loads  
 d) None of these
- 2) Factors affecting load forecasting are \_\_\_\_\_.  
 a) Weather condition  
 b) Time factors  
 c) Special events  
 d) All of these
- 3) In Load forecasting, The present and lead time is represented by \_\_\_\_\_.  
 a)  $\sigma, j$   
 b)  $\Pi, k$   
 c)  $X, l$   
 d) None of the above
- 4) Existing Distribution systems are \_\_\_\_\_.  
 a) Properly designed  
 b) Chaotic  
 c) Optimally operated  
 d) Automated
- 5) Distribution automation is used for \_\_\_\_\_.  
 a) Electrical quantities only  
 b) Physical quantities only  
 c) Both of the above  
 d) All of the above
- 6) Distribution automation (DA) is a family of technologies, including \_\_\_\_\_.  
 a) Sensors  
 b) Processors  
 c) Information and communication networks  
 d) All of above

**Instructions:** 1) All questions are compulsory.  
2) Figures to the right indicates full marks

**Section – I**

**Q.2 Solve any Four.** **16**

- 1) Explain in details classification of load forecasting.
- 2) Explain with neat diagram A time-horizon perspective of power system studies.
- 3) What do you mean by Distribution Automation? Explain tools of distribution automation.
- 4) What is generation planning? What are factors affecting this?
- 5) Explain the objectives of generation planning.

**Q.3 Solve any Two.** **12**

- 1) Which are the different techniques for load forecasting?
- 2) What do you understand by system planning? Explain main aims of different types of system planning.
- 3) What is integrated resource planning? Explain in brief.

**Section – II**

**Q.4 Solve any Four.** **16**

- 1) What is Transmission planning?
- 2) Explain Energy Conservation and its importance.
- 3) What do you mean by Energy audit?
- 4) What do you mean by Demand side Management?
- 5) Explain New algorithms and methods relating to Load Forecasting.

**Q.5 Solve any Two.** **12**

- 1) Write short note on listing of energy conservation opportunities (ECOs).
- 2) Explain New algorithms and methods relating to power system planning.
- 3) Explain the Data required for Composite System Reliability and quality.

**MCQ/Objective Type Questions**

Duration: 30 Minutes

Marks: 14

**Q.1 Choose the correct alternatives from the given options.**

**14**

- 1) For flour mills, power consumed is \_\_\_\_\_.
  - a) 10-15 KW
  - b) 100-200 W
  - c) 200 W
  - d) 7 kW
- 2) The capital cost of a power plant depends on \_\_\_\_\_.
  - a) Total installed capacity only
  - b) Total number of units only
  - c) Both (a) and (b)
  - d) None of these
- 3) What is the modern trend in electric power generation?
  - a) To have a large number of small size thermal plants located at different places.
  - b) To have a large Size thermal plants near load centre.
  - c) To have a large Size thermal plants located near coal fields.
  - d) None of the above.
- 4) Planning for power systems is essentially a projection of
  - a) How the system should grow over a specific period of time
  - b) Judgment about the future loads and the size of investment in generating capacity additions.
  - c) Transmission facilities expansion and reinforcements
  - d) All of above
- 5) Transmission efficiency of line increases with the
  - a) Decrease in power factor and voltage
  - b) Increase in power factor and voltage
  - c) Increase in power factor but Decrease in voltage
  - d) Increase in voltage but Decrease in power factor

- 6) What is the commercial unit of Energy?
- a) Electron volt
  - b) W/s
  - c) KWh
  - d) Joule
- 7) Energy conservation means
- a) Using Energy more efficiently
  - b) Reducing wastage of Energy
  - c) New investment in more efficient equipments
  - d) All of above
- 8) The load forecasting is method to predict\_\_\_\_\_.
- a) Past loads
  - b) Present loads
  - c) Future loads
  - d) None of these
- 9) Factors affecting load forecasting are\_\_\_\_\_.
- a) Weather condition
  - b) Time factors
  - c) Special events
  - d) All of these
- 10) In Load forecasting, The present and lead time is represented by \_\_\_\_\_.
- a)  $\sigma, j$
  - b)  $\Pi, k$
  - c)  $X, l$
  - d) None of the above
- 11) Existing Distribution systems are \_\_\_\_\_.
- a) Properly designed
  - b) Chaotic
  - c) Optimally operated
  - d) Automated
- 12) Distribution automation is used for \_\_\_\_\_.
- a) Electrical quantities only
  - b) Physical quantities only
  - c) Both of the above
  - d) All of the above
- 13) Distribution automation (DA) is a family of technologies, including \_\_\_\_\_.
- a) Sensors
  - b) Processors
  - c) Information and communication networks
  - d) All of above
- 14) For long term planning time period is \_\_\_\_\_.
- a) 0-2 years
  - b) 2-5 years
  - c) 5-10 years
  - d) All of above

2) Figures to the right indicates full marks.

**Section – I**

**Q.2 Solve any FOUR.** **16**

- a) What is the need of Smart Grid? What will be the components of Smart Grid?
- b) What are the different opportunities and Barriers of Smart Grid in India?
- c) What are smart energy meters? Explain its function in smart grid.
- d) Explain phase measurement unit and its importance in smart grid.
- e) Explain phase measurement unit and its importance in smart grid.

**Q.3 Solve any TWO.** **12**

- a) Explain how automatic meter reading can make the system Smarter?
- b) Explain the concept of Resilient and Self-Healing Grid.
- c) Explain EMC and its importance in smart grid.

**Section – II**

**Q.4 Solve any FOUR.** **16**

- a) Describe the concept, power quality conditioners related to smart grid.
- b) Explain the concept of Power Quality and EMC in Smart Grid.
- c) Explain how the reliability of smart grid can be enhanced by integrating IED into it.
- d) Describe web Based Power Quality Monitoring.
- e) Write short note on Cyber Controlled Smart Grid.

**Q.5 Solve any TWO.** **12**

- a) What is Broadband over power line? Explain working and feature of broadband over power Line.
- b) Write a note on, "Real Time Pricing".
- c) Explain role of AMI in Smart Grid.

**Fourth Y. (B.Tech.) (Sem - II) (New) (CBCS) Examination: Oct/Nov-2022**  
**ELECTRICAL ENGINEERING**  
**Smart Grid Technology**

Day & Date: Monday, 20-02-2023  
 Time: 02:00 PM To 05:00 PM

Max. Marks: 70

- Instructions:** 1) Q. No. 1 is compulsory. It should be solved in the first 30 minutes in answer book. Page no 03 (Starting page of the Answer Book). Each question carries one mark.  
 2) Don't forget to Mention question paper set (P/Q/R/S) on top of page.  
 3) Figures to the right indicates full marks.

**MCQ/Objective Type Questions**

Duration: 30 Minutes

Marks: 14

**Q.1 Choose the correct alternatives from the options.**

**14**

- 1) What is the role of Gateway in smart grid architecture of IoT?
  - a) Store data
  - b) Manage data
  - c) Collect data
  - d) Security
- 2) What is the role of Cloud in smart grid architecture of IoT?
  - a) Store data
  - b) Manage data
  - c) Collect data
  - d) Security
- 3) Which protocol is used to link all the devices in the IoT?
  - a) TCP/IP
  - b) Network
  - c) UDP
  - d) HTTP
- 4) The process by which the faulty of the system gets isolated from healthy part is called \_\_\_\_\_.
  - a) Islanding
  - b) Earthing
  - c) Isolating
  - d) Detecting
- 5) Self-Healing can be done using \_\_\_\_\_.
  - a) Damping unwanted power oscillations.
  - b) Avoiding flow of the unwanted current from the grid.
  - c) Rerouting power flow in order to avoid overloading in transmission line.
  - d) All of the above
- 6) The Main difference between Conventional Grid & Smart Grid.
  - a) Unidirectional Flow of Power
  - b) Unidirectional and bidirectional flow of power and information respectively.
  - c) Bidirectional flow of information.
  - d) Bidirectional & Unidirectional flow of power.
- 7) Functions of Smart Grid is \_\_\_\_\_.
  - a) Technology maturity and risk in implementation
  - b) Efficiency and reliability of power system
  - c) Lack of awareness for consumers
  - d) None of these

- 8) In which of the following methods, the data and power both are transferred with the same conductor?
- a) Fibre optic communications
  - b) Cognitive radio
  - c) Power line communication
  - d) Cellular communication systems
- 9) According to IRIG B, Time synchronization accuracy requirement is upto \_\_\_\_.
- a) 0.5  $\mu$ s
  - b) 1  $\mu$ s
  - c) 2  $\mu$ s
  - d)  $\mu$ s
- 10) The boundaries of the customer domain typically consider which type of meters \_\_\_\_.
- a) Energy Services Load
  - b) Energy Services Interface
  - c) Energy Services Demand
  - d) Wattmeter
- 11) Service Provider communicates with which domain?
- a) Bulk generation
  - b) Distribution
  - c) Transmission
  - d) Customer
- 12) The transmission network is typically operated by \_\_\_\_.
- a) Load Dispatch Centers
  - b) Distribution Company
  - c) Regional Load Dispatch Center
  - d) Generation Company
- 13) Energy Services Interface (ESI) communicates with other domain via: \_\_\_\_.
- a) AMI infrastructure or Internet
  - b) Home Area Network
  - c) Local Area Network
  - d) None of the above
- 14) In the following which standard represent the Practice for Interconnecting Distributed Resources with Electric Power Systems Distribution Secondary Networks.
- a) IEEE Standard 1547.3
  - b) IEEE Standard 1547.4
  - c) IEEE Standard 1547.5
  - d) IEEE Standard 1547.6

**MCQ/Objective Type Questions**

Duration: 30 Minutes

Marks:14

**Q.1 Choose the correct alternatives from the given options.**

**14**

- 1) Which among these tests are to be conducted on wiring installations?
  - a) Testing of polarity of non linked single pole switches
  - b) Testing of earth continuity path
  - c) Testing of earth resistance
  - d) All of these
- 2) Which lamp is used in the outdoor illumination of buildings and airport runway?
  - a) Halogen lamp
  - b) Gaseous discharge lamp
  - c) Sodium vapour lamp
  - d) All of these
- 3) How is the ballast resistance connected with the choke?
  - a) Parallel
  - b) Series
  - c) Can be connected in either way
  - d) Both (a) & (b)
- 4) What is the normal life of a fluorescent lamp?
  - a) 2000 hours
  - b) 3500 hours
  - c) 7500 hours
  - d) 10000 hours
- 5) How many earth connections are required for the motor frame as per the IE rule 61?
  - a) One
  - b) Two separate and distinct
  - c) Three separate and distinct
  - d) All of these
- 6) What should be the spacing between the two conductors if the working voltage is 11 kV?
  - a) 76 mm
  - b) 101 mm
  - c) 190 mm
  - d) 250 mm
- 7) What should be the minimum clearance for laying power cables near communication lines?
  - a) 0.2 m horizontally and vertically
  - b) 0.6 m horizontally and vertically
  - c) 1 m horizontally and vertically
  - d) 1.5 m horizontally and vertically

**Instructions:** 1) All questions are compulsory.  
2) Figures to the right indicate full marks.

**Section – I**

**Q.2 Answer the following (Any Four) 16**

- a) When working on live conductors, what personal apparel should be kept in mind?
- b) What are the objectives of testing?
- c) What do you mean by direct and indirect testing?
- d) Explain in brief the procedure for rescuing the person who has received an electric shock.
- e) Explain High voltage test, commutation test for d.c. machine.

**Q.3 Answer the following (Any Two) 12**

- a) What are different types of fire extinguishers used to extinguish fire due to electrical reasons? Explain their mode of operation in brief.
- b) Plan the preventive maintenance schedule for storage batteries used in the relay room of the receiving station.
- c) A 33 KV substation is to be Connected to a 11 KV stepdown substation which is at a distance of 1.5 km by a underground cable. If the size of the transformer in the stepdown substation is 500 KVA, determine the size of the cable

**Section – II**

**Q.4 Answer the following (Any Four) 16**

- a) What are the effects of mis-alignment?
- b) Explain the factors involved in designing the machine foundation.
- c) List the properties of transformer oil
- d) What are the protections provided by RCCB?
- e) Explain High voltage test, commutation test for d.c. machine.

**Q.5 Answer the following (Any Two) 12**

- a) Draw a neat diagram of Sumpner's test and explain how this can be used for finding the efficiency of transformers under test.
- b) What care should be taken to protect electrical equipment during the period of inactivity?
- c) What is ELCB? How it operates? State its application.

Duration: 30 Minutes

Marks:14

**Q.1 Choose the correct alternatives from the given options.****14**

- 1) As per I.E.C. for 132 kv system voltage, the impulse withstand voltage is
  - a) 250kv
  - b) 350kv
  - c) 450kv
  - d) 550kv
- 2) Out of different methods available for testing of d.c. motors, Swinburne's test and Hopkinson's test are commonly used in practice on
  - a) Shunt generators
  - b) Series motors
  - c) Shunt motors
  - d) All of these
- 3) Swinburne's test and brake tests \_\_\_\_\_
  - a) Both are direct method of testing
  - b) Direct method of testing, indirect method of testing
  - c) Indirect method of testing, direct method of testing
  - d) Both are indirect method of testing
- 4) Swinburne's test can be performed at \_\_\_\_\_
  - a) Any load
  - b) Only no load
  - c) Only full load
  - d) Only half load
- 5) Which among these tests are to be conducted on wiring installations?
  - a) Testing of polarity of non linked single pole switches
  - b) Testing of earth continuity path
  - c) Testing of earth resistance
  - d) All of these
- 6) Which lamp is used in the outdoor illumination of buildings and airport runway?
  - a) Halogen lamp
  - b) Gaseous discharge lamp
  - c) Sodium vapour lamp
  - d) All of these
- 7) How is the ballast resistance connected with the choke?
  - a) Parallel
  - b) Series
  - c) Can be connected in either way

**Electrical Estimation and Installation**

Day & Date: Wednesday, 22-02-2023  
Time: 02:00 PM To 5:00 PM

Max. Marks: 56

**Instructions:** 1) All questions are compulsory.  
2) Figures to the right indicate full marks.

**Section – I**

**Q.2 Answer the following (Any Four) 16**

- a) When working on live conductors, what personal apparel should be kept in mind?
- b) What are the objectives of testing?
- c) What do you mean by direct and indirect testing?
- d) Explain in brief the procedure for rescuing the person who has received an electric shock.
- e) Explain High voltage test, commutation test for d.c. machine.

**Q.3 Answer the following (Any Two) 12**

- a) What are different types of fire extinguishers used to extinguish fire due to electrical reasons? Explain their mode of operation in brief.
- b) Plan the preventive maintenance schedule for storage batteries used in the relay room of the receiving station.
- c) A 33 KV substation is to be Connected to a 11 KV stepdown substation which is at a distance of 1.5 km by a underground cable. If the size of the transformer in the stepdown substation is 500 KVA, determine the size of the cable

**Section – II**

**Q.4 Answer the following (Any Four) 16**

- a) What are the effects of mis-alignment?
- b) Explain the factors involved in designing the machine foundation.
- c) List the properties of transformer oil
- d) What are the protections provided by RCCB?
- e) Explain High voltage test, commutation test for d.c. machine.

**Q.5 Answer the following (Any Two) 12**

- a) Draw a neat diagram of Sumpner's test and explain how this can be used for finding the efficiency of transformers under test.
- b) What care should be taken to protect electrical equipment during the period of inactivity?
- c) What is ELCB? How it operates? State its application.

**Fourth Y. (B. Tech) (Sem - II) (New) (CBCS) Examination: Oct/Nov-2022**

**ELECTRICAL ENGINEERING**

**Electrical Estimation and Installation**

Day & Date: Wednesday, 22-02-2023

Max. Marks: 70

Time: 02:00 PM To 5:00 PM

- Instructions:**
- 1) Q. No. 1 is compulsory. It should be solved in the first 30 minutes in answer book. Page no 03 (Starting page of the Answer Book). Each question carries one mark.
  - 2) Don't forget to Mention question paper set (P/Q/R/S) on top of page.
  - 3) Figures to the right indicates full marks
  - 4) Assume suitable data wherever needed and mention it clearly.

**MCQ/Objective Type Questions**

Duration: 30 Minutes

Marks:14

**Q.1 Choose the correct alternatives from the given options.**

**14**

- 1) What should be the spacing between the two conductors if the working voltage is 11 kV?
 

|           |           |
|-----------|-----------|
| a) 76 mm  | b) 101 mm |
| c) 190 mm | d) 250 mm |
- 2) What should be the minimum clearance for laying power cables near communication lines?
 

|                                      |
|--------------------------------------|
| a) 0.2 m horizontally and vertically |
| b) 0.6 m horizontally and vertically |
| c) 1 m horizontally and vertically   |
| d) 1.5 m horizontally and vertically |
- 3) What is the multiplication factor used for the determination of maximum current carrying capacity of an 11kV line?
 

|         |         |
|---------|---------|
| a) 0.88 | b) 0.95 |
| c) 0.9  | d) 0.8  |
- 4) Which type of cable is used for underground service connections?
 

|                               |                               |
|-------------------------------|-------------------------------|
| a) Low tension 3 ¼ core cable | b) Low tension 3 ½ core cable |
| c) Low tension 2 ¼ core cable | d) Low tension 2 ½ core cable |
- 5) What should be the height of the 'Roof Pole'?
 

|                 |                  |
|-----------------|------------------|
| a) Less than 5m | b) Less than 3m  |
| c) More than 3m | d) More than 10m |
- 6) As per I.E.C. for 132 kv system voltage, the impulse withstand voltage is
 

|          |          |
|----------|----------|
| a) 250kv | b) 350kv |
| c) 450kv | d) 550kv |
- 7) Out of different methods available for testing of d.c. motors, Swinburne's test and Hopkinson's test are commonly used in practice on
 

|                     |                  |
|---------------------|------------------|
| a) Shunt generators | b) Series motors |
| c) Shunt motors     | d) All of these  |

- 8) Swinburne's test and brake tests \_\_\_\_\_
- a) Both are direct method of testing
  - b) Direct method of testing, indirect method of testing
  - c) Indirect method of testing, direct method of testing
  - d) Both are indirect method of testing
- 9) Swinburne's test can be performed at \_\_\_\_\_
- a) Any load
  - b) Only no load
  - c) Only full load
  - d) Only half load
- 10) Which among these tests are to be conducted on wiring installations?
- a) Testing of polarity of non linked single pole switches
  - b) Testing of earth continuity path
  - c) Testing of earth resistance
  - d) All of these
- 11) Which lamp is used in the outdoor illumination of buildings and airport runway?
- a) Halogen lamp
  - b) Gaseous discharge lamp
  - c) Sodium vapour lamp
  - d) All of these
- 12) How is the ballast resistance connected with the choke?
- a) Parallel
  - b) Series
  - c) Can be connected in either way
  - d) Both (a) & (b)
- 13) What is the normal life of a fluorescent lamp?
- a) 2000 hours
  - b) 3500 hours
  - c) 7500 hours
  - d) 10000 hours
- 14) How many earth connections are required for the motor frame as per the IE rule 61?
- a) One
  - b) Two separate and distinct
  - c) Three separate and distinct
  - d) All of these

**Set S****Fourth Y. (B. Tech) (Sem - II) (New) (CBCS) Examination: Oct/Nov-2022****ELECTRICAL ENGINEERING****Electrical Estimation and Installation**

Day & Date: Wednesday, 22-02-2023  
Time: 02:00 PM To 5:00 PM

Max. Marks: 56

**Instructions:** 1) All questions are compulsory.  
2) Figures to the right indicate full marks.

**Section – I**

**Q.2 Answer the following (Any Four) 16**

- a) When working on live conductors, what personal apparel should be kept in mind?
- b) What are the objectives of testing?
- c) What do you mean by direct and indirect testing?
- d) Explain in brief the procedure for rescuing the person who has received an electric shock.
- e) Explain High voltage test, commutation test for d.c. machine.

**Q.3 Answer the following (Any Two) 12**

- a) What are different types of fire extinguishers used to extinguish fire due to electrical reasons? Explain their mode of operation in brief.
- b) Plan the preventive maintenance schedule for storage batteries used in the relay room of the receiving station.
- c) A 33 KV substation is to be Connected to a 11 KV stepdown substation which is at a distance of 1.5 km by a underground cable. If the size of the transformer in the stepdown substation is 500 KVA, determine the size of the cable

**Section – II**

**Q.4 Answer the following (Any Four) 16**

- a) What are the effects of mis-alignment?
- b) Explain the factors involved in designing the machine foundation.
- c) List the properties of transformer oil
- d) What are the protections provided by RCCB?
- e) Explain High voltage test, commutation test for d.c. machine.

**Q.5 Answer the following (Any Two) 12**

- a) Draw a neat diagram of Sumpner's test and explain how this can be used for finding the efficiency of transformers under test.
- b) What care should be taken to protect electrical equipment during the period of inactivity?
- c) What is ELCB? How it operates? State its application.

|                 |  |
|-----------------|--|
| <b>Seat No.</b> |  |
|-----------------|--|

- 7) The angle  $\delta$  in the swing equation of a synchronous generator is the \_\_\_\_\_.  
 a) angle between stator voltage and current  
 b) angular displacement of the rotor with respect to the stator  
 c) angular displacement of the stator mmf with respect to a synchronously rotating axis  
 d) angular displacement of an axis fixed to the rotor with respect to a synchronously rotating axis
- 8) A 100 MVA, 11 kV, 3 phase, 50 Hz, 8 pole synchronous generator has an inertia constant  $H = 4$  seconds. The stored energy in the rotor of the generator at synchronous speed will be \_\_\_\_\_.  
 a) 100 MJ  
 b) 400 MJ  
 c) 800 MJ  
 d) 12.5 MJ
- 9) Which colored wire are ground wires that protect appliances from electrical fires?  
 a) Red-Purple  
 b) Black-Green  
 c) Blue-Black  
 d) Green-Yellow
- 10) A 40 MVA, 11 KV, 3-phase, 50 Hz, 4-pole turbo alternator has an inertia constant of 15 sec. An input of 20 MW developed 15 MW of output power. Then the acceleration is \_\_\_\_\_.  
 a)  $60^\circ/s^2$   
 b)  $70^\circ/s^2$   
 c)  $75^\circ/s^2$   
 d) None of these
- 11) Steady state power limit is \_\_\_\_\_.  
 a)  $P = EV/X$   
 b)  $P = EV/X \sin(\delta)$   
 c)  $P = EV/X \cos(\delta)$   
 d)  $P = EV/X \sin 30$
- 12) With the use of high-speed circuit breakers, which among the following stability is increased?  
 a) Steady-state stability  
 b) Transient stability  
 c) Frequency stability  
 d) All of the above
- 13) Two buses are connected with the reactance shown in the figure. Find the range of  $\delta$  for which the system will remain stable.

- a)  $0^\circ$  to  $90^\circ$   
 b)  $-90^\circ$  to  $0^\circ$   
 c)  $-90^\circ$  to  $90^\circ$   
 d)  $90^\circ$  to  $180^\circ$
- 14) A 3-phase overhead line has a reactance of 0.5 pu. The sending end voltage is  $1\angle\delta^\circ$ . In order to maintain the receiving end voltage equal to the sending end voltage, a synchronous phase modifier is installed. Determine the rating of the modifier (MVAR) when the load at the receiving end is 0.75 pu at 0.8 pf lagging. Take 100 MVA as the base \_\_\_\_\_.  
 a) 70.7 MVAR  
 b) 70 MVAR  
 c) 77 MVAR  
 d) 0.7 MVAR

**Power System Dynamics and stability**

Day & Date: Wednesday, 22-02-2023  
Time: 02:00 PM To 05:00 PM

Max. Marks: 56

**Instruction:** All questions are compulsory.

**Section – I**

**Q.2 Answer any four questions. 16**

- a) State and explain angular and load stability of power system.
- b) Explain significance of first swing stability of generators. Draw Power-angle curve and explain Equal Area Criterion.
- c) Explain about the different subsystems of a power system and associated controls and operating states of power system.
- d) Explain about the modelling of Synchronous machine using park's transformation.
- e) Draw the functional and standard block diagram of excitation system and explain.

**Q.3 Answer any two questions. 12**

- a) Draw and explain generator capability curve label the diagram indicating various limitations on generation of active and reactive power, and stability limits.
- b) Explain dynamic modeling of synchronous motors using d-q axis transformation.
- c) What is necessity of steady state stability and how this is evaluated?

**Section – II**

**Q.4 Answer any two questions. 16**

- a) Explain about the small signal stability of system by eigen value approach.
- b) Draw the block diagram and Explain about the small signal stability for SMIB system with RH criterion.
- c) Explain about the Power system stabilizer with each component in PSS.
- d) Explain about the concepts of multi machine stability.
- e) What are different solution techniques for transient stability and explain the modified Euler method for the determination of transient stability.

**Q.5 Answer any two questions. 12**

- a) Write short notes on:
  - 1) Methods to counteract the sub synchronous oscillations.
  - 2) Voltage stability using Bifurcation theory
- b) What are problems caused by self excitation and how these can be overcome using filters and damping devices.
- c) Explain how resonance can occur in power system. What are its effects on power system apparatus?

 Time: 02:00 PM To 05:00 PM

Max. Marks: 56

**Instruction:** All questions are compulsory.

**Section – I**

**Q.2 Answer any four questions. 16**

- State and explain angular and load stability of power system.
- Explain significance of first swing stability of generators. Draw Power-angle curve and explain Equal Area Criterion.
- Explain about the different subsystems of a power system and associated controls and operating states of power system.
- Explain about the modelling of Synchronous machine using park's transformation.
- Draw the functional and standard block diagram of excitation system and explain.

**Q.3 Answer any two questions. 12**

- Draw and explain generator capability curve label the diagram indicating various limitations on generation of active and reactive power, and stability limits.
- Explain dynamic modeling of synchronous motors using d-q axis transformation.
- What is necessity of steady state stability and how this is evaluated?

**Section – II**

**Q.4 Answer any two questions. 16**

- Explain about the small signal stability of system by eigen value approach.
- Draw the block diagram and Explain about the small signal stability for SMIB system with RH criterion.
- Explain about the Power system stabilizer with each component in PSS.
- Explain about the concepts of multi machine stability.
- What are different solution techniques for transient stability and explain the modified Euler method for the determination of transient stability.

**Q.5 Answer any two questions. 12**

- Write short notes on:
  - Methods to counteract the sub synchronous oscillations.
  - Voltage stability using Bifurcation theory
- What are problems caused by self excitation and how these can be overcome using filters and damping devices.
- Explain how resonance can occur in power system. What are its effects on power system apparatus?

- 6) The synchronizing power is \_\_\_\_\_ when two alternators are running in synchronism.
- negative
  - positive
  - zero
  - Cannot be determined
- 7) Equal area criteria and Swing equation are used for \_\_\_\_\_ and \_\_\_\_\_ Stability respectively.
- Steady state, Transient
  - Transient, Steady state
  - Both are used for steady state stability
  - Both are used for transient stability
- 8) When only X is present, The steady-state stability limit for the transmission line will be \_\_\_\_\_.
- greater than  $V_1V_2/X$
  - less than  $V_1V_2/X$
  - equal to  $V_1V_2/X$
  - equal to  $V_1V_2/Z$
- 9) The power transfer capability of a transmission line is the most affected by \_\_\_\_\_.
- Shunt conductance
  - Capacitance
  - Resistance
  - Inductance
- 10) Stability of a system is not affected by \_\_\_\_\_.
- Reactance of line
  - Losses
  - Reactance of generator
  - Excitation of generator
- 11) The angle  $\delta$  in the swing equation of a synchronous generator is the \_\_\_\_\_.
- angle between stator voltage and current
  - angular displacement of the rotor with respect to the stator
  - angular displacement of the stator mmf with respect to a synchronously rotating axis
  - angular displacement of an axis fixed to the rotor with respect to a synchronously rotating axis
- 12) A 100 MVA, 11 kV, 3 phase, 50 Hz, 8 pole synchronous generator has an inertia constant  $H = 4$  seconds. The stored energy in the rotor of the generator at synchronous speed will be \_\_\_\_\_.
- 100 MJ
  - 400 MJ
  - 800 MJ
  - 12.5 MJ
- 13) Which colored wire are ground wires that protect appliances from electrical fires?
- Red-Purple
  - Black-Green
  - Blue-Black
  - Green-Yellow
- 14) A 40 MVA, 11 KV, 3-phase, 50 Hz, 4-pole turbo alternator has an inertia constant of 15 sec. An input of 20 MW developed 15 MW of output power. Then the acceleration is \_\_\_\_\_.
- $60^\circ/s^2$
  - $70^\circ/s^2$
  - $75^\circ/s^2$
  - None of these

 2) Don't forget to mention Question Paper Set (P/Q/R/S) at the top of the same page.  
 3) Figures to the right indicates full marks.

**MCQ/Objective Type Questions**

Duration: 30 Minutes

Marks: 14

**Q.1 Choose the correct alternatives from the options.**

**14**

- 1) Stability of a system is not affected by \_\_\_\_\_.  
 a) Reactance of line                      b) Losses  
 c) Reactance of generator              d) Excitation of generator
- 2) The angle  $\delta$  in the swing equation of a synchronous generator is the \_\_\_\_\_.  
 a) angle between stator voltage and current  
 b) angular displacement of the rotor with respect to the stator  
 c) angular displacement of the stator mmf with respect to a synchronously rotating axis  
 d) angular displacement of an axis fixed to the rotor with respect to a synchronously rotating axis
- 3) A 100 MVA, 11 kV, 3 phase, 50 Hz, 8 pole synchronous generator has an inertia constant  $H = 4$  seconds. The stored energy in the rotor of the generator at synchronous speed will be \_\_\_\_\_.  
 a) 100 MJ                                      b) 400 MJ  
 c) 800 MJ                                      d) 12.5 MJ
- 4) Which colored wire are ground wires that protect appliances from electrical fires?  
 a) Red-Purple                                  b) Black-Green  
 c) Blue-Black                                  d) Green-Yellow
- 5) A 40 MVA, 11 KV, 3-phase, 50 Hz, 4-pole turbo alternator has an inertia constant of 15 sec. An input of 20 MW developed 15 MW of output power. Then the acceleration is \_\_\_\_\_.  
 a)  $60^\circ/s^2$                                       b)  $70^\circ/s^2$   
 c)  $75^\circ/s^2$                                       d) None of these
- 6) Steady state power limit is \_\_\_\_\_.  
 a)  $P = EV/X$                                       b)  $P = EV/X \sin(\delta)$   
 c)  $P = EV/X \cos(\delta)$                           d)  $P = EV/X \sin 30$
- 7) With the use of high-speed circuit breakers, which among the following stability is increased?  
 a) Steady-state stability                      b) Transient stability  
 c) Frequency stability                          d) All of the above

- 8) Two buses are connected with the reactance shown in the figure. Find the range of  $\delta$  for which the system will remain stable.

