Day & Date: Thursday, 09-02-2023  
 Time: 02:00 PM To 05:00 PM

Max. Marks: 70

- Instructions:** 1) Q. No. 1 is compulsory and should be solved in first 30 minutes in Answer Book. Page No.3 (starting page of the Answer Book). Each questions carry one mark.  
 2) Don't forget to mention Question Paper Set (P/Q/R/S) at the top of the same page.  
 3) Figures to the right indicates full marks.

**MCQ/Objective Type Questions**

Duration: 30 Minutes

Marks: 14

**Q.1 Choose the correct alternatives from the options.**

**14**

- 1) The sequence of a traditional production supply chain is:
  - a) Supplier-Storage-Product-Storage-Distributor-Retailer-Customer
  - b) Supplier-Storage-Product-Storage-Retailer-Distributor-Customer
  - c) Supplier-Storage-Product-Distributor-Storage-Retailer-Customer
  - d) Storage-Supplier-Product-Storage-Distributor-Retailer-Customer
- 2) The process of product design is:
  - a) Ideation-Drawing- Analysing-Validation.
  - b) Drawing- Ideation - Analysing- Validation.
  - c) Drawing- Analysing- Validation- Ideation.
  - d) Ideation- Validation- Analysing- Drawing.
- 3) The activities of designing and producing a container for a product are known as:
  - a) Purchase-sale
  - b) Presentation
  - c) Promotion
  - d) Packaging
- 4) In which of the following stages of product life cycle a company reduces sales promotion to take advantage of heavy consumer demand?
  - a) Introduction
  - b) Growth
  - c) Maturity
  - d) Decline
- 5) As the product passes through different stages of a product life cycle, the product variety
  - a) increases
  - b) decreases and then increases
  - c) remains the same
  - d) decreases
- 6) Branding of product
  - a) makes it more saleable
  - b) differentiates it from other products in the market
  - c) make it more attractive for customer
  - d) gives customer rebate on MRP

- 7) When two separate companies or two divisions within the same company agree to place both of their respective brands on a particular product or enterprise, this arrangement is termed as
- a) Differential Branding
  - b) Cobranding
  - c) Dual Branding
  - d) Both Cobranding and Dual Branding
- 8) What does the term PLC stands for?
- a) Product life cycle
  - b) Production life cycle
  - c) Product long cycle
  - d) Production long cycle
- 9) When a new product arrives in the market with higher quality, higher value and new features better than its competitors. Such products are known as
- a) Superior products
  - b) Develop superior products
  - c) Unique superior products
  - d) New products
- 10) Which of the following is not a characteristic of "Market Introduction Stage" in PLC?
- a) Demands has to be created
  - b) Costs are low
  - c) Makes no money at this stage
  - d) Slow sales volume to start
  - e) There is little or no competition
- 11) Increased competition leads to price decrease, increasing public awareness, sales volume increase significantly are the characteristics of in PLC
- a) Mature stage
  - b) Decline stage
  - c) Growth stage
  - d) Market introduction stage
- 12) \_\_\_\_\_ includes review of sales, profit projections and cost for a new product, to find out whether it satisfied the company objective or not.
- a) Product Development
  - b) Business Analysis
  - c) Marketing Strategy
  - d) Test Marketing
- 13) Color and size of the product, brand and packaging are considered as
- a) Chemical features of product
  - b) Physical features of product
  - c) Product designing
  - d) Product manufacture
- 14) The most important performance dimension for product development project is
- a) Time to market
  - b) Time to target
  - c) Time to consumer
  - d) Time to seller

**T.Y.(B.Tech) (Sem - I) (New) (CBCS) Examination: Oct/Nov-2022**  
**ELECTRONICS ENGINEERING**  
**Digital Communication**

Day & Date: Wednesday, 25-01-2023  
 Time: 10:00 AM To 01:00 PM

Max. Marks: 70

- Instructions:** 1) Q. No. 1 is compulsory. It should be solved in the first 30 minutes in answer book. Page no 03 (Starting page of the Answer Book). Each question carries one mark.  
 2) Don't forget to Mention question paper set (P/Q/R/S) on top of page.  
 3) Figures to the right indicates full marks.  
 4) Assume data wherever necessary

**MCQ/Objective Type Questions**

Duration: 30 Minutes

Marks:14

**Q.1 Choose the correct alternatives from the given options.**

**14**

- 1) The process of converting the analog sample into discrete form is called
  - a) Modulation
  - b) Multiplexing
  - c) Quantization
  - d) Sampling
- 2) The characteristics of compressor in  $\mu$ -law companding are
  - a) Continuous in nature
  - b) Logarithmic in nature
  - c) Linear in nature
  - d) Discrete in nature
- 3) The error probability of a PCM is
  - a) Calculated using noise and inter symbol interference
  - b) Gaussian noise + error component due to inter symbol interference
  - c) Calculated using power spectral density
  - d) All of the above
- 4) For a binary symmetric channel, the random bits are given as
  - a) Logic 1 given by probability P and logic 0 by (1-P)
  - b) Logic 1 given by probability 1-P and logic 0 by P
  - c) Logic 1 given by probability P<sup>2</sup> and logic 0 by 1-P
  - d) Logic 1 given by probability P and logic 0 by (1 -P)<sup>2</sup>
- 5) Information rate is defined as
  - a) Information per unit time
  - b) Average number of bits of information per second
  - c) rH
  - d) All of the above
- 6) If two events are statistically independent then  $P(AB) = \underline{\hspace{2cm}}$ .
  - a) P(A)
  - b)  $P(B/A) \times P(A)$
  - c)  $P(A) \times P(B)$
  - d)  $P(A) + P(B)$
- 7) For hamming distance  $d_{min}$  and t errors in the received word, the condition to be able to correct the errors is
  - a)  $2t + 1 \leq d_{min}$
  - b)  $2t + 2 \leq d_{min}$
  - c)  $2t + 1 \leq 2d_{min}$
  - d) Both a and b

- 8) In Binary Phase Shift Keying system, the binary symbols 1 and 0 are represented by carrier with phase shift of
- a)  $\pi/2$
  - b)  $\pi$
  - c)  $2\pi$
  - d) 0
- 9) ASK modulated signal has the bandwidth
- a) Same as the bandwidth of baseband signal
  - b) Half the bandwidth of baseband signal
  - c) Double the bandwidth of baseband signal
  - d) None of the above
- 10) The probability of error of DPSK is \_\_\_\_\_ than that of BPSK.
- a) Higher
  - b) Lower
  - c) Same
  - d) Not predictable
- 11) In On-Off keying, the carrier signal is transmitted with signal value '1' and '0' indicates
- a) No carrier
  - b) Half the carrier amplitude
  - c) Amplitude of modulating signal
  - d) None of the above
- 12) For M equally likely messages,  $M \gg 1$ , if the rate of information  $R > C$ , the probability of error is
- a) Arbitrarily small
  - b) Close to unity
  - c) Not predictable
  - d) Unknown
- 13) Costas loop is a method for
- a) Frame synchronization
  - b) Carrier synchronization
  - c) Symbol synchronization
  - d) None of these
- 14) Why spread spectrum technique is inefficient for a single user?
- a) Large transmission bandwidth
  - b) Small transmission bandwidth
  - c) Fixed transmission bandwidth
  - d) Fixed null bandwidth

**T.Y.(B.Tech) (Sem - I) (New) (CBCS) Examination: Oct/Nov-2022**  
**ELECTRONICS ENGINEERING**  
**Digital Communication**

Day & Date: Wednesday, 25-01-2023  
 Time: 10:00 AM To 01:00 PM

Max. Marks: 56

**Instructions:** 1) Both sections are compulsory.  
 2) Figures to the right indicate full marks.

**Section - I**

**Q.2 Attempt any Two of the following.** **12**

- Given the alphabets with probabilities {0.4, 0.2, 0.2, 0.1, 0.1} calculate efficiency using Huffman codes Technique and Shannon Fanno coding Technique. Compare the result.
- Illustrate with a neat diagram PCM Generation and PCM Regeneration technique.
- Illustrate with a neat diagram Baseband binary data Transmission.

**Q.3 Attempt any Four of the following** **16**

- Discuss the different types of Sampling.
- What are the drawbacks of delta modulation? How they can be reduced.
- In a binary PCM a 'zero' occurs with probability 1/4 and 'one' occurs with probability 3/4, calculate information carried by each bit.
- Explain ISI problem how it can be reduced.
- Discuss why Quantization is important in Digital Communication & its types in brief

**Section - II**

**Q.4 Attempt Any Two of the following.** **12**

- With suitable diagram explain DSSS transmitter & receiver
- The generation matrix for (6,3) block code is given below find all code vectors of this code.

$$G = \begin{bmatrix} 1 & 0 & 0 & 1 & 1 & 0 \\ 0 & 1 & 0 & 0 & 1 & 1 \\ 0 & 0 & 1 & 1 & 1 & 1 \end{bmatrix}$$

What is the minimum distance between the code vectors?

How many errors can be detected? How many errors can be correct?

- With suitable waveforms explain QPSK & OQPSK.

**Q.5 Attempt Any Four of the following** **16**

- Explain with block diagram QAM.
- Explain with block diagram DPSK modulator and demodulator.
- State advantages and disadvantages of spread spectrum techniques.
- For message  $M = [0 \ 1 \ 0 \ 1]$  and  $g(x) = 1 + x + x^3$  show a systematic (7,4) cyclic code encoder circuit and stepwise encoding of M.
- Explain optimum receiver

### MCQ/Objective Type Questions

Marks:14

14

- 1) If two events are statistically independent then  $P(AB)=$  \_\_\_\_\_.  
a)  $P(A)$                                       b)  $P(B/A) \times P(A)$   
c)  $P(A) \times P(B)$                             d)  $P(A) + P(B)$
- 2) For hamming distance  $d_{min}$  and  $t$  errors in the received word, the condition to be able to correct the errors is  
a)  $2t + 1 \leq d_{min}$                           b)  $2t + 2 \leq d_{min}$   
c)  $2t + 1 \leq 2d_{min}$                         d) Both a and b
- 3) In Binary Phase Shift Keying system, the binary symbols 1 and 0 are represented by carrier with phase shift of  
a)  $\pi/2$     b)  $\pi$   
c)  $2\pi$     d) 0
- 4) ASK modulated signal has the bandwidth  
a) Same as the bandwidth of baseband signal  
b) Half the bandwidth of baseband signal  
c) Double the bandwidth of baseband signal  
d) None of the above
- 5) The probability of error of DPSK is \_\_\_\_\_ than that of BPSK.  
a) Higher                                      b) Lower  
c) Same                                         d) Not predictable
- 6) In On-Off keying, the carrier signal is transmitted with signal value '1' and '0' indicates  
a) No carrier  
b) Half the carrier amplitude  
c) Amplitude of modulating signal  
d) None of the above

- 7) For  $M$  equally likely messages,  $M \gg 1$ , if the rate of information  $R > C$ , the probability of error is
- a) Arbitrarily small
  - b) Close to unity
  - c) Not predictable
  - d) Unknown
- 8) Costas loop is a method for
- a) Frame synchronization
  - b) Carrier synchronization
  - c) Symbol synchronization
  - d) None of these
- 9) Why spread spectrum technique is inefficient for a single user?
- a) Large transmission bandwidth
  - b) Small transmission bandwidth
  - c) Fixed transmission bandwidth
  - d) Fixed null bandwidth
- 10) The process of converting the analog sample into discrete form is called
- a) Modulation
  - b) Multiplexing
  - c) Quantization
  - d) Sampling
- 11) The characteristics of compressor in  $\mu$ -law companding are
- a) Continuous in nature
  - b) Logarithmic in nature
  - c) Linear in nature
  - d) Discrete in nature
- 12) The error probability of a PCM is
- a) Calculated using noise and inter symbol interference
  - b) Gaussian noise + error component due to inter symbol interference
  - c) Calculated using power spectral density
  - d) All of the above
- 13) For a binary symmetric channel, the random bits are given as
- a) Logic 1 given by probability  $P$  and logic 0 by  $(1-P)$
  - b) Logic 1 given by probability  $1-P$  and logic 0 by  $P$
  - c) Logic 1 given by probability  $P^2$  and logic 0 by  $1-P$
  - d) Logic 1 given by probability  $P$  and logic 0 by  $(1-P)^2$
- 14) Information rate is defined as
- a) Information per unit time
  - b) Average number of bits of information per second
  - c)  $rH$
  - d) All of the above

**Q.4 Attempt Any Two of the following.** **12**

- With suitable diagram explain DSSS transmitter & receiver
- The generation matrix for (6,3) block code is given below find all code vectors of this code.

$$G = \begin{bmatrix} 1 & 0 & 0 & 1 & 1 & 0 \\ 0 & 1 & 0 & 0 & 1 & 1 \\ 0 & 0 & 1 & 1 & 1 & 1 \end{bmatrix}$$

What is the minimum distance between the code vectors?

How many errors can be detected? How many errors can be correct?

- With suitable waveforms explain QPSK & OQPSK.

**Q.5 Attempt Any Four of the following** **16**

- Explain with block diagram QAM.
- Explain with block diagram DPSK modulator and demodulator.
- State advantages and disadvantages of spread spectrum techniques.
- For message  $M = [0 \ 1 \ 0 \ 1]$  and  $g(x) = 1 + x + x^3$  show a systematic (7,4) cyclic code encoder circuit and stepwise encoding of M.
- Explain optimum receiver

\_\_\_\_\_

## Max. Marks: 70

14

- Page 1 of 16

- 9) The FIR filter of order M gives linear phase response if \_\_\_\_\_.
  - a)  $h(n) < \infty$
  - b)  $h(n) = h(-n)$
  - c)  $h(n) = h(M - 1 - n)$
  - d) None of these
- 10) The mapping at bilinear transformation is \_\_\_\_\_.
  - a) One to one mapping
  - b) Many to one mapping
  - c) Many to many mapping
  - d) None of the above
- 11) Butterworth filters have \_\_\_\_\_.
  - a) Wide transition region
  - b) Sharp transition region
  - c) Oscillation in transition region
  - d) Maximally flat passband
- 12) Which realization method minimizes the delay elements?
  - a) Direct form-I
  - b) Direct form-II
  - c) Cascade
  - d) Parallel
- 13) Which of the following properties are true for an IIR filter designed using bilinear Transform method?
  - a) Requires the use of anti aliasing filter
  - b) Requires prewarping the filter cutoff frequencies
  - c) Not suited for the design of HP filters
  - d) Results in unique mapping from analog to digital frequencies
- 14) The addressing mode that is convenient for FFT computation is \_\_\_\_\_.
  - a) Indirect addressing
  - b) Circular mode addressing
  - c) Bit reversed addressing
  - d) Memory mapped addressing

 Time: 10:00 AM To 01:00 PM

Max. Marks: 56

**Instructions:** 1) Both Section are compulsory.  
 2) Figures to the right indicates full marks.

**Section – I**

**Q.2 Attempt any four**

20

- Draw and explain the block diagram of DSP system
- The first five points of the 8 Point DFT of a real valued sequence are  $\{28, -4 + j9.565, -4 + j4, -4 + j1.656, -4\}$ . Determine remaining three points.
- Draw direct form realization structure of the system whose impulse response is  $h(n) = \{1, 3, -2, 4, 5\}$
- Find the circular convolution of the two finite duration sequences  $x_1(n) = \{1, -1, -2, 3, -1\}$   $x_2(n) = \{1, 2, 3\}$ .
- Consider the signal  $X(n) = \{1, 4, 5, 2, -4, 6\}$ , obtain following sequences  
 $x_1(n) = x((-n))_6$   
 $x_2(n) = x((n - 2))_6$   
 $x_3(n) = x((n + 1))_6$

**Q.3 Attempt any one.**

08

- Find the output  $y(n)$  of a filter whose impulse response is  $h(n) = \{1, 1, 1\}$  and input signal  $x(n) = \{3, -1, 0, 1, 3, 2, 0, 1, 2, 1\}$  using overlap save method.
- Find DFT of the sequence  $x(n) = \{1, 2, 3, 4, 4, 3, 2, 1\}$  using DIT FFT algorithm.

**Section – II**

**Q.4 Answer any four questions.**

20

- Compare FIR filters & IIR filters. Why IIR filters cannot give linear phase characteristics? Explain.
- Given  $\alpha_p = 2$  dB,  $\alpha_s = 10$  dB,  $\Omega_p = 20$  rad/sec,  $\Omega_s = 30$  rad/sec. Determine the order of the Butterworth filter.
- Explain in detail the Multiply and Accumulate (MAC) unit of digital signal processor.
- Draw and explain the structure for  $4 \times 4$  Barrel Multiplier for unsigned numbers.
- Explain in brief windowing. Compare different window characteristics based on transition width and stop band attenuation.

**Q.5 Attempt any one.**

- a) The desired frequency response of a low pass filter is

$$H_d(e^{j\omega}) = \begin{cases} e^{-2j\omega} & -\frac{\pi}{4} \leq \omega \leq \frac{\pi}{4} \\ 0 & \frac{\pi}{4} \leq |\omega| \leq \frac{\pi}{4} \end{cases}$$

Determine  $h_d(n)$ . Also determine  $h(n)$  using symmetric Rectangular window of length 5.

- b) Explain steps for designing IIR filter using Impulse Invariance method. For the analog transfer function  $H(s) = \frac{1}{(s+1)(s+2)}$  determine  $H(z)$  using impulse Invariance method. Assume  $T = 1$  sec.

 2) Don't forget to mention Question Paper Set (P/Q/R/S) at the top of the same page.  
 3) Figures to the right indicates full marks.  
 4) Assume suitable data if necessary.

**MCQ/Objective Type Questions**

Duration: 30 Minutes

Marks: 14

**Q.1 Choose the correct alternatives from the options.**

**14**

- 1) Which of the following is not true for IIR filters \_\_\_\_\_.
  - a) Impulse response duration is infinite
  - b) They have poles
  - c) They give linear phase response
  - d) None of above
- 2) The FIR filter of order M gives linear phase response if \_\_\_\_\_.
  - a)  $h(n) < \infty$
  - b)  $h(n) = h(-n)$
  - c)  $h(n) = h(M - 1 - n)$
  - d) None of these
- 3) The mapping at bilinear transformation is \_\_\_\_\_.
  - a) One to one mapping
  - b) Many to one mapping
  - c) Many to many mapping
  - d) None of the above
- 4) Butterworth filters have \_\_\_\_\_.
  - a) Wide transition region
  - b) Sharp transition region
  - c) Oscillation in transition region
  - d) Maximally flat passband
- 5) Which realization method minimizes the delay elements?
  - a) Direct form-I
  - b) Direct form-II
  - c) Cascade
  - d) Parallel
- 6) Which of the following properties are true for an IIR filter designed using bilinear Transform method?
  - a) Requires the use of anti aliasing filter
  - b) Requires prewarping the filter cutoff frequencies
  - c) Not suited for the design of HP filters
  - d) Results in unique mapping from analog to digital frequencies
- 7) The addressing mode that is convenient for FFT computation is \_\_\_\_\_.
  - a) Indirect addressing
  - b) Circular mode addressing
  - c) Bit reversed addressing
  - d) Memory mapped addressing
- 8) The value of the twiddle factor  $W_8^{13}$  is \_\_\_\_\_.
  - a)  $-j$
  - b)  $1$
  - c)  $-0.707 + j 0.707$
  - d)  $j$

**T.Y (B.Tech.) (Sem-I) (New) (CBCS) Examination: Oct/Nov - 2022**  
**ELECTRONICS ENGINEERING**  
**Microcontrollers**

Day & Date: Friday, 24-02-2023  
 Time: 10:00 AM To 01:00 PM

Max. Marks: 56

**Instructions:** 1) Both Section are compulsory.  
 2) Assume suitable data wherever needed and mention it clearly.

**Section – I**

**Q.2 Answer any four questions. 16**

- List the three buses found in computer systems and state briefly the purpose of each bus.
- What is the purpose of program counter, stack pointer and instruction decoder?
- What are the CPU different registers and their purpose in 8051 microcontroller?
- Define addressing mode. Explain the different addressing modes in 8051 with suitable example.
- Draw and explain the bit formats of TMOD and TCON registers.

**Q.3 Answer any two questions. 12**

- What are the functions of the following 8051 pins?  
ALE EA- PSEN- RST XTAL1 & XTAL2
- Write 8051 program to transfer the message "YES" serially at 9600 baud, 8-bit data, 1 stop bit. Do this continuously.
- What are the modes of operation of Timer in 8051? Write a program Timer 0 to generate a square wave of 20.5 KHz.

**Section – II**

**Q.4 Answer any four questions. 16**

- List out the features of PIC 16F877.
- How internal memory is organized in PIC 16F877?
- Interface one digit seven segment display to 8051 and write a program to display "0" to "9".
- Explain Timer1 operation in PIC 16F877.
- How WDT and BOR internally operate?

**Q.5 Answer any two questions. 12**

- Draw and explain interfacing of ADC 0808/09 to 8051. Write a program to covert analog voltage on channel 1 to digital.
- Draw and explain interfacing of a unipolar stepper motor to 8051 and write a program to rotate the stepper motor in clockwise direction continuously.
- How do you operate CCP module in PWM mode? Explain PWM operation.

**Seat  
No.**

Max. Marks: 70

Marks: 14

14

- Page 4 of 12

- 9) This program code will be executed continuously:  
STAT: MOV A, #01h  
JNZ A, STAT
  - a) True
  - b) False
- 10) The 8051 has \_\_\_\_\_ 16-bit counter/timers.
  - a) 1
  - b) 2
  - c) 3
  - d) 4
- 11) MOV A, @R1 will: \_\_\_\_\_.
  - a) copy R1 to the accumulator
  - b) copy the accumulator to R1
  - c) copy the contents of memory whose address is in R1 to the accumulator
  - d) copy the accumulator to the contents of memory whose address is in R1
- 12) When the 8051 is reset and the  $\overline{EA}$  line is HIGH, the program counter points to the first program instruction in the: \_\_\_\_\_.
  - a) Internal code memory
  - b) External code memory
  - c) Internal data memory
  - d) External data memory
- 13) The I/O ports that are used as address and data for external memory are: \_\_\_\_\_.
  - a) ports 1 and 2
  - b) ports 1 and 3
  - c) ports 0 and 2
  - d) ports 0 and 3
- 14) LCALL instruction of 8051 is \_\_\_\_\_ byte instruction.
  - a) one
  - b) two
  - c) three
  - d) four

- a) List the three buses found in computer systems and state briefly the purpose of each bus.
- b) What is the purpose of program counter, stack pointer and instruction decoder?
- c) What are the CPU different registers and their purpose in 8051 microcontroller?
- d) Define addressing mode. Explain the different addressing modes in 8051 with suitable example.
- e) Draw and explain the bit formats of TMOD and TCON registers.

**Q.3 Answer any two questions. 12**

- a) What are the functions of the following 8051 pins?  
ALE EA- PSEN- RST XTAL1 & XTAL2
- b) Write 8051 program to transfer the message "YES" serially at 9600 baud, 8-bit data, 1 stop bit. Do this continuously.
- c) What are the modes of operation of Timer in 8051? Write a program Timer 0 to generate a square wave of 20.5 KHz.

**Section – II**

**Q.4 Answer any four questions. 16**

- a) List out the features of PIC 16F877.
- b) How internal memory is organized in PIC 16F877?
- c) Interface one digit seven segment display to 8051 and write a program to display "0" to "9".
- d) Explain Timer1 operation in PIC 16F877.
- e) How WDT and BOR internally operate?

**Q.5 Answer any two questions. 12**

- a) Draw and explain interfacing of ADC 0808/09 to 8051. Write a program to covert analog voltage on channel 1 to digital.
- b) Draw and explain interfacing of a unipolar stepper motor to 8051 and write a program to rotate the stepper motor in clockwise direction continuously.
- c) How do you operate CCP module in PWM mode? Explain PWM operation.

**Seat  
No.**

Max. Marks: 70

Marks: 14

14

- Page 7 of 12

- 9) When the 8051 is reset and the  $\overline{EA}$  line is HIGH, the program counter points to the first program instruction in the: \_\_\_\_\_.  
a) Internal code memory                      b) External code memory  
c) Internal data memory                      d) External data memory
- 10) The I/O ports that are used as address and data for external memory are: \_\_\_\_\_.  
a) ports 1 and 2                                  b) ports 1 and 3  
c) ports 0 and 2                                  d) ports 0 and 3
- 11) LCALL instruction of 8051 is \_\_\_\_\_ byte instruction.  
a) one    b) two  
c) three    d) four
- 12) In 8051 \_\_\_\_\_ bit of \_\_\_\_\_ register can be used to double the baud rate.  
a) SM0, SCON                                      b) SMOD, PCON  
c) Gate, TMOD                                      d) SM0, PCON
- 13) Operating CCP1 module in PWM mode, PWM period can be set by writing to \_\_\_\_\_ register.  
a) PR1    b) TMR2  
c) PR2    d) CCP1RL
- 14) In PIC to make Port B an input port, we must place \_\_\_\_\_ in register \_\_\_\_\_.  
a) 00 h, PORTB                                      b) FF h, PORTB  
c) 00 h, TRISB                                      d) FF h, TRISB

Marks: 14

## 14

- 1) Take an odd man out- NEFT, IRCTC, RTGS, PayTM, \_\_\_\_\_.  
a) NEFT                                      b) IRCTC  
c) RTGS                                      d) PayTM
- 2) A typical organization is devoted to the principle of \_\_\_\_\_.  
a) bureaucracy                              b) efficiency  
c) information                              d) knowledge
- 3) A typical business undergoes which of below pressure \_\_\_\_\_.  
a) legal                                      b) political  
c) technological                              d) all of these
- 4) Key member leaving project team is an example of \_\_\_\_\_.  
a) internal risk                              b) forecast  
c) Issue                                      d) all of these
- 5) A working model that is functionally equivalent to a component of the product is called \_\_\_\_\_.  
a) spiral model                              b) v model  
c) waterfall model                              d) none of these
- 6) Two types of database query are \_\_\_\_\_ and \_\_\_\_\_.  
a) select, update                              b) action, select  
c) action, update                              d) action, retrieval
- 7) Which of below is a sources of data into an enterprise?  
a) Clicksteram at web site                              b) CRM input  
c) supply chain input                              d) all of these
- 8) Take odd man out- MS Project, MS Access, DB2, Oracle \_\_\_\_\_.  
a) MS Project                              b) MS Access  
c) DB2                                      d) Oracle

- 9) Collection of computing systems used by organization in information system is referred as- \_\_\_\_\_.  
a) e infrastructure                      b) information technology  
c) Processes                              d) all of these
- 10) Which of below is not a major economical impact of information system on organization \_\_\_\_\_.  
a) shrink in organization size              b) change in workplace  
c) reduction in transaction cost          d) outsourcing of services
- 11) Which of below is a legal issue with e commerce \_\_\_\_\_.  
a) admissible evidence                      b) digital signature  
c) Jurisdiction                              d) all of these
- 12) Software is a \_\_\_\_\_ product.  
a) Complex                                  b) intangible  
c) non conform                              d) all of these
- 13) \_\_\_\_\_ are software systems designed to support machine to machine interaction over a network.  
a) Information technology                  b) Cloud computing  
c) Web services                              d) Apps
- 14) A business analyst is an example of \_\_\_\_\_.  
a) data worker                                  b) information worker  
c) knowledge worker                          d) manager

2) Don't forget to mention Question Paper Set (P/Q/R/S) at the top of the same page.  
3) Figures to the right indicates full marks.

**MCQ/Objective Type Questions**

Duration: 30 Minutes

Marks: 14

**Q.1 Choose the correct alternatives from the options.**

**14**

- 1) In the Production of Wheat, all of the following are variable factors that are used by the farmer except:
  - a) The seed and fertilizer used when the crop is planted
  - b) The field that has been cleared of trees and in which the crop is planned
  - c) The tractor used by the farmer in planting and cultivating not only wheat but also corn and barley
  - d) The Number of Hours that the farmer spends in cultivating the wheat fields
- 2) Identify the Correct statement:
  - a) The Average Product is at its maximum when marginal product is equal to Average Product
  - b) The Law of Increasing returns to scale relates to the effect of changes in factor Proportions
  - c) Economies of scale arise only because of indivisibilities of factor proportions
  - d) Internal economies of scale can accrue when industry expands beyond optimum
- 3) Which of the following is not a characteristic of land?
  - a) Its supply for the economy is limited
  - b) It's a immobile
  - c) Its usefulness depends on human efforts
  - d) It is produced by our forefathers
- 4) Which of the following statement is true?
  - a) Accumulation of capital depends solely on income of individuals
  - b) Saving can be influenced by government policies
  - c) External economies go with size and internal economies with location
  - d) The Supply curve of labour is an upward slopping curve

- 5) Diminishing Marginal Returns Implies
- a) Decreasing Average variable Costs
  - b) Decreasing Marginal Costs
  - c) Increasing Marginal Costs
  - d) Decreasing Average fixed costs
- 6) In Economics we use the term scarcity to mean
- a) Abstract scarcity and lack of resource in less developed countries
  - b) Relative scarcity i.e. scarcity in relation to the wants of the society
  - c) Scarcity during times of business failure and natural calamities
  - d) Scarcity caused on account of excessive consumption by the rich
- 7) The Marginal, Average and Total Product Curves encountered by the firm production in the short run exhibit all of the following relationship except:
- a) When total product rising, average and marginal product may be either rising or falling
  - b) When marginal product is negative, total product and average product are falling
  - c) When average product is at a maximum, marginal product equals average product, and total product is rising
  - d) When marginal product is at a maximum, average product equals marginal product, and total product is rising
- 8) What implication (s) does resource scarcity have for the satisfaction of wants?
- a) Not all wants can be satisfied
  - b) We will never be faced with the need to make a choice
  - c) We must develop ways to decrease our individual wants
  - d) The discovery of new natural resource is necessary to increase our ability to satisfy wants
- 9) Which of the following is a normative statement
- a) Planned economies allocate resources via government department
  - b) Most transitional economies have experienced problems of falling output and rising prices over the past decade
  - c) There is a greater degree of consumer sovereignty in market economies than planned economies
  - d) Reducing inequality should be a major priority for mixed economies
- 10) Demand for a commodity refers to:
- a) Desire backed by ability to pay for the commodity
  - b) Need for the commodity and willingness to pay for it
  - c) The quantity demanded of that commodity at a certain price
  - d) The quantity of the commodity demanded at a certain price during any particular period of time
- 11) Contraction of demand is a result of:
- a) Decrease in the number of consumers
  - b) Increase in the price of the good concerned
  - c) Increase in the price of other goods
  - d) Decrease in the income of purchasers

- 12)** All but one of the following are assumed to remain the same while drawing an individual's demand curve for a commodity. Which one is it?
- a) The preference of the individual
  - b) His monetary income
  - c) Price of the commodity
  - d) Price of related goods
- 13)** A Study of how increase in the corporate income tax rate will affect the national unemployment rate is an example of
- a) Macro-Economics
  - b) Descriptive Economics
  - c) Micro-Economics
  - d) Normative Economics
- 14)** Identify the Factor which Generally keeps the Price-Elasticity of demand for a Good low
- a) Variety of uses for that good
  - b) Very low Price of a Commodity
  - c) Close Substitute for that Good
  - d) High Proportion of the Consumer's Income spent on it

P

**T.Y. (B.Tech.) (Sem-I) (New) (CBCS) Examination: Oct/Nov-2022**  
**ELECTRONICS ENGINEERING**  
**Managerial Economics**

Day &amp; Date: Tuesday, 07-02-2023

Max. Marks: 56

Time: 10:00 AM To 01:00 PM

**Instructions:** 1) All questions are compulsory.  
 2) Figures to right indicate full marks.

**Section – I**

**Q.2 Solve any four questions.**

16

- What are the Basic Functions of Business Managers? How does Economics helps Business managers in Performing their Functions?
- What is law of Equimarginal Utility? What is the Condition for Equi-Marginal Utility?
- Define Budget Line. How is basis of deriving the Budget Line? What purpose does budget line serves in consumer Analysis?
- What is the Major Area of Business Decision Making? How does Economic theory Contribute to Managerial decisions?
- Explain the concepts separately
  - Income Elasticity of demand
  - Price elasticity of demand
  - Elasticity of Price expectations
- What is the condition for Consumer Equilibrium under Ordinal utility approach to consumer analysis? Explain and Illustrate Graphically.

**Q.3 Solve any two questions.**

12

- What are major Macro-economics Issues Related Directly to business decision making? What is their Significance in Business Decisions?
- What is meant by Elasticity of Demand? How is the Elasticity of Demand measured?
- Explain the Regression method for estimating a linear function, and estimating the error term.

**Section – II**

**Q.4 Solve any Four questions.**

16

- What is Purpose of demand for casting? What are the necessary steps that need to be taken for Forecasting demand for a Product?
- What are the opinion Poll method and Delphi Method?
- What are the methods used for Forecasting demand? Discuss in detail the survey method of Forecasting demand for consumer goods. What are the advantages and Limitations?
- State and Illustrate Cobb-Douglas Production Function. What are Properties of Cobb-Douglas Production Function.
- What is Linear Programming? Discuss usefulness of its application to Practical Business problems.
- What is meant by Production? Distinguish between Fixed and Variable Inputs.

**Q.5 Solve any three questions.**

- a) What is the meaning of demand in economics? How is demand different from desire, want and need?
- b) Explain and illustrate the relationship Between Marginal Cost, Average Cost and Total Cost Assuming a short run non linear cost function?
- c) Plot the following data on a graph and Find the trend equation for sales.

Year	1970	1971	1972	1973	1974	1975	1976
Total Sales (units)	1150	1020	3050	3000	2950	3060	4030

Max. Marks: 70

- Instructions:** 1) Q. No. 1 is compulsory and should be solved in first 30 minutes in Answer Book. Page No.3 (starting page of the Answer Book). Each questions carry one mark.  
 2) Don't forget to mention Question Paper Set (P/Q/R/S) at the top of the same page.  
 3) Figures to the right indicates full marks.

**MCQ/Objective Type Questions**

Duration: 30 Minutes

Marks: 14

**Q.1 Choose the correct alternatives from the options.**

**14**

- 1) What implication (s) dose resource scarcity have for the satisfaction of wants?
  - a) Not all wants can be satisfied
  - b) We Will never be faced with the need to make a choices
  - c) We must develop ways to decrease our individual wants
  - d) The discovery of new natural resource is necessary to increase our ability to satisfy wants
- 2) Which of the following is a normative statement
  - a) Planned economies allocate resources via government department
  - b) Most transitional economies have experienced problems of falling output and rising prices our past decade
  - c) There is a greater degree of consumer sovereignty in market economies than planned economies
  - d) Reducing in inequality should be major priority for mixed economies
- 3) Demand for a commodity refers to:
  - a) Desire backed by ability to pay for the commodity
  - b) Need for the commodity and willingness to pay for it
  - c) The quantity demanded of that commodity at a certain price
  - d) The quantity of the commodity demanded at a certain price during any particular period of time
- 4) Contraction of demand is result of:
  - a) Decrease.in the number of Consumers
  - b) Increase in the price of the good concerned
  - c) Increase in the price of other goods
  - d) Decrease in the income of purchasers

- 5) All but one of the following are assumed to remain the same while drawing an individual's demand curve for a commodity. Which one is it?
- a) The preference of the individual
  - b) His monetary income
  - c) Price of the commodity
  - d) Price of related goods
- 6) A Study of how increase in the corporate income tax rate will affect the national unemployment rate is an example of
- a) Macro-Economics
  - b) Descriptive Economics
  - c) Micro-Economics
  - d) Normative Economics
- 7) Identify the Factor which Generally keeps the Price-Elasticity of demand for a Good low
- a) Variety of uses for that good
  - b) Very low Price of a Commodity
  - c) Close Substitute for that Good
  - d) High Proportion of the Consumer's Income spent on it
- 8) In the Production of Wheat, all of the following are variable factors that are used by the farmer except:
- a) The seed and fertilizer used when the crop is planted
  - b) The field that has been cleared of trees and in which the crop is planned
  - c) The tractor used by the farmer in planting and cultivating not only wheat but also corn and barley
  - d) The Number of Hours that the farmer spends in cultivating the wheat fields
- 9) Identify the Correct statement:
- a) The Average Product is at its maximum when marginal product is equal to Average Product
  - b) The Law of Increasing returns to scale relates to the effect of changes in factor Proportions
  - c) Economies of scale arise only because of indivisibilities of factor proportions
  - d) Internal economies of scale can accrue when industry expands beyond optimum
- 10) Which of the following is not a characteristic of land?
- a) Its supply for the economy is limited
  - b) It's a immobile
  - c) Its usefulness depends on human efforts
  - d) It is produced by our forefathers
- 11) Which of the following statement is true?
- a) Accumulation of capital depends solely on income of individuals
  - b) Saving can be influenced by government policies
  - c) External economies go with size and internal economies with location
  - d) The Supply curve of labour is an upward slopping curve

- 12)** Diminishing Marginal Returns Implies
- a) Decreasing Average variable Costs
  - b) Decreasing Marginal Costs
  - c) Increasing Marginal Costs
  - d) Decreasing Average fixed costs
- 13)** In Economics we use the term scarcity to mean
- a) Abstract scarcity and lack of resource in less developed countries
  - b) Relative scarcity i.e. scarcity in relation to the wants of the society
  - c) Scarcity during times of business failure and natural calamities
  - d) Scarcity caused on account of excessive consumption by the rich
- 14)** The Marginal, Average and Total Product Curves encountered by the firm production in the short run exhibit all of the following relationship except:

**Q.2 Solve any four questions.** **16**

- a) What are the Basic Functions of Business Managers? How does Economics helps Business managers in Performing their Functions?
- b) What is law of Equimarginal Utility? What is the Condition for Equi-Marginal Utility?
- c) Define Budget Line. How is basis of deriving the Budget Line? What purpose does budget line serves in consumer Analysis?
- d) What is the Major Area of Business Decision Making? How does Economic theory Contribute to Managerial decisions?
- e) Explain the concepts separately
  - 1) Income Elasticity of demand
  - 2) Price elasticity of demand
  - 3) Elasticity of Price expectations
- f) What is the condition for Consumer Equilibrium under Ordinal utility approach to consumer analysis? Explain and Illustrate Graphically.

**Q.3 Solve any two questions.** **12**

- a) What are major Macro-economics Issues Related Directly to business decision making? What is their Significance in Business Decisions?
- b) What is meant by Elasticity of Demand? How is the Elasticity of Demand measured?
- c) Explain the Regression method for estimating a linear function, and estimating the error term.

**Section – II**

**Q.4 Solve any Four questions.** **16**

- a) What is Purpose of demand for casting? What are the necessary steps that need to be taken for Forecasting demand for a Product?
- b) What are the opinion Poll method and Delphi Method?
- c) What are the methods used for Forecasting demand? Discuss in detail the survey method of Forecasting demand for consumer goods. What are the advantages and Limitations?
- d) State and Illustrate Cobb-Douglas Production Function. What are Properties of Cobb-Douglas Production Function.
- e) What is Linear Programming? Discuss usefulness of its application to Practical Business problems.
- f) What is meant by Production? Distinguish between Fixed and Variable Inputs.

**Q.5 Solve any three questions.**

- a) What is the meaning of demand in economics? How is demand different from desire, want and need?
- b) Explain and illustrate the relationship Between Marginal Cost, Average Cost and Total Cost Assuming a short run non linear cost function?
- c) Plot the following data on a graph and Find the trend equation for sales.

Year	1970	1971	1972	1973	1974	1975	1976
Total Sales (units)	1150	1020	3050	3000	2950	3060	4030

- 8) \_\_\_\_\_ the application of rules and procedures to people in a consistent and avoiding arbitrarily decision-making and without discrimination on bases other than merit.
- a) Discrimination
  - b) Employees Privacy
  - c) Right and Duties
  - d) Due Process and Lay off
- 9) The claim that employees should also have a certain degree influence on their tasks, their job environmental and their company goals that is a \_\_\_\_\_.
- a) Discrimination
  - b) Employee Privacy
  - c) Right to participation
  - d) Due Process and Lay off
- 10) CSO stands for what?
- a) Civil Society Organization
  - b) Consumer Society Organization
  - c) Central Statistics Office
  - d) None of these
- 11) \_\_\_\_\_ seek to punish the target company for its actions. Therefore, rather than communicating displeasure, the boycotters actively seek to cause the firm harm, usually by aiming for significant erosion of sales.
- a) Instrumental Boycotts
  - b) Catalytic Boycott
  - c) Expressive Boycott
  - d) Punitive Boycott
- 12) Customer is stakeholder of organization.
- a) True
  - b) False
- 13) \_\_\_\_\_ is the long- term maintenance of the system according to environmental and economical and Social consideration.
- a) Security
  - b) Sustainability
  - c) Business Ethics
  - d) None of above
- 14) Characteristics of Civil Society are \_\_\_\_\_.
- a) Social change
  - b) Social accountability
  - c) Community empowerment

2) Figures to right indicate full marks.

**Section – I**

**Q.2 Solve any four of the following.** **16**

- a) Explain Sustainability - a key Context for Business Ethics.
- b) Write a short note on: Importance of Business Ethics.
- c) Illustrate the methods of assessing ethical performance.
- d) What are key features of Corporate?
- e) What are main contents of code of ethics?

**Q.3 Solve any two of the following.** **12**

- a) Explain the components of business ethics management.
- b) What is stakeholder theory of firm?
- c) Explain in detail Normative Ethical Theories.

**Section – II**

**Q.4 Solve any four of the following.** **16**

- a) Explain the ethical issues in firm-employee relationship.
- b) Explain the functions of CSO.
- c) Write a short note on marketing & consumer.
- d) List & explain the ethical issues in CSO.
- e) Write a short note on globalization-business government relation.

**Q.5 Solve any two of the following.** **12**

- a) Explain the concept of Data identity and security.
- b) Explain the Ethics of pollution control.
- c) What are Ethical challenges of globalization?

Day & Date: Tuesday, 07-02-2023  
 Time: 10:00 AM To 01:00 PM

Max. Marks: 70

- Instructions:** 1) Q. No. 1 is compulsory and should be solved in first 30 minutes in Answer Book. Page No.3 (starting page of the Answer Book). Each question carry one mark.  
 2) Don't forget to mention Question Paper Set (P/Q/R/S) at the top of the same page.  
 3) Figures to the right indicates full marks.

**MCQ/Objective Type Questions**

Duration: 30 Minutes

Marks: 14

**Q.1 Choose the correct alternatives from the options.**

**14**

- 1) \_\_\_\_\_ the application of rules and procedures to people in a consistent and avoiding arbitrarily decision-making and without discrimination on bases other than merit.
 

a) Discrimination	b) Employees Privacy
c) Right and Duties	d) Due Process and Lay off
- 2) The claim that employees should also have a certain degree influence on their tasks, their job environmental and their company goals that is a \_\_\_\_\_.
 

a) Discrimination	b) Employee Privacy
c) Right to participation	d) Due Process and Lay off
- 3) CSO stands for what?
 

a) Civil Society Organization	b) Consumer Society Organization
c) Central Statistics Office	d) None of these
- 4) \_\_\_\_\_ seek to punish the target company for its actions. Therefore, rather than communicating displeasure, the boycotters actively seek to cause the firm harm, usually by aiming for significant erosion of sales.
 

a) Instrumental Boycotts	b) Catalytic Boycott
c) Expressive Boycott	d) Punitive Boycott
- 5) Customer is stakeholder of organization.
 

a) True	b) False
---------	----------
- 6) \_\_\_\_\_ is the long- term maintenance of the system according to environmental and economical and Social consideration.
 

a) Security	b) Sustainability
c) Business Ethics	d) None of above
- 7) Characteristics of Civil Society are \_\_\_\_\_.
 

a) Social change	b) Social accountability
c) Community empowerment	d) All of above

- 8) \_\_\_\_\_ is the progressive eroding of the relevance of territorial bases for social, economical and political activities process and relations.
- a) Globalization
  - b) Privatization
  - c) Liberalization
  - d) None of these
- 9) \_\_\_\_\_ is development that meets the needs of the present without compromising the ability of future generations to meet their own needs.
- a) Accountability
  - b) Sustainability
  - c) Globalization
  - d) All of these
- 10) \_\_\_\_\_ are moral philosophy or ethics concerned with criteria of what is morally right and wrong.
- a) Normative Ethical Theories
  - b) Descriptive Ethics Theories
  - c) Traditional Ethics Theories
  - d) All of these
- 11) Model of ethical decision-making seek to represent things \_\_\_\_\_.
- a) The different stages in decision-making
  - b) The different influences on that process
  - c) Both a and b
  - d) None of these
- 12) Which is a stage of Ethical Decision Making?
- a) Make Moral Judgement
  - b) Individual Factors
  - c) Situational Factors
  - d) All of these
- 13) What is Full Form Of CSR?
- a) Corporate Social Reporting
  - b) Corporate Social Research
  - c) Corporate Social Responsibility
  - d) None of these
- 14) Which responsibility makes corporations to do what is right and fair even when they are not compelled to do so by the legal framework?
- a) Ethical Responsibility
  - b) Legal Responsibility
  - c) Philanthropic Responsibility
  - d) Economic Responsibility

 2) Don't forget to Mention question paper set (P/Q/R/S) on top of page.  
 3) Figures to the right indicates full marks.  
 4) Assume suitable data wherever needed and mention it clearly.

**MCQ/Objective Type Questions**

Duration: 30 Minutes

Marks: 14

**Q.1 Choose the correct alternatives from the options.**

**14**

- 1) If a machine can change its course of action based on the external environment on its own, the machine is called?
  - a) Mobile
  - b) Intelligent
  - c) Both a) and b)
  - d) None of the above
- 2) The "Father of Artificial Intelligence" is \_\_\_\_\_.
  - a) Alan Turing
  - b) Charles Babbage
  - c) John McCarthy
  - d) None of the above
- 3) Which of the following are heuristic search algorithms?
  - a) Best First Search Algorithm
  - b) A\*Search Algorithm
  - c) Both a) and b)
  - d) None of the above
- 4) Which of the following is the common language for Artificial Intelligence?
  - a) Python
  - b) Java
  - c) Lisp
  - d) PHP
- 5) Which of the following is a type of artificial intelligence agent?
  - a) Learning AI Agent
  - b) Simple Reflex AI Agent
  - c) Goal-Based AI Agent
  - d) All of the above
- 6) Which of the following are appropriate levels for a knowledge- based AI agent?
  - a) Knowledge Level
  - b) Logical Level
  - c) Implementation Level
  - d) All of the above
- 7) Decisions of Victory/Defeat are made in Game trees using which algorithm?
  - a) DFS
  - b) BFS
  - c) Heuristic Search
  - d) Min/Max Algorithm
- 8) What are the different types of Artificial Intelligence approaches?
  - a) Strong Approach
  - b) Weak Approach
  - c) Applied Approach
  - d) All of the above

- 9)** How an AI agent does interact with its environment?
- a) Using sensors and perceivers      b) Using only sensors
  - c) Using only perceivers              d) None of the above
- 10)** The correct ways to solve a problem of state-space search are?
- a) Forward from the initial state      b) Backward from the goal
  - c) Both a) and b)                      d) None of the above
- 11)** Out of the given options, which of the following algorithms uses the least memory?
- a) DFS                                      b) BFS
  - c) Both a) and b) are the same      d) Cannot be compared
- 12)** What is the work of Task Environment and Rational Agents?
- a) Problem and Solution              b) Solution and Problem
  - c) Observation and Problem          d) Observation and Solution
- 13)** How is a decision reached upon by a decision tree?
- a) No test                                  b) Single Test
  - c) Double Test                          d) Multiple sequences of tests
- 14)** The different types of machine learning are?
- a) Supervised                              b) Unsupervised
  - c) Reinforcement                        d) All of the above

 Time: 10:00 AM To 01:00 PM

Max. Marks: 70

- Instructions:** 1) Q. No. 1 is compulsory. It should be solved in the first 30 minutes in answer book. Page no 03 (Starting page of the Answer Book). Each question carries one mark.  
 2) Don't forget to Mention question paper set (P/Q/R/S) on top of page.  
 3) Figures to the right indicates full marks.  
 4) Assume suitable data wherever needed and mention it clearly.

**MCQ/Objective Type Questions**

Duration: 30 Minutes

Marks: 14

**Q.1 Choose the correct alternatives from the options.**

**14**

- 1) Out of the given options, which of the following algorithms uses the least memory?
  - a) DFS
  - b) BFS
  - c) Both a) and b) are the same
  - d) Cannot be compared
- 2) What is the work of Task Environment and Rational Agents?
  - a) Problem and Solution
  - b) Solution and Problem
  - c) Observation and Problem
  - d) Observation and Solution
- 3) How is a decision reached upon by a decision tree?
  - a) No test
  - b) Single Test
  - c) Double Test
  - d) Multiple sequences of tests
- 4) The different types of machine learning are?
  - a) Supervised
  - b) Unsupervised
  - c) Reinforcement
  - d) All of the above
- 5) If a machine can change its course of action based on the external environment on its own, the machine is called?
  - a) Mobile
  - b) Intelligent
  - c) Both a) and b)
  - d) None of the above
- 6) The "Father of Artificial Intelligence" is \_\_\_\_\_.
  - a) Alan Turing
  - b) Charles Babbage
  - c) John McCarthy
  - d) None of the above
- 7) Which of the following are heuristic search algorithms?
  - a) Best First Search Algorithm
  - b) A\*Search Algorithm
  - c) Both a) and b)
  - d) None of the above
- 8) Which of the following is the common language for Artificial Intelligence?
  - a) Python
  - b) Java
  - c) Lisp
  - d) PHP
- 9) Which of the following is a type of artificial intelligence agent?
  - a) Learning AI Agent
  - b) Simple Reflex AI Agent
  - c) Goal-Based AI Agent
  - d) All of the above

- 10)** Which of the following are appropriate levels for a knowledge- based AI agent?
- |                         |                     |
|-------------------------|---------------------|
| a) Knowledge Level      | b) Logical Level    |
| c) Implementation Level | d) All of the above |
- 11)** Decisions of Victory/Defeat are made in Game trees using which algorithm?
- |                     |                      |
|---------------------|----------------------|
| a) DFS              | b) BFS               |
| c) Heuristic Search | d) Min/Max Algorithm |
- 12)** What are the different types of Artificial Intelligence approaches?
- |                     |                     |
|---------------------|---------------------|
| a) Strong Approach  | b) Weak Approach    |
| c) Applied Approach | d) All of the above |
- 13)** How an AI agent does interact with its environment?
- |                                 |                       |
|---------------------------------|-----------------------|
| a) Using sensors and perceivers | b) Using only sensors |
| c) Using only perceivers        | d) None of the above  |
- 14)** The correct ways to solve a problem of state-space search are?
- |                                   |                           |
|-----------------------------------|---------------------------|
| a) Forward from the initial state | b) Backward from the goal |
| c) Both a) and b)                 | d) None of the above      |

**T.Y (B.Tech.) (Sem-I) (New) (CBCS) Examination: Oct/Nov– 2022**  
**ELECTRONICS ENGINEERING**  
**Artificial Intelligence**

Day & Date: Thursday, 16-02-2023  
Time: 10:00 AM To 01:00 PM

Max. Marks: 56

**Instructions:** 1) All question are compulsory.  
2) Figures to the right indicates full marks.

**Section – I**

**Q.2 Solve any FOUR questions.** **16**

- a) Explain AO\* Search Algorithm with example.
- b) Define Artificial Intelligence and what are the Applications of AI?
- c) State & explain different types of Agents.
- d) Write short notes.
  - 1) Description logics
  - 2) Situation calculus
- e) Differentiate Informed & Uninformed search.

**Q.3 Solve any TWO questions.** **12**

- a) Explain Heuristic Search Algorithm with example.
- b) What is Knowledge based system? Explain First Order Logic in details.
- c) State Different types of uniformed search algorithm. Explain any one in details along with advantages & disadvantages.

**Section – II**

**Q.4 Solve any FOUR questions.** **16**

- a) Write a note on Bayesian Network.
- b) Explain in detail about conditional Probability.
- c) What is elementary game theory? Explain with example.
- d) What is Utility Theory? How it will become helpful for talking decision?
- e) Describe the issues in knowledge representation.

**Q.5 Solve any TWO questions.** **12**

- a) Explain Decision Tree in details with one example.
- b) Explain Probability and Bayes' theorem along with example.
- c) What is Reinforcement learning? Explain types of Reinforcement learning.

Time: 10:00 AM To 01:00 PM

Max. Marks: 56

**Instructions:** 1) All questions are compulsory.  
2) Figures to the right indicates full.

**Section – I**

**Q.2 Attempt any FOUR. 16**

- a) Explain data scale types with suitable example.
- b) Write short note on “Structured Features”
- c) Explain kind of features in data science.
- d) What is meant by Dimensionality Reduction?
- e) Illustrate singular value decomposition method

**Q.3 Attempt any TWO. 12**

- a) Explain in detail Principal Component Analysis (PCA).
- b) Explain how to improve the data quality.
- c) What do you mean by incomplete features?

**Section – II**

**Q.4 Attempt any FOUR. 16**

- a) Explain the process of binarization.
- b) What is the Objective Function of k-Means?
- c) Explain the image gradients.
- d) Explain the convolution layer of Neural Network.
- e) Write variance scaling with examples.

**Q.5 Attempt any TWO. 12**

- a) Explain in detail k-means clustering.
- b) Explain the manual feature Extraction HOG.
- c) Explain the log and power transform and its generalization in brief.

Day & Date: Thursday, 16-02-2023  
 Time: 10:00 AM To 01:00 PM

Max. Marks: 70

- Instructions:** 1) Q. No. 1 is compulsory. It should be solved in the first 30 minutes in answer book. Each question carries one mark  
 2) Figures to the right indicates full marks.  
 3) Use of non-programmable scientific calculator is allowed.

**MCQ/Objective Type Questions**

Duration: 30 Minutes

Marks:14

**Q.1 Choose the correct alternatives from the given options.**

**14**

- 1) Which of the following managed components is responsible for relaying messages between communications channels such as MQTT, IPC, and the cloud?
  - a) MQTT bridge
  - b) Moquette
  - c) device shadows
  - d) None of these
- 2) Managing streams for real-time processing applies to the \_\_\_\_\_.
  - a) edge and the cloud
  - b) edge only
  - c) cloud only
  - d) None of these
- 3) Which of the following managed components is responsible for synchronizing the state between the edge and the cloud?
  - a) MQTT bridge
  - b) Moquette
  - c) device shadows
  - d) None of these
- 4) All of the logic of the component could be contained in the recipe life cycle scripts and does not require an \_\_\_\_\_.
  - a) artifact
  - b) config file
  - c) program
  - d) certificate
- 5) Bounded context and ubiquitous language are distinct concepts within \_\_\_\_\_.
  - a) data-driven design
  - b) domain-driven design
  - c) architecture-driven design
  - d) None of these
- 6) \_\_\_\_\_ can be deployed to IoT Greengrass devices either locally or remotely.
  - a) Group Version
  - b) Definition version
  - c) Components
  - d) Function Definition
- 7) The {"temperature": 70} message is an example of \_\_\_\_\_ data and is serializable.
  - a) Structured
  - b) Unstructured
  - c) Semi structured
  - d) None of above
- 8) \_\_\_\_\_ is not the most optimized data format for big data processing.
  - a) Apache ORC
  - b) Parquet
  - c) AVRO
  - d) JSON

- 9) Image data from a camera and transmitted as binary data is an example of \_\_\_\_\_ data.
- a) Structured
  - b) Unstructured
  - c) Semi structured
  - d) None of above
- 10) Who is the primary persona at the heart of any industrial solution?
- a) industrialists
  - b) operators and maintainers
  - c) programmers
  - d) data injectors
- 11) A single component can both reset configuration and \_\_\_\_\_ in a new configuration.
- a) restart
  - b) replace
  - c) merge
  - d) None of above
- 12) IoT Greengrass operates at the \_\_\_\_\_ layer of the OSI model.
- a) Physical
  - b) Network
  - c) Application
  - d) None of above
- 13) Edge devices can belong to multiple \_\_\_\_\_ and each thing group can define one active deployment.
- a) thing groups
  - b) thing artifacts
  - c) IAM roles
  - d) policies
- 14) Which of the following managed components is responsible for deploying a local MQTT broker and connecting leaf devices?
- a) Bridge
  - b) Moquette
  - c) Device shadows
  - d) None of these

**MCQ/Objective Type Questions**

Duration: 20 Minutes

Marks:10

**Q.1 Choose the correct alternatives from the given options. 10**

- 1) Microeconomic theory deals with \_\_\_\_\_.
  - a) Economic behavior of individual economic decision-making units
  - b) Economy as whole
  - c) Trade relations
  - d) Economic growth of the society
- 2) In a mixed economy which sector (s) is / are found \_\_\_\_\_.
  - a) Private only
  - b) Public only
  - c) None
  - d) Both (a) public and (b) private
- 3) Who is known as father of economics?
  - a) Adam Smith
  - b) Prof. A. Samuelson
  - c) Alfred Marshall
  - d) J. R. Hicks
- 4) Which of these is an economic activity?
  - a) Father teaching his son at home instead of spending on coaching
  - b) A housewife making food for the family on her own
  - c) A hair dresser doing hair cut designing on payment
  - d) A singer giving a show on his son's wedding anniversary
- 5) Market system means: \_\_\_\_\_.
  - a) Socialism
  - b) Capitalism
  - c) A place where goods are traded
  - d) All of the above
- 6) Micro and Macro are not two independent approaches to economic analysis but they are complementary to each other.
  - a) False
  - b) True
  - c) Partly true
  - d) Partly False
- 7) Variable factor means those factors of production \_\_\_\_\_.
  - a) which can be only changed in the long run
  - b) which can be changed in the short run
  - c) which can be never be changed
  - d) All of the above

- 8)** Which one of the following is not the function of money?
- a) Medium of exchange
  - b) Measure of Happiness
  - c) Standard of deferred payment
  - d) Store of value
- 9)** Which one of the following is the objective of the RBI?
- a) To maintain term deposits of the households
  - b) To ensure price stability
  - c) To arrange loans for the businessmen
  - d) None of the above
- 10)** Which one of the following cost can never become zero?
- |                  |                  |
|------------------|------------------|
| a) Average cost  | b) Fixed cost    |

Marks:10

**Q.1 Choose the correct alternatives from the given options. 10**

- 1) Micro and Macro are not two independent approaches to economic analysis but they are complementary to each other.
  - a) False
  - b) True
  - c) Partly true
  - d) Partly False
- 2) Variable factor means those factors of production \_\_\_\_\_.
  - a) which can be only changed in the long run
  - b) which can be changed in the short run
  - c) which can be never be changed
  - d) All of the above
- 3) Which one of the following is not the function of money?
  - a) Medium of exchange
  - b) Measure of Happiness
  - c) Standard of deferred payment
  - d) Store of value
- 4) Which one of the following is the objective of the RBI?
  - a) To maintain term deposits of the households
  - b) To ensure price stability
  - c) To arrange loans for the businessmen
  - d) None of the above
- 5) Which one of the following cost can never become zero?
  - a) Average cost
  - b) Fixed cost
  - c) Marginal cost
  - d) Variable cost
- 6) Microeconomic theory deals with \_\_\_\_\_.
  - a) Economic behavior of individual economic decision-making units
  - b) Economy as whole
  - c) Trade relations
  - d) Economic growth of the society
- 7) In a mixed economy which sector (s) is / are found \_\_\_\_\_.
  - a) Private only
  - b) Public only
  - c) None
  - d) Both (a) public and (b) private

- 8)** Who is known as father of economics?
- a) Adam Smith
  - b) Prof. A. Samuelson
  - c) Alfred Marshall
  - d) J. R. Hicks
- 9)** Which of these is an economic activity?
- a) Father teaching his son at home instead of spending on coaching
  - b) A housewife making food for the family on her own
  - c) A hair dresser doing hair cut designing on payment
  - d) A singer giving a show on his son's wedding anniversary
- 10)** Market system means: \_\_\_\_\_.
- a) Socialism
  - b) Capitalism
  - c) A place where goods are traded
  - d) All of the above

 c) Physical courage  
 d) Social courage
- 2) Commitment means \_\_\_\_\_.  
 a) Alignment to goals  
 b) Adherence to ethical principles  
 c) Empathy  
 d) All the above
- 3) The objectives of professional ethics in engineering are  
 a) To understand the moral values that ought to guide the Engineering profession  
 b) To resolve the moral issues in the profession, and  
 c) To justify the moral judgment concerning the profession  
 d) All the above
- 4) \_\_\_\_\_ is defined as a set of attitudes concerned with the values of work, which forms the motivational orientation.  
 a) Integrity  
 b) Work ethic  
 c) Personal Values  
 d) Professional values
- 5) Belief that the privacy of others must always be maintained \_\_\_\_\_.  
 a) Confidentiality  
 b) Empathy  
 c) Ethics  
 d) Work ethics
- 6) Ethics has evolved with evaluation of \_\_\_\_\_.  
 a) Culture  
 b) Value  
 c) Society  
 d) Moral
- 7) Virtues are \_\_\_\_\_.  
 a) Moral  
 b) Ethics  
 c) Values  
 d) Positive and preferred values
- 8) Honestly is a \_\_\_\_\_.  
 a) Virtue  
 b) Truthfulness  
 c) Trustworthiness  
 d) Communication

- 9)** Human life is lived at four levels individuals, family, society and \_\_\_\_\_.  
a) Nature                                      b) Nurture  
c) World                                        d) Universe
- 10)** One of the basic desires of every human being is to be always \_\_\_\_\_.  
a) Happy                                        b) Sad  
c) Laugh                                        d) Earn money

<b>Set Q</b>
--------------

**T.Y. (B. Tech) (Sem - I) (New) (CBCS) Examination: Oct/Nov-2022**  
**ELECTRONICS ENGINEERING**  
**Professional Ethics & Human Value**

Day & Date: Monday 20-02-2023  
Time: 10:00 AM To 12:00 PM

Max. Marks: 40

**Instructions:** 1) All questions are compulsory.  
2) Figures to the right indicate full marks.

- Q.2** List the human values and explain any two in detail. **10**  
**OR**  
Distinguish between Kohlberg's and Gilligan's approach to ethical (moral) judgments.
- Q.3** Discuss in detail risk benefit analysis and reducing risk. **10**  
**OR**  
Explain the role of engineers as manager.
- Q.4** Write short notes on any four **20**  
a) Objectives of Engineering Ethics  
b) Self confidence  
c) Commitment  
d) Difference between moral and ethics  
e) Intellectual property rights  
f) Code of ethics

**MCQ/Objective Type Questions**

Duration: 30 Minutes

Marks: 14

**Q.1 Choose the correct alternatives from the options.**

**14**

- 1) Parity check bit coding is used for
  - a) Error correction
  - b) Error detection
  - c) Error correction and detection
  - d) None of the above
- 2) The channel capacity according to Shannon's equation is
  - a) Maximum error free communication
  - b) Defined for optimum system
  - c) Information transmitted
  - d) All of the above
- 3) According to Shannon Hartley theorem
  - a) The channel capacity becomes infinite with infinite bandwidth
  - b) The channel capacity does not become infinite with infinite bandwidth
  - c) Has a tradeoff between bandwidth and Signal to noise ratio
  - d) Both b and c are correct
- 4) The mutual information
  - a) Is symmetric
  - b) Always non negative
  - c) Both a and b are corrected
  - d) None of the above
- 5) Synchronization of signals is done using
  - a) Pilot clock
  - b) Extracting timing information from the received signal
  - c) Both a and b
  - d) None of the above
- 6) The data rate of QPSK is \_\_\_\_\_ of BPSK.
  - a) Thrice
  - b) Four times
  - c) Twice
  - d) Same
- 7) The bandwidth of BFSK is \_\_\_\_\_ than BPSK.
  - a) Lower
  - b) Same
  - c) Higher
  - d) Not predictable

- 8) Equalization in digital communication
- a) Reduces inter symbol interference
  - b) Removes distortion caused due to channel
  - c) Is done using linear filters
  - d) All of the above
- 9) Scrambling of data is
- a) Removing long strings of 1's and 0's
  - b) Exchanging of data
  - c) Transmission of digital data
  - d) All of the above
- 10) In Adaptive Delta Modulation, the slope error reduces and
- a) Quantization error decreases
  - b) Quantization error increases
  - c) Quantization error remains same
  - d) None of the above
- 11) DPCM is a technique
- a) To convert analog signal into digital signal
  - b) Where addition between successive samples of the analog signals are encoded into n-bit data streams
  - c) Where subtraction codes are the quantized values of the predicted value
  - d) All of the above
- 12) One of the disadvantages of PCM is
- a) It requires large bandwidth
  - b) Very high noise
  - c) Cannot be decoded easily
  - d) All of the above
- 13) The negative statement for Shannon's theorem states that
- a) If  $R > C$ , the error probability increases towards Unity
  - b) If  $R < C$ , the error probability is very small
  - c) Both a and b
  - d) None of the above
- 14) Entropy is
- a) Average information per message
  - b) Information in a signal
  - c) Amplitude of signal
  - d) All of the above

**Digital Communication**

Day & Date: Wednesday, 25-01-2023  
 Time: 10:00 AM To 01:00 PM

Max. Marks: 56

- Instructions:** 1) All questions are compulsory.  
 2) Use of Steam tables and Mollier diagram is allowed.  
 3) Figures to the right indicate full marks.

**Section – I**

**Q.2 Attempt any Four.** **16**

- Draw the block diagram of digital communication system. Explain function of source encoder & channel encoder.
- Write Short Note on Data formats.
- Define discrete rate & Information rate.
- State sampling theorem. Explain Nyquist rate in detail.
- Explain ADM in detail.

**Q.3 Attempt any Two.** **12**

- Explain Duo-binary baseband PAM System in detail.
- Write Operation of
  - Scrambling
  - Unscrambling
- Apply Huffman coding procedure for the following message ensemble. Calculate efficiency of it.

[X] [X1 X2 X3 X4 X5]

[P] [0.4 0.2 0.2 0.1 0.1]

**Section – II**

**Q.4 Attempt any Four.** **16**

- Draw neat block diagram of QAM system. Explain its working.
- Define Pseudo noise sequences. Also explain properties of it.
- With the help of suitable waveform explain DPSK.
- With the help of basic principle explain frequency hopping of spread spectrums what are its advantages.
- Define need of error control coding.

**Q.5 Attempt any Two.** **12**

- Compare binary ASK, FSK & PSK.
- Describe M-Ary PSK encoding technique with neat block diagram.
- Explain DS-SS With coherent BPSK.

**T. Y. (B.Tech) (Sem - I) (Old) (CBCS) Examination: Oct/Nov-2022**  
**ELECTRONICS ENGINEERING**  
**Digital Communication**

Day & Date: Wednesday, 25-01-2023  
 Time: 10:00 AM To 01:00 PM

Max. Marks: 56

- Instructions:** 1) All questions are compulsory.  
 2) Use of Steam tables and Mollier diagram is allowed.  
 3) Figures to the right indicate full marks.

**Section – I**

**Q.2 Attempt any Four.** **16**

- Draw the block diagram of digital communication system. Explain function of source encoder & channel encoder.
- Write Short Note on Data formats.
- Define discrete rate & Information rate.
- State sampling theorem. Explain Nyquist rate in detail.
- Explain ADM in detail.

**Q.3 Attempt any Two.** **12**

- Explain Duo-binary baseband PAM System in detail.
- Write Operation of
  - Scrambling
  - Unscrambling
- Apply Huffman coding procedure for the following message ensemble. Calculate efficiency of it.

[X] [X1 X2 X3 X4 X5]

[P] [0.4 0.2 0.2 0.1 0.1]

**Section – II**

**Q.4 Attempt any Four.** **16**

- Draw neat block diagram of QAM system. Explain its working.
- Define Pseudo noise sequences. Also explain properties of it.
- With the help of suitable waveform explain DPSK.
- With the help of basic principle explain frequency hopping of spread spectrums what are its advantages.
- Define need of error control coding.

**Q.5 Attempt any Two.** **12**

- Compare binary ASK, FSK & PSK.
- Describe M-Ary PSK encoding technique with neat block diagram.
- Explain DS-SS With coherent BPSK.

**Seat  
No.**

**T.Y. (B. Tech) (Sem - I) (Old) (CBCS) Examination: Oct/Nov - 2022**  
**ELECTRONICS ENGINEERING**  
**Digital Signal Processing**

Day & Date: Tuesday, 31-01-2023  
 Time: 10:00 AM To 01:00 PM

Max. Marks: 56

**Instructions:** 1) All questions are compulsory.  
 2) Assume suitable data if necessary.

**Section – I**

**Q.2 Solve any four of the following.** **16**

- State and prove circular time reversal property of DFT of a DT signal.
- If  $x(n) = \{1, 5, 3, 2\}$  Determine
  - $x_1(n) = x((-n))_4$
  - $x_2(n) = x((n-1))_4$
- Compute 4-point DFT of the sequence  $x(n) = \{1, 3, 4, -5\}$
- Compute IDFT of  $X(k) = \{15, 2 + 3j, -3, 2-3j\}$
- Draw a direct form realization for the following linear phase FIR filters.  
 $h(n) = \{1, 5, 3, 7, 3, 5, 1\}$
- Compute 4-point circular convolution of sequences  $x(n) = \{1, 2, 3\}$  &  $h(n) = \{2, 5, 1, 4\}$

**Q.3 Solve any two of the following.** **12**

- List out the similarities and differences between DIT and DIF algorithms. Find DFT of the sequence  $x(n) = \{4, 3, 5, 7\}$  using DIT.
- Obtain Direct form I, Direct form II realizations for the system.  
 $y(n) = -0.1y(n-1) + 0.2y(n-2) + 3x(n) + 3.6x(n-1) + 0.6x(n-2)$
- Obtain the output of a filter using overlap & add method whose input & impulse response are as below.  
 $x(n) = \{1, 2, 1, 3, 1, 4, 1, 5, 1, 6\}$  &  $h(n) = \{1, 2, 3\}$

**Section – II**

**Q.4 Solve any four of the following.** **16**

- Describe the applications of DSP in various fields.
- Explain in detail Multiply & Accumulate (MAC) unit of digital signal processor.
- Draw and explain the barrel shifter block of DSP chip.
- Explain in brief windowing. Compare different window characteristics based on transition width and stop band attenuation.
- Convert the analog filter to digital filter whose system function is

$$H(s) = \frac{(s + 0.3)}{(s + 0.3)^2 + 16}$$

Use bilinear transformation. Assume  $T = 1s$ .

- Given the desired specifications  $\Omega_p, \Omega_s, \delta_1, \delta_2$  of Butterworth filter derive the relation for obtaining order  $N$  & cutoff frequency  $\Omega_c$ .

**Q.5 Solve any two of the followings.**

- a) Explain in brief Impulse Invariant method.
- b) Design a digital Butterworth filter to meet the following constraints.
- $$0.9 \leq |H(e^{j\omega})| \leq 1 \qquad 0 \leq \omega \leq 0.5\pi$$
- $$|H(e^{j\omega})| \leq 0.2 \qquad 0.75\pi \leq \omega \leq \pi$$
- Using Bilinear transformation. Use  $T = 1$  sec.
- c) Explain finite word length effect in designing FIR filters.

 2) Don't forget to mention Question Paper Set (P/Q/R/S) at the top of the same page.  
 3) Assume suitable data if necessary.

**MCQ/Objective Type Questions**

Duration: 30 Minutes

Marks: 14

**Q.1 Choose the correct alternatives from the options.**

**14**

- 1) TMS320C54 processor uses \_\_\_\_\_ architecture.
  - a) Simple
  - b) Complex
  - c) Harvard
  - d) Von Neumann
- 2) The FIR filter of order M gives linear phase response if \_\_\_\_\_.
  - a)  $h(n) < \infty$
  - b)  $h(n) = h(-n)$
  - c)  $h(n) = h(M - 1 - n)$
  - d) None of these
- 3) With increase in the length of the filter, width of main lobe \_\_\_\_\_.
  - a) Increases
  - b) Decreases
  - c) Does not change
  - d) None of these
- 4) Which of the following has the best transition width characteristics?
  - a) Bartlett
  - b) Rectangular
  - c) Blackman
  - d) Hamming
- 5) FIR filters are \_\_\_\_\_.
  - a) All pole filters
  - b) All zero filters
  - c) Pole zero filters
  - d) Unstable filters
- 6) The addressing mode that is convenient for FFT computation is \_\_\_\_\_.
  - a) Indirect addressing
  - b) Circular mode addressing
  - c) Bit reversed addressing
  - d) Memory mapped addressing
- 7) Butterworth filters have \_\_\_\_\_.
  - a) Wide transition region
  - b) Sharp transition region
  - c) Oscillation in transition region
  - d) Maximally flat pass band
- 8) Z-Transform reduces to Fourier transform when it is evaluated on \_\_\_\_\_.
  - a) a half circle
  - b) Z circle
  - c) Unit circle
  - d) Imaginary circle
- 9) The following realization minimizes the delay elements \_\_\_\_\_.
  - a) Direct form-I realization
  - b) Direct form-II realization
  - c) Cascade form realization
  - d) Parallel realization

- 10) DFT of an impulse function is \_\_\_\_\_.  
a)  $\delta[n]$  b) 1  
c)  $\delta[n - 1]$  d) None
- 11) The value of the twiddle factor  $W_4^5$  is \_\_\_\_\_.  
a)  $j$  b) 1  
c)  $-0.707 + j0.707$  d)  $-j$
- 12) With signal  $x(n) = \{2, 4, 3, -1, 7\}$ , if  $x_1(n) = x((n-3))_5$  then  $x_1(n)$  will be \_\_\_\_\_.  
a)  $\{3, -1, 7, 2, 4\}$  b)  $\{-1, 7, 2, 4, 3\}$   
c)  $\{4, 3, -1, 7, 2\}$  d)  $\{2, 4, 3, -1, 7\}$
- 13) The number of complex multiplications required with direct computation of N point DFT is  $N^2$ . After first step DIT FFT, this count reduces to \_\_\_\_\_.  
a)  $N^2 - 1$  b)  $N^2/2$   
c)  $N^2/2 + N/2$  d)  $N^2/2 - N/2$
- 14) If the linear convolution  $x_1 = [1, 2, 3, 4]$  and  $x_2 = [1, 2, 3]$  is  $\{1, 4, 10, 16, 17, 12\}$ , the 4-point circular convolution between  $x_1$  &  $x_2$  will be \_\_\_\_\_.  
a)  $\{1, 4, 10, 16\}$  b)  $\{10, 16, 17, 12\}$   
c)  $\{13, 21, 16, 17\}$  d)  $\{18, 16, 10, 16\}$

  - c) Main Memory
  - d) Secondary Memory
- 2) In 8-bit microprocessor, how many opcodes are present?
  - a) 246
  - b) 278
  - c) 250
  - d) 256
- 3) Which of the following is not true about the address bus?
  - a) It consists of control PIN 21 to 28
  - b) It is a bidirectional bus
  - c) It is 16 bits in length
  - d) Lower address bus lines ( $AD_0 - AD_7$ ) are called "Line number"
- 4) Which of the following is the correct sequence of operations in a microprocessor?
  - a) Opcode fetch, memory read, memory write, I/O read, I/O write
  - b) Opcode fetch, memory write, memory read, I/O read, I/O write
  - c) I/O read, opcode fetch, memory read, memory write, I/O write
  - d) I/O read, opcode fetch, memory write, memory read, I/O write
- 5) Which of the following is a special-purpose register of microprocessor?
 

a) Program counter	b) Instruction register
c) Accumulator	d) Temporary register
- 6) How many flip-flops are there in a flag register of 8085 microprocessor?
 

a) 4	b) 5
c) 7	d) 10

- 7) What does a microprocessor understand after decoding opcode?
- Perform ALU operation
  - Go to memory
  - Length of the instruction and number of operations
  - Go to the output device
- 8) When the microcontroller executes some arithmetic operations, then the flag bits of which register are affected?
- PSW
  - SP
  - DPTR
  - PC
- 9) How are the status of the carry, auxiliary carry and parity flag affected if the write instruction  
MOV A,#9C  
ADD A,#64H
- CY=0,AC=0,P=0
  - CY=1,AC=1,P=0
  - CY=0,AC=1,P=0
  - CY=1,AC=1,P=1
- 10) PSEN stands for\_\_\_\_\_
- Program Select Enable
  - Peripheral Store Enable
  - Program Store Enable
  - Peripheral Select Enable
- 11) How many rows and columns are present in a 16\*2 alphanumeric LCD?
- rows=2, columns=32
  - rows=16, columns=2
  - rows=16, columns=16
  - rows=2, columns=16
- 12) For writing commands on an LCD, RS bit is
- Set
  - Reset
  - Set & reset
  - none of the mentioned
- 13) What is the purpose of a special function register SPBRG in USART?
- To control the operation associated with baud rate generation
  - To control an oscillator frequency
  - To control or prevent the false bit transmission of 9<sup>th</sup> bit
  - All of the above
- 14) The capture operation in counter mode is feasible when mode of CCP module is \_\_\_\_.
- synchronized
  - asynchronized
  - synchronized as well as asynchronized
  - irrespective of synchronization

-----------------	--

**T.Y. (B.Tech.) (Semester-I) (Old) (CBCS) Examination: Oct/Nov - 2022**  
**ELECTRONICS ENGINEERING**  
**Microcontrollers**

Day & Date: Friday, 24-02-2023  
Time: 10:00 AM To 01:00 PM

Max. Marks: 56

**Instructions:** 1) All questions are compulsory.  
2) Figures to the right indicate full marks.  
3) Assume suitable data if necessary.

