7) What should be done, if the dependent current and voltage sources are present in a circuit while applying 'Superposition Theorem'?
a) Replace them by open circuit
b) Replaced them by short circuit
c) Keep in their original form without replacing by either open or short circuits
d) None of the above

8) If an a.c. signal generator drives a series RLC circuit, then the circuit undergoes resonance only due to variation in ____
a) Supply voltage b) Series resistance
c) Supply frequency d) Phase angle

9) In a series RLC circuit operating below the resonant frequency the current ____.
a) I leads Vs b) I lags behind Vs
c) I is in phase with Vs d) none

10) How is the short circuit reverse transfer admittance (y_{12}) calculated in terms of current and voltage ratio?
a) V_2/ I_1 (keeping $I_2 = 0$) b) I_2/ V_1 (keeping $V_2 = 0$)
c) I_1/ V_2 (keeping $V_1 = 0$) d) V_1/ I_2 (keeping $I_1 = 0$)

11) Which among the following is regarded as short circuit forward transfer admittance?
a) y11 b) y12
c) y21 d) y22

12) In a steady state, inductors and capacitors are respectively replaced by ____ circuit and ____ circuit.
a) short, open b) open, short
c) short, short d) open, open

13) When a series RC circuit is connected to a constant voltage at t=0, the current passing through the circuit is at t=0+ is ____.

a) Infinite
b) Zero
c) V/R
d) $V/\omega C$

14) The function is said to be having simple poles and zeros and only if ____.

a) the poles are not repeated
b) the zeros are not repeated
c) both poles and zeros are not repeated
d) None

S.Y. (B.Tech.) (Electronics & Telecommunication Engineering) (Sem - I) (New) (NEP CBCS) Examination: March/April - 2025
Network Theory Analysis (ENTPCC-01)

Day & Date: Saturday, 17-05-2025 Max. Marks: 56
Time: 03:00 PM To 06:00 PM

Instructions: 1) All questions are compulsory.
2) figure to right indicate full marks.

Section – I

Q.2 Attempt the following questions: (Any Four) **16**

a) Determine Thevenin's equivalent circuit with reference to terminal ab for circuit shown in figure-2(a)

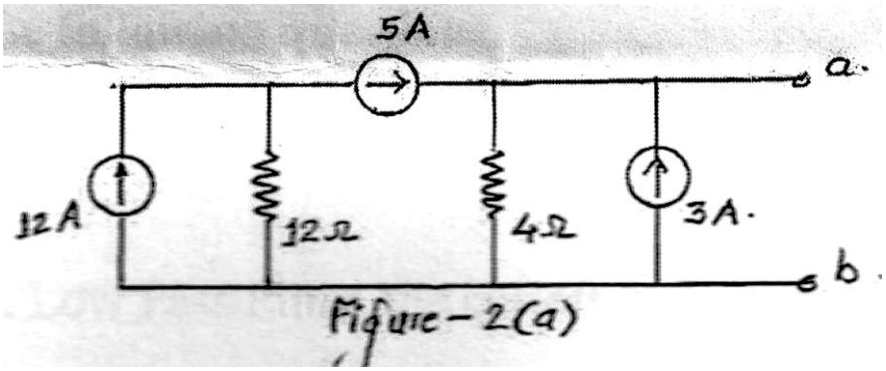

Figure – 2(a)

b) Determine load resistance to receive maximum power from source. Also find the maximum power delivered to the load in the circuit shown in figure 2(b)

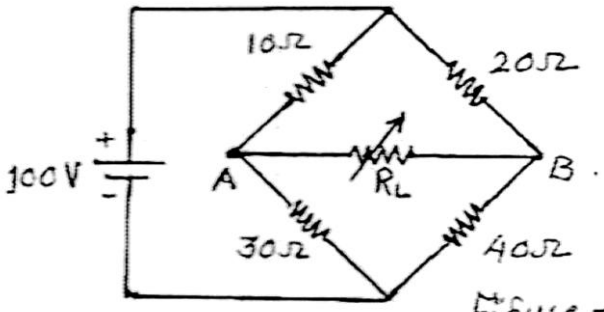

Figure – 2(b).

c) A series RLC circuit consists of R=4 Ω, L=0.5H & variable capacitance in series across a 100V, 50Hz.Calculate,
i) The capacitance to give resonance,
ii) The voltage across capacitor

d) Derive h-parameter equations for two-port network in terms of voltages & currents & give its electrical equivalent circuit.

e) Explain cascade connection of two-port networks.

Q.3 Answer the following: (Any Two) **12**

a) Replace given network shown in figure 3(a) by a single current source in parallel with a resistance.

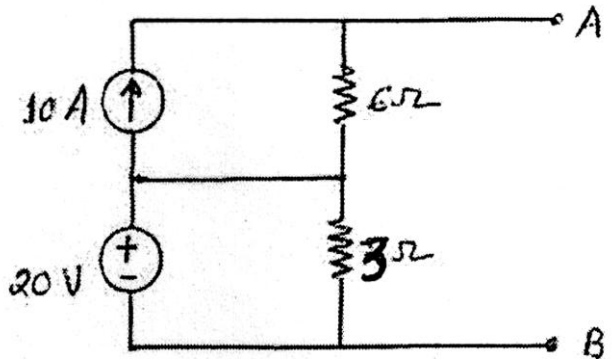

Figure – 3(a)

b) Prove that for an RLC series circuit the resonant frequency is geometric mean of upper & lower half power frequencies.

$\omega o = \sqrt{\omega_1\ \omega_2}$

c) Find the ABCD- parameters for the given π network shown in figure 3(c). Is this network bilateral or not?

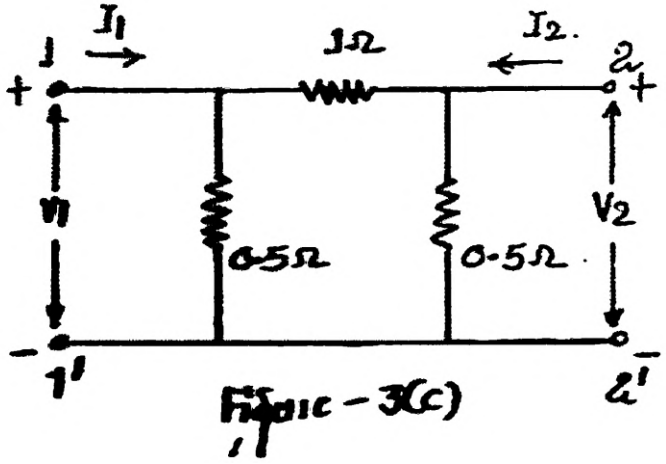

Figure – 3(c)

Section – II

Q.4 Answer the following: (Any Four) **16**

a) Design a T pad attenuator to give an attenuation of 60dB and to work in a line of impedance 500Ω.

b) Prove for Constant-K Low Pass Filter, the cut-off frequency is fc $= \frac{1}{\pi\sqrt{LC}}$

c) Draw T and π sections for m-derived LPF. State the design equations.

d) Draw pole zero plot for given function. Comment on stability of given system from pole zero plot.

$$H(s) = \frac{20(s+1)(s+5)}{s(s^2+2s+2)(s+7)}$$

e) Explain transient response of series RC circuit.

Q.5 Answer the following: (Any Two) **12**

a) Find current i(t) for t > 0 for the circuit shown in figure-5(a)

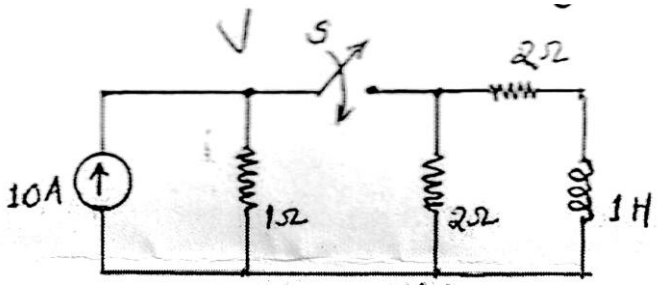

Figure – 5(a)

b) Define poles and zeros of network function. Explain the significance of poles and zeros with suitable examples.

c) Design m-derived LPF both T and π sections with cut-off frequency of 1 KHz, design impedance of 400 Ω and resonant frequency of 1100 Hz.

3) Figures to the right indicates full marks.

MCQ/Objective Type Questions

Duration: 30 Minutes Marks:14

Q.1 Choose the correct option from the following: **14**

1) How is the short circuit reverse transfer admittance (y_{12}) calculated in terms of current and voltage ratio?
a) V_2/ I_1 (keeping $I_2 = 0$) b) I_2/ V_1 (keeping $V_2 = 0$)
c) I_1/ V_2 (keeping $V_1 = 0$) d) V_1/ I_2 (keeping $I_1 = 0$)

2) Which among the following is regarded as short circuit forward transfer admittance?
a) y11 b) y12
c) y21 d) y22

3) In a steady state, inductors and capacitors are respectively replaced by ____ circuit and ____ circuit.
a) short, open b) open, short
c) short, short d) open, open

4) When a series RC circuit is connected to a constant voltage at t=0, the current passing through the circuit is at t=0+ is ____.
a) Infinite b) Zero
c) V/R d) $V/\omega C$

5) The function is said to be having simple poles and zeros and only if ____.
a) the poles are not repeated
b) the zeros are not repeated
c) both poles and zeros are not repeated
d) None

6) Which among the following belong/s to the category of critical frequency?
a) Poles
b) Zeros
c) Both a and b
d) None of the above

7) In the m-derived high pass filters the resonant frequency is to be chosen so that it is ____.
a) above the cut off frequency
b) below the cut off frequency
c) between the cut off frequency
d) None

8) An ideal filter should have ____.
a) zero attenuation in the pass band
b) infinite attenuation in the pass band
c) zero attenuation in the attenuation band
d) infinite attenuation in the attenuation band

9) Transients are present in the circuit when the circuit is having ____.
a) C
b) L
c) R
d) Either L or C

10) Under which conditions do the source transformation technique remain directly unapplicable?
a) Only in the absence of impedance in series with a voltage source
b) Only in the absence of impedance in parallel with a current source
c) Both a and b
d) None of the above

11) Superposition theorem is not applicable to network of ____.
a) Nonlinear elements
b) Dependent voltage sources
c) dependent current sources
d) All of the above

12) What should be done, if the dependent current and voltage sources are present in a circuit while applying 'Superposition Theorem'?
a) Replace them by open circuit
b) Replaced them by short circuit
c) Keep in their original form without replacing by either open or short circuits
d) None of the above

13) If an a.c. signal generator drives a series RLC circuit, then the circuit undergoes resonance only due to variation in ____
a) Supply voltage
b) Series resistance
c) Supply frequency
d) Phase angle

14) In a series RLC circuit operating below the resonant frequency the current ____.

a) I leads Vs
b) I lags behind Vs
c) I is in phase with Vs
d) none

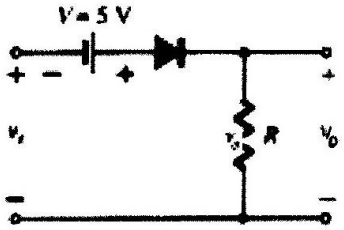
MCQ/Objective Type Questions

Duration: 30 Minutes Marks:14

Q.1 Choose the correct alternatives from the options. 14

1) If input frequency is 50Hz for a full wave rectifier, the ripple frequency of it would be _____.
a) 100 Hz b) 50Hz
c) 25Hz d) 500Hz

2) What is the circuit in the given diagram called?



a) Clipper b) Clamper
c) Half wave rectifier d) Full wave rectifier

3) Efficiency of a centre tapped full wave rectifier is _____.
a) 50% b) 46%
c) 70% d) 81.2%

4) A capacitor filter or C filter can be used in a rectifier by connecting it _____.
a) in parallel with the load b) in series with the load
c) in parallel with the supply d) in series with the supply

5) A full wave rectifier uses a capacitor filter with 500μF capacitor and provides a load current of 200mA at 8% ripple. Calculate the dc voltage.
a) 15.56V b) 20.43V
c) 11.98V d) 14.43V

6) If no load voltage across DC power supply is 10V and full load voltage is 9.8V. Then calculate the load regulation of DC power supply.

a) 5% b) 8%
c) 2% d) 10%

7) An ideal voltage regulator has _____ load regulation.

a) 0% b) 50%
c) 100% d) 10%

8) The current gain for a transistor working as common-base amplifier is 0.96. If the emitter current is7.2 mA, then the base current is _____.

a) 0.29 mA b) 0.35 mA
c) 0.39 mA d) 0.43 mA

9) There are _____ h parameters of a transistor.

a) Two b) Four
c) Three d) None of these

10) Which of the following is valid for both P-N-P as well as N-P-N transistor?

a) The emitter injects holes into the base region.
b) The electrons are the minority carriers in the base region.
c) The EB junction is forward biased for active operation.
d) When biased in the active region, current flows into their emitter terminal.

11) The gain of an amplifier with feedback is known as _____ gain.

a) Resonant b) Open loop
c) Closed loop d) None of the above

12) The value of negative feedback fraction is always _____.

a) Less than 1 b) More than 1
c) Equal to 1 d) None of the above

13) Which of the following statement is true about FET?

a) It has high output impedance.
b) It has high input impedance.
c) It has low input impedance.
d) It does not offer any resistance.

14) When drain voltage equals the pinch-off-voltage, then drain current _____ with the increase in drain voltage.

a) decreases b) increases
c) remains constant d) None of the above

Q.2 Attempt any Four. **16**

a) List different types of Clipper circuits and explain negative clipper with transfer characteristics.
b) Explain the operation of voltage doubler, Give its one application.
c) Explain operation of capacitor filter. Derive the expression for ripple factor of capacitor filter.
d) Explain how the zener diode maintains the output voltage constant.
e) Explain unregulated power supply with block diagram.

Q.3 Attempt any Two. **12**

a) Explain with neat diagram operation of full wave rectifier. Derive expression for following parameters Vo avg, Vo rms, ripple factor, efficiency, TUF and PIV.
b) A full wave rectifier has a peak output voltage of 30V at 50 Hz and feeds a resistive load of 1KΩ. The filter used is shunt capacitor one with C=20 μF. Determine.
i) DC load current
ii) DC output voltage
iii) Ripple voltage
iv) Ripple factor
c) In a zener regulator, the DC input is 10 V $\pm$20%. The output requirements are 5V, 20mA. Assume Iz(min) and Iz(max) as 5mA and 80A. Design the zener regulator.

Section – II

Q.4 Attempt any Four. **16**

a) Explain DC Load Line analysis.
b) List different coupling schemes & explain Direct Coupled amplifier.
c) Briefly explain the concept of feedback, what are the characteristics of negative feedback amplifier.
d) Explain JFET VI & Transfer characteristics.
e) Give a short note on CMOS.

Q.5 Attempt any Two. **12**

a) List BJT Biasing & explain Voltage divider bias.
b) Explain & derive effect of negative feedback on Stability, Bandwidth, and Noise, Distortion I/P Resistance and O/P Resistance amplifier.
c) Explain MOSFET- Construction, working & V I characteristics.

MCQ/Objective Type Questions

Duration: 30 Minutes Marks:14

Q.1 Choose the correct alternatives from the options. 14

1) The gain of an amplifier with feedback is known as _____ gain.
a) Resonant b) Open loop
c) Closed loop d) None of the above

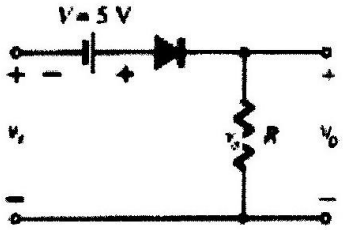
2) The value of negative feedback fraction is always _____.
a) Less than 1 b) More than 1
c) Equal to 1 d) None of the above

3) Which of the following statement is true about FET?
a) It has high output impedance.
b) It has high input impedance.
c) It has low input impedance.
d) It does not offer any resistance.

4) When drain voltage equals the pinch-off-voltage, then drain current _____ with the increase in drain voltage.
a) decreases b) increases
c) remains constant d) None of the above

5) If input frequency is 50Hz for a full wave rectifier, the ripple frequency of it would be _____.
a) 100 Hz b) 50Hz
c) 25Hz d) 500Hz

6) What is the circuit in the given diagram called?



a) Clipper
b) Clamper
c) Half wave rectifier
d) Full wave rectifier

7) Efficiency of a centre tapped full wave rectifier is _____.

a) 50%
b) 46%
c) 70%
d) 81.2%

8) A capacitor filter or C filter can be used in a rectifier by connecting it _____.

a) in parallel with the load
b) in series with the load
c) in parallel with the supply
d) in series with the supply

9) A full wave rectifier uses a capacitor filter with 500μF capacitor and provides a load current of 200mA at 8% ripple. Calculate the dc voltage.

a) 15.56V
b) 20.43V
c) 11.98V
d) 14.43V

10) If no load voltage across DC power supply is 10V and full load voltage is 9.8V. Then calculate the load regulation of DC power supply.

a) 5%
b) 8%
c) 2%
d) 10%

11) An ideal voltage regulator has _____ load regulation.

a) 0%
b) 50%
c) 100%
d) 10%

12) The current gain for a transistor working as common-base amplifier is 0.96. If the emitter current is7.2 mA, then the base current is _____.

a) 0.29 mA
b) 0.35 mA
c) 0.39 mA
d) 0.43 mA

13) There are _____ h parameters of a transistor.

a) Two
b) Four
c) Three
d) None of these

14) Which of the following is valid for both P-N-P as well as N-P-N transistor?

a) The emitter injects holes into the base region.
b) The electrons are the minority carriers in the base region.
c) The EB junction is forward biased for active operation.

Instructions: 1) Q. No. 1 is compulsory. It should be solved in the first 30 minutes in Answer Book Page no 03 (Starting page of the Answer Book). Each question carries one mark.
2) Don't forget to Mention question paper set (P/Q/R/S) on top of page.
3) Figure to the right indicates full marks.
4) Assume suitable data if necessary.

MCQ/Objective Type Questions

Duration: 30 Minutes Marks:14

Q.1 Choose the correct alternatives from the options. 14

1) If no load voltage across DC power supply is 10V and full load voltage is 9.8V. Then calculate the load regulation of DC power supply.
a) 5% b) 8%
c) 2% d) 10%

2) An ideal voltage regulator has _____ load regulation.
a) 0% b) 50%
c) 100% d) 10%

3) The current gain for a transistor working as common-base amplifier is 0.96. If the emitter current is7.2 mA, then the base current is _____.
a) 0.29 mA b) 0.35 mA
c) 0.39 mA d) 0.43 mA

4) There are _____ h parameters of a transistor.
a) Two b) Four
c) Three d) None of these

5) Which of the following is valid for both P-N-P as well as N-P-N transistor?
a) The emitter injects holes into the base region.
b) The electrons are the minority carriers in the base region.
c) The EB junction is forward biased for active operation.
d) When biased in the active region, current flows into their emitter terminal.

6) The gain of an amplifier with feedback is known as _____ gain.
a) Resonant b) Open loop
c) Closed loop d) None of the above

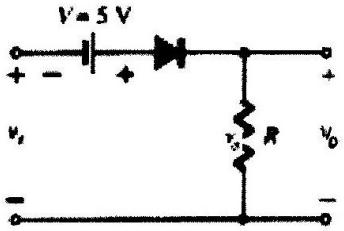
7) The value of negative feedback fraction is always _____.
a) Less than 1 b) More than 1
c) Equal to 1 d) None of the above

8) Which of the following statement is true about FET?
a) It has high output impedance.
b) It has high input impedance.
c) It has low input impedance.
d) It does not offer any resistance.

9) When drain voltage equals the pinch-off-voltage, then drain current _____ with the increase in drain voltage.
a) decreases b) increases
c) remains constant d) None of the above

10) If input frequency is 50Hz for a full wave rectifier, the ripple frequency of it would be _____.
a) 100 Hz b) 50Hz
c) 25Hz d) 500Hz

11) What is the circuit in the given diagram called?



a) Clipper b) Clamper
c) Half wave rectifier d) Full wave rectifier

12) Efficiency of a centre tapped full wave rectifier is _____.
a) 50% b) 46%
c) 70% d) 81.2%

13) A capacitor filter or C filter can be used in a rectifier by connecting it _____.
a) in parallel with the load b) in series with the load
c) in parallel with the supply d) in series with the supply

14) A full wave rectifier uses a capacitor filter with 500μF capacitor and provides a load current of 200mA at 8% ripple. Calculate the dc voltage.
a) 15.56V b) 20.43V
c) 11.98V d) 14.43V

Set **S**

S.Y. (B.Tech.) (Sem-I) (New) (NEP CBCS) Examination: March/April-2025
ELECTRONIC & TELECOMMUNICATION ENGINEERING
Electronics Circuit Analysis & Design (ENTPCC-02)

Day & Date: Monday 19-05-2025 Max. Marks: 56
Time: 03:00 PM To 06:00 PM

Instructions: 1) All questions are compulsory.
2) Figures to the right indicate full marks.
3) Assume suitable data if necessary.
4) Draw neat diagram whenever necessary.

Section – I

Q.2 Attempt any Four. **16**

a) List different types of Clipper circuits and explain negative clipper with transfer characteristics.
b) Explain the operation of voltage doubler, Give its one application.
c) Explain operation of capacitor filter. Derive the expression for ripple factor of capacitor filter.
d) Explain how the zener diode maintains the output voltage constant.
e) Explain unregulated power supply with block diagram.

Q.3 Attempt any Two. **12**

a) Explain with neat diagram operation of full wave rectifier. Derive expression for following parameters Vo avg, Vo rms, ripple factor, efficiency, TUF and PIV.
b) A full wave rectifier has a peak output voltage of 30V at 50 Hz and feeds a resistive load of 1KΩ. The filter used is shunt capacitor one with C=20 μF. Determine.
i) DC load current
ii) DC output voltage
iii) Ripple voltage
iv) Ripple factor
c) In a zener regulator, the DC input is 10 V $\pm$20%. The output requirements are 5V, 20mA. Assume Iz(min) and Iz(max) as 5mA and 80A. Design the zener regulator.

Section – II

Q.4 Attempt any Four. **16**

a) Explain DC Load Line analysis.
b) List different coupling schemes & explain Direct Coupled amplifier.
c) Briefly explain the concept of feedback, what are the characteristics of negative feedback amplifier.
d) Explain JFET VI & Transfer characteristics.
e) Give a short note on CMOS.

Q.5 Attempt any Two. **12**

a) List BJT Biasing & explain Voltage divider bias.
b) Explain & derive effect of negative feedback on Stability, Bandwidth, and Noise, Distortion I/P Resistance and O/P Resistance amplifier.
c) Explain MOSFET- Construction, working & V I characteristics.

S. Y. (B.Tech.) (Sem-I) (New) (NEP CBCS) Examination: March/April-2025
ELECTRONICS & TELECOMMUNICATION ENGINEERING
Analog and Digital Communication (ENTPCC-03)

Day & Date: Tuesday 20-05-2025 Max. Marks: 70
Time: 03:00 PM To 06:00 PM

Instructions: 1) Q. No. 1 is compulsory. It should be solved in the first 30 minutes in Answer Book Page no 03 (Starting page of the Answer Book). Each question carries one mark.
2) Don't forget to Mention question paper set (P/Q/R/S) on top of page.
3) Figures to the right indicates full marks.
4) Use of non-programmable calculator is allowed.

MCQ/Objective Type Questions

Duration: 30 Minutes Marks:14

Q.1 Choose the correct Answer. **14**

1) Which one of the following is not an internal noise?
a) Thermal agitation b) Shot noise
c) Transit time d) Solar Noise

2) Sensitivity is measured in _____.
a) Microvolts b) Mili amp
c) Ohms d) Siemens

3) Image frequency is _____.
a) Unwanted b) Useful and required
c) Improves S/N d) None

4) In FM Automatic Gain Control is derived from _____.
a) Diode Detector b) Limiter
c) Local Oscillator d) None

5) Noise in FM is less because _____.
a) Amplitude is constant
b) Pre emphasis- De-emphasis is used
c) Limiter is used
d) All above

6) Noise figure is given by _____.
a) Signal/noise
b) Input S/N divided by output S/N
c) Output S/N divided by input S/N
d) None

7) Function of balanced modulator is _____.
a) To remove carrier b) side band suppression
c) To reduce bandwidth d) None of these

8) The maximum value of H is reached for two messages when its probability is _____.

a) P = 0.5 b) P = 1
c) P = 0 d) P = 2

9) Granular noise is associated with _____.

a) PCM b) Delta Modulation
c) DPCM d) QAM

10) The main disadvantage of PCM is _____.

a) Large bandwidth b) Large power
c) Complex circuitry d) Quantization noise

11) Quantization Noise can be reduced by_____.

a) Increasing BW b) Increasing quantization level
c) Reducing BW d) None of these

12) _____ most affected by noise.

a) PSK b) ASK
c) FSK d) MSK

13) If the baud rate for QPSK is 100 then bit rate is _____.

a) 100 b) 200
c) 300 d) 400

14) In FSK max frequencies present will be _____.

a) Four b) Two
c) Six d) None of these

Analog and Digital Communication (ENTPCC-03)

Day & Date: Tuesday 20-05-2025 Max. Marks: 56
Time: 03:00 PM To 06:00 PM

Instructions: 1) All questions are compulsory.
2) Figures to the right indicate full marks.
3) Use of non-programmable calculator is allowed.

Section – I

Q.2 Attempt the following (Any Four). 16

a) Explain what is the need of modulation with relevant examples.
b) Give broad classification of noise, Elaborate each type in detail
c) What is SSB? how it is useful? Explain any one method of SSB generation.
d) What is difference between TRF and Superhetrodyne receiver. With neat block diagram explain Superhetrodyne principle
e) Equation of Angle modulated wave is given by $v = 10\sin(10^8 t + 3\sin 10^4 t)$ What is form of modulation?
Calculate carrier, modulating frequencies, modulation index and power dissipated in 100 ohm.

Q.3 Attempt the following (Any Two). 12

a) Give broad classification of Modulations. What is AM derive an expression for AM. Draw frequency response of AM. Calculate Band width from frequency response
b) Compare AM and FM? What kind of modulation is used in TV transmission? Explain VSB in brief.
c) The antenna current of AM transmitter is 8A when only carrier is sent but it increases to 8.93 A when carrier modulated by single sin wave. Find percentage modulation. Determine antenna current when parentage modulation change to 0.8.

Section – II

Q.4 Attempt the following (Any Four). 16

a) Explain PCM detail. What is major drawback of it. What is method to minimize the drawback?
b) Define entropy. Prove that the entropy is maximum when all the messages are equiprobable.
c) With suitable block diagram explain DM in detail. What are its limitations? Which method you will suggest to minimize limitations?
d) Compare different digital modulation techniques.
e) Explain FSK with suitable block diagram and waveforms.

Q.5 Attempt the following (Any Two). **12**

a) Explain concept of rate of information. What is its significance? Why it is useful?
Apply Shannon Fano coding procedure for below messages. Also find efficiency and redundancy.
[X] = [x1, x2, x3, x4, x5, x6, x7]
[P(X)] = [0.4, 0.2, 0.12, 0.08, 0.08, 0.08, 0.04]

b) Consider (7,4) block code generated by following. Find all the code vectors. Explain how syndrome S helps in correcting a single error. What happens when more than one error occurs.

$$G = \begin{matrix} 1 & 0 & 0 & 0 & 1 & 1 & 0 \\ 0 & 1 & 0 & 0 & 0 & 1 & 1 \\ 0 & 0 & 1 & 0 & 1 & 0 & 1 \\ 0 & 0 & 0 & 1 & 1 & 1 & 1 \end{matrix}$$

c) Explain QPSK signaling scheme in detail.

Time: 03:00 PM To 06:00 PM

Instructions: 1) Q. No. 1 is compulsory. It should be solved in the first 30 minutes in Answer Book Page no 03 (Starting page of the Answer Book). Each question carries one mark.
2) Don't forget to Mention question paper set (P/Q/R/S) on top of page.
3) Figures to the right indicates full marks.

MCQ/Objective Type Questions

Duration: 30 Minutes Marks:14

Q.1 Choose the correct Answer. **14**

1) If a linear differential equation with constant coefficients and r.h.s. equal to zero has a real root m_1 repeated Two times, then the corresponding part of the integral is _____.

a) $(c_1 + c_2)e^{m_1 X}$ b) $(c_1 + c_2 x)e^{m_1 X}$

c) $(c_1 x + c_2 x^2)e^{m_1 X}$ d) $(c_1 + c_2 x^3)e^{m_1 X}$

2) $\frac{1}{D-a} X$ is equal to _____.

a) $\int X e^{ax} dx$ b) $e^{ax} \int X . e^{-ax} dx$

c) $\int X e^{-ax} dx$ d) $e^{-ax} \int X e^{-ax} dx$

3) $\frac{1}{D+1}(\log x + \frac{1}{x})$ is equal to _____.

a) e^x b) 1

c) x d) $\log x$

4) The solution of $q = e^{-p}$ is _____.

a) $z = ax + by + c$ b) $z = a^x + b^y + c$

c) $z = ax + y^{-b} + c$ d) $z = ax + e^{-a} y + c$

5) The solution of the equation $pq = p + q$ is _____.

a) $z = ax + (a+1)y + c$

b) $z = (a+1)x + a(a-1)y + c$

c) $z = (a-1)x + a(a+1)y + c$

d) $z(a-1) = a(a-1)x + ay + c$

6) If μ_1', μ_2', μ_3', μ_4' are the first four moments of the distribution about certain number then fourth moment μ_4 of the distribution about the arithmetic mean is given by _____.

a) $\mu_4' + 4\mu_3'\mu_1' + 6\mu_2'(\mu_1')^4 + 3(\mu_1')^4$

b) $\mu_4' - 4\mu_3'\mu_1' + 6\mu_2'(\mu_1')^2 - 3(\mu_1')^4$

c) $\mu_4' + 4\mu_3'\mu_1' - 6\mu_2'(\mu_1')^4 - 3(\mu_1')^4$

d) $\mu_4' + 2\mu_3'\mu_1' + 6\mu_2'(\mu_1')^4 - 3(\mu_1')^4$

7) Coefficient of kurtosis β_2 is given by _____.

a) $\frac{\mu_4}{\mu_3}$ b) $\frac{\mu_4}{\mu_2^2}$

c) $\frac{\mu_3}{\mu_2^2}$ d) $\frac{\mu_4}{\mu_2^3}$

8) If value of x for normal distribution is 35, mean of normal distribution is 65 and standard deviation is 25 then standardized random variable is ___.

a) -1.5 b) -1.7

c) -1.2 d) -4

9) A continuous random variable has the following probability density function $f(x) = kx(1-x), 0 \le x \le 1$ then $k =$ _____.

a) 6 b) 2

c) 3 d) 5

10) The area under the standard normal curve from $z = -\infty$ to $z = 0$ is ___.

a) 1 b) ½

c) 3/2 d) 0

11) If X, Y denotes the deviations from their means and if $\sum X^2 = 40, \sum Y^2 = 100, \sum XY = 50,$ then $r =$ _____.

a) 0.63 b) 0.82

c) 0.91 d) 0.79

12) The line of regression of x and y is given by _____.

a) $x - \bar{x} = b_{xy}(y - \bar{y})$ b) $x - \bar{y} = b_{xy}(x - \bar{x})$

c) $x - \bar{x} = b_{xx}(y - \bar{y})$ d) $x - \bar{x} = b_{yx}(y - \bar{y})$

13) The following mistakes per page were found in a book.

No. of mistakes:	0	1	2	3	4
Pages:	211	90	19	5	0

Then χ^2 is _____.

a) 0.59 b) 0.069

c) 0.81 d) 0.79

14) The 't-statistic' is defined as _____.

a) $\frac{\bar{x}-\mu}{\sigma/\sqrt{n}}$ b) $\frac{\bar{x}-\mu}{s/\sqrt{n}}$

c) $\frac{\bar{x}-\mu}{\sigma/n}$ d) $\frac{\bar{x}-\mu}{s/n}$

Seat No.	

Set P

S. Y. (B.Tech.) (Sem-I) (New) (NEP CBCS) Examination: March/April-2025
ELECTRONICS & TELECOMMUNICATION ENGINEERING
Advanced Mathematics and Statistics (OE-01A)

Day & Date: Wednesday 21-05-2025 Max. Marks: 56
Time: 03:00 PM To 06:00 PM

Instructions: 1) All questions are compulsory.
2) Figures to the right indicate full marks.

Section – I

Q.2 Attempt any Three. **09**

a) Find the Arithmetic mean, Median and standard deviation for the following frequency distribution.

x	5	9	12	15	20	24	30	35	42	49
f	3	6	8	8	9	10	8	7	6	2

b) Solve $(D^2 - 4D + 4)y = 8.x^2e^{2x}\sin 2x$

c) Solve $(D^2 + D + 1)y = \sin 2x$

d) Calculate Mode for the following frequency distribution.

C.I.	00-10	10-20	20-30	30-40	40-50	50-60	60-70
Frequency (f)	4	7	8	12	25	18	10

e) Solve $p^2q^3 = x^2y^3$

Q.3 Attempt any Three. **09**

a) Solve: $(2D + 1)^2y = 4e^{-x/2}$

b) Solve: $p + q = pqz$

c) Find Q_1, Q_2, Q_3 from the following data.
5,7,12,14,15,22,25,30,36,42,53

d) Solve $x(y - z)p + y(z - x)q = z(x - y)$

e) Solve $(D^3 - 3D + 2)y = x$

Q.4 Attempt any Two **10**

a) The first four moments of a distribution about the value 5 are 2,20,40 and 50. from the given information obtain the first four central moments, coefficient of skewness and kurtosis.

b) Solve the following differential equation by the method of separation of variables.
$\frac{\partial z}{\partial x} - 2\frac{\partial z}{\partial y} = z$ given that $z(x, 0) = 3e^{-5x}$

c) Solve: $(D^2 - D - 2)y = 2\log x + \frac{1}{x} + \frac{1}{x^2}$

Section – II

Q.5 Attempt any three of the following. **09**

a) Find the value of k if each of the following functions is a probability density function.

$$f(x) = \begin{cases} kx^2(1-x^3), & 0 \le x \le 1 \\ 0, & \text{otherwise} \end{cases}$$

b) The mean life time of 100 fluorescent light bulbs produced by a Company is computed to be 1570 Hrs. with S.D. of 120 Hrs. If μ is the mean lifetime of all the bulbs produced by the Company, Test the Hypothesis $\mu = 1600$ Hrs. Against the alternative Hypothesis $\mu \neq 1600$ Hrs. using 5% level of Significance.
(Given Expected value at 5% LOS is 1.96)

c) Calculate the coefficient of correlation between height of father and height of son from the following data.

Height of father	64	65	66	67	68	69	70
Height of son	66	67	65	68	70	68	71

d) Two independent random sample have the following data,
$\overline{x_1} = 110, \sigma_1 = 25, n_1 = 16$
$\overline{x_2} = 120, \sigma_2 = 30, n_2 = 9$
If σ_1 and σ_2 are the S. D. of the populations. Test the hypothesis that $\mu_1 = \mu_2$ at 5% level of significance. (The table value of t at $\alpha = 0.05$ for $v = 23$ degrees of freedom is 2.069)

e) If in a lot of 500 solenoids 25 are defective, find the probability that there will be 0, 1, 2 defective solenoids in a random sample of 20 solenoids.

Q.6 Attempt any three of the following. **09**

a) If two independent random samples of sizes 15 and 8 have respectively the following mean and population standard deviations, $\overline{x_1} = 980, \overline{x_2} = 1012; \sigma_1 = 75, \sigma_2 = 80$. Test the hypothesis that $\mu_1 = \mu_2$ at 5% level of significance.
(Given Expected value at 5% LOS with 21 DF is 2.080)

b) The number of telephone calls received by an operator in a ten-minute interval follows a Poisson distribution with mean 1. What is the probability of receiving (i) no call, (ii) less than four calls, in the interval? What is the most likely number of calls?

c) Calculate the equations of the lines of regression. Given
Mean of $x = 50.07$, S.D. of $x = 5.26$
Mean of $y = 9.98$, S.D. of $y = 2.59$
$r = 0.898$

d) In an intelligence test administered to 1000 children the mean score was, 42 with s.d. 24. Find the number of children (i) scoring more than 60 and (ii) between 20 and 40 assuming the distribution to be normal.
(Given: For S.N.V. z area from z = 0 to z = 0.75 is 0.2734, that between z = 0 and z = 0.9167 is 0.3202 and that between z = 0 to z = 0.08333 is 0.0332.)

e) Fit a Straight line $y = a + bx$ to the following data.

x	0	1	2	3	4	5
y	1	2	3	4.5	6	7.5

Q.7 Attempt any Two. **10**

a) Fit a Poisson's distribution to the following data :

X	0	1	2	3	4	Total
f	112	63	20	4	1	200

b) Obtain a second-degree curve to the following data.

Year	1965	1966	1967	1968	1969	1970	1971	1972
Profit (in Corers Rs.)	125	140	165	195	200	215	220	230

Also estimate the profit in 1973.

c) Ten school boys were given a test in Statistics and their scores were recorded. They were given a month's special coaching and a second test was given to them in the same subject at the end of the coaching period. Test if the marks given below give evidence to the fact that the students are benefitted by coaching.
Marks in test I: 70, 68, 56, 75, 80, 90, 68, 75, 56, 58
Marks in Test II: 68, 70, 52, 73, 75, 78, 80, 92, 54, 55
(Given that value of t_α at 5 % LOS for v = 9 degrees of freedom is 1.86 for one tailed test)

Seat No.	

Set Q

Advanced Mathematics and Statistics (OE-01A)

Day & Date: Wednesday 21-05-2025 Max. Marks: 70
Time: 03:00 PM To 06:00 PM

Instructions: 1) Q. No. 1 is compulsory. It should be solved in the first 30 minutes in Answer Book Page no 03 (Starting page of the Answer Book). Each question carries one mark.
2) Don't forget to Mention question paper set (P/Q/R/S) on top of page.
3) Figures to the right indicates full marks.

MCQ/Objective Type Questions

Duration: 30 Minutes Marks:14

Q.1 Choose the correct Answer. 14

1) If value of x for normal distribution is 35, mean of normal distribution is 65 and standard deviation is 25 then standardized random variable is ___.
a) -1.5 b) -1.7
c) -1.2 d) -4

2) A continuous random variable has the following probability density function $f(x) = kx(1-x), 0 \leq x \leq 1$ then $k =$ _____.
a) 6 b) 2
c) 3 d) 5

3) The area under the standard normal curve from $z = -\infty$ to $z = 0$ is ___.
a) 1 b) ½
c) 3/2 d) 0

4) If X, Y denotes the deviations from their means and if $\sum X^2 = 40, \sum Y^2 = 100, \sum XY = 50,$ then $r =$ _____.
a) 0.63 b) 0.82
c) 0.91 d) 0.79

5) The line of regression of x and y is given by _____.
a) $x - \bar{x} = b_{xy}(y - \bar{y})$ b) $x - \bar{y} = b_{xy}(x - \bar{x})$
c) $x - \bar{x} = b_{xx}(y - \bar{y})$ d) $x - \bar{x} = b_{yx}(y - \bar{y})$

6) The following mistakes per page were found in a book.

No. of mistakes:	0	1	2	3	4
Pages:	211	90	19	5	0

Then χ^2 is _____.
a) 0.59 b) 0.069
c) 0.81 d) 0.79

7) The 't-statistic' is defined as _____.

a) $\frac{\bar{x}-\mu}{\sigma/\sqrt{n}}$ b) $\frac{\bar{x}-\mu}{s/\sqrt{n}}$

c) $\frac{\bar{x}-\mu}{\sigma/n}$ d) $\frac{\bar{x}-\mu}{s/n}$

8) If a linear differential equation with constant coefficients and r.h.s. equal to zero has a real root m_1 repeated Two times, then the corresponding part of the integral is _____.

a) $(c_1 + c_2)e^{m_1 X}$ b) $(c_1 + c_2 x)e^{m_1 X}$

c) $(c_1 x + c_2 x^2)e^{m_1 X}$ d) $(c_1 + c_2 x^3)e^{m_1 X}$

9) $\frac{1}{D-a}X$ is equal to _____.

a) $\int Xe^{ax}dx$ b) $e^{ax}\int X.e^{-ax}dx$

c) $\int Xe^{-ax}dx$ d) $e^{-ax}\int Xe^{-ax}dx$

10) $\frac{1}{D+1}(\log x + \frac{1}{x})$ is equal to _____.

a) e^x b) 1

c) x d) $\log x$

11) The solution of $q = e^{-p}$ is _____.

a) $z = ax + by + c$ b) $z = a^x + b^y + c$

c) $z = ax + y^{-b} + c$ d) $z = ax + e^{-a}y + c$

12) The solution of the equation $pq = p + q$ is _____.

a) $z = ax + (a+1)y + c$

b) $z = (a+1)x + a(a-1)y + c$

c) $z = (a-1)x + a(a+1)y + c$

d) $z(a-1) = a(a-1)x + ay + c$

13) If μ_1', μ_2', μ_3', μ_4' are the first four moments of the distribution about certain number then fourth moment μ_4 of the distribution about the arithmetic mean is given by _____.

a) $\mu_4' + 4\mu_3'\mu_1' + 6\mu_2'(\mu_1')^4 + 3(\mu_1')^4$

b) $\mu_4' - 4\mu_3'\mu_1' + 6\mu_2'(\mu_1')^2 - 3(\mu_1')^4$

c) $\mu_4' + 4\mu_3'\mu_1' - 6\mu_2'(\mu_1')^4 - 3(\mu_1')^4$

d) $\mu_4' + 2\mu_3'\mu_1' + 6\mu_2'(\mu_1')^4 - 3(\mu_1')^4$

14) Coefficient of kurtosis β_2 is given by _____.

a) $\frac{\mu_4}{\mu_3}$ b) $\frac{\mu_4}{\mu_2^2}$

c) $\frac{\mu_3}{\mu_2^2}$ d) $\frac{\mu_4}{\mu_2^3}$

Section – I

Q.2 Attempt any Three. **09**

a) Find the Arithmetic mean, Median and standard deviation for the following frequency distribution.

x	5	9	12	15	20	24	30	35	42	49
f	3	6	8	8	9	10	8	7	6	2

b) Solve $(D^2 - 4D + 4)y = 8.x^2e^{2x}\sin 2x$

c) Solve $(D^2 + D + 1)y = \sin 2x$

d) Calculate Mode for the following frequency distribution.

C.I.	00-10	10-20	20-30	30-40	40-50	50-60	60-70
Frequency (f)	4	7	8	12	25	18	10

e) Solve $p^2q^3 = x^2y^3$

Q.3 Attempt any Three. **09**

a) Solve: $(2D + 1)^2y = 4e^{-x/2}$

b) Solve: $p + q = pqz$

c) Find Q_1, Q_2, Q_3 from the following data.
5,7,12,14,15,22,25,30,36,42,53

d) Solve $x(y - z)p + y(z - x)q = z(x - y)$

e) Solve $(D^3 - 3D + 2)y = x$

Q.4 Attempt any Two **10**

a) The first four moments of a distribution about the value 5 are 2,20,40 and 50. from the given information obtain the first four central moments, coefficient of skewness and kurtosis.

b) Solve the following differential equation by the method of separation of variables.
$\frac{\partial z}{\partial x} - 2\frac{\partial z}{\partial y} = z$ given that $z(x, 0) = 3e^{-5x}$

c) Solve: $(D^2 - D - 2)y = 2\log x + \frac{1}{x} + \frac{1}{x^2}$

Section – II

Q.5 Attempt any three of the following. **09**

a) Find the value of k if each of the following functions is a probability density function.

$$f(x) = \begin{cases} kx^2(1-x^3), & 0 \le x \le 1 \\ 0, & \text{otherwise} \end{cases}$$

b) The mean life time of 100 fluorescent light bulbs produced by a Company is computed to be 1570 Hrs. with S.D. of 120 Hrs. If μ is the mean lifetime of all the bulbs produced by the Company, Test the Hypothesis $\mu = 1600$ Hrs. Against the alternative Hypothesis $\mu \neq 1600$ Hrs. using 5% level of Significance.
(Given Expected value at 5% LOS is 1.96)

c) Calculate the coefficient of correlation between height of father and height of son from the following data.

Height of father	64	65	66	67	68	69	70
Height of son	66	67	65	68	70	68	71

d) Two independent random sample have the following data,
$\overline{x_1} = 110, \sigma_1 = 25, n_1 = 16$
$\overline{x_2} = 120, \sigma_2 = 30, n_2 = 9$
If σ_1 and σ_2 are the S. D. of the populations. Test the hypothesis that $\mu_1 = \mu_2$ at 5% level of significance. (The table value of t at $\alpha = 0.05$ for $v = 23$ degrees of freedom is 2.069)

e) If in a lot of 500 solenoids 25 are defective, find the probability that there will be 0, 1, 2 defective solenoids in a random sample of 20 solenoids.

Q.6 Attempt any three of the following. **09**

a) If two independent random samples of sizes 15 and 8 have respectively the following mean and population standard deviations, $\overline{x_1} = 980, \overline{x_2} = 1012; \sigma_1 = 75, \sigma_2 = 80$. Test the hypothesis that $\mu_1 = \mu_2$ at 5% level of significance.

3) Figures to the right indicates full marks.

MCQ/Objective Type Questions

Duration: 30 Minutes Marks:14

Q.1 Choose the correct Answer. **14**

1) If X, Y denotes the deviations from their means and if $\sum X^2 = 40, \sum Y^2 = 100, \sum XY = 50,$ then $r =$ _____.
a) 0.63 b) 0.82
c) 0.91 d) 0.79

2) The line of regression of x and y is given by _____.
a) $x - \bar{x} = b_{xy}(y - \bar{y})$ b) $x - \bar{y} = b_{xy}(x - \bar{x})$
c) $x - \bar{x} = b_{xx}(y - \bar{y})$ d) $x - \bar{x} = b_{yx}(y - \bar{y})$

3) The following mistakes per page were found in a book.

No. of mistakes:	0	1	2	3	4
Pages:	211	90	19	5	0

Then χ^2 is _____.
a) 0.59 b) 0.069
c) 0.81 d) 0.79

4) The 't-statistic' is defined as _____.
a) $\frac{\bar{x}-\mu}{\sigma/\sqrt{n}}$ b) $\frac{\bar{x}-\mu}{s/\sqrt{n}}$
c) $\frac{\bar{x}-\mu}{\sigma/n}$ d) $\frac{\bar{x}-\mu}{s/n}$

5) If a linear differential equation with constant coefficients and r.h.s. equal to zero has a real root m_1 repeated Two times, then the corresponding part of the integral is _____.
a) $(c_1 + c_2)e^{m_1 X}$ b) $(c_1 + c_2 x)e^{m_1 X}$
c) $(c_1 x + c_2 x^2)e^{m_1 X}$ d) $(c_1 + c_2 x^3)e^{m_1 X}$

6) $\frac{1}{D-a}X$ is equal to _____.

a) $\int Xe^{ax}dx$ b) $e^{ax}\int X.e^{-ax}dx$

c) $\int Xe^{-ax}dx$ d) $e^{-ax}\int Xe^{-ax}dx$

7) $\frac{1}{D+1}(\log x+\frac{1}{x})$ is equal to _____.

a) e^x b) 1

c) x d) $\log x$

8) The solution of $q=e^{-p}$ is _____.

a) $z=ax+by+c$ b) $z=a^x+b^y+c$

c) $z=ax+y^{-b}+c$ d) $z=ax+e^{-a}y+c$

9) The solution of the equation $pq=p+q$ is _____.

a) $z=ax+(a+1)y+c$

b) $z=(a+1)x+a(a-1)y+c$

c) $z=(a-1)x+a(a+1)y+c$

d) $z(a-1)=a(a-1)x+ay+c$

10) If μ_1', μ_2', μ_3', μ_4' are the first four moments of the distribution about certain number then fourth moment μ_4 of the distribution about the arithmetic mean is given by _____.

a) $\mu_4'+4\mu_3'\mu_1'+6\mu_2'(\mu_1')^4+3(\mu_1')^4$

b) $\mu_4'-4\mu_3'\mu_1'+6\mu_2'(\mu_1')^2-3(\mu_1')^4$

c) $\mu_4'+4\mu_3'\mu_1'-6\mu_2'(\mu_1')^4-3(\mu_1')^4$

d) $\mu_4'+2\mu_3'\mu_1'+6\mu_2'(\mu_1')^4-3(\mu_1')^4$

11) Coefficient of kurtosis β_2 is given by _____.

a) $\frac{\mu_4}{\mu_3}$ b) $\frac{\mu_4}{\mu_2^2}$

c) $\frac{\mu_3}{\mu_2^2}$ d) $\frac{\mu_4}{\mu_2^3}$

12) If value of x for normal distribution is 35, mean of normal distribution is 65 and standard deviation is 25 then standardized random variable is ___.

a) -1.5 b) -1.7

c) -1.2 d) -4

13) A continuous random variable has the following probability density function $f(x)=kx(1-x),0\le x\le 1$ then $k=$ _____.

a) 6 b) 2

c) 3 d) 5

14) The area under the standard normal curve from $z = -\infty$ to $z = 0$ is ___.

a) 1 b) ½

c) 3/2 d) 0

Set R

S. Y. (B.Tech.) (Sem-I) (New) (NEP CBCS) Examination: March/April-2025
ELECTRONICS & TELECOMMUNICATION ENGINEERING
Advanced Mathematics and Statistics (OE-01A)

Day & Date: Wednesday 21-05-2025 Max. Marks: 56
Time: 03:00 PM To 06:00 PM

Instructions: 1) All questions are compulsory.
2) Figures to the right indicate full marks.

Section – I

Q.2 Attempt any Three. **09**

a) Find the Arithmetic mean, Median and standard deviation for the following frequency distribution.

x	5	9	12	15	20	24	30	35	42	49
f	3	6	8	8	9	10	8	7	6	2

b) Solve $(D^2 - 4D + 4)y = 8.x^2e^{2x}\sin 2x$

c) Solve $(D^2 + D + 1)y = \sin 2x$

d) Calculate Mode for the following frequency distribution.

C.I.	00-10	10-20	20-30	30-40	40-50	50-60	60-70
Frequency (f)	4	7	8	12	25	18	10

e) Solve $p^2q^3 = x^2y^3$

Q.3 Attempt any Three. **09**

a) Solve: $(2D + 1)^2y = 4e^{-x/2}$

b) Solve: $p + q = pqz$

c) Find Q_1, Q_2, Q_3 from the following data.
5,7,12,14,15,22,25,30,36,42,53

d) Solve $x(y - z)p + y(z - x)q = z(x - y)$

e) Solve $(D^3 - 3D + 2)y = x$

Q.4 Attempt any Two **10**

a) The first four moments of a distribution about the value 5 are 2,20,40 and 50. from the given information obtain the first four central moments, coefficient of skewness and kurtosis.

b) Solve the following differential equation by the method of separation of variables.
$\frac{\partial z}{\partial x} - 2\frac{\partial z}{\partial y} = z$ given that $z(x, 0) = 3e^{-5x}$

c) Solve: $(D^2 - D - 2)y = 2\log x + \frac{1}{x} + \frac{1}{x^2}$

Section – II

Q.5 Attempt any three of the following. **09**

a) Find the value of k if each of the following functions is a probability density function.

$$f(x) = \begin{cases} kx^2(1-x^3), & 0 \le x \le 1 \\ 0, & \text{otherwise} \end{cases}$$

b) The mean life time of 100 fluorescent light bulbs produced by a Company is computed to be 1570 Hrs. with S.D. of 120 Hrs. If μ is the mean lifetime of all the bulbs produced by the Company, Test the Hypothesis $\mu = 1600$ Hrs. Against the alternative Hypothesis $\mu \neq 1600$ Hrs. using 5% level of Significance.
(Given Expected value at 5% LOS is 1.96)

c) Calculate the coefficient of correlation between height of father and height of son from the following data.

Height of father	64	65	66	67	68	69	70
Height of son	66	67	65	68	70	68	71

d) Two independent random sample have the following data,
$\overline{x_1} = 110, \sigma_1 = 25, n_1 = 16$
$\overline{x_2} = 120, \sigma_2 = 30, n_2 = 9$
If σ_1 and σ_2 are the S. D. of the populations. Test the hypothesis that $\mu_1 = \mu_2$ at 5% level of significance. (The table value of t at $\alpha = 0.05$ for $v = 23$ degrees of freedom is 2.069)

e) If in a lot of 500 solenoids 25 are defective, find the probability that there will be 0, 1, 2 defective solenoids in a random sample of 20 solenoids.

Q.6 Attempt any three of the following. **09**

a) If two independent random samples of sizes 15 and 8 have respectively the following mean and population standard deviations, $\overline{x_1} = 980, \overline{x_2} = 1012; \sigma_1 = 75, \sigma_2 = 80$. Test the hypothesis that $\mu_1 = \mu_2$ at 5% level of significance.
(Given Expected value at 5% LOS with 21 DF is 2.080)

b) The number of telephone calls received by an operator in a ten-minute interval follows a Poisson distribution with mean 1. What is the probability of receiving (i) no call, (ii) less than four calls, in the interval? What is the most likely number of calls?

c) Calculate the equations of the lines of regression. Given
Mean of $x = 50.07$, S.D. of $x = 5.26$
Mean of $y = 9.98$, S.D. of $y = 2.59$
$r = 0.898$

d) In an intelligence test administered to 1000 children the mean score was, 42 with s.d. 24. Find the number of children (i) scoring more than 60 and (ii) between 20 and 40 assuming the distribution to be normal.
(Given: For S.N.V. z area from z = 0 to z = 0.75 is 0.2734, that between z = 0 and z = 0.9167 is 0.3202 and that between z = 0 to z = 0.08333 is 0.0332.)

e) Fit a Straight line $y = a + bx$ to the following data.

x	0	1	2	3	4	5
y	1	2	3	4.5	6	7.5

Q.7 Attempt any Two. **10**

a) Fit a Poisson's distribution to the following data :

X	0	1	2	3	4	Total
f	112	63	20	4	1	200

b) Obtain a second-degree curve to the following data.

Year	1965	1966	1967	1968	1969	1970	1971	1972
Profit (in Corers Rs.)	125	140	165	195	200	215	220	230

Also estimate the profit in 1973.

c) Ten school boys were given a test in Statistics and their scores were recorded. They were given a month's special coaching and a second test was given to them in the same subject at the end of the coaching period. Test if the marks given below give evidence to the fact that the students are benefitted by coaching.
Marks in test I: 70, 68, 56, 75, 80, 90, 68, 75, 56, 58
Marks in Test II: 68, 70, 52, 73, 75, 78, 80, 92, 54, 55
(Given that value of t_α at 5 % LOS for v = 9 degrees of freedom is 1.86 for one tailed test)

Seat No.		Set	S

S. Y. (B.Tech.) (Sem-I) (New) (NEP CBCS) Examination: March/April-2025
ELECTRONICS & TELECOMMUNICATION ENGINEERING
Advanced Mathematics and Statistics (OE-01A)

Day & Date: Wednesday 21-05-2025 Max. Marks: 70
Time: 03:00 PM To 06:00 PM

Instructions: 1) Q. No. 1 is compulsory. It should be solved in the first 30 minutes in Answer Book Page no 03 (Starting page of the Answer Book). Each question carries one mark.
2) Don't forget to Mention question paper set (P/Q/R/S) on top of page.
3) Figures to the right indicates full marks.

MCQ/Objective Type Questions

Duration: 30 Minutes Marks:14

Q.1 Choose the correct Answer. **14**

1) If $\mu_1', \mu_2', \mu_3', \mu_4'$ are the first four moments of the distribution about certain number then fourth moment μ_4 of the distribution about the arithmetic mean is given by _____.

a) $\mu_4' + 4\mu_3'\mu_1' + 6\mu_2'(\mu_1')^4 + 3(\mu_1')^4$

b) $\mu_4' - 4\mu_3'\mu_1' + 6\mu_2'(\mu_1')^2 - 3(\mu_1')^4$

c) $\mu_4' + 4\mu_3'\mu_1' - 6\mu_2'(\mu_1')^4 - 3(\mu_1')^4$

d) $\mu_4' + 2\mu_3'\mu_1' + 6\mu_2'(\mu_1')^4 - 3(\mu_1')^4$

2) Coefficient of kurtosis β_2 is given by _____.

a) $\frac{\mu_4}{\mu_3}$ b) $\frac{\mu_4}{\mu_2^2}$

c) $\frac{\mu_3}{\mu_2^2}$ d) $\frac{\mu_4}{\mu_2^3}$

3) If value of x for normal distribution is 35, mean of normal distribution is 65 and standard deviation is 25 then standardized random variable is ___.

a) -1.5 b) -1.7
c) -1.2 d) -4

4) A continuous random variable has the following probability density function $f(x) = kx(1-x), 0 \leq x \leq 1$ then $k =$ _____.

a) 6 b) 2
c) 3 d) 5

5) The area under the standard normal curve from $z = -\infty$ to $z = 0$ is ___.

a) 1 b) ½
c) 3/2 d) 0

6) If X, Y denotes the deviations from their means and if $\sum X^2 = 40, \sum Y^2 = 100, \sum XY = 50,$ then $r =$ _____.

a) 0.63 b) 0.82
c) 0.91 d) 0.79

7) The line of regression of x and y is given by _____.

a) $x - \bar{x} = b_{xy}(y - \bar{y})$ b) $x - \bar{y} = b_{xy}(x - \bar{x})$
c) $x - \bar{x} = b_{xx}(y - \bar{y})$ d) $x - \bar{x} = b_{yx}(y - \bar{y})$

8) The following mistakes per page were found in a book.

No. of mistakes:	0	1	2	3	4
Pages:	211	90	19	5	0

Then χ^2 is _____.

a) 0.59 b) 0.069
c) 0.81 d) 0.79

9) The 't-statistic' is defined as _____.

a) $\frac{\bar{x}-\mu}{\sigma/\sqrt{n}}$ b) $\frac{\bar{x}-\mu}{s/\sqrt{n}}$
c) $\frac{\bar{x}-\mu}{\sigma/n}$ d) $\frac{\bar{x}-\mu}{s/n}$

10) If a linear differential equation with constant coefficients and r.h.s. equal to zero has a real root m_1 repeated Two times, then the corresponding part of the integral is _____.

a) $(c_1 + c_2)e^{m_1 X}$ b) $(c_1 + c_2 x)e^{m_1 X}$
c) $(c_1 x + c_2 x^2)e^{m_1 X}$ d) $(c_1 + c_2 x^3)e^{m_1 X}$

11) $\frac{1}{D-a}X$ is equal to _____.

a) $\int Xe^{ax}dx$ b) $e^{ax}\int X.e^{-ax}dx$
c) $\int Xe^{-ax}dx$ d) $e^{-ax}\int Xe^{-ax}dx$

12) $\frac{1}{D+1}(\log x + \frac{1}{x})$ is equal to _____.

a) e^x b) 1
c) x d) $\log x$

13) The solution of $q = e^{-p}$ is _____.

a) $z = ax + by + c$ b) $z = a^x + b^y + c$
c) $z = ax + y^{-b} + c$ d) $z = ax + e^{-a}y + c$

14) The solution of the equation $pq = p + q$ is _____.

a) $z = ax + (a+1)y + c$
b) $z = (a+1)x + a(a-1)y + c$
c) $z = (a-1)x + a(a+1)y + c$

d) $z(a-1) = a(a-1)x + ay + c$

MCQ/Objective Type Questions

Duration: 30 Minutes Marks:14

Q.1 Choose the correct Answer. **14**

1) Which dimension of e-commerce enables commerce beyond the boundaries of the country?
a) Richness b) Interactivity
c) Global Reach d) Ubiquity

2) Which of the following describes the definition of electronic commerce?
a) Doing business
b) Sale and purchase of goods
c) Doing business electronically
d) All of the above mentioned

3) Which e-commerce model involves the sale of goods or services from businesses to the general public?
a) Business to Government b) Business to Consumer
c) Business to Business d) Consumer to Business

4) All of the following are major B2C business models except _____.
a) content provider b) industry consortium
c) transaction broker d) service provider

5) Which of the following advantage of E-commerce?
a) Ability to operate 24/7
b) Inability to personalize the shopping
c) Higher operational cost
d) Limited reach CO1 I

6) Which e-commerce transaction provides the benefits of eliminating the requirement of a middleman?

a) Business to Business b) Business to Government
c) Consumer to Business d) Business to Consumer

7) After completing an E-Commerce transaction, the seller and buyer should be provided an opportunity to _____ their transaction experience.

a) undo b) regret
c) provide rating for d) forget

8) Which of the following is a common digital marketing strategy used in E-commerce?

a) Search Engine Optimization (SEO)
b) Traditional print advertising
c) Cold-calling potential customers
d) Distributing flyers in local neighborhoods

9) Digital Cash has following characteristic _____.

a) Anonymity b) Security
c) Confidentiality d) All above

10) Which component of E-commerce ensures secure online transactions and customer data protection?

a) Payment gateways b) Shopping carts
c) Product catalogs d) Data warehouses

11) Which type of attack is a method of defeating a cryptographic scheme of trying a large number of possibilities?

a) Teardrop attack b) Brute force attack
c) Phlashing d) Smurf attack

12) What is the another name called PDoS?

a) Brute force attack b) Non technical attack
c) Phlashing d) Smurf attack

13) What does the term “data security” refer to in E-commerce?

a) The use of cookies to track customer behavior
b) The protection of customer data from unauthorized access and breaches
c) The analysis of customer browsing history for personalized recommendations
d) The process of categorizing customer data for marketing purposes

14) Which of the following is a characteristic of E-commerce marketplaces?

a) They only allow B2C transactions
b) They sell physical products exclusively
c) They are limited to a specific geographical area
d) Multiple sellers can list their products to reach a broader audience

Time: 03:00 PM To 06:00 PM

Instructions: 1) All questions are compulsory.
2) Figures to the right indicate full marks.

Section – I

Q.2 Attempt any Three. **12**

a) Explain the interdisciplinary nature of disciplines under humanities and social sciences.
b) Write a short note on: Scope of humanities.
c) Explain how perceptual processes shape human behaviour.
d) Write a short note on: Different aspects of perception.
e) Write a short note on: Major philosophical movements and their impact.

Q.3 Attempt any Two. **16**

a) Explain the advantages and disadvantages of democracy.
b) Explain major theories of psychology.
c) Explain how different psychological aspects affect social communication.

Section – II

Q.4 Attempt any Three. **12**

a) Write a short note on: Social Institutions.
b) Explain different elements of culture and society.
c) Write a short note on: Contributions of ancient civilizations to modern society.
d) How did industrial revolution contribute to technical advancements?
e) Write a short note on: Ethics in Engineering.

Q.5 Attempt any Two. **16**

a) What is industrialization? Explain the social and economic consequences of industrialization.
b) Describe different economic theories and thinkers.
c) Explain the technological innovations in 18^{th} & 19^{th} century.

S.Y. (B.Tech.) (Sem-I) (New) (NEP CBCS) Examination: March/April-2025
ELECTRONICS & TELECOMMUNICATION ENGINEERING
Industrial and Quality Management (OE-01D)

Day & Date: Wednesday 21-05-2025 Max. Marks: 70
Time: 03:00 PM To 06:00 PM

Instructions: 1) Q. No. 1 is compulsory. It should be solved in the first 30 minutes in Answer Book Page no 03 (Starting page of the Answer Book). Each question carries one mark.
2) Don't forget to Mention question paper set (P/Q/R/S) on top of page.
3) Figures to the right indicates full marks.
4) Assume suitable data if necessary and mention it clearly.

MCQ/Objective Type Questions

Duration: 30 Minutes Marks:14

Q.1 Choose the correct Answer. **14**

1) _____ is defined as "the discipline dealing with what is good & bad & with moral duty & obligation".
a) Rule b) Organisation culture
c) Protocol d) Ethics

2) _____ involves establishing the amount of work to be done & the time when each element of the work will start.
a) Planning b) Routing
c) Scheduling d) Organizing

3) In _____ concept product enjoys the supreme importance.
a) Selling b) Marketing
c) Manufacturing d) Business

4) _____ are the greatest importance at the supervisory level.
a) Supervisory skills b) Human relation skills
c) Technical skills d) Planning skills

5) The responsibilities of the operations manager include _____.
a) Planning , organizing , staffing , procuring , and reviewing
b) Forecasting , designing , planning , organizing , and controlling
c) Forecasting , designing , operating , procuring , and reviewing
d) Planning , organizing , staffing , leading , and controlling
e) Designing & operating

6) Self-esteem, status affiliation with others, affection those come under _____ needs.
a) Basic b) Primary
c) Third level of d) Secondary

7) _____ is ability of individual or group to induce or influence the beliefs or action of other person or group.

a) Power b) Authority
c) Post d) Leadership

8) The basic objective of quality control in any organization is to _____.

a) Quality development, quality maintenance and quality improvement activities in organization
b) Achieve optimum cost
c) Achieve customer's satisfaction
d) Achieve all the above

9) Cost associated with defective products being shipped to the customers are called as _____.

a) Cost of internal failure b) Total cost of failure
c) Rejection cost d) Cost of external failure

10) For identification of vital few for the given data, the tool used is _____.

a) Cause-Effect diagram b) Scatter diagram
c) Pareto Analysis d) Check Sheet

11) Total quality management (TQM) mainly aims for _____.

a) Control for quality b) Usefulness of product
c) Customer satisfaction d) Cost control

12) The statistician who invented the control chart for use in industrial quality control was: _____.

a) Deming b) Taguchi
c) Pareto d) Shewhart
e) None of the above

13) The method of accepting or rejecting the lot is known as _____.

a) Lot sampling b) Acceptance sampling
c) Batch sampling d) Quality control

14) In double sampling plan, second sample is taken when the number of defectives _____.

a) > C1 but < C2 b) > C1
c) > C1 and C2 d) < C2

MCQ/Objective Type Questions

Duration: 30 Minutes Marks:14

Q.1 Choose the correct Answer. **14**

1) Laplace transform of $\int_0^t u^3 du =$_____.

a) $\frac{3}{s^5}$ b) $\frac{6}{s^5}$

c) $\frac{1}{s^5}$ d) $\frac{6}{s^4}$

2) If $L\{f(t)\} = \emptyset(s)$, then $L\{f(at)\} =$ _____.

a) $\emptyset\left(\frac{s}{a}\right)$ b) $\frac{1}{s}\emptyset\left(\frac{s}{a}\right)$

c) $\emptyset'\left(\frac{s}{a}\right)$ d) $\frac{1}{a}\emptyset\left(\frac{s}{a}\right)$

3) $L^{-1}\left\{\frac{1}{s^2+3^2}\right\} =$_____.

a) $\frac{1}{3}\sin 3t$ b) $\frac{1}{3}\cos 3t$

c) $\frac{1}{3}\cosh 3t$ d) $\frac{1}{3}\sinh 3t$

4) For $\frac{d^2y}{dx^2} + 4\frac{dy}{dx} + 3y = 3e^{2x}$, the particular integral is _____.

a) $\frac{1}{15}e^{2x}$ b) $3e^{2x}$

c) $\frac{1}{5}e^{2x}$ d) $C_1e^{-x} + C_2e^{-2x}$

5) The general solution of the equation $(D^3 - 7D - 6)y = 0$ is _____.

a) $y = c_1e^{-x} + c_2e^{2x} + c_3e^{-3x}$

b) $y = c_1e^{-x} + c_2e^{2x} + c_3e^{3x}$

c) $y = c_1e^{-x} + c_2e^{-2x} + c_3e^{-3x}$

d) None of these

6) $z\{k\} =$_____ for $|z| > 1$

a) $\frac{z}{z-1}$ b) $\frac{1}{(z-1)^2}$

c) $\frac{z}{(z-1)^2}$ d) $\frac{z}{(z+1)^2}$

7) If $z\{f(k)\} = F(z)$, then $z\{a^k f(k)\} =$ _____.

a) $f\left(\frac{a}{z}\right)$ b) $f\left(\frac{z}{a}\right)$

c) $\frac{1}{a}f\left(\frac{z}{a}\right)$ d) None

8) $Z\left\{\frac{1}{k!}\right\} =?$ for $k \geq 0$

a) e^z b) $e^{\frac{1}{z}}$

c) $\frac{1}{z}$ d) $\frac{1}{1-z}$

9) The Fourier sine transform of $f(x)$ is given by _____.

a) $\sqrt{\frac{2}{\pi}}\int_{-\infty}^{\infty} f(x)\sin sx\, dx$ b) $\int_{-\infty}^{\infty} f(x)\cos sx\, dx$

c) $\sqrt{\frac{2}{\pi}}\int_{0}^{\infty} f(x)\sin sx\, dx$ d) $\sqrt{\frac{\pi}{2}}\int_{0}^{\infty} f(x)\sin sx\, dx$

10) From the result $\int_{-\infty}^{\infty} \frac{\cos sx.\sin sk}{s} ds = \begin{cases} \pi & , \ |x| < k \\ 0 & , \ |x| > k \end{cases}$ we can deduce that $\int_0^{\infty} \frac{\sin sk}{s}\, ds =$ _____.

a) 0 b) 1

c) π d) $\frac{\pi}{2}$

11) The first real positive root of $x^3 = 6x - 4$ by Newton Raphson method near $x_0 = 1$ is _____.

a) 0.6667 b) 0.6

c) 0.4 d) 0.3

12) How many steps does the fourth-order Runge-Kutta method use?

a) Two steps b) Five steps

c) Four steps d) Three steps

13) In the interval $(0, a)$ the constant term in the Fourier series of $f(x) = \frac{a}{2} - x$ is _____.

a) 0 b) 1

c) $\frac{a^2}{2\pi}$ d) $\frac{a^2}{4\pi}$

14) Fourier series of $f(x) = x\ in(-\pi, \pi)$ will contain ____

a) No sine term b) No cosine term

c) Both cosine and sine term d) None of these

Time: 03:00 PM To 06:00 PM

Instructions: 1) All questions are compulsory.
2) Figures to the right indicate full marks.
3) Use of non-programmable calculator is allowed.

Section – I

Q.2 Attempt any three **09**

a) Solve : $(D^2 + 4D + 5)y = -2\cos hx + 2^x$

b) Solve $(D^2 + 2D + 1)y = x\cos x$

c) Find Z-transform of $x_k = 2^k \cos(3k + 2)\,, k \geq 0$

d) Find Z-transform of $x_k = k^2 e^{-ak}, k \geq 0$

e) Find the inverse Laplace transform of following by using the Convolution theorem of $\left[\frac{1}{s(s^2+4)}\right]$

Q.3 Attempt any three of the following. **09**

a) Evaluate by using Laplace transform $\int_0^\infty \left(\frac{e^{-t}-e^{-3t}}{t}\right) dt$

b) Find the inverse Z-transform of $f(k) = \begin{cases} 4^k, & k < 0 \\ 3^k, & k \geq 0 \end{cases}$

c) Find $Z\{e^{-3k}\sin 2k\}, k \geq 0$

d) Solve $(D^2 - 1)y = (1 + e^{-x})^2$

e) Find Laplace Transform of $\{t\cos 2t\}$

Q.4 Attempt any two **10**

a) Find the inverse Z-transform of $\frac{1}{(z-a)^2}$ if

1) $|z| < a$,
2) $|z| > a$,

b) Find the inverse Laplace transform of following by using the Convolution theorem of $\left[\frac{s^2}{(s^2+a^2)(s^2+b^2)}\right]$

c) Solve $(D^2 - 6D + 13)y = e^{x\log 2} + 8e^{3x}\sin 4x$

Section – II

Q.5 Attempt any three **09**

a) Evaluate $\int_0^5 \frac{1}{4x+5} dx$ using $n = 5$ by Trapezoidal rule.

b) Evaluate $I = \int_0^2 e^{-x} dx$ by using the Simpson's 1/3rd rule given h= 0.5

c) Obtain half range cosine series $f(x) = x$ in $0 < x < 1$

d) Find the Fourier series expansion of $f(x) = x^2$ in $(-\pi, \pi)$

e) Find the Fourier transform of $f(x) = \begin{cases} \frac{1}{2\epsilon}, & |x| \leq \epsilon \\ 0, & |x| > \epsilon \end{cases}$

Q.6 Attempt any three **09**

a) Find f(x) if its Fourier sine transform e^{-as}

b) Find the Fourier cosine transform of

$f(x)$, if $f(x) = \begin{cases} 1, & 0 \leq x < 1 \\ 0, & x \geq 1 \end{cases}$

c) Find the Fourier series expansion of $f(x) = x$ in $(-\pi, \pi)$

d) Solve by Newton Raphson method $x^4 - x = 10$ correct to four decimal places. (perform two iterations only)

e) Find $\int_0^6 \frac{1}{1+x^2} dx\ n = 6$ using Simpson's 3/8th rule.

Q.7 Attempt any two. **10**

a) Find $\int_1^8 \frac{1}{1+x} dx\ h = 1$ by using Trapezoidal rule and Simpson's 1/3rd rule.

b) Find Fourier transform of

$f(x) = 1\ |x| < k$

$= 0\ |x| > k$ and

Hence evaluate i) $\int_{-\infty}^{\infty} \frac{\sin sk . \cos sk}{s} ds$ ii) $\int_{-\infty}^{\infty} \frac{sin\ ks}{s} ds$

c) Find the Fourier series expansion of the function $f(x) = e^{-\alpha x}$ in $(0, 2\pi)$

Set **Q**

S.Y. (B. Tech) (Sem-I) (New) (NEP CBCS) Examination: March/April-2025
ELECTRONICS & TELECOMMUNICATION ENGINEERING
Mathematics for Software and Hardware (OE-01E)

Day & Date: Wednesday 21-05-2025 Max. Marks: 70
Time: 03:00 PM To 06:00 PM

Instructions: 1) Q. No. 1 is compulsory. It should be solved in the first 30 minutes in Answer Book Page no 03 (Starting page of the Answer Book). Each question carries one mark.
2) Don't forget to Mention question paper set (P/Q/R/S) on top of page.
3) Figures to the right indicates full marks.
4) Use of non-programmable calculator is allowed.

MCQ/Objective Type Questions

Duration: 30 Minutes Marks:14

Q.1 Choose the correct Answer. **14**

1) $Z\left\{\frac{1}{k!}\right\} = ?$ for $k \geq 0$

a) e^z b) $e^{\frac{1}{z}}$

c) $\frac{1}{z}$ d) $\frac{1}{1-z}$

2) The Fourier sine transform of $f(x)$ is given by _____.

a) $\sqrt{\frac{2}{\pi}}\int_{-\infty}^{\infty} f(x)\sin sx\, dx$ b) $\int_{-\infty}^{\infty} f(x)\cos sx\, dx$

c) $\sqrt{\frac{2}{\pi}}\int_{0}^{\infty} f(x)\sin sx\, dx$ d) $\sqrt{\frac{\pi}{2}}\int_{0}^{\infty} f(x)\sin sx\, dx$

3) From the result $\int_{-\infty}^{\infty}\frac{\cos sx.\sin sk}{s}ds = \begin{cases}\pi & , \ |x| < k \\ 0 & , \ |x| > k\end{cases}$ we can deduce that $\int_0^{\infty}\frac{\sin sk}{s}\, ds =$ _____.

a) 0 b) 1

c) π d) $\frac{\pi}{2}$

4) The first real positive root of $x^3 = 6x - 4$ by Newton Raphson method near $x_0 = 1$ is _____.

a) 0.6667 b) 0.6

c) 0.4 d) 0.3

5) How many steps does the fourth-order Runge-Kutta method use?

a) Two steps b) Five steps

c) Four steps d) Three steps

6) In the interval $(0, a)$ the constant term in the Fourier series of $f(x) = \frac{a}{2} - x$ is _____.

a) 0 b) 1

c) $\frac{a^2}{2\pi}$ d) $\frac{a^2}{4\pi}$

7) Fourier series of $f(x) = x\ in(-\pi, \pi)$ will contain _____

a) No sine term b) No cosine term

c) Both cosine and sine term d) None of these

8) Laplace transform of $\int_0^t u^3 du =$_____.

a) $\frac{3}{s^5}$ b) $\frac{6}{s^5}$

c) $\frac{1}{s^5}$ d) $\frac{6}{s^4}$

9) If $L\{f(t)\} = \emptyset(s)$, then $L\{f(at)\} =$ _____.

a) $\emptyset\left(\frac{s}{a}\right)$ b) $\frac{1}{s}\emptyset\left(\frac{s}{a}\right)$

c) $\emptyset'\left(\frac{s}{a}\right)$ d) $\frac{1}{a}\emptyset\left(\frac{s}{a}\right)$

10) $L^{-1}\left\{\frac{1}{s^2+3^2}\right\} =$_____.

a) $\frac{1}{3}\sin 3t$ b) $\frac{1}{3}\cos 3t$

c) $\frac{1}{3}\cosh 3t$ d) $\frac{1}{3}\sinh 3t$

11) For $\frac{d^2y}{dx^2} + 4\frac{dy}{dx} + 3y = 3e^{2x}$, the particular integral is _____.

a) $\frac{1}{15}e^{2x}$ b) $3e^{2x}$

c) $\frac{1}{5}e^{2x}$ d) $C_1e^{-x} + C_2e^{-2x}$

12) The general solution of the equation $(D^3 - 7D - 6)y = 0$ is _____.

a) $y = c_1e^{-x} + c_2e^{2x} + c_3e^{-3x}$

b) $y = c_1e^{-x} + c_2e^{2x} + c_3e^{3x}$

c) $y = c_1e^{-x} + c_2e^{-2x} + c_3e^{-3x}$

d) None of these

13) $z\{k\} =$_____ for $|z| > 1$

a) $\frac{z}{z-1}$ b) $\frac{1}{(z-1)^2}$

c) $\frac{z}{(z-1)^2}$ d) $\frac{z}{(z+1)^2}$

14) If $z\{f(k)\} = F(z)$, then $z\{a^k f(k)\} =$ _____.

a) $f\left(\frac{a}{z}\right)$ b) $f\left(\frac{z}{a}\right)$

c) $\frac{1}{a} f\left(\frac{z}{a}\right)$ d) None

d) Find Z-transform of $x_k = k^2 e^{-ak}, k \geq 0$

e) Find the inverse Laplace transform of following by using the Convolution theorem of $\left[\frac{1}{s(s^2+4)}\right]$

Q.3 Attempt any three of the following. **09**

a) Evaluate by using Laplace transform $\int_0^\infty \left(\frac{e^{-t}-e^{-3t}}{t}\right) dt$

b) Find the inverse Z-transform of $f(k) = \begin{cases} 4^k, & k < 0 \\ 3^k, & k \geq 0 \end{cases}$

c) Find $Z\{e^{-3k}\sin 2k\}, k \geq 0$

d) Solve $(D^2 - 1)y = (1 + e^{-x})^2$

e) Find Laplace Transform of $\{t\cos 2t\}$

Q.4 Attempt any two **10**

a) Find the inverse Z-transform of $\frac{1}{(z-a)^2}$ if

1) $|z| < a$,
2) $|z| > a$,

b) Find the inverse Laplace transform of following by using the Convolution theorem of $\left[\frac{s^2}{(s^2+a^2)(s^2+b^2)}\right]$

c) Solve $(D^2 - 6D + 13)y = e^{x\log 2} + 8e^{3x}\sin 4x$

Section – II

Q.5 Attempt any three **09**

a) Evaluate $\int_0^5 \frac{1}{4x+5} dx$ using $n = 5$ by Trapezoidal rule.

b) Evaluate $I = \int_0^2 e^{-x} dx$ by using the Simpson's 1/3rd rule given h= 0.5

c) Obtain half range cosine series $f(x) = x$ in $0 < x < 1$

d) Find the Fourier series expansion of $f(x) = x^2$ in $(-\pi, \pi)$

e) Find the Fourier transform of $f(x) = \begin{cases} \frac{1}{2\epsilon}, & |x| \leq \epsilon \\ 0, & |x| > \epsilon \end{cases}$

Q.6 Attempt any three **09**

a) Find f(x) if its Fourier sine transform e^{-as}

b) Find the Fourier cosine transform of

$f(x)$, if $f(x) = \begin{cases} 1, & 0 \leq x < 1 \\ 0, & x \geq 1 \end{cases}$

c) Find the Fourier series expansion of $f(x) = x$ in $(-\pi, \pi)$

d) Solve by Newton Raphson method $x^4 - x = 10$ correct to four decimal places. (perform two iterations only)

e) Find $\int_0^6 \frac{1}{1+x^2} dx \; n = 6$ using Simpson's 3/8th rule.

Q.7 Attempt any two. **10**

a) Find $\int_1^8 \frac{1}{1+x} dx \; h = 1$ by using Trapezoidal rule and Simpson's 1/3rd rule.

b) Find Fourier transform of

$f(x) = 1 \; |x| < k$

$= 0 \; |x| > k$ and

Hence evaluate i) $\int_{-\infty}^{\infty} \frac{\sin sk . \cos sk}{s} ds$ ii) $\int_{-\infty}^{\infty} \frac{\sin ks}{s} ds$

c) Find the Fourier series expansion of the function $f(x) = e^{-\alpha x}$ in $(0, 2\pi)$

S. Y. (B.Tech.) (Sem-I) (New) (NEP CBCS) Examination: March/April-2025
ELECTRONICS & TELECOMMUNICATION ENGINEERING
Soft Skills and Personality Development (OE-01F)

Day & Date: Wednesday 21-05-2025 Max. Marks: 70
Time: 03:00 PM To 06:00 PM

Instructions: 1) Q. No. 1 is compulsory. It should be solved in the first 30 minutes in Answer Book Page no 03 (Starting page of the Answer Book). Each question carries one mark.
2) Don't forget to Mention question paper set (P/Q/R/S) on top of page.
3) Figures to the right indicates full marks.

MCQ/Objective Type Questions

Duration: 30 Minutes Marks:14

Q.1 Choose the correct Answer. **14**

1) What is feedback in communication?
a) The process of encoding a message.
b) The process of transmitting the message.
c) The response or reaction to a message.
d) The process of decoding a message.

2) In the process of communication 'Encoding' means _____.
a) Using symbol to express an idea
b) Deciphering the message
c) Creating noise in the communication
d) Interpreting the meaning of message

3) Empathy refers to: _____.
a) Capacity to understand or feel what another person feels
b) Having better understanding of partner's emotions
c) The higher the likelihood of self harm
d) Getting what one wants out of the relationship

4) Repots, suggestions, appeals grievances etc. are examples of: _____.
a) Down ward communication
b) Upward communication
c) Horizontal communication
d) Informal communication

5) Informal communication is commonly known as: _____.
a) Down ward communication b) Upward communication
c) Horizontal communication d) Grapevine

6) _____ is not a communication barrier?
a) Language b) Culture
c) Habits d) Physical

7) Which of the following is NOT a component of communication?
a) Sender b) Message
c) Receiver d) Translator

8) Emotional Intelligence primarily refers to the ability to: _____.
a) Understand and manage one's own emotions and the emotions of others
b) Solve mathematical problems
c) Memorize large amounts of information
d) Make logical decisions without emotions

9) Time management can help reduce stress by: _____
a) Creating unnecessary pressure
b) Organizing tasks and prioritizing effectively
c) Avoiding responsibilities altogether
d) Increasing the workload

10) The term “self-regulation” in Emotional Intelligence means: _____.
a) Hiding your emotions from others
b) Controlling impulsive behaviours and adapting to changing circumstances
c) Ignoring your emotional responses
d) Following strict rules without considering emotions

11) What is the primary purpose of a job interview?
a) To test the candidate's academic knowledge
b) To compare the candidate's qualifications with others
c) To discuss salary expectations only
d) To assess the candidate’s suitability for the job role

12) What kind of information will you collect before going to an interview?
a) About the job you are applying for
b) About the company
c) About the work culture
d) All of the above

13) Which of the following is an effective stress management technique?
a) Procrastination
b) Deep breathing and relaxation exercises
c) Avoiding physical activity
d) Excessive multitasking

14) Which of the following is an important step to prepare for an interview?
a) Memorizing answers word for word
b) Arriving late to showcase confidence
c) Avoiding practice to appear natural
d) Researching the company and role

Time: 03:00 PM To 06:00 PM

Instructions: 1) All questions are compulsory.
2) Figures to the right indicate full marks.

Section – I

Q.2 Attempt any Two. **12**

a) Define human communication and explain importance of communication.
b) Explain in brief:
1) Personal Barrier
2) Social Barrier
c) Enlighten in a brief strategy to improve emotional intelligence.

Q.3 Attempt any Four. **16**

a) Explain importance of emotional intelligence.
b) State advantages and disadvantages of informal communication.
c) Describe different modes of communication.
d) Highlight role of social awareness as key factor of emotional intelligence.
e) Explain relationship management as key factor of emotional intelligence.

Section – II

Q.4 Attempt any Two. **12**

a) What is interview? Explain various steps in the process of interview.
b) Explain importance of time management.
c) Explain the four P's of effective presentation.

Q.5 Attempt any Four. **16**

a) Explain importance of stress management.
b) Explain various types of interviews.
c) Describe various strategies for effective time management.
d) Explain various strategies of stress management.
e) Write short note on: Non- verbal aspects of presentation.

S. Y. (B.Tech.) (Sem-I) (New) (NEP CBCS) Examination: March/April-2025
ELECTRONICS & TELECOMMUNICATION ENGINEERING
Design Thinking: Business Innovation Framework (CIVMDM-01A)

Day & Date: Thursday 22-05-2025 Max. Marks: 70
Time: 03:00 PM To 06:00 PM

Instructions: 1) Q. No. 1 is compulsory. It should be solved in the first 30 minutes in Answer Book Page no. 03 (Starting page of the Answer Book). Each question carries one mark.
2) Don't forget to mention question paper set (P/Q/R/S) on top of page.
3) Figures to the right indicates full marks.

MCQ/Objective Type Questions

Duration: 30 Minutes Marks:14

Q.1 Choose the correct Answer. **14**

1) What is the primary focus of Design Thinking?
a) Maximizing shareholder
b) Developing innovative and user-centered solutions
c) Streamlining manufacturing processes
d) Enhancing employee productivity

2) Which of the following correctly lists the first three phases of the Design Thinking process?
a) Empathize, Ideate, Prototype
b) Define, Ideate, Test
c) Empathize, Define, Ideate
d) Prototype, Test, Implement

3) In the context of Design Thinking, what is "brainstorming" used for?
a) Generating a wide range of ideas
b) Testing final products
c) Developing financial models
d) Identifying user pain points

4) What does a "customer journey map" help to visualize?
a) The financial cost of product development
b) The steps a customer goes through while interacting with a product or service
c) The design specifications of a product
d) The competitive landscape of a market

5) Which tool in Design Thinking helps in understanding the target user's needs and behaviors?
a) Prototype b) Persona
c) SWOT analysis d) Business model canvas

6) What is the final phase in the Design Thinking process?
a) Test b) Implement
c) Prototype d) Ideate

7) Which of the following is NOT an objective of design thinking?
a) To create user-friendly products
b) To streamline manufacturing processes
c) To encourage iterative prototyping
d) To enhance collaboration among teams

8) Which of the following is a benefit of using design thinking?
a) Reduces product variety b) Increases customer satisfaction
c) Limits team collaboration d) Eliminates risk in decision-making

9) What role does technology play in innovation management?
a) It complicates processes
b) It is irrelevant to innovation
c) It serves as a tool for enhancing efficiency and creativity
d) It replaces human input

10) Which leadership style involves making decisions based on input from team members?
a) Autocratic b) Laissez-faire
c) Democratic d) Transactional

11) What does "Product Solution Fit" refer to?
a) The alignment of the product with customer needs and problems
b) The product's price in relation to competitors
c) The marketing strategy for the product
d) The technical specifications of the product

12) Which of the following best defines "Product Market Fit"?
a) The degree to which a product meets the demands of a specific market
b) The number of products available in the market
c) The financial performance of a product
d) The product's popularity on social media

13) What is the primary goal of service design?
a) To reduce costs
b) To enhance customer experience
c) To standardize services
d) To simplify service offerings

14) Which of the following is a key principle of service design?
a) Focus on profitability over customer satisfaction
b) User-centered design
c) Minimal feedback from users
d) Rigid service processes

Set **P**

S. Y. (B.Tech.) (Sem-I) (New) (NEP CBCS) Examination: March/April-2025
ELECTRONICS & TELECOMMUNICATION ENGINEERING
Design Thinking: Business Innovation Framework (CIVMDM-01A)

Day & Date: Thursday 22-05-2025 Max. Marks: 56
Time: 03:00 PM To 06:00 PM

Instructions: 1) All questions are compulsory.
2) Figures to the right indicate full marks.

Section – I

Q.2 **a)** Describe each phase of the Design Thinking process in detail, explaining how they contribute to the overall methodology. **06**

b) Provide a comprehensive definition of Design Thinking, including its essential characteristics and principles. **04**

Q.3 **Attempt any three.** **18**

a) Discuss the role of creativity and innovation in organizations and their impact on business performance.

b) What is the importance of empathy in Design Thinking?

c) Define leadership and explain its different types. How can effective leadership influence the success of an organization? Provide examples.

d) Explain the utilization of cognitive technology in decision-making processes.

e) Explain exemplary practices of effective leadership with relevant case studies.

Section – II

Q.4 **a)** Explain exemplary practices of effective leadership with relevant case studies. **06**

b) What is product solution fit, and how does it differ from product market fit? **04**

Q.5 **Attempt any three.** **18**

a) Define the development lifecycle and explain its significance in product development.

b) What are the benefits of implementing service design in organizations?

c) How can organizations effectively design a service to meet customer needs?

d) How does Intellectual Property (IP) play a role in product development and design thinking?

e) Explain any two successful case studies demonstrating design thinking in various engineering sectors.

a) The alignment of the product with customer needs and problems
b) The product's price in relation to competitors
c) The marketing strategy for the product
d) The technical specifications of the product

5) Which of the following best defines "Product Market Fit"?
a) The degree to which a product meets the demands of a specific market
b) The number of products available in the market
c) The financial performance of a product
d) The product's popularity on social media

6) What is the primary goal of service design?
a) To reduce costs
b) To enhance customer experience
c) To standardize services
d) To simplify service offerings

7) Which of the following is a key principle of service design?
a) Focus on profitability over customer satisfaction
b) User-centered design
c) Minimal feedback from users
d) Rigid service processes

8) What is the primary focus of Design Thinking?
a) Maximizing shareholder
b) Developing innovative and user-centered solutions
c) Streamlining manufacturing processes
d) Enhancing employee productivity

9) Which of the following correctly lists the first three phases of the Design Thinking process?
a) Empathize, Ideate, Prototype
b) Define, Ideate, Test
c) Empathize, Define, Ideate
d) Prototype, Test, Implement

10) In the context of Design Thinking, what is "brainstorming" used for?
a) Generating a wide range of ideas
b) Testing final products
c) Developing financial models
d) Identifying user pain points

11) What does a "customer journey map" help to visualize?
a) The financial cost of product development
b) The steps a customer goes through while interacting with a product or service
c) The design specifications of a product
d) The competitive landscape of a market

12) Which tool in Design Thinking helps in understanding the target user's needs and behaviors?
a) Prototype
b) Persona
c) SWOT analysis
d) Business model canvas

13) What is the final phase in the Design Thinking process?
a) Test
b) Implement
c) Prototype
d) Ideate

14) Which of the following is NOT an objective of design thinking?

a) To create user-friendly products
b) To streamline manufacturing processes
c) To encourage iterative prototyping
d) To enhance collaboration among teams

S. Y. (B.Tech.) (Sem-I) (New) (NEP CBCS) Examination: March/April-2025
ELECTRONICS & TELECOMMUNICATION ENGINEERING
Design Thinking: Business Innovation Framework (CIVMDM-01A)

Day & Date: Thursday 22-05-2025 Max. Marks: 56
Time: 03:00 PM To 06:00 PM

Instructions: 1) All questions are compulsory.
2) Figures to the right indicate full marks.

Section – I

Q.2 **a)** Describe each phase of the Design Thinking process in detail, explaining how they contribute to the overall methodology. **06**

b) Provide a comprehensive definition of Design Thinking, including its essential characteristics and principles. **04**

Q.3 **Attempt any three.** **18**

a) Discuss the role of creativity and innovation in organizations and their impact on business performance.

b) What is the importance of empathy in Design Thinking?

c) Define leadership and explain its different types. How can effective leadership influence the success of an organization? Provide examples.

d) Explain the utilization of cognitive technology in decision-making processes.

e) Explain exemplary practices of effective leadership with relevant case studies.

Section – II

Q.4 **a)** Explain exemplary practices of effective leadership with relevant case studies. **06**

b) What is product solution fit, and how does it differ from product market fit? **04**

Q.5 **Attempt any three.** **18**

a) Define the development lifecycle and explain its significance in product development.

b) What are the benefits of implementing service design in organizations?

c) How can organizations effectively design a service to meet customer needs?

d) How does Intellectual Property (IP) play a role in product development and design thinking?

e) Explain any two successful case studies demonstrating design thinking in various engineering sectors.

S. Y. (B.Tech.) (Sem-I) (New) (NEP CBCS) Examination: March/April-2025
ELECTRONICS & TELECOMMUNICATION ENGINEERING
Design Thinking: Business Innovation Framework (CIVMDM-01A)

Day & Date: Thursday 22-05-2025 Max. Marks: 70
Time: 03:00 PM To 06:00 PM

Instructions: 1) Q. No. 1 is compulsory. It should be solved in the first 30 minutes in Answer Book Page no. 03 (Starting page of the Answer Book). Each question carries one mark.
2) Don't forget to mention question paper set (P/Q/R/S) on top of page.
3) Figures to the right indicates full marks.

MCQ/Objective Type Questions

Duration: 30 Minutes Marks:14

Q.1 Choose the correct Answer. 14

1) What does "Product Solution Fit" refer to?
a) The alignment of the product with customer needs and problems
b) The product's price in relation to competitors
c) The marketing strategy for the product
d) The technical specifications of the product

2) Which of the following best defines "Product Market Fit"?
a) The degree to which a product meets the demands of a specific market
b) The number of products available in the market
c) The financial performance of a product
d) The product's popularity on social media

3) What is the primary goal of service design?
a) To reduce costs
b) To enhance customer experience
c) To standardize services
d) To simplify service offerings

4) Which of the following is a key principle of service design?
a) Focus on profitability over customer satisfaction
b) User-centered design
c) Minimal feedback from users
d) Rigid service processes

5) What is the primary focus of Design Thinking?
a) Maximizing shareholder
b) Developing innovative and user-centered solutions
c) Streamlining manufacturing processes
d) Enhancing employee productivity

6) Which of the following correctly lists the first three phases of the Design Thinking process?
a) Empathize, Ideate, Prototype
b) Define, Ideate, Test

10) What is the final phase in the Design Thinking process?
a) Test b) Implement
c) Prototype d) Ideate

11) Which of the following is NOT an objective of design thinking?
a) To create user-friendly products
b) To streamline manufacturing processes
c) To encourage iterative prototyping
d) To enhance collaboration among teams

12) Which of the following is a benefit of using design thinking?
a) Reduces product variety b) Increases customer satisfaction
c) Limits team collaboration d) Eliminates risk in decision-making

13) What role does technology play in innovation management?
a) It complicates processes
b) It is irrelevant to innovation
c) It serves as a tool for enhancing efficiency and creativity
d) It replaces human input

14) Which leadership style involves making decisions based on input from team members?
a) Autocratic b) Laissez-faire
c) Democratic d) Transactional

MCQ/Objective Type Questions

Duration: 30 Minutes Marks:14

Q.1 Choose the correct alternative from the given options. 14

1) What does GIS integrate spatial data with?
a) Other data resources b) Only tabular data
c) Only hard copy maps d) Only digital maps

2) What is the purpose of GIS software?
a) Data management and analysis
b) Creating physical maps
c) Collecting data only
d) Storing non-spatial data

3) Which of the following is a key function of an information system?
a) Data storage only
b) Data collection and processing
c) Document shredding
d) Manual calculations

4) Statistical data in GIS is primarily used for _____.
a) Data visualization b) Data analysis and interpretation
c) Data storage d) Data collection

5) Satellite data is most commonly used in GIS for _____.
a) Remote sensing b) Data entry
c) Statistical analysis d) Map digitization

6) A zone with a width created around a spatial feature is called as ____.
a) dissolve b) buffer
c) relation d) overlay

7) Network databases is to support relationships of _____.
a) many to many
b) one to many
c) none of above
d) all of above

8) The sensitivity of a sensor to detect slight differences in energy (brightness) is _____.
a) Spectral resolution
b) Spatial resolution
c) Temporal resolution
d) Radiometric resolution

9) Descriptive information provides qualitative data about the characteristics and conditions of Earth's surface features _____.
a) qualitative
b) quantitative
c) both
d) none

10) The instruments which provide electromagnetic radiation of specified wave length or a band of wave lengths to illuminate the earth surface, are called _____.
a) scanner
b) passive sensors
c) active sensors
d) none of these

11) Canal site selection using GIS is primarily concerned with _____.
a) Mapping the soil composition along the canal route
b) Studying land use in the surrounding areas
c) Identifying areas with the most water flow potential
d) Both a and c

12) What is the primary application of GIS in map revision?
a) To create new maps from scratch
b) To update and modify existing maps with current data
c) To design and print physical maps
d) To analyze spatial data for new projects

13) Which phase of GIS project planning involves the most detailed work on defining technical requirements and hardware/software needs?
a) feasibility study
b) planning and requirements analysis
c) design phase
d) testing phase

14) Which of the following is an example of a GIS design project task?
a) data model development
b) stakeholder consultation
c) site analysis and requirement definition
d) all of these

ELECTRONICS & TELECOMMUNICATION ENGINEERING
Introduction to Geographic Information System (CIVMDM-01B)

Day & Date: Thursday, 22-05-2025 Max. Marks: 56
Time: 03:00 PM To 06:00 PM

Instructions: 1) All questions are compulsory.
2) Figures to the right indicate full marks.
3) Draw neat sketch whenever necessary.

Section - I

Q.2 Attempt any four from the following. **16**

a) Describe commercial & open source GIS softwares.
b) Describe in detail data organisation method-layered based approach.
c) Describe field data & its collection methods.
d) Discuss advantages & disadvantages of aerial photographs.
e) Describe in detail run-length encoding.
f) Describe in detail about data analysis.

Q.3 Attempt any two from the following. **12**

a) Describe in detail digitizers, its process, advantages & disadvantages.
b) Describe the organisation of data in GIS.
c) Explain various data models used in DBMS in detail.

Section - II

Q.4 Attempt any four from the following. **16**

a) Explain in detail passive & active remote sensing with sketch.
b) Describe in detail metric information.
c) Describe application of GIS in dam site selection.
d) Describe application of GIS in soil erosion.
e) Explain in detail phases of planning & implementation.
f) Describe characteristics of advanced GIS projects.

Q.5 Attempt any two from the following. **12**

a) Describe need of integration of remote sensing & GIS in detail.
b) Describe key application of GIS in map revision.
c) Describe benefits of GIS implementation plan.

a) dissolve b) buffer
c) relation d) overlay

2) Network databases is to support relationships of _____.
a) many to many b) one to many
c) none of above d) all of above

3) The sensitivity of a sensor to detect slight differences in energy (brightness) is _____.
a) Spectral resolution b) Spatial resolution
c) Temporal resolution d) Radiometric resolution

4) Descriptive information provides qualitative data about the characteristics and conditions of Earth's surface features _____.
a) qualitative b) quantitative
c) both d) none

5) The instruments which provide electromagnetic radiation of specified wave length or a band of wave lengths to illuminate the earth surface, are called _____.
a) scanner b) passive sensors
c) active sensors d) none of these

6) Canal site selection using GIS is primarily concerned with _____.
a) Mapping the soil composition along the canal route
b) Studying land use in the surrounding areas
c) Identifying areas with the most water flow potential
d) Both a and c

7) What is the primary application of GIS in map revision?
a) To create new maps from scratch
b) To update and modify existing maps with current data
c) To design and print physical maps
d) To analyze spatial data for new projects

8) Which phase of GIS project planning involves the most detailed work on defining technical requirements and hardware/software needs?
a) feasibility study
b) planning and requirements analysis
c) design phase
d) testing phase

9) Which of the following is an example of a GIS design project task?
a) data model development
b) stakeholder consultation
c) site analysis and requirement definition
d) all of these

10) What does GIS integrate spatial data with?
a) Other data resources
b) Only tabular data
c) Only hard copy maps
d) Only digital maps

11) What is the purpose of GIS software?
a) Data management and analysis
b) Creating physical maps
c) Collecting data only
d) Storing non-spatial data

12) Which of the following is a key function of an information system?
a) Data storage only
b) Data collection and processing
c) Document shredding
d) Manual calculations

13) Statistical data in GIS is primarily used for _____.
a) Data visualization
b) Data analysis and interpretation
c) Data storage
d) Data collection

14) Satellite data is most commonly used in GIS for _____.
a) Remote sensing
b) Data entry
c) Statistical analysis
d) Map digitization

SLR-BD-187

S. Y (B. Tech) (Sem-I) (New) (NEP CBCS) Examination: March/April-2025
ELECTRONICS & TELECOMMUNICATION ENGINEERING
Introduction to Geographic Information System (CIVMDM-01B)

Day & Date: Thursday, 22-05-2025 Max. Marks: 56
Time: 03:00 PM To 06:00 PM

Instructions: 1) All questions are compulsory.
2) Figures to the right indicate full marks.
3) Draw neat sketch whenever necessary.

Section - I

Q.2 Attempt any four from the following. **16**
a) Describe commercial & open source GIS softwares.
b) Describe in detail data organisation method-layered based approach.
c) Describe field data & its collection methods.
d) Discuss advantages & disadvantages of aerial photographs.
e) Describe in detail run-length encoding.
f) Describe in detail about data analysis.

Q.3 Attempt any two from the following. **12**
a) Describe in detail digitizers, its process, advantages & disadvantages.
b) Describe the organisation of data in GIS.
c) Explain various data models used in DBMS in detail.

Section - II

Q.4 Attempt any four from the following. **16**
a) Explain in detail passive & active remote sensing with sketch.
b) Describe in detail metric information.
c) Describe application of GIS in dam site selection.
d) Describe application of GIS in soil erosion.
e) Explain in detail phases of planning & implementation.
f) Describe characteristics of advanced GIS projects.

Q.5 Attempt any two from the following. **12**
a) Describe need of integration of remote sensing & GIS in detail.
b) Describe key application of GIS in map revision.
c) Describe benefits of GIS implementation plan.

S. Y. (B.Tech.) (Sem-I) (New) (NEP CBCS) Examination: March/April-2025
ELECTRONICS & TELECOMMUNICATION ENGINEERING
Fundamentals of Material science and Engineering (MECHMDM-01A)

Day & Date: Thursday 22-05-2025 Max. Marks: 70
Time: 03:00 PM To 06:00 PM

Instructions: 1) Q. No. 1 is compulsory. It should be solved in the first 30 minutes in Answer Book Page no 03 (Starting page of the Answer Book). Each question carries one mark.
2) Don't forget to Mention question paper set (P/Q/R/S) on top of page.
3) Figures to the right indicates full marks.
4) Make suitable assumptions if necessary and state them clearly.

MCQ/Objective Type Questions

Duration: 30 Minutes Marks:14

Q.1 Choose the correct Answer. **14**

1) Which of the following is not a primary classification of engineering materials?
a) Metals b) Ceramics
c) Gases d) Polymers

2) Which property is most associated with metals?
a) High electrical conductivity b) High brittleness
c) Low melting point d) Low density

3) The Gibbs phase rule is given by:
a) $P + F = C - 1$ b) $P + F = C + 1$
c) $F = C - P + 2$ d) $F = C + P - 2$

4) Non-ferrous metals are primarily used for their:
a) High strength
b) High corrosion resistance and low density
c) Magnetic properties
d) Low melting point

5) In the eutectic transformation, liquid transforms into:
a) One solid phase b) Two solid phases
c) One liquid and one solid phase d) Three solid phases

6) Which of the following is a characteristic of brass alloy?
a) Primarily composed of copper and tin
b) Primarily composed of copper and zinc
c) Primarily composed, of copper and aluminum
d) Primarily composed of copper ana nickel

7) Bronze alloys are primarily composed of copper and:
a) Zinc b) Aluminum
c) Nickel d) Tin

8) Which of the following is an example of a thermoplastic polymer?
a) Bakelite b) Epoxy resin
c) Polystyrene d) Rubber

9) The ability of a polymer to return to its original shape after deformation is known as:
a) Ductility b) Elasticity
c) Malleability d) Toughness

10) Which of the following properties is enhanced by vulcanization of rubber?
a) High flexibility
b) Increased strength and resistance to wear
c) Decreased thermal stability
d) Decreased electrical resistance

11) Which of the following is NOT a characteristic of ceramic materials?
a) High melting points b) High electrical conductivity
c) Brittle nature d) Good wear resistance

12) Advanced ceramics are typically characterized by:
a) High ductility
b) Low strength
c) High thermal and electrical conductivity
d) High performance at high temperatures

13) Composite materials are widely used in the aerospace industry because they:
a) Are cost-effective and easily available
b) Provide high strength-to-weight ratio
c) Have low thermal resistance
d) Are magnetic in nature

14) Nanomaterials are commonly used in which of the following fields?
a) Drug delivery systems
b) Large-scale structural applications
c) Agricultural machinery
d) Waste disposal

MCQ/Objective Type Questions

Duration: 30 Minutes Marks:14

Q.1 Choose the correct Answer. **14**

1) What is the primary purpose of management?
a) To maximize profits
b) To achieve organizational goals efficiently
c) To manage resources effectively
d) To implement policies

2) Which approach emphasizes the interdependence of various organizational functions?
a) Classical Approach b) Systems Approach
c) Behavioral Approach d) Contingency Approach

3) What is NOT a function of managers?
a) Planning b) Organizing
c) Playing d) Controlling

4) Which of the following is a responsibility of managers regarding social responsibility?
a) Maximizing shareholder wealth
b) Ensuring employee satisfaction
c) Contributing to community welfare
d) Minimizing costs

5) What is the first step in the planning process?
a) Developing alternatives b) Setting objectives
c) Implementing plans d) Evaluating results

6) Which type of plan is designed to cover a short period?
a) Strategic Plan b) Tactical Plan
c) Operational Plan d) Contingency Plan

7) Which of the following is a part of the staffing function?
a) Budgeting b) Training
c) Planning d) Controlling

8) Which theory focuses on the hierarchy of needs to motivate employees?
a) Herzberg's Two-Factor Theory
b) McGregor's Theory X and Y
c) Maslow's Hierarchy of Needs
d) Adams' Equity Theory

9) What is the main purpose of controlling in management?
a) To set goals
b) To ensure that organizational activities are aligned with plans
c) To improve employee morale
d) To increase production

10) What type of costs includes costs associated with preventing defects?
a) Internal failure costs b) External failure costs
c) Appraisal costs d) Prevention costs

11) Which quality guru is known for his work in the field of quality improvement through statistical methods?
a) Philip Crosby b) W. Edwards Deming
c) Joseph Juran d) Kaoru Ishikawa

12) Which chart is used to monitor the mean of a process over time?
a) R-chart b) P-chart
c) C-chart d) X-bar chart

13) Acceptance sampling is primarily concerned with:
a) Evaluating the entire production process
b) Inspecting all items produced
c) Testing a sample to infer about the quality of the entire lot
d) Conducting customer satisfaction surveys

14) What is the primary goal of employee involvement in TQM?
a) To increase profits
b) To enhance product quality through teamwork and engagement
c) To reduce the number of employees
d) To focus solely on production output

S.Y. (B.Tech.) (Sem-I) (New) (NEP CBCS) Examination: March/April-2025
ELECTRONICS & TELECOMMUNICATION ENGINEERING
Industrial Management (MECHMDM-01B)

Day & Date: Thursday 22-05-2025 Max. Marks: 56
Time: 03:00 PM To 06:00 PM

Instructions: 1) In Section – I, Q. No. 3 is compulsory and attempt any two questions from the remaining questions.
1) In Section – II, Q. No. 6 is compulsory and attempt any two questions from the remaining questions.
2) Figures to the right indicate full marks.
3) Make suitable assumptions if necessary and state them clearly.
4) Draw neat-labelled diagrams wherever necessary.
5) Use of log table and calculators is allowed.

Section – I

Q.2 **a)** What are managerial skills and managerial roles? **05**
b) Explain the Social responsibilities and ethics in management. **04**

Q.3 **a)** What is planning? Explain advantages and disadvantages of planning? **05**
b) What are the types of organizations? Explain Problems with organizational level. **05**

Q.4 **a)** Define Leadership. Explain four extreme styles. **05**
b) Discuss types of communication by taking suitable example. **04**

Q.5 **Write short note on any three.** **09**
a) Channel of distribution
b) Functions of Managers
c) Methods of Departmentation
d) Explain Maslow's theory
e) Decision making

Section – II

Q.6 **a)** Define productivity. How does material management impact the productivity of a manufacturing unit? **05**
b) Explain how the production process is planned and controlled in batch production systems. **05**

Q.7	**a)**	Describe the importance of supplier partnerships in Total Quality Management. What are the key aspects that define a successful supplier partnership?	**05**
	b)	Explain the concept of employee involvement in TQM. How does fostering employee participation contribute to improved quality and productivity?	**04**
Q.8	**a)**	Explain the importance of Training and Development in enhancing employee performance. How can training programs be aligned with organizational goals?	**05**
	b)	What are the objectives of Human Resource Management (HRM)? Discuss how HRM helps in managing employee relations and improving organizational efficiency.	**04**

Q.9 Write short note on any three. **09**

- **a)** Material Requirement Planning (MRP)
- **b)** Batch Production
- **c)** Factors to improve productivity
- **d)** Functions of Production Planning and Control (PPC)
- **e)** Mass Production - Advantages and Disadvantages

Set **Q**

S.Y. (B.Tech.) (Sem-I) (New) (NEP CBCS) Examination: March/April-2025
ELECTRONICS & TELECOMMUNICATION ENGINEERING
Industrial Management (MECHMDM-01B)

Day & Date: Thursday 22-05-2025 Max. Marks: 70
Time: 03:00 PM To 06:00 PM

Instructions: 1) Q. No. 1 is compulsory. It should be solved in the first 30 minutes in Answer Book Page no 03 (Starting page of the Answer Book). Each question carries one mark.
2) Don't forget to Mention question paper set (P/Q/R/S) on top of page.
3) Figures to the right indicates full marks.
4) Make suitable assumptions if necessary and state them clearly.

MCQ/Objective Type Questions

Duration: 30 Minutes Marks:14

Q.1 Choose the correct Answer. 14

1) Which theory focuses on the hierarchy of needs to motivate employees?
a) Herzberg's Two-Factor Theory
b) McGregor's Theory X and Y
c) Maslow's Hierarchy of Needs
d) Adams' Equity Theory

2) What is the main purpose of controlling in management?
a) To set goals
b) To ensure that organizational activities are aligned with plans
c) To improve employee morale
d) To increase production

3) What type of costs includes costs associated with preventing defects?
a) Internal failure costs b) External failure costs
c) Appraisal costs d) Prevention costs

4) Which quality guru is known for his work in the field of quality improvement through statistical methods?
a) Philip Crosby b) W. Edwards Deming
c) Joseph Juran d) Kaoru Ishikawa

5) Which chart is used to monitor the mean of a process over time?
a) R-chart b) P-chart
c) C-chart d) X-bar chart

6) Acceptance sampling is primarily concerned with:
a) Evaluating the entire production process
b) Inspecting all items produced
c) Testing a sample to infer about the quality of the entire lot
d) Conducting customer satisfaction surveys

7) What is the primary goal of employee involvement in TQM?
a) To increase profits
b) To enhance product quality through teamwork and engagement
c) To reduce the number of employees
d) To focus solely on production output

8) What is the primary purpose of management?
a) To maximize profits
b) To achieve organizational goals efficiently
c) To manage resources effectively
d) To implement policies

9) Which approach emphasizes the interdependence of various organizational functions?
a) Classical Approach b) Systems Approach
c) Behavioral Approach d) Contingency Approach

10) What is NOT a function of managers?
a) Planning b) Organizing
c) Playing d) Controlling

11) Which of the following is a responsibility of managers regarding social responsibility?
a) Maximizing shareholder wealth
b) Ensuring employee satisfaction
c) Contributing to community welfare
d) Minimizing costs

12) What is the first step in the planning process?
a) Developing alternatives b) Setting objectives
c) Implementing plans d) Evaluating results

13) Which type of plan is designed to cover a short period?
a) Strategic Plan b) Tactical Plan
c) Operational Plan d) Contingency Plan

14) Which of the following is a part of the staffing function?
a) Budgeting b) Training
c) Planning d) Controlling

Set **Q**

S.Y. (B.Tech.) (Sem-I) (New) (NEP CBCS) Examination: March/April-2025
ELECTRONICS & TELECOMMUNICATION ENGINEERING
Industrial Management (MECHMDM-01B)

Day & Date: Thursday 22-05-2025 Max. Marks: 56
Time: 03:00 PM To 06:00 PM

Instructions: 1) In Section – I, Q. No. 3 is compulsory and attempt any two questions from the remaining questions.
1) In Section – II, Q. No. 6 is compulsory and attempt any two questions from the remaining questions.
2) Figures to the right indicate full marks.
3) Make suitable assumptions if necessary and state them clearly.
4) Draw neat-labelled diagrams wherever necessary.
5) Use of log table and calculators is allowed.

Section – I

Q.2 **a)** What are managerial skills and managerial roles? **05**
b) Explain the Social responsibilities and ethics in management. **04**

Q.3 **a)** What is planning? Explain advantages and disadvantages of planning? **05**
b) What are the types of organizations? Explain Problems with organizational level. **05**

Q.4 **a)** Define Leadership. Explain four extreme styles. **05**
b) Discuss types of communication by taking suitable example. **04**

Q.5 **Write short note on any three.** **09**
a) Channel of distribution
b) Functions of Managers
c) Methods of Departmentation
d) Explain Maslow's theory
e) Decision making

Section – II

Q.6 **a)** Define productivity. How does material management impact the productivity of a manufacturing unit? **05**
b) Explain how the production process is planned and controlled in batch production systems. **05**

Q.7	**a)**	Describe the importance of supplier partnerships in Total Quality Management. What are the key aspects that define a successful supplier partnership?	**05**
	b)	Explain the concept of employee involvement in TQM. How does fostering employee participation contribute to improved quality and productivity?	**04**
Q.8	**a)**	Explain the importance of Training and Development in enhancing employee performance. How can training programs be aligned with organizational goals?	**05**
	b)	What are the objectives of Human Resource Management (HRM)? Discuss how HRM helps in managing employee relations and improving organizational efficiency.	**04**
Q.9	**Write short note on any three.**		**09**
	a)	Material Requirement Planning (MRP)	
	b)	Batch Production	
	c)	Factors to improve productivity	
	d)	Functions of Production Planning and Control (PPC)	
	e)	Mass Production - Advantages and Disadvantages

Time: 03:00 PM To 06:00 PM

Instructions: 1) Q. No. 1 is compulsory. It should be solved in the first 30 minutes in Answer Book Page no 03 (Starting page of the Answer Book). Each question carries one mark.
2) Don't forget to Mention question paper set (P/Q/R/S) on top of page.
3) Figures to the right indicates full marks.

MCQ/Objective Type Questions

Duration: 30 Minutes Marks:14

Q.1 Choose the correct Answer. **14**

1) What is the output of print(3 * 4.5 // 2)?
a) 5 b) 6
c) 7 d) 8

2) Which data type is mutable in Python?
a) int b) float
c) tuple d) list

3) What is the primary purpose of the Python interpreter?
a) To convert Python code into machine code directly.
b) To compile Python code into a .exe file.
c) To interpret and execute Python code line by line.
d) To optimize Python code for faster execution.

4) How do you import a function myfunc from a module mymodule?
a) import mymodule .myfunc
b) from mymodule import myfunc
c) import myfunc from mymodule
d) from myfunc import mymodule

5) Which statement about tuples in Python is true?
a) Tuples can be modified after creation.
b) Tuples are indexed starting from 1.
c) Tuples use square brackets for element access.
d) Tuples are immutable.

6) Given s = 'Hello World!', what does s[1:5] evaluate to?
a) 'Hell' b) 'ello'
c) 'ello ' d) None of the above

7) Which keyword is used to handle exceptions in Python?

a) catch b) except
c) handle d) recover

8) What does the self parameter represent in Python class methods?

a) It refers to the current instance of the class.
b) It is used to denote private attributes.
c) It is used for method overloading.
d) It refers to the superclass.

9) What does the following code output?

```
class MyClass:
    def greet(self):
    return "Hello!"
obj = MyClass()
print(obj.greet())
```

a) Hello! b) greet
c) Error d) None

10) How do you open a file myfile.txt in read mode in Python?

a) file = open('myfile.txt', 'r')
b) file = open('myfile.txf)
c) file = open('myfile.txt', mode='read')
d) file = open('myfile.txt', mode='w')

11) Which Python library is used for numerical operations and array manipulations?

a) numpy b) math
c) scipy d) statistics

12) Which Python module is commonly used for writing unit tests?

a) unittest b) pytest
c) testing d) check

13) Which module is used to generate pseudo-random numbers in Python?

a) random b) numpy
c) math d) os

14) What is the default logging level in Python?

a) DEBUG b) INFO
c) WARNING d) ERROR

Instructions: 1) All questions are compulsory.
2) Figures to the right indicate full marks.

Section – I

Q.2 Attempt any Four. **16**

a) What is python interpreter? Explain with neat diagram.
b) Differentiate between list and tuples in python.
c) Write a python program to check whether a given string is palindrome.
d) What are the class and objects in python? Explain with syntax and example.
e) What is exceptional handling in python? How it is implemented using try, except and finally block?