- a)  $0^\circ$  to  $90^\circ$                       b)  $-90^\circ$  to  $0^\circ$   
 c)  $-90^\circ$  to  $90^\circ$                       d)  $90^\circ$  to  $180^\circ$
- 9) A 3-phase overhead line has a reactance of 0.5 pu. The sending end voltage is  $1 \angle \delta^\circ$ . In order to maintain the receiving end voltage equal to the sending end voltage, a synchronous phase modifier is installed. Determine the rating of the modifier (MVAR) when the load at the receiving end is 0.75 pu at 0.8 pf lagging. Take 100 MVA as the base \_\_\_\_.
- a) 70.7 MVAR                      b) 70 MVAR  
 c) 77 MVAR                      d) 0.7 MVAR
- 10) Transient state stability is generally improved by \_\_\_\_.
- a) Using high speed governors on the machines  
 b) Using low inertia machines  
 c) Dispensing with neutral grounding  
 d) Any of the above
- 11) The synchronizing power is \_\_\_\_ when two alternators are running in synchronism.
- a) negative                      b) positive  
 c) zero                      d) Cannot be determined
- 12) Equal area criteria and Swing equation are used for \_\_\_\_ and \_\_\_\_ Stability respectively.
- a) Steady state, Transient  
 b) Transient, Steady state  
 c) Both are used for steady state stability  
 d) Both are used for transient stability
- 13) When only X is present, The steady-state stability limit for the transmission line will be \_\_\_\_.
- a) greater than  $V_1 V_2 / X$                       b) less than  $V_1 V_2 / X$   
 c) equal to  $V_1 V_2 / X$                       d) equal to  $V_1 V_2 / Z$
- 14) The power transfer capability of a transmission line is the most affected by \_\_\_\_.
- a) Shunt conductance                      b) Capacitance  
 c) Resistance                      d) Inductance

Time: 10:00 AM To 01:00 PM

**Instructions:**

- 1) Q. No. 1 is compulsory and should be solved in first 30 minutes in Answer Book. Page No.3 (starting page of the Answer Book). Each questions carry one mark.
- 2) Don't forget to mention Question Paper Set (P/Q/R/S) at the top of the same page.
- 3) Figures to the right indicates full marks.
- 4) Assume suitable data if necessary.

## Marks: 14

14

- Page 1 of 12

- 9) A typical organization is devoted to the principle of \_\_\_\_\_.  
a) bureaucracy                      b) efficiency  
c) information                        d) knowledge
- 10) A typical business undergoes which of below pressure \_\_\_\_\_.  
a) legal                                  b) political  
c) technological                        d) all of these
- 11) Key member leaving project team is an example of \_\_\_\_\_.  
a) internal risk                        b) forecast  
c) Issue                                  d) all of these
- 12) A working model that is functionally equivalent to a component of the product is called \_\_\_\_\_.  
a) spiral model                         b) v model  
c) waterfall model                      d) none of these
- 13) Two types of database query are \_\_\_\_\_ and \_\_\_\_\_.  
a) select, update                        b) action, select  
c) action, update                        d) action, retrieval
- 14) Which of below is a sources of data into an enterprise?  
a) Clicksteram at web site              b) CRM input  
c) supply chain input                    d) all of these

Day & Date: Tuesday, 07-02-2023  
Time: 10:00 AM To 01:00 PM

Max. Marks: 56

**Instructions:** 1) All questions are compulsory.  
2) Assume suitable data if necessary.

**Section – I**

**Q.2 Solve Any Two.** **12**

- a) Classify information systems based on its levels.
- b) With suitable diagram explain flow of e payment with credit/debit card.
- c) With suitable example evaluate need, challenges and benefits of ECM.

**Q.3 Solve Any Four.** **16**

- a) Compare OLAP and data mining.
- b) What are the different models of web mining?
- c) With suitable example explain data, database, information and knowledge.
- d) Describe any four models of e business.
- e) With suitable example compare forward and reverse auctions.

**Section – II**

**Q.4 Solve Any Two** **12**

- a) With suitable example describe any six attributes of the software project.
- b) With suitable example explain how ERP interfaces with other enterprise systems.
- c) With suitable diagram and example explain various flows and processes in supply chain management.

**Q.5 Solve Any Four.** **16**

- a) With suitable example discuss any two ethical issues related to information systems.
- b) With suitable example explain - copyright and patent.
- c) Justify with example - a software project requires a good project management.
- d) Evaluate importance and different types of milestones.
- e) Justify - information systems and organization influence each other.

- 1) \_\_\_\_\_ in the business context occurs when employees receive preferential treatment on grounds that are not directly related to their qualifications and performance in the job.
 

|                      |                            |
|----------------------|----------------------------|
| a) Right and Duties  | b) Discrimination          |
| c) Employees Privacy | d) Due process and layoffs |
- 2) \_\_\_\_\_ is just one aspect of marketing communications.
 

|                         |                   |
|-------------------------|-------------------|
| a) Advertisement        | b) Product Policy |
| c) Marketing Management | d) None of these  |
- 3) CSO stands for what?
 

|                               |                                  |
|-------------------------------|----------------------------------|
| a) Civil society organization | b) Consumer Society organization |
| c) Central Statistics office  | d) None of these                 |
- 4) \_\_\_\_\_ is an attempt by one or more parties to achieve certain objectives by urging individual consumers to refrain from making selected purchases in the marketplace.
 

|             |                              |
|-------------|------------------------------|
| a) Boycott  | b) Demonstration and marches |
| c) Protests | d) Occupations               |
- 5) Government is stakeholder of organization.
 

|         |          |
|---------|----------|
| a) True | b) False |
|---------|----------|
- 6) \_\_\_\_\_ is the long- term maintenance of the system according to environmental and economical and Social consideration.
 

|                    |                   |
|--------------------|-------------------|
| a) Security        | b) Sustainability |
| c) Business Ethics | d) None of above  |
- 7) Functions of Civil Society are \_\_\_\_\_.
 

|                    |                 |
|--------------------|-----------------|
| a) Protection      | b) Monitoring   |
| c) Social Cohesion | d) All of above |

- 8) \_\_\_\_\_ is the study of business situation activities and decisions where issues of rights and wrong are addressed
- a) Business Decisions                      b) Business Situations  
c) Business Theories                      d) Business Ethics
- 9) Some businessman do \_\_\_\_\_ by indulging in unfair trade practices like black-marketing, artificial high pricing, cheating in weight and measures, selling of duplicate and harmful products etc.
- a) Business Decisions                      b) Business Situations  
c) Business Malpractices                      d) Business Ethics
- 10) In \_\_\_\_\_ the degree to which one is autonomous and driven primarily to act for the benefit of ones self, contrasted with a more social orientation that emphasize group working and community goals.
- a) Individualism/Collectivism                      b) Power Distance  
c) Uncertainty Avoidance                      d) Masculine Approach
- 11) \_\_\_\_\_ is managing any area of business, whether it is production, marketing accounting, human resources or any other functions constitute a whole range of activities covering formal and informal means of planning, implementing and control.
- a) Business Decisions                      b) Business Ethics  
c) Business Situations                      d) Business Ethics Management
- 12) \_\_\_\_\_ commit organisation, industries or professionals to specific beliefs, values and actions that set our appropriate ethical behaviour for employees.
- a) Code of ethics                      b) Code of conduct  
c) Business Situations                      c) Business Ethics
- 13) What is Full Form Of CSR?
- a) Corporate Social Reporting                      b) Corporate Social Research  
c) Corporate Social Responsibility                      d) None of these
- 14) Which responsibility makes corporations to do what is right and fair even when they are not compelled to do so by the legal framework?
- a) Ethical Responsibility  
b) Legal Responsibility  
c) Philanthropic Responsibility  
d) Economic Responsibility

**Set Q**

**T.Y. (B. Tech) (Sem- I) (New) (CBCS) Examination: Oct/Nov- 2022**  
**ELECTRONICS & TELECOMMUNICATION ENGINEERING**  
**Business Ethics**

Day & Date: Tuesday, 07-02-2023  
Time: 10:00 AM To 01:00 PM

Max. Marks: 56

**Instructions:** 1) All questions are compulsory.  
2) Figures to the right indicate full marks.

**Section – I**

**Q.2 Solve any four of the following.** **16**

- a) Define Business ethics & explain its importance.
- b) Define globalization & explain issues in globalization.
- c) Explain the stages in ethical decision making.
- d) Explain concept of corporate citizenship & its 3 perspective.
- e) Explain the components of business ethics management.

**Q.3 Solve any two of the following.** **12**

- a) Elaborate Individual and situational influences on decision making.
- b) Explain 4 port model of CSR
- c) Explain normative ethical theories.

**Section – II**

**Q.4 Solve any four of the following.** **16**

- a) What are implications of globalization for business relations with government?
- b) Define environmental ethics & environmental responsibilities.
- c) Explain the functions of CSO.
- d) Explain the ethical issues in firm-employee relationship.
- e) Explain IT code of conduct.

**Q.5 Solve any two of the following.** **12**

- a) Explain how government act as a stakeholder of a business.
- b) Define CSO & explain the ethical issues in CSO.
- c) Define stakeholders & explain who are stakeholders of any business.

 3) Figures to the right indicates full marks.

**MCQ/Objective Type Questions**

Duration: 30 Minutes

Marks: 14

**Q.1 Choose the correct alternatives from the options.**

**14**

- 1) Smart Grid Technology comprises the following:
  - a) AMI, PLM, OMS, Renewable Integration, Microgrid,
  - b) DR/DSM, Distribution Automation, Energy Efficient Systems
  - c) All of the above
  - d) None of the above
- 2) What is the role of Sensor in smart grid architecture of IoT?
  - a) Store data
  - b) Manage data
  - c) Collect data
  - d) Security
- 3) Smart Grid technologies are aimed at improvement of \_\_\_\_\_.
  - a) Only Power Transmission System
  - b) Only Power Distribution system
  - c) Both Power Transmission & Distribution System
  - d) Neither Power Transmission nor Power Distribution system
- 4) In a Smart Grid ECO System, a normal consumer is expected to be able to turn to \_\_\_\_\_.
  - a) a non-consumer
  - b) a careful consumer
  - c) a Prosumer
  - d) Both careful consumer and Prosumer
- 5) What is the full form of DR in the context of Smart Grids?
  - a) Delivery Rate
  - b) Divide & Rule
  - c) Demand Response
  - d) Demand Recycle
- 6) Sensors can be used for the following purposes in Smart Grids.
  - a) Detect mechanical failures, tower collapses, extreme mechanical conditions.
  - b) Real time mechanical and electrical conditions of power lines
  - c) Diagnose imminent as well as permanent faults
  - d) All Above
- 7) A localized grouping of electricity generations, energy storages, and loads is termed as \_\_\_\_\_.
  - a) Virtual Power Plant
  - b) Macro Grid
  - c) Micro Grid
  - d) Traditional Grid

- 8) A system that integrates several types of power sources, (wind-turbines, hydro, Photovoltaics and batteries) to give a reliable overall power supply is termed as?
- a) Virtual Power Plant
  - b) Macro Grid
  - c) Micro Grid
  - d) Traditional Grid
- 9) How much power is lost in the grid due to resistance?
- a) 2-5%
  - b) 7-10%
  - c) 11-14%
  - d) 15-18%
- 10) Advanced Control Methods Technology Area include all but:
- a) Operational Applications
  - b) Fault Tolerance
  - c) Distributed Intelligent Agents
  - d) Analytical Tools
- 11) Smart Grid goals include all but the following:
- a) Potentially Reducing Our Carbon Foot-print
  - b) Introducing advancements and efficiencies yet to be envisioned
  - c) Assimilate all cultures to become American
  - d) Maintaining Grid Affordability
- 12) Distributed Intelligent Agents include all of the following, except:
- a) Dynamic distributed power control
  - b) Digital Protective Relays
  - c) Grid friendly appliances
  - d) Meter Reading Frequency
- 13) Monitor target of the smart \_\_\_\_\_ includes sensor objects in the power link.
- a) Perception layer
  - b) Smart network layer
  - c) Smart Application layer
  - d) Data layer
- 14) Which is the example for smart grid edge device for utility?
- a) Smart Meters
  - b) Smart Home
  - c) Smart Car
  - d) Smart Collage

2) Figures to the right indicate full marks.

**Section – I**

**Q.2 Solve any four** **16**

- a) Define smart grid. Differentiate between conventional grid and smart grid.
- b) Describe the opportunities and challenges related to smart grid.
- c) Explain the Evolution of Electric Grid.
- d) Define smart grid and describe the Need for smart Grid.
- e) What are the challenges and benefits of smart grid?

**Q.3 Solve Any Two** **12**

- a) Discuss the Evolution of Meter Reading.
- b) Explain energy management system in smart grid.
- c) Explain the communication network topologies used for data transmission in advanced Metering infrastructure.

**Section – II**

**Q.4 Solve any four** **16**

- a) What are the Advances in Energy Management Systems for the Smart Grid?
- b) Define the AMI standards.
- c) Explain EMC and its importance in smart grid.
- d) Write note on 'TP based Protocol'.
- e) Give the Applications of Phasor Measurement Unit

**Q.5 Solve any Two** **12**

- a) Explain the protection & control Strategy implemented in smart grid.
- b) Describe the Mitigation Approach to Cyber Security Risks
- c) Explain the application of Intelligent Electronic Devices.

Max. Marks: 70

- Instructions:** 1) Q. No. 1 is compulsory. It should be solved in the first 30 minutes in answer book. Page no 03 (Starting page of the Answer Book). Each question carries one mark.  
 2) Don't forget to Mention question paper set (P/Q/R/S) on top of page.  
 3) Figures to the right indicates full marks.

**MCQ/Objective Type Questions**

Duration: 30 Minutes

Marks: 14

**Q.1 Choose the correct alternatives from the options.**

**14**

- 1) A system that integrates several types of power sources, (wind-turbines, hydro, Photovoltaics and batteries) to give a reliable overall power supply is termed as?
  - a) Virtual Power Plant
  - b) Macro Grid
  - c) Micro Grid
  - d) Traditional Grid
- 2) How much power is lost in the grid due to resistance?
  - a) 2-5%
  - b) 7-10%
  - c) 11-14%
  - d) 15-18%
- 3) Advanced Control Methods Technology Area include all but:
  - a) Operational Applications
  - b) Fault Tolerance
  - c) Distributed Intelligent Agents
  - d) Analytical Tools
- 4) Smart Grid goals include all but the following:
  - a) Potentially Reducing Our Carbon Foot-print
  - b) Introducing advancements and efficiencies yet to be envisioned
  - c) Assimilate all cultures to become American
  - d) Maintaining Grid Affordability
- 5) Distributed Intelligent Agents include all of the following, except:
  - a) Dynamic distributed power control
  - b) Digital Protective Relays
  - c) Grid friendly appliances
  - d) Meter Reading Frequency
- 6) Monitor target of the smart \_\_\_\_\_ includes sensor objects in the power link.
  - a) Perception layer
  - b) Smart network layer
  - c) Smart Application layer
  - d) Data layer
- 7) Which is the example for smart grid edge device for utility?
  - a) Smart Meters
  - b) Smart Home
  - c) Smart Car
  - d) Smart Collage

- 8) Smart Grid Technology comprises the following:
- a) AMI, PLM, OMS, Renewable Integration, Microgrid,
  - b) DR/DSM, Distribution Automation, Energy Efficient Systems
  - c) All of the above
  - d) None of the above
- 9) What is the role of Sensor in smart grid architecture of IoT?
- a) Store data
  - b) Manage data
  - c) Collect data
  - d) Security
- 10) Smart Grid technologies are aimed at improvement of \_\_\_\_\_
- a) Only Power Transmission System
  - b) Only Power Distribution system
  - c) Both Power Transmission & Distribution System
  - d) Neither Power Transmission nor Power Distribution system
- 11) In a Smart Grid ECO System, a normal consumer is expected to be able to turn to \_\_\_\_\_.
- a) a non-consumer
  - b) a careful consumer
  - c) a Prosumer
  - d) Both careful consumer and Prosumer
- 12) What is the full form of DR in the context of Smart Grids?
- a) Delivery Rate
  - b) Divide & Rule
  - c) Demand Response
  - d) Demand Recycle
- 13) Sensors can be used for the following purposes in Smart Grids.
- a) Detect mechanical failures, tower collapses, extreme mechanical conditions.
  - b) Real time mechanical and electrical conditions of power lines
  - c) Diagnose imminent as well as permanent faults
  - d) All Above
- 14) A localized grouping of electricity generations, energy storages, and loads is termed as \_\_\_\_\_
- a) Virtual Power Plant
  - b) Macro Grid
  - c) Micro Grid
  - d) Traditional Grid

**T.Y (B.Tech.) (Sem - I) (New) (CBCS) Examination: Oct/Nov-2022**  
**ELECTRICAL ENGINEERING**  
**Smart Energy Management System**

Day & Date: Thursday, 16-02-2023  
Time: 10:00 AM To 01:00 PM

Max. Marks: 56

**Instructions:** 1) All question are compulsory.  
2) Figures to the right indicate full marks.

**Section – I**

**Q.2 Solve any four** **16**

- a) Define smart grid. Differentiate between conventional grid and smart grid.
- b) Describe the opportunities and challenges related to smart grid.
- c) Explain the Evolution of Electric Grid.
- d) Define smart grid and describe the Need for smart Grid.
- e) What are the challenges and benefits of smart grid?

**Q.3 Solve Any Two** **12**

- a) Discuss the Evolution of Meter Reading.
- b) Explain energy management system in smart grid.
- c) Explain the communication network topologies used for data transmission in advanced Metering infrastructure.

**Section – II**

**Q.4 Solve any four** **16**

- a) What are the Advances in Energy Management Systems for the Smart Grid?
- b) Define the AMI standards.
- c) Explain EMC and its importance in smart grid.
- d) Write note on 'TP based Protocol'.
- e) Give the Applications of Phasor Measurement Unit

**Q.5 Solve any Two** **12**

- a) Explain the protection & control Strategy implemented in smart grid.
- b) Describe the Mitigation Approach to Cyber Security Risks
- c) Explain the application of Intelligent Electronic Devices.

Day & Date: Thursday, 16-02-2023  
Time: 10:00 AM To 01:00 PM

Max. Marks: 70

- Instructions:** 1) Q. No. 1 is compulsory and should be solved in first 30 minutes in Answer Book. Page No.3 (starting page of the Answer Book). Each question carry one mark.  
2) Don't forget to mention Question Paper Set (P/Q/R/S) at the top of the same page.  
3) Figures to the right indicates full marks.

**MCQ/Objective Type Questions**

Duration: 30 Minutes

Marks: 14

**Q.1 Choose the correct alternatives from the options.**

**14**

- 1) Which of the following is used to build a electric drive?
  - a) Source
  - b) Motor
  - c) Control unit
  - d) All of the mentioned
- 2) Which of the following is/are components of an electric drive?
  - a) Control unit and Power Modulator
  - b) Electric Motor and Control System
  - c) Input Command
  - d) Sensing Device and Electric Motor
- 3) Which of the following exhibits linearly rising load torque characteristics?
  - a) Rolling Mills
  - b) Fan load
  - c) Separately excited de generator connected to the resistive load
  - d) Sensed signal
- 4) Type-A chopper is used for obtaining which type of mode?
  - a) Reverse motoring mode
  - b) Motoring mode
  - c) Reverse regenerative braking mode
  - d) Regenerative braking mode
- 5) The selection of an electric motor for any application depends on which of the following factors?
  - a) Electrical characteristics
  - b) Mechanical characteristics
  - c) Size and rating of motors
  - d) All of the above
- 6) Which of the following devices should be used as a switch for high power and high voltage application?
  - a) TRIAC
  - b) Thyristor
  - c) GTO
  - d) MOSFET

- 7) The most suitable control-motor application is \_\_\_\_\_.  
a) AC one-phase induction motor    b) DC shunt motor  
c) AC shunt motor    d) DC separately motor
- 8) Which of these is the purpose of power-split device?  
a) To split Electrical Energy into Mechanical Energy  
b) To allow both the engine and Electric motor to propel the vehicle  
c) To recharge the battery while braking  
d) To recharge the brakes while driving
- 9) Which starting method is the best method in Induction motor?  
a) Direct online starting    b) Reactance starting  
c) Star-Delta starting    d) Autotransformer starting
- 10) The Field Oriented Control (FOC) enables the induction machine being controlled alike the \_\_\_\_\_.  
a) Separately excited DC Machine  
b) Permanent magnet DC machine  
c) Switched reluctance machine Option  
d) Stepper motor
- 11) Electric motors are ideal for vehicular applications because of \_\_\_\_\_.  
a) The torque speed characteristics  
b) The VI characteristics  
c) The Pd characteristics  
d) The alpha delta characteristics
- 12) Stator voltage control for speed control of induction motors is suitable for \_\_\_\_\_.  
a) Fan and pump drives    b) Drive of a crane  
c) Running it as generator    d) Constant load drive
- 13) In V/F control of a 3- Phase Induction Motor, if voltage is increased by 10%, in order to keep air gap flux constant, what is the % increment or decrement in frequency?  
a) Frequency is decreased by 10%  
b) Frequency is decreased by 20%  
c) Frequency is increased by 10%  
d) Frequency is increased by 20%
- 14) In a four -quadrant operation of an electric machine, the third operation is \_\_\_\_\_.  
a) Forward motoring    b) Reverse braking  
c) Forward braking    d) Reverse motoring

Set

P

**T.Y (B.Tech.) (Sem - I) (New) (CBCS) Examination: Oct/Nov-2022**  
**ELECTRICAL ENGINEERING**  
**Electric Motors and Controls for Electric Vehicle**

Day & Date: Thursday, 16-02-2023  
 Time: 10:00 AM To 01:00 PM

Max. Marks: 56

**Instructions:** 1) All questions are compulsory.  
 2) Figures to the right indicates full marks.

**Section – I**

**Q.2 Attempt any FOUR.** **16**

- a) Draw and explain the block diagram of switched reluctance motor drive system.
- b) With neat diagram explain brushless DC Motor.
- c) Explain the two-quadrant operation of chopper DC motor drive with suitable waveforms for electric vehicle.
- d) Explain the configuration of v/f-controlled induction motor drive with field-weakening mode and constant-torque mode.
- e) Explain briefly the electrical and mechanical constraints to be considered while sizing an electrical machine for EV.

**Q.3 Attempt any TWO.** **12**

- a) Explain the four-quadrant chopper control of dc motor.
- b) What is the advantage of AC motor over DC motors for EV applications?
- c) What is its typical value for Induction Motors used in HEV applications?

**Section - II**

**Q.4 Attempt any FOUR.** **16**

- a) Explain Field oriented control of induction machines theory using DC drive analogy.
- b) Justify why induction motor mature technology among commutator less motor drives.
- c) With a neat graph(s) discuss in detail about the power and torque characteristics of various motors suitable for EV application.
- d) Explain Various Control Strategy used in Electric Vehicle.
- e) Discuss various electric drive train topologies.

**Q.5 Attempt any TWO.** **12**

- a) Describe construction and working principle of separately excited DC motor its single phase and three phase converters with the performance parameter, characteristics, operational waveform and with freewheeling Diode scheme.
- b) What is mean by time control ratio and frequency modulation system?
- c) Comment on the suitability of DC and AC machines for electric vehicle applications.

  - d) Explain the configuration of v/f-controlled induction motor drive with field-weakening mode and constant-torque mode.
  - e) Explain briefly the electrical and mechanical constraints to be considered while sizing an electrical machine for EV.
- Q.3 Attempt any TWO.** **12**
- a) Explain the four-quadrant chopper control of dc motor.
  - b) What is the advantage of AC motor over DC motors for EV applications?
  - c) What is its typical value for Induction Motors used in HEV applications?

**Section - II**

- Q.4 Attempt any FOUR.** **16**
- a) Explain Field oriented control of induction machines theory using DC drive analogy.
  - b) Justify why induction motor mature technology among commutator less motor drives.
  - c) With a neat graph(s) discuss in detail about the power and torque characteristics of various motors suitable for EV application.
  - d) Explain Various Control Strategy used in Electric Vehicle.
  - e) Discuss various electric drive train topologies.
- Q.5 Attempt any TWO.** **12**
- a) Describe construction and working principle of separately excited DC motor its single phase and three phase converters with the performance parameter, characteristics, operational waveform and with freewheeling Diode scheme.
  - b) What is mean by time control ratio and frequency modulation system?
  - c) Comment on the suitability of DC and AC machines for electric vehicle applications.

**T.Y (B.Tech.) (Sem - I) (New) (CBCS) Examination: Oct/Nov-2022**  
**ELECTRICAL ENGINEERING**

**Electric Motors and Controls for Electric Vehicle**

Day & Date: Thursday, 16-02-2023  
 Time: 10:00 AM To 01:00 PM

Max. Marks: 70

- Instructions:** 1) Q. No. 1 is compulsory and should be solved in first 30 minutes in Answer Book. Page No.3 (starting page of the Answer Book). Each question carry one mark.  
 2) Don't forget to mention Question Paper Set (P/Q/R/S) at the top of the same page.  
 3) Figures to the right indicates full marks.

**MCQ/Objective Type Questions**

Duration: 30 Minutes

Marks: 14

**Q.1 Choose the correct alternatives from the options. 14**

- 1) Electric motors are ideal for vehicular applications because of \_\_\_\_\_.
  - a) The torque speed characteristics
  - b) The VI characteristics
  - c) The Pd characteristics
  - d) The alpha delta characteristics
- 2) Stator voltage control for speed control of induction motors is suitable for \_\_\_\_\_.
  - a) Fan and pump drives
  - b) Drive of a crane
  - c) Running it as generator
  - d) Constant load drive
- 3) In V/F control of a 3- Phase Induction Motor, if voltage is increased by 10%, in order to keep air gap flux constant, what is the % increment or decrement in frequency?
  - a) Frequency is decreased by 10%
  - b) Frequency is decreased by 20%
  - c) Frequency is increased by 10%
  - d) Frequency is increased by 20%
- 4) In a four -quadrant operation of an electric machine, the third operation is \_\_\_\_\_.
  - a) Forward motoring
  - b) Reverse braking
  - c) Forward braking
  - d) Reverse motoring
- 5) Which of the following is used to build a electric drive?
  - a) Source
  - b) Motor
  - c) Control unit
  - d) All of the mentioned
- 6) Which of the following is/are components of an electric drive?
  - a) Control unit and Power Modulator
  - b) Electric Motor and Control System
  - c) Input Command
  - d) Sensing Device and Electric Motor

- 7) Which of the following exhibits linearly rising load torque characteristics?
- a) Rolling Mills
  - b) Fan load
  - c) Separately excited de generator connected to the resistive load
  - d) Sensed signal
- 8) Type-A chopper is used for obtaining which type of mode?
- a) Reverse motoring mode
  - b) Motoring mode
  - c) Reverse regenerative braking mode
  - d) Regenerative braking mode
- 9) The selection of an electric motor for any application depends on which of the following factors?
- a) Electrical characteristics
  - b) Mechanical characteristics
  - c) Size and rating of motors
  - d) All of the above
- 10) Which of the following devices should be used as a switch for high power and high voltage application?
- a) TRIAC
  - b) Thyristor
  - c) GTO
  - d) MOSFET
- 11) The most suitable control-motor application is \_\_\_\_.
- a) AC one-phase induction motor
  - b) DC shunt motor
  - c) AC shunt motor
  - d) DC separately motor
- 12) Which of these is the purpose of power-split device?
- a) To split Electrical Energy into Mechanical Energy
  - b) To allow both the engine and Electric motor to propel the vehicle
  - c) To recharge the battery while braking
  - d) To recharge the brakes while driving
- 13) Which starting method is the best method in Induction motor?
- a) Direct online starting
  - b) Reactance starting
  - c) Star-Delta starting
  - d) Autotransformer starting
- 14) The Field Oriented Control (FOC) enables the induction machine being controlled alike the \_\_\_\_.
- a) Separately excited DC Machine
  - b) Permanent magnet DC machine
  - c) Switched reluctance machine Option
  - d) Stepper motor

**Electric Motors and Controls for Electric Vehicle**

Day & Date: Thursday, 16-02-2023  
 Time: 10:00 AM To 01:00 PM

Max. Marks: 56

**Instructions:** 1) All questions are compulsory.  
 2) Figures to the right indicates full marks.

**Section – I**

**Q.2 Attempt any FOUR.** **16**

- a) Draw and explain the block diagram of switched reluctance motor drive system.
- b) With neat diagram explain brushless DC Motor.
- c) Explain the two-quadrant operation of chopper DC motor drive with suitable waveforms for electric vehicle.
- d) Explain the configuration of v/f-controlled induction motor drive with field-weakening mode and constant-torque mode.
- e) Explain briefly the electrical and mechanical constraints to be considered while sizing an electrical machine for EV.

**Q.3 Attempt any TWO.** **12**

- a) Explain the four-quadrant chopper control of dc motor.
- b) What is the advantage of AC motor over DC motors for EV applications?
- c) What is its typical value for Induction Motors used in HEV applications?

**Section - II**

**Q.4 Attempt any FOUR.** **16**

- a) Explain Field oriented control of induction machines theory using DC drive analogy.
- b) Justify why induction motor mature technology among commutator less motor drives.
- c) With a neat graph(s) discuss in detail about the power and torque characteristics of various motors suitable for EV application.
- d) Explain Various Control Strategy used in Electric Vehicle.
- e) Discuss various electric drive train topologies.

**Q.5 Attempt any TWO.** **12**

- a) Describe construction and working principle of separately excited DC motor its single phase and three phase converters with the performance parameter, characteristics, operational waveform and with freewheeling Diode scheme.
- b) What is mean by time control ratio and frequency modulation system?
- c) Comment on the suitability of DC and AC machines for electric vehicle applications.