**Section – I**

**Q.2 Attempt any three** **12**

- a) Explain the interrupts structure of 8085.
- b) Explain different Addressing Modes of 8051 Microcontroller with examples.
- c) Explain the Memory organization & Mapping
- d) Explain difference between Microprocessor and Microcontroller.

**Q.3 Attempt any two** **16**

- a) Explain the microprocessor 8085 Architecture and instructions.
- b) Draw and explain architecture of intel-51, 8-bit Microcontroller.
- c) Explain different mode for serial communication for 8051 Microcontroller.

**Section – II**

**Q.4 Attempt any three** **12**

- a) Explain the architecture of PIC 16F877A.
- b) How SPI Protocol Works.
- c) Explain different Addressing Modes of PIC 16F877A.
- d) Explain Timer module in PIC 16F877A.

**Q.5 Attempt any two** **16**

- a) Discuss interfacing of external 16K EPROM and 8K RAM with the microcontroller 8051.
- b) Explain interfacing of stepper motor with microcontroller. Write program to rotate stepper motor in clockwise direction continuously in full step mode.
- c) Explain CCP module in PIC 16F877A in detail.

-------

**T.Y. (B.Tech.) (Semester-I) (Old) (CBCS) Examination: Oct/Nov - 2022**  
**ELECTRONICS ENGINEERING**  
**Microcontrollers**

Day & Date: Friday, 24-02-2023  
 Time: 10:00 AM To 01:00 PM

Max. Marks: 70

- Instructions:** 1) Q. No. 1 is compulsory. It should be solved in the first 30 minutes in answer book. Page no 03 (Starting page of the Answer Book). Each question carries one mark.  
 2) Don't forget to Mention question paper set (P/Q/R/S) on top of page.  
 3) Figures to the right indicates full marks.  
 4) Assume suitable data if necessary.

**MCQ/Objective Type Questions**

Duration: 30 Minutes

Marks: 14

**Q.1 Choose the correct alternatives from the given options. 14**

- 1) When the microcontroller executes some arithmetic operations, then the flag bits of which register are affected?
  - a) PSW
  - b) SP
  - c) DPTR
  - d) PC
- 2) How are the status of the carry, auxiliary carry and parity flag affected if the write instruction  
 MOV A,#9C  
 ADD A,#64H
  - a) CY=0,AC=0,P=0
  - b) CY=1,AC=1,P=0
  - c) CY=0,AC=1,P=0
  - d) CY=1,AC=1,P=1
- 3) PSEN stands for\_\_\_\_\_
  - a) Program Select Enable
  - b) Peripheral Store Enable
  - c) Program Store Enable
  - d) Peripheral Select Enable
- 4) How many rows and columns are present in a 16\*2 alphanumeric LCD?
  - a) rows=2, columns=32
  - b) rows=16, columns=2
  - c) rows=16, columns=16
  - d) rows=2, columns=16
- 5) For writing commands on an LCD, RS bit is
 

a) Set	b) Reset
c) Set & reset	d) none of the mentioned

- 6) What is the purpose of a special function register SPBRG in USART?
- a) To control the operation associated with baud rate generation
  - b) To control an oscillator frequency
  - c) To control or prevent the false bit transmission of 9<sup>th</sup> bit
  - d) All of the above
- 7) The capture operation in counter mode is feasible when mode of CCP module is \_\_\_\_.
- a) synchronized
  - b) asynchronized
  - c) synchronized as well as asynchronized
  - d) irrespective of synchronization
- 8) The microprocessor of a computer can operate on any information if it is present in \_\_\_\_ only.
- a) Program Counter
  - b) Flag
  - c) Main Memory
  - d) Secondary Memory
- 9) In 8-bit microprocessor, how many opcodes are present?
- a) 246
  - b) 278
  - c) 250
  - d) 256
- 10) Which of the following is not true about the address bus?
- a) It consists of control PIN 21 to 28
  - b) It is a bidirectional bus
  - c) It is 16 bits in length
  - d) Lower address bus lines (AD<sub>0</sub> – AD<sub>7</sub>) are called “Line number”
- 11) Which of the following is the correct sequence of operations in a microprocessor?
- a) Opcode fetch, memory read, memory write, I/O read, I/O write
  - b) Opcode fetch, memory write, memory read, I/O read, I/O write
  - c) I/O read, opcode fetch, memory read, memory write, I/O write
  - d) I/O read, opcode fetch, memory write, memory read, I/O write
- 12) Which of the following is a special-purpose register of microprocessor?
- a) Program counter
  - b) Instruction register
  - c) Accumulator
  - d) Temporary register
- 13) How many flip-flops are there in a flag register of 8085 microprocessor?
- a) 4

 2) Figures to the right indicates full marks.  
 3) Assume suitable data if necessary.

**MCQ/Objective Type Questions**

Duration: 30 Minutes

Marks:14

**Q.1 Choose the correct alternatives from the given options.**

**14**

- 1) Curl of gradient A is \_\_\_\_\_.  
 a)  $\nabla \times (\nabla A) = 1$   
 b)  $\nabla \times (\nabla A) = \infty$   
 c)  $\nabla \times (\nabla A) = 0$   
 d)  $\nabla \times (\nabla A) = -\infty$
- 2)  $\nabla^2$  is \_\_\_\_\_.  
 a) Vector  
 b) Scalar  
 c) Depend on direction  
 d) None of the above
- 3) Which of following is zero?  
 a) Grad div A  
 b) div Gradient V  
 c) div curl A  
 d) curl curl A
- 4) Electric dipole moment is given by \_\_\_\_\_.  
 a)  $P = Qd^2$   
 b)  $P = \Psi d^3$   
 c)  $P = Qd$   
 d) None of above
- 5) Relation between potential V & electric field E  
 a)  $E = -\nabla V$   
 b)  $E = \nabla V$   
 c)  $V = -\nabla E$   
 d)  $\nabla V = \nabla E$
- 6) Which of the following statement for a divergence of electric and magnetic flux densities?  
 a) Both are zero  
 b) It is zero for the electric flux density.  
 c) These are zero for static densities but non zero for time varying densities?  
 d) It is zero for the magnetic flux density.
- 7) The unit of relative permeability is \_\_\_\_\_.  
 a) henry/metre  
 b) henry  
 c) henry/sq.m  
 d) it is dimensionless
- 8) The property of coil by which a counter e.m.f. is induced in it when the current through the coil changes is known as  
 a) Self-inductance  
 b) Mutual inductance  
 c) Series aiding inductance  
 d) Capacitance

Day & Date: Tuesday 07-02-2023  
 Time: 10:00 AM To 01:00 PM

Max. Marks: 56

- Instructions:** 1) All questions are compulsory.  
 2) Figures to the right indicate full marks  
 3) Assume suitable data if necessary.

**Section – I**

**Q.2 Answer any four questions. 16**

- Given  $A = 2\hat{a}_x + 4\hat{a}_y$  and  $B = 6\hat{a}_z$ , Find the Smaller angle between them using Cross product.
- State and Explain Biot Savarts law.
- Point charge of  $+3\mu C$  and  $-3\mu C$  located at (0,0,1) mm and (0,0,-1) mm respectively, Find E at (1,2,1.5) mm
- Explain differential components for cylindrical system.
- Derive the Lorentz's force equation for moving charges.

**Q.3 Answer any two questions. 12**

- Derive the expression for Electric field intensity due to infinite line charge.
- State the explain point form of Ampere's Law.
- Let  $E = \left(\frac{-6y}{x^2}\right)\hat{a}_x + \left(\frac{6}{x}\right)\hat{a}_y + 5\hat{a}_z$  V/m and calculate
  - $V_{PQ}$  given P(-7,2,1) & Q (4,1,2)
  - $V_P$  if  $V = 0$  at (2,0,-1)

**Section – II**

**Q.4 Answer any four questions. 16**

- State the Maxwell's Equation in integral and Point form derived from Faradays Law.
- Define the term displacement current and conduction current.
- Derive the transmission line equation stating with field theory.
- Define Directive Gain and Directivity of antenna.
- Explain the term Skin depth.

**Q.5 Answer any two questions. 12**

- A lossless  $100\Omega$  transmission line is terminated in  $200 + j200\Omega$ . Find
  - Voltage reflection coefficient
  - VSWR
  - Impedance at  $0.375\lambda$  from load
  - Shortest length of line for which impedance is purely resistive for 15V applied to the line
  - The value of this resistance
- State and derive poynting theorem and give its significance.
- Derive the equation for reflection coefficient and transmission coefficient by perfect dielectric medium for normal incidence.

Marks:14

**Q.1 Choose the correct alternatives from the given options.**

**14**

- 1) The property of coil by which a counter e.m.f. is induced in it when the current through the coil changes is known as
  - a) Self-inductance
  - b) Mutual inductance
  - c) Series aiding inductance
  - d) Capacitance
- 2) For static magnetic field Maxwell's curl equation is given by
  - a)  $\nabla \cdot \vec{B} = \mu_0 \vec{J}$
  - b)  $\nabla \times \vec{B} = \mu_0 \vec{J}$
  - c)  $\nabla \times \vec{B} = 0$
  - d)  $\nabla \times \vec{B} = \mu_0 / \vec{J}$
- 3) A time varying magnetic field produces
  - a) both magnetic and electric fields
  - b) electric field only
  - c) magnetic field only
  - d) none of the above
- 4) A transmission line is specified in terms of \_\_\_\_\_.
  - a) R, G, L
  - b) G, L, C
  - c) R, G, L, C
  - d) None of these
- 5) In a fully lossless line,  $\sigma =$  \_\_\_\_\_.
  - a) 0
  - b) 1
  - c)  $\infty$
  - d) None of these
- 6) Antenna tuning is done by changing its \_\_\_\_\_.
  - a) Inductive reactances
  - b) Capacitive reactances
  - c) Both (a) and (b)
  - d) None of these
- 7) Resonant frequency of an antenna depends upon its \_\_\_\_\_.
  - a) Physical length
  - b) Electrical length
  - c) None of these
  - d) Cannot say
- 8) Curl of gradient A is \_\_\_\_\_.
  - a)  $\nabla \times (\nabla A) = 1$
  - b)  $\nabla \times (\nabla A) = \infty$
  - c)  $\nabla \times (\nabla A) = 0$
  - d)  $\nabla \times (\nabla A) = -\infty$
- 9)  $\nabla^2$  is \_\_\_\_\_.
  - a) Vector
  - b) Scalar
  - c) Depend on direction
  - d) None of the above

Set **Q**

**T.Y. (B.Tech) (Sem-I) (Old) (CBCS) Examination: Oct/Nov-2022**  
**ELECTRONICS ENGINEERING**  
**Electro Magnetic Engineering**

Day & Date: Tuesday 07-02-2023  
 Time: 10:00 AM To 01:00 PM

Max. Marks: 56

- Instructions:** 1) All questions are compulsory.  
 2) Figures to the right indicate full marks  
 3) Assume suitable data if necessary.

**Section – I**

**Q.2 Answer any four questions. 16**

- Given  $A = 2\hat{a}_x + 4\hat{a}_y$  and  $B = 6\hat{a}_z$ , Find the Smaller angle between them using Cross product.
- State and Explain Biot Savarts law.
- Point charge of  $+3\mu C$  and  $-3\mu C$  located at (0,0,1) mm and (0,0,-1) mm respectively, Find E at (1,2,1.5) mm
- Explain differential components for cylindrical system.
- Derive the Lorentz's force equation for moving charges.

**Q.3 Answer any two questions. 12**

- Derive the expression for Electric field intensity due to infinite line charge.
- State the explain point form of Ampere's Law.
- Let  $E = \left(\frac{-6y}{x^2}\right)\hat{a}_x + \left(\frac{6}{x}\right)\hat{a}_y + 5\hat{a}_z$  V/m and calculate
  - $V_{PQ}$  given P(-7,2,1) & Q (4,1,2)
  - $V_P$  if  $V = 0$  at (2,0,-1)

**Section – II**

**Q.4 Answer any four questions. 16**

- State the Maxwell's Equation in integral and Point form derived from Faradays Law.
- Define the term displacement current and conduction current.
- Derive the transmission line equation stating with field theory.
- Define Directive Gain and Directivity of antenna.
- Explain the term Skin depth.

**Q.5 Answer any two questions. 12**

- A lossless  $100\Omega$  transmission line is terminated in  $200 + j200\Omega$ . Find
  - Voltage reflection coefficient
  - VSWR
  - Impedance at  $0.375\lambda$  from load
  - Shortest length of line for which impedance is purely resistive for 15V applied to the line
  - The value of this resistance
- State and derive poynting theorem and give its significance.
- Derive the equation for reflection coefficient and transmission coefficient by perfect dielectric medium for normal incidence.

<b>Seat No.</b>	
-----------------	--

- 10) Which of the following statement for a divergence of electric and magnetic flux densities?
- Both are zero
  - It is zero for the electric flux density.
  - These are zero for static densities but non zero for time varying densities?
  - It is zero for the magnetic flux density.
- 11) The unit of relative permeability is \_\_\_\_.
- henry/metre
  - henry
  - henry/sq.m
  - it is dimensionless
- 12) The property of coil by which a counter e.m.f. is induced in it when the current through the coil changes is known as
- Self-inductance
  - Mutual inductance
  - Series aiding inductance
  - Capacitance
- 13) For static magnetic field Maxwell's curl equation is given by
- $\nabla \cdot \vec{B} = \mu_0 \vec{J}$
  - $\nabla \times \vec{B} = \mu_0 \vec{J}$
  - $\nabla \times \vec{B} = 0$
  - $\nabla \times \vec{B} = \mu_0 / \vec{J}$
- 14) A time varying magnetic field produces
- both magnetic and electric fields
  - electric field only
  - magnetic field only
  - none of the above

 2) Figures to the right indicates full marks.  
 3) Assume suitable data if necessary.

**MCQ/Objective Type Questions**

Duration: 30 Minutes

Marks:14

**Q.1 Choose the correct alternatives from the given options.**

**14**

- 1) Which of the following statement for a divergence of electric and magnetic flux densities?
  - a) Both are zero
  - b) It is zero for the electric flux density.
  - c) These are zero for static densities but non zero for time varying densities?
  - d) It is zero for the magnetic flux density.
- 2) The unit of relative permeability is \_\_\_\_\_.
  - a) henry/metre
  - b) henry
  - c) henry/sq.m
  - d) it is dimensionless
- 3) The property of coil by which a counter e.m.f. is induced in it when the current through the coil changes is known as
  - a) Self-inductance
  - b) Mutual inductance
  - c) Series aiding inductance
  - d) Capacitance
- 4) For static magnetic field Maxwell's curl equation is given by
  - a)  $\nabla \cdot \vec{B} = \mu_0 \vec{J}$
  - b)  $\nabla \times \vec{B} = \mu_0 \vec{J}$
  - c)  $\nabla \times \vec{B} = 0$
  - d)  $\nabla \times \vec{B} = \mu_0 / \vec{J}$
- 5) A time varying magnetic field produces
  - a) both magnetic and electric fields
  - b) electric field only
  - c) magnetic field only
  - d) none of the above
- 6) A transmission line is specified in terms of \_\_\_\_\_.
  - a) R, G, L
  - b) G, L, C
  - c) R, G, L, C
  - d) None of these
- 7) In a fully lossless line,  $\sigma =$  \_\_\_\_\_.
  - a) 0
  - b) 1
  - c)  $\infty$
  - d) None of these

- 8) Antenna tuning is done by changing its \_\_\_\_\_.  
 a) Inductive reactances                      b) Capacitive reactances  
 c) Both (a) and (b)                              d) None of these
- 9) Resonant frequency of an antenna depends upon its \_\_\_\_\_.  
 a) Physical length                                  b) Electrical length  
 c) None of these                                   d) Cannot say
- 10) Curl of gradient A is \_\_\_\_\_.  
 a)  $\nabla \times (\nabla A) = 1$                               b)  $\nabla \times (\nabla A) = \infty$   
 c)  $\nabla \times (\nabla A) = 0$                                   d)  $\nabla \times (\nabla A) = -\infty$
- 11)  $\nabla^2$  is \_\_\_\_\_.  
 a) Vector    b) Scalar  
 c) Depend on direction                              d) None of the above
- 12) Which of following is zero?  
 a) Grad div A    b) div Gradient V  
 c) div curl A    d) curl curl A
- 13) Electric dipole moment is given by \_\_\_\_\_.  
 a)  $P = Qd^2$     b)  $P = \Psi d^3$   
 c)  $P = Qd$     d) None of above
- 14) Relation between potential V & electric field E  
 a)  $E = -\nabla V$     b)  $E = \nabla V$   
 c)  $V = -\nabla E$     d)  $\nabla V = \nabla E$

### MCQ/Objective Type Questions

Duration: 30 Minutes

Marks: 14

**Q.1 Choose the correct alternatives from the options and rewrite the sentence. 14**

- 1) A \_\_\_\_\_ query is simply a data retrieval query.

a) action	b) get
c) select	d) all of these
- 2) Two types of decision support systems are

a) model driven, data driven	b) data based, information based
c) middle, upper	d) TPS, ERP
- 3) Take odd man out – NEFT, ERP, RTGS, UPI

a) NEFT	b) ERP
c) RTGS	d) UPI
- 4) In \_\_\_\_\_ model, typically, the outcome of one phase acts as the input for the next phase sequentially.

a) RAD	b) Waterfall
c) Prototyping	d) SDLC
- 5) Which of below is not true about organizations?

a) closed system	b) social unit
c) interact with environment	d) have a structure
- 6) Which of below is a component of an IS?

a) Purpose	b) Context
c) Hardware	d) All of these
- 7) What for IS & IT are used in Digital Enterprises?

a) Research	b) Boost employee productive
c) Customer support	d) All of these
- 8) \_\_\_\_\_ are software system designed to support machine to machine interaction over a network

a) Information technology	b) Cloud computing
c) Web services	d) Apps

- 9) Take odd man out - MS Project, MS Access, DB2, Oracle
  - a) MS Word
  - b) MS Access
  - c) DB2
  - d) Oracle
- 10) An IT project can produce \_\_\_\_\_.
  - a) a system
  - b) a software package
  - c) recommendation based on study
  - d) all of these
- 11) Select appropriate sequence \_\_\_\_\_.
  - a) database, data, knowledge, information
  - b) data, database, knowledge, information
  - c) data, database, information, knowledge
  - d) information, database, knowledge, data
- 12) Which of below is an example of TPS \_\_\_\_\_.
  - a) business intelligence
  - b) payroll
  - c) ERP
  - d) expert system
- 13) \_\_\_\_\_ and \_\_\_\_\_ are the two views of database
  - a) action, query
  - b) partitioned, replicated
  - c) information, knowledge
  - d) physical, logical
- 14) The processes required to ensure that the project includes all the work required, is part of project \_\_\_\_\_ management.
  - a) integration
  - b) scope
  - c) cost
  - d) quality

Day &amp; Date: Thursday, 09-02-2023

Max. Marks: 56

Time: 10:00 AM To 01:00 PM

**Instructions:** 1) All questions are compulsory.  
2) Figures to right indicate full marks.

**Section – I****Q.2 Attempt any Two. 12**

- a) Explain partitioned database with – diagram, advantages and disadvantages
- b) With suitable examples explain any two e - payment systems used in India.
- c) What are components of information system? Discuss with suitable diagram.

**Q.3 Attempt any Four. 16**

- a) Differentiate – data mart Vs data warehouse
- b) Justify with example – IT flattens organization structure
- c) To whom IT supports in a typical organization?
- d) Discuss Cloud Computing - SAAS model
- e) How IT infrastructure for a typical organization is decided?

**Section – II****Q.4 Attempt any Two. 12**

- a) Justify : IT projects are as complex as other engineering projects.
- b) Discuss need of and how supply chain management system is being implemented.
- c) Explain economical impact of IS on organization.

**Q.5 Attempt any Four. 16**

- a) Discuss ethical issues related to information systems.
- b) With a typical example explain decision support system
- c) Compare OLAP and OLTP
- d) What is deskilling and alienation? Comment on how it is rising because of IT.
- e) What are the types of IPR?

Max. Marks: 70

- Instructions:** 1) Q. No. 1 is compulsory. It should be solved in the first 30 minutes in answer book. Page no 03 (Starting page of the Answer Book). Each question carries one mark.  
 2) Don't forget to Mention question paper set (P/Q/R/S) on top of page.  
 3) Figures to the right indicates full marks  
 4) Assume suitable data wherever needed and mention it clearly.

**MCQ/Objective Type Questions**

Duration: 30 Minutes

Marks: 70

**Q.1 Choose the correct alternatives from the options and rewrite the sentence. 14**

- 1) Which of the following is considered production Economics?
  - a) Tilling of Soil
  - b) Singing a song before friends
  - c) Preventing a child from falling into a manhole on the road
  - d) Painting a picture for pleasure
- 2) Identify the Correct statement:
  - a) The Average Product is at its maximum when marginal product is equal to Average Product
  - b) The Law of Increasing returns to scale relates to the effect of changes in factor proportions.
  - c) Economies of scale arise only because of indivisibilities of factor proportions.
  - d) Internal economies of scale can accrue when industry expands beyond optimum.
- 3) Which of the following is not a characteristic of land?
  - a) Its supply for the economy is limited.
  - b) It's a immobile
  - c) Its usefulness depends on human efforts
  - d) It is produced by our forefathers.
- 4) Which of the following statement is true?
  - a) Accumulation of capital depends solely on income of individuals
  - b) Saving can be influenced by government policies
  - c) External economies go with size and internal economies with location
  - d) The supply curve of labour is an upward slopping curve
- 5) Macroeconomics is also called \_\_\_\_\_ Economics.
  - a) Applied
  - b) Aggregate
  - c) Experimental
  - d) None of the above
- 6) In Economics we use the term scarcity to mean
  - a) Abstract scarcity ad lack of resource in less developed countries
  - b) Relative scarcity i.e scarcity in relation to the wants of the society
  - c) Scarcity during times of business failure and natural calamities
  - d) Scarcity caused on account of excessive consumption by the rich

- 7) Business economics is
- a) Abstract and applies the tools of Microeconomics
  - b) Involves practice application of economic theory in business decision making
  - c) Incorporates tools from multiple disciplines.
  - d) (b) and (c) above
- 8) What implication (s) does resource scarcity have for the satisfaction of wants?
- a) Not all wants can be satisfied.
  - b) We will never be faced with the need to make a choice
  - c) We must develop ways to decrease our individual wants
  - d) The discovery of new natural resource is necessary to increase our ability to satisfy wants.
- 9) Which of the following is a normative statement
- a) Planned economies allocate resources via government development
  - b) Most transitional economies have experienced problems of falling output and rising prices over the past decade
  - c) There is a greater degree of consumer sovereignty in market economies than planned economies
  - d) Reducing inequality should be a major priority for mixed economies
- 10) Demand for a commodity refers to :
- a) Desire backed by ability to pay for the commodity
  - b) Need for the commodity and willingness to pay for it
  - c) The quantity demanded of that commodity at a certain price
  - d) The quantity of the commodity demanded at a certain price during any particular period of time
- 11) Contraction of demand is a result of:
- a) Decrease in the number of consumers
  - b) Increase in the price of the good concerned
  - c) Increase in the price of other goods
  - d) Decrease in the income of purchasers
- 12) All but one of the following are assumed to remain the same while drawing an individual's demand curve for a commodity. Which one is it?
- a) The preference of the individual
  - b) His monetary income
  - c) Price of the commodity
  - d) Price of related goods.
- 13) Which of the following pairs of goods is an example of substitutes?
- a) Tea and sugar
  - b) Tea and coffee
  - c) Pen and ink
  - d) Shirts and trousers
- 14) In the case of a straight line demand curve meeting the two axes, the price elasticity of demand at the mid-point of the line would be:
- a) 0
  - b) 1
  - c) 1.5
  - d) 2

Time: 10:00 AM To 01:00 PM

**Instructions:** 1) All questions are compulsory.  
 2) Figures to the right indicate full marks.

**SECTION – 1**

**Q.2 Attempt any Four.****16**

- Define Managerial Economics and Discuss its Scope, What is the importance of Managerial Economics.
- What is law of Equimarginal Utility? What is the Condition for Equi-Marginal Utility?
- Define and Distinguish between Income Elasticity and price Elasticity.
- What is the Major Area of Business Decision Making? How dose Economic theory Contribute to Managerial decisions.
- What is meant by Utility? Distinguish Between Cardinal and Ordinal Concept of Utility.
- What is the condition for Consumer Equilibrium under Ordinal utility approach to consumer analysis? Explain and illustrate Graphically.

**Q.3 Attempt any Two.****12**

- What are major Macro-economics Issues Related Directly to business decision making? What is their significance in Business decisions?
- What is meant by Utility? What are the conditions for Application of Law of Diminishing Utility?
- What is meant by Elasticity of Demand? How is the Elasticity of Demand measured?

**SECTION – II**

**Q.4 Attempt any Four.****16**

- What is purpose of demand of casting? What are the necessary steps that need to be taken for Forecasting demand for a Product?
- What are the methods used for Forecasting demand? Discuss in detail the survey method of forecasting demand for consumer goods. What are the advantages and Limitations?
- Define and Distinguish between Arc Elasticity and Point Elasticity.
- What is Linear Programming? Discuss usefulness of its application to Practical Business problems.
- What is meant by production? Distinguish between Fixed and Variable Inputs.
- What is Opportunity Cost? Give some Examples of Opportunity Cost.

**Q.5 Attempt any Two.**

- a)** Explain following Cost Concepts with examples.
  - i) Variable Cost
  - ii) Fixed Cost
  - iii) Explicit Cost
  - iv) Implicit Cost
- b)** Explain and illustrate the relationship Between Marginal Cost, Average Cost and Total Cost Assuming a short run non linear cost function?
- c)** Explain the Law of supply through a supply schedule and a supply curve. Why does a supply curve slop upward to the right? What factors cause a rightward shift in the supply curve?

**OR**  
Distinguish between Kohlberg's and Gilligan's approach to ethical (moral) judgments.
- Q.3** Discuss in detail risk benefit analysis and reducing risk. **10**  
**OR**  
Explain the role of engineers as manager.
- Q.4** Write short notes on any four **20**  
a) Objectives of Engineering Ethics  
b) Self confidence  
c) Commitment  
d) Difference between moral and ethics  
e) Intellectual property rights  
f) Code of ethics

**T.Y. (B. Tech) (Sem - I) (Old) (CBCS) Examination: Oct/Nov-2022**  
**ELECTRONICS ENGINEERING**  
**Professional Ethics & Human Value**

Day & Date: Monday 20-02-2023  
 Time: 10:00 AM To 12:00 PM

Max. Marks: 50

- Instructions:** 1) Q. No. 1 is compulsory. It should be solved in the first 20 minutes in answer book. Page no 03 (Starting page of the Answer Book). Each question carries one mark.  
 2) Don't forget to Mention question paper set (P/Q/R/S) on top of page.  
 3) Figures to the right indicates full marks

**MCQ/Objective Type Questions**

Duration: 20 Minutes

Marks:10

**Q.1 Choose the correct alternatives from the given options.**

**10**

- 1) Courage is the tendency to accept and face \_\_\_\_\_.  
 a) Self-confidence  
 b) Risks and difficult tasks in rational ways  
 c) Physical courage  
 d) Social courage
- 2) Commitment means \_\_\_\_\_.  
 a) Alignment to goals  
 b) Adherence to ethical principles  
 c) Empathy  
 d) All the above
- 3) The objectives of professional ethics in engineering are  
 a) To understand the moral values that ought to guide the Engineering profession  
 b) To resolve the moral issues in the profession, and  
 c) To justify the moral judgment concerning the profession  
 d) All the above
- 4) \_\_\_\_\_ is defined as a set of attitudes concerned with the values of work, which forms the motivational orientation.  
 a) Integrity  
 b) Work ethic  
 c) Personal Values  
 d) Professional values
- 5) Belief that the privacy of others must always be maintained \_\_\_\_\_.  
 a) Confidentiality  
 b) Empathy  
 c) Ethics  
 d) Work ethics
- 6) Ethics has evolved with evaluation of \_\_\_\_\_.  
 a) Culture  
 b) Value  
 c) Society  
 d) Moral
- 7) Virtues are \_\_\_\_\_.  
 a) Moral  
 b) Ethics  
 c) Values  
 d) Positive and preferred values
- 8) Honestly is a \_\_\_\_\_.  
 a) Virtue  
 b) Truthfulness  
 c) Trustworthiness  
 d) Communication

- 9)** Human life is lived at four levels individuals, family, society and \_\_\_\_\_.  
a) Nature                                      b) Nurture  
c) World                                        d) Universe
- 10)** One of the basic desires of every human being is to be always \_\_\_\_\_.  
a) Happy                                        b) Sad  
c) Laugh                                        d) Earn money

 2) Don't forget to mention Question Paper Set (P/Q/R/S) at the top of the same page.

**MCQ/Objective Type Questions**

Duration: 30 Minutes

Marks: 14

**Q.1 Select an appropriate option.****14**

- 1) The OSI model consists of \_\_\_\_\_ layers.
  - a) Five
  - b) Seven
  - c) Eight
  - d) Nine
- 2) End-to-end connectivity is provided from host-to-host in.
  - a) Network Layer
  - b) Session Layer
  - c) Data Link Layer
  - d) Transport Layer
- 3) What protocol is used between E-Mail servers.
  - a) FTP
  - b) SMTP
  - c) SNMP
  - d) POP3
- 4) CRC stands for \_\_\_\_\_.
  - a) cyclic redundancy check
  - b) code repeat check
  - c) code redundancy check
  - d) cyclic repeat check
- 5) Which of the following is the multiple access protocol for channel access control?
  - a) CSMA/CD
  - b) CSMA/CA
  - c) Both CSMA/CD & CSMA/CA
  - d) HDLC
- 6) The network layer is concerned with \_\_\_\_\_ of data.
  - a) bits
  - b) frames
  - c) packets
  - d) bytes
- 7) A 4 byte IP address consists of \_\_\_\_\_.
  - a) only network address
  - b) only host address
  - c) network address & host address
  - d) network address & MAC address
- 8) The network layer protocol for internet is \_\_\_\_\_.
  - a) Ethernet
  - b) internet protocol
  - c) hypertext transfer protocol
  - d) file transfer protocol
- 9) Which of the following are transport layer protocols used in networking?
  - a) TCP and FTP
  - b) UDP and HTTP
  - c) TCP and UDP
  - d) HTTP and FTP

- 10) Transport layer protocols deals with \_\_\_\_\_.
  - a) application to application communication
  - b) process to process communication
  - c) node to node communication
  - d) man to man communication
- 11) Which is not a application layer protocol.
  - a) HTTP
  - b) SMTP
  - c) FTP
  - d) TCP
- 12) Application layer offers \_\_\_\_\_ service.
  - a) End to end
  - b) Process to process
  - c) Both End to end and Process to process
  - d) None of the above
- 13) Which is a time-sensitive service.
  - a) File transfer
  - b) File download
  - c) E-mail
  - d) Internet telephony
- 14) Electronic mail uses which Application layer protocol.
  - a) SMTP
  - b) HTTP
  - c) FTP
  - d) SIP

Day & Date: Tuesday, 14-02-2023  
 Time: 10:00 AM To 01:00 PM

Max. Marks: 56

- Instructions:** 1) All questions are compulsory.  
 2) Figures to the right indicates full marks  
 3) Assume suitable data wherever needed and mention it clearly.

**Section – I**

- Q.2 Solve any four of the following.** **12**
- Explain in brief of each layer in OSI model.
  - Elaborate IEEE802.4 & IEEE802.5.
  - Explain TCP/IP Model.
  - What is Internet Domain Name System? Draw & explain Domain Server message format.
- Q.3 Solve any two of the following.** **16**
- Explain distance vector routing with its limitations.
  - Differentiate between IPv4 and IPv6.
  - Elaborate Sub netting and Masking Protocol.

**Section – II**

- Q.4 Solve any four of the following.** **12**
- Describe Error detection and error correction Methods.
  - What is MAC? Explain different protocols of MAC.
  - Write difference between Bluetooth 5.1, 5.2.
  - Explain HTTP Protocol.
- Q.5 Solve any two of the following.** **16**
- Explain shortest path routing.
  - Explain TCP connection establishment, using three way handshaking.
  - Explain Flow control methods of Data link layer.

**T. Y. (B.Tech) (Sem – II) (New) (CBCS) Examination: Oct/Nov - 2022**  
**ELECTRONICS ENGINEERING**  
**Computer Networks**

Day & Date: Tuesday, 14-02-2023  
 Time: 10:00 AM To 01:00 PM

Max. Marks: 56

- Instructions:** 1) All questions are compulsory.  
 2) Figures to the right indicates full marks  
 3) Assume suitable data wherever needed and mention it clearly.

**Section – I**

- Q.2 Solve any four of the following.** **12**
- Explain in brief of each layer in OSI model.
  - Elaborate IEEE802.4 & IEEE802.5.
  - Explain TCP/IP Model.
  - What is Internet Domain Name System? Draw & explain Domain Server message format.
- Q.3 Solve any two of the following.** **16**
- Explain distance vector routing with its limitations.
  - Differentiate between IPv4 and IPv6.
  - Elaborate Sub netting and Masking Protocol.

**Section – II**

- Q.4 Solve any four of the following.** **12**
- Describe Error detection and error correction Methods.
  - What is MAC? Explain different protocols of MAC.
  - Write difference between Bluetooth 5.1, 5.2.
  - Explain HTTP Protocol.
- Q.5 Solve any two of the following.** **16**
- Explain shortest path routing.
  - Explain TCP connection establishment, using three way handshaking.
  - Explain Flow control methods of Data link layer.

<b>Seat No.</b>	
-----------------	--

Day & Date: Thursday, 16-02-2023  
Time: 10:00 AM To 01:00 PM

**Instructions:** 1) Q. No. 1 is compulsory and should be solved in first 30 minutes in answer Book. Don't forget to mention Question paper Set (P/Q/R/S) on top of page.  
2) Figures to the right indicate full marks.  
3) Assume suitable data if necessary.

Duration: 30 Minutes

Marks: 14

## 14

- 1) A \_\_\_\_\_ processor has less number of general purpose registers.

a) CICS	b) RISC
c) Both a & b	d) None of the above
- 2) ARM uses the \_\_\_\_\_ bit instruction set to improve code density.

a) 32	b) 64
c) 8	d) 16
- 3) The \_\_\_\_\_ assembler directive is used to store 32 bit data in memory.

a) ALIGN	b) DCD
c) DCB	d) DCW
- 4) \_\_\_\_\_ mode is the mode that the processor is in after reset.

a) System	b) Supervisory
c) User	d) Abort
- 5) LPC2148's maximum operating frequency is \_\_\_\_\_ MHz.

a) 100	b) 50
c) 80	d) 60
- 6) In LPC2148 \_\_\_\_\_ pin select register is used to configure port pins P1.16 to P1.31.

a) PINSEL2	b) IODIR2
c) PINSEL0	d) PINSEL1
- 7) In ARM7TDMI-S, S stands for \_\_\_\_\_.

a) System	b) Supervisory
c) Synthesizable	d) None of the above
- 8) Inter task communication can be done through \_\_\_\_\_.

a) Mailboxes	b) Message queues
c) Pipes	d) All of above
- 9) In \_\_\_\_\_ kernels, each task requires to do something to explicitly give up control of the CPU.

a) Non-preemptive	b) Preemptive
c) Micro	d) None of the above

- 10)** The \_\_\_\_\_ state corresponds to a task which resides in memory but has not been made available to the multitasking kernel.
- a) Waiting
  - b) Running
  - c) Ready
  - d) Dormant
- 11)** A \_\_\_\_\_ function is a function that can be used by more than one task without fear of data corruption.
- a) Non-reentrant
  - b) Reentrant
  - c) Swap
  - d) None of above
- 12)** A semaphore is a protocol mechanism used to: \_\_\_\_\_.
- a) Control access to a shared resource
  - b) Signal the occurrence of an event
  - c) Allow two tasks to synchronize their activities
  - d) All of above
- 13)** For real time operating systems, interrupt latency should be \_\_\_\_\_.
- a) minimal
  - b) maximum
  - c) zero
  - d) dependent on the scheduling
- 14)**  $\mu$ cos – II can manage up to \_\_\_\_\_ tasks.
- a) 32
  - b) 64
  - c) 128
  - d) 256

**T.Y. (B. Tech) (Sem - II) (New) (CBCS) Examination: Oct/Nov-2022**  
**ELECTRONICS ENGINEERING**  
**Embedded Systems**

Day & Date: Thursday, 16-02-2023  
 Time: 10:00 AM To 01:00 PM

Max. Marks: 56

- Instructions:** 1) All questions are compulsory.  
 2) Figures to the right indicate full marks.  
 3) Assume suitable data if wherever necessary.

**Section – I**

**Q.2 Solve any four of the following.** **16**

- Define embedded system. Explain major characteristics which differs embedded system from desktop computer.
- List down the differences between RISC and CISC architecture.
- Examine the content of all registers and memory locations after the execution of following instruction independently. (R7=0x00004000, R0=0x00000001, R1=0x00000002, R2=0x00000003, R3=0x00000004, R4=0x00000000)
  - LDMIA R7, {R0, R2-R4}
  - STMIA R7!, {R1, R3}
- Write an ARM ASM code to add two 64 bit numbers.
- Discuss the all GPIO registers of LPC2148 with one example each.

**Q.3 Solve any two of the following.** **12**

- Explain ARM programmer's model in detail. (Operating modes, Register model, Program status registers, Data types etc.)
- In RISC architecture an instruction requires four stages to execute: stage 1 (instruction fetch) requires 30 ns, stage 2 (instruction decode) = 9 ns, stage 3 (instruction execute) = 20 ns and stage 4 (store results) = 10 ns. An instruction must proceed through the stages in sequence. What is the minimum asynchronous time for any single instruction to complete?
- Write embedded C code to configure LPC2148 CPU clock for 60 MHz if the 10 MHz external crystal is used as a clock source. Discuss procedure for determining PLL setting and list required conditions.

**Section – II**

**Q.4 Solve any four of the following.** **16**

- Discuss shared data problems and explain any one method to solve it.
- Define the context and context switching. What are the steps involved in  $\mu$ cos – II context switching?
- Elaborate the problem of priority inversion and mechanism to prevent the same with example.
- What is non-preemptive kernel? Elaborate in detail with example and proper diagram.
- List down the types of priority-based kernels. Discuss the preemptive kernel with example.

**Q.5 Solve any two of the followings.**

- a)** Elaborate with examples inter-task/process communication tool semaphore used in RTOS environment.
- b)** Define is a task? Sketch state transition diagram and discuss different task states in detail.
- c)** Create four RTOS tasks to blink LED's connected to LPC2148 port pins P0.4 through P0.7 at 1Hz, 1.5Hz, 2Hz and 2.5 Hz respectively.

<b>Set</b>	<b>Q</b>
------------	----------

**T. Y. (B. Tech) (Sem - II) (New) (CBCS) Examination: Oct/Nov-2022**  
**ELECTRONICS ENGINEERING**  
**Electronics System Design**

Day & Date: Monday, 20-02-2023  
Time: 10:00 AM To 01:00 PM

Max. Marks: 56

- Instructions:** 1) All questions are compulsory.  
1) Figures to the right indicates full marks.  
2) Assume suitable data wherever needed and mention it clearly.

**Section – I**

- Q.2 Solve any four** **16**
- a) Explain different stages in electronic product development.
  - b) Explain various goals of software design.
  - c) Explain different types of batteries.
  - d) Explain the working and interfacing of LDR.
  - e) Write a short note on humidity sensor DHT11. Show its interfacing.
- Q.3 Solve any Two** **12**
- a) Explain different constructs of regular program.
  - b) Develop temperature measurement system using LM35 and 8051.
  - c) Design a single cell Li-ion battery Charger with temperature compensation using LM317. Assume suitable battery specification.

**Section – II**

- Q.4 Solve any four** **16**
- a) Explain PCB design rules for digital circuits.
  - b) Explain layout rules in PCB design.
  - c) Write a short note on Smart Card Systems.
  - d) Explain RS485 serial protocol.
  - e) Compare memory mapped IO and IO mapped IO.
- Q.5 Solve any two** **12**
- a) Develop the system for RFID based attendance monitoring system.
  - b) In PCB design explain interconnection parameters Resistance and Capacitance.
  - c) Explain hardware and software components of temperature controller system.

**T. Y. (B. Tech) (Sem - II) (New) (CBCS) Examination: Oct/Nov-2022**  
**ELECTRONICS ENGINEERING**  
**Electronics System Design**

Day & Date: Monday, 20-02-2023  
 Time: 10:00 AM To 01:00 PM

Max. Marks: 70

- Instructions:**
- 1) Q. No. 1 is compulsory. It should be solved in the first 30 minutes in Answer Book Page No. 3 (starting page of the Answer Book). Each the question carries one mark.
  - 2) Don't forget to mention the Question Paper Set (P/Q/R/S) at the top of the same page.
  - 3) Assume suitable data wherever needed and mention it clearly.
  - 4) Figures to the right indicate in full marks.

**MCQ/Objective Type Questions**

Duration: 30 Minutes

Marks: 14

**Q.1 Choose the correct alternatives from the options.**

**14**

- 1) Which lines are utilized during the enable state of hardware flow control in DTE and DCE devices of RS232?
  - a) CD & IR
  - b) DSR & DTR
  - c) RTS & CTS
  - d) None of the above
- 2) In DHT 11 \_\_\_\_\_ method is used for measuring the temperature.
  - a) Resistive
  - b) Inductive
  - c) Capacitive
  - d) None of these
- 3) Thermocouple is a \_\_\_\_\_.
  - a) Primary device
  - b) Secondary transducer
  - c) Tertiary transducer
  - d) None of the mentioned
- 4) An electronic device which converts physical quantity or energy from one form to another is called \_\_\_\_\_.
  - a) Sensor
  - b) Transistor
  - c) Transducer
  - d) Thyristor
- 5) Transducer is used to convert a \_\_\_\_\_.
  - a) physical quantity into an electrical signal
  - b) electrical signal into a physical quantity
  - c) physical quantity into a mechanical quantity
  - d) physical quantity into a chemical quantity
- 6) LM35 always requires an external calibration circuitry: \_\_\_\_\_.
  - a) True
  - b) False
- 7) Why Vref is set of ADC0804 to 2.56 V if analog input is connected to the LM35?
  - a) to set the step size of the sampled input
  - b) to set the ground for the chip
  - c) to provide supply to the chip
  - d) all of the mentioned
- 8) Number of cells connected in series provide a \_\_\_\_\_.
  - a) High current carrying capacity
  - b) Higher Voltage
  - c) Higher power
  - d) None of the above

- 9) Ni-Cd batteries are made of \_\_\_\_\_ chemical composition.  
a) Nickel and Calcium                      b) Nickel and Cadmium  
c) Nitrogen and Cadmium                  d) None of the mentioned
- 10) In case of industrial or military products the prime requirement is \_\_\_\_\_.  
a) Best reliability                              b) Low cost  
c) Aesthetic design                          d) None of the above
- 11) A computer program is used to translate between lower-level representation of the computer program is called \_\_\_\_\_.  
a) Compiler                                      b) Assembler  
c) Cross-compiler                              d) Operating system
- 12) Laminate in a PCB is made of \_\_\_\_\_.  
a) insulating base                              b) conducting base  
c) semi-conductive base                      d) Ferrous material base
- 13) PCBs should be fabricated with \_\_\_\_\_ layers.  
a) Odd number                                  b) even number of  
c) any number of                                d) None of these
- 14) In RS232 standards logic "0" is represented by \_\_\_\_\_.  
a) -3 to -25 V                                  b) 3 to 25 V  
c) 0 to 0.8 V                                    d) 2 to 5 V

 3) Figures to the right indicates full marks

**MCQ/Objective Type Questions**

Duration: 30 Minutes

Marks: 14

**Q.1 Choose the correct alternative from the given option.**

**14**

- 1) A test bench is used \_\_\_\_\_.
  - a) Verify the functionality of a design
  - b) To generate primitives
  - c) To generate net list
  - d) None of above
- 2) Which of the following attribute returns the time elapsed since the previous transaction on S \_\_\_\_\_.
  - a) S'active
  - b) S'event
  - c) S'Last\_active
  - d) S'Last\_value
- 3) Which of the following is a valid signal declaration?
  - a) signal x : std\_logic = '2'
  - b) signal x <= 5;
  - c) signal x := 5;
  - d) signal x : std\_logic := '1';
- 4) Which of the following feature can be used to specify the parameters for a component at the time of instantiation?
  - a) Generate
  - b) Attribute
  - c) Generics
  - d) Signals
- 5) When the following signal assignment statement executes at 5 ns, the new value will be assigned to signal at what time?  
 X <= 4 after 5 ns ;
  - a) 10 ns;
  - b) 10ns + Δ
  - c) 5 ns
  - d) 5 ns + Δ
- 6) The delay model models the delays introduced by wiring which simply delays the signal by specified delay is \_\_\_\_\_.
  - a) Transport
  - b) Inertial
  - c) Delta
  - d) None of these
- 7) Assuming the left operand as BIT - vector, "1101010" sll 2 is
  - a) "0101010"
  - b) "0101000"
  - c) "0101011"
  - d) None of these

- 8) A single pattern that may be interpreted as a result of all the applied tests in testing is \_\_\_\_\_.
  - a) MIC
  - b) PRBSG
  - c) SIC
  - d) Signature
- 9) No. of flip-flops /CLB in FPGA XC4000 is \_\_\_\_\_.
  - a) 4
  - b) 2
  - c) 6
  - d) 1
- 10) CMOS logic consists of \_\_\_\_\_.
  - a) pull up network
  - b) pull down network
  - c) Both a) and b)
  - d) None of above
- 11) Input Resistance of CMOS Inverter is \_\_\_\_\_.
  - a) Extremely LOW
  - b) Extremely High
  - c) Infinity
  - d) Zero
- 12) Which of the following method is used for testing the sequential circuit?
  - a) Random tests
  - b) Scan path technique
  - c) Path sensitizing technique
  - d) All of these
- 13) In a CMOS inverter with  $V_{tn} < V_{in} < V_{DD} / 2$ , the states of p-device and n-device are \_\_\_\_\_.
  - a) saturated, nonsaturated
  - b) linear, saturated
  - c) nonsaturated, cutoff
  - d) None of these
- 14) Input of synthesis process are \_\_\_\_\_.
  - a) RTL VHDL description
  - b) Circuit constraints and attributes design
  - c) Technology library
  - d) All of above

Time: 10:00 AM To 01:00 PM

**Instructions:** 1) Q. No. 1 is compulsory. It should be solved in the first 30 minutes in answer book. Page no 03 (Starting page of the Answer Book). Each question carries one mark.  
2) Don't forget to Mention question paper set (P/Q/R/S) on top of page.  
3) Figures to the right indicates full marks

Marks: 14

## 14

- Page 13 of 16

- 9) Input of synthesis process are \_\_\_\_\_.  
a) RTL VHDL description  
b) Circuit constraints and attributes design  
c) Technology library  
d) All of above
- 10) A test bench is used \_\_\_\_\_.  
a) Verify the functionality of a design  
b) To generate primitives  
c) To generate net list  
d) None of above
- 11) Which of the following attribute returns the time elapsed since the previous transaction on S \_\_\_\_\_.  
a) S'active  
b) S'event  
c) S'Last\_active  
d) S'Last\_value
- 12) Which of the following is a valid signal declaration?  
a) signal x : std\_logic = '2'  
b) signal x <= 5;  
c) signal x := 5;  
d) signal x : std\_logic := '1';
- 13) Which of the following feature can be used to specify the parameters for a component at the time of instantiation?  
a) Generate  
b) Attribute  
c) Generics  
d) Signals
- 14) When the following signal assignment statement executes at 5 ns, the new value will be assigned to signal at what time?  
X <= 4 after 5 ns ;  
a) 10 ns;  
b) 10ns + Δ  
c) 5 ns  
d) 5 ns + Δ

Set **S**

**T.Y. (B.Tech.) (Sem - II) (New) (CBCS) Examination: Oct/Nov-2022**  
**ELECTRONICS ENGINEERING**  
**VLSI Design**

Day & Date: Wednesday, 22-02-2023  
 Time: 10:00 AM To 01:00 PM

Marks: 56

**Instructions:** 1) All questions are compulsory.  
 2) Figures to the right indicate full marks.

**Section – I****Q.2 Solve any four****16**

- Explain with suitable example different forms of wait statement. What is the significance of wait for 0 ns?
- Explain the transport and inertial delays in VHDL
- Write VHDL code for 8:1 Multiplexer.
- If A="101", B="011" and C="010" what are the values of following statements.
  - A xor 2
  - A & not B = "111110",
  - A or B and C
  - (A & B) or (B & C)
- Write VHDL code for D flip flop with asynchronous reset.

**Q.3 Solve any TWO****12**

- What are the major differences between VHDL functions and VHDL Procedures? Write VHDL function for 4 bit addition.
- Write VHDL code for half adder. Also write the test bench for testing it.
- Write VHDL code for a Moore FSM to detect the sequence 101 at the input. It should produce output z equal to 1 whenever the sequence is detected on input x.

**Section – II****Q.4 Solve any four****16**

- Explain the architecture of macrocell in Xilinx 9500 series CPLD.
- Explain place and route process of EDA tools.
- Explain the CMOS noise margin in detail.
- Obtain the complete test set for circuit shown below using path sensitizing.

- Draw and explain the schematic arrangement for testing sequential circuits.

**Q.5 Solve any TWO**

- a)** Draw and Explain Xilinx Spartan 4000 FPGA architecture.
- b)** Explain in detail simulation steps in RTL simulation.
- c)** Draw and Explain DC characteristics of CMOS Inverter.

Day & Date: Friday, 24-02-2023  
 Time: 10:00 AM To 01:00 PM

Max. Marks: 70

- Instructions:** 1) Q. No. 1 is compulsory. It should be solved in the first 30 minutes in answer book. Page no 03 (Starting page of the Answer Book). Each question carries one mark.  
 2) Don't forget to Mention question paper set (P/Q/R/S) on top of page.  
 3) Figures to the right indicates full marks  
 4) Assume suitable data wherever needed and mention it clearly.

**MCQ/Objective Type Questions**

Duration: 30 Minutes

Marks: 14

**Q.1 Choose the correct alternatives from the given options.**

**14**

- 1) A process can be \_\_\_\_\_.  
 a) single threaded  
 b) multithreaded  
 c) both single threaded and multithreaded  
 d) none of the mentioned
- 2) The model in which the one kernel thread is mapped to many user-level threads is called:  
 a) Many to One model  
 b) One to Many model  
 c) Many to Many model  
 d) One to One model
- 3) The long-term scheduler \_\_\_\_\_.  
 a) selects processes which have to be brought into the ready queue  
 b) selects processes which have to be executed next and allocates CPU  
 c) selects processes which have to remove from memory by swapping  
 d) None of the mentioned
- 4) Round robin scheduling falls under the category of \_\_\_\_\_.  
 a) Non-preemptive scheduling  
 b) Preemptive scheduling  
 c) All of the mentioned  
 d) None of the mentioned
- 5) Which of the following scheduling algorithms gives minimum average waiting time?  
 a) FCFS  
 b) SJF  
 c) Round robin  
 d) priority
- 6) From the time of submission of a process to the time of completion, The interval is termed as \_\_\_\_\_.  
 a) Waiting time  
 b) Turnaround time  
 c) Response time  
 d) Throughput
- 7) Which of the following system call is used for opening or creating a file?  
 a) Red  
 b) White  
 c) Open  
 d) Close

- 8) Which of the following condition is required for a deadlock to be possible?
- a) mutual exclusion
  - b) a process may hold allocated resources while awaiting assignment of other resources
  - c) no resource can be forcibly removed from a process holding it
  - d) all the mentioned
- 9) Which one of the following is the deadlock avoidance algorithm?
- a) Banker's algorithm
  - b) Round-robin algorithm
  - c) Peterson's algorithm
  - d) Karn's algorithm
- 10) Thrashing\_\_\_\_\_ the CPU utilization.
- a) increases
  - b) keeps constant
  - c) decreases
  - d) none of the mentioned
- 11) LRU page - replacement algorithm associates with each page the\_\_\_\_\_.
- a) time it was brought into memory
  - b) the time of that page's last use
  - c) page after and before it
  - d) all of the mentioned
- 12) \_\_\_\_\_ page replacement algorithm suffers from Belady's Anomaly.
- a) Optimal
  - b) LRU
  - c) FCFS
  - d) None of the mentioned
- 13) Which one of the following is the address generated by CPU?
- a) physical address
  - b) absolute address
  - c) logical address
  - d) none of the mentioned
- 14) Memory management technique in which system stores and retrieves data from secondary storage for use in main memory is called?
- a) fragmentation
  - b) paging
  - c) mapping
  - d) none of the mentioned

**Operating Systems**

Day & Date: Friday, 24-02-2023  
 Time: 10:00 AM To 01:00 PM

Max. Marks: 56

- Instructions:** 1) All questions are compulsory.  
 2) Figures to the right indicates full marks  
 3) Assume suitable data wherever needed and mention it clearly.

**Section-I**

**Q.2 Answer any four.** **16**

- a) Define process and explain different components of process.
- b) List different types of operating systems. Describe any two types of operating systems in detail.
- c) What is the necessity of system call? List different systems calls used in operating systems. Explain any two systems calls.
- d) Why inter-process communication is required? Explain shared memory and message passing mechanism of inter process communication.
- e) Describe various activities involved in process management. Specify different components of process control block.

**Q.3 Solve any two.** **12**

- a) List different multi-threading models and describe any two in detail. Compare between process and thread.
- b) What is race condition? Explain use of turn variable and semaphore to ensure mutual exclusion to avoid race condition.
- c) Following table shows processes along with their arrival and burst time

Process	Burst time (ms)	Arrival time (ms)
P1	10	0
P2	8	0
P3	6	1
P4	3	2
P5	4	1

Calculate average TAT and average WT for shortest job first (SJF) and shortest remaining time first (SRTF) scheduling algorithm.

**Section – II**

**Q.4 Attempt any four.** **16**

- a) What is deadlock? Describe necessary conditions to create deadlock.
- b) What are logical and physical addresses in operating system? Compare between logical and physical address.

- c) The following table shows allocated and required resources for processes execution.

<b>Process</b>	<b>Resource Allocated</b>		<b>Resource requested</b>	
	<b>R1</b>	<b>R2</b>	<b>R1</b>	<b>R2</b>
P1	1	0	0	0
P2	0	1	0	0
P3	0	0	1	1
P4	0	0	1	0

Draw resource allocation graph. Is deadlock available in RAG? Justify your answer

- d) Apply Banker's algorithm to find safe sequence of process execution. Assume current available resources as A= 2, B=3, C=0

<b>Process</b>	<b>Resource allocated</b>			<b>Maximum resources required</b>		
	<b>A</b>	<b>B</b>	<b>C</b>	<b>A</b>	<b>B</b>	<b>C</b>
P0	0	1	0	7	5	3
P1	3	0	2	3	2	2
P2	3	0	2	2	0	2
P3	2	1	1	9	2	2
P4	0	0	2	4	3	3

- e) What is free space management in operating system? Describe different methods of free-space management.

**Q.5 Attempt any two.**

**12**

- a) Describe contiguous and non-contiguous memory allocation in detail. What are internal and external fragmentation issues related to memory allocation.
- b) In case of optimal page replacement algorithm following is page reference String- Reference String = {7, 0, 1, 2, 0, 3, 0, 4, 2, 3, 0, 3, 2, 1, 2, 0, 1, 7, 0, 1} and number of frames in RAM = 3. Find page faults, page hits, page fault ratio and page hit ratio.
- c) What are the drawbacks of paging? Describe segmentation in operating system. How segmentation overcome paging drawbacks?

99	99
100	100

Day & Date: Friday, 24-02-2023  
Time: 10:00 AM To 01:00 PM

**Instructions:**

- 1) Q. No. 1 is compulsory. It should be solved in the first 30 minutes in answer book. Page no 03 (Starting page of the Answer Book). Each question carries one mark.
- 2) Don't forget to Mention question paper set (P/Q/R/S) on top of page.
- 3) Figures to the right indicates full marks
- 4) Assume suitable data wherever needed and mention it clearly.

## Marks: 14

14

- Page 13 of 16

- 9) Memory management technique in which system stores and retrieves data from secondary storage for use in main memory is called?
- a) fragmentation
  - b) paging
  - c) mapping
  - d) none of the mentioned
- 10) A process can be \_\_\_\_.
- a) single threaded
  - b) multithreaded
  - c) both single threaded and multithreaded
  - d) none of the mentioned
- 11) The model in which the one kernel thread is mapped to many user-level threads is called:
- a) Many to One model
  - b) One to Many model
  - c) Many to Many model
  - d) One to One model
- 12) The long-term scheduler \_\_\_\_.
- a) selects processes which have to be brought into the ready queue
  - b) selects processes which have to be executed next and allocates CPU
  - c) selects processes which have to be removed from memory by swapping
  - d) None of the mentioned
- 13) Round robin scheduling falls under the category of \_\_\_\_.
- a) Non-preemptive scheduling
  - b) Preemptive scheduling
  - c) All of the mentioned
  - d) None of the mentioned
- 14) Which of the following scheduling algorithms gives minimum average waiting time?
- a) FCFS
  - b) SJF
  - c) Round robin
  - d) priority

**T.Y. (B.Tech) (Sem - II) (New) (CBCS) Examination: Oct/Nov-2022**  
**ELECTRONICS ENGINEERING**  
**Operating Systems**

Day & Date: Friday, 24-02-2023  
 Time: 10:00 AM To 01:00 PM

Max. Marks: 56

- Instructions:** 1) All questions are compulsory.  
 2) Figures to the right indicates full marks  
 3) Assume suitable data wherever needed and mention it clearly.

**Section-I**

**Q.2 Answer any four.** **16**

- Define process and explain different components of process.
- List different types of operating systems. Describe any two types of operating systems in detail.
- What is the necessity of system call? List different systems calls used in operating systems. Explain any two systems calls.
- Why inter-process communication is required? Explain shared memory and message passing mechanism of inter process communication.
- Describe various activities involved in process management. Specify different components of process control block.

**Q.3 Solve any two.** **12**

- List different multi-threading models and describe any two in detail. Compare between process and thread.
- What is race condition? Explain use of turn variable and semaphore to ensure mutual exclusion to avoid race condition.
- Following table shows processes along with their arrival and burst time

Process	Burst time (ms)	Arrival time (ms)
P1	10	0
P2	8	0
P3	6	1
P4	3	2
P5	4	1

Calculate average TAT and average WT for shortest job first (SJF) and shortest remaining time first (SRTF) scheduling algorithm.

**Section – II**

**Q.4 Attempt any four.** **16**

- What is deadlock? Describe necessary conditions to create deadlock.
- What are logical and physical addresses in operating system? Compare between logical and physical address.

- c) The following table shows allocated and required resources for processes execution.

<b>Process</b>	<b>Resource Allocated</b>		<b>Resource requested</b>	
	<b>R1</b>	<b>R2</b>	<b>R1</b>	<b>R2</b>
P1	1	0	0	0
P2	0	1	0	0
P3	0	0	1	1
P4	0	0	1	0

Draw resource allocation graph. Is deadlock available in RAG? Justify your answer

- d) Apply Banker's algorithm to find safe sequence of process execution. Assume current available resources as A= 2, B=3, C=0

<b>Process</b>	<b>Resource allocated</b>			<b>Maximum resources required</b>		
	<b>A</b>	<b>B</b>	<b>C</b>	<b>A</b>	<b>B</b>	<b>C</b>
P0	0	1	0	7	5	3
P1	3	0	2	3	2	2
P2	3	0	2	2	0	2
P3	2	1	1	9	2	2
P4	0	0	2	4	3	3

- e) What is free space management in operating system? Describe different methods of free-space management.

#### Q.5 Attempt any two.

12

- a) Describe contiguous and non-contiguous memory allocation in detail. What are internal and external fragmentation issues related to memory allocation.
- b) In case of optimal page replacement algorithm following is page reference String- Reference String = {7, 0, 1, 2, 0, 3, 0, 4, 2, 3, 0, 3, 2, 1, 2, 0, 1, 7, 0, 1} and number of frames in RAM = 3. Find page faults, page hits, page fault ratio and page hit ratio.
- c) What are the drawbacks of paging? Describe segmentation in operating system. How segmentation overcome paging drawbacks?

Day & Date: Friday, 24-02-2023  
 Time: 10:00 AM To 01:00 PM

Max. Marks: 70

- Instructions:** 1) Q. No. 1 is compulsory. It should be solved in the first 30 minutes in answer book. Page no 03 (Starting page of the Answer Book). Each question carries one mark.  
 2) Don't forget to Mention question paper set (P/Q/R/S) on top of page.  
 3) Figures to the right indicates full marks

**MCQ/Objective Type Questions**

Duration: 30 Minutes

Marks:14

**Q.1 Choose the correct alternatives from the given options.**

**14**

- 1) Index grading may be achieved through the \_\_\_\_\_ of mobile ions across the core cladding interface within molten glass.
  - a) Diffusion
  - b) Doping
  - c) Separation
  - d) Combination
- 2) The graded index profile which produce the best results for multimode optical propagation have refractive index profile
  - a) Circular
  - b) Rectangular
  - c) Triangular
  - d) Parabolic
- 3) Attenuation per Km expressed in
  - a) Ampere
  - b) Decibel per Km
  - c) Watt
  - d) None of these
- 4) The spectral linewidth of an LED operating at room temperature is the 0.8 to 0.9  $\mu\text{m}$  wavelength band is usually between \_\_\_\_\_ at the half maximum intensity points
  - a) 10 to 15 mm
  - b) 20 to 30 mm
  - c) 25 to 40 nm
  - d) 10 to 15 nm
- 5) The internal quantum efficiency of LED decreases with \_\_\_\_\_.
  - a) Increase in temp
  - b) Decrease in temp
  - c) increase in pressure
  - d) Both a and c
- 6) Injection laser will generally supply \_\_\_\_\_ of optical output power.
  - a) Megawatts
  - b) Kilowatts
  - c) Milliwatts
  - d) None
- 7) LASER works on \_\_\_\_\_ principle.
  - a) Absorption
  - b) Stimulated emission
  - c) Spontaneous emission
  - d) Both b & c
- 8) SLD offers \_\_\_\_\_ spectral line width.
  - a) Narrow
  - b) Broad
  - c) Constant
  - d) Non liner

- 9) \_\_\_\_\_ is a multi-functional element of optical network.
  - a) HOP
  - b) Optical Mode
  - c) Wavelength
  - d) None of these
- 10) In an optical network, increase in the number of lasers \_\_\_\_\_ the bit rate.
  - a) Stabilizes
  - b) Decreases
  - c) Increases
  - d) None of these
- 11) \_\_\_\_\_ is a multiplexing technique used to combine optical signals.
  - a) FDM
  - b) WDM
  - c) TDM
  - d) None of these
- 12) The basic performance of WDM system is determine by \_\_\_\_\_.
  - a) Noise added in channel
  - b) Transmission loss
  - c) Insertion loss
  - d) All of these
- 13) In optical cable design the strain on the fiber in the cable does not exceed \_\_\_\_\_ %.
  - a) 5
  - b) 0.8
  - c) 2.2
  - d) 0.2
- 14) OTDM stand for \_\_\_\_\_ Time \_\_\_\_\_ Multiplexing
  - a) Orthogonal, Duplex
  - b) Optical, Duplex
  - c) Orthogonal, Division
  - d) Optical, Division

**ELECTRONICS ENGINEERING**  
**Optical Communication**

Day & Date: Friday, 24-02-2023  
 Time: 10:00 AM To 01:00 PM

Max. Marks: 56

**Instructions:** 1) Figures to the right indicate full marks.  
 2) All questions are compulsory.

**Section – I**

**Q.2 Answer the following (Any Four) 16**

- An optical fiber has a numerical aperture of 0.20 and a cladding refractive index of 1.59. Determine
  - The acceptance angle for the fiber in water which has a refractive index of 1.33
  - The critical angle at the core-cladding interface.
- Derive the expression for Numerical Aperture
- Briefly write about non-linear scattering losses observed in fiber optics.
- Explain the principle operation / concept of double heterojunction LED.
- Write Comparison between step index fiber and graded index fiber

**Q.3 Answer the following (Any Two) 12**

- A silica optical fiber with core diameter large enough to be considered ray theory analysis has a core refractive index of 1.50 and a cladding refractive index of 1.47. Determine
  - The critical angle at the core-cladding interface
  - The NA for the fiber
  - The acceptance angle in air for the fiber.
- What are splices? Explain techniques for splicing.
- With energy state diagram explain working of laser

**Section – II**

**Q.4 Attempt any Four. 16**

- A GaAs has a bandgap energy of 1.43 eV at 300 K. Determine the wavelength above which an intrinsic photodetector fabricated from this material will cease to operate.
- Write a short note on WDM.
- Write a short note on semiconductor optical amplifiers.
- What is FDDI? Explain in brief.
- Explain the following terms: Quantum Efficiency & Responsivity.

**Q.5 Attempt any two. 12**

- The radiative and nonradiative recombination lifetimes of the minority carriers in the active region of a double-heterojunction LED are 60 ns and 100 ns respectively. Determine the total carrier recombination lifetime and the power internally generated within the device when the peak emission wavelength is  $0.87 \mu\text{m}$  at a drive current of 40 mA.
- Explain in details types of Optical Amplifiers.
- Draw the equivalent circuit diagram of low impedance front end receiver amplifier and obtain the S/N ratio.

<b>Q</b>
----------

**T. Y (B. Tech) (Sem-II) (New) (CBCS) Examination: Oct/Nov-2022**  
**ELECTRONICS ENGINEERING**  
**Robotics**

Day & Date: Monday, 27-02-2023  
Time: 10:00 AM To 12:00 PM

Max. Marks: 50

**Instructions:** 1) Following question includes Section I & Section II.  
2) Figures to the right indicate full marks  
3) Assume suitable data wherever needed and mention it clearly.

**Section – I**

**Q.1 Attempt any Four.**

**20**

- a) Classify robot on coordinate system and explain with neat diagram.
- b) List and elaborate any two control methods of robotics.
- c) Discuss key issues for locomotion.
- d) Define transducer and sensor. Discuss proximity sensor with neat diagram.
- e) List and elaborate any two-position sensor.

**Section - II**

**Q.2 Attempt any Three.**

**30**

- a) Discuss welding and spray-painting applications of robots.
- b) Describe working of robotics for part sorting application with neat sketch.
- c) Compare stationary and mobile robots based on construction, speed, capacity and applications.
- d) With neat sketch explain basic visual sensing system.

Day & Date: Monday 27-02-2023  
 Time: 10:00 AM To 12:00 PM

Max. Marks: 50

- Instructions:** 1) Q. No. 1 is compulsory. It should be solved in the first 20 minutes in answer book. Page no 03 (Starting page of the Answer Book). Each question carries one mark.  
 2) Don't forget to Mention question paper set (P/Q/R/S) on top of page.  
 3) Figures to the right indicates full marks  
 4) Assume suitable data wherever needed and mention it clearly.

**MCQ/Objective Type Questions**

Duration: 20 Minutes

Marks: 10

**Q.1 Choose the correct alternatives from the option.****10**

- 1) What does a sensor do?
  - a) it selects transmission gear ratio
  - b) it measures some variable
  - c) it is an output device
  - d) it sends signals to the driver
- 2) The advantage of a tubeless tyre over tube type tyre is \_\_\_\_\_.
  - a) Slow air leakage
  - b) better fuel efficiency
  - c) less chance of running flat
  - d) All mentioned
- 3) What does a microcomputer use to interface with other systems?
  - a) parallel interface
  - b) analog-to-digital converter
  - c) digital-to-analog converter
  - d) all of the above
- 4) A thermistor is, \_\_\_\_\_.
  - a) a semiconductor temperature sensor
  - b) a device for regulating engine temperature
  - c) a temperature control system for the passenger
  - d) a new type of transistor
- 5) What advantages does digital signal processing have over analog signal processing?
  - a) digital is more precise
  - b) digital doesn't drift with time and temperature
  - c) the same digital hardware can be used in many filters
  - d) all of the above
- 6) Odometer is an instrument used for measurement of \_\_\_\_\_.
  - a) Power
  - b) Fuel consumption
  - c) Engine r.p.m.
  - d) Distance
- 7) Which of the following is used by the Hall Effect pickup?
  - a) Thermistors
  - b) Potentiometers
  - c) Inductive transducers
  - d) Semiconductors

- 8) The skidding of vehicles, while sudden brakes are applied, is avoided through \_\_\_\_\_.  
a) antilock braking system                      b) engine management system  
c) automatic car parking system              d) driving system
- 9) An ohmmeter can be used to measure \_\_\_\_\_.  
a) plug lead resistance                      b) engine management system  
c) automatic car parking system              d) all of the above
- 10) The ignition component that steps up voltage is the:  
a) spark plug                                      b) condenser  
c) coil    d) king lead

Max. Marks: 40

- Instructions:** 1) Both Sections are compulsory.  
2) Figures to the right indicate full marks.  
3) Use of electronic component data sheet is allowed.  
4) Assume suitable data if necessary.

**Section – I**

**Q.2 Solve any three questions:** **12**

- a) Define the following terms related to measurement
  - 1) Arithmetic mean
  - 2) Average value
  - 3) Deviation
  - 4) Standard deviation
- b) What are international, primary, secondary, and working standards of measurement?
- c) What is electromagnetic interference? What causes electromagnetic interference? How to prevent EMI?
- d) Draw block diagram of digital tachometer and describe it's working.

**Q.3 Solve any one question:** **08**

- a) Draw block diagram of electronic counter and describe various of modes of working.
- b) Why AC signal conditioning is necessary? With suitable block diagram explain working of AC signal conditioning system.

**Section – II**

**Q.4 Solve any three questions:** **12**

- a) What is wave analyzer? What is the principle of its working? Explain working of Basic wave analyzer with suitable circuit.
- b) Explain operation of X-Y recorder with help of block diagram.
- c) Discuss in brief self-testing of smart sensor and their applications.
- d) Discuss application and limitation of spectrum analyzer.

**Q.5 Solve any one question:** **08**

- a) What is DAS? Draw block diagram of DAS. Write function of each block.
- b) With suitable block diagram explain working of data logger.

**T.Y. (B. Tech.) (Semester-II) (New) (CBCS) Examination: Oct/Nov-2022**  
**ELECTRONICS ENGINEERING**  
**Electronic Instrumentation**

Day & Date: Monday, 27-02-2023  
 Time: 10:00 AM To 12:00 PM

Max. Marks: 50

- Instructions:** 1) Q. No. 1 is compulsory. It should be solved in the first 20 minutes in answer book. Page no 03 (Starting page of the Answer Book). Each question carries one mark.  
 2) Don't forget to Mention question paper set (P/Q/R/S) on top of page.  
 3) Figures to the right indicates full marks.

**MCQ/Objective Type Questions**

Duration: 20 Minutes

Marks: 10

**Q.1 Choose the correct alternative from the options. 10**

- 1) For measuring speed of motor \_\_\_\_\_ is used.
 

a) Tachometer	b) pH meter
c) X-Y recorder	d) X-Y plotter
- 2) For lower accuracies \_\_\_\_\_.
 

a) digital acquisition system is used
b) both digital and analog acquisition systems are used
c) analog acquisition system is used
d) mechanical data acquisition system is used
- 3) The degree of closeness of a measurement compared to the expected value is \_\_\_\_\_.
 

a) Measurement	b) resolution
c) precision	d) accuracy
- 4) In single channel data acquisition system, the output of the buffer circuitry is \_\_\_\_\_.
 

a) Analog	b) digital
c) zero	d) mixed
- 5) \_\_\_\_\_ is a quantitative measure of acidity.
 

a) Indicator	b) pH
c) Hp	d) balance scale
- 6) Environmental and observational are the types of \_\_\_\_\_ errors.
 

a) Systematic	b) Gross
c) Random	d) Statistical
- 7) An Ultrasonic sensor is used to measure \_\_\_\_\_.
 

a) Distance	b) Speed
c) pH Value	d) Temperature
- 8) Harmonics Distortion is due to?
 

a) DC level of the signal
b) distortion in measuring equipment
c) Non linear device or system
d) none of mentioned

- 9) Which of below is dynamic characteristics of an instrument?
- a) Accuracy
  - b) Resolution
  - c) Fidelity
  - d) Sensitivity
- 10) In signal generators, \_\_\_\_.
- a) Energy is created
  - b) Energy is generated
  - c) Energy is converted from a simple d.c. source into a.c. energy at specific frequency
  - d) All of the above

**MCQ/Objective Type Questions**

Duration: 20 Minutes

Marks: 10

**Q.1 Choose the correct alternatives from the options.**

**10**

- 1) Which of the following is not an OOPS concept in Java?
  - a) Polymorphism
  - b) Inheritance
  - c) Compilation
  - d) Encapsulation
- 2) Find the output of the following code.

```
int Integer = 24;
char String = 'I';
System.out.print(Integer);
System.out.print(String);
```

- a) Compile Error
  - b) 24  
I
  - c) 24I
  - d) Exception
- 3) Select the valid statement to declare and initialize an array.
    - a) `Int [] A={}`
    - b) `Int [] A={1,2,3}`
    - c) `Int [] A=[1,2,3]`
    - d) `Int [][] A={}`
  - 4) What is the extension of compiled java classes?
    - a) .txt
    - b) .js
    - c) .class
    - d) .java
  - 5) Identify Valid Identifiers from below:
    - a) Score
    - b) Class
    - c) Highest score
    - d) 1number
  - 6) Identify the corrected definition of a package \_\_\_\_\_.
    - a) A package is a collection of editing tools
    - b) A package is collection of classes
    - c) A package is a collection of classes and interfaces
    - d) A package is a collection of interfaces

- 7)** Which option is false about the final keyword?
- a) A final method cannot be overridden in its subclasses.
  - b) A final class cannot be extended
  - c) A final class can not extend other classes
  - d) A final method can be inherited
- 8)** Which key word is used for accessing the features of a package?
- a) Package
  - b) Import
  - c) Extends
  - d) Export
- 9)** How may threads can be executed at a time?
- a) Only one thread
  - b) Multiple threads
  - c) Only main (main method) thread
  - d) Two threads
- 10)** All Java exceptions can be handled gracefully.

<b>Set</b>	<b>P</b>
------------	----------

**Fourth Year (B.Tech.) (Sem - I) (New) (CBCS) Examination: Oct/Nov-2022**  
**ELECTRONICS ENGINEERING**  
**Power Electronics**

Day & Date: Wednesday, 25-01-2023  
Time: 02:00 PM To 05:00 PM

Max. Marks: 56

**Instructions:** 1) All questions are compulsory.  
2) Figures to the right indicates full marks.

**Section – I**

**Q.2 Solve any four** **16**

- a) Explain the various mechanisms by which thyristors may be turn on.
- b) What is commutation? How commutation takes place in class C complementary commutation technique. Sketch associated waveforms.
- c) Derive an expression for average output dc voltage for single phase full wave controlled bridge rectifier with highly inductive load.
- d) A single phase semiconverter is operated from 120V, 50Hz AC supply. The  $R_L$  is  $10\Omega$ . If the average output voltage is 25% of the maximum possible output voltage. Determine
  - 1) Firing angle
  - 2) Average DC voltage
- e) Derive an expression of average dc output voltage of three phase half wave controlled rectifier with resistive load. Draw associated waveforms.

**Q.3 Solve any two** **12**

- a) Explain following methods of over voltage protections circuits.
  - 1) Snubber circuits for  $dv/dt$  suppression
  - 2) Electronic crowbar circuit
- b) Derive an expression for  $V_{dc}$  and  $V_{rms}$  of three phase semiconverter with resistive load for continuous conduction mode. Draw neat waveform for  $\alpha=30^\circ$ .
- c) Design microcontroller based firing scheme for Three phase fully controlled rectifiers.