Q.3 Attempt any two. **12**

a) Illustrate following control structures and write syntax for each type of control structure.
1) Decision making statements
2) Iterative statements (Loop control statements)
3) Transfer statements
b) Explain string handling functions with syntax and example.
c) Explain inheritance in python with their types.

Section – II

Q.4 Attempt any Four. **16**

a) Explain basic date and time types with syntax and example.
b) Differentiate between shallow copy and deep copy operations.
c) Write a python program to create a 2D Numpy array and perform basic operations like addition, subtraction, division and multiplication.
d) Implement a program to measure execution time of small code snippets.
e) Explain Logging facility in python with all levels of logging.

Q.5 Attempt any two. **12**

a) Explain mathematical functions and pseudo random functions with syntax and example.
b) Define data persistence and implement program for read & write operations on .csv file.
c) Explain the methods of testing and debugging in python. Explain unit test in python.

a) Tuples can be modified after creation.
b) Tuples are indexed starting from 1.
c) Tuples use square brackets for element access.
d) Tuples are immutable.

10) Given s = 'Hello World!', what does s[1:5] evaluate to?
a) 'Hell' b) 'ello'
c) 'ello ' d) None of the above

11) Which keyword is used to handle exceptions in Python?
a) catch b) except
c) handle d) recover

12) What does the self parameter represent in Python class methods?
a) It refers to the current instance of the class.
b) It is used to denote private attributes.
c) It is used for method overloading.
d) It refers to the superclass.

13) What does the following code output?

```
class MyClass:
    def greet(self):
    return "Hello!"
obj = MyClass()
print(obj.greet())
```

a) Hello! b) greet
c) Error d) None

14) How do you open a file myfile.txt in read mode in Python?
a) file = open('myfile.txt', 'r')
b) file = open('myfile.txf)
c) file = open('myfile.txt', mode='read')
d) file = open('myfile.txt', mode='w')

S.Y. (B.Tech.) (Sem-I) (NEP New) (CBCS) Examination: March/April-2025
ELECTRONICS & TELECOMMUNICATION ENGINEERING
Programming basics using Python (CSEMDM-01A)

Day & Date: Thursday 22-05-2025 Max. Marks: 56
Time: 03:00 PM To 06:00 PM

Instructions: 1) All questions are compulsory.
2) Figures to the right indicate full marks.

Section – I

Q.2 Attempt any Four. **16**

a) What is python interpreter? Explain with neat diagram.
b) Differentiate between list and tuples in python.
c) Write a python program to check whether a given string is palindrome.
d) What are the class and objects in python? Explain with syntax and example.
e) What is exceptional handling in python? How it is implemented using try, except and finally block?

Q.3 Attempt any two. **12**

a) Illustrate following control structures and write syntax for each type of control structure.
1) Decision making statements
2) Iterative statements (Loop control statements)
3) Transfer statements
b) Explain string handling functions with syntax and example.
c) Explain inheritance in python with their types.

Section – II

Q.4 Attempt any Four. **16**

a) Explain basic date and time types with syntax and example.
b) Differentiate between shallow copy and deep copy operations.
c) Write a python program to create a 2D Numpy array and perform basic operations like addition, subtraction, division and multiplication.
d) Implement a program to measure execution time of small code snippets.
e) Explain Logging facility in python with all levels of logging.

Q.5 Attempt any two. **12**

a) Explain mathematical functions and pseudo random functions with syntax and example.
b) Define data persistence and implement program for read & write operations on .csv file.
c) Explain the methods of testing and debugging in python. Explain unit test in python.

S.Y. (B.Tech.) (Sem-I) (NEP New) (CBCS) Examination: March/April-2025
ELECTRONICS & TELECOMMUNICATION ENGINEERING
Programming basics using Python (CSEMDM-01A)

Day & Date: Thursday 22-05-2025 Max. Marks: 70
Time: 03:00 PM To 06:00 PM

Instructions: 1) Q. No. 1 is compulsory. It should be solved in the first 30 minutes in Answer Book Page no 03 (Starting page of the Answer Book). Each question carries one mark.
2) Don't forget to Mention question paper set (P/Q/R/S) on top of page.
3) Figures to the right indicates full marks.

MCQ/Objective Type Questions

Duration: 30 Minutes Marks:14

Q.1 Choose the correct Answer. **14**

1) Given s = 'Hello World!', what does s[1:5] evaluate to?
a) 'Hell' b) 'ello'
c) 'ello ' d) None of the above

2) Which keyword is used to handle exceptions in Python?
a) catch b) except
c) handle d) recover

3) What does the self parameter represent in Python class methods?
a) It refers to the current instance of the class.
b) It is used to denote private attributes.
c) It is used for method overloading.
d) It refers to the superclass.

4) What does the following code output?

```
class MyClass:
    def greet(self):
    return "Hello!"
obj = MyClass()
print(obj.greet())
```

a) Hello! b) greet
c) Error d) None

5) How do you open a file myfile.txt in read mode in Python?
a) file = open('myfile.txt', 'r')
b) file = open('myfile.txf)
c) file = open('myfile.txt', mode='read')
d) file = open('myfile.txt', mode='w')

6) Which Python library is used for numerical operations and array manipulations?

a) numpy b) math
c) scipy d) statistics

7) Which Python module is commonly used for writing unit tests?

a) unittest b) pytest
c) testing d) check

8) Which module is used to generate pseudo-random numbers in Python?

a) random b) numpy
c) math d) os

9) What is the default logging level in Python?

a) DEBUG b) INFO
c) WARNING d) ERROR

10) What is the output of print(3 * 4.5 // 2)?

a) 5 b) 6
c) 7 d) 8

11) Which data type is mutable in Python?

a) int b) float
c) tuple d) list

12) What is the primary purpose of the Python interpreter?

a) To convert Python code into machine code directly.
b) To compile Python code into a .exe file.
c) To interpret and execute Python code line by line.
d) To optimize Python code for faster execution.

13) How do you import a function myfunc from a module mymodule?

a) import mymodule .myfunc
b) from mymodule import myfunc
c) import myfunc from mymodule
d) from myfunc import mymodule

14) Which statement about tuples in Python is true?

a) Tuples can be modified after creation.
b) Tuples are indexed starting from 1.
c) Tuples use square brackets for element access.
d) Tuples are immutable.

3) Figures to the right indicates full marks.
4) Assume suitable data wherever necessary.

MCQ/Objective Type Questions

Duration: 30 Minutes Marks:14

Q.1 Choose the correct Answer. **14**

1) _____ model is good for well understood problems, short duration project, and automation of existing manual systems.
a) Waterfall b) Iterative enhancement
c) Prototyping d) Spiral

2) Software consists of ____.
a) Set of instructions + operating procedures
b) Set of programs
c) Programs + documentation + operating procedures
d) Programs + hardware manuals

3) SDLC is framework for ____
a) Requirement b) Design
c) Code & Test d) All of above

4) Black box testing is also called as ____.
a) Structural testing b) Interface testing
c) Stress testing d) Functional testing

5) A detailed project schedule is never ____.
a) fixed b) variable
c) dynamic d) static

6) What is the sequence of maturity levels in CMM framework?
a) Initial, defined, repeatable, managed, and optimizing
b) Initial, defined, repeatable, optimizing, and managed
c) Initial, repeatable, defined, managed, and optimizing
d) Initial, repeatable, defined, optimizing, and managed

7) A ____ is logically separable part of program. It is a program unit that is discrete and identifiable with respect to compiling and loading.

a) Component b) Connector
c) Module d) None of above

8) Risk Management aims to ____ and then take action to minimize their effect on project.

a) Identify cost and estimation
b) Identify risks
c) Identify plan
d) All of above

9) The output of requirement process is ____

a) Validated SRS b) Validation
c) Problem analysis d) Verification

10) White Box Testing is also called as ____.

a) Functional testing b) Structural testing
c) Stress testing d) Interface testing

11) Agile Software Development is depends on ____.

a) Incremental Development
b) Iterative Development
c) Linear Development
d) Both Incremental and Iterative Development

12) ____ is a first level of testing.

a) Unit testing b) Integration Testing
c) System Testing d) None of above

13) CMM means ____.

a) Common Maturity Model b) Cost Maturity Model
c) Capability Maturity Model d) All

14) Which of the following is/are characteristics of SRS?

a) Unambiguous b) Verifiable
c) Consistent d) All of above

MCQ/Objective Type Questions

Duration: 30 Minutes Marks:14

Q.1 Choose the correct Answer. **14**

1) Which of the following is an advantage of electronic energy meters over induction-type meters?
a) Higher accuracy b) More moving parts
c) More expensive d) Require more maintenance

2) Moving iron instruments have _____.
a) Uniform scale b) Squared scale
c) Log scale d) Linear scale

3) Digital voltmeters convert _____.
a) Analog to digital signal b) Digital to analog signal
c) Current to voltage d) Resistance to voltage

4) In a separately excited DC motor, the field windings are _____.
a) Connected in series with the armature
b) Supplied from an independent source
c) Connected to the same supply as the armature
d) None of above

5) A single-phase induction motor is inherently _____.
a) Self-starting
b) Not self-starting
c) More efficient than a three-phase motor
d) Can operate on both AC and DC supplies

6) The synchronous speed of a synchronous generator is dependent on __.
a) Rotor size
b) Number of poles and frequency
c) Magnetic field strength
d) Load current

7) The synchronous generator operates at _____.
a) A variable speed
b) A constant speed
c) A speed proportional to the load
d) A speed inversely proportional to the load

8) What is the main advantage of a permanent magnet DC motor over a conventional DC motor?
a) No need for a field winding b) Higher efficiency at low speeds
c) Reduced cost of construction d) All of the above

9) Which of the following is an application of PMSMs?
a) Fans b) Electric vehicles
c) HVAC systems d) All of the above

10) What is the purpose of laminated cores in AC machines?
a) Reduce mechanical stress
b) Minimize eddy current losses
c) Increase the resistance of the windings
d) Improve heat dissipation

11) In energy-efficient AC motors, the stator windings are often made of _____.
a) Aluminum b) Copper
c) Steel d) Brass

12) Which of the following does not change in a transformer?
a) Current b) Voltage
c) Frequency d) All of the above

13) When a transformer is loaded, the primary current?
a) Increases b) Decreases
c) Remains constant d) Becomes zero

14) Open circuit test on transformers is conducted to determine _____.
a) hysteresis losses b) copper losses
c) core losses d) eddy current losses

ELECTRONICS & TELECOMMUNICATION ENGINEERING
Electrical Technology (EEMDM-01A)

Day & Date: Thursday 22-05-2025 Max. Marks: 56
Time: 03:00 PM To 06:00 PM

Instructions: 1) All questions are compulsory.
2) Figures to the right indicate full marks.

Section – I

Q.2 Attempt any Four. **16**

a) With neat sketch explain PMMC type instrument.
b) A 3-phase 500V motor load has a power factor of 0.4 two wattmeter connected to measure input. They show input to be 30 KW. Find the reading of each instrument.
c) With neat sketch explain the construction of DC machine.
d) What is the purpose of the auxiliary winding in a single-phase induction motor?
e) Explain the working principle of a synchronous generator.

Q.3 Attempt any two. **12**

a) Explain 1 - ø induction energy meter with neat diagram.
b) Explain the speed control techniques of separately excited dc motor.
c) Explain the principle of operation of 3ø induction motor. With the help of phasor diagram explain how rotating magnetic field is produced?

Section – II

Q.4 Attempt any Four. **16**

a) Explain with neat sketch construction of permanent magnet brushless DC motor.
b) Explain the principle of operation of a linear induction motor.
c) Discuss the techniques used to reduce iron losses in energy-efficient AC machines.
d) A 230/2300V transformer takes a no-load current of 6.5 A and absorbs 187W if the resistance of the primary is 0.6 Ω. Find.
1) the core loss
2) no load power factor
3) active component of current
4) magnetizing current
e) Derive the expression for saving of copper in autotransformer.

Q.5 Attempt any two. **12**

a) What are the applications of Synchronous Reluctance Motor? Explain with phasor diagram torque speed characteristics of Synchronous Reluctance Motor.

b) An energy-efficient AC motor has the following loss components:
Copper losses: 2 kW
Iron losses: 1.5 kW
Friction and windage losses: 0.5 kW
The input power is 25 kW. Calculate the efficiency of the motor.

c) With neat sketch explain open circuit and short circuit test of transformer. How equivalent circuit parameters and efficiency of a transformer are computed?

Seat No.	

Set **Q**

S.Y. (B.Tech.) (Sem-I) (New) (NEP CBCS) Examination: March/April-2025
ELECTRONICS & TELECOMMUNICATION ENGINEERING
Electrical Technology (EEMDM-01A)

Day & Date: Thursday 22-05-2025 Max. Marks: 70
Time: 03:00 PM To 06:00 PM

Instructions: 1) Q. No. 1 is compulsory. It should be solved in the first 30 minutes in Answer Book Page no 03 (Starting page of the Answer Book). Each question carries one mark.
2) Don't forget to Mention question paper set (P/Q/R/S) on top of page.
3) Figures to the right indicates full marks.
4) Make suitable assumptions if necessary and state them clearly.

MCQ/Objective Type Questions

Duration: 30 Minutes Marks:14

Q.1 Choose the correct Answer. **14**

1) What is the main advantage of a permanent magnet DC motor over a conventional DC motor?
a) No need for a field winding b) Higher efficiency at low speeds
c) Reduced cost of construction d) All of the above

2) Which of the following is an application of PMSMs?
a) Fans b) Electric vehicles
c) HVAC systems d) All of the above

3) What is the purpose of laminated cores in AC machines?
a) Reduce mechanical stress
b) Minimize eddy current losses
c) Increase the resistance of the windings
d) Improve heat dissipation

4) In energy-efficient AC motors, the stator windings are often made of _____.
a) Aluminum b) Copper
c) Steel d) Brass

5) Which of the following does not change in a transformer?
a) Current b) Voltage
c) Frequency d) All of the above

6) When a transformer is loaded, the primary current?
a) Increases b) Decreases
c) Remains constant d) Becomes zero

7) Open circuit test on transformers is conducted to determine _____.
a) hysteresis losses b) copper losses
c) core losses d) eddy current losses

8) Which of the following is an advantage of electronic energy meters over induction-type meters?
a) Higher accuracy b) More moving parts
c) More expensive d) Require more maintenance

9) Moving iron instruments have _____.
a) Uniform scale b) Squared scale
c) Log scale d) Linear scale

10) Digital voltmeters convert _____.
a) Analog to digital signal b) Digital to analog signal
c) Current to voltage d) Resistance to voltage

11) In a separately excited DC motor, the field windings are _____.
a) Connected in series with the armature
b) Supplied from an independent source
c) Connected to the same supply as the armature
d) None of above

12) A single-phase induction motor is inherently _____.
a) Self-starting
b) Not self-starting
c) More efficient than a three-phase motor
d) Can operate on both AC and DC supplies

13) The synchronous speed of a synchronous generator is dependent on __.
a) Rotor size
b) Number of poles and frequency
c) Magnetic field strength
d) Load current

14) The synchronous generator operates at _____.
a) A variable speed
b) A constant speed
c) A speed proportional to the load
d) A speed inversely proportional to the load

Seat No.	

Set **Q**

MCQ/Objective Type Questions

Duration: 30 Minutes Marks:14

Q.1 Choose the correct Answer. **14**

1) What is an electric vehicle?
a) Vehicle powered by gasoline
b) Vehicle powered by Electricity
c) Vehicle powered by Diesel
d) Vehicle powered by solar energy

2) What is the function of electric motor in an EV?
a) To charge the battery b) To power the wheels
c) To generate electricity d) To cool the vehicle

3) What is the purpose of battery management system (BMS) in an EV?
a) To monitor and control the battery's state of charge
b) To power the electric motor
c) To generate electricity
d) To cool the vehicle

4) What is the primary advantage of hybrid electric vehicle?
a) Increase driving range
b) Decreased operating cost
c) Reduced Greenhouse gas emissions
d) All of above

5) What type of battery is commonly used in Battery Electric Vehicles?
a) Lead -acid battery b) Nickel- metal hybrid battery
c) Lithium- ion battery d) All of above

6) Which is the types of electric vehicle charging?
a) Level one charging b) Level two charging
c) DC fast charging d) All of the above

7) Which of the following affects battery lifespan?
a) Depth of discharge (DOD) b) Temperature
c) Charging Frequency d) All of above

8) What type of fuel do Fuel Cell Electric Vehicles use?
a) Gasoline b) Diesel
c) Hydrogen d) Natural gas

9) What is the primary cause of battery degradation?
a) Overcharge b) Undercharge
c) Depth of discharge d) High temperature

10) How does battery storage system help in grid stability?
a) By supplying reactive power
b) By absorbing excess energy
c) By providing frequency regulation
d) All of above

11) Which of the following is the benefit of Electric Vehicles?
a) Zero emission b) Lower operating cost
c) Improved performance d) All of above

12) What is the purpose of power electronic controller in electric vehicle?
a) To regulate the flow of electrical energy
b) To monitor the vehicles speed
c) To control the onboard charger
d) To regulate the battery's state of charge

13) What is the purpose of equalization in battery Storage?
a) To balance cell voltage b) To increase battery capacity
c) To reduce charging time d) To improve discharge rate

14) What is the primary function of the on board charger in electric vehicle?
a) To charge the battery from an external power source
b) To convert AC power to DC power
c) To regulate battery's state of charge
d) To monitor the vehicles speed

5) What is an electric vehicle?
a) Vehicle powered by gasoline
b) Vehicle powered by Electricity
c) Vehicle powered by Diesel
d) Vehicle powered by solar energy

6) What is the function of electric motor in an EV?
a) To charge the battery b) To power the wheels
c) To generate electricity d) To cool the vehicle

7) What is the purpose of battery management system (BMS) in an EV?
a) To monitor and control the battery's state of charge
b) To power the electric motor
c) To generate electricity
d) To cool the vehicle

8) What is the primary advantage of hybrid electric vehicle?
a) Increase driving range
b) Decreased operating cost
c) Reduced Greenhouse gas emissions
d) All of above

9) What type of battery is commonly used in Battery Electric Vehicles?
a) Lead -acid battery b) Nickel- metal hybrid battery
c) Lithium- ion battery d) All of above

10) Which is the types of electric vehicle charging?
a) Level one charging b) Level two charging
c) DC fast charging d) All of the above

11) Which of the following affects battery lifespan?
a) Depth of discharge (DOD) b) Temperature
c) Charging Frequency d) All of above

12) What type of fuel do Fuel Cell Electric Vehicles use?
a) Gasoline b) Diesel
c) Hydrogen d) Natural gas

13) What is the primary cause of battery degradation?
a) Overcharge b) Undercharge
c) Depth of discharge d) High temperature

14) How does battery storage system help in grid stability?
a) By supplying reactive power
b) By absorbing excess energy
c) By providing frequency regulation
d) All of above

S.Y. (B. Tech) (Sem-I) (New) (NEP CBCS) Examination: March/April-2025
ELECTRONICS & TELECOMMUNICATION ENGINEERING
Basics of Electrical Vehicle (EEMDM-01B)

Day & Date: Thursday 22-05-2025 Max. Marks: 56
Time: 03:00 PM To 06:00 PM

Instructions: 1) All questions are compulsory.
2) Figures to the right indicate full marks.

Section – I

Q.2 Attempt any Four **16**

a) State and explain challenges faced by Hybrid electric vehicle.
b) State and explain Economics and Environmental impacts of using electrical vehicles.
c) State and explain need of Electrical Vehicle.
d) State and Explain common part between ICE and EV drivetrain.
e) State and explain battery pack and battery management system.

Q.3 Attempt any two. **12**

a) State and explain major requirements of electrical vehicles.
b) State and explain types of electric vehicles in brief.
c) State and explain electric vehicle configuration in brief.

Section – II

Q.4 Attempt any Four. **16**

a) State and explain battery based energy storage system.
b) State and Explain components of HEVs drive train system.
c) State and explain alternative novel energy source solar photovoltaic cells, fuel cells, super capacitors and flywheels.
d) State and explain HEVs basic architecture.
e) Compare between Hybrid electric vehicle and Fuel cell electric vehicle.

Q.5 Attempt any two. **12**

a) State and explain overview of batteries and battery parameters, battery charging, regenerative braking.
b) State and Explain classification of HEVs: Conventional HEVs, Grid able HEVs.
c) State and explain fuel efficiency in HEV.

ELECTRONICS & TELECOMMUNICATION ENGINEERING
Basics of Electrical Vehicle (EEMDM-01B)

Day & Date: Thursday 22-05-2025 Max. Marks: 70
Time: 03:00 PM To 06:00 PM

Instructions: 1) Q. No. 1 is compulsory. It should be solved in the first 30 minutes in Answer Book Page no 03 (Starting page of the Answer Book). Each question carries one mark.
2) Don't forget to Mention question paper set (P/Q/R/S) on top of page.
3) Figures to the right indicates full marks.

MCQ/Objective Type Questions

Duration: 30 Minutes Marks:14

Q.1 Choose the correct Answer. **14**

1) Which is the types of electric vehicle charging?
a) Level one charging b) Level two charging
c) DC fast charging d) All of the above

2) Which of the following affects battery lifespan?
a) Depth of discharge (DOD) b) Temperature
c) Charging Frequency d) All of above

3) What type of fuel do Fuel Cell Electric Vehicles use?
a) Gasoline b) Diesel
c) Hydrogen d) Natural gas

4) What is the primary cause of battery degradation?
a) Overcharge b) Undercharge
c) Depth of discharge d) High temperature

5) How does battery storage system help in grid stability?
a) By supplying reactive power
b) By absorbing excess energy
c) By providing frequency regulation
d) All of above

6) Which of the following is the benefit of Electric Vehicles?
a) Zero emission b) Lower operating cost
c) Improved performance d) All of above

7) What is the purpose of power electronic controller in electric vehicle?
a) To regulate the flow of electrical energy
b) To monitor the vehicles speed
c) To control the onboard charger
d) To regulate the battery's state of charge

8) What is the purpose of equalization in battery Storage?
a) To balance cell voltage
b) To increase battery capacity
c) To reduce charging time
d) To improve discharge rate

9) What is the primary function of the on board charger in electric vehicle?
a) To charge the battery from an external power source
b) To convert AC power to DC power
c) To regulate battery's state of charge
d) To monitor the vehicles speed

10) What is an electric vehicle?
a) Vehicle powered by gasoline
b) Vehicle powered by Electricity
c) Vehicle powered by Diesel
d) Vehicle powered by solar energy

11) What is the function of electric motor in an EV?
a) To charge the battery
b) To power the wheels
c) To generate electricity
d) To cool the vehicle

12) What is the purpose of battery management system (BMS) in an EV?
a) To monitor and control the battery's state of charge
b) To power the electric motor
c) To generate electricity
d) To cool the vehicle

13) What is the primary advantage of hybrid electric vehicle?
a) Increase driving range
b) Decreased operating cost
c) Reduced Greenhouse gas emissions
d) All of above

14) What type of battery is commonly used in Battery Electric Vehicles?
a) Lead -acid battery
b) Nickel- metal hybrid battery
c) Lithium- ion battery
d) All of above

MCQ/Objective Type Questions

Duration: 30 Minutes Marks:14

Q.1 Choose the correct answer. **14**

1) A die is thrown once. What is the probability that the score is a factor of 6?
a) 1/6 b) 1/2
c) 2/3 d) 1

2) Rank of a (m x n) matrix is determined by the number of linearly rows present in the matrix.
a) Dependent b) Independent
c) Both d) None

3) Correlation values ranges from to _____.
a) -1, 1 b) -2, 1
c) -1, 2 d) None

4) For orthogonal variables, correlation value is _____.
a) 0 b) 1
c) -1 d) None

5) Linear regression is example of learning _____.
a) Supervised b) Un supervised
c) Reinforcement d) None

6) _____ is a state where the model cannot model itself on the training data.
a) Underfitting b) Overfitting
c) Both d) None

7) Overfitting has high _____.
a) bias b) variance
c) Both d) None

8) Following is/are applications of Machine Learning _____.
a) Self driving car b) Email spam filtering
c) Product recommendation d) all

9) In the regression equation Y = 21 - 3X, the slope is _____.
a) 21 b) -21
c) 3 d) -3

10) The difference between the actual Y value and predicted Y value found using a regression equation is called the _____.
a) slope b) residual
c) outlier d) scatter plot

11) All symmetrical distributions are Gaussian distribution.
a) True b) False
c) Both d) None of these

12) In square matrix, Sum of diagonal elements is given as _____.
a) trace b) rank
c) eigen value d) none

13) Skewness for Gaussian distribution is _____.
a) zero b) infinite
c) one d) none of these

14) In the regression equation Y = 75.65 + 0.50X, the intercept is _____.
a) 0.50 b) 75.65
c) 1.00 d) indeterminable

MCQ/Objective Type Questions

Duration: 30 Minutes Marks:14

Q.1 Choose the correct answer. **14**

1) What is DBMS?
a) DBMS is a collection of queries
b) DBMS is a high-level language
c) DBMS is a programming language
d) DBMS stores, modifies and retrieves data

2) Who created the first DBMS?
a) Edgar Frank Codd b) Charles Bachman
c) Charles Babbage d) Sharon B. Codd

3) Which of the following is not an example of DBMS?
a) MySQL b) Microsoft Access
c) IBM DB2 d) Google

4) We indicate roles in E-R diagrams by labeling the lines that connect _____ to _____.
a) Diamond, diamond b) Rectangle, diamond
c) Rectangle, rectangle d) Diamond, rectangle

5) The relation with the attribute which is the primary key is referenced in another relation. The relation which has the attribute as a primary key is called _____.
a) Referential relation b) Referencing relation
c) Referenced relation d) Referred relation

6) The intersection operator is used to get the _____ tuples.
a) different b) common
c) all d) repeating

7) The number of attributes in relation is called as its _____.
a) Cardinality b) Degree
c) Tuples d) Entity

8) The _____ clause allows us to select only those rows in the result relation of the _____clause that satisfy a specified predicate.
a) Where, from b) From, select
c) Select, from d) From, where

9) What is true about indexes?
a) Indexes enhance the performance even if the table is updated frequently.
b) It makes harder for sql server engines to work to work on index which have large keys.
c) It doesn't make harder for sql server engines to work to work on index which have large keys.
d) None of the mentioned

10) If an index is _____ the metadata and statistics continue to exists.
a) Disabling b) Dropping
c) Altering d) Both Disabling and Dropping

11) Which forms has a relation that possesses data about an individual entity?
a) 2NF b) 3NF
c) 4NF d) 5NF

12) A transaction is delimited by statements (or function calls) of the form _____.
a) Begin transaction and end transaction
b) Start transaction and stop transaction
c) Get transaction and post transaction
d) Read transaction and write transaction

13) Which of the following has "all-or-none" property?
a) Atomicity b) Durability
c) Isolation d) All of the mentioned

14) The deadlock state can be changed back to stable state by using _____ statement.
a) Commit b) Rollback
c) Savepoint d) Deadlock

Q.2 Attempt any Four questions. **16**

a) Write in detail about different types of Attributes.
b) List and explain drawbacks of file processing system over database system.
c) Elaborate following SQL queries with examples.
1) CREATE
2) DELETE
3) SELECT
4) ORDER BY
d) What is the concepts of Keys in relational model?
e) Which are the different string operations in SQL explain with example.

Q.3 Attempt any Two questions. **12**

a) With a neat diagram explain Database Architecture.
b) Explain with proper example following Relational Algebra Operations.
1) Select
2) Project
3) Union
4) Set-Difference
5) Cartesian-Product
6) Set – Intersection
c) Elaborate Extended Relational Algebra operation with example.

Section – II

Q.4 Attempt any Four questions. **16**

a) What is the concept of shadow paging?
b) Explain different states of transaction with neat diagram.
c) Give a difference between B^+ tree and B tree index files.
d) Explain in detail the concept of view serializability with example.
e) Write a short note on Dense and Sparse indexing with suitable diagram.

Q.5 Attempt any Two questions. **12**

a) What is the Two-Phase Locking Protocol? What are its disadvantages?

b) Explain in detail B^+ tree file organization with an example.

c) Write in brief about transaction model with example.

Set **Q**

S. Y. (B. Tech) (Sem-I) (New) (NEP CBCS) Examination: March/April-2025
ELECTRONICS & TELECOMMUNICATION ENGINEERING
Database Management System (ENTHON-01B)

Day & Date: Friday 23-05-2025 Max. Marks: 70
Time: 03:00 PM To 06:00 PM

Instructions: 1) Q. No. 1 is compulsory. It should be solved in the first 30 minutes in Answer Book Page no 03 (Starting page of the Answer Book). Each question carries one mark.
2) Don't forget to Mention question paper set (P/Q/R/S) on top of page.
3) Figures to the right indicates full marks.
4) Assume suitable data if required.

MCQ/Objective Type Questions

Duration: 30 Minutes Marks:14

Q.1 Choose the correct answer. **14**

1) The _____ clause allows us to select only those rows in the result relation of the _____clause that satisfy a specified predicate.
a) Where, from b) From, select
c) Select, from d) From, where

2) What is true about indexes?
a) Indexes enhance the performance even if the table is updated frequently.
b) It makes harder for sql server engines to work to work on index which have large keys.
c) It doesn't make harder for sql server engines to work to work on index which have large keys.
d) None of the mentioned

3) If an index is _____ the metadata and statistics continue to exists.
a) Disabling b) Dropping
c) Altering d) Both Disabling and Dropping

4) Which forms has a relation that possesses data about an individual entity?
a) 2NF b) 3NF
c) 4NF d) 5NF

5) A transaction is delimited by statements (or function calls) of the form _____.
a) Begin transaction and end transaction
b) Start transaction and stop transaction
c) Get transaction and post transaction
d) Read transaction and write transaction

6) Which of the following has “all-or-none” property?
a) Atomicity b) Durability
c) Isolation d) All of the mentioned

7) The deadlock state can be changed back to stable state by using _____ statement.
a) Commit b) Rollback
c) Savepoint d) Deadlock

8) What is DBMS?
a) DBMS is a collection of queries
b) DBMS is a high-level language
c) DBMS is a programming language
d) DBMS stores, modifies and retrieves data

9) Who created the first DBMS?
a) Edgar Frank Codd b) Charles Bachman
c) Charles Babbage d) Sharon B. Codd

10) Which of the following is not an example of DBMS?
a) MySQL b) Microsoft Access
c) IBM DB2 d) Google

11) We indicate roles in E-R diagrams by labeling the lines that connect _____ to _____.
a) Diamond, diamond b) Rectangle, diamond
c) Rectangle, rectangle d) Diamond, rectangle

12) The relation with the attribute which is the primary key is referenced in another relation. The relation which has the attribute as a primary key is called _____.
a) Referential relation b) Referencing relation
c) Referenced relation d) Referred relation

13) The intersection operator is used to get the _____ tuples.
a) different b) common
c) all d) repeating

14s) The number of attributes in relation is called as its _____.
a) Cardinality b) Degree
c) Tuples d) Entity

Q.1 Choose the correct Answer. **14**

1) The major commodities carried by Indian Railways are _____.
a) Petroleum products, Fertilizer
b) Containerized Traffic
c) Coal, Iron Ore
d) All Above

2) The _____ is the centralized agency for railway electrification of Indian Railways.
a) CORE b) CRIS
c) PRS d) Central Railway Board

3) The entire electrified mainline rail network in India uses _____.
a) 30 kV AC b) 25 kV AC
c) 230 kV AC d) 240 kV AC

4) Which is not part of Rail?
a) Head b) Web
c) Foot d) Frog

5) The safety in Railway in India is looked after by _____.
a) Ministry of Railways b) Commission of Railway Safety
c) Railway Board d) Headquarter Office

6) Modern locomotives employ _____ brake systems.
a) Compressed air brake b) Mechanical Brake
c) Vacuum Brake d) Electromagnetic Brake

7) The World's largest railway network is in _____ Country.
a) Japan b) China
c) United States d) India

8) Which is not part of Railway track layer?
a) Ballast b) Fishplate
c) Pantograph d) Subgrade

9) The First digit of FOIS in IR indicates _____.
a) Type of traffic b) Payment mode
c) Originating Railway d) Destination Railway

10) Which is not Problem with overhead equipment?
a) Power storms can knock the power out
b) Ice may coat overhead lines
c) Dewirement due to rails
d) Lines may sag during hot weather

11) _____ Fastest train in India is also known as Train 18.
a) Gatiman Express b) Duronto Express
c) Rajdhani Express d) Vande Bharat Express

S. Y. (B. Tech) (Sem-I) (New) (NEP CBCS) Examination: March/April-2025
ELECTRONICS & TELECOMMUNICATION ENGINEERING
Railway Engineering: A Beginner's Perspective (ENTHON-01D)

Day & Date: Friday 23-05-2025 Max. Marks: 70
Time: 03:00 PM To 06:00 PM

Instructions: 1) Q. No. 1 is compulsory. It should be solved in the first 30 minutes in Answer Book Page no 03 (Starting page of the Answer Book). Each question carries one mark.
2) Don't forget to Mention question paper set (P/Q/R/S) on top of page.
3) Figures to the right indicates full marks.

MCQ/Objective Type Questions

Duration: 30 Minutes Marks:14

Q.1 Choose the correct Answer. **14**

1) Modern locomotives employ _____ brake systems.
a) Compressed air brake b) Mechanical Brake
c) Vacuum Brake d) Electromagnetic Brake

2) The World's largest railway network is in _____ Country.
a) Japan b) China
c) United States d) India

3) Which is not part of Railway track layer?
a) Ballast b) Fishplate
c) Pantograph d) Subgrade

4) The First digit of FOIS in IR indicates _____.
a) Type of traffic b) Payment mode
c) Originating Railway d) Destination Railway

5) Which is not Problem with overhead equipment?
a) Power storms can knock the power out
b) Ice may coat overhead lines
c) Dewirement due to rails
d) Lines may sag during hot weather

6) _____ Fastest train in India is also known as Train 18.
a) Gatiman Express b) Duronto Express
c) Rajdhani Express d) Vande Bharat Express

7) The first Metro train in India _____?
a) Mumbai b) Kolkatta
c) Delhi d) Chennai

8) Which technology does Maglev trains uses for transportation?
a) Hydroelectric b) Electrification
c) Magnetic levitation d) Using fossil fuels

9) Which is the key function of Automatic Train Supervision (ATS)?
a) Real-time tracking of train locations
b) Automatic scheduling and dispatching of trains
c) Dynamic re-routing of trains in case of accidents or delays
d) All the Above

10) The major commodities carried by Indian Railways are _____.
a) Petroleum products, Fertilizer
b) Containerized Traffic
c) Coal, Iron Ore
d) All Above

11) The _____ is the centralized agency for railway electrification of Indian Railways.
a) CORE b) CRIS
c) PRS d) Central Railway Board

12) The entire electrified mainline rail network in India uses _____.
a) 30 kV AC b) 25 kV AC
c) 230 kV AC d) 240 kV AC

13) Which is not part of Rail?
a) Head b) Web
c) Foot d) Frog

14) The safety in Railway in India is looked after by _____.
a) Ministry of Railways b) Commission of Railway Safety
c) Railway Board d) Headquarter Office

Answer

Q.1 Choose the correct alternatives from the options.

1) Basic unit of human interaction is _____.
a) Family b) Society
c) Group d) None of the above

2) The Self(I) is the seer, _____.
a) Doer b) Enjoyer
c) Doer & Enjoyer d) None

3) PROSPERITY deals with _____.
a) Right understanding in the self
b) Fulfilment in relationship
c) Ensuring more than required physical facility
d) None

4) When we expect feelings from others for our happiness, it is a state of _____.
a) Swatantrata b) Partantrata
c) Prosperity d) None

5) For continuity of happiness, what is essential?
a) Right understanding in the Self
b) Right feeling and right thought in the Self
c) Recognition of needs, ensure more than required, make right utilisation of it
d) All the above

6) Right Understanding and Right Feeling is matter of _____.
a) Self b) Body
c) Both d) None

7) Acceptance of excellence in others is called _____.

a) Gratitude b) Reverence
c) Glory d) None of above

8) Self and _____ are different in nature, materiality, needs and activities.

a) Prosperity b) Right Understanding
c) Body d) None of above

9) _____ is assuming without knowing.

a) Knowing b) Assuming
c) Preconditioning d) Relationship

10) Imagination is combination of _____.

a) Desire & thought
b) Desire, thought & expectation
c) Expectation & thought
d) None of above

11) Following are the basic guidelines for value education except _____.

a) Universal b) Personal
c) Rational d) Natural

12) Natural acceptance and _____ are the two processes of knowing.

a) Self-Actualization b) Self-exploration
c) Self Evaluation d) Self control

13) Human Life is lived at four levels: Individual, Family, and Society and _____.

a) Nature b) Nurture
c) World d) Universe

14) Value education should not be based on dogmas or blind beliefs _____.

a) True b) False

15) Value of an entity is _____.

a) Physical Facility
b) Prosperity
c) Its participation in the larger order of which it is part
d) both a and b

16) _____ are as Basic Human Aspirations.

a) Money
b) Relationship without money
c) Physical Facility
d) Continuous Happiness and Prosperity

17) Please give the correct priority for Physical Facilities, Right Understanding and Relationship _____.

a) Physical Facilities, Right Understanding and Relationship
b) Relationship, Right Understanding and Physical Facilities
c) Right Understanding, Relationship and Physical Facilities
d) None of the above

18) Right Understanding in relationship lead to _____.

a) Mutual Happiness b) Mutual Prosperity
c) Both a and b d) All are wrong

19) SSDD stands for _____.

a) Sadhan Viheen Dukhi Daridra
b) Sadhan Sampan Dukhi Daridra
c) Sadhan Sampan Sukhi Samridha
d) None of the above

20) Natural acceptance does not change with _____.

a) Time b) Place
c) Beliefs d) All of above

21) Human being is co-existence of the _____ and the _____.

a) self, self b) body, body
c) self, body d) None

22) _____ is the feeling of responsibility for nurturing, protecting and right utilizing the body.

a) Swasthya b) Sanyam
c) Prosperity d) None

23) The _____ is an instrument of _____.

a) I, Body b) Body, I
c) Both a and b d) None

24) _____ is the information we get from the Body through the five sense organs.

a) Precondition b) Sensation
c) Natural acceptance d) None

25) Which of the following is NOT a response of the Self?

a) Knowing b) Assuming
c) Recognising d) Preconditioning

26) Needs of Body are quantitative whereas needs of Self are qualitative _____.

a) True b) False

27) Sah-astitva means _____.

a) Co-existence b) Co-operation
c) Cooption d) Corporate identity

28) Ensuring justice in the relationship, on the basis of values leads to _____ in society.

a) Fearlessness b) Confusion
c) Confidence d) Fear

29) _____ is the complete value in relationship.

a) Respect b) Love
c) Trust d) Glory

30) The feeling to nurture and protect the body of our relative is called _____.

a) Care b) Affection
c) Gratitude d) Respect

31) _____ is the feeling of acceptance for those who have made efforts for my excellence.

a) Reverence b) Glory
c) Gratitude d) Guidance

32) We all are similar at the level of our _____ but differ in our _____.

a) Competence, Intension b) Intension, Competence
c) Competence, Competence d) None

33) Abhay means _____.

a) Right understanding b) Trust and fearlessness
c) Prosperity d) Co-existance

34) All the units of nature can be classified into _____ orders.

a) Two b) Three
c) Four d) Six

35) Which of the following does not form an order in nature?

a) Bio b) Animal
c) Consciousness d) Human

36) According to quantity, which of the following is true for the orders in nature?

a) Bio order >> Physical order >> Animal order >> Human order
b) Animal order >> Bio order >> Physical order >> Human order
c) Physical order >> Bio order >> Animal order >> Human order
d) Physical order >> Animal order >> Bio order >> Human order

37) What is NOT acceptable naturally in the nature?

a) Enrichment of nature b) Pollution in nature
c) Protection of nature d) Right Utilization of nature

38) Which of the following is NOT a unit of physical order?

a) Soil b) Air
c) Tree d) Water

39) There is justice in relationship when there is _____.
a) Self-regulation b) Freedom
c) Mutual fulfillment d) None

40) Justice from family to world family leads to _____.
a) Powerful nation
b) Strong political ties between nations
c) Undivided society
d) Disruption of the family structure

41) _____ is and it exists between one self (I1) and other self (I2).
a) Body b) Relationship
c) Health d) All

42) Which of the following results from over-evaluation _____.
a) Ego b) Depression
c) Self-confidence d) Trust

43) Which of the following statement is true?
a) Intention of a human being is always doubtful
b) One's intension is always to make the other happy
c) Intension of a human keeps varying from time to time
d) Intension of a human being can never be understood

44) Feeling of relationship exist between _____.
a) Self and self b) Body and Body
c) Self and body d) None of the above

45) Which of the following is NOT one of the goals at the level of society?
a) Right Understanding b) Fearlessness
c) Madness for profit d) Prosperity

46) Intension of a human being is the same as _____.
a) Natural acceptance b) Competence
c) Thought d) Pre-conditioning

47) Harmony should be maintained in _____.
a) Between body and life b) Between self and body
c) Between self and society d) All of the above

48) If something is _____ to us without any force or compulsion, then it is often correct and does not change with time and people.
a) Not acceptable b) Completely acceptable
c) Naturally acceptable d) Less acceptable

49) Nurturing on the Body depends upon _____.
a) Ingestion b) Digestion
c) Excretion d) All of the above

50) Sensation is related to _____.

a) Body
b) Self 'I'
c) Both a and b
d) None of the above

Universal Human Values (VEC-01)

Day & Date: Saturday, 24-05-2025 Max. Marks: 50
Time: 03:00 PM To 4:30 PM

Instructions: 1) All questions are compulsory.
2) Figures to the right indicate full marks.
3) Mention Question Paper Set (P/Q/R/S) on Top of Page.

Answer

Q.1 Choose the correct alternatives from the options.

1) _____ is and it exists between one self (I1) and other self (I2).
a) Body b) Relationship
c) Health d) All

2) Which of the following results from over-evaluation _____.
a) Ego b) Depression
c) Self-confidence d) Trust

3) Which of the following statement is true?
a) Intention of a human being is always doubtful
b) One's intension is always to make the other happy
c) Intension of a human keeps varying from time to time
d) Intension of a human being can never be understood

4) Feeling of relationship exist between _____.
a) Self and self b) Body and Body
c) Self and body d) None of the above

5) Which of the following is NOT one of the goals at the level of society?
a) Right Understanding b) Fearlessness
c) Madness for profit d) Prosperity

6) Intension of a human being is the same as _____.
a) Natural acceptance b) Competence
c) Thought d) Pre-conditioning

7) Harmony should be maintained in _____.
a) Between body and life b) Between self and body
c) Between self and society d) All of the above

8) If something is _____ to us without any force or compulsion, then it is often correct and does not change with time and people.

a) Not acceptable
b) Completely acceptable
c) Naturally acceptable
d) Less acceptable

9) Nurturing on the Body depends upon _____.

a) Ingestion
b) Digestion
c) Excretion
d) All of the above

10) Sensation is related to _____.

a) Body
b) Self 'I'
c) Both a and b
d) None of the above

11) Basic unit of human interaction is _____.

a) Family
b) Society
c) Group
d) None of the above

12) The Self(I) is the seer, _____.

a) Doer
b) Enjoyer
c) Doer & Enjoyer
d) None

13) PROSPERITY deals with _____.

a) Right understanding in the self
b) Fulfilment in relationship
c) Ensuring more than required physical facility
d) None

14) When we expect feelings from others for our happiness, it is a state of _____.

a) Swatantrata
b) Partantrata
c) Prosperity
d) None

15) For continuity of happiness, what is essential?

a) Right understanding in the Self
b) Right feeling and right thought in the Self
c) Recognition of needs, ensure more than required, make right utilisation of it
d) All the above

16) Right Understanding and Right Feeling is matter of _____.

a) Self
b) Body
c) Both
d) None

17) Acceptance of excellence in others is called _____.

a) Gratitude
b) Reverence
c) Glory
d) None of above

18) Self and _____ are different in nature, materiality, needs and activities.

a) Prosperity
b) Right Understanding
c) Body
d) None of above

19) _____ is assuming without knowing.

a) Knowing
b) Assuming
c) Preconditioning
d) Relationship

20) Imagination is combination of _____.

a) Desire & thought
b) Desire, thought & expectation
c) Expectation & thought
d) None of above

21) Following are the basic guidelines for value education except _____.

a) Universal
b) Personal
c) Rational
d) Natural

22) Natural acceptance and _____ are the two processes of knowing.

a) Self-Actualization
b) Self-exploration
c) Self Evaluation
d) Self control

23) Human Life is lived at four levels: Individual, Family, and Society and _____.

a) Nature
b) Nurture
c) World
d) Universe

24) Value education should not be based on dogmas or blind beliefs _____.

a) True
b) False

25) Value of an entity is _____.

a) Physical Facility
b) Prosperity
c) Its participation in the larger order of which it is part
d) both a and b

26) _____ are as Basic Human Aspirations.

a) Money
b) Relationship without money
c) Physical Facility
d) Continuous Happiness and Prosperity

27) Please give the correct priority for Physical Facilities, Right Understanding and Relationship _____.

a) Physical Facilities, Right Understanding and Relationship
b) Relationship, Right Understanding and Physical Facilities
c) Right Understanding, Relationship and Physical Facilities
d) None of the above

28) Right Understanding in relationship lead to _____.

a) Mutual Happiness
b) Mutual Prosperity
c) Both a and b
d) All are wrong

29) SSDD stands for _____.

a) Sadhan Viheen Dukhi Daridra
b) Sadhan Sampan Dukhi Daridra
c) Sadhan Sampan Sukhi Samridha
d) None of the above

30) Natural acceptance does not change with _____.

a) Time
b) Place
c) Beliefs
d) All of above

31) Human being is co-existence of the _____ and the _____.

a) self, self
b) body, body
c) self, body
d) None

32) _____ is the feeling of responsibility for nurturing, protecting and right utilizing the body.

a) Swasthya
b) Sanyam
c) Prosperity
d) None

33) The _____ is an instrument of _____.

a) I, Body
b) Body, I
c) Both a and b
d) None

34) _____ is the information we get from the Body through the five sense organs.

a) Precondition
b) Sensation
c) Natural acceptance
d) None

35) Which of the following is NOT a response of the Self?

a) Knowing
b) Assuming
c) Recognising
d) Preconditioning

36) Needs of Body are quantitative whereas needs of Self are qualitative _____.

a) True
b) False

37) Sah-astitva means _____.

a) Co-existence
b) Co-operation
c) Cooption
d) Corporate identity

38) Ensuring justice in the relationship, on the basis of values leads to _____ in society.

a) Fearlessness b) Confusion
c) Confidence d) Fear

39) _____ is the complete value in relationship.

a) Respect b) Love
c) Trust d) Glory

40) The feeling to nurture and protect the body of our relative is called _____.

a) Care b) Affection
c) Gratitude d) Respect

41) _____ is the feeling of acceptance for those who have made efforts for my excellence.

a) Reverence b) Glory
c) Gratitude d) Guidance

42) We all are similar at the level of our _____ but differ in our _____.

a) Competence, Intension b) Intension, Competence
c) Competence, Competence d) None

43) Abhay means _____.

a) Right understanding b) Trust and fearlessness
c) Prosperity d) Co-existance

44) All the units of nature can be classified into _____ orders.

a) Two b) Three
c) Four d) Six

45) Which of the following does not form an order in nature?

a) Bio b) Animal
c) Consciousness d) Human

46) According to quantity, which of the following is true for the orders in nature?

a) Bio order >> Physical order >> Animal order >> Human order
b) Animal order >> Bio order >> Physical order >> Human order
c) Physical order >> Bio order >> Animal order >> Human order
d) Physical order >> Animal order >> Bio order >> Human order

47) What is NOT acceptable naturally in the nature?

a) Enrichment of nature b) Pollution in nature
c) Protection of nature d) Right Utilization of nature

48) Which of the following is NOT a unit of physical order?

a) Soil b) Air
c) Tree d) Water

49) There is justice in relationship when there is _____.

a) Self-regulation b) Freedom

c) Mutual fulfillment d) None

50) Justice from family to world family leads to _____.

a) Powerful nation

b) Strong political ties between nations

c) Undivided society

d) Disruption of the family structure

Set P

S.Y. (B.Tech. Electronics & Telecommunication Engineering) (Semester - I) (Old) (CBCS) Examination: March/April - 2025 Engineering Mathematics – III (BTN06301)

Day & Date: Saturday 17-05-2025 Max. Marks: 70
Time: 03:00 PM To 06:00 PM

Instructions: 1) Q. No. 1 is compulsory. It should be solved in the first 30 minutes in answer book Page no 03 (Starring page of the Answer Book Each question carries one mark.
2) Don't forget to Mention question paper set (P/Q/R/S) on top of Page.
3) Figures to the right indicates full marks.
4) Assume suitable data if necessary.
5) Use of non-programmable calculator is allowed.

MCQ/Objective Type Questions

Marks:14

Q.1 Choose the correct alternatives from the options. **14**

1) $\frac{1}{D+a}x$ is equal to _____.

a) $\int xe^{ax}dx$ b) $\int xe^{-ax}dx$

c) $e^{ax}\int xe^{-ax}dx$ d) $e^{-ax}\int xe^{ax}dx$

2) The general solution of the Differential equation $\frac{d^2y}{dx^2}+\frac{dy}{dx}+y=0$ is _____.

a) $c_1e^x+c_2e^{-x}$

b) $(c_1+c_2x)e^x$

c) $e^{\frac{x}{2}}\left[c_1\cos\frac{\sqrt{3}}{2}x+c_2\sin\frac{\sqrt{3}}{2}x\right]$

d) $e^{-\frac{x}{2}}\left[c_1\cos\frac{\sqrt{3}}{2}x+c_2\sin\frac{\sqrt{3}}{2}x\right]$

3) $\frac{1}{D^2+9}cos3x$ is equal to _____.

a) $\frac{x\cos 3x}{3}$ b) $\frac{x\sin 3x}{3}$

c) $\frac{x\sin 3x}{6}$ d) $-\frac{x\sin 3x}{6}$

4) The function can be expanded in Fourier series if it satisfies _____.

a) Fourier conditions b) Euler's conditions

c) Riemann's conditions d) Dirichlet's conditions

5) $f(x) = x \quad -\pi \leq x \leq 0$
$= -x \qquad 0 \leq x \leq \pi$

a) No cosine term
b) no sine term
c) both cosine and sine term
d) none

6) For a binomial distribution the $n = 6$ and $p = 1/3$ then mean and variance are _____.

a) $2, 4/3$
b) $2, 4$
c) $1/3, 3$
d) $3, 4/3$

7) If the mean of $x = 70$, the mean of $y = 149, b_{yx} = 0.7$, then the equation of the line of regression of y on x is _____.

a) $y = 0.5x + 60$
b) $y = 0.6x + 80$
c) $y = 0.7x + 100$
d) $y = 0.8x + 120$

8) The value of the integral $\int_0^\infty e^{-3t} \cos t \ dt$ is _____.

a) $\frac{3}{10}$
b) $-\frac{3}{10}$
c) 3
d) 10

9) $L^{-1}\left\{\frac{1}{s^2}\right\} =$ _____.

a) $\frac{t^2}{2!}$
b) $\frac{t}{2}$
c) t^2
d) t

10) The formula used for solving the equation using Regula Falsi method is _____.

I) $x = \frac{bf(a) - af(b)}{f(a) - f(b)}$

II) $x = \frac{af(b) - bf(a)}{f(a) - f(b)}$

a) Only I is correct
b) Only II is Correct
c) Both I, II are correct
d) Both I, 11 are Incorrect

11) If $L\{f(t)\} = \frac{1}{s} e^{-1/s}$, then $L\{f(3t)\} =$ _____.

a) $\frac{1}{s} e^{-3/s}$
b) $\frac{1}{3s} e^{-3/s}$
c) $\frac{1}{3} e^{-3/s}$
d) $\frac{1}{3} e^{-s/3}$

12) In case of Simpson's $(1/3)^{rd}$ rule, the interval is divided into _____.

a) Equal even number of subintervals
b) Equal odd number of subintervals
c) Equal even or odd of subintervals
d) Any number of subintervals

13) The Fourier sine transform of $f(x) = e^{-x}, x \geq 0$ is _____.

a) $\frac{s}{1+s^2}$

b) $\frac{2}{\pi}.\frac{s}{1+s^2}$

c) $\frac{s}{1-s^2}$

d) $\sqrt{\frac{2}{\pi}}.\frac{s}{1+s^2}$

14) The Fourier Cosine integral form of $f(x)$ is _____.

a) $\int_0^\infty f(s)\cos ws\, ds$

b) $\int_0^\infty \cos wx \left(\int_0^\infty f(s)\cos ws\, ds\right) dw$

c) $\frac{2}{\pi}\int_0^\infty \cos wx \left(\int_0^\infty f(s)\cos ws\, ds\right) dw$

d) None of these

S.Y. (B.Tech. Electronics & Telecommunication Engineering) (Semester - I) (Old) (CBCS) Examination: March/April - 2025
Engineering Mathematics – III (BTN06301)

Day & Date: Saturday 17-05-2025 Max. Marks: 56
Time: 03:00 PM To 06:00 PM

Instructions: 1) All questions are compulsory.
2) Figures to the right indicate full marks.
3) Assume suitable data if necessary.
4) Use of non-programmable calculators is allowed.

Section – I

Q.2 Attempt any three of the following question. **09**

a) Solve $(D^3 - 2D^2 - 5D + 6)y = e^{4x}$

b) Solve $(D^3 + D)y = \cos x$.

c) Calculate Karl Pearson's coefficient of correlation
$\sum x = 120, \sum y = 100, \sum x^2 = 650, \sum y^2 = 450, \sum xy = 500, N = 25$

d) Find the Fourier half range sine series of $\begin{matrix} f(x) = mx & 0 \le x \le \frac{\pi}{2} \\ = m(\pi - x) & \frac{\pi}{2} \le x < \pi \end{matrix}$

e) Four coins are tossed 160 times and the following results were obtained.

No. of head:	0	1	2	3	4
Frequency:	17	52	54	31	6

Fit a Binomial distribution

Q.3 Attempt any three of the following question. **09**

a) Solve $(D^2 - 4)y = x \cos x$.

b) Find the Fourier half range cosine series of $f(x) = x - x^2$ $0 \le x \le 1$.

c) An insurance company found that only 0.01 per cent of the population is involved in a certain type of accident each year. If its 1000 policyholders were randomly selected from the population, what is the probability that more than two of its clients are involved in such an accident next year?

d) The line of regression of y on x is $10y = x + 17$ and the line of regression of x on y is $x = 5y - 7$. Find
i) means of x and y
ii) the coefficient of correlation r

e) Find the Fourier expansion of $f(x) = x$ in $(-1,1)$

Q.4 Attempt any two of the following question. **10**

a) The life -time of certain type of battery has mean life of 400 hours and a standard deviation of 50 hours. Assuming the distribution of life -time to be normal, Find

i) percentage of batteries which have life time of more than 350 hours

ii) the population of batteries which have life time between 300 and 500 hours (For $S.N.V.Z$ area between $z = 0$ and $z = 1$ is 0.3413, For $z = 0$ and $z = 2$ is 0.4772)

b) Find the Fourier expansion of $f(x) = \pi x \quad 0 < x \leq 1$
$= 0 \quad 1 < x \leq 2$

c) Solve $(D^2 + D)y = \frac{1}{1+e^x}$

Section – II

Q.5 Solve any Three of the following. **09**

a) Calculate $L\{te^{3t}\sin^2 3t\}$

b) Find the root of the equation $x^3 - 5.4x^2 + 9.24x - 5.096 = 0$ given that it is near to 1.5 by using Newton Raphson method.

c) Find the Fourier Transform of $f(x) = e^{-x^2/2}$

d) Find $L^{-1}\left\{\frac{1}{(s^2+1)(s^2+9)}\right\}$ by using Convolution theorem.

e) Apply Trapezoidal rule to evaluate $\int_0^1 \frac{x^2}{1+x^3}dx$ with $h = 0.25$

Q.6 Solve any Three of the following. **09**

a) Calculate $L\left\{\int_0^t \frac{e^{-3u}\sin 2u}{u}du\right\}$

b) Find the Fourier sine transform of $f(x) = \frac{1}{x}$

c) Apply Gaussian Quadrature 2-point formula to evaluate $\int_{-2}^{2} e^{-x/2}dx$

d) Calculate inverse Laplace transform of $\tan^{-1}\left(\frac{2}{s}\right)$

e) Evaluate by using Simpson's three-eighth rule $\int_0^6 \frac{1}{1+x^2}\,dx$ Also check the result with actual result.

Q.7 Solve any Two of the following. **10**

a) Solve the system of non-linear equations $x^2 + y = 11, y^2 + x = 7$ take initial approximations as $x_0 = 3.5$ and $y_0 = -1.5$

b) Express $f(x) = \sin x, 0 \leq x < \pi$
$= 0, x = \pi$
$= 0, x > \pi$

as Fourier integral and hence deduce that $\int_0^\infty \frac{\cos(\omega\pi/2)}{1-\omega^2}d\omega = \frac{\pi}{2}$.

c) Using Laplace transform method solve $y''(t) - 2y'(t) + y(t) = e^t$, with $y(0) = 2. y'(0) = -1$

Seat No.

MCQ/Objective Type Questions

Marks:14

Q.1 Choose the correct alternatives from the options. **14**

1) The value of the integral $\int_0^\infty e^{-3t}\cos t\ dt$ is _____.

a) $\frac{3}{10}$ b) $-\frac{3}{10}$

c) 3 d) 10

2) $L^{-1}\left\{\frac{1}{s^2}\right\} =$ _____.

a) $\frac{t^2}{2!}$ b) $\frac{t}{2}$

c) t^2 d) t

3) The formula used for solving the equation using Regula Falsi method is _____.

I) $x = \frac{bf(a) - af(b)}{f(a) - f(b)}$

II) $x = \frac{af(b) - bf(a)}{f(a) - f(b)}$

a) Only I is correct b) Only II is Correct

c) Both I, II are correct d) Both I, 11 are Incorrect

4) If $L\{f(t)\} = \frac{1}{s}e^{-1/s}$, then $L\{f(3t)\} =$ _____.

a) $\frac{1}{s}e^{-3/s}$ b) $\frac{1}{3s}e^{-3/s}$

c) $\frac{1}{3}e^{-3/s}$ d) $\frac{1}{3}e^{-s/3}$

5) In case of Simpson's $(1/3)^{rd}$ rule, the interval is divided into _____.

a) Equal even number of subintervals
b) Equal odd number of subintervals
c) Equal even or odd of subintervals
d) Any number of subintervals

____

6) The Fourier sine transform of $f(x) = e^{-x}, x \geq 0$ is _____.

a) $\frac{s}{1+s^2}$ b) $\frac{2}{\pi}.\frac{s}{1+s^2}$

c) $\frac{s}{1-s^2}$ d) $\sqrt{\frac{2}{\pi}}.\frac{s}{1+s^2}$

7) The Fourier Cosine integral form of $f(x)$ is _____.

a) $\int_0^\infty f(s)\cos ws\, ds$

b) $\int_0^\infty \cos wx \left(\int_0^\infty f(s)\cos ws\, ds\right) dw$

c) $\frac{2}{\pi}\int_0^\infty \cos wx \left(\int_0^\infty f(s)\cos ws\, ds\right) dw$

d) None of these

8) $\frac{1}{D+a}x$ is equal to _____.

a) $\int xe^{ax}dx$ b) $\int xe^{-ax}dx$

c) $e^{ax}\int xe^{-ax}dx$ d) $e^{-ax}\int xe^{ax}dx$

9) The general solution of the Differential equation $\frac{d^2y}{dx^2} + \frac{dy}{dx} + y = 0$ is _____.

a) $c_1e^x + c_2e^{-x}$

b) $(c_1 + c_2x)e^x$

c) $e^{\frac{x}{2}}\left[c_1\cos\frac{\sqrt{3}}{2}x + c_2\sin\frac{\sqrt{3}}{2}x\right]$

d) $e^{-\frac{x}{2}}\left[c_1\cos\frac{\sqrt{3}}{2}x + c_2\sin\frac{\sqrt{3}}{2}x\right]$

10) $\frac{1}{D^2+9} cos3x$ is equal to _____.

a) $\frac{x \cos 3x}{3}$ b) $\frac{x \sin 3x}{3}$

c) $\frac{x \sin 3x}{6}$ d) $-\frac{x \sin 3x}{6}$

11) The function can be expanded in Fourier series if it satisfies _____.

a) Fourier conditions b) Euler's conditions

c) Riemann's conditions d) Dirichlet's conditions

12) $f(x) = x \quad -\pi \leq x \leq 0$
$= -x \quad 0 \leq x \leq \pi$

a) No cosine term b) no sine term

c) both cosine and sine term d) none

13) For a binomial distribution the $n = 6$ and $p = 1/3$ then mean and variance are _____.

a) $2, 4/3$ b) $2, 4$

c) $1/3,3$ d) $3, 4/3$

14) If the mean of $x = 70$, the mean of $y = 149, b_{yx} = 0.7$, then the equation of the line of regression of y on x is _____.

a) $y = 0.5x + 60$ b) $y = 0.6x + 80$

c) $y = 0.7x + 100$ d) $y = 0.8x + 120$

Time: 03:00 PM To 06:00 PM

Instructions: 1) Q. No. 1 is compulsory. It should be solved in the first 30 minutes in answer book Page no 03 (Starring page of the Answer Book Each question carries one mark.
2) Don't forget to Mention question paper set (P/Q/R/S) on top of Page.
3) Figures to the right indicates full marks.
4) Assume suitable data if necessary.
5) Use of non-programmable calculator is allowed.

MCQ/Objective Type Questions

Marks:14

Q.1 Choose the correct alternatives from the options. **14**

1) If $L\{f(t)\} = \frac{1}{s}e^{-1/s}$, then $L\{f(3t)\} =$ _____.

a) $\frac{1}{s}e^{-3/s}$ b) $\frac{1}{3s}e^{-3/s}$

c) $\frac{1}{3}e^{-3/s}$ d) $\frac{1}{3}e^{-s/3}$

2) In case of Simpson's $(1/3)^{rd}$ rule, the interval is divided into _____.

a) Equal even number of subintervals
b) Equal odd number of subintervals
c) Equal even or odd of subintervals
d) Any number of subintervals

3) The Fourier sine transform of $f(x) = e^{-x}, x \geq 0$ is _____.

a) $\frac{s}{1+s^2}$ b) $\frac{2}{\pi}.\frac{s}{1+s^2}$

c) $\frac{s}{1-s^2}$ d) $\sqrt{\frac{2}{\pi}}.\frac{s}{1+s^2}$

4) The Fourier Cosine integral form of $f(x)$ is _____.

a) $\int_0^\infty f(s)\cos ws\, ds$

b) $\int_0^\infty \cos wx \left(\int_0^\infty f(s)\cos ws\, ds\right) dw$

c) $\frac{2}{\pi}\int_0^\infty \cos wx \left(\int_0^\infty f(s)\cos ws\, ds\right) dw$

d) None of these

5) $\frac{1}{D+a}x$ is equal to _____.

a) $\int xe^{ax}dx$ b) $\int xe^{-ax}dx$

c) $e^{ax}\int xe^{-ax}dx$ d) $e^{-ax}\int xe^{ax}dx$

6) The general solution of the Differential equation $\frac{d^2y}{dx^2}+\frac{dy}{dx}+y=0$ is _____.

a) $c_1e^x + c_2e^{-x}$

b) $(c_1 + c_2x)e^x$

c) $e^{\frac{x}{2}}\left[c_1\cos\frac{\sqrt{3}}{2}x + c_2\sin\frac{\sqrt{3}}{2}x\right]$

d) $e^{-\frac{x}{2}}\left[c_1\cos\frac{\sqrt{3}}{2}x + c_2\sin\frac{\sqrt{3}}{2}x\right]$

7) $\frac{1}{D^2+9}cos3x$ is equal to _____.

a) $\frac{x\cos 3x}{3}$ b) $\frac{x\sin 3x}{3}$

c) $\frac{x\sin 3x}{6}$ d) $-\frac{x\sin 3x}{6}$

8) The function can be expanded in Fourier series if it satisfies _____.

a) Fourier conditions b) Euler's conditions

c) Riemann's conditions d) Dirichlet's conditions ___

9) $f(x) = x \quad -\pi \le x \le 0$
$\quad = -x \quad 0 \le x \le \pi$

a) No cosine term b) no sine term

c) both cosine and sine term d) none

10) For a binomial distribution the $n = 6$ and $p = 1/3$ then mean and variance are _____.

a) $2, 4/3$ b) $2, 4$

c) $1/3, 3$ d) $3, 4/3$

11) If the mean of $x = 70$, the mean of $y = 149, b_{yx} = 0.7$, then the equation of the line of regression of y on x is _____.

a) $y = 0.5x + 60$ b) $y = 0.6x + 80$

c) $y = 0.7x + 100$ d) $y = 0.8x + 120$

12) The value of the integral $\int_0^\infty e^{-3t} \cos t \ dt$ is _____.

a) $\frac{3}{10}$ b) $-\frac{3}{10}$

c) 3 d) 10

13) $L^{-1}\left\{\frac{1}{s^2}\right\} =$ _____.

a) $\frac{t^2}{2!}$ b) $\frac{t}{2}$

c) t^2 d) t

14) The formula used for solving the equation using Regula Falsi method is _____.

I) $x = \frac{bf(a) - af(b)}{f(a) - f(b)}$

II) $x = \frac{af(b) - bf(a)}{f(a) - f(b)}$

a) Only I is correct b) Only II is Correct

c) Both I, II are correct d) Both I, 11 are Incorrect

Time: 03:00 PM To 06:00 PM

Instructions: 1) All questions are compulsory.
2) Figures to the right indicate full marks.
3) Assume suitable data if necessary.
4) Use of non-programmable calculators is allowed.

Section – I

Q.2 Attempt any three of the following question. **09**

a) Solve $(D^3 - 2D^2 - 5D + 6)y = e^{4x}$

b) Solve $(D^3 + D)y = \cos x.$

c) Calculate Karl Pearson's coefficient of correlation
$\sum x = 120, \sum y = 100, \sum x^2 = 650, \sum y^2 = 450, \sum xy = 500, N = 25$

d) Find the Fourier half range sine series of $\begin{matrix} f(x) = mx & 0 \le x \le \frac{\pi}{2} \\ = m(\pi - x) & \frac{\pi}{2} \le x < \pi \end{matrix}$

e) Four coins are tossed 160 times and the following results were obtained.

No. of head:	0	1	2	3	4
Frequency:	17	52	54	31	6

Fit a Binomial distribution

Q.3 Attempt any three of the following question. **09**

a) Solve $(D^2 - 4)y = x \cos x.$

b) Find the Fourier half range cosine series of $f(x) = x - x^2$ $0 \le x \le 1.$

c) An insurance company found that only 0.01 per cent of the population is involved in a certain type of accident each year. If its 1000 policyholders were randomly selected from the population, what is the probability that more than two of its clients are involved in such an accident next year?

d) The line of regression of y on x is $10y = x + 17$ and the line of regression of x on y is $x = 5y - 7$. Find
i) means of x and y
ii) the coefficient of correlation r

e) Find the Fourier expansion of $f(x) = x$ in $(-1,1)$

Q.4 Attempt any two of the following question. **10**

a) The life -time of certain type of battery has mean life of 400 hours and a standard deviation of 50 hours. Assuming the distribution of life -time to be normal, Find

i) percentage of batteries which have life time of more than 350 hours

ii) the population of batteries which have life time between 300 and 500 hours (For $S.N.V.Z$ area between $z = 0$ and $z = 1$ is 0.3413, For $z = 0$ and $z = 2$ is 0.4772)

b) Find the Fourier expansion of $f(x) = \pi x \quad 0 < x \leq 1$
$= 0 \quad 1 < x \leq 2$

c) Solve $(D^2 + D)y = \frac{1}{1+e^x}$

Section – II

Q.5 Solve any Three of the following. **09**

a) Calculate $L\{te^{3t}\sin^2 3t\}$

b) Find the root of the equation $x^3 - 5.4x^2 + 9.24x - 5.096 = 0$ given that it is near to 1.5 by using Newton Raphson method.

c) Find the Fourier Transform of $f(x) = e^{-x^2/2}$

d) Find $L^{-1}\left\{\frac{1}{(s^2+1)(s^2+9)}\right\}$ by using Convolution theorem.

e) Apply Trapezoidal rule to evaluate $\int_0^1 \frac{x^2}{1+x^3}dx$ with $h = 0.25$

Q.6 Solve any Three of the following. **09**

a) Calculate $L\left\{\int_0^t \frac{e^{-3u}\sin 2u}{u}du\right\}$

b) Find the Fourier sine transform of $f(x) = \frac{1}{x}$

c) Apply Gaussian Quadrature 2-point formula to evaluate $\int_{-2}^{2} e^{-x/2}dx$

d) Calculate inverse Laplace transform of $\tan^{-1}\left(\frac{2}{s}\right)$

e) Evaluate by using Simpson's three-eighth rule $\int_0^6 \frac{1}{1+x^2}\,dx$ Also check the result with actual result.

Q.7 Solve any Two of the following. **10**

a) Solve the system of non-linear equations $x^2 + y = 11, y^2 + x = 7$ take initial approximations as $x_0 = 3.5$ and $y_0 = -1.5$

b) Express $f(x) = \sin x, 0 \leq x < \pi$
$= 0, x = \pi$
$= 0, x > \pi$

as Fourier integral and hence deduce that $\int_0^\infty \frac{\cos(\omega\pi/2)}{1-\omega^2}d\omega = \frac{\pi}{2}$.

c) Using Laplace transform method solve $y''(t) - 2y'(t) + y(t) = e^t$, with $y(0) = 2. y'(0) = -1$

MCQ/Objective Type Questions

Marks:14

Q.1 Choose the correct alternatives from the options. **14**

1) For a binomial distribution the $n = 6$ and $p = 1/3$ then mean and variance are _____.

a) $2, 4/3$ b) $2, 4$

c) $1/3, 3$ d) $3, 4/3$

2) If the mean of $x = 70$, the mean of $y = 149, b_{yx} = 0.7$, then the equation of the line of regression of y on x is _____.

a) $y = 0.5x + 60$ b) $y = 0.6x + 80$

c) $y = 0.7x + 100$ d) $y = 0.8x + 120$

3) The value of the integral $\int_0^\infty e^{-3t} \cos t \ dt$ is _____.

a) $\frac{3}{10}$ b) $-\frac{3}{10}$

c) 3 d) 10

4) $L^{-1}\left\{\frac{1}{s^2}\right\} =$ _____.

a) $\frac{t^2}{2!}$ b) $\frac{t}{2}$

c) t^2 d) t

5) The formula used for solving the equation using Regula Falsi method is _____.

I) $x = \dfrac{bf(a) - af(b)}{f(a) - f(b)}$

II) $x = \dfrac{af(b) - bf(a)}{f(a) - f(b)}$

a) Only I is correct
b) Only II is Correct
c) Both I, II are correct
d) Both I, 11 are Incorrect

6) If $L\{f(t)\} = \frac{1}{s}e^{-1/s}$, then $L\{f(3t)\} =$ _____.

a) $\dfrac{1}{s}e^{-3/s}$
b) $\dfrac{1}{3s}e^{-3/s}$
c) $\dfrac{1}{3}e^{-3/s}$
d) $\dfrac{1}{3}e^{-s/3}$

7) In case of Simpson's $(1/3)^{rd}$ rule, the interval is divided into _____.

a) Equal even number of subintervals
b) Equal odd number of subintervals
c) Equal even or odd of subintervals
d) Any number of subintervals

8) The Fourier sine transform of $f(x) = e^{-x}, x \geq 0$ is _____.

a) $\dfrac{s}{1+s^2}$
b) $\dfrac{2}{\pi}.\dfrac{s}{1+s^2}$
c) $\dfrac{s}{1-s^2}$
d) $\sqrt{\dfrac{2}{\pi}}.\dfrac{s}{1+s^2}$

9) The Fourier Cosine integral form of $f(x)$ is _____.

a) $\displaystyle\int_0^\infty f(s)\cos ws\, ds$

b) $\displaystyle\int_0^\infty \cos wx \left(\int_0^\infty f(s)\cos ws\, ds\right) dw$

c) $\dfrac{2}{\pi}\displaystyle\int_0^\infty \cos wx \left(\int_0^\infty f(s)\cos ws\, ds\right) dw$

d) None of these

10) $\frac{1}{D+a}x$ is equal to _____.

a) $\int xe^{ax}dx$
b) $\int xe^{-ax}dx$
c) $e^{ax}\int xe^{-ax}dx$
d) $e^{-ax}\int xe^{ax}dx$

11) The general solution of the Differential equation $\frac{d^2y}{dx^2}+\frac{dy}{dx}+y=0$ is _____.

a) $c_1e^x+c_2e^{-x}$

b) $(c_1+c_2x)e^x$

c) $e^{\frac{x}{2}}\left[c_1\cos\frac{\sqrt{3}}{2}x+c_2\sin\frac{\sqrt{3}}{2}x\right]$

d) $e^{-\frac{x}{2}}\left[c_1\cos\frac{\sqrt{3}}{2}x+c_2\sin\frac{\sqrt{3}}{2}x\right]$

12) $\frac{1}{D^2+9}cos3x$ is equal to _____.

a) $\frac{x\cos 3x}{3}$ b) $\frac{x\sin 3x}{3}$

c) $\frac{x\sin 3x}{6}$ d) $-\frac{x\sin 3x}{6}$

13) The function can be expanded in Fourier series if it satisfies _____.

a) Fourier conditions b) Euler's conditions

c) Riemann's conditions d) Dirichlet's conditions ____

14) $f(x)=x \quad -\pi\le x\le 0$
$\quad =-x \quad 0\le x\le\pi$

a) No cosine term b) no sine term

c) both cosine and sine term d) none

MCQ/Objective Type Questions

Duration: 30 Minutes Marks:14

Q.1 Multiple Choice Questions. **14**

1) For switching application, BJT is to be operated in _____.
a) active mode
b) cut-off mode
c) saturation mode
d) both saturation and cut-off modes

2) In voltage divider bias, VCC = 25 V; R1 = 10 kΩ; R2 = 2.2 V; RC = 3.6 V and RE =1 kΩ. What is the emitter voltage? Assume BJT in saturation region.
a) 6.7 V b) 5.43 V
c) 4.9 V d) 3.8 V

3) If a three-stage amplifier has individual stage gains of 10db, 6db and 15db; then the total gain in db is _____.
a) 600db b) 31 db
c) 14db d) 24db

4) When multistage amplifier is to amplify d.c. signal, then coupling used is _____.
a) RC b) Transformer
c) Direct d) none of the above

5) If D=0.2, Av=50, k=0.01 Distortion factor with feedback is _____.
a) 133.3% b) 1.33%
c) 13.33% d) 40.00%

6) When current series negative feedback is applied to an amplifier, its output resistance _____.

a) Increases b) Decreases
c) Does not change d) Become unpredictable

7) If the output of an amplifier is 10V and 100mV from the output is fed back to the input, then feedback fraction is _____.

a) 0.10 b) 1
c) 0.01 d) 0.15

8) Which of the following circuits provides the highest frequency stability, _____.

a) RC phase shift oscillator b) Colpitt's oscillator
c) Crystal oscillator d) Hartley oscillator

9) In an RC phase shift oscillator, the minimum number of RC network to be connected in cascade will be _____.

a) One b) Two
c) Three d) Four

10) The maximum collector efficiency of class B power amplifier is _____.

a) 25% b) 78.5%
c) 50% d) 50% & 78.5%

11) If a transistor is operated in such a way that output current flows for 60^0 of the input signal, then it is _____ operation.

a) Class A b) Class B
c) Class C d) None of the above

12) Input impedance of JFET amplifier is _____.

a) Very low b) same as transistor
c) Very high d) Both (a) and (b)

13) MOSFET is _____.

a) Unipolar device b) Voltage controlled device
c) Current controlled device d) Both (a) and (b)

14) The region in which JFET works as variable resistance is called as _____.

a) Pinchoff region b) Ohmic region
c) Cutoff region d) None of these

Section – I

Q.2 Solve any FOUR. **16**

a) Justify output voltage signal is 180^0 out of phase with the input signal with a suitable diagram for the transistor Common Emitter amplifier.
b) Amplifier has following voltage gain Av1=10, Av2=20 and Av3=40. What is the overall gain? Also express each gain in dB scale and determine overall gain in dB.
c) Derive the equation for the stability factor for the self-bias circuit.
d) Compare the effect of voltage series, current series, current shunt and voltage shunt feedback topologies on amplifier characteristics.
e) Input resistance increases and output resistance decreases for voltage series feedback amplifier", Justify the statement.

Q.3 Solve any TWO. **12**

a) Design a single-stage CE amplifier with voltage divider bias to give a voltage gain of 40, Vopeak = 4V and stability factor 10. Assume hfe = 45, hie = 1.4kΩ.
b) Explain the working of TWO STAGE RC COUPLED amplifier and derive the expression for voltage gain, Current Gain, Power Gain, Input Resistance and Output Resistance.
c) Explain Voltage Series Feedback Amplifier with Input and Output Resistance.

Section – II

Q.4 Solve any FOUR. **16**

a) The tuned collector oscillator circuit used in the local oscillator of a radio receiver makes use of an LC tuned circuit with L1 = 58.6 μH and C1 = 300 pF. Calculate the frequency of oscillations.
b) Explain the operation of class C amplifier with neat circuit arrangement.
c) Explain Cross-over distortion in power amplifier. Explain method to eliminate this Distortion.
d) Explain operation of JFET as switch with output characteristics.
e) Explain common source JFET amplifier with its basic parameters.

Q.6 Solve any TWO. **12**

a) Explain the Colpitts Oscillator and derive the frequency of oscillation.

b) Explain the Direct coupled class A power amplifier and derive the efficiency.

c) What are different types of MOSFET? Explain working of N channel enhancement MOSFET with drain and transfer characteristics.

Duration: 30 Minutes Marks:14

Q.1 Multiple Choice Questions. **14**

1) Which of the following circuits provides the highest frequency stability, _____.
a) RC phase shift oscillator b) Colpitt's oscillator
c) Crystal oscillator d) Hartley oscillator

2) In an RC phase shift oscillator, the minimum number of RC network to be connected in cascade will be _____.
a) One b) Two
c) Three d) Four

3) The maximum collector efficiency of class B power amplifier is _____.
a) 25% b) 78.5%
c) 50% d) 50% & 78.5%

4) If a transistor is operated in such a way that output current flows for 60^0 of the input signal, then it is _____ operation.
a) Class A b) Class B
c) Class C d) None of the above

5) Input impedance of JFET amplifier is _____.
a) Very low b) same as transistor
c) Very high d) Both (a) and (b)

6) MOSFET is _____.
a) Unipolar device b) Voltage controlled device
c) Current controlled device d) Both (a) and (b)

7) The region in which JFET works as variable resistance is called as _____.

a) Pinchoff region
b) Ohmic region
c) Cutoff region
d) None of these

8) For switching application, BJT is to be operated in _____.

a) active mode
b) cut-off mode
c) saturation mode
d) both saturation and cut-off modes

9) In voltage divider bias, VCC = 25 V; R1 = 10 kΩ; R2 = 2.2 V; RC = 3.6 V and RE =1 kΩ. What is the emitter voltage? Assume BJT in saturation region.

a) 6.7 V
b) 5.43 V
c) 4.9 V
d) 3.8 V

10) If a three-stage amplifier has individual stage gains of 10db, 6db and 15db; then the total gain in db is _____.

a) 600db
b) 31 db
c) 14db
d) 24db

11) When multistage amplifier is to amplify d.c. signal, then coupling used is _____.

a) RC
b) Transformer
c) Direct
d) none of the above

12) If D=0.2, Av=50, k=0.01 Distortion factor with feedback is _____.

a) 133.3%
b) 1.33%
c) 13.33%
d) 40.00%

13) When current series negative feedback is applied to an amplifier, its output resistance _____.

a) Increases
b) Decreases
c) Does not change
d) Become unpredictable

14) If the output of an amplifier is 10V and 100mV from the output is fed back to the input, then feedback fraction is _____.

a) 0.10
b) 1
c) 0.01
d) 0.15

Set **Q**

S.Y. (B.Tech.) (Sem-I) (Old) (CBCS) Examination: March/April-2025
ELECTRONICS & TELECOMMUNICATION ENGINEERING
Electronic Circuit Analysis and Design (BTN06302)

Day & Date: Monday, 19-05-2025 Max. Marks: 56
Time: 03:00 PM To 06:00 PM

Instructions: 1) All questions are compulsory.
2) Figures to the right indicate full marks.
3) Assume suitable data if necessary.

Section – I

Q.2 Solve any FOUR. **16**

a) Justify output voltage signal is 180^0 out of phase with the input signal with a suitable diagram for the transistor Common Emitter amplifier.
b) Amplifier has following voltage gain Av1=10, Av2=20 and Av3=40. What is the overall gain? Also express each gain in dB scale and determine overall gain in dB.
c) Derive the equation for the stability factor for the self-bias circuit.
d) Compare the effect of voltage series, current series, current shunt and voltage shunt feedback topologies on amplifier characteristics.
e) Input resistance increases and output resistance decreases for voltage series feedback amplifier", Justify the statement.

Q.3 Solve any TWO. **12**

a) Design a single-stage CE amplifier with voltage divider bias to give a voltage gain of 40, Vopeak = 4V and stability factor 10. Assume hfe = 45, hie = 1.4kΩ.
b) Explain the working of TWO STAGE RC COUPLED amplifier and derive the expression for voltage gain, Current Gain, Power Gain, Input Resistance and Output Resistance.
c) Explain Voltage Series Feedback Amplifier with Input and Output Resistance.

Section – II

Q.4 Solve any FOUR. **16**

a) The tuned collector oscillator circuit used in the local oscillator of a radio receiver makes use of an LC tuned circuit with L1 = 58.6 μH and C1 = 300 pF. Calculate the frequency of oscillations.
b) Explain the operation of class C amplifier with neat circuit arrangement.
c) Explain Cross-over distortion in power amplifier. Explain method to eliminate this Distortion.
d) Explain operation of JFET as switch with output characteristics.
e) Explain common source JFET amplifier with its basic parameters.

Q.6 Solve any TWO. **12**

a) Explain the Colpitts Oscillator and derive the frequency of oscillation.

b) Explain the Direct coupled class A power amplifier and derive the efficiency.

c) What are different types of MOSFET? Explain working of N channel enhancement MOSFET with drain and transfer characteristics.

MCQ/Objective Type Questions

Duration: 30 Minutes Marks:14

Q.1 Choose the correct answers. **14**

1) A non-linear network does not satisfy ____.
a) superposition condition
b) homogeneity condition
c) both homogeneity as well as superposition condition
d) homogeneity, superposition, and associative condition

2) Under the condition of maximum power of efficiency is ____.
a) 80% b) 75%
c) 50% d) none of the above

3) Thevenin resistance Rth, is found?
a) by removing voltage sources along with their internal resistances
b) by short-circuiting the given two terminals
c) between any two 'open' terminals
d) between same open terminals as for Eth

4) In a series resonance circuit, series resonance occurs when?
a) $X_L = 1$ b) $X_C = 1$
c) $X_L = X_C$ d) $X_L = -X_C$

5) At resonant frequency, the voltage across capacitor is ____ the voltage across inductor.
a) greater than b) less than
c) greater than or equal to d) equal to

6) If a two-port network is reciprocal, then we have, with the usual notation, the following relationship ____.

a) $h_{12} = h_{21}$ b) $h_{12} = -h_{21}$

c) $h_{11} = h_{22}$ d) $h_{11}h_{22} - h_{12}h_{21} = 1$

7) Which among the following represents the precise condition of reciprocity for transmission parameters?

a) $\mathrm{AB} - \mathrm{CD} = 1$ b) $\mathrm{AD} - \mathrm{BC} = 1$

c) $\mathrm{AB} - \mathrm{BD} = 1$ d) None of the above

8) The time constant of a series RL circuit is ____.

a) L/R b) LR

c) R/L d) $e^{-R/L}$

9) Which of the following components contribute to the oscillatory nature in system?

i) R
ii) L
iii) C

a) R, L b) L, C

c) R, C d) R, L, C

10) For the system to be stable all poles & zeros of the system should lie ____.

a) In right half of s-plan b) In left half of s-plan

c) On the imaginary axis d) None

11) The polynomial to satisfy stability condition ____.

a) Z(s) is real function
b) All the roots of $P_{(s)}$ have zero real parts, or negative real parts.
c) both a) & b)
d) None

12) The value of one decibel is equal to, where N is attenuation in Nepers ____.

a) log10 (N) b) 10 log10 (N)

c) 21 log10 (N) d) 40 log10 (N)

13) A filter which passes without attenuation all frequencies up to the cut-off frequency f_c and attenuates all other frequencies greater than f_c is called?

a) high pass filter b) low pass filter

c) band elimination filter d) band pass filter

14) Which of the following is a passive element?

a) A BJT b) An Inductor

c) A FET d) An Op-amp

Seat No.

Instructions: 1) All questions are compulsory.
2) Figures to the right indicate full marks.
3) Assume suitable data if necessary.
4) Use of nonprogrammable calculator is allowed.

Section – I

Q.2 Attempt the following questions: (Any Four) **16**

a) State & explain Superposition theorem with suitable example.

b) Determine Thevenin's equivalent circuit across terminals AB for given circuit as

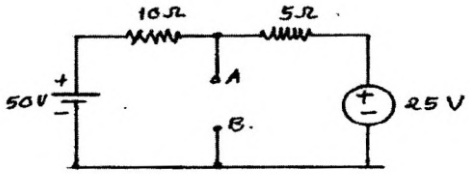

Figure 1

c) A series RLC circuit with R = 300, L= 0.5H results in a leading phase angle of 60° at a frequency of 50 Hz. At what frequency will the circuit be resonant?

d) Derive Z- parameter equations for the two-port network in terms of port voltages and currents.

e) Explain symmetrical & reciprocal two-port networks. Give their conditions.

Q.3 Attempt the following: (Any Two) **12**

a) Determine the maximum power delivered to the load in the circuit as shown in Figure 2.

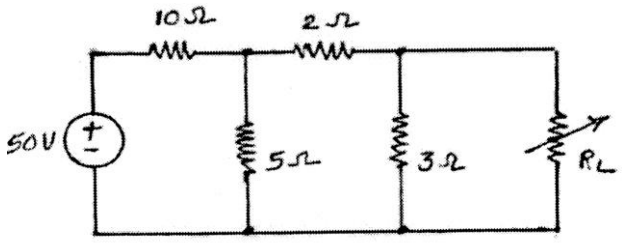

Figure 2

b) Explain parallel resonance & derive expression for resonant frequency for Tank circuit.

c) For the network shown below in Figure 3, find the Open circuit Impedance parameters.

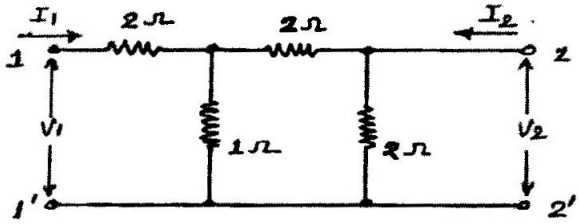

Figure 3

Section – II

Q.4 Attempt the following: (Any Four) **16**

a) Define transition state and steads state. Explain step voltage response of series RL circuit.

b) Draw pole zero plot for given function. What is condition for stability? Comment on stability of given system from pole zero plot.

$$Z(s) = \frac{8s}{(s+1)(s^2+4s+4)}$$

c) Design a low pass filter (both T and π section) having a cut off frequency of 2KHz to operate with a terminated load resistance of 500Ω.

d) A series RC circuit consists of R=10Ω and C=0.1F shown in Figure 4. Initially the switch is kept open for very long time. At t=0 switch is closed. Find the expressions for voltages across C and R and expression for current through C.

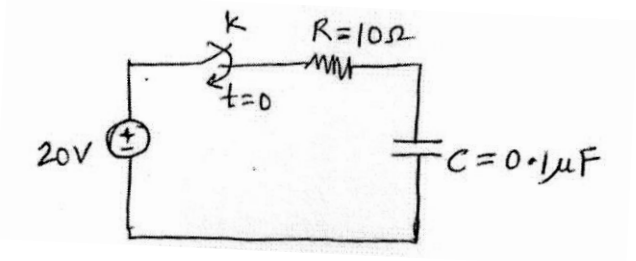

Figure 4

e) What is complex frequency? Define poles and zeros of Network function and explain their significance.

Q.5 Attempt the following: (Any Two) **12**

a) Find equation for current i(t) in Figure 5, value of current at t=0.1s Assume all initial conditions are zero.

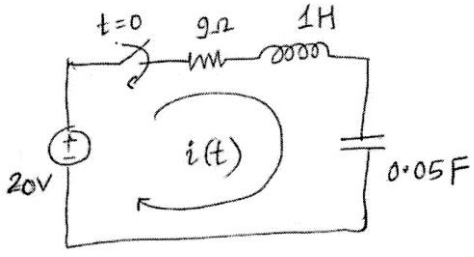

Figure 5

b) Determine the driving point impedance and driving point admittance for the given network in Figure 6.

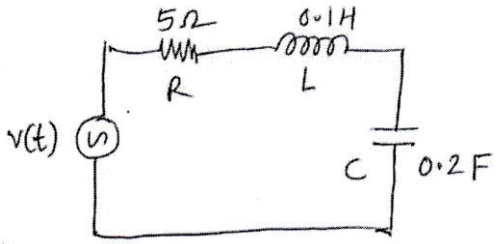

Figure 6

c) For the given network function, draw pole zero plot and hence obtain time domain response of voltage.

$$V(s) = \frac{5(s+5)}{(s+2)(s+7)}$$

$$Z(s) = \frac{8s}{(s+1)(s^2+4s+4)}$$

c) Design a low pass filter (both T and π section) having a cut off frequency of 2KHz to operate with a terminated load resistance of 500Ω.

d) A series RC circuit consists of R=10Ω and C=0.1F shown in Figure 4. Initially the switch is kept open for very long time. At t=0 switch is closed. Find the expressions for voltages across C and R and expression for current through C.

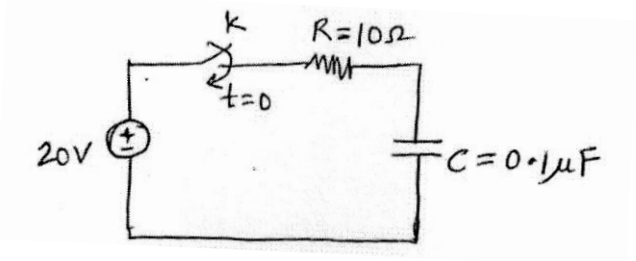

Figure 4

e) What is complex frequency? Define poles and zeros of Network function and explain their significance.

Q.5 Attempt the following: (Any Two) **12**

a) Find equation for current i(t) in Figure 5, value of current at t=0.1s Assume all initial conditions are zero.

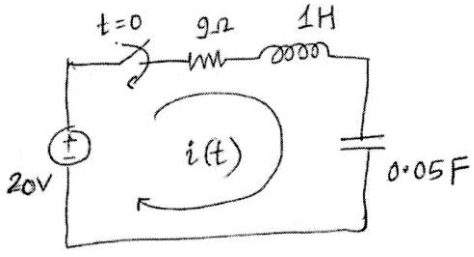

Figure 5

b) Determine the driving point impedance and driving point admittance for the given network in Figure 6.

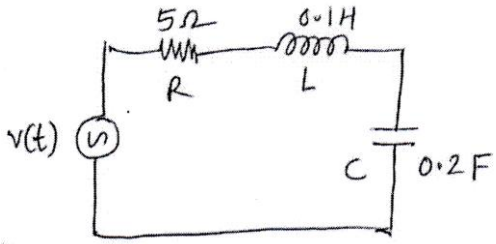

Figure 6

c) For the given network function, draw pole zero plot and hence obtain time domain response of voltage.

$$V(s) = \frac{5(s+5)}{(s+2)(s+7)}$$

S. Y. (B. Tech) (Sem - I) (Old) (CBCS) Examination: March/April-2025
ELECTRONICS & TELECOMMUNICATION ENGINEERING
Network Theory and Analysis (BTN06303)

Day & Date: Tuesday, 20-05-2025 Max. Marks: 70
Time: 03:00 PM To 06:00 PM

Instructions: 1) Q. No. 1 is compulsory. It should be solved in the first 30 minutes in answer book. Page no 03 (Starting page of the Answer Book). Each question carries one mark.
2) Don't forget to Mention question paper set (P/Q/R/S) on top of page.
3) Figures to the right indicates full marks.
4) Assume data wherever necessary.

MCQ/Objective Type Questions

Duration: 30 Minutes Marks:14

Q.1 Choose the correct answers. **14**

1) The polynomial to satisfy stability condition ____.
a) Z(s) is real function
b) All the roots of $P_{(s)}$ have zero real parts, or negative real parts.
c) both a) & b)
d) None

2) The value of one decibel is equal to, where N is attenuation in Nepers ____.
a) log10 (N) b) 10 log10 (N)
c) 21 log10 (N) d) 40 log10 (N)

3) A filter which passes without attenuation all frequencies up to the cut-off frequency f_c and attenuates all other frequencies greater than f_c is called?
a) high pass filter b) low pass filter
c) band elimination filter d) band pass filter

4) Which of the following is a passive element?
a) A BJT b) An Inductor
c) A FET d) An Op-amp

5) A non-linear network does not satisfy ____.
a) superposition condition
b) homogeneity condition
c) both homogeneity as well as superposition condition
d) homogeneity, superposition, and associative condition

6) Under the condition of maximum power of efficiency is ____.
a) 80% b) 75%
c) 50% d) none of the above

7) Thevenin resistance Rth, is found?
a) by removing voltage sources along with their internal resistances
b) by short-circuiting the given two terminals
c) between any two 'open' terminals
d) between same open terminals as for Eth

8) In a series resonance circuit, series resonance occurs when?
a) $\mathrm{X_L} = 1$ b) $\mathrm{X_C} = 1$
c) $\mathrm{X_L} = \mathrm{X_C}$ d) $\mathrm{X_L} = -\mathrm{X_C}$

9) At resonant frequency, the voltage across capacitor is ____ the voltage across inductor.
a) greater than b) less than
c) greater than or equal to d) equal to

10) If a two-port network is reciprocal, then we have, with the usual notation, the following relationship ____.
a) $h_{12} = h_{21}$ b) $h_{12} = -h_{21}$
c) $h_{11} = h_{22}$ d) $h_{11}h_{22} - h_{12}h_{21} = 1$

11) Which among the following represents the precise condition of reciprocity for transmission parameters?
a) $\mathrm{AB} - \mathrm{CD} = 1$ b) $\mathrm{AD} - \mathrm{BC} = 1$
c) $\mathrm{AB} - \mathrm{BD} = 1$ d) None of the above

12) The time constant of a series RL circuit is ____.
a) L/R b) LR
c) R/L d) $e^{-R/L}$

13) Which of the following components contribute to the oscillatory nature in system?
i) R
ii) L
iii) C
a) R, L b) L, C
c) R, C d) R, L, C

14) For the system to be stable all poles & zeros of the system should lie ____.
a) In right half of s-plan b) In left half of s-plan
c) On the imaginary axis d) None

Seat No.	

Set R

S. Y. (B. Tech) (Sem - I) (Old) (CBCS) Examination: March/April-2025
ELECTRONICS & TELECOMMUNICATION ENGINEERING
Network Theory and Analysis (BTN06303)

Day & Date: Tuesday, 20-05-2025 Max. Marks: 56
Time: 03:00 PM To 06:00 PM

Instructions: 1) All questions are compulsory.
2) Figures to the right indicate full marks.
3) Assume suitable data if necessary.
4) Use of nonprogrammable calculator is allowed.

Section – I

Q.2 Attempt the following questions: (Any Four) **16**

a) State & explain Superposition theorem with suitable example.

b) Determine Thevenin's equivalent circuit across terminals AB for given circuit as

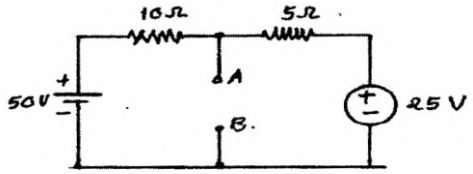

Figure 1

c) A series RLC circuit with R = 300, L= 0.5H results in a leading phase angle of 60° at a frequency of 50 Hz. At what frequency will the circuit be resonant?

d) Derive Z- parameter equations for the two-port network in terms of port voltages and currents.

e) Explain symmetrical & reciprocal two-port networks. Give their conditions.

Q.3 Attempt the following: (Any Two) **12**

a) Determine the maximum power delivered to the load in the circuit as shown in Figure 2.

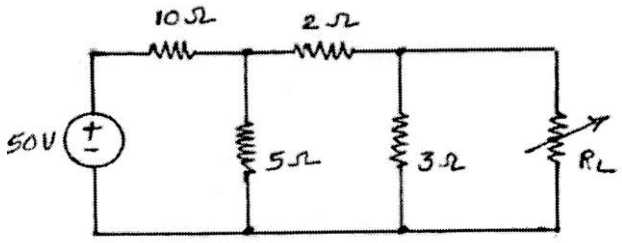

Figure 2

b) Explain parallel resonance & derive expression for resonant frequency for Tank circuit.

c) For the network shown below in Figure 3, find the Open circuit Impedance parameters.

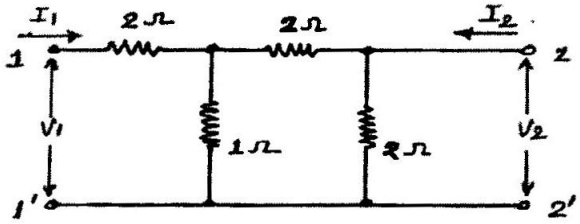

Figure 3

Section – II

Q.4 Attempt the following: (Any Four) **16**

a) Define transition state and steads state. Explain step voltage response of series RL circuit.

b) Draw pole zero plot for given function. What is condition for stability? Comment on stability of given system from pole zero plot.

$$Z(s) = \frac{8s}{(s+1)(s^2+4s+4)}$$

c) Design a low pass filter (both T and π section) having a cut off frequency of 2KHz to operate with a terminated load resistance of 500Ω.

d) A series RC circuit consists of R=10Ω and C=0.1F shown in Figure 4. Initially the switch is kept open for very long time. At t=0 switch is closed. Find the expressions for voltages across C and R and expression for current through C.

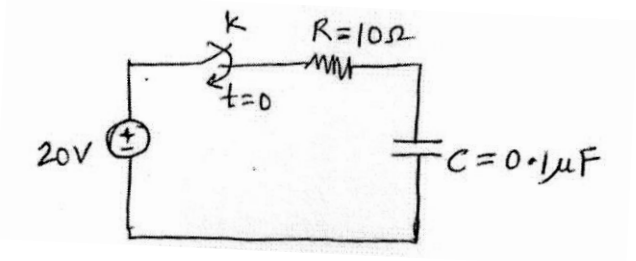

Figure 4

e) What is complex frequency? Define poles and zeros of Network function and explain their significance.

Q.5 Attempt the following: (Any Two) **12**

a) Find equation for current i(t) in Figure 5, value of current at t=0.1s Assume all initial conditions are zero.

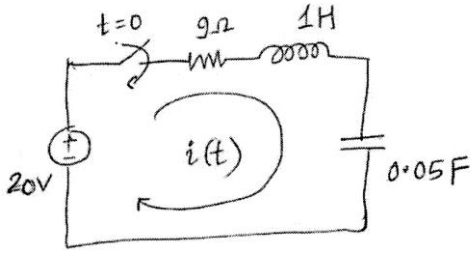

Figure 5

b) Determine the driving point impedance and driving point admittance for the given network in Figure 6.

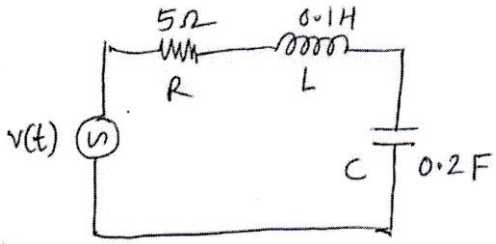

Figure 6

c) For the given network function, draw pole zero plot and hence obtain time domain response of voltage.

$$V(s) = \frac{5(s+5)}{(s+2)(s+7)}$$

MCQ/Objective Type Questions

Duration: 30 Minutes Marks:14

Q.1 Multiple Choice Questions: **14**

1) There are ____ cells in a 4-variable K-map.
a) 12 b) 16
c) 18 d) None of the Mentioned

2) The following binary system is used for K-map representation ____.
a) Binary b) BCD
c) Gray d) Hexadecimal

3) The following device selects one of the several inputs and transmits it to a single output ____.
a) Decoder b) Multiplexer
c) Demultiplexer d) Counter

4) Demultiplexer is represented by ____.
a) $2^n \times 1$ b) $2^n \times n$
c) $n \times 2^n$ d) 1×2^n

5) IC 7448 is used for ____.
a) Common anode display b) Common cathode display
c) Both(a) & (b) d) None of the above

6) SR flip-flop does not allow the input such that ____.
a) S=0, R=0 b) S=1, R=1
c) S=0, R=1 d) S=1, R=0

7) The characteristic equation of JK flip-flop is given by,____.
a) $Q_{n+1} = J\bar{Q}(n) + \bar{K}Q(n)$ b) $Q_{n+1} = JQ(n) + \bar{K}Q(n)$
c) $Q_{n+1} = J\bar{Q}(n) + KQ(n)$ d) $Q_{n+1} = J\bar{Q}(n) + \bar{K}\bar{Q}(n)$

8) An asynchronous counter differs from a synchronous counter in ____.
a) the mod number b) the type of flip-flops used
c) the method of clocking d) None of these

9) The full form of SIPO is ____.
a) Serial-in Parallel-out
b) Parallel-in Serial-out
c) Serial-in Serial-out
d) Serial-In Peripheral-Out

10) A ring counter with 5 flip flops will have ____.
a) 5 States
b) 10 States
c) 32 States
d) 25 States

11) How many clock pulses are required to completely load serially a 4 bit shift register?
a) 2
b) 3
c) 4
d) 5

12) The number of flip-flops required to implement mod-6 counter is ____.
a) 6
b) 3
c) 2
d) 5

13) The state diagram is the pictorial representation among ____.
a) present states
b) next states
c) input and output
d) all of these

14) State reduction gives, ____.
a) Reduction in number of flip-flops
b) Number of flip-flops remains same
c) (a) & (b)
d) None of these

a) Obtain the minimized expression for the function $f(A,B,C) = \pi M\ (0,1,3,4,7)$ and implement using basic gates.
b) Compare combinational and sequential circuit.
c) What is subtractor? Explain half subtractor with design.
d) Write a note on IC 7447.
e) Define the term in detail:
i) Noise margin
ii) Propagation delay

Q.3 Solve the following: (Any Two) **12**

a) Reduce given function using K-map and implement it using NOR gate only $f(A,B,C,D) = \pi M\ (0,2,5,7,8,10,13,15)$
b) Explain the design of 2-bit magnitude comparator.
c) Convert
i) D flip-flop to JK flip-flop
ii) D flip-flop to T flip-flop

Section- II

Q.4 Solve the following: (Any Four) **16**

a) Explain serial in serial out shift register.
b) Explain twisted ring counter.
c) Design MOD-3 asynchronous up counter.
d) Design MOD-7 counter using IC7490.
e) Draw the state diagram of T and D flip-flops.

Q.5 Solve the following: (Any Two) **12**

a) Explain Parallel in Serial out shift register.
b) Design asynchronous MOD 9 counter.
c) Explain state diagram, state table, and draw Moore, Mealy state diagram for D flip-flop.

Electronics & Telecommunication Engineering & Engineering
Digital Techniques (BTN06304)

Day & Date: Wednesday, 21-May-2025 Max. Marks: 70
Time: 03:00 PM To 06:00 PM

Instructions: 1) Q. No. 1 is compulsory. It should be solved in the first 30 minutes in Answer Book Page no 03 (Starting page of the Answer Book). Each question carries one mark.
2) Don't forget to Mention question paper set (P/Q/R/S) on top of page.
3) Figures to the right indicates full marks.

MCQ/Objective Type Questions

Duration: 30 Minutes Marks:14

Q.1 Multiple Choice Questions: **14**

1) SR flip-flop does not allow the input such that ____.
a) S=0, R=0 b) S=1, R=1
c) S=0, R=1 d) S=1, R=0

2) The characteristic equation of JK flip-flop is given by,____.
a) $Q_{n+1} = J\bar{Q}(n) + \bar{K}Q(n)$ b) $Q_{n+1} = JQ(n) + \bar{K}Q(n)$
c) $Q_{n+1} = J\bar{Q}(n) + KQ(n)$ d) $Q_{n+1} = J\bar{Q}(n) + \bar{K}\bar{Q}(n)$

3) An asynchronous counter differs from a synchronous counter in ____.
a) the mod number b) the type of flip-flops used
c) the method of clocking d) None of these

4) The full form of SIPO is ____.
a) Serial-in Parallel-out b) Parallel-in Serial-out
c) Serial-in Serial-out d) Serial-In Peripheral-Out

5) A ring counter with 5 flip flops will have ____.
a) 5 States b) 10 States
c) 32 States d) 25 States

6) How many clock pulses are required to completely load serially a 4 bit shift register?
a) 2 b) 3
c) 4 d) 5

7) The number of flip-flops required to implement mod-6 counter is ____.
a) 6 b) 3
c) 2 d) 5

8) The state diagram is the pictorial representation among ____.
a) present states b) next states
c) input and output d) all of these

9) State reduction gives, ____.
a) Reduction in number of flip-flops
b) Number of flip-flops remains same
c) (a) & (b)
d) None of these

10) There are ____ cells in a 4-variable K-map.
a) 12 b) 16
c) 18 d) None of the Mentioned

11) The following binary system is used for K-map representation ____.
a) Binary b) BCD
c) Gray d) Hexadecimal

12) The following device selects one of the several inputs and transmits it to a single output ____.
a) Decoder b) Multiplexer
c) Demultiplexer d) Counter

13) Demultiplexer is represented by ____.
a) $2^n \times 1$ b) $2^n \times n$
c) $n \times 2^n$ d) 1×2^n

14) IC 7448 is used for ____.
a) Common anode display b) Common cathode display
c) Both(a) & (b) d) None of the above

4) Assume suitable data if necessary.

MCQ/Objective Type Questions

Duration: 30 Minutes Marks:14

Q.1 Choose the correct Answer. **14**

1) In a communication receiver, the noise is most likely to affect the signal _____.
a) at the transmitter
b) in the channel
c) in the information source
d) at the destination

2) What is the ratio of modulating power to total power at 100% modulation?
a) 1 : 3 b) 1 : 2
c) 2 : 3 d) 3 : 2

3) Vestigial sideband modulation is used for transmission of _____.
a) HF point to point communication
b) Monaural broadcasting
c) TV broadcasting
d) Stereo broadcasting

4) The image frequency of a super heterodyne receiver _____.
a) is created within the receiver itself
b) is due to insufficient adjacent channel rejection
c) is not rejected by the IF tuned circuits
d) is independent of the frequency to which the receiver is tuned

5) A carrier is simultaneously modulated by two sine waves with modulation indices of 0.3 and 0.4. If carrier power is 10 kW, then total modulated power will be _____.
a) 12.5 kW b) 10 kW
c) 11.25 kW d) 10.5 kW

6) The equivalent noise temperature Teq of communication system varies _____.

a) Linearly with To
b) Linearly with To_2
c) Linearly with 1/To
d) Linearly with $1/To_2$

7) The M. I. of an AM wave is 50%. If carrier and one of the sideband is suppressed, then the percentage power saving is _____.

a) 66.66%
b) 83.33%
c) 50%
d) 94.44%

8) The bandwidth in frequency modulation can be calculated as _____.

a) $2(\delta + fm)$
b) $2(mf + 1)fm$
c) $2nfm$
d) All of these

9) Armstrong FM transmitter performs frequency multiplication in stages _____.

a) To increase the overall S/N ratio
b) To reduce BW
c) To find the desired value of carrier
d) For convenience frequency as well as frequency deviation

10) To boost high frequencies _____ circuit is used.

a) Amplifier
b) De-emphasis
c) Pre-emphasis
d) Filters

11) Bandwidth required by an amplitude modulated signal is _____.

a) Half the modulating signal frequency
b) Equal to carrier frequency
c) Twice the modulating signal frequency
d) Equal to modulating signal frequency

12) The audio frequency range is _____.

a) 10 Hz to 1 kHz
b) 80 MHz to 108 MHz
c) 20 Hz to 20 kHz
d) 1 kHz to 1 MHz

13) Good selectivity usually means _____ bandwidth.

a) Wide
b) Narrow
c) None of these
d) Independent of BW

14) Flicker noise is _____.

a) inversely proportional to frequency
b) directly proportional to frequency
c) independent of frequency
d) is constant over all frequencies

Time: 03:00 PM To 06:00 PM

Instructions: 1) All questions are compulsory.
2) Figures to the right indicate full marks.
3) Assume suitable data if necessary.

Section – I

Q.2 Attempt any Four **16**

a) Draw and explain the basic block diagram of communication system.
b) Prove that maximum power in AM wave is Pt = 1.5 Pc for perfect modulation.
c) The antenna current of an AM transmitter is 8 A when only the carrier is sent, but it increases to 8.93 A when the carrier is modulated by a single sine wave. Find the percentage of modulation. Determine the antenna current if depth of modulation changes to 0.8.
d) What are various SSB generation techniques? Explain phase shift method.
e) Compare AM and FM.

Q.3 Attempt any two. **12**

a) Draw and explain two stage IF amplifier. State the factors consider in choice of IF.
b) Define noise. What are the types of noise? Explain white noise.
c) Explain the different types of communication channels used in data transmission.

Section – II

Q.4 Attempt any Four. **16**

a) Differentiate between Narrowband and Wideband FM.
b) What is the need of Pre-emphasis and De-emphasis?
c) Explain the working principle of slope detector.
d) What is Nyquist rate? Explain sampling theorem.
e) An FM radio link has a frequency deviation of 30 kHz. The modulating frequency is 3 kHz. Calculate the bandwidth needed for the link. What will be the bandwidth if the deviation is reduced to 15 kHz?

Q.5 Attempt any two. **12**

a) Explain Armstrong method of FM generation.

b) With the help of circuit diagram explain the working of foster seeley discriminator.

c) Describe TDM (Time Division Multiplexing) in detail.

ELECTRONICS & TELECOMMUNICATION ENGINEERING
Signals and Systems (ENTPCC-04)

Day & Date: Monday 26-05-2025 Max. Marks: 70
Time: 10:00 AM To 01:00 PM

Instructions: 1) Q. No. 1 is compulsory. It should be solved in the first 30 minutes in Answer Book Page no 03 (Starting page of the Answer Book). Each question carries one mark.
2) Don't forget to Mention question paper set (P/Q/R/S) on top of page.
3) Figures to the right indicates full marks.
4) Assume suitable data if necessary.
5) Use of non-programmable calculator is allowed.

MCQ/Objective Type Questions

Duration: 30 Minutes Marks:14

Q.1 Choose the correct alternatives from the options **14**

1) If $x(t)$ is an odd signal then which of the following statement is true?
a) $x(t) = 0$ b) $x(t) = x(-t)$
c) $x(0) = 0$ d) None

2) Identify the non-periodic signal.
a) $x(t) = \cos 2(t)$ b) $x(t) = \cos 2\pi\, t\, u(t)$
c) $x(t) = \sin(2\,\pi/3)t$ d) None

3) If signal $f(t)$ has energy, E, the energy of signal $f(2t)$ is equal to _____
a) E b) $E/2$
c) $2E$ d) $4E$

4) The system $y[n] = x[-n]$ is _____
a) Time invariant b) Time variant
c) Both a and b d) none

5) The signal $x(n) = \cos 2n$ is _____
a) periodic with period π b) periodic with period 2
c) period with period $4\,\pi$ d) Aperiodic

6) A system is said to be defined as non-causal, when _____
a) The output at the present depends on the input at an earlier time
b) The output at the present does not depend on the factor of time at all
c) The output at the present depends on the input at the current time
d) The output at the present depends on the input at a time instant in the future

7) Convolution of $x(t+5)$ with $\delta(t-7)$ is equal to _____

a) $x(t-12)$ b) $x(t+12)$

c) $x(t-2)$ d) $x(t+2)$

8) If $x(-n)$ is signal with $x(n)=0$; for $n<-2, n>4$ then $x(n-3)$ is guaranteed to be zero for _____

a) $n<0, n>7$ b) $n<-1, n<6$

c) $n<1, n>7$ d) $n>-1, n>5$

9) Choose the correct equation for finding the output of a discrete time convolution?

a) $y[n]=\sum\times[k]h[n-k], k$ from 0 to ∞

b) $y[n]=\sum\times[k]h[n-k], k$ from -∞ to +∞

c) $y[n]=\sum\times[k]h[k], k$ from 0 to ∞

d) $y[n]=\sum\times[k]h[n], k$ from -∞ to +∞

10) Who discovered the Fourier series?

a) Jean Baptiste de Fourier

b) Jean Baptiste Joseph Fourier

c) Fourier Joseph

d) Jean Fourier

11) The Fourier transform of a unit step function is given as _____

a) $F(j\omega)=1/j\omega$ b) $F(j\omega)=j\omega$

c) $F(\omega)=j/\omega$ d) None

12) Dirichlet conditions for periodic signals are in each period _____

a) function $x(t)$ has only finite number of maxima & minima

b) function $x(t)$ has finite number of discontinuities

c) function $x(t)$ is absolutely integrable over one period

d) All of above

13) Find the Z-transform of $\delta(n+3)$.

a) z b) z2

c) 1 d) z3

14) ROC of $x(n)$ contains _____

a) poles b) zeros

c) no poles d) no zeros

Seat No.	

Set **P**

S.Y. (B.Tech.) (Sem - II) (New) (NEP CBCS) Examination: March/April-2025
ELECTRONICS & TELECOMMUNICATION ENGINEERING
Signals and Systems (ENTPCC-04)

Day & Date: Monday 26-05-2025 Max. Marks: 56
Time: 10:00 AM To 01:00 PM

Instructions: 1) All questions are compulsory.
2) Figures to the right indicate full marks.
3) Assume suitable data if necessary.
4) Use of non-programmable calculator is allowed.

Section – I

Q.2 Solve any four of the following. **16**

a) Write a list of signal classification and explain any two signals.
b) Sketch the signal $x(t) = r(t\ +1) - r(t) + r(t-1)$
c) Check whether the given system is linear or nonlinear and time variant or Invariant. $y(t) = x(n^2)$
d) Derive the equation of convolution integral and write its properties.
e) Perform the convolution between $x(t) = u(t)$ and $h(t) = e^{-t}\,u(t)$

Q.3 Solve any two of the following. **12**

a) Find the Convolution of the given sequences using multiplication method $x[n] = \{1,1,0,1,1\}$ and $h[n] = \{1,-2,-3,4\}$
b) Draw the direct form I and II of the following signals.
$4\frac{d^3y(t)}{dt^3} - 3\frac{dy(t)}{dt} + y(t) = x(t) + \frac{dx(t)}{dt}$
c) Check the system properties for the given function.
$Y(t) = x(t+10) + x^2(t)$

Section – II

Q.4 Solve any four of the following **16**

a) Explain types of Fourier series and Dirichlet's conditions.
b) For the signal $x(t) = \sin \omega o t$ find the Fourier series and draw its spectrum
c) State and prove Convolution property of Fourier series.
d) Obtain the Fourier Transform of $x(t) = te^{-t}\,u(t)$
e) State and prove time shift property of Fourier transform.