S

**T.Y (B.Tech.) (Sem - I) (New) (CBCS) Examination: Oct/Nov-2022**  
**ELECTRICAL ENGINEERING**  
**Electric Motors and Controls for Electric Vehicle**

Day & Date: Thursday, 16-02-2023  
 Time: 10:00 AM To 01:00 PM

Max. Marks: 56

**Instructions:** 1) All questions are compulsory.  
 2) Figures to the right indicates full marks.

**Section – I**

- Q.2 Attempt any FOUR. 16**
- Draw and explain the block diagram of switched reluctance motor drive system.
  - With neat diagram explain brushless DC Motor.
  - Explain the two-quadrant operation of chopper DC motor drive with suitable waveforms for electric vehicle.
  - Explain the configuration of v/f-controlled induction motor drive with field-weakening mode and constant-torque mode.
  - Explain briefly the electrical and mechanical constraints to be considered while sizing an electrical machine for EV.
- Q.3 Attempt any TWO. 12**
- Explain the four-quadrant chopper control of dc motor.
  - What is the advantage of AC motor over DC motors for EV applications?
  - What is its typical value for Induction Motors used in HEV applications?

**Section - II**

- Q.4 Attempt any FOUR. 16**
- Explain Field oriented control of induction machines theory using DC drive analogy.
  - Justify why induction motor mature technology among commutator less motor drives.
  - With a neat graph(s) discuss in detail about the power and torque characteristics of various motors suitable for EV application.
  - Explain Various Control Strategy used in Electric Vehicle.
  - Discuss various electric drive train topologies.
- Q.5 Attempt any TWO. 12**
- Describe construction and working principle of separately excited DC motor its single phase and three phase converters with the performance parameter, characteristics, operational waveform and with freewheeling Diode scheme.
  - What is mean by time control ratio and frequency modulation system?
  - Comment on the suitability of DC and AC machines for electric vehicle applications.

**Economics**

Day & Date: Monday, 20-02-2023  
 Time: 10:00 AM To 12:00 PM

Max. Marks: 50

- Instructions:** 1) Q. No. 1 is compulsory. It should be solved in the first 20 minutes in answer book. Page no 03 (Starting page of the Answer Book). Each question carries one mark.  
 2) Don't forget to Mention question paper set (P/Q/R/S) on top of page.  
 3) Figures to the right indicates full marks

**MCQ/Objective Type Questions**

Duration: 20 Minutes

Marks:10

**Q.1 Choose the correct alternatives from the given options. 10**

- 1) Microeconomic theory deals with \_\_\_\_\_.
  - a) Economic behavior of individual economic decision-making units
  - b) Economy as whole
  - c) Trade relations
  - d) Economic growth of the society
- 2) In a mixed economy which sector (s) is / are found \_\_\_\_\_.
  - a) Private only
  - b) Public only
  - c) None
  - d) Both (a) public and (b) private
- 3) Who is known as father of economics?
  - a) Adam Smith
  - b) Prof. A. Samuelson
  - c) Alfred Marshall
  - d) J. R. Hicks
- 4) Which of these is an economic activity?
  - a) Father teaching his son at home instead of spending on coaching
  - b) A housewife making food for the family on her own
  - c) A hair dresser doing hair cut designing on payment
  - d) A singer giving a show on his son's wedding anniversary
- 5) Market system means: \_\_\_\_\_.
  - a) Socialism
  - b) Capitalism
  - c) A place where goods are traded
  - d) All of the above
- 6) Micro and Macro are not two independent approaches to economic analysis but they are complementary to each other.
  - a) False
  - b) True
  - c) Partly true
  - d) Partly False
- 7) Variable factor means those factors of production \_\_\_\_\_.
  - a) which can be only changed in the long run
  - b) which can be changed in the short run
  - c) which can be never be changed
  - d) All of the above

- 8)** Which one of the following is not the function of money?
- a) Medium of exchange
  - b) Measure of Happiness
  - c) Standard of deferred payment
  - d) Store of value
- 9)** Which one of the following is the objective of the RBI?
- a) To maintain term deposits of the households
  - b) To ensure price stability
  - c) To arrange loans for the businessmen
  - d) None of the above
- 10)** Which one of the following cost can never become zero?
- |                  |                  |
|------------------|------------------|
| a) Average cost  | b) Fixed cost    |
| c) Marginal cost | d) Variable cost |

Set **P**

**F.Y (B. Tech) (Sem-I) (New) (CBCS) Examination: Oct/Nov-2022**  
**Engineering Mathematics – I**

Day & Date: Monday, 13-03-2023  
 Time: 10:00 AM To 01:00 PM

Max. Marks: 56

- Instructions:** 1) All question are compulsory.  
 2) Use of non-programable calculator is allowed.  
 3) Figures to right indicate full marks.

**Section – I**

**Q.2 Attempt any Three question from the following.** **09**

- a) Find the nth derivative of  $y = \sin x \cos x \cos 2x$
- b) Verify Cayley Hamilton theorem for  $A$  where  $A = \begin{pmatrix} 1 & 2 & 3 \\ 2 & -1 & 4 \\ 3 & 1 & -1 \end{pmatrix}$
- c) Investigate for what value of  $\mu$  and  $\lambda$  the equations.  
 $2x + 3y + 5z = 9$ ,  $7x + 3y - 2z = 8$ ,  $2x + 3y + \lambda z = \mu$  will have  
 (a) no solution, (b) infinite solution, (c) unique solution
- d) Expand  $x^5 - 5x^4 + 6x^3 - 7x^2 + 8x - 9$  in powers of  $(x - 1)$ .
- e) Expand  $\log \sec x$  in powers of  $x$  up to  $x^4$

**Q.3 Attempt any Three question from the following.** **09**

- a) Find the nth derivative of  $y = \frac{x-1}{x+1}$
- b) Prove that  $\tan^{-1} \left( \frac{\sqrt{1+x^2}-1}{x} \right) = \frac{1}{2} \left[ x + \frac{x^3}{3} + \frac{x^5}{5} + \dots \right]$
- c) Find the nth derivative of  $y = e^{-x} \cdot x \cdot \cos x$
- d) Examine the vector for Linear Dependence and Independence  
 $[1, 1, 1]$ ,  $[1, 2, 3]$ ,  $[2, 3, 8]$
- e) Find the rank of the matrix by reducing and it to Normal form  

$$\begin{pmatrix} 3 & 2 & 1 & 4 \\ -1 & 3 & 2 & 2 \\ 2 & 5 & 3 & 6 \\ 5 & 7 & 4 & 10 \end{pmatrix}$$

**Q.4 Attempt any Two questions from the following.** **10**

- a) If  $\cos^{-1} \left( \frac{y}{b} \right) = \log \left( \frac{x}{n} \right)^n$  then prove that  
 $x^2 y_{n+2} + (2n+1)xy_{n+1} + 2n^2 y_n = 0$
- b) Find the Eigen values and Eigen vector for the smallest Eigen value for  

$$A = \begin{pmatrix} 8 & -8 & -2 \\ 4 & -3 & -2 \\ 3 & -4 & 1 \end{pmatrix}$$
- c) Find the value of  $a, b, c$  if  

$$\lim_{x \rightarrow 0} \frac{x(a + b \cos x) - c \sin x}{x^5} = 1$$

## Section – II

**Q.5 Attempt any three questions from the following.** **09**

- a) Prove that  $\text{curl}(\vec{a} \times \vec{r}) = 2\vec{a}$
- b) Find the directional derivative of  $\phi = x^2y \cos z$  at  $(1, 2, \pi/2)$  in the direction of  $2i + 3j + 2k$ .
- c) If  $u = \log(\tan x + \tan y + \tan z)$   
Find the value of  $\sin 2x \frac{\partial u}{\partial x} + \sin 2y \frac{\partial u}{\partial y} + \sin 2z \frac{\partial u}{\partial z}$
- d) If  $x^y = y^x$  find  $\frac{dy}{dx}$
- e) Find the percentage error in  $g$  if the percentage errors in  $l$  and  $T$  are both  $-1$  for case of simple pendulum and the relation  $T = \frac{1}{2\pi} \sqrt{\frac{l}{g}}$

**Q.6 Attempt any three questions from the following.** **09**

- a) If  $u = F(e^{x-y}, e^{y-z}, e^{z-x})$  Prove that  $u_x + u_y + u_z = 0$
- b) If  $x = a \cosh u \cos v, y = a \sinh u \sin v$  find  $\frac{\partial(x,y)}{\partial(u,v)}$   
(Note: Derivative of  $\cosh x$  is  $\sinh x$ , derivative of  $\sinh x$  is  $\cosh x$  w.r.t.  $x$ )
- c) Find the angle between the normal to the surfaces  $x^2y + z = 3$  and  $x \log z - y^2 + 4 = 0$  at  $(-1, 2, 1)$ .
- d) A particle moves along the curve  $\vec{r} = (t^3 - 4t)i + (t^2 + 4t)j + (8t^2 - 3t^3)k$  where  $t$  denotes time. Show that the magnitudes of acceleration along the tangent and normal at  $t = 2$  are 16 and  $2\sqrt{73}$  respectively.
- e) Prove that  $\nabla \frac{1}{r^3} = \frac{-3\vec{r}}{r^5}$

**Q.7 Attempt any two questions from the following.** **10**

- a) If  $u = \sin^{-1} \left[ \frac{x^{1/4} + y^{1/4}}{x^{1/5} + y^{1/5}} \right]$  then find the values of  $x \frac{\partial u}{\partial x} + y \frac{\partial u}{\partial y}$  and  $x^2 \frac{\partial^2 u}{\partial x^2} + 2xy \frac{\partial^2 u}{\partial x \partial y} + y^2 \frac{\partial^2 u}{\partial y^2}$
- b) Find the stationary value of  $xy(1 - x - y)$
- c) Prove that  $\vec{F} = (x^2 - yz)i + (y^2 - zx)j + (z^2 - xy)k$  is irrotational. Find the function  $\phi$  such that  $\vec{F} = \nabla \phi$ .

**Engineering Mathematics – I**

Day & Date: Monday, 13-03-2023  
 Time: 10:00 AM To 01:00 PM

Max. Marks: 70

- Instructions:** 1) Q. No. 1 is compulsory. It should be solved in the first 30 minutes in answer book. Page no 03 (Starting page of the Answer Book). Each question carries one mark.  
 2) Don't forget to Mention question paper set (P/Q/R/S) on top of page.  
 3) Figures to the right indicates full marks.  
 4) Use of Non-programable calculator is allowed.

**MCQ/Objective Type Questions**

Duration: 30 Minutes

Marks: 14

**Q.1 Choose the correct alternatives.****14**

- 1)  $\nabla \times \vec{r} = ?$ 
  - a)  $i + j + k$
  - b) 0
  - c) 3
  - d)  $\sqrt{3}$
- 2) If  $\vec{a}$  is constant vector and  $\vec{r} = xi + yj + zk$  then  $\text{grad}(\vec{a} \cdot \vec{r}) = \underline{\hspace{2cm}}$ .
  - a)  $2\vec{a}$
  - b)  $\vec{a}$
  - c)  $\vec{r}$
  - d)  $2\vec{r}$
- 3) If  $u = e^{xy^2 z^3}$  then  $\frac{\partial u}{\partial z} = \underline{\hspace{2cm}}$ .
  - a)  $e^{xy^2 z^3} xy^2 z^3$
  - b)  $e^{xy^2 z^3} y^2 z^3$
  - c)  $e^{xy^2 z^3} 3xy^2 z^2$
  - d)  $e^{xy^2 z^3} 2xyz^3$
- 4) If  $g(x, y, z) = 0$  then the value of  $\frac{\partial z}{\partial x} = \underline{\hspace{2cm}}$ .
  - a)  $\frac{g_x}{g_z}$
  - b)  $\frac{g_z}{g_x}$
  - c)  $-\frac{g_z}{g_x}$
  - d)  $-\frac{g_x}{g_z}$
- 5) If  $u = \sin x, v = \cos y$  then the value of  $\underline{\hspace{2cm}}$ .
  - a)  $-\sin y \cos x$
  - b)  $-\sin x \cos y$
  - c)  $-\sin x \sin y$
  - d)  $-\cos x \cos y$
- 6) The percentage error in the area of a square when an error of 1% is made in measuring its length is  $\underline{\hspace{2cm}}$ .
  - a) 1
  - b) 2
  - c) 3
  - d) 0
- 7) Directional derivative is maximum along  $\underline{\hspace{2cm}}$ .
  - a) Any unit vector
  - b) Co-ordinate axes
  - c) Tangent to the surface
  - d) Normal to the surface
- 8) If  $y = \frac{x^n - 1}{x - 1}$  then  $y_n = \underline{\hspace{2cm}}$ .
  - a) 0
  - b)  $n!$
  - c) 1
  - d)  $(n - 1)!$

- 9) If  $y = \cos^2 x$  then  $y_n =$  \_\_\_\_\_.  
 a)  $-2^{n-1} \cos\left(2x + \frac{n\pi}{2}\right)$       b)  $2^{n-1} \cos\left(2x + \frac{n\pi}{2}\right)$   
 c)  $2^{n-1} \sin\left(2x + \frac{n\pi}{2}\right)$       d)  $2^{n+1} \sin\left(\frac{n\pi}{2}\right)$
- 10) If  $L = \lim_{n \rightarrow \infty} x^2 e^{-x}$  then  $L =$  \_\_\_\_\_.  
 a) 0      b) 1  
 c) 2      d) -2
- 11) If  $y = \log x$  then  $y_n =$  \_\_\_\_\_.  
 a)  $\frac{(-1)^n(n)!}{x^n}$       b)  $\frac{(-1)^n(n-1)!}{x^n}$   
 c)  $\frac{(-1)^{n-1}(n)!}{x^{n+1}}$       d)  $\frac{(-1)^{n-1}(n-1)!}{x^n}$
- 12) The expansion of  $y(x+h)$  in powers of  $x$  is \_\_\_\_\_.  
 a)  $y(x) + hy'(x) + \frac{h^2}{2!}y''(x) + \dots$       b)  $y(h) + xy'(h) + \frac{x^2}{2!}y''(h) + \dots$   
 c)  $y(h) - xy'(h) + \frac{x^2}{2!}y''(h) - \dots$       d)  $y(x) - hy'(x) + \frac{h^2}{2!}y''(x) - \dots$
- 13) If  $a \neq 0$  then the rank of matrix A is where  $A = \begin{pmatrix} a & a & a \\ a & a & a \\ a & a & a \end{pmatrix}$   
 a) 2      b) a  
 c) 0      d) 1
- 14) If 1, 1, 8 are eigen values and 5, 2, K are diagonal elements of matrix  $[A]_{3 \times 3}$ , then the value of K equals \_\_\_\_\_.  
 a) 0      b) 1  
 c) 2      d) 3

### MCQ/Objective Type Questions

Duration: 30 Minutes

Marks: 14

**Q.1 Choose the correct alternatives.**

14

- 1) If  $g(x, y, z) = 0$  then the value of  $\frac{\partial z}{\partial x} = \underline{\hspace{2cm}}$ .

a)  $\frac{g_x}{g_z}$                       b)  $\frac{g_z}{g_x}$

c)  $-\frac{g_z}{g_x}$                       d)  $-\frac{g_x}{g_z}$
- 2) If  $u = \sin x, v = \cos y$  then the value of  $\underline{\hspace{2cm}}$ .

a)  $-\sin y \cos x$                       b)  $-\sin x \cos y$

c)  $-\sin x \sin y$                       d)  $-\cos x \cos y$
- 3) The percentage error in the area of a square when an error of 1% is made in measuring its length is  $\underline{\hspace{2cm}}$

a) 1                                  b) 2

c) 3                                  d) 0
- 4) Directional derivative is maximum along  $\underline{\hspace{2cm}}$

a) Any unit vector                      b) Co-ordinate axes

c) Tangent to the surface                      d) Normal to the surface
- 5) If  $y = \frac{x^{n-1}}{x-1}$  then  $y_n = \underline{\hspace{2cm}}$ .

a) 0                                  b)  $n!$

c) 1                                  d)  $(n - 1)!$
- 6) If  $y = \cos^2 x$  then  $y_n = \underline{\hspace{2cm}}$ .

a)  $-2^{n-1} \cos\left(2x + \frac{n\pi}{2}\right)$                       b)  $2^{n-1} \cos\left(2x + \frac{n\pi}{2}\right)$

c)  $2^{n-1} \sin\left(2x + \frac{n\pi}{2}\right)$                       d)  $2^{n+1} \sin\left(\frac{n\pi}{2}\right)$
- 7) If  $L = \lim_{n \rightarrow \infty} x^2 e^{-x}$  then  $L = \underline{\hspace{2cm}}$ .

a) 0                                  b) 1

c) 2                                  d) -2

Find the value of  $\sin 2x \frac{\partial u}{\partial x} + \sin 2y \frac{\partial u}{\partial y} + \sin 2z \frac{\partial u}{\partial z}$
- d) If  $x^y = y^x$  find  $\frac{dy}{dx}$
- e) Find the percentage error in  $g$  if the percentage errors in  $l$  and  $T$  are both  $-1$  for case of simple pendulum and the relation  $T = \frac{1}{2\pi} \sqrt{\frac{l}{g}}$

**Q.6 Attempt any three questions from the following.** **09**

- a) If  $u = F(e^{x-y}, e^{y-z}, e^{z-x})$  Prove that  $u_x + u_y + u_z = 0$
- b) If  $x = a \cosh u \cos v$ ,  $y = a \sinh u \sin v$  find  $\frac{\partial(x,y)}{\partial(u,v)}$   
(Note: Derivative of  $\cosh x$  is  $\sinh x$ , derivative of  $\sinh x$  is  $\cosh x$  w.r.t.  $x$ )
- c) Find the angle between the normal to the surfaces  $x^2y + z = 3$  and  $x \log z - y^2 + 4 = 0$  at  $(-1, 2, 1)$ .
- d) A particle moves along the curve  $\vec{r} = (t^3 - 4t)i + (t^2 + 4t)j + (8t^2 - 3t^3)k$  where  $t$  denotes time. Show that the magnitudes of acceleration along the tangent and normal at  $t = 2$  are 16 and  $2\sqrt{73}$  respectively.
- e) Prove that  $\nabla \frac{1}{r^3} = \frac{-3\vec{r}}{r^5}$

**Q.7 Attempt any two questions from the following.** **10**

- a) If  $u = \sin^{-1} \left[ \frac{x^{1/4} + y^{1/4}}{x^{1/5} + y^{1/5}} \right]$  then find the values of  $x \frac{\partial u}{\partial x} + y \frac{\partial u}{\partial y}$  and  $x^2 \frac{\partial^2 u}{\partial x^2} + 2xy \frac{\partial^2 u}{\partial x \partial y} + y^2 \frac{\partial^2 u}{\partial y^2}$
- b) Find the stationary value of  $xy(1 - x - y)$
- c) Prove that  $\vec{F} = (x^2 - yz)i + (y^2 - zx)j + (z^2 - xy)k$  is irrotational. Find the function  $\phi$  such that  $\vec{F} = \nabla \phi$ .

**Seat  
No.**

## Max. Marks: 70

4) Use of Non-programable calculator is allowed.

Marks: 14

14

If  $a \neq 0$  then the rank of matrix A is where  $A = \begin{pmatrix} a & a & a \\ a & a & a \\ a & a & a \end{pmatrix}$

- a) 2                      b) a  
c) 0                        d) 1

2) If 1, 1, 8 are eigen values and 5, 2,  $K$  are diagonal elements of matrix  $[A]_{3 \times 3}$ , then the value of  $K$  equals \_\_\_\_\_

- a) 0                                          b) 1  
c) 2                                          d) 3

**3)**  $\nabla \times \bar{r} = ?$

- a)  $i + j + k$   
c) 3
- b) 0  
d)  $\sqrt{3}$

4) If  $\bar{a}$  is constant vector and  $\bar{r} = xi + yj + zk$  then  $\text{grad}(\bar{a} \cdot \bar{r}) = \underline{\hspace{2cm}}$ .

- a)  $2\bar{a}$   
c)  $\bar{r}$

5) If  $u = e^{xy^2 z^3}$  then  $\frac{\partial u}{\partial z} = \underline{\hspace{2cm}}$ .

- a)  $xy^2z^3$       b)  $xy^2z^3y^2z^3$   
c)  $xy^2z^33xy^2z^2$       d)  $xy^2z^32xyz^3$

**6)** If  $g(x, y, z) = 0$  then the value of  $\frac{\partial z}{\partial x} = \underline{\hspace{2cm}}$ .

- a)  $\frac{g_x}{g_z}$
- b)  $\frac{g_z}{g_x}$
- c)  $-\frac{g_z}{g_x}$
- d)  $-\frac{g_x}{g_z}$

7) If  $u = \sin x, v = \cos y$  then the value of \_\_\_\_\_.

- a)  $-\sin y \cos x$                       b)  $-\sin x \cos y$   
c)  $-\sin x \sin y$                       d)  $-\cos x \cos y$

**F.Y (B. Tech) (Sem-I) (New) (CBCS) Examination: Oct/Nov-2022**  
**Engineering Mathematics – I**

Day & Date: Monday, 13-03-2023  
 Time: 10:00 AM To 01:00 PM

Max. Marks: 56

- Instructions:** 1) All question are compulsory.  
 2) Use of non-programable calculator is allowed.  
 3) Figures to right indicate full marks.

**Section – I**

**Q.2 Attempt any Three question from the following.** **09**

- a) Find the nth derivative of  $y = \sin x \cos x \cos 2x$
- b) Verify Cayley Hamilton theorem for  $A$  where  $A = \begin{pmatrix} 1 & 2 & 3 \\ 2 & -1 & 4 \\ 3 & 1 & -1 \end{pmatrix}$
- c) Investigate for what value of  $\mu$  and  $\lambda$  the equations.  
 $2x + 3y + 5z = 9$ ,  $7x + 3y - 2z = 8$ ,  $2x + 3y + \lambda z = \mu$  will have  
 (a) no solution, (b) infinite solution, (c) unique solution
- d) Expand  $x^5 - 5x^4 + 6x^3 - 7x^2 + 8x - 9$  in powers of  $(x - 1)$ .
- e) Expand  $\log \sec x$  in powers of  $x$  up to  $x^4$

**Q.3 Attempt any Three question from the following.** **09**

- a) Find the nth derivative of  $y = \frac{x-1}{x+1}$
- b) Prove that  $\tan^{-1} \left( \frac{\sqrt{1+x^2}-1}{x} \right) = \frac{1}{2} \left[ x + \frac{x^3}{3} + \frac{x^5}{5} + \dots \right]$
- c) Find the nth derivative of  $y = e^{-x} \cdot x \cdot \cos x$
- d) Examine the vector for Linear Dependence and Independence  
 $[1, 1, 1]$ ,  $[1, 2, 3]$ ,  $[2, 3, 8]$
- e) Find the rank of the matrix by reducing and it to Normal form  

$$\begin{pmatrix} 3 & 2 & 1 & 4 \\ -1 & 3 & 2 & 2 \\ 2 & 5 & 3 & 6 \\ 5 & 7 & 4 & 10 \end{pmatrix}$$

**Q.4 Attempt any Two questions from the following.** **10**

- a) If  $\cos^{-1} \left( \frac{y}{b} \right) = \log \left( \frac{x}{n} \right)^n$  then prove that  
 $x^2 y_{n+2} + (2n+1)xy_{n+1} + 2n^2 y_n = 0$
- b) Find the Eigen values and Eigen vector for the smallest Eigen value for  
 $A = \begin{pmatrix} 8 & -8 & -2 \\ 4 & -3 & -2 \\ 3 & -4 & 1 \end{pmatrix}$
- c) Find the value of  $a, b, c$  if  

$$\lim_{x \rightarrow 0} \frac{x(a + b \cos x) - c \sin x}{x^5} = 1$$

## Section – II

**Q.5 Attempt any three questions from the following.** 09

- a) Prove that  $\text{curl}(\vec{a} \times \vec{r}) = 2\vec{a}$
- b) Find the directional derivative of  $\phi = x^2y \cos z$  at  $(1, 2, \pi/2)$  in the direction of  $2i + 3j + 2k$ .
- c) If  $u = \log(\tan x + \tan y + \tan z)$   
Find the value of  $\sin 2x \frac{\partial u}{\partial x} + \sin 2y \frac{\partial u}{\partial y} + \sin 2z \frac{\partial u}{\partial z}$
- d) If  $x^y = y^x$  find  $\frac{dy}{dx}$
- e) Find the percentage error in  $g$  if the percentage errors in  $l$  and  $T$  are both  $-1$  for case of simple pendulum and the relation  $T = \frac{1}{2\pi} \sqrt{\frac{l}{g}}$

**Q.6 Attempt any three questions from the following.** 09

- a) If  $u = F(e^{x-y}, e^{y-z}, e^{z-x})$  Prove that  $u_x + u_y + u_z = 0$
- b) If  $x = a \cosh u \cos v, y = a \sinh u \sin v$  find  $\frac{\partial(x,y)}{\partial(u,v)}$   
(Note: Derivative of  $\cosh x$  is  $\sinh x$ , derivative of  $\sinh x$  is  $\cosh x$  w.r.t.  $x$ )
- c) Find the angle between the normal to the surfaces  $x^2y + z = 3$  and  $x \log z - y^2 + 4 = 0$  at  $(-1, 2, 1)$ .
- d) A particle moves along the curve  $\vec{r} = (t^3 - 4t)i + (t^2 + 4t)j + (8t^2 - 3t^3)k$  where  $t$  denotes time. Show that the magnitudes of acceleration along the tangent and normal at  $t = 2$  are 16 and  $2\sqrt{73}$  respectively.
- e) Prove that  $\nabla \frac{1}{r^3} = \frac{-3\vec{r}}{r^5}$

**Q.7 Attempt any two questions from the following.** 10

- a) If  $u = \sin^{-1} \left[ \frac{x^{1/4} + y^{1/4}}{x^{1/5} + y^{1/5}} \right]$  then find the values of  $x \frac{\partial u}{\partial x} + y \frac{\partial u}{\partial y}$  and  $x^2 \frac{\partial^2 u}{\partial x^2} + 2xy \frac{\partial^2 u}{\partial x \partial y} + y^2 \frac{\partial^2 u}{\partial y^2}$
- b) Find the stationary value of  $xy(1 - x - y)$
- c) Prove that  $\vec{F} = (x^2 - yz)i + (y^2 - zx)j + (z^2 - xy)k$  is irrotational. Find the function  $\phi$  such that  $\vec{F} = \nabla \phi$ .

Max. Marks: 70

**Instructions:** 1) Q. No. 1 is compulsory. It should be solved in the first 30 minutes in answer book. Page no 03 (Starting page of the Answer Book). Each question carries one mark.

2) Don't forget to Mention question paper set (P/Q/R/S) on top of page.

**Constants:** 1) Avogadro's no.,  $N = 6.02 \times 10^{26}$  / k.mol.

2) Velocity of light,  $c = 3 \times 10^8$  m/sec.

3) Charge of electron,  $e = 1.6 \times 10^{-19} \text{ C}$ .

### MCQ/Objective Type Questions

Duration: 30 Minutes

Marks: 14

**Q.1 Choose the correct alternatives from the options.**

14

- 1) Donor type semiconductor is formed by adding impurity of valency  
a) 5  
b) 4  
c) 3  
d) 6
- 2) The atomic radius of BCC lattice is \_\_\_\_\_.  
a)  $\frac{\sqrt{2}}{4}a$   
b)  $\frac{\sqrt{3}}{4}a$   
c)  $a/2$   
d)  $a/4$
- 3) A plane parallel to one of the co-ordinate axes has an intercept of \_\_\_\_\_.  
a) 1  
b) 0  
c)  $\infty$   
d) none of these
- 4) The ultrasonic wave exhibit \_\_\_\_\_.  
a) Negligible diffraction effect  
b) Large diffraction effect  
c) Very long wavelength  
d) Slow speed than sound waves
- 5) Optimum reverberation time for speech is \_\_\_\_\_.  
a) 0.5 to 1 second  
b) 0 to 1 second  
c) 1 to 2 second  
d) Above 5 second
- 6) The Lorentz transformation equation for  $t'$  co-ordinate from  $s$  to  $s'$  \_\_\_\_\_.  
a) 
$$t' = \frac{(t + v \cdot x)}{\sqrt{1 - \frac{v^2}{c^2}}}$$
  
b) 
$$t' = \frac{\left(t - \frac{v \cdot x}{c^2}\right)}{\sqrt{1 - \frac{v^2}{c^2}}}$$
  
c) 
$$t = \frac{(t - v \cdot x)}{\sqrt{1 - \frac{v^2}{c^2}}}$$
  
d) 
$$t' = \frac{\left(t - \frac{v \cdot x}{c^2}\right)}{\sqrt{1 + \frac{v^2}{c^2}}}$$

- 7) Einstein's mass energy relation ( $E = mc^2$ ) shows that \_\_\_\_\_.  
a) mass disappears to reappear as energy  
b) energy disappears to reappear as mass  
c) mass and energy are two different forms of the same entity  
d) all the above statements are correct
- 8) The resolving power of a grating is \_\_\_\_\_.  
a)  $\lambda/d\lambda$   
b)  $d\lambda/\lambda$   
c)  $nNd\lambda$   
d)  $n(n + 1)$
- 9) The specific rotation of a substance is \_\_\_\_\_ concentration of solution.  
a) independent of  
b) directly proportional to  
c) inversely proportional to  
d) none of these
- 10) Stimulated absorption process is represented by equation \_\_\_\_\_.  
a)  $A^* \longrightarrow A + h\gamma$   
b)  $A^* + h\gamma \longrightarrow A + 2h\gamma$   
c)  $A + h\gamma \longrightarrow A^*$   
d)  $A^* + h\gamma \longrightarrow A + h\gamma$
- 11) LASER beam is \_\_\_\_\_.  
a) Highly directional  
b) Extremely bright  
c) Monochromatic  
d) All of these
- 12) The fractional refractive index change ( $\Delta$ ) is given by \_\_\_\_\_.  
a)  $\Delta = n_1 - n_2$   
b)  $\Delta = n_2 - n_1$   
c)  $\Delta = n_1 - n_2/n_1$   
d)  $\Delta = n_2 - n_1/n_1$
- 13) The acceptance cone of fibre is equal to \_\_\_\_\_.  
a) 2 x acceptance angle  
b) 3 x acceptance angle  
c) Acceptance angle  
d) None
- 14) The chirality of armchair CNT is \_\_\_\_\_.  
a) (a, b)  
b) (a, a)  
c) (a, 0)  
d) (0, b)

**F.Y. (B.Tech.) (Sem - I) (New) (CBCS) Examination: Oct/Nov-2022**  
**Engineering Physics**

Day & Date: Wednesday, 15-03-2023  
Time: 10:00 AM To 01:00 PM

Max. Marks: 56

**Instructions:** 1) Figures to the right indicate full marks.  
2) All questions are compulsory.

**Section – I**

**Q.2 Attempt any six of the following:** **18**

- a) Classify conductor, insulator and semiconductor on the basis of energy band structure.
- b) Explain with diagrams: Position of Fermi level in  
1) P-type and 2) N-type semiconductors
- c) Define atomic radius and obtain its values for SC and BCC.
- d) State: Properties of ultrasonic waves.
- e) Derive an expression for Length contraction.
- f) Derive the relation  $E = mc^2$
- g) Determine the lattice constant for FCC lead crystal of radius  $1.746\text{\AA}$ . Also find the spacing of  
1) (111) planes 2) (200) planes
- h) The reverberation time of a hall is 1.5 sec and the area of interior surface is  $3340\text{ m}^2$ . If the volume of the hall is  $12000\text{ m}^3$ . Find the absorption coefficient.