**Section – II**

**Q.4 Solve any four** **16**

- a) Explain working of step down chopper and derive an expression for output voltage, duty cycle and effective input resistance.
- b) Explain operation of single phase midpoint cycloconverter with resistive load. The frequency is  $f_o/f_s = 1/5$ . Sketch associated waveforms.
- c) Explain operation of single phase full bridge voltage source inverter with inductive load. Draw associate waveforms.
- d) Explain operation of basic series resonant inverter. Draw associated waveforms.
- e) Describe the control circuit block diagram for three phase cycloconverter.

**Q.5 Solve any two**

- a)** Explain working of load commutated chopper. Sketch associated waveform.
- b)** Draw a block diagram of microcontroller based speed control of four quadrant AC drive and explain its working.
- c)** With an appropriate circuit diagram discuss working principle of three phase bridge inverter using  $180^\circ$  conduction mode, feeding star connected purely resistive load. Draw associated line and phase voltage waveforms.

## Max. Marks: 70

3) Assume suitable data wherever needed and mention it clearly.

Marks: 14

14

- Page 5 of 16

- 9) Inductor is connected in series with the thyristor to \_\_\_\_\_.  
a) reduce  $dv/dt$  across it                      b) protect against  $di/dt$   
c) protect over voltage                              d) trigger thyristor
- 10) Class D commutation is \_\_\_\_\_.  
a) Auxiliary commutation technique  
b) load commutation technique  
c) current commutation technique  
d) resonant pulse commutation technique
- 11) PIV for single phase full bridge controlled rectifier is \_\_\_\_\_.  
a)  $2V_m$     b)  $V_m$   
c)  $3V_m$     d)  $4V_m$
- 12) Three phase full wave bridge converter with inductive load acts as \_\_\_\_\_.  
a) Single quadrant converter                      b) Two quadrant converter  
c) Three quadrant converter                        d) Four quadrant converter
- 13) In a three-phase full controlled rectifier, if the input frequency is 50 Hz, then output ripple frequency will be \_\_\_\_\_.  
a) 150 Hz    b) 300 Hz  
c) 100 Hz    d) 200 Hz
- 14) In Three phase full controlled bridge rectifier PIV across any thyristor is \_\_\_\_\_.  
a)  $\sqrt{2} V_m$     b)  $\sqrt{3} V_m$   
c)  $V_m$     d)  $\sqrt{3} V_{LL}$

<b>Set</b>	<b>Q</b>
------------	----------

**Fourth Year (B.Tech.) (Sem - I) (New) (CBCS) Examination: Oct/Nov-2022**  
**ELECTRONICS ENGINEERING**  
**Power Electronics**

Day & Date: Wednesday, 25-01-2023  
 Time: 02:00 PM To 05:00 PM

Max. Marks: 56

**Instructions:** 1) All questions are compulsory.  
 2) Figures to the right indicates full marks.

**Section – I**

**Q.2 Solve any four** **16**

- a) Explain the various mechanisms by which thyristors may be turn on.
- b) What is commutation? How commutation takes place in class C complementary commutation technique. Sketch associated waveforms.
- c) Derive an expression for average output dc voltage for single phase full wave controlled bridge rectifier with highly inductive load.
- d) A single phase semiconverter is operated from 120V, 50Hz AC supply. The  $R_L$  is  $10\Omega$ . If the average output voltage is 25% of the maximum possible output voltage. Determine
  - 1) Firing angle
  - 2) Average DC voltage
- e) Derive an expression of average dc output voltage of three phase half wave controlled rectifier with resistive load. Draw associated waveforms.

**Q.3 Solve any two** **12**

- a) Explain following methods of over voltage protections circuits.
  - 1) Snubber circuits for dv/dt suppression
  - 2) Electronic crowbar circuit
- b) Derive an expression for  $V_{dc}$  and  $V_{rms}$  of three phase semiconverter with resistive load for continuous conduction mode. Draw neat waveform for  $\alpha=30^\circ$ .
- c) Design microcontroller based firing scheme for Three phase fully controlled rectifiers.

**Section – II**

**Q.4 Solve any four** **16**

- a) Explain working of step down chopper and derive an expression for output voltage, duty cycle and effective input resistance.
- b) Explain operation of single phase midpoint cycloconverter with resistive load. The frequency is  $f_o/f_s = 1/5$ . Sketch associated waveforms.
- c) Explain operation of single phase full bridge voltage source inverter with inductive load. Draw associate waveforms.
- d) Explain operation of basic series resonant inverter. Draw associated waveforms.
- e) Describe the control circuit block diagram for three phase cycloconverter.

**Q.5 Solve any two**

- a)** Explain working of load commutated chopper. Sketch associated waveform.
- b)** Draw a block diagram of microcontroller based speed control of four quadrant AC drive and explain its working.
- c)** With an appropriate circuit diagram discuss working principle of three phase bridge inverter using  $180^\circ$  conduction mode, feeding star connected purely resistive load. Draw associated line and phase voltage waveforms.

- 9) Three phase full wave bridge converter with inductive load acts as \_\_\_\_\_.  
 a) Single quadrant converter      b) Two quadrant converter  
 c) Three quadrant converter      d) Four quadrant converter
- 10) In a three-phase full controlled rectifier, if the input frequency is 50 Hz, then output ripple frequency will be \_\_\_\_\_.  
 a) 150 Hz      b) 300 Hz  
 c) 100 Hz      d) 200 Hz
- 11) In Three phase full controlled bridge rectifier PIV across any thyristor is \_\_\_\_\_.  
 a)  $\sqrt{2} V_m$       b)  $\sqrt{3} V_m$   
 c)  $V_m$       d)  $\sqrt{3} V_{LL}$
- 12) The average value of the output voltage in a step - down de chopper is given by \_\_\_\_\_.  
 a)  $V_0 = V_s$       b)  $V_0 = K V_s$   
 c)  $V_0 = V_s/K$       d)  $V_0 = V_s/(1 - K)$
- 13) Class A and Class B choppers \_\_\_\_\_.  
 a) Two quadrant converters      b) Three quadrant converters  
 c) Single quadrant converters      d) None
- 14) For step up chopper  $V_s$  is source voltage,  $R_L$  is load resistance and  $K$  is duty cycle average output voltage of this chopper is \_\_\_\_\_.  
 a)  $K \times V_s$       b)  $(1 - K)/V_s$   
 c)  $V_s/K$       d)  $V_s/(1 - K)$

 3) Figures to the right indicate full marks.

**MCQ/Objective Type Questions**

Duration: 30 Minutes

Marks: 14

**Q.1 Choose the correct alternatives from the options.**

**14**

- 1) What is the condition for linear region?
 

a) $V_{gs}$ lesser than $V_t$	b) $V_{gs}$ greater than $V_t$
c) $V_{ds}$ lesser than $V_{gs}$	d) $V_{ds}$ greater than $V_{gs}$
- 2) As source drain voltage increases, channel depth \_\_\_\_\_.
 

a) Increases	b) decreases
c) logarithmically increases	d) exponentially increases
- 3) Gate area can be given as \_\_\_\_\_.
 

a) $L/W$	b) $L * W$
c) $2L/W$	d) $L/2W$
- 4) The overall delay is \_\_\_\_\_ to the relative resistance  $r$ .
 

a) Directly Proportional	b) Inversely Proportional
c) Exponentially proportional	d) Not dependent
- 5) Increase in switching speed \_\_\_\_\_ the noise problems.
 

a) increases	b) decreases
c) remains same	d) none of these
- 6) To design 3 input NOR Gate using CMOS Logic \_\_\_\_\_ number of Transistors are required if input signal is available in double rail format.
 

a) 4	b) 6
c) 8	d) 10
- 7) To design 3 input NAND Gate using Ratioed Logic \_\_\_\_\_ number of Transistors are required if inputs are available in double rail format.
 

a) 4	b) 5
c) 6	d) 8
- 8) A stored value remains valid as long as supply voltage is applied to the circuit is known as \_\_\_\_\_ storage device.
 

a) Dynamic	b) Bistable
c) Static	d) None of these

- 9) The \_\_\_\_\_ circuit store a charge on parasitic capacitor for temporary basis and it requires a periodic refresh of its stored value.
- a) Dynamic
  - b) Bistable
  - c) Static
  - d) None of these
- 10) The amount of time the input signal should be stable before the clock edge occurs is called as \_\_\_\_\_.
- a) Dynamic time
  - b) static time
  - c) Hold Time
  - d) Setup time
- 11) A \_\_\_\_\_ signal is one that has the same frequency but an unknown phase offset with respect to the local clock.
- a) Synchronous
  - b) Mesochronous
  - c) plesiochronous
  - d) Asynchronous
- 12) The spatial variation in arrival time of a clock transition on an integrated circuit is commonly referred to as \_\_\_\_\_.
- a) Clock Skew
  - b) Clock Jitter
  - c) Handshaking
  - d) Normalization
- 13) For synchronous circuits to solve the clock related to problem \_\_\_\_\_ is/are the solutions.
- a) Clock Distribution
  - b) Use synchronizers and Arbiters
  - c) Use PLL
  - d) All of these
- 14) With 4 bit select lines \_\_\_\_\_ operations can be performed by ALU.
- a) 10
  - b) 12
  - c) 16
  - d) 18

 2) Figures to the right indicates full marks.  
 3) Assume suitable data if necessary.  
 4) Draw neat diagrams.

**Section – I**

**Q.2 Answer any four.**

**16**

- With the help of diagram discuss construction and working of n-MOS also calculate value of  $\beta$  for given parameters of n-MOS transistor designed using Si as  $W/L$  ratio is 3.5, oxide layer thickness is 1.15 nm, the electron mobility is 85 sq. cm/V sec. The threshold voltage is 0.3V. The Si specific permittivity is 3.5 and permittivity of free space is  $8.85 \times 10^{-14}$  F/cm.
- What do you mean by technology scaling and how it is achieved in MOS transistor design?
- Draw and Explain CMOS inverter in detail and discuss transfer characteristics.
- How Dynamic Logic is used in CMOS Design explain using example.
- What is pass transistor? How it is used in designing CMOS Logic Gate using Example explain?

**Q.3 Solve any two.**

**12**

- Briefly explain in detail accumulation, depletion and inversion modes in MOS transistors.
- Calculate total power dissipation in CMOS inverter for frequency 10 MHz with Static power dissipation of  $15\mu\text{W}$ ,  $V_{DD} = 3.3$  V and  $C = 30$  fF.
- Design 2 input XOR gate using CMOS Logic and comment on number of transistors required to implement it.

**Section – II**

**Q.4 Attempt any four**

**16**

- What is bi-stability Principle? How it is used to design Latch explain using example.
- What is multiplexer-based latch? Explain the use of multiplexer-based latch to implement D Latch.
- With the help of diagram explain use of PLL for clock synchronization.
- What is clock skew and clock jitter? What are the reasons of clock skew and jitter?
- With the help of circuits explain ALU in detail.

**Q.5 Attempt any two.**

- a)** Explain operating principle of True single-phase clocked register (TSPCR) with help of diagram.
- b)** Explain timing classification in interconnect design.
- c)** With the help of Diagram explain Static RAM implementation.

  - c)  $2L/W$
  - d)  $L/2W$
- 8) The overall delay is \_\_\_\_\_ to the relative resistance  $r$ .
  - a) Directly Proportional
  - b) Inversely Proportional
  - c) Exponentially proportional
  - d) Not dependent

- 9) Increase in switching speed \_\_\_\_\_ the noise problems.  
a) increases                      b) decreases  
c) remains same                d) none of these
- 10) To design 3 input NOR Gate using CMOS Logic \_\_\_\_\_ number of Transistors are required if input signal is available in double rail format.  
a) 4                                  b) 6  
c) 8                                  d) 10
- 11) To design 3 input NAND Gate using Ratioed Logic \_\_\_\_\_ number of Transistors are required if inputs are available in double rail format.  
a) 4                                  b) 5  
c) 6                                  d) 8
- 12) A stored value remains valid as long as supply voltage is applied to the circuit is known as \_\_\_\_\_ storage device.  
a) Dynamic                      b) Bistable  
c) Static                          d) None of these
- 13) The \_\_\_\_\_ circuit store a charge on parasitic capacitor for temporary basis and it requires a periodic refresh of its stored value.  
a) Dynamic                      b) Bistable  
c) Static                          d) None of these
- 14) The amount of time the input signal should be stable before the clock edge occurs is called as \_\_\_\_\_.  
a) Dynamic time                b) static time  
c) Hold Time                     d) Setup time

**Fourth. Y. (B.Tech.) (Sem- I) (New) (CBCS) Examination: Oct/Nov-2022**  
**ELECTRONICS ENGINEERING**  
**CMOS VLSI Design**

Day & Date: Tuesday, 31-01-2023  
 Time: 02:00 PM To 05:00 PM

Max. Marks: 56

- Instructions:** 1) Both Section are compulsory.  
 2) Figures to the right indicates full marks.  
 3) Assume suitable data if necessary.  
 4) Draw neat diagrams.

**Section – I**

**Q.2 Answer any four.**

**16**

- With the help of diagram discuss construction and working of n-MOS also calculate value of  $\beta$  for given parameters of n-MOS transistor designed using Si as  $W/L$  ratio is 3.5, oxide layer thickness is 1.15 nm, the electron mobility is 85 sq. cm/V sec. The threshold voltage is 0.3V. The Si specific permittivity is 3.5 and permittivity of free space is  $8.85 \times 10^{-14}$  F/cm.
- What do you mean by technology scaling and how it is achieved in MOS transistor design?
- Draw and Explain CMOS inverter in detail and discuss transfer characteristics.
- How Dynamic Logic is used in CMOS Design explain using example.
- What is pass transistor? How it is used in designing CMOS Logic Gate using Example explain?

**Q.3 Solve any two.**

**12**

- Briefly explain in detail accumulation, depletion and inversion modes in MOS transistors.
- Calculate total power dissipation in CMOS inverter for frequency 10 MHz with Static power dissipation of  $15\mu\text{W}$ ,  $V_{DD} = 3.3$  V and  $C = 30$  fF.
- Design 2 input XOR gate using CMOS Logic and comment on number of transistors required to implement it.

**Section – II**

**Q.4 Attempt any four**

**16**

- What is bi-stability Principle? How it is used to design Latch explain using example.
- What is multiplexer-based latch? Explain the use of multiplexer-based latch to implement D Latch.
- With the help of diagram explain use of PLL for clock synchronization.
- What is clock skew and clock jitter? What are the reasons of clock skew and jitter?
- With the help of circuits explain ALU in detail.

**Q.5 Attempt any two.**

- a)** Explain operating principle of True single-phase clocked register (TSPCR) with help of diagram.
- b)** Explain timing classification in interconnect design.
- c)** With the help of Diagram explain Static RAM implementation.

<b>Seat No.</b>	
-----------------	--

Set	S
-----	---

- 8) For synchronous circuits to solve the clock related to problem \_\_\_\_\_ is/are the solutions.
- a) Clock Distribution
  - b) Use synchronizers and Arbiters
  - c) Use PLL
  - d) All of these
- 9) With 4 bit select lines \_\_\_\_\_ operations can be performed by ALU.
- a) 10
  - b) 12
  - c) 16
  - d) 18
- 10) What is the condition for linear region?
- a)  $V_{gs}$  lesser than  $V_t$
  - b)  $V_{gs}$  greater than  $V_t$
  - c)  $V_{ds}$  lesser than  $V_{gs}$
  - d)  $V_{ds}$  greater than  $V_{gs}$
- 11) As source drain voltage increases, channel depth \_\_\_\_\_.
- a) Increases
  - b) decreases
  - c) logarithmically increases
  - d) exponentially increases
- 12) Gate area can be given as \_\_\_\_\_.
- a)  $L/W$
  - b)  $L * W$
  - c)  $2L/W$
  - d)  $L/2W$
- 13) The overall delay is \_\_\_\_\_ to the relative resistance  $r$ .
- a) Directly Proportional
  - b) Inversely Proportional
  - c) Exponentially proportional
  - d) Not dependent
- 14) Increase in switching speed \_\_\_\_\_ the noise problems.
- a) increases
  - b) decreases
  - c) remains same
  - d) none of these

 Time: 02:00 PM To 05:00 PM

Max. Marks: 70

- Instructions:** 1) Q. No. 1 is compulsory and should be solved in first 30 minutes in Answer Book. Page No.3 (starting page of the Answer Book). Each question carry one mark.  
 2) Don't forget to mention Question Paper Set (P/Q/R/S) at the top of the same page.  
 3) Figures to the right indicates full marks.  
 4) Assume suitable data if necessary.

**MCQ/Objective Type Questions**

Duration: 30 Minutes

Marks: 14

**Q.1 Choose the correct alternatives from the options.**

**14**

- 1) Which of these is not true for TDD?
  - a) TDD uses different time slots for transmission and reception paths
  - b) Single radio frequency can be used
  - c) Duplexer is required
  - d) It increases the battery life of mobile phones
- 2) The connectivity from exchange to customer premises termed as \_\_\_\_\_.
  - a) Data network
  - b) Access Network or Local Loop
  - c) Bridge network
  - d) None of the above
- 3) The process of channel coding, Encryption, Multiplexing and modulation for Trans direction and reverse for reception are to be carried out by \_\_\_\_\_.
  - a) BTS
  - b) BSC
  - c) MSC
  - d) MS
- 4) The CDMA system has a soft capacity limit. That is increasing the number of users will \_\_\_\_\_ the system performance.
  - a) increases
  - b) decreases
  - c) stabilize
  - d) None of the above
- 5) CDMA base stations consumes \_\_\_\_\_ power than GSM and also covers a \_\_\_\_\_ distance.
  - a) more, large
  - b) less, large
  - c) less, less
  - d) None of the above
- 6) The cell size in CDMA is \_\_\_\_\_ compared to GSM.
  - a) larger
  - b) smaller
  - c) same
  - d) None of the above
- 7) Which of this is the interface between MS & BSS?

**Fourth Year (B.Tech.) (Sem-I) (New) (CBCS) Examination: Oct/Nov-2022**  
**ELECTRONICS ENGINEERING**  
**Internet of Things**

Day & Date: Tuesday, 07-02-2023  
Time: 02:00 PM To 05:00 PM

Max. Marks: 56

**Instructions:** 1) All questions are compulsory.  
2) Figures to the right indicate full marks.

**Section – I**

**Q.2 Solve any four of the following.** **16**

- a) List down all GPIO registers of LPC1768. Discuss IOSET register in details with examples.
- b) Draw a use case diagram for creating authentication code using SHA1 algorithm.
- c) List down and discuss the flags available in ARM Processors.
- d) Discuss the link register in details with neat diagrams.
- e) With a neat diagram illustrate the IoT reference architecture suggested by Oracle.

**Q.3 Solve any two of the following.** **12**

- a) Interface four LEDs to LPC1768 port pins P0.18-P0.21. Write an embedded c program to blink LEDs simultaneously.
- b) What do you mean by coarse-grain and fine-grain authorizations?
- c) What is significance of exceptions and interrupt in embedded application development and also explain the role of interrupt vector address and interrupt service routine.

**Section – II**

**Q.4 Solve any four of the following.** **16**

- a) Write a short note on Zigbee mesh routing.
- b) With a neat state diagram discuss Classic Bluetooth connection process.
- c) Write short note on RFID tags and RFID frequency bands.
- d) Write short note on Message Oriented Middleware (MOM) protocols.
- e) What is a Cloud? Discuss PaaS services supported in Cloud.

**Q.5 Solve any two of the following.** **12**

- a) List down different messages used in CoAP and elaborate with neat diagram a CoAP message format.
- b) With a neat state diagram discuss Bluetooth Low Energy mode connection process.
- c) Discuss the working principal of near-field RFID tags with neat diagrams.

**Fourth Year (B.Tech.) (Sem-I) (New) (CBCS) Examination: Oct/Nov-2022**  
**ELECTRONICS ENGINEERING**  
**Internet of Things**

Day & Date: Tuesday, 07-02-2023  
 Time: 02:00 PM To 05:00 PM

Max. Marks: 70

- Instructions:** 1) Q. No. 1 is compulsory. It should be solved in the first 30 minutes in answer book. Page no 03 (Starting page of the Answer Book). Each question carries one mark.  
 2) Don't forget to Mention question paper set (P/Q/R/S) on top of page.  
 3) Figures to the right indicates full marks  
 4) Assume suitable data wherever needed and mention it clearly.

**MCQ/Objective Type Questions**

Duration: 30 Minutes

Marks: 14

**Q.1 Choose the correct alternatives from the options.**

**14**

- 1) \_\_\_\_\_ supports a long-range communication.
  - a) ZigBee
  - b) GPRS
  - c) Bluetooth
  - d) All of the above
- 2) \_\_\_\_\_ controls the publish-subscribe messaging pattern in MQTT.
  - a) MQTT broker
  - b) MQTT client
  - c) MQTT server
  - d) None of these
- 3) The MQTT publish-subscribe protocol is \_\_\_\_\_ driven.
  - a) Event
  - b) Broker
  - c) Client
  - d) All of these
- 4) Things in IoT support \_\_\_\_\_.
  - a) Actuation
  - b) Sensing
  - c) Data Collection
  - d) All of above
- 5) CoAP is an implementation of \_\_\_\_\_ model.
  - a) Message Oriented Middleware
  - b) RESTful
  - c) Both a and b
  - d) None of the above
- 6) \_\_\_\_\_ can be considered as the skeleton for smart cities?
  - a) Banks
  - b) Transportation
  - c) Buildings
  - d) Sensors
- 7) Sensor-Cloud deals with \_\_\_\_\_.
  - a) Sensor-as-a-Service
  - b) Sensor-in-Cloud
  - c) Sensor-for-Service
  - d) None of these
- 8) After the execution of following ARM instruction the content of R2 register will be \_\_\_\_\_ RSB R2, R2, R2, LSL #3.
  - a)  $R3 * 7$
  - b)  $R2 * 7$
  - c)  $R3 * 8$
  - d)  $R2 * 8$
- 9) In ARM Cortex M3 processor Nested Vectored Interrupt Controller (NVIC) supports \_\_\_\_\_.
  - a) Nested interrupt
  - b) Vectored interrupt
  - c) Dynamic priority
  - d) All of above

- 10)** ARM Cortex-M3 processor supports \_\_\_\_\_ interfaces.
- |                           |                 |
|---------------------------|-----------------|
| a) Code memory buses      | b) System bus   |
| c) Private peripheral bus | d) All of above |
- 11)** What is the value of R1 after MVN R1, #7 is executed?
- |               |                |
|---------------|----------------|
| a) 0x00000007 | b) 0xFFFFFFFF8 |
| c) 0xFFFFFFE  | d) 0xFFFFF8    |
- 12)** Let R0=0x00000000 and R1=0x00000055. What will be the content of R0 after execution of instruction "ADD R0, R1, R1, LSL #1"?
- |               |               |
|---------------|---------------|
| a) 0x00000000 | b) 0x00000005 |
| c) 0x000000FF | d) 0x0000000A |
- 13)** The \_\_\_\_\_ flag is set when a comparison of two data returns an equal result.
- |             |             |
|-------------|-------------|
| a) Zero     | b) Overflow |
| c) Negative | d) Carry    |
- 14)** LPC1768's maximum operating frequency is \_\_\_\_\_ MHz.
- |        |        |
|--------|--------|
| a) 100 | b) 110 |
| c) 12  | d) 60  |

 2) Don't forget to Mention question paper set (P/Q/R/S) on top of page.  
 3) Figures to the right indicates full marks.

**MCQ/Objective Type Questions**

Duration: 30 Minutes

Marks:14

**Q.1 Choose the correct alternatives from the given options.**

**14**

- 1) Which type of data can be stored in the database?
  - a) Image oriented data
  - b) Text, files containing data
  - c) Data in the form of audio or video
  - d) All of the above
- 2) Which of the following is not a function of the database?
  - a) Managing stored data
  - b) Manipulating data
  - c) Security for stored data
  - d) Analysing code
- 3) Identify the correct statement(s)
  - a) A candidate Key is a set of one or more attributes that, taken collectively allows us to identify any entity in the entity set
  - b) A Super Key is a set of one or more attributes that, taken collectively allows us to identify any entity in the entity set
  - c) A Super Key for which no proper subset is also a Superkey is called a Candidate Key
  - d) All of the above
- 4) Consider the two relation below. The primary keys are underlined Identify all possible foreign key(s) from the options  
 Customer (CustomerId, customer\_name, OrderId)  
 Orders (OrderId, Ordername, customer\_name)
  - a) CustomerId, OrderId
  - b) OrderId, customer\_name
  - c) OrderId
  - d) customer\_name
- 5) Identify the correct "Create Table" Statement for table given below:

Emp_id	Last_name	First_name	Age
1	Rai	Sanjiv	24
2	Singh	Sanjiv	24
3	Roy	Raman	23
4	Roy	Raman	21

- a) Create table employee(  
Emp\_id int,  
Last\_name varchar(55) not null,  
First\_name varchar(55),  
Age int,  
Primary key(ID))
  - b) Create table employee(  
Emp\_id int not null,  
Last\_name varchar(55) not null,  
First\_name varchar(55),  
Age int,  
Primary key(ID, Last\_name))
  - c) Create table employee(  
Emp\_id int,  
Last\_name varchar(55) not null,  
First\_name varchar(55),  
Age int,  
Primary key(ID, Last\_name))
  - d) Create table employee(  
Emp\_id int,  
Last\_name varchar(55) not null,  
First\_name varchar(55),  
Age int,  
Primary key(Last\_name))
- 6) Which of the following is not a valid aggregate function?
- a) COUNT
  - b) COMPUTE
  - c) SUM
  - d) MAX
- 7) Which operator is used to compare a value to a specified list of values?
- a) ANY
  - b) BETWEEN
  - c) ALL
  - d) IN
- 8) In addition to removing undesirable characteristics, normalization also eliminates \_\_\_\_\_ anomalies.
- a) Insert
  - b) Update
  - c) Delete
  - d) All of the above
- 9) Non-prime attributes cannot be transitively dependent, so the relation must have the \_\_\_\_\_ normal form.
- a) First
  - b) Second
  - c) Third
  - d) Fourth
- 10) A hashing function is used to generate the \_\_\_\_\_ of the data blocks in this technique.
- a) Data
  - b) Addresses
  - c) Numbers
  - d) Records
- 11) The nonleaf nodes of the B+- tree structure form a
- a) Multilevel clustered indices
  - b) Sparse indices
  - c) Multilevel dense indices
  - d) Multilevel sparse indices
- 12) What is the Dirty Read Problem also known as?
- a) W-W Conflict
  - b) W-R Conflict
  - c) R-R Conflict
  - d) None

- 13) Identify the correct statement(s) about the compatibility matrix given below

	S	X
S	True	False
X	False	False

- a) If a transaction holds an S lock on them, other transactions will be allowed to obtain X lock on the same
  - b) If a transaction holds an S lock on them, other transaction will not be allowed to obtain a S lock on the same then
  - c) If a transaction holds X lock on them, other transaction will be allowed to hold X or S lock on them
  - d) If a transaction holds an S lock on them, other transactions will allow to hold only S lock
- 14) A transaction that is inserting a new tuple into the database is given an
- a) Shared lock
  - b) Mutual lock
  - c) Exclusive lock
  - d) NO lock

**Fourth Year (B. Tech) (Sem-I) (New) (CBCS) Examination: Oct/Nov-2022**  
**ELECTRONICS ENGINEERING**  
**Database Management System**

Day & Date: Thursday, 09-02-2023  
 Time: 02:00 PM To 5:00 PM

Max. Marks: 56

**Instructions:** 1) All questions are compulsory.  
 2) Figures to the right indicate full marks.

**Section – I**

**Q.2 Answer the following (Any Three) 12**

- What are drawbacks of using File Processing System?
- Explain different aggregation functions with example.
- Explain concept of cardinality with example
- Define
  - Entity&Entity Sets
  - Attributes, Types of Attributes - Composite, Derived, Stored, Multivalued
- What are different DDL Statements? Create and insert commands with syntax and suitable examples

**Q.3 Answer the following (Any One) 08**

- Draw an ER diagram for a university database  
 Drawing of ER model of university database application considering the constraints -
  - Each department has multiple instructors
  - Each department is headed by one instructor as HOD
  - Each department offers multiple courses, each course is taught by a single instructor.
  - A student may enroll for many courses.
  - Department - the relevant attributes are department Name and location.
  - Course - The relevant attributes are courseNo, course Name, Duration, and prerequisite.
  - Instructor - The relevant attributes are Instructor Name, Room No, and telephone number.
  - Student - The relevant attributes are Student No, Student Name, and date of birth.

- Consider following tables and write the given query in SQL

*EmployeeInfo Table:*

EmpID	EmpFname	EmpLname	Department	Project	Address	DOB	Gender
1	Sanjay	Mehra	HR	P1	Hyderabad(HYD)	01-12-1976	M
2	Ananya	Mishra	Admin	P2	Delhi(DEL)	02-05-1968	F
3	Rohan	Diwan	Account	P3	Mumbai (BOM)	01-01-1980	M
4	Sonia	Kulkarni	HR	P1	Hyderabad(HYD)	02-05-1992	F
5	Ankit	Kapoor	Admin	P2	Delhi(DEL)	03-07-1994	M

*EmployeePosition Table:*

<b>EmpID</b>	<b>Emp Position</b>	<b>Data of Joining</b>	<b>Salary</b>
1	Manager	01-05-2022	500000
2	Executive	02-05-2022	75000
3	Manager	01-05-2022	90000
2	Lead	02-05-2022	85000
1	Executive	01-05-2022	300000

- Write a query to fetch the number of employees working in the department 'HR'.
- Write a query to find the names of employees that begin with 'S'.
- Write a query to fetch details of all employees excluding the employees with first names, "Sanjay" and "Sonia" from the EmployeeInfo table.
- Write a query find number of employees whose DOB is between 02/05/1970 to 31/12/1975 and are grouped according to gender

**Q.4** Explain the following joins with examples in SQL along with syntaxes

**08**

- Inner Join
- Right Join
- Left Join
- Full Outer Join

## Section – II

**Q.5 Solve (Any Three)**

**12**

- What is view serializable schedule? Check whether the following schedule is view serializable? If yes, Find the Correct Serial Schedule

T1	T2	T3
read(X)		
read(Y)		
write(X)		
	read(Y)	
		write(Y)
write(X)		
	read(Y)	

**S1**

- Define Normalization. Explain 1NF and 2NF with suitable examples
- Explain the terms: i) Transaction ii) ACID Property
- Explain B+ tree with examples and how insertion works
- Define Indexing. Explain primary Index, Secondary Index and Clustering Index.

**Q.6 Solve (Any One)**

**08**

- Explain Hashing in database with suitable example.
- Convert the below Schedule into Serial Schedule using Conflict Serializable Method

T1	T2	T3
read(X)		
	read(Y)	
		read(Y)
	write(Y)	
write(X)		
		write(X)
	Read(X)	
	write(X)	

**Q.7** Explain Time Stamp Protocol with suitable example

Set Q
-------

**Fourth Year (B. Tech) (Sem-I) (New) (CBCS) Examination: Oct/Nov-2022**  
**ELECTRONICS ENGINEERING**  
**Database Management System**

Day & Date: Thursday, 09-02-2023  
 Time: 02:00 PM To 5:00 PM

Max. Marks: 70

- Instructions:** 1) Q. No. 1 is compulsory. It should be solved in the first 30 minutes in answer book. Page no 03 (Starting page of the Answer Book). Each question carries one mark.  
 2) Don't forget to Mention question paper set (P/Q/R/S) on top of page.  
 3) Figures to the right indicates full marks.

**MCQ/Objective Type Questions**

Duration: 30 Minutes

Marks:14

**Q.1 Choose the correct alternatives from the given options.**

**14**

- 1) In addition to removing undesirable characteristics, normalization also eliminates \_\_\_\_\_ anomalies.
  - a) Insert
  - b) Update
  - c) Delete
  - d) All of the above
- 2) Non-prime attributes cannot be transitively dependent, so the relation must have the \_\_\_\_\_ normal form.
  - a) First
  - b) Second
  - c) Third
  - d) Fourth
- 3) A hashing function is used to generate the \_\_\_\_\_ of the data blocks in this technique.
  - a) Data
  - b) Addresses
  - c) Numbers
  - d) Records
- 4) The nonleaf nodes of the B+- tree structure form a
  - a) Multilevel clustered indices
  - b) Sparse indices
  - c) Multilevel dense indices
  - d) Multilevel sparse indices
- 5) What is the Dirty Read Problem also known as?
  - a) W-W Conflict
  - b) W-R Conflict
  - c) R-R Conflict
  - d) None
- 6) Identify the correct statement(s) about the compatibility matrix given below

	S	X
S	True	False
X	False	False

- a) If a transaction holds an S lock on them, other transactions will be allowed to obtain X lock on the same
- b) If a transaction holds an S lock on them, other transaction will not be allowed to obtain a S lock on the same then
- c) If a transaction holds X lock on them, other transaction will be allowed to hold X or S lock on them

- d) If a transaction holds an S lock on them, other transactions will allow to hold only S lock
- 7) A transaction that is inserting a new tuple into the database is given an
- Shared lock
  - Mutual lock
  - Exclusive lock
  - NO lock
- 8) Which type of data can be stored in the database?
- Image oriented data
  - Text, files containing data
  - Data in the form of audio or video
  - All of the above
- 9) Which of the following is not a function of the database?
- Managing stored data
  - Manipulating data
  - Security for stored data
  - Analysing code
- 10) Identify the correct statement(s)
- A candidate Key is a set of one or more attributes that, taken collectively allows us to identify any entity in the entity set
  - A Super Key is a set of one or more attributes that, taken collectively allows us to identify any entity in the entity set
  - A Super Key for which no proper subset is also a Superkey is called a Candidate Key
  - All of the above
- 11) Consider the two relation below. The primary keys are underlined Identify all possible foreign key(s) from the options  
 Customer (CustomerId, customer\_name, OrderId)  
 Orders (OrderId, Ordername, customer\_name)
- CustomerId, OrderId
  - OrderId, customer\_name
  - OrderId
  - customer\_name
- 12) Identify the correct "Create Table" Statement for table given below:

Emp_id	Last_name	First_name	Age
1	Rai	Sanjiv	24
2	Singh	Sanjiv	24
3	Roy	Raman	23
4	Roy	Raman	21

- Create table employee(  
 Emp\_id int,  
 Last\_name varchar(55) not null,  
 First\_name varchar(55),  
 Age int,  
 Primary key(ID))
- Create table employee(  
 Emp\_id int not null,  
 Last\_name varchar(55) not null,  
 First\_name varchar(55),  
 Age int,  
 Primary key(ID, Last\_name))

- c) Create table employee(  
Emp\_id int,  
Last\_name varchar(55) not null,  
First\_name varchar(55),  
Age int,  
Primary key(ID, Last\_name))
  - d) Create table employee(  
Emp\_id int,  
Last\_name varchar(55) not null,  
First\_name varchar(55),  
Age int,  
Primary key(Last\_name))
- 13)** Which of the following is not a valid aggregate function?
- a) COUNT
  - b) COMPUTE
  - c) SUM
  - d) MAX
- 14)** Which operator is used to compare a value to a specified list of values?
- a) ANY
  - b) BETWEEN
  - c) ALL
  - d) IN

Set **Q**

**Fourth Year (B. Tech) (Sem-I) (New) (CBCS) Examination: Oct/Nov-2022**  
**ELECTRONICS ENGINEERING**  
**Database Management System**

Day & Date: Thursday, 09-02-2023  
 Time: 02:00 PM To 5:00 PM

Max. Marks: 56

**Instructions:** 1) All questions are compulsory.  
 2) Figures to the right indicate full marks.

**Section – I**

**Q.2 Answer the following (Any Three) 12**

- What are drawbacks of using File Processing System?
- Explain different aggregation functions with example.
- Explain concept of cardinality with example
- Define
  - Entity&Entity Sets
  - Attributes, Types of Attributes - Composite, Derived, Stored, Multivalued
- What are different DDL Statements? Create and insert commands with syntax and suitable examples

**Q.3 Answer the following (Any One) 08**

- Draw an ER diagram for a university database  
 Drawing of ER model of university database application considering the constraints -
  - Each department has multiple instructors
  - Each department is headed by one instructor as HOD
  - Each department offers multiple courses, each course is taught by a single instructor.
  - A student may enroll for many courses.
  - Department - the relevant attributes are department Name and location.
  - Course - The relevant attributes are courseNo, course Name, Duration, and prerequisite.
  - Instructor - The relevant attributes are Instructor Name, Room No, and telephone number.
  - Student - The relevant attributes are Student No, Student Name, and date of birth.

- Consider following tables and write the given query in SQL

*EmployeeInfo Table:*

EmpID	EmpFname	EmpLname	Department	Project	Address	DOB	Gender
1	Sanjay	Mehra	HR	P1	Hyderabad(HYD)	01-12-1976	M
2	Ananya	Mishra	Admin	P2	Delhi(DEL)	02-05-1968	F
3	Rohan	Diwan	Account	P3	Mumbai (BOM)	01-01-1980	M
4	Sonia	Kulkarni	HR	P1	Hyderabad(HYD)	02-05-1992	F
5	Ankit	Kapoor	Admin	P2	Delhi(DEL)	03-07-1994	M

*EmployeePosition Table:*

<b>EmpID</b>	<b>Emp Position</b>	<b>Data of Joining</b>	<b>Salary</b>
1	Manager	01-05-2022	500000
2	Executive	02-05-2022	75000
3	Manager	01-05-2022	90000
2	Lead	02-05-2022	85000
1	Executive	01-05-2022	300000

- Write a query to fetch the number of employees working in the department 'HR'.
- Write a query to find the names of employees that begin with 'S'.
- Write a query to fetch details of all employees excluding the employees with first names, "Sanjay" and "Sonia" from the EmployeeInfo table.
- Write a query find number of employees whose DOB is between 02/05/1970 to 31/12/1975 and are grouped according to gender

**Q.4** Explain the following joins with examples in SQL along with syntaxes

**08**

- Inner Join
- Right Join
- Left Join
- Full Outer Join

## Section – II

**Q.5 Solve (Any Three)**

**12**

- What is view serializable schedule? Check whether the following schedule is view serializable? If yes, Find the Correct Serial Schedule

T1	T2	T3
read(X)		
read(Y)		
write(X)		
	read(Y)	
		write(Y)
write(X)		
	read(Y)	

**S1**

- Define Normalization. Explain 1NF and 2NF with suitable examples
- Explain the terms: i) Transaction ii) ACID Property
- Explain B+ tree with examples and how insertion works
- Define Indexing. Explain primary Index, Secondary Index and Clustering Index.

**Q.6 Solve (Any One)**

**08**

- Explain Hashing in database with suitable example.
- Convert the below Schedule into Serial Schedule using Conflict Serializable Method

T1	T2	T3
read(X)		
	read(Y)	
		read(Y)
	write(Y)	
write(X)		
		write(X)
	Read(X)	
	write(X)

- 8) Which of the following is not a part of TTC?
- a) Tele-command transmitter
  - b) Delta processor
  - c) Delay line
  - d) All of these
- 9) Which of the following has largest traffic capacity?
- a) Communication sub-system
  - b) Power Sub-system
  - c) Altitude and orbit control sub-system
  - d) None
- 10) \_\_\_\_\_ angles determine where to point an earth station so that it intercepts the satellite.
- a) elevation, Azimuth
  - b) inclination, Azimuth
  - c) both
  - d) none
- 11) Which of the following factor is taken into account for satellite link design?
- a) Absorption of signal
  - b) Various noise sources present
  - c) Gain of transmitter and receiving antenna at both end
  - d) All of the above
- 12) Satellite multiple access techniques are \_\_\_\_\_.
- a) Frequency
  - b) Time
  - c) Space
  - d) All of the above
- 13) The angle b/w incident ray & normal to the plane is \_\_\_\_\_.
- a) Angle of reflection
  - b) Angle of Incident
  - c) Angle of coefficient
  - d) None of these
- 14) In second generation, wavelength of multimode fiber is \_\_\_\_\_.
- a) 1310 nm
  - b) 850 nm
  - c) 1420 nm
  - d) 1550 nm

**Fourth. Y. (B.Tech) (Sem - II) (New) (CBCS) Examination: Oct/Nov-2022**  
**ELECTRONICS ENGINEERING**  
**Advanced Communication Engineering**

Day & Date: Tuesday, 14-02-2023  
Time: 02:00 PM To 05:00 PM

Max. Marks: 56

- Instructions:** 1) All questions are compulsory.  
2) Figures to the right indicate full marks  
3) Assume suitable data wherever needed and mention it clearly.

**Section – I**

**Q.2 Attempt any two of the following question. 12**

- a) Explain construction and working of two cavity Klystron. State its performance parameters.
- b) Draw block diagram of Pulse radar system and explain its working principle.
- c) Explain construction and working two-hole directional coupler. Derive its S-matrix.

**Q.3 Attempt any four of the following question. 16**

- a) With suitable Diagram explain working of Circulator.
- b) Explain radar system. State its advantages and disadvantages.
- c) Write a note on Phased array Radar.
- d) Explain construction and working of TRAPATT diode.
- e) Explain factors affecting range of radar.

**Section – II**

**Q.4 Attempt any two of the following question. 12**

- a) With suitable block diagrams explain Attitude and orbital control system.
- b) Explain construction and working of LASER diode.
- c) Explain working of GPS system.

**Q.5 Attempt any four of the following question. 16**

- a) Draw the block diagram of optical fiber communication.
- b) State range and application of LEO, MEO and GEO satellites.
- c) Explain basic antenna types used for satellite.
- d) Write a note on multiple accesses in satellite.
- e) Explain different losses in optical fiber.

**Q.1 Choose the correct alternatives from the options.**

**14**

- 1) Which of the following is not a part of TTC?
  - a) Tele-command transmitter      b) Delta processor
  - c) Delay line      d) All of these
- 2) Which of the following has largest traffic capacity?
  - a) Communication sub-system
  - b) Power Sub-system
  - c) Altitude and orbit control sub-system
  - d) None
- 3) \_\_\_\_\_ angles determine where to point an earth station so that it intercepts the satellite.
  - a) elevation, Azimuth      b) inclination, Azimuth
  - c) both      d) none
- 4) Which of the following factor is taken into account for satellite link design?
  - a) Absorption of signal
  - b) Various noise sources present
  - c) Gain of transmitter and receiving antenna at both end
  - d) All of the above
- 5) Satellite multiple access techniques are \_\_\_\_\_.
  - a) Frequency      b) Time
  - c) Space      d) All of the above
- 6) The angle b/w incident ray & normal to the plane is \_\_\_\_\_.
  - a) Angle of reflection      b) Angle of Incident
  - c) Angle of coefficient      d) None of these
- 7) In second generation, wavelength of multimode fiber is \_\_\_\_\_.
  - a) 1310 nm      b) 850 nm
  - c) 1420 nm      d) 1550 nm

- 8) If  $P_i$  is incident power  $P_f$  is forward power  $P_b$  is back power then coupling factor (c) is given by \_\_\_\_\_.  
a)  $c=10\log_{10}P_i/P_f$                       b)  $c=20\log_{10}P_i/P_f$   
c)  $c=10\log_{10}P_f/P_i$                       d)  $c=10\log_{10}P_i/P_b$
- 9) A Duplexer is used to \_\_\_\_\_.  
a) couple two antennas to a transmitter without interference  
b) isolate the antenna from the local oscillator  
c) prevent interference between two antennas connected to a receiver  
d) use an antenna for reception or transmission without interference
- 10) The drift space converts \_\_\_\_\_ modulation into \_\_\_\_\_ modulation.  
a) Low level, High level                      b) Current, Velocity  
c) Velocity, Current                      d) High level, Low level
- 11) A microwave junction is supposed to be matched at all ports if in the S matrix \_\_\_\_\_.  
a) all the diagonal elements are zero  
b) all the diagonal elements are equal but not zero  
c) all the diagonal elements are complex  
d) is Hermitian
- 12) MESFETS are \_\_\_\_\_.  
a) Bipolar microwave transistor                      b) Tripolar microwave transistor  
c) Unipolar microwave transistor                      d) None
- 13) Drawback of continuous wave radar is \_\_\_\_\_.  
a) They cannot measure temperature  
b) They cannot measure range  
c) They cannot measure speed  
d) They cannot measure phase
- 14) The type of radar that is used to eliminate clutter in navigational application is \_\_\_\_\_.  
a) pulse radar                      b) tracking radar  
c) MTI radar                      d) monopulse radar

**Fourth. Y. (B.Tech) (Sem - II) (New) (CBCS) Examination: Oct/Nov-2022**  
**ELECTRONICS ENGINEERING**  
**Advanced Communication Engineering**

Day & Date: Tuesday, 14-02-2023  
Time: 02:00 PM To 05:00 PM

Max. Marks: 56

- Instructions:** 1) All questions are compulsory.  
2) Figures to the right indicate full marks  
3) Assume suitable data wherever needed and mention it clearly.

**Section – I**

**Q.2 Attempt any two of the following question. 12**

- a) Explain construction and working of two cavity Klystron. State its performance parameters.
- b) Draw block diagram of Pulse radar system and explain its working principle.
- c) Explain construction and working two-hole directional coupler. Derive its S-matrix.

**Q.3 Attempt any four of the following question. 16**

- a) With suitable Diagram explain working of Circulator.
- b) Explain radar system. State its advantages and disadvantages.
- c) Write a note on Phased array Radar.
- d) Explain construction and working of TRAPATT diode.
- e) Explain factors affecting range of radar.

**Section – II**

**Q.4 Attempt any two of the following question. 12**

- a) With suitable block diagrams explain Attitude and orbital control system.
- b) Explain construction and working of LASER diode.
- c) Explain working of GPS system.

**Q.5 Attempt any four of the following question. 16**

- a) Draw the block diagram of optical fiber communication.
- b) State range and application of LEO, MEO and GEO satellites.
- c) Explain basic antenna types used for satellite.
- d) Write a note on multiple accesses in satellite.
- e) Explain different losses in optical fiber.

- Instructions:** 1) Q. No. 1 is compulsory and should be solved in first 30 minutes in Answer Book. Page No.3 (starting page of the Answer Book). Each question carry one mark.  
 2) Don't forget to mention Question Paper Set (P/Q/R/S) at the top of the same page.  
 3) Assume suitable data wherever needed and mention it clearly.

**MCQ/Objective Type Questions**

Duration: 30 Minutes

Marks: 14

**Q.1 Choose the correct alternatives from the options. 14**

- 1) Which of the following factor is taken into account for satellite link design?
  - a) Absorption of signal
  - b) Various noise sources present
  - c) Gain of transmitter and receiving antenna at both end
  - d) All of the above
- 2) Satellite multiple access techniques are \_\_\_\_\_.
  - a) Frequency
  - b) Time
  - c) Space
  - d) All of the above
- 3) The angle b/w incident ray & normal to the plane is \_\_\_\_\_.
  - a) Angle of reflection
  - b) Angle of Incident
  - c) Angle of coefficient
  - d) None of these
- 4) In second generation, wavelength of multimode fiber is \_\_\_\_\_.
  - a) 1310 nm
  - b) 850 nm
  - c) 1420 nm
  - d) 1550 nm
- 5) If  $P_i$  is incident power  $P_f$  is forward power  $P_b$  is back power then coupling factor (c) is given by \_\_\_\_\_.
  - a)  $c=10\log_{10}P_i/P_f$
  - b)  $c=20\log_{10}P_i/P_f$
  - c)  $c=10\log_{10}P_f/P_i$
  - d)  $c=10\log_{10}P_i/P_b$
- 6) A Duplexer is used to \_\_\_\_\_.
  - a) couple two antennas to a transmitter without interference
  - b) isolate the antenna from the local oscillator
  - c) prevent interference between two antennas connected to a receiver
  - d) use an antenna for reception or transmission without interference
- 7) The drift space converts \_\_\_\_\_ modulation into \_\_\_\_\_ modulation.
  - a) Low level, High level
  - b) Current, Velocity
  - c) Velocity, Current
  - d) High level, Low level

- 8) A microwave junction is supposed to be matched at all ports if in the S matrix \_\_\_\_\_.  
a) all the diagonal elements are zero  
b) all the diagonal elements are equal but not zero  
c) all the diagonal elements are complex  
d) is Hermitian
- 9) MESFETS are \_\_\_\_\_.  
a) Bipolar microwave transistor      b) Tripolar microwave transistor  
c) Unipolar microwave transistor      d) None
- 10) Drawback of continuous wave radar is \_\_\_\_\_.  
a) They cannot measure temperature  
b) They cannot measure range  
c) They cannot measure speed  
d) They cannot measure phase
- 11) The type of radar that is used to eliminate clutter in navigational application is \_\_\_\_\_.  
a) pulse radar      b) tracking radar

Day & Date: Thursday, 16-02-2023  
 Time: 02:00 PM To 05:00 PM

Max. Marks: 56

- Instructions:** 1) All questions are compulsory.  
 2) Figures to the right indicate full marks  
 2) Assume suitable data wherever needed and mention it clearly.

**Section – I**

**Q.2 Attempt any four of the following question. 16**

- Define Amplitude, Frequency, Phase, and Wavelength for a sound wave.
- Write down step by step procedure for producing records.
- Discuss why FM is preferred to AM for sound signal transmission.
- Synchronizing pulses transmitted along with the picture signal justify the statement.
- How is the illusion of continuity created in television pictures? Why has the frame reception rate been chosen to be 25 and not 24 as in motion pictures?

**Q.3 Attempt any two of the following question. 12**

- If the gap width is 6 microns and the speed of tape is 4.75cm/s, calculate the maximum frequency of recording. What will happen if the tape speed is increased to 19cm/s? Comment for video frequencies.
- Discuss the factors which influence the choice of sub-carrier frequency in a colour TV system. Justify the choice of 3.579545 MHz as the subcarrier frequency in the NTSC system. How does it affect the line and field frequencies?
- Explain with a suitable block diagram the encoding process in the PAL colour system. Why is the colour burst signal transmitted after each scanning line?

**Section – II**

**Q.4 Attempt any four of the following question. 16**

- Discuss advantages of digital television.
- Explain how surround sound effect is produced in a digital TV system.
- Discuss different image data types and their file formats.
- List down different JPEG modes and discuss any one mode.
- Discuss the benefits offered by compression schemes in designing multimedia systems.

**Q.5 Attempt any two of the following question. 12**

- Draw a neat block diagram of a digital video transmitter and discuss the function of each block.
- Illustrate with a neat diagram the design for PA system for public meeting?
- Discuss bit allocation algorithm for MPEG-1 Layer 1 and Layer 2.

Max. Marks: 70

- Instructions:** 1) Q. No. 1 is compulsory. It should be solved in the first 30 minutes in answer book. Page no 03 (Starting page of the Answer Book). Each question carries one mark.  
 2) Don't forget to Mention question paper set (P/Q/R/S) on top of page.  
 3) Assume suitable data wherever needed and mention it clearly.

**MCQ/Objective Type Questions**

Duration: 30 Minutes

Marks: 14

**Q.1 Choose the correct alternatives from the options. 14**

- 1) 625-B monochrome TV follows the interlaced scanning system, and each frame is divided into two fields, with \_\_\_\_\_.  
 a) 312.5 lines/field                      b) 315 lines/field  
 c) 625 lines/field                        d) 156 lines/field
- 2) The hue and saturation of a colour put together is known as \_\_\_\_\_.  
 a) Colour mixing                        b) Chrominance  
 c) Monochrome signal                d) None of above
- 3) Joint Photographic Experts Group (JPEG) is used to compress \_\_\_\_\_.  
 a) Music                                      b) Pictures  
 c) Images                                    d) Frames
- 4) A video consists of a sequence of \_\_\_\_\_.  
 a) Frames                                    b) Signals  
 c) Packets                                   d) Slots
- 5) Moving Picture Experts Group (MPEG-2), was designed for high-quality DVD with a data rate of \_\_\_\_\_.  
 a) 3 to 6 Mbps                              b) 4 to 6 Mbps  
 c) 5 to 6 Mbps                              d) 6 to 8 Mbps
- 6) Raster images are also known as \_\_\_\_\_.  
 a) Bitmap images                        b) Vector images  
 c) Clip art images                        d) Multimedia images
- 7) The two new signals generated in PAL system are \_\_\_\_\_.  
 a) (B - Y) and (R - Y)                b) R and B  
 c) I and Q                                    d) U and V
- 8) Paint programs and image editors are used for creating and editing \_\_\_\_\_.  
 a) Text                                        b) Vector images  
 c) Bitmap images                        d) HTML codes
- 9) Rooms vibrate and respond most readily to \_\_\_\_\_.  
 a) Low frequencies                      b) High frequencies  
 c) Mid frequencies                        d) None of the above

- 10)** For a sound wave relationship between velocity and temperature is given by, \_\_\_\_\_.  
 a)  $V_2 = V_1 \sqrt{T_2/T_1}$                       b)  $V_1 = V_2 \sqrt{T_2/T_1}$   
 c)  $V_2 = V_1 \sqrt{T_1/T_2}$                       d)  $V_2 = V_1 \sqrt{T/T_1}$
- 11)** The average rate of flow of sound energy through a cross-sectional area is called as \_\_\_\_\_.  
 a) Intensity of sound                      b) Vibrations of sound  
 c) Both a & b                      d) None of above
- 12)** \_\_\_\_\_ is the spectral purity of colour light.  
 a) Luminance                      b) Brightness  
 c) Hue                      d) Saturation
- 13)** The phase of the colour subcarrier burst signal in PAL system is along the axis at \_\_\_\_\_.  
 a)  $\pm 180^\circ$                       b)  $\pm 45^\circ$   
 c)  $180 \pm 45^\circ$                       d) None
- 14)** In subtractive colour theory Cyan is formed by subtracting \_\_\_\_\_.  
 a) White – Red                      b) White – Green  
 c) White – Blue                      d) None of above

Seat No.

**Fourth Y. (B.Tech) (Sem - II) (New) (CBCS) Examination: Oct/Nov- 2022**  
**ELECTRONICS ENGINEERING**  
**Audio Video Systems**

Day & Date: Thursday, 16-02-2023  
 Time: 02:00 PM To 05:00 PM

Max. Marks: 56

- Instructions:** 1) All questions are compulsory.  
 2) Figures to the right indicate full marks  
 2) Assume suitable data wherever needed and mention it clearly.

**Section – I**

**Q.2 Attempt any four of the following question. 16**

- Define Amplitude, Frequency, Phase, and Wavelength for a sound wave.
- Write down step by step procedure for producing records.
- Discuss why FM is preferred to AM for sound signal transmission.
- Synchronizing pulses transmitted along with the picture signal justify the statement.
- How is the illusion of continuity created in television pictures? Why has the frame reception rate been chosen to be 25 and not 24 as in motion pictures?

**Q.3 Attempt any two of the following question. 12**

- If the gap width is 6 microns and the speed of tape is 4.75cm/s, calculate the maximum frequency of recording. What will happen if the tape speed is increased to 19cm/s? Comment for video frequencies.
- Discuss the factors which influence the choice of sub-carrier frequency in a colour TV system. Justify the choice of 3.579545 MHz as the subcarrier frequency in the NTSC system. How does it affect the line and field frequencies?
- Explain with a suitable block diagram the encoding process in the PAL colour system. Why is the colour burst signal transmitted after each scanning line?

**Section – II**

**Q.4 Attempt any four of the following question. 16**

- Discuss advantages of digital television.
- Explain how surround sound effect is produced in a digital TV system.
- Discuss different image data types and their file formats.
- List down different JPEG modes and discuss any one mode.
- Discuss the benefits offered by compression schemes in designing multimedia systems.

**Q.5 Attempt any two of the following question. 12**

- Draw a neat block diagram of a digital video transmitter and discuss the function of each block.
- Illustrate with a neat diagram the design for PA system for public meeting?
- Discuss bit allocation algorithm for MPEG-1 Layer 1 and Layer 2.

**MCQ/Objective Type Questions**

Duration: 30 Minutes

Marks: 14

**Q.1 Choose the correct alternatives from the options. 14**

- 1) \_\_\_\_\_ assumes that the presence of a particular feature in a class is unrelated to the presence of any other feature.
 

a) Decision tree	b) Regression analysis
c) Naive Bayes classifier	d) all of these
- 2) Which of below is not a data mining model?
 

a) classification	b) transformation
c) clustering	d) regression
- 3) Take the odd man out: Lp norm, Jaccard index, dynamic time warping, window-based methods
 

a) Lp norm	b) Jaccard index
c) dynamic time warping	d) window based methods
- 4) The process of \_\_\_\_\_ divides the ranges of the numeric attribute into various ranges.
 

a) binarization	b) averaging
c) histogram	d) discretization
- 5) \_\_\_\_\_ focuses on a single attribute at a time.
 

a) classification	b) univariate analysis
c) predictive clustering	d) all of these
- 6) Distance functions are highly sensitive to \_\_\_\_\_.
 

a) data distribution	b) dimensionality
c) data type	d) all of these
- 7) Take odd man out: association rule mining, decision tree, support vector machine, regression analysis.
 

a) association rule mining	b) decision tree
c) support vector machine	d) regression analysis
- 8) For which type of data an appropriate feature can be extracted using Fourier Transform?
 

a) image	b) speech
c) ECG signal	d) all of these

Max. Marks: 56

- Instructions:** 1) All questions are compulsory.  
2) Figures to the right indicates full marks  
3) Assume suitable data if necessary.

**Section – I**

**Q.2 Solve Any Two**

**12**

- a) Predicting electricity consumption is very challenging task in a city like Solapur. The total electricity consumption depends on attributes like time of the day, season and temperature. Past data 50,000 records is available. Describe a data analytic system which can predict electricity consumption of Solapur city given the features. Give detailed steps.
- b) Bank ABC wish to buy machine learning based software to decide whether to grant a business loan to customer or not. Bank already has complete data of past 20,000 records which consists of the features/attributes and correct outcome for each record. Design a scheme to check the performance of the software to be bought based on various performance parameters. Also evaluate the Type I and type II errors associated.
- c) Data set given: 10, 8, 20, 15, 17. Normalize it to {0 to 1} and {1 to 4} using min-max normalization.

**Q.3 Solve Any Four**

**16**

- a) With suitable example compare different types of feature subset selection
- b) Compare: data science, data analytics and machine learning.
- c) With suitable example describe how mining may help in marketing of a product.
- d) With suitable example compare Euclidean distance and Manhattan distance.
- e) With suitable example show how to calculate Jaccard Index for binary set data

## Section – II

## Q.4 Solve Any Two

12

- a) Given below transaction list at a supermarket, calculate how many '3 item item-set' can be found with support >33 % and confidence >50 % using association rule mining. Also find out confidence and support for the association rule 'a person who buys bread and butter also buys milk'.

Transaction List				
1	Milk	Egg	Bread	Butter
2	Milk	Butter	Egg	Ketch up
3	Bread	Butter	Ketchup	
4	Milk	Bread	Butter	
5	Bread	Butter	Cookies	
6	Milk	Bread	Butter	Cookies
7	Milk	Cookies		
8	Milk	Bread	Butter	
9	Bread	Butter	Egg	Cookies
10	Milk	Butter	Bread	
11	Milk	Bread	Butter	
12	Milk	Bread	Cookies	Ketch up

- b) Given below training data, using linear regression analysis method
- 1) Predict price of the house with age 30 years
  - 2) Calculate residual error for house with age 15 years

Age of House (X)	Price of House (\$,000) (Y)
10	350
15	250
20	300
20	240
25	225

- c) Compare OLTP and OLAP.

## Q.5 Solve Any Four

16

- Compare supervised learning and unsupervised learning.
- What are advantages and disadvantages of K Means Clustering?
- Compare different types of data warehouse.
- With suitable example discuss dimensionality reduction using axis rotation.
- With suitable example describe star schema.

3) Assume suitable data if necessary.

**Section – I**

**Q.2 Solve Any Two**

**12**

- a) Predicting electricity consumption is very challenging task in a city like Solapur. The total electricity consumption depends on attributes like time of the day, season and temperature. Past data 50,000 records is available. Describe a data analytic system which can predict electricity consumption of Solapur city given the features. Give detailed steps.
- b) Bank ABC wish to buy machine learning based software to decide whether to grant a business loan to customer or not. Bank already has complete data of past 20,000 records which consists of the features/attributes and correct outcome for each record. Design a scheme to check the performance of the software to be bought based on various performance parameters. Also evaluate the Type I and type II errors associated.
- c) Data set given: 10, 8, 20, 15, 17. Normalize it to {0 to 1} and {1 to 4} using min-max normalization.

**Q.3 Solve Any Four**

**16**

- a) With suitable example compare different types of feature subset selection
- b) Compare: data science, data analytics and machine learning.
- c) With suitable example describe how mining may help in marketing of a product.
- d) With suitable example compare Euclidean distance and Manhattan distance.
- e) With suitable example show how to calculate Jaccard Index for binary set data

## Section – II

## Q.4 Solve Any Two

12

- a) Given below transaction list at a supermarket, calculate how many '3 item item-set' can be found with support >33 % and confidence >50 % using association rule mining. Also find out confidence and support for the association rule 'a person who buys bread and butter also buys milk'.

Transaction List				
1	Milk	Egg	Bread	Butter
2	Milk	Butter	Egg	Ketch up
3	Bread	Butter	Ketchup	
4	Milk	Bread	Butter	
5	Bread	Butter	Cookies	
6	Milk	Bread	Butter	Cookies
7	Milk	Cookies		
8	Milk	Bread	Butter	
9	Bread	Butter	Egg	Cookies
10	Milk	Butter	Bread	
11	Milk	Bread	Butter	
12	Milk	Bread	Cookies	Ketch up

- b) Given below training data, using linear regression analysis method
- 1) Predict price of the house with age 30 years
  - 2) Calculate residual error for house with age 15 years

Age of House (X)	Price of House (\$,000) (Y)
10	350
15	250
20	300
20	240
25	225

- c) Compare OLTP and OLAP.

## Q.5 Solve Any Four

16

- Compare supervised learning and unsupervised learning.
- What are advantages and disadvantages of K Means Clustering?
- Compare different types of data warehouse.
- With suitable example discuss dimensionality reduction using axis rotation.
- With suitable example describe star schema.

**Fourth Y. (B.Tech.) (Sem-II) (New) (CBCS) Examination: Oct/Nov-2022**  
**ELECTRONIC ENGINEERING**  
**Computer Architecture**

Day & Date: Wednesday, 22-02-2023  
 Time: 02:00 PM To 05:00 PM

Max. Marks: 70

- Instructions:** 1) Q. No. 1 is compulsory. It should be solved in the first 30 minutes in answer book. Page no 03 (Starting page of the Answer Book). Each question carries one mark.  
 2) Don't forget to Mention question paper set (P/Q/R/S) on top of page.  
 3) Figures to the right indicates full marks.

**MCQ/Objective Type Questions**

Duration: 30 Minutes

Marks: 14

**Q.1 Choose the correct alternatives from the options and rewrite the sentence. 14**

- 1) Computer architecture deals with \_\_\_\_\_.  
 a) The sizes of data types that are supported.  
 b) The sizes of data types and the types of operations that are supported  
 c) The types of operations  
 d) Interfaces to peripheral devices
- 2) In memory-mapped I/O \_\_\_\_\_.  
 a) The I/O devices and the memory share the same address space  
 b) The I/O devices have a separate address space  
 c) The memory and I/O devices have an associated address space  
 d) A part of the memory is specifically set aside for the I/O operation
- 3) The advantage of I/O mapped devices to memory mapped is \_\_\_\_\_.  
 a) The former offers faster transfer of data  
 b) The devices connected using I/O mapping have a bigger buffer space  
 c) The devices have to deal with fewer address lines  
 d) No advantage as such
- 4) The method of accessing the I/O devices by repeatedly checking the status flags is \_\_\_\_\_.  
 a) Program-controlled I/O                      b) Memory-mapped I/O  
 c) I/O mapped                                      d) Interrupt driven I/O
- 5) Which of the following is a type of architecture used in the computers nowadays?  
 a) Micro architecture                      b) Harvard Architecture  
 c) Von-Neumann Architecture              d) System Design
- 6) If the decimal point is placed to the right of the first significant digit, then the number is called \_\_\_\_\_.  
 a) Orthogonal                                      b) Normalized  
 c) Determinate                                    d) None of the mentioned
- 7) \_\_\_\_\_ constitute the representation of the floating number.  
 a) Sign digit                                      b) Significant digits  
 c) Exponent digits                              d) All of the mentioned

Day & Date: Wednesday, 22-02-2023  
Time: 02:00 PM To 05:00 PM

Max. Marks: 56

- Instructions:** 1) All questions are compulsory.  
2) Figures to the right indicates full marks  
3) Assume suitable data wherever needed and mention it clearly.

**Section – I**

- Q.2 Solve any four** **16**
- a) Explain the levels of machines in the computer hierarchy.
  - b) Explain fixed point number representation in detail.
  - c) Convert  $(23.375)_{10}$  to base 2 number.
  - d) Explain hardware components of instruction set architecture.
  - e) Draw and explain functional behavior of RAM cell.
- Q.3 Solve any two** **12**
- a) Explain IEEE 754 standard format used to store floating point number in memory.
  - b) What is fetch execute cycle? Draw and explain an example of data path.
  - c) Explain methods for managing the IO devices.

**Section – II**

- Q.4 Solve any four** **16**
- a) Explain main stream classes of computing environment.
  - b) Explain the classes of parallelism and parallel architecture.
  - c) Explain basic compiler techniques for exposing instruction level parallelism.
  - d) Draw and explain basic structure of centralized shared memory multiprocessor based on multi core chip.
  - e) Explain hardware-based speculation.
- Q.5 Solve any two** **12**
- a) Explain the impact of time, volume, commoditization on a cost of computing system.
  - b) Explain challenges of parallel processing.
  - c) Explain basic schemes for enforcing coherence.

**MCQ/Objective Type Questions**

Duration: 30 Minutes

Marks:14

**Q.1 Choose the correct alternatives from the given options.**

**14**

- 1) The application/applications of Artificial Intelligence is/are
  - a) Expert Systems
  - b) Gaming
  - c) Vision System
  - d) All of these
- 2) Rational agent always does the right thing.
  - a) True
  - b) False
  - c) Either true or false
  - d) None of the above
- 3) Which of the following machines requires input from the humans but can interpret the outputs themselves?
  - a) Actuators
  - b) Sensor
  - c) Agents
  - d) AI system
- 4) In state-space, the set of actions for a given problem is expressed by the \_\_\_\_\_.
  - a) Intermediate States
  - b) Successor function that takes current action and returns next state
  - c) Initial States
  - d) None of the above
- 5) Consider the problem of preparing a schedule for a class of students. What type of problem is this?
  - a) Search Problem
  - b) Backtrack Problem
  - c) Constraint Satisfaction Problem
  - d) Planning Problem
- 6) First Order Logic is also known as \_\_\_\_\_.
  - a) Propositional Logic
  - b) Predicate Logic
  - c) Description Logic
  - d) None of the above

- 7) If according to the hypothesis, the result should be positive, but in fact it is negative, then it is known as \_\_\_\_\_.  
a) False Negative Hypothesis      b) False Positive Hypothesis  
c) Specialized Hypothesis      d) Consistent Hypothesis
- 8) Where does the Bayes rule can be used?  
a) Solving queries      b) Increasing complexity  
c) Decreasing complexity      d) Answering probabilistic query
- 9) A Bayesian network is a probabilistic graphical model that represents a set of variables and their conditional dependencies via \_\_\_\_\_.  
a) Directed acyclic graph      b) Cyclic graph  
c) Undirected graph      d) Linear graph
- 10) Which is true for Decision theory?  
a) Decision Theory = Probability theory + utility theory  
b) Decision Theory = Inference theory + utility theory  
c) Decision Theory = Uncertainty + utility theory  
d) Decision Theory = Probability theory + preference
- 11) There are various types of game models, which are based on  
a) The number of players participating  
b) The sum of gains or losses  
c) Both of the above  
d) None of the above
- 12) Which of the following is/are types of Machine Learning there?  
a) Supervised Learning      b) Unsupervised Learning  
c) Reinforcement Learning      d) All of the above
- 13) \_\_\_\_\_ reinforcement occurs due to a particular behavior, increasing the strength and the frequency of the behavior while \_\_\_\_\_ reinforcement is strengthening of a behavior because a negative condition is stopped or avoided.  
a) Positive, Positive      b) Negative, Negative  
c) Positive, Negative      d) Negative, Positive

 Time: 10:00 AM To 01:00 PM

Max. Marks: 70

- Instructions:** 1) Q. No. 1 is compulsory. It should be solved in the first 30 minutes in answer book. Page no 03 (Starting page of the Answer Book). Each question carries one mark.  
 2) Don't forget to Mention question paper set (P/Q/R/S) on top of page.

**MCQ/Objective Type Questions**

Duration: 30 Minutes

Marks:14

**Q.1 Choose the correct alternatives from the given options.**

**14**

- 1) There are various types of game models, which are based on
  - a) The number of players participating
  - b) The sum of gains or losses
  - c) Both of the above
  - d) None of the above
- 2) Which of the following is/are types of Machine Learning there?
  - a) Supervised Learning
  - b) Unsupervised Learning
  - c) Reinforcement Learning
  - d) All of the above
- 3) \_\_\_\_\_ reinforcement occurs due to a particular behavior, increasing the strength and the frequency of the behavior while \_\_\_\_\_ reinforcement is strengthening of a behavior because a negative condition is stopped or avoided.
  - a) Positive, Positive
  - b) Negative, Negative
  - c) Positive, Negative
  - d) Negative, Positive
- 4) Artificial Intelligence shares many concepts with \_\_\_\_\_ e.g. action, consciousness, epistemology, and even free will.
  - a) Psychology
  - b) Philosophy
  - c) Mentality
  - d) None of the above
- 5) The application/applications of Artificial Intelligence is/are
  - a) Expert Systems
  - b) Gaming
  - c) Vision System
  - d) All of these
- 6) Rational agent always does the right thing.
  - a) True
  - b) False
  - c) Either true or false
  - d) None of the above
- 7) Which of the following machines requires input from the humans but can interpret the outputs themselves?
  - a) Actuators
  - b) Sensor
  - c) Agents
  - d) AI system

- 8) In state-space, the set of actions for a given problem is expressed by the \_\_\_\_\_.  
a) Intermediate States  
b) Successor function that takes current action and returns next state  
c) Initial States  
d) None of the above
- 9) Consider the problem of preparing a schedule for a class of students. What type of problem is this?  
a) Search Problem  
b) Backtrack Problem  
c) Constraint Satisfaction Problem  
d) Planning Problem
- 10) First Order Logic is also known as \_\_\_\_\_.  
a) Propositional Logic  
b) Predicate Logic  
c) Description Logic  
d) None of the above
- 11) If according to the hypothesis, the result should be positive, but in fact it is negative, then it is known as \_\_\_\_\_.  
a) False Negative Hypothesis  
b) False Positive Hypothesis  
c) Specialized Hypothesis  
d) Consistent Hypothesis
- 12) Where does the bayes rule can be used?  
a) Solving queries  
b) Increasing complexity  
c) Decreasing complexity  
d) Answering probabilistic query
- 13) A Bayesian network is a probabilistic graphical model that represents a set of variables and their conditional dependencies via \_\_\_\_\_.  
a) Directed acyclic graph  
b) Cyclic graph  
c) Undirected graph  
d) Linear graph
- 14) Which is true for Decision theory?  
a) Decision Theory = Probability theory + utility theory  
b) Decision Theory = Inference theory + utility theory  
c) Decision Theory = Uncertainty + utility theory  
d) Decision Theory = Probability theory + preference

**T.Y. (B.Tech.) (Sem - I) (New) (CBCS) Examination: Oct/Nov-2022**  
**COMPUTER SCIENCE & ENGINEERING**  
**Artificial Intelligence**

Day & Date: Wednesday, 25-01-2023  
Time: 10:00 AM To 01:00 PM

Max. Marks: 56

**Instructions:** 1) All questions are compulsory.  
2) Figures to the right indicate full marks.

**Section - I**

**Q.2 Attempt any Three of the following. 12**

- a) Elaborate all the areas of scope for Artificial Intelligence.
- b) Discuss the blind search algorithms and explain which is the best algorithm in them.
- c) Explain A\* algorithm.
- d) Write a note on reasoning with defaults

**Q.3 Attempt any Two of the following 16**

- a) Explain working of Minimax algorithm with the example. Elaborate properties and limitations of Minimax algorithm.
- b) Write the note on first order logic. Explain with the example.
- c) Write a note on Intelligent agents and their types with the example

**Section - II**

**Q.4 Attempt Any Three of the following. 12**

- a) Write a note on utility theory.
- b) What are the types of algorithms used in supervised learning? Elaborate each of them.
- c) Explain Q learning.
- d) Write a case study on the past, present and future of AI.

**Q.5 Attempt Any Two of the following 16**

- a) Explain Bayes rule. What is the Bayesian network? Explain with examples.
- b) Write a note on decision theory. Explain Markov decision process.
- c) Differentiate between supervised learning and unsupervised learning. How is semi-supervised learning a mixture of these two?

 2) Don't forget to mention Question Paper Set (P/Q/R/S) at the top of the same page.  
 3) Figures to the right indicates full marks.  
 4) Assume suitable data wherever needed and mention it clearly.

**MCQ/Objective Type Questions**

Duration: 30 Minutes

Marks: 14

**Q.1 Choose the correct alternatives from the options.**

**14**

- 1) The state of a process is defined by \_\_\_\_\_.  
 a) the final activity of the process  
 b) the activity just executed by the process  
 c) next activity to be executed by the process  
 d) the current activity of the process
- 2) A solution to the problem of external fragmentation is \_\_\_\_\_.  
 a) compaction  
 b) larger memory space  
 c) smaller memory space  
 d) none of the mentioned
- 3) SPOOLING stands for \_\_\_\_\_.  
 a) Spontaneous primary operation online  
 b) Simultaneous peripheral operation online  
 c) Small peripheral operation online  
 d) None of these
- 4) The PCB of a process does not contain \_\_\_\_\_.  
 a) The value of the cpu registers  
 b) The process state  
 c) Memory management information  
 d) Context switch time
- 5) Process synchronization can be done at \_\_\_\_\_.  
 a) Hardware level  
 b) Software level  
 c) Both a) and b)  
 d) None of these
- 6) Which of the following do not belong to queues for processes?  
 a) Job queue  
 b) PCB queue  
 c) Device queue  
 d) Ready queue
- 7) Which of the following page replacement algorithms suffers from Belady's Anomaly  
 a) Optimal replacement  
 b) LRU  
 c) FIFO  
 d) Both optimal replacement and FIFO

- 8) Time quantum is defined in \_\_\_\_\_.  
a) SJF scheduling algorithm      b) FCFS scheduling algorithm  
c) RR scheduling algorithm      d) Priority scheduling algorithm
- 9) A solution to the critical section problem must satisfy which of the following condition?  
a) Mutual exclusion      b) Progress  
c) Bounded waiting      d) All of these
- 10) Which of the following is a synchronization tool?  
a) Pipe      b) Semaphore  
c) Socket      d) Thread
- 11) Which of the following is the address generated by CPU?  
a) Physical address      b) Absolute address  
c) Logical address      d) None of the above
- 12) Effective access time is directly proportional to \_\_\_\_\_.  
a) page fault rate      b) hit ratio  
c) memory access time      d) none of the mentioned
- 13) Which one of the following is the deadlock avoidance algorithm?  
a) Banker's algorithm      b) Round-robin algorithm  
c) Elevator algorithm      d) Karn's algorithm
- 14) The number of processes completed per unit time is known as \_\_\_\_\_.  
a) Output      b) Throughput  
c) Efficiency      d) Capacity

Set

P

**T.Y (B.Tech.) (Sem- I) (New) (CBCS) Examination: Oct/Nov-2022**  
**COMPUTER SCIENCE & ENGINEERING**  
**Operating Systems**

Day & Date: Tuesday, 31-01-2023  
 Time: 10:00 AM To 01:00 PM

Max. Marks: 56

**Instructions:** 1) Both Section are compulsory.  
 2) Figures to the right indicates full marks.

**Section – I**

**Q.2 Attempt any three (Each carries 4 marks) 12**

- Explain PCB with example.
- What is the major problem in Priority Scheduling? And how to solve it?
- What is a Semaphore? Explain its operations.
- What is spooling? Explain with example.

**Q.3 Attempt any two (Each carries 8 marks) 16**

- What is process scheduler? Describe long term, short term and medium term scheduler in detail.
- Consider the following set of processes, with the length of the cpu burst time given in milliseconds,

Process	Burst Time
P1	10
P2	1
P3	2
P4	1
P5	5

The processes are assumed to have arrived in the order P1, P2, P3, P4, P5 all at time 0. Answer the following.