Q.5 Solve any two of the following. **12**

a) Define ROC and its properties of Z-Transform.
b) Determine Z-Transform of both sided sequence.
c) Determine Inverse Z-Transform of the following function for ROC $|Z| > 1$ and $|Z| < 0.5$
$X(Z) = \frac{1}{1-1.5Z^{-1}+0.5Z^{-2}}$

MCQ/Objective Type Questions

Duration: 30 Minutes Marks:14

Q.1 Choose the correct alternatives from the options **14**

1) If $x(-n)$ is signal with $x(n) = 0$; for $n < -2, n > 4$ then $x(n-3)$ is guaranteed to be zero for _____

a) $n < 0, n > 7$ b) $n < -1, n < 6$
c) $n < 1, n > 7$ d) $n > -1, n > 5$

2) Choose the correct equation for finding the output of a discrete time convolution?

a) $y[n] = \sum\times [k]h[n-k], k$ from 0 to ∞
b) $y[n] = \sum\times [k]h[n-k], k$ from -∞ to +∞
c) $y[n] = \sum\times [k]h[k], k$ from 0 to ∞
d) $y[n] = \sum\times [k]h[n], k$ from -∞ to +∞

3) Who discovered the Fourier series?

a) Jean Baptiste de Fourier
b) Jean Baptiste Joseph Fourier
c) Fourier Joseph
d) Jean Fourier

4) The Fourier transform of a unit step function is given as _____

a) $F(j\omega) = 1/j\omega$ b) $F(j\omega) = j\omega$
c) $F(\omega) = j/\omega$ d) None

5) Dirichlet conditions for periodic signals are in each period _____

a) function $x(t)$ has only finite number of maxima & minima
b) function $x(t)$ has finite number of discontinuities
c) function $x(t)$ is absolutely integrable over one period
d) All of above

6) Find the Z-transform of $\delta(n+3)$.

a) z b) z2
c) 1 d) z3

7) ROC of $x(n)$ contains _____

a) poles b) zeros
c) no poles d) no zeros

8) If $x(t)$ is an odd signal then which of the following statement is true?

a) $x(t) = 0$ b) $x(t) = x(-t)$
c) $x(0) = 0$ d) None

9) Identify the non-periodic signal.

a) $x(t) = \cos 2(t)$ b) $x(t) = \cos 2\pi\ t\ u(t)$
c) $x(t) = \sin(2\ \pi/3)t$ d) None

10) If signal $f(t)$ has energy, E, the energy of signal $f(2t)$ is equal to _____

a) E b) $E/2$
c) $2E$ d) $4E$

11) The system $y[n] = x[-n]$ is _____

a) Time invariant b) Time variant
c) Both a and b d) none

12) The signal $x(n) = \cos 2n$ is _____

a) periodic with period π b) periodic with period 2
c) period with period 4 π d) Aperiodic

13) A system is said to be defined as non-causal, when _____

a) The output at the present depends on the input at an earlier time
b) The output at the present does not depend on the factor of time at all
c) The output at the present depends on the input at the current time
d) The output at the present depends on the input at a time instant in the future

14) Convolution of $x(t+5)$ with $\delta(t-7)$ is equal to _____

a) $x(t-12)$ b) $x(t+12)$
c) $x(t-2)$ d) $x(t+2)$

3) Figures to the right indicates full marks.
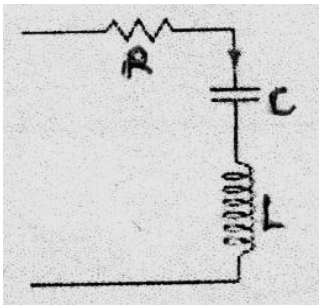
4) Assume suitable data wherever necessary and mention it clearly.

MCQ/Objective Type Questions

Duration: 30 Minutes Marks:14

Q.1 Choose the correct Answer. **14**

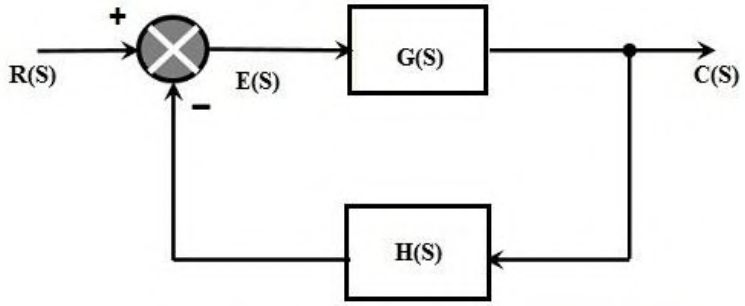
1) The output equation for given circuit is _____.



a) $Vo(S) = LsI(S) + \frac{1}{Cs}I(S)$ b) $Vo(S) = LsI(S) + \frac{1}{c}I(S)$

c) $Vo(S) = \frac{1}{Ls}I(S) + CsI(S)$ d) None of these

2) For Negative Feedback, the transfer function of closed loop control system as shown in Figure below is _____.



a) $T(S) = \frac{G(S)}{1+G(S)H(S)}$ b) $T(S) = \frac{G(S)}{1-G(S)H(S)}$

c) $T(S) = \frac{G(S)}{1+H(S)}$ d) None of these

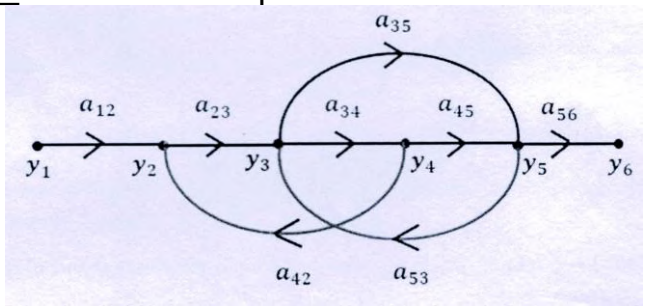
3) Transfer function is defined as _____.

a) ratio of Output to Input
b) ratio of Input to Output
c) ratio of Laplace transform of output to Laplace Transform of Input
d) ratio of Laplace transform of input to Laplace Transform of Output

4) Following is the example of closed loop system _____.

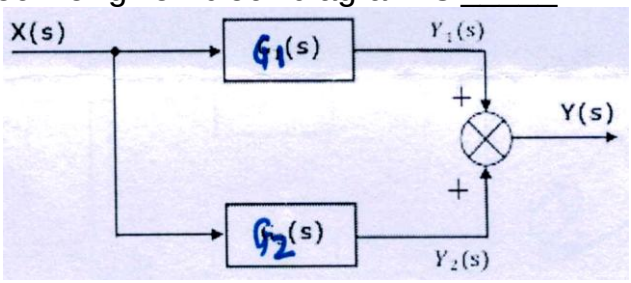
a) Electric Toaster
b) Washing Machine
c) Electric Light Switch
d) Missile Guidance system

5) The Signal Flow Graph shown below, has _____ Number of forward paths and _____ Number of Loops.



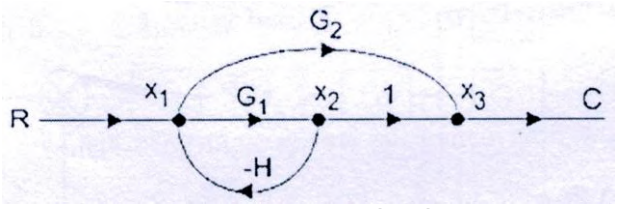
a) 2, 2
b) 2, 3
c) 3, 3
d) 3, 2

6) The Single block for given block diagram is _____.



a) $T(S) = G1(S).G2(S)$
b) $T(S) = G1(S) + G2(S)$
c) $T(S) = \frac{G1(S)}{G2(S)}$
d) None of these

7) Use Mason's Gain formula to calculate the transfer function of given figure:



a) $\mathrm{G1}/1 + \mathrm{G2H}$
b) $\frac{\mathrm{G1+G2}}{1+\mathrm{G1H}}$
c) $\mathrm{G2}/1 + \mathrm{G1H}$
d) None of these

8) The Type 1 system has _____ at the origin.

a) no pole
b) one pole
c) three poles
d) two poles

9) For Type 0 System, the Error Constants are position error = _____ Velocity error = _____ & Acceleration error = _____, where k is constant.

a) $1/(1+\mathrm{Kp}), \infty, \infty$ b) $0, 1/\mathrm{Kp}, \infty$

c) $\infty, 0, 0$ d) $\infty, \infty, 0$

10) The given system is _____.

$$T(S) = \frac{(S+10)(S+3)}{(S+20)(S+4)}$$

a) Type 2 System b) Type 0 System

c) Type 1 System d) None of these

11) Magnitude of Bode plot for a Pole is _____.

a) Line with a slope of -20dB/decade

b) Line with a slope of -6 dB/decade

c) Line with a slope of -40dB/decade

d) Straight line parallel to frequency axis

12) The Phase Angle for Asymptotic Bode at $\omega = \infty$ rad/sec, for given equation is _____.

$$G(S)H(S) = \frac{(S+1)}{(S+2)(S+5)}$$

a) $\theta = -90^0$ b) $\theta = 180^0$

c) $\theta = -270^0$ d) $\theta = 270^0$

13) If anybody wants to add Pole in the system, he/she requires to add _____ compensating network.

a) Lead -Lag Network b) Lag Network

c) Lead Network d) None of these

14) In Given Equation below, how many Poles are lies on RHS of S-Plane?

$$\Delta_{CL}(S) = s^5 + 15s^4 + 185s^3 + 725s^2 - 326s + 120 = 0$$

S^5:	1	185	-326
S^4:	15	725	120
S^3:	136.7	-334	
S^2:	761.7	120	
S^1:	-355.5		
S^0:	120		

a) 1 b) 3

c) 4 d) 2

Set **P**

S. Y. (B. Tech) (Sem - II) (New) (NEP CBCS) Examination: March/April - 2025
ELECTRONICS & TELECOMMUNICATION ENGINEERING
Control System (ENTPCC-05)

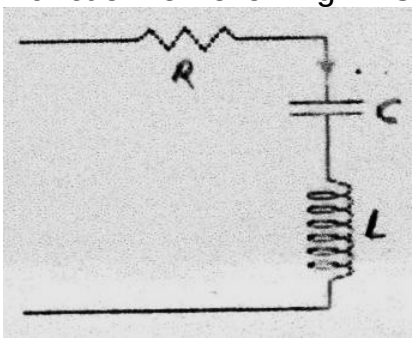
Day & Date: Wednesday 28-05-2025 Max. Marks: 56
Time: 10:00 AM To 01:00 PM

Instructions: 1) All questions are compulsory.
2) Figures to the right indicate full marks.

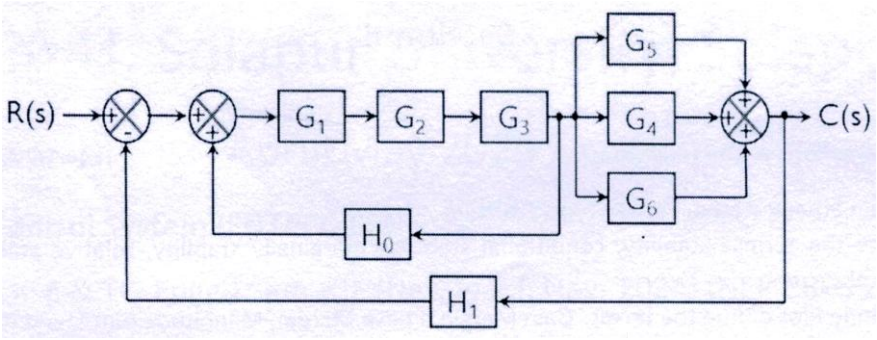
Section – I

Q.2 Attempt any four of the following questions. **16**

a) Calculate the Transfer function for following RLC circuit.



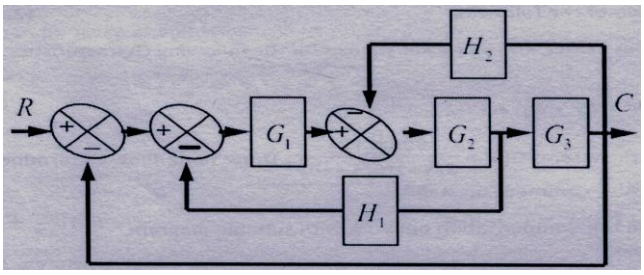
b) Explain the transfer function for closed loop control system.
c) Differentiate between Closed Loop and Open Loop system.
d) Explain Block Diagram reduction rules.
e) Define Signal Flow graph and Plot Signal flow graph for following system.



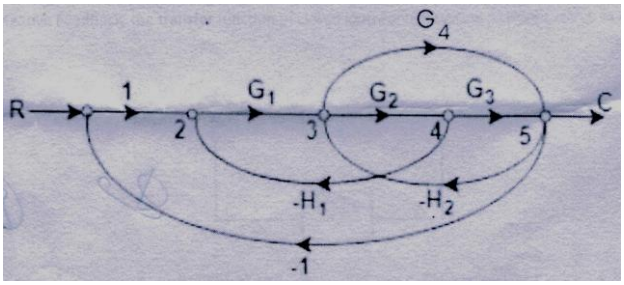
Q.3 Attempt any two of the following questions. **12**

a) Explain Missile guidance and launching system with the suitable diagram.

b) Reduce following block diagram to single block using block diagram reduction rules.



c) Calculate the transfer function for following signal flow graph using Mason's Gain formula.



Section – II

Q.4 Attempt any four of the following. **16**

a) Explain Steady state error for Type 2 system.

b) Define the terms - Stability, conditional stability, marginally stability, relative stability for the control system.

c) For Bode Plot define the terms - Gain Margin, Phase Margin, Magnitude plot, and Phase Plot.

d) Why Compensation is need in control system. Give the types of Compensating networks.

e) Test the stability of following characteristics equation using Routh - Hurwitz criterion.

$$S^6 + 2S^5 + 2S^4 + 3S^3 + 5S^2 + 6S + 1 = 0$$

Q.5 Attempt any two of the following. **12**

a) How many roots lies in RHS, LHS plane and jω axis for the following characteristics equation using Routh - Hurwitz criterion.

$$T(S) = S^5 + 2S^4 + 2S^3 + 4S^2 + S + 2$$

b) For unity feedback system, $G(S) = \frac{800(S+2)}{S(S+10)(S+40)}$ Draw Bode Plot, Determine Gain Margin, Phase Margin, ωgc, ωpc. Also comment on stability.

c) Derive and Explain Lag Compensation network with suitable diagram.

ELECTRONICS & TELECOMMUNICATION ENGINEERING
Control System (ENTPCC-05)

Day & Date: Wednesday 28-05-2025 Max. Marks: 70
Time: 10:00 AM To 01:00 PM

Instructions: 1) Q. No. 1 is compulsory. It should be solved in the first 30 minutes in Answer Book Page no 03 (Starting page of the Answer Book). Each question carries one mark.
2) Don't forget to Mention question paper set (P/Q/R/S) on top of page.
3) Figures to the right indicates full marks.
4) Assume suitable data wherever necessary and mention it clearly.

MCQ/Objective Type Questions

Duration: 30 Minutes Marks:14

Q.1 Choose the correct Answer. **14**

1) The Type 1 system has _____ at the origin.
a) no pole b) one pole
c) three poles d) two poles

2) For Type 0 System, the Error Constants are position error = _____
Velocity error = _____ & Acceleration error = _____, where k is constant.
a) $1/(1+\mathrm{Kp}), \infty, \infty$ b) $0, 1/\mathrm{Kp}, \infty$
c) $\infty, 0, 0$ d) $\infty, \infty, 0$

3) The given system is _____.

$$T(S) = \frac{(S+10)(S+3)}{(S+20)(S+4)}$$

a) Type 2 System b) Type 0 System
c) Type 1 System d) None of these

4) Magnitude of Bode plot for a Pole is _____.
a) Line with a slope of -20dB/decade
b) Line with a slope of -6 dB/decade
c) Line with a slope of -40dB/decade
d) Straight line parallel to frequency axis

5) The Phase Angle for Asymptotic Bode at $\omega = \infty$ rad/sec, for given equation is _____.

$$G(S)H(S) = \frac{(S+1)}{(S+2)(S+5)}$$

a) $\theta = -90^0$ b) $\theta = 180^0$
c) $\theta = -270^0$ d) $\theta = 270^0$

6) If anybody wants to add Pole in the system, he/she requires to add _____ compensating network.

a) Lead -Lag Network
b) Lag Network
c) Lead Network
d) None of these

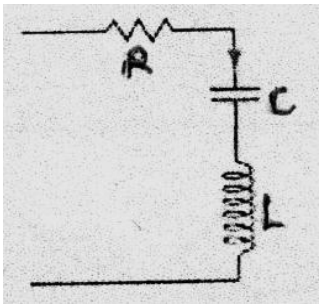
7) In Given Equation below, how many Poles are lies on RHS of S-Plane?

$$\Delta_{CL}(S) = s^5 + 15s^4 + 185s^3 + 725s^2 - 326s + 120 = 0$$

S^5:	1	185	-326
S^4:	15	725	120
S^3:	136.7	-334	
S^2:	761.7	120	
S^1:	-355.5		
S^0:	120		

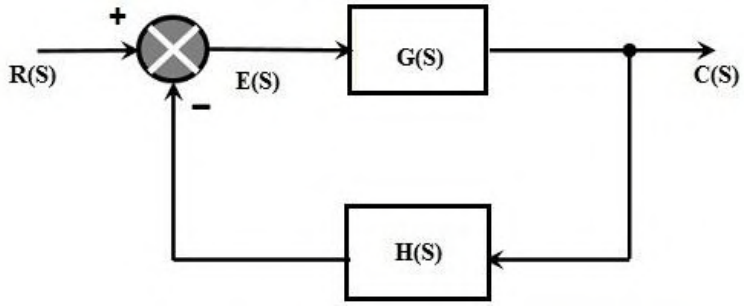
a) 1
b) 3
c) 4
d) 2

8) The output equation for given circuit is _____.



a) $Vo(S) = LsI(S) + \frac{1}{Cs}I(S)$
b) $Vo(S) = LsI(S) + \frac{1}{c}I(S)$
c) $Vo(S) = \frac{1}{Ls}I(S) + CsI(S)$
d) None of these

9) For Negative Feedback, the transfer function of closed loop control system as shown in Figure below is _____.



a) $T(S) = \frac{G(S)}{1+G(S)H(S)}$
b) $T(S) = \frac{G(S)}{1-G(S)H(S)}$
c) $T(S) = \frac{G(S)}{1+H(S)}$
d) None of these

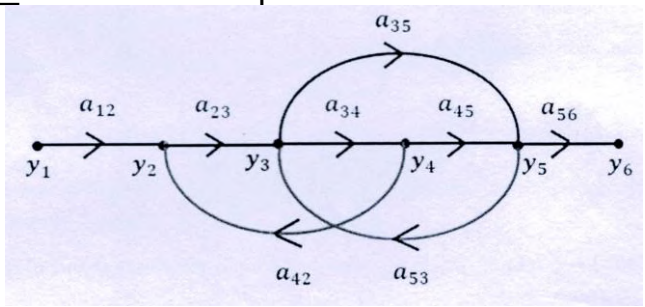
10) Transfer function is defined as _____.

a) ratio of Output to Input
b) ratio of Input to Output
c) ratio of Laplace transform of output to Laplace Transform of Input
d) ratio of Laplace transform of input to Laplace Transform of Output

11) Following is the example of closed loop system _____.

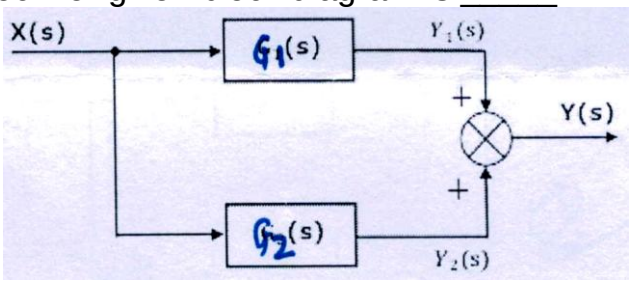
a) Electric Toaster
b) Washing Machine
c) Electric Light Switch
d) Missile Guidance system

12) The Signal Flow Graph shown below, has _____ Number of forward paths and _____ Number of Loops.



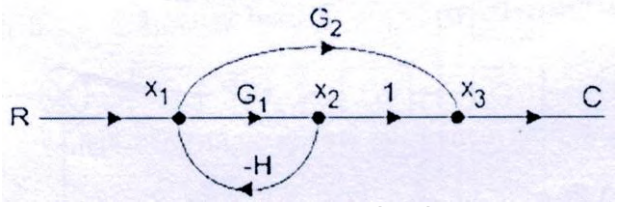
a) 2, 2
b) 2, 3
c) 3, 3
d) 3, 2

13) The Single block for given block diagram is _____.



a) $T(S) = G1(S).G2(S)$
b) $T(S) = G1(S) + G2(S)$
c) $T(S) = \frac{G1(S)}{G2(S)}$
d) None of these

14) Use Mason's Gain formula to calculate the transfer function of given figure:



a) $\mathrm{G1}/1 + \mathrm{G2H}$
b) $\frac{\mathrm{G1+G2}}{1+\mathrm{G1H}}$
c) $\mathrm{G2}/1 + \mathrm{G1H}$
d) None of these

MCQ/Objective Type Questions

Duration: 30 Minutes Marks:14

Q.1 Choose the correct answer: **14**

1) The maximum value of d Vo/dt is called _____
a) voltage ratio b) voltage rate
c) slew rate d) transient response

2) An Ideal Op-amp has _____ power supply rejection ration.
a) 0 b) Infinite
c) Negative d) Positive

3) What happens due to a mismatch between two input terminals in an op-amp?
a) Input offset voltage
b) Output offset voltage
c) Both the input and output offset voltage
d) None of the mentioned

4) A differential type amplifier in an Op-amp provides which of the following characteristics?
a) Rejection of CM signal b) High input type impedance
c) Low noise d) All the above

5) Find the type of amplifier that cannot be constructed in a differential configuration.
a) Summing amplifier b) Scaling amplifier
c) Averaging amplifier d) Subtractor

6) What is the use of the compensation capacitor in op-amp?
a) Improves the amplification of op-amp
b) Decreases the slew rate of op-amp
c) Increases the bandwidth of op-amp
d) Op-amp acts as all pass filter

7) In V-I converter with floating load where load is ____
a) Connected to ground b) Not connected to ground
c) Connected to input d) Load is zero

8) What are the features of an instrumentation amplifier?
a) Low noise b) High gain accuracy
c) Low thermal and time drift d) All of the mentioned

9) What should be the minimum time between the two zero-crossings if the output is 28 Vpp When sine wave is input, in case of IC 741, in open loop by considering the effect of slew rate?
a) 56 m sec b) 56 sec
c) 5.6 sec d) 56 msec

10) For the summing amplifier ratio of Rf/R should be _____
a) less than one b) greater than one
c) zero d) one

11) How are the square wave output generated in op-amp?
a) Op-amp is forced to operate in the positive saturation region
b) Op-amp is forced to operate in the negative saturation region
c) Op-amp is forced to operate between positive and negative saturation region
d) None of the mentioned

12) A _____ circuit converts irregular shapes into a square wave or pulse.
a) Schmitt Trigger b) Clamper
c) Peak Detector d) Window Detector

13) Active filters offer the following advantages over passive filter _____.
a) Flexibility in design b) Gain adjustment
c) Both a and b d) None of these

14) Which among the following can be used to detect the missing heart beat?
a) Monostable multivibrator b) Astable multivibrator
c) Schmitt trigger d) None of the mentioned

Seat No.	

Set **P**

S.Y. (B.Tech.) (Sem - II) (New) (NEP CBCS) Examination: March/April-2025
ELECTRONICS & TELECOMMUNICATION ENGINEERING
Analog Integrated Circuits (ENTPCC-06)

Day & Date: Friday 30-05-2025 Max. Marks: 56
Time: 10:00 AM To 01:00 PM

Instructions: 1) All questions are compulsory.
2) Figures to the right indicate full marks.
3) Assume additional suitable data if necessary and state it clearly

Section – I

Q.2 Attempt any four **16**

a) Explain the op-amp as an integrator with a waveform.
b) Explain the V to I converter with the grounded load.
c) What is slew rate? Explain its importance.
d) Design an Inverting amplifier using the op-amp 741 for a closed-loop gain of 7.
e) With a neat block diagram, explain the basic op-amp.

Q.3 Attempt any two **12**

a) Explain the following term :
i) Input offset voltag
ii) Input bias current
iii) CMRR
iv) SVRR
b) Derive the ICEQ and VCEQ for the DIBO differential amplifier.
c) Explain summing, scaling, and an averaging amplifier in an inverting configuration.

Section – II

Q.4 Attempt any four **16**

a) Draw and explain a triangular wave generator with a waveform.
b) Explain the block diagram of the PLL and give its Applications.
c) With a neat diagram, explain sample and hold circuit.
d) Explain Log amplifier.
e) Design a Second order low pass Butterworth filter with f_H= 1.5KHz.

Q.5 Attempt any two. **12**

a) Draw and explain the RC phase shift oscillator and derive the equation of frequency of oscillation.
b) Explain IC555 in Astable mode with an internal circuit diagram.
c) Give the types of precision rectifies and explain any one.

Seat No.	

Set **Q**

S.Y. (B.Tech.) (Sem - II) (New) (NEP CBCS) Examination: March/April-2025
ELECTRONICS & TELECOMMUNICATION ENGINEERING
Analog Integrated Circuits (ENTPCC-06)

Day & Date: Friday 30-05-2025 Max. Marks: 70
Time: 10:00 AM To 01:00 PM

Instructions: 1) Q. No. 1 is compulsory. It should be solved in the first 30 minutes in Answer Book Page no 03 (Starting page of the Answer Book). Each question carries one mark.
2) Don't forget to Mention question paper set (P/Q/R/S) on top of page.
3) Figures to the right indicates full marks.
4) Assume suitable fata if necessary.

MCQ/Objective Type Questions

Duration: 30 Minutes Marks:14

Q.1 Choose the correct answer: **14**

1) What are the features of an instrumentation amplifier?
a) Low noise b) High gain accuracy
c) Low thermal and time drift d) All of the mentioned

2) What should be the minimum time between the two zero-crossings if the output is 28 Vpp When sine wave is input, in case of IC 741, in open loop by considering the effect of slew rate?
a) 56 m sec b) 56 sec
c) 5.6 sec d) 56 msec

3) For the summing amplifier ratio of Rf/R should be _____
a) less than one b) greater than one
c) zero d) one

4) How are the square wave output generated in op-amp?
a) Op-amp is forced to operate in the positive saturation region
b) Op-amp is forced to operate in the negative saturation region
c) Op-amp is forced to operate between positive and negative saturation region
d) None of the mentioned

5) A _____ circuit converts irregular shapes into a square wave or pulse.
a) Schmitt Trigger b) Clamper
c) Peak Detector d) Window Detector

6) Active filters offer the following advantages over passive filter _____.
a) Flexibility in design b) Gain adjustment
c) Both a and b d) None of these

7) Which among the following can be used to detect the missing heart beat?

a) Monostable multivibrator b) Astable multivibrator
c) Schmitt trigger d) None of the mentioned

8) The maximum value of d Vo/dt is called _____

a) voltage ratio b) voltage rate
c) slew rate d) transient response

9) An Ideal Op-amp has _____ power supply rejection ration.

a) 0 b) Infinite
c) Negative d) Positive

10) What happens due to a mismatch between two input terminals in an op-amp?

a) Input offset voltage
b) Output offset voltage
c) Both the input and output offset voltage
d) None of the mentioned

11) A differential type amplifier in an Op-amp provides which of the following characteristics?

a) Rejection of CM signal b) High input type impedance
c) Low noise d) All the above

12) Find the type of amplifier that cannot be constructed in a differential configuration.

a) Summing amplifier b) Scaling amplifier
c) Averaging amplifier d) Subtractor

13) What is the use of the compensation capacitor in op-amp?

a) Improves the amplification of op-amp
b) Decreases the slew rate of op-amp
c) Increases the bandwidth of op-amp
d) Op-amp acts as all pass filter

14) In V-I converter with floating load where load is ____

a) Connected to ground b) Not connected to ground
c) Connected to input d) Load is zero

Seat No.

MCQ/Objective Type Questions

Duration: 30 Minutes Marks:14

Q.1 Choose the correct Answer. **14**

1) Innovation can be best described as: _____
a) A new idea only
b) The process of creating value through ideas
c) Invention
d) None of the above

2) Entrepreneurship is primarily related to: _____
a) Administration b) Risk-taking
c) Planning d) None of these

3) Which of the following is not an entrepreneurial competency?
a) Innovation b) Leadership
c) Laziness d) Decision making

4) An entrepreneur operates: _____
a) Outside the organization b) Within an existing company
c) As a freelancer d) None

5) "Push" type innovation comes from: _____
a) Market needs b) Customer demands
c) Internal ideas d) Suppliers

6) Agile management promotes: _____
a) Linear process b) Flexibility and iteration
c) Bureaucracy d) None

7) Blue Ocean strategy refers to: _____
a) Competing in existing markets
b) Creating new market space
c) Losing market share
d) None

8) Which of these is not a barrier to innovation?
a) Risk-taking culture b) Resistance to change
c) Lack of resources d) Poor leadership

9) The shifting composition of the economy refers to: _____
a) Stable industries b) Changing business models
c) Static job roles d) None

10) Lean start-up encourages: _____
a) High upfront investment b) Rapid prototyping
c) Formal structure d) None

11) Legal considerations for entrepreneurs include: _____
a) Taxation b) IP protection
c) Contracts d) All of these

12) One of the seven sources of innovation is: _____
a) Competitor's failure b) Demographics
c) Inflation d) GDP

13) Entrepreneurial opportunity recognition is: _____
a) Unimportant b) Intuition-based only
c) Structured process d) Not taught

Set **R**

S.Y. (B.Tech.) (Sem - II) (New) (NEP CBCS) Examination: March/April-2025
ELECTRONICS & TELECOMMUNICATION ENGINEERING
Entrepreneurship and Innovation (OE-02A)

Day & Date: Tuesday 03-06-2025 Max. Marks: 56
Time: 10:00 AM To 01:00 PM

Instructions: 1) All questions are compulsory.
2) Figures to the right indicate full marks.

Section – I

Q.2 All questions are compulsory.

a) Define innovation. Explain its relationship with entrepreneurship. **06**
b) Distinguish between Entrepreneur, Manager, and Intrapreneur. **04**

Q.3 Solve any three questions.

a) Explain classification of innovation. **06**
b) Describe the economic theories of entrepreneurship. **06**
c) Discuss need and importance of Entrepreneurship Development. **06**
d) Describe sources of innovation with examples. **06**
e) Explain Agile management and NUF test in innovation. **06**

Section – II

Q.4 All questions are compulsory.

a) Explain the purpose and process of innovation. **06**
b) What are the needs for continuous learning in innovation? **04**

Q.5 Solve any three questions.

a) Explain different types of innovative strategies. **06**
b) Describe Red Ocean vs Blue Ocean strategies. **06**
c) List barriers to innovation and explain with examples. **06**
d) Explain the entrepreneurial process and opportunity recognition. **06**
e) Write short note on Lean start-up methodology. **06**

Entrepreneurship and Innovation (OE-02A)

Day & Date: Tuesday 03-06-2025 Max. Marks: 70
Time: 10:00 AM To 01:00 PM

Instructions: 1) Q. No. 1 is compulsory. It should be solved in the first 30 minutes in Answer Book Page no 03 (Starting page of the Answer Book). Each question carries one mark.
2) Don't forget to Mention question paper set (P/Q/R/S) on top of page.
3) Figures to the right indicates full marks.
4) Use of non-programmable calculators is allowed.

MCQ/Objective Type Questions

Duration: 30 Minutes Marks:14

Q.1 Choose the correct Answer. **14**

1) Agile management promotes: _____
a) Linear process b) Flexibility and iteration
c) Bureaucracy d) None

2) Blue Ocean strategy refers to: _____
a) Competing in existing markets
b) Creating new market space
c) Losing market share
d) None

3) Which of these is not a barrier to innovation?
a) Risk-taking culture b) Resistance to change
c) Lack of resources d) Poor leadership

4) The shifting composition of the economy refers to: _____
a) Stable industries b) Changing business models
c) Static job roles d) None

5) Lean start-up encourages: _____
a) High upfront investment b) Rapid prototyping
c) Formal structure d) None

6) Legal considerations for entrepreneurs include: _____
a) Taxation b) IP protection
c) Contracts d) All of these

7) One of the seven sources of innovation is: _____
a) Competitor's failure b) Demographics
c) Inflation d) GDP

8) Entrepreneurial opportunity recognition is: _____
a) Unimportant
b) Intuition-based only
c) Structured process
d) Not taught

9) Six Thinking Hats is a method for: _____
a) Innovation testing
b) Decision-making
c) Funding
d) Legal advice

10) Innovation can be best described as: _____
a) A new idea only
b) The process of creating value through ideas
c) Invention
d) None of the above

11) Entrepreneurship is primarily related to: _____
a) Administration
b) Risk-taking
c) Planning
d) None of these

12) Which of the following is not an entrepreneurial competency?
a) Innovation
b) Leadership
c) Laziness
d) Decision making

13) An entrepreneur operates: _____
a) Outside the organization
b) Within an existing company
c) As a freelancer
d) None

14) "Push" type innovation comes from: _____
a) Market needs
b) Customer demands
c) Internal ideas
d) Suppliers

MCQ/Objective Type Questions

Duration: 30 Minutes Marks:14

Q.1 Choose the correct alternatives from the options. **14**

1) The Occupational Health and Safety Management System (OHSMS) primarily aims to: _____
a) Increase industrial profits
b) Reduce energy consumption
c) Ensure worker safety and reduce health risks in workplaces
d) Promote environmental tourism

2) In-situ conservation refers to: _____
a) Conservation of species in zoos
b) Conservation using biotechnology
c) Conservation in gene banks
d) Conservation of species in their natural habitats

3) Carbon footprint is a measure of: _____
a) Land occupied by forests
b) Energy consumption in a home
c) Greenhouse gas emissions by an activity or person
d) Amount of carbon in plants

4) The main goal of sustainability is to: _____
a) Meet present needs without compromising future needs
b) Increase profit only
c) Eliminate economic development
d) Promote urbanization

5) Which of the following is an example of hazardous waste?
a) Expired medicines b) Plastic bottles
c) Food scraps d) Paper waste

6) Biodiversity hotspots in India include: _____
a) Eastern Ghats and Indo-Gangetic Plain
b) Western Ghats and the Himalayas
c) Thar Desert and Sundarbans only
d) Deccan Plateau and Indo-Gangetic Basin

7) The 3R concept stands for: _____
a) Reuse, Reduce, Rebuild
b) Reduce, Reuse, Recycle
c) Replace, Reuse, Restore
d) Recycle, Recover, Rebuild

8) The ISO 14000 Series deals with: _____
a) Energy-efficient building design
b) Environmental Management Systems
c) Industrial Safety Standards
d) Economic Performance Indicators

9) Which of the following is a non-conventional source of energy?
a) Coal
b) Natural Gas
c) Wind
d) Diesel

10) The main goal of a circular economy is to: _____
a) Increase fossil fuel usage
b) Promote single-use products
c) Minimize waste and resource use
d) Maximize profit only

11) The first step in preparing an Environmental Impact Assessment (EIA) report is: _____
a) Cost-benefit analysis
b) Monitoring
c) Screening
d) Public hearing

12) Which of the following is not a principle of Environmental Management?
a) Polluter pays
b) Sustainability
c) Preventive action
d) Maximum profit generation

13) Cost-Benefit Analysis (CBA) in environmental policies is used to: _____
a) Maximize pollution
b) Evaluate environmental legislation
c) Compare environmental costs with economic benefits
d) Promote industrialization

14) An ecosystem consists of: _____
a) Living organisms only
b) Non-living components only
c) Living organisms and their physical environment
d) Plants and animals only

Q.2 Attempt the following **12**

a) Define the term "environment". Discuss the scope and importance of environmental studies. Why is there a need for public awareness?
b) Describe the causes and effects of air and water pollution. Suggest two preventive measures for each.
c) Define sustainability. Discuss any two major challenges in achieving sustainable development.

Q.3 Attempt Any Two **10**

a) What are hazardous wastes and e-wastes? How should they be managed?
b) What are carbon credits and carbon footprints? Explain with examples.
c) List any two Millennium Development Goals (MDGs). Mention one environmental protocol.

Q.4 Write short notes on any two of the following: **06**

a) Genetic diversity
b) India as a mega-diversity nation
c) In-situ and Ex-situ conservation

Section – II

Q.5 Write short notes on any two of the following: **10**

a) ISO 14000 Series
b) Sustainable Habitat - Green Buildings
c) Non-conventional energy sources

Q.6 Attempt the following **10**

a) Define Environmental Management. Discuss its nature, scope, and components.
b) Define the 3R concept and explain how it supports the zero waste approach.

Q.7 Attempt any two **08**

a) Define Environmental Management. Discuss its nature, scope, and components.

b) What is Environmental Policy Analysis? Distinguish between macro-level and micro-level analysis.

c) Outline the steps involved in the Environmental Impact Assessment (EIA) process.

MCQ/Objective Type Questions

Duration: 30 Minutes Marks:14

Q.1 Choose the correct Answer. **14**

1) Which is the primary advantage of using solar energy power generation?
a) Low initial coast
b) Reduce environmental impact
c) Do not require large area
d) Simple storage method

2) OTEC stands for _____.
a) Ocean thermal energy conversion
b) Ocean thermal energy Component
c) Ocean thermal energy contact
d) Ocean thermodynamic energy conversion

3) Which of the following common application of solar energy?
a) Generating electricity
b) Heating water
c) Providing power for electronic device
d) All of the above

4) Passive solar energy refers to trapping the Suns energy _____.
a) Using mechanical devices
b) without using mechanical devices
c) Using chemical
d) Incineration

5) The process or digestion taking place in the presence of air is called as _____.
a) Aerobic digestion b) Anaerobic digestion
c) Hydrolysis d) None of these

6) Which type of renewable energy resources generate low power energy?

a) Biomass b) Solar
c) Wind d) All of the above

7) In wind turbine gear box is used to _____.

a) Step up the speed b) Reduce the speed
c) shut down d) None of these

8) Geothermal energy present _____ of the earth.

a) Rotation b) Exterior
c) North side d) Interior

9) Biogas is the gaseous fuel which is obtained from biomass by means of _____ fermentation.

a) Aerobic b) Anaerobic
c) Constant d) None of the above

10) _____ is produced by blending of vegetable oil.

a) CNG b) Methane gas
c) Biofuel d) Biodisel

11) Availability of Solar energy on the earth surface is _____MW.

a) 190 billion b) 178 billion
c) 150 billion d) 250 billion

12) Energy is _____ of substance or a body to do work.

a) Obesity b) Power
c) Capacity d) None of the above

13) Wind energy used from _____ years ago.

a) 3000 b) 2000
c) 6000 d) 5000

14) The major source of the Geothermal energy is _____.

a) Water b) Hot water reservoir
c) Oil d) Gas

S.Y. (B. Tech.) (Sem-II) (New)(NEP CBCS) Examination: March/April-2025
ELECTRONICS & TELECOMMUNICATION ENGINEERING
Renewable Energy (OE-02C)

Day & Date: Tuesday, 03-June-2025 Max. Marks: 56
Time: 10:00 AM To 01:00 PM

Instructions: 1) All questions are compulsory.
2) Figures to the right indicate full marks.
3) Assume suitable data if necessary.

Section – I

Q.2 Attempt any Four **16**

a) Explain advantages of biomass energy.
b) Explain in detail scope of renewable energy.
c) What is biomass energy and explain resources of biomass energy.
d) Write a note on applications of solar energy.
e) Explain function of biogas digester.
f) Write a note on aerobic and anaerobic digestion.

Q.3 Attempt any two. **12**

a) Explain Solar photovoltaic technology.
b) Explain Basic components of wind energy conversion system.
c) Explain in detail advantages and disadvantages of renewable energy.
d) Explain in detail advantage and disadvantage of Solar energy.

Section – II

Q.4 Attempt any Four. **16**

a) Write a note on wave energy.
b) Merits and demerits of hydropower energy.
c) Explain specifications of energy storage devices.
d) Main parts of hydropower station.
e) Importance of tidal energy.
f) Importance of energy storage devices

Q.5 Attempt any two. **12**

a) Write a note on potential of wave energy in India.
b) Explain different methods of energy storage.
c) Explain with neat diagram hydropower plant.
d) Explain in detail ocean thermal energy conversion (OTEC).

Seat No.	

Set **Q**

S. Y. (B. Tech.) (Sem-II) (New) (NEP CBCS) Examination: March/April-2025
ELECTRONICS & TELECOMMUNICATION ENGINEERING
Renewable Energy (OE-02C)

Day & Date: Tuesday, 03-June-2025 Max. Marks: 70
Time: 10:00 AM To 01:00 PM

Instructions: 1) Q. No. 1 is compulsory. It should be solved in the first 30 minutes in Answer Book Page no 03 (Starting page of the Answer Book). Each question carries one mark.
2) Don't forget to Mention question paper set (P/Q/R/S) on top of page.
3) Figures to the right indicates full marks.
4) Assume suitable data if necessary.

MCQ/Objective Type Questions

Duration: 30 Minutes Marks:14

Q.1 Choose the correct Answer. **14**

1) Geothermal energy present _____ of the earth.
a) Rotation b) Exterior
c) North side d) Interior

2) Biogas is the gaseous fuel which is obtained from biomass by means of _____ fermentation.
a) Aerobic b) Anaerobic
c) Constant d) None of the above

3) _____ is produced by blending of vegetable oil.
a) CNG b) Methane gas
c) Biofuel d) Biodisel

4) Availability of Solar energy on the earth surface is _____MW.
a) 190 billion b) 178 billion
c) 150 billion d) 250 billion

5) Energy is _____ of substance or a body to do work.
a) Obesity b) Power
c) Capacity d) None of the above

6) Wind energy used from _____ years ago.
a) 3000 b) 2000
c) 6000 d) 5000

7) The major source of the Geothermal energy is _____.
a) Water b) Hot water reservoir
c) Oil d) Gas

8) Which is the primary advantage of using solar energy power generation?
a) Low initial coast
b) Reduce environmental impact
c) Do not require large area
d) Simple storage method

9) OTEC stands for _____.
a) Ocean thermal energy conversion
b) Ocean thermal energy Component
c) Ocean thermal energy contact
d) Ocean thermodynamic energy conversion

10) Which of the following common application of solar energy?
a) Generating electricity
b) Heating water
c) Providing power for electronic device
d) All of the above

11) Passive solar energy refers to trapping the Suns energy _____.
a) Using mechanical devices
b) without using mechanical devices
c) Using chemical
d) Incineration

12) The process or digestion taking place in the presence of air is called as _____.
a) Aerobic digestion b) Anaerobic digestion
c) Hydrolysis d) None of these

13) Which type of renewable energy resources generate low power energy?
a) Biomass b) Solar
c) Wind d) All of the above

14) In wind turbine gear box is used to _____.
a) Step up the speed b) Reduce the speed
c) shut down d) None of these

MCQ/Objective Type Questions

Duration: 30 Minutes Marks:14

Q.1 Choose the correct answer. **14**

1) An instrument transformer is used to extend the range of _____.
a) induction instrument b) electrostatic instrument
c) moving coil instrument d) any of the above

2) The internal resistance of an ammeter should be _____.
a) Very small b) Medium
c) High d) Infinity

3) The smallest change which a sensor can detect is termed: _____
a) Accuracy b) Precision
c) Resolution d) Scale

4) Sensor effectiveness depends on _____ parameter.
a) Sensitivity b) Radiation
c) Restively d) All the above

5) The desirable static characteristics of a measuring system are _____
a) accuracy and drift
b) accuracy, sensitivity and reproducibility
c) drift and dead zone
d) static error

6) A _____ device prevents the oscillation of the moving system and enables the latter to reach its final position quickly.
a) Deflecting b) Controlling
c) Damping d) any of the above

7) _____ is an instrument which measures the insulation resistance of an electric circuit relative to earth and one another.
a) Tangent galvanometer
b) Megger
c) Current transformer
d) None of the above

8) Which of the following is a key characteristic of a sensor?
a) It can only measure temperature
b) It is an active component
c) It converts physical parameters into an electrical signal
d) Il requires no external power

9) Which of the following is a type of magnetic sensor?
a) Thermistor
b) Strain gauge
c) Hall effect sensor
d) LVDT

10) Typical conversion speed of ADC is _____
a) Less than 1 μs
b) Less than 100 μs
c) Less than 500 μs
d) Greater than 1000 μs

11) What is signal conditioning?
a) To analyze any signal
b) Conversion or modification is referred to as conditioning
c) Conversion from analog to digital is signal conditioning
d) Conversion from digital to analog is signal conditioning

12) Touch screen devices use which sensor?
a) Touch sensor
b) Temperature sensor
c) Humidity sensor
d) Pressure sensor

13) ENOB in ADC stand for _____
a) Effective number of bytes
b) Effective number of bits
c) Effective nibble baud
d) None of the mentioned

14) A simple bridge circuit consists of a network of _____
a) 3 resistance arms
b) 2 resistance arms
c) 4 resistance arms
d) 6 resistance arms

4) Draw neat diagrams whenever necessary.

Section – I

Q.2 Attempt any four of the following: **16**

a) Define standard & explain types of standards.
b) Define the following characteristics
1) Linearity 2) Accuracy 3) Repeatability 4) Sensitivity
c) Derive the expression for unknown capacitance with phasor diagram by using Schering Bridge.
d) Write difference between Current Transformer and Potential Transformer.
e) Explain working of digital storage oscilloscope with suitable block diagram.

Q.3 Attempt any two of the following: **12**

a) Illustrate and derive the torque equation for a Moving iron instrument with neat diagram.
b) Draw the equivalent circuit and phasor diagram of a CT. Derive the expressions for ratio and phase angle errors.
c) Explain digital ramp type and dual slope integrating type digital voltmeter.

Section – II

Q.4 Attempt any four of the following: **16**

a) Explain the principle of working of Hall effect sensor.
b) Explain different types of temperature sensor with details.
c) Discuss Classification of sensor and explain active and passive sensor.
d) State and explain the methods of data transmission.
e) State and Explain the Modes of Heat transfer.

Q.5 Attempt any two of the following: **12**

a) Stale the sensors used for Velocity and Acceleration application and explain any one of them.
b) Slate and explain the sensors used for occupancy and motion detector application.
c) Define the temperature and explain the thermal properties of material.

e) Explain working of digital storage oscilloscope with suitable block diagram.

Q.3 Attempt any two of the following: **12**

a) Illustrate and derive the torque equation for a Moving iron instrument with neat diagram.
b) Draw the equivalent circuit and phasor diagram of a CT. Derive the expressions for ratio and phase angle errors.
c) Explain digital ramp type and dual slope integrating type digital voltmeter.

Section – II

Q.4 Attempt any four of the following: **16**

a) Explain the principle of working of Hall effect sensor.
b) Explain different types of temperature sensor with details.
c) Discuss Classification of sensor and explain active and passive sensor.
d) State and explain the methods of data transmission.
e) State and Explain the Modes of Heat transfer.

Q.5 Attempt any two of the following: **12**

a) Stale the sensors used for Velocity and Acceleration application and explain any one of them.
b) Slate and explain the sensors used for occupancy and motion detector application.
c) Define the temperature and explain the thermal properties of material.

Set **S**

S. Y. (B. Tech.) (Sem-II)(New)(NEP CBCS) Examination: March/April-2025
ELECTRONICS & TELECOMMUNICATION ENGINEERING
Measurement, Instrumentation and Sensors (OE-02D)

Day & Date: Tuesday, 03-June-2025 Max. Marks: 70
Time: 10:00 AM To 01:00 PM

Instructions: 1) Q. No. 1 is compulsory. It should be solved in the first 30 minutes in Answer Book Page no 03 (Starting page of the Answer Book). Each question carries one mark.
2) Don't forget to Mention question paper set (P/Q/R/S) on top of page
3) Figures to the right indicates full marks.
4) Assume suitable data if necessary.
5) Draw neat diagrams whenever necessary.

MCQ/Objective Type Questions

Duration: 30 Minutes Marks:14

Q.1 Choose the correct answer. **14**

1) A _____ device prevents the oscillation of the moving system and enables the latter to reach its final position quickly.
a) Deflecting b) Controlling
c) Damping d) any of the above

2) _____ is an instrument which measures the insulation resistance of an electric circuit relative to earth and one another.
a) Tangent galvanometer
b) Megger
c) Current transformer
d) None of the above

3) Which of the following is a key characteristic of a sensor?
a) It can only measure temperature
b) It is an active component
c) It converts physical parameters into an electrical signal
d) Il requires no external power

4) Which of the following is a type of magnetic sensor?
a) Thermistor b) Strain gauge
c) Hall effect sensor d) LVDT

5) Typical conversion speed of ADC is _____
a) Less than 1 μs b) Less than 100 μs
c) Less than 500 μs d) Greater than 1000 μs

6) What is signal conditioning?
a) To analyze any signal
b) Conversion or modification is referred to as conditioning
c) Conversion from analog to digital is signal conditioning
d) Conversion from digital to analog is signal conditioning

7) Touch screen devices use which sensor?
a) Touch sensor b) Temperature sensor
c) Humidity sensor d) Pressure sensor

8) ENOB in ADC stand for _____
a) Effective number of bytes b) Effective number of bits
c) Effective nibble baud d) None of the mentioned

9) A simple bridge circuit consists of a network of _____
a) 3 resistance arms b) 2 resistance arms
c) 4 resistance arms d) 6 resistance arms

10) An instrument transformer is used to extend the range of _____.
a) induction instrument b) electrostatic instrument
c) moving coil instrument d) any of the above

11) The internal resistance of an ammeter should be _____.
a) Very small b) Medium
c) High d) Infinity

12) The smallest change which a sensor can detect is termed: _____
a) Accuracy b) Precision
c) Resolution d) Scale

13) Sensor effectiveness depends on _____ parameter.
a) Sensitivity b) Radiation
c) Restively d) All the above

14) The desirable static characteristics of a measuring system are _____
a) accuracy and drift
b) accuracy, sensitivity and reproducibility
c) drift and dead zone
d) static error

Day & Date: Tuesday, 03-June-2025 Max. Marks: 56
Time: 10:00 AM To 01:00 PM

Instructions: 1) All questions are compulsory.
2) Figures to the right indicate full marks.
3) Assume suitable data if necessary.
4) Draw neat diagrams whenever necessary.

Section – I

Q.2 Attempt any four of the following: 16

a) Define standard & explain types of standards.
b) Define the following characteristics
1) Linearity 2) Accuracy 3) Repeatability 4) Sensitivity
c) Derive the expression for unknown capacitance with phasor diagram by using Schering Bridge.
d) Write difference between Current Transformer and Potential Transformer.
e) Explain working of digital storage oscilloscope with suitable block diagram.

Q.3 Attempt any two of the following: 12

a) Illustrate and derive the torque equation for a Moving iron instrument with neat diagram.
b) Draw the equivalent circuit and phasor diagram of a CT. Derive the expressions for ratio and phase angle errors.
c) Explain digital ramp type and dual slope integrating type digital voltmeter.

2) Don't forget to Mention question paper set (P/Q/R/S) on top of page.
3) Figures to the right indicates full marks.

MCQ/Objective Type Questions

Duration: 30 Minutes Marks:14

Q.1 Choose the correct alternatives from the options. 14

1) Linear programming deals with the optimization of a function of variables is, known as _____
a) Subjective function b) Objective function
c) Combined Equation d) None of these

2) What is the condition of Balance Assignment Problem?
a) Σ Demand$=\Sigma$ Supply
b) No. of rows $>$ No. of column
c) No. of rows $<$ No. of column
d) No. of rows $=$ No. of columns

3) EOQ means: _____
a) Economic Offering Quantity b) Empty Order Quantity
c) Economic Order Quantity d) Economic Order Quality

4) In ABC analysis, high monitoring and control are required for: _____
a) A class items b) B class items
c) C class items d) All of these

5) Graphical method, simplex method, and transportation method are concerned with _____.
a) Break-even analysis b) Value analysis
c) Linear programming d) Queueing theory

6) The cost of keeping items in inventory is called _____
a) Set up cost b) Holding cost
c) Shortage cost d) None of these

7) Dual of the Dual is _____
a) Dual b) Primal
c) Zero d) Infinity

8) At the Break-Even Point _____
a) Profit > Loss
b) Profit < Loss
c) Profit = Loss
d) None of these

9) The PERT in project management means Program Evaluation and _____ Technique.
a) Resource
b) Reconciliation
c) Reconsideration
d) Review

10) _____ Stock is the lower limit of stock below which the stock should not be allowed to fall.
a) Maximum
b) Average
c) Safety
d) Standard

11) Optimization Means _____.
a) Maximization
b) Minimization
c) Minimization or Maximization
d) Mean of Minimization & Maximization

12) A feasible solution to LPP _____.
a) Must satisfy all the constraints simultaneously
b) Need not satisfy all the constraints
c) Must be a corner point of feasible region
d) Must optimize the objective function

13) In a project network, the critical path _____.
a) May be the shortest path
b) Is the longest path
c) May be the longest path
d) Is the shortest path

14) The inventory carrying costs are also called as _____.
a) Procurement costs
b) Set-up costs
c) Storage costs
d) None of the above

Time: 10:00 AM To 01:00 PM

Instructions: 1) All questions are compulsory.
2) Figures to the right indicate full marks.
3) Assume suitable data wherever necessary and mention it clearly.
4) Use of non-programmable calculator is allowed.

Section – I

Q.2 Attempt Any Three. **24**

a) Using Graphical method, Solve

Maximize $Z = 10X_1 + 8X_2$
Subject to, $2X_1 + X_2 \leq 40;$
$2X_1 + 3X_2 \leq 80;$
$0 \leq X_1; 0 \leq X_2$

b) Solve the following assignment model for minimum processing time.

		Machines			
		M1	M2	M3	M4
Jobs	J1	51	77	49	55
	J2	32	34	59	68
	J3	37	44	70	54
	J4	55	55	58	55

c) Find the initial basic feasible solution by Least Cost Method.

	W1	W2	W3	W4	Supply
F1	48	60	56	58	140
F2	45	55	53	60	260
F3	50	65	60	62	360
F4	52	64	55	61	220
Demand	200	320	250	210	

d) What are the different Limitations & Applications of 'Operation Research'?

e) How do you solve unbalanced transportation problem? What are different methods to solve Transportation Model? Explain in details.

Q.3 Answer any one. **04**

a) What is LPP? What are different components of LPP?

b) How assignment model is useful in practical life?

Section – II

Q.4 Attempt Any Three. **24**

a) A construction company consumes 4000 bags of cement per month. Price per bag of cement is Rs. 320/-. Inventory carrying cost per bag per year is Rs. 30/- and procurement cost per order is Rs. 500/- Find economic order quantity and number of orders to be placed per month?

b) Write a note various types inventory cost.

c) Draw network, find out CP & PD. Calculate All floats of each non-critical Activity.

Activity	A	B	C	D	E	F	G	H	I	J	K	L	M	N
Immediate Predecessor	-	-	-	B	A	A	B	C,D	C,D	E	F,G,H	F,G,H	I	J,K
Time in Months	2	6	4	3	6	8	3	7	2	5	4	3	13	7

d) A small project consists of seven activities. The time estimates in weeks of different activities are given below. Find out probability of completing the project in 18 weeks.

Activity	Estimated Time		
	to	tm	tp
1-2	1	1	7
1-3	1	4	7
1-4	2	2	8
2-5	1	1	1
3-5	2	5	14
4-6	2	5	8
5-6	3	6	15

Probability Factor	Probability
0	50%
1	84.13%
2	97.72%
3	99.87%

e) Explain Sequencing Problem Technique. What are its Different Elements, also elaborate its assumptions.

Q.3 Attempt Any One. **04**

a) What is EOQ? What is its important?

b) Distinguish between CPM & PERT (At least 4 points)

Seat No.

S. Y. (B.Tech.) (Sem - II) (New) (NEP CBCS) Examination: March/April-2025
ELECTRONICS & TELECOMMUNICATION ENGINEERING
Operation Research (OE-02E)

Day & Date: Tuesday 03-06-2025 Max. Marks: 56
Time: 10:00 AM To 01:00 PM

Instructions: 1) All questions are compulsory.
2) Figures to the right indicate full marks.
3) Assume suitable data wherever necessary and mention it clearly.
4) Use of non-programmable calculator is allowed.

Section – I

Q.2 Attempt Any Three. **24**

a) Using Graphical method, Solve

Maximize $Z = 10X_1 + 8X_2$
Subject to, $2X_1 + X_2 \leq 40;$
$2X_1 + 3X_2 \leq 80;$
$0 \leq X_1; 0 \leq X_2$

b) Solve the following assignment model for minimum processing time.

		Machines			
		M1	M2	M3	M4
Jobs	J1	51	77	49	55
	J2	32	34	59	68
	J3	37	44	70	54
	J4	55	55	58	55

c) Find the initial basic feasible solution by Least Cost Method.

	W1	W2	W3	W4	Supply
F1	48	60	56	58	140
F2	45	55	53	60	260
F3	50	65	60	62	360
F4	52	64	55	61	220
Demand	200	320	250	210	

d) What are the different Limitations & Applications of 'Operation Research'?

e) How do you solve unbalanced transportation problem? What are different methods to solve Transportation Model? Explain in details.

Q.3 Answer any one. **04**

a) What is LPP? What are different components of LPP?

b) How assignment model is useful in practical life?

Section – II

Q.4 Attempt Any Three. **24**

a) A construction company consumes 4000 bags of cement per month. Price per bag of cement is Rs. 320/-. Inventory carrying cost per bag per year is Rs. 30/- and procurement cost per order is Rs. 500/- Find economic order quantity and number of orders to be placed per month?

b) Write a note various types inventory cost.

c) Draw network, find out CP & PD. Calculate All floats of each non-critical Activity.

Activity	A	B	C	D	E	F	G	H	I	J	K	L	M	N
Immediate Predecessor	-	-	-	B	A	A	B	C,D	C,D	E	F,G,H	F,G,H	I	J,K
Time in Months	2	6	4	3	6	8	3	7	2	5	4	3	13	7

d) A small project consists of seven activities. The time estimates in weeks of different activities are given below. Find out probability of completing the project in 18 weeks.

Activity	Estimated Time		
	to	tm	tp
1-2	1	1	7
1-3	1	4	7
1-4	2	2	8
2-5	1	1	1
3-5	2	5	14
4-6	2	5	8
5-6	3	6	15

Probability Factor	Probability
0	50%
1	84.13%
2	97.72%
3	99.87%

e) Explain Sequencing Problem Technique. What are its Different Elements, also elaborate its assumptions.

Q.3 Attempt Any One. **04**

a) What is EOQ? What is its important?

b) Distinguish between CPM & PERT (At least 4 points)

SLR-BD-212

Set P

S.Y. (B.Tech.)(Sem-II)(New)(NEP CBCS) Examination: March/April - 2025
ELECTRONICS & TELECOMMUNICATION ENGINEERING
Computational Mathematics (OE-02F)

Day & Date: Tuesday 03-06-2025 Max. Marks: 70
Time: 10:00 AM To 01:00 PM

Instructions: 1) Q. No. 1 is compulsory. It should be solved in the first 30 minutes in Answer Book Page no 03 (Starting page of the Answer Book). Each question carries one mark.
2) Don't forget to Mention question paper set (P/Q/R/S) on top of page.
3) Figures to the right indicates full marks.

MCQ/Objective Type Questions

Duration: 30 Minutes Marks:14

Q.1 Choose the correct option. **14**

1) A transcendental equation is an equation that involves _____.
a) Only algebraic terms
b) Only transcendental functions
c) Both algebraic and transcendental functions
d) Linear terms only

2) The interval in which a real root of the equation $x^3 - 2x - 5 = 0$ lies is _____.
a) $(1,2)$ b) $(0,1)$
c) $(2,3)$ d) $(3,4)$

3) The Gauss-Seidel method is used for solving _____.
a) Nonlinear equations
b) Systems of linear equations
c) Ordinary differential equations
d) Partial differential equations

4) Which of the following is a disadvantage of the Gauss-Jacobi method?
a) It converges faster than most direct methods
b) It requires a large number of iterations for a good approximation
c) It cannot be used for systems with more than two equations
d) It works only for symmetric systems

5) The use of Romberg's method is _____.
a) To solve simultaneous linear equation
b) To find root of linear equation
c) To evaluate definite integration
d) To find the Eigen values

6) The order of convergence of Newton-Raphson method is _____.

a) 1 b) 2

c) $\sqrt{2}$ d) 1.6

7) Power Method is used to find _____.

a) Negative Eigen Value b) Largest Eigen value

c) Positive Eigen Value d) None of these

8) To find the Numerically largest Eigen value using iterative Method we use the equation _____.

a) $A = \lambda X$ b) $AX = X$

c) $X = \lambda X$ d) $AX = \lambda X$

9) If $\frac{dy}{dx} = x - y$ and $y(0) = 1$ then by Picard's method the value of $y_1(1)$ is _____.

a) 0.905 b) 1.905

c) 2.905 d) none

10) Runge-Kutta method is self-starting method _____.

a) true d) false

c) we can't say d) none

11) If the data is equally spaced and interpolation is near the beginning of the data then _____ Interpolation formula is used.

a) Newton's backward difference

b) Newton's divided difference

c) Newton's forward difference

d) Lagrange's

12) The process of finding the value inside the interval (x_0, x_n) is called ___.

a) Interpolation b) Extrapolation

c) Iterative d) polynomial equation

13) Using Newton-Raphson method the first approximation to the root of the equation $x^4 - x - 10 = 0$ near to $x_0 = 2$ is _____.

a) 1.671 b) 2.271

c) 2.071 d) 1.871

14) To apply Simpson's one-third rule the number of sub-intervals must be _____.

a) Even b) Odd

c) Multiple of 3 d) Multiple of 6

Seat No.

Instructions: 1) All questions are compulsory.
2) Figures to the right indicate full marks.

Section – I

Q.2 Answer any three. **09**

a) Find the double root of the equation $x^3 - 5.4x^2 + 9.24x - 5.096 = 0$ given that it is nearer to 1.5.

b) Solve the system of equations by Jacobi's iterative method (perform 3 iterations) $27x + 6y - z = 85,\ 6x + 15y + 2z = 72,\ x + y + 54z = 110$

c) Find positive real root of the equation $x \sin x + \cos x = 0$ using Newton Raphson method correct to 3 decimal places.

d) Solve the system of equation by using Gauss-Elimination method. $x + 4y - z = -5, x + y - 6z = -12, -3x - y - z = 4$

e) Solve $\frac{dy}{dx} = -xy$ with $x_0 = 0\ ,\ y_0 = 1$ using Picard's method upto 3rd approximation.

Q.3 Answer any three. **09**

a) Solve $\frac{dy}{dx} = x + y$ with $x_0 = 0\ , y_0 = 1$ using Range kutta forth order method and find approximate value of y when $x = 0.2$

b) Solve $\frac{dy}{dx} = 1 + xy$ with $y(0) = 1$ using Picard's method take first approximation and find y for $x = 0.1$

c) Solve by Gauss Seidel Method, the equations $20x + y - 2z = 17, 3x + 20y - z = -18, 2x - 3y + 20z = 25$ Perform 3 iteration.

d) Find the value of $\sqrt{5}$ using newton's iterative formula. Perform 3 iteration.

e) Find the positive root of $f(x) = 2x^3 - 3x - 6$ by Newton's Raphson method perform 3 iteration.

Q.4 Answer any two. **10**

a) Perform 2-iteration by Newton's Raphson Method to Solve the non-linear equation $x = x^2 + y^2,\ y = x^2 - y^2$ Take initial approximation $x_0 = 0.8, y_0 = 0.4$

b) Solve the system of equation by LU decomposition Method $3x + 2y + 7z = 4,\quad 2x + 3y + z = 5,\quad 3x + 4y + z = 7$

c) Solve differential equation $\frac{dy}{dx} = 1 + xz,\ \frac{dz}{dx} = -xy$ for $x = 0.3$ using 4th order Runge-Kutta Method Initial Values are $x = 0,\ y = 0,\ z = 1$

Section – II

Q.5 Answer any Three. **09**

a) Evaluate the integral $\int_0^1 \frac{x^2}{1+x^3}\,dx$ using Simpson's $\frac{1}{3}$rd rule, Take $h = 0.25$

b) Determine the largest Eigen value and corresponding Eigen vector of the matrix $\begin{bmatrix} 5 & 4 \\ 1 & 2 \end{bmatrix}$ by using power method perform three iteration.

c) Use Trapezoidal Rule to compute $\int_0^1 \frac{1}{1+x^2}\,dx$ Take h as 0.5

d) Using Newton's divided difference formula, find the value of $f(2)$. Given the following table.

x	4	5	7	10	11	13
$f(x)$	48	100	294	900	1210	2028

e) Construct Newton's Forward interpolation polynomial for the following data:

x	4	6	8	10
y	1	3	8	16

Hence find the value of y for $x = 5$

Q.6 Answer any Three. **09**

a) Solve the integral $\int_0^{1/2} \frac{1}{\sqrt{1-x^2}}\,dx$ using Weddle's rule Taking $n = 6$

b) Solve $\int_3^5 \frac{4}{(2x^2)}\,dx$ Using Gauss Formula for $n = 2$ and $n = 3$.

c) Find all Eigen values and Eigen vectors of the following matrix by using Gauss Jacobi's Method. $\begin{bmatrix} 2 & 3 \\ 3 & 2 \end{bmatrix}$

d) Solve $\int_0^6 \frac{dx}{1+x^2}$ by using Simpsons 3/8th rule take $h = 1$

e) Using Newton's Backward formula, find the value of $f(2)$ if

x	1	1.4	1.8	2.2
$f(x)$	3.49	4.82	5.96	6.5

Q.7 Answer any two. **10**

a) Find the largest eigen value and the corresponding eigen vector of the matrix:

$\begin{bmatrix} 25 & 1 & 2 \\ 1 & 3 & 0 \\ 2 & 0 & -4 \end{bmatrix}$ by using power method

Take $[1 \quad 0 \quad 0]^r$ as initial eigen vector (perform 5 iterations)

b) Use Romberg's method to compute $\int_0^1 \frac{1}{1+x^2}\,dx$ Take h as $0.5, 0.25, 0.125$

c) Given the Values

x	5	7	11	13	17
$f(x)$	150	392	1452	2366	5202

Evaluate $f(9)$,using Lagrange's Formula.

c) Solve differential equation $\frac{dy}{dx} = 1 + xz,\ \frac{dz}{dx} = -xy$ for $x = 0.3$ using 4th order Runge-Kutta Method Initial Values are $x = 0,\ y = 0,\ z = 1$

Section – II

Q.5 Answer any Three. **09**

a) Evaluate the integral $\int_0^1 \frac{x^2}{1+x^3}\,dx$ using Simpson's $\frac{1}{3}$rd rule, Take $h = 0.25$

b) Determine the largest Eigen value and corresponding Eigen vector of the matrix $\begin{bmatrix} 5 & 4 \\ 1 & 2 \end{bmatrix}$ by using power method perform three iteration.

c) Use Trapezoidal Rule to compute $\int_0^1 \frac{1}{1+x^2}\,dx$ Take h as 0.5

d) Using Newton's divided difference formula, find the value of $f(2)$. Given the following table.

x	4	5	7	10	11	13
$f(x)$	48	100	294	900	1210	2028

e) Construct Newton's Forward interpolation polynomial for the following data:

x	4	6	8	10
y	1	3	8	16

Hence find the value of y for $x = 5$

Q.6 Answer any Three. **09**

a) Solve the integral $\int_0^{1/2} \frac{1}{\sqrt{1-x^2}}\,dx$ using Weddle's rule Taking $n = 6$

b) Solve $\int_3^5 \frac{4}{(2x^2)}\,dx$ Using Gauss Formula for $n = 2$ and $n = 3$.

c) Find all Eigen values and Eigen vectors of the following matrix by using Gauss Jacobi's Method. $\begin{bmatrix} 2 & 3 \\ 3 & 2 \end{bmatrix}$

d) Solve $\int_0^6 \frac{dx}{1+x^2}$ by using Simpsons 3/8th rule take $h = 1$

e) Using Newton's Backward formula, find the value of $f(2)$ if

x	1	1.4	1.8	2.2
$f(x)$	3.49	4.82	5.96	6.5

Q.7 Answer any two. **10**

a) Find the largest eigen value and the corresponding eigen vector of the matrix:

$\begin{bmatrix} 25 & 1 & 2 \\ 1 & 3 & 0 \\ 2 & 0 & -4 \end{bmatrix}$ by using power method

Take $[1 \quad 0 \quad 0]^r$ as initial eigen vector (perform 5 iterations)

b) Use Romberg's method to compute $\int_0^1 \frac{1}{1+x^2}\,dx$ Take h as $0.5, 0.25, 0.125$

c) Given the Values

x	5	7	11	13	17
$f(x)$	150	392	1452	2366	5202

Evaluate $f(9)$,using Lagrange's Formula.

S.Y. (B.Tech.)(Sem-II)(New)(NEP CBCS) Examination: March/April - 2025
ELECTRONICS & TELECOMMUNICATION ENGINEERING
Computational Mathematics (OE-02F)

Day & Date: Tuesday 03-06-2025 Max. Marks: 70
Time: 10:00 AM To 01:00 PM

Instructions: 1) Q. No. 1 is compulsory. It should be solved in the first 30 minutes in Answer Book Page no 03 (Starting page of the Answer Book). Each question carries one mark.
2) Don't forget to Mention question paper set (P/Q/R/S) on top of page.
3) Figures to the right indicates full marks.

MCQ/Objective Type Questions

Duration: 30 Minutes Marks:14

Q.1 Choose the correct option. **14**

1) The order of convergence of Newton-Raphson method is _____.
a) 1 b) 2
c) $\sqrt{2}$ d) 1.6

2) Power Method is used to find _____.
a) Negative Eigen Value b) Largest Eigen value
c) Positive Eigen Value d) None of these

3) To find the Numerically largest Eigen value using iterative Method we use the equation _____.
a) $A = \lambda X$ b) $AX = X$
c) $X = \lambda X$ d) $AX = \lambda X$

4) If $\frac{dy}{dx} = x - y$ and $y(0) = 1$ then by Picard's method the value of $y_1(1)$ is _____.
a) 0.905 b) 1.905
c) 2.905 d) none

5) Runge-Kutta method is self-starting method _____.
a) true d) false
c) we can't say d) none

6) If the data is equally spaced and interpolation is near the beginning of the data then _____ Interpolation formula is used.
a) Newton's backward difference
b) Newton's divided difference
c) Newton's forward difference
d) Lagrange's

7) The process of finding the value inside the interval (x_0, x_n) is called ___.
a) Interpolation b) Extrapolation
c) Iterative d) polynomial equation

8) Using Newton-Raphson method the first approximation to the root of the equation $x^4 - x - 10 = 0$ near to $x_0 = 2$ is _____.
a) 1.671 b) 2.271
c) 2.071 d) 1.871

9) To apply Simpson's one-third rule the number of sub-intervals must be _____.
a) Even b) Odd
c) Multiple of 3 d) Multiple of 6

10) A transcendental equation is an equation that involves _____.
a) Only algebraic terms
b) Only transcendental functions
c) Both algebraic and transcendental functions
d) Linear terms only

11) The interval in which a real root of the equation $x^3 - 2x - 5 = 0$ lies is _____.
a) $(1,2)$ b) $(0,1)$
c) $(2,3)$ d) $(3,4)$

12) The Gauss-Seidel method is used for solving _____.
a) Nonlinear equations
b) Systems of linear equations
c) Ordinary differential equations
d) Partial differential equations

13) Which of the following is a disadvantage of the Gauss-Jacobi method?
a) It converges faster than most direct methods
b) It requires a large number of iterations for a good approximation
c) It cannot be used for systems with more than two equations
d) It works only for symmetric systems

14) The use of Romberg's method is _____.
a) To solve simultaneous linear equation
b) To find root of linear equation
c) To evaluate definite integration
d) To find the Eigen values

2) Figures to the right indicate full marks.

Section – I

Q.2 Answer any three. **09**

a) Find the double root of the equation $x^3 - 5.4x^2 + 9.24x - 5.096 = 0$ given that it is nearer to 1.5.

b) Solve the system of equations by Jacobi's iterative method (perform 3 iterations) $27x + 6y - z = 85,\ 6x + 15y + 2z = 72,\ x + y + 54z = 110$

c) Find positive real root of the equation $x \sin x + \cos x = 0$ using Newton Raphson method correct to 3 decimal places.

d) Solve the system of equation by using Gauss-Elimination method. $x + 4y - z = -5, x + y - 6z = -12, -3x - y - z = 4$

e) Solve $\frac{dy}{dx} = -xy$ with $x_0 = 0\ ,\ y_0 = 1$ using Picard's method upto 3rd approximation.

Q.3 Answer any three. **09**

a) Solve $\frac{dy}{dx} = x + y$ with $x_0 = 0\ , y_0 = 1$ using Range kutta forth order method and find approximate value of y when $x = 0.2$

b) Solve $\frac{dy}{dx} = 1 + xy$ with $y(0) = 1$ using Picard's method take first approximation and find y for $x = 0.1$

c) Solve by Gauss Seidel Method, the equations $20x + y - 2z = 17, 3x + 20y - z = -18, 2x - 3y + 20z = 25$ Perform 3 iteration.

d) Find the value of $\sqrt{5}$ using newton's iterative formula. Perform 3 iteration.

e) Find the positive root of $f(x) = 2x^3 - 3x - 6$ by Newton's Raphson method perform 3 iteration.

Q.4 Answer any two. **10**

a) Perform 2-iteration by Newton's Raphson Method to Solve the non-linear equation $x = x^2 + y^2,\ y = x^2 - y^2$ Take initial approximation $x_0 = 0.8, y_0 = 0.4$

b) Solve the system of equation by LU decomposition Method $3x + 2y + 7z = 4,\quad 2x + 3y + z = 5,\quad 3x + 4y + z = 7$

c) Solve differential equation $\frac{dy}{dx} = 1 + xz,\ \frac{dz}{dx} = -xy$ for $x = 0.3$ using 4th order Runge-Kutta Method Initial Values are $x = 0,\ y = 0,\ z = 1$

Section – II

Q.5 Answer any Three. **09**

a) Evaluate the integral $\int_0^1 \frac{x^2}{1+x^3}\,dx$ using Simpson's $\frac{1}{3}$rd rule, Take $h = 0.25$

b) Determine the largest Eigen value and corresponding Eigen vector of the matrix $\begin{bmatrix} 5 & 4 \\ 1 & 2 \end{bmatrix}$ by using power method perform three iteration.

c) Use Trapezoidal Rule to compute $\int_0^1 \frac{1}{1+x^2}\,dx$ Take h as 0.5

d) Using Newton's divided difference formula, find the value of $f(2)$. Given the following table.

x	4	5	7	10	11	13
$f(x)$	48	100	294	900	1210	2028

e) Construct Newton's Forward interpolation polynomial for the following data:

x	4	6	8	10
y	1	3	8	16

Hence find the value of y for $x = 5$

Q.6 Answer any Three. **09**

a) Solve the integral $\int_0^{1/2} \frac{1}{\sqrt{1-x^2}}\,dx$ using Weddle's rule Taking $n = 6$

b) Solve $\int_3^5 \frac{4}{(2x^2)}\,dx$ Using Gauss Formula for $n = 2$ and $n = 3$.

c) Find all Eigen values and Eigen vectors of the following matrix by using Gauss Jacobi's Method. $\begin{bmatrix} 2 & 3 \\ 3 & 2 \end{bmatrix}$

d) Solve $\int_0^6 \frac{dx}{1+x^2}$ by using Simpsons 3/8th rule take $h = 1$

e) Using Newton's Backward formula, find the value of $f(2)$ if

x	1	1.4	1.8	2.2
$f(x)$	3.49	4.82	5.96	6.5

Q.7 Answer any two. **10**

a) Find the largest eigen value and the corresponding eigen vector of the matrix:

$\begin{bmatrix} 25 & 1 & 2 \\ 1 & 3 & 0 \\ 2 & 0 & -4 \end{bmatrix}$ by using power method

Take $[1 \quad 0 \quad 0]^r$ as initial eigen vector (perform 5 iterations)

b) Use Romberg's method to compute $\int_0^1 \frac{1}{1+x^2}\,dx$ Take h as $0.5, 0.25, 0.125$

c) Given the Values

x	5	7	11	13	17
$f(x)$	150	392	1452	2366	5202

Evaluate $f(9)$,using Lagrange's Formula.

MCQ/Objective Type Questions

Duration: 30 Minutes Marks:14

Q.1 Choose the correct alternatives from the options. 14

1) In communication, _____ is the person who receives and decodes the message.
a) Sender b) Receiver
c) Driver d) Cleaner

2) Which among the following is not a manmade channel of communication?
a) Telephone b) Cell phone
c) Fax d) Air

3) Communication is the part of _____ skills.
a) Rough b) Soft
c) Hard d) Short

4) Which among the following are the barriers to communication?
a) Physical b) Mechanical
c) Psychological d) All of above

5) To overcome language barrier, which of the ways should not be followed?
a) Easy and understandable words should be used.
b) Jokes should be told to the audience.
c) The language of audience should be used.
d) Non-verbal ways should be used to the extent possible.

6) Which of the following is not among 7Cs?
a) Conciseness b) Completeness
c) Clarity d) Charity

7) Posters fall under _____ communication.
a) oral b) visual
c) written d) spoken

8) On the _____ it is possible to get immediate feedback.
a) letter b) e-mail
c) fax d) telephone

9) The response to a sender's message is called as _____.
a) Reply b) Feedback
c) Answer d) None of the above

10) _____ is the soul of communication.
a) Sender b) Receiver
c) Message d) Feedback

11) Which of these is not an element of non-verbal communication?
a) Personal appearance b) Posture
c) Eye contact d) Name of the speaker

12) Telephonic conversation is a form of: _____
a) verbal communication b) non-verbal communication
c) visual communication d) Written

13) To give a good presentation, full rehearsal is: _____
a) Optional b) Necessary
c) Useless d) Audience based

14) Which of the following is not an advantage of oral presentation?
a) Flexibility b) Scope for body language
c) Expensive d) Time-saving

Q.2 Attempt Any Three. **12**

a) Explain how communication is necessary for business.
b) What is feedback? Explain its necessity in communication.
c) Write short note on: Different channels of communication.
d) Explain language barriers to communication with the ways to overcome them.
e) Explain language as a tool of communication.

Q.3 Attempt Any Four. **16**

a) Explain seven C's of effective communication.
b) Explain various types of barriers to communication and the ways to overcome them.
c) What is oral communication? Explain its advantages.
d) Explain various steps in the process of communication.
e) What is written communication? Explain its benefits.

Section – II

Q.4 Attempt Any Three. **12**

a) Explain the difference between formal and informal communication.
b) Explain vertical communication with its types.
c) Explain farewell speech by the departing person, with an example
d) Explain the speech for vote of thanks, with an example.
e) Write short note on: Non- verbal aspects of presentation.

Q.5 Attempt Any Four. **16**

a) Explain the structure of a business letter with its various components.
b) Explain the steps in the process of presentation.
c) You had purchased some furniture items from a vendor. Afterwards you found that the furniture items are in a damaged condition. Write a letter of complaint and ask for replacement.
d) Explain four P's of effective presentations.
e) You are in need of some computer hardware parts. Prepare a letter placing order to the supplier. Specify the terms and conditions of purchase.

Section – I

Q.2 Attempt Any Three. **12**

a) Explain how communication is necessary for business.
b) What is feedback? Explain its necessity in communication.
c) Write short note on: Different channels of communication.
d) Explain language barriers to communication with the ways to overcome them.
e) Explain language as a tool of communication.

Q.3 Attempt Any Four. **16**

a) Explain seven C's of effective communication.
b) Explain various types of barriers to communication and the ways to overcome them.
c) What is oral communication? Explain its advantages.
d) Explain various steps in the process of communication.
e) What is written communication? Explain its benefits.

Section – II

Q.4 Attempt Any Three. **12**

a) Explain the difference between formal and informal communication.
b) Explain vertical communication with its types.
c) Explain farewell speech by the departing person, with an example
d) Explain the speech for vote of thanks, with an example.
e) Write short note on: Non- verbal aspects of presentation.

Q.5 Attempt Any Four. **16**

a) Explain the structure of a business letter with its various components.
b) Explain the steps in the process of presentation.
c) You had purchased some furniture items from a vendor. Afterwards you found that the furniture items are in a damaged condition. Write a letter of complaint and ask for replacement.
d) Explain four P's of effective presentations.
e) You are in need of some computer hardware parts. Prepare a letter placing order to the supplier. Specify the terms and conditions of purchase.

S. Y. (B. Tech.) (Sem - II) (New) (CBCS) Examination: March/April-2025
CIVIL ENGINEERING
Microcontroller (ENTMDN-02A)

Day & Date: Thursday, 05-June-2025 Max. Marks: 70
Time: 10:00 AM To 01:00 PM

Instructions: 1) Q. No. 1 is compulsory. It should be solved in the first 30 minutes in Answer Book Page no 03 (Starting page of the Answer Book). Each question carries one mark.
2) Don't forget to Mention question paper set (P/Q/R/S) on top of page.
3) Figures to the right indicates full marks.

MCQ/Objective Type Questions

Duration: 30 Minutes Marks:14

Q.1 Choose the correct Answer. **14**

1) The internal ROM memory of the 8051 is:
a) 4 KBytes b) 6 Kbytes
c) 128 bytes d) 256 bytes

2) This program code will be executed continuously:
```
LOOP: MOV A,#03h
      DEC A
      JNZ LOOP
```
a) TRUE b) FALSE
c) gives error d) loop execute 3 times

3) After reset the stack pointer in microcontroller, 8051 is initialized to ____.
a) 70 H b) FF H
c) 00 H d) 07 H

4) Vector address of timer /counter1 interrupt is _____ h.
a) 0003 b) 0013
c) 000B d) 001B

5) Program status word register of 8051 is ____.
a) only bit addressable
b) only byte addressable
c) Bit addressable as well as byte addressable
d) none of above

6) What is the address range of Register bank 0 in 8051?
a) 00h-07h b) 00h-FFh
c) 80h-7Fh d) 80h-FFh

7) The 8051 has _____ 16-bit counter/timers.
a) 1 b) 2
c) 3 d) 4

8) The contents of the accumulator after this operation
MOV A,#0CH
ANL A,#0CH
will be _____.
a) 00001100 b) 00001101
c) 11111111 d) 11000000

9) The 8051 can handle _____ interrupt sources.
a) 3 b) 4
c) 5 d) 6

10) MOV A, @R1 will _____
a) Copy R1 to Accumulator
b) Copy Accumulator to R1
c) Copy the contents of memory whose address is in R1 to Accumulator
d) Copy the accumulator to memory whose address is in R1

11) Device pins XTAL1 and XTAL2 for the 8051 are used for connections to an external oscillator or crystal.
a) True b) False

12) An alternate function of port pin P3.4 in the 8051 is: _____
a) Timer 0 b) Timer 1
c) Interrupt 0 d) Interrupt 1

13) The I/O ports that are used as address and data for external memory are: _____
a) Port 1 and 2 b) Port 1 and 3
c) Port 0 and 2 d) Port 0 and 3

14) Microcontrollers often have: _____
a) CPUs b) RAM
c) ROM d) All of the above

Microcontroller (ENTMDN-02A)

Day & Date: Thursday, 05-June-2025 Max. Marks: 70
Time: 10:00 AM To 01:00 PM

Instructions: 1) Q. No. 1 is compulsory. It should be solved in the first 30 minutes in Answer Book Page no 03 (Starting page of the Answer Book). Each question carries one mark.
2) Don't forget to Mention question paper set (P/Q/R/S) on top of page.
3) Figures to the right indicates full marks.

MCQ/Objective Type Questions

Duration: 30 Minutes Marks:14

Q.1 Choose the correct Answer. **14**

1) The contents of the accumulator after this operation
MOV A,#0CH
ANL A,#0CH
will be _____.
a) 00001100 b) 00001101
c) 11111111 d) 11000000

2) The 8051 can handle _____ interrupt sources.
a) 3 b) 4
c) 5 d) 6

3) MOV A, @R1 will _____
a) Copy R1 to Accumulator
b) Copy Accumulator to R1
c) Copy the contents of memory whose address is in R1 to Accumulator
d) Copy the accumulator to memory whose address is in R1

4) Device pins XTAL1 and XTAL2 for the 8051 are used for connections to an external oscillator or crystal.
a) True b) False

5) An alternate function of port pin P3.4 in the 8051 is: _____
a) Timer 0 b) Timer 1
c) Interrupt 0 d) Interrupt 1

6) The I/O ports that are used as address and data for external memory are: _____
a) Port 1 and 2 b) Port 1 and 3
c) Port 0 and 2 d) Port 0 and 3

7) Microcontrollers often have: _____

a) CPUs b) RAM
c) ROM d) All of the above

8) The internal ROM memory of the 8051 is:

a) 4 KBytes b) 6 Kbytes
c) 128 bytes d) 256 bytes

9) This program code will be executed continuously:

```
LOOP: MOV A,#03h
      DEC A
      JNZ LOOP
```

a) TRUE b) FALSE
c) gives error d) loop execute 3 times

10) After reset the stack pointer in microcontroller, 8051 is initialized to ____.

a) 70 H b) FF H
c) 00 H d) 07 H

11) Vector address of timer /counter1 interrupt is _____ h.

a) 0003 b) 0013
c) 000B d) 001B

12) Program status word register of 8051 is ____.

a) only bit addressable
b) only byte addressable
c) Bit addressable as well as byte addressable
d) none of above

13) What is the address range of Register bank 0 in 8051?

a) 00h-07h b) 00h-FFh
c) 80h-7Fh d) 80h-FFh

14) The 8051 has _____ 16-bit counter/timers.

a) 1 b) 2
c) 3 d) 4

Set Q

S. Y. (B. Tech.) (Sem - II) (New) (CBCS) Examination: March/April-2025
COMPUTER SCIENCE AND ENGINEERING
Microcontroller (ENTMDN-02A)

Day & Date: Thursday, 05-June-2025 Max. Marks: 56
Time: 10:00 AM To 01:00 PM

Instructions: 1) All questions are compulsory.
2) Figures to the right indicate full marks.

Section – I

Q.2 Solve any 4 **16**

a) State functional difference between Microprocessor & Microcontroller.
b) Explain various logical instructions related with 8051 with syntax and example.
c) Write ALP for delay 200ms; Use Timer 0 in Model.
d) Explain different features of 8051.
e) Explain following Pins if 8051 Microcontroller
1) ALE/PROG 2) RST
3) XTAL1 and XTAL2 4) PSEN

Q.3 Solve any 2 **12**

a) Compare the Von-Neumann and Harvard Architecture.
b) Explain different Addressing modes with example in 8051.
c) Write a short note on i) TMOD ii) SCON iii) SBUF

Section – II

Q.4 Solve any 4 **16**

a) Write a code for addition of 2 numbers stored in R1 and R2, and store the result in R3.
b) Write a code to generate a delay of 1 sec using Registers.
c) write a short note on Timers.
d) Explain the input / output ports in 8051.
e) write a program to interface Switch & LED with 8051 provided that when the switch is pressed, LED should be ON.

Q.5 Attempt any 2 **12**

a) Write a Program to interface the 4×4 matrix keypad as input and 7-segment display as output with 8051.
b) Draw and explain the External Memory Interfacing with 8051. Attach 8KB RAM externally. Also find the starting and end address.
c) Write an 8051C program to toggle all the bits of port 1 continuously with 1 min delay in between.

2) Don't forget to Mention question paper set (P/Q/R/S) on top of page.
3) Figures to the right indicates full marks.

MCQ/Objective Type Questions

Duration: 30 Minutes Marks:14

Q.1 Choose the correct Answer. **14**

1) Device pins XTAL1 and XTAL2 for the 8051 are used for connections to an external oscillator or crystal.
a) True b) False

2) An alternate function of port pin P3.4 in the 8051 is: _____
a) Timer 0 b) Timer 1
c) Interrupt 0 d) Interrupt 1

3) The I/O ports that are used as address and data for external memory are: _____
a) Port 1 and 2 b) Port 1 and 3
c) Port 0 and 2 d) Port 0 and 3

4) Microcontrollers often have: _____
a) CPUs b) RAM
c) ROM d) All of the above

5) The internal ROM memory of the 8051 is:
a) 4 KBytes b) 6 Kbytes
c) 128 bytes d) 256 bytes

6) This program code will be executed continuously:

```
LOOP: MOV A,#03h
      DEC A
      JNZ LOOP
```

a) TRUE b) FALSE
c) gives error d) loop execute 3 times

7) After reset the stack pointer in microcontroller, 8051 is initialized to ____.
a) 70 H b) FF H
c) 00 H d) 07 H

8) Vector address of timer /counter1 interrupt is _____ h.
a) 0003 b) 0013
c) 000B d) 001B

9) Program status word register of 8051 is ____.
a) only bit addressable
b) only byte addressable
c) Bit addressable as well as byte addressable
d) none of above

10) What is the address range of Register bank 0 in 8051?
a) 00h-07h b) 00h-FFh
c) 80h-7Fh d) 80h-FFh

11) The 8051 has _____ 16-bit counter/timers.
a) 1 b) 2
c) 3 d) 4

12) The contents of the accumulator after this operation
MOV A,#0CH
ANL A,#0CH
will be _____.
a) 00001100 b) 00001101
c) 11111111 d) 11000000

a) TRUE b) FALSE
c) gives error d) loop execute 3 times

7) After reset the stack pointer in microcontroller, 8051 is initialized to ____.
a) 70 H b) FF H
c) 00 H d) 07 H

8) Vector address of timer /counter1 interrupt is _____ h.
a) 0003 b) 0013
c) 000B d) 001B

9) Program status word register of 8051 is ____.
a) only bit addressable
b) only byte addressable
c) Bit addressable as well as byte addressable
d) none of above

10) What is the address range of Register bank 0 in 8051?
a) 00h-07h b) 00h-FFh
c) 80h-7Fh d) 80h-FFh

11) The 8051 has _____ 16-bit counter/timers.
a) 1 b) 2
c) 3 d) 4

12) The contents of the accumulator after this operation
MOV A,#0CH
ANL A,#0CH
will be _____.
a) 00001100 b) 00001101
c) 11111111 d) 11000000

13) The 8051 can handle _____ interrupt sources.
a) 3 b) 4
c) 5 d) 6

14) MOV A, @R1 will _____
a) Copy R1 to Accumulator
b) Copy Accumulator to R1
c) Copy the contents of memory whose address is in R1 to Accumulator
d) Copy the accumulator to memory whose address is in R1

Set R

S.Y. (B. Tech.) (Sem - II) (New)(NEP CBCS) Examination: March/April-2025
ELECTRICAL ENGINEERING
Microcontroller (ENTMDN-02A)

Day & Date: Thursday, 05-June-2025 Max. Marks: 56
Time: 10:00 AM To 01:00 PM

Instructions: 1) All questions are compulsory.
2) Figures to the right indicate full marks.

Section – I

Q.2 Solve any 4 **16**

a) State functional difference between Microprocessor & Microcontroller.
b) Explain various logical instructions related with 8051 with syntax and example.
c) Write ALP for delay 200ms; Use Timer 0 in Model.
d) Explain different features of 8051.
e) Explain following Pins if 8051 Microcontroller
1) ALE/PROG 2) RST
3) XTAL1 and XTAL2 4) PSEN

Q.3 Solve any 2 **12**

a) Compare the Von-Neumann and Harvard Architecture.
b) Explain different Addressing modes with example in 8051.
c) Write a short note on i) TMOD ii) SCON iii) SBUF

Section – II

Q.4 Solve any 4 **16**

a) Write a code for addition of 2 numbers stored in R1 and R2, and store the result in R3.
b) Write a code to generate a delay of 1 sec using Registers.
c) write a short note on Timers.
d) Explain the input / output ports in 8051.
e) write a program to interface Switch & LED with 8051 provided that when the switch is pressed, LED should be ON.

Q.5 Attempt any 2 **12**

a) Write a Program to interface the 4×4 matrix keypad as input and 7-segment display as output with 8051.
b) Draw and explain the External Memory Interfacing with 8051. Attach 8KB RAM externally. Also find the starting and end address.
c) Write an 8051C program to toggle all the bits of port 1 continuously with 1 min delay in between.

Time: 10:00 AM To 01:00 PM

Instructions: 1) Q. No. 1 is compulsory. It should be solved in the first 30 minutes in Answer Book Page no 03 (Starting page of the Answer Book). Each question carries one mark.
2) Don't forget to Mention question paper set (P/Q/R/S) on top of page.
3) Figures to the right indicates full marks.

MCQ/Objective Type Questions

Duration: 30 Minutes Marks:14

Q.1 Choose the correct Answer. **14**

1) What is the address range of Register bank 0 in 8051?
a) 00h-07h b) 00h-FFh
c) 80h-7Fh d) 80h-FFh

2) The 8051 has _____ 16-bit counter/timers.
a) 1 b) 2
c) 3 d) 4

3) The contents of the accumulator after this operation
MOV A,#0CH
ANL A,#0CH
will be _____.
a) 00001100 b) 00001101
c) 11111111 d) 11000000

4) The 8051 can handle _____ interrupt sources.
a) 3 b) 4
c) 5 d) 6

5) MOV A, @R1 will _____
a) Copy R1 to Accumulator
b) Copy Accumulator to R1
c) Copy the contents of memory whose address is in R1 to Accumulator
d) Copy the accumulator to memory whose address is in R1

6) Device pins XTAL1 and XTAL2 for the 8051 are used for connections to an external oscillator or crystal.
a) True b) False

7) An alternate function of port pin P3.4 in the 8051 is: _____

a) Timer 0 b) Timer 1
c) Interrupt 0 d) Interrupt 1

8) The I/O ports that are used as address and data for external memory are: _____

a) Port 1 and 2 b) Port 1 and 3
c) Port 0 and 2 d) Port 0 and 3

9) Microcontrollers often have: _____

a) CPUs b) RAM
c) ROM d) All of the above

10) The internal ROM memory of the 8051 is:

a) 4 KBytes b) 6 Kbytes
c) 128 bytes d) 256 bytes

11) This program code will be executed continuously:

```
LOOP: MOV A,#03h
      DEC A
      JNZ LOOP
```

a) TRUE b) FALSE
c) gives error d) loop execute 3 times

S.Y. (B. Tech.) (Sem - II) (New)(NEP CBCS) Examination: March/April-2025
ELECTRONICS & TELECOMMUNICATION ENGINEERING
Microcontroller (ENTMDN-02A)

Day & Date: Thursday, 05-June-2025 Max. Marks: 56
Time: 10:00 AM To 01:00 PM

Instructions: 1) All questions are compulsory.
2) Figures to the right indicate full marks.

Section – I

Q.2 Solve any 4 **16**

a) State functional difference between Microprocessor & Microcontroller.
b) Explain various logical instructions related with 8051 with syntax and example.
c) Write ALP for delay 200ms; Use Timer 0 in Model.
d) Explain different features of 8051.
e) Explain following Pins if 8051 Microcontroller
1) ALE/PROG 2) RST
3) XTAL1 and XTAL2 4) PSEN

Q.3 Solve any 2 **12**

a) Compare the Von-Neumann and Harvard Architecture.
b) Explain different Addressing modes with example in 8051.
c) Write a short note on i) TMOD ii) SCON iii) SBUF

Section – II

Q.4 Solve any 4 **16**

a) Write a code for addition of 2 numbers stored in R1 and R2, and store the result in R3.
b) Write a code to generate a delay of 1 sec using Registers.
c) write a short note on Timers.
d) Explain the input / output ports in 8051.
e) write a program to interface Switch & LED with 8051 provided that when the switch is pressed, LED should be ON.

Q.5 Attempt any 2 **12**

a) Write a Program to interface the 4×4 matrix keypad as input and 7-segment display as output with 8051.
b) Draw and explain the External Memory Interfacing with 8051. Attach 8KB RAM externally. Also find the starting and end address.
c) Write an 8051C program to toggle all the bits of port 1 continuously with 1 min delay in between.

Day & Date: Thursday, 05-June-2025 Max. Marks: 70
Time: 10:00 AM To 01:00 PM

Instructions: 1) Q. No. 1 is compulsory. It should be solved in the first 30 minutes in Answer Book Page no 03 (Starting page of the Answer Book). Each question carries one mark.
2) Don't forget to Mention question paper set (P/Q/R/S) on top of page.
3) Figures to the right indicates full marks.

MCQ/Objective Type Questions

Duration: 30 Minutes Marks:14

Q.1 Choose the correct Answer. **14**

1) The internal ROM memory of the 8051 is:
a) 4 KBytes b) 6 Kbytes
c) 128 bytes d) 256 bytes

2) This program code will be executed continuously:
```
LOOP: MOV A,#03h
      DEC A
      JNZ LOOP
```
a) TRUE b) FALSE
c) gives error d) loop execute 3 times

3) After reset the stack pointer in microcontroller, 8051 is initialized to ____.
a) 70 H b) FF H
c) 00 H d) 07 H

4) Vector address of timer /counter1 interrupt is _____ h.
a) 0003 b) 0013
c) 000B d) 001B

5) Program status word register of 8051 is ____.
a) only bit addressable
b) only byte addressable
c) Bit addressable as well as byte addressable
d) none of above

6) What is the address range of Register bank 0 in 8051?
a) 00h-07h b) 00h-FFh
c) 80h-7Fh d) 80h-FFh

7) The 8051 has _____ 16-bit counter/timers.
a) 1 b) 2
c) 3 d) 4

8) The contents of the accumulator after this operation
MOV A,#0CH
ANL A,#0CH
will be _____.
a) 00001100 b) 00001101
c) 11111111 d) 11000000

9) The 8051 can handle _____ interrupt sources.
a) 3 b) 4
c) 5 d) 6

10) MOV A, @R1 will _____
a) Copy R1 to Accumulator
b) Copy Accumulator to R1
c) Copy the contents of memory whose address is in R1 to Accumulator
d) Copy the accumulator to memory whose address is in R1

11) Device pins XTAL1 and XTAL2 for the 8051 are used for connections to an external oscillator or crystal.
a) True b) False

12) An alternate function of port pin P3.4 in the 8051 is: _____
a) Timer 0 b) Timer 1
c) Interrupt 0 d) Interrupt 1

13) The I/O ports that are used as address and data for external memory are: _____
a) Port 1 and 2 b) Port 1 and 3
c) Port 0 and 2 d) Port 0 and 3

14) Microcontrollers often have: _____
a) CPUs b) RAM
c) ROM d) All of the above

CIVIL ENGINEERING
Fundamentals of IOT (ENTMDN-02A)

Day & Date: Thursday, 05-June-2025 Max. Marks: 70
Time: 10:00 AM To 01:00 PM

Instructions: 1) Q. No. 1 is compulsory. It should be solved in the first 30 minutes in Answer Book Page no 03 (Starting page of the Answer Book). Each question carries one mark.
2) Don't forget to Mention question paper set (P/Q/R/S) on top of page.
3) Figures to the right indicates full marks.

MCQ/Objective Type Questions

Duration: 30 Minutes Marks:14

Q.1 Choose the correct Answer. **14**

1) Which IoT characteristic ensures that devices can work with different platforms?
a) Reliability b) Scalability
c) Interoperability d) Maintainability

2) The IOT application layer is responsible for: ____
a) Collecting data from devices
b) Providing interfaces to the user
c) Transmitting data between devices
d) Authenticating users

3) What is the main purpose of the gateway in IOT?
a) Secure device communication
b) Transmit data to the cloud
c) Provide power to devices
d) Collect user input

4) The Gyro sensor measures: ____
a) Angular velocity b) Pressure
c) Force d) Temperature

5) A relay is necessary when using actuators because ____
a) To isolate high-power actuators from low-power circuits
b) To provide more precise control
c) To amplify the actuator's signal
d) To reduce the actuator's power consumption

6) What could happen if a sensor is supplied with voltage above or below its required range?

a) It will always work efficiently
b) It will generate more power
c) It will automatically adjust its voltage
c) It may fail or produce incorrect readings

7) Which component in a servo motor provides position feedback?

a) Gearbox b) Output shaft
c) Control circuit d) Potentiometer

8) Why is BLE ideal for wearable IoT devices?

a) High-speed data transmission
b) Long-range communication
c) Low power consumption
d) High memory usage

9) Which topology is best for a home automation system with a central controller?

a) Star topology b) Ring topology
c) Mesh topology d) Point-to-point topology

10) Which problem is likely in ring topology if a node fails?

a) Increased power consumption
b) Network breakdown
c) Reduced speed
d) More memory usage

11) The _____ message in CoAP ensures reliable communication by requiring an acknowledgment.

a) NON b) RST
c) ACK d) CON

12) You are designing a home automation system for elderly care. Which feature would you prioritize?

a) Gaming support b) Automated Irrigation
c) Fall detection and alerts d) Music control

13) Which thing helps detect available parking slots in a smart parking system?

a) Microphone b) Servo motor
c) Ultrasonic sensor d) Thermistor

14) What is the impact of sensor failure in an irrigation system?

a) Overwatering or under watering
b) Accurate irrigation
c) Increased crop yield
d) Beller energy usage

CIVIL ENGINEERING
Fundamentals of IOT (ENTMDN-02A)

Day & Date: Thursday, 05-June-2025 Max. Marks: 56
Time: 10:00 AM To 01:00 PM

Instructions: 1) All questions are compulsory.
2) Figures to the right indicate full marks.

Section – I

Q.2 Attempt Any FOUR Questions **16**

a) Describe the main components of an loT system with neat sketch.

b) Draw the layered architecture of the Internet of Things (loT) and explain the function of each layer in brief.

c) Explain Need of ADC Chip while using Analog Sensors.

d) Describe the key voltage considerations when designing a sensor-based IoT system. Give examples of common voltage ranges used.

e) Compare Sharp IR Distance Sensor with ultrasonic sensors (any 4 Points).

Q.3 Attempt any TWO **12**

a) What is role of Actuator in IoT. Give examples of commonly used actuators in IoT. Explain working of any one in detail.

b) What is a PIR Sensor? Why it is called Passive? Describe how Motion Detected using a PIR sensor with neat sketch.

c) Define IoT. List and Explain Design challenges & security challenges related to IoT.

Section – II

Q.4 Attempt Any FOUR Questions **16**

a) Describe the architecture of a Li-Fi system with a neat diagram.

b) Explain the MQTT architecture with the roles of Publisher, Subscriber, and Broker.

c) List the various sensors and actuators used in smart home automation system and justify their selection.

d) Discuss the advantages, disadvantages and applications of CoAP for constrained IoT devices.

e) What is Presence in XMPP? How does it help in IoT and messaging applications?

Q.5 Attempt any TWO **12**

a) Explain the role of the central node (hub/ switch /gateway) in Star Topology. Compare Star Topology with Ring and Mesh Topologies.

b) Farmers are struggling with improper watering of crops due to irregular rainfall, leading to low crop yield.

Develop an IoT-based Smart Agriculture system focusing on soil moisture monitoring and automated irrigation. State challenges in system design.

c) A city faces frequent traffic jams due to drivers wasting time finding parking slots in crowded areas.

Propose a Smart Parking IoT solution to efficiently guide drivers to available parking spots. Draw the system architecture and explain working.

Set **Q**

S. Y. (B. Tech) (Sem-II) (New) (CBCS) Examination: March/April-2025
CIVIL ENGINEERING
Fundamentals of IOT (ENTMDN-02A)

Day & Date: Thursday, 05-June-2025 Max. Marks: 70
Time: 10:00 AM To 01:00 PM

Instructions: 1) Q. No. 1 is compulsory. It should be solved in the first 30 minutes in Answer Book Page no 03 (Starting page of the Answer Book). Each question carries one mark.
2) Don't forget to Mention question paper set (P/Q/R/S) on top of page.
3) Figures to the right indicates full marks.

MCQ/Objective Type Questions

Duration: 30 Minutes Marks:14

Q.1 Choose the correct Answer. **14**

1) Why is BLE ideal for wearable IoT devices?
a) High-speed data transmission
b) Long-range communication
c) Low power consumption
d) High memory usage

2) Which topology is best for a home automation system with a central controller?
a) Star topology b) Ring topology
c) Mesh topology d) Point-to-point topology

3) Which problem is likely in ring topology if a node fails?
a) Increased power consumption
b) Network breakdown
c) Reduced speed
d) More memory usage

4) The _____ message in CoAP ensures reliable communication by requiring an acknowledgment.
a) NON b) RST
c) ACK d) CON

5) You are designing a home automation system for elderly care. Which feature would you prioritize?
a) Gaming support b) Automated Irrigation
c) Fall detection and alerts d) Music control

6) Which thing helps detect available parking slots in a smart parking system?
a) Microphone b) Servo motor
c) Ultrasonic sensor d) Thermistor

7) What is the impact of sensor failure in an irrigation system?
a) Overwatering or under watering
b) Accurate irrigation
c) Increased crop yield
d) Beller energy usage

8) Which IoT characteristic ensures that devices can work with different platforms?
a) Reliability
b) Scalability
c) Interoperability
d) Maintainability

9) The IOT application layer is responsible for: ____
a) Collecting data from devices
b) Providing interfaces to the user
c) Transmitting data between devices
d) Authenticating users

10) What is the main purpose of the gateway in IOT?
a) Secure device communication
b) Transmit data to the cloud
c) Provide power to devices
d) Collect user input

11) The Gyro sensor measures: ____
a) Angular velocity
b) Pressure
c) Force
d) Temperature

12) A relay is necessary when using actuators because ____
a) To isolate high-power actuators from low-power circuits
b) To provide more precise control
c) To amplify the actuator's signal
d) To reduce the actuator's power consumption

13) What could happen if a sensor is supplied with voltage above or below its required range?
a) It will always work efficiently
b) It will generate more power
c) It will automatically adjust its voltage
c) It may fail or produce incorrect readings

14) Which component in a servo motor provides position feedback?
a) Gearbox
b) Output shaft
c) Control circuit
d) Potentiometer

Set Q

S. Y. (B. Tech) (Sem-II) (New) (CBCS) Examination: March/April-2025
CIVIL ENGINEERING
Fundamentals of IOT (ENTMDN-02A)

Day & Date: Thursday, 05-June-2025 Max. Marks: 56
Time: 10:00 AM To 01:00 PM

Instructions: 1) All questions are compulsory.
2) Figures to the right indicate full marks.

Section – I

Q.2 Attempt Any FOUR Questions **16**

a) Describe the main components of an loT system with neat sketch.

b) Draw the layered architecture of the Internet of Things (loT) and explain the function of each layer in brief.

c) Explain Need of ADC Chip while using Analog Sensors.

d) Describe the key voltage considerations when designing a sensor-based IoT system. Give examples of common voltage ranges used.

e) Compare Sharp IR Distance Sensor with ultrasonic sensors (any 4 Points).

Q.3 Attempt any TWO **12**

a) What is role of Actuator in IoT. Give examples of commonly used actuators in IoT. Explain working of any one in detail.

b) What is a PIR Sensor? Why it is called Passive? Describe how Motion Detected using a PIR sensor with neat sketch.

c) Define IoT. List and Explain Design challenges & security challenges related to IoT.

Section – II

Q.4 Attempt Any FOUR Questions **16**

a) Describe the architecture of a Li-Fi system with a neat diagram.

b) Explain the MQTT architecture with the roles of Publisher, Subscriber, and Broker.

c) List the various sensors and actuators used in smart home automation system and justify their selection.

d) Discuss the advantages, disadvantages and applications of CoAP for constrained IoT devices.

e) What is Presence in XMPP? How does it help in IoT and messaging applications?

Q.5 Attempt any TWO **12**

a) Explain the role of the central node (hub/ switch /gateway) in Star Topology. Compare Star Topology with Ring and Mesh Topologies.

b) Farmers are struggling with improper watering of crops due to irregular rainfall, leading to low crop yield.

Develop an IoT-based Smart Agriculture system focusing on soil moisture monitoring and automated irrigation. State challenges in system design.

c) A city faces frequent traffic jams due to drivers wasting time finding parking slots in crowded areas.

Propose a Smart Parking IoT solution to efficiently guide drivers to available parking spots. Draw the system architecture and explain working.

Set R

S. Y. (B. Tech) (Sem-II) (New) (CBCS) Examination: March/April-2025
COMPUTER SCIENCE AND ENGINEERING
Fundamentals of IOT (ENTMDN-02A)

Day & Date: Thursday, 05-June-2025 Max. Marks: 56
Time: 10:00 AM To 01:00 PM

Instructions: 1) All questions are compulsory.
2) Figures to the right indicate full marks.

Section – I

Q.2 Attempt Any FOUR Questions **16**

a) Describe the main components of an loT system with neat sketch.

b) Draw the layered architecture of the Internet of Things (loT) and explain the function of each layer in brief.

c) Explain Need of ADC Chip while using Analog Sensors.

d) Describe the key voltage considerations when designing a sensor-based IoT system. Give examples of common voltage ranges used.

e) Compare Sharp IR Distance Sensor with ultrasonic sensors (any 4 Points).

Q.3 Attempt any TWO **12**

a) What is role of Actuator in IoT. Give examples of commonly used actuators in IoT. Explain working of any one in detail.

b) What is a PIR Sensor? Why it is called Passive? Describe how Motion Detected using a PIR sensor with neat sketch.

c) Define IoT. List and Explain Design challenges & security challenges related to IoT.

Section – II

Q.4 Attempt Any FOUR Questions **16**

a) Describe the architecture of a Li-Fi system with a neat diagram.

b) Explain the MQTT architecture with the roles of Publisher, Subscriber, and Broker.

c) List the various sensors and actuators used in smart home automation system and justify their selection.

d) Discuss the advantages, disadvantages and applications of CoAP for constrained IoT devices.

e) What is Presence in XMPP? How does it help in IoT and messaging applications?

Q.5 Attempt any TWO **12**

a) Explain the role of the central node (hub/ switch /gateway) in Star Topology. Compare Star Topology with Ring and Mesh Topologies.

b) Farmers are struggling with improper watering of crops due to irregular rainfall, leading to low crop yield.

Develop an IoT-based Smart Agriculture system focusing on soil moisture monitoring and automated irrigation. State challenges in system design.

c) A city faces frequent traffic jams due to drivers wasting time finding parking slots in crowded areas.

Propose a Smart Parking IoT solution to efficiently guide drivers to available parking spots. Draw the system architecture and explain working.

S. Y. (B. Tech) (Sem-II) (New) (CBCS) Examination: March/April-2025
COMPUTER SCIENCE AND ENGINEERING
Fundamentals of IOT (ENTMDN-02A)

Day & Date: Thursday, 05-June-2025 Max. Marks: 70
Time: 10:00 AM To 01:00 PM

Instructions: 1) Q. No. 1 is compulsory. It should be solved in the first 30 minutes in Answer Book Page no 03 (Starting page of the Answer Book). Each question carries one mark.
2) Don't forget to Mention question paper set (P/Q/R/S) on top of page.
3) Figures to the right indicates full marks.

MCQ/Objective Type Questions

Duration: 30 Minutes Marks:14

Q.1 Choose the correct Answer. **14**

1) What could happen if a sensor is supplied with voltage above or below its required range?
a) It will always work efficiently
b) It will generate more power
c) It will automatically adjust its voltage
c) It may fail or produce incorrect readings

2) Which component in a servo motor provides position feedback?
a) Gearbox b) Output shaft
c) Control circuit d) Potentiometer

3) Why is BLE ideal for wearable IoT devices?
a) High-speed data transmission
b) Long-range communication
c) Low power consumption
d) High memory usage

4) Which topology is best for a home automation system with a central controller?
a) Star topology b) Ring topology
c) Mesh topology d) Point-to-point topology

5) Which problem is likely in ring topology if a node fails?
a) Increased power consumption
b) Network breakdown
c) Reduced speed
d) More memory usage

6) The _____ message in CoAP ensures reliable communication by requiring an acknowledgment.

a) NON b) RST
c) ACK d) CON

7) You are designing a home automation system for elderly care. Which feature would you prioritize?

a) Gaming support b) Automated Irrigation
c) Fall detection and alerts d) Music control

8) Which thing helps detect available parking slots in a smart parking system?

a) Microphone b) Servo motor
c) Ultrasonic sensor d) Thermistor

9) What is the impact of sensor failure in an irrigation system?

a) Overwatering or under watering
b) Accurate irrigation
c) Increased crop yield
d) Beller energy usage

10) Which IoT characteristic ensures that devices can work with different platforms?

a) Reliability b) Scalability
c) Interoperability d) Maintainability

11) The IOT application layer is responsible for: ____

a) Collecting data from devices
b) Providing interfaces to the user
c) Transmitting data between devices
d) Authenticating users

12) What is the main purpose of the gateway in IOT?

a) Secure device communication
b) Transmit data to the cloud
c) Provide power to devices
d) Collect user input

13) The Gyro sensor measures: ____

a) Angular velocity b) Pressure
c) Force d) Temperature

14) A relay is necessary when using actuators because ____

a) To isolate high-power actuators from low-power circuits
b) To provide more precise control
c) To amplify the actuator's signal
d) To reduce the actuator's power consumption

1) Which IoT characteristic ensures that devices can work with different platforms?
a) Reliability b) Scalability
c) Interoperability d) Maintainability

2) The IOT application layer is responsible for: ____
a) Collecting data from devices
b) Providing interfaces to the user
c) Transmitting data between devices
d) Authenticating users

3) What is the main purpose of the gateway in IOT?
a) Secure device communication
b) Transmit data to the cloud
c) Provide power to devices
d) Collect user input

4) The Gyro sensor measures: ____
a) Angular velocity b) Pressure
c) Force d) Temperature

5) A relay is necessary when using actuators because ____
a) To isolate high-power actuators from low-power circuits
b) To provide more precise control
c) To amplify the actuator's signal
d) To reduce the actuator's power consumption

6) What could happen if a sensor is supplied with voltage above or below its required range?

a) It will always work efficiently
b) It will generate more power
c) It will automatically adjust its voltage
c) It may fail or produce incorrect readings

7) Which component in a servo motor provides position feedback?

a) Gearbox b) Output shaft
c) Control circuit d) Potentiometer

8) Why is BLE ideal for wearable IoT devices?

a) High-speed data transmission
b) Long-range communication
c) Low power consumption
d) High memory usage

9) Which topology is best for a home automation system with a central controller?

a) Star topology b) Ring topology
c) Mesh topology d) Point-to-point topology

10) Which problem is likely in ring topology if a node fails?

a) Increased power consumption
b) Network breakdown
c) Reduced speed
d) More memory usage

11) The _____ message in CoAP ensures reliable communication by requiring an acknowledgment.

a) NON b) RST
c) ACK d) CON

12) You are designing a home automation system for elderly care. Which feature would you prioritize?

a) Gaming support b) Automated Irrigation
c) Fall detection and alerts d) Music control

13) Which thing helps detect available parking slots in a smart parking system?

a) Microphone b) Servo motor
c) Ultrasonic sensor d) Thermistor

14) What is the impact of sensor failure in an irrigation system?

a) Overwatering or under watering
b) Accurate irrigation
c) Increased crop yield
d) Beller energy usage

Seat No.	

Set **P**

S. Y. (B. Tech) (Sem-II) (New) (NEP CBCS) Examination: March/April-2025
ELECTRONICS & TELECOMMUNICATION ENGINEERING
Fundamentals of IOT (ENTMDN-02A)

Day & Date: Thursday, 05-June-2025 Max. Marks: 56
Time: 10:00 AM To 01:00 PM

Instructions: 1) All questions are compulsory.
2) Figures to the right indicate full marks.

Section – I

Q.2 Attempt Any FOUR Questions **16**

a) Describe the main components of an loT system with neat sketch.

b) Draw the layered architecture of the Internet of Things (loT) and explain the function of each layer in brief.

c) Explain Need of ADC Chip while using Analog Sensors.

d) Describe the key voltage considerations when designing a sensor-based IoT system. Give examples of common voltage ranges used.

e) Compare Sharp IR Distance Sensor with ultrasonic sensors (any 4 Points).

Q.3 Attempt any TWO **12**

a) What is role of Actuator in IoT. Give examples of commonly used actuators in IoT. Explain working of any one in detail.

b) What is a PIR Sensor? Why it is called Passive? Describe how Motion Detected using a PIR sensor with neat sketch.

c) Define IoT. List and Explain Design challenges & security challenges related to IoT.

Section – II

Q.4 Attempt Any FOUR Questions **16**

a) Describe the architecture of a Li-Fi system with a neat diagram.

b) Explain the MQTT architecture with the roles of Publisher, Subscriber, and Broker.

c) List the various sensors and actuators used in smart home automation system and justify their selection.

d) Discuss the advantages, disadvantages and applications of CoAP for constrained IoT devices.

e) What is Presence in XMPP? How does it help in IoT and messaging applications?

Q.5 Attempt any TWO **12**

a) Explain the role of the central node (hub/ switch /gateway) in Star Topology. Compare Star Topology with Ring and Mesh Topologies.

b) Farmers are struggling with improper watering of crops due to irregular rainfall, leading to low crop yield.

Develop an IoT-based Smart Agriculture system focusing on soil moisture monitoring and automated irrigation. State challenges in system design.

c) A city faces frequent traffic jams due to drivers wasting time finding parking slots in crowded areas.

Propose a Smart Parking IoT solution to efficiently guide drivers to available parking spots. Draw the system architecture and explain working.

ELECTRONICS & TELECOMMUNICATION ENGINEERING
Fundamentals of IOT (ENTMDN-02A)

Day & Date: Thursday, 05-June-2025 Max. Marks: 70
Time: 10:00 AM To 01:00 PM

Instructions: 1) Q. No. 1 is compulsory. It should be solved in the first 30 minutes in Answer Book Page no 03 (Starting page of the Answer Book). Each question carries one mark.
2) Don't forget to Mention question paper set (P/Q/R/S) on top of page.
3) Figures to the right indicates full marks.

MCQ/Objective Type Questions

Duration: 30 Minutes Marks:14

Q.1 Choose the correct Answer. **14**

1) Why is BLE ideal for wearable IoT devices?
a) High-speed data transmission
b) Long-range communication
c) Low power consumption
d) High memory usage

2) Which topology is best for a home automation system with a central controller?
a) Star topology b) Ring topology
c) Mesh topology d) Point-to-point topology

3) Which problem is likely in ring topology if a node fails?
a) Increased power consumption
b) Network breakdown
c) Reduced speed
d) More memory usage

4) The _____ message in CoAP ensures reliable communication by requiring an acknowledgment.
a) NON b) RST
c) ACK d) CON

5) You are designing a home automation system for elderly care. Which feature would you prioritize?
a) Gaming support b) Automated Irrigation
c) Fall detection and alerts d) Music control

6) Which thing helps detect available parking slots in a smart parking system?
a) Microphone b) Servo motor
c) Ultrasonic sensor d) Thermistor

7) What is the impact of sensor failure in an irrigation system?
a) Overwatering or under watering
b) Accurate irrigation
c) Increased crop yield
d) Beller energy usage

8) Which IoT characteristic ensures that devices can work with different platforms?
a) Reliability
b) Scalability
c) Interoperability
d) Maintainability

e) Compare Sharp IR Distance Sensor with ultrasonic sensors (any 4 Points).

