CIVIL ENGINEERING**

**Concrete Technology, Material Testing & Evaluation**

Day & Date: Friday, 17-03-2023  
Time: 02:00 PM To 05:00 PM

Max. Marks: 70

- Instructions:** 1) Q. No. 1 is compulsory. It should be solved in the first 30 minutes in answer book. Page no 03 (Starting page of the Answer Book). Each question carries one mark.  
2) Don't forget to Mention question paper set (P/Q/R/S) on top of page.  
3) Figures to the right indicates full marks.  
4) Assume suitable data if necessary.

**MCQ/Objective Type Questions**

Duration: 30 Minutes

Marks: 14

**Q.1 Choose the correct alternatives from the options.**

**14**

- 1) Tensile test can be performed on \_\_\_\_\_.  
a) Impact testing machine      b) Universal testing machine  
c) Rockwell Tester              d) None
- 2) Final setting time of cement should not be more than  
a) 30 min                              b) 600 min  
c) 600 sec                             d) None
- 3) In Extra Rapid Hardening Cement Calcium Chloride is limited to \_\_\_\_%.  
a) 5                                      b) 7  
c) 10                                     d) 2
- 4) Volume of 1 Bag cement is \_\_\_\_\_.  
a) 35 lit                                b) 60 lit  
c) 50 lit                                d) none of above
- 5) In Low heat cement  $C_2S$  is \_\_\_\_\_ &  $C_3S$  is \_\_\_\_\_.  
a) decreased increased          b) increased, decreased  
c) decreased, decreased        d) None
- 6) For W/C ratio of 0.45 the water content per bag of cement is \_\_\_\_\_.  
a) 25kg                                b) 30 kg  
c) 22.5kg                              d) 20kg
- 7) The modulus of elasticity of concrete is expressed as \_\_\_\_\_.  
a)  $500 \sqrt{f_{ck}}$                               b)  $5000 \sqrt{f_{ck}}$   
c)  $0.7 \sqrt{f_{ck}}$                               d) None of above
- 8) Creep is \_\_\_\_\_.  
a) Time dependent                  b) Time independent  
c) Temperature dependent        d) None
- 9) IS Provision for concrete mix design is given by \_\_\_\_\_.  
a) IS 456-2000                        b) IS 10262-2009  
c) IS 383-1970                        d) None

- 10)** Admixtures can be used to \_\_\_\_\_.  
a) Improve workability                      b) Reduce heat of hydration  
c) Increase setting time                    d) All of above
- 11)** The ratio of W/C ratio \_\_\_\_\_ creep \_\_\_\_\_.  
a) Increases, decreases                      b) Increases, increases  
c) Decreases, increases                    d) None
- 12)** Characteristic strength of concrete is defined as the strength of concrete below which not more than of the test results are expected to fail  
a) 15%                                              b) 10%  
c) 7%                                                d) None
- 13)** The workability of concrete is measured by  
a) Slump test                                      b) Compaction factor test  
c) Vee Bee Consistometer test            d) All of the above
- 14)** In terms of oxide composition maximum percentage of ingredient in cement is that of  
a) Lime                                              b) Iron oxide  
c) Alumina                                           d) Silica

**S.Y. (B.Tech.) (Sem - I) (New) (CBCS) Examination: Oct/Nov-2022  
CIVIL ENGINEERING**

**Concrete Technology, Material Testing & Evaluation**

Day & Date: Friday, 17-03-2023  
Time: 02:00 PM To 05:00 PM

Max. Marks: 56

**Instructions:** 1) All questions are compulsory.  
2) Figures to the right indicate full marks.

**Section – I**

**Q.2 Attempt any Two of the following. 12**

- a) Explain about Accelerators and Retarders.
- b) Explain in detail Wet Process of Manufacturing of cement with neat sketch.
- c) Enlist factor affecting workability of concrete & explain any Two.

**Q.3 Write a note on any Four of the following. 16**

- a) Bulking of Sand
- b) Plasticizers & Super plasticizers
- c) Batching of Concrete
- d) Rapid Hardening Cement
- e) Split tensile test

**Section – II**

**Q.4 Write a note on any Three of the following. 12**

- a) Shrinkage of Concrete
- b) Factor affecting Creep of concrete
- c) Sulphate Attack
- d) Tension test on mild Steel

**Q.5 Explain in Detail Procedure of ACI method of Concrete Mix design. 16**

**OR**

**Q.6 Design a Concrete Mix for RCC Building from following data.**

- 1) Grade of Concrete-M25
- 2) Type of Cement-OPC 53
- 3) Workability (slump)-100
- 4) Exposure Condition -Moderate
- 5) Size of Aggregate -20mm
- 6) Grading Zone of Sand - Zone II
- 7) Specific Gravity of Cement - 3.15
- 8) Specific Gravity of FA - 2.7
- 9) Specific Gravity of CA - 2.72
- 10) Minimum Cement Content - 320 kg/m<sup>3</sup>
- 11) Maximum Cement Content - 450 kg/m<sup>3</sup>
- 12) Water Absorption for CA-1%
- 13) Moisture content for FA- 0.5%

## Concrete Technology, Material Testing & Evaluation

Max. Marks: 70

**Instructions:** 1) Q. No. 1 is compulsory. It should be solved in the first 30 minutes in answer book. Page no 03 (Starting page of the Answer Book). Each question carries one mark.  
2) Don't forget to Mention question paper set (P/Q/R/S) on top of page.  
3) Figures to the right indicates full marks.  
4) Assume suitable data if necessary.

Marks: 14

14

- 1) Volume of 1 Bag cement is \_\_\_\_\_.  
a) 35 lit                                      b) 60 lit  
c) 50 lit                                        d) none of above
- 2) In Low heat cement C<sub>2</sub>S is \_\_\_\_\_ & C<sub>3</sub>S is \_\_\_\_\_.  
a) decreased increased                  b) increased, decreased  
c) decreased, decreased                 d) None
- 3) For W/C ratio of 0.45 the water content per bag of cement is \_\_\_\_\_.  
a) 25kg                                         b) 30 kg  
c) 22.5kg                                      d) 20kg
- 4) The modulus of elasticity of concrete is expressed as \_\_\_\_\_.  
a)  $500 \sqrt{f_{ck}}$                                       b)  $5000 \sqrt{f_{ck}}$   
c)  $0.7 \sqrt{f_{ck}}$                                       d) None of above
- 5) Creep is \_\_\_\_\_.  
a) Time dependent                            b) Time independent  
c) Temperature dependent                d) None
- 6) IS Provision for concrete mix design is given by \_\_\_\_\_.  
a) IS 456-2000                                b) IS 10262-2009  
c) IS 383-1970                                d) None
- 7) Admixtures can be used to \_\_\_\_\_.  
a) Improve workability                      b) Reduce heat of hydration  
c) Increase setting time                      d) All of above
- 8) The ratio of W/C ratio \_\_\_\_\_ creep \_\_\_\_\_.  
a) Increases, decreases                      b) Increases, increases  
c) Decreases, increases                      d) None
- 9) Characteristic strength of concrete is defined as the strength of concrete below which not more than of the test results are expected to fail  
a) 15%                                            b) 10%  
c) 7%                                              d) None

**S.Y. (B.Tech.) (Sem - I) (New) (CBCS) Examination: Oct/Nov-2022  
CIVIL ENGINEERING**

**Concrete Technology, Material Testing & Evaluation**

Day & Date: Friday, 17-03-2023  
Time: 02:00 PM To 05:00 PM

Max. Marks: 70

- Instructions:** 1) Q. No. 1 is compulsory. It should be solved in the first 30 minutes in answer book. Page no 03 (Starting page of the Answer Book). Each question carries one mark.  
2) Don't forget to Mention question paper set (P/Q/R/S) on top of page.  
3) Figures to the right indicates full marks.  
4) Assume suitable data if necessary.

**MCQ/Objective Type Questions**

Duration: 30 Minutes

Marks: 14

**Q.1 Choose the correct alternatives from the options.**

**14**

- 1) The workability of concrete is measured by
  - a) Slump test
  - b) Compaction factor test
  - c) Vee Bee Consistometer test
  - d) All of the above
- 2) In terms of oxide composition maximum percentage of ingredient in cement is that of
  - a) Lime
  - b) Iron oxide
  - c) Alumina
  - d) Silica
- 3) Tensile test can be performed on \_\_\_\_\_.
  - a) Impact testing machine
  - b) Universal testing machine
  - c) Rockwell Tester
  - d) None
- 4) Final setting time of cement should not be more than
  - a) 30 min
  - b) 600 min
  - c) 600 sec
  - d) None
- 5) In Extra Rapid Hardening Cement Calcium Chloride is limited to \_\_\_\_%.
  - a) 5
  - b) 7
  - c) 10
  - d) 2
- 6) Volume of 1 Bag cement is \_\_\_\_\_.
  - a) 35 lit
  - b) 60 lit
  - c) 50 lit
  - d) none of above
- 7) In Low heat cement  $C_2S$  is \_\_\_\_\_ &  $C_3S$  is \_\_\_\_\_.
  - a) decreased increased
  - b) increased, decreased
  - c) decreased, decreased
  - d) None
- 8) For W/C ratio of 0.45 the water content per bag of cement is \_\_\_\_\_.
  - a) 25kg
  - b) 30 kg
  - c) 22.5kg
  - d) 20kg
- 9) The modulus of elasticity of concrete is expressed as \_\_\_\_\_.
  - a)  $500 \sqrt{f_{ck}}$
  - b)  $5000 \sqrt{f_{ck}}$
  - c)  $0.7 \sqrt{f_{ck}}$
  - d) None of above

- 10)** Creep is \_\_\_\_\_.  
a) Time dependent                      b) Time independent  
c) Temperature dependent            d) None
- 11)** IS Provision for concrete mix design is given by \_\_\_\_\_.  
a) IS 456-2000                          b) IS 10262-2009  
c) IS 383-1970                          d) None
- 12)** Admixtures can be used to \_\_\_\_\_.  
a) Improve workability                b) Reduce heat of hydration  
c) Increase setting time                d) All of above
- 13)** The ratio of W/C ratio \_\_\_\_\_ creep \_\_\_\_\_.  
a) Increases, decreases                b) Increases, increases  
c) Decreases, increases                d) None
- 14)** Characteristic strength of concrete is defined as the strength of concrete below which not more than of the test results are expected to fail  
a) 15%                                      b) 10%  
c) 7%                                        d) None

**S.Y. (B.Tech.) (Sem - I) (New) (CBCS) Examination: Oct/Nov-2022  
CIVIL ENGINEERING**

**Concrete Technology, Material Testing & Evaluation**

Day & Date: Friday, 17-03-2023  
Time: 02:00 PM To 05:00 PM

Max. Marks: 56

**Instructions:** 1) All questions are compulsory.  
2) Figures to the right indicate full marks.

**Section – I**

**Q.2 Attempt any Two of the following. 12**

- a) Explain about Accelerators and Retarders.
- b) Explain in detail Wet Process of Manufacturing of cement with neat sketch.
- c) Enlist factor affecting workability of concrete & explain any Two.

**Q.3 Write a note on any Four of the following. 16**

- a) Bulking of Sand
- b) Plasticizers & Super plasticizers
- c) Batching of Concrete
- d) Rapid Hardening Cement
- e) Split tensile test

**Section – II**

**Q.4 Write a note on any Three of the following. 12**

- a) Shrinkage of Concrete
- b) Factor affecting Creep of concrete
- c) Sulphate Attack
- d) Tension test on mild Steel

**Q.5 Explain in Detail Procedure of ACI method of Concrete Mix design. 16**

**OR**

**Q.6 Design a Concrete Mix for RCC Building from following data.**

- 1) Grade of Concrete-M25
- 2) Type of Cement-OPC 53
- 3) Workability (slump)-100
- 4) Exposure Condition -Moderate
- 5) Size of Aggregate -20mm
- 6) Grading Zone of Sand - Zone II
- 7) Specific Gravity of Cement - 3.15
- 8) Specific Gravity of FA - 2.7
- 9) Specific Gravity of CA - 2.72
- 10) Minimum Cement Content - 320 kg/m<sup>3</sup>
- 11) Maximum Cement Content - 450 kg/m<sup>3</sup>
- 12) Water Absorption for CA-1%
- 13) Moisture content for FA- 0.5%

| <b>Seat No.</b> |  |
|-----------------|--|

Day & Date: Monday, 13-03-2023  
Time: 02:00 PM To 05:00 PM

**Instructions:** 1) Q. No. 1 is compulsory. It should be solved in the first 30 minutes in answer book. Page no 03 (Starting page of the Answer Book). Each question carries one mark.  
2) Don't forget to Mention question paper set (P/Q/R/S) on top of page.  
3) Figures to the right indicate full marks

Marks: 14

14

- Page 1 of 12

- 8) Minimum how many satellites shall be accessible for user to get latitude, longitude, altitude, and time measurements in Global Positioning System?
- |      |       |
|------|-------|
| a) 3 | b) 4  |
| c) 8 | d) 24 |
- 9) In terrestrial photogrammetry photographs are taken by \_\_\_\_\_
- |                    |              |
|--------------------|--------------|
| a) Arial camera    | b) Drone     |
| c) Phototheodolite | d) Satellite |
- 10) LiDAR is \_\_\_\_\_
- |                                                 |
|-------------------------------------------------|
| a) Active remote sensing system                 |
| b) Passive remote sensing system                |
| c) Both Active as well as Passive remote system |
| d) None of these                                |
- 11) Drone can provide \_\_\_\_\_
- |                                                                                                    |
|----------------------------------------------------------------------------------------------------|
| a) a satisfactory means of performing the required survey in large scale projects                  |
| b) a satisfactory means of performing projects where access is difficult                           |
| c) Both survey in large scale projects as well as of performing projects where access is difficult |
| d) None of these                                                                                   |
- 12) Remote sensing in which energy from sun is used is \_\_\_\_\_
- |                                           |
|-------------------------------------------|
| a) Active Remote sensing                  |
| b) Passive remote sensing                 |
| c) Both active and passive remote sensing |
| d) None of these                          |
- 13) Following are components of GIS \_\_\_\_\_
- |             |                     |
|-------------|---------------------|
| a) Hardware | b) Software         |
| c) Users    | d) All of the above |
- 14) Following survey is required for route survey \_\_\_\_\_
- |                          |                  |
|--------------------------|------------------|
| a) Profile leveling      | b) Triangulation |
| c) Theodolite traversing | d) None of these |

**Set P**

**S.Y (B. Tech) (Sem - I) (New) (CBCS) Examination: Oct/Nov-2022**  
**CIVIL ENGINEERING**  
**Surveying & Geomatics**

Day & Date: Monday, 13-03-2023  
Time: 02:00 PM To 05:00 PM

Max. Marks: 56

**Instructions:** 1) In Section – I, Q. 2 is compulsory; answer any two questions out of Q.3, Q.4, and Q.5.  
2) In Section – II, Q. 6 is compulsory; answer any two questions out of Q.7, Q.8, and Q.9.

**Section – I**

- Q.2 Write detailed note on** **12**  
a) Construction and use of Automatic level  
b) Differentiate between Direct and Indirect methods of Contouring  
c) Explain the methods of interpolation of contours
- Q.3 Explain** **08**  
a) Construction of vernier theodolite with parts  
b) Use of theodolite for measurement of horizontal angle using reiteration method
- Q.4 Explain** **08**  
a) Construction of Digital level  
b) Construction of Total station
- Q.5 Write notes on** **08**  
a) Geodimeter  
b) Tellurometer

**Section – II**

- Q.6 Write detailed notes on** **12**  
a) Space Segment of GPS  
b) Differentiate between Static GPS and Differential GPS methods  
c) GPS receivers and their comparison
- Q.7 Explain** **08**  
a) Flight Planning for aerial photogrammetry  
b) Scale of vertical photographs and its classification
- Q.8 Write notes on** **08**  
a) LiDAR and its advantages  
b) Drone surveying and its advantages over satellite remote sensing
- Q.9 Explain** **08**  
a) Electromagnetic Spectrum  
b) Compare the Raster images with Vector images

**MCQ/Objective Type Questions**

Duration: 30 Minutes

Marks: 14

**Q.1 Choose the correct alternatives from the options.**

**14**

- 1) Minimum how many satellites shall be accessible for user to get latitude, longitude, altitude, and time measurements in Global Positioning System?
 

|      |       |
|------|-------|
| a) 3 | b) 4  |
| c) 8 | d) 24 |
- 2) In terrestrial photogrammetry photographs are taken by \_\_\_\_\_.
 

|                    |              |
|--------------------|--------------|
| a) Arial camera    | b) Drone     |
| c) Phototheodolite | d) Satellite |
- 3) LiDAR is \_\_\_\_\_.
 

|                                                 |
|-------------------------------------------------|
| a) Active remote sensing system                 |
| b) Passive remote sensing system                |
| c) Both Active as well as Passive remote system |
| d) None of these                                |
- 4) Drone can provide \_\_\_\_\_.
 

|                                                                                                    |
|----------------------------------------------------------------------------------------------------|
| a) a satisfactory means of performing the required survey in large scale projects                  |
| b) a satisfactory means of performing projects where access is difficult                           |
| c) Both survey in large scale projects as well as of performing projects where access is difficult |
| d) None of these                                                                                   |
- 5) Remote sensing in which energy from sun is used is \_\_\_\_\_.
 

|                                           |
|-------------------------------------------|
| a) Active Remote sensing                  |
| b) Passive remote sensing                 |
| c) Both active and passive remote sensing |
| d) None of these                          |
- 6) Following are components of GIS \_\_\_\_\_.
 

|             |                     |
|-------------|---------------------|
| a) Hardware | b) Software         |
| c) Users    | d) All of the above |
- 7) Following survey is required for route survey \_\_\_\_\_.
 

|                          |                  |
|--------------------------|------------------|
| a) Profile leveling      | b) Triangulation |
| c) Theodolite traversing | d) None of these |

- 8) In a tilting level, while taking the sight to a leveling staff, the centering of bubble is done by \_\_\_\_\_.
  - a) Foot screws
  - b) Tilting screw
  - c) Focusing screw
  - d) Tripod legs
- 9) The vertical distance between any two consecutive contours is called \_\_\_\_\_ (complete the sentence using correct option)
  - a) Horizontal equivalent
  - b) Contour interval
  - c) Height of instrument
  - d) Contour gradient
- 10) The theodolite is designed for precise measurement of following.
  - a) Both Horizontal and Vertical Distance
  - b) Difference in level
  - c) Both Horizontal and Vertical Angle
  - d) Coordinates of stations
- 11) The total latitude and departure of any point with respect to a common origin are known as \_\_\_\_\_.
  - a) Consecutive coordinates
  - b) Independent coordinates
  - c) Geodetic coordinates
  - d) Cartesian coordinates
- 12) In Digital level the field book is \_\_\_\_\_.
  - a) Printed on pages in a notebook
  - b) Digital on a PC
  - c) Digital in a laptop
  - d) Digital in microprocessor of level
- 13) The instrument using modulated light waves are known as \_\_\_\_\_.
  - a) Geodimeter
  - b) Tellurometer
  - c) Distometer
  - d) All the above
- 14) A total station is a combination of \_\_\_\_\_.
  - a) Electronic theodolite, EDM only
  - b) Vernier theodolite, EDM only
  - c) Electronic theodolite, Microprocessor only
  - d) Electronic theodolite, EDM, Microprocessor

  - b) Drone
  - c) Phototheodolite
  - d) Satellite
- 5) LiDAR is \_\_\_\_\_.
  - a) Active remote sensing system
  - b) Passive remote sensing system
  - c) Both Active as well as Passive remote system
  - d) None of these
- 6) Drone can provide \_\_\_\_\_.
  - a) a satisfactory means of performing the required survey in large scale projects
  - b) a satisfactory means of performing projects where access is difficult
  - c) Both survey in large scale projects as well as of performing projects where access is difficult
  - d) None of these

- 7) Remote sensing in which energy from sun is used is \_\_\_\_\_  
a) Active Remote sensing  
b) Passive remote sensing  
c) Both active and passive remote sensing  
d) None of these
- 8) Following are components of GIS \_\_\_\_\_  
a) Hardware  
b) Software  
c) Users  
d) All of the above
- 9) Following survey is required for route survey \_\_\_\_\_  
a) Profile leveling  
b) Triangulation  
c) Theodolite traversing  
d) None of these
- 10) In a tilting level, while taking the sight to a leveling staff, the centering of bubble is done by \_\_\_\_\_.  
a) Foot screws  
b) Tilting screw  
c) Focusing screw  
d) Tripod legs
- 11) The vertical distance between any two consecutive contours is called \_\_\_\_ (complete the sentence using correct option)  
a) Horizontal equivalent  
b) Contour interval  
c) Height of instrument  
d) Contour gradient
- 12) The theodolite is designed for precise measurement of following.  
a) Both Horizontal and Vertical Distance  
b) Difference in level  
c) Both Horizontal and Vertical Angle  
d) Coordinates of stations
- 13) The total latitude and departure of any point with respect to a common origin are known as \_\_\_\_\_.  
a) Consecutive coordinates  
b) Independent coordinates  
c) Geodetic coordinates  
d) Cartesian coordinates
- 14) In Digital level the field book is \_\_\_\_\_.  
a) Printed on pages in a notebook  
b) Digital on a PC  
c) Digital in a laptop  
d) Digital in microprocessor of level

| <b>Seat No.</b> |  |
|-----------------|--|

**S.Y (B. Tech) (Sem - I) (New) (CBCS) Examination: Oct/Nov-2022**  
**CIVIL ENGINEERING**  
**Surveying & Geomatics**

Day & Date: Monday, 13-03-2023  
Time: 02:00 PM To 05:00 PM

Max. Marks: 56

**Instructions:** 1) In Section – I, Q. 2 is compulsory; answer any two questions out of Q.3, Q.4, and Q.5.  
2) In Section – II, Q. 6 is compulsory; answer any two questions out of Q.7, Q.8, and Q.9.

**Section – I**

- Q.2 Write detailed note on** **12**  
a) Construction and use of Automatic level  
b) Differentiate between Direct and Indirect methods of Contouring  
c) Explain the methods of interpolation of contours
- Q.3 Explain** **08**  
a) Construction of vernier theodolite with parts  
b) Use of theodolite for measurement of horizontal angle using reiteration method
- Q.4 Explain** **08**  
a) Construction of Digital level  
b) Construction of Total station
- Q.5 Write notes on** **08**  
a) Geodimeter  
b) Tellurometer

**Section – II**

- Q.6 Write detailed notes on** **12**  
a) Space Segment of GPS  
b) Differentiate between Static GPS and Differential GPS methods  
c) GPS receivers and their comparison
- Q.7 Explain** **08**  
a) Flight Planning for aerial photogrammetry  
b) Scale of vertical photographs and its classification
- Q.8 Write notes on** **08**  
a) LiDAR and its advantages  
b) Drone surveying and its advantages over satellite remote sensing
- Q.9 Explain** **08**  
a) Electromagnetic Spectrum  
b) Compare the Raster images with Vector images

|                 |  |
|-----------------|--|
| <b>Seat No.</b> |  |
|-----------------|--|

- 9) In perspective projection, all lines of sight start at a \_\_\_\_\_ point.
- |             |           |
|-------------|-----------|
| a) Double   | b) Triple |
| c) Multiple | d) Single |
- 10) The \_\_\_\_\_ plays an important role in the comfort of persons affected by ventilation system.
- |                    |                       |
|--------------------|-----------------------|
| a) Carbon monoxide | b) Purity of air      |
| c) Volume of room  | d) Health of occupant |
- 11) The \_\_\_\_\_ consists of equal volume of lime and sand.
- |                  |             |
|------------------|-------------|
| a) Cement Mortar | b) Concrete |
| c) Lime Mortar   | d) Slurry   |
- 12) The term \_\_\_\_\_ is used to describe the thin plastic covering that is applied on the surface of walls and ceilings.
- |             |                     |
|-------------|---------------------|
| a) Grouting | b) Plastering       |
| c) Pointing | d) All of the above |
- 13) The main objective of applying \_\_\_\_\_ to the plastered surfaces is to create a smooth surface.
- |        |              |
|--------|--------------|
| a) Gum | b) Varnish   |
| c) POP | d) Distemper |
- 14) The \_\_\_\_\_ varnishes dry slowly, but they form hard and durable surface.
- |          |               |
|----------|---------------|
| a) Oil   | b) Spirit     |
| c) Water | d) Turpentine |

**S. Y. (B.Tech.) (Sem - I) (New) (CBCS) Examination: Oct/Nov-2022**

**CIVIL ENGINEERING**

**Building Construction & Drawing**

Day & Date: Tuesday, 21-03-2023

Max. Marks: 56

Time: 02:00 PM To 06:00 PM

- Instructions:** 1) All questions are compulsory.  
2) Figures to the right indicate full marks.

**Section – I**

**Q.2 Answer the following question. (Any Four) 28**

- a) Write down about "Building Functional Requirements".
- b) Differentiate between "Framed and Load Bearing and Composite structure".
- c) Explain in steps wise a "Design of Staircase" for building with neat sketch.
- d) Explain in brief "Natural Ventilation and Artificial Ventilation" with the good significance of it.
- e) Enlist and explain the various types of pointing with neat sketch.

**Section – II**

**Q.3 Answer the following question. (Any One) 18**

- a) Draw to a scale of 1:10 front view and vertical sectional elevation of a double leaf panelled door for the following data  
(All the dimensions are in mm)
  - 1) Clear opening = 1000 x 2100
  - 2) Cross section of the frame = 100 x 80
  - 3) Vertical stiles = 100 x 40
  - 4) Top rail = 100 x 35
  - 5) Frieze rail = 100 x 35
  - 6) Lock rail = 190 x 40
  - 7) Bottom rail = 160 x 40
  - 8) No. of panels = 6 (25 mm thick)
- b) Design and draw a suitable Dog Legged Staircase for residential building using the following data.  
(All the dimensions are in mm)
  - 1) Floor to Floor height: 3000
  - 2) Riser: 150 and Tread: 300
  - 3) Wall Thickness 230
  - 4) Fight width: 1200
  - 5) Waist Slab: 150
 Assume Suitable data if necessary
  - i) Draw detailed plan (1:20)
  - ii) Sectional elevation (1:20)

**Q.4 Answer the following question. (Any Two)**

- a)** Draw to a scale of 1:10 plans for alternate course and elevation for at least 10 courses for a brick wall built with.
- 1) Stretcher bond (01 brick thick)
  - 2) Take brick size as (100x100x200) mm including mortar joints
- b)** Draw a neat sketch type of arches based on number of centre's
- 1) One-centred Arches
  - 2) Two-centred Arches
  - 3) Three-centred Arches
  - 4) Four-centred Arches
- c)** Construct the perspective image of below object. Take Scale as 1:1

Day & Date: Tuesday, 21-03-2023  
Time: 02:00 PM To 06:00 PM

Max. Marks: 70

- Instructions:**
- 1) Q. No. 1 is compulsory. It should be solved in the first 30 minutes in answer book. Page no 03 (Starting page of the Answer Book). Each question carries one mark.
  - 2) Don't forget to Mention question paper set (P/Q/R/S) on top of page.
  - 3) Figures to the right indicates full marks
  - 4) Assume suitable data wherever needed and mention it clearly.

**MCQ/Objective Type Questions**

Duration: 30 Minutes

Marks: 14

**Q.1 Choose the correct alternatives from the options.**

**14**

- 1) The term \_\_\_\_\_ is used to mean the free passage of clean air in a Structure.
 

|                 |                |
|-----------------|----------------|
| a) Condensation | b) Dissipation |
| c) Circulation  | d) Ventilation |
- 2) In perspective projection, all lines of sight start at a \_\_\_\_\_ point.
 

|             |           |
|-------------|-----------|
| a) Double   | b) Triple |
| c) Multiple | d) Single |
- 3) The \_\_\_\_\_ plays an important role in the comfort of persons affected by ventilation system.
 

|                    |                       |
|--------------------|-----------------------|
| a) Carbon monoxide | b) Purity of air      |
| c) Volume of room  | d) Health of occupant |
- 4) The \_\_\_\_\_ consists of equal volume of lime and sand.
 

|                  |             |
|------------------|-------------|
| a) Cement Mortar | b) Concrete |
| c) Lime Mortar   | d) Slurry   |
- 5) The term \_\_\_\_\_ is used to describe the thin plastic covering that is applied on the surface of walls and ceilings.
 

|             |                     |
|-------------|---------------------|
| a) Grouting | b) Plastering       |
| c) Pointing | d) All of the above |
- 6) The main objective of applying \_\_\_\_\_ to the plastered surfaces is to create a smooth surface.
 

|        |              |
|--------|--------------|
| a) Gum | b) Varnish   |
| c) POP | d) Distemper |
- 7) The \_\_\_\_\_ varnishes dry slowly, but they form hard and durable surface.
 

|          |               |
|----------|---------------|
| a) Oil   | b) Spirit     |
| c) Water | d) Turpentine |
- 8) \_\_\_\_\_ in a building means the free passage of clean air in a building.
 

|               |                |
|---------------|----------------|
| a) Habitation | b) Protection  |
| c) Sanitation | d) Ventilation |

|          |               |
|----------|---------------|
| a) Oil   | b) Spirit     |
| c) Water | d) Turpentine |
- 5) \_\_\_\_\_ in a building means the free passage of clean air in a building.
 

|               |                |
|---------------|----------------|
| a) Habitation | b) Protection  |
| c) Sanitation | d) Ventilation |
- 6) The part of a building constructed below ground level is known as \_\_\_\_\_.
 

|             |                   |
|-------------|-------------------|
| a) Plinth   | b) Superstructure |
| c) Basement | d) Foundation     |
- 7) The foundation in which the loading on the soil remains practically the same after the construction of the building is known as \_\_\_\_\_.
 

|                    |                             |
|--------------------|-----------------------------|
| a) Step foundation | b) Grillage foundation      |
| c) Raft foundation | d) Inverted arch foundation |
- 8) The term \_\_\_\_\_ is used to indicate the art of building the structures in Stones.
 

|            |           |
|------------|-----------|
| a) Masonry | b) Mortar |
| c) Brick   | d) Bond   |

- 9) Brick cut in length wise is called as \_\_\_\_\_.
  - a) Queen Closer
  - b) King closer
  - c) Bevelled closer
  - d) Mitred closer
- 10) Which of the following components of a door is an assembly of horizontal and vertical members?
  - a) Shutter
  - b) Frame
  - c) Frog
  - d) Nogging
- 11) The length of the horn is \_\_\_\_\_.
  - a) 35-70 CM
  - b) 25-45 CM
  - c) 10-15 CM
  - d) 45-25 CM
- 12) The term \_\_\_\_\_ is used to mean the free passage of clean air in a Structure.
  - a) Condensation
  - b) Dissipation
  - c) Circulation
  - d) Ventilation
- 13) In perspective projection, all lines of sight start at a \_\_\_\_\_ point.
  - a) Double
  - b) Triple
  - c) Multiple
  - d) Single
- 14) The \_\_\_\_\_ plays an important role in the comfort of persons affected by ventilation system.
  - a) Carbon monoxide
  - b) Purity of air
  - c) Volume of room
  - d) Health of occupant

c) Basement  
d) Foundation
- 12) The foundation in which the loading on the soil remains practically the same after the construction of the building is known as \_\_\_\_\_.  
a) Step foundation  
b) Grillage foundation  
c) Raft foundation  
d) Inverted arch foundation
- 13) The term \_\_\_\_\_ is used to indicate the art of building the structures in Stones.  
a) Masonry  
b) Mortar  
c) Brick  
d) Bond
- 14) Brick cut in length wise is called as \_\_\_\_\_.  
a) Queen Closer  
b) King closer  
c) Bevelled closer  
d) Mitred closer

**S. Y. (B.Tech.) (Sem - I) (New) (CBCS) Examination: Oct/Nov-2022**

**CIVIL ENGINEERING**

**Building Construction & Drawing**

Day & Date: Tuesday, 21-03-2023

Max. Marks: 56

Time: 02:00 PM To 06:00 PM

- Instructions:** 1) All questions are compulsory.  
2) Figures to the right indicate full marks.

**Section – I**

**Q.2 Answer the following question. (Any Four) 28**

- a) Write down about "Building Functional Requirements".
- b) Differentiate between "Framed and Load Bearing and Composite structure".
- c) Explain in steps wise a "Design of Staircase" for building with neat sketch.
- d) Explain in brief "Natural Ventilation and Artificial Ventilation" with the good significance of it.
- e) Enlist and explain the various types of pointing with neat sketch.

**Section – II**

**Q.3 Answer the following question. (Any One) 18**

- a) Draw to a scale of 1:10 front view and vertical sectional elevation of a double leaf panelled door for the following data  
(All the dimensions are in mm)
  - 1) Clear opening = 1000 x 2100
  - 2) Cross section of the frame = 100 x 80
  - 3) Vertical stiles = 100 x 40
  - 4) Top rail = 100 x 35
  - 5) Frieze rail = 100 x 35
  - 6) Lock rail = 190 x 40
  - 7) Bottom rail = 160 x 40
  - 8) No. of panels = 6 (25 mm thick)
- b) Design and draw a suitable Dog Legged Staircase for residential building using the following data.  
(All the dimensions are in mm)
  - 1) Floor to Floor height: 3000
  - 2) Riser: 150 and Tread: 300
  - 3) Wall Thickness 230
  - 4) Fight width: 1200
  - 5) Waist Slab: 150
 Assume Suitable data if necessary
  - i) Draw detailed plan (1:20)
  - ii) Sectional elevation (1:20)

**Q.4 Answer the following question. (Any Two)**

- a) Draw to a scale of 1:10 plans for alternate course and elevation for at least 10 courses for a brick wall built with.
- 1) Stretcher bond (01 brick thick)
  - 2) Take brick size as (100x100x200) mm including mortar joints
- b) Draw a neat sketch type of arches based on number of centre's
- 1) One-centred Arches
  - 2) Two-centred Arches
  - 3) Three-centred Arches
  - 4) Four-centred Arches
- c) Construct the perspective image of below object. Take Scale as 1:1

**Fluid Mechanics and Fluid Machines**

Day & Date: Wednesday, 15-03-2023  
 Time: 02:00 PM To 05:00 PM

Max. Marks: 70

- Instructions:** 1) Q. No. 1 is compulsory. It should be solved in the first 30 minutes in answer book. Page no 03 (Starting page of the Answer Book). Each question carries one mark.  
 2) Don't forget to Mention question paper set (P/Q/R/S) on top of page.  
 3) Figures to the right indicates full marks.

**MCQ/Objective Type Questions**

Duration: 30 Minutes

Marks: 14

**Q.1 Choose the correct alternatives from the options. 14**

- 1) A \_\_\_\_\_ line is an imaginary line within the flow so that the tangent at any point on it indicates velocity at that point.
 

|                |                      |
|----------------|----------------------|
| a) Streak line | b) stream line       |
| c) path line   | d) none of the above |
- 2) The flow in a pipe whose valve being opened or closed gradually is an example of \_\_\_\_\_.
 

|                    |                      |
|--------------------|----------------------|
| a) steady flow     | b) unsteady flow     |
| c) rotational flow | d) compressible flow |
- 3) A real practical fluid possesses which of the following?
 

|              |                    |
|--------------|--------------------|
| a) viscosity | b) surface tension |
| c) density   | d) all the above   |
- 4) For a submerged body, if centre of buoyancy is above than C.G. of the body, the body will remain in the state of \_\_\_\_\_.
 

|                         |                        |
|-------------------------|------------------------|
| a) stable equilibrium   | b) neutral equilibrium |
| c) unstable equilibrium | d) any of the above    |
- 5) The continuity equation is based on the principle of \_\_\_\_\_.
 

|                             |                         |
|-----------------------------|-------------------------|
| a) conservation of momentum | b) conservation of mass |
| c) conservation of energy   | d) none of the above    |
- 6) The height of free surface above point is known as \_\_\_\_\_.
 

|                        |                          |
|------------------------|--------------------------|
| a) static head         | b) intensity of pressure |
| c) either of the above | d) none of the above     |
- 7) An error of 1% in measuring H will produce... error in discharges over a rectangular notch or weir.
 

|       |         |
|-------|---------|
| a) 1% | b) 1.5% |
| c) 2% | d) 2.5% |
- 8) The hydraulic grade line is \_\_\_\_\_.
 

|                                                      |
|------------------------------------------------------|
| a) always above the energy grade line                |
| b) the velocity head below the energy grade line     |
| c) always above the closed conduit                   |
| d) always slopping downward in the direction of flow |

- 9) The head loss in turbulent flow in pipe
- a) Varies directly as the velocity
  - b) Varies inversely as the square of the velocity
  - c) Varies inversely as the square of the diameter
  - d) Varies approximately as the square of the velocity
- 10) Following is not a minor head loss
- a) loss at exit of pipe
  - b) loss at entrance of pipe
  - c) friction loss
  - d) none of these
- 11) Consider the following statements:
- 1) Pelton wheel is a tangential flow impulse turbine
  - 2) Francis turbine is an axial flow reaction turbine.
  - 3) Kaplan turbine is a radial flow reaction turbine.
- Which of the above statements is/are correct?
- a) 1 and 3
  - b) 1 alone
  - c) 2 alone
  - d) 3 alone
- 12) Specific speed of an impulse turbine (Pelton wheel) ranges from
- a) 12 to 70
  - b) 80 to 400
  - c) 300 to 1000
  - d) 1000 to 1200
- 13) A centrifugal pump is taking much of power, the probable reason may be
- a) liquid being pumped is heavy
  - b) speed of the pump is low
  - c) there is leakage of air
  - d) Ineffective strainer and foot valve arrangement
- 14) The flow ratio in case of a centrifugal pump varies from
- a) 0.40 to 0.50
  - b) 0.25 to 0.40
  - c) 0.1 to 0.25
  - d) 0.50 to 0.65

Set **P**

**S.Y. (B.Tech.) (Sem - I) (New) (CBCS) Examination: Oct/Nov-2022**  
**CIVIL ENGINEERING**

**Fluid Mechanics and Fluid Machines**

Day & Date: Wednesday, 15-03-2023  
 Time: 02:00 PM To 05:00 PM

Max. Marks: 56

- Instructions:** 1) Solve all question from Section - I.  
 2) Section – II Q.No.5 is compulsory and Q. No. 6 to Q. No. 8 any two from the remaining question.  
 3) Figures to the right indicate full marks.  
 4) Use of non-programmable calculator is allowed.  
 5) Assume correct data wherever necessary.

**Section – I**

- Q.2 a)** Define and Write The Units **04**  
 1) Viscosity  
 2) Specific Gravity  
 3) Compressibility  
 4) Capillarity
- b)** Calculate the capillary rise in a glass tube of 2.5 mm diameter when immersed vertically in (a) water and (b) mercury. Take  $\sigma = 0.0725 \text{ N/m}$  for water and  $\sigma = 0.52 \text{ N/m}$  for mercury. The angle of contact for water is zero and for mercury  $130^\circ$ . **04**
- Q.3 Attempt any two.** **10**  
**a)** A uniform body of size 3m long, 2m wide and 1m deep floats in water. What is the weight of body if depth of immersion is 0.8m? Determine the metacentric height also.  
**b)** A rectangular plate 3 m long and 1 m wide is immersed vertically in water in such a way that 3 m side is parallel to water surface and 1 m below it. Determine;  
 1) Total pressure on the plate  
 2) Centre of plate  
**c)** State and prove Pascal's law
- Q.4 Attempt any two.** **10**  
**a)** Find the discharge of water flowing over a rectangular notch of 2.5m length when the constant head over the notch is 400mm. Take  $C_d = 0.62$ .  
**b)** Derive Bernoulli's theorem for steady flow of an incompressible fluid and state assumptions made for the derivation.  
**c)** The stream function is given by  $\psi = 5x - 6y$ . Calculate the velocity components. Also find magnitude and direction of the resultant velocity at any point.

**Section – II**

- Q.5** a) Write short note on i) Surge Tank ii) Water Hammer. **05**  
 b) Show that frictional torque  $\tau$  of a disc of diameter  $D$  at a speed  $N$  is in fluid of viscosity  $\mu$  and density  $\rho$  in a turbulent flow is given by **05**  

$$\tau = D^5 N^2 \rho \Phi[\mu/D^2 N \rho]$$
- Q.6** a) What is mean by turbine? Give detailed classification of turbines. **05**  
 b) What is mean by dimensional analysis? what are its uses? **04**
- Q.7** a) Derive an expression for force exerted by a jet on stationary curved plate, when jet strikes at centre of symmetrical curved plate. **05**  
 b) A centrifugal pump delivers water against a net head of 15 m and design speed of 1100 rpm. The vane angle is  $30^\circ$  curved back. If the impeller diameter is 320 mm and outlet width is 60 mm. Determine discharge of pump if manometric efficiency is 96%. **04**
- Q.8** a) Determine the difference in elevation between water surfaces in two tanks which are connected by horizontal pipe of diameter 50cm and length 15m. The discharge through the pipe is 600 lps. Consider all losses and assume  $f=0.04$  **05**  
 b) With neat sketch explain various types of heads available for Centrifugal Pumps. **04**

 3) Compressibility  
 4) Capillarity
- b)** Calculate the capillary rise in a glass tube of 2.5 mm diameter when immersed vertically in (a) water and (b) mercury. Take  $\sigma = 0.0725 \text{ N/m}$  for water and  $\sigma = 0.52 \text{ N/m}$  for mercury. The angle of contact for water is zero and for mercury  $130^\circ$ . **04**
- Q.3 Attempt any two.** **10**  
**a)** A uniform body of size 3m long, 2m wide and 1m deep floats in water. What is the weight of body if depth of immersion is 0.8m? Determine the metacentric height also.  
**b)** A rectangular plate 3 m long and 1 m wide is immersed vertically in water in such a way that 3 m side is parallel to water surface and 1 m below it. Determine;  
 1) Total pressure on the plate  
 2) Centre of plate  
**c)** State and prove Pascal's law
- Q.4 Attempt any two.** **10**  
**a)** Find the discharge of water flowing over a rectangular notch of 2.5m length when the constant head over the notch is 400mm. Take  $C_d = 0.62$ .  
**b)** Derive Bernoulli's theorem for steady flow of an incompressible fluid and state assumptions made for the derivation.  
**c)** The stream function is given by  $\psi = 5x - 6y$ . Calculate the velocity components. Also find magnitude and direction of the resultant velocity at any point.

**Section – II**

- Q.5** a) Write short note on i) Surge Tank ii) Water Hammer. **05**  
 b) Show that frictional torque  $\tau$  of a disc of diameter  $D$  at a speed  $N$  is in fluid of viscosity  $\mu$  and density  $\rho$  in a turbulent flow is given by **05**  

$$\tau = D^5 N^2 \rho \Phi[\mu/D^2 N \rho]$$
- Q.6** a) What is mean by turbine? Give detailed classification of turbines. **05**  
 b) What is mean by dimensional analysis? what are its uses? **04**
- Q.7** a) Derive an expression for force exerted by a jet on stationary curved plate, when jet strikes at centre of symmetrical curved plate. **05**  
 b) A centrifugal pump delivers water against a net head of 15 m and design speed of 1100 rpm. The vane angle is  $30^\circ$  curved back. If the impeller diameter is 320 mm and outlet width is 60 mm. Determine discharge of pump if manometric efficiency is 96%. **04**
- Q.8** a) Determine the difference in elevation between water surfaces in two tanks which are connected by horizontal pipe of diameter 50cm and length 15m. The discharge through the pipe is 600 lps. Consider all losses and assume  $f=0.04$  **05**  
 b) With neat sketch explain various types of heads available for Centrifugal Pumps. **04**

# S

# Fluid Mechanics and Fluid Machines

Time: 02:00 PM To 05:00 PM

**Instructions:** 1) Q. No. 1 is compulsory. It should be solved in the first 30 minutes in answer book. Page no 03 (Starting page of the Answer Book). Each question carries one mark.  
2) Don't forget to Mention question paper set (P/Q/R/S) on top of page.  
3) Figures to the right indicates full marks.

### MCQ/Objective Type Questions

Duration: 30 Minutes

Marks: 14

**Q.1 Choose the correct alternatives from the options.**

14

- 1) The elongation produced in a rod by its own weight of length "L" and diameter "D" rigidly fixed at the upper end and hanging is equal to \_\_\_\_\_.  
Where  
W = weight per unit volume of the rod  
E = Modulus of elasticity
  - a)  $WL / 2E$
  - b)  $WL^2 / 2E$
  - c)  $WL^3 / 2E$
  - d)  $WL^4 / 2E$
- 2) The modulus of elasticity E and bulk modulus K are related by \_\_\_\_\_.
  - a)  $K = mE / 3(m-2)$
  - b)  $K = mE / 2(m+1)$
  - c)  $K = 3(m-2) / mE$
  - d)  $K = 2(m+1) / mE$
- 3) The ultimate stress for a hollow steel column which carries an axial load of 1.9 MN is 480 N/mm<sup>2</sup> and working stress is 120 N/mm<sup>2</sup>. The factor of safety is \_\_\_\_\_.
  - a) 4
  - b) 0.25
  - c) 25
  - d) 2
- 4) A rectangular bar of cross-sectional area 10000 mm<sup>2</sup> is subjected to an axial load of 20 kN. The normal stress on a section which is inclined at an angle of 30° with normal cross section of the bar is \_\_\_\_\_.
  - a) 2 N/mm<sup>2</sup>
  - b) 1.5 N/mm<sup>2</sup>
  - c) 0.866 N/mm<sup>2</sup>
  - d) 2.866 N/mm<sup>2</sup>
- 5) If principal stresses in a two-dimensional case are -10 MPa and 20 MPa respectively, then maximum shear stress at the point is \_\_\_\_\_.
  - a) 10 MPa
  - b) 15 MPa
  - c) 20 MPa
  - d) 30 MPa
- 6) Pick the incorrect statement from the following four statements \_\_\_\_\_.
  - a) On the plane which carries maximum normal stress, the shear stress is zero
  - b) Principal planes are mutually orthogonal
  - c) On the plane which carries maximum shear stress, the normal stress is zero
  - d) The principal stress axes and principal strain axes coincide for an isotropic

- 7) Equivalent torque in a shaft subjected to axial load  $P$ , torque  $T$  and bending moment  $M$  is \_\_\_\_\_.  
 a)  $T_{eq} = (Pa^2 + M^2 + T^2)$                       b)  $T_{eq} = (Pa^2 + M^2 + T^2)^{0.5}$   
 c)  $T_{eq} = (M^2 + T^2)^{0.5}$                       d)  $T_{eq} = (M^2 + T^2)$
- 8) Maximum principal stress is equal to \_\_\_\_\_.  
 a)  $(\sigma_x + \sigma_y)/2 + [(\sigma_x - \sigma_y)^2 + \tau^2]^{0.5}$   
 b)  $(\sigma_x + \sigma_y)/2 + 0.5 [(\sigma_x - \sigma_y)^2 + \tau^2]^{0.5}$   
 c)  $(\sigma_x + \sigma_y)/2 + 0.5 [(\sigma_x - \sigma_y)^2 + 4\tau^2]^{0.5}$   
 d)  $(\sigma_x + \sigma_y)/2 + 0.5 [(\sigma_x - \sigma_y)^2 + 4\tau^2]$
- 9) A concentrated load  $P$  acts on a simply supported beam of span " $L$ " at a distance  $(L/3)$  from the left support. The bending moment at the point of application of the load is given by \_\_\_\_\_.  
 a)  $PL/3$                       b)  $2PL/3$   
 c)  $PL/9$                       d)  $2PL/9$
- 10) Shear force diagram of a cantilever beam with point load at free end is represented by \_\_\_\_\_.  
 a) Triangular                      b) Semi-circular  
 c) Rectangular                      d) Parabolic curve
- 11) When a beam is subjected to a bending moment the bending stress in a layer is \_\_\_\_\_ the distance from the neutral axis.  
 a) Independent of                      b) Directly proportional to  
 c) Inversely proportional to                      d) None of these
- 12) The section modulus of a rectangular section having width " $b$ " and depth " $d$ " about an axis through its C. G. and parallel to the base " $b$ " is \_\_\_\_\_.  
 a)  $bd^2 / 12$                       b)  $bd^2 / 4$   
 c)  $bd^2 / 6$                       d) None of these
- 13) In influence line diagrams (ILD):- \_\_\_\_\_.  
 a) Points change, position of loads remain fixed  
 b) Both points and position of load changes  
 c) Neither points nor position of load changes  
 d) Points remain fixed, position of load changes
- 14) What will be the shape of ILD curve for vertical reaction at left support for a simply supported beam?  
 a) Triangular                      b) Rectangular  
 c) Trapezoidal                      d) Cubic curve

Day & Date: Monday, 20-03-2023  
 Time: 02:00 PM To 05:00 PM

Max. Marks: 56

- Instructions:** 1) In Section -I, Question No. 2 is compulsory, solve any two from the remaining.  
 2) In Section - II, Question No. 6 is compulsory, solve any two from the remaining.  
 3) Assume suitable data, if necessary and mention it clearly.  
 4) Figures to the right indicate full marks.

**Section – I**

- Q.2** The bar shown in fig-1, is subjected to a tensile load of 160 kN. If the stress in the middle portion is limited to  $150 \text{ N/mm}^2$ . Determine the diameter of the middle portion, find also the length of the middle portion, if the total elongation of the bar is to be 0.2 mm. young's modulus is given as  $2.1 \times 10^5 \text{ N/mm}^2$ . **10**

Fig.-1

- Q.3** A small block is 4 cm long, 3 cm high and 0.5 cm thick. It is subjected to uniformly distributed tensile forces of resultants 1200 N and 500 N as shown in fig.-2 compute the normal and shear stresses developed along the diagonal AB. **09**

Fig.-2

- Q.4** A circular shaft transmits 60 kW at 2 Hz it is supported in bearings 3 m apart and at 1 m from one bearing, it carries a pulley exerting a transverse load of 36 kN on the shaft. Determine a suitable diameter for the shaft if. **09**
- a) The maximum direct stress is not to exceed  $100 \text{ N/mm}^2$ .
- b) The maximum shear stress is not to exceed  $50 \text{ N/mm}^2$ .
- Q.5** Determine the diameter of bolt which is subjected to an axial pull of 9 kN together with a transverse shear force of 4.5 kN using maximum principal stress theory. Given the elastic limit in tension =  $225 \text{ N/mm}^2$ , Factor of safety = 3, and Poisson's ratio = 0.3. **09**

### Section – II

- Q.6** Draw the shear force and bending moment diagrams of a simply supported beam of length 7 m carrying uniformly distributed load as shown in fig.-3. **10**

Fig.-3

- Q.7** A Timber beam of rectangular section of length 8 m is simply supported. The beam carries a UDL of  $12 \text{ kN/m}$  run over the entire length and a point load of 10 kN at 3 m from the left support. If the depth is two times the width and the stress in the timber is not to exceed  $8 \text{ N/mm}^2$ , find the suitable dimensions of the section. **09**
- Q.8** The shear force acting on a section of a beam is 50 kN. The section of the beam is of T-shaped of dimensions 100 mm x 100 mm x 20 mm as shown in fig.-4, the moment of inertia about the horizontal neutral axis is  $314.221 \times 10^4 \text{ mm}^4$ . Calculate the shear stress at the neutral axis and at the junction of the web and the flange. **09**

Fig.-4

- Q.9** Two-wheel loads 8 kN and 20 kN spaced at 2 m apart move along the span of girder of span 16 m. find the maximum BM that can occur at a section of 6 m from the left end. Any wheel load can lead the other. **09**

**S. Y. (B.Tech.) (Sem - I) (New) (CBCS) Examination: Oct/Nov-2022**  
**CIVIL ENGINEERING**  
**Structural Mechanics-I**

Day & Date: Monday, 20-03-2023  
 Time: 02:00 PM To 05:00 PM

Max. Marks: 70

- Instructions:** 1) Q. No. 1 is compulsory. It should be solved in the first 30 minutes in answer book. Page no 03 (Starting page of the Answer Book). Each question carries one mark.  
 2) Don't forget to Mention question paper set (P/Q/R/S) on top of page.  
 3) Figures to the right indicates full marks  
 4) Assume suitable data wherever needed and mention it clearly.

**MCQ/Objective Type Questions**

Duration: 30 Minutes

Marks: 14

**Q.1 Choose the correct alternatives from the options.**

**14**

- 1) Pick the incorrect statement from the following four statements \_\_\_\_\_.
  - a) On the plane which carries maximum normal stress, the shear stress is zero
  - b) Principal planes are mutually orthogonal
  - c) On the plane which carries maximum shear stress, the normal stress is zero
  - d) The principal stress axes and principal strain axes coincide for an isotropic
- 2) Equivalent torque in a shaft subjected to axial load  $P$ , torque  $T$  and bending moment  $M$  is \_\_\_\_\_.
 

|                                  |                                        |
|----------------------------------|----------------------------------------|
| a) $T_{eq} = (Pa^2 + M^2 + T^2)$ | b) $T_{eq} = (Pa^2 + M^2 + T^2)^{0.5}$ |
| c) $T_{eq} = (M^2 + T^2)^{0.5}$  | d) $T_{eq} = (M^2 + T^2)$              |
- 3) Maximum principal stress is equal to \_\_\_\_\_.
  - a)  $(\sigma_x + \sigma_y)/2 + [(\sigma_x - \sigma_y)^2 + \tau^2]^{0.5}$
  - b)  $(\sigma_x + \sigma_y)/2 + 0.5 [(\sigma_x - \sigma_y)^2 + \tau^2]^{0.5}$
  - c)  $(\sigma_x + \sigma_y)/2 + 0.5 [(\sigma_x - \sigma_y)^2 + 4\tau^2]^{0.5}$
  - d)  $(\sigma_x + \sigma_y)/2 + 0.5 [(\sigma_x - \sigma_y)^2 + 4\tau^2]$
- 4) A concentrated load  $P$  acts on a simply supported beam of span " $L$ " at a distance  $(L/3)$  from the left support. The bending moment at the point of application of the load is given by \_\_\_\_\_.
 

|           |            |
|-----------|------------|
| a) $PL/3$ | b) $2PL/3$ |
| c) $PL/9$ | d) $2PL/9$ |
- 5) Shear force diagram of a cantilever beam with point load at free end is represented by \_\_\_\_\_.
 

|                |                    |
|----------------|--------------------|
| a) Triangular  | b) Semi-circular   |
| c) Rectangular | d) Parabolic curve |

Seat  
No.

**S. Y. (B.Tech.) (Sem - I) (New) (CBCS) Examination: Oct/Nov-2022**  
**CIVIL ENGINEERING**  
**Structural Mechanics-I**

Day & Date: Monday, 20-03-2023  
 Time: 02:00 PM To 05:00 PM

Max. Marks: 56

- Instructions:** 1) In Section -I, Question No. 2 is compulsory, solve any two from the remaining.  
 2) In Section - II, Question No. 6 is compulsory, solve any two from the remaining.  
 3) Assume suitable data, if necessary and mention it clearly.  
 4) Figures to the right indicate full marks.

**Section – I**

- Q.2** The bar shown in fig-1, is subjected to a tensile load of 160 kN. If the stress in the middle portion is limited to  $150 \text{ N/mm}^2$ . Determine the diameter of the middle portion, find also the length of the middle portion, if the total elongation of the bar is to be 0.2 mm. young's modulus is given as  $2.1 \times 10^5 \text{ N/mm}^2$ . **10**

**Fig.-1**

- Q.3** A small block is 4 cm long, 3 cm high and 0.5 cm thick. It is subjected to uniformly distributed tensile forces of resultants 1200 N and 500 N as shown in fig.-2 compute the normal and shear stresses developed along the diagonal AB. **09**

**Fig.-2**

- Q.4** A circular shaft transmits 60 kW at 2 Hz it is supported in bearings 3 m apart and at 1 m from one bearing, it carries a pulley exerting a transverse load of 36 kN on the shaft. Determine a suitable diameter for the shaft if. **09**
- a) The maximum direct stress is not to exceed  $100 \text{ N/mm}^2$ .
- b) The maximum shear stress is not to exceed  $50 \text{ N/mm}^2$ .
- Q.5** Determine the diameter of bolt which is subjected to an axial pull of 9 kN together with a transverse shear force of 4.5 kN using maximum principal stress theory. Given the elastic limit in tension =  $225 \text{ N/mm}^2$ , Factor of safety = 3, and Poisson's ratio = 0.3. **09**

### Section – II

- Q.6** Draw the shear force and bending moment diagrams of a simply supported beam of length 7 m carrying uniformly distributed load as shown in fig.-3. **10**

Fig.-3

- Q.7** A Timber beam of rectangular section of length 8 m is simply supported. The beam carries a UDL of  $12 \text{ kN/m}$  run over the entire length and a point load of 10 kN at 3 m from the left support. If the depth is two times the width and the stress in the timber is not to exceed  $8 \text{ N/mm}^2$ , find the suitable dimensions of the section. **09**
- Q.8** The shear force acting on a section of a beam is 50 kN. The section of the beam is of T-shaped of dimensions  $100 \text{ mm} \times 100 \text{ mm} \times 20 \text{ mm}$  as shown in fig.-4, the moment of inertia about the horizontal neutral axis is  $314.221 \times 10^4 \text{ mm}^4$ . Calculate the shear stress at the neutral axis and at the junction of the web and the flange. **09**

Fig.-4

- Q.9** Two-wheel loads 8 kN and 20 kN spaced at 2 m apart move along the span of girder of span 16 m. find the maximum BM that can occur at a section of 6 m from the left end. Any wheel load can lead the other. **09**

**S.Y. (B. Tech) (Sem – II) (New) (CBCS) Examination: Oct/Nov-2022**  
**CIVIL ENGINEERING**  
**Environmental Engineering – I**

Day & Date: Monday, 06-03-2023  
 Time: 02:00 PM To 05:00 PM

Max. Marks: 70

- Instructions:** 1) Q. No. 1 is compulsory. It should be solved in the first 30 minutes in answer book. Page no 03 (Starting page of the Answer Book). Each question carries one mark.  
 2) Don't forget to Mention question paper set (P/Q/R/S) on top of page.  
 3) Figures to the right indicate full marks.  
 4) Assume data wherever necessary

**MCQ/Objective Type Questions**

Duration: 30 Minutes

Marks: 14

**Q.1 Choose the correct alternatives from the given options.**

**14**

- 1) Freeman's formula for estimating fire demand  $Q = 5663\sqrt{P}$  where "P" indicates \_\_\_\_\_.  
 a) Population in hundreds                      b) Population in thousands  
 c) Population in lakhs                            d) None of the above
- 2) Most causes of alkalinity in river water is \_\_\_\_\_.  
 a) Carbonates                                      b) Bicarbonates  
 c) Hydroxides                                      d) All of the above
- 3) \_\_\_\_\_ as disinfectant doesn't leave behind any residual.  
 a) UV light                                          b) Bleaching powder  
 c) Chlorine gas                                      d) Chlorine powder
- 4) Cleaning of Rapid sand Filter is done by \_\_\_\_\_.  
 a) Backwashing                                    b) Scrapping and removal of sand  
 c) Both a) and b)                                  d) None of the above
- 5) Standard EDTA is used in the titration to determine \_\_\_\_\_ of the water.  
 a) Alkalinity                                          b) Acidity  
 c) Hardness                                          d) Chlorides
- 6) Stokes law is applied in the design of \_\_\_\_\_ treatment unit.  
 a) Coagulation                                      b) Filtration  
 c) Sedimentation                                  d) Aeration
- 7) Overflow rate in the sedimentation tank is independent of \_\_\_\_\_ of the tank.  
 a) Height                                              b) Length  
 c) Detention time                                  d) Breadth
- 8) To absorb the hourly variation in demand \_\_\_\_\_ type of reservoirs are provided.  
 a) Sedimentation                                  b) Distribution  
 c) Penetration                                      d) Filtration

- 9) The purpose of aeration used in water treatment is to \_\_\_\_\_.  
a) reduce corrosion to water pipes  
b) remove iron and manganese  
c) remove hydrogen sulphide  
d) All of the above
- 10) In rapid sand filters the permissible head loss is \_\_\_\_\_.  
a) Between 2.5 and 3.5 m  
b) Exactly 2.5 m  
c) Less than 5 m  
d) All of the above
- 11) \_\_\_\_\_ is constituent of Asbestos cement pipe.  
a) Sand  
b) Lime  
c) Portland cement  
d) Iron
- 12) Corrosion is \_\_\_\_\_ process.  
a) Electrodynamic  
b) Electrochemical  
c) Electrostatic  
d) Electromagnetic
- 13) \_\_\_\_\_ treatment reduces salinity of water.  
a) Flocculation  
b) Reverse osmosis  
c) Electro-dialysis  
d) Both b) and c)
- 14) Analysis of pipe networks of distribution system is calculated by \_\_\_\_\_.  
a) Discharge in pipelines  
b) Equivalent pipe method  
c) Computation of pressure  
d) Mass Curve Method

**Environmental Engineering-I**

Day & Date: Monday, 06-03-2023  
 Time: 02:00 PM To 05:00 PM

Max. Marks: 56

- Instructions:** 1) In Section-I, Q. No. 2 is compulsory and solve any two questions from the remaining.  
 2) In Section-II, Q. No. 6 is compulsory and solve any two questions from the remaining.  
 3) Figures to the right indicates full marks.  
 4) Assume suitable data wherever necessary and mention it clearly.  
 5) Use of non-programmable calculator is allowed.

**Section – I**

- Q.2 a)** Find the population and of a city in 2051 by Incremental Increase method. **06**

| Year | Population |
|------|------------|
| 1991 | 15,000     |
| 2001 | 41,000     |
| 2011 | 65,000     |
| 2021 | 98,000     |
| 2031 | 1,12,000   |

- b)** Describe various factors affecting the demand of water. **04**

- Q.3 a)** A settling tank is designed for an overflow rate of 3500 lit./m<sup>2</sup>/hr. What percentage of particles of diameter (i) 0.04 mm and (ii) 0.02 mm will be removed in this tank at water temperature of 10°C. Take  $S_s = 2.65$ . **05**

- b)** Explain the methodology adopted in usage of Alum and copperas in coagulation process with the help of chemical equations. **04**

- Q.4 a)** Design a Flocculator for the flow of 15 MLD. **05**

- b)** Write short note on Lime soda ash method of water softening. **04**

- Q.5 a)** Design cascade type circular aerator with the following data **05**

- 1) Quantity of water flowing over aerator per day = 120 MLD.
- 2) Loading rate = 0.03 m<sup>2</sup>/m<sup>3</sup>/hr.
- 3) Velocity of water flow in collecting channel = 1 m/s

- b)** Explain any four types of sedimentation tanks in WTP. **04**

**Section – II**

- Q.6 a)** A large service reservoir supplies water to two colonies. **06**

Colony A - Population 12000

Colony B - Population 60000

Determine the diameter of supply pipe and hydraulic gradient. Average daily demand is 200 lpcd

- b)** Discuss Gravity System with diagram. **04**

- |            |                             |                                                                     |           |
|------------|-----------------------------|---------------------------------------------------------------------|-----------|
| <b>Q.7</b> | <b>a)</b>                   | Explain methodology of chlorination process with the help of graph. | <b>05</b> |
|            | <b>b)</b>                   | Explain Reverse Osmosis with a neat diagram.                        | <b>04</b> |
| <b>Q.8</b> | <b>a)</b>                   | Discuss the various types of storage reservoirs.                    | <b>05</b> |
|            | <b>b)</b>                   | Discuss the different types of losses in pipes.                     | <b>04</b> |
| <b>Q.9</b> | <b>Write short notes on</b> |                                                                     |           |
|            | <b>a)</b>                   | UV                                                                  | <b>09</b> |
|            | <b>b)</b>                   | Adsorption                                                          |           |
|            | <b>c)</b>                   | Ozone Disinfection                                                  |           |

| c) Sedimentation | d) Aeration   |
- 11) Overflow rate in the sedimentation tank is independent of \_\_\_\_\_ of the tank.
- |                   |            |
|-------------------|------------|
| a) Height         | b) Length  |
| c) Detention time | d) Breadth |
- 12) To absorb the hourly variation in demand \_\_\_\_\_ type of reservoirs are provided.
- |                  |                 |
|------------------|-----------------|
| a) Sedimentation | b) Distribution |
| c) Penetration   | d) Filtration   |
- 13) The purpose of aeration used in water treatment is to \_\_\_\_\_.
- |                                    |                              |
|------------------------------------|------------------------------|
| a) reduce corrosion to water pipes | b) remove iron and manganese |
| c) remove hydrogen sulphide        | d) All of the above          |
- 14) In rapid sand filters the permissible head loss is \_\_\_\_\_.
- |                          |                     |
|--------------------------|---------------------|
| a) Between 2.5 and 3.5 m | b) Exactly 2.5 m    |
| c) Less than 5 m         | d) All of the above |

**S.Y. (B. Tech) (Sem – II) (New) (CBCS) Examination: Oct/Nov-2022**  
**CIVIL ENGINEERING**  
**Environmental Engineering-I**

Day & Date: Monday, 06-03-2023  
 Time: 02:00 PM To 05:00 PM

Max. Marks: 56

- Instructions:** 1) In Section-I, Q. No. 2 is compulsory and solve any two questions from the remaining.  
 2) In Section-II, Q. No. 6 is compulsory and solve any two questions from the remaining.  
 3) Figures to the right indicates full marks.  
 4) Assume suitable data wherever necessary and mention it clearly.  
 5) Use of non-programmable calculator is allowed.

**Section – I**

- Q.2 a)** Find the population and of a city in 2051 by Incremental Increase method. **06**

| Year | Population |
|------|------------|
| 1991 | 15,000     |
| 2001 | 41,000     |
| 2011 | 65,000     |
| 2021 | 98,000     |
| 2031 | 1,12,000   |

- b)** Describe various factors affecting the demand of water. **04**

- Q.3 a)** A settling tank is designed for an overflow rate of 3500 lit./m<sup>2</sup>/hr. What percentage of particles of diameter (i) 0.04 mm and (ii) 0.02 mm will be removed in this tank at water temperature of 10°C. Take  $S_s = 2.65$ . **05**

- b)** Explain the methodology adopted in usage of Alum and copperas in coagulation process with the help of chemical equations. **04**

- Q.4 a)** Design a Flocculator for the flow of 15 MLD. **05**

- b)** Write short note on Lime soda ash method of water softening. **04**

- Q.5 a)** Design cascade type circular aerator with the following data **05**

- 1) Quantity of water flowing over aerator per day = 120 MLD.
- 2) Loading rate = 0.03 m<sup>2</sup>/m<sup>3</sup>/hr.
- 3) Velocity of water flow in collecting channel = 1 m/s

- b)** Explain any four types of sedimentation tanks in WTP. **04**

**Section – II**

- Q.6 a)** A large service reservoir supplies water to two colonies. **06**

Colony A - Population 12000

Colony B - Population 60000

Determine the diameter of supply pipe and hydraulic gradient. Average daily demand is 200 lpcd

- b)** Discuss Gravity System with diagram. **04**

- |            |                             |                                                                     |           |
|------------|-----------------------------|---------------------------------------------------------------------|-----------|
| <b>Q.7</b> | <b>a)</b>                   | Explain methodology of chlorination process with the help of graph. | <b>05</b> |
|            | <b>b)</b>                   | Explain Reverse Osmosis with a neat diagram.                        | <b>04</b> |
|            |                             |                                                                     |           |
| <b>Q.8</b> | <b>a)</b>                   | Discuss the various types of storage reservoirs.                    | <b>05</b> |
|            | <b>b)</b>                   | Discuss the different types of losses in pipes.                     | <b>04</b> |
|            |                             |                                                                     |           |
| <b>Q.9</b> | <b>Write short notes on</b> |                                                                     |           |
|            | <b>a)</b>                   | UV                                                                  | <b>09</b> |
|            | <b>b)</b>                   | Adsorption                                                          |           |
|            | <b>c)</b>                   | Ozone Disinfection                                                  |           |

**Environmental Engineering – I**

Day & Date: Monday, 06-03-2023  
 Time: 02:00 PM To 05:00 PM

Max. Marks: 70

- Instructions:** 1) Q. No. 1 is compulsory. It should be solved in the first 30 minutes in answer book. Page no 03 (Starting page of the Answer Book). Each question carries one mark.  
 2) Don't forget to Mention question paper set (P/Q/R/S) on top of page.  
 3) Figures to the right indicate full marks.  
 4) Assume data wherever necessary

**MCQ/Objective Type Questions**

Duration: 30 Minutes

Marks: 14

**Q.1 Choose the correct alternatives from the given options.**

**14**

- 1) Stokes law is applied in the design of \_\_\_\_\_ treatment unit.
  - a) Coagulation
  - b) Filtration
  - c) Sedimentation
  - d) Aeration
- 2) Overflow rate in the sedimentation tank is independent of \_\_\_\_\_ of the tank.
  - a) Height
  - b) Length
  - c) Detention time
  - d) Breadth
- 3) To absorb the hourly variation in demand \_\_\_\_\_ type of reservoirs are provided.
  - a) Sedimentation
  - b) Distribution
  - c) Penetration
  - d) Filtration
- 4) The purpose of aeration used in water treatment is to \_\_\_\_\_.
  - a) reduce corrosion to water pipes
  - b) remove iron and manganese
  - c) remove hydrogen sulphide
  - d) All of the above
- 5) In rapid sand filters the permissible head loss is \_\_\_\_\_.
  - a) Between 2.5 and 3.5 m
  - b) Exactly 2.5 m
  - c) Less than 5 m
  - d) All of the above
- 6) \_\_\_\_\_ is constituent of Asbestos cement pipe.
  - a) Sand
  - b) Lime
  - c) Portland cement
  - d) Iron
- 7) Corrosion is \_\_\_\_\_ process.
  - a) Electrodynamic
  - b) Electrochemical
  - c) Electrostatic
  - d) Electromagnetic
- 8) \_\_\_\_\_ treatment reduces salinity of water.
  - a) Flocculation
  - b) Reverse osmosis
  - c) Electro-dialysis
  - d) Both b) and c)

- 9) Analysis of pipe networks of distribution system is calculated by \_\_\_\_\_.  
a) Discharge in pipelines                      b) Equivalent pipe method  
c) Computation of pressure                    d) Mass Curve Method
- 10) Freeman's formula for estimating fire demand  $Q = 5663\sqrt{P}$  where "P" indicates \_\_\_\_\_.  
a) Population in hundreds                      b) Population in thousands  
c) Population in lakhs                            d) None of the above
- 11) Most causes of alkalinity in river water is \_\_\_\_\_.  
a) Carbonates                                      b) Bicarbonates  
c) Hydroxides                                      d) All of the above
- 12) \_\_\_\_\_ as disinfectant doesn't leave behind any residual.  
a) UV light                                          b) Bleaching powder  
c) Chlorine gas                                      d) Chlorine powder
- 13) Cleaning of Rapid sand Filter is done by \_\_\_\_\_.  
a) Backwashing                                      b) Scrapping and removal of sand  
c) Both a) and b)                                    d) None of the above
- 14) Standard EDTA is used in the titration to determine \_\_\_\_\_ of the water.  
a) Alkalinity                                          b) Acidity  
c) Hardness                                          d) Chlorides

 Time: 02:00 PM To 04:00 PM

Max. Marks: 35

- Instructions:** 1) Q. No. 1 is compulsory. It should be solved in the first 20 minutes in answer book. Page no 03 (Starting page of the Answer Book). Each question carries one mark.  
 2) Don't forget to Mention question paper set (P/Q/R/S) on top of page.  
 3) Figures to the right indicates full marks  
 4) Assume suitable data wherever needed and mention it clearly.

**MCQ/Objective Type Questions**

Duration: 20 Minutes

Marks: 07

**Q.1 Choose the correct alternatives from the options.**

**07**

- 1) Which is not a type of building?
  - a) Educational Building
  - b) Mercantile Building
  - c) Institutional Building
  - d) Domestic Building
- 2) Combining two or more plots as a single plot is called \_\_\_\_\_.
  - a) Amalgamation
  - b) Frontage
  - c) Bifurcation
  - d) Building setback
- 3) Partially ventilated single stack system is the modified form of \_\_\_\_\_.
  - a) Single stack system and two-pipe system
  - b) Single stack system and one pipe system
  - c) One pipe system and two-pipe system
  - d) Two pipe system
- 4) The earthing wire should have \_\_\_\_\_.
  - a) High resistance
  - b) Medium resistance
  - c) Negligible resistance
  - d) Any of the above
- 5) The Low income housing construction funding is provided by \_\_\_\_\_.
  - a) National Governments
  - b) State Governments
  - c) World Bank
  - d) National Governments, State Governments and World Bank
- 6) \_\_\_\_\_ is generated in the air when a surface is vibrated.
  - a) Sound
  - b) Thunder
  - c) Both A and B
  - d) None of these
- 7) The green building process can be applied to which of these?
  - a) Buildings
  - b) Materials
  - c) Interiors
  - d) All of above

Time: 02:00 PM To 04:00 PM

Max. Marks: 28

**Instructions:** 1) All questions are compulsory.  
2) Figures to the right indicate full marks.

**Section – I**

- Q.2 Attempt any Two.** **08**
- a) Write down about “Site Selection Criteria for Education building”.
  - b) Enlist and explain the in brief “Principles of Building Planning” with neat sketch.
  - c) What is Orientations? Explain with sketch about “Orientations of building for various part of India on bases of climate conditions”.
  - d) Explain with sketch about “Wind Flow Diagram”.
- Q.3 Attempt any One:** **06**
- a) Explain with flow chart “Procedure and list of documents for Building Permission”.
  - b) Enlist and explain the in brief about “Types of Residential Building” with neat sketch.

**Section – II**

- Q.4 Attempt any two.** **08**
- a) Explain in brief about “Single Stuck Way Piper system” with neat sketch.
  - b) Draw a neat sketch “Various type of Traps”
  - c) What is “Green Building”? Explain in brief.
  - d) What is “Low Costing Housing”? Explain in brief
- Q.5 Attempt any One:** **06**
- a) Enlist and explain in short materials available for “Sound Insulation”.
  - b) Explain in short about “Fire Resistant Structures”

a) Buildings  
b) Materials  
c) Interiors  
d) All of above
- 3) Which is not a type of building?  
a) Educational Building  
b) Mercantile Building  
c) Institutional Building  
d) Domestic Building
- 4) Combining two or more plots as a single plot is called \_\_\_\_\_.  
a) Amalgamation  
b) Frontage  
c) Bifurcation  
d) Building setback
- 5) Partially ventilated single stack system is the modified form of \_\_\_\_\_.  
a) Single stack system and two-pipe system  
b) Single stack system and one pipe system  
c) One pipe system and two-pipe system  
d) Two pipe system
- 6) The earthing wire should have \_\_\_\_\_.  
a) High resistance  
b) Medium resistance  
c) Negligible resistance  
d) Any of the above
- 7) The Low income housing construction funding is provided by \_\_\_\_\_.  
a) National Governments  
b) State Governments  
c) World Bank  
d) National Governments, State Governments and World Bank

**S.Y. (B.Tech.) (Sem - II) (New) (CBCS) Examination: Oct/Nov-2022**  
**CIVIL ENGINEERING**  
**Building Planning & Design**

Day & Date: Wednesday, 08-03-2023  
Time: 02:00 PM To 04:00 PM

Max. Marks: 28

**Instructions:** 1) All questions are compulsory.  
2) Figures to the right indicate full marks.

**Section – I**

- Q.2 Attempt any Two.** **08**
- a) Write down about “Site Selection Criteria for Education building”.
  - b) Enlist and explain the in brief “Principles of Building Planning” with neat sketch.
  - c) What is Orientations? Explain with sketch about “Orientations of building for various part of India on bases of climate conditions”.
  - d) Explain with sketch about “Wind Flow Diagram”.
- Q.3 Attempt any One:** **06**
- a) Explain with flow chart “Procedure and list of documents for Building Permission”.
  - b) Enlist and explain the in brief about “Types of Residential Building” with neat sketch.

**Section – II**

- Q.4 Attempt any two.** **08**
- a) Explain in brief about “Single Stuck Way Piper system” with neat sketch.
  - b) Draw a neat sketch “Various type of Traps”
  - c) What is “Green Building”? Explain in brief.
  - d) What is “Low Costing Housing”? Explain in brief
- Q.5 Attempt any One:** **06**
- a) Enlist and explain in short materials available for “Sound Insulation”.
  - b) Explain in short about “Fire Resistant Structures”

**CIVIL ENGINEERING**  
**Structural Mechanics – II**

Day & Date: Thursday, 09-03-2023  
 Time: 02:00 PM To 05:00 PM

Max. Marks: 56

- Instructions:** 1) Solve any 3 questions from each section, Q1 and Q5 are compulsory.  
 2) Figures to the right indicate full marks.  
 3) Use of scientific non programmable calculator is allowed.  
 4) Draw the appropriate sketches wherever necessary.  
 5) Assume suitable data if necessary and mention it clearly before the solution

**Section – I**

- Q.2** A masonry pier of 3 m x 4 m supports a vertical load of 80 kN as shown in fig.1 **10**  
**a)** Find the stresses developed at each corner of the pier  
**b)** What additional load should be placed at the center of the pier, so that there is no tension anywhere in the pier section.  
**c)** What are the stresses at the corners with the additional load in the center?

Fig.-1

- Q.3 a)** State Mohr's theorem to determine slope and deflection. **02**  
**b)** A hollow alloy tube 5 m long with external and internal diameter 40 mm and 25 mm respectively was found to extend 6.4 mm under a tensile load of 60 kN. Find the buckling load for the tube when used as a column with both ends pinned. Also find the safe load for the tube taking a factor of safety = 3 **07**

- Q.4** A three hinged parabolic arch of span 40 m and rise 10 m carries a uniformly distributed load of 30 kN/m over left half span as shown in fig.-2. Find horizontal thrust and support reaction.

Fig.-2

- Q.5** A masonry trapezoidal dam 4 m high, 1 m wide at its top and 3 m width at its bottom retains water on its vertical face. Determine the maximum and minimum stresses at the base.

- 1) when the reservoir is full
- 2) when the reservoir is empty

Take the weight of masonry as  $19.62 \text{ kN/m}^3$ . Weight of water as  $9810 \text{ N/m}^3$ .

### Section – II

- Q.6** Analyze the continuous beam as shown in Fig.-3 and draw bending moment diagram.

Fig.-3

- Q.7 a)** Determine the degree of static and kinematic indeterminacy of the frame as shown in Fig-4.

Fig.-4

- b) Analyze the continuous beam as shown in fig.-5 by flexibility matrix method. 07

Fig.-5

- Q.8 Analysis the frame shown in Fig- 6 by stiffness matrix method. 09

Fig.-6

- Q.9 Analysis the symmetric portal frame as shown in fig.-7 by moment distribution method. 09

No.**

Max. Marks: 70

Marks: 14

14

- 1) A three-hinged parabolic arch subjected to a load  $w$  at  $L/4$  distance from left support. The rise of the Crown is 4 m, span is 20 m and  $w$  is 80 kN, the horizontal thrust at the support is \_\_\_\_\_.  
a) 40 kN                                      b) 25 kN  
c) 80 kN                                      d) 50 kN
- 2) A parabolic three hinged arch ABC is supporting uniformly distributed load of 500 N/m over its entire span of 100 m, the center point "B" is vertically 25 m high from supports A and C.  
The reactions shall be \_\_\_\_\_.  
a) 50 kN horizontal and vertical reactions at each support  
b) 25 kN horizontal and 50 kN vertical reactions at each support  
c) 50 kN horizontal and 25 kN vertical reactions at each support  
d) 25 kN horizontal and vertical reactions at each support
- 3) In moment distribution method, the sum of distribution factors of all the members meeting at any joint is always \_\_\_\_\_.  
a) Zero                                          b) Less than 1  
c) One                                          d) Greater than 1
- 4) Carryover Moment at end B due to moment  $M$  applied at end A for the given beam is \_\_\_\_\_.

## Max. Marks: 70

### MCQ/Objective Type Questions

Marks: 14

## 14

- Page 5 of 16

- 10) Which one of the following is a part of volcano?
  - a) Crater
  - b) Geyser
  - c) Volcanic cinder
  - d) Limb
- 11) A coarse-grained sedimentary rock with rounded pebbles, cobbles is called as \_\_\_\_\_.
  - a) breccias
  - b) sandstone
  - c) conglomerate
  - d) basalt
- 12) In \_\_\_\_\_ fold, axial plane is vertical.
  - a) asymmetrical
  - b) symmetrical
  - c) overturned
  - d) recumbent
- 13) Hardness of Diamond is \_\_\_\_\_.
  - a) 1
  - b) 10
  - c) 8
  - d) 9
- 14) Formation of sediments by breaking of the rocks by natural agents with change in their composition is a \_\_\_\_\_ weathering.
  - a) chemical
  - b) mechanical
  - c) biological
  - d) physical

Day & Date: Friday, 10-03-2023  
 Time: 02:00 PM To 05:00 PM

Max. Marks: 56

- Instructions:** 1) All questions are compulsory.  
 2) Figures to the right indicate full marks  
 3) Draw neat and labelled diagrams wherever necessary.

**Section – I**

- Q.2**     **a)** Define unconformity. Explain Non-conformity. **06**  
             **b)** What are igneous rocks? Give their classification on the basis of silica percentage. **06**

**OR**

- Q.3**     **a)** Define Sedimentary rocks. Describe Cross bedding structure. **06**  
             **b)** Describe physical properties and chemical properties of Quartz group minerals. **06**

- Q.4**     Define Volcano. Describe Solid products of Volcano. **07**

**OR**

- Q.5**     Define Fold. Describe Anticline and Syncline folds. **07**

- Q.6**     **Write notes on (Any Three)** **09**  
             **a)** Gneissose structure  
             **b)** Normal Fault  
             **c)** Columnar Joints  
             **d)** Types of fractures in minerals  
             **e)** Crust of the Earth

**Section – II**

- Q.7**     **a)** Define Aquifer. Describe confined aquifer/ Artesian well. **06**  
             **b)** Define Landslides. Explain any two types of Landslides. **06**

**OR**

- Q.8**     **a)** Define Earthquake. Describe Seismic waves. **06**  
             **b)** Describe any three types of Dams. **06**

- Q.9**     Define Dam. Describe desirable geological conditions in faulted region for Dams. **07**

**OR**

- Q.10**    What are Building Stones? Add a note on Porosity and Permeability of building stones. **07**

Day & Date: Friday, 10-03-2023  
Time: 02:00 PM To 05:00 PM

Max. Marks: 70

**Instructions:** 1) Q. No. 1 is compulsory. It should be solved in the first 30 minutes in answer book. Page no 03 (Starting page of the Answer Book). Each question carries one mark.  
2) Don't forget to Mention question paper set (P/Q/R/S) on top of page.  
3) Figures to the right indicates full marks.

### MCQ/Objective Type Questions

Duration: 30 Minutes

Marks: 14

**Q.1 Choose the correct alternatives from the options.**

14

- 1) An instrument which records earthquake waves is \_\_\_\_\_.  
a) Seismoscope                      b) Seismogram  
c) Seismograph                    d) Seismometer
- 2) Which of the following is important engineering property of building stones?  
a) compressive strength              b) tensile strength  
c) durability                          d) All the above
- 3) Which of the following is most common and fast indirect method of sub-surface investigations?  
a) seismic method                      b) gravity method  
c) drilling method                       d) electric resistivity method
- 4) Which of the following dam can be constructed on weak, unconsolidated foundation?  
a) Earthen dam                          b) Arch dam  
c) Gravity dam                          d) none of these
- 5) Metamorphic rock with thin separable layers and clay, mica minerals is called as a \_\_\_\_\_.  
a) marble                                  b) gneiss  
c) slate                                     d) shale
- 6) The radius of the earth is \_\_\_\_\_ km.  
a) 20                                        b) 40  
c) 2900                                      d) 6763
- 7) Which one of the following is a part of volcano?  
a) Crater                                    b) Geyser  
c) Volcanic cinder                       d) Limb
- 8) A coarse-grained sedimentary rock with rounded pebbles, cobbles is called as \_\_\_\_\_.  
a) breccias                                b) sandstone  
c) conglomerate                         d) basalt

Marks: 14

14

- Page 1 of 16

- 8) If  $L\{f(t) = F(s)\}$ , then  $L\{tf(t)\} = \underline{\hspace{2cm}}$ .
- a)  $\frac{d}{ds}\{F(s)\}$                       b)  $\frac{1}{s} F(s)$   
 c)  $-\frac{d}{ds}\{F(s)\}$                       d)  $\int_s^\infty F(s)ds$
- 9)  $L\left\{\int_0^t \cos h(t)dt\right\} = \underline{\hspace{2cm}}$
- a)  $\frac{s}{s^2 - 1}$                       b)  $\frac{s}{s^2 + 1}$   
 c)  $-\frac{2s}{(s^2 - 1)^2}$                       d)  $\frac{1}{s^2 - 1}$
- 10) In solving algebraic and transcendental equations, the rate convergence of Newton's Raphson method is  $\underline{\hspace{2cm}}$ .
- a) 0.5                      b) 2  
 c) 1.5                      d) 1.62
- 11) The number of strips required to use Weddle's rule is  $\underline{\hspace{2cm}}$ .
- a) Multiple of 6                      b) Multiple of 3  
 c) Multiple of 2                      d) Any number
- 12) The order of error is Simpson's  $\frac{1}{3}$ rd rule is  $\underline{\hspace{2cm}}$ .
- a)  $h^3$                       b)  $h^2$   
 c)  $h^4$                       d)  $h^6$
- 13) A continuous random variable has the probability density function  $f(x) = kx^2$ , for  $0 \leq x \leq 2$  then  $k = \underline{\hspace{2cm}}$ .
- a)  $\frac{8}{3}$                       b)  $\frac{3}{2}$   
 c)  $\frac{5}{8}$                       d)  $\frac{3}{8}$
- 14) The line of regression equations are given by  $10y = x + 17$  and  $x = 5y - 7$ , then mean  $\bar{x}$  and  $\bar{y}$  are respectively  $\underline{\hspace{2cm}}$ .
- a) 1 and 10                      b) 1 and 5  
 c) 3 and 2                      d) 2 and 3

Day & Date: Tuesday, 14-03-2023  
 Time: 02:00 PM To 05:00 PM

Max. Marks: 56

- Instructions:** 1) All questions are compulsory.  
 2) Figures to the right indicates full marks.  
 3) Use of non-programmable calculator is allowed.

**Section – I**

**Q.2 Attempt any three from the following.** **09**

- Solve :  $(D^2 + 1)y = 3 + 5e^{-3x}$
- Solve :  $(D^3 - 4D)y = \cos(x)$
- Solve :  $p(1 + q) = qz$
- Solve :  $x^2p^2 + y^2q^2 = qz$
- Obtain the Fourier series of  $f(x) = 1 - x^2$  in  $-1 \leq x \leq 1$

**Q.3 Attempt any three from the followings.** **09**

- Solve :  $(D^2 + 4)y = x \cos x$
- Solve :  $py = 2xy + \log q$
- Solve :  $y^4z p + zx^4q = xy^4$
- Obtain the half range sine series of the function  $f(x) = \pi x - x^2$  in  $(0, \pi)$
- Solve :  $(D^2 + 6D + 9)y = e^{-3x} \cos 2(x)$

**Q.4 Attempt any two from the following.** **10**

- Solve the partial differential equation by method of separation of variables  
 $\frac{\partial z}{\partial x} - 2 \frac{\partial z}{\partial y} = z$  where  $z(x, 0) = 6e^{-3x}$
- Obtain the Fourier series of the function series of the function  
 $f(x) = \frac{1}{4}(\pi - x)^2$   $0 \leq x \leq 2\pi$
- The equation of motion of a spring whose one and other end supports weight of 10 lbs is given by equation  $\frac{d^2x}{dt^2} + \frac{8}{25} \frac{dx}{dt} + 64x = 0$ .  
 If at  $t = 0$ ,  $x = 0.25$  and  $\frac{dx}{dt} = 0$ , then find the displacement ' $x$ ' at any time ' $t$ '

**Section – II**

**Q.5 Attempt any three of the following.** **09**

- Find  $L\{e^{-3t}t \sin 4t\}$
- Find  $L^{-1}\left\{\frac{s}{(s-2)(s+3)}\right\}$
- Compute the coefficient of correlation between  $x$  and  $y$  from the data  
 $N = 20, \sum x = 80, \sum x^2 = 900, \sum y = 70, \sum y^2 = 800$  and  $\sum xy = 700$
- Evaluate  $\int_0^1 \frac{x^2}{1+x^3} dx$  using Simpson's 1/3<sup>rd</sup> rule with  $h = 0.25$

- e) Find a positive real root of the equation  $2x - 3 \sin x - 5 = 0$  correct to three decimal places by Regula Falsi method.

**Q.6 Attempt any three from the following.****09**

- a) The probability that a missile will strike the target is  $\frac{1}{5}$ . If six missiles are fixed, then using Binomial distribution find the probability that exactly two will strike the target.
- b) If the probability an individual suffers a bad reaction from a certain injection is 0.001. Using Poisson distribution determine the probability that out of 2000 individuals
- exactly 3,
  - at most 2 will suffer a bad reaction
- c) Find  $L^{-1}\left\{\frac{1}{s(s^2+9)}\right\}$  by convolution theorem.
- d) Find a positive real root of the equation  $xe^x - 2 = 0$  correct to three decimal places by Newton's Raphson method.
- e) Find the Laplace transform of  $t \sin 2t \cos 3t$

**Q.7 Attempt any two from the following.****10**

- a) Evaluate  $\int_0^{\infty} e^{-3t} t \sin t \, dt$  by Laplace transform
- b) Evaluate  $\int_0^{\pi} \frac{\sin x}{x} \, dx$  by dividing range into six equals parts, using Trapezoidal rule and Weddle's rule.
- c) The size of hats is normally distributed with mean 18.5 cm and standard deviation 2.5 cm. How many hats in a total of 2000 will have sizes between
- 18 cm and 20 cm
  - Above 20 cm?
- (Give: For S. N. V. z, area between  $z = 0$  and  $z = 0.6$  is 0.2257, between  $z = 0$  and  $z = 0.2$  is 0.0793)

**Section – I**

**Q.2 Attempt any three from the following. 09**

- Solve :  $(D^2 + 1)y = 3 + 5e^{-3x}$
- Solve :  $(D^3 - 4D)y = \cos(x)$
- Solve :  $p(1 + q) = qz$
- Solve :  $x^2p^2 + y^2q^2 = qz$
- Obtain the Fourier series of  $f(x) = 1 - x^2$  in  $-1 \leq x \leq 1$

**Q.3 Attempt any three from the followings. 09**

- Solve :  $(D^2 + 4)y = x \cos x$
- Solve :  $py = 2xy + \log q$
- Solve :  $y^4z p + zx^4q = xy^4$
- Obtain the half range sine series of the function  $f(x) = \pi x - x^2$  in  $(0, \pi)$
- Solve :  $(D^2 + 6D + 9)y = e^{-3x} \cos 2(x)$

**Q.4 Attempt any two from the following. 10**

- Solve the partial differential equation by method of separation of variables  
 $\frac{\partial z}{\partial x} - 2 \frac{\partial z}{\partial y} = z$  where  $z(x, 0) = 6e^{-3x}$
- Obtain the Fourier series of the function series of the function  
 $f(x) = \frac{1}{4}(\pi - x)^2$   $0 \leq x \leq 2\pi$
- The equation of motion of a spring whose one and other end supports weight of 10 lbs is given by equation  $\frac{d^2x}{dt^2} + \frac{8}{25} \frac{dx}{dt} + 64x = 0$ .  
 If at  $t = 0$ ,  $x = 0.25$  and  $\frac{dx}{dt} = 0$ , then find the displacement ' $x$ ' at any time ' $t$ '

**Section – II**

**Q.5 Attempt any three of the following. 09**

- Find  $L\{e^{-3t}t \sin 4t\}$
- Find  $L^{-1}\left\{\frac{s}{(s-2)(s+3)}\right\}$
- Compute the coefficient of correlation between  $x$  and  $y$  from the data  
 $N = 20, \sum x = 80, \sum x^2 = 900, \sum y = 70, \sum y^2 = 800$  and  $\sum xy = 700$
- Evaluate  $\int_0^1 \frac{x^2}{1+x^3} dx$  using Simpson's 1/3<sup>rd</sup> rule with  $h = 0.25$

- e) Find a positive real root of the equation  $2x - 3 \sin x - 5 = 0$  correct to three decimal places by Regula Falsi method.

**Q.6 Attempt any three from the following.****09**

- a) The probability that a missile will strike the target is  $\frac{1}{5}$ . If six missiles are fixed, then using Binomial distribution find the probability that exactly two will strike the target.
- b) If the probability an individual suffers a bad reaction from a certain injection is 0.001. Using Poisson distribution determine the probability that out of 2000 individuals
- exactly 3,
  - at most 2 will suffer a bad reaction
- c) Find  $L^{-1}\left\{\frac{1}{s(s^2+9)}\right\}$  by convolution theorem.
- d) Find a positive real root of the equation  $xe^x - 2 = 0$  correct to three decimal places by Newton's Raphson method.
- e) Find the Laplace transform of  $t \sin 2t \cos 3t$

**Q.7 Attempt any two from the following.****10**

- a) Evaluate  $\int_0^{\infty} e^{-3t} t \sin t \, dt$  by Laplace transform
- b) Evaluate  $\int_0^{\pi} \frac{\sin x}{x} \, dx$  by dividing range into six equals parts, using Trapezoidal rule and Weddle's rule.
- c) The size of hats is normally distributed with mean 18.5 cm and standard deviation 2.5 cm. How many hats in a total of 2000 will have sizes between
- 18 cm and 20 cm
  - Above 20 cm?
- (Give: For S. N. V. z, area between  $z = 0$  and  $z = 0.6$  is 0.2257, between  $z = 0$  and  $z = 0.2$  is 0.0793)

**S.Y. (B.Tech.) (Sem - II) (New) (CBCS) Examination: Oct/Nov-2022**  
**CIVIL ENGINEERING**  
**Engineering Mathematics-III**

Day & Date: Tuesday, 14-03-2023  
 Time: 02:00 PM To 05:00 PM

Max. Marks: 56

- Instructions:** 1) All questions are compulsory.  
 2) Figures to the right indicates full marks.  
 3) Use of non-programmable calculator is allowed.

**Section – I**

**Q.2 Attempt any three from the following.** **09**

- Solve :  $(D^2 + 1)y = 3 + 5e^{-3x}$
- Solve :  $(D^3 - 4D)y = \cos(x)$
- Solve :  $p(1 + q) = qz$
- Solve :  $x^2p^2 + y^2q^2 = qz$
- Obtain the Fourier series of  $f(x) = 1 - x^2$  in  $-1 \leq x \leq 1$

**Q.3 Attempt any three from the followings.** **09**

- Solve :  $(D^2 + 4)y = x \cos x$
- Solve :  $py = 2xy + \log q$
- Solve :  $y^4z p + zx^4q = xy^4$
- Obtain the half range sine series of the function  $f(x) = \pi x - x^2$  in  $(0, \pi)$
- Solve :  $(D^2 + 6D + 9)y = e^{-3x} \cos 2(x)$

**Q.4 Attempt any two from the following.** **10**

- Solve the partial differential equation by method of separation of variables  
 $\frac{\partial z}{\partial x} - 2 \frac{\partial z}{\partial y} = z$  where  $z(x, 0) = 6e^{-3x}$
- Obtain the Fourier series of the function series of the function  
 $f(x) = \frac{1}{4}(\pi - x)^2$   $0 \leq x \leq 2\pi$
- The equation of motion of a spring whose one and other end supports weight of 10 lbs is given by equation  $\frac{d^2x}{dt^2} + \frac{8}{25} \frac{dx}{dt} + 64x = 0$ .  
 If at  $t = 0$ ,  $x = 0.25$  and  $\frac{dx}{dt} = 0$ , then find the displacement ' $x$ ' at any time ' $t$ '

**Section – II**

**Q.5 Attempt any three of the following.** **09**

- Find  $L\{e^{-3t}t \sin 4t\}$
- Find  $L^{-1}\left\{\frac{s}{(s-2)(s+3)}\right\}$
- Compute the coefficient of correlation between  $x$  and  $y$  from the data  
 $N = 20, \sum x = 80, \sum x^2 = 900, \sum y = 70, \sum y^2 = 800$  and  $\sum xy = 700$
- Evaluate  $\int_0^1 \frac{x^2}{1+x^3} dx$  using Simpson's 1/3<sup>rd</sup> rule with  $h = 0.25$

- e) Find a positive real root of the equation  $2x - 3 \sin x - 5 = 0$  correct to three decimal places by Regula Falsi method.

**Q.6 Attempt any three from the following.****09**

- a) The probability that a missile will strike the target is  $\frac{1}{5}$ . If six missiles are fixed, then using Binomial distribution find the probability that exactly two will strike the target.
- b) If the probability an individual suffers a bad reaction from a certain injection is 0.001. Using Poisson distribution determine the probability that out of 2000 individuals
- exactly 3,
  - at most 2 will suffer a bad reaction
- c) Find  $L^{-1}\left\{\frac{1}{s(s^2+9)}\right\}$  by convolution theorem.
- d) Find a positive real root of the equation  $xe^x - 2 = 0$  correct to three decimal places by Newton's Raphson method.
- e) Find the Laplace transform of  $t \sin 2t \cos 3t$

**Q.7 Attempt any two from the following.****10**

- a) Evaluate  $\int_0^{\infty} e^{-3t} t \sin t \, dt$  by Laplace transform
- b) Evaluate  $\int_0^{\pi} \frac{\sin x}{x} \, dx$  by dividing range into six equals parts, using Trapezoidal rule and Weddle's rule.
- c) The size of hats is normally distributed with mean 18.5 cm and standard deviation 2.5 cm. How many hats in a total of 2000 will have sizes between
- 18 cm and 20 cm
  - Above 20 cm?
- (Give: For S. N. V. z, area between  $z = 0$  and  $z = 0.6$  is 0.2257, between  $z = 0$  and  $z = 0.2$  is 0.0793)

Marks: 14

14

- Page 13 of 16

- 8) A continuous random variable has the probability density function  $f(x) = kx^2$ , for  $0 \leq x \leq 2$  then  $k =$  \_\_\_\_\_.  
 a)  $\frac{8}{3}$  b)  $\frac{3}{2}$   
 c)  $\frac{5}{8}$  d)  $\frac{3}{8}$
- 9) The line of regression equations are given by  $10y = x + 17$  and  $x = 5y - 7$ , then mean  $\bar{x}$  and  $\bar{y}$  are respectively \_\_\_\_\_.  
 a) 1 and 10 b) 1 and 5  
 c) 3 and 2 d) 2 and 3
- 10) If the linear differential equation with constant coefficient has real root 'm' repeated twice, then the corresponding complementary functions \_\_\_\_\_.  
 a)  $c_1 e^{mx} + c_2 e^{-mx}$  b)  $c_1 \cos(mx) + c_2 \sin(mx)$   
 c)  $(c_1 + c_2 x)e^{mx}$  d)  $(c_1 + c_2 x)e^{-mx}$
- 11)  $\frac{1}{D^2} \{x^3\}$  is equal to \_\_\_\_\_.  
 a)  $\frac{x^5}{20}$  b)  $\frac{x^4}{12}$   
 c)  $x^3 e^{-x}$  d)  $20 x^5$
- 12) The particular integral of  $(D^2 + a^2)y = \cos(ax)$  is \_\_\_\_\_.  
 a)  $\frac{x}{2a} \cos(ax)$  b)  $\frac{x}{2a^2} \cos(ax)$   
 c)  $\frac{x}{2a} \sin(ax)$  d)  $\frac{x}{2a^2} \sin(ax)$
- 13) The solution of partial differential equation  $q = 3p^2$  is \_\_\_\_\_.  
 a)  $z = ax + \frac{a^2}{3} y + c$  b)  $z = 3ax + a^2 y + c$   
 c)  $z = 3a^2 x + by$  d)  $z = ax + 3a^2 y + c$
- 14) The general solution of partial differential equation  $pe^y = qe^x$  is \_\_\_\_\_.  
 a)  $z = a(e^{-x} + e^{-y}) + c$  b)  $z = a(e^{-x} - e^{-y}) + c$   
 c)  $z = a(e^x + e^y) + c$  d)  $z = a(e^x - e^y) + c$

- Instructions:** 1) Q. No. 1 is compulsory. It should be solved in the first 30 minutes in answer book. Page no 03 (Starting page of the Answer Book). Each question carries one mark.  
 2) Don't forget to Mention question paper set (P/Q/R/S) on top of page.  
 3) Figures to the right indicates full marks.  
 4) Assume suitable data if necessary.

**MCQ/Objective Type Questions**

Duration: 30 Minutes

Marks: 14

**Q.1 Choose the correct alternatives from the options.**

**14**

- 1) What are the steps of the design thinking process?
  - a) Understand > Draw > Ideate > Create > Test > Implement
  - b) Empathize > Define > Ideate > Prototype > Test > Implement
  - c) Empathize > Design > Implement > Produce > Test
  - d) Understand > Define > Ideate > Produce > Try
- 2) Design Thinking Skills:
  - a) Emotional Intelligence
  - b) Consensus Building
  - c) Both (a) and (b)
  - d) None of these.
- 3) What step of design thinking has users try out your prototype?
  - a) Empathize
  - b) Define
  - c) Ideate
  - d) Test
- 4) Raw data can be gathered from consumers commonly by:
  - a) Interviewing
  - b) Facilitating focus groups
  - c) Observing the products in use
  - d) All of the above
- 5) Focus groups are one of the methods for:
  - a) Interpreting raw data collected from customers
  - b) Organizing data into a hierarchy of customer needs
  - c) Gathering raw data from customers
  - d) Reflecting on the results and the process of identifying customer need
- 6) Tools for gathering customer needs is \_\_\_\_\_.
  - a) Interviews
  - b) Questionnaires
  - c) Be the customer
  - d) All of the above
- 7) Prototyping process requires \_\_\_\_\_.
  - a) Engagement and data
  - b) Collaboration, working with others
  - c) Commitment to ones goals
  - d) Discipline, being the best

- 8) Brainstorming, the method of generating ideas relies in two rules:
- Quality ideas and small groups of participants
  - Multiple mini sessions with small groups of participants
  - Large groups of participants and more than a hundred ideas per hour
  - Large quantity of ideas and differing judgment (avoid censoring ideas)
- 9) What are some characteristics of a service?
- Intangible
  - Inflexible
  - Fluctuating desire
  - Co-managed
- 10) What is an aspect of service design?
- Resources to connect people and/or machines
  - Environmental
  - Process and experience
  - All of above
- 11) Figure -1 shows the conceptual drawing of a (n) \_\_\_\_\_ architecture.

Figure 10-1

- Slot-modular
  - Bus-modular
  - Sectional-modular
  - Integral
- 12) Product architecture is the assignment of the \_\_\_\_\_ elements of a product to \_\_\_\_\_ building blocks of the product.
- Functional; conceptual
  - Functional; physical
  - Non-functional; conceptual
  - Non-functional: physical
- 13) Infrastructure Sustainability can be achieved by \_\_\_\_\_.
- Optimum use of resources
  - Minimum use of resources
  - Constructing more and more concrete structures
  - Using materials having high carbon footprint
- 14) The Design for environment is done for
- Part of product
  - Entire product
  - Entire life cycle of product
  - Any of the above

**MCQ/Objective Type Questions**

Duration: 30 Minutes

Marks: 14

**Q.1 Choose the correct alternatives from the options.**

**14**

- 1) Brainstorming, the method of generating ideas relies in two rules:
  - a) Quality ideas and small groups of participants
  - b) Multiple mini sessions with small groups of participants
  - c) Large groups of participants and more than a hundred ideas per hour
  - d) Large quantity of ideas and differing judgment (avoid censoring ideas)
- 2) What are some characteristics of a service?
  - a) Intangible
  - b) Inflexible
  - c) Fluctuating desire
  - d) Co-managed
- 3) What is an aspect of service design?
  - a) Resources to connect people and/or machines
  - b) Environmental
  - c) Process and experience
  - d) All of above
- 4) Figure -1 shows the conceptual drawing of a (n) \_\_\_\_\_ architecture.

Figure 10-1

- a) Slot-modular
  - b) Bus-modular
  - c) Sectional-modular
  - d) Integral
- 5) Product architecture is the assignment of the \_\_\_\_\_ elements of a product to \_\_\_\_\_ building blocks of the product.
  - a) Functional; conceptual
  - b) Functional; physical
  - c) Non-functional; conceptual
  - d) Non-functional: physical

- 6) Infrastructure Sustainability can be achieved by \_\_\_\_\_.  
a) Optimum use of resources  
b) Minimum use of resources  
c) Constructing more and more concrete structures  
d) Using materials having high carbon footprint
- 7) The Design for environment is done for  
a) Part of product  
b) Entire product  
c) Entire life cycle of product  
d) Any of the above
- 8) What are the steps of the design thinking process?  
a) Understand > Draw > Ideate > Create > Test > Implement  
b) Empathize > Define > Ideate > Prototype > Test > Implement  
c) Empathize > Design > Implement > Produce > Test  
d) Understand > Define > Ideate > Produce > Try
- 9) Design Thinking Skills:  
a) Emotional Intelligence  
b) Consensus Building  
c) Both (a) and (b)  
d) None of these.
- 10) What step of design thinking has users try out your prototype?  
a) Empathize  
b) Define  
c) Ideate  
d) Test
- 11) Raw data can be gathered from consumers commonly by:  
a) Interviewing  
b) Facilitating focus groups  
c) Observing the products in use  
d) All of the above
- 12) Focus groups are one of the methods for:  
a) Interpreting raw data collected from customers  
b) Organizing data into a hierarchy of customer needs  
c) Gathering raw data from customers  
d) Reflecting on the results and the process of identifying customer need
- 13) Tools for gathering customer needs is \_\_\_\_\_.  
a) Interviews  
b) Questionnaires  
c) Be the customer  
d) All of the above
- 14) Prototyping process requires \_\_\_\_\_.  
a) Engagement and data  
b) Collaboration, working with others  
c) Commitment to ones goals  
d) Discipline, being the best

**S.Y. (B.Tech.) (Sem - II) (New) (CBCS) Examination: Oct/Nov-2022**  
**CIVIL ENGINEERING**  
**Design Thinking**

Day & Date: Thursday, 16-03-2023  
 Time: 02:00 PM To 05:00 PM

Max. Marks: 56

- Instructions:** 1) Question no. 2 is compulsory in section I, and solve any two questions from the remaining. Question no. 6 is compulsory in section II, and solve any two questions from the remaining.  
 2) Figures to the right indicate full marks.  
 3) Assume suitable data wherever necessary and mention it clearly.  
 4) Use of non-programmable calculator is allowed.

**Section – I**

- |            |                                                                                                                            |           |
|------------|----------------------------------------------------------------------------------------------------------------------------|-----------|
| <b>Q.2</b> | <b>a)</b> What is meant by the Design Thinking? What are the stages of design thinking? Explain in details.                | <b>06</b> |
|            | <b>b)</b> Explain the design thinking skills with some examples.                                                           | <b>04</b> |
| <b>Q.3</b> | <b>a)</b> What do you meant by product specification? Explain it in briefly.                                               | <b>04</b> |
|            | <b>b)</b> What do you meant by customer need identification? What are the different goals of customer need identification? | <b>05</b> |
| <b>Q.4</b> | <b>a)</b> What do you meant by creativity? Explain in short.                                                               | <b>04</b> |
|            | <b>b)</b> What do you meant by prototyping? Enlist and explain are the different methods of prototyping.                   | <b>05</b> |
| <b>Q.5</b> | <b>a)</b> Explain the different design thinking mindset.                                                                   | <b>04</b> |
|            | <b>b)</b> Explain the brainstorming.                                                                                       | <b>05</b> |

**Section – II**

- |            |                                                                                                                                          |           |
|------------|------------------------------------------------------------------------------------------------------------------------------------------|-----------|
| <b>Q.6</b> | <b>a)</b> What is Service Design? What are the different principles of service design and tools for the service design thinking?         | <b>06</b> |
|            | <b>b)</b> Write a note on modular product architecture.                                                                                  | <b>04</b> |
| <b>Q.7</b> | <b>a)</b> What is meant by financial analysis and why financial analysis is needed?                                                      | <b>04</b> |
|            | <b>b)</b> What is product architecture and importance of product architecture? What is the different aspect of the product architecture? | <b>05</b> |
| <b>Q.8</b> | <b>a)</b> What are the different principles to a product life cycle?                                                                     | <b>04</b> |
|            | <b>b)</b> What is the environmental impact over the life cycle? Explain in short.                                                        | <b>05</b> |
| <b>Q.9</b> | <b>a)</b> Draw & explain the design for environment process.                                                                             | <b>04</b> |
|            | <b>b)</b> Write a note on Agile Product Development Process.                                                                             | <b>05</b> |

**S.Y. (B.Tech.) (Sem - II) (New) (CBCS) Examination: Oct/Nov-2022**

**CIVIL ENGINEERING**

**Design Thinking**

Day & Date: Thursday, 16-03-2023

Max. Marks: 70

Time: 02:00 PM To 05:00 PM

- Instructions:**
- 1) Q. No. 1 is compulsory. It should be solved in the first 30 minutes in answer book. Page no 03 (Starting page of the Answer Book). Each question carries one mark.
  - 2) Don't forget to Mention question paper set (P/Q/R/S) on top of page.
  - 3) Figures to the right indicates full marks.
  - 4) Assume suitable data if necessary.

**MCQ/Objective Type Questions**

Duration: 30 Minutes

Marks: 14

**Q.1 Choose the correct alternatives from the options.**

**14**

- 1) Tools for gathering customer needs is \_\_\_\_\_.
  - a) Interviews
  - b) Questionnaires
  - c) Be the customer
  - d) All of the above
- 2) Prototyping process requires \_\_\_\_\_.
  - a) Engagement and data
  - b) Collaboration, working with others
  - c) Commitment to ones goals
  - d) Discipline, being the best
- 3) Brainstorming, the method of generating ideas relies in two rules:
  - a) Quality ideas and small groups of participants
  - b) Multiple mini sessions with small groups of participants
  - c) Large groups of participants and more than a hundred ideas per hour
  - d) Large quantity of ideas and differing judgment (avoid censoring ideas)
- 4) What are some characteristics of a service?
  - a) Intangible
  - b) Inflexible
  - c) Fluctuating desire
  - d) Co-managed
- 5) What is an aspect of service design?
  - a) Resources to connect people and/or machines
  - b) Environmental
  - c) Process and experience
  - d) All of above
- 6) Figure -1 shows the conceptual drawing of a (n) \_\_\_\_\_ architecture.

Figure 10-1

- a) Slot-modular
- b) Bus-modular
- c) Sectional-modular
- d) Integral

- 7) Product architecture is the assignment of the \_\_\_\_\_ elements of a product to \_\_\_\_\_ building blocks of the product.
- a) Functional; conceptual
  - b) Functional; physical
  - c) Non-functional; conceptual
  - d) Non-functional: physical
- 8) Infrastructure Sustainability can be achieved by \_\_\_\_\_.
- a) Optimum use of resources
  - b) Minimum use of resources
  - c) Constructing more and more concrete structures
  - d) Using materials having high carbon footprint
- 9) The Design for environment is done for
- a) Part of product
  - b) Entire product
  - c) Entire life cycle of product
  - d) Any of the above

**S.Y. (B.Tech) (Sem - II) (Old) (CBCS) Examination: Oct/Nov-2022**  
**CIVIL ENGINEERING**  
**Water Supply Engineering**

Day & Date: Monday, 06-03-2023  
 Time: 02:00 PM To 05:00 PM

Max. Marks: 70

- Instructions:** 1) Q. No. 1 is compulsory. It should be solved in the first 30 minutes in answer book. Page no 03 (Starting page of the Answer Book). Each question carries one mark.  
 2) Don't forget to Mention question paper set (P/Q/R/S) on top of page.  
 3) Figures to the right indicate full marks

**MCQ/Objective Type Questions**

Duration: 30 Minutes

Marks: 14

**Q.1 Choose the correct alternatives from the options.**

**14**

- 1) Air binding phenomena in rapid sand filter may occur due to \_\_\_\_\_.  
 a) Excessive negative pressure      b) Mud ball formation  
 c) Higher turbidity in the effluent      d) None of the above
- 2) Reflux valves are also known as \_\_\_\_\_ valves.  
 a) Shut off      b) Check  
 c) Cut off      d) Air relief
- 3) Water losses in water supply is assumed as \_\_\_\_\_.  
 a) Test pressure      b) Working pressure  
 c) Pipe pressure      d) Design pressure
- 4) \_\_\_\_\_ is the pipe connecting to storage tank various fixtures and taps.  
 a) Distributing pipe      b) Supply pipe  
 c) Antisiphonage pipe      d) Service pipe
- 5) Tube settlers are installed in the sedimentation tank to \_\_\_\_\_.  
 a) Increase detention time      b) Reduce Surface loading  
 c) Both a) and b)      d) None of the above
- 6) Generally, \_\_\_\_\_ water supply will reduce water demand of a city.  
 a) Continuous      b) Intermittent  
 c) Both a) and b)      d) None of the above
- 7) Analysis of pipe networks of distribution system is calculated by \_\_\_\_\_.  
 a) Discharge in pipelines      b) Equivalent pipe method  
 c) Computation of pressure      d) Mass Curve Method
- 8) To control the wastage of water \_\_\_\_\_ measures are taken.  
 a) Pipe joints      b) Water taps  
 c) Zoning system      d) All of the above
- 9) For ideal settling basin  $V_s$  is settling velocity. If particle is having settling velocity ( $V_s'$ ) less than  $V_s$ , then particle will be removed with \_\_\_\_\_.  
 a) Less than 100%      b) 100%  
 c) 0%      d) None of the above

- 10)** Zeolite is \_\_\_\_\_.  
a) A naturally occurring salt      b) Hydrated silica  
c) Dehydrated calcium silicate      d) Silicon carbide
- 11)**  $\text{CO}_3^{2-}$  in water indicates \_\_\_\_\_.  
a) Acidity in water      b) Alkalinity in water  
c) Acidity and alkalinity in water      d) None of the above
- 12)** \_\_\_\_\_ can follow direct routes and require shorter length of conduits.  
a) Gravity conduit      b) Aqueduct  
c) Tunnels      d) Pressure conduits
- 13)** For a city developed haphazardly, the layout of distribution pipes preferred to is \_\_\_\_\_.  
a) Radial system      b) Ring system  
c) Dead end system      d) Iron grid system
- 14)** Precipitation of non-carbonate hardness is done by addition of \_\_\_\_\_.  
a) Soda ash      b) Lime  
c) Zeolites      d) Sodium chloride

Set

P

**S.Y. (B.Tech) (Sem - II) (Old) (CBCS) Examination: Oct/Nov-2022**  
**CIVIL ENGINEERING**  
**Water Supply Engineering**

Day &amp; Date: Monday, 06-03-2023

Max. Marks: 56

Time: 02:00 PM To 05:00 PM

- Instructions:** 1) Q.2 is compulsory in section I, attempt any two out of Q.3 to Q.5  
 2) Q. 6 is compulsory in section II, attempt any two out of Q.7 to Q.9  
 3) Figures to the right indicate full marks  
 4) Assume suitable data wherever necessary and mention it clearly.  
 5) Use of non-programmable calculator is allowed.

**Section – I**

- Q.2 a)** Find the population and of a city in 2041 by geometric increase method. **06**

| Year | Population |
|------|------------|
| 1981 | 40,000     |
| 1991 | 60,000     |
| 2001 | 85,000     |
| 2011 | 115,000    |
| 2021 | 2,00,000   |

- b)** Calculate the fire demand for the same city having Population of year 2041 using various formulae. (Question 02 (a)). **04**

- Q.3 a)** A settling tank is designed for an overflow rate of 4000 lit./m<sup>2</sup>/hr. What percentage of particles of diameter **05**

i) 0.06 mm and ii) 0.03 mm will be removed in this tank?  
 Temperature of water is 10°C and specific gravity of particles is 2.65.

- b)** Enlist various limitations of aeration process in tropical countries. **04**

- Q.4 a)** Design underdrainage system for rapid sand filter for 26 MLD of water flow. **05**

- b)** Write short note on Ion exchange method. **04**

- Q.5 a)** Maximum daily demand of water in a city is 130 MLD. Design cascade aerator for the same. Draw plan and elevation of the aerator. Assume the inlet pipe diameter as 1.1 m. **05**

- b)** Explain water hammer pressure with a neat sketch. **04**

**Section – II**

- Q.6 a)** A large service reservoir supplies water to two colonies. **05**

Colony A - Population 12000

Colony B - Population 60000

Determine the diameter of supply pipe. Average daily demand is 200 lpcd

- b)** Discuss intermittent water supply system. **05**

|            |           |                                                            |           |
|------------|-----------|------------------------------------------------------------|-----------|
| <b>Q.7</b> | <b>a)</b> | <b>Write short notes on</b>                                | <b>05</b> |
|            |           | 1) Action of bleaching powder                              |           |
|            |           | 2) Chloramines                                             |           |
|            | <b>b)</b> | Discuss the various methods of Disinfection.               | <b>04</b> |
| <b>Q.8</b> | <b>a)</b> | Discuss Packaged drinking water plant with a neat diagram. | <b>05</b> |
|            | <b>b)</b> | Explain various methods of Membrane Filtration.            | <b>04</b> |
| <b>Q.9</b> | <b>a)</b> | Explain the various types of storage reservoirs.           | <b>05</b> |
|            | <b>b)</b> | Discuss the different types of losses in pipes.            | <b>04</b> |

Duration: 30 Minutes

Marks: 14

**Q.1 Choose the correct alternatives from the options.**

**14**

- 1) Generally, \_\_\_\_\_ water supply will reduce water demand of a city.
  - a) Continuous
  - b) Intermittent
  - c) Both a) and b)
  - d) None of the above
- 2) Analysis of pipe networks of distribution system is calculated by \_\_\_\_\_.
  - a) Discharge in pipelines
  - b) Equivalent pipe method
  - c) Computation of pressure
  - d) Mass Curve Method
- 3) To control the wastage of water \_\_\_\_\_ measures are taken.
  - a) Pipe joints
  - b) Water taps
  - c) Zoning system
  - d) All of the above
- 4) For ideal settling basin  $V_s$  is settling velocity. If particle is having settling velocity ( $V_s'$ ) less than  $V_s$ , then particle will be removed with \_\_\_\_\_.
  - a) Less than 100%
  - b) 100%
  - c) 0%
  - d) None of the above
- 5) Zeolite is \_\_\_\_\_.
  - a) A naturally occurring salt
  - b) Hydrated silica
  - c) Dehydrated calcium silicate
  - d) Silicon carbide
- 6)  $\text{CO}_3^{2-}$  in water indicates \_\_\_\_\_.
  - a) Acidity in water
  - b) Alkalinity in water
  - c) Acidity and alkalinity in water
  - d) None of the above
- 7) \_\_\_\_\_ can follow direct routes and require shorter length of conduits.
  - a) Gravity conduit
  - b) Aqueduct
  - c) Tunnels
  - d) Pressure conduits
- 8) For a city developed haphazardly, the layout of distribution pipes preferred to is \_\_\_\_\_.
  - a) Radial system
  - b) Ring system
  - c) Dead end system
  - d) Iron grid system
- 9) Precipitation of non-carbonate hardness is done by addition of \_\_\_\_\_.
  - a) Soda ash
  - b) Lime
  - c) Zeolites
  - d) Sodium chloride

- 10)** Air binding phenomena in rapid sand filter may occur due to \_\_\_\_\_.  
a) Excessive negative pressure      b) Mud ball formation  
c) Higher turbidity in the effluent      d) None of the above
- 11)** Reflux valves are also known as \_\_\_\_\_ valves.  
a) Shut off      b) Check  
c) Cut off      d) Air relief
- 12)** Water losses in water supply is assumed as \_\_\_\_\_.  
a) Test pressure      b) Working pressure  
c) Pipe pressure      d) Design pressure
- 13)** \_\_\_\_\_ is the pipe connecting to storage tank various fixtures and taps.  
a) Distributing pipe      b) Supply pipe  
c) Antisiphonage pipe      d) Service pipe
- 14)** Tube settlers are installed in the sedimentation tank to \_\_\_\_\_.  
a) Increase detention time      b) Reduce Surface loading  
c) Both a) and b)      d) None of the above

**S.Y. (B.Tech) (Sem - II) (Old) (CBCS) Examination: Oct/Nov-2022**  
**CIVIL ENGINEERING**  
**Water Supply Engineering**

Day & Date: Monday, 06-03-2023  
 Time: 02:00 PM To 05:00 PM

Max. Marks: 56

- Instructions:** 1) Q.2 is compulsory in section I, attempt any two out of Q.3 to Q.5  
 2) Q. 6 is compulsory in section II, attempt any two out of Q.7 to Q.9  
 3) Figures to the right indicate full marks  
 4) Assume suitable data wherever necessary and mention it clearly.  
 5) Use of non-programmable calculator is allowed.

**Section – I**

- Q.2 a)** Find the population and of a city in 2041 by geometric increase method. **06**

| Year | Population |
|------|------------|
| 1981 | 40,000     |
| 1991 | 60,000     |
| 2001 | 85,000     |
| 2011 | 115,000    |
| 2021 | 2,00,000   |

- b)** Calculate the fire demand for the same city having Population of year 2041 using various formulae. (Question 02 (a)). **04**

- Q.3 a)** A settling tank is designed for an overflow rate of 4000 lit./m<sup>2</sup>/hr. What percentage of particles of diameter **05**

i) 0.06 mm and ii) 0.03 mm will be removed in this tank?  
 Temperature of water is 10°C and specific gravity of particles is 2.65.

- b)** Enlist various limitations of aeration process in tropical countries. **04**

- Q.4 a)** Design underdrainage system for rapid sand filter for 26 MLD of water flow. **05**

- b)** Write short note on Ion exchange method. **04**

- Q.5 a)** Maximum daily demand of water in a city is 130 MLD. Design cascade aerator for the same. Draw plan and elevation of the aerator. Assume the inlet pipe diameter as 1.1 m. **05**

- b)** Explain water hammer pressure with a neat sketch. **04**

**Section – II**

- Q.6 a)** A large service reservoir supplies water to two colonies. **05**

Colony A - Population 12000

Colony B - Population 60000

Determine the diameter of supply pipe. Average daily demand is 200 lpcd

- b)** Discuss intermittent water supply system. **05**

|            |           |                                                            |           |
|------------|-----------|------------------------------------------------------------|-----------|
| <b>Q.7</b> | <b>a)</b> | <b>Write short notes on</b>                                | <b>05</b> |
|            |           | 1) Action of bleaching powder                              |           |
|            |           | 2) Chloramines                                             |           |
|            | <b>b)</b> | Discuss the various methods of Disinfection.               | <b>04</b> |
| <b>Q.8</b> | <b>a)</b> | Discuss Packaged drinking water plant with a neat diagram. | <b>05</b> |
|            | <b>b)</b> | Explain various methods of Membrane Filtration.            | <b>04</b> |
| <b>Q.9</b> | <b>a)</b> | Explain the various types of storage reservoirs.           | <b>05</b> |
|            | <b>b)</b> | Discuss the different types of losses in pipes.            | <b>04</b> |

**Structural Analysis**

Day & Date: Friday, 10-03-2023  
 Time: 02:00 PM To 05:00 PM

Max. Marks: 56

- Instructions:** 1) Q.2 is compulsory, attempt any two out of Q.3 to Q.5.  
 2) Q. 6 is compulsory, attempt any two out of Q.7 to Q.9.  
 3) Figures to the right indicate full marks.  
 4) Use of scientific non programmable calculator is allowed  
 5) Assume suitable data if necessary and mention it clearly before solution  
 6) Draw the appropriate sketches wherever necessary.

**Section – I**

- Q.2** A masonry pier of 3 m x 4 m supports a vertical load of 80 kN as shown in Fig. 1 **10**  
 a) find the stresses developed at each corner of the pier  
 b) what additional load should be placed at the center of the pier, so that there is no tension anywhere in the pier section  
 c) what are the stresses at the corners with the additional load in the center

Fig.-1

- Q.3** A simply supported beam AB of span 4 m as shown in Fig.-2., carries a point load of 100 kN at its center C. the value of 'I' for the left half is  $1 \times 10^8 \text{ mm}^4$  and for the right half portion 'I' is  $2 \times 10^8 \text{ mm}^4$ . Find the slopes at the two supports and deflection under the load. Take  $E = 200 \text{ GN/m}^2$  **09**

Fig.-2

- Q.4** A three hinged parabolic arch of span 40 m and rise 10 m carries a uniformly distributed load of 30 kN/m over left half span as shown in Fig.-3. Find horizontal thrust and support reaction.

Fig.-3

- Q.5** A masonry trapezoidal dam 4 m high, 1 m wide at its top and 3 m width at its bottom retain water on its vertical face. Determine the maximum and minimum stresses at the base.

09

i) when the reservoir is full

Take the weight of masonry as  $19.62 \text{ kN/m}^3$ . Weight of water as  $9810 \text{ N/m}^3$ .

### Section – II

- Q.6** Analyze the continuous beam as shown in Fig.- 4 and draw bending moment diagram.

10

Fig.-4

- Q.7 a)** Determine the degree of static and kinematic indeterminacy of the frame as shown in Fig-5.

02

Fig.-5

- b) Analyze the continuous beam as shown in Fig. - 6 by flexibility matrix method.

Fig.-6

- Q.8 Analyze the frame shown in Fig - 7 by stiffness matrix method and draw bending moment diagram.

09

Fig.-7

- Q.9 Analyze the symmetric portal frame as shown in Fig. - 8 by moment distribution method and draw bending moment diagram.

09

Fig.-8

Day & Date: Friday, 10-03-2023  
Time: 02:00 PM To 05:00 PM

**Instructions:** 1) Q. No. 1 is compulsory. It should be solved in the first 30 minutes in answer book. Page no 03 (Starting page of the Answer Book). Each question carries one mark.  
2) Don't forget to Mention question paper set (P/Q/R/S) on top of page.  
3) Figures to the right indicate full marks

Marks: 14

14

- 1) A three hinged parabolic arch has a span of 30 m and the central rise is 5 m. It is subjected to a point load of 40 kN at a distance of 20 m from the right hinge. Calculate the vertical component at its left support \_\_\_\_\_.  
a) 35.35 kN                      b) 40 kN  
c) 13.13 kN                      d) 26.67 kN
- 2) The carryover factor in a prismatic member whose far end is fixed is \_\_\_\_\_.  
a) Zero                          b)  $\frac{1}{2}$   
c)  $\frac{3}{4}$                           d) One
- 3) Carryover Moment at end B due to moment M applied at end A for the given beam is \_\_\_\_\_.

- a) Zero  
c) -M
- b) +M  
d)  $+(M/2)$
- 4) For stable structures, one of the important properties of flexibility and stiffness matrices is that the elements on the main diagonal \_\_\_\_\_?
- i) of a stiffness matrix must be positive  
ii) of a stiffness matrix must be negative  
iii) of a flexibility matrix must be positive  
iv) of a flexibility matrix must be negative
- The correct answer is
- a) (i) and (iii)  
c) (i) and (iv)
- b) (ii) and (iii)  
d) (ii) and (iv)
- 5) The number of independent equations to be satisfied for static equilibrium of a plane structure is \_\_\_\_\_?
- a) 4  
c) 3
- b) 2  
d) 6

- 6) Flexibility matrix is also known as \_\_\_\_\_.  
 a) Displacement method                      b) Stiffness method  
 c) Equilibrium method                      d) Compatibility method
- 7) Independent displacement components at each joint of a rigid-jointed plane frame are \_\_\_\_\_.  
 a) Three linear movements  
 b) Two linear movements and one rotation  
 c) One linear movement and two rotations  
 d) Three rotations
- 8) If load is acting away from the longitudinal axis of column, it is called \_\_\_\_\_.  
 a) Horizontal load                      b) Axial load  
 c) Eccentric load                      d) Vertical load
- 9) The Rankine's constant ( $\alpha$ ) in Rankine's formula is equal to \_\_\_\_\_.  
 a)  $\Pi^2 \cdot E / \sigma_c$                       b)  $\Pi^2 / E \cdot \sigma_c$   
 c)  $E \cdot \sigma_c / \Pi^2$                       d)  $\sigma_c / \Pi^2 \cdot E$
- 10) Calculate the self-weight of rectangular dam of 22 m high and 8 m wide. It contains water up to a height of 20 m. consider the specific weight of masonry be 250 kN/m<sup>3</sup>.  
 a) 3560 kN                      b) 5432 kN  
 c) 4400 kN                      d) 5680 kN
- 11) An electric pole is 6.5 m high from the ground level. Its effective length for design purpose will be 3.25 m \_\_\_\_\_.  
 a) 6.5 m                      b) 3.25 m  
 c) 13.0 m                      d) 12.0 m
- 12) The ratio of crippling load, for a column of length (L) with both ends fixed to the crippling load of the same column with both ends hinges is equal to \_\_\_\_\_.  
 a) 2                      b) 4  
 c) 0.25                      d) 0.5
- 13) Deflection of a simply supported beam when subjected to central point load is given as \_\_\_\_\_.  
 a)  $WI / 16 EI$                       b)  $WI^2 / 16 EI$   
 c)  $WI^3 / 48 EI$                       d)  $5WI^4 / 384 EI$
- 14) Internal bending moment generated in a three hinged arch is always \_\_\_\_\_.  
 a) Zero  
 b) Infinite  
 c) Varies  
 d) Non zero value but remains constant

Set **Q**

**S. Y. (B.Tech.) (Sem - II) (Old) (CBCS) Examination: Oct/Nov-2022**  
**CIVIL ENGINEERING**  
**Structural Analysis**

Day & Date: Friday, 10-03-2023  
 Time: 02:00 PM To 05:00 PM

Max. Marks: 56

- Instructions:** 1) Q.2 is compulsory, attempt any two out of Q.3 to Q.5.  
 2) Q. 6 is compulsory, attempt any two out of Q.7 to Q.9.  
 3) Figures to the right indicate full marks.  
 4) Use of scientific non programmable calculator is allowed  
 5) Assume suitable data if necessary and mention it clearly before solution  
 6) Draw the appropriate sketches wherever necessary.

**Section – I**

- Q.2** A masonry pier of 3 m x 4 m supports a vertical load of 80 kN as shown in Fig. 1 **10**  
 a) find the stresses developed at each corner of the pier  
 b) what additional load should be placed at the center of the pier, so that there is no tension anywhere in the pier section  
 c) what are the stresses at the corners with the additional load in the center

Fig.-1

- Q.3** A simply supported beam AB of span 4 m as shown in Fig.-2., carries a point load of 100 kN at its center C. the value of 'I' for the left half is  $1 \times 10^8 \text{ mm}^4$  and for the right half portion 'I' is  $2 \times 10^8 \text{ mm}^4$ . Find the slopes at the two supports and deflection under the load. Take  $E = 200 \text{ GN/m}^2$  **09**

Fig.-2

- Q.4** A three hinged parabolic arch of span 40 m and rise 10 m carries a uniformly distributed load of 30 kN/m over left half span as shown in Fig.-3. Find horizontal thrust and support reaction.

Fig.-3

- Q.5** A masonry trapezoidal dam 4 m high, 1 m wide at its top and 3 m width at its bottom retain water on its vertical face. Determine the maximum and minimum stresses at the base.

09

i) when the reservoir is full

Take the weight of masonry as  $19.62 \text{ kN/m}^3$ . Weight of water as  $9810 \text{ N/m}^3$ .

### Section – II

- Q.6** Analyze the continuous beam as shown in Fig.- 4 and draw bending moment diagram.

10

Fig.-4

- Q.7 a)** Determine the degree of static and kinematic indeterminacy of the frame as shown in Fig-5.

02

Fig.-5

- b) Analyze the continuous beam as shown in Fig. - 6 by flexibility matrix method.

Fig.-6

- Q.8 Analyze the frame shown in Fig - 7 by stiffness matrix method and draw bending moment diagram.

09

Fig.-7

- Q.9 Analyze the symmetric portal frame as shown in Fig. - 8 by moment distribution method and draw bending moment diagram.

2) Don't forget to Mention question paper set (P/Q/R/S) on top of page.  
3) Figures to the right indicate full marks

### MCQ/Objective Type Questions

Duration: 30 Minutes

Marks: 14

**Q.1 Choose the correct alternatives from the options.**

14

- 1) Deflection of a simply supported beam when subjected to central point load is given as \_\_\_\_\_.  
a)  $WI / 16 EI$   
b)  $WI^2 / 16 EI$   
c)  $WI^3 / 48 EI$   
d)  $5WI^4 / 384 EI$
- 2) Internal bending moment generated in a three hinged arch is always \_\_\_\_\_.  
a) Zero  
b) Infinite  
c) Varies  
d) Non zero value but remains constant
- 3) A three hinged parabolic arch has a span of 30 m and the central rise is 5 m. It is subjected to a point load of 40 kN at a distance of 20 m from the right hinge. Calculate the vertical component at its left support \_\_\_\_\_.  
a) 35.35 kN  
b) 40 kN  
c) 13.13 kN  
d) 26.67 kN
- 4) The carryover factor in a prismatic member whose far end is fixed is \_\_\_\_\_.  
a) Zero  
b)  $\frac{1}{2}$   
c)  $\frac{3}{4}$   
d) One
- 5) Carryover Moment at end B due to moment M applied at end A for the given beam is \_\_\_\_\_.

- a) Zero                      b) +M  
c) -M                        d) +(M/2)

- 6) For stable structures, one of the important properties of flexibility and stiffness matrices is that the elements on the main diagonal \_\_\_\_\_?
- of a stiffness matrix must be positive
  - of a stiffness matrix must be negative
  - of a flexibility matrix must be positive
  - of a flexibility matrix must be negative
- The correct answer is
- (i) and (iii)
  - (ii) and (iii)
  - (i) and (iv)
  - (ii) and (iv)
- 7) The number of independent equations to be satisfied for static equilibrium of a plane structure is \_\_\_\_\_?
- 4
  - 2
  - 3
  - 6
- 8) Flexibility matrix is also known as \_\_\_\_\_.
- Displacement method
  - Stiffness method
  - Equilibrium method
  - Compatibility method
- 9) Independent displacement components at each joint of a rigid-jointed plane frame are \_\_\_\_\_.
- Three linear movements
  - Two linear movements and one rotation
  - One linear movement and two rotations
  - Three rotations
- 10) If load is acting away from the longitudinal axis of column, it is called \_\_\_\_\_.
- Horizontal load
  - Axial load
  - Eccentric load
  - Vertical load
- 11) The Rankine's constant ( $\alpha$ ) in Rankine's formula is equal to \_\_\_\_\_.
- $\Pi^2 \cdot E / \sigma_c$
  - $\Pi^2 / E \cdot \sigma_c$
  - $E \cdot \sigma_c / \Pi^2$
  - $\sigma_c / \Pi^2 \cdot E$
- 12) Calculate the self-weight of rectangular dam of 22 m high and 8 m wide. It contains water up to a height of 20 m. consider the specific weight of masonry be 250 kN/m<sup>3</sup>.
- 3560 kN
  - 5432 kN
  - 4400 kN
  - 5680 kN
- 13) An electric pole is 6.5 m high from the ground level. Its effective length for design purpose will be 3.25 m \_\_\_\_\_.
- 6.5 m
  - 3.25 m
  - 13.0 m
  - 12.0 m
- 14) The ratio of crippling load, for a column of length (L) with both ends fixed to the crippling load of the same column with both ends hinges is equal to \_\_\_\_\_.
- 2
  - 4
  - 0.25
  - 0.5

**S.Y. (B.Tech.) (Sem - II) (Old) (CBCS) Examination: Oct/Nov-2022**  
**CIVIL ENGINEERING**  
**Engineering Mathematics-III**

Day & Date: Tuesday, 14-03-2023  
 Time: 02:00 PM To 05:00 PM

Max. Marks: 70

- Instructions:** 1) Q. No. 1 is compulsory. It should be solved in the first 30 minutes in answer book. Page no 03 (Starting page of the Answer Book). Each question carries one mark.  
 2) Don't forget to Mention question paper set (P/Q/R/S) on top of page.  
 3) Figures to the right indicate full marks.  
 4) Use of non-programmable calculator is allowed.

**MCQ/Objective Type Questions**

Duration: 30 Minutes

Marks: 14

**Q.1 Choose the correct alternatives from the options.**

**14**

- 1) If the linear differential equation with constant coefficient has real root 'm' repeated twice, then the corresponding complementary functions \_\_\_\_\_.  
 a)  $c_1 e^{mx} + c_2 e^{-mx}$                       b)  $c_1 \cos(mx) + c_2 \sin(mx)$   
 c)  $(c_1 + c_2 x) e^{mx}$                       d)  $(c_1 + c_2 x) e^{-mx}$
- 2)  $\frac{1}{D^2} \{x^3\}$  is equal to \_\_\_\_\_.  
 a)  $\frac{x^5}{20}$                       b)  $\frac{x^4}{12}$   
 c)  $x^3 e^{-x}$                       d)  $20 x^5$
- 3) The particular integral of  $(D^2 + a^2)y = \cos(ax)$  is \_\_\_\_\_.  
 a)  $\frac{x}{2a} \cos(ax)$                       b)  $\frac{x}{2a^2} \cos(ax)$   
 c)  $\frac{x}{2a} \sin(ax)$                       d)  $\frac{x}{2a^2} \sin(ax)$
- 4) The solution of partial differential equation  $q = 3p^2$  is \_\_\_\_\_.  
 a)  $z = ax + \frac{a^2}{3} y + c$                       b)  $z = 3ax + a^2 y + c$   
 c)  $z = 3a^2 x + by$                       d)  $z = ax + 3a^2 y + c$
- 5) The general solution of partial differential equation  $pe^y = qe^x$  is \_\_\_\_\_.  
 a)  $z = a(e^{-x} + e^{-y}) + c$                       b)  $z = a(e^{-x} - e^{-y}) + c$   
 c)  $z = a(e^x + e^y) + c$                       d)  $z = a(e^x - e^y) + c$
- 6) In the interval,  $(0, \pi)$ , the constant term in the Fourier half range cosine series of  $f(x) = x$  is \_\_\_\_\_.  
 a)  $\pi$                       b)  $\frac{\pi}{2}$   
 c)  $0$                       d)  $\frac{\pi}{4}$
- 7) The Fourier expansion of an even function  $f(x)$  in  $(-5, 5)$  has only \_\_\_\_\_.  
 a) Cosine terms                      b) Sine terms  
 c) Both Sine & Cosine terms                      d) None of these

Day & Date: Tuesday, 14-03-2023  
 Time: 02:00 PM To 05:00 PM

Max. Marks: 56

- Instructions:** 1) All questions are compulsory.  
 2) Figures to the right indicates full marks.  
 3) Use of non-programmable calculator is allowed.

**Section – I**

**Q.2 Attempt any three from the following.** **09**

- Solve :  $(D^2 + 1)y = 3 + 5e^{-3x}$
- Solve :  $(D^3 - 4D)y = \cos(x)$
- Solve :  $p(1 + q) = qz$
- Solve :  $x^2p^2 + y^2q^2 = qz$
- Obtain the Fourier series of  $f(x) = 1 - x^2$  in  $-1 \leq x \leq 1$

**Q.3 Attempt any three from the followings.** **09**

- Solve :  $(D^2 + 4)y = x \cos x$
- Solve :  $py = 2xy + \log q$
- Solve :  $y^4z p + zx^4q = xy^4$
- Obtain the half range sine series of the function  $f(x) = \pi x - x^2$  in  $(0, \pi)$
- Solve :  $(D^2 + 6D + 9)y = e^{-3x} \cos 2(x)$

**Q.4 Attempt any two from the following.** **10**

- Solve the partial differential equation by method of separation of variables  
 $\frac{\partial z}{\partial x} - 2 \frac{\partial z}{\partial y} = z$  where  $z(x, 0) = 6e^{-3x}$
- Obtain the Fourier series of the function series of the function  
 $f(x) = \frac{1}{4}(\pi - x)^2$   $0 \leq x \leq 2\pi$
- The equation of motion of a spring whose one and other end supports weight of 10 lbs is given by equation  $\frac{d^2x}{dt^2} + \frac{8}{25} \frac{dx}{dt} + 64x = 0$ .  
 If at  $t = 0$ ,  $x = 0.25$  and  $\frac{dx}{dt} = 0$ , then find the displacement ' $x$ ' at any time ' $t$ '

**Section – II**

**Q.5 Attempt any three of the following.** **09**

- Find  $L\{e^{-3t}t \sin 4t\}$
- Find  $L^{-1}\left\{\frac{s}{(s-2)(s+3)}\right\}$
- Compute the coefficient of correlation between  $x$  and  $y$  from the data  
 $N = 20, \sum x = 80, \sum x^2 = 900, \sum y = 70, \sum y^2 = 800$  and  $\sum xy = 700$
- Evaluate  $\int_0^1 \frac{x^2}{1+x^3} dx$  using Simpson's 1/3<sup>rd</sup> rule with  $h = 0.25$

- e) Find a positive real root of the equation  $2x - 3 \sin x - 5 = 0$  correct to three decimal places by Regula Falsi method.

**Q.6 Attempt any three from the following.****09**

- a) The probability that a missile will strike the target is  $\frac{1}{5}$ . If six missiles are fixed, then using Binomial distribution find the probability that exactly two will strike the target.
- b) If the probability an individual suffers a bad reaction from a certain injection is 0.001. Using Poisson distribution determine the probability that out of 2000 individuals
- exactly 3,
  - at most 2 will suffer a bad reaction
- c) Find  $L^{-1}\left\{\frac{1}{s(s^2+9)}\right\}$  by convolution theorem.
- d) Find a positive real root of the equation  $xe^x - 2 = 0$  correct to three decimal places by Newton's Raphson method.
- e) Find the Laplace transform of  $t \sin 2t \cos 3t$

**Q.7 Attempt any two from the following.****10**

- a) Evaluate  $\int_0^{\infty} e^{-3t} t \sin t \, dt$  by Laplace transform
- b) Evaluate  $\int_0^{\pi} \frac{\sin x}{x} \, dx$  by dividing range into six equals parts, using Trapezoidal rule and Weddle's rule.
- c) The size of hats is normally distributed with mean 18.5 cm and standard deviation 2.5 cm. How many hats in a total of 2000 will have sizes between
- 18 cm and 20 cm
  - Above 20 cm?
- (Give: For S. N. V. z, area between  $z = 0$  and  $z = 0.6$  is 0.2257, between  $z = 0$  and  $z = 0.2$  is 0.0793)

Duration: 30 Minutes

Marks: 14

**Q.1 Choose the correct alternatives from the options.**

**14**

- 1) If  $L\{f(t) = F(s)\}$ , then  $L\{tf(t)\} = \underline{\hspace{2cm}}$ .
 

|                            |                           |
|----------------------------|---------------------------|
| a) $\frac{d}{ds}\{F(s)\}$  | b) $\frac{1}{s} F(s)$     |
| c) $-\frac{d}{ds}\{F(s)\}$ | d) $\int_s^\infty F(s)ds$ |
- 2)  $L\left\{\int_0^t \cos h(t)dt\right\} = \underline{\hspace{2cm}}$ 

|                              |                        |
|------------------------------|------------------------|
| a) $\frac{s}{s^2 - 1}$       | b) $\frac{s}{s^2 + 1}$ |
| c) $-\frac{2s}{(s^2 - 1)^2}$ | d) $\frac{1}{s^2 - 1}$ |
- 3) In solving algebraic and transcendental equations, the rate convergence of Newton's Raphson method is \_\_\_\_\_.
 

|        |         |
|--------|---------|
| a) 0.5 | b) 2    |
| c) 1.5 | d) 1.62 |
- 4) The number of strips required to use Weddle's rule is \_\_\_\_\_.
 

|                  |                  |
|------------------|------------------|
| a) Multiple of 6 | b) Multiple of 3 |
| c) Multiple of 2 | d) Any number    |
- 5) The order of error is Simpson's  $\frac{1}{3}$  rd rule is \_\_\_\_\_.
 

|          |          |
|----------|----------|
| a) $h^3$ | b) $h^2$ |
| c) $h^4$ | d) $h^6$ |
- 6) A continuous random variable has the probability density function  $f(x) = kx^2$ , for  $0 \leq x \leq 2$  then  $k = \underline{\hspace{2cm}}$ .
 

|                  |                  |
|------------------|------------------|
| a) $\frac{8}{3}$ | b) $\frac{3}{2}$ |
| c) $\frac{5}{8}$ | d) $\frac{3}{8}$ |

Day & Date: Monday, 13-03-2023  
 Time: 02:00 PM To 05:00 PM

Max. Marks: 70

- Instructions:** 1) Q. No. 1 is compulsory. It should be solved in the first 30 minutes in answer book. Page no 03 (Starting page of the Answer Book). Each question carries one mark.  
 2) Don't forget to Mention question paper set (P/Q/R/S) on top of page.  
 3) Figures to the right indicate full marks  
 4) Use of Steam table and scientific calculator is allowed.

**MCQ/Objective Type Questions**

Duration: 30 Minutes

Marks: 14

**Q.1 Choose the correct alternatives from the options.**

**14**

- 1) Rankin cycle comprises of \_\_\_\_\_  
 a) Two isentropic and two constant volume processes  
 b) Two isentropic and two constant pressure processes  
 c) Two isothermal and two isentropic  
 d) None of these
- 2) Volumetric efficiency is always \_\_\_\_\_  
 a) Less than 1  
 b) equal to 1  
 c) Greater than 1  
 d) In between 1 & 5
- 3) The term coefficient of performance (COP) is related with \_\_\_\_\_  
 a) Heat Pump  
 b) Heat Engine  
 c) Steam Engine  
 d) Gas Turbine
- 4) If pressure on water increases then saturation temperature \_\_\_\_\_  
 a) remains constant  
 b) decreases  
 c) increases remain constant  
 d) none of these
- 5) Which of among the following is the boiler mounting?  
 a) Air preheater  
 b) Economizer  
 c) Fusible plug  
 d) Super heater
- 6) In Rankine cycle, the work output from turbine is obtained by \_\_\_\_\_  
 a) Change in internal energy between inlet and outlet  
 b) Change in enthalpy between inlet and outlet  
 c) Change in entropy between inlet and outlet  
 d) Change in temperature between inlet and outlet
- 7) Latent heat of vaporization of water at critical point is \_\_\_\_\_.  
 a) Zero  
 b) 539 kcal/kg  
 c) 1 kcal/kg  
 d) 2257 KJ/Kg
- 8) The steam leaves the nozzle at \_\_\_\_\_.  
 a) High pressure and low velocity  
 b) Low pressure and low velocity  
 c) High pressure and high velocity  
 d) Low pressure and high velocity

P

**S.Y. (B.Tech) (Sem - I) (New) (CBCS) Examination: Oct/Nov-2022**  
**MECHANICAL ENGINEERING**  
**Applied Thermodynamics**

Day &amp; Date: Monday, 13-03-2023

Max. Marks: 56

Time: 02:00 PM To 05:00 PM

- Instructions:** 1) Solve any two questions from each section.  
 2) Figures to the right indicate full marks.  
 3) Assume additional suitable data if necessary and state it clearly.  
 4) Use of Steam and scientific calculator is allowed.

**Section – I**

- Q.2** a) Explain the effect of operating conditions on the efficiency of Rankine cycle. **05**  
 b) Calculate the standard enthalpy change at 298.15K for the reaction **05**  

$$\text{C}_5\text{H}_{12(g)} + 8\text{O}_2 \longrightarrow 5\text{CO}_{2(g)} + 6\text{H}_2\text{O}_g$$
  
 Standard enthalpy of formation at 298.15K for  
 $\text{CO}_{2(g)} = -393.8 \text{ KJ/mol}$   
 $\text{H}_2\text{O}_{(g)} = -242 \text{ KJ/mol}$   
 $\text{C}_5\text{H}_{12(g)} = -146.5 \text{ KJ/mol}$   
 c) Explain the different heat losses in boiler and draw model heat balance sheet for boiler. **04**
- Q.3** a) A steam power plant working on Rankine cycle has range of operations 50 bar to 0.08 bar. **06**  
 The steam at the entry of turbine is dry saturated.  
 Calculate -  
 i) Dryness fraction at the end of expansion  
 ii) Turbine work  
 iii) Cycle Efficiency  
 b) Explain - Equivalent evaporation and Boiler efficiency **04**  
 c) Compare heat engine and heat pump. **04**
- Q.4** a) The following readings were obtained during a boiler trial of 6 hours duration. **05**  
 Mean steam pressure 12 bar, mass of steam generated 40000Kg, mean dryness fraction as 0.80. Mean feed water temperature 30°C, coal used 4000 Kg, Calorific value of coal is 33600 KJ/Kg.  
 Calculate –  
 i) Equivalent evaporation  
 ii) Boiler efficiency  
 b) Explain the Rankine cycle with neat diagram. **05**  
 c) Explain with the help of property diagram, phase change process of water. **04**

**Section – II**

- Q.5**   **a)** In a De-Laval turbine steam issues from a nozzle with a velocity of 1200m/s. **05**  
The nozzle angle is  $20^\circ$ . The mean blade speed is 400 m/s, inlet and outlet angles are equal. The mass of steam flowing through the turbine per hour is 1000kg,  
Calculate:  
i) Blade angles  
ii) Relative velocity of blade entering the blade  
iii) Blade efficiency
- b)** Explain with neat sketch any one type surface condenser. **05**
- c)** What is nozzle? Explain the types of nozzle with neat sketches **04**
- Q.6**   **a)** Derive an expression for intermediate pressure for a two stage compressor with minimum work input. **05**
- b)** A Compressor compresses air from 1 bar to 7 bar. The clearance volume is 2.13 lit. Compression and expansion are polytropic with  $n=1.3$ , volumetric efficiency is 85%. **05**  
Determine:  
i) Stroke volume  
ii) Diameter of cylinder if length of stroke is 30 cm.
- c)** Explain the classification of steam turbines. **04**
- Q.7**   **a)** What is mean by compounding of steam turbine? What are its different methods? Explain any one method with neat diagram. **05**
- b)** Derive an expression for work done equation of compressor with and without clearance **05**
- c)** Write the difference between jet and surface condenser. **04**

**MCQ/Objective Type Questions**

Duration: 30 Minutes

Marks: 14

**Q.1 Choose the correct alternatives from the options.**

**14**

- 1) The steam leaves the nozzle at \_\_\_\_\_.  
 a) High pressure and low velocity  
 b) Low pressure and low velocity  
 c) High pressure and high velocity  
 d) Low pressure and high velocity
- 2) In intercooler the pressure of the compresses air \_\_\_\_\_.  
 a) Reduces  
 b) Increases  
 c) Remains same  
 d) None of these
- 3) For Parson's reaction steam turbine, the degree of reaction is \_\_\_\_\_.  
 a) 70%  
 b) 100%  
 c) 25%  
 d) 50%
- 4) Dryness fraction (x) of superheated steam is \_\_\_\_\_.  
 a) Less than 1  
 b) Greater than 1  
 c) Equals to 1  
 d) None of these
- 5) Standard Enthalpy of formation is measured at \_\_\_\_\_.  
 a) 25° C and 10 atm  
 b) 0° C and 1 atm  
 c) 100° C and 1 atm  
 d) 25° C and 1 atm
- 6) Compounding of steam turbine is done to \_\_\_\_\_.  
 a) To balance the rotor  
 b) Reduce the blade friction  
 c) Reduce the rotor speed  
 d) To increase the rotor speed
- 7) Evaporative type of condenser has \_\_\_\_\_.  
 a) Steam in pipe surrounded by water  
 b) water in pipe surrounded by steam  
 c) Either a and b  
 d) None of these

- 8) Rankin cycle comprises of \_\_\_\_\_  
a) Two isentropic and two constant volume processes  
b) Two isentropic and two constant pressure processes  
c) Two isothermal and two isentropic  
d) None of these
- 9) Volumetric efficiency is always \_\_\_\_\_  
a) Less than 1  
b) equal to 1  
c) Greater than 1  
d) In between 1 & 5
- 10) The term coefficient of performance (COP) is related with \_\_\_\_\_  
a) Heat Pump  
b) Heat Engine  
c) Steam Engine  
d) Gas Turbine
- 11) If pressure on water increases then saturation temperature \_\_\_\_\_  
a) remains constant  
b) decreases  
c) increases remain constant  
d) none of these
- 12) Which of among the following is the boiler mounting?  
a) Air preheater  
b) Economizer  
c) Fusible plug  
d) Super heater
- 13) In Rankine cycle, the work output from turbine is obtained by \_\_\_\_\_  
a) Change in internal energy between inlet and outlet  
b) Change in enthalpy between inlet and outlet  
c) Change in entropy between inlet and outlet  
d) Change in temperature between inlet and outlet
- 14) Latent heat of vaporization of water at critical point is \_\_\_\_\_.  
a) Zero  
b) 539 kcal/kg  
c) 1 kcal/kg  
d) 2257 KJ/Kg

- a) Parabolic
  - b) triangular
  - c) Two equal and opposite rectangle
  - d) Two equal and opposite triangle
- 9) When simply supported beam is loaded maximum compressive stress shall develop at
- a) at the neutral layer
  - b) top layer
  - c) Bottom layer
  - d) None of above
- 10) For a triangular section subjected to shear force, the intensity of shear stress is maximum at
- a) at the base of triangle
  - b) at  $h/2$  from base
  - c) At neutral axis
  - d) At vertex of triangle
- 11) The radius of Mohr's stress circle indicates
- a) Maximum normal stress
  - b) Minimum normal stress
  - c) Maximum shear stress
  - d) Minimum shear stress
- 12) On a principal plane, the shear stress is
- a) maximum
  - b) minimum
  - c) zero
  - d) average
- 13) For a simply supported beam carrying a U.D.L. on its entire span, the slope is
- a) same as deflection
  - b) zero at support
  - c) zero at center
  - d) maximum at center
- 14) On an element, perpendicular tensile stresses are 100 MPa and 50 MPa. The normal stress acting on the plane of maximum shear stress is
- a) 75 MPa (tensile)
  - b) 25 MPa (tensile)
  - c) 75 MPa (compressive)
  - d) 25 MPa (compressive)

**S.Y. (B.Tech.) (Sem-I) (New) (CBCS) Examination: Oct/Nov - 2022**  
**MECHANICAL ENGINEERING**  
**Mechanics of Materials**

Day & Date: Wednesday, 15-03-2023  
 Time: 02:00 PM To 05:00 PM

Max. Marks: 56

- Instructions:** 1) Solve any two questions from each section.  
 2) Figures to the right indicate full marks.  
 3) Assume suitable data wherever necessary.  
 4) Use of scientific calculator is allowed.