**Q.3 Attempt any two of the following:** **10**

- a) What is Hall effect? Derive the relation for Hall voltage ( $V_H$ ) and Hall coefficient ( $R_H$ ).
- b) Explain the term Miller indices. Derive the relation between lattice constant and interplanar spacing for cubic crystal.

$$d = \frac{a}{\sqrt{h^2 + k^2 + l^2}}$$

- c) State and explain the factors affecting the architectural acoustics and their remedies.
- d) 1) Calculate the density of copper. Given that copper has FCC structure, atomic weight 63.24 and lattice constant is  $3.61 \times 10^{-10}\text{m}$ .  
( $N = 6.02 \times 10^{26}/\text{k.mol.}$ )  
2) Copper has an FCC structure with lattice constant  $3.61\text{ \AA}$ . Calculate the radius of copper atom.

## Section – II

## Q.4 Attempt any six.

18

- a) Derive an expression for the resolving power of a plane diffraction grating.

$$\frac{\lambda}{d\lambda} = n.N$$

- b) State and Explain Malus law.  
 c) Explain in brief:  
     1) Population inversion  
     2) Pumping and  
     3) Metastable state  
 d) Write any **five** applications of laser in different fields.  
 e) Describe the principle (TIR) of optical fiber.  
 f) Explain three types of carbon nano tubes (CNTs).  
 g) In an optical fiber the core material has refractive index 1.6 and refractive index of clad material is 1.3. What is the value of critical angle? Also calculate the value of angle of acceptance.  
 h) What is the De Broglie wavelength of an electron that has a momentum of  $4.56 \times 10^{-27} \text{ kg.m/s}$ ? Given  $h = 6.63 \times 10^{-34} \text{ J.s}$

## Q.5 Attempt any two of the following:

10

- a) Obtain the expression for acceptance angle, acceptance cone, numerical aperture and fractional refractive index change of an optical fiber.  
 b) Explain in detail Davisson-Germer experiment.  
 c) 1) Determine the grating element of a grating if when illuminated with light of wavelength  $4000\text{\AA}$ , the second order spectrum is seen at an angle of  $26^\circ$   
     2) Calculate the specific rotation if the plane of polarization is turned through  $26.4^\circ$  traversing 20 cm. The length of 20% sugar solution.  
 d) Describe He-Ne laser with its construction and working.

**F.Y. (B.Tech.) (Sem - I) (New) (CBCS) Examination: Oct/Nov-2022**  
**Engineering Physics**

Day & Date: Wednesday, 15-03-2023  
Time: 10:00 AM To 01:00 PM

Max. Marks: 70

**Instructions:** 1) Q. No. 1 is compulsory. It should be solved in the first 30 minutes in answer book. Page no 03 (Starting page of the Answer Book). Each question carries one mark.  
2) Don't forget to Mention question paper set (P/Q/R/S) on top of page.

**Constants:** 1) Avogadro's no.,  $N = 6.02 \times 10^{26}$  / k.mol.  
2) Velocity of light,  $c = 3 \times 10^8$  m/sec.  
3) Charge of electron,  $e = 1.6 \times 10^{-19}$  C.

**MCQ/Objective Type Questions**

Duration: 30 Minutes

Marks: 14

**Q.1 Choose the correct alternatives from the options.**

**14**

- 1) LASER beam is \_\_\_\_\_.  
a) Highly directional  
b) Extremely bright  
c) Monochromatic  
d) All of these
- 2) The fractional refractive index change ( $\Delta$ ) is given by \_\_\_\_\_.  
a)  $\Delta = n_1 - n_2$   
b)  $\Delta = n_2 - n_1$   
c)  $\Delta = n_1 - n_2/n_1$   
d)  $\Delta = n_2 - n_1/n_1$
- 3) The acceptance cone of fibre is equal to \_\_\_\_\_.  
a) 2 x acceptance angle  
b) 3 x acceptance angle  
c) Acceptance angle  
d) None
- 4) The chirality of armchair CNT is \_\_\_\_\_.  
a) (a, b)  
b) (a, a)  
c) (a, 0)  
d) (0, b)
- 5) Donor type semiconductor is formed by adding impurity of valency \_\_\_\_\_.  
a) 5  
b) 4  
c) 3  
d) 6
- 6) The atomic radius of BCC lattice is \_\_\_\_\_.  
a)  $\frac{\sqrt{2}}{4}a$   
b)  $\frac{\sqrt{3}}{4}a$   
c)  $a/2$   
d)  $a/4$
- 7) A plane parallel to one of the co-ordinate axes has an intercept of \_\_\_\_\_.  
a) 1  
b) 0  
c)  $\infty$   
d) none of these
- 8) The ultrasonic wave exhibit \_\_\_\_\_.  
a) Negligible diffraction effect  
b) Large diffraction effect  
c) Very long wavelength  
d) Slow speed than sound waves

|---|

**F.Y. (B.Tech.) (Sem - I) (New) (CBCS) Examination: Oct/Nov-2022**  
**Engineering Physics**

Day & Date: Wednesday, 15-03-2023  
Time: 10:00 AM To 01:00 PM

Max. Marks: 56

**Instructions:** 1) Figures to the right indicate full marks.  
2) All questions are compulsory.

**Section – I**

**Q.2 Attempt any six of the following:** **18**

- a) Classify conductor, insulator and semiconductor on the basis of energy band structure.
- b) Explain with diagrams: Position of Fermi level in
  - 1) P-type and
  - 2) N-type semiconductors
- c) Define atomic radius and obtain its values for SC and BCC.
- d) State: Properties of ultrasonic waves.
- e) Derive an expression for Length contraction.
- f) Derive the relation  $E = mc^2$
- g) Determine the lattice constant for FCC lead crystal of radius  $1.746\text{\AA}$ . Also find the spacing of
  - 1) (111) planes
  - 2) (200) planes
- h) The reverberation time of a hall is 1.5 sec and the area of interior surface is  $3340\text{ m}^2$ . If the volume of the hall is  $12000\text{ m}^3$ . Find the absorption coefficient.

**Q.3 Attempt any two of the following:** **10**

- a) What is Hall effect? Derive the relation for Hall voltage ( $V_H$ ) and Hall coefficient ( $R_H$ ).
- b) Explain the term Miller indices. Derive the relation between lattice constant and interplanar spacing for cubic crystal.

$$d = \frac{a}{\sqrt{h^2 + k^2 + l^2}}$$

- c) State and explain the factors affecting the architectural acoustics and their remedies.
- d)
  - 1) Calculate the density of copper. Given that copper has FCC structure, atomic weight 63.24 and lattice constant is  $3.61 \times 10^{-10}\text{ m}$ .  
( $N = 6.02 \times 10^{26}/\text{k.mol.}$ )
  - 2) Copper has an FCC structure with lattice constant  $3.61\text{ \AA}$ . Calculate the radius of copper atom.

## Section – II

## Q.4 Attempt any six.

18

- a) Derive an expression for the resolving power of a plane diffraction grating.

$$\frac{\lambda}{d\lambda} = n.N$$

- b) State and Explain Malus law.  
 c) Explain in brief:  
     1) Population inversion  
     2) Pumping and  
     3) Metastable state  
 d) Write any **five** applications of laser in different fields.  
 e) Describe the principle (TIR) of optical fiber.  
 f) Explain three types of carbon nano tubes (CNTs).  
 g) In an optical fiber the core material has refractive index 1.6 and refractive index of clad material is 1.3. What is the value of critical angle? Also calculate the value of angle of acceptance.  
 h) What is the De Broglie wavelength of an electron that has a momentum of  $4.56 \times 10^{-27} \text{ kg.m/s}$ ? Given  $h = 6.63 \times 10^{-34} \text{ J.s}$

## Q.5 Attempt any two of the following:

10

- a) Obtain the expression for acceptance angle, acceptance cone, numerical aperture and fractional refractive index change of an optical fiber.  
 b) Explain in detail Davisson-Germer experiment.  
 c) 1) Determine the grating element of a grating if when illuminated with light of wavelength  $4000\text{\AA}$ , the second order spectrum is seen at an angle of  $26^\circ$   
     2) Calculate the specific rotation if the plane of polarization is turned through  $26.4^\circ$  traversing 20 cm. The length of 20% sugar solution.  
 d) Describe He-Ne laser with its construction and working.

**MCQ/Objective Type Questions**

Duration: 30 Minutes

Marks: 14

**Q.1 Choose the correct alternatives from the options.**

**14**

1) The Lorentz transformation equation for  $t'$  co-ordinate from  $s$  to  $s'$  \_\_\_\_\_.

a)  $t' = \frac{(t + v \cdot x)}{\sqrt{1 - \frac{v^2}{c^2}}}$

b)  $t' = \frac{(t - \frac{v \cdot x}{c^2})}{\sqrt{1 - \frac{v^2}{c^2}}}$

c)  $t = \frac{(t - v \cdot x)}{\sqrt{1 - \frac{v^2}{c^2}}}$

d)  $t' = \frac{(t - \frac{v \cdot x}{c^2})}{\sqrt{1 + \frac{v^2}{c^2}}}$

2) Einstein's mass energy relation ( $E = mc^2$ ) shows that \_\_\_\_\_.

- a) mass disappears to reappear as energy
- b) energy disappears to reappear as mass
- c) mass and energy are two different forms of the same entity
- d) all the above statements are correct

3) The resolving power of a grating is \_\_\_\_\_.

- a)  $\lambda/d\lambda$
- b)  $d\lambda/\lambda$
- c)  $nNd\lambda$
- d)  $n(n + 1)$

4) The specific rotation of a substance is \_\_\_\_\_ concentration of solution.

- a) independent of
- b) directly proportional to
- c) inversely proportional to
- d) none of these

5) Stimulated absorption process is represented by equation \_\_\_\_\_.

- a)  $A^* \longrightarrow A + h\gamma$
- b)  $A^* + h\gamma \longrightarrow A + 2h\gamma$
- c)  $A + h\gamma \longrightarrow A^*$
- d)  $A^* + h\gamma \longrightarrow A + h\gamma$

6) LASER beam is \_\_\_\_\_.

- a) Highly directional
- b) Extremely bright
- c) Monochromatic
- d) All of these

**MCQ/Objective Type Questions**

Duration: 30 Minutes

Marks: 14

**Q.1 Choose the correct alternatives from the options.**

**14**

- 1) Hardness in water is caused by the presence of:  
a) sodium chloride                      b) sodium carbonate  
c) calcium chloride                      d) potassium nitrate
- 2) Hard water may be softened by passing it through:  
a) limestone                              b) ion-exchange resin  
c) calgon                                      d) rock salt
- 3) A good lubricant should have:  
a) low viscosity index                      b) high viscosity index  
c) low fire point                              d) high volatility
- 4) Capacity of an oil to stick onto the surface of machine parts under conditions of heavy load, is called:  
a) volatility                                  b) oiliness  
c) acid value                                  d) flash point
- 5) During galvanic corrosion, the more noble metals acts as \_\_\_\_\_.  
a) anode                                      b) cathode  
c) anode as well as cathode                      d) corroding metal
- 6) Galvanizing is the process of coating iron with:  
a) Sn                                              b) Zn  
c) Cu                                              d) Ni
- 7) Highest percentage of carbon is present in:  
a) high carbon steel                      b) wrought iron  
c) cast iron                                      d) medium carbon steel
- 8) Glass used extensively for making superior laboratory apparatus is:  
a) soda glass                                  b) potash glass  
c) borosilicate glass                      d) flint glass
- 9) A good fuel should possess:  
a) low calorific value                      b) high ignition temperature  
c) high calorific value                      d) high ash content

Max. Marks: 56

Time: 10:00 AM To 01:00 PM

**Instructions:** 1) Figures to the right indicate full marks.  
2) All questions are compulsory.

**Section – I**

**Q.2 Attempt any Four.**

**16**

- a) A sample of water on analysis was found to contain the following impurities in mg/lit:

|                                    | <b>Amount</b> | <b>Mo. Wt.</b> |
|------------------------------------|---------------|----------------|
| Ca(HCO <sub>3</sub> ) <sub>2</sub> | 20.15         | 162            |
| Mg(HCO <sub>3</sub> ) <sub>2</sub> | 18.73         | 146            |
| CaSO <sub>4</sub>                  | 17.00         | 136            |
| MgCl <sub>2</sub>                  | 16.5          | 95             |

Calculate the temporary, permanent and total hardness of water in mg/lit.

- b) Define aeration Explain different types of aerators.  
c) Explain Ion exchange process for softening of hard water.  
d) Define following terms  
1) Viscosity  
2) Acid Value  
3) Fire point  
4) Aniline Point  
e) Explain Hydrogen evolution mechanism and oxygen absorption mechanism in electrochemical corrosion.  
f) Describe cathodic protection in corrosion control.

**Q.3 Attempt any Four**

**12**

- a) Define BOD. How it is determined. Explain its importance.  
b) Explain characteristics of batteries.  
c) Define Lubricant. Explain its functions  
d) 6 gm of an oil sample after saponification with 50 ml of N/2 alcoholic KOH solution and subsequent titration with N/2 HCl gave the titer value of 10 ml to phenolphthalein end point. A blank experiment was conducted without taking oil sample. On repeating same procedure gave a titer value of 50 ml. Calculate saponification value of an oil sample.  
e) Explain semisolid lubricants.  
f) Explain prevention of corrosion by galvanizing.

Section – II

**Q.4 Attempt any Four.**

16

- a) Define alloy. Explain purpose of alloying.
- b) During the determination of calorific value of a gaseous fuel by Boy's calorimeter, the following results were obtained:  
Volume of the gaseous fuel burnt at STP =  $0.11 \text{ m}^3$   
Weight of water used for cooling =  $34.2 \text{ Kg}$   
Weight of steam condensed =  $0.051 \text{ Kg}$   
Temperature of Inlet water =  $25.2^\circ\text{C}$   
Temperature of Outlet water =  $39.5^\circ\text{C}$   
Determine the gross and net calorific values of gaseous fuel.  
(Take latent heat of condensation of steam =  $587 \text{ kcal/kg}$ ).
- c) Explain construction and working of bomb calorimeter.
- d) Explain molding of plastics in to articles by following methods.
  - 1) Compression molding
  - 2) Injection molding
- e) Explain vulcanization of natural rubber. List advantages of vulcanized rubber?
- f) Define TGA. Explain instrumentation of TGA with diagram.

**Q.5 Attempt any Four.**

12

- a) Explain any three types of glass.
- b) Explain the characteristics of good fuels.
- c) Summarize advantages and disadvantages of biodiesel.
- d) Draw neat and labelled block diagram of GLC.
- e) Calculate Degree of polymerization of PVC having molecular weight 18750. (Mol. Wt. of vinyl chloride = 62.5)
- f) Calculate weight of  $\text{Na}_2\text{CO}_3$  required to prepare 0.4 N 500 ml solution. (Mol. Wt. of  $\text{Na}_2\text{CO}_3$  = 106)

### MCQ/Objective Type Questions

Duration: 30 Minutes

Marks: 14

**Q.1 Choose the correct alternatives from the options.**

14

- 1) Glass used extensively for making superior laboratory apparatus is:

  - a) soda glass
  - b) potash glass
  - c) borosilicate glass
  - d) flint glass
- 2) A good fuel should possess:

  - a) low calorific value
  - b) high ignition temperature
  - c) high calorific value
  - d) high ash content
- 3) The total quantity of heat liberated when unit mass (or volume) of a fuel is burnt completely is called its \_\_\_\_.

  - a) Heat value
  - b) Burning value
  - c) Calorific value
  - d) Combustion value
- 4) GR-S rubber is an example of:

  - a) condensation polymerization
  - b) copolymerization
  - c) cross-linked polymerization
  - d) addition polymerization in which single monomer takes part
- 5) Most commonly used vulcanizing agent is \_\_\_\_.

  - a) graphite
  - b) carbon black
  - c) dry ice
  - d) sulphur
- 6) Which of the following can be used for purification of substances?

  - a) IR spectroscopy
  - b) UV spectroscopy
  - c) Gas chromatography
  - d) Calorimetry
- 7) Which is the electrolyte used in Li-ion battery?

  - a) Lead dioxide
  - b) Lithium-based gel
  - c) Sulfur dioxide
  - d) Cobalt
- 8) Hardness in water is caused by the presence of:

  - a) sodium chloride
  - b) sodium carbonate
  - c) calcium chloride
  - d) potassium nitrate
- 9) Hard water may be softened by passing it through:

  - a) limestone
  - b) ion-exchange resin
  - c) calgon
  - d) rock salt

- 10)** A good lubricant should have:
- |                        |                         |
|------------------------|-------------------------|
| a) low viscosity index | b) high viscosity index |
| c) low fire point      | d) high volatility      |
- 11)** Capacity of an oil to stick onto the surface of machine parts under conditions of heavy load, is called:
- |               |                |
|---------------|----------------|
| a) volatility | b) oiliness    |
| c) acid value | d) flash point |
- 12)** During galvanic corrosion, the more noble metals acts as \_\_\_\_.
- |                             |                    |
|-----------------------------|--------------------|
| a) anode                    | b) cathode         |
| c) anode as well as cathode | d) corroding metal |
- 13)** Galvanizing is the process of coating iron with:
- |       |       |
|-------|-------|
| a) Sn | b) Zn |
| c) Cu | d) Ni |
- 14)** Highest percentage of carbon is present in:
- |                      |                        |
|----------------------|------------------------|
| a) high carbon steel | b) wrought iron        |
| c) cast iron         | d) medium carbon steel |

**Set Q**

**F.Y. (B.Tech.) (Sem - I) (New) (CBCS) Examination: Oct/Nov-2022**  
**Engineering Chemistry**

Day & Date: Wednesday, 15-03-2023  
Time: 10:00 AM To 01:00 PM

Max. Marks: 56

**Instructions:** 1) Figures to the right indicate full marks.  
2) All questions are compulsory.

**Section – I**

**Q.2 Attempt any Four.**

**16**

- a) A sample of water on analysis was found to contain the following impurities in mg/lit:

|                                    | Amount | Mo. Wt. |
|------------------------------------|--------|---------|
| Ca(HCO <sub>3</sub> ) <sub>2</sub> | 20.15  | 162     |
| Mg(HCO <sub>3</sub> ) <sub>2</sub> | 18.73  | 146     |
| CaSO <sub>4</sub>                  | 17.00  | 136     |
| MgCl <sub>2</sub>                  | 16.5   | 95      |

Calculate the temporary, permanent and total hardness of water in mg/lit.

- b) Define aeration Explain different types of aerators.  
c) Explain Ion exchange process for softening of hard water.  
d) Define following terms  
1) Viscosity  
2) Acid Value  
3) Fire point  
4) Aniline Point  
e) Explain Hydrogen evolution mechanism and oxygen absorption mechanism in electrochemical corrosion.  
f) Describe cathodic protection in corrosion control.

**Q.3 Attempt any Four**

**12**

- a) Define BOD. How it is determined. Explain its importance.  
b) Explain characteristics of batteries.  
c) Define Lubricant. Explain its functions  
d) 6 gm of an oil sample after saponification with 50 ml of N/2 alcoholic KOH solution and subsequent titration with N/2 HCl gave the titer value of 10 ml to phenolphthalein end point. A blank experiment was conducted without taking oil sample. On repeating same procedure gave a titer value of 50 ml. Calculate saponification value of an oil sample.  
e) Explain semisolid lubricants.  
f) Explain prevention of corrosion by galvanizing.

Section – II

**Q.4 Attempt any Four.**

16

- a) Define alloy. Explain purpose of alloying.
- b) During the determination of calorific value of a gaseous fuel by Boy's calorimeter, the following results were obtained:  
Volume of the gaseous fuel burnt at STP =  $0.11 \text{ m}^3$   
Weight of water used for cooling =  $34.2 \text{ Kg}$   
Weight of steam condensed =  $0.051 \text{ Kg}$   
Temperature of Inlet water =  $25.2^\circ\text{C}$   
Temperature of Outlet water =  $39.5^\circ\text{C}$   
Determine the gross and net calorific values of gaseous fuel.  
(Take latent heat of condensation of steam =  $587 \text{ kcal/kg}$ ).
- c) Explain construction and working of bomb calorimeter.
- d) Explain molding of plastics in to articles by following methods.
  - 1) Compression molding
  - 2) Injection molding
- e) Explain vulcanization of natural rubber. List advantages of vulcanized rubber?
- f) Define TGA. Explain instrumentation of TGA with diagram.

**Q.5 Attempt any Four.**

12

- a) Explain any three types of glass.
- b) Explain the characteristics of good fuels.
- c) Summarize advantages and disadvantages of biodiesel.
- d) Draw neat and labelled block diagram of GLC.
- e) Calculate Degree of polymerization of PVC having molecular weight 18750. (Mol. Wt. of vinyl chloride = 62.5)
- f) Calculate weight of  $\text{Na}_2\text{CO}_3$  required to prepare 0.4 N 500 ml solution. (Mol. Wt. of  $\text{Na}_2\text{CO}_3$  = 106)

**F.Y. (B.Tech.) (Sem - I) (New) (CBCS) Examination: Oct/Nov-2022**  
**Engineering Chemistry**

Day & Date: Wednesday, 15-03-2023

Max. Marks: 70

Time: 10:00 AM To 01:00 PM

**Instructions:** 1) Q. No. 1 is compulsory. It should be solved in the first 30 minutes in answer book. Page no 03 (Starting page of the Answer Book). Each question carries one mark.

2) Don't forget to Mention question paper set (P/Q/R/S) on top of page.

**MCQ/Objective Type Questions**

Duration: 30 Minutes

Marks: 14

**Q.1 Choose the correct alternatives from the options.**

**14**

- 1) GR-S rubber is an example of:
  - a) condensation polymerization
  - b) copolymerization
  - c) cross-linked polymerization
  - d) addition polymerization in which single monomer takes part
- 2) Most commonly used vulcanizing agent is \_\_\_\_\_.
  - a) graphite
  - b) carbon black
  - c) dry ice
  - d) sulphur
- 3) Which of the following can be used for purification of substances?
  - a) IR spectroscopy
  - b) UV spectroscopy
  - c) Gas chromatography
  - d) Calorimetry
- 4) Which is the electrolyte used in Li-ion battery?
  - a) Lead dioxide
  - b) Lithium-based gel
  - c) Sulfur dioxide
  - d) Cobalt
- 5) Hardness in water is caused by the presence of:
  - a) sodium chloride
  - b) sodium carbonate
  - c) calcium chloride
  - d) potassium nitrate
- 6) Hard water may be softened by passing it through:
  - a) limestone
  - b) ion-exchange resin
  - c) calgon
  - d) rock salt
- 7) A good lubricant should have:
  - a) low viscosity index
  - b) high viscosity index
  - c) low fire point
  - d) high volatility
- 8) Capacity of an oil to stick onto the surface of machine parts under conditions of heavy load, is called:
  - a) volatility
  - b) oiliness
  - c) acid value
  - d) flash point
- 9) During galvanic corrosion, the more noble metals acts as \_\_\_\_\_.
  - a) anode
  - b) cathode
  - c) anode as well as cathode
  - d) corroding metal

**F.Y. (B.Tech.) (Sem - I) (New) (CBCS) Examination: Oct/Nov-2022**  
**Engineering Chemistry**

Day & Date: Wednesday, 15-03-2023  
Time: 10:00 AM To 01:00 PM

Max. Marks: 56

**Instructions:** 1) Figures to the right indicate full marks.  
2) All questions are compulsory.

**Section – I**

**Q.2 Attempt any Four.**

**16**

- a) A sample of water on analysis was found to contain the following impurities in mg/lit:

|                                    | Amount | Mo. Wt. |
|------------------------------------|--------|---------|
| Ca(HCO <sub>3</sub> ) <sub>2</sub> | 20.15  | 162     |
| Mg(HCO <sub>3</sub> ) <sub>2</sub> | 18.73  | 146     |
| CaSO <sub>4</sub>                  | 17.00  | 136     |
| MgCl <sub>2</sub>                  | 16.5   | 95      |

Calculate the temporary, permanent and total hardness of water in mg/lit.

- b) Define aeration Explain different types of aerators.  
c) Explain Ion exchange process for softening of hard water.  
d) Define following terms  
1) Viscosity  
2) Acid Value  
3) Fire point  
4) Aniline Point  
e) Explain Hydrogen evolution mechanism and oxygen absorption mechanism in electrochemical corrosion.  
f) Describe cathodic protection in corrosion control.

**Q.3 Attempt any Four**

**12**

- a) Define BOD. How it is determined. Explain its importance.  
b) Explain characteristics of batteries.  
c) Define Lubricant. Explain its functions  
d) 6 gm of an oil sample after saponification with 50 ml of N/2 alcoholic KOH solution and subsequent titration with N/2 HCl gave the titer value of 10 ml to phenolphthalein end point. A blank experiment was conducted without taking oil sample. On repeating same procedure gave a titer value of 50 ml. Calculate saponification value of an oil sample.  
e) Explain semisolid lubricants.  
f) Explain prevention of corrosion by galvanizing.

Section – II

**Q.4 Attempt any Four.**

16

- a) Define alloy. Explain purpose of alloying.
- b) During the determination of calorific value of a gaseous fuel by Boy's calorimeter, the following results were obtained:  
Volume of the gaseous fuel burnt at STP =  $0.11 \text{ m}^3$   
Weight of water used for cooling =  $34.2 \text{ Kg}$   
Weight of steam condensed =  $0.051 \text{ Kg}$   
Temperature of Inlet water =  $25.2^\circ\text{C}$   
Temperature of Outlet water =  $39.5^\circ\text{C}$   
Determine the gross and net calorific values of gaseous fuel.  
(Take latent heat of condensation of steam =  $587 \text{ kcal/kg}$ ).
- c) Explain construction and working of bomb calorimeter.
- d) Explain molding of plastics in to articles by following methods.
  - 1) Compression molding
  - 2) Injection molding
- e) Explain vulcanization of natural rubber. List advantages of vulcanized rubber?
- f) Define TGA. Explain instrumentation of TGA with diagram.

**Q.5 Attempt any Four.**

12

- a) Explain any three types of glass.
- b) Explain the characteristics of good fuels.
- c) Summarize advantages and disadvantages of biodiesel.
- d) Draw neat and labelled block diagram of GLC.
- e) Calculate Degree of polymerization of PVC having molecular weight 18750. (Mol. Wt. of vinyl chloride = 62.5)
- f) Calculate weight of  $\text{Na}_2\text{CO}_3$  required to prepare 0.4 N 500 ml solution. (Mol. Wt. of  $\text{Na}_2\text{CO}_3$  = 106)

2) Don't forget to Mention question paper set (P/Q/R/S) on top of page.

### MCQ/Objective Type Questions

Marks: 14

14

- 1) Galvanizing is the process of coating iron with:  
a) Sn  
b) Zn  
c) Cu  
d) Ni
- 2) Highest percentage of carbon is present in:  
a) high carbon steel  
b) wrought iron  
c) cast iron  
d) medium carbon steel
- 3) Glass used extensively for making superior laboratory apparatus is:  
a) soda glass  
b) potash glass  
c) borosilicate glass  
d) flint glass
- 4) A good fuel should possess:  
a) low calorific value  
b) high ignition temperature  
c) high calorific value  
d) high ash content
- 5) The total quantity of heat liberated when unit mass (or volume) of a fuel is burnt completely is called its \_\_\_\_\_.  
a) Heat value  
b) Burning value  
c) Calorific value  
d) Combustion value
- 6) GR-S rubber is an example of:  
a) condensation polymerization  
b) copolymerization  
c) cross-linked polymerization  
d) addition polymerization in which single monomer takes part
- 7) Most commonly used vulcanizing agent is \_\_\_\_\_.  
a) graphite  
b) carbon black  
c) dry ice  
d) sulphur
- 8) Which of the following can be used for purification of substances?  
a) IR spectroscopy  
b) UV spectroscopy  
c) Gas chromatography  
d) Calorimetry
- 9) Which is the electrolyte used in Li-ion battery?  
a) Lead dioxide  
b) Lithium-based gel  
c) Sulfur dioxide  
d) Cobalt

Time: 10:00 AM To 01:00 PM

**Instructions:** 1) Figures to the right indicate full marks.  
2) All questions are compulsory.

**Section – I**

**Q.2 Attempt any Four.**

**16**

- a) A sample of water on analysis was found to contain the following impurities in mg/lit:

|                                    | Amount | Mo. Wt. |
|------------------------------------|--------|---------|
| Ca(HCO <sub>3</sub> ) <sub>2</sub> | 20.15  | 162     |
| Mg(HCO <sub>3</sub> ) <sub>2</sub> | 18.73  | 146     |
| CaSO <sub>4</sub>                  | 17.00  | 136     |
| MgCl <sub>2</sub>                  | 16.5   | 95      |

Calculate the temporary, permanent and total hardness of water in mg/lit.