Q.3 Attempt any TWO **12**

a) What is role of Actuator in IoT. Give examples of commonly used actuators in IoT. Explain working of any one in detail.

b) What is a PIR Sensor? Why it is called Passive? Describe how Motion Detected using a PIR sensor with neat sketch.

c) Define IoT. List and Explain Design challenges & security challenges related to IoT.

Section – II

Q.4 Attempt Any FOUR Questions **16**

a) Describe the architecture of a Li-Fi system with a neat diagram.

b) Explain the MQTT architecture with the roles of Publisher, Subscriber, and Broker.

c) List the various sensors and actuators used in smart home automation system and justify their selection.

d) Discuss the advantages, disadvantages and applications of CoAP for constrained IoT devices.

e) What is Presence in XMPP? How does it help in IoT and messaging applications?

Q.5 Attempt any TWO **12**

a) Explain the role of the central node (hub/ switch /gateway) in Star Topology. Compare Star Topology with Ring and Mesh Topologies.

b) Farmers are struggling with improper watering of crops due to irregular rainfall, leading to low crop yield.

Develop an IoT-based Smart Agriculture system focusing on soil moisture monitoring and automated irrigation. State challenges in system design.

c) A city faces frequent traffic jams due to drivers wasting time finding parking slots in crowded areas.

Propose a Smart Parking IoT solution to efficiently guide drivers to available parking spots. Draw the system architecture and explain working.

S. Y. (B. Tech) (Sem-II) (New) (CBCS) Examination: March/April-2025
MECHANICAL ENGINEERING
Fundamentals of IOT (ENTMDN-02A)

Day & Date: Thursday, 05-June-2025 Max. Marks: 70
Time: 10:00 AM To 01:00 PM

Instructions: 1) Q. No. 1 is compulsory. It should be solved in the first 30 minutes in Answer Book Page no 03 (Starting page of the Answer Book). Each question carries one mark.
2) Don't forget to Mention question paper set (P/Q/R/S) on top of page.
3) Figures to the right indicates full marks.

MCQ/Objective Type Questions

Duration: 30 Minutes Marks:14

Q.1 Choose the correct Answer. **14**

1) The _____ message in CoAP ensures reliable communication by requiring an acknowledgment.
a) NON b) RST
c) ACK d) CON

2) You are designing a home automation system for elderly care. Which feature would you prioritize?
a) Gaming support b) Automated Irrigation
c) Fall detection and alerts d) Music control

3) Which thing helps detect available parking slots in a smart parking system?
a) Microphone b) Servo motor
c) Ultrasonic sensor d) Thermistor

4) What is the impact of sensor failure in an irrigation system?
a) Overwatering or under watering
b) Accurate irrigation
c) Increased crop yield
d) Beller energy usage

5) Which IoT characteristic ensures that devices can work with different platforms?
a) Reliability b) Scalability
c) Interoperability d) Maintainability

6) The IOT application layer is responsible for: ____
a) Collecting data from devices
b) Providing interfaces to the user
c) Transmitting data between devices
d) Authenticating users

7) What is the main purpose of the gateway in IOT?
a) Secure device communication
b) Transmit data to the cloud
c) Provide power to devices
d) Collect user input

8) The Gyro sensor measures: ____
a) Angular velocity
b) Pressure
c) Force
d) Temperature

9) A relay is necessary when using actuators because ____
a) To isolate high-power actuators from low-power circuits
b) To provide more precise control
c) To amplify the actuator's signal
d) To reduce the actuator's power consumption

10) What could happen if a sensor is supplied with voltage above or below its required range?
a) It will always work efficiently
b) It will generate more power
c) It will automatically adjust its voltage
c) It may fail or produce incorrect readings

11) Which component in a servo motor provides position feedback?
a) Gearbox
b) Output shaft
c) Control circuit
d) Potentiometer

12) Why is BLE ideal for wearable IoT devices?
a) High-speed data transmission
b) Long-range communication
c) Low power consumption
d) High memory usage

13) Which topology is best for a home automation system with a central controller?
a) Star topology
b) Ring topology
c) Mesh topology
d) Point-to-point topology

14) Which problem is likely in ring topology if a node fails?
a) Increased power consumption
b) Network breakdown
c) Reduced speed
d) More memory usage

MCQ/Objective Type Questions

Duration: 30 Minutes Marks:14

Q.1 Choose the correct Answer **14**

1) The correct ways to solve a problem of state-space search are?
a) Forward from the initial state b) Backward from the goal
c) Both a and b d) None of the above

2) Which of these is the best learning model suitable for an observable environment?
a) Supervised b) Unsupervised
c) Both a & b d) None of the above

3) A* algorithm is based on _____
a) Breadth-First-Search b) Depth-First-Search
c) Best-First-Search d) Hill climbing

4) Which is not a property of representation of knowledge?
a) Representational Verification b) Representational Adequacy
c) Inferential Adequacy d) Inferential Efficiency

5) Which of the following search technique has AND/OR graph theory?
a) Greedy Best First Search b) A*
c) AO* d) None of these

6) Propositional Logic has _____ output.
a) Either True or False b) Both True and False
c) Quantitative Value d) None

7) How an AI agent does interact with its environment?
a) Using sensors and perceivers b) Using only sensors
c) Using only perceivers d) None of the above

8) Which AI technique enables the computers to understand the associations and relationships between objects and events?

a) Heuristic Processing
b) Cognitive Science
c) Relative Symbolism
d) Pattern Matching

9) In state-space, the set of actions for a given problem is expressed by the _____.

a) Intermediate States
b) Successor function that takes current action and returns next state
c) Initial States
d) None of the above

10) Which statement is valid for the Heuristic function?

a) The heuristic function is used to solve mathematical problems.
b) The heuristic function takes parameters of type string and returns an integer value.
c) The heuristic function does not have any return type.
d) The heuristic function calculates the cost of an optimal path between the pair of states.

11) The Bayesian Network gives _____

a) A complete description of the problem
b) Partial Description of the domain
c) A complete description of the domain
d) None of the above

12) The best AI agent is one which _____

a) Needs user inputs for solving any problem
b) Can solve a problem on its own without any human intervention
c) Need a similar exemplary problem in its knowledge base
d) All of the above

13) The search algorithm which is similar to the minimax search, but removes the branches that don't affect the final output is known as_____.

a) Depth-first search
b) Breadth-first search
c) Alpha-beta pruning
d) None of the above

14) The probabilistic reasoning depends upon _____.

a) Estimation
b) Observations
c) Likelihood
d) All of the above

Set S

S.Y. (B.Tech.) (Sem-II) (New) (NEP CBCS) Examination: March/April-2025
ELECTRONICS & TELECOMMUNICATION ENGINEERING
Artificial Intelligence (ENTHON-02A)

Day & Date: Monday 09-June-2025 Max. Marks: 56
Time: 10:00 AM To 01:00 PM

Instructions: 1) All questions are compulsory.
2) Figures to the right indicate full marks.

Section – I

Q.2 Solve any four: **16**

a) Explain the minimax algorithm with example.
b) Explain any four applications of Al.
c) Explain any two types Al agents with diagram.
d) Explain AO* Algorithm with example.
e) What is constraint Satisfaction Problems? Explain with map colouring example.

Q.3 Solve any two: **12**

a) Explain FOL (First Order Logic) in detail.
b) Write short note on knowledge representation and reasoning.
c) Write a note BFS and DFS with example.

Section – II

Q.4 Solve any four: **16**

a) Explain in brief Utility Theory of Decision making in Al.
b) Explain few sample applications of representing and reasoning with uncertain knowledge.
c) Explain in brief sequential decision problems in decision making of Al.
d) Explain in brief the scalability issues in learning and Knowledge acquisition.
e) Explain in brief the streaming scenario in learning and Knowledge acquisition.

Q.5 Solve any two: **12**

a) Explain Elementary Game Theory with few sample applications.
b) Explain Bayesian networks with few sample applications.
c) Describe alpha beta pruning algorithm with example.

S.Y. (B.Tech.) (Sem-II) (New) (NEP CBCS) Examination: March/April-2025
ELECTRONICS & TELECOMMUNICATION ENGINEERING
Data Communication and Signaling in Railway (ENTHON-02D)

Day & Date: Monday, 09-June-2025 Max. Marks: 70
Time: 10:00 AM To 01:00 PM

Instructions: 1) Q. No. 1 is compulsory. It should be solved in the first 30 minutes in Answer Book Page no 03 (Starting page of the Answer Book). Each question carries one mark.
2) Don't forget to Mention question paper set (P/Q/R/S) on top of page.
3) Figures to the right indicates full marks.

MCQ/Objective Type Questions

Duration: 30 Minutes Marks:14

Q.1 Choose the correct Answer **14**

1) The World Wide Web (WWW) was invented by _____.
a) Steve Jobs b) Tim Berners Lee
c) Ray Tom liners d) All of these

2) The purpose of using flux in soldering is to _____
a) Increase fluidity of solder metal
b) Feel up gaps left in a bad joint
c) Carbon steel
d) Prevent oxides forming

3) State the reason for thermal shutdown of IC regulator?
a) Spikes in temperature b) Decrease in temperature
c) Fluctuation in temperature d) Increase in temperature

4) On which of the following effects of electric current a fuse operates?
a) Photoelectric effect b) Electrostatic effect
c) Heating effect d) Magnetic effect

5) The bridge rectifier is an alternative for _____
a) Full wave rectifier b) Peak rectifier
c) Half wave rectifier d) None of the mentioned

6) Which of these is not a guided medium?
a) Fiber optical cable b) Coaxial cable
c) Wireless LAN d) Copper wire

7) Which transmission media provides the highest transmission speed in a network?
a) Coaxial cable b) twisted pair cable
c) optical fiber d) electrical cable

8) Which of these are web browsers?
a) Google Chrome
b) Internet Explorer
c) Brave
d) All of these

9) The purpose of using flux in soldering is to _____
a) Increase fluidity of solder metal
b) Feel up gaps left in a bad joint
c) Carbon steel
d) Prevent oxides forming

10) State the reason for the thermal shutdown of IC regulator.
a) Spikes in temperature
b) Decrease in temperature
c) Fluctuation in temperature
d) Increase in temperature

11) On which of the following effects of electric current a fuse operates?
a) Photoelectric effect
b) Electrostatic effect
c) Heating effect
d) Magnetic effect

12) A soldering iron 'bit' is made of _____
a) Brass
b) Tin
c) Steel
d) Copper

13) What is the max data transfer rate for optical fiber cable?
a) 10 Mbps
b) 100 Mbps
c) 1000 Mbps
d) 10000 Mbps

14) Fiber optics possess the following properties _____.
a) Immune electromagnetic interference
b) Very less signal attenuation
c) Very hard to tap
d) All of the mentioned

Instructions: 1) All question are compulsory.
2) Figures to the right indicate full marks.

Section – I

Q.2 Attempt any FOUR **16**

a) What do you mean by Rectifiers? Give classification.
b) Draw and Explain Block diagram of DC Regulated Power supply.
c) Write a note on WWW (World Wide Web).
d) Explain Soldering & Desoldering techniques.
e) Explain & compare Internet & Intranet.

Q.3 Attempt any TWO **12**

a) Give Classification of Transmission media. Compare wired transmission media and Wireless transmission media.
b) Explain the necessity of Fuses & classification of Fuses.
c) Write a short note on IC Regulators.

Section – II

Q.4 Attempt any FOUR **16**

a) Give & explain the classification of Railway signals according to functions.
b) Write a short note on FTP (File Transfer Protocol).
c) Explain different networking devices.
d) Explain Equipment used in Railnet.
e) What are the special signals used in Railway signaling.

Q.5 Attempt any TWO **12**

a) Explain the client Server communication model.
b) Write a note on DHCP (Dynamic Host Configuration Protocol).
c) Explain in detail Domain Name System (DNS).

MCQ/Objective Type Questions

Duration: 30 Minutes Marks:14

Q.1 Choose the correct alternatives from the options. **14**

1) In an open loop control system _____
a) Output is independent of control input
b) Output is dependent on control input
c) Only system parameters have effect on the control output
d) None of the above

2) A control system in which the control action is somehow dependent on the output is known as _____
a) Closed loop system b) Semiclosed loop system
c) Open system d) None of the above

3) Signal flow graph is a _____
a) semilog graph
b) log-log graph
c) Topological representation of a set of differential equation
d) A special type of graph for analysis of modern control system

4) The overall transfer function from block diagram reduction for cascaded blocks is _____
a) Sum of individual gain
b) Product of individual gain
c) Difference of individual gain
d) Divsion of individual gain

5) Root locus is used to calculate _____
a) Marginal stability b) Absolute stability
c) Conditional stability d) Relative stability

6) Standard test signals in control system are _____
a) Impulse signal b) Ramp signal
c) Unit step signal d) All of the mentioned

7) While increasing the value of gain K, the system becomes _____
a) Less stable b) More stable
c) Unstable d) Absolute stable

8) Roots on the imaginary axis makes the system _____
a) Stable b) Unstable
c) Marginally stable d) Linear

9) The overall transfer function of two blocks in parallel are _____
a) Sum of individual gain b) Product of individual gain
c) Difference of individual gain d) Division of individual gain

10) The main objective of drawing root locus plot is _____
a) To obtain a clear picture about the open loop poles and zeroes of the system
b) To obtain a clear picture about the transient response of feedback system for various values of open loop gain K
c) To determine sufficient condition for the value of 'K' that will make the feedback system unstable
d) Both b and c

11) A node having only outgoing branches _____
a) Input node b) Output node
c) Incoming node d) Outgoing node

12) Scientist Bode have contribution in _____
a) Asymptotic plots b) Polar plots
c) Root locus technique d) Constant M and n circle

13) For a stable closed loop system, the gain at phase crossover frequency should always be _____
a) < 20 dB b) < 6 dB
c) > 6 dB d) > 0 dB

14) Routh Hurwitz criterion gives _____
a) Number of roots in the right half of the s-plane
b) Value of the roots
c) Number of roots in the left half of the s-plane
d) Number of roots in the top half of the s-plane

Seat No.

Control System (BTN06401)

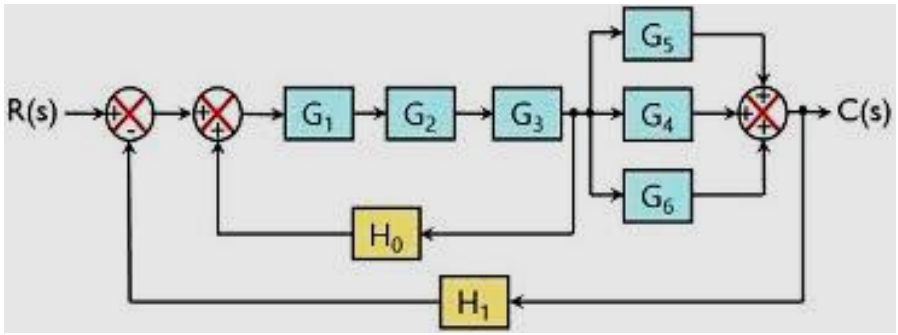
Day & Date: Monday 26-05-2025 Max. Marks: 56
Time: 10:00 AM To 01:00 PM

Instructions: 1) All questions are compulsory.
2) Figures to the right indicate full marks.

Section – I

Q.2 Attempt any four of the following **16**

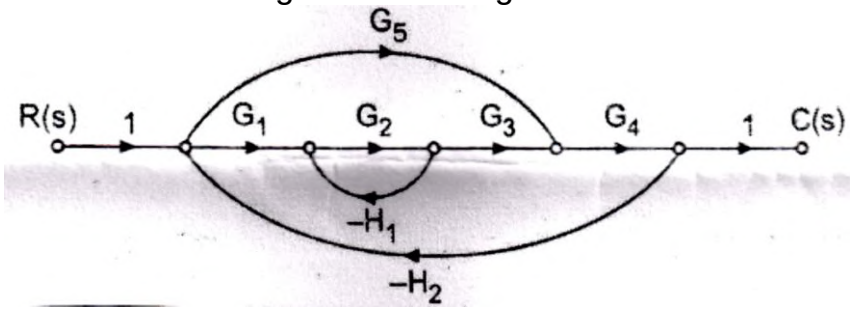
a) Reduce the following block diagram using block diagram reduction rules.



b) What is type of system explains TYPE 0 and TYPE 1 system.
c) Examine stability if $S^5 + S^4 + 2S^3 + 2S^2 + 3S + 15 = 0$
d) Define Transfer Function? Derive transfer function.
e) Explain Liquid level Control system.

Q.3 Attempt any two of the following **12**

a) Find Transfer function of given SFG diagram.



b) Explain working principle of Stepper motor with diagram.
c) Determine Kp, Kv, Ka, Steady State Error with open loop transfer function as:
$G(s)H(s) = \frac{10(s+2)(s+3)}{s(s+1)(s+4)(s+5)}$, and $r(t) = 3 + t + t^2$

Section – II

Q.4 Attempt any four of the following **16**

a) Explain the terms 1) Gain Margin, 2) Phase Margin

b) Explain Lead Compensator.

c) For Root Locus, explain Angle condition and Magnitude condition

d) How to find the Breakaway point and the angle of Departure for Root Locus Technique.

e) Draw the root locus of the control system having open loop transfer function,

$$G(s)H(s) = \frac{20}{s(s+1)(s+3)}$$

Q.5 Attempt any two of the following **12**

a) Construct the Bode Plot for Transfer Function $G(s) = \frac{20}{s(1+0.1s)}$

b) A feedback system has open loop transfer function

$$G(s)H(s) = \frac{K(1+S)}{s(s^2+5S-6)}$$

Determine,

i) Range of K for stability,

ii) Marginal value of K,

iii) Location of roots for marginal value of K.

c) Explain two special cases of Routh's criterion.

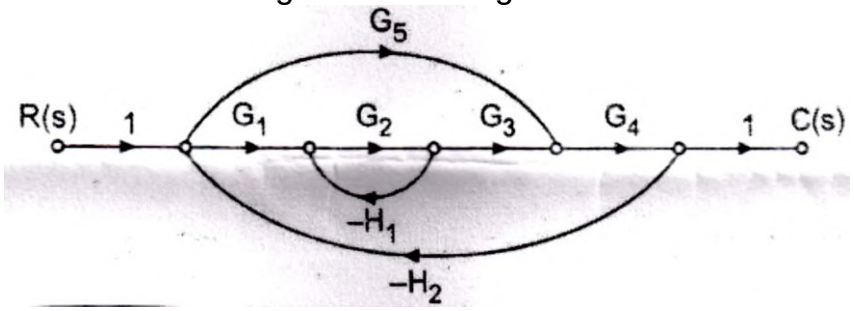
e) Explain Liquid level Control system.

Q.3 Attempt any two of the following **12**

a) Find Transfer function of given SFG diagram.



b) Explain working principle of Stepper motor with diagram.
c) Determine Kp, Kv, Ka, Steady State Error with open loop transfer function as:
$G(s)H(s) = \frac{10(s+2)(s+3)}{s(s+1)(s+4)(s+5)}$, and $r(t) = 3 + t + t^2$

Section – II

Q.4 Attempt any four of the following **16**

a) Explain the terms 1) Gain Margin, 2) Phase Margin

b) Explain Lead Compensator.

c) For Root Locus, explain Angle condition and Magnitude condition

d) How to find the Breakaway point and the angle of Departure for Root Locus Technique.

e) Draw the root locus of the control system having open loop transfer function,

$$G(s)H(s) = \frac{20}{s(s+1)(s+3)}$$

Q.5 Attempt any two of the following **12**

a) Construct the Bode Plot for Transfer Function $G(s) = \frac{20}{s(1+0.1s)}$

b) A feedback system has open loop transfer function

$$G(s)H(s) = \frac{K(1+S)}{s(s^2+5S-6)}$$

Determine,

i) Range of K for stability,

ii) Marginal value of K,

iii) Location of roots for marginal value of K.

c) Explain two special cases of Routh's criterion.

S.Y. (B.Tech.) (Sem - II) (New/Old) (CBCS) Examination: March/April-2025
ELECTRONICS & TELECOMMUNICATION ENGINEERING
Control System (BTN06401)

Day & Date: Monday 26-05-2025 Max. Marks: 70
Time: 10:00 AM To 01:00 PM

Instructions: 1) Q. No. 1 is compulsory. It should be solved in the first 30 minutes in Answer Book Page no 03 (Starting page of the Answer Book). Each question carries one mark.
2) Don't forget to Mention question paper set (P/Q/R/S) on top of page.
3) Figures to the right indicates full marks.

MCQ/Objective Type Questions

Duration: 30 Minutes Marks:14

Q.1 Choose the correct alternatives from the options. **14**

1) A node having only outgoing branches _____
a) Input node b) Output node
c) Incoming node d) Outgoing node

2) Scientist Bode have contribution in _____
a) Asymptotic plots b) Polar plots
c) Root locus technique d) Constant M and n circle

3) For a stable closed loop system, the gain at phase crossover frequency should always be _____
a) < 20 dB b) < 6 dB
c) > 6 dB d) > 0 dB

4) Routh Hurwitz criterion gives _____
a) Number of roots in the right half of the s-plane
b) Value of the roots
c) Number of roots in the left half of the s-plane
d) Number of roots in the top half of the s-plane

5) In an open loop control system _____
a) Output is independent of control input
b) Output is dependent on control input
c) Only system parameters have effect on the control output
d) None of the above

6) A control system in which the control action is somehow dependent on the output is known as _____
a) Closed loop system b) Semiclosed loop system
c) Open system d) None of the above

7) Signal flow graph is a _____
a) semilog graph
b) log-log graph
c) Topological representation of a set of differential equation
d) A special type of graph for analysis of modern control system

8) The overall transfer function from block diagram reduction for cascaded blocks is _____
a) Sum of individual gain
b) Product of individual gain
c) Difference of individual gain
d) Divsion of individual gain

9) Root locus is used to calculate _____
a) Marginal stability b) Absolute stability
c) Conditional stability d) Relative stability

10) Standard test signals in control system are _____
a) Impulse signal b) Ramp signal
c) Unit step signal d) All of the mentioned

11) While increasing the value of gain K, the system becomes _____
a) Less stable b) More stable
c) Unstable d) Absolute stable

12) Roots on the imaginary axis makes the system _____
a) Stable b) Unstable
c) Marginally stable d) Linear

13) The overall transfer function of two blocks in parallel are _____
a) Sum of individual gain b) Product of individual gain
c) Difference of individual gain d) Division of individual gain

14) The main objective of drawing root locus plot is _____
a) To obtain a clear picture about the open loop poles and zeroes of the system
b) To obtain a clear picture about the transient response of feedback system for various values of open loop gain K
c) To determine sufficient condition for the value of ‘K’ that will make the feedback system unstable
d) Both b and c

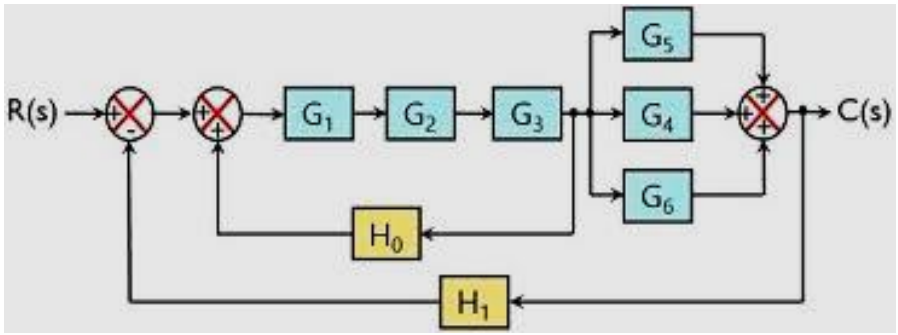
Instructions: 1) All questions are compulsory.
2) Figures to the right indicate full marks.

Section – I

Q.2 Attempt any four of the following **16**

a) Reduce the following block diagram using block diagram reduction rules.



b) What is type of system explains TYPE 0 and TYPE 1 system.

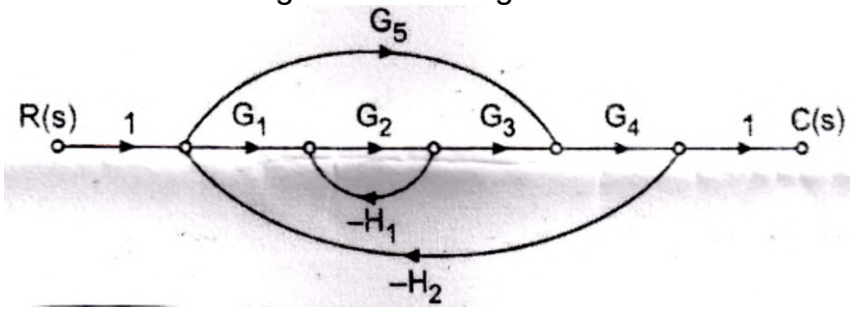
c) Examine stability if $S^5 + S^4 + 2S^3 + 2S^2 + 3S + 15 = 0$

d) Define Transfer Function? Derive transfer function.

e) Explain Liquid level Control system.

Q.3 Attempt any two of the following **12**

a) Find Transfer function of given SFG diagram.



b) Explain working principle of Stepper motor with diagram.

c) Determine Kp, Kv, Ka, Steady State Error with open loop transfer function as:

$G(s)H(s) = \frac{10(s+2)(s+3)}{s(s+1)(s+4)(s+5)}$, and $r(t) = 3 + t + t^2$

Section – II

Q.4 Attempt any four of the following **16**

a) Explain the terms 1) Gain Margin, 2) Phase Margin

b) Explain Lead Compensator.

c) For Root Locus, explain Angle condition and Magnitude condition

d) How to find the Breakaway point and the angle of Departure for Root Locus Technique.

e) Draw the root locus of the control system having open loop transfer function,

$$G(s)H(s) = \frac{20}{s(s+1)(s+3)}$$

Q.5 Attempt any two of the following **12**

a) Construct the Bode Plot for Transfer Function $G(s) = \frac{20}{s(1+0.1s)}$

b) A feedback system has open loop transfer function

$$G(s)H(s) = \frac{K(1+S)}{s(s^2+5S-6)}$$

Determine,

i) Range of K for stability,

ii) Marginal value of K,

iii) Location of roots for marginal value of K.

c) Explain two special cases of Routh's criterion.

MCQ/Objective Type Questions

Duration: 30 Minutes Marks:14

Q.1 Tick the correct option. **14**

1) In ideal Differential Amplifier, if same signal is given to both inputs, and then output will be ____
a) Same as input b) Double the input
c) Not equal to zero d) Zero

2) What should be maximum bandwidth for a gain of 20 in case of IC 741?
a) 1 MHz b) 100 KHz
c) 50 KHz d) 1 KHz

3) The type of feedback used in closed loop non-inverting amplifier is _____.
a) Voltage series b) Current series
c) Current shunt d) Voltage shunt

4) How to improve CMRR value _____.
a) Increase common mode gain
b) Decrease common mode gain
c) Increase Differential mode gain
d) Decrease differential mode gain

5) Voltage Follower is special case of _____ amplifier.
a) Non-inverting b) Inverting
c) Differential d) Scaling

6) Zero crossing detectors is special case of _____.
a) Basic comparator b) Peak detector
c) Schmitt trigger d) Window detector

7) Which is not the ideal characteristic of an op-amp?
a) Input Resistance → 0
b) Output impedance → 0
c) Bandwidth → ∞
d) Open loop voltage gain → ∞

8) For radio frequency oscillator components used are _____.
a) Crystal
b) LC
c) RC
d) Both (a & b)

9) A duty cycle is less than _____ in saw tooth wave generator.
a) 90%
b) 66.66%
c) 50%
d) 20%

10) To introduce a delay of 10 ms using IC555 with R = 10Kohm the capacitance value required is _____.
a) 1 μF
b) 4.54mF
c) 0.45 μF
d) 0.1 μF

11) Vref for LM317 is _____.
a) 1.25mV
b) 1.25V
c) 12.5V
d) None of these

12) Find the output voltage of an ideal op-amp. If V1 and V2 are the two input voltages _____.
a) VO = V1-V2
b) VO = A x (V1-V2)
c) VO = A x (V1+V2)
d) VO = V1 x V2

13) For first order active filter gain roll off rate in stop band is _____.
a) 40 dB/decade
b) 20 dB/decade
c) 90 dB/decade
d) 60 dB/decade

14) For Wien bridge Oscillator frequency of oscillation is _____.
a) 0.159 / RC
b) 1.59 / RC
c) 0.065 / RC
d) 6.5 / RC

Instructions: 1) All questions are compulsory.
2) Figures to the right indicate full marks.
3) Assume suitable data if necessary.
4) Draw neat diagrams wherever necessary.

Section – I

Q.2 Attempt the following. (Any Four) **16**

a) What is op-amp? Explain with neat diagram basic building blocks of op-amp.

b) Derive equation for ideal voltage gain of non-inverting amplifier using virtual ground concept.

c) Define the following electrical parameters of IC 741 with practical & ideal values:
a) Input Offset Current
b) Total output offset voltage
c) CMRR
d) PSRR

d) Explain differentiator and its frequency response.

e) Explain the concept of grounded load V-I converter.

Q.3 Attempt the following. (Any Two) **12**

a) Derive expressions for differential voltage gain, R_{in} and R_{out} for DIBO differential amplifier using AC equivalent circuit.

b) Determine the slew rate of a frequency compensated OP-AMP at room temperature, which has a unity cross-over frequency of 5MHz (Assume $V_m = 1$)

c) Draw and Explain Summing and Scaling amplifier using non Inverting mode of amplifiers.

Section – II

Q.5 Answer the following questions. (Any Four) **16**

a) Explain with neat diagram operation of OP-AMP as Comparator.

b) Draw and Explain Zero crossing Detector in detail.

c) Write design procedure for a first order low pass filter.

d) Explain the concept of Phase Shift Oscillator with neat diagrams.

e) What is voltage regulator? Explain the concept of fixed voltage regulators.

Q.6 Answer the following questions. (Any Two) **12**

a) Draw and Explain Positive and negative clippers.

b) Design a second order low-pass filter for a cut-off frequency of 1 kHz with a pass band gain of 1.586
(Assume $C_2 = C_3 = 0.005\ \mu F$ and $R_1 = 33k\Omega$)

c) Explain the operation of Astable Multivibrator using IC 555. Obtain the expression for,
(1) One Cycle Period and Output Frequency
(2) T_{on}
(3) T_{off}

Seat No.

Q.3 Attempt the following. (Any Two) **12**

a) Derive expressions for differential voltage gain, R_{in} and R_{out} for DIBO differential amplifier using AC equivalent circuit.

b) Determine the slew rate of a frequency compensated OP-AMP at room temperature, which has a unity cross-over frequency of 5MHz (Assume $V_m = 1$)

c) Draw and Explain Summing and Scaling amplifier using non Inverting mode of amplifiers.

Section – II

Q.5 Answer the following questions. (Any Four) **16**

a) Explain with neat diagram operation of OP-AMP as Comparator.

b) Draw and Explain Zero crossing Detector in detail.

c) Write design procedure for a first order low pass filter.

d) Explain the concept of Phase Shift Oscillator with neat diagrams.

e) What is voltage regulator? Explain the concept of fixed voltage regulators.

Q.6 Answer the following questions. (Any Two) **12**

a) Draw and Explain Positive and negative clippers.

b) Design a second order low-pass filter for a cut-off frequency of 1 kHz with a pass band gain of 1.586
(Assume $C_2 = C_3 = 0.005\ \mu F$ and $R_1 = 33k\Omega$)

c) Explain the operation of Astable Multivibrator using IC 555. Obtain the expression for,
(1) One Cycle Period and Output Frequency
(2) T_{on}
(3) T_{off}

S.Y. (B.Tech.) (Sem-II) (New/Old) (CBCS) Examination: March/April-2025
ELECTRONICS & TELECOMMUNICATION ENGINEERING
Analog Integrated Circuits (BTN06402)

Day & Date: Wednesday, 28-05-2025 Max. Marks: 70
Time: 10:00 AM To 01:00 PM

Instructions: 1) Q. No. 1 is compulsory. It should be solved in the first 20 minutes in Answer Book Page no 03 (Starting page of the Answer Book). Each Question carries one mark.
2) Don't forget to mention question paper set (P/Q/R/S) on top of page.
3) Figures to the right indicates full marks.
4) Assume suitable data if necessary.
5) Draw neat diagram wherever necessary.

MCQ/Objective Type Questions

Duration: 30 Minutes Marks:14

Q.1 Tick the correct option. **14**

1) Zero crossing detectors is special case of _____.
a) Basic comparator b) Peak detector
c) Schmitt trigger d) Window detector

2) Which is not the ideal characteristic of an op-amp?
a) Input Resistance → 0
b) Output impedance → 0
c) Bandwidth → ∞
d) Open loop voltage gain → ∞

3) For radio frequency oscillator components used are _____.
a) Crystal b) LC
c) RC d) Both (a & b)

4) A duty cycle is less than _____ in saw tooth wave generator.
a) 90% b) 66.66%
c) 50% d) 20%

5) To introduce a delay of 10 ms using IC555 with R = 10Kohm the capacitance value required is _____.
a) 1 μF b) 4.54mF
c) 0.45 μF d) 0.1 μF

6) Vref for LM317 is _____.
a) 1.25mV b) 1.25V
c) 12.5V d) None of these

7) Find the output voltage of an ideal op-amp. If V1 and V2 are the two input voltages _____.

a) VO = V1-V2 b) VO = A x (V1-V2)
c) VO = A x (V1+V2) d) VO = V1 x V2

8) For first order active filter gain roll off rate in stop band is _____.

a) 40 dB/decade b) 20 dB/decade
c) 90 dB/decade d) 60 dB/decade

9) For Wien bridge Oscillator frequency of oscillation is _____.

a) 0.159 / RC b) 1.59 / RC
c) 0.065 / RC d) 6.5 / RC

10) In ideal Differential Amplifier, if same signal is given to both inputs, and then output will be ____

a) Same as input b) Double the input
c) Not equal to zero d) Zero

11) What should be maximum bandwidth for a gain of 20 in case of IC 741?

a) 1 MHz b) 100 KHz
c) 50 KHz d) 1 KHz

12) The type of feedback used in closed loop non-inverting amplifier is _____.

a) Voltage series b) Current series
c) Current shunt d) Voltage shunt

13) How to improve CMRR value _____.

a) Increase common mode gain
b) Decrease common mode gain
c) Increase Differential mode gain
d) Decrease differential mode gain

14) Voltage Follower is special case of _____ amplifier.

a) Non-inverting b) Inverting
c) Differential d) Scaling

Time: 10:00 AM To 01:00 PM

Instructions: 1) All questions are compulsory.
2) Figures to the right indicate full marks.
3) Assume suitable data if necessary.
4) Draw neat diagrams wherever necessary.

Section – I

Q.2 Attempt the following. (Any Four) **16**

a) What is op-amp? Explain with neat diagram basic building blocks of op-amp.

b) Derive equation for ideal voltage gain of non-inverting amplifier using virtual ground concept.

c) Define the following electrical parameters of IC 741 with practical & ideal values:
a) Input Offset Current
b) Total output offset voltage
c) CMRR
d) PSRR

d) Explain differentiator and its frequency response.

e) Explain the concept of grounded load V-I converter.

Q.3 Attempt the following. (Any Two) **12**

a) Derive expressions for differential voltage gain, R_{in} and R_{out} for DIBO differential amplifier using AC equivalent circuit.

b) Determine the slew rate of a frequency compensated OP-AMP at room temperature, which has a unity cross-over frequency of 5MHz (Assume $V_m = 1$)

3) Figures to the right indicates full marks.
4) Make suitable assumptions if necessary and state them clearly.
5) Use non-programmable calculator is allowed.

MCQ/Objective Type Questions

Duration: 30 Minutes Marks:14

Q.1 Choose the correct Answer. **14**

1) Average information per message is called _____.
a) Mutual information b) Joint information
c) Uncertainty d) Entropy

2) Information content in the universally true event is _____.
a) Infinite Constant b) Zero
c) Positive d) Negative Constant

3) In _____ encoding, we use three levels: positive, zero and negative.
a) Unipolar b) Bipolar
c) Polar d) None of the above

4) In PCM quantization noise depends on _____.
a) Sampling rate b) Number of quantization levels
c) Signal power d) None of the above

5) The minimum distance in two symbols in case of BPSK is _____.
a) $\sqrt{\mathrm{Eb}}$ b) $2\sqrt{\mathrm{Eb}}$
c) Eb d) None of these

6) Coherent detection at the receiver side requires _____.
a) Phase Synchronization b) Timing Synchronization
c) Both a) & b) d) Amplitude Synchronization

7) In QAM, both identities are varied _____.
a) Amplitude and phase b) Bit rate and phase
c) Frequency and phase d) Baud rate and phase

8) The error probability of QPSK is, _____.
a) Better than BPSK b) Inferior to BPSK
c) Same as BPSK d) None of the above

9) Minimum shift keying is similar to _____.
a) Continuous phase frequency shift keying
b) BPSK
c) BFSK
d) QPSK

10) A correlation receiver consists of _____.
a) Multiplier and integrator b) An integrator only
c) Multiplier only d) Adder and integrator

11) Equalizer is used for _____.
a) Frame synchronization b) Symbol synchronization
c) Carrier synchronization d) Minimizing ISI

12) The order of _____ matrix is (n- k) x n.
a) Generator matrix b) Parity check matrix
c) Transpose of H d) none of above

13) Code rate is the ratio of _____.
a) k/n b) n/k
c) q/k d) none of above

14) The weight of the code 1010100 is _____.
a) 2 b) 3
c) 4 d) 5

Principles of Digital Communication (BTN06403)

Day & Date: Friday, 30-05-2025 Max. Marks: 56
Time: 10:00 AM To 01:00 PM

Instructions: 1) All questions are compulsory.
2) Figures to the right indicate full marks.
3) Make suitable assumptions if necessary and state them clearly.
4) Use of non-programmable calculator is allowed.

Section – I

Q.2 Attempt the following (Any Four). **16**

a) Explain concept of amount of information. Why logarithmic function is used to represent information.

b) A black & white TV picture consists of 525 lines of picture information. Assume that, each line consists of 525 picture elements & that each element can have 256 brightness levels. Pictures are repeated at the rate of 30 per second. Calculate the average rate of information conveyed by a TV set to a receiver.

c) Explain the distortions in Delta modulation. Give its remedy.

d) Write notes on Inter Symbol Interference.

e) Give advantages, disadvantages & applications of DPSK

Q.3 Attempt the following (Any Two). **12**

a) Find the mutual information for the channel shown below in figure 1.

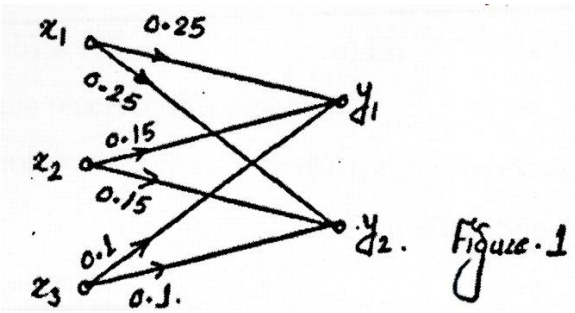

Figure. 1

b) Explain with neat schematic PCM transmitter & receiver.

c) With the help of a neat block schematic explain the FSK modulator & demodulator.

Section – II

Q.4 Attempt the following (Any Four). **16**

a) Explain matched filter.

b) Write a note on M-ary orthogonal signals.

c) Write any one method of frame synchronization.

d) For the (6,3) block code the parity check matrix is given as

$$H = \begin{bmatrix} 1 & 0 & 1 & 1 & 0 & 0 \\ 0 & 1 & 1 & 0 & 1 & 0 \\ 1 & 1 & 0 & 0 & 0 & 1 \end{bmatrix}$$

If received vector is 100101, find whether it is erroneous.

e) Explain any one carrier recovery technique.

Q.5 Attempt the following (Any Two). **12**

a) For (7,4) block code the generator matrix is given by,

$$G = \begin{bmatrix} 1 & 0 & 0 & 0 & 1 & 0 & 1 \\ 0 & 1 & 0 & 0 & 1 & 1 & 1 \\ 0 & 0 & 1 & 0 & 1 & 1 & 0 \\ 0 & 0 & 0 & 1 & 0 & 1 & 1 \end{bmatrix}$$

1) Find parity check matrix.
2) Find all the code vectors of this code
3) Comment on error detection and correction capability of this code.

b) Explain the working of M-ary FSK transmitter.

c) Explain in detail integrator and dump receiver.

Q.2 Attempt the following (Any Four). **16**

a) Explain concept of amount of information. Why logarithmic function is used to represent information.

b) A black & white TV picture consists of 525 lines of picture information. Assume that, each line consists of 525 picture elements & that each element can have 256 brightness levels. Pictures are repeated at the rate of 30 per second. Calculate the average rate of information conveyed by a TV set to a receiver.

c) Explain the distortions in Delta modulation. Give its remedy.

d) Write notes on Inter Symbol Interference.

e) Give advantages, disadvantages & applications of DPSK

Q.3 Attempt the following (Any Two). **12**

a) Find the mutual information for the channel shown below in figure 1.

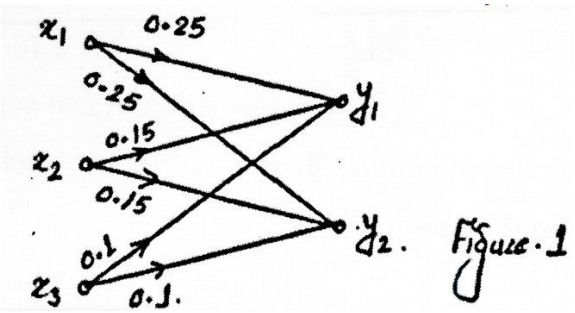

Figure 1

b) Explain with neat schematic PCM transmitter & receiver.

c) With the help of a neat block schematic explain the FSK modulator & demodulator.

Section – II

Q.4 Attempt the following (Any Four). **16**

a) Explain matched filter.

b) Write a note on M-ary orthogonal signals.

c) Write any one method of frame synchronization.

d) For the (6,3) block code the parity check matrix is given as

$$H = \begin{bmatrix} 1 & 0 & 1 & 1 & 0 & 0 \\ 0 & 1 & 1 & 0 & 1 & 0 \\ 1 & 1 & 0 & 0 & 0 & 1 \end{bmatrix}$$

If received vector is 100101, find whether it is erroneous.

e) Explain any one carrier recovery technique.

Q.5 Attempt the following (Any Two). **12**

a) For (7,4) block code the generator matrix is given by,

$$G = \begin{bmatrix} 1 & 0 & 0 & 0 & 1 & 0 & 1 \\ 0 & 1 & 0 & 0 & 1 & 1 & 1 \\ 0 & 0 & 1 & 0 & 1 & 1 & 0 \\ 0 & 0 & 0 & 1 & 0 & 1 & 1 \end{bmatrix}$$

1) Find parity check matrix.
2) Find all the code vectors of this code
3) Comment on error detection and correction capability of this code.

b) Explain the working of M-ary FSK transmitter.

c) Explain in detail integrator and dump receiver.

S. Y (B. Tech.) (Sem-II) (New/Old) (CBCS) Examination: March/April-2025
ELECTRONICS & TELECOMMUNICATION ENGINEERING
Signals and Systems (BTN06404)

Day & Date: Tuesday, 03-06-2025 Max. Marks: 70
Time: 10:00 AM To 01:00 PM

Instructions: 1) Q. No. 1 is compulsory. It should be solved in the first 30 minutes in Answer Book Page no 03 (Starting page of the Answer Book). Each question carries one mark.
2) Don't forget to Mention question paper set (P/Q/R/S) on top of page.
3) Figures to the right indicates full marks.

MCQ/Objective Type Questions

Duration: 30 Minutes Marks:14

Q.1 Choose the correct Alternatives. **14**

1) Which one of the following systems is causal?
a) $y(t) = x(t) + x(t-3) + x(t^2)$
b) $y(n) = x(n+2)$
c) $y(t) = x(t-1) + x(t-2)$
d) $y(n) = x(2^n)$

2) Which one of the following is an example of a bounded signal?
a) $e^t \cos wt$ b) $e^t \sin w(-t)$
c) $e^{-t} \cos wt$ d) $e^t \cos w(-t)$

3) Determine the odd component of the signal: $x(t) = \cos t + \sin t$.
a) $\sin t$ b) $2 \sin t$
c) $\cos t$ d) $2 \cos t$

4) For an energy signal _____.
a) $E = 0$ b) $P = \infty$
c) $E = \infty$ d) $P = 0$

5) Which of the following is true for complex-valued function?
a) $X(-t) = x^*(t)$ b) $X(-t) = x(t)$
c) $X(-t) = -x(t)$ d) $X(-t) = x^*(-t)$

6) The step function $u(t)$ is integral of _____ with respect to time t.
a) Ramp function b) Impulse function
c) Sinusoidal function d) Exponential function

7) What is a convolution sum?

a) $\sum x[k]h[n-k], k$ from $-\infty$ to $+\infty$

b) $\sum x[k]^{*}\sum h[n-k], k$ from $-\infty$ to $+\infty$

c) $\sum x[k] + \sum h[n-k], k$ from $-\infty$ to $+\infty$

d) $\sum\sum x[k]h[n-k], k$ from $-\infty$ to $+\infty$

8) The z-transform of $\delta[n-k] > 0$ is _____.

a) $Z^{k}, Z > 0$ b) $Z^{-k}, Z > 0$

c) $Z^{k}, Z \neq 0$ d) $Z^{-k}, Z \neq 0$

9) The z-transform of $x[n] = \{2,4,5,7,0,1\}$(5 as the reference variable) is _____.

a) $2z^{2} + 4z + 5 + 7z + z^{2}, z \neq \infty$

b) $2z^{-2} + 4z^{-1} + 5 + 7z + z^{3}, z \neq \infty$

c) $2z^{-2} + 4z^{-1} + 5 + 7z + z^{3}, 0 < |z| < \infty$

d) $2z^{2} + 4z + 5 + 7z^{-1} + z^{3}, 0 < |z| < \infty$

10) Find the Fourier transform of the unit step function.

a) $\pi\delta(\omega) + 1/\omega$ b) $\pi\delta(\omega) + 1/j\omega$

c) $\pi\delta(\omega) - 1/j\omega$ d) $\delta(\omega) + 1/j\omega$

11) The Fourier transform of the signal sgn (t) is _____.

a) $-2/j\omega$ b) $4/j\omega$

c) $2/j\omega$ d) $1/j\omega + 1$

12) The Fourier transform of a continuous time aperiodic signal is _____.

a) Continuous and aperiodic b) Discrete and aperiodic

c) Continuous and periodic d) Discrete and periodic

13) Which of the following is me process of 'aliasing'?

a) Peaks overlapping b) Phase overlapping

c) Amplitude overlapping d) Spectral overlapping

14) Sampling a signal is equivalent to multiplying it with _____.

a) A sync function b) A train of impulse

c) A train of sync functions d) A rectangular window

Time: 10:00 AM To 01:00 PM

Instructions: 1) All questions are compulsory.
2) Figures to the right indicate full marks.

Section – I

Q.2 Answer any FOUR. **16**

a) Sketch the following signal: $X(t) = u(-t+1)$

b) Find Even and Odd components of following signals.
$X(t) = \cos t + \sin t + \cos t \sin t$

c) Determine the energy and power of the following signal. $X(t) = t.u(t)$

d) Explain in detail properties of convolution.

e) Realize the transfer function of the system given in direct form-I
$H(s) = \dfrac{s+1}{S^2+3s+5}$

Q.3 Answer any two. **12**

a) List properties of system and explain in detail.

b) Find the convolution integral of given signals
$x_1(t) = e^{-at}u(t) \quad x_2(t) = e^{-bt}u(t)$

c) Find the convolution of the sequences.
$x_1(n) = \{1, -1, 2, 3, \} \quad x_2(n) = \{1, -2, 3, -1\}$

Section – II

Q.4 Answer any FOUR. **16**

a) State and explain sampling theorem in detail.

b) Obtain Fourier transform of $x(t) = e^{-at}.u(t)$

c) Find z- transform of $y(n) = \sum_{k=-\infty}^{n} x(k)$

d) Explain Properties of ROC of $X(z)$

e) Determine Nyquist rate and Nyquist sampling interval of $\sin c^2\,(200\pi t)$

Q.5 Answer any TWO. **12**

a) Find the Fourier transform of $x(t) = e^{at}u(-t)$

b) Find the z-transform of $x(n) = (1/2)^n u(-n)$ and also find ROC.

c) Find the Fourier series coefficients for the continuous time periodic signal.
$X(t) = 1.5 \quad \text{for } 0 \le t < 1$
$= -1.5 \quad \text{for } 1 \le t < 2$
With fundamental frequency $\Omega_0 = \pi$.

Day & Date: Thursday, 05-June-2025 Max. Marks: 70
Time: 10:00 AM To 01:00 PM

Instructions: 1) Q. No. 1 is compulsory. It should be solved in the first 30 minutes in Answer Book Page no 03 (Starting page of the Answer Book). Each question carries one mark.
2) Don't forget to Mention question paper set (P/Q/R/S) on top of page.
3) Figures to right indicates full marks.

MCQ/Objective Type Questions

Duration: 30 Minutes Marks:14

Q.1 Choose the correct Answer. 14

1) In ____, search start at the beginning of the list and check every element in the list.
a) Linear search b) Binary search
c) Hash search d) Binary Tree search

2) State True or False:
i) Binary search is used for searching in a sorted array.
ii) The time complexity of binary search is O(logn).
a) True, False b) False, True
c) False, False d) True, True

3) What is the asymptotic notation for Average-case?
a) Big O b) Omega
c) Theta d) None of the above

4) Inserting an item into the stack when stack is not full is called _____ operation and deletion of item form the stack, when stack is not empty is called ____.
a) push, pop b) pop, push
c) insert, delete d) delete, insert

5) Which of the following data structure is linear type?
a) Graph b) Trees
c) Binary tree d) Stack

6) Overflow condition of queue is ____.
a) rear==max-1 b) top==max-1
c) front==max-l d) Both a) & b)

7) ____ is a pile in which items are added at one end and removed from the other.

a) Stack b) Queue
c) List d) None of the above

8) A binary tree in which all its levels except the last, have maximum numbers of nodes, and all the nodes in the last level have only one child it will be its left child. Name the tree.

a) Threaded tree b) Complete binary tree
c) M-way search tree d) Full binary tree

9) A ____ is a data structure that organizes data similar to a line in the supermarket, where the first one in line is the first one out.

a) Queue linked list b) Stacks linked list
c) Both of them d) Neither of them

10) In the ____ traversal we process all of a vertex's descendants before we move to an adjacent vertex.

a) Depth First b) Breadth first
c) With First d) Depth Limited

11) State True or False:

i) Network is a graph that has weights or costs associated with it.
ii) An undirected graph which contains no cycles is called a forest.
iii) A graph is said to be complete if there is no edge between every pair of vertices.

a) True, False, True b) True, True, False
c) True, True, True d) False, True, True

12) Which of the following is not the internal sort?

a) Insertion sort b) Bubble sort
c) Merge sort d) Heap sort

13) A graph is said to be ____ if the vertices can be split into two sets V1 and V2 such there are no edges between two vertices of V1 or two vertices of V2.

a) Partite b) Bipartite
c) Rooted d) Bisects

14) Which of the following statement is true?

i) Using singly linked lists and circular list, it is not possible to traverse the list backwards.
ii) To find the predecessor, it is required to traverse the list from the first node in case of singly linked list.

a) i-only b) ii-only
c) Both i and ii d) None of both

Set **P**

S.Y. (B. Tech) (Sem-II) (New/Old) (CBCS) Examination: March/April-2025
ELECTRONICS & TELECOMMUNICATION ENGINEERING
Data Structures (BTN06405)

Day & Date: Thursday, 05-June-2025 Max. Marks: 56
Time: 10:00 AM To 01:00 PM

Instructions: 1) All question are compulsory.
2) Figures to the right indicate full marks.
3) Assume additional data if required and mention it clearly.

Section – I

Q.2 Solve the following: (Any Four) **16**

a) Explain Algorithm Analysis & Algorithm complexity in detail.
b) Write a C program to find the Fibonacci series of first 10 numbers with recursive function.
c) What are the Applications of stack?
d) Write C program to implement a linear queue.
e) Write note on double ended queue DEQUE.

Q.3 Solve the following: (Any Two) **12**

a) Which are the Different Basic Terminologies in data structures?
b) Define different operations in Stack.
c) Write a C program for circular queue.

Section – II

Q.4 Solve the following: (Any Four) **16**

a) Explain the representation of a polynomial using linked list.
b) What are various applications of tree?
c) Draw binary search tree for following input. 42 23 74 11 65 54
d) Explain adjacency matrix of graph with an example.
e) Explain bubble sort method for sorting array of 10 elements.
Array: [29, 10, 14, 37, 13, 40, 15, 22, 8, 19]

Q.5 Solve the following: (Any Two) **12**

a) Write a program to implement singly linked list using functions insert, delete and display.
b) The following sequence gives preorder & inorder traversal of binary tree
Preorder: ABCDEGFHIJ Inorder: BCAEGDHFIJ
c) What is hashing? Explain properties of good hash function? Explain modulus hash function.

MCQ/Objective Type Questions

Duration: 30 Minutes Marks:14

Q.1 Choose the correct Answer. **14**

1) Rank of a (m x n) matrix is determined by the number of linearly ____ rows present in the matrix.
a) Dependent b) Independent
c) Both d) None

2) What is the probability of getting a number less than 6 on dice?
a) 1 b) 1/3
c) ½ d) 0

3) In square matrix, sum of principal diagonal elements is given as ____.
a) Trace b) Rank
c) Eigen Value d) None

4) A die is thrown once. What is the probability that the score is a factor of 3?
a) 3/6 b) ½
c) 1/3 d) 1

5) The matrix which follows the conditions m=n is called?
a) Square matrix b) Rectangular matrix
c) Scalar matrix d) Diagonal matrix

6) ____ shows difference between actual Y and predicted Y value found using regression equation.
a) Slope b) Residual
c) Outlier d) None

7) How many outcomes are possible when drawing a card from deck of cards?
a) 1 b) 13
c) 52 d) 26

8) PCA reduce dimensionality of the data using feature extraction.
a) True b) False

9) What is Machine learning?
a) The autonomous acquisition of knowledge through the use of computer programs
b) The autonomous acquisition of knowledge through the use of manual programs
c) The selective acquisition of knowledge through the use of computer programs
d) The selective acquisition of knowledge through the use of manual programs

10) In the regression equation Y = 21+3X, the slope is ____.
a) 21 b) +3
c) -21 d) -3

11) Identify the type of learning in which labelled training data is used.
a) Semi supervised b) Supervised learning
c) Reinforcement learning d) Unsupervised learning

12) Linear regression is example of ____ learning.
a) Supervised b) Unsupervised
c) Reinforcement d) None of above

13) For orthogonal variable, correlation value is ____.
a) 0 b) 1
c) -1 d) None

14) Overfitting has high ____.
a) Bias b) Variance
c) Both d) None

SECTION - I

Q.2 Solve the following: (Any Four) **16**

a) A die is rolled twice and two numbers are obtained, let X be the outcome of first role and Y be the outcome of the second roll. Given that X+Y=5, what is the probability of X=4 or Y=4?

b) Describe problem formulation.

c) Solve following using Substitute method.
2x-3y=-2 4x+y=24

d) A fair coin is tossed three times. What is probability of obtaining one Head and two Tails?

e) Describe Gaussian distribution.

Q.3 Solve the following: (Any Two) **12**

a) A doctor is aware of that disease Meningitis causes a patient to have stiff neck & it occurs 80% of the time. He also is aware of some more facts
(a) The known probability that patient has Meningitis disease is 1/30000.
(b) The known probability that a patient has stiff neck is 2%.
Find the probability that patients with stiff neck will have Meningitis.

b) The trace of square matrix of order 2*2 is 3 and trace of A3 is -18. Find determinant of matrix A.

c) Consider two bags, an orange bag and black bag. There are 4 candies in orange bag and 5 candies in black bag. There are also 2 chocolates in orange bag and 3 chocolates in black bag. A sweet is to be chosen randomly from any of the bags. What is probability that chosen sweet is chocolate from black bag?

SECTION - II

Q.4 Solve the following: (Any Four) **16**

a) Explain common term related to PCA.

b) Explain curse of dimensionality.

c) Write a note on machine learning.

d) Differentiate between Supervised, Unsupervised and Reinforcement Learning.

e) Differentiate between Training data and Testing data.

Q.5 Attempt the following: (Any Two) **12**

a) Explain overfitting and underfitting in detail with an example.

b) Explain key steps of PCA in Practice.

c) Explain various issues in machine learning.

a) 0 b) 1
c) -1 d) None

7) Overfitting has high ____.

a) Bias b) Variance
c) Both d) None

8) Rank of a (m x n) matrix is determined by the number of linearly ____ rows present in the matrix.

a) Dependent b) Independent
c) Both d) None

9) What is the probability of getting a number less than 6 on dice?

a) 1 b) 1/3
c) ½ d) 0

10) In square matrix, sum of principal diagonal elements is given as ____.

a) Trace b) Rank
c) Eigen Value d) None

11) A die is thrown once. What is the probability that the score is a factor of 3?

a) 3/6 b) ½
c) 1/3 d) 1

12) The matrix which follows the conditions m=n is called?

a) Square matrix b) Rectangular matrix
c) Scalar matrix d) Diagonal matrix

13) ____ shows difference between actual Y and predicted Y value found using regression equation.

a) Slope b) Residual
c) Outlier d) None

14) How many outcomes are possible when drawing a card from deck of cards?

a) 1 b) 13
c) 52 d) 26

Seat No.	

Set **Q**

S.Y. (B. Tech.) (Sem-II) (New/Old) (CBCS) Examination: March/April-2025
ELECTRONICS & TELECOMMUNICATION ENGINEERING
Computational Statistics (BTN04407)

Day & Date: Monday, 09-June-2025 Max. Marks: 56
Time: 10:00 AM To 01:00 PM

Instructions: 1) All questions are compulsory.
2) Figures to the right indicate full marks.

SECTION - I

Q.2 Solve the following: (Any Four) **16**

a) A die is rolled twice and two numbers are obtained, let X be the outcome of first role and Y be the outcome of the second roll. Given that X+Y=5, what is the probability of X=4 or Y=4?

b) Describe problem formulation.

c) Solve following using Substitute method.
2x-3y=-2 4x+y=24

d) A fair coin is tossed three times. What is probability of obtaining one Head and two Tails?

e) Describe Gaussian distribution.

Q.3 Solve the following: (Any Two) **12**

a) A doctor is aware of that disease Meningitis causes a patient to have stiff neck & it occurs 80% of the time. He also is aware of some more facts
(a) The known probability that patient has Meningitis disease is 1/30000.
(b) The known probability that a patient has stiff neck is 2%.
Find the probability that patients with stiff neck will have Meningitis.

b) The trace of square matrix of order 2*2 is 3 and trace of A3 is -18. Find determinant of matrix A.

c) Consider two bags, an orange bag and black bag. There are 4 candies in orange bag and 5 candies in black bag. There are also 2 chocolates in orange bag and 3 chocolates in black bag. A sweet is to be chosen randomly from any of the bags. What is probability that chosen sweet is chocolate from black bag?

SECTION - II

Q.4 Solve the following: (Any Four) **16**

a) Explain common term related to PCA.

b) Explain curse of dimensionality.

c) Write a note on machine learning.

d) Differentiate between Supervised, Unsupervised and Reinforcement Learning.

e) Differentiate between Training data and Testing data.

Q.5 Attempt the following: (Any Two) **12**

a) Explain overfitting and underfitting in detail with an example.

b) Explain key steps of PCA in Practice.

c) Explain various issues in machine learning.

S.Y. (B. Tech.) (Sem-II) (New/Old) (CBCS) Examination: March/April-2025
ELECTRONICS & TELECOMMUNICATION ENGINEERING
Computational Statistics (BTN04407)

Day & Date: Monday, 09-June-2025 Max. Marks: 70
Time: 10:00 AM To 01:00 PM

Instructions: 1) Q. No. 1 is compulsory. It should be solved in the first 30 minutes in Answer Book Page no 03 (Starting page of the Answer Book). Each question carries one mark.
2) Don't forget to Mention question paper set (P/Q/R/S) on top of page.
3) Figures to the right indicates full marks.
4) Assume suitable data if required.

MCQ/Objective Type Questions

Duration: 30 Minutes Marks:14

Q.1 Choose the correct Answer. **14**

1) Identify the type of learning in which labelled training data is used.
a) Semi supervised b) Supervised learning
c) Reinforcement learning d) Unsupervised learning

2) Linear regression is example of ____ learning.
a) Supervised b) Unsupervised
c) Reinforcement d) None of above

3) For orthogonal variable, correlation value is ____.
a) 0 b) 1
c) -1 d) None

4) Overfitting has high ____.
a) Bias b) Variance
c) Both d) None

5) Rank of a (m x n) matrix is determined by the number of linearly ____ rows present in the matrix.
a) Dependent b) Independent
c) Both d) None

6) What is the probability of getting a number less than 6 on dice?
a) 1 b) 1/3
c) ½ d) 0

7) In square matrix, sum of principal diagonal elements is given as ____.
a) Trace b) Rank
c) Eigen Value d) None

8) A die is thrown once. What is the probability that the score is a factor of 3?

a) 3/6 b) ½

c) 1/3 d) 1

9) The matrix which follows the conditions m=n is called?

a) Square matrix b) Rectangular matrix

c) Scalar matrix d) Diagonal matrix

10) ____ shows difference between actual Y and predicted Y value found using regression equation.

a) Slope b) Residual

c) Outlier d) None

11) How many outcomes are possible when drawing a card from deck of cards?

a) 1 b) 13

c) 52 d) 26

12) PCA reduce dimensionality of the data using feature extraction.

a) True b) False

13) What is Machine learning?

a) The autonomous acquisition of knowledge through the use of computer programs

b) The autonomous acquisition of knowledge through the use of manual programs

c) The selective acquisition of knowledge through the use of computer programs

d) The selective acquisition of knowledge through the use of manual programs

14) In the regression equation Y = 21+3X, the slope is ____.

a) 21 b) +3

c) -21 d) -3

Duration: 30 Minutes Marks:14

Q.1 Choose the correct Answer. **14**

1) DDL stands for ____.
a) Data declaration language
b) Declaration data language
c) Document declaration language
d) Data definition language

2) _____ operation can be visualized as a horizontal partition of the relation into two set of tuples.
a) JOIN b) PARTITION
c) SELECT d) PROJECT

3) 'AS' clause is used in SQL for ____.
a) selection b) rename
c) join d) projection

4) What key links records from one database table to a record or records in another database table?
a) Primary key b) Principal Key
c) Foreign key d) Link key

5) Which of the following contains information about the structure of a database?
a) Database management system
b) Data dictionary
c) Data repository
d) Data warehouse

6) The language which has recently become the defacto standard for interfacing application programs with relational database system is _____.
a) Oracle b) SQL
c) DBase d) 4GL

7) By normalizing relations or sets of relations, one minimizes ____.
a) Data b) Fields
c) Redundancy d) Database

8) Which of the following is a type of Normal Form?
a) ACNF b) BCNF
c) CCNF d) DCNF

9) Domain constraints, functional dependency and referential integrity are special forms of ____.
a) Foreign key b) Primary key
c) Assertion d) Referential constraint

10) The database administrator who authorizes all the new users, modifies the database, and takes grants privilege is ____.
a) Super user b) Administrator
c) Operator of operating system d) All

11) If we wish to grant a privilege and to allow the recipient to pass the privilege on to other users, we append the ____ clause to the appropriate grant command.
a) With grant b) Grant user
c) Grant pass privilege d) With grant option

12) Which of the following is the syntax for views where v is view name?
a) Create view v as “query name”;
b) Create “query expression” as view;
c) Create view v as “query expression”;
d) Create view “query expression”;

13) Key value pairs are usually seen in ____.
a) Hash tables b) Heaps
c) Both Hash tables and Heaps d) Skip list

a) Foreign key b) Primary key
c) Assertion d) Referential constraint

5) The database administrator who authorizes all the new users, modifies the database, and takes grants privilege is ____.
a) Super user b) Administrator
c) Operator of operating system d) All

6) If we wish to grant a privilege and to allow the recipient to pass the privilege on to other users, we append the ____ clause to the appropriate grant command.
a) With grant b) Grant user
c) Grant pass privilege d) With grant option

7) Which of the following is the syntax for views where v is view name?
   a) Create view v as “query name”;
   b) Create “query expression” as view;
   c) Create view v as “query expression”;
   d) Create view “query expression”;

8) Key value pairs are usually seen in ____.
   a) Hash tables
   b) Heaps
   c) Both Hash tables and Heaps
   d) Skip list

9) A system is in a ____ state if there exists a set of transactions such that every transaction in the set is waiting for another transaction in the set.
   a) Idle
   b) Waiting
   c) Deadlock
   d) Ready

10) DDL stands for ____.
   a) Data declaration language
   b) Declaration data language
   c) Document declaration language
   d) Data definition language

11) _____ operation can be visualized as a horizontal partition of the relation into two set of tuples.
   a) JOIN
   b) PARTITION
   c) SELECT
   d) PROJECT

12) ‘AS’ clause is used in SQL for ____.
   a) selection
   b) rename
   c) join
   d) projection

13) What key links records from one database table to a record or records in another database table?
   a) Primary key
   b) Principal Key
   c) Foreign key
   d) Link key

14) Which of the following contains information about the structure of a database?
   a) Database management system
   b) Data dictionary
   c) Data repository
   d) Data warehouse

Seat No.	

Set **S**

S.Y. (B. Tech) (Sem-II) (New/Old) (CBCS) Examination: March/April-2025
ELECTRONICS & TELECOMMUNICATION ENGINEERING
Database Management Systems (BTN04408)

Day & Date: Monday, 09-June-2025 Max. Marks: 56
Time: 10:00 AM To 01:00 PM

Instructions: 1) All questions are compulsory.
2) Figures to the right indicate full marks.

Section - I

Q.2 Solve the following: (Any Four) **16**

a) What is DBMS? And which are the application database system?
b) Which are the constraints in DBMS explain with example.
c) Explain Relational Query languages.
d) What are the different design issues in ER model?
e) Explain view in SQL with example.

Q.3 Solve the following: (Any Two) **12**

a) Which are the types of Database Languages? Explain with its commands.
b) Explain Basic SQL clauses.
c) Explain Extended Relational Algebra operation with example.

Section - II

Q.4 Attempt the following: (Any Four) **16**

a) Write a short note on Nested subqueries with example.
b) Explain Atomic Domains.
c) Explain ordered indices in detail.
d) Explain the transaction states with neat diagram.
e) What is functional dependency? Give example.

Q.5 Attempt the following: (Any Two) **12**

a) List the different Aggregate operations in SQL? Explain any 3 Aggregate operations with queries.
b) Differentiate between B+ tree and B tree index files.
c) Explain Time stamp ordering protocol with example.

Seat No.	

Set **P**

S.Y. (B. Tech.) (Sem-II) (New/Old) (CBCS) Examination: March/April-2025
ELECTRONICS & TELECOMMUNICATION ENGINEERING
Fundamentals of IOT(BTN04409)

Day & Date: Monday, 09-June-2025 Max. Marks: 70
Time: 10:00 AM To 01:00 PM

Instructions: 1) Q. No. 1 is compulsory. It should be solved in the first 30 minutes in Answer Book Page no 03 (Starting page of the Answer Book). Each question carries one mark.
2) Don't forget to Mention question paper set (P/Q/R/S) on top of page.
3) Figures to the right indicates full marks.
4) Make suitable assumptions (if necessary and state them clearly).

MCQ/Objective Type Questions

Duration: 30 Minutes Marks:14

Q.1 Choose the correct alternatives from the options. 14

1) How does IoT contribute to the development of smart cities?
a) By promoting online gaming
b) By enhancing communication systems
c) By improving urban infrastructure and management
d) By increasing social media usage

2) What is the role of communication systems in IoT?
a) Real-time processing b) Data storage in the cloud
c) Interconnecting devices d) Embedded system development

3) What are the challenges associated with developing embedded systems for IoT?
a) Increased power consumption
b) Real-time requirements, resource constraints
c) Limited communication options
d) Lack of sensor integration

4) Which of the following is an example of a real-time operating system (RTOS) used in embedded systems for IoT?
a) Windows b) Linux
c) FreeRTOS d) MacOS

5) What is the role of communication protocols in embedded systems for IoT?
a) Managing communication between devices
b) Providing data storage in the cloud
c) Simplifying the development process
d) Designing user interfaces for IoT applications

6) What is the purpose of calibration in sensor applications?
a) Adjusting sensor readings to match a reference standard
b) Enhancing sensor sensitivity
c) Increasing sensor power consumption
d) Improving sensor communication

7) Which environmental factor can affect sensor readings?
a) Cloud cover
b) Traffic congestion
c) Operating temperature
d) Social media activity

8) Which environmental factor can affect the performance of moisture sensors?
a) Temperature
b) Traffic congestion
c) Social media activity
d) Cloud cover

9) In which domain are position sensors commonly used?
a) Healthcare
b) Manufacturing
c) Entertainment
d) Social networking

10) What is the primary application of humidity sensors in IoT?
a) Monitoring temperature
b) Detecting human presence
c) Assessing air quality
d) Measuring humidity levels

11) Which communication technology is commonly used for IoT applications in smart agriculture?
a) Wi-Fi
b) LoRa (Long Range)
c) Bluetooth Low Energy (BLE)
d) Cellular

12) What is the primary advantage of using LoRa technology in IoT applications?
a) Short communication range
b) High data transfer speed
c) Long communication range
d) Low power consumption

13) Which of the following is NOT a valid Linux command for shell access in Raspberry Pi?
a) Is
b) mv
c) cd
d) run

14) Which tool is commonly used for remote access to a Raspberry Pi from a Windows machine?
a) Terminal
b) PuTTY
c) SSH
d) Remote Desktop

Set P

S.Y. (B. Tech.) (Sem-II) (New/Old) (CBCS) Examination: March/April-2025
ELECTRONICS & TELECOMMUNICATION ENGINEERING
Fundamentals of IOT(BTN04409)

Day & Date: Monday, 09-June-2025 Max. Marks: 56
Time: 10:00 AM To 01:00 PM

Instructions: 1) All questions are compulsory.
2) Figures to the right indicate full marks.

Section - I

Q.2 Solve the following: (Any Four) **16**

a) Describe the key components of an IoT system, including embedded systems, communication systems, and the cloud.
b) Explain the role of cloud computing in supporting IoT applications. How does cloud computing enhance the capabilities of IoT devices?
c) Compare various embedded platforms commonly used in IoT.
d) Discuss the key characteristics that differentiate embedded systems from general-purpose computing systems.
e) Explain the units of measurement commonly used in sensor technology.

Q.3 Solve the following: (Any Two) **12**

a) Explain the concept of edge computing in the context of IoT. How does edge computing address die challenges of data processing and latency in IoT systems? Provide examples of edge computing in IoT applications.
b) Examine the role of sensors and actuators in embedded systems for IoT. Provide examples of sensors and actuators commonly used in IoT applications and explain how they contribute to the overall functionality of embedded systems.
c) Examine the concept of noise in sensor signals. Discuss the types of noise that can affect sensor measurements and explain how noise can be minimized or eliminated in sensor systems.

Section - II

Q.4 Solve the following: (Any Four) **16**

a) Discuss the significance of humidity and moisture sensors in IoT.
b) Discuss how light sensors are used for tasks such as ambient light adjustment, security, and in consumer electronics.
c) Discuss the challenges and considerations in implementing sensor applications in real-world scenarios.
d) Compare Bluetooth Low Energy, Wi-Fi, and RFID technologies.
e) Identify two significant challenges in developing IoT solutions with Raspberry Pi and discuss potential future advancements in this field.

Q.5 Attempt the following: (Any Two) **12**

a) Discuss the techniques and protocols used for interfacing LED, switches, and LCD with Raspberry Pi.

b) Examine the integration of communication technologies in industrial IoT applications. Discuss how BLE, Wi-Fi, and RFID are employed to enable communication between machines and support automation in industrial settings.

c) Discuss the role of temperature sensors in various IoT applications. Discuss examples of temperature-sensitive applications in industries such as healthcare, food storage, and climate control.

3) The figures to the right indicate full marks.

MCQ/Objective Type Questions

Duration: 30 Minutes Marks:14

Q.1 Choose the correct Answer. **14**

1) An attempt to gain unauthorized access to a system is called: _____
a) Passive Attack b) Active Attack
c) Intrusion d) Masquerading

2) Which of the following is a cryptographic security mechanism?
a) Firewalls b) Encryption
c) Access Control d) Intrusion Detection Systems

3) In the symmetric cipher model, the plaintext refers to: _____
a) The encrypted message
b) The original, readable message before encryption
c) The key used for decryption
d) The hashing algorithm

4) Ina transposition cipher, encryption is performed by: _____
a) Replacing each character with another
b) Rearranging the order of characters in the plaintext
c) Swapping letters based on a predefined key
d) Adding extra characters to the text

5) In a Feistel cipher structure, encryption and decryption: _____
a) Use different functions
b) Require different keys
c) Use the same structure with key scheduling
d) Are based only on permutation

6) The Feistel structure in DES means: _____
a) Encryption and decryption use different algorithms
b) The algorithm is reversible
c) It requires asymmetric key pairs
d) It is immune to brute-force attacks

7) Avalanche effect in cryptography means: _____
a) A minor change in plaintext produces major changes in ciphertext
b) A small key change results in minor output differences
c) The cipher resists linear cryptanalysis
d) A key can be reused multiple times

8) The most widely used public-key cryptosystem is: _____
a) AES b) RSA
c) DES d) Blowfish

9) Public-key cryptography is not commonly used for: _____
a) Key exchange
b) Digital signatures
c) Encrypting large amounts of data directly
d) Authenticating websites

10) A good cryptographic hash function should be: _____
a) Reversible
b) Computationally expensive to compute
c) Deterministic and fast to compute
d) Dependent on a secret key

11) The term collision in hash functions refers to: _____
a) Two different inputs producing the same hash output
b) The hash function being too slow
c) The key being compromised
d) Data being lost during hashing

12) The verification of a digital signature is performed using: _____
a) A private key b) A public key
c) A symmetric key d) A shared secret key

13) Which authentication protocol relies on symmetric encryption?
a) RSA b) Kerberos
c) Diffie-Hellman d) Digital signatures

14) The main goal of Personal Identity Verification is to: _____
a) Store user passwords securely
b) Authenticate individuals using strong identity proofing
c) Encrypt user emails
d) Provide network security

Instructions: 1) All questions are compulsory.
2) Figures to the right indicate full marks.

Section – I

Q.2 Attempt any FOUR questions. **16**

a) Explain the difference between data integrity and system integrity.
b) What is a transposition cipher? How is it different from a substitution cipher?
c) Explain the concept of payload and cover media in steganography.
d) Demonstrate the XOR operation in DES using a small example.
e) Describe how the initial cipher key is expanded to create round keys.

Q.3 Attempt any TWO questions. **12**

a) Describe the role of specific security mechanisms as defined in the OSI Security Architecture.
b) How does the Playfair cipher work? Illustrate with encryption of a sample plaintext.
c) Describe the AES structure and the steps involved in one round of AES.

Section – II

Q.4 Attempt any FOUR questions. **16**

a) Define the encryption and decryption functions in RSA.
b) What is the limitation of using simple XOR-based hash functions?
c) List two requirements of a good MAC.
d) What is a challenge-response mechanism? How does it work with symmetric keys?
e) What is the goal of a Personal Identity Verification (PIV) system?

Q.5 Attempt any TWO questions. **12**

a) Describe the Diffie-Hellman key exchange algorithm in detail with an example.
b) Compare SHA-1 and SHA-2 in terms of structure and security.
c) Discuss the use of Public Key Infrastructure (PKI) in remote authentication systems.

S.Y. (B.Tech.) (Sem-II) (New/Old) (CBCS) Examination: March/April-2025
ELECTRONICS & TELECOMMUNICATION ENGINEERING
Cryptography (BTN04410)

Day & Date: Monday 09-06-2025 Max. Marks: 70
Time: 10:00 AM To 01:00 PM

Instructions: 1) Q. No. 1 is compulsory. It should be solved in the first 30 minutes in Answer Book Page no 03 (Starting page of the Answer Book). Each question carries one mark.
2) Don't forget to Mention question paper set (P/Q/R/S) on top of page.
3) The figures to the right indicate full marks.

MCQ/Objective Type Questions

Duration: 30 Minutes Marks:14

Q.1 Choose the correct Answer. **14**

1) The most widely used public-key cryptosystem is: _____
a) AES b) RSA
c) DES d) Blowfish

2) Public-key cryptography is not commonly used for: _____
a) Key exchange
b) Digital signatures
c) Encrypting large amounts of data directly
d) Authenticating websites

3) A good cryptographic hash function should be: _____
a) Reversible
b) Computationally expensive to compute
c) Deterministic and fast to compute
d) Dependent on a secret key

4) The term collision in hash functions refers to: _____
a) Two different inputs producing the same hash output
b) The hash function being too slow
c) The key being compromised
d) Data being lost during hashing

5) The verification of a digital signature is performed using: _____
a) A private key b) A public key
c) A symmetric key d) A shared secret key

6) Which authentication protocol relies on symmetric encryption?
a) RSA b) Kerberos
c) Diffie-Hellman d) Digital signatures

7) The main goal of Personal Identity Verification is to: _____
a) Store user passwords securely
b) Authenticate individuals using strong identity proofing
c) Encrypt user emails
d) Provide network security

8) An attempt to gain unauthorized access to a system is called: _____
a) Passive Attack b) Active Attack
c) Intrusion d) Masquerading

9) Which of the following is a cryptographic security mechanism?
a) Firewalls b) Encryption
c) Access Control d) Intrusion Detection Systems

10) In the symmetric cipher model, the plaintext refers to: _____
a) The encrypted message
b) The original, readable message before encryption
c) The key used for decryption
d) The hashing algorithm

11) Ina transposition cipher, encryption is performed by: _____
a) Replacing each character with another
b) Rearranging the order of characters in the plaintext
c) Swapping letters based on a predefined key
d) Adding extra characters to the text

12) In a Feistel cipher structure, encryption and decryption: _____
a) Use different functions
b) Require different keys
c) Use the same structure with key scheduling
d) Are based only on permutation

13) The Feistel structure in DES means: _____
a) Encryption and decryption use different algorithms
b) The algorithm is reversible
c) It requires asymmetric key pairs
d) It is immune to brute-force attacks

14) Avalanche effect in cryptography means: _____
a) A minor change in plaintext produces major changes in ciphertext
b) A small key change results in minor output differences
c) The cipher resists linear cryptanalysis
d) A key can be reused multiple times

MCQ/Objective Type Questions

Duration: 30 Minutes Marks:14

Q.1 Choose the correct Answer. **14**

1) The entire electrified mainline rail network in India uses ____.
a) 30 kV AC b) 25 kV AC
c) 230 kV AC d) 240 kV AC

2) Who deals with safety matters of rail travel & train operations?
a) Railway Boards
b) Control Office Applications (COA)
c) Commission of Railway Safety (CRS)
d) Center Railway Information System (CRIS)

3) A railway reservation system is a piece of software that helps railway operators handle ____.
a) Scheduling b) Reservation
c) Pricing d) All of given

4) Which of the following is not the types of Rails?
a) B.H.Rail b) D.H.Rail
c) R.H.Rail d) F.F.Rail

5) In Indian Railway mostly which type of Gauges of Track has been adopted ____.
a) Broad b) Medium
c) Narrow d) Small

6) What is the characteristic/Advantage of the Electric Locomotive?
a) Independence of running costs
b) Reduced environmental pollution
c) Reduced power loss
d) All of the Above

7) India's first metro was commissioned was ____.

a) Metro railway, Kochi
b) Metro railway, Mumbai
c) Metro railway, Kolkata
d) Metro railway, Delhi

8) Which of the following is an advantage of railway transport?

a) Railways are the cheapest mode of transport compared with other modes of transports
b) Railways help a country's industrialization process by easily transporting coal and raw materials at a lower rate
c) Railways make it easier to travel long distances and carry bulky goods that are not easily carried by motor vehicles
d) All of the mentioned

9) In Indian Railway how many Gauges of Track has been adopted ____.

a) 1
b) 2
c) 3
d) 4

10) Indian Railways propose to install large format display screens under ____ the project.

a) Railway Board
b) Railway Display Network ("RDN")
c) Railway Ministry
d) Railway Department

11) The currently under construction bullet train project route in India is ____.

a) Mumbai-Ahmedabad
b) Mumbai-Kolkata
c) Delhi-Ahmedabad
d) Delhi-Bengaluru

12) Which is not part of Railway track layer?

a) Ballast
b) Fishplate
c) Switch
d) Subgrade

13) Electronic Interlocking (EI): employs computer-based systems and electronic equipment NOT to control ____.

a) Signals
b) Points
c) level-crossing gates
d) Bogies

14) Which of following is not the advantage of maglev trains?

a) Higher top speeds
b) Superior acceleration and deceleration
c) Higher noise
d) Lower

S.Y. (B. Tech.) (Sem-II) (New/Old) (CBCS) Examination: March/April-2025
ELECTRONICS & TELECOMMUNICATION ENGINEERING
Railway Engineering: A Beginner's Perspective (BTN04411)

Day & Date: Monday, 09-June-2025 Max. Marks: 56
Time: 10:00 AM To 01:00 PM

Instructions: 1) All questions are compulsory.
2) Figures to the right indicate full marks.

SECTION - I

Q.2 Solve the following: (Any Four) **16**

a) Give important features of Indian Railways.
b) What are sleepers? Explain its types.
c) Define Terminologies:
i) Ballast
ii) Pantograph
iii) Fishplate
iv) Fasteners
d) Describe Track Layers in details.
e) Which are different Facets of the Railways/Rail types.

Q.3 Solve the following: (Any Two) **12**

a) What are Bogies and Coaches? Explain.
b) Which is the overhead equipment? Explain.
c) Write a note on Power supply system & technology in Railways.

SECTION - II

Q.4 Solve the following: (Any Four) **16**

a) What is mean by Relays? Give its types.
b) Write note on Indian Railways Electrification.
c) Which Display System is used in Railways? Explain.
d) Write short note on Clean Energy in Indian Railways.
e) Write note on Bullet Trains and Metro in India.

Q.5 Solve the following: (Any Two) **12**

a) What is the Maglev Train concept in Railways? Explain.
b) Write note on Trends in International Railways.
c) Explain the concept of Bio Toilets in Indian Railway.

ELECTRONICS & TELECOMMUNICATION ENGINEERING
Railway Engineering: A Beginner's Perspective (BTN04411)

Day & Date: Monday, 09-June-2025 Max. Marks: 70
Time: 10:00 AM To 01:00 PM

Instructions: 1) Q. No. 1 is compulsory. It should be solved in the first 30 minutes in Answer Book Page no 03 (Starting page of the Answer Book). Each question carries one mark.
2) Don't forget to Mention question paper set (P/Q/R/S) on top of page.
3) Figures to the right indicates full marks.

MCQ/Objective Type Questions

Duration: 30 Minutes Marks:14

Q.1 Choose the correct Answer. **14**

1) What is the characteristic/Advantage of the Electric Locomotive?
a) Independence of running costs
b) Reduced environmental pollution
c) Reduced power loss
d) All of the Above

2) India's first metro was commissioned was ____.
a) Metro railway, Kochi b) Metro railway, Mumbai
c) Metro railway, Kolkata d) Metro railway, Delhi

3) Which of the following is an advantage of railway transport?
a) Railways are the cheapest mode of transport compared with other modes of transports
b) Railways help a country's industrialization process by easily transporting coal and raw materials at a lower rate
c) Railways make it easier to travel long distances and carry bulky goods that are not easily carried by motor vehicles
d) All of the mentioned

4) In Indian Railway how many Gauges of Track has been adopted ____.
a) 1 b) 2
c) 3 d) 4

5) Indian Railways propose to install large format display screens under ____ the project.
a) Railway Board b) Railway Display Network ("RDN")
c) Railway Ministry d) Railway Department

6) The currently under construction bullet train project route in India is ____.
a) Mumbai-Ahmedabad b) Mumbai-Kolkata
c) Delhi-Ahmedabad d) Delhi-Bengaluru

7) Which is not part of Railway track layer?
a) Ballast b) Fishplate
c) Switch d) Subgrade

8) Electronic Interlocking (El): employs computer-based systems and electronic equipment NOT to control ____.
a) Signals b) Points
c) level-crossing gates d) Bogies

9) Which of following is not the advantage of maglev trains?
a) Higher top speeds b) Superior acceleration and deceleration
c) Higher noise d) Lower

10) The entire electrified mainline rail network in India uses ____.
a) 30 kV AC b) 25 kV AC
c) 230 kV AC d) 240 kV AC

11) Who deals with safety matters of rail travel & train operations?
a) Railway Boards
b) Control Office Applications (COA)
c) Commission of Railway Safety (CRS)
d) Center Railway Information System (CRIS)

12) A railway reservation system is a piece of software that helps railway operators handle ____.
a) Scheduling b) Reservation
c) Pricing d) All of given

13) Which of the following is not the types of Rails?
a) B.H.Rail b) D.H.Rail
c) R.H.Rail d) F.F.Rail

14) In Indian Railway mostly which type of Gauges of Track has been adopted ____.
a) Broad b) Medium
c) Narrow d) Small

Day & Date: Monday 19-05-2025 Max. Marks: 70
Time: 03:00 PM To 06:00 PM

Instructions: 1) Q. No. 1 is compulsory. It should be solved in the first 30 minutes in Answer Book Page no 03 (Starting page of the Answer Book). Each question carries one mark.
2) Don't forget to Mention question paper set (P/Q/R/S) on top of page.
3) Assume suitable data if necessary and state it clearly.
4) Figures to the right indicates full marks.

MCQ/Objective Type Questions

Duration: 30 Minutes Marks: 14

Q.1 Multiple Choice Questions. **14**

1) Which of the following enters the super heater of a boiler?
a) Cold Water b) Hot Water
c) Wet Steam d) Superheated Steam

2) Control rods are made of _____.
a) Cesium b) Cadmium
c) Tin d) Gallium

3) Silencer is usually incorporated in _____.
a) Cooling System b) Air intake
c) Fuel Supply System d) Exhaust System

4) The lubrication cost in a diesel power plant is _____.
a) High b) Low
c) Moderate d) Very low

5) In a three-unit insulator string, voltage across the lowest unit is 17.5 KV and string efficiency is 84.28%. The total voltage across the string will be equal to _____.
a) 8.285 KV b) 44.25 KV
c) 88.25 KV d) 442.5 KV

6) String efficiency is given by _____.
a) (Voltage across the string)/ (number of discs on the string)*(Voltage across disc nearest to the conductor)
b) (Voltage across the string)* (number of discs on the string) / (Voltage across disc nearest to the conductor)
c) (Voltage across disc nearest to the conductor) * (number of discs on the string) / (Voltage across the string)
d) (Voltage across disc nearest to the conductor) / (number of discs on the string)*(Voltage across the string)

7) The generating voltage & frequency in India is about?
a) 11 KV and 60HZ
b) 11KV and 50HZ
c) 220KV and 60HZ
d) 220KV and 50HZ

8) Which of these systems uses the 3 phase 4 wire system?
a) Primary distribution
b) Secondary distribution
c) Primary transmission
d) Secondary transmission

9) Suspension type insulators are used for voltage beyond _____.
a) 230V
b) 440V
c) 11KV
d) 33KV

10) Which type of insulator is used where there is a dead end of the line or there is a corner for a high voltage line?
a) Pin type insulator
b) Shackle insulator
c) Strain insulator
d) Stay insulator

11) Generally grounding is provided for _____.
a) for the safety of the equipment
b) for the safety of the operating personnel
c) Both a & b
d) None of these

12) Underground substation is preferred when _____.
a) Enough land is not available
b) Price of land is high
c) Population density is high
d) All of above

13) For the same conductor length, same amount of power, same losses and same maximum voltage to earth, which system requires minimum conductor area?
a) Single phase AC
b) 3 phase AC
c) 2 wire AC
d) 3 wire DC

14) Spillway belongs to which structure: _____.
a) Hydroelectric power plant
b) Steam power station
c) Nuclear power Station
d) Wind Turbine

S.Y. (B.Tech.) (Sem-I) (New) (NEP CBCS) Examination: March/April-2025
ELECTRICAL ENGINEERING
Power Plant Engineering and Elements of Power System (EEPCC-02)

Day & Date: Monday 19-05-2025 Max. Marks: 56
Time: 03:00 PM To 06:00 PM

Instructions: 1) All questions are compulsory.
2) Figures to the right indicate full marks.
3) Assume suitable data if necessary.

Section – I

Q.2 Attempt any Four. **16**

a) Define the following terms: Load Curve, Load duration curve, Connected load, Maximum demand.
b) Explain the merits & demerits of Gas Power Plant.
c) Draw the layout of the wind power plan & explain the operation of main components.
d) Write the site selection factors of diesel power plants.
e) What are the merits and limitations of green energy?
f) Write a note on economic load sharing.

Q.3 Attempt any Two. **12**

a) With neat diagram explain the classification of nuclear reactors.
b) The maximum demand of a Thermal Power Plant of 60 MW capacity is 50 MW at annual load factor of 50%. The load having maximum demands of 25 MW, 20 MW, 8 MW & 5 MW are connected to the power station.
Calculate the energy generated, diversity factor and plant capacity factor.
c) What are the desirable characteristics of tariff?

Section – II

Q.4 Attempt any Four. **16**

a) Explain the advantages of high voltage transmission.
b) Explain Kelvin's Law.
c) Explain equipment used in substations with their symbols.
d) Derive an expression for 3 phase 3 wire for the overhead system.
e) Explain various conductor materials.
f) What are different methods to improve string efficiency?

Q.5 Attempt any Two. **12**

a) In a 33 KV overhead line, there are three units in the string of insulators. If the capacitance between each insulator pin and earth is 11% of self-capacitance of each insulator, find
   i) the distribution of voltage over 3 insulators
   ii) String efficiency

b) Explain - resistance grounding, reactance grounding & solid grounding.

c) Make comparisons between AC and DC transmission systems.

S. Y. (B.Tech.) (Sem-I) (New) (NEP CBCS) Examination: March/April-2025
ELECTRICAL ENGINEERING
DC Machines and Transformer (EEPCC-03)

Day & Date: Tuesday 20-05-2025 Max. Marks: 70
Time: 03:00 PM To 06:00 PM

Instructions: 1) Q. No. 1 is compulsory. It should be solved in the first 30 minutes in Answer Book Page no 03 (Starting page of the Answer Book). Each question carries one mark.
2) Don't forget to Mention question paper set (P/Q/R/S) on top of page.
3) Figures to the right indicates full marks.
4) Make suitable assumptions (if necessary and state them clearly).

MCQ/Objective Type Questions

Duration: 30 Minutes Marks:14

Q.1 Choose the correct Answer. **14**

1) In a clockwise rotating loaded d.c. generator, brushes have to be shifted _____.
a) clockwise b) counterclockwise
c) either (a) or (b) d) neither (a) nor (b)

2) Iron losses in a D.C. machine are independent of variations in _____.
a) speed b) load
c) voltage d) speed and voltage

3) What will happen if the back e.m.f. in the d.c. motor absent?
a) Motor will run faster than rated value
b) Motor will burn
c) Armature drop will be reduced substantially
d) None of the above

4) A laboratory group was working with a set of 3-hp shunt DC motor. But there was a mistake that it was fused with a 0.3A fuse instead 3A fuse. Then it was started _____.
a) a flash occurred instantly b) it ran for 3s and fuse was blown
c) it ran normal d) none of the mentioned

5) Hopkinson's test on D.C. machines is conducted at _____.
a) no-load b) part load
c) full-load d) overload

6) While performing Swinburne's test, the iron losses are assumed to be _____.
a) Constant b) Absent
c) Variable d) None of these

7) To perform field test on d.c. machines two motors are required. The motors used are _____.
a) Series motors
b) One will be series motor and other will be shunt motors
c) Shunt motors
d) None of these

8) BLDC motor is analogous to _____.
a) Permanent magnet synchronous motor
b) DC motor
c) Rotating Transformer
d) Single-phase Induction motor

9) The voltage transformation ratio of a transformer is defined as ratio of _____.
a) primary turns to secondary turns
b) secondary current to primary current
c) secondary induced emf to primary induced emf
d) secondary terminal voltage to primary applied voltage

10) Which of the following loss in a transformer is zero even at full load?
a) Core loss b) Friction loss
c) Eddy current loss d) Hysteresis loss

11) Why OC test is performed on LV side?
a) Simple construction
b) Less voltage is required and parameters can be transformed to HV side
c) It'll not give losses ig conducted on HV side
d) HV side does not have connections for voltage

12) When a V - V system is converted into a $\Delta - \Delta$ system, increase in capacity of the system is _____ percent.
a) 86.6 b) 66.7
c) 73.2 d) 50

13) Transformers operating in parallel mode of operation will share the load depending upon their _____.
a) leakage reactance b) per unit impedance
c) efficiencies d) ratings

14) An autotransformer having a transformation ratio of 0.8 supplies a load of 3 kW. The power transferred conductively from primary to secondary is _____ kW.
a) 0.6 b) 2.4
c) 1.5 d) 0.27

Set P

S. Y. (B.Tech.) (Sem-I) (New) (NEP CBCS) Examination: March/April-2025
ELECTRICAL ENGINEERING
DC Machines and Transformer (EEPCC-03)

Day & Date: Tuesday 20-05-2025 Max. Marks: 56
Time: 03:00 PM To 06:00 PM

Instructions: 1) All questions are compulsory.
2) Figures to the right indicate full marks.
3) Make suitable assumptions (if necessary and state them clearly).
4) Draw neat diagrams whenever necessary.

Section – I

Q.2 Attempt the following (Any Four). **16**

a) Derive the torque equation of DC machine.

b) A six-pole lap-connected 230 V shunt motor has 410 armature conductors. It takes 41 A on full load. The flux per pole is 0.05 weber. The armature and field resistances are 0.1 ohm and 230 ohms respectively. Contact drop per brush = 1 V. Determines the speed of the motor at full load.

c) With a neat sketch explain the Hopkinson's test for dc motor.

d) A 4 pole, long shunt lap -wound generator supplies 25 KW at a terminal voltage of 500 V. The armature resistance is 0.03 Ω, series field resistance is 0.04 Ω, and shunt field resistance is 200Ω. The brush drop may be taken as 1.0 V. Determine the e.m.f. generated. Calculate also the No. of conductors if speed is 1200 rpm. and flux per pole is 0.02 weber. Neglect armature reaction.

e) With help of neat diagram explain speed control methods of dc series motor.

f) A 200 V, 2000 rpm, 10 A separately excited DC motor has an armature resistance of 2 Ω. Rated DC voltage is applied to the armature and field winding of the motor. If the armature draws 5 A from the source, calculate the torque developed by the motor.

Q.3 Attempt the following (Any Two). **12**

a) A 100KW, 500V DC shunt generator was runs as motor on no load at rates voltage and speed. The total current taken was 9.5 A including the shunt field current of 2.5 A. The resistance of armature circuit is 0.1 Ω . Calculate the efficiency of generator at
1) full load
2) half the full load

b) A 440 V, 4-pole, lap-connected shunt motor has a no-load input current of 15 A and a shunt field current of 10 A. At full load, it takes a current of 150 A. If armature resistance = 0.1 ohms, flux per pole on no-load = 0.05 weber, number of armature conductors = 750, and contact drop per brush = 1 V, calculate:

i) No-load speed
ii) Full-load speed
iii) Speed regulation. Armature reaction weakens the field by 1.5% on full load.

OR

b) With a neat circuit diagram explain Swinburne's test and how the efficiency of the generator and motor are computed with this test. Write the advantages of this test.

Section – II

Q.4 Attempt the following (Any Four). **16**

a) With a neat sketch explain the constructions and working of a Variable Reluctance stepper motor.

b) Explain with phasor diagram a practical transformer on load condition.

c) single-phase 200 kVA, 3300/240 volt, 50 Hz. Transformer carries 80 turns on its secondary. What will be its

i) primary and secondary current on full load;
ii) the maximum value of flux;
iii) the number of primary turns.

d) With a neat sketch explain $\Delta - Y$ connection of a $3 - \phi$ transformer.

e) A single phase transformer with a ratio 5:1 has primary resistance of 0.4 ohm and reactance of 1.2 ohm and the secondary resistance of 0.01 and reactance of 0.04 ohm. Determine the percentage regulation when delivering 125 A at 600 V at 0.8 p.f. lagging.

f) Derive the condition for maximum efficiency of a transformer.

Q.5 Attempt the following (Any Two). **12**

a) Derive an expression for saving in conductor material in an autotransformer over two-winding transformers of equal rating. State the advantages and disadvantages of autotransformer over two-winding transformers.

b) Two single phase transformers are connected in parallel. Both of them are having equal turns and an impedance of (0.5 + j3) ohm and (0.6 + j10) ohm with respect to the secondary. Determine how they will share a total load of 100 kW at power factor 0.8 lagging.

c) Explain how Open circuit and Short circuit tests are conducted on single phase transformer to calculate equivalent circuit parameters and efficiency.

f) A 200 V, 2000 rpm, 10 A separately excited DC motor has an armature resistance of 2 Ω. Rated DC voltage is applied to the armature and field winding of the motor. If the armature draws 5 A from the source, calculate the torque developed by the motor.

Q.3 Attempt the following (Any Two). **12**

a) A 100KW, 500V DC shunt generator was runs as motor on no load at rates voltage and speed. The total current taken was 9.5 A including the shunt field current of 2.5 A. The resistance of armature circuit is 0.1 Ω . Calculate the efficiency of generator at
1) full load
2) half the full load

b) A 440 V, 4-pole, lap-connected shunt motor has a no-load input current of 15 A and a shunt field current of 10 A. At full load, it takes a current of 150 A. If armature resistance = 0.1 ohms, flux per pole on no-load = 0.05 weber, number of armature conductors = 750, and contact drop per brush = 1 V, calculate:

i) No-load speed
ii) Full-load speed
iii) Speed regulation. Armature reaction weakens the field by 1.5% on full load.

OR

b) With a neat circuit diagram explain Swinburne's test and how the efficiency of the generator and motor are computed with this test. Write the advantages of this test.

Section – II

Q.4 Attempt the following (Any Four). **16**

a) With a neat sketch explain the constructions and working of a Variable Reluctance stepper motor.

b) Explain with phasor diagram a practical transformer on load condition.

c) single-phase 200 kVA, 3300/240 volt, 50 Hz. Transformer carries 80 turns on its secondary. What will be its

i) primary and secondary current on full load;
ii) the maximum value of flux;
iii) the number of primary turns.

d) With a neat sketch explain $\Delta - Y$ connection of a $3 - \phi$ transformer.

e) A single phase transformer with a ratio 5:1 has primary resistance of 0.4 ohm and reactance of 1.2 ohm and the secondary resistance of 0.01 and reactance of 0.04 ohm. Determine the percentage regulation when delivering 125 A at 600 V at 0.8 p.f. lagging.

f) Derive the condition for maximum efficiency of a transformer.

Q.5 Attempt the following (Any Two). **12**

a) Derive an expression for saving in conductor material in an autotransformer over two-winding transformers of equal rating. State the advantages and disadvantages of autotransformer over two-winding transformers.

b) Two single phase transformers are connected in parallel. Both of them are having equal turns and an impedance of (0.5 + j3) ohm and (0.6 + j10) ohm with respect to the secondary. Determine how they will share a total load of 100 kW at power factor 0.8 lagging.

c) Explain how Open circuit and Short circuit tests are conducted on single phase transformer to calculate equivalent circuit parameters and efficiency.

S. Y. (B.Tech.) (Sem-I) (New) (NEP CBCS) Examination: March/April-2025
ELECTRICAL ENGINEERING
Advanced Mathematics and Statistics (OE-01A)

Day & Date: Wednesday 21-05-2025 Max. Marks: 70
Time: 03:00 PM To 06:00 PM

Instructions: 1) Q. No. 1 is compulsory. It should be solved in the first 30 minutes in Answer Book Page no 03 (Starting page of the Answer Book). Each question carries one mark.
2) Don't forget to Mention question paper set (P/Q/R/S) on top of page.
3) Figures to the right indicates full marks.

MCQ/Objective Type Questions

Duration: 30 Minutes Marks:14

Q.1 Choose the correct Answer. **14**

1) If a linear differential equation with constant coefficients and r.h.s. equal to zero has a real root m_1 repeated Two times, then the corresponding part of the integral is _____.

a) $(c_1 + c_2)e^{m_1 X}$ b) $(c_1 + c_2 x)e^{m_1 X}$

c) $(c_1 x + c_2 x^2)e^{m_1 X}$ d) $(c_1 + c_2 x^3)e^{m_1 X}$

2) $\frac{1}{D-a}X$ is equal to _____.

a) $\int Xe^{ax}dx$ b) $e^{ax}\int X.e^{-ax}dx$

c) $\int Xe^{-ax}dx$ d) $e^{-ax}\int Xe^{-ax}dx$

3) $\frac{1}{D+1}(\log x + \frac{1}{x})$ is equal to _____.

a) e^x b) 1

c) x d) $\log x$

4) The solution of $q = e^{-p}$ is _____.

a) $z = ax + by + c$ b) $z = a^x + b^y + c$

c) $z = ax + y^{-b} + c$ d) $z = ax + e^{-a}y + c$

5) The solution of the equation $pq = p + q$ is _____.

a) $z = ax + (a+1)y + c$

b) $z = (a+1)x + a(a-1)y + c$

c) $z = (a-1)x + a(a+1)y + c$

d) $z(a-1) = a(a-1)x + ay + c$

6) If μ_1', μ_2', μ_3', μ_4' are the first four moments of the distribution about certain number then fourth moment μ_4 of the distribution about the arithmetic mean is given by _____.

a) $\mu_4' + 4\mu_3'\mu_1' + 6\mu_2'(\mu_1')^4 + 3(\mu_1')^4$

b) $\mu_4' - 4\mu_3'\mu_1' + 6\mu_2'(\mu_1')^2 - 3(\mu_1')^4$

c) $\mu_4' + 4\mu_3'\mu_1' - 6\mu_2'(\mu_1')^4 - 3(\mu_1')^4$

d) $\mu_4' + 2\mu_3'\mu_1' + 6\mu_2'(\mu_1')^4 - 3(\mu_1')^4$

7) Coefficient of kurtosis β_2 is given by _____.

a) $\frac{\mu_4}{\mu_3}$ b) $\frac{\mu_4}{\mu_2^2}$

c) $\frac{\mu_3}{\mu_2^2}$ d) $\frac{\mu_4}{\mu_2^3}$

8) If value of x for normal distribution is 35, mean of normal distribution is 65 and standard deviation is 25 then standardized random variable is ___.

a) -1.5 b) -1.7

c) -1.2 d) -4

9) A continuous random variable has the following probability density function $f(x) = kx(1-x), 0 \le x \le 1$ then $k =$ _____.

a) 6 b) 2

c) 3 d) 5

10) The area under the standard normal curve from $z = -\infty$ to $z = 0$ is ___.

a) 1 b) ½

c) 3/2 d) 0

11) If X, Y denotes the deviations from their means and if $\sum X^2 = 40, \sum Y^2 = 100, \sum XY = 50,$ then $r =$ _____.

a) 0.63 b) 0.82

c) 0.91 d) 0.79

12) The line of regression of x and y is given by _____.

a) $x - \bar{x} = b_{xy}(y - \bar{y})$ b) $x - \bar{y} = b_{xy}(x - \bar{x})$

c) $x - \bar{x} = b_{xx}(y - \bar{y})$ d) $x - \bar{x} = b_{yx}(y - \bar{y})$

13) The following mistakes per page were found in a book.

No. of mistakes:	0	1	2	3	4
Pages:	211	90	19	5	0

Then χ^2 is _____.

a) 0.59 b) 0.069

c) 0.81 d) 0.79

14) The 't-statistic' is defined as _____.

a) $\frac{\bar{x}-\mu}{\sigma/\sqrt{n}}$ b) $\frac{\bar{x}-\mu}{s/\sqrt{n}}$

c) $\frac{\bar{x}-\mu}{\sigma/n}$ d) $\frac{\bar{x}-\mu}{s/n}$

Set P

S. Y. (B.Tech.) (Sem-I) (New) (NEP CBCS) Examination: March/April-2025
ELECTRICAL ENGINEERING
Advanced Mathematics and Statistics (OE-01A)

Day & Date: Wednesday 21-05-2025 Max. Marks: 56
Time: 03:00 PM To 06:00 PM

Instructions: 1) All questions are compulsory.
2) Figures to the right indicate full marks.

Section – I

Q.2 Attempt any Three. **09**

a) Find the Arithmetic mean, Median and standard deviation for the following frequency distribution.

x	5	9	12	15	20	24	30	35	42	49
f	3	6	8	8	9	10	8	7	6	2

b) Solve $(D^2 - 4D + 4)y = 8.x^2e^{2x}\sin 2x$

c) Solve $(D^2 + D + 1)y = \sin 2x$

d) Calculate Mode for the following frequency distribution.

C.I.	00-10	10-20	20-30	30-40	40-50	50-60	60-70
Frequency (f)	4	7	8	12	25	18	10

e) Solve $p^2q^3 = x^2y^3$

Q.3 Attempt any Three. **09**

a) Solve: $(2D + 1)^2y = 4e^{-x/2}$

b) Solve: $p + q = pqz$

c) Find Q_1, Q_2, Q_3 from the following data.
5,7,12,14,15,22,25,30,36,42,53

d) Solve $x(y - z)p + y(z - x)q = z(x - y)$

e) Solve $(D^3 - 3D + 2)y = x$

Q.4 Attempt any Two **10**

a) The first four moments of a distribution about the value 5 are 2,20,40 and 50. from the given information obtain the first four central moments, coefficient of skewness and kurtosis.

b) Solve the following differential equation by the method of separation of variables.
$\frac{\partial z}{\partial x} - 2\frac{\partial z}{\partial y} = z$ given that $z(x, 0) = 3e^{-5x}$

c) Solve: $(D^2 - D - 2)y = 2\log x + \frac{1}{x} + \frac{1}{x^2}$

Section – II

Q.5 Attempt any three of the following. **09**

a) Find the value of k if each of the following functions is a probability density function.

$$f(x) = \begin{cases} kx^2(1-x^3), & 0 \le x \le 1 \\ 0, & \text{otherwise} \end{cases}$$

b) The mean life time of 100 fluorescent light bulbs produced by a Company is computed to be 1570 Hrs. with S.D. of 120 Hrs. If μ is the mean lifetime of all the bulbs produced by the Company, Test the Hypothesis $\mu = 1600$ Hrs. Against the alternative Hypothesis $\mu \neq 1600$ Hrs. using 5% level of Significance.
(Given Expected value at 5% LOS is 1.96)

c) Calculate the coefficient of correlation between height of father and height of son from the following data.

Height of father	64	65	66	67	68	69	70
Height of son	66	67	65	68	70	68	71

d) Two independent random sample have the following data,
$\overline{x_1} = 110, \sigma_1 = 25, n_1 = 16$
$\overline{x_2} = 120, \sigma_2 = 30, n_2 = 9$
If σ_1 and σ_2 are the S. D. of the populations. Test the hypothesis that $\mu_1 = \mu_2$ at 5% level of significance. (The table value of t at $\alpha = 0.05$ for $v = 23$ degrees of freedom is 2.069)

e) If in a lot of 500 solenoids 25 are defective, find the probability that there will be 0, 1, 2 defective solenoids in a random sample of 20 solenoids.

Q.6 Attempt any three of the following. **09**

a) If two independent random samples of sizes 15 and 8 have respectively the following mean and population standard deviations, $\overline{x_1} = 980, \overline{x_2} = 1012; \sigma_1 = 75, \sigma_2 = 80$. Test the hypothesis that $\mu_1 = \mu_2$ at 5% level of significance.
(Given Expected value at 5% LOS with 21 DF is 2.080)

b) The number of telephone calls received by an operator in a ten-minute interval follows a Poisson distribution with mean 1. What is the probability of receiving (i) no call, (ii) less than four calls, in the interval? What is the most likely number of calls?

c) Calculate the equations of the lines of regression. Given
Mean of $x = 50.07$, S.D. of $x = 5.26$
Mean of $y = 9.98$, S.D. of $y = 2.59$
$r = 0.898$

d) In an intelligence test administered to 1000 children the mean score was, 42 with s.d. 24. Find the number of children (i) scoring more than 60 and (ii) between 20 and 40 assuming the distribution to be normal.
(Given: For S.N.V. z area from z = 0 to z = 0.75 is 0.2734, that between z = 0 and z = 0.9167 is 0.3202 and that between z = 0 to z = 0.08333 is 0.0332.)

e) Fit a Straight line $y = a + bx$ to the following data.

x	0	1	2	3	4	5
y	1	2	3	4.5	6	7.5

Q.7 Attempt any Two. **10**

a) Fit a Poisson's distribution to the following data :

X	0	1	2	3	4	Total
f	112	63	20	4	1	200

b) Obtain a second-degree curve to the following data.

Year	1965	1966	1967	1968	1969	1970	1971	1972
Profit (in Corers Rs.)	125	140	165	195	200	215	220	230

Also estimate the profit in 1973.

c) Ten school boys were given a test in Statistics and their scores were recorded. They were given a month's special coaching and a second test was given to them in the same subject at the end of the coaching period. Test if the marks given below give evidence to the fact that the students are benefitted by coaching.
Marks in test I: 70, 68, 56, 75, 80, 90, 68, 75, 56, 58
Marks in Test II: 68, 70, 52, 73, 75, 78, 80, 92, 54, 55
(Given that value of t_α at 5 % LOS for v = 9 degrees of freedom is 1.86 for one tailed test)

MCQ/Objective Type Questions

Duration: 30 Minutes Marks:14

Q.1 Choose the correct Answer. 14

1) If value of x for normal distribution is 35, mean of normal distribution is 65 and standard deviation is 25 then standardized random variable is ___.
a) -1.5 b) -1.7
c) -1.2 d) -4

2) A continuous random variable has the following probability density function $f(x) = kx(1-x), 0 \leq x \leq 1$ then $k =$ _____.
a) 6 b) 2
c) 3 d) 5

3) The area under the standard normal curve from $z = -\infty$ to $z = 0$ is ___.
a) 1 b) ½
c) 3/2 d) 0

4) If X, Y denotes the deviations from their means and if $\sum X^2 = 40, \sum Y^2 = 100, \sum XY = 50,$ then $r =$ _____.
a) 0.63 b) 0.82
c) 0.91 d) 0.79

5) The line of regression of x and y is given by _____.
a) $x - \bar{x} = b_{xy}(y - \bar{y})$ b) $x - \bar{y} = b_{xy}(x - \bar{x})$
c) $x - \bar{x} = b_{xx}(y - \bar{y})$ d) $x - \bar{x} = b_{yx}(y - \bar{y})$

6) The following mistakes per page were found in a book.

No. of mistakes:	0	1	2	3	4
Pages:	211	90	19	5	0

Then χ^2 is _____.
a) 0.59 b) 0.069
c) 0.81 d) 0.79

7) The 't-statistic' is defined as _____.

a) $\frac{\bar{x}-\mu}{\sigma/\sqrt{n}}$ b) $\frac{\bar{x}-\mu}{s/\sqrt{n}}$

c) $\frac{\bar{x}-\mu}{\sigma/n}$ d) $\frac{\bar{x}-\mu}{s/n}$

8) If a linear differential equation with constant coefficients and r.h.s. equal to zero has a real root m_1 repeated Two times, then the corresponding part of the integral is _____.

a) $(c_1 + c_2)e^{m_1 X}$ b) $(c_1 + c_2 x)e^{m_1 X}$

c) $(c_1 x + c_2 x^2)e^{m_1 X}$ d) $(c_1 + c_2 x^3)e^{m_1 X}$

9) $\frac{1}{D-a}X$ is equal to _____.

a) $\int Xe^{ax}dx$ b) $e^{ax}\int X.e^{-ax}dx$

c) $\int Xe^{-ax}dx$ d) $e^{-ax}\int Xe^{-ax}dx$

10) $\frac{1}{D+1}(\log x + \frac{1}{x})$ is equal to _____.

a) e^x b) 1

c) x d) $\log x$

11) The solution of $q = e^{-p}$ is _____.

a) $z = ax + by + c$ b) $z = a^x + b^y + c$

c) $z = ax + y^{-b} + c$ d) $z = ax + e^{-a}y + c$

12) The solution of the equation $pq = p + q$ is _____.

a) $z = ax + (a+1)y + c$

b) $z = (a+1)x + a(a-1)y + c$

c) $z = (a-1)x + a(a+1)y + c$

d) $z(a-1) = a(a-1)x + ay + c$

13) If μ_1', μ_2', μ_3', μ_4' are the first four moments of the distribution about certain number then fourth moment μ_4 of the distribution about the arithmetic mean is given by _____.

a) $\mu_4' + 4\mu_3'\mu_1' + 6\mu_2'(\mu_1')^4 + 3(\mu_1')^4$

b) $\mu_4' - 4\mu_3'\mu_1' + 6\mu_2'(\mu_1')^2 - 3(\mu_1')^4$

c) $\mu_4' + 4\mu_3'\mu_1' - 6\mu_2'(\mu_1')^4 - 3(\mu_1')^4$

d) $\mu_4' + 2\mu_3'\mu_1' + 6\mu_2'(\mu_1')^4 - 3(\mu_1')^4$

14) Coefficient of kurtosis β_2 is given by _____.

a) $\frac{\mu_4}{\mu_3}$ b) $\frac{\mu_4}{\mu_2^2}$

c) $\frac{\mu_3}{\mu_2^2}$ d) $\frac{\mu_4}{\mu_2^3}$

MCQ/Objective Type Questions

Duration: 30 Minutes Marks:14

Q.1 Choose the correct Answer. **14**

1) If X, Y denotes the deviations from their means and if $\sum X^2 = 40, \sum Y^2 = 100, \sum XY = 50,$ then $r =$ _____.
a) 0.63 b) 0.82
c) 0.91 d) 0.79

2) The line of regression of x and y is given by _____.
a) $x - \bar{x} = b_{xy}(y - \bar{y})$ b) $x - \bar{y} = b_{xy}(x - \bar{x})$
c) $x - \bar{x} = b_{xx}(y - \bar{y})$ d) $x - \bar{x} = b_{yx}(y - \bar{y})$

3) The following mistakes per page were found in a book.

No. of mistakes:	0	1	2	3	4
Pages:	211	90	19	5	0

Then χ^2 is _____.
a) 0.59 b) 0.069
c) 0.81 d) 0.79

4) The 't-statistic' is defined as _____.
a) $\frac{\bar{x}-\mu}{\sigma/\sqrt{n}}$ b) $\frac{\bar{x}-\mu}{s/\sqrt{n}}$
c) $\frac{\bar{x}-\mu}{\sigma/n}$ d) $\frac{\bar{x}-\mu}{s/n}$

5) If a linear differential equation with constant coefficients and r.h.s. equal to zero has a real root m_1 repeated Two times, then the corresponding part of the integral is _____.
a) $(c_1 + c_2)e^{m_1 X}$ b) $(c_1 + c_2 x)e^{m_1 X}$
c) $(c_1 x + c_2 x^2)e^{m_1 X}$ d) $(c_1 + c_2 x^3)e^{m_1 X}$

6) $\frac{1}{D-a}X$ is equal to _____.

a) $\int Xe^{ax}dx$ b) $e^{ax}\int X.e^{-ax}dx$

c) $\int Xe^{-ax}dx$ d) $e^{-ax}\int Xe^{-ax}dx$

7) $\frac{1}{D+1}(\log x+\frac{1}{x})$ is equal to _____.

a) e^x b) 1

c) x d) $\log x$

8) The solution of $q=e^{-p}$ is _____.

a) $z=ax+by+c$ b) $z=a^x+b^y+c$

c) $z=ax+y^{-b}+c$ d) $z=ax+e^{-a}y+c$

9) The solution of the equation $pq=p+q$ is _____.

a) $z=ax+(a+1)y+c$

b) $z=(a+1)x+a(a-1)y+c$

c) $z=(a-1)x+a(a+1)y+c$

d) $z(a-1)=a(a-1)x+ay+c$

10) If μ_1', μ_2', μ_3', μ_4' are the first four moments of the distribution about certain number then fourth moment μ_4 of the distribution about the arithmetic mean is given by _____.

a) $\mu_4'+4\mu_3'\mu_1'+6\mu_2'(\mu_1')^4+3(\mu_1')^4$

b) $\mu_4'-4\mu_3'\mu_1'+6\mu_2'(\mu_1')^2-3(\mu_1')^4$

c) $\mu_4'+4\mu_3'\mu_1'-6\mu_2'(\mu_1')^4-3(\mu_1')^4$

d) $\mu_4'+2\mu_3'\mu_1'+6\mu_2'(\mu_1')^4-3(\mu_1')^4$

11) Coefficient of kurtosis β_2 is given by _____.

a) $\frac{\mu_4}{\mu_3}$ b) $\frac{\mu_4}{\mu_2^2}$

c) $\frac{\mu_3}{\mu_2^2}$ d) $\frac{\mu_4}{\mu_2^3}$

12) If value of x for normal distribution is 35, mean of normal distribution is 65 and standard deviation is 25 then standardized random variable is ___.

a) -1.5 b) -1.7

c) -1.2 d) -4

13) A continuous random variable has the following probability density function $f(x)=kx(1-x),0\le x\le 1$ then $k=$ _____.

a) 6 b) 2

c) 3 d) 5

14) The area under the standard normal curve from $z = -\infty$ to $z = 0$ is ___.

a) 1 b) ½

c) 3/2 d) 0

S. Y. (B.Tech.) (Sem-I) (New) (NEP CBCS) Examination: March/April-2025
ELECTRICAL ENGINEERING
Advanced Mathematics and Statistics (OE-01A)

Day & Date: Wednesday 21-05-2025 Max. Marks: 56
Time: 03:00 PM To 06:00 PM

Instructions: 1) All questions are compulsory.
2) Figures to the right indicate full marks.