- Draw Gantt charts that illustrate the execution of these processes using FCFS and SJF - non preemptive.
  - What is average waiting time for both are scheduling algorithms in part (i)?
  - What is average turnaround time for both are scheduling algorithms in part (i)?
  - Which scheduling algorithm results in minimal average waiting time (over all process)?
- Represent waiting time and turnaround time for all processes in table.
- Explain classical problems of Synchronization in terms of Dining Philosopher problem.

**Section – II**

**Q.4 Attempt any three (Each carries 4 marks) 12**

- Explain the steps for page fault handling.
- Explain four essential conditions for the occurrence of deadlock.
- Explain swapping mechanism in paging.
- Write a note on DMA.

**Q.5 Attempt any two (Each carries 8 marks)**

- a) Explain deadlock prevention technique in detail.
- b) Let there be five processes (P1 to P5) and three resource types A, B and C. Resource type A has 10 instances. Resource type B has 5 instances. Resource type C has 7 instances. Suppose that at time,  $t_0$ , the following snapshot of the system has been taken:

	Allocation			Max			Available		
	A	B	C	A	B	C	A	B	C
P1	0	1	0	7	5	3	3	3	2
P2	2	0	0	3	2	2			
P3	3	0	2	9	0	2			
P4	2	1	1	2	2	2			
P5	0	0	2	4	3	3			

- i) What is the content of need matrix?
- ii) Find the safe sequence. Is this system safe at time  $t_0$ ?
- iii) If process, P2 sends one additional request, can it be granted? Say P2 send the request of (1,0,2).
- c) Explain Paging in detail.

Day & Date: Tuesday, 31-01-2023  
 Time: 10:00 AM To 01:00 PM

Max. Marks: 70

- Instructions:**
- 1) Q. No. 1 is compulsory and should be solved in first 30 minutes in Answer Book. Page No.3 (starting page of the Answer Book). Each question carry one mark.
  - 2) Don't forget to mention Question Paper Set (P/Q/R/S) at the top of the same page.
  - 3) Figures to the right indicates full marks.
  - 4) Assume suitable data wherever needed and mention it clearly.

**MCQ/Objective Type Questions**

Duration: 30 Minutes

Marks: 14

**Q.1 Choose the correct alternatives from the options.**

**14**

- 1) Which of the following do not belong to queues for processes?
  - a) Job queue
  - b) PCB queue
  - c) Device queue
  - d) Ready queue
- 2) Which of the following page replacement algorithms suffers from Belady's Anomaly
  - a) Optimal replacement
  - b) LRU
  - c) FIFO
  - d) Both optimal replacement and FIFO
- 3) Time quantum is defined in \_\_\_\_\_.
  - a) SJF scheduling algorithm
  - b) FCFS scheduling algorithm
  - c) RR scheduling algorithm
  - d) Priority scheduling algorithm
- 4) A solution to the critical section problem must satisfy which of the following condition?
  - a) Mutual exclusion
  - b) Progress
  - c) Bounded waiting
  - d) All of these
- 5) Which of the following is a synchronization tool?
  - a) Pipe
  - b) Semaphore
  - c) Socket
  - d) Thread
- 6) Which of the following is the address generated by CPU?
  - a) Physical address
  - b) Absolute address
  - c) Logical address
  - d) None of the above
- 7) Effective access time is directly proportional to \_\_\_\_\_.
  - a) page fault rate
  - b) hit ratio
  - c) memory access time
  - d) none of the mentioned
- 8) Which one of the following is the deadlock avoidance algorithm?
  - a) Banker's algorithm
  - b) Round-robin algorithm
  - c) Elevator algorithm
  - d) Karn's algorithm

- 9) The number of processes completed per unit time is known as \_\_\_\_\_.
  - a) Output
  - b) Throughput
  - c) Efficiency
  - d) Capacity
- 10) The state of a process is defined by \_\_\_\_\_.
  - a) the final activity of the process
  - b) the activity just executed by the process
  - c) next activity to be executed by the process
  - d) the current activity of the process
- 11) A solution to the problem of external fragmentation is \_\_\_\_\_.
  - a) compaction
  - b) larger memory space
  - c) smaller memory space
  - d) none of the mentioned
- 12) SPOOLING stands for \_\_\_\_\_.
  - a) Spontaneous primary operation online
  - b) Simultaneous peripheral operation online
  - c) Small peripheral operation online
  - d) None of these
- 13) The PCB of a process does not contain \_\_\_\_\_.
  - a) The value of the cpu registers
  - b) The process state
  - c) Memory management information
  - d) Context switch time
- 14) Process synchronization can be done at \_\_\_\_\_.
  - a) Hardware level
  - b) Software level
  - c) Both a) and b)
  - d) None of these

**T.Y (B.Tech.) (Sem- I) (New) (CBCS) Examination: Oct/Nov-2022**  
**COMPUTER SCIENCE & ENGINEERING**  
**Operating Systems**

Day & Date: Tuesday, 31-01-2023  
 Time: 10:00 AM To 01:00 PM

Max. Marks: 56

**Instructions:** 1) Both Section are compulsory.  
 2) Figures to the right indicates full marks.

**Section – I**

**Q.2 Attempt any three (Each carries 4 marks) 12**

- Explain PCB with example.
- What is the major problem in Priority Scheduling? And how to solve it?
- What is a Semaphore? Explain its operations.
- What is spooling? Explain with example.

**Q.3 Attempt any two (Each carries 8 marks) 16**

- What is process scheduler? Describe long term, short term and medium term scheduler in detail.
- Consider the following set of processes, with the length of the cpu burst time given in milliseconds,

Process	Burst Time
P1	10
P2	1
P3	2
P4	1
P5	5

The processes are assumed to have arrived in the order P1, P2, P3, P4, P5 all at time 0. Answer the following.

- Draw Gantt charts that illustrate the execution of these processes using FCFS and SJF - non preemptive.
  - What is average waiting time for both are scheduling algorithms in part (i)?
  - What is average turnaround time for both are scheduling algorithms in part (i)?
  - Which scheduling algorithm results in minimal average waiting time (over all process)?
- Represent waiting time and turnaround time for all processes in table.
- Explain classical problems of Synchronization in terms of Dining Philosopher problem.

**Section – II**

**Q.4 Attempt any three (Each carries 4 marks) 12**

- Explain the steps for page fault handling.
- Explain four essential conditions for the occurrence of deadlock.
- Explain swapping mechanism in paging.
- Write a note on DMA.

**Q.5 Attempt any two (Each carries 8 marks)**

- a) Explain deadlock prevention technique in detail.
- b) Let there be five processes (P1 to P5) and three resource types A, B and C. Resource type A has 10 instances. Resource type B has 5 instances. Resource type C has 7 instances. Suppose that at time,  $t_0$ , the following snapshot of the system has been taken:

	Allocation			Max			Available		
	A	B	C	A	B	C	A	B	C
P1	0	1	0	7	5	3	3	3	2
P2	2	0	0	3	2	2			
P3	3	0	2	9	0	2			
P4	2	1	1	2	2	2			
P5	0	0	2	4	3	3			

- i) What is the content of need matrix?
- ii) Find the safe sequence. Is this system safe at time  $t_0$ ?
- iii) If process, P2 sends one additional request, can it be granted? Say P2 send the request of (1,0,2).
- c) Explain Paging in detail.

**Instructions:** All questions are compulsory.

**Section – I**

**Q.2 Answer any three questions. 12**

- Illustrate different Keys of DBMS.
- Compare Database management system over file storage system
- Classify different types of attributes.
- Construct the following SQL queries for *Bank Schema*
  - Find all customers of the bank who have an account but not a loan.
  - Find the names of all customers who live on the same street and in the same city as "Smith".

Bank Schema

branch ( <u>branch name</u> , branch city, assets) Customer ( <u>customer name</u> , customer street, customer city) Loan ( <u>loan number</u> , branch name, amount) Borrower ( <u>customer name</u> , <u>loan number</u> ) Account ( <u>account number</u> , branch name, balance) Depositor ( <u>customer name</u> , <u>account number</u> )
--

**Q.3 Answer any two questions. 16**

- Find the highest normal form of a relation.
  - $R(A,B,C,D,E)$  with FD set  $\{A \rightarrow D, B \rightarrow A, BC \rightarrow D, AC \rightarrow BE\}$
  - $R(A,B,C,D,E)$  with FD set as  $\{BC \rightarrow D, AC \rightarrow BE, B \rightarrow E\}$
- Explain Various 'Joins' with example.
- Construct E-R Diagram for online movie ticket booking database.

**Section – II**

**Q.4 Answer any three questions. 12**

- Enlist different indexing technique with appropriate example.
- Explain Bitmap Indices with example.
- Draw and explain transaction state.
- Write various types of failures.

**Q.5 Answer any two questions. 16**

- What do you mean by concurrency control? Explain two-phase locking protocol.
- Explain deadlock detection and recovery from deadlock.
- Check whether the schedule is view serializable or not?

**MCQ/Objective Type Questions**

Duration: 30 Minutes

Marks: 14

**Q.1 Choose the correct alternatives from the options.**

**14**

- 1) Wrong statement about ORDER BY keyword is \_\_\_\_\_.
  - a) Used to sort the result-set in ascending or descending order
  - b) The ORDER BY keyword sorts the records in ascending order by default.
  - c) To sort the records in ascending order, use the ASC keyword.
  - d) To sort the records in descending order, use the DECENDING keyword.
- 2) Correct syntax query syntax to drop a column from a table is \_\_\_\_\_.
  - a) DELETE COLUMN *column\_name*;
  - b) DROP COLUMN *column\_name*;
  - c) ALTER TABLE *table\_\_name* DROP COLUMN *column\_name*;
  - d) None is correct
- 3) The primary indexes, secondary indexes and cluster indexes are all types of \_\_\_\_\_.
  - a) Ordered indexes
  - b) Unordered indexes
  - c) linear indexes
  - d) Relative search indexes
- 4) Which of the following is an operation of transactions?
  - a) Read
  - b) Write
  - c) Commit
  - d) All of the above
- 5) To include integrity constraint in an existing relation use \_\_\_\_\_.
  - a) Create table
  - b) Modify table
  - c) Alter table
  - d) Drop table
- 6) For each attribute of a relation, there is a set of permitted values, called the \_\_\_\_\_ of that attribute.
  - a) Domain
  - b) Relation
  - c) Set
  - d) Schema
- 7) Database \_\_\_\_\_ which is the logical design of the database, and the database \_\_\_\_\_ which is a snapshot of the data in the database at a given instant in time.
  - a) Instance, Schema
  - b) Relation, Schema
  - c) Relation, Domain
  - d) Schema, Instance

- 8) \_\_\_\_\_ expresses the number of entities to which another entity can be associated via a relationship set.
- a) Mapping Cardinality
  - b) Relational Cardinality
  - c) Participation Constraints
  - d) None of the mentioned
- 9) Identify the correct statement.
- a) Logical level Abstraction: hide details of data types.
  - b) Logical level Abstraction: describes how schema is stored in a data base.
  - c) Logical level Abstraction: describes how a record is stored.
  - d) Logical level Abstraction: describes accessibility of the database by an individual user
- 10) A relational database consists of a collection of \_\_\_\_\_.
- a) Tables
  - b) Fields
  - c) Records
  - d) Keys
- 11) In case of any failure, a log of each transaction can be recovered there from some \_\_\_\_\_ storage.
- a) Stable
  - b) Unstable
  - c) Recovery
  - d) System
- 12) In existing table, ALTER TABLE statement is used to \_\_\_\_\_.
- a) Add columns
  - b) Add constraints
  - c) Delete Columns
  - d) Delete constrains
  - e) All of the above
- 13) SQL Query to delete all rows in a table without deleting the table (structure, attributes, and indexes)
- a) DELETE FROM table\_name;
  - b) DELETE TABLE table\_name;
  - c) DROP TABLE table\_name;
  - d) NONE
- 14) Wrong statement about UPDATE keyword is \_\_\_\_\_.
- a) If WHERE clause is missing in statement the all records will be updated.
  - b) Only one record can be updated at a time using WHERE clause
  - c) Multiple records can be updated at a time using WHERE clause
  - d) None is wrong statement

**Q.1 Choose the correct alternatives from the options.**

**14**

- 1) Which of the following case does not exist in complexity theory?
  - a) Best case
  - b) Worst case
  - c) Average case
  - d) Null case
- 2) If for an algorithm time complexity is given by  $O(1)$  then the complexity of it is \_\_\_\_\_.
  - a) constant
  - b) polynomial
  - c) exponential
  - d) none of the mentioned
- 3) What is the worst case complexity of binary search using recursion?
  - a)  $O(n \log n)$
  - b)  $O(\log n)$
  - c)  $O(n)$
  - d)  $O(n^2)$
- 4) Which of the following method is used for sorting in merge sort?
  - a) Merging
  - b) Partitioning
  - c) Selection
  - d) Exchanging
- 5) The result of the fractional knapsack is greater than or equal to 0/1 knapsack.
  - a) True
  - b) False
- 6) Which of the following statement about 0/1 knapsack and fractional knapsack problem is correct?
  - a) In 0/1 knapsack problem items are divisible and in fractional knapsack items are indivisible
  - b) Both are the same
  - c) 0/1 knapsack is solved using a greedy algorithm and fractional knapsack is solved using dynamic programming
  - d) In 0/1 knapsack problem items are indivisible and in fractional knapsack items are divisible
- 7) Dijkstra's Algorithm is used to solve \_\_\_\_\_ problems.
  - a) All pair shortest path
  - b) Single source shortest path
  - c) Network flow
  - d) Sorting

- 8) The correct matching for the following pairs is
- |                      |                        |
|----------------------|------------------------|
| A. Multistage graph  | 1. Greedy Method       |
| B. Kruskal Algorithm | 2. Dynamic Programming |
| C. Merge Sort        | 3. Backtracking        |
| D. Hamilton Cycle    | 4. Divide and Conquer  |
- a) A-3, B-2, C-4, D-1                      b) A-4, B-3, C-1, D-2  
c) A-2, B-1, C-4, D-3                      d) None
- 9) Floyd Warshall's Algorithm is used for solving \_\_\_\_\_.  
a) All pair shortest path problems  
b) Single Source shortest path problems  
c) Network flow problems  
d) Sorting problems
- 10) Which of the following problems is similar to that of a Hamiltonian path problem?  
a) knapsack problem                      b) closest pair problem  
c) travelling salesman problem        d) assignment problem
- 11) Backtracking algorithm is implemented by constructing a tree of choices called as?  
a) State-space tree                      b) State-chart tree  
c) Node tree                                d) Backtracking tree
- 12) Where is the n-queens problem implemented?  
a) Carom                                      b) Chess  
c) Ludo                                        d) Cards
- 13) \_\_\_\_\_ is the class of decision problems that can be solved by non-deterministic polynomial algorithms.  
a) NP    b) P  
c) Hard                                        d) Complete
- 14) Problems that can be solved in polynomial time are known as?  
a) intractable                                b) tractable  
c) decision                                    d) complete

 Algorithm Add(a,b,c,m,n)  
 {  
   for i:=1 to m do  
     for j:=1 to n do  
       C[i,j]=a[i,j]+b[i,j]  
 }  
 }
- What are different specification of algorithm?
- Find an optimal solution to knapsack problem using greedy method.  
 M=60, n=5 (p<sub>1</sub>.....p<sub>5</sub>) = {15,25,40,20,36} and (w<sub>1</sub>.....w<sub>5</sub>) = {5,5,10,10,6}

**Q.3 Solve any one.****08**

- Write an algorithm based on divide and conquer methodology to sort algorithm using merge sort. And prove time complexity of Merge sort is  $O(n \log n)$ .

**OR**

- Explain optimal merge pattern in detail and find an optimal merge pattern for 8 files whose length (3,5,7,9,12,14,15,17). Calculate no of record move.

**Q.4 Find minimum weight /cost spanning tree using prim's algorithm & Kruskal algorithm.****08**

## Section – II

**Q.5 Solve any three questions.****12**

- Write a short note on flow shop scheduling.
- Design a three-stage system with device types D1, D2, D3. The cost are \$30, \$15, \$20 respectively. The cost of system is to be no more than \$105. The reliability of each device is 0.9, 0.8, 0.5 respectively.
- State and explain Graph coloring problem with example.
- Explain N queen problem. And explain N=4 Draw its portion of permutation tree.

**Q.6 Solve any one.****08**

- Find minimum cost path from s to t multistage graph using forward approach.

**OR**

- Write recursive algorithm for backtracking and explain it in detail.

**Q.7 Consider the following directed graph. Find optimal tour length of travelling sales person problem.****08**

$$\begin{bmatrix} 0 & 2 & 9 & 10 \\ 1 & 0 & 6 & 4 \\ 15 & 7 & 0 & 8 \\ 6 & 3 & 12 & 0 \end{bmatrix}$$

**T.Y. (B.Tech.) (Sem-I) (New) (CBCS) Examination: Oct/Nov-2022**  
**COMPUTER SCIENCE AND ENGINEERING**  
**Design and Analysis of Algorithm**

Day & Date: Tuesday, 07-02-2023  
 Time: 10:00 AM To 01:00 PM

Max. Marks: 70

- Instructions:** 1) Q. No. 1 is compulsory and should be solved in first 30 minutes in Answer Book. Page No.3 (starting page of the Answer Book). Each questions carry one mark.  
 2) Don't forget to mention Question Paper Set (P/Q/R/S) at the top of the same page.  
 3) Figures to the right indicates full marks.

**MCQ/Objective Type Questions**

Duration: 30 Minutes

Marks: 14

**Q.1 Choose the correct alternatives from the options.**

**14**

- 1) The correct matching for the following pairs is
 

A. Multistage graph	1. Greedy Method
B. Kruskal Algorithm	2. Dynamic Programming
C. Merge Sort	3. Backtracking
D. Hamilton Cycle	4. Divide and Conquer

  - a) A-3, B-2, C-4, D-1
  - b) A-4, B-3, C-1, D-2
  - c) A-2, B-1, C-4, D-3
  - d) None
- 2) Floyd Warshall's Algorithm is used for solving \_\_\_\_\_.
  - a) All pair shortest path problems
  - b) Single Source shortest path problems
  - c) Network flow problems
  - d) Sorting problems
- 3) Which of the following problems is similar to that of a Hamiltonian path problem?
 

a) knapsack problem	b) closest pair problem
c) travelling salesman problem	d) assignment problem
- 4) Backtracking algorithm is implemented by constructing a tree of choices called as?
 

a) State-space tree	b) State-chart tree
c) Node tree	d) Backtracking tree
- 5) Where is the n-queens problem implemented?
 

a) Carom	b) Chess
c) Ludo	d) Cards
- 6) \_\_\_\_\_ is the class of decision problems that can be solved by non-deterministic polynomial algorithms.
 

a) NP	b) P
c) Hard	d) Complete
- 7) Problems that can be solved in polynomial time are known as?
 

a) intractable	b) tractable
c) decision	d) complete

**MCQ/Objective Type Questions**

Duration: 30 Minutes

Marks: 14

**Q.1 Choose the correct alternatives from the options.**

**14**

- 1) Reinforcement learning is \_\_\_\_\_.  
 a) Unsupervised learning                      b) Supervised learning  
 c) Feedback based learning                      d) None of these
- 2) The multi-armed bandit problem is a generalized use case for \_\_\_\_\_.  
 a) Reinforcement learning                      b) Supervised learning  
 c) Unsupervised learning                      d) All of these
- 3) The key idea of using DP is the use of \_\_\_\_\_ to organize and structure the search for good policies.  
 a) Activation functions                      b) Value functions  
 c) Policy functions                      d) Discount factor
- 4) All the updates done in DP algorithms are called \_\_\_\_\_ because they are based on an expectation over all possible next states.  
 a) Predicted updates                      b) Sample updates  
 c) Expected updates                      d) Past updates
- 5) The process of making a new policy that improves on an original policy, by making it greedy with respect to the value function of the original policy, is called \_\_\_\_\_.  
 a) Policy prediction                      b) Policy process  
 c) Greedy Policy process                      d) Policy improvement
- 6) Any RL tasks composed of a set of states, actions and rewards that follows the \_\_\_\_\_ would be considered as MDP.  
 a) Markov property                      b) Backup policy  
 c) Bootstrap property                      d) Bellman equation
- 7) The use of a \_\_\_\_\_ to formalize the idea of a goal is one of the most distinctive features of reinforcement learning.  
 a) Policy                      b) Action  
 c) Reward signal                      d) State

 Time: 10:00 AM To 01:00 PM

Max. Marks: 56

**Instructions:** 1) All questions are compulsory.  
 2) Figures to the right indicates full marks.

**Section – I**

- Q.2 Attempt Any THREE.** **12**
- What is reinforcement learning? Explain with diagram the steps in reinforcement learning.
  - What role do Exploration and Exploitation take w.r.t Reinforcement learning?
  - Explain the Multi armed bandit problem. List its applications.
  - What is the Markov property? Explain concept of MDP with its elements.
- Q.3 Attempt Any ONE.** **08**
- Explain policy and value function. Derive the bellman equation for value function and explain how it is used to find the optimal policy.
  - Explain the following Action-value methods along with their mathematical equations for computing action value in 10-armed bandit problem:
    - Sample-Averaging method
    - $\epsilon$ -greedy method
    - Incremental implementation method
- Q.4** Illustrate with diagram and equation the unified notation for episodic tasks and continuous task. **08**

**Section – II**

- Q.5 Attempt Any THREE.** **12**
- List the features of Temporal Difference Learning. Illustrate each of them.
  - Illustrate the working of SARSA (On-Policy TD control) method.
  - Explain the value iteration method in dynamic programming.
  - Differentiate between model based and model free learning
- Q.6 Attempt Any ONE.** **08**
- What is Samuel's Checkers Player? Explain its working in detail.
  - Write short notes:**
    - Dyna-Q
    - Monte Carlo method
- Q.7** What is Prioritized sweeping? Why it is needed? Explain it in detail. **08**

Duration: 30 Minutes

Marks: 14

**Q.1 Choose the correct alternatives from the options.**

**14**

- 1) \_\_\_\_\_ includes all the processes such as planning, acting, model-learning, and direct RL which occurs continually.
  - a) MDP
  - b) Dyna-Q
  - c) Q-learning
  - d) Monte Carlo
- 2) The motivation behind Dyna-Q+ is to give a \_\_\_\_\_ for actions that have not been tried for a long time, since there is a greater chance that the dynamics for that actions might have changed.
  - a) Bonus reward
  - b) Discounted reward
  - c) Punishment
  - d) None of these
- 3) TD learning is combines ideas from \_\_\_\_\_.
  - a) Monte Carlo and dynamic programming
  - b) Greedy method and Monte Carlo
  - c) Dynamic programming and Greedy method
  - d) None of these
- 4) In the given equation,  $\text{total\_reward} = R_1 + \gamma R_2 + \gamma^2 R_2 + \gamma^3 R_3 + \dots$ ,  $\gamma$  is called as \_\_\_\_\_.
  - a) Discount rate
  - b) Punishment value
  - c) Reward
  - d) State value
- 5) Reinforcement learning is \_\_\_\_\_.
  - a) Unsupervised learning
  - b) Supervised learning
  - c) Feedback based learning
  - d) None of these
- 6) The multi-armed bandit problem is a generalized use case for \_\_\_\_\_.
  - a) Reinforcement learning
  - b) Supervised learning
  - c) Unsupervised learning
  - d) All of these
- 7) The key idea of using DP is the use of \_\_\_\_\_ to organize and structure the search for good policies.
  - a) Activation functions
  - b) Value functions
  - c) Policy functions
  - d) Discount factor

- 8) All the updates done in DP algorithms are called \_\_\_\_\_ because they are based on an expectation over all possible next states.
- a) Predicted updates
  - b) Sample updates
  - c) Expected updates
  - d) Past updates
- 9) The process of making a new policy that improves on an original policy, by making it greedy with respect to the value function of the original policy, is called \_\_\_\_\_.
- a) Policy prediction
  - b) Policy process
  - c) Greedy Policy process
  - d) Policy improvement
- 10) Any RL tasks composed of a set of states, actions and rewards that follows the \_\_\_\_\_ would be considered as MDP.
- a) Markov property
  - b) Backup policy
  - c) Bootstrap property
  - d) Bellman equation
- 11) The use of a \_\_\_\_\_ to formalize the idea of a goal is one of the most distinctive features of reinforcement learning.
- a) Policy
  - b) Action
  - c) Reward signal
  - d) State
- 12) In many cases the agent-environment interaction does not break naturally into identifiable episodes, but goes on continually without limit. We call these as \_\_\_\_\_.
- a) Episodic task
  - b) Continuous task
  - c) Both a) and b)
  - d) None of these
- 13) Methods for solving reinforcement learning problems that use models and planning are called \_\_\_\_\_.
- a) Model-free method
  - b) Model-based method
  - c) Both a) and b)
  - d) None of these
- 14) A \_\_\_\_\_ would produce all possible sums and their probabilities of occurring, whereas a \_\_\_\_\_ would produce an individual sum drawn according to this probability distribution.
- a) Distribution model, Sample model
  - b) Sample model, Distribution model
  - c) Sample model, Stochastic model
  - d) None of these

**T.Y (B.Tech.) (Sem-I) (New) (CBCS) Examination: Oct/Nov - 2022**  
**COMPUTER SCIENCE & ENGINEERING**  
**Reinforcement Learning**

Day & Date: Thursday, 16-02-2023  
 Time: 10:00 AM To 01:00 PM

Max. Marks: 56

**Instructions:** 1) All questions are compulsory.  
 2) Figures to the right indicates full marks.

**Section – I**

- Q.2 Attempt Any THREE.** **12**
- What is reinforcement learning? Explain with diagram the steps in reinforcement learning.
  - What role do Exploration and Exploitation take w.r.t Reinforcement learning?
  - Explain the Multi armed bandit problem. List its applications.
  - What is the Markov property? Explain concept of MDP with its elements.
- Q.3 Attempt Any ONE.** **08**
- Explain policy and value function. Derive the bellman equation for value function and explain how it is used to find the optimal policy.
  - Explain the following Action-value methods along with their mathematical equations for computing action value in 10-armed bandit problem:
    - Sample-Averaging method
    - $\epsilon$ -greedy method
    - Incremental implementation method
- Q.4** Illustrate with diagram and equation the unified notation for episodic tasks and continuous task. **08**

**Section – II**

- Q.5 Attempt Any THREE.** **12**
- List the features of Temporal Difference Learning. Illustrate each of them.
  - Illustrate the working of SARSA (On-Policy TD control) method.
  - Explain the value iteration method in dynamic programming.
  - Differentiate between model based and model free learning
- Q.6 Attempt Any ONE.** **08**
- What is Samuel's Checkers Player? Explain its working in detail.
  - Write short notes:**
    - Dyna-Q
    - Monte Carlo method
- Q.7** What is Prioritized sweeping? Why it is needed? Explain it in detail. **08**

Day & Date: Thursday, 16-02-2023  
 Time: 10:00 AM To 01:00 PM

Max. Marks: 70

- Instructions:** 1) Q. No. 1 is compulsory. It should be solved in the first 30 minutes in answer book. Page no 03 (Starting page of the Answer Book). Each question carries one mark.  
 2) Don't forget to Mention question paper set (P/Q/R/S) on top of page.  
 3) Figures to the right indicates full marks.

**MCQ/Objective Type Questions**

Duration: 30 Minutes

Marks: 14

**Q.1 Choose the correct alternatives from the options.**

**14**

- 1) Any RL tasks composed of a set of states, actions and rewards that follows the \_\_\_\_\_ would be considered as MDP.
  - a) Markov property
  - b) Backup policy
  - c) Bootstrap property
  - d) Bellman equation
- 2) The use of a \_\_\_\_\_ to formalize the idea of a goal is one of the most distinctive features of reinforcement learning.
  - a) Policy
  - b) Action
  - c) Reward signal
  - d) State
- 3) In many cases the agent-environment interaction does not break naturally into identifiable episodes, but goes on continually without limit. We call these as \_\_\_\_\_.
  - a) Episodic task
  - b) Continuous task
  - c) Both a) and b)
  - d) None of these
- 4) Methods for solving reinforcement learning problems that use models and planning are called \_\_\_\_\_.
  - a) Model-free method
  - b) Model-based method
  - c) Both a) and b)
  - d) None of these
- 5) A \_\_\_\_\_ would produce all possible sums and their probabilities of occurring, whereas a \_\_\_\_\_ would produce an individual sum drawn according to this probability distribution.
  - a) Distribution model, Sample model
  - b) Sample model, Distribution model
  - c) Sample model, Stochastic model
  - d) None of these
- 6) \_\_\_\_\_ includes all the processes such as planning, acting, model-learning, and direct RL which occurs continually.
  - a) MDP
  - b) Dyna-Q
  - c) Q-learning
  - d) Monte Carlo

- 7) The motivation behind Dyna-Q+ is to give a \_\_\_\_\_ for actions that have not been tried for a long time, since there is a greater chance that the dynamics for that actions might have changed.
- a) Bonus reward
  - b) Discounted reward
  - c) Punishment
  - d) None of these
- 8) TD learning is combines ideas from \_\_\_\_\_.
- a) Monte Carlo and dynamic programming
  - b) Greedy method and Monte Carlo
  - c) Dynamic programming and Greedy method
  - d) None of these
- 9) In the given equation,  $\text{total\_reward} = R_1 + \gamma R_2 + \gamma^2 R_2 + \gamma^3 R_3 + \dots$ ,  $\gamma$  is called as \_\_\_\_\_.

Marks: 14

## 14

- 1) Which of the measures given here are based on every item of the series (uses all Observations)?
  - a) Range
  - b) Standard Deviation
  - c) Quartile Deviation
  - d) All of the above
- 2) Find the median of the following data:  
160, 180, 200, 280, 300, 320, 400
  - a) 140
  - b) 300
  - c) 180
  - d) 280
- 3) A feature F1 can take certain value: A, B, C, D, E, & F and represents grade of students from a college. Which of the following statement is true in following case?
  - a) Feature F1 is an example of nominal variable.
  - b) Feature F1 is an example of ordinal variable.
  - c) It doesn't belong to any of the above category
  - d) Both of these
- 4) What are the benefits of Data Visualizations?
  - a) Better Analysis
  - b) Identifying patterns
  - c) Exploring Business Insights
  - d) All of the above
- 5) "The sum of squares of deviations of the values is least" when deviations are taken from \_\_\_\_\_.
  - a) Median
  - b) Mode
  - c) Arithmetic Mean
  - d) Geometric Mean
- 6) In a week the prices of a bag of rice were 350, 280, 340, 290, 320, 310, 300. The range is \_\_\_\_\_.
  - a) 60
  - b) 90
  - c) 70
  - d) 100

- 7) Taking mean centring for a given variable is achieved by:
- Taking the mean of all scores (ignoring from which variable they come) and subtracting each score from it.
  - Taking each score and subtracting from it the mean of all scores (for that variable).
  - Taking each score and dividing it by the mean of all scores (for that variable).
  - Taking each score, subtracting the mean and then dividing by the standard deviation.
- 8) The combined effect of two variables on another is known conceptually as \_\_\_\_\_, and in statistical terms as \_\_\_\_\_.
- Mediation, an interaction effect
  - Moderation, a direct effect
  - Moderation, an interaction effect
  - Mediation, a direct effect
- 9) Which of the following quantities does not affect the width of the confidence interval for a population proportion?
- Sample Proportion
  - Population Size
  - Sample size
  - Confidence level
- 10) Which of the following is true about hypothesis testing?
- Hypothesis are statements about the population(s)
  - Results are said to be statistically significant when the p-value is greater than the alpha level.
  - The test statistic is a population parameter
  - None of the above
- 11) What will be printed?
- ```
import numpy as np
a = np.array([1,2,3,5,8])
b = np.array([0,3,4,2,1])
c = a + b
c = c*a
print (c[2])
```
- 7
  - 12
  - 10
  - 21
- 12) A Tabular arrangement for classifying data into different groups is called \_\_\_\_.
- Standard deviation
  - frequency distribution
  - Secondary data
  - Arithmetic Mean
- 13) Which of the following ways to create a MultiIndex (multi-level index)?
- From a list of arrays using MultiIndex.from\_arrays()
  - From an array of tuples using MultiIndex.from\_tuples()
  - rom a crossed set of iterables using MultiIndex.from\_product()
  - All of the above
- 14) Amongst which of the following is a correct syntax for panda's dataframe?
- Pandas.DataFrame(data, index, dtype, copy)
  - pandas.DataFrame( data, index, columns, dtype, copy)
  - pandas.DataFrame(data, index, dtype, copy)
  - pandas.DataFrame( data, index, rows, dtype, copy)

- a) Taking the mean of all scores (ignoring from which variable they come) and subtracting each score from it.
  - b) Taking each score and subtracting from it the mean of all scores (for that variable).
  - c) Taking each score and dividing it by the mean of all scores (for that variable).
  - d) Taking each score, subtracting the mean and then dividing by the standard deviation.
- 12) The combined effect of two variables on another is known conceptually as \_\_\_\_\_, and in statistical terms as \_\_\_\_\_.
- a) Mediation, an interaction effect
  - b) Moderation, a direct effect
  - c) Moderation, an interaction effect
  - d) Mediation, a direct effect
- 13) Which of the following quantities does not affect the width of the confidence interval for a population proportion?
- a) Sample Proportion
  - b) Population Size
  - c) Sample size
  - d) Confidence level
- 14) Which of the following is true about hypothesis testing?
- a) Hypothesis are statements about the population(s)
  - b) Results are said to be statistically significant when the p-value is greater than the alpha level.
  - c) The test statistic is a population parameter
  - d) None of the above

**T.Y (B.Tech.) (Sem-I) (New) (CBCS) Examination: Oct/Nov – 2022**  
**COMPUTER SCIENCE & ENGINEERING**  
**Data Preprocessing & Visualization**

Day & Date: Thursday, 16-02-2023  
 Time: 10:00 AM To 01:00 PM

Max. Marks: 56

**Instructions:** 1) All question are compulsory.  
 2) Figures to the right indicates full marks.

**Section – I**

- Q.2 Attempt Any FOUR:** **16**
- Write a program to create an empty array of 3X4 and full array of 3X3 of INTEGER type?
  - What type of plot would you use if you need to demonstrate “relationship” between variables/parameters?
  - What is nominal variable and ordinal variable? Explain with examples.
  - What are ways of creating 1D, 2D and 3D arrays in NumPy?
  - How do you convert Pandas DataFrame to a NumPy array?
- Q.3 a)** Define a Range? What are the Applications of Range? Explain the method of How to Find Range with example? **06**
- b)** Find the standard deviation of the average temperatures recorded over a five-day period last winter: **06**  
 18,22,19,25,12

**Section – II**

- Q.4 Attempt Any FOUR:** **16**
- What is Data visualization? What are the advantages of Data Visualization?
  - Draw a diagram of Box plot representing multi-variate categorical variables.
  - Define a scatter plot? Write syntax of scatter plot and explain its parameter in the syntax.
  - Name any 4 libraries in Python used for Data Analysis and Scientific computations?
  - How can we visualize more than three dimensions of data in a single chart?
- Q.5 Attempt Any ONE:** **12**
- Describe in detail Three-Dimensional Plotting in Matplotlib.
  - What is a dynamic technique in data visualization? explain with Example.

4) Assume suitable data wherever needed and mention it clearly .

**MCQ/Objective Type Questions**

Duration: 30 Minutes

Marks: 14

**Q.1 Choose the correct alternatives from the options.**

**14**

- 1) What is Cyber Security?
  - a) Cyber Security provides security against malware
  - b) Cyber Security provides security against cyber-terrorists
  - c) Cyber Security protects a system from cyber attacks
  - d) All of the mentioned
- 2) Which of the following is an objective of network security?
  - a) Confidentiality
  - b) Integrity
  - c) Availability
  - d) All of the above
- 3) Which of the following is a type of cyber attack?
  - a) Phishing
  - b) SQL Injections
  - c) Password Attack
  - d) All of the above
- 4) Which of the following act violates cyber security?
  - a) Exploit
  - b) Attack
  - c) Threat
  - d) Vulnerability
- 5) Which of the following do Cyber attackers commonly target for fetching IP address of a target or victim user?
  - a) ip tracker
  - b) emails
  - c) websites
  - d) web pages
- 6) Which of the following is an internet scam done by cyber-criminals where the user is convinced digitally to provide confidential information?
  - a) MiTM attack
  - b) Phishing attack
  - c) Website attack
  - d) DoS attack
- 7) \_\_\_\_\_ is the cyclic practice for identifying & classifying and then solving the vulnerabilities in a system.
  - a) Bug protection
  - b) Bug bounty
  - c) Vulnerability measurement
  - d) Vulnerability management

- 8) A \_\_\_\_\_ is a trusted third party that assigns a symmetric key to two parties.
- a) KDC
  - b) CA
  - c) KDD
  - d) None of above
- 9) In the \_\_\_\_\_ mode, IPSec protects the whole IP packet, including the original IP header.
- a) Transport
  - b) Tunnel
  - c) AH
  - d) ESP
- 10) In \_\_\_\_\_ the cryptographic algorithms and secrets are sent with the message.
- a) IPSec
  - b) SSL
  - c) TLS
  - d) PGP
- 11) \_\_\_\_\_ is a computer on a network which act as an intermediary for connections with other computers on the network.
- a) Proxy Server
  - b) Anonymizer
  - c) Both a & b
  - d) Neither a nor b
- 12) Phishing execute following sequential steps
- a) Planning, Collection, Setup, Attack
  - b) Planning, Setup, Collection, Attack
  - c) Planning, Setup, Attack, Collection
  - d) Collection, Planning, Setup, Attack
- 13) Following is the event dependent program executed only when certain event occur \_\_\_\_\_.
- a) Logic Bomb
  - b) Salami
  - c) Email Bombing
  - d) Trojan Horse
- 14) Financial motivation hacking coming under type of \_\_\_\_\_.
- a) Hungry for Recognition
  - b) Not interested in Recognition
  - c) The insider
  - d) The Outsider

- Instructions:** 1) All questions are compulsory.  
2) Figures to the right indicate full marks.  
3) Assume suitable data if necessary.

**Section – I**

- Q.2 Attempt Any FOUR:** **16**
- a) Explain Security Service.
  - b) Write a note on secure hash function.
  - c) Write a note on key management Kerberos.
  - d) Write a note on ARP attack.
  - e) Explain model of internetwork security.
- Q.3 Attempt any Two:** **12**
- a) Explain block cipher modes of operation with suitable diagram.
  - b) Explain approaches of message authentication.
  - c) Describe digital signature standard.

**Section – II**

- Q.4 Attempt Any Four:** **16**
- a) Explain viruses with their structure, type and nature in detail.
  - b) Write note of fuzzing.
  - c) Write a note on PGP.
  - d) Define the term:
    - i) E-mail bombing
    - ii) Salami attack
    - iii) Logic bomb
    - iv) Data diddling
  - e) Explain intrusion detection system.
- Q.5 Attempt Any Two:** **12**
- a) Write a note S/MIME.
  - b) Explain Encapsulating security payload.
  - c) Write a note on Firewall Design principal.

**MCQ/Objective Type Questions**

Duration: 20 Minutes

Marks:10

**Q.1 Choose the correct alternatives from the given options. 10**

- 1) Microeconomic theory deals with \_\_\_\_\_.
  - a) Economic behavior of individual economic decision-making units
  - b) Economy as whole
  - c) Trade relations
  - d) Economic growth of the society
- 2) In a mixed economy which sector (s) is / are found \_\_\_\_\_.
  - a) Private only
  - b) Public only
  - c) None
  - d) Both (a) public and (b) private
- 3) Who is known as father of economics?
  - a) Adam Smith
  - b) Prof. A. Samuelson
  - c) Alfred Marshall
  - d) J. R. Hicks
- 4) Which of these is an economic activity?
  - a) Father teaching his son at home instead of spending on coaching
  - b) A housewife making food for the family on her own
  - c) A hair dresser doing hair cut designing on payment
  - d) A singer giving a show on his son's wedding anniversary
- 5) Market system means: \_\_\_\_\_.
  - a) Socialism
  - b) Capitalism
  - c) A place where goods are traded
  - d) All of the above
- 6) Micro and Macro are not two independent approaches to economic analysis but they are complementary to each other.
  - a) False
  - b) True
  - c) Partly true
  - d) Partly False
- 7) Variable factor means those factors of production \_\_\_\_\_.
  - a) which can be only changed in the long run
  - b) which can be changed in the short run
  - c) which can be never be changed
  - d) All of the above

- 8)** Which one of the following is not the function of money?
- a) Medium of exchange
  - b) Measure of Happiness
  - c) Standard of deferred payment
  - d) Store of value
- 9)** Which one of the following is the objective of the RBI?
- a) To maintain term deposits of the households
  - b) To ensure price stability
  - c) To arrange loans for the businessmen
  - d) None of the above
- 10)** Which one of the following cost can never become zero?
- a) Average cost
  - b) Fixed cost
  - c) Marginal cost

**T.Y. (B. Tech) (Sem - I) (New) (CBCS) Examination: Oct/Nov-2022**  
**COMPUTER SCIENCE & ENGINEERING**  
**Professional Ethics & Human Value**

Day & Date: Monday 20-02-2023  
Time: 10:00 AM To 12:00 PM

Max. Marks: 40

**Instructions:** 1) All questions are compulsory.  
2) Figures to the right indicate full marks.

- Q.2** List the human values and explain any two in detail. **10**  
**OR**  
Distinguish between Kohlberg's and Gilligan's approach to ethical (moral) judgments.
- Q.3** Discuss in detail risk benefit analysis and reducing risk. **10**  
**OR**  
Explain the role of engineers as manager.
- Q.4 Write short notes on any four** **20**  
a) Objectives of Engineering Ethics  
b) Self confidence  
c) Commitment  
d) Difference between moral and ethics  
e) Intellectual property rights  
f) Code of ethics

**T.Y. (B. Tech) (Sem - I) (New) (CBCS) Examination: Oct/Nov-2022**  
**COMPUTER SCIENCE & ENGINEERING**  
**Professional Ethics & Human Value**

Day &amp; Date: Monday 20-02-2023

Max. Marks: 50

Time: 10:00 AM To 12:00 PM

- Instructions:** 1) Q. No. 1 is compulsory. It should be solved in the first 20 minutes in answer book. Page no 03 (Starting page of the Answer Book). Each question carries one mark.  
 2) Don't forget to Mention question paper set (P/Q/R/S) on top of page.  
 3) Figures to the right indicates full marks

**MCQ/Objective Type Questions**

Duration: 20 Minutes

Marks:10

**Q.1 Choose the correct alternatives from the given options. 10**

- 1) \_\_\_\_\_ is defined as a set of attitudes concerned with the values of work, which forms the motivational orientation.
  - a) Integrity
  - b) Work ethic
  - c) Personal Values
  - d) Professional values
- 2) Belief that the privacy of others must always be maintained \_\_\_\_\_.
  - a) Confidentiality
  - b) Empathy
  - c) Ethics
  - d) Work ethics
- 3) Ethics has evolved with evaluation of \_\_\_\_\_.
  - a) Culture
  - b) Value
  - c) Society
  - d) Moral
- 4) Virtues are \_\_\_\_\_.
  - a) Moral
  - b) Ethics
  - c) Values
  - d) Positive and preferred values
- 5) Honestly is a \_\_\_\_\_.
  - a) Virtue
  - b) Truthfulness
  - c) Trustworthiness
  - d) Communication
- 6) Human life is lived at four levels individuals, family, society and \_\_\_\_\_.
  - a) Nature
  - b) Nurture
  - c) World
  - d) Universe
- 7) One of the basic desires of every human being is to be always \_\_\_\_\_.
  - a) Happy
  - b) Sad
  - c) Laugh
  - d) Earn money
- 8) Courage is the tendency to accept and face \_\_\_\_\_.
  - a) Self-confidence
  - b) Risks and difficult tasks in rational ways
  - c) Physical courage
  - d) Social courage
- 9) Commitment means \_\_\_\_\_.
  - a) Alignment to goals
  - b) Adherence to ethical principles
  - c) Empathy
  - d) All the above

- 10)** The objectives of professional ethics in engineering are
- a) To understand the moral values that ought to guide the Engineering profession
  - b) To resolve the moral issues in the profession, and
  - c) To justify the moral judgment concerning the profession
  - d) All the above

 3) Assume data wherever necessary.

**MCQ/Objective Type Questions**

Duration: 30 Minutes

Marks: 14

**Q.1 Choose the correct alternatives from the options.**

**14**

- 1) The designer expresses the ideas in terms related to the \_\_\_\_\_.  
 a) application domain                      b) execution domain  
 c) all of the above                          d) none of the above
- 2) The semantic gap has many consequences like \_\_\_\_\_.  
 a) large development time                  b) large development efforts  
 c) poor quality of software                  d) all of the above
- 3) Program generation activities and program execution activities are the processing activities that come under \_\_\_\_\_.  
 a) Processing activities  
 b) Language processing activities  
 c) All of the above  
 d) None of the above
- 4) Which of the following might be used to convert high-level language instructions into machine language?  
 a) System software                          b) Applications software  
 c) An operating environment              d) An interpreter
- 5) Indicate which of the following is not true about an interpreter?  
 a) Interpreter generates an object program from the source program  
 b) Interpreter is a kind of translator  
 c) Interpreter analyses each source statement every time it is to be executed  
 d) All of the above
- 6) Which of the following program converts assembly language program to object programs?  
 a) Assembler                                  b) Compiler  
 c) Macro processor                          d) Linker
- 7) \_\_\_\_\_ converts the programs written in assembly language into machine instructions.  
 a) Machine compiler                          b) Interpreter  
 c) Assembler                                  d) Converter

- 8) A system program that sets up an executable program in main memory ready for execution
- a) Assembler
  - b) Linker
  - c) Loader
  - d) Load and go
- 9) During macro expansion each statement is replaced by \_\_\_\_\_.  
a) The original program  
b) The sequence of assembly statement  
c) By specific symbols  
d) None of the above
- 10) A macro can be defined at \_\_\_\_\_.  
a) Beginning of a program      b) End of a program  
c) After initialization of program      d) Anywhere in a program
- 11) Macro processor is an inbuilt function of -  
a) Assembler      b) Loader  
c) Linker      d) Editor
- 12) To overcome the problems of the assembler in dealing with branching code we use \_\_\_\_\_.  
a) Interpreter      b) Debugger  
c) Op-Assembler      d) Two-pass assemble
- 13) Compiler can check \_\_\_\_\_.  
a) Syntax Error      b) Logical Error  
c) Both Logical and Syntax Error      d) None of the above
- 14) Translator for low level programming language were termed as \_\_\_\_\_.  
a) Assembler      b) Compiler  
c) Linker      d) Loader

**System Programming**

Day & Date: Saturday, 25-01-2023  
Time: 10:00 AM To 01:00 PM

Max. Marks: 56

**Instructions:** 1) All Questions are compulsory.  
2) Figures to the right indicate full marks.

**Section – I**

**Q.2 Attempt any Four.** **16**

- a) Describe front end & back end of toy compiler with the help of examples.
- b) What is IR? Prepare an IR by making front end analysis of following program  
P : integer;  
Q, R: real;  
Q: = R + P;
- c) List and explain types of elements of assembly language programming.
- d) Classify the fundamental language processing activities.
- e) Define and Describe Nested macro call.
- f) Define macro definition, call and expansion in detail with the help of examples.

**Q.3 Attempt any One.** **06**

- a) Define Language processor? List and explain different types of language processor with example.
- b) Write down the tasks performed in the analysis phase and synthesis phase of Assembler.

**Q.4 Attempt the following.** **06**

- a) List major issues in code generation for expression. Explain operand & register Descriptor with example.

**Section – II**

**Q.5 Attempt any Four** **16**

- a) Explain aspects of compilation.
- b) What are triples, quadruples and indirect triples? Explain.
- c) Define linker? And what are binary programs & object modules used in linker?
- d) What is absolute loader? How it differs from relocating loader.
- e) What is Loader? Explain the four basic functions of any loader.
- f) Compare linking address & loading address.

**Q.6 Attempt any one.**

- a)** Compare the direct linking and self relocating loader.
- b)** List & explain the PL features used in implementation of aspects of compilation.

**Q.7 Attempt the following.**

Describe the working of direct linking loader & various data structures used in loader.

Marks: 14

**Q.1 Choose the correct alternatives from the options. 14**

- 1) Which of the following program converts assembly language program to object programs?
 

|                    |             |
|--------------------|-------------|
| a) Assembler       | b) Compiler |
| c) Macro processor | d) Linker   |
- 2) \_\_\_\_\_ converts the programs written in assembly language into machine instructions.
 

|                     |                |
|---------------------|----------------|
| a) Machine compiler | b) Interpreter |
| c) Assembler        | d) Converter   |
- 3) A system program that sets up an executable program in main memory ready for execution
 

|              |                |
|--------------|----------------|
| a) Assembler | b) Linker      |
| c) Loader    | d) Load and go |
- 4) During macro expansion each statement is replaced by \_\_\_\_\_.
 

|                                       |  |
|---------------------------------------|--|
| a) The original program               |  |
| b) The sequence of assembly statement |  |
| c) By specific symbols                |  |
| d) None of the above                  |  |
- 5) A macro can be defined at \_\_\_\_\_.
 

|                                    |                          |
|------------------------------------|--------------------------|
| a) Beginning of a program          | b) End of a program      |
| c) After initialization of program | d) Anywhere in a program |
- 6) Macro processor is an inbuilt function of -
 

|              |           |
|--------------|-----------|
| a) Assembler | b) Loader |
| c) Linker    | d) Editor |
- 7) To overcome the problems of the assembler in dealing with branching code we use \_\_\_\_\_.
 

|                 |                      |
|-----------------|----------------------|
| a) Interpreter  | b) Debugger          |
| c) Op-Assembler | d) Two-pass assemble |
- 8) Compiler can check \_\_\_\_\_.
 

|                                  |                      |
|----------------------------------|----------------------|
| a) Syntax Error                  | b) Logical Error     |
| c) Both Logical and Syntax Error | d) None of the above |

- 9) Translator for low level programming language were termed as\_\_\_\_\_.
  - a) Assembler
  - b) Compiler
  - c) Linker
  - d) Loader
- 10) The designer expresses the ideas in terms related to the\_\_\_\_\_.
  - a) application domain
  - b) execution domain
  - c) all of the above
  - d) none of the above
- 11) The semantic gap has many consequences like \_\_\_\_\_.
  - a) large development time
  - b) large development efforts
  - c) poor quality of software
  - d) all of the above
- 12) Program generation activities and program execution activities are the processing activities that come under\_\_\_\_\_.
  - a) Processing activities
  - b) Language processing activities
  - c) All of the above
  - d) None of the above
- 13) Which of the following might be used to convert high-level language instructions into machine language?
  - a) System software
  - b) Applications software
  - c) An operating environment
  - d) An interpreter
- 14) Indicate which of the following is not true about an interpreter?
  - a) Interpreter generates an object program from the source program
  - b) Interpreter is a kind of translator
  - c) Interpreter analyses each source statement every time it is to be executed
  - d) All of the above

**T. Y. (B.Tech.) (Sem - I) (Old) (CBCS) Examination: Oct/Nov-2022**  
**COMPUTER SCIENCE & ENGINEERING**  
**System Programming**

Day & Date: Saturday, 25-01-2023  
Time: 10:00 AM To 01:00 PM

Max. Marks: 56

**Instructions:** 1) All Questions are compulsory.  
2) Figures to the right indicate full marks.

**Section – I**

**Q.2 Attempt any Four.** **16**

- a) Describe front end & back end of toy compiler with the help of examples.
- b) What is IR? Prepare an IR by making front end analysis of following program  
P : integer;  
Q, R: real;  
Q: = R + P;
- c) List and explain types of elements of assembly language programming.
- d) Classify the fundamental language processing activities.
- e) Define and Describe Nested macro call.
- f) Define macro definition, call and expansion in detail with the help of examples.

**Q.3 Attempt any One.** **06**

- a) Define Language processor? List and explain different types of language processor with example.
- b) Write down the tasks performed in the analysis phase and synthesis phase of Assembler.

**Q.4 Attempt the following.** **06**

- a) List major issues in code generation for expression. Explain operand & register Descriptor with example.

**Section – II**

**Q.5 Attempt any Four** **16**

- a) Explain aspects of compilation.
- b) What are triples, quadruples and indirect triples? Explain.
- c) Define linker? And what are binary programs & object modules used in linker?
- d) What is absolute loader? How it differs from relocating loader.
- e) What is Loader? Explain the four basic functions of any loader.
- f) Compare linking address & loading address.

**Q.6 Attempt any one.**

- a)** Compare the direct linking and self relocating loader.
- b)** List & explain the PL features used in implementation of aspects of compilation.

**Q.7 Attempt the following.**

Describe the working of direct linking loader & various data structures used in loader.

Day & Date: Tuesday, 31-01-2023  
Time: 10:00 AM To 01:00 PM

**Instructions:** 1) Q. No. 1 is compulsory and should be solved in first 30 minutes in Answer Book. Page No.3 (starting page of the Answer Book). Each question carry one mark.  
2) Don't forget to mention Question Paper Set (P/Q/R/S) at the top of the same page.

Marks: 14

14

- Page 1 of 16

- 8) What is the reusable resource?
- a) that can be used by one process at a time and is not depleted that use
  - b) that can be used by more than one process at a time
  - c) that can be shared between various threads
  - d) none of the mentioned
- 9) Which one of the following is the deadlock avoidance algorithm?
- a) banker's algorithm
  - b) round-robin algorithm
  - c) elevator algorithm
  - d) kern's algorithm
- 10) CPI fetches the instruction from memory according to the value of
- a) program counter
  - b) status register
  - c) instruction register
  - d) program status word
- 11) Which one of the following is the address generated by CPU?
- a) physical address
  - b) absolute address
  - c) logical address
  - d) none of the mentioned
- 12) \_\_\_\_\_ is the concept in which a process is copied into main memory from the secondary memory according to the requirement.
- a) Paging
  - b) Demand paging
  - c) Segmentation
  - d) Swapping
- 13) In FIFO page replacement algorithm, when a page must be replaced \_\_\_\_\_.
- a) oldest page is chosen
  - b) newest page is chosen
  - c) random page is chosen
  - d) none of the mentioned
- 14) A \_\_\_\_\_ is a set of wires and a rigidly defined protocol that specifies a set of messages that can be sent on the wires.
- a) port
  - b) node
  - c) bus
  - d) none of the mentioned

Day & Date: Tuesday, 31-01-2023  
 Time: 10:00 AM To 01:00 PM

Max. Marks: 56

**Instructions:** 1) Section I and Section II are compulsory.  
 2) Figures to the right indicate full marks.

**Section – I**

**Q.2 Solve any three of the following questions. 12**

- What is the major problem in Priority Scheduling? And how to solve it?
- What is a semaphore? Explain its operations.
- What is a process? Explain its state transition diagram.
- Explain Time-Sharing operating systems.
- Describe critical section problem. State the solution to CS problem.

**Q.3 Solve any two of the following questions. 16**

- Consider the following set of processes with arrival time and burst time in milliseconds as given below.

| P No. | AT | BT |
|-------|----|----|
| 1     | 0  | 7  |
| 2     | 1  | 5  |
| 3     | 2  | 3  |
| 4     | 3  | 1  |
| 5     | 4  | 2  |
| 6     | 5  | 1  |

- Draw Gantt chart that illustrate execution of processes in Pre-emptive SJF manner.
  - Calculate average waiting time for Pre-emptive SJF scheduling algorithm.
  - Calculate average Turnaround time for Pre-emptive SJF scheduling algorithm.
- What is process Scheduler? Describe long-term, short-term, and medium-term scheduler in detail.
  - Explain Monitor in detail.

**Section – II**

**Q.4 Solve any three of the following questions. 12**

- Explain deadlock prevention in detail
- Explain FIFO page replacement policy with example.
- Explain Swapping with the help of diagram.
- Write note on deadlock characterization.
- Write short note on application I/O interface.

**Q.6 Solve any two of the following questions.**

- a)** Write and explain Banker's algorithm for deadlock avoidance with the help of example.
- b)** Explain Paging in detail.
- c)** What is virtual memory? Explain demand paging in detail.

**MCQ/Objective Type Questions**

Duration: 30 Minutes

Marks: 14

**Q.1 Choose the correct alternatives from the options. 14**

- 1) The TestAndSet instruction is executed:
  - a) after a particular process
  - b) periodically
  - c) atomically
  - d) none of these
- 2) Round robin scheduling falls under the category of:
  - a) Non preemptive scheduling
  - b) Preemptive scheduling
  - c) None of these
  - d) Both (a) and (b)
- 3) What is the reusable resource?
  - a) that can be used by one process at a time and is not depleted that use
  - b) that can be used by more than one process at a time
  - c) that can be shared between various threads
  - d) none of the mentioned
- 4) Which one of the following is the deadlock avoidance algorithm?
  - a) banker's algorithm
  - b) round-robin algorithm
  - c) elevator algorithm
  - d) kern's algorithm
- 5) CPI fetches the instruction from memory according to the value of
  - a) program counter

**T.Y (B.Tech.) (Sem-I) (Old) (CBCS) Examination: Oct/Nov-2022**  
**COMPUTER SCIENCE & ENGINEERING**  
**Software Engineering**

Day & Date: Friday, 24-02-2023  
Time: 10:00 AM To 01:00 PM

Max. Marks: 56

**Instructions:** 1) All questions are compulsory.  
2) Figures to the right indicate full marks.

**Section – I**

**Q.2 Answer any three questions. 12**

- a) What are the different characteristics of a software process?
- b) What are the different components of SRS?
- c) Describe waterfall model of software development in detail.
- d) How design principles used in function and object-oriented design.
- e) What is cohesion? Describe all types of cohesion used in design.

**Q.3 Answer any two questions. 16**

- a) What is SRS? Explain different need and characteristics of SRS.
- b) Describe Spiral model of software development in detail.
- c) Explain design principles used in function and object-oriented design.

**Section – II**

**Q.4 Answer any three questions. 12**

- a) Describe about quality concept in software project.
- b) What is process capability baseline in project planning?
- c) Describe black box testing in detail.
- d) Explain Capability Maturity Model (CMM) in detail.
- e) Describe new management responsibilities in agile project management.

**Q.5 Answer any two questions. 16**

- a) How effort estimation and scheduling is applied in software project?
- b) Describe Adaptive project management life cycle in detail.
- c) Describe white box testing in detail.

 3) Figures to the right indicates full marks.

**MCQ/Objective Type Questions**

Duration: 30 Minutes

Marks: 14

**Q.1 Choose the correct alternatives from the options.**

**14**

- 1) A view of database that appears to an application program is known as:
  - a) Schema
  - b) Subschema
  - c) Virtual table
  - d) None of the above
- 2) An abstraction concept for building composite object from their component is called:
  - a) Specialization
  - b) Normalization
  - c) Generalization
  - d) Aggregation
- 3) Let  $R = (A, B, C, D)$  and  $F = \{A \rightarrow B, A \rightarrow C, BC \rightarrow D\}$  then  $A \rightarrow D$  is in  $F^+$ . Then which of following is correct?
  - a)  $A \rightarrow D$  in  $F^+$  is always true
  - b)  $A \rightarrow D$  is in  $F^+$  but for that  $D \rightarrow A$  must be satisfied
  - c)  $A \rightarrow D$  is not in  $F^+$
  - d) None of these
- 4) The output of Data Definition Language (DDL) is stored in
  - a) Relation
  - b) Cache
  - c) Data dictionary
  - d) E-R diagram
- 5) Rename is binary operation
  - a) True
  - b) False
- 6) We say that a relation schema  $R$  is in first normal form (1 NF) if \_\_\_\_\_.
  - a) The domains of all attributes of  $R$  are atomic
  - b) The relation schema do not allow NULL values
  - c) The relation schema do not allow NULL attributes
  - d) The relation schema has a foreign key
- 7) In SQL, which command is used to remove rows from a table?
  - a) DELETE
  - b) REMOVE
  - c) TRUNCATE
  - d) Both a and c

- 8) \_\_\_\_\_ index has an index entry search key value in the data file.
- a) Sparse
  - b) Dense
  - c) Both a and b
  - d) None
- 9) Consider two statements for two-phase locking protocol
- S1: In growing phase a transaction may obtain locks
- S2: In growing phase a transaction may not release any lock
- a) Both S1 and S2 are true
  - b) Only S1 is true
  - c) Only S2 is true
  - d) Both S1 and S2 are false
- 10) Which of the log is not in transaction state?
- a) Start
  - b) Write
  - c) Rollback
  - d) Commit
- 11) Check-point are used for
- a) Transaction recovery
  - b) Transaction concurrency control
  - c) Designing serializable schedule
  - d) Designing optimized query
- 12) For the B+ tree, following is true
- a) Each no-leaf node has between  $\lceil n/2 \rceil$  to  $n^2$  children
  - b) Each no-leaf node has between  $\lceil n/2 \rceil$  to  $\lceil n/4 \rceil$  children
  - c) Each no-leaf node has between  $\lceil n/2 \rceil$  to  $n$  children
  - d) Each no-leaf node has same number of children
- 13) Which of the following scenarios lead to an non-recoverable schedule?
- a) A transaction writes a data item after it is read by an uncommitted transaction
  - b) A transaction reads a data item after it is read by an uncommitted transaction
  - c) A transaction reads a data item after it is written by an committed transaction
  - d) A transaction reads a data item after it is written by an uncommitted transaction
- 14) In a two-phase locking protocol, a transaction \_\_\_\_\_downgrade a write lock to a read lock.
- a) Cannot, in the growing phase only
  - b) Can under all circumstances
  - c) Can in the shrinking phase only
  - d) Cannot in the shrinking phase only

Day & Date: Tuesday, 07-02-2023  
 Time: 10:00 AM To 01:00 PM

Max. Marks: 70

- Instructions:** 1) Q. No. 1 is compulsory and should be solved in first 30 minutes in Answer Book. Page No.3 (starting page of the Answer Book). Each question carry one mark.  
 2) Don't forget to mention Question Paper Set (P/Q/R/S) at the top of the same page.  
 3) Figures to the right indicates full marks.

**MCQ/Objective Type Questions**

Duration: 30 Minutes

Marks: 14

**Q.1 Choose the correct alternatives from the options.**

**14**

- 1) Check-point are used for
  - a) Transaction recovery
  - b) Transaction concurrency control
  - c) Designing serializable schedule
  - d) Designing optimized query
- 2) For the B+ tree, following is true
  - a) Each no-leaf node has between  $\lceil n/2 \rceil$  to  $n^2$  children
  - b) Each no-leaf node has between  $\lceil n/2 \rceil$  to  $\lceil n/4 \rceil$  children
  - c) Each no-leaf node has between  $\lceil n/2 \rceil$  to  $n$  children
  - d) Each no-leaf node has same number of children
- 3) Which of the following scenarios lead to an non-recoverable schedule?
  - a) A transaction writes a data item after it is read by an uncommitted transaction
  - b) A transaction reads a data item after it is read by an uncommitted transaction
  - c) A transaction reads a data item after it is written by an committed transaction
  - d) A transaction reads a data item after it is written by an uncommitted transaction
- 4) In a two-phase locking protocol, a transaction \_\_\_\_\_downgrade a write lock to a read lock.
  - a) Cannot, in the growing phase only
  - b) Can under all circumstances
  - c) Can in the shrinking phase only
  - d) Cannot in the shrinking phase only
- 5) A view of database that appears to an application program is known as:
  - a) Schema
  - b) Subschema
  - c) Virtual table
  - d) None of the above

- 6) An abstraction concept for building composite object from their component is called:
- a) Specialization
  - b) Normalization
  - c) Generalization
  - d) Aggregation
- 7) Let  $R = (A, B, C, D)$  and  $F = \{A \rightarrow B, A \rightarrow C, BC \rightarrow D\}$  then  $A \rightarrow D$  is in  $F^+$ . Then which of following is correct?
- a)  $A \rightarrow D$  in  $F^+$  is always true
  - b)  $A \rightarrow D$  is in  $F^+$  but for that  $D \rightarrow A$  must be satisfied
  - c)  $A \rightarrow D$  is not in  $F^+$
  - d) None of these
- 8) The output of Data Definition Language (DDL) is stored in
- a) Relation
  - b) Cache
  - c) Data dictionary
  - d) E-R diagram
- 9) Rename is binary operation
- a) True
  - b) False
- 10) We say that a relation schema  $R$  is in first normal form (1 NF) if \_\_\_\_\_
- a) The domains of all attributes of  $R$  are atomic
  - b) The relation schema do not allow NULL values
  - c) The relation schema do not allow NULL attributes
  - d) The relation schema has a foreign key
- 11) In SQL, which command is used to remove rows from a table?
- a) DELETE
  - b) REMOVE
  - c) TRUNCATE
  - d) Both a and c
- 12) \_\_\_\_\_ index has an index entry search key value in the data file.
- a) Sparse
  - b) Dense
  - c) Both a and b
  - d) None
- 13) Consider two statements for two-phase locking protocol
- S1: In growing phase a transaction may obtain locks
- S2: In growing phase a transaction may not release any lock
- a) Both S1 and S2 are true
  - b) Only S1 is true
  - c) Only S2 is true
  - d) Both S1 and S2 are false
- 14) Which of the log is not in transaction state?
- a) Start
  - b) Write
  - c) Rollback
  - d) Commit

**T.Y. (B. Tech) (Sem-I) (Old) (CBCS) Examination: Oct/Nov-2022**  
**COMPUTER SCIENCE & ENGINEERING**  
**\$ Database Engineering**

Day &amp; Date: Tuesday, 07-02-2023

Max. Marks: 56

Time: 10:00 AM To 01:00 PM

**Instructions:** 1) All questions are compulsory.  
 2) Figures to the right indicates full marks.

**Section – I**

**Q.2 Attempt any three from the following. 12**

- Explain with example various attributes types in ER model.
- Explain with example Generalization and Specialization.
- Explain with example dependency preservation.
- Explain with example Third Normal Form (3NF).
- Explain cardinality constraints and participating constraints.

**Q.3 Attempt any two from the following. 16**

- What is functional dependency? Explain the way to find closure of a set of functional dependency.
- Explain fundamental relational algebra operations with examples.
- List and explain drawbacks of file processing system.

**Section – II**

**Q.4 Attempt any three from the following. 12**

- Explain transaction model with example.
- Explain the concept of shadow paging.
- Explain deferred database modifications with example.
- Explain Dense and Sparse Indexing with suitable diagram.
- Give difference between Ordered indices and Hashing with one example. Which is better to use.

**Q.5 Attempt any two from the following. 16**

- Explain two-phase protocol in detail.
- List the ACID properties and explain each property in detail with a suitable example.
- Explain in detail the concept of check points in recovery systems.

**MCQ/Objective Type Questions**

Duration: 30 Minutes

Marks: 70

**Q.1 Choose the correct alternatives from the given options.**

**14**

- 1) Time Complexity is \_\_\_\_\_
  - a) Space required by program
  - b) Amount of machine time necessary for running program
  - c) Time required for programmer to code
  - d) All of above
- 2) Algorithm A is said to be \_\_\_\_\_ recursive if it call another algorithm which in turn calls A.
 

a) Indirect	b) Direct
c) Pointed	d) Related
- 3) \_\_\_\_\_ method is used for solving recurrence relation.
 

a) Division	b) Substitution
c) Replacement	d) None of these
- 4) For merging two sorted listed list of sizes m and n into sorted list of size m + n, we require comparison of \_\_\_\_\_.
 

a) $O(m + n)$	b) $O(m)$
c) $O(n)$	d) $O(\log m + \log n)$
- 5) Which of the following sorting algorithms has the lowest worst-case complexity?
 

a) Merge sort	b) Bubble sort
c) Quick sort	d) Selection sort
- 6) Job sequencing with deadlines is an example of \_\_\_\_\_ greedy method.
 

a) subset paradigm	b) ordering paradigm
c) both a) and c)	d) none of the above
- 7) In an optimal storage on tape problem if  $(\lambda_1, \lambda_2, \lambda_3) = (5, 10, 3)$  then the optimal ordering of program is
 

a) 1, 2, 3	b) 3, 1, 2
c) 2, 3, 1	d) 1, 3, 2
- 8) Which algorithm design technique is the most efficient one for solving the problem of real knapsack?
 

a) Enumerating strategy	b) Divide and conquer
c) Greedy strategy	d) Backtracking

- 9) Which one of the following algorithm design techniques is used in finding all pairs of shortest distance in Graph?
- a) Dynamic programming
  - b) Backtracking
  - c) Greedy method
  - d) Divide and conquer
- 10) \_\_\_\_\_ is a generated node which is too expanded further or all of whose children have been generated.
- a) Live node
  - b) E-node
  - c) Dead ode
  - d) Root Node
- 11) The smallest number of colors needed to color a graph G is called its \_\_\_\_
- a) Face number
  - b) Chromatic number
  - c) Edges number
  - d) Vertex number
- 12) If a problem Q is known to be NP-hard, then which of the following is true?
- a) If Q is in NP then Q is NP-complete
  - b) Q is not NP-complete
  - c) Q is not in NP
  - d) Not all problem is NP can be reduce to Q
- 13) A problem is NP-Complete if the problem is \_\_\_\_\_
- a) NP-Hard
  - b) P only
  - c) P Hard and in NP
  - d) NP Hard but not in NP
- 14) Which of the following statements are true?
- 1) The problem of determining whether there exists a cycle in an undirected graph is in P
  - 2) The problem of determining whether there exists a cycle in an undirected graph is in NP
  - 3) If a problem A is NP-complete, there exists a non-deterministic polynomial time algorithm to solve A
- a) 1, 2 and 3
  - b) 1 and 3
  - c) 2 only
  - d) 3 only

Seat  
No.

**T.Y. (B. Tech) (Sem-I) (Old) (CBCS) Examination: Oct/Nov-2022**

Day & Date: Thursday, 09-02-2023  
 Time: 10:00 AM To 01:00 PM

Max. Marks: 56

**Instructions:** 1) All questions are compulsory.  
 2) Figures to the right indicate full marks.

**SECTION – I****Q.2 Solve any four questions.****20**

- Define space and time complexity with suitable example.
- State and prove time complexity of Merge sort.
- Explain Binary Search with suitable example.
- Using Greedy approach find maximum profit earned for the given Knapsack problem.

Profit = (12,10,8,11,14,7,9)

Weight = (4,6,5,7,3,1,6)

M=18

e)	Symbol	Frequency
	A	70 Million
	B	3 Million
	C	20 Million
	D	37 Million

Find decode tree and code for particular symbol.

**Q.3 Solve any One.****08**

- Sort following elements using Quick sort (Show each iteration).  
65, 70, 75, 80, 85, 60, 55, 50, 45
- Find the minimum cost spanning tree using Prims and Kruskals algorithm.  
(show each iteration)

## SECTION – II

20

## Q.4 Attempt any Four.

- Write a note on – Reliability design.
- Solve 0/1 Knapsack problem using Dynamic Programming  
 $N = 3$ ,  $m = 6$  profit =  $\{1, 2, 5\}$  and weight =  $\{2, 3, 4\}$
- Draw portion of solution space tree for 4- Queen problem using backtracking.
- Explain Hamilton cycle.
- Define P, NP, NP-hard problem.
- Find all pair shortest path using dynamic programming for following diagram

## Q.5 Attempt any One.

08

- Find the minimum cost from s to t in multistage graph using backward approach.

- Consider following directed graph and edge lengths are given by matrix. Find optimal tour travelling sales person.

**SECTION – II****Q.4 Attempt any Four.****20**

- Write a note on – Reliability design.
- Solve 0/1 Knapsack problem using Dynamic Programming  
 $N = 3$ ,  $m = 6$  profit = {1, 2, 5} and weight = {2, 3, 4}
- Draw portion of solution space tree for 4- Queen problem using backtracking.
- Explain Hamilton cycle.
- Define P, NP, NP-hard problem.
- Find all pair shortest path using dynamic programming for following diagram

**Q.5 Attempt any One.****08**

- Find the minimum cost from s to t in multistage graph using backward approach.

- Consider following directed graph and edge lengths are given by matrix. Find optimal tour travelling sales person.

**T.Y. (B. Tech) (Sem-I) (Old) (CBCS) Examination: Oct/Nov-2022**  
**COMPUTER SCIENCE & ENGINEERING**  
**Design and Analysis of Algorithm**

Day & Date: Thursday, 09-02-2023  
 Time: 10:00 AM To 01:00 PM

Max. Marks: 70

- Instructions:** 1) Q. No. 1 is compulsory. It should be solved in the first 30 minutes in answer book. Page no 03 (Starting page of the Answer Book). Each question carries one mark.  
 2) Don't forget to Mention question paper set (P/Q/R/S) on top of page.  
 3) Figures to the right indicates full marks.

**MCQ/Objective Type Questions**

Duration: 30 Minutes

Marks: 70

**Q.1 Choose the correct alternatives from the given options.**

**14**

- 1) Job sequencing with deadlines is an example of \_\_\_\_\_ greedy method.
  - a) subset paradigm
  - b) ordering paradigm
  - c) both a) and c)
  - d) none of the above
- 2) In an optimal storage on tape problem if  $(\lambda_1, \lambda_2, \lambda_3) = (5, 10, 3)$  then the optimal ordering of program is
  - a) 1, 2, 3
  - b) 3, 1, 2
  - c) 2, 3, 1
  - d) 1, 3, 2
- 3) Which algorithm design technique is the most efficient one for solving the problem of real knapsack?
  - a) Enumerating strategy
  - b) Divide and conquer
  - c) Greedy strategy
  - d) Backtracking
- 4) Which one of the following algorithm design techniques is used in finding all pairs of shortest distance in Graph?
  - a) Dynamic programming
  - b) Backtracking
  - c) Greedy method
  - d) Divide and conquer
- 5) \_\_\_\_\_ is a generated node which is too expanded further or all of whose children have been generated.
  - a) Live node
  - b) E-node
  - c) Dead node
  - d) Root Node
- 6) The smallest number of colors needed to color a graph G is called its \_\_\_\_
  - a) Face number
  - b) Chromatic number
  - c) Edges number
  - d) Vertex number
- 7) If a problem Q is known to be NP-hard, then which of the following is true?
  - a) If Q is in NP then Q is NP-complete
  - b) Q is not NP-complete
  - c) Q is not in NP
  - d) Not all problem in NP can be reduce to Q
- 8) A problem is NP-Complete if the problem is \_\_\_\_
  - a) NP-Hard
  - b) P only
  - c) P Hard and in NP
  - d) NP Hard but not in NP

- 9) Which of the following statements are true?
  - 1) The problem of determining whether there exists a cycle in an undirected graph is in P
  - 2) The problem of determining whether there exists a cycle in an undirected graph is in NP
  - 3) If a problem A is NP-complete, there exists a non-deterministic polynomial time algorithm to solve A
  - a) 1, 2 and 3
  - b) 1 and 3
  - c) 2 only
  - d) 3 only
- 10) Time Complexity is \_\_\_\_\_
  - a) Space required by program
  - b) Amount of machine time necessary for running program
  - c) Time required for programmer to code
  - d) All of above
- 11) Algorithm A is said to be \_\_\_\_\_ recursive if it call another algorithm which in turn calls A.
  - a) Indirect
  - b) Direct
  - c) Pointed
  - d) Related
- 12) \_\_\_\_\_ method is used for solving recurrence relation.
  - a) Division
  - b) Substitution
  - c) Replacement
  - d) None of these
- 13) For merging two sorted listed list of sizes m and n into sorted list of size m + n, we require comparison of \_\_\_\_\_.
  - a)  $O(m + n)$
  - b)  $O(m)$
  - c)  $O(n)$
  - d)  $O(\log m + \log n)$
- 14) Which of the following sorting algorithms has the lowest worst-case complexity?
  - a) Merge sort
  - b) Bubble sort
  - c) Quick sort
  - d) Selection sort

Seat  
No.

**T.Y. (B. Tech) (Sem-I) (Old) (CBCS) Examination: Oct/Nov-2022**  
**COMPUTER SCIENCE & ENGINEERING**  
**Design and Analysis of Algorithm**

Day & Date: Thursday, 09-02-2023  
 Time: 10:00 AM To 01:00 PM

Max. Marks: 56

**Instructions:** 1) All questions are compulsory.  
 2) Figures to the right indicate full marks.

**SECTION – I****Q.2 Solve any four questions.****20**

- Define space and time complexity with suitable example.
- State and prove time complexity of Merge sort.
- Explain Binary Search with suitable example.
- Using Greedy approach find maximum profit earned for the given Knapsack problem.

Profit = (12,10,8,11,14,7,9)

Weight = (4,6,5,7,3,1,6)

M=18

e)	Symbol	Frequency
	A	70 Million
	B	3 Million
	C	20 Million
	D	37 Million

Find decode tree and code for particular symbol.