- b) Define aeration Explain different types of aerators.  
c) Explain Ion exchange process for softening of hard water.  
d) Define following terms  
1) Viscosity  
2) Acid Value  
3) Fire point  
4) Aniline Point  
e) Explain Hydrogen evolution mechanism and oxygen absorption mechanism in electrochemical corrosion.  
f) Describe cathodic protection in corrosion control.

**Q.3 Attempt any Four**

**12**

- a) Define BOD. How it is determined. Explain its importance.  
b) Explain characteristics of batteries.  
c) Define Lubricant. Explain its functions  
d) 6 gm of an oil sample after saponification with 50 ml of N/2 alcoholic KOH solution and subsequent titration with N/2 HCl gave the titer value of 10 ml to phenolphthalein end point. A blank experiment was conducted without taking oil sample. On repeating same procedure gave a titer value of 50 ml. Calculate saponification value of an oil sample.  
e) Explain semisolid lubricants.  
f) Explain prevention of corrosion by galvanizing.

**MCQ/Objective Type Questions**

Duration: 30 Minutes

Marks: 14

**Q.1 Choose the correct alternatives from the options and rewrite the sentence. 14**

- 1) Following is not a branch of civil engineering
  - a) Transportation Engineering
  - b) Data Structure
  - c) Structural Engineering
  - d) Hydraulic Engineering
- 2) What is rain water harvesting?
  - a) Collection and storage of used water
  - b) Collection and storage of Rainwater
  - c) Distribution of water
  - d) None of the above
- 3) Which of the following is not the purpose of a green building?
  - a) To reduce use of water
  - b) To minimize damage of the environment
  - c) Re-use of waste materials
  - d) None of the above
- 4) The portion of the building between Ground level and Ground floor is called
  - a) Foundation
  - b) Plinth
  - c) Wall
  - d) Lintel
- 5) Which of the following is a classification based on the nature of the field survey?
  - a) Topographic surveying
  - b) Mine surveying
  - c) Military surveying
  - d) Chain surveying
- 6) D.P.C (Damp Proof Course) is mainly laid on
  - a) Plinth
  - b) Floor
  - c) Foundation
  - d) Footing
- 7) Which of the following is the first principle of surveying?
  - a) Whole to whole
  - b) Whole to part
  - c) Part to part
  - d) Part to whole

- 8) The devices, like compressors and pumps which require energy input for their operation are called \_\_\_\_\_.  
a) Power absorbing devices      b) Power producing devices  
c) Power transferring devices      d) Power fulfilling devices
- 9) Which of the following is a general-purpose machine tools  
a) Milling      b) Lathe  
c) Drilling      d) Cutting
- 10) A welding process definitely needs following input  
a) Heat      b) Pressure  
c) Filler material      d) Coolant
- 11) The pulley fixed on the shaft of a prime mover known as  
a) Driver pulley      b) Driven pulley  
c) Jockey pulley      d) Cone pulley
- 12) Gears used to connect two non-parallel and intersecting shafts at right angles to each other.  
a) Spiral gears      b) Spur gears  
c) Bevel gears      d) Helical gears
- 13) During a cycle, the heat transfer are given by: 120kJ, -60kJ, -48kJ, and 12kJ then the net work transfer the cycle is  
a) 60000 Nm      b) 24000 Nm  
c) 12000 Nm      d) 4400 Nm
- 14) A system comprising of a single phase, is known as  
a) Open system      b) Closed system  
c) Heterogeneous system      d) Homogeneous system

**F.Y. (B.Tech) (Sem-I) (New) (CBCS) Examination: Oct/Nov-2022**  
**Basics of Civil and Mechanical Engineering**

Day & Date: Friday, 17-03-2023  
 Time: 10:00 AM To 01:00 PM

Max. Marks: 56

- Instructions:** 1) Q. 2 & Q. 4 are short answer type questions.  
 2) Q. 3 and Q. 5 are long answer type questions.  
 3) Neat diagram must be drawn whenever necessary.  
 4) Use of log tables and non-programmable single memory calculator is Allowed.

**Section – I**

- Q.2 Attempt any Five. 15**
- Write the Significance of any one subdomains of Civil engineering.
  - Enlist various stages involved in the water treatment plant.
  - Draw Typical Functional Cross Section of Road and also give label to each part of cross section.
  - Write short note on rain water harvesting.
  - Explain the concept of green building.
  - Write any three applications of GIS.
  - Write note on fire safety measures of building.
- Q.3 Attempt any one out of (a) and (b) and solve any two out of (c) to (f) 13**
- Differentiate between Load bearing and Framed structure. **05**
  - Explain various stages involved in effluent treatment plant. **05**
  - Write note on classification of Road. **04**
  - Write note on classification of surveying. **04**
  - Explain various application of Remote sensing. **04**
  - Differentiate between Plane Surveying and Geodetic Surveying. **04**

**Section – II**

- Q.4 Attempt any Five. 15**
- Distinguish between Centrifugal pump and Reciprocating pump.
  - Write a note on construction of a Pelton wheel with its diagram.
  - What is Brazing process? Explain with neat sketch.
  - State and explain the first law of thermodynamics in case of an open system.
  - Write short notes on**
    - Compound gear train
    - Simple gear train
  - Write a note on**
    - Zeroth law of thermodynamic
    - Open and closed systems
  - Derive an expression for velocity of fluid at the exit of nozzle, by applying SFEE.

**Q.5 Attempt any one out of (a) and (b) and solve any two out of (c) to (f)** **13**

- a)** Two parallel shafts, which have center distance between them 8 m. They are connected by crossed belt drive. The diameter of driver pulley is 800 mm and diameter of driven pulley is 600 mm. The direction of rotation of driven is need to be reversed by changing over an open belt drive. Calculate the length of both open and crossed belt drive and state can same belt be applied in changed arrangement? If not, then what will be the solution to fix the belt in open belt drive? **05**

- b)** Describe Lathe Machine with its block diagram. **05**

- c)** A cycle comprises three processes. The energy transfers in each are tabulated below. Complete the table. **04**

| Process | Q(KJ) | W (KJ) | $\Delta U$ (KJ) |
|---------|-------|--------|-----------------|
| 1-2     | +80   | +30    | ---             |
| 2-3     | ---   | -50    | +20             |
| 3-1     | +50   | ---    | ---             |

- d)** Explain with neat sketch working of Kaplan turbine. **04**

- e)** Derive an expression for length of belt for open belt drive. **04**

- f)** Sketch and describe in brief pillar drilling machine. **04**

- a)** Two parallel shafts, which have center distance between them 8 m. They are connected by crossed belt drive. The diameter of driver pulley is 800 mm and diameter of driven pulley is 600 mm. The direction of rotation of driven is need to be reversed by changing over an open belt drive. Calculate the length of both open and crossed belt drive and state can same belt be applied in changed arrangement? If not, then what will be the solution to fix the belt in open belt drive? **05**

- b)** Describe Lathe Machine with its block diagram. **05**

- c)** A cycle comprises three processes. The energy transfers in each are tabulated below. Complete the table. **04**

| Process | Q(KJ) | W (KJ) | $\Delta U$ (KJ) |
|---------|-------|--------|-----------------|
| 1-2     | +80   | +30    | ---             |
| 2-3     | ---   | -50    | +20             |
| 3-1     | +50   | ---    | ---             |

- d)** Explain with neat sketch working of Kaplan turbine. **04**

- e)** Derive an expression for length of belt for open belt drive. **04**

- f)** Sketch and describe in brief pillar drilling machine. **04**

**F.Y. (B.Tech) (Sem-I) (New) (CBCS) Examination: Oct/Nov-2022**  
**Basics of Civil and Mechanical Engineering**

Day & Date: Friday, 17-03-2023  
 Time: 10:00 AM To 01:00 PM

Max. Marks: 70

- Instructions:** 1) Q. No. 1 is compulsory. It should be solved in the first 30 minutes in answer book. Page no 03 (Starting page of the Answer Book). Each question carries one mark.  
 2) Don't forget to Mention question paper set (P/Q/R/S) on top of page.  
 3) Figures to the right indicates full marks.  
 4) Assume suitable data wherever needed and mention it clearly.

**MCQ/Objective Type Questions**

Duration: 30 Minutes

Marks: 14

**Q.1 Choose the correct alternatives from the options and rewrite the sentence. 14**

- 1) The pulley fixed on the shaft of a prime mover known as
  - a) Driver pulley
  - b) Driven pulley
  - c) Jockey pulley
  - d) Cone pulley
- 2) Gears used to connect two non-parallel and intersecting shafts at right angles to each other.
  - a) Spiral gears
  - b) Spur gears
  - c) Bevel gears
  - d) Helical gears
- 3) During a cycle, the heat transfer are given by: 120kJ, -60kJ, -48kJ, and 12kJ then the net work transfer the cycle is
  - a) 60000 Nm
  - b) 24000 Nm
  - c) 12000 Nm
  - d) 4400 Nm
- 4) A system comprising of a single phase, is known as
  - a) Open system
  - b) Closed system
  - c) Heterogeneous system
  - d) Homogeneous system
- 5) Following is not a branch of civil engineering
  - a) Transportation Engineering
  - b) Data Structure
  - c) Structural Engineering
  - d) Hydraulic Engineering
- 6) What is rain water harvesting?
  - a) Collection and storage of used water
  - b) Collection and storage of Rainwater
  - c) Distribution of water
  - d) None of the above
- 7) Which of the following is not the purpose of a green building?
  - a) To reduce use of water
  - b) To minimize damage of the environment
  - c) Re-use of waste materials
  - d) None of the above
- 8) The portion of the building between Ground level and Ground floor is called
  - a) Foundation
  - b) Plinth
  - c) Wall
  - d) Lintel

- 9) Which of the following is a classification based on the nature of the field survey?
- a) Topographic surveying
  - b) Mine surveying
  - c) Military surveying
  - d) Chain surveying
- 10) D.P.C (Damp Proof Course) is mainly laid on
- a) Plinth
  - b) Floor
  - c) Foundation
  - d) Footing
- 11) Which of the following is the first principle of surveying?
- a) Whole to whole
  - b) Whole to part
  - c) Part to part
  - d) Part to whole
- 12) The devices, like compressors and pumps which require energy input for their operation are called \_\_\_\_\_.
- a) Power absorbing devices
  - b) Power producing devices
  - c) Power transferring devices
  - d) Power fulfilling devices
- 13) Which of the following is a general-purpose machine tools
- a) Milling
  - b) Lathe
  - c) Drilling
  - d) Cutting
- 14) A welding process definitely needs following input
- a) Heat
  - b) Pressure
  - c) Filler material
  - d) Coolant

Set **R**

**F.Y. (B.Tech) (Sem-I) (New) (CBCS) Examination: Oct/Nov-2022**  
**Basics of Civil and Mechanical Engineering**

Day & Date: Friday, 17-03-2023  
 Time: 10:00 AM To 01:00 PM

Max. Marks: 56

- Instructions:** 1) Q. 2 & Q. 4 are short answer type questions.  
 2) Q. 3 and Q. 5 are long answer type questions.  
 3) Neat diagram must be drawn whenever necessary.  
 4) Use of log tables and non-programmable single memory calculator is Allowed.

**Section – I**

- Q.2 Attempt any Five.** **15**
- Write the Significance of any one subdomains of Civil engineering.
  - Enlist various stages involved in the water treatment plant.
  - Draw Typical Functional Cross Section of Road and also give label to each part of cross section.
  - Write short note on rain water harvesting.
  - Explain the concept of green building.
  - Write any three applications of GIS.
  - Write note on fire safety measures of building.
- Q.3 Attempt any one out of (a) and (b) and solve any two out of (c) to (f)** **13**
- Differentiate between Load bearing and Framed structure. **05**
  - Explain various stages involved in effluent treatment plant. **05**
  - Write note on classification of Road. **04**
  - Write note on classification of surveying. **04**
  - Explain various application of Remote sensing. **04**
  - Differentiate between Plane Surveying and Geodetic Surveying. **04**

**Section – II**

- Q.4 Attempt any Five.** **15**
- Distinguish between Centrifugal pump and Reciprocating pump.
  - Write a note on construction of a Pelton wheel with its diagram.
  - What is Brazing process? Explain with neat sketch.
  - State and explain the first law of thermodynamics in case of an open system.
  - Write short notes on**
    - Compound gear train
    - Simple gear train
  - Write a note on**
    - Zeroth law of thermodynamic
    - Open and closed systems
  - Derive an expression for velocity of fluid at the exit of nozzle, by applying SFEE.

**Q.5 Attempt any one out of (a) and (b) and solve any two out of (c) to (f)** **13**

- a)** Two parallel shafts, which have center distance between them 8 m. They are connected by crossed belt drive. The diameter of driver pulley is 800 mm and diameter of driven pulley is 600 mm. The direction of rotation of driven is need to be reversed by changing over an open belt drive. Calculate the length of both open and crossed belt drive and state can same belt be applied in changed arrangement? If not, then what will be the solution to fix the belt in open belt drive? **05**

- b)** Describe Lathe Machine with its block diagram. **05**

- c)** A cycle comprises three processes. The energy transfers in each are tabulated below. Complete the table. **04**

| Process | Q(KJ) | W (KJ) | $\Delta U$ (KJ) |
|---------|-------|--------|-----------------|
| 1-2     | +80   | +30    | ---             |
| 2-3     | ---   | -50    | +20             |
| 3-1     | +50   | ---    | ---             |

- d)** Explain with neat sketch working of Kaplan turbine. **04**

- e)** Derive an expression for length of belt for open belt drive. **04**

- f)** Sketch and describe in brief pillar drilling machine. **04**

## Max. Marks: 70

- 2) Don't forget to Mention question paper set (P/Q/R/S) on top of page.
- 3) Figures to the right indicates full marks
- 4) Assume suitable data wherever needed and mention it clearly.

Marks: 14

## 14

- 1) Ideal condition(s) assumed in engineering mechanics is (are) \_\_\_\_\_.  
a) Body is rigid                      b) Body is continuum  
c) both a and b                      d) Body is plastic
- 2) Capital letters used to indicate spaces between forces is termed as \_\_\_\_\_.  
a) Newton's Letters                  b) Varignon's notations  
c) Bow's notations                  d) All of these
- 3) A force can be resolved in to \_\_\_\_\_.  
a) n components                      b) a force and couple moment  
c) both a and b                      d) only two components
- 4) If a given truss satisfies mathematical condition  $m = 2j - 3$  then the truss is \_\_\_\_\_.  
a) redundant                          b) deficient  
c) imperfect                          d) perfect
- 5) To start the analysis of truss by method of joints the number of unknown must not be more than \_\_\_\_\_.  
a) two                                    b) three  
c) either two or three                d) four
- 6) A point at which whole area of lamina is supposed to be concentrated is called as \_\_\_\_\_.  
a) centre of gravity                  b) centroid  
c) centre of mass                      d) none of these
- 7) If axis of symmetry exist then it passes through the \_\_\_\_\_.  
a) centre                                 b) base  
c) top of web                          d) side of flange
- 8) If a particle requires t seconds to reach maximum height during upward motion from a certain position then how much time it will take to reach the same point in its downward motion \_\_\_\_\_.  
a) t                                         b) t/2  
c) 2t                                        d) 9.81 t

- 9) A straight line s-t curve passing through the origin represents \_\_\_\_\_.  
a) Uniform Velocity  
b) Uniform acceleration  
c) Both a and b  
d) Retardation
- 10) If a car travelling at 70 kmph halts due to application of brakes after 5.14 sec then the rate of reduction of velocity with time is \_\_\_\_\_.  
a)  $2.98 \text{ m/s}^2$   
b)  $2.89 \text{ m/s}^2$   
c)  $3.78 \text{ m/s}^2$   
d)  $4.89 \text{ m/s}^2$
- 11) Inertia force during retardation acts in \_\_\_\_\_.  
a) Same direction of motion  
b) Opposite direction of motion  
c) Perpendicular to direction of motion  
d) Both a and b
- 12) 100 rpm is equivalent to \_\_\_\_\_.  
a) 10.467 rad/sec  
b) 628 rad/sec  
c) 1.667 rad/sec  
d) 955.414 rad/sec
- 13) Potential energy of body at height h from ground is 2 unit then its kinetic energy when it reaches at ground is \_\_\_\_\_.  
a) 16 unit  
b) 4 unit  
c) 2 unit  
d) 0
- 14) Centroidal rotation is rotation of body about \_\_\_\_\_.  
a) Axis parallel to its centroidal axis  
b) axis perpendicular to its plane of rotation and passing through its centre  
c) both a and b  
d) none of these

**F.Y. (B.Tech.) (Sem - I) (New) (CBCS) Examination: Oct/Nov-2022**  
**Engineering Mechanics**

Day & Date: Monday, 20-03-2023  
 Time: 10:00 AM To 01:00 PM

Max. Marks: 56

**Instructions:** 1) All questions are compulsory.  
 2) Figures to the right indicate full marks.

**Section – I**

**Q.2 Answer the following question. (Any Four)**

12

- State and explain Newton's laws of motion.
- Enlist any three systems of forces.
- Determine resultant and its direction of force system acting on body as shown below.

- A block of 200 N is resting on rough horizontal surface. To just slide the block a pull of 50 N is required. Determine coefficient of friction between surface of body and plane.
- Define centroid and moment of inertia.
- What is meant by couple moment? Enlist characteristics of couple moment.

**Q.3 Answer the following question. (Any Two)**

16

- Determine the support reactions for the beam which is loaded and supported as shown below.

- b) Determine forces and their nature in all the members of a truss which is loaded and supported as shown below.

- c) Locate centroid with respect to reference point O and determine the moment of inertia about polar axis for the L section as shown below

### Section – II

#### Q.4 Answer the following question. (Any Four)

12

- Derive equations of linear motion with uniform acceleration.
- Define the following.
  - Angular velocity
  - Angular acceleration
  - Angular displacement
- A motorist is traveling at speed of 80 kmph suddenly applies brakes and halts after skidding 60 m if rate of retardation is  $4.12 \text{ m/s}^2$ . Determine coefficient of friction between road and tyre. Use D'Alembert's principle.
- State and derive work energy equation.
- Initial velocity of two balls moving towards each other are 10 m/s and 4 m/s respectively and their velocities after collision are 4 m/s and 10 m/s respectively. Determine coefficient of restitution.
- State and explain types of vibration.

**Q.5 Answer the following question. (Any Two)**

- a) Angular acceleration of flywheel is given by  $\alpha = 12 - t$  where,  $\alpha$  is in radians and  $t$  is in seconds. If the angular velocity of flywheel is 60 rad/sec at the end of 4 seconds. Determine,
- 1) Angular velocity at the end of 6 seconds.
  - 2) Angular acceleration in 13<sup>th</sup> second
  - 3) Number of revolutions at the end of 6 seconds
- b) A pulley of weight 500 N has a radius of 0.5 m. A block weighing 700 N is suspended by a tight rope wound round the pulley the other end being attached to the pulley as shown in below in fig below. Determine the resulting acceleration of the weight and the tension in the rope.

- c) A body weighing 300 N is pushed up a 30° plane by a 400 N force acting parallel to the plane as shown in below. If the initial velocity of the body is 1.5 m/sec. and coefficient of kinetic friction is = 0.2, what velocity will the body have after moving 6 m? Use work energy method.

**Seat  
No.**

Max. Marks: 70

- 2) Don't forget to Mention question paper set (P/Q/R/S) on top of page.
- 3) Figures to the right indicates full marks
- 4) Assume suitable data wherever needed and mention it clearly.

Marks: 14

14

- Page 6 of 20

- 8) Ideal condition(s) assumed in engineering mechanics is (are) \_\_\_\_\_.  
a) Body is rigid                      b) Body is continuum  
c) both a and b                      d) Body is plastic
- 9) Capital letters used to indicate spaces between forces is termed as \_\_\_\_\_.  
a) Newton's Letters                  b) Varignon's notations  
c) Bow's notations                  d) All of these
- 10) A force can be resolved in to \_\_\_\_\_.  
a) n components                    b) a force and couple moment  
c) both a and b                    d) only two components
- 11) If a given truss satisfies mathematical condition  $m = 2j - 3$  then the truss is \_\_\_\_\_.  
a) redundant                         b) deficient  
c) imperfect                         d) perfect
- 12) To start the analysis of truss by method of joints the number of unknown must not be more than \_\_\_\_\_.  
a) two                                    b) three  
c) either two or three               d) four
- 13) A point at which whole area of lamina is supposed to be concentrated is called as \_\_\_\_\_.  
a) centre of gravity                  b) centroid  
c) centre of mass                    d) none of these
- 14) If axis of symmetry exist then it passes through the \_\_\_\_\_.  
a) centre                                b) base  
c) top of web                         d) side of flange

Set **Q**

**F.Y. (B.Tech.) (Sem - I) (New) (CBCS) Examination: Oct/Nov-2022**  
**Engineering Mechanics**

Day & Date: Monday, 20-03-2023  
 Time: 10:00 AM To 01:00 PM

Max. Marks: 56

**Instructions:** 1) All questions are compulsory.  
 2) Figures to the right indicate full marks.

**Section – I**

**Q.2 Answer the following question. (Any Four)**

12

- State and explain Newton's laws of motion.
- Enlist any three systems of forces.
- Determine resultant and its direction of force system acting on body as shown below.

- A block of 200 N is resting on rough horizontal surface. To just slide the block a pull of 50 N is required. Determine coefficient of friction between surface of body and plane.
- Define centroid and moment of inertia.
- What is mean by couple moment? Enlist characteristics of couple moment.

**Q.3 Answer the following question. (Any Two)**

16

- Determine the support reactions for the beam which is loaded and supported as shown below.

- b) Determine forces and their nature in all the members of a truss which is loaded and supported as shown below.

- c) Locate centroid with respect to reference point O and determine the moment of inertia about polar axis for the L section as shown below

### Section – II

#### Q.4 Answer the following question. (Any Four)

12

- Derive equations of linear motion with uniform acceleration.
- Define the following.
  - Angular velocity
  - Angular acceleration
  - Angular displacement
- A motorist is traveling at speed of 80 kmph suddenly applies brakes and halts after skidding 60 m if rate of retardation is  $4.12 \text{ m/s}^2$ . Determine coefficient of friction between road and tyre. Use D'Alembert's principle.
- State and derive work energy equation.
- Initial velocity of two balls moving towards each other are 10 m/s and 4 m/s respectively and their velocities after collision are 4 m/s and 10 m/s respectively. Determine coefficient of restitution.
- State and explain types of vibration.

**Q.5 Answer the following question. (Any Two)**

- a) Angular acceleration of flywheel is given by  $\alpha = 12 - t$  where,  $\alpha$  is in radians and  $t$  is in seconds. If the angular velocity of flywheel is 60 rad/sec at the end of 4 seconds. Determine,
- 1) Angular velocity at the end of 6 seconds.
  - 2) Angular acceleration in 13<sup>th</sup> second
  - 3) Number of revolutions at the end of 6 seconds
- b) A pulley of weight 500 N has a radius of 0.5 m. A block weighing 700 N is suspended by a tight rope wound round the pulley the other end being attached to the pulley as shown in below in fig below. Determine the resulting acceleration of the weight and the tension in the rope.

- c) A body weighing 300 N is pushed up a 30° plane by a 400 N force acting parallel to the plane as shown in below. If the initial velocity of the body is 1.5 m/sec. and coefficient of kinetic friction is = 0.2, what velocity will the body have after moving 6 m? Use work energy method.

**F.Y. (B.Tech.) (Sem - I) (New) (CBCS) Examination: Oct/Nov-2022**  
**Engineering Mechanics**

Day & Date: Monday, 20-03-2023  
 Time: 10:00 AM To 01:00 PM

Max. Marks: 70

- Instructions:** 1) Q. No. 1 is compulsory. It should be solved in the first 30 minutes in answer book. Page no 03 (Starting page of the Answer Book). Each question carries one mark.  
 2) Don't forget to Mention question paper set (P/Q/R/S) on top of page.  
 3) Figures to the right indicates full marks  
 4) Assume suitable data wherever needed and mention it clearly.

**MCQ/Objective Type Questions**

Duration: 30 Minutes

Marks: 14

**Q.1 Choose the correct alternatives from the options.**

**14**

- 1) Inertia force during retardation acts in \_\_\_\_\_.  
 a) Same direction of motion  
 b) Opposite direction of motion  
 c) Perpendicular to direction of motion  
 d) Both a and b
- 2) 100 rpm is equivalent to \_\_\_\_\_.  
 a) 10.467 rad/sec                      b) 628 rad/sec  
 c) 1.667 rad/sec                      d) 955.414 rad/sec
- 3) Potential energy of body at height h from ground is 2 unit then its kinetic energy when it reaches at ground is \_\_\_\_\_.  
 a) 16 unit                                  b) 4 unit  
 c) 2 unit                                  d) 0
- 4) Centroidal rotation is rotation of body about \_\_\_\_\_.  
 a) Axis parallel to its centroidal axis  
 b) axis perpendicular to its plane of rotation and passing through its centre  
 c) both a and b  
 d) none of these
- 5) Ideal condition(s) assumed in engineering mechanics is (are) \_\_\_\_\_.  
 a) Body is rigid                              b) Body is continuum  
 c) both a and b                              d) Body is plastic
- 6) Capital letters used to indicate spaces between forces is termed as \_\_\_\_\_.  
 a) Newton's Letters                      b) Varignon's notations  
 c) Bow's notations                      d) All of these
- 7) A force can be resolved in to \_\_\_\_\_.  
 a) n components                              b) a force and couple moment  
 c) both a and b                              d) only two components
- 8) If a given truss satisfies mathematical condition  $m = 2j - 3$  then the truss is \_\_\_\_\_.  
 a) redundant                                  b) deficient  
 c) imperfect                                  d) perfect

 Time: 10:00 AM To 01:00 PM

Max. Marks: 56

**Instructions:** 1) All questions are compulsory.  
 2) Figures to the right indicate full marks.

**Section – I**

**Q.2 Answer the following question. (Any Four)**

12

- State and explain Newton's laws of motion.
- Enlist any three systems of forces.
- Determine resultant and its direction of force system acting on body as shown below.

- A block of 200 N is resting on rough horizontal surface. To just slide the block a pull of 50 N is required. Determine coefficient of friction between surface of body and plane.
- Define centroid and moment of inertia.
- What is mean by couple moment? Enlist characteristics of couple moment.

**Q.3 Answer the following question. (Any Two)**

16

- Determine the support reactions for the beam which is loaded and supported as shown below.

- b) Determine forces and their nature in all the members of a truss which is loaded and supported as shown below.

- c) Locate centroid with respect to reference point O and determine the moment of inertia about polar axis for the L section as shown below

### Section – II

#### Q.4 Answer the following question. (Any Four)

12

- Derive equations of linear motion with uniform acceleration.
- Define the following.
  - Angular velocity
  - Angular acceleration
  - Angular displacement
- A motorist is traveling at speed of 80 kmph suddenly applies brakes and halts after skidding 60 m if rate of retardation is  $4.12 \text{ m/s}^2$ . Determine coefficient of friction between road and tyre. Use D'Alembert's principle.
- State and derive work energy equation.
- Initial velocity of two balls moving towards each other are 10 m/s and 4 m/s respectively and their velocities after collision are 4 m/s and 10 m/s respectively. Determine coefficient of restitution.
- State and explain types of vibration.

**Q.5 Answer the following question. (Any Two)**

- a) Angular acceleration of flywheel is given by  $\alpha = 12 - t$  where,  $\alpha$  is in radians and  $t$  is in seconds. If the angular velocity of flywheel is 60 rad/sec at the end of 4 seconds. Determine,
- 1) Angular velocity at the end of 6 seconds.
  - 2) Angular acceleration in 13<sup>th</sup> second
  - 3) Number of revolutions at the end of 6 seconds
- b) A pulley of weight 500 N has a radius of 0.5 m. A block weighing 700 N is suspended by a tight rope wound round the pulley the other end being attached to the pulley as shown in below in fig below. Determine the resulting acceleration of the weight and the tension in the rope.

- c) A body weighing 300 N is pushed up a 30° plane by a 400 N force acting parallel to the plane as shown in below. If the initial velocity of the body is 1.5 m/sec. and coefficient of kinetic friction is = 0.2, what velocity will the body have after moving 6 m? Use work energy method.