Section – I

Q.2 Attempt any Three. **09**

a) Find the Arithmetic mean, Median and standard deviation for the following frequency distribution.

x	5	9	12	15	20	24	30	35	42	49
f	3	6	8	8	9	10	8	7	6	2

b) Solve $(D^2 - 4D + 4)y = 8.x^2e^{2x}\sin 2x$

c) Solve $(D^2 + D + 1)y = \sin 2x$

d) Calculate Mode for the following frequency distribution.

C.I.	00-10	10-20	20-30	30-40	40-50	50-60	60-70
Frequency (f)	4	7	8	12	25	18	10

e) Solve $p^2q^3 = x^2y^3$

Q.3 Attempt any Three. **09**

a) Solve: $(2D + 1)^2y = 4e^{-x/2}$

b) Solve: $p + q = pqz$

c) Find Q_1, Q_2, Q_3 from the following data.
5,7,12,14,15,22,25,30,36,42,53

d) Solve $x(y - z)p + y(z - x)q = z(x - y)$

e) Solve $(D^3 - 3D + 2)y = x$

Q.4 Attempt any Two **10**

a) The first four moments of a distribution about the value 5 are 2,20,40 and 50. from the given information obtain the first four central moments, coefficient of skewness and kurtosis.

b) Solve the following differential equation by the method of separation of variables.
$\frac{\partial z}{\partial x} - 2\frac{\partial z}{\partial y} = z$ given that $z(x, 0) = 3e^{-5x}$

c) Solve: $(D^2 - D - 2)y = 2\log x + \frac{1}{x} + \frac{1}{x^2}$

Section – II

Q.5 Attempt any three of the following. **09**

a) Find the value of k if each of the following functions is a probability density function.

$$f(x) = \begin{cases} kx^2(1-x^3), & 0 \le x \le 1 \\ 0, & \text{otherwise} \end{cases}$$

b) The mean life time of 100 fluorescent light bulbs produced by a Company is computed to be 1570 Hrs. with S.D. of 120 Hrs. If μ is the mean lifetime of all the bulbs produced by the Company, Test the Hypothesis $\mu = 1600$ Hrs. Against the alternative Hypothesis $\mu \neq 1600$ Hrs. using 5% level of Significance.
(Given Expected value at 5% LOS is 1.96)

c) Calculate the coefficient of correlation between height of father and height of son from the following data.

Height of father	64	65	66	67	68	69	70
Height of son	66	67	65	68	70	68	71

d) Two independent random sample have the following data,
$\overline{x_1} = 110, \sigma_1 = 25, n_1 = 16$
$\overline{x_2} = 120, \sigma_2 = 30, n_2 = 9$
If σ_1 and σ_2 are the S. D. of the populations. Test the hypothesis that $\mu_1 = \mu_2$ at 5% level of significance. (The table value of t at $\alpha = 0.05$ for $v = 23$ degrees of freedom is 2.069)

e) If in a lot of 500 solenoids 25 are defective, find the probability that there will be 0, 1, 2 defective solenoids in a random sample of 20 solenoids.

Q.6 Attempt any three of the following. **09**

a) If two independent random samples of sizes 15 and 8 have respectively the following mean and population standard deviations, $\overline{x_1} = 980, \overline{x_2} = 1012; \sigma_1 = 75, \sigma_2 = 80$. Test the hypothesis that $\mu_1 = \mu_2$ at 5% level of significance.
(Given Expected value at 5% LOS with 21 DF is 2.080)

b) The number of telephone calls received by an operator in a ten-minute interval follows a Poisson distribution with mean 1. What is the probability of receiving (i) no call, (ii) less than four calls, in the interval? What is the most likely number of calls?

c) Calculate the equations of the lines of regression. Given
Mean of $x = 50.07$, S.D. of $x = 5.26$
Mean of $y = 9.98$, S.D. of $y = 2.59$
$r = 0.898$

d) In an intelligence test administered to 1000 children the mean score was, 42 with s.d. 24. Find the number of children (i) scoring more than 60 and (ii) between 20 and 40 assuming the distribution to be normal.
(Given: For S.N.V. z area from z = 0 to z = 0.75 is 0.2734, that between z = 0 and z = 0.9167 is 0.3202 and that between z = 0 to z = 0.08333 is 0.0332.)

e) Fit a Straight line $y = a + bx$ to the following data.

x	0	1	2	3	4	5
y	1	2	3	4.5	6	7.5

Q.7 Attempt any Two. **10**

a) Fit a Poisson's distribution to the following data :

X	0	1	2	3	4	Total
f	112	63	20	4	1	200

b) Obtain a second-degree curve to the following data.

Year	1965	1966	1967	1968	1969	1970	1971	1972
Profit (in Corers Rs.)	125	140	165	195	200	215	220	230

Also estimate the profit in 1973.

c) Ten school boys were given a test in Statistics and their scores were recorded. They were given a month's special coaching and a second test was given to them in the same subject at the end of the coaching period. Test if the marks given below give evidence to the fact that the students are benefitted by coaching.
Marks in test I: 70, 68, 56, 75, 80, 90, 68, 75, 56, 58
Marks in Test II: 68, 70, 52, 73, 75, 78, 80, 92, 54, 55
(Given that value of t_α at 5 % LOS for v = 9 degrees of freedom is 1.86 for one tailed test)

S. Y. (B.Tech.) (Sem-I) (New) (NEP CBCS) Examination: March/April-2025
ELECTRICAL ENGINEERING
Advanced Mathematics and Statistics (OE-01A)

Day & Date: Wednesday 21-05-2025 Max. Marks: 70
Time: 03:00 PM To 06:00 PM

Instructions: 1) Q. No. 1 is compulsory. It should be solved in the first 30 minutes in Answer Book Page no 03 (Starting page of the Answer Book). Each question carries one mark.
2) Don't forget to Mention question paper set (P/Q/R/S) on top of page.
3) Figures to the right indicates full marks.

MCQ/Objective Type Questions

Duration: 30 Minutes Marks:14

Q.1 Choose the correct Answer. **14**

1) If $\mu_1', \mu_2', \mu_3', \mu_4'$ are the first four moments of the distribution about certain number then fourth moment μ_4 of the distribution about the arithmetic mean is given by _____.

a) $\mu_4' + 4\mu_3'\mu_1' + 6\mu_2'(\mu_1')^4 + 3(\mu_1')^4$

b) $\mu_4' - 4\mu_3'\mu_1' + 6\mu_2'(\mu_1')^2 - 3(\mu_1')^4$

c) $\mu_4' + 4\mu_3'\mu_1' - 6\mu_2'(\mu_1')^4 - 3(\mu_1')^4$

d) $\mu_4' + 2\mu_3'\mu_1' + 6\mu_2'(\mu_1')^4 - 3(\mu_1')^4$

2) Coefficient of kurtosis β_2 is given by _____.

a) $\frac{\mu_4}{\mu_3}$ b) $\frac{\mu_4}{\mu_2^2}$

c) $\frac{\mu_3}{\mu_2^2}$ d) $\frac{\mu_4}{\mu_2^3}$

3) If value of x for normal distribution is 35, mean of normal distribution is 65 and standard deviation is 25 then standardized random variable is ___.

a) -1.5 b) -1.7
c) -1.2 d) -4

4) A continuous random variable has the following probability density function $f(x) = kx(1-x), 0 \leq x \leq 1$ then $k =$ _____.

a) 6 b) 2
c) 3 d) 5

5) The area under the standard normal curve from $z = -\infty$ to $z = 0$ is ___.

a) 1 b) ½
c) 3/2 d) 0

6) If X, Y denotes the deviations from their means and if $\sum X^2 = 40, \sum Y^2 = 100, \sum XY = 50,$ then $r =$ _____.

a) 0.63 b) 0.82
c) 0.91 d) 0.79

7) The line of regression of x and y is given by _____.

a) $x - \bar{x} = b_{xy}(y - \bar{y})$ b) $x - \bar{y} = b_{xy}(x - \bar{x})$
c) $x - \bar{x} = b_{xx}(y - \bar{y})$ d) $x - \bar{x} = b_{yx}(y - \bar{y})$

8) The following mistakes per page were found in a book.

No. of mistakes:	0	1	2	3	4
Pages:	211	90	19	5	0

Then χ^2 is _____.

a) 0.59 b) 0.069
c) 0.81 d) 0.79

9) The 't-statistic' is defined as _____.

a) $\frac{\bar{x}-\mu}{\sigma/\sqrt{n}}$ b) $\frac{\bar{x}-\mu}{s/\sqrt{n}}$
c) $\frac{\bar{x}-\mu}{\sigma/n}$ d) $\frac{\bar{x}-\mu}{s/n}$

10) If a linear differential equation with constant coefficients and r.h.s. equal to zero has a real root m_1 repeated Two times, then the corresponding part of the integral is _____.

a) $(c_1 + c_2)e^{m_1 X}$ b) $(c_1 + c_2 x)e^{m_1 X}$
c) $(c_1 x + c_2 x^2)e^{m_1 X}$ d) $(c_1 + c_2 x^3)e^{m_1 X}$

11) $\frac{1}{D-a}X$ is equal to _____.

a) $\int Xe^{ax}dx$ b) $e^{ax}\int X.e^{-ax}dx$
c) $\int Xe^{-ax}dx$ d) $e^{-ax}\int Xe^{-ax}dx$

12) $\frac{1}{D+1}(\log x + \frac{1}{x})$ is equal to _____.

a) e^x b) 1
c) x d) $\log x$

13) The solution of $q = e^{-p}$ is _____.

a) $z = ax + by + c$ b) $z = a^x + b^y + c$
c) $z = ax + y^{-b} + c$ d) $z = ax + e^{-a}y + c$

14) The solution of the equation $pq = p + q$ is _____.

a) $z = ax + (a+1)y + c$
b) $z = (a+1)x + a(a-1)y + c$
c) $z = (a-1)x + a(a+1)y + c$

d) $z(a-1) = a(a-1)x + ay + c$

MCQ/Objective Type Questions

Duration: 30 Minutes Marks:14

Q.1 Choose the correct Answer. **14**

1) Which dimension of e-commerce enables commerce beyond the boundaries of the country?
a) Richness b) Interactivity
c) Global Reach d) Ubiquity

2) Which of the following describes the definition of electronic commerce?
a) Doing business
b) Sale and purchase of goods
c) Doing business electronically
d) All of the above mentioned

3) Which e-commerce model involves the sale of goods or services from businesses to the general public?
a) Business to Government b) Business to Consumer
c) Business to Business d) Consumer to Business

4) All of the following are major B2C business models except _____.
a) content provider b) industry consortium
c) transaction broker d) service provider

5) Which of the following advantage of E-commerce?
a) Ability to operate 24/7
b) Inability to personalize the shopping
c) Higher operational cost
d) Limited reach CO1 I

6) Which e-commerce transaction provides the benefits of eliminating the requirement of a middleman?

a) Business to Business
b) Business to Government
c) Consumer to Business
d) Business to Consumer

7) After completing an E-Commerce transaction, the seller and buyer should be provided an opportunity to _____ their transaction experience.

a) undo
b) regret
c) provide rating for
d) forget

8) Which of the following is a common digital marketing strategy used in E-commerce?

a) Search Engine Optimization (SEO)
b) Traditional print advertising
c) Cold-calling potential customers
d) Distributing flyers in local neighborhoods

9) Digital Cash has following characteristic _____.

a) Anonymity
b) Security
c) Confidentiality
d) All above

10) Which component of E-commerce ensures secure online transactions and customer data protection?

a) Payment gateways
b) Shopping carts
c) Product catalogs
d) Data warehouses

11) Which type of attack is a method of defeating a cryptographic scheme of trying a large number of possibilities?

a) Teardrop attack
b) Brute force attack
c) Phlashing
d) Smurf attack

12) What is the another name called PDoS?

a) Brute force attack
b) Non technical attack
c) Phlashing
d) Smurf attack

13) What does the term “data security” refer to in E-commerce?

a) The use of cookies to track customer behavior
b) The protection of customer data from unauthorized access and breaches
c) The analysis of customer browsing history for personalized recommendations
d) The process of categorizing customer data for marketing purposes

14) Which of the following is a characteristic of E-commerce marketplaces?

a) They only allow B2C transactions
b) They sell physical products exclusively
c) They are limited to a specific geographical area
d) Multiple sellers can list their products to reach a broader audience

Set **Q**

S. Y. (B.Tech.) (Sem-I) (New) (NEP CBCS) Examination: March/April-2025
ELECTRICAL ENGINEERING
Digital Marketing and E- Commerce (OE-01B)

Day & Date: Wednesday 21-05-2025 Max. Marks: 70
Time: 03:00 PM To 06:00 PM

Instructions: 1) Q. No. 1 is compulsory. It should be solved in the first 30 minutes in Answer Book Page no 03 (Starting page of the Answer Book). Each question carries one mark.
2) Don't forget to Mention question paper set (P/Q/R/S) on top of page.
3) Figures to the right indicates full marks.
4) Assume suitable data if necessary.

MCQ/Objective Type Questions

Duration: 30 Minutes Marks:14

Q.1 Choose the correct Answer. **14**

1) Which of the following is a common digital marketing strategy used in E-commerce?
a) Search Engine Optimization (SEO)
b) Traditional print advertising
c) Cold-calling potential customers
d) Distributing flyers in local neighborhoods

2) Digital Cash has following characteristic _____.
a) Anonymity b) Security
c) Confidentiality d) All above

3) Which component of E-commerce ensures secure online transactions and customer data protection?
a) Payment gateways b) Shopping carts
c) Product catalogs d) Data warehouses

4) Which type of attack is a method of defeating a cryptographic scheme of trying a large number of possibilities?
a) Teardrop attack b) Brute force attack
c) Phlashing d) Smurf attack

5) What is the another name called PDoS?
a) Brute force attack b) Non technical attack
c) Phlashing d) Smurf attack

6) What does the term “data security” refer to in E-commerce?
a) The use of cookies to track customer behavior
b) The protection of customer data from unauthorized access and breaches
c) The analysis of customer browsing history for personalized recommendations
d) The process of categorizing customer data for marketing purposes

7) Which of the following is a characteristic of E-commerce marketplaces?
a) They only allow B2C transactions
b) They sell physical products exclusively
c) They are limited to a specific geographical area
d) Multiple sellers can list their products to reach a broader audience

8) Which dimension of e-commerce enables commerce beyond the boundaries of the country?
a) Richness b) Interactivity
c) Global Reach d) Ubiquity

9) Which of the following describes the definition of electronic commerce?
a) Doing business
b) Sale and purchase of goods
c) Doing business electronically
d) All of the above mentioned

10) Which e-commerce model involves the sale of goods or services from businesses to the general public?
a) Business to Government b) Business to Consumer
c) Business to Business d) Consumer to Business

11) All of the following are major B2C business models except _____.
a) content provider b) industry consortium
c) transaction broker d) service provider

12) Which of the following advantage of E-commerce?
a) Ability to operate 24/7
b) Inability to personalize the shopping
c) Higher operational cost
d) Limited reach CO1 I

13) Which e-commerce transaction provides the benefits of eliminating the requirement of a middleman?
a) Business to Business b) Business to Government
c) Consumer to Business d) Business to Consumer

14) After completing an E-Commerce transaction, the seller and buyer should be provided an opportunity to _____ their transaction experience.
a) undo b) regret
c) provide rating for d) forget

3) Figures to the right indicates full marks.

MCQ/Objective Type Questions

Duration: 30 Minutes Marks:14

Q.1 Choose the correct Answer. **14**

1) The archaeology focuses on: _____.

a) Economic theories
b) The study of celestial bodies
c) Material remains of past societies
d) Genetic research

2) Which of the following disciplines deals with political systems and governance?

a) Economics b) Political Science
c) Sociology d) Cultural Studies

3) Sociology mainly focuses on: _____.

a) Artistic techniques
b) Social behaviour and societal structures
c) Social economics
d) Historical events

4) Which discipline studies the production, distribution, and consumption of goods and services?

a) Sociology b) Political Science
c) Economics d) History

5) In which ancient civilization did the term "democracy" originate?

a) Ancient Egypt b) Ancient Greece
c) Ancient Rome d) Mesopotamia

6) Identify the primary focus of ethics in philosophy _____.

a) Logic and reasoning b) Moral principles and conduct
c) Aesthetics and beauty d) Scientific discovery

7) Feminism primarily addresses issues related to: _____.
a) Economic inequality
b) Gender equality and women's rights
c) Political ideologies
d) Technological advancements

8) What is the fundamental problem of economics?
a) Production of goods
b) Scarcity of resources
c) Inflation
d) Trade barriers

9) Dr. Sigmund Freud is best known for his contributions to: _____.
a) Political science
b) Psychoanalysis
c) Economic theory
d) Structural linguistics

10) The main focus of the humanities is: _____.
a) Scientific experiments
b) Human culture and expression
c) Market trends and economies
d) Medical advancements

11) Which of the following does not come under the humanities?
a) Philosophy
b) Literature
c) Physics
d) Art History

12) The main focus of social sciences is on:
a) The physical and natural world
b) Human society and social relationships
c) Ancient artifacts
d) Chemical compositions

13) The study of language structure and its evolution is called: _____.
a) Sociology
b) Linguistics
c) Psychology
d) Anthropology

14) Identify the key person in philosophy _____.
a) Isaac Newton
b) Leonardo da Vinci
c) Aristotle
d) Charles Darwin

Time: 03:00 PM To 06:00 PM

Instructions: 1) All questions are compulsory.
2) Figures to the right indicate full marks.

Section – I

Q.2 Attempt any Three. **12**

a) Explain the interdisciplinary nature of disciplines under humanities and social sciences.
b) Write a short note on: Scope of humanities.
c) Explain how perceptual processes shape human behaviour.
d) Write a short note on: Different aspects of perception.
e) Write a short note on: Major philosophical movements and their impact.

Q.3 Attempt any Two. **16**

a) Explain the advantages and disadvantages of democracy.
b) Explain major theories of psychology.
c) Explain how different psychological aspects affect social communication.

Section – II

Q.4 Attempt any Three. **12**

a) Write a short note on: Social Institutions.
b) Explain different elements of culture and society.
c) Write a short note on: Contributions of ancient civilizations to modern society.
d) How did industrial revolution contribute to technical advancements?
e) Write a short note on: Ethics in Engineering.

Q.5 Attempt any Two. **16**

a) What is industrialization? Explain the social and economic consequences of industrialization.
b) Describe different economic theories and thinkers.
c) Explain the technological innovations in 18^{th} & 19^{th} century.

MCQ/Objective Type Questions

Duration: 30 Minutes Marks:14

Q.1 Choose the correct Answer. **14**

1) _____ is defined as "the discipline dealing with what is good & bad & with moral duty & obligation".
a) Rule b) Organisation culture
c) Protocol d) Ethics

2) _____ involves establishing the amount of work to be done & the time when each element of the work will start.
a) Planning b) Routing
c) Scheduling d) Organizing

3) In _____ concept product enjoys the supreme importance.
a) Selling b) Marketing
c) Manufacturing d) Business

4) _____ are the greatest importance at the supervisory level.
a) Supervisory skills b) Human relation skills
c) Technical skills d) Planning skills

5) The responsibilities of the operations manager include _____.
a) Planning , organizing , staffing , procuring , and reviewing
b) Forecasting , designing , planning , organizing , and controlling
c) Forecasting , designing , operating , procuring , and reviewing
d) Planning , organizing , staffing , leading , and controlling
e) Designing & operating

6) Self-esteem, status affiliation with others, affection those come under _____ needs.
a) Basic b) Primary
c) Third level of d) Secondary

7) _____ is ability of individual or group to induce or influence the beliefs or action of other person or group.

a) Power b) Authority
c) Post d) Leadership

8) The basic objective of quality control in any organization is to _____.

a) Quality development, quality maintenance and quality improvement activities in organization
b) Achieve optimum cost
c) Achieve customer's satisfaction
d) Achieve all the above

9) Cost associated with defective products being shipped to the customers are called as _____.

a) Cost of internal failure b) Total cost of failure
c) Rejection cost d) Cost of external failure

10) For identification of vital few for the given data, the tool used is _____.

a) Cause-Effect diagram b) Scatter diagram
c) Pareto Analysis d) Check Sheet

11) Total quality management (TQM) mainly aims for _____.

a) Control for quality b) Usefulness of product
c) Customer satisfaction d) Cost control

12) The statistician who invented the control chart for use in industrial quality control was: _____.

a) Deming b) Taguchi
c) Pareto d) Shewhart
e) None of the above

13) The method of accepting or rejecting the lot is known as _____.

a) Lot sampling b) Acceptance sampling
c) Batch sampling d) Quality control

14) In double sampling plan, second sample is taken when the number of defectives _____.

a) > C1 but < C2 b) > C1
c) > C1 and C2 d) < C2

MCQ/Objective Type Questions

Duration: 30 Minutes Marks:14

Q.1 Choose the correct Answer. **14**

1) Laplace transform of $\int_0^t u^3 du =$_____.

a) $\frac{3}{s^5}$ b) $\frac{6}{s^5}$

c) $\frac{1}{s^5}$ d) $\frac{6}{s^4}$

2) If $L\{f(t)\} = \emptyset(s)$, then $L\{f(at)\} =$ _____.

a) $\emptyset\left(\frac{s}{a}\right)$ b) $\frac{1}{s}\emptyset\left(\frac{s}{a}\right)$

c) $\emptyset'\left(\frac{s}{a}\right)$ d) $\frac{1}{a}\emptyset\left(\frac{s}{a}\right)$

3) $L^{-1}\left\{\frac{1}{s^2+3^2}\right\} =$_____.

a) $\frac{1}{3}\sin 3t$ b) $\frac{1}{3}\cos 3t$

c) $\frac{1}{3}\cosh 3t$ d) $\frac{1}{3}\sinh 3t$

4) For $\frac{d^2y}{dx^2} + 4\frac{dy}{dx} + 3y = 3e^{2x}$, the particular integral is _____.

a) $\frac{1}{15}e^{2x}$ b) $3e^{2x}$

c) $\frac{1}{5}e^{2x}$ d) $C_1e^{-x} + C_2e^{-2x}$

5) The general solution of the equation $(D^3 - 7D - 6)y = 0$ is _____.

a) $y = c_1e^{-x} + c_2e^{2x} + c_3e^{-3x}$

b) $y = c_1e^{-x} + c_2e^{2x} + c_3e^{3x}$

c) $y = c_1e^{-x} + c_2e^{-2x} + c_3e^{-3x}$

d) None of these

6) $z\{k\} =$_____ for $|z| > 1$

a) $\frac{z}{z-1}$ b) $\frac{1}{(z-1)^2}$

c) $\frac{z}{(z-1)^2}$ d) $\frac{z}{(z+1)^2}$

7) If $z\{f(k)\} = F(z)$, then $z\{a^k f(k)\} =$ _____.

a) $f\left(\frac{a}{z}\right)$ b) $f\left(\frac{z}{a}\right)$

c) $\frac{1}{a}f\left(\frac{z}{a}\right)$ d) None

8) $Z\left\{\frac{1}{k!}\right\} =?$ for $k \geq 0$

a) e^z b) $e^{\frac{1}{z}}$

c) $\frac{1}{z}$ d) $\frac{1}{1-z}$

9) The Fourier sine transform of $f(x)$ is given by _____.

a) $\sqrt{\frac{2}{\pi}}\int_{-\infty}^{\infty} f(x)\sin sx\, dx$ b) $\int_{-\infty}^{\infty} f(x)\cos sx\, dx$

c) $\sqrt{\frac{2}{\pi}}\int_{0}^{\infty} f(x)\sin sx\, dx$ d) $\sqrt{\frac{\pi}{2}}\int_{0}^{\infty} f(x)\sin sx\, dx$

10) From the result $\int_{-\infty}^{\infty} \frac{\cos sx.\sin sk}{s} ds = \begin{cases} \pi & , \ |x| < k \\ 0 & , \ |x| > k \end{cases}$ we can deduce that $\int_0^{\infty} \frac{\sin sk}{s}\, ds =$ _____.

a) 0 b) 1

c) π d) $\frac{\pi}{2}$

11) The first real positive root of $x^3 = 6x - 4$ by Newton Raphson method near $x_0 = 1$ is _____.

a) 0.6667 b) 0.6

c) 0.4 d) 0.3

12) How many steps does the fourth-order Runge-Kutta method use?

a) Two steps b) Five steps

c) Four steps d) Three steps

13) In the interval $(0, a)$ the constant term in the Fourier series of $f(x) = \frac{a}{2} - x$ is _____.

a) 0 b) 1

c) $\frac{a^2}{2\pi}$ d) $\frac{a^2}{4\pi}$

14) Fourier series of $f(x) = x\ in(-\pi, \pi)$ will contain ____

a) No sine term b) No cosine term

c) Both cosine and sine term d) None of these

S.Y. (B. Tech) (Sem-I) (New) (NEP CBCS) Examination: March/April-2025
ELECTRICAL ENGINEERING
Mathematics for Software and Hardware (OE-01E)

Day & Date: Wednesday 21-05-2025 Max. Marks: 56
Time: 03:00 PM To 06:00 PM

Instructions: 1) All questions are compulsory.
2) Figures to the right indicate full marks.
3) Use of non-programmable calculator is allowed.

Section – I

Q.2 Attempt any three **09**

a) Solve : $(D^2 + 4D + 5)y = -2\cos hx + 2^x$

b) Solve $(D^2 + 2D + 1)y = x\cos x$

c) Find Z-transform of $x_k = 2^k \cos(3k + 2)\,, k \geq 0$

d) Find Z-transform of $x_k = k^2 e^{-ak}, k \geq 0$

e) Find the inverse Laplace transform of following by using the Convolution theorem of $\left[\frac{1}{s(s^2+4)}\right]$

Q.3 Attempt any three of the following. **09**

a) Evaluate by using Laplace transform $\int_0^\infty \left(\frac{e^{-t}-e^{-3t}}{t}\right) dt$

b) Find the inverse Z-transform of $f(k) = \begin{cases} 4^k, & k < 0 \\ 3^k, & k \geq 0 \end{cases}$

c) Find $Z\{e^{-3k}\sin 2k\}, k \geq 0$

d) Solve $(D^2 - 1)y = (1 + e^{-x})^2$

e) Find Laplace Transform of $\{t\cos 2t\}$

Q.4 Attempt any two **10**

a) Find the inverse Z-transform of $\frac{1}{(z-a)^2}$ if

1) $|z| < a$,
2) $|z| > a$,

b) Find the inverse Laplace transform of following by using the Convolution theorem of $\left[\frac{s^2}{(s^2+a^2)(s^2+b^2)}\right]$

c) Solve $(D^2 - 6D + 13)y = e^{x\log 2} + 8e^{3x}\sin 4x$

Section – II

Q.5 Attempt any three **09**

a) Evaluate $\int_0^5 \frac{1}{4x+5} dx$ using $n = 5$ by Trapezoidal rule.

b) Evaluate $I = \int_0^2 e^{-x} dx$ by using the Simpson's 1/3rd rule given h= 0.5

c) Obtain half range cosine series $f(x) = x$ in $0 < x < 1$

d) Find the Fourier series expansion of $f(x) = x^2$ in $(-\pi, \pi)$

e) Find the Fourier transform of $f(x) = \begin{cases} \frac{1}{2\epsilon}, & |x| \leq \epsilon \\ 0, & |x| > \epsilon \end{cases}$

Q.6 Attempt any three **09**

a) Find f(x) if its Fourier sine transform e^{-as}

b) Find the Fourier cosine transform of

$f(x)$, if $f(x) = \begin{cases} 1, & 0 \leq x < 1 \\ 0, & x \geq 1 \end{cases}$

c) Find the Fourier series expansion of $f(x) = x$ in $(-\pi, \pi)$

d) Solve by Newton Raphson method $x^4 - x = 10$ correct to four decimal places. (perform two iterations only)

e) Find $\int_0^6 \frac{1}{1+x^2} dx\ n = 6$ using Simpson's 3/8th rule.

Q.7 Attempt any two. **10**

a) Find $\int_1^8 \frac{1}{1+x} dx\ h = 1$ by using Trapezoidal rule and Simpson's 1/3rd rule.

b) Find Fourier transform of

$f(x) = 1\ |x| < k$

$= 0\ |x| > k$ and

Hence evaluate i) $\int_{-\infty}^{\infty} \frac{\sin sk . \cos sk}{s} ds$ ii) $\int_{-\infty}^{\infty} \frac{sin\ ks}{s} ds$

c) Find the Fourier series expansion of the function $f(x) = e^{-\alpha x}$ in $(0, 2\pi)$

Seat No.

S.Y. (B. Tech) (Sem-I) (New) (NEP CBCS) Examination: March/April-2025
ELECTRICAL ENGINEERING
Mathematics for Software and Hardware (OE-01E)

Day & Date: Wednesday 21-05-2025 Max. Marks: 70
Time: 03:00 PM To 06:00 PM

Instructions: 1) Q. No. 1 is compulsory. It should be solved in the first 30 minutes in Answer Book Page no 03 (Starting page of the Answer Book). Each question carries one mark.
2) Don't forget to Mention question paper set (P/Q/R/S) on top of page.
3) Figures to the right indicates full marks.
4) Use of non-programmable calculator is allowed.

MCQ/Objective Type Questions

Duration: 30 Minutes Marks:14

Q.1 Choose the correct Answer. **14**

1) $Z\left\{\frac{1}{k!}\right\} = ?$ for $k \geq 0$

a) e^z b) $e^{\frac{1}{z}}$

c) $\frac{1}{z}$ d) $\frac{1}{1-z}$

2) The Fourier sine transform of $f(x)$ is given by _____.

a) $\sqrt{\frac{2}{\pi}}\int_{-\infty}^{\infty} f(x)\sin sx\, dx$ b) $\int_{-\infty}^{\infty} f(x)\cos sx\, dx$

c) $\sqrt{\frac{2}{\pi}}\int_{0}^{\infty} f(x)\sin sx\, dx$ d) $\sqrt{\frac{\pi}{2}}\int_{0}^{\infty} f(x)\sin sx\, dx$

3) From the result $\int_{-\infty}^{\infty}\frac{\cos sx.\sin sk}{s}ds = \begin{cases}\pi & , \ |x| < k \\ 0 & , \ |x| > k\end{cases}$ we can deduce that $\int_0^{\infty}\frac{\sin sk}{s}\, ds =$ _____.

a) 0 b) 1

c) π d) $\frac{\pi}{2}$

4) The first real positive root of $x^3 = 6x - 4$ by Newton Raphson method near $x_0 = 1$ is _____.

a) 0.6667 b) 0.6

c) 0.4 d) 0.3

5) How many steps does the fourth-order Runge-Kutta method use?

a) Two steps b) Five steps

c) Four steps d) Three steps

6) In the interval $(0, a)$ the constant term in the Fourier series of $f(x) = \frac{a}{2} - x$ is _____.

a) 0 b) 1

c) $\frac{a^2}{2\pi}$ d) $\frac{a^2}{4\pi}$

7) Fourier series of $f(x) = x\ in(-\pi, \pi)$ will contain _____

a) No sine term b) No cosine term

c) Both cosine and sine term d) None of these

8) Laplace transform of $\int_0^t u^3 du =$_____.

a) $\frac{3}{s^5}$ b) $\frac{6}{s^5}$

c) $\frac{1}{s^5}$ d) $\frac{6}{s^4}$

9) If $L\{f(t)\} = \emptyset(s)$, then $L\{f(at)\} =$ _____.

a) $\emptyset\left(\frac{s}{a}\right)$ b) $\frac{1}{s}\emptyset\left(\frac{s}{a}\right)$

c) $\emptyset'\left(\frac{s}{a}\right)$ d) $\frac{1}{a}\emptyset\left(\frac{s}{a}\right)$

10) $L^{-1}\left\{\frac{1}{s^2+3^2}\right\} =$_____.

a) $\frac{1}{3}\sin 3t$ b) $\frac{1}{3}\cos 3t$

c) $\frac{1}{3}\cosh 3t$ d) $\frac{1}{3}\sinh 3t$

11) For $\frac{d^2y}{dx^2} + 4\frac{dy}{dx} + 3y = 3e^{2x}$, the particular integral is _____.

a) $\frac{1}{15}e^{2x}$ b) $3e^{2x}$

c) $\frac{1}{5}e^{2x}$ d) $C_1e^{-x} + C_2e^{-2x}$

12) The general solution of the equation $(D^3 - 7D - 6)y = 0$ is _____.

a) $y = c_1e^{-x} + c_2e^{2x} + c_3e^{-3x}$

b) $y = c_1e^{-x} + c_2e^{2x} + c_3e^{3x}$

c) $y = c_1e^{-x} + c_2e^{-2x} + c_3e^{-3x}$

d) None of these

13) $z\{k\} =$_____ for $|z| > 1$

a) $\frac{z}{z-1}$ b) $\frac{1}{(z-1)^2}$

c) $\frac{z}{(z-1)^2}$ d) $\frac{z}{(z+1)^2}$

14) If $z\{f(k)\} = F(z)$, then $z\{a^k f(k)\} =$ _____.

a) $f\left(\frac{a}{z}\right)$ b) $f\left(\frac{z}{a}\right)$

c) $\frac{1}{a} f\left(\frac{z}{a}\right)$ d) None

MCQ/Objective Type Questions

Duration: 30 Minutes Marks:14

Q.1 Choose the correct Answer. **14**

1) $z\{k\} =$_____ for $|z| > 1$

a) $\frac{z}{z-1}$ b) $\frac{1}{(z-1)^2}$

c) $\frac{z}{(z-1)^2}$ d) $\frac{z}{(z+1)^2}$

2) If $z\{f(k)\} = F(z)$, then $z\{a^k f(k)\} =$ _____.

a) $f\left(\frac{a}{z}\right)$ b) $f\left(\frac{z}{a}\right)$

c) $\frac{1}{a} f\left(\frac{z}{a}\right)$ d) None

3) $Z\left\{\frac{1}{k!}\right\} =?$ for $k \geq 0$

a) e^z b) $e^{\frac{1}{z}}$

c) $\frac{1}{z}$ d) $\frac{1}{1-z}$

4) The Fourier sine transform of $f(x)$ is given by _____.

a) $\sqrt{\frac{2}{\pi}} \int_{-\infty}^{\infty} f(x) \sin sx \, dx$ b) $\int_{-\infty}^{\infty} f(x) \cos sx \, dx$

c) $\sqrt{\frac{2}{\pi}} \int_{0}^{\infty} f(x) \sin sx \, dx$ d) $\sqrt{\frac{\pi}{2}} \int_{0}^{\infty} f(x) \sin sx \, dx$

5) From the result $\int_{-\infty}^{\infty} \frac{\cos sx.\sin sk}{s} ds = \begin{cases} \pi & , \ |x| < k \\ 0 & , \ |x| > k \end{cases}$ we can deduce that $\int_0^{\infty} \frac{\sin sk}{s} \, ds =$ _____.

a) 0 b) 1

c) π d) $\frac{\pi}{2}$

6) The first real positive root of $x^3 = 6x - 4$ by Newton Raphson method near $x_0 = 1$ is _____.

a) 0.6667 b) 0.6

c) 0.4 d) 0.3

7) How many steps does the fourth-order Runge-Kutta method use?

a) Two steps b) Five steps

c) Four steps d) Three steps

8) In the interval $(0, a)$ the constant term in the Fourier series of $f(x) = \frac{a}{2} - x$ is _____.

a) 0 b) 1

c) $\frac{a^2}{2\pi}$ d) $\frac{a^2}{4\pi}$

9) Fourier series of $f(x) = x \ in(-\pi, \pi)$ will contain ____

a) No sine term b) No cosine term

c) Both cosine and sine term d) None of these

10) Laplace transform of $\int_0^t u^3 du =$_____.

a) $\frac{3}{s^5}$ b) $\frac{6}{s^5}$

c) $\frac{1}{s^5}$ d) $\frac{6}{s^4}$

11) If $L\{f(t)\} = \emptyset(s)$, then $L\{f(at)\} =$ _____.

a) $\emptyset\left(\frac{s}{a}\right)$ b) $\frac{1}{s}\emptyset\left(\frac{s}{a}\right)$

c) $\emptyset'\left(\frac{s}{a}\right)$ d) $\frac{1}{a}\emptyset\left(\frac{s}{a}\right)$

12) $L^{-1}\left\{\frac{1}{s^2+3^2}\right\} =$_____.

a) $\frac{1}{3}\sin 3t$ b) $\frac{1}{3}\cos 3t$

c) $\frac{1}{3}\cosh 3t$ d) $\frac{1}{3}\sinh 3t$

13) For $\frac{d^2y}{dx^2} + 4\frac{dy}{dx} + 3y = 3e^{2x}$, the particular integral is _____.

a) $\frac{1}{15}e^{2x}$ b) $3e^{2x}$

c) $\frac{1}{5}e^{2x}$ d) $C_1e^{-x} + C_2e^{-2x}$

14) The general solution of the equation $(D^3 - 7D - 6)y = 0$ is _____.

a) $y = c_1e^{-x} + c_2e^{2x} + c_3e^{-3x}$

b) $y = c_1e^{-x} + c_2e^{2x} + c_3e^{3x}$

c) $y = c_1e^{-x} + c_2e^{-2x} + c_3e^{-3x}$

d) None of these

S.Y. (B. Tech) (Sem-I) (New) (NEP CBCS) Examination: March/April-2025
ELECTRICAL ENGINEERING
Mathematics for Software and Hardware (OE-01E)

Day & Date: Wednesday 21-05-2025 Max. Marks: 56
Time: 03:00 PM To 06:00 PM

Instructions: 1) All questions are compulsory.
2) Figures to the right indicate full marks.
3) Use of non-programmable calculator is allowed.

Section – I

Q.2 Attempt any three **09**

a) Solve : $(D^2 + 4D + 5)y = -2\cos hx + 2^x$

b) Solve $(D^2 + 2D + 1)y = x\cos x$

c) Find Z-transform of $x_k = 2^k \cos(3k + 2)\,, k \geq 0$

d) Find Z-transform of $x_k = k^2 e^{-ak}, k \geq 0$

e) Find the inverse Laplace transform of following by using the Convolution theorem of $\left[\frac{1}{s(s^2+4)}\right]$

Q.3 Attempt any three of the following. **09**

a) Evaluate by using Laplace transform $\int_0^\infty \left(\frac{e^{-t}-e^{-3t}}{t}\right) dt$

b) Find the inverse Z-transform of $f(k) = \begin{cases} 4^k, & k < 0 \\ 3^k, & k \geq 0 \end{cases}$

c) Find $Z\{e^{-3k}\sin 2k\}, k \geq 0$

d) Solve $(D^2 - 1)y = (1 + e^{-x})^2$

e) Find Laplace Transform of $\{t\cos 2t\}$

Q.4 Attempt any two **10**

a) Find the inverse Z-transform of $\frac{1}{(z-a)^2}$ if

1) $|z| < a$,
2) $|z| > a$,

b) Find the inverse Laplace transform of following by using the Convolution theorem of $\left[\frac{s^2}{(s^2+a^2)(s^2+b^2)}\right]$

c) Solve $(D^2 - 6D + 13)y = e^{x\log 2} + 8e^{3x}\sin 4x$

Section – II

Q.5 Attempt any three **09**

a) Evaluate $\int_0^5 \frac{1}{4x+5} dx$ using $n = 5$ by Trapezoidal rule.

b) Evaluate $I = \int_0^2 e^{-x} dx$ by using the Simpson's 1/3rd rule given h= 0.5

c) Obtain half range cosine series $f(x) = x$ in $0 < x < 1$

d) Find the Fourier series expansion of $f(x) = x^2$ in $(-\pi, \pi)$

e) Find the Fourier transform of $f(x) = \begin{cases} \frac{1}{2\epsilon}, & |x| \leq \epsilon \\ 0, & |x| > \epsilon \end{cases}$

Q.6 Attempt any three **09**

a) Find f(x) if its Fourier sine transform e^{-as}

b) Find the Fourier cosine transform of

$f(x)$, if $f(x) = \begin{cases} 1, & 0 \leq x < 1 \\ 0, & x \geq 1 \end{cases}$

c) Find the Fourier series expansion of $f(x) = x$ in $(-\pi, \pi)$

d) Solve by Newton Raphson method $x^4 - x = 10$ correct to four decimal places. (perform two iterations only)

e) Find $\int_0^6 \frac{1}{1+x^2} dx \; n = 6$ using Simpson's 3/8th rule.

Q.7 Attempt any two. **10**

a) Find $\int_1^8 \frac{1}{1+x} dx \; h = 1$ by using Trapezoidal rule and Simpson's 1/3rd rule.

b) Find Fourier transform of

$f(x) = 1 \; |x| < k$

$= 0 \; |x| > k$ and

Hence evaluate i) $\int_{-\infty}^{\infty} \frac{\sin sk . \cos sk}{s} ds$ ii) $\int_{-\infty}^{\infty} \frac{\sin ks}{s} ds$

c) Find the Fourier series expansion of the function $f(x) = e^{-\alpha x}$ in $(0, 2\pi)$

ELECTRICAL ENGINEERING
Soft Skills and Personality Development (OE-01F)

Day & Date: Wednesday 21-05-2025 Max. Marks: 70
Time: 03:00 PM To 06:00 PM

Instructions: 1) Q. No. 1 is compulsory. It should be solved in the first 30 minutes in Answer Book Page no 03 (Starting page of the Answer Book). Each question carries one mark.
2) Don't forget to Mention question paper set (P/Q/R/S) on top of page.
3) Figures to the right indicates full marks.

MCQ/Objective Type Questions

Duration: 30 Minutes Marks:14

Q.1 Choose the correct Answer. **14**

1) What is feedback in communication?
a) The process of encoding a message.
b) The process of transmitting the message.
c) The response or reaction to a message.
d) The process of decoding a message.

2) In the process of communication 'Encoding' means _____.
a) Using symbol to express an idea
b) Deciphering the message
c) Creating noise in the communication
d) Interpreting the meaning of message

3) Empathy refers to: _____.
a) Capacity to understand or feel what another person feels
b) Having better understanding of partner's emotions
c) The higher the likelihood of self harm
d) Getting what one wants out of the relationship

4) Repots, suggestions, appeals grievances etc. are examples of: _____.
a) Down ward communication
b) Upward communication
c) Horizontal communication
d) Informal communication

5) Informal communication is commonly known as: _____.
a) Down ward communication b) Upward communication
c) Horizontal communication d) Grapevine

6) _____ is not a communication barrier?
a) Language b) Culture
c) Habits d) Physical

7) Which of the following is NOT a component of communication?
a) Sender b) Message
c) Receiver d) Translator

8) Emotional Intelligence primarily refers to the ability to: _____.
a) Understand and manage one's own emotions and the emotions of others
b) Solve mathematical problems
c) Memorize large amounts of information
d) Make logical decisions without emotions

9) Time management can help reduce stress by: _____
a) Creating unnecessary pressure
b) Organizing tasks and prioritizing effectively
c) Avoiding responsibilities altogether
d) Increasing the workload

10) The term “self-regulation” in Emotional Intelligence means: _____.
a) Hiding your emotions from others
b) Controlling impulsive behaviours and adapting to changing circumstances
c) Ignoring your emotional responses
d) Following strict rules without considering emotions

11) What is the primary purpose of a job interview?
a) To test the candidate's academic knowledge
b) To compare the candidate's qualifications with others
c) To discuss salary expectations only
d) To assess the candidate’s suitability for the job role

12) What kind of information will you collect before going to an interview?
a) About the job you are applying for
b) About the company
c) About the work culture
d) All of the above

13) Which of the following is an effective stress management technique?
a) Procrastination
b) Deep breathing and relaxation exercises
c) Avoiding physical activity
d) Excessive multitasking

14) Which of the following is an important step to prepare for an interview?
a) Memorizing answers word for word
b) Arriving late to showcase confidence
c) Avoiding practice to appear natural
d) Researching the company and role

Design Thinking: Business Innovation Framework (CIVMDM-01A)

Day & Date: Thursday 22-05-2025 Max. Marks: 70
Time: 03:00 PM To 06:00 PM

Instructions: 1) Q. No. 1 is compulsory. It should be solved in the first 30 minutes in Answer Book Page no. 03 (Starting page of the Answer Book). Each question carries one mark.
2) Don't forget to mention question paper set (P/Q/R/S) on top of page.
3) Figures to the right indicates full marks.

MCQ/Objective Type Questions

Duration: 30 Minutes Marks:14

Q.1 Choose the correct Answer. **14**

1) What is the primary focus of Design Thinking?
a) Maximizing shareholder
b) Developing innovative and user-centered solutions
c) Streamlining manufacturing processes
d) Enhancing employee productivity

2) Which of the following correctly lists the first three phases of the Design Thinking process?
a) Empathize, Ideate, Prototype
b) Define, Ideate, Test
c) Empathize, Define, Ideate
d) Prototype, Test, Implement

3) In the context of Design Thinking, what is "brainstorming" used for?
a) Generating a wide range of ideas
b) Testing final products
c) Developing financial models
d) Identifying user pain points

4) What does a "customer journey map" help to visualize?
a) The financial cost of product development
b) The steps a customer goes through while interacting with a product or service
c) The design specifications of a product
d) The competitive landscape of a market

5) Which tool in Design Thinking helps in understanding the target user's needs and behaviors?
a) Prototype b) Persona
c) SWOT analysis d) Business model canvas

6) What is the final phase in the Design Thinking process?
a) Test b) Implement
c) Prototype d) Ideate

7) Which of the following is NOT an objective of design thinking?
a) To create user-friendly products
b) To streamline manufacturing processes
c) To encourage iterative prototyping
d) To enhance collaboration among teams

8) Which of the following is a benefit of using design thinking?
a) Reduces product variety b) Increases customer satisfaction
c) Limits team collaboration d) Eliminates risk in decision-making

9) What role does technology play in innovation management?
a) It complicates processes
b) It is irrelevant to innovation
c) It serves as a tool for enhancing efficiency and creativity
d) It replaces human input

10) Which leadership style involves making decisions based on input from team members?
a) Autocratic b) Laissez-faire
c) Democratic d) Transactional

11) What does "Product Solution Fit" refer to?
a) The alignment of the product with customer needs and problems
b) The product's price in relation to competitors
c) The marketing strategy for the product
d) The technical specifications of the product

12) Which of the following best defines "Product Market Fit"?
a) The degree to which a product meets the demands of a specific market
b) The number of products available in the market
c) The financial performance of a product
d) The product's popularity on social media

13) What is the primary goal of service design?
a) To reduce costs
b) To enhance customer experience
c) To standardize services
d) To simplify service offerings

14) Which of the following is a key principle of service design?
a) Focus on profitability over customer satisfaction
b) User-centered design
c) Minimal feedback from users
d) Rigid service processes

Q.2 **a)** Describe each phase of the Design Thinking process in detail, explaining how they contribute to the overall methodology. **06**

b) Provide a comprehensive definition of Design Thinking, including its essential characteristics and principles. **04**

Q.3 **Attempt any three.** **18**

a) Discuss the role of creativity and innovation in organizations and their impact on business performance.

b) What is the importance of empathy in Design Thinking?

c) Define leadership and explain its different types. How can effective leadership influence the success of an organization? Provide examples.

d) Explain the utilization of cognitive technology in decision-making processes.

e) Explain exemplary practices of effective leadership with relevant case studies.

Section – II

Q.4 **a)** Explain exemplary practices of effective leadership with relevant case studies. **06**

b) What is product solution fit, and how does it differ from product market fit? **04**

Q.5 **Attempt any three.** **18**

a) Define the development lifecycle and explain its significance in product development.

b) What are the benefits of implementing service design in organizations?

c) How can organizations effectively design a service to meet customer needs?

d) How does Intellectual Property (IP) play a role in product development and design thinking?

e) Explain any two successful case studies demonstrating design thinking in various engineering sectors.

Set **Q**

S. Y. (B.Tech.) (Sem-I) (New) (NEP CBCS) Examination: March/April-2025
ELECTRICAL ENGINEERING
Design Thinking: Business Innovation Framework (CIVMDM-01A)

Day & Date: Thursday 22-05-2025 Max. Marks: 70
Time: 03:00 PM To 06:00 PM

Instructions: 1) Q. No. 1 is compulsory. It should be solved in the first 30 minutes in Answer Book Page no. 03 (Starting page of the Answer Book). Each question carries one mark.
2) Don't forget to mention question paper set (P/Q/R/S) on top of page.
3) Figures to the right indicates full marks.

MCQ/Objective Type Questions

Duration: 30 Minutes Marks:14

Q.1 Choose the correct Answer. **14**

1) Which of the following is a benefit of using design thinking?
a) Reduces product variety b) Increases customer satisfaction
c) Limits team collaboration d) Eliminates risk in decision-making

2) What role does technology play in innovation management?
a) It complicates processes
b) It is irrelevant to innovation
c) It serves as a tool for enhancing efficiency and creativity
d) It replaces human input

3) Which leadership style involves making decisions based on input from team members?
a) Autocratic b) Laissez-faire
c) Democratic d) Transactional

4) What does "Product Solution Fit" refer to?
a) The alignment of the product with customer needs and problems
b) The product's price in relation to competitors
c) The marketing strategy for the product
d) The technical specifications of the product

5) Which of the following best defines "Product Market Fit"?
a) The degree to which a product meets the demands of a specific market
b) The number of products available in the market
c) The financial performance of a product
d) The product's popularity on social media

6) What is the primary goal of service design?
a) To reduce costs
b) To enhance customer experience
c) To standardize services
d) To simplify service offerings

7) Which of the following is a key principle of service design?
a) Focus on profitability over customer satisfaction
b) User-centered design
c) Minimal feedback from users
d) Rigid service processes

8) What is the primary focus of Design Thinking?
a) Maximizing shareholder
b) Developing innovative and user-centered solutions
c) Streamlining manufacturing processes
d) Enhancing employee productivity

9) Which of the following correctly lists the first three phases of the Design Thinking process?
a) Empathize, Ideate, Prototype
b) Define, Ideate, Test
c) Empathize, Define, Ideate
d) Prototype, Test, Implement

10) In the context of Design Thinking, what is "brainstorming" used for?
a) Generating a wide range of ideas
b) Testing final products
c) Developing financial models
d) Identifying user pain points

11) What does a "customer journey map" help to visualize?
a) The financial cost of product development
b) The steps a customer goes through while interacting with a product or service
c) The design specifications of a product
d) The competitive landscape of a market

12) Which tool in Design Thinking helps in understanding the target user's needs and behaviors?
a) Prototype
b) Persona
c) SWOT analysis
d) Business model canvas

13) What is the final phase in the Design Thinking process?
a) Test
b) Implement
c) Prototype
d) Ideate

14) Which of the following is NOT an objective of design thinking?

a) To create user-friendly products
b) To streamline manufacturing processes
c) To encourage iterative prototyping
d) To enhance collaboration among teams

MCQ/Objective Type Questions

Duration: 30 Minutes Marks:14

Q.1 Choose the correct alternative from the given options. 14

1) What does GIS integrate spatial data with?
a) Other data resources b) Only tabular data
c) Only hard copy maps d) Only digital maps

2) What is the purpose of GIS software?
a) Data management and analysis
b) Creating physical maps
c) Collecting data only
d) Storing non-spatial data

3) Which of the following is a key function of an information system?
a) Data storage only
b) Data collection and processing
c) Document shredding
d) Manual calculations

4) Statistical data in GIS is primarily used for _____.
a) Data visualization b) Data analysis and interpretation
c) Data storage d) Data collection

5) Satellite data is most commonly used in GIS for _____.
a) Remote sensing b) Data entry
c) Statistical analysis d) Map digitization

6) A zone with a width created around a spatial feature is called as ____.
a) dissolve b) buffer
c) relation d) overlay

7) Network databases is to support relationships of _____.
a) many to many b) one to many
c) none of above d) all of above

8) The sensitivity of a sensor to detect slight differences in energy (brightness) is _____.
a) Spectral resolution b) Spatial resolution
c) Temporal resolution d) Radiometric resolution

9) Descriptive information provides qualitative data about the characteristics and conditions of Earth's surface features _____.
a) qualitative b) quantitative
c) both d) none

10) The instruments which provide electromagnetic radiation of specified wave length or a band of wave lengths to illuminate the earth surface, are called _____.
a) scanner b) passive sensors
c) active sensors d) none of these

11) Canal site selection using GIS is primarily concerned with _____.
a) Mapping the soil composition along the canal route
b) Studying land use in the surrounding areas
c) Identifying areas with the most water flow potential
d) Both a and c

12) What is the primary application of GIS in map revision?
a) To create new maps from scratch
b) To update and modify existing maps with current data
c) To design and print physical maps
d) To analyze spatial data for new projects

13) Which phase of GIS project planning involves the most detailed work on defining technical requirements and hardware/software needs?
a) feasibility study
b) planning and requirements analysis
c) design phase
d) testing phase

14) Which of the following is an example of a GIS design project task?
a) data model development
b) stakeholder consultation
c) site analysis and requirement definition
d) all of these

2) Figures to the right indicate full marks.
3) Draw neat sketch whenever necessary.

Section - I

Q.2 Attempt any four from the following. **16**
a) Describe commercial & open source GIS softwares.
b) Describe in detail data organisation method-layered based approach.
c) Describe field data & its collection methods.
d) Discuss advantages & disadvantages of aerial photographs.
e) Describe in detail run-length encoding.
f) Describe in detail about data analysis.

Q.3 Attempt any two from the following. **12**
a) Describe in detail digitizers, its process, advantages & disadvantages.
b) Describe the organisation of data in GIS.
c) Explain various data models used in DBMS in detail.

Section - II

Q.4 Attempt any four from the following. **16**
a) Explain in detail passive & active remote sensing with sketch.
b) Describe in detail metric information.
c) Describe application of GIS in dam site selection.
d) Describe application of GIS in soil erosion.
e) Explain in detail phases of planning & implementation.
f) Describe characteristics of advanced GIS projects.

Q.5 Attempt any two from the following. **12**
a) Describe need of integration of remote sensing & GIS in detail.
b) Describe key application of GIS in map revision.
c) Describe benefits of GIS implementation plan.

ELECTRICAL ENGINEERING
Introduction to Geographic Information System (CIVMDM-01B)

Day & Date: Thursday, 22-05-2025 Max. Marks: 56
Time: 03:00 PM To 06:00 PM

Instructions: 1) All questions are compulsory.
2) Figures to the right indicate full marks.
3) Draw neat sketch whenever necessary.

Section - I

Q.2 Attempt any four from the following. **16**

a) Describe commercial & open source GIS softwares.
b) Describe in detail data organisation method-layered based approach.
c) Describe field data & its collection methods.
d) Discuss advantages & disadvantages of aerial photographs.
e) Describe in detail run-length encoding.
f) Describe in detail about data analysis.

Q.3 Attempt any two from the following. **12**

a) Describe in detail digitizers, its process, advantages & disadvantages.
b) Describe the organisation of data in GIS.
c) Explain various data models used in DBMS in detail.

Section - II

Q.4 Attempt any four from the following. **16**

a) Explain in detail passive & active remote sensing with sketch.
b) Describe in detail metric information.
c) Describe application of GIS in dam site selection.
d) Describe application of GIS in soil erosion.
e) Explain in detail phases of planning & implementation.
f) Describe characteristics of advanced GIS projects.

Q.5 Attempt any two from the following. **12**

a) Describe need of integration of remote sensing & GIS in detail.
b) Describe key application of GIS in map revision.
c) Describe benefits of GIS implementation plan.

S. Y (B. Tech) (Sem-I) (New) (NEP CBCS) Examination: March/April-2025
ELECTRICAL ENGINEERING
Introduction to Geographic Information System (CIVMDM-01B)

Day & Date: Thursday, 22-05-2025 Max. Marks: 70
Time: 03:00 PM To 06:00 PM

Instructions: 1) Q. No. 1 is compulsory. It should be solved in the first 30 minutes in Answer Book Page no 03 (Starting page of the Answer Book). Each question carries one mark.
2) Don't forget to Mention question paper set (P/Q/R/S) on top of page.
3) Figures to the right indicates full marks.

MCQ/Objective Type Questions

Duration: 30 Minutes Marks:14

Q.1 Choose the correct alternative from the given options. 14

1) A zone with a width created around a spatial feature is called as ____.
a) dissolve b) buffer
c) relation d) overlay

2) Network databases is to support relationships of _____.
a) many to many b) one to many
c) none of above d) all of above

3) The sensitivity of a sensor to detect slight differences in energy (brightness) is _____.
a) Spectral resolution b) Spatial resolution
c) Temporal resolution d) Radiometric resolution

4) Descriptive information provides qualitative data about the characteristics and conditions of Earth's surface features _____.
a) qualitative b) quantitative
c) both d) none

5) The instruments which provide electromagnetic radiation of specified wave length or a band of wave lengths to illuminate the earth surface, are called _____.
a) scanner b) passive sensors
c) active sensors d) none of these

6) Canal site selection using GIS is primarily concerned with _____.
a) Mapping the soil composition along the canal route
b) Studying land use in the surrounding areas
c) Identifying areas with the most water flow potential
d) Both a and c

7) What is the primary application of GIS in map revision?
a) To create new maps from scratch
b) To update and modify existing maps with current data
c) To design and print physical maps
d) To analyze spatial data for new projects

8) Which phase of GIS project planning involves the most detailed work on defining technical requirements and hardware/software needs?
a) feasibility study
b) planning and requirements analysis
c) design phase
d) testing phase

9) Which of the following is an example of a GIS design project task?
a) data model development
b) stakeholder consultation
c) site analysis and requirement definition
d) all of these

10) What does GIS integrate spatial data with?
a) Other data resources
b) Only tabular data
c) Only hard copy maps
d) Only digital maps

11) What is the purpose of GIS software?
a) Data management and analysis
b) Creating physical maps
c) Collecting data only
d) Storing non-spatial data

12) Which of the following is a key function of an information system?
a) Data storage only
b) Data collection and processing
c) Document shredding
d) Manual calculations

13) Statistical data in GIS is primarily used for _____.
a) Data visualization
b) Data analysis and interpretation
c) Data storage
d) Data collection

14) Satellite data is most commonly used in GIS for _____.
a) Remote sensing
b) Data entry
c) Statistical analysis
d) Map digitization

ELECTRICAL ENGINEERING
Fundamentals of Material science and Engineering (MECHMDM-01A)

Day & Date: Thursday 22-05-2025 Max. Marks: 70
Time: 03:00 PM To 06:00 PM

Instructions: 1) Q. No. 1 is compulsory. It should be solved in the first 30 minutes in Answer Book Page no 03 (Starting page of the Answer Book). Each question carries one mark.
2) Don't forget to Mention question paper set (P/Q/R/S) on top of page.
3) Figures to the right indicates full marks.
4) Make suitable assumptions if necessary and state them clearly.

MCQ/Objective Type Questions

Duration: 30 Minutes Marks:14

Q.1 Choose the correct Answer. **14**

1) Which of the following is not a primary classification of engineering materials?
a) Metals b) Ceramics
c) Gases d) Polymers

2) Which property is most associated with metals?
a) High electrical conductivity b) High brittleness
c) Low melting point d) Low density

3) The Gibbs phase rule is given by:
a) $P + F = C - 1$ b) $P + F = C + 1$
c) $F = C - P + 2$ d) $F = C + P - 2$

4) Non-ferrous metals are primarily used for their:
a) High strength
b) High corrosion resistance and low density
c) Magnetic properties
d) Low melting point

5) In the eutectic transformation, liquid transforms into:
a) One solid phase b) Two solid phases
c) One liquid and one solid phase d) Three solid phases

6) Which of the following is a characteristic of brass alloy?
a) Primarily composed of copper and tin
b) Primarily composed of copper and zinc
c) Primarily composed, of copper and aluminum
d) Primarily composed of copper ana nickel

7) Bronze alloys are primarily composed of copper and:
a) Zinc b) Aluminum
c) Nickel d) Tin

8) Which of the following is an example of a thermoplastic polymer?
a) Bakelite b) Epoxy resin
c) Polystyrene d) Rubber

9) The ability of a polymer to return to its original shape after deformation is known as:
a) Ductility b) Elasticity
c) Malleability d) Toughness

10) Which of the following properties is enhanced by vulcanization of rubber?
a) High flexibility
b) Increased strength and resistance to wear
c) Decreased thermal stability
d) Decreased electrical resistance

11) Which of the following is NOT a characteristic of ceramic materials?
a) High melting points b) High electrical conductivity
c) Brittle nature d) Good wear resistance

12) Advanced ceramics are typically characterized by:
a) High ductility
b) Low strength
c) High thermal and electrical conductivity
d) High performance at high temperatures

13) Composite materials are widely used in the aerospace industry because they:
a) Are cost-effective and easily available
b) Provide high strength-to-weight ratio
c) Have low thermal resistance
d) Are magnetic in nature

14) Nanomaterials are commonly used in which of the following fields?
a) Drug delivery systems
b) Large-scale structural applications
c) Agricultural machinery
d) Waste disposal

MCQ/Objective Type Questions

Duration: 30 Minutes Marks:14

Q.1 Choose the correct Answer. **14**

1) What is the primary purpose of management?
a) To maximize profits
b) To achieve organizational goals efficiently
c) To manage resources effectively
d) To implement policies

2) Which approach emphasizes the interdependence of various organizational functions?
a) Classical Approach b) Systems Approach
c) Behavioral Approach d) Contingency Approach

3) What is NOT a function of managers?
a) Planning b) Organizing
c) Playing d) Controlling

4) Which of the following is a responsibility of managers regarding social responsibility?
a) Maximizing shareholder wealth
b) Ensuring employee satisfaction
c) Contributing to community welfare
d) Minimizing costs

5) What is the first step in the planning process?
a) Developing alternatives b) Setting objectives
c) Implementing plans d) Evaluating results

6) Which type of plan is designed to cover a short period?
a) Strategic Plan b) Tactical Plan
c) Operational Plan d) Contingency Plan

7) Which of the following is a part of the staffing function?
a) Budgeting b) Training
c) Planning d) Controlling

8) Which theory focuses on the hierarchy of needs to motivate employees?
a) Herzberg's Two-Factor Theory
b) McGregor's Theory X and Y
c) Maslow's Hierarchy of Needs
d) Adams' Equity Theory

9) What is the main purpose of controlling in management?
a) To set goals
b) To ensure that organizational activities are aligned with plans
c) To improve employee morale
d) To increase production

10) What type of costs includes costs associated with preventing defects?
a) Internal failure costs b) External failure costs
c) Appraisal costs d) Prevention costs

11) Which quality guru is known for his work in the field of quality improvement through statistical methods?
a) Philip Crosby b) W. Edwards Deming
c) Joseph Juran d) Kaoru Ishikawa

12) Which chart is used to monitor the mean of a process over time?
a) R-chart b) P-chart
c) C-chart d) X-bar chart

13) Acceptance sampling is primarily concerned with:
a) Evaluating the entire production process
b) Inspecting all items produced
c) Testing a sample to infer about the quality of the entire lot
d) Conducting customer satisfaction surveys

14) What is the primary goal of employee involvement in TQM?
a) To increase profits
b) To enhance product quality through teamwork and engagement
c) To reduce the number of employees
d) To focus solely on production output

ELECTRICAL ENGINEERING
Industrial Management (MECHMDM-01B)

Day & Date: Thursday 22-05-2025 Max. Marks: 56
Time: 03:00 PM To 06:00 PM

Instructions: 1) In Section – I, Q. No. 3 is compulsory and attempt any two questions from the remaining questions.
1) In Section – II, Q. No. 6 is compulsory and attempt any two questions from the remaining questions.
2) Figures to the right indicate full marks.
3) Make suitable assumptions if necessary and state them clearly.
4) Draw neat-labelled diagrams wherever necessary.
5) Use of log table and calculators is allowed.

Section – I

Q.2 **a)** What are managerial skills and managerial roles? **05**
b) Explain the Social responsibilities and ethics in management. **04**

Q.3 **a)** What is planning? Explain advantages and disadvantages of planning? **05**
b) What are the types of organizations? Explain Problems with organizational level. **05**

Q.4 **a)** Define Leadership. Explain four extreme styles. **05**
b) Discuss types of communication by taking suitable example. **04**

Q.5 **Write short note on any three.** **09**
a) Channel of distribution
b) Functions of Managers
c) Methods of Departmentation
d) Explain Maslow's theory
e) Decision making

Section – II

Q.6 **a)** Define productivity. How does material management impact the productivity of a manufacturing unit? **05**
b) Explain how the production process is planned and controlled in batch production systems. **05**

Q.7	**a)**	Describe the importance of supplier partnerships in Total Quality Management. What are the key aspects that define a successful supplier partnership?	**05**
	b)	Explain the concept of employee involvement in TQM. How does fostering employee participation contribute to improved quality and productivity?	**04**
Q.8	**a)**	Explain the importance of Training and Development in enhancing employee performance. How can training programs be aligned with organizational goals?	**05**
	b)	What are the objectives of Human Resource Management (HRM)? Discuss how HRM helps in managing employee relations and improving organizational efficiency.	**04**

Q.9 Write short note on any three. **09**

- **a)** Material Requirement Planning (MRP)
- **b)** Batch Production
- **c)** Factors to improve productivity
- **d)** Functions of Production Planning and Control (PPC)
- **e)** Mass Production - Advantages and Disadvantages

Seat No.	

Set **Q**

S.Y. (B.Tech.) (Sem-I) (New) (NEP CBCS) Examination: March/April-2025
ELECTRICAL ENGINEERING
Industrial Management (MECHMDM-01B)

Day & Date: Thursday 22-05-2025 Max. Marks: 70
Time: 03:00 PM To 06:00 PM

Instructions: 1) Q. No. 1 is compulsory. It should be solved in the first 30 minutes in Answer Book Page no 03 (Starting page of the Answer Book). Each question carries one mark.
2) Don't forget to Mention question paper set (P/Q/R/S) on top of page.
3) Figures to the right indicates full marks.
4) Make suitable assumptions if necessary and state them clearly.

MCQ/Objective Type Questions

Duration: 30 Minutes Marks:14

Q.1 Choose the correct Answer. 14

1) Which theory focuses on the hierarchy of needs to motivate employees?
a) Herzberg's Two-Factor Theory
b) McGregor's Theory X and Y
c) Maslow's Hierarchy of Needs
d) Adams' Equity Theory

2) What is the main purpose of controlling in management?
a) To set goals
b) To ensure that organizational activities are aligned with plans
c) To improve employee morale
d) To increase production

3) What type of costs includes costs associated with preventing defects?
a) Internal failure costs b) External failure costs
c) Appraisal costs d) Prevention costs

4) Which quality guru is known for his work in the field of quality improvement through statistical methods?
a) Philip Crosby b) W. Edwards Deming
c) Joseph Juran d) Kaoru Ishikawa

5) Which chart is used to monitor the mean of a process over time?
a) R-chart b) P-chart
c) C-chart d) X-bar chart

6) Acceptance sampling is primarily concerned with:
a) Evaluating the entire production process
b) Inspecting all items produced
c) Testing a sample to infer about the quality of the entire lot
d) Conducting customer satisfaction surveys

7) What is the primary goal of employee involvement in TQM?
a) To increase profits
b) To enhance product quality through teamwork and engagement
c) To reduce the number of employees
d) To focus solely on production output

8) What is the primary purpose of management?
a) To maximize profits
b) To achieve organizational goals efficiently
c) To manage resources effectively
d) To implement policies

9) Which approach emphasizes the interdependence of various organizational functions?
a) Classical Approach b) Systems Approach
c) Behavioral Approach d) Contingency Approach

10) What is NOT a function of managers?
a) Planning b) Organizing
c) Playing d) Controlling

11) Which of the following is a responsibility of managers regarding social responsibility?
a) Maximizing shareholder wealth
b) Ensuring employee satisfaction
c) Contributing to community welfare
d) Minimizing costs

12) What is the first step in the planning process?
a) Developing alternatives b) Setting objectives
c) Implementing plans d) Evaluating results

13) Which type of plan is designed to cover a short period?
a) Strategic Plan b) Tactical Plan
c) Operational Plan d) Contingency Plan

14) Which of the following is a part of the staffing function?
a) Budgeting b) Training
c) Planning d) Controlling

Time: 03:00 PM To 06:00 PM

Instructions: 1) Q. No. 1 is compulsory. It should be solved in the first 30 minutes in Answer Book Page no 03 (Starting page of the Answer Book). Each question carries one mark.
2) Don't forget to Mention question paper set (P/Q/R/S) on top of page.
3) Figures to the right indicates full marks.

MCQ/Objective Type Questions

Duration: 30 Minutes Marks:14

Q.1 Choose the correct Answer. **14**

1) The terms in SOP are called _____.
a) max terms b) min terms
c) mid terms d) sum terms

2) The number of cells in a K-map with n- variables.
a) 2n b) n^2
c) 2^n d) n

3) The logical sum of two or more logical product terms is called _____.
a) SOP b) POS
c) OR operation d) NAND operation

4) A Karnaugh map (K-map) is an abstract form of _____ diagram organized as a matrix of squares.
a) Venn Diagram b) Cycle Diagram
c) Block diagram d) Triangular Diagram

5) If A and B are the inputs of a half adder, the sum is given by _____.
a) A AND B b) A OR B
c) A XOR B d) A EX-NOR B

6) Let A and B is the input of a Subtractor, then the output will be _____.
a) A XOR B b) A AND B
c) A OR B d) A EX-NOR B

7) What is a multiplexer?
a) It is a type of decoder which decodes several inputs and gives one output
b) A multiplexer is a device which converts many signals into one
c) It takes one input and results into many output
d) It is a type of encoder which decodes several inputs and gives one output

8) A basic S-R flip-flop can be constructed by cross-coupling of which basic logic gates?
a) AND or OR gates
b) XOR or XNOR gates
c) NOR or NAND gates
d) AND or NOR gates

9) In S-R flip-flop, if Q = 0 the output is said to be _____.
a) Set
b) Reset
c) Previous state
d) Current state

10) A D-Flip flop is said to be transparent, when _____.
a) the output is Low
b) the output is High
c) the output follows clock
d) the output follows input

11) How many stable state/states present in flip-flop?
a) 1
b) 0
c) 2
d) 4

12) How many natural states will there be in a 4-bit ripple counter?
a) 4
b) 8
c) 16
d) 32

13) How many flip-flops are required to construct a decade counter?
a) 4
b) 8
c) 5
d) 10

14) A 4-bit counter has a maximum modulus of _____.
a) 3
b) 6
c) 8
d) 16

ELECTRICAL ENGINEERING
Digital Techniques (ENTMDM-01A)

Day & Date: Thursday 22-05-2025 Max. Marks: 56
Time: 03:00 PM To 06:00 PM

Instructions: 1) All questions are compulsory.
2) Figures to the right indicate full marks.

Section – I

Q.2 Attempt any Four. **16**

a) Explain Standard representation of logic function.
b) Express Boolean function $F = xy + x'z$ as a product of Max-terms.
c) Explain Half Adder with logic diagram.
d) Explain 1:4 De-Multiplexer with truth Table and logic diagram.
e) Explain stepwise procedure for K-map solution.

Q.3 Attempt any two. **12**

a) Explain Binary to Gray conversion in details.
b) Explain Full Adder with suitable diagram
c) Solve using K Map -

$$F\ (A, B, C, D)\ = \sum (0, 2, 5, 7, 8, 10, 13, 15)$$

Section – II

Q.4 Attempt any Four. **16**

a) Explain basic SR Flip-flop using logic gates.
b) Explain D-Flip-Flop with suitable diagram.
c) Differentiate between Synchronous and Asynchronous sequential circuit.
d) Explain PISO shift register.
e) Explain Race-Round condition. How this condition will overcome?

Q.5 Attempt any two. **12**

a) Design MOD-10 Counter.
b) Explain JK Flip flop with suitable diagram, and truth table.
c) Explain 4-bit UP/DOWN counter with suitable diagram.

1) How many stable state/states present in flip-flop?
a) 1 b) 0
c) 2 d) 4

2) How many natural states will there be in a 4-bit ripple counter?
a) 4 b) 8
c) 16 d) 32

3) How many flip-flops are required to construct a decade counter?
a) 4 b) 8
c) 5 d) 10

4) A 4-bit counter has a maximum modulus of _____.
a) 3 b) 6
c) 8 d) 16

5) The terms in SOP are called _____.
a) max terms b) min terms
c) mid terms d) sum terms

6) The number of cells in a K-map with n- variables.
a) 2n b) n^2
c) 2^n d) n

7) The logical sum of two or more logical product terms is called _____.
a) SOP b) POS
c) OR operation d) NAND operation

8) A Karnaugh map (K-map) is an abstract form of _____ diagram organized as a matrix of squares.

a) Venn Diagram b) Cycle Diagram
c) Block diagram d) Triangular Diagram

9) If A and B are the inputs of a half adder, the sum is given by _____.

a) A AND B b) A OR B
c) A XOR B d) A EX-NOR B

10) Let A and B is the input of a Subtractor, then the output will be _____.

a) A XOR B b) A AND B
c) A OR B d) A EX-NOR B

11) What is a multiplexer?

a) It is a type of decoder which decodes several inputs and gives one output
b) A multiplexer is a device which converts many signals into one
c) It takes one input and results into many output
d) It is a type of encoder which decodes several inputs and gives one output

12) A basic S-R flip-flop can be constructed by cross-coupling of which basic logic gates?

a) AND or OR gates b) XOR or XNOR gates
c) NOR or NAND gates d) AND or NOR gates

13) In S-R flip-flop, if Q = 0 the output is said to be _____.

a) Set b) Reset
c) Previous state d) Current state

14) A D-Flip flop is said to be transparent, when _____.

a) the output is Low b) the output is High
c) the output follows clock d) the output follows input

S.Y. (B. Tech) (Sem-I) (NEP New) (CBCS) Examination: March/April-2025
ELECTRICAL ENGINEERING
Digital Techniques (ENTMDM-01A)

Day & Date: Thursday 22-05-2025 Max. Marks: 56
Time: 03:00 PM To 06:00 PM

Instructions: 1) All questions are compulsory.
2) Figures to the right indicate full marks.

Section – I

Q.2 Attempt any Four. **16**

a) Explain Standard representation of logic function.
b) Express Boolean function $F = xy + x'z$ as a product of Max-terms.
c) Explain Half Adder with logic diagram.
d) Explain 1:4 De-Multiplexer with truth Table and logic diagram.
e) Explain stepwise procedure for K-map solution.

Q.3 Attempt any two. **12**

a) Explain Binary to Gray conversion in details.
b) Explain Full Adder with suitable diagram
c) Solve using K Map -

$$F\ (A, B, C, D)\ = \sum (0, 2, 5, 7, 8, 10, 13, 15)$$

Section – II

Q.4 Attempt any Four. **16**

a) Explain basic SR Flip-flop using logic gates.
b) Explain D-Flip-Flop with suitable diagram.
c) Differentiate between Synchronous and Asynchronous sequential circuit.
d) Explain PISO shift register.
e) Explain Race-Round condition. How this condition will overcome?

Q.5 Attempt any two. **12**

a) Design MOD-10 Counter.
b) Explain JK Flip flop with suitable diagram, and truth table.
c) Explain 4-bit UP/DOWN counter with suitable diagram.

Seat No.		Set	S

S.Y. (B. Tech) (Sem-I) (NEP New) (CBCS) Examination: March/April-2025
ELECTRICAL ENGINEERING
Digital Techniques (ENTMDM-01A)

Day & Date: Thursday 22-05-2025 Max. Marks: 70
Time: 03:00 PM To 06:00 PM

Instructions: 1) Q. No. 1 is compulsory. It should be solved in the first 30 minutes in Answer Book Page no 03 (Starting page of the Answer Book). Each question carries one mark.
2) Don't forget to Mention question paper set (P/Q/R/S) on top of page.
3) Figures to the right indicates full marks.

MCQ/Objective Type Questions

Duration: 30 Minutes Marks:14

Q.1 Choose the correct Answer. 14

1) Let A and B is the input of a Subtractor, then the output will be _____.
a) A XOR B b) A AND B
c) A OR B d) A EX-NOR B

2) What is a multiplexer?
a) It is a type of decoder which decodes several inputs and gives one output
b) A multiplexer is a device which converts many signals into one
c) It takes one input and results into many output
d) It is a type of encoder which decodes several inputs and gives one output

3) A basic S-R flip-flop can be constructed by cross-coupling of which basic logic gates?
a) AND or OR gates b) XOR or XNOR gates
c) NOR or NAND gates d) AND or NOR gates

4) In S-R flip-flop, if Q = 0 the output is said to be _____.
a) Set b) Reset
c) Previous state d) Current state

5) A D-Flip flop is said to be transparent, when _____.
a) the output is Low b) the output is High
c) the output follows clock d) the output follows input

6) How many stable state/states present in flip-flop?
a) 1 b) 0
c) 2 d) 4

7) How many natural states will there be in a 4-bit ripple counter?
a) 4 b) 8
c) 16 d) 32

8) How many flip-flops are required to construct a decade counter?
a) 4 b) 8
c) 5 d) 10

9) A 4-bit counter has a maximum modulus of _____.
a) 3 b) 6
c) 8 d) 16

10) The terms in SOP are called _____.
a) max terms b) min terms
c) mid terms d) sum terms

11) The number of cells in a K-map with n- variables.
a) 2n b) n^2
c) 2^n d) n

12) The logical sum of two or more logical product terms is called _____.
a) SOP b) POS
c) OR operation d) NAND operation

13) A Karnaugh map (K-map) is an abstract form of _____ diagram organized as a matrix of squares.
a) Venn Diagram b) Cycle Diagram
c) Block diagram d) Triangular Diagram

14) If A and B are the inputs of a half adder, the sum is given by _____.

MCQ/Objective Type Questions

Duration: 30 Minutes Marks:14

Q.1 Choose the correct Answer. **14**

1) Thermocouple generate output voltage according to _____.
a) Circuit parameters b) Humidity
c) Temperature d) Voltage

2) Sensor is a type of transducer.
a) True b) False

3) Which factor affects the least while selection of sensor?
a) Size b) Accuracy
c) Colour d) Durability

4) Which sensor should one prefer for accurate measurement of distance upto 1 meter?
a) Ultrasonic sensor b) Infrared sensor
c) PIR sensor d) Photoresistor sensor

5) IR sensors can't work in dark environment.
a) True b) False

6) Which sensor should be used for calculating humidity?
a) DHT11 b) LM335Z/NOPB
c) HC-SR04 d) MPX10DP

7) What is the primary purpose of a strain gauge?
a) Measure temperature
b) Measure pressure
c) Measure deformation or strain
d) Measure voltage

8) What is a Wheatstone bridge used for in the context of strain gauges?
a) To amplify the signal
b) To convert mechanical strain to a voltage output
c) To filter noise from the signal
d) To measure temperature

9) Signal conditioning is carried out in _____.
a) Transducer housing b) Processor
c) Network interface d) None of the mentioned

10) What principle does a thermocouple operate on?
a) Seebeck effect b) Peltier effect
c) Joule heating d) Hall effect

11) Which material is most commonly used in RTDs for temperature sensing?
a) Copper b) Aluminum
c) Platinum d) Nickel

12) What is the typical temperature range for standard RTDs?
a) -200 to 500 °C b) -50 to 200 °C
c) 0 to 100 °C d) -100 to 1000 °C

13) What type of electrode is commonly used in a pHsensor?
a) Reference electrode b) Glass electrode
c) Metal electrode d) Carbon electrode

14) What is the output of atypical pHsensor?
a) Voltage b) Resistance
c) Current d) Frequency

Section – I

Q.2 Attempt any Four. **16**

a) Define Motion Transducer. Explain different types of motion sensor with example.
b) Write a short note on sensor selection.
c) Define Sensor & Transducer. How do they differ from each other?
d) What is Calibration? With the help of block diagram explain procedure of calibration.
e) Explain concept of strain gauge & light intensity.
f) Describe concept of motion transducer in detail.

Q.3 Attempt any two. **12**

a) Discuss the classification of sensor based on Measurand. Provide the example of each type and their application.
b) State the working principle of LDR. Explain the construction & working of it. Also state advantages, disadvantages & application of it.
c) Write a note on:-
1) Temperature sensing
2) Light Intensity
3) Strain gauge
4) Magnetic field Sensor

Section – II

Q.4 Attempt any Four. **16**

a) With the help of neat sketch explain concept of LVDT.
b) Illustrate concept of ultrasonic sensor & Chemical sensor in detail
c) With the help of explain RTD.
d) With the help of neat sketch explain concept of RVDT.
e) Describe the concept of motion transducer.

Q.5 Attempt any two. **12**

a) With the help of neat sketch explain concept of AC Tachometer & DC Tachometer.

b) Define following concepts:

1) Humidity Sensor
2) Vibration Sensor
3) Gas Sensor

c) With the help of neat sketch explain Thermocouple & Thermistor.

MCQ/Objective Type Questions

Duration: 30 Minutes Marks:14

Q.1 Choose the correct Answer. **14**

1) What is the output of print(3 * 4.5 // 2)?
a) 5 b) 6
c) 7 d) 8

2) Which data type is mutable in Python?
a) int b) float
c) tuple d) list

3) What is the primary purpose of the Python interpreter?
a) To convert Python code into machine code directly.
b) To compile Python code into a .exe file.
c) To interpret and execute Python code line by line.
d) To optimize Python code for faster execution.

4) How do you import a function myfunc from a module mymodule?
a) import mymodule .myfunc
b) from mymodule import myfunc
c) import myfunc from mymodule
d) from myfunc import mymodule

5) Which statement about tuples in Python is true?
a) Tuples can be modified after creation.
b) Tuples are indexed starting from 1.
c) Tuples use square brackets for element access.
d) Tuples are immutable.

6) Given s = 'Hello World!', what does s[1:5] evaluate to?
a) 'Hell' b) 'ello'
c) 'ello ' d) None of the above

7) Which keyword is used to handle exceptions in Python?

a) catch b) except
c) handle d) recover

8) What does the self parameter represent in Python class methods?

a) It refers to the current instance of the class.
b) It is used to denote private attributes.
c) It is used for method overloading.
d) It refers to the superclass.

9) What does the following code output?

```
class MyClass:
    def greet(self):
    return "Hello!"
obj = MyClass()
print(obj.greet())
```

a) Hello! b) greet
c) Error d) None

10) How do you open a file myfile.txt in read mode in Python?

a) file = open('myfile.txt', 'r')
b) file = open('myfile.txf)
c) file = open('myfile.txt', mode='read')
d) file = open('myfile.txt', mode='w')

11) Which Python library is used for numerical operations and array manipulations?

a) numpy b) math
c) scipy d) statistics

12) Which Python module is commonly used for writing unit tests?

a) unittest b) pytest
c) testing d) check

13) Which module is used to generate pseudo-random numbers in Python?

a) random b) numpy
c) math d) os

14) What is the default logging level in Python?

a) DEBUG b) INFO
c) WARNING d) ERROR

Set **P**

S.Y. (B.Tech.) (Sem-I) (NEP New) (CBCS) Examination: March/April-2025
ELECTRICAL ENGINEERING
Programming basics using Python (CSEMDM-01A)

Day & Date: Thursday 22-05-2025 Max. Marks: 56
Time: 03:00 PM To 06:00 PM

Instructions: 1) All questions are compulsory.
2) Figures to the right indicate full marks.

Section – I

Q.2 Attempt any Four. **16**

a) What is python interpreter? Explain with neat diagram.
b) Differentiate between list and tuples in python.
c) Write a python program to check whether a given string is palindrome.
d) What are the class and objects in python? Explain with syntax and example.
e) What is exceptional handling in python? How it is implemented using try, except and finally block?

Q.3 Attempt any two. **12**

a) Illustrate following control structures and write syntax for each type of control structure.
1) Decision making statements
2) Iterative statements (Loop control statements)
3) Transfer statements
b) Explain string handling functions with syntax and example.
c) Explain inheritance in python with their types.

Section – II

Q.4 Attempt any Four. **16**

a) Explain basic date and time types with syntax and example.
b) Differentiate between shallow copy and deep copy operations.
c) Write a python program to create a 2D Numpy array and perform basic operations like addition, subtraction, division and multiplication.
d) Implement a program to measure execution time of small code snippets.
e) Explain Logging facility in python with all levels of logging.

Q.5 Attempt any two. **12**

a) Explain mathematical functions and pseudo random functions with syntax and example.
b) Define data persistence and implement program for read & write operations on .csv file.
c) Explain the methods of testing and debugging in python. Explain unit test in python.

Set **Q**

S.Y. (B.Tech.) (Sem-I) (NEP New) (CBCS) Examination: March/April-2025
ELECTRICAL ENGINEERING
Programming basics using Python (CSEMDM-01A)

Day & Date: Thursday 22-05-2025 Max. Marks: 70
Time: 03:00 PM To 06:00 PM

Instructions: 1) Q. No. 1 is compulsory. It should be solved in the first 30 minutes in Answer Book Page no 03 (Starting page of the Answer Book). Each question carries one mark.
2) Don't forget to Mention question paper set (P/Q/R/S) on top of page.
3) Figures to the right indicates full marks.

MCQ/Objective Type Questions

Duration: 30 Minutes Marks:14

Q.1 Choose the correct Answer. **14**

1) What does the self parameter represent in Python class methods?
a) It refers to the current instance of the class.
b) It is used to denote private attributes.
c) It is used for method overloading.
d) It refers to the superclass.

2) What does the following code output?

```
class MyClass:
    def greet(self):
    return "Hello!"
obj = MyClass()
print(obj.greet())
```

a) Hello! b) greet
c) Error d) None

3) How do you open a file myfile.txt in read mode in Python?
a) file = open('myfile.txt', 'r')
b) file = open('myfile.txf)
c) file = open('myfile.txt', mode='read')
d) file = open('myfile.txt', mode='w')

4) Which Python library is used for numerical operations and array manipulations?
a) numpy b) math
c) scipy d) statistics

5) Which Python module is commonly used for writing unit tests?
a) unittest b) pytest
c) testing d) check

6) Which module is used to generate pseudo-random numbers in Python?

a) random b) numpy
c) math d) os

7) What is the default logging level in Python?

a) DEBUG b) INFO
c) WARNING d) ERROR

8) What is the output of print(3 * 4.5 // 2)?

a) 5 b) 6
c) 7 d) 8

9) Which data type is mutable in Python?

a) int b) float
c) tuple d) list

10) What is the primary purpose of the Python interpreter?

a) To convert Python code into machine code directly.
b) To compile Python code into a .exe file.
c) To interpret and execute Python code line by line.
d) To optimize Python code for faster execution.

11) How do you import a function myfunc from a module mymodule?

a) import mymodule .myfunc
b) from mymodule import myfunc
c) import myfunc from mymodule
d) from myfunc import mymodule

12) Which statement about tuples in Python is true?

a) Tuples can be modified after creation.
b) Tuples are indexed starting from 1.
c) Tuples use square brackets for element access.
d) Tuples are immutable.

13) Given s = 'Hello World!', what does s[1:5] evaluate to?

a) 'Hell' b) 'ello'
c) 'ello ' d) None of the above

4) Assume suitable data wherever necessary.

MCQ/Objective Type Questions

Duration: 30 Minutes Marks:14

Q.1 Choose the correct Answer. **14**

1) _____ model is good for well understood problems, short duration project, and automation of existing manual systems.
a) Waterfall b) Iterative enhancement
c) Prototyping d) Spiral

2) Software consists of ____.
a) Set of instructions + operating procedures
b) Set of programs
c) Programs + documentation + operating procedures
d) Programs + hardware manuals

3) SDLC is framework for ____
a) Requirement b) Design
c) Code & Test d) All of above

4) Black box testing is also called as ____.
a) Structural testing b) Interface testing
c) Stress testing d) Functional testing

5) A detailed project schedule is never ____.
a) fixed b) variable
c) dynamic d) static

6) What is the sequence of maturity levels in CMM framework?
a) Initial, defined, repeatable, managed, and optimizing
b) Initial, defined, repeatable, optimizing, and managed
c) Initial, repeatable, defined, managed, and optimizing
d) Initial, repeatable, defined, optimizing, and managed

7) A ____ is logically separable part of program. It is a program unit that is discrete and identifiable with respect to compiling and loading.

a) Component b) Connector
c) Module d) None of above

8) Risk Management aims to ____ and then take action to minimize their effect on project.

a) Identify cost and estimation
b) Identify risks
c) Identify plan
d) All of above

9) The output of requirement process is ____

a) Validated SRS b) Validation
c) Problem analysis d) Verification

10) White Box Testing is also called as ____.

a) Functional testing b) Structural testing
c) Stress testing d) Interface testing

11) Agile Software Development is depends on ____.

a) Incremental Development
b) Iterative Development
c) Linear Development
d) Both Incremental and Iterative Development

12) ____ is a first level of testing.

a) Unit testing b) Integration Testing
c) System Testing d) None of above

13) CMM means ____.

a) Common Maturity Model b) Cost Maturity Model
c) Capability Maturity Model d) All

6) Software consists of ____.
a) Set of instructions + operating procedures
b) Set of programs
c) Programs + documentation + operating procedures
d) Programs + hardware manuals

7) SDLC is framework for ____

a) Requirement b) Design
c) Code & Test d) All of above

8) Black box testing is also called as ____.

a) Structural testing b) Interface testing
c) Stress testing d) Functional testing

9) A detailed project schedule is never ____.

a) fixed b) variable
c) dynamic d) static

10) What is the sequence of maturity levels in CMM framework?

a) Initial, defined, repeatable, managed, and optimizing
b) Initial, defined, repeatable, optimizing, and managed
c) Initial, repeatable, defined, managed, and optimizing
d) Initial, repeatable, defined, optimizing, and managed

11) A ____ is logically separable part of program. It is a program unit that is discrete and identifiable with respect to compiling and loading.

a) Component b) Connector
c) Module d) None of above

12) Risk Management aims to ____ and then take action to minimize their effect on project.

a) Identify cost and estimation
b) Identify risks
c) Identify plan
d) All of above

13) The output of requirement process is ____

a) Validated SRS b) Validation
c) Problem analysis d) Verification

14) White Box Testing is also called as ____.

a) Functional testing b) Structural testing
c) Stress testing d) Interface testing

S. Y. (B.Tech.) (Sem-I) (New) (NEP CBCS) Examination: March/April-2025
ELECTRICAL ENGINEERING
Software Engineering (CSEMDM-01B)

Day & Date: Thursday 22-05-2025 Max. Marks: 56
Time: 03:00 PM To 06:00 PM

Instructions: 1) All questions are compulsory.
2) Figures to the right indicate full marks.
3) Assume suitable data wherever necessary.

SECTION – I

Q.2 Solve: (Any Four) **16**

a) Explain Prototype model.
b) What is SRS? Explain characteristics of SRS.
c) Explain Entity Relationship diagram in detail.
d) Write a short note on Function Oriented Design.
e) Explain characteristics of software process.

Q.3 Solve: (Any Two) **12**

a) Define DFD with all notations and levels. Draw Zero level DFD for Hotel Management System.
b) Draw and Explain waterfall model with its strength and weaknesses.
c) Write a short note on high level design & detailed design.

SECTION – II

Q.4 Solve: (Any Two) **16**

a) Compare White and Black box testing.
b) Explain equivalence partitioning technique of black box testing.
c) Explain CMM with diagram.
d) What are levels of testing? Explain Unit Testing in detail.
e) Write a short note on Agile Project Management.

Q.5 Solve: (Any Two) **12**

a) Explain top down & bottom-up effort estimation technique.
b) Explain Software Configuration Management Process.
c) What is Scrum? Explain in detail Scrum methodology.

Set **S**

S. Y. (B.Tech.) (Sem-I) (New) (NEP CBCS) Examination: March/April-2025
ELECTRICAL ENGINEERING
Software Engineering (CSEMDM-01B)

Day & Date: Thursday 22-05-2025 Max. Marks: 70
Time: 03:00 PM To 06:00 PM

Instructions: 1) Q. No. 1 is compulsory. It should be solved in the first 30 minutes in Answer Book Page no 03 (Starting page of the Answer Book). Each question carries one mark.
2) Don't forget to Mention question paper set (P/Q/R/S) on top of page.
3) Figures to the right indicates full marks.
4) Assume suitable data wherever necessary.

MCQ/Objective Type Questions

Duration: 30 Minutes Marks:14

Q.1 Choose the correct Answer. **14**

1) What is the sequence of maturity levels in CMM framework?
a) Initial, defined, repeatable, managed, and optimizing
b) Initial, defined, repeatable, optimizing, and managed
c) Initial, repeatable, defined, managed, and optimizing
d) Initial, repeatable, defined, optimizing, and managed

2) A ____ is logically separable part of program. It is a program unit that is discrete and identifiable with respect to compiling and loading.
a) Component b) Connector
c) Module d) None of above

3) Risk Management aims to ____ and then take action to minimize their effect on project.
a) Identify cost and estimation
b) Identify risks
c) Identify plan
d) All of above

4) The output of requirement process is ____
a) Validated SRS b) Validation
c) Problem analysis d) Verification

5) White Box Testing is also called as ____.
a) Functional testing b) Structural testing
c) Stress testing d) Interface testing

6) Agile Software Development is depends on ____.
a) Incremental Development
b) Iterative Development
c) Linear Development
d) Both Incremental and Iterative Development

7) ____ is a first level of testing.
a) Unit testing b) Integration Testing
c) System Testing d) None of above

8) CMM means ____.
a) Common Maturity Model b) Cost Maturity Model
c) Capability Maturity Model d) All

9) Which of the following is/are characteristics of SRS?
a) Unambiguous b) Verifiable
c) Consistent d) All of above

10) ____ model is good for well understood problems, short duration project, and automation of existing manual systems.
a) Waterfall b) Iterative enhancement
c) Prototyping d) Spiral

11) Software consists of ____.
a) Set of instructions + operating procedures
b) Set of programs
c) Programs + documentation + operating procedures
d) Programs + hardware manuals

12) SDLC is framework for ____
a) Requirement b) Design
c) Code & Test d) All of above

13) Black box testing is also called as ____.
a) Structural testing b) Interface testing
c) Stress testing d) Functional testing

S. Y. (B. Tech) (Sem-I) (New) (NEP CBCS) Examination: March/April-2025
ELECTRICAL ENGINEERING
Electric Vehicle Technology (EEHn-01A)

Day & Date: Friday, 23-05-2025 Max. Marks: 70
Time: 03:00 PM To 06:00 PM

Instructions: 1) Q. No. 1 is compulsory. It should be solved in the first 30 minutes in Answer Book Page no 03 (Starting page of the Answer Book). Each question carries one mark.
2) Don't forget to Mention question paper set (P/Q/R/S) on top of page.
3) Figures to the right indicates full marks.

MCQ/Objective Type Questions

Duration: 30 Minutes Marks:14

Q.1 Choose the correct Answer. **14**

1) Who invented the battery?
a) Alessandro Volta b) Alexander Bell
c) Alessandro Bell d) Tim Southee

2) Combination of cell is known as battery.
a) True b) False

3) Full form ICV is_____.
a) Internal combustion vehicle b) Internet combustion vehicle
c) Internally combined vehicle d) Internet combined vehicle

4) Newtons third law of motion explains the two forces namely as 'action' and 'reaction' coming into action when the two bodies are in contact with each other. These two forces _____.
a) Always act on the same body.
b) Always act on the different bodies in opposite direction.
c) Have the same magnitude and direction.
d) Acts on either body at normal to each other.

5) The SI unit of force is _____.
a) Newton meter b) Newton
c) Newton per second d) Newton per square meter

6) If the force acting on the body is zero, its momentum is _____.
a) Zero b) Constant
c) Infinite d) None of the above

7) A passengers in a moving train tosses a coin which fall the behind him, observing this statement what can you say about the motion of the train tracks.

a) Accelerated b) Retarded
c) Along circular tracks d) Uniform

8) The hybrid electric vehicle consist of _____.

a) Motor Electric 1 + Motor Electric 2
b) NGV engine + Gasoline engine
c) Internal combustion engine + Electric Motor
d) None of the above

9) The correct statement about integrated motor assist (IMA) system.

a) This system is the basis of many series-parallel hybrid vehicle.
b) This system is capable of instantaneously switching from one power source to another or combining the two.
c) Produced by Honda
d) None of the above

10) What is the challenge with electric vehicle?

a) Vehicle durability b) Cell life
c) Cost d) Both a & b

11) What type od battery is used in an electric vehicle?

a) Lithium ion b) Nickle metal hydride
c) Both a & b d) None of the above

12) The solar heater function is to convert the solar energy into _____.

a) Electrical energy b) Thermal energy
c) Radiation d) None of the above

13) All electric vehicle stations need to be hardwired and permanently mounted.

a) True b) False

14) How many mile of range per hour will the average EV get while charging on a 32 amp 240 volt, level 2 charger.

a) About 5 b) About 25
c) About 55 d) None of the above

Time: 03:00 PM To 06:00 PM

Instructions: 1) All questions are compulsory.
2) Figures to the right indicate full marks.

Section – I

Q.2 Attempt any Four questions. **16**

a) Explain the brief history of electric vehicle.
b) Explain the all law of motion with briefly.
c) Explain in details of electric vehicle configuration (any two).
d) Write note on engine rating and fuel economy.
e) Define.
1) Propulsion power
2) Speed
3) Velocity
4) Acceleration
f) Draw and explain electric motor characteristics for D.C. series and D.C. compound motor.

Q.3 Attempt any Two questions. **12**

a) What are the various electric component of electric vehicle? Explain each component in details.
b) Write a brief note on vehicle dynamics.
c) Explain electric vehicle of general configuration.

Section – II

Q.4 Attempt any Four questions. **16**

a) What is the different types of Hybrid Drive trains and explain in one of them.
b) Explain the Environmental Benefits of SPCS.
c) Explain EVs infrastructure system.
d) Explain in details of Electric vehicle Architecture power trains.
e) Explain in details of electric vehicle supply Equipment.
f) Explain the charge point side EV connector type.

Q.5 Attempt any Two questions. **12**

a) Explain in details of series hybrid Vehicle & parallel hybrid Vehicle.
b) Explain in details of Energy storage.
c) Explain the Tesla for Electric vehicle.

MCQ/Objective Type Questions

Duration: 30 Minutes Marks:14

Q.1 Choose the correct Answer. **14**

1) Heating value of coal is approximately.
a) 1000-2000 kcal / kg b) 2000-4000 kcal / kg
c) 5000-6500 kcal / kg d) 9000-10,500 kcal / kg

2) Water gas is a mixture of _____.
a) CO_2 and O_2 b) O_2 and H_2
c) H_2, N_2 and O_2 d) CO, N_2 and H_2

3) Which of the following contributes to the improvement of efficiency of Rankine cycle in a thermal power plant?
a) Reheating of steam at intermediate stage
b) Regeneration use of steam for heating boiler feed water
c) Use of high pressures
d) All of the above

4) Steam pressures usually used in thermal power plants are _____.
a) 5 kg/cm^2 to 10 kg/cm^2 b) 50 kg/cm^2 to 100 kg/cm^2
c) 110 kg/cm^2 to 170 kg/cm^2 d) 200 kg/cm^2 to 215 kg/cm^2

5) Permissible pH value of water for boilers is _____.
a) 1 b) 7
c) slightly more than 7 d) 10

6) A condenser in a thermal power plant condenses steam combing out of _____.
a) Boiler b) Super-heater
c) Economizer d) Turbine

7) In a hydro-electric plant a conduct system for taking water from the intake works to the turbine is known as _____.

a) Dam b) Reservoir
c) Penstock d) Surge tank

8) A Pelton wheel is _____.

a) inward flow impulse turbine
b) outward flow impulse turbine
c) inward flow reaction turbine
d) axial flow impulse turbine

9) In a thermal power plant cooling towers are used to _____.

a) condense low pressure steam
b) cool condensed steam
c) cool water used in condenser for condensing steam
d) cool feed water of boiler

10) Major constituent of methane gas is?

a) CO b) Methane
c) Oxygen d) Hydrogen

11) The firing order of a four cylinder engine is _____.

a) 1-2-4-3 b) 1-4-2-3
c) 1-2-3-4 d) 1-3-2-4

12) The performance of engines of different HP, RPM and sizes can be compared on the basis of _____.

a) specific fuel consumption b) compression ratio
c) clearance volume d) cylinder volume

13) In hydrothermal systems when steam, water and dissolved solids are available as source of energy, the entrained solids are removed by _____.

a) filters b) centrifugal separators
c) strainers d) none of the above

14) Tidal energy mainly makes use of _____.

a) kinetic energy of water
b) potential energy of water
c) both kinetic as well as potential energy of water
d) none of the above

Set P

S. Y. (B. Tech) (Sem-I) (New) (NEP CBCS) Examination: March/April-2025
ELECTRICAL ENGINEERING
Advanced and Sustainable Energy Sources (EEHn-01B)

Day & Date: Friday, 23-05-2025 Max. Marks: 56
Time: 03:00 PM To 06:00 PM

Instructions: 1) All questions are compulsory.
2) Figures to the right indicate full marks.

Section – I

Q.2 Attempt any Four questions. **16**

a) Write a short note on fluidized bed combustion.
b) Explain the basic characteristics of Sunlight.
c) Discuss the advantages and disadvantages of breeder reactor.
d) Describe the water hammer.
e) Show the P-V, H-S and T-S diagram for Rankine Cycle.

Q.3 Attempt any Two questions. **12**

a) Explain with neat sketch diesel engine power plant.
b) Name the Components of Gas Turbine Power plants.
c) Explain with a neat sketch the working of a thermal electric power plant station and discuss the function of major components in it.

Section – II

Q.4 Attempt any Four questions. **16**

a) Explain the design of biomass power generation.
b) With neat sketches explain briefly the Tidal power plant.
c) Explain with a neat diagram of wind electric generating power plant.
d) Describe the significance of two-part tariff and three-part tariff.
e) Explain the term depreciation and discuss various methods of calculating the depreciation of an electrical plant.

Q.5 Attempt any Two Questions. **12**

a) Write short note turbo Electric Nano generators.
b) Explain the waste disposal options for Coal Power Plant.
c) Generalize the merits and demerits site selection of power plant.

Seat No.	

Set **Q**

S. Y. (B. Tech) (Sem-I) (New) (NEP CBCS) Examination: March/April-2025
ELECTRICAL ENGINEERING
Advanced and Sustainable Energy Sources (EEHn-01B)

Day & Date: Friday, 23-05-2025 Max. Marks: 70
Time: 03:00 PM To 06:00 PM

Instructions: 1) Q. No. 1 is compulsory. It should be solved in the first 30 minutes in Answer Book Page no 03 (Starting page of the Answer Book). Each question carries one mark.
2) Don't forget to Mention question paper set (P/Q/R/S) on top of page.
3) Figures to the right indicates full marks.

MCQ/Objective Type Questions

Duration: 30 Minutes Marks:14

Q.1 Choose the correct Answer. **14**

1) A Pelton wheel is _____.
a) inward flow impulse turbine
b) outward flow impulse turbine
c) inward flow reaction turbine
d) axial flow impulse turbine

2) In a thermal power plant cooling towers are used to _____.
a) condense low pressure steam
b) cool condensed steam
c) cool water used in condenser for condensing steam
d) cool feed water of boiler

3) Major constituent of methane gas is?
a) CO b) Methane
c) Oxygen d) Hydrogen

4) The firing order of a four cylinder engine is _____.
a) 1-2-4-3 b) 1-4-2-3
c) 1-2-3-4 d) 1-3-2-4

5) The performance of engines of different HP, RPM and sizes can be compared on the basis of _____.
a) specific fuel consumption b) compression ratio
c) clearance volume d) cylinder volume

6) In hydrothermal systems when steam, water and dissolved solids are available as source of energy, the entrained solids are removed by _____.
a) filters b) centrifugal separators
c) strainers d) none of the above

7) Tidal energy mainly makes use of _____.
a) kinetic energy of water
b) potential energy of water
c) both kinetic as well as potential energy of water
d) none of the above

8) Heating value of coal is approximately.
a) 1000-2000 kcal / kg b) 2000-4000 kcal / kg
c) 5000-6500 kcal / kg d) 9000-10,500 kcal / kg

9) Water gas is a mixture of _____.
a) CO_2 and O_2 b) O_2 and H_2
c) H_2, N_2 and O_2 d) CO, N_2 and H_2

10) Which of the following contributes to the improvement of efficiency of Rankine cycle in a thermal power plant?
a) Reheating of steam at intermediate stage
b) Regeneration use of steam for heating boiler feed water
c) Use of high pressures
d) All of the above

11) Steam pressures usually used in thermal power plants are _____.
a) 5 kg/cm^2 to 10 kg/cm^2 b) 50 kg/cm^2 to 100 kg/cm^2
c) 110 kg/cm^2 to 170 kg/cm^2 d) 200 kg/cm^2 to 215 kg/cm^2

12) Permissible pH value of water for boilers is _____.
a) 1 b) 7
c) slightly more than 7 d) 10

13) A condenser in a thermal power plant condenses steam combing out of _____.
a) Boiler b) Super-heater
c) Economizer d) Turbine

14) In a hydro-electric plant a conduct system for taking water from the intake works to the turbine is known as _____.
a) Dam b) Reservoir
c) Penstock d) Surge tank

3) Mention Question Paper Set (P/Q/R/S) on Top of Page.

Answer

Q.1 Choose the correct alternatives from the options.

1) Basic unit of human interaction is _____.
a) Family b) Society
c) Group d) None of the above

2) The Self(I) is the seer, _____.
a) Doer b) Enjoyer
c) Doer & Enjoyer d) None

3) PROSPERITY deals with _____.
a) Right understanding in the self
b) Fulfilment in relationship
c) Ensuring more than required physical facility
d) None

4) When we expect feelings from others for our happiness, it is a state of _____.
a) Swatantrata b) Partantrata
c) Prosperity d) None

5) For continuity of happiness, what is essential?
a) Right understanding in the Self
b) Right feeling and right thought in the Self
c) Recognition of needs, ensure more than required, make right utilisation of it
d) All the above

6) Right Understanding and Right Feeling is matter of _____.
a) Self b) Body
c) Both d) None

7) Acceptance of excellence in others is called _____.

a) Gratitude b) Reverence
c) Glory d) None of above

8) Self and _____ are different in nature, materiality, needs and activities.

a) Prosperity b) Right Understanding
c) Body d) None of above

9) _____ is assuming without knowing.

a) Knowing b) Assuming
c) Preconditioning d) Relationship

10) Imagination is combination of _____.

a) Desire & thought
b) Desire, thought & expectation
c) Expectation & thought
d) None of above

11) Following are the basic guidelines for value education except _____.

a) Universal b) Personal
c) Rational d) Natural

12) Natural acceptance and _____ are the two processes of knowing.

a) Self-Actualization b) Self-exploration
c) Self Evaluation d) Self control

13) Human Life is lived at four levels: Individual, Family, and Society and _____.

a) Nature b) Nurture
c) World d) Universe

14) Value education should not be based on dogmas or blind beliefs _____.

a) True b) False

15) Value of an entity is _____.

a) Physical Facility
b) Prosperity
c) Its participation in the larger order of which it is part
d) both a and b

16) _____ are as Basic Human Aspirations.

a) Money
b) Relationship without money
c) Physical Facility
d) Continuous Happiness and Prosperity

17) Please give the correct priority for Physical Facilities, Right Understanding and Relationship _____.

a) Physical Facilities, Right Understanding and Relationship
b) Relationship, Right Understanding and Physical Facilities
c) Right Understanding, Relationship and Physical Facilities
d) None of the above

18) Right Understanding in relationship lead to _____.

a) Mutual Happiness b) Mutual Prosperity
c) Both a and b d) All are wrong

19) SSDD stands for _____.

a) Sadhan Viheen Dukhi Daridra
b) Sadhan Sampan Dukhi Daridra
c) Sadhan Sampan Sukhi Samridha
d) None of the above

20) Natural acceptance does not change with _____.

a) Time b) Place
c) Beliefs d) All of above

21) Human being is co-existence of the _____ and the _____.

a) self, self b) body, body
c) self, body d) None

22) _____ is the feeling of responsibility for nurturing, protecting and right utilizing the body.

a) Swasthya b) Sanyam
c) Prosperity d) None

23) The _____ is an instrument of _____.

a) I, Body b) Body, I
c) Both a and b d) None

24) _____ is the information we get from the Body through the five sense organs.

a) Precondition b) Sensation
c) Natural acceptance d) None

25) Which of the following is NOT a response of the Self?

a) Knowing b) Assuming
c) Recognising d) Preconditioning

26) Needs of Body are quantitative whereas needs of Self are qualitative _____.

a) True b) False

27) Sah-astitva means _____.

a) Co-existence b) Co-operation
c) Cooption d) Corporate identity

28) Ensuring justice in the relationship, on the basis of values leads to _____ in society.

a) Fearlessness b) Confusion
c) Confidence d) Fear

29) _____ is the complete value in relationship.

a) Respect b) Love
c) Trust d) Glory

30) The feeling to nurture and protect the body of our relative is called _____.

a) Care b) Affection
c) Gratitude d) Respect

31) _____ is the feeling of acceptance for those who have made efforts for my excellence.

a) Reverence b) Glory
c) Gratitude d) Guidance

32) We all are similar at the level of our _____ but differ in our _____.

a) Competence, Intension b) Intension, Competence
c) Competence, Competence d) None

33) Abhay means _____.

a) Right understanding b) Trust and fearlessness
c) Prosperity d) Co-existance

34) All the units of nature can be classified into _____ orders.

a) Two b) Three
c) Four d) Six

35) Which of the following does not form an order in nature?

a) Bio b) Animal
c) Consciousness d) Human

36) According to quantity, which of the following is true for the orders in nature?

a) Bio order >> Physical order >> Animal order >> Human order
b) Animal order >> Bio order >> Physical order >> Human order
c) Physical order >> Bio order >> Animal order >> Human order
d) Physical order >> Animal order >> Bio order >> Human order

37) What is NOT acceptable naturally in the nature?

a) Enrichment of nature b) Pollution in nature
c) Protection of nature d) Right Utilization of nature

38) Which of the following is NOT a unit of physical order?

a) Soil b) Air
c) Tree d) Water

39) There is justice in relationship when there is _____.
a) Self-regulation b) Freedom
c) Mutual fulfillment d) None

40) Justice from family to world family leads to _____.
a) Powerful nation
b) Strong political ties between nations
c) Undivided society
d) Disruption of the family structure

41) _____ is and it exists between one self (I1) and other self (I2).
a) Body b) Relationship
c) Health d) All

42) Which of the following results from over-evaluation _____.
a) Ego b) Depression
c) Self-confidence d) Trust

43) Which of the following statement is true?
a) Intention of a human being is always doubtful
b) One's intension is always to make the other happy
c) Intension of a human keeps varying from time to time
d) Intension of a human being can never be understood

44) Feeling of relationship exist between _____.
a) Self and self b) Body and Body
c) Self and body d) None of the above

45) Which of the following is NOT one of the goals at the level of society?
a) Right Understanding b) Fearlessness
c) Madness for profit d) Prosperity

46) Intension of a human being is the same as _____.
a) Natural acceptance b) Competence
c) Thought d) Pre-conditioning

47) Harmony should be maintained in _____.
a) Between body and life b) Between self and body
c) Between self and society d) All of the above

48) If something is _____ to us without any force or compulsion, then it is often correct and does not change with time and people.
a) Not acceptable b) Completely acceptable
c) Naturally acceptable d) Less acceptable

49) Nurturing on the Body depends upon _____.
a) Ingestion b) Digestion
c) Excretion d) All of the above

50) Sensation is related to _____.

a) Body
b) Self 'I'
c) Both a and b
d) None of the above

17) Harmony should be maintained in _____.
a) Between body and life b) Between self and body
c) Between self and society d) All of the above

18) If something is _____ to us without any force or compulsion, then it is often correct and does not change with time and people.
a) Not acceptable b) Completely acceptable
c) Naturally acceptable d) Less acceptable

19) Nurturing on the Body depends upon _____.

a) Ingestion b) Digestion
c) Excretion d) All of the above

20) Sensation is related to _____.

a) Body b) Self 'I'
c) Both a and b d) None of the above

21) Basic unit of human interaction is _____.

a) Family b) Society
c) Group d) None of the above

22) The Self(I) is the seer, _____.

a) Doer b) Enjoyer
c) Doer & Enjoyer d) None

23) PROSPERITY deals with _____.

a) Right understanding in the self
b) Fulfilment in relationship
c) Ensuring more than required physical facility
d) None

24) When we expect feelings from others for our happiness, it is a state of _____.

a) Swatantrata b) Partantrata
c) Prosperity d) None

25) For continuity of happiness, what is essential?

a) Right understanding in the Self
b) Right feeling and right thought in the Self
c) Recognition of needs, ensure more than required, make right utilisation of it
d) All the above

26) Right Understanding and Right Feeling is matter of _____.

a) Self b) Body
c) Both d) None

27) Acceptance of excellence in others is called _____.

a) Gratitude b) Reverence
c) Glory d) None of above

28) Self and _____ are different in nature, materiality, needs and activities.

a) Prosperity b) Right Understanding
c) Body d) None of above

29) _____ is assuming without knowing.

a) Knowing b) Assuming
c) Preconditioning d) Relationship

30) Imagination is combination of _____.

a) Desire & thought
b) Desire, thought & expectation
c) Expectation & thought
d) None of above

31) Following are the basic guidelines for value education except _____.

a) Universal b) Personal
c) Rational d) Natural

32) Natural acceptance and _____ are the two processes of knowing.

a) Self-Actualization b) Self-exploration
c) Self Evaluation d) Self control

33) Human Life is lived at four levels: Individual, Family, and Society and _____.

a) Nature b) Nurture
c) World d) Universe

34) Value education should not be based on dogmas or blind beliefs _____.

a) True b) False

35) Value of an entity is _____.

a) Physical Facility
b) Prosperity
c) Its participation in the larger order of which it is part
d) both a and b

36) _____ are as Basic Human Aspirations.

a) Money
b) Relationship without money
c) Physical Facility
d) Continuous Happiness and Prosperity

37) Please give the correct priority for Physical Facilities, Right Understanding and Relationship _____.

a) Physical Facilities, Right Understanding and Relationship
b) Relationship, Right Understanding and Physical Facilities
c) Right Understanding, Relationship and Physical Facilities
d) None of the above

38) Right Understanding in relationship lead to _____.

a) Mutual Happiness b) Mutual Prosperity
c) Both a and b d) All are wrong

39) SSDD stands for _____.

a) Sadhan Viheen Dukhi Daridra
b) Sadhan Sampan Dukhi Daridra
c) Sadhan Sampan Sukhi Samridha
d) None of the above

40) Natural acceptance does not change with _____.

a) Time b) Place
c) Beliefs d) All of above

41) Human being is co-existence of the _____ and the _____.

a) self, self b) body, body
c) self, body d) None

42) _____ is the feeling of responsibility for nurturing, protecting and right utilizing the body.

a) Swasthya b) Sanyam
c) Prosperity d) None

43) The _____ is an instrument of _____.

a) I, Body b) Body, I
c) Both a and b d) None

44) _____ is the information we get from the Body through the five sense organs.

a) Precondition b) Sensation
c) Natural acceptance d) None

45) Which of the following is NOT a response of the Self?

a) Knowing b) Assuming
c) Recognising d) Preconditioning

46) Needs of Body are quantitative whereas needs of Self are qualitative _____.

a) True b) False

47) Sah-astitva means _____.

a) Co-existence b) Co-operation
c) Cooption d) Corporate identity

48) Ensuring justice in the relationship, on the basis of values leads to _____ in society.

a) Fearlessness b) Confusion
c) Confidence d) Fear

49) _____ is the complete value in relationship.

a) Respect b) Love

c) Trust d) Glory

50) The feeling to nurture and protect the body of our relative is called _____.

a) Care b) Affection

c) Gratitude d) Respect

Universal Human Values (VEC-01)

Day & Date: Saturday, 24-05-2025 Max. Marks: 50
Time: 03:00 PM To 4:30 PM

Instructions: 1) All questions are compulsory.
2) Figures to the right indicate full marks.
3) Mention Question Paper Set (P/Q/R/S) on Top of Page.

Answer

Q.1 Choose the correct alternatives from the options.