**Section – I**

- Q.2 a)** A steel rod 40mm diameter 1000mm long is coaxially enclosed in brass tube of 60mm external diameter 4mm thickness and 1000mm length. Determine the stresses & load shared by each material and also change in length of assembly, if the assembly is subjected to an axial compressive force of 150kN.  $E_{\text{steel}}=200\text{Gpa}$  and  $E_{\text{brass}}=100\text{Gpa}$  **08**
- b)** A load of 100N falls through a height of 2 cm on to a collar rigidly attached to it to the lower end of vertical bar 1.5m long and of  $150\text{ mm}^2$  cross sectional area. The upper end of vertical bar is fixed Determine **06**
- 1) Maximum stress induced in bar
  - 2) Maximum elongation
  - 3) Strain energy stored  $E=200\text{Gpa}$
- Q.3 a)** A shaft of hollow circular cross section has outer diameter 120mm and inner diameter 80mm. It is subjected to a torque of 20 kN-m. Determine: **06**
- 1) Shear stress at outer surface
  - 2) shear stress at inner surface
  - 3) angle of twist over length of 3m. Assume  $G=85\text{Gpa}$ .
- b)** Draw SFD and BMD of simply supported beam as shown in figure. Find Maximum bending moment and locate point of contra-flexure. **08**

- Q.4 a)** A bar of steel 80 x 65 mm in cross section and 290mm long. It is subjected to a tensile load of 280 kN along longitudinal axis, compressive load of 650kN in Y-direction and 500 kN tensile load in Z-direction in respective lateral direction. Find change in Volume of bar  $E=200\text{Gpa}$  and  $\mu=0.3$  **06**
- b)** A weight of 2kN is dropped on the collar attached at the lower end of vertical bar 3 m long and 28 mm diameter. Calculate height of drop if maximum instantaneous stress is not to exceed 150mpa. Also calculate instantaneous elongation. Take  $E=200\text{Gpa}$ . **04**
- c)** Draw SFD and BMD for Cantilever beam having length (L) and subjected to point load 'W' at free end. **04**

**Section – II**

- Q.5**   **a)**   At a point in a bracket the stresses on two mutually perpendicular planes are 120 mpa and 80 mpa both tensile in nature, together with shear stress of 20 mpa tends to rotate the block in clockwise direction. Find the magnitude and direction of resultant stress on plane making an angle of 30 degree with plane of first stress. Also find angle of obliquity and maximum shear stress      **08**
- b)**   A hollow rectangular section 30mm x 60mm inside dimension and 10mm thick is subjected to shear force of 40kN. Calculate ratio of maximum shear stress to average shear stress.      **06**
- Q.6**   **a)**   A beam of T section having top flange 120 mm x 20 mm and web 20 mm x 100mm simply supported over span of 5 m and carries point load of 3 kN at mid span. Determine maximum tensile and compressive stresses developed.      **08**
- b)**   A simply supported beam of 6meter span carries uniformly distributed load of 6kN/m over its entire span. The cross section of beam is 120 x 180 mm in size. Calculate the maximum slope at support and maximum deflection at center. Take  $E=11 \text{ Gpa}$ .      **06**
- Q.7**   **a)**   Define Slope and Deflection of beam. Describe concept in brief for simply supported and cantilever beam.      **04**
- b)**   A cantilever beam has length 4 m subjected to point load of 250N at free end. It is of hollow square section of outer size 50mm and inner size 40mm. Find maximum bending stresses.      **05**
- c)**   At a point in elastic material under strain, there are normal tensile stresses of 90 Mpa and 40 Mpa respectively at the right angles to each other along with a shear stress of 25 Mpa. Find graphically principal stresses and maximum shear stress.      **05**

Day & Date: Wednesday, 15-03-2023  
 Time: 02:00 PM To 05:00 PM

Max. Marks: 70

- Instructions:** 1) Q. No. 1 is compulsory. It should be solved in the first 30 minutes in answer book. Page no 03 (Starting page of the Answer Book). Each question carries one mark.  
 2) Don't forget to Mention question paper set (P/Q/R/S) on top of page.  
 3) Figures to the right indicates full marks  
 4) Assume suitable data wherever needed and mention it clearly.

**MCQ/Objective Type Questions**

Duration: 30 Minutes

Marks: 14

**Q.1 Choose the correct alternatives from the options.**

**14**

- 1) For a simply supported beam carrying U.D.L. over entire span, shape of SFD is
  - a) Parabolic
  - b) triangular
  - c) Two equal and opposite rectangle
  - d) Two equal and opposite triangle
- 2) When simply supported beam is loaded maximum compressive stress shall develop at
 

|                         |                  |
|-------------------------|------------------|
| a) at the neutral layer | b) top layer     |
| c) Bottom layer         | d) None of above |
- 3) For a triangular section subjected to shear force, the intensity of shear stress is maximum at
 

|                            |                          |
|----------------------------|--------------------------|
| a) at the base of triangle | b) at h/2 from base      |
| c) At neutral axis         | d) At vertex of triangle |
- 4) The radius of Mohr's stress circle indicates
 

|                          |                          |
|--------------------------|--------------------------|
| a) Maximum normal stress | b) Minimum normal stress |
| c) Maximum shear stress  | d) Minimum shear stress  |
- 5) On a principal plane, the shear stress is
 

|            |            |
|------------|------------|
| a) maximum | b) minimum |
| c) zero    | d) average |
- 6) For a simply supported beam carrying a U.D.L. on its entire span, the slope is
 

|                       |                      |
|-----------------------|----------------------|
| a) same as deflection | b) zero at support   |
| c) zero at center     | d) maximum at center |
- 7) On an element, perpendicular tensile stresses are 100 MPa and 50 MPa. The normal stress acting on the plane of maximum shear stress is
 

|                         |                         |
|-------------------------|-------------------------|
| a) 75 MPa (tensile)     | b) 25 MPa (tensile)     |
| c) 75 MPa (compressive) | d) 25 MPa (compressive) |

- 8) The percentage elongation and the percentage reduction in area depends upon \_\_\_\_\_.  
a) Tensile strength of the material  
b) Ductility of the material  
c) Toughness of the material  
d) hardness of material
- 9) For a material with Poisson's ratio 0.25, the ratio of Elastic modulus to shear modulus is \_\_\_\_\_.  
a) 2.55  
b) 2.5  
c) 3.0  
d) 1.5
- 10) If diameter of shaft is doubled, power transmitted 'P' can be increased to  
a) 16P  
b) 2P  
c) 8P  
d) 4P
- 11) In case of a cantilever beam, maximum B.M. and maximum S.F. always occur at  
a) Couple end  
b) Fixed end  
c) Free end  
d) Mid span
- 12) The angle of twist \_\_\_\_\_ proportional to the twisting moment.  
a) Directly  
b) Inversely  
c) Either a) or b)  
d) None
- 13) Modulus of resilience is the ratio of  
a) minimum strain energy and unit volume  
b) direct stress and unit volume  
c) proof resilience and unit volume  
d) resilience and unit area
- 14) For a simply supported beam carrying a couple, its B.M.D. shows  
a) zero bending moment  
b) rise or fall in bending moment  
c) maximum bending moment  
d) minimum bending moment

**MCQ/Objective Type Questions**

Duration: 30 Minutes

Marks: 14

**Q.1 Choose the correct alternatives from the options.**

**14**

- 1) Modulus of resilience is the ratio of
  - a) minimum strain energy and unit volume
  - b) direct stress and unit volume
  - c) proof resilience and unit volume
  - d) resilience and unit area
- 2) For a simply supported beam carrying a couple, its B.M.D. shows
  - a) zero bending moment
  - b) rise or fall in bending moment
  - c) maximum bending moment
  - d) minimum bending moment
- 3) For a simply supported beam carrying U.D.L. over entire span, shape of SFD is
  - a) Parabolic
  - b) triangular
  - c) Two equal and opposite rectangle
  - d) Two equal and opposite triangle
- 4) When simply supported beam is loaded maximum compressive stress shall develop at
  - a) at the neutral layer
  - b) top layer
  - c) Bottom layer
  - d) None of above
- 5) For a triangular section subjected to shear force, the intensity of shear stress is maximum at
  - a) at the base of triangle
  - b) at  $h/2$  from base
  - c) At neutral axis
  - d) At vertex of triangle
- 6) The radius of Mohr's stress circle indicates
  - a) Maximum normal stress
  - b) Minimum normal stress
  - c) Maximum shear stress
  - d) Minimum shear stress
- 7) On a principal plane, the shear stress is
  - a) maximum
  - b) minimum
  - c) zero
  - d) average

- 8) For a simply supported beam carrying a U.D.L. on its entire span, the slope is  
a) same as deflection                      b) zero at support  
c) zero at center                          d) maximum at center
- 9) On an element, perpendicular tensile stresses are 100 MPa and 50 MPa. The normal stress acting on the plane of maximum shear stress is  
a) 75 MPa (tensile)                      b) 25 MPa (tensile)  
c) 75 MPa (compressive)              d) 25 MPa (compressive)
- 10) The percentage elongation and the percentage reduction in area depends upon \_\_\_\_\_.  
a) Tensile strength of the material  
b) Ductility of the material  
c) Toughness of the material  
d) hardness of material
- 11) For a material with Poisson's ratio 0.25, the ratio of Elastic modulus to shear modulus is \_\_\_\_\_.  
a) 2.55                                      b) 2.5  
c) 3.0                                        d) 1.5
- 12) If diameter of shaft is doubled, power transmitted 'P' can be increased to  
a) 16P                                        b) 2P  
c) 8P                                         d) 4P
- 13) In case of a cantilever beam, maximum B.M. and maximum S.F. always occur at  
a) Couple end                              b) Fixed end  
c) Free end                                  d) Mid span
- 14) The angle of twist \_\_\_\_\_ proportional to the twisting moment.  
a) Directly                                  b) Inversely  
c) Either a) or b)                        d) None

**S.Y. (B.Tech.) (Sem-I) (New) (CBCS) Examination: Oct/Nov - 2022**  
**MECHANICAL ENGINEERING**  
**Mechanics of Materials**

Day & Date: Wednesday, 15-03-2023  
 Time: 02:00 PM To 05:00 PM

Max. Marks: 56

- Instructions:** 1) Solve any two questions from each section.  
 2) Figures to the right indicate full marks.  
 3) Assume suitable data wherever necessary.  
 4) Use of scientific calculator is allowed.

**Section – I**

- Q.2 a)** A steel rod 40mm diameter 1000mm long is coaxially enclosed in brass tube of 60mm external diameter 4mm thickness and 1000mm length. Determine the stresses & load shared by each material and also change in length of assembly, if the assembly is subjected to an axial compressive force of 150kN.  $E_{\text{steel}}=200\text{Gpa}$  and  $E_{\text{brass}}=100\text{Gpa}$  **08**
- b)** A load of 100N falls through a height of 2 cm on to a collar rigidly attached to it to the lower end of vertical bar 1.5m long and of  $150\text{ mm}^2$  cross sectional area. The upper end of vertical bar is fixed Determine  
 1) Maximum stress induced in bar  
 2) Maximum elongation  
 3) Strain energy stored  $E=200\text{Gpa}$  **06**
- Q.3 a)** A shaft of hollow circular cross section has outer diameter 120mm and inner diameter 80mm. It is subjected to a torque of 20 kN-m. Determine:  
 1) Shear stress at outer surface  
 2) shear stress at inner surface  
 3) angle of twist over length of 3m. Assume  $G=85\text{Gpa}$ . **06**
- b)** Draw SFD and BMD of simply supported beam as shown in figure. Find Maximum bending moment and locate point of contra-flexure. **08**

- Q.4 a)** A bar of steel 80 x 65 mm in cross section and 290mm long. It is subjected to a tensile load of 280 kN along longitudinal axis, compressive load of 650kN in Y-direction and 500 kN tensile load in Z-direction in respective lateral direction. Find change in Volume of bar  $E=200\text{Gpa}$  and  $\mu=0.3$  **06**
- b)** A weight of 2kN is dropped on the collar attached at the lower end of vertical bar 3 m long and 28 mm diameter. Calculate height of drop if maximum instantaneous stress is not to exceed 150mpa. Also calculate instantaneous elongation. Take  $E=200\text{Gpa}$ . **04**
- c)** Draw SFD and BMD for Cantilever beam having length (L) and subjected to point load 'W' at free end. **04**

**Section – II**

- Q.5 a)** At a point in a bracket the stresses on two mutually perpendicular planes are 120 mpa and 80 mpa both tensile in nature, together with shear stress of 20 mpa tends to rotate the block in clockwise direction. Find the magnitude and direction of resultant stress on plane making an angle of 30 degree with plane of first stress. Also find angle of obliquity and maximum shear stress **08**
- b)** A hollow rectangular section 30mm x 60mm inside dimension and 10mm thick is subjected to shear force of 40kN. Calculate ratio of maximum shear stress to average shear stress. **06**
- Q.6 a)** A beam of T section having top flange 120 mm x 20 mm and web 20 mm x 100mm simply supported over span of 5 m and carries point load of 3 kN at mid span. Determine maximum tensile and compressive stresses developed. **08**
- b)** A simply supported beam of 6meter span carries uniformly distributed load of 6kN/m over its entire span. The cross section of beam is 120 x 180 mm in size. Calculate the maximum slope at support and maximum deflection at center. Take  $E=11$  Gpa. **06**
- Q.7 a)** Define Slope and Deflection of beam. Describe concept in brief for simply supported and cantilever beam. **04**
- b)** A cantilever beam has length 4 m subjected to point load of 250N at free end. It is of hollow square section of outer size 50mm and inner size 40mm. Find maximum bending stresses. **05**
- c)** At a point in elastic material under strain, there are normal tensile stresses of 90 Mpa and 40 Mpa respectively at the right angles to each other along with a shear stress of 25 Mpa. Find graphically principal stresses and maximum shear stress. **05**

 Time: 02:00 PM To 05:00 PM

Max. Marks: 70

- Instructions:** 1) Q. No. 1 is compulsory. It should be solved in the first 30 minutes in answer book. Page no 03 (Starting page of the Answer Book). Each question carries one mark.  
 2) Don't forget to Mention question paper set (P/Q/R/S) on top of page.  
 3) Figures to the right indicates full marks.  
 4) Assume suitable data if necessary.

**MCQ/Objective Type Questions**

Duration: 30 Minutes

Marks: 14

**Q.1 A) Choose the correct alternatives from the options.**

**14**

- 1) In \_\_\_\_\_ process wastage of material is high.
  - a) Casting
  - b) Forming
  - c) Machining
  - d) Welding
- 2) In sand molding, the middle part of joining two flask is called
  - a) Coupe
  - b) Parting line
  - c) Drag
  - d) Flask-middle
- 3) Casting process is preferred for parts having \_\_\_\_\_.
  - a) A few details
  - b) Many details
  - c) No details
  - d) Non-symmetrical shape
- 4) For mounting several patterns at a time, following type of pattern is used
  - a) Combined pattern
  - b) Loose piece pattern
  - c) Sweep pattern
  - d) Match plate pattern
- 5) Draft on pattern for casting is
  - a) Shrinkage allowance
  - b) Identification number marked on it
  - c) Taper to facilitate its removal from mould
  - d) Increase in size of cavity due shaking of pattern
- 6) Which if the following materials has more shrinkage allowance
  - a) Cast iron
  - b) Brass
  - c) Lead
  - d) Aluminum alloy
- 7) Higher ramming density gives\_ to mould
  - a) Good collapsibility
  - b) Low Permeability
  - c) Low Strength
  - d) High Permeability
- 8) Which is incorrect statement about results of hot working
  - a) Annealing operation is not necessary
  - b) Power requirements are low
  - c) Surface finish is good
  - d) Grain refinement is possible

**S.Y. (B.Tech.) (Sem - I) (New) (CBCS) Examination: Oct/Nov-2022**  
**MECHANICAL ENGINEERING**  
**Manufacturing Processes**

Day &amp; Date: Friday, 17-03-2023

Max. Marks: 56

Time: 02:00 PM To 05:00 PM

- Instructions:** 1) Answer any two full questions from each Section.  
 2) Figures to the right indicate full marks.  
 3) Make suitable assumptions, if required and state them clearly.

**Section – I**

- Q.2** a) Write the basic steps in casting process. What are the advantages and limitations of sand casting? **06**  
 b) Write different stages in core making. What do you understand by core setting? **05**  
 c) Differentiate clearly between Open riser and Blind riser. **03**
- Q.3** a) Enlist different types of core boxes. Explain any two core boxes in detail. **06**  
 b) Explain advantages and limitations of shell molding process. **05**  
 c) Suggest the suitable casting technique for manufacturing of: 4 **03**  
     1) Milling machine Bed  
     2) Ingots  
     3) Carburetor body  
     4) Art castings
- Q.4** a) What is 'MMAW' process of welding? Explain its working with applications. **06**  
 b) Differentiate clearly between Brazing and Soldering. **05**  
 c) Write a note on "Resistance welding". **03**

**Section – II**

- Q.5** a) What is rapid prototyping? Explain in brief basic principle and classification of RP. **06**  
 b) Classify the advance forming processes. Explain in brief about two advance forming processes. **05**  
 c) With neat sketch explain the process of wire drawing. **03**
- Q.6** a) Explain with neat sketch direct and indirect extrusion. **06**  
 b) How to classify conventional forming process. Explain with neat sketch upset forging process. **05**  
 c) With neat sketch explain the process of tube drawing. **03**
- Q.7** a) What do you know about open die and close die forging? Explain with a neat sketch. **06**  
 b) Write a short note on types of rolling mills. **05**  
 c) Explain with nice diagram high energy rate forming process. **03**

 c) Write a note on "Resistance welding". **03**

**Section – II**

- Q.5** a) What is rapid prototyping? Explain in brief basic principle and classification of RP. **06**  
 b) Classify the advance forming processes. Explain in brief about two advance forming processes. **05**  
 c) With neat sketch explain the process of wire drawing. **03**
- Q.6** a) Explain with neat sketch direct and indirect extrusion. **06**  
 b) How to classify conventional forming process. Explain with neat sketch upset forging process. **05**  
 c) With neat sketch explain the process of tube drawing. **03**
- Q.7** a) What do you know about open die and close die forging? Explain with a neat sketch. **06**  
 b) Write a short note on types of rolling mills. **05**  
 c) Explain with nice diagram high energy rate forming process. **03**

**S.Y. (B.Tech.) (Sem - I) (New) (CBCS) Examination: Oct/Nov-2022**  
**MECHANICAL ENGINEERING**  
**Machine Drawing & CAD**

Day & Date: Monday, 20-03-2023  
 Time: 02:00 PM To 06:00 PM

Max. Marks: 70

- Instructions:** 1) Q. No. 1 is compulsory. It should be solved in the first 30 minutes in answer book. Page no 03 (Starting page of the Answer Book). Each question carries one mark.  
 2) Don't forget to Mention question paper set (P/Q/R/S) on top of page.  
 3) Figures to the right indicates full marks.

**MCQ/Objective Type Questions**

Duration: 30 Minutes

Marks: 14

**Q.1 Choose the correct alternatives from the options.**

**Type – I : Straight Objective Type / classical MCQ (Each bit one Mark each).**

**05**

- 1) Welding Produce a \_\_\_\_\_ Joint.
 

|                   |                      |
|-------------------|----------------------|
| a) Temporary      | b) Permanent         |
| c) Semi-permanent | d) None of the above |
- 2) This is the symbol for internal thread geometry.
 

|         |          |
|---------|----------|
| a) True | b) False |
|---------|----------|
- 3) Angle of buttress thread is \_\_\_\_\_ degrees.
 

|        |        |
|--------|--------|
| a) 90° | b) 50° |
| c) 45° | d) 29° |
- 4) An Oldham's coupling connects two shafts, when they are \_\_\_\_\_.
 

|                 |             |
|-----------------|-------------|
| a) Intersecting | b) Parallel |
| c) Co-axial     | d) All      |
- 5)  $\phi 78^{+0.75}$  is the example of unilateral tolerance type.
 

|            |              |
|------------|--------------|
| a) Correct | b) Incorrect |
|------------|--------------|

**Type-2 Correct or Incorrect (Attempt any two) (Each bit One Mark each).**

**02**

- 1) A hole whose lower deviation is zero is called as basic hole.
- 2) The Size of A4 sheet is  $297 \times 420$ .
- 3) The size across flats in hexagonal nut is 2D.

**Type -3 Multiple correct answer type. (Solve any two) (Each correct bit 2 mark)**

04

1) In the figure shown the value 0.5 indicates.

- |                        |                     |
|------------------------|---------------------|
| a) Machining allowance | b) Roughness value  |
| c) Sampling length     | d) Direction of lay |

2)  Represents \_\_\_\_\_ section.

- |            |             |
|------------|-------------|
| a) Full    | b) Half     |
| c) Partial | d) Revolved |

3) \_\_\_\_\_ is the example of sunk key.

- |                    |                      |
|--------------------|----------------------|
| a) Woodruff key    | b) GIB headed key    |
| c) Flat saddle key | d) Hollow saddle key |

**Type -4 Match the pairs (One marks for each correct answer)**

03

**Geometric Tolerances**

**Symbol**

- 1) Simple Run Out
- 2) Circularity
- 3) Cylindricity

- a) 
- b) 
- c) 
- d)

Marks: 14

14

- Page 1 of 12

- 9) If the bore of an engine is 83 mm and stroke is 90 mm and rotation speed is 4000 rpm, then the mean piston speed is \_\_\_\_\_.
  - a) 10 m/s
  - b) 15 m/s
  - c) 12 m/s
  - d) 14 m/s
- 10) Ignition quality of diesel depends upon \_\_\_\_\_.
  - a) flash point
  - b) octane number
  - c) cetane number
  - d) HUCR
- 11) The centrifugal type super charger is preferred at \_\_\_\_\_.
  - a) low speeds
  - b) high speeds
  - c) high pressure
  - d) all the above
- 12) Single point fuel injection in SI engines is \_\_\_\_\_.
  - a) throttle body injection
  - b) port injection
  - c) direct injection
  - d) both b) and c)
- 13) Incomplete combustion in SI engines is indicated by \_\_\_\_\_.
  - a) high percentage of carbon monoxide
  - b) high percentage of carbon dioxide
  - c) high percentage of NOx
  - d) low percentage of NOx
- 14) The thermal efficiency of large diesel engines is in the range of \_\_\_\_\_.
  - a) 10 to 20 percent
  - b) 20 to 30 percent
  - c) 35 to 50 percent
  - d) 50 to 100 percent

Set

P

**S.Y. (B.Tech.) (Sem - I) (New) (CBCS) Examination: Oct/Nov-2022**  
**MECHANICAL ENGINEERING**  
**Internal Combustion Engines**

Day &amp; Date: Tuesday, 21-03-2023

Max. Marks: 56

Time: 02:00 PM To 05:00 PM

- Instructions:** 1) Solve any two questions from each section.  
 2) Figures to the right indicate full marks.  
 3) Use university graph paper & semi-log paper if required.

**Section – I**

- Q.2** a) Why does the efficiency of the fuel air cycle differ from that of the actual cycle? **05**  
 b) What do you understand by the term carburetion? Sketch the complete carburetor including all its sub-systems. **05**  
 c) What is turbo charging? Explain the different types of supercharging. **04**
- Q.3** a) Explain requirements of fuel injection system for C I Engines. **05**  
 b) Compare 2S and 4S internal combustion engines. **05**  
 c) Explain thermodynamic cycle of supercharged engines. **04**
- Q.4** a) Derive an equation for air fuel ratio for carburetor by using approximate analysis method. **05**  
 b) Enlist types of injector nozzles used in engines and explain CRDI system with neat sketch. **05**  
 c) Explain compensating devices in carburetor. Explain any one compensating system with neat sketch. **04**

**Section – II**

- Q.5** a) Discuss the phenomenon of knock or detonation in SI engines. **05**  
 b) Explain with the help of sketch the combustion process in a CI engine. **05**  
 c) What is exhaust gas recirculation? How does it help in reducing NOx emissions? **04**
- Q.6** a) What is the importance of flame speed in combustion in SI engines? Discuss the engine variables on which flame speed depends. **05**  
 b) What do you understand by the term's octane number, cetane number and HUCR? **05**  
 c) Explain Heat Balance Sheet in detail. **04**
- Q.7** a) Explain any three factors affecting knock in CI engines. **05**  
 b) Discuss the suitability of biogas as an alternative fuel. **04**  
 c) Following particulars were obtained in a trial of 4 S single cylinder gas engine conducted for 1 hour. **05**  
 Revolution = 16000 rph                      Missed cycles = 600  
 Net brake load = 1600 N                      Brake circumference = 4 m  
 Mean effective pressure = 8 bar              Gas consumption = 22000 liter  
 Calorific value of gas = 20 KJ/Lit  
 Take,  $d = 25$  cm,  $L = 40$  cm,  $R_c = 6.5$  for the engine. Find: IP, BP, Mechanical Efficiency.

**S.Y. (B.Tech.) (Sem - I) (New) (CBCS) Examination: Oct/Nov-2022**  
**MECHANICAL ENGINEERING**  
**Internal Combustion Engines**

Day & Date: Tuesday, 21-03-2023  
 Time: 02:00 PM To 05:00 PM

Max. Marks: 70

- Instructions:** 1) Q. No. 1 is compulsory. It should be solved in the first 30 minutes in answer book. Page no 03 (Starting page of the Answer Book). Each question carries one mark.  
 2) Don't forget to Mention question paper set (P/Q/R/S) on top of page.  
 3) Figures to the right indicates full marks  
 4) Assume suitable data wherever needed and mention it clearly.

**MCQ/Objective Type Questions**

Duration: 30 Minutes

Marks: 14

**Q.1 Choose the correct alternatives from the options.**

**14**

- 1) Which of the following is not a compensation device of a carburetor?
 

|                    |                  |
|--------------------|------------------|
| a) auxiliary valve | b) emulsion tube |
| c) bypass valve    | d) choke         |
- 2) If the bore of an engine is 83 mm and stroke is 90 mm and rotation speed is 4000 rpm, then the mean piston speed is \_\_\_\_\_.
 

|           |           |
|-----------|-----------|
| a) 10 m/s | b) 15 m/s |
| c) 12 m/s | d) 14 m/s |
- 3) Ignition quality of diesel depends upon \_\_\_\_\_.
 

|                  |                  |
|------------------|------------------|
| a) flash point   | b) octane number |
| c) cetane number | d) HUCR          |
- 4) The centrifugal type super charger is preferred at \_\_\_\_\_.
 

|                  |                  |
|------------------|------------------|
| a) low speeds    | b) high speeds   |
| c) high pressure | d) all the above |
- 5) Single point fuel injection in SI engines is \_\_\_\_\_.
 

|                            |                   |
|----------------------------|-------------------|
| a) throttle body injection | b) port injection |
| c) direct injection        | d) both b) and c) |
- 6) Incomplete combustion in SI engines is indicated by \_\_\_\_\_.
 

|                                       |
|---------------------------------------|
| a) high percentage of carbon monoxide |
| b) high percentage of carbon dioxide  |
| c) high percentage of NOx             |
| d) low percentage of NOx              |
- 7) The thermal efficiency of large diesel engines is in the range of \_\_\_\_\_.
 

|                     |                      |
|---------------------|----------------------|
| a) 10 to 20 percent | b) 20 to 30 percent  |
| c) 35 to 50 percent | d) 50 to 100 percent |
- 8) The most likely range of compression ratio for modern day spark ignition engines is \_\_\_\_\_.
 

|            |             |
|------------|-------------|
| a) 5 to 8  | b) 12 to 16 |
| c) 8 to 12 | d) 16 to 22 |

- 9) Which part of the petrol engine needs to be modified if it is to be run on LPG?
  - a) Piston
  - b) Crankshaft
  - c) Valves
  - d) Carburetor
- 10) Friction power of an internal combustion engine increases with the increase in \_\_\_\_\_.
  - a) Speed
  - b) brake power
  - c) indicated power
  - d) fuel flow
- 11) The primary advantage of the pintaux nozzle is \_\_\_\_\_.
  - a) good fuel distribution
  - b) good atomization
  - c) good penetration
  - d) good cold starting performance
- 12) Octane number of alcohol is \_\_\_\_\_.
  - a) 0
  - b) 100
  - c) > 100
  - d) 50
- 13) The NO<sub>x</sub> emission in SI engines is highest when the mixture is \_\_\_\_\_.
  - a) rich
  - b) lean
  - c) stoichiometric
  - d) very rich
- 14) In SI engines with an increase in compression ratio the tendency to detonate \_\_\_\_\_.
  - a) increases
  - b) does not change
  - c) decreases
  - d) none of the above

|---|

**S.Y. (B.Tech.) (Sem - I) (New) (CBCS) Examination: Oct/Nov-2022**  
**MECHANICAL ENGINEERING**  
**Internal Combustion Engines**

Day &amp; Date: Tuesday, 21-03-2023

Max. Marks: 56

Time: 02:00 PM To 05:00 PM

- Instructions:** 1) Solve any two questions from each section.  
 2) Figures to the right indicate full marks.  
 3) Use university graph paper & semi-log paper if required.

**Section – I**

- Q.2** a) Why does the efficiency of the fuel air cycle differ from that of the actual cycle? **05**  
 b) What do you understand by the term carburetion? Sketch the complete carburetor including all its sub-systems. **05**  
 c) What is turbo charging? Explain the different types of supercharging. **04**
- Q.3** a) Explain requirements of fuel injection system for C I Engines. **05**  
 b) Compare 2S and 4S internal combustion engines. **05**  
 c) Explain thermodynamic cycle of supercharged engines. **04**
- Q.4** a) Derive an equation for air fuel ratio for carburetor by using approximate analysis method. **05**  
 b) Enlist types of injector nozzles used in engines and explain CRDI system with neat sketch. **05**  
 c) Explain compensating devices in carburetor. Explain any one compensating system with neat sketch. **04**

**Section – II**

- Q.5** a) Discuss the phenomenon of knock or detonation in SI engines. **05**  
 b) Explain with the help of sketch the combustion process in a CI engine. **05**  
 c) What is exhaust gas recirculation? How does it help in reducing NOx emissions? **04**
- Q.6** a) What is the importance of flame speed in combustion in SI engines? Discuss the engine variables on which flame speed depends. **05**  
 b) What do you understand by the term's octane number, cetane number and HUCR? **05**  
 c) Explain Heat Balance Sheet in detail. **04**
- Q.7** a) Explain any three factors affecting knock in CI engines. **05**  
 b) Discuss the suitability of biogas as an alternative fuel. **04**  
 c) Following particulars were obtained in a trial of 4 S single cylinder gas engine conducted for 1 hour. **05**  
 Revolution = 16000 rph                      Missed cycles = 600  
 Net brake load = 1600 N                      Brake circumference = 4 m  
 Mean effective pressure = 8 bar              Gas consumption = 22000 liter  
 Calorific value of gas = 20 KJ/Lit  
 Take,  $d = 25$  cm,  $L = 40$  cm,  $R_c = 6.5$  for the engine. Find: IP, BP, Mechanical Efficiency.

 Time: 02:00 PM To 05:00 PM

Max. Marks: 56

- Instructions:** 1) Solve any two questions from each section.  
 2) Figures to the right indicate full marks.  
 3) Use of non-programable calculator is allowed.  
 4) Make suitable assumptions if necessary and state it clearly.

**Section – I**

- Q.2 Answer the following question.** **14**  
 a) Classify the composite material and describe in detail all types of composite materials.  
 b) Derive the stress-strain relation for monoclinic material in plane stress condition.
- Q.3 Answer the following question.** **14**  
 a) Describe Engineering Constants of an Angle Lamina.  
 b) Explain Hooke's Law for a Two-Dimensional Unidirectional Lamina.
- Q.4 Answer the following question.**  
 a) Write short note on Plane Stress Assumption. **04**  
 b) Explain recycling fiber-reinforced composites. **05**  
 c) Explain Transversely Isotropic Material. **05**

**Section – II**

- Q.5 Answer the following question.**  
 a) Describe filament winding process for composite material manufacturing. **05**  
 b) Explain the term Pultrusion. **05**  
 c) Describe the concept of volume and mass fractions. **04**
- Q.6 Answer the following question.**  
 a) Describe in detail the semi-empirical model. **06**  
 b) A glass/epoxy lamina consists of a 70% fiber volume fraction. Use properties of glass and epoxy ( $\rho_f = 2500 \text{ kg/m}^3$ ,  $\rho_m = 1200 \text{ kg/m}^3$ ). to determine the **08**  
     1) Density of lamina  
     2) Mass fractions of the glass and epoxy  
     3) Volume of composite lamina if the mass of the lamina is 4 kg
- Q.7 Answer the following question.**  
 a) Describe the concepts of Longitudinal Young's Modulus Transverse Young's Modulus. **05**  
 b) Describe the transverse Young's Modulus and Major Poisson's Ratio. **05**  
 c) Explain the effect of Void Content on composite material. **04**

**MCQ/Objective Type Questions**

Duration: 30 Minutes

Marks: 14

**Q.1 Choose the correct alternatives from the options.**

**14**

- 1) \_\_\_\_\_ is a stack of plies of composites, each layer can be laid at various orientations and can be made up of different material systems.
 

|           |                  |
|-----------|------------------|
| a) Matrix | b) Laminate      |
| c) Layer  | d) none of these |
- 2) \_\_\_\_\_ composites contain more than one fiber or one matrix system in a laminate.
 

|           |                  |
|-----------|------------------|
| a) Hybrid | b) Laminate      |
| c) Layer  | d) none of these |
- 3) \_\_\_\_\_ composite materials consist of the smallest size of reinforced in matrix.
 

|                |                 |
|----------------|-----------------|
| a) Short fiber | b) Whisker      |
| c) Particulate | d) Monofilament |
- 4) \_\_\_\_\_ composite materials consist of layers of at least two different materials that are bonded together.
 

|                 |              |
|-----------------|--------------|
| a) Short fiber  | b) Whisker   |
| c) Monofilament | d) Laminated |
- 5) The protection of material ingredient is role of \_\_\_\_\_.
 

|                                  |                  |
|----------------------------------|------------------|
| a) matrix                        | b) reinforcement |
| c) both matrix and reinforcement | d) interphase    |
- 6) Carrying the load and supporting whole material is role of \_\_\_\_\_.
 

|                                  |                  |
|----------------------------------|------------------|
| a) matrix                        | b) reinforcement |
| c) both matrix and reinforcement | d) interphase    |
- 7) Composite material is made up of \_\_\_\_\_.
 

|                                  |                  |
|----------------------------------|------------------|
| a) matrix                        | b) reinforcement |
| c) both matrix and reinforcement | d) interphase    |
- 8) Following is the area of application of composite \_\_\_\_\_.
 

|              |                     |
|--------------|---------------------|
| a) defence   | b) marian           |
| c) aerospace | d) all of the above |

**S. Y. (B.Tech.) (Sem - I) (New) (CBCS) Examination: Oct/Nov-2022**  
**MECHANICAL ENGINEERING**  
**Composite Material**

Day & Date: Tuesday, 21-03-2023  
 Time: 02:00 PM To 05:00 PM

Max. Marks: 56

- Instructions:** 1) Solve any two questions from each section.  
 2) Figures to the right indicate full marks.  
 3) Use of non-programable calculator is allowed.  
 4) Make suitable assumptions if necessary and state it clearly.

**Section – I**

- Q.2 Answer the following question. 14**  
 a) Classify the composite material and describe in detail all types of composite materials.  
 b) Derive the stress-strain relation for monoclinic material in plane stress condition.
- Q.3 Answer the following question. 14**  
 a) Describe Engineering Constants of an Angle Lamina.  
 b) Explain Hooke's Law for a Two-Dimensional Unidirectional Lamina.
- Q.4 Answer the following question.**  
 a) Write short note on Plane Stress Assumption. **04**  
 b) Explain recycling fiber-reinforced composites. **05**  
 c) Explain Transversely Isotropic Material. **05**

**Section – II**

- Q.5 Answer the following question.**  
 a) Describe filament winding process for composite material manufacturing. **05**  
 b) Explain the term Pultrusion. **05**  
 c) Describe the concept of volume and mass fractions. **04**
- Q.6 Answer the following question.**  
 a) Describe in detail the semi-empirical model. **06**  
 b) A glass/epoxy lamina consists of a 70% fiber volume fraction. Use properties of glass and epoxy ( $\rho_f = 2500 \text{ kg/m}^3$ ,  $\rho_m = 1200 \text{ kg/m}^3$ ) to determine the **08**  
 1) Density of lamina  
 2) Mass fractions of the glass and epoxy  
 3) Volume of composite lamina if the mass of the lamina is 4 kg
- Q.7 Answer the following question.**  
 a) Describe the concepts of Longitudinal Young's Modulus Transverse Young's Modulus. **05**  
 b) Describe the transverse Young's Modulus and Major Poisson's Ratio. **05**  
 c) Explain the effect of Void Content on composite material. **04**

Day & Date: Tuesday, 21-03-2023  
 Time: 02:00 PM To 05:00 PM

Max. Marks: 70

- Instructions:** 1) Q. No. 1 is compulsory. It should be solved in the first 30 minutes in Answer book. Page no 03 (Starting page of the Answer Book). Each Question carries one mark.  
 2) Don't forget to Mention question paper set (P/Q/R/S) on top of page.  
 3) Figures to the right indicates full marks

**MCQ/Objective Type Questions**

Duration: 30 Minutes

Marks: 14

**Q.1 Choose the correct alternatives from the options.**

**14**

- 1) \_\_\_\_\_ are a ready-made tape composed of filbers in a polymer matrix.
 

|              |            |
|--------------|------------|
| a) Polyester | b) Epoxy   |
| c) Prepregs  | d) Polymer |
- 2) Winding patterns includes \_\_\_\_\_.
 

|          |                 |
|----------|-----------------|
| a) hoop  | b) helical      |
| c) polar | d) all of these |
- 3) A low viscosity resin such as polyester or epoxy resin is injected under low pressure into a closed mold that contains the fiber perform is called \_\_\_\_\_.
 

|                           |                      |
|---------------------------|----------------------|
| a) hand lay up            | b) autoclave forming |
| c) resin transfer molding | d) filament winding  |
- 4) Material has properties that are a function of the position on the body \_\_\_\_\_.
 

|                |                   |
|----------------|-------------------|
| a) orthotropic | b) isotropic      |
| c) anisotropic | d) nonhomogeneous |
- 5) \_\_\_\_\_ is a single flat layer of unidirectional fibers or woven fibers arranged in a matrix.
 

|             |           |
|-------------|-----------|
| a) Laminate | b) Layer  |
| c) Lamina   | d) Matrix |
- 6) \_\_\_\_\_ is a stack of plies of composites, each layer can be laid at various orientations and can be made up of different material systems.
 

|           |                  |
|-----------|------------------|
| a) Matrix | b) Laminate      |
| c) Layer  | d) none of these |
- 7) \_\_\_\_\_ composites contain more than one fiber or one matrix system in a laminate.
 

|           |                  |
|-----------|------------------|
| a) Hybrid | b) Laminate      |
| c) Layer  | d) none of these |
- 8) \_\_\_\_\_ composite materials consist of the smallest size of reinforced in matrix.
 

|                |                 |
|----------------|-----------------|
| a) Short fiber | b) Whisker      |
| c) Particulate | d) Monofilament |

- 9) \_\_\_\_\_ composite materials consist of layers of at least two different materials that are bonded together.
- |                 |              |
|-----------------|--------------|
| a) Short fiber  | b) Whisker   |
| c) Monofilament | d) Laminated |
- 10) The protection of material ingredient is role of \_\_\_\_\_.
- |                                  |                  |
|----------------------------------|------------------|
| a) matrix                        | b) reinforcement |
| c) both matrix and reinforcement | d) interphase    |
- 11) Carrying the load and supporting whole material is role of \_\_\_\_\_.
- |                                  |                  |
|----------------------------------|------------------|
| a) matrix                        | b) reinforcement |
| c) both matrix and reinforcement | d) interphase    |
- 12) Composite material is made up of \_\_\_\_\_.
- |                                  |                  |
|----------------------------------|------------------|
| a) matrix                        | b) reinforcement |
| c) both matrix and reinforcement | d) interphase    |
- 13) Following is the area of application of composite \_\_\_\_\_.
- |              |                     |
|--------------|---------------------|
| a) defence   | b) marian           |
| c) aerospace | d) all of the above |
- 14) \_\_\_\_\_ has high mechanical strength and good adherence to metals and glasses is property of.
- |              |            |
|--------------|------------|
| a) Polyester | b) Epoxy   |
| c) Gum       | d) Fevicol |

 2) Don't forget to mention Question Paper Set (P/Q/R/S) at the top of the same page.

**MCQ/Objective Type Questions**

Duration: 30 Minutes

Marks: 14

**Q.1 Choose the correct alternatives from the options.****14**

- 1) The solution of partial differential equation  $\sqrt{p} + \sqrt{q} = 2$  is \_\_\_\_\_.
  - a)  $z = ax + (1 - \sqrt{b})y + c$
  - b)  $z = a^2x + b^2y + c$
  - c)  $z = ax + (2 - \sqrt{a})^2y + c$
  - d)  $z = a(x + y) + c$
- 2) The solution of partial differential equation  $xp - yq = z$  is \_\_\_\_\_.
  - a)  $\phi(xy, yz) = 0$
  - b)  $\phi\left(\frac{x}{y}, \frac{y}{z}\right) = 0$
  - c)  $\phi(\log x, \log y) = 0$
  - d)  $\phi(x + y, y + z) = 0$
- 3) In solving algebraic and Transcendental equations, which of the following method is called method of tangent?
  - a) Trapezoidal rule
  - b) Newton's Raphson method
  - c) Regula Falsie method
  - d) Weddle's rule
- 4) A positive real root of the equation  $xe^x - 2 = 0$  is lies between \_\_\_\_\_.
  - a) 2 and 3
  - b) 1 and 2
  - c) 3 and 4
  - d) 0 and 1
- 5) In the cosine series of  $f(x) = \pi x - x^2$  for  $0 < x < \pi$ , the constant term is \_\_\_\_\_.
  - a)  $\frac{\pi^2}{4}$
  - b)  $\frac{\pi^2}{16}$
  - c)  $\frac{\pi^2}{6}$
  - d)  $\frac{\pi^2}{2}$
- 6) The coefficient of  $\cos(nx)$  in the Fourier series of  $f(x) = x^3$  in  $(-\pi, \pi)$  is \_\_\_\_\_.
  - a) 0
  - b)  $\frac{1}{n}$
  - c)  $\frac{4(-1)^n}{n^2}$
  - d)  $\frac{-2(-1)^n}{n}$

- 7) Gaussian Quadrature formula is used \_\_\_\_\_.  
 a) To solve partial differential equation  
 b) To solve ordinary differential equation  
 c) To find the roots of transcendental equation  
 d) To evaluate the definite integration.
- 8) For the data  $\begin{matrix} x: & 0 & 0.2 & 0.4 \\ y: & 2 & 4 & 5 \end{matrix}$   
 By Trapezoidal rule the value of integration  $\int_0^{0.4} \frac{1}{y} dx$  is \_\_\_\_\_.  
 a) 1.02  
 b) 0.12  
 c) 0.3010  
 d) 1.0012
- 9) To apply Simpson's 3/8<sup>th</sup> rule, the number of sub interval must be \_\_\_\_\_.  
 a) even  
 b) odd  
 c) multiple of 3  
 d) multiple of 4
- 10) If the Poisson distribution is such that  $P(x = 1) = P(x = 2)$  then the mean  $m$  is \_\_\_\_\_.  
 a) 1  
 b) 3  
 c) 2  
 d) 4
- 11) The area under the standard normal curve from  $z = -\infty$  to  $z = 0$  is \_\_\_\_\_.  
 a) 1  
 b) 0  
 c) 1.5  
 d) 0.5
- 12) The value of coefficient of correlation  $r$  lies between \_\_\_\_\_.  
 a) -3 and 3  
 b) -1 and 1  
 c) 1 and 2  
 d) 2 and 3
- 13) If the probability of defective bulbs is 0.02 then the mean of the distribution of defective bulb in a lot of 1000 bulbs is \_\_\_\_\_.  
 a) 160  
 b) 20  
 c) 200  
 d) 120
- 14) If the coefficient of regressions are  $b_{xy} = \frac{5}{6}$  &  $b_{yx} = \frac{8}{15}$  then the coefficient of correlation 'r' is \_\_\_\_\_.  
 a) 0.67  
 b) 1.5  
 c) 0.5  
 d) 0.4

**S.Y (B.Tech.) (Sem-II) (New) (CBCS) Examination: Oct/Nov-2022**  
**MECHANICAL ENGINEERING**  
**Engineering Mathematics - III**

Day &amp; Date: Monday, 06-03-2023

Max. Marks: 56

Time: 02:00 PM To 05:00 PM

- Instructions: 1) All questions are compulsory.  
 3) Figures to the right indicates full marks.  
 4) Use of non-programmable calculator is allowed.

**Section – I**

**Q.2 Answer any three questions.**

- a) Solve:  $y^2 zp + x^2 zq = xy^2$  03  
 b) Solve:  $p^3 + q^3 = 27z$  03  
 c) Solve:  $py = 2xy + \log q$  03  
 d) Solve:  $3x \frac{\partial z}{\partial x} - 5y \frac{\partial z}{\partial y} = 0$  by the method of separation of variables. 03

- Q.3 a)** Obtain a Fourier series of  $f(x) = x + x^2$  in the range  $-\pi < x < \pi$  06

**OR**

- a) Expand  $f(x) = e^{ax}$  as a Fourier series in interval  $(0, 2\pi)$  06  
 b) Obtain half range cosine series of  $f(x) = x$  in  $0 < x < 2$  04

**Q.4 Answer any three questions.**

- a) Evaluate  $\int_0^6 \frac{e^x}{1+x} dx$  using Simpson's 1/3<sup>rd</sup> rule. (Take  $h = 1$ ) 03  
 b) Evaluate  $\int_2^3 \frac{1}{x+1} dx$  using Gaussian three points formula. 03  
 c) Curve is drawn to pass through the points given by the following table. 03  
 $x:$  1    1.5    2    2.5    3    3.5    4  
 $y:$  2    2.4    2.7    2.8    3    2.6    2.1  
 Using Simpson's 3/8<sup>th</sup> rule, estimate the area bounded between the curve, the  $x$  – axis and the lines  $x = 1$  and  $x = 4$   
 d) Evaluate  $\int_0^1 \int_0^1 \frac{1}{1+x+y} dx dy$  using Trapezoidal rule Taking  $h = 0.5, k = 0.5$  03

**Section – II**

**Q.5 Answer any three questions.**

- a) Find a positive real root of the equation  $x - e^{-x} = 0$  correct to four places of decimal using Newton's Raphson method 03  
 b) Find a positive real root of the equation  $x^3 - 3x - 7 = 0$  is one step of Muller's method. Taking three initial approximation 2, 2.5 and 3 03  
 c) Find the value of  $k$ , if the following function is probability density function. 03  
 $f(x) = \frac{k}{1+x^2}, \quad -\infty < x < \infty$

- d) From the following results obtain the two regression equations. 03
- |                    | $y$ (yield in Kg) | $x$ (rain fall in cms) |
|--------------------|-------------------|------------------------|
| Mean $\rightarrow$ | 508.4             | 26.7                   |
| S.D $\rightarrow$  | 36.8              | 4.6                    |
- and coefficient of correlation is  $r = 0.52$

**Q.6 Attempt any three from the following.**

- a) Find a positive real root of the equation  $2x - \log_e x - 6 = 0$  correct to three decimal places by False position method 03
- b) The probability that a student in an evening college will graduate is 0.4. Determine the probability that out of 5 students (i) none (ii) one will graduate. 03
- c) If 3% of bulbs manufactured by a company are defective, assuming Poisson distribution find the probability that in a pack of 100 bulbs (i) zero bulbs (ii) two bulbs are defective. 03
- d) Using Newton's Raphson iterative formula, find the approximate value of  $\sqrt{12}$  correct to three decimal places. 03

**Q.7 Attempt any two from the following.**

- a) Obtain the Karl Pearson's coefficient of correlation between export of raw material ( $x$ ) and import of finished goods ( $y$ ) from the data. 05
- |       |    |    |    |    |    |    |    |
|-------|----|----|----|----|----|----|----|
| $x$ : | 42 | 44 | 58 | 55 | 89 | 98 | 66 |
| $y$ : | 56 | 59 | 53 | 58 | 65 | 78 | 58 |
- b) Using Newton's Raphson method, solve the system of non-linear equations  $x^2 + y - 11 = 0$ ,  $y^2 + x - 7 = 0$  starting with the initial values  $x_0 = 3.5$ ,  $y_0 = -1.5$  (Perform two iterations). 05
- c) If the mean life time and standard deviation of battery cells are 12 hrs. and 3 hrs. What percentage of batteries will have life 05
- (i) between 10 and 14 hrs.
- (ii) more than 15 hrs.
- (iii) less than 6 hrs.
- Assume the distribution to be normal.
- (Given: For S.N.V  $z$ , area from  $z = 0$  to  $z = 0.67$  is 0.2486, from  $z = 0$  to  $z = 1$  is 0.3413 and from  $z = 0$  to  $z = 2$  is 0.4772)

**Seat  
No.**

Max. Marks: 70

Marks: 14

14

- Page 5 of 16

- 8) The solution of partial differential equation  $\sqrt{p} + \sqrt{q} = 2$  is \_\_\_\_\_.  
 a)  $z = ax + (1 - \sqrt{b})y + c$   
 b)  $z = a^2x + b^2y + c$   
 c)  $z = ax + (2 - \sqrt{a})^2y + c$   
 d)  $z = a(x + y) + c$
- 9) The solution of partial differential equation  $xp - yq = z$  is \_\_\_\_\_.  
 a)  $\phi(xy, yz) = 0$   
 b)  $\phi\left(\frac{x}{y}, \frac{y}{z}\right) = 0$   
 c)  $\phi(\log x, \log y) = 0$   
 d)  $\phi(x + y, y + z) = 0$
- 10) In solving algebraic and Transcendental equations, which of the following method is called method of tangent?  
 a) Trapezoidal rule  
 b) Newton's Raphson method  
 c) Regula Falsie method  
 d) Weddle's rule
- 11) A positive real root of the equation  $xe^x - 2 = 0$  is lies between \_\_\_\_\_.  
 a) 2 and 3  
 b) 1 and 2  
 c) 3 and 4  
 d) 0 and 1
- 12) In the cosine series of  $f(x) = \pi x - x^2$  for  $0 < x < \pi$ , the constant term is \_\_\_\_\_.  
 a)  $\frac{\pi^2}{4}$   
 b)  $\frac{\pi^2}{16}$   
 c)  $\frac{\pi^2}{6}$   
 d)  $\frac{\pi^2}{2}$
- 13) The coefficient of  $\cos(nx)$  in the Fourier series of  $f(x) = x^3$  in  $(-\pi, \pi)$  is \_\_\_\_\_.  
 a) 0  
 b)  $\frac{1}{n}$   
 c)  $\frac{4(-1)^n}{n^2}$   
 d)  $\frac{-2(-1)^n}{n}$
- 14) Gaussian Quadrature formula is used \_\_\_\_\_.  
 a) To solve partial differential equation  
 b) To solve ordinary differential equation  
 c) To find the roots of transcendental equation  
 d) To evaluate the definite integration.

**Section – I**

**Q.2 Answer any three questions.**

- a) Solve:  $y^2 zp + x^2 zq = xy^2$  03  
 b) Solve:  $p^3 + q^3 = 27z$  03  
 c) Solve:  $py = 2xy + \log q$  03  
 d) Solve:  $3x \frac{\partial z}{\partial x} - 5y \frac{\partial z}{\partial y} = 0$  by the method of separation of variables. 03

**Q.3 a) Obtain a Fourier series of  $f(x) = x + x^2$  in the range  $-\pi < x < \pi$**  06

**OR**

- a) Expand  $f(x) = e^{ax}$  as a Fourier series in interval  $(0, 2\pi)$  06  
 b) Obtain half range cosine series of  $f(x) = x$  in  $0 < x < 2$  04

**Q.4 Answer any three questions.**

- a) Evaluate  $\int_0^6 \frac{e^x}{1+x} dx$  using Simpson's 1/3<sup>rd</sup> rule. (Take  $h = 1$ ) 03  
 b) Evaluate  $\int_2^3 \frac{1}{x+1} dx$  using Gaussian three points formula. 03  
 c) Curve is drawn to pass through the points given by the following table. 03  

|    |   |     |     |     |   |     |     |
|----|---|-----|-----|-----|---|-----|-----|
| x: | 1 | 1.5 | 2   | 2.5 | 3 | 3.5 | 4   |
| y: | 2 | 2.4 | 2.7 | 2.8 | 3 | 2.6 | 2.1 |

Using Simpson's 3/8<sup>th</sup> rule, estimate the area bounded between the curve, the  $x$  – axis and the lines  $x = 1$  and  $x = 4$

d) Evaluate  $\int_0^1 \int_0^1 \frac{1}{1+x+y} dx dy$  using Trapezoidal rule Taking  $h = 0.5, k = 0.5$  03

**Section – II**

**Q.5 Answer any three questions.**

- a) Find a positive real root of the equation  $x - e^{-x} = 0$  correct to four places of decimal using Newton's Raphson method 03  
 b) Find a positive real root of the equation  $x^3 - 3x - 7 = 0$  is one step of Muller's method. Taking three initial approximation 2, 2.5 and 3 03  
 c) Find the value of  $k$ , if the following function is probability density function. 03  

$$f(x) = \frac{k}{1+x^2}, \quad -\infty < x < \infty$$

- d) From the following results obtain the two regression equations. 03
- |                    |                   |                        |
|--------------------|-------------------|------------------------|
|                    | $y$ (yield in Kg) | $x$ (rain fall in cms) |
| Mean $\rightarrow$ | 508.4             | 26.7                   |
| S.D $\rightarrow$  | 36.8              | 4.6                    |
- and coefficient of correlation is  $r = 0.52$

**Q.6 Attempt any three from the following.**

- a) Find a positive real root of the equation  $2x - \log_e x - 6 = 0$  correct to three decimal places by False position method 03
- b) The probability that a student in an evening college will graduate is 0.4. Determine the probability that out of 5 students (i) none (ii) one will graduate. 03
- c) If 3% of bulbs manufactured by a company are defective, assuming Poisson distribution find the probability that in a pack of 100 bulbs (i) zero bulbs (ii) two bulbs are defective. 03
- d) Using Newton's Raphson iterative formula, find the approximate value of  $\sqrt{12}$  correct to three decimal places. 03

**Q.7 Attempt any two from the following.**

- a) Obtain the Karl Pearson's coefficient of correlation between export of raw material ( $x$ ) and import of finished goods ( $y$ ) from the data. 05
- |       |    |    |    |    |    |    |    |
|-------|----|----|----|----|----|----|----|
| $x$ : | 42 | 44 | 58 | 55 | 89 | 98 | 66 |
| $y$ : | 56 | 59 | 53 | 58 | 65 | 78 | 58 |
- b) Using Newton's Raphson method, solve the system of non-linear equations  $x^2 + y - 11 = 0$ ,  $y^2 + x - 7 = 0$  starting with the initial values  $x_0 = 3.5$ ,  $y_0 = -1.5$  (Perform two iterations). 05
- c) If the mean life time and standard deviation of battery cells are 12 hrs. and 3 hrs. What percentage of batteries will have life 05
- (i) between 10 and 14 hrs.
- (ii) more than 15 hrs.
- (iii) less than 6 hrs.
- Assume the distribution to be normal.
- (Given: For S.N.V  $z$ , area from  $z = 0$  to  $z = 0.67$  is 0.2486, from  $z = 0$  to  $z = 1$  is 0.3413 and from  $z = 0$  to  $z = 2$  is 0.4772)

 Time: 02:00 PM To 05:00 PM

Max. Marks: 56

**Instructions:** - 1) Attempt any Two Questions from section I and II.  
 2) Draw neat sketches.  
 3) Make suitable assumptions if required.

**Section – I**

- Q.2**
- a) Draw a neat sketch of centre lathe and explain its parts. **05**
  - b) List the different accessories used in lathe machine. Explain Three jaw chuck. **05**
  - c) A 40 mm dia. and 80 mm length M.S. round bar is to be taper turned over entire length to the dia. of 30 mm. Calculate set over distance and taper angle. **04**
- Q.3**
- a) Explain the construction and working of Radial drilling machine with neat sketch. **05**
  - b) Explain construction and working of vertical boring machine with neat sketch. **05**
  - c) Classify broaching machine and explain with neat sketch pull type broach. **04**
- Q.4**
- a) Explain with neat sketch construction and working of Shaping machine. **05**
  - b) Explain operations carried out on shaper machine. **05**
  - c) Explain Slotting machine. **04**

**Section – II**

- Q.5**
- a) Explain with neat sketch column and knee type milling machine. **05**
  - b) Index work piece for 73 divisions on milling machine using dividing head by differential indexing method, Data given: Indexing plate:  
 Plate 1: --- 15, 16, 17, 18, 19, 20  
 Plate 2: --- 21, 23, 27, 29, 31, 33  
 Plate 3: --- 37, 39, 41, 43, 47, 49  
 Change Gears with teeth number 24, 24, 28, 32, 40, 44, 48, 56, 64, 72, 86 and 100 (one gear each) **05**
  - c) Gear rolling and Gear shaving **04**
- Q.6**
- a) Explain with neat sketch cylindrical grinding machine. **05**
  - b) What do you understand from grain, grit, structure and grade of grinding wheel? Explain. **05**
  - c) Explain Lapping process. **04**
- Q.7**
- a) Explain with neat sketches construction working, principle of EDM machine **05**
  - b) Explain with neat sketches construction working, principle of AWJM machine. **05**
  - c) Explain Difference between conventional and Non-conventional machining process. **04**

**Seat

- 10) In the Lathe machine long, Hollow shaft is supported by \_\_\_\_\_.
  - a) Lathe Dogs
  - b) Lathe Centres
  - c) Steady Rest
  - d) Lathe Mandrels
- 11) Table contains \_\_\_\_\_ slots.
  - a) L-slots
  - b) T-Slots
  - c) H-Slots
  - d) All of these
- 12) The cylindrical work pieces are held in the drilling machine to carry the operations in \_\_\_\_\_.
  - a) C-clamp
  - b) Machine Vice
  - c) V block
  - d) T-bolt
- 13) The job reciprocates in \_\_\_\_\_.
  - a) Shaping machine
  - b) Planing machine
  - c) Slotting machine
  - d) All of the above
- 14) Internal keyway in gears can be cut in \_\_\_\_\_.
  - a) Shaping machine
  - b) Planning machine
  - c) Slotting machine
  - d) None of the above

|            | <b>c)</b> A 40 mm dia. and 80 mm length M.S. round bar is to be taper turned over entire length to the dia. of 30 mm. Calculate set over distance and taper angle. | <b>04</b> |
| <b>Q.3</b> | <b>a)</b> Explain the construction and working of Radial drilling machine with neat sketch.                                                                        | <b>05</b> |
|            | <b>b)</b> Explain construction and working of vertical boring machine with neat sketch.                                                                            | <b>05</b> |
|            | <b>c)</b> Classify broaching machine and explain with neat sketch pull type broach.                                                                                | <b>04</b> |
| <b>Q.4</b> | <b>a)</b> Explain with neat sketch construction and working of Shaping machine.                                                                                    | <b>05</b> |
|            | <b>b)</b> Explain operations carried out on shaper machine.                                                                                                        | <b>05</b> |
|            | <b>c)</b> Explain Slotting machine.                                                                                                                                | <b>04</b> |

**Section – II**

- |            |                                                                                                                                                                                                                                                                                                                                                                           |           |
|------------|---------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|-----------|
| <b>Q.5</b> | <b>a)</b> Explain with neat sketch column and knee type milling machine.                                                                                                                                                                                                                                                                                                  | <b>05</b> |
|            | <b>b)</b> Index work piece for 73 divisions on milling machine using dividing head by differential indexing method, Data given: Indexing plate:<br>Plate 1: --- 15, 16, 17, 18, 19, 20<br>Plate 2: --- 21, 23, 27, 29, 31, 33<br>Plate 3: --- 37, 39, 41, 43, 47, 49<br>Change Gears with teeth number 24, 24, 28, 32, 40, 44, 48, 56, 64, 72, 86 and 100 (one gear each) | <b>05</b> |
|            | <b>c)</b> Gear rolling and Gear shaving                                                                                                                                                                                                                                                                                                                                   | <b>04</b> |
| <b>Q.6</b> | <b>a)</b> Explain with neat sketch cylindrical grinding machine.                                                                                                                                                                                                                                                                                                          | <b>05</b> |
|            | <b>b)</b> What do you understand from grain, grit, structure and grade of grinding wheel? Explain.                                                                                                                                                                                                                                                                        | <b>05</b> |
|            | <b>c)</b> Explain Lapping process.                                                                                                                                                                                                                                                                                                                                        | <b>04</b> |
| <b>Q.7</b> | <b>a)</b> Explain with neat sketches construction working, principle of EDM machine                                                                                                                                                                                                                                                                                       | <b>05</b> |
|            | <b>b)</b> Explain with neat sketches construction working, principle of AWJM machine.                                                                                                                                                                                                                                                                                     | <b>05</b> |
|            | <b>c)</b> Explain Difference between conventional and Non-conventional machining process.                                                                                                                                                                                                                                                                                 | <b>04</b> |

**S.Y. (B.Tech.) (Sem - II) (New) (CBCS) Examination: Oct/Nov-2022**  
**MECHANICAL ENGINEERING**  
**Manufacturing Technology**

Day & Date: Wednesday, 08-03-2023  
 Time: 02:00 PM To 05:00 PM

Max. Marks: 70

- Instructions:** 1) Q. No. 1 is compulsory. It should be solved in the first 30 minutes in answer book. Page no 03 (Starting page of the Answer Book). Each question carries one mark.  
 2) Don't forget to Mention question paper set (P/Q/R/S) on top of page.  
 3) Figures to the right indicates full marks.  
 4) Assume suitable data wherever needed and mention it clearly.

**MCQ/Objective Type Questions**

Duration: 30 Minutes

Marks: 14

**Q.1 Choose the correct alternatives from the options.**

**14**

- 1) The grinding of flat surfaces can be accomplished in \_\_\_\_\_.  
 a) Cylindrical grinding M/C                      b) Centre less grinding M/C  
 c) Surface grinding M/C                          d) Hand grinder
- 2) Grinding is the process of removing material by a \_\_\_\_\_ action.  
 a) Rubbing                                              b) Cutting  
 c) Polishing                                            d) Wearing
- 3) What is the material removal mechanism in electrochemical machining?  
 a) Electrolysis                                        b) Indentation  
 c) Melting and vaporization                    d) Electro deposition
- 4) In Electro Discharge Machining (EDM) the tool is made of \_\_\_\_\_.  
 a) Copper                                              b) H.S.S.  
 c) Cast Iron                                            d) Tool Steel
- 5) The following part of Lathe serves as housing for the driving pulleys and back gears \_\_\_\_\_.  
 a) Head stock                                        b) Tail stock  
 c) Bed                                                    d) Carriage
- 6) Tapping operation can perform in \_\_\_\_\_.  
 a) Lathe machine                                    b) Slotting machine  
 c) Grinding machine                                d) Drilling machine
- 7) In the Lathe machine long, Hollow shaft is supported by \_\_\_\_\_.  
 a) Lathe Dogs                                        b) Lathe Centres  
 c) Steady Rest                                        d) Lathe Mandrels
- 8) Table contains \_\_\_\_\_ slots.  
 a) L-slots                                                b) T-Slots  
 c) H-Slots                                               d) All of these
- 9) The cylindrical work pieces are held in the drilling machine to carry the operations in \_\_\_\_\_.  
 a) C-clamp                                              b) Machine Vice  
 c) V block                                               d) T-bolt

- 10)** The job reciprocates in \_\_\_\_\_.  
a) Shaping machine                      b) Planing machine  
c) Slotting machine                      d) All of the above
- 11)** Internal keyway in gears can be cut in \_\_\_\_\_.  
a) Shaping machine                      b) Planning machine  
c) Slotting machine                      d) None of the above
- 12)** The chips are minimum at the initial and maximum when cut terminates in \_\_\_\_\_.  
a) Down Milling                              b) Form Milling  
c) Side Milling                                d) Conventional Milling
- 13)** In simple indexing method, one complete rotation of spindle makes rotation of index crank \_\_\_\_\_.  
a) 24                                              b) 40  
c) 20                                              d) 30
- 14)** The gear shaving is the process of \_\_\_\_\_.  
a) Gear generation                        b) Gear finishing  
c) Gear forging                              d) Gear casting

**S.Y. (B.Tech.) (Sem - II) (New) (CBCS) Examination: Oct/Nov-2022**  
**MECHANICAL ENGINEERING**  
**Manufacturing Technology**

Day & Date: Wednesday, 08-03-2023  
 Time: 02:00 PM To 05:00 PM

Max. Marks: 56

**Instructions:** - 1) Attempt any Two Questions from section I and II.  
 2) Draw neat sketches.  
 3) Make suitable assumptions if required.

**Section – I**

- |            |                                                                                                                                                                    |           |
|------------|--------------------------------------------------------------------------------------------------------------------------------------------------------------------|-----------|
| <b>Q.2</b> | <b>a)</b> Draw a neat sketch of centre lathe and explain its parts.                                                                                                | <b>05</b> |
|            | <b>b)</b> List the different accessories used in lathe machine. Explain Three jaw chuck.                                                                           | <b>05</b> |
|            | <b>c)</b> A 40 mm dia. and 80 mm length M.S. round bar is to be taper turned over entire length to the dia. of 30 mm. Calculate set over distance and taper angle. | <b>04</b> |
| <b>Q.3</b> | <b>a)</b> Explain the construction and working of Radial drilling machine with neat sketch.                                                                        | <b>05</b> |
|            | <b>b)</b> Explain construction and working of vertical boring machine with neat sketch.                                                                            | <b>05</b> |
|            | <b>c)</b> Classify broaching machine and explain with neat sketch pull type broach.                                                                                | <b>04</b> |
| <b>Q.4</b> | <b>a)</b> Explain with neat sketch construction and working of Shaping machine.                                                                                    | <b>05</b> |
|            | <b>b)</b> Explain operations carried out on shaper machine.                                                                                                        | <b>05</b> |
|            | <b>c)</b> Explain Slotting machine.                                                                                                                                | <b>04</b> |

**Section – II**

- |            |                                                                                                                                                                                                                                                                                                                                                                           |           |
|------------|---------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|-----------|
| <b>Q.5</b> | <b>a)</b> Explain with neat sketch column and knee type milling machine.                                                                                                                                                                                                                                                                                                  | <b>05</b> |
|            | <b>b)</b> Index work piece for 73 divisions on milling machine using dividing head by differential indexing method, Data given: Indexing plate:<br>Plate 1: --- 15, 16, 17, 18, 19, 20<br>Plate 2: --- 21, 23, 27, 29, 31, 33<br>Plate 3: --- 37, 39, 41, 43, 47, 49<br>Change Gears with teeth number 24, 24, 28, 32, 40, 44, 48, 56, 64, 72, 86 and 100 (one gear each) | <b>05</b> |
|            | <b>c)</b> Gear rolling and Gear shaving                                                                                                                                                                                                                                                                                                                                   | <b>04</b> |
| <b>Q.6</b> | <b>a)</b> Explain with neat sketch cylindrical grinding machine.                                                                                                                                                                                                                                                                                                          | <b>05</b> |
|            | <b>b)</b> What do you understand from grain, grit, structure and grade of grinding wheel? Explain.                                                                                                                                                                                                                                                                        | <b>05</b> |
|            | <b>c)</b> Explain Lapping process.                                                                                                                                                                                                                                                                                                                                        | <b>04</b> |
| <b>Q.7</b> | <b>a)</b> Explain with neat sketches construction working, principle of EDM machine                                                                                                                                                                                                                                                                                       | <b>05</b> |
|            | <b>b)</b> Explain with neat sketches construction working, principle of AWJM machine.                                                                                                                                                                                                                                                                                     | <b>05</b> |
|            | <b>c)</b> Explain Difference between conventional and Non-conventional machining process.                                                                                                                                                                                                                                                                                 | <b>04</b> |

Day & Date: Wednesday, 08-03-2023  
Time: 02:00 PM To 05:00 PM

**Instructions:** 1) Q. No. 1 is compulsory. It should be solved in the first 30 minutes in answer book. Page no 03 (Starting page of the Answer Book). Each question carries one mark.  
2) Don't forget to Mention question paper set (P/Q/R/S) on top of page.  
3) Figures to the right indicates full marks.  
4) Assume suitable data wherever needed and mention it clearly.

Marks: 14

14

- Page 10 of 12

- 10)** The following part of Lathe serves as housing for the driving pulleys and back gears \_\_\_\_\_.  
a) Head stock                      b) Tail stock  
c) Bed                                d) Carriage
- 11)** Tapping operation can perform in \_\_\_\_\_.  
a) Lathe machine                  b) Slotting machine  
c) Grinding machine              d) Drilling machine
- 12)** In the Lathe machine long, Hollow shaft is supported by \_\_\_\_\_.  
a) Lathe Dogs                      b) Lathe Centres  
c) Steady Rest                      d) Lathe Mandrels
- 13)** Table contains \_\_\_\_\_ slots.  
a) L-slots                              b) T-Slots  
c) H-Slots                             d) All of these
- 14)** The cylindrical work pieces are held in the drilling machine to carry the operations in \_\_\_\_\_.  
a) C-clamp                            b) Machine Vice  
c) V block                             d) T-bolt

**S.Y. (B.Tech.) (Sem - II) (New) (CBCS) Examination: Oct/Nov-2022**  
**MECHANICAL ENGINEERING**  
**Manufacturing Technology**

Day & Date: Wednesday, 08-03-2023  
 Time: 02:00 PM To 05:00 PM

Max. Marks: 56

**Instructions:** - 1) Attempt any Two Questions from section I and II.  
 2) Draw neat sketches.  
 3) Make suitable assumptions if required.

**Section – I**

- Q.2**
- a) Draw a neat sketch of centre lathe and explain its parts. **05**
  - b) List the different accessories used in lathe machine. Explain Three jaw chuck. **05**
  - c) A 40 mm dia. and 80 mm length M.S. round bar is to be taper turned over entire length to the dia. of 30 mm. Calculate set over distance and taper angle. **04**
- Q.3**
- a) Explain the construction and working of Radial drilling machine with neat sketch. **05**
  - b) Explain construction and working of vertical boring machine with neat sketch. **05**
  - c) Classify broaching machine and explain with neat sketch pull type broach. **04**
- Q.4**
- a) Explain with neat sketch construction and working of Shaping machine. **05**
  - b) Explain operations carried out on shaper machine. **05**
  - c) Explain Slotting machine. **04**

**Section – II**

- Q.5**
- a) Explain with neat sketch column and knee type milling machine. **05**
  - b) Index work piece for 73 divisions on milling machine using dividing head by differential indexing method, Data given: Indexing plate:  
 Plate 1: --- 15, 16, 17, 18, 19, 20  
 Plate 2: --- 21, 23, 27, 29, 31, 33  
 Plate 3: --- 37, 39, 41, 43, 47, 49  
 Change Gears with teeth number 24, 24, 28, 32, 40, 44, 48, 56, 64, 72, 86 and 100 (one gear each) **05**
  - c) Gear rolling and Gear shaving **04**
- Q.6**
- a) Explain with neat sketch cylindrical grinding machine. **05**
  - b) What do you understand from grain, grit, structure and grade of grinding wheel? Explain. **05**
  - c) Explain Lapping process. **04**
- Q.7**
- a) Explain with neat sketches construction working, principle of EDM machine **05**
  - b) Explain with neat sketches construction working, principle of AWJM machine. **05**
  - c) Explain Difference between conventional and Non-conventional machining process. **04**

**S.Y (B. Tech) (Sem-II) (New) (CBCS) Examination: Oct/Nov-2022**  
**MECHANICAL ENGINEERING**  
**Fluid Mechanics & Fluid Machines**

Day & Date: Thursday, 09-03-2023  
 Time: 02:00 PM To 05:00 PM

Max. Marks: 70

- Instructions:** 1) Q. No. 1 is compulsory. It should be solved in the first 30 minutes in answer book. Page no 03 (Starting page of the Answer Book). Each question carries one mark.  
 2) Don't forget to Mention question paper set (P/Q/R/S) on top of page.  
 3) Figures to the right indicates full marks

**MCQ/Objective Type Questions**

Duration: 30 Minutes

Marks: 14

**Q.1 Choose the correct alternatives from the options.**

**14**

- 1) The center of pressure acting on a vertically plane surface immersed in a liquid will be \_\_\_\_\_.  
 a) at the center of gravity      b) above the center of gravity  
 c) below the center of gravity      d) at the lowest level
- 2) Discharge of a centrifugal pump is \_\_\_\_\_.  
 a) Directly proportional to N      b) Inversely proportional to N  
 c) Directly proportional to N<sup>2</sup>      d) Inversely proportional to N<sup>2</sup>
- 3) The center of pressure and center of gravity are coincide when \_\_\_\_\_.  
 a) vertical surface immersed in the liquid  
 b) horizontal surface immersed in the liquid  
 c) inclined surface immersed in the liquid  
 d) curved surface immersed in the liquid
- 4) Buoyancy acts on a floating body \_\_\_\_\_.  
 a) vertically upward  
 b) horizontally  
 c) vertically downward  
 d) both vertically upward and horizontally
- 5) The centre of buoyancy of a submerged body \_\_\_\_\_.  
 a) coincides with the centre of gravity of the body  
 b) coincides with the centroid of the displaced volume of the fluid  
 c) is always below the centre of gravity of the body  
 d) is always above the centroid of the displaced volume of liquid
- 6) The flow field represented by the velocity vector  
 $V = axi + by^2 + cz t^2 k$   
 where a, b and c are constants, is  
 a) three-dimensional and unsteady  
 b) three-dimensional and steady  
 c) two-dimensional and steady  
 d) two-dimensional and unsteady

**S.Y (B. Tech) (Sem-II) (New) (CBCS) Examination: Oct/Nov-2022**  
**MECHANICAL ENGINEERING**  
**Fluid Mechanics & Fluid Machines**

Day & Date: Thursday, 09-03-2023  
 Time: 02:00 PM To 05:00 PM

Max. Marks: 56

**Instructions:** 1) Out of remaining question, attempt any two question from each section.  
 2) Assume suitable data if required.  
 3) Use of scientific calculator is allowed.

**Section – I**

**Q.2 Solve.**

- a) With neat sketch explain the conditions of the equilibrium for floating body. **04**
- b) Derive an expression for total pressure and centre of pressure on an inclined plane immersed in a liquid. **05**
- c) A rectangular plane surface 2 m wide and 3 m deep lies in water in such a way that its plane makes an angle of 30° with the free surface of water. Determine the total pressure and position of centre of pressure when the upper edge is 1.5 m below the free water surface. **05**

**Q.3 Solve.**

- a) What are different types of fluid flow? Explain with an example. **04**
- b) What is venturimeter? Derive an expression for the discharge through venturimeter. **05**
- c) The velocity vector in a fluid flow is given **05**  
 $V = 4x^3i - 10x^2yj + 2tk$   
 Find the velocity and acceleration of a fluid particle at (2, 1, 3) at time  $t = 1$

**Q.4 Solve.**

- a) Define the following terms: **04**
  - 1) Stream line
  - 2) Path line
  - 3) Streak line
  - 4) Laminar flow
- b) Derive Darcy-Weisbach equation for finding loss of head due to friction in pipes. **05**
- c) Derive a condition for maximum transmission power through a pipeline. **05**  
 What is efficiency under such conditions?

## Section – II

## Q.5 Solve.

- a) Explain the different losses that occur in the pipe line connection, with formulae. 04
- b) The difference in water surface levels in two tanks, which are connected by three pipes in series of lengths 300 m, 170 m and 210 m and of diameters 300 mm, 200 mm and 400 mm respectively, is 12 m. Determine the rate of flow of water if co-efficient of friction are .005, .0052 and .0048 respectively by considering: minor losses. 05
- c) The resisting force R of supersonic plane during the flight can be considered as dependent upon the length of aeroplane (l), velocity (v), dynamic viscosity ( $\mu$ ), air density ( $\rho$ ), bulk modulus (K). Express the functional relationship of these variables and the resisting force using Buckingham's  $\pi$ -theorem. 05

## Q.6 Solve:

- a) A Pelton wheel is to be designed for a head of 60 m when running at 200 r.p.m. The Pelton wheel develops 95.6475 kW shaft power. The velocity of the buckets = 0.45 times the velocity of the jet, overall efficiency = 0.85 and co-efficient of the velocity is equal to 0.98. 05
- b) A reaction turbine works at 450 r.p.m. under a head of 120 metres. Its diameter at inlet is 120 cm and the flow area is 0.4 m<sup>2</sup>. The angles made by absolute and relative velocities at inlet are 20° and 60° respectively with the tangential velocity. Determine:  
 1) The volume flow rate,  
 2) The power developed, and  
 3) Hydraulic efficiency.  
 Assume whirl at outlet to be zero. 05
- c) Explain governing of Pelton wheel. 04

## Q.7 Solve:

- a) What is Cavitation? What are its effects on Centrifugal Pumps? What precautions are to be taken against cavitation? 04
- b) A Kaplan turbine working under a head of 20 m develops 11772 kW shaft power. The outer diameter of the runner is 3.5 m and hub diameter is 1.75 m. The guide blade angle at the extreme edge of the runner is 35°. The hydraulic and overall efficiencies of the turbines are 88% and 84% respectively. If the velocity of whirl is zero at outlet, determine:  
 1) Runner vane angles at inlet and outlet at the extreme edge of the runner, and  
 2) Speed of the turbine 05
- c) A centrifugal pump having outer diameter equal to two times the inner diameter and running at 1000 r.p.m. works against a total head of 40 m. The velocity of flow through the impeller is constant and equal to 2.5 m/s. The vanes are set back at an angle of 40° at outlet. If the outer diameter of the impeller is 500 mm and width at outlet is 50 mm, determine:  
 1) Vane angle at inlet  
 2) Work done by impeller on water per second, and  
 3) Manometric efficiency 05

**Seat  
No.**

 3) Figures to the right indicates full marks

**MCQ/Objective Type Questions**

Duration: 30 Minutes

Marks: 14

**Q.1 Choose the correct alternatives from the options.**

**14**

- 1) Gross head is the difference between \_\_\_\_\_.  
 a) head race and tail race                      b) head race and net head  
 c) head race and friction losses              d) net head and friction losses
- 2) The blade speed ratio of impulse turbine is given as \_\_\_\_\_.  
 a) (Steam velocity at inlet) / (Blade velocity)  
 b) (Blade velocity) / (Steam velocity at exit)  
 c) (Blade velocity) / (Steam velocity at inlet)  
 d) (Steam velocity at exit) / (Blade velocity)
- 3) Pelton turbine is \_\_\_\_\_.  
 a) Tangential flow                                      b) Radial flow  
 c) Axial flow                                              d) Mixed flow
- 4) In a centrifugal pump, the liquid enters the pump \_\_\_\_\_.  
 a) At the centre                                              b) At the bottom  
 c) At the top                                                  d) From sides
- 5) The center of pressure acting on a vertically plane surface immersed in a liquid will be \_\_\_\_\_.  
 a) at the center of gravity                      b) above the center of gravity  
 c) below the center of gravity              d) at the lowest level
- 6) Discharge of a centrifugal pump is \_\_\_\_\_.  
 a) Directly proportional to N              b) Inversely proportional to N  
 c) Directly proportional to  $N^2$               d) Inversely proportional to  $N^2$
- 7) The center of pressure and center of gravity are coincide when \_\_\_\_\_.  
 a) vertical surface immersed in the liquid  
 b) horizontal surface immersed in the liquid  
 c) inclined surface immersed in the liquid  
 d) curved surface immersed in the liquid
- 8) Buoyancy acts on a floating body \_\_\_\_\_.  
 a) vertically upward  
 b) horizontally  
 c) vertically downward  
 d) both vertically upward and horizontally

- 9) The centre of buoyancy of a submerged body \_\_\_\_\_.  
 a) coincides with the centre of gravity of the body  
 b) coincides with the centroid of the displaced volume of the fluid  
 c) is always below the centre of gravity of the body  
 d) is always above the centroid of the displaced volume of liquid
- 10) The flow field represented by the velocity vector  
 $V = axi + by^2 + cz t^2 k$   
 where a, b and c are constants, is  
 a) three-dimensional and unsteady  
 b) three-dimensional and steady  
 c) two-dimensional and steady  
 d) two-dimensional and unsteady
- 11) Venturi meter is advantageous because \_\_\_\_\_.  
 a) it has much smaller head loss  
 b) its accuracy is quite good  
 c) its coefficient of discharge is more than for an orifice meter  
 d) all the above
- 12) According to Darcy's formula, the loss of head due to friction in the pipe is  
 where  $f$  = coefficient of friction  
 $l$  = length of pipe  
 $V$  = average velocity of liquid in pipe, and  
 $d$  = diameter of pipe  
 a)  $4flV^2 / 2gd$   
 b)  $flV^2 / 2gd$   
 c)  $4flV / 2gd$   
 d)  $4flV^2 / gd$
- 13) For laminar flow in circular pipes, the Darcy's friction factor  $f'$  is equal to  
 where  $Re$  is Reynold's, number \_\_\_\_\_.  
 a)  $16/Re$   
 b)  $32/Re$   
 c)  $64/Re$   
 d) None of the above
- 14) The Buckingham-Pi theorem is widely used in the dimensional analysis  
 and expresses the resulting equation in terms of \_\_\_\_\_.  
 a) the dependent and independent variables  
 b)  $n$  dimensionless parameters  
 c)  $(n - m)$  dimensionless parameters  
 d) geometric, kinematic and dynamic variables

**S.Y (B. Tech) (Sem-II) (New) (CBCS) Examination: Oct/Nov-2022**  
**MECHANICAL ENGINEERING**  
**Fluid Mechanics & Fluid Machines**

Day & Date: Thursday, 09-03-2023  
 Time: 02:00 PM To 05:00 PM

Max. Marks: 56

**Instructions:** 1) Out of remaining question, attempt any two question from each section.  
 2) Assume suitable data if required.  
 3) Use of scientific calculator is allowed.

**Section – I**

**Q.2 Solve.**

- a) With neat sketch explain the conditions of the equilibrium for floating body. **04**
- b) Derive an expression for total pressure and centre of pressure on an inclined plane immersed in a liquid. **05**
- c) A rectangular plane surface 2 m wide and 3 m deep lies in water in such a way that its plane makes an angle of 30° with the free surface of water. Determine the total pressure and position of centre of pressure when the upper edge is 1.5 m below the free water surface. **05**

**Q.3 Solve.**

- a) What are different types of fluid flow? Explain with an example. **04**
- b) What is venturimeter? Derive an expression for the discharge through venturimeter. **05**
- c) The velocity vector in a fluid flow is given **05**  
 $V = 4x^3i - 10x^2yj + 2tk$   
 Find the velocity and acceleration of a fluid particle at (2, 1, 3) at time  $t = 1$

**Q.4 Solve.**

- a) Define the following terms: **04**
  - 1) Stream line
  - 2) Path line
  - 3) Streak line
  - 4) Laminar flow
- b) Derive Darcy-Weisbach equation for finding loss of head due to friction in pipes. **05**
- c) Derive a condition for maximum transmission power through a pipeline. **05**  
 What is efficiency under such conditions?

## Section – II

## Q.5 Solve.

- a) Explain the different losses that occur in the pipe line connection, with formulae. 04
- b) The difference in water surface levels in two tanks, which are connected by three pipes in series of lengths 300 m, 170 m and 210 m and of diameters 300 mm, 200 mm and 400 mm respectively, is 12 m. Determine the rate of flow of water if co-efficient of friction are .005, .0052 and .0048 respectively by considering: minor losses. 05
- c) The resisting force R of supersonic plane during the flight can be considered as dependent upon the length of aeroplane (l), velocity (v), dynamic viscosity ( $\mu$ ), air density ( $\rho$ ), bulk modulus (K). Express the functional relationship of these variables and the resisting force using Buckingham's  $\pi$ -theorem. 05

## Q.6 Solve:

- a) A Pelton wheel is to be designed for a head of 60 m when running at 200 r.p.m. The Pelton wheel develops 95.6475 kW shaft power. The velocity of the buckets = 0.45 times the velocity of the jet, overall efficiency = 0.85 and co-efficient of the velocity is equal to 0.98. 05
- b) A reaction turbine works at 450 r.p.m. under a head of 120 metres. Its diameter at inlet is 120 cm and the flow area is 0.4 m<sup>2</sup>. The angles made by absolute and relative velocities at inlet are 20° and 60° respectively with the tangential velocity. Determine:  
 1) The volume flow rate,  
 2) The power developed, and  
 3) Hydraulic efficiency.  
 Assume whirl at outlet to be zero. 05
- c) Explain governing of Pelton wheel. 04

## Q.7 Solve:

- a) What is Cavitation? What are its effects on Centrifugal Pumps? What precautions are to be taken against cavitation? 04
- b) A Kaplan turbine working under a head of 20 m develops 11772 kW shaft power. The outer diameter of the runner is 3.5 m and hub diameter is 1.75 m. The guide blade angle at the extreme edge of the runner is 35°. The hydraulic and overall efficiencies of the turbines are 88% and 84% respectively. If the velocity of whirl is zero at outlet, determine:  
 1) Runner vane angles at inlet and outlet at the extreme edge of the runner, and  
 2) Speed of the turbine 05
- c) A centrifugal pump having outer diameter equal to two times the inner diameter and running at 1000 r.p.m. works against a total head of 40 m. The velocity of flow through the impeller is constant and equal to 2.5 m/s. The vanes are set back at an angle of 40° at outlet. If the outer diameter of the impeller is 500 mm and width at outlet is 50 mm, determine:  
 1) Vane angle at inlet  
 2) Work done by impeller on water per second, and  
 3) Manometric efficiency 05

**MCQ/Objective Type Questions**

Duration: 30 Minutes

Marks: 14

**Q.1 Choose the correct alternatives from the options.**

**14**

- 1) The flow field represented by the velocity vector  
 $V = axi + by^2 + czt^2k$   
 where a, b and c are constants, is  
 a) three-dimensional and unsteady  
 b) three-dimensional and steady  
 c) two-dimensional and steady  
 d) two-dimensional and unsteady
- 2) Venturi meter is advantageous because \_\_\_\_\_.  
 a) it has much smaller head loss  
 b) its accuracy is quite good  
 c) its coefficient of discharge is more than for an orifice meter  
 d) all the above
- 3) According to Darcy's formula, the loss of head due to friction in the pipe is  
 where  $f$  = coefficient of friction  
 $l$  = length of pipe  
 $V$  = average velocity of liquid in pipe, and  
 $d$  = diameter of pipe  
 a)  $4flV^2 / 2gd$   
 b)  $flV^2 / 2gd$   
 c)  $4fVl / 2gd$   
 d)  $4flV^2 / gd$
- 4) For laminar flow in circular pipes, the Darcy's friction factor  $f'$  is equal to  
 where  $Re$  is Reynold's, number \_\_\_\_\_.  
 a)  $16/Re$   
 b)  $32/Re$   
 c)  $64/Re$   
 d) None of the above
- 5) The Buckingham-Pi theorem is widely used in the dimensional analysis and expresses the resulting equation in terms of \_\_\_\_\_.  
 a) the dependent and independent variables  
 b)  $n$  dimensionless parameters  
 c)  $(n - m)$  dimensionless parameters  
 d) geometric, kinematic and dynamic variables

- 6) Gross head is the difference between \_\_\_\_\_.  
a) head race and tail race      b) head race and net head  
c) head race and friction losses      d) net head and friction losses
- 7) The blade speed ratio of impulse turbine is given as \_\_\_\_\_.  
a) (Steam velocity at inlet) / (Blade velocity)  
b) (Blade velocity) / (Steam velocity at exit)  
c) (Blade velocity) / (Steam velocity at inlet)  
d) (Steam velocity at exit) / (Blade velocity)
- 8) Pelton turbine is \_\_\_\_\_.  
a) Tangential flow      b) Radial flow  
c) Axial flow      d) Mixed flow
- 9) In a centrifugal pump, the liquid enters the pump \_\_\_\_\_.  
a) At the centre      b) At the bottom  
c) At the top      d) From sides
- 10) The center of pressure acting on a vertically plane surface immersed in a liquid will be \_\_\_\_\_.  
a) at the center of gravity      b) above the center of gravity  
c) below the center of gravity      d) at the lowest level
- 11) Discharge of a centrifugal pump is \_\_\_\_\_.  
a) Directly proportional to  $N$       b) Inversely proportional to  $N$   
c) Directly proportional to  $N^2$       d) Inversely proportional to  $N^2$
- 12) The center of pressure and center of gravity are coincide when \_\_\_\_\_.  
a) vertical surface immersed in the liquid  
b) horizontal surface immersed in the liquid  
c) inclined surface immersed in the liquid  
d) curved surface immersed in the liquid
- 13) Buoyancy acts on a floating body \_\_\_\_\_.  
a) vertically upward  
b) horizontally  
c) vertically downward  
d) both vertically upward and horizontally
- 14) The centre of buoyancy of a submerged body \_\_\_\_\_.  
a) coincides with the centre of gravity of the body  
b) coincides with the centroid of the displaced volume of the fluid  
c) is always below the centre of gravity of the body  
d) is always above the centroid of the displaced volume of liquid

**MCQ/Objective Type Questions**

Duration: 30 Minutes

Marks: 14

**Q.1 Choose the correct alternatives from the options.**

**14**

- 1) The motion of a piston in the cylinder of a steam engine is an example of \_\_\_\_\_.  
 a) completely constrained motion  
 b) incompletely constrained motion  
 c) successfully constrained motion  
 d) none of these
- 2) A ball and a socket joint forms a \_\_\_\_\_.  
 a) turning pair  
 b) rolling pair  
 c) sliding pair  
 d) spherical pair
- 3) The direction of linear velocity of any point on a link with respect to another point on the same link is \_\_\_\_\_.  
 a) parallel to the link joining the points  
 b) perpendicular to the link joining the points  
 c) at 45° to the link joining the points  
 d) none of these
- 4) The component of the acceleration, parallel to the velocity of the particle, at the given instant is called \_\_\_\_\_.  
 a) radial component  
 b) Coriolis component  
 c) tangential component  
 d) None of these
- 5) A point B on a rigid link AB moves with respect to A with angular velocity  $\omega$  rad/s. The radial component of the acceleration of B with respect to A, \_\_\_\_\_.  
 a)  $V_{BA} \times AB$   
 b)  $(V_{BA})^2 / AB$   
 c)  $V_{BA} / AB$   
 d) None of these  
 Where,  $V_{BA}$  = Linear velocity of B with respect to A =  $\omega \times AB$
- 6) The size of a cam depends upon \_\_\_\_\_.  
 a) base circle  
 b) pitch circle  
 c) prime circle  
 d) pitch curve
- 7) Offset is provided to a cam follower mechanism to \_\_\_\_\_.  
 a) avoid jerk  
 b) accelerate  
 c) minimize the side thrust  
 d) none of these

**S. Y. (B.Tech.) (Sem - II) (New)(CBCS) Examination: Oct/Nov-2022**  
**MECHANICAL ENGINEERING**  
**Kinematics & Theory of Machines**

Day & Date: Friday, 10-03-2023  
 Time: 02:00 PM To 05:00 PM

Max. Marks: 56

- Instructions:** 1) Solve any two questions from each section.  
 2) Use of calculator is allowed.  
 3) Figures to the right indicate full marks.  
 4) Draw neat sketches wherever necessary.  
 5) Assume suitable data if necessary and state it clearly.

**Section – I**

- Q.2 a)** Explain any two inversions of four bar chain with neat sketch. **06**  
**b)** In a pin jointed four bar mechanism, as shown in Fig. I,  $AB = 300$  mm,  $BC = CD = 360$  mm and  $AD = 600$  mm. The angle  $BAD = 60^\circ$ . The crank  $AB$  rotates uniformly at 100 rpm. Locate all the instantaneous centres and find the angular velocity of the link  $BC$ . **08**

Figure-I

- Q.3 a)** An engine mechanism is shown in Fig. II. The crank  $OB = 100$  mm and the connecting rod  $BC = 300$  mm with centre of gravity  $K$ , 100 mm from  $B$ . In the position shown, the crankshaft has a speed of 75 rad/s and an angular acceleration of  $1200 \text{ rad/s}^2$ . Determine using relative velocity and acceleration method the following. **10**
- 1) Velocity of  $K$
  - 2) Angular velocity of  $CB$
  - 3) Acceleration of  $K$

- 4) Angular acceleration of CB

Figure-II

- b) Define kinematic pair and explain types of pairs. 04

- Q.4 a) Define the following terms as applied to cam. 06

- 1) Base circle
- 2) Pitch circle
- 3) Trace point
- 4) Pitch point
- 5) Pressure angle
- 6) Stroke of the follower

- b) A cam is to give the following motion to a knife-edged follower: 08

- 1) Outstroke during  $60^\circ$  of cam rotation;
- 2) Dwell for the next  $30^\circ$  of cam rotation;
- 3) Return stroke during next  $60^\circ$  of cam rotation, and
- 4) Dwell for the remaining  $210^\circ$  of cam rotation

The stroke of the follower is 40 mm and the minimum radius of the cam is 50 mm. The follower moves with uniform velocity during both the outstroke and return strokes. Draw the profile of the cam when the axis of the follower passes through the axis of the cam shaft.

### Section – II

- Q.5 a) Differentiate between involute and cycloidal gear tooth profile. 04

- b) An epicyclic gear train, as shown in Fig. III, is composed of a fixed annular 10

wheel A having 150 teeth. The wheel A is meshing with wheel B which drives wheel D through an idle wheel C, D being concentric with A. The wheels B and C are carried on an arm which revolves clockwise at 100 rpm about the axis of A and D. If the wheels B and D have 25 teeth and 40 teeth respectively.

Find the following:

- 1) Number of teeth on C

- 2) Speed and sense of rotation of C.

Figure - III

**Fig. III**

- Q.6 a)** A Porter governor has equal arms each 250 mm long and pivoted on the axis of rotation. Each ball has a mass of 5 kg and the mass of the central load on the sleeve is 25 kg. The radius of rotation of the ball is 150 mm when the governor begins to lift and 200 mm when the governor is at maximum speed. Find the minimum and maximum speeds and range of speed of the governor. **08**
- b)** Define and explain the following terms relating to governors: **06**
- 1) Stability
  - 2) Sensitiveness
  - 3) Isochronous governor
  - 4) Hunting
  - 5) Effort of a governor
  - 6) Power of a governor
- Q.7 a)** Write a short note on static balancing and dynamic balancing. **04**
- b)** Four masses A, B, C and D revolve at equal radii and are equally spaced along a shaft. The mass B is 7 kg and the radii of C and D make angles of  $90^\circ$  and  $240^\circ$  respectively with the radius of B. Find the magnitude of the masses A, C and D and the angular position of A so that the system may be completely balanced. **10**

**MCQ/Objective Type Questions**

Duration: 30 Minutes

Marks: 14

**Q.1 Choose the correct alternatives from the options. 14**

- 1) An imaginary circle which by pure rolling action, gives the same motion as the actual gear, is called \_\_\_\_\_.  
 a) addendum circle                      b) dedendum circle  
 c) clearance circle                      d) pitch circle
- 2) The product of the diametral pitch and circular pitch is equal to \_\_\_\_\_.  
 a) 1                                              b)  $\pi$   
 c)  $1/\pi$                                           d)  $2\pi$
- 3) The condition of correct gearing is \_\_\_\_\_.  
 a) common normal to the pitch surface cuts the line of centers at a fixed point  
 b) radius of curvature of two profiles be same  
 c) pitch line velocities of teeth be same  
 d) none of the above
- 4) The height of a Watt's governor (in meters) is equal to \_\_\_\_\_.  
 a)  $8.95/N^2$                                       b)  $89.5/N^2$   
 c)  $8950/N^2$                                     d)  $895/N^2$   
 where N = Speed of the arm and ball about the spindle axis.
- 5) A Hartnell governor is a \_\_\_\_\_.  
 a) spring loaded governor                      b) pendulum type governor  
 c) dead weight governor                      d) inertia governor
- 6) In order to have a complete balance of the several revolving masses in different planes \_\_\_\_\_.  
 a) the resultant force must be zero  
 b) the resultant couple must be zero  
 c) both the resultant force and couple must be zero  
 d) none of the above

Set **Q**

**S. Y. (B.Tech.) (Sem - II) (New)(CBCS) Examination: Oct/Nov-2022**  
**MECHANICAL ENGINEERING**  
**Kinematics & Theory of Machines**

Day & Date: Friday, 10-03-2023  
 Time: 02:00 PM To 05:00 PM

Max. Marks: 56

- Instructions:** 1) Solve any two questions from each section.  
 2) Use of calculator is allowed.  
 3) Figures to the right indicate full marks.  
 4) Draw neat sketches wherever necessary.  
 5) Assume suitable data if necessary and state it clearly.

**Section – I**

- Q.2 a)** Explain any two inversions of four bar chain with neat sketch. **06**  
**b)** In a pin jointed four bar mechanism, as shown in Fig. I,  $AB = 300$  mm,  $BC = CD = 360$  mm and  $AD = 600$  mm. The angle  $BAD = 60^\circ$ . The crank  $AB$  rotates uniformly at 100 rpm. Locate all the instantaneous centres and find the angular velocity of the link  $BC$ . **08**

Figure-I

- Q.3 a)** An engine mechanism is shown in Fig. II. The crank  $OB = 100$  mm and the connecting rod  $BC = 300$  mm with centre of gravity  $K$ , 100 mm from  $B$ . In the position shown, the crankshaft has a speed of 75 rad/s and an angular acceleration of  $1200 \text{ rad/s}^2$ . Determine using relative velocity and acceleration method the following. **10**
- 1) Velocity of  $K$
  - 2) Angular velocity of  $CB$
  - 3) Acceleration of  $K$

- 4) Angular acceleration of CB

Figure-II

- b) Define kinematic pair and explain types of pairs. 04

- Q.4 a) Define the following terms as applied to cam. 06

- 1) Base circle
- 2) Pitch circle
- 3) Trace point
- 4) Pitch point
- 5) Pressure angle
- 6) Stroke of the follower

- b) A cam is to give the following motion to a knife-edged follower: 08

- 1) Outstroke during  $60^\circ$  of cam rotation;
- 2) Dwell for the next  $30^\circ$  of cam rotation;
- 3) Return stroke during next  $60^\circ$  of cam rotation, and
- 4) Dwell for the remaining  $210^\circ$  of cam rotation

The stroke of the follower is 40 mm and the minimum radius of the cam is 50 mm. The follower moves with uniform velocity during both the outstroke and return strokes. Draw the profile of the cam when the axis of the follower passes through the axis of the cam shaft.

### Section – II

- Q.5 a) Differentiate between involute and cycloidal gear tooth profile. 04

- b) An epicyclic gear train, as shown in Fig. III, is composed of a fixed annular 10

wheel A having 150 teeth. The wheel A is meshing with wheel B which drives wheel D through an idle wheel C, D being concentric with A. The wheels B and C are carried on an arm which revolves clockwise at 100 rpm about the axis of A and D. If the wheels B and D have 25 teeth and 40 teeth respectively.

Find the following:

- 1) Number of teeth on C

- 2) Speed and sense of rotation of C.

Figure - III

**Fig. III**

- Q.6 a)** A Porter governor has equal arms each 250 mm long and pivoted on the axis of rotation. Each ball has a mass of 5 kg and the mass of the central load on the sleeve is 25 kg. The radius of rotation of the ball is 150 mm when the governor begins to lift and 200 mm when the governor is at maximum speed. Find the minimum and maximum speeds and range of speed of the governor. **08**
- b)** Define and explain the following terms relating to governors: **06**
- 1) Stability
  - 2) Sensitiveness
  - 3) Isochronous governor
  - 4) Hunting
  - 5) Effort of a governor
  - 6) Power of a governor
- Q.7 a)** Write a short note on static balancing and dynamic balancing. **04**
- b)** Four masses A, B, C and D revolve at equal radii and are equally spaced along a shaft. The mass B is 7 kg and the radii of C and D make angles of  $90^\circ$  and  $240^\circ$  respectively with the radius of B. Find the magnitude of the masses A, C and D and the angular position of A so that the system may be completely balanced. **10**

## Max. Marks: 70

Marks: 14

## 14

- Page 11 of 20

- 7) The direction of linear velocity of any point on a link with respect to another point on the same link is \_\_\_\_\_.  
 a) parallel to the link joining the points  
 b) perpendicular to the link joining the points  
 c) at  $45^\circ$  to the link joining the points  
 d) none of these
- 8) The component of the acceleration, parallel to the velocity of the particle, at the given instant is called \_\_\_\_\_.  
 a) radial component  
 b) Coriolis component  
 c) tangential component  
 d) None of these
- 9) A point B on a rigid link AB moves with respect to A with angular velocity  $\omega$  rad/s. The radial component of the acceleration of B with respect to A, \_\_\_\_\_.  
 a)  $V_{BA} \times AB$   
 b)  $(V_{BA})^2 / AB$   
 c)  $V_{BA} / AB$   
 d) None of these
- Where,  $V_{BA}$  = Linear velocity of B with respect to A =  $\omega \times AB$
- 10) The size of a cam depends upon \_\_\_\_\_.  
 a) base circle  
 b) pitch circle  
 c) prime circle  
 d) pitch curve
- 11) Offset is provided to a cam follower mechanism to \_\_\_\_\_.  
 a) avoid jerk  
 b) accelerate  
 c) minimize the side thrust  
 d) none of these
- 12) An imaginary circle which by pure rolling action, gives the same motion as the actual gear, is called \_\_\_\_\_.  
 a) addendum circle  
 b) dedendum circle  
 c) clearance circle  
 d) pitch circle
- 13) The product of the diametral pitch and circular pitch is equal to \_\_\_\_\_.  
 a) 1  
 b)  $\pi$   
 c)  $1/\pi$   
 d)  $2\pi$
- 14) The condition of correct gearing is \_\_\_\_\_.  
 a) common normal to the pitch surface cuts the line of centers at a fixed point  
 b) radius of curvature of two profiles be same  
 c) pitch line velocities of teeth be same  
 d) none of the above

- 8) In order to have a complete balance of the several revolving masses in different planes \_\_\_\_\_.  
 a) the resultant force must be zero  
 b) the resultant couple must be zero  
 c) both the resultant force and couple must be zero  
 d) none of the above
- 9) A disturbing mass  $m_1$  attached to a rotating shaft may be balanced by a single mass  $m_2$  attached in the same plane of rotation as that of  $m_1$  such that \_\_\_\_\_.  
 a)  $m_1 \cdot r_2 = m_2 \cdot r_1$   
 b)  $m_1 \cdot r_1 = m_2 \cdot r_2$   
 c)  $m_1 \cdot m_2 = r_1 \cdot r_2$   
 d) None of the above
- 10) The motion of a piston in the cylinder of a steam engine is an example of \_\_\_\_\_.  
 a) completely constrained motion  
 b) incompletely constrained motion  
 c) successfully constrained motion  
 d) none of these
- 11) A ball and a socket joint forms a \_\_\_\_\_.  
 a) turning pair  
 b) rolling pair  
 c) sliding pair  
 d) spherical pair
- 12) The direction of linear velocity of any point on a link with respect to another point on the same link is \_\_\_\_\_.  
 a) parallel to the link joining the points  
 b) perpendicular to the link joining the points  
 c) at  $45^\circ$  to the link joining the points  
 d) none of these
- 13) The component of the acceleration, parallel to the velocity of the particle, at the given instant is called \_\_\_\_\_.  
 a) radial component  
 b) Coriolis component  
 c) tangential component  
 d) None of these
- 14) A point B on a rigid link AB moves with respect to A with angular velocity  $\omega$  rad/s. The radial component of the acceleration of B with respect to A, \_\_\_\_\_.  
 a)  $V_{BA} \times AB$   
 b)  $(V_{BA})^2 / AB$   
 c)  $V_{BA} / AB$   
 d) None of these

Where,  $V_{BA}$  = Linear velocity of B with respect to A =  $\omega \times AB$

**MCQ/Objective Type Questions**

Duration: 30 Minutes

Marks: 14

**Q.1 Choose the correct alternatives from the options.**

**14**

- 1) Where and when was the word Mechatronics invented?
 

|                  |                  |
|------------------|------------------|
| a) Japan (1960)  | b) Japan (1980)  |
| c) Europe (1960) | d) Europe (1980) |
- 2) A servo motor is a typical example of \_\_\_\_\_.
 

|                       |                        |
|-----------------------|------------------------|
| a) Electronics system | b) Mechanical system   |
| c) Computer system    | d) Mechatronics system |
- 3) What is the function of an input signal conditioning unit?
 

|                                                           |
|-----------------------------------------------------------|
| a) To produce control signals                             |
| b) To amplify the signal and convert it into digital form |
| c) To perform mechanical work                             |
| d) To produce electrical signals                          |
- 4) Potentiometer as a displacement sensor works on the principle of \_\_\_\_\_.
 

|                                     |
|-------------------------------------|
| a) Mutual Inductance                |
| b) Self Inductance                  |
| c) Variable Resistance Transduction |
| d) Hall Effect                      |
- 5) LIDAR stands for \_\_\_\_\_.
 

|                                  |
|----------------------------------|
| a) Light Detection and Radiation |
| b) Light Detection and Ranging   |
| c) Lithium Detector and Radiator |
| d) Lithium Detection and Ranging |
- 6) A microcontroller at-least should consist of \_\_\_\_\_.
 

|                                        |
|----------------------------------------|
| a) RAM, ROM, I/O ports and timers      |
| b) CPU, RAM, I/O ports and timers      |
| c) CPU, RAM, ROM, I/O ports and timers |
| d) CPU, ROM, I/O ports and timers      |
- 7) Unlike microprocessors, microcontrollers make use of batteries because they have:
 

|                            |                            |
|----------------------------|----------------------------|
| a) high power dissipation  | b) low power consumption   |
| c) low voltage consumption | d) low current consumption |

- 8) Which is a false statement regarding DAQ (Data acquisition) systems?
- a) It can measure physical phenomenon which can be sampled
  - b) Signal conditioning can be done
  - c) DAQ system can generate its own physical sample sets
  - d) Analog to digital conversion can be done
- 9) Which conversion takes place when music is played from a memory card?
- a) AAC
  - b) ADC
  - c) DDC
  - d) DAC
- 10) Which is not a property of group drive?
- a) Less initial cost than individual drive
  - b) Less maintenance cost than individual drive
  - c) Low power factor
  - d) Provides constant motor speed
- 11) IEEE 488 is more commonly known as:
- a) GPIB
  - b) PCI Express
  - c) FireWire
  - d) Serial ATA
- 12) The programmable logic controllers are used in \_\_\_\_.
- a) Manufacturing
  - b) Automation
  - c) Both a and b
  - d) None of the above
- 13) What are the components that make the programmable logic controller work?
- a) Input and output module
  - b) CPU
  - c) Power supply
  - d) All of the above
- 14) Which transmission media provides the highest transmission speed in a network?
- a) coaxial cable
  - b) twisted pair cable
  - c) optical fiber
  - d) electrical cable

**Set Q**

**S.Y. (B.Tech.) (Sem - II) (New) (CBCS) Examination: Oct/Nov-2022**  
**MECHANICAL ENGINEERING**  
**Mechatronic Systems**

Day & Date: Tuesday, 14-03-2023  
Time: 02:00 PM To 05:00 PM

Max. Marks: 70

- Instructions:** 1) Q. No. 1 is compulsory. It should be solved in the first 30 minutes in answer book. Page no 03 (Starting page of the Answer Book). Each question carries one mark.  
2) Don't forget to Mention question paper set (P/Q/R/S) on top of page.  
3) Figures to the right indicates full marks.

**MCQ/Objective Type Questions**

Duration: 30 Minutes

Marks: 14

**Q.1 Choose the correct alternatives from the options.**

**14**

- 1) Which is a false statement regarding DAQ (Data acquisition) systems?
  - a) It can measure physical phenomenon which can be sampled
  - b) Signal conditioning can be done
  - c) DAQ system can generate its own physical sample sets
  - d) Analog to digital conversion can be done
- 2) Which conversion takes place when music is played from a memory card?
  - a) AAC
  - b) ADC
  - c) DDC
  - d) DAC
- 3) Which is not a property of group drive?
  - a) Less initial cost than individual drive
  - b) Less maintenance cost than individual drive
  - c) Low power factor
  - d) Provides constant motor speed
- 4) IEEE 488 is more commonly known as:
  - a) GPIB
  - b) PCI Express
  - c) FireWire
  - d) Serial ATA
- 5) The programmable logic controllers are used in \_\_\_\_\_.
  - a) Manufacturing
  - b) Automation
  - c) Both a and b
  - d) None of the above
- 6) What are the components that make the programmable logic controller work?
  - a) Input and output module
  - b) CPU
  - c) Power supply
  - d) All of the above
- 7) Which transmission media provides the highest transmission speed in a network?
  - a) coaxial cable
  - b) twisted pair cable
  - c) optical fiber
  - d) electrical cable
- 8) Where and when was the word Mechatronics invented?
  - a) Japan (1960)
  - b) Japan (1980)
  - c) Europe (1960)
  - d) Europe (1980)

- 9) A servo motor is a typical example of \_\_\_\_\_.  
a) Electronics system                      b) Mechanical system  
c) Computer system                        d) Mechatronics system
- 10) What is the function of an input signal conditioning unit?  
a) To produce control signals  
b) To amplify the signal and convert it into digital form  
c) To perform mechanical work  
d) To produce electrical signals
- 11) Potentiometer as a displacement sensor works on the principle of \_\_\_\_\_.  
a) Mutual Inductance  
b) Self Inductance  
c) Variable Resistance Transduction  
d) Hall Effect
- 12) LIDAR stands for \_\_\_\_\_.  
a) Light Detection and Radiation  
b) Light Detection and Ranging  
c) Lithium Detector and Radiator  
d) Lithium Detection and Ranging
- 13) A microcontroller at-least should consist of \_\_\_\_\_.  
a) RAM, ROM, I/O ports and timers  
b) CPU, RAM, I/O ports and timers  
c) CPU, RAM, ROM, I/O ports and timers  
d) CPU, ROM, I/O ports and timers
- 14) Unlike microprocessors, microcontrollers make use of batteries because they have:  
a) high power dissipation                      b) low power consumption  
c) low voltage consumption                    d) low current consumption

**Set Q**

**S.Y. (B.Tech.) (Sem - II) (New) (CBCS) Examination: Oct/Nov-2022**  
**MECHANICAL ENGINEERING**  
**Mechatronic Systems**

Day & Date: Tuesday, 14-03-2023  
 Time: 02:00 PM To 05:00 PM

Max. Marks: 56

**Instructions:** 1) Solve any two questions from Section-I and Section-II.  
 2) Figures to the right indicate full marks.

**Section – I**

- |            |                                                                                         |           |
|------------|-----------------------------------------------------------------------------------------|-----------|
| <b>Q.2</b> | <b>a)</b> Explain key elements of mechatronic system.                                   | <b>07</b> |
|            | <b>b)</b> Explain application of mechatronics in car engine management.                 | <b>07</b> |
| <b>Q.3</b> | <b>a)</b> Explain classification of sensors.                                            | <b>07</b> |
|            | <b>b)</b> Explain with neat sketch linear and rotary variable differential transformer. | <b>07</b> |
| <b>Q.4</b> | <b>a)</b> Explain features of 8085 microprocessor.                                      | <b>07</b> |
|            | <b>b)</b> Differentiate between microprocessor and microcontroller.                     | <b>07</b> |

**Section – II**

- |            |                                                                                                                 |           |
|------------|-----------------------------------------------------------------------------------------------------------------|-----------|
| <b>Q.5</b> | <b>a)</b> What is meant by signal conditioning and what are the different types of signal conditioner?          | <b>07</b> |
|            | <b>b)</b> Explain signal processing. How signal processing is done and write applications of signal processing. | <b>07</b> |
| <b>Q.6</b> | <b>a)</b> Explain basic architecture of PLC.                                                                    | <b>07</b> |
|            | <b>b)</b> Explain with neat sketch NPN and PNP sourcing and sinking circuits.                                   | <b>07</b> |
| <b>Q.7</b> | <b>a)</b> What is computer network? Explain key components of computer networks.                                | <b>07</b> |
|            | <b>b)</b> Define Network Topology. Explain any two network topologies.                                          | <b>07</b> |

**S. Y. (B.Tech.) (Sem - II) (New) (CBCS) Examination: Oct/Nov-2022**  
**MECHANICAL ENGINEERING**  
**Power Plant and Energy Engineering**

Day & Date: Tuesday, 14-03-2023  
 Time: 02:00 PM To 05:00 PM

Max. Marks: 70

- Instructions:** 1) Q. No. 1 is compulsory. It should be solved in the first 30 minutes in Answer book. Page no 03 (Starting page of the Answer Book). Each Question carries one mark.  
 2) Don't forget to Mention question paper set (P/Q/R/S) on top of page.  
 3) Figures to the right indicate full marks

**MCQ/Objective Type Questions**

Duration: 30 Minutes

Marks: 14

**Q.1 Choose the correct alternatives from the options.**

**14**

- 1) A load curve is a plot of \_\_\_\_\_.  
 a) Load versus generation capacity  
 b) Load versus current  
 c) Load versus cost of power  
 d) Load versus time
- 2) An Inspection survey and analysis of energy flows for energy conservation in a building is called as \_\_\_\_\_.  
 a) Energy Management  
 b) Energy Audit  
 c) Energy Conservation  
 d) None of above
- 3) The solar constant value is \_\_\_\_\_.  
 a) 1327 W/m<sup>2</sup>  
 b) 1366 W/m<sup>2</sup>  
 c) 1357 W/m<sup>2</sup>  
 d) 1377 W/m<sup>2</sup>
- 4) Which of the following power plant have longest physical life?  
 a) Thermal power plant  
 b) Nuclear power plant  
 c) Hydroelectric power plant  
 d) Diesel power plant
- 5) In hydroelectric power, what is necessary for the production of power throughout the Year?  
 a) Dams filled with water  
 b) High amount of air  
 c) High intense sunlight  
 d) Nuclear power
- 6) A system has a connected load of 100 kW, the peak load of 80 kW. base load of 20 kW and an average load of 40 kW, will have a load factor of \_\_\_\_\_.  
 a) 40%  
 b) 50%  
 c) 60%  
 d) 80%
- 7) What does WECS stands for?  
 a) Wind energy conversion system  
 b) Wind engine control system  
 c) Wind energy combined system  
 d) Wind engine comparison system

- 8) Energy conservation act was formed in the year \_\_\_\_\_.
  - a) 1998
  - b) 1999
  - c) 2001
  - d) 2000
- 9) The Function of solar collectors to convert \_\_\_\_\_.
  - a) Solar energy into electricity
  - b) Solar energy into radiations
  - c) Solar energy into thermal energy
  - d) none of these
- 10) What is hot molten rock called?
  - a) Lava
  - b) Magma
  - c) Igneous rocks
  - d) Volcano
- 11) Which of the following power plant cannot be used as a base load plant?
  - a) Hydroelectric power plant
  - b) Diesel elected plant
  - c) Nuclear power plant
  - d) Thermal power plant
- 12) Kinetic energy that results from the oscillation of water is called \_\_\_\_\_.
  - a) Wave energy
  - b) Tidal energy
  - c) Ocean thermal energy
  - d) Hydro energy
- 13) Economiser is used to heat \_\_\_\_\_.
  - a) Feed water
  - b) Air
  - c) Flue gases
  - d) All of the above
- 14) Which Meter is used to measure the Beam Radiations?
  - a) Pyrliometer
  - b) Sunshine Recorder
  - c) Anemometer
  - d) All of the above

Set

P

**S. Y. (B.Tech.) (Sem - II) (New) (CBCS) Examination: Oct/Nov-2022**  
**MECHANICAL ENGINEERING**

**Power Plant and Energy Engineering**

Day &amp; Date: Tuesday, 14-03-2023

Max. Marks: 56

Time: 02:00 PM To 05:00 PM

- Instructions:** 1) Solve any two questions from each section.  
 2) Use of calculator is allowed.  
 3) Figures to the right indicate full marks.  
 4) Assume additional suitable data, if necessary and mention it clearly.

**Section – I**

- Q.2** a) What are the different types of Load Curves? Explain any one in detail with a neat sketch. **05**  
 b) What is Tariff? Explain any one Tariff Method. **05**  
 c) Explain in short Straight Line Method of Depreciation with figure. **04**
- Q.3** a) Explain the role of NTPC and NPCIL in Power Development. **05**  
 b) Write a short note on the role of Power Grid Corporation in India (PGCIL). **04**  
 c) Explain the requirement of Compressed Air Storage Plants. **05**
- Q.4** a) What are the various factors considered during Selection of Site for Power Station? **05**  
 b) The load supplied by a power station is given below: **05**

| Time (Hr.) | 0 - 6 | 6 - 12 | 12 - 14 | 14 - 18 | 18 - 24 |
|------------|-------|--------|---------|---------|---------|
| Load (MW)  | 35    | 90     | 70      | 100     | 50      |

Draw the load curve & load duration curve. Determine plant capacity factor if plant capacity is 150 MW.

- c) Explain in short the role of the Private Sector in India for Power development. **04**

**Section – II**

- Q.5** a) Write a short note on Pyranometer. **05**  
 b) What is the role of energy audit in energy conservation? **04**  
 c) What is Tidal Energy? Explain Single Basin System Tidal Power Plant. **05**
- Q.6** a) What are the types of Energy Audit? Explain any one in detail. **05**  
 b) What are the Non-concentrating types Collectors? Explain Liquid Flat Plate Collector with a neat sketch. **05**  
 c) Explain with a neat sketch Closed OTEC Cycle Power Plant. **04**

- Q.7**
- |           |                                                                              |           |
|-----------|------------------------------------------------------------------------------|-----------|
| <b>a)</b> | Give a list and explain in short different energy audit instruments.         | <b>05</b> |
| <b>b)</b> | Give classification of wind mill and state its advantages and disadvantages. | <b>05</b> |
| <b>c)</b> | Define the following terms with neat sketch:                                 | <b>04</b> |
|           | 1) Latitude                                                                  |           |
|           | 2) Hour Angle                                                                |           |
|           | 3) Altitude                                                                  |           |
|           | 4) Solar Azimuth Angle                                                       |           |

|                 |  |
|-----------------|--|
| <b>Seat No.</b> |  |
|-----------------|--|

- 9) An Inspection survey and analysis of energy flows for energy conservation in a building is called as \_\_\_\_\_.  
a) Energy Management                      b) Energy Audit  
c) Energy Conservation                    d) None of above
- 10) The solar constant value is \_\_\_\_\_.  
a)  $1327 \text{ W/m}^2$                               b)  $1366 \text{ W/m}^2$   
c)  $1357 \text{ W/m}^2$                               d)  $1377 \text{ W/m}^2$
- 11) Which of the following power plant have longest physical life?  
a) Thermal power plant                      b) Nuclear power plant  
c) Hydroelectric power plant                d) Diesel power plant
- 12) In hydroelectric power, what is necessary for the production of power throughout the Year?  
a) Dams filled with water                    b) High amount of air  
c) High intense sunlight                      d) Nuclear power
- 13) A system has a connected load of 100 kW, the peak load of 80 kW. base load of 20 kW and an average load of 40 kW, will have a load factor of \_\_\_\_\_.  
a) 40%                                              b) 50%  
c) 60%                                              d) 80%
- 14) What does WECS stands for?  
a) Wind energy conversion system  
b) Wind engine control system  
c) Wind energy combined system  
d) Wind engine comparison system

**Power Plant and Energy Engineering**

Day & Date: Tuesday, 14-03-2023  
 Time: 02:00 PM To 05:00 PM

Max. Marks: 70

- Instructions:** 1) Q. No. 1 is compulsory. It should be solved in the first 30 minutes in Answer book. Page no 03 (Starting page of the Answer Book). Each Question carries one mark.  
 2) Don't forget to Mention question paper set (P/Q/R/S) on top of page.  
 3) Figures to the right indicate full marks

**MCQ/Objective Type Questions**

Duration: 30 Minutes

Marks: 14

**Q.1 Choose the correct alternatives from the options.**

**14**

- 1) Which of the following power plant cannot be used as a base load plant?
 

|                              |                         |
|------------------------------|-------------------------|
| a) Hydroelectric power plant | b) Diesel elected plant |
| c) Nuclear power plant       | d) Thermal power plant  |
- 2) Kinetic energy that results from the oscillation of water is called \_\_\_\_\_.
 

|                         |                 |
|-------------------------|-----------------|
| a) Wave energy          | b) Tidal energy |
| c) Ocean thermal energy | d) Hydro energy |
- 3) Economiser is used to heat \_\_\_\_\_.
 

|               |                     |
|---------------|---------------------|
| a) Feed water | b) Air              |
| c) Flue gases | d) All of the above |
- 4) Which Meter is used to measure the Beam Radiations?
 

|                  |                      |
|------------------|----------------------|
| a) Pyrheliometer | b) Sunshine Recorder |
| c) Anemometer    | d) All of the above  |
- 5) A load curve is a plot of \_\_\_\_\_.
 

|                                    |
|------------------------------------|
| a) Load versus generation capacity |
| b) Load versus current             |
| c) Load versus cost of power       |
| d) Load versus time                |
- 6) An Inspection survey and analysis of energy flows for energy conservation in a building is called as \_\_\_\_\_.
 

|                        |                  |
|------------------------|------------------|
| a) Energy Management   | b) Energy Audit  |
| c) Energy Conservation | d) None of above |
- 7) The solar constant value is \_\_\_\_\_.
 

|                          |                          |
|--------------------------|--------------------------|
| a) 1327 W/m <sup>2</sup> | b) 1366 W/m <sup>2</sup> |
| c) 1357 W/m <sup>2</sup> | d) 1377 W/m <sup>2</sup> |
- 8) Which of the following power plant have longest physical life?
 

|                              |                        |
|------------------------------|------------------------|
| a) Thermal power plant       | b) Nuclear power plant |
| c) Hydroelectric power plant | d) Diesel power plant  |

- 9) In hydroelectric power, what is necessary for the production of power throughout the Year?
- |                           |                       |
|---------------------------|-----------------------|
| a) Dams filled with water | b) High amount of air |
| c) High intense sunlight  | d) Nuclear power      |
- 10) A system has a connected load of 100 kW, the peak load of 80 kW. base load of 20 kW and an average load of 40 kW, will have a load factor of \_\_\_\_.
- |        |        |
|--------|--------|
| a) 40% | b) 50% |
| c) 60% | d) 80% |
- 11) What does WECS stands for?
- |                                  |                                  |
|----------------------------------|----------------------------------|
| a) Wind energy conversion system | b) Wind engine control system    |
| c) Wind energy combined system   | d) Wind engine comparison system |
- 12) Energy conservation act was formed in the year \_\_\_\_.
- |         |         |
|---------|---------|
| a) 1998 | b) 1999 |
| c) 2001 | d) 2000 |
- 13) The Function of solar collectors to convert \_\_\_\_.
- |                                     |                                 |
|-------------------------------------|---------------------------------|
| a) Solar energy into electricity    | b) Solar energy into radiations |
| c) Solar energy into thermal energy | d) none of these                |
- 14) What is hot molten rock called?
- |                  |            |
|------------------|------------|
| a) Lava          | b) Magma   |
| c) Igneous rocks | d) Volcano |

## MECHANICAL ENGINEERING

## Max. Marks: 70

Time: 02:00 PM To 05:00 PM

3) Figures to the right indicate full marks

Marks: 14

14

- 1) A system has a connected load of 100 kW, the peak load of 80 kW. base load of 20 kW and an average load of 40 kW, will have a load factor of \_\_\_\_\_.  
a) 40%                                      b) 50%  
c) 60%                                      d) 80%
- 2) What does WECS stands for?  
a) Wind energy conversion system  
b) Wind engine control system  
c) Wind energy combined system  
d) Wind engine comparison system
- 3) Energy conservation act was formed in the year \_\_\_\_\_.  
a) 1998                                      b) 1999  
c) 2001                                      d) 2000
- 4) The Function of solar collectors to convert \_\_\_\_\_.  
a) Solar energy into electricity  
b) Solar energy into radiations  
c) Solar energy into thermal energy  
d) none of these
- 5) What is hot molten rock called?  
a) Lava                                          b) Magma  
c) Igneous rocks                          d) Volcano
- 6) Which of the following power plant cannot be used as a base load plant?  
a) Hydroelectric power plant            b) Diesel elected plant  
c) Nuclear power plant                 d) Thermal power plant
- 7) Kinetic energy that results from the oscillation of water is called \_\_\_\_\_.  
a) Wave energy                              b) Tidal energy  
c) Ocean thermal energy                 d) Hydro energy
- 8) Economiser is used to heat \_\_\_\_\_.  
a) Feed water                                b) Air  
c) Flue gases                                 d) All of the above

- 9) Which Meter is used to measure the Beam Radiations?
  - a) Pyrheliometer
  - b) Sunshine Recorder
  - c) Anemometer
  - d) All of the above
- 10) A load curve is a plot of \_\_\_\_\_.
  - a) Load versus generation capacity
  - b) Load versus current
  - c) Load versus cost of power
  - d) Load versus time
- 11) An Inspection survey and analysis of energy flows for energy conservation in a building is called as \_\_\_\_\_.
  - a) Energy Management
  - b) Energy Audit
  - c) Energy Conservation
  - d) None of above
- 12) The solar constant value is \_\_\_\_\_.
  - a)  $1327 \text{ W/m}^2$
  - b)  $1366 \text{ W/m}^2$
  - c)  $1357 \text{ W/m}^2$
  - d)  $1377 \text{ W/m}^2$
- 13) Which of the following power plant have longest physical life?
  - a) Thermal power plant
  - b) Nuclear power plant
  - c) Hydroelectric power plant
  - d) Diesel power plant
- 14) In hydroelectric power, what is necessary for the production of power throughout the Year?
  - a) Dams filled with water
  - b) High amount of air
  - c) High intense sunlight
  - d) Nuclear power

Set **S**

**S. Y. (B.Tech.) (Sem - II) (New) (CBCS) Examination: Oct/Nov-2022**  
**MECHANICAL ENGINEERING**  
**Power Plant and Energy Engineering**

Day &amp; Date: Tuesday, 14-03-2023

Max. Marks: 56

Time: 02:00 PM To 05:00 PM

- Instructions:** 1) Solve any two questions from each section.  
 2) Use of calculator is allowed.  
 3) Figures to the right indicate full marks.  
 4) Assume additional suitable data, if necessary and mention it clearly.

**Section – I**

- Q.2** a) What are the different types of Load Curves? Explain any one in detail with a neat sketch. **05**  
 b) What is Tariff? Explain any one Tariff Method. **05**  
 c) Explain in short Straight Line Method of Depreciation with figure. **04**
- Q.3** a) Explain the role of NTPC and NPCIL in Power Development. **05**  
 b) Write a short note on the role of Power Grid Corporation in India (PGCIL). **04**  
 c) Explain the requirement of Compressed Air Storage Plants. **05**
- Q.4** a) What are the various factors considered during Selection of Site for Power Station? **05**  
 b) The load supplied by a power station is given below: **05**

| Time (Hr.) | 0 - 6 | 6 - 12 | 12 - 14 | 14 - 18 | 18 - 24 |
|------------|-------|--------|---------|---------|---------|
| Load (MW)  | 35    | 90     | 70      | 100     | 50      |

Draw the load curve & load duration curve. Determine plant capacity factor if plant capacity is 150 MW.

- c) Explain in short the role of the Private Sector in India for Power development. **04**

**Section – II**

- Q.5** a) Write a short note on Pyranometer. **05**  
 b) What is the role of energy audit in energy conservation? **04**  
 c) What is Tidal Energy? Explain Single Basin System Tidal Power Plant. **05**
- Q.6** a) What are the types of Energy Audit? Explain any one in detail. **05**  
 b) What are the Non-concentrating types Collectors? Explain Liquid Flat Plate Collector with a neat sketch. **05**  
 c) Explain with a neat sketch Closed OTEC Cycle Power Plant. **04**

- Q.7**
- |           |                                                                              |           |
|-----------|------------------------------------------------------------------------------|-----------|
| <b>a)</b> | Give a list and explain in short different energy audit instruments.         | <b>05</b> |
| <b>b)</b> | Give classification of wind mill and state its advantages and disadvantages. | <b>05</b> |
| <b>c)</b> | Define the following terms with neat sketch:                                 | <b>04</b> |
|           | 1) Latitude                                                                  |           |
|           | 2) Hour Angle                                                                |           |
|           | 3) Altitude                                                                  |           |
|           | 4) Solar Azimuth Angle                                                       |           |

**S. Y. (B.Tech.) (Sem - II) (New) (CBCS) Examination: Oct/Nov-2022**  
**MECHANICAL ENGINEERING**  
**Industrial Robotics**

Day & Date: Thursday, 16-03-2023  
 Time: 02:00 PM To 05:00 PM

Max. Marks: 56

**Instructions:** 1) Solve any two question from the both section.  
 2) Figures to the right indicate full marks.

**Section – I**

- Q.2**
- a) Explain selection criteria for sensors. **04**
  - b) Explain the five basic robot types according to the work envelope geometries. **06**
  - c) Define the following. **04**
    - 1) Work envelope
    - 2) Work cell
    - 3) Degrees of freedom
    - 4) Servomechanism
- Q.3**
- a) Discuss the construction and working of stepper motors. List its advantages, disadvantages and applications. **05**
  - b) What are the tactile sensors? Explain how they are operated? **04**
  - c) Explain following industrial automation. **05**
    - 1) Fixed automation
    - 2) Programmable automation
    - 3) Flexible automation
- Q.4**
- a) What do you understand by DH conversion Explain in detail? **06**
  - b) Name five different types of robots end effectors. Explain any two. **08**

**Section – II**

- Q.5**
- a) What do you understand by forward & inverse kinematics for 2 dof's? Explain in detail it is desired to determine the values of which the angles  $\theta_1$  &  $\theta_2$  must be set into order to achieve certain point the length of joint  $L_1 = 12$  in the length of  $L_2 = 10$  in. The coordinates  $x = 15.7$  and  $y = 12.6$  using the reverse transformation method determine the angles  $\theta_1$  &  $\theta_2$  **08**

- b) Explain PID control with neat sketch. **06**

- |            |           |                                                                                                                                                                                                                                              |           |
|------------|-----------|----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|-----------|
| <b>Q.6</b> | <b>a)</b> | Explain the applications of robot in following.<br>1) Medical<br>2) Assembly                                                                                                                                                                 | <b>06</b> |
|            | <b>b)</b> | Explain the applications of robot in following.<br>1) Material handling<br>2) Spray painting/coating                                                                                                                                         | <b>08</b> |
| <b>Q.7</b> | <b>a)</b> | Write a short note on pick and place robot.                                                                                                                                                                                                  | <b>06</b> |
|            | <b>b)</b> | Define "Industrial Robot". List the reasons why and where industrial robots must be deployed in place of humans in the industrial workspace. State possible issues associated with the use of industrial robots in place of human operators. | <b>08</b> |

**S. Y. (B.Tech.) (Sem - II) (New) (CBCS) Examination: Oct/Nov-2022**  
**MECHANICAL ENGINEERING**  
**Industrial Robotics**

Day & Date: Thursday, 16-03-2023  
 Time: 02:00 PM To 05:00 PM

Max. Marks: 70

- Instructions:** 1) Q. No. 1 is compulsory. It should be solved in the first 30 minutes in Answer book. Page no 03 (Starting page of the Answer Book). Each Question carries one mark.  
 2) Don't forget to Mention question paper set (P/Q/R/S) on top of page.  
 3) Figures to the right indicates full marks

**MCQ/Objective Type Questions**

Duration: 30 Minutes

Marks: 14

**Q.1 Choose the correct alternatives from the options.**

**14**

- 1) Binary sensors having \_\_\_\_\_ is the contact device.
 

|            |                  |
|------------|------------------|
| a) Fingers | b) micro switch  |
| c) Wrist   | d) none of these |
- 2) The envelope or space within which robot can manipulate the wrist is known as \_\_\_\_\_.
 

|                  |              |
|------------------|--------------|
| a) repeatability | b) accuracy  |
| c) work volume   | d) stability |
- 3) Degree(s) of freedom of a four - bar mechanism is/are found to be equal to \_\_\_\_\_.
 

|      |                  |
|------|------------------|
| a) 1 | b) 2             |
| c) 3 | d) None of these |
- 4) The non-manufacturing areas of robotics are \_\_\_\_\_.
 

|             |                |
|-------------|----------------|
| a) mining   | b) agriculture |
| c) assembly | d) a & b       |
- 5) Which of the following drives used for control the robots?
 

|               |              |
|---------------|--------------|
| a) Hydraulic  | b) Pneumatic |
| c) Electrical | d) Solenoid  |
- 6) Which of the following are tactile sensors?
 

|                    |                  |
|--------------------|------------------|
| a) Magnetic sensor | b) Piezoelectric |
| c) Encoder         | d) range sensor  |
- 7) Which one of the following statements is TRUE?
 

|                                                  |
|--------------------------------------------------|
| a) Revolute joint is a rotary joint having 1 dof |
| b) Revolute joint is a linear joint having 2 dof |
| c) Revolute joint is a linear joint having 3 dof |
| d) Revolute joint is a linear joint having 4 dof |
- 8) The term "Robotics" was coined by \_\_\_\_\_.
 

|                      |                      |
|----------------------|----------------------|
| a) Karel Capek       | b) Aurther C. Clarke |
| c) Leonardo Da Vinci | d) None of these     |

- 9) When the joint angles and the different configurations of manipulator are derived from the position orientation, the scheme is known as \_\_\_\_\_.  
a) Forward kinematics                      b) inverse kinematics  
c) transformation                              d) none of these
- 10) Which one of the following statements is TRUE?  
a) Dextrous workspace of a manipulator is a subset of its reachable workspace  
b) Reachable workspace of a manipulator is a subset of its dextrous workspace  
c) No relationship exists between dextrous and reachable workspaces  
d) Summation of dextrous and reachable workspaces of a manipulator gives rise to its total workspace
- 11) The term UGV stands for \_\_\_\_\_.  
a) Unnamed Ground Vehicle                      b) Unknown Ground Vehicle  
c) Universal Ground Vehicle                      d) Unmanned Ground Vehicle
- 12) Which type of joints used in robots?  
a) Knuckle joint                                      b) prismatic joint  
c) universal joint                                      d) None of these
- 13) Work envelope generated by Cartesian coordinate robot is \_\_\_\_\_.  
a) Sphere                                              b) Cylinder  
c) rectangular box                                      d) triangle
- 14) Spot welding and Arc welding are the examples of \_\_\_\_\_.  
a) Point-to-point tasks  
b) Continuous path tasks  
c) Point-to-point and continuous path tasks  
d) Continuous path task and point-to-point tasks

Set **Q**

**S. Y. (B.Tech.) (Sem - II) (New) (CBCS) Examination: Oct/Nov-2022**  
**MECHANICAL ENGINEERING**  
**Industrial Robotics**

Day & Date: Thursday, 16-03-2023  
 Time: 02:00 PM To 05:00 PM

Max. Marks: 56

**Instructions:** 1) Solve any two question from the both section.  
 2) Figures to the right indicate full marks.

**Section – I**

- Q.2**
- a) Explain selection criteria for sensors. **04**
  - b) Explain the five basic robot types according to the work envelope geometries. **06**
  - c) Define the following. **04**
    - 1) Work envelope
    - 2) Work cell
    - 3) Degrees of freedom
    - 4) Servomechanism
- Q.3**
- a) Discuss the construction and working of stepper motors. List its advantages, disadvantages and applications. **05**
  - b) What are the tactile sensors? Explain how they are operated? **04**
  - c) Explain following industrial automation. **05**
    - 1) Fixed automation
    - 2) Programmable automation
    - 3) Flexible automation
- Q.4**
- a) What do you understand by DH conversion Explain in detail? **06**
  - b) Name five different types of robots end effectors. Explain any two. **08**

**Section – II**

- Q.5**
- a) What do you understand by forward & inverse kinematics for 2 dof's? Explain in detail it is desired to determine the values of which the angles  $\theta_1$  &  $\theta_2$  must be set into order to achieve certain point the length of joint  $L_1 = 12$  in the length of  $L_2 = 10$  in. The coordinates  $x = 15.7$  and  $y = 12.6$  using the reverse transformation method determine the angles  $\theta_1$  &  $\theta_2$  **08**

- b) Explain PID control with neat sketch. **06**

- |            |           |                                                                                                                                                                                                                                              |           |
|------------|-----------|----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|-----------|
| <b>Q.6</b> | <b>a)</b> | Explain the applications of robot in following.                                                                                                                                                                                              | <b>06</b> |
|            |           | 1) Medical                                                                                                                                                                                                                                   |           |
|            |           | 2) Assembly                                                                                                                                                                                                                                  |           |
|            | <b>b)</b> | Explain the applications of robot in following.                                                                                                                                                                                              | <b>08</b> |
|            |           | 1) Material handling                                                                                                                                                                                                                         |           |
|            |           | 2) Spray painting/coating                                                                                                                                                                                                                    |           |
| <b>Q.7</b> | <b>a)</b> | Write a short note on pick and place robot.                                                                                                                                                                                                  | <b>06</b> |
|            | <b>b)</b> | Define "Industrial Robot". List the reasons why and where industrial robots must be deployed in place of humans in the industrial workspace. State possible issues associated with the use of industrial robots in place of human operators. | <b>08</b> |

**S. Y. (B.Tech.) (Sem - II) (New) (CBCS) Examination: Oct/Nov-2022**  
**MECHANICAL ENGINEERING**  
**Industrial Robotics**

Day & Date: Thursday, 16-03-2023  
 Time: 02:00 PM To 05:00 PM

Max. Marks: 56

**Instructions:** 1) Solve any two question from the both section.  
 2) Figures to the right indicate full marks.

**Section – I**

- Q.2**
- a) Explain selection criteria for sensors. **04**
  - b) Explain the five basic robot types according to the work envelope geometries. **06**
  - c) Define the following. **04**
    - 1) Work envelope
    - 2) Work cell
    - 3) Degrees of freedom
    - 4) Servomechanism
- Q.3**
- a) Discuss the construction and working of stepper motors. List its advantages, disadvantages and applications. **05**
  - b) What are the tactile sensors? Explain how they are operated? **04**
  - c) Explain following industrial automation. **05**
    - 1) Fixed automation
    - 2) Programmable automation
    - 3) Flexible automation
- Q.4**
- a) What do you understand by DH conversion Explain in detail? **06**
  - b) Name five different types of robots end effectors. Explain any two. **08**

**Section – II**

- Q.5**
- a) What do you understand by forward & inverse kinematics for 2 dof's? **08**  
 Explain in detail it is desired to determine the values of which the angles  $\theta_1$  &  $\theta_2$  must be set into order to achieve certain point the length of joint  $L_1 = 12$  in the length of  $L_2 = 10$  in. The coordinates  $x = 15.7$  and  $y = 12.6$  using the reverse transformation method determine the angles  $\theta_1$  &  $\theta_2$

- b) Explain PID control with neat sketch. **06**

- |            |           |                                                                                                                                                                                                                                              |           |
|------------|-----------|----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|-----------|
| <b>Q.6</b> | <b>a)</b> | Explain the applications of robot in following.<br>1) Medical<br>2) Assembly                                                                                                                                                                 | <b>06</b> |
|            | <b>b)</b> | Explain the applications of robot in following.<br>1) Material handling<br>2) Spray painting/coating                                                                                                                                         | <b>08</b> |
| <b>Q.7</b> | <b>a)</b> | Write a short note on pick and place robot.                                                                                                                                                                                                  | <b>06</b> |
|            | <b>b)</b> | Define "Industrial Robot". List the reasons why and where industrial robots must be deployed in place of humans in the industrial workspace. State possible issues associated with the use of industrial robots in place of human operators. | <b>08</b> |

|                 |  |

| <b>Seat No.</b> |  |
|-----------------|--|

- 9) Which one of the following statements is TRUE?
  - a) Revolute joint is a rotary joint having 1 dof
  - b) Revolute joint is a linear joint having 2 dof
  - c) Revolute joint is a linear joint having 3 dof
  - d) Revolute joint is a linear joint having 4 dof
- 10) The term "Robotics" was coined by \_\_\_\_\_.
  - a) Karel Capek
  - b) Aurthar C. Clarke
  - c) Leonardo Da Vinci
  - d) None of these
- 11) When the joint angles and the different configurations of manipulator are derived from the position orientation, the scheme is known as \_\_\_\_\_.
  - a) Forward kinematics
  - b) inverse kinematics
  - c) transformation
  - d) none of these
- 12) Which one of the following statements is TRUE?
  - a) Dextrous workspace of a manipulator is a subset of its reachable workspace
  - b) Reachable workspace of a manipulator is a subset of its dextrous workspace
  - c) No relationship exists between dextrous and reachable workspaces
  - d) Summation of dextrous and reachable workspaces of a manipulator gives rise to its total workspace
- 13) The term UGV stands for \_\_\_\_\_.
  - a) Unnamed Ground Vehicle
  - b) Unknown Ground Vehicle
  - c) Universal Ground Vehicle
  - d) Unmanned Ground Vehicle
- 14) Which type of joints used in robots?
  - a) Knuckle joint
  - b) prismatic joint
  - c) universal joint
  - d) None of these

Set **S**

**S. Y. (B.Tech.) (Sem - II) (New) (CBCS) Examination: Oct/Nov-2022**  
**MECHANICAL ENGINEERING**  
**Industrial Robotics**

Day & Date: Thursday, 16-03-2023  
 Time: 02:00 PM To 05:00 PM

Max. Marks: 56

**Instructions:** 1) Solve any two question from the both section.  
 2) Figures to the right indicate full marks.

**Section – I**

- Q.2**
- a) Explain selection criteria for sensors. **04**
  - b) Explain the five basic robot types according to the work envelope geometries. **06**
  - c) Define the following. **04**
    - 1) Work envelope
    - 2) Work cell
    - 3) Degrees of freedom
    - 4) Servomechanism
- Q.3**
- a) Discuss the construction and working of stepper motors. List its advantages, disadvantages and applications. **05**
  - b) What are the tactile sensors? Explain how they are operated? **04**
  - c) Explain following industrial automation. **05**
    - 1) Fixed automation
    - 2) Programmable automation
    - 3) Flexible automation
- Q.4**
- a) What do you understand by DH conversion Explain in detail? **06**
  - b) Name five different types of robots end effectors. Explain any two. **08**

**Section – II**

- Q.5**
- a) What do you understand by forward & inverse kinematics for 2 dof's? **08**  
 Explain in detail it is desired to determine the values of which the angles  $\theta_1$  &  $\theta_2$  must be set into order to achieve certain point the length of joint  $L_1 = 12$  in the length of  $L_2 = 10$  in. The coordinates  $x = 15.7$  and  $y = 12.6$  using the reverse transformation method determine the angles  $\theta_1$  &  $\theta_2$

- b) Explain PID control with neat sketch. **06**

- |            |           |                                                                                                                                                                                                                                              |           |
|------------|-----------|----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|-----------|

- 9) From following, the alternative name for Rapid Prototyping is \_\_\_\_\_.  
a) Additive Manufacturing                      b) Layer Manufacturing  
c) Direct CAD Manufacturing                  d) All of the above
- 10) Following is not the type of Geometrical Modeling?  
a) Solid Modeling                                  b) Drafting  
c) Surface Modeling                              d) Wireframe Modeling
- 11) Process of converting STL file model in to layers is called \_\_\_\_\_ in RP.  
a) chopping                                          b) slicing  
c) cutting                                              d) trimming
- 12) Full form of STL is \_\_\_\_\_.  
a) Straight-lithography                          b) Streto-lithography  
c) Stereo-lithography                              d) Straight-lipsography
- 13) In the \_\_\_\_\_ process, one starts with a single block of solid material larger than the final size of the desired object and material is removed until the desired shape is reached.  
a) Subtractive process                              b) Additive process  
c) Formative process                                d) All of above
- 14) Which of the following is used as base material in Stereolithography (SLA) process?  
a) Thermoplastics, Metals powders  
b) Thermoplastics, Eutectic metals  
c) Photopolymer  
d) Titanium alloys

Day & Date: Thursday, 16-03-2023  
Time: 02:00 PM To 05:00 PM

Max. Marks: 56

- Instructions:** 1) Q.2 is compulsory, attempt any two out of Q.3 to Q.5.  
2) Q. 6 is compulsory, attempt any two out of Q.7 to Q.9.  
3) Figures to the right indicate full marks.  
4) Assume suitable data if required.

**Section – I**

- Q.2** Explain the need of additive manufacturing with respect to industry applications. **10**
- Q.3** Compare Additive Manufacturing Vs conventional Manufacturing. **09**
- Q.4** Enlist the types of Additive manufacturing process and Illustrate Vat Photopolymerization process in detail. **09**
- Q.5** Explain Material Extrusion Process with neat sketch. **09**

**Section – II**

- Q.6** Discuss different 3D CAD modeling features that can be used during the additive manufacturing process. **10**
- Q.7** Describe the classification of Additive manufacturing with respect to Technology in detail. **09**
- Q.8** Enlist different polymers used in Additive manufacturing. Explain in detail applications and characteristics of any 2 polymers used in additive manufacturing process. **09**
- Q.9** Discuss the different applications of 3D printing in the Medical, Automobile Aerospace and Manufacturing field. **09**

Day & Date: Thursday, 16-03-2023  
 Time: 02:00 PM To 05:00 PM

Max. Marks: 70

- Instructions:** 1) Q. No. 1 is compulsory. It should be solved in the first 30 minutes in Answer book. Page no 03 (Starting page of the Answer Book). Each Question carries one mark.  
 2) Don't forget to Mention question paper set (P/Q/R/S) on top of page.  
 3) Figures to the right indicates full marks

**MCQ/Objective Type Questions**

Duration: 30 Minutes

Marks: 14

**Q.1 Choose the correct alternatives from the options.**

**14**

- 1) Choose the correct sequence to generate prototype.
  - a) 3D CAD data - CAD solid model - STL file - RP prototype
  - b) CAD solid model - 3D CAD data - RP prototype - STL file
  - c) STL file - 3D CAD data - CAD solid model - RP prototype
  - d) 3D CAD data - STL file - CAD solid model - RP prototype
- 2) From following, the alternative name for Rapid Prototyping is \_\_\_\_\_.
  - a) Additive Manufacturing
  - b) Layer Manufacturing
  - c) Direct CAD Manufacturing
  - d) All of the above
- 3) Following is not the type of Geometrical Modeling?
  - a) Solid Modeling
  - b) Drafting
  - c) Surface Modeling
  - d) Wireframe Modeling
- 4) Process of converting STL file model in to layers is called \_\_\_\_\_ in RP.
  - a) chopping
  - b) slicing
  - c) cutting
  - d) trimming
- 5) Full form of STL is \_\_\_\_\_.
  - a) Straight-lithography
  - b) Streto-lithography
  - c) Stereo-lithography
  - d) Straight-lipsography
- 6) In the \_\_\_\_\_ process, one starts with a single block of solid material larger than the final size of the desired object and material is removed until the desired shape is reached.
  - a) Subtractive process
  - b) Additive process
  - c) Formative process
  - d) All of above
- 7) Which of the following is used as base material in Stereolithography (SLA) process?
  - a) Thermoplastics, Metals powders
  - b) Thermoplastics, Eutectic metals
  - c) Photopolymer
  - d) Titanium alloys

- 8) Which kind of laser is used to cut the sheets in LOM?
- |                |                         |
|----------------|-------------------------|
| a) Ruby Laser  | b) Carbon Dioxide Laser |
| c) He-Ne Laser | d) None of these        |
- 9) STL file format is represented by interaction of \_\_\_\_\_.  
a) lines and hexagons      b) lines and rectangles  
c) lines and triangles      d) lines and circles
- 10) Which of the following is used as base material in Selective laser sintering (SLS)?  
a) Photopolymer      b) Thermoplastics, Metal powders  
c) Titanium alloys      d) Various materials
- 11) Which material gives finest surface finish in RP?  
a) ABS      b) PLA  
c) Nylon      d) INF
- 12) Which material is not used in 3D printing?  
a) Nylon      b) ABS  
c) PLA      d) PVC
- 13) Creation, analysis, modification, and optimization is \_\_\_\_\_.  
a) CAD      b) CAM  
c) CAE      d) None of above
- 14) Geometric modelling corresponds to \_\_\_\_\_.  
a) Synthesis phase of CAD  
b) Analysis phase of CAD  
c) Synthesis and Analysis phase of CAD  
d) None of the above

Day & Date: Thursday, 16-03-2023

Max. Marks: 56

Time: 02:00 PM To 05:00 PM

- Instructions:** 1) Q.2 is compulsory, attempt any two out of Q.3 to Q.5.  
2) Q. 6 is compulsory, attempt any two out of Q.7 to Q.9.  
3) Figures to the right indicate full marks.  
4) Assume suitable data if required.