**Q.3 Solve any One.****08**

- Sort following elements using Quick sort (Show each iteration).  
 65, 70, 75, 80, 85, 60, 55, 50, 45
- Find the minimum cost spanning tree using Prims and Kruskals algorithm.  
 (show each iteration)

## SECTION – II

20

## Q.4 Attempt any Four.

- Write a note on – Reliability design.
- Solve 0/1 Knapsack problem using Dynamic Programming  
 $N = 3$ ,  $m = 6$  profit = {1, 2, 5} and weight = {2, 3, 4}
- Draw portion of solution space tree for 4- Queen problem using backtracking.
- Explain Hamilton cycle.
- Define P, NP, NP-hard problem.
- Find all pair shortest path using dynamic programming for following diagram

## Q.5 Attempt any One.

08

- Find the minimum cost from s to t in multistage graph using backward approach.

- Consider following directed graph and edge lengths are given by matrix. Find optimal tour travelling sales person.

0	10	15	20
5	0	9	10

Day & Date: Monday, 20-02-2023  
 Time: 10:00 AM To 12:00 PM

Max. Marks: 50

- Instructions:** 1) Q. No. 1 is compulsory. It should be solved in the first 20 minutes in answer book. Page no 03 (Starting page of the Answer Book). Each question carries one mark.  
 2) Don't forget to Mention question paper set (P/Q/R/S) on top of page.  
 3) Figures to the right indicates full marks

**MCQ/Objective Type Questions**

Duration: 20 Minutes

Marks:10

**Q.1 Choose the correct alternatives from the given options. 10**

- 1) Microeconomic theory deals with \_\_\_\_\_.
  - a) Economic behavior of individual economic decision-making units
  - b) Economy as whole
  - c) Trade relations
  - d) Economic growth of the society
- 2) In a mixed economy which sector (s) is / are found \_\_\_\_\_.
  - a) Private only
  - b) Public only
  - c) None
  - d) Both (a) public and (b) private
- 3) Who is known as father of economics?
  - a) Adam Smith
  - b) Prof. A. Samuelson
  - c) Alfred Marshall
  - d) J. R. Hicks
- 4) Which of these is an economic activity?
  - a) Father teaching his son at home instead of spending on coaching
  - b) A housewife making food for the family on her own
  - c) A hair dresser doing hair cut designing on payment
  - d) A singer giving a show on his son's wedding anniversary
- 5) Market system means: \_\_\_\_\_.
  - a) Socialism
  - b) Capitalism
  - c) A place where goods are traded
  - d) All of the above
- 6) Micro and Macro are not two independent approaches to economic analysis but they are complementary to each other.
  - a) False
  - b) True
  - c) Partly true
  - d) Partly False
- 7) Variable factor means those factors of production \_\_\_\_\_.
  - a) which can be only changed in the long run
  - b) which can be changed in the short run
  - c) which can be never be changed
  - d) All of the above

- 8)** Which one of the following is not the function of money?
- a) Medium of exchange
  - b) Measure of Happiness
  - c) Standard of deferred payment
  - d) Store of value
- 9)** Which one of the following is the objective of the RBI?
- a) To maintain term deposits of the households
  - b) To ensure price stability
  - c) To arrange loans for the businessmen
  - d) None of the above
- 10)** Which one of the following cost can never become zero?
- |                  |                  |
|------------------|------------------|
| a) Average cost  | b) Fixed cost    |

**MCQ/Objective Type Questions**

Duration: 20 Minutes

Marks:10

**Q.1 Choose the correct alternatives from the given options.**

**10**

- 1) Which is not a type of intellectual property?
  - a) Trade secrets
  - b) Trademarks
  - c) Home loans
  - d) Copyrights
- 2) In which article is intellectual property rights outlined?
  - a) Article 15
  - b) Article 27
  - c) Article 13
  - d) Article 20
- 3) How long does intellectual property last? (after the death of the author)
  - a) 10 yrs
  - b) 30 yrs
  - c) 60 yrs
  - d) 70 yrs
- 4) Which of the following can you copyright?
  - a) Literary work
  - b) Ideas
  - c) Choreographic work
  - d) Fashion
- 5) Which of the following identifies as a trademark?
  - a) Name, symbol
  - b) Symbol, logo
  - c) Logo, name
  - d) Name, symbol, logo
- 6) What is the subject matter of a patent?
  - a) Art
  - b) Invention
  - c) Goods
  - d) Ideas
- 7) What is copyright meant for?
  - a) Film work
  - b) Books
  - c) Essay
  - d) All of these
- 8) Intellectual Property Rights (IPR) protect the use of information and ideas that are of \_\_\_\_\_.
  - a) Ethical value
  - b) Moral value
  - c) Social value
  - d) Commercial value
- 9) The first Patent Law was enacted in India in the year \_\_\_\_\_.
  - a) 1856
  - b) 1880
  - c) 1905
  - d) 1850

- 10)** All of the following are examples of intellectual property protections except \_\_\_\_.
- a) Copyright
  - b) Patents

Day & Date: Monday, 20-02-2023  
 Time: 10:00 AM To 12:00 PM

Max. Marks: 50

- Instructions:** 1) Q. No. 1 is compulsory. It should be solved in the first 20 minutes in answer book. Page no 03 (Starting page of the Answer Book). Each question carries one mark.  
 2) Don't forget to Mention question paper set (P/Q/R/S) on top of page.  
 3) Figures to the right indicates full marks.

**MCQ/Objective Type Questions**

Duration: 20 Minutes

Marks: 10

**Q.1 Choose the correct alternatives from the options.**

**10**

- 1) A good way to prevent stress is \_\_\_\_\_.  
 a) Drinking beverages high in caffeine  
 b) Sitting ideal doing nothing  
 c) Overeating  
 d) Taking time out for relaxation
- 2) \_\_\_\_\_ is referred as a stressful event.  
 a) Birthday  
 b) Studying  
 c) Spouse death  
 d) Vacation
- 3) Anxiety can cause the following moods \_\_\_\_\_.  
 a) Irritable  
 b) Nervous  
 c) Anxious  
 d) All of the above
- 4) \_\_\_\_\_ is the confusion about the expectation of the role one occupies.  
 a) Role stagnation  
 b) Role Isolation  
 c) Role erosion  
 d) Role ambiguity
- 5) Stress is \_\_\_\_\_ related to performance.  
 a) Positively  
 b) Negatively  
 c) Proportionately  
 d) None of these
- 6) Which one is not considered as Environmental stressors?  
 a) Weather  
 b) Traffic  
 c) Financial problems  
 d) Substandard housing
- 7) The following are the characteristics of Positive Stress.  
 a) It improves performance  
 b) It feels exciting  
 c) It motivates  
 d) All of the above
- 8) The word Stress is derived from Latin word 'Stringere' which means \_\_\_\_\_.  
 a) Draw tight  
 b) Stimulus  
 c) Force  
 d) Attitude
- 9) Absenteeism, turnover and less productivity are \_\_\_\_\_ symptoms of stress.  
 a) Medical  
 b) Psychological  
 c) Behavioral  
 d) None of these

- 10)** When a task appears overwhelming, it is best to \_\_\_\_.
- a) Put it aside till later
  - b) Drink alcohol to relax
  - c) Break it down into smaller task
  - d) Avoid the task

 2) Don't forget to mention Question Paper Set (P/Q/R/S) at the top of the same page.

**MCQ/Objective Type Questions**

Duration: 30 Minutes

Marks: 14

**Q.1 Multiple choice questions**

**14**

- 1) A compiler for a high-level language that runs on one machine and produce code for different machine is called \_\_\_\_\_.  
 a) Optimizing compiler                      b) One pass compiler  
 c) Cross compiler                              d) Multipass compiler
- 2) Task of the lexical analysis is \_\_\_\_\_.  
 a) To scan the source program and generate the basic elements or tokens of the language  
 b) To support macro call  
 c) To report errors in source program  
 d) All of these
- 3) In operator precedence parsing, precedence relations are defined \_\_\_\_\_.  
 a) For all pair of non-terminals              b) For all pair of terminals  
 c) To delimit the handle                      d) All of these
- 4) Which concept of grammar is used in the compiler?  
 a) Parser    b) Lexical analysis  
 c) Code generation                              d) Code optimization
- 5) Synthesized attribute can be easily simulated by a \_\_\_\_\_.  
 a) LL grammar                                      b) LR grammar  
 c) Ambiguous grammar                        d) Operator grammar
- 6) Which of the following is not a feature of compiler?  
 a) Scan the entire program first and translate into machine code  
 b) To remove syntax errors  
 c) Slow for debugging  
 d) Execution time is more
- 7) A programmer by mistakes writes a program to multiply two numbers instead of dividing them, how can this error be detected?  
 a) Compiler    b) Interpreter  
 c) Compiler or interpreter                      d) None of the mentioned

- 8) Running time of a program depends on \_\_\_\_\_.  
a) Addressing mode                      b) Order of computations  
c) The usage of machine idioms      d) All of the mentioned
- 9) Peep Hole optimization is \_\_\_\_\_.  
a) Loop Optimization                      b) Local Optimization  
c) Constant folding                      d) Data Flow analysis
- 10) The graph that shows basic blocks and their successor relationship is called \_\_\_\_\_.  
a) Dag    b) Flow Graph  
c) Control Graph                          d) Hamilton Graph
- 11) The specific task storage manager performs \_\_\_\_\_.  
a) Allocation/ deal location of programs  
b) Protection of storage area assigned to the program  
c) Allocation/ deal location of programs & protection of storage area assigned to the program  
d) None of the mentioned
- 12) An intermediate code form is \_\_\_\_\_.  
a) Postfix notation                      b) Syntax trees  
c) Three address code                      d) All of these
- 13) Reduction in strength means \_\_\_\_\_.  
a) Replacing run time computation by compile time computation  
b) Removing loop invariant computation  
c) Removing common sub expression  
d) Replacing a costly operation by a relatively cheaper one
- 14) The optimization which avoids test at every iteration is \_\_\_\_\_.  
a) Loop jamming                              b) Loop unrolling  
c) Constant folding                              d) All of these

**Compiler Construction**

Day & Date: Tuesday, 14-02-2023  
 Time: 10:00 AM To 01:00 PM

Max. Marks: 56

**Instructions:** 1) All questions are compulsory.  
 2) Figures to the right indicate full marks.

**Section – I**

**Q.2 Attempt any three of the following questions. 12**

- a) Explain the terms with example:
  - i) Tokens
  - ii) Lexeme
- b) What are compiler construction tools? Explain.
- c) Explain types of derivation with example.
- d) Explain L attributed definition of SDD with example.

**Q.3 Attempt any one of the following questions. 08**

- a) Explain SLR parser in detail with example.
- b) What is input buffering? Explain in detail with double buffer and sentinel concept.

**Q.4 Attempt any one of the following questions. 08**

- a) Explain bottom up evaluation of S- attributed definition with example.
- b) Explain process of compilation with various phases in detail.

**Section – II**

**Q.5 Attempt any three of the following questions. 12**

- a) Explain Activation record with its fields.
- b) Explain the terms with example:
  - i) Triple
  - ii) Quadruple
- c) What is DAG? Explain with example
- d) Explain common sub expression elimination.

**Q.6 Attempt any one of the following questions. 08**

- a) Write an algorithm for partitioning into basic blocks by considering following program code.  

```

prod = 0;

i = 1;
do
{
  prod=prod+a[i]*b[i];
  i=i+1;
}while(i<=10);

```

- b)** Explain translation of switch-case statement in 3 address code.

**Q.7 Attempt any one of the following questions.**

**08**

- a)** Explain storage allocation strategies in detail.
- b)** What is optimization? Explain peephole optimization techniques in detail.

Q
---

**T. Y. (B.Tech.) (Sem – II) (New) (CBCS) Examination: Oct/Nov-2022**  
**COMPUTER SCIENCE AND ENGINEERING**  
**Compiler Construction**

Day & Date: Tuesday, 14-02-2023  
 Time: 10:00 AM To 01:00 PM

Max. Marks: 70

- Instructions:** 1) Q. No. 1 is compulsory and should be solved in first 30 minutes in Answer Book. Page No.3 (starting page of the Answer Book). Each question carry one mark.  
 2) Don't forget to mention Question Paper Set (P/Q/R/S) at the top of the same page.

**MCQ/Objective Type Questions**

Duration: 30 Minutes

Marks: 14

**Q.1 Multiple choice questions**

**14**

- 1) Running time of a program depends on \_\_\_\_\_.  
 a) Addressing mode                      b) Order of computations  
 c) The usage of machine idioms      d) All of the mentioned
- 2) Peep Hole optimization is \_\_\_\_\_.  
 a) Loop Optimization                      b) Local Optimization  
 c) Constant folding                      d) Data Flow analysis
- 3) The graph that shows basic blocks and their successor relationship is called \_\_\_\_\_.  
 a) Dag    b) Flow Graph  
 c) Control Graph                          d) Hamilton Graph
- 4) The specific task storage manager performs \_\_\_\_\_.  
 a) Allocation/ deal location of programs  
 b) Protection of storage area assigned to the program  
 c) Allocation/ deal location of programs & protection of storage area assigned to the program  
 d) None of the mentioned
- 5) An intermediate code form is \_\_\_\_\_.  
 a) Postfix notation                      b) Syntax trees  
 c) Three address code                      d) All of these
- 6) Reduction in strength means \_\_\_\_\_.  
 a) Replacing run time computation by compile time computation  
 b) Removing loop invariant computation  
 c) Removing common sub expression  
 d) Replacing a costly operation by a relatively cheaper one
- 7) The optimization which avoids test at every iteration is \_\_\_\_\_.  
 a) Loop jamming                      b) Loop unrolling  
 c) Constant folding                      d) All of these
- 8) A compiler for a high-level language that runs on one machine and produce code for different machine is called \_\_\_\_\_.  
 a) Optimizing compiler                      b) One pass compiler  
 c) Cross compiler                      d) Multipass compiler

- 9) Task of the lexical analysis is \_\_\_\_\_.  
a) To scan the source program and generate the basic elements or tokens of the language  
b) To support macro call  
c) To report errors in source program  
d) All of these
- 10) In operator precedence parsing, precedence relations are defined \_\_\_\_\_.  
a) For all pair of non-terminals      b) For all pair of terminals  
c) To delimit the handle              d) All of these
- 11) Which concept of grammar is used in the compiler?  
a) Parser                                      b) Lexical analysis  
c) Code generation                      d) Code optimization
- 12) Synthesized attribute can be easily simulated by a \_\_\_\_\_.  
a) LL grammar                              b) LR grammar  
c) Ambiguous grammar                  d) Operator grammar
- 13) Which of the following is not a feature of compiler?  
a) Scan the entire program first and translate into machine code  
b) To remove syntax errors  
c) Slow for debugging  
d) Execution time is more
- 14) A programmer by mistakes writes a program to multiply two numbers instead of dividing them, how can this error be detected?  
a) Compiler                                      b) Interpreter  
c) Compiler or interpreter                  d) None of the mentioned

**T. Y. (B.Tech.) (Sem – II) (New) (CBCS) Examination: Oct/Nov-2022**  
**COMPUTER SCIENCE AND ENGINEERING**  
**Compiler Construction**

Day & Date: Tuesday, 14-02-2023  
 Time: 10:00 AM To 01:00 PM

Max. Marks: 56

**Instructions:** 1) All questions are compulsory.  
 2) Figures to the right indicate full marks.

**Section – I**

**Q.2 Attempt any three of the following questions. 12**

- a) Explain the terms with example:
  - i) Tokens
  - ii) Lexeme
- b) What are compiler construction tools? Explain.
- c) Explain types of derivation with example.
- d) Explain L attributed definition of SDD with example.

**Q.3 Attempt any one of the following questions. 08**

- a) Explain SLR parser in detail with example.
- b) What is input buffering? Explain in detail with double buffer and sentinel concept.

**Q.4 Attempt any one of the following questions. 08**

- a) Explain bottom up evaluation of S- attributed definition with example.
- b) Explain process of compilation with various phases in detail.

**Section – II**

**Q.5 Attempt any three of the following questions. 12**

- a) Explain Activation record with its fields.
- b) Explain the terms with example:
  - i) Triple
  - ii) Quadruple
- c) What is DAG? Explain with example
- d) Explain common sub expression elimination.

**Q.6 Attempt any one of the following questions. 08**

- a) Write an algorithm for partitioning into basic blocks by considering following program code.  

```

prod = 0;

i = 1;
do
{
  prod=prod+a[i]*b[i];
  i=i+1;
}while(i<=10);

```

- b)** Explain translation of switch-case statement in 3 address code.

**Q.7 Attempt any one of the following questions.**

**08**

- a)** Explain storage allocation strategies in detail.
- b)** What is optimization? Explain peephole optimization techniques in detail.

**MCQ/Objective Type Questions**

Duration: 30 Minutes

Marks: 14

**Q.1 Choose the correct alternatives from the options.**

**14**

- 1) Kernel maintains the \_\_\_\_\_ of buffers that preserves the least recently used order.
 

a) First list	b) Queue
c) Tree	d) Stack
- 2) \_\_\_\_\_ algorithm is used for conversion of Byte offset to Block number in file system.
 

a) map	b) bmap
c) bread	d) none of these
- 3) \_\_\_\_\_ is used to write error messages to standard error file.
 

a) <	b) >
c) 2>	d) err
- 4) \_\_\_\_\_ algorithm is used for validity fault handler.
 

a) fault	b) vfault
c) bfault	d) mfault
- 5) \_\_\_\_\_ data structure is used for allocation of swap space.
 

a) malloc	b) map
c) region table	d) page table
- 6) The syntax of the system call chown is \_\_\_\_\_.
 

a) chown(pathname,owner)
b) chown(filename,owner)
c) chown(pathname,owner,group)
d) chown(filename,owner,group)
- 7) The state \_\_\_\_\_ is logically the same as ready to run in memory.
 

a) zombie	b) preempted
c) ready to run	d) sleeping
- 8) A \_\_\_\_\_ file type field indicates that disk inode is assigned.
 

a) zero	b) negative value
c) non-zero	d) none of these
- 9) \_\_\_\_\_ process is commonly called init because it is responsible for initializing of new process.
 

a) process 0	b) process1
c) Swapper	d) Superuser

- 10) A process can synchronize its execution with the termination of a child by executing \_\_\_\_\_ system call.
- |         |         |
|---------|---------|
| a) wait | b) exec |
| c) fork | d) exit |
- 11) The system call \_\_\_\_\_ creates special files in the system, including named pipes, device files and directories.
- |          |         |
|----------|---------|
| a) mknod | b) mkfs |
| c) creat | d) pipe |
- 12) Moving between kernel and user mode is called as \_\_\_\_\_.
- |                   |                   |
|-------------------|-------------------|
| a) change in mode | b) context switch |
| c) kernel running | d) none of above  |
- 13) \_\_\_\_\_ has access rights to all files in the system.
- |                 |                |
|-----------------|----------------|
| a) User process | b) User        |
| c) Superuser    | d) Group owner |
- 14) Algorithm used for handling signal is \_\_\_\_\_.
- |             |              |
|-------------|--------------|
| a) psig     | b) issig     |
| c) sigcatch | d) sighandle |

Set **R**

**T.Y. (B. Tech) (Sem - II) (New) (CBCS) Examination: Oct/Nov - 2022**  
**COMPUTER SCIENCE & ENGINEERING**  
**Unix Operating System**

Day & Date: Thursday, 16-02-2023  
 Time: 10:00 AM To 01:00 PM

Max. Marks: 56

**Instructions:** 1) Section I and Section II are compulsory.  
 2) Figures to the right indicate full marks

**Section – I**

**Q.2 Solve any three of the following questions. 12**

- What are different Processor Execution Levels (PEL). What is the role of PEL in operating system?
- Consider that, block number 2 is the start block of the inode list and there are 8 inode per block. Calculate the block number for inode number 8 and calculate byte offset for the same. (Size of disk inode = 64 bytes)
- Describe different advantages and disadvantages of Buffer Cache.
- Write a short note on Pipe System call.

**Q.3 Solve any two of the following questions. 16**

- Explain architecture of Unix operating system with the help of block diagram of system kernel in detail.
- Describe in detail the scenario of *getblk* algorithm used to allocate buffer for a disk block.
- Explain how kernel allocates an inode to newly created file using *ialloc* algorithm and how it releases the inode using *ifree* algorithm.

**Section – II**

**Q.4 Solve any three of the following questions. 12**

- What is signal? Explain algorithm used for recognizing it.
- Describe system *boot* and *init* process in detail.
- Explain system calls used for time.
- Explain fork System call in detail.

**Q.5 Solve any two of the following questions. 16**

- What is Context of process? Explain components of context of process in detail.
- What are different data structures used by a system which supports demand paging? Explain in detail.
- Describe Process state transition diagram in detail.

**T.Y. (B. Tech) (Sem - II) (New) (CBCS) Examination: Oct/Nov - 2022**  
**COMPUTER SCIENCE & ENGINEERING**  
**Unix Operating System**

Day & Date: Thursday, 16-02-2023  
 Time: 10:00 AM To 01:00 PM

Max. Marks: 70

- Instructions:** 1) Q. No. 1 is compulsory. It should be solved in the first 30 minutes in answer book. Page no 03 (Starting page of the Answer Book). Each question carries one mark.  
 2) Don't forget to Mention question paper set (P/Q/R/S) on top of page.

**MCQ/Objective Type Questions**

Duration: 30 Minutes

Marks: 14

**Q.1 Choose the correct alternatives from the options.**

**14**

- 1) The syntax of the system call chown is \_\_\_\_\_.  
 a) chown(pathname,owner)  
 b) chown(filename,owner)  
 c) chown(pathname,owner,group)  
 d) chown(filename,owner,group)
- 2) The state \_\_\_\_\_ is logically the same as ready to run in memory.  
 a) zombie  
 b) preempted  
 c) ready to run  
 d) sleeping
- 3) A \_\_\_\_\_ file type field indicates that disk inode is assigned.  
 a) zero  
 b) negative value  
 c) non-zero  
 d) none of these
- 4) \_\_\_\_\_ process is commonly called init because it is responsible for initializing of new process.  
 a) process 0  
 b) process1  
 c) Swapper  
 d) Superuser
- 5) A process can synchronize its execution with the termination of a child by executing \_\_\_\_\_ system call.  
 a) wait  
 b) exec  
 c) fork  
 d) exit
- 6) The system call \_\_\_\_\_ creates special files in the system, including named pipes, device files and directories.  
 a) mknod  
 b) mkfs  
 c) creat  
 d) pipe
- 7) Moving between kernel and user mode is called as \_\_\_\_\_.  
 a) change in mode  
 b) context switch  
 c) kernel running  
 d) none of above
- 8) \_\_\_\_\_ has access rights to all files in the system.  
 a) User process  
 b) User  
 c) Superuser  
 d) Group owner
- 9) Algorithm used for handling signal is \_\_\_\_\_.  
 a) psig  
 b) issig  
 c) sigcatch  
 d) sighandle

- 10) Kernel maintains the \_\_\_\_\_ of buffers that preserves the least recently used order.
- |               |          |
|---------------|----------|
| a) First list | b) Queue |
| c) Tree       | d) Stack |
- 11) \_\_\_\_\_ algorithm is used for conversion of Byte offset to Block number in file system.
- |          |                  |
|----------|------------------|
| a) map   | b) bmap          |
| c) bread | d) none of these |
- 12) \_\_\_\_\_ is used to write error messages to standard error file.
- |       |        |
|-------|--------|
| a) <  | b) >   |
| c) 2> | d) err |
- 13) \_\_\_\_\_ algorithm is used for validity fault handler.
- |           |           |
|-----------|-----------|
| a) fault  | b) vfault |
| c) bfault | d) mfault |
- 14) \_\_\_\_\_ data structure is used for allocation of swap space.
- |                 |               |
|-----------------|---------------|
| a) malloc       | b) map        |
| c) region table | d) page table |

Duration: 30 Minutes

Marks: 14

**Q.1 Choose the correct alternatives from the given options.**

**14**

- 1) SIMD represents an organization that \_\_\_\_\_.  
 a) refers to a computer system capable of processing several programs at the same time.  
 b) represents organization of single computer containing a control unit, processor unit and a memory unit.  
 c) includes many processing units under the supervision of a common control unit.  
 d) none of above
- 2) Floating point representation is used to store \_\_\_\_\_.  
 a) Boolean values  
 b) whole numbers  
 c) real integers  
 d) integer
- 3) In computers, subtraction is generally carried out by \_\_\_\_\_.  
 a) 9's complement  
 b) 10's complement  
 c) 1's complement  
 d) 2's complement
- 4) What characteristic of RAM memory makes it not suitable for permanent storage?  
 a) too slow  
 b) unreliable  
 c) it is volatile  
 d) too bulky
- 5) Computers use addressing mode techniques for \_\_\_\_\_.  
 a) giving programming versatility to the user by providing facilities as pointers to memory counters for loop control  
 b) to reduce no. of bits in the field of instruction  
 c) specifying rules for modifying or interpreting address field of the instruction  
 d) all the above
- 6) The circuit used to store one bit of data is known as \_\_\_\_\_.  
 a) Register  
 b) Encoder  
 c) Decoder  
 d) Flip Flop

## Marks: 14

- The addressing mode used in an instruction of the form ADD X Y, is \_\_\_\_\_.
  - Absolute
  - indirect
  - index
  - none of these
- Interrupts which are initiated by an instruction are \_\_\_\_\_.
  - internal
  - external
  - hardware
  - software
- Which memory unit has lowest access time?
  - Cache
  - Registers
  - Magnetic Disk
  - Main Memory
- The DMA differs from the interrupt mode by \_\_\_\_\_.
  - The involvement of the processor for the operation
  - The method accessing the I/O devices
  - The amount of data transfer possible
  - None of the mentioned
- The DMA transfers are performed by a control circuit called as \_\_\_\_\_.
  - Device interface
  - DMA controller
  - Data controller
  - Overlooked
- The pipelining process is also called as \_\_\_\_\_.
  - Superscalar operation
  - Assembly line operation
  - Von Neumann cycle
  - None of the mentioned
- Each stage in pipelining should be completed within \_\_\_\_\_ cycle.
  - 1
  - 2
  - 3
  - 4

- 8) SIMD represents an organization that \_\_\_\_\_.  
a) refers to a computer system capable of processing several programs at the same time.  
b) represents organization of single computer containing a control unit, processor unit and a memory unit.  
c) includes many processing units under the supervision of a common control unit.  
d) none of above
- 9) Floating point representation is used to store \_\_\_\_\_.  
a) Boolean values  
b) whole numbers  
c) real integers  
d) integer
- 10) In computers, subtraction is generally carried out by \_\_\_\_\_.  
a) 9's complement  
b) 10's complement  
c) 1's complement  
d) 2's complement
- 11) What characteristic of RAM memory makes it not suitable for permanent storage?  
a) too slow  
b) unreliable  
c) it is volatile  
d) too bulky
- 12) Computers use addressing mode techniques for \_\_\_\_\_.  
a) giving programming versatility to the user by providing facilities as pointers to memory counters for loop control  
b) to reduce no. of bits in the field of instruction  
c) specifying rules for modifying or interpreting address field of the instruction  
d) all the above
- 13) The circuit used to store one bit of data is known as \_\_\_\_\_.  
a) Register  
b) Encoder  
c) Decoder  
d) Flip Flop
- 14) (2FAOC) 16 is equivalent to \_\_\_\_\_.  
a) (195 084) 10  
b) (001011111010 0000 1100) 2  
c) Both (a) and (b)  
d) None of these

**MCQ/Objective Type Questions**

Duration: 30 Minutes

Marks: 14

**Q.1 Choose the correct alternatives from the options.**

**14**

- 1) Artificial Intelligence is about \_\_\_\_\_.  
 a) Playing a game on Computer  
 b) Making a machine Intelligent  
 c) Programming on Machine with your Own Intelligence  
 d) Putting your intelligence in Machine
- 2) Select the most appropriate situation for that a blind search can be used.  
 a) Real-life situation  
 b) Small Search Space  
 c) Complex game  
 d) All of the above
- 3) Among the given options, which search algorithm requires less memory?  
 a) Optimal Search  
 b) Depth-firstsearch  
 c) Breadth-First Search  
 d) Linear Search
- 4) Which of the following is the branch of Artificial Intelligence?  
 a) Machine Learning  
 b) Cyber forensics  
 c) Full-Stack Developer  
 d) Network Design
- 5) Which of the following is a component of Artificial Intelligence?  
 a) Learning  
 b) Training  
 c) Designing cost  
 d) Puzzling
- 6) What is the function of an Artificial Intelligence "Agent"?  
 a) Mapping of goal sequence to an action  
 b) Work without the direct interference of the people  
 c) Mapping of precept sequence to an action  
 d) Mapping of environment sequence to an action
- 7) Which of the following machine requires input from humans but can interpret the outputs themselves?  
 a) Actuators  
 b) Sensor  
 c) Agents  
 d) AI system
- 8) Face Recognition system is based on which type of approach?  
 a) Weak AI approach  
 b) Applied AI approach  
 c) Cognitive AI approach  
 d) Strong AI approach

- 9) Which algorithm is used in the Game tree to make decisions of Win/Lose?
- a) Heuristic Search Algorithm
  - b) DFS/BFS algorithm
  - c) Greedy Search Algorithm
  - d) Min/Max algorithm
- 10) Among the given options, which is not the required property of Knowledge representation?
- a) Inferential Efficiency
  - b) Inferential Adequacy
  - c) Representational Verification
  - d) Representational Adequacy
- 11) What is the name of Artificial Intelligence which allows machines to handle vague information with a deftness that mimics human intuition?
- a) Human intelligence
  - b) Boolean logic
  - c) Functional logic
  - d) Fuzzy logic
- 12) The available ways to solve a problem of state-space-search.
- a) 1
  - b) 2
  - c) 3
  - d) 4
- 13) Which agent deals with the happy and unhappy state?
- a) Utility-based agent
  - b) Goal-based agent
  - c) Model-based agent
  - d) Learning agents
- 14) Automatic Reasoning tool is used in \_\_\_\_.
- a) Personal Computers
  - b) Microcomputers
  - c) LISP Machines
  - d) All of the above

------------	----------

**T.Y (B.Tech.) (Sem-II) (New) (CBCS) Examination: Oct/Nov-2022**  
**COMPUTER SCIENCE & ENGINEERING**  
**Artificial Intelligence**

Day & Date: Wednesday, 22-02-2023  
Time: 10:00 AM To 01:00 PM

Marks: 56

**Instructions:** 1) All questions are compulsory.  
2) Figures to the right indicate full marks.

**Q.2 Attempt any five. 30**

- a) Give some real-world applications of AI
- b) How Artificial intelligence. Machine Learning, and Deep Learning differ from each other?
- c) What are the types of Machine Learning?
- d) What is NLP? What are the various components of NLP?
- e) What is Bayes rule explain Bayes rule with example?
- f) Explain Sequential decision problem with example.
- g) What is reinforcement learning? How does reinforcement learning work?

**Q.3 Attempt any two. 16**

- a) What is the difference between supervised and unsupervised learning in AI?
- b) Explain Game theory in AI. How many types of game theory in AI.
- c) Write a note BFS and DFS with example.

**Q.4 Solve any one. 10**

- a) Write a short note on AI in the present and in the future.
- b) i) Blind Search (Uninformed search)
  - 1) Iterative deepening search
  - 2) Bidirectional search
- ii) Informed Search

Set Q
-------

**T.Y (B.Tech.) (Sem-II) (New) (CBCS) Examination: Oct/Nov-2022**  
**COMPUTER SCIENCE & ENGINEERING**  
**Artificial Intelligence**

Day & Date: Wednesday, 22-02-2023  
 Time: 10:00 AM To 01:00 PM

Max. Marks: 70

- Instructions:** 1) Q. No. 1 is compulsory. It should be solved in the first 30 minutes in answer book. Page no 03 (Starting page of the Answer Book). Each question carries one mark.  
 2) Don't forget to Mention question paper set (P/Q/R/S) on top of page.  
 3) Figures to the right indicates full marks

**MCQ/Objective Type Questions**

Duration: 30 Minutes

Marks: 14

**Q.1 Choose the correct alternatives from the options.**

**14**

- 1) Face Recognition system is based on which type of approach?
  - a) Weak AI approach
  - b) Applied AI approach
  - c) Cognitive AI approach
  - d) Strong AI approach
- 2) Which algorithm is used in the Game tree to make decisions of Win/Lose?
  - a) Heuristic Search Algorithm
  - b) DFS/BFS algorithm
  - c) Greedy Search Algorithm
  - d) Min/Max algorithm
- 3) Among the given options, which is not the required property of Knowledge representation?
  - a) Inferential Efficiency
  - b) Inferential Adequacy
  - c) Representational Verification
  - d) Representational Adequacy
- 4) What is the name of Artificial Intelligence which allows machines to handle vague information with a deftness that mimics human intuition?
  - a) Human intelligence
  - b) Boolean logic
  - c) Functional logic
  - d) Fuzzy logic
- 5) The available ways to solve a problem of state-space-search.
  - a) 1
  - b) 2
  - c) 3
  - d) 4
- 6) Which agent deals with the happy and unhappy state?
  - a) Utility-based agent
  - b) Goal-based agent
  - c) Model-based agent
  - d) Learning agents
- 7) Automatic Reasoning tool is used in \_\_\_\_\_.
  - a) Personal Computers
  - b) Microcomputers
  - c) LISP Machines
  - d) All of the above

- 8) Artificial Intelligence is about \_\_\_\_\_.  
a) Playing a game on Computer  
b) Making a machine Intelligent  
c) Programming on Machine with your Own Intelligence  
d) Putting your intelligence in Machine
- 9) Select the most appropriate situation for that a blind search can be used.  
a) Real-life situation  
b) Small Search Space  
c) Complex game  
d) All of the above
- 10) Among the given options, which search algorithm requires less memory?  
a) Optimal Search  
b) Depth-firstsearch  
c) Breadth-First Search  
d) Linear Search
- 11) Which of the following is the branch of Artificial Intelligence?  
a) Machine Learning  
b) Cyber forensics  
c) Full-Stack Developer  
d) Network Design
- 12) Which of the following is a component of Artificial Intelligence?  
a) Learning  
b) Training  
c) Designing cost  
d) Puzzling
- 13) What is the function of an Artificial Intelligence “Agent”?  
a) Mapping of goal sequence to an action  
b) Work without the direct interference of the people  
c) Mapping of precept sequence to an action  
d) Mapping of environment sequence to an action
- 14) Which of the following machine requires input from humans but can interpret the outputs themselves?  
a) Actuators  
b) Sensor  
c) Agents  
d) AI system

**MCQ/Objective Type Questions**

Duration: 30 Minutes

Marks: 14

**Q.1 Choose the correct alternatives from the options and rewrite the sentence. 14**

- 1) \_\_\_\_\_ characterize mainstream object-oriented language.
  - a) Identity
  - b) Classification
  - c) Polymorphism
  - d) All of the above
- 2) A \_\_\_\_\_ represents the specification of an asynchronous stimulus communicated between instances.
  - a) Event
  - b) Process
  - c) Thread
  - d) Signal
- 3) Aggregation is a \_\_\_\_\_ relationship.
  - a) "is a part of"
  - b) "is a Kind of"
  - c) "is a replica of"
  - d) "Has a"
- 4) The triangle notation for \_\_\_\_\_ to connect a super class to its subclasses.
  - a) Generalization
  - b) Composition
  - c) Aggregation
  - d) None of the above
- 5) A module is a logical construct for \_\_\_\_\_.
  - a) Grouping Classes
  - b) Generalization
  - c) Association
  - d) All of the above
- 6) \_\_\_\_\_ is a Building Blocks of the UML.
  - a) Things
  - b) Diagrams
  - c) Relationships
  - d) All of the option
- 7) Composition is a stronger form of \_\_\_\_\_.
  - a) Aggregation
  - b) Inheritance
  - c) Encapsulation
  - d) All of the above
- 8) In object-oriented design
  - a) Operations and methods are identical
  - b) Methods specify algorithms whereas operations only state what is to be done
  - c) Methods do not change values of attributes
  - d) Methods and constructor are same

- 9) The Unified Modeling Language:
- a) is a notation useful for graphically depicting an object-oriented analysis or design model.
  - b) allows one to capture design decisions of a system.
  - c) promotes communication among key personnel involved in development.
  - d) All of the above
- 10) A class is divided into \_\_\_\_\_.  
a) Name compartment                      b) Operation compartment  
c) Attribute compartment                d) All of the above
- 11) In Unified Modelling Language, diagrams that organize system elements into groups are classified as \_\_\_\_\_.  
a) Package diagrams                      b) System diagrams  
c) Organized diagram                      d) Class diagrams
- 12) Components can be represented by which of the following \_\_\_\_\_.  
a) Component symbols  
b) Stereotypes  
c) Rectangular boxes  
d) Both component symbols & Stereotypes
- 13) UML provides which of these levels of visibility that can be applied to attributes and operations?  
a) Public                                      b) Protected and private  
c) Package                                    d) All of the mentioned
- 14) Weak entities are represented in UML diagrams by using aggregations called  
a) Qualified segregation                      b) Non-qualified aggregation  
c) Non-qualified segregation                d) Qualified aggregation

**Object Oriented Modeling & Design**

Day &amp; Date: Friday, 24-02-2023

Max. Marks: 56

Time: 10:00 AM To 01:00 PM

**Instructions:** 1) All question are compulsory.  
 2) Figures to the right indicates full marks.

**SECTION – I****Q.2 Attempt any Three.** **12**

- a) Explain object, links and association with diagram.
- b) Explain the inheritance concept with example.
- c) Explain state, event and operations with suitable diagram.
- d) Explain elements of data flow diagram with diagram.

**Q.3 Attempt any two.** **16**

- a) Explain object-oriented Styles.
- b) Draw a class model for Railway Reservation System.
- c) Explain about object diagram compiler.

**SECTION – II****Q.4 Attempt any Three.** **12**

- a) Explain state Machine Diagram in UML
- b) Explain Activity diagram with example
- c) Explain Deployment Diagram with example
- d) Write note on Object Oriented Language features?

**Q.5 Attempt any Two.** **16**

- a) Explain Core Elements of use case diagram for Hospital Management System.
- b) Explain State chart diagrams and Nested State Chart diagram in UML with example.
- c) Explain steps for building a Sequence Diagram in UML. Elaborate with an Example

**Object Oriented Modeling & Design**

Day & Date: Friday, 24-02-2023  
 Time: 10:00 AM To 01:00 PM

Max. Marks: 70

- Instructions:** 1) Q. No. 1 is compulsory. It should be solved in the first 30 minutes in answer book. Page no 03 (Starting page of the Answer Book). Each question carries one mark.  
 2) Don't forget to Mention question paper set (P/Q/R/S) on top of page.  
 3) Figures to the right indicates full marks.

**MCQ/Objective Type Questions**

Duration: 30 Minutes

Marks: 14

**Q.1 Choose the correct alternatives from the options and rewrite the sentence. 14**

- 1) \_\_\_\_\_ is a Building Blocks of the UML.
  - a) Things
  - b) Diagrams
  - c) Relationships
  - d) All of the option
- 2) Composition is a stronger form of \_\_\_\_\_.
  - a) Aggregation
  - b) Inheritance
  - c) Encapsulation
  - d) All of the above
- 3) In object-oriented design
  - a) Operations and methods are identical
  - b) Methods specify algorithms whereas operations only state what is to be done
  - c) Methods do not change values of attributes
  - d) Methods and constructor are same
- 4) The Unified Modeling Language:
  - a) is a notation useful for graphically depicting an object-oriented analysis or design model.
  - b) allows one to capture design decisions of a system.
  - c) promotes communication among key personnel involved in development.
  - d) All of the above
- 5) A class is divided into \_\_\_\_\_.
  - a) Name compartment
  - b) Operation compartment
  - c) Attribute compartment
  - d) All of the above
- 6) In Unified Modelling Language, diagrams that organize system elements into groups are classified as \_\_\_\_\_.
  - a) Package diagrams
  - b) System diagrams
  - c) Organized diagram
  - d) Class diagrams
- 7) Components can be represented by which of the following \_\_\_\_\_.
  - a) Component symbols
  - b) Stereotypes
  - c) Rectangular boxes
  - d) Both component symbols & Stereotypes

- 8) UML provides which of these levels of visibility that can be applied to attributes and operations?
- a) Public
  - b) Protected and private
  - c) Package
  - d) All of the mentioned
- 9) Weak entities are represented in UML diagrams by using aggregations called
- a) Qualified segregation
  - b) Non-qualified aggregation
  - c) Non-qualified segregation
  - d) Qualified aggregation
- 10) \_\_\_\_\_ characterize mainstream object-oriented language.
- a) Identity
  - b) Classification
  - c) Polymorphism
  - d) All of the above
- 11) A \_\_\_\_\_ represents the specification of an asynchronous stimulus communicated between instances.
- a) Event
  - b) Process
  - c) Thread
  - d) Signal
- 12) Aggregation is a \_\_\_\_\_ relationship.
- a) "is a part of"
  - b) "is a Kind of"
  - c) "is a replica of"
  - d) "Has a"
- 13) The triangle notation for \_\_\_\_\_ to connect a super class to its subclasses.
- a) Generalization
  - b) Composition
  - c) Aggregation
  - d) None of the above
- 14) A module is a logical construct for \_\_\_\_\_.
- a) Grouping Classes
  - b) Generalization
  - c) Association
  - d) All of the above

**MCQ/Objective Type Questions**

Duration: 30 Minutes

Marks:14

**Q.1 Choose the correct alternatives from the given options.**

**14**

- 1) The application/applications of Artificial Intelligence is/are
  - a) Expert Systems
  - b) Gaming
  - c) Vision Systems
  - d) All of the above
- 2) Which agent deals with the happy and unhappy state?
  - a) Utility-based agent
  - b) Model-based agent
  - c) Goal-based Agent
  - d) Learning Agent
- 3) What are the compositions for agents in artificial intelligence?
  - a) Program
  - b) Architecture
  - c) Both Program and Architecture
  - d) None of the mentioned
- 4) How do you represent "All dogs have tails"?
  - a)  $\forall x: \text{dog}(x) \rightarrow \text{hastail}(x)$
  - b)  $\forall x: \text{dog}(x) \rightarrow \text{hastail}(y)$
  - c)  $\forall x: \text{dog}(y) \rightarrow \text{hastail}(x)$
  - d)  $\forall x: \text{dog}(x) \rightarrow \text{hasatail}(x)$
- 5) The process of removing detail from a given state representation is called
  - a) Extraction
  - b) Abstraction
  - c) Information Retrieval
  - d) Mining of data
- 6) Which of the Following problems can be modelled as CSP?
  - a) 8-Puzzle problem
  - b) 8-Queen problem
  - c) Map Coloring problem
  - d) All of the mentioned
- 7) Zero sum games are the one in which there are two agents whose actions must alternate and in which the utility values at the end of the game are always the same.
  - a) True
  - b) False
- 8) Where does the Baye's rule can be used?
  - a) Solving queries
  - b) Increasing complexity
  - c) Decreasing complexity
  - d) Answering probabilistic query

Day & Date: Friday 24-02-2023  
 Time: 10:00 AM To 1:00 PM

Max. Marks: 56

**Instructions:** 1) All questions are compulsory.  
 2) Figures to the right indicate full marks.

**Q.2 Answer the following (Any Five) 30**

- Describe the Components that define a well-defined search problem.
- Differentiate between informed and uninformed search algorithm.
- Explain A\* searching technique in detail with example. Discuss conditions for the optimality of this technique.
- With an example AND-OR Graph in detail.
- Write a note on Monotonic Reasoning and Non-Monotonic Reasoning with example.
- Differentiate between Supervised Learning and Unsupervised Learning.

**Q.3 Answer the following (Any Two) 16**

- For each of the following activities, give a PEAS description of the task environment and characterize it in terms of the properties listed in Section like
  - Interactive English Tutor
  - Taxi Driver
- Explain Uniform Cost Search Algorithm and find the shortest path between Sibiu and Bucharest using Uniform Cost Search Algorithm.

- With proper example explain Decision tree and the types of nodes in Decision tree.

**Q.4 Attempt the following.****Consider a vocabulary with the following symbols:**

- i) Occupation ( $p, o$ ): Predicate. Person  $p$  has occupation  $o$ .
- ii) Customer ( $p_1, p_2$ ): Predicate. Person  $p_1$  is a customer of person  $p_2$ .
- iii) Boss ( $p_1, p_2$ ): Predicate. Person  $p_1$  is a boss of person  $p_2$ .
- iv) Doctor, Surgeon, Lawyer, Actor: Constants denoting occupations.
- v) Emily, Joe: Constants denoting people.

**Use these symbols to write the following assertions in first-order logic:**

- a) Emily is either a surgeon or a lawyer.
- b) Joe is an actor, but he also holds another job.
- c) All surgeons are doctors.
- d) Joe does not have a lawyer (i.e., is not a customer of any lawyer).
- e) Emily has a boss who is a lawyer.
- f) There exists a lawyer all of whose customers are doctors.
- g) Every surgeon has a lawyer.

c) PCA	d) Linear Regression
- 2) A Data Scientist \_\_\_\_\_
 

a) Asks the right questions
b) Performs data wrangling and data visualization
c) Acquires data
d) All of the above
- 3) Mean, Mode, Median, Range, Variance are types of \_\_\_\_\_ statistic.
 

a) Inferential statistic	b) Descriptive statistic
c) Both a and b	d) None of the above
- 4) Which of the following sentence is FALSE regarding regression?
 

a) It is used for interpretation	b) It discovers casual relationship
c) It relates input to output	d) It is used for predication
- 5) \_\_\_\_\_ is the ability to train computer to understand both human speech and written text Select one:
 

a) Linear Algebra	b) Statistics
c) Data mining	d) Natural Language Processing
- 6) \_\_\_\_\_ occurs when your algorithm has learned too much from your data, up to the point of mapping curve shapes and rules that do not exist.
 

a) Under fitting	b) None
c) Over fitting	d) Cost function
- 7) In Python \_\_\_\_\_ package offers all the functionality needed to create and manipulate matrices.
 

a) matplotlib	b) sklearn
c) scipy	d) numpy

- 8) \_\_\_\_\_ method is used to avoid over fitting.
- a) Regularization
  - b) Dimensionality reduction
  - c) Rule based machine learning
  - d) Bayesian
- 9) Which of the following plots can be used to detect an outlier?
- a) Boxplot
  - b) Histogram
  - c) Scatter plot
  - d) All of the above
- 10) Can decision trees be used for performing clustering? State True/False
- a) True
  - b) False
- 11) Which of the following cannot be a component of time series data?
- a) Trend
  - b) Seasonality
  - c) Noise
  - d) None of the above
- 12) Tokenization, is a way to \_\_\_\_\_
- a) Find the grammar of the text
  - b) Split text data into words, phrases and idioms
  - c) Analyze the sentence structure
  - d) Find ambiguities
- 13) Which of the following is a branch of statistics?
- a) Inferential statistic
  - b) Descriptive statistic
  - c) Both a and b
  - d) None of the above
- 14) Which of the following library is use to plot Heatmap?
- a) Matplotlib
  - b) Seaborn
  - c) Scikit-learn
  - d) Nltk

**T.Y (B. Tech) (Sem-II) (New) (CBCS) Examination: Oct/Nov-2022**  
**COMPUTER SCIENCE & ENGINEERING**  
**Data Science**

Day & Date: Friday, 24-02-2023

Max. Marks: 56

Time: 10:00 AM To 01:00 PM

**Instructions:** 1) All question are compulsory.  
 2) Figures to the right indicates full marks.

**SECTION – I**

**Q.2 Attempt any Three.** **12**

- a) Describe Data Science. Summarize the components of Data Science.
- b) What is NLTK? Explain the various functionality provided in NLTK.
- c) Illustrate why data visualization is needed in data analytics. In python how data visualization takes place.
- d) Explain Simpson's Paradox with example.

**Q.3 Attempt any Two.** **16**

- a) Define Web scrapping. Elaborate the process of web scrapping in detail. Write advantages of web scrapping.
- b) Describe Data preprocessing in data science, why it is important? Explain the steps involve in data preprocessing.
- c) What is statistics? Describe descriptive statistic with example.

**SECTION – II**

**Q.4 Attempt any Three.** **12**

- a) Describe Naïve Bayes classifier. Also example its applications.
- b) What is sentimental analysis example with their example.
- c) Write a short note on overfitting & underfitting.
- d) Elaborate the working of Support Vector Machine (SVM).

**Q.5 Attempt any Two.** **16**

- a) Define Machine Learning. Also describe the need of ML. Explain supervised machine learning with example
- b) Explain Decision Tree algorithm with example. List its advantages and disadvantages.
- c) Explain the K-Nearest Neighbours algorithm with suitable examples.

**T.Y. (B. Tech.) (Semester-II) (New) (CBCS) Examination: Oct/Nov-2022**  
**COMPUTER SCIENCE & ENGINEERING**  
**Software Licences and Practices**

Day & Date: Monday, 27-02-2023

Max. Marks: 50

Time: 10:00 AM To 12:00 PM

- Instructions:** 1) Q. No. 1 is compulsory and should be solved in first 20 minutes in Answer Book. Page No.3 (starting page of the Answer Book). Each question carry one mark.  
 2) Don't forget to mention Question Paper Set (P/Q/R/S) at the top of the same page.  
 3) Figures to the right indicates full marks.

**MCQ/Objective Type Questions**

Duration: 20 Minutes

Marks: 10

**Q.1 Choose the correct alternatives from the options.** **10**

- 1) The open source method for creating software rely on developers who voluntarily revel code in the expectation that other developers will reciprocate is called \_\_\_\_\_.  
 a) open source property                      b) intellectual property  
 c) software property                          d) licensing property
- 2) \_\_\_\_\_ is a legal instrument governing the usage or redistribution of the software.  
 a) GNU Public License                      b) Reciprocal License  
 c) Software License                          d) Academic License
- 3) Dual licensing is also called as \_\_\_\_\_.  
 a) tri-licensing                                  b) business licensing  
 c) multi licensing                              d) software licensing
- 4) Microsoft uses and release code under a variety of licenses including \_\_\_\_.  
 a) gpl    b) apache  
 c) ibm     d) gnu project license
- 5) Richard Stallman from MIT, established a special license, the \_\_\_\_\_.  
 a) GNU    b) Free  
 c) Package                                        d) Commercial
- 6) The copyright board shall be deemed to be a \_\_\_\_\_.  
 a) Supreme Court                              b) High Court  
 c) Civil Court                                    d) Criminal Court
- 7) In India first Copyright Act was passed in \_\_\_\_\_.  
 a) 1914    b) 1709  
 c) 1911    d) 1842
- 8) The user must agree to the \_\_\_\_\_ terms and agreements when they use as a open source software.  
 a) System     b) License  
 c) Community                                   d) Programmer

- 9)** Which of the following is not an open source Software?
- a) Linux
  - b) Ubuntu
  - c) Open Office
  - d) Windows 10
- 10)** Which of the following is a disadvantage of 'proprietary' software?
- a) You need to be an expert to edit code
  - b) You have to pay for this type of software
  - c) Its often free
  - d) You can edit the source code to customize it

**MCQ/Objective Type Questions**

Duration: 30 Minutes

Marks: 14

**Q.1 Choose the correct alternatives from the given options.**

**14**

- 1) In the \_\_\_\_\_ model request-response protocol is described to access services of server machine.  
a) Workstation- Server model      b) Processor pool model  
c) Minicomputer model      d) All
- 2) Almost all networks have an upper bound on the size of data that can be transmitted at a time, this size is known as the \_\_\_\_\_.  
a) Bounded transfer unit      b) Maximum transfer unit  
c) Minimum transfer unit      d) None of the above
- 3) In distributed system each processor has its own \_\_\_\_\_.  
a) local memory      b) Clock  
c) both a and b      d) None of these
- 4) \_\_\_\_\_ is not the issue in the design of distributed operating system.  
a) Scalability      b) Performance  
c) Heterogeneity      d) Resource sharing
- 5) \_\_\_\_\_ provides group communication facility and implements a secure and efficient client server based communication protocol.  
a) VMTP      b) TCP  
c) FLIP      d) None
- 6) The \_\_\_\_\_ handles transmission of messages across the network between client and server.  
a) Server Stub      b) RPC Runtime  
c) Client stub      d) Server
- 7) Workstation server model is popular because it is used for \_\_\_\_\_.  
a) E-mail      b) Editing jobs  
c) Executing small programs      d) all of the above
- 8) Each fragment is sent in a packet that has some control information in addition to the message data, then each packet is known as a \_\_\_\_\_.  
a) MTU      b) Multi datagram  
c) Datagram      d) Segment
- 9) \_\_\_\_\_ is not possible in distributed file system.  
a) File replication      b) Migration

Day & Date: Wednesday, 25-01-2023  
 Time: 02:00 PM To 05:00 PM

Max. Marks: 56

**Instructions:** 1) Figures to the right indicates full marks.  
 2) All Questions are compulsory.

**Section – I**

**Q.2 Attempt any three of the following.** **12**

- a) Differentiate between the monolithic kernel and microkernel approaches for designing a distributed operating system. Discuss their relative advantages and disadvantages.
- b) Why are distributed operating systems more difficult to design than operating Systems for centralized time-sharing systems?
- c) Explain RPC mechanism with diagram.
- d) Describe what is meant by consistent ordering of messages? What is the mechanism used to implement it?
- e) Discuss the relative advantages and disadvantages of using full file caching and block caching models for the data - caching mechanism of a distributed file system.

**Q.3 Attempt any one of the following.** **08**

- a) What is an idempotent operation? Which of the following operations are idempotent:
  - 1) read\_next\_record (filename)
  - 2) readrecord (filename, recordnumber)
  - 3) append\_record (filename, record)
  - 4) writerecord (filename, after\_record\_n, record)
  - 5) seek (filename, position)
  - 6) add (integer\_1, integer\_2)
  - 7) Increment (variable\_name)
- b) Discuss with an example, how to Keep Track of lost and Out-of-Sequence Packets in Multidatagram messages.

**Q.4 Describe the different types of transparency in distributed systems.** **08**

**Section – II**

**Q.5 Attempt any three of the following.** **12**

- a) Elaborate how mutex variable and conditional variable can be used for an application in which two threads of a process have producer -consumer relationship.
- b) Describe the four data transfer models that may be used in a distributed file system that uses the data caching model for file accessing.

- c) What will happen in a bully algorithm for electing a coordinator when two or more processes almost simultaneously discover that the coordinator has crashed.
- d) Compare message passing and Distributed Shared Memory (DSM).
- e) Explain the architecture of distributed shared memory (DSM).

**Q.6 Attempt any one of the following.**

**08**

- a) Discuss the Implementation issues of DSM.
- b) Explain the architecture and the services of Distributed File System. (DFS).

**Q.7 List and explain the mechanisms for building Distributed File System (DFS).**

**Fourth Year (B.Tech.) (Sem - I) (New) (CBCS) Examination: Oct/Nov-2022**  
**COMPUTER ENGINEERING**  
**Distributed Systems**

Day & Date: Wednesday, 25-01-2023  
Time: 02:00 PM To 05:00 PM

Max. Marks: 56

**Instructions:** 1) Figures to the right indicates full marks.  
2) All Questions are compulsory.

**Section – I**

**Q.2 Attempt any three of the following.** **12**

- a) Differentiate between the monolithic kernel and microkernel approaches for designing a distributed operating system. Discuss their relative advantages and disadvantages.
- b) Why are distributed operating systems more difficult to design than operating Systems for centralized time-sharing systems?
- c) Explain RPC mechanism with diagram.
- d) Describe what is meant by consistent ordering of messages? What is the mechanism used to implement it?
- e) Discuss the relative advantages and disadvantages of using full file caching and block caching models for the data - caching mechanism of a distributed file system.

**Q.3 Attempt any one of the following.** **08**

- a) What is an idempotent operation? Which of the following operations are idempotent:
  - 1) read\_next\_record (filename)
  - 2) readrecord (filename, recordnumber)
  - 3) append\_record (filename, record)
  - 4) writerecord (filename, after\_record\_n, record)
  - 5) seek (filename, position)
  - 6) add (integer\_1, integer\_2)
  - 7) Increment (variable\_name)
- b) Discuss with an example, how to Keep Track of lost and Out-of-Sequence Packets in Multidatagram messages.

**Q.4 Describe the different types of transparency in distributed systems.** **08**

**Section – II**

**Q.5 Attempt any three of the following.** **12**

- a) Elaborate how mutex variable and conditional variable can be used for an application in which two threads of a process have producer -consumer relationship.
- b) Describe the four data transfer models that may be used in a distributed file system that uses the data caching model for file accessing.

- c) What will happen in a bully algorithm for electing a coordinator when two or more processes almost simultaneously discover that the coordinator has crashed.
- d) Compare message passing and Distributed Shared Memory (DSM).
- e) Explain the architecture of distributed shared memory (DSM).

**Q.6 Attempt any one of the following.**

**08**

- a) Discuss the Implementation issues of DSM.
- b) Explain the architecture and the services of Distributed File System. (DFS).

**Q.7 List and explain the mechanisms for building Distributed File System (DFS).**

**Fourth Year (B.Tech.) (Sem - I) (New) (CBCS) Examination: Oct/Nov - 2022**

**COMPUTER SCIENCE & ENGINEERING  
Machine Learning**

Day & Date: Tuesday, 31-01-2023  
Time: 02:00 PM To 05:00 PM

Max. Marks: 70

- Instructions:** 1) Q. No. 1 is compulsory and should be solved in first 30 minutes in Answer Book. Page No.3 (starting page of the Answer Book). Each question carry one mark.  
2) Don't forget to mention Question Paper Set (P/Q/R/S) at the top of the same page.  
3) Assume suitable data wherever needed and mention it clearly.

**MCQ/Objective Type Questions**

Duration: 30 Minutes

Marks: 14

**Q.1 Choose the correct alternatives from the options.**

**14**

- 1) Machine Learning enables models to train on data sets before being deployed and continuously adapted as new data is ingested is called as \_\_\_\_\_.
  - a) Offline machine learning model
  - b) Deep Learning model
  - c) Online machine Learning model
  - d) None of these
- 2) On the basis of historical data, we can understand the current reality in the business is called as \_\_\_\_\_.
  - a) Predictive analysis
  - b) Data analytics
  - c) Descriptive analytics
  - d) All
- 3) \_\_\_\_\_ is the ability to train computer to understand both human speech and written text.
  - a) Data mining
  - b) Natural Language Processing
  - c) Statistics
  - d) none
- 4) Supervised learning and unsupervised learning both require at least one \_\_\_\_\_.
  - a) Output attribute
  - b) Input attribute
  - c) Hidden attribute
  - d) none
- 5) \_\_\_\_\_ Technique is used to group the similar types of objects with similar parameter.
  - a) Bayesian
  - b) Clustering
  - c) Association
  - d) none
- 6) Which of following steps are required to apply machine learning technique to support business strategy?
  - a) What is the business problem you are trying to solve
  - b) When are the hidden data resources that you can take advantage
  - c) How can you prepare to get your data
  - d) All

- 7) \_\_\_\_\_ Algorithm is used to remove redundant data, outliers and other no useful data.
- |                |                             |
|----------------|-----------------------------|
| a) Bayesian    | b) Dimensionality reduction |
| c) association | d) clustering               |
- 8) In Python \_\_\_\_\_ package offers all the functionality needed to create and manipulate matrices.
- |          |            |
|----------|------------|
| a) scipy | b) numpy   |
| c) none  | d) sklearn |
- 9) The driving force behind optimization in machine learning is the response from a function internal to the algorithm, called the \_\_\_\_\_.
- |                        |                  |
|------------------------|------------------|
| a) Regression          | b) cost function |
| c) logistic regression | d) none          |
- 10) The process goes on repetitively until there are no more chunks. Chunks can be small (depending on core memory), and the process is called \_\_\_\_\_.
- |                        |                   |
|------------------------|-------------------|
| a) mini-batch learning | b) learning model |
| c) linear regression   | d) none           |
- 11) \_\_\_\_\_ involves buying large amounts of goods or services automatically based on a combination of machine-based transactions, algorithms.
- |                         |                  |
|-------------------------|------------------|
| a) Programmatic trading | b) cost function |
| c) mapping              | d) none          |
- 12) \_\_\_\_\_ is the approach to machine learning that is based on neuroscience.
- |                  |                 |
|------------------|-----------------|
| a) Connectionism | b) Neuron       |
| c) Deep learning | d) all of above |
- 13) \_\_\_\_\_ is used to overcome the problem of snooping.
- |               |            |
|---------------|------------|
| a) training   | b) testing |
| c) validation | d) none    |
- 14) \_\_\_\_\_ is a phenomenon of observing results that are systematically prejudiced due to faulty assumptions.
- |         |             |
|---------|-------------|
| a) bias | b) variance |
| c) mode | d) none     |

**MCQ/Objective Type Questions**

Duration: 30 Minutes

Marks: 14

**Q.1 Choose the correct alternatives from the options and rewrite the sentence. 14**

- 1) In Type Inheritance, the keyword \_\_\_\_\_ says that, subtype may not be created, from the given type.
 

a) not final	b) self
c) create	d) final
- 2) Every individual operation in query are parallelized in \_\_\_\_\_.
 

a) Interquery parallelism	b) Interoperation parallelism
c) Intraoperation parallelism	d) none
- 3) The task of correcting and pre-processing the data is called as \_\_\_\_\_.
 

a) data Correction	b) data warehousing
c) Loading	d) Data Cleaning
- 4) \_\_\_\_\_ is an unordered collection, where an element may occur multiple times.
 

a) Array	b) Multiset
c) Create Type	d) Structure Type
- 5) In Quorum Consensus protocol, values for read quorum  $Q_r$  and Write Quorum  $Q_w$  for each data item are chosen as \_\_\_\_\_, where  $S$  is the weight for all sites.
 

a) $Q_r + Q_w > S$ and $2 * Q_w > S$	b) $Q_r + Q_w < S$ and $2 * Q_w > S$
c) $Q_r + Q_w > S$ and $2 * Q_w < S$	d) $Q_r + Q_w < S$ and $2 * Q_w < S$
- 6) \_\_\_\_\_ Partitioning technique is Best suited for Point Queries based on partitioning attributes.
 

a) Range Partitioning	b) Round Robin Partitioning
c) Hash Partitioning	d) All
- 7) For Joins where partitioning is not applicable, parallelism can be accomplished by \_\_\_\_\_ techniques.
 

a) range partitioning sort	b) parallel external sort merge
c) partition parallel join	d) fragment and replicate join
- 8) \_\_\_\_\_ can best be described as a programming model used to develop Hadoop-based applications that can process massive amounts of data.
 

a) MapReduce	b) Mahout
c) Oozie	d) All of the mentioned

- 9) Most NoSQL databases support automatic \_\_\_\_\_, meaning that you get high availability and disaster recovery.
- a) processing
  - b) scalability
  - c) replication
  - d) All of the mentioned
- 10) A variation of the star schema that allows more than one central fact table.
- a) Snowflake Schema
  - b) Linked star Schema
  - c) Distributed star Schema
  - d) Constellation Schema
- 11) NoSQL databases is used mainly for handling large volumes of \_\_\_\_\_ data.
- a) unstructured
  - b) structured
  - c) semi-structured
  - d) All of the mentioned
- 12) A global locking system is required in \_\_\_\_\_.
- a) shared disk architecture
  - b) Shared Nothing architecture
  - c) Shared-memory Architecture
  - d) All of these
- 13) \_\_\_\_\_ predicts future trends & behaviour's, allowing business managers to make proactive, knowledge-driven decisions.
- a) Data warehouse
  - b) Data mining
  - c) Data marts
  - d) Metadata
- 14) The type of relationship in star schema is \_\_\_\_\_.
- a) many-to-many
  - b) one-to-one
  - c) one-to-many
  - d) many-to-one

<b>Set</b>	<b>P</b>
------------	----------

**Fourth Year (B.Tech) (Sem - I) (New) (CBCS) Examination: Oct/Nov - 2022**  
**COMPUTER ENGINEERING**  
**Modern Database System**

Day & Date: Friday, 17-02-2023  
Time: 02:00 PM To 05:00 PM

Max. Marks: 56

**Instructions:** 1) Figures to the right indicates full marks  
2) Assume suitable data wherever needed and mention it clearly.

**Section – I**

**Q.2 Answer any four** **16**

- a) List and compare different partitioning techniques.
- b) What are different issues in designing a Data Server?
- c) How deadlock is handled in distributed database systems?
- d) How ranking operation can be performed on database?
- e) List and explain 4 methods of OLAP implementation.

**Q.3 Answer any Two** **12**

- a) Define Data Warehouse and Data Mining? Explain KDD process in Detail.
- b) In Distributed Transaction which protocol is used to ensure Atomicity? Explain the protocol in detail.
- c) Explain Fragment and replicate join and Asymmetric Fragment and Replicate Join.

**Section – II**

**Q.4 Answer any four** **16**

- a) Describe characteristics of MongoDB.
- b) Explain Type inheritance with example.
- c) Differentiate between object-oriented DBMS and Object-relational DBMS.
- d) Explain external Sort merge in detail.
- e) With the help of diagram, explain steps in query processing.

**Q.5 Answer any Two** **12**

- a) Explain Hadoop Distributed File System (HDFS) Architecture with diagram.
- b) In Object oriented database, structured type can have methods. With example, write declaration, body of method and also explain how this method can be invoked on instance of Type.
- c) List Characteristics of NoSql. Also define Key-value store and Document Database.

**COMPUTER ENGINEERING**  
**Modern Database System**

Day & Date: Friday, 17-02-2023  
 Time: 02:00 PM To 05:00 PM

Max. Marks: 70

- Instructions:** 1) Q. No. 1 is compulsory and should be solved in first 30 minutes in Answer Book. Page No.3 (starting page of the Answer Book). Each question carry one mark.  
 2) Don't forget to mention Question Paper Set (P/Q/R/S) at the top of the same page.  
 3) Assume suitable data wherever needed and mention it clearly.

**MCQ/Objective Type Questions**

Duration: 30 Minutes

Marks: 14

**Q.1 Choose the correct alternatives from the options and rewrite the sentence. 14**

- 1) \_\_\_\_\_ can best be described as a programming model used to develop Hadoop-based applications that can process massive amounts of data.
  - a) MapReduce
  - b) Mahout
  - c) Oozie
  - d) All of the mentioned
- 2) Most NoSQL databases support automatic \_\_\_\_\_, meaning that you get high availability and disaster recovery.
  - a) processing
  - b) scalability
  - c) replication
  - d) All of the mentioned
- 3) A variation of the star schema that allows more than one central fact table.
  - a) Snowflake Schema
  - b) Linked star Schema
  - c) Distributed star Schema
  - d) Constellation Schema
- 4) NoSQL databases is used mainly for handling large volumes of \_\_\_\_\_ data.
  - a) unstructured
  - b) structured
  - c) semi-structured
  - d) All of the mentioned
- 5) A global locking system is required in \_\_\_\_\_.
  - a) shared disk architecture
  - b) Shared Nothing architecture
  - c) Shared-memory Architecture
  - d) All of these
- 6) \_\_\_\_\_ predicts future trends & behaviour's, allowing business managers to make proactive, knowledge-driven decisions.
  - a) Data warehouse
  - b) Data mining
  - c) Data marts
  - d) Metadata
- 7) The type of relationship in star schema is \_\_\_\_\_.
  - a) many-to-many
  - b) one-to-one
  - c) one-to-many
  - d) many-to-one
- 8) In Type Inheritance, the keyword \_\_\_\_\_ says that, subtype may not be created, from the given type.
  - a) not final
  - b) self
  - c) create
  - d) final

- 9) Every individual operation in query are parallelized in \_\_\_\_\_.  
a) Interquery parallelism                      b) Interoperation parallelism  
c) Intraoperation parallelism                d) none
- 10) The task of correcting and pre-processing the data is called as \_\_\_\_\_.  
a) data Correction                                b) data warehousing  
c) Loading    d) Data Cleaning
- 11) \_\_\_\_\_ is an unordered collection, where an element may occur multiple times.  
a) Array    b) Multiset  
c) Create Type                                    d) Structure Type
- 12) In Quorum Consensus protocol, values for read quorum  $Q_r$  and Write Quorum  $Q_w$  for each data item are chosen as \_\_\_\_\_, where  $S$  is the weight for all sites.  
a)  $Q_r + Q_w > S$  and  $2 * Q_w > S$             b)  $Q_r + Q_w < S$  and  $2 * Q_w > S$   
c)  $Q_r + Q_w > S$  and  $2 * Q_w < S$             d)  $Q_r + Q_w < S$  and  $2 * Q_w < S$
- 13) \_\_\_\_\_ Partitioning technique is Best suited for Point Queries based on partitioning attributes.  
a) Range Partitioning                            b) Round Robin Partitioning  
c) Hash Partitioning                              d) All
- 14) For Joins where partitioning is not applicable, parallelism can be accomplished by \_\_\_\_\_ techniques.  
a) range partitioning sort                      b) parallel external sort merge  
c) partition parallel join                        d) fragment and replicate join

Duration: 30 Minutes

Marks: 14

**Q.1 Choose the correct alternatives from the options and rewrite the sentence. 14**

- 1) NoSQL databases is used mainly for handling large volumes of \_\_\_\_ data.
 

a) unstructured	b) structured
c) semi-structured	d) All of the mentioned
- 2) A global locking system is required in \_\_\_\_\_.
 

a) shared disk architecture	b) Shared Nothing architecture
c) Shared-memory Architecture	d) All of these
- 3) \_\_\_\_\_ predicts future trends & behaviour's, allowing business managers to make proactive, knowledge-driven decisions.
 

a) Data warehouse	b) Data mining
c) Data marts	d) Metadata
- 4) The type of relationship in star schema is \_\_\_\_\_.
 

a) many-to-many	b) one-to-one
c) one-to-many	d) many-to-one
- 5) In Type Inheritance, the keyword \_\_\_\_\_ says that, subtype may not be created, from the given type.
 

a) not final	b) self
c) create	d) final
- 6) Every individual operation in query are parallelized in \_\_\_\_\_.
 

a) Interquery parallelism	b) Interoperation parallelism
c) Intraopration parallelism	d) none
- 7) The task of correcting and pre-processing the data is called as \_\_\_\_\_.
 

a) data Correction	b) data warehousing
c) Loading	d) Data Cleaning
- 8) \_\_\_\_\_ is an unordered collection, where an element may occur multiple times.
 

a) Array	b) Multiset
c) Create Type	d) Structure Type

- 9) In Quorum Consensus protocol, values for read quorum  $Q_r$  and Write Quorum  $Q_w$  for each data item are chosen as \_\_\_\_\_, where  $S$  is the weight for all sites.
- a)  $Q_r + Q_w > S$  and  $2 * Q_w > S$       b)  $Q_r + Q_w < S$  and  $2 * Q_w > S$   
c)  $Q_r + Q_w > S$  and  $2 * Q_w < S$       d)  $Q_r + Q_w < S$  and  $2 * Q_w < S$
- 10) \_\_\_\_\_ Partitioning technique is Best suited for Point Queries based on partitioning attributes.
- a) Range Partitioning      b) Round Robin Partitioning  
c) Hash Partitioning      d) All
- 11) For Joins where partitioning is not applicable, parallelism can be accomplished by \_\_\_\_\_ techniques.
- a) range partitioning sort      b) parallel external sort merge  
c) partition parallel join      d) fragment and replicate join

**14**

- 1) What are the key components of a M2M system?
  - a) Vortex DDS
  - b) Smart Homes
  - c) Sensors and Wi-Fi
  - d) Protocols
- 2) Which is not an IoT communication model
  - a) Push-Producer
  - b) Publish-Subscribe
  - c) Request-Response
  - d) Exclusive Pair
- 3) Which of the following is not an application of IoT?
  - a) Wearables
  - b) Smart Grid
  - c) Arduino
  - d) Smart city
- 4) Choose correct principle of IOT \_\_\_\_\_.
  - a) focus on the value
  - b) focus on the machine
  - c) build a strong machine
  - d) neither one
- 5) \_\_\_\_\_ in the IoT Architecture is the hardware and software gateways that analyze and pre-process the data before transferring it to the cloud.
  - a) Data center
  - b) Edge IT
  - c) Gateways
  - d) Data Acquisition
- 6) In which RFID tag, the range is less.
  - a) Active
  - b) Semi-passive
  - c) Passive
  - d) None of the above
- 7) What is another name for I2C?
  - a) Signal wire interface
  - b) Two wire interfaces
  - c) UART
  - d) USART
- 8) Which one of the following protocols is lightweight?
  - a) IP
  - b) HTTP
  - c) MQTT
  - d) CoAP
- 9) Which of the following IEEE standards is followed by the physical and MAC layer protocols in ZigBee?
  - a) IEEE 801.15.4
  - b) IEEE 802.15.4
  - c) IEEE 803.15.4
  - d) IEEE 804.15.4

- 10)** Smart warehousing uses \_\_\_\_\_ based framework.  
a) Both RIFT and RIST                      b) Only RIFT  
c) Only RIST                                      d) Only REST
- 11)** Coordinator ZigBee devices act as the bridge between \_\_\_\_\_.  
a) Different networks                      b) Different edge devices  
c) Different fog devices                      d) All of the above
- 12)** IoT devices can easily lead to catastrophe without \_\_\_\_\_.  
a) Software                                      b) Devices  
c) Cloud    d) Management System
- 13)** What is the role of Big data in smart grid architecture of IoT?  
a) Store data                                      b) Manage Data

**Fourth Year (B.Tech.) (Sem-I) (New) (CBCS) Examination: Oct/Nov-2022**  
**COMPUTER ENGINEERING**  
**Internet of Things**

Day & Date: Tuesday, 07-02-2023  
Time: 02:00 PM To 05:00 PM

Max. Marks: 56

**Instructions:** 1) All questions are compulsory.  
2) Figures to the right indicate full marks.

**Section – I**

- Q.2 Solve any three of the following questions. 12**
- a) What are the characteristics of IoT?
  - b) Write a note on sources of IoT.
  - c) Explain automotive IoT.
  - d) Write in detail application of Actuator.
- Q.3 Solve any two. 16**
- a) Write in detail physical design of IoT.
  - b) Write a note on M2M Communications.
  - c) Explain RFID (Radio Frequency Identification Technology's) in detail.

**Section – II**

- Q.4 Solve any three. 12**
- a) Explain IoT privacy & Vulnerability in brief.
  - b) Explain business model scenario for IoT.
  - c) Write a note on application of IoT in smart agriculture.
  - d) Explain the concept of Bluetooth & its low frequency profile in IoT.
- Q.5 Solve any two. 16**
- a) Explain in detail Constrained application protocol.
  - b) Write a note on business models in IoT.
  - c) Explain application of IoT in smart city.

**Fourth Year (B.Tech.) (Sem-I) (New) (CBCS) Examination: Oct/Nov-2022**  
**COMPUTER ENGINEERING**  
**Internet of Things**

Day & Date: Tuesday, 07-02-2023  
 Time: 02:00 PM To 05:00 PM

Max. Marks: 70

- Instructions:** 1) Q. No. 1 is compulsory. It should be solved in the first 30 minutes in answer book. Page no 03 (Starting page of the Answer Book). Each question carries one mark.  
 2) Don't forget to Mention question paper set (P/Q/R/S) on top of page.  
 3) Figures to the right indicates full marks  
 4) Assume suitable data wherever needed and mention it clearly.