- 9) Centroidal rotation is rotation of body about \_\_\_\_\_.  
a) Axis parallel to its centroidal axis  
b) axis perpendicular to its plane of rotation and passing through its centre  
c) both a and b  
d) none of these
- 10) Ideal condition(s) assumed in engineering mechanics is (are) \_\_\_\_\_.  
a) Body is rigid  
b) Body is continuum  
c) both a and b  
d) Body is plastic
- 11) Capital letters used to indicate spaces between forces is termed as \_\_\_\_\_.  
a) Newton's Letters  
b) Varignon's notations  
c) Bow's notations  
d) All of these
- 12) A force can be resolved in to \_\_\_\_\_.  
a) n components  
b) a force and couple moment  
c) both a and b  
d) only two components
- 13) If a given truss satisfies mathematical condition  $m = 2j - 3$  then the truss is \_\_\_\_\_.  
a) redundant  
b) deficient  
c) imperfect  
d) perfect
- 14) To start the analysis of truss by method of joints the number of unknown must not be more than \_\_\_\_\_.  
a) two  
b) three  
c) either two or three  
d) four

**F. Y. (B.Tech.) (Sem - I) (New) (CBCS) Examination: Oct/Nov-2022**  
**Universal Human Values**

Day &amp; Date: Tuesday, 21-03-2023

Max. Marks: 50

Time: 10:00 AM To 11:30 AM

**Instructions:** 1) All questions are compulsory.  
 2) Figures to the right indicate full marks.

**Answer****Q.1 Choose the correct alternatives from the options.**

- 1) What is self-Exploration?
  - a) Process of dialogue between what you are and what you really want to be ☐
  - b) Process of self-evolution through self-investigation
  - c) Process of knowing oneself
  - d) All of the above
- 2) Following are the basic guidelines for value education except \_\_\_\_\_.
  - a) Universal
  - b) Personal
  - c) Rational
  - d) Natural☐
- 3) One of the basic desires of every human being is to be always \_\_\_\_\_.
  - a) Happy
  - b) Sad
  - c) Laugh
  - d) Earn money☐
- 4) Natural acceptance and \_\_\_\_\_ are the two processes of knowing.
  - a) Self-Actualization
  - b) Self-exploration
  - c) Self-Evaluation
  - d) Self-control☐
- 5) Human Life is lived at four levels: Individual, Family, and Society and \_\_\_\_\_.
  - a) Nature
  - b) Nurture
  - c) World
  - d) Universe☐
- 6) Value education should be based on dogmas or blind beliefs \_\_\_\_\_.
  - a) True
  - b) False☐
- 7) Value of an entity is \_\_\_\_\_.
  - a) Physical Facility
  - b) Prosperity
  - c) Its participation in the larger order of which it is part
  - d) both a and b☐
- 8) \_\_\_\_\_ are as Basic Human Aspirations.
  - a) Money
  - b) Relationship without money
  - c) Physical Facility
  - d) Continuous Happiness and Prosperity☐

- 9) For Human beings, physical facility is not required \_\_\_\_\_.  
 a) True b) False ☐
- 10) Please give the correct priority for Physical Facilities, Right Understanding, and Relationship \_\_\_\_\_.  
 a) Physical Facilities, Right Understanding and Relationship  
 b) Relationship, Right Understanding and Physical Facilities  
 c) Right Understanding, Relationship and Physical Facilities  
 d) None of the above ☐
- 11) Right Understanding and Physical Facilities lead to \_\_\_\_\_.  
 a) Mutual Happiness b) Mutual Prosperity  
 c) Both a and b d) All are wrong ☐
- 12) Beside physical facilities human being wants \_\_\_\_\_.  
 a) Name b) Fame  
 c) Relationship d) None of the above ☐
- 13) SVDD stands for \_\_\_\_\_.  
 a) Sadhan Viheen Dukhi Daridra  
 b) Sadhan Sampan Dukhi Daridra  
 c) Sadhan Sampan Sukhi Samridha  
 d) None of the above ☐
- 14) Natural acceptance does not change with \_\_\_\_\_.  
 a) Time b) Place  
 c) Beliefs d) All of above ☐
- 15) When you are living with pre-conditionings and accumulated desires without evaluating them, then it means that you are \_\_\_\_\_.  
 a) Swatantra b) Partantra  
 c) Prosperous d) None ☐
- 16) Sadupyog of the Body mean \_\_\_\_\_ of the Body.  
 a) Self-regulation b) Care  
 c) Happiness d) Right utilization ☐
- 17) Human being is co-existence of the \_\_\_\_\_ and the \_\_\_\_\_.  
 a) Self, Self b) body, body  
 c) self, body d) None ☐
- 18) \_\_\_\_\_ is the feeling of responsibility for nurturing, protecting, and right utilizing the body.  
 a) Swasthya b) Sanyam  
 c) Prosperity d) None ☐
- 19) The activity of desire, thought and expecting together is called as \_\_\_\_\_.  
 a) Body b) Health  
 c) Imagination d) Future ☐
- 20) The \_\_\_\_\_ is an instrument of \_\_\_\_\_.  
 a) I, Body b) Body, I  
 c) Both a and b d) None ☐
- 21) Activities of self (I) are \_\_\_\_\_.  
 a) Happiness b) Desire, thought and Expectation  
 c) Prosperity d) None ☐

- 22) \_\_\_\_\_ is the information we get from the Body through the five sense organs.
- |                       |              |                          |
|-----------------------|--------------|--------------------------|
| a) Precondition       | b) Sensation | <input type="checkbox"/> |
| c) Natural acceptance | d) None      |                          |
- 23) Needs of Body are Temporary whereas needs of Self are continuous \_\_\_\_.
- |         |          |                          |
|---------|----------|--------------------------|
| a) True | b) False | <input type="checkbox"/> |
|---------|----------|--------------------------|
- 24) Which of the following is NOT a response of the Self?
- |                |                    |                          |
|----------------|--------------------|--------------------------|
| a) Knowing     | b) Assuming        | <input type="checkbox"/> |
| c) Recognising | d) Preconditioning |                          |
- 25) Preconditioning is?
- |                             |                             |                          |
|-----------------------------|-----------------------------|--------------------------|
| a) Assuming without knowing | b) Knowing without Assuming | <input type="checkbox"/> |
| c) Only Assuming            | d) Only Knowing             |                          |
- 26) Needs of Body are qualitative whereas needs of Self are quantitative \_\_\_\_.
- |         |          |                          |
|---------|----------|--------------------------|
| a) True | b) False | <input type="checkbox"/> |
|---------|----------|--------------------------|
- 27) Sah-astitva means \_\_\_\_\_.
- |                 |                       |                          |

| a) Fearlessness | b) Confusion | <input type="checkbox"/> |
| c) Confidence   | d) Fear      |                          |
- 29) \_\_\_\_\_ is the foundational value in relationship.
- |            |          |                          |
|------------|----------|--------------------------|
| a) Respect | b) Love  | <input type="checkbox"/> |
| c) Trust   | d) Glory |                          |
- 30) The feeling to nurture and protect the body of our relative is called \_\_\_\_\_.
- |              |              |                          |
|--------------|--------------|--------------------------|
| a) Care      | b) Affection | <input type="checkbox"/> |
| c) Gratitude | d) Respect   |                          |
- 31) \_\_\_\_\_ is the feeling of acceptance for those who have made efforts for my excellence.
- |              |             |                          |
|--------------|-------------|--------------------------|
| a) Reverence | b) Glory    | <input type="checkbox"/> |
| c) Gratitude | d) Guidance |                          |
- 32) \_\_\_\_\_ is a complete value.
- |              |              |                          |
|--------------|--------------|--------------------------|
| a) Love      | b) Affection | <input type="checkbox"/> |
| c) Gratitude | d) Respect   |                          |
- 33) \_\_\_\_\_ is an extension of family.
- |            |           |                          |
|------------|-----------|--------------------------|
| a) Self    | b) Body   | <input type="checkbox"/> |
| c) Society | d) Nature |                          |
- 34) We all are similar at the level of our \_\_\_\_\_ but differ in our \_\_\_\_\_.
- |                           |                          |                          |
|---------------------------|--------------------------|--------------------------|
| a) Competence, Intension  | b) Intension, Competence | <input type="checkbox"/> |
| c) Competence, Competence | d) None                  |                          |
- 35) Abhay means \_\_\_\_\_.
- |                        |                           |                          |
|------------------------|---------------------------|--------------------------|
| a) Right understanding | b) Trust and fearlessness | <input type="checkbox"/> |
| c) Prosperity          | d) Co-existence           |                          |

- 36) \_\_\_\_\_ means one who consumes or experience.  
a) Doer  
b) Seer  
c) Enjoyer  
d) None
- 37) All the units of nature can be classified into \_\_\_\_\_ orders.  
a) Two  
b) Three  
c) Four  
d) Six
- 38) Which of the following does not form an order in nature?  
a) Bio  
b) Animal  
c) Consciousness  
d) Human
- 39) Which of the following statement is not true?  
a) There is interconnectedness in nature  
b) There is recyclability and self-regulation in nature  
c) There is struggle for survival in nature  
d) There is mutual fulfillment in nature
- 40) According to quantity, which of the following is true for the orders in nature?  
a) Bio order >> Physical order >> Animal order >> Human order  
b) Animal order >> Bio order >> Physical order >> Human order  
c) Physical order >> Bio order >> Animal order >> Human order  
d) Physical order >> Animal order >> Bio order >> Human order
- 41) What is NOT acceptable naturally in Nature?  
a) Enrichment of nature  
b) Pollution in nature  
c) Protection of nature  
d) Right Utilization of nature
- 42) Which of the following is NOT a unit of physical order?  
a) Soil  
b) Air  
c) Tree  
d) Water
- 43) There is justice in relationship when there is \_\_\_\_\_.  
a) self-regulation  
b) freedom  
c) Mutual fulfillment  
d) none
- 44) Justice from family to world family leads to \_\_\_\_\_.  
a) Powerful nation  
b) Strong political ties between nations  
c) Undivided society  
d) Disruption of the family structure
- 45) Which of the following is NOT a source of imagination in the self?  
a) Preconditioning  
b) Sensation  
c) Thought  
d) Natural Acceptance
- 46) Which of the following results from over-evaluation?  
a) Ego  
b) Depression  
c) Self-confidence  
d) Trust
- 47) Which of the following statement is true?  
a) Intention of a human being is always doubtful  
b) One's intension is always to make the other happy  
c) Intension of a human keeps varying from time to time  
d) Intension of a human being can never be understood

- 48)** Feeling of relationship exists between \_\_\_\_\_.  
a) Self and self                      b) Body and Body  
c) Self and body                     d) None of the above
- 49)** Which of the following is NOT one of the goals at the level of society?  
a) Right Understanding            b) Fearlessness  
c) Madness for profit               d) Prosperity
- 50)** Intension of a human being is the same as \_\_\_\_\_.  
a) Natural acceptance              b) Competence  
c) Thought                             d) Pre-conditioning

**F. Y. (B.Tech.) (Sem - I) (New) (CBCS) Examination: Oct/Nov-2022**  
**Universal Human Values**

Day &amp; Date: Tuesday, 21-03-2023

Max. Marks: 50

Time: 10:00 AM To 11:30 AM

**Instructions:** 1) All questions are compulsory.  
 2) Figures to the right indicate full marks.

**Answer****Q.1 Choose the correct alternatives from the options.**

- 1) Right Understanding and Physical Facilities lead to \_\_\_\_\_.  
 a) Mutual Happiness                      b) Mutual Prosperity  
 c) Both a and b                              d) All are wrong                      ☐
- 2) Beside physical facilities human being wants \_\_\_\_\_.  
 a) Name                                          b) Fame  
 c) Relationship                                d) None of the above                      ☐
- 3) SVDD stands for \_\_\_\_\_.  
 a) Sadhan Viheen Dukhi Daridra  
 b) Sadhan Sampan Dukhi Daridra  
 c) Sadhan Sampan Sukhi Samridha  
 d) None of the above                      ☐
- 4) Natural acceptance does not change with \_\_\_\_\_.  
 a) Time                                          b) Place  
 c) Beliefs                                        d) All of above                      ☐
- 5) When you are living with pre-conditionings and accumulated desires without evaluating them, then it means that you are \_\_\_\_\_.  
 a) Swatantra                                    b) Partantra  
 c) Prosperous                                  d) None                      ☐
- 6) Sadupyog of the Body mean \_\_\_\_\_ of the Body.  
 a) Self-regulation                              b) Care  
 c) Happiness                                    d) Right utilization                      ☐
- 7) Human being is co-existence of the \_\_\_\_\_ and the \_\_\_\_\_.  
 a) Self, Self                                      b) body, body  
 c) self, body                                      d) None                      ☐
- 8) \_\_\_\_\_ is the feeling of responsibility for nurturing, protecting, and right utilizing the body.  
 a) Swasthya                                      b) Sanyam  
 c) Prosperity                                    d) None                      ☐
- 9) The activity of desire, thought and expecting together is called as \_\_\_\_\_.  
 a) Body                                            b) Health  
 c) Imagination                                  d) Future                      ☐

- 10) The \_\_\_\_\_ is an instrument of \_\_\_\_\_.  
a) I, Body                                      b) Body, I  
c) Both a and b                                d) None
- 11) What is NOT acceptable naturally in Nature?  
a) Enrichment of nature                      b) Pollution in nature  
c) Protection of nature                        d) Right Utilization of nature
- 12) Which of the following is NOT a unit of physical order?  
a) Soil                                              b) Air  
c) Tree                                              d) Water
- 13) There is justice in relationship when there is \_\_\_\_\_.  
a) self-regulation                              b) freedom  
c) Mutual fulfillment                          d) none
- 14) Justice from family to world family leads to \_\_\_\_\_.  
a) Powerful nation  
b) Strong political ties between nations  
c) Undivided society  
d) Disruption of the family structure
- 15) Which of the following is NOT a source of imagination in the self?  
a) Preconditioning                              b) Sensation  
c) Thought                                        d) Natural Acceptance
- 16) Which of the following results from over-evaluation?  
a) Ego                                                b) Depression  
c) Self-confidence                              d) Trust
- 17) Which of the following statement is true?  
a) Intention of a human being is always doubtful  
b) One's intension is always to make the other happy  
c) Intension of a human keeps varying from time to time  
d) Intension of a human being can never be understood
- 18) Feeling of relationship exists between \_\_\_\_\_.  
a) Self and self                                      b) Body and Body  
c) Self and body                                    d) None of the above
- 19) Which of the following is NOT one of the goals at the level of society?  
a) Right Understanding                        b) Fearlessness  
c) Madness for profit                            d) Prosperity
- 20) Intension of a human being is the same as \_\_\_\_\_.  
a) Natural acceptance                            b) Competence  
c) Thought                                         d) Pre-conditioning
- 21) What is self-Exploration?  
a) Process of dialogue between what you are and what you really want to be  
b) Process of self-evolution through self-investigation  
c) Process of knowing oneself  
d) All of the above
- 22) Following are the basic guidelines for value education except \_\_\_\_\_.  
a) Universal                                        b) Personal  
c) Rational                                         d) Natural

- 23) One of the basic desires of every human being is to be always \_\_\_\_\_.  
 a) Happy b) Sad  
 c) Laugh d) Earn money ☐
- 24) Natural acceptance and \_\_\_\_\_ are the two processes of knowing.  
 a) Self-Actualization b) Self-exploration  
 c) Self-Evaluation d) Self-control ☐
- 25) Human Life is lived at four levels: Individual, Family, and Society and \_\_\_\_\_.  
 a) Nature b) Nurture  
 c) World d) Universe ☐
- 26) Value education should be based on dogmas or blind beliefs \_\_\_\_\_.  
 a) True b) False ☐
- 27) Value of an entity is \_\_\_\_\_.  
 a) Physical Facility  
 b) Prosperity  
 c) Its participation in the larger order of which it is part  
 d) both a and b ☐
- 28) \_\_\_\_\_ are as Basic Human Aspirations.  
 a) Money  
 b) Relationship without money  
 c) Physical Facility  
 d) Continuous Happiness and Prosperity ☐
- 29) For Human beings, physical facility is not required \_\_\_\_\_.  
 a) True b) False ☐
- 30) Please give the correct priority for Physical Facilities, Right Understanding, and Relationship \_\_\_\_\_.  
 a) Physical Facilities, Right Understanding and Relationship  
 b) Relationship, Right Understanding and Physical Facilities  
 c) Right Understanding, Relationship and Physical Facilities  
 d) None of the above ☐
- 31) Preconditioning is?  
 a) Assuming without knowing b) Knowing without Assuming  
 c) Only Assuming d) Only Knowing ☐
- 32) Needs of Body are qualitative whereas needs of Self are quantitative \_\_\_\_\_.  
 a) True b) False ☐
- 33) Sah-astitva means \_\_\_\_\_.  
 a) Co-existence b) Co-operation  
 c) Cooption d) Corporate identity ☐
- 34) Ensuring justice in the relationship, on the basis of values leads to \_\_\_\_\_ in society.  
 a) Fearlessness b) Confusion  
 c) Confidence d) Fear ☐
- 35) Activities of self (I) are \_\_\_\_\_.  
 a) Happiness b) Desire, thought and Expectation  
 c) Prosperity d) None ☐

- 36) \_\_\_\_\_ is the information we get from the Body through the five sense organs.
- |                       |              |                          |

- |              |              |                          |
|--------------|--------------|--------------------------|
| a) Care      | b) Affection | <input type="checkbox"/> |
| c) Gratitude | d) Respect   |                          |
- 41) Abhay means \_\_\_\_.
- |                        |                           |                          |
|------------------------|---------------------------|--------------------------|
| a) Right understanding | b) Trust and fearlessness | <input type="checkbox"/> |
| c) Prosperity          | d) Co-existence           |                          |
- 42) \_\_\_\_\_ means one who consumes or experience.
- |            |         |                          |
|------------|---------|--------------------------|
| a) Doer    | b) Seer | <input type="checkbox"/> |
| c) Enjoyer | d) None |                          |
- 43) All the units of nature can be classified into \_\_\_\_\_ orders.
- |         |          |                          |
|---------|----------|--------------------------|
| a) Two  | b) Three | <input type="checkbox"/> |
| c) Four | d) Six   |                          |
- 44) Which of the following does not form an order in nature?
- |                  |           |                          |
|------------------|-----------|--------------------------|
| a) Bio           | b) Animal | <input type="checkbox"/> |
| c) Consciousness | d) Human  |                          |
- 45) \_\_\_\_\_ is the feeling of acceptance for those who have made efforts for my excellence.
- |              |             |                          |
|--------------|-------------|--------------------------|
| a) Reverence | b) Glory    | <input type="checkbox"/> |
| c) Gratitude | d) Guidance |                          |
- 46) \_\_\_\_\_ is a complete value.
- |              |              |                          |
|--------------|--------------|--------------------------|
| a) Love      | b) Affection | <input type="checkbox"/> |
| c) Gratitude | d) Respect   |                          |
- 47) \_\_\_\_\_ is an extension of family.
- |            |           |                          |
|------------|-----------|--------------------------|
| a) Self    | b) Body   | <input type="checkbox"/> |
| c) Society | d) Nature |                          |
- 48) We all are similar at the level of our \_\_\_\_\_ but differ in our \_\_\_\_.
- |                           |                          |                          |
|---------------------------|--------------------------|--------------------------|
| a) Competence, Intension  | b) Intension, Competence | <input type="checkbox"/> |
| c) Competence, Competence | d) None                  |                          |
- 49) Which of the following statement is not true?
- |                                                         |                          |
|---------------------------------------------------------|--------------------------|
| a) There is interconnectedness in nature                | <input type="checkbox"/> |
| b) There is recyclability and self-regulation in nature |                          |
| c) There is struggle for survival in nature             |                          |
| d) There is mutual fulfillment in nature                |                          |

**50)** According to quantity, which of the following is true for the orders in nature?

- a) Bio order >> Physical order >> Animal order >> Human order
- b) Animal order >> Bio order >> Physical order >> Human order
- c) Physical order >> Bio order >> Animal order >> Human order
- d) Physical order >> Animal order >> Bio order >> Human order

☐

- 10) According to quantity, which of the following is true for the orders in nature?
- a) Bio order >> Physical order >> Animal order >> Human order ☐
- b) Animal order >> Bio order >> Physical order >> Human order
- c) Physical order >> Bio order >> Animal order >> Human order
- d) Physical order >> Animal order >> Bio order >> Human order
- 11) Activities of self (I) are \_\_\_\_\_.  
 a) Happiness  
 b) Desire, thought and Expectation  
 c) Prosperity  
 d) None ☐
- 12) \_\_\_\_\_ is the information we get from the Body through the five sense organs.  
 a) Precondition  
 b) Sensation  
 c) Natural acceptance  
 d) None ☐
- 13) Needs of Body are Temporary whereas needs of Self are continuous \_\_\_\_\_.  
 a) True  
 b) False ☐
- 14) Which of the following is NOT a response of the Self?  
 a) Knowing  
 b) Assuming  
 c) Recognising  
 d) Preconditioning ☐
- 15) Preconditioning is?  
 a) Assuming without knowing  
 b) Knowing without Assuming  
 c) Only Assuming  
 d) Only Knowing ☐
- 16) Needs of Body are qualitative whereas needs of Self are quantitative \_\_\_\_\_.  
 a) True  
 b) False ☐
- 17) Sah-astitva means \_\_\_\_\_.  
 a) Co-existence  
 b) Co-operation  
 c) Cooption  
 d) Corporate identity ☐
- 18) Ensuring justice in the relationship, on the basis of values leads to \_\_\_\_\_ in society.  
 a) Fearlessness  
 b) Confusion  
 c) Confidence  
 d) Fear ☐
- 19) \_\_\_\_\_ is the foundational value in relationship.  
 a) Respect  
 b) Love  
 c) Trust  
 d) Glory ☐
- 20) The feeling to nurture and protect the body of our relative is called \_\_\_\_\_.  
 a) Care  
 b) Affection  
 c) Gratitude  
 d) Respect ☐
- 21) What is NOT acceptable naturally in Nature?  
 a) Enrichment of nature  
 b) Pollution in nature  
 c) Protection of nature  
 d) Right Utilization of nature ☐
- 22) Which of the following is NOT a unit of physical order?  
 a) Soil  
 b) Air  
 c) Tree  
 d) Water ☐

- 

- 24)** Justice from family to world family leads to \_\_\_\_\_.
- a) Powerful nation
  - b) Strong political ties between nations
  - c) Undivided society
  - d) Disruption of the family structure

- 

- 25)** Which of the following is NOT a source of imagination in the self?
- |                    |                       |
|--------------------|-----------------------|
| a) Preconditioning | b) Sensation          |
| c) Thought         | d) Natural Acceptance |

- 

- 26)** Which of the following results from over-evaluation?
- a) Ego                                      b) Depression
- c) Self-confidence                      d) Trust

- 1

- 27)** Which of the following statement is true?
- a) Intention of a human being is always doubtful
  - b) One's intension is always to make the other happy
  - c) Intension of a human keeps varying from time to time
  - d) Intension of a human being can never be understood

- |  |  |
|--|--|
|  |  |
|--|--|

- 28)** Feeling of relationship exists between \_\_\_\_\_.  
 a) Self and self                      b) Body and Body  
 c) Self and body                     d) None of the above

- |  |  |
|--|--|
|  |  |
|--|--|

- 29)** Which of the following is NOT one of the goals at the level of society?
- a) Right Understanding                      b) Fearlessness  
c) Madness for profit                      d) Prosperity

- 30)** Intension of a human being is the same as \_\_\_\_\_.  
a) Natural acceptance                      b) Competence  
c) Thought                                      d) Pre-conditioning

- 10

- 31)** Right Understanding and Physical Facilities lead to \_\_\_\_\_.  
 a) Mutual Happiness                      b) Mutual Prosperity  
 c) Both a and b                          d) All are wrong

- 10

- 32)** Beside physical facilities human being wants \_\_\_\_\_.  
 a) Name                                      b) Fame  
 c) Relationship                            d) None of the above

- |  |  |
|--|--|
|  |  |
|--|--|

- 33)** SVDD stands for \_\_\_\_\_.  
a) Sadhan Viheen Dukhi Daridra  
b) Sadhan Sampan Dukhi Daridra  
c) Sadhan Sampan Sukhi Samridha  
d) None of the above

- 10

- 34)** Natural acceptance does not change with \_\_\_\_\_.  
a) Time                                      b) Place  
c) Beliefs                                    d) All of above

- |  |  |
|--|--|
|  |  |
|--|--|

- 35)** When you are living with pre-conditionings and accumulated desires without evaluating them, then it means that you are \_\_\_\_\_.  
a) Swatantra                      b) Partantra  
c) Prosperous                  d) None

- 10

- 

- 37)** Human being is co-existence of the \_\_\_\_\_ and the \_\_\_\_\_.  
 a) Self, Self                      b) body, body  
 c) self, body                        d) None

- 

- 38)** \_\_\_\_\_ is the feeling of responsibility for nurturing, protecting, and right utilizing the body.

- a) Swasthya                      b) Sanyam  
c) Prosperity                  d) None

- |  |  |
|--|--|
|  |  |

- 1) What is NOT acceptable naturally in Nature?
 

|                         |                                |                      |
|-------------------------|--------------------------------|----------------------|
| a) Enrichment of nature | b) Pollution in nature         | <input type="text"/> |
| c) Protection of nature | d) Right Utilization of nature |                      |
- 2) Which of the following is NOT a unit of physical order?
 

|         |          |                      |
|---------|----------|----------------------|
| a) Soil | b) Air   | <input type="text"/> |
| c) Tree | d) Water |                      |
- 3) There is justice in relationship when there is \_\_\_\_\_.
 

|                       |            |                      |
|-----------------------|------------|----------------------|
| a) self-regulation    | b) freedom | <input type="text"/> |
| c) Mutual fulfillment | d) none    |                      |
- 4) Justice from family to world family leads to \_\_\_\_\_.
 

|                                          |                      |
|------------------------------------------|----------------------|
| a) Powerful nation                       | <input type="text"/> |
| b) Strong political ties between nations |                      |
| c) Undivided society                     |                      |
| d) Disruption of the family structure    |                      |
- 5) Which of the following is NOT a source of imagination in the self?
 

|                    |                       |                      |
|--------------------|-----------------------|----------------------|
| a) Preconditioning | b) Sensation          | <input type="text"/> |
| c) Thought         | d) Natural Acceptance |                      |
- 6) Which of the following results from over-evaluation?
 

|                    |               |                      |
|--------------------|---------------|----------------------|
| a) Ego             | b) Depression | <input type="text"/> |
| c) Self-confidence | d) Trust      |                      |
- 7) Which of the following statement is true?
 

|                                                         |                      |
|---------------------------------------------------------|----------------------|
| a) Intention of a human being is always doubtful        | <input type="text"/> |
| b) One's intension is always to make the other happy    |                      |
| c) Intension of a human keeps varying from time to time |                      |
| d) Intension of a human being can never be understood   |                      |
- 8) Feeling of relationship exists between \_\_\_\_\_.
 

|                  |                      |                      |
|------------------|----------------------|----------------------|
| a) Self and self | b) Body and Body     | <input type="text"/> |
| c) Self and body | d) None of the above |                      |
- 9) Which of the following is NOT one of the goals at the level of society?
 

|                        |                 |
|------------------------|-----------------|
| a) Right Understanding | b) Fearlessness |
| c) Madness for profit  | d) Prosperity   |

- 10) Intension of a human being is the same as \_\_\_\_\_.  
 a) Natural acceptance                      b) Competence  
 c) Thought                                      d) Pre-conditioning ☐
- 11) What is self-Exploration?  
 a) Process of dialogue between what you are and what you really want to be  
 b) Process of self-evolution through self-investigation  
 c) Process of knowing oneself  
 d) All of the above ☐
- 12) Following are the basic guidelines for value education except \_\_\_\_\_.  
 a) Universal                                      b) Personal  
 c) Rational                                      d) Natural ☐
- 13) One of the basic desires of every human being is to be always \_\_\_\_\_.  
 a) Happy                                              b) Sad  
 c) Laugh                                              d) Earn money ☐
- 14) Natural acceptance and \_\_\_\_\_ are the two processes of knowing.  
 a) Self-Actualization                      b) Self-exploration  
 c) Self-Evaluation                              d) Self-control ☐
- 15) Human Life is lived at four levels: Individual, Family, and Society and \_\_\_\_\_.  
 a) Nature                                              b) Nurture  
 c) World                                              d) Universe ☐
- 16) Value education should be based on dogmas or blind beliefs \_\_\_\_\_.  
 a) True                                              b) False ☐
- 17) Value of an entity is \_\_\_\_\_.  
 a) Physical Facility  
 b) Prosperity  
 c) Its participation in the larger order of which it is part  
 d) both a and b ☐
- 18) \_\_\_\_\_ are as Basic Human Aspirations.  
 a) Money  
 b) Relationship without money  
 c) Physical Facility  
 d) Continuous Happiness and Prosperity ☐
- 19) For Human beings, physical facility is not required \_\_\_\_\_.  
 a) True                                              b) False ☐
- 20) Please give the correct priority for Physical Facilities, Right Understanding, and Relationship \_\_\_\_\_.  
 a) Physical Facilities, Right Understanding and Relationship  
 b) Relationship, Right Understanding and Physical Facilities  
 c) Right Understanding, Relationship and Physical Facilities  
 d) None of the above ☐
- 21) \_\_\_\_\_ is the feeling of acceptance for those who have made efforts for my excellence.  
 a) Reverence                                      b) Glory  
 c) Gratitude                                      d) Guidance ☐

- Page 18 of 20

- 35) Preconditioning is?  
 a) Assuming without knowing      b) Knowing without Assuming  
 c) Only Assuming      d) Only Knowing ☐
- 36) Needs of Body are qualitative whereas needs of Self are quantitative \_\_\_\_\_.  
 a) True      b) False ☐
- 37) Sah-astitva means \_\_\_\_\_.  
 a) Co-existence      b) Co-operation  
 c) Cooption      d) Corporate identity ☐
- 38) Ensuring justice in the relationship, on the basis of values leads to \_\_\_\_\_ in society.  
 a) Fearlessness      b) Confusion  
 c) Confidence      d) Fear ☐
- 39) Sadupyog of the Body mean \_\_\_\_\_ of the Body.  
 a) Self-regulation      b) Care  
 c) Happiness      d) Right utilization ☐
- 40) Human being is co-existence of the \_\_\_\_\_ and the \_\_\_\_\_.  
 a) Self, Self      b) body, body  
 c) self, body      d) None ☐
- 41) The feeling to nurture and protect the body of our relative is called \_\_\_\_\_.  
 a) Care      b) Affection  
 c) Gratitude      d) Respect ☐
- 42) Right Understanding and Physical Facilities lead to \_\_\_\_\_.  
 a) Mutual Happiness      b) Mutual Prosperity  
 c) Both a and b      d) All are wrong ☐
- 43) \_\_\_\_\_ is the foundational value in relationship.  
 a) Respect      b) Love  
 c) Trust      d) Glory ☐
- 44) Natural acceptance does not change with \_\_\_\_\_.  
 a) Time      b) Place  
 c) Beliefs      d) All of above ☐
- 45) When you are living with pre-conditionings and accumulated desires without evaluating them, then it means that you are \_\_\_\_\_.  
 a) Swatantra      b) Partantra  
 c) Prosperous      d) None ☐
- 46) \_\_\_\_\_ is the feeling of responsibility for nurturing, protecting, and right utilizing the body.  
 a) Swasthya      b) Sanyam  
 c) Prosperity      d) None ☐
- 47) The activity of desire, thought and expecting together is called as \_\_\_\_\_.  
 a) Body      b) Health  
 c) Imagination      d) Future ☐
- 48) The \_\_\_\_\_ is an instrument of \_\_\_\_\_.  
 a) I, Body      b) Body, I  
 c) Both a and b      d) None ☐

- 49)** Beside physical facilities human being wants \_\_\_\_\_.  
 a) Name  
 b) Fame  
 c) Relationship  
 d) None of the above
- 50)** SVDD stands for \_\_\_\_\_.  
 a) Sadhan Viheen Dukhi Daridra  
 b) Sadhan Sampan Dukhi Daridra  
 c) Sadhan Sampan Sukhi Samridha  
 d) None of the above

Set **P**

**F.Y. (B. Tech) (Sem – II) (CBCS) Examination: Oct/Nov-2022**  
**Engineering Graphics & CAD**

Day & Date: Monday, 06-03-2023  
 Time: 10:00 AM To 01:00 PM

Max. Marks: 70

- Instructions:**
- 1) All questions from each section are compulsory.
  - 2) Figures to the right indicate full marks.
  - 3) Retain all construction lines
  - 4) Assume suitable dimensions, wherever required and mention it clearly.
  - 5) All dimensions are in 'mm'.
  - 6) Return all the answer-sheet supplied irrespective of their use.