**Section – I**

- Q.2** Explain the need of additive manufacturing with respect to industry applications. **10**
- Q.3** Compare Additive Manufacturing Vs conventional Manufacturing. **09**
- Q.4** Enlist the types of Additive manufacturing process and Illustrate Vat Photopolymerization process in detail. **09**
- Q.5** Explain Material Extrusion Process with neat sketch. **09**

**Section – II**

- Q.6** Discuss different 3D CAD modeling features that can be used during the additive manufacturing process. **10**
- Q.7** Describe the classification of Additive manufacturing with respect to Technology in detail. **09**
- Q.8** Enlist different polymers used in Additive manufacturing. Explain in detail applications and characteristics of any 2 polymers used in additive manufacturing process. **09**
- Q.9** Discuss the different applications of 3D printing in the Medical, Automobile Aerospace and Manufacturing field. **09**

**S. Y. (B.Tech.) (Sem - II) (New) (CBCS) Examination: Oct/Nov-2022**  
**MECHANICAL ENGINEERING**  
**Renewable Energy Sources**

Day & Date: Thursday, 16-03-2023  
 Time: 02:00 PM To 05:00 PM

Max. Marks: 70

- Instructions:** 1) Q. No. 1 is compulsory. It should be solved in the first 30 minutes in Answer book. Page no 03 (Starting page of the Answer Book). Each Question carries one mark.  
 2) Don't forget to Mention question paper set (P/Q/R/S) on top of page.  
 3) Figures to the right indicates full marks

**MCQ/Objective Type Questions**

Duration: 30 Minutes

Marks: 14

**Q.1 Choose the correct alternatives from the options. 14**

- 1) Which of the following is not a renewable source of energy?
 

|          |          |
|----------|----------|
| a) Wind  | b) Tidal |
| c) Solar | d) Coal  |
- 2) Solar collectors are coated with Black colour for the purpose of \_\_\_\_\_.
 

|                                     |
|-------------------------------------|
| a) For minimum absorbtion of energy |
| b) For maximum absorbtion of energy |
| c) For maximum reflection of energy |
| d) None of above                    |
- 3) What is a solar collector?
 

|                                                      |
|------------------------------------------------------|
| a) A system to collect heat by absorbing sunlight    |
| b) A system to collect rainwater using sunlight      |
| c) A system to collect electricity by using sunlight |
| d) A device to reflect sunlight back                 |
- 4) Solar Power plant use \_\_\_\_\_ type of Collectors.
 

|                   |                      |
|-------------------|----------------------|
| a) Concentrating  | b) Flat plate        |
| c) Evacuated tube | d) None of the above |
- 5) Solar Energy can be directly converted into thermal energy by using \_\_\_\_\_.
 

|                      |                      |
|----------------------|----------------------|
| a) Photovoltaic cell | b) Rechargeable cell |
| c) Solar Collector   | d) Dry cell          |
- 6) Wind turbine converts \_\_\_\_\_ of wind into Mechanical energy.
 

|                    |                   |
|--------------------|-------------------|
| a) Potential scale | b) Kinetic energy |
| c) Chemical energy | d) Thermal energy |
- 7) Why is feathering of wind turbine blades required?
 

|                                                               |
|---------------------------------------------------------------|
| a) To increase drag                                           |
| b) To reduce drag                                             |
| c) To prevent the blades from being destroyed by strong winds |
| d) To extract power from strong winds originating from storms |

- 8) What is the major problem with wind energy?
- a) Generates energy from wind
  - b) It is a renewable source of energy
  - c) Requires large area of land
  - d) Compact and does not require large area of land
- 9) How is the temperature maintained in a bubbling fluidized bed?
- a) Biomass
  - b) Gasification agent
  - c) A constant ratio of biomass and gasification agent
  - d) Manipulating the ratio of biomass and gasification agent
- 10) Which of the following is not an application of wind energy?
- a) Electricity
  - b) Steam engine
  - c) Agriculture
  - d) Energy storage for emergencies
- 11) Which of the following technologies are used to convert biomass into useful energy forms?
- a) Bio-chemical process
  - b) Galvanization
  - c) Doping
  - d) Photoelectric effect
- 12) What is the byproduct of an ocean thermal energy conversion system?
- a) Electricity
  - b) Clean water
  - c) Water vapour
  - d) Cold water
- 13) Biomass is used in the production of \_\_\_\_\_.
- a) fibres
  - b) chemicals
  - c) transportation fuels
  - d) biochemicals
- 14) The aerobic digestion of sewage is utilized in the production of \_\_\_\_\_.
- a) metal articles
  - b) biofuels
  - c) biomass
  - d) synthetic fuels

**S. Y. (B.Tech.) (Sem - II) (New) (CBCS) Examination: Oct/Nov-2022**  
**MECHANICAL ENGINEERING**  
**Renewable Energy Sources**

Day &amp; Date: Thursday, 16-03-2023

Max. Marks: 56

Time: 02:00 PM To 05:00 PM

- Instructions:** 1) Attempt any two question from each section.  
 2) Figures to the right indicate full marks.  
 3) Assume suitable data if required.  
 4) Use of scientific calculator is allowed.

**Section – I**

**Q.2 Solve**

- |    |                                                                                                                 |           |
|----|-----------------------------------------------------------------------------------------------------------------|-----------|
| a) | What is the status of non-conventional energy sources in India, and what are their future prospect?             | <b>04</b> |
| b) | What are the disadvantages of conventional energy sources? Explain the need of non-conventional energy sources? | <b>05</b> |
| c) | What are the main advantages of flat plate solar collector?                                                     | <b>05</b> |

**Q.3 Solve**

- |    |                                                                                   |           |
|----|-----------------------------------------------------------------------------------|-----------|
| a) | How does sun tracking helps in energy collection by a flat plate solar collector? | <b>04</b> |
| b) | What is the present status of nuclear energy and what are their future prospects? | <b>05</b> |
| c) | What are limitations of solar energy?                                             | <b>05</b> |

**Q.4 Write a short note on.**

- |    |                             |           |
|----|-----------------------------|-----------|
| a) | Application of Solar Energy | <b>04</b> |
| b) | Evacuated tube collectors   | <b>05</b> |
| c) | Renewable energy sources    | <b>05</b> |

**Section – II**

**Q.5 Solve**

- |    |                                                                |           |
|----|----------------------------------------------------------------|-----------|
| a) | What factors led to the accelerated development of wind power? | <b>04</b> |
| b) | Explain the mechanism of production of local winds.            | <b>05</b> |
| c) | What is the main advantage and disadvantage of biomass energy? | <b>05</b> |

**Q.6 Solve**

- |    |                                                             |           |
|----|-------------------------------------------------------------|-----------|
| a) | Explain the process of gasification of solid bio fuels?     | <b>05</b> |
| b) | What is the effect of pumping on the output of tidal plant? | <b>05</b> |
| c) | Explain the technology available for OTEC.                  | <b>04</b> |

**Q.7 Write a short note on.**

- |    |                                                   |           |
|----|---------------------------------------------------|-----------|
| a) | Advantages and disadvantages of OTEC system       | <b>04</b> |
| b) | Type of bio fuels                                 | <b>05</b> |
| c) | Advantages and disadvantages of ocean wave energy | <b>05</b> |

Day & Date: Thursday, 16-03-2023  
 Time: 02:00 PM To 05:00 PM

Max. Marks: 70

- Instructions:** 1) Q. No. 1 is compulsory. It should be solved in the first 30 minutes in Answer book. Page no 03 (Starting page of the Answer Book). Each Question carries one mark.  
 2) Don't forget to Mention question paper set (P/Q/R/S) on top of page.  
 3) Figures to the right indicates full marks

**MCQ/Objective Type Questions**

Duration: 30 Minutes

Marks: 14

**Q.1 Choose the correct alternatives from the options.**

**14**

- 1) What is the major problem with wind energy?
  - a) Generates energy from wind
  - b) It is a renewable source of energy
  - c) Requires large area of land
  - d) Compact and does not require large area of land
- 2) How is the temperature maintained in a bubbling fluidized bed?
  - a) Biomass
  - b) Gasification agent
  - c) A constant ratio of biomass and gasification agent
  - d) Manipulating the ratio of biomass and gasification agent
- 3) Which of the following is not an application of wind energy?
  - a) Electricity
  - b) Steam engine
  - c) Agriculture
  - d) Energy storage for emergencies
- 4) Which of the following technologies are used to convert biomass into useful energy forms?
 

|                         |                         |
|-------------------------|-------------------------|
| a) Bio-chemical process | b) Galvanization        |
| c) Doping               | d) Photoelectric effect |
- 5) What is the byproduct of an ocean thermal energy conversion system?
 

|                 |                |
|-----------------|----------------|
| a) Electricity  | b) Clean water |
| c) Water vapour | d) Cold water  |
- 6) Biomass is used in the production of \_\_\_\_\_.
 

|                         |                 |
|-------------------------|-----------------|
| a) fibres               | b) chemicals    |
| c) transportation fuels | d) biochemicals |
- 7) The aerobic digestion of sewage is utilized in the production of \_\_\_\_\_.
 

|                   |                    |
|-------------------|--------------------|
| a) metal articles | b) biofuels        |
| c) biomass        | d) synthetic fuels |

- 8) Which of the following is not a renewable source of energy?
- a) Wind
  - b) Tidal
  - c) Solar
  - d) Coal
- 9) Solar collectors are coated with Black colour for the purpose of \_\_\_\_\_.  
a) For minimum absorbtion of energy  
b) For maximum absorbtion of energy  
c) For maximum reflection of energy  
d) None of above
- 10) What is a solar collector?  
a) A system to collect heat by absorbing sunlight  
b) A system to collect rainwater using sunlight  
c) A system to collect electricity by using sunlight  
d) A device to reflect sunlight back
- 11) Solar Power plant use \_\_\_\_\_ type of Collectors.  
a) Concentrating- b) Flat plate
- c) Evacuated tube
- d) None of the above

12) Solar Energy can be directly converted into thermal energy by using \_\_\_\_\_.  
a) Photovoltaic cell- b) Rechargeable cell
- c) Solar Collector
- d) Dry cell

13) Wind turbine converts \_\_\_\_\_ of wind into Mechanical energy.  
a) Potential scale- b) Kinetic energy
- c) Chemical energy
- d) Thermal energy

14) Why is feathering of wind turbine blades required?  
a) To increase drag  
b) To reduce drag  
c) To prevent the blades from being destroyed by strong winds  
d) To extract power from strong winds originating from storms

|---------------------------------------------------------------|-------------------|
| a) To increase drag                                           | b) To reduce drag |
| c) To prevent the blades from being destroyed by strong winds |                   |
| d) To extract power from strong winds originating from storms |                   |
- 12) What is the major problem with wind energy?
- |                                                    |                                       |
|----------------------------------------------------|---------------------------------------|
| a) Generates energy from wind                      | b) It is a renewable source of energy |
| c) Requires large area of land                     |                                       |
| d) Compact and does not require large area of land |                                       |
- 13) How is the temperature maintained in a bubbling fluidized bed?
- |                                                             |                       |
|-------------------------------------------------------------|-----------------------|
| a) Biomass                                                  | b) Gasification agent |
| c) A constant ratio of biomass and gasification agent       |                       |
| d) Manipulating the ratio of biomass and gasification agent |                       |
- 14) Which of the following is not an application of wind energy?
- |                                   |                 |
|-----------------------------------|-----------------|
| a) Electricity                    | b) Steam engine |
| c) Agriculture                    |                 |
| d) Energy storage for emergencies |                 |

**S. Y. (B.Tech.) (Sem - II) (New) (CBCS) Examination: Oct/Nov-2022**  
**MECHANICAL ENGINEERING**  
**Renewable Energy Sources**

Day &amp; Date: Thursday, 16-03-2023

Max. Marks: 56

Time: 02:00 PM To 05:00 PM

- Instructions:** 1) Attempt any two question from each section.  
 2) Figures to the right indicate full marks.  
 3) Assume suitable data if required.  
 4) Use of scientific calculator is allowed.

**Section – I**

**Q.2 Solve**

- |    |                                                                                                                 |           |
|----|-----------------------------------------------------------------------------------------------------------------|-----------|
| a) | What is the status of non-conventional energy sources in India, and what are their future prospect?             | <b>04</b> |
| b) | What are the disadvantages of conventional energy sources? Explain the need of non-conventional energy sources? | <b>05</b> |
| c) | What are the main advantages of flat plate solar collector?                                                     | <b>05</b> |

**Q.3 Solve**

- |    |                                                                                   |           |
|----|-----------------------------------------------------------------------------------|-----------|
| a) | How does sun tracking helps in energy collection by a flat plate solar collector? | <b>04</b> |
| b) | What is the present status of nuclear energy and what are their future prospects? | <b>05</b> |
| c) | What are limitations of solar energy?                                             | <b>05</b> |

**Q.4 Write a short note on.**

- |    |                             |           |
|----|-----------------------------|-----------|
| a) | Application of Solar Energy | <b>04</b> |
| b) | Evacuated tube collectors   | <b>05</b> |
| c) | Renewable energy sources    | <b>05</b> |

**Section – II**

**Q.5 Solve**

- |    |                                                                |           |
|----|----------------------------------------------------------------|-----------|
| a) | What factors led to the accelerated development of wind power? | <b>04</b> |
| b) | Explain the mechanism of production of local winds.            | <b>05</b> |
| c) | What is the main advantage and disadvantage of biomass energy? | <b>05</b> |

**Q.6 Solve**

- |    |                                                             |           |
|----|-------------------------------------------------------------|-----------|
| a) | Explain the process of gasification of solid bio fuels?     | <b>05</b> |
| b) | What is the effect of pumping on the output of tidal plant? | <b>05</b> |
| c) | Explain the technology available for OTEC.                  | <b>04</b> |

**Q.7 Write a short note on.**

- |    |                                                   |           |
|----|---------------------------------------------------|-----------|
| a) | Advantages and disadvantages of OTEC system       | <b>04</b> |
| b) | Type of bio fuels                                 | <b>05</b> |
| c) | Advantages and disadvantages of ocean wave energy | <b>05</b> |

**MECHANICAL ENGINEERING**  
**Renewable Energy Sources**

Day & Date: Thursday, 16-03-2023  
 Time: 02:00 PM To 05:00 PM

Max. Marks: 70

- Instructions:** 1) Q. No. 1 is compulsory. It should be solved in the first 30 minutes in Answer book. Page no 03 (Starting page of the Answer Book). Each Question carries one mark.  
 2) Don't forget to Mention question paper set (P/Q/R/S) on top of page.  
 3) Figures to the right indicates full marks

**MCQ/Objective Type Questions**

Duration: 30 Minutes

Marks: 14

**Q.1 Choose the correct alternatives from the options.**

**14**

- 1) Wind turbine converts \_\_\_\_\_ of wind into Mechanical energy.
  - a) Potential scale
  - b) Kinetic energy
  - c) Chemical energy
  - d) Thermal energy
- 2) Why is feathering of wind turbine blades required?
  - a) To increase drag
  - b) To reduce drag
  - c) To prevent the blades from being destroyed by strong winds
  - d) To extract power from strong winds originating from storms
- 3) What is the major problem with wind energy?
  - a) Generates energy from wind
  - b) It is a renewable source of energy
  - c) Requires large area of land
  - d) Compact and does not require large area of land
- 4) How is the temperature maintained in a bubbling fluidized bed?
  - a) Biomass
  - b) Gasification agent
  - c) A constant ratio of biomass and gasification agent
  - d) Manipulating the ratio of biomass and gasification agent
- 5) Which of the following is not an application of wind energy?
  - a) Electricity
  - b) Steam engine
  - c) Agriculture
  - d) Energy storage for emergencies
- 6) Which of the following technologies are used to convert biomass into useful energy forms?
  - a) Bio-chemical process
  - b) Galvanization
  - c) Doping
  - d) Photoelectric effect
- 7) What is the byproduct of an ocean thermal energy conversion system?
  - a) Electricity
  - b) Clean water
  - c) Water vapour
  - d) Cold water

Day &amp; Date: Thursday, 16-03-2023

Max. Marks: 56

Time: 02:00 PM To 05:00 PM

**Instructions:** 1) Solve any two question from section I and Section II.

2) Figures to the right indicate full marks.

**Section – I**

**Q.2 Answer the following question.**

- |    |                                                                                    |           |
|----|------------------------------------------------------------------------------------|-----------|
| a) | Explain Four Wheel drive with neat Sketch. State its advantages and disadvantages. | <b>08</b> |
| b) | Explain with neat sketch working of Single plate Clutch.                           | <b>06</b> |

**Q.3 Answer the following question.**

- |    |                                                                 |           |
|----|-----------------------------------------------------------------|-----------|
| a) | Explain with neat sketch the working of constant mesh Gear Box. | <b>08</b> |
| b) | 1) Explain necessity of transmission                            | <b>03</b> |
|    | 2) Explain double declutching in short                          | <b>03</b> |

**Q.4 Answer the following question.**

- |    |                                                                                      |           |
|----|--------------------------------------------------------------------------------------|-----------|
| a) | Explain the requirements of automobile Brakes. State the types of automobile Brakes. | <b>08</b> |
| b) | Explain working of Propeller shaft and Universal Joint.                              | <b>06</b> |

**Section – II**

**Q.5 Answer the following question.**

- |    |                                                                                         |           |
|----|-----------------------------------------------------------------------------------------|-----------|
| a) | Explain the steering linkages with neat sketch. State the types of steering Geer Boxes, | <b>08</b> |
| b) | <b>Explain in short.</b>                                                                | <b>06</b> |
|    | 1) Caster                                                                               |           |
|    | 2) Camber                                                                               |           |
|    | 3) King pin Inclination                                                                 |           |

**Q.6 Answer the following question.**

- |    |                                                                          |           |
|----|--------------------------------------------------------------------------|-----------|
| a) | State the Types of suspension systems. Explain any one with neat sketch. | <b>08</b> |
| b) | Explain Cross ply, Radial ply, belted bias ply in tyres.                 | <b>06</b> |

**Q.7 Answer the following question.**

- |    |                                                                  |           |
|----|------------------------------------------------------------------|-----------|
| a) | Write a short note on sensors and actuators used in automobiles. | <b>06</b> |
| b) | Explain the construction of battery.                             | <b>04</b> |
| c) | State the advantages of electric vehicles.                       | <b>04</b> |

**14**

- 1) The coil spring in wishbone suspension is placed between the \_\_\_\_\_.  
 a) two wishbones  
 b) upper wishbone and the cross-member  
 c) lower wishbone and the cross-member  
 d) shock absorber and the cross-member
- 2) The turning circle for a car is approximately \_\_\_\_\_.  
 a) 1 metre  
 b) 2 metres  
 c) 10 metres  
 d) 30 metres
- 3) The brake bleeding process removes from system \_\_\_\_\_.  
 a) air  
 b) vacuum  
 c) excess fluid  
 d) excess pressure
- 4) The brake efficiency of a new vehicle is about \_\_\_\_\_.  
 a) 30 per cent  
 b) 50 per cent  
 c) 80 per cent  
 d) 100 per cent
- 5) The cooling system of automobile engine is most simple when the engine is \_\_\_\_\_.  
 a) front  
 b) centre  
 c) rear on the left  
 d) rear on the right
- 6) In case of a four-wheel driven vehicle \_\_\_\_\_.  
 a) clutch operating linkage is simplified  
 b) cooling system is simplified  
 c) the road adhesion is increased  
 d) the road adhesion is decreased
- 7) The frame may get distorted to a parallelogram shape due to \_\_\_\_\_.  
 a) weight of vehicle  
 b) weight of passengers  
 c) cornering force  
 d) wheel impact with road obstacle
- 8) The most effective section against bending is \_\_\_\_\_.  
 a) rectangular bar  
 b) round bar  
 c) round hollow tube  
 d) square hollow section

**S. Y. (B.Tech.) (Sem - II) (New) (CBCS) Examination: Oct/Nov-2022**  
**MECHANICAL ENGINEERING**

**Introduction to Automobile Engineering**

Day & Date: Thursday, 16-03-2023

Max. Marks: 56

Time: 02:00 PM To 05:00 PM

**Instructions:** 1) Solve any two question from section I and Section II.

2) Figures to the right indicate full marks.

**Section – I**

**Q.2 Answer the following question.**

- |    |                                                                                    |           |
|----|------------------------------------------------------------------------------------|-----------|
| a) | Explain Four Wheel drive with neat Sketch. State its advantages and disadvantages. | <b>08</b> |
| b) | Explain with neat sketch working of Single plate Clutch.                           | <b>06</b> |

**Q.3 Answer the following question.**

- |    |                                                                 |           |
|----|-----------------------------------------------------------------|-----------|
| a) | Explain with neat sketch the working of constant mesh Gear Box. | <b>08</b> |
| b) | 1) Explain necessity of transmission                            | <b>03</b> |
|    | 2) Explain double declutching in short                          | <b>03</b> |

**Q.4 Answer the following question.**

- |    |                                                                                      |           |
|----|--------------------------------------------------------------------------------------|-----------|
| a) | Explain the requirements of automobile Brakes. State the types of automobile Brakes. | <b>08</b> |
| b) | Explain working of Propeller shaft and Universal Joint.                              | <b>06</b> |

**Section – II**

**Q.5 Answer the following question.**

- |    |                                                                                         |           |
|----|-----------------------------------------------------------------------------------------|-----------|
| a) | Explain the steering linkages with neat sketch. State the types of steering Geer Boxes, | <b>08</b> |
| b) | <b>Explain in short.</b>                                                                | <b>06</b> |
|    | 1) Caster                                                                               |           |
|    | 2) Camber                                                                               |           |
|    | 3) King pin Inclination                                                                 |           |

**Q.6 Answer the following question.**

- |    |                                                                          |           |
|----|--------------------------------------------------------------------------|-----------|
| a) | State the Types of suspension systems. Explain any one with neat sketch. | <b>08</b> |
| b) | Explain Cross ply, Radial ply, belted bias ply in tyres.                 | <b>06</b> |

**Q.7 Answer the following question.**

- |    |                                                                  |           |
|----|------------------------------------------------------------------|-----------|
| a) | Write a short note on sensors and actuators used in automobiles. | <b>06</b> |
| b) | Explain the construction of battery.                             | <b>04</b> |
| c) | State the advantages of electric vehicles.                       | <b>04</b> |

Day & Date: Thursday, 16-03-2023  
Time: 02:00 PM To 05:00 PM

Max. Marks: 70

- Instructions:** 1) Q. No. 1 is compulsory. It should be solved in the first 30 minutes in Answer book. Page no 03 (Starting page of the Answer Book). Each Question carries one mark.  
2) Don't forget to Mention question paper set (P/Q/R/S) on top of page.  
3) Figures to the right indicates full marks

**MCQ/Objective Type Questions**

Duration: 30 Minutes

Marks: 14

**Q.1 Choose the correct alternatives from the options.**

**14**

- 1) The purpose of transmission in an automobile is \_\_\_\_\_.  
 a) to vary the speed of automobile  
 b) to vary the torque at the road wheels  
 c) to vary the power of automobile  
 d) none of the above
- 2) If the intake air temperature of I.C. engine increases its efficiency will \_\_\_\_\_.  
 a) increase  
 b) decrease  
 c) remain same  
 d) none of the mentioned
- 3) The function of a universal joint is to allow the propeller shaft to \_\_\_\_\_.  
 a) change length  
 b) bend sideways  
 c) transfer torque at a angle  
 d) change inclination
- 4) The vehicle ride will be comfortable if \_\_\_\_\_.  
 a) unsprung weight is kept minimum  
 b) sprung weight is kept minimum  
 c) vehicle weight is kept minimum  
 d) all of the above
- 5) Another name for a torsion bar is \_\_\_\_\_.  
 a) stabilizer bar  
 b) strut rod  
 c) panhard rod  
 d) radius rod
- 6) The coil spring in wishbone suspension is placed between the \_\_\_\_\_.  
 a) two wishbones  
 b) upper wishbone and the cross-member  
 c) lower wishbone and the cross-member  
 d) shock absorber and the cross-member
- 7) The turning circle for a car is approximately \_\_\_\_\_.  
 a) 1 metre  
 b) 2 metres  
 c) 10 metres  
 d) 30 metres
- 8) The brake bleeding process removes from system \_\_\_\_\_.  
 a) air  
 b) vacuum  
 c) excess fluid  
 d) excess pressure

 2) Don't forget to mention Question Paper Set (P/Q/R/S) at the top of the same page.

**MCQ/Objective Type Questions**

Duration: 30 Minutes

Marks: 14

**Q.1 Choose the correct alternatives from the options.**

**14**

- 1) The solution of partial differential equation  $\sqrt{p} + \sqrt{q} = 2$  is \_\_\_\_\_.
  - a)  $z = ax + (1 - \sqrt{b})y + c$
  - b)  $z = a^2x + b^2y + c$
  - c)  $z = ax + (2 - \sqrt{a})^2y + c$
  - d)  $z = a(x + y) + c$
- 2) The solution of partial differential equation  $xp - yq = z$  is \_\_\_\_\_.
  - a)  $\phi(xy, yz) = 0$
  - b)  $\phi\left(\frac{x}{y}, \frac{y}{z}\right) = 0$
  - c)  $\phi(\log x, \log y) = 0$
  - d)  $\phi(x + y, y + z) = 0$
- 3) In solving algebraic and Transcendental equations, which of the following method is called method of tangent?
  - a) Trapezoidal rule
  - b) Newton's Raphson method
  - c) Regula Falsie method
  - d) Weddle's rule
- 4) A positive real root of the equation  $xe^x - 2 = 0$  is lies between \_\_\_\_\_.
  - a) 2 and 3
  - b) 1 and 2
  - c) 3 and 4
  - d) 0 and 1
- 5) In the cosine series of  $f(x) = \pi x - x^2$  for  $0 < x < \pi$ , the constant term is \_\_\_\_\_.
  - a)  $\frac{\pi^2}{4}$
  - b)  $\frac{\pi^2}{16}$
  - c)  $\frac{\pi^2}{6}$
  - d)  $\frac{\pi^2}{2}$
- 6) The coefficient of  $\cos(nx)$  in the Fourier series of  $f(x) = x^3$  in  $(-\pi, \pi)$  is \_\_\_\_\_.
  - a) 0
  - b)  $\frac{1}{n}$
  - c)  $\frac{4(-1)^n}{n^2}$
  - d)  $\frac{-2(-1)^n}{n}$

- 7) Gaussian Quadrature formula is used \_\_\_\_\_.  
 a) To solve partial differential equation  
 b) To solve ordinary differential equation  
 c) To find the roots of transcendental equation  
 d) To evaluate the definite integration.
- 8) For the data  $\begin{matrix} x: & 0 & 0.2 & 0.4 \\ y: & 2 & 4 & 5 \end{matrix}$   
 By Trapezoidal rule the value of integration  $\int_0^{0.4} \frac{1}{y} dx$  is \_\_\_\_\_.  
 a) 1.02  
 b) 0.12  
 c) 0.3010  
 d) 1.0012
- 9) To apply Simpson's 3/8<sup>th</sup> rule, the number of sub interval must be \_\_\_\_\_.  
 a) even  
 b) odd  
 c) multiple of 3  
 d) multiple of 4
- 10) If the Poisson distribution is such that  $P(x = 1) = P(x = 2)$  then the mean  $m$  is \_\_\_\_\_.  
 a) 1  
 b) 3  
 c) 2  
 d) 4
- 11) The area under the standard normal curve from  $z = -\infty$  to  $z = 0$  is \_\_\_\_\_.  
 a) 1  
 b) 0  
 c) 1.5  
 d) 0.5
- 12) The value of coefficient of correlation  $r$  lies between \_\_\_\_\_.  
 a) -3 and 3  
 b) -1 and 1  
 c) 1 and 2  
 d) 2 and 3
- 13) If the probability of defective bulbs is 0.02 then the mean of the distribution of defective bulb in a lot of 1000 bulbs is \_\_\_\_\_.  
 a) 160  
 b) 20  
 c) 200  
 d) 120
- 14) If the coefficient of regressions are  $b_{xy} = \frac{5}{6}$  &  $b_{yx} = \frac{8}{15}$  then the coefficient of correlation 'r' is \_\_\_\_\_.  
 a) 0.67  
 b) 1.5  
 c) 0.5  
 d) 0.4

P

**S.Y (B.Tech.) (Sem-II) (Old) (CBCS) Examination: Oct/Nov-2022**  
**MECHANICAL ENGINEERING**  
**Engineering Mathematics - III**

Day &amp; Date: Monday, 06-03-2023

Max. Marks: 56

Time: 02:00 PM To 05:00 PM

- Instructions: 1) All questions are compulsory.  
 3) Figures to the right indicates full marks.  
 4) Use of non-programmable calculator is allowed.

**Section – I**

**Q.2 Answer any three questions.**

- a) Solve:  $y^2 zp + x^2 zq = xy^2$  03  
 b) Solve:  $p^3 + q^3 = 27z$  03  
 c) Solve:  $py = 2xy + \log q$  03  
 d) Solve:  $3x \frac{\partial z}{\partial x} - 5y \frac{\partial z}{\partial y} = 0$  by the method of separation of variables. 03

- Q.3 a)** Obtain a Fourier series of  $f(x) = x + x^2$  in the range  $-\pi < x < \pi$  06

**OR**

- a) Expand  $f(x) = e^{ax}$  as a Fourier series in interval  $(0, 2\pi)$  06  
 b) Obtain half range cosine series of  $f(x) = x$  in  $0 < x < 2$  04

**Q.4 Answer any three questions.**

- a) Evaluate  $\int_0^6 \frac{e^x}{1+x} dx$  using Simpson's 1/3<sup>rd</sup> rule. (Take  $h = 1$ ) 03  
 b) Evaluate  $\int_2^3 \frac{1}{x+1} dx$  using Gaussian three points formula. 03  
 c) Curve is drawn to pass through the points given by the following table. 03  

|    |   |     |     |     |   |     |     |
|----|---|-----|-----|-----|---|-----|-----|
| x: | 1 | 1.5 | 2   | 2.5 | 3 | 3.5 | 4   |
| y: | 2 | 2.4 | 2.7 | 2.8 | 3 | 2.6 | 2.1 |

Using Simpson's 3/8<sup>th</sup> rule, estimate the area bounded between the curve, the  $x$  – axis and the lines  $x = 1$  and  $x = 4$

 d) Evaluate  $\int_0^1 \int_0^1 \frac{1}{1+x+y} dx dy$  using Trapezoidal rule Taking  $h = 0.5, k = 0.5$  03

**Section – II**

**Q.5 Answer any three questions.**

- a) Find a positive real root of the equation  $x - e^{-x} = 0$  correct to four places of decimal using Newton's Raphson method 03  
 b) Find a positive real root of the equation  $x^3 - 3x - 7 = 0$  is one step of Muller's method. Taking three initial approximation 2, 2.5 and 3 03  
 c) Find the value of  $k$ , if the following function is probability density function. 03  

$$f(x) = \frac{k}{1+x^2}, \quad -\infty < x < \infty$$

- d) From the following results obtain the two regression equations. 03
- |                    | $y$ (yield in Kg) | $x$ (rain fall in cms) |
|--------------------|-------------------|------------------------|
| Mean $\rightarrow$ | 508.4             | 26.7                   |
| S.D $\rightarrow$  | 36.8              | 4.6                    |
- and coefficient of correlation is  $r = 0.52$

**Q.6 Attempt any three from the following.**

- a) Find a positive real root of the equation  $2x - \log_e x - 6 = 0$  correct to three decimal places by False position method 03
- b) The probability that a student in an evening college will graduate is 0.4. Determine the probability that out of 5 students (i) none (ii) one will graduate. 03
- c) If 3% of bulbs manufactured by a company are defective, assuming Poisson distribution find the probability that in a pack of 100 bulbs (i) zero bulbs (ii) two bulbs are defective. 03
- d) Using Newton's Raphson iterative formula, find the approximate value of  $\sqrt{12}$  correct to three decimal places. 03

**Q.7 Attempt any two from the following.**

- a) Obtain the Karl Pearson's coefficient of correlation between export of raw material ( $x$ ) and import of finished goods ( $y$ ) from the data. 05
- |       |    |    |    |    |    |    |    |
|-------|----|----|----|----|----|----|----|
| $x$ : | 42 | 44 | 58 | 55 | 89 | 98 | 66 |
| $y$ : | 56 | 59 | 53 | 58 | 65 | 78 | 58 |
- b) Using Newton's Raphson method, solve the system of non-linear equations  $x^2 + y - 11 = 0$ ,  $y^2 + x - 7 = 0$  starting with the initial values  $x_0 = 3.5$ ,  $y_0 = -1.5$  (Perform two iterations). 05
- c) If the mean life time and standard deviation of battery cells are 12 hrs. and 3 hrs. What percentage of batteries will have life 05
- (i) between 10 and 14 hrs.
- (ii) more than 15 hrs.
- (iii) less than 6 hrs.
- Assume the distribution to be normal.
- (Given: For S.N.V  $z$ , area from  $z = 0$  to  $z = 0.67$  is 0.2486, from  $z = 0$  to  $z = 1$  is 0.3413 and from  $z = 0$  to  $z = 2$  is 0.4772)

**Seat  
No.**

- 8) The solution of partial differential equation  $\sqrt{p} + \sqrt{q} = 2$  is \_\_\_\_\_.  
 a)  $z = ax + (1 - \sqrt{b})y + c$   
 b)  $z = a^2x + b^2y + c$   
 c)  $z = ax + (2 - \sqrt{a})^2y + c$   
 d)  $z = a(x + y) + c$
- 9) The solution of partial differential equation  $xp - yq = z$  is \_\_\_\_\_.  
 a)  $\phi(xy, yz) = 0$   
 b)  $\phi\left(\frac{x}{y}, \frac{y}{z}\right) = 0$   
 c)  $\phi(\log x, \log y) = 0$   
 d)  $\phi(x + y, y + z) = 0$
- 10) In solving algebraic and Transcendental equations, which of the following method is called method of tangent?  
 a) Trapezoidal rule  
 b) Newton's Raphson method  
 c) Regula Falsie method  
 d) Weddle's rule
- 11) A positive real root of the equation  $xe^x - 2 = 0$  is lies between \_\_\_\_\_.  
 a) 2 and 3  
 b) 1 and 2  
 c) 3 and 4  
 d) 0 and 1
- 12) In the cosine series of  $f(x) = \pi x - x^2$  for  $0 < x < \pi$ , the constant term is \_\_\_\_\_.  
 a)  $\frac{\pi^2}{4}$   
 b)  $\frac{\pi^2}{16}$   
 c)  $\frac{\pi^2}{6}$   
 d)  $\frac{\pi^2}{2}$
- 13) The coefficient of  $\cos(nx)$  in the Fourier series of  $f(x) = x^3$  in  $(-\pi, \pi)$  is \_\_\_\_\_.  
 a) 0  
 b)  $\frac{1}{n}$   
 c)  $\frac{4(-1)^n}{n^2}$   
 d)  $\frac{-2(-1)^n}{n}$
- 14) Gaussian Quadrature formula is used \_\_\_\_\_.  
 a) To solve partial differential equation  
 b) To solve ordinary differential equation  
 c) To find the roots of transcendental equation  
 d) To evaluate the definite integration.

Set **Q**

**S.Y (B.Tech.) (Sem-II) (Old) (CBCS) Examination: Oct/Nov-2022**  
**MECHANICAL ENGINEERING**  
**Engineering Mathematics - III**

Day & Date: Monday, 06-03-2023  
 Time: 02:00 PM To 05:00 PM

Max. Marks: 56

- Instructions: 1) All questions are compulsory.  
 2) Figures to the right indicates full marks.  
 3) Use of non-programmable calculator is allowed.

**Section – I****Q.2 Answer any three questions.**

- a) Solve:  $y^2 zp + x^2 zq = xy^2$  **03**  
 b) Solve:  $p^3 + q^3 = 27z$  **03**  
 c) Solve:  $py = 2xy + \log q$  **03**  
 d) Solve:  $3x \frac{\partial z}{\partial x} - 5y \frac{\partial z}{\partial y} = 0$  by the method of separation of variables. **03**

**Q.3 a) Obtain a Fourier series of  $f(x) = x + x^2$  in the range  $-\pi < x < \pi$  **06******OR**

- a) Expand  $f(x) = e^{ax}$  as a Fourier series in interval  $(0, 2\pi)$  **06**  
 b) Obtain half range cosine series of  $f(x) = x$  in  $0 < x < 2$  **04**

**Q.4 Answer any three questions.**

- a) Evaluate  $\int_0^6 \frac{e^x}{1+x} dx$  using Simpson's 1/3<sup>rd</sup> rule. (Take  $h = 1$ ) **03**  
 b) Evaluate  $\int_2^3 \frac{1}{x+1} dx$  using Gaussian three points formula. **03**  
 c) Curve is drawn to pass through the points given by the following table. **03**  

|       |   |     |     |     |   |     |     |
|-------|---|-----|-----|-----|---|-----|-----|
| $x$ : | 1 | 1.5 | 2   | 2.5 | 3 | 3.5 | 4   |
| $y$ : | 2 | 2.4 | 2.7 | 2.8 | 3 | 2.6 | 2.1 |

Using Simpson's 3/8<sup>th</sup> rule, estimate the area bounded between the curve, the  $x$  – axis and the lines  $x = 1$  and  $x = 4$

d) Evaluate  $\int_0^1 \int_0^1 \frac{1}{1+x+y} dx dy$  using Trapezoidal rule Taking  $h = 0.5, k = 0.5$  **03**

**Section – II****Q.5 Answer any three questions.**

- a) Find a positive real root of the equation  $x - e^{-x} = 0$  correct to four places of decimal using Newton's Raphson method **03**  
 b) Find a positive real root of the equation  $x^3 - 3x - 7 = 0$  is one step of Muller's method. Taking three initial approximation 2, 2.5 and 3 **03**  
 c) Find the value of  $k$ , if the following function is probability density function. **03**  

$$f(x) = \frac{k}{1+x^2}, \quad -\infty < x < \infty$$

- d) From the following results obtain the two regression equations. 03
- |                    | $y$ (yield in Kg) | $x$ (rain fall in cms) |
|--------------------|-------------------|------------------------|
| Mean $\rightarrow$ | 508.4             | 26.7                   |
| S.D $\rightarrow$  | 36.8              | 4.6                    |
- and coefficient of correlation is  $r = 0.52$

**Q.6 Attempt any three from the following.**

- a) Find a positive real root of the equation  $2x - \log_e x - 6 = 0$  correct to three decimal places by False position method 03
- b) The probability that a student in an evening college will graduate is 0.4. Determine the probability that out of 5 students (i) none (ii) one will graduate. 03
- c) If 3% of bulbs manufactured by a company are defective, assuming Poisson distribution find the probability that in a pack of 100 bulbs (i) zero bulbs (ii) two bulbs are defective. 03
- d) Using Newton's Raphson iterative formula, find the approximate value of  $\sqrt{12}$  correct to three decimal places. 03

**Q.7 Attempt any two from the following.**

- a) Obtain the Karl Pearson's coefficient of correlation between export of raw material ( $x$ ) and import of finished goods ( $y$ ) from the data. 05
- |       |    |    |    |    |    |    |    |
|-------|----|----|----|----|----|----|----|
| $x$ : | 42 | 44 | 58 | 55 | 89 | 98 | 66 |
| $y$ : | 56 | 59 | 53 | 58 | 65 | 78 | 58 |
- b) Using Newton's Raphson method, solve the system of non-linear equations  $x^2 + y - 11 = 0$ ,  $y^2 + x - 7 = 0$  starting with the initial values  $x_0 = 3.5$ ,  $y_0 = -1.5$  (Perform two iterations). 05
- c) If the mean life time and standard deviation of battery cells are 12 hrs. and 3 hrs. What percentage of batteries will have life 05
- (i) between 10 and 14 hrs.
- (ii) more than 15 hrs.
- (iii) less than 6 hrs.
- Assume the distribution to be normal.
- (Given: For S.N.V  $z$ , area from  $z = 0$  to  $z = 0.67$  is 0.2486, from  $z = 0$  to  $z = 1$  is 0.3413 and from  $z = 0$  to  $z = 2$  is 0.4772)

Marks: 14

14

- Page 13 of 16

- 8) If the probability of defective bulbs is 0.02 then the mean of the distribution of defective bulb in a lot of 1000 bulbs is \_\_\_\_\_.  
a) 160  
b) 20  
c) 200  
d) 120
- 9) If the coefficient of regressions are  $b_{xy} = \frac{5}{6}$  &  $b_{yx} = \frac{8}{15}$  then the coefficient of correlation 'r' is \_\_\_\_\_.  
a) 0.67  
b) 1.5  
c) 0.5  
d) 0.4
- 10) The solution of partial differential equation  $\sqrt{p} + \sqrt{q} = 2$  is \_\_\_\_\_.  
a)  $z = ax + (1 - \sqrt{b})y + c$   
b)  $z = a^2x + b^2y + c$   
c)  $z = ax + (2 - \sqrt{a})^2y + c$   
d)  $z = a(x + y) + c$
- 11) The solution of partial differential equation  $xp - yq = z$  is \_\_\_\_\_.  
a)  $\phi(xy, yz) = 0$   
b)  $\phi\left(\frac{x}{y}, \frac{y}{z}\right) = 0$   
c)  $\phi(\log x, \log y) = 0$   
d)  $\phi(x + y, y + z) = 0$
- 12) In solving algebraic and Transcendental equations, which of the following method is called method of tangent?  
a) Trapezoidal rule  
b) Newton's Raphson method  
c) Regula Falsie method  
d) Weddle's rule
- 13) A positive real root of the equation  $xe^x - 2 = 0$  is lies between \_\_\_\_\_.  
a) 2 and 3  
b) 1 and 2  
c) 3 and 4  
d) 0 and 1
- 14) In the cosine series of  $f(x) = \pi x - x^2$  for  $0 < x < \pi$ , the constant term is \_\_\_\_\_.  
a)  $\frac{\pi^2}{4}$   
b)  $\frac{\pi^2}{16}$   
c)  $\frac{\pi^2}{6}$   
d)  $\frac{\pi^2}{2}$

 Time: 02:00 PM To 05:00 PM

Max. Marks: 70

- Instructions:** 1) Q. No. 1 is compulsory. It should be solved in the first 30 minutes in answer book. Page no 03 (Starting page of the Answer Book). Each question carries one mark.  
 2) Don't forget to Mention question paper set (P/Q/R/S) on top of page.  
 3) Figures to the right indicates full marks

**MCQ/Objective Type Questions**

Duration: 30 Minutes

Marks: 14

**Q.1 Choose the correct alternatives from the options.**

**14**

- 1) The center of pressure acting on a vertically plane surface immersed in a liquid will be \_\_\_\_\_.  
 a) at the center of gravity      b) above the center of gravity  
 c) below the center of gravity      d) at the lowest level
- 2) Discharge of a centrifugal pump is \_\_\_\_\_.  
 a) Directly proportional to N      b) Inversely proportional to N  
 c) Directly proportional to N<sup>2</sup>      d) Inversely proportional to N<sup>2</sup>
- 3) The center of pressure and center of gravity are coincide when \_\_\_\_\_.  
 a) vertical surface immersed in the liquid  
 b) horizontal surface immersed in the liquid  
 c) inclined surface immersed in the liquid  
 d) curved surface immersed in the liquid
- 4) Buoyancy acts on a floating body \_\_\_\_\_.  
 a) vertically upward  
 b) horizontally  
 c) vertically downward  
 d) both vertically upward and horizontally
- 5) The centre of buoyancy of a submerged body \_\_\_\_\_.  
 a) coincides with the centre of gravity of the body  
 b) coincides with the centroid of the displaced volume of the fluid  
 c) is always below the centre of gravity of the body  
 d) is always above the centroid of the displaced volume of liquid
- 6) The flow field represented by the velocity vector  
 $V = axi + by^2 + cz t^2 k$   
 where a, b and c are constants, is  
 a) three-dimensional and unsteady  
 b) three-dimensional and steady  
 c) two-dimensional and steady  
 d) two-dimensional and unsteady

Day & Date: Thursday, 09-03-2023  
 Time: 02:00 PM To 05:00 PM

Max. Marks: 56

**Instructions:** 1) Out of remaining question, attempt any two question from each section.  
 2) Assume suitable data if required.  
 3) Use of scientific calculator is allowed.

**Section – I**

**Q.2 Solve.**

- a) With neat sketch explain the conditions of the equilibrium for floating body. **04**
- b) Derive an expression for total pressure and centre of pressure on an inclined plane immersed in a liquid. **05**
- c) A rectangular plane surface 2 m wide and 3 m deep lies in water in such a way that its plane makes an angle of 30° with the free surface of water. Determine the total pressure and position of centre of pressure when the upper edge is 1.5 m below the free water surface. **05**

**Q.3 Solve.**

- a) What are different types of fluid flow? Explain with an example. **04**
- b) What is venturimeter? Derive an expression for the discharge through venturimeter. **05**
- c) The velocity vector in a fluid flow is given **05**  
 $V = 4x^3i - 10x^2yj + 2tk$   
 Find the velocity and acceleration of a fluid particle at (2, 1, 3) at time  $t = 1$

**Q.4 Solve.**

- a) Define the following terms: **04**
  - 1) Stream line
  - 2) Path line
  - 3) Streak line
  - 4) Laminar flow
- b) Derive Darcy-Weisbach equation for finding loss of head due to friction in pipes. **05**
- c) Derive a condition for maximum transmission power through a pipeline. **05**  
 What is efficiency under such conditions?

## Section – II

## Q.5 Solve.

- a) Explain the different losses that occur in the pipe line connection, with formulae. 04
- b) The difference in water surface levels in two tanks, which are connected by three pipes in series of lengths 300 m, 170 m and 210 m and of diameters 300 mm, 200 mm and 400 mm respectively, is 12 m. Determine the rate of flow of water if co-efficient of friction are .005, .0052 and .0048 respectively by considering: minor losses. 05
- c) The resisting force R of supersonic plane during the flight can be considered as dependent upon the length of aeroplane (l), velocity (v), dynamic viscosity ( $\mu$ ), air density ( $\rho$ ), bulk modulus (K). Express the functional relationship of these variables and the resisting force using Buckingham's  $\pi$ -theorem. 05

## Q.6 Solve:

- a) A Pelton wheel is to be designed for a head of 60 m when running at 200 r.p.m. The Pelton wheel develops 95.6475 kW shaft power. The velocity of the buckets = 0.45 times the velocity of the jet, overall efficiency = 0.85 and co-efficient of the velocity is equal to 0.98. 05
- b) A reaction turbine works at 450 r.p.m. under a head of 120 metres. Its diameter at inlet is 120 cm and the flow area is 0.4 m<sup>2</sup>. The angles made by absolute and relative velocities at inlet are 20° and 60° respectively with the tangential velocity. Determine:  
 1) The volume flow rate,  
 2) The power developed, and  
 3) Hydraulic efficiency.  
 Assume whirl at outlet to be zero. 05
- c) Explain governing of Pelton wheel. 04

## Q.7 Solve:

- a) What is Cavitation? What are its effects on Centrifugal Pumps? What precautions are to be taken against cavitation? 04
- b) A Kaplan turbine working under a head of 20 m develops 11772 kW shaft power. The outer diameter of the runner is 3.5 m and hub diameter is 1.75 m. The guide blade angle at the extreme edge of the runner is 35°. The hydraulic and overall efficiencies of the turbines are 88% and 84% respectively. If the velocity of whirl is zero at outlet, determine:  
 1) Runner vane angles at inlet and outlet at the extreme edge of the runner, and  
 2) Speed of the turbine 05
- c) A centrifugal pump having outer diameter equal to two times the inner diameter and running at 1000 r.p.m. works against a total head of 40 m. The velocity of flow through the impeller is constant and equal to 2.5 m/s. The vanes are set back at an angle of 40° at outlet. If the outer diameter of the impeller is 500 mm and width at outlet is 50 mm, determine:  
 1) Vane angle at inlet  
 2) Work done by impeller on water per second, and  
 3) Manometric efficiency 05

Day & Date: Thursday, 09-03-2023  
Time: 02:00 PM To 05:00 PM

Max. Marks: 70

- Instructions:** 1) Q. No. 1 is compulsory. It should be solved in the first 30 minutes in answer book. Page no 03 (Starting page of the Answer Book). Each question carries one mark.  
2) Don't forget to Mention question paper set (P/Q/R/S) on top of page.  
3) Figures to the right indicates full marks

**MCQ/Objective Type Questions**

Duration: 30 Minutes

Marks: 14

**Q.1 Choose the correct alternatives from the options.**

**14**

- 1) According to Darcy's formula, the loss of head due to friction in the pipe is  
where  $f$  = coefficient of friction  
 $l$  = length of pipe  
 $V$  = average velocity of liquid in pipe, and  
 $d$  = diameter of pipe
  - a)  $4flV^2 / 2gd$
  - b)  $flV^2 / 2gd$
  - c)  $4flV / 2gd$
  - d)  $4flV^2 / gd$
- 2) For laminar flow in circular pipes, the Darcy's friction factor  $f'$  is equal to  
where  $Re$  is Reynold's, number \_\_\_\_\_.
  - a)  $16/Re$
  - b)  $32/Re$
  - c)  $64/Re$
  - d) None of the above
- 3) The Buckingham-Pi theorem is widely used in the dimensional analysis and expresses the resulting equation in terms of \_\_\_\_\_.
  - a) the dependent and independent variables
  - b)  $n$  dimensionless parameters
  - c)  $(n - m)$  dimensionless parameters
  - d) geometric, kinematic and dynamic variables
- 4) Gross head is the difference between \_\_\_\_\_.
  - a) head race and tail race
  - b) head race and net head
  - c) head race and friction losses
  - d) net head and friction losses
- 5) The blade speed ratio of impulse turbine is given as \_\_\_\_\_.
  - a) (Steam velocity at inlet) / (Blade velocity)
  - b) (Blade velocity) / (Steam velocity at exit)
  - c) (Blade velocity) / (Steam velocity at inlet)
  - d) (Steam velocity at exit) / (Blade velocity)
- 6) Pelton turbine is \_\_\_\_\_.
  - a) Tangential flow
  - b) Radial flow
  - c) Axial flow
  - d) Mixed flow

**MCQ/Objective Type Questions**

Duration: 30 Minutes

Marks: 14

**Q.1 Choose the correct alternatives from the options.**

**14**

- 1) Gross head is the difference between \_\_\_\_\_.  
 a) head race and tail race                      b) head race and net head  
 c) head race and friction losses              d) net head and friction losses
- 2) The blade speed ratio of impulse turbine is given as \_\_\_\_\_.  
 a) (Steam velocity at inlet) / (Blade velocity)  
 b) (Blade velocity) / (Steam velocity at exit)  
 c) (Blade velocity) / (Steam velocity at inlet)  
 d) (Steam velocity at exit) / (Blade velocity)
- 3) Pelton turbine is \_\_\_\_\_.  
 a) Tangential flow                                      b) Radial flow  
 c) Axial flow                                              d) Mixed flow
- 4) In a centrifugal pump, the liquid enters the pump \_\_\_\_\_.  
 a) At the centre                                              b) At the bottom  
 c) At the top                                                  d) From sides
- 5) The center of pressure acting on a vertically plane surface immersed in a liquid will be \_\_\_\_\_.  
 a) at the center of gravity                      b) above the center of gravity  
 c) below the center of gravity              d) at the lowest level
- 6) Discharge of a centrifugal pump is \_\_\_\_\_.  
 a) Directly proportional to N              b) Inversely proportional to N  
 c) Directly proportional to  $N^2$               d) Inversely proportional to  $N^2$
- 7) The center of pressure and center of gravity are coincide when \_\_\_\_\_.  
 a) vertical surface immersed in the liquid  
 b) horizontal surface immersed in the liquid  
 c) inclined surface immersed in the liquid  
 d) curved surface immersed in the liquid
- 8) Buoyancy acts on a floating body \_\_\_\_\_.  
 a) vertically upward  
 b) horizontally  
 c) vertically downward  
 d) both vertically upward and horizontally

- 9) The centre of buoyancy of a submerged body \_\_\_\_\_.  
 a) coincides with the centre of gravity of the body  
 b) coincides with the centroid of the displaced volume of the fluid  
 c) is always below the centre of gravity of the body  
 d) is always above the centroid of the displaced volume of liquid
- 10) The flow field represented by the velocity vector  
 $V = axi + by^2 + czt^2k$   
 where a, b and c are constants, is  
 a) three-dimensional and unsteady  
 b) three-dimensional and steady  
 c) two-dimensional and steady  
 d) two-dimensional and unsteady
- 11) Venturi meter is advantageous because \_\_\_\_\_.  
 a) it has much smaller head loss  
 b) its accuracy is quite good  
 c) its coefficient of discharge is more than for an orifice meter  
 d) all the above
- 12) According to Darcy's formula, the loss of head due to friction in the pipe is  
 where  $f$  = coefficient of friction  
 $l$  = length of pipe  
 $V$  = average velocity of liquid in pipe, and  
 $d$  = diameter of pipe  
 a)  $4flV^2 / 2gd$   
 b)  $flV^2 / 2gd$   
 c)  $4flV / 2gd$   
 d)  $4flV^2 / gd$
- 13) For laminar flow in circular pipes, the Darcy's friction factor  $f'$  is equal to  
 where  $Re$  is Reynold's, number \_\_\_\_\_.  
 a)  $16/Re$   
 b)  $32/Re$   
 c)  $64/Re$   
 d) None of the above
- 14) The Buckingham-Pi theorem is widely used in the dimensional analysis  
 and expresses the resulting equation in terms of \_\_\_\_\_.  
 a) the dependent and independent variables  
 b)  $n$  dimensionless parameters  
 c)  $(n - m)$  dimensionless parameters

**MCQ/Objective Type Questions**

Duration: 30 Minutes

Marks: 14

**Q.1 Choose the correct alternatives from the options.**

**14**

- 1) The flow field represented by the velocity vector  
 $V = axi + by^2 + cz^2k$   
 where a, b and c are constants, is  
 a) three-dimensional and unsteady  
 b) three-dimensional and steady  
 c) two-dimensional and steady  
 d) two-dimensional and unsteady
- 2) Venturi meter is advantageous because \_\_\_\_\_.  
 a) it has much smaller head loss  
 b) its accuracy is quite good  
 c) its coefficient of discharge is more than for an orifice meter  
 d) all the above
- 3) According to Darcy's formula, the loss of head due to friction in the pipe is  
 where  $f$  = coefficient of friction  
 $l$  = length of pipe  
 $V$  = average velocity of liquid in pipe, and  
 $d$  = diameter of pipe  
 a)  $4flV^2 / 2gd$   
 b)  $flV^2 / 2gd$   
 c)  $4fV / 2gd$   
 d)  $4flV^2 / gd$
- 4) For laminar flow in circular pipes, the Darcy's friction factor  $f'$  is equal to  
 where  $Re$  is Reynold's, number \_\_\_\_\_.  
 a)  $16/Re$   
 b)  $32/Re$   
 c)  $64/Re$   
 d) None of the above

## Q.5 Solve.

- a) Explain the different losses that occur in the pipe line connection, with formulae. 04
- b) The difference in water surface levels in two tanks, which are connected by three pipes in series of lengths 300 m, 170 m and 210 m and of diameters 300 mm, 200 mm and 400 mm respectively, is 12 m. Determine the rate of flow of water if co-efficient of friction are .005, .0052 and .0048 respectively by considering: minor losses. 05
- c) The resisting force R of supersonic plane during the flight can be considered as dependent upon the length of aeroplane (l), velocity (v), dynamic viscosity ( $\mu$ ), air density ( $\rho$ ), bulk modulus (K). Express the functional relationship of these variables and the resisting force using Buckingham's  $\pi$ -theorem. 05

## Q.6 Solve:

- a) A Pelton wheel is to be designed for a head of 60 m when running at 200 r.p.m. The Pelton wheel develops 95.6475 kW shaft power. The velocity of the buckets = 0.45 times the velocity of the jet, overall efficiency = 0.85 and co-efficient of the velocity is equal to 0.98. 05
- b) A reaction turbine works at 450 r.p.m. under a head of 120 metres. Its diameter at inlet is 120 cm and the flow area is 0.4 m<sup>2</sup>. The angles made by absolute and relative velocities at inlet are 20° and 60° respectively with the tangential velocity. Determine:  
 1) The volume flow rate,  
 2) The power developed, and  
 3) Hydraulic efficiency.  
 Assume whirl at outlet to be zero. 05
- c) Explain governing of Pelton wheel. 04

## Q.7 Solve:

- a) What is Cavitation? What are its effects on Centrifugal Pumps? What precautions are to be taken against cavitation? 04
- b) A Kaplan turbine working under a head of 20 m develops 11772 kW shaft power. The outer diameter of the runner is 3.5 m and hub diameter is 1.75 m. The guide blade angle at the extreme edge of the runner is 35°. The hydraulic and overall efficiencies of the turbines are 88% and 84% respectively. If the velocity of whirl is zero at outlet, determine:  
 1) Runner vane angles at inlet and outlet at the extreme edge of the runner, and  
 2) Speed of the turbine 05
- c) A centrifugal pump having outer diameter equal to two times the inner diameter and running at 1000 r.p.m. works against a total head of 40 m. The velocity of flow through the impeller is constant and equal to 2.5 m/s. The vanes are set back at an angle of 40° at outlet. If the outer diameter of the impeller is 500 mm and width at outlet is 50 mm, determine:  
 1) Vane angle at inlet  
 2) Work done by impeller on water per second, and  
 3) Manometric efficiency 05

Day & Date: Friday, 10-03-2023  
 Time: 02:00 PM To 05:00 PM

Max. Marks: 70

- Instructions:** 1) Q. No. 1 is compulsory. It should be solved in the first 30 minutes in answer book. Page no 03 (Starting page of the Answer Book). Each question carries one mark.  
 2) Don't forget to Mention question paper set (P/Q/R/S) on top of page.  
 3) Figures to the right indicate full marks

**MCQ/Objective Type Questions**

Duration: 30 Minutes

Marks: 14

**Q.1 Choose the correct alternatives from the options.**

**14**

- 1) The motion of a piston in the cylinder of a steam engine is an example of \_\_\_\_\_.  
 a) completely constrained motion  
 b) incompletely constrained motion  
 c) successfully constrained motion  
 d) none of these
- 2) A ball and a socket joint forms a \_\_\_\_\_.  
 a) turning pair  
 b) rolling pair  
 c) sliding pair  
 d) spherical pair
- 3) The direction of linear velocity of any point on a link with respect to another point on the same link is \_\_\_\_\_.  
 a) parallel to the link joining the points  
 b) perpendicular to the link joining the points  
 c) at 45° to the link joining the points  
 d) none of these
- 4) The component of the acceleration, parallel to the velocity of the particle, at the given instant is called \_\_\_\_\_.  
 a) radial component  
 b) Coriolis component  
 c) tangential component  
 d) None of these
- 5) A point B on a rigid link AB moves with respect to A with angular velocity  $\omega$  rad/s. The radial component of the acceleration of B with respect to A, \_\_\_\_\_.  
 a)  $V_{BA} \times AB$   
 b)  $(V_{BA})^2 / AB$   
 c)  $V_{BA} / AB$   
 d) None of these  
 Where,  $V_{BA}$  = Linear velocity of B with respect to A =  $\omega \times AB$
- 6) The size of a cam depends upon \_\_\_\_\_.  
 a) base circle  
 b) pitch circle  
 c) prime circle  
 d) pitch curve
- 7) Offset is provided to a cam follower mechanism to \_\_\_\_\_.  
 a) avoid jerk  
 b) accelerate  
 c) minimize the side thrust  
 d) none of these

- 8) An imaginary circle which by pure rolling action, gives the same motion as the actual gear, is called \_\_\_\_\_.  
a) addendum circle                      b) dedendum circle  
c) clearance circle                      d) pitch circle
- 9) The product of the diametral pitch and circular pitch is equal to \_\_\_\_\_.  
a) 1                                              b)  $\pi$   
c)  $1/\pi$                                               d)  $2\pi$
- 10) The condition of correct gearing is \_\_\_\_\_.  
a) common normal to the pitch surface cuts the line of centers at a fixed point  
b) radius of curvature of two profiles be same  
c) pitch line velocities of teeth be same  
d) none of the above
- 11) The height of a Watt's governor (in meters) is equal to \_\_\_\_\_.  
a)  $8.95/N^2$                                               b)  $89.5/N^2$   
c)  $8950/N^2$                                               d)  $895/N^2$   
where N = Speed of the arm and ball about the spindle axis.
- 12) A Hartnell governor is a \_\_\_\_\_.  
a) spring loaded governor                      b) pendulum type governor  
c) dead weight governor                      d) inertia governor
- 13) In order to have a complete balance of the several revolving masses in different planes \_\_\_\_\_.  
a) the resultant force must be zero  
b) the resultant couple must be zero  
c) both the resultant force and couple must be zero  
d) none of the above
- 14) A disturbing mass  $m_1$  attached to a rotating shaft may be balanced by a single mass  $m_2$  attached in the same plane of rotation as that of  $m_1$  such that \_\_\_\_\_.  
a)  $m_1 \cdot r_2 = m_2 \cdot r_1$                                               b)  $m_1 \cdot r_1 = m_2 \cdot r_2$   
c)  $m_1 \cdot m_2 = r_1 \cdot r_2$                                               d) None of the above

Max. Marks: 56

- Instructions:** 1) Solve any two questions from each section.  
 2) Use of calculator is allowed.  
 3) Figures to the right indicate full marks.  
 4) Draw neat sketches wherever necessary.  
 5) Assume suitable data if necessary and state it clearly.

**Section – I**

- Q.2 a)** Explain any two inversions of four bar chain with neat sketch. **06**  
**b)** In a pin jointed four bar mechanism, as shown in Fig. I,  $AB = 300$  mm,  $BC = CD = 360$  mm and  $AD = 600$  mm. The angle  $BAD = 60^\circ$ . The crank  $AB$  rotates uniformly at 100 rpm. Locate all the instantaneous centres and find the angular velocity of the link  $BC$ . **08**

Figure-I

- Q.3 a)** An engine mechanism is shown in Fig. II. The crank  $OB = 100$  mm and the connecting rod  $BC = 300$  mm with centre of gravity  $K$ , 100 mm from  $B$ . In the position shown, the crankshaft has a speed of 75 rad/s and an angular acceleration of  $1200 \text{ rad/s}^2$ . Determine using relative velocity and acceleration method the following. **10**
- 1) Velocity of  $K$
  - 2) Angular velocity of  $CB$
  - 3) Acceleration of  $K$

- 2) Speed and sense of rotation of C.

Figure - III

**Fig. III**

- Q.6 a)** A Porter governor has equal arms each 250 mm long and pivoted on the axis of rotation. Each ball has a mass of 5 kg and the mass of the central load on the sleeve is 25 kg. The radius of rotation of the ball is 150 mm when the governor begins to lift and 200 mm when the governor is at maximum speed. Find the minimum and maximum speeds and range of speed of the governor. **08**
- b)** Define and explain the following terms relating to governors: **06**
- 1) Stability
  - 2) Sensitiveness
  - 3) Isochronous governor
  - 4) Hunting
  - 5) Effort of a governor
  - 6) Power of a governor
- Q.7 a)** Write a short note on static balancing and dynamic balancing. **04**
- b)** Four masses A, B, C and D revolve at equal radii and are equally spaced along a shaft. The mass B is 7 kg and the radii of C and D make angles of  $90^\circ$  and  $240^\circ$  respectively with the radius of B. Find the magnitude of the masses A, C and D and the angular position of A so that the system may be completely balanced. **10**

**Section – I**

- Q.2 a)** Explain any two inversions of four bar chain with neat sketch. **06**  
**b)** In a pin jointed four bar mechanism, as shown in Fig. I,  $AB = 300$  mm,  $BC = CD = 360$  mm and  $AD = 600$  mm. The angle  $BAD = 60^\circ$ . The crank  $AB$  rotates uniformly at 100 rpm. Locate all the instantaneous centres and find the angular velocity of the link  $BC$ . **08**

- Q.3 a)** An engine mechanism is shown in Fig. II. The crank  $OB = 100$  mm and the connecting rod  $BC = 300$  mm with centre of gravity  $K$ , 100 mm from  $B$ . In the position shown, the crankshaft has a speed of 75 rad/s and an angular acceleration of  $1200 \text{ rad/s}^2$ . Determine using relative velocity and acceleration method the following. **10**
- 1) Velocity of  $K$
  - 2) Angular velocity of  $CB$
  - 3) Acceleration of  $K$

- 4) Angular acceleration of CB

Figure-II

- b) Define kinematic pair and explain types of pairs. 04

- Q.4 a) Define the following terms as applied to cam. 06

- 1) Base circle
- 2) Pitch circle
- 3) Trace point
- 4) Pitch point
- 5) Pressure angle
- 6) Stroke of the follower

- b) A cam is to give the following motion to a knife-edged follower: 08

- 1) Outstroke during  $60^\circ$  of cam rotation;
- 2) Dwell for the next  $30^\circ$  of cam rotation;
- 3) Return stroke during next  $60^\circ$  of cam rotation, and
- 4) Dwell for the remaining  $210^\circ$  of cam rotation

The stroke of the follower is 40 mm and the minimum radius of the cam is 50 mm. The follower moves with uniform velocity during both the outstroke and return strokes. Draw the profile of the cam when the axis of the follower passes through the axis of the cam shaft.

### Section – II

- Q.5 a) Differentiate between involute and cycloidal gear tooth profile. 04

- b) An epicyclic gear train, as shown in Fig. III, is composed of a fixed annular 10

wheel A having 150 teeth. The wheel A is meshing with wheel B which drives wheel D through an idle wheel C, D being concentric with A. The wheels B and C are carried on an arm which revolves clockwise at 100 rpm about the axis of A and D. If the wheels B and D have 25 teeth and 40 teeth respectively.

Find the following:

- 1) Number of teeth on C

- 2) Speed and sense of rotation of C.

Figure - III

**Fig. III**

- Q.6 a)** A Porter governor has equal arms each 250 mm long and pivoted on the axis of rotation. Each ball has a mass of 5 kg and the mass of the central load on the sleeve is 25 kg.  Time: 02:00 PM To 05:00 PM

Max. Marks: 56

- Instructions:** 1) Solve any two questions from each section.  
 2) Use of calculator is allowed.  
 3) Figures to the right indicate full marks.  
 4) Draw neat sketches wherever necessary.  
 5) Assume suitable data if necessary and state it clearly.

**Section – I**

- Q.2 a)** Explain any two inversions of four bar chain with neat sketch. **06**  
**b)** In a pin jointed four bar mechanism, as shown in Fig. I,  $AB = 300$  mm,  $BC = CD = 360$  mm and  $AD = 600$  mm. The angle  $BAD = 60^\circ$ . The crank  $AB$  rotates uniformly at 100 rpm. Locate all the instantaneous centres and find the angular velocity of the link  $BC$ . **08**

Figure-I

- Q.3 a)** An engine mechanism is shown in Fig. II. The crank  $OB = 100$  mm and the connecting rod  $BC = 300$  mm with centre of gravity  $K$ , 100 mm from  $B$ . In the position shown, the crankshaft has a speed of 75 rad/s and an angular acceleration of  $1200 \text{ rad/s}^2$ . Determine using relative velocity and acceleration method the following. **10**
- 1) Velocity of  $K$
  - 2) Angular velocity of  $CB$
  - 3) Acceleration of  $K$

- 4) Angular acceleration of CB

Figure-II

- b) Define kinematic pair and explain types of pairs. 04

- Q.4 a) Define the following terms as applied to cam. 06

- 1) Base circle
- 2) Pitch circle
- 3) Trace point
- 4) Pitch point
- 5) Pressure angle
- 6) Stroke of the follower

- b) A cam is to give the following motion to a knife-edged follower: 08

- 1) Outstroke during  $60^\circ$  of cam rotation;
- 2) Dwell for the next  $30^\circ$  of cam rotation;
- 3) Return stroke during next  $60^\circ$  of cam rotation, and
- 4) Dwell for the remaining  $210^\circ$  of cam rotation

The stroke of the follower is 40 mm and the minimum radius of the cam is 50 mm. The follower moves with uniform velocity during both the outstroke and return strokes. Draw the profile of the cam when the axis of the follower passes through the axis of the cam shaft.

### Section – II

- Q.5 a) Differentiate between involute and cycloidal gear tooth profile. 04

- b) An epicyclic gear train, as shown in Fig. III, is composed of a fixed annular 10

wheel A having 150 teeth. The wheel A is meshing with wheel B which drives wheel D through an idle wheel C, D being concentric with A. The wheels B and C are carried on an arm which revolves clockwise at 100 rpm about the axis of A and D. If the wheels B and D have 25 teeth and 40 teeth respectively.

Find the following:

- 1) Number of teeth on C

- 2) Speed and sense of rotation of C.

Figure - III

**Fig. III**

- Q.6 a)** A Porter governor has equal arms each 250 mm long and pivoted on the axis of rotation. Each ball has a mass of 5 kg and the mass of the central load on the sleeve is 25 kg. The radius of rotation of the ball is 150 mm when the governor begins to lift and 200 mm when the governor is at maximum speed. Find the minimum and maximum speeds and range of speed of the governor. **08**
- b)** Define and explain the following terms relating to governors: **06**
- 1) Stability
  - 2) Sensitiveness
  - 3) Isochronous governor
  - 4) Hunting
  - 5) Effort of a governor
  - 6) Power of a governor
- Q.7 a)** Write a short note on static balancing and dynamic balancing. **04**
- b)** Four masses A, B, C and D revolve at equal radii and are equally spaced along a shaft. The mass B is 7 kg and the radii of C and D make angles of  $90^\circ$  and  $240^\circ$  respectively with the radius of B. Find the magnitude of the masses A, C and D and the angular position of A so that the system may be completely balanced. **10**

**Mechatronic Systems**

Day & Date: Tuesday, 14-03-2023  
 Time: 02:00 PM To 05:00 PM

Max. Marks: 70

- Instructions:** 1) Q. No. 1 is compulsory. It should be solved in the first 30 minutes in answer book. Page no 03 (Starting page of the Answer Book). Each question carries one mark.  
 2) Don't forget to Mention question paper set (P/Q/R/S) on top of page.  
 3) Figures to the right indicates full marks.

**MCQ/Objective Type Questions**

Duration: 30 Minutes

Marks: 14

**Q.1 Choose the correct alternatives from the options.**

**14**

- 1) Where and when was the word Mechatronics invented?
 

|                  |                  |
|------------------|------------------|
| a) Japan (1960)  | b) Japan (1980)  |
| c) Europe (1960) | d) Europe (1980) |
- 2) A servo motor is a typical example of \_\_\_\_\_.
 

|                       |                        |
|-----------------------|------------------------|
| a) Electronics system | b) Mechanical system   |
| c) Computer system    | d) Mechatronics system |
- 3) What is the function of an input signal conditioning unit?
 

|                                                           |
|-----------------------------------------------------------|
| a) To produce control signals                             |
| b) To amplify the signal and convert it into digital form |
| c) To perform mechanical work                             |
| d) To produce electrical signals                          |
- 4) Potentiometer as a displacement sensor works on the principle of \_\_\_\_\_.
 

|                                     |
|-------------------------------------|
| a) Mutual Inductance                |
| b) Self Inductance                  |
| c) Variable Resistance Transduction |
| d) Hall Effect                      |
- 5) LIDAR stands for \_\_\_\_\_.
 

|                                  |
|----------------------------------|
| a) Light Detection and Radiation |
| b) Light Detection and Ranging   |
| c) Lithium Detector and Radiator |
| d) Lithium Detection and Ranging |
- 6) A microcontroller at-least should consist of \_\_\_\_\_.
 

|                                        |
|----------------------------------------|
| a) RAM, ROM, I/O ports and timers      |
| b) CPU, RAM, I/O ports and timers      |
| c) CPU, RAM, ROM, I/O ports and timers |
| d) CPU, ROM, I/O ports and timers      |
- 7) Unlike microprocessors, microcontrollers make use of batteries because they have:
 

|                            |                            |
|----------------------------|----------------------------|
| a) high power dissipation  | b) low power consumption   |
| c) low voltage consumption | d) low current consumption |

- 8) Which is a false statement regarding DAQ (Data acquisition) systems?
- a) It can measure physical phenomenon which can be sampled
  - b) Signal conditioning can be done
  - c) DAQ system can generate its own physical sample sets
  - d) Analog to digital conversion can be done
- 9) Which conversion takes place when music is played from a memory card?
- a) AAC
  - b) ADC
  - c) DDC
  - d) DAC
- 10) Which is not a property of group drive?
- a) Less initial cost than individual drive
  - b) Less maintenance cost than individual drive
  - c) Low power factor
  - d) Provides constant motor speed
- 11) IEEE 488 is more commonly known as:
- a) GPIB
  - b) PCI Express
  - c) FireWire
  - d) Serial ATA
- 12) The programmable logic controllers are used in \_\_\_\_.
- a) Manufacturing
  - b) Automation
  - c) Both a and b
  - d) None of the above
- 13) What are the components that make the programmable logic controller work?
- a) Input and output module
  - b) CPU
  - c) Power supply
  - d) All of the above
- 14) Which transmission media provides the highest transmission speed in a network?
- a) coaxial cable
  - b) twisted pair cable
  - c) optical fiber
  - d) electrical cable

**S.Y. (B.Tech.) (Sem - II) (Old) (CBCS) Examination: Oct/Nov-2022**  
**MECHANICAL ENGINEERING**  
**Mechatronic Systems**

Day & Date: Tuesday, 14-03-2023  
 Time: 02:00 PM To 05:00 PM

Max. Marks: 70

- Instructions:** 1) Q. No. 1 is compulsory. It should be solved in the first 30 minutes in answer book. Page no 03 (Starting page of the Answer Book). Each question carries one mark.  
 2) Don't forget to Mention question paper set (P/Q/R/S) on top of page.  
 3) Figures to the right indicates full marks.

**MCQ/Objective Type Questions**

Duration: 30 Minutes

Marks: 14

**Q.1 Choose the correct alternatives from the options.**

**14**

- 1) A microcontroller at-least should consist of \_\_\_\_\_.  
 a) RAM, ROM, I/O ports and timers  
 b) CPU, RAM, I/O ports and timers  
 c) CPU, RAM, ROM, I/O ports and timers  
 d) CPU, ROM, I/O ports and timers
- 2) Unlike microprocessors, microcontrollers make use of batteries because they have:  
 a) high power dissipation                      b) low power consumption  
 c) low voltage consumption                      d) low current consumption
- 3) Which is a false statement regarding DAQ (Data acquisition) systems?  
 a) It can measure physical phenomenon which can be sampled  
 b) Signal conditioning can be done  
 c) DAQ system can generate its own physical sample sets  
 d) Analog to digital conversion can be done
- 4) Which conversion takes place when music is played from a memory card?  
 a) AAC                                                      b) ADC  
 c) DDC                                                      d) DAC
- 5) Which is not a property of group drive?  
 a) Less initial cost than individual drive  
 b) Less maintenance cost than individual drive  
 c) Low power factor  
 d) Provides constant motor speed
- 6) IEEE 488 is more commonly known as:  
 a) GPIB                                                      b) PCI Express  
 c) FireWire                                                      d) Serial ATA
- 7) The programmable logic controllers are used in \_\_\_\_\_.  
 a) Manufacturing                                                      b) Automation  
 c) Both a and b                                                      d) None of the above

- 8) What are the components that make the programmable logic controller work?
- a) Input and output module
  - b) CPU
  - c) Power supply
  - d) All of the above
- 9) Which transmission media provides the highest transmission speed in a network?
- a) coaxial cable
  - b) twisted pair cable
  - c) optical fiber
  - d) electrical cable
- 10) Where and when was the word Mechatronics invented?
- a) Japan (1960)
  - b) Japan (1980)
  - c) Europe (1960)
  - d) Europe (1980)
- 11) A servo motor is a typical example of \_\_\_\_\_.
- a) Electronics system
  - b) Mechanical system
  - c) Computer system
  - d) Mechatronics system
- 12) What is the function of an input signal conditioning unit?
- a) To produce control signals
  - b) To amplify the signal and convert it into digital form
  - c) To perform mechanical work
  - d) To produce electrical signals
- 13) Potentiometer as a displacement sensor works on the principle of \_\_\_\_\_.
- a) Mutual Inductance
  - b) Self Inductance
  - c) Variable Resistance Transduction
  - d) Hall Effect
- 14) LIDAR stands for \_\_\_\_\_.
- a) Light Detection and Radiation
  - b) Light Detection and Ranging
  - c) Lithium Detector and Radiator
  - d) Lithium Detection and Ranging

**S.Y. (B.Tech.) (Sem - II) (Old) (CBCS) Examination: Oct/Nov-2022**  
**MECHANICAL ENGINEERING**  
**Mechatronic Systems**

Day & Date: Tuesday, 14-03-2023  
Time: 02:00 PM To 05:00 PM

Max. Marks: 56

**Instructions:** 1) Solve any two questions from Section-I and Section-II.  
2) Figures to the right indicate full marks.

**Section – I**

- |            |                                                                                         |           |
|------------|-----------------------------------------------------------------------------------------|-----------|
| <b>Q.2</b> | <b>a)</b> Explain key elements of mechatronic system.                                   | <b>07</b> |
|            | <b>b)</b> Explain application of mechatronics in car engine management.                 | <b>07</b> |
| <b>Q.3</b> | <b>a)</b> Explain classification of sensors.                                            | <b>07</b> |
|            | <b>b)</b> Explain with neat sketch linear and rotary variable differential transformer. | <b>07</b> |
| <b>Q.4</b> | <b>a)</b> Explain features of 8085 microprocessor.                                      | <b>07</b> |
|            | <b>b)</b> Differentiate between microprocessor and microcontroller.                     | <b>07</b> |

**Section – II**

- |            |                                                                                                                 |           |
|------------|-----------------------------------------------------------------------------------------------------------------|-----------|
| <b>Q.5</b> | <b>a)</b> What is meant by signal conditioning and what are the different types of signal conditioner?          | <b>07</b> |
|            | <b>b)</b> Explain signal processing. How signal processing is done and write applications of signal processing. | <b>07</b> |
| <b>Q.6</b> | <b>a)</b> Explain basic architecture of PLC.                                                                    | <b>07</b> |
|            | <b>b)</b> Explain with neat sketch NPN and PNP sourcing and sinking circuits.                                   | <b>07</b> |
| <b>Q.7</b> | <b>a)</b> What is computer network? Explain key components of computer networks.                                | <b>07</b> |
|            | <b>b)</b> Define Network Topology. Explain any two network topologies.                                          | <b>07</b> |

**MCQ/Objective Type Questions**

Duration: 30 Minutes

Marks: 14

**Q.1 Choose the correct alternatives from the options.**

**14**

- 1) A load curve is a plot of \_\_\_\_\_.  
 a) Load versus generation capacity  
 b) Load versus current  
 c) Load versus cost of power  
 d) Load versus time
- 2) An Inspection survey and analysis of energy flows for energy conservation in a building is called as \_\_\_\_\_.  
 a) Energy Management  
 b) Energy Audit  
 c) Energy Conservation  
 d) None of above
- 3) The solar constant value is \_\_\_\_\_.  
 a) 1327 W/m<sup>2</sup>  
 b) 1366 W/m<sup>2</sup>  
 c) 1357 W/m<sup>2</sup>  
 d) 1377 W/m<sup>2</sup>
- 4) Which of the following power plant have longest physical life?  
 a) Thermal power plant  
 b) Nuclear power plant  
 c) Hydroelectric power plant  
 d) Diesel power plant
- 5) In hydroelectric power, what is necessary for the production of power throughout the Year?  
 a) Dams filled with water  
 b) High amount of air  
 c) High intense sunlight  
 d) Nuclear power
- 6) A system has a connected load of 100 kW, the peak load of 80 kW. base load of 20 kW and an average load of 40 kW, will have a load factor of \_\_\_\_\_.  
 a) 40%  
 b) 50%  
 c) 60%  
 d) 80%
- 7) What does WECS stands for?  
 a) Wind energy conversion system  
 b) Wind engine control system  
 c) Wind energy combined system  
 d) Wind engine comparison system

Set

P

**S. Y. (B.Tech.) (Sem - II) (Old) (CBCS) Examination: Oct/Nov-2022**  
**MECHANICAL ENGINEERING**  
**Power Plant Engineering**

Day &amp; Date: Tuesday, 14-03-2023

Max. Marks: 56

Time: 02:00 PM To 05:00 PM

- Instructions:** 1) Solve any two questions from each section.  
 2) Use of calculator is allowed.  
 3) Figures to the right indicate full marks.  
 4) Assume additional suitable data, if necessary and mention it clearly.

**Section – I**

- Q.2** a) What are the different types of Load Curves? Explain any one in detail with a neat sketch. **05**  
 b) What is Tariff? Explain any one Tariff Method. **05**  
 c) Explain in short Straight Line Method of Depreciation with figure. **04**
- Q.3** a) Explain the role of NTPC and NPCIL in Power Development. **05**  
 b) Write a short note on the role of Power Grid Corporation in India (PGCIL). **04**  
 c) Explain the requirement of Compressed Air Storage Plants. **05**
- Q.4** a) What are the various factors considered during Selection of Site for Power Station? **05**  
 b) The load supplied by a power station is given below: **05**

| Time (Hr.) | 0 - 6 | 6 - 12 | 12 - 14 | 14 - 18 | 18 - 24 |
|------------|-------|--------|---------|---------|---------|
| Load (MW)  | 35    | 90     | 70      | 100     | 50      |

Draw the load curve & load duration curve. Determine plant capacity factor if plant capacity is 150 MW.

- c) Explain in short the role of the Private Sector in India for Power development. **04**

**Section – II**

- Q.5** a) Write a short note on Pyranometer. **05**  
 b) What is the role of energy audit in energy conservation? **04**  
 c) What is Tidal Energy? Explain Single Basin System Tidal Power Plant. **05**
- Q.6** a) What are the types of Energy Audit? Explain any one in detail. **05**  
 b) What are the Non-concentrating types Collectors? Explain Liquid Flat Plate Collector with a neat sketch. **05**  
 c) Explain with a neat sketch Closed OTEC Cycle Power Plant. **04**

- Q.7**
- |           |                                                                              |           |
|-----------|------------------------------------------------------------------------------|-----------|
| <b>a)</b> | Give a list and explain in short different energy audit instruments.         | <b>05</b> |
| <b>b)</b> | Give classification of wind mill and state its advantages and disadvantages. | <b>05</b> |
| <b>c)</b> | Define the following terms with neat sketch:                                 | <b>04</b> |
|           | 1) Latitude                                                                  |           |
|           | 2) Hour Angle                                                                |           |
|           | 3) Altitude                                                                  |           |
|           | 4) Solar Azimuth Angle                                                       |           |

**MCQ/Objective Type Questions**

Duration: 30 Minutes

Marks: 14

**Q.1 Choose the correct alternatives from the options.**

**14**

- 1) Which of the following power plant cannot be used as a base load plant?
 

|                              |                         |
|------------------------------|-------------------------|
| a) Hydroelectric power plant | b) Diesel elected plant |
| c) Nuclear power plant       | d) Thermal power plant  |
- 2) Kinetic energy that results from the oscillation of water is called \_\_\_\_\_.
 

|                         |                 |
|-------------------------|-----------------|
| a) Wave energy          | b) Tidal energy |
| c) Ocean thermal energy | d) Hydro energy |
- 3) Economiser is used to heat \_\_\_\_\_.
 

|               |                     |
|---------------|---------------------|
| a) Feed water | b) Air              |
| c) Flue gases | d) All of the above |
- 4) Which Meter is used to measure the Beam Radiations?
 

|                  |                      |
|------------------|----------------------|
| a) Pyrheliometer | b) Sunshine Recorder |
| c) Anemometer    | d) All of the above  |
- 5) A load curve is a plot of \_\_\_\_\_.
 

|                                    |
|------------------------------------|
| a) Load versus generation capacity |
| b) Load versus current             |
| c) Load versus cost of power       |
| d) Load versus time                |
- 6) An Inspection survey and analysis of energy flows for energy conservation in a building is called as \_\_\_\_\_.
 

|                        |                  |
|------------------------|------------------|
| a) Energy Management   | b) Energy Audit  |
| c) Energy Conservation | d) None of above |
- 7) The solar constant value is \_\_\_\_\_.
 

|                          |                          |
|--------------------------|--------------------------|
| a) 1327 W/m <sup>2</sup> | b) 1366 W/m <sup>2</sup> |
| c) 1357 W/m <sup>2</sup> | d) 1377 W/m <sup>2</sup> |
- 8) Which of the following power plant have longest physical life?
 

|                              |                        |
|------------------------------|------------------------|
| a) Thermal power plant       | b) Nuclear power plant |
| c) Hydroelectric power plant | d) Diesel power plant  |

- 9) In hydroelectric power, what is necessary for the production of power throughout the Year?
- |                           |                       |
|---------------------------|-----------------------|
| a) Dams filled with water | b) High amount of air |
| c) High intense sunlight  | d) Nuclear power      |
- 10) A system has a connected load of 100 kW, the peak load of 80 kW. base load of 20 kW and an average load of 40 kW, will have a load factor of \_\_\_\_.
- |        |        |
|--------|--------|
| a) 40% | b) 50% |
| c) 60% | d) 80% |
- 11) What does WECS stands for?
- |                                  |                                  |
|----------------------------------|----------------------------------|
| a) Wind energy conversion system | b) Wind engine control system    |
| c) Wind energy combined system   | d) Wind engine comparison system |
- 12) Energy conservation act was formed in the year \_\_\_\_.
- |         |         |
|---------|---------|
| a) 1998 | b) 1999 |
| c) 2001 | d) 2000 |
- 13) The Function of solar collectors to convert \_\_\_\_.
- |                                     |                                 |
|-------------------------------------|---------------------------------|
| a) Solar energy into electricity    | b) Solar energy into radiations |
| c) Solar energy into thermal energy | d) none of these                |
- 14) What is hot molten rock called?
- |                  |            |
|------------------|------------|
| a) Lava          | b) Magma   |
| c) Igneous rocks | d) Volcano |

**S. Y. (B.Tech.) (Sem - II) (Old) (CBCS) Examination: Oct/Nov-2022**  
**MECHANICAL ENGINEERING**  
**Power Plant Engineering**

Day &amp; Date: Tuesday, 14-03-2023

Max. Marks: 56

Time: 02:00 PM To 05:00 PM

- Instructions:** 1) Solve any two questions from each section.  
 2) Use of calculator is allowed.  
 3) Figures to the right indicate full marks.  
 4) Assume additional suitable data, if necessary and mention it clearly.

**Section – I**

- Q.2** a) What are the different types of Load Curves? Explain any one in detail with a neat sketch. **05**  
 b) What is Tariff? Explain any one Tariff Method. **05**  
 c) Explain in short Straight Line Method of Depreciation with figure. **04**
- Q.3** a) Explain the role of NTPC and NPCIL in Power Development. **05**  
 b) Write a short note on the role of Power Grid Corporation in India (PGCIL). **04**  
 c) Explain the requirement of Compressed Air Storage Plants. **05**
- Q.4** a) What are the various factors considered during Selection of Site for Power Station? **05**  
 b) The load supplied by a power station is given below: **05**

| Time (Hr.) | 0 - 6 | 6 - 12 | 12 - 14 | 14 - 18 | 18 - 24 |
|------------|-------|--------|---------|---------|---------|
| Load (MW)  | 35    | 90     | 70      | 100     | 50      |

Draw the load curve & load duration curve. Determine plant capacity factor if plant capacity is 150 MW.

- c) Explain in short the role of the Private Sector in India for Power development. **04**

**Section – II**

- Q.5** a) Write a short note on Pyranometer. **05**  
 b) What is the role of energy audit in energy conservation? **04**  
 c) What is Tidal Energy? Explain Single Basin System Tidal Power Plant. **05**
- Q.6** a) What are the types of Energy Audit? Explain any one in detail. **05**  
 b) What are the Non-concentrating types Collectors? Explain Liquid Flat Plate Collector with a neat sketch. **05**  
 c) Explain with a neat sketch Closed OTEC Cycle Power Plant. **04**

- Q.7**
- |           |                                                                              |           |
|-----------|------------------------------------------------------------------------------|-----------|
| <b>a)</b> | Give a list and explain in short different energy audit instruments.         | <b>05</b> |
| <b>b)</b> | Give classification of wind mill and state its advantages and disadvantages. | <b>05</b> |
| <b>c)</b> | Define the following terms with neat sketch:                                 | <b>04</b> |
|           | 1) Latitude                                                                  |           |
|           | 2) Hour Angle                                                                |           |
|           | 3) Altitude                                                                  |           |
|           | 4) Solar Azimuth Angle                                                       |           |

**Seat  
No.**

# Power Plant Engineering

Max. Marks: 70

3) Figures to the right indicate full marks

Marks: 14

14

- 1) A system has a connected load of 100 kW, the peak load of 80 kW. base load of 20 kW and an average load of 40 kW, will have a load factor of \_\_\_\_\_.  
a) 40%                                      b) 50%  
c) 60%                                      d) 80%
- 2) What does WECS stands for?  
a) Wind energy conversion system  
b) Wind engine control system  
c) Wind energy combined system  
d) Wind engine comparison system
- 3) Energy conservation act was formed in the year \_\_\_\_\_.  
a) 1998                                      b) 1999  
c) 2001                                      d) 2000
- 4) The Function of solar collectors to convert \_\_\_\_\_.  
a) Solar energy into electricity  
b) Solar energy into radiations  
c) Solar energy into thermal energy  
d) none of these
- 5) What is hot molten rock called?  
a) Lava                                      b) Magma  
c) Igneous rocks                          d) Volcano
- 6) Which of the following power plant cannot be used as a base load plant?  
a) Hydroelectric power plant            b) Diesel elected plant  
c) Nuclear power plant                  d) Thermal power plant
- 7) Kinetic energy that results from the oscillation of water is called \_\_\_\_\_.  
a) Wave energy                            b) Tidal energy  
c) Ocean thermal energy                d) Hydro energy
- 8) Economiser is used to heat \_\_\_\_\_.  
a) Feed water                              b) Air  
c) Flue gases                              d) All of the above

- 9) Which Meter is used to measure the Beam Radiations?
  - a) Pyrheliometer
  - b) Sunshine Recorder
  - c) Anemometer
  - d) All of the above
- 10) A load curve is a plot of \_\_\_\_\_.
  - a) Load versus generation capacity
  - b) Load versus current
  - c) Load versus cost of power
  - d) Load versus time
- 11) An Inspection survey and analysis of energy flows for energy conservation in a building is called as \_\_\_\_\_.
  - a) Energy Management
  - b) Energy Audit
  - c) Energy Conservation
  - d) None of above
- 12) The solar constant value is \_\_\_\_\_.
  - a)  $1327 \text{ W/m}^2$
  - b)  $1366 \text{ W/m}^2$
  - c)  $1357 \text{ W/m}^2$
  - d)  $1377 \text{ W/m}^2$
- 13) Which of the following power plant have longest physical life?
  - a) Thermal power plant
  - b) Nuclear power plant
  - c) Hydroelectric power plant
  - d) Diesel power plant
- 14) In hydroelectric power, what is necessary for the production of power throughout the Year?
  - a) Dams filled with water
  - b) High amount of air
  - c) High intense sunlight
  - d) Nuclear power

**S. Y. (B.Tech.) (Sem - I) (New) (CBCS) Examination: Oct/Nov-2022**

**ELECTRONICS ENGINEERING**

**Electronic Circuit Analysis and Design**

Day & Date: Tuesday, 21-03-2023

Max. Marks: 70

Time: 02:00 PM To 05:00 PM

- Instructions:** 1) Q. No. 1 is compulsory. It should be solved in the first 30 minutes in Answer book. Page no 03 (Starting page of the Answer Book). Each Question carries one mark.  
2) Don't forget to Mention question paper set (P/Q/R/S) on top of page.  
3) Figures to the right indicates full marks

**MCQ/Objective Type Questions**

Duration: 30 Minutes

Marks: 14

**Q.1 Choose the correct alternatives from the options.**

**14**

- 1) The use of a capacitor filter in a rectifier circuit gives good performance when the load \_\_\_\_\_.
  - a) current is high
  - b) current is low
  - c) voltage is high
  - d) voltage is low
- 2) The main reason why a bleeder resistor is used in a dc power supply is that it \_\_\_\_\_.
  - a) keeps the supply ON
  - b) improves voltage regulation
  - c) improves filtering action
  - d) both b) and c)
- 3) Which rectifier requires four diodes?
  - a) half-wave voltage doubler
  - b) full-wave voltage doubler
  - c) full-wave bridge circuit
  - d) voltage tripler
- 4) In CE configuration the input V-I characteristics are drawn by taking \_\_\_\_\_.
  - a) VCE vs. IC for constant value of IE
  - b) VBE vs. IE for constant value of VCE
  - c) VBE vs. IB for constant value of IC
  - d) VBE vs. IB for constant value of VCB
- 5) A transistor connected in common base configuration has \_\_\_\_\_.
  - a) a high input resistance and low output resistance
  - b) a low input resistance and high output resistance
  - c) a low input resistance and low output resistance
  - d) a high input resistance and a high output resistance
- 6) One of the purpose of negative feedback is to \_\_\_\_\_.
  - a) increase noise
  - b) Decrease harmonic distortion
  - c) increase the voltage gain
  - d) decrease the bandwidth
- 7) JFET and BJT is \_\_\_\_\_.
  - a) Unipolar device and bipolar device
  - b) Voltage controlled device and Current controlled device
  - c) Current controlled device and Voltage controlled device
  - d) both a) & b)

- 8) For VVR application MOSFET is operated in \_\_\_\_\_ region.
- a) ohmic
  - b) saturation
  - c) pinch-off
  - d) both b) & c)
- 9) The basic purpose of filter is to \_\_\_\_\_.
- a) minimize variations in ac input signal
  - b) suppress harmonics in rectified output
  - c) remove ripples from the rectified output
  - d) stabilize dc output voltage
- 10) In a LC filter, the ripple factor, \_\_\_\_\_.
- a) Increases with the load current
  - b) increases with the load resistance
  - c) remains constant with the load current
  - d) has the lowest value
- 11) Early effect in BJT refers to \_\_\_\_\_.
- a) avalanche breakdown
  - b) thermal breakdown
  - c) base narrowing
  - d) Zener breakdown
- 12) If the output of an amplifier is 10 V and 100 mV from the output is fed back to the input, then feedback fraction is \_\_\_\_\_.
- a) 0.10
  - b) 1
  - c) 0.01
  - d) 0.15
- 13) If a three stage amplifier has individual stage gains of 10db, 6db and 15db; then the total gain in db is \_\_\_\_\_.
- a) 600db
  - b) 24db
  - c) 14db
  - d) 31db
- 14) The dc current gain in common base configuration is given by \_\_\_\_\_.
- a)  $\alpha$
  - b)  $\beta$
  - c)  $\beta + 1$
  - d)  $\alpha + 1$

**S. Y. (B.Tech.) (Sem - I) (New) (CBCS) Examination: Oct/Nov-2022**  
**ELECTRONICS ENGINEERING**  
**Electronic Circuit Analysis and Design**

Day & Date: Tuesday, 21-03-2023  
 Time: 02:00 PM To 05:00 PM

Max. Marks: 56

- Instructions:** 1) All questions are compulsory.  
 2) Figures to the right indicate full marks.

**Section – I**

**Q.2 Answer the following question. (Any Four)**

**16**

- Describe working of biased positive clamper with suitable example.
- Plot the output waveforms of clipper circuit supplied with sine input as shown. Name the type of clipper. Assume ideal diode in the circuit.

- Draw circuit diagram of LC filter with FWR and describe its functioning. What is critical inductor in LC filter?
- Explain procedure to plot dc load-line in case of CE BJT amplifier.
- Draw collector to base bias circuit and derive formula of its stability factor.

**Q.3 Answer the following question. (Any Two)**

**12**

- A dc voltage of 380 volt with a peak ripple voltage not more than 7 volts is required to supply across  $500\ \Omega$  load. If inductor filter is used for filtering purpose along with full-wave rectifier circuit, find value of inductance required and other circuit parameters.
- Analyze transistorized CE amplifier using h- parameters.
- What is bias stabilization in BJT? Describe different bias compensation techniques for BJT.

**Section – II**

- Q.4 Answer the following question. (Any Four) 16**
- a) Describe frequency response of single stage CE amplifier.
  - b) What are different types of couplings in multistage amplifiers? Describe any two briefly.
  - c) Draw block diagram for negative feedback in amplifier and derive generalized expression for gain with feedback. What is feedback factor?
  - d) List different biasing methods. Draw circuit diagram for fixed biasing and find stability factor.
  - e) Define the terms  $\alpha$  and  $\beta$  related to BJT. Write equation showing relation between  $\alpha$  and  $\beta$ . Find the value of the base current if common base current gain of BJT is 0.987 and emitter current is 10 mA.
- Q.5 Answer the following question. (Any Two) 12**
- a) Design an unregulated power supply using bridge rectifier and LC filter to provide output voltage of 10V dc, load current of 50mA and ripple factor equal to 6%. State specifications of different components.
  - b) An amplifier with 1K input resistance and 50 K output resistance has voltage gain of 40. The amplifier has now provided with 10 % negative feedback, calculate-
    - 1) Voltage gain with feedback
    - 2) Input resistance with feedback
    - 3) Output resistance with feedback
    - 4) loop-gain
  - c) Define different FET parameters. Draw and explain drain characteristics and transfer characteristics in case of FET.

**Q.3 Answer the following question. (Any Two)**

**12**

- A dc voltage of 380 volt with a peak ripple voltage not more than 7 volts is required to supply across  $500\ \Omega$  load. If inductor filter is used for filtering purpose along with full-wave rectifier circuit, find value of inductance required and other circuit parameters.
- Analyze transistorized CE amplifier using h- parameters.
- What is bias stabilization in BJT? Describe different bias compensation techniques for BJT.

## Section – II

- Q.4 Answer the following question. (Any Four)** **16**
- a) Describe frequency response of single stage CE amplifier.
  - b) What are different types of couplings in multistage amplifiers? Describe any two briefly.
  - c) Draw block diagram for negative feedback in amplifier and derive generalized expression for gain with feedback. What is feedback factor?
  - d) List different biasing methods. Draw circuit diagram for fixed biasing and find stability factor.
  - e) Define the terms  $\alpha$  and  $\beta$  related to BJT. Write equation showing relation between  $\alpha$  and  $\beta$ . Find the value of the base current if common base current gain of BJT is 0.987 and emitter current is 10 mA.
- Q.5 Answer the following question. (Any Two)** **12**
- a) Design an unregulated power supply using bridge rectifier and LC filter to provide output voltage of 10V dc, load current of 50mA and ripple factor equal to 6%. State specifications of different components.
  - b) An amplifier with 1K input resistance and 50 K output resistance has voltage gain of 40. The amplifier has now provided with 10 % negative feedback, calculate-
    - 1) Voltage gain with feedback
    - 2) Input resistance with feedback
    - 3) Output resistance with feedback
    - 4) loop-gain
  - c) Define different FET parameters. Draw and explain drain characteristics and transfer characteristics in case of FET.

**S. Y. (B.Tech.) (Sem - I) (New) (CBCS) Examination: Oct/Nov-2022**  
**ELECTRONICS ENGINEERING**  
**Electronic Circuit Analysis and Design**

Day & Date: Tuesday, 21-03-2023  
 Time: 02:00 PM To 05:00 PM

Max. Marks: 70

- Instructions:** 1) Q. No. 1 is compulsory. It should be solved in the first 30 minutes in Answer book. Page no 03 (Starting page of the Answer Book). Each Question carries one mark.  
 2) Don't forget to Mention question paper set (P/Q/R/S) on top of page.  
 3) Figures to the right indicates full marks

**MCQ/Objective Type Questions**

Duration: 30 Minutes

Marks: 14

**Q.1 Choose the correct alternatives from the options.**

**14**

- 1) Early effect in BJT refers to \_\_\_\_\_.  
 a) avalanche breakdown                      b) thermal breakdown  
 c) base narrowing                                d) Zener breakdown
- 2) If the output of an amplifier is 10 V and 100 mV from the output is fed back to the input, then feedback fraction is \_\_\_\_\_.  
 a) 0.10                                                b) 1  
 c) 0.01                                                d) 0.15
- 3) If a three stage amplifier has individual stage gains of 10db, 6db and 15db; then the total gain in db is \_\_\_\_\_.  
 a) 600db                                              b) 24db  
 c) 14db                                                d) 31db
- 4) The dc current gain in common base configuration is given by \_\_\_\_\_.  
 a)  $\alpha$                                                 b)  $\beta$   
 c)  $\beta + 1$                                               d)  $\alpha + 1$
- 5) The use of a capacitor filter in a rectifier circuit gives good performance when the load \_\_\_\_\_.  
 a) current is high                                      b) current is low  
 c) voltage is high                                      d) voltage is low
- 6) The main reason why a bleeder resistor is used in a dc power supply is that it \_\_\_\_\_.  
 a) keeps the supply ON                              b) improves voltage regulation  
 c) improves filtering action                        d) both b) and c)
- 7) Which rectifier requires four diodes?  
 a) half-wave voltage doubler                      b) full-wave voltage doubler  
 c) full-wave bridge circuit                        d) voltage tripler
- 8) In CE configuration the input V-I characteristics are drawn by taking \_\_\_\_\_.  
 a) VCE vs. IC for constant value of IE  
 b) VBE vs. IE for constant value of VCE  
 c) VBE vs. IB for constant value of IC  
 d) VBE vs. IB for constant value of VCB

- 9) A transistor connected in common base configuration has \_\_\_\_\_.  
a) a high input resistance and low output resistance  
b) a low input resistance and high output resistance  
c) a low input resistance and low output resistance  
d) a high input resistance and a high output resistance
- 10) One of the purpose of negative feedback is to \_\_\_\_\_.  
a) increase noise  
b) Decrease harmonic distortion  
c) increase the voltage gain  
d) decrease the bandwidth
- 11) JFET and BJT is \_\_\_\_\_.  
a) Unipolar device and bipolar device  
b) Voltage controlled device and Current controlled device  
c) Current controlled device and Voltage controlled device  
d) both a) & b)
- 12) For VVR application MOSFET is operated in \_\_\_\_\_ region.  
a) ohmic  
b) saturation  
c) pinch-off  
d) both b) & c)
- 13) The basic purpose of filter is to \_\_\_\_\_.  
a) minimize variations in ac input signal  
b) suppress harmonics in rectified output  
c) remove ripples from the rectified output  
d) stabilize dc output voltage
- 14) In a LC filter, the ripple factor, \_\_\_\_\_.  
a) Increases with the load current  
b) increases with the load resistance  
c) remains constant with the load current  
d) has the lowest value

### MCQ/Objective Type Questions

Duration: 30 Minutes

Marks: 14

**Q.1 Choose the correct alternatives from the options.**

14

- 1) One of the purpose of negative feedback is to \_\_\_\_\_.  
a) increase noise                      b) Decrease harmonic distortion  
c) increase the voltage gain        d) decrease the bandwidth
- 2) JFET and BJT is \_\_\_\_\_.  
a) Unipolar device and bipolar device  
b) Voltage controlled device and Current controlled device  
c) Current controlled device and Voltage controlled device  
d) both a) & b)
- 3) For VVR application MOSFET is operated in \_\_\_\_\_ region.  
a) ohmic                                  b) saturation  
c) pinch-off                             d) both b) & c)
- 4) The basic purpose of filter is to \_\_\_\_\_.  
a) minimize variations in ac input signal  
b) suppress harmonics in rectified output  
c) remove ripples from the rectified output  
d) stabilize dc output voltage
- 5) In a LC filter, the ripple factor, \_\_\_\_\_.  
a) Increases with the load current  
b) increases with the load resistance  
c) remains constant with the load current  
d) has the lowest value
- 6) Early effect in BJT refers to \_\_\_\_\_.  
a) avalanche breakdown            b) thermal breakdown  
c) base narrowing                    d) Zener breakdown
- 7) If the output of an amplifier is 10 V and 100 mV from the output is fed back to the input, then feedback fraction is \_\_\_\_\_.  
a) 0.10                                  b) 1  
c) 0.01                                  d) 0.15

- 8) If a three stage amplifier has individual stage gains of 10db, 6db and 15db; then the total gain in db is \_\_\_\_\_.  
a) 600db  
b) 24db  
c) 14db  
d) 31db
- 9) The dc current gain in common base configuration is given by \_\_\_\_\_.  
a)  $\alpha$   
b)  $\beta$   
c)  $\beta + 1$   
d)  $\alpha + 1$
- 10) The use of a capacitor filter in a rectifier circuit gives good performance when the load \_\_\_\_\_.  
a) current is high  
b) current is low  
c) voltage is high  
d) voltage is low
- 11) The main reason why a bleeder resistor is used in a dc power supply is that it \_\_\_\_\_.  
a) keeps the supply ON  
b) improves voltage regulation  
c) improves filtering action  
d) both b) and c)
- 12) Which rectifier requires four diodes?  
a) half-wave voltage doubler  
b) full-wave voltage doubler  
c) full-wave bridge circuit  
d) voltage tripler
- 13) In CE configuration the input V-I characteristics are drawn by taking \_\_\_\_\_.  
a) VCE vs. IC for constant value of IE  
b) VBE vs. IE for constant value of VCE  
c) VBE vs. IB for constant value of IC  
d) VBE vs. IB for constant value of VCB
- 14) A transistor connected in common base configuration has \_\_\_\_\_.  
a) a high input resistance and low output resistance  
b) a low input resistance and high output resistance  
c) a low input resistance and low output resistance  
d) a high input resistance and a high output resistance

 2) Don't forget to mention Question Paper Set (P/Q/R/S) at the top of the same page.

**MCQ/Objective Type Questions**

Duration: 30 Minutes

Marks: 14

**Q.1 Choose the correct alternatives from the options.**

**14**

- 1) Example of a two port network is
  - a) transformer
  - b) transmission line
  - c) bridge circuit and transistor circuit
  - d) all of the above
- 2) Maximum power is transferred when the load impedance is equal to
  - a) Source impedance
  - b) Zero
  - c) Half of Source Impedance
  - d) none
- 3) If  $Z_{11}=2$  ohm,  $Z_{12}=1$  ohm and  $Z_{21}=1$  ohm and  $Z_{22}=3$  ohm, what is the determinant of matrix?
  - a) 1
  - b)  $1/5$
  - c) 5
  - d) 2
- 4) When two port networks are connected in series the resultant
  - a) Z parameters are a sum of individual parameters
  - b) Y parameters are a sum of individual parameters
  - c) h parameters are a sum of individual parameters
  - d) ABCD parameters are a sum of individual parameters
- 5) If a series circuit RLC circuit, the quality factor is defined as \_\_\_\_\_.
  - a) C
  - b)  $\omega RC$
  - c)  $\omega C$
  - d)  $1/\omega RC$
- 6) In the parallel RLC circuit the impedance at resonance is
  - a) Maximum
  - b) Minimum
  - c) Zero
  - d) Infinity
- 7) Superposition theorem is valid for \_\_\_\_\_.
  - a) Linear systems
  - b) Non-linear systems
  - c) Both linear and non-linear systems
  - d) Neither linear nor non-linear systems

- 8) The system is said to be stable if and only if
- All the poles lie on right half of the s-plane
  - Some of the poles lie on right half of the s-plane
  - All the poles lie on the left half of the s-plane
  - None
- 9) The system is said to be unstable if \_\_\_\_\_.
- all the poles lie on right half of s plane
  - all the poles lie on left half of s plane
  - all poles does not lie on right half of s plane
  - both a and b
- 10) An ideal filter should have
- zero attenuation in pass band
  - infinite attenuation in pass band
  - zero attenuation in attenuation band
  - all of the above
- 11) The function is said to be having simple poles and zeros only if
- The poles are not repeated
  - The zeros are not repeated
  - The poles and zeros are not repeated
  - none of the above
- 12) A Low pass filter is one which
- Passes all low frequencies
  - Attenuates all high frequencies
  - Passes all low frequencies up to cut-off frequencies and attenuates all other frequencies
  - None
- 13) Transient behavior occurs in any circuit when
- there is sudden change in applied voltage
  - the voltage source is suddenly shorted
  - the circuit is connected or disconnected from supply
  - all of the above
- 14) When a series RC circuit is connected to a constant voltage at  $t=0$ , the current passing through the circuit is at  $t=0^+$  is
- |                  |                         |
|------------------|-------------------------|
| a) Infinite      | b) zero                 |
| c) $\frac{V}{R}$ | d) $\frac{V}{\omega C}$ |

**Network Theory and Analysis**

Day & Date: Wednesday, 15-03-2023  
 Time: 02:00 PM To 05:00 PM

Max. Marks: 56

- Instructions:** 1) All question are compulsory.  
 2) Figures to the right indicate full marks.  
 3) Assume suitable data wherever necessary.

**Section – I**

**Q.2 Attempt any four (4x4)**

16

- State and prove Maximum power transfer theorem.
- A Series RLC Circuit has a quality factor of 5 at 50 rad/sec. The current flowing through the circuit at resonance is 10A and the supply voltage is 100V. The total impedance of the circuit is  $20\Omega$ . Find the circuit constants R, L & C.
- Derive an expression of resonant frequency for a parallel resonance circuit.
- Determine Norton's equivalent circuit for above circuit.

- Express Z parameters in terms of Y parameter.

**Q.3 Attempt any two (2x6)**

12

- Prove that bandwidth of series RLC circuit is  $BW = \frac{R}{2\pi L}$  and  $Q = \frac{fr}{BW}$
- Find the Z parameters of the above two port network.

- Find out Thevenin's equivalent circuit for following circuits.

## Section - II

## Q.4 Attempt any four (4x4)

16

- a) Design a T pad attenuator to give an attenuation of 50dB & to work in line of  $600\Omega$  impedance.
- b) Prove that cut off frequency for constant K low pass filter is  $F_c = \frac{1}{\pi \sqrt{LC}}$
- c) Check stability of following polynomial by applying Routh criteria  
 $Q(S) = S^3 + 2S^2 + 8S + 10$
- d) Find  $Z(S)$  for following network

- e) A series RC circuit consists of resistor of  $10\Omega$  and capacitor of  $0.1F$  as shown in figure. A constant voltage of  $20V$  is applied to the circuit at  $t=0$ . Obtain the current equation. Determine the voltage across the resistor and the capacitor.

## Q.5 Attempt any two (2x6)

12

- a) Draw the pole-zero plot for the given network function and hence obtain  $V(t)$ .  $V(s) = \frac{4s(s+2)}{(s+1)(s+3)}$
- b) Derive an expression of current,  $V_R$  &  $V_L$  for dc response of series RL circuit.
- c) Design a HPF (T &  $\pi$  section) having  $f_c = 1\text{KHz}$  and design impedance  $R_o = 600\Omega$

 $Q(S) = S^3 + 2S^2 + 8S + 10$
- d) Find  $Z(S)$  for following network

- e) A series RC circuit consists of resistor of  $10\Omega$  and capacitor of  $0.1F$  as shown in figure. A constant voltage of  $20V$  is applied to the circuit at  $t=0$ . Obtain the current equation. Determine the voltage across the resistor and the capacitor.

**Q.5 Attempt any two (2x6)****12**

- a) Draw the pole-zero plot for the given network function and hence obtain  $V(t)$ .  $V(s) = \frac{4s(s+2)}{(s+1)(s+3)}$
- b) Derive an expression of current,  $V_R$  &  $V_L$  for dc response of series RL circuit.
- c) Design a HPF (T &  $\pi$  section) having  $f_c = 1\text{KHz}$  and design impedance  $R_o = 600\Omega$

Day & Date: Wednesday, 15-03-2023  
 Time: 02:00 PM To 05:00 PM

Max. Marks: 70

- Instructions:** 1) Q. No. 1 is compulsory and should be solved in first 30 minutes in Answer Book. Page No.3 (starting page of the Answer Book). Each question carry one mark.  
 2) Don't forget to mention Question Paper Set (P/Q/R/S) at the top of the same page.

**MCQ/Objective Type Questions**

Duration: 30 Minutes

Marks: 14

**Q.1 Choose the correct alternatives from the options.**

**14**

- 1) The function is said to be having simple poles and zeros only if
  - a) The poles are not repeated
  - b) The zeros are not repeated
  - c) The poles and zeros are not repeated
  - d) none of the above
- 2) A Low pass filter is one which
  - a) Passes all low frequencies
  - b) Attenuates all high frequencies
  - c) Passes all low frequencies up to cut-off frequencies and attenuates all other frequencies
  - d) None
- 3) Transient behavior occurs in any circuit when
  - a) there is sudden change in applied voltage
  - b) the voltage source is suddenly shorted
  - c) the circuit is connected or disconnected from supply
  - d) all of the above
- 4) When a series RC circuit is connected to a constant voltage at  $t=0$ , the current passing through the circuit is at  $t=0^+$  is

**Network Theory and Analysis**

Day & Date: Wednesday, 15-03-2023  
 Time: 02:00 PM To 05:00 PM

Max. Marks: 56

- Instructions:** 1) All question are compulsory.  
 2) Figures to the right indicate full marks.  
 3) Assume suitable data wherever necessary.

**Section – I**

**Q.2 Attempt any four (4x4)**

**16**

- State and prove Maximum power transfer theorem.
- A Series RLC Circuit has a quality factor of 5 at 50 rad/sec. The current flowing through the circuit at resonance is 10A and the supply voltage is 100V. The total impedance of the circuit is  $20\Omega$ . Find the circuit constants R, L & C.
- Derive an expression of resonant frequency for a parallel resonance circuit.
- Determine Norton's equivalent circuit for above circuit.

- Express Z parameters in terms of Y parameter.

**Q.3 Attempt any two (2x6)**

**12**

- Prove that bandwidth of series RLC circuit is  $BW = \frac{R}{2\pi L}$  and  $Q = \frac{fr}{BW}$
- Find the Z parameters of the above two port network.

- Find out Thevenin's equivalent circuit for following circuits.

## Section - II

## Q.4 Attempt any four (4x4)

16

- a) Design a T pad attenuator to give an attenuation of 50dB & to work in line of  $600\Omega$  impedance.
- b) Prove that cut off frequency for constant K low pass filter is  $F_c = \frac{1}{\pi \sqrt{LC}}$
- c) Check stability of following polynomial by applying Routh criteria  
 $Q(S) = S^3 + 2S^2 + 8S + 10$
- d) Find  $Z(S)$  for following network

- e) A series RC circuit consists of resistor of  $10\Omega$  and capacitor of  $0.1F$  as shown in figure. A constant voltage of  $20V$  is applied to the circuit at  $t=0$ . Obtain the current equation. Determine the voltage across the resistor and the capacitor.

## Q.5 Attempt any two (2x6)

12

- a) Draw the pole-zero plot for the given network function and hence obtain  $V(t)$ .  $V(s) = \frac{4s(s+2)}{(s+1)(s+3)}$
- b) Derive an expression of current,  $V_R$  &  $V_L$  for dc response of series RL circuit.
- c) Design a HPF (T &  $\pi$  section) having  $f_c = 1\text{KHz}$  and design impedance  $R_o = 600\Omega$

**MCQ/Objective Type Questions**

Duration: 30 Minutes

Marks: 14

**Q.1 Choose the correct alternatives from the options.**

**14**

- 1) In the parallel RLC circuit the impedance at resonance is
  - a) Maximum
  - b) Minimum
  - c) Zero
  - d) Infinity
- 2) Superposition theorem is valid for \_\_\_\_\_.
  - a) Linear systems
  - b) Non-linear systems
  - c) Both linear and non-linear systems
  - d) Neither linear nor non-linear systems
- 3) The system is said to be stable if and only if
  - a) All the poles lie on right half of the s-plane
  - b) Some of the poles lie on right half of the s-plane
  - c) All the poles lie on the left half of the s-plane
  - d) None
- 4) The system is said to be unstable if \_\_\_\_\_.
  - a) all the poles lie on right half of s plane
  - b) all the poles lie on left half of s plane
  - c) all poles does not lie on right half of s plane
  - d) both a and b
- 5) An ideal filter should have
  - a) zero attenuation in pass band
  - b) infinite attenuation in pass band
  - c) zero attenuation in attenuation band
  - d) all of the above
- 6) The function is said to be having simple poles and zeros only if
  - a) The poles are not repeated
  - b) The zeros are not repeated
  - c) The poles and zeros are not repeated
  - d) none of the above

- 7) A Low pass filter is one which
- Passes all low frequencies
  - Attenuates all high frequencies
  - Passes all low frequencies up to cut-off frequencies and attenuates all other frequencies
  - None
- 8) Transient behavior occurs in any circuit when
- there is sudden change in applied voltage
  - the voltage source is suddenly shorted
  - the circuit is connected or disconnected from supply
  - all of the above
- 9) When a series RC circuit is connected to a constant voltage at  $t=0$ , the current passing through the circuit is at  $t=0^+$  is
- Infinite
  - zero
  - $\frac{V}{R}$
  - $\frac{V}{\omega C}$
- 10) Example of a two port network is
- transformer
  - transmission line
  - bridge circuit and transistor circuit
  - all of the above
- 11) Maximum power is transferred when the load impedance is equal to
- Source impedance
  - Zero
  - Half of Source Impedance
  - none
- 12) If  $Z_{11}=2$  ohm,  $Z_{12}=1$  ohm and  $Z_{21}=1$  ohm and  $Z_{22}=3$  ohm, what is the determinant of matrix?
- 1
  - 1/5
  - 5
  - 2
- 13) When two port networks are connected in series the resultant
- Z parameters are a sum of individual parameters
  - Y parameters are a sum of individual parameters
  - h parameters are a sum of individual parameters
  - ABCD parameters are a sum of individual parameters
- 14) If a series circuit RLC circuit, the quality factor is defined as \_\_\_\_.
- C
  - $\omega RC$
  - $\omega C$
  - $1/\omega RC$

**Q.1 Choose the correct alternatives from the options.****14**

- 1) D.C. generator works on the principle of \_\_\_\_\_.  
 a) Lenz's law  
 b) Ohm's law  
 c) Faraday's law of electromagnetic induction  
 d) None of the above
- 2) In a D.C. generator the critical resistance can be increased by \_\_\_\_\_.  
 a) Increasing its field resistance      b) Decreasing its field resistance  
 c) Increasing its speed                      d) Decreasing its speed
- 3) In a D.C. generator the critical resistance refers to the resistance of \_\_\_\_\_.  
 a) Brushes                                      b) Field  
 c) Armature                                      d) Load
- 4) Which of the following law/rule can be used to determine the direction of rotation of D.C. motor?  
 a) Lenz's law                                      b) Faraday's law  
 c) Coulomb's law                                      d) Fleming's left-hand rule
- 5) One D.C. motor drives another D.C. motor. The second D.C. motor when excited and driven  
 a) Does not run as a generator  
 b) Also runs as a motor comes to stop after sometime  
 c) Runs as a generator  
 d) None of these
- 6) In a low power factor wattmeter the compensating coil is connected  
 a) In series with current coil  
 b) In parallel with current coil  
 c) In series with pressure coil  
 d) In parallel with pressure coil
- 7) In a 3-phase power measurement by two wattmeter method, both the wattmeters had identical readings. The power factor of the load was  
 a) Unity                                              b) 0.8 lagging  
 c) 0.8 leading                                      d) Zero

2) Figures to the right indicates full marks.

**Section – I**

**Q.2 Solve any four.** **16**

- a) What is working principle of DC generator? Derive the EMF equation of a DC generator.
- b) A dc generator generates an EMF of 450V and has 1000 armature conductors, flux per pole of 0.012 wb, speed of 1500 rpm and the armature winding has 4 parallel paths, find the number of poles.
- c) A dc shunt motor takes a load current of 40A from a 230V dc power supply the armature and field resistance are 0.25  $\Omega$  and 220  $\Omega$  respectively. Find the armature torque when the motor runs at 960rpm.
- d) Derive the torque equation of a DC motor.
- e) Discuss the power factor and causes of low power factor.

**Q.3 Solve any two:** **12**

- a) An 8pole d.c. shunt generator with 778 wave connected armature conductors and running at 500 rpm supplies load of 12.5  $\Omega$  resistance at terminal voltage of 50V. The armature resistance is 0.24  $\Omega$  and field resistance is 250  $\Omega$ . Find armature current, induced emf and flux per pole.
- b) Explain various schemes of speed control of dc motor.
- c) Explain two wattmeter method for three phase power measurement.

**Section II**

**Q.4 Solve any four.** **16**

- a) Explain working of capacitor start single phase induction motor
- b) A 3ph delta/star connected 11000/440V, 50Hz transformer takes line current of 5 amp, when secondary load of 0.8 Lagging power factor is connected. Determine each coil current and output of transformer.
- c) On which factor the speed of three phase induction motor depends? And how to control the speed of three phase induction motor?
- d) A 4 pole, 50 (Hz) three phase induction motor running with speed 1440 (rpm). Find synchronous speed, slip speed, slip for this condition.
- e) Draw neat diagram of star delta starter and explain its operation.

**Q.5 Solve any Two.**

- a)** Draw and explain star- delta three phase transformer connections.  
Compare star- delta and delta- star three phase transformer connection.
- b)** Discuss about the working, types, characteristics and applications of universal motor.
- c)** A 3-phase induction motor is wound for 4 pole & is supplied from 50HZ system calculate
  - a) The synchronous speed
  - b) The speed of motor when the slip is 4%
  - c) The rotor current frequency when the motor runs at 600rpm.

 3) Figures to the right indicates full marks.  
 4) Assume suitable data if required.

**MCQ/Objective Type Questions**

Duration: 30 Minutes

Marks: 14

**Q.1 Choose the correct alternatives from the options.**

**14**

- 1) In a split-phase motor, the running winding should have \_\_\_\_\_.  
 a) High resistance and low inductance  
 b) High resistance and High inductance  
 c) Low resistance and high inductance  
 d) Low resistance and low inductance
- 2) If the capacitor of a single-phase motor is short-circuited  
 a) The motor will not start  
 b) The motor will run in the same direction at a reduced speed  
 c) The motor will run in the reverse direction  
 d) None of the above
- 3) The transformer which is more feasible to use in the distribution ends should be \_\_\_\_\_.  
 a) star-delta  
 b) delta-star  
 c) scott  
 d) delta-delta
- 4) The open delta connection (V-V) is frequently used for \_\_\_\_\_.  
 a) two auto-transformers  
 b) three auto-transformers  
 c) four auto-transformers  
 d) five two auto-transformers
- 5) D.C. generator works on the principle of \_\_\_\_\_.  
 a) Lenz's law  
 b) Ohm's law  
 c) Faraday's law of electromagnetic induction  
 d) None of the above
- 6) In a D.C. generator the critical resistance can be increased by \_\_\_\_\_.  
 a) Increasing its field resistance  
 b) Decreasing its field resistance  
 c) Increasing its speed  
 d) Decreasing its speed
- 7) In a D.C. generator the critical resistance refers to the resistance of \_\_\_\_\_.  
 a) Brushes  
 b) Field  
 c) Armature  
 d) Load

- 8) Which of the following law/rule can be used to determine the direction of rotation of D.C. motor?
- a) Lenz's law
  - b) Faraday's law
  - c) Coulomb's law
  - d) Fleming's left-hand rule
- 9) One D.C. motor drives another D.C. motor. The second D.C. motor when excited and driven
- a) Does not run as a generator
  - b) Also runs as a motor comes to stop after sometime
  - c) Runs as a generator
  - d) None of these
- 10) In a low power factor wattmeter the compensating coil is connected
- a) In series with current coil
  - b) In parallel with current coil
  - c) In series with pressure coil
  - d) In parallel with pressure coil
- 11) In a 3-phase power measurement by two wattmeter method, both the wattmeters had identical readings. The power factor of the load was
- a) Unity
  - b) 0.8 lagging
  - c) 0.8 leading
  - d) Zero
- 12) A 3-phase 440 V, 50 Hz induction motor has 4% slip. The frequency of rotor current will be \_\_\_\_.
- a) 50 Hz
  - b) 25 Hz
  - c) 5 Hz
  - d) 2 Hz
- 13) A 50 Hz, 3-phase induction motor has a full load speed of 1500 rpm. The number of poles in the motor is \_\_\_\_.
- a) 2 pole
  - b) 4 pole
  - c) 6 pole
  - d) 8 pole
- 14) As compared to DOL starting method the star delta starting method should have \_\_\_\_.
- a) High torque
  - b) Low starting current
  - c) High starting current
  - d) Smooth acceleration

**S.Y. (B.Tech.) (Sem - I) (New) (CBCS) Examination: Oct/Nov-2022**  
**ELECTRONICS ENGINEERING**  
**Electrical Machines**

Day & Date: Friday, 17-03-2023  
Time: 02:00 PM To 05:00 PM

Max. Marks: 56

**Instructions:** 1) All questions are compulsory.  
2) Figures to the right indicates full marks.

**Section – I**

**Q.2 Solve any four.** **16**

- a) What is working principle of DC generator? Derive the EMF equation of a DC generator.
- b) A dc generator generates an EMF of 450V and has 1000 armature conductors, flux per pole of 0.012 wb, speed of 1500 rpm and the armature winding has 4 parallel paths, find the number of poles.
- c) A dc shunt motor takes a load current of 40A from a 230V dc power supply the armature and field resistance are 0.25  $\Omega$  and 220  $\Omega$  respectively. Find the armature torque when the motor runs at 960rpm.
- d) Derive the torque equation of a DC motor.
- e) Discuss the power factor and causes of low power factor.

**Q.3 Solve any two:** **12**

- a) An 8pole d.c. shunt generator with 778 wave connected armature conductors and running at 500 rpm supplies load of 12.5  $\Omega$  resistance at terminal voltage of 50V. The armature resistance is 0.24  $\Omega$  and field resistance is 250  $\Omega$ . Find armature current, induced emf and flux per pole.
- b) Explain various schemes of speed control of dc motor.
- c) Explain two wattmeter method for three phase power measurement.

**Section II**

**Q.4 Solve any four.** **16**

- a) Explain working of capacitor start single phase induction motor
- b) A 3ph delta/star connected 11000/440V, 50Hz transformer takes line current of 5 amp, when secondary load of 0.8 Lagging power factor is connected. Determine each coil current and output of transformer.
- c) On which factor the speed of three phase induction motor depends? And how to control the speed of three phase induction motor?
- d) A 4 pole, 50 (Hz) three phase induction motor running with speed 1440 (rpm). Find synchronous speed, slip speed, slip for this condition.
- e) Draw neat diagram of star delta starter and explain its operation.

**Q.5 Solve any Two.**

- a)** Draw and explain star- delta three phase transformer connections.  
Compare star- delta and delta- star three phase transformer connection.
- b)** Discuss about the working, types, characteristics and applications of universal motor.
- c)** A 3-phase induction motor is wound for 4 pole & is supplied from 50HZ system calculate
  - a) The synchronous speed
  - b) The speed of motor when the slip is 4%
  - c) The rotor current frequency when the motor runs at 600rpm.

 3) Figures to the right indicates full marks.  
 4) Assume suitable data if required.

**MCQ/Objective Type Questions**

Duration: 30 Minutes

Marks: 14

**Q.1 Choose the correct alternatives from the options.**

**14**

- 1) In a low power factor wattmeter the compensating coil is connected
  - a) In series with current coil
  - b) In parallel with current coil
  - c) In series with pressure coil
  - d) In parallel with pressure coil
- 2) In a 3-phase power measurement by two wattmeter method, both the wattmeters had identical readings. The power factor of the load was
  - a) Unity
  - b) 0.8 lagging
  - c) 0.8 leading
  - d) Zero
- 3) A 3-phase 440 V, 50 Hz induction motor has 4% slip. The frequency of rotor current will be \_\_\_\_\_.
  - a) 50 Hz
  - b) 25 Hz
  - c) 5 Hz
  - d) 2 Hz
- 4) A 50 Hz, 3-phase induction motor has a full load speed of 1500 rpm. The number of poles in the motor is \_\_\_\_\_.
  - a) 2 pole
  - b) 4 pole
  - c) 6 pole
  - d) 8 pole
- 5) As compared to DOL starting method the star delta starting method should have \_\_\_\_\_.
  - a) High torque
  - b) Low starting current
  - c) High starting current
  - d) Smooth acceleration
- 6) In a split-phase motor, the running winding should have \_\_\_\_\_.
  - a) High resistance and low inductance
  - b) High resistance and High inductance
  - c) Low resistance and high inductance
  - d) Low resistance and low inductance
- 7) If the capacitor of a single-phase motor is short-circuited
  - a) The motor will not start
  - b) The motor will run in the same direction at a reduced speed
  - c) The motor will run in the reverse direction
  - d) None of the above

**MCQ/Objective Type Questions**

Duration: 30 Minutes

Marks: 14

**Q.1 Choose the correct alternatives from the given options.**

**14**

- 1) The general solution of  $(D^2 - 4)^2 y = 0$  is \_\_\_\_\_.
  - a)  $y = C_1 e^{2x} + C_2 e^{-2x}$
  - b)  $y = (C_1 + C_2 x) e^{-2x} + (C_3 + C_4 x) e^{2x}$
  - c)  $y = C_1 \cos 2x + C_2 \sin 2x + (C_3 + C_4 x) e^{2x}$
  - d) None of these
- 2) For  $\frac{d^2 y}{dx^2} + 4 \frac{dy}{dx} + 3y = 3e^{2x}$ , the particular integral is \_\_\_\_\_.
  - a)  $\frac{1}{15} e^{2x}$
  - b)  $3e^{2x}$
  - c)  $\frac{1}{5} e^{2x}$
  - d)  $C_1 e^{-x} + C_2 e^{-2x}$
- 3) If the characteristic equation of the diff. equation  $\frac{d^2 y}{dx^2} + 2\alpha \frac{dy}{dx} + y = 0$  has two equal roots then the value of  $\alpha$  are \_\_\_\_\_.
  - a)  $\pm 1$
  - b)  $0, 0$
  - c)  $\pm i$
  - d)  $\pm \frac{1}{2}$
- 4) The conditions for expansion of a function in a Fourier series are known as \_\_\_\_\_.
  - a) Harmonic
  - b) Periodic
  - c) Riemann Conditions
  - d) Dirichlet's conditions
- 5) For the function  $f(x) = \begin{cases} 0, & -\pi < x < 0 \\ x, & 0 < x < \pi \end{cases}$  The value of Fourier constant  $a_0$  is \_\_\_\_\_.
  - a)  $\frac{\pi^2}{4}$
  - b)  $\frac{\pi}{4}$
  - c)  $\frac{\pi^2}{2}$
  - d)  $\frac{-\pi}{4}$

- 6) Since  $z\{1\} = \frac{z}{z-1}$ ,  $z\{a^k\}, k \geq 0 =$  \_\_\_\_\_.  
 a)  $\frac{z}{z-a}$  b)  $\frac{z}{a(z-1)}$   
 c)  $\frac{a}{z-a}$  d)  $\frac{z}{az-1}$
- 7) The inverse z-transform of  $\frac{z}{z-3}, |z| > 3$  (with  $k \geq 0$ ) is \_\_\_\_\_.  
 a)  $3^{-k}$  b)  $3^{k+1}$   
 c)  $3^k$  d)  $3^{-k-1}$
- 8)  $L^{-1}\{\phi'(s)\} =$  \_\_\_\_\_.  
 a)  $\frac{-L^{-1}\{\phi(s)\}}{t}$  b)  $-t L^{-1}\{\phi(s)\}$   
 c)  $-L^{-1}\{\phi(s)\}$  d)  $-s L^{-1}\{\phi(s)\}$
- 9) If  $L\{f(t)\} = \frac{a}{s^2+a^2}$  then  $L\left\{\int_0^t f(t)dt\right\} =$  \_\_\_\_\_.  
 a)  $\frac{1}{s(s^2+a^2)}$  b)  $\frac{a}{s(s^2+a^2)}$   
 c)  $\frac{as}{s^2+a^2}$  d)  $\frac{as^2}{s^2+a^2}$
- 10) This method is called as method of chord \_\_\_\_\_.  
 a) Newton Raphson b) False Position  
 c) Bisection d) Both a and b
- 11) The first real positive root of  $x^3 = 6x - 4$  by Newton Raphson method near  $x_0 = 1$  is \_\_\_\_\_.  
 a) 0.6667 b) 0.6  
 c) 0.4 d) 0.3
- 12) The Two regression equations of the variables are  $x = 19.13 - 0.87y$ ,  $y = 11.64 - 0.5x$ . The means of  $x$  and  $y$  are \_\_\_\_\_.  
 a) 16, 2.93 b) 2.93, 16  
 c) 3.67, 15.93 d) 15.93, 3.67
- 13) If a Poisson distribution is such that  $p(x=2) = p(x=3)$  then  $m =$  \_\_\_\_\_.  
 a) 3 b)  $\frac{1}{3}$   
 c) 2 d) 4
- 14) In solving simultaneous linear equations  $AX = B$ , in which method as soon as getting the value of one unknown is immediately used to compute next unknown?  
 a) Jacobi b) Gauss Seidal  
 c) Euler's d) Gauss Elimination

 2) Figures to the right indicates full marks.  
 3) Use of non-programmable calculator is allowed.

**Section – I**

**Q.2 Attempt any three** **09**

- Solve:  $(D^2 + 4D + 5)y = -2 \cos hx + 2^x$
- Solve:  $(D^3 + D^2 + D + 1)y = \sin 2x$
- Find the Fourier series of  $f(x) = \begin{cases} \pi x, & 0 < x < 1 \\ 0, & 1 < x < 2 \end{cases}$
- Find the half-range cosine series for  $f(x) = e^{-x}$  in  $(0, \pi)$
- Find the inverse z-transform of  $F(z) = \frac{1}{(z-2)(z-3)}$ , if  $|z| < 2$

**Q.3 Attempt any three** **09**

- Solve:  $(D^2 + D)y = x^2 + 2x + 4$
- Solve:  $(D^2 - 6D + 9)y = \frac{e^{3x}}{x^2}$
- Find the Fourier series of  $f(x) = \frac{x(\pi^2 - x^2)}{12}$ , in  $(-\pi, \pi)$
- Find  $Z\{a^{|k|}\}$  for all  $k$
- Find  $Z^{-1}\left\{\frac{1}{(z-5)^2}\right\}$ ,  $|z| < 5$

**Q.4 Attempt any two** **10**

- A condenser of capacity  $C$  is discharged through an inductance  $L$  and resistance  $R$  in series and the charge  $q$  at a time satisfies the equation.

$$L \frac{d^2 q}{dt^2} + R \frac{dq}{dt} + \frac{q}{C} = 0$$

Given that  $L = 0.25$  Henries,  $R = 250$  ohms,  $C = 2 \times 10^{-6}$  farads and that at  $t = 0$ ,  $q = 0.002$  coulombs and the current  $\frac{dq}{dt} = 0$ , obtain  $q$  in terms of  $t$ .

- Find the Fourier series of  $f(x) = \begin{cases} -\pi, & -\pi < x < 0 \\ x, & 0 < x < \pi \end{cases}$
- Find Z-transform of  $f(k) = \cos \alpha k$ ,  $k \geq 0$

**Section – II**

**Q.5 Attempt any three** **09**

- If the mean of the binomial distribution is 2 and variance is  $\frac{4}{3}$  find the probability of
  - Two successes
  - Less than to successes

- b) Evaluate  $\int_0^{\infty} \frac{\cos 4t - \cos 3t}{t} dt$  by Laplace transform
- c) Find  $L^{-1}[\tan^{-1}(s + 1)]$
- d) Find the coefficient of correlation between  $x$  and  $y$  from the following data:  
 $n = 25$ ,  $\Sigma x = 120$ ,  $\Sigma x^2 = 650$ ,  $\Sigma y = 100$ ,  $\Sigma y^2 = 450$ ,  $\Sigma xy = 500$
- e) Find an approximate root of  $x \log_{10} x - 1.2 = 0$  by False Position method  
 (Perform 2 iterations)

**Q.6 Attempt any three****09**

- a) Fit a Poisson distribution

|       |     |    |    |   |   |
|-------|-----|----|----|---|---|
| $x$ : | 0   | 1  | 2  | 3 | 4 |
| $y$ : | 109 | 65 | 22 | 3 | 1 |

- b) Find Laplace transform of  $f(t) = \frac{2t}{3}$   $0 < t < 3$  and  $f(t)f(t + 3)$
- c) Solve by Gauss Elimination method, the following system of linear simultaneous equations  
 $x + y + 2z = 4$ ,  $3x + y - 3z = -4$ ,  $2x - 3y - 5z = -5$
- d) Weights of 4000 students are found to be normally distributed with mean 50 kgs and S.D. 5 kgs. Find the number of students with weights between 45 and 60 kgs.  
 (For SNV  $z$  area under the Curve between  $z = 0$  and  $z = 1$  is 0.3413 and between  $z = 0$  and  $z = 2$  is 0.4772)
- e) Find the value of  $\sqrt{35}$  by Newton Raphson method, taking  $x_0 = 6$  as initial approximation, correct to 4 decimal places.

**Q.7 Attempt any two****10**

- a) Find  $L^{-1} \left[ \frac{s+29}{(s+4)(s^2+9)} \right]$
- b) Calculate Karl Pearson's coefficient of correlation and the equations of the lines of regression from the following data.
- |       |    |    |    |    |    |    |    |    |    |    |
|-------|----|----|----|----|----|----|----|----|----|----|
| $x$ : | 18 | 19 | 20 | 21 | 22 | 23 | 24 | 25 | 26 | 27 |
| $y$ : | 17 | 17 | 18 | 18 | 18 | 19 | 19 | 20 | 21 | 22 |
- c) Solve the following system by Jacobi's method (Perform 4 iterations)
- $$10x - 5y - 2z = 3$$
- $$4x - 10y + 3z = -3$$
- $$x + 6y + 10z = -3$$

 e) Find the inverse z-transform of  $F(z) = \frac{1}{(z-2)(z-3)}$ , if  $|z| < 2$

**Q.3 Attempt any three****09**

- a) Solve:  $(D^2 + D)y = x^2 + 2x + 4$   
 b) Solve:  $(D^2 - 6D + 9)y = \frac{e^{3x}}{x^2}$   
 c) Find the Fourier series of  $f(x) = \frac{x(\pi^2 - x^2)}{12}$ , in  $(-\pi, \pi)$   
 d) Find  $Z\{a^{|k|}\}$  for all  $k$   
 e) Find  $Z^{-1}\left\{\frac{1}{(z-5)^2}\right\}$ ,  $|z| < 5$

**Q.4 Attempt any two****10**

- a) A condenser of capacity  $C$  is discharged through an inductance  $L$  and resistance  $R$  in series and the charge  $q$  at a time satisfies the equation.

$$L \frac{d^2 q}{dt^2} + R \frac{dq}{dt} + \frac{q}{C} = 0$$

Given that  $L = 0.25$  Henries,  $R = 250$  ohms,  $C = 2 \times 10^{-6}$  farads and that at  $t = 0$ ,  $q = 0.002$  coulombs and the current  $\frac{dq}{dt} = 0$ , obtain  $q$  in terms of  $t$ .

- b) Find the Fourier series of  $f(x) = \begin{cases} -\pi, & -\pi < x < 0 \\ x, & 0 < x < \pi \end{cases}$   
 c) Find Z-transform of  $f(k) = \cos \alpha k$ ,  $k \geq 0$

**Section – II****Q.5 Attempt any three****09**

- a) If the mean of the binomial distribution is 2 and variance is  $\frac{4}{3}$  find the probability of  
 i) Two successes  
 ii) Less than to successes

- b) Evaluate  $\int_0^{\infty} \frac{\cos 4t - \cos 3t}{t} dt$  by Laplace transform
- c) Find  $L^{-1}[\tan^{-1}(s + 1)]$
- d) Find the coefficient of correlation between  $x$  and  $y$  from the following data:  
 $n = 25$ ,  $\Sigma x = 120$ ,  $\Sigma x^2 = 650$ ,  $\Sigma y = 100$ ,  $\Sigma y^2 = 450$ ,  $\Sigma xy = 500$
- e) Find an approximate root of  $x \log_{10} x - 1.2 = 0$  by False Position method (Perform 2 iterations)

**Q.6 Attempt any three****09**

- a) Fit a Poisson distribution

|      |     |    |    |   |   |
|------|-----|----|----|---|---|
| $x:$ | 0   | 1  | 2  | 3 | 4 |
| $y:$ | 109 | 65 | 22 | 3 | 1 |

- b) Find Laplace transform of  $f(t) = \frac{2t}{3}$   $0 < t < 3$  and  $f(t)f(t + 3)$
- c) Solve by Gauss Elimination method, the following system of linear simultaneous equations  
 $x + y + 2z = 4$ ,  $3x + y - 3z = -4$ ,  $2x - 3y - 5z = -5$
- d) Weights of 4000 students are found to be normally distributed with mean 50 kgs and S.D. 5 kgs. Find the number of students with weights between 45 and 60 kgs.  
 (For SNV  $z$  area under the Curve between  $z = 0$  and  $z = 1$  is 0.3413 and between  $z = 0$  and  $z = 2$  is 0.4772)
- e) Find the value of  $\sqrt{35}$  by Newton Raphson method, taking  $x_0 = 6$  as initial approximation, correct to 4 decimal places.

**Q.7 Attempt any two****10**

- a) Find  $L^{-1} \left[ \frac{s+29}{(s+4)(s^2+9)} \right]$
- b) Calculate Karl Pearson's coefficient of correlation and the equations of the lines of regression from the following data.
- |      |    |    |    |    |    |    |    |    |    |    |
|------|----|----|----|----|----|----|----|----|----|----|
| $x:$ | 18 | 19 | 20 | 21 | 22 | 23 | 24 | 25 | 26 | 27 |
| $y:$ | 17 | 17 | 18 | 18 | 18 | 19 | 19 | 20 | 21 | 22 |
- c) Solve the following system by Jacobi's method (Perform 4 iterations)
- $$10x - 5y - 2z = 3$$
- $$4x - 10y + 3z = -3$$
- $$x + 6y + 10z = -3$$

## Max. Marks: 70

### MCQ/Objective Type Questions

Marks: 14

14

- 1) The first real positive root of  $x^3 = 6x - 4$  by Newton Raphson method near  $x_0 = 1$  is \_\_\_\_\_.  
a) 0.6667                                      b) 0.6  
c) 0.4                                          d) 0.3
- 2) The Two regression equations of the variables are  $x = 19.13 - 0.87y$ ,  $y = 11.64 - 0.5x$ . The means of  $x$  and  $y$  are \_\_\_\_\_.  
a) 16, 2.93                                    b) 2.93, 16  
c) 3.67, 15.93                                d) 15.93, 3.67
- 3) If a Poisson distribution is such that  $p(x = 2) = p(x = 3)$  then  $m =$  \_\_\_\_\_.  
a) 3                                                b)  $\frac{1}{3}$   
c) 2                                                d) 4
- 4) In solving simultaneous linear equations  $AX = B$ , in which method as soon as getting the value of one unknown is immediately used to compute next unknown?  
a) Jacobi                                          b) Gauss Seidal  
c) Euler's                                         d) Gauss Elimination
- 5) The general solution of  $(D^2 - 4)^2 y = 0$  is \_\_\_\_\_.  
a)  $y = C_1 e^{2x} + C_2 e^{-2x}$   
b)  $y = (C_1 + C_2 x)e^{-2x} + (C_3 + C_4 x)e^{2x}$   
c)  $y = C_1 \cos 2x + C_2 \sin 2x + (C_3 + C_4 x)e^{2x}$   
d) None of these
- 6) For  $\frac{d^2 y}{dx^2} + 4\frac{dy}{dx} + 3y = 3e^{2x}$ , the particular integral is \_\_\_\_\_.  
a)  $\frac{1}{15}e^{2x}$                                         b)  $3e^{2x}$   
c)  $\frac{1}{5}e^{2x}$                                         d)  $C_1 e^{-x} + C_2 e^{-2x}$

Day & Date: Monday, 13-03-2023  
 Time: 02:00 PM To 05:00 PM

Max. Marks: 56

- Instructions:** 1) All questions are compulsory.  
 2) Figures to the right indicates full marks.  
 3) Use of non-programmable calculator is allowed.

**Section – I**

**Q.2 Attempt any three** **09**

- Solve:  $(D^2 + 4D + 5)y = -2 \cos hx + 2^x$
- Solve:  $(D^3 + D^2 + D + 1)y = \sin 2x$
- Find the Fourier series of  $f(x) = \begin{cases} \pi x, & 0 < x < 1 \\ 0, & 1 < x < 2 \end{cases}$
- Find the half-range cosine series for  $f(x) = e^{-x}$  in  $(0, \pi)$
- Find the inverse z-transform of  $F(z) = \frac{1}{(z-2)(z-3)}$ , if  $|z| < 2$

**Q.3 Attempt any three** **09**

- Solve:  $(D^2 + D)y = x^2 + 2x + 4$
- Solve:  $(D^2 - 6D + 9)y = \frac{e^{3x}}{x^2}$
- Find the Fourier series of  $f(x) = \frac{x(\pi^2 - x^2)}{12}$ , in  $(-\pi, \pi)$
- Find  $Z\{a^{|k|}\}$  for all  $k$
- Find  $Z^{-1}\left\{\frac{1}{(z-5)^2}\right\}$ ,  $|z| < 5$

**Q.4 Attempt any two** **10**

- A condenser of capacity  $C$  is discharged through an inductance  $L$  and resistance  $R$  in series and the charge  $q$  at a time satisfies the equation.

$$L \frac{d^2 q}{dt^2} + R \frac{dq}{dt} + \frac{q}{C} = 0$$

Given that  $L = 0.25$  Henries,  $R = 250$  ohms,  $C = 2 \times 10^{-6}$  farads and that at  $t = 0$ ,  $q = 0.002$  coulombs and the current  $\frac{dq}{dt} = 0$ , obtain  $q$  in terms of  $t$ .

- Find the Fourier series of  $f(x) = \begin{cases} -\pi, & -\pi < x < 0 \\ x, & 0 < x < \pi \end{cases}$
- Find Z-transform of  $f(k) = \cos \alpha k$ ,  $k \geq 0$

**Section – II**

**Q.5 Attempt any three** **09**

- If the mean of the binomial distribution is 2 and variance is  $\frac{4}{3}$  find the probability of
  - Two successes
  - Less than to successes

- b) Evaluate  $\int_0^{\infty} \frac{\cos 4t - \cos 3t}{t} dt$  by Laplace transform
- c) Find  $L^{-1}[\tan^{-1}(s + 1)]$
- d) Find the coefficient of correlation between  $x$  and  $y$  from the following data:  
 $n = 25, \Sigma x = 120, \Sigma x^2 = 650, \Sigma y = 100, \Sigma y^2 = 450, \Sigma xy = 500$
- e) Find an approximate root of  $x \log_{10} x - 1.2 = 0$  by False Position method (Perform 2 iterations)

**Q.6 Attempt any three****09**

- a) Fit a Poisson distribution

|      |     |    |    |   |   |
|------|-----|----|----|---|---|
| $x:$ | 0   | 1  | 2  | 3 | 4 |
| $y:$ | 109 | 65 | 22 | 3 | 1 |

- b) Find Laplace transform of  $f(t) = \frac{2t}{3}, 0 < t < 3$  and  $f(t)f(t + 3)$
- c) Solve by Gauss Elimination method, the following system of linear simultaneous equations  
 $x + y + 2z = 4, \quad 3x + y - 3z = -4, \quad 2x - 3y - 5z = -5$
- d) Weights of 4000 students are found to be normally distributed with mean 50 kgs and S.D. 5 kgs. Find the number of students with weights between 45 and 60 kgs.  
 (For SNV  $z$  area under the Curve between  $z = 0$  and  $z = 1$  is 0.3413 and between  $z = 0$  and  $z = 2$  is 0.4772)
- e) Find the value of  $\sqrt{35}$  by Newton Raphson method, taking  $x_0 = 6$  as initial approximation, correct to 4 decimal places.

**Q.7 Attempt any two****10**

- a) Find  $L^{-1}\left[\frac{s+29}{(s+4)(s^2+9)}\right]$
- b) Calculate Karl Pearson's coefficient of correlation and the equations of the lines of regression from the following data.
- |      |    |    |    |    |    |    |    |    |    |    |
|------|----|----|----|----|----|----|----|----|----|----|
| $x:$ | 18 | 19 | 20 | 21 | 22 | 23 | 24 | 25 | 26 | 27 |
| $y:$ | 17 | 17 | 18 | 18 | 18 | 19 | 19 | 20 | 21 | 22 |
- c) Solve the following system by Jacobi's method (Perform 4 iterations)
- $$10x - 5y - 2z = 3$$
- $$4x - 10y + 3z = -3$$
- $$x + 6y + 10z = -3$$

Max. Marks: 70

Time: 02:00 PM To 05:00 PM

- Instructions:** 1) Q. No. 1 is compulsory. It should be solved in the first 30 minutes in answer book. Page no 03 (Starting page of the Answer Book). Each question carries one mark.  
 2) Don't forget to Mention question paper set (P/Q/R/S) on top of page.  
 3) Figures to the right indicate full marks.  
 4) Use of non-programable calculator is allowed.

**MCQ/Objective Type Questions**

Duration: 30 Minutes

Marks: 14

**Q.1 Choose the correct alternatives from the given options.**

**14**

- 1) Since  $z\{1\} = \frac{z}{z-1}$ ,  $z\{a^k\}$ ,  $k \geq 0 =$  \_\_\_\_\_.
  - a)  $\frac{z}{z-a}$
  - b)  $\frac{z}{a(z-1)}$
  - c)  $\frac{a}{z-a}$
  - d)  $\frac{z}{az-1}$
- 2) The inverse z-transform of  $\frac{z}{z-3}$ ,  $|z| > 3$  (with  $k \geq 0$ ) is \_\_\_\_\_.
  - a)  $3^{-k}$
  - b)  $3^{k+1}$
  - c)  $3^k$
  - d)  $3^{-k-1}$
- 3)  $L^{-1}\{\phi'(s)\} =$  \_\_\_\_\_.
  - a)  $\frac{-L^{-1}\{\phi(s)\}}{t}$
  - b)  $-t L^{-1}\{\phi(s)\}$
  - c)  $-L^{-1}\{\phi(s)\}$
  - d)  $-s L^{-1}\{\phi(s)\}$
- 4) If  $L\{f(t)\} = \frac{a}{s^2+a^2}$  then  $L\left\{\int_0^t f(t)dt\right\} =$  \_\_\_\_\_.
  - a)  $\frac{1}{s(s^2+a^2)}$
  - b)  $\frac{a}{s(s^2+a^2)}$
  - c)  $\frac{as}{s^2+a^2}$
  - d)  $\frac{as^2}{s^2+a^2}$
- 5) This method is called as method of chord \_\_\_\_\_.
  - a) Newton Raphson
  - b) False Position
  - c) Bisection
  - d) Both a and b
- 6) The first real positive root of  $x^3 = 6x - 4$  by Newton Raphson method near  $x_0 = 1$  is \_\_\_\_\_.
  - a) 0.6667
  - b) 0.6
  - c) 0.4
  - d) 0.3
- 7) The Two regression equations of the variables are  $x = 19.13 - 0.87y$ ,  $y = 11.64 - 0.5x$ . The means of  $x$  and  $y$  are \_\_\_\_\_.
  - a) 16, 2.93
  - b) 2.93, 16
  - c) 3.67, 15.93
  - d) 15.93, 3.67

**MCQ/Objective Type Questions**

Duration: 30 Minutes

Marks: 14

**Q.1 Choose the correct alternatives from the options.**

**14**

- 1) Shifting property of impulse is  $X[n] * \delta[n - n_0] =$ 
  - a)  $X[n]$
  - b)  $\delta[n]$
  - c)  $X[n - n_0]$
  - d)  $\delta[n - n_0]$
- 2) The system  $y(t) = x^2(t) + 6$  is \_\_\_\_\_.
  - a) Linear
  - b) Non Linear
  - c) Invertible
  - d) None of these
- 3) The system  $y[n] = x[-n]$  is \_\_\_\_\_.
  - a) Time variant
  - b) Time invariant
  - c) Both
  - d) None of these
- 4) Given sequence  $x_1[n] = \{1, -2, 3, 1\}$  &  $x_2[n] = \{2, -3, -2\}$  then their convolution  $y[n]$  is \_\_\_\_\_.
  - a)  $\{2, -7, 10, -7\}$
  - b)  $\{2, -7, 10, -3, -9, -2\}$
  - c)  $\{10, -7, -9, 2\}$
  - d)  $\{2, -7, 10, -7, 9\}$
- 5) Odd signal satisfies \_\_\_\_\_.
  - a)  $x(-t) = x(t)$
  - b)  $x[-n] = -x[n]$
  - c)  $x[n + 1] = a x[n] + b$
  - d)  $dx(t)/dt = \text{constant}$
- 6) Energy signals are the signals with \_\_\_\_\_.
  - a)  $0 < E < \infty, P = 0$
  - b)  $0 < E < \infty, P = \infty$
  - c)  $0 < P < \infty, E = \infty$
  - d)  $0 < P < \infty, E = 0$
- 7) Any periodic signal may be called as \_\_\_\_\_.
  - a) Causal
  - b) Non Causal
  - c) Anti Causal
  - d) None of these
- 8) ROC of sequence  $x[n] = u[n]$  is \_\_\_\_\_.
  - a)  $|z| > 1$
  - b)  $|z| < 1$
  - c) No ROC
  - d)  $-1 < |z| < 1$
- 9) If a signal  $f(t)$  has energy  $E$ , the energy of  $f(2t)$  is \_\_\_\_\_.
  - a)  $E$
  - b)  $E/2$
  - c)  $2E$
  - d)  $4E$

- 10) ZT reduces to FT when it is evaluated on \_\_\_\_\_ circle.

|         |              |
|---------|--------------|
| a) Half | b) Z         |
| c) Unit | d) Imaginary |
- 11) Following system is time invariant.

|                    |                             |
|--------------------|-----------------------------|
| a) $y(t) = x(2t)$  | b) $y(t) = x(t) + x(t - 1)$ |
| c) $y(t) = x(t/2)$ | d) $y(t) = x(-t)$           |
- 12) Sampled frequency less than Nyquist rate is called \_\_\_\_\_ sampling.

|             |         |
|-------------|---------|
| a) Under    | b) Over |
| c) Critical | d) None |
- 13) According to properties of ZT, ROC cannot contain \_\_\_\_\_

|          |          |
|----------|----------|
| a) Zeros | b) Poles |
| c) Both  | d) None  |
- 14) Unit ramp signal can be expressed as \_\_\_\_\_.

|               |                   |
|---------------|-------------------|
| a) $u(t) + t$ | b) $u(t) - t$     |
| c) $u(t)/t$   | d) $t \cdot u(t)$ |

**12**

- 1) Sketch given signal  $y(t) = r(t - 1) + u(t)$
- 2) Find even & odd component of  $x(t) = \cos(t) + \sin(t) + \cos(t) \cdot \sin(t)$
- 3) Obtain direct form I structure of system described by  
 $y(n) - (2/3)y(n - 1) + (1/5)y(n - 2) = x(n) + 2x(n - 1)$
- 4) Determine energy of signal.  $X[n] = (1/2)^2 u(n)$
- 5) Let  $x[n] = 0$  for  $n < -2$  and  $n > 4$ . For each signal given below determine values of  $n$  for which it is guaranteed to be zero.