1) Following are the basic guidelines for value education except _____.
a) Universal b) Personal
c) Rational d) Natural

2) Natural acceptance and _____ are the two processes of knowing.
a) Self-Actualization b) Self-exploration
c) Self Evaluation d) Self control

3) Human Life is lived at four levels: Individual, Family, and Society and _____.
a) Nature b) Nurture
c) World d) Universe

4) Value education should not be based on dogmas or blind beliefs _____.
a) True b) False

5) Value of an entity is _____.
a) Physical Facility
b) Prosperity
c) Its participation in the larger order of which it is part
d) both a and b

6) _____ are as Basic Human Aspirations.
a) Money
b) Relationship without money
c) Physical Facility
d) Continuous Happiness and Prosperity

7) Please give the correct priority for Physical Facilities, Right Understanding and Relationship _____.

a) Physical Facilities, Right Understanding and Relationship
b) Relationship, Right Understanding and Physical Facilities
c) Right Understanding, Relationship and Physical Facilities
d) None of the above

8) Right Understanding in relationship lead to _____.

a) Mutual Happiness b) Mutual Prosperity
c) Both a and b d) All are wrong

9) SSDD stands for _____.

a) Sadhan Viheen Dukhi Daridra
b) Sadhan Sampan Dukhi Daridra
c) Sadhan Sampan Sukhi Samridha
d) None of the above

10) Natural acceptance does not change with _____.

a) Time b) Place
c) Beliefs d) All of above

11) Human being is co-existence of the _____ and the _____.

a) self, self b) body, body
c) self, body d) None

12) _____ is the feeling of responsibility for nurturing, protecting and right utilizing the body.

a) Swasthya b) Sanyam
c) Prosperity d) None

13) The _____ is an instrument of _____.

a) I, Body b) Body, I
c) Both a and b d) None

14) _____ is the information we get from the Body through the five sense organs.

a) Precondition b) Sensation
c) Natural acceptance d) None

15) Which of the following is NOT a response of the Self?

a) Knowing b) Assuming
c) Recognising d) Preconditioning

16) Needs of Body are quantitative whereas needs of Self are qualitative _____.

a) True b) False

17) Sah-astitva means _____.

a) Co-existence b) Co-operation
c) Cooption d) Corporate identity

18) Ensuring justice in the relationship, on the basis of values leads to _____ in society.

a) Fearlessness b) Confusion
c) Confidence d) Fear

19) _____ is the complete value in relationship.

a) Respect b) Love
c) Trust d) Glory

20) The feeling to nurture and protect the body of our relative is called _____.

a) Care b) Affection
c) Gratitude d) Respect

21) _____ is the feeling of acceptance for those who have made efforts for my excellence.

a) Reverence b) Glory
c) Gratitude d) Guidance

22) We all are similar at the level of our _____ but differ in our _____.

a) Competence, Intension b) Intension, Competence
c) Competence, Competence d) None

23) Abhay means _____.

a) Right understanding b) Trust and fearlessness
c) Prosperity d) Co-existance

24) All the units of nature can be classified into _____ orders.

a) Two b) Three
c) Four d) Six

25) Which of the following does not form an order in nature?

a) Bio b) Animal
c) Consciousness d) Human

26) According to quantity, which of the following is true for the orders in nature?

a) Bio order >> Physical order >> Animal order >> Human order
b) Animal order >> Bio order >> Physical order >> Human order
c) Physical order >> Bio order >> Animal order >> Human order
d) Physical order >> Animal order >> Bio order >> Human order

27) What is NOT acceptable naturally in the nature?

a) Enrichment of nature b) Pollution in nature
c) Protection of nature d) Right Utilization of nature

28) Which of the following is NOT a unit of physical order?

a) Soil b) Air
c) Tree d) Water

29) There is justice in relationship when there is _____.
a) Self-regulation b) Freedom
c) Mutual fulfillment d) None

30) Justice from family to world family leads to _____.
a) Powerful nation
b) Strong political ties between nations
c) Undivided society
d) Disruption of the family structure

31) _____ is and it exists between one self (I1) and other self (I2).
a) Body b) Relationship
c) Health d) All

32) Which of the following results from over-evaluation _____.
a) Ego b) Depression
c) Self-confidence d) Trust

33) Which of the following statement is true?
a) Intention of a human being is always doubtful
b) One's intension is always to make the other happy
c) Intension of a human keeps varying from time to time
d) Intension of a human being can never be understood

34) Feeling of relationship exist between _____.
a) Self and self b) Body and Body
c) Self and body d) None of the above

35) Which of the following is NOT one of the goals at the level of society?
a) Right Understanding b) Fearlessness
c) Madness for profit d) Prosperity

36) Intension of a human being is the same as _____.
a) Natural acceptance b) Competence
c) Thought d) Pre-conditioning

37) Harmony should be maintained in _____.
a) Between body and life b) Between self and body
c) Between self and society d) All of the above

38) If something is _____ to us without any force or compulsion, then it is often correct and does not change with time and people.
a) Not acceptable b) Completely acceptable
c) Naturally acceptable d) Less acceptable

39) Nurturing on the Body depends upon _____.
a) Ingestion b) Digestion
c) Excretion d) All of the above

40) Sensation is related to _____.

a) Body b) Self 'I'
c) Both a and b d) None of the above

41) Basic unit of human interaction is _____.

a) Family b) Society
c) Group d) None of the above

42) The Self(I) is the seer, _____.

a) Doer b) Enjoyer
c) Doer & Enjoyer d) None

43) PROSPERITY deals with _____.

a) Right understanding in the self
b) Fulfilment in relationship
c) Ensuring more than required physical facility
d) None

44) When we expect feelings from others for our happiness, it is a state of _____.

a) Swatantrata b) Partantrata
c) Prosperity d) None

45) For continuity of happiness, what is essential?

a) Right understanding in the Self
b) Right feeling and right thought in the Self
c) Recognition of needs, ensure more than required, make right utilisation of it
d) All the above

46) Right Understanding and Right Feeling is matter of _____.

a) Self b) Body
c) Both d) None

47) Acceptance of excellence in others is called _____.

a) Gratitude b) Reverence
c) Glory d) None of above

48) Self and _____ are different in nature, materiality, needs and activities.

a) Prosperity b) Right Understanding
c) Body d) None of above

49) _____ is assuming without knowing.

a) Knowing b) Assuming
c) Preconditioning d) Relationship

50) Imagination is combination of _____.

a) Desire & thought
b) Desire, thought & expectation
c) Expectation & thought
d) None of above

Answer

Q.1 Choose the correct alternatives from the options.

1) _____ is and it exists between one self (I1) and other self (I2).
a) Body b) Relationship
c) Health d) All

2) Which of the following results from over-evaluation _____.
a) Ego b) Depression
c) Self-confidence d) Trust

3) Which of the following statement is true?
a) Intention of a human being is always doubtful
b) One's intension is always to make the other happy
c) Intension of a human keeps varying from time to time
d) Intension of a human being can never be understood

4) Feeling of relationship exist between _____.
a) Self and self b) Body and Body
c) Self and body d) None of the above

5) Which of the following is NOT one of the goals at the level of society?
a) Right Understanding b) Fearlessness
c) Madness for profit d) Prosperity

6) Intension of a human being is the same as _____.
a) Natural acceptance b) Competence
c) Thought d) Pre-conditioning

7) Harmony should be maintained in _____.
a) Between body and life b) Between self and body
c) Between self and society d) All of the above

8) If something is _____ to us without any force or compulsion, then it is often correct and does not change with time and people.

a) Not acceptable b) Completely acceptable
c) Naturally acceptable d) Less acceptable

9) Nurturing on the Body depends upon _____.

a) Ingestion b) Digestion
c) Excretion d) All of the above

10) Sensation is related to _____.

a) Body b) Self 'I'
c) Both a and b d) None of the above

11) Basic unit of human interaction is _____.

a) Family b) Society
c) Group d) None of the above

12) The Self(I) is the seer, _____.

a) Doer b) Enjoyer
c) Doer & Enjoyer d) None

13) PROSPERITY deals with _____.

a) Right understanding in the self
b) Fulfilment in relationship
c) Ensuring more than required physical facility
d) None

14) When we expect feelings from others for our happiness, it is a state of _____.

a) Swatantrata b) Partantrata
c) Prosperity d) None

15) For continuity of happiness, what is essential?

a) Right understanding in the Self
b) Right feeling and right thought in the Self
c) Recognition of needs, ensure more than required, make right utilisation of it
d) All the above

16) Right Understanding and Right Feeling is matter of _____.

a) Self b) Body
c) Both d) None

17) Acceptance of excellence in others is called _____.

a) Gratitude b) Reverence
c) Glory d) None of above

18) Self and _____ are different in nature, materiality, needs and activities.

a) Prosperity
b) Right Understanding
c) Body
d) None of above

19) _____ is assuming without knowing.

a) Knowing
b) Assuming
c) Preconditioning
d) Relationship

20) Imagination is combination of _____.

a) Desire & thought
b) Desire, thought & expectation
c) Expectation & thought
d) None of above

21) Following are the basic guidelines for value education except _____.

a) Universal
b) Personal
c) Rational
d) Natural

22) Natural acceptance and _____ are the two processes of knowing.

a) Self-Actualization
b) Self-exploration
c) Self Evaluation
d) Self control

23) Human Life is lived at four levels: Individual, Family, and Society and _____.

a) Nature
b) Nurture
c) World
d) Universe

24) Value education should not be based on dogmas or blind beliefs _____.

a) True
b) False

25) Value of an entity is _____.

a) Physical Facility
b) Prosperity
c) Its participation in the larger order of which it is part
d) both a and b

26) _____ are as Basic Human Aspirations.

a) Money
b) Relationship without money
c) Physical Facility
d) Continuous Happiness and Prosperity

27) Please give the correct priority for Physical Facilities, Right Understanding and Relationship _____.

a) Physical Facilities, Right Understanding and Relationship
b) Relationship, Right Understanding and Physical Facilities
c) Right Understanding, Relationship and Physical Facilities
d) None of the above

28) Right Understanding in relationship lead to _____.

a) Mutual Happiness
b) Mutual Prosperity
c) Both a and b
d) All are wrong

29) SSDD stands for _____.

a) Sadhan Viheen Dukhi Daridra
b) Sadhan Sampan Dukhi Daridra
c) Sadhan Sampan Sukhi Samridha
d) None of the above

30) Natural acceptance does not change with _____.

a) Time
b) Place
c) Beliefs
d) All of above

31) Human being is co-existence of the _____ and the _____.

a) self, self
b) body, body
c) self, body
d) None

32) _____ is the feeling of responsibility for nurturing, protecting and right utilizing the body.

a) Swasthya
b) Sanyam
c) Prosperity
d) None

33) The _____ is an instrument of _____.

a) I, Body
b) Body, I
c) Both a and b
d) None

34) _____ is the information we get from the Body through the five sense organs.

a) Precondition
b) Sensation
c) Natural acceptance
d) None

35) Which of the following is NOT a response of the Self?

a) Knowing
b) Assuming
c) Recognising
d) Preconditioning

36) Needs of Body are quantitative whereas needs of Self are qualitative _____.

a) True
b) False

37) Sah-astitva means _____.

a) Co-existence
b) Co-operation
c) Cooption
d) Corporate identity

38) Ensuring justice in the relationship, on the basis of values leads to _____ in society.

a) Fearlessness b) Confusion
c) Confidence d) Fear

39) _____ is the complete value in relationship.

a) Respect b) Love
c) Trust d) Glory

40) The feeling to nurture and protect the body of our relative is called _____.

a) Care b) Affection
c) Gratitude d) Respect

41) _____ is the feeling of acceptance for those who have made efforts for my excellence.

a) Reverence b) Glory
c) Gratitude d) Guidance

42) We all are similar at the level of our _____ but differ in our _____.

a) Competence, Intension b) Intension, Competence
c) Competence, Competence d) None

43) Abhay means _____.

a) Right understanding b) Trust and fearlessness
c) Prosperity d) Co-existance

44) All the units of nature can be classified into _____ orders.

a) Two b) Three
c) Four d) Six

45) Which of the following does not form an order in nature?

a) Bio b) Animal
c) Consciousness d) Human

46) According to quantity, which of the following is true for the orders in nature?

a) Bio order >> Physical order >> Animal order >> Human order
b) Animal order >> Bio order >> Physical order >> Human order
c) Physical order >> Bio order >> Animal order >> Human order
d) Physical order >> Animal order >> Bio order >> Human order

47) What is NOT acceptable naturally in the nature?

a) Enrichment of nature b) Pollution in nature
c) Protection of nature d) Right Utilization of nature

48) Which of the following is NOT a unit of physical order?

a) Soil b) Air
c) Tree d) Water

49) There is justice in relationship when there is _____.

a) Self-regulation b) Freedom

c) Mutual fulfillment d) None

50) Justice from family to world family leads to _____.

a) Powerful nation

b) Strong political ties between nations

c) Undivided society

d) Disruption of the family structure

Day & Date: Saturday, 17-05-2025 Max. Marks: 70
Time: 03:00 PM To 06:00 PM

Instructions: 1) Q. No. 1 is compulsory. It should be solved in the first 30 minutes in answer book Page no 03 (Starring page of the Answer Book Each question carries one mark.
2) Don't forget to Mention question paper set (P/Q/R/S) on top of Page.
3) Figures to the right indicates full marks.

MCQ/Objective Type Questions

Duration: 30 Minutes Marks:14

Q.1 Choose the correct Answer. **14**

1) $L[e^t t^3]$ is _____.

a) $\frac{6}{(s-1)^4}$ b) $\frac{6}{s(s-1)^4}$

c) $\frac{1}{(s-1)^4}$ d) $\frac{1}{s(s-1)^4}$

2) If $L\{f(t)\} = \emptyset(s)$, then $L\{f(at)\} =$ _____.

a) $\emptyset\left(\frac{s}{a}\right)$ b) $\frac{1}{s}\emptyset\left(\frac{s}{a}\right)$

c) $\emptyset'\left(\frac{s}{a}\right)$ d) $\frac{1}{s}\emptyset\left(\frac{s}{a}\right)$

3) $L^{-1}\left\{\frac{1}{s^2+3^2}\right\} =$ _____.

a) $\frac{1}{3}\sin 3t$ b) $\frac{1}{3}\cos 3t$

c) $\frac{1}{3}\cosh 3t$ d) $\frac{1}{3}\sinh 3t$

4) For $\frac{d^2y}{dx^2} + 4\frac{dy}{dx} + 3y = 3ex^{2x}$, the particular integral is _____.

a) $\frac{1}{15}e^{2x}$ b) $3e^{2x}$

c) $\frac{1}{5}e^{2x}$ d) $c_1e^{-x} + c_2e^{-2x}$

5) The general solution of the equation $(D^3 - 7D - 6)y = 0$ is _____.

a) $y = c_1e^{-x} + c_2e^{2x} + c_3e^{-3x}$ b) $y = c_1e^{x} + c_2e^{2x} + c_3e^{3x}$

c) $y = c_1e^{-x} + c_2e^{-2x} + c_3e^{-3x}$ d) None of these

6) $z\{k\} =$ for $|z| > 1$

a) $\frac{z}{z-1}$ b) $\frac{1}{(z-1)^2}$

c) $\frac{z}{(z-1)^2}$ d) $\frac{z}{(z+1)^2}$

7) If $z\{f(k)\} = F(z)$, then $z\{a^k f(k)\} =$ _____.

a) $f\left(\frac{a}{z}\right)$ b) $f\left(\frac{z}{a}\right)$

c) $\frac{1}{a} f\left(\frac{a}{z}\right)$ d) None

8) The solution of the equation $pq = p + q$ is _____.

a) $z = ax + (a+1)y + c$

b) $z = (a+1)x + a(a-1)y + c$

c) $z(a-1) = a(a-1)x + ay + c$

d) $z = (a-1)x + a(a+1)y + c$

9) If $Z\{f(k)\} = F(z)$, then $Z\{kf(k)\} =$ _____.

a) $\frac{dF(z)}{dz}$ b) $-\frac{dF(z)}{dz}$

c) $z\frac{dF(z)}{dz}$ d) $-z\frac{dF(z)}{dz}$

10) The solution of a partial differential equation $xp + yq = z$ is _____.

a) $f(x^2, y^2) = 0$ b) $f(x, y) = 0$

c) $f(xz, yz) = 0$ d) $f\left(\frac{x}{y}, \frac{y}{z}\right)$

11) $L\left\{\int_0^t \sin 2u \, du\right\} =$_____.

a) $\frac{2}{s^2+4}$ b) $\frac{2}{s^2}$

c) $\frac{2}{(s^2+4)^2}$ d) $\frac{2}{s(s^2+4)}$

12) The particular integral of $x^2 \frac{d^2y}{dx^2} + 2x\frac{dy}{dx} = \frac{1}{x^2}$ is _____.

a) $y = c_1 + c_2 x^2$ b) $y = x - \frac{1}{x^2}$

c) $y = \frac{1}{2x^2}$ d) $y = \frac{1}{x^2}$

13) The value of $\frac{1}{D+a}X =$ _____.

a) $e^{-ax}\int e^{-ax}Xdx$

b) $e^{-ax}\int e^{ax}Xdx$

c) $e^{ax}\int e^{-ax}Xdx|$

d) $e^{ax}\int e^{ax}Xdx$

14) The complementary function of $(D^2+2D+1)y = 2e^{3x}$ is _____.

a) $c_1e^{-x}+c_2e^{-x}$

b) $(c_1+c_2x)e^{-2x}$

c) $(c_1\cos x + c_2\sin x)$

d) $(c_1+c_2x)e^{-x}$

Set P

S.Y. (B.Tech.) (Electrical Engineering) (Semester - I) (Old) (CBCS)
Examination: March/April - 2025
Engineering Mathematics – III (BTN07301)

Day & Date: Saturday, 17-05-2025 Max. Marks: 56
Time: 03:00 PM To 06:00 PM

Instructions: 1) All questions are compulsory.
2) Figures to the right indicate full marks.

Section – I

Q.2 Attempt any three. **09**

a) Solve $(D^3 + D)y = \cos x$

b) Solve $(D^2 + 2D + 1)y = x\cos x$

c) Solve $x^2\frac{d^2y}{dx^2} - 3x\frac{dy}{dx} + 4y = 2x$

d) Calculate $L\left\{\int_0^t u.e^{-4u}\sin 5u\, du\right\}$

e) Calculate $L\{te^{-4t}\sin 3t\}$

Q.3 Attempt any three. **09**

a) Evaluate $\int_0^\infty \frac{e^{-t}-e^{-3t}}{t}$ by using Laplace transform.

b) Find Laplace transform of $te^{-t}\cos 2t$

c) Solve $(D^3 + 3D^2 + 3D + 1)y = e^{-x}$

d) Solve $(x+1)^2\frac{d^2y}{dx^2} + (x+1)\frac{dy}{dx} + y = 2\sin(\log(1+x))$

e) Solve $\frac{d^2y}{dx^2} + 3\frac{dy}{dx} + 2y = e^{e^x}$

Q.4 Attempt any two. **10**

a) Find Z-transform of $x_k = a^{|k|}$ for all $k, 0 < a < 1$

b) Find the inverse Z-transform of $\frac{1}{(z-a)^2}$ if

1) $|z| < a$
2) $|z| > a$

c) Find the inverse Laplace transform of following by using the Convolution theorem of $\left[\frac{s^2}{(s^2+a^2)(s^2+b^2)}\right]$

d) Solve $(D^2 - 6D + 13)y = e^{x\log 2} + 8e^{3x}\sin 4x$

e) Find the inverse Laplace transform of following by using the Convolution theorem of $\left[\frac{1}{s(s^2+4)}\right]$

Section – II

Q.5 Attempt any three. **09**

a) Find Z- transform of $x_k = a^{|k|}$ for all $k, 0 < a < 1$

b) Solve $x(y-z)p + y(z-x)q = z(x-y)$

c) Evaluate $\oint \frac{z+2}{(z-3)(z-4)} dz$ where c is the circle $|z| = 1$.

d) Calculate inverse Z-Transform of $F(z) = \frac{1}{(z-5)^2}$ when $|z| > 5$

e) Solve $p(1+q^2) = q(z-a)$

Q.6 Attempt any three. **09**

a) Solve $pe^y = qe^x$

b) Solve $p^2 - q^2 = \frac{x-y}{z}$

c) Calculate Z-Transform of $f(x) = 2^k \cos\{3k+2\}, k \geq 0$.

d) Calculate $Z\{f(k)\}$ where $f(k) = \left(\frac{1}{3}\right)^{|k|}$ for all k.

e) Evaluate $\int_0^{2+i} z^2 dz$

1) Along the line $x = 2y$
2) Along the real axis from $z = 0$ to $z = 2$ and then along the line parallel to the imaginary axis from $z = 2$ to $z = 2 + i$
3) Along the imaginary axis from $z = 0$ to $z = 1$ and then along the line parallel to the real axis from $z = i$ to $z = 2 + i$ along the parabola $2y^2 = x$.

Q.7 Attempt any two. **10**

a) Calculate inverse Z-Transform of $F(z) = \frac{3z^2-18z+26}{(z-2)(z-3)(z-4)'}$ if region of Convergence is $3 < |z| < 4$

b) Evaluate $\oint \frac{z+2}{(z-3)(z-4)} dz$ where c is the circle $|z| = 1$

c) Use variable separable method to solve $\frac{\partial z}{\partial x} = 4\frac{\partial z}{\partial y}$ given $z(0, y) = 8e^{-3y}$

Examination: March/April - 2025
Engineering Mathematics – III (BTN07301)

Day & Date: Saturday, 17-05-2025 Max. Marks: 70
Time: 03:00 PM To 06:00 PM

Instructions: 1) Q. No. 1 is compulsory. It should be solved in the first 30 minutes in answer book Page no 03 (Starring page of the Answer Book Each question carries one mark.
2) Don't forget to Mention question paper set (P/Q/R/S) on top of Page.
3) Figures to the right indicates full marks.

MCQ/Objective Type Questions

Duration: 30 Minutes Marks:14

Q.1 Choose the correct Answer. **14**

1) The solution of the equation $pq = p + q$ is _____.
a) $z = ax + (a+1)y + c$
b) $z = (a+1)x + a(a-1)y + c$
c) $z(a-1) = a(a-1)x + ay + c$
d) $z = (a-1)x + a(a+1)y + c$

2) If $Z\{f(k)\} = F(z)$, then $Z\{kf(k)\} =$ _____.
a) $\frac{dF(z)}{dz}$ b) $-\frac{dF(z)}{dz}$
c) $z\frac{dF(z)}{dz}$ d) $-z\frac{dF(z)}{dz}$

3) The solution of a partial differential equation $xp + yq = z$ is _____.
a) $f(x^2, y^2) = 0$ b) $f(x, y) = 0$
c) $f(xz, yz) = 0$ d) $f\left(\frac{x}{y}, \frac{y}{z}\right)$

4) $L\left\{\int_0^t \sin 2u\, du\right\} =$_____.
a) $\frac{2}{s^2+4}$ b) $\frac{2}{s^2}$
c) $\frac{2}{(s^2+4)^2}$ d) $\frac{2}{s(s^2+4)}$

5) The particular integral of $x^2\frac{d^2y}{dx^2}+2x\frac{dy}{dx}=\frac{1}{x^2}$ is _____.

a) $y=c_1+c_2x^2$ b) $y=x-\frac{1}{x^2}$

c) $y=\frac{1}{2x^2}$ d) $y=\frac{1}{x^2}$

6) The value of $\frac{1}{D+a}X=$ _____.

a) $e^{-ax}\int e^{-ax}Xdx$ b) $e^{-ax}\int e^{ax}Xdx$

c) $e^{ax}\int e^{-ax}Xdx|$ d) $e^{ax}\int e^{ax}Xdx$

7) The complementary function of $(D^2+2D+1)y=2e^{3x}$ is _____.

a) $c_1e^{-x}+c_2e^{-x}$ b) $(c_1+c_2x)e^{-2x}$

c) $(c_1\cos x+c_2\sin x)$ d) $(c_1+c_2x)e^{-x}$

8) $L[e^tt^3]$ is _____.

a) $\frac{6}{(s-1)^4}$ b) $\frac{6}{s(s-1)^4}$

c) $\frac{1}{(s-1)^4}$ d) $\frac{1}{s(s-1)^4}$

9) If $L\{f(t)\}=\emptyset(s)$, then $L\{f(at)\}=$ _____.

a) $\emptyset\left(\frac{s}{a}\right)$ b) $\frac{1}{s}\emptyset\left(\frac{s}{a}\right)$

c) $\emptyset'\left(\frac{s}{a}\right)$ d) $\frac{1}{s}\emptyset\left(\frac{s}{a}\right)$

10) $L^{-1}\left\{\frac{1}{s^2+3^2}\right\}=$ _____.

a) $\frac{1}{3}\sin 3t$ b) $\frac{1}{3}\cos 3t$

c) $\frac{1}{3}\cosh 3t$ d) $\frac{1}{3}\sinh 3t$

11) For $\frac{d^2y}{dx^2}+4\frac{dy}{dx}+3y=3ex^{2x}$, the particular integral is _____.

a) $\frac{1}{15}e^{2x}$ b) $3e^{2x}$

c) $\frac{1}{5}e^{2x}$ d) $c_1e^{-x}+c_2e^{-2x}$

12) The general solution of the equation $(D^3-7D-6)y=0$ is _____.

a) $y=c_1e^{-x}+c_2e^{2x}+c_3e^{-3x}$ b) $y=c_1e^{x}+c_2e^{2x}+c_3e^{3x}$

c) $y=c_1e^{-x}+c_2e^{-2x}+c_3e^{-3x}$ d) None of these

13) $z\{k\} =$ for $|z| > 1$

a) $\frac{z}{z-1}$ b) $\frac{1}{(z-1)^2}$

c) $\frac{z}{(z-1)^2}$ d) $\frac{z}{(z+1)^2}$

14) If $z\{f(k)\} = F(z)$, then $z\{a^k f(k)\} =$ _____.

a) $f\left(\frac{a}{z}\right)$ b) $f\left(\frac{z}{a}\right)$

c) $\frac{1}{a} f\left(\frac{a}{z}\right)$ d) None

Set Q

S.Y. (B.Tech.) (Electrical Engineering) (Semester - I) (Old) (CBCS)
Examination: March/April - 2025
Engineering Mathematics – III (BTN07301)

Day & Date: Saturday, 17-05-2025 Max. Marks: 56
Time: 03:00 PM To 06:00 PM

Instructions: 1) All questions are compulsory.
2) Figures to the right indicate full marks.

Section – I

Q.2 Attempt any three. **09**

a) Solve $(D^3 + D)y = \cos x$

b) Solve $(D^2 + 2D + 1)y = x\cos x$

c) Solve $x^2\frac{d^2y}{dx^2} - 3x\frac{dy}{dx} + 4y = 2x$

d) Calculate $L\left\{\int_0^t u.e^{-4u}\sin 5u\, du\right\}$

e) Calculate $L\{te^{-4t}\sin 3t\}$

Q.3 Attempt any three. **09**

a) Evaluate $\int_0^\infty \frac{e^{-t}-e^{-3t}}{t}$ by using Laplace transform.

b) Find Laplace transform of $te^{-t}\cos 2t$

c) Solve $(D^3 + 3D^2 + 3D + 1)y = e^{-x}$

d) Solve $(x+1)^2\frac{d^2y}{dx^2} + (x+1)\frac{dy}{dx} + y = 2\sin(\log(1+x))$

e) Solve $\frac{d^2y}{dx^2} + 3\frac{dy}{dx} + 2y = e^{e^x}$

Q.4 Attempt any two. **10**

a) Find Z-transform of $x_k = a^{|k|}$ for all $k, 0 < a < 1$

b) Find the inverse Z-transform of $\frac{1}{(z-a)^2}$ if

1) $|z| < a$
2) $|z| > a$

c) Find the inverse Laplace transform of following by using the Convolution theorem of $\left[\frac{s^2}{(s^2+a^2)(s^2+b^2)}\right]$

d) Solve $(D^2 - 6D + 13)y = e^{x\log 2} + 8e^{3x}\sin 4x$

e) Find the inverse Laplace transform of following by using the Convolution theorem of $\left[\frac{1}{s(s^2+4)}\right]$

Section – II

Q.5 Attempt any three. **09**

a) Find Z- transform of $x_k = a^{|k|}$ for all $k, 0 < a < 1$

b) Solve $x(y-z)p + y(z-x)q = z(x-y)$

c) Evaluate $\oint \frac{z+2}{(z-3)(z-4)} dz$ where c is the circle $|z| = 1$.

d) Calculate inverse Z-Transform of $F(z) = \frac{1}{(z-5)^2}$ when $|z| > 5$

e) Solve $p(1+q^2) = q(z-a)$

Q.6 Attempt any three. **09**

a) Solve $pe^y = qe^x$

b) Solve $p^2 - q^2 = \frac{x-y}{z}$

c) Calculate Z-Transform of $f(x) = 2^k \cos\{3k+2\}, k \geq 0$.

d) Calculate $Z\{f(k)\}$ where $f(k) = \left(\frac{1}{3}\right)^{|k|}$ for all k.

e) Evaluate $\int_0^{2+i} z^2 dz$

1) Along the line $x = 2y$
2) Along the real axis from $z = 0$ to $z = 2$ and then along the line parallel to the imaginary axis from $z = 2$ to $z = 2 + i$
3) Along the imaginary axis from $z = 0$ to $z = 1$ and then along the line parallel to the real axis from $z = i$ to $z = 2 + i$ along the parabola $2y^2 = x$.

Q.7 Attempt any two. **10**

a) Calculate inverse Z-Transform of $F(z) = \frac{3z^2-18z+26}{(z-2)(z-3)(z-4)'}$ if region of Convergence is $3 < |z| < 4$

b) Evaluate $\oint \frac{z+2}{(z-3)(z-4)} dz$ where c is the circle $|z| = 1$

b) Find Laplace transform of $te^{-t}\cos 2t$

c) Solve $(D^3 + 3D^2 + 3D + 1)y = e^{-x}$

d) Solve $(x+1)^2\frac{d^2y}{dx^2} + (x+1)\frac{dy}{dx} + y = 2\sin(\log(1+x))$

e) Solve $\frac{d^2y}{dx^2} + 3\frac{dy}{dx} + 2y = e^{e^x}$

Q.4 Attempt any two. **10**

a) Find Z-transform of $x_k = a^{|k|}$ for all $k, 0 < a < 1$

b) Find the inverse Z-transform of $\frac{1}{(z-a)^2}$ if

1) $|z| < a$
2) $|z| > a$

c) Find the inverse Laplace transform of following by using the Convolution theorem of $\left[\frac{s^2}{(s^2+a^2)(s^2+b^2)}\right]$

d) Solve $(D^2 - 6D + 13)y = e^{x\log 2} + 8e^{3x}\sin 4x$

e) Find the inverse Laplace transform of following by using the Convolution theorem of $\left[\frac{1}{s(s^2+4)}\right]$

Section – II

Q.5 Attempt any three. **09**

a) Find Z- transform of $x_k = a^{|k|}$ for all $k, 0 < a < 1$

b) Solve $x(y-z)p + y(z-x)q = z(x-y)$

c) Evaluate $\oint \frac{z+2}{(z-3)(z-4)} dz$ where c is the circle $|z| = 1$.

d) Calculate inverse Z-Transform of $F(z) = \frac{1}{(z-5)^2}$ when $|z| > 5$

e) Solve $p(1+q^2) = q(z-a)$

Q.6 Attempt any three. **09**

a) Solve $pe^y = qe^x$

b) Solve $p^2 - q^2 = \frac{x-y}{z}$

c) Calculate Z-Transform of $f(x) = 2^k \cos\{3k+2\}, k \geq 0$.

d) Calculate $Z\{f(k)\}$ where $f(k) = \left(\frac{1}{3}\right)^{|k|}$ for all k.

e) Evaluate $\int_0^{2+i} z^2 dz$

1) Along the line $x = 2y$
2) Along the real axis from $z = 0$ to $z = 2$ and then along the line parallel to the imaginary axis from $z = 2$ to $z = 2 + i$
3) Along the imaginary axis from $z = 0$ to $z = 1$ and then along the line parallel to the real axis from $z = i$ to $z = 2 + i$ along the parabola $2y^2 = x$.

Q.7 Attempt any two. **10**

a) Calculate inverse Z-Transform of $F(z) = \frac{3z^2-18z+26}{(z-2)(z-3)(z-4)'}$ if region of Convergence is $3 < |z| < 4$

b) Evaluate $\oint \frac{z+2}{(z-3)(z-4)} dz$ where c is the circle $|z| = 1$

c) Use variable separable method to solve $\frac{\partial z}{\partial x} = 4\frac{\partial z}{\partial y}$ given $z(0, y) = 8e^{-3y}$

S. Y. (B.Tech.) (Sem-I) (Old) (CBCS) Examination: March/April-2025
ELECTRICAL ENGINEERING
Electrical Machines – I (BTN07302)

Day & Date: Monday 19-05-2025 Max. Marks: 70
Time: 03:00 PM To 06:00 PM

Instructions: 1) Q. No.1 is compulsory. It should be solved in the first 30 minutes. Each question carries one mark.
2) All questions are compulsory.
3) Assume suitable data if necessary.
4) Draw neat diagrams whenever necessary.
5) Don't forget to mention, Q. P. Set (A/B/C/D) ON TOP OF page.
6) Separate answer books for each section.

MCQ/Objective Type Questions

Duration: 30 Minutes Marks:14

Q.1 Choose the correct answer. 14

1) The most likely cause(s) of sparking at the brushes in a d. c. the machine is /are _____.
a) open coil in the armature
b) defective interpoles
c) incorrect brush spring pressure
d) all of the above

2) In a clockwise rotating loaded d.c. generator, brushes have to be shifted _____.
a) clockwise b) counterclockwise
c) either (a) or (b) d) neither (a) nor (b)

3) In lap winding, the number of brushes is always _____.
a) double the number of poles
b) the same as the number of poles
c) half the number of poles
d) Two

4) The commutation process in a.d.c. generator involves the _____.
a) passage of current from a moving armature to a stationary load
b) reversal of current in an armature coil as it crosses MNA
c) conversion of a.c. to d.c.
d) suppression of reactance voltage

5) The current drawn by a 120V d.c. the motor of armature resistance 0.5 Ω and back e.m.f.110 V is _____ ampere.
a) 20 b) 240
c) 220 d) 5

6) The speed of a d.c. the motor can be controlled by varying _____.
a) its flux per pole
b) the resistance of the armature circuit
c) applied voltage
d) all of the above

7) When the load is removed, _____ motor will run at the highest speed.
a) Shunt
b) Cumulative-compound
c) Differential compound
d) Series

8) Which type of flux does transformer action need?
a) Alternating electric flux
b) Alternating magnetic flux
c) Increasing magnetic flux
d) Constant magnetic flux

9) The ordinary efficiency of a given transformer is maximum when _____.
a) it runs at half full-load
b) it runs at full-load
c) its Cu loss equals iron loss
d) it runs slightly overload

10) In an actual transformer the iron loss remains practically constant from no load to full load because _____.
a) Value of transformation ratio remains constant
b) Permeability of transformer core remains constant
c) Core flux remains practically constant
d) Primary voltage remains constant

11) When does star/star transformers work satisfactorily?
a) Load is unbalanced only
b) Load is balanced only
c) On balanced as well as unbalanced loads
d) Independent of load type

12) For the parallel operation of two single phase transformers it is necessary that they should have _____.
a) same efficiency
b) same polarity
c) same kVA rating
d) same number of turns on the secondary side

13) On which load power factor zero voltage regulation will be achieved?
a) 0
b) 1
c) Leading
d) Lagging

14) An autotransformer having a transformation ratio of 0.8 supplies a load of 3 kW. The power transferred conductively from primary to secondary is _____ kW.
a) 0.6
b) 2.4
c) 1.5
d) 0.27

Electrical Machines – I (BTN07302)

Day & Date: Monday 19-05-2025 Max. Marks: 56
Time: 03:00 PM To 06:00 PM

Instructions: 1) All questions are compulsory.
2) Figures to the right indicate full marks.

Section – I

Q.2 Attempt any four of the following. **16**

a) Derive an expression for cross magnetizing and demagnetizing Ampere Turns due to armature reaction in DC machine.

b) A six-pole lap-connected 230 V shunt motor has 410 armature conductors. It takes 41 A on full load. The flux per pole is 0.05 Weber. The armature and field resistances are 0.1 ohm and 230 ohms respectively. Contact drop per brush = 1 V. Determines the speed of the motor at full load.

c) What are the losses in DC motors, explain them and derive the condition for maximum efficiency.

d) A series generator delivers a current of 100 A at 250 V. Its armature and series field resistances are 0.1 Ω and 0.055 Ω respectively. Find:
i) Armature current
ii) Generated e.m.f.

e) Derive an EMF equation of the DC Generator.

f) What is the necessity of a starter? Explain the 4-point starter with a neat diagram.

Q.3 Attempt any two of the following. **12**

a) The open circuit characteristic (O.C.C.) of a separately excited generator, at 600r.p.m. is as under.

Field Current, A:	1.6	3.2	4.8	6.4	8.0	9.6	11.2
E.m.f.:	148	285	390	460	520	560	590

Find
i) The voltage to which the machine will excite as a shunt generator with a field circuit resistance of 60ohm.
ii) The critical resistance, at this speed.

b) With the help of a neat sketch explain the speed control methods of D.C. shunt motor.

c) With a neat circuit diagram explain Swinburne's test and how the efficiency of the generator and motor are computed with this test. Write the advantages of this test.

Section – II

Q.4 Attempt any four of the following: **16**

a) Derive an EMF equation of the transformer.

b) Explain with a phasor diagram the behavior of a transformer on no-load.

c) The primary and secondary of a 25 kVA transformer has 500 and 40 turns, respectively. If the primary is connected to 3000 V, 50 Hz mains, calculate

i) Primary and secondary currents at full load;
ii) The secondary emf and
iii) The maximum flux in the core

Neglect magnetic leakage, resistance of the winding, and the primary no-load current in relation to the full load current.

d) A single-phase transformer with a ratio 5: 1 has a primary resistance of 0.4 ohm and reactance of 1.2 ohm and a secondary resistance of 0.01 and reactance of 0.04 ohm. Determine the percentage regulation when delivering 125 A at 600 V at 0.8 p.f. lagging.

e) With a neat sketch explain the open circuit test and short circuit test for transformer.

f) Define the efficiency of a transformer and find the condition for obtaining maximum efficiency.

Q.5 Attempt any two of the following. **12**

a) Explain open delta and Scott connections for a three-phase transformer.

b) Explain the following connections of three-phase transformers;

i) Star-star
ii) Delta-delta
iii) Delta-star
iv) Star-delta giving the merits of each one of them.

c) Determine the percentage efficiency and regulation at full load 0.9 p.f. lagging of a 5 kVA, 220/440V single-phase transformer. When the following test data is obtained.
OC. Test - 220 V, 2 A, 100 W on L.V. side;
S.C. Test - 40 V. 11.4 A, 200 W on H.V. side.

b) the same as the number of poles
c) half the number of poles
d) Two

13) The commutation process in a.d.c. generator involves the _____.
a) passage of current from a moving armature to a stationary load
b) reversal of current in an armature coil as it crosses MNA
c) conversion of a.c. to d.c.
d) suppression of reactance voltage

14) The current drawn by a 120V d.c. the motor of armature resistance 0.5 Ω and back e.m.f.110 V is _____ ampere.
a) 20 b) 240
c) 220 d) 5

S. Y. (B.Tech.) (Sem-I) (Old) (CBCS) Examination: March/April-2025
ELECTRICAL ENGINEERING
Electrical Machines – I (BTN07302)

Day & Date: Monday 19-05-2025 Max. Marks: 56
Time: 03:00 PM To 06:00 PM

Instructions: 1) All questions are compulsory.
2) Figures to the right indicate full marks.

Section – I

Q.2 Attempt any four of the following. **16**

a) Derive an expression for cross magnetizing and demagnetizing Ampere Turns due to armature reaction in DC machine.

b) A six-pole lap-connected 230 V shunt motor has 410 armature conductors. It takes 41 A on full load. The flux per pole is 0.05 Weber. The armature and field resistances are 0.1 ohm and 230 ohms respectively. Contact drop per brush = 1 V. Determines the speed of the motor at full load.

c) What are the losses in DC motors, explain them and derive the condition for maximum efficiency.

d) A series generator delivers a current of 100 A at 250 V. Its armature and series field resistances are 0.1 Ω and 0.055 Ω respectively. Find:
i) Armature current
ii) Generated e.m.f.

e) Derive an EMF equation of the DC Generator.

f) What is the necessity of a starter? Explain the 4-point starter with a neat diagram.

Q.3 Attempt any two of the following. **12**

a) The open circuit characteristic (O.C.C.) of a separately excited generator, at 600r.p.m. is as under.

Field Current, A:	1.6	3.2	4.8	6.4	8.0	9.6	11.2
E.m.f.:	148	285	390	460	520	560	590

Find
i) The voltage to which the machine will excite as a shunt generator with a field circuit resistance of 60ohm.
ii) The critical resistance, at this speed.

b) With the help of a neat sketch explain the speed control methods of D.C. shunt motor.

c) With a neat circuit diagram explain Swinburne's test and how the efficiency of the generator and motor are computed with this test. Write the advantages of this test.

Section – II

Q.4 Attempt any four of the following: **16**

a) Derive an EMF equation of the transformer.

b) Explain with a phasor diagram the behavior of a transformer on no-load.

c) The primary and secondary of a 25 kVA transformer has 500 and 40 turns, respectively. If the primary is connected to 3000 V, 50 Hz mains, calculate

i) Primary and secondary currents at full load;
ii) The secondary emf and
iii) The maximum flux in the core

Neglect magnetic leakage, resistance of the winding, and the primary no-load current in relation to the full load current.

d) A single-phase transformer with a ratio 5: 1 has a primary resistance of 0.4 ohm and reactance of 1.2 ohm and a secondary resistance of 0.01 and reactance of 0.04 ohm. Determine the percentage regulation when delivering 125 A at 600 V at 0.8 p.f. lagging.

e) With a neat sketch explain the open circuit test and short circuit test for transformer.

f) Define the efficiency of a transformer and find the condition for obtaining maximum efficiency.

Q.5 Attempt any two of the following. **12**

a) Explain open delta and Scott connections for a three-phase transformer.

b) Explain the following connections of three-phase transformers;

i) Star-star
ii) Delta-delta
iii) Delta-star
iv) Star-delta giving the merits of each one of them.

c) Determine the percentage efficiency and regulation at full load 0.9 p.f. lagging of a 5 kVA, 220/440V single-phase transformer. When the following test data is obtained.
OC. Test - 220 V, 2 A, 100 W on L.V. side;
S.C. Test - 40 V. 11.4 A, 200 W on H.V. side.

Power System I (BTN07304)

Day & Date: Tuesday, 20-05-2025 Max. Marks: 70
Time: 03:00 PM To 06:00 PM

Instructions: 1) Q. No. 1 is compulsory. It should be solved in the first 30 minutes in answer book. Page no 03 (Starting page of the Answer Book). Each question carries one mark.
2) Don't forget to Mention question paper set (P/Q/R/S) on top of page.
3) Figures to the right indicates full marks.
4) Assume data wherever necessary.

MCQ/Objective Type Questions

Duration: 30 Minutes Marks:14

Q.1 Choose the correct answers. **14**

1) Transmission and distribution of electric power by underground system is superior to overhead system in respect of ____
a) Appearance and public safety
b) Maintenance cost
c) Frequency of faults, power failure and accidents
d) All of the above

2) The volume of copper required for an ac transmission line is inversely proportional to ____.
a) Current b) Voltage
c) Power factor d) Both b and c

3) For the same conductor length, same amount of power, same losses and same maximum voltage to earth, which system requires minimum conductor area ____.
a) Single phase ac
b) 3 phase ac
c) 2 wire ac
d) Two Wire DC System with Mid-Point Earthed

4) The diesel plants are mainly used ____.
a) As peak load plants
b) As base load plants
c) As standby power plants
d) Both peak and stand by plants

5) Reflector mirrors used for exploiting the solar energy are called ____.
a) Mantle b) Heliostats
c) Diffusers d) Ponds

6) Temperature attained by cylindrical parabolic collector is of the order of ____.

a) 50 - 100 °C b) 100 - 150 °C
c) 150 - 200 °C d) 200 - 400 °C

7) Which among these is the fundamental economical principle which influences the design of transmission lines?

a) Economic choice of conductor size
b) Economic choice of transmission voltage
c) Both a and b
d) Economic, choice of transmission line length

8) Assembly of which type of insulators are used as strain type of insulators?

a) Pin type b) Shackle type
c) Suspension type d) None of these

9) The voltage across the various discs of a string of suspension insulator having identical discs is different due to ____.

a) Surface leakage currents
b) Series capacitance
c) Shunt capacitance to ground
d) Series and shunt capacitance

10) Which of the following enters at the super heater of a boiler?

a) Cold Water b) Wet steam
c) Hot water d) Super-heated steam

11) Maximum and Minimum loads on the load duration curve is represented on which respective side?

a) Left and Right b) Right and Left
c) Randomly d) None of these

12) Which of the following material can be used as a moderator?

a) Graphite b) Heavy water D
c) Beryllium d) Any of the above

13) Maximum demand on the power system is ____.

a) Sum of the maximum demands of all its consumers.
b) Greatest average load in a specified time
c) Peak value of load in a specified time
d) All of the above

14) In a power station, the cost of generation of power reduces most effectively when ____.

a) Diversity factor alone increases
b) Both diversity factor and load factor increase
c) Only load factor increases
d) Both diversity factor and load factor decrease

Time: 03:00 PM To 06:00 PM

Instructions: 1) All questions are compulsory.
2) Figures to the right indicate full marks.
3) Assume suitable data if necessary.

Section – I

Q.2 Attempt the following questions: (Any Four) **16**

a) Define:
i) Max. Demand,
ii) Load curve,
iii) Load duration curve,
iv) Diversity factor.

b) What is electrical load, explain type of load, in brief.

c) Write note on interconnected grid System, state the various merits of interconnected grid.

d) Enlist type of nuclear reactor & Draw & Explain in brief with schematic arrangement of Boiled Water reactor (BWR).

e) Write Short Note:
i) Reflector
ii) Moderator
iii) Control Rod
iv) Coolant used in a nuclear power plant

Q.3 Attempt the following: (Any Two) **12**

a) Describe with neat sketch schematic arrangement of thermal power station.

b) Draw and explain load curve and load duration curve.

c) Enlist type of tariff and explain in detail Block Rate Tariff and Three-Part Tariff in Electrical Power System.

Section – II

Q.4 Attempt the following: (Any Four) **16**

a) Write note on Economics of Transmission line, discuss what are the aspects related to Economics of Transmission line.

b) Write short note on selection of optimum Voltage level for Transmission line, also enlist various advantages & disadvantages if select higher voltage level.

c) Enlist the various main types of insulators of Overhead power system, explain Strain type of insulator.

d) Derive equation for conductor material required in three phase 4-wire AC system.

e) Derive equation for conductor material required in 2-wire DC system with midpoint earthed. (K/4)

Q.5 Attempt the following: (Any Two) **12**

a) In a 33 KV transmission line, there are three units of disc insulator in a string, if capacitance between the tower body & insulator is 11% of self-capacitance disc insulator.
Find the:
i) Voltage distribution over a 3-disc insulator and,
ii) String Efficiency.

b) Show that conductor material required in single phase 3-wire system is $\frac{15}{\cos^2\emptyset}$ times of volume of conductor material required in Two wire DC System with one conductor earthed.

c) State and explain kelvin's law to determine the economic size of transmission conductor.

Duration: 30 Minutes Marks:14

Q.1 Choose the correct alternatives from the options. 14

1) Thermal runaway occurs when ____.
a) Collector is reverse biased b) Transistor is not biased
c) Emitter is forward biased d) Junction capacitance is high

2) The disadvantage of voltage divider bias, that it has ____.
a) High stability factor b) Low base current
c) Many resistor d) None of the above

3) Zener diode can be used as ____.
a) d. c. voltage regulator only
b) a. c. voltage regulator only
c) both d. c. and a. c. voltage regulator
d) none of the above

4) The dc current gain in common collector configuration is given by ____.
a) α b) β
c) $\beta + 1$ d) $\alpha + 1$

5) In which mode of BJT operation are both junctions reverse biased____.
a) active b) saturation
c) cut off d) reverse active

6) For an NPN transistor in normal bias ____.
a) Only holes cross the collector junction
b) Only majority carriers cross the collector junction
c) The emitter junction has high resistance
d) Emitter junction is forward biased and collector junction is reverse biased

7) The ideal value for stability factor for biasing circuit is ____.
a) 1 b) 5
c) 0 d) 100

8) In BJT base region is made very thin so that ____.
a) Recombination in base region is minimum
b) Electric field gradient in base is high
c) Base can be easily fabricated
d) Base can be easily biased

9) In the input RC circuit of a single stage BJT amplifier, by how much does the base voltage lead the input voltage for frequencies much larger than the cutoff frequency in the low frequency region?
a) About 0° b) 45°
c) About 90° d) None of the above

10) If temperature changes, h parameters of a transistor ____.
a) May or may not change b) Do not change
c) Also change d) None of the above

11) In an unregulated power supply, if load current increases, the output voltage ____.
a) Remains the same b) Decreases
c) Increases d) None of the above

12) The gain of an amplifier without feedback is 100 dB. If negative feedback of 3 db is applied, the gain of the amplifier will become ____.
a) 5 dB b) 300 dB
c) 103 dB d) 97 dB

13) An emitter-follower is also known as a ____.
a) common-emitter amplifier b) common-base amplifier
c) common-collector amplifier d) Darlington pair

14) A transistor behaves as a linear device for ____.
a) Small signals only b) Large signals only
c) Both small and large signals d) None of the above

Set P

S. Y. (B. Tech) (Sem-I) (Old) (CBCS) Examination: March/April-2025
ELECTRICAL & ENGINEERING
Electronic devices and Circuits (BTN07305)

Day & Date: Wednesday 21-05-2025 Max. Marks: 56
Time: 03:00 PM To 06:00 PM

Instructions: 1) All questions are compulsory.
2) Figures to the right indicate full marks.
3) Assume suitable data if necessary and mention it clearly.

Section – I

Q.2 Solve the following: (Any Four) **16**

a) Explain neat diagram of DC load line of BJT. Write significance of load line.
b) Derive expression for operating point voltage, current and stability factor of voltage divider biasing circuit.
c) Explain the frequency response of RC coupled CE amplifier.
d) What is compensation techniques used in BJT? Explain in detail with circuit diagram.
e) Define the terms related to small signal parameter of JFET.
i) DC drain to source resistance
ii) Amplification factor
iii) AC drain resistance
iv) Transconductance

Q.3 Solve the following: (Any Two) **12**

a) Draw & Explain V-I characteristics of JFET, also draw & explain V-I characteristics for different value of VGS.
b) Derive expression for current gain and input impedance for amplifier in terms of h-parameters.
c) Design a single stage CE amplifier which has $\mathrm{VCEQ} = 5\mathrm{V}, \mathrm{ICEQ} = 5\ \mathrm{mA}, \mathrm{VCC} = 12\mathrm{V}, \mathrm{AV} = 100, \mathrm{Ai} = 150, \mathrm{VBE} = 0.6\mathrm{V}, \mathrm{hie} = 2.5\ \mathrm{k\Omega}, \mathrm{s} = 3, \mathrm{RL} = 1\mathrm{k\Omega}.$

Section- II

Q.4 Solve the following: (Any Four) **16**

a) Explain various types of filters.
b) Draw the Circuit diagram of Full wave center tap rectifier with π filter. Explain.
c) Differentiate between positive and negative feedback (At least four points).
d) Explain transformer coupled class B amplifier.
e) Explain the technical features of positive voltage regulators.

Q.5 Solve the following: (Any Two) **12**

a) Design stabilized power supply using inductor filter to give DC output voltage of 33 V at 2KΩ with ripple factor not exceeding 4%. Assume supply frequency of 50Hz & Use 2 diode FWR.

b) Derive the equation for voltage series feedback amplifier for effect of Input resistance (Rif).

c) Compare between class A, class B and class AB amplifiers (Any four points).

ELECTRICAL & ENGINEERING
Electronic devices and Circuits (BTN07305)

Day & Date: Wednesday 21-05-2025 Max. Marks: 70
Time: 03:00 PM To 06:00 PM

Instructions: 1) Q. No. 1 is compulsory. It should be solved in the first 30 minutes in Answer Book Page no 03 (Starting page of the Answer Book). Each question carries one mark.
2) Don't forget to Mention question paper set (P/Q/R/S) on top of page.
3) Figures to the right indicates full marks.

MCQ/Objective Type Questions

Duration: 30 Minutes Marks:14

Q.1 Choose the correct alternatives from the options. 14

1) In BJT base region is made very thin so that ____.
a) Recombination in base region is minimum
b) Electric field gradient in base is high
c) Base can be easily fabricated
d) Base can be easily biased

2) In the input RC circuit of a single stage BJT amplifier, by how much does the base voltage lead the input voltage for frequencies much larger than the cutoff frequency in the low frequency region?
a) About 0° b) 45°
c) About 90° d) None of the above

3) If temperature changes, h parameters of a transistor ____.
a) May or may not change b) Do not change
c) Also change d) None of the above

4) In an unregulated power supply, if load current increases, the output voltage ____.
a) Remains the same b) Decreases
c) Increases d) None of the above

5) The gain of an amplifier without feedback is 100 dB. If negative feedback of 3 db is applied, the gain of the amplifier will become ____.
a) 5 dB b) 300 dB
c) 103 dB d) 97 dB

6) An emitter-follower is also known as a ____.
a) common-emitter amplifier b) common-base amplifier
c) common-collector amplifier d) Darlington pair

7) A transistor behaves as a linear device for ____.
a) Small signals only b) Large signals only
c) Both small and large signals d) None of the above

8) Thermal runaway occurs when ____.
a) Collector is reverse biased b) Transistor is not biased
c) Emitter is forward biased d) Junction capacitance is high

9) The disadvantage of voltage divider bias, that it has ____.
a) High stability factor b) Low base current
c) Many resistor d) None of the above

10) Zener diode can be used as ____.
a) d. c. voltage regulator only
b) a. c. voltage regulator only
c) both d. c. and a. c. voltage regulator
d) none of the above

11) The dc current gain in common collector configuration is given by ____.
a) α b) β
c) $\beta + 1$ d) $\alpha + 1$

12) In which mode of BJT operation are both junctions reverse biased____.
a) active b) saturation
c) cut off d) reverse active

13) For an NPN transistor in normal bias ____.
a) Only holes cross the collector junction
b) Only majority carriers cross the collector junction
c) The emitter junction has high resistance
d) Emitter junction is forward biased and collector junction is reverse biased

14) The ideal value for stability factor for biasing circuit is ____.
a) 1 b) 5
c) 0 d) 100

MCQ/Objective Type Questions

Duration: 30 Minutes Marks:14

Q.1 Choose the correct Answer. **14**

1) _____ instruments are those which measure the total quantity of electricity delivered in a particular time.
a) Absolute b) Indicating
c) Recording d) Integrating

2) For handling greater currents induction wattmeters are used in conjunction with _____.
a) potential transformers b) current transformers
c) power transformer d) either of the above

3) Induction type single phase energy meters measure electric energy in _____.
a) kW b) Wh
c) kWh d) VAR

4) In majority of instruments damping is provided by _____.
a) fluid friction b) spring
c) eddy currents d) all of the above

5) Basically a potentiometer is a device for _____.
a) comparing two voltages b) measuring a current
c) comparing two currents d) measuring a voltage

6) In order to achieve high accuracy, the slide wire of a potentiometer should be _____.
a) as long as possible
b) as short as possible
c) neither too small not too large
d) very thick

7) Instrument transformers are _____.
a) potential transformers b) current transformers
c) both (a) and (b) d) power transformers

8) An instrument transformer is used to extend the range of _____.
a) induction instrument b) electrostatic instrument
c) moving coil instrument d) any of the above

9) For measurement of mutual inductance we can use _____.
a) Anderson bridge b) Maxwell's bridge
c) Heaviside bridge d) Any of the above

10) In a Weston frequency meter, the magnetic axes of the two fixed coils are _____.
a) parallel b) perpendicular
c) inclined at 60° d) inclined at 120°

11) To measure radio frequency, the suitable frequency meter is _____.
a) Weston frequency meter
b) reed vibrator frequency meter
c) heterodoxy frequency meter
d) electrical resonance frequency meter

12) A CRO can display _____.
a) AC signals b) DC signals
c) Both AC and DC signals d) Time invariant signals

13) The internal resistance of an ammeter should be _____.
a) very small b) medium
c) high d) infinity

14) In a moving coil instrument, the deflecting torque is proportional to ___.
a) current b) square of the current
c) square root of the current d) sine of the measurand

Seat No.

2) Figures to the right indicate full marks.

Section – I

Q.2 Attempt any Four **16**

a) Write classification of measuring instruments.
b) Define standard & explain types of standard.
c) Explain the working of megger with neat diagram.
d) Explain Maxwell's inductance bridge with phasor diagram.
e) With neat sketch explain PMMC type instrument.

Q.3 Attempt any two. **12**

a) Explain construction & operation of $1\text{-}\Phi$ electro dynamo meter power factor meter.
b) Explain Schering Bridge measurement of unknown capacitance with phasor diagram
c) A bridge consist of the following :
Arm ab:- A choke coil having resistance R_1 & inductance L_1
Arm bc:- A non-inductive resistance R_3
Arm cd :- A mica condenser C_4 in series with non-inductive resistance R_4
Arm da :- A non-inductive resistance R_2
When this bridge fed from a source of 500 Hz, balance is obtained underfollowing conditions $\mathrm{R}_2 = 2410\Omega, \mathrm{R}_3 = 750\Omega, \mathrm{C}_4 = 0.35\mu\mathrm{F}$, $\mathrm{R}_4 = 64.5\Omega$
The series resistance of capacitor is 0.4Ω. Calculate resistance and Inductance of choke coil. The supply is connected between a & c and detector is between b & d.

Section – II

Q.4 Attempt any Four. **16**

a) Difference between CT and PT.
b) Write note on Digital voltmer.
c) Explain Q-meter with neat diagram.
d) Write note on digital storage oscilloscope.
e) Explain digital measurement of time period.

Q.5 Attempt any two. **12**

a) Draw the block diagram of CRO and explain each block.
b) Explain with neat diagram, working of ramp type digital voltmeter.
c) Draw typical phasor diagram of potential transformer. Derive an expression for actual transformation ratio.

7) In a moving coil instrument, the deflecting torque is proportional to ___.
a) current b) square of the current
c) square root of the current d) sine of the measurand

8) _____ instruments are those which measure the total quantity of electricity delivered in a particular time.

a) Absolute b) Indicating
c) Recording d) Integrating

9) For handling greater currents induction wattmeters are used in conjunction with _____.

a) potential transformers b) current transformers
c) power transformer d) either of the above

10) Induction type single phase energy meters measure electric energy in _____.

a) kW b) Wh
c) kWh d) VAR

11) In majority of instruments damping is provided by _____.

a) fluid friction b) spring
c) eddy currents d) all of the above

12) Basically a potentiometer is a device for _____.

a) comparing two voltages b) measuring a current
c) comparing two currents d) measuring a voltage

13) In order to achieve high accuracy, the slide wire of a potentiometer should be _____.

a) as long as possible
b) as short as possible
c) neither too small not too large
d) very thick

14) Instrument transformers are _____.

a) potential transformers b) current transformers
c) both (a) and (b) d) power transformers

Set **Q**

S. Y. (B. Tech) (Sem-I) (Old) (CBCS) Examination: March/April-2025
ELECTRICAL ENGINEERING
Electrical Measurement and Instrumentation (BTN07303)

Day & Date: Thursday 22-05-2025 Max. Marks: 56
Time: 03:00 PM To 06:00 PM

Instructions: 1) All questions are compulsory.
2) Figures to the right indicate full marks.

Section – I

Q.2 Attempt any Four **16**

a) Write classification of measuring instruments.
b) Define standard & explain types of standard.
c) Explain the working of megger with neat diagram.
d) Explain Maxwell's inductance bridge with phasor diagram.
e) With neat sketch explain PMMC type instrument.

Q.3 Attempt any two. **12**

a) Explain construction & operation of $1\text{-}\Phi$ electro dynamo meter power factor meter.
b) Explain Schering Bridge measurement of unknown capacitance with phasor diagram
c) A bridge consist of the following :
Arm ab:- A choke coil having resistance R_1 & inductance L_1
Arm bc:- A non-inductive resistance R_3
Arm cd :- A mica condenser C_4 in series with non-inductive resistance R_4
Arm da :- A non-inductive resistance R_2
When this bridge fed from a source of 500 Hz, balance is obtained underfollowing conditions $\mathrm{R}_2 = 2410\Omega, \mathrm{R}_3 = 750\Omega, \mathrm{C}_4 = 0.35\mu\mathrm{F}$, $\mathrm{R}_4 = 64.5\Omega$
The series resistance of capacitor is 0.4Ω. Calculate resistance and Inductance of choke coil. The supply is connected between a & c and detector is between b & d.

Section – II

Q.4 Attempt any Four. **16**

a) Difference between CT and PT.
b) Write note on Digital voltmer.
c) Explain Q-meter with neat diagram.
d) Write note on digital storage oscilloscope.
e) Explain digital measurement of time period.

Q.5 Attempt any two. **12**

a) Draw the block diagram of CRO and explain each block.
b) Explain with neat diagram, working of ramp type digital voltmeter.
c) Draw typical phasor diagram of potential transformer. Derive an expression for actual transformation ratio.

Instructions: 1) Q. No. 1 is compulsory. It should be solved in the first 30 minutes in Answer Book Page no 03 (Starting page of the Answer Book). Each question carries one mark.
2) Don't forget to Mention question paper set (P/Q/R/S) on top of page.
3) Figures to the right indicates full marks.

MCQ/Objective Type Questions

Duration: 30 Minutes Marks:14

Q.1 Choose the correct Answer. 14

1) To measure radio frequency, the suitable frequency meter is _____.
a) Weston frequency meter
b) reed vibrator frequency meter
c) heterodoxy frequency meter
d) electrical resonance frequency meter

2) A CRO can display _____.
a) AC signals b) DC signals
c) Both AC and DC signals d) Time invariant signals

3) The internal resistance of an ammeter should be _____.
a) very small b) medium
c) high d) infinity

4) In a moving coil instrument, the deflecting torque is proportional to ___.
a) current b) square of the current
c) square root of the current d) sine of the measurand

5) _____ instruments are those which measure the total quantity of electricity delivered in a particular time.
a) Absolute b) Indicating
c) Recording d) Integrating

6) For handling greater currents induction wattmeters are used in conjunction with _____.
a) potential transformers b) current transformers
c) power transformer d) either of the above

7) Induction type single phase energy meters measure electric energy in _____.

a) kW b) Wh
c) kWh d) VAR

8) In majority of instruments damping is provided by _____.

a) fluid friction b) spring
c) eddy currents d) all of the above

9) Basically a potentiometer is a device for _____.

a) comparing two voltages b) measuring a current
c) comparing two currents d) measuring a voltage

10) In order to achieve high accuracy, the slide wire of a potentiometer should be _____.

a) as long as possible
b) as short as possible
c) neither too small not too large
d) very thick

11) Instrument transformers are _____.

a) potential transformers b) current transformers
c) both (a) and (b) d) power transformers

12) An instrument transformer is used to extend the range of _____.

a) induction instrument b) electrostatic instrument
c) moving coil instrument d) any of the above

13) For measurement of mutual inductance we can use _____.

a) Anderson bridge b) Maxwell's bridge
c) Heaviside bridge d) Any of the above

14) In a Weston frequency meter, the magnetic axes of the two fixed coils are _____.

a) parallel b) perpendicular
c) inclined at 60° d) inclined at 120°

MCQ/Objective Type Questions

Duration: 30 Minutes Marks:14

Q.1 Choose the Correct Alternatives from the Options and Rewrite the Sentence. **14**

1) The sag of a transmission line depends upon _____
a) Weight of conductor and directly proportional to span length
b) Weight of conductor and inversely proportional to span length
c) Weight of conductor and directly proportional to the square of span length
d) Weight of conductor and inversely proportional to the square of span length

2) The maximum tension in a section of overhead line conductor between two supports of unequal height occurs at _____
a) The higher support b) The lower point
c) The midpoint of the conductor d) None of the above

3) Corona is accompanied by _____
a) Violet visible light b) Hissing sound
c) Power loss and interference d) all of the above

4) Transmission line constants are _____
a) Capacitance b) Inductance
c) Resistance d) All of these

5) The inductance of line is minimum when _____
a) G M D is high b) G M R is high
c) Both G M D and G M R are high d) G M D is low but G M R is high

6) When two conductors between each of radius 'r' are at a distance D, the capacitance between the two is proportional to _____
a) loge (D/r) b) loge (r/D)
c) 1/loge (D/r) d) 1/loge (r/D)

7) Find the inductance per km of a 3- phase transmission line using 1.24 cm diameter conductors when these are placed at the corners of an equilateral triangle of each side 2 m.

a) 3.2 mH/Km b) 2.1 mH/Km
c) 1.205 mH/Km d) 2.3 mH/Km

8) In triangular configuration, inductance and capacitance values are _____ and _____ respective.

a) Less, Less b) Higher, Higher
c) Less, Higher d) Higher, Less

9) What is the purpose of bedding on the underground cables?

a) To avoid leakage of current
b) To protect the sheath against corrosion
c) To protect the sheath from mechanical injury due to armoring
d) Both (b) and (c)

10) The cable best suited for the transmission of voltages from 33 kV to 66kV is _____

a) Belted cables b) Screened cables
c) Pressure cables d) None of these

11) What does capacitance grade of cables mean?

a) Use of dielectrics in different concentrations.
b) Introduction of capacitance at various lengths of cable to counter the effect of inductance.
c) Use of dielectrics of different permittivity's.
d) Grading according to capacitance per km length of the cable.

12) In long transmission lines Resistance and Capacitance parameters of lines are connected in _____

a) Series, shunt b) Series, series
c) Shunt, shunt d) Shunt, parallel

13) In nominal-π method of solution of medium transmission line, capacitance is assumed to be _____

a) Distributed uniformly from sending end to receiving end
b) Divided into two halves
c) Lumped at the generation end
d) Lumped at middle of generation and load end

14) Which of the following distribution system is more reliable?

a) Radial system b) Tree system
c) Ring main system d) All are equally reliable

Seat No.

Section – I

Q.2 Attempt any four **16**

a) Define corona discharge; enlist and describe in brief various methods of reducing the corona effect.

b) Calculate the loop inductance per km of a single-phase overhead line consisting of two conductors each 1 cm diameter and 1.2 m apart.

c) What is meant by sag? Derive an expression for sag in a transmission line having equal level of supports.

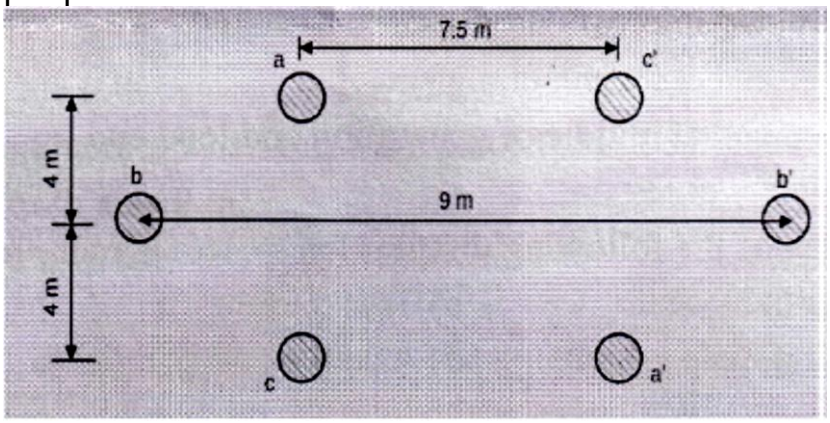
d) Derive the expression for capacitance of a single core underground cable with neat schematic diagram.

e) Find the line to line capacitance(Cab) per km of a three phase transmission line using 1.24 cm diameter conductor when these are placed at the corners of an equilateral triangle of each side 2m.

Q.3 Attempt any two. **12**

a) Derive the expression for Capacitance of 3-ph single circuit overhead triangular configuration of transmission line for symmetrical spacing.

b) The double circuit three-phase line has the configuration shown in figure the distance between conductor a and c' is 7.5 between b and b' is 9 m and between a and c is 8 m. Find inductance per kilometer per phase. The radius of each conductor is 1.25 cm.



c) Explain the following methods of cable grading with neat sketch:
i) Capacitance grading
ii) Inter-sheath grading

Section – II

Q.4 Attempt any four. **16**

a) Describe with neat diagram following AC Distribution System
   i) Radial system
   ii) Ring main system

b) Draw and describe the uniformly loaded distributor fed at one end in DC system with a point of minimum potential, maximum and minimum voltage drops.

c) Explain in detail effect of Power Factor on Voltage regulation, Losses, efficiency in case of transmission line.

d) Define and explain brief following terms: feeders, distributor and service mains with neat schematic diagram in case of AC Distribution System.

e) Enlist and explain brief different advantages and limitation of EHVAC Transmission System.

Q.5 Attempt any two. **12**

a) Explain in details with neat circuit and phasor/Vector diagram performance analysis of short transmission line.

b) Enlist various types of HV DC Transmission System and describe in brief with neat circuit diagram.
   i) Mono Polar and
   ii) Bipolar

HVDC Transmission System with advantages and disadvantages.

c) A 3-ph, 50 Hz OH lines 100km long has the following constant:
Resistance/ Km/phase=0.1Ω Inductive reactance /km/phase=0.2 Ω
Capacitive Susceptance/km/phase=0.04×10^4 Siemens
Determine:
   i) The sending end current
   ii) Sending end voltage
   iii) Sending end power factor and
   iv) Transmission efficiency when supporting a balanced load of 10000KW a 66 KV. P.F. 0.8 lagging. Use nominal T method

a) G M D is high b) G M R is high
c) Both G M D and G M R are high d) G M D is low but G M R is high

10) When two conductors between each of radius 'r' are at a distance D, the capacitance between the two is proportional to _____

a) loge (D/r) b) loge (r/D)
c) 1/loge (D/r) d) 1/loge (r/D)

11) Find the inductance per km of a 3- phase transmission line using 1.24 cm diameter conductors when these are placed at the corners of an equilateral triangle of each side 2 m.

a) 3.2 mH/Km b) 2.1 mH/Km
c) 1.205 mH/Km d) 2.3 mH/Km

12) In triangular configuration, inductance and capacitance values are _____ and _____ respective.

a) Less, Less b) Higher, Higher
c) Less, Higher d) Higher, Less

13) What is the purpose of bedding on the underground cables?

a) To avoid leakage of current
b) To protect the sheath against corrosion
c) To protect the sheath from mechanical injury due to armoring
d) Both (b) and (c)

14) The cable best suited for the transmission of voltages from 33 kV to 66kV is _____

a) Belted cables b) Screened cables
c) Pressure cables d) None of these

Set **R**

S.Y. (B.Tech.) (Sem - II) (New) (NEP CBCS) Examination: March/April-2025
ELECTRICAL ENGINEERING
Electrical Transmission and Distribution (EEPCC-04)

Day & Date: Monday 26-05-2025 Max. Marks: 56
Time: 10:00 AM To 01:00 PM

Instructions: 1) All questions are compulsory.
2) Figures to the right indicate full marks.

Section – I

Q.2 Attempt any four **16**

a) Define corona discharge; enlist and describe in brief various methods of reducing the corona effect.

b) Calculate the loop inductance per km of a single-phase overhead line consisting of two conductors each 1 cm diameter and 1.2 m apart.

c) What is meant by sag? Derive an expression for sag in a transmission line having equal level of supports.

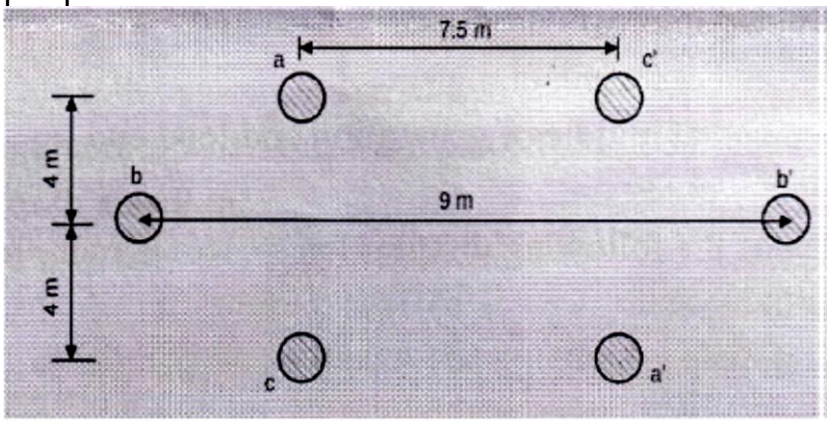
d) Derive the expression for capacitance of a single core underground cable with neat schematic diagram.

e) Find the line to line capacitance(Cab) per km of a three phase transmission line using 1.24 cm diameter conductor when these are placed at the corners of an equilateral triangle of each side 2m.

Q.3 Attempt any two. **12**

a) Derive the expression for Capacitance of 3-ph single circuit overhead triangular configuration of transmission line for symmetrical spacing.

b) The double circuit three-phase line has the configuration shown in figure the distance between conductor a and c' is 7.5 between b and b' is 9 m and between a and c is 8 m. Find inductance per kilometer per phase. The radius of each conductor is 1.25 cm.



c) Explain the following methods of cable grading with neat sketch:
i) Capacitance grading
ii) Inter-sheath grading

Section – II

Q.4 Attempt any four. **16**

a) Describe with neat diagram following AC Distribution System
   i) Radial system
   ii) Ring main system

b) Draw and describe the uniformly loaded distributor fed at one end in DC system with a point of minimum potential, maximum and minimum voltage drops.

c) Explain in detail effect of Power Factor on Voltage regulation, Losses, efficiency in case of transmission line.

d) Define and explain brief following terms: feeders, distributor and service mains with neat schematic diagram in case of AC Distribution System.

e) Enlist and explain brief different advantages and limitation of EHVAC Transmission System.

Q.5 Attempt any two. **12**

a) Explain in details with neat circuit and phasor/Vector diagram performance analysis of short transmission line.

b) Enlist various types of HV DC Transmission System and describe in brief with neat circuit diagram.
   i) Mono Polar and
   ii) Bipolar

HVDC Transmission System with advantages and disadvantages.

c) A 3-ph, 50 Hz OH lines 100km long has the following constant:
Resistance/ Km/phase=0.1Ω Inductive reactance /km/phase=0.2 Ω
Capacitive Susceptance/km/phase=0.04×10^4 Siemens
Determine:
   i) The sending end current
   ii) Sending end voltage
   iii) Sending end power factor and
   iv) Transmission efficiency when supporting a balanced load of 10000KW a 66 KV. P.F. 0.8 lagging. Use nominal T method

Electrical Transmission and Distribution (EEPCC-04)

Day & Date: Monday 26-05-2025 Max. Marks: 70
Time: 10:00 AM To 01:00 PM

Instructions: 1) Q. No. 1 is compulsory. It should be solved in the first 30 minutes in Answer Book Page no 03 (Starting page of the Answer Book). Each question carries one mark.
2) Don't forget to Mention question paper set (P/Q/R/S) on top of page.
3) Figures to the right indicates full marks.

MCQ/Objective Type Questions

Duration: 30 Minutes Marks:14

Q.1 Choose the Correct Alternatives from the Options and Rewrite the Sentence. **14**

1) When two conductors between each of radius 'r' are at a distance D, the capacitance between the two is proportional to _____
a) loge (D/r) b) loge (r/D)
c) 1/loge (D/r) d) 1/loge (r/D)

2) Find the inductance per km of a 3- phase transmission line using 1.24 cm diameter conductors when these are placed at the corners of an equilateral triangle of each side 2 m.
a) 3.2 mH/Km b) 2.1 mH/Km
c) 1.205 mH/Km d) 2.3 mH/Km

3) In triangular configuration, inductance and capacitance values are _____ and _____ respective.
a) Less, Less b) Higher, Higher
c) Less, Higher d) Higher, Less

4) What is the purpose of bedding on the underground cables?
a) To avoid leakage of current
b) To protect the sheath against corrosion
c) To protect the sheath from mechanical injury due to armoring
d) Both (b) and (c)

5) The cable best suited for the transmission of voltages from 33 kV to 66kV is _____
a) Belted cables b) Screened cables
c) Pressure cables d) None of these

6) What does capacitance grade of cables mean?
a) Use of dielectrics in different concentrations.
b) Introduction of capacitance at various lengths of cable to counter the effect of inductance.
c) Use of dielectrics of different permittivity's.
d) Grading according to capacitance per km length of the cable.

7) In long transmission lines Resistance and Capacitance parameters of lines are connected in _____
a) Series, shunt b) Series, series
c) Shunt, shunt d) Shunt, parallel

8) In nominal-π method of solution of medium transmission line, capacitance is assumed to be _____
a) Distributed uniformly from sending end to receiving end
b) Divided into two halves
c) Lumped at the generation end
d) Lumped at middle of generation and load end

9) Which of the following distribution system is more reliable?
a) Radial system b) Tree system
c) Ring main system d) All are equally reliable

10) The sag of a transmission line depends upon _____
a) Weight of conductor and directly proportional to span length
b) Weight of conductor and inversely proportional to span length
c) Weight of conductor and directly proportional to the square of span length
d) Weight of conductor and inversely proportional to the square of span length

11) The maximum tension in a section of overhead line conductor between two supports of unequal height occurs at _____
a) The higher support b) The lower point
c) The midpoint of the conductor d) None of the above

12) Corona is accompanied by _____
a) Violet visible light b) Hissing sound
c) Power loss and interference d) all of the above

13) Transmission line constants are _____
a) Capacitance b) Inductance
c) Resistance d) All of these

14) The inductance of line is minimum when _____
a) G M D is high b) G M R is high
c) Both G M D and G M R are high d) G M D is low but G M R is high

MCQ/Objective Type Questions

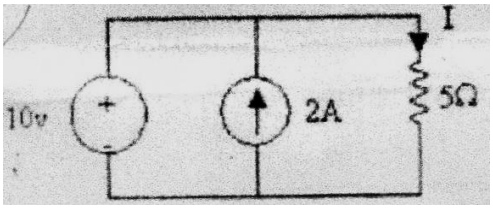
Duration: 30 Minutes Marks:14

Q.1 Choose the correct Answer. **14**

1) In an electrical circuit dual of inductance is _____.
a) conductance b) resistance
c) capacitance d) susceptance

2) Four equal value resistors are connected in parallel. 5 V voltage is applied across the parallel circuit and 2.5 A current are measured from the source. What is the value of each resistor?
a) 4Ω b) 8Ω
c) 2.5Ω d) 5Ω

3) Calculate current I of the circuit shown below.



a) 4 A b) 2 A
c) -2 A d) -4 A

4) Application of Norton's theorem to a circuit yield _____
a) equivalent current source and impedance in series
b) equivalent current source and impedance in parallel
c) equivalent impedance
d) equivalent current source

5) The number of independent loops for a network with n nodes and b branches is _____
a) $n-1$ b) $b-n$
c) $b-n+1$ d) independent of the number of nodes

6) Between two open circuited terminals the current is _____.

a) Minimum b) Maximum
c) Zero d) None of the above

7) Superposition theorem is not applicable to network containing _____

a) Nonlinear elements
b) Dependent voltage source
c) Dependent current source
d) Transformers

8) The time constant of RC circuit is _____

a) RC b) C/R
c) R/C d) R

9) Laplace transform of a unit ramp function is _____.

a) 1 b) s
c) 1/s d) 1/s2

10) The value of impulse function for t > 0

a) Zero b) Unity
c) K where k is a constant d) Infinity

11) A capacitor does not allow sudden changes in _____.

a) currents b) Voltages
c) both a and b d) none of Above

12) Transients are presents in the circuit when the circuit is having _____

a) R b) L
c) C d) either b) or c)

13) For a 2-port network to be reciprocal, _____.

a) $Z_{11} = Z_{22}$ b) $Y_{21} = Y_{22}$
c) $h_{21} = -h_{12}$ d) $AD - BC = 0$

14) Which parameters are widely used in transmission line theory?

a) Z parameters b) ABCD parameters
c) Y parameters d) h parameters

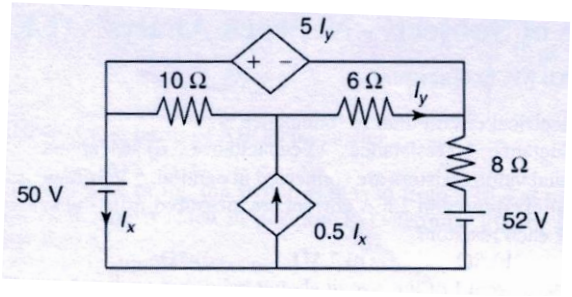
2) Figures to the right indicate full marks.

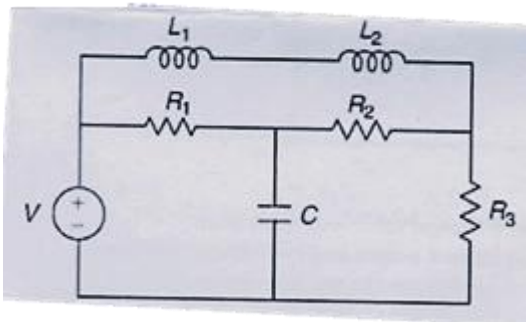
Section – I

Q.2 Attempt any four **16**

a) Find current through the 8Ω resistor by using mesh analysis.

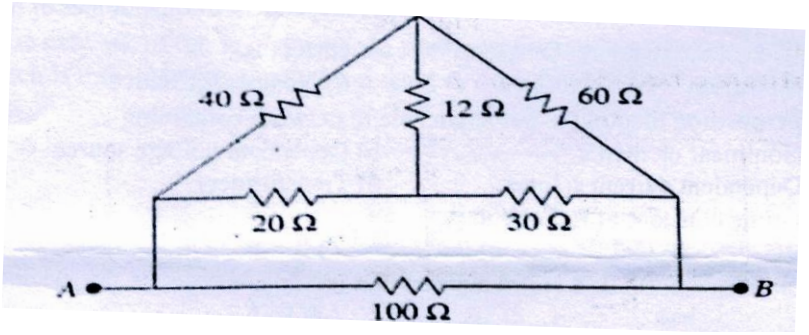


b) Draw the dual of the network.

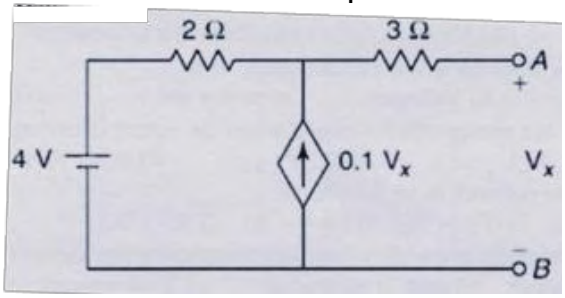


c) State and explain the Maximum Power transfer Theorem. Also derive the condition to deliver Maximum Power.

d) Find the Equivalent Resistance between terminal A&B.

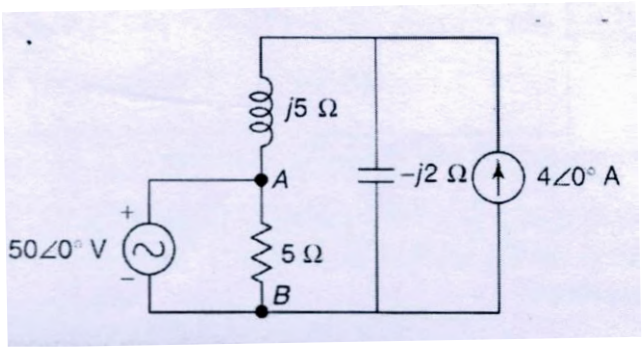


e) Find the Thevenin's equivalent network for the terminals A and B.

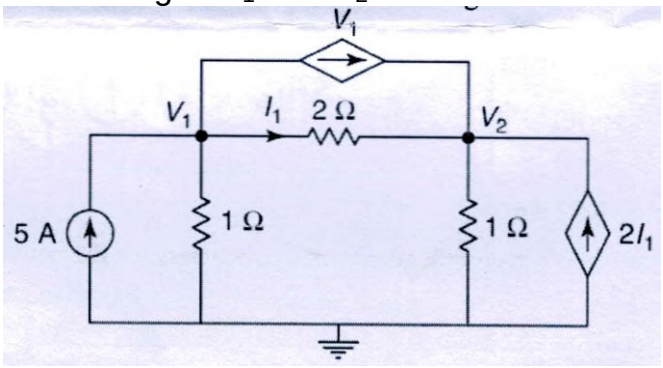


Q.3 Solve any two **12**

a) Determine the voltage V_{AB} for the network shown in Fig. Using Superposition Theorem.

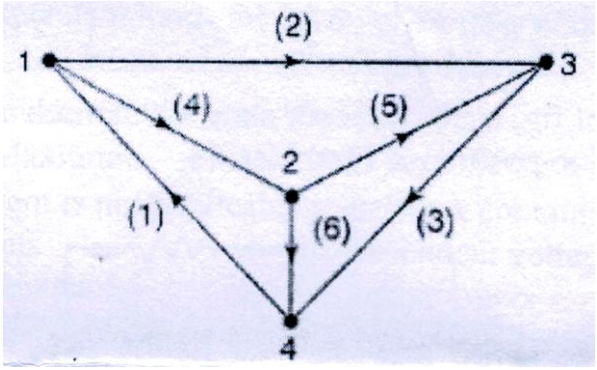


b) Find voltages V_1 and V_2 in the network shown in Fig.



c) The graph of a network shown in fig. write

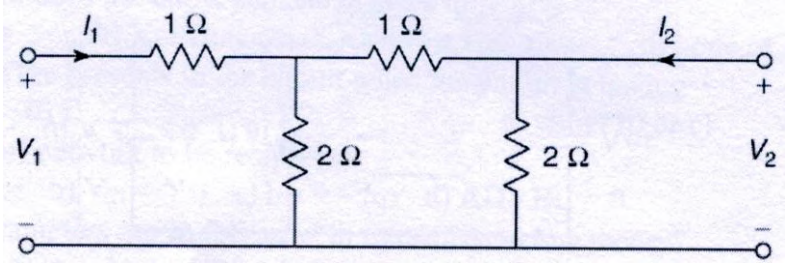
i) Incidence matrix
ii) Tie set matrix
iii) Cut set matrix



Section – II

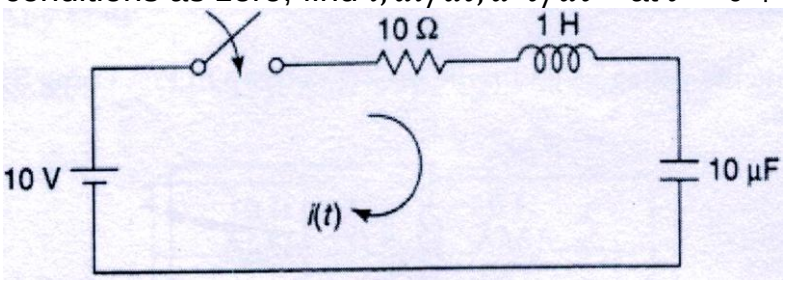
Q.4 Solve any four. **16**

a) Determine transmission parameters for the given network.



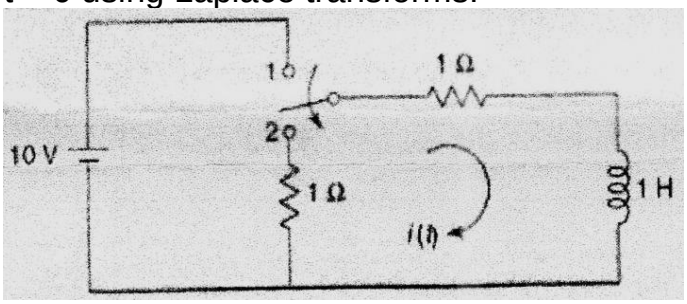
b) Derive an expression for response given by RL circuit.

c) In the network shown, the switch is closed. Assuming all initial conditions as zero, find $i, di/dt, d^2t/dt^2$ at $t = 0+$



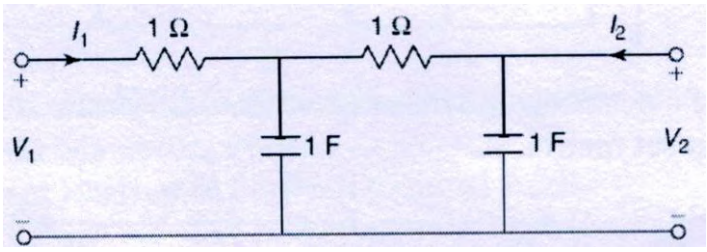
d) Derive Z parameter in terms of ABCD parameter.

e) In the network shown in fig. the switch is moved from 1 to 2 at t = 0. Steady state condition having reached in position 1. Determine i(t) for t > 0 using Laplace transforms.

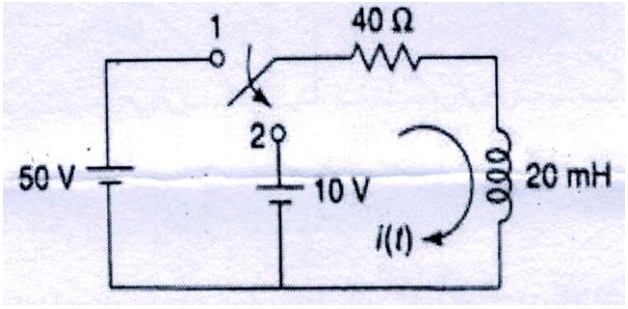


Q.5 Attempt any two of the following. **12**

a) Determine the short-circuit admittance parameters for the network shown in Fig.



b) In the network of fig, is under steady state with switch is at position 1, at switch is moved to position 2. Find i (t).



c) The switch in the network shown in Fig. is closed at $t = 0$. Determine the voltage cross the capacitor using Laplace transform approach.

Set **S**

S.Y. (B.Tech.) (Sem - II) (New) (NEP CBCS) Examination: March/April-2025
ELECTRIAL ENGINEERING
Network Analysis (EEPCC-05)

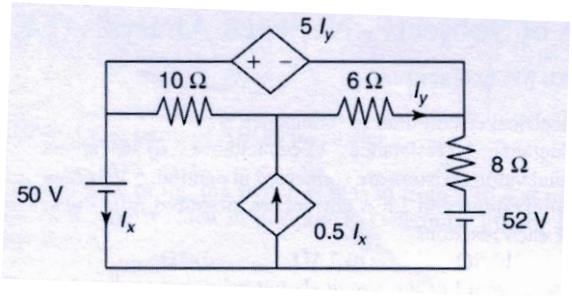
Day & Date: Wednesday 28-05-2025 Max. Marks: 56
Time: 10:00 AM To 01:00 PM

Instructions: 1) All questions are Compulsory.
2) Figures to the right indicate full marks.

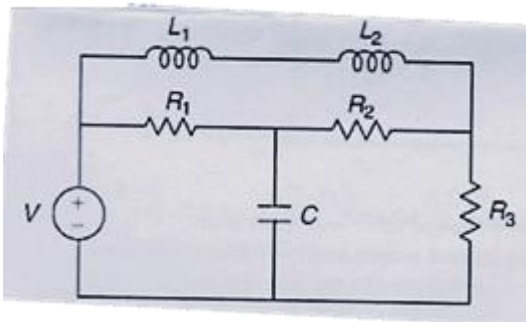
Section – I

Q.2 Attempt any four **16**

a) Find current through the 8Ω resistor by using mesh analysis.

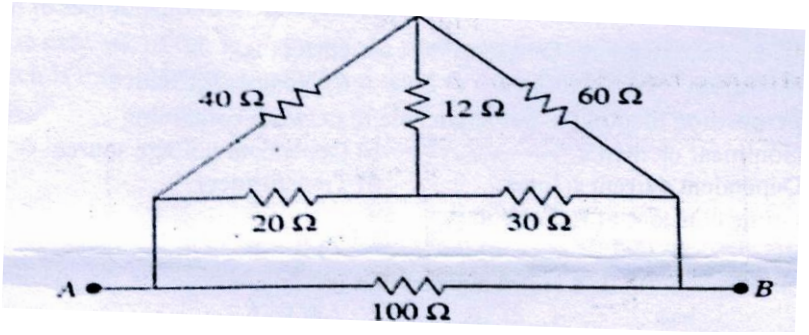


b) Draw the dual of the network.

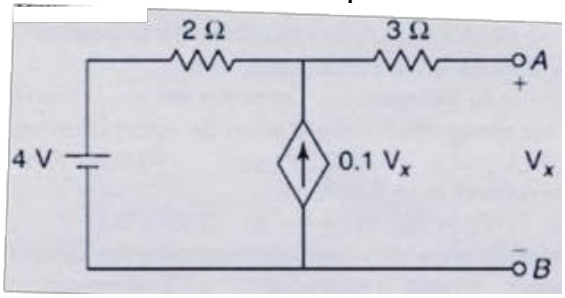


c) State and explain the Maximum Power transfer Theorem. Also derive the condition to deliver Maximum Power.

d) Find the Equivalent Resistance between terminal A&B.

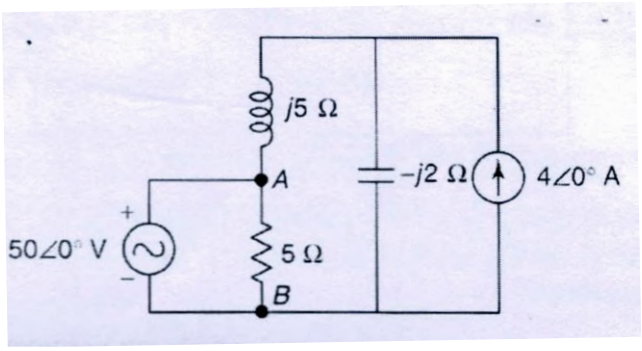


e) Find the Thevenin's equivalent network for the terminals A and B.

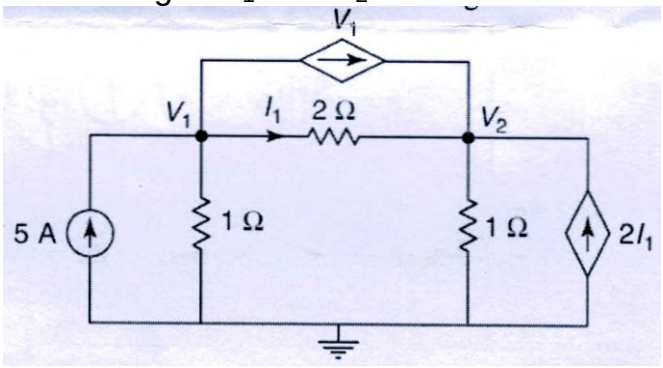


Q.3 Solve any two **12**

a) Determine the voltage V_{AB} for the network shown in Fig. Using Superposition Theorem.

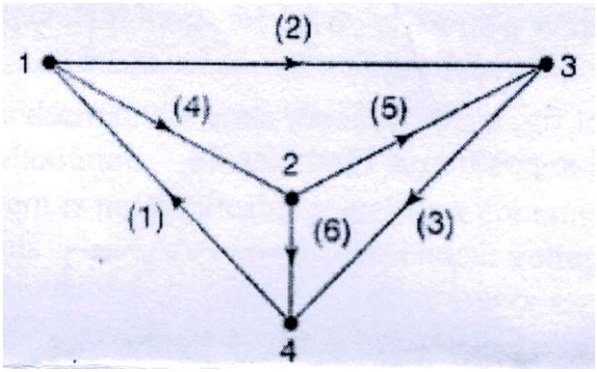


b) Find voltages V_1 and V_2 in the network shown in Fig.



c) The graph of a network shown in fig. write

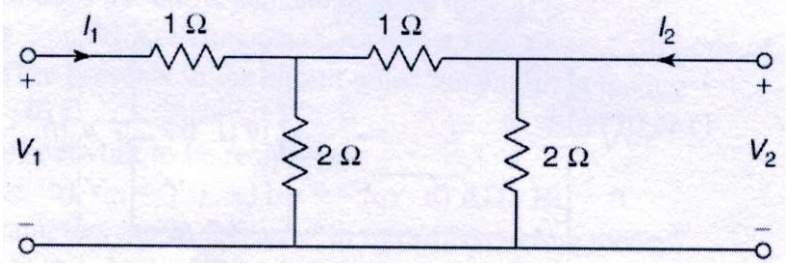
i) Incidence matrix
ii) Tie set matrix
iii) Cut set matrix



Section – II

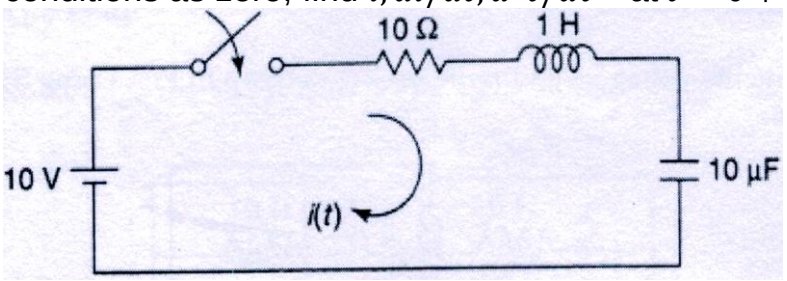
Q.4 Solve any four. **16**

a) Determine transmission parameters for the given network.



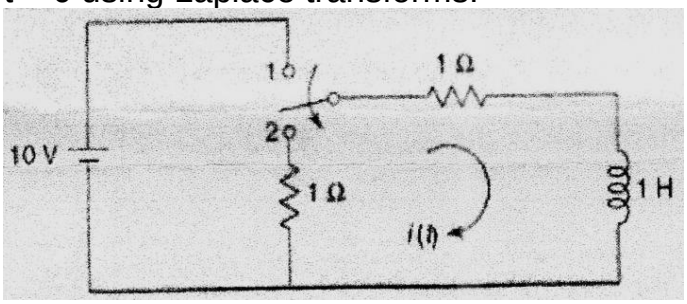
b) Derive an expression for response given by RL circuit.

c) In the network shown, the switch is closed. Assuming all initial conditions as zero, find $i, di/dt, d^2t/dt^2$ at $t = 0+$



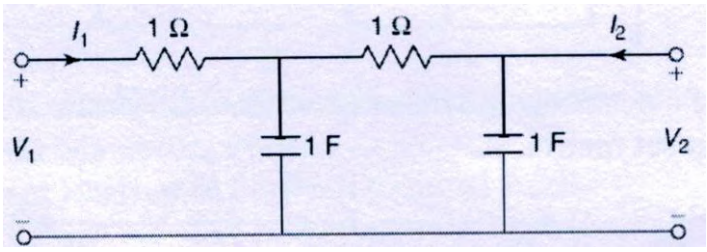
d) Derive Z parameter in terms of ABCD parameter.

e) In the network shown in fig. the switch is moved from 1 to 2 at t = 0. Steady state condition having reached in position 1. Determine i(t) for t > 0 using Laplace transforms.

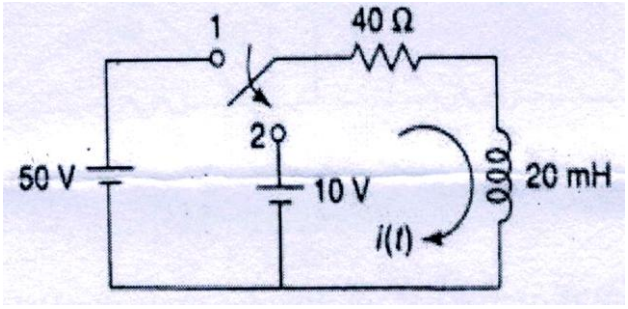


Q.5 Attempt any two of the following. **12**

a) Determine the short-circuit admittance parameters for the network shown in Fig.



b) In the network of fig, is under steady state with switch is at position 1, at switch is moved to position 2. Find i (t).



c) The switch in the network shown in Fig. is closed at $t = 0$. Determine the voltage cross the capacitor using Laplace transform approach.

S.Y. (B.Tech.) (Sem - II) (New) (NEP CBCS) Examination: March/April-2025
ELECTRICAL ENGINEERING
AC Machines (EEPCC-06)

Day & Date: Friday 30-05-2025 Max. Marks: 70
Time: 10:00 AM To 01:00 PM

Instructions: 1) Q. No. 1 is compulsory. It should be solved in the first 30 minutes in Answer Book Page no 03 (Starting page of the Answer Book). Each question carries one mark.
2) Don't forget to Mention question paper set (P/Q/R/S) on top of page.
3) Draw neat diagrams whenever necessary.
4) Assume suitable data if necessary.

MCQ/Objective Type Questions

Duration: 30 Minutes Marks:14

Q.1 Choose the correct answer: **14**

1) A three-phase slip ring induction motor is fed from the rotor side with the stator winding short- circuited. The frequency of the current flowing in the short-circuited stator is _____
a) Slip frequency
b) Supply frequency
c) The frequency corresponding to rotor speed
d) Zero

2) A 3-phase induction motor with its rotor blocked behaves similar to a _____
a) transformer under open circuit of secondary
b) transformer under short circuit of secondary terminals
c) synchronous motor under slip test
d) synchronous motor under open circuit

3) The great advantage of the double squirrel-cage induction motor over single cage rotor is that its _____
a) efficiency is higher b) power factor is higher
c) slip is larger d) starting current is lower

4) Starters are required in the induction motor because _____
a) torque produced is very low at starting to overcome inertia
b) they are not self starting
c) of high starting current
d) all of the mentioned

5) Circle diagram of an induction motor is graphical representation of _____
a) its equivalent circuit
b) its rotor equivalent
c) its stator equivalent
d) its stationary equivalent circuit

6) Blocked rotor test comprises of _____
a) rotor copper and stator core losses
b) rotor and stator copper losses
c) rotor core losses
d) stator copper losses

7) The method which can be used for the speed control of induction motor from stator side is _____
a) V / f control
b) Controlling number of stator poles to control Ns
c) Adding rheostats in stator circuit
d) All of these

8) According to double revolving field theory, any alternating quantity can be resolved into two rotating components. The directions and magnitude of these components are _____
a) Same directions, each having magnitude equal to the maximum magnitude of alternating current
b) Opposite directions, each having magnitude equal to the maximum magnitude of alternating current
c) Opposite directions, each having magnitude half of the maximum magnitude of alternating current
d) Same directions, each having magnitude half of the maximum magnitude of alternating current

9) The spit phase induction motor has _____
a) Low starting current and high starting torque
b) Moderate starting current and moderate starting torque
c) Low starting current and moderate starting torque
d) Moderate starting current and low starting torque

10) When the load on an alternator is varied, its terminal voltage also changes due to _____
a) armature resistance
b) leakage reactance
c) armature reaction
d) all of the mentioned

11) Emf method of finding voltage regulation of alternator is also known as _____
a) pessimistic method
b) optimistic method
c) zero power factor method
d) none of the mentioned

12) Synchronous reactance of an alternator represents _____
a) armature reaction reactance and leakage reactance.
b) leakage reactance and field winding reactance.
c) field winding reactance and armature reaction reactance
d) a reactance connected in series with a synchronous generator.

13) When synchronous motor is running at synchronous speed, the damper winding produces?
a) damping torque
b) eddy current torque
c) no torque
d) torque aiding the developed torque

14) What are the probable causes of hunting?
a) sudden change in load
b) fault in supply
c) sudden change in field current
d) all of the mentioned

Instructions: 1) All questions are compulsory.
2) Figures to the right indicate full marks.
3) Draw neat diagrams whenever necessary.
4) Assume suitable data if necessary.

Section – I

Q.2 Attempt any four of the following: **16**

a) Explain the concept of rotating magnetic field (RMF) in three phase induction motor.

b) Explain the effect of slip on various parameters of rotor.

c) Draw and explain torque-slip characteristics of three phase induction motor.

d) A 440 V, 50 Hz, 6-pole, 3-phase induction motor draws an input power of 81 kW from the mains. The rotor emf makes 120 complete cycle per minute. Its stator losses are 1 kW and rotor current per phase is 65 ampere. Calculate:
(i) Rotor copper losses per phase;
(ii) Rotor resistance per phase

e) Explain with the help of a neat sketch the working of a star-delta starter.

f) Explain V/f method of speed control of 3-phase induction motor.

Q.3 Attempt the following: **12**

a) Derive the torque equation of three phase induction motor. Also derive the condition for maximum torque in case of three phase induction motor.

b) Draw the circle diagram and determine the line current and power factor at rated output for a 415 V, 29.84 kW, 50 Hz delta connected motor. The following test data is available:
No-load test: 415 V; 21 A; 1250 W
Blocked-rotor test: 100 V; 45 A; 2730 W
Assume that stator copper losses are equal to rotor copper losses at standstill.

OR

Explain slip-power recovery scheme of speed control 3-phase slip-ring induction motor.

Section – II

Q.4 Attempt any four of the following **16**

a) Explain why single phase induction motor is not self started.

b) Explain the construction and working of a single-phase capacitor start induction motor.

c) Explain the term Armature reaction in case of alternator. Explain armature reaction at lagging power factor.

d) Derive the generalized expression for an induced e.m.f. per phase in three phase alternator, when Winding is short pitched and distributed.

e) Explain working principle of synchronous motor.

f) Explain hunting of synchronous motor and methods of its prevention.

Q.5 Attempt any two of the following. **12**

a) Derive expression for pitch factor and distribution factor in alternator.

b) A 100 KVA, 3000 Volts, 50 Hz, 3- phase star connected alternator has effective armature resistance of 0.2 Ohm. The field current of 40 Amp produces a short circuit current of 200 Amp and an open circuit e.m.f. of 1040 (line value). Calculate the full load voltage regulation at 0.8 p.f. lagging and 0.8 p.f. leading. Draw phasor diagrams.

c) Explain the action of synchronous motor when loaded. Explain the effect of excitation on the Performance of a synchronous motor.

b) A 100 KVA, 3000 Volts, 50 Hz, 3- phase star connected alternator has effective armature resistance of 0.2 Ohm. The field current of 40 Amp produces a short circuit current of 200 Amp and an open circuit e.m.f. of 1040 (line value). Calculate the full load voltage regulation at 0.8 p.f. lagging and 0.8 p.f. leading. Draw phasor diagrams.

c) Explain the action of synchronous motor when loaded. Explain the effect of excitation on the Performance of a synchronous motor.

S.Y. (B.Tech.) (Sem - II) (New) (NEP CBCS) Examination: March/April-2025
ELECTRICAL ENGINEERING
Entrepreneurship and Innovation (OE-02A)

Day & Date: Tuesday 03-06-2025 Max. Marks: 70
Time: 10:00 AM To 01:00 PM

Instructions: 1) Q. No. 1 is compulsory. It should be solved in the first 30 minutes in Answer Book Page no 03 (Starting page of the Answer Book). Each question carries one mark.
2) Don't forget to Mention question paper set (P/Q/R/S) on top of page.
3) Figures to the right indicates full marks.
4) Use of non-programmable calculators is allowed.

MCQ/Objective Type Questions

Duration: 30 Minutes Marks:14

Q.1 Choose the correct Answer. **14**

1) Innovation can be best described as: _____
a) A new idea only
b) The process of creating value through ideas
c) Invention
d) None of the above

2) Entrepreneurship is primarily related to: _____
a) Administration b) Risk-taking
c) Planning d) None of these

3) Which of the following is not an entrepreneurial competency?
a) Innovation b) Leadership
c) Laziness d) Decision making

4) An entrepreneur operates: _____
a) Outside the organization b) Within an existing company
c) As a freelancer d) None

5) "Push" type innovation comes from: _____
a) Market needs b) Customer demands
c) Internal ideas d) Suppliers

6) Agile management promotes: _____
a) Linear process b) Flexibility and iteration
c) Bureaucracy d) None

7) Blue Ocean strategy refers to: _____
a) Competing in existing markets
b) Creating new market space
c) Losing market share
d) None

8) Which of these is not a barrier to innovation?
a) Risk-taking culture b) Resistance to change
c) Lack of resources d) Poor leadership

9) The shifting composition of the economy refers to: _____
a) Stable industries b) Changing business models
c) Static job roles d) None

10) Lean start-up encourages: _____
a) High upfront investment b) Rapid prototyping
c) Formal structure d) None

11) Legal considerations for entrepreneurs include: _____
a) Taxation b) IP protection
c) Contracts d) All of these

12) One of the seven sources of innovation is: _____
a) Competitor's failure b) Demographics
c) Inflation d) GDP

13) Entrepreneurial opportunity recognition is: _____
a) Unimportant b) Intuition-based only
c) Structured process d) Not taught

14) Six Thinking Hats is a method for: _____
a) Innovation testing b) Decision-making
c) Funding d) Legal advice

Instructions: 1) All questions are compulsory.
2) Figures to the right indicate full marks.

Section – I

Q.2 All questions are compulsory.

a) Define innovation. Explain its relationship with entrepreneurship. **06**
b) Distinguish between Entrepreneur, Manager, and Intrapreneur. **04**

Q.3 Solve any three questions.

a) Explain classification of innovation. **06**
b) Describe the economic theories of entrepreneurship. **06**
c) Discuss need and importance of Entrepreneurship Development. **06**
d) Describe sources of innovation with examples. **06**
e) Explain Agile management and NUF test in innovation. **06**

Section – II

Q.4 All questions are compulsory.

a) Explain the purpose and process of innovation. **06**
b) What are the needs for continuous learning in innovation? **04**

Q.5 Solve any three questions.

a) Explain different types of innovative strategies. **06**
b) Describe Red Ocean vs Blue Ocean strategies. **06**
c) List barriers to innovation and explain with examples. **06**
d) Explain the entrepreneurial process and opportunity recognition. **06**

MCQ/Objective Type Questions

Duration: 30 Minutes Marks:14

Q.1 Choose the correct alternatives from the options. **14**

1) The Occupational Health and Safety Management System (OHSMS) primarily aims to: _____
a) Increase industrial profits
b) Reduce energy consumption
c) Ensure worker safety and reduce health risks in workplaces
d) Promote environmental tourism

2) In-situ conservation refers to: _____
a) Conservation of species in zoos
b) Conservation using biotechnology
c) Conservation in gene banks
d) Conservation of species in their natural habitats

3) Carbon footprint is a measure of: _____
a) Land occupied by forests
b) Energy consumption in a home
c) Greenhouse gas emissions by an activity or person
d) Amount of carbon in plants

4) The main goal of sustainability is to: _____
a) Meet present needs without compromising future needs
b) Increase profit only
c) Eliminate economic development
d) Promote urbanization

5) Which of the following is an example of hazardous waste?
a) Expired medicines b) Plastic bottles
c) Food scraps d) Paper waste

6) Biodiversity hotspots in India include: _____
a) Eastern Ghats and Indo-Gangetic Plain
b) Western Ghats and the Himalayas
c) Thar Desert and Sundarbans only
d) Deccan Plateau and Indo-Gangetic Basin

7) The 3R concept stands for: _____
a) Reuse, Reduce, Rebuild
b) Reduce, Reuse, Recycle
c) Replace, Reuse, Restore
d) Recycle, Recover, Rebuild

8) The ISO 14000 Series deals with: _____
a) Energy-efficient building design
b) Environmental Management Systems
c) Industrial Safety Standards
d) Economic Performance Indicators

9) Which of the following is a non-conventional source of energy?
a) Coal
b) Natural Gas
c) Wind
d) Diesel

10) The main goal of a circular economy is to: _____
a) Increase fossil fuel usage
b) Promote single-use products
c) Minimize waste and resource use
d) Maximize profit only

11) The first step in preparing an Environmental Impact Assessment (EIA) report is: _____
a) Cost-benefit analysis
b) Monitoring
c) Screening
d) Public hearing

12) Which of the following is not a principle of Environmental Management?
a) Polluter pays
b) Sustainability
c) Preventive action
d) Maximum profit generation

13) Cost-Benefit Analysis (CBA) in environmental policies is used to: _____
a) Maximize pollution
b) Evaluate environmental legislation
c) Compare environmental costs with economic benefits
d) Promote industrialization

14) An ecosystem consists of: _____
a) Living organisms only
b) Non-living components only
c) Living organisms and their physical environment
d) Plants and animals only

Section – I

Q.2 Attempt the following **12**

a) Define the term "environment". Discuss the scope and importance of environmental studies. Why is there a need for public awareness?
b) Describe the causes and effects of air and water pollution. Suggest two preventive measures for each.
c) Define sustainability. Discuss any two major challenges in achieving sustainable development.

Q.3 Attempt Any Two **10**

a) What are hazardous wastes and e-wastes? How should they be managed?
b) What are carbon credits and carbon footprints? Explain with examples.
c) List any two Millennium Development Goals (MDGs). Mention one environmental protocol.

Q.4 Write short notes on any two of the following: **06**

a) Genetic diversity
b) India as a mega-diversity nation
c) In-situ and Ex-situ conservation

Section – II

Q.5 Write short notes on any two of the following: **10**

a) ISO 14000 Series
b) Sustainable Habitat - Green Buildings
c) Non-conventional energy sources

Q.6 Attempt the following **10**

a) Define Environmental Management. Discuss its nature, scope, and components.
b) Define the 3R concept and explain how it supports the zero waste approach.

Q.7 Attempt any two **08**

a) Define Environmental Management. Discuss its nature, scope, and components.

b) What is Environmental Policy Analysis? Distinguish between macro-level and micro-level analysis.

c) Outline the steps involved in the Environmental Impact Assessment (EIA) process.

d) Amount of carbon in plants

8) The main goal of sustainability is to: _____
a) Meet present needs without compromising future needs
b) Increase profit only
c) Eliminate economic development
d) Promote urbanization

9) Which of the following is an example of hazardous waste?
a) Expired medicines b) Plastic bottles
c) Food scraps d) Paper waste

10) Biodiversity hotspots in India include: _____
a) Eastern Ghats and Indo-Gangetic Plain
b) Western Ghats and the Himalayas
c) Thar Desert and Sundarbans only
d) Deccan Plateau and Indo-Gangetic Basin

11) The 3R concept stands for: _____
a) Reuse, Reduce, Rebuild b) Reduce, Reuse, Recycle
c) Replace, Reuse, Restore d) Recycle, Recover, Rebuild

12) The ISO 14000 Series deals with: _____
a) Energy-efficient building design
b) Environmental Management Systems
c) Industrial Safety Standards
d) Economic Performance Indicators

13) Which of the following is a non-conventional source of energy?
a) Coal b) Natural Gas
c) Wind d) Diesel

14) The main goal of a circular economy is to: _____
a) Increase fossil fuel usage
b) Promote single-use products
c) Minimize waste and resource use
d) Maximize profit only

Set **R**

S.Y. (B.Tech.) (Sem - II) (New) (NEP CBCS) Examination: March/April-2025
ELECTRICAL ENGINEERING
Environmental Sustainability (OE-02B)

Day & Date: Tuesday 03-06-2025 Max. Marks: 56
Time: 10:00 AM To 01:00 PM

Instructions: 1) All questions are compulsory.
2) Figures to the right indicate full marks.

Section – I

Q.2 Attempt the following **12**

a) Define the term "environment". Discuss the scope and importance of environmental studies. Why is there a need for public awareness?
b) Describe the causes and effects of air and water pollution. Suggest two preventive measures for each.
c) Define sustainability. Discuss any two major challenges in achieving sustainable development.

Q.3 Attempt Any Two **10**

a) What are hazardous wastes and e-wastes? How should they be managed?
b) What are carbon credits and carbon footprints? Explain with examples.
c) List any two Millennium Development Goals (MDGs). Mention one environmental protocol.

Q.4 Write short notes on any two of the following: **06**

a) Genetic diversity
b) India as a mega-diversity nation
c) In-situ and Ex-situ conservation

Section – II

Q.5 Write short notes on any two of the following: **10**

a) ISO 14000 Series
b) Sustainable Habitat - Green Buildings
c) Non-conventional energy sources

Q.6 Attempt the following **10**

a) Define Environmental Management. Discuss its nature, scope, and components.
b) Define the 3R concept and explain how it supports the zero waste approach.

Q.7 Attempt any two **08**

a) Define Environmental Management. Discuss its nature, scope, and components.

b) What is Environmental Policy Analysis? Distinguish between macro-level and micro-level analysis.

c) Outline the steps involved in the Environmental Impact Assessment (EIA) process.

ELECTRICAL ENGINEERING
Environmental Sustainability (OE-02B)

Day & Date: Tuesday 03-06-2025 Max. Marks: 70
Time: 10:00 AM To 01:00 PM

Instructions: 1) Q. No. 1 is compulsory. It should be solved in the first 30 minutes in Answer Book Page no 03 (Starting page of the Answer Book). Each question carries one mark.
2) Don't forget to Mention question paper set (P/Q/R/S) on top of page.
3) Figures to the right indicates full marks.