**\*Note: Objectives type Question paper must be returned after first 40 minutes strictly.**

**Section – I**

- Q.1 Solve any FOUR: (Objective Type) 14**
1. Attempt any two questions from a) to d)
  2. Questions e) & f) are compulsory.
- a) **Refer Fig.(a):** Complete projection of line AB if **03**
- 1) Its inclination of line with VP is  $50^\circ$
  - 2) Top view length 65mm
  - 3) End point 'B' is 65 mm above HRP. Find True length.
- b) **Refer Fig.(b):** Complete projections of line AB and find its grade if **03**
- 1) True length is 70mm
  - 2) its inclination with VP is  $45^\circ$
  - 3) its inclination with HP is  $30^\circ$
- c) **Refer Fig.(c):** Complete projection of line CD and find its true length if **03**
- 1) grade is 70% w.r.to 'C'
  - 2) Bearing is S 55 E w.r.to 'C'
  - 3) Top view of line measure 60mm.
- d) **Refer Fig.(d):** Complete projection of line PQ if **03**
- 1) its inclination with horizontal plane is  $45^\circ$
  - 2) Bearing with respect to Q is N 60 W
  - 3) Elevation length is 60 mm. Find True length.
- e) **Refer Fig.(e):** Complete projections of an equilateral triangle ABC **04**
- f) **Refer Fig.(f) :** Find the strike and Dip of Plane PQR **04**
- Q.2 Solve the following: 11**
- a) A line AB has its front view length of 50 mm with a true length of 70 mm. **04**  
 The inclination with horizontal reference plane is  $45^\circ$ . Draw the projections of AB & find its true inclination with frontal reference plane. Consider point A 20 mm above horizontal reference plane and 20 mm in front of vertical plane.

- b) A line AB carries a front view length of 50 mm and apparent inclination of  $45^\circ$  with horizontal reference plane. The line carries a true inclination of  $30^\circ$  with frontal reference plane. Complete the projections of the line and determine the true inclination with horizontal reference plane. Consider point A 20 mm above horizontal reference plane and 20 mm in front of vertical plane. **03**
- c) A rhombus ABCD having diagonals 50 mm and 80 mm long has its corner A in the frontal plane. The longer diagonal inclined at  $45^\circ$  to frontal plane. Complete the projections. **04**

**Q.3** A hexagon of 30 mm side has its side AB in horizontal reference plane and inclined at  $35^\circ$  to frontal reference plane. The surface of the plane makes an angle of  $45^\circ$  with the horizontal reference plane. Complete the projections of the plane. **07**

**Q.4** A Square prism, side of base 40 mm & axis 60 mm long has a corner of base in Horizontal reference plane and the axis is inclined at  $40^\circ$  to horizontal reference plane. The lower edge through the corner in horizontal reference plane makes  $30^\circ$  to vertical reference plane. Complete its projections. **10**

**OR**

A square pyramid, base 40 mm side & axis 60 mm long, has side of base in horizontal reference plane & inclined at  $30^\circ$  to vertical reference plane. The axis of the pyramid is inclined at  $45^\circ$  to horizontal reference plane. Complete its projections, when the apex is nearer to observer.

## Section – II

- Q.5** Fig. Shows isometric view of machine component. Draw the following views **18**
- Sectional F. V. looking in the direction FV (Section A-A)
  - Right hand side view
  - Top view

- Q.6** A square pyramid base 30 mm side and axis 50 mm long stands vertically on the ground with the edge of the base equally inclined to vertical plane. It is cut by a section plane perpendicular to vertical reference plane and inclined at  $45^\circ$  to horizontal reference plane, passing through a point on axis 20 mm from apex. Draw the front view, sectional top view and true shape of section. **10**

**OR**

A cylinder, diameter of base 60 mm & height 80 mm has its base in horizontal reference plane. It is to be cut by an auxiliary inclined plane in such a way that true shape of section is an ellipse with maximum possible size. Draw front view, sectional top view and true shape of section.

**Seat  
No.**

Max. Marks: 70

- 2) Don't forget to Mention question paper set (P/Q/R/S) on top of page.
- 3) Figures to the right indicates full marks.
- 4) Assume suitable data wherever needed and mention it clearly.

Marks: 14

14

- Page 1 of 16

- 10)** The collector of transistor is \_\_\_\_\_ doped.
- |               |            |
|---------------|------------|
| a) Lightly    | b) Heavily |
| c) Moderately | d) None    |
- 11)** In transistor \_\_\_\_\_.
- |                      |                      |
|----------------------|----------------------|
| a) $I_C = I_E + I_B$ | b) $I_B = I_C + I_E$ |
| c) $I_E = I_C - I_B$ | d) $I_E = I_C + I_B$ |
- 12)** The gauge factor is defined as
- |                                  |                                            |
|----------------------------------|--------------------------------------------|
| a) $(\Delta L/L) / (\Delta R/R)$ | b) $(\Delta R/R) / (\Delta L/L)$           |
| c) $(\Delta R/R) / (\Delta D/D)$ | d) $(\Delta R/R) / (\Delta \sigma/\sigma)$ |
- 13)** What is moving part of LVDT
- |              |              |
|--------------|--------------|
| a) Primary   | b) Secondary |
| c) Diaphragm | d) Core      |
- 14)** 1's complement of  $(10111010)_2$  is
- |                   |                |
|-------------------|----------------|
| a) $(01000101)_2$ | b) $(11111)_2$ |

**F.Y (B. Tech) (Sem-II) (CBCS) Examination: Oct/Nov-2022**  
**Basic Electrical & Electronics Engineering**

Day & Date: Wednesday, 08-03-2023  
 Time: 10:00 AM To 01:00 PM

Max. Marks: 56

**Instructions:** 1) All question are compulsory.  
 2) Section I and Section II are compulsory.

**Section – I**

**Q.2 Solve any four.** **16**

- a) Define resistance and discuss the factors on which resistance of conductor material depends.
- b) Two coils connected in series have a resistance of  $18\Omega$  and when connected in parallel have a resistance of  $4\Omega$ . Find the value of resistances.
- c) Explain the term (i) mmf, (ii) Flux, (iii) Permeability, (iv) Reluctance.
- d) Define and derive expression for average value for sinusoidal current in terms of its maximum value.
- e) Derive expression for purely capacitive circuit. Explain concept of capacitive reactance.
- f) Derive the relationship between line and phase quantities in balanced star connected 3 - phase load.

**Q.3 Solve any two.** **12**

- a) Describe the importance of delta - star transformation. If three resistances are connected in delta - connection, then find the equivalent values of these resistances for star – connections.
- b) A coil of resistance  $10\Omega$  and an inductance of  $0.2H$  is connected in series with a capacitor of  $50.7\mu F$ . The circuit is connected across a  $100V$ ,  $50Hz$ , single phase supply. Find i) the current flowing ii) the voltage across capacitors iii) the voltage across the coil iv) power factor of the coil. Draw the phasor diagram.
- c) A flux density of  $1.3T$  is required in  $3.5mm$  air gap of an electromagnet wound with  $550$  turns of wire and having an iron path of  $130cm$ . calculate the current required assuming that a relative permeability of  $1200$  for iron and neglecting the leakage and fringing.

**Section II**

**Q.4 Solve any four.** **16**

- a) Explain working of BJT as switch.
- b) Explain Full wave rectifier with necessary diagrams.
- c) Convert (DBD)  $H$  to decimal and octal.
- d) What is meant by universal gate? Derive basic gates using NAND and NOR gate.
- e) Explain thermocouple for the measurement of temp. In detail.
- f) Explain VI characteristics of PN junction diode.

**Q.5 Solve any two**

- a)** Explain the following transducer: 1) Thermocouple 2) Load Cell
- b)** Explain construction and operation of light emitting diode. Write applications of it and explain any one in detail.
- c)** Explain with symbol, equation, truth table following logic gates.
  - a) XOR b) NAND c) NOR d) NOT e) AND

**Seat  
No.**

Max. Marks: 70

Marks: 14

14

- 10) The basic requirement for inducing e.m.f in a coil is that \_\_\_\_\_.  
a) lux should link the coil  
b) there should be change in lux linking the coil  
c) coil should form a closed loop  
d) none of the above
- 11) The capacitive reactance  $X_c$  \_\_\_\_\_ with \_\_\_\_\_ in frequency.  
a) Increases, increase  
b) Decreases, decreases  
c) Increases, decreases  
d) Remains constant, any change
- 12) For R-L-C series circuit if  $X_L = X_C$  then then power factor  $\cos \phi =$   
a) 1  
b) 0  
c) 0.1  
d) 0.5
- 13) The power taken by a 3 -  $\phi$  load is given by the expression  
a)  $3V_{LL} \cos \phi$   
b)  $\sqrt{3}V_{LL} \cos \phi$   
c)  $3V_{LL} \sin \phi$   
d)  $\sqrt{3}V_{LL} \sin \phi$
- 14) A 3 - phase load is balanced if all the three phases have the same \_\_\_\_\_.  
a) Impedance  
b) power factor  
c) impedance & power factor  
d) none of these

 Time: 10:00 AM To 01:00 PM

Max. Marks: 70

- Instructions:** 1) Q. No. 1 is compulsory. It should be solved in the first 30 minutes in answer book. Page no 03 (Starting page of the Answer Book). Each question carries one mark.  
 2) Don't forget to Mention question paper set (P/Q/R/S) on top of page.  
 3) Figures to the right indicates full marks.  
 4) Assume suitable data wherever needed and mention it clearly.

**MCQ/Objective Type Questions**

Duration: 30 Minutes

Marks: 14

**Q.1 Choose the correct alternatives from the options.**

**14**

- 1) In transistor \_\_\_\_\_.
  - a)  $I_c = I_E + I_B$
  - b)  $I_B = I_c + I_E$
  - c)  $I_E = I_c - I_B$
  - d)  $I_E = I_c + I_B$
- 2) The gauge factor is defined as
  - a)  $(\Delta L/L) / (\Delta R/R)$
  - b)  $(\Delta R/R) / (\Delta L/L)$
  - c)  $(\Delta R/R) / (\Delta D/D)$
  - d)  $(\Delta R/R) / (\Delta \sigma/\sigma)$
- 3) What is moving part of LVDT
  - a) Primary
  - b) Secondary
  - c) Diaphragm
  - d) Core
- 4) 1's complement of  $(10111010)_2$  is
  - a)  $(01000101)_2$
  - b)  $(11111)_2$
  - c)  $(010001)_2$
  - d)  $(1111)_2$
- 5) Unit of resistivity is \_\_\_\_\_.
  - a)  $\Omega.m$
  - b)  $\Omega.m^2$
  - c)  $\Omega$
  - d) m
- 6) Flux density  $B = ?$ 
  - a)  $\mu_o \mu_r / H$
  - b)  $\mu_o H / \mu_r$
  - c)  $\mu_o \mu_r H$
  - d)  $(\mu_o)^2 H$
- 7) The basic requirement for inducing e.m.f in a coil is that \_\_\_\_\_.
  - a) flux should link the coil
  - b) there should be change in flux linking the coil
  - c) coil should form a closed loop
  - d) none of the above
- 8) The capacitive reactance  $X_c$  \_\_\_\_\_ with \_\_\_\_\_ in frequency.
  - a) Increases, increase
  - b) Decreases, decreases
  - c) Increases, decreases
  - d) Remains constant, any change
- 9) For R-L-C series circuit if  $X_L = X_C$  then power factor  $\cos \phi =$ 
  - a) 1
  - b) 0
  - c) 0.1
  - d) 0.5

Set **R**

**F.Y (B. Tech) (Sem-II) (CBCS) Examination: Oct/Nov-2022**  
**Basic Electrical & Electronics Engineering**

Day & Date: Wednesday, 08-03-2023  
 Time: 10:00 AM To 01:00 PM

Max. Marks: 56

**Instructions:** 1) All question are compulsory.  
 2) Section I and Section II are compulsory.

**Section – I**

**Q.2 Solve any four.** **16**

- a) Define resistance and discuss the factors on which resistance of conductor material depends.
- b) Two coils connected in series have a resistance of  $18\Omega$  and when connected in parallel have a resistance of  $4\Omega$ . Find the value of resistances.
- c) Explain the term (i) mmf, (ii) Flux, (iii) Permeability, (iv) Reluctance.
- d) Define and derive expression for average value for sinusoidal current in terms of its maximum value.
- e) Derive expression for purely capacitive circuit. Explain concept of capacitive reactance.
- f) Derive the relationship between line and phase quantities in balanced star connected 3 - phase load.

**Q.3 Solve any two.** **12**

- a) Describe the importance of delta - star transformation. If three resistances are connected in delta - connection, then find the equivalent values of these resistances for star – connections.
- b) A coil of resistance  $10\Omega$  and an inductance of  $0.2H$  is connected in series with a capacitor of  $50.7\mu F$ . The circuit is connected across a  $100V$ ,  $50Hz$ , single phase supply. Find i) the current flowing ii) the voltage across capacitors iii) the voltage across the coil iv) power factor of the coil. Draw the phasor diagram.
- c) A flux density of  $1.3T$  is required in  $3.5mm$  air gap of an electromagnet wound with  $550$  turns of wire and having an iron path of  $130cm$ . calculate the current required assuming that a relative permeability of  $1200$  for iron and neglecting the leakage and fringing.

**Section II**

**Q.4 Solve any four.** **16**

- a) Explain working of BJT as switch.
- b) Explain Full wave rectifier with necessary diagrams.
- c) Convert (DBD)  $H$  to decimal and octal.
- d) What is meant by universal gate? Derive basic gates using NAND and NOR gate.
- e) Explain thermocouple for the measurement of temp. In detail.
- f) Explain VI characteristics of PN junction diode.

**Q.5 Solve any two**

- a)** Explain the following transducer: 1) Thermocouple 2) Load Cell
- b)** Explain construction and operation of light emitting diode. Write applications of it and explain any one in detail.
- c)** Explain with symbol, equation, truth table following logic gates.
  - a) XOR b) NAND c) NOR d) NOT e) AND

Day & Date: Wednesday, 08-03-2023  
 Time: 10:00 AM To 01:00 PM

Max. Marks: 70

- Instructions:** 1) Q. No. 1 is compulsory. It should be solved in the first 30 minutes in answer book. Page no 03 (Starting page of the Answer Book). Each question carries one mark.  
 2) Don't forget to Mention question paper set (P/Q/R/S) on top of page.  
 3) Figures to the right indicates full marks.  
 4) Assume suitable data wherever needed and mention it clearly.

**MCQ/Objective Type Questions**

Duration: 30 Minutes

Marks: 14

**Q.1 Choose the correct alternatives from the options.**

**14**

- 1) The power taken by a 3 -  $\phi$  load is given by the expression
 

|                      |                             |
|----------------------|-----------------------------|
| a) $3V_{LL}\cos\phi$ | b) $\sqrt{3}V_{LL}\cos\phi$ |
| c) $3V_{LL}\sin\phi$ | d) $\sqrt{3}V_{LL}\sin\phi$ |
- 2) A 3 - phase load is balanced if all the three phases have the same \_\_\_\_\_.
 

|                             |                  |
|-----------------------------|------------------|
| a) Impedance                | b) power factor  |
| c) impedance & power factor | d) none of these |
- 3) With forward bias to a pn junction, the width of depletion layer \_\_\_\_\_.
 

|                     |              |
|---------------------|--------------|
| a) decreases        | b) increases |
| c) remains the same | d) none      |
- 4) PIV in full wave rectifier used in a centre tapped transformer is \_\_\_\_\_.
 

|              |               |
|--------------|---------------|
| a) $V_m/\pi$ | b) $2V_m/\pi$ |
| c) $2V_m$    | d) $V_m$      |
- 5) The collector of transistor is \_\_\_\_\_ doped.
 

|               |            |
|---------------|------------|
| a) Lightly    | b) Heavily |
| c) Moderately | d) None    |
- 6) In transistor \_\_\_\_\_.
 

|                      |                      |
|----------------------|----------------------|
| a) $I_C = I_E + I_B$ | b) $I_B = I_C + I_E$ |
| c) $I_E = I_C - I_B$ | d) $I_E = I_C + I_B$ |
- 7) The gauge factor is defined as
 

|                                  |                                            |
|----------------------------------|--------------------------------------------|
| a) $(\Delta L/L) / (\Delta R/R)$ | b) $(\Delta R/R) / (\Delta L/L)$           |
| c) $(\Delta R/R) / (\Delta D/D)$ | d) $(\Delta R/R) / (\Delta \sigma/\sigma)$ |
- 8) What is moving part of LVDT
 

|              |              |
|--------------|--------------|
| a) Primary   | b) Secondary |
| c) Diaphragm | d) Core      |
- 9) 1's complement of  $(10111010)_2$  is
 

|                   |                |
|-------------------|----------------|
| a) $(01000101)_2$ | b) $(11111)_2$ |
| c) $(010001)_2$   | d) $(1111)_2$  |
- 10) Unit of resistivity is \_\_\_\_\_.
 

|               |                 |
|---------------|-----------------|
| a) $\Omega.m$ | b) $\Omega.m^2$ |
| c) $\Omega$   | d) m            |

- 11) Flux density  $B = ?$
- |                      |                      |
|----------------------|----------------------|
| a) $\mu_o \mu_r / H$ | b) $\mu_o H / \mu_r$ |
| c) $\mu_o \mu_r H$   | d) $(\mu_o)^2 H$     |
- 12) The basic requirement for inducing e.m.f in a coil is that \_\_\_\_.
- a) lux should link the coil
  - b) there should be change in lux linking the coil
  - c) coil should form a closed loop
  - d) none of the above
- 13) The capacitive reactance  $X_c$  \_\_\_\_\_ with \_\_\_\_\_ in frequency.
- |                         |                                 |
|-------------------------|---------------------------------|
| a) Increases, increase  | b) Decreases, decreases         |
| c) Increases, decreases | d) Remains constant, any change |
- 14) For R-L-C series circuit if  $X_L = X_C$  then then power factor  $\cos \phi =$
- |        |        |
|--------|--------|
| a) 1   | b) 0   |
| c) 0.1 | d) 0.5 |

**F.Y (B.Tech.) (Sem-II) (CBCS) Examination: Oct/Nov-2022**  
**Engineering Mathematics – II**

Day & Date: Thursday, 09-03-2023  
 Time: 10:00 AM To 01:00 PM

Max. Marks: 56

**Instructions:** 1) All questions are compulsory.  
 2) Figures to the right indicate full marks.

**Section – I**

**Q.2 Answer any three questions.** **09**

- Solve  $(1 + y^2)dx = \{\sqrt{1 + y^2} \sin y - xy\} dy$
- Show that continued product of  $\left(\frac{1}{2} + i\frac{\sqrt{3}}{2}\right)^{\frac{3}{4}}$  is 1
- Solve  $(3y + 2x + 4)dx - (4x + 6y + 5)dy = 0$
- Construct an analytic function whose imaginary part is  $v = \sin hx \cos y$
- Test the convergence of  $\sum \frac{n^3+2}{2^{n+2}}$  by using D' Alemberts ratio test.

**Q.3 Answer any three questions.** **09**

- Solve  $\left(xy^2 - e^{-\frac{1}{x^3}}\right) dx - x^2y dy = 0$
- Find the orthogonal trajectory of family of cardioid  $r = a(1 + \cos \theta)$
- Determine  $k$  such that  $f(z) = \frac{1}{2} \log(x^2 + y^2) + i \tan^{-1}\left(\frac{kx}{y}\right)$  is an analytic function.
- Test the convergence of  $\frac{3x}{4} + \left(\frac{4}{5}\right)^2 x^2 + \left(\frac{5}{6}\right)^3 x^3 + \dots + \left(\frac{n+2}{n+3}\right)^n x^n + \dots$  by using Cauchy  $n^{\text{th}}$  root test.
- Construct the analytic function  $f(z) = u + iv$  in terms of  $z$  if,  
 $u + v = e^x(\cos y + \sin y)$

**Q.4 Answer any two questions.** **10**

- When a switch is closed, the current built up in an electric circuit is given by  $L \frac{di}{dt} + Ri = E$  if  $L = 640$ ,  $R = 250$ ,  $E = 500$ , and  $i = 0$  when  $t = 0$ .  
 Show the current will approach 2 amp. When  $t \rightarrow \infty$ .
- Show that  $u = e^x \cos y$  is harmonic function. Find its harmonic conjugate and the corresponding analytic function.
- Test the convergence of  $\frac{1^2}{1^3+1} + \frac{2^2}{2^3+1} + \frac{3^2}{3^3+1} + \dots$  by using comparison test.

## Section – II

**Q.5 Answer any three questions.****09**

- a) Evaluate  $\int_0^2 x^4 (8 - x^3)^{-\frac{1}{3}} dx$
- b) Trace the following curves with full justification  
 $r = a \cos 3\theta$
- c) Evaluate,  $\int_0^\pi x \sin^5 x \cos^8 x dx$
- d) Find by double integration the area between the circles  
 $r = 2 \sin(\theta)$  and  $r = 4 \sin(\theta)$
- e) Evaluate by changing to polar co-ordinates  $\int_0^{4a} \int_{y^2/4a}^y \frac{x^2 - y^2}{x^2 + y^2} dx dy$ .

**Q.6 Attempt any three****09**

- a) Evaluate  $\int_0^\infty x^5 5^{-x} dx$
- b) Evaluate  $\int_{-1}^1 \int_0^z \int_{x-z}^{x+z} y dy dx dz$
- c) In a lamina in the form of ellipse  $\frac{x^2}{a^2} + \frac{y^2}{b^2} = 1$ , density at any point varies as product of its distance from axis of ellipse. Find the mass.
- d) Trace the following curves with full justification.  $x = t + \sin t$ ,  $y = 1 - \cos t$
- e) Prove that  $\int_0^\infty \frac{\tan^{-1} ax - \tan^{-1} bx}{x} dx = \frac{\pi}{2} \log\left(\frac{a}{b}\right)$  where a is parameter  
 (By using differentiation under integral sign).

**Q.7 Attempt any two****10**

- a) Change the order of integration and Evaluate  $\int_0^\infty \int_0^x e^{\frac{-x^2}{y}} x dx dy$
- b) State and Prove Duplication Formula.
- c) Trace the following curves with full justification.  
 $x y^2 = a (x^2 - a^2)$

**Q.1 Choose the correct alternatives from the options.**

14

- 1) Value of  $\Gamma(1/2)$  is = \_\_\_\_\_.  
a) 0  
b)  $1/2$   
c)  $\pi$   
d)  $\sqrt{\pi}$
- 2) If  $f(z) = u(x, y) + iv(x, y)$  is an analytic function then it satisfies \_\_\_\_\_.  
a)  $v_x = -u_y$   
b)  $v_y = u_x$   
c) both a & b  
d) None
- 3) If  $\lim_{n \rightarrow \infty} \sqrt[n]{u_n} > 1$  then  $\sum u_n$  is \_\_\_\_\_.  
a) convergent  
b) divergent  
c) oscillatory  
d) none of these
- 4) In the integral  $\int_0^1 \int_0^y \int_0^{x^2 y} f(x, y, z) dx dy dz$  integration is taken \_\_\_\_\_.  
a) first w.r.t.  $z$  then w.r.t.  $y$  then w.r.t.  $x$   
b) first w.r.t.  $z$  then w.r.t.  $x$  then w.r.t.  $y$   
c) first w.r.t.  $x$  then w.r.t.  $y$  then w.r.t.  $z$   
d) first w.r.t.  $y$  then w.r.t.  $y$  then w.r.t.  $x$
- 5) The Orthogonal trajectories of the family of curves  $xy = a$  is \_\_\_\_\_.  
a)  $x^2 - y^2 = c$   
b)  $x^2 + y^2 = c$   
c)  $x = cy$   
d)  $y^2 = 4cx$
- 6) The solution of the differential equation  $x dx + y dy = 0$  is \_\_\_\_\_.  
a)  $xy = c$   
b)  $x + y = c$   
c)  $x^2 y^2 = c$   
d)  $x^2 + y^2 = c$
- 7) The value of  $\int_0^\infty e^{-x^4} dx$  is \_\_\_\_\_.  
a)  $\frac{1}{2} \sqrt{\frac{1}{3}}$   
b)  $\frac{1}{4} \sqrt{\frac{1}{4}}$   
c)  $\frac{1}{4} \sqrt{\frac{1}{3}}$   
d)  $\frac{1}{3} \sqrt{\frac{1}{4}}$

- Find the orthogonal trajectory of family of cardioid  $r = a(1 + \cos \theta)$
- Determine  $k$  such that  $f(z) = \frac{1}{2} \log(x^2 + y^2) + i \tan^{-1}\left(\frac{kx}{y}\right)$  is an analytic function.
- Test the convergence of  $\frac{3x}{4} + \left(\frac{4}{5}\right)^2 x^2 + \left(\frac{5}{6}\right)^3 x^3 + \dots + \left(\frac{n+2}{n+3}\right)^n x^n + \dots$  by using Cauchy  $n^{\text{th}}$  root test.
- Construct the analytic function  $f(z) = u + iv$  in terms of  $z$  if,  
 $u + v = e^x(\cos y + \sin y)$

**Q.4 Answer any two questions.** **10**

- When a switch is closed, the current built up in an electric circuit is given by  $L \frac{di}{dt} + Ri = E$  if  $L = 640$ ,  $R = 250$ ,  $E = 500$ , and  $i = 0$  when  $t = 0$ .  
 Show the current will approach 2 amp. When  $t \rightarrow \infty$ .
- Show that  $u = e^x \cos y$  is harmonic function. Find its harmonic conjugate and the corresponding analytic function.
- Test the convergence of  $\frac{1^2}{1^3+1} + \frac{2^2}{2^3+1} + \frac{3^2}{3^3+1} + \dots$  by using comparison test.

## Section – II

**Q.5 Answer any three questions.****09**

- a) Evaluate  $\int_0^2 x^4 (8 - x^3)^{-\frac{1}{3}} dx$
- b) Trace the following curves with full justification  
 $r = a \cos 3\theta$
- c) Evaluate,  $\int_0^\pi x \sin^5 x \cos^8 x dx$
- d) Find by double integration the area between the circles  
 $r = 2 \sin(\theta)$  and  $r = 4 \sin(\theta)$
- e) Evaluate by changing to polar co-ordinates  $\int_0^{4a} \int_{y^2/4a}^y \frac{x^2 - y^2}{x^2 + y^2} dx dy$ .

**Q.6 Attempt any three****09**

- a) Evaluate  $\int_0^\infty x^5 5^{-x} dx$
- b) Evaluate  $\int_{-1}^1 \int_0^z \int_{x-z}^{x+z} y dy dx dz$
- c) In a lamina in the form of ellipse  $\frac{x^2}{a^2} + \frac{y^2}{b^2} = 1$ , density at any point varies as product of its distance from axis of ellipse. Find the mass.
- d) Trace the following curves with full justification.  $x = t + \sin t$ ,  $y = 1 - \cos t$
- e) Prove that  $\int_0^\infty \frac{\tan^{-1} ax - \tan^{-1} bx}{x} dx = \frac{\pi}{2} \log\left(\frac{a}{b}\right)$  where a is parameter  
 (By using differentiation under integral sign).

**Q.7 Attempt any two****10**

- a) Change the order of integration and Evaluate  $\int_0^\infty \int_0^x e^{\frac{-x^2}{y}} x dx dy$
- b) State and Prove Duplication Formula.
- c) Trace the following curves with full justification.  
 $x y^2 = a (x^2 - a^2)$

Day & Date: Thursday, 09-03-2023  
Time: 10:00 AM To 01:00 PM

Max. Marks: 70

**Instructions:** 1) Q. No. 1 is compulsory. It should be solved in the first 30 minutes in answer book. Page no 03 (Starting page of the Answer Book). Each question carries one mark.  
2) Don't forget to Mention question paper set (P/Q/R/S) on top of page.  
3) Figures to the right indicates full mark.

Duration: 30 Minutes

Marks: 14

**Q.1 Choose the correct alternatives from the options.**

14

- 1) A double point is called a node if the two tangents there are \_\_\_\_\_.  
a) Coincident  
b) imaginary  
c) real and distinct  
d) none of these
- 2)  $\left[ \sin\left(\frac{\pi}{3}\right) + i \cos\left(\frac{\pi}{3}\right) \right]^4$  is equal to \_\_\_\_\_.  
a)  $\sin\frac{4\pi}{3} + i \cos\frac{4\pi}{3}$   
b)  $\sin\frac{\pi}{12} + i \cos\frac{\pi}{12}$   
c)  $-i \sin\frac{2\pi}{3} + \cos\frac{2\pi}{3}$   
d)  $\cos\frac{2\pi}{3} + i \sin\frac{2\pi}{3}$
- 3) If the differential equation  $(x^4 e^x - 2mxy^2)dx + 4x^2 y dy = 0$  is exact then the value of  $m =$  \_\_\_\_\_.  
a) 1  
b) -4  
c) -1  
d) -2
- 4)  $\sin(ix)$  is equal to \_\_\_\_\_.  
a)  $\sinh x$   
b)  $i \sin x$   
c)  $-\sin ix$   
d)  $i \sinh x$
- 5)  $\int_0^{\frac{\pi}{2}} \int_0^1 r^3 \sin \theta \cdot \cos \theta \, dr \cdot d\theta$   
a)  $\pi/4$   
b)  $\pi/8$   
c)  $1/8$   
d)  $1/4$
- 6) Value of  $\Gamma(1/2)$  is \_\_\_\_\_.  
a) 0  
b)  $1/2$   
c)  $\pi$   
d)  $\sqrt{\pi}$
- 7) If  $f(z) = u(x, y) + iv(x, y)$  is an analytic function then it satisfies \_\_\_\_\_.  
a)  $v_x = -u_y$   
b)  $v_y = u_x$   
c) both a & b  
d) None

**Engineering Mathematics – II**

Day & Date: Thursday, 09-03-2023  
 Time: 10:00 AM To 01:00 PM

Max. Marks: 56

**Instructions:** 1) All questions are compulsory.  
 2) Figures to the right indicate full marks.

**Section – I**

**Q.2 Answer any three questions.** **09**

- Solve  $(1 + y^2)dx = \{\sqrt{1 + y^2} \sin y - xy\} dy$
- Show that continued product of  $\left(\frac{1}{2} + i\frac{\sqrt{3}}{2}\right)^{\frac{3}{4}}$  is 1
- Solve  $(3y + 2x + 4)dx - (4x + 6y + 5)dy = 0$
- Construct an analytic function whose imaginary part is  $v = \sin hx \cos y$
- Test the convergence of  $\sum \frac{n^3+2}{2^{n+2}}$  by using D' Alemberts ratio test.