- i)  $x[n-3]$
- ii)  $x[n+4]$
- iii)  $x[-n]$
- iv)  $x[-n+2]$

**Q.3 Attempt any two:**

**16**

- 1) Determine convolution of following signals. Sketch result.  
 $y(n) = (0.5)^n u[n]$        $x(n) = u[n]$
- 2) Determine whether following system is 1. Static or Dynamic 2. Linear or nonlinear 3. Time variant or time invariant 4. Causal or Non-causal 5. Stable or Unstable.  $y(t) = 10 x(t) + 5$
- 3) Find even and odd part of signal  $x[n] = \{3, 2, 1, 1, 1, 2, 1, 1\}$   

$\uparrow$   
 (The arrow points to the 4th element of the sequence, which is 1.)

**Section – II**

**Q.4 Attempt any Four.**

**12**

- 1) State & Prove convolution property of CT Fourier Transform.
- 2) Find Z.T. with its ROC for  $x(n) = (a)^n u[n]$
- 3) Find F.T of  $x(t) = e^{-at} u(t)$
- 4) Find Nyquist sampling rate for  $x(t) = 5 \cdot \cos(1000 \pi t) \cdot \cos(6000 \pi t)$
- 5) The analog signal  $m(t)$  is given below. Calculate Nyquist sampling rate.  
 $m(t) = 4 \cos(50 \pi t) + 8 \sin(300 \pi t) - \cos(100 \pi t)$

**Q.5 Attempt any two:**

- 1) The analog signal given below is  $m(t) = 4 \cos 100 \pi t$ .
  - a) Calculate Nyquist rate b) What is DT signal after sampling for  
1)  $F_s = 200 \text{ Hz}$  & 2)  $F_s = 75 \text{ Hz}$
- 2) Find Fourier series coefficient using trigonometric Fourier series method for Full wave rectified signal with fundamental frequency  $\omega_0 = \pi$
- 3) State and prove any two properties of Laplace transform.

**Seat  
No.**

Max. Marks: 70

Marks: 14

14

- Page 5 of 16

- 11) Given sequence  $x_1[n] = \{1, -2, 3, 1\}$  &  $x_2[n] = \{2, -3, -2\}$  then their convolution  $y[n]$  is \_\_\_\_\_.  
 a)  $\{2, -7, 10, -7\}$                       b)  $\{2, -7, 10, -3, -9, -2\}$   
 c)  $\{10, -7, -9, 2\}$                       d)  $\{2, -7, 10, -7, 9\}$
- 12) Odd signal satisfies \_\_\_\_\_.  
 a)  $x(-t) = x(t)$                       b)  $x[-n] = -x[n]$   
 c)  $x[n+1] = a x[n] + b$                       d)  $dx(t)/dt = \text{constant}$
- 13) Energy signals are the signals with \_\_\_\_\_.  
 a)  $0 < E < \infty, P = 0$                       b)  $0 < E < \infty, P = \infty$   
 c)  $0 < P < \infty, E = \infty$                       d)  $0 < P < \infty, E = 0$
- 14) Any periodic signal may be called as \_\_\_\_\_.  
 a) Causal                      b) Non Causal  
 c) Anti Causal                      d) None of these

Max. Marks: 70

- Instructions:** 1) Q. No. 1 is compulsory. It should be solved in the first 30 minutes in answer book. Page no 03 (Starting page of the Answer Book). Each question carries one mark.  
 2) Don't forget to Mention question paper set (P/Q/R/S) on top of page.  
 3) Figures to the right indicates full marks.

**MCQ/Objective Type Questions**

Duration: 30 Minutes

Marks: 14

**Q.1 Choose the correct alternatives from the options.**

**14**

- 1) Following system is time invariant.
  - a)  $y(t) = x(2t)$
  - b)  $y(t) = x(t) + x(t - 1)$
  - c)  $y(t) = x(t/2)$
  - d)  $y(t) = x(-t)$
- 2) Sampled frequency less than Nyquist rate is called \_\_\_\_\_ sampling.
  - a) Under
  - b) Over
  - c) Critical
  - d) None
- 3) According to properties of ZT, ROC cannot contain \_\_\_\_\_.
  - a) Zeros
  - b) Poles
  - c) Both
  - d) None
- 4) Unit ramp signal can be expressed as \_\_\_\_\_.
  - a)  $u(t) + t$
  - b)  $u(t) - t$
  - c)  $u(t)/t$
  - d)  $t \cdot u(t)$
- 5) Shifting property of impulse is  $X[n] * \delta[n - n_0] =$ 
  - a)  $X[n]$
  - b)  $\delta[n]$
  - c)  $X[n - n_0]$
  - d)  $\delta[n - n_0]$
- 6) The system  $y(t) = x^2(t) + 6$  is \_\_\_\_\_.
  - a) Linear
  - b) Non Linear
  - c) Invertible
  - d) None of these
- 7) The system  $y[n] = x[-n]$  is \_\_\_\_\_.
  - a) Time variant
  - b) Time invariant
  - c) Both
  - d) None of these
- 8) Given sequence  $x_1[n] = \{1, -2, 3, 1\}$  &  $x_2[n] = \{2, -3, -2\}$  then their convolution  $y[n]$  is \_\_\_\_\_.
  - a)  $\{2, -7, 10, -7\}$
  - b)  $\{2, -7, 10, -3, -9, -2\}$
  - c)  $\{10, -7, -9, 2\}$
  - d)  $\{2, -7, 10, -7, 9\}$
- 9) Odd signal satisfies \_\_\_\_\_.
  - a)  $x(-t) = x(t)$
  - b)  $x[-n] = -x[n]$
  - c)  $x[n + 1] = a x[n] + b$
  - d)  $dx(t)/dt = \text{constant}$

- 10) Energy signals are the signals with \_\_\_\_\_.  
a)  $0 < E < \infty, P = 0$                       b)  $0 < E < \infty, P = \infty$   
c)  $0 < P < \infty, E = \infty$                       d)  $0 < P < \infty, E = 0$
- 11) Any periodic signal may be called as \_\_\_\_\_.  
a) Causal                                              b) Non Causal  
c) Anti Causal                                      d) None of these
- 12) ROC of sequence  $x[n] = u[n]$  is \_\_\_\_\_.  
a)  $|z| > 1$                                               b)  $|z| < 1$   
c) No ROC                                              d)  $-1 < |z| < 1$
- 13) If a signal  $f(t)$  has energy  $E$ , the energy of  $f(2t)$  is \_\_\_\_\_.  
a)  $E$                                                       b)  $E/2$   
c)  $2E$                                                       d)  $4E$
- 14) ZT reduces to FT when it is evaluated on \_\_\_\_\_ circle.  
a) Half                                                      b) Z  
c) Unit                                                      d) Imaginary

**Signals & Systems**

Day & Date: Monday, 06-03-2023  
 Time: 02:00 PM To 05:00 PM

Max. Marks: 56

**Instructions:** 1) All questions are compulsory.  
 2) Figures to the right indicate full marks.

**Section – I****Q.2 Attempt any Four.****12**

- 1) Sketch given signal  $y(t) = r(t - 1) + u(t)$
- 2) Find even & odd component of  $x(t) = \cos(t) + \sin(t) + \cos(t) \cdot \sin(t)$
- 3) Obtain direct form I structure of system described by  
 $y(n) - (2/3)y(n - 1) + (1/5)y(n - 2) = x(n) + 2x(n - 1)$
- 4) Determine energy of signal.  $X[n] = (1/2)^2 u(n)$
- 5) Let  $x[n] = 0$  for  $n < -2$  and  $n > 4$ . For each signal given below determine values of  $n$  for which it is guaranteed to be zero.

- i)  $x[n-3]$
- ii)  $x[n+4]$
- iii)  $x[-n]$
- iv)  $x[-n+2]$

**Q.3 Attempt any two:****16**

- 1) Determine convolution of following signals. Sketch result.  
 $y(n) = (0.5)^n u[n]$        $x(n) = u[n]$
- 2) Determine whether following system is 1. Static or Dynamic 2. Linear or nonlinear 3. Time variant or time invariant 4. Causal or Non-causal 5. Stable or Unstable.  $y(t) = 10 x(t) + 5$
- 3) Find even and odd part of signal  $x[n] = \{3, 2, 1, 1, 1, 2, 1, 1\}$   

↑

**Section – II****Q.4 Attempt any Four.****12**

- 1) State & Prove convolution property of CT Fourier Transform.
- 2) Find Z.T. with its ROC for  $x(n) = (a)^n u[n]$
- 3) Find F.T of  $x(t) = e^{-at} u(t)$
- 4) Find Nyquist sampling rate for  $x(t) = 5 \cdot \cos(1000 \pi t) \cdot \cos(6000 \pi t)$
- 5) The analog signal  $m(t)$  is given below. Calculate Nyquist sampling rate.  
 $m(t) = 4 \cos(50 \pi t) + 8 \sin(300 \pi t) - \cos(100 \pi t)$

**Q.5 Attempt any two:**

- 1) The analog signal given below is  $m(t) = 4 \cos 100 \pi t$ .  
a) Calculate Nyquist rate b) What is DT signal after sampling for  
1)  $F_s = 200 \text{ Hz}$  & 2)  $F_s = 75 \text{ Hz}$
- 2) Find Fourier series coefficient using trigonometric Fourier series method for Full wave rectified signal with fundamental frequency  $\omega_0 = \pi$
- 3) State and prove any two properties of Laplace transform.

**Seat  
No.**

Max. Marks: 70

Marks: 14

14

- 

- Page 1 of 16

- 7) What is the type of the closed loop system for the plant transfer function  $G(S) = \frac{kS}{s^3(1+5S)}$ 
  - a) 2
  - b) 1
  - c) 3
  - d) 0
- 8) If the system is specified by open loop transfer function  $G(s)H(s) = \frac{K}{s(s+4)(s+6)}$ , how many root loci proceed to end at infinity?
  - a) 2
  - b) 3
  - c) 5
  - d) 6
- 9) The compensator required to improve the steady state response of system is \_\_\_\_\_
  - a) Lead
  - b) Lag
  - c) Lag-Lead
  - d) None of these
- 10) Bandwidth is increased when compensator used is \_\_\_\_\_
  - a) Lead
  - b) Lag
  - c) Lag-Lead
  - d) None of these
- 11) The phase crossover frequency  $|G(j\omega)H(j\omega)| =$  \_\_\_\_\_
  - a)  $0^\circ$
  - b)  $180^\circ$
  - c)  $-90^\circ$
  - d)  $-180^\circ$
- 12) If the system has nonrepeated pole on the  $j\omega$  axis, the system is \_\_\_\_\_
  - a) stable
  - b) unstable
  - c) marginally stable
  - d) conditionally unstable
- 13) The gain margin of a system is 0dB. It represents a \_\_\_\_\_.
  - a) stable system
  - b) unstable system
  - c) marginally stable systems
  - d) conditionally stable system
- 14) The polar plot of a transfer function passes through the critical point  $(-1,0)$ . Gain margin is \_\_\_\_\_
  - a) Zero
  - b) -1dB
  - c) 1dB
  - d) Infinity

- Instructions:** 1) All questions are compulsory.  
 2) Figures to the right indicate full marks  
 3) Assume suitable data wherever necessary and mention it clearly.

**Section – I**

**Q.2 Attempt any four.**

16

- a) Using Masons gain formula find the gain of the following system.

- b) Define closed loop control system. Prove that  $\frac{C(s)}{R(s)} = \frac{G(s)}{1+G(s)H(s)}$
- c) Describe construction and working of permanent magnet stepper motor.
- d) A unity feedback control system has  $G(s) = \frac{40(s+2)}{s(s+1)(s+4)}$  Determine
- 1) Type of system
  - 2) All error coefficients
- e) Analyze Type 0, Type 1 & Type 2 system for step input.

**Q.3 Solve any two.**

12

- 1) Obtain transfer function for the given system by using block diagram reduction.

- 2) Derive transfer function of armature controlled D.C servomotor.
- 3) Derive the expressions for first order system for unit step input.

## Section – II

## Q.4 Attempt any four.

16

- a) What do you mean by proportional integral controller? Elaborate its effect on system performance.
- b) Consider characteristics equation  $s^5 + s^4 + 2s^3 + 2s^2 + 3s + 5 = 0$ . Determine stability using Routh's criterion.
- c) Explain nature of Bode plot for
  - 1) Simple gain 'K'
  - 2) Simple poles (first order factor)
- d) Explain frequency domain specifications.
- e) What do you mean by a polar plot? Draw polar plot for Type two system.

## Q.5 Attempt any two:

12

- 1) A feedback system has  $G(s)H(s) = \frac{200(s+1)}{s^2(s+10)(s+40)}$ . Sketch the Bode plot and comment on stability.
- 2) For unity feedback system  $G(s) = \frac{K}{s(s+3)(s+1)}$  Sketch nature root locus and comment on stability.
- 3) What is compensator? Derive transfer function of lag compensator and also explain its polar plot.

**Seat  
No.**

Max. Marks: 70

Marks: 14

14

- Page 5 of 16

- 9) The \_\_\_\_\_ number of forward paths and number of loops \_\_\_\_\_ are present in given SFG.

- a) 2, 2  
b) 2, 3  
c) 3, 2  
d) 3, 3
- 10) Three blocks with gain of 4, 6 and 8 are connected in parallel. The total gain of arrangement is \_\_\_\_\_.  
a) 18  
b) 196  
c) 32  
d) 52
- 11) A synchro pair consists of a \_\_\_\_\_ and a \_\_\_\_\_.  
a) Synchro transmitter & synchro control transformer  
b) transmitter & receiver  
c) transformer & detector  
d) transducer & receiver
- 12) One of the basic requirements of a servomotor is that it must produce high torque at all \_\_\_\_\_.  
a) Loads  
b) Frequencies  
c) Speeds  
d) Voltages
- 13) If for second order system damping factor is less than one, then system response will be \_\_\_\_\_.  
a) Under damped  
b) Over damped  
c) Critically damped  
d) None of these
- 14) What is the type of the closed loop system for the plant transfer function  $G(S) = \frac{k S}{s^3(1+5S)}$   
a) 2  
b) 1  
c) 3  
d) 0

 2) Figures to the right indicate full marks  
 3) Assume suitable data wherever necessary and mention it clearly.

**Section – I**

**Q.2 Attempt any four.**

16

- a) Using Masons gain formula find the gain of the following system.

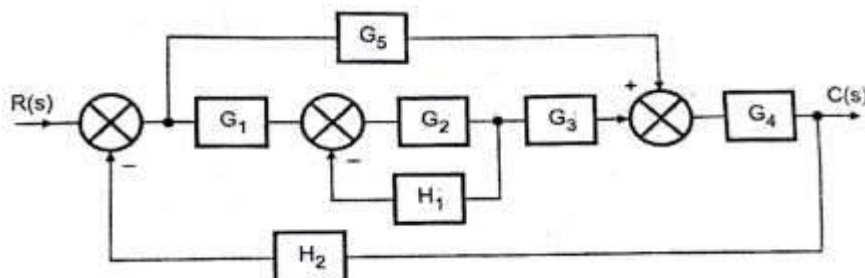

- b) Define closed loop control system. Prove that  $\frac{C(s)}{R(s)} = \frac{G(s)}{1 \pm G(s)H(s)}$
- c) Describe construction and working of permanent magnet stepper motor.
- d) A unity feedback control system has  $G(S) = \frac{40(s+2)}{s(s+1)(s+4)}$  Determine
- 1) Type of system
  - 2) All error coefficients
- e) Analyze Type 0, Type 1 & Type 2 system for step input.

**Q.3 Solve any two.**

12

- 1) Obtain transfer function for the given system by using block diagram reduction.

- 2) Derive transfer function of armature controlled D.C servomotor.
- 3) Derive the expressions for first order system for unit step input.

## Section – II

**Q.4 Attempt any four.****16**

- a) What do you mean by proportional integral controller? Elaborate its effect on system performance.
- b) Consider characteristics equation  $s^5 + s^4 + 2s^3 + 2s^2 + 3s + 5 = 0$ . Determine stability using Routh's criterion.
- c) Explain nature of Bode plot for
  - 1) Simple gain 'K'
  - 2) Simple poles (first order factor)
- d) Explain frequency domain specifications.
- e) What do you mean by a polar plot? Draw polar plot for Type two system.

**Q.5 Attempt any two:****12**

- 1) A feedback system has  $G(s)H(s) = \frac{200(s+1)}{s^2(s+10)(s+40)}$ . Sketch the Bode plot and comment on stability.
- 2) For unity feedback system  $G(s) = \frac{K}{s(s+3)(s+1)}$  Sketch nature root locus and comment on stability.

**Instructions:** 1) Q. No. 1 is compulsory. It should be solved in the first 30 minutes in answer book. Page no 03 (Starting page of the Answer Book). Each question carries one mark.  
2) Don't forget to Mention question paper set (P/Q/R/S) on top of page.  
3) Figures to the right indicates full mark

Marks: 14

14

- The phase crossover frequency  $|G(j\omega)H(j\omega)| = \underline{\hspace{2cm}}$ 
  - $0^\circ$
  - $180^\circ$
  - $-90^\circ$
  - $-180^\circ$
- If the system has nonrepeated pole on the  $j\omega$  axis, the system is \_\_\_\_\_.
  - stable
  - unstable
  - marginally stable
  - conditionally unstable
- The gain margin of a system is 0dB. It represents a \_\_\_\_\_.
  - stable system
  - unstable system
  - marginally stable systems
  - conditionally stable system
- The polar plot of a transfer function passes through the critical point (-1,0). Gain margin is \_\_\_\_\_.
  - Zero
  - 1dB
  - 1dB
  - Infinity
- The path from source node to sink node in SFG is called as \_\_\_\_\_.
  - Forward loops
  - Forward path
  - Forward path gain
  - None of these
- The \_\_\_\_\_ number of forward paths and number of loops \_\_\_\_\_ are present in given SFG.

- a) 2, 2                      b) 2, 3  
c) 3, 2                      d) 3, 3
- 7) Three blocks with gain of 4, 6 and 8 are connected in parallel. The total gain of arrangement is \_\_\_\_\_  
a) 18                          b) 196  
c) 32                          d) 52

- 8) A synchro pair consists of a \_\_\_\_\_ and a \_\_\_\_\_.  
 a) Synchro transmitter & synchro control transformer  
 b) transmitter & receiver  
 c) transformer & detector  
 d) transducer & receiver
- 9) One of the basic requirements of a servomotor is that it must produce high torque at all \_\_\_\_\_.  
 a) Loads  
 b) Frequencies  
 c) Speeds  
 d) Voltages
- 10) If for second order system damping factor is less than one, then system response will be \_\_\_\_\_.  
 a) Under damped  
 b) Over damped  
 c) Critically damped  
 d) None of these
- 11) What is the type of the closed loop system for the plant transfer function  

$$G(S) = \frac{k S}{s^3(1+5S)}$$
  
 a) 2  
 b) 1  
 c) 3  
 d) 0
- 12) If the system is specified by open loop transfer function  

$$G(s)H(s) = \frac{K}{s(s+4)(s+6)}$$
, how many root loci proceed to end at infinity?  
 a) 2  
 b) 3  
 c) 5  
 d) 6
- 13) The compensator required to improve the steady state response of system is \_\_\_\_\_.  
 a) Lead  
 b) Lag  
 c) Lag-Lead  
 d) None of these
- 14) Bandwidth is increased when compensator used is \_\_\_\_\_.  
 a) Lead  
 b) Lag  
 c) Lag-Lead  
 d) None of these

**MCQ/Objective Type Questions**

Duration: 30 Minutes

Marks: 14

**Q.1 Choose the correct alternatives from the options.**

**14**

- 1) What will be the value of top, if there is size of stack STACK\_SIZE is 5?
  - a) 5
  - b) 6
  - c) 4
  - d) None
- 2) Stack is called as \_\_\_\_\_.
  - a) Last in first out
  - b) First in last out
  - c) Last in last out
  - d) First in first out
- 3) Identify the data structure which allows deletions at both ends of the list but insertion at only one end.
  - a) Input restricted dequeue
  - b) Output restricted dequeue
  - c) Priority queues
  - d) Stack
- 4) A \_\_\_\_\_ is a data structure that organizes data similar to a line in the supermarket, where the first one in line is the first one out.
  - a) Queue linked list
  - b) Stack linked list
  - c) Both of them
  - d) Neither of them
- 5) Recursion is similar to which of the following?
  - a) Switch Case
  - b) Loop
  - c) If-else
  - d) None
- 6) In recursion the condition after which the function will stop calling itself is \_\_\_\_\_.
  - a) Base condition
  - b) Function call
  - c) Both a and b
  - d) None
- 7) Head node is used in \_\_\_\_\_.
  - a) Graphs
  - b) Stacks
  - c) Linked list
  - d) Queues
- 8) Which of the following indicates pre-order traversal?
  - a) Left sub-tree, Right sub-tree and root
  - b) Right sub-tree, Left sub-tree and root
  - c) Root, Left sub-tree, Right sub-tree
  - d) Right sub-tree, root, Left sub-tree

- 9) The number of binary trees with 3 nodes which when traversed in post order gives the sequence A,B,C is ?
  - a) 3
  - b) 9
  - c) 7
  - d) 5
- 10) What is the hash function used in the division method?
  - a)  $h(k) = k/m$
  - b)  $h(k) = k \bmod m$
  - c)  $h(k) = m/k$
  - d)  $h(k) = m \bmod k$
- 11) Which of the following is a disadvantage of linear search?
  - a) Requires more space
  - b) Greater time complexities compared to other searching algorithms
  - c) Not easy to understand
  - d) Not easy to implement
- 12) In the following scenarios, when will you use selection sort?
  - a) The input is already sorted
  - b) A large file has to be sorted
  - c) Large values need to be sorted with small keys
  - d) Small values need to be sorted with large keys
- 13) Which of the following properties does a simple graph not hold?
  - a) Must be connected
  - b) Must be unweighted
  - c) Must have no loops
  - d) Must have no multiple edges
- 14) What is the maximum possible number of edges in a directed graph with no self loops having 8 vertices?
  - a) 28
  - b) 64
  - c) 256
  - d) 56

**Section – I**

**Q.2 Attempt any four.** **16**

- a) Write and explain an algorithm to evaluate a postfix expression.
- b) Write a 'C' program to find the fibonacci sequence using recursive functions
- c) Differentiate between Singly linked list and Circular linked list.
- d) Draw the recursive flowchart. Write the general algorithm for recursion.
- e) Define queue. Explain the different types of queues with suitable diagram.

**Q.3 Attempt any two.** **12**

- a) Write a 'C' program to implement following operations on a stack
  - 1) Push
  - 2) Pop
  - 3) Display
- b) Define Doubly linked list and state its advantages and disadvantages
- c) Write a 'C' program to implement following operations on a simple queue.
  - 1) Enqueue
  - 2) Dequeue
  - 3) Display

**Section – II**

**Q.4 Answer any four questions.** **16**

- a) Define the following terms of a graph
  - 1) Loop
  - 2) Weighted graph
  - 3) Isolated node
  - 4) Simple graph
- b) Write a C program to implement insertion sort method
- c) Create a binary search tree from the following keys:  
55, 32, 62, 38, 35, 51, 22, 59, 95, 13, 98
- d) Explain the binary search method to search an element in an array with an example.
- e) Define hashing. Explain the following hash functions with example.
  - 1) Division Method
  - 2) Digit Analysis

**Q.5 Answer any two questions.**

- a) What are the different methods to represent a graph? Explain any one method with example for representation of a graph
- b) What is hash collision? Explain closed addressing technique in detail
- c) Explain the different tree traversal methods with example. Find all the three traversal order for following binary search tree.

**S.Y. (B.Tech.) (Sem-II) (New) (CBCS) Examination: Oct/Nov - 2022**  
**ELECTRONICS ENGINEERING**  
**Data Structures and Algorithms**

Day & Date: Thursday, 09-03-2023  
 Time: 02:00 PM To 05:00 PM

Max. Marks: 70

**Instructions:** 1) Q. No. 1 is compulsory and should be solved in first 30 minutes in Answer Book. Page No.3 (starting page of the Answer Book). Each question carry one mark.  
 2) Don't forget to mention Question Paper Set (P/Q/R/S) at the top of the same page.

**MCQ/Objective Type Questions**

Duration: 30 Minutes

Marks: 14

**Q.1 Choose the correct alternatives from the options.**

**14**

- 1) Which of the following is a disadvantage of linear search?
  - a) Requires more space
  - b) Greater time complexities compared to other searching algorithms
  - c) Not easy to understand
  - d) Not easy to implement
- 2) In the following scenarios, when will you use selection sort?
  - a) The input is already sorted
  - b) A large file has to be sorted
  - c) Large values need to be sorted with small keys
  - d) Small values need to be sorted with large keys
- 3) Which of the following properties does a simple graph not hold?
  - a) Must be connected
  - b) Must be unweighted
  - c) Must have no loops
  - d) Must have no multiple edges
- 4) What is the maximum possible number of edges in a directed graph with no self loops having 8 vertices?
 

|        |       |
|--------|-------|
| a) 28  | b) 64 |
| c) 256 | d) 56 |
- 5) What will be the value of top, if there is size of stack STACK\_SIZE is 5?
 

|      |         |
|------|---------|
| a) 5 | b) 6    |
| c) 4 | d) None |
- 6) Stack is called as \_\_\_\_\_.
 

|                      |                       |
|----------------------|-----------------------|
| a) Last in first out | b) First in last out  |
| c) Last in last out  | d) First in first out |
- 7) Identify the data structure which allows deletions at both ends of the list but insertion at only one end.
 

|                             |                              |
|-----------------------------|------------------------------|
| a) Input restricted dequeue | b) Output restricted dequeue |
| c) Priority queues          | d) Stack                     |

- 8) A \_\_\_\_\_ is a data structure that organizes data similar to a line in the supermarket, where the first one in line is the first one out.
- a) Queue linked list                      b) Stack linked list  
c) Both of them                              d) Neither of them
- 9) Recursion is similar to which of the following?
- a) Switch Case                              b) Loop  
c) If-else                                      d) None
- 10) In recursion the condition after which the function will stop calling itself is \_\_\_\_\_.
- a) Base condition                              b) Function call  
c) Both a and b                              d) None
- 11) Head node is used in \_\_\_\_\_.
- a) Graphs                                      b) Stacks  
c) Linked list                                  d) Queues
- 12) Which of the following indicates pre-order traversal?
- a) Left sub-tree, Right sub-tree and root  
b) Right sub-tree, Left sub-tree and root  
c) Root, Left sub-tree, Right sub-tree  
d) Right sub-tree, root, Left sub-tree
- 13) The number of binary trees with 3 nodes which when traversed in post order gives the sequence A,B,C is ?
- a) 3                                              b) 9  
c) 7                                              d) 5
- 14) What is the hash function used in the division method?
- a)  $h(k) = k/m$                               b)  $h(k) = k \bmod m$   
c)  $h(k) = m/k$                               d)  $h(k) = m \bmod k$

**S.Y. (B.Tech.) (Sem-II) (New) (CBCS) Examination: Oct/Nov - 2022**  
**ELECTRONICS ENGINEERING**  
**Data Structures and Algorithms**

Day & Date: Thursday, 09-03-2023  
Time: 02:00 PM To 05:00 PM

Max. Marks: 56

- Instructions:** 1) All questions are compulsory.  
2) Figures to the right indicate full marks.  
3) Assume suitable data wherever necessary.

**Section – I**

**Q.2 Attempt any four.** **16**

- a) Write and explain an algorithm to evaluate a postfix expression.
- b) Write a 'C' program to find the fibonacci sequence using recursive functions
- c) Differentiate between Singly linked list and Circular linked list.
- d) Draw the recursive flowchart. Write the general algorithm for recursion.
- e) Define queue. Explain the different types of queues with suitable diagram.

**Q.3 Attempt any two.** **12**

- a) Write a 'C' program to implement following operations on a stack
  - 1) Push
  - 2) Pop
  - 3) Display
- b) Define Doubly linked list and state its advantages and disadvantages
- c) Write a 'C' program to implement following operations on a simple queue.
  - 1) Enqueue
  - 2) Dequeue
  - 3) Display

**Section – II**

**Q.4 Answer any four questions.** **16**

- a) Define the following terms of a graph
  - 1) Loop
  - 2) Weighted graph
  - 3) Isolated node
  - 4) Simple graph
- b) Write a C program to implement insertion sort method
- c) Create a binary search tree from the following keys:  
55, 32, 62, 38, 35, 51, 22, 59, 95, 13, 98
- d) Explain the binary search method to search an element in an array with an example.
- e) Define hashing. Explain the following hash functions with example.
  - 1) Division Method
  - 2) Digit Analysis

**Q.5 Answer any two questions.**

- a) What are the different methods to represent a graph? Explain any one method with example for representation of a graph
- b) What is hash collision? Explain closed addressing technique in detail
- c) Explain the different tree traversal methods with example. Find all the three traversal order for following binary search tree.

**MCQ/Objective Type Questions**

Duration: 30 Minutes

Marks: 14

**Q.1 Choose the correct alternatives from the options.**

**14**

- 1) A practical integrator has an additional \_\_\_\_\_ than ideal integrator.
  - a) resistor
  - b) capacitor
  - c) resistor and capacitor
  - d) two resistors
- 2) Output voltage swing indicates the values of \_\_\_\_\_ voltage output of the op amp.
  - a) saturation
  - b) supply
  - c) slew rate
  - d) all of these
- 3) A typical narrow band reject filter consists of two \_\_\_\_\_.
  - a) sections
  - b) T network
  - c) op amps
  - d) all of these
- 4) Transient response of an op amp is characterized by \_\_\_\_\_.
  - a) steady state, overshoot
  - b) overshoot, rise time
  - c) steady state, rise time
  - d) steady state, slew rate
- 5) Make odd man out: input offset current, input offset voltage, thermal drift, CMRR \_\_\_\_\_.
  - a) input offset current
  - b) input offset voltage
  - c) thermal drift
  - d) CMRR
- 6) For a Wein Bridge oscillator, the gain required for sustained oscillations is \_\_\_\_\_.
  - a) 1
  - b) 1.59
  - c) 2
  - d) 3
- 7) Take odd man out: square wave generator, free running multivibrator, astable multivibrator, bistable multivibrator \_\_\_\_\_.
  - a) square wave generator
  - b) free running multivibrator
  - c) astable multivibrator
  - d) bistable multivibrator
- 8) \_\_\_\_\_ is the slowest of all ADCs.
  - a) Flash
  - b) Successive approximation
  - c) Single slope
  - d) Dual slope

- 9) A temperature of milk tank need to be controlled. Which of below is required?
- a) ADC
  - b) sample and hold
  - c) transducer
  - d) all of these
- 10) A clamper is also called as \_\_\_\_\_.  
a) reference voltage circuit      b) dc inserter  
c) peak clipper      d) all of these
- 11) A high frequency and low frequency op mp equivalent circuits differs with \_\_\_\_\_.  
a) input resistance      b) gain  
c) output resistance      d) equivalent capacitance
- 12) A notch filter is a \_\_\_\_\_ filter.  
a) wide band stop      b) wide band pass  
c) narrow band stop      d) narrow band pass
- 13) \_\_\_\_\_ is a an open loop application of op amp.  
a) window detector      b) voltage follower  
c) I to V converter      d) V to I converter
- 14) When signals need to travel over long distance in noisy environment, one can use \_\_\_\_\_ amplifier.  
a) differential      b) log  
c) all pass      d) unity gain

Set **P**

**S.Y. (B.Tech.) (Sem - II) (New) (CBCS) Examination: Oct/Nov-2022**  
**ELECTRONICS ENGINEERING**  
**Analog Integrated Circuits**

Day & Date: Friday, 10-03-2023  
 Time: 02:00 PM To 05:00 PM

Max. Marks: 56

- Instructions:** 1) All questions are compulsory.  
 2) Figures to the right indicate full marks.  
 3) Assume suitable data if necessary.

**Section – I**

**Q.2 Answer the following questions. (Any Two)** **12**

- Derive an equation for closed loop voltage gain ( $A_F$ ) for non inverting amplifier for ideal & exact case. Also derive equation for closed loop voltage gain and loop gain ( $A\beta$ )
- Prove - when negative feedback is applied to a non inverting amplifier, its input resistance increases.
- Derive an expression for a closed loop gain of an op amp as a function of frequency.

**Q.3 Solve Any Four** **16**

- Draw and explain completely compensated inverting amplifier.
- Derive an expression for output of an integrator.
- What is loading effect? How op amp can be used to avoid it?
- $V_1, V_2, V_3$  &  $V_o$  are analog voltages. Show how op amp can be used to obtain  $V_o$  where  $V_o = V_1 + V_2 + V_3$
- Compare ideal and practical op amp.

**Section – II**

**Q.4 Solve Any Two** **12**

- Design a circuit: input is 8 bit binary number, output is proportional voltage between 0V to 5V.
- Design a circuit which through different color LEDs give indication about voltage range of an unknown input voltage. Assume suitable voltage ranges.
- Design a circuit which samples and holds an input waveform.

**Q.5 Solve Any Four** **16**

- Show how op amp can be used for notch filter.
- Discuss advantages and disadvantages of active filters over passive filters.
- Evaluate any four specifications of ADC.
- Discuss Schmitt trigger and its applications.
- What are oscillator types? Discuss with the context of components used, frequency, applications and types of waveforms.

### MCQ/Objective Type Questions

Duration: 30 Minutes

Marks: 14

**Q.1 Choose the correct alternatives from the options.**

14

- 1) A high frequency and low frequency op mp equivalent circuits differs with \_\_\_\_\_.  
a) input resistance  
b) gain  
c) output resistance  
d) equivalent capacitance
- 2) A notch filter is a \_\_\_\_\_ filter.  
a) wide band stop  
b) wide band pass  
c) narrow band stop  
d) narrow band pass
- 3) \_\_\_\_\_ is a an open loop application of op amp.  
a) window detector  
b) voltage follower  
c) I to V converter  
d) V to I converter
- 4) When signals need to travel over long distance in noisy environment, one can use \_\_\_\_\_ amplifier.  
a) differential  
b) log  
c) all pass  
d) unity gain
- 5) A practical integrator has an additional \_\_\_\_\_ than ideal integrator.  
a) resistor  
b) capacitor  
c) resistor and capacitor  
d) two resistors
- 6) Output voltage swing indicates the values of \_\_\_\_\_ voltage output of the op amp.  
a) saturation  
b) supply  
c) slew rate  
d) all of these
- 7) A typical narrow band reject filter consists of two \_\_\_\_\_.  
a) sections  
b) T network  
c) op amps  
d) all of these
- 8) Transient response of an op amp is characterized by \_\_\_\_\_.  
a) steady state, overshoot  
b) overshoot, rise time  
c) steady state, rise time  
d) steady state, slew rate

- 9) Make odd man out: input offset current, input offset voltage, thermal drift, CMRR \_\_\_\_\_.  
a) input offset current                      b) input offset voltage  
c) thermal drift                                d) CMRR
- 10) For a Wein Bridge oscillator, the gain required for sustained oscillations is \_\_\_\_\_.  
a) 1                                                b) 1.59  
c) 2                                                d) 3
- 11) Take odd man out: square wave generator, free running multivibrator, astable multivibrator, bistable multivibrator \_\_\_\_\_.  
a) square wave generator                      b) free running multivibrator  
c) astable multivibrator                        d) bistable multivibrator
- 12) \_\_\_\_\_ is the slowest of all ADCs.  
a) Flash                                            b) Successive approximation  
c) Single slope                                   d) Dual slope
- 13) A temperature of milk tank need to be controlled. Which of below is required?  
a) ADC                                              b) sample and hold  
c) transducer                                    d) all of these
- 14) A clamper is also called as \_\_\_\_\_.  
a) reference voltage circuit                      b) dc inserter  
c) peak clipper                                    d) all of these

- b) Derive an expression for output of an integrator.
- c) What is loading effect? How op amp can be used to avoid it?
- d)  $V_1, V_2, V_3$  &  $V_o$  are analog voltages. Show how op amp can be used to obtain  $V_o$  where  $V_o = V_1 + V_2 + V_3$
- e) Compare ideal and practical op amp.

**Section – II**

**Q.4 Solve Any Two** **12**

- a) Design a circuit: input is 8 bit binary number, output is proportional voltage between 0V to 5V.
- b) Design a circuit which through different color LEDs give indication about voltage range of an unknown input voltage. Assume suitable voltage ranges.
- c) Design a circuit which samples and holds an input waveform.

**Q.5 Solve Any Four** **16**

- a) Show how op amp can be used for notch filter.
- b) Discuss advantages and disadvantages of active filters over passive filters.
- c) Evaluate any four specifications of ADC.
- d) Discuss Schmitt trigger and its applications.
- e) What are oscillator types? Discuss with the context of components used, frequency, applications and types of waveforms.

Day & Date: Friday, 10-03-2023  
Time: 02:00 PM To 05:00 PM

**Instructions:** 1) Q. No. 1 is compulsory. It should be solved in the first 30 minutes in answer book. Page no 03 (Starting page of the Answer Book). Each question carries one mark.  
2) Don't forget to Mention question paper set (P/Q/R/S) on top of page.

Marks: 14

14

- Page 10 of 12

- 9) When signals need to travel over long distance in noisy environment, one can use \_\_\_\_\_ amplifier.
- |                 |               |
|-----------------|---------------|
| a) differential | b) log        |
| c) all pass     | d) unity gain |
- 10) A practical integrator has an additional \_\_\_\_\_ than ideal integrator.
- |                           |                  |
|---------------------------|------------------|
| a) resistor               | b) capacitor     |
| c) resistor and capacitor | d) two resistors |
- 11) Output voltage swing indicates the values of \_\_\_\_\_ voltage output of the op amp.
- |               |                 |
|---------------|-----------------|
| a) saturation | b) supply       |
| c) slew rate  | d) all of these |
- 12) A typical narrow band reject filter consists of two \_\_\_\_\_.
- |             |                 |
|-------------|-----------------|
| a) sections | b) T network    |
| c) op amps  | d) all of these |
- 13) Transient response of an op amp is characterized by \_\_\_\_\_.
- |                            |                            |
|----------------------------|----------------------------|
| a) steady state, overshoot | b) overshoot, rise time    |
| c) steady state, rise time | d) steady state, slew rate |
- 14) Make odd man out: input offset current, input offset voltage, thermal drift, CMRR \_\_\_\_\_.
- |                         |                         |
|-------------------------|-------------------------|
| a) input offset current | b) input offset voltage |
| c) thermal drift        | d) CMRR                 |

Day & Date: Friday, 10-03-2023  
 Time: 02:00 PM To 05:00 PM

Max. Marks: 56

- Instructions:** 1) All questions are compulsory.  
 2) Figures to the right indicate full marks.  
 3) Assume suitable data if necessary.

**Section – I**

**Q.2 Answer the following questions. (Any Two)** **12**

- Derive an equation for closed loop voltage gain ( $A_F$ ) for non inverting amplifier for ideal & exact case. Also derive equation for closed loop voltage gain and loop gain ( $A\beta$ )
- Prove - when negative feedback is applied to a non inverting amplifier, its input resistance increases.
- Derive an expression for a closed loop gain of an op amp as a function of frequency.

**Q.3 Solve Any Four** **16**

- Draw and explain completely compensated inverting amplifier.
- Derive an expression for output of an integrator.
- What is loading effect? How op amp can be used to avoid it?
- $V_1, V_2, V_3$  &  $V_o$  are analog voltages. Show how op amp can be used to obtain  $V_o$  where  $V_o = V_1 + V_2 + V_3$
- Compare ideal and practical op amp.

**Section – II**

**Q.4 Solve Any Two** **12**

- Design a circuit: input is 8 bit binary number, output is proportional voltage between 0V to 5V.
- Design a circuit which through different color LEDs give indication about voltage range of an unknown input voltage. Assume suitable voltage ranges.
- Design a circuit which samples and holds an input waveform.

**Q.5 Solve Any Four** **16**

- Show how op amp can be used for notch filter.
- Discuss advantages and disadvantages of active filters over passive filters.
- Evaluate any four specifications of ADC.
- Discuss Schmitt trigger and its applications.
- What are oscillator types? Discuss with the context of components used, frequency, applications and types of waveforms.

Max. Marks: 70

Marks: 14

14

- 1) In a low level amplitude modulation system, the amplifier following the modulated stage must be \_\_\_\_\_.  
a) Linear device  
b) Non Linear device  
c) harmonics device  
d) Class C amplifier
- 2) Thermal noise voltage in a resistor R is given by \_\_\_\_\_.  
a)  $\sqrt{4RkTB}$   
b)  $kTB$   
c)  $TBk^2$   
d) None
- 3) In an amplitude modulated waveform the amplitude of side bands is \_\_\_\_\_.  
a) Independent of the carrier amplitude  
b) Independent of the modulation index  
c) carrier amplitude x modulation index  
d) 1/2 carrier amplitude x modulation index
- 4) Noise power at the resistor is affected by the value of the resistor as \_\_\_\_\_.  
a) Directly proportional to the value of the resistor  
b) Inversely proportional to the value of the resistor  
c) Unaffected by the value of the resistor  
d) Becomes half as the resistance value is doubled
- 5) The relation between carrier power and total power in an AM wave is \_\_\_\_\_.  
a)  $P_C = P_T \left(1 + \frac{m^2}{4}\right)$   
b)  $P_C = P_T \left(1 + \frac{m^2}{2}\right)$   
c)  $P_T = P_C \left(1 + \frac{m^2}{4}\right)$   
d)  $P_T = P_C \left(1 + \frac{m^2}{2}\right)$
- 6) In superhetrodyne receiver the frequency of local oscillator is \_\_\_\_\_.  
a) higher than the incoming signal frequency  
b) lower than the incoming signal frequency  
c) equal to the incoming signal frequency  
d) none of above

- 7) In a radio receiver with simple AGC \_\_\_\_\_.  
a) the highest AGC voltage is produced between stations  
b) An increase signal strength produces more AGC  
c) audio stage gain is normally controlled by the AGC  
d) the faster the ACG time constant, the more accurate the output
- 8) In PM, the frequency deviation is proportional to \_\_\_\_\_.  
a) only modulating frequency  
b) both amplitude and frequency  
c) only amplitude of modulating signal  
d) antenna height
- 9) Which of the following statement is not valid for Armstrong modulation modulation system?  
a) the system is basically PM not FM  
b) AFC is not needed as a crystal oscillator is used  
c) frequency multiplication must be used  
d) equalization is unnecessary
- 10) Broadcasting antenna are generally \_\_\_\_\_.  
a) omni directional antenna                      b) vertical type  
c) horizontal type                                      d) any of these
- 11) During day time, the ionosphere consists of \_\_\_\_\_.  
a) D, E, F layers                                      b) D, E, F<sub>1</sub> layers  
c) D, E, F<sub>2</sub> layers                                      d) D, E, F<sub>1</sub>, F<sub>2</sub> layers
- 12) The ionosphere plays a significant role in radio wave propagation at \_\_\_\_\_.  
a) high frequency                                      b) ultra high frequency  
c) microwaves frequencies                      d) optical frequencies
- 13) In Pulse time modulation (PTM), \_\_\_\_\_.  
a) Amplitude of the carrier is constant  
b) Position or width of the carrier varies with modulating signal  
c) Pulse width modulation and pulse position modulation are the types of PTM  
d) All of the above
- 14) The sampling technique having the minimum noise interference is \_\_\_\_\_.  
a) Instantaneous sampling                      b) Natural sampling  
c) Flat top sampling                                      d) All of the above

**Analog Communication**

Day & Date: Tuesday, 14-03-2023  
 Time: 02:00 PM To 05:00 PM

Max. Marks: 56

- Instructions:** 1) All questions are compulsory.  
 2) Assume suitable data if necessary.  
 3) Figures to the right indicate full marks.

**Section – I**

**Q.2 Answer the following questions. (Any Four) 16**

- Why modulation is required?
- What are the different types of communication channels?
- Classify noise and give the example of each.
- Draw and explain superhetrodyne receiver.
- Define Bandwidth. The resonant frequency of RF amplifier of a receiver is a 1 MHz and its bandwidth is 10 KHz. What is the Q Factor?

**Q.3 Answer the following questions. (Any Two) 12**

- The output voltage of a transmitter is given by  $400(1+0.4 \sin 6280 t) \sin 3.14 \times 10^7 t$ . this voltage is fed to a load of  $600 \Omega$  resistance Determine:
  - carrier frequency
  - Modulating frequency
  - Carrier power
  - Total power output
  - Peak power output
- Comparison between DSB, SSB, ISB, and VSB with different parameters.
- Derive an expression for noise equivalent resistance due to cascading of many amplifiers.

**Section – II**

**Q.4 Answer the following questions. (Any Four) 16**

- The carrier swing of a frequency modulated signal is 70KHz and the modulating signal is a 7 KHz sine wave determine the modulation index of the FM signal.
- Explain pre-emphasis and de emphasis in brief.
- Define Nyquist Rate and its significant.
- Define characteristics of antenna.
- Explain Sky wave propagation.

**Q.5 Answer the following questions. (Any Two) 12**

- With suitable circuit diagram explain a frequency modulation of a crystal oscillator with a varactor diode.
- State and prove Sampling Theorem. Discuss the different types of Sampling.
- Illustrate with a neat diagram PAM Generation and Regeneration technique.

**Q.4 Answer the following questions. (Any Four) 16**

- The carrier swing of a frequency modulated signal is 70KHz and the modulating signal is a 7 KHz sine wave determine the modulation index of the FM signal.
- Explain pre-emphasis and de emphasis in brief.
- Define Nyquist Rate and its significant.
- Define characteristics of antenna.
- Explain Sky wave propagation.

**Q.5 Answer the following questions. (Any Two) 12**

- With suitable circuit diagram explain a frequency modulation of a crystal oscillator with a varactor diode.
- State and prove Sampling Theorem. Discuss the different types of Sampling.
- Illustrate with a neat diagram PAM Generation and Regeneration technique.

**S. Y. (B.Tech.) (Sem - II) (New) (CBCS) Examination: Oct/Nov-2022**  
**ELECTRONICS ENGINEERING**  
**Computational Statistics**

Day & Date: Thursday, 16-03-2023  
 Time: 02:00 PM To 05:00 PM

Max. Marks: 70

- Instructions:** 1) Q. No. 1 is compulsory. It should be solved in the first 30 minutes in Answer book. Page no 03 (Starting page of the Answer Book). Each Question carries one mark.  
 2) Don't forget to Mention question paper set (P/Q/R/S) on top of page.  
 3) Figures to the right indicates full marks

**MCQ/Objective Type Questions**

Duration: 30 Minutes

Marks: 14

**Q.1 Choose the correct alternatives from the options. 14**

- 1) Which of the following mentioned standard Probability density functions is applicable to discrete Random Variables?
 

|                          |                             |
|--------------------------|-----------------------------|
| a) Gaussian Distribution | b) Poisson Distribution     |
| c) Rayleigh Distribution | d) Exponential Distribution |
- 2) A variable that can assume any value between two given points is called \_\_\_\_\_.
 

|                               |                              |
|-------------------------------|------------------------------|
| a) Continuous random variable | b) Discrete random variable  |
| c) Irregular random variable  | d) Uncertain random variable |
- 3) \_\_\_\_\_ is an incredibly powerful tool for analysing data.
 

|                      |                        |
|----------------------|------------------------|
| a) Linear regression | b) Logistic regression |
| c) Gradient Descent  | d) Greedy algorithms   |
- 4) Analysis of variance in short form is?
 

|          |         |
|----------|---------|
| a) ANOV  | b) AVA  |
| c) ANOVA | d) ANVA |
- 5) The matrix which follows the conditions  $m=n$  is called?
 

|                  |                       |
|------------------|-----------------------|
| a) Square matrix | b) Rectangular matrix |
| c) Scalar matrix | d) Diagonal matrix    |
- 6) If the order of the matrix is  $m \times n$ , then how many elements will there be in the matrix?
 

|           |             |
|-----------|-------------|
| a) $mn$   | b) $m^2n^2$ |
| c) $mn^2$ | d) $2mn$    |
- 7) What is the probability of an impossible event?
 

|                      |                |
|----------------------|----------------|
| a) 1                 | b) 0           |
| c) Insufficient data | d) Not defined |
- 8) PCA reduce dimensionality of the data using feature extraction.
 

|         |          |
|---------|----------|
| a) True | b) False |
|---------|----------|
- 9) Analysis of ML algorithm needs \_\_\_\_\_.
 

|                                |                                  |
|--------------------------------|----------------------------------|
| a) Statistical learning theory | b) Computational learning theory |
| c) Both A and B                | d) None of the above             |

- 10) Among the following identify the one in which dimensionality reduction reduces \_\_\_\_\_.
  - a) Performance
  - b) Entropy
  - c) Stochastic
  - d) Co linearity
- 11) Choose a disadvantage of decision trees among the following.
  - a) Decision trees are robust to outliers
  - b) Factor analysis
  - c) Decision trees are prone to overfit
  - d) All of above
- 12) Which of the following are common classes of problems in machine learning?
  - a) Regression
  - b) Classification
  - c) Clustering
  - d) All of above
- 13) Under which condition SVD and PCA produce the same projection result?
  - a) When data has zero median
  - b) When data has zero mean
  - c) Both are always same
  - d) None of these
- 14) Decision tree cannot be used for clustering.
  - a) True
  - b) False

**S. Y. (B.Tech.) (Sem - II) (New) (CBCS) Examination: Oct/Nov-2022**  
**ELECTRONICS ENGINEERING**  
**Computational Statistics**

Day & Date: Thursday, 16-03-2023  
 Time: 02:00 PM To 05:00 PM

Max. Marks: 56

- Instructions:** 1) All questions are compulsory.  
 2) Figures to the right indicate full marks.  
 3) Assume suitable data if required.

**Section – I**

- Q.2 Answer the following questions. (Any Four) 16**
- Differentiate between discrete probability and continuous probability.
  - Describe linear regression in detail.
  - Solve following using Substitute method.  
 $2x-3y=-2$        $4x+y=24$
  - Explain problem formulation in regression.
  - Explain Bayes theorem in detail.
- Q.3 Answer the following questions. (Any Two) 12**
- Explain various rules in probability with proper example.
  - Describe eigen values and eigenvectors in detail.
  - Define dependent event. Explain dependent event with example.

**Section – II**

- Q.4 Answer the following questions. (Any Four) 16**
- Explain steps in PCA.
  - Explain dimensionality reduction with benefits and disadvantages.
  - Differentiate between under fitting and over fitting.
  - What is generalization? Explain generalization in detail.
  - Define machine learning. Describe various learning models in detail.
- Q.5 Answer the following questions. (Any Two) 12**
- Explain the applications of machine learning.
  - Explain under fitting and over fitting in detail.
  - Explain decision theory in machine learning.

Set Q

Max. Marks: 70

- 9) A variable that can assume any value between two given points is called \_\_\_\_\_.
- a) Continuous random variable      b) Discrete random variable  
c) Irregular random variable      d) Uncertain random variable
- 10) \_\_\_\_\_ is an incredibly powerful tool for analysing data.
- a) Linear regression      b) Logistic regression  
c) Gradient Descent      d) Greedy algorithms
- 11) Analysis of variance in short form is?
- a) ANOV      b) AVA  
c) ANOVA      d) ANVA
- 12) The matrix which follows the conditions  $m=n$  is called?
- a) Square matrix      b) Rectangular matrix  
c) Scalar matrix      d) Diagonal matrix
- 13) If the order of the matrix is  $m \times n$ , then how many elements will there be in the matrix?
- a)  $mn$       b)  $m^2n^2$   
c)  $mn^2$       d)  $2mn$
- 14) What is the probability of an impossible event?
- a) 1      b) 0  
c) Insufficient data      d) Not defined

**MCQ/Objective Type Questions**

Duration: 30 Minutes

Marks: 14

**Q.1 Choose the correct alternatives from the options.**

**14**

- 1) Which type of data can be stored in the database?
  - a) Image oriented data
  - b) Text, files containing data
  - c) Data in the form of audio or video
  - d) All of the above
- 2) What does an RDBMS consist of?
 

|                          |                         |
|--------------------------|-------------------------|
| a) Collection of Records | b) Collection of Keys   |
| c) Collection of Tables  | d) Collection of Fields |
- 3) The DBMS acts as an interface between \_\_\_\_\_ and \_\_\_\_\_ of an enterprise-class system.
  - a) Data and the DBMS
  - b) Application and SQL
  - c) Database application and the database
  - d) The user and the software
- 4) What is the function of the following command? Delete from r where P;
  - a) Clears entries from relation
  - b) Deletes relation
  - c) Deletes particular tuple from relation
  - d) All of the mentioned
- 5) Which of the following is the full form of DDL?
 

|                             |                             |
|-----------------------------|-----------------------------|
| a) Data definition language | b) Data derivation language |
| c) Dynamic data language    | d) Detailed data language   |
- 6) Which of the following is known as minimal super key?
 

|                |                  |
|----------------|------------------|
| a) Primary key | b) Candidate key |
| c) Foreign key | d) None          |
- 7) Which clause is used to retrieve a unique element from the table?
 

|                   |                      |
|-------------------|----------------------|
| a) SELECT UNIQUE  | b) SELECT DISTINCT   |
| c) Both A) and B) | d) None of the above |

- 8) What is ACID properties of Transactions?
- a) Atomicity, Consistency, Isolation, Database
  - b) Atomicity, Consistency, Isolation, Durability
  - c) Atomicity, Consistency, Inconsistent, Durability
  - d) Automatically, Concurrency. Isolation, Durability
- 9) A table is in 3NF if it is in 2NF and if it has no \_\_\_\_\_.  
a) Functional Dependencies                      b) Transitive Dependencies  
c) Trivial Functional Dependency              d) Multivalued Dependencies
- 10) Redundancy is reduced in a database table by using the \_\_\_\_\_ form.  
a) Abnormal                                          b) Normal  
c) Special                                            d) None
- 11) Which of the following is a type of Normal Form?  
a) ACNF                                              b) BCNF  
c) CCNF                                              d) DCNF
- 12) Some database columns can be used to create \_\_\_\_\_.  
a) Indices                                            b) Files  
c) Indexes                                            d) Records
- 13) Which of the following systems is responsible for ensuring isolation?  
a) Recovery system                                b) Atomic system  
c) Concurrency control system                d) Compiler system
- 14) In order to undo the work of transaction after last commit which one should be used?  
a) View                                              b) Commit  
c) Rollback                                           d) Flashback

Set **P**

**S.Y. (B.Tech.) (Sem-II) (New) (CBCS) Examination: Oct/Nov - 2022**  
**ELECTRONICS ENGINEERING**  
**Database Management Systems**

Day & Date: Thursday, 16-03-2023  
 Time: 02:00 PM To 05:00 PM

Max. Marks: 56

**Instructions:** 1) All question are compulsory.  
 2) Figures to the right indicate full marks.

**Section – I**

- Q.2 Attempt any three** **12**
- List four significant features of file processing system.
  - Explain any four relational algebra operations with example.
  - Define the following terms Entity, Attributes, Entity Sets, Cardinality and its types.
  - Discuss various DDL commands in SQL.
- Q.3 Attempt any two.** **16**
- Draw ER diagram for below scenario: A salesperson may manage many other salespeople. A salesperson is managed by only one salespeople. A salesperson can be an agent for many customers. A customer is managed by one salespeople. A customer can place many orders. An order can be placed by one customer. An order lists many inventory items. An inventory item may be listed on many orders. An inventory item is assembled from many parts. A part may be assembled into many inventory items. Many employees assemble an inventory item from many parts. A supplier supplies many parts. A part may be supplied by many suppliers.
  - In SQL, explain the terms with syntax and example. SELECT, DISTINCT, WHERE, ORDERBY
  - List significant differences between a file-processing system and DBMS.

**Section - II**

- Q.4 Attempt any three** **12**
- Define functional dependency and need of normalization.
  - Explain the terms: Transaction, ACID Property
  - Explain the following terms with example; primary indexing and clustering indexing.
  - Discuss timestamp-based protocol.
- Q.5 Attempt any two** **16**
- Discuss types of normalization in detail with example.
  - Explain conflict serializability with example.
  - Consider following schedules involving two transactions:  
 S1: r1(X); r1(Y); r2(X); r2(Y); w2(Y); w1(X)  
 S2: r1(X); r2(X); r2(Y); w2(Y); r1(Y); w1(X)
    - If given schedule is conflict serializable convert it into Conflict Serializable schedule.
    - If given schedule is not conflict serializable convert it into View Serializable Schedule.

Day & Date: Thursday, 16-03-2023  
 Time: 02:00 PM To 05:00 PM

Max. Marks: 70

- Instructions:** 1) Q. No. 1 is compulsory. It should be solved in the first 30 minutes in answer book. Page no 03 (Starting page of the Answer Book). Each question carries one mark.  
 2) Don't forget to Mention question paper set (P/Q/R/S) on top of page.  
 3) Figures to the right indicates full marks

**MCQ/Objective Type Questions**

Duration: 30 Minutes

Marks: 14

**Q.1 Choose the correct alternatives from the options.**

**14**

- 1) What is ACID properties of Transactions?
  - a) Atomicity, Consistency, Isolation, Database
  - b) Atomicity, Consistency, Isolation, Durability
  - c) Atomicity, Consistency, Inconsistent, Durability
  - d) Automatically, Concurrency. Isolation, Durability
- 2) A table is in 3NF if it is in 2NF and if it has no \_\_\_\_\_.
  - a) Functional Dependencies
  - b) Transitive Dependencies
  - c) Trivial Functional Dependency
  - d) Multivalued Dependencies
- 3) Redundancy is reduced in a database table by using the \_\_\_\_\_ form.
  - a) Abnormal
  - b) Normal
  - c) Special
  - d) None
- 4) Which of the following is a type of Normal Form?
  - a) ACNF
  - b) BCNF
  - c) CCNF
  - d) DCNF
- 5) Some database columns can be used to create \_\_\_\_\_.
  - a) Indices
  - b) Files
  - c) Indexes
  - d) Records
- 6) Which of the following systems is responsible for ensuring isolation?
  - a) Recovery system
  - b) Atomic system
  - c) Concurrency control system
  - d) Compiler system
- 7) In order to undo the work of transaction after last commit which one should be used?
  - a) View
  - b) Commit
  - c) Rollback
  - d) Flashback
- 8) Which type of data can be stored in the database?
  - a) Image oriented data
  - b) Text, files containing data
  - c) Data in the form of audio or video
  - d) All of the above

- 9) What does an RDBMS consist of?
- a) Collection of Records
  - b) Collection of Keys
  - c) Collection of Tables
  - d) Collection of Fields
- 10) The DBMS acts as an interface between \_\_\_\_\_ and \_\_\_\_\_ of an enterprise-class system.
- a) Data and the DBMS
  - b) Application and SQL
  - c) Database application and the database
  - d) The user and the software
- 11) What is the function of the following command? Delete from r where P;
- a) Clears entries from relation
  - b) Deletes relation
  - c) Deletes particular tuple from relation
  - d) All of the mentioned
- 12) Which of the following is the full form of DDL?
- a) Data definition language
  - b) Data derivation language
  - c) Dynamic data language
  - d) Detailed data language
- 13) Which of the following is known as minimal super key?
- a) Primary key
  - b) Candidate key
  - c) Foreign key
  - d) None
- 14) Which clause is used to retrieve a unique element from the table?
- a) SELECT UNIQUE
  - b) SELECT DISTINCT
  - c) Both A) and B)
  - d) None of the above

  - In SQL, explain the terms with syntax and example. SELECT, DISTINCT, WHERE, ORDERBY
  - List significant differences between a file-processing system and DBMS.

**Section - II**

- Q.4 Attempt any three** **12**
- Define functional dependency and need of normalization.
  - Explain the terms: Transaction, ACID Property
  - Explain the following terms with example; primary indexing and clustering indexing.
  - Discuss timestamp-based protocol.
- Q.5 Attempt any two** **16**
- Discuss types of normalization in detail with example.
  - Explain conflict serializability with example.
  - Consider following schedules involving two transactions:  
 S1: r1(X); r1(Y); r2(X); r2(Y); w2(Y); w1(X)  
 S2: r1(X); r2(X); r2(Y); w2(Y); r1(Y); w1(X)
    - If given schedule is conflict serializable convert it into Conflict Serializable schedule.
    - If given schedule is not conflict serializable convert it into View Serializable Schedule.

**Seat  
No.**

- 8) The binary relation  $\{(1,1), (2,1), (2,2), (2,3), (2,4), (3,1), (3,2)\}$  on the set  $\{1, 2, 3\}$  is \_\_\_\_\_.  
 a) reflexive, symmetric and transitive  
 b) irreflexive, symmetric and transitive  
 c) neither reflexive, nor irreflexive but transitive  
 d) irreflexive and antisymmetric
- 9) Determine the partitions of the set  $\{3, 4, 5, 6, 7\}$  from the following subsets.  
 a)  $\{3,5\}, \{3,6,7\}, \{4,5,6\}$                       b)  $\{3\}, \{4,6\}, \{5\}, \{7\}$   
 c)  $\{3,4,6\}, \{7\}$                                       d)  $\{5,6\}, \{5,7\}$
- 10) For an inverse to exist it is necessary that a function should be \_\_\_\_\_.  
 a) injection                                              b) bijection  
 c) surjection                                            d) none of the mentioned
- 11) Hasse diagrams are drawn for  
 a) Boolean Algebra                                      b) POSET  
 c) Lattices                                                d) For all
- 12) A group  $(M, *)$  is said to be abelian if \_\_\_\_\_.  
 a)  $(x + y) = (y + x)$                                       b)  $(x^* y) = (y^* x)$   
 c)  $(x + y) = x$                                             d)  $(y^* x) = (x + y)$
- 13) A monoid is called a group if \_\_\_\_\_.  
 a)  $(a^* a) = a = (a + c)$                                       b)  $(a^* c) = (a + c)$   
 c)  $(a + c) = a$                                             d)  $(a^* c) = (c^* a) = e$
- 14) A cyclic group is always \_\_\_\_\_.  
 a) abelian group                                              b) monoid  
 c) semigroup                                                d) subgroup

Set **P**

**S.Y. (B.Tech.) (Sem-I) (New) (CBCS) Examination: Oct/Nov - 2022**  
**COMPUTER SCIENCE & ENGINEERING**  
**Discrete Mathematical Structures**

Day & Date: Wednesday, 15-03-2023  
 Time: 02:00 PM To 05:00 PM

Max. Marks: 56

**Instructions:** 1) All question are compulsory.  
 2) Figures to the right indicate full marks.

**Section – I**

**Q.2 Attempt any three** **12**

- Explain in detail composition of binary relation with example.
- Given the relation  $R$  on set  $X = \{1, 2, \dots, 7\}$   
 $R = \{ \langle x, y \rangle \mid (x - y) \text{ is divisible by } 3 \}$ , show that  $R$  is equivalence relation.
- Define following terms  
 i) Contradiction ii) WFF
- What is Tautological implication? Show the following implication.  
 $\neg P \wedge (P \vee Q) \Rightarrow Q$

**Q.3 Attempt any two.** **16**

- What is binary relation? List and define the properties of binary relation with example.
- What is partial ordering? Explain in detail partial ordered set representation with Hasse diagram.  
 Let  $X = \{2, 3, 6, 12, 24, 36\}$  and relation  $\leq$  be such that  $x \leq y$  if  $x$  divides  $y$ .  
 Draw Hasse diagram of  $\langle X, \leq \rangle$ .
- Obtain the PDNF of I and PCNF of II following statement formulas  
 i)  $(P \wedge Q) \vee (\neg p \wedge R) \vee (Q \wedge R)$   
 ii)  $(\neg P \rightarrow R) \wedge (Q \leftrightarrow P)$

**Section - II**

**Q.4 Attempt any three** **12**

- Define semigroup and explain the homomorphism of semigroup with example.
- Write note on the following  
 1) subalgebra  
 2) sub-lattice
- Define and explain in detail Inverse function.
- Define group with an example.

**Q.5 Attempt any two** **16**

- Define Algebraic System & State its Properties.
- Define and explain in detail Composition of functions.  
 Let  $X = \{1, 2, 3\}$  and  $f, g, h$ , and  $s$  be functions from  $X$  to  $X$  given by  
 $f = \{ \langle 1, 2 \rangle, \langle 2, 3 \rangle, \langle 3, 1 \rangle \}$ ,  $g = \{ \langle 1, 2 \rangle, \langle 2, 1 \rangle, \langle 3, 3 \rangle \}$ ,  $h = \{ \langle 1, 1 \rangle, \langle 2, 2 \rangle, \langle 3, 1 \rangle \}$ ,  $s = \{ \langle 1, 1 \rangle, \langle 2, 2 \rangle, \langle 3, 3 \rangle \}$  find fog, gof, fohog, sog, gos, sos and fos.
- Explain with example function and their types.

**S.Y. (B.Tech.) (Sem-I) (New) (CBCS) Examination: Oct/Nov - 2022**  
**COMPUTER SCIENCE & ENGINEERING**  
**Discrete Mathematical Structures**

Day & Date: Wednesday, 15-03-2023  
 Time: 02:00 PM To 05:00 PM

Max. Marks: 70

- Instructions:** 1) Q. No. 1 is compulsory and should be solved in first 30 minutes in Answer Book. Page No.3 (starting page of the Answer Book). Each question carry one mark.  
 2) Don't forget to mention Question Paper Set (P/Q/R/S) at the top of the same page.

**MCQ/Objective Type Questions**

Duration: 30 Minutes

Marks: 14

**Q.1 Choose the correct alternatives from the options.**

**14**

- 1) The binary relation  $\{(1,1), (2,1), (2,2), (2,3), (2,4), (3,1), (3,2)\}$  on the set  $\{1, 2, 3\}$  is \_\_\_\_\_.  
 a) reflexive, symmetric and transitive  
 b) irreflexive, symmetric and transitive  
 c) neither reflexive, nor irreflexive but transitive  
 d) irreflexive and antisymmetric
- 2) Determine the partitions of the set  $\{3, 4, 5, 6, 7\}$  from the following subsets.  
 a)  $\{3,5\}, \{3,6,7\}, \{4,5,6\}$   
 b)  $\{3\}, \{4,6\}, \{5\}, \{7\}$   
 c)  $\{3,4,6\}, \{7\}$   
 d)  $\{5,6\}, \{5,7\}$
- 3) For an inverse to exist it is necessary that a function should be \_\_\_\_\_.  
 a) injection  
 b) bijection  
 c) surjection  
 d) none of the mentioned
- 4) Hasse diagrams are drawn for  
 a) Boolean Algebra  
 b) POSET  
 c) Lattices  
 d) For all
- 5) A group  $(M, *)$  is said to be abelian if \_\_\_\_\_.  
 a)  $(x + y) = (y + x)$   
 b)  $(x * y) = (y * x)$   
 c)  $(x + y) = x$   
 d)  $(y * x) = (x + y)$
- 6) A monoid is called a group if \_\_\_\_\_.  
 a)  $(a * a) = a = (a + c)$   
 b)  $(a * c) = (a + c)$   
 c)  $(a + c) = a$   
 d)  $(a * c) = (c * a) = e$
- 7) A cyclic group is always \_\_\_\_\_.  
 a) abelian group  
 b) monoid  
 c) semigroup  
 d) subgroup
- 8)  $A \rightarrow (A \vee q)$  is a \_\_\_\_\_.  
 a) Tautology  
 b) Contradiction  
 c) Contingency  
 d) None of the mentioned

- 9)  $\sim A \vee \sim B$  is logically equivalent to?  
 a)  $\sim A \rightarrow \sim B$  b)  $\sim A \wedge \sim B$   
 c)  $A \rightarrow \sim B$  d)  $B \vee A$
- 10) The contrapositive of  $p \rightarrow q$  is the proposition of \_\_\_\_\_.  
 a)  $\neg p \rightarrow \neg q$  b)  $\neg q \rightarrow \neg p$   
 c)  $q \rightarrow p$  d)  $\neg q \rightarrow p$
- 11) PCNF is also called \_\_\_\_\_.  
 a) sum of product canonical form b) product of sum canonical form  
 c) sum canonical form d) product canonical form
- 12) What is the Cartesian product of  $A = \{1, 2\}$  and  $B = \{a, b\}$ ?  
 a)  $\{ \langle 1, a \rangle, \langle 1, b \rangle, \langle 2, a \rangle, \langle 2, b \rangle \}$   
 b)  $\{ \langle 1, 1 \rangle, \langle 2, 2 \rangle, \langle a, a \rangle, \langle b, b \rangle \}$   
 c)  $\{ \langle 1, a \rangle, \langle 2, a \rangle, \langle 1, b \rangle, \langle 2, b \rangle \}$   
 d)  $\{ \langle 1, 1 \rangle, \langle a, a \rangle, \langle 2, a \rangle, \langle 1, b \rangle \}$
- 13) The shaded area of figure is best described by?

- a)  $A \setminus (\text{Complement of } A)$  b)  $B - (A \cap B) - (C \cap B)$   
 c)  $A \cap C \cap B$  d)  $B \setminus (\text{Complement of } B)$
- 14) If set  $C$  is  $\{1, 2, 3, 4\}$  and  $C - D = \Phi$  then set  $D$  can be \_\_\_\_\_.  
 a)  $\{1, 2, 4, 5\}$  b)  $\{1, 2, 3\}$   
 c)  $\{1, 2, 3, 4, 5\}$  d) None of the mentioned

Set **Q**

**S.Y. (B.Tech.) (Sem-I) (New) (CBCS) Examination: Oct/Nov - 2022**  
**COMPUTER SCIENCE & ENGINEERING**  
**Discrete Mathematical Structures**

Day & Date: Wednesday, 15-03-2023  
 Time: 02:00 PM To 05:00 PM

Max. Marks: 56

**Instructions:** 1) All question are compulsory.  
 2) Figures to the right indicate full marks.

**Section – I**

**Q.2 Attempt any three** **12**

- Explain in detail composition of binary relation with example.
- Given the relation  $R$  on set  $X = \{1, 2, \dots, 7\}$   
 $R = \{ \langle x, y \rangle \mid (x - y) \text{ is divisible by } 3 \}$ , show that  $R$  is equivalence relation.
- Define following terms  
 i) Contradiction ii) WFF
- What is Tautological implication? Show the following implication.  
 $\neg P \wedge (P \vee Q) \Rightarrow Q$

**Q.3 Attempt any two.** **16**

- What is binary relation? List and define the properties of binary relation with example.
- What is partial ordering? Explain in detail partial ordered set representation with Hasse diagram.  
 Let  $X = \{2, 3, 6, 12, 24, 36\}$  and relation  $\leq$  be such that  $x \leq y$  if  $x$  divides  $y$ .  
 Draw Hasse diagram of  $\langle X, \leq \rangle$ .
- Obtain the PDNF of I and PCNF of II following statement formulas  
 i)  $(P \wedge Q) \vee (\neg p \wedge R) \vee (Q \wedge R)$   
 ii)  $(\neg P \rightarrow R) \wedge (Q \leftrightarrow P)$

**Section - II**

**Q.4 Attempt any three** **12**

- Define semigroup and explain the homomorphism of semigroup with example.
- Write note on the following  
 1) subalgebra  
 2) sub-lattice
- Define and explain in detail Inverse function.
- Define group with an example.

**Q.5 Attempt any two** **16**

- Define Algebraic System & State its Properties.
- Define and explain in detail Composition of functions.  
 Let  $X = \{1, 2, 3\}$  and  $f, g, h$ , and  $s$  be functions from  $X$  to  $X$  given by  
 $f = \{ \langle 1, 2 \rangle, \langle 2, 3 \rangle, \langle 3, 1 \rangle \}$ ,  $g = \{ \langle 1, 2 \rangle, \langle 2, 1 \rangle, \langle 3, 3 \rangle \}$ ,  $h = \{ \langle 1, 1 \rangle, \langle 2, 2 \rangle, \langle 3, 1 \rangle \}$ ,  $s = \{ \langle 1, 1 \rangle, \langle 2, 2 \rangle, \langle 3, 3 \rangle \}$  find fog, gof, fohog, sog, gos, sos and fos.
- Explain with example function and their types.

 ii)  $(\neg P \rightarrow R) \wedge (Q \leftrightarrow P)$

**Section - II**

**Q.4 Attempt any three** **12**

- Define semigroup and explain the homomorphism of semigroup with example.
- Write note on the following  
 1) subalgebra  
 2) sub-lattice
- Define and explain in detail Inverse function.
- Define group with an example.

**Q.5 Attempt any two** **16**

- Define Algebraic System & State its Properties.
- Define and explain in detail Composition of functions.  
 Let  $X = \{1, 2, 3\}$  and  $f, g, h$ , and  $s$  be functions from  $X$  to  $X$  given by  
 $f = \{ \langle 1, 2 \rangle, \langle 2, 3 \rangle, \langle 3, 1 \rangle \}$ ,  $g = \{ \langle 1, 2 \rangle, \langle 2, 1 \rangle, \langle 3, 3 \rangle \}$ ,  $h = \{ \langle 1, 1 \rangle, \langle 2, 2 \rangle, \langle 3, 1 \rangle \}$ ,  $s = \{ \langle 1, 1 \rangle, \langle 2, 2 \rangle, \langle 3, 3 \rangle \}$  find fog, gof, fohog, sog, gos, sos and fos.
- Explain with example function and their types.

**S.Y. (B.Tech.) (Sem-I) (New) (CBCS) Examination: Oct/Nov - 2022**  
**COMPUTER SCIENCE & ENGINEERING**  
**Data structures**

Day & Date: Friday, 17-03-2023  
 Time: 02:00 PM To 05:00 PM

Max. Marks: 70

- Instructions:** 1) Q. No. 1 is compulsory and should be solved in first 30 minutes in Answer Book. Page No.3 (starting page of the Answer Book). Each question carry one mark.  
 2) Don't forget to mention Question Paper Set (P/Q/R/S) at the top of the same page.

**MCQ/Objective Type Questions**

Duration: 30 Minutes

Marks: 14

**Q.1 Choose the correct alternatives from the options.**

**14**

- 1) Which one of the following is an application of Stack Data Structure?  
 a) Managing function calls  
 b) The stock span problem  
 c) Arithmetic expression evaluation  
 d) All of the above
- 2) A hash table of length 10 uses open addressing with hash function  $h(k)=k \bmod 10$ , and linear probing. After inserting 6 values into an empty hash table, the table is as shown below.

|   |    |
|---|----|
| 0 |    |
| 1 |    |
| 2 | 42 |
| 3 | 23 |
| 4 | 34 |
| 5 | 52 |
| 6 | 46 |
| 7 | 33 |
| 8 |    |
| 9 |    |

Which one of the following choices gives a possible order in which the key values could have been inserted in the table?

- a) 46, 42, 34, 52, 23, 33      b) 34, 42, 23, 52, 33, 46  
 c) 46, 34, 42, 23, 52, 33      d) 42, 46, 33, 23, 34, 52
- 3) Suppose the numbers 7, 5, 1, 8, 3, 6, 0, 9, 4, 2 are inserted in that order into an initially empty binary search tree. The binary search tree uses the usual ordering on natural numbers. What is the in-order traversal sequence of the resultant tree?
- a) 7 5 1 0 3 2 4 6 8 9      b) 0 2 4 3 1 6 5 9 8 7  
 c) 0 1 2 3 4 5 6 7 8 9      d) 9 8 6 4 2 3 0 1 5 7

- 4) B+ Trees are considered BALANCED because
  - a) the lengths of the paths from the root to all leaf nodes are all equal.
  - b) the lengths of the paths from the root to all leaf nodes differ from each other by at most 1.
  - c) the number of children of any two non-leaf sibling nodes differ by at most 1.
  - d) the number of records in any two leaf nodes differ by at most 1
- 5) An advantage of chained hash table (external hashing) over the open addressing scheme is
  - a) Worst case complexity of search operations is less
  - b) Space used is less
  - c) Deletion is easier
  - d) None of the above
- 6) In \_\_\_\_\_ searching technique records must be in sorted order.
  - a) Hashing
  - b) Binary search
  - c) Linear search
  - d) Tree search
- 7) Two main measures for the efficiency of an algorithm are \_\_\_\_\_.
  - a) Processor and memory
  - b) Complexity and capacity
  - c) Time and space
  - d) Data and space
- 8) Quick sort running time depends on the selection of
  - a) size of array
  - b) pivot element
  - c) sequence of values
  - d) none of the above
- 9) Dijkstra algorithm is used for finding \_\_\_\_\_.
  - a) Cycle in the graph
  - b) Topological sort
  - c) shortest path
  - d) Tree in a graph
- 10) Which one of the following data structures are preferred in database-system implementation?
  - a) AVL tree
  - b) B tree
  - c) B+ tree
  - d) Splay tree
- 11) Which of the following is the prefix form of  $A+B*C$ ?
  - a)  $A+(BC^*)$
  - b)  $+AB^*C$
  - c)  $ABC+^*$
  - d)  $+A^*BC$
- 12) If the elements '1', '2', '3' and '4' are added in a stack, so what would be the order for the removal?
  - a) 1234
  - b) 2134
  - c) 4321
  - d) None of the above
- 13) Which of the following is the time complexity to search an element in the linked list?
  - a)  $O(1)$
  - b)  $O(n)$
  - c)  $O(\log n)$
  - d)  $O(n \log n)$
- 14) How can we define a AVL tree?
  - a) A tree which is binary search tree and height balanced tree
  - b) A tree which is a binary search tree but unbalanced tree.
  - c) A tree with utmost two children
  - d) A tree with utmost three children

**S.Y. (B.Tech.) (Sem-I) (New) (CBCS) Examination: Oct/Nov - 2022**  
**COMPUTER SCIENCE & ENGINEERING**  
**Data structures**

Day & Date: Friday, 17-03-2023  
 Time: 02:00 PM To 05:00 PM

Max. Marks: 56

**Instructions:** 1) All question are compulsory.  
 2) Figures to the right indicate full marks.

**Section – I**

**Q.2 Attempt any four** **20**

- a) Perform Bubble sort (ascending) of following numbers. Show every iteration.  
 $A = \{15, 3, 21, 5, 11, 45, 15\}$
- b) Perform quick sort (ascending) of following numbers-show every iteration  
 18, 16, 4, 15, 16, 9, 7, 8, 3
- c) Write a short note on the collision resolution technique of Linear Probing for the following elements 15,22,35,33,41,36,57,9
- d) Define queue. Explain operations of queue using array?
- e) Elaborate about Singly Linked List.
  - i) Node Structure
  - ii) Inserting a node at the end
  - iii) Deleting a node from Beginning

**Q.3 Attempt any one.** **08**

- a) How an infix expression is converted to postfix using stack? Convert following expression into postfix by providing proper explanation and showing the content of stack?  $(A + B) * C / D + E \wedge F / G$
- b) Explain Merge Sort along with its working for the following example 1, 6, 3, 2, 7, 5, 8, 4. Also write a pseudocode(or program) for merge and mergesort functions

**Section - II**

**Q.4 Attempt any four** **20**

- a) Define following terms
  - i) Height of the tree
  - ii) Level of the tree
  - iii) Full binary tree
  - iv) complete binary tree
  - v) perfect binary tree
- b) Construct a Binary tree with following given orders. (Give proper explanation)  
 Preorder= ABDGHEICFJK  
 InOrder= GDHBEIACJFK
- c) Define the graph And explain Adjacency List and Adjacency Matrix Graph Representation of graph

- d) Define following terminologies in Graph
- neighbours
  - degree of a node
  - regular graph
  - path
  - Cycle
- e) Explain Multiway Tree with a proper diagram. Also explain how multiway tree are a useful data structure with its applications

**Q.5 Attempt any one****08**

- a) With proper explanation find Inorder, Preorder and Post order Traversal of the following tree.

- b) Explain AVL Tree with all types of rotation and also construct AVL tree for the following example 21,26,30,9,4,14,28,18,15,10,2,3,7

| 7 | 33 |
| 8 |    |
| 9 |    |

Which one of the following choices gives a possible order in which the key values could have been inserted in the table?

- 46, 42, 34, 52, 23, 33
  - 34, 42, 23, 52, 33, 46
  - 46, 34, 42, 23, 52, 33
  - 42, 46, 33, 23, 34, 52
- 12) Suppose the numbers 7, 5, 1, 8, 3, 6, 0, 9, 4, 2 are inserted in that order into an initially empty binary search tree. The binary search tree uses the usual ordering on natural numbers. What is the in-order traversal sequence of the resultant tree?
- 7 5 1 0 3 2 4 6 8 9
  - 0 2 4 3 1 6 5 9 8 7
  - 0 1 2 3 4 5 6 7 8 9
  - 9 8 6 4 2 3 0 1 5 7
- 13) B+ Trees are considered BALANCED because
- the lengths of the paths from the root to all leaf nodes are all equal.
  - the lengths of the paths from the root to all leaf nodes differ from each other by at most 1.
  - the number of children of any two non-leaf sibling nodes differ by at most 1.
  - the number of records in any two leaf nodes differ by at most 1
- 14) An advantage of chained hash table (external hashing) over the open addressing scheme is
- Worst case complexity of search operations is less
  - Space used is less
  - Deletion is easier
  - None of the above

**S.Y. (B.Tech.) (Sem-I) (New) (CBCS) Examination: Oct/Nov - 2022**  
**COMPUTER SCIENCE & ENGINEERING**  
**Data structures**

Day & Date: Friday, 17-03-2023  
 Time: 02:00 PM To 05:00 PM

Max. Marks: 56

**Instructions:** 1) All question are compulsory.  
 2) Figures to the right indicate full marks.

**Section – I**

**Q.2 Attempt any four** **20**

- a) Perform Bubble sort (ascending) of following numbers. Show every iteration.  
 $A = \{15, 3, 21, 5, 11, 45, 15\}$
- b) Perform quick sort (ascending) of following numbers-show every iteration  
 18, 16, 4, 15, 16, 9, 7, 8, 3
- c) Write a short note on the collision resolution technique of Linear Probing for the following elements 15, 22, 35, 33, 41, 36, 57, 9
- d) Define queue. Explain operations of queue using array?
- e) Elaborate about Singly Linked List.
  - i) Node Structure
  - ii) Inserting a node at the end
  - iii) Deleting a node from Beginning

**Q.3 Attempt any one.** **08**

- a) How an infix expression is converted to postfix using stack? Convert following expression into postfix by providing proper explanation and showing the content of stack?  $(A + B) * C / D + E \wedge F / G$
- b) Explain Merge Sort along with its working for the following example 1, 6, 3, 2, 7, 5, 8, 4. Also write a pseudocode(or program) for merge and mergesort functions

**Section - II**

**Q.4 Attempt any four** **20**

- a) Define following terms
  - i) Height of the tree
  - ii) Level of the tree
  - iii) Full binary tree
  - iv) complete binary tree
  - v) perfect binary tree
- b) Construct a Binary tree with following given orders. (Give proper explanation)  
 Preorder= ABDGHEICFJK  
 InOrder= GDHBEIACJFK
- c) Define the graph And explain Adjacency List and Adjacency Matrix Graph Representation of graph

- d) Define following terminologies in Graph
- neighbours
  - degree of a node
  - regular graph
  - path
  - Cycle
- e) Explain Multiway Tree with a proper diagram. Also explain how multiway tree are a useful data structure with its applications

**Q.5 Attempt any one****08**

- a) With proper explanation find Inorder, Preorder and Post order Traversal of the following tree.

- b) Explain AVL Tree with all types of rotation and also construct AVL tree for the following example 21,26,30,9,4,14,28,18,15,10,2,3,7

Day & Date: Tuesday, 21-03-2023  
 Time: 02:00 PM To 05:00 PM

Max. Marks: 70

- Instructions:** 1) Q. No. 1 is compulsory. It should be solved in the first 30 minutes in answer book. Page no 03 (Starting page of the Answer Book). Each question carries one mark.  
 2) Don't forget to Mention question paper set (P/Q/R/S) on top of page.  
 3) Figures to the right indicates full marks

**MCQ/Objective Type Questions**

Duration: 30 Minutes

Marks: 14

**Q.1 Choose the correct alternatives from the options.**

**14**

- 1) Which of the following is correct for microprocessor Intel 8085?
 

|                         |                          |
|-------------------------|--------------------------|
| a) 8 bit microprocessor | b) 16 bit microprocessor |
| c) 4 bit microprocessor | d) 32 bit microprocessor |
- 2) Which of the following is used for storing flag registers?
 

|                    |                          |
|--------------------|--------------------------|
| a) Status register | b) Control register      |
| c) Buffer register | d) None of the mentioned |
- 3) 8086 can access up to?
 

|          |          |
|----------|----------|
| a) 512KB | b) 1Mb   |
| c) 2Mb   | d) 256KB |
- 4) The instruction, MOV AX, [BX] is an example of \_\_\_\_\_.
 

|                                      |
|--------------------------------------|
| a) direct addressing mode            |
| b) register addressing mode          |
| c) register relative addressing mode |
| d) register indirect addressing mode |
- 5) The instruction, "INC" increases the contents of the specified register or memory location by
 

|      |      |
|------|------|
| a) 2 | b) 0 |
| c) 1 | d) 3 |
- 6) The directive that marks the end of a logical segment is \_\_\_\_\_.
 

|               |                  |
|---------------|------------------|
| a) ENDS       | b) END           |
| c) ENDS & END | d) None of these |
- 7) NMI stands for \_\_\_\_\_.
 

|                           |                           |
|---------------------------|---------------------------|
| a) non maskable interrupt | b) non multiple interrupt |
| c) non movable interrupt  | d) none of the mentioned  |
- 8) Port C of 8255 can function independently as \_\_\_\_\_.
 

|                                 |                                |
|---------------------------------|--------------------------------|
| a) input port                   | b) output port                 |
| c) either input or output ports | d) both input and output ports |
- 9) The data bus buffer is controlled by \_\_\_\_\_.
 

|                          |                             |
|--------------------------|-----------------------------|
| a) control word register | b) read/write control logic |
| c) data bus              | d) none of the mentioned    |

- 10) Mode 0 is also called as \_\_\_\_\_.
  - a) Simple I/O mode
  - b) Strobed I/O mode 18
  - c) Bidirectional I/O mode
  - d) None of these
- 11) The unit that executes all the numeric processor instructions in 8087 is \_\_\_\_\_.
  - a) Control unit
  - b) ALU
  - c) Numeric extension unit
  - d) None of the mentioned
- 12) The flags that are used for controlling machine operation are called \_\_\_\_\_.
  - a) status flags
  - b) control flags
  - c) machine controlled flags
  - d) all of the mentioned
- 13) The CPU of 80286 contains \_\_\_\_\_.
  - a) 16-bit general purpose registers
  - b) 16-bit segment registers
  - c) status and control register
  - d) all of the mentioned
- 14) The strobed input/output mode is another name of \_\_\_\_\_.
  - a) mode 0
  - b) mode 1
  - c) mode 2
  - d) none

Day & Date: Tuesday, 21-03-2023  
Time: 02:00 PM To 05:00 PM

Max. Marks: 56

**Instructions:** 1) All questions are compulsory.  
2) Figures to the right indicate full marks.

**Section – I**

**Q.2 Answer the following question. (Any Three) 12**

- a) Explain flag Registers of 8085.
- b) What are different types of Addressing Modes explain with example.
- c) Explain Directives in 8086.
- d) Explain PUSH, POP, OUT, HLT instruction.

**Q.3 Draw and explain architecture of 8086. 08**

**Q.4 Draw and explain minimum mode of 8086. 08**

**OR**

Write a assembly language program to perform addition subtraction of two 16 bit data.

**Section – II**

**Q.5 Answer the following question. (Any Three) 12**

- a) Differentiate between makeable and nonmaskable interrupt.
- b) Explain following.
  - 1) ISR
  - 2) IRR
  - 3) IMR
  - 4) Priority Resolver
- c) Write down features of 8255.
- d) What are different numeric data types.

**Q.6 Draw and explain block diagram of 8257 DMA controller. 08**

**Q.7 Explain following operating mode of 8257. 08**

- a) Rotating operating mode
- b) Fixed operating mode
- c) Auto load operating mode
- d) Extended write mode

**OR**

Draw and explain block diagram of 80286.

 2) Don't forget to Mention question paper set (P/Q/R/S) on top of page.  
 3) Figures to the right indicates full marks  
 4) Assume suitable data wherever needed and mention it clearly.

**MCQ/Objective Type Questions**

Duration: 30 Minutes

Marks: 14

**Q.1 Choose the correct alternatives from the options.**

**14**

- 1) \_\_\_\_\_ is the features of Computer Graphics.
  - a) Creation and deletion of images by computer only
  - b) Deletion and manipulation of graphical images by computer
  - c) Creation and manipulation of graphics by computer
  - d) Creation of artificial images by computer only
- 2) The maximum number of points that can be displayed without overlap on a CRT is referred to as \_\_\_\_\_.
  - a) Resolution
  - b) Persistence
  - c) Attenuation
  - d) None of the above
- 3) The process of determining the suitable or appropriate pixels for representing image or graphic object is called \_\_\_\_\_.
  - a) Animation
  - b) Rasterization
  - c) Scan-Conversion
  - d) Quantization
- 4) Run length coding is used for \_\_\_\_\_.
  - a) Image smoothening
  - b) Image compression
  - c) Image coloring
  - d) Image dithering
- 5) The basic geometric transformations are \_\_\_\_\_.
  - a) Translation
  - b) Rotation
  - c) Scaling
  - d) All of the mentioned
- 6) Which of the following operation can be applied on a 3 D object to zoom it in or out about any axis from its original position?
  - a) Translation
  - b) Scaling
  - c) Rotation
  - d) Shearing
- 7) Clipping algorithm which follows "Divide and conquer" strategy is \_\_\_\_\_.
  - a) Sutherland - Cohen algorithm
  - b) Cyrus - Beck algorithm
  - c) Midpoint subdivision
  - d) None of the above
- 8) The centre region of the screen and the window can be represented as \_\_\_\_\_.
  - a) 0000
  - b) 1111
  - c) 0110
  - d) 1001

- 9) In the Cohen-Sutherland line clipping algorithm, if the codes of the two points P and Q are 0101 and 0001 then the line segment joining the points P and Q will be \_\_\_\_\_ the clipping window.
- |                    |                      |
|--------------------|----------------------|
| a) Totally outside | b) Partially outside |
| c) Totally inside  | d) None              |
- 10) Aliasing effect means \_\_\_\_\_.  
a) Staircase effect                      b) Shading effect  
c) Rendering effect                      d) Cueing effect
- 11) In Warnock algorithm, the polygon is called as surrounding, if it completely \_\_\_\_\_ the window.  
a) Outside                                  b) Contains  
c) Intersects                              d) None of above
- 12) The technique of using a minimum number of intensity levels to obtain increased visual resolution is called as \_\_\_\_\_.  
a) Dithering                                b) Halftoning  
c) Depth cueing                            d) Rendering
- 13) \_\_\_\_\_ control points are the points which decides the local shape of a curve.  
a) Local                                      b) Global  
c) Interpolation                            d) None
- 14) A curve that passes through all the known data points is known as curve is \_\_\_\_\_.  
a) fair to data                              b) fit to data  
c) both fair and fit to data              d) None of the above

**S.Y. (B.Tech.) (Sem - I) (New) (CBCS) Examination: Oct/Nov-2022**  
**COMPUTER SCIENCE & ENGINEERING**  
**Computer Graphics**

Day & Date: Monday, 20-03-2023  
 Time: 02:00 PM To 05:00 PM

Max. Marks: 56

**Instructions:** 1) All questions are compulsory.  
 2) Figures to the right indicate full marks.

**Section – I**

- Q.2 Answer the following question. (Any Four) 16**
- Distinguish between the Raster Scan display and Random Scan display.
  - Explain 2D Rotation.
  - Explain any four Computer graphics applications.
  - Scale the polygon with coordinates P(2,5), Q(7,10), C(10,2) by 2 units in both x and y direction.
  - Explain Run Length Encoding.
- Q.3 Answer the following question. (Any One) 06**
- Consider a line from (0,0) to (5,6). Use DDA algorithm to rasterize this line.
  - Write a Bresenham's Circle generation algorithm.
- Q.4 Attempt the following. 06**
- Beam Penetration Technique
  - Shadow Mask Technique

**Section – II**

- Q.5 Answer the following question. (Any Four) 16**
- Write a short note on segmented display file.
  - Explain Viewing transformation in detail.
  - Explain properties of Bezier curve.
  - Explain Z-Buffer algorithm.
  - Explain Painter's algorithm.
- Q.6 Answer the following question. (Any One) 06**
- Explain Warnock algorithm.
  - What is antialiasing? Explain different techniques of antialiasing.
- Q.7 Explain Cohen-Sutherland Line Clipping algorithm. 06**

- 8) \_\_\_\_\_ is the features of Computer Graphics.
- a) Creation and deletion of images by computer only
  - b) Deletion and manipulation of graphical images by computer
  - c) Creation and manipulation of graphics by computer
  - d) Creation of artificial images by computer only
- 9) The maximum number of points that can be displayed without overlap on a CRT is referred to as \_\_\_\_\_.
- a) Resolution
  - b) Persistence
  - c) Attenuation
  - d) None of the above
- 10) The process of determining the suitable or appropriate pixels for representing image or graphic object is called \_\_\_\_\_.
- a) Animation
  - b) Rasterization
  - c) Scan-Conversion
  - d) Quantization
- 11) Run length coding is used for \_\_\_\_\_.
- a) Image smoothening
  - b) Image compression
  - c) Image coloring
  - d) Image dithering
- 12) The basic geometric transformations are \_\_\_\_\_.
- a) Translation
  - b) Rotation
  - c) Scaling
  - d) All of the mentioned
- 13) Which of the following operation can be applied on a 3 D object to zoom it in or out about any axis from its original position?
- a) Translation
  - b) Scaling
  - c) Rotation
  - d) Shearing
- 14) Clipping algorithm which follows "Divide and conquer" strategy is \_\_\_\_\_.
- a) Sutherland - Cohen algorithm
  - b) Cyrus - Beck algorithm
  - c) Midpoint subdivision
  - d) None of the above

Day & Date: Monday, 20-03-2023  
 Time: 02:00 PM To 05:00 PM

Max. Marks: 70

- Instructions:** 1) Q. No. 1 is compulsory. It should be solved in the first 30 minutes in answer book. Page no 03 (Starting page of the Answer Book). Each question carries one mark.  
 2) Don't forget to Mention question paper set (P/Q/R/S) on top of page.  
 3) Figures to the right indicates full marks  
 4) Assume suitable data wherever needed and mention it clearly.

**MCQ/Objective Type Questions**

Duration: 30 Minutes

Marks: 14

**Q.1 Choose the correct alternatives from the options.**

**14**

- 1) In Warnock algorithm, the polygon is called as surrounding, if it completely \_\_\_\_\_ the window.
 

|               |                  |
|---------------|------------------|
| a) Outside    | b) Contains      |
| c) Intersects | d) None of above |
- 2) The technique of using a minimum number of intensity levels to obtain increased visual resolution is called as \_\_\_\_\_.
 

|                 |               |
|-----------------|---------------|
| a) Dithering    | b) Halftoning |
| c) Depth cueing | d) Rendering  |
- 3) \_\_\_\_\_ control points are the points which decides the local shape of a curve.
 

|                  |           |
|------------------|-----------|
| a) Local         | b) Global |
| c) Interpolation | d) None   |
- 4) A curve that passes through all the known data points is known as curve is \_\_\_\_\_.
 

|                              |                      |
|------------------------------|----------------------|
| a) fair to data              | b) fit to data       |
| c) both fair and fit to data | d) None of the above |
- 5) \_\_\_\_\_ is the features of Computer Graphics.
 

|                                                              |
|--------------------------------------------------------------|
| a) Creation and deletion of images by computer only          |
| b) Deletion and manipulation of graphical images by computer |
| c) Creation and manipulation of graphics by computer         |
| d) Creation of artificial images by computer only            |
- 6) The maximum number of points that can be displayed without overlap on a CRT is referred to as \_\_\_\_\_.
 

|                |                      |
|----------------|----------------------|
| a) Resolution  | b) Persistence       |
| c) Attenuation | d) None of the above |
- 7) The process of determining the suitable or appropriate pixels for representing image or graphic object is called \_\_\_\_\_.
 

|                    |                  |
|--------------------|------------------|
| a) Animation       | b) Rasterization |
| c) Scan-Conversion | d) Quantization  |

- 8) Run length coding is used for \_\_\_\_\_.  
a) Image smoothening                      b) Image compression  
c) Image coloring                          d) Image dithering
- 9) The basic geometric transformations are \_\_\_\_\_.  
a) Translation                              b) Rotation  
c) Scaling                                  d) All of the mentioned
- 10) Which of the following operation can be applied on a 3 D object to zoom it in or out about any axis from its original position?  
a) Translation                              b) Scaling  
c) Rotation                                  d) Shearing
- 11) Clipping algorithm which follows "Divide and conquer" strategy is \_\_\_\_\_.  
a) Sutherland - Cohen algorithm      b) Cyrus - Beck algorithm  
c) Midpoint subdivision                  d) None of the above
- 12) The centre region of the screen and the window can be represented as \_\_\_\_\_.  
a) 0000                                      b) 1111  
c) 0110                                      d) 1001
- 13) In the Cohen-Sutherland line clipping algorithm, if the codes of the two points P and Q are 0101 and 0001 then the line segment joining the points P and Q will be \_\_\_\_\_ the clipping window.  
a) Totally outside                          b) Partially outside  
c) Totally inside                            d) None
- 14) Aliasing effect means \_\_\_\_\_.  
a) Staircase effect                          b) Shading effect  
c) Rendering effect                        d) Cueing effect

- 7) Which of the following is not a Dirichlet's condition?  
 a)  $f(x)$  is periodic  
 b)  $f(x)$  is single valued  
 c)  $f(x)$  is even function  
 d)  $f(x)$  is infinite
- 8) If  $(x) = x^2$  is expanded as a cosine series in  $(0, \pi)$  then the constant term is \_\_\_\_\_.  
 a)  $\frac{\pi^2}{3}$   
 b)  $\frac{\pi^3}{3}$   
 c)  $\frac{2\pi^2}{3}$   
 d)  $\frac{3\pi^2}{2}$
- 9) Correlation analysis help us to \_\_\_\_\_ our activities.  
 a) Control  
 b) Plan  
 c) Predict  
 d) All of above
- 10) A discrete probability distribution function of a discrete random variable is given by,
- |         |     |      |      |      |      |                   |
|---------|-----|------|------|------|------|-------------------|
| $x:$    | 0   | 1    | 2    | 3    | 4    |                   |
| $P(x):$ | $k$ | $3k$ | $5k$ | $4k$ | $2k$ | then $k =$ _____. |
- a)  $1/3$   
 b)  $1/15$   
 c)  $1/5$   
 d)  $1$
- 11) Between 2 and 4 pm average number of phone calls coming to a switch board of a company is 2.5. Then the probability that during a minute there will be exactly 3 calls is \_\_\_\_\_.  
 a) 0.2138  
 b) 0.3120  
 c) 0.2183  
 d) 0.3821S
- 12) If  $b_{yx} = 5/18, b_{xy} = 8/5$ , then  $r =$  \_\_\_\_\_.  
 a)  $2/5$   
 b)  $2/3$   
 c)  $1/2$   
 d)  $3/2$
- 13) Idle time of queuing system is \_\_\_\_\_.  
 a)  $1 - \frac{\lambda}{\mu}$   
 b)  $\frac{\lambda}{\mu}$   
 c)  $\frac{\mu}{\lambda}$   
 d)  $1 - \frac{\mu}{\lambda}$
- 14) In a  $M/M/1/\infty$  system the probability that there will be no customer in the system is \_\_\_\_\_.  
 a)  $\rho$   
 b)  $\rho^2$   
 c)  $1 - \rho$   
 d)  $1 - \rho^2$

**S.Y. (B.Tech.) (Sem - I) (New) (CBCS) Examination: Oct/Nov-2022**  
**COMPUTER SCIENCE & ENGINEERING**  
**Applied Mathematics – I**

Day & Date: Thursday, 09-03-2023  
 Time: 02:00 PM To 05:00 PM

Max. Marks: 56

- Instructions:** 1) All questions are compulsory.  
 2) Figures to the right indicate full marks.  
 3) Use of non-programmable calculator is allowed.

**Section – I**

**Q.2 Attempt any three of the following.** **09**

- Solve  $(D^4 + 8D^2 + 16)y = \sin^2 x$ .
- Solve  $(D^2 - 2D + 1)y = x^2 e^{3x}$ .
- Find  $L \{t \sqrt{1 - \sin t}\}$ .
- Find the inverse Laplace transform of  $\frac{s+29}{(s+4)(s^2+9)}$
- Find  $Z\{k^2 a^{k-1}\}, k \geq 0$ .

**Q.3 Attempt any three of the following.** **09**

- Solve  $(D^3 - D^2 - 6D)y = x^2 + 1$ .
- Find Inverse Z-transform of  $\frac{1}{(z-5)^3}, |Z| > 5$
- Evaluate  $\int_0^\infty e^{-t} \left( \frac{1 - \cos t}{t} \right) dt$
- Find  $Z \left\{ \left( \frac{1}{3} \right)^{|k|} \right\}$
- Find  $L^{-1} \left\{ \log \left( 1 + \frac{a^2}{s^2} \right) \right\}$

**Q.4 Attempt any two of the following.** **10**

- Solve  $(D^2 + a^2)y = \sec ax$ .
- Using Laplace transform method solve  $y''(t) - y'(t) - 2y(t) = 20\sin 2t$ , ,  
with  $y(0) = 1$  and  $y'(0) = 2$ .
- Calculate inverse Z- Transform of  $F(z) = \frac{z^2}{\left(z - \frac{1}{4}\right)\left(z - \frac{1}{5}\right)}$ , if ROC is,
  - $\frac{1}{5} < |Z| < \frac{1}{4}$ ,
  - $|Z| < \frac{1}{5}$

**Section – II**

**Q.5 Attempt any three of the following.** **09**

- Obtain Fourier series expansion of  $f(x) = \frac{x(\pi^2 - x^2)}{12}$  in  $(-\pi, \pi)$
- Obtain half range cosine series of  $f(x) = e^{-x}$  in  $0 < x < \pi$

- c) Assuming that half of the population in a city is vegetarian so that the chance of an individual being vegetarian is  $1/2$  and assuming that 100 investigators take a sample of 10 individuals to see whether they are vegetarian, how many investigators would you expect to report that three people or less were vegetarian.
- d) Calculate i)  $k$  ii)  $p(x > 5)$  iii)  $p(0 \leq x \leq 5)$ , if a random variable  $x$  has the following probability distribution

|        |     |      |      |       |           |        |        |
|--------|-----|------|------|-------|-----------|--------|--------|
| $x$    | 1   | 2    | 3    | 4     | 5         | 6      | 7      |
| $p(x)$ | $k$ | $2k$ | $3k$ | $k^2$ | $k^2 + k$ | $2k^2$ | $4k^2$ |

- e) With the usual notation find the average waiting time per customer in the queue and in the system for  $M/M/1/\infty$  model, if  $\lambda = 9$  and  $\mu = 15$  per hour.

**Q.6 Attempt any three of the following.****09**

- a) In a sample of 1000 students, the mean and standard deviation of marks obtained by the students in a certain test are 14 and 2.5. Assuming the distribution to be normal find the number of students getting marks (i) between 12 and 15 (ii) above 18 (iii) below 8.  
(Given: For S.N.V.  $z$  area between  $z = 0$  and  $z = 0.4$  is 0.1554, that between  $z = 0$  and  $z = 0.8$  is 0.2881, that between  $z = 0$  and  $z = 1.6$  is 0.4452, that between  $z = 0$  and  $z = 2.4$  is 0.4918.)
- b) A supermarket has two girls serving at the two counters. The customers arrive in Poisson fashion at the rate of 12 per hour. The service time for each customer is exponential with mean 6 minutes. Find  
1) the probability that an arriving customer has to wait.  
2) the average number of customers in the system.
- c) Obtain the Fourier expansion of,  $f(x) = 2x - x^2$  in  $(0,3)$ .
- d) Calculate the correlation co-efficient between  $x$  and  $y$ , if Nine students obtained the following percentage of marks in the college examination ( $x$ ) and in the University examination ( $y$ ).

|     |    |    |    |    |    |    |    |    |    |
|-----|----|----|----|----|----|----|----|----|----|
| $x$ | 51 | 53 | 73 | 46 | 50 | 60 | 47 | 36 | 60 |
| $y$ | 49 | 72 | 74 | 44 | 58 | 66 | 50 | 30 | 55 |

- e) The following mistakes per page were observed in a book.

|                 |     |    |    |   |   |       |
|-----------------|-----|----|----|---|---|-------|
| No. of mistakes | 0   | 1  | 2  | 3 | 4 | Total |
| No. of pages    | 211 | 90 | 19 | 5 | 0 | 325   |

Fit a Poisson distribution.

**Q.7 Attempt any two****10**

- a) At what rate a retail shop owner having no assistant, must work in order to ensure that 90% of the customers will not have to wait more than 12 minutes? It is assumed that the customers arrive in Poisson process at an average rate of 18 per hour and the length of the service by the owner has an exponential distribution?
- b) Obtain the Fourier series of,  $f(x) = \left(\frac{\pi-x}{2}\right)^2$  in  $(0,2\pi)$  and hence deduce that  $\frac{\pi^2}{6} = \frac{1}{1^2} + \frac{1}{2^2} + \frac{1}{3^2} + \frac{1}{4^2} + \dots$
- c) Calculate the equations of two lines of regression and calculate expected height of son when the height of father is 154 cms. Heights of fathers and sons are given below

|                       |     |     |     |     |     |     |     |     |
|-----------------------|-----|-----|-----|-----|-----|-----|-----|-----|
| Ht. of Father ( $x$ ) | 150 | 152 | 155 | 157 | 160 | 161 | 164 | 166 |
| Ht. of Son ( $y$ )    | 154 | 156 | 158 | 159 | 160 | 162 | 161 | 164 |

- Page 5 of 16

- 7) In a  $M/M/1/\infty$  system the probability that there will be no customer in the system is \_\_\_\_\_.  
 a)  $\rho$  b)  $\rho^2$   
 c)  $1 - \rho$  d)  $1 - \rho^2$
- 8) The complementary function of the equation  $[(D + 1)^2(D + 4)]y = 2t$  is \_\_\_\_\_.  
 a)  $c_1 e^{-t} + c_2 e^{-4t} + c_3 e^t$  b)  $c_1 \cos t + c_2 \sin t + c_3 e^{-4t}$   
 c)  $(c_1 + c_2 t)e^t + c_3 e^{-4t}$  d)  $(c_1 + c_2 t)e^{-t} + c_3 e^{-4t}$
- 9) The general solution of  $(D^4 + 2D^2 + 1)y = 0$  is \_\_\_\_\_.  
 a)  $c_1 \cos x + c_2 \sin x + c_3 \cos x + c_4 \sin x$   
 b)  $(c_1 + c_2 x)e^x$   
 c)  $(c_1 + c_2 x) \cos x + (c_3 + c_4 x) \sin x$   
 d)  $(c_1 + c_2 x + c_3 x^2 + c_4 x^3)e^{-x}$
- 10) The value of the integral  $\int_0^\infty e^{-2t} \cos 3t dt$  is \_\_\_\_\_.  
 a)  $1/13$  b)  $2/13$   
 c)  $13^2$  d)  $13$
- 11)  $L^{-1} \left\{ \frac{1}{s^2 - 3^2} \right\} =$  \_\_\_\_\_.  
 a)  $\frac{1}{3} \sin 3t$  b)  $\frac{1}{3} \cos 3t$   
 c)  $\frac{1}{3} \cos h3t$  d)  $\frac{1}{3} \sin h3t$
- 12) If  $Z\{f(k)\} = F(z)$ , then  $Z\{a^k f(k)\} =$  \_\_\_\_\_.  
 a)  $F\left(\frac{z}{a}\right)$  b)  $F\left(\frac{a}{z}\right)$   
 c)  $\frac{1}{a} F\left(\frac{z}{a}\right)$  d)  $\frac{1}{a} F\left(\frac{a}{z}\right)$
- 13)  $Z^{-1} \left\{ \frac{z}{z+a} \right\}, |z| > a$  (with  $k \geq 0$ ) is \_\_\_\_\_.  
 a)  $a^k$  b)  $(-a)^k$   
 c)  $a^{k+1}$  d)  $a^{-k-1}$
- 14) Which of the following is not a Dirichlet's condition?  
 a)  $f(x)$  is periodic b)  $f(x)$  is single valued  
 c)  $f(x)$  is even function d)  $f(x)$  is infinite

**S.Y. (B.Tech.) (Sem - I) (New) (CBCS) Examination: Oct/Nov-2022**  
**COMPUTER SCIENCE & ENGINEERING**  
**Applied Mathematics – I**

Day & Date: Thursday, 09-03-2023  
 Time: 02:00 PM To 05:00 PM

Max. Marks: 56

- Instructions:** 1) All questions are compulsory.  
 2) Figures to the right indicate full marks.  
 3) Use of non-programmable calculator is allowed.

**Section – I**

**Q.2 Attempt any three of the following. 09**

- Solve  $(D^4 + 8D^2 + 16)y = \sin^2 x$ .
- Solve  $(D^2 - 2D + 1)y = x^2 e^{3x}$ .
- Find  $L \{t \cdot \sqrt{1 - \sin t}\}$ .
- Find the inverse Laplace transform of  $\frac{s+29}{(s+4)(s^2+9)}$
- Find  $Z\{k^2 a^{k-1}\}, k \geq 0$ .

**Q.3 Attempt any three of the following. 09**

- Solve  $(D^3 - D^2 - 6D)y = x^2 + 1$ .
- Find Inverse Z-transform of  $\frac{1}{(z-5)^3}, |Z| > 5$
- Evaluate  $\int_0^\infty e^{-t} \left(\frac{1-\cos t}{t}\right) dt$
- Find  $Z \left\{ \left(\frac{1}{3}\right)^{|k|} \right\}$
- Find  $L^{-1} \left\{ \log \left( 1 + \frac{a^2}{s^2} \right) \right\}$

**Q.4 Attempt any two of the following. 10**

- Solve  $(D^2 + a^2)y = \sec ax$ .
- Using Laplace transform method solve  $y''(t) - y'(t) - 2y(t) = 20\sin 2t$ , , with  $y(0) = 1$  and  $y'(0) = 2$ .
- Calculate inverse Z- Transform of  $F(z) = \frac{z^2}{\left(z-\frac{1}{4}\right)\left(z-\frac{1}{5}\right)}$ , if ROC is,
  - $\frac{1}{5} < |Z| < \frac{1}{4}$ ,
  - $|Z| < \frac{1}{5}$

**Section – II**

**Q.5 Attempt any three of the following. 09**

- Obtain Fourier series expansion of  $f(x) = \frac{x(\pi^2 - x^2)}{12}$  in  $(-\pi, \pi)$
- Obtain half range cosine series of  $f(x) = e^{-x}$  in  $0 < x < \pi$

- c) Assuming that half of the population in a city is vegetarian so that the chance of an individual being vegetarian is  $1/2$  and assuming that 100 investigators take a sample of 10 individuals to see whether they are vegetarian, how many investigators would you expect to report that three people or less were vegetarian.
- d) Calculate i)  $k$  ii)  $p(x > 5)$  iii)  $p(0 \leq x \leq 5)$ , if a random variable  $x$  has the following probability distribution

|        |     |      |      |       |           |        |        |
|--------|-----|------|------|-------|-----------|--------|--------|
| $x$    | 1   | 2    | 3    | 4     | 5         | 6      | 7      |
| $p(x)$ | $k$ | $2k$ | $3k$ | $k^2$ | $k^2 + k$ | $2k^2$ | $4k^2$ |

- e) With the usual notation find the average waiting time per customer in the queue and in the system for  $M/M/1/\infty$  model, if  $\lambda = 9$  and  $\mu = 15$  per hour.

**Q.6 Attempt any three of the following.****09**

- a) In a sample of 1000 students, the mean and standard deviation of marks obtained by the students in a certain test are 14 and 2.5. Assuming the distribution to be normal find the number of students getting marks (i) between 12 and 15 (ii) above 18 (iii) below 8.  
(Given: For S.N.V.  $z$  area between  $z = 0$  and  $z = 0.4$  is 0.1554, that between  $z = 0$  and  $z = 0.8$  is 0.2881, that between  $z = 0$  and  $z = 1.6$  is 0.4452, that between  $z = 0$  and  $z = 2.4$  is 0.4918.)
- b) A supermarket has two girls serving at the two counters. The customers arrive in Poisson fashion at the rate of 12 per hour. The service time for each customer is exponential with mean 6 minutes. Find  
1) the probability that an arriving customer has to wait.  
2) the average number of customers in the system.
- c) Obtain the Fourier expansion of,  $f(x) = 2x - x^2$  in  $(0,3)$ .
- d) Calculate the correlation co-efficient between  $x$  and  $y$ , if Nine students obtained the following percentage of marks in the college examination ( $x$ ) and in the University examination ( $y$ ).

|     |    |    |    |    |    |    |    |    |    |
|-----|----|----|----|----|----|----|----|----|----|
| $x$ | 51 | 53 | 73 | 46 | 50 | 60 | 47 | 36 | 60 |
| $y$ | 49 | 72 | 74 | 44 | 58 | 66 | 50 | 30 | 55 |

- e) The following mistakes per page were observed in a book.

|                 |     |    |    |   |   |       |
|-----------------|-----|----|----|---|---|-------|
| No. of mistakes | 0   | 1  | 2  | 3 | 4 | Total |
| No. of pages    | 211 | 90 | 19 | 5 | 0 | 325   |

Fit a Poisson distribution.

**Q.7 Attempt any two****10**

- a) At what rate a retail shop owner having no assistant, must work in order to ensure that 90% of the customers will not have to wait more than 12 minutes? It is assumed that the customers arrive in Poisson process at an average rate of 18 per hour and the length of the service by the owner has an exponential distribution?
- b) Obtain the Fourier series of,  $f(x) = \left(\frac{\pi-x}{2}\right)^2$  in  $(0,2\pi)$  and hence deduce that  $\frac{\pi^2}{6} = \frac{1}{1^2} + \frac{1}{2^2} + \frac{1}{3^2} + \frac{1}{4^2} + \dots$
- c) Calculate the equations of two lines of regression and calculate expected height of son when the height of father is 154 cms. Heights of fathers and sons are given below

|                       |     |     |     |     |     |     |     |     |
|-----------------------|-----|-----|-----|-----|-----|-----|-----|-----|
| Ht. of Father ( $x$ ) | 150 | 152 | 155 | 157 | 160 | 161 | 164 | 166 |
| Ht. of Son ( $y$ )    | 154 | 156 | 158 | 159 | 160 | 162 | 161 | 164 |

- Page 9 of 16

- 7) The value of the integral  $\int_0^{\infty} e^{-2t} \cos 3t dt$  is \_\_\_\_\_.  
 a)  $1/13$  b)  $2/13$   
 c)  $13^2$  d)  $13$
- 8)  $L^{-1} \left\{ \frac{1}{s^2 - 3^2} \right\} =$  \_\_\_\_\_.  
 a)  $\frac{1}{3} \sin 3t$  b)  $\frac{1}{3} \cos 3t$   
 c)  $\frac{1}{3} \cos h3t$  d)  $\frac{1}{3} \sin h3t$
- 9) If  $Z\{f(k)\} = F(z)$ , then  $Z\{a^k f(k)\} =$  \_\_\_\_\_.  
 a)  $F\left(\frac{z}{a}\right)$  b)  $F\left(\frac{a}{z}\right)$   
 c)  $\frac{1}{a} F\left(\frac{z}{a}\right)$  d)  $\frac{1}{a} F\left(\frac{a}{z}\right)$
- 10)  $Z^{-1} \left\{ \frac{z}{z+a} \right\}, |z| > a$  (with  $k \geq 0$ ) is \_\_\_\_\_.  
 a)  $a^k$  b)  $(-a)^k$   
 c)  $a^{k+1}$  d)  $a^{-k-1}$
- 11) Which of the following is not a Dirichlet's condition?  
 a)  $f(x)$  is periodic b)  $f(x)$  is single valued  
 c)  $f(x)$  is even function d)  $f(x)$  is infinite
- 12) If  $(x) = x^2$  is expanded as a cosine series in  $(0, \pi)$  then the constant term is \_\_\_\_\_.  
 a)  $\frac{\pi^2}{3}$  b)  $\frac{\pi^3}{3}$   
 c)  $\frac{2\pi^2}{3}$  d)  $\frac{3\pi^2}{2}$
- 13) Correlation analysis help us to \_\_\_\_\_ our activities.  
 a) Control b) Plan  
 c) Predict d) All of above
- 14) A discrete probability distribution function of a discrete random variable is given by,
- |         |     |      |      |      |      |                   |
|---------|-----|------|------|------|------|-------------------|
| $x:$    | 0   | 1    | 2    | 3    | 4    |                   |
| $P(x):$ | $k$ | $3k$ | $5k$ | $4k$ | $2k$ | then $k =$ _____. |
- a)  $1/3$  b)  $1/15$   
 c)  $1/5$  d)  $1$

- 8) Idle time of queuing system is \_\_\_\_\_.  
 a)  $1 - \frac{\lambda}{\mu}$  b)  $\frac{\lambda}{\mu}$   
 c)  $\frac{\mu}{\lambda}$  d)  $1 - \frac{\mu}{\lambda}$
- 9) In a  $M/M/1/\infty$  system the probability that there will be no customer in the system is \_\_\_\_\_.  
 a)  $\rho$  b)  $\rho^2$   
 c)  $1 - \rho$  d)  $1 - \rho^2$
- 10) The complementary function of the equation  $[(D + 1)^2(D + 4)]y = 2t$  is \_\_\_\_\_.  
 a)  $c_1 e^{-t} + c_2 e^{-4t} + c_3 e^t$  b)  $c_1 \cos t + c_2 \sin t + c_3 e^{-4t}$   
 c)  $(c_1 + c_2 t)e^t + c_3 e^{-4t}$  d)  $(c_1 + c_2 t)e^{-t} + c_3 e^{-4t}$
- 11) The general solution of  $(D^4 + 2D^2 + 1)y = 0$  is \_\_\_\_\_.  
 a)  $c_1 \cos x + c_2 \sin x + c_3 \cos x + c_4 \sin x$   
 b)  $(c_1 + c_2 x)e^x$   
 c)  $(c_1 + c_2 x) \cos x + (c_3 + c_4 x) \sin x$   
 d)  $(c_1 + c_2 x + c_3 x^2 + c_4 x^3)e^{-x}$
- 12) The value of the integral  $\int_0^\infty e^{-2t} \cos 3t dt$  is \_\_\_\_\_.  
 a)  $1/13$  b)  $2/13$   
 c)  $13^2$  d)  $13$
- 13)  $L^{-1} \left\{ \frac{1}{s^2 - 3^2} \right\} =$  \_\_\_\_\_.  
 a)  $\frac{1}{3} \sin 3t$  b)  $\frac{1}{3} \cos 3t$   
 c)  $\frac{1}{3} \cos h3t$  d)  $\frac{1}{3} \sin h3t$
- 14) If  $Z\{f(k)\} = F(z)$ , then  $Z\{a^k f(k)\} =$  \_\_\_\_\_.  
 a)  $F\left(\frac{z}{a}\right)$  b)  $F\left(\frac{a}{z}\right)$   
 c)  $\frac{1}{a} F\left(\frac{z}{a}\right)$  d)  $\frac{1}{a} F\left(\frac{a}{z}\right)$

- Obtain Fourier series expansion of  $f(x) = \frac{x(\pi^2 - x^2)}{12}$  in  $(-\pi, \pi)$
- Obtain half range cosine series of  $f(x) = e^{-x}$  in  $0 < x < \pi$

- c) Assuming that half of the population in a city is vegetarian so that the chance of an individual being vegetarian is  $1/2$  and assuming that 100 investigators take a sample of 10 individuals to see whether they are vegetarian, how many investigators would you expect to report that three people or less were vegetarian.
- d) Calculate i)  $k$  ii)  $p(x > 5)$  iii)  $p(0 \leq x \leq 5)$ , if a random variable  $x$  has the following probability distribution
- |        |     |      |      |       |           |        |        |
|--------|-----|------|------|-------|-----------|--------|--------|
| $x$    | 1   | 2    | 3    | 4     | 5         | 6      | 7      |
| $p(x)$ | $k$ | $2k$ | $3k$ | $k^2$ | $k^2 + k$ | $2k^2$ | $4k^2$ |
- e) With the usual notation find the average waiting time per customer in the queue and in the system for  $M/M/1/\infty$  model, if  $\lambda = 9$  and  $\mu = 15$  per hour.

**Q.6 Attempt any three of the following.****09**

- a) In a sample of 1000 students, the mean and standard deviation of marks obtained by the students in a certain test are 14 and 2.5. Assuming the distribution to be normal find the number of students getting marks (i) between 12 and 15 (ii) above 18 (iii) below 8.  
(Given: For S.N.V.  $z$  area between  $z = 0$  and  $z = 0.4$  is 0.1554, that between  $z = 0$  and  $z = 0.8$  is 0.2881, that between  $z = 0$  and  $z = 1.6$  is 0.4452, that between  $z = 0$  and  $z = 2.4$  is 0.4918.)
- b) A supermarket has two girls serving at the two counters. The customers arrive in Poisson fashion at the rate of 12 per hour. The service time for each customer is exponential with mean 6 minutes. Find  
1) the probability that an arriving customer has to wait.  
2) the average number of customers in the system.
- c) Obtain the Fourier expansion of,  $f(x) = 2x - x^2$  in  $(0,3)$ .
- d) Calculate the correlation co-efficient between  $x$  and  $y$ , if Nine students obtained the following percentage of marks in the college examination ( $x$ ) and in the University examination ( $y$ ).

|     |    |    |    |    |    |    |    |    |    |
|-----|----|----|----|----|----|----|----|----|----|
| $x$ | 51 | 53 | 73 | 46 | 50 | 60 | 47 | 36 | 60 |
| $y$ | 49 | 72 | 74 | 44 | 58 | 66 | 50 | 30 | 55 |

- e) The following mistakes per page were observed in a book.

|                 |     |    |    |   |   |       |
|-----------------|-----|----|----|---|---|-------|
| No. of mistakes | 0   | 1  | 2  | 3 | 4 | Total |
| No. of pages    | 211 | 90 | 19 | 5 | 0 | 325   |

Fit a Poisson distribution.

**Q.7 Attempt any two****10**

- a) At what rate a retail shop owner having no assistant, must work in order to ensure that 90% of the customers will not have to wait more than 12 minutes? It is assumed that the customers arrive in Poisson process at an average rate of 18 per hour and the length of the service by the owner has an exponential distribution?
- b) Obtain the Fourier series of,  $f(x) = \left(\frac{\pi-x}{2}\right)^2$  in  $(0,2\pi)$  and hence deduce that  $\frac{\pi^2}{6} = \frac{1}{1^2} + \frac{1}{2^2} + \frac{1}{3^2} + \frac{1}{4^2} + \dots$
- c) Calculate the equations of two lines of regression and calculate expected height of son when the height of father is 154 cms. Heights of fathers and sons are given below

|                       |     |     |     |     |     |     |     |     |
|-----------------------|-----|-----|-----|-----|-----|-----|-----|-----|
| Ht. of Father ( $x$ ) | 150 | 152 | 155 | 157 | 160 | 161 | 164 | 166 |
| Ht. of Son ( $y$ )    | 154 | 156 | 158 | 159 | 160 | 162 | 161 | 164 |

**Seat

Max. Marks: 70

Marks: 14

14

- Page 1 of 16

- 9) The push down automata indicate the acceptance of input string in terms of \_\_\_\_\_.  
a) Final state  
b) Empty stack  
c) Both (a) and (b)  
d) None of these
- 10) Which type of symbols contain in the stack of PDA?  
a) Variable  
b) Terminal  
c) Both (a) and (b)  
d) None of these
- 11) Inability of FA is \_\_\_\_\_.  
a) Writing  
b) Finite memory  
c) Sequential memory  
d) all a, b, and c
- 12) The symbol  $Z_0$  in formal definition of PDA is used for \_\_\_\_\_.  
a) Stack symbol  
b) Input symbol  
c) Both (a) and (b)  
d) None of these
- 13) A grammar  $G = (V, T, P, S)$  is \_\_\_\_\_ if every production taken one of the two forms:  
 $B \rightarrow aC$   
 $B \rightarrow a$   
a) Ambiguous  
b) Regular  
c) Non Regular  
d) None of the mentioned
- 14) Which of the following strings is not generated by the following grammar?  
 $S \rightarrow SaSbS|e$   
a) aabb  
b) abab  
c) aababb  
d) aaabb

 2) Figures to the right indicates full marks.

**Section – I**

**Q.2 Solve any three**

**12**

a) Identify the set of strings accepted by given following DFA.

b) Construct regular expression corresponding to each of the following subset of  $\{0, 1\}^*$

- The language of all strings containing exactly two 0's
- The language C identifiers.

c) Associate given M1 and M2 be the FAs are pictured for L1, L2 resp. to represent a machine accepting following language  $L1 \cup L2$ ,  $L1 - L2$

d) Write a context free grammar equivalent for  $(011+1)^*(01)^*$

**Q.3 Solve any One**

**08**

a) Convert the following grammar into Chomsky normal form

$S \rightarrow AACD$

$A \rightarrow aAb|^{\wedge}$

$C \rightarrow aC|a$

$D \rightarrow aDa|bDb|^{\wedge}$

b) Check whether following string is accepted by given NFA-<sup>^</sup>

- 1) aa
- 2) bab
- 3) ab
- 4) abab

Q.4 Draw NFA-<sup>^</sup> for the following Regular expression

$$a^*b^*+(ba)^*$$

08

### Section – II

Q.5 Solve any three

12

- a) State and explain pumping lemma for CFL.
- b) What is PDA? Explain with an example.
- c) Obtain a TM to accept the language  
 $L = \{w | w \leftarrow (0 + 1)^* \text{ containing substring } 001\}$
- d) Show that  $L = \{a^n b^n | n \geq 1\}$  is not regular.

Q.6 Solve any One

08

- a) Obtain a PDA to accept the language  
 $L(M) = \{w | w \leftarrow (a + b)^* \text{ and } n_a(w) = n_b(w)\}$  by final state
- b) Explain Different types of variation in TM.

Q.7 State and explain the block diagram of TM and construct a TM to accept the language.

**S.Y. (B.Tech.) (Sem - II) (New) (CBCS) Examination: Oct/Nov-2022**  
**COMPUTER SCIENCE & ENGINEERING**  
**Computer Organization and Architecture**

Day & Date: Wednesday, 08-03-2023  
 Time: 02:00 PM To 05:00 PM

Max. Marks: 56

**Instructions:** 1) All questions are compulsory.  
 2) Figures to the right indicates full marks.

**Section – I**

- Q.2 Answer any three:** **12**
- Explain with Suitable diagram the Von Neumann Architecture.
  - List the pseudo operations for the ARC assembly language.
  - Write a note on Cache memory.
  - Write a note on Generations of Computers.
- Q.3 Answer the following:** **16**
- Explain the System Bus model.
  - With an example explain Assembly language programs.
  - Explain ISA in detail.
  - Write a short note on.
    - Shared variable Model
    - Functional and Logic Model

**Section – II**

- Q.4 Answer any three:** **12**
- Compare Programmed I/O and Interrupt Driven I/O.
  - Explain major hurdles of Pipeline.
  - What is instruction level Parallelism?
  - Explain snooping protocol.
- Q.5 Answer the following:** **16**
- What are the types of I/O channels? Explain with suitable example.
  - Explain MESI protocol.
  - Explain the concept of overcoming data hazards with dynamic scheduling.
  - With neat diagram explain Centralized Shared Memory Architecture.

**S.Y. (B.Tech.) (Sem - II) (New) (CBCS) Examination: Oct/Nov-2022**  
**COMPUTER SCIENCE & ENGINEERING**  
**Computer Organization and Architecture**

Day & Date: Wednesday, 08-03-2023  
 Time: 02:00 PM To 05:00 PM

Max. Marks: 56

**Instructions:** 1) All questions are compulsory.  
 2) Figures to the right indicates full marks.

**Section – I**

- Q.2 Answer any three:** **12**
- Explain with Suitable diagram the Von Neumann Architecture.
  - List the pseudo operations for the ARC assembly language.
  - Write a note on Cache memory.
  - Write a note on Generations of Computers.
- Q.3 Answer the following:** **16**
- Explain the System Bus model.
  - With an example explain Assembly language programs.
  - Explain ISA in detail.
  - Write a short note on.
    - Shared variable Model
    - Functional and Logic Model

**Section – II**

- Q.4 Answer any three:** **12**
- Compare Programmed I/O and Interrupt Driven I/O.
  - Explain major hurdles of Pipeline.
  - What is instruction level Parallelism?
  - Explain snooping protocol.
- Q.5 Answer the following:** **16**
- What are the types of I/O channels? Explain with suitable example.
  - Explain MESI protocol.
  - Explain the concept of overcoming data hazards with dynamic scheduling.
  - With neat diagram explain Centralized Shared Memory Architecture.

Day & Date: Wednesday, 08-03-2023  
 Time: 02:00 PM To 05:00 PM

Max. Marks: 70

- Instructions:** 1) Q. No. 1 is compulsory. It should be solved in the first 30 minutes in answer book. Page no 03 (Starting page of the Answer Book). Each question carries one mark.  
 2) Don't forget to Mention question paper set (P/Q/R/S) on top of page.  
 3) Figures to the right indicates full marks.

**MCQ/Objective Type Questions**

Duration: 30 Minutes

Marks: 14

**Q.1 Choose the correct alternatives from the options and rewrite the sentence. 14**

- 1) The given set of instructions add \$s0, \$t0, \$t1; sub \$t2, \$s0, \$t3; shows the \_\_\_\_\_.  
 a) Structural hazards                      b) Data hazards  
 c) Forwarding bypassing                  d) Pipeline stall
- 2) An \_\_\_\_\_ between instruction i and instruction j occurs when instruction j writes register or memory location that instruction i reads.  
 a) Anti-dependence                      b) Output dependence  
 c) Register renaming                      d) None
- 3) The eliminating stage of WAR and WAW hazards, is often called \_\_\_\_\_.  
 a) Execution                                  b) Anti-dependence  
 c) Data hazards                                d) Dispatch
- 4) The term shared memory refers to the fact that the \_\_\_\_\_ is shared.  
 a) Program space                              b) Instruction space  
 c) Address space                                d) Thread space
- 5) The ALU and control unit are frequently referred to collectively as \_\_\_\_\_.  
 a) CPU                                              b) MPU  
 c) Combo                                              d) DPU
- 6) \_\_\_\_\_ generation of computer started with using discrete transistor as basic components.  
 a) 1<sup>st</sup>                                                      b) 2<sup>nd</sup>  
 c) 3<sup>rd</sup>                                                      d) 4<sup>th</sup>
- 7) The data path is made up of a collection of registers known as \_\_\_\_\_.  
 a) Data file                                              b) Collection file  
 c) Register file                                              d) Data path file
- 8) A cache memory is faster than main memory \_\_\_\_\_.  
 a) True                                                      b) False
- 9) The computer architecture aimed at reducing the time of execution of instructions is \_\_\_\_\_.  
 a) CISC                                                      b) RISC  
 c) ISA                                                      d) ANNA

- 10)** ULSI stands for \_\_\_\_\_.  
a) Ultra large scale integration      b) Under lower scale integration  
c) Ultra lower scale integration      d) Under large scale integration
- 11)** The ENIAC consists of \_\_\_\_\_ vacuum.  
a) 17,000      b) 19,000  
c) 18,000      d) 1,80,000
- 12)** \_\_\_\_\_ Suitable for communicating with equipment.  
a) Human readable      b) Machine readable  
c) Communication      d) None
- 13)** The \_\_\_\_\_ contains I/O protocols that are mapped onto the transport layer.  
a) Physical layer      b) The cable and connector  
c) Common transport layer      d) Application layer
- 14)** \_\_\_\_\_ is a technique whereby multiple instructions are overlapped in execution.  
a) Assembly line      b) Pipelining  
c) Collision line      d) Control line

Day & Date: Thursday, 09-03-2023  
 Time: 02:00 PM To 05:00 PM

Max. Marks: 56

- Instructions:** 1) All questions are compulsory.  
 2) Figures to the right indicate full marks  
 3) Assume suitable data wherever necessary and mention it clearly.

**Section – I**

- Q.2 Attempt any three.** **12**
- Differentiate between OSI model and TCP/IP protocol suite.
  - Explain multiple streams and multihoming services of SCTP.
  - Explain TCP Timers in detail.
  - Explain Socket System calls.
  - What is TCP? Explain features of TCP.
- Q.3 Solve any two.** **16**
- Explain TCP State Transition Diagram.
  - Describe with diagram the connectionless iterative server.
  - Sketch and explain the format of TCP segment header. List the services provided by TCP.

**Section – II**

- Q.4 Attempt any three.** **12**
- Explain the resolution in DNS.
  - What is SSH? Explain the concept of port forwarding.
  - Write a short note on POP3.
  - What is DHCP? Describe the DHCP operation when client and server are on the same network.
  - Write a short note on TFTP.
- Q.5 Attempt any two:** **16**
- Draw and explain DHCP packet format in detail.
  - Explain the E-mail architecture with its four scenarios.
  - Draw the diagram of SSH packet format and briefly describe its fields.

**MCQ/Objective Type Questions**

Duration: 30 Minutes

Marks: 14

**Q.1 Choose the correct alternatives from the options.**

**14**

- 1) FTP uses two well-known TCP ports: port 20 is used for the \_\_\_\_\_ connection.
  - a) Control
  - b) Data
  - c) Error
  - d) All above
- 2) The datagram socket is used by \_\_\_\_\_ processes.
  - a) UDP
  - b) TCP
  - c) SCTP
  - d) None of these
- 3) \_\_\_\_\_ allows you to connect and login to a remote computer.
  - a) Telnet
  - b) FTP
  - c) HTTP
  - d) SMTP
- 4) How many levels of addressing is provided in TCP/IP protocol?
  - a) One
  - b) Two
  - c) Three
  - d) Four
- 5) Secure shell (SSH) network protocol is used for \_\_\_\_\_.
  - a) secure data communication
  - b) remote command-line login
  - c) remote command execution
  - d) all of the mentioned
- 6) TCP sliding windows are \_\_\_\_\_ oriented.
  - a) packet
  - b) segment
  - c) byte
  - d) none of the above
- 7) A DNS client is called \_\_\_\_\_.
  - a) DNS updater
  - b) DNS resolver
  - c) DNS handler
  - d) None of the mentioned
- 8) Remote login can involve \_\_\_\_\_.
  - a) NVT
  - b) TELNET
  - c) TCP/IP
  - d) All of the above
- 9) DNS has two types of message: \_\_\_\_\_ and \_\_\_\_\_.
  - a) Request and reply
  - b) Query and response
  - c) Question and answer
  - d) True and false

- 10) Which of the following is/are Message Transfer Agent?
  - a) POP
  - b) IMAP
  - c) SMTP
  - d) Both a) and b)
- 11) Which modes are available with the POP3 protocol for email access?
  - a) Keep mode
  - b) Delete mode
  - c) Both a) and b)
  - d) None of these
- 12) To distinguish between different data chunks belonging to the same stream, SCTP uses \_\_\_\_\_.
  - a) TSNs
  - b) SIs
  - c) SSNs
  - d) None of the above
- 13) In DNS, each node in the tree has a label, which is a string with a maximum of \_\_\_\_\_ characters.
  - a) 46
  - b) 63
  - c) 65
  - d) 16
- 14) SSH \_\_\_\_\_ mechanism is sometimes referred to as SSH tunneling.
  - a) Encapsulation
  - b) port forwarding
  - c) Multiplexing
  - d) Numbering

**S.Y. (B.Tech) (Sem - II) (New) (CBCS) Examination: Oct/Nov-2022**  
**COMPUTER SCIENCE & ENGINEERING**  
**Computer Networks**

Day & Date: Thursday, 09-03-2023  
 Time: 02:00 PM To 05:00 PM

Max. Marks: 56

- Instructions:** 1) All questions are compulsory.  
 2) Figures to the right indicate full marks  
 3) Assume suitable data wherever necessary and mention it clearly.

**Section – I**

- Q.2 Attempt any three.** **12**
- Differentiate between OSI model and TCP/IP protocol suite.
  - Explain multiple streams and multihoming services of SCTP.
  - Explain TCP Timers in detail.
  - Explain Socket System calls.
  - What is TCP? Explain features of TCP.
- Q.3 Solve any two.** **16**
- Explain TCP State Transition Diagram.
  - Describe with diagram the connectionless iterative server.
  - Sketch and explain the format of TCP segment header. List the services provided by TCP.

**Section – II**

- Q.4 Attempt any three.** **12**
- Explain the resolution in DNS.
  - What is SSH? Explain the concept of port forwarding.
  - Write a short note on POP3.
  - What is DHCP? Describe the DHCP operation when client and server are on the same network.
  - Write a short note on TFTP.
- Q.5 Attempt any two:** **16**
- Draw and explain DHCP packet format in detail.
  - Explain the E-mail architecture with its four scenarios.
  - Draw the diagram of SSH packet format and briefly describe its fields.

**S.Y. (B.Tech) (Sem - II) (New) (CBCS) Examination: Oct/Nov-2022**  
**COMPUTER SCIENCE & ENGINEERING**  
**Computer Networks**

Day & Date: Thursday, 09-03-2023  
 Time: 02:00 PM To 05:00 PM

Max. Marks: 70

- Instructions:** 1) Q. No. 1 is compulsory. It should be solved in the first 30 minutes in answer book. Page no 03 (Starting page of the Answer Book). Each question carries one mark.  
 2) Don't forget to Mention question paper set (P/Q/R/S) on top of page.  
 3) Figures to the right indicates full marks

**MCQ/Objective Type Questions**

Duration: 30 Minutes

Marks: 14

**Q.1 Choose the correct alternatives from the options.**

**14**

- 1) In DNS, each node in the tree has a label, which is a string with a maximum of \_\_\_\_\_ characters.
  - a) 46
  - b) 63
  - c) 65
  - d) 16
- 2) SSH \_\_\_\_\_ mechanism is sometimes referred to as SSH tunneling.
  - a) Encapsulation
  - b) port forwarding
  - c) Multiplexing
  - d) Numbering
- 3) FTP uses two well-known TCP ports: port 20 is used for the \_\_\_\_\_ connection.
  - a) Control
  - b) Data
  - c) Error
  - d) All above
- 4) The datagram socket is used by \_\_\_\_\_ processes.
  - a) UDP
  - b) TCP
  - c) SCTP
  - d) None of these
- 5) \_\_\_\_\_ allows you to connect and login to a remote computer.
  - a) Telnet
  - b) FTP
  - c) HTTP
  - d) SMTP
- 6) How many levels of addressing is provided in TCP/IP protocol?
  - a) One
  - b) Two
  - c) Three
  - d) Four
- 7) Secure shell (SSH) network protocol is used for \_\_\_\_\_.
  - a) secure data communication
  - b) remote command-line login
  - c) remote command execution
  - d) all of the mentioned
- 8) TCP sliding windows are \_\_\_\_\_ oriented.
  - a) packet
  - b) segment
  - c) byte
  - d) none of the above
- 9) A DNS client is called \_\_\_\_\_.
  - a) DNS updater
  - b) DNS resolver
  - c) DNS handler
  - d) None of the mentioned

- 10)** Remote login can involve \_\_\_\_\_
- a) NVT
  - b) TELNET
  - c) TCP/IP
  - d) All of the above
- 11)** DNS has two types of message: \_\_\_\_\_ and \_\_\_\_\_.
- a) Request and reply
  - b) Query and response
  - c) Question and answer
  - d) True and false
- 12)** Which of the following is/are Message Transfer Agent?
- a) POP
  - b) IMAP
  - c) SMTP
  - d) Both a) and b)
- 13)** Which modes are available with the POP3 protocol for email access?
- a) Keep mode
  - b) Delete mode
  - c) Both a) and b)
  - d) None of these
- 14)** To distinguish between different data chunks belonging to the same stream, SCTP uses \_\_\_\_\_.
- a) TSNs
  - b) SIs
  - c) SSNs
  - d) None of the above

Max. Marks: 70

Marks: 14

14

- Page 1 of 20

- 7) Match the following and choose the correct option
- | Rule                       | No. of subintervals |
|----------------------------|---------------------|
| 1) Simpson's (1/3) rd rule | p) Any              |
| 2) Simpson's (3/8) th rule | q) Multiple of 6    |
| 3) Weddle's rule           | r) Multiple of 3    |
|                            | s) Multiple of 2    |
- a)  $1 - p, 2 - q, 3 - s$                       b)  $1 - r, 2 - s, 3 - q$   
c)  $1 - s, 2 - p, 3 - s$                       d)  $1 - s, 2 - r, 3 - q$
- 8) While solving an assignment problem an activity is assigned to a resource with zero opportunity cost the objective is to \_\_\_\_\_.  
a) Reduce the cost of assignment to zero  
b) Minimize total cost of an assignment  
c) Reduce the cost of that particular assignment to minimum  
d) none
- 9) Let  $A, B \in F(x)$  then A is said to be subset of B if for all  $x \in X$  \_\_\_\_\_.  
a)  $A(x) \geq B(x)$                                       b)  $A(x) \leq B(x)$   
c)  $A(x) > B(x)$                                       d) None
- 10) If A is a fuzzy set defined on  $X = [2, 4]$  by  $A(x) = \frac{x-2}{2}$  then  $\alpha_A =$  \_\_\_\_\_.  
a)  $[2, 4]$                                                       b)  $[2\alpha + 2, 4]$   
c) Both a and b                                              d) None
- 11) For the maximization LPP the simplex method is terminated when all the net evaluations are \_\_\_\_\_.  
a) Negative                                                      b) Non-negative  
c) Zero                                                              d) All of the above
- 12) A is a fuzzy set,  $A(x) = \bar{A}(x), x \in X$  then x is \_\_\_\_\_.  
a) special point                                                      b) middle point  
c) equilibrium point                                                      d) point of intersection
- 13) For fuzzy sets A, B  $|A| = 3$   $|B| = 10, |A \cap B| = 0.9$  then  $S(A, B) =$  \_\_\_\_\_.  
a) 0.09                                                              b) 0.9  
c) 0.3                                                              d) 0.99
- 14) Which of the following is not a fuzzy number?  
a)  $A + B$                                                               b)  $A - B$   
c)  $\text{MIN}(A, B)$                                                               d) None

**S.Y. (B.Tech.) (Sem - II) (New) (CBCS) Examination: Oct/Nov-2022**  
**COMPUTER SCIENCE & ENGINEERING**  
**Applied Mathematics – II**

Day & Date: Friday, 10-03-2023  
 Time: 02:00 PM To 05:00 PM

Max. Marks: 56

- Instructions:** 1) All questions are compulsory.  
 2) Figures to the right indicate full marks.  
 3) Use of non-programmable calculator is allowed.

**Section – I**

**Q.2 Attempt any three of the following.**

**09**

- Find the Positive root of the equation  $x^3 - \log_{10} x - 12 = 0$  correct up to three decimal places by using False Position method.
- Solve the system of equations by using Gauss Elimination method.  
 $x + 2y + z = 3, 2x + 3y + 3z = 10, 3x - y + 2z = 13$
- Find the value of  $\sqrt{24}$  by using Newton Raphson method. Correct up to four decimal places.
- State the Trapezoidal Rule and evaluate  $\int_0^6 \frac{1}{1+x^2} dx$
- Find first three approximations by using Gauss Jacobi method  
 $10x - 5y - 2z = 3, 4x - 10y + 3z = -3, x + 6y + 10z = 3$

**Q.3 Attempt any three of the following.**

**09**

- Apply Gaussian Quadrature 2-point formula to evaluate  $\int_{-2}^2 e^{-x/2} dx$
- Discover the double root of the equation  $x^3 - 5x^2 + 8x - 4 = 0$ . Which is near to 1.8 by using Newton Raphson method.
- Find first five approximations of the Eigen values of the given matrix by using Power method  $\begin{bmatrix} 2 & -1 & 0 \\ -1 & 2 & -1 \\ 0 & -1 & 2 \end{bmatrix}$
- Apply Simpson's three-eighth rule to evaluate  $\int_{0.2}^{1.4} (\sin x - \log x + e^x) dx$  by take  $h = 0.2$ .
- Solve the system of equations by using Gauss Jordan method  
 $2x - 3y - z = 5, 4x + 4y - 3z = 3, 2x - 3y + 2z = 2$

**Q.4 Attempt any two of the following.**

**10**

- Solve the system of equations by using L. U. Decomposition method  
 $2x + 3y + z = 9, x + 2y + 3z = 6, 3x + y + 2z = 8$
- Solve the system of non-linear equations  $x^2 + y = 11, y^2 + x = 7$  take initial approximations as  $x_0 = 3.5$  and  $y_0 = -1.8$
- Apply Romberg integration method to evaluate  $\int_0^{0.5} \frac{x}{\sin x} dx$

## Section – II

09

**Q.5 Attempt any three of the following.**

- a) Define membership function and fuzzy set  
 b) For the fuzzy sets

|           |       |       |       |       |       |       |
|-----------|-------|-------|-------|-------|-------|-------|
| Elements: | $x_1$ | $x_2$ | $x_3$ | $x_4$ | $x_5$ | $x_6$ |
| A(x):     | 0.1   | 0.6   | 0.8   | 0.9   | 0.7   | 0.1   |
| B(x):     | 0.9   | 0.7   | 0.5   | 0.2   | 0.1   | 0     |

Then find  $(A \cup B)'$ ,  $A \cup B'$ 

- c) Evaluate the following

- i)  $[1,3] + [5,8]$   
 ii)  $[1,3] - [5,8]$   
 iii)  $[1,3] \cdot [5,8]$   
 iv)  $[1,3]/[5,8]$

- d) Find the equilibrium point for  $C(x) = \frac{x}{x+1}$   
 e) Find I.B.F.S by using Hungarian method

| Warehouse<br>Factory | I  | II | III | IV |
|----------------------|----|----|-----|----|
| A                    | 15 | 14 | 12  | 16 |
| B                    | 23 | 22 | 25  | 24 |
| C                    | 31 | 34 | 32  | 33 |
| D                    | 21 | 32 | 44  | 53 |

09

**Q.6 Attempt any three of the following.**

- a) Determine whether the following fuzzy set is a fuzzy number

$$C(x) = x \quad 0 \leq x \leq 1$$

$$= 0 \quad \text{otherwise}$$

- b) Prove that  $\alpha_{+(A \cap B)} = \alpha_{+A} \cap \alpha_{+B}$

- c) For the fuzzy sets

|           |       |       |       |       |       |       |
|-----------|-------|-------|-------|-------|-------|-------|
| Elements: | $x_1$ | $x_2$ | $x_3$ | $x_4$ | $x_5$ | $x_6$ |
| A(x):     | 0.1   | 0.6   | 0.8   | 0.9   | 0.7   | 0.1   |
| B(x):     | 0.9   | 0.7   | 0.5   | 0.2   | 0.1   | 0     |

Then find fuzzy set  $0.4_{A \cap B}$ 

- d) Solve the Assignment Problem

| Tasks | E  | F  | G  | H  |
|-------|----|----|----|----|
| A     | 18 | 26 | 17 | 11 |
| B     | 13 | 28 | 14 | 26 |
| C     | 38 | 19 | 18 | 15 |
| D     | 19 | 26 | 24 | 10 |

- e) Maximize  $Z = 3x_1 + 2x_2$ , subject to

$$x_1 + x_2 \leq 4, \quad x_1 - x_2 \leq 2, \quad x_1, x_2 \geq 0$$

**Q.7 Attempt any two**

- a)**
- State first decomposition theorem and find
- $f(A)$
- where

$$A(x) = \frac{0.7}{-5} + \frac{0.6}{-4} + \frac{1}{-3} + \frac{0.4}{-2} + \frac{0.45}{-1} + \frac{0.75}{0} + \frac{0.81}{1} + \frac{0.34}{2} + \frac{1}{3} + \frac{0.17}{4} + \frac{0.91}{5}$$

$$X = \{-5, -4, -3, -2, -1, 0, 1, 2, 3, 4, 5\}$$

$$F: x \rightarrow y \text{ defined by } f(x) = x^2$$

- b)**
- Find
- $A + B$
- for the following membership function:

$$A(x) = \frac{x+1}{2} \quad -1 < x \leq 1$$

$$= \frac{3-x}{2} \quad 1 < x < 3$$

$$= 0 \quad \text{otherwise}$$

$$B(x) = \frac{x-1}{2} \quad 1 < x \leq 3$$

$$= \frac{5-x}{2} \quad 3 < x \leq 5$$

$$= 0 \quad \text{otherwise}$$

- c)**
- Solve the Assignment Problem

Machine

| Job | A  | B  | C  | D  |
|-----|----|----|----|----|
| 1   | 18 | 24 | 28 | 32 |
| 2   | 8  | 13 | 17 | 19 |
| 3   | 10 | 15 | 19 | 22 |

|          |  |
|----------|--|
| Seat No. |  |

**Applied Mathematics – II**

Day & Date: Friday, 10-03-2023  
 Time: 02:00 PM To 05:00 PM

Max. Marks: 70

- Instructions:** 1) Q. No. 1 is compulsory. It should be solved in the first 30 minutes in answer book. Page no 03 (Starting page of the Answer Book). Each question carries one mark.  
 2) Don't forget to Mention question paper set (P/Q/R/S) on top of page.  
 3) Figures to the right indicates full marks.  
 4) Use of non-programmable calculator is allowed.

