Concept Note

Traditional systems of medicines, including herbal medicines, have been used for many centuries for health care by people in countries of the South-East Asia Region as well as in other parts of the world. Traditional medicine continues to be a valuable source of remedies that have been used by millions of people around the world to secure their health. It has been developed from empirical experiences and from observations made by people who use them. It embodies age-old wisdom and knowledge accrued over thousands of years, and forms an integral part of the social and cultural heritage of peoples and countries. The system has been inherited and handed down from one generation to the next by custom and tradition. When one thinks of traditional home remedies one gets a cosy feeling associated with wise grandmothers and simple, natural ingredients like turmeric, ginger, pepper, and honey. Members of the older generation in India relied heavily on Ayurveda, the traditional Indian system of medicine, as they were not convinced of the efficacy and safety of modern allopathic treatments. It was largely due to their experience and knowledge of the medicinal properties of various herbs that they were able to treat common diseases like diarrhoea, gripes, cough, cold, fever, etc. Even today, it is quite common for parents to try to treat common illnesses at home by these methods rather than rush to the doctor at the first sneeze.

The global health scenario is facing new challenges due to global covid pandemic and economic down-turn that are now threatening health development. It is therefore crucial that all systems of medicine – whether conventional or traditional – in so far as they are beneficial and not deleterious to the health and well-being of the people must play their respective roles in promoting health, in preventing disease, in curing the sick, and in rehabilitating the infirm. It is through these concerted efforts that tangible gains can be achieved.

As the world economies are becoming increasingly globalized and with emergence of covid pandemic, it is necessary to think about health in a global context. While there are talks about sustainable development for women's health, little is mentioned about women's health for sustainable development. Subject of women's health has always been limited to reproductive health rather than considering it wholesomely. Women's health especially from childhood to adolescence and up to geriatric age has not been discussed in detail nationwide. This has resulted in insufficient knowledge within the academia as well as healthcare and at public and policy-maker levels on core issues pertaining to women's health. This lack of knowledge is affecting not only women but also men and society as such. International reports and studies inform that global poverty and health would be closed if investing in women's health is prioritized. Women do bring different skills, innovative ideas and gender perspectives and their concerns often are focussed in addition to the economic performance, the social needs also. Women's issues are deeply inequitable be it academia, entrepreneurship, governance, bureaucracy, politics, media etc. As per the Gender Gap Report of Global Economics Forum (GEF) 2021, only 8.9% of firms have women leaders at top. There is a need to view women's health with a holistic view and to promote new thinking on mechanisms that support innovation in women's health program. On this background Punyashlok Ahilyadevi Holkar Solapur University proposes to conduct a special session on initiatives in women's health on the occasion of International Women's Day on 8th March 2022. This will be live interactive session where key note speaker will deliver the orations on key issues in women's health followed by question-and-answer session. The detailed program is as follows,

Excerpts from Speakers:

आरोग्य म्हणजे केवळ शारीरिक स्वास्थ्य नसून मानसिक स्वास्थ्य देखील निरोगी राहण्यासाठी तितकेच आवश्यक आहे. मानसिक आजारांबद्दल न्यूनगंड न बाळगता वेळीच सावध होऊन उपचार करून घेतल्यास त्यावर मात देणे सहज शक्य आहे. स्त्रियांनी केवळ कुटुंबात न अडकता स्वतःची वेगळी ओळख जपणे आवश्यक आहे. मानसिक स्वास्थ्य सुदृढ ठेवण्यासाठी स्त्रियांनी स्वतःच्या कोशातून बाहेर पडून वेगवेगळ्या क्षेत्रात भरारी घेणे तितकेच महत्वाचे आहे.

- डॉ.विजयालक्ष्मी
अमिनाभावी

भारतीय स्त्रियांचे आरोग्याचे विविध प्रश्न आहेत आणि यातील बरेच आजार हे केवळ अज्ञान आणि दुर्लक्ष केल्यामुळे बळावतात. कुटुंबातील सर्व सदस्यांचे आरोग्य स्त्रीच्या स्वतःच्या आरोग्यावर अवलंबून असते. त्यामुळे स्त्रियांनी स्वतःच्या आरोग्याबद्दल दक्ष आणि सजग असणे आवश्यक आहे. वेळीच आवश्यक त्या तपासण्या करून घेतल्या तर वेळेत आजारांचे निदान करून त्यावर मात करता येते. स्त्रियांनी आरोग्य साक्षर व्हावेच त्याचसोबत स्वतःच्या कुटुंबातील सदस्यांना देखील आरोग्य साक्षर बनवावे.

- डॉ.सरिता कोठडिया

प्राचीन भारतीय संस्कृतीमध्ये मनुष्याच्या जीवनात विविध संस्कार सांगितले गेले आहेत. या प्रत्येक संस्कारांचे आरोग्याच्या दृष्टीने अत्यंत महत्त्व आहे. आपली दिनचर्या व आहार विहार उत्तम ठेवणे आणि आपल्या परंपरा जपणे हाच निरोगी आरोग्याचा खरा मूलमंत्र आहे.

- डॉ.मृदुला बापट

कोव्हीड १९ च्या साथीने मनुष्य जाती साठी प्रचंड असे आव्हान निर्माण केलेले आहे. विशेषतः या साथीच्या काळात गर्भवती स्त्रिया व माता यांना अनेक अडचणींना तोंड द्यावे लागले. कोव्हीड प्रतिबंधात्मक लसीकरण हाच एकमेव उपाय आहे जो आपल्याला या आजारापासून वाचवू शकतो त्यामुळे गर्भवती स्त्रिया असोत वा माता, सर्वांनी कोणतेही किंतु न बाळगता कोव्हीड १९ प्रतिबंधात्मक लसीकरण करून घेतले तरच आपण आपल्या येणाऱ्या पिढीस या आजारापासून दूर ठेवू शकू.