MCQ/Objective Type Questions

Duration: 30 Minutes Marks:14

Q.1 Choose the correct alternatives from the options. **14**

1) Biodiversity hotspots in India include: _____
a) Eastern Ghats and Indo-Gangetic Plain
b) Western Ghats and the Himalayas
c) Thar Desert and Sundarbans only
d) Deccan Plateau and Indo-Gangetic Basin

2) The 3R concept stands for: _____
a) Reuse, Reduce, Rebuild b) Reduce, Reuse, Recycle
c) Replace, Reuse, Restore d) Recycle, Recover, Rebuild

3) The ISO 14000 Series deals with: _____
a) Energy-efficient building design
b) Environmental Management Systems
c) Industrial Safety Standards
d) Economic Performance Indicators

4) Which of the following is a non-conventional source of energy?
a) Coal b) Natural Gas
c) Wind d) Diesel

5) The main goal of a circular economy is to: _____
a) Increase fossil fuel usage
b) Promote single-use products
c) Minimize waste and resource use
d) Maximize profit only

6) The first step in preparing an Environmental Impact Assessment (EIA) report is: _____
a) Cost-benefit analysis b) Monitoring
c) Screening d) Public hearing

7) Which of the following is not a principle of Environmental Management?
a) Polluter pays
b) Sustainability
c) Preventive action
d) Maximum profit generation

8) Cost-Benefit Analysis (CBA) in environmental policies is used to: _____
a) Maximize pollution
b) Evaluate environmental legislation
c) Compare environmental costs with economic benefits
d) Promote industrialization

9) An ecosystem consists of: _____
a) Living organisms only
b) Non-living components only
c) Living organisms and their physical environment
d) Plants and animals only

10) The Occupational Health and Safety Management System (OHSMS) primarily aims to: _____
a) Increase industrial profits
b) Reduce energy consumption
c) Ensure worker safety and reduce health risks in workplaces
d) Promote environmental tourism

11) In-situ conservation refers to: _____
a) Conservation of species in zoos
b) Conservation using biotechnology
c) Conservation in gene banks
d) Conservation of species in their natural habitats

12) Carbon footprint is a measure of: _____
a) Land occupied by forests
b) Energy consumption in a home
c) Greenhouse gas emissions by an activity or person
d) Amount of carbon in plants

13) The main goal of sustainability is to: _____
a) Meet present needs without compromising future needs
b) Increase profit only
c) Eliminate economic development
d) Promote urbanization

14) Which of the following is an example of hazardous waste?
a) Expired medicines
b) Plastic bottles
c) Food scraps
d) Paper waste

MCQ/Objective Type Questions

Duration: 30 Minutes Marks:14

Q.1 Choose the correct Answer. **14**

1) Which is the primary advantage of using solar energy power generation?
a) Low initial coast
b) Reduce environmental impact
c) Do not require large area
d) Simple storage method

2) OTEC stands for _____.
a) Ocean thermal energy conversion
b) Ocean thermal energy Component
c) Ocean thermal energy contact
d) Ocean thermodynamic energy conversion

3) Which of the following common application of solar energy?
a) Generating electricity
b) Heating water
c) Providing power for electronic device
d) All of the above

4) Passive solar energy refers to trapping the Suns energy _____.
a) Using mechanical devices
b) without using mechanical devices
c) Using chemical
d) Incineration

5) The process or digestion taking place in the presence of air is called as _____.
a) Aerobic digestion b) Anaerobic digestion
c) Hydrolysis d) None of these

6) Which type of renewable energy resources generate low power energy?

a) Biomass b) Solar
c) Wind d) All of the above

7) In wind turbine gear box is used to _____.

a) Step up the speed b) Reduce the speed
c) shut down d) None of these

8) Geothermal energy present _____ of the earth.

a) Rotation b) Exterior
c) North side d) Interior

9) Biogas is the gaseous fuel which is obtained from biomass by means of _____ fermentation.

a) Aerobic b) Anaerobic
c) Constant d) None of the above

10) _____ is produced by blending of vegetable oil.

a) CNG b) Methane gas
c) Biofuel d) Biodisel

11) Availability of Solar energy on the earth surface is _____MW.

a) 190 billion b) 178 billion
c) 150 billion d) 250 billion

12) Energy is _____ of substance or a body to do work.

a) Obesity b) Power
c) Capacity d) None of the above

13) Wind energy used from _____ years ago.

a) 3000 b) 2000
c) 6000 d) 5000

14) The major source of the Geothermal energy is _____.

a) Water b) Hot water reservoir
c) Oil d) Gas

Q.2 Attempt any Four **16**

a) Explain advantages of biomass energy.
b) Explain in detail scope of renewable energy.
c) What is biomass energy and explain resources of biomass energy.
d) Write a note on applications of solar energy.
e) Explain function of biogas digester.
f) Write a note on aerobic and anaerobic digestion.

Q.3 Attempt any two. **12**

a) Explain Solar photovoltaic technology.
b) Explain Basic components of wind energy conversion system.
c) Explain in detail advantages and disadvantages of renewable energy.
d) Explain in detail advantage and disadvantage of Solar energy.

Section – II

Q.4 Attempt any Four. **16**

a) Write a note on wave energy.
b) Merits and demerits of hydropower energy.
c) Explain specifications of energy storage devices.
d) Main parts of hydropower station.
e) Importance of tidal energy.
f) Importance of energy storage devices

Q.5 Attempt any two. **12**

a) Write a note on potential of wave energy in India.
b) Explain different methods of energy storage.
c) Explain with neat diagram hydropower plant.
d) Explain in detail ocean thermal energy conversion (OTEC).

MCQ/Objective Type Questions

Duration: 30 Minutes Marks:14

Q.1 Choose the correct answer. **14**

1) An instrument transformer is used to extend the range of _____.
a) induction instrument b) electrostatic instrument
c) moving coil instrument d) any of the above

2) The internal resistance of an ammeter should be _____.
a) Very small b) Medium
c) High d) Infinity

3) The smallest change which a sensor can detect is termed: _____
a) Accuracy b) Precision
c) Resolution d) Scale

4) Sensor effectiveness depends on _____ parameter.
a) Sensitivity b) Radiation
c) Restively d) All the above

5) The desirable static characteristics of a measuring system are _____
a) accuracy and drift
b) accuracy, sensitivity and reproducibility
c) drift and dead zone
d) static error

6) A _____ device prevents the oscillation of the moving system and enables the latter to reach its final position quickly.
a) Deflecting b) Controlling
c) Damping d) any of the above

7) _____ is an instrument which measures the insulation resistance of an electric circuit relative to earth and one another.
a) Tangent galvanometer
b) Megger
c) Current transformer
d) None of the above

8) Which of the following is a key characteristic of a sensor?
a) It can only measure temperature
b) It is an active component
c) It converts physical parameters into an electrical signal
d) Il requires no external power

9) Which of the following is a type of magnetic sensor?
a) Thermistor
b) Strain gauge
c) Hall effect sensor
d) LVDT

10) Typical conversion speed of ADC is _____
a) Less than 1 μs
b) Less than 100 μs
c) Less than 500 μs
d) Greater than 1000 μs

11) What is signal conditioning?
a) To analyze any signal
b) Conversion or modification is referred to as conditioning
c) Conversion from analog to digital is signal conditioning
d) Conversion from digital to analog is signal conditioning

12) Touch screen devices use which sensor?
a) Touch sensor
b) Temperature sensor
c) Humidity sensor
d) Pressure sensor

13) ENOB in ADC stand for _____
a) Effective number of bytes
b) Effective number of bits
c) Effective nibble baud
d) None of the mentioned

14) A simple bridge circuit consists of a network of _____
a) 3 resistance arms
b) 2 resistance arms
c) 4 resistance arms
d) 6 resistance arms

S. Y. (B. Tech.)(Sem-II)(New)(NEP CBCS) Examination: March/April-2025
ELECTRICAL ENGINEERING
Measurement, Instrumentation and Sensors (OE-02D)

Day & Date: Tuesday, 03-June-2025 Max. Marks: 56
Time: 10:00 AM To 01:00 PM

Instructions: 1) All questions are compulsory.
2) Figures to the right indicate full marks.
3) Assume suitable data if necessary.
4) Draw neat diagrams whenever necessary.

Section – I

Q.2 Attempt any four of the following: **16**

a) Define standard & explain types of standards.
b) Define the following characteristics
1) Linearity 2) Accuracy 3) Repeatability 4) Sensitivity
c) Derive the expression for unknown capacitance with phasor diagram by using Schering Bridge.
d) Write difference between Current Transformer and Potential Transformer.
e) Explain working of digital storage oscilloscope with suitable block diagram.

Q.3 Attempt any two of the following: **12**

a) Illustrate and derive the torque equation for a Moving iron instrument with neat diagram.
b) Draw the equivalent circuit and phasor diagram of a CT. Derive the expressions for ratio and phase angle errors.
c) Explain digital ramp type and dual slope integrating type digital voltmeter.

Section – II

Q.4 Attempt any four of the following: **16**

a) Explain the principle of working of Hall effect sensor.
b) Explain different types of temperature sensor with details.
c) Discuss Classification of sensor and explain active and passive sensor.
d) State and explain the methods of data transmission.
e) State and Explain the Modes of Heat transfer.

Q.5 Attempt any two of the following: **12**

a) Stale the sensors used for Velocity and Acceleration application and explain any one of them.
b) Slate and explain the sensors used for occupancy and motion detector application.
c) Define the temperature and explain the thermal properties of material.

Set Q

S. Y. (B. Tech.)(Sem-II)(New)(NEP CBCS) Examination: March/April-2025
ELECTRICAL ENGINEERING
Measurement, Instrumentation and Sensors (OE-02D)

Day & Date: Tuesday, 03-June-2025 Max. Marks: 70
Time: 10:00 AM To 01:00 PM

Instructions: 1) Q. No. 1 is compulsory. It should be solved in the first 30 minutes in Answer Book Page no 03 (Starting page of the Answer Book). Each question carries one mark.
2) Don't forget to Mention question paper set (P/Q/R/S) on top of page
3) Figures to the right indicates full marks.
4) Assume suitable data if necessary.
5) Draw neat diagrams whenever necessary.

MCQ/Objective Type Questions

Duration: 30 Minutes Marks:14

Q.1 Choose the correct answer. **14**

1) Which of the following is a key characteristic of a sensor?
a) It can only measure temperature
b) It is an active component
c) It converts physical parameters into an electrical signal
d) Il requires no external power

2) Which of the following is a type of magnetic sensor?
a) Thermistor b) Strain gauge
c) Hall effect sensor d) LVDT

3) Typical conversion speed of ADC is _____
a) Less than 1 μs b) Less than 100 μs
c) Less than 500 μs d) Greater than 1000 μs

4) What is signal conditioning?
a) To analyze any signal
b) Conversion or modification is referred to as conditioning
c) Conversion from analog to digital is signal conditioning
d) Conversion from digital to analog is signal conditioning

5) Touch screen devices use which sensor?
a) Touch sensor b) Temperature sensor
c) Humidity sensor d) Pressure sensor

6) ENOB in ADC stand for _____
a) Effective number of bytes b) Effective number of bits
c) Effective nibble baud d) None of the mentioned

7) A simple bridge circuit consists of a network of _____
a) 3 resistance arms b) 2 resistance arms
c) 4 resistance arms d) 6 resistance arms

8) An instrument transformer is used to extend the range of _____.
a) induction instrument b) electrostatic instrument
c) moving coil instrument d) any of the above

9) The internal resistance of an ammeter should be _____.
a) Very small b) Medium
c) High d) Infinity

10) The smallest change which a sensor can detect is termed: _____
a) Accuracy b) Precision
c) Resolution d) Scale

11) Sensor effectiveness depends on _____ parameter.
a) Sensitivity b) Radiation
c) Restively d) All the above

12) The desirable static characteristics of a measuring system are _____
a) accuracy and drift
b) accuracy, sensitivity and reproducibility
c) drift and dead zone
d) static error

13) A _____ device prevents the oscillation of the moving system and enables the latter to reach its final position quickly.
a) Deflecting b) Controlling
c) Damping d) any of the above

14) _____ is an instrument which measures the insulation resistance of an electric circuit relative to earth and one another.
a) Tangent galvanometer
b) Megger
c) Current transformer
d) None of the above

MCQ/Objective Type Questions

Duration: 30 Minutes Marks:14

Q.1 Choose the correct alternatives from the options. 14

1) Linear programming deals with the optimization of a function of variables is, known as _____
a) Subjective function b) Objective function
c) Combined Equation d) None of these

2) What is the condition of Balance Assignment Problem?
a) Σ Demand$=\Sigma$ Supply
b) No. of rows $>$ No. of column
c) No. of rows $<$ No. of column
d) No. of rows $=$ No. of columns

3) EOQ means: _____
a) Economic Offering Quantity b) Empty Order Quantity
c) Economic Order Quantity d) Economic Order Quality

4) In ABC analysis, high monitoring and control are required for: _____
a) A class items b) B class items
c) C class items d) All of these

5) Graphical method, simplex method, and transportation method are concerned with _____.
a) Break-even analysis b) Value analysis
c) Linear programming d) Queueing theory

6) The cost of keeping items in inventory is called _____
a) Set up cost b) Holding cost
c) Shortage cost d) None of these

7) Dual of the Dual is _____
a) Dual b) Primal
c) Zero d) Infinity

8) At the Break-Even Point _____
a) Profit > Loss
b) Profit < Loss
c) Profit = Loss
d) None of these

9) The PERT in project management means Program Evaluation and _____ Technique.
a) Resource
b) Reconciliation
c) Reconsideration
d) Review

10) _____ Stock is the lower limit of stock below which the stock should not be allowed to fall.
a) Maximum
b) Average
c) Safety
d) Standard

11) Optimization Means _____.
a) Maximization
b) Minimization
c) Minimization or Maximization
d) Mean of Minimization & Maximization

12) A feasible solution to LPP _____.
a) Must satisfy all the constraints simultaneously
b) Need not satisfy all the constraints
c) Must be a corner point of feasible region
d) Must optimize the objective function

13) In a project network, the critical path _____.
a) May be the shortest path
b) Is the longest path
c) May be the longest path
d) Is the shortest path

14) The inventory carrying costs are also called as _____.
a) Procurement costs
b) Set-up costs
c) Storage costs
d) None of the above

Instructions: 1) All questions are compulsory.
2) Figures to the right indicate full marks.
3) Assume suitable data wherever necessary and mention it clearly.
4) Use of non-programmable calculator is allowed.

Section – I

Q.2 Attempt Any Three. **24**

a) Using Graphical method, Solve

Maximize $Z = 10X_1 + 8X_2$
Subject to, $2X_1 + X_2 \leq 40;$
$2X_1 + 3X_2 \leq 80;$
$0 \leq X_1; 0 \leq X_2$

b) Solve the following assignment model for minimum processing time.

		Machines			
		M1	M2	M3	M4
Jobs	J1	51	77	49	55
	J2	32	34	59	68
	J3	37	44	70	54
	J4	55	55	58	55

c) Find the initial basic feasible solution by Least Cost Method.

	W1	W2	W3	W4	Supply
F1	48	60	56	58	140
F2	45	55	53	60	260
F3	50	65	60	62	360
F4	52	64	55	61	220
Demand	200	320	250	210	

d) What are the different Limitations & Applications of 'Operation Research'?

e) How do you solve unbalanced transportation problem? What are different methods to solve Transportation Model? Explain in details.

Q.3 Answer any one. **04**

a) What is LPP? What are different components of LPP?

b) How assignment model is useful in practical life?

Section – II

Q.4 Attempt Any Three. **24**

a) A construction company consumes 4000 bags of cement per month. Price per bag of cement is Rs. 320/-. Inventory carrying cost per bag per year is Rs. 30/- and procurement cost per order is Rs. 500/- Find economic order quantity and number of orders to be placed per month?

b) Write a note various types inventory cost.

c) Draw network, find out CP & PD. Calculate All floats of each non-critical Activity.

Activity	A	B	C	D	E	F	G	H	I	J	K	L	M	N
Immediate Predecessor	-	-	-	B	A	A	B	C,D	C,D	E	F,G,H	F,G,H	I	J,K
Time in Months	2	6	4	3	6	8	3	7	2	5	4	3	13	7

d) A small project consists of seven activities. The time estimates in weeks of different activities are given below. Find out probability of completing the project in 18 weeks.

Activity	Estimated Time		
	to	tm	tp
1-2	1	1	7
1-3	1	4	7
1-4	2	2	8
2-5	1	1	1
3-5	2	5	14
4-6	2	5	8
5-6	3	6	15

Probability Factor	Probability
0	50%
1	84.13%
2	97.72%
3	99.87%

e) Explain Sequencing Problem Technique. What are its Different Elements, also elaborate its assumptions.

Q.3 Attempt Any One. **04**

a) What is EOQ? What is its important?

b) Distinguish between CPM & PERT (At least 4 points)

Seat No.

Set **R**

S. Y. (B.Tech.) (Sem - II) (New) (NEP CBCS) Examination: March/April-2025
ELECTRICAL ENGINEERING
Operation Research (OE-02E)

Day & Date: Tuesday 03-06-2025 Max. Marks: 70
Time: 10:00 AM To 01:00 PM

Instructions: 1) Q. No. 1 is compulsory. It should be solved in the first 30 minutes in Answer Book Page no 03 (Starting page of the Answer Book). Each question carries one mark.
2) Don't forget to Mention question paper set (P/Q/R/S) on top of page.
3) Figures to the right indicates full marks.

MCQ/Objective Type Questions

Duration: 30 Minutes Marks:14

Q.1 Choose the correct alternatives from the options. **14**

1) Optimization Means _____.
a) Maximization
b) Minimization
c) Minimization or Maximization
d) Mean of Minimization & Maximization

2) A feasible solution to LPP _____.
a) Must satisfy all the constraints simultaneously
b) Need not satisfy all the constraints
c) Must be a corner point of feasible region
d) Must optimize the objective function

3) In a project network, the critical path _____.
a) May be the shortest path b) Is the longest path
c) May be the longest path d) Is the shortest path

4) The inventory carrying costs are also called as _____.
a) Procurement costs b) Set-up costs
c) Storage costs d) None of the above

5) Linear programming deals with the optimization of a function of variables is, known as _____
a) Subjective function b) Objective function
c) Combined Equation d) None of these

6) What is the condition of Balance Assignment Problem?
a) Σ Demand$=\Sigma$ Supply
b) No. of rows $>$ No. of column
c) No. of rows $<$ No. of column
d) No. of rows $=$ No. of columns

7) EOQ means: _____

a) Economic Offering Quantity b) Empty Order Quantity
c) Economic Order Quantity d) Economic Order Quality

8) In ABC analysis, high monitoring and control are required for: _____

a) A class items b) B class items
c) C class items d) All of these

9) Graphical method, simplex method, and transportation method are concerned with _____.

a) Break-even analysis b) Value analysis
c) Linear programming d) Queueing theory

10) The cost of keeping items in inventory is called _____

a) Set up cost b) Holding cost
c) Shortage cost d) None of these

11) Dual of the Dual is _____

a) Dual b) Primal
c) Zero d) Infinity

12) At the Break-Even Point _____

a) Profit > Loss b) Profit < Loss
c) Profit = Loss d) None of these

13) The PERT in project management means Program Evaluation and _____ Technique.

a) Resource b) Reconciliation
c) Reconsideration d) Review

14) _____ Stock is the lower limit of stock below which the stock should not be allowed to fall.

a) Maximum b) Average
c) Safety d) Standard

Time: 10:00 AM To 01:00 PM

Instructions: 1) All questions are compulsory.
2) Figures to the right indicate full marks.
3) Assume suitable data wherever necessary and mention it clearly.
4) Use of non-programmable calculator is allowed.

Section – I

Q.2 Attempt Any Three. **24**

a) Using Graphical method, Solve

Maximize $Z = 10X_1 + 8X_2$
Subject to, $2X_1 + X_2 \leq 40;$
$2X_1 + 3X_2 \leq 80;$
$0 \leq X_1; 0 \leq X_2$

b) Solve the following assignment model for minimum processing time.

		Machines			
		M1	M2	M3	M4
Jobs	J1	51	77	49	55
	J2	32	34	59	68
	J3	37	44	70	54
	J4	55	55	58	55

c) Find the initial basic feasible solution by Least Cost Method.

	W1	W2	W3	W4	Supply
F1	48	60	56	58	140
F2	45	55	53	60	260
F3	50	65	60	62	360
F4	52	64	55	61	220
Demand	200	320	250	210	

d) What are the different Limitations & Applications of 'Operation Research'?
e) How do you solve unbalanced transportation problem? What are different methods to solve Transportation Model? Explain in details.

Q.3 Answer any one. **04**

a) What is LPP? What are different components of LPP?
b) How assignment model is useful in practical life?

Section – II

Q.4 Attempt Any Three. **24**

a) A construction company consumes 4000 bags of cement per month. Price per bag of cement is Rs. 320/-. Inventory carrying cost per bag per year is Rs. 30/- and procurement cost per order is Rs. 500/- Find economic order quantity and number of orders to be placed per month?

b) Write a note various types inventory cost.

c) Draw network, find out CP & PD. Calculate All floats of each non-critical Activity.

Activity	A	B	C	D	E	F	G	H	I	J	K	L	M	N
Immediate Predecessor	-	-	-	B	A	A	B	C,D	C,D	E	F,G,H	F,G,H	I	J,K
Time in Months	2	6	4	3	6	8	3	7	2	5	4	3	13	7

d) A small project consists of seven activities. The time estimates in weeks of different activities are given below. Find out probability of completing the project in 18 weeks.

Activity	Estimated Time		
	to	tm	tp
1-2	1	1	7
1-3	1	4	7
1-4	2	2	8
2-5	1	1	1

MCQ/Objective Type Questions

Duration: 30 Minutes Marks:14

Q.1 Choose the correct option. **14**

1) A transcendental equation is an equation that involves _____.
a) Only algebraic terms
b) Only transcendental functions
c) Both algebraic and transcendental functions
d) Linear terms only

2) The interval in which a real root of the equation $x^3 - 2x - 5 = 0$ lies is _____.
a) $(1,2)$ b) $(0,1)$
c) $(2,3)$ d) $(3,4)$

3) The Gauss-Seidel method is used for solving _____.
a) Nonlinear equations
b) Systems of linear equations
c) Ordinary differential equations
d) Partial differential equations

4) Which of the following is a disadvantage of the Gauss-Jacobi method?
a) It converges faster than most direct methods
b) It requires a large number of iterations for a good approximation
c) It cannot be used for systems with more than two equations
d) It works only for symmetric systems

5) The use of Romberg's method is _____.
a) To solve simultaneous linear equation
b) To find root of linear equation
c) To evaluate definite integration
d) To find the Eigen values

6) The order of convergence of Newton-Raphson method is _____.

a) 1 b) 2

c) $\sqrt{2}$ d) 1.6

7) Power Method is used to find _____.

a) Negative Eigen Value b) Largest Eigen value

c) Positive Eigen Value d) None of these

8) To find the Numerically largest Eigen value using iterative Method we use the equation _____.

a) $A = \lambda X$ b) $AX = X$

c) $X = \lambda X$ d) $AX = \lambda X$

9) If $\frac{dy}{dx} = x - y$ and $y(0) = 1$ then by Picard's method the value of $y_1(1)$ is _____.

a) 0.905 b) 1.905

c) 2.905 d) none

10) Runge-Kutta method is self-starting method _____.

a) true d) false

c) we can't say d) none

11) If the data is equally spaced and interpolation is near the beginning of the data then _____ Interpolation formula is used.

a) Newton's backward difference

b) Newton's divided difference

c) Newton's forward difference

d) Lagrange's

12) The process of finding the value inside the interval (x_0, x_n) is called ___.

a) Interpolation b) Extrapolation

c) Iterative d) polynomial equation

13) Using Newton-Raphson method the first approximation to the root of the equation $x^4 - x - 10 = 0$ near to $x_0 = 2$ is _____.

a) 1.671 b) 2.271

c) 2.071 d) 1.871

14) To apply Simpson's one-third rule the number of sub-intervals must be _____.

a) Even b) Odd

c) Multiple of 3 d) Multiple of 6

2) Figures to the right indicate full marks.

Section – I

Q.2 Answer any three. **09**

a) Find the double root of the equation $x^3 - 5.4x^2 + 9.24x - 5.096 = 0$ given that it is nearer to 1.5.

b) Solve the system of equations by Jacobi's iterative method (perform 3 iterations) $27x + 6y - z = 85,\ 6x + 15y + 2z = 72,\ x + y + 54z = 110$

c) Find positive real root of the equation $x \sin x + \cos x = 0$ using Newton Raphson method correct to 3 decimal places.

d) Solve the system of equation by using Gauss-Elimination method. $x + 4y - z = -5, x + y - 6z = -12, -3x - y - z = 4$

e) Solve $\frac{dy}{dx} = -xy$ with $x_0 = 0\ ,\ y_0 = 1$ using Picard's method upto 3rd approximation.

Q.3 Answer any three. **09**

a) Solve $\frac{dy}{dx} = x + y$ with $x_0 = 0\ , y_0 = 1$ using Range kutta forth order method and find approximate value of y when $x = 0.2$

b) Solve $\frac{dy}{dx} = 1 + xy$ with $y(0) = 1$ using Picard's method take first approximation and find y for $x = 0.1$

c) Solve by Gauss Seidel Method, the equations $20x + y - 2z = 17, 3x + 20y - z = -18, 2x - 3y + 20z = 25$ Perform 3 iteration.

d) Find the value of $\sqrt{5}$ using newton's iterative formula. Perform 3 iteration.

e) Find the positive root of $f(x) = 2x^3 - 3x - 6$ by Newton's Raphson method perform 3 iteration.

Q.4 Answer any two. **10**

a) Perform 2-iteration by Newton's Raphson Method to Solve the non-linear equation $x = x^2 + y^2,\ y = x^2 - y^2$ Take initial approximation $x_0 = 0.8, y_0 = 0.4$

b) Solve the system of equation by LU decomposition Method $3x + 2y + 7z = 4,\quad 2x + 3y + z = 5,\quad 3x + 4y + z = 7$

c) Solve differential equation $\frac{dy}{dx} = 1 + xz,\ \frac{dz}{dx} = -xy$ for $x = 0.3$ using 4th order Runge-Kutta Method Initial Values are $x = 0,\ y = 0,\ z = 1$

Section – II

Q.5 Answer any Three. **09**

a) Evaluate the integral $\int_0^1 \frac{x^2}{1+x^3}\,dx$ using Simpson's $\frac{1}{3}$rd rule, Take $h = 0.25$

b) Determine the largest Eigen value and corresponding Eigen vector of the matrix $\begin{bmatrix} 5 & 4 \\ 1 & 2 \end{bmatrix}$ by using power method perform three iteration.

c) Use Trapezoidal Rule to compute $\int_0^1 \frac{1}{1+x^2}\,dx$ Take h as 0.5

d) Using Newton's divided difference formula, find the value of $f(2)$. Given the following table.

x	4	5	7	10	11	13
$f(x)$	48	100	294	900	1210	2028

e) Construct Newton's Forward interpolation polynomial for the following data:

x	4	6	8	10
y	1	3	8	16

Hence find the value of y for $x = 5$

Q.6 Answer any Three. **09**

a) Solve the integral $\int_0^{1/2} \frac{1}{\sqrt{1-x^2}}\,dx$ using Weddle's rule Taking $n = 6$

b) Solve $\int_3^5 \frac{4}{(2x^2)}\,dx$ Using Gauss Formula for $n = 2$ and $n = 3$.

c) Find all Eigen values and Eigen vectors of the following matrix by using Gauss Jacobi's Method. $\begin{bmatrix} 2 & 3 \\ 3 & 2 \end{bmatrix}$

d) Solve $\int_0^6 \frac{dx}{1+x^2}$ by using Simpsons 3/8th rule take $h = 1$

e) Using Newton's Backward formula, find the value of $f(2)$ if

x	1	1.4	1.8	2.2
$f(x)$	3.49	4.82	5.96	6.5

Q.7 Answer any two. **10**

a) Find the largest eigen value and the corresponding eigen vector of the matrix:

$\begin{bmatrix} 25 & 1 & 2 \\ 1 & 3 & 0 \\ 2 & 0 & -4 \end{bmatrix}$ by using power method

Take $[1 \quad 0 \quad 0]^r$ as initial eigen vector (perform 5 iterations)

b) Use Romberg's method to compute $\int_0^1 \frac{1}{1+x^2}\,dx$ Take h as $0.5, 0.25, 0.125$

c) Given the Values

x	5	7	11	13	17
$f(x)$	150	392	1452	2366	5202

Evaluate $f(9)$,using Lagrange's Formula.

$20x + y - 2z = 17, 3x + 20y - z = -18, 2x - 3y + 20z = 25$
Perform 3 iteration.

d) Find the value of $\sqrt{5}$ using newton's iterative formula. Perform 3 iteration.

e) Find the positive root of $f(x) = 2x^3 - 3x - 6$ by Newton's Raphson method perform 3 iteration.

Q.4 Answer any two. **10**

a) Perform 2-iteration by Newton's Raphson Method to Solve the non-linear equation $x = x^2 + y^2,\ y = x^2 - y^2$ Take initial approximation $x_0 = 0.8, y_0 = 0.4$

b) Solve the system of equation by LU decomposition Method
$3x + 2y + 7z = 4,\quad 2x + 3y + z = 5,\quad 3x + 4y + z = 7$

c) Solve differential equation $\frac{dy}{dx} = 1 + xz,\ \frac{dz}{dx} = -xy$ for $x = 0.3$ using 4th order Runge-Kutta Method Initial Values are $x = 0,\ y = 0,\ z = 1$

Section – II

Q.5 Answer any Three. **09**

a) Evaluate the integral $\int_0^1 \frac{x^2}{1+x^3}\,dx$ using Simpson's $\frac{1}{3}$rd rule, Take $h = 0.25$

b) Determine the largest Eigen value and corresponding Eigen vector of the matrix $\begin{bmatrix} 5 & 4 \\ 1 & 2 \end{bmatrix}$ by using power method perform three iteration.

c) Use Trapezoidal Rule to compute $\int_0^1 \frac{1}{1+x^2}\,dx$ Take h as 0.5

d) Using Newton's divided difference formula, find the value of $f(2)$. Given the following table.

x	4	5	7	10	11	13
$f(x)$	48	100	294	900	1210	2028

e) Construct Newton's Forward interpolation polynomial for the following data:

x	4	6	8	10
y	1	3	8	16

Hence find the value of y for $x = 5$

Q.6 Answer any Three. **09**

a) Solve the integral $\int_0^{1/2} \frac{1}{\sqrt{1-x^2}}\,dx$ using Weddle's rule Taking $n = 6$

b) Solve $\int_3^5 \frac{4}{(2x^2)}\,dx$ Using Gauss Formula for $n = 2$ and $n = 3$.

c) Find all Eigen values and Eigen vectors of the following matrix by using Gauss Jacobi's Method. $\begin{bmatrix} 2 & 3 \\ 3 & 2 \end{bmatrix}$

d) Solve $\int_0^6 \frac{dx}{1+x^2}$ by using Simpsons 3/8th rule take $h = 1$

e) Using Newton's Backward formula, find the value of $f(2)$ if

x	1	1.4	1.8	2.2
$f(x)$	3.49	4.82	5.96	6.5

Q.7 Answer any two. **10**

a) Find the largest eigen value and the corresponding eigen vector of the matrix:

$\begin{bmatrix} 25 & 1 & 2 \\ 1 & 3 & 0 \\ 2 & 0 & -4 \end{bmatrix}$ by using power method

Take $[1 \quad 0 \quad 0]^r$ as initial eigen vector (perform 5 iterations)

b) Use Romberg's method to compute $\int_0^1 \frac{1}{1+x^2}\,dx$ Take h as $0.5, 0.25, 0.125$

c) Given the Values

x	5	7	11	13	17
$f(x)$	150	392	1452	2366	5202

Evaluate $f(9)$,using Lagrange's Formula.

S.Y. (B.Tech.)(Sem-II)(New)(NEP CBCS) Examination: March/April - 2025
ELECTRICAL ENGINEERING
Computational Mathematics (OE-02F)

Day & Date: Tuesday 03-06-2025 Max. Marks: 70
Time: 10:00 AM To 01:00 PM

Instructions: 1) Q. No. 1 is compulsory. It should be solved in the first 30 minutes in Answer Book Page no 03 (Starting page of the Answer Book). Each question carries one mark.
2) Don't forget to Mention question paper set (P/Q/R/S) on top of page.
3) Figures to the right indicates full marks.

MCQ/Objective Type Questions

Duration: 30 Minutes Marks:14

Q.1 Choose the correct option. **14**

1) If the data is equally spaced and interpolation is near the beginning of the data then _____ Interpolation formula is used.
a) Newton's backward difference
b) Newton's divided difference
c) Newton's forward difference
d) Lagrange's

2) The process of finding the value inside the interval (x_0, x_n) is called ___.
a) Interpolation b) Extrapolation
c) Iterative d) polynomial equation

3) Using Newton-Raphson method the first approximation to the root of the equation $x^4 - x - 10 = 0$ near to $x_0 = 2$ is _____.
a) 1.671 b) 2.271
c) 2.071 d) 1.871

4) To apply Simpson's one-third rule the number of sub-intervals must be _____.
a) Even b) Odd
c) Multiple of 3 d) Multiple of 6

5) A transcendental equation is an equation that involves _____.
a) Only algebraic terms
b) Only transcendental functions
c) Both algebraic and transcendental functions
d) Linear terms only

6) The interval in which a real root of the equation $x^3 - 2x - 5 = 0$ lies is _____.

a) $(1,2)$ b) $(0,1)$
c) $(2,3)$ d) $(3,4)$

7) The Gauss-Seidel method is used for solving _____.

a) Nonlinear equations
b) Systems of linear equations
c) Ordinary differential equations
d) Partial differential equations

8) Which of the following is a disadvantage of the Gauss-Jacobi method?

a) It converges faster than most direct methods
b) It requires a large number of iterations for a good approximation
c) It cannot be used for systems with more than two equations
d) It works only for symmetric systems

9) The use of Romberg's method is _____.

a) To solve simultaneous linear equation
b) To find root of linear equation
c) To evaluate definite integration
d) To find the Eigen values

10) The order of convergence of Newton-Raphson method is _____.

a) 1 b) 2
c) $\sqrt{2}$ d) 1.6

11) Power Method is used to find _____.

a) Negative Eigen Value b) Largest Eigen value
c) Positive Eigen Value d) None of these

12) To find the Numerically largest Eigen value using iterative Method we use the equation _____.

a) $A = \lambda X$ b) $AX = X$
c) $X = \lambda X$ d) $AX = \lambda X$

13) If $\frac{dy}{dx} = x - y$ and $y(0) = 1$ then by Picard's method the value of $y_1(1)$ is _____.

a) 0.905 b) 1.905
c) 2.905 d) none

14) Runge-Kutta method is self-starting method _____.

a) true d) false
c) we can't say d) none

2) Figures to the right indicate full marks.

Section – I

Q.2 Answer any three. **09**

a) Find the double root of the equation $x^3 - 5.4x^2 + 9.24x - 5.096 = 0$ given that it is nearer to 1.5.

b) Solve the system of equations by Jacobi's iterative method (perform 3 iterations) $27x + 6y - z = 85,\ 6x + 15y + 2z = 72,\ x + y + 54z = 110$

c) Find positive real root of the equation $x \sin x + \cos x = 0$ using Newton Raphson method correct to 3 decimal places.

d) Solve the system of equation by using Gauss-Elimination method. $x + 4y - z = -5, x + y - 6z = -12, -3x - y - z = 4$

e) Solve $\frac{dy}{dx} = -xy$ with $x_0 = 0\ ,\ y_0 = 1$ using Picard's method upto 3rd approximation.

Q.3 Answer any three. **09**

a) Solve $\frac{dy}{dx} = x + y$ with $x_0 = 0\ , y_0 = 1$ using Range kutta forth order method and find approximate value of y when $x = 0.2$

b) Solve $\frac{dy}{dx} = 1 + xy$ with $y(0) = 1$ using Picard's method take first approximation and find y for $x = 0.1$

c) Solve by Gauss Seidel Method, the equations $20x + y - 2z = 17, 3x + 20y - z = -18, 2x - 3y + 20z = 25$ Perform 3 iteration.

d) Find the value of $\sqrt{5}$ using newton's iterative formula. Perform 3 iteration.

e) Find the positive root of $f(x) = 2x^3 - 3x - 6$ by Newton's Raphson method perform 3 iteration.

Q.4 Answer any two. **10**

a) Perform 2-iteration by Newton's Raphson Method to Solve the non-linear equation $x = x^2 + y^2,\ y = x^2 - y^2$ Take initial approximation $x_0 = 0.8, y_0 = 0.4$

b) Solve the system of equation by LU decomposition Method $3x + 2y + 7z = 4,\quad 2x + 3y + z = 5,\quad 3x + 4y + z = 7$

c) Solve differential equation $\frac{dy}{dx} = 1 + xz,\ \frac{dz}{dx} = -xy$ for $x = 0.3$ using 4th order Runge-Kutta Method Initial Values are $x = 0,\ y = 0,\ z = 1$

Section – II

Q.5 Answer any Three. **09**

a) Evaluate the integral $\int_0^1 \frac{x^2}{1+x^3}\,dx$ using Simpson's $\frac{1}{3}$rd rule, Take $h = 0.25$

b) Determine the largest Eigen value and corresponding Eigen vector of the matrix $\begin{bmatrix} 5 & 4 \\ 1 & 2 \end{bmatrix}$ by using power method perform three iteration.

c) Use Trapezoidal Rule to compute $\int_0^1 \frac{1}{1+x^2}\,dx$ Take h as 0.5

d) Using Newton's divided difference formula, find the value of $f(2)$. Given the following table.

x	4	5	7	10	11	13
$f(x)$	48	100	294	900	1210	2028

e) Construct Newton's Forward interpolation polynomial for the following data:

x	4	6	8	10
y	1	3	8	16

Hence find the value of y for $x = 5$

Q.6 Answer any Three. **09**

a) Solve the integral $\int_0^{1/2} \frac{1}{\sqrt{1-x^2}}\,dx$ using Weddle's rule Taking $n = 6$

b) Solve $\int_3^5 \frac{4}{(2x^2)}\,dx$ Using Gauss Formula for $n = 2$ and $n = 3$.

c) Find all Eigen values and Eigen vectors of the following matrix by using Gauss Jacobi's Method. $\begin{bmatrix} 2 & 3 \\ 3 & 2 \end{bmatrix}$

d) Solve $\int_0^6 \frac{dx}{1+x^2}$ by using Simpsons 3/8th rule take $h = 1$

e) Using Newton's Backward formula, find the value of $f(2)$ if

x	1	1.4	1.8	2.2
$f(x)$	3.49	4.82	5.96	6.5

Q.7 Answer any two. **10**

a) Find the largest eigen value and the corresponding eigen vector of the matrix:

$\begin{bmatrix} 25 & 1 & 2 \\ 1 & 3 & 0 \\ 2 & 0 & -4 \end{bmatrix}$ by using power method

Take $[1 \quad 0 \quad 0]^r$ as initial eigen vector (perform 5 iterations)

b) Use Romberg's method to compute $\int_0^1 \frac{1}{1+x^2}\,dx$ Take h as $0.5, 0.25, 0.125$

c) Given the Values

x	5	7	11	13	17
$f(x)$	150	392	1452	2366	5202

Evaluate $f(9)$,using Lagrange's Formula.

MCQ/Objective Type Questions

Duration: 30 Minutes Marks:14

Q.1 Choose the correct alternatives from the options. 14

1) In communication, _____ is the person who receives and decodes the message.
a) Sender b) Receiver
c) Driver d) Cleaner

2) Which among the following is not a manmade channel of communication?
a) Telephone b) Cell phone
c) Fax d) Air

3) Communication is the part of _____ skills.
a) Rough b) Soft
c) Hard d) Short

4) Which among the following are the barriers to communication?
a) Physical b) Mechanical
c) Psychological d) All of above

5) To overcome language barrier, which of the ways should not be followed?
a) Easy and understandable words should be used.
b) Jokes should be told to the audience.
c) The language of audience should be used.
d) Non-verbal ways should be used to the extent possible.

6) Which of the following is not among 7Cs?
a) Conciseness b) Completeness
c) Clarity d) Charity

7) Posters fall under _____ communication.
a) oral b) visual
c) written d) spoken

8) On the _____ it is possible to get immediate feedback.
a) letter b) e-mail
c) fax d) telephone

9) The response to a sender's message is called as _____.
a) Reply b) Feedback
c) Answer d) None of the above

10) _____ is the soul of communication.
a) Sender b) Receiver
c) Message d) Feedback

11) Which of these is not an element of non-verbal communication?
a) Personal appearance b) Posture
c) Eye contact d) Name of the speaker

12) Telephonic conversation is a form of: _____
a) verbal communication b) non-verbal communication
c) visual communication d) Written

13) To give a good presentation, full rehearsal is: _____
a) Optional b) Necessary
c) Useless d) Audience based

14) Which of the following is not an advantage of oral presentation?
a) Flexibility b) Scope for body language
c) Expensive d) Time-saving

Time: 10:00 AM To 01:00 PM

Instructions: 1) All questions are compulsory.
2) Figures to the right indicate full marks.

Section – I

Q.2 Attempt Any Three. **12**

a) Explain how communication is necessary for business.
b) What is feedback? Explain its necessity in communication.
c) Write short note on: Different channels of communication.
d) Explain language barriers to communication with the ways to overcome them.
e) Explain language as a tool of communication.

Q.3 Attempt Any Four. **16**

a) Explain seven C's of effective communication.
b) Explain various types of barriers to communication and the ways to overcome them.
c) What is oral communication? Explain its advantages.
d) Explain various steps in the process of communication.
e) What is written communication? Explain its benefits.

Section – II

Q.4 Attempt Any Three. **12**

a) Explain the difference between formal and informal communication.
b) Explain vertical communication with its types.
c) Explain farewell speech by the departing person, with an example
d) Explain the speech for vote of thanks, with an example.
e) Write short note on: Non- verbal aspects of presentation.

Q.5 Attempt Any Four. **16**

a) Explain the structure of a business letter with its various components.
b) Explain the steps in the process of presentation.
c) You had purchased some furniture items from a vendor. Afterwards you found that the furniture items are in a damaged condition. Write a letter of complaint and ask for replacement.
d) Explain four P's of effective presentations.
e) You are in need of some computer hardware parts. Prepare a letter placing order to the supplier. Specify the terms and conditions of purchase.

S.Y. (B.Tech.) (Sem - II) (New) (NEP CBCS) Examination: March/April - 2025
ELECTRICAL ENGINEERING
Professional Business Communication (OE-02G)

Day & Date: Tuesday 03-06-2025 Max. Marks: 56
Time: 10:00 AM To 01:00 PM

Instructions: 1) All questions are compulsory.
2) Figures to the right indicate full marks.

Section – I

Q.2 Attempt Any Three. **12**

a) Explain how communication is necessary for business.
b) What is feedback? Explain its necessity in communication.
c) Write short note on: Different channels of communication.
d) Explain language barriers to communication with the ways to overcome them.
e) Explain language as a tool of communication.

Q.3 Attempt Any Four. **16**

a) Explain seven C's of effective communication.
b) Explain various types of barriers to communication and the ways to overcome them.
c) What is oral communication? Explain its advantages.
d) Explain various steps in the process of communication.
e) What is written communication? Explain its benefits.

Section – II

Q.4 Attempt Any Three. **12**

a) Explain the difference between formal and informal communication.
b) Explain vertical communication with its types.
c) Explain farewell speech by the departing person, with an example
d) Explain the speech for vote of thanks, with an example.
e) Write short note on: Non- verbal aspects of presentation.

Q.5 Attempt Any Four. **16**

a) Explain the structure of a business letter with its various components.
b) Explain the steps in the process of presentation.
c) You had purchased some furniture items from a vendor. Afterwards you found that the furniture items are in a damaged condition. Write a letter of complaint and ask for replacement.
d) Explain four P's of effective presentations.
e) You are in need of some computer hardware parts. Prepare a letter placing order to the supplier. Specify the terms and conditions of purchase.

Day & Date: Tuesday 03-06-2025 Max. Marks: 70
Time: 10:00 AM To 01:00 PM

Instructions: 1) Q. No. 1 is compulsory. It should be solved in the first 30 minutes in Answer Book Page no 03 (Starting page of the Answer Book). Each question carries one mark.
2) Don't forget to Mention question paper set (P/Q/R/S) on top of page.
3) Figures to the right indicates full marks.

MCQ/Objective Type Questions

Duration: 30 Minutes Marks:14

Q.1 Choose the correct alternatives from the options. 14

1) Which of these is not an element of non-verbal communication?
a) Personal appearance b) Posture
c) Eye contact d) Name of the speaker

2) Telephonic conversation is a form of: _____
a) verbal communication b) non-verbal communication
c) visual communication d) Written

3) To give a good presentation, full rehearsal is: _____
a) Optional b) Necessary
c) Useless d) Audience based

4) Which of the following is not an advantage of oral presentation?
a) Flexibility b) Scope for body language
c) Expensive d) Time-saving

5) In communication, _____ is the person who receives and decodes the message.
a) Sender b) Receiver
c) Driver d) Cleaner

6) Which among the following is not a manmade channel of communication?
a) Telephone b) Cell phone
c) Fax d) Air

7) Communication is the part of _____ skills.
a) Rough b) Soft
c) Hard d) Short

8) Which among the following are the barriers to communication?
a) Physical b) Mechanical
c) Psychological d) All of above

9) To overcome language barrier, which of the ways should not be followed?
a) Easy and understandable words should be used.
b) Jokes should be told to the audience.
c) The language of audience should be used.
d) Non-verbal ways should be used to the extent possible.

10) Which of the following is not among 7Cs?
a) Conciseness b) Completeness
c) Clarity d) Charity

11) Posters fall under _____ communication.
a) oral b) visual
c) written d) spoken

12) On the _____ it is possible to get immediate feedback.
a) letter b) e-mail
c) fax d) telephone

13) The response to a sender's message is called as _____.
a) Reply b) Feedback
c) Answer d) None of the above

14) _____ is the soul of communication.
a) Sender b) Receiver
c) Message d) Feedback

MCQ/Objective Type Questions

Duration: 30 Minutes Marks:14

Q.1 Choose the correct Alternatives. **14**

1) Which of the following is a non-renewable energy source?
a) Solar energy b) Wind energy
c) Coal d) Biomass

2) What is the main goal of energy strategy for the future?
a) Reduce energy usage
b) Maximize fossil fuel usage
c) Ensure energy security and sustainability
d) Export all energy sources

3) Which of the following is a common hydrogen production method?
a) Electrolysis b) Pyrolysis
c) Filtration d) Oxidation

4) Which of these is a key challenge in hydrogen energy?
a) High density b) Easy storage
c) High cost of production d) Lack of oxygen

5) Which of the following is a passive heating technique?
a) Air conditioner b) Direct Gain
c) Radiator d) Heat Pump

6) A thermal storage wall is used in: _____.
a) Lighting systems b) Active cooling
c) Passive solar heating d) Water pumping

7) Which of the following helps in dehumidification?
a) Ground coupling b) Radiation cooling
c) Solar panels d) Thermal mass

8) Which of the following is a direct-type solar dryer?
a) Hybrid dryer b) Natural convection dryer
c) Hot air dryer d) Industrial dryer

9) In forced circulation type dryers, the air is: _____.
a) Heated by gas burners b) Moved using fans
c) Naturally circulated d) Removed completely

10) What is the main purpose of solar drying?
a) Heating buildings b) Producing electricity
c) Preserving food d) Storing energy

11) Which of the following is a standard for PV system performance?
a) ISO 31000 b) IEC 61215
c) ASTM C1303 d) IEEE 519

12) Rooftop PV systems are typically: _____.
a) Off-grid b) Grid-connected
c) Hybrid systems only d) Diesel based

13) The cost analysis of solar PV systems includes: _____.
a) Only capital cost
b) Only labor cost
c) Performance ratio and LCOE
d) None of the above

14) What is the role of semiconductor material in PV cells?
a) Store energy
b) Reflect sunlight
c) Conduct electricity
d) Convert sunlight to electricity

S. Y. (B.Tech.) (Sem - II) (New) (CBCS) Examination: March/April - 2025
COMPUTER SCIENCE AND ENGINEERING
Advanced application in renewable Energy (EEMDM-02A)

Day & Date: Thursday, 05-June-2025 Max. Marks: 70
Time: 10:00 AM To 01:00 PM

Instructions: 1) Q. No. 1 is compulsory. It should be solved in the first 30 minutes in Answer Book Page no 03 (Starting page of the Answer Book). Each question carries one mark.
2) Don't forget to Mention question paper set (P/Q/R/S) on top of page.
3) Figures to the right indicates full marks.

MCQ/Objective Type Questions

Duration: 30 Minutes Marks:14

Q.1 Choose the correct Alternatives. **14**

1) Which of the following is a non-renewable energy source?
a) Solar energy b) Wind energy
c) Coal d) Biomass

2) What is the main goal of energy strategy for the future?
a) Reduce energy usage
b) Maximize fossil fuel usage
c) Ensure energy security and sustainability
d) Export all energy sources

3) Which of the following is a common hydrogen production method?
a) Electrolysis b) Pyrolysis
c) Filtration d) Oxidation

4) Which of these is a key challenge in hydrogen energy?
a) High density b) Easy storage
c) High cost of production d) Lack of oxygen

5) Which of the following is a passive heating technique?
a) Air conditioner b) Direct Gain
c) Radiator d) Heat Pump

6) A thermal storage wall is used in: _____.
a) Lighting systems b) Active cooling
c) Passive solar heating d) Water pumping

7) Which of the following helps in dehumidification?
a) Ground coupling b) Radiation cooling
c) Solar panels d) Thermal mass

8) Which of the following is a direct-type solar dryer?
a) Hybrid dryer b) Natural convection dryer
c) Hot air dryer d) Industrial dryer

9) In forced circulation type dryers, the air is: _____.
a) Heated by gas burners b) Moved using fans
c) Naturally circulated d) Removed completely

10) What is the main purpose of solar drying?
a) Heating buildings b) Producing electricity
c) Preserving food d) Storing energy

11) Which of the following is a standard for PV system performance?
a) ISO 31000 b) IEC 61215
c) ASTM C1303 d) IEEE 519

12) Rooftop PV systems are typically: _____.
a) Off-grid b) Grid-connected
c) Hybrid systems only d) Diesel based

13) The cost analysis of solar PV systems includes: _____.
a) Only capital cost
b) Only labor cost
c) Performance ratio and LCOE
d) None of the above

14) What is the role of semiconductor material in PV cells?
a) Store energy
b) Reflect sunlight
c) Conduct electricity
d) Convert sunlight to electricity

Set | P

S. Y. (B.Tech.) (Sem - II) (New) (CBCS) Examination: March/April - 2025
COMPUTER SCIENCE AND ENGINEERING
Advanced application in renewable Energy (EEMDM-02A)

Day & Date: Thursday, 05-June-2025 Max. Marks: 56
Time: 10:00 AM To 01:00 PM

Instructions: 1) All questions are compulsory.
2) Figures to the right indicate full marks.

Section – I

Q.2 Attempt Any Four **16**

a) Define renewable and non-renewable energy sources with examples.
b) State the challenges in transporting hydrogen.
c) Mention two differences between primary and secondary batteries.
d) What is direct gain in solar heating?
e) Explain thermal storage walls.

Q.3 Attempt Any Two **12**

a) Explain the prospects and challenges of renewable energy in India.
b) Explain the methods of hydrogen production in detail.
c) Explain the auxiliary heat supply system and control systems used in solar buildings.

Section – II

Q.4 Attempt Any Four **16**

a) What is solar drying? Mention its two key advantages.
b) Differentiate between direct-type and indirect-type solar dryers.
c) Explain hot air industrial process heat systems in solar drying.
d) What is the photovoltaic effect? Explain in brief.
e) What is net-metering in solar PV systems?

Q.5 Attempt Any Two **12**

a) Explain the performance prediction of a basin-type solar still.
b) Describe solar PV battery charging systems and their importance.
c) Explain the typical schematic of a rooftop solar PV system and its components.

S. Y. (B.Tech.) (Sem - II) (New)(NEP CBCS) Examination: March/April - 2025
ELECTRICAL ENGINEERING
Advanced application in renewable Energy (EEMDM-02A)

Day & Date: Thursday, 05-June-2025 Max. Marks: 56
Time: 10:00 AM To 01:00 PM

Instructions: 1) All questions are compulsory.
2) Figures to the right indicate full marks.

Section – I

Q.2 Attempt Any Four **16**

a) Define renewable and non-renewable energy sources with examples.
b) State the challenges in transporting hydrogen.
c) Mention two differences between primary and secondary batteries.
d) What is direct gain in solar heating?
e) Explain thermal storage walls.

Q.3 Attempt Any Two **12**

a) Explain the prospects and challenges of renewable energy in India.
b) Explain the methods of hydrogen production in detail.
c) Explain the auxiliary heat supply system and control systems used in solar buildings.

Section – II

Q.4 Attempt Any Four **16**

a) What is solar drying? Mention its two key advantages.
b) Differentiate between direct-type and indirect-type solar dryers.
c) Explain hot air industrial process heat systems in solar drying.
d) What is the photovoltaic effect? Explain in brief.
e) What is net-metering in solar PV systems?

Q.5 Attempt Any Two **12**

a) Explain the performance prediction of a basin-type solar still.
b) Describe solar PV battery charging systems and their importance.
c) Explain the typical schematic of a rooftop solar PV system and its components.

Seat No.	

Set **S**

S. Y. (B.Tech.) (Sem - II) (New)(NEP CBCS) Examination: March/April - 2025
ELECTRICAL ENGINEERING
Advanced application in renewable Energy (EEMDM-02A)

Day & Date: Thursday, 05-June-2025 Max. Marks: 70
Time: 10:00 AM To 01:00 PM

Instructions: 1) Q. No. 1 is compulsory. It should be solved in the first 30 minutes in Answer Book Page no 03 (Starting page of the Answer Book). Each question carries one mark.
2) Don't forget to Mention question paper set (P/Q/R/S) on top of page.
3) Figures to the right indicates full marks.

MCQ/Objective Type Questions

Duration: 30 Minutes Marks:14

Q.1 Choose the correct Alternatives. **14**

1) A thermal storage wall is used in: _____.
a) Lighting systems b) Active cooling
c) Passive solar heating d) Water pumping

2) Which of the following helps in dehumidification?
a) Ground coupling b) Radiation cooling
c) Solar panels d) Thermal mass

3) Which of the following is a direct-type solar dryer?
a) Hybrid dryer b) Natural convection dryer
c) Hot air dryer d) Industrial dryer

4) In forced circulation type dryers, the air is: _____.
a) Heated by gas burners b) Moved using fans
c) Naturally circulated d) Removed completely

5) What is the main purpose of solar drying?
a) Heating buildings b) Producing electricity
c) Preserving food d) Storing energy

6) Which of the following is a standard for PV system performance?
a) ISO 31000 b) IEC 61215
c) ASTM C1303 d) IEEE 519

7) Rooftop PV systems are typically: _____.
a) Off-grid b) Grid-connected
c) Hybrid systems only d) Diesel based

8) The cost analysis of solar PV systems includes: _____.
a) Only capital cost
b) Only labor cost
c) Performance ratio and LCOE
d) None of the above

9) What is the role of semiconductor material in PV cells?
a) Store energy
b) Reflect sunlight
c) Conduct electricity
d) Convert sunlight to electricity

10) Which of the following is a non-renewable energy source?
a) Solar energy b) Wind energy
c) Coal d) Biomass

11) What is the main goal of energy strategy for the future?
a) Reduce energy usage
b) Maximize fossil fuel usage
c) Ensure energy security and sustainability
d) Export all energy sources

12) Which of the following is a common hydrogen production method?
a) Electrolysis b) Pyrolysis
c) Filtration d) Oxidation

13) Which of these is a key challenge in hydrogen energy?
a) High density b) Easy storage
c) High cost of production d) Lack of oxygen

14) Which of the following is a passive heating technique?
a) Air conditioner b) Direct Gain
c) Radiator d) Heat Pump

5) Rooftop PV systems are typically: _____.
a) Off-grid b) Grid-connected
c) Hybrid systems only d) Diesel based

6) The cost analysis of solar PV systems includes: _____.
a) Only capital cost
b) Only labor cost
c) Performance ratio and LCOE
d) None of the above

7) What is the role of semiconductor material in PV cells?
a) Store energy
b) Reflect sunlight
c) Conduct electricity
d) Convert sunlight to electricity

8) Which of the following is a non-renewable energy source?
a) Solar energy b) Wind energy
c) Coal d) Biomass

9) What is the main goal of energy strategy for the future?
a) Reduce energy usage
b) Maximize fossil fuel usage
c) Ensure energy security and sustainability
d) Export all energy sources

10) Which of the following is a common hydrogen production method?
a) Electrolysis b) Pyrolysis
c) Filtration d) Oxidation

11) Which of these is a key challenge in hydrogen energy?
a) High density b) Easy storage
c) High cost of production d) Lack of oxygen

12) Which of the following is a passive heating technique?
a) Air conditioner b) Direct Gain
c) Radiator d) Heat Pump

13) A thermal storage wall is used in: _____.
a) Lighting systems b) Active cooling
c) Passive solar heating d) Water pumping

14) Which of the following helps in dehumidification?
a) Ground coupling b) Radiation cooling
c) Solar panels d) Thermal mass

Set Q

S. Y. (B.Tech.) (Sem - II) (New) (CBCS) Examination: March/April - 2025
MECHANICAL ENGINEERING
Advanced application in renewable Energy (EEMDM-02A)

Day & Date: Thursday, 05-June-2025 Max. Marks: 56
Time: 10:00 AM To 01:00 PM

Instructions: 1) All questions are compulsory.
2) Figures to the right indicate full marks.

Section – I

Q.2 Attempt Any Four **16**

a) Define renewable and non-renewable energy sources with examples.
b) State the challenges in transporting hydrogen.
c) Mention two differences between primary and secondary batteries.
d) What is direct gain in solar heating?
e) Explain thermal storage walls.

Q.3 Attempt Any Two **12**

a) Explain the prospects and challenges of renewable energy in India.
b) Explain the methods of hydrogen production in detail.
c) Explain the auxiliary heat supply system and control systems used in solar buildings.

Section – II

Q.4 Attempt Any Four **16**

a) What is solar drying? Mention its two key advantages.
b) Differentiate between direct-type and indirect-type solar dryers.
c) Explain hot air industrial process heat systems in solar drying.
d) What is the photovoltaic effect? Explain in brief.
e) What is net-metering in solar PV systems?

Q.5 Attempt Any Two **12**

a) Explain the performance prediction of a basin-type solar still.
b) Describe solar PV battery charging systems and their importance.
c) Explain the typical schematic of a rooftop solar PV system and its components.

S. Y. (B.Tech.) (Sem - II) (New) (CBCS) Examination: March/April - 2025
MECHANICAL ENGINEERING
Advanced application in renewable Energy (EEMDM-02A)

Day & Date: Thursday, 05-June-2025 Max. Marks: 70
Time: 10:00 AM To 01:00 PM

Instructions: 1) Q. No. 1 is compulsory. It should be solved in the first 30 minutes in Answer Book Page no 03 (Starting page of the Answer Book). Each question carries one mark.
2) Don't forget to Mention question paper set (P/Q/R/S) on top of page.
3) Figures to the right indicates full marks.

MCQ/Objective Type Questions

Duration: 30 Minutes Marks:14

Q.1 Choose the correct Alternatives. 14

1) Which of the following is a standard for PV system performance?
a) ISO 31000 b) IEC 61215
c) ASTM C1303 d) IEEE 519

2) Rooftop PV systems are typically: _____.
a) Off-grid b) Grid-connected
c) Hybrid systems only d) Diesel based

3) The cost analysis of solar PV systems includes: _____.
a) Only capital cost
b) Only labor cost
c) Performance ratio and LCOE
d) None of the above

4) What is the role of semiconductor material in PV cells?
a) Store energy
b) Reflect sunlight
c) Conduct electricity
d) Convert sunlight to electricity

5) Which of the following is a non-renewable energy source?
a) Solar energy b) Wind energy
c) Coal d) Biomass

6) What is the main goal of energy strategy for the future?
a) Reduce energy usage
b) Maximize fossil fuel usage
c) Ensure energy security and sustainability
d) Export all energy sources

a) Electrolysis b) Pyrolysis
c) Filtration d) Oxidation

8) Which of these is a key challenge in hydrogen energy?
a) High density b) Easy storage
c) High cost of production d) Lack of oxygen

9) Which of the following is a passive heating technique?
a) Air conditioner b) Direct Gain
c) Radiator d) Heat Pump

10) A thermal storage wall is used in: _____.
a) Lighting systems b) Active cooling
c) Passive solar heating d) Water pumping

11) Which of the following helps in dehumidification?
a) Ground coupling b) Radiation cooling
c) Solar panels d) Thermal mass

12) Which of the following is a direct-type solar dryer?
a) Hybrid dryer b) Natural convection dryer
c) Hot air dryer d) Industrial dryer

13) In forced circulation type dryers, the air is: _____.
a) Heated by gas burners b) Moved using fans
c) Naturally circulated d) Removed completely

14) What is the main purpose of solar drying?
a) Heating buildings b) Producing electricity
c) Preserving food d) Storing energy

Electrical Vehicle Motors (EEMDM-02B)

Day & Date: Thursday, 05-June-2025 Max. Marks: 70
Time: 10:00 AM To 01:00 PM

Instructions: 1) Q. No. 1 is compulsory. It should be solved in the first 30 minutes in Answer Book Page no 03 (Starting page of the Answer Book). Each question carries one mark.
2) Don't forget to Mention question paper set (P/Q/R/S) on top of page.

MCQ/Objective Type Questions

Duration: 30 Minutes Marks:14

Q.1 Solve All MCQ Questions: 14

1) What is the primary role of electric motors in Electric Vehicles (EVs)?
a) To generate electricity b) To propel the vehicle
c) To charge the battery d) To power accessories

2) Which type of electric motor uses a permanent magnet as the rotor?
a) DC motor b) Induction motor
c) Synchronous motor d) Permanent Magnet (PM) motor

3) What is the fundamental principle behind the operation of electric motors?
a) Faraday's law b) Lorentz force
c) Newton's law d) Ohm's law

4) Which of the following DC motors has the highest starting torque?
a) DC Shunt Motor b) DC Series Motor
c) DC Compound Motor d) None of the above

5) In a DC shunt motor, the field winding is connected: _____
a) In series with the armature
b) In parallel with the armature
c) In series with the load
d) In parallel with the load

6) A DC compound motor has: ____.
a) Only series field winding
b) Only shunt field winding
c) Both series and shunt field windings
d) Neither series nor shunt field winding

7) What is the primary advantage of using three-phase induction motors in Electric Vehicles (EVs)?
a) High power density b) Low cost
c) High efficiency d) Simple control

8) Which of the following design considerations is crucial for induction motors in EVs?

a) High torque density b) Low noise emission
c) High power factor d) All of the above

9) What is the primary function of a Variable Frequency Drive (VFD) in an induction motor?

a) To regulate the motor speed
b) To control the motor torque
c) To optimize the motor efficiency
d) To convert DC power to AC power

10) What is the primary reason for using starters in electric motors used in Electric Vehicles (EVs)?

a) To increase the starting torque
b) To reduce the starting current
c) To improve the motor efficiency
d) To increase the motor speed

11) Which of the following is a benefit of using starters in electric motors used in EVs?

a) Increased starting torque b) Reduced starting current
c) Improved motor efficiency d) All of the above

12) What happens when an electric motor is started without a starter?

a) The motor starts smoothly
b) The motor starts with a high starting torque
c) The motor draws a high inrush current
d) The motor does not start

13) What is the primary advantage of PMSMs?

a) High efficiency b) Low cost
c) Simple construction d) High torque ripple

14) PMSMs use: ____.

a) Permanent magnets b) Electromagnets
c) Induction coils d) None of the above

Section – I

Q.2 Answer the following: (Any Four) **16**

a) Describe the main components of an electric propulsion system.
b) Describe the role of electric motors in Electric Vehicles (EVs).
c) Explain the construction and component of electric motors.
d) Comparison between DC Motor, induction Motor, synchronous Motor and permanent magnet motors.
e) Draw and explain in details of Shunt DC motor.
f) Draw and explain in details of Series DC motor.

Q.3 Answer the following: (Any Two) **12**

a) Explain in details of principles of electric motors (Faraday's law, Lorentz force, torque production).
b) Explain the construction and component of electric motors.
c) Comparison between DC series motor and Shunt motor.

Section – II

Q.4 Solve the following: (Any Four) **16**

a) Explain the working principle of three-phase induction motor.
b) Comparison between Squirrel Cage & Slip Ring Induction Motor.
c) Explain the need for starters in electric motors used in EVs.
d) Describe the function and operation of stator resistance starter.
e) Explain in brief working and construction of Permanent Magnet Synchronous motor.
f) Explain in brief working and construction of Switched Reluctance motor.

Q.5 Solve the following: (Any Two) **12**

a) Explain in details design considerations for induction motors in Electric Vehicle.
b) Describe the function and operation of star-delta starters.
c) Explain in brief working and construction of Brushless DC motor.

12) What is the fundamental principle behind the operation of electric motors?
a) Faraday's law b) Lorentz force
c) Newton's law d) Ohm’s law

13) Which of the following DC motors has the highest starting torque?
a) DC Shunt Motor b) DC Series Motor
c) DC Compound Motor d) None of the above

14) In a DC shunt motor, the field winding is connected: _____
a) In series with the armature
b) In parallel with the armature
c) In series with the load
d) In parallel with the load

S.Y. (B. Tech) (Sem - II) (New) (CBCS) Examination: March/April-2025
CIVIL ENGINEERING
Electrical Vehicle Motors (EEMDM-02B)

Day & Date: Thursday, 05-June-2025 Max. Marks: 56
Time: 10:00 AM To 01:00 PM

Instructions: 1) All question are compulsory.
2) Figures to the right indicate full marks.

Section – I

Q.2 Answer the following: (Any Four) **16**

a) Describe the main components of an electric propulsion system.
b) Describe the role of electric motors in Electric Vehicles (EVs).
c) Explain the construction and component of electric motors.
d) Comparison between DC Motor, induction Motor, synchronous Motor and permanent magnet motors.
e) Draw and explain in details of Shunt DC motor.
f) Draw and explain in details of Series DC motor.

Q.3 Answer the following: (Any Two) **12**

a) Explain in details of principles of electric motors (Faraday's law, Lorentz force, torque production).
b) Explain the construction and component of electric motors.
c) Comparison between DC series motor and Shunt motor.

Section – II

Q.4 Solve the following: (Any Four) **16**

a) Explain the working principle of three-phase induction motor.
b) Comparison between Squirrel Cage & Slip Ring Induction Motor.
c) Explain the need for starters in electric motors used in EVs.
d) Describe the function and operation of stator resistance starter.
e) Explain in brief working and construction of Permanent Magnet Synchronous motor.
f) Explain in brief working and construction of Switched Reluctance motor.

Q.5 Solve the following: (Any Two) **12**

a) Explain in details design considerations for induction motors in Electric Vehicle.
b) Describe the function and operation of star-delta starters.
c) Explain in brief working and construction of Brushless DC motor.

Electrical Vehicle Motors (EEMDM-02B)

Day & Date: Thursday, 05-June-2025 Max. Marks: 70
Time: 10:00 AM To 01:00 PM

Instructions: 1) Q. No. 1 is compulsory. It should be solved in the first 30 minutes in Answer Book Page no 03 (Starting page of the Answer Book). Each question carries one mark.
2) Don't forget to Mention question paper set (P/Q/R/S) on top of page.

MCQ/Objective Type Questions

Duration: 30 Minutes Marks:14

Q.1 Solve All MCQ Questions: 14

1) What is the primary role of electric motors in Electric Vehicles (EVs)?
a) To generate electricity b) To propel the vehicle
c) To charge the battery d) To power accessories

2) Which type of electric motor uses a permanent magnet as the rotor?
a) DC motor b) Induction motor
c) Synchronous motor d) Permanent Magnet (PM) motor

3) What is the fundamental principle behind the operation of electric motors?
a) Faraday's law b) Lorentz force
c) Newton's law d) Ohm's law

4) Which of the following DC motors has the highest starting torque?
a) DC Shunt Motor b) DC Series Motor
c) DC Compound Motor d) None of the above

5) In a DC shunt motor, the field winding is connected: _____
a) In series with the armature
b) In parallel with the armature
c) In series with the load
d) In parallel with the load

6) A DC compound motor has: ____.
a) Only series field winding
b) Only shunt field winding
c) Both series and shunt field windings
d) Neither series nor shunt field winding

7) What is the primary advantage of using three-phase induction motors in Electric Vehicles (EVs)?
a) High power density b) Low cost
c) High efficiency d) Simple control

8) Which of the following design considerations is crucial for induction motors in EVs?

a) High torque density b) Low noise emission
c) High power factor d) All of the above

9) What is the primary function of a Variable Frequency Drive (VFD) in an induction motor?

a) To regulate the motor speed
b) To control the motor torque
c) To optimize the motor efficiency
d) To convert DC power to AC power

10) What is the primary reason for using starters in electric motors used in Electric Vehicles (EVs)?

a) To increase the starting torque
b) To reduce the starting current
c) To improve the motor efficiency
d) To increase the motor speed

11) Which of the following is a benefit of using starters in electric motors used in EVs?

a) Increased starting torque b) Reduced starting current
c) Improved motor efficiency d) All of the above

12) What happens when an electric motor is started without a starter?

a) The motor starts smoothly
b) The motor starts with a high starting torque
c) The motor draws a high inrush current
d) The motor does not start

13) What is the primary advantage of PMSMs?

a) High efficiency b) Low cost
c) Simple construction d) High torque ripple

14) PMSMs use: ____.

a) Permanent magnets b) Electromagnets
c) Induction coils d) None of the above

c) To charge the battery d) To power accessories

9) Which type of electric motor uses a permanent magnet as the rotor?
a) DC motor b) Induction motor
c) Synchronous motor d) Permanent Magnet (PM) motor

10) What is the fundamental principle behind the operation of electric motors?
a) Faraday's law b) Lorentz force
c) Newton's law d) Ohm’s law

11) Which of the following DC motors has the highest starting torque?
a) DC Shunt Motor b) DC Series Motor
c) DC Compound Motor d) None of the above

12) In a DC shunt motor, the field winding is connected: _____
a) In series with the armature
b) In parallel with the armature
c) In series with the load
d) In parallel with the load

13) A DC compound motor has: ____.
a) Only series field winding
b) Only shunt field winding
c) Both series and shunt field windings
d) Neither series nor shunt field winding

14) What is the primary advantage of using three-phase induction motors in Electric Vehicles (EVs)?
a) High power density b) Low cost
c) High efficiency d) Simple control

Set **Q**

S.Y. (B. Tech) (Sem - II) (New) (NEP CBCS) Examination: March/April-2025
ELECTRICAL ENGINEERING
Electrical Vehicle Motors (EEMDM-02B)

Day & Date: Thursday, 05-June-2025 Max. Marks: 56
Time: 10:00 AM To 01:00 PM

Instructions: 1) All question are compulsory.
2) Figures to the right indicate full marks.

Section – I

Q.2 Answer the following: (Any Four) **16**

a) Describe the main components of an electric propulsion system.
b) Describe the role of electric motors in Electric Vehicles (EVs).
c) Explain the construction and component of electric motors.
d) Comparison between DC Motor, induction Motor, synchronous Motor and permanent magnet motors.
e) Draw and explain in details of Shunt DC motor.
f) Draw and explain in details of Series DC motor.

Q.3 Answer the following: (Any Two) **12**

a) Explain in details of principles of electric motors (Faraday's law, Lorentz force, torque production).
b) Explain the construction and component of electric motors.
c) Comparison between DC series motor and Shunt motor.

Section – II

Q.4 Solve the following: (Any Four) **16**

a) Explain the working principle of three-phase induction motor.
b) Comparison between Squirrel Cage & Slip Ring Induction Motor.
c) Explain the need for starters in electric motors used in EVs.
d) Describe the function and operation of stator resistance starter.
e) Explain in brief working and construction of Permanent Magnet Synchronous motor.
f) Explain in brief working and construction of Switched Reluctance motor.

Q.5 Solve the following: (Any Two) **12**

a) Explain in details design considerations for induction motors in Electric Vehicle.
b) Describe the function and operation of star-delta starters.
c) Explain in brief working and construction of Brushless DC motor.

ELECTRICAL ENGINEERING
Electrical Vehicle Motors (EEMDM-02B)

Day & Date: Thursday, 05-June-2025 Max. Marks: 70
Time: 10:00 AM To 01:00 PM

Instructions: 1) Q. No. 1 is compulsory. It should be solved in the first 30 minutes in Answer Book Page no 03 (Starting page of the Answer Book). Each question carries one mark.
2) Don't forget to Mention question paper set (P/Q/R/S) on top of page.

MCQ/Objective Type Questions

Duration: 30 Minutes Marks:14

Q.1 Solve All MCQ Questions: **14**

1) Which of the following is a benefit of using starters in electric motors used in EVs?
a) Increased starting torque b) Reduced starting current
c) Improved motor efficiency d) All of the above

2) What happens when an electric motor is started without a starter?
a) The motor starts smoothly
b) The motor starts with a high starting torque
c) The motor draws a high inrush current
d) The motor does not start

3) What is the primary advantage of PMSMs?
a) High efficiency b) Low cost
c) Simple construction d) High torque ripple

4) PMSMs use: ____.
a) Permanent magnets b) Electromagnets
c) Induction coils d) None of the above

5) What is the primary role of electric motors in Electric Vehicles (EVs)?
a) To generate electricity b) To propel the vehicle
c) To charge the battery d) To power accessories

6) Which type of electric motor uses a permanent magnet as the rotor?
a) DC motor b) Induction motor
c) Synchronous motor d) Permanent Magnet (PM) motor

7) What is the fundamental principle behind the operation of electric motors?
a) Faraday's law b) Lorentz force
c) Newton's law d) Ohm's law

8) Which of the following DC motors has the highest starting torque?
a) DC Shunt Motor b) DC Series Motor
c) DC Compound Motor d) None of the above

9) In a DC shunt motor, the field winding is connected: _____
a) In series with the armature
b) In parallel with the armature
c) In series with the load
d) In parallel with the load

10) A DC compound motor has: ____.
a) Only series field winding
b) Only shunt field winding
c) Both series and shunt field windings
d) Neither series nor shunt field winding

11) What is the primary advantage of using three-phase induction motors in Electric Vehicles (EVs)?
a) High power density b) Low cost
c) High efficiency d) Simple control

12) Which of the following design considerations is crucial for induction motors in EVs?
a) High torque density b) Low noise emission
c) High power factor d) All of the above

13) What is the primary function of a Variable Frequency Drive (VFD) in an induction motor?
a) To regulate the motor speed
b) To control the motor torque
c) To optimize the motor efficiency
d) To convert DC power to AC power

14) What is the primary reason for using starters in electric motors used in Electric Vehicles (EVs)?
a) To increase the starting torque
b) To reduce the starting current
c) To improve the motor efficiency
d) To increase the motor speed

c) To improve the motor efficiency
d) To increase the motor speed

6) Which of the following is a benefit of using starters in electric motors used in EVs?
a) Increased starting torque b) Reduced starting current
c) Improved motor efficiency d) All of the above

7) What happens when an electric motor is started without a starter?
a) The motor starts smoothly
b) The motor starts with a high starting torque
c) The motor draws a high inrush current
d) The motor does not start

8) What is the primary advantage of PMSMs?
a) High efficiency b) Low cost
c) Simple construction d) High torque ripple

9) PMSMs use: ____.
a) Permanent magnets b) Electromagnets
c) Induction coils d) None of the above

10) What is the primary role of electric motors in Electric Vehicles (EVs)?
a) To generate electricity b) To propel the vehicle
c) To charge the battery d) To power accessories

11) Which type of electric motor uses a permanent magnet as the rotor?
a) DC motor b) Induction motor
c) Synchronous motor d) Permanent Magnet (PM) motor

12) What is the fundamental principle behind the operation of electric motors?
a) Faraday's law b) Lorentz force
c) Newton's law d) Ohm’s law

13) Which of the following DC motors has the highest starting torque?
a) DC Shunt Motor b) DC Series Motor
c) DC Compound Motor d) None of the above

14) In a DC shunt motor, the field winding is connected: _____
a) In series with the armature
b) In parallel with the armature
c) In series with the load
d) In parallel with the load

S.Y. (B. Tech) (Sem - II) (New) (NEP CBCS) Examination: March/April-2025
ELECTRONICS & TELECOMMUNICATION ENGINEERING
Electrical Vehicle Motors (EEMDM-02B)

Day & Date: Thursday, 05-June-2025 Max. Marks: 56
Time: 10:00 AM To 01:00 PM

Instructions: 1) All question are compulsory.
2) Figures to the right indicate full marks.

Section – I

Q.2 Answer the following: (Any Four) **16**

a) Describe the main components of an electric propulsion system.
b) Describe the role of electric motors in Electric Vehicles (EVs).
c) Explain the construction and component of electric motors.
d) Comparison between DC Motor, induction Motor, synchronous Motor and permanent magnet motors.
e) Draw and explain in details of Shunt DC motor.
f) Draw and explain in details of Series DC motor.

Q.3 Answer the following: (Any Two) **12**

a) Explain in details of principles of electric motors (Faraday's law, Lorentz force, torque production).
b) Explain the construction and component of electric motors.
c) Comparison between DC series motor and Shunt motor.

Section – II

Q.4 Solve the following: (Any Four) **16**

a) Explain the working principle of three-phase induction motor.
b) Comparison between Squirrel Cage & Slip Ring Induction Motor.
c) Explain the need for starters in electric motors used in EVs.
d) Describe the function and operation of stator resistance starter.
e) Explain in brief working and construction of Permanent Magnet Synchronous motor.
f) Explain in brief working and construction of Switched Reluctance motor.

Q.5 Solve the following: (Any Two) **12**

a) Explain in details design considerations for induction motors in Electric Vehicle.
b) Describe the function and operation of star-delta starters.
c) Explain in brief working and construction of Brushless DC motor.

MCQ/Objective Type Questions

Duration: 30 Minutes Marks:14

Q.1 Solve All MCQ Questions: 14

1) What is the primary role of electric motors in Electric Vehicles (EVs)?
a) To generate electricity b) To propel the vehicle
c) To charge the battery d) To power accessories

2) Which type of electric motor uses a permanent magnet as the rotor?
a) DC motor b) Induction motor
c) Synchronous motor d) Permanent Magnet (PM) motor

3) What is the fundamental principle behind the operation of electric motors?
a) Faraday's law b) Lorentz force
c) Newton's law d) Ohm's law

4) Which of the following DC motors has the highest starting torque?
a) DC Shunt Motor b) DC Series Motor
c) DC Compound Motor d) None of the above

5) In a DC shunt motor, the field winding is connected: _____
a) In series with the armature
b) In parallel with the armature
c) In series with the load
d) In parallel with the load

6) A DC compound motor has: ____.
a) Only series field winding
b) Only shunt field winding
c) Both series and shunt field windings
d) Neither series nor shunt field winding

7) What is the primary advantage of using three-phase induction motors in Electric Vehicles (EVs)?
a) High power density b) Low cost
c) High efficiency d) Simple control

8) Which of the following design considerations is crucial for induction motors in EVs?

a) High torque density b) Low noise emission
c) High power factor d) All of the above

9) What is the primary function of a Variable Frequency Drive (VFD) in an induction motor?

a) To regulate the motor speed
b) To control the motor torque
c) To optimize the motor efficiency
d) To convert DC power to AC power

10) What is the primary reason for using starters in electric motors used in Electric Vehicles (EVs)?

a) To increase the starting torque
b) To reduce the starting current
c) To improve the motor efficiency
d) To increase the motor speed

11) Which of the following is a benefit of using starters in electric motors used in EVs?

a) Increased starting torque b) Reduced starting current
c) Improved motor efficiency d) All of the above

12) What happens when an electric motor is started without a starter?

a) The motor starts smoothly
b) The motor starts with a high starting torque
c) The motor draws a high inrush current
d) The motor does not start

3) Make suitable assumptions (if necessary and state them clearly

MCQ/Objective Type Questions

Duration: 30 Minutes Marks: 14

Q.1 Choose the correct Answer. **14**

1) How many thyristors does we need in half wave converter?
a) 1 b) 2
c) 3 d) Many

2) In a hybrid electric vehicle one energy source is_____& the other is a conversion of a _____.
a) combustion, energy to fuel b) storage, energy to fuel
c) storage, energy to energy d) storage, Fuel to energy

3) Dual converters provide
a) two quadrant operation b) three quadrant operation
c) four quadrant operation d) none of the mentioned

4) Electric motors are ideal for vehicular applications because of
a) the torque speed characteristics
b) the V 1 characteristics
c) the Pd characteristics
d) the alpha delta characteristics

5) The disadvantage of stator voltage control method using $3-\Phi$ ac voltage controller feeding a $3-\Phi 1.\mathrm{M}$ is /are
a) offers limited speed range
b) introduces pronounce harmonic contents
c) supply p.f. for the voltage is quite low
d) all of the above

6) For a step-up chopper, when the duty cycle is increased the average value of the output voltage
a) Increases b) Decreases
c) remains the same d) none of the mentioned

7) A fully controlled converter uses
a) diodes only
b) thyristors only
c) both diodes and thyristors
d) none of the mentioned

8) In VSI fed Induction Motor drives the magnitude of the load current depends on the nature of
a) load voltage
b) load impedance
c) load power
d) supply current

9) _____ method relies on keeping V/f ratio constant so as to maintain air gap flux at constant value
a) Scalar Control
b) Vector Control
c) Torque Control
d) none of the above

10) _____analysis of an IM allows decoupled analysis where the flux and torque component can be independently controlled?
a) Scalar Control
b) Vector Control
c) V/F Control
d) none of the above

11) _____is a technique that allows you to instantaneously control the motor magnetic flux and its electromagnetic torque in a decoupled way.
a) Scalar Control
b) Vector Control
c) Direct Torque Control
d) none of the above

12) The Field Oriented Control (FOC) enables the induction machine being controlled alike the
a) separately excited DC Machine
b) Permanent magnet DC Machine
c) Switched reluctance machine
d) Stepper motor

13) Which of the following control loops used by Direct torque control?
a) speed control loop
b) torque control loop
c) both a & b
d) none of the above

14) Space vector modulation is responsible for generating pulse width modulated signals to control the switches of an inverter
a) generating pulse width modulated signals to control the switches of an inverter
b) generating pulse width modulated signals only
c) control the switches of an inverter only
d) none of the above

Instructions: 1) All questions are compulsory.
2) Figures to the right indicate full marks.
3) Assume suitable data wherever necessary.

Section – I

Q.2 Attempt any four of the following: **16**

a) Explain power flow in Hybrid Electric Drive Train System with different modes.
b) Explain frequency modulation in case of Chopper Control.
c) Explain with diagram Parallel Hybrid Electric Drive Train System.
d) Describe single phase half wave converter feeding a separately excited dc motor with circuit diagram and waveform.
e) Explain in detail basic structure of switched reluctance motor.
f) Explain the operation of V/F control method of speed control of induction motor drive.

Q.3 Attempt any two of the following: **12**

a) Explain in detail power flow in n Hybrid Electric Drive Train System with different modes.
b) Explain Closed loop Speed control of CSI fed Induction machine with suitable diagram.
c) Explain performance and control strategy of multi-quadrant operation in case of Chopper controlled dc motor.

Section – II

Q.4 Attempt any four of the following: **16**

a) Explain in detail lndirect/Feed forward vector control of induction machine.
b) Explain principle of direct vector control of induction machine.
c) Explain optimum switching vector control strategy in case of DTC control of induction machine.
d) Describe the torque expression with stator and rotor fluxes in case of Direct Torque control of induction machine.
e) Explain Vehicle Supervisory Control in the context of hybrid and electric vehicles.
f) Describe space vector modulation control in case of induction machine.

Q.5 Attempt any two of the following: **12**

a) Explain different Modal Control Strategy and Mode Selection Strategy for control of electric vehicles.

b) Explain in detail theory and dc drive analogy of field-oriented control of Induction Machine.

c) Explain with block diagram Direct Torque Control of induction motor.

Duration: 30 Minutes Marks: 14

Q.1 Choose the correct Answer. 14

1) In VSI fed Induction Motor drives the magnitude of the load current depends on the nature of
a) load voltage b) load impedance
c) load power d) supply current

2) _____ method relies on keeping V/f ratio constant so as to maintain air gap flux at constant value
a) Scalar Control b) Vector Control
c) Torque Control d) none of the above

3) _____analysis of an IM allows decoupled analysis where the flux and torque component can be independently controlled?
a) Scalar Control b) Vector Control
c) V/F Control d) none of the above

4) _____is a technique that allows you to instantaneously control the motor magnetic flux and its electromagnetic torque in a decoupled way.
a) Scalar Control b) Vector Control
c) Direct Torque Control d) none of the above

5) The Field Oriented Control (FOC) enables the induction machine being controlled alike the
a) separately excited DC Machine
b) Permanent magnet DC Machine
c) Switched reluctance machine
d) Stepper motor

6) Which of the following control loops used by Direct torque control?
a) speed control loop b) torque control loop
c) both a & b d) none of the above

7) Space vector modulation is responsible for generating pulse width modulated signals to control the switches of an inverter
a) generating pulse width modulated signals to control the switches of an inverter
b) generating pulse width modulated signals only
c) control the switches of an inverter only
d) none of the above

8) How many thyristors does we need in half wave converter?
a) 1 b) 2
c) 3 d) Many

9) In a hybrid electric vehicle one energy source is_____& the other is a conversion of a _____.
a) combustion, energy to fuel b) storage, energy to fuel
c) storage, energy to energy d) storage, Fuel to energy

10) Dual converters provide
a) two quadrant operation b) three quadrant operation
c) four quadrant operation d) none of the mentioned

11) Electric motors are ideal for vehicular applications because of
a) the torque speed characteristics
b) the V 1 characteristics
c) the Pd characteristics
d) the alpha delta characteristics

12) The disadvantage of stator voltage control method using $3-\Phi$ ac voltage controller feeding a $3-\Phi 1.\mathrm{M}$ is /are
a) offers limited speed range
b) introduces pronounce harmonic contents
c) supply p.f. for the voltage is quite low
d) all of the above

13) For a step-up chopper, when the duty cycle is increased the average value of the output voltage
a) Increases b) Decreases
c) remains the same d) none of the mentioned

14) A fully controlled converter uses
a) diodes only b) thyristors only
c) both diodes and thyristors d) none of the mentioned

Set **Q**

S.Y. (B. Tech) (Sem - II) (New) (NEP CBCS) Examination: March/April-2025
ELECTRICAL ENGINEERING
Electric Motors and Controls for Electric Vehicle (EEHn-02A)

Day & Date: Monday, 09-June-2025 Max. Marks: 56
Time: 10:00 AM To 01:00 PM

Instructions: 1) All questions are compulsory.
2) Figures to the right indicate full marks.
3) Assume suitable data wherever necessary.

Section – I

Q.2 Attempt any four of the following: **16**

a) Explain power flow in Hybrid Electric Drive Train System with different modes.
b) Explain frequency modulation in case of Chopper Control.
c) Explain with diagram Parallel Hybrid Electric Drive Train System.
d) Describe single phase half wave converter feeding a separately excited dc motor with circuit diagram and waveform.
e) Explain in detail basic structure of switched reluctance motor.
f) Explain the operation of V/F control method of speed control of induction motor drive.

Q.3 Attempt any two of the following: **12**

a) Explain in detail power flow in n Hybrid Electric Drive Train System with different modes.
b) Explain Closed loop Speed control of CSI fed Induction machine with suitable diagram.
c) Explain performance and control strategy of multi-quadrant operation in case of Chopper controlled dc motor.

Section – II

Q.4 Attempt any four of the following: **16**

a) Explain in detail lndirect/Feed forward vector control of induction machine.
b) Explain principle of direct vector control of induction machine.
c) Explain optimum switching vector control strategy in case of DTC control of induction machine.
d) Describe the torque expression with stator and rotor fluxes in case of Direct Torque control of induction machine.
e) Explain Vehicle Supervisory Control in the context of hybrid and electric vehicles.
f) Describe space vector modulation control in case of induction machine.

Q.5 Attempt any two of the following: **12**

a) Explain different Modal Control Strategy and Mode Selection Strategy for control of electric vehicles.

b) Explain in detail theory and dc drive analogy of field-oriented control of Induction Machine.

c) Explain with block diagram Direct Torque Control of induction motor.

Time: 10:00 AM To 01:00 PM

Instructions: 1) Q. No. 1 is compulsory. It should be solved in the first 30 minutes in Answer Book Page no 03 (Starting page of the Answer Book). Each question carries one mark.
2) Don't forget to Mention question paper set (P/Q/R/S) on top of page.
3) Make suitable assumptions (if necessary and state them clearly

MCQ/Objective Type Questions

Duration: 30 Minutes Marks: 14

Q.1 Choose the correct Answer. **14**

1) _____is a technique that allows you to instantaneously control the motor magnetic flux and its electromagnetic torque in a decoupled way.

a) Scalar Control b) Vector Control
c) Direct Torque Control d) none of the above

2) The Field Oriented Control (FOC) enables the induction machine being controlled alike the

a) separately excited DC Machine
b) Permanent magnet DC Machine
c) Switched reluctance machine
d) Stepper motor

3) Which of the following control loops used by Direct torque control?

a) speed control loop b) torque control loop
c) both a & b d) none of the above

4) Space vector modulation is responsible for generating pulse width modulated signals to control the switches of an inverter

a) generating pulse width modulated signals to control the switches of an inverter
b) generating pulse width modulated signals only
c) control the switches of an inverter only
d) none of the above

5) How many thyristors does we need in half wave converter?

a) 1 b) 2
c) 3 d) Many

6) In a hybrid electric vehicle one energy source is_____& the other is a conversion of a _____.

a) combustion, energy to fuel b) storage, energy to fuel
c) storage, energy to energy d) storage, Fuel to energy

7) Dual converters provide

a) two quadrant operation b) three quadrant operation
c) four quadrant operation d) none of the mentioned

8) Electric motors are ideal for vehicular applications because of

a) the torque speed characteristics
b) the V 1 characteristics

Q.1 Choose the correct Answer. **14**

1) An Which of the following is a key feature of smart grids?
a) Manual operation b) One-way communication
c) Two-way communication d) Analog control

2) Which of the following is NOT a smart grid objective?
a) Enhanced reliability b) Increased blackouts
c) Improved efficiency d) Better load management

3) Which of these is a decision-making tool used in smart grid management?
a) SCADA b) CRM
c) ERP d) HTML

4) Which of the following is a grid-scale energy storage system?
a) Lead-acid battery b) Supercapacitor
c) Pumped hydro storage d) Mobile power bank

5) Demand aggregation refers to:
a) Combining power from multiple generators
b) Accumulating power losses
c) Consolidating loads for efficient energy use
d) Grouping substations

6) Fundamentals of demand response include:
a) Increasing transformer size
b) Real-time pricing and incentives
c) Installing solar panels
d) Extending transmission lines

7) Which of the following is ***not*** a feature of grid computing?
a) Scalability
b) Decentralized control
c) Limited resource usage
d) Fault tolerance

8) Which of the following is an example of dynamic pricing used in residential metering?
a) Flat Rate
b) Block Rate Pricing
c) Real-Time Pricing (RTP)
d) Monthly Average Pricing

9) Which of the following parameters is ***not*** typically monitored in equipment condition monitoring?
a) Vibration
b) Temperature
c) Voltage Stability Margin
d) Insulation resistance

10) Smart vending machines are designed to:
a) Provide offline transactions
b) Monitor stock and usage patterns
c) Reduce product prices
d) Operate manually

11) Which system manages heating, cooling, and electricity in a smart home?
a) HVAC System
b) IoT router
c) Central lighting panel
d) Water purifier

12) Which of the following is NOT a component of a Smart City?
a) Smart Lighting
b) Smart Toilets
c) Smart Roads
d) Smart Parking

13) PHEVs can contribute to smart grid applications through:
a) Generating electricity
b) Peak load shaving via V2G
c) Demand forecasting
d) Power factor correction

14) What is the primary goal of Demand Side Management (DSM)?
a) Increase generation capacity
b) Enhance customer billing
c) Modify consumer demand pattern
d) Reduce electricity theft

S.Y. (B. Tech) (Sem - II) (New) (NEP CBCS) Examination: March/April-2025
ELECTRICAL ENGINEERING
Smart Energy Management System (EEHn-02B)

Day & Date: Monday, 09-June-2025 Max. Marks: 70
Time: 10:00 AM To 01:00 PM

Instructions: 1) Q. No. 1 is compulsory. It should be solved in the first 30 minutes in Answer Book Page no 03 (Starting page of the Answer Book). Each question carries one mark.
2) Don't forget to Mention question paper set (P/Q/R/S) on top of page.
3) Make suitable assumptions (if necessary and state them clearly).
4) Separate answer books for each section.

MCQ/Objective Type Questions

Duration: 30 Minutes Marks: 14

Q.1 Choose the correct Answer. **14**

1) Fundamentals of demand response include:
a) Increasing transformer size
b) Real-time pricing and incentives
c) Installing solar panels
d) Extending transmission lines

2) Which of the following is ***not*** a feature of grid computing?
a) Scalability b) Decentralized control
c) Limited resource usage d) Fault tolerance

3) Which of the following is an example of dynamic pricing used in residential metering?
a) Flat Rate b) Block Rate Pricing
c) Real-Time Pricing (RTP) d) Monthly Average Pricing

4) Which of the following parameters is ***not*** typically monitored in equipment condition monitoring?
a) Vibration b) Temperature
c) Voltage Stability Margin d) Insulation resistance

5) Smart vending machines are designed to:
a) Provide offline transactions
b) Monitor stock and usage patterns
c) Reduce product prices
d) Operate manually

6) Which system manages heating, cooling, and electricity in a smart home?
a) HVAC System b) IoT router
c) Central lighting panel d) Water purifier

7) Which of the following is NOT a component of a Smart City?
a) Smart Lighting b) Smart Toilets
c) Smart Roads d) Smart Parking

8) PHEVs can contribute to smart grid applications through:
a) Generating electricity b) Peak load shaving via V2G
c) Demand forecasting d) Power factor correction

9) What is the primary goal of Demand Side Management (DSM)?
a) Increase generation capacity
b) Enhance customer billing
c) Modify consumer demand pattern
d) Reduce electricity theft

10) An Which of the following is a key feature of smart grids?
a) Manual operation b) One-way communication
c) Two-way communication d) Analog control

11) Which of the following is NOT a smart grid objective?
a) Enhanced reliability b) Increased blackouts
c) Improved efficiency d) Better load management

12) Which of these is a decision-making tool used in smart grid management?
a) SCADA b) CRM
c) ERP d) HTML

13) Which of the following is a grid-scale energy storage system?
a) Lead-acid battery b) Supercapacitor
c) Pumped hydro storage d) Mobile power bank

14) Demand aggregation refers to:
a) Combining power from multiple generators
b) Accumulating power losses
c) Consolidating loads for efficient energy use
d) Grouping substations

Smart Energy Management System (EEHn-02B)

Day & Date: Monday, 09-June-2025 Max. Marks: 56
Time: 10:00 AM To 01:00 PM

Instructions: 1) All questions are compulsory.
2) Figures to the right indicate full marks.
3) Assume suitable data wherever necessary.
4) Draw neat diagrams whenever necessary.

Section – I

Q.2 Attempt any four of the following: **16**

a) Write short notes on Hardware-Software communication in smart grids.
b) Explain the use of estimation techniques in smart grid control.
c) List different types of energy storage mediums and explain any two briefly.
d) List and explain any two applications of data mining techniques in power system analysis.
e) Briefly explain how grid computing improves reliability in smart grids.

Q.3 Attempt any two of the following: **12**

a) Discuss the key technologies used for smart grid generation, networks, and load control.
b) Describe the principles, tools, and techniques used in Demand Side Management (DSM).
c) Describe the working principle and benefits of optimization algorithms in SEMS with suitable examples.

Section – II

Q.4 Attempt any four of the following: **16**

a) Define the characteristics of distribution grids in terms of topology and assets.
b) Explain the concept of substation automation in modern distribution grids.
c) Define Advanced Metering Infrastructure (AMI) and list its key components.
d) List any two impacts of smart grid integration on the distribution network.
e) What are the main challenges in smart city modeling?

Q.5 Attempt any two of the following: **12**

a) How does substation automation contribute to grid reliability and efficiency? Discuss with applications.

b) Describe how demand response helps in load balancing and peak load reduction in a smart grid.

c) Explain in detail Smart Home System.

4) Assume sutiable fata if necessary.

MCQ/Objective Type Questions

Duration: 30 Minutes Marks:14

Q.1 Choose the correct answer: **14**

1) If the phase sequence of supply currents is reversed, then the direction of rotation of the resultant Magnetic Field will _____
a) Be reversed b) Remains unchanged
c) Cannot be determined d) None of the mentioned

2) Slip ring induction motor has ____
a) Low starting torque
b) Medium starting torque
c) High starting torque
d) None of these

3) The maximum torque in an IM depends on ____
a) Frequency
b) rotor inductive reactance
c) square of supply voltage
d) all the above

4) The auto-starters (using three auto transformers) can be used to start cage induction motor of the following type ____
a) star connected only b) delta connected only
c) (a) and (b) both d) none of the above

5) For which motor the speed can be controlled from rotor side?
a) Squirrel-cage induction motor
b) Slip-ring induction motor
c) Both (a) and (b)
d) None of the above

6) A 10kW, 400V, 4-pole delta connected induction motor gave the following test results: No-load test: 400V, 8A, 250 W Blocked rotor test: 90, 35A,1350 W. The dc resistance per phase is 0.6 ohms. The effective stator resistance is _____

a) 0.72 ohms b) 0.6 ohms
c) 0.3 ohms d) 1.2 ohms

7) The electrical analogous of the mechanical load in the induction machine is given by _____

a) (r2)*(1-s)/s b) (r2)
c) (r2)/s d) (r2)/(1-s)

8) A single-phase induction motor is _____

a) inherently self-starting with high torque
b) inherently non-self-starting with low torque
c) inherently self-starting with low torque
d) inherently non-self-starting with high torque

9) In a single phase motor the centrifugal switch _____

a) disconnects auxiliary winding of the motor
b) disconnects main winding of the motor
c) reconnects the main winding the motor
d) reconnects the auxiliary winding of the motor

10) The short circuit characteristic of alternator is a straight line due to _____

a) no saturation b) no armature reaction
c) no eddy current d) all of the mentioned

11) The zero power factor of an alternator can be obtained by _____ at rated Ia.

a) conducting short circuit of secondary terminals
b) over exciting
c) under excitation
d) running as reluctance motor

12) Synchronous motor always runs at _____

a) speed which is less than synchronous speed
b) speed which is greater than synchronous speed
c) synchronous speed
d) none of the above

13) The voltage equation of synchronous motor is?

a) $\mathrm{Ef} = \mathrm{Vt} + \mathrm{Ia} * (\mathrm{ra} + \mathrm{jXa})$ b) $\mathrm{Ef} = \mathrm{Vt} - \mathrm{Ia} * (\mathrm{ra} + \mathrm{jXa})$
c) $\mathrm{Ef} = \mathrm{Vt} + \mathrm{Ia} * (\mathrm{ra} - \mathrm{jXa})$ d) $\mathrm{Ef} = \mathrm{Vt} - \mathrm{Ia} * (\mathrm{ra} - \mathrm{jXa})$

14) Mostly, synchronous motors are of _____

a) alternator type machines b) induction type machines
c) salient pole type machines d) smooth cylindrical type machines

S.Y. (B.Tech.) (Sem - II) (New/Old) (CBCS) Examination: March/April-2025
ELECTRICAL ENGINEERING
Electrical Machines - II (BTN07402)

Day & Date: Monday 26-05-2025 Max. Marks: 56
Time: 10:00 AM To 01:00 PM

Instructions: 1) All questions are compulsory.
2) Figures to the right indicate full marks.
3) Make suitable assumptions if necessary and state them clearly.
4) Draw neat diagrams whenever necessary.

Section – I

Q.2 Attempt any four of the following **16**

a) Explain Crawling and Cogging effects in 3 phase IM.

b) Explain how rotating magnetic field is created when 3-Ph supply voltage is given to the stator winding. Give the important assumptions in this case.

c) A three-phase, 50 Hz induction motor with its rotor star connected gives 500 V (r.m.s.) at standstill between the slip rings on open circuit. Calculate the current and power factor at standstill when the rotor winding is joined to a star connected external circuit, each phase of which has a resistance of 10 Ω and an inductance of 0.04 H. The resistance per phase of the rotor winding is 0.2 Ω and an inductance of 0.04 H. Also calculate the current and power factor when slip rings are short circuited and the motor is running with a slip of 5 per cent. Assume flux remains constant.

d) What is the necessity of starter? Explain with diagram, working and features of star delta starter for a 3 Ph induction motor.

e) Draw and explain equivalent circuit of 3 Ph IM.

f) The rotor resistance/phase of a 4 pole, 50 Hz, Induction motor are 0.024 Ω and 0.12 Ω respectively. Find the speed at maximum torque. Also find the value of additional rotor resistance per phase to be added to develop 80% of maximum torque starting.

Q.3 Attempt any two of the following **12**

a) With a neat sketch explain: i) DOL starter ii) Auto transformer starter

b) Draw and explain procedure to construct a circle diagram for IM.

c) The power input to the rotor of a 440 V, 50 Hz, 6 pole 3- induction motor is 80 kW. The rotor electromotive force is observed to make 100 cycles per minute, calculate:
(i) the slip
(ii) the rotor speed
(iii) mechanical power developed
(iv) the rotor cu loss per phase

Section – II

Q.4 Solve any four. **16**

a) Explain with circuit diagram and vector diagram capacitor start single phase induction motor.

b) Explain in detail the cross field theory related to single phase induction motor.

c) Derive EMF equation of alternator with short pitched coils and distributed windings.

d) Explain the role of damper winding in synchronous machine.

e) Derive an expression for the power developed in synchronous motor.

f) Explain constructional details of alternator.

Q.5 Solve the following. **12**

a) What is armature reaction? Explain the effect of armature reaction on terminal voltage of an alternator at i) unity power factor ii) lagging power factor.

b) Explain in detail the determination of synchronous reactance of an alternator.

c) Explain the operation of synchronous motor with constant load and following type of excitation with phasor diagram.

i) Under excitation

ii) Over excitation

a) $\mathrm{Ef} = \mathrm{Vt} + \mathrm{Ia} * (\mathrm{ra} + \mathrm{jXa})$
b) $\mathrm{Ef} = \mathrm{Vt} - \mathrm{Ia} * (\mathrm{ra} + \mathrm{jXa})$
c) $\mathrm{Ef} = \mathrm{Vt} + \mathrm{Ia} * (\mathrm{ra} - \mathrm{jXa})$
d) $\mathrm{Ef} = \mathrm{Vt} - \mathrm{Ia} * (\mathrm{ra} - \mathrm{jXa})$

9) Mostly, synchronous motors are of _____
a) alternator type machines
b) induction type machines
c) salient pole type machines
d) smooth cylindrical type machines

10) If the phase sequence of supply currents is reversed, then the direction of rotation of the resultant Magnetic Field will _____
a) Be reversed
b) Remains unchanged
c) Cannot be determined
d) None of the mentioned

11) Slip ring induction motor has ____
a) Low starting torque
b) Medium starting torque
c) High starting torque
d) None of these

12) The maximum torque in an IM depends on ____
a) Frequency
b) rotor inductive reactance
c) square of supply voltage
d) all the above

13) The auto-starters (using three auto transformers) can be used to start cage induction motor of the following type ____
a) star connected only
b) delta connected only
c) (a) and (b) both
d) none of the above

14) For which motor the speed can be controlled from rotor side?
a) Squirrel-cage induction motor
b) Slip-ring induction motor
c) Both (a) and (b)
d) None of the above

Set **S**

S.Y. (B.Tech.) (Sem - II) (New/Old) (CBCS) Examination: March/April-2025
ELECTRICAL ENGINEERING
Electrical Machines - II (BTN07402)

Day & Date: Monday 26-05-2025 Max. Marks: 56
Time: 10:00 AM To 01:00 PM

Instructions: 1) All questions are compulsory.
2) Figures to the right indicate full marks.
3) Make suitable assumptions if necessary and state them clearly.
4) Draw neat diagrams whenever necessary.

Section – I

Q.2 Attempt any four of the following **16**

a) Explain Crawling and Cogging effects in 3 phase IM.

b) Explain how rotating magnetic field is created when 3-Ph supply voltage is given to the stator winding. Give the important assumptions in this case.

c) A three-phase, 50 Hz induction motor with its rotor star connected gives 500 V (r.m.s.) at standstill between the slip rings on open circuit. Calculate the current and power factor at standstill when the rotor winding is joined to a star connected external circuit, each phase of which has a resistance of 10 Ω and an inductance of 0.04 H. The resistance per phase of the rotor winding is 0.2 Ω and an inductance of 0.04 H. Also calculate the current and power factor when slip rings are short circuited and the motor is running with a slip of 5 per cent. Assume flux remains constant.

d) What is the necessity of starter? Explain with diagram, working and features of star delta starter for a 3 Ph induction motor.

e) Draw and explain equivalent circuit of 3 Ph IM.

f) The rotor resistance/phase of a 4 pole, 50 Hz, Induction motor are 0.024 Ω and 0.12 Ω respectively. Find the speed at maximum torque. Also find the value of additional rotor resistance per phase to be added to develop 80% of maximum torque starting.

Q.3 Attempt any two of the following **12**

a) With a neat sketch explain: i) DOL starter ii) Auto transformer starter

b) Draw and explain procedure to construct a circle diagram for IM.

c) The power input to the rotor of a 440 V, 50 Hz, 6 pole 3- induction motor is 80 kW. The rotor electromotive force is observed to make 100 cycles per minute, calculate:
(i) the slip
(ii) the rotor speed
(iii) mechanical power developed
(iv) the rotor cu loss per phase

Section – II

Q.4 Solve any four. **16**

a) Explain with circuit diagram and vector diagram capacitor start single phase induction motor.

b) Explain in detail the cross field theory related to single phase induction motor.

c) Derive EMF equation of alternator with short pitched coils and distributed windings.

d) Explain the role of damper winding in synchronous machine.

e) Derive an expression for the power developed in synchronous motor.

f) Explain constructional details of alternator.

Q.5 Solve the following. **12**

a) What is armature reaction? Explain the effect of armature reaction on terminal voltage of an alternator at i) unity power factor ii) lagging power factor.

b) Explain in detail the determination of synchronous reactance of an alternator.

c) Explain the operation of synchronous motor with constant load and following type of excitation with phasor diagram.

i) Under excitation

ii) Over excitation

Power System II (BTN07403)

Day & Date: Wednesday 28-05-2025 Max. Marks: 70
Time: 10:00 AM To 01:00 PM

Instructions: 1) Q. No. 1 is compulsory. It should be solved in the first 30 minutes in Answer Book Page no 03 (Starting page of the Answer Book). Each question carries one mark.
2) Don't forget to Mention question paper set (P/Q/R/S) on top of page.
3) Figures to the right indicates full marks.

MCQ/Objective Type Questions

Duration: 30 Minutes Marks:14

Q.1 Choose the correct alternative from the given option and rewrite the sentence. **14**

1) In triangular configuration, inductance and capacitance values are _____ and _____ respectively.
a) less, less b) higher, higher
c) less, higher d) higher, less

2) What is the purpose of bedding on the underground cables?
a) To avoid leakage of current.
b) To protect the sheath against corrosion.
c) To protect the sheath from mechanical injury due to armoring.
d) Both (b) and (c)

3) The cable best suited for the transmission of voltages from 33 kV to 66 kV is _____.
a) Belted cables b) Screened cables
c) Pressure cables d) None of these

4) What does capacitance grade of cables mean?
a) Use of dielectrics in different concentrations.
b) Introduction of capacitance at various lengths of cable to counter the effect of inductance.
c) Use of dielectrics of different permittivity's
d) Grading according to capacitance per km length of the cable.

5) In long transmission lines Resistance and Capacitance parameters of lines are connected in _____.
a) Series, shunt b) Series, series
c) Shunt, shunt d) Shunt, parallel

6) In nominal -π method of solution of medium transmission line, capacitance is assumed to be: _____.

a) Distributed uniformly from sending end to receiving end
b) Divided into two halves
c) Lumped at the generation end
d) Lumped at middle of generation and load end

7) Which of the following distribution system is more reliable?

a) Radial system b) Tree system
c) Ring main system d) All are equally reliable

8) The sag of a transmission line depends upon _____.

a) Weight of conductor and directly proportional to span length
b) Weight of conductor and inversely proportional to span length
c) Weight of conductor and directly proportional to the square of span length
d) Weight of conductor and inversely proportional to the square of span length

9) The maximum tension in a section of overhead line conductor between two supports of unequal height occurs at _____.

a) The higher support b) The lower point
c) The midpoint of the conductor d) None of the above

10) Corona is accompanied by _____.

a) violet visible light b) hissing sound
c) power loss and interference d) all of the above

11) Transmission line constants are _____.

a) Capacitance b) Inductance
c) Resistance d) All of these

12) The inductance of line is minimum when _____.

a) G M D is high
b) G M R is high
c) Both G M D and G M R are high
d) G M D is low but G M R is high

13) When two conductors between each of radius 'r' are at a distance D, the capacitance between the two is proportional to _____.

a) loge(D/r) b) loge (r/ D)
c) 1/loge(D/r) d) 1/loge (r/D)

14) Find the inductance per km of a 3-phase transmission line using 1.24 cm diameter conductors when these are placed at the corners of an equilateral triangle of each side 2 m.

a) 3.2 mH/Km b) 2.1 mH/Km
c) 1.205 mH/Km d) 2.3 mH/Km

Section – I

Q.2 Attempt the following Questions. (Any Four) **16**

a) Define corona discharge: enlist the methods of reducing the corona effect.

b) Calculate the loop inductance per km of a single-phase overhead line consisting of two conductors each 1 cm diameter and 1.2 m apart.

c) What is meant by sag? Derive an expression for sag in a transmission line having equal level of supports.

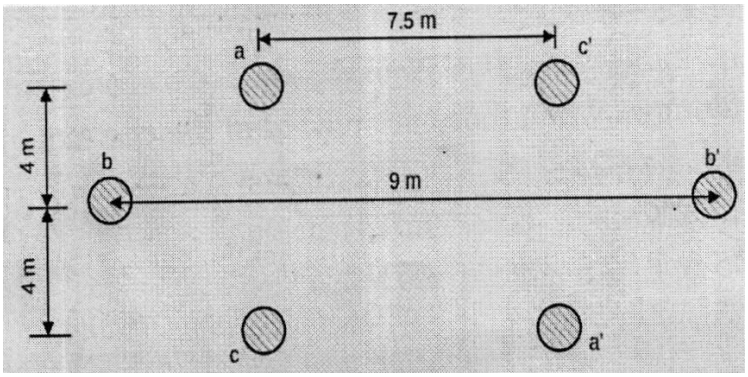
d) Explain the following methods of cable grading:
i) Capacitance grading
ii) Inters heath grading

e) Find the line to line capacitance per km of a three phase transmission line using 1.24 cm diameter conductor when these are placed at the corners of an equilateral triangle of each side 2m.

Q.3 Attempt the following Questions. (Any Two) **12**

a) Derive the expression for inductance of 3-ph single circuit overhead triangular configuration of transmission line for symmetrical spacing.

b) The double circuit three-phase line has the configuration shown in figure the distance between conductor a and c' is 7.5 between b and b' is 9 m and between a and c is 8 m. Find inductance per kilometer per phase. The radius of each conductor is 1.25 cm.



c) Derive the expression for Insulation resistance of a cable.

Section – II

Q.4 Attempt the following Questions. (Any Four) **16**

a) Describe with diagram.
- i) Radial system
- ii) Ring main system

b) Derive an expression for voltage regulation and efficiency of short transmission line.

c) Explain in detail effect of Power Factor on Voltage regulation, Losses, efficiency in case of transmission line.

d) Define and explain terms: feeders, distributor and service mains with neat schematic diagram.

e) Explain various types of equipment in substation with neat symbol.

Q.5 Attempt the following Questions. (Any Two) **12**

a) What is mean by Neutral grounding and Explain with neat circuit diagram various methods of Neutral grounding.
- i) Resistance grounding
- ii) Reactance grounding
- iii) Solid grounding

b) With neat diagram derive the expression for A, B, C, D constants of medium transmission line using nominal T method.

c) A single-phase overhead transmission line delivers 1100 kW at 33KV at 0.8p. f lagging. The total resistance and inductive reactance of the line are 10 Ω and15 Ω respectively.
Determine:
- i) Sending end voltage
- ii) Sending end power factor
- iii) Transmission Efficiency

- ii) Ring main system

b) Derive an expression for voltage regulation and efficiency of short transmission line.

c) Explain in detail effect of Power Factor on Voltage regulation, Losses, efficiency in case of transmission line.

d) Define and explain terms: feeders, distributor and service mains with neat schematic diagram.

e) Explain various types of equipment in substation with neat symbol.

Q.5 Attempt the following Questions. (Any Two) **12**

a) What is mean by Neutral grounding and Explain with neat circuit diagram various methods of Neutral grounding.
- i) Resistance grounding
- ii) Reactance grounding
- iii) Solid grounding

b) With neat diagram derive the expression for A, B, C, D constants of medium transmission line using nominal T method.

c) A single-phase overhead transmission line delivers 1100 kW at 33KV at 0.8p. f lagging. The total resistance and inductive reactance of the line are 10 Ω and15 Ω respectively.
Determine:
- i) Sending end voltage
- ii) Sending end power factor
- iii) Transmission Efficiency

Day & Date: Friday, 30-05-2025 Max. Marks: 70
Time: 10:00 AM To 01:00 PM

Instructions: 1) Q. No. 1 is compulsory. It should be solved in the first 30 minutes in Answer Book Page no 03 (Starting page of the Answer Book). Each question carries one mark.
2) Don't forget to Mention question paper set (P/Q/R/S) on top of page.
3) Figures to the right indicates full marks.
4) Make suitable assumptions if necessary and state them clearly.

MCQ/Objective Type Questions

Duration: 30 Minutes Marks:14

Q.1 Choose the correct Answer. 14

1) When a differential amplifier is operated single-ended, _____.
a) the output is grounded
b) one input is grounded and signal is applied to the other
c) both inputs are connected together
d) the output is not inverted

2) For an Op-amp with negative feedback, the output is _____.
a) equal to the input
b) increased
c) fed back to the inverting input
d) fed back to the non-inverting input

3) A voltage follower _____.
a) has a voltage gain of 1 b) is non-inverting
c) has no feedback resistor d) has all of these

4) The Op-amp can amplify _____.
a) a.c. signals only b) d.c. signals only
c) both a.c. and d.c. signals d) neither d.c. nor a.c. signals

5) The input stage of an Op-amp is usually a _____.
a) differential amplifier b) class B push-pull amplifier
c) CE amplifier d) swamped amplifier

6) _____ is defined ratio of change in output voltage to change in time.
a) Slew rate b) CMRR
c) Unity Gain Frequency d) SVRR

7) Input resistance of op-amp is _____.
a) very high b) very low
c) zero d) one

8) _____ can also be called as data distributor.
a) Multiplexer b) Demultiplexer
c) Adder d) Subtractor

9) Universal Shift Register _____.
a) Accepts serial input
b) Accepts parallel input
c) Gives serial and parallel output
d) Is capable of all the above

10) In K-map, 8-square eliminates _____ variables.
a) 2 b) 3
c) 4 d) 5

11) Twisted ring counter is _____ register.
a) Serial In Serial Out b) Serial In Parallel Out
c) Parallel In Serial Out d) Parallel In Parallel Out

12) Each term in the standard SOP form is called a _____.
a) Minterm b) Maxterm
c) Don't care d) Literal

13) Toggle state for JK flip flop is when _____.
a) J=0, K=0 b) J=0, K=1
c) J=1, K=1 d) J=1, K=0

14) In sequential circuits the present input depends on _____.
a) past inputs only
b) present inputs only
c) present as well as past inputs
d) past outputs

Instructions: 1) All questions are compulsory.
2) Figures to the right indicate full marks.
3) Make suitable assumptions if necessary and state them clearly.

Section – I

Q.2 Solve any Four: **16**

a) Explain DC Analysis of differential amplifier (DIBO).
b) With neat circuit diagram explain working of adder circuit.
c) Draw and explain block diagram representation of closed loop configurations of op-amp.
1) voltage-series feedback
2) voltage-shunt feedback
3) current-series feedback
4) current-shunt feedback
d) Explain voltage to current converter with grounded load.
e) Draw and explain ideal voltage transfer curve.

Q.3 Solve any Two: **12**

a) Draw and explain the block diagram of operational amplifier.
b) Explain the working of instrumentation amplifier.
c) Derive an expression for closed loop voltage gain and input resistance with feedback for voltage series feedback op-amp.

Section – II

Q.4 Solve any Four: **16**

a) Explain in detail ring counter.
b) With truth table explain operation of D flip flop.
c) Simplify the following function using K-map
F(A, B, C) = (1, 3, 5, 7)
d) Explain 4:1 Mux with truth table.
e) Explain Parallel in Serial Out (PISO) shift register.

Q.5 Solve any Two: **12**

a) Define flip flop. Explain the operation of Master Slave JK flip flop.
b) Obtain the real minimal expression for $f = \sum m\,(1, 2, 4, 6, 7)$ and implement it in universal gates.
c) Explain universal shift registers.

MCQ/Objective Type Questions

Duration: 30 Minutes Marks:14

Q.1 Choose the correct Answer. **14**

1) A practical current source consists of _____.
a) An ideal current source in series with a resistance
b) An ideal current source in parallel with a resistance
c) Both are correct
d) None of the above

2) Four equal value resistors are connected in parallel. 5 V voltage is applied across the parallel circuit and 2.5 A current are measured from the source. What is the value of each resistor?
a) 4Ω b) 8Ω
c) 2.5Ω d) 5Ω

3) Between two open circuited terminals the current is_____
a) Minimum b) Maximum
c) Zero d) None of the above

4) In Nortons theorem, to find ZN _____.
a) All independent current sources are short circuited and independent voltage sources are open circuited
b) All independent voltage and current sources are open circuited
c) All independent voltage and current sources are short circuited
d) All independent voltage sources are short circuited and independent current sources are open circuited

5) Superposition theorem is not applicable to network containing _____.
a) Nonlinear elements b) Dependent voltage source
c) Dependent current source d) Transformers

6) In an electrical circuit dual of inductance is _____.
a) conductance b) resistance
c) capacitance d) susceptance

7) Rank of Cut- set matrix is _____.
a) N b) N – 1
c) B – N + 1 d) B – N – 1

8) An RC circuit has R = 2 ohm and C = 4F. The time constant is _____.
a) 0.5 s b) 2 s
c) 8 s d) 1.5 s

9) In RLC circuit, if $\alpha < \omega 0$ then thee current gives _____.
a) over damped b) under damped
c) critically damped d) undamped

10) The value of unity impulse function at time (t) = 0 is _____.
a) 0 b) 1
c) Infinite d) Indeterminate

11) The Inductor doesn't allow sudden changes in _____.
a) Voltage b) Current
c) Resistance d) Inductance

12) In an electrical circuit's transient are due to _____.
a) inductor b) capacitor
c) inductor and capacitor d) none of the above

13) What does the connectivity of energy source at the port of network known as?
a) Driving Point b) Transfer Point
c) Both a and b d) None of the above

14) Which of the following ABCD parameters is unit less?
a) A and D b) A and B
c) B and C d) A and C

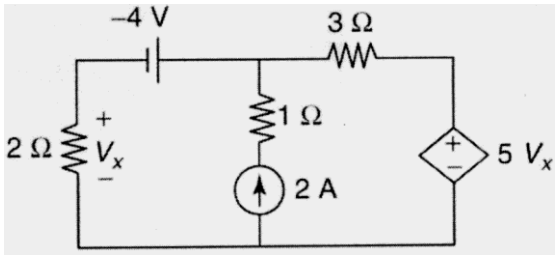
2) Figures to the right indicate full marks.