**Q.3 Answer any three questions.** **09**

- Solve  $(xy^2 - e^{-\frac{1}{x^3}}) dx - x^2y dy = 0$
- Find the orthogonal trajectory of family of cardioid  $r = a(1 + \cos \theta)$
- Determine  $k$  such that  $f(z) = \frac{1}{2} \log(x^2 + y^2) + i \tan^{-1}\left(\frac{ky}{x}\right)$  is an analytic function.
- Test the convergence of  $\frac{3x}{4} + \left(\frac{4}{5}\right)^2 x^2 + \left(\frac{5}{6}\right)^3 x^3 + \dots + \left(\frac{n+2}{n+3}\right)^n x^n + \dots$  by using Cauchy  $n^{\text{th}}$  root test.
- Construct the analytic function  $f(z) = u + iv$  in terms of  $z$  if,  
 $u + v = e^x(\cos y + \sin y)$

**Q.4 Answer any two questions.** **10**

- When a switch is closed, the current built up in an electric circuit is given by  $L \frac{di}{dt} + Ri = E$  if  $L = 640$ ,  $R = 250$ ,  $E = 500$ , and  $i = 0$  when  $t = 0$ .  
 Show the current will approach 2 amp. When  $t \rightarrow \infty$ .
- Show that  $u = e^x \cos y$  is harmonic function. Find its harmonic conjugate and the corresponding analytic function.
- Test the convergence of  $\frac{1^2}{1^3+1} + \frac{2^2}{2^3+1} + \frac{3^2}{3^3+1} + \dots$  by using comparison test.

**F. Y. (B.Tech.) (Sem - II) (CBCS) Examination: Oct/Nov-2022**  
**ENGINEERING PHYSICS**

Day & Date: Friday, 10-03-2023

Max. Marks: 56

Time: 10:00 AM To 01:00 PM

- Instructions:** 1) All questions are compulsory.  
2) Make suitable assumptions, if necessary.  
3) Figures to the right indicate full marks.

**Section – I**

**Q.2 Answer the following questions. (Any Six)**

**18**

- Define atomic radius and obtain its values for SC and BCC.
- Derive an expression for Fermi energy in intrinsic semiconductors.  
$$E_F = \frac{E_g}{2}$$
- Classify: conductor, insulator and semiconductor on the basis of energy band structure.
- State: Properties of ultrasonic waves.
- Derive an expression for Length contraction.
- State and explain: Sabine Formula.
- A classroom has dimensions 20 x 15 x 5 m<sup>3</sup>. The reverberation time is 3.5 sec. Calculate the total absorption of its surfaces and the average absorption coefficient.
- Polonium belongs to SC lattice. If the lattice constant is 3.36Å<sup>0</sup>, calculate its density. The atomic mass of polonium is 209.

**Q.3 Answer the following questions. (Any Two)**

**10**

- What is Hall effect? Derive the relation for Hall voltage (V<sub>H</sub>) and Hall coefficient (R<sub>H</sub>).
- Explain the term Miller indices. Derive the relation between lattice constant and interplanar spacing for cubic crystal.

$$d = \frac{a}{\sqrt{h^2 + k^2 + l^2}}$$

- State and explain the factors affecting architectural acoustics and their remedies.
- Derive an expression for E = m.c<sup>2</sup>
  - A rod has length 100 cm. When the rod is in a satellite moving with a velocity that is one half of the velocity of light relative to laboratory. What is the length of the rod as determined by an observer
    - in the satellite and
    - in the laboratory

**Section – II**

- Q.4 Answer the following questions. (Any Six) 18**
- a) Derive an expression for the resolving power of a plane diffraction grating.
  - b) Distinguish between positive and negative crystals.
  - c) Explain in brief:
    - 1) Stimulated Emission and
    - 2) Spontaneous Emission
  - d) Write properties of LASER.
  - e) Explain structure of optical fibers with neat labeled diagrams.
  - f) Give applications of nanotechnology in different fields.
  - g) Calculate the numerical aperture and acceptance angle for an optical fibre with core and cladding refractive indices being 1.5 and 1.4 respectively.
  - h) Calculate the De-Broglie wavelength of electron traversing through the potential of 100V (Given:  $h = 6.63 \times 10^{-34} \text{ Js}$ ,  $m = 9.1 \times 10^{-31} \text{ kg}$ )
- Q.5 Answer the following questions. (Any Two) 10**
- a) Obtain the expression for acceptance angle, acceptance cone, numerical aperture and fractional refractive index change of an optical fiber.
  - b) Describe Laurent's half shade polarimeter for the determination of specific rotation of the substance.
  - c)
    - 1) Calculate specific rotation, if the plane of polarization is rotated through  $22^\circ$ . Length of tube is 20 cm. Given: Density of solution 20%.
    - 2) What is the highest order spectrum which may be seen with monochromatic light of wavelength  $6000 \times 10^{-8} \text{ cm}$  by means of diffraction grating with 5000 lines per cm.
  - d) Describe He-Ne laser with its construction and working.

**MCQ/Objective Type Questions**

Duration: 30 Minutes

Marks: 14

**Q.1 Choose the correct alternatives from the options.**

**14**

- 1) Maximum number of orders possible with a grating is \_\_\_\_\_.  
a) independent of grating element  
b) directly proportional to grating element  
c) Inversely proportional to grating element  
d) directly proportional to the wavelength of light
- 2) Light waves are transverse in nature, can be demonstrated by observing the phenomenon of \_\_\_\_\_.  
a) Dispersion  
b) Diffraction  
c) Polarization  
d) Interference
- 3) Holography means \_\_\_\_\_.  
a) To get 2D image of 3D object  
b) To get zero dimension image  
c) To get 3D image of 3D object  
d) To get 3D image of 2D object
- 4) Stimulated emission process is represented by equation \_\_\_\_\_.  
a)  $A^* \rightarrow A + h\nu$   
b)  $A^* + h\nu \rightarrow A + 2h\nu$   
c)  $A + h\nu \rightarrow A^*$   
d)  $A^* + h\nu \rightarrow A + h\nu$
- 5) In total internal reflection phenomenon, the light ray incident from \_\_\_\_\_.  
a) Rarer to denser  
b) Denser to denser  
c) Rarer to rarer  
d) Denser to rarer
- 6) Single Wall Carbon Nanotubes (SWCNT) have diameters ranging from \_\_\_\_\_.  
a) 2 to 25 nm  
b) 1 to 25 nm  
c) 2 to 50 nm  
d) 1 to 2 nm
- 7) Which of the following proved the De Broglie equation was correct?  
a) Planks equation  
b) Quantum mechanics  
c) Einstein's theory of relativity  
d) Davisson Germer experiment

**F. Y. (B.Tech.) (Sem - II) (CBCS) Examination: Oct/Nov-2022**  
**ENGINEERING PHYSICS**

Day & Date: Friday, 10-03-2023  
Time: 10:00 AM To 01:00 PM

Max. Marks: 56

- Instructions:** 1) All questions are compulsory.  
2) Make suitable assumptions, if necessary.  
3) Figures to the right indicate full marks.

**Section – I**

**Q.2 Answer the following questions. (Any Six)** **18**

- Define atomic radius and obtain its values for SC and BCC.
- Derive an expression for Fermi energy in intrinsic semiconductors.  
$$E_F = \frac{E_g}{2}$$
- Classify: conductor, insulator and semiconductor on the basis of energy band structure.
- State: Properties of ultrasonic waves.
- Derive an expression for Length contraction.
- State and explain: Sabine Formula.
- A classroom has dimensions 20 x 15 x 5 m<sup>3</sup>. The reverberation time is 3.5 sec. Calculate the total absorption of its surfaces and the average absorption coefficient.
- Polonium belongs to SC lattice. If the lattice constant is 3.36Å<sup>0</sup>, calculate its density. The atomic mass of polonium is 209.

**Q.3 Answer the following questions. (Any Two)** **10**

- What is Hall effect? Derive the relation for Hall voltage (V<sub>H</sub>) and Hall coefficient (R<sub>H</sub>).
- Explain the term Miller indices. Derive the relation between lattice constant and interplanar spacing for cubic crystal.

$$d = \frac{a}{\sqrt{h^2 + k^2 + l^2}}$$

- State and explain the factors affecting architectural acoustics and their remedies.
- Derive an expression for E = m.c<sup>2</sup>
  - A rod has length 100 cm. When the rod is in a satellite moving with a velocity that is one half of the velocity of light relative to laboratory. What is the length of the rod as determined by an observer
    - in the satellite and
    - in the laboratory

**Section – II**

**Q.4 Answer the following questions. (Any Six) 18**

- a) Derive an expression for the resolving power of a plane diffraction grating.
- b) Distinguish between positive and negative crystals.
- c) Explain in brief:
  - 1) Stimulated Emission and
  - 2) Spontaneous Emission
- d) Write properties of LASER.
- e) Explain structure of optical fibers with neat labeled diagrams.
- f) Give applications of nanotechnology in different fields.
- g) Calculate the numerical aperture and acceptance angle for an optical fibre with core and cladding refractive indices being 1.5 and 1.4 respectively.
- h) Calculate the De-Broglie wavelength of electron traversing through the potential of 100V (Given:  $h = 6.63 \times 10^{-34} \text{ Js}$ ,  $m = 9.1 \times 10^{-31} \text{ kg}$ )

**Q.5 Answer the following questions. (Any Two) 10**

- a) Obtain the expression for acceptance angle, acceptance cone, numerical aperture and fractional refractive index change of an optical fiber.
- b) Describe Laurent's half shade polarimeter for the determination of specific rotation of the substance.
- c)
  - 1) Calculate specific rotation, if the plane of polarization is rotated through  $22^\circ$ . Length of tube is 20 cm. Given: Density of solution 20%.
  - 2) What is the highest order spectrum which may be seen with monochromatic light of wavelength  $6000 \times 10^{-8} \text{ cm}$  by means of diffraction grating with 5000 lines per cm.
- d) Describe He-Ne laser with its construction and working.

Day & Date: Friday, 10-03-2023

Max. Marks: 70

Time: 10:00 AM To 01:00 PM

- Instructions:** 1) Q. No. 1 is compulsory. It should be solved in the first 30 minutes in answer book. Page no 03 (Starting page of the Answer Book). Each question carries one mark.  
2) Don't forget to Mention question paper set (P/Q/R/S) on top of page.  
3) Figures to the right indicate full marks

- Constants:** 1) Avogadro's no.,  $N = 6.02 \times 10^{26}$  / k.mol.  
2) Velocity of light,  $c = 3 \times 10^8$  m/sec.  
3) Charge of electron,  $e = 1.6 \times 10^{-19}$  C.

**MCQ/Objective Type Questions**

Duration: 30 Minutes

Marks: 14

**Q.1 Choose the correct alternatives from the options.**

**14**

- 1) The ultrasonic wave's exhibit \_\_\_\_\_.  
a) Very long wavelength      b) Large diffraction effect  
c) Negligible diffraction effect      d) Faster speed than light waves
- 2) The length of the rod moving with velocity  $v$  relative to the observer is same when \_\_\_\_\_.  
a)  $v \ll c$       b)  $v$  is comparable to  $c$   
c)  $v \geq c$       d)  $v = 0$
- 3) Maximum number of orders possible with a grating is \_\_\_\_\_.  
a) independent of grating element  
b) directly proportional to grating element  
c) Inversely proportional to grating element  
d) directly proportional to the wavelength of light
- 4) Light waves are transverse in nature, can be demonstrated by observing the phenomenon of \_\_\_\_\_.  
a) Dispersion      b) Diffraction  
c) Polarization      d) Interference
- 5) Holography means \_\_\_\_\_.  
a) To get 2D image of 3D object      b) To get zero dimension image  
c) To get 3D image of 3D object      d) To get 3D image of 2D object
- 6) Stimulated emission process is represented by equation \_\_\_\_\_.  
a)  $A^* \rightarrow A + h\nu$       b)  $A^* + h\nu \rightarrow A + 2h\nu$   
c)  $A + h\nu \rightarrow A^*$       d)  $A^* + h\nu \rightarrow A + h\nu$
- 7) In total internal reflection phenomenon, the light ray incident from \_\_\_\_\_.  
a) Rarer to denser      b) Denser to denser  
c) Rarer to rarer      d) Denser to rarer

### MCQ/Objective Type Questions

Duration: 30 Minutes

Marks: 14

**Q.1 Choose the correct alternatives from the options.**

14

- 1) The process of removing extra common salt from water is called: \_\_\_\_\_.  
a) deionization                      b) softening  
c) disinfections                      d) desalination
- 2) Hard water is unfit for use in boilers for "steam raising" because: \_\_\_\_\_.  
a) its boiling point is higher  
b) steam is generated at a high pressure  
c) it leads to scale formation inside boiler  
d) water undergoes decomposition into oxygen and hydrogen
- 3) A lubricant is used primarily to prevent: \_\_\_\_\_.  
a) corrosion of metals  
b) oxidation of metals  
c) reduction of metals  
d) wearing out of rubbing metallic surfaces
- 4) Animal and vegetable oils are : \_\_\_\_\_.  
a) very cheap                      b) not oxidized easily  
c) not thickened in use                      d) good in oiliness
- 5) Metal at the top of electrochemical series is : \_\_\_\_\_.  
a) most stable                      b) least active  
c) most noble                      d) most active
- 6) During wet corrosion \_\_\_\_\_.  
a) Anodic part undergoes oxidation  
b) Cathodic part undergoes oxidation  
c) Anodic part undergoes reduction  
d) Neither anodic nor cathodic part undergoes any change
- 7) Purest form of iron is : \_\_\_\_\_.  
a) steel                      b) wrought iron  
c) pig iron                      d) cast iron
- 8) The main constituent of safety glass is: \_\_\_\_\_.  
a) CaCO<sub>3</sub>                      b) PbO  
c) vinyl plastic                      d) boron

- 9) A good fuel should have: \_\_\_\_\_.  
a) high moisture content      b) low calorific value  
c) moderate ignition temperature      d) high ash content
- 10) Charcoal is a secondary fuel derived from \_\_\_\_\_.  
a) Wood      b) Lignite  
c) Petroleum      d) Coke
- 11) A thermoplastic is formed by the phenomenon of : \_\_\_\_\_.  
a) Chlorination      b) condensation polymerization  
c) Nitration      d) chain polymerization
- 12) Natural rubber is basically a polymer of: \_\_\_\_\_.  
a) isoprene      b) propylene  
c) ethylene      d) propane
- 13) The commonly used carrier gas in GLC is \_\_\_\_\_.  
a)  $F_2$       b)  $Br_2$   
c)  $Cl_2$       d)  $N_2$
- 14) A fuel cell is used to convert chemical energy into \_\_\_\_\_.  
a) Mechanical energy      b) Solar energy  
c) Electrical energy      d) Potential energy

**P**

**F. Y. (B.Tech.) (Sem - II) (CBCS) Examination: Oct/Nov-2022**  
**ENGINEERING CHEMISTRY**

Day & Date: Friday, 10-03-2023

Max. Marks: 56

Time: 10:00 AM To 01:00 PM

- Instructions:** 1) All questions are compulsory.  
2) Draw neat and labeled diagrams wherever necessary.  
3) Figures to the right indicate full marks.

**Section – I**

**Q.2 Answer the following questions. (Any Four)**

**16**

- a) A sample of water on analysis was found to contain the following impurities in mg/lit:

|                                    | Amount | Mo. Wt. |
|------------------------------------|--------|---------|
| Ca(HCO <sub>3</sub> ) <sub>2</sub> | 30.15  | 162     |
| Mg(HCO <sub>3</sub> ) <sub>2</sub> | 28.73  | 146     |
| CaSO <sub>4</sub>                  | 27.00  | 136     |
| MgCl <sub>2</sub>                  | 26.5   | 95      |

Calculate the temporary, permanent and total hardness of water in mg/lit.

- b) Define aeration. Explain different types of aerators.  
c) Define disinfection. Explain disinfection of water by chlorine, Chloramine and bleaching powder.  
d) Define following terms.  
1) Viscosity Index  
2) Acid Value  
3) Flash point  
4) Aniline Point  
e) Explain Hydrogen evolution mechanism and oxygen absorption mechanism in electrochemical corrosion.  
f) Explain factors affecting on rate of corrosion.

**Q.3 Answer the following questions. (Any Four)**

**12**

- a) Define BOD. How it is determined. Explain its importance.  
b) Explain characteristics of batteries.  
c) Explain solid lubricants.  
d) 6 gm of an oil sample after saponification with 60 ml of N/2 alcoholic KOH solution and subsequent titration with N/2 HCl gave the titer value of 15 ml to phenolphthalein end point. A blank experiment was conducted without taking oil sample. On repeating same procedure gave a titer value of 60 ml. Calculate saponification value of an oil sample.  
e) Define Lubricant. Explain its functions.  
f) Explain prevention of corrosion by tinning.

**Section – II**

**Q.4 Answer the following questions. (Any Four)**

**16**

- a) Explain composition, properties and applications of cast iron, steel and wrought iron.
- b) During the determination of calorific value of a gaseous fuel by Boy's calorimeter, the following results were obtained:  
Volume of the gaseous fuel burnt at STP =  $0.12 \text{ m}^3$   
Weight of water used for cooling = 36.2 Kg  
Weight of steam condensed = 0.031 Kg  
Temperature of Inlet water =  $24.2^\circ\text{C}$   
Temperature of Outlet water =  $39.3^\circ\text{C}$   
Determine the gross and net calorific values of gaseous fuel.  
(Take latent heat of condensation of steam = 587 kcal/kg)
- c) Explain construction and working of bomb calorimeter.
- d) Explain molding of plastics in to articles by following methods.
  - 1) Extrusion molding
  - 2) Injection molding
- e) Explain properties and applications of PVC and PET.
- f) Explain components and instrumentation of GLC with labelled diagram.

**Q.5 Answer the following questions. (Any Four)**

**12**

- a) Explain any three types of glass.
- b) Compare solid and gaseous fuels.
- c) Summarize advantages and disadvantages of biodiesel.
- d) Explain vulcanization of natural rubber.
- e) Calculate Degree of polymerization of polyethene having molecular weight 18200. (Mol. Wt. of ethene = 28)
- f) Calculate weight of  $\text{MgSO}_4$  required to prepare 0.4 N 500 ml solution. (Mol. Wt. of  $\text{MgSO}_4$  = 120)

c) it leads to scale formation inside boiler  
d) water undergoes decomposition into oxygen and hydrogen
- 7) A lubricant is used primarily to prevent: \_\_\_\_\_.  
a) corrosion of metals  
b) oxidation of metals  
c) reduction of metals  
d) wearing out of rubbing metallic surfaces
- 8) Animal and vegetable oils are : \_\_\_\_\_.  
a) very cheap                                         b) not oxidized easily  
c) not thickened in use                              d) good in oiliness

Set **R**

**F. Y. (B.Tech.) (Sem - II) (CBCS) Examination: Oct/Nov-2022**  
**ENGINEERING CHEMISTRY**

Day & Date: Friday, 10-03-2023  
Time: 10:00 AM To 01:00 PM

Max. Marks: 56

- Instructions:** 1) All questions are compulsory.  
2) Draw neat and labeled diagrams wherever necessary.  
3) Figures to the right indicate full marks.

**Section – I**

**Q.2 Answer the following questions. (Any Four) 16**

- a) A sample of water on analysis was found to contain the following impurities in mg/lit:

|                                    | Amount | Mo. Wt. |
|------------------------------------|--------|---------|
| Ca(HCO <sub>3</sub> ) <sub>2</sub> | 30.15  | 162     |
| Mg(HCO <sub>3</sub> ) <sub>2</sub> | 28.73  | 146     |
| CaSO <sub>4</sub>                  | 27.00  | 136     |
| MgCl <sub>2</sub>                  | 26.5   | 95      |

Calculate the temporary, permanent and total hardness of water in mg/lit.

- b) Define aeration. Explain different types of aerators.  
c) Define disinfection. Explain disinfection of water by chlorine, Chloramine and bleaching powder.  
d) Define following terms.  
1) Viscosity Index  
2) Acid Value  
3) Flash point  
4) Aniline Point  
e) Explain Hydrogen evolution mechanism and oxygen absorption mechanism in electrochemical corrosion.  
f) Explain factors affecting on rate of corrosion.

**Q.3 Answer the following questions. (Any Four) 12**

- a) Define BOD. How it is determined. Explain its importance.  
b) Explain characteristics of batteries.  
c) Explain solid lubricants.  
d) 6 gm of an oil sample after saponification with 60 ml of N/2 alcoholic KOH solution and subsequent titration with N/2 HCl gave the titer value of 15 ml to phenolphthalein end point. A blank experiment was conducted without taking oil sample. On repeating same procedure gave a titer value of 60 ml. Calculate saponification value of an oil sample.  
e) Define Lubricant. Explain its functions.  
f) Explain prevention of corrosion by tinning.

Section – II

**Q.4 Answer the following questions. (Any Four)**

**16**

- a) Explain composition, properties and applications of cast iron, steel and wrought iron.
- b) During the determination of calorific value of a gaseous fuel by Boy's calorimeter, the following results were obtained:  
Volume of the gaseous fuel burnt at STP =  $0.12 \text{ m}^3$   
Weight of water used for cooling = 36.2 Kg  
Weight of steam condensed = 0.031 Kg  
Temperature of Inlet water =  $24.2^\circ\text{C}$   
Temperature of Outlet water =  $39.3^\circ\text{C}$   
Determine the gross and net calorific values of gaseous fuel.  
(Take latent heat of condensation of steam = 587 kcal/kg)
- c) Explain construction and working of bomb calorimeter.
- d) Explain molding of plastics in to articles by following methods.
  - 1) Extrusion molding
  - 2) Injection molding
- e) Explain properties and applications of PVC and PET.
- f) Explain components and instrumentation of GLC with labelled diagram.

**Q.5 Answer the following questions. (Any Four)**

**12**

- a) Explain any three types of glass.
- b) Compare solid and gaseous fuels.
- c) Summarize advantages and disadvantages of biodiesel.
- d) Explain vulcanization of natural rubber.
- e) Calculate Degree of polymerization of polyethene having molecular weight 18200. (Mol. Wt. of ethene = 28)
- f) Calculate weight of  $\text{MgSO}_4$  required to prepare 0.4 N 500 ml solution. (Mol. Wt. of  $\text{MgSO}_4$  = 120)

**F. Y. (B.Tech.) (Sem - II) (CBCS) Examination: Oct/Nov-2022**  
**ENGINEERING CHEMISTRY**

Day & Date: Friday, 10-03-2023

Max. Marks: 70

Time: 10:00 AM To 01:00 PM

- Instructions:** 1) Q. No. 1 is compulsory. It should be solved in the first 30 minutes in answer book. Page no 03 (Starting page of the Answer Book). Each question carries one mark.  
2) Don't forget to Mention question paper set (P/Q/R/S) on top of page.  
3) Figures to the right indicate full marks

**MCQ/Objective Type Questions**

Duration: 30 Minutes

Marks: 14

**Q.1 Choose the correct alternatives from the options.**

**14**

- 1) During wet corrosion \_\_\_\_\_.  
a) Anodic part undergoes oxidation  
b) Cathodic part undergoes oxidation  
c) Anodic part undergoes reduction  
d) Neither anodic nor cathodic part undergoes any change
- 2) Purest form of iron is : \_\_\_\_\_.  
a) steel  
b) wrought iron  
c) pig iron  
d) cast iron
- 3) The main constituent of safety glass is: \_\_\_\_\_.  
a)  $\text{CaCO}_3$   
b)  $\text{PbO}$   
c) vinyl plastic  
d) boron
- 4) A good fuel should have: \_\_\_\_\_.  
a) high moisture content  
b) low calorific value  
c) moderate ignition temperature  
d) high ash content
- 5) Charcoal is a secondary fuel derived from \_\_\_\_\_.  
a) Wood  
b) Lignite  
c) Petroleum  
d) Coke
- 6) A thermoplastic is formed by the phenomenon of : \_\_\_\_\_.  
a) Chlorination  
b) condensation polymerization  
c) Nitration  
d) chain polymerization
- 7) Natural rubber is basically a polymer of: \_\_\_\_\_.  
a) isoprene  
b) propylene  
c) ethylene  
d) propane
- 8) The commonly used carrier gas in GLC is \_\_\_\_\_.  
a)  $\text{F}_2$   
b)  $\text{Br}_2$   
c)  $\text{Cl}_2$   
d)  $\text{N}_2$
- 9) A fuel cell is used to convert chemical energy into \_\_\_\_\_.  
a) Mechanical energy  
b) Solar energy  
c) Electrical energy  
d) Potential energy

## Concrete Technology, Material Testing & Evaluation

Max. Marks: 70

**Instructions:** 1) Q. No. 1 is compulsory. It should be solved in the first 30 minutes in answer book. Page no 03 (Starting page of the Answer Book). Each question carries one mark.  
2) Don't forget to Mention question paper set (P/Q/R/S) on top of page.  
3) Figures to the right indicates full marks.  
4) Assume suitable data if necessary.

Marks: 14

14

- 1) Creep is \_\_\_\_\_.
  - a) Time dependent
  - b) Time independent
  - c) Temperature dependent
  - d) None
- 2) IS Provision for concrete mix design is given by \_\_\_\_\_.
  - a) IS 456-2000
  - b) IS 10262-2009
  - c) IS 383-1970
  - d) None
- 3) Admixtures can be used to \_\_\_\_\_.
  - a) Improve workability
  - b) Reduce heat of hydration
  - c) Increase setting time
  - d) All of above
- 4) The ratio of W/C ratio \_\_\_\_\_ creep \_\_\_\_\_.
  - a) Increases, decreases
  - b) Increases, increases
  - c) Decreases, increases
  - d) None
- 5) Characteristic strength of concrete is defined as the strength of concrete below which not more than of the test results are expected to fail
  - a) 15%
  - b) 10%
  - c) 7%
  - d) None
- 6) The workability of concrete is measured by
  - a) Slump test
  - b) Compaction factor test
  - c) Vee Bee Consistometer test
  - d) All of the above
- 7) In terms of oxide composition maximum percentage of ingredient in cement is that of
  - a) Lime
  - b) Iron oxide
  - c) Alumina
  - d) Silica
- 8) Tensile test can be performed on \_\_\_\_\_.
  - a) Impact testing machine
  - b) Universal testing machine
  - c) Rockwell Tester
  - d) None

- 9) Final setting time of cement should not be more than
  - a) 30 min
  - b) 600 min
  - c) 600 sec
  - d) None
- 10) In Extra Rapid Hardening Cement Calcium Chloride is limited to \_\_\_\_\_.
  - a) 5
  - b) 7
  - c) 10
  - d) 2
- 11) Volume of 1 Bag cement is \_\_\_\_\_.
  - a) 35 lit
  - b) 60 lit
  - c) 50 lit
  - d) none of above
- 12) In Low heat cement  $C_2S$  is \_\_\_\_\_ &  $C_3S$  is \_\_\_\_\_.
  - a) decreased increased
  - b) increased, decreased
  - c) decreased, decreased
  - d) None
- 13) For W/C ratio of 0.45 the water content per bag of cement is \_\_\_\_\_.
  - a) 25kg
  - b) 30 kg
  - c) 22.5kg
  - d) 20kg
- 14) The modulus of elasticity of concrete is expressed as \_\_\_\_\_.
  - a)  $500 \sqrt{f_{ck}}$
  - b)  $5000 \sqrt{f_{ck}}$
  - c)  $0.7 \sqrt{f_{ck}}$
  - d) None of above

**S.Y. (B.Tech.) (Sem - I) (New) (CBCS) Examination: Oct/Nov-2022  
CIVIL ENGINEERING**

**Concrete Technology, Material Testing & Evaluation**

Day & Date: Friday, 17-03-2023  
Time: 02:00 PM To 05:00 PM

Max. Marks: 56

**Instructions:** 1) All questions are compulsory.  
2) Figures to the right indicate full marks.

**Section – I**

**Q.2 Attempt any Two of the following. 12**

- a) Explain about Accelerators and Retarders.
- b) Explain in detail Wet Process of Manufacturing of cement with neat sketch.
- c) Enlist factor affecting workability of concrete & explain any Two.

**Q.3 Write a note on any Four of the following. 16**

- a) Bulking of Sand
- b) Plasticizers & Super plasticizers
- c) Batching of Concrete
- d) Rapid Hardening Cement
- e) Split tensile test

**Section – II**

**Q.4 Write a note on any Three of the following. 12**

- a) Shrinkage of Concrete
- b) Factor affecting Creep of concrete
- c) Sulphate Attack
- d) Tension test on mild Steel

**Q.5 Explain in Detail Procedure of ACI method of Concrete Mix design. 16**

**OR**

**Q.6 Design a Concrete Mix for RCC Building from following data.**

- 1) Grade of Concrete-M25
- 2) Type of Cement-OPC 53
- 3) Workability (slump)-100
- 4) Exposure Condition -Moderate
- 5) Size of Aggregate -20mm
- 6) Grading Zone of Sand - Zone II
- 7) Specific Gravity of Cement - 3.15
- 8) Specific Gravity of FA - 2.7
- 9) Specific Gravity of CA - 2.72
- 10) Minimum Cement Content - 320 kg/m<sup>3</sup>
- 11) Maximum Cement Content - 450 kg/m<sup>3</sup>
- 12) Water Absorption for CA-1%
- 13) Moisture content for FA- 0.5%

**Table 1 Assumed Standard Deviation**