**MCQ/Objective Type Questions**

Duration: 30 Minutes

Marks: 14

**Q.1 Choose the correct alternatives from the options.**

**14**

- 1) In which RFID tag, the range is less.
  - a) Active
  - b) Semi-passive
  - c) Passive
  - d) None of the above
- 2) What is another name for I2C?
  - a) Signal wire interface
  - b) Two wire interfaces
  - c) UART
  - d) USART
- 3) Which one of the following protocols is lightweight?
  - a) IP
  - b) HTTP
  - c) MQTT
  - d) CoAP
- 4) Which of the following IEEE standards is followed by the physical and MAC layer protocols in ZigBee?
  - a) IEEE 801.15.4
  - b) IEEE 802.15.4
  - c) IEEE 803.15.4
  - d) IEEE 804.15.4
- 5) Smart warehousing uses \_\_\_\_\_ based framework.
  - a) Both RIFT and RIST
  - b) Only RIFT
  - c) Only RIST
  - d) Only REST
- 6) Coordinator ZigBee devices act as the bridge between \_\_\_\_\_.
  - a) Different networks
  - b) Different edge devices
  - c) Different fog devices
  - d) All of the above
- 7) IoT devices can easily lead to catastrophe without \_\_\_\_\_.
  - a) Software
  - b) Devices
  - c) Cloud
  - d) Management System
- 8) What is the role of Big data in smart grid architecture of IoT?
  - a) Store data
  - b) Manage Data
  - c) Collect data
  - d) Security

- 9) Smart Fitness clothing mainly has which device?  
a) Battery  
b) Bluetooth  
c) Sensors  
d) Internet
- 10) What are the key components of a M2M system?  
a) Vortex DDS  
b) Smart Homes  
c) Sensors and Wi-Fi  
d) Protocols
- 11) Which is not an IoT communication model  
a) Push-Producer  
b) Publish-Subscribe  
c) Request-Response  
d) Exclusive Pair
- 12) Which of the following is not an application of IoT?  
a) Wearables  
b) Smart Grid  
c) Arduino  
d) Smart city
- 13) Choose correct principle of IOT \_\_\_\_\_.  
a) focus on the value  
b) focus on the machine  
c) build a strong machine  
d) neither one
- 14) \_\_\_\_\_ in the IoT Architecture is the hardware and software gateways that analyze and pre-process the data before transferring it to the cloud.  
a) Data center  
b) Edge IT  
c) Gateways  
d) Data Acquisition

 3) Figures to the right indicates full marks

**MCQ/Objective Type Questions**

Duration: 30 Minutes

Marks: 14

**Q.1 Solve Multiple Choice Questions.**

**14**

- 1) Test cases should uncover errors like
  - a) Nonexistent loop termination
  - b) Comparison of different data types
  - c) Incorrect logical operators or precedence
  - d) All of these
- 2) The object of \_\_\_\_\_ within an OO system is to design tests that have a high likelihood of uncovering plausible bugs.
  - a) Fault-based testing
  - b) Integration testing
  - c) Use-based testing
  - d) Scenario-based testing
- 3) Which testing tool is responsible for documenting programs?
  - a) Test/File Generator
  - b) Test Harness System
  - c) Test Archiving Systems
  - d) Coverage Analyzer
- 4) Which of the following testing tools examine program systematically & automatically?
  - a) Code Inspector
  - b) Static Analyzer
  - c) Standard Enforcer
  - d) Coverage Analyzer
- 5) Name an evaluation technique to assess the quality of test cases.
  - a) Mutation analysis
  - b) Validation
  - c) Verification
  - d) Performance analysis
- 6) Which of the following is not a conflict in software development team?
  - a) Simultaneous updates
  - b) Shared and common code
  - c) Versions
  - d) Graphics issues
- 7) Quality also can be looked at in terms of user satisfaction which includes
  - a) A compliant product
  - b) Good quality output
  - c) Delivery within budget and schedule
  - d) All of these
- 8) A testing strategy that test the application as a whole.
  - a) Requirement Gathering
  - b) Verification testing
  - c) Validation testing
  - d) System testing

- 9) A set of activities that ensure that software correctly implements a specific function.
- |                   |               |
|-------------------|---------------|
| a) verification   | b) testing    |
| c) implementation | d) validation |
- 10) Which granularity level of testing checks the behaviour of module cooperation?
- |                       |                        |
|-----------------------|------------------------|
| a) Unit Testing       | b) Integration Testing |
| c) Acceptance Testing | d) Regression Testing  |
- 11) Acceptance & system test planning are a part of architectural design.
- |         |          |
|---------|----------|
| a) True | b) False |
|---------|----------|
- 12) Lower and upper limits are present in which chart?
- |                  |                  |
|------------------|------------------|
| a) Run chart     | b) Bar chart     |
| c) Control chart | d) None of these |
- 13) Which of the following is/are White box technique?
- |                       |                     |
|-----------------------|---------------------|
| a) Statement Testing  | b) Decision Testing |
| c) Condition Coverage | d) All of these     |
- 14) Which of the following is non-functional testing?
- |                      |                        |
|----------------------|------------------------|

 4) Assume suitable data wherever needed and mention it clearly.

**MCQ/Objective Type Questions**

Duration: 30 Minutes

Marks: 14

**Q.1 Choose the correct alternatives from the given options:**

**14**

- 1) A decision\_\_\_\_\_ is if it is based on well-defined and recurring decision-making procedure.
 

a) Structured Decisions	b) Unstructured Decisions
c) Semi-structured decisions	d) None of the mentioned
- 2) \_\_\_\_\_ type of decisions affects the entire organization or at least a substantial part of it for a long period of time.
 

a) Tactical decisions	b) Strategic decisions
c) Operational decisions	d) Structured decisions
- 3) Independent variable in regression analysis is also known as \_\_\_\_\_.
 

a) Predictor variable	b) Target variable
c) Outliers	d) None of the mentioned
- 4) Which of the following is/are Benefits of Dimensional Modelling?
 

a) Faster Data Retrieval	b) Better Understandability
c) Extensibility	d) All of the mentioned
- 5) Due to normalization in the Snowflake schema, the redundancy is reduced and therefore, it becomes easy to maintain and save the storage space. (State True/False)
 

a) True	b) False
---------	----------
- 6) \_\_\_\_\_ is the last step in decision-making process?
 

a) Intelligence	b) Design
c) Choice	d) Control
- 7) DSS refers to \_\_\_\_\_.
 

a) Decision Designing System	b) Decision Support System
c) Declaration Support System	d) Decision Supply System
- 8) Which of the following techniques is/are adapted to improve the quality of incomplete data?
 

a) Elimination	b) Inspection
c) Identification	d) All of the above

**Fourth Year (B.Tech.) (Sem – I) (New) (CBCS) Examination: Oct/Nov-2022**  
**COMPUTER ENGINEERING**  
**Business Intelligence**

Day & Date: Thursday, 09-02-2023  
 Time: 02:00 PM To 05:00 PM

Max. Marks: 56

**Instructions:** 1) All questions are compulsory.  
 2) Figures to the right indicate full marks.

**Section – I**

**Q.2 Attempt any Three (each carries 4 marks):** **12**

- a) How Data mining process provide useful knowledge to decision makers? Explain with neat diagram.
- b) Define Decision system. Describe the phases of Decision-making process in detail.
- c) What do you mean by Ethics on BI?
- d) Differentiate between fact table and dimension table.

**Q.3 Attempt any Two (each carries 8 marks):** **16**

- a) Draw architecture of business intelligence system and explain its components.
- b) What do you mean by data validation? Explain techniques used for data validation.
- c) Design Dimension Models for “Web page clicking event” using Star constellation schema

**Section – II**

**Q.4 Attempt any Three (each carries 4 marks):** **12**

- a) Describe the purpose of Market basket analysis.
- b) Define Time series. How evaluation and analysis of time series take place?
- c) Compare Bivariate and multivariate analysis.
- d) Write a short note on Web-mining.

**Q.5 Attempt any Two (each carries 8 marks):** **16**

- a) Describe the purpose of Regression models and explain linear and logistic regression in detail.
- b) Elaborate the classification tree with suitable example.
- c) What are the motivation and objectives for the spread of relational marketing strategies?

Day & Date: Thursday, 09-02-2023  
 Time: 02:00 PM To 05:00 PM

Max. Marks: 70

- Instructions:** 1) Q. No. 1 is compulsory. It should be solved in the first 30 minutes in answer book. Page no 03 (Starting page of the Answer Book). Each question carries one mark.  
 2) Don't forget to Mention question paper set (P/Q/R/S) on top of page.  
 3) Figures to the right indicates full marks  
 4) Assume suitable data wherever needed and mention it clearly.

**MCQ/Objective Type Questions**

Duration: 30 Minutes

Marks: 14

**Q.1 Choose the correct alternatives from the given options:**

**14**

- 1) Which of the following techniques is/are adapted to improve the quality of incomplete data?
  - a) Elimination
  - b) Inspection
  - c) Identification
  - d) All of the above
- 2) In Univariate analysis data can be display using Frequency distribution table. (State True/False)
  - a) True
  - b) False
- 3) In which type of variable, changing the order of the unit does not change their values.
  - a) Nominal
  - b) Ordinal
  - c) Predictor
  - d) Target
- 4) Web mining method is used for \_\_\_\_\_.
  - a) Content mining
  - b) Structure mining
  - c) Usage mining
  - d) All of the above
- 5) Business Intelligence and data warehousing is used for \_\_\_\_\_.
  - a) Forecasting
  - b) Data Mining
  - c) Analysis of large volumes of product sales data
  - d) All of the above.
- 6) \_\_\_\_\_ describes the data contained in the data warehouse.
  - a) Relational data
  - b) Operational data
  - c) Metadata
  - d) Informational data
- 7) modelling is used for the design of the data warehouse.
  - a) Relational model
  - b) Object-oriented model
  - c) Dimensional model
  - d) None of the above

- 8) A decision\_\_\_\_\_ is if it is based on well-defined and recurring decision-making procedure.
- a) Structured Decisions                      b) Unstructured Decisions  
c) Semi-structured decisions                d) None of the mentioned
- 9) \_\_\_\_\_ type of decisions affects the entire organization or at least a substantial part of it for a long period of time.
- a) Tactical decisions                          b) Strategic decisions  
c) Operational decisions                      d) Structured decisions
- 10) Independent variable in regression analysis is also known as \_\_\_\_\_.  
a) Predictor variable                          b) Target variable  
c) Outliers                                      d) None of the mentioned

**Fourth Year (B. Tech) (Sem-I) (New) (CBCS) Examination: Oct/Nov-2022**  
**COMPUTER ENGINEERING**  
**Data Mining**

Day & Date: Thursday, 09-02-2023  
Time: 02:00 PM To 05:00 PM

Max. Marks: 56

**Instructions:** 1) All questions are compulsory.  
2) Figures to the right indicate full marks.

**Section – I**

**Q.2 Solve any three** **12**

- a) What is data mining?
- b) Explain classic problems in machine learning that are highly related to data mining.
- c) What are different forms of data preprocessing?
- d) Illustrate the steps followed by the Web mining framework w.r.t. Health care and Medical data.

**Q.3 Solve any two** **16**

- a) Define each of the following data mining functionalities: characterization, discrimination, association and correlation analysis, classification, regression, clustering, and outlier analysis. Give examples of each data mining functionality, using a real-life database that you are familiar with.
- b) Use a flowchart to summarize the following procedures for attribute subset selection
  - a) stepwise forward selection
  - b) stepwise backward elimination
  - c) a combination of forward selection and backward elimination
- c) What are major issues in data mining?

**Section – II**

**Q.4 Solve any three** **12**

- a) Explain large itemset algorithm
- b) How do you measure the quality of rules
- c) What are advanced association rule techniques?
- d) Explain decision tree based algorithms.

**Q.5 Solve any two** **16**

- a) Give an example for Apriori with transaction and explain Apriori-gen-algorithm.
- b) Explain sampling algorithm with an example.
- c) What do you mean by partitioning?

Marks: 14

**Q.1 Choose the correct alternatives.**

**14**

- 1) Management information systems (MIS) \_\_\_\_\_.
  - a) create and share documents that support day-to-day office activities
  - b) process business transactions (e.g., time cards, payments, orders, etc.)
  - c) capture and reproduce the knowledge of an expert problem solver
  - d) use the transaction data to produce information needed by managers to run the business
- 2) The MIS helps the \_\_\_\_\_ management in goal setting, strategic planning, and evolving the business plans and their implementation.
  - a) low level
  - b) middle level
  - c) top level
  - d) base level
- 3) Organizational culture is powerful unifying force than \_\_\_\_\_.
  - a) Restrains political conflict
  - b) Restrains common understanding
  - c) Restrains agreement on procedures and practices
  - d) All of the above
- 4) \_\_\_\_\_ is the first step in system development life cycle.
  - a) Designing
  - b) Planning
  - c) Analysis
  - d) Implementation
- 5) Which of the following is not an IT infrastructure service component?
  - a) operating system software
  - b) computing platforms to provide a coherent digital environment
  - c) physical facilities management to manage the facilities housing physical components
  - d) IT education services that provide training to employees
- 6) Which of the following is a data analysis technology that find hidden connection between data in disparate sources?
  - a) HIPPA
  - b) FIP
  - c) NORA
  - d) Spyware

Duration: 30 Minutes

Marks: 14

**Q.1 Choose the correct alternatives from the options and rewrite the sentence. 14**

- 1) Many Cyber Crimes comes under Indian Penal Code Which one of the following is an example?
  - a) Sending Threatening message by Email
  - b) Forgery of Electronic Record
  - c) Bogus Website
  - d) All of above
- 2) The following cannot be exploited by assigning or by licensing the rights of others
  - a) Patent
  - b) Design
  - c) Trademark
  - d) All of the above
- 3) What is a node?
  - a) A type of cryptocurrency
  - b) A Blockchain
  - c) A computer on a Blockchain network
  - d) An exchange
- 4) The term used for a blockchain splits is \_\_\_\_\_.
  - a) A merger
  - b) A fork
  - c) A division
  - d) None of the above
- 5) Bitcoin is created by \_\_\_\_\_.
  - a) Saifedean Ammous
  - b) Vitalik Buterin
  - c) Satoshi Nakamoto
  - d) None of the above
- 6) Which of the following is /are offered by the Hash functions?
  - a) Authentication
  - b) Non repudiation
  - c) Data Integrity
  - d) All of the above
- 7) In brute force attack, on average half of all possible keys must be tried to achieve success.
  - a) True
  - b) False
- 8) If the sender and receiver use different keys, the system is referred to as conventional cipher system.
  - a) True
  - b) False

- 9) Pretty good privacy (PGP) security system uses
- a) Public key cryptosystem
  - b) Private key cryptosystem
  - c) Public & Private key cryptosystem
  - d) None of the mentioned
- 10) Use Caesar's Cipher to decipher the following  
HQFUBSWHG WHAW
- a) Abandoned Lock
  - b) Encrypted Text
  - c) Abandoned Text
  - d) Encrypted Lock
- 11) IPSec is designed to provide security at the\_\_\_\_\_.
- a) Transport layer
  - b) Network layer
  - c) Application layer
  - d) Session layer
- 12) Which of the following is not a type of cyber crime?
- a) Data theft
  - b) Forgery
  - c) Damage to data and systems
  - d) installing antivirus for protection
- 13) What is cipher-block chaining?
- a) Data is logically 'ANDed' with previous block
  - b) Data is logically 'ORed' with previous block
  - c) Data is logically 'XORed' with previous block
  - d) None of the mentioned
- 14) What is a Hash Function?
- a) It creates a small flexible block of data

**Information & Cyber Security**

Day & Date: Thursday, 16-02-2023  
 Time: 02:00 PM To 05:00 PM

Max. Marks: 56

**Instructions:** 1) Section I and Section II are compulsory.  
 2) Figures to the right indicate full marks.

**Q.2 Solve any three of the following questions.** **12**

- Define and Compare Active and Passive attack.
- Explain Public Key Infrastructure with diagram.
- Using this Playfair matrix.

M	F	H	I/J	K
U	N	O	P	Q
Z	V	W	X	Y
E	L	A	R	G
D	S	T	B	C

Encrypt the given message: *Must see you over Cadogan West. Coming at once.*

- Explain – Digital Signature

**Q.3 Solve any one of the following questions.** **08**

- Encrypt the message "*meet me at the usual place at ten rather than eight oclock*" using the Hill cipher  $\begin{pmatrix} 9 & 4 \\ 5 & 7 \end{pmatrix}$  with the key  
 Show your calculations and the result.
- Users A and B use the Diffie-Hellman key exchange technique with a common prime  $q = 71$  and a primitive root  $\alpha = 7$ .
  - If user A has private key  $X_A = 5$ , what is A's public key  $Y_A$ ?
  - If user B has private key  $X_B = 12$ , what is B's public key  $Y_B$ ?
  - What is the shared secret key?

**Q.4 Explain in detail RSA Algorithm.** **08**

**Section – II**

**Q.5 Solve any three of the following questions.** **12**

- What is Bitcoin? List some properties of Bitcoin.
- How did forensic happen? How can this be prevented from happening again in the future?
- List some applications of block chain life.
- Explain PGP.

**Q.6 Solve any one of the following questions.**

- a)** Define block chain? And list some difference between Public and Private Blockchain.
- b)** What are Cyber Security Standards? List different Cyber Security Standards and explain any one in brief.

**Q.7 Explain Proof of Work and proof of Stake.**

**08**

Set **Q**

**Fourth Y. (B.Tech) (Sem - II) (New) (CBCS) Examination: Oct/Nov-2022**  
**COMPUTER SCIENCE & ENGINEERING**  
**Information & Cyber Security**

Day & Date: Thursday, 16-02-2023  
 Time: 02:00 PM To 05:00 PM

Max. Marks: 56

**Instructions:** 1) Section I and Section II are compulsory.  
 2) Figures to the right indicate full marks.

**Q.2 Solve any three of the following questions.** **12**

- Define and Compare Active and Passive attack.
- Explain Public Key Infrastructure with diagram.
- Using this Playfair matrix.

M	F	H	I/J	K
U	N	O	P	Q
Z	V	W	X	Y
E	L	A	R	G
D	S	T	B	C

Encrypt the given message: *Must see you over Cadogan West. Coming at once.*

- Explain – Digital Signature

**Q.3 Solve any one of the following questions.** **08**

- Encrypt the message "*meet me at the usual place at ten rather than eight oclock*" using the Hill cipher  $\begin{pmatrix} 9 & 4 \\ 5 & 7 \end{pmatrix}$  with the key  
 Show your calculations and the result.
- Users A and B use the Diffie-Hellman key exchange technique with a common prime  $q = 71$  and a primitive root  $\alpha = 7$ .
  - If user A has private key  $X_A = 5$ , what is A's public key  $Y_A$ ?
  - If user B has private key  $X_B = 12$ , what is B's public key  $Y_B$ ?
  - What is the shared secret key?

**Q.4 Explain in detail RSA Algorithm.** **08**

**Section – II**

**Q.5 Solve any three of the following questions.** **12**

- What is Bitcoin? List some properties of Bitcoin.
- How did forensic happen? How can this be prevented from happening again in the future?
- List some applications of block chain life.
- Explain PGP.

**Q.6 Solve any one of the following questions.**

- a)** Define block chain? And list some difference between Public and Private Blockchain.
- b)** What are Cyber Security Standards? List different Cyber Security Standards and explain any one in brief.

**Q.7 Explain Proof of Work and proof of Stake.**

**08**

<b>Seat No.</b>	
-----------------	--

- 7) What is a node?
- a) A type of cryptocurrency
  - b) A Blockchain
  - c) A computer on a Blockchain network
  - d) An exchange
- 8) The term used for a blockchain splits is\_\_\_\_\_.
- a) A merger
  - b) A fork
  - c) A division
  - d) None of the above
- 9) Bitcoin is created by \_\_\_\_\_.
- a) Saifedean Ammous
  - b) Vitalik Buterin
  - c) Satoshi Nakamoto
  - d) None of the above
- 10) Which of the following is /are offered by the Hash functions?
- a) Authentication
  - b) Non repudiation
  - c) Data Integrity
  - d) All of the above
- 11) In brute force attack, on average half of all possible keys must be tried to achieve success.
- a) True
  - b) False
- 12) If the sender and receiver use different keys, the system is referred to as conventional cipher system.
- a) True
  - b) False
- 13) Pretty good privacy (PGP) security system uses
- a) Public key cryptosystem
  - b) Private key cryptosystem
  - c) Public & Private key cryptosystem
  - d) None of the mentioned
- 14) Use Caesar's Cipher to decipher the following  
HQFUBSWHG WHAW
- a) Abandoned Lock
  - b) Encrypted Text
  - c) Abandoned Text
  - d) Encrypted Lock

**Big Data Analytics**

Day & Date: Monday, 20-02-2023  
 Time: 02:00 PM To 05:00 PM

Max. Marks: 70

- Instructions:** 1) Q. No. 1 is compulsory. It should be solved in the first 30 minutes in answer book. Page no 03 (Starting page of the Answer Book). Each question carries one mark.  
 2) Don't forget to Mention question paper set (P/Q/R/S) on top of page.  
 3) Figures to the right indicate full marks.

**MCQ/Objective Type Questions**

Duration: 30 Minutes

Marks: 14

**Q.1 Choose the correct alternatives from the options.**

**14**

- 1) Select the characteristics of Semi-structured data
 

a) Inconsistent Structure	b) Self-describing
c) Schema blended with value	d) All
- 2) What is the characteristic of data dealing with its retention?
 

a) Volatility	b) Variability
c) Velocity	d) Volume
- 3) System will continue to function even when network partition occurs is \_\_\_\_\_ in CAP Theorem.
 

a) Consistency	b) Availability
c) Partition Tolerant	d) None of the above
- 4) Choose the human generated unstructured data
 

a) Scientific data	b) Social media data
c) point-of-scale	d) Mobile data
- 5) Analytics 3.0 provides \_\_\_\_\_.
 

a) Descriptive Statistics	b) Predictive Statistics
c) Prescriptive Statistics	d) All
- 6) The \_\_\_\_\_ technology helps query data that resides in a computer's RAM rather than data stored on physical disks.
 

a) Massively Parallel Processing
b) In-Memory analytics
c) Symmetric Multiprocessing System
d) Distributed Systems
- 7) How are keys and values presented and passed to the reducers during a standard sort and shuffle phase of MapReduce?
 

a) Keys are presented to reducer in sorted order; values for a given key are not sorted correct
b) Keys are presented to reducer in sorted order; values for a given key are sorted in ascending order
c) Keys are presented to a reducer in random order; values for a given key are not sorted
d) Keys are presented to a reducer in random order; values for a given key are sorted in ascending order

- 8) Which configuration file is used to control the HDFS replication factor?  
a) mapred-site.xml                      b) hdfs-site.xml  
c) core-site.xml                         d) yarn-site.xml
- 9) Hadoop focuses on moving \_\_\_\_\_ to \_\_\_\_\_.  
a) Code, Code                              b) Data, Data  
c) Code, Data                               d) Data, Code
- 10) Apache Cassandra is a massively scalable open source \_\_\_\_\_ database.  
a) SQL                                        b) NoSQL  
c) NewSQL                                  d) All of the mentioned
- 11) Which of the following is true about Apache Cassandra?  
a) Apache Cassandra is a free and open-source  
b) Apache Cassandra is a distributed  
c) Apache Cassandra has wide column store  
d) All of the above
- 12) Cassandra uses a protocol called \_\_\_\_\_ to discover location and state information.  
a) gossip                                      b) intercos  
c) goss                                         d) all of the mentioned
- 13) You can run Pig in batch mode using \_\_\_\_\_.  
a) Pig shell command                      b) Pig scripts  
c) Pig options                                d) All of the mentioned
- 14) Which of the following is used by Hive?  
a) HDFS for storage                        b) Map Reduce for execution  
c) RDBMS for metadata storage        d) All of the above

**Fourth Y. (B.Tech.) (Sem - II) (New) (CBCS) Examination: Oct/Nov-2022**  
**COMPUTER SCIENCE & ENGINEERING**  
**Big Data Analytics**

Day & Date: Monday, 20-02-2023  
Time: 02:00 PM To 05:00 PM

Max. Marks: 56

**Instructions:** 1) Section I and Section II are compulsory.  
2) Figures to the right indicate full marks

**Section – I**

- Q.2 Solve any three of the following questions. 12**
- a) What are the sources of unstructured data and why social media data is placed in the unstructured category? Elaborate with proper example.
  - b) How to deal with unstructured data and why an email is placed in the unstructured category? Elaborate with proper example.
  - c) Distinguish the features of Hadoop 1.0 and Hadoop 2.x and Describe with YARN architecture.
  - d) What is anatomy of File read and File? Write operations in HDFS Daemons. Write steps with the diagram.
- Q.3 Solve any one of the following questions. 08**
- a) With proper block diagram of Data warehouse and Hadoop environment show how Hadoop is different from Data warehouse.
- OR**
- b) What is CAP theorem? Why it guarantees only two terms out of three? Elaborate with reason.
- Q.4 Elaborate the Hadoop Ecosystem components according to their usage and give examples. 08**

**Section – II**

- Q.5 Solve any three of the following questions. 12**
- a) Use the MongoDB collection for students and apply the queries for CRUD operations and list the queries with output. (Consider the proper collection elements)
  - b) How writes are treated in Cassandra? Elaborate tunable consistency in Cassandra.
  - c) Elaborate Hive architecture with its components.
  - d) What is Pig Latin? Explain the ETL processing with Pig.

**Q.6 Solve any one of the following questions.**

- a) For Cassandra write the syntax for Create, Insert, Alter, Sort and write queries for the following.
- 1) Create a table employee in Cassandra which has attributes.  
{emp-id, emp-name, doj, desg, sal} and set PRIMARY KEY
  - 2) Insert data of three employees and Find all employees whose sal>40k
  - 3) Alter table to add new attribute email-id as set collection data type and insert set of email-ids for all employees.
  - 4) Sort the table by emp-name

**OR**

- b) Consider the following MongoDB Collection and for all the queries write the output

```
{
  "address": {
    "building": "1007",
    "coord": [ -73.856077, 40.848447],
    "street": "Morris Park Ave",
    "zipcode": "10462"
  },
  "borough": "Bronx",
  "cuisine": "Bakery",
  "grades": [
    { "date": { "$date": 1393804800000 }, "grade": "A", "score": 2 },
    { "date": { "$date": 1378857600000 }, "grade": "A", "score": 6 },
    { "date": { "$date": 1358985600000 }, "grade": "A", "score": 10 },
    { "date": { "$date": 1322006400000 }, "grade": "A", "score": 9 },
    { "date": { "$date": 1299715200000 }, "grade": "B", "score": 14 }
  ],
  "name": "Morris Park Bake Shop",
  "restaurant_id": "30075445"
}
```

- 1) Write a MongoDB query to insert the above data into a database "mydb" and Collection "restaurants" collection
- 2) Write a MongoDB query to display all the documents in the collection "restaurants".
- 3) Write a MongoDB query to display the fields restaurant\_id, name, borough and cuisine for all the documents in the collection "restaurants".
- 4) Write a MongoDB query to update name of the restaurant as "Bakers Shop"

**Q.7 Write HQL (HIVE QUERY LANGUAGE) queries along with its syntax for the following.**

- a) Create a table named student having fields.  
{rollno, name, year, department}
- b) Insert the data of three students from text file using LOAD statement
- c) Add three Partitions to the table and rename them to SY, TY and Finalyear
- d) Drop a Partition Finalyear from the table

<b>Seat No.</b>	
-----------------	--

- 10)** System will continue to function even when network partition occurs is \_\_\_\_\_ in CAP Theorem.
- a) Consistency

- What are the sources of unstructured data and why social media data is placed in the unstructured category? Elaborate with proper example.
- How to deal with unstructured data and why an email is placed in the unstructured category? Elaborate with proper example.
- Distinguish the features of Hadoop 1.0 and Hadoop 2.x and Describe with YARN architecture.
- What is anatomy of File read and File? Write operations in HDFS Daemons. Write steps with the diagram.

**Q.3 Solve any one of the following questions. 08**

- With proper block diagram of Data warehouse and Hadoop environment show how Hadoop is different from Data warehouse.

**OR**

- What is CAP theorem? Why it guarantees only two terms out of three? Elaborate with reason.

**Q.4 Elaborate the Hadoop Ecosystem components according to their usage and give examples. 08**

**Section – II**

**Q.5 Solve any three of the following questions. 12**

- Use the MongoDB collection for students and apply the queries for CRUD operations and list the queries with output. (Consider the proper collection elements)
- How writes are treated in Cassandra? Elaborate tunable consistency in Cassandra.
- Elaborate Hive architecture with its components.
- What is Pig Latin? Explain the ETL processing with Pig.

**Q.6 Solve any one of the following questions.**

- a) For Cassandra write the syntax for Create, Insert, Alter, Sort and write queries for the following.
- 1) Create a table employee in Cassandra which has attributes.  
{emp-id, emp-name, doj, desg,sal} and set PRIMARY KEY
  - 2) Insert data of three employees and Find all employees whose sal>40k
  - 3) Alter table to add new attribute email-id as set collection data type and insert set of email-ids for all employees.
  - 4) Sort the table by emp-name

**OR**

- b) Consider the following MongoDB Collection and for all the queries write the output

```
{
  "address": {
    "building": "1007",
    "coord": [ -73.856077, 40.848447],
    "street": "Morris Park Ave",
    "zipcode": "10462"
  },
  "borough": "Bronx",
  "cuisine": "Bakery",
  "grades": [
    { "date": { "$date": 1393804800000 } , "grade": "A", "score": 2},
    { "date": { "$date": 1378857600000 } , "grade": "A", "score": 6},
    { "date": { "$date": 1358985600000 } , "grade": "A", "score": 10},
    { "date": { "$date": 1322006400000 } , "grade": "A", "score": 9 },
    { "date": { "$date": 1299715200000 } , "grade": "B", "score": 14}
  ],
  "name": "Morris Park Bake Shop",
  "restaurant_id": "30075445"
}
```

- 1) Write a MongoDB query to insert the above data into a database "mydb" and Collection "restaurants" collection
- 2) Write a MongoDB query to display all the documents in the collection "restaurants".
- 3) Write a MongoDB query to display the fields restaurant\_id, name, borough and cuisine for all the documents in the collection "restaurants".
- 4) Write a MongoDB query to update name of the restaurant as "Bakers Shop"

**Q.7 Write HQL (HIVE QUERY LANGUAGE) queries along with its syntax for the following.**

- a) Create a table named student having fields.  
{rollno, name, year, department}
- b) Insert the data of three students from text file using LOAD statement
- c) Add three Partitions to the table and rename them to SY, TY and Finalyear
- d) Drop a Partition Finalyear from the table

**Fourth Y. (B.Tech.) (Sem - II) (New) (CBCS) Examination: Oct/Nov-2022**  
**COMPUTER SCIENCE & ENGINEERING**  
**Big Data Analytics**

Day & Date: Monday, 20-02-2023  
 Time: 02:00 PM To 05:00 PM

Max. Marks: 70

- Instructions:** 1) Q. No. 1 is compulsory. It should be solved in the first 30 minutes in answer book. Page no 03 (Starting page of the Answer Book). Each question carries one mark.  
 2) Don't forget to Mention question paper set (P/Q/R/S) on top of page.  
 3) Figures to the right indicate full marks.

**MCQ/Objective Type Questions**

Duration: 30 Minutes

Marks: 14

**Q.1 Choose the correct alternatives from the options.**

**14**

- 1) The \_\_\_\_\_ technology helps query data that resides in a computer's RAM rather than data stored on physical disks.
  - a) Massively Parallel Processing
  - b) In-Memory analytics
  - c) Symmetric Multiprocessing System
  - d) Distributed Systems
- 2) How are keys and values presented and passed to the reducers during a standard sort and shuffle phase of MapReduce?
  - a) Keys are presented to reducer in sorted order; values for a given key are not sorted correct
  - b) Keys are presented to reducer in sorted order; values for a given key are sorted in ascending order
  - c) Keys are presented to a reducer in random order; values for a given key are not sorted
  - d) Keys are presented to a reducer in random order; values for a given key are sorted in ascending order
- 3) Which configuration file is used to control the HDFS replication factor?
  - a) mapred-site.xml
  - b) hdfs-site.xml
  - c) core-site.xml
  - d) yarn-site.xml
- 4) Hadoop focuses on moving \_\_\_\_\_ to \_\_\_\_\_.
  - a) Code, Code
  - b) Data, Data
  - c) Code, Data
  - d) Data, Code
- 5) Apache Cassandra is a massively scalable open source \_\_\_\_\_ database.
  - a) SQL
  - b) NoSQL
  - c) NewSQL
  - d) All of the mentioned
- 6) Which of the following is true about Apache Cassandra?
  - a) Apache Cassandra is a free and open-source
  - b) Apache Cassandra is a distributed
  - c) Apache Cassandra has wide column store
  - d) All of the above

- 7) Cassandra uses a protocol called \_\_\_\_\_ to discover location and state information.
- a) gossip
  - b) intergos
  - c) goss
  - d) all of the mentioned
- 8) You can run Pig in batch mode using \_\_\_\_\_.
- a) Pig shell command
  - b) Pig scripts
  - c) Pig options
  - d) All of the mentioned
- 9) Which of the following is used by Hive?
- a) HDFS for storage
  - b) Map Reduce for execution
  - c) RDBMS for metadata storage
  - d) All of the above
- 10) Select the characteristics of Semi-structured data
- a) Inconsistent Structure
  - b) Self-describing
  - c) Schema blended with value
  - d) All
- 11) What is the characteristic of data dealing with its retention?
- a) Volatility
  - b) Variability
  - c) Velocity
  - d) Volume
- 12) System will continue to function even when network partition occurs is \_\_\_\_\_ in CAP Theorem.
- a) Consistency
  - b) Availability
  - c) Partition Tolerant
  - d) None of the above
- 13) Choose the human generated unstructured data
- a) Scientific data
  - b) Social media data
  - c) point-of-scale
  - d) Mobile data
- 14) Analytics 3.0 provides \_\_\_\_\_.
- a) Descriptive Statistics
  - b) Predictive Statistics
  - c) Prescriptive Statistics
  - d) All

Set **S**

**Fourth Y. (B.Tech.) (Sem - II) (New) (CBCS) Examination: Oct/Nov-2022**  
**COMPUTER SCIENCE & ENGINEERING**  
**Big Data Analytics**

Day & Date: Monday, 20-02-2023  
 Time: 02:00 PM To 05:00 PM

Max. Marks: 56

**Instructions:** 1) Section I and Section II are compulsory.  
 2) Figures to the right indicate full marks

**Section – I**

- Q.2 Solve any three of the following questions. 12**
- What are the sources of unstructured data and why social media data is placed in the unstructured category? Elaborate with proper example.
  - How to deal with unstructured data and why an email is placed in the unstructured category? Elaborate with proper example.
  - Distinguish the features of Hadoop 1.0 and Hadoop 2.x and Describe with YARN architecture.
  - What is anatomy of File read and File? Write operations in HDFS Daemons. Write steps with the diagram.
- Q.3 Solve any one of the following questions. 08**
- With proper block diagram of Data warehouse and Hadoop environment show how Hadoop is different from Data warehouse.
- OR**
- What is CAP theorem? Why it guarantees only two terms out of three? Elaborate with reason.
- Q.4 Elaborate the Hadoop Ecosystem components according to their usage and give examples. 08**

**Section – II**

- Q.5 Solve any three of the following questions. 12**
- Use the MongoDB collection for students and apply the queries for CRUD operations and list the queries with output. (Consider the proper collection elements)
  - How writes are treated in Cassandra? Elaborate tunable consistency in Cassandra.
  - Elaborate Hive architecture with its components.
  - What is Pig Latin? Explain the ETL processing with Pig.

**Q.6 Solve any one of the following questions.**

- a) For Cassandra write the syntax for Create, Insert, Alter, Sort and write queries for the following.
- 1) Create a table employee in Cassandra which has attributes.  
{emp-id, emp-name, doj, desg, sal} and set PRIMARY KEY
  - 2) Insert data of three employees and Find all employees whose sal>40k
  - 3) Alter table to add new attribute email-id as set collection data type and insert set of email-ids for all employees.
  - 4) Sort the table by emp-name

**OR**

- b) Consider the following MongoDB Collection and for all the queries write the output

```
{
  "address": {
    "building": "1007",
    "coord": [ -73.856077, 40.848447],
    "street": "Morris Park Ave",
    "zipcode": "10462"
  },
  "borough": "Bronx",
  "cuisine": "Bakery",
  "grades": [
    { "date": { "$date": 1393804800000 }, "grade": "A", "score": 2 },
    { "date": { "$date": 1378857600000 }, "grade": "A", "score": 6 },
    { "date": { "$date": 1358985600000 }, "grade": "A", "score": 10 },
    { "date": { "$date": 1322006400000 }, "grade": "A", "score": 9 },
    { "date": { "$date": 1299715200000 }, "grade": "B", "score": 14 }
  ],
  "name": "Morris Park Bake Shop",
  "restaurant_id": "30075445"
}
```

- 1) Write a MongoDB query to insert the above data into a database "mydb" and Collection "restaurants" collection
- 2) Write a MongoDB query to display all the documents in the collection "restaurants".
- 3) Write a MongoDB query to display the fields restaurant\_id, name, borough and cuisine for all the documents in the collection "restaurants".
- 4) Write a MongoDB query to update name of the restaurant as "Bakers Shop"

**Q.7 Write HQL (HIVE QUERY LANGUAGE) queries along with its syntax for the following.**

- a) Create a table named student having fields.  
{rollno, name, year, department}
- b) Insert the data of three students from text file using LOAD statement
- c) Add three Partitions to the table and rename them to SY, TY and Finalyear
- d) Drop a Partition Finalyear from the table

## Max. Marks: 70

Marks: 14

Page 1 of 12

- 8) What is Machine Translation?
- a) Converts one human language to another
  - b) Converts human language to machine language
  - c) Converts any human language to English
  - d) Converts Machine language to human language
- 9) The more general task of co-reference resolution also includes identifying so-called “bridging relationships” involving referring expressions.
- a) True
  - b) False
  - c) Can't say
  - d) none of above
- 10) What is Morphological Segmentation?
- a) Does Discourse Analysis
  - b) Separate words into individual morphemes and identify the class of the morphemes
  - c) Is an extension of propositional logic
  - d) None of the mentioned
- 11) Given a stream of text, Named Entity Recognition determines which pronoun maps to which noun.
- a) False
  - b) True
  - c) Can't say
  - d) none of above
- 12) Natural Language generation is the main task of Natural language processing.
- a) True
  - b) False
  - c) Can't say
  - d) none of above
- 13) OCR (Optical Character Recognition) uses NLP.
- a) True
  - b) False
  - c) Can't say
  - d) none of above
- 14) Parts-of-Speech tagging determines \_\_\_\_\_.
- a) part-of-speech for each word dynamically as per meaning of the sentence
  - b) part-of-speech for each word dynamically as per sentence structure
  - c) all part-of-speech for a specific word given as input
  - d) all of the mentioned

**Fourth Y. (B.Tech.) (Sem-II) (New) (CBCS) Examination: Oct/Nov-2022**  
**COMPUTER SCIENCE & ENGINEERING**  
**Cloud Computing**

Day & Date: Wednesday, 22-02-2023  
 Time: 02:00 PM To 05:00 PM

Max. Marks: 70

- Instructions:** 1) Q. No. 1 is compulsory. It should be solved in the first 30 minutes in answer book. Page no 03 (Starting page of the Answer Book). Each question carries one mark.  
 2) Don't forget to Mention question paper set (P/Q/R/S) on top of page.  
 3) Figures to the right indicates full marks

**MCQ/Objective Type Questions**

Duration: 30 Minutes

Marks: 14

**Q.1 Choose the correct alternatives from the options and rewrite the sentence. 14**

- 1) Which of the following is essential concept related to Cloud?
 

a) Reliability	b) Productivity
c) Abstraction	d) All of the mentioned
- 2) Point out the correct statement:
 

a) A client can request access to a cloud service from any location.
b) A cloud has multiple application instances and directs requests to an instance based on conditions.
c) Computers can be partitioned into a set of virtual machines with each machine being assigned
d) All of the mentioned
- 3) Which of the following is not a type of cloud?
 

a) private	b) public
c) protected	d) hybrid
- 4) SaaS stands for?
 

a) Software as a service
b) System software and services
c) Software as a system
d) System as a service
- 5) Which delivery model is an example of a cloud computing environment that provides users access to virtual machines?
 

a) Platform as a Service	b) Software as a Service
c) Application as a Service	d) Infrastructure as a service
- 6) Which of the following is key mechanism for protecting data?
 

a) Access control	b) Auditing
c) Authentication	d) All of the mentioned
- 7) A cloud providers offers environment for building the applications that will runs from customers environment. Which Cloud computing delivery model they are using?
 

a) Platform as a Service	b) Software as a Service
c) Application as a Service	d) Infrastructure as a Service

- 8) Which of the following model type is not trusted in terms of security?
- a) Public
  - b) Private
  - c) Hybrid
  - d) None of the mentioned
- 9) Which of the following allows you to create instances of the MySQL database to support your Websites?
- a) Amazon Elastic ComputeCloud
  - b) Amazon Simple QueueService
  - c) Amazon Relational DatabaseService
  - d) Amazon Simple StorageSystem
- 10) Point out the correct statement:
- a) Except for tightly managed SaaS cloud providers, the burden of resource management is still in the hands of the user
  - b) Cloud computing vendors run very reliable networks
  - c) The low barrier to entry cannot be accompanied by a low barrier to provisioning
  - d) All of the mentioned
- 11) Point out the wrong statement:
- a) Public cloud managed by the constituent organization(s) or by a third party
  - b) A community cloud managed by the constituent organization(s) or by a third party
  - c) Private clouds may be either on- or off-premises
  - d) None of the mentioned
- 12) Point out the wrong statement:
- a) Internet consumes roughly 1 percent of the world's total power
  - b) The cost advantages of cloud computing have enabled new software vendors to create productivity applications
  - c) A client can provision computer resources without the need for interaction with cloud service provider personnel
  - d) None of the mentioned
- 13) State True or False Migrating applications to the cloud or between clouds is complicated by having data stored and managed remotely, by external organizations and usually in several locations.
- a) True
  - b) False
- 14) Which of the following is the most important area of concern in cloud computing?
- a) Security
  - b) Storage
  - c) Scalability
  - d) All of the mentioned

- 8) Which of the option is correct regarding following statement?  
Statement 1. Auto encoders are a supervised learning technique.  
Statement 2. Auto encoder's output is exactly the same as the input
- a) Both the statements are TRUE
  - b) Statement 1 is TRUE, but statement 2 is FALSE.
  - c) Statement 1 is FALSE, but statement 2 is TRUE
  - d) Both the statements are FALSE
- 9) Which of the following statement is true regarding dropout?
- 1) Dropout gives a way to approximate by combining many different architectures
  - 2) Dropout demands high learning rates
  - 3) Dropout can help preventing overfitting
- a) Both 1 and 2
  - b) Both 1 and 3
  - c) Both 2 and 3
  - d) All 1, 2 and 3
- 10) IN Neural Network The input from Input layer is then feed into the \_\_\_\_.
- a) Input layer
  - b) Output layer
  - c) Hidden layer
  - d) None of these
- 11) \_\_\_\_\_ computes the output volume by computing dot product between all filters and image patch.
- a) Input Layer
  - b) Convolution Layer
  - c) Activation Function Layer
  - d) Pool Layer
- 12) \_\_\_\_\_ is a pooling operation that selects the maximum element from the region of the feature map covered by the filter.
- a) Max Pooling
  - b) Average Pooling
  - c) Global pooling
  - d) none of these
- 13) The rate at which cost changes with respect to weight or bias is called \_\_\_\_.
- a) Derivative
  - b) Gradient
  - c) Rate of Change
  - d) Loss
- 14) Recurrent Neural Networks are best suited for Text Processing.

  - c) Activation Function Layer
  - d) Pool Layer
- 5) \_\_\_\_\_ is a pooling operation that selects the maximum element from the region of the feature map covered by the filter.
  - a) Max Pooling
  - b) Average Pooling
  - c) Global pooling
  - d) none of these
- 6) The rate at which cost changes with respect to weight or bias is called \_\_\_\_\_.
  - a) Derivative
  - b) Gradient
  - c) Rate of Change
  - d) Loss
- 7) Recurrent Neural Networks are best suited for Text Processing.
  - a) True
  - b) False

- 8) The number of nodes in the input layer is 10 and the hidden layer is 5. The maximum number of connections from the input layer to the hidden layer are \_\_\_\_\_.
  - a) 50
  - b) Less than 50
  - c) More than 50
  - d) It is an arbitrary value
- 9) Which of the following functions can be used as an activation function in the output layer if we wish to predict the probabilities of  $n$  classes ( $p_1, p_2, \dots, p_k$ ) such that sum of  $p$  over all  $n$  equals to 1?
  - a) Softmax
  - b) ReLu
  - c) Sigmoid
  - d) Tanh
- 10) Dimensionality reduction does \_\_\_\_\_.
  - a) reduce computational time
  - b) may lead to some data loss
  - c) remove redundant feature
  - d) all
- 11) Under fitting means \_\_\_\_\_.
  - a) low bias & high variance
  - b) high bias & low variance
  - c) low bias & low variance
  - d) high bias & high variance
- 12) De-noising and Contractive are examples of \_\_\_\_\_.
  - a) Auto encoders
  - b) Convolution Neural Networks
  - c) Recurrent Neural Networks
  - d) None
- 13) The reuse of a pre-trained model on a new problem is known as \_\_\_\_\_.
  - a) Learning rate
  - b) Bias
  - c) variance
  - d) transfer learning
- 14) In the neural network, every parameter can have their different learning rate.
  - a) True
  - b) False
  - c) Can't say
  - d) none of this

-----	---

**Fourth Y. (B.Tech.) (Sem-II) (New) (CBCS) Examination: Oct/Nov-2022**  
**COMPUTER SCIENCE & ENGINEERING**  
**Deep Learning**

Day & Date: Wednesday, 22-02-2023  
 Time: 02:00 PM To 05:00 PM

Max. Marks: 56

- Instructions:** 1) All questions are compulsory.  
 2) Figures to the right indicate full marks  
 3) Assume suitable data wherever needed and mention it clearly.

**Section – I**

- Q.2 Attempt any four** **16**
- Write differences between LOOCV and K fold cross validation.
  - Explain under fitting and overfitting.
  - Assume a simple deep learning model with 3 neurons and inputs = 1, 2, 3. The weights to the input neurons are 7, 8 and 9 respectively. Assume the activation function is a linear constant value of 2. Calculate the output.
  - Describe Gradient based Learning.
  - Write a short note on
    - Early stopping
    - Dropout
- Q.3 Attempt any one** **06**
- What is drawback of RNN? How it is overcome by LSTM? Explain it in details.
  - Explain different convolutional Neural network operations.
- Q.4 Attempt the following** **06**
- Explain various activation functions

**Section – II**

- Q.5 Attempt any Four** **16**
- Explain Deep Architectures of computer Vision.
  - Explain Metric Learning.
  - Write different applications of auto encoder.
  - Explain Siamese Networks.
  - Explain the use of auto encoder in dimensionality reduction & classification.
- Q.6 Attempt any one** **06**
- Define Transfer Learning. Explain in detail
  - Explain RMS Prop Deep Learning Optimizer for RNNs.
- Q.7 Attempt the following** **06**
- What are the different types of auto encoder explain it in details?

Seat No.

**Deep Learning**

Day & Date: Wednesday, 22-02-2023  
 Time: 02:00 PM To 05:00 PM

Max. Marks: 70

- Instructions:** 1) Q. No. 1 is compulsory. It should be solved in the first 30 minutes in answer book. Page no 03 (Starting page of the Answer Book). Each question carries one mark.  
 2) Don't forget to Mention question paper set (P/Q/R/S) on top of page.  
 3) Figures to the right indicates full marks  
 4) Make suitable assumptions (if necessary and state them clearly)

**MCQ/Objective Type Questions**

Duration: 30 Minutes

Marks: 14

**Q.1 Choose the correct alternatives from the options and rewrite the sentence. 14**

- 1) \_\_\_\_\_ computes the output volume by computing dot product between all filters and image patch.
 

a) Input Layer	b) Convolution Layer
c) Activation Function Layer	d) Pool Layer
- 2) \_\_\_\_\_ is a pooling operation that selects the maximum element from the region of the feature map covered by the filter.
 

a) Max Pooling	b) Average Pooling
c) Global pooling	d) none of these
- 3) The rate at which cost changes with respect to weight or bias is called \_\_\_\_\_.
 

a) Derivative	b) Gradient
c) Rate of Change	d) Loss
- 4) Recurrent Neural Networks are best suited for Text Processing.
 

a) True	b) False
---------	----------
- 5) The number of nodes in the input layer is 10 and the hidden layer is 5. The maximum number of connections from the input layer to the hidden layer are \_\_\_\_\_.
 

a) 50	b) Less than 50
c) More than 50	d) It is an arbitrary value
- 6) Which of the following functions can be used as an activation function in the output layer if we wish to predict the probabilities of n classes ( $p_1, p_2, \dots, p_k$ ) such that sum of p over all n equals to 1?
 

a) Softmax	b) ReLu
c) Sigmoid	d) Tanh
- 7) Dimensionality reduction does \_\_\_\_\_.
 

a) reduce computational time	b) may lead to some data loss
c) remove redundant feature	d) all
- 8) Under fitting means \_\_\_\_\_.
 

a) low bias & high variance	b) high bias & low variance
c) low bias & low variance	d) high bias & high variance

- 9) De-noising and Contractive are examples of \_\_\_\_\_.  
a) Auto encoders                      b) Convolution Neural Networks  
c) Recurrent Neural Networks      d) None
- 10) The reuse of a pre-trained model on a new problem is known as \_\_\_\_\_.  
a) Learning rate                      b) Bias  
c) variance                              d) transfer learning
- 11) In the neural network, every parameter can have their different learning rate.  
a) True                                      b) False  
c) Can't say                              d) none of this
- 12) Which of the option is correct regarding following statement?  
Statement 1. Auto encoders are a supervised learning technique.  
Statement 2. Auto encoder's output is exactly the same as the input  
a) Both the statements are TRUE  
b) Statement 1 is TRUE, but statement 2 is FALSE.  
c) Statement 1 is FALSE, but statement 2 is TRUE  
d) Both the statements are FALSE
- 13) Which of the following statement is true regarding dropout?  
1) Dropout gives a way to approximate by combining many different architectures  
2) Dropout demands high learning rates  
3) Dropout can help preventing overfitting  
a) Both 1 and 2                              b) Both 1 and 3  
c) Both 2 and 3                              d) All 1, 2 and 3
- 14) IN Neural Network The input from Input layer is then feed into the \_\_\_\_\_.  
a) Input layer                              b) Output layer  
c) Hidden layer                              d) None of these

**MCQ/Objective Type Questions**

Duration: 30 Minutes

Marks:14

**Q.1 Choose the correct alternatives from the given options.**

**14**

- 1)  $\int (\nabla \times H) \cdot dS$  is
  - a) Zero
  - b) lenclosed
  - c) J
  - d)  $\int H \cdot dS$
- 2) If pair of + ve & -ve charges of 1C separated by distance  $2\mu m$  then the magnitude of dipole moment is
  - a) 1 C-  $\mu m$
  - b) 2 C-  $m$
  - c) 2 C-  $\mu m$
  - d) 0.5 C-  $\mu m$
- 3) Absolute permeability of free space is
  - a)  $4\pi \times 10^{-7} A/m$
  - b)  $4\pi \times 10^{-7} H/m$
  - c)  $4\pi \times 10^{-7} F/m$
  - d)  $4\pi \times 10^{-7} H/m^2$
- 4) The unit of electric field is
  - a) Newton
  - b) Coulomb/Newton
  - c) Newton/Coulomb
  - d) Coulomb/meter
- 5) Coulomb's force is proportional to
  - a) R
  - b)  $r^2$
  - c)  $1/r$
  - d)  $1/r^2$
- 6) Divergence theorem relates
  - a) Line integral with volume integral
  - b) Line integral with surface integral
  - c) Surface integral with volume integral
  - d) Surface integral with surface integral
- 7) The charge density of  $10 \text{ nC-m}^2$  is distributed on a plane  $z = -5m$ , the electric field intensity at origin is
  - a) 180 p az
  - b) - 180 p az
  - c) -10 p az
  - d) -360 p az

- 8) A quantitative relation between induced emf and rate of change of flux linkage is known as
  - a) Maxwell's law
  - b) Stoke's law
  - c) Lenz's law
  - d) Faraday's law
- 9) Which of the following is not Maxwell's equation?
  - a)  $B = \mu H$
  - b)  $E = D/\epsilon$
  - c)  $E = J/\sigma$
  - d)  $E = \epsilon D$
- 10) For reflection co-efficient  $|r| = 1/2$  VSWR is
  - a) 2
  - b) 3
  - c) C
  - d) 8
- 11) If  $\sigma = 2 \text{ mho/m}$ ,  $E = 10 \text{ V/m}$ , the conduction current density is
  - a) 10
  - b) 40
  - c) 20
  - d) 5
- 12) The  $\gamma$  is known as \_\_\_\_\_ constant.
  - a) Proportional constant
  - b) Personal constant
  - c) Parameter constant
  - d) Propagation constant
- 13) The displacement current density can be given as
  - a)  $\partial D / \partial t$
  - b)  $\partial D / \partial x$
  - c)  $\partial H / \partial t$
  - d)  $\partial B / \partial t$
- 14) The Smith chart is a polar chart which plots
  - a) R vs Z
  - b) R vs  $Z_{\text{norm}}$
  - c) T vs Z
  - d) T vs  $Z_{\text{norm}}$

Day & Date: Wednesday 25-01-2023  
 Time: 10:00 AM To 1:00 PM

Max. Marks: 56

**Instructions:** 1) All questions are compulsory.  
 2) Figures to the right indicate full marks.

**Section - I**

**Q.2 Attempt any Three of the following.** **12**

- State and Derive Ampere's circuital Law.
- Charge  $Q_1 = -0.3 \mu C$  is located at  $A(0.25, -0.3, 0.15)$  and second charge of  $Q_2 = 0.5 \mu C$  is at  $B(-0.1, 0.08, 0.12)$ . Find  $\vec{E}$  at  $P(0.15, 0.2, 0.5)$ .
- In the region  $1 \leq r \leq 4m$ ,  $\vec{J} = 4.5 e^{-2r} \vec{a}_z (A/m^2)$  &  $\vec{J} = 0$  elsewhere, Find current  $I$ .
- Derive an equation of potential for a dipole.

**Q.3 Attempt any Two of the following** **16**

- Calculate electric flux density at point  $P(6,4,-5)$  caused by
  - A point of 20 miliC at origin,
  - A uniform line charge of  $20 \mu C/m$  placed along z-axis and
  - A sheet charge of  $60 \mu C/m^2$  at  $X=8m$ .
- Derive an expression for electric field intensity in xy plane produced by an infinite uniform line charge placed along z axis.
- A current carrying filament carrying current of 15A in +ve Z direction lies along entire Z axis. Find  $\vec{H}$  at i) PA (4.472,0,4), ii) PB (2,-4,4)

**Section - II**

**Q.4 Attempt Any Three of the following.** **12**

- Write a note on Skin depth.
- Derive Transmission line equations starting from circuit theory.
- Find displacement current density next to your radio in air where local FM station provides a carried having  $\vec{H} = 0.2 \cos[2.10(3 \times 10^8 t - x)] \vec{a}_z A/m$
- A lossless  $50 \Omega$  transmission line terminated in  $25 + j 50 \Omega$ . Find
  - Voltage reflection coefficient and ii) VSWR

**Q.5 Attempt Any Two of the following.** **16**

- Starting from Maxwell's equation, derive wave equation for conducting media in terms of E and in terms of H.
- Derive Maxwell's equations for time varying field in terms of point form & integral form.
- Calculate secondary constants ( $Z_o$  and  $\gamma$ ) for a transmission line having primary constants as  $R = 2 \Omega/m$ ,  $G = 0.2 mho/m$ ,  $L = 1 mH/m$  and  $C = 3 \mu F/m$ . Given  $\omega = 5000 rad/sec$ .

**MCQ/Objective Type Questions**

Duration: 30 Minutes

Marks:14

**Q.1 Choose the correct alternatives from the given options.**

**14**

- 1) A quantitative relation between induced emf and rate of change of flux linkage is known as
  - a) Maxwell's law
  - b) Stoke's law
  - c) Lenz's law
  - d) Faraday's law
- 2) Which of the following is not Maxwell's equation?
  - a)  $B = \mu H$
  - b)  $E = D/\epsilon$
  - c)  $E = J/\sigma$
  - d)  $E = \epsilon D$
- 3) For reflection co-efficient  $|r| = 1/2$  VSWR is
  - a) 2
  - b) 3
  - c) C
  - d) 8
- 4) If  $\sigma = 2 \text{ mho/m}$ ,  $E = 10 \text{ V/m}$ , the conduction current density is
  - a) 10
  - b) 40
  - c) 20
  - d) 5
- 5) The  $\gamma$  is known as \_\_\_\_\_ constant.
  - a) Proportional constant
  - b) Personal constant
  - c) Parameter constant
  - d) Propagation constant
- 6) The displacement current density can be given as
  - a)  $\partial D / \partial t$
  - b)  $\partial D / \partial x$
  - c)  $\partial H / \partial t$
  - d)  $\partial B / \partial t$
- 7) The Smith chart is a polar chart which plots
  - a) R vs Z
  - b) R vs  $Z_{\text{norm}}$
  - c) T vs Z
  - d) T vs  $Z_{\text{norm}}$
- 8)  $\int (\nabla \times H) \cdot dS$  is
  - a) Zero
  - b)  $I_{\text{enclosed}}$
  - c) J
  - d)  $\int H \cdot dS$

**Q.1 Choose the correct alternatives from the given options.**

**14**

- 1) If  $\sigma = 2 \text{ mho/m}$ ,  $E = 10 \text{ V/m}$ , the conduction current density is
  - a) 10
  - b) 40
  - c) 20
  - d) 5
- 2) The  $\gamma$  is known as \_\_\_\_\_ constant.
  - a) Proportional constant
  - b) Personal constant
  - c) Parameter constant
  - d) Propagation constant
- 3) The displacement current density can be given as
  - a)  $\partial D / \partial t$
  - b)  $\partial D / \partial x$
  - c)  $\partial H / \partial t$
  - d)  $\partial B / \partial t$
- 4) The Smith chart is a polar chart which plots
  - a) R vs Z
  - b) R vs Znorm
  - c) T vs Z
  - d) T vs Znorm
- 5)  $\int (\nabla \times H) \cdot dS$  is
  - a) Zero
  - b) Ienclosed
  - c) J
  - d)  $\int H \cdot dS$
- 6) If pair of + ve & -ve charges of 1C separated by distance  $2\mu\text{m}$  then the magnitude of dipole moment is
  - a) 1 C-  $\mu\text{m}$
  - b) 2 C-  $\mu\text{m}$
  - c) 2 C-  $\mu\text{m}$
  - d) 0.5 C-  $\mu\text{m}$
- 7) Absolute permeability of free space is
  - a)  $4\pi \times 10^{-7} \text{ A/m}$
  - b)  $4\pi \times 10^{-7} \text{ H/m}$
  - c)  $4\pi \times 10^{-7} \text{ F/m}$
  - d)  $4\pi \times 10^{-7} \text{ H/m}^2$
- 8) The unit of electric field is
  - a) Newton
  - b) Coulomb/Newton
  - c) Newton/Coulomb
  - d) Coulomb/meter
- 9) Coulomb's force is proportional to
  - a) r
  - b)  $r^2$
  - c)  $1/r$
  - d)  $1/r^2$

- 10) Divergence theorem relates
- a) Line integral with volume integral
  - b) Line integral with surface integral
  - c) Surface integral with volume integral
  - d) Surface integral with surface integral
- 11) The charge density of  $10 \text{ nC-m}^2$  is distributed on a plane  $z = -5\text{m}$ , the electric field intensity at origin is
- a)  $180 \text{ p az}$
  - b)  $-180 \text{ p az}$
  - c)  $-10 \text{ p az}$
  - d)  $-360 \text{ p az}$
- 12) A quantitative relation between induced emf and rate of change of flux linkage is known as
- a) Maxwell's law
  - b) Stoke's law
  - c) Lenz's law
  - d) Faraday's law
- 13) Which of the following is not Maxwell's equation?
- a)  $B = \mu H$
  - b)  $E = D/\epsilon$
  - c)  $E = J/\sigma$
  - d)  $E = \epsilon D$
- 14) For reflection co-efficient  $|r| = 1/2$  VSWR is
- a) 2
  - b) 3
  - c) C
  - d) 8

Set **R**

**T.Y. (B.Tech.) (Sem - I) (New) (CBCS) Examination: Oct/Nov-2022**  
**ELECTRONICS & TELECOMMUNICATION**  
**Electromagnetic Field Theory**

Day & Date: Wednesday 25-01-2023  
 Time: 10:00 AM To 01:00 PM

Max. Marks: 56

**Instructions:** 1) All questions are compulsory.  
 2) Figures to the right indicate full marks.

**Section - I**

**Q.2 Attempt any Three of the following.** **12**

- State and Derive Ampere's circuital Law.
- Charge  $Q_1 = -0.3 \mu C$  is located at  $A(0.25, -0.3, 0.15)$  and second charge of  $Q_2 = 0.5 \mu C$  is at  $B(-0.1, 0.08, 0.12)$ . Find  $\vec{E}$  at  $P(0.15, 0.2, 0.5)$ .
- In the region  $1 \leq r \leq 4m$ ,  $\vec{J} = 4.5 e^{-2r} \vec{a}_z (A/m^2)$  &  $\vec{J} = 0$  elsewhere, Find current  $I$ .
- Derive an equation of potential for a dipole.

**Q.3 Attempt any Two of the following** **16**

- Calculate electric flux density at point  $P(6,4,-5)$  caused by
  - A point of 20 miliC at origin,
  - A uniform line charge of  $20 \mu C/m$  placed along z-axis and
  - A sheet charge of  $60 \mu C/m^2$  at  $X=8m$ .
- Derive an expression for electric field intensity in xy plane produced by an infinite uniform line charge placed along z axis.
- A current carrying filament carrying current of 15A in +ve Z direction lies along entire Z axis. Find  $\vec{H}$  at i) PA (4.472,0,4), ii) PB (2,-4,4)

**Section - II**

**Q.4 Attempt Any Three of the following.** **12**

- Write a note on Skin depth.
- Derive Transmission line equations starting from circuit theory.
- Find displacement current density next to your radio in air where local FM station provides a carried having  $\vec{H} = 0.2 \cos[2.10(3 \times 10^8 t - x)] \vec{a}_z A/m$
- A lossless  $50 \Omega$  transmission line terminated in  $25 + j 50 \Omega$ . Find
  - Voltage reflection coefficient and ii) VSWR

**Q.5 Attempt Any Two of the following.** **16**

- Starting from Maxwell's equation, derive wave equation for conducting media in terms of E and in terms of H.
- Derive Maxwell's equations for time varying field in terms of point form & integral form.
- Calculate secondary constants ( $Z_o$  and  $\gamma$ ) for a transmission line having primary constants as  $R = 2 \Omega/m$ ,  $G = 0.2 mho/m$ ,  $L = 1 mH/m$  and  $C = 3 \mu F/m$ . Given  $\omega = 5000 rad/sec$ .

Max. Marks: 70

**Instructions:** 1) Q. No. 1 is compulsory. It should be solved in the first 30 minutes in answer book. Page no 03 (Starting page of the Answer Book). Each question carries one mark.  
 2) Don't forget to Mention question paper set (P/Q/R/S) on top of page.

**MCQ/Objective Type Questions**

Duration: 30 Minutes

Marks:14

**Q.1 Choose the correct alternatives from the given options.**

**14**

- 1) Divergence theorem relates
  - a) Line integral with volume integral
  - b) Line integral with surface integral
  - c) Surface integral with volume integral
  - d) Surface integral with surface integral
- 2) The charge density of  $10 \text{ nC-m}^2$  is distributed on a plane  $z = -5\text{m}$ , the electric field intensity at origin is
  - a)  $180 \text{ p az}$
  - b)  $-180 \text{ p az}$
  - c)  $-10 \text{ p az}$
  - d)  $-360 \text{ p az}$
- 3) A quantitative relation between induced emf and rate of change of flux linkage is known as
  - a) Maxwell's law
  - b) Stoke's law
  - c) Lenz's law
  - d) Faraday's law
- 4) Which of the following is not Maxwell's equation?
  - a)  $B = \mu H$
  - b)  $E = D/\epsilon$
  - c)  $E = J/\sigma$
  - d)  $E = \epsilon D$
- 5) For reflection co-efficient  $|r| = 1/2$  VSWR is
  - a) 2
  - b) 3
  - c) C
  - d) 8
- 6) If  $\sigma = 2 \text{ mho/m}$ ,  $E = 10 \text{ V/m}$ , the conduction current density is
  - a) 10
  - b) 40
  - c) 20
  - d) 5
- 7) The  $\gamma$  is known as \_\_\_\_\_ constant.
  - a) Proportional constant
  - b) Personal constant
  - c) Parameter constant
  - d) Propagation constant
- 8) The displacement current density can be given as
  - a)  $\partial D / \partial t$
  - b)  $\partial D / \partial x$
  - c)  $\partial H / \partial t$
  - d)  $\partial B / \partial t$

- 9) The Smith chart is a polar chart which plots
- |               |                             |
|---------------|-----------------------------|
| a) $R$ vs $Z$ | b) $R$ vs $Z_{\text{norm}}$ |
| c) $T$ vs $Z$ | d) $T$ vs $Z_{\text{norm}}$ |
- 10)  $\int (\nabla \times H) \cdot dS$  is
- |         |                          |
|---------|--------------------------|
| a) Zero | b) $I_{\text{enclosed}}$ |
| c) $J$  | d) $\int H \cdot dS$     |
- 11) If pair of + ve & -ve charges of 1C separated by distance  $2\mu m$  then the magnitude of dipole moment is
- |                              |                                |
|------------------------------|--------------------------------|
| a) $1 \text{ C} \cdot \mu m$ | b) $2 \text{ C} \cdot m$       |
| c) $2 \text{ C} \cdot \mu m$ | d) $0.5 \text{ C} \cdot \mu m$ |
- 12) Absolute permeability of free space is
- |                              |                                |
|------------------------------|--------------------------------|
| a) $4\pi \times 10^{-7} A/m$ | b) $4\pi \times 10^{-7} H/m$   |
| c) $4\pi \times 10^{-7} F/m$ | d) $4\pi \times 10^{-7} H/m^2$ |
- 13) The unit of electric field is
- |                   |                   |
|-------------------|-------------------|
| a) Newton         | b) Coulomb/Newton |
| c) Newton/Coulomb | d) Coulomb/meter  |
- 14) Coulomb's force is proportional to
- |          |            |
|----------|------------|
| a) $r$   | b) $r^2$   |
| c) $1/r$ | d) $1/r^2$ |

Duration: 30 Minutes

Marks: 14

**Q.1 Choose the correct alternatives from the options.** **14**

- 1) Which of the following is the False reasons for writing programs in C for micro-controller \_\_\_\_\_.
  - a) You can use code available in function libraries
  - b) It is easier and less time consuming to write in C than Assembly
  - c) C code is portable to other microcontroller with little of no modification
  - d) C is difficult to modify and update
- 2) Addressing mode for the source data in the instruction move a, @a + PC2 points \_\_\_\_\_.
  - a) Immediate
  - b) Indirect
  - c) Direct
  - d) Register Indexed
- 3) PIC 16F877 devices \_\_\_\_\_ bit program counter capable of addressing \_\_\_\_\_ program memory.
  - a) 8,256 k × 8
  - b) 14,8 k × 14
  - c) 16,64 k × 8
  - d) 13,8 k × 14
- 4) After stack has been pushed eight times, the ninth push is \_\_\_\_\_.
  - a) overwrites the value that was stored from the first push
  - b) overwrites the value that was stored from the last push
  - c) Result in loss of pushed data
  - d) sets stack overflow bit
- 5) Before execution of ANDL W 0 × 5f the working register contents where 0 × A3. The contents after execution will be \_\_\_\_\_.
  - a) 0 × 00
  - b) 0 × 03
  - c) 0 × FF
  - d) 0 × 5f
- 6) CALL and GOTO instructions provides \_\_\_\_\_ bits address to allow branching within any \_\_\_\_\_ program memory.
  - a) 11, 2k
  - b) 16, 64k
  - c) 8,368Bytes
  - d) 13, 8k

**Section – I**

**Q.2 Solve any four of the following.** **16**

- a) Explain following instructions.
  - 1) MUL AB
  - 2) DIV AB
  - 3) JNB 80h, relative address
  - 4) XCHD
- b) Compare Harvard and von Neumann architecture.
- c) What is the difference between timer mode and Counter mode? Explain TMOD SFR in detail.
- d) Write an 8051 C program to toggle all the bits of P1 continuously.
- e) Explain UART mode 1 for 8051 Microcontroller.
- f) Write 8051 assembly language program to find number of even and odd numbers in the given array of 8-bit numbers, stored from address 9001h and length of array is at 9000h. Store result at 9050h and 9051h.

**Q.3 Solve any two of the following.** **12**

- a) Explain timer module with GATE bit and INTx pin. Also explain in detail mode 3 of timer of Microcontroller.
- b) Discuss with suitable example Addressing modes of 8051 Microcontroller.
- c) Interface LCD(16\*2) to 8051. Write assembly or embedded C prog to display "PAHSUS" on LCD.

**Section – II**

**Q.4 Solve any four of the following.** **16**

- a) Enlist different features of PIC 16F877a.
- b) Explain Capture mode in CCP1 module.
- c) Explain following instructions.
  - 1) INCFSZ
  - 2) BSF
  - 3) SUBWF
- d) Discuss significance of bits in STATUS register when its contents are "BD"H.
- e) Draw and Explain the bit format for INTCON.
- f) Explain steps for ADC conversion on 2<sup>nd</sup> channel in PIC16F877a.

**Q.5 Solve any two of the following.**

- a)** With Block diagram explain operation of CCP module in PWM mode. How PWM module can be used to generate a duty cycle of 80%?
- b)** Explain interrupts in PIC16f877a in detail.
- c)** Explain Direct and Indirect addressing modes in PIC. What is the use of IRP bit for it? Give one example of each addressing Mode.

 2) Figures to the right indicates full marks.

**Section – I**

**Q.2 Solve any four of the following.** **16**

- a) Explain following instructions.
  - 1) MUL AB
  - 2) DIV AB
  - 3) JNB 80h, relative address
  - 4) XCHD
- b) Compare Harvard and von Neumann architecture.
- c) What is the difference between timer mode and Counter mode? Explain TMOD SFR in detail.
- d) Write an 8051 C program to toggle all the bits of P1 continuously.
- e) Explain UART mode 1 for 8051 Microcontroller.
- f) Write 8051 assembly language program to find number of even and odd numbers in the given array of 8-bit numbers, stored from address 9001h and length of array is at 9000h. Store result at 9050h and 9051h.

**Q.3 Solve any two of the following.** **12**

- a) Explain timer module with GATE bit and INTx pin. Also explain in detail mode 3 of timer of Microcontroller.
- b) Discuss with suitable example Addressing modes of 8051 Microcontroller.
- c) Interface LCD(16\*2) to 8051. Write assembly or embedded C prog to display "PAHSUS" on LCD.

**Section – II**

**Q.4 Solve any four of the following.** **16**

- a) Enlist different features of PIC 16F877a.
- b) Explain Capture mode in CCP1 module.
- c) Explain following instructions.
  - 1) INCFSZ
  - 2) BSF
  - 3) SUBWF
- d) Discuss significance of bits in STATUS register when its contents are "BD"H.
- e) Draw and Explain the bit format for INTCON.
- f) Explain steps for ADC conversion on 2<sup>nd</sup> channel in PIC16F877a.

**Q.5 Solve any two of the following.**

- a) With Block diagram explain operation of CCP module in PWM mode. How PWM module can be used to generate a duty cycle of 80%?
- b) Explain interrupts in PIC16f877a in detail.
- c) Explain Direct and Indirect addressing modes in PIC. What is the use of IRP bit for it? Give one example of each addressing Mode.

**Seat  
No.**

Set	S
-----	---

Day & Date: Tuesday, 31-01-2023  
Time: 10:00 AM To 01:00 PM

Max. Marks: 70

### MCQ/Objective Type Questions

Duration: 30 Minutes

Marks: 14

**Q.1 Choose the correct alternatives from the options.**

14

- CALL and GOTO instructions provides \_\_\_\_\_ bits address to allow branching within any \_\_\_\_\_ program memory.
  - 11, 2k
  - 16, 64k
  - 8,368Bytes
  - 13, 8k
- Which bit in INTCON register allows to either enable or disable all interrupt?
  - INTE
  - GIE
  - RBIE
  - ADIE
- With the available Address bus and Data bus, the total external data memory that can be interfaced to the 8051 is: \_\_\_\_\_.
  - 32K
  - 64K
  - 128K
  - 256K
- Which of the following instructions will load the value 35H into the high byte of timer 0?
  - MOV TH0, #35H
  - MOV TH0, 35H
  - MOV T0, #35H
  - MOV T0, 35H
- If we push data onto the stack then the stack pointer \_\_\_\_\_.
  - increases with every push
  - decreases with every push
  - increases with every POP
  - decreases with every POP
- When the 8051 is reset and the /EA line is HIGH, the program counter points to the first program instruction in the: \_\_\_\_\_.
  - internal code memory
  - external code memory
  - internal data memory
  - external data memory
- In microcontroller & LCD interface, which line will instruct the LCD that microcontroller sending a data or command?
  - DB0
  - RW
  - EN
  - RS

- 8) A Harvard architecture means that a machine has \_\_\_\_\_.  
a) separate memories for data and instructions  
b) unified cache memory  
c) multiple functional units  
d) an on-chip cache
- 9) When the RET instruction at the end of subroutine is executed, \_\_\_\_\_.  
a) the information where the stack is initialized is transferred to the stack pointer  
b) the memory address of the RET instruction is transferred to the program counter  
c) two data bytes stored in the top two locations of the stack are transferred to the program counter  
d) two data bytes stored in the top two locations of the stack are transferred to the stack pointer
- 10) Which of the following is the False reasons for writing programs in C for micro-controller \_\_\_\_\_.  
a) You can use code available in function libraries  
b) It is easier and less time consuming to write in C than Assembly  
c) C code is portable to other microcontroller with little of no modification  
d) C is difficult to modify and update
- 11) Addressing mode for the source data in the instruction move a, @a + PC2 points \_\_\_\_\_.  
a) Immediate  
b) Indirect  
c) Direct  
d) Register Indexed
- 12) PIC 16F877 devices \_\_\_\_\_ bit program counter capable of addressing \_\_\_\_\_ program memory.  
a) 8,256 k × 8  
b) 14,8 k × 14  
c) 16,64 k × 8  
d) 13,8 k × 14
- 13) After stack has been pushed eight times, the ninth push is \_\_\_\_\_.  
a) overwrites the value that was stored from the first push  
b) overwrites the value that was stored from the last push  
c) Result in loss of pushed data  
d) sets stack overflow bit
- 14) Before execution of ANDL W 0 × 5f the working register contents where 0 × A3. The contents after execution will be \_\_\_\_\_.  
a) 0 × 00  
b) 0 × 03  
c) 0 × FF  
d) 0 × 5f

**Instructions:** 1) Both Section are compulsory.  
 2) Figures to the right indicates full marks.

**Section – I**

**Q.2 Solve any four of the following.** **16**

- a) Explain following instructions.
  - 1) MUL AB
  - 2) DIV AB
  - 3) JNB 80h, relative address
  - 4) XCHD
- b) Compare Harvard and von Neumann architecture.
- c) What is the difference between timer mode and Counter mode? Explain TMOD SFR in detail.
- d) Write an 8051 C program to toggle all the bits of P1 continuously.
- e) Explain UART mode 1 for 8051 Microcontroller.
- f) Write 8051 assembly language program to find number of even and odd numbers in the given array of 8-bit numbers, stored from address 9001h and length of array is at 9000h. Store result at 9050h and 9051h.

**Q.3 Solve any two of the following.** **12**

- a) Explain timer module with GATE bit and INTx pin. Also explain in detail mode 3 of timer of Microcontroller.
- b) Discuss with suitable example Addressing modes of 8051 Microcontroller.
- c) Interface LCD(16\*2) to 8051. Write assembly or embedded C prog to display "PAHSUS" on LCD.

**Section – II**

**Q.4 Solve any four of the following.** **16**

- a) Enlist different features of PIC 16F877a.
- b) Explain Capture mode in CCP1 module.
- c) Explain following instructions.
  - 1) INCFSZ
  - 2) BSF
  - 3) SUBWF
- d) Discuss significance of bits in STATUS register when its contents are "BD"H.
- e) Draw and Explain the bit format for INTCON.
- f) Explain steps for ADC conversion on 2<sup>nd</sup> channel in PIC16F877a.

**Q.5 Solve any two of the following.**

- a)** With Block diagram explain operation of CCP module in PWM mode. How PWM module can be used to generate a duty cycle of 80%?
- b)** Explain interrupts in PIC16f877a in detail.
- c)** Explain Direct and Indirect addressing modes in PIC. What is the use of IRP bit for it? Give one example of each addressing Mode.