**MCQ/Objective Type Questions**

Duration: 30 Minutes

Marks: 14

**Q.1 Choose the correct alternatives from the options.**

**14**

- 1) While solving an assignment problem an activity is assigned to a resource with zero opportunity cost the objective is to \_\_\_\_\_.  
 a) Reduce the cost of assignment to zero  
 b) Minimize total cost of an assignment  
 c) Reduce the cost of that particular assignment to minimum  
 d) none
- 2) Let  $A, B \in F(x)$  then A is said to be subset of B if for all  $x \in X$  \_\_\_\_\_.  
 a)  $A(x) \geq B(x)$   
 b)  $A(x) \leq B(x)$   
 c)  $A(x) > B(x)$   
 d) None
- 3) If A is a fuzzy set defined on  $X = [2,4]$  by  $A(x) = \frac{x-2}{2}$  then  $\alpha_A =$  \_\_\_\_\_.  
 a)  $[2,4]$   
 b)  $[2\alpha + 2,4]$   
 c) Both a and b  
 d) None
- 4) For the maximization LPP the simplex method is terminated when all the net evaluations are \_\_\_\_\_.  
 a) Negative  
 b) Non-negative  
 c) Zero  
 d) All of the above
- 5) A is a fuzzy set,  $A(x) = \bar{A}(x), x \in X$  then x is \_\_\_\_\_.  
 a) special point  
 b) middle point  
 c) equilibrium point  
 d) point of intersection
- 6) For fuzzy sets A, B  $|A| = 3$   $|B| = 10$ ,  $|A \cap B| = 0.9$  then  $S(A, B) =$  \_\_\_\_\_.  
 a) 0.09  
 b) 0.9  
 c) 0.3  
 d) 0.99
- 7) Which of the following is not a fuzzy number?  
 a)  $A + B$   
 b)  $A - B$   
 c)  $\text{MIN}(A, B)$   
 d) None

Set **Q**

**S.Y. (B.Tech.) (Sem - II) (New) (CBCS) Examination: Oct/Nov-2022**  
**COMPUTER SCIENCE & ENGINEERING**  
**Applied Mathematics – II**

Day & Date: Friday, 10-03-2023  
 Time: 02:00 PM To 05:00 PM

Max. Marks: 56

- Instructions:** 1) All questions are compulsory.  
 2) Figures to the right indicate full marks.  
 3) Use of non-programmable calculator is allowed.

**Section – I**

**Q.2 Attempt any three of the following.**

**09**

- Find the Positive root of the equation  $x^3 - \log_{10} x - 12 = 0$  correct up to three decimal places by using False Position method.
- Solve the system of equations by using Gauss Elimination method.  
 $x + 2y + z = 3, 2x + 3y + 3z = 10, 3x - y + 2z = 13$
- Find the value of  $\sqrt{24}$  by using Newton Raphson method. Correct up to four decimal places.
- State the Trapezoidal Rule and evaluate  $\int_0^6 \frac{1}{1+x^2} dx$
- Find first three approximations by using Gauss Jacobi method  
 $10x - 5y - 2z = 3, 4x - 10y + 3z = -3, x + 6y + 10z = 3$

**Q.3 Attempt any three of the following.**

**09**

- Apply Gaussian Quadrature 2-point formula to evaluate  $\int_{-2}^2 e^{-x/2} dx$
- Discover the double root of the equation  $x^3 - 5x^2 + 8x - 4 = 0$ . Which is near to 1.8 by using Newton Raphson method.
- Find first five approximations of the Eigen values of the given matrix by using Power method  $\begin{bmatrix} 2 & -1 & 0 \\ -1 & 2 & -1 \\ 0 & -1 & 2 \end{bmatrix}$
- Apply Simpson's three-eighth rule to evaluate  $\int_{0.2}^{1.4} (\sin x - \log x + e^x) dx$  by take  $h = 0.2$ .
- Solve the system of equations by using Gauss Jordan method  
 $2x - 3y - z = 5, 4x + 4y - 3z = 3, 2x - 3y + 2z = 2$

**Q.4 Attempt any two of the following.**

**10**

- Solve the system of equations by using L. U. Decomposition method  
 $2x + 3y + z = 9, x + 2y + 3z = 6, 3x + y + 2z = 8$
- Solve the system of non-linear equations  $x^2 + y = 11, y^2 + x = 7$  take initial approximations as  $x_0 = 3.5$  and  $y_0 = -1.8$
- Apply Romberg integration method to evaluate  $\int_0^{0.5} \frac{x}{\sin x} dx$

## Section – II

**Q.5 Attempt any three of the following.**

09

- a) Define membership function and fuzzy set  
 b) For the fuzzy sets

|           |       |       |       |       |       |       |
|-----------|-------|-------|-------|-------|-------|-------|
| Elements: | $x_1$ | $x_2$ | $x_3$ | $x_4$ | $x_5$ | $x_6$ |
| A(x):     | 0.1   | 0.6   | 0.8   | 0.9   | 0.7   | 0.1   |
| B(x):     | 0.9   | 0.7   | 0.5   | 0.2   | 0.1   | 0     |

Then find  $(A \cup B)'$ ,  $A \cup B'$ 

- c) Evaluate the following

- i)  $[1,3] + [5,8]$   
 ii)  $[1,3] - [5,8]$   
 iii)  $[1,3] \cdot [5,8]$   
 iv)  $[1,3]/[5,8]$

- d) Find the equilibrium point for  $C(x) = \frac{x}{x+1}$   
 e) Find I.B.F.S by using Hungarian method

| Warehouse<br>Factory | I  | II | III | IV |
|----------------------|----|----|-----|----|
| A                    | 15 | 14 | 12  | 16 |
| B                    | 23 | 22 | 25  | 24 |
| C                    | 31 | 34 | 32  | 33 |
| D                    | 21 | 32 | 44  | 53 |

**Q.6 Attempt any three of the following.**

09

- a) Determine whether the following fuzzy set is a fuzzy number

$$C(x) = x \quad 0 \leq x \leq 1$$

$$= 0 \quad \text{otherwise}$$

- b) Prove that  $\alpha_{+(A \cap B)} = \alpha_{+A} \cap \alpha_{+B}$

- c) For the fuzzy sets

|           |       |       |       |       |       |       |
|-----------|-------|-------|-------|-------|-------|-------|
| Elements: | $x_1$ | $x_2$ | $x_3$ | $x_4$ | $x_5$ | $x_6$ |
| A(x):     | 0.1   | 0.6   | 0.8   | 0.9   | 0.7   | 0.1   |
| B(x):     | 0.9   | 0.7   | 0.5   | 0.2   | 0.1   | 0     |

Then find fuzzy set  $0.4_{A \cap B}$ 

- d) Solve the Assignment Problem

| Tasks | E  | F  | G  | H  |
|-------|----|----|----|----|
| A     | 18 | 26 | 17 | 11 |
| B     | 13 | 28 | 14 | 26 |
| C     | 38 | 19 | 18 | 15 |
| D     | 19 | 26 | 24 | 10 |

- e) Maximize  $Z = 3x_1 + 2x_2$ , subject to

$$x_1 + x_2 \leq 4, \quad x_1 - x_2 \leq 2, \quad x_1, x_2 \geq 0$$

**Q.7 Attempt any two**

- a)**
- State first decomposition theorem and find
- $f(A)$
- where

$$A(x) = \frac{0.7}{-5} + \frac{0.6}{-4} + \frac{1}{-3} + \frac{0.4}{-2} + \frac{0.45}{-1} + \frac{0.75}{0} + \frac{0.81}{1} + \frac{0.34}{2} + \frac{1}{3} + \frac{0.17}{4} + \frac{0.91}{5}$$

$$X = \{-5, -4, -3, -2, -1, 0, 1, 2, 3, 4, 5\}$$

$$F: x \rightarrow y \text{ defined by } f(x) = x^2$$

- b)**
- Find
- $A + B$
- for the following membership function:

$$A(x) = \frac{x+1}{2} \quad -1 < x \leq 1$$

$$= \frac{3-x}{2} \quad 1 < x < 3$$

$$= 0 \quad \text{otherwise}$$

$$B(x) = \frac{x-1}{2} \quad 1 < x \leq 3$$

$$= \frac{5-x}{2} \quad 3 < x \leq 5$$

$$= 0 \quad \text{otherwise}$$

- c)**
- Solve the Assignment Problem

Machine

Day & Date: Friday, 10-03-2023  
 Time: 02:00 PM To 05:00 PM

Max. Marks: 70

- Instructions:** 1) Q. No. 1 is compulsory. It should be solved in the first 30 minutes in answer book. Page no 03 (Starting page of the Answer Book). Each question carries one mark.  
 2) Don't forget to Mention question paper set (P/Q/R/S) on top of page.  
 3) Figures to the right indicates full marks.  
 4) Use of non-programmable calculator is allowed.

**MCQ/Objective Type Questions**

Duration: 30 Minutes

Marks: 14

**Q.1 Choose the correct alternatives from the options.**

**14**

- 1) For the maximization LPP the simplex method is terminated when all the net evaluations are \_\_\_\_\_.
  - a) Negative
  - b) Non-negative
  - c) Zero
  - d) All of the above
- 2)  $A$  is a fuzzy set,  $A(x) = \bar{A}(x), x \in X$  then  $x$  is \_\_\_\_\_.
  - a) special point
  - b) middle point
  - c) equilibrium point
  - d) point of intersection
- 3) For fuzzy sets  $A, B$   $|A| = 3$   $|B| = 10, |A \cap B| = 0.9$  then  $S(A, B) =$  \_\_\_\_\_.
  - a) 0.09
  - b) 0.9
  - c) 0.3
  - d) 0.99
- 4) Which of the following is not a fuzzy number?
  - a)  $A + B$
  - b)  $A - B$
  - c)  $\text{MIN}(A, B)$
  - d) None
- 5) The interval in which a real root of the equation  $x^3 - 2x - 5 = 0$  lies is \_\_\_\_\_.
  - a) (1,2)
  - b) (0,1)
  - c) (2,3)
  - d) (3,4)
- 6) The formula used for solving the equation using Regula Falsi method is
  - i)  $x = \frac{bf(a) - af(b)}{f(a) - f(b)}$
  - ii)  $x = \frac{af(b) - bf(a)}{f(a) - f(b)}$
  - a) Only i is Correct
  - b) Only ii is Correct
  - c) Both i, ii are Correct
  - d) Both i, ii are Incorrect
- 7) The coefficient matrix is transformed to \_\_\_\_\_ form in Gauss Elimination method.
  - a) Diagonal
  - b) Upper triangular
  - c) Lower triangular
  - d) None of a, b, c

- 8) Which of the following is not direct method?  
 a) Gauss – Elimination                      b) Gauss – Jordan  
 c) Gauss – Seidal                              d) Crout's method
- 9) To apply Simpson's one-third rule the number of sub-intervals must be \_\_\_\_\_.  
 a) Even                                              b) Odd  
 c) Multiple of 3                                  d) Multiple of 6
- 10) Which of the following is false?  
 a) Error in Trapezoidal rule is of order  $h^2$   
 b) Error in Weddle's rule is of order  $h^7$   
 c) Error in Simpson's  $3/8^{\text{th}}$  rule is of order  $h^5$   
 d) Error in Simpson's  $1/3^{\text{rd}}$  rule is of order  $h$
- 11) Match the following and choose the correct option
- | Rule                       | No. of subintervals    |
|----------------------------|------------------------|
| 1) Simpson's (1/3) rd rule | p) Any                 |
| 2) Simpson's (3/8) th rule | q) Multiple of 6       |
| 3) Weddle's rule           | r) Multiple of 3       |
|                            | s) Multiple of 2       |
| a) 1 – p, 2 – q, 3 – s     | b) 1 – r, 2 – s, 3 – q |
| c) 1 – s, 2 – p, 3 – s     | d) 1 – s, 2 – r, 3 – q |
- 12) While solving an assignment problem an activity is assigned to a resource with zero opportunity cost the objective is to \_\_\_\_\_.  
 a) Reduce the cost of assignment to zero  
 b) Minimize total cost of an assignment  
 c) Reduce the cost of that particular assignment to minimum  
 d) none
- 13) Let  $A, B \in F(X)$  then A is said to be subset of B if for all  $x \in X$  \_\_\_\_\_.  
 a)  $A(x) \geq B(x)$                                   b)  $A(x) \leq B(x)$   
 c)  $A(x) > B(x)$                                   d) None
- 14) If A is a fuzzy set defined on  $X = [2,4]$  by  $A(x) = \frac{x-2}{2}$  then  $\alpha_A =$  \_\_\_\_\_.  
 a)  $[2,4]$                                               b)  $[2\alpha + 2,4)$   
 c) Both a and b                                      d) None

**COMPUTER SCIENCE & ENGINEERING**  
**Applied Mathematics – II**

Day & Date: Friday, 10-03-2023  
 Time: 02:00 PM To 05:00 PM

Max. Marks: 56

- Instructions:** 1) All questions are compulsory.  
 2) Figures to the right indicate full marks.  
 3) Use of non-programmable calculator is allowed.

**Section – I**

**Q.2 Attempt any three of the following.**

09

- Find the Positive root of the equation  $x^3 - \log_{10} x - 12 = 0$  correct up to three decimal places by using False Position method.
- Solve the system of equations by using Gauss Elimination method.  
 $x + 2y + z = 3, 2x + 3y + 3z = 10, 3x - y + 2z = 13$
- Find the value of  $\sqrt{24}$  by using Newton Raphson method. Correct up to four decimal places.
- State the Trapezoidal Rule and evaluate  $\int_0^6 \frac{1}{1+x^2} dx$
- Find first three approximations by using Gauss Jacobi method  
 $10x - 5y - 2z = 3, 4x - 10y + 3z = -3, x + 6y + 10z = 3$

**Q.3 Attempt any three of the following.**

09

- Apply Gaussian Quadrature 2-point formula to evaluate  $\int_{-2}^2 e^{-x/2} dx$
- Discover the double root of the equation  $x^3 - 5x^2 + 8x - 4 = 0$ . Which is near to 1.8 by using Newton Raphson method.
- Find first five approximations of the Eigen values of the given matrix by using Power method  $\begin{bmatrix} 2 & -1 & 0 \\ -1 & 2 & -1 \\ 0 & -1 & 2 \end{bmatrix}$
- Apply Simpson's three-eighth rule to evaluate  $\int_{0.2}^{1.4} (\sin x - \log x + e^x) dx$  by take  $h = 0.2$ .
- Solve the system of equations by using Gauss Jordan method  
 $2x - 3y - z = 5, 4x + 4y - 3z = 3, 2x - 3y + 2z = 2$

**Q.4 Attempt any two of the following.**

10

- Solve the system of equations by using L. U. Decomposition method  
 $2x + 3y + z = 9, x + 2y + 3z = 6, 3x + y + 2z = 8$
- Solve the system of non-linear equations  $x^2 + y = 11, y^2 + x = 7$  take initial approximations as  $x_0 = 3.5$  and  $y_0 = -1.8$
- Apply Romberg integration method to evaluate  $\int_0^{0.5} \frac{x}{\sin x} dx$

## Section – II

**Q.5 Attempt any three of the following.**

09

- a) Define membership function and fuzzy set  
 b) For the fuzzy sets

|           |       |       |       |       |       |       |
|-----------|-------|-------|-------|-------|-------|-------|
| Elements: | $x_1$ | $x_2$ | $x_3$ | $x_4$ | $x_5$ | $x_6$ |
| A(x):     | 0.1   | 0.6   | 0.8   | 0.9   | 0.7   | 0.1   |
| B(x):     | 0.9   | 0.7   | 0.5   | 0.2   | 0.1   | 0     |

Then find  $(A \cup B)'$ ,  $A \cup B'$ 

- c) Evaluate the following

- i)  $[1,3] + [5,8]$   
 ii)  $[1,3] - [5,8]$   
 iii)  $[1,3] \cdot [5,8]$   
 iv)  $[1,3]/[5,8]$

- d) Find the equilibrium point for  $C(x) = \frac{x}{x+1}$   
 e) Find I.B.F.S by using Hungarian method

| Warehouse<br>Factory | I  | II | III | IV |
|----------------------|----|----|-----|----|
| A                    | 15 | 14 | 12  | 16 |
| B                    | 23 | 22 | 25  | 24 |
| C                    | 31 | 34 | 32  | 33 |
| D                    | 21 | 32 | 44  | 53 |

**Q.6 Attempt any three of the following.**

09

- a) Determine whether the following fuzzy set is a fuzzy number

$$C(x) = x \quad 0 \leq x \leq 1$$

$$= 0 \quad \text{otherwise}$$

- b) Prove that  $\alpha_{+(A \cap B)} = \alpha_{+A} \cap \alpha_{+B}$

- c) For the fuzzy sets

|           |       |       |       |       |       |       |
|-----------|-------|-------|-------|-------|-------|-------|
| Elements: | $x_1$ | $x_2$ | $x_3$ | $x_4$ | $x_5$ | $x_6$ |
| A(x):     | 0.1   | 0.6   | 0.8   | 0.9   | 0.7   | 0.1   |
| B(x):     | 0.9   | 0.7   | 0.5   | 0.2   | 0.1   | 0     |

Then find fuzzy set  $0.4_{A \cap B}$ 

- d) Solve the Assignment Problem

| Tasks | E  | F  | G  | H  |
|-------|----|----|----|----|
| A     | 18 | 26 | 17 | 11 |
| B     | 13 | 28 | 14 | 26 |
| C     | 38 | 19 | 18 | 15 |
| D     | 19 | 26 | 24 | 10 |

- e) Maximize  $Z = 3x_1 + 2x_2$ , subject to

$$x_1 + x_2 \leq 4, \quad x_1 - x_2 \leq 2, \quad x_1, x_2 \geq 0$$

**Q.7 Attempt any two**

- a)**
- State first decomposition theorem and find
- $f(A)$
- where

$$A(x) = \frac{0.7}{-5} + \frac{0.6}{-4} + \frac{1}{-3} + \frac{0.4}{-2} + \frac{0.45}{-1} + \frac{0.75}{0} + \frac{0.81}{1} + \frac{0.34}{2} + \frac{1}{3} + \frac{0.17}{4} + \frac{0.91}{5}$$

$$X = \{-5, -4, -3, -2, -1, 0, 1, 2, 3, 4, 5\}$$

$$F: x \rightarrow y \text{ defined by } f(x) = x^2$$

- b)**
- Find
- $A + B$
- for the following membership function:

$$A(x) = \frac{x+1}{2} \quad -1 < x \leq 1$$

$$= \frac{3-x}{2} \quad 1 < x < 3$$

$$= 0 \quad \text{otherwise}$$

$$B(x) = \frac{x-1}{2} \quad 1 < x \leq 3$$

$$= \frac{5-x}{2} \quad 3 < x \leq 5$$

$$= 0 \quad \text{otherwise}$$

- c)**
- Solve the Assignment Problem

**10**

- Solve the system of equations by using L. U. Decomposition method  
 $2x + 3y + z = 9, x + 2y + 3z = 6, 3x + y + 2z = 8$
- Solve the system of non-linear equations  $x^2 + y = 11, y^2 + x = 7$  take initial approximations as  $x_0 = 3.5$  and  $y_0 = -1.8$
- Apply Romberg integration method to evaluate  $\int_0^{0.5} \frac{x}{\sin x} dx$

## Section – II

**Q.5 Attempt any three of the following.**

09

- a) Define membership function and fuzzy set  
 b) For the fuzzy sets

|           |       |       |       |       |       |       |
|-----------|-------|-------|-------|-------|-------|-------|
| Elements: | $x_1$ | $x_2$ | $x_3$ | $x_4$ | $x_5$ | $x_6$ |
| A(x):     | 0.1   | 0.6   | 0.8   | 0.9   | 0.7   | 0.1   |
| B(x):     | 0.9   | 0.7   | 0.5   | 0.2   | 0.1   | 0     |

Then find  $(A \cup B)'$ ,  $A \cup B'$ 

- c) Evaluate the following

- i)  $[1,3] + [5,8]$   
 ii)  $[1,3] - [5,8]$   
 iii)  $[1,3] \cdot [5,8]$   
 iv)  $[1,3]/[5,8]$

- d) Find the equilibrium point for  $C(x) = \frac{x}{x+1}$   
 e) Find I.B.F.S by using Hungarian method

| Warehouse<br>Factory | I  | II | III | IV |
|----------------------|----|----|-----|----|
| A                    | 15 | 14 | 12  | 16 |
| B                    | 23 | 22 | 25  | 24 |
| C                    | 31 | 34 | 32  | 33 |
| D                    | 21 | 32 | 44  | 53 |

**Q.6 Attempt any three of the following.**

09

- a) Determine whether the following fuzzy set is a fuzzy number

$$C(x) = x \quad 0 \leq x \leq 1$$

$$= 0 \quad \text{otherwise}$$

- b) Prove that  $\alpha_{+(A \cap B)} = \alpha_{+A} \cap \alpha_{+B}$

- c) For the fuzzy sets

|           |       |       |       |       |       |       |
|-----------|-------|-------|-------|-------|-------|-------|
| Elements: | $x_1$ | $x_2$ | $x_3$ | $x_4$ | $x_5$ | $x_6$ |
| A(x):     | 0.1   | 0.6   | 0.8   | 0.9   | 0.7   | 0.1   |
| B(x):     | 0.9   | 0.7   | 0.5   | 0.2   | 0.1   | 0     |

Then find fuzzy set  $0.4_{A \cap B}$ 

- d) Solve the Assignment Problem

| Tasks | E  | F  | G  | H  |
|-------|----|----|----|----|
| A     | 18 | 26 | 17 | 11 |
| B     | 13 | 28 | 14 | 26 |
| C     | 38 | 19 | 18 | 15 |
| D     | 19 | 26 | 24 | 10 |

- e) Maximize  $Z = 3x_1 + 2x_2$ , subject to

$$x_1 + x_2 \leq 4, \quad x_1 - x_2 \leq 2, \quad x_1, x_2 \geq 0$$

**Q.7 Attempt any two**

- a)**
- State first decomposition theorem and find
- $f(A)$
- where

$$A(x) = \frac{0.7}{-5} + \frac{0.6}{-4} + \frac{1}{-3} + \frac{0.4}{-2} + \frac{0.45}{-1} + \frac{0.75}{0} + \frac{0.81}{1} + \frac{0.34}{2} + \frac{1}{3} + \frac{0.17}{4} + \frac{0.91}{5}$$

$$X = \{-5, -4, -3, -2, -1, 0, 1, 2, 3, 4, 5\}$$

$$F: x \rightarrow y \text{ defined by } f(x) = x^2$$

- b)**
- Find
- $A + B$
- for the following membership function:

$$A(x) = \frac{x+1}{2} \quad -1 < x \leq 1$$

$$= \frac{3-x}{2} \quad 1 < x < 3$$

$$= 0 \quad \text{otherwise}$$

$$B(x) = \frac{x-1}{2} \quad 1 < x \leq 3$$

$$= \frac{5-x}{2} \quad 3 < x \leq 5$$

$$= 0 \quad \text{otherwise}$$

- c)**
- Solve the Assignment Problem

Machine

| Job | A  | B  | C  | D  |
|-----|----|----|----|----|
| 1   | 18 | 24 | 28 | 32 |
| 2   | 8  | 13 | 17 | 19 |
| 3   | 10 | 15 | 19 | 22 |

**Seat  
No.**

Max. Marks: 70

Marks: 14

14

- Page 1 of 12

- 8) \_\_\_\_\_ occurs when your algorithm has learned too much from your data, up to the point of mapping curve shapes and rules that do not exist.
- |                  |                |
|------------------|----------------|
| a) under fitting | b) overfitting |
| c) cost function | d) none        |
- 9) \_\_\_\_\_ is the ability to train computer to understand both human speech and written text.
- |                |                                |
|----------------|--------------------------------|
| a) Data mining | b) Natural Language Processing |
| c) Statistics  | d) None                        |
- 10) The process goes on repetitively until there are no more chunks. Chunks can be small (depending on core memory), and the process is called \_\_\_\_\_.
- |                        |                   |
|------------------------|-------------------|
| a) mini-batch learning | b) learning model |
| c) linear regression   | d) None           |
- 11) \_\_\_\_\_ function performs the rendering and uses a grayscale color map.
- |               |             |
|---------------|-------------|
| a) plt.show() | b) show()   |
| c) imshow()   | d) imread() |
- 12) \_\_\_\_\_ is the approach to machine learning that is based on neuroscience.
- |                  |                 |
|------------------|-----------------|
| a) connectionism | b) neuron       |
| c) deep learning | d) all of above |
- 13) \_\_\_\_\_ Model looks into the future analysis of data.
- |                |                  |
|----------------|------------------|
| a) Descriptive | b) Predictive    |
| c) Business    | d) None of above |
- 14) \_\_\_\_\_ method is used to avoid over fitting.
- |                                |                   |
|--------------------------------|-------------------|
| a) Bayesian                    | b) Regularization |
| c) Rule based machine learning | d) None           |

**S. Y. (B.Tech.) (Sem - II) (New) (CBCS) Examination: Oct/Nov-2022**  
**COMPUTER SCIENCE & ENGINEERING**  
**Machine Learning**

Day & Date: Tuesday, 14-03-2023  
 Time: 02:00 PM To 05:00 PM

Max. Marks: 56

- Instructions:** 1) All questions are compulsory.  
 2) Make suitable assumptions (if necessary and state them clearly)  
 3) Figures to the right indicate full marks.

**Section – I**

- Q.2 Answer the following questions. (Any Four) 16**  
 a) Explain tying machine learning methods to outcome.  
 b) Define machine learning. Explain Lear verging the power of machine learning.  
 c) Write the differences between supervised and unsupervised learning.  
 d) Explain the application of machine learning.  
 e) Explain the term reinforcement learning.
- Q.3 Answer the following questions. (Any One) 06**  
 a) Explain learning as optimization.  
 b) How to determine the best learning model explain it?
- Q.4 What is cost function explain its different types? 06**

**Section – II**

- Q.5 Answer the following questions. (Any Four) 16**  
 a) Write short note on Searching for the best hyper parameters.  
 b) Write a short note on applying feature engineering.  
 c) Explain the term variance.  
 d) Explain the descending error curve.  
 e) Explain the stacking model.
- Q.6 Answer the following questions. (Any One) 06**  
 a) Write short note on underfitting and overfitting.  
 b) Explain the discovering the Incredible perceptron.
- Q.7 Explain the use of cross validation. 06**

|                 |  |

- 9) \_\_\_\_\_ is focused on primarily on making inferences and understanding the characteristics of the variable.
- a) Data mining
  - b) Statistics
  - c) Artificial Intelligence
  - d) All
- 10) In Python \_\_\_\_\_ package offers all the functionality needed to create and manipulate matrices.
- a) scipy
  - b) numpy
  - c) none
  - d) sklearn
- 11) \_\_\_\_\_ ways improves machine learning model.
- a) error curve method
  - b) testing multiple model
  - c) SDLC Model
  - d) none
- 12) \_\_\_\_\_ Technique is used to group similar types of objects with similar parameter.
- a) Bayesian
  - b) Clustering
  - c) Association
  - d) None
- 13) Which of the following steps are required to apply machine learning technique to support business strategy?
- a) What is the business problem you are trying to solve
  - b) When are the hidden data resources that you can take advantage
  - c) How can you prepare to get your data
  - d) all
- 14) No matter what the information is, for a machine learning algorithm to correctly process it, it should always be transformed into a \_\_\_\_\_.
- a) number
  - b) text
  - c) images
  - d) all of above

Max. Marks: 70

- Instructions:** 1) Q. No. 1 is compulsory. It should be solved in the first 30 minutes in Answer book. Page no 03 (Starting page of the Answer Book). Each Question carries one mark.  
 2) Don't forget to Mention question paper set (P/Q/R/S) on top of page.  
 3) Figures to the right indicate full marks

**MCQ/Objective Type Questions**

Duration: 30 Minutes

Marks: 14

**Q.1 Choose the correct alternatives from the options.**

**14**

- 1) \_\_\_\_\_ function performs the rendering and uses a grayscale color map.
 

|               |             |
|---------------|-------------|
| a) plt.show() | b) show()   |
| c) imshow()   | d) imread() |
- 2) \_\_\_\_\_ is the approach to machine learning that is based on neuroscience.
 

|                  |                 |
|------------------|-----------------|
| a) connectionism | b) neuron       |
| c) deep learning | d) all of above |
- 3) \_\_\_\_\_ Model looks into the future analysis of data.
 

|                |                  |
|----------------|------------------|
| a) Descriptive | b) Predictive    |
| c) Business    | d) None of above |
- 4) \_\_\_\_\_ method is used to avoid over fitting.
 

|                                |                   |
|--------------------------------|-------------------|
| a) Bayesian                    | b) Regularization |
| c) Rule based machine learning | d) None           |
- 5) Quantitative features are perfect for machine learning because they define values as \_\_\_\_\_.
 

|           |                 |
|-----------|-----------------|
| a) number | b) text         |
| c) images | d) all of above |
- 6) \_\_\_\_\_ is focused on primarily on making inferences and understanding the characteristics of the variable.
 

|                            |               |
|----------------------------|---------------|
| a) Data mining             | b) Statistics |
| c) Artificial Intelligence | d) All        |
- 7) In Python \_\_\_\_\_ package offers all the functionality needed to create and manipulate matrices.
 

|          |            |
|----------|------------|
| a) scipy | b) numpy   |
| c) none  | d) sklearn |
- 8) \_\_\_\_\_ ways improves machine learning model.
 

|                       |                           |
|-----------------------|---------------------------|
| a) error curve method | b) testing multiple model |
| c) SDLC Model         | d) none                   |

- 9) \_\_\_\_\_ Technique is used to group similar types of objects with similar parameter.
- a) Bayesian
  - b) Clustering
  - c) Association

**MCQ/Objective Type Questions**

Duration: 30 Minutes

Marks: 14

**Q.1 Choose the correct alternatives from the options.**

**14**

- 1) Among the following, choose the correct application of data science in Healthcare.
  - a) Data science for genomics
  - b) Data science for medical imaging
  - c) Drug discovery with Data science
  - d) All of the above
- 2) What is the first step in linear algebra?
  - a) Let's complicate the problem
  - b) Solve the problem
  - c) Visualize the problem
  - d) None of the above
- 3) The concept of Eigen values and vectors is applicable to \_\_\_\_\_.
  - a) Scalar matrix
  - b) Identity matrix
  - c) Upper triangular matrix
  - d) Square matrix
- 4) Simpson's rule assumes that boundary between the ordinates are parabolic arcs.
  - a) True
  - b) False
- 5) Find the mode and median of the 9 consecutive number: 12, 7, 8, 14, 21, 23, 27, 7, 11
  - a) 12, 9
  - b) 7, 9
  - c) 7, 12
  - d) 11, 9
- 6) Which of the following is correct application for Eigenvectors?
  - a) Computer vision
  - b) Physics
  - c) Machine learning
  - d) All of the above
- 7) The correlation coefficient is \_\_\_\_\_.
  - a) The square of the coefficient of determination
  - b) Can never be negative
  - c) The square root of the coefficient of determination
  - d) The same as r square

- 8) Normal Distribution is applied for \_\_\_\_\_.  
a) Continuous Random Distribution  
b) Discrete Random Variable  
c) Irregular Random Variable  
d) Uncertain Random Variable
- 9) What does the central limit theorem state?  
a) if the sample size increases sampling distribution must approach normal distribution  
b) if the sample size decreases then the sample distribution must approach normal distribution  
c) if the sample size increases then the sampling distribution much approach an exponential distribution  
d) if the sample size decreases then the sampling distribution much approach an exponential distribution
- 10) The probability of rejecting a true hypothesis is called \_\_\_\_\_.  
a) Critical region  
b) Level of significance  
c) Test statistics  
d) Statement of hypothesis
- 11) A statistic on the basis of which a decision is made about the hypothesis of interest is called \_\_\_\_\_.  
a) Test statistics  
b) Significance level  
c) Statement of hypothesis  
d) Critical region
- 12) The parameter E which we use for least square method is called as \_\_\_\_\_.  
a) Sum of residues  
b) Residues  
c) Error  
d) Sum of errors
- 13) \_\_\_\_\_ processes all the training examples for each iteration of gradient descent.  
a) Stochastic Gradient Descent  
b) Batch Gradient Descent  
c) Mini Batch gradient descent  
d) None of the above
- 14) What is the full form of KKT?  
a) Kret Kuhn Tacker  
b) Karush Kuhn Tucker  
c) Karush Kuhn Tacker  
d) None of these

**S. Y. (B.Tech.) (Sem - II) (New) (CBCS) Examination: Oct/Nov-2022**  
**COMPUTER SCIENCE & ENGINEERING**  
**Mathematics for Data Science**

Day &amp; Date: Tuesday, 14-03-2023

Max. Marks: 56

Time: 02:00 PM To 05:00 PM

- Instructions:** 1) All questions are compulsory.  
 2) Assume suitable data if necessary.  
 3) Figures to the right indicate full marks.

**Section – I**

- Q.2 Answer the following questions. (Any Three) 12**
- What is Data Science?
  - Consider the ages of five employees as 30, 30, 32, 38, 60 years. Calculate the measures of central tendency.
  - Explain the term hyper planes and half-planes.
  - What is central tendencies?
- Q.3 Answer the following questions. (Any Two) 16**
- Explain Data Science Life Cycle.
  - Explain in detail Distance measures types in data science.
  - What are Eigen values & Eigenvectors?

**Section – II**

- Q.4 Answer the following questions. (Any Three) 12**
- The mean age of people in a colony is 34 years. Suppose the standard deviation is 15 years. The sample of size is 50. Find the mean and standard deviation of the sample.
  - What Is Hypothesis Testing in Statistics?
  - What is KKT condition? Explain in short.
  - What is the Least Squares Method?
- Q.5 Answer the following questions. (Any Two) 16**
- A fair die is rolled, Let A be the event that shows an outcome is an odd number, so  $A = \{1, 3, 5\}$ . Also, suppose B the event that shows the outcome is less than or equal to 3, so  $B = \{1, 2, 3\}$ . Then what is the probability of A,  $P(A)$ , and what is the probability A given B,  $P(A | B)$ ?
  - Explain in detail Statistical Hypothesis Testing. What is P-value?
  - What is gradient descent? How does gradient descent work? Explain with its types.

Day & Date: Tuesday, 14-03-2023  
 Time: 02:00 PM To 05:00 PM

Max. Marks: 70

- Instructions:** 1) Q. No. 1 is compulsory. It should be solved in the first 30 minutes in Answer book. Page no. 03 (Starting page of the Answer Book). Each Question carries one mark.  
 2) Don't forget to Mention question paper set (P/Q/R/S) on top of page.  
 3) Figures to the right indicate full marks.

**MCQ/Objective Type Questions**

Duration: 30 Minutes

Marks: 14

**Q.1 Choose the correct alternatives from the options.**

**14**

- 1) Normal Distribution is applied for \_\_\_\_\_.  
 a) Continuous Random Distribution  
 b) Discrete Random Variable  
 c) Irregular Random Variable  
 d) Uncertain Random Variable
- 2) What does the central limit theorem state?  
 a) if the sample size increases sampling distribution must approach normal distribution  
 b) if the sample size decreases then the sample distribution must approach normal distribution  
 c) if the sample size increases then the sampling distribution much approach an exponential distribution  
 d) if the sample size decreases then the sampling distribution much approach an exponential distribution
- 3) The probability of rejecting a true hypothesis is called \_\_\_\_\_.  
 a) Critical region  
 b) Level of significance  
 c) Test statistics  
 d) Statement of hypothesis
- 4) A statistic on the basis of which a decision is made about the hypothesis of interest is called \_\_\_\_\_.  
 a) Test statistics  
 b) Significance level  
 c) Statement of hypothesis  
 d) Critical region
- 5) The parameter E which we use for least square method is called as \_\_\_\_\_.  
 a) Sum of residues  
 b) Residues  
 c) Error  
 d) Sum of errors
- 6) \_\_\_\_\_ processes all the training examples for each iteration of gradient descent.  
 a) Stochastic Gradient Descent  
 b) Batch Gradient Descent  
 c) Mini Batch gradient descent  
 d) None of the above

Marks: 14

14

- 1) A statistic on the basis of which a decision is made about the hypothesis of interest is called \_\_\_\_\_.  
a) Test statistics                      b) Significance level  
c) Statement of hypothesis          d) Critical region
- 2) The parameter E which we use for least square method is called as \_\_\_\_\_.  
a) Sum of residues                      b) Residues  
c) Error                                    d) Sum of errors
- 3) \_\_\_\_\_ processes all the training examples for each iteration of gradient descent.  
a) Stochastic Gradient Descent      b) Batch Gradient Descent  
c) Mini Batch gradient descent       d) None of the above
- 4) What is the full form of KKT?  
a) Kret Kuhn Tacker                      b) Karush Kuhn Tucker  
c) Karush Kuhn Tacker                  d) None of these
- 5) Among the following, choose the correct application of data science in Healthcare.  
a) Data science for genomics  
b) Data science for medical imaging  
c) Drug discovery with Data science  
d) All of the above
- 6) What is the first step in linear algebra?  
a) Let's complicate the problem      b) Solve the problem  
c) Visualize the problem                d) None of the above
- 7) The concept of Eigen values and vectors is applicable to \_\_\_\_\_.  
a) Scalar matrix                          b) Identity matrix  
c) Upper triangular matrix              d) Square matrix
- 8) Simpson's rule assumes that boundary between the ordinates are parabolic arcs.  
a) True                                        b) False

- 9) Find the mode and median of the 9 consecutive number:  
12, 7, 8, 14, 21, 23, 27, 7, 11
- |          |          |
|----------|----------|
| a) 12, 9 | b) 7, 9  |
| c) 7, 12 | d) 11, 9 |
- 10) Which of the following is correct application for Eigenvectors?
- |                     |                     |
|---------------------|---------------------|
| a) Computer vision  | b) Physics          |
| c) Machine learning | d) All of the above |
- 11) The correlation coefficient is \_\_\_\_\_
- a) The square of the coefficient of determination
  - b) Can never be negative
  - c) The square root of the coefficient of determination
  - d) The same as r square
- 12) Normal Distribution is applied for \_\_\_\_\_.
- a) Continuous Random Distribution
  - b) Discrete Random Variable
  - c) Irregular Random Variable
  - d) Uncertain Random Variable
- 13) What does the central limit theorem state?
- a) if the sample size increases sampling distribution must approach normal distribution
  - b) if the sample size decreases then the sample distribution must approach normal distribution
  - c) if the sample size increases then the sampling distribution much approach an exponential distribution
  - d) if the sample size decreases then the sampling distribution much approach an exponential distribution
- 14) The probability of rejecting a true hypothesis is called \_\_\_\_\_.
- |                    |                            |

Marks: 14

**Q.1 Choose the correct alternatives from the options.**

**14**

- 1) The \_\_\_\_\_ is the message after transformation.
  - a) Plaintext
  - b) Secret-text
  - c) Ciphertext
  - d) None of the above
- 2) The keys used in cryptography are \_\_\_\_\_.
  - a) Private Key
  - b) Public Key
  - c) Secret Key
  - d) All of the above
- 3) In symmetric-key cryptography, the key locks and unlocks the box is \_\_\_\_\_.
  - a) Shared
  - b) Same
  - c) Private
  - d) Public
- 4) In asymmetric key cryptography, the private key is kept by \_\_\_\_\_.
  - a) sender
  - b) receiver
  - c) sender and receiver
  - d) all the connected devices to the network
- 5) Caesar Cipher is an example of \_\_\_\_\_.
  - a) Poly-alphabetic Cipher
  - b) Mono-alphabetic Cipher
  - c) Multi-alphabetic Cipher
  - d) Bi-alphabetic Cipher
- 6) The DES algorithm has a key length of \_\_\_\_\_.
  - a) 128 Bits
  - b) 32 Bits
  - c) 64 Bits
  - d) 16 Bits
- 7) AES stands for Advanced Encryption Standard.
  - a) True
  - b) False
- 8) RSA algorithm is \_\_\_\_\_ cryptography algorithm.
  - a) Systematic
  - b) Symmetric
  - c) Asymmetric
  - d) None of the mentioned above
- 9) Which of the following modes of operation in DES is used for operating?
  - a) Cipher Feedback Mode (CFB)
  - b) Cipher Block chaining (CBC)
  - c) Electronic code book (ECB)
  - d) Output Feedback Modes (OFB)

- 10) Which of the following is /are offered by the Hash functions?
  - a) Authentication
  - b) Non repudiation
  - c) Data Integrity
  - d) All of the above
- 11) A cryptographic hash function is an equation used to verify the \_\_\_\_\_ of data.
  - a) Variety
  - b) Validity
  - c) Veracity
  - d) None of the mentioned above
- 12) MAC is a \_\_\_\_\_.
  - a) one-to-one mapping
  - b) many-to-one mapping
  - c) onto mapping
  - d) None of the mentioned
- 13) What are the common security threats?
  - a) File Shredding
  - b) File sharing and permission
  - c) File corrupting
  - d) File integrity
- 14) A cryptosystem is also termed as \_\_\_\_\_.
  - a) secure system

**Cryptography**

Day & Date: Tuesday, 14-03-2023  
 Time: 02:00 PM To 05:00 PM

Max. Marks: 70

- Instructions:** 1) Q. No. 1 is compulsory. It should be solved in the first 30 minutes in Answer book. Page no 03 (Starting page of the Answer Book). Each Question carries one mark.  
 2) Don't forget to Mention question paper set (P/Q/R/S) on top of page.  
 3) Figures to the right indicate full marks

**MCQ/Objective Type Questions**

Duration: 30 Minutes

Marks: 14

**Q.1 Choose the correct alternatives from the options.**

**14**

- 1) A cryptographic hash function is an equation used to verify the \_\_\_\_\_ of data.
  - a) Variety
  - b) Validity
  - c) Veracity
  - d) None of the mentioned above
- 2) MAC is a \_\_\_\_\_.
  - a) one-to-one mapping
  - b) many-to-one mapping
  - c) onto mapping
  - d) None of the mentioned
- 3) What are the common security threats?
  - a) File Shredding
  - b) File sharing and permission
  - c) File corrupting
  - d) File integrity
- 4) A cryptosystem is also termed as \_\_\_\_\_.
  - a) secure system
  - b) cipher system
  - c) cipher-text
  - d) secure algorithm
- 5) The \_\_\_\_\_ is the message after transformation.
  - a) Plaintext
  - b) Secret-text
  - c) Ciphertext
  - d) None of the above
- 6) The keys used in cryptography are \_\_\_\_\_.
  - a) Private Key
  - b) Public Key
  - c) Secret Key
  - d) All of the above
- 7) In symmetric-key cryptography, the key locks and unlocks the box is \_\_\_\_\_.
  - a) Shared
  - b) Same
  - c) Private
  - d) Public
- 8) In asymmetric key cryptography, the private key is kept by \_\_\_\_\_.
  - a) sender
  - b) receiver
  - c) sender and receiver
  - d) all the connected devices to the network
- 9) Caesar Cipher is an example of \_\_\_\_\_.
  - a) Poly-alphabetic Cipher
  - b) Mono-alphabetic Cipher
  - c) Multi-alphabetic Cipher
  - d) Bi-alphabetic Cipher

- 10) The DES algorithm has a key length of \_\_\_\_\_.
  - a) 128 Bits
  - b) 32 Bits
  - c) 64 Bits
  - d) 16 Bits
- 11) AES stands for Advanced Encryption Standard.
  - a) True
  - b) False
- 12) RSA algorithm is \_\_\_\_\_ cryptography algorithm.
  - a) Systematic
  - b) Symmetric
  - c) Asymmetric
  - d) None of the mentioned above
- 13) Which of the following modes of operation in DES is used for operating?
  - a) Cipher Feedback Mode (CFB)
  - b) Cipher Block chaining (CBC)
  - c) Electronic code book (ECB)
  - d) Output Feedback Modes (OFB)
- 14) Which of the following is /are offered by the Hash functions?
  - a) Authentication
  - b) Non repudiation
  - c) Data Integrity
  - d) All of the above

**S. Y. (B.Tech.) (Sem - II) (New) (CBCS) Examination: Oct/Nov-2022**  
**COMPUTER SCIENCE & ENGINEERING**  
**Cryptography**

Day &amp; Date: Tuesday, 14-03-2023

Max. Marks: 56

Time: 02:00 PM To 05:00 PM

- Instructions:** 1) All questions are compulsory.  
 2) Assume suitable data if necessary.  
 3) Figures to the right indicate full marks.

**Section – I**

- Q.2 Answer the following questions. (Any Four) 16**
- Explain the model of network security with diagram.
  - Explain in detail security attacks.
  - Explain Caesar cipher with example.
  - What is difference between monoalphabetic cipher and polyalphabetic cipher?
  - Explain block cipher and stream cipher with diagram.
- Q.3 Answer the following questions. (Any Two) 12**
- Explain the working of DES with diagram.
  - Explain Security services in details.
  - Explain in detail symmetric cipher model with diagram.

**Section – II**

- Q.4 Answer the following questions. (Any Four) 16**
- Write application of public key cryptosystem.
  - Explain encryption with public key with diagram.
  - Write hash functions based on using a cipher block chaining technique.
  - Explain Kerberos in details.
  - Write a note on Simplified Depiction of Essential Elements of Digital Signature Process.
- Q.5 Answer the following questions. (Any Two) 12**
- What is MAC? Explain three basic uses of Message authentication code.
  - Explain PIV System Model with diagram.
  - Explain Man-in-the-Middle Attack.

### MCQ/Objective Type Questions

Duration: 30 Minutes

Marks: 14

**Q.1 Choose the correct alternatives from the options.**

14

- 1) The DES algorithm has a key length of \_\_\_\_\_.  
a) 128 Bits                                      b) 32 Bits  
c) 64 Bits                                        d) 16 Bits
- 2) AES stands for Advanced Encryption Standard.  
a) True                                              b) False
- 3) RSA algorithm is \_\_\_\_\_ cryptography algorithm.  
a) Systematic                                      b) Symmetric  
c) Asymmetric                                    d) None of the mentioned above
- 4) Which of the following modes of operation in DES is used for operating?  
a) Cipher Feedback Mode (CFB)  
b) Cipher Block chaining (CBC)  
c) Electronic code book (ECB)  
d) Output Feedback Modes (OFB)
- 5) Which of the following is /are offered by the Hash functions?  
a) Authentication                                  b) Non repudiation  
c) Data Integrity                                   d) All of the above
- 6) A cryptographic hash function is an equation used to verify the \_\_\_\_\_ of data.  
a) Variety                                            b) Validity  
c) Veracity                                          d) None of the mentioned above
- 7) MAC is a \_\_\_\_\_.  
a) one-to-one mapping                              b) many-to-one mapping  
c) onto mapping                                      d) None of the mentioned
- 8) What are the common security threats?  
a) File Shredding                                   b) File sharing and permission  
c) File corrupting                                   d) File integrity

- 9) A cryptosystem is also termed as \_\_\_\_\_.  
a) secure system                      b) cipher system  
c) cipher-text                         d) secure algorithm
- 10) The \_\_\_\_\_ is the message after transformation.  
a) Plaintext                            b) Secret-text  
c) Ciphertext                          d) None of the above
- 11) The keys used in cryptography are \_\_\_\_\_.  
a) Private Key                         b) Public Key  
c) Secret Key                          d) All of the above
- 12) In symmetric-key cryptography, the key locks and unlocks the box is \_\_\_\_\_.  
a) Shared                                b) Same  
c) Private                                d) Public
- 13) In asymmetric key cryptography, the private key is kept by \_\_\_\_\_.  
a) sender  
b) receiver  
c) sender and receiver  
d) all the connected devices to the network
- 14) Caesar Cipher is an example of \_\_\_\_\_.  
a) Poly-alphabetic Cipher            b) Mono-alphabetic Cipher  
c) Multi-alphabetic Cipher          d) Bi-alphabetic Cipher

Marks: 14

14

- Page 1 of 16

- 9) The push down automata indicate the acceptance of input string in terms of \_\_\_\_\_.  
a) Final state  
b) Empty stack  
c) Both (a) and (b)  
d) None of these
- 10) Which type of symbols contain in the stack of PDA?  
a) Variable  
b) Terminal  
c) Both (a) and (b)  
d) None of these
- 11) Inability of FA is \_\_\_\_\_.  
a) Writing  
b) Finite memory  
c) Sequential memory  
d) all a, b, and c
- 12) The symbol  $Z_0$  in formal definition of PDA is used for \_\_\_\_\_.  
a) Stack symbol  
b) Input symbol  
c) Both (a) and (b)  
d) None of these
- 13) A grammar  $G = (V, T, P, S)$  is \_\_\_\_\_ if every production taken one of the two forms:  
 $B \rightarrow aC$   
 $B \rightarrow a$   
a) Ambiguous  
b) Regular  
c) Non Regular  
d) None of the mentioned
- 14) Which of the following strings is not generated by the following grammar?  
 $S \rightarrow SaSbS|e$   
a) aabb  
b) abab  
c) aababb  
d) aaabb

Day & Date: Monday, 06-03-2023  
 Time: 02:00 PM To 05:00 PM

Max. Marks: 56

**Instructions:** 1) All questions are compulsory.  
 2) Figures to the right indicates full marks.

**Section – I**

**Q.2 Solve any three**

**12**

a) Identify the set of strings accepted by given following DFA.

b) Construct regular expression corresponding to each of the following subset of  $\{0, 1\}^*$

- The language of all strings containing exactly two 0's
- The language C identifiers.

c) Associate given M1 and M2 be the FAs are pictured for L1, L2 resp. to represent a machine accepting following language  $L1 \cup L2$ ,  $L1 - L2$

d) Write a context free grammar equivalent for  $(011+1)^*(01)^*$

**Q.3 Solve any One**

**08**

a) Convert the following grammar into Chomsky normal form

$S \rightarrow AACD$

$A \rightarrow aAb|^{\wedge}$

$C \rightarrow aC|a$

$D \rightarrow aDa|bDb|^{\wedge}$

b) Check whether following string is accepted by given NFA-<sup>^</sup>

- 1) aa
- 2) bab
- 3) ab
- 4) abab

Q.4 Draw NFA-<sup>^</sup> for the following Regular expression

$$a^*b^*+(ba)^*$$

08

### Section – II

Q.5 Solve any three

12

- a) State and explain pumping lemma for CFL.
- b) What is PDA? Explain with an example.
- c) Obtain a TM to accept the language  
 $L = \{w | w \leftarrow (0 + 1)^* \text{ containing substring } 001\}$
- d) Show that  $L = \{a^n b^n | n \geq 1\}$  is not regular.

Q.6 Solve any One

08

- a) Obtain a PDA to accept the language  
 $L(M) = \{w | w \leftarrow (a + b)^* \text{ and } n_a(w) = n_b(w)\}$  by final state
- b) Explain Different types of variation in TM.

Q.7 State and explain the block diagram of TM and construct a TM to accept the language.

08

$$L(M) = \{a^n b^n c^n | n \geq 1\}$$

No.**

Max. Marks: 70

Marks: 14

14

- Page 5 of 16

- 9) The language  $L = \{ a^n b^n a^n : n \geq 1 \}$  is recognized by \_\_\_\_\_.
  - a) TM
  - b) 2PDA
  - c) Post Machine
  - d) All of the above
- 10) The set of all strings over the alphabet  $S = \{a, b\}$  (including  $\epsilon$ ) is denoted by \_\_\_\_\_.
  - a)  $(a + b)^*$
  - b)  $(a + b) +$
  - c)  $a + b +$
  - d)  $a^* b^*$
- 11) UTM influenced the concept of \_\_\_\_\_.
  - a) Computability
  - b) Interpretive implementation of programming language
  - c) Program and data is in same memory
  - d) All of above
- 12) The entity which generate Language is termed as:
  - a) Automata
  - b) Tokens
  - c) Grammar
  - d) Data
- 13) There are \_\_\_\_\_ tuples in finite state machine.
  - a) 4
  - b) 5
  - c) 6
  - d) unlimited
- 14) PDA can be represented with the help of \_\_\_\_\_.
  - a) Instantaneous description
  - b) Transition diagram
  - c) Transition table
  - d) All of these

Set **S**

**S.Y. (B.Tech) (Sem – II) (Old) (CBSE) Examination: Oct/Nov-2022**  
**COMPUTER SCIENCE & ENGINEERING**  
**Theory of Computation**

Day & Date: Monday, 06-03-2023  
 Time: 02:00 PM To 05:00 PM

Max. Marks: 56

**Instructions:** 1) All questions are compulsory.  
 2) Figures to the right indicates full marks.

**Section – I**

**Q.2 Solve any three**

**12**

a) Identify the set of strings accepted by given following DFA.

b) Construct regular expression corresponding to each of the following subset of  $\{0, 1\}^*$

- The language of all strings containing exactly two 0's
- The language C identifiers.

c) Associate given M1 and M2 be the FAs are pictured for L1, L2 resp. to represent a machine accepting following language  $L1 \cup L2$ ,  $L1 - L2$

d) Write a context free grammar equivalent for  $(011+1)^*(01)^*$

**Q.3 Solve any One**

**08**

a) Convert the following grammar into Chomsky normal form

$S \rightarrow AACD$

$A \rightarrow aAb|^{\wedge}$

$C \rightarrow aC|a$

$D \rightarrow aDa|bDb|^{\wedge}$

b) Check whether following string is accepted by given NFA-<sup>^</sup>

- 1) aa
- 2) bab
- 3) ab
- 4) abab

Q.4 Draw NFA-<sup>^</sup> for the following Regular expression

$$a^*b^*(ba)^*$$

08

### Section – II

Q.5 Solve any three

12

- a) State and explain pumping lemma for CFL.
- b) What is PDA? Explain with an example.
- c) Obtain a TM to accept the language  
 $L = \{w | w \leftarrow (0 + 1)^* \text{ containing substring } 001\}$
- d) Show that  $L = \{a^n b^n | n \geq 1\}$  is not regular.

Q.6 Solve any One

08

- a) Obtain a PDA to accept the language  
 $L(M) = \{w | w \leftarrow (a + b)^* \text{ and } n_a(w) = n_b(w)\}$  by final state
- b) Explain Different types of variation in TM.

Q.7 State and explain the block diagram of TM and construct a TM to accept the language.

08

$$L(M) = \{a^n b^n c^n | n \geq 1\}$$

**S.Y. (B.Tech) (Sem - II) (Old) (CBCS) Examination: Oct/Nov-2022**  
**COMPUTER SCIENCE & ENGINEERING**  
**Microprocessors**

Day & Date: Wednesday, 08-03-2023  
 Time: 02:00 PM To 05:00 PM

Max. Marks: 70

- Instructions:** 1) Q. No. 1 is compulsory. It should be solved in the first 30 minutes in answer book. Page no 03 (Starting page of the Answer Book). Each question carries one mark.  
 2) Don't forget to Mention question paper set (P/Q/R/S) on top of page.  
 3) Figures to the right indicates full marks  
 4) Assume suitable data wherever needed and mention it clearly.

**MCQ/Objective Type Questions**

Duration: 30 Minutes

Marks: 14

**Q.1 Choose the correct alternatives from the options.**

**14**

- 1) In 8085, 16-bit address bus, which can address up to?
  - a) 16KB
  - b) 32KB
  - c) 64KB
  - d) 128KB
- 2) The instruction format 'register to register' has a length of \_\_\_\_\_.
  - a) 2 bytes
  - b) 1 byte
  - c) 3 bytes
  - d) 4 bytes
- 3) The instruction that subtracts 1 from the contents of the specified register/memory location is \_\_\_\_\_.
  - a) INC
  - b) SUBB
  - c) SUB
  - d) DEC
- 4) Which are the part of architecture of 8086?
  - a) The bus interface unit
  - b) The execution unit
  - c) Both a and b
  - d) None of these
- 5) The instruction, CMP to compare source and destination operands it performs \_\_\_\_\_.
  - a) addition
  - b) subtraction
  - c) division
  - d) multiplication
- 6) The directive that marks the end of a logical segment is \_\_\_\_\_.
  - a) ENDS
  - b) END
  - c) ENDS & END
  - d) None of the mentioned
- 7) The ROR instruction rotates the contents of the destination operand to \_\_\_\_\_.
  - a) left
  - b) right
  - c) left and then right
  - d) right and then left
- 8) NMI stands for \_\_\_\_\_.
  - a) nonmaskable interrupt
  - b) nonmultiple interrupt
  - c) nonmovable interrupt
  - d) none of the mentioned

- 9) The Programmable interrupt controller is required to \_\_\_\_\_
  - a) handle one interrupt request
  - b) handle one or more interrupt requests at a time
  - c) handle one or more interrupt requests with a delay
  - d) handle no interrupt request
- 10) How many channels are there in DMA controller?
  - a) 2
  - b) 3
  - c) 4
  - d) 5
- 11) The port that is used for the generation of handshake lines in mode 1 or mode 2 is \_\_\_\_\_
  - a) port A
  - b) port B
  - c) port C Lower
  - d) port C Upper
- 12) In BSR mode, only port C can be used to \_\_\_\_\_
  - a) set individual ports
  - b) reset individual ports
  - c) set and reset individual ports
  - d) programmable I/O ports
- 13) In 8087 Invalid operation is the exception generated due to \_\_\_\_\_
  - a) stack overflow
  - b) stack underflow
  - c) indeterminate form as result
  - d) all of the mentioned
- 14) The unit that is responsible for calculating the address of instructions, and data that the CPU wants to access is \_\_\_\_\_
  - a) bus unit
  - b) address unit
  - c) instruction unit
  - d) control unit

- Instructions:** 1) All questions are compulsory.  
2) Figures to the right indicate full marks  
3) Assume suitable data wherever necessary and mention it clearly.

**Section – I**

- Q.2 Attempt any three.** **12**  
a) Define microprocessor and explain features of 8085.  
b) Explain flag registers of 8086.  
c) Differentiate between maximum mode and minimum mode of 8086.  
d) Explain Instruction Format with example.
- Q.3 Draw and explain Block diagram of 8085.** **08**
- Q.4 Define instruction and what are different instruction set(group), explain any three group in detail.** **08**

**OR**

Explain programming model of 8085 in detail.

**Section – II**

- Q.5 Attempt any three.** **12**  
a) Define interrupt. What are different types of interrupt?  
b) What is need of DMA explain in brief?  
c) Define handshake and explain its use.  
d) Write and explain any four-instruction used with 8087.
- Q.6 Draw and explain Block diagram of 8259.** **08**
- Q.7 Explain mode 1 as input mode and as output mode of operation of 8255.** **08**

**OR**

Compare between 8086 and 80286.

- a) in order
  - b) pre order
  - c) post order
  - d) none of these
- 10) Number of nodes in complete binary tree in level 4 \_\_\_\_\_.
- a) 31
  - b) 32
  - c) 16
  - d) 15
- 11) What is an AVL tree?
- a) a tree which is balanced and is a height balanced tree
  - b) a tree which is unbalanced and is a height balanced tree
  - c) a tree with three children
  - d) a tree with atmost 3 children
- 12) If the partially constructed AVL tree having three nodes is left skewed, then \_\_\_\_\_ rotation is applicable to make it balanced
- a) LL
  - b) LR
  - c) RL
  - d) RR
- 13) In a simple graph, the number of edges is equal to twice the sum of the degrees of the vertices.
- a) True
  - b) False
- 14) Graphs are represented using \_\_\_\_\_.
- a) Adjacency tree
  - b) Adjacency linked list
  - c) Adjacency graph
  - d) Adjacency queue

**S.Y. (B.Tech.) (Sem-II) (Old) (CBCS) Examination: Oct/Nov - 2022**  
**COMPUTER SCIENCE & ENGINEERING**  
**Data Structures**

Day & Date: Thursday, 09-03-2023  
 Time: 02:00 PM To 05:00 PM

Max. Marks: 56

- Instructions:** 1) All question are compulsory.  
 2) Figures to the right indicate full marks.  
 3) Assume suitable data wherever necessary.

**Section – I**

**Q.2 Attempt any four.** **16**

- Define data structure. Explain its types along with example.
- Write a program for Evaluation of postfix expression.
- Define stack. What are the operations of stack & its application?
- Construct a Binary tree with following given orders.  
 Preorder= ABDGHEICFJK  
 InOrder= GDHBEIACJFK
- Write C code for insertion of Node at the beginning of Singly Linked List.

**Q.3 Attempt any two.** **12**

- Explain with example subtraction of polynomial using linked list.
- Write menu driven C code to implement Linear Queue using array.
- Write a program to implement Stack using Linked List.

**Section - II**

**Q.4 Attempt any four.** **16**

- Give a brief summary of M-way search tree.
- Compare B tree with B+ Tree
- Write a note on Rotation types in AVL trees.
- Explain how graph is represented with Adjacency Matrix.
- Explain the procedure to delete a node from AVL tree.

**Q.5 Answer any two.** **12**

- Create a AVL tree for following values in given order.  
 63,9,19,27,18,108,99,81.
- Explain B+ Trees with example.
- Explain Dijkstra's algorithm to find shortest path.

Day & Date: Thursday, 09-03-2023  
 Time: 02:00 PM To 05:00 PM

Max. Marks: 70

**Instructions:** 1) Q. No. 1 is compulsory and should be solved in first 30 minutes in Answer Book. Page No.3 (starting page of the Answer Book). Each question carry one mark.  
 2) Don't forget to mention Question Paper Set (P/Q/R/S) at the top of the same page.

**MCQ/Objective Type Questions**

Duration: 30 Minutes

Marks: 14

**Q.1 Choose the correct alternatives from the options.**

**14**

- 1) Which of the following is the most widely used external memory data structure?
  - a) AVL tree
  - b) B-tree
  - c) Red-black tree
  - d) Both AVL tree and Red-black tree
- 2) In \_\_\_\_\_ traversal root is present the last
  - a) in order
  - b) pre order
  - c) post order
  - d) none of these
- 3) Number of nodes in complete binary tree in level 4 \_\_\_\_\_.
  - a) 31
  - b) 32
  - c) 16
  - d) 15
- 4) What is an AVL tree?
  - a) a tree which is balanced and is a height balanced tree
  - b) a tree which is unbalanced and is a height balanced tree
  - c) a tree with three children
  - d) a tree with atmost 3 children
- 5) If the partially constructed AVL tree having three nodes is left skewed, then \_\_\_\_\_ rotation is applicable to make it balanced
  - a) LL
  - b) LR
  - c) RL
  - d) RR
- 6) In a simple graph, the number of edges is equal to twice the sum of the degrees of the vertices.
  - a) True
  - b) False
- 7) Graphs are represented using \_\_\_\_\_.
  - a) Adjacency tree
  - b) Adjacency linked list
  - c) Adjacency graph
  - d) Adjacency queue

- 8) Process of inserting an element in stack is called \_\_\_\_\_.
  - a) Create
  - b) Push
  - c) Evaluation
  - d) Pop
- 9) Which of the following is non-linear data structure?
  - a) Trees
  - b) Stacks
  - c) Array
  - d) Linked List
- 10) Circular Queue is also known as \_\_\_\_\_.
  - a) Ring Buffer
  - b) Square Buffer
  - c) Rectangle Buffer
  - d) Curve Buffer
- 11) With what data structure can a priority queue be implemented?
  - a) Array
  - b) List
  - c) Heap
  - d) Tree
- 12) What is the space complexity for deleting a linked list?
  - a)  $O(1)$
  - b)  $O(n)$
  - c) Either  $O(1)$  or  $O(n)$
  - d)  $O(\log n)$
- 13) The concatenation of two lists can be performed in  $O(1)$  time. Which of the following variation of the linked list can be used?
  - a) Singly linked list
  - b) Doubly linked list
  - c) Circular doubly linked list
  - d) Array implementation of list
- 14) Which of the following c code is used to create new node?
  - a) `ptr = (NODE*)malloc(sizeof(NODE));`
  - b) `ptr = (NODE*)malloc(NODE);`
  - c) `ptr = (NODE*)malloc(sizeof(NODE*));`
  - d) `ptr = (NODE)malloc(sizeof(NODE));`

### MCQ/Objective Type Questions

Duration: 30 Minutes

Marks: 14

**Q.1 Choose the correct alternatives from the options.**

14

- 1) A best-effort delivery service such as IPv4 includes \_\_\_\_\_.
  - a) error checking
  - b) error correction
  - c) datagram acknowledgment
  - d) none of the above
- 2) A multicast message is sent from \_\_\_\_\_ to \_\_\_\_\_.
  - a) one source; one destination
  - b) one source; multiple destinations
  - c) multiple sources; one destination
  - d) none of the above
- 3) \_\_\_\_\_ is a process-to-process protocol that adds only port addresses, checksum error control, and length information to the data from the upper layer.
  - a) IP
  - b) TCP
  - c) UDP
  - d) The slowest transmission speed are those of
- 4) To accomplish flow control, TCP uses a \_\_\_\_\_ window protocol.
  - a) limited size
  - b) sliding
  - c) fixed-size
  - d) none of the above
- 5) The bytes of data being transferred in each connection are numbered by TCP. The numbering starts with a \_\_\_\_\_.
  - a) 0
  - b) 1
  - c) randomly generated number
  - d) none of the above
- 6) \_\_\_\_\_ server can process multiple requests at a time.
  - a) An iterative
  - b) A concurrent
  - c) A concurrent or an iterative
  - d) None of the choices
- 7) A full domain name is a sequence of labels separated by \_\_\_\_\_.
  - a) semicolons
  - b) dots
  - c) colons
  - d) none of the above

P

**S. Y. (B.Tech.) (Sem - II) (Old) (CBCS) Examination: Oct/Nov-2022**  
**COMPUTER SCIENCE & ENGINEERING**  
**Computer Networks**

Day &amp; Date: Friday, 10-03-2023

Max. Marks: 56

Time: 02:00 PM To 05:00 PM

**Instructions:** 1) All questions are compulsory.  
 2) Figures to the right indicate full marks.

**Section – I**

**Q.2 Answer the following questions. (Any Four) 16**

- Explain Port address and Application specific address with examples.
- Explain classful addressing.
- Write a short note on Persistence Timer.
- Explain SCTP Packet format.
- Shortly describe with diagram the concept of multihoming service offered.

**Q.3 Answer the following questions. (Any One) 06**

- Explain the following system calls with their syntax:
  - socket ()
  - bind ()
  - connect ()
- Explain the steps to implement connection-oriented concurrent client-server.

**Q.4 Explain UDP Package with neat diagram. 06**

**Section – II**

**Q.5 Answer the following questions. (Any Four) 16**

- Explain BOOTP packet format.
- What is SSH? Explain the port forwarding service of SSH.
- Explain connections establishment and termination in TFTP.
- Explain the concept of NVT. Also explain NVT Character set.
- Explain DNS Message format.

**Q.6 Answer the following questions. (Any One) 06**

- Explain the terms used in DNS: Flat Name Space, Hierarchical Name Space, Zone, FQDN and PQDN.
- Draw the diagram of SSH packet format and briefly describe it's fields.

**Q.7 What is TFTP? List the names of five types of TFTP messages, draw and briefly describe TFTP ACK message format. 06**

**MCQ/Objective Type Questions**

Duration: 30 Minutes

Marks: 14

**Q.1 Choose the correct alternatives from the options.**

**14**

- 1) DNS can use the services of \_\_\_\_\_ using the well-known port 53.
  - a) UDP
  - b) TCP
  - c) either (a) or (b)
  - d) none of the above
- 2) When the secondary downloads information from the primary, it is called \_\_\_\_\_ transfer.
  - a) domain
  - b) zone
  - c) label
  - d) none of the above
- 3) When the sender is connected to the mail server via a LAN or a WAN, we need \_\_\_\_\_.
  - a) two MTA
  - b) two UAs and two pairs of MTAs
  - c) two UAs and a pair of MTAs
  - d) none of the above
- 4) NVT uses two sets of characters, one for \_\_\_\_\_ and one for \_\_\_\_\_.
  - a) sending; receiving
  - b) request; reply
  - c) data; control
  - d) none of the above
- 5) In the \_\_\_\_\_ mode, each character typed is sent by the client to the server.
  - a) default
  - b) character
  - c) line
  - d) none of the above
- 6) TELNET uses only one TCP connection. The server uses \_\_\_\_\_ port and the client uses \_\_\_\_\_ port.
  - a) a well-known; another well-known
  - b) an ephemeral; another ephemeral
  - c) a well-known; an ephemeral
  - d) none of the above

- 7) \_\_\_\_\_ is more powerful and complex than \_\_\_\_\_.
  - a) POP3; IMAP4
  - b) IMAP4; POP3
  - c) SMTP; POP3
  - d) none of the above
- 8) A best-effort delivery service such as IPv4 includes \_\_\_\_\_.
  - a) error checking
  - b) error correction
  - c) datagram acknowledgment
  - d) none of the above
- 9) A multicast message is sent from \_\_\_\_\_ to \_\_\_\_\_.
  - a) one source; one destination
  - b) one source; multiple destinations
  - c) multiple sources; one destination
  - d) none of the above
- 10) \_\_\_\_\_ is a process-to-process protocol that adds only port addresses, checksum error control, and length information to the data from the upper layer.
  - a) IP
  - b) TCP
  - c) UDP
  - d) The slowest transmission speed are those of
- 11) To accomplish flow control, TCP uses a \_\_\_\_\_ window protocol.
  - a) limited size
  - b) sliding
  - c) fixed-size
  - d) none of the above
- 12) The bytes of data being transferred in each connection are numbered by TCP. The numbering starts with a \_\_\_\_\_.
  - a) 0
  - b) 1
  - c) randomly generated number
  - d) none of the above
- 13) \_\_\_\_\_ server can process multiple requests at a time.
  - a) An iterative
  - b) A concurrent
  - c) A concurrent or an iterative
  - d) None of the choices
- 14) A full domain name is a sequence of labels separated by \_\_\_\_\_.
  - a) semicolons
  - b) dots
  - c) colons
  - d) none of the above

**S. Y. (B.Tech.) (Sem - II) (Old) (CBCS) Examination: Oct/Nov-2022**  
**COMPUTER SCIENCE & ENGINEERING**  
**Computer Networks**

Day &amp; Date: Friday, 10-03-2023

Max. Marks: 56

Time: 02:00 PM To 05:00 PM

**Instructions:** 1) All questions are compulsory.  
 2) Figures to the right indicate full marks.

**Section – I****Q.2 Answer the following questions. (Any Four) 16**

- a) Explain Port address and Application specific address with examples.
- b) Explain classful addressing.
- c) Write a short note on Persistence Timer.
- d) Explain SCTP Packet format.
- e) Shortly describe with diagram the concept of multihoming service offered.

**Q.3 Answer the following questions. (Any One) 06**

- a) Explain the following system calls with their syntax:
  - i) socket ()
  - ii) bind ()
  - iii) connect ()
- b) Explain the steps to implement connection-oriented concurrent client-server.

**Q.4 Explain UDP Package with neat diagram. 06****Section – II****Q.5 Answer the following questions. (Any Four) 16**

- a) Explain BOOTP packet format.
- b) What is SSH? Explain the port forwarding service of SSH.
- c) Explain connections establishment and termination in TFTP.
- d) Explain the concept of NVT. Also explain NVT Character set.
- e) Explain DNS Message format.

**Q.6 Answer the following questions. (Any One) 06**

- a) Explain the terms used in DNS: Flat Name Space, Hierarchical Name Space, Zone, FQDN and PQDN.
- b) Draw the diagram of SSH packet format and briefly describe it's fields.

**Q.7 What is TFTP? List the names of five types of TFTP messages, draw and briefly describe TFTP ACK message format. 06**

Day & Date: Friday, 10-03-2023  
 Time: 02:00 PM To 05:00 PM

Max. Marks: 70

- Instructions:** 1) Q. No. 1 is compulsory. It should be solved in the first 30 minutes in answer book. Page no 03 (Starting page of the Answer Book). Each question carries one mark.  
 2) Don't forget to Mention question paper set (P/Q/R/S) on top of page.  
 3) Figures to the right indicates full marks  
 4) Assume suitable data wherever needed and mention it clearly.

**MCQ/Objective Type Questions**

Duration: 30 Minutes

Marks: 14

**Q.1 Choose the correct alternatives from the options.**

**14**

- 1) NVT uses two sets of characters, one for \_\_\_\_\_ and one for \_\_\_\_\_.  
 a) sending; receiving                      b) request; reply  
 c) data; control                              d) none of the above
- 2) In the \_\_\_\_\_ mode, each character typed is sent by the client to the server.  
 a) default                                      b) character  
 c) line                                          d) none of the above
- 3) TELNET uses only one TCP connection. The server uses \_\_\_\_\_ port and the client uses \_\_\_\_\_ port.  
 a) a well-known; another well-known  
 b) an ephemeral; another ephemeral  
 c) a well-known; an ephemeral  
 d) none of the above
- 4) \_\_\_\_\_ is more powerful and complex than \_\_\_\_\_.  
 a) POP3; IMAP4                              b) IMAP4; POP3  
 c) SMTP; POP3                                d) none of the above
- 5) A best-effort delivery service such as IPv4 includes \_\_\_\_\_.  
 a) error checking                              b) error correction  
 c) datagram acknowledgment            d) none of the above
- 6) A multicast message is sent from \_\_\_\_\_ to \_\_\_\_\_.  
 a) one source; one destination  
 b) one source; multiple destinations  
 c) multiple sources; one destination  
 d) none of the above
- 7) \_\_\_\_\_ is a process-to-process protocol that adds only port addresses, checksum error control, and length information to the data from the upper layer.  
 a) IP  
 b) TCP  
 c) UDP  
 d) The slowest transmission speed are those of

Duration: 30 Minutes

Marks: 14

**Q.1 Choose the correct alternatives from the options.**

**14**

- 1) \_\_\_\_\_ server can process multiple requests at a time.
 

|                                 |                        |
|---------------------------------|------------------------|
| a) An iterative                 | b) A concurrent        |
| c) A concurrent or an iterative | d) None of the choices |
- 2) A full domain name is a sequence of labels separated by \_\_\_\_\_.
 

|               |                      |
|---------------|----------------------|
| a) semicolons | b) dots              |
| c) colons     | d) none of the above |
- 3) DNS can use the services of \_\_\_\_\_ using the well-known port 53.
 

|                      |                      |
|----------------------|----------------------|
| a) UDP               | b) TCP               |
| c) either (a) or (b) | d) none of the above |
- 4) When the secondary downloads information from the primary, it is called \_\_\_\_\_ transfer.
 

|           |                      |
|-----------|----------------------|
| a) domain | b) zone              |
| c) label  | d) none of the above |
- 5) When the sender is connected to the mail server via a LAN or a WAN, we need \_\_\_\_\_.
 

|                               |                                  |
|-------------------------------|----------------------------------|
| a) two MTA                    | b) two UAs and two pairs of MTAs |
| c) two UAs and a pair of MTAs | d) none of the above             |
- 6) NVT uses two sets of characters, one for \_\_\_\_\_ and one for \_\_\_\_\_.
 

|                       |                      |
|-----------------------|----------------------|
| a) sending; receiving | b) request; reply    |
| c) data; control      | d) none of the above |
- 7) In the \_\_\_\_\_ mode, each character typed is sent by the client to the server.
 

|            |                      |
|------------|----------------------|
| a) default | b) character         |
| c) line    | d) none of the above |

- 8) TELNET uses only one TCP connection. The server uses \_\_\_\_\_ port and the client uses \_\_\_\_\_ port.
- a) a well-known; another well-known
  - b) an ephemeral; another ephemeral
  - c) a well-known; an ephemeral
  - d) none of the above
- 9) \_\_\_\_\_ is more powerful and complex than \_\_\_\_\_.
- a) POP3; IMAP4
  - b) IMAP4; POP3
  - c) SMTP; POP3
  - d) none of the above
- 10) A best-effort delivery service such as IPv4 includes \_\_\_\_\_.
- a) error checking
  - b) error correction
  - c) datagram acknowledgment
  - d) none of the above
- 11) A multicast message is sent from \_\_\_\_\_ to \_\_\_\_\_.
- a) one source; one destination
  - b) one source; multiple destinations
  - c) multiple sources; one destination
  - d) none of the above
- 12) \_\_\_\_\_ is a process-to-process protocol that adds only port addresses, checksum error control, and length information to the data from the upper layer.
- a) IP
  - b) TCP
  - c) UDP
  - d) The slowest transmission speed are those of
- 13) To accomplish flow control, TCP uses a \_\_\_\_\_ window protocol.
- a) limited size
  - b) sliding
  - c) fixed-size
  - d) none of the above
- 14) The bytes of data being transferred in each connection are numbered by TCP. The numbering starts with a \_\_\_\_\_.
- a) 0
  - b) 1
  - c) randomly generated number
  - d) none of the above

**MCQ/Objective Type Questions**

Duration: 30 Minutes

Marks: 14

**Q.1 Choose the correct alternatives from the options.**

**14**

- 1) The use of Romberg's method is \_\_\_\_\_.  
 a) To solve simultaneous linear equations  
 b) To find root of the equation  
 c) To evaluate definite integration  
 d) To find eigen values
- 2) As soon as a new value of a variable is found by iteration, it is used immediately in the next step, this method is called as \_\_\_\_\_.  
 a) Gauss-Jacobi's method                      b) Gauss-Seidal method  
 c) Gauss-Jordan method                      d) Gauss Elimination method
- 3) When Gauss Elimination method is used to solve set of equation  $AX = B$ , matrix  $A$  is transformed to \_\_\_\_\_.  
 a) Upper triangular matrix                      b) Diagonal matrix  
 c) Lower triangular matrix                      d) Identity matrix
- 4) The number of strips required in Weddel's rule is \_\_\_\_\_.  
 a) A Multiple of 6                                      b) A multiple of 10  
 c) A Multiple of 3                                      d) A multiple of 2
- 5) The order of convergence of Regulafalsi method for finding roots of equation  $(x) = 0$  is \_\_\_\_\_.  
 a) Second order                                      b) Cubic order  
 c) First order                                              d) Very slow
- 6) A root of the equation  $x - \cos x = 0$  lies between \_\_\_\_\_.  
 a) 1 and 2                                              b) 2 and 3  
 c) 0 and 1                                              d) -1 and 0
- 7) The Newton - Raphson method fails when \_\_\_\_\_.  
 a)  $f'(x)$  is negative                                      b)  $f'(x)$  is positive  
 c) Never fails                                              c)  $f'(x)$  is zero
- 8) The Multiplication of closed interval  $[-3,4]. [-3,5] =$  \_\_\_\_\_.  
 a)  $-15,20$                                               b)  $1\ 15, 1\ 20$   
 c)  $[20, -15]$                                               d)  $9,15$

- [illegible]

- a)  $(0,1)$   
c)  $(0,1]$
- b)  $[0,1]$   
d)  $[0,1)$

- Which of the following is true for fuzzy sets?
- a)  $\overline{A \cup B} = \bar{A} \cup \bar{B}$
- b)  $\overline{A \cap B} = \bar{A} \cup \bar{B}$
- c)  $\bar{\bar{A}} \subseteq A$
- d)  $A \subseteq \bar{\bar{A}}$

- |          |   |      |   |      |   |

**S.Y. (B.Tech.) (Sem - II) (Old) (CBCS) Examination: Oct/Nov-2022**  
**COMPUTER SCIENCE & ENGINEERING**  
**Applied Mathematics-II**

Day & Date: Tuesday, 14-03-2023  
 Time: 02:00 PM To 05:00 PM

Max. Marks: 56

**Instructions:** 1) All question are compulsory.  
 2) Figures to the right indicate full marks.

**Section – I**

**Q.2 Attempt any three.**

**09**

- Solve the system of equations by using Gauss-Jacobi method  
 $x - y + z = 1, -3x + 2y - 3z = -6, 2x - 5y + 4z = 5$
- Solve the system of equations by using Gauss-Jacobi method.  
 $8x - 3y + 2z = 20, 4x + 11y - z = 33, 6x + 3y + 12z = 35$
- Find a real root of the equation  $e^x = x^3 + \cos 25$  take  $x_0 = 4.5$  by Using Newton-Raphson method correct to 3 decimal places.
- Find positive root of the equation  $x \log_{10} x = 1.2$  by Using false-position method correct to 3 decimal places.
- Using power method find eigen values & corresponding eigen vectors  
 $A = \begin{bmatrix} 5 & 0 & 1 \\ 0 & -2 & 0 \\ 1 & 0 & 5 \end{bmatrix}$  take  $x_0 = [1, 0, 0]^T$  upto 5 iterations.

**Q.3 Attempt any three.**

**09**

- Solve the system of equation by using Gauss-Seidal method  
 $83x + 11y - 4z = 95, 7x + 52y + 13z = 104, 3x + 8y + 29z = 71$   
 (three iterations)
- Find the double root of the equation  $x^3 - x^2 - x + 1 = 0$  choosing  $x_0 = 0.8$  by using generalized Newton-Raphson method.
- Evaluate  $\int_0^{1/2} \int_0^{1/2} \frac{\sin xy}{1+xy} dx dy$  by using Simpson's rule  $h = k = 1/4$
- By using trapezoidal rule, evaluate  $\int_4^{5.2} \log_e x dx, n = 6$
- By using Weddell's rule find  $\int_0^{0.6} e^{-x^2} dx dy$  by taking  $n = 6$

**Q.4 Attempt any two**

- a) Apply factorization method to solve the equations.  
 $3x + 2y + 7z = 4$ ,  $2x + 3y + z = 5$ ,  $3x + 4y + z = 7$
- b) Perform two iterations of Newton-Raphson method of find a solution of the system.  $x^2 + xy = 6$ ,  $x^2 - y^2 = 3$  Take  $x_0 = y_0 = 1$
- c) Evaluate by using Romberg's method.  $I = \int_0^1 \frac{dx}{1+x^2}$  take  $h = 0.5, 0.25, 0.125$  respectively.

**Section – II****Q.5 Attempt any three**

09

- a) Let  $A, B$  be the fuzzy sets define on universal set  $X = \{-5, -4, -3, -2, -1, 0, 1, 2, 3\}$  as  
 $A = \frac{1}{-5} + \frac{0.75}{-4} + \frac{0.20}{-3} + \frac{0.8}{-2} + \frac{0.32}{-1} + \frac{0.28}{0} + \frac{0.9}{1} + \frac{0.65}{2} + \frac{1}{3}$   
 $B = \frac{0}{-5} + \frac{0.80}{-4} + \frac{0.20}{-3} + \frac{0.70}{-2} + \frac{0.20}{-1} + \frac{0.15}{0} + \frac{1}{1} + \frac{0.60}{2} + \frac{1}{3}$  find  $S(A, B)$ ,  $S(B, A)$
- b) Find Strong  $\alpha$ -cuts of the fuzzy set  $A$  defined by membership function.  

$$A(x) = \begin{cases} \frac{x-10}{20} & 10 \leq x \leq 30 \\ \frac{40-x}{10} & 30 < x \leq 40 \\ 0 & \text{otherwise} \end{cases} \quad \text{for } \alpha = 0, 0.3, 0.9$$
- c) Solve  $Max z = 3x_1 + 4x_2$  subject to constraints  
 $x_1 - x_2 \leq 1$   $-x_1 + x_2 \leq 2$   $x_1, x_2 \geq 0$
- d) Verify which of the following fuzzy sets are fuzzy number  
 i)  $A = 1/1 + \frac{0.5}{2} + \frac{0.6}{3} + \frac{0.7}{4} + \frac{0.8}{5}$   
 ii)  $B(x) = \log x, x \in [1, 2.72]$   
 iii) Customer relationship management
- e) Find  $f(A)$ , is  $A$  be a fuzzy set defined on universal set  
 $X = \{-3, -2, -1, 0, 1, 2, 3\}$  by the membership function  $A(x) = \frac{x+3}{10} \forall x \in X$  &  
 $f$  be a function defined on  $X$  as  $f(x) = 2x^2 + 10$

**Q.6 Attempt any three**

09

- a) Let  $A$  be a fuzzy set defined on universal set  $x = \{0, 1, 2, 3, 4, 5\}$  by the membership function  $A(x) = e^{-x} \forall x \in X$ . Then fuzzy cardinality of  $A$
- b) Let  $A, B$  be any two fuzzy sets defined on universal set  $X$  an  $\alpha, \beta \in [0, 1]$  then prove that  
 i)  ${}^\alpha(A \cap B) = {}^\alpha A \cap {}^\alpha B$   
 ii) If  $\alpha \leq \beta$  then  ${}^\beta A \subseteq {}^\alpha B$
- c) A building firm possesses four cranes each of which has a distance (km) from four different constructions sites as shown in table

|       | I   | II  | III | IV  |
|-------|-----|-----|-----|-----|
| $C_1$ | 90  | 75  | 75  | 80  |
| $C_2$ | 35  | 85  | 55  | 65  |
| $C_3$ | 125 | 95  | 90  | 105 |
| $C_4$ | 45  | 110 | 95  | 115 |

Place the cranes (one for each construction site) in such a way that the overall distance required for the transfer is as small as possible.

- d) Solve the fuzzy equation  $A + X = B$  where  $A, B$  are fuzzy numbers defined by membership functions.

$$A(x) = \begin{cases} \frac{x-9}{2} & 9 \leq x \leq 11 \\ \frac{14-x}{3} & 11 < x \leq 14 \\ 0 & \text{otherwise} \end{cases}$$

$$B(x) = \begin{cases} \frac{x-5}{9-x} & 5 \leq x \leq 6 \\ \frac{3}{3} & 6 < x \leq 9 \\ 0 & \text{otherwise} \end{cases}$$

- e) Let  $A$  be a fuzzy set defined on universal set  $[-1,1]$  by the membership function

$$A(x) = \begin{cases} x+1 & -1 \leq x \leq 0 \\ 1-x & 0 < x \leq 1 \end{cases}$$

- Find i) Boundary of  $A$   
ii) Core of  $A$

### Q.7 Attempt any two

10

- a) Max  $z = 4x_1 + 3x_2 + 6x_3$  subject to

$$2x_1 + 3x_2 + 2x_3 \leq 440$$

$$4x_1 + 3x_2 \leq 470$$

$$2x_1 + 5x_2 \leq 430 \quad x_1, x_2, x_3 \geq 0$$

- b) Let  $A, B$  the fuzzy number defined by the membership functions

$$A(x) = \begin{cases} \frac{x-1}{4} & 1 \leq x \leq 15 \\ 6-x & 5 \leq x \leq 6 \\ 0 & \text{otherwise} \end{cases}$$

$$B(x) = \begin{cases} \frac{x-6}{4} & 6 \leq x \leq 10 \\ 11-x & 10 < x \leq 11 \\ 0 & \text{otherwise} \end{cases}$$

Find  $\text{Max}(A, B)$

- c) Let  $A, B$  be the fuzzy numbers defined by membership functions.

$$A(x) = \begin{cases} \frac{x+5}{2} & -5 \leq x \leq -3 \\ -x/3 & -3 < x \leq 0 \\ 0 & \text{otherwise} \end{cases}$$

Find a fuzzy number  $A, B$

**7)** The dominant eigen value of the matrix  $A = \begin{bmatrix} 1 & 2 \\ 3 & 4 \end{bmatrix}$  is

a) 0.3722                      b) -5.3723  
c) 5.3723                      d) 10.7445

- 8) The use of Romberg's method is \_\_\_\_\_.  
a) To solve simultaneous linear equations  
b) To find root of the equation  
c) To evaluate definite integration  
d) To find eigen values
- 9) As soon as a new value of a variable is found by iteration, it is used immediately in the next step, this method is called as \_\_\_\_\_.  
a) Gauss-Jacobi's method                      b) Gauss-Seidal method  
c) Gauss-Jordan method                      d) Gauss Elimination method
- 10) When Gauss Elimination method is used to solve set of equation  $AX = B$ , matrix  $A$  is transformed to \_\_\_\_\_.  
a) Upper triangular matrix                      b) Diagonal matrix  
c) Lower triangular matrix                      d) Identity matrix
- 11) The number of strips required in Weddel's rule is \_\_\_\_\_.  
a) A Multiple of 6                                      b) A multiple of 10  
c) A Multiple of 3                                      d) A multiple of 2
- 12) The order of convergence of Regulafalsi method for finding roots of equation  $(x) = 0$  is \_\_\_\_\_.  
a) Second order                                      b) Cubic order  
c) First order                                              d) Very slow
- 13) A root of the equation  $x - \cos x = 0$  lies between \_\_\_\_\_.  
a) 1 and 2                                              b) 2 and 3  
c) 0 and 1                                              d) -1 and 0
- 14) The Newton - Raphson method fails when \_\_\_\_\_.  
a)  $f'(x)$  is negative                                      b)  $f'(x)$  is positive  
c) Never fails                                              c)  $f'(x)$  is zero

**S.Y. (B.Tech.) (Sem - II) (Old) (CBCS) Examination: Oct/Nov-2022**  
**COMPUTER SCIENCE & ENGINEERING**  
**Applied Mathematics-II**

Day & Date: Tuesday, 14-03-2023  
 Time: 02:00 PM To 05:00 PM

Max. Marks: 56

**Instructions:** 1) All question are compulsory.  
 2) Figures to the right indicate full marks.

**Section – I**

**Q.2 Attempt any three.**

**09**

- Solve the system of equations by using Gauss-Jacobi method  
 $x - y + z = 1, -3x + 2y - 3z = -6, 2x - 5y + 4z = 5$
- Solve the system of equations by using Gauss-Jacobi method.  
 $8x - 3y + 2z = 20, 4x + 11y - z = 33, 6x + 3y + 12z = 35$
- Find a real root of the equation  $e^x = x^3 + \cos 25$  take  $x_0 = 4.5$  by Using Newton-Raphson method correct to 3 decimal places.
- Find positive root of the equation  $x \log_{10} x = 1.2$  by Using false-position method correct to 3 decimal places.
- Using power method find eigen values & corresponding eigen vectors  
 $A = \begin{bmatrix} 5 & 0 & 1 \\ 0 & -2 & 0 \\ 1 & 0 & 5 \end{bmatrix}$  take  $x_0 = [1, 0, 0]^T$  upto 5 iterations.

**Q.3 Attempt any three.**

**09**

- Solve the system of equation by using Gauss-Seidal method  
 $83x + 11y - 4z = 95, 7x + 52y + 13z = 104, 3x + 8y + 29z = 71$   
 (three iterations)
- Find the double root of the equation  $x^3 - x^2 - x + 1 = 0$  choosing  $x_0 = 0.8$  by using generalized Newton-Raphson method.
- Evaluate  $\int_0^{1/2} \int_0^{1/2} \frac{\sin xy}{1+xy} dx dy$  by using Simpson's rule  $h = k = 1/4$
- By using trapezoidal rule, evaluate  $\int_4^{5.2} \log_e x dx, n = 6$
- By using Weddell's rule find  $\int_0^{0.6} e^{-x^2} dx dy$  by taking  $n = 6$

**Q.4 Attempt any two**

- a) Apply factorization method to solve the equations.  
 $3x + 2y + 7z = 4$ ,  $2x + 3y + z = 5$ ,  $3x + 4y + z = 7$
- b) Perform two iterations of Newton-Raphson method of find a solution of the system.  $x^2 + xy = 6$ ,  $x^2 - y^2 = 3$  Take  $x_0 = y_0 = 1$
- c) Evaluate by using Romberg's method.  $I = \int_0^1 \frac{dx}{1+x^2}$  take  $h = 0.5, 0.25, 0.125$  respectively.

**Section – II****Q.5 Attempt any three**

09

- a) Let  $A, B$  be the fuzzy sets define on universal set  $X = \{-5, -4, -3, -2, -1, 0, 1, 2, 3\}$  as  
 $A = \frac{1}{-5} + \frac{0.75}{-4} + \frac{0.20}{-3} + \frac{0.8}{-2} + \frac{0.32}{-1} + \frac{0.28}{0} + \frac{0.9}{1} + \frac{0.65}{2} + \frac{1}{3}$   
 $B = \frac{0}{-5} + \frac{0.80}{-4} + \frac{0.20}{-3} + \frac{0.70}{-2} + \frac{0.20}{-1} + \frac{0.15}{0} + \frac{1}{1} + \frac{0.60}{2} + \frac{1}{3}$  find  $S(A, B)$ ,  $S(B, A)$
- b) Find Strong  $\alpha$ -cuts of the fuzzy set  $A$  defined by membership function.  

$$A(x) = \begin{cases} \frac{x-10}{20} & 10 \leq x \leq 30 \\ \frac{40-x}{10} & 30 < x \leq 40 \\ 0 & \text{otherwise} \end{cases} \quad \text{for } \alpha = 0, 0.3, 0.9$$
- c) Solve  $Max z = 3x_1 + 4x_2$  subject to constraints  
 $x_1 - x_2 \leq 1$   $-x_1 + x_2 \leq 2$   $x_1, x_2 \geq 0$
- d) Verify which of the following fuzzy sets are fuzzy number  
 i)  $A = 1/1 + \frac{0.5}{2} + \frac{0.6}{3} + \frac{0.7}{4} + \frac{0.8}{5}$   
 ii)  $B(x) = \log x, x \in [1, 2.72]$   
 iii) Customer relationship management
- e) Find  $f(A)$ , is  $A$  be a fuzzy set defined on universal set  
 $X = \{-3, -2, -1, 0, 1, 2, 3\}$  by the membership function  $A(x) = \frac{x+3}{10} \forall x \in X$  &  
 $f$  be a function defined on  $X$  as  $f(x) = 2x^2 + 10$

**Q.6 Attempt any three**

09

- a) Let  $A$  be a fuzzy set defined on universal set  $x = \{0, 1, 2, 3, 4, 5\}$  by the membership function  $A(x) = e^{-x} \forall x \in X$ . Then fuzzy cardinality of  $A$
- b) Let  $A, B$  be any two fuzzy sets defined on universal set  $X$  an  $\alpha, \beta \in [0, 1]$  then prove that  
 i)  ${}^\alpha(A \cap B) = {}^\alpha A \cap {}^\alpha B$   
 ii) If  $\alpha \leq \beta$  then  ${}^\beta A \subseteq {}^\alpha A$
- c) A building firm possesses four cranes each of which has a distance (km) from four different constructions sites as shown in table

|       | I   | II  | III | IV  |
|-------|-----|-----|-----|-----|
| $C_1$ | 90  | 75  | 75  | 80  |
| $C_2$ | 35  | 85  | 55  | 65  |
| $C_3$ | 125 | 95  | 90  | 105 |
| $C_4$ | 45  | 110 | 95  | 115 |

Place the cranes (one for each construction site) in such a way that the overall distance required for the transfer is as small as possible.

- d) Solve the fuzzy equation  $A + X = B$  where  $A, B$  are fuzzy numbers defined by membership functions.

$$A(x) = \begin{cases} \frac{x-9}{2} & 9 \leq x \leq 11 \\ \frac{14-x}{3} & 11 < x \leq 14 \\ 0 & \text{otherwise} \end{cases}$$

$$B(x) = \begin{cases} \frac{x-5}{9-x} & 5 \leq x \leq 6 \\ \frac{3}{0} & 6 < x \leq 9 \\ 0 & \text{otherwise} \end{cases}$$

- e) Let  $A$  be a fuzzy set defined on universal set  $[-1,1]$  by the membership function

$$A(x) = \begin{cases} x+1 & -1 \leq x \leq 0 \\ 1-x & 0 < x \leq 1 \end{cases}$$

- Find i) Boundary of  $A$   
ii) Core of  $A$

### Q.7 Attempt any two

10

- a) Max  $z = 4x_1 + 3x_2 + 6x_3$  subject to

$$2x_1 + 3x_2 + 2x_3 \leq 440$$

$$4x_1 + 3x_2 \leq 470$$

$$2x_1 + 5x_2 \leq 430 \quad x_1, x_2, x_3 \geq 0$$

- b) Let  $A, B$  the fuzzy number defined by the membership functions

$$A(x) = \begin{cases} \frac{x-1}{4} & 1 \leq x \leq 15 \\ 6-x & 5 \leq x \leq 6 \\ 0 & \text{otherwise} \end{cases}$$

$$B(x) = \begin{cases} \frac{x-6}{4} & 6 \leq x \leq 10 \\ 11-x & 10 < x \leq 11 \\ 0 & \text{otherwise} \end{cases}$$

Find  $Max(A, B)$

- c) Let  $A, B$  be the fuzzy numbers defined by membership functions.

$$A(x) = \begin{cases} \frac{x+5}{2} & -5 \leq x \leq -3 \\ -x/3 & -3 < x \leq 0 \\ 0 & \text{otherwise} \end{cases}$$

Find a fuzzy number  $A, B$

**Q.5 Attempt any three**

09

- a) Let  $A, B$  be the fuzzy sets define on universal set  $X = \{-5, -4, -3, -2, -1, 0, 1, 2, 3\}$  as  
 $A = \frac{1}{-5} + \frac{0.75}{-4} + \frac{0.20}{-3} + \frac{0.8}{-2} + \frac{0.32}{-1} + \frac{0.28}{0} + \frac{0.9}{1} + \frac{0.65}{2} + \frac{1}{3}$   
 $B = \frac{0}{-5} + \frac{0.80}{-4} + \frac{0.20}{-3} + \frac{0.70}{-2} + \frac{0.20}{-1} + \frac{0.15}{0} + \frac{1}{1} + \frac{0.60}{2} + \frac{1}{3}$  find  $S(A, B)$ ,  $S(B, A)$
- b) Find Strong  $\alpha$ -cuts of the fuzzy set  $A$  defined by membership function.  
 $A(x) = \begin{cases} \frac{x-10}{20} & 10 \leq x \leq 30 \\ \frac{40-x}{10} & 30 < x \leq 40 \\ 0 & \text{otherwise} \end{cases}$  for  $\alpha = 0, 0.3, 0.9$
- c) Solve  $Max z = 3x_1 + 4x_2$  subject to constraints  
 $x_1 - x_2 \leq 1$   $-x_1 + x_2 \leq 2$   $x_1, x_2 \geq 0$
- d) Verify which of the following fuzzy sets are fuzzy number  
i)  $A = 1/1 + \frac{0.5}{2} + \frac{0.6}{3} + \frac{0.7}{4} + \frac{0.8}{5}$   
ii)  $B(x) = \log x, x \in [1, 2.72]$   
iii) Customer relationship management
- e) Find  $f(A)$ , is  $A$  be a fuzzy set defined on universal set  
 $X = \{-3, -2, -1, 0, 1, 2, 3\}$  by the membership function  $A(x) = \frac{x+3}{10} \forall x \in X$  &  
 $f$  be a function defined on  $X$  as  $f(x) = 2x^2 + 10$

**Q.6 Attempt any three**

09

- a) Let  $A$  be a fuzzy set defined on universal set  $x = \{0, 1, 2, 3, 4, 5\}$  by the membership function  $A(x) = e^{-x} \forall x \in X$ . Then fuzzy cardinality of  $A$
- b) Let  $A, B$  be any two fuzzy sets defined on universal set  $X$  an  $\alpha, \beta \in [0, 1]$  then prove that  
i)  ${}^\alpha(A \cap B) = {}^\alpha A \cap {}^\alpha B$   
ii) If  $\alpha \leq \beta$  then  ${}^\beta A \subseteq {}^\alpha A$
- c) A building firm possesses four cranes each of which has a distance (km) from four different constructions sites as shown in table

|       | I   | II  | III | IV  |
|-------|-----|-----|-----|-----|
| $C_1$ | 90  | 75  | 75  | 80  |
| $C_2$ | 35  | 85  | 55  | 65  |
| $C_3$ | 125 | 95  | 90  | 105 |
| $C_4$ | 45  | 110 | 95  | 115 |

Place the cranes (one for each construction site) in such a way that the overall distance required for the transfer is as small as possible.

- d) Solve the fuzzy equation  $A + X = B$  where  $A, B$  are fuzzy numbers defined by membership functions.

$$A(x) = \begin{cases} \frac{x-9}{2} & 9 \leq x \leq 11 \\ \frac{14-x}{3} & 11 < x \leq 14 \\ 0 & \text{otherwise} \end{cases}$$

$$B(x) = \begin{cases} x-5 & 5 \leq x \leq 6 \\ \frac{9-x}{3} & 6 < x \leq 9 \\ 0 & \text{otherwise} \end{cases}$$

- e) Let  $A$  be a fuzzy set defined on universal set  $[-1,1]$  by the membership function

$$A(x) = \begin{cases} x+1 & -1 \leq x \leq 0 \\ 1-x & 0 < x \leq 1 \end{cases}$$

- Find i) Boundary of  $A$   
ii) Core of  $A$

**Q.7 Attempt any two**

**10**

- a) Max  $z = 4x_1 + 3x_2 + 6x_3$  subject to

$$2x_1 + 3x_2 + 2x_3 \leq 440$$

$$4x_1 + 3x_2 \leq 470$$

$$2x_1 + 5x_2 \leq 430 \quad x_1, x_2, x_3 \geq 0$$

- b) Let  $A, B$  the fuzzy number defined by the membership functions

$$A(x) = \begin{cases} \frac{x-1}{4} & 1 \leq x \leq 15 \\ 6-x & 5 \leq x \leq 6 \\ 0 & \text{otherwise} \end{cases}$$

$$B(x) = \begin{cases} \frac{x-6}{4} & 6 \leq x \leq 10 \\ 11-x & 10 < x \leq 11 \\ 0 & \text{otherwise} \end{cases}$$

Find  $Max(A, B)$

- c) Let  $A, B$  be the fuzzy numbers defined by membership functions.

$$A(x) = \begin{cases} \frac{x+5}{2} & -5 \leq x \leq -3 \\ -x/3 & -3 < x \leq 0 \\ 0 & \text{otherwise} \end{cases}$$

Find a fuzzy number  $A, B$

**ELECTRONICS & TELECOMMUNICATION ENGINEERING**  
**Electronic Circuit Analysis and Design**

Day & Date: Wednesday, 15-03-2023  
 Time: 02:00 PM To 05:00 PM

Max. Marks: 70

- Instructions:** 1) Q. No. 1 is compulsory and should be solved in first 30 minutes in Answer Book. Page No.3 (starting page of the Answer Book). Each question carry one mark.  
 2) Don't forget to mention Question Paper Set (P/Q/R/S) at the top of the same page.

**MCQ/Objective Type Questions**

Duration: 30 Minutes

Marks: 14

**Q.1 Choose the correct alternatives from the options.**

**14**

- 1) The transistor biasing circuit which provides least thermal stability is \_\_\_\_\_ bias circuit.
 

|                           |                            |
|---------------------------|----------------------------|
| a) Voltage divider        | b) Fixed                   |
| c) Collector to base bias | d) Thermistor compensation |
- 2) Input and output resistance of CC amplifier is \_\_\_\_\_ & \_\_\_\_\_ respectively.
 

|               |                |
|---------------|----------------|
| a) Low & low  | b) High & high |
| c) Low & high | d) High & low  |
- 3) H parameter obtained from input characteristics of transistor is \_\_\_\_\_.
 

|             |                  |
|-------------|------------------|
| a) $h_{ie}$ | b) $h_{fe}$      |
| c) $h_{oe}$ | d) None of these |
- 4) The slope of DC load line of a transistor CE amplifier is
 

|                     |            |
|---------------------|------------|
| a) $-1/(R_C + R_E)$ | b) $1/R_C$ |
| c) $1/R_L$          | d) zero    |
- 5) Cascading two amplifiers will result in \_\_\_\_\_.
 

|                                      |
|--------------------------------------|
| a) reduction in gain increase in BW  |
| b) increase in gain decrease in BW   |
| c) reduction in gain reduction in BW |
| d) None of these                     |
- 6) The outstanding characteristic of direct coupled amplifier is \_\_\_\_\_.
 

|                            |                          |
|----------------------------|--------------------------|
| a) utmost economy          | b) temperature stability |
| c) amplifies low frequency | d) None of these         |
- 7) When emitter bypass capacitor is removed from RC coupled amplifier circuit it results to
 

|                                     |
|-------------------------------------|
| a) voltage series negative feedback |
| b) voltage shunt negative feedback  |
| c) current series negative feedback |
| d) current shunt negative feedback  |

- 8) When voltage series negative feedback is applied to an amplifier. its input impedance and output impedance
- a) Increases, Decreases
  - b) Decreases, Increases
  - c) Remains the same
  - d) Increases, Increases
- 9) In an RC phase shift oscillator, the minimum number of RC networks to be connected in cascade will be \_\_\_\_.
- a) One
  - b) Two
  - c) Three
  - d) Four
- 10) The maximum theoretical efficiency of class B Push pull power amplifier is \_\_\_\_.
- a) 50%
  - b) 62.5%
  - c) 78.5%
  - d) 25%
- 11) Location of Q point is fixed at three locations, namely middle, at cutoff and below cutoff of the amplifier characteristics, then the resulting power amplifier configurations are \_\_\_\_, \_\_\_\_, \_\_\_\_ respectively.
- a) Class B, Class A, Class C
  - b) Class A, Class B, Class C
  - c) Class A, Class AB, Class C
  - d) Class A, Class C, Class AB
- 12) The region in which  $V_{ds} > V_p$  &  $V_{gs} > V_p$  for N channel JFET is called as
- a) Ohmic region
  - b) Cutoff region
  - c) Pinch off region
  - d) None of these
- 13) JFET operates as Voltage Variable Resistor in \_\_\_\_ region.
- a) Ohmic
  - b) Pinch off
  - c) Active
  - d) none of the these
- 14) MOSFET can be used as \_\_\_\_.
- a) Voltage controlled capacitor
  - b) Voltage controlled inductor
  - c) Current controlled capacitor
  - d) Current controlled inductor

**S.Y. (B.Tech.) (Sem-I) (New) (CBCS) Examination: Oct/Nov - 2022**  
**ELECTRONICS & TELECOMMUNICATION ENGINEERING**  
**Electronic Circuit Analysis and Design**

Day & Date: Wednesday, 15-03-2023  
 Time: 02:00 PM To 05:00 PM

Max. Marks: 56

- Instructions:** 1) All question are compulsory.  
 2) Figures to the right indicate full marks.  
 3) Assume suitable data wherever necessary.  
 4) Draw neat diagram whenever necessary.

**Section – I**

- Q.2 Attempt any four** **16**
- Obtain H-parameter model & define H parameters for transistor in CB circuit configuration.
  - Explain Q point stabilization in transistor collector to base bias circuit.
  - What is the need of cascading and explain any one coupling schemes along with frequency response?
  - "Input resistance increases and output resistance decreases for voltage series feedback amplifier", Justify the statement.
  - Compare effect of voltage series, current series, current shunt and voltage shunt feedback topologies on amplifier characteristics.
- Q.3 Attempt any two** **12**
- Consider transistor CE amplifier with  $R_L = 1 K\Omega$ ,  $h_{ie} = 1 K\Omega$ ,  $h_{re} = 2 \times 10^{-4}$ ,  $h_{fe} = 50$ ,  $h_{oe} = 25 \mu S$ ,  $R_s = 800\Omega$ . Calculate  $A_i$ ,  $A_v$ ,  $R_i$ ,  $R_o$
  - Design a single CE amplifier with voltage divider bias for voltage of voltage gain of 40 & output voltage of 4 volt peak and stability factor 10.  
 $P_{D max.} = 225mW$ ,  $h_{ie} = 1.4 k\Omega$ ,  $h_{fe} = 45$
  - Describe the effect of negative feedback on gain stability, bandwidth, noise, distortion, input & output resistance of feedback amplifier.

**Section - II**

- Q.4 Attempt any four** **16**
- In a transistor Colpitt's oscillator  $L = 100 \mu H$ ,  $C_1 = 0.001 \mu F$ ,  $C_2 = 0.01 \mu F$ . Determine operating frequency, feedback factor and minimum gain to sustain oscillations in the circuit.
  - Explain Direct coupled class A power amplifier, derive the efficiency. How its efficiency can be improved?
  - What is crossover distortion? How it can be avoided? Explain the circuit in detail which is free from this distortion.
  - Explain working and drain characteristics of N channel JFET.
  - Explain working of depletion type MOSFET.

**Q.5 Attempt any two**

- a) Design a transformed coupled Class B push pull amplifier for maximum output voltage of  $6V_{rms}$  at  $4\Omega$  load with transformer efficiency of 75%.  
[Use BC152 with  $V_{CE}=45V$ ,  $I_c=3A$ ,  $h_{fe}=150$ ,  $P_{Dmax}=25$ ]
- b) Explain UJT relaxation oscillator and derive equation for output frequency.
- c) Explain the effect of  $V_{gs}$  and  $V_{ds}$  on Channel conductivity and Drain current  $I_D$

  - a) Ohmic
  - b) Pinch off
  - c) Active
  - d) none of the these
- 4) MOSFET can be used as \_\_\_\_\_.
  - a) Voltage controlled capacitor
  - b) Voltage controlled inductor
  - c) Current controlled capacitor
  - d) Current controlled inductor
- 5) The transistor biasing circuit which provides least thermal stability is \_\_\_\_\_ bias circuit.
  - a) Voltage divider
  - b) Fixed
  - c) Collector to base bias
  - d) Thermistor compensation
- 6) Input and output resistance of CC amplifier is \_\_\_\_\_ & \_\_\_\_\_ respectively.
  - a) Low & low
  - b) High & high
  - c) Low & high
  - d) High & low
- 7) H parameter obtained from input characteristics of transistor is \_\_\_\_\_.
  - a)  $h_{ie}$
  - b)  $h_{fe}$
  - c)  $h_{oe}$
  - d) None of these
- 8) The slope of DC load line of a transistor CE amplifier is
  - a)  $-1/(R_c + R_E)$
  - b)  $1/R_c$
  - c)  $1/R_L$
  - d) zero

- 9) Cascading two amplifiers will result in \_\_\_\_\_.  
a) reduction in gain increase in BW  
b) increase in gain decrease in BW  
c) reduction in gain reduction in BW  
d) None of these
- 10) The outstanding characteristic of direct coupled amplifier is \_\_\_\_\_.  
a) utmost economy  
b) temperature stability  
c) amplifies low frequency  
d) None of these
- 11) When emitter bypass capacitor is removed from RC coupled amplifier circuit it results to  
a) voltage series negative feedback  
b) voltage shunt negative feedback  
c) current series negative feedback  
d) current shunt negative feedback
- 12) When voltage series negative feedback is applied to an amplifier. its input impedance and output impedance  
a) Increases, Decreases  
b) Decreases, Increases  
c) Remains the same  
d) Increases, Increases
- 13) In an RC phase shift oscillator, the minimum number of RC networks to be connected in cascade will be \_\_\_\_\_.  
a) One  
b) Two  
c) Three  
d) Four
- 14) The maximum theoretical efficiency of class B Push pull power amplifier is \_\_\_\_\_.  
a) 50%  
b) 62.5%  
c) 78.5%  
d) 25%

**Electronic Circuit Analysis and Design**

Day & Date: Wednesday, 15-03-2023  
 Time: 02:00 PM To 05:00 PM

Max. Marks: 56

- Instructions:** 1) All question are compulsory.  
 2) Figures to the right indicate full marks.  
 3) Assume suitable data wherever necessary.  
 4) Draw neat diagram whenever necessary.

**Section – I**

- Q.2 Attempt any four** **16**
- Obtain H-parameter model & define H parameters for transistor in CB circuit configuration.
  - Explain Q point stabilization in transistor collector to base bias circuit.
  - What is the need of cascading and explain any one coupling schemes along with frequency response?
  - "Input resistance increases and output resistance decreases for voltage series feedback amplifier", Justify the statement.
  - Compare effect of voltage series, current series, current shunt and voltage shunt feedback topologies on amplifier characteristics.
- Q.3 Attempt any two** **12**
- Consider transistor CE amplifier with  $R_L = 1\text{ K}\Omega$ ,  $h_{ie} = 1\text{ K}\Omega$ ,  $h_{re} = 2 \times 10^{-4}$ ,  $h_{fe} = 50$ ,  $h_{oe} = 25\text{ }\mu\text{S}$ ,  $R_s = 800\Omega$ . Calculate  $A_i$ ,  $A_v$ ,  $R_i$ ,  $R_o$
  - Design a single CE amplifier with voltage divider bias for voltage of voltage gain of 40 & output voltage of 4 volt peak and stability factor 10.  
 $P_{D\text{ max.}} = 225\text{ mW}$ ,  $h_{ie} = 1.4\text{ k}\Omega$ ,  $h_{fe} = 45$
  - Describe the effect of negative feedback on gain stability, bandwidth, noise, distortion, input & output resistance of feedback amplifier.

**Section - II**

- Q.4 Attempt any four** **16**
- In a transistor Colpitt's oscillator  $L = 100\text{ }\mu\text{H}$ ,  $C_1 = 0.001\text{ }\mu\text{F}$ ,  $C_2 = 0.01\text{ }\mu\text{F}$ . Determine operating frequency, feedback factor and minimum gain to sustain oscillations in the circuit.
  - Explain Direct coupled class A power amplifier, derive the efficiency. How its efficiency can be improved?
  - What is crossover distortion? How it can be avoided? Explain the circuit in detail which is free from this distortion.
  - Explain working and drain characteristics of N channel JFET.
  - Explain working of depletion type MOSFET.

**Q.5 Attempt any two**

- a) Design a transformed coupled Class B push pull amplifier for maximum output voltage of 6Vrms at  $4\Omega$  load with transformer efficiency of 75%.  
[Use BC152 with  $V_{CE}=45V$ ,  $I_c=3A$ ,  $h_{fe}=150$ ,  $P_{Dmax}=25$ ]
- b) Explain UJT relaxation oscillator and derive equation for output frequency.
- c) Explain the effect of  $V_{gs}$  and  $V_{ds}$  on Channel conductivity and Drain current  $I_D$

|                 |  |
|-----------------|--|
| <b>Seat No.</b> |  |
|-----------------|--|

- 8) JFET operates as Voltage Variable Resistor in \_\_\_\_\_ region.
  - a) Ohmic
  - b) Pinch off
  - c) Active
  - d) none of the these
- 9) MOSFET can be used as \_\_\_\_\_.
  - a) Voltage controlled capacitor
  - b) Voltage controlled inductor
  - c) Current controlled capacitor
  - d) Current controlled inductor
- 10) The transistor biasing circuit which provides least thermal stability is \_\_\_\_\_ bias circuit.
  - a) Voltage divider
  - b) Fixed
  - c) Collector to base bias
  - d) Thermistor compensation
- 11) Input and output resistance of CC amplifier is \_\_\_\_\_ & \_\_\_\_\_ respectively.
  - a) Low & low
  - b) High & high
  - c) Low & high
  - d) High & low
- 12) H parameter obtained from input characteristics of transistor is \_\_\_\_\_.
  - a)  $h_{ie}$
  - b)  $h_{fe}$
  - c)  $h_{oe}$
  - d) None of these
- 13) The slope of DC load line of a transistor CE amplifier is
  - a)  $-1 / (R_C + R_E)$
  - b)  $1 / R_C$
  - c)  $1 / R_L$
  - d) zero
- 14) Cascading two amplifiers will result in \_\_\_\_\_.
  - a) reduction in gain increase in BW
  - b) increase in gain decrease in BW
  - c) reduction in gain reduction in BW
  - d) None of these

Day & Date: Friday, 17-03-2023  
 Time: 02:00 PM To 05:00 PM

Max. Marks: 70

- Instructions:** 1) Q. No. 1 is compulsory. It should be solved in the first 30 minutes in answer book. Page no 03 (Starting page of the Answer Book). Each question carries one mark.  
 2) Don't forget to Mention question paper set (P/Q/R/S) on top of page.  
 3) Figures to the right indicates full marks.

**MCQ/Objective Type Questions**

Duration: 30 Minutes

Marks: 14

**Q.1 Choose the correct alternatives from the options.**

**14**

- 1) For maximum transfer of power the source resistance must be \_\_\_\_\_.  
 a) Greater than load resistance      b) less than load resistance  
 c) Equal to load resistance      d) None of the above
- 2) The Thevenin's circuit can be obtained by making the load resistance as \_\_\_\_\_.  
 a) Open Circuit      b) Short Circuit  
 c) Equal to source resistance      d) Less than source resistance
- 3) What would be the value of impedance of a parallel resonant circuit at anti resonance condition?  
 a) Reactive & minimum      b) Resistive & minimum  
 c) Reactive & maximum      d) Resistive & maximum
- 4) If the value of Quality factor is 100 in a series RLC circuit along with the bandwidth of about 1 kHz, then what would be the value of resonance frequency?  
 a) 5 kHz      b) 50 kHz  
 c) 100 kHz      d) None of these
- 5) In a certain series resonant circuit,  $V_C = 250V$ ,  $V_L = 250V$ , and  $V_R = 100V$ . The value of the source voltage is \_\_\_\_\_.  
 a) 100V      b) 125V  
 c) 40V      d) 250V
- 6) How is the output admittance ( $h_{22}$ ) calculated?  
 a)  $V_2 / I_1$  (keeping  $I_2 = 0$ )      b)  $I_2 / V_1$  (keeping  $V_2 = 0$ )  
 c)  $I_2 / V_2$  (keeping  $I_1 = 0$ )      d)  $V_1 / I_2$  (keeping  $I_1 = 0$ )
- 7) In RC series circuit  $R = 50\Omega$ ,  $C = 20\mu F$  and 100V dc is applied. Then what is the value of current at steady state?  
 a) 20 A      b) 2 A  
 c) 0 A      d) 10 A
- 8) Which elements act as dependent variables in Y-parameters?  
 a) Current      b) Voltage  
 c) Both a and b      d) None of the above

- 9) Transients are present in the circuit when the circuit is having \_\_\_\_\_.
  - a) C
  - b) L
  - c) R
  - d) Either L or C
- 10) Time constant of RC series circuit is \_\_\_\_\_.
  - a)  $2C/R$
  - b) RC
  - c)  $C/2R$
  - d)  $R/C$
- 11) A band elimination filter is one which \_\_\_\_\_.
  - a) Attenuates all frequencies less than lower cut off frequency
  - b) Attenuates all frequencies greater than lower cut off frequency
  - c) Attenuates all frequencies between lower and higher cut off frequency
  - d) None of the above
- 12) An ideal high pass filter is one which \_\_\_\_\_.
  - a) Zero attenuation for all frequencies less than cut off frequency
  - b) Infinite attenuation for all frequencies
  - c) No attenuation for all frequencies greater than cut off frequency
  - d) None of the above
- 13) The driving point admittance is defined as \_\_\_\_\_.
  - a) ratio of transform current to transform voltage at same port
  - b) Ratio of transform voltage at one port to transform current at other port
  - c) Both a and b
  - d) None of the above
- 14) If attenuation in dB is 60, then in Neper it is \_\_\_\_\_.
  - a) 10
  - b) 100
  - c) 1000
  - d) None of the above

Seat  
No.

**S.Y. (B.Tech.) (Sem - I) (New) (CBCS) Examination: Oct/Nov-2022**  
**ELECTRONICS & TELECOMMUNICATION ENGINEERING**  
**Network Theory and Analysis**

Day & Date: Friday, 17-03-2023  
 Time: 02:00 PM To 05:00 PM

Max. Marks: 56

**Instructions:** 1) All questions are compulsory.  
 2) Figures to the right indicates full marks.

**Section – I****Q.2 Answer any four of the following questions.****16****a)** Find  $I$  in figure 1 using superposition theorem?

Figure 1

**b)** Find the Norton equivalent circuit between the points A and B in figure 2?

Figure 2

- c)** A  $50\mu\text{F}$ , when connected in series with a coil having  $40\Omega$  resistance, resonates at  $1000\text{Hz}$ . Find the inductance of the coil. Also obtain the Maximum current if the applied voltage is  $100\text{V}$ .
- d)** Derive h-parameters for two port network in terms of voltage, current and draw h-parameter equivalent circuit.
- e)** Find Y-parameters for the network shown in figure 3

Figure 3

**Q.3 Attempt any two questions.**

- a) Find the value of  $R$  in figure 4 for which maximum power transfer takes place and hence find the maximum power delivered to  $R$ ?

Figure 4

- b) Derive the expression for frequency at which the Voltage across Inductor will be maximum in series resonance circuit.  
 c) Determine Z parameters for T type network shown in figure 5.

Figure 5

**Section II****Q.4 Attempt any four questions.**

- a) Determine the current  $i(t)$  for  $t \geq 0$  if initial voltage on capacitor  $V_C(t) = 4V$  for the circuit shown in figure 6.

- b) Design a T pad attenuator to give an attenuation of 60dB and to work in a line of  $500\Omega$  impedance.  
 c) Plot the pole zero diagram for  $H(s) = 2s / [(s+2)(s^2+2s+2)]$   
 d) Design a k-type high-pass filter (T and  $\pi$ ) with a cut-off frequency of 1kHz with a terminated design impedance of  $800\Omega$ .  
 e) A series RL circuit with  $R=30\Omega$  and  $L=15H$  has a constant voltage  $V=60V$  applied at  $t=0$  as shown in figure 7. Determine the current  $i(t)$  and the voltage  $v(t)$  across the resistance.

**Q.5 Answer any two questions.**

- a)** Explain the concept of complex frequency and significance of poles and zeros.
- b)** Derive the expression for step response (current) for series RL circuit. Also derive the expression for time constant.
- c)** Design a k-type band pass T and  $\pi$  type filter having a design impedance of  $500\Omega$  and cut-off frequencies 1kHz and 10 kHz.

  - b) Voltage
  - c) Both a and b
  - d) None of the above
- 4) Transients are present in the circuit when the circuit is having \_\_\_\_\_.
  - a) C
  - b) L
  - c) R
  - d) Either L or C
- 5) Time constant of RC series circuit is \_\_\_\_\_.
  - a)  $2C/R$
  - b) RC
  - c)  $C/2R$
  - d)  $R/C$
- 6) A band elimination filter is one which \_\_\_\_\_.
  - a) Attenuates all frequencies less than lower cut off frequency
  - b) Attenuates all frequencies greater than lower cut off frequency
  - c) Attenuates all frequencies between lower and higher cut off frequency
  - d) None of the above
- 7) An ideal high pass filter is one which \_\_\_\_\_.
  - a) Zero attenuation for all frequencies less than cut off frequency
  - b) Infinite attenuation for all frequencies
  - c) No attenuation for all frequencies greater than cut off frequency
  - d) None of the above

- 8) The driving point admittance is defined as \_\_\_\_\_.  
a) ratio of transform current to transform voltage at same port  
b) Ratio of transform voltage at one port to transform current at other port  
c) Both a and b  
d) None of the above
- 9) If attenuation in dB is 60, then in Neper it is \_\_\_\_\_.  
a) 10  
b) 100  
c) 1000  
d) None of the above
- 10) For maximum transfer of power the source resistance must be \_\_\_\_\_.  
a) Greater than load resistance  
b) less than load resistance  
c) Equal to load resistance  
d) None of the above
- 11) The Thevenin's circuit can be obtained by making the load resistance as \_\_\_\_\_.  
a) Open Circuit  
b) Short Circuit  
c) Equal to source resistance  
d) Less than source resistance
- 12) What would be the value of impedance of a parallel resonant circuit at anti resonance condition?  
a) Reactive & minimum  
b) Resistive & minimum  
c) Reactive & maximum  
d) Resistive & maximum
- 13) If the value of Quality factor is 100 in a series RLC circuit along with the bandwidth of about 1 kHz, then what would be the value of resonance frequency?  
a) 5 kHz  
b) 50 kHz  
c) 100 kHz  
d) None of these
- 14) In a certain series resonant circuit,  $V_C = 250V$ ,  $V_L = 250V$ , and  $V_R = 100V$ . The value of the source voltage is \_\_\_\_\_.  
a) 100V  
b) 125V  
c) 40V  
d) 250V

Seat  
No.

**S.Y. (B.Tech.) (Sem - I) (New) (CBCS) Examination: Oct/Nov-2022**  
**ELECTRONICS & TELECOMMUNICATION ENGINEERING**  
**Network Theory and Analysis**

Day & Date: Friday, 17-03-2023  
 Time: 02:00 PM To 05:00 PM

Max. Marks: 56

**Instructions:** 1) All questions are compulsory.  
 2) Figures to the right indicates full marks.

**Section – I****Q.2 Answer any four of the following questions.****16****a)** Find  $I$  in figure 1 using superposition theorem?

Figure 1

**b)** Find the Norton equivalent circuit between the points A and B in figure 2?

Figure 2

- c)** A  $50\mu\text{F}$ , when connected in series with a coil having  $40\Omega$  resistance, resonates at  $1000\text{Hz}$ . Find the inductance of the coil. Also obtain the Maximum current if the applied voltage is  $100\text{V}$ .
- d)** Derive h-parameters for two port network in terms of voltage, current and draw h-parameter equivalent circuit.
- e)** Find Y-parameters for the network shown in figure 3

Figure 3

**Q.3 Attempt any two questions.**

- a) Find the value of  $R$  in figure 4 for which maximum power transfer takes place and hence find the maximum power delivered to  $R$ ?

Figure 4

- b) Derive the expression for frequency at which the Voltage across Inductor will be maximum in series resonance circuit.  
 c) Determine Z parameters for T type network shown in figure 5.

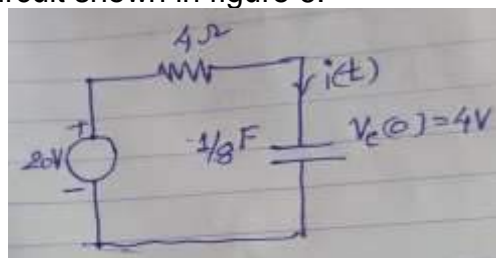

Figure 5

**Section II****Q.4 Attempt any four questions.**

- a) Determine the current  $i(t)$  for  $t \geq 0$  if initial voltage on capacitor  $V_c(t) = 4V$  for the circuit shown in figure 6.

- b) Design a T pad attenuator to give an attenuation of 60dB and to work in a line of  $500\Omega$  impedance.  
 c) Plot the pole zero diagram for  $H(s) = 2s / [(s+2)(s^2+2s+2)]$   
 d) Design a k-type high-pass filter (T and  $\pi$ ) with a cut-off frequency of 1kHz with a terminated design impedance of  $800\Omega$ .  
 e) A series RL circuit with  $R=30\Omega$  and  $L=15H$  has a constant voltage  $V=60V$  applied at  $t=0$  as shown in figure 7. Determine the current  $i(t)$  and the voltage  $v(t)$  across the resistance.

**Q.5 Answer any two questions.**

- a)** Explain the concept of complex frequency and significance of poles and zeros.
- b)** Derive the expression for step response (current) for series RL circuit. Also derive the expression for time constant.
- c)** Design a k-type band pass T and  $\pi$  type filter having a design impedance of  $500\Omega$  and cut-off frequencies 1kHz and 10 kHz.

**Seat  
No.**

Max. Marks: 70

Marks: 14

14

- 1) For each cell, no. of adjacent cell on a 4-variable K-map is \_\_\_\_\_.  
a) 2                                      b) 4  
c) 3                                      d) 8
- 2) The following binary system is used for K-map representation \_\_\_\_\_.  
a) Binary                                b) BCD  
c) Gray                                  d) hexadecimal
- 3) A half adder has \_\_\_\_\_.  
a) 1 input & 2 outputs                b) 2 input & 2 outputs  
c) 2 input & 1 outputs                 d) 3 input & 2 outputs
- 4) A Multiplexer is also known as \_\_\_\_\_.  
a) Counter                                b) Decoder  
c) Data selector                          d) None of these
- 5) The fan out of TTL logic is about \_\_\_\_\_.  
a) 5                                        b) 10  
c) 20                                       d) 50
- 6) When both inputs of JK flip-flop are 1, then the next state is \_\_\_\_\_.  
a) 0                                        b) 1  
c) Q(n)                                    d) [Q(n)]'
- 7) The characteristic equation of T flip-flop is given by, \_\_\_\_\_.  
a)  $Q = T'Q' + T'Q$                       b)  $Q = T'Q' + TQ$   
c)  $Q = TQ' + T'Q$                       d)  $Q = TQ$
- 8) Asynchronous counters are known as \_\_\_\_\_.  
a) ripple counter                        b) multiple clock counter  
c) decade counter                      d) modulus of counter
- 9) How many clock pulses are required to completely load serially a 5 bit shift register?  
a) 2                                        b) 3  
c) 4                                        d) 5

- 10) Ring and Johnson counters are \_\_\_\_\_.
  - a) Synchronous counters
  - b) Asynchronous counters
  - c) True binary counters
  - d) Synchronous and true binary counters
- 11) The MOD number of counter is \_\_\_\_\_.
  - a) maximum possible number of states
  - b) actual number of states in a sequence
  - c) number of flip-flop
  - d) none
- 12) The output of a mod-2 counter given as a clock input of a MOD-5 counter gives a \_\_\_\_\_.
  - a) Mod-5 counter
  - b) MOD-10 counter
  - c) MOD-25 counter
  - d) None of these
- 13) The state table is the pictorial representation among \_\_\_\_\_.
  - a) present states
  - b) next states
  - c) i/p & o/p
  - d) all of these
- 14) The output of the Mealy machine is the function of \_\_\_\_\_.
  - a) next state
  - b) present inputs
  - c) present state and present inputs
  - d) present state

Day & Date: Monday, 20-03-2023  
 Time: 02:00 PM To 05:00 PM

Max. Marks: 56

**Instructions:** 1) All questions are compulsory.  
 2) Figures to the right indicate full marks.

**Section – I**

**Q.2 Answer the following question. (Any Four) 16**

- Reduce given function using K-map and implement it using NAND gate only  
 $f(A, B, C, D) = \sum m(0, 1, 2, 3, 5, 7, 8, 9, 10, 11)$
- Explain the terms:
  - SOP
  - POS
- What is subtractor? Explain full subtractor with design.
- Design & explain 2-bit magnitude comparator.
- Explain the various characteristics of logic families.

**Q.3 Answer the following question. (Any Two) 12**

- Reduce following function using Quine McClusky method.  
 $f(A, B, C, D) = \sum m(0, 1, 3, 7, 8, 9, 11, 15)$
- Implement the following function using single 8:1 MUX.  
 $f(A, B, C, D) = \sum m(0, 1, 3, 4, 8, 9, 15)$
- Convert
  - JK flip-flop to D flip-flop
  - JK flip-flop to T flip-flop

**Section – II**

**Q.4 Answer the following question. (Any Four) 16**

- What are different modes of operation of shift register? Explain any one of it.
- Explain 5 bit ring counter.
- Design 4-bit asynchronous down counter and explain it with waveforms.
- Design divide-by-6 counter using IC7490.
- Compare synchronous and asynchronous sequential circuit.

**Q.5 Answer the following question. (Any Two) 12**

- Explain bidirectional shift register.
- Design MOD 10 synchronous up counter using JK flip flop.
- Explain state diagram, state table and draw Moore, Mealy state diagram for D flip-flop.

**Seat  
No.**

Duration: 30 Minutes

Marks: 14

**Q.1 Choose the correct alternatives from the options.**

14

- 1) When both inputs of JK flip-flop are 1, then the next state is \_\_\_\_\_.  
a) 0  
b) 1  
c)  $Q(n)$   
d)  $[Q(n)]'$
- 2) The characteristic equation of T flip-flop is given by, \_\_\_\_\_.  
a)  $Q = T'Q' + T'Q$   
b)  $Q = T'Q' + TQ$   
c)  $Q = TQ' + T'Q$   
d)  $Q = TQ$
- 3) Asynchronous counters are known as \_\_\_\_\_.  
a) ripple counter  
b) multiple clock counter  
c) decade counter  
d) modulus of counter
- 4) How many clock pulses are required to completely load serially a 5 bit shift register?  
a) 2  
b) 3  
c) 4  
d) 5
- 5) Ring and Johnson counters are \_\_\_\_\_.  
a) Synchronous counters  
b) Asynchronous counters  
c) True binary counters  
d) Synchronous and true binary counters
- 6) The MOD number of counter is \_\_\_\_\_.  
a) maximum possible number of states  
b) actual number of states in a sequence  
c) number of flip-flop  
d) none
- 7) The output of a mod-2 counter given as a clock input of a MOD-5 counter gives a \_\_\_\_\_.  
a) Mod-5 counter  
b) MOD-10 counter  
c) MOD-25 counter  
d) None of these
- 8) The state table is the pictorial representation among \_\_\_\_\_.  
a) present states  
b) next states  
c) i/p & o/p  
d) all of these

- 9) The output of the Mealy machine is the function of \_\_\_\_\_.  
a) next state  
b) present inputs  
c) present state and present inputs  
d) present state
- 10) For each cell, no. of adjacent cell on a 4-variable K-map is \_\_\_\_\_.  
a) 2  
b) 4  
c) 3  
d) 8
- 11) The following binary system is used for K-map representation \_\_\_\_\_.  
a) Binary  
b) BCD  
c) Gray  
d) hexadecimal
- 12) A half adder has \_\_\_\_\_.  
a) 1 input & 2 outputs  
b) 2 input & 2 outputs  
c) 2 input & 1 outputs  
d) 3 input & 2 outputs
- 13) A Multiplexer is also known as \_\_\_\_\_.  
a) Counter  
b) Decoder  
c) Data selector  
d) None of these
- 14) The fan out of TTL logic is about \_\_\_\_\_.  
a) 5  
b) 10  
c) 20  
d) 50

**Instructions:** 1) All questions are compulsory.  
 2) Figures to the right indicate full marks.

**Section – I**

**Q.2 Answer the following question. (Any Four) 16**

- Reduce given function using K-map and implement it using NAND gate only  
 $f(A, B, C, D) = \sum m(0, 1, 2, 3, 5, 7, 8, 9, 10, 11)$
- Explain the terms:
  - SOP
  - POS
- What is subtractor? Explain full subtractor with design.
- Design & explain 2-bit magnitude comparator.
- Explain the various characteristics of logic families.

**Q.3 Answer the following question. (Any Two) 12**

- Reduce following function using Quine McClusky method.  
 $f(A, B, C, D) = \sum m(0, 1, 3, 7, 8, 9, 11, 15)$
- Implement the following function using single 8:1 MUX.  
 $f(A, B, C, D) = \sum m(0, 1, 3, 4, 8, 9, 15)$
- Convert
  - JK flip-flop to D flip-flop
  - JK flip-flop to T flip-flop

**Section – II**

**Q.4 Answer the following question. (Any Four) 16**

- What are different modes of operation of shift register? Explain any one of it.
- Explain 5 bit ring counter.
- Design 4-bit asynchronous down counter and explain it with waveforms.
- Design divide-by-6 counter using IC7490.
- Compare synchronous and asynchronous sequential circuit.

**Q.5 Answer the following question. (Any Two) 12**

- Explain bidirectional shift register.
- Design MOD 10 synchronous up counter using JK flip flop.
- Explain state diagram, state table and draw Moore, Mealy state diagram for D flip-flop.

Marks: 14

**Q.1 Choose the correct alternatives from the options.**

**14**

- 1) Noise is added to a signal in a communication system \_\_\_\_\_.  
 a) At the receiving end  
 b) At transmitting antenna  
 c) In the channel  
 d) During regeneration of the information
- 2) Noise power at the resistor is affected by the value of the resistor as \_\_\_\_\_.  
 a) Directly proportional to the value of the resistor  
 b) Inversely proportional to the value of the resistor  
 c) Unaffected by the value of the resistor  
 d) Becomes half as the resistance value is doubled
- 3) Low frequency noise is \_\_\_\_\_.  
 a) Transit time noise  
 b) Flicker noise  
 c) Shot noise  
 d) None of the above
- 4) Thermal noise is also known as \_\_\_\_\_.  
 a) Johnson noise  
 b) Partition noise  
 c) Flicker noise  
 d) Solar noise
- 5) Modulation is the process of \_\_\_\_\_.  
 a) generating constant-frequency radio waves  
 b) combining audio and radio-frequency waves at the transmitting end of a communication system  
 c) reducing distortion in RF amplifiers  
 d) improving thermal stability of a transistor
- 6) As compared to DSB-FC, 100% modulated transmission, power saving in SSB-SC system is \_\_\_\_\_ percent.  
 a) 94.4  
 b) 85  
 c) 100  
 d) 83.3
- 7) Pilot-carrier transmission is one in which \_\_\_\_\_.  
 a) only one sideband is transmitted  
 b) one sidebands and carrier are transmitted  
 c) only two sidebands are transmitted  
 d) two sidebands as well as a trace of carrier are transmitted

- 8) Vestigial sideband (VSB) transmission is exclusively used for \_\_\_\_\_.  
a) HF mobile communications  
b) video transmission in all TV systems to conserve bandwidth  
c) long-distance HF radiotelephony  
d) point-to-point radiotelephony where more than one channel is required
- 9) Foster Seelay discriminator uses a \_\_\_\_\_.  
a) single tuned circuit  
b) double tuned circuit with primary and secondary tuned to the same frequency  
c) double tuned circuit with primary and secondary tuned to the different frequency  
d) none of the above
- 10) Pre-emphasis is used to amplify \_\_\_\_\_.  
a) low frequency  
b) high frequency  
c) both (a) and (b) above  
d) none of the above
- 11) The commercial FM radio broadcast band is \_\_\_\_\_.  
a) 535 to 1600 kHz  
b) 20 to 80 kHz  
c) 88 to 108 MHz  
d) 300 to 3000 MHz
- 12) The difference between PM and FM \_\_\_\_\_.  
a) lies in the poorer audio response of phase modulation  
b) is too great to make the two systems compatible  
c) is purely theoretical because practically both are identical  
d) none of these
- 13) The phase shift method for generation of SSB signal is most suitable for \_\_\_\_\_.  
a) data signals  
b) weak modulating signals  
c) larger bandwidth modulating signals  
d) smaller bandwidth modulating signals
- 14) Determine the Bandwidth of a FM wave when the maximum deviation allowed is 75KHz and the modulating signal has a frequency of 20KHz.  
a) 170 KHz  
b) 190 KHz  
c) 100 KHz  
d) 1000 KHz

**S. Y. (B.Tech.) (Sem - I) (New) (CBCS) Examination: Oct/Nov-2022**  
**ELECTRONICS & TELECOMMUNICATION ENGINEERING**  
**Analog Communication**

Day & Date: Tuesday, 21-03-2023  
 Time: 02:00 PM To 05:00 PM

Max. Marks: 56

**Instructions:** 1) All question are compulsory.  
 2) Figures to the right indicate full marks.

**Section – I**

**Q.2 Answer the following question. (Any Four) 16**

- Explain the significance of different blocks in an electronics communication system.
- List various external noises and give a brief description of each one of them.
- An AM broadcast radio station radiates 10KW of power, if modulation percentage is 60. Calculate how much of this is the carrier power.
- Derive an expression for the AM wave.
- Draw the schematic diagram of VSB modulation and explain.

**Q.3 Answer the following question. (Any Two) 12**

- An AM Signal has a peak unmodulated earner voltage,  $V_c = 100$  V, a load resistance,  $R = 50$  ohm, and a modulation index, Modulation index is 1. Determine the following:
  - The carrier power
  - The lower-sideband and upper-sideband power
  - Total sideband power
  - Total power of the modulated AM Signal
  - Sketch the AM power spectrum
- Derive Friis formula for the noise figure of cascaded stages in terms of available power gain and noise figure of each stage.
- What are the methods of generating SSB? Explain any one in detail.

**Section – II**

**Q.4 Answer the following question. (Any Four) 16**

- Illustrate the concept of PWM.
- State and prove sampling theorem for baseband signal.
- What is pre-emphasis and de-emphasis? Why is it used?
- Define the term with suitable example data : Selectivity , Sensitivity , Fidelity and Image Frequency.
- State advantages and disadvantages of TRF receiver.

**Q.5 Answer the following question. (Any Two) 12**

- With block diagrams, explicate the working of the Armstrong frequency modulator system.
- Illustrate with an example the concept of TDM and FDM.
- Describe with the help of a diagram, the working of a superheterodyne receiver. Explain function and purpose of each block.

**MCQ/Objective Type Questions**

Duration: 30 Minutes

Marks: 14

**Q.1 Choose the correct alternatives from the options.**

**14**

- 1) Vestigial sideband (VSB) transmission is exclusively used for \_\_\_\_\_.  
 a) HF mobile communications  
 b) video transmission in all TV systems to conserve bandwidth  
 c) long-distance HF radiotelephony  
 d) point-to-point radiotelephony where more than one channel is required
- 2) Foster Seelay discriminator uses a \_\_\_\_\_.  
 a) single tuned circuit  
 b) double tuned circuit with primary and secondary tuned to the same frequency  
 c) double tuned circuit with primary and secondary tuned to the different frequency  
 d) none of the above
- 3) Pre-emphasis is used to amplify \_\_\_\_\_.  
 a) low frequency  
 b) high frequency  
 c) both (a) and (b) above  
 d) none of the above
- 4) The commercial FM radio broadcast band is \_\_\_\_\_.  
 a) 535 to 1600 kHz  
 b) 20 to 80 kHz  
 c) 88 to 108 MHz  
 d) 300 to 3000 MHz
- 5) The difference between PM and FM \_\_\_\_\_.  
 a) lies in the poorer audio response of phase modulation  
 b) is too great to make the two systems compatible  
 c) is purely theoretical because practically both are identical  
 d) none of these
- 6) The phase shift method for generation of SSB signal is most suitable for \_\_\_\_\_.  
 a) data signals  
 b) weak modulating signals  
 c) larger bandwidth modulating signals  
 d) smaller bandwidth modulating signals

- 7) Determine the Bandwidth of a FM wave when the maximum deviation allowed is 75KHz and the modulating signal has a frequency of 20KHz.
- a) 170 KHz
  - b) 190 KHz
  - c) 100 KHz
  - d) 1000 KHz
- 8) Noise is added to a signal in a communication system \_\_\_\_\_.  
a) At the receiving end  
b) At transmitting antenna  
c) In the channel  
d) During regeneration of the information
- 9) Noise power at the resistor is affected by the value of the resistor as \_\_\_\_\_.  
a) Directly proportional to the value of the resistor  
b) Inversely proportional to the value of the resistor  
c) Unaffected by the value of the resistor  
d) Becomes half as the resistance value is doubled
- 10) Low frequency noise is \_\_\_\_\_.  
a) Transit time noise- b) Flicker noise
- c) Shot noise
- d) None of the above

11) Thermal noise is also known as \_\_\_\_\_.  
a) Johnson noise- b) Partition noise
- c) Flicker noise
- d) Solar noise

12) Modulation is the process of \_\_\_\_\_.  
a) generating constant-frequency radio waves  
b) combining audio and radio-frequency waves at the transmitting end of a communication system  
c) reducing distortion in RF amplifiers  
d) improving thermal stability of a transistor

13) As compared to DSB-FC, 100% modulated transmission, power saving in SSB-SC system is \_\_\_\_\_ percent.  
a) 94.4- b) 85
- c) 100
- d) 83.3

14) Pilot-carrier transmission is one in which \_\_\_\_\_.  
a) only one sideband is transmitted  
b) one sidebands and carrier are transmitted  
c) only two sidebands are transmitted  
d) two sidebands as well as a trace of carrier are transmitted

 3) Figures to the right indicate full marks.  
 4) Use of non-programable calculator is allowed.

**MCQ/Objective Type Questions**

Duration: 30 Minutes

Marks: 14

**Q.1 Choose the correct alternatives from the given options.**

**14**

- 1) The general solution of  $(D^2 - 4)^2 y = 0$  is \_\_\_\_\_.
  - a)  $y = C_1 e^{2x} + C_2 e^{-2x}$
  - b)  $y = (C_1 + C_2 x) e^{-2x} + (C_3 + C_4 x) e^{2x}$
  - c)  $y = C_1 \cos 2x + C_2 \sin 2x + (C_3 + C_4 x) e^{2x}$
  - d) None of these
- 2) For  $\frac{d^2 y}{dx^2} + 4 \frac{dy}{dx} + 3y = 3e^{2x}$ , the particular integral is \_\_\_\_\_.
  - a)  $\frac{1}{15} e^{2x}$
  - b)  $3e^{2x}$
  - c)  $\frac{1}{5} e^{2x}$
  - d)  $C_1 e^{-x} + C_2 e^{-2x}$
- 3) If the characteristic equation of the diff. equation  $\frac{d^2 y}{dx^2} + 2\alpha \frac{dy}{dx} + y = 0$  has two equal roots then the value of  $\alpha$  are \_\_\_\_\_.
  - a)  $\pm 1$
  - b)  $0, 0$
  - c)  $\pm i$
  - d)  $\pm \frac{1}{2}$
- 4) The conditions for expansion of a function in a Fourier series are known as \_\_\_\_\_.
  - a) Harmonic
  - b) Periodic
  - c) Riemann Conditions
  - d) Dirichlet's conditions
- 5) For the function  $f(x) = \begin{cases} 0, & -\pi < x < 0 \\ x, & 0 < x < \pi \end{cases}$  The value of Fourier constant  $a_0$  is \_\_\_\_\_.
  - a)  $\frac{\pi^2}{4}$
  - b)  $\frac{\pi}{4}$
  - c)  $\frac{\pi^2}{2}$
  - d)  $\frac{-\pi}{4}$

- 6) Since  $z\{1\} = \frac{z}{z-1}$ ,  $z\{a^k\}, k \geq 0 =$  \_\_\_\_\_.  
 a)  $\frac{z}{z-a}$  b)  $\frac{z}{a(z-1)}$   
 c)  $\frac{a}{z-a}$  d)  $\frac{z}{az-1}$
- 7) The inverse z-transform of  $\frac{z}{z-3}, |z| > 3$  (with  $k \geq 0$ ) is \_\_\_\_\_.  
 a)  $3^{-k}$  b)  $3^{k+1}$   
 c)  $3^k$  d)  $3^{-k-1}$
- 8)  $L^{-1}\{\phi'(s)\} =$  \_\_\_\_\_.  
 a)  $\frac{-L^{-1}\{\phi(s)\}}{t}$  b)  $-t L^{-1}\{\phi(s)\}$   
 c)  $-L^{-1}\{\phi(s)\}$  d)  $-s L^{-1}\{\phi(s)\}$
- 9) If  $L\{f(t)\} = \frac{a}{s^2+a^2}$  then  $L\left\{\int_0^t f(t)dt\right\} =$  \_\_\_\_\_.  
 a)  $\frac{1}{s(s^2+a^2)}$  b)  $\frac{a}{s(s^2+a^2)}$   
 c)  $\frac{as}{s^2+a^2}$  d)  $\frac{as^2}{s^2+a^2}$
- 10) This method is called as method of chord \_\_\_\_\_.  
 a) Newton Raphson b) False Position  
 c) Bisection d) Both a and b
- 11) The first real positive root of  $x^3 = 6x - 4$  by Newton Raphson method near  $x_0 = 1$  is \_\_\_\_\_.  
 a) 0.6667 b) 0.6  
 c) 0.4 d) 0.3
- 12) The Two regression equations of the variables are  $x = 19.13 - 0.87y$ ,  $y = 11.64 - 0.5x$ . The means of  $x$  and  $y$  are \_\_\_\_\_.  
 a) 16, 2.93 b) 2.93, 16  
 c) 3.67, 15.93 d) 15.93, 3.67
- 13) If a Poisson distribution is such that  $p(x=2) = p(x=3)$  then  $m =$  \_\_\_\_\_.  
 a) 3 b)  $\frac{1}{3}$   
 c) 2 d) 4
- 14) In solving simultaneous linear equations  $AX = B$ , in which method as soon as getting the value of one unknown is immediately used to compute next unknown?  
 a) Jacobi b) Gauss Seidal  
 c) Euler's d) Gauss Elimination

**S.Y. (B. Tech) (Sem – I) (New) (CBCS) Examination: Oct/Nov-2022**  
**ELECTRONICS & TELECOMMUNICATION ENGINEERING**  
**Engineering Mathematics – III**

Day & Date: Monday, 13-03-2023  
 Time: 02:00 PM To 05:00 PM

Max. Marks: 56

- Instructions:** 1) All questions are compulsory.  
 2) Figures to the right indicates full marks.  
 3) Use of non-programmable calculator is allowed.

**Section – I**

**Q.2 Attempt any three**

**09**

- Solve:  $(D^2 + 4D + 5)y = -2 \cos hx + 2^x$
- Solve:  $(D^3 + D^2 + D + 1)y = \sin 2x$
- Find the Fourier series of  $f(x) = \begin{cases} \pi x, & 0 < x < 1 \\ 0, & 1 < x < 2 \end{cases}$
- Find the half-range cosine series for  $f(x) = e^{-x}$  in  $(0, \pi)$
- Find the inverse z-transform of  $F(z) = \frac{1}{(z-2)(z-3)}$ , if  $|z| < 2$

**Q.3 Attempt any three**

**09**

- Solve:  $(D^2 + D)y = x^2 + 2x + 4$
- Solve:  $(D^2 - 6D + 9)y = \frac{e^{3x}}{x^2}$
- Find the Fourier series of  $f(x) = \frac{x(\pi^2 - x^2)}{12}$ , in  $(-\pi, \pi)$
- Find  $Z\{a^{|k|}\}$  for all  $k$
- Find  $Z^{-1}\left\{\frac{1}{(z-5)^2}\right\}$ ,  $|z| < 5$

**Q.4 Attempt any two**

**10**

- A condenser of capacity  $C$  is discharged through an inductance  $L$  and resistance  $R$  in series and the charge  $q$  at a time satisfies the equation.

$$L \frac{d^2 q}{dt^2} + R \frac{dq}{dt} + \frac{q}{C} = 0$$

Given that  $L = 0.25$  Henries,  $R = 250$  ohms,  $C = 2 \times 10^{-6}$  farads and that at  $t = 0$ ,  $q = 0.002$  coulombs and the current  $\frac{dq}{dt} = 0$ , obtain  $q$  in terms of  $t$ .

- Find the Fourier series of  $f(x) = \begin{cases} -\pi, & -\pi < x < 0 \\ x, & 0 < x < \pi \end{cases}$
- Find Z-transform of  $f(k) = \cos \alpha k$ ,  $k \geq 0$

**Section – II**

**Q.5 Attempt any three**

**09**

- If the mean of the binomial distribution is 2 and variance is  $\frac{4}{3}$  find the probability of
  - Two successes
  - Less than to successes

- b) Evaluate  $\int_0^{\infty} \frac{\cos 4t - \cos 3t}{t} dt$  by Laplace transform
- c) Find  $L^{-1}[\tan^{-1}(s + 1)]$
- d) Find the coefficient of correlation between  $x$  and  $y$  from the following data:  
 $n = 25$ ,  $\Sigma x = 120$ ,  $\Sigma x^2 = 650$ ,  $\Sigma y = 100$ ,  $\Sigma y^2 = 450$ ,  $\Sigma xy = 500$
- e) Find an approximate root of  $x \log_{10} x - 1.2 = 0$  by False Position method (Perform 2 iterations)

**Q.6 Attempt any three****09**

- a) Fit a Poisson distribution

|      |     |    |    |   |   |
|------|-----|----|----|---|---|
| $x:$ | 0   | 1  | 2  | 3 | 4 |
| $y:$ | 109 | 65 | 22 | 3 | 1 |

- b) Find Laplace transform of  $f(t) = \frac{2t}{3}$   $0 < t < 3$  and  $f(t)f(t + 3)$
- c) Solve by Gauss Elimination method, the following system of linear simultaneous equations  
 $x + y + 2z = 4$ ,  $3x + y - 3z = -4$ ,  $2x - 3y - 5z = -5$
- d) Weights of 4000 students are found to be normally distributed with mean 50 kgs and S.D. 5 kgs. Find the number of students with weights between 45 and 60 kgs.  
 (For SNV  $z$  area under the Curve between  $z = 0$  and  $z = 1$  is 0.3413 and between  $z = 0$  and  $z = 2$  is 0.4772)
- e) Find the value of  $\sqrt{35}$  by Newton Raphson method, taking  $x_0 = 6$  as initial approximation, correct to 4 decimal places.

**Q.7 Attempt any two****10**

- a) Find  $L^{-1} \left[ \frac{s+29}{(s+4)(s^2+9)} \right]$
- b) Calculate Karl Pearson's coefficient of correlation and the equations of the lines of regression from the following data.
- |      |    |    |    |    |    |    |    |    |    |    |
|------|----|----|----|----|----|----|----|----|----|----|
| $x:$ | 18 | 19 | 20 | 21 | 22 | 23 | 24 | 25 | 26 | 27 |
| $y:$ | 17 | 17 | 18 | 18 | 18 | 19 | 19 | 20 | 21 | 22 |
- c) Solve the following system by Jacobi's method (Perform 4 iterations)
- $$10x - 5y - 2z = 3$$
- $$4x - 10y + 3z = -3$$
- $$x + 6y + 10z = -3$$

Max. Marks: 70

- Instructions:** 1) Q. No. 1 is compulsory. It should be solved in the first 30 minutes in answer book. Page no 03 (Starting page of the Answer Book). Each question carries one mark.  
 2) Don't forget to Mention question paper set (P/Q/R/S) on top of page.  
 3) Figures to the right indicate full marks.  
 4) Use of non-programable calculator is allowed.

**MCQ/Objective Type Questions**

Duration: 30 Minutes

Marks: 14

**Q.1 Choose the correct alternatives from the given options.**

**14**

- 1)  $L^{-1}\{\phi'(s)\} = \underline{\hspace{2cm}}$ 
  - a)  $\frac{-L^{-1}\{\phi(s)\}}{t}$
  - b)  $-t L^{-1}\{\phi(s)\}$
  - c)  $-L^{-1}\{\phi(s)\}$
  - d)  $-s L^{-1}\{\phi(s)\}$
- 2) If  $L\{f(t)\} = \frac{a}{s^2+a^2}$  then  $L\left\{\int_0^t f(t)dt\right\} = \underline{\hspace{2cm}}$ 
  - a)  $\frac{1}{s(s^2+a^2)}$
  - b)  $\frac{a}{s(s^2+a^2)}$
  - c)  $\frac{as}{s^2+a^2}$
  - d)  $\frac{as^2}{s^2+a^2}$
- 3) This method is called as method of chord  $\underline{\hspace{2cm}}$ 
  - a) Newton Raphson
  - b) False Position
  - c) Bisection
  - d) Both a and b
- 4) The first real positive root of  $x^3 = 6x - 4$  by Newton Raphson method near  $x_0 = 1$  is  $\underline{\hspace{2cm}}$ .
  - a) 0.6667
  - b) 0.6
  - c) 0.4
  - d) 0.3
- 5) The Two regression equations of the variables are  $x = 19.13 - 0.87y$ ,  $y = 11.64 - 0.5x$ . The means of  $x$  and  $y$  are  $\underline{\hspace{2cm}}$ .
  - a) 16, 2.93
  - b) 2.93, 16
  - c) 3.67, 15.93
  - d) 15.93, 3.67
- 6) If a Poisson distribution is such that  $p(x = 2) = p(x = 3)$  then  $m = \underline{\hspace{2cm}}$ 
  - a) 3
  - b)  $\frac{1}{3}$
  - c) 2
  - d) 4

- 7) If the characteristic equation of the diff. equation  $\frac{d^2y}{dx^2} + 2\alpha \frac{dy}{dx} + y = 0$  has two equal roots then the value of  $\alpha$  are \_\_\_\_\_.  
 a)  $\pm 1$  b)  $0, 0$   
 c)  $\pm i$  d)  $\pm \frac{1}{2}$
- 8) The conditions for expansion of a function in a Fourier series are known as \_\_\_\_\_.  
 a) Harmonic b) Periodic  
 c) Riemann Conditions d) Dirichlet's conditions
- 9) For the function  $f(x) = \begin{cases} 0, & -\pi < x < 0 \\ x, & 0 < x < \pi \end{cases}$  The value of Fourier constant  $a_0$  is \_\_\_\_\_.  
 a)  $\frac{\pi^2}{4}$  b)  $\frac{\pi}{4}$   
 c)  $\frac{\pi^2}{2}$  d)  $\frac{-\pi}{4}$
- 10) Since  $z\{1\} = \frac{z}{z-1}$ ,  $z\{a^k\}, k \geq 0 =$  \_\_\_\_\_.  
 a)  $\frac{z}{z-a}$  b)  $\frac{z}{a(z-1)}$   
 c)  $\frac{a}{z-a}$  d)  $\frac{z}{az-1}$
- 11) The inverse z-transform of  $\frac{z}{z-3}, |z| > 3$  (with  $k \geq 0$ ) is \_\_\_\_\_.  
 a)  $3^{-K}$  b)  $3^{k+1}$   
 c)  $3^k$  d)  $3^{-k-1}$
- 12)  $L^{-1}\{\phi'(s)\} =$  \_\_\_\_\_.  
 a)  $\frac{-L^{-1}\{\phi(s)\}}{t}$  b)  $-t L^{-1}\{\phi(s)\}$   
 c)  $-L^{-1}\{\phi(s)\}$  d)  $-s L^{-1}\{\phi(s)\}$
- 13) If  $L\{f(t)\} = \frac{a}{s^2+a^2}$  then  $L\left\{\int_0^t f(t)dt\right\} =$  \_\_\_\_\_.  
 a)  $\frac{1}{s(s^2+a^2)}$  b)  $\frac{a}{s(s^2+a^2)}$   
 c)  $\frac{as}{s^2+a^2}$  d)  $\frac{as^2}{s^2+a^2}$
- 14) This method is called as method of chord \_\_\_\_\_.  
 a) Newton Raphson b) False Position  
 c) Bisection d) Both a and b

  - c) 0.4
  - d) 0.3
- 7) The Two regression equations of the variables are  $x = 19.13 - 0.87y$ ,  $y = 11.64 - 0.5x$ . The means of  $x$  and  $y$  are \_\_\_\_\_.
  - a) 16, 2.93
  - b) 2.93, 16
  - c) 3.67, 15.93
  - d) 15.93, 3.67

**S.Y. (B. Tech) (Sem – I) (New) (CBCS) Examination: Oct/Nov-2022**  
**ELECTRONICS & TELECOMMUNICATION ENGINEERING**  
**Engineering Mathematics – III**

Day & Date: Monday, 13-03-2023  
 Time: 02:00 PM To 05:00 PM

Max. Marks: 56

- Instructions:** 1) All questions are compulsory.  
 2) Figures to the right indicates full marks.  
 3) Use of non-programmable calculator is allowed.

**Section – I****Q.2 Attempt any three****09**

- a) Solve:  $(D^2 + 4D + 5)y = -2 \cos hx + 2^x$   
 b) Solve:  $(D^3 + D^2 + D + 1)y = \sin 2x$   
 c) Find the Fourier series of  $f(x) = \begin{cases} \pi x, & 0 < x < 1 \\ 0, & 1 < x < 2 \end{cases}$   
 d) Find the half-range cosine series for  $f(x) = e^{-x}$  in  $(0, \pi)$   
 e) Find the inverse z-transform of  $F(z) = \frac{1}{(z-2)(z-3)}$ , if  $|z| < 2$

**Q.3 Attempt any three****09**

- a) Solve:  $(D^2 + D)y = x^2 + 2x + 4$   
 b) Solve:  $(D^2 - 6D + 9)y = \frac{e^{3x}}{x^2}$   
 c) Find the Fourier series of  $f(x) = \frac{x(\pi^2 - x^2)}{12}$ , in  $(-\pi, \pi)$   
 d) Find  $Z\{a^{|k|}\}$  for all  $k$   
 e) Find  $Z^{-1}\left\{\frac{1}{(z-5)^2}\right\}$ ,  $|z| < 5$

**Q.4 Attempt any two****10**

- a) A condenser of capacity  $C$  is discharged through an inductance  $L$  and resistance  $R$  in series and the charge  $q$  at a time satisfies the equation.

$$L \frac{d^2 q}{dt^2} + R \frac{dq}{dt} + \frac{q}{C} = 0$$

Given that  $L = 0.25$  Henries,  $R = 250$  ohms,  $C = 2 \times 10^{-6}$  farads and that at  $t = 0$ ,  $q = 0.002$  coulombs and the current  $\frac{dq}{dt} = 0$ , obtain  $q$  in terms of  $t$ .

- b) Find the Fourier series of  $f(x) = \begin{cases} -\pi, & -\pi < x < 0 \\ x, & 0 < x < \pi \end{cases}$   
 c) Find Z-transform of  $f(k) = \cos \alpha k$ ,  $k \geq 0$

**Section – II****Q.5 Attempt any three****09**

- a) If the mean of the binomial distribution is 2 and variance is  $\frac{4}{3}$  find the probability of  
 i) Two successes  
 ii) Less than to successes

- b) Evaluate  $\int_0^{\infty} \frac{\cos 4t - \cos 3t}{t} dt$  by Laplace transform
- c) Find  $L^{-1}[\tan^{-1}(s + 1)]$
- d) Find the coefficient of correlation between  $x$  and  $y$  from the following data:  
 $n = 25$ ,  $\Sigma x = 120$ ,  $\Sigma x^2 = 650$ ,  $\Sigma y = 100$ ,  $\Sigma y^2 = 450$ ,  $\Sigma xy = 500$
- e) Find an approximate root of  $x \log_{10} x - 1.2 = 0$  by False Position method  
 (Perform 2 iterations)

**Q.6 Attempt any three****09**

- a) Fit a Poisson distribution

|      |     |    |    |   |   |
|------|-----|----|----|---|---|
| $x:$ | 0   | 1  | 2  | 3 | 4 |
| $y:$ | 109 | 65 | 22 | 3 | 1 |

- b) Find Laplace transform of  $f(t) = \frac{2t}{3}$   $0 < t < 3$  and  $f(t)f(t + 3)$
- c) Solve by Gauss Elimination method, the following system of linear simultaneous equations  
 $x + y + 2z = 4$ ,  $3x + y - 3z = -4$ ,  $2x - 3y - 5z = -5$
- d) Weights of 4000 students are found to be normally distributed with mean 50 kgs and S.D. 5 kgs. Find the number of students with weights between 45 and 60 kgs.  
 (For SNV  $z$  area under the Curve between  $z = 0$  and  $z = 1$  is 0.3413 and between  $z = 0$  and  $z = 2$  is 0.4772)
- e) Find the value of  $\sqrt{35}$  by Newton Raphson method, taking  $x_0 = 6$  as initial approximation, correct to 4 decimal places.

**Q.7 Attempt any two****10**

- a) Find  $L^{-1} \left[ \frac{s+29}{(s+4)(s^2+9)} \right]$
- b) Calculate Karl Pearson's coefficient of correlation and the equations of the lines of regression from the following data.
- |      |    |    |    |    |    |    |    |    |    |    |
|------|----|----|----|----|----|----|----|----|----|----|
| $x:$ | 18 | 19 | 20 | 21 | 22 | 23 | 24 | 25 | 26 | 27 |
| $y:$ | 17 | 17 | 18 | 18 | 18 | 19 | 19 | 20 | 21 | 22 |
- c) Solve the following system by Jacobi's method (Perform 4 iterations)
- $$10x - 5y - 2z = 3$$
- $$4x - 10y + 3z = -3$$
- $$x + 6y + 10z = -3$$

Day & Date: Monday, 06-03-2023  
 Time: 02:00 PM To 05:00 PM

Max. Marks: 70

- Instructions:** 1) Q. No. 1 is compulsory. It should be solved in the first 30 minutes in answer book. Page no 03 (Starting page of the Answer Book). Each question carries one mark.  
 2) Don't forget to Mention question paper set (P/Q/R/S) on top of page.  
 3) Figures to the right indicates full marks  
 4) Assume suitable data wherever needed and mention it clearly.

**MCQ/Objective Type Questions**

Duration: 30 Minutes

Marks: 14

**Q.1 Choose the correct alternatives from the options.**

**14**

- 1) Traffic light system is the example of:
  - a) Open-loop system
  - b) Closed-loop system
  - c) Both (a) and (b)
  - d) None of these
- 2) Which type of node comprises incoming as well as outgoing branches?
  - a) Source node
  - b) Sink node
  - c) Chain node
  - d) Main node
- 3) In a signal flow graph method, how is an overall transfer function of a system obtained?
  - a) Poisson's equation
  - b) Block diagram reduction rules
  - c) Mason's equation
  - d) Lagrange's equation
- 4) If finite number of blocks are connected in series or cascade configuration, then how are the blocks combined algebraically?
  - a) By addition
  - b) By multiplication
  - c) By differentiation
  - d) By integration
- 5) Which among the following is represented by a parabolic input signal?
  - a) Position
  - b) Force
  - c) Velocity
  - d) Acceleration
- 6) The position and velocity errors of a type-2 system are :
  - a) Constant, constant
  - b) Constant, infinity
  - c) Zero, constant
  - d) Zero, zero
- 7) On which factor does the steady state error of the system depend?
  - a) Order
  - b) Type
  - c) Size
  - d) Prototype
- 8) For drawing root locus, the angle of asymptote yields the direction along which \_\_\_\_\_ branches approach to infinity.
  - a)  $p + z$
  - b)  $p - z$
  - c)  $p / z$
  - d)  $p \times z$
- 9) What should be the nature of root locus about the real axis?
  - a) Asymmetric
  - b) Symmetric
  - c) Exponential
  - d) Decaying

- 10) In Routh array, if zero is found in the first column, then by which term it needs to be replaced?
- |             |                  |
|-------------|------------------|
| a) $\delta$ | b) $\eta$        |
| c) $\sigma$ | d) $\varepsilon$ |
- 11) Adding of poles in a transfer function causes compensation \_\_\_\_\_
- |               |                  |
|---------------|------------------|
| a) lag        | b) lead          |
| c) lag – lead | d) none of these |
- 12) With the knowledge of state space representation, the transfer function of the system \_\_\_\_\_
- |                             |                                 |
|-----------------------------|---------------------------------|
| a) Can be determined partly | b) Can be determined completely |
| c) Cannot be determined     | d) None of these                |
- 13) How is the sinusoidal transfer function obtained from the system transfer function in frequency domain?
- |                                            |                                           |
|--------------------------------------------|-------------------------------------------|
| a) Replacement of ' $j\omega$ ' by ' $s$ ' | b) Replacement of ' $s$ ' by ' $\omega$ ' |
| c) Replacement of ' $s$ ' by ' $j\omega$ ' | d) Replacement of ' $\omega$ ' by ' $s$ ' |
- 14) According to the property of state transition method,  $e^0$  is equal to \_\_\_\_\_
- |              |              |
|--------------|--------------|
| a) $I$       | b) $A$       |
| c) $e^{-At}$ | d) $-e^{At}$ |

**S.Y (B.Tech.) (Sem-II) (New) (CBCS) Examination: Oct/Nov-2022**  
**ELECTRONICS & TELECOMMUNICATION ENGINEERING**  
**Control System**

Day & Date: Monday, 06-03-2023  
 Time: 02:00 PM To 05:00 PM

Max. Marks: 56

**Instructions:** 1) All questions are compulsory.  
 2) Figures to the right indicates full marks

**Section – I**

**Q.2 Answer any Four questions.**

**16**

- Define a transfer function? Derive transfer function for closed loop control system.
- Compare open loop control system with closed loop control.
- Explain Mason's gain formula.
- What is a "TYPES" of system? Explain type 0 and type 1 system.
- Derive the time response of 1st order system to unit step.

**Q.3 Answer any two questions.**

**12**

- a) Find transfer function for given SFG diagram.

- b) Find the transfer function of the system

- c) Calculate  $K_p$ ,  $K_v$ ,  $K_a$  steady state error with open loop transfer function as:  
 $G(s) \cdot H(s) = 10(S + 2)(S + 3)/S(S + 1)(S + 4)(S + 5)$  and  $r(t) = 3 + t + t^2$

## Section – II

**Q.4 Answer any Four questions.****16**

- a) What is root locus? Explain all the steps which are required to draw root locus?
- b) Investigate the stability of the system with characteristics equation
$$Q(S) = S^4 + 6S^3 + 15S^2 + 5S + 3$$
- c) State the advantages of frequency response method.
- d) How Routh's criteria is used to study the relative stability?
- e) What is state transition matrix? State the properties of state transition matrix.

**Q.5 Answer any two questions.****12**

- a) Explain in a two special cases of Routh Criteria?
- b) Determine damping factor, under damped natural frequency, resonant peak & resonant Frequency for the system with closed loop transfer function

$$G(S) = \frac{36}{S^2 + 6S + 36}$$

- c) Explain in a detail Lead Lag compensator.

Max. Marks: 70

- Instructions:** 1) Q. No. 1 is compulsory. It should be solved in the first 30 minutes in answer book. Page no 03 (Starting page of the Answer Book). Each question carries one mark.  
 2) Don't forget to Mention question paper set (P/Q/R/S) on top of page.  
 3) Figures to the right indicates full marks  
 4) Assume suitable data wherever needed and mention it clearly.

**MCQ/Objective Type Questions**

Duration: 30 Minutes

Marks: 14

**Q.1 Choose the correct alternatives from the options.**

**14**

- 1) The position and velocity errors of a type-2 system are :  
 a) Constant, constant                      b) Constant, infinity  
 c) Zero, constant                              d) Zero, zero
- 2) On which factor does the steady state error of the system depend?  
 a) Order                                              b) Type  
 c) Size                                                d) Prototype
- 3) For drawing root locus, the angle of asymptote yields the direction along which \_\_\_\_\_ branches approach to infinity.  
 a)  $p + z$                                               b)  $p - z$   
 c)  $p / z$                                                 d)  $p \times z$
- 4) What should be the nature of root locus about the real axis?  
 a) Asymmetric                                      b) Symmetric  
 c) Exponential                                      d) Decaying
- 5) In Routh array, if zero is found in the first column, then by which term it needs to be replaced?  
 a)  $\delta$                                                       b)  $\eta$   
 c)  $\sigma$                                                       d)  $\varepsilon$
- 6) Adding of poles in a transfer function causes compensation \_\_\_\_\_.  
 a) lag                                                      b) lead  
 c) lag – lead                                              d) none of these
- 7) With the knowledge of state space representation, the transfer function of the system \_\_\_\_\_.  
 a) Can be determined partly                      b) Can be determined completely  
 c) Cannot be determined                              d) None of these
- 8) How is the sinusoidal transfer function obtained from the system transfer function in frequency domain?  
 a) Replacement of ' $j\omega$ ' by ' $s$ '                      b) Replacement of ' $s$ ' by ' $\omega$ '  
 c) Replacement of ' $s$ ' by ' $j\omega$ '                      d) Replacement of ' $\omega$ ' by ' $s$ '

- 9) According to the property of state transition method,  $e_0$  is equal to \_\_\_\_
  - a)  $I$
  - b)  $A$
  - c)  $e^{-At}$
  - d)  $-e^{At}$
- 10) Traffic light system is the example of:
  - a) Open-loop system
  - b) Closed-loop system
  - c) Both (a) and (b)
  - d) None of these
- 11) Which type of node comprises incoming as well as outgoing branches?
  - a) Source node
  - b) Sink node
  - c) Chain node
  - d) Main node
- 12) In a signal flow graph method, how is an overall transfer function of a system obtained?
  - a) Poisson's equation
  - b) Block diagram reduction rules
  - c) Mason's equation
  - d) Lagrange's equation
- 13) If finite number of blocks are connected in series or cascade configuration, then how are the blocks combined algebraically?
  - a) By addition
  - b) By multiplication
  - c) By differentiation
  - d) By integration
- 14) Which among the following is represented by a parabolic input signal?
  - a) Position
  - b) Force
  - c) Velocity
  - d) Acceleration

Set **S**

**S.Y (B.Tech.) (Sem-II) (New) (CBCS) Examination: Oct/Nov-2022**  
**ELECTRONICS & TELECOMMUNICATION ENGINEERING**  
**Control System**

Day & Date: Monday, 06-03-2023  
 Time: 02:00 PM To 05:00 PM

Max. Marks: 56

**Instructions:** 1) All questions are compulsory.  
 2) Figures to the right indicates full marks

**Section – I**

**Q.2 Answer any Four questions.**

16

- Define a transfer function? Derive transfer function for closed loop control system.
- Compare open loop control system with closed loop control.
- Explain Mason's gain formula.
- What is a "TYPES" of system? Explain type 0 and type 1 system.
- Derive the time response of 1st order system to unit step.

**Q.3 Answer any two questions.**

12

- a) Find transfer function for given SFG diagram.

- b) Find the transfer function of the system

- c) Calculate  $K_p$ ,  $K_v$ ,  $K_a$  steady state error with open loop transfer function as:  
 $G(s) \cdot H(s) = 10(S + 2)(S + 3)/S(S + 1)(S + 4)(S + 5)$  and  $r(t) = 3 + t + t^2$

## Section – II

**Q.4 Answer any Four questions.****16**

- a) What is root locus? Explain all the steps which are required to draw root locus?
- b) Investigate the stability of the system with characteristics equation
$$Q(S) = S^4 + 6S^3 + 15S^2 + 5S + 3$$
- c) State the advantages of frequency response method.
- d) How Routh's criteria is used to study the relative stability?
- e) What is state transition matrix? State the properties of state transition matrix.

**Q.5 Answer any two questions.****12**

- a) Explain in a two special cases of Routh Criteria?
- b) Determine damping factor, under damped natural frequency, resonant peak & resonant Frequency for the system with closed loop transfer function

$$G(S) = \frac{36}{S^2 + 6S + 36}$$

- c) Explain in a detail Lead Lag compensator.

**Analog Integrated Circuits**

Day & Date: Wednesday, 08-03-2023  
 Time: 02:00 PM To 05:00 PM

Max. Marks: 56

**Instructions:** 1) All questions are compulsory.  
 2) Figures to the right indicates full marks

**Section – I**

**Q.2 Attempt any four.** **16**

- Derive equations for  $I_{CQ}$  &  $V_{CEQ}$  of Dual input balanced output differential amplifier using transistors.
- Derive equation for ideal voltage gain of Inverting amplifier using virtual ground concept.
- Define any four electrical parameters of IC 741 with practical & ideal values.
- Explain basic integrator with i/p & o/p waveforms.
- For Inverting amplifier with feedback using IC 741,  $R_1 = 470 \Omega$  &  $R_F = 4.7 K \Omega$ . Calculate the values for  $A_F$ ,  $R_{iF}$ ,  $R_{oF}$  &  $f_F$ .  
 (For IC 741 Assume  $A = 200000$ ,  $R_i = 2M \Omega$ ,  $R_o = 75 \Omega$  &  $f_o = 5 Hz$ )

**Q.3 Attempt any two.** **12**

- Derive expressions for gain  $A_d$  for DIBO differential amplifier using AC equivalent circuit.
- Explain instrumentation amplifier with transducer bridge & derive expression of output voltage.
- Draw high frequency equivalent circuit of op-amp & obtain expression for  $A_{OL(f)}$  open loop gain as function of frequency.

**Section II**

**Q.4 Answer any four questions.** **16**

- Explain with neat diagram operation of window detector using op-amp.
- Draw & Explain op-amp precision full wave rectifier with i/p & o/p waveforms.
- Design RC phase shift oscillator using op-amp 741 for output frequency of 200 Hz.  
 (Assume  $C = 0.1 \mu F$ )
- Explain op-amp square wave generator with circuit diagram & waveforms.
- Explain mono stable multi vibrator using IC 555 with equation for output.

**Q.5 Answer any two questions.**

- a)** Explain op-amp triangular wave generator with circuit diagram & waveforms.
- b)** Design & explain first order low pass filter at cutoff frequency of 1 KHz with a pass band gain of 2.
- c)** Calculate  $V_{ut}$ ,  $V_{lt}$ , hysteresis voltage & draw o/p waveform for op-amp Schmitt trigger circuit With  $V_{in} = 1$  Vp-p sine wave signal,  $\pm V_{cc} = 15$  Volt,  $R_1 = 100 \Omega$ ,  $R_2 = 56 \text{ k}\Omega$  & IC 741.

**Seat  
No.**

Max. Marks: 70

Marks: 14

- 1) For audio frequency oscillator components used are \_\_\_\_\_.  
a) Crystal                                      b) LC  
c) RC                                                d) LRC
- 2) A duty cycle is less than \_\_\_\_\_ in saw tooth wave generator.  
a) 90%                                             b) 66.66%  
c) 50%                                             d) 20%
- 3) The voltage at threshold pin of IC 555 is \_\_\_\_\_.  
a)  $V_{cc}/3$                                           b)  $2 V_{cc}/3$   
c)  $V_{cc}$                                               d) All of these
- 4)  $V_{ref}$  for LM317 is \_\_\_\_\_.  
a) 1.25mV                                         b) 1.25 V  
c) 12.5 V                                            d) None of these
- 5) Butterworth filter is also called as \_\_\_\_\_ filter.  
a) Riple-riple                                    b) Riple-Flat  
c) Flat-ripple                                      d) Flat-Flat
- 6) For second order active filter gain roll off rate in stop band is \_\_\_\_\_.  
a) 40 dB/Decade                                b) 20 dB/decade  
c) 90dB/decade                                 d) 60 dB/decade
- 7) If square wave input is applied to a differentiator, then output will be \_\_\_\_\_.  
a) Inverted square wave                      b) Cosine wave  
c) Sine wave                                        d) Spike wave
- 8) Differential voltage gain of DIBO differential amplifier is \_\_\_\_\_.  
a)  $R_c/2r_e$                                           b)  $2R_c/r_e$   
c)  $R_c/r_e$                                             d)  $2 \beta_{ac} r_e$
- 9) What should be maximum bandwidth for a gain of 10 in case of IC 741?  
a) 1 MHz                                            b) 100 KHz  
c) 10 KHz                                           d) 1 KHz

- 10) The type of feedback used in closed loop inverting amplifier is \_\_\_\_\_.
  - a) Voltage series
  - b) Current series
  - c) Current shunt
  - d) Voltage shunt
- 11)  $\pm V_{sat} / (1+AB)$  is total output offset voltage for \_\_\_\_\_.
  - a) Inverting amplifier
  - b) Non- Inverting amplifier
  - c) Both b & a
  - d) None of these
- 12) I to V converter is special case of \_\_\_\_\_ amplifier.
  - a) Non-inverting
  - b) Inverting
  - c) Differential
  - d) Scaling
- 13) For IC 741 maximum Input bias current at supply voltage  $\pm 15$  volts dc is \_\_\_\_\_.
  - a) 75 nA
  - b) 100 nA
  - c) 750 nA
  - d) 500 nA
- 14) A DC inserter is \_\_\_\_\_.
  - a) Clipper
  - b) Peak detector
  - c) Clamper
  - d) Integrator

## Marks: 14

- 1) Vref for LM317 is \_\_\_\_\_.  
a) 1.25mV                      b) 1.25 V  
c) 12.5 V                      d) None of these
- 2) Butterworth filter is also called as \_\_\_\_\_ filter.  
a) Riple-ripple                  b) Riple-Flat  
c) Flat-ripple                  d) Flat-Flat
- 3) For second order active filter gain roll off rate in stop band is \_\_\_\_\_.  
a) 40 dB/Decade                  b) 20 dB/decade  
c) 90dB/decade                  d) 60 dB/decade
- 4) If square wave input is applied to a differentiator, then output will be \_\_\_\_\_.  
a) Inverted square wave          b) Cosine wave  
c) Sine wave                      d) Spike wave
- 5) Differential voltage gain of DIBO differential amplifier is \_\_\_\_\_.  
a)  $R_c/2r_e$                       b)  $2R_c/r_e$   
c)  $R_c/r_e$                       d)  $2\beta_{ac} r_e$
- 6) What should be maximum bandwidth for a gain of 10 in case of IC 741?  
a) 1 MHz                          b) 100 KHz  
c) 10 KHz                          d) 1 KHz
- 7) The type of feedback used in closed loop inverting amplifier is \_\_\_\_\_.  
a) Voltage series                  b) Current series  
c) Current shunt                  d) Voltage shunt
- 8)  $\pm V_{sat} / (1+AB)$  is total output offset voltage for \_\_\_\_\_.  
a) Inverting amplifier              b) Non-Inverting amplifier  
c) Both b & a                      d) None of these
- 9) I to V converter is special case of \_\_\_\_\_ amplifier.  
a) Non-inverting                  b) Inverting  
c) Differential                      d) Scaling

- 10) For IC 741 maximum Input bias current at supply voltage  $\pm 15$  volts dc is \_\_\_\_\_.  
a) 75 nA  
b) 100 nA  
c) 750 nA  
d) 500 nA
- 11) A DC inserter is \_\_\_\_\_.  
a) Clipper  
b) Peak detector  
c) Clamper  
d) Integrator
- 12) For audio frequency oscillator components used are \_\_\_\_\_.  
a) Crystal  
b) LC  
c) RC  
d) LRC

**MCQ/Objective Type Questions**

Duration: 30 Minutes

Marks: 14

**Q.1 Choose the correct alternatives from the options and rewrite the sentence. 14**

- 1) Which is the greatest disadvantage of Pulse Code Modulation?
  - a) Highly prone to noise
  - b) Cannot travel long distances
  - c) Its inability to handle analog signals
  - d) large bandwidth is required for it
- 2) In a uni-polar RZ format, \_\_\_\_\_.
  - a) The waveform has zero value for symbol '0'
  - b) The waveform has A volts for symbol '1'
  - c) The waveform has positive and negative values for '1' and '0' symbol respectively
  - d) Both a) and b) are correct
- 3) Information rate is defined as \_\_\_\_\_.
  - a) Information per unit time
  - b) Average number of bits of information per second
  - c) rH
  - d) All of the above
- 4) In Delta Modulation, the bit rate is \_\_\_\_\_.
  - a) N times the sampling frequency
  - b) N times the modulating frequency
  - c) N times the nyquist criteria
  - d) None of the above
- 5) FSK reception is \_\_\_\_\_.
  - a) Phase Coherent
  - b) Phase non coherent
  - c) Phase Coherent & non coherent
  - d) None of the mentioned
- 6) In On- Off keying, the carrier signal is transmitted with signal value 1 and '0' indicates \_\_\_\_\_.
 

|                                   |                               |
|-----------------------------------|-------------------------------|
| a) No carrier                     | b) Half the carrier amplitude |
| c) Amplitude of modulating signal | d) None of the above          |

- 7) ASK modulated signal has the bandwidth \_\_\_\_\_.  
a) Same as the bandwidth of baseband signal  
b) Half the bandwidth of baseband signal  
c) Double the bandwidth of baseband signal  
d) None of the above
- 8) The bit rate of digital communication system is M Kbps. The modulation used is 16QAM. The minimum bandwidth required for ideal transmission is \_\_\_\_\_.  
a) M/12 KHz  
b) M/16 KHz  
c) M/2 KHz  
d) M/22 KHz
- 9) The modulation normally used with digital data is \_\_\_\_\_.  
a) FM  
b) AM  
c) SSB  
d) QPSK
- 10) Matched filter is \_\_\_\_\_ technique.  
a) Modulation  
b) Demodulation  
c) Modulation & Demodulation  
d) None of the above
- 11) QPSK system uses a phase shift of \_\_\_\_\_.  
a)  $\pi$   
b)  $\pi/2$   
c)  $\pi/4$   
d)  $2\pi$
- 12) A correlation receiver consists of \_\_\_\_\_.  
a) a multiplier and integrator  
b) an integrator only  
c) Multiplier  
d) None of the above
- 13) In Adaptive Delta Modulation, the slope error reduces and \_\_\_\_\_.  
a) Quantization error decreases  
b) Quantization error increases  
c) Quantization error remains same  
d) None of the above
- 14) Nyquist criterion helps in \_\_\_\_\_.  
a) Transmitting the signal without ISI  
b) Reduction in transmission bandwidth  
c) Increase in transmission bandwidth  
d) Receiving the signal without ISI

Set **P**

**S.Y (B. Tech) (Sem-II) (New) (CBCS) Examination: Oct/Nov-2022**  
**ELECTRONICS & TELECOMMUNICATION ENGINEERING**  
**Principles of Digital Communication**

Day & Date: Thursday, 09-03-2023  
 Time: 02:00 PM To 05:00 PM

Max. Marks: 56

**Instructions:** 1) All question are compulsory.  
 2) Section I and Section II are compulsory.

**Section – I****Q.2 Attempt any Four.****16**

- Define the terms: Channel Capacity & Mutual Information.
- With the help of neat sketch explain eye Pattern.
- Explain Uniform & Non uniform quantization.
- With the help of block diagram explain DPSK.
- Compare Analog & Digital system

**Q.3 Attempt any Two.****12**

- With the help of block diagram explain working of Adaptive delta modulation. What are its advantages?
- With the help of block diagram & waveform explain FSK Modulation technique.
- The Discrete source transmits message  $X_1$ ,  $X_2$  &  $X_3$  with probabilities 0.3, 0.4 & 0.3 respectively. The source is connected to channel given in fig. Calculate all Entropy.

**Section – II****Q.4 Attempt any Four.****16**

- Explain Operation of QPSK transmitter along with the constellation diagram.
- Write Short Note on QAM Signaling Scheme.
- With the help of block diagram explain optimum receiver.
- Explain Frame synchronization in detail
- What is Syndrome testing? Explain it with detail.

**Q.5 Attempt any two.**

- a) Define Synchronization. With the help of block diagram explain symbol synchronization.
- b) Explain M-Ary differential PSK transmitter & receiver.
- c) Define linear codes. The generator matrix for (6,3) block code is given below. Find out all code vectors for this code.

$$G = \begin{bmatrix} 1 & 0 & 0 & 1 & 1 & 0 \\ 0 & 1 & 0 & 0 & 1 & 1 \\ 0 & 0 & 1 & 1 & 1 & 1 \end{bmatrix}$$

**Seat  
No.**

**Set Q**

## Max. Marks: 70

Marks: 14

- a) Transmitting the signal without ISI
- b) Reduction in transmission bandwidth
- c) Increase in transmission bandwidth
- d) Receiving the signal without ISI

- 8) Which is the greatest disadvantage of Pulse Code Modulation?
- a) Highly prone to noise
  - b) Cannot travel long distances
  - c) Its inability to handle analog signals
  - d) large bandwidth is required for it
- 9) In a uni-polar RZ format, \_\_\_\_\_.  
a) The waveform has zero value for symbol '0'  
b) The waveform has A volts for symbol '1'  
c) The waveform has positive and negative values for '1' and '0' symbol respectively  
d) Both a) and b) are correct
- 10) Information rate is defined as \_\_\_\_\_.  
a) Information per unit time  
b) Average number of bits of information per second  
c) rH  
d) All of the above
- 11) In Delta Modulation, the bit rate is \_\_\_\_\_.  
a) N times the sampling frequency  
b) N times the modulating frequency  
c) N times the nyquist criteria  
d) None of the above
- 12) FSK reception is \_\_\_\_\_.  
a) Phase Coherent  
b) Phase non coherent  
c) Phase Coherent & non coherent  
d) None of the mentioned
- 13) In On- Off keying, the carrier signal is transmitted with signal value 1 and '0' indicates \_\_\_\_\_.  
a) No carrier  
b) Half the carrier amplitude  
c) Amplitude of modulating signal  
d) None of the above
- 14) ASK modulated signal has the bandwidth \_\_\_\_\_.  
a) Same as the bandwidth of baseband signal  
b) Half the bandwidth of baseband signal  
c) Double the bandwidth of baseband signal  
d) None of the above

Day & Date: Thursday, 09-03-2023  
Time: 02:00 PM To 05:00 PM

Max. Marks: 70

**Instructions:** 1) Q. No. 1 is compulsory. It should be solved in the first 30 minutes in answer book. Page no 03 (Starting page of the Answer Book). Each question carries one mark.  
2) Don't forget to Mention question paper set (P/Q/R/S) on top of page.  
3) Figures to the right indicates full marks.  
4) Assume suitable data wherever needed and mention it clearly.

Duration: 30 Minutes

Marks: 14

**Q.1 Choose the correct alternatives from the options and rewrite the sentence. 14**

- 1) QPSK system uses a phase shift of \_\_\_\_\_.  
a)  $\pi$   
b)  $\pi/2$   
c)  $\pi/4$   
d)  $2\pi$
- 2) A correlation receiver consists of \_\_\_\_\_.  
a) a multiplier and integrator  
b) an integrator only  
c) Multiplier  
d) None of the above
- 3) In Adaptive Delta Modulation, the slope error reduces and \_\_\_\_\_.  
a) Quantization error decreases  
b) Quantization error increases  
c) Quantization error remains same  
d) None of the above
- 4) Nyquist criterion helps in \_\_\_\_\_.  
a) Transmitting the signal without ISI  
b) Reduction in transmission bandwidth  
c) Increase in transmission bandwidth  
d) Receiving the signal without ISI
- 5) Which is the greatest disadvantage of Pulse Code Modulation?  
a) Highly prone to noise  
b) Cannot travel long distances  
c) Its inability to handle analog signals  
d) large bandwidth is required for it
- 6) In a uni-polar RZ format, \_\_\_\_\_.  
a) The waveform has zero value for symbol '0'  
b) The waveform has A volts for symbol '1'  
c) The waveform has positive and negative values for '1' and '0' symbol respectively  
d) Both a) and b) are correct

 4) Assume suitable data wherever needed and mention it clearly.

**MCQ/Objective Type Questions**

Duration: 30 Minutes

Marks: 14

**Q.1 Choose the correct alternatives from the options.**

**14**

- 1) Shifting property of impulse is  $X[n] * \delta[n - n_0] =$ 
  - a)  $X[n]$
  - b)  $\delta[n]$
  - c)  $X[n - n_0]$
  - d)  $\delta[n - n_0]$
- 2) The system  $y(t) = x^2(t) + 6$  is \_\_\_\_\_.
  - a) Linear
  - b) Non Linear
  - c) Invertible
  - d) None of these
- 3) The system  $y[n] = x[-n]$  is \_\_\_\_\_.
  - a) Time variant
  - b) Time invariant
  - c) Both
  - d) None of these
- 4) Given sequence  $x_1[n] = \{1, -2, 3, 1\}$  &  $x_2[n] = \{2, -3, -2\}$  then their convolution  $y[n]$  is
  - a)  $\{2, -7, 10, -7\}$
  - b)  $\{2, -7, 10, -3, -9, -2\}$
  - c)  $\{10, -7, -9, 2\}$
  - d)  $\{2, -7, 10, -7, 9\}$
- 5) Odd signal satisfies
  - a)  $x(-t) = x(t)$
  - b)  $x[-n] = -x[n]$
  - c)  $x[n + 1] = a x[n] + b$
  - d)  $dx(t)/dt = \text{constant}$
- 6) Energy signals are the signals with \_\_\_\_\_.
  - a)  $0 < E < \infty, P = 0$
  - b)  $0 < E < \infty, P = \infty$
  - c)  $0 < P < \infty, E = \infty$
  - d)  $0 < P < \infty, E = 0$
- 7) Any periodic signal may be called as \_\_\_\_\_.
  - a) Causal
  - b) Non Causal
  - c) Anti Causal
  - d) None of these
- 8) ROC of sequence  $x[n] = u[n]$  is \_\_\_\_\_.
  - a)  $|z| > 1$
  - b)  $|z| < 1$
  - c) No ROC
  - d)  $-1 < |z| < 1$
- 9) If a signal  $f(t)$  has energy  $E$ , the energy of  $f(2t)$  is
  - a)  $E$
  - b)  $E/2$
  - c)  $2E$
  - d)  $4E$

- 10) ZT reduces to FT when it is evaluated on \_\_\_\_\_ circle.  
a) Half  
b) Z  
c) Unit  
d) Imaginary
- 11) Following system is time invariant.  
a)  $y(t) = x(2t)$   
b)  $y(t) = x(t) + x(t - 1)$   
c)  $y(t) = x(t/2)$   
d)  $y(t) = x(-t)$
- 12) Sampled frequency less than Nyquist rate is called \_\_\_\_\_ sampling.  
a) Under  
b) Over  
c) Critical  
d) None.
- 13) According to properties of ZT, ROC cannot contain.  
a) Zeros  
b) Poles  
c) Both  
d) None
- 14) Unit ramp signal can be expressed as  
a)  $u(t) + t$   
b)  $u(t) - t$   
c)  $u(t)/t$   
d)  $t \cdot u(t)$

Set **P**

**S.Y. (B.Tech.) (Sem - II) (New) (CBCS) Examination: Oct/Nov-2022**  
**ELECTRONICS & TELECOMMUNICATION ENGINEERING**  
**Signals and Systems**

Day & Date: Friday, 10-03-2023  
 Time: 02:00 PM To 05:00 PM

Max. Marks: 56

**Instructions:** 1) All questions are compulsory.  
 2) Figures to the right indicate full marks.

**Section – I****Q.2 Attempt any Four.****16**

- 1) Sketch given signal  $y(t) = r(t - 1) + u(t)$ .
- 2) Find even & odd component of  $x(t) = \cos(t) + \sin(t) + \cos(t) \cdot \sin(t)$ .
- 3) Obtain direct form I structure of system described by  

$$y(n) - (2/3)y(n-1) + (1/5)y(n-2) = x(n) + 2x(n-1)$$
- 4) Determine energy of signal.  $X[n] = (1/2)^n u(n)$ .
- 5) Let  $x[n] = 0$  for  $n < -2$  and  $n > 4$ . For each signal given below determine values of  $n$  for which it is guaranteed to be zero.

- i)  $x[n-3]$
- ii)  $x[n+4]$
- iii)  $x[-n]$
- iv)  $x[-n+2]$

**Q.3 Attempt any two:****12**

- 1) Determine convolution of following signals. Sketch result.  

$$y(n) = (0.5)^n u[n] \quad x(n) = u[n]$$
- 2) Determine whether following system is 1. Static or Dynamic 2. Linear or nonlinear 3. Time variant or time in variant 4. Causal or Non-causal 5. Stable or Unstable.  $y(t) = 10 x(t) + 5$
- 3) Find even and odd part of signal  $x[n] = \{3, 2, 1, 1, 1, 2, 1, 1\}$

**Section – II****Q.4 Attempt any Four.****16**

- 1) State & Prove convolution property of Fourier Transform.
- 2) Find Z.T. with its ROC for  $x(n) = (a^n)u[n]$ .
- 3) Find F.T of  $x(t) = e^{-at}u(t)$ .
- 4) Find Nyquist sampling rate for  $x(t) = 5 \cos(1000 \pi t), \cos(6000 \pi t)$ .
- 5) The analog signal  $m(t)$  is given below. Calculate Nyquist sampling rate.  

$$m(t) = 4 \cos(50 \pi t) + 8 \sin(300 \pi t) - \cos(100 \pi t)$$

**Q.5 Attempt any two:**

- 1) The analog signal given below is  $m(t) = 4 \cos 100 \pi t$ .
  - a) Calculate Nyquist rate
  - b) What is DT signal after sampling for
    - 1)  $F_s = 200 \text{ Hz}$
    - 2)  $F_s = 75 \text{ Hz}$ .
- 2) Find Fourier series coefficient using trigonometric Fourier series method for Full wave rectified signal with fundamental frequency  $\omega_0 = \pi$ .
- 3) Determine the sequence  $x(n)$  associated with  $ZT$  given below using power series method.  $X(Z) = (Z^2 + Z)/(Z^3 - 3Z^2 + 3Z - 1)$ ; Right handed sequence.

Set **Q**

**S.Y. (B.Tech.) (Sem - II) (New) (CBCS) Examination: Oct/Nov-2022**  
**ELECTRONICS & TELECOMMUNICATION ENGINEERING**  
**Signals and Systems**

Day & Date: Friday, 10-03-2023  
 Time: 02:00 PM To 05:00 PM

Max. Marks: 56

**Instructions:** 1) All questions are compulsory.  
 2) Figures to the right indicate full marks.

**Section – I****Q.2 Attempt any Four.****16**

- 1) Sketch given signal  $y(t) = r(t - 1) + u(t)$ .
- 2) Find even & odd component of  $x(t) = \cos(t) + \sin(t) + \cos(t) \cdot \sin(t)$ .
- 3) Obtain direct form I structure of system described by  

$$y(n) - (2/3)y(n-1) + (1/5)y(n-2) = x(n) + 2x(n-1)$$
- 4) Determine energy of signal.  $X[n] = (1/2)^n u(n)$ .
- 5) Let  $x[n] = 0$  for  $n < -2$  and  $n > 4$ . For each signal given below determine values of  $n$  for which it is guaranteed to be zero.

- i)  $x[n-3]$
- ii)  $x[n+4]$
- iii)  $x[-n]$
- iv)  $x[-n+2]$

**Q.3 Attempt any two:****12**

- 1) Determine convolution of following signals. Sketch result.  
 $y(n) = (0.5)^n u[n]$        $x(n) = u[n]$
- 2) Determine whether following system is 1. Static or Dynamic 2. Linear or nonlinear 3. Time variant or time invariant 4. Causal or Non-causal 5. Stable or Unstable.  $y(t) = 10x(t) + 5$
- 3) Find even and odd part of signal  $x[n] = \{3, 2, 1, 1, 1, 2, 1, 1\}$

**Section – II****Q.4 Attempt any Four.****16**

- 1) State & Prove convolution property of Fourier Transform.
- 2) Find Z.T. with its ROC for  $x(n) = (a^n)u[n]$ .
- 3) Find F.T of  $x(t) = e^{-at}u(t)$ .
- 4) Find Nyquist sampling rate for  $x(t) = 5 \cos(1000\pi t), \cos(6000\pi t)$ .
- 5) The analog signal  $m(t)$  is given below. Calculate Nyquist sampling rate.  

$$m(t) = 4 \cos(50\pi t) + 8 \sin(300\pi t) - \cos(100\pi t)$$

**Q.5 Attempt any two:**

- 1) The analog signal given below is  $m(t) = 4 \cos 100 \pi t$ .
  - a) Calculate Nyquist rate
  - b) What is DT signal after sampling for
    - 1)  $F_s = 200 \text{ Hz}$
    - 2)  $F_s = 75 \text{ Hz}$ .
- 2) Find Fourier series coefficient using trigonometric Fourier series method for Full wave rectified signal with fundamental frequency  $\omega_0 = \pi$ .
- 3) Determine the sequence  $x(n)$  associated with  $ZT$  given below using power series method.  $X(Z) = (Z^2 + Z)/(Z^3 - 3Z^2 + 3Z - 1)$ ; Right handed sequence.

**MCQ/Objective Type Questions**

Duration: 30 Minutes

Marks: 14

**Q.1 Choose the correct alternatives from the options.**

**14**

- 1) Following system is time invariant.
 

|                    |                             |
|--------------------|-----------------------------|
| a) $y(t) = x(2t)$  | b) $y(t) = x(t) + x(t - 1)$ |
| c) $y(t) = x(t/2)$ | d) $y(t) = x(-t)$           |
- 2) Sampled frequency less than Nyquist rate is called \_\_\_\_\_ sampling.
 

|             |          |
|-------------|----------|
| a) Under    | b) Over  |
| c) Critical | d) None. |
- 3) According to properties of ZT, ROC cannot contain.
 

|          |          |
|----------|----------|
| a) Zeros | b) Poles |
| c) Both  | d) None  |
- 4) Unit ramp signal can be expressed as
 

|               |               |
|---------------|---------------|
| a) $u(t) + t$ | b) $u(t) - t$ |
| c) $u(t)/t$   | d) $t.u(t)$   |
- 5) Shifting property of impulse is  $X[n] * \delta[n - n_0] =$ 

|                 |                      |
|-----------------|----------------------|
| a) $X[n]$       | b) $\delta[n]$       |
| c) $X[n - n_0]$ | d) $\delta[n - n_0]$ |
- 6) The system  $y(t) = x^2(t) + 6$  is \_\_\_\_\_.
 

|               |                  |
|---------------|------------------|
| a) Linear     | b) Non Linear    |
| c) Invertible | d) None of these |
- 7) The system  $y[n] = x[-n]$  is \_\_\_\_\_.
 

|                 |                   |
|-----------------|-------------------|
| a) Time variant | b) Time invariant |
| c) Both         | d) None of these  |
- 8) Given sequence  $x_1[n] = \{1, -2, 3, 1\}$  &  $x_2[n] = \{2, -3, -2\}$  then their convolution  $y[n]$  is
 

|                        |                                |
|------------------------|--------------------------------|
| a) $\{2, -7, 10, -7\}$ | b) $\{2, -7, 10, -3, -9, -2\}$ |
| c) $\{10, -7, -9, 2\}$ | d) $\{2, -7, 10, -7, 9\}$      |
- 9) Odd signal satisfies
 

|                            |                                 |
|----------------------------|---------------------------------|
| a) $x(-t) = x(t)$          | b) $x[-n] = -x[n]$              |
| c) $x[n + 1] = a x[n] + b$ | d) $dx(t)/dt = \text{constant}$ |

 2) Figures to the right indicate full marks.

**Section – I**

**Q.2 Attempt any Four.**

**16**

- 1) Sketch given signal  $y(t) = r(t - 1) + u(t)$ .
- 2) Find even & odd component of  $x(t) = \cos(t) + \sin(t) + \cos(t) \cdot \sin(t)$ .
- 3) Obtain direct form I structure of system described by  

$$y(n) - (2/3)y(n-1) + (1/5)y(n-2) = x(n) + 2x(n-1)$$
- 4) Determine energy of signal.  $X[n] = (1/2)^n u(n)$ .
- 5) Let  $x[n] = 0$  for  $n < -2$  and  $n > 4$ . For each signal given below determine values of  $n$  for which it is guaranteed to be zero.

- i)  $x[n-3]$
- ii)  $x[n+4]$
- iii)  $x[-n]$
- iv)  $x[-n+2]$

**Q.3 Attempt any two:**

**12**

- 1) Determine convolution of following signals. Sketch result.  
 $y(n) = (0.5)^n u[n]$        $x(n) = u[n]$
- 2) Determine whether following system is 1. Static or Dynamic 2. Linear or nonlinear 3. Time variant or time invariant 4. Causal or Non-causal 5. Stable or Unstable.  $y(t) = 10x(t) + 5$
- 3) Find even and odd part of signal  $x[n] = \{3, 2, 1, 1, 1, 2, 1, 1\}$

**Section – II**

**Q.4 Attempt any Four.**

**16**

- 1) State & Prove convolution property of Fourier Transform.
- 2) Find Z.T. with its ROC for  $x(n) = (a^n)u[n]$ .
- 3) Find F.T of  $x(t) = e^{-at}u(t)$ .
- 4) Find Nyquist sampling rate for  $x(t) = 5 \cos(1000\pi t) \cos(6000\pi t)$ .
- 5) The analog signal  $m(t)$  is given below. Calculate Nyquist sampling rate.  

$$m(t) = 4 \cos(50\pi t) + 8 \sin(300\pi t) - \cos(100\pi t)$$

**Q.5 Attempt any two:**

- 1) The analog signal given below is  $m(t) = 4 \cos 100 \pi t$ .
  - a) Calculate Nyquist rate
  - b) What is DT signal after sampling for
    - 1)  $F_s = 200 \text{ Hz}$
    - 2)  $F_s = 75 \text{ Hz}$ .
- 2) Find Fourier series coefficient using trigonometric Fourier series method for Full wave rectified signal with fundamental frequency  $\omega_0 = \pi$ .
- 3) Determine the sequence  $x(n)$  associated with  $ZT$  given below using power series method.  $X(Z) = (Z^2 + Z)/(Z^3 - 3Z^2 + 3Z - 1)$ ; Right handed sequence.

**MCQ/Objective Type Questions**

Duration: 30 Minutes

Marks: 14

**Q.1 Choose the correct alternatives from the options.**

**14**

- 1) Which of the following is an application of Stack Data Structure?
  - a) Backtracking
  - b) Expression evaluation
  - c) Expression conversion
  - d) All of the above
- 2) Which of the following is not the type of queue?
  - a) Priority queue
  - b) Single-ended queue
  - c) Circular queue
  - d) Simple Queue
- 3) Which of the following is a linear data structure?
  - a) Array
  - b) AVL Tree
  - c) Binary Tree
  - d) Graph
- 4) In Linked List implementation, a node carries information regarding \_\_\_\_\_.
  - a) Data
  - b) Link
  - c) Data and Link
  - d) Node
- 5) What is the number of edges present in a complete graph having n vertices?
  - a)  $(n * (n + 1))/2$
  - b)  $(n * (n - 1))/2$
  - c) n
  - d) Information given is insufficient
- 6) A B-tree of order 4 and of height 3 will have a maximum of \_\_\_\_\_ keys.
  - a) 255
  - b) 63
  - c) 127
  - d) 188
- 7) What is the maximum number of swaps that can be performed in the Selection Sort algorithm?
  - a) n-1
  - b) n-2
  - c) n
  - d) 1
- 8) Which of the following is the infix expression?
  - a) A+B\*C
  - b) +A\*BC
  - c) ABC+\*
  - d) None of above
- 9) When the user tries to delete the element from the empty stack then the condition is said to be a \_\_\_\_\_.
  - a) Underflow
  - b) Garbage collection
  - c) Overflow
  - d) None of the above

- 10)** With what data structure can a priority queue be implemented?
- a) Array
  - b) List
  - c) Heap
  - d) Tree
- 11)** How can we initialize an array in C language?
- a) `int arr[2] = (10, 20)`
  - b) `int arr(2) = {10, 20}`
  - c) `int arr[2] = {10, 20}`
  - d) `int arr(2) = (10, 20)`
- 12)** Which of the following sorting algorithms can be used to sort a random linked list with minimum time complexity?
- a) Insertion Sort
  - b) Quick Sort
  - c) Heap Sort
  - d) Merge Sort
- 13)** Linear search it is a \_\_\_\_\_.
- a) Circular search
  - b) Random search
  - c) Sequential search
  - d) None of the above
- 14)** What is the Worst case for binary search?
- a)  $O(\log n)$
  - b)  $O(n \log n)$
  - c)  $O(n)$
  - d)  $O(1)$

  - c)  $O(n)$
  - d)  $O(1)$
- 12) Which of the following is an application of Stack Data Structure?
  - a) Backtracking
  - b) Expression evaluation
  - c) Expression conversion
  - d) All of the above
- 13) Which of the following is not the type of queue?
  - a) Priority queue
  - b) Single-ended queue
  - c) Circular queue
  - d) Simple Queue
- 14) Which of the following is a linear data structure?
  - a) Array
  - b) AVL Tree
  - c) Binary Tree
  - d) Graph

**Set R**

**S.Y. (B.Tech.) (Sem - II) (New) (CBCS) Examination: Oct/Nov-2022**  
**ELECTRONICS & TELECOMMUNICATION ENGINEERING**  
**Data Structures**

Day & Date: Tuesday, 14-03-2023  
Time: 02:00 PM To 05:00 PM

Max. Marks: 56

**Instructions:** 1) All questions are compulsory.  
2) Figures to the right indicates full marks.

**Section – I**

**Q.2 Solve any four of the following. 16**

- a) Explain the different Operations in data Structures.
- b) Define Expression representations with different representations techniques.
- c) What is mean by Queue? Explain with any one type of queue.
- d) Define Stack Applications.
- e) Convert Infix to Postfix form.  $(A+B/C*D)$

**Q.3 Solve any two of the following. 12**

- a) Define Stack & its operations with any one algorithm.
- b) Explain Searching techniques with their complexity analysis.
- c) Define Asymptotic Notations in data structures.

**Section II**

**Q.4 Solve any four of the following. 16**

- a) Explain Linked list with representation.
- b) Write short note on Trees.
- c) Explain the Advantages & Disadvantages of Linked list.
- d) Define Different types of Trees.
- e) Explain Basic Terminologies and Representations in Graph.

**Q.5 Solve any two of the following. 12**

- a) Explain different types of linked list.
- b) Explain basics of hashing. Different Hashing techniques.
- c) Explain different types of sorting algorithms.

**S.Y. (B.Tech.) (Sem - II) (New) (CBCS) Examination: Oct/Nov-2022**  
**ELECTRONICS & TELECOMMUNICATION ENGINEERING**  
**Data Structures**

Max. Marks: 70

**Instructions:** 1) Q. No. 1 is compulsory. It should be solved in the first 30 minutes in answer book. Page no 03 (Starting page of the Answer Book). Each question carries one mark.  
2) Don't forget to Mention question paper set (P/Q/R/S) on top of page.  
3) Figures to the right indicate full marks.

Marks: 14

14

- Page 10 of 12

- 11) When the user tries to delete the element from the empty stack then the condition is said to be a \_\_\_\_\_.
  - a) Underflow
  - b) Garbage collection
  - c) Overflow
  - d) None of the above
- 12) With what data structure can a priority queue be implemented?
  - a) Array
  - b) List
  - c) Heap
  - d) Tree
- 13) How can we initialize an array in C language?
  - a) `int arr[2] = (10, 20)`
  - b) `int arr(2) = {10, 20}`
  - c) `int arr[2] = {10, 20}`
  - d) `int arr(2) = (10, 20)`
- 14) Which of the following sorting algorithms can be used to sort a random linked list with minimum time complexity?
  - a) Insertion Sort
  - b) Quick Sort
  - c) Heap Sort
  - d) Merge Sort

Marks: 14

## 14

- 1) A process by which we estimate the value of dependent variable on the basis of one or more independent variables is called: \_\_\_\_\_.  
a) Correlation  
b) Regression  
c) Residual  
d) Slope
- 2) The slope of the regression line of Y on X is also called the: \_\_\_\_\_.  
a) Correlation coefficient of X on Y  
b) Correlation coefficient of Y on X  
c) Regression coefficient of X on Y  
d) Regression coefficient of Y on X
- 3) Prediction is \_\_\_\_\_.  
a) discipline in statistics used to find projections in multidimensional data  
b) value entered in database by expert  
c) the result of application of specific theory or rule in a specific case  
d) independent of data
- 4) Like the probabilistic view, the \_\_\_\_\_ view allows us to associate a Probability of membership with each classification.  
a) deductive  
b) exemplar  
c) classical  
d) inductive
- 5) In the example of predicting number of babies based on stork's population, Number of babies is \_\_\_\_\_.  
a) feature  
b) observation  
c) outcome  
d) attribute
- 6) Supervised learning and unsupervised clustering both require which is correct according to the statement.  
a) input attribute  
b) hidden attribute  
c) output attribute  
d) categorical attribute
- 7) Which of the following mentioned standard Probability density functions is applicable to discrete Random Variables?  
a) Gaussian Distribution  
b) Poisson Distribution  
c) Rayleigh Distribution  
d) Exponential Distribution

- 8) PCA is \_\_\_\_\_.  
a) backward feature selection      b) forward feature selection  
c) feature extraction      d) none of these
- 9) Mutually Exclusive events \_\_\_\_\_.  
a) Contain all sample points  
b) Contain all common sample points  
c) Does not contain any sample point  
d) Does not contain any common sample point
- 10) Impact of high variance on the training set?  
a) under fitting      b) over fitting  
c) both under fitting & over fitting      d) depends upon the dataset
- 11) What is an eigenvector?  
a) The proportion of the variance explained in the matrix  
b) A higher-order dimension that subsumes all of the lower-order errors  
c) A higher-order dimension that subsumes similar lower-order dimensions  
d) A higher-order dimension that subsumes all lower-order dimensions
- 12) A measurable property or parameter of the data-set is \_\_\_\_\_.  
a) training data      b) test data  
c) Feature      d) validation data
- 13) Which of the following techniques would perform better for reducing dimensions of a data set?  
a) removing columns which have high variance in data  
b) removing columns which have too many missing value  
c) removing columns with dissimilar data trends  
d) None of the above
- 14) What does dimensionality reduction reduce?  
a) collinearity      b) stochastic  
c) entropy      d) performance

**S. Y. (B.Tech.) (Sem - II) (New) (CBCS) Examination: Oct/Nov-2022**  
**ELECTRONICS & TELECOMMUNICATION ENGINEERING**  
**Computational Statistics**

Day &amp; Date: Thursday, 16-03-2023

Max. Marks: 56

Time: 02:00 PM To 05:00 PM

**Instructions:** 1) All Questions are compulsory.  
 2) Figures to the right indicate full marks.

**Section – I**

- Q.2 Answer the following questions. (Any Four) 16**
- Explain the terms with example.
    - Sample space
    - Mutually exclusive events
    - Conditional Probability
  - Describe Bayes's theorem in details with an example
  - Discuss Conditional probability with an example in detail.
  - Explain the simple linear regression model in detail.
  - Discuss matrix factorization in detail.
- Q.3 Answer the following questions. (Any One) 06**
- Write a short note on Gaussian Distribution.
  - Explain Eigenvectors centrality in detail.
- Q.4 Explain the goodness of fitting in multiple regression model. 06**

**Section – II**

- Q.5 Answer the following questions. (Any Four) 16**
- What are the important objectives of machine learning?
  - How do you design learning system? Explain with examples.
  - Differentiate between Training data and Testing Data.
  - Which are the applications of machine learning?
  - Differentiate between Supervised, Unsupervised and Reinforcement Learning.
- Q.6 Answer the following questions. (Any One) 06**
- What do you mean by a well -posed learning problem? Explain the important features that are required to well -define a learning problem.
  - Explain the significance of Dimensionality Reduction.
- Q.7 What is Bias, Variance and what do you mean by Bias-Variance Tradeoff? And Differentiate between overfitting & Underfitting. 06**

- a) Correlation coefficient of X on Y
  - b) Correlation coefficient of Y on X
  - c) Regression coefficient of X on Y
  - d) Regression coefficient of Y on X
- 12) Prediction is \_\_\_\_\_.
- a) discipline in statistics used to find projections in multidimensional data
  - b) value entered in database by expert
  - c) the result of application of specific theory or rule in a specific case
  - d) independent of data
- 13) Like the probabilistic view, the \_\_\_\_\_ view allows us to associate a Probability of membership with each classification.
- a) deductive
  - b) exemplar
  - c) classical
  - d) inductive
- 14) In the example of predicting number of babies based on stork's population, Number of babies is \_\_\_\_\_.
- a) feature
  - b) observation
  - c) outcome
  - d) attribute

**S. Y. (B.Tech.) (Sem - II) (New) (CBCS) Examination: Oct/Nov-2022**  
**ELECTRONICS & TELECOMMUNICATION ENGINEERING**  
**Computational Statistics**

Day & Date: Thursday, 16-03-2023  
 Time: 02:00 PM To 05:00 PM

Max. Marks: 56

**Instructions:** 1) All Questions are compulsory.  
 2) Figures to the right indicate full marks.

**Section – I**

- Q.2 Answer the following questions. (Any Four) 16**
- Explain the terms with example.
    - Sample space
    - Mutually exclusive events
    - Conditional Probability
  - Describe Bayes's theorem in details with an example
  - Discuss Conditional probability with an example in detail.
  - Explain the simple linear regression model in detail.
  - Discuss matrix factorization in detail.
- Q.3 Answer the following questions. (Any One) 06**
- Write a short note on Gaussian Distribution.
  - Explain Eigenvectors centrality in detail.
- Q.4 Explain the goodness of fitting in multiple regression model. 06**

**Section – II**

- Q.5 Answer the following questions. (Any Four) 16**
- What are the important objectives of machine learning?
  - How do you design learning system? Explain with examples.
  - Differentiate between Training data and Testing Data.
  - Which are the applications of machine learning?
  - Differentiate between Supervised, Unsupervised and Reinforcement Learning.
- Q.6 Answer the following questions. (Any One) 06**
- What do you mean by a well -posed learning problem? Explain the important features that are required to well -define a learning problem.
  - Explain the significance of Dimensionality Reduction.
- Q.7 What is Bias, Variance and what do you mean by Bias-Variance Tradeoff? And Differentiate between overfitting & Underfitting. 06**

Set **P**

**S.Y. (B.Tech.) (Sem-II) (New) (CBCS) Examination: Oct/Nov - 2022**  
**ELECTRONICS & TELECOMMUNICATION ENGINEERING**  
**Database Management Systems**

Day & Date: Thursday, 16-03-2023  
 Time: 02:00 PM To 05:00 PM

Max. Marks: 70

- Instructions:** 1) Q. No. 1 is compulsory. It should be solved in the first 30 minutes in answer book. Page no 03 (Starting page of the Answer Book). Each question carries one mark.  
 2) Don't forget to Mention question paper set (P/Q/R/S) on top of page.  
 3) Figures to the right indicates full marks

**MCQ/Objective Type Questions**

Duration: 30 Minutes

Marks: 14

**Q.1 Choose the correct alternatives from the options.**

**14**

- 1) Which type of data can be stored in the database?
  - a) Image oriented data
  - b) Text, files containing data
  - c) Data in the form of audio or video
  - d) All of the above
- 2) What does an RDBMS consist of?
 

|                          |                         |
|--------------------------|-------------------------|
| a) Collection of Records | b) Collection of Keys   |
| c) Collection of Tables  | d) Collection of Fields |
- 3) The DBMS acts as an interface between \_\_\_\_\_ and \_\_\_\_\_ of an enterprise-class system.
  - a) Data and the DBMS
  - b) Application and SQL
  - c) Database application and the database
  - d) The user and the software
- 4) What is the function of the following command? Delete from r where P;
  - a) Clears entries from relation
  - b) Deletes relation
  - c) Deletes particular tuple from relation
  - d) All of the mentioned
- 5) Which of the following is the full form of DDL?
 

|                             |                             |
|-----------------------------|-----------------------------|
| a) Data definition language | b) Data derivation language |
| c) Dynamic data language    | d) Detailed data language   |
- 6) Which of the following is known as minimal super key?
 

|                |                  |
|----------------|------------------|
| a) Primary key | b) Candidate key |
| c) Foreign key | d) None          |
- 7) Which clause is used to retrieve a unique element from the table?
 

|                   |                      |
|-------------------|----------------------|
| a) SELECT UNIQUE  | b) SELECT DISTINCT   |
| c) Both A) and B) | d) None of the above |

- 8) What is ACID properties of Transactions?
- a) Atomicity, Consistency, Isolation, Database
  - b) Atomicity, Consistency, Isolation, Durability
  - c) Atomicity, Consistency, Inconsistent, Durability
  - d) Automatically, Concurrency. Isolation, Durability
- 9) A table is in 3NF if it is in 2NF and if it has no \_\_\_\_\_.  
a) Functional Dependencies                      b) Transitive Dependencies  
c) Trivial Functional Dependency              d) Multivalued Dependencies
- 10) Redundancy is reduced in a database table by using the \_\_\_\_\_ form.  
a) Abnormal                                          b) Normal  
c) Special                                            d) None
- 11) Which of the following is a type of Normal Form?  
a) ACNF                                              b) BCNF  
c) CCNF                                              d) DCNF
- 12) Some database columns can be used to create \_\_\_\_\_.  
a) Indices                                            b) Files  
c) Indexes                                            d) Records
- 13) Which of the following systems is responsible for ensuring isolation?  
a) Recovery system                                b) Atomic system  
c) Concurrency control system                d) Compiler system
- 14) In order to undo the work of transaction after last commit which one should be used?  
a) View                                                b) Commit  
c) Rollback                                            d) Flashback

Day & Date: Thursday, 16-03-2023  
 Time: 02:00 PM To 05:00 PM

Max. Marks: 56

**Instructions:** 1) All question are compulsory.  
 2) Figures to the right indicate full marks.

**Section – I**

- Q.2 Attempt any three** **12**
- List four significant features of file processing system.
  - Explain any four relational algebra operations with example.
  - Define the following terms Entity, Attributes, Entity Sets, Cardinality and its types.
  - Discuss various DDL commands in SQL.
- Q.3 Attempt any two.** **16**
- Draw ER diagram for below scenario: A salesperson may manage many other salespeople. A salesperson is managed by only one salespeople. A salesperson can be an agent for many customers. A customer is managed by one salespeople. A customer can place many orders. An order can be placed by one customer. An order lists many inventory items. An inventory item may be listed on many orders. An inventory item is assembled from many parts. A part may be assembled into many inventory items. Many employees assemble an inventory item from many parts. A supplier supplies many parts. A part may be supplied by many suppliers.
  - In SQL, explain the terms with syntax and example. SELECT, DISTINCT, WHERE, ORDERBY
  - List significant differences between a file-processing system and DBMS.

**Section - II**

- Q.4 Attempt any three** **12**
- Define functional dependency and need of normalization.
  - Explain the terms: Transaction, ACID Property
  - Explain the following terms with example; primary indexing and clustering indexing.
  - Discuss timestamp-based protocol.
- Q.5 Attempt any two** **16**
- Discuss types of normalization in detail with example.
  - Explain conflict serializability with example.
  - Consider following schedules involving two transactions:  
 S1: r1(X); r1(Y); r2(X); r2(Y); w2(Y); w1(X)  
 S2: r1(X); r2(X); r2(Y); w2(Y); r1(Y); w1(X)
    - If given schedule is conflict serializable convert it into Conflict Serializable schedule.
    - If given schedule is not conflict serializable convert it into View Serializable Schedule.

  - Explain any four relational algebra operations with example.
  - Define the following terms Entity, Attributes, Entity Sets, Cardinality and its types.
  - Discuss various DDL commands in SQL.
- Q.3 Attempt any two.** **16**
- Draw ER diagram for below scenario: A salesperson may manage many other salespeople. A salesperson is managed by only one salespeople. A salesperson can be an agent for many customers. A customer is managed by one salespeople. A customer can place many orders. An order can be placed by one customer. An order lists many inventory items. An inventory item may be listed on many orders. An inventory item is assembled from many parts. A part may be assembled into many inventory items. Many employees assemble an inventory item from many parts. A supplier supplies many parts. A part may be supplied by many suppliers.
  - In SQL, explain the terms with syntax and example. SELECT, DISTINCT, WHERE, ORDERBY
  - List significant differences between a file-processing system and DBMS.

**Section - II**

- Q.4 Attempt any three** **12**
- Define functional dependency and need of normalization.
  - Explain the terms: Transaction, ACID Property
  - Explain the following terms with example; primary indexing and clustering indexing.
  - Discuss timestamp-based protocol.
- Q.5 Attempt any two** **16**
- Discuss types of normalization in detail with example.
  - Explain conflict serializability with example.
  - Consider following schedules involving two transactions:  
 S1: r1(X); r1(Y); r2(X); r2(Y); w2(Y); w1(X)  
 S2: r1(X); r2(X); r2(Y); w2(Y); r1(Y); w1(X)
    - If given schedule is conflict serializable convert it into Conflict Serializable schedule.
    - If given schedule is not conflict serializable convert it into View Serializable Schedule.

Day & Date: Monday, 06-03-2023  
 Time: 02:00 PM To 05:00 PM

Max. Marks: 70

- Instructions:** 1) Q. No. 1 is compulsory. It should be solved in the first 30 minutes in answer book. Page no 03 (Starting page of the Answer Book). Each question carries one mark.  
 2) Don't forget to Mention question paper set (P/Q/R/S) on top of page.  
 3) Figures to the right indicates full marks.  
 4) Assume suitable data if necessary.

**MCQ/Objective Type Questions**

Duration: 30 Minutes

Marks: 14

**Q.1 Choose the correct alternatives from the options.**

**14**

- 1) Which terminology deals with the excitation or stimulus applied to the system from an external source for the generation of an output?
  - a) Input signal
  - b) Output signal
  - c) Error signal
  - d) Feedback signal
- 2) For the elimination of feedback loops, the derivation based on transfer function of \_\_\_\_\_ loop is used.
  - a) Open
  - b) Closed
  - c) Both a and b
  - d) None of the above
- 3) Where are the dummy nodes added in the branch with unity gain?
  - a) At input & output nodes
  - b) Between chain nodes
  - c) Both a and b
  - d) None of the above
- 4) Transfer function of the system is defined as the ratio of Laplace output to Laplace input considering initial conditions \_\_\_\_\_.
  - a) 1
  - b) 2
  - c) 0
  - d) infinite
- 5) Loop which do not possess any common node are said to be \_\_\_\_\_ loops.
  - a) Forward gain
  - b) Touching loops
  - c) Non touching loops
  - d) Feedback gain
- 6) The type 2 system has at the origin \_\_\_\_\_.
  - a) no net pole
  - b) net pole
  - c) simple pole
  - d) two poles
- 7) In case of type-1 system steady state acceleration is \_\_\_\_\_.
  - a) unity
  - b) infinity
  - c) zero
  - d) 10
- 8) If the system is specified by open loop transfer function  $G(s)H(s) = k / s(s + 3)(s + 2)$ , how many root loci proceed to end at infinity?
  - a) 2
  - b) 3
  - c) 5
  - d) 6

- 9) Which point on root locus specifies the meeting or collision of two poles?
  - a) Centroid
  - b) Break away point
  - c) Stability point
  - d) Anti-break point
- 10) Which unit is adopted for magnitude measurement in Bode plots?
  - a) Degree
  - b) Decimal
  - c) Decibel
  - d) Deviation
- 11) In an octave frequency band, the ratio of  $f_2 / f_1$  is equivalent to \_\_\_\_\_.
  - a) 2
  - b) 4
  - c) 8
  - d) 10
- 12) State space analysis is applicable even if the initial conditions are \_\_\_\_\_.
  - a) Zero
  - b) Non-zero
  - c) Equal
  - d) Not equal
- 13) The analysis of multiple input multiple output is conveniently studied by;
  - a) State space analysis
  - b) Root locus approach
  - c) Characteristic equation approach
  - d) Nicholas chart
- 14) Which of the following is exhibited by root locus diagrams?
  - a) The bandwidth of the system
  - b) The response of a system to a step input
  - c) The frequency response of a system
  - d) The poles of the transfer function for a set of parameter values

Seat  
No.

**S.Y. (B.Tech.) (Sem - II) (Old) (CBCS) Examination: Oct/Nov-2022**  
**ELECTRONICS & TELECOMMUNICATION ENGINEERING**  
**Control Systems**

Day & Date: Monday, 06-03-2023  
 Time: 02:00 PM To 05:00 PM

Max. Marks: 56

**Instructions:** 1) All questions are compulsory.  
 2) Figures to the right indicate full marks.

**Section – I**

**Q.2 Attempt any Four.**

16

- 1) Explain missile launching and guidance system.
- 2) Explain block diagram reduction rules.
- 3) Write a note on Stepper Motor.
- 4) Find the transfer function of series RLC circuit.
- 5) Explain standard test signals.

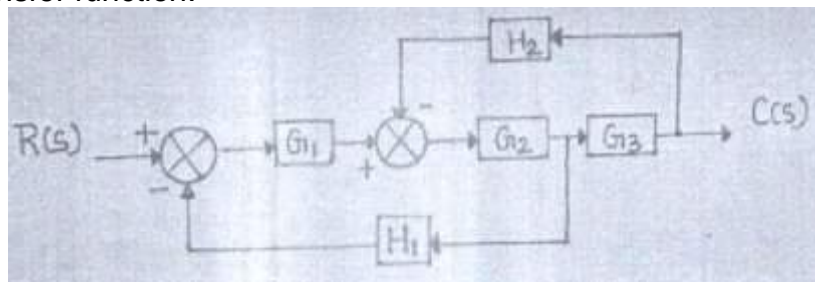

**Q.3 Attempt any two:**

12

- 1) Find transfer function for given SFG diagram.

- 2) Find transfer function.

- 3) A system is given by  $C(S)/R(S) = 1/S^2 + S + 1$ . Find time response specifications.

## Section – II

**Q.4 Attempt any Four.****16**

- 1) State the advantages and limitations of Routh's criteria.
- 2) Investigate the stability of the system with characteristics equation  
 $Q(S) = S^3 + 7S^2 + 10S + k = 0$  Find  $K_{mar}$  and  $\omega_{mar}$
- 3) Compare the absolute and conditional stability.
- 4) Write a short on co-relation between time domain and frequency domain for second order system.
- 5) Explain the concept of controllability and observability.

**Q.5 Attempt any two:****12**

- 1) Explain in a detail steps involved in Bode plot with suitable example.
- 2) Determine damping factor, under damped natural frequency, resonant peak & resonant frequency for the system with closed loop transfer function.

$$G(S) = \frac{100}{S^2 + 10S + 100}$$

- 3) Give advantages and disadvantages of state space analysis approach.

Set

P

**S.Y. (B.Tech.) (Sem-II) (Old) (CBCS) Examination: Oct/Nov - 2022**  
**ELECTRONICS & TELECOMMUNICATION ENGINEERING**  
**Analog Integrated Circuits**

Day & Date: Wednesday, 08-03-2023  
 Time: 02:00 PM To 05:00 PM

Max. Marks: 56

- Instructions:** 1) All question are compulsory.  
 2) Assume suitable data wherever necessary.  
 3) Draw neat diagram wherever necessary.

**Section – I**

**Q.2 Attempt any four.** **16**

- Derive equations for  $I_{CQ}$  &  $V_{CEQ}$  of Dual input balanced output differential amplifier using transistors.
- Derive equation for ideal voltage gain of Inverting amplifier using virtual ground concept.
- Define any four electrical parameters of IC 741 with practical & ideal values.
- Explain basic integrator with i/p & o/p waveforms.
- For Inverting amplifier with feedback using IC 741,  $R_1 = 470\Omega$  &  $R_F = 4.7K\Omega$   
 Calculate the values for  $A_F$ ,  $R_{iF}$ ,  $R_{oF}$  &  $f_F$   
 (For IC 741 Assume  $A = 200000$ ,  $R_i = 2M\Omega$ ,  $R_o = 75\Omega$  &  $f_o = 5\text{ Hz}$ )

**Q.3 Attempt any two.** **12**

- Derive expressions for gain  $A_d$  for DIBO differential amplifier using AC equivalent circuit.
- Explain instrumentation amplifier with transducer bridge & derive expression of output voltage.
- Draw high frequency equivalent circuit of op-amp & obtain expression for  $A_{OL}(f)$  open loop gain as function of frequency.

**Section - II**

**Q.4 Answer any four questions.** **16**

- Explain with neat diagram operation of window detector using op-amp.
- Draw & Explain op-amp precision full wave rectifier with i/p & o/p waveforms.
- Design RC phase shift oscillator using op-amp 741 for output frequency of 200 Hz. (Assume  $C = 0.1\mu F$ )
- Explain op-amp square wave generator with circuit diagram & waveforms.
- Explain mono stable multi vibrator using IC 555 with equation for output.

**Q.5 Answer any two questions.** **12**

- Explain op-amp triangular wave generator with circuit diagram & waveforms.
- Design & explain first order low pass filter at cutoff frequency of 1 KHz with a pass band gain of 2.
- Calculate  $V_{ut}$ ,  $V_{lt}$ , hysteresis voltage & draw o/p waveform for op-amp Schmitt trigger circuit With  $V_{in} = 1\text{ Vp-p}$  sine wave signal,  $\pm V_{cc} = 15\text{ Volt}$ ,  $R_1 = 100\Omega$ ,  $R_2 = 56k\Omega$  & IC 741.

- 10) The type of feedback used in closed loop inverting amplifier is \_\_\_\_\_.
  - a) Voltage series
  - b) Current series
  - c) Current shunt
  - d) Voltage shunt
- 11)  $\pm V_{sat}/(1 + AB)$  is total output offset voltage for \_\_\_\_\_.
  - a) Inverting amplifier
  - b) Non-Inverting amplifier
  - c) Both b & a
  - d) None of these
- 12) I to V converter is special case of \_\_\_\_\_ amplifier.
  - a) Non-inverting
  - b) Inverting
  - c) Differential
  - d) Scaling
- 13) For IC 741 maximum Input bias current at supply voltage  $\pm 15$  volts dc is \_\_\_\_\_.
  - a) 75 nA
  - b) 100 nA
  - c) 750 nA
  - d) 500 nA
- 14) A DC inserter is \_\_\_\_\_.
  - a) Clipper
  - b) Peak detector
  - c) Clamper
  - d) Integrator

| <b>Set Q</b> |
|--------------|

**S.Y. (B.Tech.) (Sem-II) (Old) (CBCS) Examination: Oct/Nov - 2022**  
**ELECTRONICS & TELECOMMUNICATION ENGINEERING**  
**Analog Integrated Circuits**

Day & Date: Wednesday, 08-03-2023  
 Time: 02:00 PM To 05:00 PM

Max. Marks: 56

- Instructions:** 1) All question are compulsory.  
 2) Assume suitable data wherever necessary.  
 3) Draw neat diagram wherever necessary.

**Section – I**

**Q.2 Attempt any four.** **16**

- Derive equations for  $I_{CQ}$  &  $V_{CEQ}$  of Dual input balanced output differential amplifier using transistors.
- Derive equation for ideal voltage gain of Inverting amplifier using virtual ground concept.
- Define any four electrical parameters of IC 741 with practical & ideal values.
- Explain basic integrator with i/p & o/p waveforms.
- For Inverting amplifier with feedback using IC 741,  $R_1 = 470\Omega$  &  $R_F = 4.7K\Omega$   
 Calculate the values for  $A_F$ ,  $R_{iF}$ ,  $R_{oF}$  &  $f_F$   
 (For IC 741 Assume  $A = 200000$ ,  $R_i = 2M\Omega$ ,  $R_o = 75\Omega$  &  $f_o = 5\text{ Hz}$ )

**Q.3 Attempt any two.** **12**

- Derive expressions for gain  $A_d$  for DIBO differential amplifier using AC equivalent circuit.
- Explain instrumentation amplifier with transducer bridge & derive expression of output voltage.
- Draw high frequency equivalent circuit of op-amp & obtain expression for  $A_{OL}(f)$  open loop gain as function of frequency.

**Section - II**

**Q.4 Answer any four questions.** **16**

- Explain with neat diagram operation of window detector using op-amp.
- Draw & Explain op-amp precision full wave rectifier with i/p & o/p waveforms.
- Design RC phase shift oscillator using op-amp 741 for output frequency of 200 Hz. (Assume  $C = 0.1\mu F$ )
- Explain op-amp square wave generator with circuit diagram & waveforms.
- Explain mono stable multi vibrator using IC 555 with equation for output.

**Q.5 Answer any two questions.** **12**

- Explain op-amp triangular wave generator with circuit diagram & waveforms.
- Design & explain first order low pass filter at cutoff frequency of 1 KHz with a pass band gain of 2.
- Calculate  $V_{ut}$ ,  $V_{lt}$ , hysteresis voltage & draw o/p waveform for op-amp Schmitt trigger circuit With  $V_{in} = 1\text{ Vp-p}$  sine wave signal,  $\pm V_{cc} = 15\text{ Volt}$ ,  $R_1 = 100\Omega$ ,  $R_2 = 56k\Omega$  & IC 741.

Day & Date: Wednesday, 08-03-2023  
Time: 02:00 PM To 05:00 PM

Max. Marks: 70

**Instructions:** 1) Q. No. 1 is compulsory and should be solved in first 30 minutes in Answer Book. Page No.3 (starting page of the Answer Book). Each question carry one mark.  
2) Don't forget to mention Question Paper Set (P/Q/R/S) at the top of the same page.

Duration: 30 Minutes

Marks: 14

**Q.1 Choose the correct alternatives from the options.**

14

- 1) V<sub>ref</sub> for LM317 is \_\_\_\_\_.  
a) 1.25mV  
b) 1.25V  
c) 12.5V  
d) None of these
- 2) Butterworth filter is also called as \_\_\_\_\_.  
a) Riple-riple  
b) Riple-Flat  
c) Flat-ripple  
d) Flat-Flat
- 3) For second order active filter gain roll off rate in stop band is \_\_\_\_\_.  
a) 40 dB/decade  
b) 20 dB/decade  
c) 90 dB/decade  
d) 60 dB/decade
- 4) If square wave input is applied to a differentiator, then output will be \_\_\_\_\_.  
a) Inverted square wave  
b) Cosine wave  
c) Sine wave  
d) Spike wave
- 5) Differential voltage gain of DIBO differential amplifier is \_\_\_\_\_.  
a)  $R_c/2r_e$   
b)  $2R_c/r_e$   
c)  $R_c/r_e$   
d)  $2\beta ac r_e$
- 6) What should be maximum bandwidth for a gain of 10 in case of IC 741?  
a) 1 MHz  
b) 100KHz  
c) 10 KHz  
d) 1KHz
- 7) The type of feedback used in closed loop inverting amplifier is \_\_\_\_\_.  
a) Voltage series  
b) Current series  
c) Current shunt  
d) Voltage shunt
- 8)  $\pm V_{sat}/(1 + AB)$  is total output offset voltage for \_\_\_\_\_.  
a) Inverting amplifier  
b) Non-Inverting amplifier  
c) Both b & a  
d) None of these
- 9) I to V converter is special case of \_\_\_\_\_ amplifier.  
a) Non-inverting  
b) Inverting  
c) Differential  
d) Scaling

- 10) For IC 741 maximum Input bias current at supply voltage  $\pm 15$  volts dc is \_\_\_\_\_.
  - a) 75 nA
  - b) 100 nA
  - c) 750 nA
  - d) 500 nA
- 11) A DC inserter is \_\_\_\_\_.
  - a) Clipper
  - b) Peak detector
  - c) Clamper
  - d) Integrator
- 12) For audio frequency oscillator components used are \_\_\_\_\_.
  - a) Crystal
  - b) LC
  - c) RC
  - d) LRC
- 13) A duty cycle is less than \_\_\_\_\_ in saw tooth wave generator.
  - a) 90%
  - b) 66.66%
  - c) 50%
  - d) 20%
- 14) The voltage at threshold pin of IC 555 is \_\_\_\_\_.
  - a)  $V_{cc}/3$
  - b)  $2V_{cc}/3$
  - c)  $V_{cc}$
  - d) All of these

Max. Marks: 70

### MCQ/Objective Type Questions

Duration: 30 Minutes

Marks: 14

**Q.1 Choose the correct alternatives from the options.**

14

- 1) For IC 741 maximum Input bias current at supply voltage  $\pm 15$  volts dc is \_\_\_\_\_.  
a) 75 nA                                      b) 100 nA  
c) 750 nA                                     d) 500 nA
- 2) A DC inserter is \_\_\_\_\_.  
a) Clipper                                      b) Peak detector  
c) Clamper                                     d) Integrator
- 3) For audio frequency oscillator components used are \_\_\_\_\_.  
a) Crystal                                      b) LC  
c) RC                                            d) LRC
- 4) A duty cycle is less than \_\_\_\_\_ in saw tooth wave generator.  
a) 90%                                          b) 66.66%  
c) 50%                                          d) 20%
- 5) The voltage at threshold pin of IC 555 is \_\_\_\_\_.  
a)  $V_{cc}/3$                                         b)  $2V_{cc}/3$   
c)  $V_{cc}$                                            d) All of these
- 6)  $V_{ref}$  for LM317 is \_\_\_\_\_.  
a) 1.25mV                                       b) 1.25V  
c) 12.5V                                        d) None of these
- 7) Butterworth filter is also called as \_\_\_\_\_.  
a) Riple-riple                                b) Riple-Flat  
c) Flat-ripple                                 d) Flat-Flat
- 8) For second order active filter gain roll off rate in stop band is \_\_\_\_\_.  
a) 40 dB/decade                              b) 20 dB/decade  
c) 90 dB/decade                              d) 60 dB/decade
- 9) If square wave input is applied to a differentiator, then output will be \_\_\_\_\_.  
a) Inverted square wave                    b) Cosine wave  
c) Sine wave                                   d) Spike wave

- 10)** Differential voltage gain of DIBO differential amplifier is \_\_\_\_\_.  
a)  $R_c/2r_e$                                       b)  $2R_c/r_e$   
c)  $R_c/r_e$                                         d)  $2\beta_{ac} r_e$
- 11)** What should be maximum bandwidth for a gain of 10 in case of IC 741?  
a) 1 MHz                                          b) 100KHz  
c) 10 KHz                                         d) 1KHz
- 12)** The type of feedback used in closed loop inverting amplifier is \_\_\_\_\_.  
a) Voltage series                                b) Current series  
c) Current shunt                                 d) Voltage shunt
- 13)**  $\pm V_{sat}/(1 + AB)$  is total output offset voltage for \_\_\_\_\_.  
a) Inverting amplifier                          b) Non-Inverting amplifier  
c) Both b & a                                      d) None of these
- 14)** I to V converter is special case of \_\_\_\_\_ amplifier.  
a) Non-inverting                                 b) Inverting  
c) Differential                                      d) Scaling

Day & Date: Wednesday, 08-03-2023  
 Time: 02:00 PM To 05:00 PM

Max. Marks: 56

- Instructions:** 1) All question are compulsory.  
 2) Assume suitable data wherever necessary.  
 3) Draw neat diagram wherever necessary.

**Section – I**

**Q.2 Attempt any four.** **16**

- Derive equations for  $I_{CQ}$  &  $V_{CEQ}$  of Dual input balanced output differential amplifier using transistors.
- Derive equation for ideal voltage gain of Inverting amplifier using virtual ground concept.
- Define any four electrical parameters of IC 741 with practical & ideal values.
- Explain basic integrator with i/p & o/p waveforms.
- For Inverting amplifier with feedback using IC 741,  $R_1 = 470\Omega$  &  $R_F = 4.7K\Omega$   
 Calculate the values for  $A_F$ ,  $R_iF$ ,  $R_oF$  &  $f_F$   
 (For IC 741 Assume  $A = 200000$ ,  $R_i = 2M\Omega$ ,  $R_o = 75\Omega$  &  $f_o = 5\text{ Hz}$ )

**Q.3 Attempt any two.** **12**

- Derive expressions for gain  $A_d$  for DIBO differential amplifier using AC equivalent circuit.
- Explain instrumentation amplifier with transducer bridge & derive expression of output voltage.
- Draw high frequency equivalent circuit of op-amp & obtain expression for  $A_{OL}(f)$  open loop gain as function of frequency.

**Section - II**

**Q.4 Answer any four questions.** **16**

- Explain with neat diagram operation of window detector using op-amp.
- Draw & Explain op-amp precision full wave rectifier with i/p & o/p waveforms.
- Design RC phase shift oscillator using op-amp 741 for output frequency of 200 Hz. (Assume  $C = 0.1\mu F$ )
- Explain op-amp square wave generator with circuit diagram & waveforms.
- Explain mono stable multi vibrator using IC 555 with equation for output.

**Q.5 Answer any two questions.** **12**

- Explain op-amp triangular wave generator with circuit diagram & waveforms.
- Design & explain first order low pass filter at cutoff frequency of 1 KHz with a pass band gain of 2.
- Calculate  $V_{ut}$ ,  $V_{lt}$ , hysteresis voltage & draw o/p waveform for op-amp Schmitt trigger circuit With  $V_{in} = 1\text{ Vp-p}$  sine wave signal,  $\pm V_{cc} = 15\text{ Volt}$ ,  $R_1 = 100\Omega$ ,  $R_2 = 56k\Omega$  & IC 741.

2) Don't forget to mention Question Paper Set (P/Q/R/S) at the top of the same page.

Duration: 30 Minutes

**Q.1 Choose the correct alternatives from the options.**

- 1) Entropy is the measure of \_\_\_\_\_.  
a) Randomness  
b) Information  
c) Randomness & Information  
d) None of the mentioned
- 2) When the base of the logarithm is e, the unit of measure of information is \_\_\_\_\_.  
a) Bits  
b) Bytes  
c) Nats  
d) None of the mentioned
- 3) When X and Y are statistically independent, then  $I(x,y)$  is \_\_\_\_\_.  
a) 1  
b) 0  
c)  $\ln 2$   
d) Cannot be determined
- 4) Analog information is converted to digital data using \_\_\_\_\_.  
a) Sampling  
b) Quantization  
c) Coding  
d) All of the mentioned
- 5) PCM includes the process of \_\_\_\_\_.  
a) Amplitude discretization  
b) Time discretization  
c) Amplitude & Time discretization  
d) None of the mentioned
- 6) Which of the following gives maximum probability of error?  
a) ASK  
b) FSK  
c) PSK  
d) DPSK
- 7) For non coherent reception of PSK \_\_\_\_\_ is used.  
a) Differential encoding  
b) Decoding  
c) Differential encoding & Decoding  
d) None of the mentioned
- 8) If carrier modulated by a digital bit stream had one of the possible phases 0, 90, 180 & 270, then modulation is called  
a) BPSK  
b) QPSK  
c) QAM  
d) MSK

Day & Date: Thursday, 09-03-2023  
 Time: 02:00 PM To 05:00 PM

Max. Marks: 56

- Instructions:** 1) All question are compulsory.  
 2) Figures to the right indicate full marks.  
 3) Assume suitable data wherever necessary.

**Section – I**

**Q.2 Attempt any four.**

**16**

- a) 1) Define Entropy.  
 2) Calculate the joint probability matrix and  $P(Y)$  for a given channel below with the probability of messages  $x_1$ ,  $x_2$ , and  $x_3$  as 0.3, 0.4, and 0.5.

- b) With the help of a block diagram explain the PCM system.  
 c) Illustrate with an example what is uniform quantization.  
 d) Compare ASK, FSK, PSK and DPSK.  
 e) What are different line coding techniques. State its advantages and disadvantages.

**Q.3 Attempt any two.**

**12**

- a) Apply the Shannon-Fano coding procedure for the following message ensemble for  $M=2$ .

$$[X] = [x_1 \ x_2 \ x_3 \ x_4 \ x_5 \ x_6 \ x_7 \ x_8]$$

$$[P] = [1/4 \ 1/8 \ 1/16 \ 1/16 \ 1/16 \ 1/4 \ 1/16 \ 1/8]$$

- b) With the help of a block diagram and waveform, explain the working of the Delta Modulation transmitter. What are the drawbacks of the DM technique?  
 c) With an example explain the working of the DPSK transmitter and receiver.

**Section - II**

**Q.4 Answer any four questions.**

**16**

- a) Explain QPSK transmitter in detail.  
 b) Explain M-ary wideband FSK demodulation.  
 c) Describe Costas Loop method of carrier recovery system.  
 d) What is significance of multicarrier system?

- e) For a (6, 3) code, the parity check matrix is as shown. Determine whether a received code vector is erroneous. The received code vector is 100101.

$$H = \begin{bmatrix} 1 & 0 & 1 & 1 & 0 & 0 \\ 0 & 1 & 1 & 0 & 1 & 0 \\ 1 & 1 & 0 & 0 & 0 & 1 \end{bmatrix}$$

**Q.5 Answer any two questions.**

**12**

- a) Explain how to minimize peak to average power ratio in a multicarrier system.
- b) What are different symbol synchronization methods? Explain DTTL method in detail.
- c) Write a note on QAM transmitter and receiver.

Duration: 30 Minutes

Marks: 14

**Q.1 Choose the correct alternatives from the options. 14**

- 1) If carrier modulated by a digital bit stream had one of the possible phases 0, 90, 180 & 270, then modulation is called
  - a) BPSK
  - b) QPSK
  - c) QAM
  - d) MSK
- 2) The error performance of MPSK \_\_\_\_\_ as M increases.
  - a) Increases
  - b) Decreases
  - c) Stays constant
  - d) None of the mentioned
- 3) In phase lock which parameter is synchronized \_\_\_\_\_.
  - a) Frequency
  - b) Phase
  - c) Frequency & Phase
  - d) None of the mentioned
- 4) A correlation receiver consists of \_\_\_\_\_.
  - a) a multiplier & integrator
  - b) an integrator only
  - c) multiplier only
  - d) adder & integrator
- 5) A major problem of multicarrier modulation is \_\_\_\_\_.
  - a) Fading
  - b) Diversity
  - c) High peak-to-average power ratio
  - d) None of these
- 6) The received code contains an error if the syndrome vector is \_\_\_\_\_.
  - a) Zero
  - b) Non zero
  - c) Infinity
  - d) None of the mentioned
- 7) Block length is the \_\_\_\_\_ in the code word.
  - a) Number of elements
  - b) Distance between elements
  - c) Number of parity bits
  - d) None of the mentioned
- 8) Entropy is the measure of \_\_\_\_\_.
  - a) Randomness
  - b) Information
  - c) Randomness & Information
  - d) None of the mentioned

- 9) When the base of the logarithm is e, the unit of measure of information is \_\_\_\_\_.
  - a) Bits
  - b) Bytes
  - c) Nats
  - d) None of the mentioned
- 10) When X and Y are statistically independent, then  $I(x,y)$  is \_\_\_\_\_.
  - a) 1
  - b) 0
  - c)  $\ln 2$
  - d) Cannot be determined
- 11) Analog information is converted to digital data using \_\_\_\_\_.
  - a) Sampling
  - b) Quantization
  - c) Coding
  - d) All of the mentioned
- 12) PCM includes the process of \_\_\_\_\_.
  - a) Amplitude discretization
  - b) Time discretization
  - c) Amplitude & Time discretization
  - d) None of the mentioned
- 13) Which of the following gives maximum probability of error?
  - a) ASK
  - b) FSK
  - c) PSK
  - d) DPSK
- 14) For non coherent reception of PSK \_\_\_\_\_ is used.
  - a) Differential encoding
  - b) Decoding
  - c) Differential encoding & Decoding
  - d) None of the mentioned

Set **Q**

**S.Y. (B.Tech.) (Sem-II) (Old) (CBCS) Examination: Oct/Nov - 2022**  
**ELECTRONICS & TELECOMMUNICATION ENGINEERING**  
**Principles of Digital Communication**

Day & Date: Thursday, 09-03-2023  
 Time: 02:00 PM To 05:00 PM

Max. Marks: 56

- Instructions:** 1) All question are compulsory.  
 2) Figures to the right indicate full marks.  
 3) Assume suitable data wherever necessary.

**Section – I**

**Q.2 Attempt any four.**

16

- a) 1) Define Entropy.  
 2) Calculate the joint probability matrix and  $P(Y)$  for a given channel below with the probability of messages  $x_1$ ,  $x_2$ , and  $x_3$  as 0.3, 0.4, and 0.5.

- b) With the help of a block diagram explain the PCM system.  
 c) Illustrate with an example what is uniform quantization.  
 d) Compare ASK, FSK, PSK and DPSK.  
 e) What are different line coding techniques. State its advantages and disadvantages.

**Q.3 Attempt any two.**

12

- a) Apply the Shannon-Fano coding procedure for the following message ensemble for  $M=2$ .

$$[X] = [x_1 \ x_2 \ x_3 \ x_4 \ x_5 \ x_6 \ x_7 \ x_8]$$

$$[P] = [1/4 \ 1/8 \ 1/16 \ 1/16 \ 1/16 \ 1/4 \ 1/16 \ 1/8]$$

- b) With the help of a block diagram and waveform, explain the working of the Delta Modulation transmitter. What are the drawbacks of the DM technique?  
 c) With an example explain the working of the DPSK transmitter and receiver.

**Section - II**

**Q.4 Answer any four questions.**

16

- a) Explain QPSK transmitter in detail.  
 b) Explain M-ary wideband FSK demodulation.  
 c) Describe Costas Loop method of carrier recovery system.  
 d) What is significance of multicarrier system?

- e) For a (6, 3) code, the parity check matrix is as shown. Determine whether a received code vector is erroneous. The received code vector is 100101.

$$H = \begin{bmatrix} 1 & 0 & 1 & 1 & 0 & 0 \\ 0 & 1 & 1 & 0 & 1 & 0 \\ 1 & 1 & 0 & 0 & 0 & 1 \end{bmatrix}$$

**Q.5 Answer any two questions.**

**12**

- a) Explain how to minimize peak to average power ratio in a multicarrier system.
- b) What are different symbol synchronization methods? Explain DTTL method in detail.
- c) Write a note on QAM transmitter and receiver.

 Time: 02:00 PM To 05:00 PM

Max. Marks: 56

- Instructions:** 1) All questions are compulsory.  
 2) Figures to the right indicate full marks.  
 3) Assume suitable data if required & state the assumptions

**Section – I**

**Q.2 Attempt any Four.**

**16**

- 1) Consider the signal  $x[n] = \{1, 3, 4, 2, 3\}$  Sketch & label following signals

i.  $x[n-1]$  ii.  $x[n+2]$  iii.  $x[-n]$  iv.  $x[n]u[n-1]$

- 2) Obtain and sketch the even and odd parts of the continuous time signal  $x(t)$  shown below.

- 3) Determine whether or not the following signals are periodic or not. If the signal is periodic determine the fundamental period.  
 i.  $x[n] = u[n-1]$  ii.  $x(t) = e^{j5\pi t}u(t+1)$
- 4) State the Trigonometric Fourier series & derive the expression for computing the coefficients  $a_0$  &  $a_n$  of Trigonometric Fourier Series.
- 5) Consider the system whose input output relation is as given below  
 $y[n] = x[n+1]$

Determine which of the following properties hold & which does not hold by above system. Justify your answers.

i. Memory less ii. Linear iii. Causal iv. Stable

**Q.3 Attempt any two:**

**12**

- 1) Compute convolution sum of  $y[n] = x[n] * h[n]$  of the following signals  
 $X[n] = u[n-1]$  and  $h[n] = u[n]$
- 2) Determine the Trigonometric Fourier series representation for the following signals  $x(t)$  periodic with period 2 and  $x(t) = \begin{cases} -1 & -1 < t < 0 \\ 1 & 0 \leq t < 1 \end{cases}$
- 3) Consider the LTI systems with following impulse responses  
 i)  $h[n] = (0.5)^n u[n]$   
 ii)  $h(t) = e^{-3t} u(t+1)$

Determine whether each of the above system is causal and or stable.  
 Justify your answers

## Section – II

**Q.4 Attempt any Four.****16**

- 1) Explain how to represent periodic signal using Fourier transform.
- 2) Explain in brief sample with zero order hold.
- 3) Obtain the Fourier transform of  $x(t) = e^{-at}u(t)$ ,  $a > 0$
- 4) Explain Aliasing and how it is reduced.
- 5) State the conditions for ROC of system function  $H(z)$  of an LTI system to be i. stable & ii. Causal. Determine whether following system is stable and or causal for each of the ROC given below.

$$h(z) = \frac{z}{z - 1/2} + \frac{z}{z - 3}$$

- i)  $|z| < (1/2)$     ii)  $(1/2) < |z| < 3$     iii)  $|z| > 3$

**Q.5 Attempt any two:****12**

- 1) State and explain the sampling theorem for continuous time signals.
- 2) The analog signal given below is sampled at 600 samples per second

$$x(t) = 2 \sin(480\pi) + 3 \sin(720\pi)$$

Calculate

- i) Nyquist sampling rate
- ii) Folding frequency
- 3) Compute Fourier transform of following signals. Sketch magnitude transforms.
  - i)  $x_1(t) = e^{-2(t-1)}(u(t-1))$
  - ii)  $x(t) = \delta(t-1)$

 3) Figures to the right indicates full marks  
 4) Assume suitable data wherever needed and mention it clearly.

**MCQ/Objective Type Questions**

Duration: 30 Minutes

Marks: 14

**Q.1 Choose the correct alternatives from the options.**

**14**

- 1) Fourier transform of  $\frac{dx(t)}{dt}$  is \_\_\_\_\_
  - a)  $x(j\omega)$
  - b)  $\frac{1}{j\omega}x(j\omega)$
  - c)  $j\omega x(j\omega)$
  - d)  $e^{j\omega}x(j\omega)$
- 2) The sinc function can be defined as  $\text{SINC}(x) = \frac{\sin x}{x}$ 
  - a)  $\frac{\sin x}{x}$
  - b)  $\frac{\sin \pi x}{x}$
  - c)  $\frac{\sin \pi x}{\pi x}$
  - d)  $\text{SINC}\left(\frac{\sin x}{x}\right)$
- 3) A function having frequency  $f$  is to be sampled. The sampling time  $T$  should be \_\_\_\_\_
  - a)  $T = \frac{1}{2f}$
  - b)  $T > \frac{1}{2f}$
  - c)  $T < \frac{1}{2f}$
  - d)  $T \geq \frac{1}{2f}$
- 4) Fourier transform of unity is \_\_\_\_\_
  - a)  $\delta(\omega)$
  - b)  $\pi \delta(\omega)$
  - c)  $2\pi \delta(\omega)$
  - d) unit step signal
- 5) if  $x(t)$  signal is multiplied with train of impulses, the process is \_\_\_\_\_.
  - a) convolution
  - b) Z transform
  - c) Sampling
  - d) Laplace transform
- 6) If sampling frequency is 1000 Hz, then for proper recovery of signal the signal frequency should be \_\_\_\_\_.
  - a)  $\geq 2000 \text{ Hz}$
  - b)  $\geq 1000 \text{ Hz}$
  - c)  $\geq 500 \text{ Hz}$
  - d)  $\leq 500 \text{ Hz}$

 ii)  $h(t) = e^{-3t} u(t+1)$   
 Determine whether each of the above system is causal and or stable. Justify your answers

## Section – II

**Q.4 Attempt any Four.****16**

- 1) Explain how to represent periodic signal using Fourier transform.
- 2) Explain in brief sample with zero order hold.
- 3) Obtain the Fourier transform of  $x(t) = e^{-at}u(t)$ ,  $a > 0$
- 4) Explain Aliasing and how it is reduced.
- 5) State the conditions for ROC of system function  $H(z)$  of an LTI system to be i. stable & ii. Causal. Determine whether following system is stable and or causal for each of the ROC given below.

$$h(z) = \frac{z}{z - 1/2} + \frac{z}{z - 3}$$

- i)  $|z| < (1/2)$     ii)  $(1/2) < |z| < 3$     iii)  $|z| > 3$

**Q.5 Attempt any two:****12**

- 1) State and explain the sampling theorem for continuous time signals.
- 2) The analog signal given below is sampled at 600 samples per second  
 $x(t) = 2 \sin(480\pi) + 3 \sin(720\pi)$   
 Calculate  
 i) Nyquist sampling rate  
 ii) Folding frequency
- 3) Compute Fourier transform of following signals. Sketch magnitude transforms.  
 i)  $x_1(t) = e^{-2(t-1)}(u(t-1))$   
 ii)  $x(t) = \delta(t-1)$

Day & Date: Friday, 10-03-2023  
Time: 02:00 PM To 05:00 PM

Max. Marks: 70

**Instructions:** 1) Q. No. 1 is compulsory. It should be solved in the first 30 minutes in answer book. Page no 03 (Starting page of the Answer Book). Each question carries one mark.  
2) Don't forget to Mention question paper set (P/Q/R/S) on top of page.  
3) Figures to the right indicates full marks  
4) Assume suitable data wherever needed and mention it clearly.

Duration: 30 Minutes

Marks: 14

**Q.1 Choose the correct alternatives from the options.**

14

- 1) Fourier transform of unity is \_\_\_\_\_.  
a)  $\delta(\omega)$   
b)  $\pi \delta(\omega)$   
c)  $2\pi \delta(\omega)$   
d) unit step signal
- 2) if  $x(t)$  signal is multiplied with train of impulses, the process is \_\_\_\_\_.  
a) convolution  
b) Z transform  
c) Sampling  
d) Laplace transform
- 3) If sampling frequency is 1000 Hz, then for proper recovery of signal the signal frequency should be \_\_\_\_\_.  
a)  $\geq 2000 \text{ Hz}$   
b)  $\geq 1000 \text{ Hz}$   
c)  $\geq 500 \text{ Hz}$   
d)  $\leq 500 \text{ Hz}$
- 4) Which of the following is the method used for reconstruction of signal from its samples \_\_\_\_\_.  
a) Zero order hold  
b) Linear interpolation  
c) Both a) and b)  
d) None of these
- 5)  $y(t) = x(t + 3)$  is \_\_\_\_\_.  
a) Casual  
b) Invertible  
c) Non casual and invertible  
d) Memory less
- 6) the range of  $n$  for which the signal  $u(n + 1) - 2u(n - 2)$  exists is \_\_\_\_\_.  
a)  $-2$  to  $2$   
b)  $-1$  to  $1$   
c)  $-1$  to  $\infty$   
d)  $-3$  to  $2$
- 7) A system is having impulse response  $h(t)$  will be BIBO stable of \_\_\_\_\_.  
a)  $\int_{-\infty}^{\infty} |h(t)| > \infty$   
b)  $\int_{-\infty}^{\infty} |h(t)| < \infty$   
c)  $\int_{-\infty}^{\infty} |h(t)| = 0$   
d)  $\int_{-\infty}^{\infty} |h(t)| = 1$

- 8) Two systems with impulse responses  $h_1(t)$  and  $h_2(t)$  are connected in cascade. Then the overall impulse response of the cascaded system is given by \_\_\_\_\_
- product of  $h_1(t)$  and  $h_2(t)$
  - sum of  $h_1(t)$  and  $h_2(t)$
  - convolution of  $h_1(t)$  and  $h_2(t)$
  - subtraction of  $h_2(t)$  from  $h_1(t)$
- 9) The fundamental period  $T$  of continuous time signal  $je^{j2t}$  is \_\_\_\_\_
- $\pi \text{ sec}$
  - $0.4 \pi \text{ sec}$
  - $0.3 \pi \text{ sec}$
  - $0.5 \pi \text{ sec}$
- 10) An LTI system is said to be causal if and only if \_\_\_\_\_
- Impulse response is non-zero for positive values of  $n$
  - Impulse response is zero for positive values of  $n$
  - Impulse response is non-zero for negative values of  $n$
  - Impulse response is zero for negative values of  $n$
- 11)  $m(t)$  is an even function, then its Fourier representation has \_\_\_\_\_
- $a_0 = 0$
  - $a_n = 0$
  - $b_n = 0$
  - $a_n = b_n$
- 12) Fourier transform of  $\frac{dx(t)}{dt}$  is \_\_\_\_\_
- $x(j\omega)$
  - $\frac{1}{j\omega}x(j\omega)$
  - $j\omega x(j\omega)$
  - $e^{j\omega}x(j\omega)$
- 13) The sinc function can be defined as  $\text{SINC}(x) = \frac{\sin x}{x}$
- $\frac{\sin x}{x}$
  - $\frac{\sin \pi x}{x}$
  - $\frac{\sin \pi x}{\pi x}$
  - $\text{SINC}\left(\frac{\sin x}{x}\right)$
- 14) A function having frequency  $f$  is to be sampled. The sampling time  $T$  should be \_\_\_\_\_
- $T = \frac{1}{2f}$
  - $T > \frac{1}{2f}$
  - $T < \frac{1}{2f}$
  - $T \geq \frac{1}{2f}$

**S.Y. (B.Tech.) (Sem - II) (Old) (CBCS) Examination: Oct/Nov-2022**  
**ELECTRONICS & TELECOMMUNICATION ENGINEERING**  
**Signals and Systems**

Day & Date: Friday, 10-03-2023  
 Time: 02:00 PM To 05:00 PM

Max. Marks: 56

- Instructions:** 1) All questions are compulsory.  
 2) Figures to the right indicate full marks.  
 3) Assume suitable data if required & state the assumptions

**Section – I**

**Q.2 Attempt any Four.**

**16**

- 1) Consider the signal  $x[n] = \{1, 3, 4, 2, 3\}$  Sketch & label following signals

i.  $x[n-1]$  ii.  $x[n+2]$  iii.  $x[-n]$  iv.  $x[n]u[n-1]$

- 2) Obtain and sketch the even and odd parts of the continuous time signal  $x(t)$  shown below.

- 3) Determine whether or not the following signals are periodic or not. If the signal is periodic determine the fundamental period.  
 i.  $x[n] = u[n-1]$  ii.  $x(t) = e^{j5\pi t}u(t+1)$
- 4) State the Trigonometric Fourier series & derive the expression for computing the coefficients  $a_0$  &  $a_n$  of Trigonometric Fourier Series.
- 5) Consider the system whose input output relation is as given below  
 $y[n] = x[n+1]$

Determine which of the following properties hold & which does not hold by above system. Justify your answers.

i. Memory less ii. Linear iii. Causal iv. Stable

**Q.3 Attempt any two:**

**12**

- 1) Compute convolution sum of  $y[n] = x[n] * h[n]$  of the following signals  
 $X[n] = u[n-1]$  and  $h[n] = u[n]$
- 2) Determine the Trigonometric Fourier series representation for the following signals  $x(t)$  periodic with period 2 and  $x(t) = \begin{cases} -1 & -1 < t < 0 \\ 1 & 0 \leq t < 1 \end{cases}$
- 3) Consider the LTI systems with following impulse responses  
 i)  $h[n] = (0.5)^n u[n]$   
 ii)  $h(t) = e^{-3t} u(t+1)$

Determine whether each of the above system is causal and or stable.  
 Justify your answers

## Section – II

**Q.4 Attempt any Four.****16**

- 1) Explain how to represent periodic signal using Fourier transform.
- 2) Explain in brief sample with zero order hold.
- 3) Obtain the Fourier transform of  $x(t) = e^{-at}u(t)$ ,  $a > 0$
- 4) Explain Aliasing and how it is reduced.
- 5) State the conditions for ROC of system function  $H(z)$  of an LTI system to be i. stable & ii. Causal. Determine whether following system is stable and or causal for each of the ROC given below.

$$h(z) = \frac{z}{z - 1/2} + \frac{z}{z - 3}$$

- i)  $|z| < (1/2)$     ii)  $(1/2) < |z| < 3$     iii)  $|z| > 3$

**Q.5 Attempt any two:****12**

- 1) State and explain the sampling theorem for continuous time signals.
- 2) The analog signal given below is sampled at 600 samples per second  
 $x(t) = 2 \sin(480\pi) + 3 \sin(720\pi)$   
 Calculate  
 i) Nyquist sampling rate  
 ii) Folding frequency
- 3) Compute Fourier transform of following signals. Sketch magnitude transforms.  
 i)  $x_1(t) = e^{-2(t-1)}(u(t-1))$   
 ii)  $x(t) = \delta(t-1)$

**MCQ/Objective Type Questions**

Duration: 30 Minutes

Marks: 14

**Q.1 Choose the correct alternatives from the options.**

**14**

- 1) Which of the following will not be accepted by the following DFA?

- a) ababaabaa                      b) abbbbaa  
 c) abbbbaabb                    d) none
- 2) Can a DFA recognize a palindrome number?  
 a) Yes                                b) No  
 c) Yes, with input alphabet as  $\Sigma^*$     d) Can't be determined
- 3) Which of the following does not represents the given language?  
 Language:  $\{0,01\}$   
 a)  $0 + 01$                               b)  $\{0\} \cup \{0\}$   
 c)  $\{0\} \cup \{0\}\{1\}$                       d)  $\{0\} \wedge \{01\}$
- 4) A regular language over an alphabet a is one that can be obtained from \_\_\_\_\_.  
 a) union                                b) concatenation  
 c) Kleene                                d) All of the mentioned
- 5) Which of the following is a regular language?  
 a) String whose length is a sequence of prime numbers  
 b) String with substring  $ww^r$  in between  
 c) Palindrome string  
 d) String with even number of Zero's
- 6) Following context free grammar  
 $S \rightarrow aB \mid bA$   
 $A \rightarrow b \mid aS \mid bAA$   
 $B \rightarrow b \mid bS \mid aBB$  generates strings of terminals that have \_\_\_\_\_.  
 a) equal number of a's and b's  
 b) odd number of a's and odd number b's  
 c) even number of a's and even number of b's  
 d) None

- 7) The regular expression with all strings of 0's and 1's with at least two consecutive 0's, is \_\_\_\_\_.  
 a)  $1 + (10)^*$  b)  $(0 + 1)^*00(0 + 1)^*$   
 c)  $(0 + 1)^*011$  d)  $0^*1^*2^*$
- 8) In one move the turing machine:  
 a) May change its state  
 b) Write a symbol on the cell being scanned  
 c) Move the head one position left or right  
 d) All of the above
- 9) A push down automata is different than finite automata by \_\_\_\_\_.  
 a) Its memory (stack) b) Number of states  
 c) Both (a) and (b) d) None of these
- 10) In the Universal TM, the non-halting states of a TM T1 are encoded as \_\_\_\_\_.  
 a)  $s(q_i) = 0^{i+1}$  b)  $e(q_i) = 0i + 2$   
 c)  $s(q_i) = 0i$  d)  $s(q_i) = 0i + 2$
- 11) Which of the following is not true?  
 a) Power of deterministic automata is equivalent to power of non-deterministic automata  
 b) Power of deterministic pushdown automata is equivalent to power of non-deterministic pushdown automata  
 c) Power of deterministic TM is equivalent to power of non-deterministic TM.  
 d) All above
- 12) The  $\delta$  (transition function) for PDA is \_\_\_\_\_.  
 a)  $\delta : Q \times \Sigma \times \Gamma^* \Rightarrow Q \times \Gamma^*$  b)  $\delta : Q \times \Sigma \Rightarrow Q \times \Gamma^*$   
 c)  $\delta : Q \times \Gamma^* \Rightarrow \Sigma \times \Gamma^*$  d)  $\delta : Q \times \Gamma^* \Rightarrow Q \times \Sigma$
- 13) The instantaneous description is PDA shows \_\_\_\_\_.  
 a) Present state b) Stack symbol  
 c) String to be processed d) All of these
- 14) Alan Turing introduced Turing machine in late \_\_\_\_\_.  
 a) 1936 b) 1938  
 c) 1940 d) 1942

 2) Figures to the right indicate full marks.

**Section – I**

**Q.2 Attempt any three.** **12**

- 1) What is a  $\delta$  symbol? Explain.
- 2) Determine whether the grammar G has a useless production.
- 3) Define: (i) Finite Automaton (FA) (ii) NFA.
- 4) Define CNF.

**Q.3 Attempt any two:** **16**

- 1) Explain Kleene's theorem.
- 2) Write short notes on Minimization of DFA with example.
- 3) Define and explain types of grammars and languages.

**Section – II**

**Q.4 Attempt any three.** **12**

- 1) TM with semi infinite tape.
- 2) Define PDA and explain types of PDA.
- 3) Design a TM to recognize all strings consisting of an odd number of  $a$ 's.
- 4) Prove that  $L = \{0^p \mid p \text{ is prime}\}$  is not CFL.

**Q.5 Attempt any two:** **16**

- 1) Explain the following.
  - a) TM with multiple track
  - b) Offline TM
- 2) Write a note on Universal TM.
- 3) State pumping lemma. Prove that  $L = \{a^i b^i c^i \mid i \geq 0\}$  is not regular

**S.Y. (B.Tech.) (Sem - II) (New) (CBCS) Examination: Oct/Nov-2022**  
**INFORMATION TECHNOLOGY ENGINEERING**  
**Theory of Computation**

Day & Date: Monday, 06-03-2023  
 Time: 02:00 PM To 05:00 PM

Max. Marks: 56

**Instructions:** 1) All questions are compulsory.  
 2) Figures to the right indicate full marks.

**Section – I**

**Q.2 Attempt any three.** **12**

- 1) What is a  $\delta$  symbol? Explain.
- 2) Determine whether the grammar G has a useless production.
- 3) Define: (i) Finite Automaton (FA) (ii) NFA.
- 4) Define CNF.

**Q.3 Attempt any two:** **16**

- 1) Explain Kleene's theorem.
- 2) Write short notes on Minimization of DFA with example.
- 3) Define and explain types of grammars and languages.

**Section – II**

**Q.4 Attempt any three.** **12**

- 1) TM with semi infinite tape.
- 2) Define PDA and explain types of PDA.
- 3) Design a TM to recognize all strings consisting of an odd number of  $a$ 's.
- 4) Prove that  $L = \{0^p \mid p \text{ is prime}\}$  is not CFL.

**Q.5 Attempt any two:** **16**

- 1) Explain the following.
  - a) TM with multiple track
  - b) Offline TM
- 2) Write a note on Universal TM.
- 3) State pumping lemma. Prove that  $L = \{a^i b^i c^i \mid i \geq 0\}$  is not regular

**Theory of Computation**

Day & Date: Monday, 06-03-2023  
 Time: 02:00 PM To 05:00 PM

Max. Marks: 70

- Instructions:** 1) Q. No. 1 is compulsory. It should be solved in the first 30 minutes in answer book. Page no 03 (Starting page of the Answer Book). Each question carries one mark.  
 2) Don't forget to Mention question paper set (P/Q/R/S) on top of page.  
 3) Figures to the right indicates full marks.

**MCQ/Objective Type Questions**

Duration: 30 Minutes

Marks: 14

**Q.1 Choose the correct alternatives from the options.**

**14**

- 1) Which of the following is not true?
  - a) Power of deterministic automata is equivalent to power of non-deterministic automata
  - b) Power of deterministic pushdown automata is equivalent to power of non-deterministic pushdown automata
  - c) Power of deterministic TM is equivalent to power of non-deterministic TM.
  - d) All above
- 2) The  $\delta$  (transition function) for PDA is \_\_\_\_\_.
  - a)  $\delta : Q \times \Sigma \times \Gamma^* \Rightarrow Q \times \Gamma^*$
  - b)  $\delta : Q \times \Sigma \Rightarrow Q \times \Gamma^*$
  - c)  $\delta : Q \times \Gamma^* \Rightarrow \Sigma \times \Gamma^*$
  - d)  $\delta : Q \times \Gamma^* \Rightarrow Q \times \Sigma$
- 3) The instantaneous description is PDA shows \_\_\_\_\_.
  - a) Present state
  - b) Stack symbol
  - c) String to be processed
  - d) All of these
- 4) Alan Turing introduced Turing machine in late \_\_\_\_\_.
  - a) 1936
  - b) 1938
  - c) 1940
  - d) 1942
- 5) Which of the following will not be accepted by the following DFA?

- a) ababaabaa
  - b) abbbbaa
  - c) abbbbaabb
  - d) none
- 6) Can a DFA recognize a palindrome number?
  - a) Yes
  - b) No
  - c) Yes, with input alphabet as  $\Sigma^*$
  - d) Can't be determined
- 7) Which of the following does not represents the given language?  
 Language:  $\{0,01\}$ 
  - a)  $0 + 01$
  - b)  $\{0\} \cup \{0\}$
  - c)  $\{0\} \cup \{0\}\{1\}$
  - d)  $\{0\} \wedge \{01\}$

**MCQ/Objective Type Questions**

Duration: 30 Minutes

Marks: 14

**Q.1 Choose the correct alternatives from the options.**

**14**

- 1) Following context free grammar  
 $S \rightarrow aB \mid bA$   
 $A \rightarrow b \mid aS \mid bAA$   
 $B \rightarrow b \mid bS \mid aBB$  generates strings of terminals that have \_\_\_\_\_.  
 a) equal number of a's and b's  
 b) odd number of a's and odd number b's  
 c) even number of a's and even number of b's  
 d) None
- 2) The regular expression with all strings of 0's and 1's with at least two consecutive 0's, is \_\_\_\_\_.  
 a)  $1 + (10)^*$   
 b)  $(0 + 1)^*00(0 + 1)^*$   
 c)  $(0 + 1)^*011$   
 d)  $0^*1^*2^*$
- 3) In one move the turing machine:  
 a) May change its state  
 b) Write a symbol on the cell being scanned  
 c) Move the head one position left or right  
 d) All of the above
- 4) A push down automata is different than finite automata by \_\_\_\_\_.  
 a) Its memory (stack)  
 b) Number of states  
 c) Both (a) and (b)  
 d) None of these
- 5) In the Universal TM, the non-halting states of a TM T1 are encoded as \_\_\_\_\_.  
 a)  $s(q_i) = 0^{i+1}$   
 b)  $e(q_i) = 0i + 2$   
 c)  $s(q_i) = 0i$   
 d)  $s(q_i) = 0i + 2$
- 6) Which of the following is not true?  
 a) Power of deterministic automata is equivalent to power of non-deterministic automata  
 b) Power of deterministic pushdown automata is equivalent to power of non-deterministic pushdown automata  
 c) Power of deterministic TM is equivalent to power of non-deterministic TM.  
 d) All above

- 7) The  $\delta$  (transition function) for PDA is \_\_\_\_\_.  
 a)  $\delta : Q \times \Sigma \times \Gamma \Rightarrow Q \times \Gamma^*$       b)  $\delta : Q \times \Sigma \Rightarrow Q \times \Gamma^*$   
 c)  $\delta : Q \times \Gamma \Rightarrow \Sigma \times \Gamma^*$       d)  $\delta : Q \times \Gamma \Rightarrow Q \times \Sigma$
- 8) The instantaneous description is PDA shows \_\_\_\_\_.  
 a) Present state      b) Stack symbol  
 c) String to be processed      d) All of these
- 9) Alan Turing introduced Turing machine in late \_\_\_\_\_.  
 a) 1936      b) 1938  
 c) 1940      d) 1942
- 10) Which of the following will not be accepted by the following DFA?

- a) ababaabaa      b) abbbbaa  
 c) abbbaabb      d) none
- 11) Can a DFA recognize a palindrome number?  
 a) Yes      b) No  
 c) Yes, with input alphabet as  $\Sigma^*$       d) Can't be determined
- 12) Which of the following does not represent the given language?  
 Language:  $\{0,01\}$   
 a)  $0 + 01$       b)  $\{0\} \cup \{0\}$   
 c)  $\{0\} \cup \{0\}\{1\}$       d)  $\{0\} \wedge \{01\}$
- 13) A regular language over an alphabet  $a$  is one that can be obtained from \_\_\_\_\_.  
 a) union      b) concatenation  
 c) Kleene      d) All of the mentioned
- 14) Which of the following is a regular language?  
 a) String whose length is a sequence of prime numbers  
 b) String with substring  $ww^r$  in between  
 c) Palindrome string  
 d) String with even number of Zero's

**Q.1 Choose the correct alternatives from the options.**

**14**

- 1) Transmission control protocol \_\_\_\_\_.
  - a) is a connection-oriented protocol
  - b) uses a three way handshake to establish a connection
  - c) receives data from application as a single stream
  - d) all of these
- 2) Transport layer protocols deals with \_\_\_\_\_.
  - a) application to application communication
  - b) man to man communication
  - c) node to node communication
  - d) process to process communication
- 3) Which one of the following authentication method is used by SSH?
  - a) public-key
  - b) host based
  - c) password
  - d) all of these
- 4) Simple mail transfer protocol (SMTP) utilizes \_\_\_\_\_ as the transport layer protocol for electronic mail transfer.
  - a) DHCP
  - b) UDP
  - c) TCP
  - d) SCTP
- 5) If 5 files are transferred from server A to client B in the same session. The number of TCP connection between A and B is \_\_\_\_\_.
  - a) 6
  - b) 3
  - c) 9
  - d) 5
- 6) Mode of data transfer in FTP, where all these left to TCP:
  - a) Compressed mode
  - b) Block mode
  - c) Stream mode
  - d) None of these
- 7) The DHCP server \_\_\_\_\_.
  - a) Maintains a database of available IP addresses
  - b) Maintains the information about client configuration parameters
  - c) Grants a IP address when receives a request from a client
  - d) All of these

- c) Concurrency in Servers

**Section – II**

**Q.5 Attempt any three:** **12**

- a) Illustrate the message access agent w.r.t SMTP?
- b) Explain with figure the packet format of SSH?
- c) Extend the DHCP protocol with its transition state?
- d) Identify and illustrate the options and option negotiation from TELNET?

**Q.6 Illustrate the following w.r.t DNS** **08**

- a) Resolution
- b) DNS messages
- c) Types of Records

**OR**

Explain in detail the role of message transfer agent in an electronic mail system?

**Q.7 Attempt any two** **08**

- a) E-mail architecture
- b) Escape Character and Mode of Operation
- c) DNS Messages

**S.Y. (B.Tech.) (Sem - II) (New) (CBCS) Examination: Oct/Nov-2022**  
**INFORMATION TECHNOLOGY**  
**Computer Networks**

Day & Date: Thursday, 09-03-2023  
Time: 02:00 PM To 05:00 PM

Max. Marks: 70

- Instructions:** 1) Q. No. 1 is compulsory. It should be solved in the first 30 minutes in answer book. Page no 03 (Starting page of the Answer Book). Each question carries one mark.  
2) Don't forget to Mention question paper set (P/Q/R/S) on top of page.  
3) Figures to the right indicates full marks.  
4) Assume suitable data if necessary.

**MCQ/Objective Type Questions**

Duration: 30 Minutes

Marks: 14

**Q.1 Choose the correct alternatives from the options.**

**14**

- 1) Mode of data transfer in FTP, where all these left to TCP:  
a) Compressed mode                      b) Block mode  
c) Stream mode                              d) None of these
- 2) The DHCP server \_\_\_\_\_.  
a) Maintains a database of available IP addresses  
b) Maintains the information about client configuration parameters  
c) Grants a IP address when receives a request from a client  
d) All of these
- 3) The values GET, POST, HEAD are specified in \_\_\_\_\_ of HTTP message.  
a) Header line                                  b) Request line  
c) Status line                                   d) Entity body
- 4) When the mail server sends mail to other mail servers it becomes \_\_\_\_\_.  
a) SMTP server                                b) Peer  
c) SMTP client                                  d) Master
- 5) The entire hostname has a maximum of \_\_\_\_\_.  
a) 127 characters                              b) 255 characters  
c) 63 characters                                 d) 31 characters
- 6) Which amongst the following statements is correct for "character at a time" mode?  
a) Character processing is done on the local system under the control of the remote system  
b) All text is processed locally, and only confirmed lines are sent to the remote host  
c) All text is echoed locally, only completed lines are sent to the remote host  
d) Most text typed is immediately sent to the remote host for processing

**S.Y. (B.Tech.) (Sem - II) (New) (CBCS) Examination: Oct/Nov-2022**  
**INFORMATION TECHNOLOGY**  
**Computer Networks**

Day & Date: Thursday, 09-03-2023  
 Time: 02:00 PM To 05:00 PM

Max. Marks: 56

**Instructions:** 1) All questions are compulsory.  
 2) Figures to the right indicate full marks.

**Section – I**

**Q.2 Attempt any three.** **12**

- a) State and illustrate the different levels of network addressing?
- b) Extend with figure the client server paradigm?
- c) Summarize the fragmentation w.r.t. IP protocol?
- d) Explain in detail the congestion control in TCP?

**Q.3 Justify the following w.r.t. SCTP?** **08**

- a) Services
- b) Features
- c) Packet format

**OR**

Identify and illustrate all the socket system calls in socket interface?

**Q.4 Attempt any two** **08**

- a) User Datagram
- b) Special addresses
- c) Concurrency in Servers

**Section – II**

**Q.5 Attempt any three:** **12**

- a) Illustrate the message access agent w.r.t SMTP?
- b) Explain with figure the packet format of SSH?
- c) Extend the DHCP protocol with its transition state?
- d) Identify and illustrate the options and option negotiation from TELNET?

**Q.6 Illustrate the following w.r.t DNS** **08**

- a) Resolution
- b) DNS messages
- c) Types of Records

**OR**

Explain in detail the role of message transfer agent in an electronic mail system?

**Q.7 Attempt any two** **08**

- a) E-mail architecture
- b) Escape Character and Mode of Operation
- c) DNS Messages

|-----------------|--|
| <b>Seat No.</b> |  |
|-----------------|--|

- 7) Match the following and choose the correct option
- | Rule                       | No. of subintervals |
|----------------------------|---------------------|
| 1) Simpson's (1/3) rd rule | p) Any              |
| 2) Simpson's (3/8) th rule | q) Multiple of 6    |
| 3) Weddle's rule           | r) Multiple of 3    |
|                            | s) Multiple of 2    |
- a)  $1 - p, 2 - q, 3 - s$       b)  $1 - r, 2 - s, 3 - q$   
 c)  $1 - s, 2 - p, 3 - s$       d)  $1 - s, 2 - r, 3 - q$
- 8) While solving an assignment problem an activity is assigned to a resource with zero opportunity cost the objective is to \_\_\_\_\_.  
 a) Reduce the cost of assignment to zero  
 b) Minimize total cost of an assignment  
 c) Reduce the cost of that particular assignment to minimum  
 d) none
- 9) Let  $A, B \in F(x)$  then A is said to be subset of B if for all  $x \in X$  \_\_\_\_\_.  
 a)  $A(x) \geq B(x)$       b)  $A(x) \leq B(x)$   
 c)  $A(x) > B(x)$       d) None
- 10) If A is a fuzzy set defined on  $X = [2, 4]$  by  $A(x) = \frac{x-2}{2}$  then  $\alpha_A =$  \_\_\_\_\_.  
 a)  $[2, 4]$       b)  $[2\alpha + 2, 4]$   
 c) Both a and b      d) None
- 11) For the maximization LPP the simplex method is terminated when all the net evaluations are \_\_\_\_\_.  
 a) Negative      b) Non-negative  
 c) Zero      d) All of the above
- 12) A is a fuzzy set,  $A(x) = \bar{A}(x), x \in X$  then x is \_\_\_\_\_.  
 a) special point      b) middle point  
 c) equilibrium point      d) point of intersection
- 13) For fuzzy sets A, B  $|A| = 3$   $|B| = 10$ ,  $|A \cap B| = 0.9$  then  $S(A, B) =$  \_\_\_\_\_.  
 a) 0.09      b) 0.9  
 c) 0.3      d) 0.99
- 14) Which of the following is not a fuzzy number?  
 a)  $A + B$       b)  $A - B$   
 c)  $\text{MIN}(A, B)$       d) None

**INFORMATION TECHNOLOGY ENGINEERING**  
**Applied Mathematics – II**

Day & Date: Friday, 10-03-2023  
 Time: 02:00 PM To 05:00 PM

Max. Marks: 56

- Instructions:** 1) All questions are compulsory.  
 2) Figures to the right indicate full marks.  
 3) Use of non-programmable calculator is allowed.

**Section – I**

**Q.2 Attempt any three of the following.**

**09**

- Find the Positive root of the equation  $x^3 - \log_{10} x - 12 = 0$  correct up to three decimal places by using False Position method.
- Solve the system of equations by using Gauss Elimination method.  
 $x + 2y + z = 3, 2x + 3y + 3z = 10, 3x - y + 2z = 13$
- Find the value of  $\sqrt{24}$  by using Newton Raphson method. Correct up to four decimal places.
- State the Trapezoidal Rule and evaluate  $\int_0^6 \frac{1}{1+x^2} dx$
- Find first three approximations by using Gauss Jacobi method  
 $10x - 5y - 2z = 3, 4x - 10y + 3z = -3, x + 6y + 10z = 3$

**Q.3 Attempt any three of the following.**

**09**

- Apply Gaussian Quadrature 2-point formula to evaluate  $\int_{-2}^2 e^{-x/2} dx$
- Discover the double root of the equation  $x^3 - 5x^2 + 8x - 4 = 0$ . Which is near to 1.8 by using Newton Raphson method.
- Find first five approximations of the Eigen values of the given matrix by using Power method  $\begin{bmatrix} 2 & -1 & 0 \\ -1 & 2 & -1 \\ 0 & -1 & 2 \end{bmatrix}$
- Apply Simpson's three-eighth rule to evaluate  $\int_{0.2}^{1.4} (\sin x - \log x + e^x) dx$  by take  $h = 0.2$ .
- Solve the system of equations by using Gauss Jordan method  
 $2x - 3y - z = 5, 4x + 4y - 3z = 3, 2x - 3y + 2z = 2$

**Q.4 Attempt any two of the following.**

**10**

- Solve the system of equations by using L. U. Decomposition method  
 $2x + 3y + z = 9, x + 2y + 3z = 6, 3x + y + 2z = 8$
- Solve the system of non-linear equations  $x^2 + y = 11, y^2 + x = 7$  take initial approximations as  $x_0 = 3.5$  and  $y_0 = -1.8$
- Apply Romberg integration method to evaluate  $\int_0^{0.5} \frac{x}{\sin x} dx$

## Section – II

**Q.5 Attempt any three of the following.**

09

- a) Define membership function and fuzzy set  
 b) For the fuzzy sets

|           |       |       |       |       |       |       |
|-----------|-------|-------|-------|-------|-------|-------|
| Elements: | $x_1$ | $x_2$ | $x_3$ | $x_4$ | $x_5$ | $x_6$ |
| A(x):     | 0.1   | 0.6   | 0.8   | 0.9   | 0.7   | 0.1   |
| B(x):     | 0.9   | 0.7   | 0.5   | 0.2   | 0.1   | 0     |

Then find  $(A \cup B)'$ ,  $A \cup B'$ 

- c) Evaluate the following

- i)  $[1,3] + [5,8]$   
 ii)  $[1,3] - [5,8]$   
 iii)  $[1,3] \cdot [5,8]$   
 iv)  $[1,3]/[5,8]$

- d) Find the equilibrium point for  $C(x) = \frac{x}{x+1}$   
 e) Find I.B.F.S by using Hungarian method

| Warehouse<br>Factory | I  | II | III | IV |
|----------------------|----|----|-----|----|
| A                    | 15 | 14 | 12  | 16 |
| B                    | 23 | 22 | 25  | 24 |
| C                    | 31 | 34 | 32  | 33 |
| D                    | 21 | 32 | 44  | 53 |

**Q.6 Attempt any three of the following.**

09

- a) Determine whether the following fuzzy set is a fuzzy number

$$C(x) = x \quad 0 \leq x \leq 1$$

$$= 0 \quad \text{otherwise}$$

- b) Prove that  $\alpha_{+(A \cap B)} = \alpha_{+A} \cap \alpha_{+B}$

- c) For the fuzzy sets

|           |       |       |       |       |       |       |
|-----------|-------|-------|-------|-------|-------|-------|
| Elements: | $x_1$ | $x_2$ | $x_3$ | $x_4$ | $x_5$ | $x_6$ |
| A(x):     | 0.1   | 0.6   | 0.8   | 0.9   | 0.7   | 0.1   |
| B(x):     | 0.9   | 0.7   | 0.5   | 0.2   | 0.1   | 0     |

Then find fuzzy set  $0.4_{A \cap B}$ 

- d) Solve the Assignment Problem

| Tasks | E  | F  | G  | H  |
|-------|----|----|----|----|
| A     | 18 | 26 | 17 | 11 |
| B     | 13 | 28 | 14 | 26 |
| C     | 38 | 19 | 18 | 15 |
| D     | 19 | 26 | 24 | 10 |

- e) Maximize  $Z = 3x_1 + 2x_2$ , subject to

$$x_1 + x_2 \leq 4, \quad x_1 - x_2 \leq 2, \quad x_1, x_2 \geq 0$$

**Q.7 Attempt any two**

- a)**
- State first decomposition theorem and find
- $f(A)$
- where

$$A(x) = \frac{0.7}{-5} + \frac{0.6}{-4} + \frac{1}{-3} + \frac{0.4}{-2} + \frac{0.45}{-1} + \frac{0.75}{0} + \frac{0.81}{1} + \frac{0.34}{2} + \frac{1}{3} + \frac{0.17}{4} + \frac{0.91}{5}$$

$$X = \{-5, -4, -3, -2, -1, 0, 1, 2, 3, 4, 5\}$$

$$F: x \rightarrow y \text{ defined by } f(x) = x^2$$

- b)**
- Find
- $A + B$
- for the following membership function:

$$A(x) = \frac{x+1}{2} \quad -1 < x \leq 1$$

$$= \frac{3-x}{2} \quad 1 < x < 3$$

$$= 0 \quad \text{otherwise}$$

$$B(x) = \frac{x-1}{2} \quad 1 < x \leq 3$$

$$= \frac{5-x}{2} \quad 3 < x \leq 5$$

$$= 0 \quad \text{otherwise}$$

- c)**
- Solve the Assignment Problem

Machine

| Job | A  | B  | C  | D  |
|-----|----|----|----|----|
| 1   | 18 | 24 | 28 | 32 |
| 2   | 8  | 13 | 17 | 19 |
| 3   | 10 | 15 | 19 | 22 |

|          |  |

 2) Don't forget to Mention question paper set (P/Q/R/S) on top of page.  
 3) Figures to the right indicates full marks.  
 4) Use of non-programmable calculator is allowed.

**MCQ/Objective Type Questions**

Duration: 30 Minutes

Marks: 14

**Q.1 Choose the correct alternatives from the options. 14**

- 1) While solving an assignment problem an activity is assigned to a resource with zero opportunity cost the objective is to \_\_\_\_\_.  
 a) Reduce the cost of assignment to zero  
 b) Minimize total cost of an assignment  
 c) Reduce the cost of that particular assignment to minimum  
 d) none
- 2) Let  $A, B \in F(X)$  then A is said to be subset of B if for all  $x \in X$  \_\_\_\_\_.  
 a)  $A(x) \geq B(x)$   
 b)  $A(x) \leq B(x)$   
 c)  $A(x) > B(x)$   
 d) None
- 3) If A is a fuzzy set defined on  $X = [2,4]$  by  $A(x) = \frac{x-2}{2}$  then  $\alpha_A =$  \_\_\_\_\_.  
 a)  $[2,4]$   
 b)  $[2\alpha + 2,4]$   
 c) Both a and b  
 d) None
- 4) For the maximization LPP the simplex method is terminated when all the net evaluations are \_\_\_\_\_.  
 a) Negative  
 b) Non-negative  
 c) Zero  
 d) All of the above
- 5) A is a fuzzy set,  $A(x) = \bar{A}(x), x \in X$  then x is \_\_\_\_\_.  
 a) special point  
 b) middle point  
 c) equilibrium point  
 d) point of intersection
- 6) For fuzzy sets A, B  $|A| = 3$   $|B| = 10$ ,  $|A \cap B| = 0.9$  then  $S(A, B) =$  \_\_\_\_\_.  
 a) 0.09  
 b) 0.9  
 c) 0.3  
 d) 0.99
- 7) Which of the following is not a fuzzy number?  
 a)  $A + B$   
 b)  $A - B$   
 c)  $\text{MIN}(A, B)$   
 d) None

Day & Date: Friday, 10-03-2023  
 Time: 02:00 PM To 05:00 PM

Max. Marks: 56

- Instructions:** 1) All questions are compulsory.  
 2) Figures to the right indicate full marks.  
 3) Use of non-programmable calculator is allowed.

**Section – I**

**Q.2 Attempt any three of the following.**

**09**

- Find the Positive root of the equation  $x^3 - \log_{10} x - 12 = 0$  correct up to three decimal places by using False Position method.
- Solve the system of equations by using Gauss Elimination method.  
 $x + 2y + z = 3, 2x + 3y + 3z = 10, 3x - y + 2z = 13$
- Find the value of  $\sqrt{24}$  by using Newton Raphson method. Correct up to four decimal places.
- State the Trapezoidal Rule and evaluate  $\int_0^6 \frac{1}{1+x^2} dx$
- Find first three approximations by using Gauss Jacobi method  
 $10x - 5y - 2z = 3, 4x - 10y + 3z = -3, x + 6y + 10z = 3$

**Q.3 Attempt any three of the following.**

**09**

- Apply Gaussian Quadrature 2-point formula to evaluate  $\int_{-2}^2 e^{-x/2} dx$
- Discover the double root of the equation  $x^3 - 5x^2 + 8x - 4 = 0$ . Which is near to 1.8 by using Newton Raphson method.
- Find first five approximations of the Eigen values of the given matrix by using Power method  $\begin{bmatrix} 2 & -1 & 0 \\ -1 & 2 & -1 \\ 0 & -1 & 2 \end{bmatrix}$
- Apply Simpson's three-eighth rule to evaluate  $\int_{0.2}^{1.4} (\sin x - \log x + e^x) dx$  by take  $h = 0.2$ .
- Solve the system of equations by using Gauss Jordan method  
 $2x - 3y - z = 5, 4x + 4y - 3z = 3, 2x - 3y + 2z = 2$

**Q.4 Attempt any two of the following.**

**10**

- Solve the system of equations by using L. U. Decomposition method  
 $2x + 3y + z = 9, x + 2y + 3z = 6, 3x + y + 2z = 8$
- Solve the system of non-linear equations  $x^2 + y = 11, y^2 + x = 7$  take initial approximations as  $x_0 = 3.5$  and  $y_0 = -1.8$
- Apply Romberg integration method to evaluate  $\int_0^{0.5} \frac{x}{\sin x} dx$

## Section – II

**Q.5 Attempt any three of the following.**

09

- a) Define membership function and fuzzy set  
 b) For the fuzzy sets

|           |       |       |       |       |       |       |
|-----------|-------|-------|-------|-------|-------|-------|
| Elements: | $x_1$ | $x_2$ | $x_3$ | $x_4$ | $x_5$ | $x_6$ |
| A(x):     | 0.1   | 0.6   | 0.8   | 0.9   | 0.7   | 0.1   |
| B(x):     | 0.9   | 0.7   | 0.5   | 0.2   | 0.1   | 0     |

Then find  $(A \cup B)'$ ,  $A \cup B'$ 

- c) Evaluate the following

- i)  $[1,3] + [5,8]$   
 ii)  $[1,3] - [5,8]$   
 iii)  $[1,3] \cdot [5,8]$   
 iv)  $[1,3]/[5,8]$

- d) Find the equilibrium point for  $C(x) = \frac{x}{x+1}$   
 e) Find I.B.F.S by using Hungarian method

| Warehouse<br>Factory | I  | II | III | IV |
|----------------------|----|----|-----|----|
| A                    | 15 | 14 | 12  | 16 |
| B                    | 23 | 22 | 25  | 24 |
| C                    | 31 | 34 | 32  | 33 |
| D                    | 21 | 32 | 44  | 53 |

**Q.6 Attempt any three of the following.**

09

- a) Determine whether the following fuzzy set is a fuzzy number

$$C(x) = x \quad 0 \leq x \leq 1$$

$$= 0 \quad \text{otherwise}$$

- b) Prove that  $\alpha_{+(A \cap B)} = \alpha_{+A} \cap \alpha_{+B}$

- c) For the fuzzy sets

|           |       |       |       |       |       |       |
|-----------|-------|-------|-------|-------|-------|-------|
| Elements: | $x_1$ | $x_2$ | $x_3$ | $x_4$ | $x_5$ | $x_6$ |
| A(x):     | 0.1   | 0.6   | 0.8   | 0.9   | 0.7   | 0.1   |
| B(x):     | 0.9   | 0.7   | 0.5   | 0.2   | 0.1   | 0     |

Then find fuzzy set  $0.4_{A \cap B}$ 

- d) Solve the Assignment Problem

| Tasks | E  | F  | G  | H  |
|-------|----|----|----|----|
| A     | 18 | 26 | 17 | 11 |
| B     | 13 | 28 | 14 | 26 |
| C     | 38 | 19 | 18 | 15 |
| D     | 19 | 26 | 24 | 10 |

- e) Maximize  $Z = 3x_1 + 2x_2$ , subject to

$$x_1 + x_2 \leq 4, \quad x_1 - x_2 \leq 2, \quad x_1, x_2 \geq 0$$

**Q.7 Attempt any two**

- a)**
- State first decomposition theorem and find
- $f(A)$
- where

$$A(x) = \frac{0.7}{-5} + \frac{0.6}{-4} + \frac{1}{-3} + \frac{0.4}{-2} + \frac{0.45}{-1} + \frac{0.75}{0} + \frac{0.81}{1} + \frac{0.34}{2} + \frac{1}{3} + \frac{0.17}{4} + \frac{0.91}{5}$$

$$X = \{-5, -4, -3, -2, -1, 0, 1, 2, 3, 4, 5\}$$

$$F: x \rightarrow y \text{ defined by } f(x) = x^2$$

- b)**
- Find
- $A + B$
- for the following membership function:

$$A(x) = \frac{x+1}{2} \quad -1 < x \leq 1$$

$$= \frac{3-x}{2} \quad 1 < x < 3$$

$$= 0 \quad \text{otherwise}$$

$$B(x) = \frac{x-1}{2} \quad 1 < x \leq 3$$

$$= \frac{5-x}{2} \quad 3 < x \leq 5$$

$$= 0 \quad \text{otherwise}$$

**Applied Mathematics – II**

Day & Date: Friday, 10-03-2023  
 Time: 02:00 PM To 05:00 PM

Max. Marks: 70

- Instructions:** 1) Q. No. 1 is compulsory. It should be solved in the first 30 minutes in answer book. Page no 03 (Starting page of the Answer Book). Each question carries one mark.  
 2) Don't forget to Mention question paper set (P/Q/R/S) on top of page.  
 3) Figures to the right indicates full marks.  
 4) Use of non-programmable calculator is allowed.

**MCQ/Objective Type Questions**

Duration: 30 Minutes

Marks: 14

**Q.1 Choose the correct alternatives from the options.**

**14**

- 1) For the maximization LPP the simplex method is terminated when all the net evaluations are \_\_\_\_\_.
  - a) Negative
  - b) Non-negative
  - c) Zero
  - d) All of the above
- 2)  $A$  is a fuzzy set,  $A(x) = \bar{A}(x), x \in X$  then  $x$  is \_\_\_\_\_.
  - a) special point
  - b) middle point
  - c) equilibrium point
  - d) point of intersection
- 3) For fuzzy sets  $A, B$   $|A| = 3$   $|B| = 10, |A \cap B| = 0.9$  then  $S(A, B) =$  \_\_\_\_\_.
  - a) 0.09
  - b) 0.9
  - c) 0.3
  - d) 0.99
- 4) Which of the following is not a fuzzy number?
  - a)  $A + B$
  - b)  $A - B$
  - c)  $\text{MIN}(A, B)$
  - d) None
- 5) The interval in which a real root of the equation  $x^3 - 2x - 5 = 0$  lies is \_\_\_\_\_.
  - a) (1,2)
  - b) (0,1)
  - c) (2,3)
  - d) (3,4)
- 6) The formula used for solving the equation using Regula Falsi method is
  - i)  $x = \frac{bf(a) - af(b)}{f(a) - f(b)}$
  - ii)  $x = \frac{af(b) - bf(a)}{f(a) - f(b)}$
  - a) Only i is Correct
  - b) Only ii is Correct
  - c) Both i, ii are Correct
  - d) Both i, ii are Incorrect
- 7) The coefficient matrix is transformed to \_\_\_\_\_ form in Gauss Elimination method.
  - a) Diagonal
  - b) Upper triangular
  - c) Lower triangular
  - d) None of a, b, c

- 8) Which of the following is not direct method?  
 a) Gauss – Elimination                      b) Gauss – Jordan  
 c) Gauss – Seidal                              d) Crout's method
- 9) To apply Simpson's one-third rule the number of sub-intervals must be \_\_\_\_\_.  
 a) Even                                              b) Odd  
 c) Multiple of 3                                  d) Multiple of 6
- 10) Which of the following is false?  
 a) Error in Trapezoidal rule is of order  $h^2$   
 b) Error in Weddle's rule is of order  $h^7$   
 c) Error in Simpson's  $3/8^{\text{th}}$  rule is of order  $h^5$   
 d) Error in Simpson's  $1/3^{\text{rd}}$  rule is of order  $h$
- 11) Match the following and choose the correct option
- | Rule                       | No. of subintervals    |
|----------------------------|------------------------|
| 1) Simpson's (1/3) rd rule | p) Any                 |
| 2) Simpson's (3/8) th rule | q) Multiple of 6       |
| 3) Weddle's rule           | r) Multiple of 3       |
|                            | s) Multiple of 2       |
| a) 1 – p, 2 – q, 3 – s     | b) 1 – r, 2 – s, 3 – q |
| c) 1 – s, 2 – p, 3 – s     | d) 1 – s, 2 – r, 3 – q |
- 12) While solving an assignment problem an activity is assigned to a resource with zero opportunity cost the objective is to \_\_\_\_\_.  
 a) Reduce the cost of assignment to zero  
 b) Minimize total cost of an assignment  
 c) Reduce the cost of that particular assignment to minimum  
 d) none
- 13) Let  $A, B \in F(X)$  then A is said to be subset of B if for all  $x \in X$  \_\_\_\_\_.  
 a)  $A(x) \geq B(x)$                                   b)  $A(x) \leq B(x)$   
 c)  $A(x) > B(x)$                                   d) None
- 14) If A is a fuzzy set defined on  $X = [2,4]$  by  $A(x) = \frac{x-2}{2}$  then  $\alpha_A =$  \_\_\_\_\_.  
 a)  $[2,4]$                                               b)  $[2\alpha + 2,4)$   
 c) Both a and b                                      d) None

**S.Y. (B.Tech.) (Sem - II) (New) (CBCS) Examination: Oct/Nov-2022**  
**INFORMATION TECHNOLOGY ENGINEERING**  
**Applied Mathematics – II**

Day & Date: Friday, 10-03-2023  
 Time: 02:00 PM To 05:00 PM

Max. Marks: 56

- Instructions:** 1) All questions are compulsory.  
 2) Figures to the right indicate full marks.  
 3) Use of non-programmable calculator is allowed.