- 9) The frequency sampling structure are efficient because \_\_\_\_\_.  
 a) sample points are less  
 b) some sampled DFT coefficients are zero when filter is narrow band  
 c) some sampled values can be assumed zero  
 d) parallel structures are efficient
- 10) Advantage of FIR filter is \_\_\_\_\_.  
 a) they are always stable                      b) less storage requirement  
 c) errors due to round off is less              d) None
- 11) The mapping of s-plane to z- plane in bilinear transformation is \_\_\_\_\_.  
 a)  $S = \frac{2}{3T} \left[ \frac{1-z^{-1}}{1+z^{-1}} \right]$                       b)  $S = \frac{2}{T} \left[ \frac{1-z^{-1}}{1+z^{-1}} \right]$   
 c)  $S = \frac{2}{T} \left[ \frac{1+z^{-1}}{1-z^{-1}} \right]$                       d) None
- 12) To avoid aliasing of frequency components which method is useful in designing filter \_\_\_\_\_.  
 a) impulse invariant                              b) bilinear transformation  
 c) windowing techniques                      d) None
- 13) The overall impulse response of two LTI systems connected in cascade is equal to \_\_\_\_\_.  
 a) Sum of two impulse response  
 b) Multiplication of two impulse response  
 c) Convolution of individual impulse response  
 d) None
- 14) In IIR system, which of the following structure will give direct relation between time domain and Z domain?  
 a) Direct form I                                      b) Direct form II  
 c) Cascade form                                      d) Parallel form

**T.Y (B.Tech.) (Sem-I) (New) (CBCS) Examination: Oct/Nov-2022**  
**ELECTRONIC & TELECOMMUNICATION ENGINEERING**  
**Digital Signal Processing**

Day & Date: Friday, 24-02-2023  
 Time: 10:00 AM To 01:00 PM

Max. Marks: 56

**Instructions:** All questions are compulsory.

**Section – I**

**Q.2 Answer any four questions.**

16

- Compute auto correlation of the sequence  $x(n) = \{1, 2, 3, 4\}$
- The first 5 point of the 8 point DFT of a real valued sequence are  $\{28, -4 + j9.565, -4 + j4, -4 + j1.656, -4\}$  Determine the remaining 3 Points.
- Find IDFT of  $X(k) = \{50, 2 - j2, -2, 2 + j2\}$ .
- List the properties of DFT & explain circular convolution properties of DFT.
- Calculate 4 point DFT values of the sequence  $x(n) = \{0, 2, 4, 6\}$  using DIF, FFT Algorithm.

**Q.3 Answer any two questions.**

12

- Perform circular convolution of the following sequences  $x(n) = \{1, 2, 2, 1\}$  &  $h(n) = \{1, 2, 3, 4\}$  using DFT and IDFT method.
- Find DFT of the sequence  $x(n) = \{1, 4, 3, 5, 6, 3, 2, 3\}$  using FFT algorithm.
- Find linear convolution Using overlap save method, of the following sequence  $x(n) = \{1, 0, -3, 0, 2, 1, 0, -2, -1, 0, 1, 5, 7, 3\}$   $h(n) = \{2, 2, 1, 1\}$ .
- Find circular convolution of two finite duration sequence  $x(n) = \{1, -2, -2, 4, -1, 2\}$   $h(n) = \{1, 2, 3, 2\}$

**Section – II**

**Q.4 Answer the following questions.**

16

- Explain Fourier series method for designing FIR filter?
- Write a short note on Gibb's phenomenon.
- For analog transfer function  $H(s) = \frac{2}{(s+1)(s+2)}$   
 Determine  $H(Z)$  using bilinear transformation with  $T=1$  sec.
- Obtain the direct form-I & direct form-II realization for the system describe  $y(n) = 0.5y(n-1) - 0.25y(n-2) + x(n) + 0.4x(n-1)$

**Q.5 Answer any two questions.**

- a) Convert the given analog transfer function into equivalent digital transfer function using impulse invariant transformation technique (T=1 second/sample)

$$H(s) = \frac{s + 0.1}{(s + 0.1)^2 + 25}$$

- b) Design an ideal lowpass filter with frequency response specifications as

$$H_d(e^{jw}) = 1 \quad \text{for } -\frac{\pi}{2} \leq w \leq \frac{\pi}{2}$$

$$= 0 \quad \text{for } \frac{\pi}{2} \leq |w| \leq \pi$$

Find the values of h(n) for N=11, also find H(Z).

- c) Explain the application of DSP in Audio Signal Processing.

- Instructions:** 1) Q. No. 1 is compulsory and should be solved in first 30 minutes in Answer Book. Page No.3 (starting page of the Answer Book). Each question carry one mark.  
 2) Don't forget to mention Question Paper Set (P/Q/R/S) at the top of the same page.  
 3) Figures to the right indicates full marks.

**MCQ/Objective Type Questions**

Duration: 30 Minutes

Marks: 14

**Q.1 Choose the correct alternatives from the options.**

**14**

- 1) Which of the following has linear phase?
  - a) IIR filter
  - b) LP filter
  - c) FIR filter
  - d) None
- 2) The frequency sampling structure are efficient because \_\_\_\_\_.
  - a) sample points are less
  - b) some sampled DFT coefficients are zero when filter is narrow band
  - c) some sampled values can be assumed zero
  - d) parallel structures are efficient
- 3) Advantage of FIR filter is \_\_\_\_\_.
  - a) they are always stable
  - b) less storage requirement
  - c) errors due to round off is less
  - d) None
- 4) The mapping of s-plane to z- plane in bilinear transformation is \_\_\_\_\_.
  - a)  $S = \frac{2}{3T} \left[ \frac{1-z^{-1}}{1+z^{-1}} \right]$
  - b)  $S = \frac{2}{T} \left[ \frac{1-z^{-1}}{1+z^{-1}} \right]$
  - c)  $S = \frac{2}{T} \left[ \frac{1+z^{-1}}{1-z^{-1}} \right]$
  - d) None
- 5) To avoid aliasing of frequency components which method is useful in designing filter \_\_\_\_\_.
  - a) impulse invariant
  - b) bilinear transformation
  - c) windowing techniques
  - d) None
- 6) The overall impulse response of two LTI systems connected in cascade is equal to \_\_\_\_\_.
  - a) Sum of two impulse response
  - b) Multiplication of two impulse response
  - c) Convolution of individual impulse response
  - d) None
- 7) In IIR system, which of the following structure will give direct relation between time domain and Z domain?
  - a) Direct form I
  - b) Direct form II
  - c) Cascade form
  - d) Parallel form

- 8) A necessary & sufficient condition for LTI system to be BIBO stable is \_\_\_\_\_.
  - a)  $\sum_{n=-\infty}^{\infty} h > \infty$
  - b)  $\sum_{n=-\infty}^{\infty} h(n) < \infty$
  - c)  $\sum_{n=-\infty}^{\infty} h(n) = \infty$
  - d) None
- 9) Correlation is basically used to \_\_\_\_\_.
  - a) Add two signals
  - b) Subtract two signals
  - c) Compare two signals
  - d) None
- 10) If the sequence  $x(n)$  is real & even the its corresponding DFT values are \_\_\_\_\_.
  - a) Imaginary and odd
  - b) Imaginary and even
  - c) Real and even
  - d) None
- 11) When a sequence is circularly shifted in time by 5 units, the magnitude response \_\_\_\_\_.
  - a) Increase by 5
  - b) Remain unchanged
  - c) Shift by 5 units
  - d) None
- 12) With zero padding DFT used as \_\_\_\_\_.
  - a) Circular filtering
  - b) Linear filtering
  - c) FFT calculations
  - d) Overlap add method
- 13) The circular convolution can be converted to linear convolution for sequence  $x(n)$  of length L and sequence  $h(n)$  of length M by \_\_\_\_\_.
  - a) making both sequence equal to  $L+M-1$
  - b) making both sequence equal to L or M
  - c) making both sequence equal to  $L+M+1$
  - d) None
- 14) Goertzel algorithm evaluates the \_\_\_\_\_.
  - a) DTFT coefficients
  - b) DFT coefficients
  - c) Z transform
  - d) FT coefficient

**Q.5 Answer any two questions.**

- a) Convert the given analog transfer function into equivalent digital transfer function using impulse invariant transformation technique (T=1 second/sample)

$$H(s) = \frac{s + 0.1}{(s + 0.1)^2 + 25}$$

- b) Design an ideal lowpass filter with frequency response specifications as
- $$H_d(e^{jw}) = 1 \quad \text{for } -\frac{\pi}{2} \leq w \leq \frac{\pi}{2}$$
- $$= 0 \quad \text{for } \frac{\pi}{2} \leq |w| \leq \pi$$

Find the values of h(n) for N=11, also find H(Z).

- c) Explain the application of DSP in Audio Signal Processing.

**T.Y (B.Tech.) (Sem-I) (New) (CBCS) Examination: Oct/Nov-2022**  
**ELECTRONIC & TELECOMMUNICATION ENGINEERING**  
**Digital Signal Processing**

Day & Date: Friday, 24-02-2023  
 Time: 10:00 AM To 01:00 PM

Max. Marks: 70

- Instructions:** 1) Q. No. 1 is compulsory and should be solved in first 30 minutes in Answer Book. Page No.3 (starting page of the Answer Book). Each question carry one mark.  
 2) Don't forget to mention Question Paper Set (P/Q/R/S) at the top of the same page.  
 3) Figures to the right indicates full marks.

**MCQ/Objective Type Questions**

Duration: 30 Minutes

Marks: 14

**Q.1 Choose the correct alternatives from the options.**

**14**

- 1) The circular convolution can be converted to linear convolution for sequence  $x(n)$  of length  $L$  and sequence  $h(n)$  of length  $M$  by \_\_\_\_\_.  
 a) making both sequence equal to  $L+M-1$   
 b) making both sequence equal to  $L$  or  $M$   
 c) making both sequence equal to  $L+M+1$   
 d) None
- 2) Goertzel algorithm evaluates the \_\_\_\_\_.  
 a) DTFT coefficients                      b) DFT coefficients  
 c) Z transform                              d) FT coefficient
- 3) Which of the following has linear phase?  
 a) IIR filter                                      b) LP filter  
 c) FIR filter                                      d) None
- 4) The frequency sampling structure are efficient because \_\_\_\_\_.  
 a) sample points are less  
 b) some sampled DFT coefficients are zero when filter is narrow band  
 c) some sampled values can be assumed zero  
 d) parallel structures are efficient
- 5) Advantage of FIR filter is \_\_\_\_\_.  
 a) they are always stable                      b) less storage requirement  
 c) errors due to round off is less              d) None
- 6) The mapping of s-plane to z- plane in bilinear transformation is \_\_\_\_\_.  
 a)  $S = \frac{2}{3T} \left[ \frac{1-z^{-1}}{1+z^{-1}} \right]$                       b)  $S = \frac{2}{T} \left[ \frac{1-z^{-1}}{1+z^{-1}} \right]$   
 c)  $S = \frac{2}{T} \left[ \frac{1+z^{-1}}{1-z^{-1}} \right]$                       d) None
- 7) To avoid aliasing of frequency components which method is useful in designing filter \_\_\_\_\_.  
 a) impulse invariant                              b) bilinear transformation  
 c) windowing techniques                      d) None

- 8) The overall impulse response of two LTI systems connected in cascade is equal to \_\_\_\_\_.  
a) Sum of two impulse response  
b) Multiplication of two impulse response  
c) Convolution of individual impulse response  
d) None
- 9) In IIR system, which of the following structure will give direct relation between time domain and Z domain?  
a) Direct form I  
b) Direct form II  
c) Cascade form  
d) Parallel form
- 10) A necessary & sufficient condition for LTI system to be BIBO stable is \_\_\_\_\_.  
a)  $\sum_{n=-\infty}^{\infty} h > \infty$   
b)  $\sum_{n=-\infty}^{\infty} h(n) < \infty$   
c)  $\sum_{n=-\infty}^{\infty} h(n) = \infty$   
d) None
- 11) Correlation is basically used to \_\_\_\_\_.  
a) Add two signals  
b) Subtract two signals  
c) Compare two signals  
d) None
- 12) If the sequence  $x(n)$  is real & even the its corresponding DFT values are \_\_\_\_\_.  
a) Imaginary and odd  
b) Imaginary and even  
c) Real and even  
d) None
- 13) When a sequence is circularly shifted in time by 5 units, the magnitude response \_\_\_\_\_.  
a) Increase by 5  
b) Remain unchanged  
c) Shift by 5 units  
d) None
- 14) With zero padding DFT used as \_\_\_\_\_.  
a) Circular filtering  
b) Linear filtering  
c) FFT calculations  
d) Overlap add method

**T.Y (B.Tech.) (Sem-I) (New) (CBCS) Examination: Oct/Nov-2022**  
**ELECTRONIC & TELECOMMUNICATION ENGINEERING**  
**Digital Signal Processing**

Day & Date: Friday, 24-02-2023  
 Time: 10:00 AM To 01:00 PM

Max. Marks: 56

**Instructions:** All questions are compulsory.

**Section – I**

**Q.2 Answer any four questions. 16**

- Compute auto correlation of the sequence  $x(n) = \{1, 2, 3, 4\}$
- The first 5 point of the 8 point DFT of a real valued sequence are  $\{28, -4 + j9.565, -4 + j4, -4 + j1.656, -4\}$  Determine the remaining 3 Points.
- Find IDFT of  $X(k) = \{50, 2 - j2, -2, 2 + j2\}$ .
- List the properties of DFT & explain circular convolution properties of DFT.
- Calculate 4 point DFT values of the sequence  $x(n) = \{0, 2, 4, 6\}$  using DIF, FFT Algorithm.

**Q.3 Answer any two questions. 12**

- Perform circular convolution of the following sequences  $x(n) = \{1, 2, 2, 1\}$  &  $h(n) = \{1, 2, 3, 4\}$  using DFT and IDFT method.
- Find DFT of the sequence  $x(n) = \{1, 4, 3, 5, 6, 3, 2, 3\}$  using FFT algorithm.
- Find linear convolution Using overlap save method, of the following sequence  $x(n) = \{1, 0, -3, 0, 2, 1, 0, -2, -1, 0, 1, 5, 7, 3\}$   $h(n) = \{2, 2, 1, 1\}$ .
- Find circular convolution of two finite duration sequence  $x(n) = \{1, -2, -2, 4, -1, 2\}$   $h(n) = \{1, 2, 3, 2\}$

**Section – II**

**Q.4 Answer the following questions. 16**

- Explain Fourier series method for designing FIR filter?
- Write a short note on Gibb's phenomenon.
- For analog transfer function  $H(s) = \frac{2}{(s+1)(s+2)}$   
 Determine  $H(Z)$  using bilinear transformation with  $T=1$  sec.
- Obtain the direct form-I & direct form-II realization for the system describe  $y(n) = 0.5y(n-1) - 0.25y(n-2) + x(n) + 0.4x(n-1)$

**Q.5 Answer any two questions.**

- a) Convert the given analog transfer function into equivalent digital transfer function using impulse invariant transformation technique (T=1 second/sample)

$$H(s) = \frac{s + 0.1}{(s + 0.1)^2 + 25}$$

- b) Design an ideal lowpass filter with frequency response specifications as
- $$H_d(e^{jw}) = 1 \quad \text{for } -\frac{\pi}{2} \leq w \leq \frac{\pi}{2}$$
- $$= 0 \quad \text{for } \frac{\pi}{2} \leq |w| \leq \pi$$

Find the values of h(n) for N=11, also find H(Z).

- c) Explain the application of DSP in Audio Signal Processing.

**MCQ/Objective Type Questions**

Duration: 30 Minutes

Marks: 14

**Q.1 Choose the correct alternatives from the options.**

**14**

- 1) The principle reasons behind economic problems \_\_\_\_\_.  
 a) Unlimited wants  
 b) Limited or Scarce of Means  
 c) Alternatives Uses of Means  
 d) All of the above
- 2) \_\_\_\_\_ is economic theory used in business whereas \_\_\_\_\_ is economics theory used in business and non-business organization.  
 a) Micro economics, macro economics  
 b) Business economics, managerial economics  
 c) Positive economics and normative economics  
 d) None of these
- 3) Demand curve slopes downwards because of \_\_\_\_\_.  
 a) The law of diminishing marginal utility  
 b) The income effect  
 c) Substitution effect  
 d) All of the above
- 4) Basic assumptions of law of demand include \_\_\_\_\_.  
 a) Prices of other goods should change  
 b) There should be substitute for the commodity  
 c) The commodity should not confer any distinction  
 d) The demand for the commodity should not be continuous
- 5) \_\_\_\_\_ is the degree of responsiveness of supply to changes in the price of a good.  
 a) Elasticity of demand  
 b) Elasticity of supply  
 c) Both (a) & (b)  
 d) None of them
- 6) In the case of perfect elasticity, the demand curve is \_\_\_\_\_.  
 a) Vertical  
 b) Horizontal  
 c) Flat  
 d) Steep
- 7) Cross elasticity of demand between tea and sugar is \_\_\_\_\_.  
 a) Positive  
 b) Zero  
 c) Infinity  
 d) Negative

- 8) Which of the following is not a survey method of demand forecasting?
- a) Consumers interview method      b) Expert opinion method
  - c) Barometric method                  d) Collective opinion method
- 9) The law of diminishing returns states that:
- a) As a firm uses more of a variable resource, given the quantity of fixed resources, the average product of the firm will increase.
  - b) As a firm uses more of a variable resource, given the quantity of fixed resources, marginal product of the firm will eventually decrease.
  - c) In the short run, the average total costs of the firm will eventually diminish.
  - d) In the long run, the average total costs of the firm will eventually diminish.
- 10) Implicit costs are:
- a) Equal to total fixed costs.
  - b) Comprised entirely of variable costs.
  - c) "payments" for self-employed resources.
  - d) always greater in the short run than in the long run.
- 11) In a perfectly competitive market, individual firm \_\_\_\_.
- a) Cannot influence the price of its product
  - b) Can influence the price of its product
  - c) Can fix the price of its product
  - d) Can influence the market force
- 12) The product under monopolistic competition are \_\_\_\_.
- a) Differentiated with close substitute
  - b) Perfect substitute
  - c) Differentiated without close substitute
  - d) Homogeneous
- 13) Fixed cost per unit increases when \_\_\_\_.
- a) Volume of production decreases
  - b) Volume of production increases
  - c) Variable cost per unit decreases
  - d) None of these
- 14) Firms in an oligopoly \_\_\_\_.
- a) Are independent of each other's action
  - b) Can each influence the market price
  - c) Charge a price equal to marginal revenue
  - d) All of these

**Q.3 Solve Any Two.** **12**

- a) Explain the scope and nature of Managerial Economics.
- b) State and explain the determinants of demand.
- c) Explain Elasticity of Supply? State the factors affecting elasticity of supply.

**Section – II**

**Q.4 Solve any four.** **16**

- a) What are the objectives of demand forecasting?
- b) Explain Trend projection method of demand forecasting.
- c) What do you mean by production? Explain the concept of production function.
- d) State and explain characteristics of market structure.
- e) Explain different market structures.

**Q.5 Solve Any Two.** **12**

- a) What is Linear programming? Explain applications of Linear programming.
- b) Explain break even analysis in detail. What is profit margin of safety.
- c) What is Pricing? Explain pricing decisions under perfect competition.

**Project Management and Operation Research**

Day & Date: Tuesday, 07-02-2023  
 Time: 10:00 AM To 01:00 PM

Max. Marks: 56

**Instructions:** 1) All question are compulsory.  
 2) Figures to the right indicate full marks.

**Section – I**

**Q.2 Solve any four of the following.** **16**

- Explain Project Life Cycle concept.
- Explain PERT.
- What is Top down and bottoms up budgeting?
- What is Risk? What are its categories?
- Differentiate Qualitative & Quantitative risk assessment.

**Q.3 Solve any two of the following.** **12**

- What are the various stages in project planning & explain.
- Explain Case study on visualization process of GANTT Chart.
- What is Risk Identification? Explain in detail about Risk Register.

**Section – II**

**Q.4 Solve any four of the following.** **16**

**Note:** Question e is compulsory.

- Write in brief on application of OR in Industry.
- What is LPP give its Applications & Advantages of LPP
- A firm produces three products, these products are processed on three different machines. The time required to manufacture one unit of each of the three products and the daily capacity of the three machines are given in the table below.

Machine	Time per unit (minutes)			Machine Capacity (Min/day)
	Product 1	Product 2	Product 3	
M1	2	3	2	440
M2	4	-	3	470
M3	2	5		430

It is required to determine the daily no. of units to be manufactured for each product. The profit per unit for product 1, 2 and 3 is, Rs 4, Rs 3 and Rs 6 respectively. It is assumed that all the amounts produced are consumed in the market. Formulate the mathematical (LP) model that will maximize the daily profit.

- Solve the following by Graphical method.

$$\text{Minimize } Z = 2X_1 + 3X_2$$

$$\text{Subject to } X_1 + X_2 \geq 6$$

$$7X_1 + X_2 \geq 14, X_1 \text{ \& } X_2 \geq 0$$

Compute the coordinates to plot on the  $X_1, X_2$  Plane

- What are the factors that influence the selection of location for plant?

**Q.5 Solve any two of the following.****Note:** Question c is compulsory.

- a) What is Replacement Model? State it's need & explain categories of replacement problems.
- b) What is Operational Research? Explain in brief the models of Operational Research.
- c) Consider the assignment problem as shown in table. In this problem 5 different jobs are to be assigned to five different operators such that the total processing time is minimized. The matrix entries represent processing time in hours. Solve using Hungarian method the matrix entries represent the processing time in hours.

Job	Operator				
	A	B	C	D	E
1	10	12	15	12	8
2	7	16	14	14	11

  - b) Pessimistic time
  - c) Most likely time
  - d) All of the above
- 5) A risk response strategy used under tool of Strategies for negative Risks or Threats through which the project team decides to acknowledge the risk and not take any action unless the risk occurs is called \_\_\_\_\_.
  - a) Mitigate
  - b) Transfer
  - c) Accept
  - d) Avoid
- 6) Operations Research has the characteristics it is done by a team of \_\_\_\_\_.
  - a) Scientists
  - b) Mathematicians
  - c) Academics
  - d) All of the above
- 7) \_\_\_\_\_ are the representation of reality.
  - a) Models
  - b) Phases
  - c) Both A and B
  - d) None of the above

- 8) In simplex method, if there is tie between a decision variable and a slack (or surplus) variable, \_\_\_\_\_ should be selected.
- a) Slack variable
  - b) Surplus variable
  - c) Decision variable
  - d) None of the above
- 9) In graphical representation the bounded region is known as \_\_\_\_\_ region.
- a) solution
  - b) basic solution
  - c) feasible solution
  - d) optimal solution
- 10) Project is \_\_\_\_\_.
- a) task
  - b) activity
  - c) planned activity
  - d) process
- 11) The Gantt chart is used for \_\_\_\_\_.
- a) Tracking project progress
  - b) Knowing date of project
  - c) Knowing starting date of project
  - d) Knowing end date of project
- 12) Generating new ideas for increasing the customer demands is \_\_\_\_\_.
- a) Innovation
  - b) Directing

Day & Date: Tuesday, 07-02-2023  
 Time: 10:00 AM To 01:00 PM

Max. Marks: 56

**Instructions:** 1) All question are compulsory.  
 2) Figures to the right indicate full marks.

**Section – I**

**Q.2 Solve any four of the following.** **16**

- Explain Project Life Cycle concept.
- Explain PERT.
- What is Top down and bottoms up budgeting?
- What is Risk? What are its categories?
- Differentiate Qualitative & Quantitative risk assessment.

**Q.3 Solve any two of the following.** **12**

- What are the various stages in project planning & explain.
- Explain Case study on visualization process of GANTT Chart.
- What is Risk Identification? Explain in detail about Risk Register.

**Section – II**

**Q.4 Solve any four of the following.** **16**

**Note:** Question e is compulsory.

- Write in brief on application of OR in Industry.
- What is LPP give its Applications & Advantages of LPP
- A firm produces three products, these products are processed on three different machines. The time required to manufacture one unit of each of the three products and the daily capacity of the three machines are given in the table below.

Machine	Time per unit (minutes)			Machine Capacity (Min/day)
	Product 1	Product 2	Product 3	
M1	2	3	2	440
M2	4	-	3	470
M3	2	5		430

It is required to determine the daily no. of units to be manufactured for each product. The profit per unit for product 1, 2 and 3 is, Rs 4, Rs 3 and Rs 6 respectively. It is assumed that all the amounts produced are consumed in the market. Formulate the mathematical (LP) model that will maximize the daily profit.

- d)** Solve the following by Graphical method.

$$\text{Minimize } Z = 2X_1 + 3X_2$$

$$\text{Subject to } X_1 + X_2 \geq 6$$

$$7X_1 + X_2 \geq 14, X_1 \text{ \& } X_2 \geq 0$$

Compute the coordinates to plot on the  $X_1, X_2$  Plane

- e)** What are the factors that influence the selection of location for plant?

**Q.5 Solve any two of the following.****Note:** Question c is compulsory.

- a) What is Replacement Model? State it's need & explain categories of replacement problems.
- b) What is Operational Research? Explain in brief the models of Operational Research.
- c) Consider the assignment problem as shown in table. In this problem 5 different jobs are to be assigned to five different operators such that the total processing time is minimized. The matrix entries represent processing time in hours. Solve using Hungarian method the matrix entries represent the processing time in hours.

Max. Marks: 70

- Instructions:** 1) Q. No. 1 is compulsory. It should be solved in the first 30 minutes in answer book. Page no 03 (Starting page of the Answer Book). Each question carries one mark.  
 2) Don't forget to Mention question paper set (P/Q/R/S) on top of page.  
 3) Figures to the right indicates full marks.  
 4) Assume suitable data wherever needed and mention it clearly.

**MCQ/Objective Type Questions**

Duration: 30 Minutes

Marks: 14

**Q.1 Choose the correct alternatives from the options.**

**14**

- 1) If a machine can change its course of action based on the external environment on its own, the machine is called?
  - a) Mobile
  - b) Intelligent
  - c) Both a) and b)
  - d) None of the above
- 2) The "Father of Artificial Intelligence" is \_\_\_\_\_.
  - a) Alan Turing
  - b) Charles Babbage
  - c) John McCarthy
  - d) None of the above
- 3) Which of the following are heuristic search algorithms?
  - a) Best First Search Algorithm
  - b) A\*Search Algorithm
  - c) Both a) and b)
  - d) None of the above
- 4) Which of the following is the common language for Artificial Intelligence?
  - a) Python
  - b) Java
  - c) Lisp
  - d) PHP
- 5) Which of the following is a type of artificial intelligence agent?
  - a) Learning AI Agent
  - b) Simple Reflex AI Agent
  - c) Goal-Based AI Agent
  - d) All of the above
- 6) Which of the following are appropriate levels for a knowledge- based AI agent?
  - a) Knowledge Level
  - b) Logical Level
  - c) Implementation Level
  - d) All of the above
- 7) Decisions of Victory/Defeat are made in Game trees using which algorithm?
  - a) DFS
  - b) BFS
  - c) Heuristic Search
  - d) Min/Max Algorithm
- 8) What are the different types of Artificial Intelligence approaches?
  - a) Strong Approach
  - b) Weak Approach
  - c) Applied Approach
  - d) All of the above

- 9)** How an AI agent does interact with its environment?
- a) Using sensors and perceivers      b) Using only sensors
  - c) Using only perceivers              d) None of the above
- 10)** The correct ways to solve a problem of state-space search are?
- a) Forward from the initial state      b) Backward from the goal
  - c) Both a) and b)                      d) None of the above
- 11)** Out of the given options, which of the following algorithms uses the least memory?
- a) DFS                                      b) BFS
  - c) Both a) and b) are the same      d) Cannot be compared
- 12)** What is the work of Task Environment and Rational Agents?
- a) Problem and Solution              b) Solution and Problem
  - c) Observation and Problem          d) Observation and Solution
- 13)** How is a decision reached upon by a decision tree?
- a) No test                                  b) Single Test
  - c) Double Test                          d) Multiple sequences of tests
- 14)** The different types of machine learning are?
- a) Supervised                              b) Unsupervised
  - c) Reinforcement                      d) All of the above

- a) Explain Heuristic Search Algorithm with example.
- b) What is Knowledge based system? Explain First Order Logic in details.
- c) State Different types of uniformed search algorithm. Explain any one in details along with advantages & disadvantages.

**Section – II**

**Q.4 Solve any FOUR questions. 16**

- a) Write a note on Bayesian Network.
- b) Explain in detail about conditional Probability.
- c) What is elementary game theory? Explain with example.
- d) What is Utility Theory? How it will become helpful for talking decision?
- e) Describe the issues in knowledge representation.

**Q.5 Solve any TWO questions. 12**

- a) Explain Decision Tree in details with one example.
- b) Explain Probability and Bayes' theorem along with example.
- c) What is Reinforcement learning? Explain types of Reinforcement learning.

**T.Y (B.Tech.) (Sem-I) (New) (CBCS) Examination: Oct/Nov– 2022**  
**ELECTRONICS & TELECOMMUNICATION ENGINEERING**  
**Artificial Intelligence**

Day & Date: Thursday, 16-02-2023  
 Time: 10:00 AM To 01:00 PM

Max. Marks: 70

- Instructions:** 1) Q. No. 1 is compulsory. It should be solved in the first 30 minutes in answer book. Page no 03 (Starting page of the Answer Book). Each question carries one mark.  
 2) Don't forget to Mention question paper set (P/Q/R/S) on top of page.  
 3) Figures to the right indicates full marks.  
 4) Assume suitable data wherever needed and mention it clearly.

**MCQ/Objective Type Questions**

Duration: 30 Minutes

Marks: 14

**Q.1 Choose the correct alternatives from the options.**

**14**

- 1) Out of the given options, which of the following algorithms uses the least memory?
  - a) DFS
  - b) BFS
  - c) Both a) and b) are the same
  - d) Cannot be compared
- 2) What is the work of Task Environment and Rational Agents?
  - a) Problem and Solution
  - b) Solution and Problem
  - c) Observation and Problem
  - d) Observation and Solution
- 3) How is a decision reached upon by a decision tree?
  - a) No test
  - b) Single Test
  - c) Double Test
  - d) Multiple sequences of tests
- 4) The different types of machine learning are?
  - a) Supervised
  - b) Unsupervised
  - c) Reinforcement
  - d) All of the above
- 5) If a machine can change its course of action based on the external environment on its own, the machine is called?
  - a) Mobile
  - b) Intelligent
  - c) Both a) and b)
  - d) None of the above
- 6) The "Father of Artificial Intelligence" is \_\_\_\_\_.
  - a) Alan Turing
  - b) Charles Babbage
  - c) John McCarthy
  - d) None of the above
- 7) Which of the following are heuristic search algorithms?
  - a) Best First Search Algorithm
  - b) A\*Search Algorithm
  - c) Both a) and b)
  - d) None of the above
- 8) Which of the following is the common language for Artificial Intelligence?
  - a) Python
  - b) Java
  - c) Lisp
  - d) PHP
- 9) Which of the following is a type of artificial intelligence agent?
  - a) Learning AI Agent
  - b) Simple Reflex AI Agent
  - c) Goal-Based AI Agent
  - d) All of the above

- 10)** Which of the following are appropriate levels for a knowledge- based AI agent?
- a) Knowledge Level
  - b) Logical Level
  - c) Implementation Level
  - d) All of the above
- 11)** Decisions of Victory/Defeat are made in Game trees using which algorithm?
- a) DFS
  - b) BFS
  - c) Heuristic Search
  - d) Min/Max Algorithm
- 12)** What are the different types of Artificial Intelligence approaches?
- a) Strong Approach
  - b) Weak Approach
  - c) Applied Approach
  - d) All of the above
- 13)** How an AI agent does interact with its environment?
- a) Using sensors and perceivers
  - b) Using only sensors
  - c) Using only perceivers
  - d) None of the above
- 14)** The correct ways to solve a problem of state-space search are?
- a) Forward from the initial state
  - b) Backward from the goal
  - c) Both a) and b)
  - d) None of the above

### MCQ/Objective Type Questions

Duration: 30 Minutes

Marks: 14

## 14

- Page 1 of 12

- 9) \_\_\_\_\_ techniques can be used to reduce the number of values for a given continuous attribute, by dividing the range of the attribute into intervals.
- a) Discretization
  - b) Transformation
  - c) Smoothing
  - d) Generalization
- 10) Which of the following method is used for finding optimal of cluster in K-Mean algorithm?
- a) Elbow method
  - b) Manhattan method
  - c) C. Ecludian method
  - d) All of the above
- 11) The Noise and outliers, missing values and duplicate data are problems of \_\_\_\_\_.
- a) Processing data
  - b) Mapping Data
  - c) Evaluating data
  - d) Data quality
- 12) ANN stands for \_\_\_\_\_.
- a) Ariel Neural Network
  - b) Artificial Neural Nucleus
  - c) Artificial Neural Network
  - d) Ariel Neural Nucleus
- 13) Create new attributes that can capture the important information in a data set much more efficiently than the original attributes \_\_\_\_\_.
- a) Feature Creation
  - b) Feature Selection
  - c) PCA
  - d) All of the above
- 14) The histogram of oriented gradients (HOG) is a feature descriptor used in computer vision and image processing for the purpose of \_\_\_\_\_.
- a) object detection
  - b) object classification
  - c) object clustering
  - d) All of the above

Duration: 30 Minutes

Marks: 14

**Q.1 Choose the correct alternatives from the options. 14**

- 1) What is the use of the bin/ binary data structure?
 

a) to have efficient insertion	b) to have efficient region query
c) to have efficient deletion	d) to have efficient traversal
- 2) \_\_\_\_\_ techniques can be used to reduce the number of values for a given continuous attribute, by dividing the range of the attribute into intervals.
 

a) Discretization	b) Transformation
c) Smoothing	d) Generalization
- 3) Which of the following method is used for finding optimal of cluster in K-Mean algorithm?
 

a) Elbow method	b) Manhattan method
c) C. Ecludian method	d) All of the above
- 4) The Noise and outliers, missing values and duplicate data are problems of \_\_\_\_\_.
 

a) Processing data	b) Mapping Data
c) Evaluating data	d) Data quality
- 5) ANN stands for \_\_\_\_\_.
 

a) Ariel Neural Network	b) Artificial Neural Nucleus
c) Artificial Neural Network	d) Ariel Neural Nucleus
- 6) Create new attributes that can capture the important information in a data set much more efficiently than the original attributes \_\_\_\_\_.
 

a) Feature Creation	b) Feature Selection
c) PCA	d) All of the above
- 7) The histogram of oriented gradients (HOG) is a feature descriptor used in computer vision and image processing for the purpose of \_\_\_\_\_.
 

a) object detection	b) object classification
c) object clustering	d) All of the above
- 8) Data Analysis is a process of \_\_\_\_\_.
 

a) Inspecting data	b) Cleaning data
c) Transforming data	d) All of the above

- 9) Amongst which of the following step is performed by data scientist after acquiring the data?
- a) Deletion
  - b) Data Replication
  - c) Data Integration
  - d) Data Cleansing
- 10) Amongst which of the following is / are the true about regression analysis?
- a) Describes associations within the data
  - b) Modeling relationships within the data
  - c) Answering yes/no questions about the data
  - d) All of the mentioned above
- 11) By normalizing relations or sets of relations, one minimizes \_\_\_\_\_.
- a) Data
  - b) Fields
  - c) Redundancy
  - d) Database
- 12) A graph that uses vertical bars to represent data is called a \_\_\_\_\_.
- a) Bar graph
  - b) Line graph
  - c) Scatterplot
  - d) All of the mentioned above
- 13) Which of the following techniques would perform better for reducing dimensions of a data set?
- a) Removing columns which have too many missing values
  - b) Removing columns which have high variance in data
  - c) Removing columns with dissimilar data trends
  - d) None of these
- 14) Clustering belongs to \_\_\_\_\_ data analysis.
- a) Supervised
  - b) Unsupervised
  - c) Both a) and b)

- 1) Which of the following managed components is responsible for relaying messages between communications channels such as MQTT, IPC, and the cloud?
  - a) MQTT bridge
  - b) Moquette
  - c) device shadows
  - d) None of these
- 2) Managing streams for real-time processing applies to the \_\_\_\_\_.
  - a) edge and the cloud
  - b) edge only
  - c) cloud only
  - d) None of these
- 3) Which of the following managed components is responsible for synchronizing the state between the edge and the cloud?
  - a) MQTT bridge
  - b) Moquette
  - c) device shadows
  - d) None of these
- 4) All of the logic of the component could be contained in the recipe life cycle scripts and does not require an \_\_\_\_\_.
  - a) artifact
  - b) config file
  - c) program
  - d) certificate
- 5) Bounded context and ubiquitous language are distinct concepts within \_\_\_\_\_.
  - a) data-driven design
  - b) domain-driven design
  - c) architecture-driven design
  - d) None of these
- 6) \_\_\_\_\_ can be deployed to IoT Greengrass devices either locally or remotely.
  - a) Group Version
  - b) Definition version
  - c) Components
  - d) Function Definition
- 7) The {"temperature": 70} message is an example of \_\_\_\_\_ data and is serializable.
  - a) Structured
  - b) Unstructured
  - c) Semi structured
  - d) None of above
- 8) \_\_\_\_\_ is not the most optimized data format for big data processing.
  - a) Apache ORC
  - b) Parquet
  - c) AVRO
  - d) JSON

- 9) Image data from a camera and transmitted as binary data is an example of \_\_\_\_\_ data.
- a) Structured
  - b) Unstructured
  - c) Semi structured
  - d) None of above
- 10) Who is the primary persona at the heart of any industrial solution?
- a) industrialists
  - b) operators and maintainers
  - c) programmers
  - d) data injectors
- 11) A single component can both reset configuration and \_\_\_\_\_ in a new configuration.
- a) restart
  - b) replace
  - c) merge
  - d) None of above
- 12) IoT Greengrass operates at the \_\_\_\_\_ layer of the OSI model.
- a) Physical
  - b) Network
  - c) Application
  - d) None of above
- 13) Edge devices can belong to multiple \_\_\_\_\_ and each thing group can define one active deployment.
- a) thing groups
  - b) thing artifacts
  - c) IAM roles
  - d) policies
- 14) Which of the following managed components is responsible for deploying a local MQTT broker and connecting leaf devices?
- a) Bridge
  - b) Moquette
  - c) Device shadows
  - d) None of these

**T.Y. (B.Tech) (Sem - I) (New) (CBCS) Examination: Oct/Nov-2022**  
**ELECTRONICS & TELECOMMUNICATION ENGINEERING**  
**Industrial IoT**

Day & Date: Thursday, 16-02-2023  
Time: 10:00 AM To 01:00 PM

Max. Marks: 56

**Instructions:** 1) All questions are compulsory.  
2) Figures to the right indicate full marks.

**Section – I**

**Q.2 Attempt any THREE.** **12**

- a) What are the three primary types of tools needed to deliver intelligence workloads at the edge?
- b) Describe one use case for the smart home vertical that ties in with one more of the key benefits for ML-powered edge solutions?
- c) What is the benefit of isolating your code and dependencies from other services?
- d) What is the benefit of using a publish/subscribe model to exchange messages?

**Q.3 Attempt any TWO.** **16**

- a) What is the benefit of decoupling services in your edge architecture?
- b) What do you think is the worst-case scenario if your home network router was compromised by an attacker but was still processing traffic as normal?
- c) What are the common components of an edge solution?

**Section – II**

**Q.4 Attempt any THREE.** **12**

- a) Can you modify an artifact stored in the cloud after it has been included in a registered custom component?
- b) What is the benefit of performing a data modeling exercise?
- c) Discuss at least one benefit of using a serverless function for processing IoT data?
- d) What business intelligence (BI) services can you use for data exposition to end consumers?

**Q.5 Attempt any TWO.** **16**

- a) What are some examples that differentiate static and dynamic resources of an edge component?
- b) Is there any relevance of ETL architectures for edge computing?  
(Hint: Think lambda.)
- c) What do you think is necessary to have an operational data store or a data lake/data warehouse?

 2) Figures to the right indicates full marks.  
 3) Use of non-programmable scientific calculator is allowed.

**MCQ/Objective Type Questions**

Duration: 30 Minutes

Marks:14

**Q.1 Choose the correct alternatives from the given options.**

**14**

- 1) \_\_\_\_\_ is not the most optimized data format for big data processing.
  - a) Apache ORC
  - b) Parquet
  - c) AVRO
  - d) JSON
- 2) Image data from a camera and transmitted as binary data is an example of \_\_\_\_\_ data.
  - a) Structured
  - b) Unstructured
  - c) Semi structured
  - d) None of above
- 3) Who is the primary persona at the heart of any industrial solution?
  - a) industrialists
  - b) operators and maintainers
  - c) programmers
  - d) data injectors
- 4) A single component can both reset configuration and \_\_\_\_\_ in a new configuration.
  - a) restart
  - b) replace
  - c) merge
  - d) None of above
- 5) IoT Greengrass operates at the \_\_\_\_\_ layer of the OSI model.
  - a) Physical
  - b) Network
  - c) Application
  - d) None of above
- 6) Edge devices can belong to multiple \_\_\_\_\_ and each thing group can define one active deployment.
  - a) thing groups
  - b) thing artifacts
  - c) IAM roles
  - d) policies
- 7) Which of the following managed components is responsible for deploying a local MQTT broker and connecting leaf devices?
  - a) Bridge
  - b) Moquette
  - c) Device shadows
  - d) None of these
- 8) Which of the following managed components is responsible for relaying messages between communications channels such as MQTT, IPC, and the cloud?
  - a) MQTT bridge
  - b) Moquette
  - c) device shadows
  - d) None of these

- 9) Managing streams for real-time processing applies to the \_\_\_\_\_.  
a) edge and the cloud                      b) edge only  
c) cloud only                                  d) None of these

 Time: 10:00 AM To 01:00 PM

Max. Marks: 70

- Instructions:** 1) Q. No. 1 is compulsory. It should be solved in the first 30 minutes in answer book. Page no 03 (Starting page of the Answer Book). Each question carries one mark.  
 2) Don't forget to Mention question paper set (P/Q/R/S) on top of page.  
 3) Figures to the right indicates full marks.

**MCQ/Objective Type Questions**

Duration: 30 Minutes

Marks: 14

**Q.1 Choose the correct alternatives from the options. 14**

- 1) When semaphore and Warner signals are installed on the same post, then the stop indication is given when \_\_\_\_\_.  
 a) Semaphore arm is lowered but Warner arm is horizontal  
 b) Both semaphore and Warner arms are lowered  
 c) Both the arms are horizontal  
 d) None of the above
- 2) In railways, the disc signals are provided for the purpose of \_\_\_\_\_.  
 a) dead slow movement                      b) indicating busy platform  
 c) possible danger ahead                      d) shunting
- 3) Semaphore-type signals are used when the maintenance or repair work is more than \_\_\_\_\_.  
 a) 1 – week    b) 4 days  
 c) 3 days    d) 2 days
- 4) Shunting signals are known as \_\_\_\_\_.  
 a) Routing signals                                      b) Starter signals  
 c) Ground signals                                      d) Warner signals
- 5) In railways the signal that also acts as a routing signal is \_\_\_\_\_.  
 a) Home signal    b) Advance starter signal  
 c) Outer signal    d) Starter signal
- 6) What is internet?  
 a) Programming language  
 b) Network connecting computers all over the world  
 c) Computer program to transfer data  
 d) All of these
- 7) Which of these is a non-profit domain?  
 a) .com    b) .in  
 c) .org    d) All of these
- 8) Which of these are web browsers?  
 a) Google Chrome    b) Internet Explorer  
 c) Brave    d) All of these

- 9) The purpose of using flux in soldering is to \_\_\_\_\_.  
a) Increase fluidity of solder metal  
b) Fill up gaps left in a bad joint  
c) Carbon steel  
d) Prevent oxides forming
- 10) State the reason for the thermal shutdown of IC regulator.  
a) Spikes in temperature                      b) Decrease in temperature  
c) Fluctuation in temperature              d) Increase in temperature
- 11) On which of the following effects of electric current a fuse operates?  
a) Photoelectric effect                      b) Electrostatic effect  
c) Heating effect                              d) Magnetic effect
- 12) A soldering iron 'bit' is made of \_\_\_\_\_.  
a) Brass    b) Tin  
c) Steel    d) Copper
- 13) What is the max data transfer rate for optical fiber cable?  
a) 10 Mbps                                      b) 100 Mbps  
c) 1000 Mbps                                  d) 10000 Mbps
- 14) Fiber optics possess the following properties \_\_\_\_\_.  
a) Immune electromagnetic interference  
b) Very less signal attenuation  
c) Very hard to tap  
d) All of these

**Instructions:** 1) All question are compulsory.  
 2) Figures to the right indicates full marks.

**Section – I**

**Q.2 Attempt any FOUR.** **16**

- a) What are the types of networking cables? Explain
- b) What do you mean by email? Give examples of email attacks.
- c) Give uses & advantages of email.
- d) What do you mean by Rectifiers? Give classification.
- e) Write a short note on IC Regulators.

**Q.3 Attempt any TWO.** **12**

- a) Explain & compare the Internet & Intranet.
- b) Write a note on WWW (World Wide Web).
- c) Write note on different batteries.

**Section – II**

**Q.4 Attempt any FOUR.** **16**

- a) Give & explain the classification of Railway signals according to functions.
- b) Explain the Client-Server communication model.
- c) Explain DHCP (Dynamic Host Configuration Protocol)
- d) Explain the classification of signaling relays.
- e) Write a short note on Railnet.

**Q.5 Attempt any TWO.** **12**

- a) What are the special signals used in Railway signaling?
- b) Write a notes on FTP (File Transfer Protocol)
- c) Explain Network security in Computer Network.

**T.Y. (B.Tech.) (Sem-I) (New) (CBCS) Examination: Oct/Nov -2022**  
**ELECTRONICS & TELECOMMUNICATION ENGINEERING**  
**Data Communication and Signaling in Railway**

Day & Date: Thursday, 16-02-2023  
 Time: 10:00 AM To 01:00 PM

Max. Marks: 56

**Instructions:** 1) All question are compulsory.  
 2) Figures to the right indicates full marks.

**Section – I**

**Q.2 Attempt any FOUR.** **16**

- a) What are the types of networking cables? Explain
- b) What do you mean by email? Give examples of email attacks.
- c) Give uses & advantages of email.
- d) What do you mean by Rectifiers? Give classification.
- e) Write a short note on IC Regulators.

**Q.3 Attempt any TWO.** **12**

- a) Explain & compare the Internet & Intranet.
- b) Write a note on WWW (World Wide Web).
- c) Write note on different batteries.

**Section – II**

**Q.4 Attempt any FOUR.** **16**

- a) Give & explain the classification of Railway signals according to functions.
- b) Explain the Client-Server communication model.
- c) Explain DHCP (Dynamic Host Configuration Protocol)
- d) Explain the classification of signaling relays.
- e) Write a short note on Railnet.

**Q.5 Attempt any TWO.** **12**

- a) What are the special signals used in Railway signaling?
- b) Write a notes on FTP (File Transfer Protocol)
- c) Explain Network security in Computer Network.

**Data Communication and Signaling in Railway**

Day & Date: Thursday, 16-02-2023  
 Time: 10:00 AM To 01:00 PM

Max. Marks: 70

- Instructions:** 1) Q. No. 1 is compulsory. It should be solved in the first 30 minutes in answer book. Page no 03 (Starting page of the Answer Book). Each question carries one mark.  
 2) Don't forget to Mention question paper set (P/Q/R/S) on top of page.  
 3) Figures to the right indicates full marks.

**MCQ/Objective Type Questions**

Duration: 30 Minutes

Marks: 14

**Q.1 Choose the correct alternatives from the options.**

**14**

- 1) On which of the following effects of electric current a fuse operates?
  - a) Photoelectric effect
  - b) Electrostatic effect
  - c) Heating effect
  - d) Magnetic effect
- 2) A soldering iron 'bit' is made of \_\_\_\_\_.
  - a) Brass
  - b) Tin
  - c) Steel
  - d) Copper
- 3) What is the max data transfer rate for optical fiber cable?
  - a) 10 Mbps
  - b) 100 Mbps
  - c) 1000 Mbps
  - d) 10000 Mbps
- 4) Fiber optics possess the following properties \_\_\_\_\_.
  - a) Immune electromagnetic interference
  - b) Very less signal attenuation
  - c) Very hard to tap
  - d) All of these
- 5) When semaphore and Warner signals are installed on the same post, then the stop indication is given when \_\_\_\_\_.
  - a) Semaphore arm is lowered but Warner arm is horizontal
  - b) Both semaphore and Warner arms are lowered
  - c) Both the arms are horizontal
  - d) None of the above
- 6) In railways, the disc signals are provided for the purpose of \_\_\_\_\_.
  - a) dead slow movement
  - b) indicating busy platform
  - c) possible danger ahead
  - d) shunting
- 7) Semaphore-type signals are used when the maintenance or repair work is more than \_\_\_\_\_.
  - a) 1 – week
  - b) 4 days
  - c) 3 days
  - d) 2 days
- 8) Shunting signals are known as \_\_\_\_\_.
  - a) Routing signals
  - b) Starter signals
  - c) Ground signals
  - d) Warner signals

  - d) Social courage
- 5) Commitment means \_\_\_\_\_.
  - a) Alignment to goals
  - b) Adherence to ethical principles
  - c) Empathy
  - d) All the above
- 6) The objectives of professional ethics in engineering are
  - a) To understand the moral values that ought to guide the Engineering profession
  - b) To resolve the moral issues in the profession, and
  - c) To justify the moral judgment concerning the profession
  - d) All the above
- 7) \_\_\_\_\_ is defined as a set of attitudes concerned with the values of work, which forms the motivational orientation.
  - a) Integrity
  - b) Work ethic
  - c) Personal Values
  - d) Professional values
- 8) Belief that the privacy of others must always be maintained \_\_\_\_\_.
  - a) Confidentiality
  - b) Empathy
  - c) Ethics
  - d) Work ethics

- a) Culture
- c) Society

- b) Value  
d) Moral

- a) Moral  
c) Values

- b) Ethics
- d) Positive and preferred values

**T.Y. (B. Tech) (Sem - I) (New) (CBCS) Examination: Oct/Nov-2022**  
**ELECTRONICS & TELECOMMUNICATION ENGINEERING**  
**Professional Ethics & Human Value**

Day & Date: Monday 20-02-2023  
Time: 10:00 AM To 12:00 PM

Max. Marks: 40

**Instructions:** 1) All questions are compulsory.  
2) Figures to the right indicate full marks.

- Q.2** List the human values and explain any two in detail. **10**  
**OR**  
Distinguish between Kohlberg's and Gilligan's approach to ethical (moral) judgments.
- Q.3** Discuss in detail risk benefit analysis and reducing risk. **10**  
**OR**  
Explain the role of engineers as manager.
- Q.4** **Write short notes on any four** **20**  
a) Objectives of Engineering Ethics  
b) Self confidence  
c) Commitment  
d) Difference between moral and ethics  
e) Intellectual property rights  
f) Code of ethics

Day & Date: Wednesday, 25-01-2023  
 Time: 10:00 AM To 01:00 PM

Max. Marks: 70

- Instructions:** 1) Q. No. 1 is compulsory it should be solved in first 30 minutes in answer Book. Page No.3 (starting page of the Answer Book) Each question carries one mark.  
 2) Don't forget to mention the question paper Set (P/Q/R/S) at the top of the Same page.

**MCQ/Objective Type Questions**

Duration: 30 Minutes

Marks: 14

**Q.1 Choose the correct alternatives from the given options.**

**14**

- 1) Total flux passing through a closed surface held in a magnetic field is
  - a) Infinity
  - b) Zero
  - c) Unity
  - d) None of these
- 2) Energy density is given as \_\_\_\_\_.
  - a) Energy per unit volume
  - b) Energy per unit area
  - c) Linear energy
  - d) All of these
- 3) Surface integral with volume integral relation is given by
  - a) Divergence theorem
  - b) Ampere's law
  - c) Poynting Theorem
  - d) Coulomb's law
- 4) According to Maxwell's first equation in differential form gives
  - a)  $\nabla \cdot D = \rho_v$
  - b)  $\int D ds = \int (\nabla \cdot D) dv$
  - c)  $\int H dl = \int (\nabla \times H) ds$
  - d)  $\nabla \times H = J_c + J_d$
- 5) In good conductors, rate of attenuation is
  - a) Small
  - b) Large
  - c) Infinity
  - d) Zero
- 6) The normal components of D are \_\_\_\_\_ across a dielectric boundary
  - a) discontinuous
  - b) continuous
  - c) zero
  - d)  $\infty$
- 7) "The total electric flux through any closed surface surrounding charges is equal to the amount of charge enclosed". This statement is associated with
  - a) Coulomb's square law
  - b) Gauss's law
  - c) Maxwell's first law
  - d) Maxwell's second law
- 8) The lines having R, L, C distributed along the circuit are called
  - a) Lumped
  - b) Distributed
  - c) Parallel
  - d) Paired

- 9) The characteristic impedance of a transmission line with impedance and admittance of 16 and 9 respectively is
- a) 25
  - b) 7
  - c) 1.33
  - d) 0.75
- 10) If potential of 1V is applied across a capacitor of 10pF, the energy stored is
- a) zero
  - b) 2.5 pJ
  - c) 10 pJ
  - d) 5 pJ
- 11) The propagation of the electromagnetic waves can be illustrated by
- a) Faraday law
  - b) Ampere law
  - c) Fleming rule
  - d) Coulomb law
- 12) The Stoke's theorem uses which of the following operation?
- a) Divergence
  - b) Gradient
  - c) Curl
  - d) Laplacian
- 13) The Poynting vector is the power component that is calculated by the
- a) Product of E and H
  - b) Ratio of E and H
  - c) Dot product of E and H
  - d) Cross product of E and H
- 14) The potential due to a dipole at a point P from it is the
- a) Sum of potentials at the charges
  - b) Difference of potentials at the charges
  - c) Multiplication of potentials at the charges
  - d) Ratio of potentials at the charges

Day & Date: Wednesday, 25-01-2023  
 Time: 10:00 AM To 01:00 PM

Max. Marks: 56

**Instructions:** 1) All Questions are compulsory.  
 2) Figures to the right indicate full marks.

**Section – I**

**Q.2 Attempt any Three.** **12**

- State and explain Coulomb's law.
- Two charges  $Q_1 = 300\mu\text{C}$  &  $Q_2 = -40\mu\text{C}$  are placed at (1, -1, -3) m and at (3, -3, -2) m. Find the force acting on charge  $Q_1$  due to charge  $Q_2$ .
- State and verify Ampere's Circuital Law.
- If  $\vec{D} = 2xy\vec{a}_x + x^2y\vec{a}_y$  (C/m<sup>2</sup>) and the rectangular parallelepiped formed by the planes  $x = 0$  &  $x = 1$ ,  $y = 0$  &  $y = 2$  and  $z = 0$  &  $z = 3$ . Apply divergence theorem to find out the charge.

**Q.3 Attempt any two.** **16**

- Given a dipole at origin in free space has a moment of  $400\pi \epsilon_0 (0.6\vec{a}_x - 0.75\vec{a}_y + 0.8\vec{a}_z)$  C.m. Find the potential at i) (0,5,0) ii) (2,3,4).
- Derive the boundary conditions of electrostatic fields for conductor-free space medium.
- State and prove point form of Gauss' Law.

**Section – II**

**Q.4 Attempt any Three.** **12**

- State and derive the Maxwell's equations of Faraday's law and Ampere's law for static fields.
- Define following parameters of transmission line
  - Characteristic Impedance
  - Propagation constant
  - Reflection coefficient
  - Transmission coefficient
- Derive the wave equation for electric field for lossless media by using Maxwell's equation  $\nabla \times \vec{E} = -\frac{\partial \vec{B}}{\partial t}$ .
- Derive the transmission line equation in terms of voltage.

**Q.5 Attempt any two.** **16**

- State and derive Poynting theorem.
- If the field quantities  $\vec{E} = 2 \sin x \cdot \sin t \vec{a}_y$  and  $\vec{H} = \frac{2}{\mu_0} \cos x \cdot \cos t \vec{a}_z$  are given. Verify whether the given pairs of fields satisfy Maxwell's equations or not.
- What is Smith chart & how it is constructed? Write the applications of Smith chart.

**Q.5 Attempt any two.** **16**

- State and derive Poynting theorem.
- If the field quantities  $\vec{E} = 2 \sin x \cdot \sin t \vec{a}_y$  and  $\vec{H} = \frac{2}{\mu_0} \cos x \cdot \cos t \vec{a}_z$  are given. Verify whether the given pairs of fields satisfy Maxwell's equations or not.
- What is Smith chart & how it is constructed? Write the applications of Smith chart.

**T.Y. (B. Tech) (Sem – I) (Old) (CBCS) Examination: Oct/Nov - 2022**  
**ELECTRONICS AND TELECOMMUNICATION ENGINEERING**  
**Digital Design and HDL**

Day & Date: Tuesday, 31-01-2023  
 Time: 10:00 AM To 01:00 PM

Max. Marks: 70

- Instructions:** 1) Q. No. 1 is compulsory and should be solved in first 30 minutes in Answer Book. Page No.3 (starting page of the Answer Book). Each question carry one mark.  
 2) Don't forget to mention Question Paper Set (P/Q/R/S) at the top of the same page.

**MCQ/Objective Type Questions**

Duration: 30 Minutes

Marks: 14

**Q.1 Choose the correct option.**

14

- 1) Select which is the correct statement
  - a) A single architecture can have multiple entity
  - b) A single entity can have multiple architecture
  - c) A single entity can have only one architecture
  - d) none of these
- 2) Which of the delay statements are not valid
  - a)  $z \leq x$  and  $y$  after 5 NS;
  - b)  $z \leq \text{transport not } ((x \text{ and } y) \text{ or } (a \text{ and } b))$  after 8 NS;
  - c)  $z \leq x$  after 4 NS, not  $x$  after 8 NS;
  - d) none of these
- 3) A buffer with single input A and single output B has a delay of 20 nanosecond. If the value of input A changes after 10 ns from 0 to 1 and it changes again from 1 to 0 at 20 ns. At what time, the value of output B will be 1, if the transport delay model is used?
  - a) 20 ns
  - b) 30 ns
  - c) 40 ns
  - d) Output will remain zero
- 4) Which is the correct entity representation for the two input NAND gate shown below?

- a) NAND 5 entity is  
port (A, B : input;  
C: output); NAND 5 end;
- b) entity NAND5 is  
port (A, B : in bit;  
C: out bit);  
end NAND5;
- c) Entity: NAND5 is  
port(Inputs: A, B;  
Output: C);  
end;

- d) entity : NAND5  
port( inbit: A,B),  
(outbit: C);  
end.
- 5) Binary multiplication requires\_\_\_\_\_
- |                        |                      |
|------------------------|----------------------|
| a) Shifting            | b) BCD addition      |
| c) Shifting and adding | d) None of the above |
- 6) The Verilog HDL code starts with the keyword\_\_\_\_\_
- |               |           |
|---------------|-----------|
| a) always     | b) module |
| c) end module | d) items  |
- 7) #40 \$finish indicates\_\_\_\_\_
- |  |
|--|
| a) end of simulation time              |
| b) end of simulation at 40 time units  |
| c) suspend simulation at 40 time units |
| d) None                                |
- 8) If A=4'b1010 and B=4'b1100 then A&B
- |            |            |
|------------|------------|
| a) 4'b0000 | b) 4'b1000 |
| c) 1'b1    | d) 1'b0    |
- 9) Which of the following is correct syntax for component declaration?
- |  |
|--|
| a) COMPONENT component_name IS<br>PORT ( port_mode : type port_name;<br>port_mode : type port_name;<br>....);<br>END component_name; |
| b) COMPONENT component_name IS<br>PORT ( port_mode : type port_name;<br>port_mode : type port_name;<br>.....);<br>END COMPONENT;     |
| c) COMPONENT component_name IS<br>PORT ( port_name : mode type;<br>port_name : mode type;<br>.....);<br>END component_name;          |
| d) COMPONENT component name IS<br>PORT ( port_name : mode type;<br>port_name : mode type;<br>....);<br>END COMPONENT;                |
- 10) A ripple counter is \_\_\_\_\_ sequential circuit.
- |                 |                |
|-----------------|----------------|
| a) Reset        | b) Synchronous |
| c) Asynchronous | d) Logic       |
- 11) In FSM diagram what does circle represent?
- |                    |                  |
|--------------------|------------------|
| a) Change of state | b) State         |
| c) Output value    | d) Initial state |

- 12) Moore machine has \_\_\_\_\_ states than a mealy machine.
  - a) Fewer
  - b) More
  - c) Equal
  - d) Negligible
- 13) The boundary scan path is provided with
  - a) serial input pads
  - b) parallel input pads
  - c) parallel output pads
  - d) buffer pads
- 14) SPLDs, CPLDs, and FPGAs are all which type of device?
  - a) PAL
  - b) PLD
  - c) EPROM
  - d) SRAM

Max. Marks: 70

**Instructions:** 1) Section I and Section II are compulsory.  
2) Figures to the right indicate full marks.

**Section – I**

**Q.2 Answer any four** **16**

- a) With the help of Flow Chart, explain different steps involved in VLSI design flow.
- b) Design a VHDL module for 3:8 decoder using behavioral architecture style.
- c) What are delays used in VHDL? Explain with example.
- d) Design a Verilog module for full adder.
- e) Explain various attributes in VHDL.

**Q.3 Answer any Two** **12**

- a) Design a 4:1 mux using data flow and behavioral modeling. Comment on the performance of this multiplexer using both the modeling style.
- b) Design a VHDL module to realize mod 6 up down counter with asynchronous reset.
- c) With example, explain the concept of operator overloading in VHDL.

**Section – II**

**Q.4 Answer any four** **16**

- a) Draw state diagram and Design a VHDL module for D flip flop.
- b) Explain the testing process using Built-In-Self test.
- c) Write a VHDL test bench for half adder.
- d) Draw Macrocell and explain its working.
- e) Draw state diagram and Design a VHDL module for detecting a sequence 111 using Mealy model.

**Q.5 Answer any Two** **12**

- a) Draw block diagram and explain Embedded Array Block (EAB) of Flex 10 K.
- b) Draw state diagram and Design a VHDL module to realize ADD and SHIFT multiplier.
- c) Explain testing of combinational and sequential logic.

**T. Y (B.Tech.) (Sem-I) (Old) (CBCS) Examination: Oct/Nov- 2022**  
**ELECTRONICS & TELECOMMUNICATION**  
**Digital Signal Processing**

Day & Date: Friday, 24-02-2023  
 Time: 10:00 AM To 01:00 PM

Max. Marks: 56

**Instructions:** 1) All questions are compulsory.  
 2) Figures to the right indicates full marks

**Section - I**

**Q.2 Attempt any Four.** **16**

- Determine DFT of  $x[n]$  if  $x[n] = \{0, 1, 2, 3\}$  using definition of DFT.
- Find Cross correlation of sequence  $x[n] = \{2, 1, 2, 4\}$  &  $y[n] = \{1, 2, 3, 1\}$ .
- Find linearity of system i)  $y[n] = x^2[n]$  ii)  $y[n] = n x[n]$ ,
- Find 4 point DFT of  $x[n] = \{1, -1, 1, -1\}$  using DIF algorithm.
- Determine circular convolution using concentric circle method  
 $x[n] = \{1, 2, 3, 1\}$  &  $h[n] = \{4, 3, 2, 2\}$ .

**Q.3 Attempt any one full question.** **12**

- Find linear convolution of the following sequences using Overlap Save Method.  $x[n] = \{3, -1, 0, 1, 3, 2, 0, 1, 2, 1\}$  &  $h[n] = \{1, 1, 1\}$ .
  - Differentiate between Circular & Linear convolution.
- Find  $x(n)$  using DIT FFT where  $X(n) = \{1, 0, 2, 0, 3, 0, 4, 0\}$ .
  - Explain similarities & differences between DIF & DIT algorithms.

**Section – II**

**Q.4 Attempt any four:** **16**

- Give the equation specifying Bartlett, Hamming and rectangular window.
- By impulse invariance method obtain the digital filter transfer function  $H(z)$   
 $H(s) = 2/(s + 1)(s + 2)$  for  $T=1$  sec
- Explain the characteristics of Analog low pass Butterworth filter.
- Realize the system in cascade form  $H(Z) = \frac{1 + \frac{1}{2}Z^{-1}}{(1 - Z^{-1} + \frac{1}{4}Z^{-2})(1 - Z^{-1} + \frac{1}{2}Z^{-2})}$
- Explain the application of DSP in telecommunication in detail.

**Q.5 Attempt any one full question:** **12**

- Design an ideal low pass filter using Fourier method whose desired frequency response is

$$H_d(e^{jw}) = 1 \quad \text{for } \frac{\pi}{4} \leq |w| \leq \pi$$

$$= 0 \quad \text{for } |w| \leq \frac{\pi}{4}$$

Determine the impulse response  $h(n)$  for  $N = 11$ . Determine  $H(Z)$  &  $H'(Z)$ .

- Explain finite word length effect of FIR filter.
- Obtain cascade form realization of the system function  
 $H(Z) = (1 + 2Z^{-1} - Z^{-2})(1 + Z^{-1} - Z^{-2})$
    - Consider an FIR lattice filter with coefficients  $k_1 = \frac{1}{4}$ ;  $k_2 = \frac{1}{4}$ ;  $k_3 = \frac{1}{3}$   
 Determine the FIR filter coefficients direct form structure.

**T. Y (B.Tech.) (Sem-I) (Old) (CBCS) Examination: Oct/Nov- 2022**  
**ELECTRONICS & TELECOMMUNICATION**  
**Digital Signal Processing**

Day & Date: Friday, 24-02-2023  
 Time: 10:00 AM To 01:00 PM

Max. Marks: 70

- Instructions:** 1) Q. No. 1 is compulsory. It should be solved in the first 30 minutes in answer book. Page no 03 (Starting page of the Answer Book). Each question carries one mark.  
 2) Don't forget to Mention question paper set (P/Q/R/S) on top of page.  
 3) Figures to the right indicates full marks

**MCQ/Objective Type Questions**

Duration: 30 Minutes

Marks: 14

**Q.1 Choose the correct alternatives from the given options.**

**14**

- 1) Bilinear transformation mapping is
  - a) One to one
  - b) Many to one
  - c) Many to Many
  - d) One to Many
- 2) Which of the following filter have linear phase characteristic
  - a) IIR
  - b) LP
  - c) HP
  - d) FIR
- 3) Convolution of ideal filter response and sinc function results in
  - a) side lobes oscillations
  - b) main lobe oscillations
  - c) sharpening of transition width
  - d) decrease in main lobe width
- 4) IIR digital filters are of the nature
  - a) Recursive
  - b) Non recursive
  - c) Both
  - d) None
- 5) To avoid aliasing of frequency components which method is useful in designing filter
  - a) impulse invariant
  - b) bilinear transformation
  - c) Windowing techniques
  - d) None
- 6) In the FIR realization methods, the following method requires minimum number of multipliers
  - a) Cascade
  - b) Direct Form
  - c) Lattice
  - d) Linear phase
- 7) The factor that influence the choice of realization of structure is
  - a) Memory requirement
  - b) Computational complexity
  - c) Parallel processing
  - d) All of the above
- 8) If  $X(k)$  is  $N$  point DFT of sequence  $x(n)$  then what is DFT of  $x^*(n)$ ?
  - a)  $X^*(N-k)$
  - b)  $X^*(k)$
  - c)  $X^*(N-k)$
  - d) None of these
- 9) The zero padding is used for better display of
  - a) Time domain signal
  - b) Frequency Spectrum
  - c) both a & b
  - d) None of these

- 10) For calculating DFT, DIT algorithm is related to
  - a)  $X(k)$  shuffled
  - b)  $x(n)$  shuffled
  - c) both a & b
  - d) None of these
- 11) In overlap save method of long sequence filtering what is the length of the input sequence block?
  - a)  $L + M + 1$
  - b)  $L + M$
  - c)  $L + M - 1$
  - d) None of these
- 12) Correlation is basically used to \_\_\_\_\_ two signals.
  - a) Add
  - b) Subtract
  - c) Compare
  - d) None of these
- 13) No. of complex Multiplication required to compute  $N$  point DFT using DIF are.
  - a)  $N \log_2 N$
  - b)  $(N/2) * \log_2 N$
  - c)  $N^2$
  - d)  $N(N - 1)$
- 14) The circular convolution of  $\{0, 1, 2\}$  &  $\{1, 1, 0\}$  is
  - a)  $\{0, 2, 3\}$
  - b)  $\{1, 2, 3\}$
  - c)  $\{1, 1, 1\}$
  - d)  $\{2, 1, 3\}$

**T. Y (B.Tech.) (Sem-I) (Old) (CBCS) Examination: Oct/Nov- 2022**  
**ELECTRONICS & TELECOMMUNICATION**  
**Digital Signal Processing**

Day & Date: Friday, 24-02-2023  
 Time: 10:00 AM To 01:00 PM

Max. Marks: 56

**Instructions:** 1) All questions are compulsory.  
 2) Figures to the right indicates full marks

**Section - I****Q.2 Attempt any Four.****16**

- Determine DFT of  $x[n]$  if  $x[n] = \{0, 1, 2, 3\}$  using definition of DFT.
- Find Cross correlation of sequence  $x[n] = \{2, 1, 2, 4\}$  &  $y[n] = \{1, 2, 3, 1\}$ .
- Find linearity of system i)  $y[n] = x^2[n]$  ii)  $y[n] = n x[n]$ ,
- Find 4 point DFT of  $x[n] = \{1, -1, 1, -1\}$  using DIF algorithm.
- Determine circular convolution using concentric circle method  $x[n] = \{1, 2, 3, 1\}$  &  $h[n] = \{4, 3, 2, 2\}$ .

**Q.3 Attempt any one full question.****12**

- Find linear convolution of the following sequences using Overlap Save Method.  $x[n] = \{3, -1, 0, 1, 3, 2, 0, 1, 2, 1\}$  &  $h[n] = \{1, 1, 1\}$ .
  - Differentiate between Circular & Linear convolution.
- Find  $x(n)$  using DIT FFT where  $X(n) = \{1, 0, 2, 0, 3, 0, 4, 0\}$ .
  - Explain similarities & differences between DIF & DIT algorithms.

**Section – II****Q.4 Attempt any four:****16**

- Give the equation specifying Bartlett, Hamming and rectangular window.
- By impulse invariance method obtain the digital filter transfer function  $H(z)$   $H(s) = 2/(s + 1)(s + 2)$  for  $T=1$  sec
- Explain the characteristics of Analog low pass Butterworth filter.
- Realize the system in cascade form  $H(Z) = \frac{1 + \frac{1}{2}Z^{-1}}{(1 - Z^{-1} + \frac{1}{4}Z^{-2})(1 - Z^{-1} + \frac{1}{2}Z^{-2})}$
- Explain the application of DSP in telecommunication in detail.

**Q.5 Attempt any one full question:****12**

- Design an ideal low pass filter using Fourier method whose desired frequency response is

$$H_d(e^{jw}) = 1 \quad \text{for } \frac{\pi}{4} \leq |w| \leq \pi$$

$$= 0 \quad \text{for } |w| \leq \frac{\pi}{4}$$

Determine the impulse response  $h(n)$  for  $N = 11$ . Determine  $H(Z)$  &  $H'(Z)$ .

- Explain finite word length effect of FIR filter.
- Obtain cascade form realization of the system function  $H(Z) = (1 + 2Z^{-1} - Z^{-2})(1 + Z^{-1} - Z^{-2})$
    - Consider an FIR lattice filter with coefficients  $k_1 = \frac{1}{4}$ ;  $k_2 = \frac{1}{4}$ ;  $k_3 = \frac{1}{3}$   
 Determine the FIR filter coefficients direct form structure.

Marks: 14

14

- 1) The internal RAM memory of the 8051 is\_\_\_\_\_

a) 32 bytes                                      b) 64 bytes  
c) 128 bytes                                     d) 256 bytes
- 2) The 8051 has \_\_\_\_\_ 16-bit counter/timers.

a) 2    b) 1  
c) 4    d) 3
- 3) Data transfer from I/O to external data memory can only be done with the MOVX command.

a) True    b) False
- 4) In UART, \_\_\_\_\_ register is used as Transmit Status and Control Register

a) RCSTA    b) TXREG  
c) TXSTA    d) RCREG
- 5) In PIC16F877A, \_\_\_\_\_ bit resolution ADC is available.

a) 10    b) 8  
c) 4    d) 1
- 6) Which flags are more likely to get affected in status registers by Arithmetic and Logical Unit (ALU) of PIC 16 FXX on the basis of instructions execution?

a) Carry Flag                                        b) Zero Flag  
c) Digit Carry Flag                                d) All of the above
- 7) Address assigned to INTI & Timer 1 interrupts are\_\_\_\_\_

a) 0013H & 001BH                              b) 001BH & 0013H  
c) 0003H & 000BH                              d) 0013H & 0023H

- 8) When the microcontroller executes some arithmetic operations, then the flag bits of which register are affected?
- a) PSW
  - b) SP
  - c) DPTR
  - d) PC
- 9) An alternate function of port pin P3.4 in the 8051 is:
- a) Timer 0
  - b) Timer 1
  - c) interrupt 0
  - d) interrupt 1
- 10) PSEN stands for \_\_\_\_\_
- a) Program Select Enable
  - b) Peripheral Store Enable
  - c) Program Store Enable
  - d) Peripheral Select Enable
- 11) How many rows and columns are present in a 16\*2 alphanumeric LCD?
- a) rows=2, columns=32
  - b) rows=16, columns=2
  - c) rows=16, columns=16
  - d) rows=2, columns=16
- 12) For writing commands on an LCD, RS bit is
- a) set
  - b) reset
  - c) set & reset
  - d) none of the mentioned
- 13) What is the purpose of a special function register SPBRG in USART?
- a) To control the operation associated with baud rate generation
  - b) To control an oscillator frequency
  - c) To control or prevent the false bit transmission of 9<sup>th</sup> bit
  - d) All of the above
- 14) The capture operation in counter mode is feasible when mode of CCP module is \_\_\_\_\_
- a) synchronized
  - b) asynchronized
  - c) synchronized as well as asynchronized
  - d) irrespective of synchronization

- a) Compare CISC & RISC Microcontroller
  - b) Explain the 8051 Instructions set.
  - c) Explain different Addressing Modes of 8051 Microcontroller with examples.
  - d) Explain the Memory organization & Mapping in 8051.
- Q.3 Attempt any two.** **16**
- a) Discuss interfacing of external 16K EPROM and 8K RAM with the microcontroller 8051.
  - b) Brief about Timers and Counter and its associated registers in 8051.
  - c) Explain interfacing of stepper motor with microcontroller. Write program to rotate stepper motor in clockwise direction continuously in full step mode.

**Section – II**

- Q.4 Attempt any three.** **12**
- a) Explain in brief the Functional pin description of PIC16F877A
  - b) Mention the various kinds of RESET? Explain any one in detail.
  - c) Explain Configuration word in PIC 16F877A.
  - d) Explain any one Master Synchronous Serial Port (MSSP) module.
- Q.5 Attempt any two.** **16**
- a) Explain the terms in PIC 16F877A:  
i) Internal ADC      ii) The Watchdog Timer
  - b) Explain all types of Interrupts in PIC 16F877A.
  - c) Explain CCP module in PIC 16F877A in detail.

-----	---

**T.Y. (B. Tech) (Sem-I) (Old) (CBCS) Examination: Oct/Nov-2022**  
**ELECTRONICS & TELECOMMUNICATION ENGINEERING**  
**Microcontrollers and Applications**

Day & Date: Tuesday, 07-02-2023  
 Time: 10:00 AM To 01:00 PM

Max. Marks: 70

- Instructions:** 1) Q. No. 1 is compulsory and should be solved in first 30 minutes in Answer Book. Page No.3 (starting page of the Answer Book). Each questions carry one mark.  
 2) Don't forget to mention Question Paper Set (P/Q/R/S) at the top of the same page.  
 3) Figures to the right indicates full marks.

**MCQ/Objective Type Questions**

Duration: 30 Minutes

Marks: 14

**Q.1 Choose the correct alternatives from the options. 14**

- 1) When the microcontroller executes some arithmetic operations, then the flag bits of which register are affected?
 

a) PSW	b) SP
c) DPTR	d) PC
- 2) An alternate function of port pin P3.4 in the 8051 is:
 

a) Timer 0	b) Timer 1
c) interrupt 0	d) interrupt 1
- 3) PSEN stands for \_\_\_\_
 

a) Program Select Enable	b) Peripheral Store Enable
c) Program Store Enable	d) Peripheral Select Enable
- 4) How many rows and columns are present in a 16\*2 alphanumeric LCD?
 

a) rows=2, columns=32	b) rows=16, columns=2
c) rows=16, columns=16	d) rows=2, columns=16
- 5) For writing commands on an LCD, RS bit is
 

a) set	b) reset
c) set & reset	d) none of the mentioned
- 6) What is the purpose of a special function register SPBRG in USART?
 

a) To control the operation associated with baud rate generation
b) To control an oscillator frequency
c) To control or prevent the false bit transmission of 9 <sup>th</sup> bit
d) All of the above
- 7) The capture operation in counter mode is feasible when mode of CCP module is \_\_\_\_
 

a) synchronized
b) asynchronized
c) synchronized as well as asynchronized
d) irrespective of synchronization
- 8) The internal RAM memory of the 8051 is \_\_\_\_
 

a) 32 bytes	b) 64 bytes
c) 128 bytes	d) 256 bytes

 3) Assume suitable data if necessary.

**MCQ/Objective Type Questions**

Duration: 30 Minutes

Marks: 14

**Q.1 Choose the correct alternatives from the options.**

**14**

- 1) \_\_\_\_\_ theory can be described as a code of conduct to which all rational beings should adhere. This contrasts with \_\_\_\_\_ morality which is the code of conduct adopted by a particular group or society.
  - a) Descriptive, Normative
  - b) Normative, Instrumental
  - c) Normative, Descriptive
  - d) Ethical, Descriptive
- 2) \_\_\_\_\_ and \_\_\_\_\_ are both examples of \_\_\_\_\_ based theories which are based on basic universal principles of right and wrong.
  - a) Ethics of duty, Ethics of rights and justice, Principle
  - b) Utilitarianism, Egoism, Principle
  - c) Ethics of duty, Utilitarianism, Consequentialist
  - d) Egoism, Ethics of rights and justice, Consequentialist incorrect
- 3) What term can be used to describe 'the hypothetical agreement between member of society and those who govern it which establishes the inter-relationships, rights and responsibilities on a fair basis'?
  - a) Social Contract
  - b) Duty Ethics
  - c) Consequentialism
  - d) Virtue Ethics
- 4) What type of justice exist if employees are being open, honest and truthful in their communications at work?
  - a) Procedural
  - b) Distributive
  - c) Ethical
  - d) Interactional
- 5) Stakeholders are considered more important to an organization when :
  - a) They can make use of their power on the organization
  - b) They do not emphasize the urgency of their issues
  - c) Their issues are not legitimate
  - d) They can express themselves articulately
- 6) \_\_\_\_\_ is a problem, situation or opportunity requiring an individual, group, or organization to choose among several actions that must be evaluated as right or wrong.
  - a) Crisis
  - b) Ethical Issue
  - c) Fraud
  - d) Indictment

- 7) A stakeholder orientation includes all of the following activities except:
- a) generating data about stakeholder group
  - b) assessing the firms effect on stakeholder groups
  - c) distributing stakeholder information throughout the firm
  - d) minimizing the influence of stakeholder information on the firm
- 8) Ethics should guide the technology towards \_\_\_\_.
- a) Political justice
  - b) Cultural justice
  - c) Social justice
  - d) None of the Above
- 9) A company whose shares are easily transferred is \_\_\_\_.
- a) Private Company
  - b) Public Company
  - c) Both (a). & (b).
  - d) None of the above
- 10) Codes of conduct and codes of ethics \_\_\_\_.
- a) are formal statements that describe what an organization expects of its employees
  - b) become necessary only after a company has been in legal trouble
  - c) are designed for top executives and managers, not regular employees
  - d) rarely become an effective component of the ethics and compliance program
- 11) The first step in the auditing process should be to secure the commitment of:
- a) employees.
  - b) top executives and directors.
  - c) stockholders
  - d) customers
- 12) An organization's obligation to act to protect and improve society's welfare as well as its own interests is referred to as
- a) organizational social responsibility
  - b) organizational social responsiveness
  - c) corporate obligation
  - d) business ethics
- 13) Managerial ethics can be characterized by all of the following levels except
- a) Immoral management
  - b) Amoral management
  - c) Demoral management
  - d) Moral management
- 14) \_\_\_\_\_ are the principles, which govern and guide business people to perform business functions
- a) business ethics
  - b) code of conduct
  - c) all of these
  - d) None

  - b) top executives and directors.
  - c) stockholders
  - d) customers
- 2) An organization's obligation to act to protect and improve society's welfare as well as its own interests is referred to as
  - a) organizational social responsibility
  - b) organizational social responsiveness
  - c) corporate obligation
  - d) business ethics
- 3) Managerial ethics can be characterized by all of the following levels except
  - a) Immoral management
  - b) Amoral management
  - c) Demoral management
  - d) Moral management
- 4) \_\_\_\_\_ are the principles, which govern and guide business people to perform business functions
  - a) business ethics
  - b) code of conduct
  - c) all of these
  - d) None
- 5) \_\_\_\_\_ theory can be described as a code of conduct to which all rational beings should adhere. This contrasts with \_\_\_\_\_ morality which is the code of conduct adopted by a particular group or society.
  - a) Descriptive, Normative
  - b) Normative, Instrumental
  - c) Normative, Descriptive
  - d) Ethical, Descriptive
- 6) \_\_\_\_\_ and \_\_\_\_\_ are both examples of \_\_\_\_\_ based theories which are based on basic universal principles of right and wrong.
  - a) Ethics of duty, Ethics of rights and justice, Principle
  - b) Utilitarianism, Egoism, Principle
  - c) Ethics of duty, Utilitarianism, Consequentialist
  - d) Egoism, Ethics of rights and justice, Consequentialist incorrect

- 7) What term can be used to describe 'the hypothetical agreement between member of society and those who govern it which establishes the inter-relationships, rights and responsibilities on a fair basis'?
- a) Social Contract
  - b) Duty Ethics
  - c) Consequentialism
  - d) Virtue Ethics
- 8) What type of justice exist if employees are being open, honest and truthful in their communications at work?
- a) Procedural
  - b) Distributive
  - c) Ethical
  - d) Interactional
- 9) Stakeholders are considered more important to an organization when :
- a) They can make use of their power on the organization
  - b) They do not emphasize the urgency of their issues
  - c) Their issues are not legitimate
  - d) They can express themselves articulately
- 10) \_\_\_\_\_ is a problem, situation or opportunity requiring an individual, group, or organization to choose among several actions that must be evaluated as right or wrong.
- a) Crisis
  - b) Ethical Issue
  - c) Fraud
  - d) Indictment
- 11) A stakeholder orientation includes all of the following activities except:
- a) generating data about stakeholder group
  - b) assessing the firms effect on stakeholder groups
  - c) distributing stakeholder information throughout the firm
  - d) minimizing the influence of stakeholder information on the firm
- 12) Ethics should guide the technology towards \_\_\_\_\_.
- a) Political justice
  - b) Cultural justice
  - c) Social justice
  - d) None of the Above
- 13) A company whose shares are easily transferred is \_\_\_\_\_.
- a) Private Company
  - b) Public Company
  - c) Both (a). & (b).
  - d) None of the above
- 14) Codes of conduct and codes of ethics \_\_\_\_\_.
- a) are formal statements that describe what an organization expects of its employees
  - b) become necessary only after a company has been in legal trouble
  - c) are designed for top executives and managers, not regular employees
  - d) rarely become an effective component of the ethics and compliance program

 3) Figures to the right indicates full marks  
 4) Assume suitable data wherever needed and mention it clearly.

**MCQ/Objective Type Questions**

Duration: 30 Minutes

Marks: 70

**Q.1 Choose the correct alternatives from the options and rewrite the sentence. 14**

- 1) Which of the following is considered production Economics?
  - a) Tilling of Soil
  - b) Singing a song before friends
  - c) Preventing a child from falling into a manhole on the road
  - d) Painting a picture for pleasure
- 2) Identify the Correct statement:
  - a) The Average Product is at its maximum when marginal product is equal to Average Product
  - b) The Law of Increasing returns to scale relates to the effect of changes in factor proportions.
  - c) Economies of scale arise only because of indivisibilities of factor proportions.
  - d) Internal economies of scale can accrue when industry expands beyond optimum.
- 3) Which of the following is not a characteristic of land?
  - a) Its supply for the economy is limited.
  - b) It's a immobile
  - c) Its usefulness depends on human efforts
  - d) It is produced by our forefathers.
- 4) Which of the following statement is true?
  - a) Accumulation of capital depends solely on income of individuals
  - b) Saving can be influenced by government policies
  - c) External economies go with size and internal economies with location
  - d) The supply curve of labour is an upward slopping curve
- 5) Macroeconomics is also called \_\_\_\_\_ Economics.
  - a) Applied
  - b) Aggregate
  - c) Experimental
  - d) None of the above
- 6) In Economics we use the term scarcity to mean
  - a) Abstract scarcity ad lack of resource in less developed countries
  - b) Relative scarcity i.e scarcity in relation to the wants of the society
  - c) Scarcity during times of business failure and natural calamities
  - d) Scarcity caused on account of excessive consumption by the rich

- 7) Business economics is
- a) Abstract and applies the tools of Microeconomics
  - b) Involves practice application of economic theory in business decision making
  - c) Incorporates tools from multiple disciplines.
  - d) (b) and (c) above
- 8) What implication (s) does resource scarcity have for the satisfaction of wants?
- a) Not all wants can be satisfied.
  - b) We will never be faced with the need to make a choice
  - c) We must develop ways to decrease our individual wants
  - d) The discovery of new natural resource is necessary to increase our ability to satisfy wants.
- 9) Which of the following is a normative statement
- a) Planned economies allocate resources via government development
  - b) Most transitional economies have experienced problems of falling output and rising prices over the past decade
  - c) There is a greater degree of consumer sovereignty in market economies than planned economies
  - d) Reducing inequality should be a major priority for mixed economies
- 10) Demand for a commodity refers to :
- a) Desire backed by ability to pay for the commodity
  - b) Need for the commodity and willingness to pay for it
  - c) The quantity demanded of that commodity at a certain price
  - d) The quantity of the commodity demanded at a certain price during any particular period of time
- 11) Contraction of demand is a result of:
- a) Decrease in the number of consumers
  - b) Increase in the price of the good concerned
  - c) Increase in the price of other goods
  - d) Decrease in the income of purchasers
- 12) All but one of the following are assumed to remain the same while drawing an individual's demand curve for a commodity. Which one is it?
- a) The preference of the individual
  - b) His monetary income
  - c) Price of the commodity
  - d) Price of related goods.
- 13) Which of the following pairs of goods is an example of substitutes?
- a) Tea and sugar
  - b) Tea and coffee
  - c) Pen and ink
  - d) Shirts and trousers
- 14) In the case of a straight line demand curve meeting the two axes, the price elasticity of demand at the mid-point of the line would be:
- a) 0
  - b) 1
  - c) 1.5
  - d) 2

Time: 10:00 AM To 01:00 PM

**Instructions:** 1) All questions are compulsory.  
 2) Figures to the right indicate full marks.

**SECTION – 1**

**Q.2 Attempt any Four.****16**

- Define Managerial Economics and Discuss its Scope, What is the importance of Managerial Economics.
- What is law of Equimarginal Utility? What is the Condition for Equi-Marginal Utility?
- Define and Distinguish between Income Elasticity and price Elasticity.
- What is the Major Area of Business Decision Making? How does Economic theory Contribute to Managerial decisions.
- What is meant by Utility? Distinguish Between Cardinal and Ordinal Concept of Utility.
- What is the condition for Consumer Equilibrium under Ordinal utility approach to consumer analysis? Explain and illustrate Graphically.

**Q.3 Attempt any Two.****12**

- What are major Macro-economics Issues Related Directly to business decision making? What is their significance in Business decisions?
- What is meant by Utility? What are the conditions for Application of Law of Diminishing Utility?
- What is meant by Elasticity of Demand? How is the Elasticity of Demand measured?

**SECTION – II**

**Q.4 Attempt any Four.****16**

- What is purpose of demand forecasting? What are the necessary steps that need to be taken for Forecasting demand for a Product?
- What are the methods used for Forecasting demand? Discuss in detail the survey method of forecasting demand for consumer goods. What are the advantages and Limitations?
- Define and Distinguish between Arc Elasticity and Point Elasticity.
- What is Linear Programming? Discuss usefulness of its application to Practical Business problems.
- What is meant by production? Distinguish between Fixed and Variable Inputs.
- What is Opportunity Cost? Give some Examples of Opportunity Cost.

**Q.5 Attempt any Two.**

- a)** Explain following Cost Concepts with examples.
  - i) Variable Cost
  - ii) Fixed Cost
  - iii) Explicit Cost
  - iv) Implicit Cost
- b)** Explain and illustrate the relationship Between Marginal Cost, Average Cost and Total Cost Assuming a short run non linear cost function?
- c)** Explain the Law of supply through a supply schedule and a supply curve. Why does a supply curve slop upward to the right? What factors cause a rightward shift in the supply curve?

**T.Y. (B.Tech) (Sem-I) (Old) (CBCS) Examination: Oct/Nov-2022**  
**ELECTRONICS & TELECOMMUNICATION ENGINEERING**  
**Managerial Economics**

Day &amp; Date: Thursday, 09-02-2023

Max. Marks: 56

Time: 10:00 AM To 01:00 PM

**Instructions:** 1) All questions are compulsory.  
 2) Figures to the right indicate full marks.

**SECTION – 1****Q.2 Attempt any Four.****16**

- Define Managerial Economics and Discuss its Scope, What is the importance of Managerial Economics.
- What is law of Equimarginal Utility? What is the Condition for Equi-Marginal Utility?
- Define and Distinguish between Income Elasticity and price Elasticity.
- What is the Major Area of Business Decision Making? How does Economic theory Contribute to Managerial decisions.
- What is meant by Utility? Distinguish Between Cardinal and Ordinal Concept of Utility.
- What is the condition for Consumer Equilibrium under Ordinal utility approach to consumer analysis? Explain and illustrate Graphically.

**Q.3 Attempt any Two.****12**

- What are major Macro-economics Issues Related Directly to business decision making? What is their significance in Business decisions?
- What is meant by Utility? What are the conditions for Application of Law of Diminishing Utility?
- What is meant by Elasticity of Demand? How is the Elasticity of Demand measured?

**SECTION – II****Q.4 Attempt any Four.****16**

- What is purpose of demand forecasting? What are the necessary steps that need to be taken for Forecasting demand for a Product?
- What are the methods used for Forecasting demand? Discuss in detail the survey method of forecasting demand for consumer goods. What are the advantages and Limitations?
- Define and Distinguish between Arc Elasticity and Point Elasticity.
- What is Linear Programming? Discuss usefulness of its application to Practical Business problems.
- What is meant by production? Distinguish between Fixed and Variable Inputs.
- What is Opportunity Cost? Give some Examples of Opportunity Cost.

**Q.5 Attempt any Two.**

- a)** Explain following Cost Concepts with examples.
  - i) Variable Cost
  - ii) Fixed Cost
  - iii) Explicit Cost
  - iv) Implicit Cost
- b)** Explain and illustrate the relationship Between Marginal Cost, Average Cost and Total Cost Assuming a short run non linear cost function?
- c)** Explain the Law of supply through a supply schedule and a supply curve. Why does a supply curve slop upward to the right? What factors cause a rightward shift in the supply curve?

 2) Don't forget to Mention question paper set (P/Q/R/S) on top of page.  
 3) Figures to the right indicates full marks  
 4) Assume suitable data wherever needed and mention it clearly.

**MCQ/Objective Type Questions**

Duration: 30 Minutes

Marks: 70

**Q.1 Choose the correct alternatives from the options and rewrite the sentence. 14**

- 1) In Economics we use the term scarcity to mean
  - a) Abstract scarcity and lack of resource in less developed countries
  - b) Relative scarcity i.e scarcity in relation to the wants of the society
  - c) Scarcity during times of business failure and natural calamities
  - d) Scarcity caused on account of excessive consumption by the rich
- 2) Business economics is
  - a) Abstract and applies the tools of Microeconomics
  - b) Involves practice application of economic theory in business decision making
  - c) Incorporates tools from multiple disciplines.
  - d) (b) and (c) above
- 3) What implication (s) does resource scarcity have for the satisfaction of wants?
  - a) Not all wants can be satisfied.
  - b) We will never be faced with the need to make a choice
  - c) We must develop ways to decrease our individual wants
  - d) The discovery of new natural resource is necessary to increase our ability to satisfy wants.
- 4) Which of the following is a normative statement
  - a) Planned economies allocate resources via government development
  - b) Most transitional economies have experienced problems of falling output and rising prices over the past decade
  - c) There is a greater degree of consumer sovereignty in market economies than planned economies
  - d) Reducing inequality should be a major priority for mixed economies
- 5) Demand for a commodity refers to :
  - a) Desire backed by ability to pay for the commodity
  - b) Need for the commodity and willingness to pay for it
  - c) The quantity demanded of that commodity at a certain price
  - d) The quantity of the commodity demanded at a certain price during any particular period of time

- 6) Contraction of demand is result of:
  - a) Decrease in the number of consumers
  - b) Increase in the price of the good concerned
  - c) Increase in the price of other goods
  - d) Decrease in the income of purchasers
- 7) All but one of the following are assumed to remain the same while drawing an individual's demand curve for a commodity. Which one is it?
  - a) The preference of the individual
  - b) His monetary income
  - c) Price of the commodity
  - d) Price of related goods.
- 8) Which of the following pairs of goods is an example of substitutes?
 

a) Tea and sugar	b) Tea and coffee
c) Pen and ink	d) Shirts trousers
- 9) In the case of a straight line demand curve meeting the two axes, the price elasticity of demand at the mid-point of the line would be:
 

a) 0	b) 1
c) 1.5	d) 2
- 10) Which of the following is considered production Economics?
  - a) Tilling of Soil
  - b) Singing a song before friends
  - c) Preventing a child from falling into a manhole on the road
  - d) Painting a picture for pleasure
- 11) Identify the Correct statement:
  - a) The Average Product is at its maximum when marginal product is equal to Average Product
  - b) The Law of Increasing returns to scale relates to the effect of changes in factor proportions.
  - c) Economies of scale arise only because of indivisibilities of factor proportions.
  - d) Internal economies of scale can accrue when industry expands beyond optimum.
- 12) Which of the following is not a characteristic of land?
  - a) Its supply for the economy is limited.
  - b) It's a immobile
  - c) Its usefulness depends on human efforts
  - d) It is produced by our forefathers.
- 13) Which of the following statement is true?
  - a) Accumulation of capital depends solely on income of individuals
  - b) Saving can be influenced by government policies
  - c) External economies go with size and internal economies with location
  - d) The supply curve of labour is an upward slopping curve
- 14) Macroeconomics is also called \_\_\_\_\_ Economics.
 

a) Applied	b) Aggregate
c) Experimental	d) None of the above

**T.Y (B.Tech.) (Sem-I) (Old) (CBCS) Examination: Oct/Nov-2022**  
**ELECTRONICS & TELECOMMUNICATION ENGINEERING**  
**Stress and Coping**

Day & Date: Monday, 20-02-2023  
Time: 10:00 AM To 12:00 PM

Max. Marks: 40

**Instructions:** 1) Solve any 4 Questions from Q.No.2 to Q.No.7.  
2) Figures to the right indicate full marks.

- |            |  |           |
|------------|--|-----------|
| <b>Q.2</b> | Explain the role of social support in mitigating stress.         | <b>10</b> |
| <b>Q.3</b> | Explain various sources of stress in detail.                     | <b>10</b> |
| <b>Q.4</b> | Explain various consequences due to stress.                      | <b>10</b> |
| <b>Q.5</b> | Stress can be managed explain various techniques.                | <b>10</b> |
| <b>Q.6</b> | Discuss the nature of stress response.                           | <b>10</b> |
| <b>Q.7</b> | Define Stress & explain current and historical status of stress. | <b>10</b> |

**Stress and Coping**

Day & Date: Monday, 20-02-2023  
 Time: 10:00 AM To 12:00 PM

Max. Marks: 50

- Instructions:** 1) Q. No. 1 is compulsory. It should be solved in the first 20 minutes in answer book. Page no 03 (Starting page of the Answer Book). Each question carries one mark.  
 2) Don't forget to Mention question paper set (P/Q/R/S) on top of page.  
 3) Figures to the right indicates full marks.

**MCQ/Objective Type Questions**

Duration: 20 Minutes

Marks: 10

**Q.1 Choose the correct alternatives from the options.**

**10**

- 1) A good way to prevent stress is \_\_\_\_\_.  
 a) Drinking beverages high in caffeine  
 b) Sitting ideal doing nothing  
 c) Overeating  
 d) Taking time out for relaxation
- 2) \_\_\_\_\_ is referred as a stressful event.  
 a) Birthday  
 b) Studying  
 c) Spouse death  
 d) Vacation
- 3) Anxiety can cause the following moods \_\_\_\_\_.  
 a) Irritable  
 b) Nervous  
 c) Anxious  
 d) All of the above
- 4) \_\_\_\_\_ is the confusion about the expectation of the role one occupies.  
 a) Role stagnation  
 b) Role Isolation  
 c) Role erosion  
 d) Role ambiguity
- 5) Stress is \_\_\_\_\_ related to performance.  
 a) Positively  
 b) Negatively  
 c) Proportionately  
 d) None of these
- 6) Which one is not considered as Environmental stressors?  
 a) Weather  
 b) Traffic  
 c) Financial problems  
 d) Substandard housing
- 7) The following are the characteristics of Positive Stress.  
 a) It improves performance  
 b) It feels exciting  
 c) It motivates  
 d) All of the above
- 8) The word Stress is derived from Latin word 'Stringere' which means \_\_\_\_\_.  
 a) Draw tight  
 b) Stimulus  
 c) Force  
 d) Attitude
- 9) Absenteeism, turnover and less productivity are \_\_\_\_\_ symptoms of stress.  
 a) Medical  
 b) Psychological  
 c) Behavioral  
 d) None of these

- 10)** When a task appears overwhelming, it is best to \_\_\_\_.
- a) Put it aside till later
  - b) Drink alcohol to relax
  - c) Break it down into smaller task
  - d) Avoid the task

**T. Y. (B.Tech) (Sem – II) (New) (CBCS) Examination: Oct/Nov - 2022**  
**ELECTRONICS & TELECOMMUNICATION ENGINEERING**  
**Antenna & Wave Propagation**

Day & Date: Tuesday, 14-02-2023  
 Time: 10:00 AM To 01:00 PM

Max. Marks: 56

**Instructions:** 1) All questions are compulsory.  
 2) Figures to the right indicate full marks.

**Section – I**

**Q.2 Attempt any three of the following question. 12**

- Explain various antenna field zones and their boundaries with neat sketches.
- Calculate the directivity of 20 turns helix, having  $\alpha = 12^\circ$  and circumference equal to one wavelength.
- What is the need for antenna array? Explain with the types.
- Explain Babinet's principle with its features.

**Q.3 Attempt any two of the following question. 16**

- Define pattern multiplication and derive the equation for the Array factor of n-isotropic point sources.
- Explain slot antenna in detail. What is the difference between slot antenna and its complementary antenna?
- Explain any four parameters of an antenna.

**Section – II**

**Q.4 Attempt the following question. 12**

- Why log periodic antenna is named so far? Explain log periodic antenna in detail.
- How the antenna gain can be measured by using Absolute method.

**OR**

- How the radiation pattern of an antenna is measured?
- What do you mean by Spiral antenna? Write the equations for frequencies defined to design spiral antenna.

**Q.5 Attempt any two of the following question. 16**

- Draw and explain various feeding mechanism of parabolic reflector antenna.
- Explain different types of Horn antenna. Write the applications of Horn antenna.
- Explain following characteristic parameters of Ionospheric propagation.
  - Virtual height
  - Critical frequency
  - Maximum Usable frequency
  - Skip distance

**Q.1 Choose the correct alternatives from the options.**

**14**

- 1) Which of the following antennas is used as feed antenna at microwave frequencies?
 

a) Single dipole	b) Folded dipole
c) Rhombic	d) Horn
- 2) Waveguide fed slots give radiation \_\_\_\_\_.
 

a) Single side	b) Both sides equally
c) Both sides unequally	d) None
- 3) Slot and dipole impedances are related by the equation \_\_\_\_\_.
 

a) $Z_s Z_d = Z_0^2$	b) $Z_s Z_d = Z_0^2/4$
c) $Z_s Z_d = Z_0^2/2$	d) None of these
- 4) Radiation pattern denoting angle of E in different directions is \_\_\_\_\_.
 

a) Amplitude pattern	b) Phase pattern
c) Magnitude pattern	d) Polarization pattern
- 5) If three identical antennas are available, the gain is measured using \_\_\_\_\_.
 

a) Two antenna method	b) Three antenna method
c) Gain transfer method	d) None
- 6) Space wave propagation occurs at frequencies \_\_\_\_\_.
 

a) Below HF	b) In HF
c) Above HF	d) None
- 7) In ground wave propagation, the antennas must be located \_\_\_\_\_.
 

a) Near the earth's surface	b) At a height from earth's surface
c) Either a or b	d) None
- 8) The Effective area and directivity are related by \_\_\_\_\_.
 

a) $D = \frac{4\pi A_e}{\lambda}$	b) $D = \frac{4\pi A_e}{\lambda^2}$
c) $D = \frac{4\pi D}{\lambda}$	d) None of the above

- 9) Total field pattern of the array depends on \_\_\_\_\_.  
a) Geometrical configuration  
b) Distance between the elements  
c) Excitation phase of individual elements  
d) All of the above
- 10) If the maximum radiation is normal to the length of the array, it is \_\_\_\_\_.  
a) Broadside array  
b) End fire array  
c) Hansen-wood yard array  
d) None
- 11) The array factor depends on the following parameters.  
i) Geometrical arrangement      ii) Spacing  
iii) Number of elements      iv) Unit pattern  
a) i & ii only      b) ii & iv only  
c) i, ii & iii only      d) i, ii, iii & iv
- 12) When circumference of Helix is one wavelength, then the antenna must be working in \_\_\_\_\_.  
a) Axial mode      b) End-fire mode  
c) Both a and b      d) Normal mode
- 13) Plane sheet and corner reflector antenna produce patterns \_\_\_\_\_.  
a) Omni directional      b) Broadside  
c) End fire      d) None of these
- 14) For small spacing between the reflector and driven element \_\_\_\_\_.  
a) Gain is less but bandwidth is larger  
b) Gain is high but bandwidth is less  
c) Gain is high and bandwidth is high  
d) Gain is less but bandwidth is less

Set Q
-------

**T. Y. (B.Tech) (Sem – II) (New) (CBCS) Examination: Oct/Nov - 2022**  
**ELECTRONICS & TELECOMMUNICATION ENGINEERING**  
**Antenna & Wave Propagation**

Day & Date: Tuesday, 14-02-2023  
 Time: 10:00 AM To 01:00 PM

Max. Marks: 56

**Instructions:** 1) All questions are compulsory.  
 2) Figures to the right indicate full marks.

**Section – I**

**Q.2 Attempt any three of the following question. 12**

- Explain various antenna field zones and their boundaries with neat sketches.
- Calculate the directivity of 20 turns helix, having  $\alpha = 12^\circ$  and circumference equal to one wavelength.
- What is the need for antenna array? Explain with the types.
- Explain Babinet's principle with its features.

**Q.3 Attempt any two of the following question. 16**

- Define pattern multiplication and derive the equation for the Array factor of n-isotropic point sources.
- Explain slot antenna in detail. What is the difference between slot antenna and its complementary antenna?
- Explain any four parameters of an antenna.

**Section – II**

**Q.4 Attempt the following question. 12**

- Why log periodic antenna is named so far? Explain log periodic antenna in detail.
- How the antenna gain can be measured by using Absolute method.

**OR**

- How the radiation pattern of an antenna is measured?
- What do you mean by Spiral antenna? Write the equations for frequencies defined to design spiral antenna.

**Q.5 Attempt any two of the following question. 16**

- Draw and explain various feeding mechanism of parabolic reflector antenna.
- Explain different types of Horn antenna. Write the applications of Horn antenna.
- Explain following characteristic parameters of Ionospheric propagation.
  - Virtual height
  - Critical frequency
  - Maximum Usable frequency
  - Skip distance

Day & Date: Tuesday, 14-02-2023  
 Time: 10:00 AM To 01:00 PM

Max. Marks: 70

**Instructions:** 1) Q. No. 1 is compulsory and should be solved in first 30 minutes in Answer Book. Page No.3 (starting page of the Answer Book). Each question carry one mark.  
 2) Don't forget to mention Question Paper Set (P/Q/R/S) at the top of the same page.

**MCQ/Objective Type Questions**

Duration: 30 Minutes

Marks: 14

**Q.1 Choose the correct alternatives from the options.** **14**

- 1) Radiation pattern denoting angle of E in different directions is \_\_\_\_\_.  
 a) Amplitude pattern                      b) Phase pattern  
 c) Magnitude pattern                      d) Polarization pattern
- 2) If three identical antennas are available, the gain is measured using \_\_\_\_\_.  
 a) Two antenna method                      b) Three antenna method  
 c) Gain transfer method                      d) None
- 3) Space wave propagation occurs at frequencies \_\_\_\_\_.  
 a) Below HF                                      b) In HF  
 c) Above HF                                      d) None
- 4) In ground wave propagation, the antennas must be located \_\_\_\_\_.  
 a) Near the earth's surface                      b) At a height from earth's surface  
 c) Either a or b                                      d) None
- 5) The Affective area and directivity are related by \_\_\_\_\_.  
 a)  $D = \frac{4\pi A_e}{\lambda}$                                       b)  $D = \frac{4\pi A_e}{\lambda^2}$   
 c)  $D = \frac{4\pi D}{\lambda}$                                       d) None of the above
- 6) Total field pattern of the array depends on \_\_\_\_\_.  
 a) Geometrical configuration  
 b) Distance between the elements  
 c) Excitation phase of individual elements  
 d) All of the above
- 7) If the maximum radiation is normal to the length of the array, it is \_\_\_\_\_.  
 a) Broadside array                                      b) End fire array  
 c) Hansen-wood yard array                      d) None
- 8) The array factor depends on the following parameters.  
 i) Geometrical arrangement                      ii) Spacing  
 iii) Number of elements                      iv) Unit pattern  
 a) i & ii only                                      b) ii & iv only  
 c) i, ii & iii only                                      d) i, ii, iii & iv

- 9) When circumference of Helix is one wavelength, then the antenna must be working in \_\_\_\_\_.
  - a) Axial mode
  - b) End-fire mode
  - c) Both a and b
  - d) Normal mode
- 10) Plane sheet and corner reflector antenna produce patterns \_\_\_\_\_.
  - a) Omni directional
  - b) Broadside
  - c) End fire
  - d) None of these
- 11) For small spacing between the reflector and driven element \_\_\_\_\_.
  - a) Gain is less but bandwidth is larger
  - b) Gain is high but bandwidth is less
  - c) Gain is high and bandwidth is high
  - d) Gain is less but bandwidth is less
- 12) Which of the following antennas is used as feed antenna at microwave frequencies?
  - a) Single dipole
  - b) Folded dipole
  - c) Rhombic
  - d) Horn
- 13) Waveguide fed slots give radiation \_\_\_\_\_.
  - a) Single side
  - b) Both sides equally
  - c) Both sides unequally
  - d) None
- 14) Slot and dipole impedances are related by the equation \_\_\_\_\_.
  - a)  $Z_s Z_d = Z_0^2$
  - b)  $Z_s Z_d = Z_0^2 / 4$
  - c)  $Z_s Z_d = Z_0^2 / 2$
  - d) None of these

**MCQ/Objective Type Questions**

Duration: 30 Minutes

Marks: 14

**Q.1 Choose the correct alternatives from the options. 14**

- 1) ARM uses the thumb \_\_\_\_\_ bit instruction set to improve code density.
  - a) 32
  - b) 8
  - c) 64
  - d) 16
- 2) Where is the return address stored after execution of the Branch-and-Link (BL) instruction in ARM?
  - a) In the stack
  - b) In the register r14
  - c) In the program counter pc
  - d) None of these.
- 3) In LPC 2148 \_\_\_\_\_ register is used to configure port pins P0.0 to P0.15 as GPIO.
  - a) PINSEL1
  - b) PINSEL0
  - c) IODIR2
  - d) IOSET0
- 4) NRE cost can be defined by \_\_\_\_\_.
  - a) The one-time monetary cost of designing the system
  - b) Life time cost of system
  - c) Depends upon embedded systems
  - d) None of the these
- 5) A privileged mode allows
  - a) Full read access to cpsr
  - b) Full read write access to cpsr
  - c) Full write access to cpsr
  - d) Full read write access to spsr
- 6) The \_\_\_\_\_ directive allows the programmer to specify the memory locations where programs, subroutines or the data will reside.
  - a) ALIGN
  - b) AREA
  - c) ENTRY
  - d) END
- 7) An Embedded system executes a specific program repeatedly called as \_\_\_\_\_.
  - a) Reactive system
  - b) Tightly constrained
  - c) Single functioned
  - d) None of the above
- 8) Switching the CPU to another process requires to save state of the old process and loading new process state is called \_\_\_\_\_.
  - a) Process blocking
  - b) Context switch
  - c) Time sharing
  - d) None of these

- 9) Which is the core of the OS?
- a) shell
  - b) Kernel
  - c) commands
  - d) scripts
- 10) Information about a task is maintained in a \_\_\_\_\_. .
- a) stack
  - b) translation look aside buffer
  - c) Task control block
  - d) Task
- 11) Semaphore is used to \_\_\_\_\_
- a) signal the occurrence of event
  - b) Show interfacing between input and output devices
  - c) Provide memory management
  - d) None of these
- 12) Which type of following OS the response time is critical?
- a) Network operating System
  - b) Real Time operating System
  - c) Batch OS
  - d) Unix operating system
- 13) A relationship between processes such that each has some part (critical section) which must not be executed while the critical section of another is being executed, is known as
- a) semaphore
  - b) mutual exclusion
  - c) multiprogramming
  - d) multitasking
- 14) In rate monotonic scheduling \_\_\_\_\_
- a) shorter duration job has higher priority
  - b) longer duration job has higher priority
  - c) priority does not depend on the duration of the job
  - d) none of the mentioned

- Instructions:** 1) Section I and Section II are compulsory.  
2) Figures to the right indicate full marks.  
3) Assumes suitable data if necessary.  
4) Draw neat diagram whenever necessary.

**Section – I**

**Q.2 Attempt any four.** **16**

- a) What are design metrics? Explain any one in detail. How to optimize design metrics?
- b) Explain on chip DAC of LPC2148 using associated register.
- c) Describe the operation with example of any two ARM instructions.  
a) MOV b) STR c) MLA d) BX
- d) Explain the role of AMBA bus architecture in LPC2148.
- e) Explain in brief operating modes of ARM7 processor.

**Q.3 Attempt any two.** **12**

- a) Draw and explain ARM core data flow model of ARM7 processor.
- b) Explain the concept of following peripherals in LPC2148  
a) Timer/Counter b) WDT
- c) Draw and explain Internal block diagram architecture of LPC2148.

**Section – II**

**Q.4 Answer any four questions.** **16**

- a) List features of UCOSII RTOs.
- b) Write an Embedded C code to demonstrate operation of on-chip DAC of LPC2148.
- c) What are the services provided by desktop or traditional OS?
- d) Write the Embedded C program to interface & blink eight LED's to LPC2148 along with necessary circuit diagram.
- e) Explain digital camera as embedded system. How to measure its performance.

**Q.5 Answer any two questions.** **12**

- a) With suitable example explain the role of semaphore in Operating system.
- b) Draw & Explain architecture of Embedded system OS Kernel.
- c) Draw interfacing of stepper motor with LPC2148 & Write the embedded C program for the same.

  - a) signal the occurrence of event
  - b) Show interfacing between input and output devices
  - c) Provide memory management
  - d) None of these
- 2) Which type of following OS the response time is critical?
  - a) Network operating System
  - b) Real Time operating System
  - c) Batch OS
  - d) Unix operating system
- 3) A relationship between processes such that each has some part (critical section) which must not be executed while the critical section of another is being executed, is known as
 

a) semaphore	b) mutual exclusion
c) multiprogramming	d) multitasking
- 4) In rate monotonic scheduling \_\_\_\_\_.
  - a) shorter duration job has higher priority
  - b) longer duration job has higher priority
  - c) priority does not depend on the duration of the job
  - d) none of the mentioned
- 5) ARM uses the thumb \_\_\_\_\_ bit instruction set to improve code density.
 

a) 32	b) 8
c) 64	d) 16
- 6) Where is the return address stored after execution of the Branch-and-Link (BL) instruction in ARM?
 

a) In the stack	b) In the register r14
c) In the program counter pc	d) None of these.
- 7) In LPC 2148 \_\_\_\_\_ register is used to configure port pins P0.0 to P0.15 as GPIO.
 

a) PINSEL1	b) PINSEL0
c) IODIR2	d) IOSET0

- 8) NRE cost can be defined by \_\_\_\_\_.  
a) The one-time monetary cost of designing the system  
b) Life time cost of system  
c) Depends upon embedded systems  
d) None of the these
- 9) A privileged mode allows  
a) Full read access to cpsr                      b) Full read write access to cpsr  
c) Full write access to cpsr                      d) Full read write access to spsr
- 10) The \_\_\_\_\_ directive allows the programmer to specify the memory locations where programs, subroutines or the data will reside.  
a) ALIGN    b) AREA  
c) ENTRY    d) END
- 11) An Embedded system executes a specific program repeatedly called as \_\_\_\_\_.  
a) Reactive system                                  b) Tightly constrained  
c) Single functioned                                  d) None of the above
- 12) Switching the CPU to another process requires to save state of the old process and loading new process state is called \_\_\_\_\_.  
a) Process blocking                                  b) Context switch  
c) Time sharing                                      d) None of these
- 13) Which is the core of the OS?  
a) shell    b) Kernel  
c) commands    d) scripts
- 14) Information about a task is maintained in a \_\_\_\_\_.  
a) stack  
b) translation look aside buffer  
c) Task control block  
d) Task

<b>R</b>
----------

**T.Y. (B. Tech) (Sem - II) (New) (CBCS) Examination: Oct/Nov - 2022**  
**ELECTRONICS & TELECOMMUNICATION ENGINEERING**  
**Embedded System**

Day & Date: Thursday, 16-02-2023  
Time: 10:00 AM To 01:00 PM

Max. Marks: 56

- Instructions:** 1) Section I and Section II are compulsory.  
2) Figures to the right indicate full marks.  
3) Assumes suitable data if necessary.  
4) Draw neat diagram whenever necessary.

**Section – I**

**Q.2 Attempt any four.** **16**

- a) What are design metrics? Explain any one in detail. How to optimize design metrics?
- b) Explain on chip DAC of LPC2148 using associated register.
- c) Describe the operation with example of any two ARM instructions.  
a) MOV b) STR c) MLA d) BX
- d) Explain the role of AMBA bus architecture in LPC2148.
- e) Explain in brief operating modes of ARM7 processor.

**Q.3 Attempt any two.** **12**

- a) Draw and explain ARM core data flow model of ARM7 processor.
- b) Explain the concept of following peripherals in LPC2148  
a) Timer/Counter b) WDT
- c) Draw and explain Internal block diagram architecture of LPC2148.

**Section – II**

**Q.4 Answer any four questions.** **16**

- a) List features of UCOSII RTOs.
- b) Write an Embedded C code to demonstrate operation of on-chip DAC of LPC2148.
- c) What are the services provided by desktop or traditional OS?
- d) Write the Embedded C program to interface & blink eight LED's to LPC2148 along with necessary circuit diagram.
- e) Explain digital camera as embedded system. How to measure its performance.

**Q.5 Answer any two questions.** **12**

- a) With suitable example explain the role of semaphore in Operating system.
- b) Draw & Explain architecture of Embedded system OS Kernel.
- c) Draw interfacing of stepper motor with LPC2148 & Write the embedded C program for the same.

**T. Y. (B. Tech) (Sem - II) (New) (CBCS) Examination: Oct/Nov-2022**  
**ELECTRONICS & TELECOMMUNICATION ENGINEERING**  
**Electronic System Design**

Day & Date: Monday, 20-02-2023  
 Time: 10:00 AM To 01:00 PM

Max. Marks: 56

**Instructions:** 1) All questions are compulsory.  
 2) Figures to the right indicates full marks.

**Section – I**

**Q.2 Answer any FOUR.** **16**

- a) Sketch V-I characteristics of DIAC and explain its principal of working.
- b) What is meant by commutation? Explain Class A commutation method.
- c) Explain AC power control using TRIAC for fan regulator.
- d) Derive an exp for Avg voltage and RMS Voltage for half wave-controlled rectifier with resistive load.
- e) Explain the use of balanced modulator as AM modulator.

**Q.3 Answer any TWO.** **12**

- a) Derive the expression for relationship between collector current and base current in SCR using two transistor analogy and also show that once the SCR is triggered, there is no change in the working of SCR even if gate pulse (Gate current) is removed.
- b) Describe the working of single phase fully controlled bridge rectifier with resistive load. Sketch the following waveforms for  $\alpha = 60^\circ$  and  $\alpha = 120^\circ$ .
  - 1) Load voltage waveform
  - 2) Load current waveform
  - 3) Thyristor current and voltage waveform
  - 4) Supply voltage and current waveform.
 Analyze the waveforms and comment on effect of firing angle  $\alpha$  on its working.
- c) Design a frequency synthesizer to generate a frequency of 5000 KHz using PLL 565. Draw the complete connection diagram.

**Section – II**

**Q.4 Answer any FOUR.** **16**

- a) Design a timer using IC XR 2240 to generate a delay of 50 sec.
- b) Design a Zero -Span circuit to convert 1.6 V - 2.75 V to 0 - 5 V.
- c) Explain cold junction compensation.
- d) Draw and explain PLC architecture.
- e) Design a signal conditioning circuit to get a voltage of 0 to 10 V from a temperature of  $0^\circ\text{C}$  to  $150^\circ\text{C}$  using PT100 temperature sensor.

**Q.5 Answer any TWO.** **12**

- a) Design a ON-OFF controller for temperature range of  $0^\circ\text{C}$  to  $200^\circ\text{C}$  with a set point of  $50^\circ\text{C}$ . Use LM35 temperature sensor.
- b) Design a DVM for the measurement of 2 V input voltage.
- c) Design a frequency counter using IC 74926, to count frequency upto 1000 Hz with accuracy of 0.1 Hz.

**Seat  
No.**

Max. Marks: 70

- 10) In commutation circuit, employed to turn off an SCR, satisfactory turn off time is obtained \_\_\_\_\_.  
a) Circuit turn off time is less than device turn off time  
b) Circuit turn off time is greater than device turn off time  
c) Circuit time constant is greater than device turn off time  
d) Circuit time constant is less than device turn off time
- 11) A single phase fully controlled bridge converter supplies an Inductive load. If  $\alpha = 0^\circ$ , then average de voltage is \_\_\_\_\_.  
a)  $\frac{V_m}{\pi}$   
b)  $\frac{2V_m}{\pi}$   
c)  $\frac{V_m}{\sqrt{2}}$   
d)  $0.95V_m$
- 12) A freewheeling diode in phase-controlled rectifiers.  
a) Stops rectifier operations  
b) Improves line power factor  
c) Is the reason for additional harmonics  
d) Is the reason for the sudden breakdown
- 13) In PLL, input signal frequency is compared with which one of the following.  
a) VCO output  
b) Phase comparator output  
c) Either A or B  
d) None of the above
- 14) Which of the following is balance modulator-demodulator?  
a) IC 74C926  
b) IC 1596  
c) IC 2240  
d) IC 565

 Time: 10:00 AM To 01:00 PM

Max. Marks: 70

- Instructions:** 1) Q. No. 1 is compulsory. It should be solved in the first 30 minutes in answer book. Page no 03 (Starting page of the Answer Book). Each question carries one mark.  
 2) Don't forget to Mention question paper set (P/Q/R/S) on top of page.  
 3) Figures to the right indicates full marks  
 4) Assume suitable data wherever needed and mention it clearly.

**MCQ/Objective Type Questions**

Duration: 30 Minutes

Marks: 14

**Q.1 Choose the correct alternatives from the given options.**

**14**

- 1) Which of the following is/are the main part(s) of basic cellular system?
  - a) A mobile Unit
  - b) A Base Station
  - c) A Mobile Telephone Switching Office
  - d) All of the above
- 2) Fading of the received radio signals in a mobile communication environment occurs because of \_\_\_\_\_.
  - a) Direct propagation
  - b) Multipath Propagation
  - c) Bi-path Propagation
  - d) None of the above
- 3) In \_\_\_\_\_ Frequency Spectrum is divided into smaller spectra and is allocated to each user.
  - a) TDMA
  - b) CDMA
  - c) FDMA
  - d) FGMA
- 4) The antenna which attempts to direct all its energy in a particular direction is called as a \_\_\_\_\_.
  - a) Directional Antenna
  - b) One to One Antenna
  - c) Propagation Antenna
  - d) Single Direction Antenna
- 5) Reflection is?
  - a) Propagation mode
  - b) Propagation mechanism
  - c) Spread spectrum
  - d) None of the above
- 6) What is Fraunhofer distance for  $f = 1800$  MHz and largest linear antenna dimension is 0.5?
  - a) 1.5 m
  - b) 2 m
  - c) 3 m
  - d) None of these
- 7) The model considered for both direct path and ground reflected propagation path between T-R is \_\_\_\_\_.
  - a) Hata model
  - b) Two ray model
  - c) Free space model
  - d) Okumura model

**ELECTRONICS & TELECOMMUNICATION ENGINEERING**  
**Advanced Mobile Communication**

Day & Date: Wednesday, 22-02-2023  
 Time: 10:00 AM To 01:00 PM

Max. Marks: 56

**Instructions:** 1) All questions are compulsory.  
 2) Figures to the right indicate full marks.

**Section – I**

**Q.2 Attempt any three of the following:** **16**

- 1) Explain frequency reuse technique in cellular system.
- 2) A spectrum of 30 MHz is allocated to a wireless FDD cellular system which uses two 25 KHz simplex channels to provide full duplex voice and control channels, compute the number of channels available per cell if a system uses (i) four cell reuse, (ii) seven cell reuse (iii) 12 cell reuse.
- 3) Explain channel assignment strategies in cellular system
- 4) Find the Fraunhofer distance for an antenna with maximum dimension of 1 m and operating frequency of 900 MHz. If antenna have unity gain calculate the path loss.

**Q.3 Attempt any two of the following.** **12**

- 1) Explain in brief different methods used to improve capacity of cellular system.
- 2) For a given path loss exponent i)  $n = 4$  ii)  $n = 3$  find the frequency reuse factor and the cluster size that should be used for maximum capacity. The signal to interference ratio of 15 dB is minimum required for satisfactory forward channel performance of a cellular system. There are 6 co-channel cells in the first tier and all of them are at the same distance from the mobile.
- 3) Explain ground reflection or two ray model and prove that path difference  $\Delta = (2 h_t h_r)/d$

**Section – II**

**Q.4 Attempt any three of the following:** **16**

- 1) Explain frequency and channel specification in IS-95 CDMA system.
- 2) Write a short note on GSM system architecture.
- 3) Explain GSM frames in detail.
- 4) Explain mobile call origination sequence in GSM.

**Q.5 Attempt any two of the following.** **12**

- 1) Draw and explain GPRS network architecture in detail.
- 2) Draw 4G/LTE architecture and explain.
- 3) Explain packet and frame format for forward and reverse CDMA IS-95 channels.

**MCQ/Objective Type Questions**

Duration: 30 Minutes

Marks: 14

**Q.1 Choose the correct alternatives from the given options.**

**14**

- 1) Modulation technique used in CDMA 2000 is \_\_\_\_\_.  
 a) Uplink – QPSK, Downlink – BPSK  
 b) Uplink – BPSK, Downlink – QPSK  
 c) Uplink – BPSK, Downlink – BPSK  
 d) None of the above
- 2) In GSM the uplink frequency band is \_\_\_\_\_.  
 a) 890-915 MHz  
 b) 935-960 MHz  
 c) 890-935 MHz  
 d) 917-945 MHz
- 3) An interface which connects a BTS to a BSC is called \_\_\_\_\_ interface.  
 a) Channel Interface  
 b) Signaling Interface  
 c) Abis Interface  
 d) None of these
- 4) IMT 2000 stands for \_\_\_\_\_.  
 a) International Mobile Telecommunication  
 b) Interim Mobile Telecommunication  
 c) International Mobile Technology  
 d) None of these
- 5) In FDMA/FDD system, forward and reverse channel uses \_\_\_\_\_ carrier frequencies  
 a) Same  
 b) Different  
 c) Both (a) and (b)  
 d) None of these
- 6) GSM is a \_\_\_\_\_ generation cellular system.  
 a) First  
 b) Second  
 c) Third  
 d) None of these
- 7) What is the bandwidth used in IS-95 CDMA?  
 a) 1.25 MHz  
 b) 1.5 MHz  
 c) 1.75 MHz  
 d) 2 MHz

- 8) Which of the following is/are the main part(s) of basic cellular system?  
a) A mobile Unit  
b) A Base Station  
c) A Mobile Telephone Switching Office  
d) All of the above
- 9) Fading of the received radio signals in a mobile communication environment occurs because of \_\_\_\_\_.

Duration: 30 Minutes

Marks: 14

**Q.1 Select an appropriate option**

**14**

- 1) In optical fiber, signal is in \_\_\_\_\_ form.
  - a) Light
  - b) Electrical
  - c) RF Waves
  - d) None of above
- 2) N.A. is useful measure of \_\_\_\_\_.
  - a) Light Scattering Ability
  - b) Attenuation
  - c) Dispersion
  - d) Light gathering capability
- 3) SRS (Stimulated Raman Scattering) occurs at high power level.
  - a) True
  - b) False
- 4) Intramodal dispersion is also known as \_\_\_\_\_ dispersion.
  - a) Modal
  - b) Chromatic
  - c) Material
  - d) Waveguide
- 5) A temporary joint-formed between two individual optical fibers in the field is known as a
  - a) Fiber joint
  - b) Fiber splice
  - c) Fiber connector
  - d) Fiber coupler
- 6) To achieve optical amplification the condition  $N_2 > N_1$  is achieved through a process called as \_\_\_\_\_.
  - a) Population Inversion
  - b) Nuclear Radiation
  - c) Variation of diameter of optical fiber
  - d) LASER modulation
- 7) SLD offers \_\_\_\_\_ spectral linewidth.
  - a) broad
  - b) constant
  - c) non linear
  - d) narrow
- 8) Impact ionization phenomenon occur in \_\_\_\_\_.
  - a) p-n photodiode
  - b) Avalanche photodiode
  - c) P-I-N photodiode
  - d) None of the above

- 9) The phototransistor provides internal gain of the photocurrent through \_\_\_\_\_.  
a) Avalanche multiplication  
b) Transistor action  
c) Both a and b  
d) None of these
- 10) LAN network is used for \_\_\_\_\_.  
a) TV broadcasting service                      b) Home facsimile  
c) video phone                                      d) All of the above
- 11) In an optical network, which topologies are used?  
a) Ring    b) Bus  
c) Star    d) All of the above
- 12) The basic performance of WDM system is determined by \_\_\_\_\_.  
a) Insertion loss                                      b) Transmission loss  
c) Noise added in channel                      d) All of the above
- 13) Responsivity unit is  
a) AW    b) A/W  
c)  $AW^2$     d) W
- 14) In the intrinsic absorption process the energy of the incident photons should be \_\_\_\_\_ to the band gap energy  $E_g$  of the material used to fabricate the photodetector.  
a) Lesser than or equal  
b) Greater than or equal  
c) Equal  
d) Not equal

 Time: 10:00 AM To 01:00 PM

Max. Marks: 56

**Instructions:** 1) All questions are compulsory.  
 2) Figures to the right indicates full marks.

**Section – I**

**Q.2 Solve any four of the following.** **16**

- 1) Explain the block diagram of optical communication system.
- 2) With ray theory of light, explain the basic working principle of Optical Fiber.
- 3) Explain the scattering losses in Fiber.
- 4) An Optical Fiber has a numerical aperture of 0.20 and a cladding refractive index of 1.59. Determine
  - a) The acceptance angle for the Fiber in water which has a refractive index of 1.33.
  - b) The critical angle at the core-cladding interface.
- 5) Write the various types of LEDs & explain any one.

**Q.3 Solve any two of the following.** **12**

- 1) Explain LASER characteristics.
- 2) Explain optical fiber alignment & joint loss.
- 3) A long single-mode Optical Fiber has an attenuation of  $0.5 \text{ dBkm}^{-1}$  when operating at a wavelength of  $1.3 \mu\text{m}$ . The Fiber core diameter is  $6 \mu\text{m}$  and the LASER source bandwidth is 600 MHz. Compare the threshold Optical powers for stimulated Brillouin and Raman scattering within the Fiber at the wavelength specified.

**Section – II**

**Q.4 Solve any four of the following.** **16**

- 1) Explain in detail the concept of phototransistor.
- 2) Explain the basic working principle of optical detector.
- 3) Explain the concept of FDDI.
- 4) What are the requirements of the Optical detectors?
- 5) Explain the optical transmitter design in detail.

**Q.5 Solve any two of the following.** **12**

- 1) A photodiode has a quantum efficiency of 65% when photons of energy  $1.5 \times 10^{-19} \text{ J}$  are incident upon it.
  - a) At what wavelength is the photodiode operating?
  - b) Calculate the incident Optical power required to obtain a photocurrent of  $2.5 \mu\text{A}$  when the photodiode is operating as described above.
- 2) Write short note on SONET/SDH.
- 3) Explain optical link design.

<b>Seat No.</b>	
-----------------	--

- 8) In optical fiber, signal is in \_\_\_\_\_ form.
- a) Light
  - b) Electrical
  - c) RF Waves
  - d) None of above
- 9) N.A. is useful measure of\_\_\_\_\_.
- a) Light Scattering Ability
  - b) Attenuation
  - c) Dispersion
  - d) Light gathering capability
- 10) SRS (Stimulated Raman Scattering) occurs at high power level.
- a) True
  - b) False
- 11) Intramodal dispersion is also known as\_\_\_\_\_dispersion.
- a) Modal
  - b) Chromatic
  - c) Material
  - d) Waveguide
- 12) A temporary joint-formed between two individual optical fibers in the field is known as a
- a) Fiber joint
  - b) Fiber splice
  - c) Fiber connector
  - d) Fiber coupler
- 13) To achieve optical amplification the condition  $N_2 > N_1$  is achieved through a process called as\_\_\_\_\_.
- a) Population Inversion
  - b) Nuclear Radiation
  - c) Variation of diameter of optical fiber
  - d) LASER modulation
- 14) SLD offers\_\_\_\_\_spectral linewidth.
- a) broad
  - b) constant
  - c) non linear
  - d) narrow

Day & Date: Friday, 24-02-2023  
 Time: 10:00 AM To 01:00 PM

Max. Marks: 70

- Instructions:** 1) Q. No. 1 is compulsory. It should be solved in the first 30 minutes in answer book. Page no 03 (Starting page of the Answer Book). Each question carries one mark.  
 2) Don't forget to Mention question paper set (P/Q/R/S) on top of page.  
 3) Figures to the right indicates full marks.

**MCQ/Objective Type Questions**

Duration: 30 Minutes

Marks: 14

**Q.1 Select an appropriate option**

**14**

- 1) In an optical network, which topologies are used?
  - a) Ring
  - b) Bus
  - c) Star
  - d) All of the above
- 2) The basic performance of WDM system is determined by \_\_\_\_\_.
  - a) Insertion loss
  - b) Transmission loss
  - c) Noise added in channel
  - d) All of the above
- 3) Responsivity unit is
  - a) AW
  - b) A/W
  - c) AW<sup>2</sup>
  - d) W
- 4) In the intrinsic absorption process the energy of the incident photons should be \_\_\_\_\_ to the band gap energy  $E_g$  of the material used to fabricate the photodetector.
  - a) Lesser than or equal
  - b) Greater than or equal
  - c) Equal
  - d) Not equal
- 5) In optical fiber, signal is in \_\_\_\_\_ form.
  - a) Light
  - b) Electrical
  - c) RF Waves
  - d) None of above
- 6) N.A. is useful measure of \_\_\_\_\_.
  - a) Light Scattering Ability
  - b) Attenuation
  - c) Dispersion
  - d) Light gathering capability
- 7) SRS (Stimulated Raman Scattering) occurs at high power level.
  - a) True
  - b) False
- 8) Intramodal dispersion is also known as \_\_\_\_\_ dispersion.

  - c) Material
  - d) Waveguide

- 9) A temporary joint-formed between two individual optical fibers in the field is known as a
- a) Fiber joint
  - b) Fiber splice
  - c) Fiber connector
  - d) Fiber coupler
- 10) To achieve optical amplification the condition  $N_2 > N_1$  is achieved through a process called as\_\_\_\_\_.
- a) Population Inversion
  - b) Nuclear Radiation
  - c) Variation of diameter of optical fiber
  - d) LASER modulation
- 11) SLD offers\_\_\_\_\_spectral linewidth.
- a) broad
  - b) constant
  - c) non linear
  - d) narrow
- 12) Impact ionization phenomenon occur in\_\_\_\_\_.
- a) p-n photodiode
  - b) Avalanche photodiode
  - c) P-I-N photodiode
  - d) None of the above
- 13) The phototransistor provides internal gain of the photocurrent through\_\_\_\_\_.
- a) Avalanche multiplication
  - b) Transistor action
  - c) Both a and b
  - d) None of these
- 14) LAN network is used for\_\_\_\_\_.
- a) TV broadcasting service
  - b) Home facsimile
  - c) video phone
  - d) All of the above

Marks: 14

**Q.1 Choose the correct answer.**

**14**

- 1) \_\_\_\_\_ is the insensitivity of the sensor in a specific range of input signals.
  - a) Dead band
  - b) Repeatability
  - c) Non linearity
  - d) None of the above
- 2) Piezo- electric transducer has a \_\_\_\_\_.
  - a) High sensitivity
  - b) Low sensitivity
  - c) Both A and B
  - d) None of the above
- 3) The unit of magnetic flux density is \_\_\_\_\_.
  - a) Weber
  - b) Weber/m
  - c) Tesla
  - d) Tesla/second
- 4) The fundamental property of magnetism is that \_\_\_\_\_ electric charge.
  - a) Moving
  - b) Steady
  - c) both a & b
  - d) None of the above
- 5) Which of the following is magnetic sensor resistor?
  - a) Capacitive sensor
  - b) Semiconductor sensor
  - c) Resistive Sensor
  - d) Thermal sensor
- 6) In current generator, electric current is independent on \_\_\_\_\_.
  - a) Matching impedance
  - b) load impedance
  - c) terminal impedance
  - d) None of the above
- 7) Which of the following is dynamic characteristics of sensor
  - a) Hysteresis
  - b) Accuracy
  - c) Linearity
  - d) None of the above

- 8) SI unit of pressure is\_\_\_\_\_.  
a) Mole  
b) Pascal

**Sensors & Applications**

Day & Date: Friday, 24-02-2023  
Time: 10:00 AM To 01:00 PM

Max. Marks: 70

- Instructions:** 1) Q. No. 1 is compulsory. It should be solved in the first 30 minutes in answer book. Page no 03 (Starting page of the Answer Book). Each question carries one mark.  
2) Don't forget to Mention question paper set (P/Q/R/S) on top of page.  
3) Figures to the right indicates full marks.

**MCQ/Objective Type Questions**

Duration: 30 Minutes

Marks: 14

**Q.1 Choose the correct answer.**

**14**

- 1) Function of Electrical actuator is\_\_\_\_\_.
  - a) Converts electrical energy into mechanical torque
  - b) Converts mechanical torque into electrical energy
  - c) Converts mechanical energy into mechanical torque
  - d) None of the above
- 2) Output generated by piezo-electric sensor is\_\_\_\_\_.
  - a) Mechanical
  - b) Electrical Charge
  - c) Chemical
  - d) All of the above
- 3) Which of the following are examples of Level Sensor?
  - a) Ultrasonic
  - b) Capacitance
  - c) Both a & b
  - d) All of the above
- 4) Relative Humidity is the function of\_\_\_\_\_.
  - a) Ambient temperature
  - b) Water Vapor Pressure
  - c) Both a & b
  - d) Dryness
- 5) \_\_\_\_\_is the insensitivity of the sensor in a specific range of input signals.
  - a) Dead band
  - b) Repeatability
  - c) Non linearity
  - d) None of the above
- 6) Piezo- electric transducer has a\_\_\_\_\_.
  - a) High sensitivity
  - b) Low sensitivity
  - c) Both A and B
  - d) None of the above

- 7) The unit of magnetic flux density is \_\_\_\_\_.  
a) Weber  
b) Weber/m  
c) Tesla  
d) Tesla/second
- 8) The fundamental property of magnetism is that \_\_\_\_\_ electric charge.  
a) Moving  
b) Steady  
c) both a & b  
d) None of the above
- 9) Which of the following is magnetic sensor resistor?  
a) Capacitive sensor  
b) Semiconductor sensor  
c) Resistive Sensor  
d) Thermal sensor
- 10) In current generator, electric current is independent on \_\_\_\_\_.  
a) Matching impedance  
b) load impedance  
c) terminal impedance  
d) None of the above
- 11) Which of the following is dynamic characteristics of sensor  
a) Hysteresis  
b) Accuracy  
c) Linearity  
d) None of the above
- 12) SI unit of pressure is \_\_\_\_\_.  
a) Mole  
b) Pascal  
c) Candela  
d) Kelvin
- 13) Which of the following is the humidity sensor?  
a) Gyroscope  
b) Hygrometer  
c) Sundial  
d) Proximity
- 14) Pressure Sensor generates output in \_\_\_\_\_ form.  
a) Digital  
b) Analog  
c) Both a & b  
d) Heat

**T.Y. (B.Tech.) (Sem – II) (New) (CBCS) Examination: Oct/Nov-2022**  
**ELECTRONICS & TELECOMMUNICATION ENGINEERING**  
**Sensors & Applications**

Day & Date: Friday, 24-02-2023  
Time: 10:00 AM To 01:00 PM

Max. Marks: 56

**Instructions:** 1) All questions are compulsory.  
2) Figures to the right indicates full marks.

**Section – I**

**Q.2 Attempt any Four.** **16**

- 1) With the help of neat sketch explain Hall Effect sensor.
- 2) Explain working of Instrumentation Amplifier.
- 3) Describe thermal conduction of heat transfer.
- 4) Explain Primary & Secondary cells of battery.
- 5) Define Absolute & Relative Sensor with example.

**Q.3 Attempt any Two.** **12**

- 1) Describe dual slope converter & successive approximation converter with necessary diagrams.
- 2) Explain Following Characteristics of Sensor.  
a) Hysteresis b) Dead band c) span
- 3) Explain types of sensor element dynamic models

**Section – II**

**Q.4 Attempt any Four.** **16**

- 1) With the help of neat sketch explain working of photo transistor.
- 2) Describe Selection criteria of actuators.
- 3) Compare Hydraulic & Pneumatic actuators.
- 4) Explain following terms.  
c) Velocity b) Acceleration
- 5) With the help of neat sketch explain piezo-resistive tactile sensor. Also write application of it.

**Q.5 Attempt any Two.** **12**

- 1) Explain following sensor.  
c) Thermocouple b) Thermistor
- 2) Write short note on nanotechnology.
- 3) Explain Working of Electromagnetic Actuator with neat sketch.

**MCQ/Objective Type Questions**

Duration: 20 Minutes

Marks: 10

**Q.1 Choose the correct alternatives from the options.** **10**

- 1) The contents of the program counter is the \_\_\_\_\_ of the instruction to be run.
 

a) Data	b) Address
c) Counter	d) None of these
- 2) In the case of, Zero-address instruction method the operands are stored in \_\_\_\_\_.
 

a) Cache	b) Push down stack
c) Registers	d) Accumulators
- 3) Which unit acts as the brain of the computer which control other peripherals and interfaces:
 

a) Memory unit	b) Cache unit
c) Timing and control unit	d) None of the above
- 4) A collection of wires that connects several devices or computer parts is called \_\_\_\_\_.
 

a) link wire	b) bus
c) bidirectional wire	d) cable
- 5) Which unit works as an interface between the processor and all the memories on chip or off- chip: \_\_\_\_\_.
 

a) Timing unit	b) Control unit
c) Memory control unit	d) All of these
- 6) Cache memory is located between main memory and \_\_\_\_\_.
 

a) CPU	b) Memory
c) Both A and B	d) None of these
- 7) An instruction pipeline can be implemented by means of \_\_\_\_\_.
 

a) LIFO buffer	b) FIFO buffer
c) Sequential memory	d) None of the above

- 8) A microprogram sequencer \_\_\_\_\_.
  - a) generates the address of next micro instruction to be executed.
  - b) generates the control signals to execute a microinstruction.
  - c) sequentially averages all microinstructions in the control memory
  - d) enables the efficient handling of a micro program subroutine
- 9) Cache memory works on the principle of \_\_\_\_\_.
  - a) Locality of data
  - b) Locality of memory
  - c) Locality of reference
  - d) Locality of reference & memory
- 10) Which of the following data transfer mode is relatively fast?
  - a) DMA
  - b) Interrupt initiated I/O
  - c) Programmed I/O
  - d) Isolated I/O

 2) Don't forget to Mention question paper set (P/Q/R/S) on top of page.  
 3) Figures to the right indicates full marks  
 4) Assume suitable data wherever needed and mention it clearly.

**MCQ/Objective Type Questions**

Duration: 20 Minutes

Marks: 10

**Q.1 Choose the correct alternatives from the options.**

**10**

- 1) Which of the following is associated with fuzzy logic?
  - a) Crisp set logic
  - b) Many-valued logic
  - c) Two-valued logic
  - d) Binary set logic
- 2) How many types of random variables are there in Fuzzy logic?
  - a) 4
  - b) 3
  - c) 2
  - d) 1
- 3) Which of the following fuzzy operators are utilized in fuzzy set theory?
  - a) AND
  - b) OR
  - c) NOT
  - d) ALL
- 4) In artificial neural network, interconnected processing elements are termed as \_\_\_\_\_.
  - a) Weights
  - b) Nodes or neurons
  - c) Axon
  - d) Soma
- 5) Which of the following is termed exploratory learning?
  - a) Active learning
  - b) Supervised learning
  - c) Reinforcement learning
  - d) Unsupervised learning
- 6) The number of nodes in the input layer is 10 and the hidden layer is 5. The maximum number of connections from the input layer to the hidden layer are \_\_\_\_\_.
  - a) 50
  - b) Less than 50
  - c) More than 50
  - d) It is an arbitrary value
- 7) Which of the following functions can be used as an activation function in the output layer if we wish to predict the probabilities of n classes ( $p_1, p_2, \dots, p_n$ ) such that sum of p over all n equals to 1?
  - a) Softmax
  - b) ReLu
  - c) Sigmoid
  - d) Tanh
- 8) In the neural network, every parameter can have their different learning rate \_\_\_\_\_.
  - a) True
  - b) False
  - c) Can't say
  - d) None of this

- 9)** IN Neural Network The input from Input layer is then feed into the \_\_\_\_.
- |                 |                  |
|-----------------|------------------|
| a) Input layer  | b) Output layer  |
| c) Hidden layer | d) None of these |
- 10)** The rate at which cost changes with respect to weight or bias is called \_\_\_\_.
- |                   |             |
|-------------------|-------------|
| a) Derivative     | b) Gradient |
| c) Rate of Change | d) Loss     |

<b>Set</b>	<b>Q</b>
------------	----------

**T.Y (B.Tech.) (Sem-II) (New) (CBCS) Examination: Oct/Nov-2022**  
**ELECTRONICS & TELECOMUNICATION ENGINEERING**  
**Soft Computing**

Day & Date: Monday, 27-02-2023  
Time: 10:00 AM To 12:00 PM

Max. Marks: 40

**Instructions:** 1) All questions are compulsory.  
2) Figures to the right indicates full marks

**SECTION – I**

- Q.2 Attempt any FOUR.** **20**
- a) Define soft computing Explain it in detail.
  - b) Write differences between soft computing and hard computing.
  - c) Explain different operations in fuzzy sets.
  - d) Write applications of fuzzy sets.
  - e) Explain different defuzzification methods.

**SECTION – II**

- Q.3 Attempt any FOUR.** **20**
- a) Explain the Characteristics of Artificial Neural Network.
  - b) Explain different activation function.
  - c) Write application of Artificial Neural Network.
  - d) Explain the concept of Biological Neurons.
  - e) Explain Unsupervised Learning in details.

<b>Seat No.</b>	
-----------------	--

- 9)** How many types of random variables are there in Fuzzy logic?
- |      |      |
|------|------|
| a) 4 | b) 3 |
| c) 2 | d) 1 |
- 10)** Which of the following fuzzy operators are utilized in fuzzy set theory?
- |        |        |
|--------|--------|
| a) AND | b) OR  |
| c) NOT | d) ALL |

<b>Seat No.</b>	
-----------------	--

<b>Set</b>	<b>R</b>
------------	----------

**T.Y (B.Tech.) (Sem-II) (New) (CBCS) Examination: Oct/Nov-2022**  
**ELECTRONICS & TELECOMUNICATION ENGINEERING**

Day & Date: Monday, 27-02-2023  
Time: 10:00 AM To 12:00 PM

Max. Marks: 40

**Instructions:** 1) All questions are compulsory.  
2) Figures to the right indicates full marks

**SECTION – I**

**Q.2 Attempt any FOUR.** **20**

- a) Define soft computing Explain it in detail.
- b) Write differences between soft computing and hard computing.
- c) Explain different operations in fuzzy sets.
- d) Write applications of fuzzy sets.
- e) Explain different defuzzification methods.

**SECTION – II**

**Q.3 Attempt any FOUR.** **20**

- a) Explain the Characteristics of Artificial Neural Network.
- b) Explain different activation function.
- c) Write application of Artificial Neural Network.
- d) Explain the concept of Biological Neurons.
- e) Explain Unsupervised Learning in details.

Day & Date: Monday, 27-02-2023  
Time: 10:00 AM To 12:00 PM

**Instructions:**

- 1) Q. No. 1 is compulsory. It should be solved in the first 20 minutes in answer book. Page no 03 (Starting page of the Answer Book). Each question carries one mark.
- 2) Don't forget to Mention question paper set (P/Q/R/S) on top of page.
- 3) Figures to the right indicates full marks
- 4) Assume suitable data wherever needed and mention it clearly.

Marks: 10

10

- Page 10 of 12

- 9)** The number of nodes in the input layer is 10 and the hidden layer is 5. The maximum number of connections from the input layer to the hidden layer are \_\_\_\_.
- |                 |                             |
|-----------------|-----------------------------|
| a) 50           | b) Less than 50             |
| c) More than 50 | d) It is an arbitrary value |
- 10)** Which of the following functions can be used as an activation function in the output layer if we wish to predict the probabilities of  $n$  classes ( $p_1, p_2, \dots, p_k$ ) such that sum of  $p$  over all  $n$  equals to 1?
- |            |         |
|------------|---------|
| a) Softmax | b) ReLu |
| c) Sigmoid | d) Tanh |

**Fourth Year (B.Tech) (Sem - I) (New) (CBCS) Examination: Oct/Nov-2022**  
**ELECTRONICS & TELECOMMUNICATION ENGINEERING**  
**Machine Learning**

Day & Date: Wednesday, 25-01-2023  
Time: 02:00 PM To 05:00 PM

Max. Marks: 70

**Instructions:** 1) Q. No. 1 is compulsory it should be solved in first 30 minutes in answer Book. Page No.3 (starting page of the Answer Book) Each question carries one mark.  
2) Don't forget to mention the question paper Set (P/Q/R/S) at the top of the Same page.

**MCQ/Objective Type Questions**

Duration: 30 Minutes

Marks: 14

**Q.1 Choose the correct alternatives from the given options.**

**14**

- 1) What is true about machine learning?
  - a) Machine Learning (ML) is that field of computer science
  - b) ML is a type of artificial intelligence that extract patterns out of raw data by using an algorithm or method.
  - c) The main focus of ML is to allow computer systems learn from experience without being explicitly programmed or human intervention.
  - d) All of the above.
- 2) What is machine learning?
  - a) The autonomous acquisition of knowledge through the use of computer programs
  - b) The autonomous acquisition of knowledge through the use of manual programs
  - c) The selective acquisition of knowledge through the use of computer programs
  - d) The selective acquisition of knowledge through the use of manual programs
- 3) Machine learning technique differ from statistical techniques in that machine learning methods
  - a) Typically assumes underlying distribution for the data
  - b) Are better able to deal with missing and noisy data
  - c) Are not able to explain their behaviors
  - d) Have trouble with large type datasets
- 4) Real-time decisions, Game AI, Learning Tasks, Skill Acquisition and Robot Navigation are applications of which of the following
  - a) Supervised Learning: Classification
  - b) Reinforcement Learning
  - c) Unsupervised Learning: Clustering
  - d) Unsupervised Learning: Regression
- 5) Target marketing, Recommended Systems and Customer Segmentation are applications in which of the following
  - a) Supervised Learning: Classification
  - b) Unsupervised Learning: Clustering
  - c) Unsupervised Learning: Regression
  - d) Reinforcement Learning

- 6) Fraud detection, image classification, Diagnostic and Customer Retention are applications in which of the following
- a) Unsupervised Learning: Regression
  - b) Supervised Learning: Classification
  - c) Unsupervised Learning: Clustering
  - d) Reinforcement Learning
- 7) Which of the following is FALSE about Deep Learning and Machine Learning algorithms?
- a) Deep learning algorithms work efficiently on a high amount of data.
  - b) Feature Extraction needs to be done manually in both ML and DL algorithms.
  - c) Deep learning algorithms are best suited for unstructured data.
  - d) Deep Learning algorithms require high computational power.
- 8) When performing regression or classification which of the following is the correct way to preprocess the data?
- a) Normalize the data---PCA---Training
  - b) PCA---Normalize PCA output---Training
  - c) Normalize the data---PCA---Normalize PCA output---Training
  - d) None of the above
- 9) The most widely used metrics and tools to access a classification model are
- a) Confusion Matrix
  - b) Cost Sensitive accuracy
  - c) Area under the ROC curve
  - d) All of the above
- 10) What is over fitting?
- a) Poor result in Training and poor result in test
  - b) Great result in training and poor result in test
  - c) Great result in training and Great result in test
  - d) Poor result in training and Great result in rest
- 11) What is Perceptron?
- a) A single layer feed-forward neural network with pre-processing
  - b) A neural network that contains feedback
  - c) A double layer auto-associative neural network
  - d) An auto-associative neural network
- 12) What is back propagation?
- a) It is another name given to the curvy function in the perceptron
  - b) It is transmission of error back through the network to allow weights to be adjusted so that the network can learn
  - c) It is another name given to the curvy function in the perceptron
  - d) None of the above

- 13) Which of the following is the disadvantage of Decision tree?
- a) Factor Analysis
  - b) Decision tree are robust to outliers
  - c) Decision tree are prone to be overfit
  - d) None of the above
- 14) Disadvantages of Naïve Bayes Classifier:
- a) Naive Bayes assumes that all features are independent or unrelated, so it cannot learn the relationship between
  - b) It performs well in Multi-class predictions as compared to the other
  - c) Naïve Bayes is one of the fast and easy ML algorithms to predict a class of
  - d) It is the most popular choice for text classification problems.

**Instructions:** 1) All questions are compulsory.  
2) Figures to the right indicate full marks.

**Section – I**

- Q.2 Solve any Three. 12**
- a) What is Machine Learning? Give examples of Machine Learning Problem
  - b) Explain Predictive and descriptive tasks?
  - c) Explain Reinforcement learning with examples?
  - d) Explain feature construction and Transformation?
- Q.3 Solve any two. 16**
- a) Differentiate between Machine Learning and Deep Learning
  - b) Explain in detail about accessing Performance of Regression and classification.
  - c) Explain Regularization Theory and VC dimensions?

**Section – II**

- Q.4 Solve any Three. 12**
- a) What are Neural network Elements? Explain Basic Perception?
  - b) Explain Artificial Neural Network.
  - c) Explain Least Square Method for classification?
  - d) Explain Nearest Neighbor classification with Examples?
- Q.5 Solve any two. 16**
- a) Explain Feed forward Network and Back Propagation Algorithm with examples?
  - b) Explain Image and Speed Recognition?
  - c) Explain Email Spam and Malware Filtering?

Seat No.

**Fourth Year (B.Tech) (Sem-I) (New) (CBCS) Examination: Oct/Nov-2022**  
**ELECTRONICS & TELECOMMUNICATION ENGINEERING**  
**Data Communication**

Day & Date: Tuesday, 31-01-2023  
 Time: 02:00 PM To 05:00 PM

Max. Marks: 70

- Instructions:** 1) All questions are compulsory.  
 2) Q. No. 1 should be solved in first 30 minutes in Answer Book Page No. 3. Each question carries one mark. Don't forget to mention Q.P. Set (P,Q,R,S) on top of page.  
 3) Figure on right indicates full marks.

**MCQ/Objective Type Questions**

Duration: 30 Minutes

Marks: 14