**Section – I**

**Q.2 Attempt any three of the following.**

**09**

- Find the Positive root of the equation  $x^3 - \log_{10} x - 12 = 0$  correct up to three decimal places by using False Position method.
- Solve the system of equations by using Gauss Elimination method.  
 $x + 2y + z = 3, 2x + 3y + 3z = 10, 3x - y + 2z = 13$
- Find the value of  $\sqrt{24}$  by using Newton Raphson method. Correct up to four decimal places.
- State the Trapezoidal Rule and evaluate  $\int_0^6 \frac{1}{1+x^2} dx$
- Find first three approximations by using Gauss Jacobi method  
 $10x - 5y - 2z = 3, 4x - 10y + 3z = -3, x + 6y + 10z = 3$

**Q.3 Attempt any three of the following.**

**09**

- Apply Gaussian Quadrature 2-point formula to evaluate  $\int_{-2}^2 e^{-x/2} dx$
- Discover the double root of the equation  $x^3 - 5x^2 + 8x - 4 = 0$ . Which is near to 1.8 by using Newton Raphson method.
- Find first five approximations of the Eigen values of the given matrix by using Power method  $\begin{bmatrix} 2 & -1 & 0 \\ -1 & 2 & -1 \\ 0 & -1 & 2 \end{bmatrix}$
- Apply Simpson's three-eighth rule to evaluate  $\int_{0.2}^{1.4} (\sin x - \log x + e^x) dx$  by take  $h = 0.2$ .
- Solve the system of equations by using Gauss Jordan method  
 $2x - 3y - z = 5, 4x + 4y - 3z = 3, 2x - 3y + 2z = 2$

**Q.4 Attempt any two of the following.**

**10**

- Solve the system of equations by using L. U. Decomposition method  
 $2x + 3y + z = 9, x + 2y + 3z = 6, 3x + y + 2z = 8$
- Solve the system of non-linear equations  $x^2 + y = 11, y^2 + x = 7$  take initial approximations as  $x_0 = 3.5$  and  $y_0 = -1.8$
- Apply Romberg integration method to evaluate  $\int_0^{0.5} \frac{x}{\sin x} dx$

## Section – II

**Q.5 Attempt any three of the following.**

09

- a) Define membership function and fuzzy set  
 b) For the fuzzy sets

|           |       |       |       |       |       |       |
|-----------|-------|-------|-------|-------|-------|-------|
| Elements: | $x_1$ | $x_2$ | $x_3$ | $x_4$ | $x_5$ | $x_6$ |
| A(x):     | 0.1   | 0.6   | 0.8   | 0.9   | 0.7   | 0.1   |
| B(x):     | 0.9   | 0.7   | 0.5   | 0.2   | 0.1   | 0     |

Then find  $(A \cup B)'$ ,  $A \cup B'$ 

- c) Evaluate the following

- i)  $[1,3] + [5,8]$   
 ii)  $[1,3] - [5,8]$   
 iii)  $[1,3] \cdot [5,8]$   
 iv)  $[1,3]/[5,8]$

- d) Find the equilibrium point for  $C(x) = \frac{x}{x+1}$   
 e) Find I.B.F.S by using Hungarian method

| Warehouse<br>Factory | I  | II | III | IV |
|----------------------|----|----|-----|----|
| A                    | 15 | 14 | 12  | 16 |
| B                    | 23 | 22 | 25  | 24 |
| C                    | 31 | 34 | 32  | 33 |
| D                    | 21 | 32 | 44  | 53 |

**Q.6 Attempt any three of the following.**

09

- a) Determine whether the following fuzzy set is a fuzzy number

$$C(x) = x \quad 0 \leq x \leq 1$$

$$= 0 \quad \text{otherwise}$$

- b) Prove that  $\alpha_{+(A \cap B)} = \alpha_{+A} \cap \alpha_{+B}$

- c) For the fuzzy sets

|           |       |       |       |       |       |       |
|-----------|-------|-------|-------|-------|-------|-------|
| Elements: | $x_1$ | $x_2$ | $x_3$ | $x_4$ | $x_5$ | $x_6$ |
| A(x):     | 0.1   | 0.6   | 0.8   | 0.9   | 0.7   | 0.1   |
| B(x):     | 0.9   | 0.7   | 0.5   | 0.2   | 0.1   | 0     |

Then find fuzzy set  $0.4_{A \cap B}$ 

- d) Solve the Assignment Problem

| Tasks | E  | F  | G  | H  |
|-------|----|----|----|----|
| A     | 18 | 26 | 17 | 11 |
| B     | 13 | 28 | 14 | 26 |
| C     | 38 | 19 | 18 | 15 |
| D     | 19 | 26 | 24 | 10 |

- e) Maximize  $Z = 3x_1 + 2x_2$ , subject to

$$x_1 + x_2 \leq 4, \quad x_1 - x_2 \leq 2, \quad x_1, x_2 \geq 0$$

**Q.7 Attempt any two**

- a)**
- State first decomposition theorem and find
- $f(A)$
- where

$$A(x) = \frac{0.7}{-5} + \frac{0.6}{-4} + \frac{1}{-3} + \frac{0.4}{-2} + \frac{0.45}{-1} + \frac{0.75}{0} + \frac{0.81}{1} + \frac{0.34}{2} + \frac{1}{3} + \frac{0.17}{4} + \frac{0.91}{5}$$

$$X = \{-5, -4, -3, -2, -1, 0, 1, 2, 3, 4, 5\}$$

$$F: x \rightarrow y \text{ defined by } f(x) = x^2$$

- b)**
- Find
- $A + B$
- for the following membership function:

$$A(x) = \frac{x+1}{2} \quad -1 < x \leq 1$$

$$= \frac{3-x}{2} \quad 1 < x < 3$$

$$= 0 \quad \text{otherwise}$$

$$B(x) = \frac{x-1}{2} \quad 1 < x \leq 3$$

$$= \frac{5-x}{2} \quad 3 < x \leq 5$$

$$= 0 \quad \text{otherwise}$$

- c)**
- Solve the Assignment Problem

**MCQ/Objective Type Questions**

Duration: 30 Minutes

Marks: 14

**Q.1 Choose the correct alternatives from the options.**

**14**

- 1) Which of the following is false?
  - a) Error in Trapezoidal rule is of order  $h^2$
  - b) Error in Weddle's rule is of order  $h^7$
  - c) Error in Simpson's  $3/8^{\text{th}}$  rule is of order  $h^5$
  - d) Error in Simpson's  $1/3^{\text{rd}}$  rule is of order  $h$
- 2) Match the following and choose the correct option
 

| Rule                                  | No. of subintervals |
|---------------------------------------|---------------------|
| 1) Simpson's $(1/3)^{\text{rd}}$ rule | p) Any              |
| 2) Simpson's $(3/8)^{\text{th}}$ rule | q) Multiple of 6    |
| 3) Weddle's rule                      | r) Multiple of 3    |
|                                       | s) Multiple of 2    |

  - a) 1 – p, 2 – q, 3 – s
  - b) 1 – r, 2 – s, 3 – q
  - c) 1 – s, 2 – p, 3 – s
  - d) 1 – s, 2 – r, 3 – q
- 3) While solving an assignment problem an activity is assigned to a resource with zero opportunity cost the objective is to \_\_\_\_\_.
  - a) Reduce the cost of assignment to zero
  - b) Minimize total cost of an assignment
  - c) Reduce the cost of that particular assignment to minimum
  - d) none
- 4) Let  $A, B \in F(X)$  then A is said to be subset of B if for all  $x \in X$  \_\_\_\_\_.
  - a)  $A(x) \geq B(x)$
  - b)  $A(x) \leq B(x)$
  - c)  $A(x) > B(x)$
  - d) None
- 5) If A is a fuzzy set defined on  $X = [2, 4]$  by  $A(x) = \frac{x-2}{2}$  then  $\alpha_A =$  \_\_\_\_\_.
  - a)  $[2, 4]$
  - b)  $[2\alpha + 2, 4]$
  - c) Both a and b
  - d) None

**S. Y. (B.Tech.) (Sem - II) (New) (CBCS) Examination: Oct/Nov-2022**  
**INFORMATION TECHNOLOGY ENGINEERING**  
**Machine Learning**

Day & Date: Tuesday, 14-03-2023  
 Time: 02:00 PM To 05:00 PM

Max. Marks: 56

- Instructions:** 1) All questions are compulsory.  
 2) Make suitable assumptions (if necessary and state them clearly)  
 3) Figures to the right indicate full marks.

**Section – I**

- Q.2 Answer the following questions. (Any Four) 16**  
 a) Explain tying machine learning methods to outcome.  
 b) Define machine learning. Explain Lear verging the power of machine learning.  
 c) Write the differences between supervised and unsupervised learning.  
 d) Explain the application of machine learning.  
 e) Explain the term reinforcement learning.
- Q.3 Answer the following questions. (Any One) 06**  
 a) Explain learning as optimization.  
 b) How to determine the best learning model explain it?
- Q.4 What is cost function explain its different types? 06**

**Section – II**

- Q.5 Answer the following questions. (Any Four) 16**  
 a) Write short note on Searching for the best hyper parameters.  
 b) Write a short note on applying feature engineering.  
 c) Explain the term variance.  
 d) Explain the descending error curve.  
 e) Explain the stacking model.
- Q.6 Answer the following questions. (Any One) 06**  
 a) Write short note on underfitting and overfitting.  
 b) Explain the discovering the Incredible perceptron.
- Q.7 Explain the use of cross validation. 06**

|                 |  |
|-----------------|--|
| <b>Seat No.</b> |  |
|-----------------|--|

- 9) \_\_\_\_\_ is focused on primarily on making inferences and understanding the characteristics of the variable.
- a) Data mining
  - b) Statistics
  - c) Artificial Intelligence
  - d) All
- 10) In Python \_\_\_\_\_ package offers all the functionality needed to create and manipulate matrices.
- a) scipy
  - b) numpy
  - c) none
  - d) sklearn
- 11) \_\_\_\_\_ ways improves machine learning model.
- a) error curve method
  - b) testing multiple model
  - c) SDLC Model
  - d) none
- 12) \_\_\_\_\_ Technique is used to group similar types of objects with similar parameter.
- a) Bayesian
  - b) Clustering
  - c) Association
  - d) None
- 13) Which of the following steps are required to apply machine learning technique to support business strategy?
- a) What is the business problem you are trying to solve
  - b) When are the hidden data resources that you can take advantage
  - c) How can you prepare to get your data
  - d) all
- 14) No matter what the information is, for a machine learning algorithm to correctly process it, it should always be transformed into a \_\_\_\_\_.
- a) number
  - b) text
  - c) images
  - d) all of above

|                 |  |

**Machine Learning**

Day & Date: Tuesday, 14-03-2023  
 Time: 02:00 PM To 05:00 PM

Max. Marks: 70

- Instructions:** 1) Q. No. 1 is compulsory. It should be solved in the first 30 minutes in Answer book. Page no 03 (Starting page of the Answer Book). Each Question carries one mark.  
 2) Don't forget to Mention question paper set (P/Q/R/S) on top of page.  
 3) Figures to the right indicate full marks

**MCQ/Objective Type Questions**

Duration: 30 Minutes

Marks: 14

**Q.1 Choose the correct alternatives from the options.**

**14**

- 1) \_\_\_\_\_ function performs the rendering and uses a grayscale color map.
  - a) plt.show()
  - b) show()
  - c) imshow()
  - d) imread()
- 2) \_\_\_\_\_ is the approach to machine learning that is based on neuroscience.
  - a) connectionism
  - b) neuron
  - c) deep learning
  - d) all of above
- 3) \_\_\_\_\_ Model looks into the future analysis of data.
  - a) Descriptive
  - b) Predictive
  - c) Business
  - d) None of above
- 4) \_\_\_\_\_ method is used to avoid over fitting.
  - a) Bayesian
  - b) Regularization
  - c) Rule based machine learning
  - d) None
- 5) Quantitative features are perfect for machine learning because they define values as \_\_\_\_\_.
  - a) number
  - b) text
  - c) images
  - d) all of above
- 6) \_\_\_\_\_ is focused on primarily on making inferences and understanding the characteristics of the variable.
  - a) Data mining
  - b) Statistics
  - c) Artificial Intelligence
  - d) All
- 7) In Python \_\_\_\_\_ package offers all the functionality needed to create and manipulate matrices.
  - a) scipy
  - b) numpy
  - c) none
  - d) sklearn

**MCQ/Objective Type Questions**

Duration: 30 Minutes

Marks: 14

**Q.1 Choose the correct alternatives from the options.**

**14**

- 1) Among the following, choose the correct application of data science in Healthcare.
  - a) Data science for genomics
  - b) Data science for medical imaging
  - c) Drug discovery with Data science
  - d) All of the above
- 2) What is the first step in linear algebra?
  - a) Let's complicate the problem
  - b) Solve the problem
  - c) Visualize the problem
  - d) None of the above
- 3) The concept of Eigen values and vectors is applicable to \_\_\_\_\_.
  - a) Scalar matrix
  - b) Identity matrix
  - c) Upper triangular matrix
  - d) Square matrix
- 4) Simpson's rule assumes that boundary between the ordinates are parabolic arcs.
  - a) True
  - b) False
- 5) Find the mode and median of the 9 consecutive number: 12, 7, 8, 14, 21, 23, 27, 7, 11
  - a) 12, 9
  - b) 7, 9
  - c) 7, 12
  - d) 11, 9
- 6) Which of the following is correct application for Eigenvectors?
  - a) Computer vision
  - b) Physics
  - c) Machine learning
  - d) All of the above
- 7) The correlation coefficient is \_\_\_\_\_.
  - a) The square of the coefficient of determination
  - b) Can never be negative
  - c) The square root of the coefficient of determination
  - d) The same as r square

- 8) Normal Distribution is applied for \_\_\_\_\_.  
a) Continuous Random Distribution  
b) Discrete Random Variable  
c) Irregular Random Variable  
d) Uncertain Random Variable
- 9) What does the central limit theorem state?  
a) if the sample size increases sampling distribution must approach normal distribution  
b) if the sample size decreases then the sample distribution must approach normal distribution  
c) if the sample size increases then the sampling distribution much approach an exponential distribution  
d) if the sample size decreases then the sampling distribution much approach an exponential distribution
- 10) The probability of rejecting a true hypothesis is called \_\_\_\_\_.  
a) Critical region  
b) Level of significance  
c) Test statistics  
d) Statement of hypothesis
- 11) A statistic on the basis of which a decision is made about the hypothesis of interest is called \_\_\_\_\_.  
a) Test statistics  
b) Significance level  
c) Statement of hypothesis  
d) Critical region
- 12) The parameter E which we use for least square method is called as \_\_\_\_\_.  
a) Sum of residues  
b) Residues  
c) Error  
d) Sum of errors
- 13) \_\_\_\_\_ processes all the training examples for each iteration of gradient descent.  
a) Stochastic Gradient Descent  
b) Batch Gradient Descent  
c) Mini Batch gradient descent  
d) None of the above
- 14) What is the full form of KKT?  
a) Kret Kuhn Tacker  
b) Karush Kuhn Tucker  
c) Karush Kuhn Tacker  
d) None of these

**S. Y. (B.Tech.) (Sem - II) (New) (CBCS) Examination: Oct/Nov-2022**  
**INFORMATION TECHNOLOGY ENGINEERING**  
**Mathematics for Data Science**

Day &amp; Date: Tuesday, 14-03-2023

Max. Marks: 56

Time: 02:00 PM To 05:00 PM

- Instructions:** 1) All questions are compulsory.  
 2) Assume suitable data if necessary.  
 3) Figures to the right indicate full marks.

**Section – I**

- Q.2 Answer the following questions. (Any Three) 12**
- What is Data Science?
  - Consider the ages of five employees as 30, 30, 32, 38, 60 years. Calculate the measures of central tendency.
  - Explain the term hyper planes and half-planes.
  - What is central tendencies?
- Q.3 Answer the following questions. (Any Two) 16**
- Explain Data Science Life Cycle.
  - Explain in detail Distance measures types in data science.
  - What are Eigen values & Eigenvectors?

**Section – II**

- Q.4 Answer the following questions. (Any Three) 12**
- The mean age of people in a colony is 34 years. Suppose the standard deviation is 15 years. The sample of size is 50. Find the mean and standard deviation of the sample.
  - What Is Hypothesis Testing in Statistics?
  - What is KKT condition? Explain in short.
  - What is the Least Squares Method?
- Q.5 Answer the following questions. (Any Two) 16**
- A fair die is rolled, Let A be the event that shows an outcome is an odd number, so  $A = \{1, 3, 5\}$ . Also, suppose B the event that shows the outcome is less than or equal to 3, so  $B = \{1, 2, 3\}$ . Then what is the probability of A,  $P(A)$ , and what is the probability A given B,  $P(A | B)$ ?
  - Explain in detail Statistical Hypothesis Testing. What is P-value?
  - What is gradient descent? How does gradient descent work? Explain with its types.

 c) Test statistics  
 d) Statement of hypothesis
- 4) A statistic on the basis of which a decision is made about the hypothesis of interest is called \_\_\_\_\_.  
 a) Test statistics  
 b) Significance level  
 c) Statement of hypothesis  
 d) Critical region
- 5) The parameter E which we use for least square method is called as \_\_\_\_\_.  
 a) Sum of residues  
 b) Residues  
 c) Error  
 d) Sum of errors
- 6) \_\_\_\_\_ processes all the training examples for each iteration of gradient descent.  
 a) Stochastic Gradient Descent  
 b) Batch Gradient Descent  
 c) Mini Batch gradient descent  
 d) None of the above

- 7) What is the full form of KKT?  
a) Kret Kuhn Tacker                      b) Karush Kuhn Tucker  
c) Karush Kuhn Tacker                  d) None of these
- 8) Among the following, choose the correct application of data science in Healthcare.  
a) Data science for genomics  
b) Data science for medical imaging  
c) Drug discovery with Data science  
d) All of the above
- 9) What is the first step in linear algebra?  
a) Let's complicate the problem      b) Solve the problem  
c) Visualize the problem                d) None of the above
- 10) The concept of Eigen values and vectors is applicable to \_\_\_\_\_.  
a) Scalar matrix                          b) Identity matrix  
c) Upper triangular matrix              d) Square matrix
- 11) Simpson's rule assumes that boundary between the ordinates are parabolic arcs.  
a) True                                        b) False
- 12) Find the mode and median of the 9 consecutive number:  
12, 7, 8, 14, 21, 23, 27, 7, 11  
a) 12, 9                                      b) 7, 9  
c) 7, 12                                        d) 11, 9
- 13) Which of the following is correct application for Eigenvectors?  
a) Computer vision                        b) Physics  
c) Machine learning                        d) All of the above
- 14) The correlation coefficient is \_\_\_\_\_.  
a) The square of the coefficient of determination  
b) Can never be negative  
c) The square root of the coefficient of determination  
d) The same as r square

**S. Y. (B.Tech.) (Sem - II) (New) (CBCS) Examination: Oct/Nov-2022**  
**INFORMATION TECHNOLOGY ENGINEERING**  
**Mathematics for Data Science**

Day &amp; Date: Tuesday, 14-03-2023

Max. Marks: 56

Time: 02:00 PM To 05:00 PM

- Instructions:** 1) All questions are compulsory.  
 2) Assume suitable data if necessary.  
 3) Figures to the right indicate full marks.

**Section – I**

- Q.2 Answer the following questions. (Any Three) 12**
- What is Data Science?
  - Consider the ages of five employees as 30, 30, 32, 38, 60 years. Calculate the measures of central tendency.
  - Explain the term hyper planes and half-planes.
  - What is central tendencies?
- Q.3 Answer the following questions. (Any Two) 16**
- Explain Data Science Life Cycle.
  - Explain in detail Distance measures types in data science.
  - What are Eigen values & Eigenvectors?

**Section – II**

- Q.4 Answer the following questions. (Any Three) 12**
- The mean age of people in a colony is 34 years. Suppose the standard deviation is 15 years. The sample of size is 50. Find the mean and standard deviation of the sample.
  - What Is Hypothesis Testing in Statistics?
  - What is KKT condition? Explain in short.
  - What is the Least Squares Method?
- Q.5 Answer the following questions. (Any Two) 16**
- A fair die is rolled, Let A be the event that shows an outcome is an odd number, so  $A = \{1, 3, 5\}$ . Also, suppose B the event that shows the outcome is less than or equal to 3, so  $B = \{1, 2, 3\}$ . Then what is the probability of A,  $P(A)$ , and what is the probability A given B,  $P(A | B)$ ?
  - Explain in detail Statistical Hypothesis Testing. What is P-value?
  - What is gradient descent? How does gradient descent work? Explain with its types.

Max. Marks: 70

- Instructions:** 1) Q. No. 1 is compulsory. It should be solved in the first 30 minutes in Answer book. Page no. 03 (Starting page of the Answer Book). Each Question carries one mark.  
2) Don't forget to Mention question paper set (P/Q/R/S) on top of page.  
3) Figures to the right indicate full marks.

### MCQ/Objective Type Questions

Duration: 30 Minutes

Marks: 14

**Q.1 Choose the correct alternatives from the options.**

14

- 1) A statistic on the basis of which a decision is made about the hypothesis of interest is called \_\_\_\_\_.  
a) Test statistics                      b) Significance level  
c) Statement of hypothesis          d) Critical region
- 2) The parameter E which we use for least square method is called as \_\_\_\_\_.  
a) Sum of residues                      b) Residues  
c) Error                                    d) Sum of errors
- 3) \_\_\_\_\_ processes all the training examples for each iteration of gradient descent.  
a) Stochastic Gradient Descent      b) Batch Gradient Descent  
c) Mini Batch gradient descent       d) None of the above
- 4) What is the full form of KKT?  
a) Kret Kuhn Tacker                      b) Karush Kuhn Tucker  
c) Karush Kuhn Tacker                  d) None of these
- 5) Among the following, choose the correct application of data science in Healthcare.  
a) Data science for genomics  
b) Data science for medical imaging  
c) Drug discovery with Data science  
d) All of the above
- 6) What is the first step in linear algebra?  
a) Let's complicate the problem      b) Solve the problem  
c) Visualize the problem                d) None of the above
- 7) The concept of Eigen values and vectors is applicable to \_\_\_\_\_.  
a) Scalar matrix                          b) Identity matrix  
c) Upper triangular matrix              d) Square matrix
- 8) Simpson's rule assumes that boundary between the ordinates are parabolic arcs.  
a) True                                        b) False

- 9) Find the mode and median of the 9 consecutive number:  
12, 7, 8, 14, 21, 23, 27, 7, 11
- |          |          |

| a) 12, 9 | b) 7, 9  |
| c) 7, 12 | d) 11, 9 |
- 10) Which of the following is correct application for Eigenvectors?
- |                     |                     |
|---------------------|---------------------|
| a) Computer vision  | b) Physics          |
| c) Machine learning | d) All of the above |
- 11) The correlation coefficient is \_\_\_\_\_
- a) The square of the coefficient of determination
  - b) Can never be negative
  - c) The square root of the coefficient of determination
  - d) The same as r square
- 12) Normal Distribution is applied for \_\_\_\_\_.
- a) Continuous Random Distribution
  - b) Discrete Random Variable
  - c) Irregular Random Variable
  - d) Uncertain Random Variable
- 13) What does the central limit theorem state?
- a) if the sample size increases sampling distribution must approach normal distribution
  - b) if the sample size decreases then the sample distribution must approach normal distribution
  - c) if the sample size increases then the sampling distribution much approach an exponential distribution
  - d) if the sample size decreases then the sampling distribution much approach an exponential distribution
- 14) The probability of rejecting a true hypothesis is called \_\_\_\_\_.
- |                    |                            |

**MCQ/Objective Type Questions**

Duration: 30 Minutes

Marks: 14

**Q.1 Choose the correct alternatives from the options.**

**14**

- 1) The \_\_\_\_\_ is the message after transformation.
  - a) Plaintext
  - b) Secret-text
  - c) Ciphertext
  - d) None of the above
- 2) The keys used in cryptography are \_\_\_\_\_.
  - a) Private Key
  - b) Public Key
  - c) Secret Key
  - d) All of the above
- 3) In symmetric-key cryptography, the key locks and unlocks the box is \_\_\_\_\_.
  - a) Shared
  - b) Same
  - c) Private
  - d) Public
- 4) In asymmetric key cryptography, the private key is kept by \_\_\_\_\_.
  - a) sender
  - b) receiver
  - c) sender and receiver
  - d) all the connected devices to the network
- 5) Caesar Cipher is an example of \_\_\_\_\_.
  - a) Poly-alphabetic Cipher
  - b) Mono-alphabetic Cipher
  - c) Multi-alphabetic Cipher
  - d) Bi-alphabetic Cipher
- 6) The DES algorithm has a key length of \_\_\_\_\_.
  - a) 128 Bits
  - b) 32 Bits
  - c) 64 Bits
  - d) 16 Bits
- 7) AES stands for Advanced Encryption Standard.
  - a) True
  - b) False
- 8) RSA algorithm is \_\_\_\_\_ cryptography algorithm.
  - a) Systematic
  - b) Symmetric
  - c) Asymmetric
  - d) None of the mentioned above
- 9) Which of the following modes of operation in DES is used for operating?
  - a) Cipher Feedback Mode (CFB)
  - b) Cipher Block chaining (CBC)
  - c) Electronic code book (ECB)
  - d) Output Feedback Modes (OFB)

- 10) Which of the following is /are offered by the Hash functions?
  - a) Authentication
  - b) Non repudiation
  - c) Data Integrity
  - d) All of the above
- 11) A cryptographic hash function is an equation used to verify the \_\_\_\_\_ of data.
  - a) Variety
  - b) Validity
  - c) Veracity
  - d) None of the mentioned above
- 12) MAC is a \_\_\_\_\_.
  - a) one-to-one mapping
  - b) many-to-one mapping
  - c) onto mapping
  - d) None of the mentioned
- 13) What are the common security threats?
  - a) File Shredding
  - b) File sharing and permission
  - c) File corrupting
  - d) File integrity
- 14) A cryptosystem is also termed as \_\_\_\_\_.
  - a) secure system
  - b) cipher system
  - c) cipher-text
  - d) secure algorithm

 3) Figures to the right indicate full marks.

**Section – I**

- Q.2 Answer the following questions. (Any Four) 16**
- Explain the model of network security with diagram.
  - Explain in detail security attacks.
  - Explain Caesar cipher with example.
  - What is difference between monoalphabetic cipher and polyalphabetic cipher?
  - Explain block cipher and stream cipher with diagram.
- Q.3 Answer the following questions. (Any Two) 12**
- Explain the working of DES with diagram.
  - Explain Security services in details.
  - Explain in detail symmetric cipher model with diagram.

**Section – II**

- Q.4 Answer the following questions. (Any Four) 16**
- Write application of public key cryptosystem.
  - Explain encryption with public key with diagram.
  - Write hash functions based on using a cipher block chaining technique.
  - Explain Kerberos in details.
  - Write a note on Simplified Depiction of Essential Elements of Digital Signature Process.
- Q.5 Answer the following questions. (Any Two) 12**
- What is MAC? Explain three basic uses of Message authentication code.
  - Explain PIV System Model with diagram.
  - Explain Man-in-the-Middle Attack.

**MCQ/Objective Type Questions**

Duration: 30 Minutes

Marks: 14

**Q.1 Choose the correct alternatives from the options.**

**14**

- 1) A cryptographic hash function is an equation used to verify the \_\_\_\_\_ of data.
  - a) Variety
  - b) Validity
  - c) Veracity
  - d) None of the mentioned above
- 2) MAC is a \_\_\_\_\_.
  - a) one-to-one mapping
  - b) many-to-one mapping
  - c) onto mapping
  - d) None of the mentioned
- 3) What are the common security threats?
  - a) File Shredding
  - b) File sharing and permission
  - c) File corrupting
  - d) File integrity
- 4) A cryptosystem is also termed as \_\_\_\_\_.
  - a) secure system
  - b) cipher system
  - c) cipher-text
  - d) secure algorithm
- 5) The \_\_\_\_\_ is the message after transformation.
  - a) Plaintext
  - b) Secret-text
  - c) Ciphertext
  - d) None of the above
- 6) The keys used in cryptography are \_\_\_\_\_.
  - a) Private Key
  - b) Public Key
  - c) Secret Key
  - d) All of the above
- 7) In symmetric-key cryptography, the key locks and unlocks the box is \_\_\_\_\_.
  - a) Shared
  - b) Same
  - c) Private
  - d) Public
- 8) In asymmetric key cryptography, the private key is kept by \_\_\_\_\_.
  - a) sender
  - b) receiver
  - c) sender and receiver
  - d) all the connected devices to the network
- 9) Caesar Cipher is an example of \_\_\_\_\_.
  - a) Poly-alphabetic Cipher
  - b) Mono-alphabetic Cipher
  - c) Multi-alphabetic Cipher
  - d) Bi-alphabetic Cipher

- 10) The DES algorithm has a key length of \_\_\_\_\_.
  - a) 128 Bits
  - b) 32 Bits
  - c) 64 Bits
  - d) 16 Bits
- 11) AES stands for Advanced Encryption Standard.
  - a) True
  - b) False
- 12) RSA algorithm is \_\_\_\_\_ cryptography algorithm.
  - a) Systematic
  - b) Symmetric
  - c) Asymmetric
  - d) None of the mentioned above
- 13) Which of the following modes of operation in DES is used for operating?
  - a) Cipher Feedback Mode (CFB)
  - b) Cipher Block chaining (CBC)
  - c) Electronic code book (ECB)
  - d) Output Feedback Modes (OFB)
- 14) Which of the following is /are offered by the Hash functions?
  - a) Authentication
  - b) Non repudiation
  - c) Data Integrity
  - d) All of the above

**S. Y. (B.Tech.) (Sem - II) (New) (CBCS) Examination: Oct/Nov-2022**  
**INFORMATION TECHNOLOGY ENGINEERING**  
**Cryptography**

Day &amp; Date: Tuesday, 14-03-2023

Max. Marks: 56

Time: 02:00 PM To 05:00 PM

- Instructions:** 1) All questions are compulsory.  
 2) Assume suitable data if necessary.  
 3) Figures to the right indicate full marks.

**Section – I**

- Q.2 Answer the following questions. (Any Four) 16**
- Explain the model of network security with diagram.
  - Explain in detail security attacks.
  - Explain Caesar cipher with example.
  - What is difference between monoalphabetic cipher and polyalphabetic cipher?
  - Explain block cipher and stream cipher with diagram.
- Q.3 Answer the following questions. (Any Two) 12**
- Explain the working of DES with diagram.
  - Explain Security services in details.
  - Explain in detail symmetric cipher model with diagram.

**Section – II**

- Q.4 Answer the following questions. (Any Four) 16**
- Write application of public key cryptosystem.
  - Explain encryption with public key with diagram.
  - Write hash functions based on using a cipher block chaining technique.
  - Explain Kerberos in details.
  - Write a note on Simplified Depiction of Essential Elements of Digital Signature Process.
- Q.5 Answer the following questions. (Any Two) 12**
- What is MAC? Explain three basic uses of Message authentication code.
  - Explain PIV System Model with diagram.
  - Explain Man-in-the-Middle Attack.

**MCQ/Objective Type Questions**

Duration: 30 Minutes

Marks: 14

**Q.1 Choose the correct alternatives from the options.**

**14**

- 1) The use of Romberg's method is \_\_\_\_\_.  
 a) To solve simultaneous linear equations  
 b) To find root of the equation  
 c) To evaluate definite integration  
 d) To find eigen values
- 2) As soon as a new value of a variable is found by iteration, it is used immediately in the next step, this method is called as \_\_\_\_\_.  
 a) Gauss-Jacobi's method                      b) Gauss-Seidal method  
 c) Gauss-Jordan method                      d) Gauss Elimination method
- 3) When Gauss Elimination method is used to solve set of equation  $AX = B$ , matrix  $A$  is transformed to \_\_\_\_\_.  
 a) Upper triangular matrix                      b) Diagonal matrix  
 c) Lower triangular matrix                      d) Identity matrix
- 4) The number of strips required in Weddel's rule is \_\_\_\_\_.  
 a) A Multiple of 6                                      b) A multiple of 10  
 c) A Multiple of 3                                      d) A multiple of 2
- 5) The order of convergence of Regulafalsi method for finding roots of equation  $(x) = 0$  is \_\_\_\_\_.  
 a) Second order                                      b) Cubic order  
 c) First order                                              d) Very slow
- 6) A root of the equation  $x - \cos x = 0$  lies between \_\_\_\_\_.  
 a) 1 and 2                                              b) 2 and 3  
 c) 0 and 1                                              d) -1 and 0
- 7) The Newton - Raphson method fails when \_\_\_\_\_.  
 a)  $f'(x)$  is negative                                      b)  $f'(x)$  is positive  
 c) Never fails                                              c)  $f'(x)$  is zero
- 8) The Multiplication of closed interval  $[-3,4]. [-3,5] =$  \_\_\_\_\_.  
 a)  $-15,20$                                               b)  $1\ 15, 1\ 20$   
 c)  $[20, -15]$                                               d)  $9,15$

- a) 3                  b) 3.5  
c) 4                  d) 4.5

- a)  $(0,1)$   
c)  $[0,1]$
- b)  $[0,1]$   
d)  $[0,1)$

- Which of the following is true for fuzzy sets?
- a)  $\overline{A \cup B} = \bar{A} \cup \bar{B}$
- b)  $\overline{A \cap B} = \bar{A} \cup \bar{B}$
- c)  $\bar{\bar{A}} \subseteq A$
- d)  $A \subseteq \bar{A}$

- |          |   |      |   |      |   |
|----------|---|------|---|------|---|
| $t$ :    | 0 | 0.5  | 1 | 1.5  | 2 |
| $f(t)$ : | 0 | 0.25 | 1 | 2.25 | 4 |

a) 2.66668                      b) 2.66667  
c) 2.66669                      d) None

- 14)** The dominant eigen value of the matrix  $A = \begin{bmatrix} 1 & 2 \\ 3 & 4 \end{bmatrix}$  is
- a) 0.3722                      b) -5.3723  
c) 5.3723                      d) 10.7445

**S.Y. (B.Tech.) (Sem - II) (Old) (CBCS) Examination: Oct/Nov-2022**  
**INFORMATION TECHNOLOGY ENGINEERING**  
**Applied Mathematics-II**

Day & Date: Tuesday, 14-03-2023  
 Time: 02:00 PM To 05:00 PM

Max. Marks: 56

**Instructions:** 1) All question are compulsory.  
 2) Figures to the right indicate full marks.

**Section – I**

**Q.2 Attempt any three.**

**09**

- Solve the system of equations by using Gauss-Jacobi method  
 $x - y + z = 1, -3x + 2y - 3z = -6, 2x - 5y + 4z = 5$
- Solve the system of equations by using Gauss-Jacobi method.  
 $8x - 3y + 2z = 20, 4x + 11y - z = 33, 6x + 3y + 12z = 35$
- Find a real root of the equation  $e^x = x^3 + \cos 25$  take  $x_0 = 4.5$  by Using Newton-Raphson method correct to 3 decimal places.
- Find positive root of the equation  $x \log_{10} x = 1.2$  by Using false-position method correct to 3 decimal places.
- Using power method find eigen values & corresponding eigen vectors  
 $A = \begin{bmatrix} 5 & 0 & 1 \\ 0 & -2 & 0 \\ 1 & 0 & 5 \end{bmatrix}$  take  $x_0 = [1, 0, 0]^T$  upto 5 iterations.

**Q.3 Attempt any three.**

**09**

- Solve the system of equation by using Gauss-Seidal method  
 $83x + 11y - 4z = 95, 7x + 52y + 13z = 104, 3x + 8y + 29z = 71$   
 (three iterations)
- Find the double root of the equation  $x^3 - x^2 - x + 1 = 0$  choosing  $x_0 = 0.8$  by using generalized Newton-Raphson method.
- Evaluate  $\int_0^{1/2} \int_0^{1/2} \frac{\sin xy}{1+xy} dx dy$  by using Simpson's rule  $h = k = 1/4$
- By using trapezoidal rule, evaluate  $\int_4^{5.2} \log_e x dx, n = 6$
- By using Weddell's rule find  $\int_0^{0.6} e^{-x^2} dx dy$  by taking  $n = 6$

**Q.4 Attempt any two**

- a) Apply factorization method to solve the equations.  
 $3x + 2y + 7z = 4$ ,  $2x + 3y + z = 5$ ,  $3x + 4y + z = 7$
- b) Perform two iterations of Newton-Raphson method of find a solution of the system.  $x^2 + xy = 6$ ,  $x^2 - y^2 = 3$  Take  $x_0 = y_0 = 1$
- c) Evaluate by using Romberg's method.  $I = \int_0^1 \frac{dx}{1+x^2}$  take  $h = 0.5, 0.25, 0.125$  respectively.

**Section – II****Q.5 Attempt any three**

09

- a) Let  $A, B$  be the fuzzy sets define on universal set  $X = \{-5, -4, -3, -2, -1, 0, 1, 2, 3\}$  as  
 $A = \frac{1}{-5} + \frac{0.75}{-4} + \frac{0.20}{-3} + \frac{0.8}{-2} + \frac{0.32}{-1} + \frac{0.28}{0} + \frac{0.9}{1} + \frac{0.65}{2} + \frac{1}{3}$   
 $B = \frac{0}{-5} + \frac{0.80}{-4} + \frac{0.20}{-3} + \frac{0.70}{-2} + \frac{0.20}{-1} + \frac{0.15}{0} + \frac{1}{1} + \frac{0.60}{2} + \frac{1}{3}$  find  $S(A, B)$ ,  $S(B, A)$
- b) Find Strong  $\alpha$ -cuts of the fuzzy set  $A$  defined by membership function.  

$$A(x) = \begin{cases} \frac{x-10}{20} & 10 \leq x \leq 30 \\ \frac{40-x}{10} & 30 < x \leq 40 \\ 0 & \text{otherwise} \end{cases} \quad \text{for } \alpha = 0, 0.3, 0.9$$
- c) Solve  $Max z = 3x_1 + 4x_2$  subject to constraints  
 $x_1 - x_2 \leq 1$   $-x_1 + x_2 \leq 2$   $x_1, x_2 \geq 0$
- d) Verify which of the following fuzzy sets are fuzzy number  
 i)  $A = \frac{1}{1} + \frac{0.5}{2} + \frac{0.6}{3} + \frac{0.7}{4} + \frac{0.8}{5}$   
 ii)  $B(x) = \log x, x \in [1, 2.72]$   
 iii) Customer relationship management
- e) Find  $f(A)$ , is  $A$  be a fuzzy set defined on universal set  
 $X = \{-3, -2, -1, 0, 1, 2, 3\}$  by the membership function  $A(x) = \frac{x+3}{10} \forall x \in X$  &  
 $f$  be a function defined on  $X$  as  $f(x) = 2x^2 + 10$

**Q.6 Attempt any three**

09

- a) Let  $A$  be a fuzzy set defined on universal set  $x = \{0, 1, 2, 3, 4, 5\}$  by the membership function  $A(x) = e^{-x} \forall x \in X$ . Then fuzzy cardinality of  $A$
- b) Let  $A, B$  be any two fuzzy sets defined on universal set  $X$  an  $\alpha, \beta \in [0, 1]$  then prove that  
 i)  ${}^\alpha(A \cap B) = {}^\alpha A \cap {}^\alpha B$   
 ii) If  $\alpha \leq \beta$  then  ${}^\beta A \subseteq {}^\alpha B$
- c) A building firm possesses four cranes each of which has a distance (km) from four different constructions sites as shown in table

|       | I   | II  | III | IV  |
|-------|-----|-----|-----|-----|
| $C_1$ | 90  | 75  | 75  | 80  |
| $C_2$ | 35  | 85  | 55  | 65  |
| $C_3$ | 125 | 95  | 90  | 105 |
| $C_4$ | 45  | 110 | 95  | 115 |

Place the cranes (one for each construction site) in such a way that the overall distance required for the transfer is as small as possible.

- d) Solve the fuzzy equation  $A + X = B$  where  $A, B$  are fuzzy numbers defined by membership functions.

$$A(x) = \begin{cases} \frac{x-9}{2} & 9 \leq x \leq 11 \\ \frac{14-x}{3} & 11 < x \leq 14 \\ 0 & \text{otherwise} \end{cases}$$

$$B(x) = \begin{cases} \frac{x-5}{9-x} & 5 \leq x \leq 6 \\ \frac{3}{3} & 6 < x \leq 9 \\ 0 & \text{otherwise} \end{cases}$$

- e) Let  $A$  be a fuzzy set defined on universal set  $[-1,1]$  by the membership function

$$A(x) = \begin{cases} x+1 & -1 \leq x \leq 0 \\ 1-x & 0 < x \leq 1 \end{cases}$$

- Find i) Boundary of  $A$   
ii) Core of  $A$

### Q.7 Attempt any two

10

- a) Max  $z = 4x_1 + 3x_2 + 6x_3$  subject to

$$2x_1 + 3x_2 + 2x_3 \leq 440$$

$$4x_1 + 3x_2 \leq 470$$

$$2x_1 + 5x_2 \leq 430 \quad x_1, x_2, x_3 \geq 0$$

- b) Let  $A, B$  the fuzzy number defined by the membership functions

$$A(x) = \begin{cases} \frac{x-1}{4} & 1 \leq x \leq 15 \\ 6-x & 5 \leq x \leq 6 \\ 0 & \text{otherwise} \end{cases}$$

$$B(x) = \begin{cases} \frac{x-6}{4} & 6 \leq x \leq 10 \\ 11-x & 10 < x \leq 11 \\ 0 & \text{otherwise} \end{cases}$$

Find  $\text{Max}(A, B)$

- c) Let  $A, B$  be the fuzzy numbers defined by membership functions.

$$A(x) = \begin{cases} \frac{x+5}{2} & -5 \leq x \leq -3 \\ -x/3 & -3 < x \leq 0 \\ 0 & \text{otherwise} \end{cases}$$

Find a fuzzy number  $A, B$

**09**

- Solve the system of equation by using Gauss-Seidal method  
 $83x + 11y - 4z = 95, 7x + 52y + 13z = 104, 3x + 8y + 29z = 71$   
 (three iterations)
- Find the double root of the equation  $x^3 - x^2 - x + 1 = 0$  choosing  $x_0 = 0.8$  by using generalized Newton-Raphson method.
- Evaluate  $\int_0^{1/2} \int_0^{1/2} \frac{\sin xy}{1+xy} dx dy$  by using Simpson's rule  $h = k = 1/4$
- By using trapezoidal rule, evaluate  $\int_4^{5.2} \log_e x dx, n = 6$
- By using Weddell's rule find  $\int_0^{0.6} e^{-x^2} dx dy$  by taking  $n = 6$

**Q.4 Attempt any two**

- a) Apply factorization method to solve the equations.  
 $3x + 2y + 7z = 4$ ,  $2x + 3y + z = 5$ ,  $3x + 4y + z = 7$
- b) Perform two iterations of Newton-Raphson method of find a solution of the system.  $x^2 + xy = 6$ ,  $x^2 - y^2 = 3$  Take  $x_0 = y_0 = 1$
- c) Evaluate by using Rombeg's method.  $I = \int_0^1 \frac{dx}{1+x^2}$  take  $h = 0.5, 0.25, 0.125$  respectively.

**Section – II****Q.5 Attempt any three**

09

- a) Let  $A, B$  be the fuzzy sets define on universal set  $X = \{-5, -4, -3, -2, -1, 0, 1, 2, 3\}$  as  
 $A = \frac{1}{-5} + \frac{0.75}{-4} + \frac{0.20}{-3} + \frac{0.8}{-2} + \frac{0.32}{-1} + \frac{0.28}{0} + \frac{0.9}{1} + \frac{0.65}{2} + \frac{1}{3}$   
 $B = \frac{0}{-5} + \frac{0.80}{-4} + \frac{0.20}{-3} + \frac{0.70}{-2} + \frac{0.20}{-1} + \frac{0.15}{0} + \frac{1}{1} + \frac{0.60}{2} + \frac{1}{3}$  find  $S(A, B)$ ,  $S(B, A)$
- b) Find Strong  $\alpha$ -cuts of the fuzzy set  $A$  defined by membership function.  

$$A(x) = \begin{cases} \frac{x-10}{20} & 10 \leq x \leq 30 \\ \frac{40-x}{10} & 30 < x \leq 40 \\ 0 & \text{otherwise} \end{cases} \quad \text{for } \alpha = 0, 0.3, 0.9$$
- c) Solve  $Max z = 3x_1 + 4x_2$  subject to constraints  
 $x_1 - x_2 \leq 1$   $-x_1 + x_2 \leq 2$   $x_1, x_2 \geq 0$
- d) Verify which of the following fuzzy sets are fuzzy number  
 i)  $A = 1/1 + \frac{0.5}{2} + \frac{0.6}{3} + \frac{0.7}{4} + \frac{0.8}{5}$   
 ii)  $B(x) = \log x, x \in [1, 2.72]$   
 iii) Customer relationship management
- e) Find  $f(A)$ , is  $A$  be a fuzzy set defined on universal set  
 $X = \{-3, -2, -1, 0, 1, 2, 3\}$  by the membership function  $A(x) = \frac{x+3}{10} \forall x \in X$  &  
 $f$  be a function defined on  $X$  as  $f(x) = 2x^2 + 10$

**Q.6 Attempt any three**

09

- a) Let  $A$  be a fuzzy set defined on universal set  $x = \{0, 1, 2, 3, 4, 5\}$  by the membership function  $A(x) = e^{-x} \forall x \in X$ . Then fuzzy cardinality of  $A$
- b) Let  $A, B$  be any two fuzzy sets defined on universal set  $X$  an  $\alpha, \beta \in [0, 1]$  then prove that  
 i)  ${}^\alpha(A \cap B) = {}^\alpha A \cap {}^\alpha B$   
 ii) If  $\alpha \leq \beta$  then  ${}^\beta A \subseteq {}^\alpha A$
- c) A building firm possesses four cranes each of which has a distance (km) from four different constructions sites as shown in table

|       | I   | II  | III | IV  |
|-------|-----|-----|-----|-----|
| $C_1$ | 90  | 75  | 75  | 80  |
| $C_2$ | 35  | 85  | 55  | 65  |
| $C_3$ | 125 | 95  | 90  | 105 |
| $C_4$ | 45  | 110 | 95  | 115 |

Place the cranes (one for each construction site) in such a way that the overall distance required for the transfer is as small as possible.

- d) Solve the fuzzy equation  $A + X = B$  where  $A, B$  are fuzzy numbers defined by membership functions.

$$A(x) = \begin{cases} \frac{x-9}{2} & 9 \leq x \leq 11 \\ \frac{14-x}{3} & 11 < x \leq 14 \\ 0 & \text{otherwise} \end{cases}$$

$$B(x) = \begin{cases} \frac{x-5}{9-x} & 5 \leq x \leq 6 \\ \frac{3}{3} & 6 < x \leq 9 \\ 0 & \text{otherwise} \end{cases}$$

- e) Let  $A$  be a fuzzy set defined on universal set  $[-1,1]$  by the membership function

$$A(x) = \begin{cases} x+1 & -1 \leq x \leq 0 \\ 1-x & 0 < x \leq 1 \end{cases}$$

- Find i) Boundary of  $A$   
ii) Core of  $A$

### Q.7 Attempt any two

10

- a) Max  $z = 4x_1 + 3x_2 + 6x_3$  subject to

$$2x_1 + 3x_2 + 2x_3 \leq 440$$

$$4x_1 + 3x_2 \leq 470$$

$$2x_1 + 5x_2 \leq 430 \quad x_1, x_2, x_3 \geq 0$$

- b) Let  $A, B$  the fuzzy number defined by the membership functions

$$A(x) = \begin{cases} \frac{x-1}{4} & 1 \leq x \leq 15 \\ 6-x & 5 \leq x \leq 6 \\ 0 & \text{otherwise} \end{cases}$$

$$B(x) = \begin{cases} \frac{x-6}{4} & 6 \leq x \leq 10 \\ 11-x & 10 < x \leq 11 \\ 0 & \text{otherwise} \end{cases}$$

Find  $\text{Max}(A, B)$

- c) Let  $A, B$  be the fuzzy numbers defined by membership functions.

$$A(x) = \begin{cases} \frac{x+5}{2} & -5 \leq x \leq -3 \\ -x/3 & -3 < x \leq 0 \\ 0 & \text{otherwise} \end{cases}$$

Find a fuzzy number  $A, B$

Day & Date: Tuesday, 14-03-2023  
Time: 02:00 PM To 05:00 PM

**Instructions:** 1) Q. No. 1 is compulsory. It should be solved in the first 30 minutes in answer book. Page no 03 (Starting page of the Answer Book). Each question carries one mark.

3) Figures to the right indicates full marks.

Marks: 14

14

- 1) If A is a fuzzy number then boundary of A is \_\_\_\_\_.  
a) Unbounded                                      b) Bounded  
c) Finite                                              d) None of these
- 2) Which of the following is true for fuzzy sets?  
a)  $\overline{A \cup B} = \bar{A} \cup \bar{B}$                                       b)  $\overline{A \cap B} = \bar{A} \cup \bar{B}$   
c)  $\bar{\bar{A}} \subseteq A$                                                           d)  $A \subseteq \bar{\bar{A}}$

- 3) For the data**

|          |   |      |   |      |   |
|----------|---|------|---|------|---|
| $t$ :    | 0 | 0.5  | 1 | 1.5  | 2 |
| $f(t)$ : | 0 | 0.25 | 1 | 2.25 | 4 |

The value of  $\int_0^2 f(t)$  by Simpson's 1/3<sup>rd</sup> rule is \_\_\_\_\_.

 Time: 02:00 PM To 05:00 PM

Max. Marks: 56

**Instructions:** 1) All question are compulsory.  
 2) Figures to the right indicate full marks.

**Section – I**

**Q.2 Attempt any three.**

**09**

- Solve the system of equations by using Gauss-Jacobi method  
 $x - y + z = 1, -3x + 2y - 3z = -6, 2x - 5y + 4z = 5$
- Solve the system of equations by using Gauss-Jacobi method.  
 $8x - 3y + 2z = 20, 4x + 11y - z = 33, 6x + 3y + 12z = 35$
- Find a real root of the equation  $e^x = x^3 + \cos 25$  take  $x_0 = 4.5$  by Using Newton-Raphson method correct to 3 decimal places.
- Find positive root of the equation  $x \log_{10} x = 1.2$  by Using false-position method correct to 3 decimal places.
- Using power method find eigen values & corresponding eigen vectors  
 $A = \begin{bmatrix} 5 & 0 & 1 \\ 0 & -2 & 0 \\ 1 & 0 & 5 \end{bmatrix}$  take  $x_0 = [1, 0, 0]^T$  upto 5 iterations.

**Q.3 Attempt any three.**

**09**

- Solve the system of equation by using Gauss-Seidal method  
 $83x + 11y - 4z = 95, 7x + 52y + 13z = 104, 3x + 8y + 29z = 71$   
 (three iterations)
- Find the double root of the equation  $x^3 - x^2 - x + 1 = 0$  choosing  $x_0 = 0.8$  by using generalized Newton-Raphson method.
- Evaluate  $\int_0^{1/2} \int_0^{1/2} \frac{\sin xy}{1+xy} dx dy$  by using Simpson's rule  $h = k = 1/4$
- By using trapezoidal rule, evaluate  $\int_4^{5.2} \log_e x dx, n = 6$
- By using Weddell's rule find  $\int_0^{0.6} e^{-x^2} dx dy$  by taking  $n = 6$

**Q.4 Attempt any two**

- a) Apply factorization method to solve the equations.  
 $3x + 2y + 7z = 4$ ,  $2x + 3y + z = 5$ ,  $3x + 4y + z = 7$
- b) Perform two iterations of Newton-Raphson method of find a solution of the system.  $x^2 + xy = 6$ ,  $x^2 - y^2 = 3$  Take  $x_0 = y_0 = 1$
- c) Evaluate by using Romberg's method.  $I = \int_0^1 \frac{dx}{1+x^2}$  take  $h = 0.5, 0.25, 0.125$  respectively.

**Section – II****Q.5 Attempt any three**

09

- a) Let  $A, B$  be the fuzzy sets define on universal set  $X = \{-5, -4, -3, -2, -1, 0, 1, 2, 3\}$  as  
 $A = \frac{1}{-5} + \frac{0.75}{-4} + \frac{0.20}{-3} + \frac{0.8}{-2} + \frac{0.32}{-1} + \frac{0.28}{0} + \frac{0.9}{1} + \frac{0.65}{2} + \frac{1}{3}$   
 $B = \frac{0}{-5} + \frac{0.80}{-4} + \frac{0.20}{-3} + \frac{0.70}{-2} + \frac{0.20}{-1} + \frac{0.15}{0} + \frac{1}{1} + \frac{0.60}{2} + \frac{1}{3}$  find  $S(A, B)$ ,  $S(B, A)$
- b) Find Strong  $\alpha$ -cuts of the fuzzy set  $A$  defined by membership function.  

$$A(x) = \begin{cases} \frac{x-10}{20} & 10 \leq x \leq 30 \\ \frac{40-x}{10} & 30 < x \leq 40 \\ 0 & \text{otherwise} \end{cases} \quad \text{for } \alpha = 0, 0.3, 0.9$$
- c) Solve  $Max z = 3x_1 + 4x_2$  subject to constraints  
 $x_1 - x_2 \leq 1$   $-x_1 + x_2 \leq 2$   $x_1, x_2 \geq 0$
- d) Verify which of the following fuzzy sets are fuzzy number  
 i)  $A = \frac{1}{1} + \frac{0.5}{2} + \frac{0.6}{3} + \frac{0.7}{4} + \frac{0.8}{5}$   
 ii)  $B(x) = \log x, x \in [1, 2.72]$   
 iii) Customer relationship management
- e) Find  $f(A)$ , is  $A$  be a fuzzy set defined on universal set  
 $X = \{-3, -2, -1, 0, 1, 2, 3\}$  by the membership function  $A(x) = \frac{x+3}{10} \forall x \in X$  &  
 $f$  be a function defined on  $X$  as  $f(x) = 2x^2 + 10$

**Q.6 Attempt any three**

09

- a) Let  $A$  be a fuzzy set defined on universal set  $x = \{0, 1, 2, 3, 4, 5\}$  by the membership function  $A(x) = e^{-x} \forall x \in X$ . Then fuzzy cardinality of  $A$
- b) Let  $A, B$  be any two fuzzy sets defined on universal set  $X$  an  $\alpha, \beta \in [0, 1]$  then prove that  
 i)  ${}^\alpha(A \cap B) = {}^\alpha A \cap {}^\alpha B$   
 ii) If  $\alpha \leq \beta$  then  ${}^\beta A \subseteq {}^\alpha A$
- c) A building firm possesses four cranes each of which has a distance (km) from four different constructions sites as shown in table

|       | I   | II  | III | IV  |
|-------|-----|-----|-----|-----|
| $C_1$ | 90  | 75  | 75  | 80  |
| $C_2$ | 35  | 85  | 55  | 65  |
| $C_3$ | 125 | 95  | 90  | 105 |
| $C_4$ | 45  | 110 | 95  | 115 |

Place the cranes (one for each construction site) in such a way that the overall distance required for the transfer is as small as possible.

- d) Solve the fuzzy equation  $A + X = B$  where  $A, B$  are fuzzy numbers defined by membership functions.

$$A(x) = \begin{cases} \frac{x-9}{2} & 9 \leq x \leq 11 \\ \frac{14-x}{3} & 11 < x \leq 14 \\ 0 & \text{otherwise} \end{cases}$$

$$B(x) = \begin{cases} \frac{x-5}{9-x} & 5 \leq x \leq 6 \\ \frac{3}{3} & 6 < x \leq 9 \\ 0 & \text{otherwise} \end{cases}$$

- e) Let  $A$  be a fuzzy set defined on universal set  $[-1,1]$  by the membership function

$$A(x) = \begin{cases} x+1 & -1 \leq x \leq 0 \\ 1-x & 0 < x \leq 1 \end{cases}$$

- Find i) Boundary of  $A$   
ii) Core of  $A$

### Q.7 Attempt any two

10

- a) Max  $z = 4x_1 + 3x_2 + 6x_3$  subject to

$$2x_1 + 3x_2 + 2x_3 \leq 440$$

$$4x_1 + 3x_2 \leq 470$$

$$2x_1 + 5x_2 \leq 430 \quad x_1, x_2, x_3 \geq 0$$

- b) Let  $A, B$  the fuzzy number defined by the membership functions

$$A(x) = \begin{cases} \frac{x-1}{4} & 1 \leq x \leq 15 \\ 6-x & 5 \leq x \leq 6 \\ 0 & \text{otherwise} \end{cases}$$

$$B(x) = \begin{cases} \frac{x-6}{4} & 6 \leq x \leq 10 \\ 11-x & 10 < x \leq 11 \\ 0 & \text{otherwise} \end{cases}$$

Find  $Max(A, B)$

- c) Let  $A, B$  be the fuzzy numbers defined by membership functions.

$$A(x) = \begin{cases} \frac{x+5}{2} & -5 \leq x \leq -3 \\ -x/3 & -3 < x \leq 0 \\ 0 & \text{otherwise} \end{cases}$$

Find a fuzzy number  $A, B$

**Seat  
No.**

Max. Marks: 70

- Instructions:** 1) Q. No. 1 is compulsory. It should be solved in the first 30 minutes in answer book. Page no 03 (Starting page of the Answer Book). Each question carries one mark.  
2) Don't forget to Mention question paper set (P/Q/R/S) on top of page.  
3) Figures to the right indicates full marks.

### MCQ/Objective Type Questions

Duration: 30 Minutes

Marks: 14

**Q.1 Choose the correct alternatives from the options.**

14

- 1) A root of the equation  $x - \cos x = 0$  lies between \_\_\_\_\_.  
a) 1 and 2                                      b) 2 and 3  
c) 0 and 1                                        d) -1 and 0
- 2) The Newton - Raphson method fails when \_\_\_\_\_.  
a)  $f'(x)$  is negative                          b)  $f'(x)$  is positive  
c) Never fails                                    d)  $f'(x)$  is zero
- 3) The Multiplication of closed interval  $[-3,4]. [-3,5] =$  \_\_\_\_\_.  
a)  $-15,20$                                         b)  $1\ 15, 1\ 20$   
c)  $[20,-15]$                                       d)  $9,15$
- 4) The scalar cardinality of fuzzy set A defined by the membership function  
 $A(x) = 1 + \frac{x}{10}, x \in \{0, -1, -2, -3, -4\}$   
a) 3                                                      b) 3.5  
c) 4                                                      d) 4.5
- 5) Consider the fuzzy set defined by the membership function  
 $B(x) = e^{-x}, x \in [0, \infty)$  then level set of fuzzy set B is \_\_\_\_\_.  
a)  $(0,1)$                                               b)  $[0,1]$   
c)  $[0,1]$                                               d)  $[0,1)$
- 6) If A is a fuzzy number then boundary of A is \_\_\_\_\_.  
a) Unbounded                                      b) Bounded  
c) Finite                                                d) None of these
- 7) Which of the following is true for fuzzy sets?  
a)  $\overline{A \cup B} = \bar{A} \cup \bar{B}$                           b)  $\overline{A \cap B} = \bar{A} \cup \bar{B}$   
c)  $\bar{\bar{A}} \subseteq A$                                               d)  $A \subseteq \bar{\bar{A}}$

Day & Date: Tuesday, 14-03-2023  
 Time: 02:00 PM To 05:00 PM

Max. Marks: 56

**Instructions:** 1) All question are compulsory.  
 2) Figures to the right indicate full marks.

**Section – I**

**Q.2 Attempt any three.**

**09**

- Solve the system of equations by using Gauss-Jacobi method  
 $x - y + z = 1, -3x + 2y - 3z = -6, 2x - 5y + 4z = 5$
- Solve the system of equations by using Gauss-Jacobi method.  
 $8x - 3y + 2z = 20, 4x + 11y - z = 33, 6x + 3y + 12z = 35$
- Find a real root of the equation  $e^x = x^3 + \cos 25$  take  $x_0 = 4.5$  by Using Newton-Raphson method correct to 3 decimal places.
- Find positive root of the equation  $x \log_{10} x = 1.2$  by Using false-position method correct to 3 decimal places.
- Using power method find eigen values & corresponding eigen vectors  
 $A = \begin{bmatrix} 5 & 0 & 1 \\ 0 & -2 & 0 \\ 1 & 0 & 5 \end{bmatrix}$  take  $x_0 = [1, 0, 0]^T$  upto 5 iterations.

**Q.3 Attempt any three.**

**09**

- Solve the system of equation by using Gauss-Seidal method  
 $83x + 11y - 4z = 95, 7x + 52y + 13z = 104, 3x + 8y + 29z = 71$   
 (three iterations)
- Find the double root of the equation  $x^3 - x^2 - x + 1 = 0$  choosing  $x_0 = 0.8$  by using generalized Newton-Raphson method.
- Evaluate  $\int_0^{1/2} \int_0^{1/2} \frac{\sin xy}{1+xy} dx dy$  by using Simpson's rule  $h = k = 1/4$
- By using trapezoidal rule, evaluate  $\int_4^{5.2} \log_e x dx, n = 6$
- By using Weddell's rule find  $\int_0^{0.6} e^{-x^2} dx dy$  by taking  $n = 6$

**Q.4 Attempt any two**

- a) Apply factorization method to solve the equations.  
 $3x + 2y + 7z = 4$ ,  $2x + 3y + z = 5$ ,  $3x + 4y + z = 7$
- b) Perform two iterations of Newton-Raphson method of find a solution of the system.  $x^2 + xy = 6$ ,  $x^2 - y^2 = 3$  Take  $x_0 = y_0 = 1$
- c) Evaluate by using Romberg's method.  $I = \int_0^1 \frac{dx}{1+x^2}$  take  $h = 0.5, 0.25, 0.125$  respectively.

**Section – II****Q.5 Attempt any three**

09

- a) Let  $A, B$  be the fuzzy sets define on universal set  $X = \{-5, -4, -3, -2, -1, 0, 1, 2, 3\}$  as  
 $A = \frac{1}{-5} + \frac{0.75}{-4} + \frac{0.20}{-3} + \frac{0.8}{-2} + \frac{0.32}{-1} + \frac{0.28}{0} + \frac{0.9}{1} + \frac{0.65}{2} + \frac{1}{3}$   
 $B = \frac{0}{-5} + \frac{0.80}{-4} + \frac{0.20}{-3} + \frac{0.70}{-2} + \frac{0.20}{-1} + \frac{0.15}{0} + \frac{1}{1} + \frac{0.60}{2} + \frac{1}{3}$  find  $S(A, B)$ ,  $S(B, A)$
- b) Find Strong  $\alpha$ -cuts of the fuzzy set  $A$  defined by membership function.  

$$A(x) = \begin{cases} \frac{x-10}{20} & 10 \leq x \leq 30 \\ \frac{40-x}{10} & 30 < x \leq 40 \\ 0 & \text{otherwise} \end{cases} \quad \text{for } \alpha = 0, 0.3, 0.9$$
- c) Solve  $Max z = 3x_1 + 4x_2$  subject to constraints  
 $x_1 - x_2 \leq 1$   $-x_1 + x_2 \leq 2$   $x_1, x_2 \geq 0$
- d) Verify which of the following fuzzy sets are fuzzy number  
 i)  $A = 1/1 + \frac{0.5}{2} + \frac{0.6}{3} + \frac{0.7}{4} + \frac{0.8}{5}$   
 ii)  $B(x) = \log x, x \in [1, 2.72]$   
 iii) Customer relationship management
- e) Find  $f(A)$ , is  $A$  be a fuzzy set defined on universal set  
 $X = \{-3, -2, -1, 0, 1, 2, 3\}$  by the membership function  $A(x) = \frac{x+3}{10} \forall x \in X$  &  
 $f$  be a function defined on  $X$  as  $f(x) = 2x^2 + 10$

**Q.6 Attempt any three**

09

- a) Let  $A$  be a fuzzy set defined on universal set  $x = \{0, 1, 2, 3, 4, 5\}$  by the membership function  $A(x) = e^{-x} \forall x \in X$ . Then fuzzy cardinality of  $A$
- b) Let  $A, B$  be any two fuzzy sets defined on universal set  $X$  an  $\alpha, \beta \in [0, 1]$  then prove that  
 i)  ${}^\alpha(A \cap B) = {}^\alpha A \cap {}^\alpha B$   
 ii) If  $\alpha \leq \beta$  then  ${}^\beta A \subseteq {}^\alpha A$
- c) A building firm possesses four cranes each of which has a distance (km) from four different constructions sites as shown in table

|       | I   | II  | III | IV  |
|-------|-----|-----|-----|-----|
| $C_1$ | 90  | 75  | 75  | 80  |
| $C_2$ | 35  | 85  | 55  | 65  |
| $C_3$ | 125 | 95  | 90  | 105 |
| $C_4$ | 45  | 110 | 95  | 115 |

Place the cranes (one for each construction site) in such a way that the overall distance required for the transfer is as small as possible.

- d) Solve the fuzzy equation  $A + X = B$  where  $A, B$  are fuzzy numbers defined by membership functions.

$$A(x) = \begin{cases} \frac{x-9}{2} & 9 \leq x \leq 11 \\ \frac{14-x}{3} & 11 < x \leq 14 \\ 0 & \text{otherwise} \end{cases}$$

$$B(x) = \begin{cases} x-5 & 5 \leq x \leq 6 \\ \frac{9-x}{3} & 6 < x \leq 9 \\ 0 & \text{otherwise} \end{cases}$$

- e) Let  $A$  be a fuzzy set defined on universal set  $[-1,1]$  by the membership function

$$A(x) = \begin{cases} x+1 & -1 \leq x \leq 0 \\ 1-x & 0 < x \leq 1 \end{cases}$$

- Find i) Boundary of  $A$   
ii) Core of  $A$

**Q.7 Attempt any two**

**10**

- a) Max  $z = 4x_1 + 3x_2 + 6x_3$  subject to

$$2x_1 + 3x_2 + 2x_3 \leq 440$$

$$4x_1 + 3x_2 \leq 470$$

$$2x_1 + 5x_2 \leq 430 \quad x_1, x_2, x_3 \geq 0$$

- b) Let  $A, B$  the fuzzy number defined by the membership functions

$$A(x) = \begin{cases} \frac{x-1}{4} & 1 \leq x \leq 15 \\ 6-x & 5 \leq x \leq 6 \\ 0 & \text{otherwise} \end{cases}$$

$$B(x) = \begin{cases} \frac{x-6}{4} & 6 \leq x \leq 10 \\ 11-x & 10 < x \leq 11 \\ 0 & \text{otherwise} \end{cases}$$

Find  $\text{Max}(A, B)$

- c) Let  $A, B$  be the fuzzy numbers defined by membership functions.

$$A(x) = \begin{cases} \frac{x+5}{2} & -5 \leq x \leq -3 \\ -x/3 & -3 < x \leq 0 \\ 0 & \text{otherwise} \end{cases}$$

Find a fuzzy number  $A, B$

**S.Y. (B.Tech) (Sem - I) (New) (CBCS) Examination: Oct/Nov-2022**  
**ELECTRICAL ENGINEERING**  
**Electrical Machines - I**

Day & Date: Wednesday, 15-03-2023  
 Time: 02:00 PM To 05:00 PM

Max Marks: 70

- Instructions:** 1) Q. No. 1 is compulsory. It should be solved in the first 30 minutes in answer book. Page no 03 (Starting page of the Answer Book). Each question carries one mark.  
 2) Don't forget to Mention question paper set (P/Q/R/S) on top of page.  
 3) Figures to the right indicates full marks  
 4) Assume suitable data wherever needed and mention it clearly.

**MCQ/Objective Type Questions**

Duration: 30 Minutes

Marks: 14

**Q.1 Choose the correct alternatives from the options.**

**14**

- 1) The armature of DC machine is made up of laminated sheets to \_\_\_\_\_.  
 a) Reduce hysteresis loss  
 b) Reduce the eddy-current loss  
 c) Reduce armature copper loss  
 d) Increase dissipation of heat from the armature surface
- 2) In D.C. generators, the cause of rapid brush wear may be  
 a) severe sparking  
 b) rough commutator surface  
 c) imperfect contact  
 d) any of the above
- 3) Two generators A and B have 6-poles each. Generator A has wave wound armature while generator B has lap wound armature. The ratio of the induced e.m.f. is generator A and B will be  
 a) 2 : 3  
 b) 3 : 1  
 c) 3 : 2  
 d) 1 : 3
- 4) In a D.C. series motor, if the armature current is reduced by 50%, the torque of the motor will be equal to  
 a) 100% of the previous value  
 b) 50% of the previous value  
 c) 25% of the previous value  
 d) 10% of the previous value
- 5) Out of electrical, mechanical and magnetic losses, the losses which is minimum is \_\_\_\_\_.  
 a) All are equal  
 b) Electrical losses  
 c) Magnetic losses  
 d) Mechanical losses
- 6) Efficiency calculated by Swinburne's test is \_\_\_\_\_.  
 a) Exactly equal  
 b) Over-estimated  
 c) Under-estimated  
 d) Depends on the manual errors
- 7) The type of D.C. motor used for shears and punches is  
 a) shunt motor  
 b) series motor  
 c) differential compound D.C. motor  
 d) cumulative compound D.C. motor

- 8) Scott connection is used for the conversion of  
a) Three phases to two phases      b) Three phases to single phase  
c) Single phase to two phases      d) All of these
- 9) Which of the following is not a part of transformer installation?  
a) Conservator      b) Breather  
c) Buchholz relay      d) Exciter
- 10) Efficiency of a power transformer is of the order of  
a) 100 per cent      b) 98 per cent  
c) 50 per cent      d) 25 per cent
- 11) If  $R_2$  is the resistance of the secondary winding of the transformer and  $K$  is the transformation ratio then the equivalent secondary resistance referred to as primary will be  
a)  $R_2/K$       b)  $R_2/K^2$   
c)  $R_2^2/K^2$       d)  $R_2^2/K$
- 12) For a transformer given of 100 kVA, 220/6000-V transformer, short circuit test is performed. What current rating is needed?  
a) 445A      b) 40A  
c) 60A      d) 30A
- 13) Good voltage regulation of a transformer means  
a) output voltage fluctuation from no load to full load is the least  
b) output voltage fluctuation with power factor is the least  
c) difference between primary and secondary voltage is the least  
d) difference between primary and secondary voltage is maximum
- 14) In the case of the delta-star connection of three phase transformer, the secondary line voltage to the primary line voltage is at  
a) 0-degree      b) 30-degree leading  
c) 30-degree lagging      d) 60-degree lagging

**ELECTRICAL ENGINEERING**  
**Electrical Machines - I**

Day & Date: Wednesday, 15-03-2023  
 Time: 02:00 PM To 05:00 PM

Max. Marks: 56

**Instructions:** 1) All question are compulsory.  
 2) Figures to the right indicate full marks.

**Section – I**

**Q.2 Attempt any four of the following:**

**16**

- With a neat sketch explain the Hopkinson's test for dc motor.
- Derive the torque equation of DC machine.
- With help of neat diagram explain speed control methods of dc shunt motor.
- A 230 V dc shunt motor has an armature resistance of  $0.5 \Omega$  and a field resistance of  $76\frac{2}{3} \Omega$ . The motor draws a line current of 13 A while running light at 1000 r.p.m. At a certain load, the field circuit resistance is increased by  $38\frac{1}{3} \Omega$ . What is the new speed of the motor if the line current at this load is 42 A?
- A 4 pole, long shunt lap -wound generator supplies 25 KW at a terminal voltage of 500 V. The armature resistance is  $0.03 \Omega$ , series field resistance is  $0.04 \Omega$ , and shunt field resistance is  $200 \Omega$ . The brush drop may be taken as 1.0 V. Determine the e.m.f. generated. Calculate also the No. of conductors if speed is 1200 rpm. and flux per pole is 0.02 weber. Neglect armature reaction.
- A 200V DC shunt motor develops an output of 17.158 KW when taking 20.2 KW. The field resistance is 50 ohm and armature resistance are 0.06 ohm. What is the efficiency and power input when output is 7.46 KW?

**Q.3 Attempt two of the following:**

**12**

- With neat sketch explain the armature reaction, its effect and remedies to overcome it.
- A 22.38 KW, 440V, 4 pole wave wound DC shunt motor has 840 armature conductors and 140 commutator segments. Its full load efficiency is 88 % and shunt field current is 1.8 A. If brushes are shifted backward through 1.5 segment to Geometrical Neutral Axis. Find demagnetizing and cross magnetizing ampere- turns?

**OR**

The brake test on a DC shunt motor gave the following results: tensions on two sides of the brake were 2.9 kg and 0.17 kg, radius of pulley 7 cm, speed 1500 rpm. Input current was 2 A at 230V, line current = 2.8 A.  
 Find: 1) Output torque 2) Output power 3) Horse power 4) Efficiency

## Section – II

**Q.4 Attempt any four of the following:****16**

- a) Explain the different losses in the transformer and derive the condition for maximum efficiency.
- b) Draw the vector diagram of the loaded transformer for resistive, capacitive, and inductive load.
- c) Write a short note on YD11 and DY 11 connections of the  $3\phi$  transformer.
- d) A 200 kVA, 6600/400 V, 50 Hz single-phase transformer has 80 turns on the secondary. Calculate: (i) the approximate values of the primary and secondary currents (ii) the approximate number of primary turns (iii) the maximum value of flux.
- e) A 600 KVA, the 1-phase transformer has an efficiency of 92% both at full load and half load at unity power factor. Determine its efficiency at 60% of full load at 0.8 lagging power factor.
- f) A 2200/200 V, 1 ph transformer takes a no-load current of 0.6 A and absorbs 400 watts. Find: (i) Magnetizing component of no load current (ii) Iron loss component of no load current (iii) power factor (iv) Draw phasor diagram for above no load parameters

**Q.5 Attempt any two of the following:****12**

- a) With a neat sketch explain the parallel operation of the transformer.
- b) With a neat sketch explain the open circuit and short circuit test of the transformer. How equivalent circuit parameters and efficiency of a transformer are computed?
- c) A 50 KVA, 4400/220 V transformer has  $R_1 = 3.45 \Omega$ ,  $R_2 = 0.009 \Omega$ ,  $X_1 = 5.2 \Omega$ ,  $X_2 = 0.015 \Omega$ . Calculate for the transformer (i) equivalent resistance referred to primary, (ii) equivalent resistance referred to secondary (iii) equivalent reactance referred to both primary and secondary (iv) equivalent impedance referred to both primary and secondary, (v) total cu losses

If brushes are shifted backward through 1.5 segment to Geometrical Neutral Axis. Find demagnetizing and cross magnetizing ampere- turns?

**OR**

The brake test on a DC shunt motor gave the following results: tensions on two sides of the brake were 2.9 kg and 0.17 kg, radius of pulley 7 cm, speed 1500 rpm. Input current was 2 A at 230V, line current = 2.8 A.  
 Find: 1) Output torque 2) Output power 3) Horse power 4) Efficiency

## Section – II

**Q.4 Attempt any four of the following:****16**

- a) Explain the different losses in the transformer and derive the condition for maximum efficiency.
- b) Draw the vector diagram of the loaded transformer for resistive, capacitive, and inductive load.
- c) Write a short note on YD11 and DY 11 connections of the  $3\phi$  transformer.
- d) A 200 kVA, 6600/400 V, 50 Hz single-phase transformer has 80 turns on the secondary. Calculate: (i) the approximate values of the primary and secondary currents (ii) the approximate number of primary turns (iii) the maximum value of flux.
- e) A 600 KVA, the 1-phase transformer has an efficiency of 92% both at full load and half load at unity power factor. Determine its efficiency at 60% of full load at 0.8 lagging power factor.
- f) A 2200/200 V, 1 ph transformer takes a no-load current of 0.6 A and absorbs 400 watts. Find: (i) Magnetizing component of no load current (ii) Iron loss component of no load current (iii) power factor (iv) Draw phasor diagram for above no load parameters

**Q.5 Attempt any two of the following:****12**

- a) With a neat sketch explain the parallel operation of the transformer.
- b) With a neat sketch explain the open circuit and short circuit test of the transformer. How equivalent circuit parameters and efficiency of a transformer are computed?
- c) A 50 KVA, 4400/220 V transformer has  $R_1 = 3.45 \Omega$ ,  $R_2 = 0.009 \Omega$ ,  $X_1 = 5.2 \Omega$ ,  $X_2 = 0.015 \Omega$ . Calculate for the transformer (i) equivalent resistance referred to primary, (ii) equivalent resistance referred to secondary (iii) equivalent reactance referred to both primary and secondary (iv) equivalent impedance referred to both primary and secondary, (v) total cu losses

Day & Date: Wednesday, 15-03-2023  
Time: 02:00 PM To 05:00 PM

**Instructions:**

- 1) Q. No. 1 is compulsory. It should be solved in the first 30 minutes in answer book. Page no 03 (Starting page of the Answer Book). Each question carries one mark.
- 2) Don't forget to Mention question paper set (P/Q/R/S) on top of page.
- 3) Figures to the right indicates full marks
- 4) Assume suitable data wherever needed and mention it clearly.

Marks: 14

14

- Page 13 of 16

- 8) Good voltage regulation of a transformer means  
a) output voltage fluctuation from no load to full load is the least  
b) output voltage fluctuation with power factor is the least  
c) difference between primary and secondary voltage is the least  
d) difference between primary and secondary voltage is maximum
- 9) In the case of the delta-star connection of three phase transformer, the secondary line voltage to the primary line voltage is at  
a) 0-degree  
b) 30-degree leading  
c) 30-degree lagging  
d) 60-degree lagging
- 10) The armature of DC machine is made up of laminated sheets to \_\_\_\_\_.  
a) Reduce hysteresis loss  
b) Reduce the eddy-current loss  
c) Reduce armature copper loss  
d) Increase dissipation of heat from the armature surface
- 11) In D.C. generators, the cause of rapid brush wear may be  
a) severe sparking  
b) rough commutator surface  
c) imperfect contact  
d) any of the above
- 12) Two generators A and B have 6-poles each. Generator A has wave wound armature while generator B has lap wound armature. The ratio of the induced e.m.f. is generator A and B will be  
a) 2 : 3  
b) 3 : 1  
c) 3 : 2  
d) 1 : 3
- 13) In a D.C. series motor, if the armature current is reduced by 50%, the torque of the motor will be equal to  
a) 100% of the previous value  
b) 50% of the previous value  
c) 25% of the previous value  
d) 10% of the previous value
- 14) Out of electrical, mechanical and magnetic losses, the losses which is minimum is \_\_\_\_\_.  
a) All are equal  
b) Electrical losses  
c) Magnetic losses  
d) Mechanical losses

**S.Y. (B.Tech) (Sem - I) (New) (CBCS) Examination: Oct/Nov-2022**  
**ELECTRICAL ENGINEERING**  
**Electrical Machines - I**

Day & Date: Wednesday, 15-03-2023  
 Time: 02:00 PM To 05:00 PM

Max. Marks: 56

**Instructions:** 1) All question are compulsory.  
 2) Figures to the right indicate full marks.

**Section – I**

**Q.2 Attempt any four of the following:**

**16**

- With a neat sketch explain the Hopkinson's test for dc motor.
- Derive the torque equation of DC machine.
- With help of neat diagram explain speed control methods of dc shunt motor.
- A 230 V dc shunt motor has an armature resistance of  $0.5 \Omega$  and a field resistance of  $76\frac{2}{3} \Omega$ . The motor draws a line current of 13 A while running light at 1000 r.p.m. At a certain load, the field circuit resistance is increased by  $38\frac{1}{3} \Omega$ . What is the new speed of the motor if the line current at this load is 42 A?
- A 4 pole, long shunt lap -wound generator supplies 25 KW at a terminal voltage of 500 V. The armature resistance is  $0.03 \Omega$ , series field resistance is  $0.04 \Omega$ , and shunt field resistance is  $200 \Omega$ . The brush drop may be taken as 1.0 V. Determine the e.m.f. generated. Calculate also the No. of conductors if speed is 1200 rpm. and flux per pole is 0.02 weber. Neglect armature reaction.
- A 200V DC shunt motor develops an output of 17.158 KW when taking 20.2 KW. The field resistance is 50 ohm and armature resistance are 0.06 ohm. What is the efficiency and power input when output is 7.46 KW?

**Q.3 Attempt two of the following:**

**12**

- With neat sketch explain the armature reaction, its effect and remedies to overcome it.
- A 22.38 KW, 440V, 4 pole wave wound DC shunt motor has 840 armature conductors and 140 commutator segments. Its full load efficiency is 88 % and shunt field current is 1.8 A. If brushes are shifted backward through 1.5 segment to Geometrical Neutral Axis. Find demagnetizing and cross magnetizing ampere- turns?

**OR**

The brake test on a DC shunt motor gave the following results: tensions on two sides of the brake were 2.9 kg and 0.17 kg, radius of pulley 7 cm, speed 1500 rpm. Input current was 2 A at 230V, line current = 2.8 A.  
 Find: 1) Output torque 2) Output power 3) Horse power 4) Efficiency

## Section – II

**Q.4 Attempt any four of the following:****16**

- a) Explain the different losses in the transformer and derive the condition for maximum efficiency.
- b) Draw the vector diagram of the loaded transformer for resistive, capacitive, and inductive load.
- c) Write a short note on YD11 and DY 11 connections of the  $3\phi$  transformer.
- d) A 200 kVA, 6600/400 V, 50 Hz single-phase transformer has 80 turns on the secondary. Calculate: (i) the approximate values of the primary and secondary currents (ii) the approximate number of primary turns (iii) the maximum value of flux.
- e) A 600 KVA, the 1-phase transformer has an efficiency of 92% both at full load and half load at unity power factor. Determine its efficiency at 60% of full load at 0.8 lagging power factor.
- f) A 2200/200 V, 1 ph transformer takes a no-load current of 0.6 A and absorbs 400 watts. Find: (i) Magnetizing component of no load current (ii) Iron loss component of no load current (iii) power factor (iv) Draw phasor diagram for above no load parameters

**Q.5 Attempt any two of the following:****12**

- a) With a neat sketch explain the parallel operation of the transformer.
- b) With a neat sketch explain the open circuit and short circuit test of the transformer. How equivalent circuit parameters and efficiency of a transformer are computed?

4) Assume suitable data wherever needed and mention it clearly.

**MCQ/Objective Type Questions**

Duration: 30 Minutes

Marks: 14

**Q.1 Choose the correct alternatives from the options.**

**14**

- 1) A power factor meter has
  - a) one current circuit and two pressure circuits
  - b) one current circuit and one pressure circuit
  - c) two current circuits and one pressure circuit
  - d) None of the above
- 2) In a dynamometer 3-phase power factor meter, the planes of the-two moving coils are at
  - a) 0°
  - b) 60°
  - c) 90°
  - d) 120°
- 3) The desirable static characteristics of a measuring system are
  - a) accuracy and drift
  - b) accuracy, sensitivity and reproducibility
  - c) drift and dead zone
  - d) static error
- 4) Basically a potentiometer is a device for
  - a) comparing two voltages
  - b) measuring a current
  - c) comparing two currents
  - d) measuring a voltage
- 5) For measurement of inductance having high value, we should use
  - a) Maxwell's bridge
  - b) Maxwell Wein bridge
  - c) Hay's bridge
  - d) All of the above
- 6) A CRO can display
  - a) AC signals
  - b) DC signals
  - c) Both AC and DC signals
  - d) Time invariant signals
- 7) Digital instruments have input impedance of the order of
  - a)  $\Omega$
  - b)  $k\Omega$
  - c)  $M\Omega$
  - d)  $m\Omega$

- 8) Which of the following are integrating instruments?
- a) Ammeters
  - b) Voltmeters
  - c) Wattmeters
  - d) Ampere-hour and watt-hour meters
- 9) Resistances can be measured with the help of
- a) wattmeters
  - b) voltmeters
  - c) ammeters
  - d) ohmmeters and resistance bridges
- 10) A \_\_\_\_\_ device prevents the oscillation of the moving system and enables the latter to reach its final position quickly
- a) deflecting
  - b) Controlling
  - c) damping
  - d) any of the above
- 11) Induction type single phase energy meters measure electric energy in
- a) kW
  - b) Wh
  - c) kWh
  - d) VAR
- 12) \_\_\_\_\_ is an instrument which measures the insulation resistance of an electric circuit relative to earth and one another,
- a) Tangent galvanometer
  - b) Meggar
  - c) Current transformer
  - d) None of the above
- 13) A moving iron instrument can be used for
- a) D.C. only
  - b) A.C. only
  - c) both D.C. and A.C
  - d) All of the above
- 14) In a 3-phase power measurement by two wattmeter method the reading of one of the wattmeter was zero. The power factor of the load must be
- a) unity
  - b) 0.5
  - c) 0.3
  - d) zero

**Instructions:** 1) All question are compulsory.  
2) Figures to the right indicate full marks.

**Section – I**

**Q.2 Solve any four:** **16**

- a) Define Errors and enlist classification in detail.
- b) Explain in detail shunt & multiplier Ohmmeter with their shape of scale.
- c) Explain Maxwell's inductance bridge with phasor diagram
- d) Give the classifications of Potentiometer. State the working principle of DC potentiometer
- e) List out all the desirable & undesirable characteristics of an instrument

**Q.3 Solve any two:** **12**

- a) Derive the torque equation of a PMMI instrument
- b) Explain the method of measurement of power using two wattmeter for balanced load. Also derive the equation of power factor.
- c) Explain Schering bridge with phasor diagram. Also derive the equation of dissipation factor

**Section – II**

**Q.4 Solve any four:** **16**

- a) Define following terms:
  - i) Burden of an instrument transformer
  - ii) Actual transformation ratio
  - iii) Nominal transformation ratio
  - iv) Turns ratio
- b) Explain with neat diagram electronic counter.
- c) Draw and explain integrating type digital voltmeter.
- d) Enlist the features of CRT.
- e) With neat sketch explain Q- meter.

**Q.5 Solve any two:** **12**

- a) Draw the block diagram of CRO & explain working of each block in detail.
- b) Draw typical phasor diagram of a potential transformer. Derive expression for actual transformation ratio.
- c) Explain Electronic energy meter with construction and working principle.

 3) Figures to the right indicates full marks  
 4) Assume suitable data wherever needed and mention it clearly.

**MCQ/Objective Type Questions**

Duration: 30 Minutes

Marks: 14

**Q.1 Choose the correct alternatives from the options.**

**14**

- 1) A CRO can display
  - a) AC signals
  - b) DC signals
  - c) Both AC and DC signals
  - d) Time invariant signals
- 2) Digital instruments have input impedance of the order of
  - a)  $\Omega$
  - b)  $k\Omega$
  - c)  $M\Omega$
  - d)  $m\Omega$
- 3) Which of the following are integrating instruments?
  - a) Ammeters
  - b) Voltmeters
  - c) Wattmeters
  - d) Ampere-hour and watt-hour meters
- 4) Resistances can be measured with the help of
  - a) wattmeters
  - b) voltmeters
  - c) ammeters
  - d) ohmmeters and resistance bridges
- 5) A \_\_\_\_\_ device prevents the oscillation of the moving system and enables the latter to reach its final position quickly
  - a) deflecting
  - b) Controlling
  - c) damping
  - d) any of the above
- 6) Induction type single phase energy meters measure electric energy in
  - a) kW
  - b) Wh
  - c) kWh
  - d) VAR
- 7) \_\_\_\_\_ is an instrument which measures the insulation resistance of an electric circuit relative to earth and one another,
  - a) Tangent galvanometer
  - b) Meggar
  - c) Current transformer
  - d) None of the above
- 8) A moving iron instrument can be used for
  - a) D.C. only
  - b) A.C. only
  - c) both D.C. and A.C
  - d) All of the above

- 9) In a 3-phase power measurement by two wattmeter method the reading of one of the wattmeter was zero. The power factor of the load must be
- |          |         |
|----------|---------|
| a) unity | b) 0.5  |
| c) 0.3   | d) zero |
- 10) A power factor meter has
- |                                                  |
|--------------------------------------------------|
| a) one current circuit and two pressure circuits |
| b) one current circuit and one pressure circuit  |
| c) two current circuits and one pressure circuit |
| d) None of the above                             |
- 11) In a dynamometer 3-phase power factor meter, the planes of the-two moving coils are at
- |               |                |
|---------------|----------------|
| a) $0^\circ$  | b) $60^\circ$  |
| c) $90^\circ$ | d) $120^\circ$ |
- 12) The desirable static characteristics of a measuring system are
- |                                              |
|----------------------------------------------|
| a) accuracy and drift                        |
| b) accuracy, sensitivity and reproducibility |
| c) drift and dead zone                       |
| d) static error                              |
- 13) Basically a potentiometer is a device for
- |                           |                        |
|---------------------------|------------------------|
| a) comparing two voltages | b) measuring a current |
| c) comparing two currents | d) measuring a voltage |
- 14) For measurement of inductance having high value, we should use
- |                     |                        |
|---------------------|------------------------|
| a) Maxwell's bridge | b) Maxwell Wein bridge |
| c) Hay's bridge     | d) All of the above    |

|                 |  |
|-----------------|--|
| <b>Seat No.</b> |  |
|-----------------|--|

**Set S**

**S.Y (B. Tech) (Sem - I) (New) (CBCS) Examination: Oct/Nov-2022  
ELECTRICAL ENGINEERING**

**Electrical measurement and instrumentation**

Day & Date: Tuesday, 21-03-2023  
Time: 02:00 PM To 05:00 PM

Max. Marks: 56

**Instructions:** 1) All question are compulsory.  
2) Figures to the right indicate full marks.

**Section – I**

**Q.2 Solve any four:** **16**

- a) Define Errors and enlist classification in detail.
- b) Explain in detail shunt & multiplier Ohmmeter with their shape of scale.
- c) Explain Maxwell's inductance bridge with phasor diagram
- d) Give the classifications of Potentiometer. State the working principle of DC potentiometer
- e) List out all the desirable & undesirable characteristics of an instrument

**Q.3 Solve any two:** **12**

- a) Derive the torque equation of a PMMI instrument
- b) Explain the method of measurement of power using two wattmeter for balanced load. Also derive the equation of power factor.
- c) Explain Schering bridge with phasor diagram. Also derive the equation of dissipation factor

**Section – II**

**Q.4 Solve any four:** **16**

- a) Define following terms:
  - i) Burden of an instrument transformer
  - ii) Actual transformation ratio
  - iii) Nominal transformation ratio
  - iv) Turns ratio
- b) Explain with neat diagram electronic counter.
- c) Draw and explain integrating type digital voltmeter.
- d) Enlist the features of CRT.
- e) With neat sketch explain Q- meter.

**Q.5 Solve any two:** **12**

- a) Draw the block diagram of CRO & explain working of each block in detail.
- b) Draw typical phasor diagram of a potential transformer. Derive expression for actual transformation ratio.
- c) Explain Electronic energy meter with construction and working principle.

Set **P**

**S.Y. (B.Tech.) (Sem-I) (New) (CBCS) Examination: Oct/Nov - 2022**  
**ELECTRICAL ENGINEERING**  
**Power System I**

Day & Date: Friday, 17-03-2023  
 Time: 02:00 PM To 05:00 PM

Max. Marks: 70

- Instructions:** 1) Q. No. 1 is compulsory and should be solved in first 30 minutes in Answer Book. Page No.3 (starting page of the Answer Book). Each question carry one mark.  
 2) Don't forget to mention Question Paper Set (P/Q/R/S) at the top of the same page.

**MCQ/Objective Type Questions**

Duration: 30 Minutes

Marks: 14

**Q.1 Choose the correct alternatives from the options.**

**14**

- 1) Which of the following will take least time in starting from cold condition to full load operation
  - a) Gas turbine plant
  - b) Nuclear power plant
  - c) Hydro electric power plant
  - d) Thermal power plant
- 2) Which of following generating plants has the minimum operating cost
  - a) Diesel plant
  - b) Hydroelectric plant
  - c) Steam plant
  - d) Nuclear plant
- 3) A gas turbine power plant is best suited for
  - a) Peak load
  - b) Base load
  - c) Emergency
  - d) None of these
- 4) A diesel power plant is generally used as a/an
  - a) Peak loads
  - b) Base load
  - c) Standby/emergency plant
  - d) Any of above
- 5) Which tariff is most ideal tariff for the consumer?
  - a) Two part tariff
  - b) Three part tariff
  - c) Both (a) and (b)
  - d) None of the above
- 6) Domestic consumers are charged \_\_\_\_\_.
  - a) Flat demand tariff
  - b) Block rate tariff
  - c) Flat rate tariff
  - d) Off peak tariff
- 7) Area under the daily load curve divided by 24 hours gives
  - a) Average load
  - b) Maximum demand
  - c) Units generated
  - d) Peak load
- 8) The knowledge of diversity factor helps in determining
  - a) plant capacity
  - b) Maximum demand
  - c) Units generated
  - d) Average load

- 9) Feeder is designed mainly from the point of view of \_\_\_\_\_.  
a) Its current carrying capacity  
b) Voltage drop in it  
c) Operating voltage  
d) Operating Frequency
- 10) A 3 phase 4 wire system is commonly used for \_\_\_\_\_.  
a) Primary distribution  
b) Secondary distribution  
c) Primary transmission  
d) Secondary transmission
- 11) The voltage of the single phase supply to residential consumers is  
a) 110 V  
b) 210 V  
c) 230 V  
d) 400 V
- 12) High voltage transmission lines use  
a) suspension insulators  
b) pin insulators  
c) both (a) and (b)  
d) none of the above
- 13) Overhead lines generally use \_\_\_\_\_.  
a) A.C.S.R. conductors  
b) Copper conductors  
c) Aluminum conductors  
d) Any of the above
- 14) Voltage across the string is \_\_\_\_\_ times the line voltage  
a)  $\sqrt{3}$   
b)  $\sqrt{2}$   
c)  $1 / \sqrt{3}$   
d)  $1 / \sqrt{2}$

Day & Date: Friday, 17-03-2023  
Time: 02:00 PM To 05:00 PM

Max. Marks: 56

**Instructions:** 1) All question are compulsory.  
2) Figures to the right indicate full marks.

**Section – I**

- Q.2 Attempt any four** **16**
- a) Explain the following terms
    - i) Maximum demand
    - ii) Demand factor
    - iii) Diversity factor
    - iv) Load factor
  - b) Discuss the factors governing the choice of site selection for hydro power plant.
  - c) With the help of neat sketch explain gas turbine power plant.
  - d) Draw the Schematic Arrangement of Nuclear Power Station and explain.
  - e) Explain Base Load and Peak Load on Power Station.
- Q.3 Attempt any two.** **12**
- a) What are the different types of loads? Explain.
  - b) A generating station has a connected load of 43MW and a maximum demand of 20 MW; the units generated being  $61.5 \times 10^6$  per annum. Calculate
    - i) the demand factor and
    - ii) load factor
  - c) What is Tariff? Explain different types of Tariffs.

**Section - II**

- Q.4 Attempt any four** **16**
- a) Differentiate between overhead and underground system.
  - b) What are the methods improving String Efficiency?
  - c) Explain typical a. c. Power Supply Scheme.
  - d) Derive the equation for conductor material required in 2-wire d.c. system with one conductor earthed.
  - e) What are the different types of Commonly used conductor materials?
- Q.5 Attempt any two** **12**
- a) State and explain Kelvin's law to determine the economic size of Transmission conductor.
  - b) In a 33 kV overhead line, there are three units in the string of insulators. If the capacitance between each insulator pin and earth is 11% of self-capacitance of each insulator, find
    - i) the distribution of voltage over 3 insulators and
    - ii) string efficiency
  - c) Derive the equation for conductor material required in Single phase, 2-wire a.c. system. Compare with 2 wire DC system.

- 5) A 3 phase 4 wire system is commonly used for \_\_\_\_\_.  
 a) Primary distribution                      b) Secondary distribution  
 c) Primary transmission                      d) Secondary transmission
- 6) The voltage of the single phase supply to residential consumers is  
 a) 110 V                                              b) 210 V  
 c) 230 V                                              d) 400 V
- 7) High voltage transmission lines use  
 a) suspension insulators                      b) pin insulators  
 c) both (a) and (b)                              d) none of the above
- 8) Overhead lines generally use \_\_\_\_\_.  
 a) A.C.S.R. conductors                      b) Copper conductors  
 c) Aluminum conductors                      d) Any of the above
- 9) Voltage across the string is \_\_\_\_\_ times the line voltage  
 a)  $\sqrt{3}$                                               b)  $\sqrt{2}$   
 c)  $1/\sqrt{3}$                                               d)  $1/\sqrt{2}$

- 10)** Which of the following will take least time in starting from cold condition to full load operation
- a) Gas turbine plant
  - b) Nuclear power plant
  - c) Hydro electric power plant
  - d) Thermal power plant
- 11)** Which of following generating plants has the minimum operating cost
- a) Diesel plant
  - b) Hydroelectric plant
  - c) Steam plant
  - d) Nuclear plant
- 12)** A gas turbine power plant is best suited for
- a) Peak load
  - b) Base load
  - c) Emergency
  - d) None of these
- 13)** A diesel power plant is generally used as a/an
- a) Peak loads
  - b) Base load
  - c) Standby/emergency plant
  - d) Any of above
- 14)** Which tariff is most ideal tariff for the consumer?
- a) Two part tariff
  - b) Three part tariff
  - c) Both (a) and (b)
  - d) None of the above

Set **S**

**S.Y. (B.Tech.) (Sem-I) (New) (CBCS) Examination: Oct/Nov - 2022**  
**ELECTRICAL ENGINEERING**  
**Power System I**

Day & Date: Friday, 17-03-2023  
 Time: 02:00 PM To 05:00 PM

Max. Marks: 56

**Instructions:** 1) All question are compulsory.  
 2) Figures to the right indicate full marks.

**Section – I**

**Q.2 Attempt any four** **16**

- a) Explain the following terms
  - i) Maximum demand
  - ii) Demand factor
  - iii) Diversity factor
  - iv) Load factor
- b) Discuss the factors governing the choice of site selection for hydro power plant.
- c) With the help of neat sketch explain gas turbine power plant.
- d) Draw the Schematic Arrangement of Nuclear Power Station and explain.
- e) Explain Base Load and Peak Load on Power Station.

**Q.3 Attempt any two.** **12**

- a) What are the different types of loads? Explain.
- b) A generating station has a connected load of 43MW and a maximum demand of 20 MW; the units generated being  $61.5 \times 10^6$  per annum. Calculate
  - i) the demand factor and
  - ii) load factor
- c) What is Tariff? Explain different types of Tariffs.

**Section - II**

**Q.4 Attempt any four** **16**

- a) Differentiate between overhead and underground system.
- b) What are the methods improving String Efficiency?
- c) Explain typical a. c. Power Supply Scheme.
- d) Derive the equation for conductor material required in 2-wire d.c. system with one conductor earthed.
- e) What are the different types of Commonly used conductor materials?

**Q.5 Attempt any two** **12**

- a) State and explain Kelvin's law to determine the economic size of Transmission conductor.
- b) In a 33 kV overhead line, there are three units in the string of insulators. If the capacitance between each insulator pin and earth is 11% of self-capacitance of each insulator, find
  - i) the distribution of voltage over 3 insulators and
  - ii) string efficiency
- c) Derive the equation for conductor material required in Single phase, 2-wire a.c. system. Compare with 2 wire DC system.

**S.Y. (B.Tech.) (Sem - I) (New) (CBCS) Examination: Oct/Nov-2022**  
**ELECTRICAL ENGINEERING**  
**Electronic Devices and Circuits**

Day & Date: Monday, 20-03-2023  
 Time: 02:00 PM To 05:00 PM

Max. Marks: 70

- Instructions:** 1) Q. No. 1 is compulsory. It should be solved in the first 30 minutes in answer book. Page no 03 (Starting page of the Answer Book). Each question carries one mark.  
 2) Don't forget to Mention question paper set (P/Q/R/S) on top of page.  
 3) Figures to the right indicates full marks  
 4) Assume suitable data wherever needed and mention it clearly.

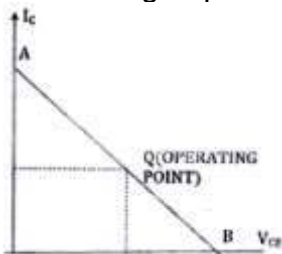

**MCQ/Objective Type Questions**

Duration: 30 Minutes

Marks: 14

**Q.1 Choose the correct alternatives from the options.**

**14**

- 1) BJT is biased to \_\_\_\_\_.  
 a) Work as a switch  
 b) Prevent thermal runaway  
 c) Increase DC collector current  
 d) Operate it in the saturation region
- 2) Which of the following depicts the DC load line?  
 a) 

- 3) The Low frequency response of RC Coupled amplifier \_\_\_\_\_.  
 a) Increasing the value of coupling capacitor only  
 b) Increasing the value of bypass capacitor and coupling capacitor  
 c) Increasing the value of bypass capacitor only  
 d) Decreasing the value of coupling capacitor
- 4) RC coupling is used for \_\_\_\_\_ amplification.  
 a) Voltage  
 b) Current  
 c) Power  
 d) None of the above

- 5) In an RC coupled amplifier, the voltage gain over mid-frequency range \_\_\_\_\_.  
a) Changes abruptly with frequency  
b) Is constant  
c) Changes uniformly with frequency  
d) None of the above
- 6) How do we determine the hybrid parameters  $h_{11}$  and  $h_{21}$  of a two - port network?  
a) Short circuiting the input terminal  
b) Open circuiting the input terminal  
c) Short circuiting the output terminal  
d) Open circuiting the output terminal
- 7) MOSFET has greatest application in digital circuit due to \_\_\_\_\_.  
a) Low power consumption  
b) Less noise  
c) Small amount of space it takes on a chip  
d) All of the above
- 8) The change in output voltage for the corresponding change in load current in 7805 IC regulator is defined as \_\_\_\_\_.  
a) All of the mentioned  
b) Line regulation  
c) Load regulation  
d) Input regulation
- 9) Negative feedback in amplifier \_\_\_\_\_.  
a) Improves the signal-to-noise ratio at input  
b) Improves the signal-to-noise ratio at output  
c) Does not improve the signal-to-noise ratio at I/O  
d) Reduce Distortion
- 10) A feedback circuit usually employs which type of circuit?  
a) Resistive  
b) Inductive  
c) Capacitive  
d) Shunt
- 11) When a negative voltage feedback is applied to an amplifier, it's voltage gain is \_\_\_\_\_.  
a) increases  
b) reduces  
c) remains same  
d) none of above
- 12) Why do we use CE amplifier as a large signal class A amplifier?  
a) It has very high output impedance  
b) It has very high input impedance  
c) It has very high voltage gain  
d) It is very much stable
- 13) Where does the Q point lie for class B amplifier?  
a) Active  
b) Cut off  
c) Saturation  
d) Between saturation and active
- 14) What is cross over distortion?  
a) Effect occurred during switching of transistor after every half cycle  
b) Distortion occurred due to resistors  
c) Distortion occurred due to Capacitors  
d) Distortion occurred due to Inductors

Seat  
No.

**S.Y. (B.Tech.) (Sem - I) (New) (CBCS) Examination: Oct/Nov-2022**  
**ELECTRICAL ENGINEERING**  
**Electronic Devices and Circuits**

Day & Date: Monday, 20-03-2023  
 Time: 02:00 PM To 05:00 PM

Max. Marks: 56

**Instructions:** 1) All questions are compulsory.  
 2) Figures to the right indicate full marks.

**Section – I**

**Q.2 Answer the following question. (Any Four)**

16

- Explain Hybrid model for Common CE Configuration.
- Explain the frequency response of RC coupled CE amplifier.
- Why biasing is needed in transistors.
- Explain the input and output characteristics of JFET.
- Explain Construction and working of E-MOSFET.

**Q.3 Answer the following question. (Any Two)**

12

- Explain the small signal parameters for Common Drain configuration of JFET.  $H_2$
- Explain - Thermal Runway, stability factor analysis for BJT.
- Analyze two stage RC coupled CE amplifier circuit (shown below) to determine Input Impedance, Output Impedance, and overall voltage gain.

Where  $R_1 = 120\text{K}\Omega$ ,  $R_2 = 39\text{K}\Omega$ ,  $R_C = 12\text{K}\Omega$ ,  $R_E = 3.9\text{K}\Omega$ ,  $h_{fe} = 100$ ,  $r_{e1} = 20\Omega$ ,  $R_L = 120\text{K}\Omega$

**Section – II**

- Q.4 Answer the following question. (Any Four)** **16**
- a) Explain 78xx and 79xx fixed voltage regulator with suitable diagram.
  - b) An amplifier with  $1\text{K}\Omega$  input resistance and  $50\text{K}\Omega$  output resistance has voltage gain of 40. The amplifier is now modified to provide 10% negative feedback in series with input.  
Calculate
    - 1) voltage gain
    - 2) input impedance
    - 3) output impedance
  - c) A voltage series negative feedback amplifier has voltage gain without feedback  $A_v = 500$ ,  $R_i = 3\text{K}\Omega$ ,  $R_o = 20\text{K}\Omega$ ,  $\beta = 0.01$ . Calculate overall voltage gain, input impedance and output impedance.
  - d) Explain the classification of power amplifier with current waveform in active device.
  - e) Derive the expression for efficiency of Class – A amplifier.
- Q.5 Answer the following question. (Any Two)** **12**
- a) Compare Class A, Class B and Class AB amplifier.
  - b) Explain the classification of negative feedback.
  - c) Explain various types of filters.

### MCQ/Objective Type Questions

Duration: 30 Minutes

Marks: 14

**Q.1 Choose the correct alternatives from the options.**

14

- 1) When a negative voltage feedback is applied to an amplifier, its voltage gain is \_\_\_\_\_.  
a) increases                                      b) reduces  
c) remains same                                  d) none of above
- 2) Why do we use CE amplifier as a large signal class A amplifier?  
a) It has very high output impedance  
b) It has very high input impedance  
c) It has very high voltage gain  
d) It is very much stable
- 3) Where does the Q point lie for class B amplifier?  
a) Active                                              b) Cut off  
c) Saturation                                        d) Between saturation and active
- 4) What is cross over distortion?  
a) Effect occurred during switching of transistor after every half cycle  
b) Distortion occurred due to resistors  
c) Distortion occurred due to Capacitors  
d) Distortion occurred due to Inductors
- 5) BJT is biased to \_\_\_\_\_.  
a) Work as a switch  
b) Prevent thermal runaway  
c) Increase DC collector current  
d) Operate it in the saturation region
- 6) Which of the following depicts the DC load line?

a)  

b)  

c)

d)

- 7) The Low frequency response of RC Coupled amplifier \_\_\_\_\_.  
 a) Increasing the value of coupling capacitor only  
 b) Increasing the value of bypass capacitor and coupling capacitor  
 c) Increasing the value of bypass capacitor only  
 d) Decreasing the value of coupling capacitor
- 8) RC coupling is used for \_\_\_\_\_ amplification.  
 a) Voltage  
 b) Current  
 c) Power  
 d) None of the above
- 9) In an RC coupled amplifier, the voltage gain over mid-frequency range \_\_\_\_\_.  
 a) Changes abruptly with frequency  
 b) Is constant  
 c) Changes uniformly with frequency  
 d) None of the above
- 10) How do we determine the hybrid parameters  $h_{11}$  and  $h_{21}$  of a two - port network?  
 a) Short circuiting the input terminal  
 b) Open circuiting the input terminal  
 c) Short circuiting the output terminal  
 d) Open circuiting the output terminal
- 11) MOSFET has greatest application in digital circuit due to \_\_\_\_\_.  
 a) Low power consumption  
 b) Less noise  
 c) Small amount of space it takes on a chip  
 d) All of the above
- 12) The change in output voltage for the corresponding change in load current in 7805 IC regulator is defined as \_\_\_\_\_.  
 a) All of the mentioned  
 b) Line regulation  
 c) Load regulation  
 d) Input regulation
- 13) Negative feedback in amplifier \_\_\_\_\_.  
 a) Improves the signal-to-noise ratio at input  
 b) Improves the signal-to-noise ratio at output  
 c) Does not improve the signal-to-noise ratio at I/O  
 d) Reduce Distortion
- 14) A feedback circuit usually employs which type of circuit?  
 a) Resistive  
 b) Inductive  
 c) Capacitive  
 d) Shunt

Seat  
No.

**S.Y. (B.Tech.) (Sem - I) (New) (CBCS) Examination: Oct/Nov-2022**  
**ELECTRICAL ENGINEERING**  
**Electronic Devices and Circuits**

Day & Date: Monday, 20-03-2023  
 Time: 02:00 PM To 05:00 PM

Max. Marks: 56

**Instructions:** 1) All questions are compulsory.  
 2) Figures to the right indicate full marks.

**Section – I**

**Q.2 Answer the following question. (Any Four)**

16

- Explain Hybrid model for Common CE Configuration.
- Explain the frequency response of RC coupled CE amplifier.
- Why biasing is needed in transistors.
- Explain the input and output characteristics of JFET.
- Explain Construction and working of E-MOSFET.

**Q.3 Answer the following question. (Any Two)**

12

- Explain the small signal parameters for Common Drain configuration of JFET.  $H_2$
- Explain - Thermal Runway, stability factor analysis for BJT.
- Analyze two stage RC coupled CE amplifier circuit (shown below) to determine Input Impedance, Output Impedance, and overall voltage gain.

Where  $R_1 = 120\text{K}\Omega$ ,  $R_2 = 39\text{K}\Omega$ ,  $R_C = 12\text{K}\Omega$ ,  $R_E = 3.9\text{K}\Omega$ ,  $h_{fe} = 100$ ,  $r_{e1} = 20\Omega$ ,  $R_L = 120\text{K}\Omega$

**Section – II**

**Q.4 Answer the following question. (Any Four)** **16**

- a) Explain 78xx and 79xx fixed voltage regulator with suitable diagram.
- b) An amplifier with  $1\text{K}\Omega$  input resistance and  $50\text{K}\Omega$  output resistance has voltage gain of 40. The amplifier is now modified to provide 10% negative feedback in series with input.  
Calculate
  - 1) voltage gain
  - 2) input impedance
  - 3) output impedance
- c) A voltage series negative feedback amplifier has voltage gain without feedback  $A_v = 500$ ,  $R_i = 3\text{K}\Omega$ ,  $R_o = 20\text{K}\Omega$ ,  $\beta = 0.01$ . Calculate overall voltage gain, input impedance and output impedance.
- d) Explain the classification of power amplifier with current waveform in active device.
- e) Derive the expression for efficiency of Class – A amplifier.

**Q.5 Answer the following question. (Any Two)** **12**

- a) Compare Class A, Class B and Class AB amplifier.
- b) Explain the classification of negative feedback.
- c) Explain various types of filters.

**Seat  
No.**

Max. Marks: 70

Marks: 14

14

- Page 1 of 16

- 7) The Laplace transform of  $t \cosh t$  is \_\_\_\_\_.  
 a)  $\frac{s^2 - 1}{(s^2 + 1)^2}$  b)  $-\frac{s^2 - 1}{(s + 1)^2}$   
 c)  $\frac{s^2 + 1}{(s^2 - 1)^2}$  d)  $-\frac{s^2 + 1}{(s^2 - 1)^2}$
- 8) The value of  $\int_C \frac{(z+6) dz}{z^2-4}$  where  $C$  is the circle  $|z - 2| = 1$  is \_\_\_\_\_.  
 a)  $2\pi$  b)  $4\pi i$   
 c)  $2\pi i$  d)  $4\pi$
- 9)  $\int_C (y - x - 3x^2 i) dz$  where  $C$  is the straight line from  $z = 0$  to  $z = 1 + i$  is \_\_\_\_\_.  
 a)  $1 + i$  b)  $1 - i$   
 c)  $i$  d)  $-i$
- 10) If  $Z\{f(k)\} = F(z)$ , then  $Z\{kf(k)\}$  \_\_\_\_\_.  
 a)  $\frac{dF(z)}{dz}$  b)  $-\frac{dF(z)}{dz}$   
 c)  $z \frac{dF(z)}{dz}$  d)  $-z \frac{dF(z)}{dz}$
- 11) If  $\delta(k) = \begin{cases} 1, & k = 0 \\ 0, & \text{otherwise} \end{cases}$  then  $Z\{\delta(k)\} =$  \_\_\_\_\_.  
 a)  $0$  b)  $1$   
 c)  $Z$  d)  $1/z$
- 12) The ROC of Z-transform of the sequence  $F(k) = \begin{cases} (\frac{1}{2})^k, & k \leq 0 \\ (\frac{1}{3})^k, & k > 0 \end{cases}$  is \_\_\_\_\_.  
 a)  $|z| > \frac{1}{2}$  b)  $|z| > \frac{1}{3}$   
 c)  $2 < |z| < 3$  d)  $\frac{1}{3} < |z| < \frac{1}{2}$
- 13) The solution of the equation  $p q = p + q$  is \_\_\_\_\_.  
 a)  $z = ax + (a + 1) y + c$   
 b)  $z = (a + 1)x + a(a - 1) y + c$   
 c)  $z(a - 1) = a(a - 1)x + ay + c$   
 d)  $z = (a - 1)x + a(a + 1)y + c$
- 14)  $Z = a(x + y) + c$  is the general solution of \_\_\_\_\_.  
 a)  $P q = 1$  b)  $p = 1 - q$   
 c)  $P + q = 0$  d)  $p = q$

**ELECTRICAL ENGINEERING**  
**Engineering Mathematics – III**

Day & Date: Monday, 13-03-2023  
 Time: 02:00 PM To 05:00 PM

Max. Marks: 56

- Instructions:** 1) All questions are compulsory.  
 2) Figures to the right indicate full marks.  
 3) Use of non-programmable calculator is allowed.

**Section – I**

**Q.2 Attempt any three of the following.** **09**

- Solve  $(D^3 + 3D^2 + 3D + 1)y = e^{-x}$
- $(D^3 + D)y = \cos x$ .
- Solve  $x^2 \frac{d^2y}{dx^2} - 3x \frac{dy}{dx} + 5y = x^2 \sin(\log x)$
- Calculate  $L\{te^{-4t} \sin 3t\}$
- Calculate  $L\left\{\cos ht \int_0^t e^u \cdot \cos hu \, du\right\}$

**Q.3 Attempt any three of the following.** **09**

- Solve  $(D^2 + 3D + 2)y = \sin(e^x)$
- Solve  $(D^2 - 2D + 1)y = x \cdot e^x \sin x$ .
- Solve  $(5 + 2x)^2 \frac{d^2y}{dx^2} - 6(5 + 2x) \frac{dy}{dx} + 8y = 6x$
- Evaluate  $\int_0^\infty \frac{\cos at - \cos bt}{t} dt$
- Find the Laplace Transform of  $(1 + 2t - 3t^2 + 4t^3)H(t - 2)$

**Q.4 Attempt any two of the following.** **10**

- An e.m.f.  $E \sin pt$  is applied at  $t = 0$  to a circuit containing a condenser  $C$  and inductance  $L$  in series. The current  $X$  satisfies the equation  $L \frac{dx}{dt} + \frac{1}{c} \int X \, dt = E \sin pt$  where  $X = -\frac{dq}{dt}$ . If  $p^2 = \frac{1}{LC}$  and initially the current  $X$  and charge  $q$  are zero, find the current in the circuit at time  $t$ .
- Calculate inverse Laplace transform of  $\frac{s^2}{(s^2+4)(s^2+9)}$  by using Convolution Method.
- Solve  $(D^2 - D - 2)y = 2 \log x + \frac{1}{x} + \frac{1}{x^2}$

## Section – II

**Q.5 Attempt any three of the following.****09**

- a) Solve  $pq = x^m y^n z^{2l}$
- b) Solve  $p^2 q^3 = x^2 y^3$
- c) Evaluate  $\int_0^{1+i} (x - y + ix^2) dz$  along the straight line from  $z = 0$  to  $z = 1 + i$
- d) Calculate  $Z\{f(k)\}$  and the region of convergence of  $f(k) = k2^k, k \geq 0$
- e) Calculate  $Z\{f(k)\}$  and the region of convergence of  $f(k) = \left(\frac{1}{2}\right)^{|k|}$  for all  $k$ .

**Q.6 Attempt any three of the following.****09**

- a) Solve  $p(1 + q) = qz$ .
- b) Solve  $x(y - z)p + y(z - x)q = z(x - y)$
- c) Evaluate  $\oint \frac{z+2}{(z-3)(z-4)} dz$  where  $c$  is the circle  $|z| = 1$
- d) Calculate Z-Transform of  $f(k) = 2^k \sin\{3k + 2\}, k \geq 0$ .
- e) Calculate inverse Z-Transform of  $F(z) = \frac{1}{(z-5)^2}$  when  $|z| < 5$

**Q.7 Attempt any two****10**

- a) Evaluate  $\oint \frac{\sin^6 z}{(z-\pi/6)^3} dz$  where  $c$  is  $|z| = 1$ .
- b) Calculate inverse Z-Transform of  $F(z) = \frac{3z^2 - 18z + 26}{(z-2)(z-3)(z-4)}$ , if region of Convergence is  $3 < |z| < 4$
- c) Use variable separable method to solve  $\frac{\partial z}{\partial x} + 4 \frac{\partial z}{\partial y} = 0$  given  $z(0, y) = 8e^{-3y}$

**Seat  
No.**

Max. Marks: 70

Marks: 14

14

- Page 5 of 16

- 6) The solution of the equation  $p q = p + q$  is \_\_\_\_\_.  
 a)  $z = ax + (a + 1)y + c$   
 b)  $z = (a + 1)x + a(a - 1)y + c$   
 c)  $z(a - 1) = a(a - 1)x + ay + c$   
 d)  $z = (a - 1)x + a(a + 1)y + c$
- 7)  $Z = a(x + y) + c$  is the general solution of \_\_\_\_\_.  
 a)  $P q = 1$   
 b)  $p = 1 - q$   
 c)  $P + q = 0$   
 d)  $p = q$
- 8) If the differential equation  $\frac{d^n y}{dx^n} + P_1 \frac{d^{n-1} y}{dx^{n-1}} + \dots + P_n y = X$  is a linear differential equation with constant coefficients then the R.H.S. is a \_\_\_\_\_.  
 a) Constant  
 b) function of  $x$   
 c) function of  $y$   
 d) function of  $x$  and  $y$
- 9)  $\frac{1}{D+1}(\log x + \frac{1}{x})$  is equal to \_\_\_\_\_.  
 a)  $e^x$   
 b)  $\log x$   
 c)  $x$   
 d)  $1$
- 10)  $y = (c_1 + c_2 x)e^{2x} + (c_3 + c_4 x)e^{-2x}$  is the general solutions of \_\_\_\_\_.  
 a)  $(D^2 + 2)^2 y = 0$   
 b)  $(D^2 - 2)^2 y = 0$   
 c)  $(D^2 + 4)^2 y = 0$   
 d)  $(D^2 - 4)^2 y = 0$
- 11) The particular integral of  $x^2 \frac{d^2 y}{dx^2} + 2x \frac{dy}{dx} = \frac{1}{x^2}$  is \_\_\_\_\_.  
 a)  $y = c_1 + c_2 x^2$   
 b)  $y = x - \frac{1}{x^2}$   
 c)  $y = \frac{1}{2x^2}$   
 d)  $y = \frac{1}{x^2}$
- 12) The general solution of  $(3x + 2)^2 \frac{d^2 y}{dx^2} + 5(3x + 2) \frac{dy}{dx} - 3y = 0$  is  $y =$  \_\_\_\_\_.  
 a)  $(c_1 + c_2 x)e^{2x}$   
 b)  $c_1 e^{2x} + c_2 e^{4x}$   
 c)  $c_1(3x + 2)^{1/3} + c_2(3x + 2)^{-1}$   
 d)  $c_1(x + 3)^2 + c_2(x + 3)^3$
- 13) If  $L[f(t)] = \phi(s)$ , then  $L[f(at)]$  is \_\_\_\_\_.  
 a)  $\phi(\frac{s}{a})$   
 b)  $\frac{1}{s} \phi(\frac{s}{a})$   
 c)  $\frac{1}{a} \phi[\frac{s}{a}]$   
 d)  $a. \phi(\frac{s}{a})$
- 14) The Laplace transform of  $t \cosh t$  is \_\_\_\_\_.  
 a)  $\frac{s^2 - 1}{(s^2 + 1)^2}$   
 b)  $-\frac{s^2 - 1}{(s + 1)^2}$   
 c)  $\frac{s^2 + 1}{(s^2 - 1)^2}$   
 d)  $-\frac{s^2 + 1}{(s^2 - 1)^2}$

### MCQ/Objective Type Questions

Duration: 30 Minutes

Marks: 14

**Q.1 Choose the correct alternatives from the options.**

14

- 1) If  $\delta(k) = \begin{cases} 1, & k=0 \\ 0, & otherwise \end{cases}$  then  $Z\{\delta(k)\} =$  \_\_\_\_\_.

a) 0                                      b) 1  
c) Z                                        d)  $1/z$
- 2) The ROC of Z-transform of the sequence  $F(k) = \begin{cases} (\frac{1}{2})^k, & k \leq 0 \\ (\frac{1}{3})^k, & k > 0 \end{cases}$  is \_\_\_\_\_.

a)  $|z| > \frac{1}{2}$                                   b)  $|z| > \frac{1}{3}$   
c)  $2 < |z| < 3$                               d)  $\frac{1}{3} < |z| < \frac{1}{2}$
- 3) The solution of the equation  $p q = p + q$  is \_\_\_\_\_

a)  $z = ax + (a+1)y + c$   
b)  $z = (a+1)x + a(a-1)y + c$   
c)  $z(a-1) = a(a-1)x + ay + c$   
d)  $z = (a-1)x + a(a+1)y + c$
- 4)  $Z = a(x+y) + c$  is the general solution of \_\_\_\_\_.

a)  $Pq = 1$                                   b)  $p = 1 - q$   
c)  $P + q = 0$                                 d)  $p = q$
- 5) If the differential equation  $\frac{d^n y}{dx^n} + P_1 \frac{d^{n-1}y}{dx^{n-1}} + \dots + P_n y = X$  is a linear differential equation with constant coefficients then the R.H.S. is a \_\_\_\_\_.

a) Constant                                  b) function of x  
c) function of y                              d) function of x and y

**Q.1 Choose the correct alternatives from the options.**

**14**

- 1) If  $L[f(t)] = \phi(s)$ , then  $L[f(at)]$  is \_\_\_\_\_.
  - a)  $\phi\left(\frac{s}{a}\right)$
  - b)  $\frac{1}{s}\phi\left(\frac{s}{a}\right)$
  - c)  $\frac{1}{a}\phi\left[\frac{s}{a}\right]$
  - d)  $a.\phi\left(\frac{s}{a}\right)$
- 2) The Laplace transform of  $t \cosh t$  is \_\_\_\_\_.
  - a)  $\frac{s^2 - 1}{(s^2 + 1)^2}$
  - b)  $-\frac{s^2 - 1}{(s + 1)^2}$
  - c)  $\frac{s^2 + 1}{(s^2 - 1)^2}$
  - d)  $-\frac{s^2 + 1}{(s^2 - 1)^2}$
- 3) The value of  $\int_c \frac{(z+6) dz}{z^2-4}$  where  $c$  is the circle  $|z - 2| = 1$  is \_\_\_\_\_.
  - a)  $2\pi$
  - b)  $4\pi i$
  - c)  $2\pi i$
  - d)  $4\pi$
- 4)  $\int_c (y - x - 3x^2 i) dz$  where  $c$  is the straight line from  $z = 0$  to  $z = 1 + i$  is \_\_\_\_\_.
  - a)  $1 + i$
  - b)  $1 - i$
  - c)  $i$
  - d)  $-i$
- 5) If  $Z\{f(k)\} = F(z)$ , then  $Z\{kf(k)\}$  \_\_\_\_\_.
  - a)  $\frac{dF(z)}{dz}$
  - b)  $-\frac{dF(z)}{dz}$
  - c)  $z \frac{dF(z)}{dz}$
  - d)  $-z \frac{dF(z)}{dz}$

**S.Y. (B.Tech.) (Sem - I) (New) (CBCS) Examination: Oct/Nov-2022**  
**ELECTRICAL ENGINEERING**  
**Engineering Mathematics – III**

Day & Date: Monday, 13-03-2023  
 Time: 02:00 PM To 05:00 PM

Max. Marks: 56

- Instructions:** 1) All questions are compulsory.  
 2) Figures to the right indicate full marks.  
 3) Use of non-programmable calculator is allowed.

**Section – I**

**Q.2 Attempt any three of the following.** **09**

- Solve  $(D^3 + 3D^2 + 3D + 1)y = e^{-x}$
- $(D^3 + D)y = \cos x$ .
- Solve  $x^2 \frac{d^2y}{dx^2} - 3x \frac{dy}{dx} + 5y = x^2 \sin(\log x)$
- Calculate  $L\{te^{-4t} \sin 3t\}$
- Calculate  $L\left\{\cos ht \int_0^t e^u \cdot \cos hu \, du\right\}$

**Q.3 Attempt any three of the following.** **09**

- Solve  $(D^2 + 3D + 2)y = \sin(e^x)$
- Solve  $(D^2 - 2D + 1)y = x \cdot e^x \sin x$ .
- Solve  $(5 + 2x)^2 \frac{d^2y}{dx^2} - 6(5 + 2x) \frac{dy}{dx} + 8y = 6x$
- Evaluate  $\int_0^\infty \frac{\cos at - \cos bt}{t} dt$
- Find the Laplace Transform of  $(1 + 2t - 3t^2 + 4t^3)H(t - 2)$

**Q.4 Attempt any two of the following.** **10**

- An e.m.f.  $E \sin pt$  is applied at  $t = 0$  to a circuit containing a condenser  $C$  and inductance  $L$  in series. The current  $X$  satisfies the equation  $L \frac{dx}{dt} + \frac{1}{c} \int X \, dt = E \sin pt$  where  $X = -\frac{dq}{dt}$ . If  $p^2 = \frac{1}{LC}$  and initially the current  $X$  and charge  $q$  are zero, find the current in the circuit at time  $t$ .
- Calculate inverse Laplace transform of  $\frac{s^2}{(s^2+4)(s^2+9)}$  by using Convolution Method.
- Solve  $(D^2 - D - 2)y = 2 \log x + \frac{1}{x} + \frac{1}{x^2}$

## Section – II

**Q.5 Attempt any three of the following.****09**

- a) Solve  $pq = x^m y^n z^{2l}$
- b) Solve  $p^2 q^3 = x^2 y^3$
- c) Evaluate  $\int_0^{1+i} (x - y + ix^2) dz$  along the straight line from  $z = 0$  to  $z = 1 + i$
- d) Calculate  $Z\{f(k)\}$  and the region of convergence of  $f(k) = k2^k, k \geq 0$
- e) Calculate  $Z\{f(k)\}$  and the region of convergence of  $f(k) = \left(\frac{1}{2}\right)^{|k|}$  for all  $k$ .

**Q.6 Attempt any three of the following.****09**

- a) Solve  $p(1 + q) = qz$ .
- b) Solve  $x(y - z)p + y(z - x)q = z(x - y)$
- c) Evaluate  $\oint \frac{z+2}{(z-3)(z-4)} dz$  where  $c$  is the circle  $|z| = 1$
- d) Calculate Z-Transform of  $f(k) = 2^k \sin\{3k + 2\}, k \geq 0$ .
- e) Calculate inverse Z-Transform of  $F(z) = \frac{1}{(z-5)^2}$  when  $|z| < 5$

**Q.7 Attempt any two****10**

- a) Evaluate  $\oint \frac{\sin^6 z}{(z-\pi/6)^3} dz$  where  $c$  is  $|z| = 1$ .
- b) Calculate inverse Z-Transform of  $F(z) = \frac{3z^2 - 18z + 26}{(z-2)(z-3)(z-4)}$ , if region of Convergence is  $3 < |z| < 4$
- c) Use variable separable method to solve  $\frac{\partial z}{\partial x} + 4 \frac{\partial z}{\partial y} = 0$  given  $z(0, y) = 8e^{-3y}$

**ELECTRICAL ENGINEERING**

**Electrical Machines – II**

Day & Date: Monday, 06-03-2023

Max. Marks: 70

Time: 02:00 PM To 05:00 PM

- Instructions:** 1) Q. No. 1 is compulsory. It should be solved in the first 30 minutes in answer book. Page no 03 (Starting page of the Answer Book). Each question carries one mark.  
 2) Don't forget to Mention question paper set (P/Q/R/S) on top of page.  
 3) Figures to the right indicates full marks  
 4) Assume suitable data wherever needed and mention it clearly.

**MCQ/Objective Type Questions**

Duration: 30 Minutes

Marks: 14

**Q.1 Choose the correct alternatives from the options.**

**14**

- 1) The synchronous speed of an induction motor is defined as \_\_\_\_\_.  
 a) Natural speed at which a magnetic field rotates  
 b) The speed of a synchronous motor  
 c) The speed of an induction motor at no load  
 d) None of these
- 2) Stator of a 3 ph induction motor produces \_\_\_\_\_ magnetic field.  
 a) Steady  
 b) Rotating  
 c) Alternating  
 d) None of the above
- 3) When load is placed on 3 phase induction motor, its slip \_\_\_\_\_.  
 a) increases  
 b) decreases  
 c) remains same  
 d) none of these
- 4) In case of 3 phase induction motor having  $N_s = 1500$  rpm and running with slip,  $s = 0.04$ , its rotor speed is \_\_\_\_\_ rpm  
 a) 1500  
 b) 0  
 c) 1440  
 d) 1560
- 5) Rotor rheostat control method of speed control is used for \_\_\_\_\_.  
 a) Squirrel-cage induction motors only  
 b) Slip ring induction motors only  
 c) Both a and b  
 d) None of the above
- 6) The disadvantage of starting an induction motor with a star-delta starter is that \_\_\_\_\_.  
 a) The starting torque is one-third of the torque in case of delta connection  
 b) During starting high losses result  
 c) The starting torque increases and the motor runs with jerks  
 d) None of these

- 7) Circle diagram of an induction motor can be used to determine its \_\_\_\_\_.
  - a) power factor
  - b) efficiency
  - c) slip
  - d) all of the above
- 8) Blocked rotor test is conducted at \_\_\_\_\_.
  - a) High voltage
  - b) Rated current
  - c) High current
  - d) Rated voltage
- 9) Starting winding of single phase induction motor is placed in the \_\_\_\_\_.
  - a) Stator
  - b) Rotor
  - c) Armature
  - d) Field
- 10) The direction of rotation of a single phase motor can be reversed by \_\_\_\_\_.
  - a) reversing connections of both windings
  - b) reversing connections of starting winding
  - c) using a reversing switch
  - d) reversing supply connections
- 11) The frequency of voltage generated by an alternator having 4 poles and rotating at 1800 rpm is \_\_\_\_\_ Hz.
  - a) 60
  - b) 7200
  - c) 120
  - d) 450
- 12) For the same power rating, a lower voltage alternator will be \_\_\_\_\_.
  - a) more efficient
  - b) larger in size
  - c) operating at high rpm
  - d) more costly
- 13) The back emf set up in the stator of a synchronous motor will depend on \_\_\_\_\_.
  - a) Rotor speed only
  - b) Rotor excitation only
  - c) Rotor excitation and rotor speed
  - d) Coupling angle, rotor speed and excitation
- 14) The field winding of a three phase synchronous machine is excited by \_\_\_\_\_.
  - a) Single-phase ac supply
  - b) Three-phase ac supply
  - c) DC supply
  - d) Supply obtained from an inverter

**ELECTRICAL ENGINEERING**  
**Electrical Machines – II**

Day & Date: Monday, 06-03-2023  
 Time: 02:00 PM To 05:00 PM

Max. Marks: 56

**Instructions:** - 1) All questions are compulsory.  
 2) Figures to the right indicate full marks.

**Section – I**

**Q.2 Solve any four** **16**

- a) Explain principle of operation of 3 phase induction motor.
- b) A 4 pole, 3 phase induction motor operates from a supply whose frequency is 50 Hz. Calculate:
  - i) the synchronous speed
  - ii) the speed of rotor when the slip is 0.05,
  - iii) the frequency of rotor currents when the slip is 0.03,
- c) What is the necessity of starter? Explain with diagram, working of DOL starter for a 3-phase induction motor.
- d) Explain how the speed is controlled by adding an external resistance in the rotor circuit.
- e) At standstill the equivalent impedance of inner and outer cages of a double cage rotor are  $(0.01 + j0.5) \Omega$  and  $(0.05 + j0.1) \Omega$  respectively. Calculate the ratio of torques produced by the two cages
  - i) at starting
  - ii) when running with a slip of 5%.
- f) Draw and explain equivalent circuit of 3ph Induction Motor.

**Q.3 Solve any Two** **12**

- a) Derive the expression for the torque of 3 phase induction motor. Also derive expression for starting torque and maximum torque.
- b) Prove that the rotating magnetic field is produced when 2 phase supply voltage is given to the stator winding of induction motor. Use phasor diagrams to support your answer.
- c) A 3 phase, 400 V induction motor gave the following test readings;  
 No load test: 400 V, 1250 W, 9 A  
 Blocked rotor test: 150 V, 4000 W, 38 A  
 Draw the circle diagram. If the normal rating is 14.9 kW, find from the circle diagram, the full load value of
  - i) current
  - ii) power factor
  - iii) slip
 Assume that stator Cu loss is equal to rotor Cu loss.

## Section – II

**Q.4 Solve any four****16**

- a) Explain why a single phase induction motor should be provided with an auxiliary winding on the stator.
- b) Draw and Explain capacitor start capacitor run induction motor.
- c) Explain the methods of synchronization of an alternator.
- d) A 3 ph, 16 pole alternator has a star connected winding with 144 slots and 10 conductors per slot. The flux per pole is 0.03 Wb, sinusoidally distributed and the speed is 375 rpm. Find the frequency and the phase and line emf. Assume full pitched coil &  $k_c = 1$ .
- e) A 1200 kVA, 3300 V, 50 Hz, three phase star connected alternator has armature resistance of  $0.25 \Omega$  per phase. A field current of 40 A produces a short circuit current of 200 A and an open circuit emf of 1100 V (line value). By using synchronous impedance method, find the voltage regulation at full load 0.8 p.f. lagging.
- f) Explain hunting effect of synchronous motor, also write down its causes and remedies.

**Q.5 Solve any Two****12**

- a) How to make single phase induction motor self starting? Explain cross field theory.
- b) 20 pole, 693 V, 50 Hz, 3 phase delta connected synchronous motor is operating at no load with normal excitation. It has armature resistance per phase of zero and synchronous reactance of  $10 \Omega$ . If rotor is retarded by  $0.5^\circ$  (mechanical) from its synchronous position. Calculate:
  - i) rotor displacement in electrical degrees
  - ii) armature emf per phase
  - iii) armature current per phase
  - iv) power drawn by the motor
- c) With neat sketch explain the construction and working principle of an alternator.

- b) Draw and Explain capacitor start capacitor run induction motor.
- c) Explain the methods of synchronization of an alternator.
- d) A 3 ph, 16 pole alternator has a star connected winding with 144 slots and 10 conductors per slot. The flux per pole is 0.03 Wb, sinusoidally distributed and the speed is 375 rpm. Find the frequency and the phase and line emf. Assume full pitched coil &  $k_c = 1$ .
- e) A 1200 kVA, 3300 V, 50 Hz, three phase star connected alternator has armature resistance of  $0.25 \Omega$  per phase. A field current of 40 A produces a short circuit current of 200 A and an open circuit emf of 1100 V (line value). By using synchronous impedance method, find the voltage regulation at full load 0.8 p.f. lagging.
- f) Explain hunting effect of synchronous motor, also write down its causes and remedies.

## Q.5 Solve any Two

12

- a) How to make single phase induction motor self starting? Explain cross field theory.
- b) 20 pole, 693 V, 50 Hz, 3 phase delta connected synchronous motor is operating at no load with normal excitation. It has armature resistance per phase of zero and synchronous reactance of  $10 \Omega$ . If rotor is retarded by  $0.5^\circ$  (mechanical) from its synchronous position. Calculate:
  - i) rotor displacement in electrical degrees
  - ii) armature emf per phase
  - iii) armature current per phase
  - iv) power drawn by the motor
- c) With neat sketch explain the construction and working principle of an alternator.

**Electrical Machines – II**

Day & Date: Monday, 06-03-2023

Max. Marks: 70

Time: 02:00 PM To 05:00 PM

- Instructions:** 1) Q. No. 1 is compulsory. It should be solved in the first 30 minutes in answer book. Page no 03 (Starting page of the Answer Book). Each question carries one mark.  
 2) Don't forget to Mention question paper set (P/Q/R/S) on top of page.  
 3) Figures to the right indicates full marks  
 4) Assume suitable data wherever needed and mention it clearly.

**MCQ/Objective Type Questions**

Duration: 30 Minutes

Marks: 14

**Q.1 Choose the correct alternatives from the options.**

**14**

- 1) The disadvantage of starting an induction motor with a star-delta starter is that \_\_\_\_\_.
  - a) The starting torque is one-third of the torque in case of delta connection
  - b) During starting high losses result
  - c) The starting torque increases and the motor runs with jerks
  - d) None of these
- 2) Circle diagram of an induction motor can be used to determine its \_\_\_\_\_.
  - a) power factor
  - b) efficiency
  - c) slip
  - d) all of the above
- 3) Blocked rotor test is conducted at \_\_\_\_\_.
  - a) High voltage
  - b) Rated current
  - c) High current
  - d) Rated voltage
- 4) Starting winding of single phase induction motor is placed in the \_\_\_\_\_.
  - a) Stator
  - b) Rotor
  - c) Armature
  - d) Field
- 5) The direction of rotation of a single phase motor can be reversed by \_\_\_\_\_.
  - a) reversing connections of both windings
  - b) reversing connections of starting winding
  - c) using a reversing switch
  - d) reversing supply connections
- 6) The frequency of voltage generated by an alternator having 4 poles and rotating at 1800 rpm is \_\_\_\_\_ Hz.
  - a) 60
  - b) 7200
  - c) 120
  - d) 450
- 7) For the same power rating, a lower voltage alternator will be \_\_\_\_\_.
  - a) more efficient
  - b) larger in size
  - c) operating at high rpm
  - d) more costly

- 8) The back emf set up in the stator of a synchronous motor will depend on \_\_\_\_\_.  
a) Rotor speed only  
b) Rotor excitation only  
c) Rotor excitation and rotor speed  
d) Coupling angle, rotor speed and excitation
- 9) The field winding of a three phase synchronous machine is excited by \_\_\_\_\_.  
a) Single-phase ac supply  
b) Three-phase ac supply  
c) DC supply  
d) Supply obtained from an inverter
- 10) The synchronous speed of an induction motor is defined as \_\_\_\_\_.  
a) Natural speed at which a magnetic field rotates  
b) The speed of a synchronous motor  
c) The speed of an induction motor at no load  
d) None of these
- 11) Stator of a 3 ph induction motor produces \_\_\_\_\_ magnetic field.  
a) Steady  
b) Rotating  
c) Alternating  
d) None of the above
- 12) When load is placed on 3 phase induction motor, its slip \_\_\_\_\_.  
a) increases  
b) decreases  
c) remains same  
d) none of these
- 13) In case of 3 phase induction motor having  $N_s = 1500$  rpm and running with slip,  $s = 0.04$ , its rotor speed is \_\_\_\_\_ rpm  
a) 1500  
b) 0  
c) 1440  
d) 1560
- 14) Rotor rheostat control method of speed control is used for \_\_\_\_\_.  
a) Squirrel-cage induction motors only  
b) Slip ring induction motors only  
c) Both a and b  
d) None of the above

**S.Y. (B.Tech) (Semester – II) (New) (CBCS) Examination: Oct/Nov-2022**  
**ELECTRICAL ENGINEERING**  
**Electrical Machines – II**

Day & Date: Monday, 06-03-2023  
 Time: 02:00 PM To 05:00 PM

Max. Marks: 56

**Instructions:** - 1) All questions are compulsory.  
 2) Figures to the right indicate full marks.

**Section – I**

**Q.2 Solve any four** **16**

- a) Explain principle of operation of 3 phase induction motor.
- b) A 4 pole, 3 phase induction motor operates from a supply whose frequency is 50 Hz. Calculate:
  - i) the synchronous speed
  - ii) the speed of rotor when the slip is 0.05,
  - iii) the frequency of rotor currents when the slip is 0.03,
- c) What is the necessity of starter? Explain with diagram, working of DOL starter for a 3-phase induction motor.
- d) Explain how the speed is controlled by adding an external resistance in the rotor circuit.
- e) At standstill the equivalent impedance of inner and outer cages of a double cage rotor are  $(0.01 + j0.5) \Omega$  and  $(0.05 + j0.1) \Omega$  respectively. Calculate the ratio of torques produced by the two cages
  - i) at starting
  - ii) when running with a slip of 5%.
- f) Draw and explain equivalent circuit of 3ph Induction Motor.

**Q.3 Solve any Two** **12**

- a) Derive the expression for the torque of 3 phase induction motor. Also derive expression for starting torque and maximum torque.
- b) Prove that the rotating magnetic field is produced when 2 phase supply voltage is given to the stator winding of induction motor. Use phasor diagrams to support your answer.
- c) A 3 phase, 400 V induction motor gave the following test readings;  
 No load test: 400 V, 1250 W, 9 A  
 Blocked rotor test: 150 V, 4000 W, 38 A  
 Draw the circle diagram. If the normal rating is 14.9 kW, find from the circle diagram, the full load value of
  - i) current
  - ii) power factor
  - iii) slip
 Assume that stator  $C_u$  loss is equal to rotor  $C_u$  loss.

## Section – II

**Q.4 Solve any four****16**

- a) Explain why a single phase induction motor should be provided with an auxiliary winding on the stator.
- b) Draw and Explain capacitor start capacitor run induction motor.
- c) Explain the methods of synchronization of an alternator.
- d) A 3 ph, 16 pole alternator has a star connected winding with 144 slots and 10 conductors per slot. The flux per pole is 0.03 Wb, sinusoidally distributed and the speed is 375 rpm. Find the frequency and the phase and line emf. Assume full pitched coil &  $k_c = 1$ .
- e) A 1200 kVA, 3300 V, 50 Hz, three phase star connected alternator has armature resistance of  $0.25 \Omega$  per phase. A field current of 40 A produces a short circuit current of 200 A and an open circuit emf of 1100 V (line value). By using synchronous impedance method, find the voltage regulation at full load 0.8 p.f. lagging.
- f) Explain hunting effect of synchronous motor, also write down its causes and remedies.

**Q.5 Solve any Two****12**

- a) How to make single phase induction motor self starting? Explain cross field theory.
- b) 20 pole, 693 V, 50 Hz, 3 phase delta connected synchronous motor is operating at no load with normal excitation. It has armature resistance per phase of zero and synchronous reactance of  $10 \Omega$ . If rotor is retarded by  $0.5^\circ$  (mechanical) from its synchronous position. Calculate:
  - i) rotor displacement in electrical degrees
  - ii) armature emf per phase
  - iii) armature current per phase
  - iv) power drawn by the motor
- c) With neat sketch explain the construction and working principle of an alternator.

**MCQ/Objective Type Questions**

Duration: 30 Minutes

Marks: 14

**Q.1 Choose the correct alternatives from the options.**

**14**

- 1) Corona is accompanied by \_\_\_\_\_.  
a) violet visible glow                      b) hissing noise  
c) formation of ozone gas                  d) all of the above
- 2) Corona usually occurs when the electrostatic stress in the air around the conductor succeeds \_\_\_\_\_.  
a) 30 kV (maximum value)/cm              b) 22 kV (maximum value)/cm  
c) 11 kV (rms value)/cm                      d) 6.6 kV (rms value)/cm
- 3) The sag of transmission line is least affected owing to \_\_\_\_\_.  
a) Weight of conductor                      b) Current through the conductor  
c) Temperature                                d) Ice deposited on the conductor
- 4) In a cable immediately above metallic sheath \_\_\_\_\_ is provided.  
a) Earthing connection                      b) Bedding  
c) Armouring                                    d) None of the above
- 5) The process of achieving uniformity in the dielectric stress by using layers of different dielectrics is known as \_\_\_\_\_.  
a) Stranding process                          b) Grading of cables  
c) Stress distribution                          d) Capacitance grading
- 6) The thickness of the layer of insulation on the conductor, in cables, depends upon \_\_\_\_\_.  
a) Reactive power                              b) Power factor  
c) Voltage                                        d) Current carrying capacity
- 7) By using which conductor is the skin effect reduced?  
a) Bundled conductors                        b) Stranded conductors  
c) Hollow conductors                          d) Solid conductors
- 8) Which of the following is correct operating voltage range for short transmission lines?  
a) Less than 456 KV                            b) Less than 132 KV  
c) Less than 20 KV                              d) Less than 100 KV

- 9) In any transmission line  $AD-BC = \underline{\hspace{2cm}}$ ?  
a) 1  
b) 0  
c) 2  
d) 3
- 10) The values of A, B, C and D constants for a short transmission line are respectively \_\_\_\_\_  
a) Z, 0, 1 and 1  
b) 0, 1, 1 and Z  
c) 1, Z, 0 and 1  
d) 1, 1, Z and 0
- 11) Feeder is designed mainly from the point of view of \_\_\_\_\_.  
a) Its current carrying capacity  
b) Voltage drop in it  
c) Operating voltage  
d) Operating Frequency
- 12) Which of the following distribution systems is more reliable?  
a) Radial system  
b) Tree system  
c) Ring main system  
d) All are equally reliable
- 13) In a substation the following equipment is not installed \_\_\_\_\_  
a) Exciters  
b) Series capacitors  
c) Shunt reactors  
d) Voltage transformers
- 14) Which of the following are the methods of grounding?  
a) Resistance  
b) Reactance  
c) Solid  
d) All of these

P

**S.Y. (B.Tech) (Sem - II) (New) (CBCS) Examination: Oct/Nov-2022**  
**ELECTRICAL ENGINEERING**  
**Power System II**

Day & Date: Wednesday, 08-03-2023  
 Time: 02:00 PM To 05:00 PM

Max. Marks: 56

**Instructions:** 1) All questions are compulsory.  
 2) Figures to the right indicate full marks

**Section – I**

**Q.2 Attempt any four.**

16

- Explain phenomenon of corona with advantages and disadvantages.
- A single core cable has a conductor diameter of 2.5 cm & insulation of thickness of 1.2 cm. If the specific resistance of insulation is  $4.5 \times 10^{14} \Omega \text{ cm}$ , calculate the insulation resistance per kilometre length of cable.
- Explain the concept of GMR & GMD.
- An overhead line has a span of 260 m, the weight of the line conductor is 0.68 kg per meter run. Calculate the value of maximum sag in the line if the maximum allowable tension in the line is 1550 kg.
- Explain in detail skin effect & proximity effect.
- Derive the expression for capacitance of single core cable.

**Q.3 Attempt any two.**

12

- An overhead transmission line at a river crossing is supported from two towers at heights of 40m and 90m above water level, the horizontal distance between the towers being 400m. If the maximum allowable tension is 2000kg. Find the clearance between the conductor and water at a point mid-way between the towers. Weight of conductor is 1kg/m.
- Derive the expression for inductance of single phase two wire line.
- Explain the following methods of cable grading:
  - Capacitance grading
  - Intersheath grading

**Section – II**

**Q.4 Attempt any four.**

16

- Derive an expression for voltage regulation and efficiency of short transmission line along with the equivalent circuit and phasor diagram.
- Explain different equipment used in substation.
- Write short note on connection schemes of distribution systems.
- A 3-phase, 50Hz, 150 km line has a resistance, inductive reactance and capacitive shunt admittance of  $0.1 \Omega$ ,  $0.5 \Omega$  and  $3 \times 10^{-6} \text{ S}$  per km per phase. If the line delivers 50 MW at 110 kV and 0.8 p.f. lagging, determine the sending end voltage and current. Assume a nominal  $\pi$  circuit for the line.
- Draw and explain concentrated loaded DC distributor fed at one end.
- Write short note on resistance & reactance grounding.

**Q.5 Attempt any two:**

- 1) A single phase overhead transmission line delivers 1100 kW at 33KV at 0.8p.f lagg. The total resistance and inductive reactance of the line are  $10\Omega$  and  $15\Omega$  respectively.  
Determine:
  - i) Sending end voltage
  - ii) Sending end power factor
  - iii) Transmission Efficiency
- 2) With neat diagram derive the expression for A, B, C, D constants of medium transmission line using nominal T method.
- 3) A 2 wire dc distributor 600 m long as loaded as under:  
Distance from A in meters: 150   300   350   450  
Loads in amperes:                100   200   250   300  
The feeding point A is maintained at 440 V and that of B at 430 V. If each conductor has a resistance of 0.01 ohm per 100 m.  
Calculate:
  - i) the current supplied from A to B
  - ii) the power dissipated in the distributor

 c) Shunt reactors      d) Voltage transformers
- 4) Which of the following are the methods of grounding?  
 a) Resistance      b) Reactance  
 c) Solid      d) All of these
- 5) Corona is accompanied by \_\_\_\_\_.  
 a) violet visible glow      b) hissing noise  
 c) formation of ozone gas      d) all of the above
- 6) Corona usually occurs when the electrostatic stress in the air around the conductor succeeds \_\_\_\_\_.  
 a) 30 kV (maximum value)/cm      b) 22 kV (maximum value)/cm  
 c) 11 kV (rms value)/cm      d) 6.6 kV (rms value)/cm
- 7) The sag of transmission line is least affected owing to \_\_\_\_\_.  
 a) Weight of conductor      b) Current through the conductor  
 c) Temperature      d) Ice deposited on the conductor
- 8) In a cable immediately above metallic sheath \_\_\_\_\_ is provided.  
 a) Earthing connection      b) Bedding  
 c) Armouring      d) None of the above
- 9) The process of achieving uniformity in the dielectric stress by using layers of different dielectrics is known as \_\_\_\_\_.  
 a) Stranding process      b) Grading of cables  
 c) Stress distribution      d) Capacitance grading

- 10) The thickness of the layer of insulation on the conductor, in cables, depends upon \_\_\_\_\_.
  - a) Reactive power
  - b) Power factor
  - c) Voltage
  - d) Current carrying capacity
- 11) By using which conductor is the skin effect reduced?
  - a) Bundled conductors
  - b) Stranded conductors
  - c) Hollow conductors
  - d) Solid conductors
- 12) Which of the following is correct operating voltage range for short transmission lines?
  - a) Less than 456 KV
  - b) Less than 132 KV
  - c) Less than 20 KV
  - d) Less than 100 KV
- 13) In any transmission line  $AD - BC =$  \_\_\_\_\_?
  - a) 1
  - b) 0
  - c) 2
  - d) 3
- 14) The values of A, B, C and D constants for a short transmission line are respectively \_\_\_\_\_.
  - a) Z, 0, 1 and 1
  - b) 0, 1, 1 and Z
  - c) 1, Z, 0 and 1
  - d) 1, 1, Z and 0

**S.Y. (B.Tech) (Sem - II) (New) (CBCS) Examination: Oct/Nov-2022**  
**ELECTRICAL ENGINEERING**  
**Power System II**

Day & Date: Wednesday, 08-03-2023  
 Time: 02:00 PM To 05:00 PM

Max. Marks: 56

**Instructions:** 1) All questions are compulsory.  
 2) Figures to the right indicate full marks

**Section – I**

**Q.2 Attempt any four.** **16**

- a) Explain phenomenon of corona with advantages and disadvantages.
- b) A single core cable has a conductor diameter of 2.5 cm & insulation of thickness of 1.2 cm. If the specific resistance of insulation is  $4.5 \times 10^{14} \Omega \text{ cm}$ , calculate the insulation resistance per kilometre length of cable.
- c) Explain the concept of GMR & GMD.
- d) An overhead line has a span of 260 m, the weight of the line conductor is 0.68 kg per meter run. Calculate the value of maximum sag in the line if the maximum allowable tension in the line is 1550 kg.
- e) Explain in detail skin effect & proximity effect.
- f) Derive the expression for capacitance of single core cable.

**Q.3 Attempt any two.** **12**

- 1) An overhead transmission line at a river crossing is supported from two towers at heights of 40m and 90m above water level, the horizontal distance between the towers being 400m. If the maximum allowable tension is 2000kg. Find the clearance between the conductor and water at a point mid-way between the towers. Weight of conductor is 1kg/m.
- 2) Derive the expression for inductance of single phase two wire line.
- 3) Explain the following methods of cable grading:
  - i) Capacitance grading
  - ii) Intersheath grading

**Section – II**

**Q.4 Attempt any four.** **16**

- a) Derive an expression for voltage regulation and efficiency of short transmission line along with the equivalent circuit and phasor diagram.
- b) Explain different equipment used in substation.
- c) Write short note on connection schemes of distribution systems.
- d) A 3-phase, 50Hz, 150 km line has a resistance, inductive reactance and capacitive shunt admittance of  $0.1 \Omega$ ,  $0.5 \Omega$  and  $3 \times 10^{-6} \text{ S}$  per km per phase. If the line delivers 50 MW at 110 kV and 0.8 p.f. lagging, determine the sending end voltage and current. Assume a nominal  $\pi$  circuit for the line.
- e) Draw and explain concentrated loaded DC distributor fed at one end.
- f) Write short note on resistance & reactance grounding.

**Q.5 Attempt any two:**

- 1) A single phase overhead transmission line delivers 1100 kW at 33KV at 0.8p.f lagg. The total resistance and inductive reactance of the line are  $10\Omega$  and  $15\Omega$  respectively.  
Determine:
  - i) Sending end voltage
  - ii) Sending end power factor
  - iii) Transmission Efficiency
- 2) With neat diagram derive the expression for A, B, C, D constants of medium transmission line using nominal T method.
- 3) A 2 wire dc distributor 600 m long as loaded as under:  
Distance from A in meters: 150   300   350   450  
Loads in amperes:            100   200   250   300  
The feeding point A is maintained at 440 V and that of B at 430 V. If each conductor has a resistance of 0.01 ohm per 100 m.  
Calculate:
  - i) the current supplied from A to B
  - ii) the power dissipated in the distributor

Day & Date: Wednesday, 08-03-2023  
Time: 02:00 PM To 05:00 PM

Max. Marks: 70

**Instructions:** 1) Q. No. 1 is compulsory. It should be solved in the first 30 minutes in answer book. Page no 03 (Starting page of the Answer Book). Each question carries one mark.  
2) Don't forget to Mention question paper set (P/Q/R/S) on top of page.  
3) Figures to the right indicates full marks

Duration: 30 Minutes

Marks: 14

**Q.1 Choose the correct alternatives from the options.**

14

- 1) The thickness of the layer of insulation on the conductor, in cables, depends upon \_\_\_\_\_.  
a) Reactive power                      b) Power factor  
c) Voltage                                  d) Current carrying capacity
- 2) By using which conductor is the skin effect reduced?  
a) Bundled conductors                  b) Stranded conductors  
c) Hollow conductors                  d) Solid conductors
- 3) Which of the following is correct operating voltage range for short transmission lines?  
a) Less than 456 KV                      b) Less than 132 KV  
c) Less than 20 KV                        d) Less than 100 KV
- 4) In any transmission line  $AD-BC = \underline{\hspace{2cm}}$ ?  
a) 1                                              b) 0  
c) 2                                              d) 3
- 5) The values of A, B, C and D constants for a short transmission line are respectively \_\_\_\_\_.  
a) Z, 0, 1 and 1                              b) 0, 1, 1 and Z  
c) 1, Z, 0 and 1                              d) 1, 1, Z and O
- 6) Feeder is designed mainly from the point of view of \_\_\_\_\_.  
a) Its current carrying capacity          b) Voltage drop in it  
c) Operating voltage                        d) Operating Frequency
- 7) Which of the following distribution systems is more reliable?  
a) Radial system                              b) Tree system  
c) Ring main system                        d) All are equally reliable
- 8) In a substation the following equipment is not installed \_\_\_\_\_.  
a) Exciters                                      b) Series capacitors  
c) Shunt reactors                             d) Voltage transformers

- 9) Which of the following are the methods of grounding?
  - a) Resistance
  - b) Reactance
  - c) Solid
  - d) All of these
- 10) Corona is accompanied by \_\_\_\_\_.
  - a) violet visible glow
  - b) hissing noise
  - c) formation of ozone gas
  - d) all of the above
- 11) Corona usually occurs when the electrostatic stress in the air around the conductor succeeds \_\_\_\_\_.
  - a) 30 kV (maximum value)/cm
  - b) 22 kV (maximum value)/cm
  - c) 11 kV (rms value)/cm
  - d) 6.6 kV (rms value)/cm
- 12) The sag of transmission line is least affected owing to \_\_\_\_\_.
  - a) Weight of conductor
  - b) Current through the conductor
  - c) Temperature
  - d) Ice deposited on the conductor
- 13) In a cable immediately above metallic sheath \_\_\_\_\_ is provided.
  - a) Earthing connection
  - b) Bedding
  - c) Armouring
  - d) None of the above
- 14) The process of achieving uniformity in the dielectric stress by using layers of different dielectrics is known as \_\_\_\_\_.
  - a) Stranding process
  - b) Grading of cables
  - c) Stress distribution
  - d) Capacitance grading

**MCQ/Objective Type Questions**

Duration: 30 Minutes

Marks: 14

**Q.1 Choose the correct alternatives from the options.**

**14**

- 1) If output is measured between two collectors of transistors, then the Differential amplifier with two input signal is said to be configured as
  - a) Dual Input Balanced Output      b) Dual Input Unbalanced Output
  - c) Single Input Balanced Output    d) Dual Input Unbalanced Output
- 2) In ideal Differential Amplifier, if same signal is given to both inputs, then output will be
  - a) Same as input                              b) Double the input
  - c) Not equal to zero                          d) Zero
- 3) Which is not the internal circuit of operational amplifier?
  - a) Differential amplifier                      b) Level translator
  - c) Output driver                                d) Clamper
- 4) What is the purpose of differential amplifier stage in internal circuit of Op-amp?
  - a) Low gain to differential mode signal
  - b) Cancel difference mode signal
  - c) Low gain to common mode signal
  - d) Cancel common mode signal
- 5) Calculate the output voltage for the given circuit.

- a)  $V_o = 7v$                                       b)  $V_o = 5.9v$
- c)  $V_o = 12v$                                    d)  $V_o = 11.4v$

- 6) Determine the output from the following circuit, if  $V_1 = 0V$

- a)  $180^\circ$  in phase with input signal  
 b)  $180^\circ$  out of phase with input signal  
 c) Same as that of input signal  
 d) Output signal cannot be determined
- 7) In which amplifier the output voltage is equal to the negative sum of all the inputs?  
 a) Averaging amplifier  
 b) Summing amplifier  
 c) Scaling amplifier  
 d) All of the mentioned
- 8) The logical sum of two or more logical product terms is called \_\_\_\_\_.  
 a) SOP  
 b) POS  
 c) OR operation  
 d) NAND operation
- 9) According to the property of minterm, how many combination will have value equal to 1 for K input variables?  
 a) 0  
 b) 1  
 c) 2  
 d) 3
- 10) There are \_\_\_\_\_ cells in a 4-variable K-map.  
 a) 12  
 b) 16  
 c) 18  
 d) 8
- 11) The device shown here is most likely a \_\_\_\_\_.

- a) Comparator  
 b) Multiplexer  
 c) Inverter  
 d) Demultiplexer
- 12) In S-R flip-flop, if  $Q = 0$  the output is said to be \_\_\_\_\_.  
 a) Set  
 b) Reset  
 c) Previous state  
 d) Current state
- 13) How many types of registers are?  
 a) 2  
 b) 3  
 c) 4  
 d) 5

- 14)** Registers capable of shifting in one direction is \_\_\_\_\_.
- |                             |                                  |
|-----------------------------|----------------------------------|

Day & Date: Thursday, 09-03-2023  
 Time: 02:00 PM To 05:00 PM

Max. Marks: 56

- Instructions:** 1) All questions are compulsory.  
 2) Figures to the right indicate full marks  
 3) Consider the data whenever necessary and mention the assumptions in answer.

**Section – I**

- Q.2 Attempt any four.** **16**
- Explain Differential Amplifier with differential gain.
  - Enlist idea and Practical characteristics of Op-Amp
  - Explain Common Mode Rejection ratio.
  - Explain with block diagram for voltage shunt close loop configuration.
  - Explain Subtractor with suitable diagram.
- Q.3 Solve any two.** **12**
- Explain integrator and Differentiator using Op-Amp.
  - Explain Current to Voltage converter with grounded load.
  - Draw block diagram of Op-Amp. Also explain Equivalent circuit for it with its ideal voltage transfer curve.

**Section – II**

- Q.4 Attempt any four.** **16**
- Minimize the Boolean equation using K-Map  
 $F(A,B,C,D) = \sum m(0,1,2,5,7,8,9,10,13,15)$
  - Explain 4x1 Mux with truth table.
  - Design Half Adder with truth table.
  - Explain T-Flip-flop with truth table and timing diagram.
  - Explain Ring counter with truth table and timing diagram.
- Q.5 Attempt any two:** **12**
- Design Modulus 6 Counter with state diagram.
  - Explain 4 bit Bidirectional shift register.
  - Convert JK flip-flop to D Flip-flop.

**Seat  
No.**

Max. Marks: 70

Time: 02:00 PM To 05:00 PM

Max. Marks: 70

**Instructions:** 1) Q. No. 1 is compulsory. It should be solved in the first 30 minutes in answer book. Page no 03 (Starting page of the Answer Book). Each question carries one mark.  
2) Don't forget to Mention question paper set (P/Q/R/S) on top of page.  
3) Figures to the right indicates full marks

Duration: 30 Minutes

Marks: 14

**Q.1 Choose the correct alternatives from the options.**

14

1) The device shown here is most likely a \_\_\_\_\_.

- a) Comparator
  - b) Multiplexer
  - c) Inverter
  - d) Demultiplexer
- 2) In S-R flip-flop, if  $Q = 0$  the output is said to be \_\_\_\_\_.  
a) Set- b) Reset
- c) Previous state
- d) Current state
- 3) How many types of registers are?  
a) 2- b) 3
- c) 4
- d) 5
- 4) Registers capable of shifting in one direction is \_\_\_\_\_.  
a) Universal shift register- b) Unidirectional shift register
- c) Unipolar shift register
- d) Unique shift register
- 5) If output is measured between two collectors of transistors, then the Differential amplifier with two input signal is said to be configured as  
a) Dual Input Balanced Output- b) Dual Input Unbalanced Output
- c) Single Input Balanced Output
- d) Dual Input Unbalanced Output
- 6) In ideal Differential Amplifier, if same signal is given to both inputs, then output will be  
a) Same as input- b) Double the input
- c) Not equal to zero
- d) Zero

- 7) Which is not the internal circuit of operational amplifier?  
 a) Differential amplifier                      b) Level translator  
 c) Output driver                                d) Clamper
- 8) What is the purpose of differential amplifier stage in internal circuit of Op-amp?  
 a) Low gain to differential mode signal  
 b) Cancel difference mode signal  
 c) Low gain to common mode signal  
 d) Cancel common mode signal
- 9) Calculate the output voltage for the given circuit.

- a)  $V_o = 7v$                                       b)  $V_o = 5.9v$   
 c)  $V_o = 12v$                                     d)  $V_o = 11.4v$
- 10) Determine the output from the following circuit, if  $V_1 = 0v$

- a)  $180^\circ$  in phase with input signal  
 b)  $180^\circ$  out of phase with input signal  
 c) Same as that of input signal  
 d) Output signal cannot be determined
- 11) In which amplifier the output voltage is equal to the negative sum of all the inputs?  
 a) Averaging amplifier                      b) Summing amplifier  
 c) Scaling amplifier                         d) All of the mentioned
- 12) The logical sum of two or more logical product terms is called \_\_\_\_\_.  
 a) SOP                                              b) POS  
 c) OR operation                                d) NAND operation
- 13) According to the property of minterm, how many combination will have value equal to 1 for K input variables?  
 a) 0                                                  b) 1  
 c) 2                                                  d) 3

- 14)** There are \_\_\_\_\_ cells in a 4-variable K-map.
- |       |       |
|-------|-------|
| a) 12 | b) 16 |
| c) 18 | d) 8  |

**S.Y. (B.Tech) (Sem - II) (New) (CBCS) Examination: Oct/Nov-2022**  
**ELECTRICAL ENGINEERING**  
**Analog & Digital Integrated circuits**

Day & Date: Thursday, 09-03-2023  
 Time: 02:00 PM To 05:00 PM

Max. Marks: 56

- Instructions:** 1) All questions are compulsory.  
 2) Figures to the right indicate full marks  
 3) Consider the data whenever necessary and mention the assumptions in answer.

**Section – I**

- Q.2 Attempt any four.** **16**
- Explain Differential Amplifier with differential gain.
  - Enlist idea and Practical characteristics of Op-Amp
  - Explain Common Mode Rejection ratio.
  - Explain with block diagram for voltage shunt close loop configuration.
  - Explain Subtractor with suitable diagram.
- Q.3 Solve any two.** **12**
- Explain integrator and Differentiator using Op-Amp.
  - Explain Current to Voltage converter with grounded load.
  - Draw block diagram of Op-Amp. Also explain Equivalent circuit for it with its ideal voltage transfer curve.

**Section – II**

- Q.4 Attempt any four.** **16**
- Minimize the Boolean equation using K-Map  
 $F(A,B,C,D) = \sum m(0,1,2,5,7,8,9,10,13,15)$
  - Explain 4x1 Mux with truth table.
  - Design Half Adder with truth table.
  - Explain T-Flip-flop with truth table and timing diagram.
  - Explain Ring counter with truth table and timing diagram.
- Q.5 Attempt any two:** **12**
- Design Modulus 6 Counter with state diagram.
  - Explain 4 bit Bidirectional shift register.
  - Convert JK flip-flop to D Flip-flop.

**MCQ/Objective Type Questions**

Duration: 30 Minutes

Marks: 14

**Q.1 Choose the correct alternatives from the given options.**

**14**

- 1) Kirchhoff's voltage law is related to
  - a) Battery E.M.F' s and IR drops
  - b) Battery E.M.F' s only
  - c) IR drops only
  - d) Junction currents
- 2) Four equal value resistors are connected in parallel. 5 V voltage is applied across the parallel circuit and 2.5 A current are measured from the source. What is the value of each resistor?
  - a)  $4\Omega$
  - b)  $8\Omega$
  - c)  $2.5\Omega$
  - d)  $5\Omega$
- 3) Calculate current I of the circuit shown below.

- a) 4 A
  - b) 2 A
  - c) -2 A
  - d) -4 A
- 4) Application of Thevenin's theorem to a circuit yields
  - a) Equivalent voltage source and impedance in series
  - b) Equivalent current source and impedance in parallel
  - c) Equivalent impedance
  - d) Equivalent current source
- 5) Rank of tie set matrix is
  - a) N
  - b) N-1
  - c) B-N + 1
  - d) B-N-1
- 6) The nodal method of circuit analysis is based on
  - a) KVL and ohms law
  - b) KCL and ohms law
  - c) KVL and KCL
  - d) KCL, KVL and ohms law

- 7) Superposition theorem is not applicable to network containing  
 a) nonlinear elements  
 b) dependent voltage source  
 c) dependent current source  
 d) Transformers
- 8) The time constant of RC circuit is \_\_\_\_\_.  
 a) RC  
 b) C/R  
 c) R/C  
 d) R
- 9) Laplace transform of a unit ramp function is \_\_\_\_\_.  
 a) 1  
 b) s  
 c) 1/s  
 d) 1/s<sup>2</sup>
- 10) The value of impulse function for  $t > 0$   
 a) Zero  
 b) Unity  
 c) K where k is a constant  
 d) Infinity
- 11) A capacitor does not allow sudden changes in \_\_\_\_\_.  
 a) Currents  
 b) Voltages  
 c) both a and b  
 d) none of Above
- 12) Transients are presents in the circuit when the circuit is having  
 a) R  
 b) L  
 c) C  
 d) either b) or c)
- 13) For a 2-port network to be reciprocal, \_\_\_\_\_.  
 a)  $Z_{11} = Z_{22}$   
 b)  $Y_{21} = Y_{22}$   
 c)  $h_{21} = -h_{12}$   
 d)  $AD - BC = 0$
- 14) The hybrid parameters  $h_{21}$  of the two-port network in the figure are

- a)  $-1/2$   
 b)  $1/2$   
 c)  $-3/2$   
 d)  $3/2$

**ELECTRICAL ENGINEERING**  
**Network Analysis**

Day & Date: Friday, 10-03-2023  
 Time: 02:00 PM To 05:00 PM

Max. Marks: 56

**Instructions:** 1) All questions are compulsory.  
 2) Figures to the right indicates full marks.

**Section – I****Q.2 Attempt any four.****16**

a) Obtain branch currents using mesh analysis.

b) Draw the dual of the network.

c) Derive the condition for Maximum power transfer.

d) Find the Equivalent Resistance between terminal A &amp; B.

e) Verify the Reciprocity theorem for the network shown below

**Q.3 Attempt any two.**

- a) Obtain the Thevenin's equivalent Network across terminals AB of the circuit shown in given figure.

- b) Consider the following circuit, determine node voltages  $V_1$  and  $V_2$

- c) The graph of a network shown in fig. write a) Incidence matrix b) Tie set matrix c) Cut set matrix.

**Section II****Q.4 Attempt Any Four**

- a) Determine transmission parameters for the given network.

- b) Derive an expression for response given by RL circuit.

- c) In the network shown, the switch is closed. Assuming all initial conditions as zero, find  $i$ ,  $di/dt$ ,  $d^2i/dt^2$  at  $t = 0 +$

- d) Derive Y-Parameter in terms of Z parameters.  
 e) In the network shown in fig. the switch is moved from 1 to 2 at  $t = 0$ . Steady state condition having reached in position 1. Determine  $i(t)$  for  $t > 0$  using Laplace transforms.

### Q.5 Attempt Any Two

12

- a) In the network of fig. the switch is moved from a to b at  $t = 0$ . Determine  $i(t)$  and  $V_c(t)$  using Laplace transform.

- b) Find Y parameter for the two-port network shown.

- c) For the Network shown in Fig. Switch is closed at  $t = 0$ , determine  $v$ ,  $dv/dt$  and  $d^2v/dt^2$  at  $t = 0 +$

- c) In the network shown, the switch is closed. Assuming all initial conditions as zero, find  $i$ ,  $di/dt$ ,  $d^2i/dt^2$  at  $t = 0 +$

- d) Derive Y-Parameter in terms of Z parameters.  
 e) In the network shown in fig. the switch is moved from 1 to 2 at  $t = 0$ . Steady state condition having reached in position 1. Determine  $i(t)$  for  $t > 0$  using Laplace transforms.

### Q.5 Attempt Any Two

12

- a) In the network of fig. the switch is moved from a to b at  $t = 0$ . Determine  $i(t)$  and  $V_c(t)$  using Laplace transform.

- b) Find Y parameter for the two-port network shown.

- c) For the Network shown in Fig. Switch is closed at  $t = 0$ , determine  $v$ ,  $dv/dt$  and  $d^2v/dt^2$  at  $t = 0 +$

Max. Marks: 70

- Instructions:** 1) Q. No. 1 is compulsory. It should be solved in the first 30 minutes in answer book. Page no 03 (Starting page of the Answer Book). Each question carries one mark.  
 2) Don't forget to Mention question paper set (P/Q/R/S) on top of page.  
 3) Figures to the right indicates full marks.  
 4) Use of non-programmable calculator is allowed.

**MCQ/Objective Type Questions**

Duration: 30 Minutes

Marks: 14

**Q.1 Choose the correct alternatives from the options.**

**14**

- 1) In solving simultaneous linear equation which of the following method is iterative?
 

|                  |                 |
|------------------|-----------------|
| a) Factorisation | b) Jacobi       |
| c) Gauss-Seidel  | d) Both b and c |
- 2) Error in the Trapezoidal rule is of the order \_\_\_\_\_.
 

|          |          |
|----------|----------|
| a) $h^2$ | b) $h^3$ |
| c) $h^4$ | d) $h^5$ |
- 3) If  $\frac{dy}{dx} = x^2 + y^2$  and  $y(0) = 1$  then Picard's first approximation is \_\_\_\_\_.
 

|                            |                            |
|----------------------------|----------------------------|
| a) $1 + x$                 | b) $x + \frac{x^3}{3}$     |
| c) $1 + x - \frac{x^3}{3}$ | d) $1 + x + \frac{x^3}{3}$ |
- 4) Romberg method is used to solve \_\_\_\_\_.
 

|                                    |                 |
|------------------------------------|-----------------|
| a) Ordinary differential equations | b) Integration  |
| c) Partial differential equations  | d) All of these |
- 5) The quantity K obtained by Runge-Kutta method of fourth order for differential equation  $\frac{dy}{dx} = x^2 + y^2$  and  $y(0) = 1$  when  $h = 0.1$  is \_\_\_\_\_.
 

|        |         |
|--------|---------|
| a) 0.1 | b) 0    |
| c) 1   | d) 0.01 |
- 6) LU decomposition of matrix is possible only for \_\_\_\_\_.
 

|                      |                    |
|----------------------|--------------------|
| a) Invertible matrix | b) Singular matrix |
| c) Square matrix     | d) Ordered matrix  |
- 7) The order of convergence of Newton -Raphson method is \_\_\_\_\_.
 

|      |      |
|------|------|
| a) 3 | b) 2 |
| c) 1 | d) 0 |
- 8) If all eigen values are negative then the quadratic form  $X'AX$  is \_\_\_\_\_.
 

|                      |                      |
|----------------------|----------------------|
| a) Positive definite | b) Negative definite |
| c) Indefinite        | d) None              |

- 9)**  $\|v\| = \sqrt{v \cdot v}$
- a) True                                      b) False
- 10)** If  $u = \begin{bmatrix} 7 \\ 1 \end{bmatrix}, v = \begin{bmatrix} 3 \\ 2 \end{bmatrix}$  then  $\|u - v\|$
- a)  $\sqrt{7}$                                       b)  $\sqrt{17}$   
c)  $\sqrt{71}$                                     d)  $\sqrt{70}$
- 11)** -2 is the eigen values of A where  $A = \begin{bmatrix} 2 & 4 & 3 \\ -4 & -6 & -3 \\ 3 & 3 & 1 \end{bmatrix}$
- a) True                                      b) False
- 12)** Let A be an  $n \times n$  invertible matrix then which of the following is not true \_\_\_\_\_
- a) The columns of A form a basis of  $R^n$   
b) The rows of A form a basis of  $R^n$   
c) Rank A = n  
d) NulA  $\neq \{0\}$
- 13)** If a system of equations has no free variables then it has \_\_\_\_\_.  
a) Unique solution                      b) No solution  
c) Infinite solution                      d) None
- 14)** Power method is used to find \_\_\_\_\_.  
a) Smallest eigen values              b) Zero Eigen values  
c) Largest eigen values                d) None

**S.Y. (B.Tech.) (Sem - II) (New) (CBCS) Examination: Oct/Nov-2022**  
**ELECTRICAL ENGINEERING**  
**Numerical Methods and Linear Algebra**

Day & Date: Tuesday, 14-03-2023  
 Time: 02:00 PM To 05:00 PM

Max. Marks: 56

**Instructions:** 1) Figures to the right indicates full marks.  
 2) Use of non-programmable calculator is allowed.

**Section – I**

**Q.2 Solve any three of the following.** **09**

- Evaluate  $I = \int_0^1 \frac{1}{1+x} dx$  correct to three decimal places by Trapezoidal rule taking  $h = 0.25$
- Find a real root of the equation  $x \sin x + \cos x = 0$  by Newton Raphson method (Take  $x_0 = \pi$ )
- Find a double root of the equation  $f(x) = x^3 - x^2 - x + 1 = 0$  choosing  $x_0 = 0.8$
- Evaluate  $I = \int_0^1 \frac{x^2}{1+x^2} dx$  using Simpson's  $\frac{3}{8}$  th rule.
- Apply Runge-Kutta method of fourth order to find an approximate value of  $y$  when  $x = 0.2$  given that  $\frac{dy}{dx} = x + y$  and  $y(0) = 1$

**Q.3 Solve any three of the following.** **09**

- Solve the system by Gauss-Elimination method.  
 $x - y + z = 1, -3x - 2y - 3z = -6, 2x - 5y + 4z = 5$
- Solve by Picard's method  $\frac{dy}{dx} = 1 + xy$  and  $y(2) = 0$  up to third approximation.
- Find an iterative formula for  $\sqrt{N}$  (where  $N$  is a Positive number) and hence find  $\sqrt{5}$
- Solve by Gauss-Seidel method  
 $10x - 5y - 2z = 3, 4x - 10y + 3z = -3, x + 6y + 10z = -3$
- Evaluate  $I = \int_0^1 \frac{1}{1+x} dx$  by Gaussian quadrature three-point formula.

**Q.4 Solve any two of the following.** **10**

- Apply factorisation method to solve the equations  
 $3x + 2y + 7z = 4, 2x + 3y + z = 5, 3x + 4y + z = 7$
- Evaluate  $I = \int_0^1 \frac{1}{1+x^2} dx$  using Romberg method, hence obtain an approximate value of  $\pi$
- Solve the differential equation  $\frac{dy}{dx} = 1 + xz, \frac{dz}{dx} = -xy$  for  $x = 0.3$ . Using fourth order Runge-Kutta method and initial values are  $x = 0, y = 0, z = 1$ .

## Section II

09

**Q.5 Solve any three of the following.**

- a) Determine the rank of matrix A.

$$A = \begin{bmatrix} 2 & -3 & 6 & 5 \\ -2 & 3 & -3 & -4 \\ 4 & -6 & 5 & 9 \\ -2 & 3 & -4 & 1 \end{bmatrix}$$

- b) Find the bases for the row space of the matrix A.

$$A = \begin{bmatrix} -2 & -5 & 8 & 0 & -17 \\ 1 & 3 & -5 & 1 & 5 \\ 3 & 11 & -19 & 7 & 1 \\ 1 & 7 & -13 & 5 & -3 \end{bmatrix}$$

- c) Compute quadratic form
- $X'AX$
- for
- $A = \begin{bmatrix} 3 & 2 & 0 \\ 2 & 2 & 2 \\ 0 & 2 & 1 \end{bmatrix}$
- and
- $X = \begin{bmatrix} x \\ y \\ z \end{bmatrix}$

Also find eigen values of quadratic form  $X'AX$ 

- d) Determine whether the vectors are dependent or independent.

$$v_1 = \begin{bmatrix} 3 \\ 0 \\ -6 \end{bmatrix} \quad v_2 = \begin{bmatrix} -4 \\ 1 \\ 7 \end{bmatrix} \quad v_3 = \begin{bmatrix} -2 \\ 1 \\ 5 \end{bmatrix}$$

- e) Assume that T is linear transformation. Find standard matrix of
- $T: \mathbb{R}^3 \rightarrow \mathbb{R}^2$
- defined by
- $T(e_1) = (1,3)$
- $T(e_2) = (4,-7)$
- $T(e_3) = (-5,4)$

**Q.6 Solve any three of the following.**

09

- a) Determine whether the vectors are orthogonal if orthogonal Normalize the vector to

$$\text{Produce the orthonormal set } \mu = \begin{bmatrix} -2 \\ 3 \\ 1 \\ 3 \\ 2 \\ 3 \end{bmatrix} \quad v = \begin{bmatrix} 1 \\ 3 \\ 2 \\ 3 \\ 0 \end{bmatrix}$$

- b) Show that
- $\{v_1, v_2, v_3\}$
- is orthonormal basis for
- $\mathbb{R}^3$
- where

$$v_1 = \begin{bmatrix} \frac{1}{\sqrt{10}} \\ \frac{3}{\sqrt{20}} \\ \frac{3}{\sqrt{20}} \end{bmatrix} \quad v_2 = \begin{bmatrix} \frac{3}{\sqrt{10}} \\ \frac{-1}{\sqrt{20}} \\ \frac{-1}{\sqrt{20}} \end{bmatrix} \quad v_3 = \begin{bmatrix} 0 \\ \frac{-1}{\sqrt{20}} \\ \frac{1}{\sqrt{20}} \end{bmatrix}$$

- c) Describe all solutions of
- $AX = B$
- where
- $A = \begin{bmatrix} 3 & 5 & -4 \\ -3 & -2 & 4 \\ 6 & 1 & 8 \end{bmatrix}$
- $b = \begin{bmatrix} 7 \\ -1 \\ -4 \end{bmatrix}$

- d) Let
- $b_1 = \begin{bmatrix} 2 \\ 1 \end{bmatrix}$
- ,
- $b_2 = \begin{bmatrix} -1 \\ 1 \end{bmatrix}$
- ,
- $x = \begin{bmatrix} 4 \\ 5 \end{bmatrix}$
- &
- $B = \{b_1, b_2\}$
- Find the co-ordinate vector
- $[X]_B$
- of X relative to B.

e) Let  $A = \begin{bmatrix} 2 & 4 & -2 & 1 \\ -2 & -5 & 7 & 3 \\ 3 & 7 & -8 & 6 \end{bmatrix}$  and  $u = \begin{bmatrix} 3 \\ -2 \\ -1 \\ 0 \end{bmatrix}$   $v = \begin{bmatrix} 3 \\ -1 \\ 3 \end{bmatrix}$

Is  $u$  in  $\text{Nul}A$ ?

Is  $v$  in  $\text{Col}A$ ?

**Q.7 Solve any two of the following.**

**10**

- a) Find the numerically largest eigen values of  $A$  by Power method.

$$A = \begin{bmatrix} 1 & 6 & 1 \\ 1 & 2 & 0 \\ 0 & 0 & 3 \end{bmatrix} \quad x_0 = \begin{bmatrix} 1 \\ 0 \\ 0 \end{bmatrix}$$

- b) If possible, diagonalize the matrix  $A$

$$A = \begin{bmatrix} 6 & -2 & -1 \\ -2 & 6 & -1 \\ -1 & -1 & 5 \end{bmatrix}$$

- c) Find the dimension of  $\text{Nul}A$  &  $\text{Col}A$  of matrix  $A$  where

$$A = \begin{bmatrix} 1 & 2 & -4 & 3 & 3 \\ 5 & 10 & -9 & -7 & 8 \\ 4 & 8 & -9 & -2 & 7 \\ -2 & -4 & 5 & 0 & 6 \end{bmatrix}$$

Day & Date: Tuesday, 14-03-2023  
 Time: 02:00 PM To 05:00 PM

Max. Marks: 56

**Instructions:** 1) Figures to the right indicates full marks.  
 2) Use of non-programmable calculator is allowed.

**Section – I**

**Q.2 Solve any three of the following.** **09**

- Evaluate  $I = \int_0^1 \frac{1}{1+x} dx$  correct to three decimal places by Trapezoidal rule taking  $h = 0.25$
- Find a real root of the equation  $x \sin x + \cos x = 0$  by Newton Raphson method (Take  $x_0 = \pi$ )
- Find a double root of the equation  $f(x) = x^3 - x^2 - x + 1 = 0$  choosing  $x_0 = 0.8$
- Evaluate  $I = \int_0^1 \frac{x^2}{1+x^2} dx$  using Simpson's  $\frac{3}{8}$  th rule.
- Apply Runge-Kutta method of fourth order to find an approximate value of  $y$  when  $x = 0.2$  given that  $\frac{dy}{dx} = x + y$  and  $y(0) = 1$

**Q.3 Solve any three of the following.** **09**

- Solve the system by Gauss-Elimination method.  
 $x - y + z = 1, -3x - 2y - 3z = -6, 2x - 5y + 4z = 5$
- Solve by Picard's method  $\frac{dy}{dx} = 1 + xy$  and  $y(2) = 0$  up to third approximation.
- Find an iterative formula for  $\sqrt{N}$  (where  $N$  is a Positive number) and hence find  $\sqrt{5}$
- Solve by Gauss-Seidel method  
 $10x - 5y - 2z = 3, 4x - 10y + 3z = -3, x + 6y + 10z = -3$
- Evaluate  $I = \int_0^1 \frac{1}{1+x} dx$  by Gaussian quadrature three-point formula.

**Q.4 Solve any two of the following.** **10**

- Apply factorisation method to solve the equations  
 $3x + 2y + 7z = 4, 2x + 3y + z = 5, 3x + 4y + z = 7$
- Evaluate  $I = \int_0^1 \frac{1}{1+x^2} dx$  using Romberg method, hence obtain an approximate value of  $\pi$
- Solve the differential equation  $\frac{dy}{dx} = 1 + xz, \frac{dz}{dx} = -xy$  for  $x = 0.3$ . Using fourth order Runge-Kutta method and initial values are  $x = 0, y = 0, z = 1$ .

## Section II

09

**Q.5 Solve any three of the following.****a)** Determine the rank of matrix A.

$$A = \begin{bmatrix} 2 & -3 & 6 & 5 \\ -2 & 3 & -3 & -4 \\ 4 & -6 & 5 & 9 \\ -2 & 3 & -4 & 1 \end{bmatrix}$$

**b)** Find the bases for the row space of the matrix A.

$$A = \begin{bmatrix} -2 & -5 & 8 & 0 & -17 \\ 1 & 3 & -5 & 1 & 5 \\ 3 & 11 & -19 & 7 & 1 \\ 1 & 7 & -13 & 5 & -3 \end{bmatrix}$$

**c)** Compute quadratic form  $X'AX$  for  $A = \begin{bmatrix} 3 & 2 & 0 \\ 2 & 2 & 2 \\ 0 & 2 & 1 \end{bmatrix}$  and  $X = \begin{bmatrix} x \\ y \\ z \end{bmatrix}$ Also find eigen values of quadratic form  $X'AX$ **d)** Determine whether the vectors are dependent or independent.

$$v_1 = \begin{bmatrix} 3 \\ 0 \\ -6 \end{bmatrix} \quad v_2 = \begin{bmatrix} -4 \\ 1 \\ 7 \end{bmatrix} \quad v_3 = \begin{bmatrix} -2 \\ 1 \\ 5 \end{bmatrix}$$

**e)** Assume that T is linear transformation. Find standard matrix of  $T: \mathbb{R}^3 \rightarrow \mathbb{R}^2$  defined by  $T(e_1) = (1,3)$   $T(e_2) = (4,-7)$   $T(e_3) = (-5,4)$ **Q.6 Solve any three of the following.**

09

**a)** Determine whether the vectors are orthogonal if orthogonal Normalize the vector to

$$\text{Produce the orthonormal set } \mu = \begin{bmatrix} -2 \\ 3 \\ 1 \\ 3 \\ 2 \\ \frac{1}{3} \end{bmatrix} \quad v = \begin{bmatrix} 1 \\ 3 \\ 2 \\ 3 \\ 0 \end{bmatrix}$$

**b)** Show that  $\{v_1, v_2, v_3\}$  is orthonormal basis for  $\mathbb{R}^3$  where

$$v_1 = \begin{bmatrix} \frac{1}{\sqrt{10}} \\ \frac{3}{\sqrt{20}} \\ \frac{3}{\sqrt{20}} \end{bmatrix} \quad v_2 = \begin{bmatrix} \frac{3}{\sqrt{10}} \\ \frac{-1}{\sqrt{20}} \\ \frac{-1}{\sqrt{20}} \end{bmatrix} \quad v_3 = \begin{bmatrix} 0 \\ \frac{-1}{\sqrt{20}} \\ \frac{1}{\sqrt{20}} \end{bmatrix}$$

**c)** Describe all solutions of  $AX = B$  where  $A = \begin{bmatrix} 3 & 5 & -4 \\ -3 & -2 & 4 \\ 6 & 1 & 8 \end{bmatrix}$   $b = \begin{bmatrix} 7 \\ -1 \\ -4 \end{bmatrix}$ **d)** Let  $b_1 = \begin{bmatrix} 2 \\ 1 \end{bmatrix}$ ,  $b_2 = \begin{bmatrix} -1 \\ 1 \end{bmatrix}$ ,  $x = \begin{bmatrix} 4 \\ 5 \end{bmatrix}$  &  $B = \{b_1, b_2\}$  Find the co-ordinate vector  $[X]_B$  of X relative to B.

e) Let  $A = \begin{bmatrix} 2 & 4 & -2 & 1 \\ -2 & -5 & 7 & 3 \\ 3 & 7 & -8 & 6 \end{bmatrix}$  and  $u = \begin{bmatrix} 3 \\ -2 \\ -1 \\ 0 \end{bmatrix}$   $v = \begin{bmatrix} 3 \\ -1 \\ 3 \end{bmatrix}$

Is  $u$  is in NulA?

Is  $v$  is in ColA?

**Q.7 Solve any two of the following.**

**10**

- a) Find the numerically largest eigen values of A by Power method.

$$A = \begin{bmatrix} 1 & 6 & 1 \\ 1 & 2 & 0 \\ 0 & 0 & 3 \end{bmatrix} \quad x_0 = \begin{bmatrix} 1 \\ 0 \\ 0 \end{bmatrix}$$

- b) If possible, diagonalize the matrix A

$$A = \begin{bmatrix} 6 & -2 & -1 \\ -2 & 6 & -1 \\ -1 & -1 & 5 \end{bmatrix}$$

- c) Find the dimension of NulA & ColA of matrix A where

$$A = \begin{bmatrix} 1 & 2 & -4 & 3 & 3 \\ 5 & 10 & -9 & -7 & 8 \\ 4 & 8 & -9 & -2 & 7 \\ -2 & -4 & 5 & 0 & 6 \end{bmatrix}$$

**Q.1 Choose the correct alternatives from the options.**

14

- 1) -2 is the eigen values of A where  $A = \begin{bmatrix} 2 & 4 & 3 \\ -4 & -6 & -3 \\ 3 & 3 & 1 \end{bmatrix}$ 
  - a) True
  - b) False
- 2) Let A be an  $n \times n$  invertible matrix then which of the following is not true \_\_\_\_\_
  - a) The columns of A form a basis of  $R^n$
  - b) The rows of A form a basis of  $R^n$
  - c) Rank A = n
  - d)  $\text{Nul}A \neq \{0\}$
- 3) If a system of equations has no free variables then it has \_\_\_\_\_.
  - a) Unique solution
  - b) No solution
  - c) Infinite solution
  - d) None
- 4) Power method is used to find \_\_\_\_\_.
  - a) Smallest eigen values
  - b) Zero Eigen values
  - c) Largest eigen values
  - d) None
- 5) In solving simultaneous linear equation which of the following method is iterative?
  - a) Factorisation
  - b) Jacobi
  - c) Gauss-Seidel
  - d) Both b and c
- 6) Error in the Trapezoidal rule is of the order \_\_\_\_\_.
  - a)  $h^2$
  - b)  $h^3$
  - c)  $h^4$
  - d)  $h^5$
- 7) If  $\frac{dy}{dx} = x^2 + y^2$  and  $y(0) = 1$  then Picard's first approximation is \_\_\_\_\_.
  - a)  $1 + x$
  - b)  $x + \frac{x^3}{3}$
  - c)  $1 + x - \frac{x^3}{3}$
  - d)  $1 + x + \frac{x^3}{3}$

- 8) Romberg method is used to solve \_\_\_\_\_.  
a) Ordinary differential equations    b) Integration  
c) Partial differential equations    d) All of these
- 9) The quantity K obtained by Runge-Kutta method of fourth order for differential equation  $\frac{dy}{dx} = x^2 + y^2$  and  $y(0) = 1$  when  $h = 0.1$  is \_\_\_\_\_.  
a) 0.1    b) 0  
c) 1    d) 0.01
- 10) LU decomposition of matrix is possible only for \_\_\_\_\_.  
a) Invertible matrix    b) Singular matrix  
c) Square matrix    d) Ordered matrix
- 11) The order of convergence of Newton -Raphson method is \_\_\_\_\_.  
a) 3    b) 2  
c) 1    d) 0
- 12) If all eigen values are negative then the quadratic form  $X'AX$  is \_\_\_\_\_.  
a) Positive definite    b) Negative definite  
c) Indefinite    d) None
- 13)  $||v|| = \sqrt{v \cdot v}$   
a) True    b) False
- 14) If  $u = \begin{bmatrix} 7 \\ 1 \end{bmatrix}$ ,  $v = \begin{bmatrix} 3 \\ 2 \end{bmatrix}$  then  $\|u - v\|$   
a)  $\sqrt{7}$     b)  $\sqrt{17}$   
c)  $\sqrt{71}$     d)  $\sqrt{70}$

Set **R**

**S.Y. (B.Tech.) (Sem - II) (New) (CBCS) Examination: Oct/Nov-2022**  
**ELECTRICAL ENGINEERING**  
**Numerical Methods and Linear Algebra**

Day & Date: Tuesday, 14-03-2023  
 Time: 02:00 PM To 05:00 PM

Max. Marks: 56

**Instructions:** 1) Figures to the right indicates full marks.  
 2) Use of non-programmable calculator is allowed.

**Section – I**

**Q.2 Solve any three of the following.** **09**

- Evaluate  $I = \int_0^1 \frac{1}{1+x} dx$  correct to three decimal places by Trapezoidal rule taking  $h = 0.25$
- Find a real root of the equation  $x \sin x + \cos x = 0$  by Newton Raphson method (Take  $x_0 = \pi$ )
- Find a double root of the equation  $f(x) = x^3 - x^2 - x + 1 = 0$  choosing  $x_0 = 0.8$
- Evaluate  $I = \int_0^1 \frac{x^2}{1+x^2} dx$  using Simpson's  $\frac{3}{8}$  th rule.
- Apply Runge-Kutta method of fourth order to find an approximate value of  $y$  when  $x = 0.2$  given that  $\frac{dy}{dx} = x + y$  and  $y(0) = 1$

**Q.3 Solve any three of the following.** **09**

- Solve the system by Gauss-Elimination method.  
 $x - y + z = 1, -3x - 2y - 3z = -6, 2x - 5y + 4z = 5$
- Solve by Picard's method  $\frac{dy}{dx} = 1 + xy$  and  $y(2) = 0$  up to third approximation.
- Find an iterative formula for  $\sqrt{N}$  (where  $N$  is a Positive number) and hence find  $\sqrt{5}$
- Solve by Gauss-Seidel method  
 $10x - 5y - 2z = 3, 4x - 10y + 3z = -3, x + 6y + 10z = -3$
- Evaluate  $I = \int_0^1 \frac{1}{1+x} dx$  by Gaussian quadrature three-point formula.

**Q.4 Solve any two of the following.** **10**

- Apply factorisation method to solve the equations  
 $3x + 2y + 7z = 4, 2x + 3y + z = 5, 3x + 4y + z = 7$
- Evaluate  $I = \int_0^1 \frac{1}{1+x^2} dx$  using Romberg method, hence obtain an approximate value of  $\pi$
- Solve the differential equation  $\frac{dy}{dx} = 1 + xz, \frac{dz}{dx} = -xy$  for  $x = 0.3$ . Using fourth order Runge-Kutta method and initial values are  $x = 0, y = 0, z = 1$ .

## Section II

09

**Q.5 Solve any three of the following.****a)** Determine the rank of matrix A.

$$A = \begin{bmatrix} 2 & -3 & 6 & 5 \\ -2 & 3 & -3 & -4 \\ 4 & -6 & 5 & 9 \\ -2 & 3 & -4 & 1 \end{bmatrix}$$

**b)** Find the bases for the row space of the matrix A.

$$A = \begin{bmatrix} -2 & -5 & 8 & 0 & -17 \\ 1 & 3 & -5 & 1 & 5 \\ 3 & 11 & -19 & 7 & 1 \\ 1 & 7 & -13 & 5 & -3 \end{bmatrix}$$

**c)** Compute quadratic form  $X'AX$  for  $A = \begin{bmatrix} 3 & 2 & 0 \\ 2 & 2 & 2 \\ 0 & 2 & 1 \end{bmatrix}$  and  $X = \begin{bmatrix} x \\ y \\ z \end{bmatrix}$ Also find eigen values of quadratic form  $X'AX$ **d)** Determine whether the vectors are dependent or independent.

$$v_1 = \begin{bmatrix} 3 \\ 0 \\ -6 \end{bmatrix} \quad v_2 = \begin{bmatrix} -4 \\ 1 \\ 7 \end{bmatrix} \quad v_3 = \begin{bmatrix} -2 \\ 1 \\ 5 \end{bmatrix}$$

**e)** Assume that T is linear transformation. Find standard matrix of  $T: \mathbb{R}^3 \rightarrow \mathbb{R}^2$  defined by  $T(e_1) = (1,3)$   $T(e_2) = (4,-7)$   $T(e_3) = (-5,4)$ **Q.6 Solve any three of the following.**

09

**a)** Determine whether the vectors are orthogonal if orthogonal Normalize the vector to

$$\text{Produce the orthonormal set } \mu = \begin{bmatrix} -2 \\ 3 \\ 1 \\ 3 \\ 2 \\ 3 \end{bmatrix} \quad v = \begin{bmatrix} 1 \\ 3 \\ 2 \\ 3 \\ 0 \end{bmatrix}$$

**b)** Show that  $\{v_1, v_2, v_3\}$  is orthonormal basis for  $\mathbb{R}^3$  where

$$v_1 = \begin{bmatrix} \frac{1}{\sqrt{10}} \\ \frac{3}{\sqrt{20}} \\ \frac{3}{\sqrt{20}} \end{bmatrix} \quad v_2 = \begin{bmatrix} \frac{3}{\sqrt{10}} \\ \frac{-1}{\sqrt{20}} \\ \frac{-1}{\sqrt{20}} \end{bmatrix} \quad v_3 = \begin{bmatrix} 0 \\ \frac{-1}{\sqrt{20}} \\ \frac{1}{\sqrt{20}} \end{bmatrix}$$

**c)** Describe all solutions of  $AX = B$  where  $A = \begin{bmatrix} 3 & 5 & -4 \\ -3 & -2 & 4 \\ 6 & 1 & 8 \end{bmatrix}$   $b = \begin{bmatrix} 7 \\ -1 \\ -4 \end{bmatrix}$ **d)** Let  $b_1 = \begin{bmatrix} 2 \\ 1 \end{bmatrix}$ ,  $b_2 = \begin{bmatrix} -1 \\ 1 \end{bmatrix}$ ,  $x = \begin{bmatrix} 4 \\ 5 \end{bmatrix}$  &  $B = \{b_1, b_2\}$  Find the co-ordinate vector  $[X]_B$  of X relative to B.

e) Let  $A = \begin{bmatrix} 2 & 4 & -2 & 1 \\ -2 & -5 & 7 & 3 \\ 3 & 7 & -8 & 6 \end{bmatrix}$  and  $u = \begin{bmatrix} 3 \\ -2 \\ -1 \\ 0 \end{bmatrix}$   $v = \begin{bmatrix} 3 \\ -1 \\ 3 \end{bmatrix}$

Is  $u$  in  $\text{Nul}A$ ?

Is  $v$  in  $\text{Col}A$ ?

**Q.7 Solve any two of the following.**

**10**

- a) Find the numerically largest eigen values of  $A$  by Power method.

$$A = \begin{bmatrix} 1 & 6 & 1 \\ 1 & 2 & 0 \\ 0 & 0 & 3 \end{bmatrix} \quad x_0 = \begin{bmatrix} 1 \\ 0 \\ 0 \end{bmatrix}$$

- b) If possible, diagonalize the matrix  $A$

$$A = \begin{bmatrix} 6 & -2 & -1 \\ -2 & 6 & -1 \\ -1 & -1 & 5 \end{bmatrix}$$

- c) Find the dimension of  $\text{Nul}A$  &  $\text{Col}A$  of matrix  $A$  where

$$A = \begin{bmatrix} 1 & 2 & -4 & 3 & 3 \\ 5 & 10 & -9 & -7 & 8 \\ 4 & 8 & -9 & -2 & 7 \\ -2 & -4 & 5 & 0 & 6 \end{bmatrix}$$

Day & Date: Tuesday, 14-03-2023  
 Time: 02:00 PM To 05:00 PM

Max. Marks: 70

- Instructions:** 1) Q. No. 1 is compulsory. It should be solved in the first 30 minutes in answer book. Page no 03 (Starting page of the Answer Book). Each question carries one mark.  
 2) Don't forget to Mention question paper set (P/Q/R/S) on top of page.  
 3) Figures to the right indicates full marks.  
 4) Use of non-programmable calculator is allowed.

**MCQ/Objective Type Questions**

Duration: 30 Minutes

Marks: 14

**Q.1 Choose the correct alternatives from the options.**

**14**

- 1) LU decomposition of matrix is possible only for \_\_\_\_\_.  
 a) Invertible matrix                      b) Singular matrix  
 c) Square matrix                          d) Ordered matrix
- 2) The order of convergence of Newton -Raphson method is \_\_\_\_\_.  
 a) 3                                              b) 2  
 c) 1                                              d) 0
- 3) If all eigen values are negative then the quadratic form  $X'AX$  is \_\_\_\_\_.  
 a) Positive definite                      b) Negative definite  
 c) Indefinite                              d) None
- 4)  $\|v\| = \sqrt{v \cdot v}$   
 a) True                                          b) False
- 5) If  $u = \begin{bmatrix} 7 \\ 1 \end{bmatrix}$ ,  $v = \begin{bmatrix} 3 \\ 2 \end{bmatrix}$  then  $\|u - v\|$   
 a)  $\sqrt{7}$                                           b)  $\sqrt{17}$   
 c)  $\sqrt{71}$                                           d)  $\sqrt{70}$
- 6) -2 is the eigen values of A where  $A = \begin{bmatrix} 2 & 4 & 3 \\ -4 & -6 & -3 \\ 3 & 3 & 1 \end{bmatrix}$   
 a) True                                          b) False
- 7) Let A be an  $n \times n$  invertible matrix then which of the following is not true \_\_\_\_\_.  
 a) The columns of A form a basis of  $R^n$   
 b) The rows of A form a basis of  $R^n$   
 c) Rank A = n  
 d)  $\text{Nul}A \neq \{0\}$
- 8) If a system of equations has no free variables then it has \_\_\_\_\_.  
 a) Unique solution                      b) No solution  
 c) Infinite solution                      d) None

- 9) Power method is used to find \_\_\_\_\_.  
a) Smallest eigen values                      b) Zero Eigen values  
c) Largest eigen values                      d) None
- 10) In solving simultaneous linear equation which of the following method is iterative?  
a) Factorisation                                      b) Jacobi  
c) Gauss-Seidel                                      d) Both b and c
- 11) Error in the Trapezoidal rule is of the order \_\_\_\_\_.  
a)  $h^2$                                                       b)  $h^3$   
c)  $h^4$                                                       d)  $h^5$
- 12) If  $\frac{dy}{dx} = x^2 + y^2$  and  $y(0) = 1$  then Picard's first approximation is \_\_\_\_\_.  
a)  $1 + x$                                                       b)  $x + \frac{x^3}{3}$   
c)  $1 + x - \frac{x^3}{3}$                                                       d)  $1 + x + \frac{x^3}{3}$
- 13) Romberg method is used to solve \_\_\_\_\_.  
a) Ordinary differential equations              b) Integration  
c) Partial differential equations              d) All of these
- 14) The quantity K obtained by Runge-Kutta method of fourth order for differential equation  $\frac{dy}{dx} = x^2 + y^2$  and  $y(0) = 1$  when  $h = 0.1$  is \_\_\_\_\_.  
a) 0.1                                                      b) 0  
c) 1                                                      d) 0.01

**Q.3 Solve any three of the following.** **09**

- Solve the system by Gauss-Elimination method.  
 $x - y + z = 1, -3x - 2y - 3z = -6, 2x - 5y + 4z = 5$
- Solve by Picard's method  $\frac{dy}{dx} = 1 + xy$  and  $y(2) = 0$  up to third approximation.
- Find an iterative formula for  $\sqrt{N}$  (where  $N$  is a Positive number) and hence find  $\sqrt{5}$
- Solve by Gauss-Seidel method  
 $10x - 5y - 2z = 3, 4x - 10y + 3z = -3, x + 6y + 10z = -3$
- Evaluate  $I = \int_0^1 \frac{1}{1+x} dx$  by Gaussian quadrature three-point formula.

**Q.4 Solve any two of the following.** **10**

- Apply factorisation method to solve the equations  
 $3x + 2y + 7z = 4, 2x + 3y + z = 5, 3x + 4y + z = 7$
- Evaluate  $I = \int_0^1 \frac{1}{1+x^2} dx$  using Romberg method, hence obtain an approximate value of  $\pi$
- Solve the differential equation  $\frac{dy}{dx} = 1 + xz, \frac{dz}{dx} = -xy$  for  $x = 0.3$ . Using fourth order Runge-Kutta method and initial values are  $x = 0, y = 0, z = 1$ .

## Section II

09

**Q.5 Solve any three of the following.****a)** Determine the rank of matrix A.

$$A = \begin{bmatrix} 2 & -3 & 6 & 5 \\ -2 & 3 & -3 & -4 \\ 4 & -6 & 5 & 9 \\ -2 & 3 & -4 & 1 \end{bmatrix}$$

**b)** Find the bases for the row space of the matrix A.

$$A = \begin{bmatrix} -2 & -5 & 8 & 0 & -17 \\ 1 & 3 & -5 & 1 & 5 \\ 3 & 11 & -19 & 7 & 1 \\ 1 & 7 & -13 & 5 & -3 \end{bmatrix}$$

**c)** Compute quadratic form  $X'AX$  for  $A = \begin{bmatrix} 3 & 2 & 0 \\ 2 & 2 & 2 \\ 0 & 2 & 1 \end{bmatrix}$  and  $X = \begin{bmatrix} x \\ y \\ z \end{bmatrix}$ Also find eigen values of quadratic form  $X'AX$ **d)** Determine whether the vectors are dependent or independent.

$$v_1 = \begin{bmatrix} 3 \\ 0 \\ -6 \end{bmatrix} \quad v_2 = \begin{bmatrix} -4 \\ 1 \\ 7 \end{bmatrix} \quad v_3 = \begin{bmatrix} -2 \\ 1 \\ 5 \end{bmatrix}$$

**e)** Assume that T is linear transformation. Find standard matrix of  $T: \mathbb{R}^3 \rightarrow \mathbb{R}^2$  defined by  $T(e_1) = (1,3)$   $T(e_2) = (4,-7)$   $T(e_3) = (-5,4)$ **Q.6 Solve any three of the following.**

09

**a)** Determine whether the vectors are orthogonal if orthogonal Normalize the vector to

$$\text{Produce the orthonormal set } \mu = \begin{bmatrix} -2 \\ 3 \\ 1 \\ 3 \\ 2 \\ \frac{1}{3} \end{bmatrix} \quad v = \begin{bmatrix} 1 \\ 3 \\ 2 \\ 3 \\ 0 \end{bmatrix}$$

**b)** Show that  $\{v_1, v_2, v_3\}$  is orthonormal basis for  $\mathbb{R}^3$  where

$$v_1 = \begin{bmatrix} \frac{1}{\sqrt{10}} \\ \frac{3}{\sqrt{20}} \\ \frac{3}{\sqrt{20}} \end{bmatrix} \quad v_2 = \begin{bmatrix} \frac{3}{\sqrt{10}} \\ \frac{-1}{\sqrt{20}} \\ \frac{-1}{\sqrt{20}} \end{bmatrix} \quad v_3 = \begin{bmatrix} 0 \\ \frac{-1}{\sqrt{20}} \\ \frac{1}{\sqrt{20}} \end{bmatrix}$$

**c)** Describe all solutions of  $AX = B$  where  $A = \begin{bmatrix} 3 & 5 & -4 \\ -3 & -2 & 4 \\ 6 & 1 & 8 \end{bmatrix}$   $b = \begin{bmatrix} 7 \\ -1 \\ -4 \end{bmatrix}$ **d)** Let  $b_1 = \begin{bmatrix} 2 \\ 1 \end{bmatrix}$ ,  $b_2 = \begin{bmatrix} -1 \\ 1 \end{bmatrix}$ ,  $x = \begin{bmatrix} 4 \\ 5 \end{bmatrix}$  &  $B = \{b_1, b_2\}$  Find the co-ordinate vector  $[X]_B$  of X relative to B.

e) Let  $A = \begin{bmatrix} 2 & 4 & -2 & 1 \\ -2 & -5 & 7 & 3 \\ 3 & 7 & -8 & 6 \end{bmatrix}$  and  $u = \begin{bmatrix} 3 \\ -2 \\ -1 \\ 0 \end{bmatrix}$   $v = \begin{bmatrix} 3 \\ -1 \\ 3 \end{bmatrix}$

Is  $u$  is in NulA?

Is  $v$  is in ColA?

**Q.7 Solve any two of the following.**

**10**

- a) Find the numerically largest eigen values of A by Power method.

$$A = \begin{bmatrix} 1 & 6 & 1 \\ 1 & 2 & 0 \\ 0 & 0 & 3 \end{bmatrix} \quad x_0 = \begin{bmatrix} 1 \\ 0 \\ 0 \end{bmatrix}$$

- b) If possible, diagonalize the matrix A

$$A = \begin{bmatrix} 6 & -2 & -1 \\ -2 & 6 & -1 \\ -1 & -1 & 5 \end{bmatrix}$$

- c) Find the dimension of NulA & ColA of matrix A where

$$A = \begin{bmatrix} 1 & 2 & -4 & 3 & 3 \\ 5 & 10 & -9 & -7 & 8 \\ 4 & 8 & -9 & -2 & 7 \\ -2 & -4 & 5 & 0 & 6 \end{bmatrix}$$

**MCQ/Objective Type Questions**

Duration: 30 Minutes

Marks: 14

**Q.1 Choose the correct alternatives from the options.****14**

- 1) HEV stands for
  - a) Hybrid Electronic Vehicle
  - b) Hybrid Electrical vehicle
  - c) Hybrid Environmental Vehicle
  - d) None of the above
- 2) When was the first electric car invented?
  - a) 1830
  - b) 1985
  - c) 1832
  - d) 1945
- 3) What is the challenge with electric vehicles?
  - a) Vehicle durability
  - b) Cell life
  - c) Cost
  - d) Both A and B
- 4) Electric Vehicles are generally powered by \_\_\_\_\_.
  - a) Aluminium batteries
  - b) Lead-acid batteries
  - c) Sodium batteries
  - d) Magnesium batteries
- 5) Life of a battery in the electric vehicle is about \_\_\_\_\_.
  - a) 8 years
  - b) 5 years
  - c) 10 years
  - d) 20 years
- 6) Full form of EV is \_\_\_\_\_.
  - a) Energy voltage
  - b) Electric vehicles
  - c) Electric voltage
  - d) Energy vehicles
- 7) The rate of change of momentum with respect to time is measured in
  - a) kg ms<sup>-2</sup>
  - b) kg ms<sup>-1</sup>
  - c) kg m
  - d) kg
- 8) When unbalanced forces act on a body, the body \_\_\_\_\_.
  - a) Must move with uniform velocity.
  - b) Must remain at rest.
  - c) Must experience acceleration.
  - d) Must move in a curved path.
- 9) How many known modes of charging of EVs are available?
  - a) 3
  - b) 2
  - c) 4
  - d) 1

- 10)** Newton's third law of motion explains the two forces namely 'action' and 'reaction' coming into action when the two bodies are in contact with each other. These two forces:
- a) Always act on the same body
  - b) Always act on the different bodies in opposite directions
  - c) Have the same magnitude and direction
  - d) Acts on either body at normal to each other
- 11)** The seat belts are provided in the cars so that if the car stops suddenly due to an emergency braking, the persons sitting on the front seats are not thrown forward violently and saved from getting injured. Can you guess the law due to which a person falls in the forward direction on the sudden stopping of the car?
- a) Newton's first law of motion
  - b) Newton's second law of motion
  - c) Newton's third law of motion
  - d) Newton's law of gravitation
- 12)** Which of the following is NOT the type of Hybrid Vehicle \_\_\_\_\_?
- a) Plug-in Hybrid
  - b) Parallel Hybrid
  - c) Natural Gas for Vehicles
  - d) Series Hybrid
- 13)** "In this system, the engine is used to supply electrical power to the motor, which then turns the wheels" Select the type of Hybrid System according to above description.
- a) Series Hybrid
  - b) Parallel Hybrid
  - c) Plug-in Hybrid
  - d) Series-parallel Hybrid
- 14)** Which vehicle has the smallest number of principle components?
- a) Traditional vehicle
  - b) Hybrid vehicle
  - c) Electric vehicle
  - d) Both A and B

Time: 02:00 PM To 05:00 PM

Max. Marks: 56

**Instructions:** 1) All questions are compulsory.  
2) Figures to the right indicates full marks.

**Section – I**

**Q.2 Solve any four.** **16**

- a) What is meant by an electric vehicle?
- b) Explain about the history of electric vehicle?
- c) Explain about the social and environmental importance of EV?
- d) What are the supporting systems in an electric vehicle?
- e) What are the advantages & disadvantages of electric vehicles?

**Q.3 Solve any two:** **12**

- a) Explain all law of motion in details?
- b) Write brief note on vehicle dynamics.
- c) Explain the following terms.
  - 1) Propulsion Power
  - 2) Motion
  - 3) Speed
  - 4) velocity

**Section II**

**Q.4 Solve any four.** **16**

- a) Explain the components of HEV and its types?
- b) With the help of block diagram explain battery management supporting system of HEV?
- c) Explain the different power flow control modes of a typical parallel hybrid system with the help of block diagrams?
- d) Explain the benefits of Solar powered charging system?
- e) Explain the fuel efficiency analysis of hybrid drive train and electric drive trains?

**Q.5 Solve any Two.** **12**

- a) Explain the operation, the advantages & disadvantages of flywheel energy storage?
- b) Explain the working of fuel cell and state its limitations?
- c) Explain the fundamentals of regenerative braking system used in HEV?

Day & Date: Thursday, 16-03-2023  
Time: 02:00 PM To 05:00 PM

**Instructions:** 1) Q. No. 1 is compulsory. It should be solved in the first 30 minutes in answer book. Page no 03 (Starting page of the Answer Book). Each question carries one mark.  
2) Don't forget to Mention question paper set (P/Q/R/S) on top of page.  
3) Figures to the right indicates full marks.

Marks: 14

14

- Page 4 of 12

- 7) Which vehicle has the smallest number of principle components?  
a) Traditional vehicle                      b) Hybrid vehicle  
c) Electric vehicle                          d) Both A and B
- 8) HEV stands for  
a) Hybrid Electronic Vehicle              b) Hybrid Electrical vehicle  
c) Hybrid Environmental Vehicle        d) None of the above
- 9) When was the first electric car invented?  
a) 1830                                          b) 1985  
c) 1832                                          d) 1945
- 10) What is the challenge with electric vehicles?  
a) Vehicle durability                      b) Cell life  
c) Cost                                          d) Both A and B
- 11) Electric Vehicles are generally powered by \_\_\_\_\_.  
a) Aluminium batteries                      b) Lead-acid batteries  
c) Sodium batteries d                      d) Magnesium batteries
- 12) Life of a battery in the electric vehicle is about \_\_\_\_\_.  
a) 8 years                                          b) 5 years  
c) 10 years                                        d) 20 years
- 13) Full form of EV is \_\_\_\_\_.  
a) Energy voltage                              b) Electric vehicles  
c) Electric voltage                            d) Energy vehicles
- 14) The rate of change of momentum with respect to time is measured in  
a)  $\text{kg ms}^{-2}$                                       b)  $\text{kg ms}^{-1}$   
c)  $\text{kg m}$                                           d)  $\text{kg}$

Day & Date: Thursday, 16-03-2023  
Time: 02:00 PM To 05:00 PM

Max. Marks: 56

**Instructions:** 1) All questions are compulsory.  
2) Figures to the right indicates full marks.

**Section – I**

**Q.2 Solve any four.** **16**

- a) What is meant by an electric vehicle?
- b) Explain about the history of electric vehicle?
- c) Explain about the social and environmental importance of EV?
- d) What are the supporting systems in an electric vehicle?
- e) What are the advantages & disadvantages of electric vehicles?

**Q.3 Solve any two:** **12**

- a) Explain all law of motion in details?
- b) Write brief note on vehicle dynamics.
- c) Explain the following terms.
  - 1) Propulsion Power
  - 2) Motion
  - 3) Speed
  - 4) velocity

**Section II**

**Q.4 Solve any four.** **16**

- a) Explain the components of HEV and its types?
- b) With the help of block diagram explain battery management supporting system of HEV?
- c) Explain the different power flow control modes of a typical parallel hybrid system with the help of block diagrams?
- d) Explain the benefits of Solar powered charging system?
- e) Explain the fuel efficiency analysis of hybrid drive train and electric drive trains?

**Q.5 Solve any Two.** **12**

- a) Explain the operation, the advantages & disadvantages of flywheel energy storage?
- b) Explain the working of fuel cell and state its limitations?
- c) Explain the fundamentals of regenerative braking system used in HEV?

3) Figures to the right indicates full marks.

Duration: 30 Minutes

Marks: 14

**Q.1 Choose the correct alternatives from the options.**

14

- 1) Full form of EV is \_\_\_\_\_.  
a) Energy voltage                      b) Electric vehicles  
c) Electric voltage                  d) Energy vehicles
- 2) The rate of change of momentum with respect to time is measured in  
a) kg ms-2                                b) kg ms-1  
c) kg m                                     d) kg
- 3) When unbalanced forces act on a body, the body \_\_\_\_\_.  
a) Must move with uniform velocity.  
b) Must remain at rest.  
c) Must experience acceleration.  
d) Must move in a curved path.
- 4) How many known modes of charging of EVs are available?  
a) 3                                          b) 2  
c) 4                                          d) 1
- 5) Newton's third law of motion explains the two forces namely 'action' and 'reaction' coming into action when the two bodies are in contact with each other. These two forces:  
a) Always act on the same body  
b) Always act on the different bodies in opposite directions  
c) Have the same magnitude and direction  
d) Acts on either body at normal to each other
- 6) The seat belts are provided in the cars so that if the car stops suddenly due to an emergency braking, the persons sitting on the front seats are not thrown forward violently and saved from getting injured. Can you guess the law due to which a person falls in the forward direction on the sudden stopping of the car?  
a) Newton's first law of motion        b) Newton's second law of motion  
c) Newton's third law of motion       d) Newton's law of gravitation

- 7) Which of the following is NOT the type of Hybrid Vehicle \_\_\_\_\_?
- a) Plug-in Hybrid
  - b) Parallel Hybrid
  - c) Natural Gas for Vehicles
  - d) Series Hybrid
- 8) "In this system, the engine is used to supply electrical power to the motor, which then turns the wheels" Select the type of Hybrid System according to above description.
- a) Series Hybrid
  - b) Parallel Hybrid
  - c) Plug-in Hybrid
  - d) Series-parallel Hybrid
- 9) Which vehicle has the smallest number of principle components?
- a) Traditional vehicle
  - b) Hybrid vehicle
  - c) Electric vehicle
  - d) Both A and B
- 10) HEV stands for
- a) Hybrid Electronic Vehicle
  - b) Hybrid Electrical vehicle
  - c) Hybrid Environmental Vehicle
  - d) None of the above
- 11) When was the first electric car invented?
- a) 1830
  - b) 1985
  - c) 1832
  - d) 1945
- 12) What is the challenge with electric vehicles?
- a) Vehicle durability
  - b) Cell life
  - c) Cost
  - d) Both A and B
- 13) Electric Vehicles are generally powered by \_\_\_\_\_.
- a) Aluminium batteries
  - b) Lead-acid batteries
  - c) Sodium batteries
  - d) Magnesium batteries
- 14) Life of a battery in the electric vehicle is about \_\_\_\_\_.
- a) 8 years
  - b) 5 years
  - c) 10 years
  - d) 20 years

**S.Y. (B.Tech.) (Sem - II) (Old) (CBCS) Examination: Oct/Nov-2022**  
**ELECTRICAL ENGINEERING**  
**Electrical Machines - II**

Day & Date: Monday, 06-03-2023  
 Time: 02:00 PM To 05:00 PM

Max. Marks: 70

- Instructions:** 1) Q. No. 1 is compulsory. It should be solved in the first 30 minutes in answer book. Page no 03 (Starting page of the Answer Book). Each question carries one mark.  
 2) Don't forget to Mention question paper set (P/Q/R/S) on top of page.  
 3) Figures to the right indicates full marks.  
 4) Assume suitable data wherever needed and mention it clearly.

**MCQ/Objective Type Questions**

Duration: 30 Minutes

Marks: 14

**Q.1 Choose the correct alternatives from the given option:**

**14**

- 1) For a p-pole machine, which of the following statements are correct regarding the rotating field speed?
  - a)  $1/(p/2)$  revolutions in one cycle
  - b)  $f/(p/2)$  revolutions in f cycles
  - c)  $f/(p/2)$  revolutions in one second
  - d) Any of the mentioned
- 2) Under which of the following starting methods an induction motor draws high starting currents?
  - a) Star-delta starter
  - b) Auto transformer starter
  - c) Direct online starter
  - d) Reduced voltage starter
- 3) A 10 kW, 50 Hz, 3-phase induction motor develops the rated torque at 1440 rpm. If the load torque is reduced to half, then the motor speed is \_\_\_\_\_.
  - a) 1470 rpm
  - b) 1410 rpm
  - c) 1400 rpm
  - d) 1444 rpm
- 4) In a blocked rotor test on an induction motor, the mechanical output of the motor is \_\_\_\_\_.
  - a) zero
  - b) moderate
  - c) very low
  - d) none of the above
- 5) In the circle diagram for I.M. the diameter of the circle represents \_\_\_\_\_.
  - a) Slip
  - b) Rotor current
  - c) Running torque
  - d) Line voltage
- 6) If induction motor is direct switched-on then it will develop \_\_\_\_\_.
  - a) 1.5 times their full load torque
  - b) 1.5 to 2.5 times their full load torque
  - c) 2.5 times their full load torque
  - d) 1.5 to 5 times their full load torque

- 7) The relation between maximum torque and full load torque ( $T_{\max}$ ,  $T_f$  respectively) when referred to induction motor is given by \_\_\_\_\_.  
 a)  $T_f/T_{\max} = 2a/(a^2 + s^2)$                       b)  $T_f/T_{\max} = 2/(a^2 + s^2)$   
 c)  $T_f/T_{\max} = 2as/(a^2 + s^2)$                       d)  $T_f/T_{\max} = a/(a^2 + s^2)$
- 8) Which of the following motors has highest starting torque?  
 a) Repulsion motor                      b) Shaped pole motor  
 c) Capacitor-start motor                      d) Split-phase motor
- 9) In a capacitor start motor, the phase displacement between starting and running winding can be nearly \_\_\_\_\_.  
 a)  $10^\circ$                       b)  $30^\circ$   
 c)  $60^\circ$                       d)  $90^\circ$
- 10) Potier method is very accurate due to \_\_\_\_\_.  
 a) emfs are handled as voltage and mmf as AT  
 b) emf and mmf are handled as AT  
 c) emf and mmf are handled as voltage  
 d) none of the mentioned
- 11) A 3-phase alternator has 3 slots per pole. The distribution factor of the winding is \_\_\_\_\_.  
 a) 0.866                      b) 0.5  
 c) 1                      d) none of the above
- 12) When the load on an alternator is varied, its terminal voltage also changes due to \_\_\_\_\_.  
 a) armature reaction                      b) leakage reactance  
 c) armature resistance                      d) all of the mentioned
- 13) A three-phase synchronous motor will have \_\_\_\_\_.  
 a) no slip-rings                      b) one slip-ring  
 c) two slip-rings                      d) three slip-rings
- 14) Voltage regulation for an alternator operating at leading power factor is negative due to \_\_\_\_\_.  
 a) magnetizing nature of armature reaction  
 b) demagnetizing nature of armature reaction  
 c) cross-magnetizing nature of armature reaction  
 d) all of the mentioned

**S.Y. (B.Tech.) (Sem - II) (Old) (CBCS) Examination: Oct/Nov-2022**  
**ELECTRICAL ENGINEERING**  
**Electrical Machines - II**

Day & Date: Monday, 06-03-2023  
 Time: 02:00 PM To 05:00 PM

Max. Marks: 56

**Instructions:** 1) All question are compulsory.  
 2) Figures to the right indicates full marks.

**Section – I**

**Q.2 Attempt any four of the following:**

**16**

- a) Derive  $P_i : P_c : P_m : 1 : s : (1-s)$  where  $P_i$ =Rotor input;  $P_c$ =Rotor Cu loss and  $P_m$  = Mechanical power developed.
- b) With a neat vector diagram, explain the production of rotating magnetic field in 3- Induction Motor.
- c) Derive the condition for Max torque in case of 3 Ph Induction Motor.
- d) Explain a) Construction and Working of double cage IM  
       b) Equivalent circuit of double cage IM
- e) A squirrel cage type induction motor when started by means of a star/Delta starter takes 180% of full load line current and develops 35% of full load torque at starting calculate the starting torque and current in terms of full load values, if an autotransformer with 75% tapping were employed.
- f) What are the different methods of speed control of induction motors explain with neat diagram the rotor rheostat control method?

**Q.3 Attempt any two of the following:**

**12**

- a) Describe with circuit diagram the working of 1) Autotransformer starter  
       2) Rotor resistance starter
- b) Explain the procedure to construct a circle diagram for IM from no load and blocked rotor test data and mark output line and torque line on diagram.
- c) A 75 kW, 440 V, 3-phase, 6-pole, 50 Hz wound rotor induction motor has a full load slip of 0.04 and the slip at maximum torque of 0.2 when operating at rated voltage and frequency with rotor winding short circuited at the slip rings. Assume the stator resistance and rotational losses to be negligible. Find (a) maximum torque (b) starting torque (c) full load copper loss. The rotor resistance is now doubled by adding an external series resistance. Determine (d) slip at full load (e) full-load torque (f) slip at maximum torque.

**Section – II****Q.4 Attempt any four of the following:****16**

- a) Explain the operation of split phase induction motor.
- b) Explain cross field theory of single-phase induction motor.
- c) What is an armature reaction? Explain its effect on the terminal voltage of an alternator at unity pf.
- d) Derive EMF equation of alternator with short pitched coils and distributed windings.
- e) Explain the operation of synchronous motor with constant load and over excitation with phasor diagram.
- f) State and explain different losses in synchronous motor.

**Q.5 Attempt any two of the following:****12**

- a) What are conditions of parallel operation of alternator? Explain parallel operation of alternator.
- b) Explain EMF method of calculating voltage regulation of an alternator.
- c) Derive an expression for the power developed per phase of a synchronous motor.

- Instructions:** 1) Q. No. 1 is compulsory. It should be solved in the first 30 minutes in answer book. Page no 03 (Starting page of the Answer Book). Each question carries one mark.  
 2) Don't forget to Mention question paper set (P/Q/R/S) on top of page.  
 3) Figures to the right indicates full marks.  
 4) Assume suitable data wherever needed and mention it clearly.

**MCQ/Objective Type Questions**

Duration: 30 Minutes

Marks: 14

**Q.1 Choose the correct alternatives from the given option:**

**14**

- 1) Which of the following motors has highest starting torque?
 

|                          |                      |
|--------------------------|----------------------|
| a) Repulsion motor       | b) Shaped pole motor |
| c) Capacitor-start motor | d) Split-phase motor |
- 2) In a capacitor start motor, the phase displacement between starting and running winding can be nearly \_\_\_\_\_.
 

|        |        |
|--------|--------|
| a) 10° | b) 30° |
| c) 60° | d) 90° |
- 3) Potier method is very accurate due to \_\_\_\_\_.
 

|                                              |
|----------------------------------------------|
| a) emfs are handled as voltage and mmf as AT |
| b) emf and mmf are handled as AT             |
| c) emf and mmf are handled as voltage        |
| d) none of the mentioned                     |
- 4) A 3-phase alternator has 3 slots per pole. The distribution factor of the winding is \_\_\_\_\_.
 

|          |                      |
|----------|----------------------|
| a) 0.866 | b) 0.5               |
| c) 1     | d) none of the above |
- 5) When the load on an alternator is varied, its terminal voltage also changes due to \_\_\_\_\_.
 

|                        |                         |
|------------------------|-------------------------|
| a) armature reaction   | b) leakage reactance    |
| c) armature resistance | d) all of the mentioned |
- 6) A three-phase synchronous motor will have \_\_\_\_\_.
 

|                   |                     |
|-------------------|---------------------|
| a) no slip-rings  | b) one slip-ring    |
| c) two slip-rings | d) three slip-rings |
- 7) Voltage regulation for an alternator operating at leading power factor is negative due to \_\_\_\_\_.
 

|                                                  |
|--------------------------------------------------|
| a) magnetizing nature of armature reaction       |
| b) demagnetizing nature of armature reaction     |
| c) cross-magnetizing nature of armature reaction |
| d) all of the mentioned                          |

- 8) For a p-pole machine, which of the following statements are correct regarding the rotating field speed?
- $1/(p/2)$  revolutions in one cycle
  - $f/(p/2)$  revolutions in f cycles
  - $f/(p/2)$  revolutions in one second
  - Any of the mentioned
- 9) Under which of the following starting methods an induction motor draws high starting currents?
- Star-delta starter
  - Auto transformer starter
  - Direct online starter
  - Reduced voltage starter
- 10) A 10 kW, 50 Hz, 3-phase induction motor develops the rated torque at 1440 rpm. If the load torque is reduced to half, then the motor speed is \_\_\_\_\_
- 1470 rpm
  - 1410 rpm
  - 1400 rpm
  - 1444 rpm
- 11) In a blocked rotor test on an induction motor, the mechanical output of the motor is \_\_\_\_\_
- zero
  - moderate
  - very low
  - none of the above
- 12) In the circle diagram for I.M. the diameter of the circle represents \_\_\_\_\_
- Slip
  - Rotor current
  - Running torque
  - Line voltage
- 13) If induction motor is direct switched-on then it will develop \_\_\_\_\_
- 1.5 times their full load torque
  - 1.5 to 2.5 times their full load torque
  - 2.5 times their full load torque
  - 1.5 to 5 times their full load torque
- 14) The relation between maximum torque and full load torque ( $T_{\max}$ ,  $T_f$  respectively) when referred to induction motor is given by \_\_\_\_\_
- $T_f/T_{\max} = 2a/(a^2 + s^2)$
  - $T_f/T_{\max} = 2/(a^2 + s^2)$
  - $T_f/T_{\max} = 2as/(a^2 + s^2)$
  - $T_f/T_{\max} = a/(a^2 + s^2)$

| <b>Seat No.</b> |  |
|-----------------|--|

Day & Date: Monday, 06-03-2023  
Time: 02:00 PM To 05:00 PM

**Instructions:** 1) All question are compulsory.  
2) Figures to the right indicates full marks.

**Q.2 Attempt any four of the following:**

- Derive  $P_i : P_c : P_m : 1 : s : (1-s)$  where  $P_i$ =Rotor input;  $P_c$ =Rotor Cu loss and  $P_m$  = Mechanical power developed.
- With a neat vector diagram, explain the production of rotating magnetic field in 3- Induction Motor.
- Derive the condition for Max torque in case of 3 Ph Induction Motor.
- Explain a) Construction and Working of double cage IM  
b) Equivalent circuit of double cage IM
- A squirrel cage type induction motor when started by means of a star/Delta starter takes 180% of full load line current and develops 35% of full load torque at starting calculate the starting torque and current in terms of full load values, if an autotransformer with 75% tapping were employed.
- What are the different methods of speed control of induction motors explain with neat diagram the rotor rheostat control method?

**Q.3 Attempt any two of the following:**

- Describe with circuit diagram the working of 1) Autotransformer starter  
2) Rotor resistance starter
- Explain the procedure to construct a circle diagram for IM from no load and blocked rotor test data and mark output line and torque line on diagram.
- A 75 kW, 440 V, 3-phase, 6-pole, 50 Hz wound rotor induction motor has a full load slip of 0.04 and the slip at maximum torque of 0.2 when operating at rated voltage and frequency with rotor winding short circuited at the slip rings. Assume the stator resistance and rotational losses to be negligible. Find (a) maximum torque (b) starting torque (c) full load copper loss. The rotor resistance is now doubled by adding an external series resistance. Determine (d) slip at full load (e) full-load torque (f) slip at maximum torque.

**Section – II**

- Q.4 Attempt any four of the following:** **16**
- a) Explain the operation of split phase induction motor.
  - b) Explain cross field theory of single-phase induction motor.
  - c) What is an armature reaction? Explain its effect on the terminal voltage of an alternator at unity pf.
  - d) Derive EMF equation of alternator with short pitched coils and distributed windings.
  - e) Explain the operation of synchronous motor with constant load and over excitation with phasor diagram.
  - f) State and explain different losses in synchronous motor.
- Q.5 Attempt any two of the following:** **12**
- a) What are conditions of parallel operation of alternator? Explain parallel operation of alternator.
  - b) Explain EMF method of calculating voltage regulation of an alternator.
  - c) Derive an expression for the power developed per phase of a synchronous motor.

**MCQ/Objective Type Questions**

Duration: 30 Minutes

Marks: 14

**Q.1 Choose the correct alternatives from the given option: 14**

- 1) If induction motor is direct switched-on then it will develop \_\_\_\_
  - a) 1.5 times their full load torque
  - b) 1.5 to 2.5 times their full load torque
  - c) 2.5 times their full load torque
  - d) 1.5 to 5 times their full load torque
- 2) The relation between maximum torque and full load torque ( $T_{\max}$ ,  $T_f$  respectively) when referred to induction motor is given by \_\_\_\_
  - a)  $T_f / T_{\max} = 2a / (a^2 + s^2)$
  - b)  $T_f / T_{\max} = 2 / (a^2 + s^2)$
  - c)  $T_f / T_{\max} = 2as / (a^2 + s^2)$
  - d)  $T_f / T_{\max} = a / (a^2 + s^2)$
- 3) Which of the following motors has highest starting torque?
  - a) Repulsion motor
  - b) Shaped pole motor
  - c) Capacitor-start motor
  - d) Split-phase motor
- 4) In a capacitor start motor, the phase displacement between starting and running winding can be nearly \_\_\_\_\_.
  - a)  $10^\circ$
  - b)  $30^\circ$
  - c)  $60^\circ$
  - d)  $90^\circ$
- 5) Potier method is very accurate due to \_\_\_\_\_.
  - a) emfs are handled as voltage and mmf as AT
  - b) emf and mmf are handled as AT
  - c) emf and mmf are handled as voltage
  - d) none of the mentioned
- 6) A 3-phase alternator has 3 slots per pole. The distribution factor of the winding is \_\_\_\_\_.
  - a) 0.866
  - b) 0.5
  - c) 1
  - d) none of the above
- 7) When the load on an alternator is varied, its terminal voltage also changes due to \_\_\_\_\_.
  - a) armature reaction
  - b) leakage reactance
  - c) armature resistance
  - d) all of the mentioned

**MCQ/Objective Type Questions**

Duration: 30 Minutes

Marks: 14

**Q.1 Choose the correct alternatives from the options.**

**14**

- 1) The corona is considerably affected by which of the following \_\_\_\_\_  
 a) Size of the conductor  
 b) Shape of the conductor  
 c) Surface condition of the conductor  
 d) All of the above
- 2) Corona usually occurs when the electrostatic stress in the air around the conductor succeeds \_\_\_\_\_  
 a) 30 kV (maximum value)/cm      b) 22 kV (maximum value)/cm  
 c) 11 kV (rms value)/cm      d) 6.6 kV (rms value)/cm
- 3) A conductor, due to sag between two supports, takes the form of \_\_\_\_\_  
 a) semi-circle      b) catenary  
 c) triangle      d) ellipse
- 4) In a cable immediately above metallic sheath \_\_\_\_\_ is provided.  
 a) Earthing connection      b) Bedding  
 c) Armouring      d) None of the above
- 5) The process of achieving uniformity in the dielectric stress by using layers of different dielectrics is known as \_\_\_\_\_.  
 a) Stranding process      b) Grading of cables  
 c) Stress distribution      d) Capacitance grading
- 6) The thickness of the layer of insulation on the conductor, in cables, depends upon \_\_\_\_\_  
 a) Reactive power      b) Power factor  
 c) Voltage      d) Current carrying capacity
- 7) The conductor carries more current on the surface in comparison to its core. This phenomenon is called the \_\_\_\_\_.  
 a) Corona      b) Ferranti effect  
 c) Lenz's effect      d) Skin effect

- 8) 310 km line is considered as \_\_\_\_\_  
a) a long transmission line      b) a medium transmission line  
c) a short transmission line      d) any of the above
- 9) In any transmission line  $AD - BC =$  \_\_\_\_\_?  
a) 1      b) 0  
c) 2      d) 3
- 10) The values of A, B, C and D constants for a short transmission line are respectively \_\_\_\_\_  
a) Z, 0, 1 and 1      b) 0, 1, 1 and Z  
c) 1, Z, 0 and 1      d) 1, 1, Z and 0
- 11) Feeder is designed mainly from the point of view of \_\_\_\_\_  
a) Its current carrying capacity      b) Voltage drop in it  
c) Operating voltage      d) Operating Frequency
- 12) A \_\_\_\_\_ distribution system is more reliable than the \_\_\_\_\_ distribution System.  
a) parallel, ring      b) radial, parallel  
c) parallel, radial      d) ring, parallel
- 13) In a substation the following equipment is not installed \_\_\_\_\_  
a) Exciters      b) Series capacitors  
c) Shunt reactors      d) Voltage transformers
- 14) Which of the following are the methods of grounding?  
a) Resistance      b) Reactance  
c) Solid      d) All of these

Set **P**

**S.Y (B. Tech) (Sem-II) (Old) (CBCS) Examination: Oct/Nov-2022**  
**ELECTRICAL ENGINEERING**  
**Power System II**

Day & Date: Wednesday, 08-03-2023  
 Time: 02:00 PM To 05:00 PM

Max. Marks: 56

**Instructions:** 1) All questions are compulsory.  
 2) Section I and Section II are compulsory.

**Section – I****Q.2 Solve Any Four.****16**

- What is corona? Explain the factors affecting corona.
- A single core cable has a conductor diameter of 2.5 cm & insulation of thickness of 1.2 cm. If the specific resistance of insulation is  $4.5 \times 10^{14} \Omega$  cm, calculate the insulation resistance per kilometer length of cable.
- Explain the concept of GMR & GMD.
- A 132 KV transmission line has the following details:  
 weight of conductor = 680 kg/km, length of span = 260 m,  
 ultimate strength = 3100 kg, safety factor = 2.  
 Calculate the height above the ground at which the conductor should be supported. Ground clearance required is 10 m.
- Explain in detail skin effect & proximity effect.
- Write short note on dielectric stress in single core cable.

**Q.3 Attempt any Two.****12**

- The tower of height 30 m and 90 m respectively support a transmission line conductor at water crossing. The horizontal distance between the towers is 500 m. If the tension in the conductor is 1600 kg, find the minimum clearance of the conductor and water and clearance midway between the supports. Weight of conductor is 1.5 kg/m. Bases of the towers can be considered to be at water level.
- Derive the expression for inductance of 3-ph single circuit overhead triangular configuration of transmission line for equilateral spacing.
- Explain the following methods of cable grading:  
 i) Capacitance grading ii) Intersheath grading

**Section – II****Q.4 Attempt any Four.****16**

- Derive an expression for voltage regulation and efficiency of short transmission line along with the equivalent circuit and phasor diagram.
- Explain different equipment used in substation.
- Write short note on connection schemes of distribution systems.
- A 3-phase, 50 Hz, overhead transmission line delivers 10 MW at 0.8 p.f lagging and at 66 KV. The resistance & inductive reactance of line per phase are  $10\Omega$  &  $20\Omega$  respectively while capacitive admittance is  $4 \times 10^{-4}$  siemen. Calculate sending voltage (line-to-line) & sending end power factor using nominal T Method.

- e) Draw and explain concentrated loaded DC distributor fed at one end.
- f) Write short note on reactance grounding.

**Q.5 Attempt any two.****12**

- a) A single-phase overhead transmission line delivers 1000 kW at 10 KV at 0.85 p.f. lagg. The total resistance and inductive reactance of the line are  $2\ \Omega$  and  $3\ \Omega$  respectively.  
Determine:
  - 1) Sending end voltage
  - 2) Voltage regulation
  - 3) Transmission Efficiency
- b) With neat diagram derive the expression for A, B, C, D constants of medium transmission line using nominal  $\pi$  method.
- c) A 2 wire dc distributor 600 m long as loaded as under:  
Distance from A in meters: 150 300 350 450  
Loads in amperes: 100 200 250 300  
The feeding point A is maintained at 440 V and that of B at 430 V. If each conductor has a resistance of 0.01 ohm per 100 m.  
Calculate:
  - i) the current supplied from A to B
  - ii) the power dissipated in the distributor

**Q.3 Attempt any Two.****12**

- The tower of height 30 m and 90 m respectively support a transmission line conductor at water crossing. The horizontal distance between the towers is 500 m. If the tension in the conductor is 1600 kg, find the minimum clearance of the conductor and water and clearance midway between the supports. Weight of conductor is 1.5 kg/m. Bases of the towers can be considered to be at water level.
- Derive the expression for inductance of 3-ph single circuit overhead triangular configuration of transmission line for equilateral spacing.
- Explain the following methods of cable grading:  
 i) Capacitance grading ii) Intersheath grading

**Section – II****Q.4 Attempt any Four.****16**

- Derive an expression for voltage regulation and efficiency of short transmission line along with the equivalent circuit and phasor diagram.
- Explain different equipment used in substation.
- Write short note on connection schemes of distribution systems.
- A 3-phase, 50 Hz, overhead transmission line delivers 10 MW at 0.8 p.f lagging and at 66 KV. The resistance & inductive reactance of line per phase are  $10\Omega$  &  $20\Omega$  respectively while capacitive admittance is  $4 \times 10^{-4}$  siemen. Calculate sending voltage (line-to-line) & sending end power factor using nominal T Method.

- e) Draw and explain concentrated loaded DC distributor fed at one end.
- f) Write short note on reactance grounding.

**Q.5 Attempt any two.****12**

- a) A single-phase overhead transmission line delivers 1000 kW at 10 KV at 0.85 p.f. lagg. The total resistance and inductive reactance of the line are  $2\ \Omega$  and  $3\ \Omega$  respectively.  
Determine:
  - 1) Sending end voltage
  - 2) Voltage regulation
  - 3) Transmission Efficiency
- b) With neat diagram derive the expression for A, B, C, D constants of medium transmission line using nominal  $\pi$  method.
- c) A 2 wire dc distributor 600 m long as loaded as under:  
 Distance from A in meters: 150   300   350   450  
 Loads in amperes:            100   200   250   300  
 The feeding point A is maintained at 440 V and that of B at 430 V. If each conductor has a resistance of 0.01 ohm per 100 m.  
 Calculate:
  - i) the current supplied from A to B
  - ii) the power dissipated in the distributor

Day & Date: Wednesday, 08-03-2023  
 Time: 02:00 PM To 05:00 PM

Max. Marks: 70

- Instructions:** 1) Q. No. 1 is compulsory. It should be solved in the first 30 minutes in answer book. Page no 03 (Starting page of the Answer Book). Each question carries one mark.  
 2) Don't forget to Mention question paper set (P/Q/R/S) on top of page.  
 3) Figures to the right indicate full marks.

**MCQ/Objective Type Questions**

Duration: 30 Minutes

Marks: 14

**Q.1 Choose the correct alternatives from the options.**

**14**

- 1) Feeder is designed mainly from the point of view of \_\_\_\_\_.  
 a) Its current carrying capacity      b) Voltage drop in it  
 c) Operating voltage      d) Operating Frequency
- 2) A \_\_\_\_\_ distribution system is more reliable than the \_\_\_\_\_ distribution System.  
 a) parallel, ring      b) radial, parallel  
 c) parallel, radial      d) ring, parallel
- 3) In a substation the following equipment is not installed \_\_\_\_\_.  
 a) Exciters      b) Series capacitors  
 c) Shunt reactors      d) Voltage transformers
- 4) Which of the following are the methods of grounding?  
 a) Resistance      b) Reactance  
 c) Solid      d) All of these
- 5) The corona is considerably affected by which of the following \_\_\_\_\_.  
 a) Size of the conductor  
 b) Shape of the conductor  
 c) Surface condition of the conductor  
 d) All of the above
- 6) Corona usually occurs when the electrostatic stress in the air around the conductor succeeds \_\_\_\_\_.  
 a) 30 kV (maximum value)/cm      b) 22 kV (maximum value)/cm  
 c) 11 kV (rms value)/cm      d) 6.6 kV (rms value)/cm
- 7) A conductor, due to sag between two supports, takes the form of \_\_\_\_\_.  
 a) semi-circle      b) catenary  
 c) triangle      d) ellipse
- 8) In a cable immediately above metallic sheath \_\_\_\_\_ is provided.  
 a) Earthing connection      b) Bedding  
 c) Armouring      d) None of the above

- 9) The process of achieving uniformity in the dielectric stress by using layers of different dielectrics is known as \_\_\_\_\_.  
a) Stranding process                      b) Grading of cables  
c) Stress distribution                      d) Capacitance grading
- 10) The thickness of the layer of insulation on the conductor, in cables, depends upon \_\_\_\_\_.  
a) Reactive power                      b) Power factor  
c) Voltage                      d) Current carrying capacity
- 11) The conductor carries more current on the surface in comparison to its core. This phenomenon is called the \_\_\_\_\_.  
a) Corona                      b) Ferranti effect  
c) Lenz's effect                      d) Skin effect
- 12) 310 km line is considered as \_\_\_\_\_.  
a) a long transmission line                      b) a medium transmission line  
c) a short transmission line                      d) any of the above
- 13) In any transmission line  $AD - BC =$  \_\_\_\_\_?  
a) 1                      b) 0  
c) 2                      d) 3
- 14) The values of A, B, C and D constants for a short transmission line are respectively \_\_\_\_\_.  
a) Z, 0, 1 and 1                      b) 0,1,1 and Z  
c) 1, Z, 0 and 1                      d) 1,1, Z and O

Set **R**

**S.Y (B. Tech) (Sem-II) (Old) (CBCS) Examination: Oct/Nov-2022**  
**ELECTRICAL ENGINEERING**  
**Power System II**

Day & Date: Wednesday, 08-03-2023  
 Time: 02:00 PM To 05:00 PM

Max. Marks: 56

**Instructions:** 1) All questions are compulsory.  
 2) Section I and Section II are compulsory.

**Section – I****Q.2 Solve Any Four.****16**

- What is corona? Explain the factors affecting corona.
- A single core cable has a conductor diameter of 2.5 cm & insulation of thickness of 1.2 cm. If the specific resistance of insulation is  $4.5 \times 10^{14} \Omega$  cm, calculate the insulation resistance per kilometer length of cable.
- Explain the concept of GMR & GMD.
- A 132 KV transmission line has the following details:  
 weight of conductor = 680 kg/km, length of span = 260 m,  
 ultimate strength = 3100 kg, safety factor = 2.  
 Calculate the height above the ground at which the conductor should be supported. Ground clearance required is 10 m.
- Explain in detail skin effect & proximity effect.
- Write short note on dielectric stress in single core cable.

**Q.3 Attempt any Two.****12**

- The tower of height 30 m and 90 m respectively support a transmission line conductor at water crossing. The horizontal distance between the towers is 500 m. If the tension in the conductor is 1600 kg, find the minimum clearance of the conductor and water and clearance midway between the supports. Weight of conductor is 1.5 kg/m. Bases of the towers can be considered to be at water level.
- Derive the expression for inductance of 3-ph single circuit overhead triangular configuration of transmission line for equilateral spacing.
- Explain the following methods of cable grading:  
 i) Capacitance grading ii) Intersheath grading

**Section – II****Q.4 Attempt any Four.****16**

- Derive an expression for voltage regulation and efficiency of short transmission line along with the equivalent circuit and phasor diagram.
- Explain different equipment used in substation.
- Write short note on connection schemes of distribution systems.
- A 3-phase, 50 Hz, overhead transmission line delivers 10 MW at 0.8 p.f lagging and at 66 KV. The resistance & inductive reactance of line per phase are  $10\Omega$  &  $20\Omega$  respectively while capacitive admittance is  $4 \times 10^{-4}$  siemen. Calculate sending voltage (line-to-line) & sending end power factor using nominal T Method.

- e) Draw and explain concentrated loaded DC distributor fed at one end.
- f) Write short note on reactance grounding.

**Q.5 Attempt any two.****12**

- a) A single-phase overhead transmission line delivers 1000 kW at 10 KV at 0.85 p.f. lagg. The total resistance and inductive reactance of the line are  $2\ \Omega$  and  $3\ \Omega$  respectively.  
Determine:
  - 1) Sending end voltage
  - 2) Voltage regulation
  - 3) Transmission Efficiency
- b) With neat diagram derive the expression for A, B, C, D constants of medium transmission line using nominal  $\pi$  method.
- c) A 2 wire dc distributor 600 m long as loaded as under:  
 Distance from A in meters: 150   300   350   450  
 Loads in amperes:            100   200   250   300  
 The feeding point A is maintained at 440 V and that of B at 430 V. If each conductor has a resistance of 0.01 ohm per 100 m.  
 Calculate:
  - i) the current supplied from A to B
  - ii) the power dissipated in the distributor

**Instructions:** 1) All questions are compulsory.  
 2) Section I and Section II are compulsory.

**Section – I****Q.2 Solve Any Four. 16**

- What is corona? Explain the factors affecting corona.
- A single core cable has a conductor diameter of 2.5 cm & insulation of thickness of 1.2 cm. If the specific resistance of insulation is  $4.5 \times 10^{14} \Omega$  cm, calculate the insulation resistance per kilometer length of cable.
- Explain the concept of GMR & GMD.
- A 132 KV transmission line has the following details:  
 weight of conductor = 680 kg/km, length of span = 260 m,  
 ultimate strength = 3100 kg, safety factor = 2.  
 Calculate the height above the ground at which the conductor should be supported. Ground clearance required is 10 m.
- Explain in detail skin effect & proximity effect.
- Write short note on dielectric stress in single core cable.

**Q.3 Attempt any Two. 12**

- The tower of height 30 m and 90 m respectively support a transmission line conductor at water crossing. The horizontal distance between the towers is 500 m. If the tension in the conductor is 1600 kg, find the minimum clearance of the conductor and water and clearance midway between the supports. Weight of conductor is 1.5 kg/m. Bases of the towers can be considered to be at water level.
- Derive the expression for inductance of 3-ph single circuit overhead triangular configuration of transmission line for equilateral spacing.
- Explain the following methods of cable grading:  
 i) Capacitance grading ii) Intersheath grading

**Section – II****Q.4 Attempt any Four. 16**

- Derive an expression for voltage regulation and efficiency of short transmission line along with the equivalent circuit and phasor diagram.
- Explain different equipment used in substation.
- Write short note on connection schemes of distribution systems.
- A 3-phase, 50 Hz, overhead transmission line delivers 10 MW at 0.8 p.f lagging and at 66 KV. The resistance & inductive reactance of line per phase are  $10\Omega$  &  $20\Omega$  respectively while capacitive admittance is  $4 \times 10^{-4}$  siemen. Calculate sending voltage (line-to-line) & sending end power factor using nominal T Method.

- e) Draw and explain concentrated loaded DC distributor fed at one end.
- f) Write short note on reactance grounding.

**Q.5 Attempt any two.****12**

- a) A single-phase overhead transmission line delivers 1000 kW at 10 KV at 0.85 p.f. lagg. The total resistance and inductive reactance of the line are  $2\ \Omega$  and  $3\ \Omega$  respectively.  
Determine:
  - 1) Sending end voltage
  - 2) Voltage regulation
  - 3) Transmission Efficiency
- b) With neat diagram derive the expression for A, B, C, D constants of medium transmission line using nominal  $\pi$  method.
- c) A 2 wire dc distributor 600 m long as loaded as under:  
Distance from A in meters: 150 300 350 450  
Loads in amperes: 100 200 250 300  
The feeding point A is maintained at 440 V and that of B at 430 V. If each conductor has a resistance of 0.01 ohm per 100 m.  
Calculate:
  - i) the current supplied from A to B
  - ii) the power dissipated in the distributor

**MCQ/Objective Type Questions**

Duration: 30 Minutes

Marks: 14

**Q.1 Choose the correct alternatives from the options.**

**14**

- 1) In the common mode \_\_\_\_\_.
  - a) both inputs are grounded
  - b) the outputs are connected together
  - c) an identical signal appears on both the inputs
  - d) the output signal are in-phase
- 2) The other name for Miller Circuit is \_\_\_\_\_.
  - a) Non-Inverting Integrator
  - b) Inverting Integrator
  - c) Non-Inverting Differentiator
  - d) Inverting Differentiator
- 3) The use of negative feedback \_\_\_\_\_.
  - a) reduces the voltage gain of an Op-amp
  - b) makes the Op-amp gain increase
  - c) makes no change
  - d) none of the above
- 4) The Op-amp can amplify
  - a) a.c. signals only
  - b) d.c. signals only
  - c) both a.c. and d.c. signals
  - d) Neither d.c. nor a.c. signals
- 5) A common-mode signal is applied to \_\_\_\_\_.
  - a) the non-inverting input
  - b) the inverting input
  - c) both inputs
  - d) top of the tail resistor
- 6) What happen if any positive input signal is applied to open-loop configuration?
  - a) Output reaches saturation level
  - b) Output voltage swing's peak to peak
  - c) Output will be a sine waveform
  - d) Output will be a non-sinusoidal waveform
- 7) In which amplifier the output voltage is equal to the negative sum of all the inputs?
  - a) Averaging amplifier
  - b) inverting Summing amplifier
  - c) Scaling amplifier
  - d) All of the mentioned

- 8) Differentiation amplifier produces
- a) Output waveform as integration of input waveform
  - b) Input waveform as integration of output waveform
  - c) Output waveform as derivative of input waveform
  - d) Input waveform as derivative of output waveform
- 9) Which of the following method is used to minimize Boolean expressions
- a) Fourier transform
  - b) Gray code
  - c) Karnaugh mapping
  - d) Venitch method
- 10) The Boolean expression  $Y = XY + ZX$  is in the \_\_\_\_\_ form.
- a) Product-of-Sum
  - b) Sum-of-Products
  - c) Linear
  - d) None of the above
- 11) How many types of latches are there?
- a) One
  - b) Two
  - c) Six
  - d) Four
- 12) Which circuit doesn't have a memory unit?
- a) Combinational
  - b) Sequential
  - c) Both a and b
  - d) None of the above
- 13) A register is defined as \_\_\_\_\_.
- a) The group of latches for storing many bit of information
  - b) The group of latches for storing n-bit of information
  - c) The group of flip-flops suitable for storing one byte of information
  - d) The group of flip-flops suitable for storing binary information
- 14) In D register, 'D' stands for \_\_\_\_\_.
- a) Delay
  - b) Decrement
  - c) Data
  - d) Decay

**Instructions:** 1) All question are compulsory.  
 2) Section I and Section II are compulsory.

**Section – I**

**Q.2 Answer the following (Any four) 16**

- With neat circuit diagram explain working of subtractor.
- Explain the effect of power supply on offset voltage.
- List practical characteristics of Op-AMP. Explain shortly.
- Design a circuit for  $V_0 = - (V_1 + V_2 + V_3)$
- Draw and Explain working of practical differentiator.

**Q.3 Answer the Following (Any two) 12**

- Draw and Explain Instrumentation amplifier.
- Explain working of Practical Integrator with frequency response.
- Draw and explain block diagram of Operational amplifier.

**Section – II**

**Q.4 Answer the following (Any four) 16**

- Explain different modes of shift registers with suitable diagrams.
- Differentiate between synchronous and asynchronous counters.
- Define the following term with logic families.
  - Propagation delay
  - Power Dissipation
  - Fan out
  - Noise Margin
- Explain full adder in details & realize it using basic logic gates.
- Explain 4 bit ring counter.

**Q.5 Answer the Following (Any Two) 12**

- Design 2 bit synchronous counter using T flip flop.
- Reduce the following expression using K-map and implement reduced expression by using Logic gates.  
 $F = (A, B, C, D) = \sum(1, 2, 5, 8, 11, 13)$
- Design a mod-10 asynchronous down counter using J-K flip flop.

Day & Date: Thursday, 09-03-2023  
 Time: 02:00 PM To 05:00 PM

Max. Marks: 56

**Instructions:** 1) All question are compulsory.  
 2) Section I and Section II are compulsory.

**Section – I**

**Q.2 Answer the following (Any four) 16**

- With neat circuit diagram explain working of subtractor.
- Explain the effect of power supply on offset voltage.
- List practical characteristics of Op-AMP. Explain shortly.
- Design a circuit for  $V_0 = - (V_1 + V_2 + V_3)$
- Draw and Explain working of practical differentiator.

**Q.3 Answer the Following (Any two) 12**

- Draw and Explain Instrumentation amplifier.
- Explain working of Practical Integrator with frequency response.
- Draw and explain block diagram of Operational amplifier.

**Section – II**

**Q.4 Answer the following (Any four) 16**

- Explain different modes of shift registers with suitable diagrams.
- Differentiate between synchronous and asynchronous counters.
- Define the following term with logic families.
  - Propagation delay
  - Power Dissipation
  - Fan out
  - Noise Margin
- Explain full adder in details & realize it using basic logic gates.
- Explain 4 bit ring counter.

**Q.5 Answer the Following (Any Two) 12**

- Design 2 bit synchronous counter using T flip flop.
- Reduce the following expression using K-map and implement reduced expression by using Logic gates.  
 $F = (A, B, C, D) = \sum(1, 2, 5, 8, 11, 13)$
- Design a mod-10 asynchronous down counter using J-K flip flop.

**Analog & Digital Integrated Circuits**

Day & Date: Thursday, 09-03-2023  
 Time: 02:00 PM To 05:00 PM

Max. Marks: 70

- Instructions:** 1) Q. No. 1 is compulsory. It should be solved in the first 30 minutes in answer book. Page no 03 (Starting page of the Answer Book). Each question carries one mark.  
 2) Don't forget to Mention question paper set (P/Q/R/S) on top of page.  
 3) Figures to the right indicates full marks.  
 4) Assume suitable data wherever needed and mention it clearly.

**MCQ/Objective Type Questions**

Duration: 30 Minutes

Marks: 14

**Q.1 Choose the correct alternatives from the options.**

**14**

- 1) How many types of latches are there?
 

|        |         |
|--------|---------|
| a) One | b) Two  |
| c) Six | d) Four |
- 2) Which circuit doesn't have a memory unit?
 

|                  |                      |
|------------------|----------------------|
| a) Combinational | b) Sequential        |
| c) Both a and b  | d) None of the above |
- 3) A register is defined as \_\_\_\_\_.
 

|                                                                         |
|-------------------------------------------------------------------------|
| a) The group of latches for storing many bit of information             |
| b) The group of latches for storing n-bit of information                |
| c) The group of flip-flops suitable for storing one byte of information |
| d) The group of flip-flops suitable for storing binary information      |
- 4) In D register, 'D' stands for \_\_\_\_\_.
 

|          |              |
|----------|--------------|
| a) Delay | b) Decrement |
| c) Data  | d) Decay     |
- 5) In the common mode \_\_\_\_\_.
 

|                                                   |
|---------------------------------------------------|
| a) both inputs are grounded                       |
| b) the outputs are connected together             |
| c) an identical signal appears on both the inputs |
| d) the output signal are in-phase                 |
- 6) The other name for Miller Circuit is \_\_\_\_\_.
 

|                                 |                             |
|---------------------------------|-----------------------------|
| a) Non-Inverting Integrator     | b) Inverting Integrator     |
| c) Non-Inverting Differentiator | d) Inverting Differentiator |
- 7) The use of negative feedback \_\_\_\_\_.
 

|                                          |
|------------------------------------------|
| a) reduces the voltage gain of an Op-amp |
| b) makes the Op-amp gain increase        |
| c) makes no change                       |
| d) none of the above                     |

- 8) The Op-amp can amplify  
a) a.c. signals only                      b) d.c. signals only  
c) both a.c. and d.c. signals          d) Neither d.c. nor a.c. signals
- 9) A common-mode signal is applied to \_\_\_\_\_.  
a) the non-inverting input              b) the inverting input  
c) both inputs                              d) top of the tail resistor
- 10) What happen if any positive input signal is applied to open-loop configuration?  
a) Output reaches saturation level  
b) Output voltage swing's peak to peak  
c) Output will be a sine waveform  
d) Output will be a non-sinusoidal waveform
- 11) In which amplifier the output voltage is equal to the negative sum of all the inputs?  
a) Averaging amplifier                      b) inverting Summing amplifier  
c) Scaling amplifier                        d) All of the mentioned
- 12) Differentiation amplifier produces  
a) Output waveform as integration of input waveform  
b) Input waveform as integration of output waveform  
c) Output waveform as derivative of input waveform  
d) Input waveform as derivative of output waveform
- 13) Which of the following method is used to minimize Boolean expressions  
a) Fourier transform                      b) Gray code  
c) Karnaugh mapping                      d) Venitch method
- 14) The Boolean expression  $Y = XY + ZX$  is in the \_\_\_\_\_ form.  
a) Product-of-Sum                        b) Sum-of-Products  
c) Linear                                      d) None of the above

- Page 1 of 24

- 7) Superposition theorem is not applicable to network containing \_\_\_\_\_.  
a) nonlinear elements                      b) dependent voltage source  
c) dependent current source              d) transformers
- 8) An RC circuit has  $R = 2 \text{ ohm}$  and  $C = 4F$ . The time constant is \_\_\_\_\_.  
a) 0.5 s                                          b) 2 s  
c) 8 s                                              d) 1.5 s
- 9) Laplace transform of a unit ramp function is \_\_\_\_\_.  
a) 1                                                b) s  
c) 1/s                                              d) 1/s<sup>2</sup>
- 10)  $L[e^{iat}]$  is \_\_\_\_\_.  
a)  $1/(s + ia)$                                   b)  $1/s$   
c)  $1/(s - ia)$                                   d) none of these
- 11) A capacitor does not allow sudden changes in \_\_\_\_\_.  
a) currents                                        b) voltages  
c) both a and b                                  d) none of above
- 12) Transients are presents in the circuit when the circuit is having \_\_\_\_\_.  
a) R                                                b) L  
c) C                                                d) either b) or c)
- 13) A 2-port network using z-parameter representation is said to be reciprocal if \_\_\_\_\_.  
a)  $Z_{11} = Z_{22}$                                       b)  $Z_{12} = Z_{21}$   
c)  $Z_{12} = -Z_{21}$                                     d)  $Z_{11}Z_{22} - Z_{12}Z_{21} = 1$
- 14) Which parameters are widely used in transmission line theory?  
a) Z parameters                                  b) ABCD parameters  
c) Y parameters                                  d) h parameters

**Instructions:** 1) All questions are compulsory.  
 2) Figures to the right indicate full marks.

**Section – I**

**Q.2 Answer the following questions. (Any Four)**

**16**

a) Find the  $I_x$  &  $I_y$  for the circuit shown by mesh method.

b) Draw the dual of the network.

c) Derive the condition for maximum power transfer.

d) Find the Equivalent Resistance between terminal A & B.

- e) Verify the Reciprocity theorem for the network shown below.

**Q.3 Answer the following questions. (Any Two)**

12

- a) Find the voltage  $V_x$  by Superposition principle.

- b) Find Norton's equivalent network for the circuit shown.

- c) The graph of a network shown in fig. write  
 1) Incidence matrix  
 2) Tie set matrix  
 3) Cut set matrix

## Section – II

Q.4 Answer the following questions. (Any Four)

16

a) Determine transmission parameters for the given network.

b) Find impulse response of current  $i(t)$  in the network shown in fig.c) In the network shown, the switch is closed. Assuming all initial conditions as zero, find  $i$ ,  $di/dt$ ,  $d^2i/dt^2$  at  $t = 0 +$ .

d) Derive ABCD parameter in terms of Y-parameter.

e) In the network shown in fig. the switch is moved from 1 to 2 at  $t = 0$ . Steady state condition having reached in position 1. Determine  $i(t)$  for  $t > 0$  using Laplace transforms.

**Q.5 Answer the following questions. (Any Two)**

- a) In the network of fig. the switch is moved from a to b at  $t = 0$ . Determine  $i(t)$  and  $V_c(t)$  using Laplace transforms.

- b) Find Y and Z-Parameters of the network shown in Fig.

- c) For the Network shown in Fig. Switch is closed at  $t = 0$ , determine  $v$ ,  $dv/dt$  and  $d^2v/dt^2$  at  $t = 0 +$ .

## Max. Marks: 70

Marks: 14

14

- Page 7 of 24

- 9) The number of independent loops for a network with  $n$  nodes and  $b$  branches is \_\_\_\_\_.  
a)  $n - 1$   
b)  $b - n$   
c)  $b - n + 1$   
d) independent of the number of nodes
- 10) A practical current source consists of \_\_\_\_\_.  
a) An ideal current source in series with a resistance  
b) An ideal current source in parallel with a resistance  
c) Both are correct  
d) None of the above
- 11) In Norton's theorem, to find  $Z_N$  \_\_\_\_\_.  
a) All independent current sources are short circuited and independent voltage sources are open circuited  
b) All independent voltage and current sources are open circuited  
c) All independent voltage and current sources are short circuited  
d) All independent voltage sources are short circuited and independent current sources are open circuited
- 12) 3-ohm resistors are connected to form a triangle. What is the resistance between any two of the corners?  
a)  $\frac{3}{4}$  ohm  
b) 3 ohm  
c) 2 ohm  
d)  $\frac{4}{3}$  ohm
- 13) The nodal method of circuit analysis is based on \_\_\_\_\_.  
a) KVL and ohms law  
b) KCL and ohms law  
c) KVL and KCL  
d) KCL, KVL and ohms law
- 14) Superposition theorem is not applicable to network containing \_\_\_\_\_.  
a) nonlinear elements  
b) dependent voltage source  
c) dependent current source  
d) transformers

 3) Cut set matrix

## Section – II

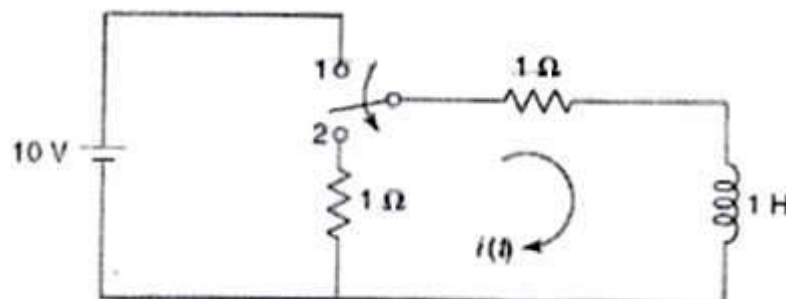

Q.4 Answer the following questions. (Any Four)

16

a) Determine transmission parameters for the given network.

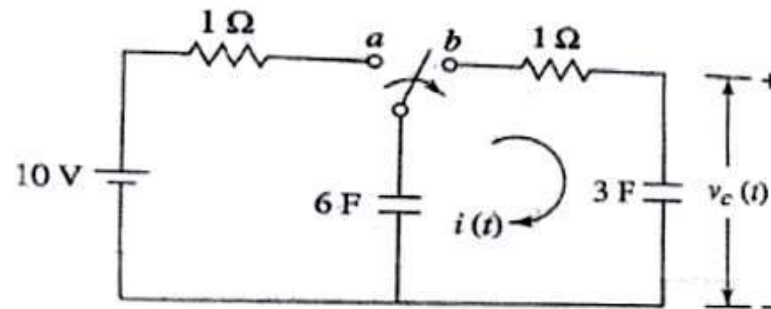

b) Find impulse response of current  $i(t)$  in the network shown in fig.c) In the network shown, the switch is closed. Assuming all initial conditions as zero, find  $i$ ,  $di/dt$ ,  $d^2i/dt^2$  at  $t = 0 +$ .

d) Derive ABCD parameter in terms of Y-parameter.

e) In the network shown in fig. the switch is moved from 1 to 2 at  $t = 0$ . Steady state condition having reached in position 1. Determine  $i(t)$  for  $t > 0$  using Laplace transforms.

**Q.5 Answer the following questions. (Any Two)**

- a) In the network of fig. the switch is moved from a to b at  $t = 0$ . Determine  $i(t)$  and  $V_c(t)$  using Laplace transforms.

- b) Find Y and Z-Parameters of the network shown in Fig.

- c) For the Network shown in Fig. Switch is closed at  $t = 0$ , determine  $v$ ,  $dv/dt$  and  $d^2v/dt^2$  at  $t = 0 +$ .

Day & Date: Friday, 10-03-2023  
 Time: 02:00 PM To 05:00 PM

Max. Marks: 70

- Instructions:** 1) Q. No. 1 is compulsory. It should be solved in the first 30 minutes in answer book. Page no 03 (Starting page of the Answer Book). Each question carries one mark.  
 2) Don't forget to Mention question paper set (P/Q/R/S) on top of page.  
 3) Figures to the right indicates full marks  
 4) Assume suitable data wherever needed and mention it clearly.

**MCQ/Objective Type Questions**

Duration: 30 Minutes

Marks: 14

**Q.1 Choose the correct alternatives from the options.**

**14**

- 1) The nodal method of circuit analysis is based on \_\_\_\_\_.  
 a) KVL and ohms law                      b) KCL and ohms law  
 c) KVL and KCL                              d) KCL, KVL and ohms law
- 2) Superposition theorem is not applicable to network containing \_\_\_\_\_.  
 a) nonlinear elements                      b) dependent voltage source  
 c) dependent current source              d) transformers
- 3) An RC circuit has  $R = 2 \text{ ohm}$  and  $C = 4F$ . The time constant is \_\_\_\_\_.  
 a) 0.5 s                                              b) 2 s  
 c) 8 s                                                d) 1.5 s
- 4) Laplace transform of a unit ramp function is \_\_\_\_\_.  
 a) 1                                                      b) s  
 c) 1/s                                                d) 1/s<sup>2</sup>
- 5)  $L[e^{iat}]$  is \_\_\_\_\_.  
 a)  $1/(s + ia)$                                       b)  $1/s$   
 c)  $1/(s - ia)$                                       d) none of these
- 6) A capacitor does not allow sudden changes in \_\_\_\_\_.  
 a) currents                                              b) voltages  
 c) both a and b                                      d) none of above
- 7) Transients are presents in the circuit when the circuit is having \_\_\_\_\_.  
 a) R                                                      b) L  
 c) C                                                      d) either b) or c)
- 8) A 2-port network using z-parameter representation is said to be reciprocal if \_\_\_\_\_.  
 a)  $Z_{11} = Z_{22}$                                       b)  $Z_{12} = Z_{21}$   
 c)  $Z_{12} = -Z_{21}$                                       d)  $Z_{11}Z_{22} - Z_{12}Z_{21} = 1$

- 9) Which parameters are widely used in transmission line theory?
- a) Z parameters
  - b) ABCD parameters
  - c) Y parameters
  - d) h parameters
- 10) In an electrical circuit dual of inductance is \_\_\_\_\_.
- a) conductance
  - b) resistance
  - c) capacitance
  - d) susceptance
- 11) The number of independent loops for a network with n nodes and b branches is \_\_\_\_\_.
- a)  $n - 1$
  - b)  $b - n$
  - c)  $b - n + 1$
  - d) independent of the number of nodes
- 12) A practical current source consists of \_\_\_\_\_.
- a) An ideal current source in series with a resistance
  - b) An ideal current source in parallel with a resistance
  - c) Both are correct
  - d) None of the above
- 13) In Norton's theorem, to find  $Z_N$  \_\_\_\_\_.
- a) All independent current sources are short circuited and independent voltage sources are open circuited
  - b) All independent voltage and current sources are open circuited
  - c) All independent voltage and current sources are short circuited
  - d) All independent voltage sources are short circuited and independent current sources are open circuited
- 14) 3-ohm resistors are connected to form a triangle. What is the resistance between any two of the corners?
- a)  $\frac{3}{4}$  ohm
  - b) 3 ohm
  - c) 2 ohm
  - d)  $\frac{4}{3}$  ohm

Seat  
No.

Duration: 30 Minutes

Marks: 14

**Q.1 Choose the correct alternatives from the options.**

**14**

- 1) In solving simultaneous linear equation which of the following method is iterative?
 

|                  |                 |
|------------------|-----------------|
| a) Factorisation | b) Jacobi       |
| c) Gauss-Seidel  | d) Both b and c |
- 2) Error in the Trapezoidal rule is of the order \_\_\_\_\_.
 

|          |          |
|----------|----------|
| a) $h^2$ | b) $h^3$ |
| c) $h^4$ | d) $h^5$ |
- 3) If  $\frac{dy}{dx} = x^2 + y^2$  and  $y(0) = 1$  then Picard's first approximation is \_\_\_\_\_.
 

|                            |                            |
|----------------------------|----------------------------|
| a) $1 + x$                 | b) $x + \frac{x^3}{3}$     |
| c) $1 + x - \frac{x^3}{3}$ | d) $1 + x + \frac{x^3}{3}$ |
- 4) Romberg method is used to solve \_\_\_\_\_.
 

|                                    |                 |
|------------------------------------|-----------------|
| a) Ordinary differential equations | b) Integration  |
| c) Partial differential equations  | d) All of these |
- 5) The quantity K obtained by Runge-Kutta method of fourth order for differential equation  $\frac{dy}{dx} = x^2 + y^2$  and  $y(0) = 1$  when  $h = 0.1$  is \_\_\_\_\_.
 

|        |         |
|--------|---------|
| a) 0.1 | b) 0    |
| c) 1   | d) 0.01 |
- 6) LU decomposition of matrix is possible only for \_\_\_\_\_.
 

|                      |                    |
|----------------------|--------------------|
| a) Invertible matrix | b) Singular matrix |
| c) Square matrix     | d) Ordered matrix  |
- 7) The order of convergence of Newton -Raphson method is \_\_\_\_\_.
 

|      |      |
|------|------|
| a) 3 | b) 2 |
| c) 1 | d) 0 |
- 8) If all eigen values are negative then the quadratic form  $X'AX$  is \_\_\_\_\_.
 

|                      |                      |
|----------------------|----------------------|
| a) Positive definite | b) Negative definite |
| c) Indefinite        | d) None              |

**S. Y. (B.Tech.) (Sem - II) (Old) (CBCS) Examination: Oct/Nov-2022**  
**ELECTRICAL ENGINEERING**  
**Numerical Methods and Linear Algebra**

Day & Date: Tuesday, 14-03-2023  
 Time: 02:00 PM To 05:00 PM

Max. Marks: 56

- Instructions:** 1) All questions are compulsory.  
 2) Use of non-programmable calculator is allowed.  
 3) Figures to the right indicate full marks.

**Section – I**

**Q.2 Answer the following questions. (Any Three) 09**

- Evaluate  $I = \int_0^1 \frac{1}{1+x} dx$  correct to three decimal places by Trapezoidal rule taking  $h = 0.25$ .
- Find the Positive root of the equation  $x = \cos x$  by Newton Raphson method.
- Find a double root of the equation  $x^3 - 5.4x^2 - 9.24x - 5.096 = 0$  given that it is near to  $x_0 = 1.5$ .
- Evaluate  $I = \int_0^1 \frac{x^2}{1+x^3} dx$  using Simpson's  $\frac{3}{8}$  th rule.
- Apply Runge-Kutta method of fourth order to find an approximate value of  $y$  when  $x = 0.1$  given that  $\frac{dy}{dx} = x + y$  and  $y(0) = 1$ .

**Q.3 Answer the following questions. (Any Three) 09**

- Solve the system by Gauss-Elimination method.  
 $x - y + z = 1, -3x + 2y - 3z = -6, 2x - 5y + 4z = 5$
- Solve by Picard's method  $\frac{dy}{dx} = y - x^2$  and  $y(0) = 1$  up to third approximation Hence find the value of  $y(0.2)$ .
- Find an iterative formula for  $\sqrt{N}$  (where N is an Positive number) and hence find  $\sqrt{5}$ .
- Solve by Gauss-Seidel method.  
 $10x - 5y - 2z = 3, 4x - 10y + 3z = -3, x + 6y + 10z = -3$
- Evaluate  $I = \int_{0.2}^{1.5} e^{-x^2} dx$  by Gaussian quadrature three-point formula.

**Q.4 Answer the following questions. (Any Two) 10**

- Apply factorisation method to solve the equations  
 $5x - 2y + z = 4, 7x + y - 5z = 8, 3x + 7y + 4z = 10$
- Evaluate  $I = \int_0^1 \frac{1}{1+x^2} dx$  using Romberg method, hence obtain an approximate value of  $\pi$ .
- Solve the differential equation  $\frac{dy}{dx} = 1 + xz, \frac{dz}{dx} = -xy$ , for  $x = 0.3$ . Using fourth order Runge-Kutta method and initial values are  $x = 0, y = 0, z = 1$  up to second approximation.

## Section – II

**Q.5 Answer the following questions. (Any Three)**

09

- a) Determine the rank of matrix A.

$$A = \begin{bmatrix} 2 & 5 & -3 & -4 & 8 \\ 4 & 7 & -4 & -3 & 9 \\ 6 & 9 & -5 & 2 & 4 \\ 0 & -9 & 6 & 5 & -6 \end{bmatrix}$$

- b) Find the bases for the null space of the matrix A.

$$A = \begin{bmatrix} -3 & 6 & -1 & 1 & -7 \\ 1 & -2 & 2 & 3 & -1 \\ 2 & -4 & 5 & 8 & -4 \end{bmatrix}$$

- c) Compute quadratic form
- $X'AX$
- for
- $A = \begin{bmatrix} 3 & 2 & 0 \\ 2 & 2 & 2 \\ 0 & 2 & 1 \end{bmatrix}$
- and
- $X = \begin{bmatrix} x \\ y \\ z \end{bmatrix}$

Also find eigen values of quadratic form  $X'AX$ .

- d) Determine whether the vectors are dependent or independent.

$$v_1 = \begin{bmatrix} 0 \\ 0 \\ 2 \end{bmatrix} \quad v_2 = \begin{bmatrix} 0 \\ 5 \\ -8 \end{bmatrix} \quad v_3 = \begin{bmatrix} -3 \\ 4 \\ 1 \end{bmatrix}$$

- e) Assume that T is linear transformation. Find standard matrix of
- $T: \mathbb{R}^3 \rightarrow \mathbb{R}^2$
- defined by
- $T(e_1) = (1,3)$
- $T(e_2) = (4,-7)$
- $T(e_3) = (-5,4)$

**Q.6 Answer the following questions. (Any Three)**

09

- a) Determine whether the vectors are orthogonal if orthogonal Normalize the vector to

$$\text{produce the orthonormal set } u = \begin{bmatrix} -2 \\ 3 \\ 1 \\ 3 \\ 2 \\ 3 \end{bmatrix} \quad v = \begin{bmatrix} 1 \\ 3 \\ 2 \\ 3 \\ 0 \end{bmatrix}$$

- b) Show that
- $\{v_1, v_2, v_3\}$
- is orthonormal basis for
- $\mathbb{R}^3$
- where

$$v_1 = \begin{bmatrix} 3 \\ \sqrt{11} \\ 1 \\ \sqrt{11} \\ 1 \\ \sqrt{11} \end{bmatrix} \quad v_2 = \begin{bmatrix} -1 \\ \sqrt{6} \\ 2 \\ \sqrt{6} \\ 1 \\ \sqrt{6} \end{bmatrix} \quad v_3 = \begin{bmatrix} -1 \\ \sqrt{66} \\ -4 \\ \sqrt{66} \\ 7 \\ \sqrt{66} \end{bmatrix}$$

- c) Describe all solutions of
- $AX = B$
- where
- $A = \begin{bmatrix} 3 & 5 & -4 \\ -3 & -2 & 4 \\ 6 & 1 & -8 \end{bmatrix}$
- $b = \begin{bmatrix} 7 \\ -1 \\ 4 \end{bmatrix}$

- d) Is
- $\begin{bmatrix} 4 \\ -3 \\ 1 \end{bmatrix}$
- an eigen vector of
- $\begin{bmatrix} 3 & 7 & 9 \\ -4 & -5 & 1 \\ 2 & 4 & 4 \end{bmatrix}$
- if so, Find Eigen Value.

- e) Let
- $A = \begin{bmatrix} -8 & -2 & -9 \\ 6 & 4 & 8 \\ 4 & 0 & 4 \end{bmatrix}$
- and
- $W = \begin{bmatrix} 2 \\ 1 \\ -2 \end{bmatrix}$

Is W is in NulA?

Is W is in ColA?

**Q.7 Answer the following questions. (Any Two)**

- a) Find the numerically largest eigen values of A by Power method.

$$A = \begin{bmatrix} 1 & 6 & 1 \\ 1 & 2 & 0 \\ 0 & 0 & 3 \end{bmatrix} \quad X_0 = \begin{bmatrix} 1 \\ 0 \\ 0 \end{bmatrix}$$

- b) Orthogonally diagonalize the matrix A.

$$A = \begin{bmatrix} 3 & -2 & 4 \\ -2 & 6 & 2 \\ 4 & 2 & 3 \end{bmatrix}$$

- c) Find the dimension of NulA & ColA of matrix A where.

$$A = \begin{bmatrix} 1 & 2 & -4 & 3 & 3 \\ 5 & 10 & -9 & -7 & 8 \\ 4 & 8 & -9 & -2 & 7 \\ -2 & -4 & 5 & 0 & 6 \end{bmatrix}$$

Duration: 30 Minutes

Marks: 14

**Q.1 Choose the correct alternatives from the options.**

**14**

- 1) If all eigen values are negative then the quadratic form  $X'AX$  is \_\_\_\_\_.  
 a) Positive definite                      b) Negative definite  
 c) Indefinite                                d) None
- 2)  $\|v\| = \sqrt{v \cdot v}$   
 a) True                                              b) False
- 3) If  $u = \begin{bmatrix} 7 \\ 1 \end{bmatrix}$ ,  $v = \begin{bmatrix} 3 \\ 2 \end{bmatrix}$  then  $\|u - v\|$   
 a)  $\sqrt{7}$                                               b)  $\sqrt{17}$   
 c)  $\sqrt{71}$                                               d)  $\sqrt{70}$
- 4) -2 is the eigen values of A where  $A = \begin{bmatrix} 2 & 4 & 3 \\ -4 & -6 & -3 \\ 3 & 3 & 1 \end{bmatrix}$   
 a) True                                              b) False
- 5) Let A be an  $n \times n$  invertible matrix then which of the following is not true \_\_\_\_\_.  
 a) The columns of A forms a basis of  $R^n$   
 b) The rows of A forms a basis of  $R^n$   
 c) Rank A = n  
 d)  $\text{Nul } A \neq \{0\}$
- 6) If a system of equations has no free variables then it has \_\_\_\_\_.  
 a) Unique solution                              b) No solution  
 c) Infinite solution                              d) None
- 7) Power method is used to find \_\_\_\_\_.  
 a) Smallest eigen values                      b) Zero Eigen values  
 c) Largest eigen values                      d) None
- 8) In solving simultaneous linear equation which of the following method is iterative?  
 a) Factorisation                                      b) Jacobi  
 c) Gauss-Seidel                                      d) Both b and c

- Solve by Gauss-Seidel method.  
 $10x - 5y - 2z = 3, 4x - 10y + 3z = -3, x + 6y + 10z = -3$
- Evaluate  $I = \int_{0.2}^{1.5} e^{-x^2} dx$  by Gaussian quadrature three-point formula.

**Q.4 Answer the following questions. (Any Two)**

**10**

- Apply factorisation method to solve the equations  
 $5x - 2y + z = 4, 7x + y - 5z = 8, 3x + 7y + 4z = 10$
- Evaluate  $I = \int_0^1 \frac{1}{1+x^2} dx$  using Romberg method, hence obtain an approximate value of  $\pi$ .
- Solve the differential equation  $\frac{dy}{dx} = 1 + xz, \frac{dz}{dx} = -xy$ , for  $x = 0.3$ . Using fourth order Runge-Kutta method and initial values are  $x = 0, y = 0, z = 1$  up to second approximation.

## Section – II

**Q.5 Answer the following questions. (Any Three)**

09

- a) Determine the rank of matrix A.

$$A = \begin{bmatrix} 2 & 5 & -3 & -4 & 8 \\ 4 & 7 & -4 & -3 & 9 \\ 6 & 9 & -5 & 2 & 4 \\ 0 & -9 & 6 & 5 & -6 \end{bmatrix}$$

- b) Find the bases for the null space of the matrix A.

$$A = \begin{bmatrix} -3 & 6 & -1 & 1 & -7 \\ 1 & -2 & 2 & 3 & -1 \\ 2 & -4 & 5 & 8 & -4 \end{bmatrix}$$

- c) Compute quadratic form
- $X'AX$
- for
- $A = \begin{bmatrix} 3 & 2 & 0 \\ 2 & 2 & 2 \\ 0 & 2 & 1 \end{bmatrix}$
- and
- $X = \begin{bmatrix} x \\ y \\ z \end{bmatrix}$

Also find eigen values of quadratic form  $X'AX$ .

- d) Determine whether the vectors are dependent or independent.

$$v_1 = \begin{bmatrix} 0 \\ 0 \\ 2 \end{bmatrix} \quad v_2 = \begin{bmatrix} 0 \\ 5 \\ -8 \end{bmatrix} \quad v_3 = \begin{bmatrix} -3 \\ 4 \\ 1 \end{bmatrix}$$

- e) Assume that T is linear transformation. Find standard matrix of
- $T: \mathbb{R}^3 \rightarrow \mathbb{R}^2$
- defined by
- $T(e_1) = (1,3)$
- $T(e_2) = (4,-7)$
- $T(e_3) = (-5,4)$

**Q.6 Answer the following questions. (Any Three)**

09

- a) Determine whether the vectors are orthogonal if orthogonal Normalize the vector to

$$\text{produce the orthonormal set } u = \begin{bmatrix} -2 \\ 3 \\ 1 \\ 3 \\ 2 \\ 3 \end{bmatrix} \quad v = \begin{bmatrix} 1 \\ 3 \\ 2 \\ 3 \\ 0 \end{bmatrix}$$

- b) Show that
- $\{v_1, v_2, v_3\}$
- is orthonormal basis for
- $\mathbb{R}^3$
- where

$$v_1 = \begin{bmatrix} 3 \\ \sqrt{11} \\ 1 \\ \sqrt{11} \\ 1 \\ \sqrt{11} \end{bmatrix} \quad v_2 = \begin{bmatrix} -1 \\ \sqrt{6} \\ 2 \\ \sqrt{6} \\ 1 \\ \sqrt{6} \end{bmatrix} \quad v_3 = \begin{bmatrix} -1 \\ \sqrt{66} \\ -4 \\ \sqrt{66} \\ 7 \\ \sqrt{66} \end{bmatrix}$$

- c) Describe all solutions of
- $AX = B$
- where
- $A = \begin{bmatrix} 3 & 5 & -4 \\ -3 & -2 & 4 \\ 6 & 1 & -8 \end{bmatrix}$
- $b = \begin{bmatrix} 7 \\ -1 \\ 4 \end{bmatrix}$

- d) Is
- $\begin{bmatrix} 4 \\ -3 \\ 1 \end{bmatrix}$
- an eigen vector of
- $\begin{bmatrix} 3 & 7 & 9 \\ -4 & -5 & 1 \\ 2 & 4 & 4 \end{bmatrix}$
- if so, Find Eigen Value.

- e) Let
- $A = \begin{bmatrix} -8 & -2 & -9 \\ 6 & 4 & 8 \\ 4 & 0 & 4 \end{bmatrix}$
- and
- $W = \begin{bmatrix} 2 \\ 1 \\ -2 \end{bmatrix}$

Is W is in NulA?

Is W is in ColA?

**Q.7 Answer the following questions. (Any Two)**

- a) Find the numerically largest eigen values of A by Power method.

$$A = \begin{bmatrix} 1 & 6 & 1 \\ 1 & 2 & 0 \\ 0 & 0 & 3 \end{bmatrix} \quad X_0 = \begin{bmatrix} 1 \\ 0 \\ 0 \end{bmatrix}$$

- b) Orthogonally diagonalize the matrix A.

$$A = \begin{bmatrix} 3 & -2 & 4 \\ -2 & 6 & 2 \\ 4 & 2 & 3 \end{bmatrix}$$

- c) Find the dimension of NulA & ColA of matrix A where.

$$A = \begin{bmatrix} 1 & 2 & -4 & 3 & 3 \\ 5 & 10 & -9 & -7 & 8 \\ 4 & 8 & -9 & -2 & 7 \\ -2 & -4 & 5 & 0 & 6 \end{bmatrix}$$

Day & Date: Tuesday, 14-03-2023  
 Time: 02:00 PM To 05:00 PM

Max. Marks: 70

- Instructions:** 1) Q. No. 1 is compulsory. It should be solved in the first 30 minutes in Answer book. Page no 03 (Starting page of the Answer Book). Each Question carries one mark.  
 2) Don't forget to Mention question paper set (P/Q/R/S) on top of page.  
 3) Figures to the right indicate full marks  
 4) Use of non-programmable calculator is allowed.

**MCQ/Objective Type Questions**

Duration: 30 Minutes

Marks: 14

**Q.1 Choose the correct alternatives from the options.**

**14**

- 1) -2 is the eigen values of A where  $A = \begin{bmatrix} 2 & 4 & 3 \\ -4 & -6 & -3 \\ 3 & 3 & 1 \end{bmatrix}$ 
  - a) True
  - b) False
- 2) Let A be an  $n \times n$  invertible matrix then which of the following is not true \_\_\_\_\_.
  - a) The columns of A forms a basis of  $R^n$
  - b) The rows of A forms a basis of  $R^n$
  - c) Rank A = n
  - d) Nul A  $\neq \{0\}$
- 3) If a system of equations has no free variables then it has \_\_\_\_\_.
  - a) Unique solution
  - b) No solution
  - c) Infinite solution
  - d) None
- 4) Power method is used to find \_\_\_\_\_.
  - a) Smallest eigen values
  - b) Zero Eigen values
  - c) Largest eigen values
  - d) None
- 5) In solving simultaneous linear equation which of the following method is iterative?
  - a) Factorisation
  - b) Jacobi
  - c) Gauss-Seidel
  - d) Both b and c
- 6) Error in the Trapezoidal rule is of the order \_\_\_\_\_.
  - a)  $h^2$
  - b)  $h^3$
  - c)  $h^4$
  - d)  $h^5$
- 7) If  $\frac{dy}{dx} = x^2 + y^2$  and  $y(0) = 1$  then Picard's first approximation is \_\_\_\_\_.
  - a)  $1 + x$
  - b)  $x + \frac{x^3}{3}$
  - c)  $1 + x - \frac{x^3}{3}$
  - d)  $1 + x + \frac{x^3}{3}$

- 8) Romberg method is used to solve \_\_\_\_\_.  
a) Ordinary differential equations    b) Integration  
c) Partial differential equations    d) All of these
- 9) The quantity K obtained by Runge-Kutta method of fourth order for differential equation  $\frac{dy}{dx} = x^2 + y^2$  and  $y(0) = 1$  when  $h = 0.1$  is \_\_\_\_\_.  
a) 0.1    b) 0  
c) 1    d) 0.01
- 10) LU decomposition of matrix is possible only for \_\_\_\_\_.  
a) Invertible matrix    b) Singular matrix  
c) Square matrix    d) Ordered matrix
- 11) The order of convergence of Newton -Raphson method is \_\_\_\_\_.  
a) 3    b) 2  
c) 1    d) 0
- 12) If all eigen values are negative then the quadratic form  $X'AX$  is \_\_\_\_\_.  
a) Positive definite    b) Negative definite  
c) Indefinite    d) None
- 13)  $\|v\| = \sqrt{v \cdot v}$   
a) True    b) False
- 14) If  $u = \begin{bmatrix} 7 \\ 1 \end{bmatrix}$ ,  $v = \begin{bmatrix} 3 \\ 2 \end{bmatrix}$  then  $\|u - v\|$   
a)  $\sqrt{7}$     b)  $\sqrt{17}$   
c)  $\sqrt{71}$     d)  $\sqrt{70}$

**Numerical Methods and Linear Algebra**

Day & Date: Tuesday, 14-03-2023  
 Time: 02:00 PM To 05:00 PM

Max. Marks: 56

- Instructions:** 1) All questions are compulsory.  
 2) Use of non-programmable calculator is allowed.  
 3) Figures to the right indicate full marks.

**Section – I**

**Q.2 Answer the following questions. (Any Three)**

**09**

- Evaluate  $I = \int_0^1 \frac{1}{1+x} dx$  correct to three decimal places by Trapezoidal rule taking  $h = 0.25$ .
- Find the Positive root of the equation  $x = \cos x$  by Newton Raphson method.
- Find a double root of the equation  $x^3 - 5.4x^2 - 9.24x - 5.096 = 0$  given that it is near to  $x_0 = 1.5$ .
- Evaluate  $I = \int_0^1 \frac{x^2}{1+x^3} dx$  using Simpson's  $\frac{3}{8}$  th rule.
- Apply Runge-Kutta method of fourth order to find an approximate value of  $y$  when  $x = 0.1$  given that  $\frac{dy}{dx} = x + y$  and  $y(0) = 1$ .

**Q.3 Answer the following questions. (Any Three)**

**09**

- Solve the system by Gauss-Elimination method.  
 $x - y + z = 1, -3x + 2y - 3z = -6, 2x - 5y + 4z = 5$
- Solve by Picard's method  $\frac{dy}{dx} = y - x^2$  and  $y(0) = 1$  up to third approximation Hence find the value of  $y(0.2)$ .
- Find an iterative formula for  $\sqrt{N}$  (where N is an Positive number) and hence find  $\sqrt{5}$ .
- Solve by Gauss-Seidel method.  
 $10x - 5y - 2z = 3, 4x - 10y + 3z = -3, x + 6y + 10z = -3$
- Evaluate  $I = \int_{0.2}^{1.5} e^{-x^2} dx$  by Gaussian quadrature three-point formula.

**Q.4 Answer the following questions. (Any Two)**

**10**

- Apply factorisation method to solve the equations  
 $5x - 2y + z = 4, 7x + y - 5z = 8, 3x + 7y + 4z = 10$
- Evaluate  $I = \int_0^1 \frac{1}{1+x^2} dx$  using Romberg method, hence obtain an approximate value of  $\pi$ .
- Solve the differential equation  $\frac{dy}{dx} = 1 + xz, \frac{dz}{dx} = -xy$ , for  $x = 0.3$ . Using fourth order Runge-Kutta method and initial values are  $x = 0, y = 0, z = 1$  up to second approximation.

## Section – II

## Q.5 Answer the following questions. (Any Three)

09

- a) Determine the rank of matrix A.

$$A = \begin{bmatrix} 2 & 5 & -3 & -4 & 8 \\ 4 & 7 & -4 & -3 & 9 \\ 6 & 9 & -5 & 2 & 4 \\ 0 & -9 & 6 & 5 & -6 \end{bmatrix}$$

- b) Find the bases for the null space of the matrix A.

$$A = \begin{bmatrix} -3 & 6 & -1 & 1 & -7 \\ 1 & -2 & 2 & 3 & -1 \\ 2 & -4 & 5 & 8 & -4 \end{bmatrix}$$

- c) Compute quadratic form
- $X'AX$
- for
- $A = \begin{bmatrix} 3 & 2 & 0 \\ 2 & 2 & 2 \\ 0 & 2 & 1 \end{bmatrix}$
- and
- $X = \begin{bmatrix} x \\ y \\ z \end{bmatrix}$

Also find eigen values of quadratic form  $X'AX$ .

- d) Determine whether the vectors are dependent or independent.

$$v_1 = \begin{bmatrix} 0 \\ 0 \\ 2 \end{bmatrix} \quad v_2 = \begin{bmatrix} 0 \\ 5 \\ -8 \end{bmatrix} \quad v_3 = \begin{bmatrix} -3 \\ 4 \\ 1 \end{bmatrix}$$

- e) Assume that T is linear transformation. Find standard matrix of
- $T: \mathbb{R}^3 \rightarrow \mathbb{R}^2$
- defined by
- $T(e_1) = (1,3)$
- $T(e_2) = (4,-7)$
- $T(e_3) = (-5,4)$

## Q.6 Answer the following questions. (Any Three)

09

- a) Determine whether the vectors are orthogonal if orthogonal Normalize the vector to

$$\text{produce the orthonormal set } u = \begin{bmatrix} -2 \\ 3 \\ 1 \\ 3 \\ 2 \\ 3 \end{bmatrix} \quad v = \begin{bmatrix} 1 \\ 3 \\ 2 \\ 3 \\ 0 \end{bmatrix}$$

- b) Show that
- $\{v_1, v_2, v_3\}$
- is orthonormal basis for
- $\mathbb{R}^3$
- where

$$v_1 = \begin{bmatrix} 3 \\ \sqrt{11} \\ 1 \\ \sqrt{11} \\ 1 \\ \sqrt{11} \end{bmatrix} \quad v_2 = \begin{bmatrix} -1 \\ \sqrt{6} \\ 2 \\ \sqrt{6} \\ 1 \\ \sqrt{6} \end{bmatrix} \quad v_3 = \begin{bmatrix} -1 \\ \sqrt{66} \\ -4 \\ \sqrt{66} \\ 7 \\ \sqrt{66} \end{bmatrix}$$

- c) Describe all solutions of
- $AX = B$
- where
- $A = \begin{bmatrix} 3 & 5 & -4 \\ -3 & -2 & 4 \\ 6 & 1 & -8 \end{bmatrix}$
- $b = \begin{bmatrix} 7 \\ -1 \\ 4 \end{bmatrix}$

- d) Is
- $\begin{bmatrix} 4 \\ -3 \\ 1 \end{bmatrix}$
- an eigen vector of
- $\begin{bmatrix} 3 & 7 & 9 \\ -4 & -5 & 1 \\ 2 & 4 & 4 \end{bmatrix}$
- if so, Find Eigen Value.

- e) Let
- $A = \begin{bmatrix} -8 & -2 & -9 \\ 6 & 4 & 8 \\ 4 & 0 & 4 \end{bmatrix}$
- and
- $W = \begin{bmatrix} 2 \\ 1 \\ -2 \end{bmatrix}$

Is W is in NulA?

Is W is in ColA?

**Q.7 Answer the following questions. (Any Two)**

- a) Find the numerically largest eigen values of A by Power method.

$$A = \begin{bmatrix} 1 & 6 & 1 \\ 1 & 2 & 0 \\ 0 & 0 & 3 \end{bmatrix} \quad X_0 = \begin{bmatrix} 1 \\ 0 \\ 0 \end{bmatrix}$$

- b) Orthogonally diagonalize the matrix A.

$$A = \begin{bmatrix} 3 & -2 & 4 \\ -2 & 6 & 2 \\ 4 & 2 & 3 \end{bmatrix}$$

- c) Find the dimension of NulA & ColA of matrix A where.

$$A = \begin{bmatrix} 1 & 2 & -4 & 3 & 3 \\ 5 & 10 & -9 & -7 & 8 \\ 4 & 8 & -9 & -2 & 7 \\ -2 & -4 & 5 & 0 & 6 \end{bmatrix}$$

 3) Figures to the right indicate full marks.

**Section – I**

**Q.2 Answer the following questions. (Any Three) 09**

- Evaluate  $I = \int_0^1 \frac{1}{1+x} dx$  correct to three decimal places by Trapezoidal rule taking  $h = 0.25$ .
- Find the Positive root of the equation  $x = \cos x$  by Newton Raphson method.
- Find a double root of the equation  $x^3 - 5.4x^2 - 9.24x - 5.096 = 0$  given that it is near to  $x_0 = 1.5$ .
- Evaluate  $I = \int_0^1 \frac{x^2}{1+x^3} dx$  using Simpson's  $\frac{3}{8}$  th rule.
- Apply Runge-Kutta method of fourth order to find an approximate value of  $y$  when  $x = 0.1$  given that  $\frac{dy}{dx} = x + y$  and  $y(0) = 1$ .

**Q.3 Answer the following questions. (Any Three) 09**

- Solve the system by Gauss-Elimination method.  
 $x - y + z = 1, -3x + 2y - 3z = -6, 2x - 5y + 4z = 5$
- Solve by Picard's method  $\frac{dy}{dx} = y - x^2$  and  $y(0) = 1$  up to third approximation Hence find the value of  $y(0.2)$ .
- Find an iterative formula for  $\sqrt{N}$  (where N is an Positive number) and hence find  $\sqrt{5}$ .
- Solve by Gauss-Seidel method.  
 $10x - 5y - 2z = 3, 4x - 10y + 3z = -3, x + 6y + 10z = -3$
- Evaluate  $I = \int_{0.2}^{1.5} e^{-x^2} dx$  by Gaussian quadrature three-point formula.

**Q.4 Answer the following questions. (Any Two) 10**

- Apply factorisation method to solve the equations  
 $5x - 2y + z = 4, 7x + y - 5z = 8, 3x + 7y + 4z = 10$
- Evaluate  $I = \int_0^1 \frac{1}{1+x^2} dx$  using Romberg method, hence obtain an approximate value of  $\pi$ .
- Solve the differential equation  $\frac{dy}{dx} = 1 + xz, \frac{dz}{dx} = -xy$ , for  $x = 0.3$ . Using fourth order Runge-Kutta method and initial values are  $x = 0, y = 0, z = 1$  up to second approximation.

## Section – II

09

**Q.5 Answer the following questions. (Any Three)**

- a) Determine the rank of matrix A.

$$A = \begin{bmatrix} 2 & 5 & -3 & -4 & 8 \\ 4 & 7 & -4 & -3 & 9 \\ 6 & 9 & -5 & 2 & 4 \\ 0 & -9 & 6 & 5 & -6 \end{bmatrix}$$

- b) Find the bases for the null space of the matrix A.

$$A = \begin{bmatrix} -3 & 6 & -1 & 1 & -7 \\ 1 & -2 & 2 & 3 & -1 \\ 2 & -4 & 5 & 8 & -4 \end{bmatrix}$$

- c) Compute quadratic form
- $X'AX$
- for
- $A = \begin{bmatrix} 3 & 2 & 0 \\ 2 & 2 & 2 \\ 0 & 2 & 1 \end{bmatrix}$
- and
- $X = \begin{bmatrix} x \\ y \\ z \end{bmatrix}$

Also find eigen values of quadratic form  $X'AX$ .

- d) Determine whether the vectors are dependent or independent.

$$v_1 = \begin{bmatrix} 0 \\ 0 \\ 2 \end{bmatrix} \quad v_2 = \begin{bmatrix} 0 \\ 5 \\ -8 \end{bmatrix} \quad v_3 = \begin{bmatrix} -3 \\ 4 \\ 1 \end{bmatrix}$$

- e) Assume that T is linear transformation. Find standard matrix of
- $T: \mathbb{R}^3 \rightarrow \mathbb{R}^2$
- defined by
- $T(e_1) = (1,3)$
- $T(e_2) = (4,-7)$
- $T(e_3) = (-5,4)$

**Q.6 Answer the following questions. (Any Three)**

09

- a) Determine whether the vectors are orthogonal if orthogonal Normalize the vector to

$$\text{produce the orthonormal set } u = \begin{bmatrix} -2 \\ 3 \\ 1 \\ 3 \\ 2 \\ -3 \\ 3 \end{bmatrix} \quad v = \begin{bmatrix} 1 \\ 3 \\ 2 \\ 3 \\ 0 \end{bmatrix}$$

- b) Show that
- $\{v_1, v_2, v_3\}$
- is orthonormal basis for
- $\mathbb{R}^3$
- where

$$v_1 = \begin{bmatrix} 3 \\ \sqrt{11} \\ 1 \\ \sqrt{11} \\ 1 \\ \sqrt{11} \end{bmatrix} \quad v_2 = \begin{bmatrix} -1 \\ \sqrt{6} \\ 2 \\ \sqrt{6} \\ 1 \\ \sqrt{6} \end{bmatrix} \quad v_3 = \begin{bmatrix} -1 \\ \sqrt{66} \\ -4 \\ \sqrt{66} \\ 7 \\ \sqrt{66} \end{bmatrix}$$

- c) Describe all solutions of
- $AX = B$
- where
- $A = \begin{bmatrix} 3 & 5 & -4 \\ -3 & -2 & 4 \\ 6 & 1 & -8 \end{bmatrix}$
- $b = \begin{bmatrix} 7 \\ -1 \\ 4 \end{bmatrix}$

- d) Is
- $\begin{bmatrix} 4 \\ -3 \\ 1 \end{bmatrix}$
- an eigen vector of
- $\begin{bmatrix} 3 & 7 & 9 \\ -4 & -5 & 1 \\ 2 & 4 & 4 \end{bmatrix}$
- if so, Find Eigen Value.

- e) Let
- $A = \begin{bmatrix} -8 & -2 & -9 \\ 6 & 4 & 8 \\ 4 & 0 & 4 \end{bmatrix}$
- and
- $W = \begin{bmatrix} 2 \\ 1 \\ -2 \end{bmatrix}$

Is W is in NulA?

Is W is in ColA?

**Q.7 Answer the following questions. (Any Two)**

- a) Find the numerically largest eigen values of A by Power method.

$$A = \begin{bmatrix} 1 & 6 & 1 \\ 1 & 2 & 0 \\ 0 & 0 & 3 \end{bmatrix} \quad X_0 = \begin{bmatrix} 1 \\ 0 \\ 0 \end{bmatrix}$$

- b) Orthogonally diagonalize the matrix A.

$$A = \begin{bmatrix} 3 & -2 & 4 \\ -2 & 6 & 2 \\ 4 & 2 & 3 \end{bmatrix}$$

- c) Find the dimension of NulA & ColA of matrix A where.

$$A = \begin{bmatrix} 1 & 2 & -4 & 3 & 3 \\ 5 & 10 & -9 & -7 & 8 \\ 4 & 8 & -9 & -2 & 7 \\ -2 & -4 & 5 & 0 & 6 \end{bmatrix}$$