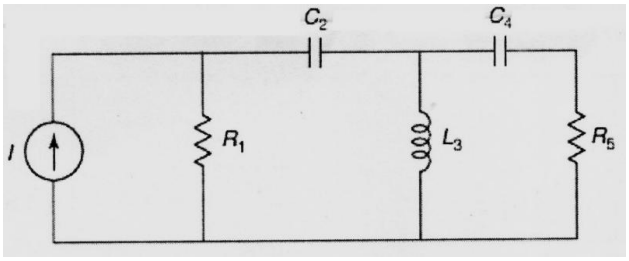
Section – I

Q.2 Attempt any Four **16**

a) Find the current through 3Ω resistor.

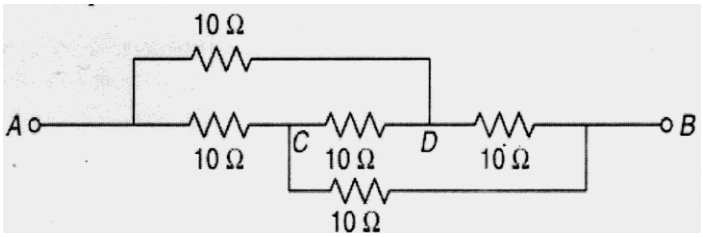


b) Draw the dual of the network.

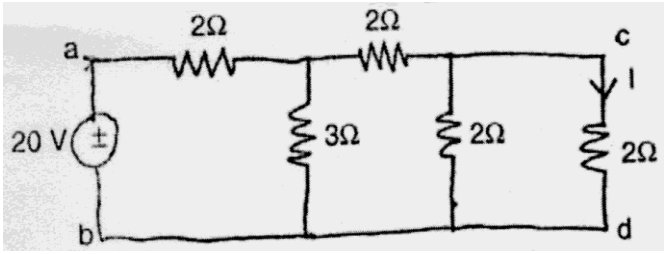


c) State and explain Maximum Power transfer Theorem. Also, Derive the Condition for maximum power transfer.

d) Find the Equivalent Resistance between terminal A&B.

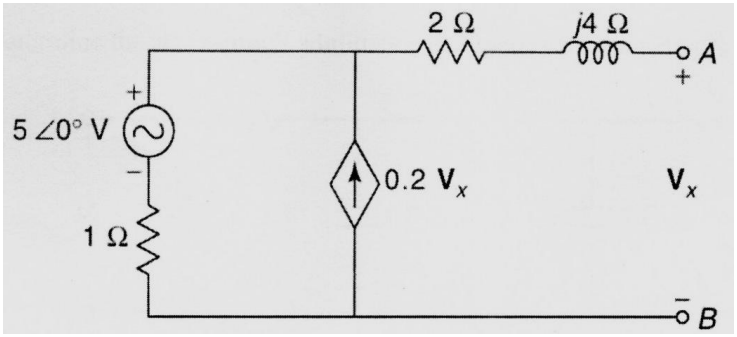


e) Verify the Reciprocity theorem for the network shown below Find the Thevenin's equivalent network for the terminals A and B.

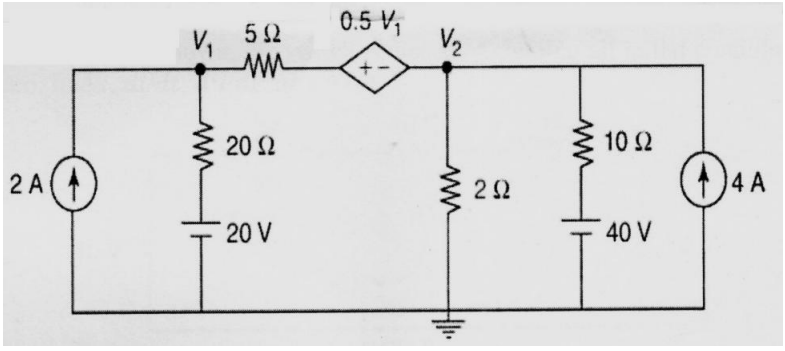


Q.3 Attempt any two. **12**

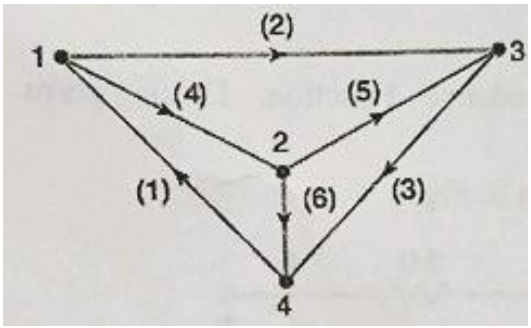
a) Find Thevenin's equivalent network across terminals A and B.



b) For the network shown below find voltages V_1 and V_2.



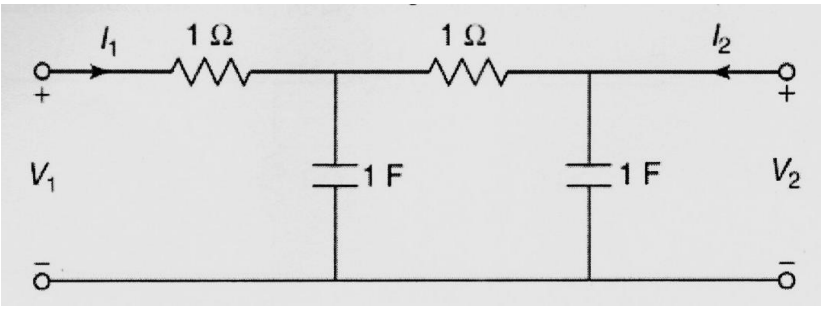
c) The graph of a network shown in fig. write a) Incidence matrix b) Tie set matrix c) Cut set matrix.



Section – II

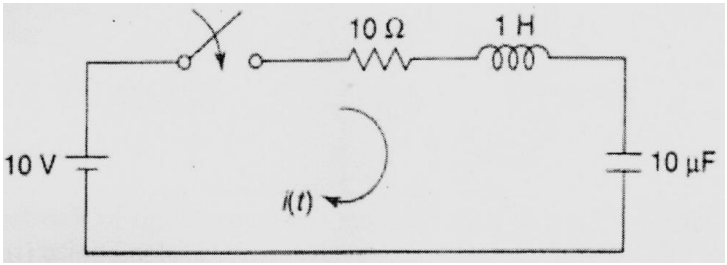
Q.4 Attempt any Four. **16**

a) Determine the short-circuit admittance parameters for the network shown.



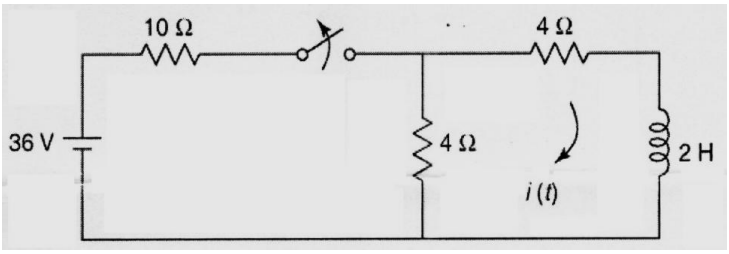
b) Derive an expression for response given by RC circuit.

c) In the network shown, the switch is closed. Assuming all initial conditions as zero, find $i, di/dt, d^2i/dt^2$ at $t = 0+$.



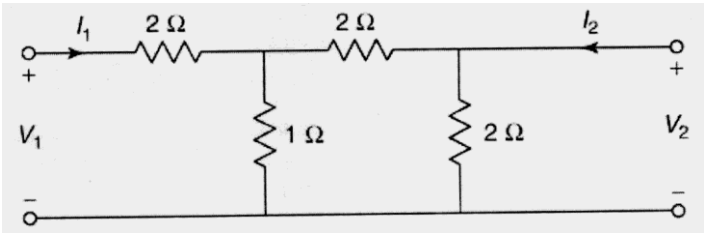
d) Derive Z- Parameter in terms of ABCD Parameter.

e) The network shown in Fig. has acquired steady-state with the switch closed for t < 0. At t = 0, the switch is opened. Obtain i (t) for t > 0. using Laplace transforms.

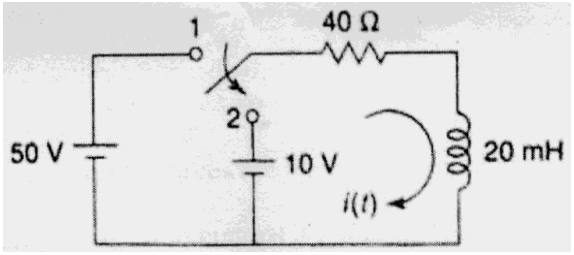


Q.5 Attempt any two. **12**

a) Two identical sections of the network shown are connected in cascade. Obtain the transmission parameters of the overall connection.



b) In the network of fig, is under steady state with switch is at position 1, at switch is moved to position 2. Find i (t).



c) In the network of fig. the switch is moved from a to b at t = 0. Determine i(t) and Vc (t) using Laplace transform.

   a) All independent current sources are short circuited and independent voltage sources are open circuited
   b) All independent voltage and current sources are open circuited
   c) All independent voltage and current sources are short circuited
   d) All independent voltage sources are short circuited and independent current sources are open circuited

12) Superposition theorem is not applicable to network containing _____.
   a) Nonlinear elements b) Dependent voltage source
   c) Dependent current source d) Transformers

13) In an electrical circuit dual of inductance is _____.
   a) conductance b) resistance
   c) capacitance d) susceptance

14) Rank of Cut- set matrix is _____.
   a) N b) N – 1
   c) B – N + 1 d) B – N – 1

Set **Q**

S. Y. (B. Tech.) (Sem-II) (New/Old) (CBCS) Examination: March/April-2025
ELECTRICAL ENGINEERING
Network Analysis (BTN07405)

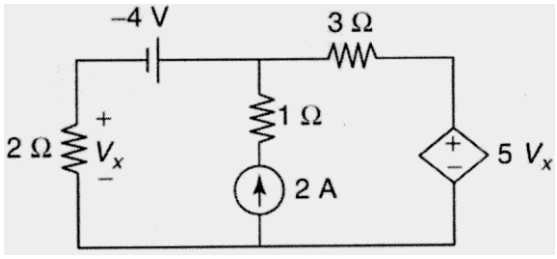
Day & Date: Tuesday, 03-June-2025 Max. Marks: 56
Time: 10:00 AM To 01:00 PM

Instructions: 1) All questions are compulsory.
2) Figures to the right indicate full marks.

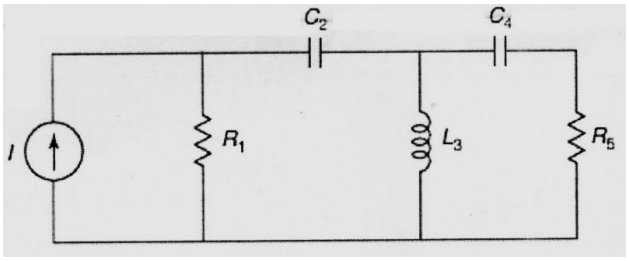
Section – I

Q.2 Attempt any Four **16**

a) Find the current through 3Ω resistor.

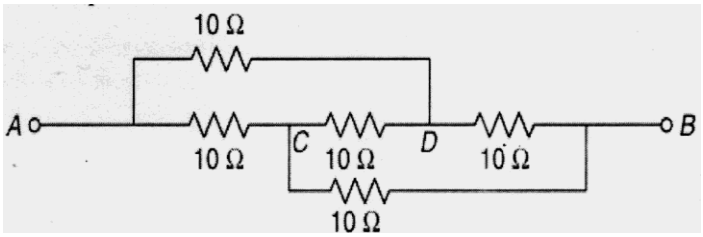


b) Draw the dual of the network.

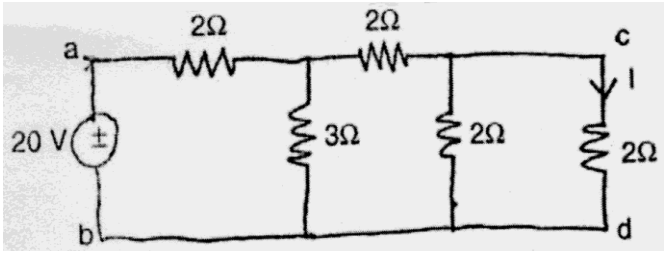


c) State and explain Maximum Power transfer Theorem. Also, Derive the Condition for maximum power transfer.

d) Find the Equivalent Resistance between terminal A&B.

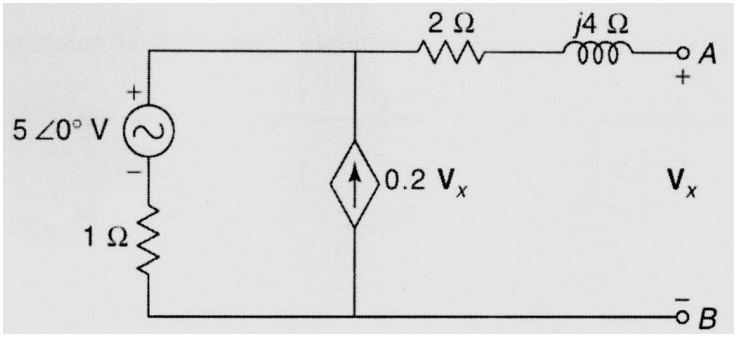


e) Verify the Reciprocity theorem for the network shown below Find the Thevenin's equivalent network for the terminals A and B.

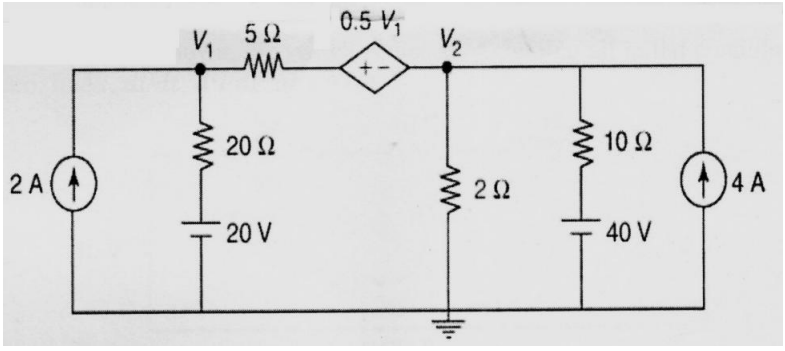


Q.3 Attempt any two. **12**

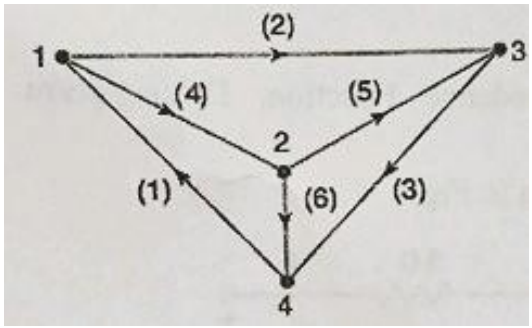
a) Find Thevenin's equivalent network across terminals A and B.



b) For the network shown below find voltages V_1 and V_2.



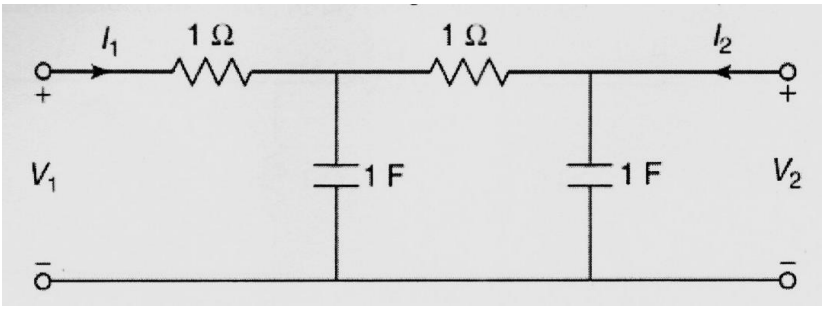
c) The graph of a network shown in fig. write a) Incidence matrix b) Tie set matrix c) Cut set matrix.



Section – II

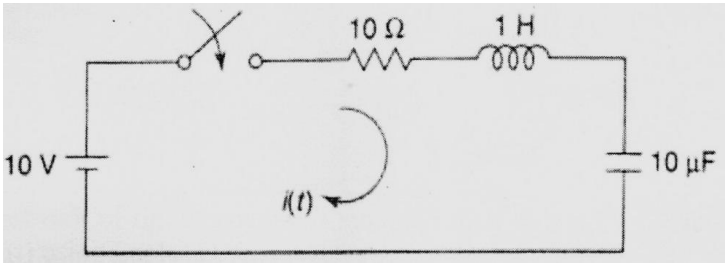
Q.4 Attempt any Four. **16**

a) Determine the short-circuit admittance parameters for the network shown.



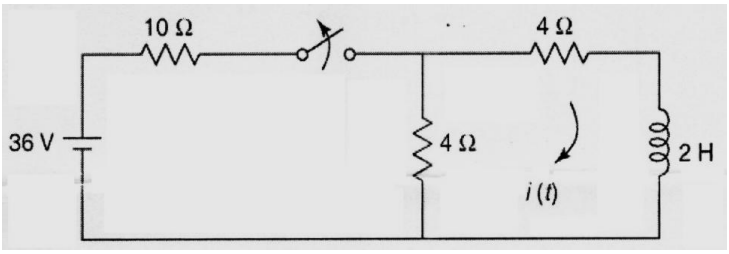
b) Derive an expression for response given by RC circuit.

c) In the network shown, the switch is closed. Assuming all initial conditions as zero, find $i, di/dt, d^2i/dt^2$ at $t = 0+$.



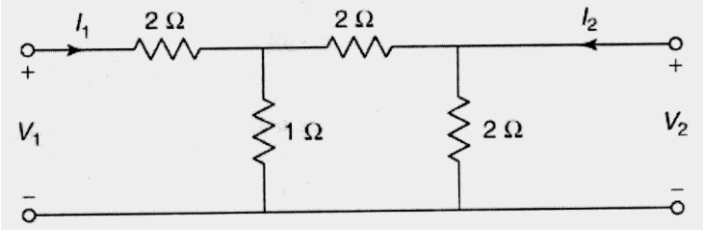
d) Derive Z- Parameter in terms of ABCD Parameter.

e) The network shown in Fig. has acquired steady-state with the switch closed for t < 0. At t = 0, the switch is opened. Obtain i (t) for t > 0. using Laplace transforms.

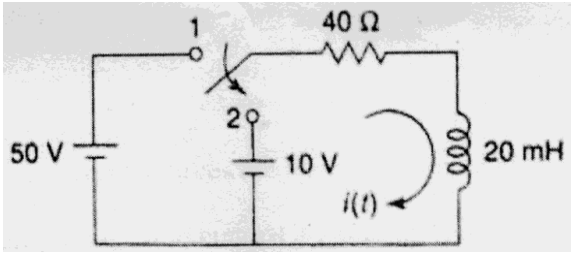


Q.5 Attempt any two. **12**

a) Two identical sections of the network shown are connected in cascade. Obtain the transmission parameters of the overall connection.



b) In the network of fig, is under steady state with switch is at position 1, at switch is moved to position 2. Find i (t).



c) In the network of fig. the switch is moved from a to b at t = 0. Determine i(t) and Vc (t) using Laplace transform.

Network Analysis (BTN07405)

Day & Date: Tuesday, 03-June-2025 Max. Marks: 70
Time: 10:00 AM To 01:00 PM

Instructions: 1) Q. No. 1 is compulsory. It should be solved in the first 30 minutes in Answer Book Page no 03 (Starting page of the Answer Book). Each question carries one mark.
2) Don't forget to Mention question paper set (P/Q/R/S) on top of page.
3) Figures to the right indicates full marks.

MCQ/Objective Type Questions

Duration: 30 Minutes Marks:14

Q.1 Choose the correct Answer. **14**

1) The Inductor doesn't allow sudden changes in _____.
a) Voltage b) Current
c) Resistance d) Inductance

2) In an electrical circuit's transient are due to _____.
a) inductor b) capacitor
c) inductor and capacitor d) none of the above

3) What does the connectivity of energy source at the port of network known as?
a) Driving Point b) Transfer Point
c) Both a and b d) None of the above

4) Which of the following ABCD parameters is unit less?
a) A and D b) A and B
c) B and C d) A and C

5) A practical current source consists of _____.
a) An ideal current source in series with a resistance
b) An ideal current source in parallel with a resistance
c) Both are correct
d) None of the above

6) Four equal value resistors are connected in parallel. 5 V voltage is applied across the parallel circuit and 2.5 A current are measured from the source. What is the value of each resistor?
a) 4Ω b) 8Ω
c) 2.5Ω d) 5Ω

7) Between two open circuited terminals the current is_____
a) Minimum b) Maximum
c) Zero d) None of the above

8) In Nortons theorem, to find ZN _____.
- a) All independent current sources are short circuited and independent voltage sources are open circuited
- b) All independent voltage and current sources are open circuited
- c) All independent voltage and current sources are short circuited
- d) All independent voltage sources are short circuited and independent current sources are open circuited

9) Superposition theorem is not applicable to network containing _____.
- a) Nonlinear elements
- b) Dependent voltage source
- c) Dependent current source
- d) Transformers

10) In an electrical circuit dual of inductance is _____.
- a) conductance
- b) resistance
- c) capacitance
- d) susceptance

11) Rank of Cut- set matrix is _____.
- a) N
- b) N – 1
- c) B – N + 1
- d) B – N – 1

12) An RC circuit has R = 2 ohm and C = 4F. The time constant is _____.
- a) 0.5 s
- b) 2 s
- c) 8 s
- d) 1.5 s

13) In RLC circuit, if $\alpha < \omega 0$ then thee current gives _____.
- a) over damped
- b) under damped
- c) critically damped
- d) undamped

14) The value of unity impulse function at time (t) = 0 is _____.
- a) 0
- b) 1
- c) Infinite
- d) Indeterminate

MCQ/Objective Type Questions

Duration: 30 Minutes Marks:14

Q.1 Choose the correct option. **14**

1) In solving simultaneous linear equation which of the following method is iterative?
a) Factorisation b) Jacobi
c) Gauss-Seidel d) Both b and c

2) Error in the Trapezoidal rule is of the order _____.
a) h^2 b) h^3
c) h^4 d) h^5

3) If $\frac{dy}{dx} = x^2 + y^2$ and $y(0) = 1$ then Picard's first approximation is ____.
a) $1 + x$ b) $x + \frac{x^3}{3}$
c) $1 + x - \frac{x^3}{3}$ d) $1 + x + \frac{x^3}{3}$

4) Romberg method is used to solve _____.
a) Ordinary differential equations
b) Integration
c) Partial differential equations
d) All of these

5) The quantity K obtained by Runge-Kutta method of fourth order for differential equation $\frac{dy}{dx} = x^2 + y^2$ and $y(0) = 1$ when $h = 0.1$ is _____.
a) 0.1 b) 0
c) 1 d) 0.01

6) LU decomposition of matrix is possible only for _____.

a) Invertible matrix b) Singular matrix
c) Square matrix d) Ordered matrix

7) The order of convergence of Newton-Raphson method is _____.

a) 3 b) 2
c) 1 d) 0

8) If all eigen values are negative then the quadratic form $X'AX$ is _____.

a) Positive definite b) Negative definite
c) Indefinite d) none

9) $||v|| = \sqrt{v.v}$

a) True b) False

10) If $u = \begin{bmatrix}7\\1\end{bmatrix}, v = \begin{bmatrix}3\\2\end{bmatrix}$ then $||u - v||$

a) $\sqrt{7}$ b) $\sqrt{17}$
c) $\sqrt{71}$ d) $\sqrt{7}0$

11) -2 is the eigen values of A where $A = \begin{bmatrix}2 & 4 & 3\\-4 & -6 & -3\\3 & 3 & 1\end{bmatrix}$

a) True b) False

12) Let A be an $n \times n$ invertible matrix then which of the following is not true _____.

a) The columns of A forms a basis of R^n
b) The rows of A forms a basis of R^n
c) Rank $A = n$
d) $\text{Nul}A \neq \{0\}$

13) If a system of equations has no free variables then it has _____.

a) Unique solution b) No solution
c) Infinite solution d) none

14) Power method is used to find _____.

a) Smallest eigen values b) Zero Eigen values
c) Largest eigen values d) None

Section – I

Q.2 Solve any three from the following. **09**

a) Evaluate $I = \int_0^1 \frac{1}{1+x}\, dx$ correct to three decimal places by Trapezoidal rule taking $h = 0.25$.

b) Find a real root of the equation $x \sin x + \cos x = 0$ by Newton Raphson method (Take $x_0 = \pi$).

c) Find a double root of the equation $f(x) = x^3 - x^2 - x + 1 = 0$ choosing $x_0 = 0.8$

d) Evaluate $I = \int_0^1 \frac{x^2}{1+x^3}\, dx$ using Simpson's $\frac{3}{8}$ th rule.

e) Apply Runge-Kutta method of fourth order to find an approximate value of y when $x = 0.1$ given that $\frac{dy}{dx} = x + y$ and $y(0) = 1$.

Q.3 Solve any three of the following. **09**

a) Solve the system by Gauss-Elimination method
$x - y + z = 1, -3x + 2y - 3z = -6, 2x - 5y + 4z = 5$

b) Solve by Picard's method $\frac{dy}{dx} = 1 + xy$ and $y(2) = 0$ up to third approximation.

c) Find an iterative formula for $\sqrt{N}$ (where N is an Positive number) and hence find $\sqrt{5}$.

d) Solve by Gauss-Seidel method
$10x - 5y - 2z = 3, 4x - 10y + 3z = -3, x + 6y + 10z = -3$

e) Evaluate $I = \int_0^1 \frac{1}{1+x}\, dx$ by Gaussian quadrature three-point formula.

Q.4 Solve any two of the following. **10**

a) Apply factorisation method to solve the equations
$x + 5y + z = 14, 2x + y + 3z = 13, 3x + y + 4z = 17$

b) Evaluate $I = \int_0^2 \frac{1}{1+x^2}\, dx$ using Romberg method, hence obtain an approximate value of π.

c) Solve the differential equation $\frac{dy}{dx} = 1 + xz, \frac{dz}{dx} = -xy$ for $x = 0.3$ Using fourth order Runge-Kutta method and initial values are $x = 0$, $y = 0, z = 1$ up to second approximation.

Section – II

Q.5 Solve any three of the following. **09**

a) Determine the rank of matrix A

$$A = \begin{bmatrix} 2 & -3 & 6 & 2 & 5 \\ -2 & 3 & -3 & -3 & -4 \\ 4 & -6 & 9 & 5 & 9 \\ -2 & 3 & 3 & -4 & 1 \end{bmatrix}$$

b) Find the bases for the row space of the matrix A

$$A \begin{bmatrix} -2 & -5 & 8 & 0 & -17 \\ 1 & 3 & -5 & 1 & 5 \\ 3 & 11 & -19 & 7 & 1 \\ 1 & 7 & -13 & 5 & -3 \end{bmatrix}$$

c) Compute quadratic form $X'AX$ for $A = \begin{bmatrix} 3 & 2 & 0 \\ 2 & 2 & 2 \\ 0 & 2 & 1 \end{bmatrix}$ and $X = \begin{bmatrix} x \\ y \\ z \end{bmatrix}$

Also find eigen values of quadratic form $X'AX$

d) Determine whether the vectors are dependent or independent

$$v_1 = \begin{bmatrix} 3 \\ 0 \\ -6 \end{bmatrix} \quad v_2 = \begin{bmatrix} -4 \\ 1 \\ 7 \end{bmatrix} \quad v_3 = \begin{bmatrix} -2 \\ 1 \\ 5 \end{bmatrix}$$

e) Assume that T is linear transformation. Find standard matrix of $T: R^3 \to R^2$ defined by $T(e_1) = (1,3)\ T(e_2) = (4,-7) T(e_3) = (-5,4)$

Q.6 Solve any three of the following. **09**

a) Determine whether the vectors are orthogonal if orthogonal Normalize the vector to produce the orthonormal set

$$u = \begin{bmatrix} \frac{-2}{3} \\ \frac{1}{3} \\ \frac{2}{3} \end{bmatrix} \quad v = \begin{bmatrix} \frac{1}{3} \\ \frac{2}{3} \\ 0 \end{bmatrix}$$

b) Show that $\{v_1, v_2, v_3\}$ is orthonormal basis for R^3 where

$$v_1 = \begin{bmatrix} \frac{1}{\sqrt{10}} \\ \frac{3}{\sqrt{20}} \\ \frac{3}{\sqrt{20}} \end{bmatrix} \quad v_1 = \begin{bmatrix} \frac{3}{\sqrt{10}} \\ \frac{-1}{\sqrt{20}} \\ \frac{-1}{\sqrt{20}} \end{bmatrix} \quad v_3 = \begin{bmatrix} 0 \\ \frac{-1}{\sqrt{20}} \\ \frac{1}{\sqrt{20}} \end{bmatrix}$$

c) Describe all solutions of $AX = B$ where $A = \begin{bmatrix} 3 & 5 & -4 \\ -3 & -2 & 4 \\ 6 & 1 & -8 \end{bmatrix} b = \begin{bmatrix} 7 \\ -1 \\ 4 \end{bmatrix}$

d) Let $b_1 = \begin{bmatrix}2\\1\end{bmatrix}, b_2 = \begin{bmatrix}-1\\1\end{bmatrix}, X = \begin{bmatrix}4\\5\end{bmatrix}$ & $B = \{b_1, b_2\}$ Find the co-ordinate vector $[X]_B$ of X relative to B

e) Let $A = \begin{bmatrix}2 & 4 & -2 & 1\\-2 & -5 & 7 & 3\\3 & 7 & -8 & 6\end{bmatrix}$ and $u = \begin{bmatrix}3\\-2\\-1\\0\end{bmatrix}$ $v = \begin{bmatrix}3\\-1\\3\end{bmatrix}$

Is u is in $\mathrm{Nu}1A$?

Is v is in $\mathrm{Co}1A$?

Q.7 Solve any two of the following. **10**

a) Find the numerically largest eigen values of A by Power method

$$A = \begin{bmatrix}1 & 6 & 1\\1 & 2 & 0\\0 & 0 & 3\end{bmatrix} x_0 = \begin{bmatrix}1\\0\\0\end{bmatrix}$$

b) If possible, diagonalize the matrix A

$$A = \begin{bmatrix}6 & -2 & -1\\-2 & 6 & -1\\-1 & -1 & 5\end{bmatrix}$$

c) Find the dimension of $\mathrm{Nu}1A$ & $\mathrm{Co}1A$ of matrix A where

$$A = \begin{bmatrix}1 & 2 & -4 & 3 & 3\\5 & 10 & -9 & -7 & 8\\4 & 8 & -9 & -2 & 7\\-2 & -4 & 5 & 0 & 6\end{bmatrix}$$

b) Find a real root of the equation $x \sin x + \cos x = 0$ by Newton Raphson method (Take $x_0 = \pi$).

c) Find a double root of the equation $f(x) = x^3 - x^2 - x + 1 = 0$ choosing $x_0 = 0.8$

d) Evaluate $I = \int_0^1 \frac{x^2}{1+x^3}\, dx$ using Simpson's $\frac{3}{8}$ th rule.

e) Apply Runge-Kutta method of fourth order to find an approximate value of y when $x = 0.1$ given that $\frac{dy}{dx} = x + y$ and $y(0) = 1$.

Q.3 Solve any three of the following. **09**

a) Solve the system by Gauss-Elimination method
$x - y + z = 1, -3x + 2y - 3z = -6, 2x - 5y + 4z = 5$

b) Solve by Picard's method $\frac{dy}{dx} = 1 + xy$ and $y(2) = 0$ up to third approximation.

c) Find an iterative formula for $\sqrt{N}$ (where N is an Positive number) and hence find $\sqrt{5}$.

d) Solve by Gauss-Seidel method
$10x - 5y - 2z = 3, 4x - 10y + 3z = -3, x + 6y + 10z = -3$

e) Evaluate $I = \int_0^1 \frac{1}{1+x}\, dx$ by Gaussian quadrature three-point formula.

Q.4 Solve any two of the following. **10**

a) Apply factorisation method to solve the equations
$x + 5y + z = 14, 2x + y + 3z = 13, 3x + y + 4z = 17$

b) Evaluate $I = \int_0^2 \frac{1}{1+x^2}\, dx$ using Romberg method, hence obtain an approximate value of π.

c) Solve the differential equation $\frac{dy}{dx} = 1 + xz, \frac{dz}{dx} = -xy$ for $x = 0.3$ Using fourth order Runge-Kutta method and initial values are $x = 0$, $y = 0, z = 1$ up to second approximation.

Section – II

Q.5 Solve any three of the following. **09**

a) Determine the rank of matrix A

$$A = \begin{bmatrix} 2 & -3 & 6 & 2 & 5 \\ -2 & 3 & -3 & -3 & -4 \\ 4 & -6 & 9 & 5 & 9 \\ -2 & 3 & 3 & -4 & 1 \end{bmatrix}$$

b) Find the bases for the row space of the matrix A

$$A \begin{bmatrix} -2 & -5 & 8 & 0 & -17 \\ 1 & 3 & -5 & 1 & 5 \\ 3 & 11 & -19 & 7 & 1 \\ 1 & 7 & -13 & 5 & -3 \end{bmatrix}$$

c) Compute quadratic form $X'AX$ for $A = \begin{bmatrix} 3 & 2 & 0 \\ 2 & 2 & 2 \\ 0 & 2 & 1 \end{bmatrix}$ and $X = \begin{bmatrix} x \\ y \\ z \end{bmatrix}$

Also find eigen values of quadratic form $X'AX$

d) Determine whether the vectors are dependent or independent

$$v_1 = \begin{bmatrix} 3 \\ 0 \\ -6 \end{bmatrix} \quad v_2 = \begin{bmatrix} -4 \\ 1 \\ 7 \end{bmatrix} \quad v_3 = \begin{bmatrix} -2 \\ 1 \\ 5 \end{bmatrix}$$

e) Assume that T is linear transformation. Find standard matrix of $T: R^3 \to R^2$ defined by $T(e_1) = (1,3)\ T(e_2) = (4,-7) T(e_3) = (-5,4)$

Q.6 Solve any three of the following. **09**

a) Determine whether the vectors are orthogonal if orthogonal Normalize the vector to produce the orthonormal set

$$u = \begin{bmatrix} \frac{-2}{3} \\ \frac{1}{3} \\ \frac{2}{3} \end{bmatrix} \quad v = \begin{bmatrix} \frac{1}{3} \\ \frac{2}{3} \\ 0 \end{bmatrix}$$

b) Show that $\{v_1, v_2, v_3\}$ is orthonormal basis for R^3 where

$$v_1 = \begin{bmatrix} \frac{1}{\sqrt{10}} \\ \frac{3}{\sqrt{20}} \\ \frac{3}{\sqrt{20}} \end{bmatrix} \quad v_1 = \begin{bmatrix} \frac{3}{\sqrt{10}} \\ \frac{-1}{\sqrt{20}} \\ \frac{-1}{\sqrt{20}} \end{bmatrix} \quad v_3 = \begin{bmatrix} 0 \\ \frac{-1}{\sqrt{20}} \\ \frac{1}{\sqrt{20}} \end{bmatrix}$$

c) Describe all solutions of $AX = B$ where $A = \begin{bmatrix} 3 & 5 & -4 \\ -3 & -2 & 4 \\ 6 & 1 & -8 \end{bmatrix}$ $b = \begin{bmatrix} 7 \\ -1 \\ 4 \end{bmatrix}$

d) Let $b_1 = \begin{bmatrix}2\\1\end{bmatrix}, b_2 = \begin{bmatrix}-1\\1\end{bmatrix}, X = \begin{bmatrix}4\\5\end{bmatrix}$ & $B = \{b_1, b_2\}$ Find the co-ordinate vector $[X]_B$ of X relative to B

e) Let $A = \begin{bmatrix}2 & 4 & -2 & 1\\-2 & -5 & 7 & 3\\3 & 7 & -8 & 6\end{bmatrix}$ and $u = \begin{bmatrix}3\\-2\\-1\\0\end{bmatrix}$ $v = \begin{bmatrix}3\\-1\\3\end{bmatrix}$

Is u is in $\mathrm{Nu}1A$?

Is v is in $\mathrm{Co}1A$?

Q.7 Solve any two of the following. **10**

a) Find the numerically largest eigen values of A by Power method

$$A = \begin{bmatrix}1 & 6 & 1\\1 & 2 & 0\\0 & 0 & 3\end{bmatrix} x_0 = \begin{bmatrix}1\\0\\0\end{bmatrix}$$

b) If possible, diagonalize the matrix A

$$A = \begin{bmatrix}6 & -2 & -1\\-2 & 6 & -1\\-1 & -1 & 5\end{bmatrix}$$

c) Find the dimension of $\mathrm{Nu}1A$ & $\mathrm{Co}1A$ of matrix A where

$$A = \begin{bmatrix}1 & 2 & -4 & 3 & 3\\5 & 10 & -9 & -7 & 8\\4 & 8 & -9 & -2 & 7\\-2 & -4 & 5 & 0 & 6\end{bmatrix}$$

S.Y (B. Tech.) (Sem-II) (New/Old) (CBCS) Examination: March/April-2025
ELECTRICAL ENGINEERING
Numerical Methods and Linear Algebra (BTN07401)

Day & Date: Thursday, 05-June-2025 Max. Marks: 70
Time: 10:00 AM To 01:00 PM

Instructions: 1) Q. No. 1 is compulsory. It should be solved in the first 30 minutes in Answer Book Page no 03 (Starting page of the Answer Book). Each question carries one mark.
2) Don't forget to Mention question paper set (P/Q/R/S) on top of page.
3) Figures to the right indicates full marks.
4) Make suitable assumptions if necessary and state them clearly.
5) Use of non-programmable calculator is allowed.

MCQ/Objective Type Questions

Duration: 30 Minutes Marks:14

Q.1 Choose the correct option. **14**

1) -2 is the eigen values of A where $A = \begin{bmatrix} 2 & 4 & 3 \\ -4 & -6 & -3 \\ 3 & 3 & 1 \end{bmatrix}$

a) True b) False

2) Let A be an $n \times n$ invertible matrix then which of the following is not true _____.
a) The columns of A forms a basis of R^n
b) The rows of A forms a basis of R^n
c) Rank $A = n$
d) $\text{Nul}A \neq \{0\}$

3) If a system of equations has no free variables then it has _____.
a) Unique solution b) No solution
c) Infinite solution d) none

4) Power method is used to find _____.
a) Smallest eigen values b) Zero Eigen values
c) Largest eigen values d) None

5) In solving simultaneous linear equation which of the following method is iterative?
a) Factorisation b) Jacobi
c) Gauss-Seidel d) Both b and c

6) Error in the Trapezoidal rule is of the order _____.
a) h^2 b) h^3
c) h^4 d) h^5

7) If $\frac{dy}{dx} = x^2 + y^2$ and $y(0) = 1$ then Picard's first approximation is ____.

a) $1 + x$ b) $x + \frac{x^3}{3}$

c) $1 + x - \frac{x^3}{3}$ d) $1 + x + \frac{x^3}{3}$

8) Romberg method is used to solve _____.

a) Ordinary differential equations
b) Integration
c) Partial differential equations
d) All of these

9) The quantity K obtained by Runge-Kutta method of fourth order for differential equation $\frac{dy}{dx} = x^2 + y^2$ and $y(0) = 1$ when $h = 0.1$ is _____.

a) 0.1 b) 0

c) 1 d) 0.01

10) LU decomposition of matrix is possible only for _____.

a) Invertible matrix b) Singular matrix
c) Square matrix d) Ordered matrix

11) The order of convergence of Newton-Raphson method is _____.

a) 3 b) 2
c) 1 d) 0

12) If all eigen values are negative then the quadratic form $X'AX$ is _____.

a) Positive definite b) Negative definite
c) Indefinite d) none

13) $\big||v|\big| = \sqrt{v.v}$

a) True b) False

14) If $u = \begin{bmatrix} 7 \\ 1 \end{bmatrix}, v = \begin{bmatrix} 3 \\ 2 \end{bmatrix}$ then $\big||u - v|\big|$

a) $\sqrt{7}$ b) $\sqrt{17}$

c) $\sqrt{71}$ d) $\sqrt{70}$

MCQ/Objective Type Questions

Duration: 30 Minutes Marks:14

Q.1 Choose the correct Answer. **14**

1) Which motor is suitable for high starting torque?
a) DC series motor b) DC shunt motor
c) DC separately excited motor d) Synchronous motor

2) Which of the following vehicle produces zero emissions?
a) Gasoline vehicle b) Electrical vehicle
c) Hybrid vehicle d) Diesel vehicle

3) Who coined the term battery?
a) George Franklin b) Benjamin Fernandes
c) Benjamin Franklin d) George Bush

4) The solar energy essentially used in ____ contexts.
a) Soar thermal
b) Solar photovoltaics
c) Solar thermal and Solar photovoltaics
d) None of above

5) When was the first electric car invented?
a) 1830 b) 1985
c) 1832 d) 1945

6) Full form of ICV is ____.
a) Internal combustion vehicles b) Internet combustion vehicles
c) Internally combined vehicles d) Internet combined vehicles

7) What is S.I. unit of force is ____.
a) Newton-meter b) Newton
c) Newton per second d) Newton per square meter

8) What is the challenge with electric vehicles?

a) Vehicle durability b) Cell life
c) Cost d) Both a) and b)

9) A fuel cells converts ____ energy into electrical energy.

a) Mechanical b) Magnetic
c) Solar d) Chemical

10) The solar cell efficiency is about ____.

a) 25% b) 15%
c) 48% d) 63%

11) Where do most electric vehicle owners charge their cars?

a) At home b) At work
c) At public charging stations d) Both (a) and (b)

12) The capacity of batteries is expressed in terms of ____.

a) Current rating b) Voltage rating
c) Ampere hour rating d) None of the above

13) How to increase the range on electric vehicles?

a) By increasing the battery capacity
b) By reducing battery capacity
c) By installing another DC motor
d) By installing turbocharger

14) From where tractive effort generate in EV?

a) Battery b) Convertor
c) Driving Shaft d) Motor

S.Y. (B. Tech.) (Sem-II) (New/Old) (CBCS) Examination: March/April-2025
ELECTRICAL ENGINEERING
Electric Vehicle Technology (BTN07408)

Day & Date: Monday, 09-June-2025 Max. Marks: 56
Time: 10:00 AM To 01:00 PM

Instructions: 1) All questions are compulsory.
2) Figures to the right indicate full marks.

SECTION - I

Q.2 Solve the following: (Any Four) **16**

a) Explain history of vehicle in detail.
b) State and explain laws of motion.
c) Write note on tractive effort and transmission requirement.
d) Explain electric vehicle market.
e) Explain in brief vehicle kinetics.
f) Write note on energy consumption and vehicle performance.

Q.3 Solve the following: (Any Two) **12**

a) What is meant by Electric vehicle and explain the components of electric vehicle in brief.
b) State and explain electric motor characteristics in detail.
c) Explain propulsion power along with velocity and acceleration.

SECTION - II

Q.4 Solve the following: (Any Four) **16**

a) Explain concept of plug-in hybrid electric vehicle.
b) Explain social benefits of solar powered charging systems.
c) Explain the integration of EV's smart grid.
d) Explain in detail powertrain component sizing.
e) Explain electric vehicle supply equipment.
f) Explain different types of EV charging connector.

Q.5 Attempt the following: (Any Two) **12**

a) Explain in detail hybrid electric drive with series and parallel concept.
b) State and explain environmental and economic benefits of solar powered charging systems.
c) State and explain different types of plug standard in different countries.

Seat No.	

Set **Q**

S.Y. (B. Tech.) (Sem-II) (New/Old) (CBCS) Examination: March/April-2025
ELECTRICAL ENGINEERING
Electric Vehicle Technology (BTN07408)

Day & Date: Monday, 09-June-2025 Max. Marks: 70
Time: 10:00 AM To 01:00 PM

Instructions: 1) Q. No. 1 is compulsory. It should be solved in the first 30 minutes in Answer Book Page no 03 (Starting page of the Answer Book). Each question carries one mark.
2) Don't forget to Mention question paper set (P/Q/R/S) on top of page.
3) Figures to the right indicates full marks.

MCQ/Objective Type Questions

Answer

Q.1 Choose the correct alternatives from the options.

1) The primary meaning of "ethics"?
a) Financial management
b) Principles governing the behavior of individuals
c) Rules for social interaction
d) Legal frameworks for business

2) The following is an example of a moral value?
a) Earning money b) Achieving fame
c) Helping others in need d) Increasing personal wealth

3) Integrity refers to: _____
a) Working hard at any cost
b) Being honest and having strong moral principles
c) Competing with others
d) Disregarding rules for personal gain

4) The concept of "work ethics" includes: _____
a) The right to leave work early
b) Consistently producing quality work
c) Avoiding all responsibilities
d) Expecting promotions without effort

5) The primary purpose of service learning is _____.
a) Earning money while volunteering
b) Acquiring knowledge through practical experiences
c) Participating in online courses
d) Building a professional career

6) Civic virtue is: _____
a) Attending religious services
b) Demonstrating good behavior and contributing to the welfare of society
c) Building personal wealth
d) Following family traditions

7) The following is an example of "respect for others" is _____.
a) Ignoring people's opinions
b) Listening attentively to others and valuing their viewpoints
c) Interrupting others in conversations
d) Arguing to prove your point

8) Living peacefully involves: _____
a) Suppressing all emotions
b) Treating others with kindness and understanding
c) Avoiding any conflict
d) Always agreeing with others

9) The value of "caring" means: _____
a) Always focusing on personal success
b) Showing concern and compassion for others
c) Ignoring the needs of others
d) Only helping when there is a reward

10) Honesty is best defined as: _____
a) Telling the truth regardless of the consequences
b) Saying only what others want to hear
c) Keeping secrets for friends
d) Telling lies to avoid conflict

11) According to Kohlberg's theory, the highest stage of moral development is: _____
a) Obedience and punishment orientation
b) Conventional morality
c) Post-conventional morality
d) Self-interest orientation

12) Which of the following is a key characteristic of Gilligan's moral development theory?
a) Emphasis on justice and rights
b) Focus on the value of relationships and care
c) Focus on maximizing personal gain
d) Belief that all moral issues are universal and objective

13) Which of the following models of professional roles emphasizes the engineer's responsibility to society and the public welfare?

a) The Engineer as Technocrat
b) The Engineer as Contractor
c) The Engineer as Guardian
d) The Engineer as Entrepreneur

14) Which theory of moral development emphasizes the importance of care and relationships, particularly for women?

a) Kohlberg's theory
b) Aristotle's virtue ethics
c) Gilligan's theory
d) Rawls' theory of justice

15) Which model of professional role in engineering sees the engineer as a neutral expert, focused only on technical competence without concern for social values?

a) The Engineer as Guardian
b) The Engineer as Technocrat
c) The Engineer as Entrepreneur
d) The Engineer as Contractor

16) Which ethical theory suggests that individuals should act in ways that maximize their own happiness and well-being?

a) Deontological ethics
b) Utilitarianism
c) Ethical egoism
d) Virtue ethics

17) The concept of "professional ethics" in engineering involves: _____

a) The personal beliefs of engineers
b) The specific ethical standards and principles set by professional organizations
c) The opinions of senior management
d) The religious views of the engineers

18) In engineering ethics, a "conflict of interest" occurs when: _____

a) Engineers prioritize their personal interests over their professional duties
b) Engineers follow the orders of their superiors without question
c) Engineers act in ways that promote the well-being of society
d) Engineers make decisions based solely on technical expertise

19) In engineering ethics, what is the purpose of "risk assessment"?

a) To identify and mitigate potential dangers and harm to society
b) To increase profits and minimize costs
c) To ensure that engineers do not make mistakes
d) To promote the engineer's personal career advancement

20) What does "ethical responsibility" in engineering imply?
a) Only following orders from superiors
b) Making decisions that benefit only the company
c) Balancing technical, legal, and moral considerations to ensure public safety and well-being
d) Prioritizing efficiency over quality

21) Safety and risk primarily deal with: _____
a) Managing hazards and assessing potential harm
b) Legal contracts
c) Maximizing productivity
d) Reducing work hours

22) Risk-benefit analysis involves: _____
a) Estimating the cost of a project
b) Evaluating potential risks against possible benefits
c) Managing legal liabilities
d) Defining workplace responsibilities

23) The Chernobyl disaster is an example of: _____
a) A technological breakthrough
b) An ethical failure in managing risks
c) A successful safety protocol implementation
d) An engineering success

24) Which of the following is a key factor in assessing safety and risk?
a) The cost of implementation
b) The likelihood and impact of potential hazards
c) The speed of technology adoption
d) The market demand for a product

25) The Three Mile Island incident was caused by: _____
a) Technological failure
b) Natural disasters
c) Lack of training for engineers
d) Poor risk assessment and safety protocol failures

26) Collegiality in a professional setting refers to: _____
a) Loyalty to your employer
b) Cooperation and mutual respect among colleagues
c) Competing for individual success
d) Avoiding work conflicts

27) Professional loyalty involves: _____
a) Reporting colleagues' mistakes publicly
b) Protecting the interests of the team or organization
c) Ignoring safety violations to avoid
d) Disclosing confidential information for personal conflict gain

28) Employee rights include: _____
a) The right to work without discrimination
b) The right to disregard company policies
c) The right to personal opinion but not affecting work
d) The right to ignore workplace safety standards

29) Intellectual Property Rights (IPR) protect: _____
a) The financial interests of corporations
b) The ownership and use of creative ideas and inventions
c) The physical assets of a company
d) Workplace performance evaluations

30) *Risk assessment* is important because it helps in: _____
a) Evaluating the potential impact of hazards on health and safety
b) Minimizing workplace productivity
c) Defining job roles
d) Ignoring environmental issues

31) In risk management, mitigation strategies aim to: _____
a) Accept all risks in the workplace
b) Reduce or eliminate identified risks
c) Increase the likelihood of hazards
d) Focus only on maximizing profits

32) Which of the following is a potential consequence of *occupational crime*?
a) Increased workplace productivity
b) Legal consequences and loss of reputation
c) Improvement in company safety standards
d) Higher employee satisfaction

33) Risk reduction in engineering refers to: _____
a) Implementing measures to lower the chances of accidents
b) Increasing the number of hazards in the work environment
c) Ignoring potential risks
d) Cutting costs by removing safety measures

34) Public safety regulations are primarily designed to: _____
a) Ensure the safety of the company's assets
b) Protect the general public from potential harm
c) Increase revenue for the government
d) Focus only on preventing natural disasters

35) Multinational corporations (MNCs) are characterized by: _____
a) Operations in multiple countries with a centralized headquarters
b) Operating only in their home country
c) Limited influence on global markets
d) No responsibility toward environmental concerns

36) Environmental ethics primarily deals with: _____
a) Human responsibility to manage the environment and natural resources
b) Minimizing corporate profits
c) Technological advancements in engineering
d) Treating employees equally

37) Which of the following is NOT an example of environmental ethics?
a) Reducing pollution and waste
b) Maximizing resource use regardless of environmental impact
c) Preserving biodiversity
d) Sustainable development

38) Computer ethics involves: _____
a) Programming and coding without considering social consequences
b) Understanding the moral implications of computing technologies
c) Focusing only on technological innovation
d) Ignoring privacy issues

39) Weapons development ethics deals with: _____
a) The development of new technologies to enhance military capabilities
b) Restricting the use of all technological advancements
c) Focusing only on civilian safety
d) Only addressing the legal aspects of weapon development

40) Engineers as managers are expected to: _____
a) Focus solely on technical tasks
b) Lead teams, make strategic decisions, and manage projects
c) Ignore the business aspects of their work
d) Avoid taking responsibility for team outcomes

41) Consulting engineers are hired to: _____
a) Work on projects within the company they are employed
b) Provide expert advice on technical and engineering problems
c) Manage public relations for a company
d) Conduct legal investigations

42) Engineers acting as expert witnesses typically: _____
a) Present evidence and offer testimony in legal cases
b) Focus on public relations during a case
c) Manage engineering projects for legal firms
d) Directly represent the interests of a company in court

43) Sample Code of Ethics of professional organizations typically includes: _____
a) Guidelines for acceptable behavior and decision-making
b) Rules for maximizing profits at any cost
c) Detailed technical specifications for projects
d) Guidelines for political involvement in engineering

44) ASME stands for: _____
a) American Society of Mechanical Engineers
b) American Society of Management Engineers
c) Association of Safety and Mechanical Engineers
d) Association of Scientific and Mechanical Engineers

45) The ASCE Code of Ethics emphasizes: _____
a) Following only local regulations
b) Maintaining professional integrity and responsibility
c) Focusing on personal financial gain
d) Ignoring environmental impacts

46) **T**he IEEE Code of Ethics is primarily concerned with: _____
a) Fostering professional competence and integrity
b) Protecting corporate secrets
c) Maximizing technological advancements at any cost
d) Developing weapons for defense purposes

47) Global issues in engineering ethics include: _____
a) Cultural differences in engineering practices
b) Lack of understanding between technical and ethical concerns
c) Addressing both local and international engineering challenges
d) All of the above

48) A key challenge faced by multinational corporations is: _____
a) Balancing profits with social and environmental
b) Competing only within their home country responsibilities
c) Focusing solely on domestic issues
d) Ignoring corporate social responsibility

49) Empathy is the ability to: _____
a) Solve problems logically
b) Understand and share the feelings of others
c) Be indifferent to others' emotions
d) Only care about your own well-being

50) The quality of "caring" includes: _____
a) Showing concern for others' well-being
b) Ignoring the needs of others
c) Only helping family and friends
d) Seeking praise for helping others

a) Operations in multiple countries with a centralized headquarters
b) Operating only in their home country
c) Limited influence on global markets
d) No responsibility toward environmental concerns

6) Environmental ethics primarily deals with: _____
a) Human responsibility to manage the environment and natural resources
b) Minimizing corporate profits
c) Technological advancements in engineering
d) Treating employees equally

7) Which of the following is NOT an example of environmental ethics?
a) Reducing pollution and waste
b) Maximizing resource use regardless of environmental impact
c) Preserving biodiversity
d) Sustainable development

8) Computer ethics involves: _____
a) Programming and coding without considering social consequences
b) Understanding the moral implications of computing technologies
c) Focusing only on technological innovation
d) Ignoring privacy issues

9) Weapons development ethics deals with: _____
a) The development of new technologies to enhance military capabilities
b) Restricting the use of all technological advancements
c) Focusing only on civilian safety
d) Only addressing the legal aspects of weapon development

10) Engineers as managers are expected to: _____
a) Focus solely on technical tasks
b) Lead teams, make strategic decisions, and manage projects
c) Ignore the business aspects of their work
d) Avoid taking responsibility for team outcomes

11) Consulting engineers are hired to: _____
a) Work on projects within the company they are employed
b) Provide expert advice on technical and engineering problems
c) Manage public relations for a company
d) Conduct legal investigations

12) Engineers acting as expert witnesses typically: _____
a) Present evidence and offer testimony in legal cases
b) Focus on public relations during a case
c) Manage engineering projects for legal firms
d) Directly represent the interests of a company in court

13) Sample Code of Ethics of professional organizations typically includes: _____
a) Guidelines for acceptable behavior and decision-making
b) Rules for maximizing profits at any cost
c) Detailed technical specifications for projects
d) Guidelines for political involvement in engineering

14) ASME stands for: _____
a) American Society of Mechanical Engineers
b) American Society of Management Engineers
c) Association of Safety and Mechanical Engineers
d) Association of Scientific and Mechanical Engineers

15) The ASCE Code of Ethics emphasizes: _____
a) Following only local regulations
b) Maintaining professional integrity and responsibility
c) Focusing on personal financial gain
d) Ignoring environmental impacts

16) **T**he IEEE Code of Ethics is primarily concerned with: _____
a) Fostering professional competence and integrity
b) Protecting corporate secrets
c) Maximizing technological advancements at any cost
d) Developing weapons for defense purposes

17) Global issues in engineering ethics include: _____
a) Cultural differences in engineering practices
b) Lack of understanding between technical and ethical concerns
c) Addressing both local and international engineering challenges
d) All of the above

18) A key challenge faced by multinational corporations is: _____
a) Balancing profits with social and environmental
b) Competing only within their home country responsibilities
c) Focusing solely on domestic issues
d) Ignoring corporate social responsibility

19) Empathy is the ability to: _____
a) Solve problems logically
b) Understand and share the feelings of others
c) Be indifferent to others' emotions
d) Only care about your own well-being

20) The quality of "caring" includes: _____
a) Showing concern for others' well-being
b) Ignoring the needs of others
c) Only helping family and friends
d) Seeking praise for helping others

21) The primary meaning of "ethics"?
a) Financial management
b) Principles governing the behavior of individuals
c) Rules for social interaction
d) Legal frameworks for business

22) The following is an example of a moral value?
a) Earning money
b) Achieving fame
c) Helping others in need
d) Increasing personal wealth

23) Integrity refers to: _____
a) Working hard at any cost
b) Being honest and having strong moral principles
c) Competing with others
d) Disregarding rules for personal gain

24) The concept of "work ethics" includes: _____
a) The right to leave work early
b) Consistently producing quality work
c) Avoiding all responsibilities
d) Expecting promotions without effort

25) The primary purpose of service learning is _____.
a) Earning money while volunteering
b) Acquiring knowledge through practical experiences
c) Participating in online courses
d) Building a professional career

26) Civic virtue is: _____
a) Attending religious services
b) Demonstrating good behavior and contributing to the welfare of society
c) Building personal wealth
d) Following family traditions

27) The following is an example of "respect for others" is _____.
a) Ignoring people's opinions
b) Listening attentively to others and valuing their viewpoints
c) Interrupting others in conversations
d) Arguing to prove your point

28) Living peacefully involves: _____
a) Suppressing all emotions
b) Treating others with kindness and understanding
c) Avoiding any conflict
d) Always agreeing with others

29) The value of "caring" means: _____
a) Always focusing on personal success
b) Showing concern and compassion for others
c) Ignoring the needs of others
d) Only helping when there is a reward

30) Honesty is best defined as: _____
a) Telling the truth regardless of the consequences
b) Saying only what others want to hear
c) Keeping secrets for friends
d) Telling lies to avoid conflict

31) According to Kohlberg's theory, the highest stage of moral development is: _____
a) Obedience and punishment orientation
b) Conventional morality
c) Post-conventional morality
d) Self-interest orientation

32) Which of the following is a key characteristic of Gilligan's moral development theory?
a) Emphasis on justice and rights
b) Focus on the value of relationships and care
c) Focus on maximizing personal gain
d) Belief that all moral issues are universal and objective

33) Which of the following models of professional roles emphasizes the engineer's responsibility to society and the public welfare?
a) The Engineer as Technocrat
b) The Engineer as Contractor
c) The Engineer as Guardian
d) The Engineer as Entrepreneur

34) Which theory of moral development emphasizes the importance of care and relationships, particularly for women?
a) Kohlberg's theory
b) Aristotle's virtue ethics
c) Gilligan's theory
d) Rawls' theory of justice

35) Which model of professional role in engineering sees the engineer as a neutral expert, focused only on technical competence without concern for social values?
a) The Engineer as Guardian
b) The Engineer as Technocrat
c) The Engineer as Entrepreneur
d) The Engineer as Contractor

36) Which ethical theory suggests that individuals should act in ways that maximize their own happiness and well-being?

a) Deontological ethics b) Utilitarianism
c) Ethical egoism d) Virtue ethics

37) The concept of "professional ethics" in engineering involves: _____

a) The personal beliefs of engineers
b) The specific ethical standards and principles set by professional organizations
c) The opinions of senior management
d) The religious views of the engineers

38) In engineering ethics, a "conflict of interest" occurs when: _____

a) Engineers prioritize their personal interests over their professional duties
b) Engineers follow the orders of their superiors without question
c) Engineers act in ways that promote the well-being of society
d) Engineers make decisions based solely on technical expertise

39) In engineering ethics, what is the purpose of "risk assessment"?

a) To identify and mitigate potential dangers and harm to society
b) To increase profits and minimize costs
c) To ensure that engineers do not make mistakes
d) To promote the engineer's personal career advancement

40) What does "ethical responsibility" in engineering imply?

a) Only following orders from superiors
b) Making decisions that benefit only the company
c) Balancing technical, legal, and moral considerations to ensure public safety and well-being
d) Prioritizing efficiency over quality

41) Safety and risk primarily deal with: _____

a) Managing hazards and assessing potential harm
b) Legal contracts
c) Maximizing productivity
d) Reducing work hours

42) Risk-benefit analysis involves: _____

a) Estimating the cost of a project
b) Evaluating potential risks against possible benefits
c) Managing legal liabilities
d) Defining workplace responsibilities

43) The Chernobyl disaster is an example of: _____

a) A technological breakthrough
b) An ethical failure in managing risks
c) A successful safety protocol implementation
d) An engineering success

44) Which of the following is a key factor in assessing safety and risk?
a) The cost of implementation
b) The likelihood and impact of potential hazards
c) The speed of technology adoption
d) The market demand for a product

45) The Three Mile Island incident was caused by: _____
a) Technological failure
b) Natural disasters
c) Lack of training for engineers
d) Poor risk assessment and safety protocol failures

46) Collegiality in a professional setting refers to: _____
a) Loyalty to your employer
b) Cooperation and mutual respect among colleagues
c) Competing for individual success
d) Avoiding work conflicts

47) Professional loyalty involves: _____
a) Reporting colleagues' mistakes publicly
b) Protecting the interests of the team or organization
c) Ignoring safety violations to avoid
d) Disclosing confidential information for personal conflict gain

48) Employee rights include: _____
a) The right to work without discrimination
b) The right to disregard company policies
c) The right to personal opinion but not affecting work
d) The right to ignore workplace safety standards

49) Intellectual Property Rights (IPR) protect: _____
a) The financial interests of corporations
b) The ownership and use of creative ideas and inventions
c) The physical assets of a company
d) Workplace performance evaluations

50) *Risk assessment* is important because it helps in: _____
a) Evaluating the potential impact of hazards on health and safety
b) Minimizing workplace productivity
c) Defining job roles
d) Ignoring environmental issues

S. Y. (B.Tech.) (Sem - II) (New) (CBCS) Examination: March/April-2025
CIVIL ENGINEERING
Professional Ethics (VEC-02)

Day & Date: Wednesday, 11-06-2025 Max. Marks: 50
Time: 10:00 AM To 11:30 AM

Instructions: 1) All questions are compulsory.
2) Figures to the right indicate full marks.
3) Mention Question Paper Set (P/Q/R/S) on Top of Page.

Answer

Q.1 Choose the correct alternatives from the options.

1) According to Kohlberg's theory, the highest stage of moral development is: _____
a) Obedience and punishment orientation
b) Conventional morality
c) Post-conventional morality
d) Self-interest orientation

2) Which of the following is a key characteristic of Gilligan's moral development theory?
a) Emphasis on justice and rights
b) Focus on the value of relationships and care
c) Focus on maximizing personal gain
d) Belief that all moral issues are universal and objective

3) Which of the following models of professional roles emphasizes the engineer’s responsibility to society and the public welfare?
a) The Engineer as Technocrat
b) The Engineer as Contractor
c) The Engineer as Guardian
d) The Engineer as Entrepreneur

4) Which theory of moral development emphasizes the importance of care and relationships, particularly for women?
a) Kohlberg's theory b) Aristotle's virtue ethics
c) Gilligan's theory d) Rawls' theory of justice

5) Which model of professional role in engineering sees the engineer as a neutral expert, focused only on technical competence without concern for social values?

a) The Engineer as Guardian
b) The Engineer as Technocrat
c) The Engineer as Entrepreneur
d) The Engineer as Contractor

6) Which ethical theory suggests that individuals should act in ways that maximize their own happiness and well-being?

a) Deontological ethics b) Utilitarianism
c) Ethical egoism d) Virtue ethics

7) The concept of "professional ethics" in engineering involves: _____

a) The personal beliefs of engineers
b) The specific ethical standards and principles set by professional organizations
c) The opinions of senior management
d) The religious views of the engineers

8) In engineering ethics, a "conflict of interest" occurs when: _____

a) Engineers prioritize their personal interests over their professional duties
b) Engineers follow the orders of their superiors without question
c) Engineers act in ways that promote the well-being of society
d) Engineers make decisions based solely on technical expertise

9) In engineering ethics, what is the purpose of "risk assessment"?

a) To identify and mitigate potential dangers and harm to society
b) To increase profits and minimize costs
c) To ensure that engineers do not make mistakes
d) To promote the engineer's personal career advancement

10) What does "ethical responsibility" in engineering imply?

a) Only following orders from superiors
b) Making decisions that benefit only the company
c) Balancing technical, legal, and moral considerations to ensure public safety and well-being
d) Prioritizing efficiency over quality

11) Safety and risk primarily deal with: _____

a) Managing hazards and assessing potential harm
b) Legal contracts
c) Maximizing productivity
d) Reducing work hours

12) Risk-benefit analysis involves: _____
a) Estimating the cost of a project
b) Evaluating potential risks against possible benefits
c) Managing legal liabilities
d) Defining workplace responsibilities

13) The Chernobyl disaster is an example of: _____
a) A technological breakthrough
b) An ethical failure in managing risks
c) A successful safety protocol implementation
d) An engineering success

14) Which of the following is a key factor in assessing safety and risk?
a) The cost of implementation
b) The likelihood and impact of potential hazards
c) The speed of technology adoption
d) The market demand for a product

15) The Three Mile Island incident was caused by: _____
a) Technological failure
b) Natural disasters
c) Lack of training for engineers
d) Poor risk assessment and safety protocol failures

16) Collegiality in a professional setting refers to: _____
a) Loyalty to your employer
b) Cooperation and mutual respect among colleagues
c) Competing for individual success
d) Avoiding work conflicts

17) Professional loyalty involves: _____
a) Reporting colleagues' mistakes publicly
b) Protecting the interests of the team or organization
c) Ignoring safety violations to avoid
d) Disclosing confidential information for personal conflict gain

18) Employee rights include: _____
a) The right to work without discrimination
b) The right to disregard company policies
c) The right to personal opinion but not affecting work
d) The right to ignore workplace safety standards

19) Intellectual Property Rights (IPR) protect: _____
a) The financial interests of corporations
b) The ownership and use of creative ideas and inventions
c) The physical assets of a company
d) Workplace performance evaluations

20) *Risk assessment* is important because it helps in: _____
a) Evaluating the potential impact of hazards on health and safety
b) Minimizing workplace productivity
c) Defining job roles
d) Ignoring environmental issues

21) In risk management, mitigation strategies aim to: _____
a) Accept all risks in the workplace
b) Reduce or eliminate identified risks
c) Increase the likelihood of hazards
d) Focus only on maximizing profits

22) Which of the following is a potential consequence of *occupational crime*?
a) Increased workplace productivity
b) Legal consequences and loss of reputation
c) Improvement in company safety standards
d) Higher employee satisfaction

23) Risk reduction in engineering refers to: _____
a) Implementing measures to lower the chances of accidents
b) Increasing the number of hazards in the work environment
c) Ignoring potential risks
d) Cutting costs by removing safety measures

24) Public safety regulations are primarily designed to: _____
a) Ensure the safety of the company's assets
b) Protect the general public from potential harm
c) Increase revenue for the government
d) Focus only on preventing natural disasters

25) Multinational corporations (MNCs) are characterized by: _____
a) Operations in multiple countries with a centralized headquarters
b) Operating only in their home country
c) Limited influence on global markets
d) No responsibility toward environmental concerns

26) Environmental ethics primarily deals with: _____
a) Human responsibility to manage the environment and natural resources
b) Minimizing corporate profits
c) Technological advancements in engineering
d) Treating employees equally

27) Which of the following is NOT an example of environmental ethics?
a) Reducing pollution and waste
b) Maximizing resource use regardless of environmental impact
c) Preserving biodiversity
d) Sustainable development

28) Computer ethics involves: _____
a) Programming and coding without considering social consequences
b) Understanding the moral implications of computing technologies
c) Focusing only on technological innovation
d) Ignoring privacy issues

29) Weapons development ethics deals with: _____
a) The development of new technologies to enhance military capabilities
b) Restricting the use of all technological advancements
c) Focusing only on civilian safety
d) Only addressing the legal aspects of weapon development

30) Engineers as managers are expected to: _____
a) Focus solely on technical tasks
b) Lead teams, make strategic decisions, and manage projects
c) Ignore the business aspects of their work
d) Avoid taking responsibility for team outcomes

31) Consulting engineers are hired to: _____
a) Work on projects within the company they are employed
b) Provide expert advice on technical and engineering problems
c) Manage public relations for a company
d) Conduct legal investigations

32) Engineers acting as expert witnesses typically: _____
a) Present evidence and offer testimony in legal cases
b) Focus on public relations during a case
c) Manage engineering projects for legal firms
d) Directly represent the interests of a company in court

33) Sample Code of Ethics of professional organizations typically includes: _____
a) Guidelines for acceptable behavior and decision-making
b) Rules for maximizing profits at any cost
c) Detailed technical specifications for projects
d) Guidelines for political involvement in engineering

34) ASME stands for: _____
a) American Society of Mechanical Engineers
b) American Society of Management Engineers
c) Association of Safety and Mechanical Engineers
d) Association of Scientific and Mechanical Engineers

35) The ASCE Code of Ethics emphasizes: _____
a) Following only local regulations
b) Maintaining professional integrity and responsibility
c) Focusing on personal financial gain
d) Ignoring environmental impacts

36) **T**he IEEE Code of Ethics is primarily concerned with: _____
a) Fostering professional competence and integrity
b) Protecting corporate secrets
c) Maximizing technological advancements at any cost
d) Developing weapons for defense purposes

37) Global issues in engineering ethics include: _____
a) Cultural differences in engineering practices
b) Lack of understanding between technical and ethical concerns
c) Addressing both local and international engineering challenges
d) All of the above

38) A key challenge faced by multinational corporations is: _____
a) Balancing profits with social and environmental
b) Competing only within their home country responsibilities
c) Focusing solely on domestic issues
d) Ignoring corporate social responsibility

39) Empathy is the ability to: _____
a) Solve problems logically
b) Understand and share the feelings of others
c) Be indifferent to others' emotions
d) Only care about your own well-being

40) The quality of "caring" includes: _____
a) Showing concern for others' well-being
b) Ignoring the needs of others
c) Only helping family and friends
d) Seeking praise for helping others

41) The primary meaning of "ethics"?
a) Financial management
b) Principles governing the behavior of individuals
c) Rules for social interaction
d) Legal frameworks for business

42) The following is an example of a moral value?
a) Earning money b) Achieving fame
c) Helping others in need d) Increasing personal wealth

43) Integrity refers to: _____
a) Working hard at any cost
b) Being honest and having strong moral principles
c) Competing with others
d) Disregarding rules for personal gain

44) The concept of "work ethics" includes: _____
a) The right to leave work early
b) Consistently producing quality work
c) Avoiding all responsibilities
d) Expecting promotions without effort

45) The primary purpose of service learning is _____.
a) Earning money while volunteering
b) Acquiring knowledge through practical experiences
c) Participating in online courses
d) Building a professional career

46) Civic virtue is: _____
a) Attending religious services
b) Demonstrating good behavior and contributing to the welfare of society
c) Building personal wealth
d) Following family traditions

47) The following is an example of "respect for others" is _____.
a) Ignoring people's opinions
b) Listening attentively to others and valuing their viewpoints
c) Interrupting others in conversations
d) Arguing to prove your point

48) Living peacefully involves: _____
a) Suppressing all emotions
b) Treating others with kindness and understanding
c) Avoiding any conflict
d) Always agreeing with others

49) The value of "caring" means: _____
a) Always focusing on personal success
b) Showing concern and compassion for others
c) Ignoring the needs of others
d) Only helping when there is a reward

50) Honesty is best defined as: _____

a) Telling the truth regardless of the consequences
b) Saying only what others want to hear
c) Keeping secrets for friends
d) Telling lies to avoid conflict

3) Sample Code of Ethics of professional organizations typically includes: _____
a) Guidelines for acceptable behavior and decision-making
b) Rules for maximizing profits at any cost
c) Detailed technical specifications for projects
d) Guidelines for political involvement in engineering

4) ASME stands for: _____
a) American Society of Mechanical Engineers
b) American Society of Management Engineers
c) Association of Safety and Mechanical Engineers
d) Association of Scientific and Mechanical Engineers

5) The ASCE Code of Ethics emphasizes: _____
a) Following only local regulations
b) Maintaining professional integrity and responsibility
c) Focusing on personal financial gain
d) Ignoring environmental impacts

6) **T**he IEEE Code of Ethics is primarily concerned with: _____
a) Fostering professional competence and integrity
b) Protecting corporate secrets
c) Maximizing technological advancements at any cost
d) Developing weapons for defense purposes

7) Global issues in engineering ethics include: _____
a) Cultural differences in engineering practices
b) Lack of understanding between technical and ethical concerns
c) Addressing both local and international engineering challenges
d) All of the above

8) A key challenge faced by multinational corporations is: _____
a) Balancing profits with social and environmental
b) Competing only within their home country responsibilities
c) Focusing solely on domestic issues
d) Ignoring corporate social responsibility

9) Empathy is the ability to: _____
a) Solve problems logically
b) Understand and share the feelings of others
c) Be indifferent to others' emotions
d) Only care about your own well-being

10) The quality of "caring" includes: _____
a) Showing concern for others' well-being
b) Ignoring the needs of others
c) Only helping family and friends
d) Seeking praise for helping others

11) The primary meaning of "ethics"?
a) Financial management
b) Principles governing the behavior of individuals
c) Rules for social interaction
d) Legal frameworks for business

12) The following is an example of a moral value?
a) Earning money
b) Achieving fame
c) Helping others in need
d) Increasing personal wealth

13) Integrity refers to: _____
a) Working hard at any cost
b) Being honest and having strong moral principles
c) Competing with others
d) Disregarding rules for personal gain

14) The concept of "work ethics" includes: _____
a) The right to leave work early
b) Consistently producing quality work
c) Avoiding all responsibilities
d) Expecting promotions without effort

15) The primary purpose of service learning is _____.
a) Earning money while volunteering
b) Acquiring knowledge through practical experiences
c) Participating in online courses
d) Building a professional career

16) Civic virtue is: _____
a) Attending religious services
b) Demonstrating good behavior and contributing to the welfare of society
c) Building personal wealth
d) Following family traditions

17) The following is an example of "respect for others" is _____.
a) Ignoring people's opinions
b) Listening attentively to others and valuing their viewpoints
c) Interrupting others in conversations
d) Arguing to prove your point

18) Living peacefully involves: _____
a) Suppressing all emotions
b) Treating others with kindness and understanding
c) Avoiding any conflict
d) Always agreeing with others

19) The value of "caring" means: _____
a) Always focusing on personal success
b) Showing concern and compassion for others
c) Ignoring the needs of others
d) Only helping when there is a reward

20) Honesty is best defined as: _____
a) Telling the truth regardless of the consequences
b) Saying only what others want to hear
c) Keeping secrets for friends
d) Telling lies to avoid conflict

21) According to Kohlberg's theory, the highest stage of moral development is: _____

a) Obedience and punishment orientation
b) Conventional morality
c) Post-conventional morality
d) Self-interest orientation

22) Which of the following is a key characteristic of Gilligan's moral development theory?

a) Emphasis on justice and rights
b) Focus on the value of relationships and care
c) Focus on maximizing personal gain
d) Belief that all moral issues are universal and objective

23) Which of the following models of professional roles emphasizes the engineer's responsibility to society and the public welfare?

a) The Engineer as Technocrat
b) The Engineer as Contractor
c) The Engineer as Guardian
d) The Engineer as Entrepreneur

24) Which theory of moral development emphasizes the importance of care and relationships, particularly for women?

a) Kohlberg's theory
b) Aristotle's virtue ethics
c) Gilligan's theory
d) Rawls' theory of justice

25) Which model of professional role in engineering sees the engineer as a neutral expert, focused only on technical competence without concern for social values?

a) The Engineer as Guardian
b) The Engineer as Technocrat
c) The Engineer as Entrepreneur
d) The Engineer as Contractor

26) Which ethical theory suggests that individuals should act in ways that maximize their own happiness and well-being?

a) Deontological ethics
b) Utilitarianism
c) Ethical egoism
d) Virtue ethics

27) The concept of "professional ethics" in engineering involves: _____

a) The personal beliefs of engineers
b) The specific ethical standards and principles set by professional organizations
c) The opinions of senior management
d) The religious views of the engineers

28) In engineering ethics, a "conflict of interest" occurs when: _____
a) Engineers prioritize their personal interests over their professional duties
b) Engineers follow the orders of their superiors without question
c) Engineers act in ways that promote the well-being of society
d) Engineers make decisions based solely on technical expertise

29) In engineering ethics, what is the purpose of "risk assessment"?
a) To identify and mitigate potential dangers and harm to society
b) To increase profits and minimize costs
c) To ensure that engineers do not make mistakes
d) To promote the engineer's personal career advancement

30) What does "ethical responsibility" in engineering imply?
a) Only following orders from superiors
b) Making decisions that benefit only the company
c) Balancing technical, legal, and moral considerations to ensure public safety and well-being
d) Prioritizing efficiency over quality

31) Safety and risk primarily deal with: _____
a) Managing hazards and assessing potential harm
b) Legal contracts
c) Maximizing productivity
d) Reducing work hours

32) Risk-benefit analysis involves: _____
a) Estimating the cost of a project
b) Evaluating potential risks against possible benefits
c) Managing legal liabilities
d) Defining workplace responsibilities

33) The Chernobyl disaster is an example of: _____
a) A technological breakthrough
b) An ethical failure in managing risks
c) A successful safety protocol implementation
d) An engineering success

34) Which of the following is a key factor in assessing safety and risk?
a) The cost of implementation
b) The likelihood and impact of potential hazards
c) The speed of technology adoption
d) The market demand for a product

35) The Three Mile Island incident was caused by: _____
a) Technological failure
b) Natural disasters
c) Lack of training for engineers
d) Poor risk assessment and safety protocol failures

36) Collegiality in a professional setting refers to: _____
a) Loyalty to your employer
b) Cooperation and mutual respect among colleagues
c) Competing for individual success
d) Avoiding work conflicts

37) Professional loyalty involves: _____
a) Reporting colleagues' mistakes publicly
b) Protecting the interests of the team or organization
c) Ignoring safety violations to avoid
d) Disclosing confidential information for personal conflict gain

38) Employee rights include: _____
a) The right to work without discrimination
b) The right to disregard company policies
c) The right to personal opinion but not affecting work
d) The right to ignore workplace safety standards

39) Intellectual Property Rights (IPR) protect: _____
a) The financial interests of corporations
b) The ownership and use of creative ideas and inventions
c) The physical assets of a company
d) Workplace performance evaluations

40) *Risk assessment* is important because it helps in: _____
a) Evaluating the potential impact of hazards on health and safety
b) Minimizing workplace productivity
c) Defining job roles
d) Ignoring environmental issues

41) In risk management, mitigation strategies aim to: _____
a) Accept all risks in the workplace
b) Reduce or eliminate identified risks
c) Increase the likelihood of hazards
d) Focus only on maximizing profits

42) Which of the following is a potential consequence of *occupational crime*?
a) Increased workplace productivity
b) Legal consequences and loss of reputation
c) Improvement in company safety standards
d) Higher employee satisfaction

43) Risk reduction in engineering refers to: _____
a) Implementing measures to lower the chances of accidents
b) Increasing the number of hazards in the work environment
c) Ignoring potential risks
d) Cutting costs by removing safety measures

44) Public safety regulations are primarily designed to: _____
a) Ensure the safety of the company's assets
b) Protect the general public from potential harm
c) Increase revenue for the government
d) Focus only on preventing natural disasters

45) Multinational corporations (MNCs) are characterized by: _____
a) Operations in multiple countries with a centralized headquarters
b) Operating only in their home country
c) Limited influence on global markets
d) No responsibility toward environmental concerns

46) Environmental ethics primarily deals with: _____
a) Human responsibility to manage the environment and natural resources
b) Minimizing corporate profits
c) Technological advancements in engineering
d) Treating employees equally

47) Which of the following is NOT an example of environmental ethics?
a) Reducing pollution and waste
b) Maximizing resource use regardless of environmental impact
c) Preserving biodiversity
d) Sustainable development

48) Computer ethics involves: _____
a) Programming and coding without considering social consequences
b) Understanding the moral implications of computing technologies
c) Focusing only on technological innovation
d) Ignoring privacy issues

49) Weapons development ethics deals with: _____
a) The development of new technologies to enhance military capabilities
b) Restricting the use of all technological advancements
c) Focusing only on civilian safety
d) Only addressing the legal aspects of weapon development

50) Engineers as managers are expected to: _____
a) Focus solely on technical tasks
b) Lead teams, make strategic decisions, and manage projects
c) Ignore the business aspects of their work
d) Avoid taking responsibility for team outcomes

MECHANICAL ENGINEERING
Professional Ethics (VEC-02)

Day & Date: Wednesday, 11-06-2025 Max. Marks: 50
Time: 10:00 AM To 11:30 AM

Instructions: 1) All questions are compulsory.
2) Figures to the right indicate full marks.
3) Mention Question Paper Set (P/Q/R/S) on Top of Page.

Answer

Q.1 Choose the correct alternatives from the options.

1) The primary meaning of "ethics"?
a) Financial management
b) Principles governing the behavior of individuals
c) Rules for social interaction
d) Legal frameworks for business

2) The following is an example of a moral value?
a) Earning money b) Achieving fame
c) Helping others in need d) Increasing personal wealth

3) Integrity refers to: _____
a) Working hard at any cost
b) Being honest and having strong moral principles
c) Competing with others
d) Disregarding rules for personal gain

4) The concept of "work ethics" includes: _____
a) The right to leave work early
b) Consistently producing quality work
c) Avoiding all responsibilities
d) Expecting promotions without effort

5) The primary purpose of service learning is _____.
a) Earning money while volunteering
b) Acquiring knowledge through practical experiences
c) Participating in online courses
d) Building a professional career

6) Civic virtue is: _____
a) Attending religious services
b) Demonstrating good behavior and contributing to the welfare of society
c) Building personal wealth
d) Following family traditions

7) The following is an example of "respect for others" is _____.
a) Ignoring people's opinions
b) Listening attentively to others and valuing their viewpoints
c) Interrupting others in conversations
d) Arguing to prove your point

8) Living peacefully involves: _____
a) Suppressing all emotions
b) Treating others with kindness and understanding
c) Avoiding any conflict
d) Always agreeing with others

9) The value of "caring" means: _____
a) Always focusing on personal success
b) Showing concern and compassion for others
c) Ignoring the needs of others
d) Only helping when there is a reward

10) Honesty is best defined as: _____
a) Telling the truth regardless of the consequences
b) Saying only what others want to hear
c) Keeping secrets for friends
d) Telling lies to avoid conflict

11) According to Kohlberg's theory, the highest stage of moral development is: _____
a) Obedience and punishment orientation
b) Conventional morality
c) Post-conventional morality
d) Self-interest orientation

12) Which of the following is a key characteristic of Gilligan's moral development theory?
a) Emphasis on justice and rights
b) Focus on the value of relationships and care
c) Focus on maximizing personal gain
d) Belief that all moral issues are universal and objective

13) Which of the following models of professional roles emphasizes the engineer's responsibility to society and the public welfare?

a) The Engineer as Technocrat
b) The Engineer as Contractor
c) The Engineer as Guardian
d) The Engineer as Entrepreneur

14) Which theory of moral development emphasizes the importance of care and relationships, particularly for women?

a) Kohlberg's theory
b) Aristotle's virtue ethics
c) Gilligan's theory
d) Rawls' theory of justice

15) Which model of professional role in engineering sees the engineer as a neutral expert, focused only on technical competence without concern for social values?

a) The Engineer as Guardian
b) The Engineer as Technocrat
c) The Engineer as Entrepreneur
d) The Engineer as Contractor

16) Which ethical theory suggests that individuals should act in ways that maximize their own happiness and well-being?

a) Deontological ethics
b) Utilitarianism
c) Ethical egoism
d) Virtue ethics

17) The concept of "professional ethics" in engineering involves: _____

a) The personal beliefs of engineers
b) The specific ethical standards and principles set by professional organizations
c) The opinions of senior management
d) The religious views of the engineers

18) In engineering ethics, a "conflict of interest" occurs when: _____

a) Engineers prioritize their personal interests over their professional duties
b) Engineers follow the orders of their superiors without question
c) Engineers act in ways that promote the well-being of society
d) Engineers make decisions based solely on technical expertise

19) In engineering ethics, what is the purpose of "risk assessment"?

a) To identify and mitigate potential dangers and harm to society
b) To increase profits and minimize costs
c) To ensure that engineers do not make mistakes
d) To promote the engineer's personal career advancement

20) What does "ethical responsibility" in engineering imply?
a) Only following orders from superiors
b) Making decisions that benefit only the company
c) Balancing technical, legal, and moral considerations to ensure public safety and well-being
d) Prioritizing efficiency over quality

21) Safety and risk primarily deal with: _____
a) Managing hazards and assessing potential harm
b) Legal contracts
c) Maximizing productivity
d) Reducing work hours

22) Risk-benefit analysis involves: _____
a) Estimating the cost of a project
b) Evaluating potential risks against possible benefits
c) Managing legal liabilities
d) Defining workplace responsibilities

23) The Chernobyl disaster is an example of: _____
a) A technological breakthrough
b) An ethical failure in managing risks
c) A successful safety protocol implementation
d) An engineering success

24) Which of the following is a key factor in assessing safety and risk?
a) The cost of implementation
b) The likelihood and impact of potential hazards
c) The speed of technology adoption
d) The market demand for a product

25) The Three Mile Island incident was caused by: _____
a) Technological failure
b) Natural disasters
c) Lack of training for engineers
d) Poor risk assessment and safety protocol failures

26) Collegiality in a professional setting refers to: _____
a) Loyalty to your employer
b) Cooperation and mutual respect among colleagues
c) Competing for individual success
d) Avoiding work conflicts

27) Professional loyalty involves: _____
a) Reporting colleagues' mistakes publicly
b) Protecting the interests of the team or organization
c) Ignoring safety violations to avoid
d) Disclosing confidential information for personal conflict gain

28) Employee rights include: _____
a) The right to work without discrimination
b) The right to disregard company policies
c) The right to personal opinion but not affecting work
d) The right to ignore workplace safety standards

29) Intellectual Property Rights (IPR) protect: _____
a) The financial interests of corporations
b) The ownership and use of creative ideas and inventions
c) The physical assets of a company
d) Workplace performance evaluations

30) *Risk assessment* is important because it helps in: _____
a) Evaluating the potential impact of hazards on health and safety
b) Minimizing workplace productivity
c) Defining job roles
d) Ignoring environmental issues

31) In risk management, mitigation strategies aim to: _____
a) Accept all risks in the workplace
b) Reduce or eliminate identified risks
c) Increase the likelihood of hazards
d) Focus only on maximizing profits

32) Which of the following is a potential consequence of *occupational crime*?
a) Increased workplace productivity
b) Legal consequences and loss of reputation
c) Improvement in company safety standards
d) Higher employee satisfaction

33) Risk reduction in engineering refers to: _____
a) Implementing measures to lower the chances of accidents
b) Increasing the number of hazards in the work environment
c) Ignoring potential risks
d) Cutting costs by removing safety measures

34) Public safety regulations are primarily designed to: _____
a) Ensure the safety of the company's assets
b) Protect the general public from potential harm
c) Increase revenue for the government
d) Focus only on preventing natural disasters

35) Multinational corporations (MNCs) are characterized by: _____
a) Operations in multiple countries with a centralized headquarters
b) Operating only in their home country
c) Limited influence on global markets
d) No responsibility toward environmental concerns

36) Environmental ethics primarily deals with: _____
a) Human responsibility to manage the environment and natural resources
b) Minimizing corporate profits
c) Technological advancements in engineering
d) Treating employees equally

37) Which of the following is NOT an example of environmental ethics?
a) Reducing pollution and waste
b) Maximizing resource use regardless of environmental impact
c) Preserving biodiversity
d) Sustainable development

38) Computer ethics involves: _____
a) Programming and coding without considering social consequences
b) Understanding the moral implications of computing technologies
c) Focusing only on technological innovation
d) Ignoring privacy issues

39) Weapons development ethics deals with: _____
a) The development of new technologies to enhance military capabilities
b) Restricting the use of all technological advancements
c) Focusing only on civilian safety
d) Only addressing the legal aspects of weapon development

40) Engineers as managers are expected to: _____
a) Focus solely on technical tasks
b) Lead teams, make strategic decisions, and manage projects
c) Ignore the business aspects of their work
d) Avoid taking responsibility for team outcomes

41) Consulting engineers are hired to: _____
a) Work on projects within the company they are employed
b) Provide expert advice on technical and engineering problems
c) Manage public relations for a company
d) Conduct legal investigations

42) Engineers acting as expert witnesses typically: _____
a) Present evidence and offer testimony in legal cases
b) Focus on public relations during a case
c) Manage engineering projects for legal firms
d) Directly represent the interests of a company in court

43) Sample Code of Ethics of professional organizations typically includes: _____
a) Guidelines for acceptable behavior and decision-making
b) Rules for maximizing profits at any cost
c) Detailed technical specifications for projects
d) Guidelines for political involvement in engineering

44) ASME stands for: _____
a) American Society of Mechanical Engineers
b) American Society of Management Engineers
c) Association of Safety and Mechanical Engineers
d) Association of Scientific and Mechanical Engineers

45) The ASCE Code of Ethics emphasizes: _____
a) Following only local regulations
b) Maintaining professional integrity and responsibility
c) Focusing on personal financial gain
d) Ignoring environmental impacts

46) **T**he IEEE Code of Ethics is primarily concerned with: _____
a) Fostering professional competence and integrity
b) Protecting corporate secrets
c) Maximizing technological advancements at any cost
d) Developing weapons for defense purposes

47) Global issues in engineering ethics include: _____
a) Cultural differences in engineering practices
b) Lack of understanding between technical and ethical concerns
c) Addressing both local and international engineering challenges
d) All of the above

48) A key challenge faced by multinational corporations is: _____
a) Balancing profits with social and environmental
b) Competing only within their home country responsibilities
c) Focusing solely on domestic issues
d) Ignoring corporate social responsibility

49) Empathy is the ability to: _____
a) Solve problems logically
b) Understand and share the feelings of others
c) Be indifferent to others' emotions
d) Only care about your own well-being

50) The quality of "caring" includes: _____
a) Showing concern for others' well-being
b) Ignoring the needs of others
c) Only helping family and friends
d) Seeking praise for helping others

d) No responsibility toward environmental concerns

6) Environmental ethics primarily deals with: _____
a) Human responsibility to manage the environment and natural resources
b) Minimizing corporate profits
c) Technological advancements in engineering
d) Treating employees equally

7) Which of the following is NOT an example of environmental ethics?
a) Reducing pollution and waste
b) Maximizing resource use regardless of environmental impact
c) Preserving biodiversity
d) Sustainable development

8) Computer ethics involves: _____
a) Programming and coding without considering social consequences
b) Understanding the moral implications of computing technologies
c) Focusing only on technological innovation
d) Ignoring privacy issues

9) Weapons development ethics deals with: _____
a) The development of new technologies to enhance military capabilities
b) Restricting the use of all technological advancements
c) Focusing only on civilian safety
d) Only addressing the legal aspects of weapon development

10) Engineers as managers are expected to: _____
a) Focus solely on technical tasks
b) Lead teams, make strategic decisions, and manage projects
c) Ignore the business aspects of their work
d) Avoid taking responsibility for team outcomes

11) Consulting engineers are hired to: _____
a) Work on projects within the company they are employed
b) Provide expert advice on technical and engineering problems
c) Manage public relations for a company
d) Conduct legal investigations

12) Engineers acting as expert witnesses typically: _____
a) Present evidence and offer testimony in legal cases
b) Focus on public relations during a case
c) Manage engineering projects for legal firms
d) Directly represent the interests of a company in court

13) Sample Code of Ethics of professional organizations typically includes: _____
a) Guidelines for acceptable behavior and decision-making
b) Rules for maximizing profits at any cost
c) Detailed technical specifications for projects
d) Guidelines for political involvement in engineering

14) ASME stands for: _____
a) American Society of Mechanical Engineers
b) American Society of Management Engineers
c) Association of Safety and Mechanical Engineers
d) Association of Scientific and Mechanical Engineers

15) The ASCE Code of Ethics emphasizes: _____
a) Following only local regulations
b) Maintaining professional integrity and responsibility
c) Focusing on personal financial gain
d) Ignoring environmental impacts

16) **T**he IEEE Code of Ethics is primarily concerned with: _____
a) Fostering professional competence and integrity
b) Protecting corporate secrets
c) Maximizing technological advancements at any cost
d) Developing weapons for defense purposes

17) Global issues in engineering ethics include: _____
a) Cultural differences in engineering practices
b) Lack of understanding between technical and ethical concerns
c) Addressing both local and international engineering challenges
d) All of the above

18) A key challenge faced by multinational corporations is: _____
a) Balancing profits with social and environmental
b) Competing only within their home country responsibilities
c) Focusing solely on domestic issues
d) Ignoring corporate social responsibility

19) Empathy is the ability to: _____
a) Solve problems logically
b) Understand and share the feelings of others
c) Be indifferent to others' emotions
d) Only care about your own well-being

20) The quality of "caring" includes: _____
a) Showing concern for others' well-being
b) Ignoring the needs of others
c) Only helping family and friends
d) Seeking praise for helping others

21) The primary meaning of "ethics"?
a) Financial management
b) Principles governing the behavior of individuals
c) Rules for social interaction
d) Legal frameworks for business

22) The following is an example of a moral value?
a) Earning money
b) Achieving fame
c) Helping others in need
d) Increasing personal wealth

23) Integrity refers to: _____
a) Working hard at any cost
b) Being honest and having strong moral principles
c) Competing with others
d) Disregarding rules for personal gain

24) The concept of "work ethics" includes: _____
a) The right to leave work early
b) Consistently producing quality work
c) Avoiding all responsibilities
d) Expecting promotions without effort

25) The primary purpose of service learning is _____.
a) Earning money while volunteering
b) Acquiring knowledge through practical experiences
c) Participating in online courses
d) Building a professional career

26) Civic virtue is: _____
a) Attending religious services
b) Demonstrating good behavior and contributing to the welfare of society
c) Building personal wealth
d) Following family traditions

27) The following is an example of "respect for others" is _____.
a) Ignoring people's opinions
b) Listening attentively to others and valuing their viewpoints
c) Interrupting others in conversations
d) Arguing to prove your point

28) Living peacefully involves: _____
a) Suppressing all emotions
b) Treating others with kindness and understanding
c) Avoiding any conflict
d) Always agreeing with others

29) The value of "caring" means: _____
a) Always focusing on personal success
b) Showing concern and compassion for others
c) Ignoring the needs of others
d) Only helping when there is a reward

30) Honesty is best defined as: _____
a) Telling the truth regardless of the consequences
b) Saying only what others want to hear
c) Keeping secrets for friends
d) Telling lies to avoid conflict

31) According to Kohlberg's theory, the highest stage of moral development is: _____
a) Obedience and punishment orientation
b) Conventional morality
c) Post-conventional morality
d) Self-interest orientation

32) Which of the following is a key characteristic of Gilligan's moral development theory?
a) Emphasis on justice and rights
b) Focus on the value of relationships and care
c) Focus on maximizing personal gain
d) Belief that all moral issues are universal and objective

33) Which of the following models of professional roles emphasizes the engineer's responsibility to society and the public welfare?
a) The Engineer as Technocrat
b) The Engineer as Contractor
c) The Engineer as Guardian
d) The Engineer as Entrepreneur

34) Which theory of moral development emphasizes the importance of care and relationships, particularly for women?
a) Kohlberg's theory
b) Aristotle's virtue ethics
c) Gilligan's theory
d) Rawls' theory of justice

35) Which model of professional role in engineering sees the engineer as a neutral expert, focused only on technical competence without concern for social values?
a) The Engineer as Guardian
b) The Engineer as Technocrat
c) The Engineer as Entrepreneur
d) The Engineer as Contractor

36) Which ethical theory suggests that individuals should act in ways that maximize their own happiness and well-being?

a) Deontological ethics b) Utilitarianism
c) Ethical egoism d) Virtue ethics

37) The concept of "professional ethics" in engineering involves: _____

a) The personal beliefs of engineers
b) The specific ethical standards and principles set by professional organizations
c) The opinions of senior management
d) The religious views of the engineers

38) In engineering ethics, a "conflict of interest" occurs when: _____

a) Engineers prioritize their personal interests over their professional duties
b) Engineers follow the orders of their superiors without question
c) Engineers act in ways that promote the well-being of society
d) Engineers make decisions based solely on technical expertise

39) In engineering ethics, what is the purpose of "risk assessment"?

a) To identify and mitigate potential dangers and harm to society
b) To increase profits and minimize costs
c) To ensure that engineers do not make mistakes
d) To promote the engineer's personal career advancement

40) What does "ethical responsibility" in engineering imply?

a) Only following orders from superiors
b) Making decisions that benefit only the company
c) Balancing technical, legal, and moral considerations to ensure public safety and well-being
d) Prioritizing efficiency over quality

41) Safety and risk primarily deal with: _____

a) Managing hazards and assessing potential harm
b) Legal contracts
c) Maximizing productivity
d) Reducing work hours

42) Risk-benefit analysis involves: _____

a) Estimating the cost of a project
b) Evaluating potential risks against possible benefits
c) Managing legal liabilities
d) Defining workplace responsibilities

43) The Chernobyl disaster is an example of: _____

a) A technological breakthrough
b) An ethical failure in managing risks
c) A successful safety protocol implementation
d) An engineering success

44) Which of the following is a key factor in assessing safety and risk?
a) The cost of implementation
b) The likelihood and impact of potential hazards
c) The speed of technology adoption
d) The market demand for a product

45) The Three Mile Island incident was caused by: _____
a) Technological failure
b) Natural disasters
c) Lack of training for engineers
d) Poor risk assessment and safety protocol failures

46) Collegiality in a professional setting refers to: _____
a) Loyalty to your employer
b) Cooperation and mutual respect among colleagues
c) Competing for individual success
d) Avoiding work conflicts

47) Professional loyalty involves: _____
a) Reporting colleagues' mistakes publicly
b) Protecting the interests of the team or organization
c) Ignoring safety violations to avoid
d) Disclosing confidential information for personal conflict gain

48) Employee rights include: _____
a) The right to work without discrimination
b) The right to disregard company policies
c) The right to personal opinion but not affecting work
d) The right to ignore workplace safety standards

49) Intellectual Property Rights (IPR) protect: _____
a) The financial interests of corporations
b) The ownership and use of creative ideas and inventions
c) The physical assets of a company
d) Workplace performance evaluations

50) *Risk assessment* is important because it helps in: _____
a) Evaluating the potential impact of hazards on health and safety
b) Minimizing workplace productivity
c) Defining job roles
d) Ignoring environmental issues

Answer

Q.1 Choose the correct alternatives from the options.

1) According to Kohlberg's theory, the highest stage of moral development is: _____
a) Obedience and punishment orientation
b) Conventional morality
c) Post-conventional morality
d) Self-interest orientation

2) Which of the following is a key characteristic of Gilligan's moral development theory?
a) Emphasis on justice and rights
b) Focus on the value of relationships and care
c) Focus on maximizing personal gain
d) Belief that all moral issues are universal and objective

3) Which of the following models of professional roles emphasizes the engineer’s responsibility to society and the public welfare?
a) The Engineer as Technocrat
b) The Engineer as Contractor
c) The Engineer as Guardian
d) The Engineer as Entrepreneur

4) Which theory of moral development emphasizes the importance of care and relationships, particularly for women?
a) Kohlberg's theory b) Aristotle's virtue ethics
c) Gilligan's theory d) Rawls' theory of justice

5) Which model of professional role in engineering sees the engineer as a neutral expert, focused only on technical competence without concern for social values?

a) The Engineer as Guardian
b) The Engineer as Technocrat
c) The Engineer as Entrepreneur
d) The Engineer as Contractor

6) Which ethical theory suggests that individuals should act in ways that maximize their own happiness and well-being?

a) Deontological ethics
b) Utilitarianism
c) Ethical egoism
d) Virtue ethics

7) The concept of "professional ethics" in engineering involves: _____

a) The personal beliefs of engineers
b) The specific ethical standards and principles set by professional organizations
c) The opinions of senior management
d) The religious views of the engineers

8) In engineering ethics, a "conflict of interest" occurs when: _____

a) Engineers prioritize their personal interests over their professional duties
b) Engineers follow the orders of their superiors without question
c) Engineers act in ways that promote the well-being of society
d) Engineers make decisions based solely on technical expertise

9) In engineering ethics, what is the purpose of "risk assessment"?

a) To identify and mitigate potential dangers and harm to society
b) To increase profits and minimize costs
c) To ensure that engineers do not make mistakes
d) To promote the engineer's personal career advancement

10) What does "ethical responsibility" in engineering imply?

a) Only following orders from superiors
b) Making decisions that benefit only the company
c) Balancing technical, legal, and moral considerations to ensure public safety and well-being
d) Prioritizing efficiency over quality

11) Safety and risk primarily deal with: _____

a) Managing hazards and assessing potential harm
b) Legal contracts
c) Maximizing productivity
d) Reducing work hours

12) Risk-benefit analysis involves: _____
a) Estimating the cost of a project
b) Evaluating potential risks against possible benefits
c) Managing legal liabilities
d) Defining workplace responsibilities

13) The Chernobyl disaster is an example of: _____
a) A technological breakthrough
b) An ethical failure in managing risks
c) A successful safety protocol implementation
d) An engineering success

14) Which of the following is a key factor in assessing safety and risk?
a) The cost of implementation
b) The likelihood and impact of potential hazards
c) The speed of technology adoption
d) The market demand for a product

15) The Three Mile Island incident was caused by: _____
a) Technological failure
b) Natural disasters
c) Lack of training for engineers
d) Poor risk assessment and safety protocol failures

16) Collegiality in a professional setting refers to: _____
a) Loyalty to your employer
b) Cooperation and mutual respect among colleagues
c) Competing for individual success
d) Avoiding work conflicts

17) Professional loyalty involves: _____
a) Reporting colleagues' mistakes publicly
b) Protecting the interests of the team or organization
c) Ignoring safety violations to avoid
d) Disclosing confidential information for personal conflict gain

18) Employee rights include: _____
a) The right to work without discrimination
b) The right to disregard company policies
c) The right to personal opinion but not affecting work
d) The right to ignore workplace safety standards

19) Intellectual Property Rights (IPR) protect: _____
a) The financial interests of corporations
b) The ownership and use of creative ideas and inventions
c) The physical assets of a company
d) Workplace performance evaluations

20) *Risk assessment* is important because it helps in: _____
a) Evaluating the potential impact of hazards on health and safety
b) Minimizing workplace productivity
c) Defining job roles
d) Ignoring environmental issues

21) In risk management, mitigation strategies aim to: _____
a) Accept all risks in the workplace
b) Reduce or eliminate identified risks
c) Increase the likelihood of hazards
d) Focus only on maximizing profits

22) Which of the following is a potential consequence of *occupational crime*?
a) Increased workplace productivity
b) Legal consequences and loss of reputation
c) Improvement in company safety standards
d) Higher employee satisfaction

23) Risk reduction in engineering refers to: _____
a) Implementing measures to lower the chances of accidents
b) Increasing the number of hazards in the work environment
c) Ignoring potential risks
d) Cutting costs by removing safety measures

24) Public safety regulations are primarily designed to: _____
a) Ensure the safety of the company's assets
b) Protect the general public from potential harm
c) Increase revenue for the government
d) Focus only on preventing natural disasters

25) Multinational corporations (MNCs) are characterized by: _____
a) Operations in multiple countries with a centralized headquarters
b) Operating only in their home country
c) Limited influence on global markets
d) No responsibility toward environmental concerns

26) Environmental ethics primarily deals with: _____
a) Human responsibility to manage the environment and natural resources
b) Minimizing corporate profits
c) Technological advancements in engineering
d) Treating employees equally

27) Which of the following is NOT an example of environmental ethics?
a) Reducing pollution and waste
b) Maximizing resource use regardless of environmental impact
c) Preserving biodiversity
d) Sustainable development

28) Computer ethics involves: _____
a) Programming and coding without considering social consequences
b) Understanding the moral implications of computing technologies
c) Focusing only on technological innovation
d) Ignoring privacy issues

29) Weapons development ethics deals with: _____
a) The development of new technologies to enhance military capabilities
b) Restricting the use of all technological advancements
c) Focusing only on civilian safety
d) Only addressing the legal aspects of weapon development

30) Engineers as managers are expected to: _____
a) Focus solely on technical tasks
b) Lead teams, make strategic decisions, and manage projects
c) Ignore the business aspects of their work
d) Avoid taking responsibility for team outcomes

31) Consulting engineers are hired to: _____
a) Work on projects within the company they are employed
b) Provide expert advice on technical and engineering problems
c) Manage public relations for a company
d) Conduct legal investigations

32) Engineers acting as expert witnesses typically: _____
a) Present evidence and offer testimony in legal cases
b) Focus on public relations during a case
c) Manage engineering projects for legal firms
d) Directly represent the interests of a company in court

33) Sample Code of Ethics of professional organizations typically includes: _____
a) Guidelines for acceptable behavior and decision-making
b) Rules for maximizing profits at any cost
c) Detailed technical specifications for projects
d) Guidelines for political involvement in engineering

34) ASME stands for: _____
a) American Society of Mechanical Engineers
b) American Society of Management Engineers
c) Association of Safety and Mechanical Engineers
d) Association of Scientific and Mechanical Engineers

35) The ASCE Code of Ethics emphasizes: _____
a) Following only local regulations
b) Maintaining professional integrity and responsibility
c) Focusing on personal financial gain
d) Ignoring environmental impacts

36) **T**he IEEE Code of Ethics is primarily concerned with: _____
a) Fostering professional competence and integrity
b) Protecting corporate secrets
c) Maximizing technological advancements at any cost
d) Developing weapons for defense purposes

37) Global issues in engineering ethics include: _____
a) Cultural differences in engineering practices
b) Lack of understanding between technical and ethical concerns
c) Addressing both local and international engineering challenges
d) All of the above

38) A key challenge faced by multinational corporations is: _____
a) Balancing profits with social and environmental
b) Competing only within their home country responsibilities
c) Focusing solely on domestic issues
d) Ignoring corporate social responsibility

39) Empathy is the ability to: _____
a) Solve problems logically
b) Understand and share the feelings of others
c) Be indifferent to others' emotions
d) Only care about your own well-being

40) The quality of "caring" includes: _____
a) Showing concern for others' well-being
b) Ignoring the needs of others
c) Only helping family and friends
d) Seeking praise for helping others

41) The primary meaning of "ethics"?
a) Financial management
b) Principles governing the behavior of individuals
c) Rules for social interaction
d) Legal frameworks for business

42) The following is an example of a moral value?

a) Earning money b) Achieving fame
c) Helping others in need d) Increasing personal wealth

43) Integrity refers to: _____

a) Working hard at any cost
b) Being honest and having strong moral principles
c) Competing with others
d) Disregarding rules for personal gain

44) The concept of "work ethics" includes: _____

a) The right to leave work early
b) Consistently producing quality work
c) Avoiding all responsibilities
d) Expecting promotions without effort

45) The primary purpose of service learning is _____.

a) Earning money while volunteering
b) Acquiring knowledge through practical experiences
c) Participating in online courses
d) Building a professional career

46) Civic virtue is: _____

a) Attending religious services
b) Demonstrating good behavior and contributing to the welfare of society
c) Building personal wealth
d) Following family traditions

47) The following is an example of "respect for others" is _____.

a) Ignoring people's opinions
b) Listening attentively to others and valuing their viewpoints
c) Interrupting others in conversations
d) Arguing to prove your point

48) Living peacefully involves: _____

a) Suppressing all emotions
b) Treating others with kindness and understanding
c) Avoiding any conflict
d) Always agreeing with others

49) The value of "caring" means: _____

a) Always focusing on personal success
b) Showing concern and compassion for others
c) Ignoring the needs of others
d) Only helping when there is a reward

50) Honesty is best defined as: _____

a) Telling the truth regardless of the consequences
b) Saying only what others want to hear
c) Keeping secrets for friends
d) Telling lies to avoid conflict

Professional Ethics (VEC-02)

Day & Date: Wednesday, 11-06-2025 Max. Marks: 50
Time: 10:00 AM To 11:30 AM

Instructions: 1) All questions are compulsory.
2) Figures to the right indicate full marks.
3) Mention Question Paper Set (P/Q/R/S) on Top of Page.

Answer

Q.1 Choose the correct alternatives from the options.

1) Consulting engineers are hired to: _____
a) Work on projects within the company they are employed
b) Provide expert advice on technical and engineering problems
c) Manage public relations for a company
d) Conduct legal investigations

2) Engineers acting as expert witnesses typically: _____
a) Present evidence and offer testimony in legal cases
b) Focus on public relations during a case
c) Manage engineering projects for legal firms
d) Directly represent the interests of a company in court

3) Sample Code of Ethics of professional organizations typically includes: _____
a) Guidelines for acceptable behavior and decision-making
b) Rules for maximizing profits at any cost
c) Detailed technical specifications for projects
d) Guidelines for political involvement in engineering

4) ASME stands for: _____
a) American Society of Mechanical Engineers
b) American Society of Management Engineers
c) Association of Safety and Mechanical Engineers
d) Association of Scientific and Mechanical Engineers

5) The ASCE Code of Ethics emphasizes: _____
a) Following only local regulations
b) Maintaining professional integrity and responsibility
c) Focusing on personal financial gain
d) Ignoring environmental impacts

6) **T**he IEEE Code of Ethics is primarily concerned with: _____
a) Fostering professional competence and integrity
b) Protecting corporate secrets
c) Maximizing technological advancements at any cost
d) Developing weapons for defense purposes

7) Global issues in engineering ethics include: _____
a) Cultural differences in engineering practices
b) Lack of understanding between technical and ethical concerns
c) Addressing both local and international engineering challenges
d) All of the above

8) A key challenge faced by multinational corporations is: _____
a) Balancing profits with social and environmental
b) Competing only within their home country responsibilities
c) Focusing solely on domestic issues
d) Ignoring corporate social responsibility

9) Empathy is the ability to: _____
a) Solve problems logically
b) Understand and share the feelings of others
c) Be indifferent to others' emotions
d) Only care about your own well-being

10) The quality of "caring" includes: _____
a) Showing concern for others' well-being
b) Ignoring the needs of others
c) Only helping family and friends
d) Seeking praise for helping others

11) The primary meaning of "ethics"?
a) Financial management
b) Principles governing the behavior of individuals
c) Rules for social interaction
d) Legal frameworks for business

12) The following is an example of a moral value?
a) Earning money
b) Achieving fame
c) Helping others in need
d) Increasing personal wealth

13) Integrity refers to: _____
a) Working hard at any cost
b) Being honest and having strong moral principles
c) Competing with others
d) Disregarding rules for personal gain

14) The concept of "work ethics" includes: _____
a) The right to leave work early
b) Consistently producing quality work
c) Avoiding all responsibilities
d) Expecting promotions without effort

15) The primary purpose of service learning is _____.
a) Earning money while volunteering
b) Acquiring knowledge through practical experiences
c) Participating in online courses
d) Building a professional career

16) Civic virtue is: _____
a) Attending religious services
b) Demonstrating good behavior and contributing to the welfare of society
c) Building personal wealth
d) Following family traditions

17) The following is an example of "respect for others" is _____.
a) Ignoring people's opinions
b) Listening attentively to others and valuing their viewpoints
c) Interrupting others in conversations
d) Arguing to prove your point

18) Living peacefully involves: _____
a) Suppressing all emotions
b) Treating others with kindness and understanding
c) Avoiding any conflict
d) Always agreeing with others

19) The value of "caring" means: _____
a) Always focusing on personal success
b) Showing concern and compassion for others
c) Ignoring the needs of others
d) Only helping when there is a reward

20) Honesty is best defined as: _____
a) Telling the truth regardless of the consequences
b) Saying only what others want to hear
c) Keeping secrets for friends
d) Telling lies to avoid conflict

21) According to Kohlberg's theory, the highest stage of moral development is: _____

a) Obedience and punishment orientation
b) Conventional morality
c) Post-conventional morality
d) Self-interest orientation

22) Which of the following is a key characteristic of Gilligan's moral development theory?

a) Emphasis on justice and rights
b) Focus on the value of relationships and care
c) Focus on maximizing personal gain
d) Belief that all moral issues are universal and objective

23) Which of the following models of professional roles emphasizes the engineer's responsibility to society and the public welfare?

a) The Engineer as Technocrat
b) The Engineer as Contractor
c) The Engineer as Guardian
d) The Engineer as Entrepreneur

24) Which theory of moral development emphasizes the importance of care and relationships, particularly for women?

a) Kohlberg's theory
b) Aristotle's virtue ethics
c) Gilligan's theory
d) Rawls' theory of justice

25) Which model of professional role in engineering sees the engineer as a neutral expert, focused only on technical competence without concern for social values?

a) The Engineer as Guardian
b) The Engineer as Technocrat
c) The Engineer as Entrepreneur
d) The Engineer as Contractor

26) Which ethical theory suggests that individuals should act in ways that maximize their own happiness and well-being?

a) Deontological ethics
b) Utilitarianism
c) Ethical egoism
d) Virtue ethics

27) The concept of "professional ethics" in engineering involves: _____

a) The personal beliefs of engineers
b) The specific ethical standards and principles set by professional organizations
c) The opinions of senior management
d) The religious views of the engineers

28) In engineering ethics, a "conflict of interest" occurs when: _____
a) Engineers prioritize their personal interests over their professional duties
b) Engineers follow the orders of their superiors without question
c) Engineers act in ways that promote the well-being of society
d) Engineers make decisions based solely on technical expertise

29) In engineering ethics, what is the purpose of "risk assessment"?
a) To identify and mitigate potential dangers and harm to society
b) To increase profits and minimize costs
c) To ensure that engineers do not make mistakes
d) To promote the engineer's personal career advancement

30) What does "ethical responsibility" in engineering imply?
a) Only following orders from superiors
b) Making decisions that benefit only the company
c) Balancing technical, legal, and moral considerations to ensure public safety and well-being
d) Prioritizing efficiency over quality

31) Safety and risk primarily deal with: _____
a) Managing hazards and assessing potential harm
b) Legal contracts
c) Maximizing productivity
d) Reducing work hours

32) Risk-benefit analysis involves: _____
a) Estimating the cost of a project
b) Evaluating potential risks against possible benefits
c) Managing legal liabilities
d) Defining workplace responsibilities

33) The Chernobyl disaster is an example of: _____
a) A technological breakthrough
b) An ethical failure in managing risks
c) A successful safety protocol implementation
d) An engineering success

34) Which of the following is a key factor in assessing safety and risk?
a) The cost of implementation
b) The likelihood and impact of potential hazards
c) The speed of technology adoption
d) The market demand for a product

35) The Three Mile Island incident was caused by: _____
a) Technological failure
b) Natural disasters
c) Lack of training for engineers
d) Poor risk assessment and safety protocol failures

36) Collegiality in a professional setting refers to: _____
a) Loyalty to your employer
b) Cooperation and mutual respect among colleagues
c) Competing for individual success
d) Avoiding work conflicts

37) Professional loyalty involves: _____
a) Reporting colleagues' mistakes publicly
b) Protecting the interests of the team or organization
c) Ignoring safety violations to avoid
d) Disclosing confidential information for personal conflict gain

38) Employee rights include: _____
a) The right to work without discrimination
b) The right to disregard company policies
c) The right to personal opinion but not affecting work
d) The right to ignore workplace safety standards

39) Intellectual Property Rights (IPR) protect: _____
a) The financial interests of corporations
b) The ownership and use of creative ideas and inventions
c) The physical assets of a company
d) Workplace performance evaluations

40) *Risk assessment* is important because it helps in: _____
a) Evaluating the potential impact of hazards on health and safety
b) Minimizing workplace productivity
c) Defining job roles
d) Ignoring environmental issues

41) In risk management, mitigation strategies aim to: _____
a) Accept all risks in the workplace
b) Reduce or eliminate identified risks
c) Increase the likelihood of hazards
d) Focus only on maximizing profits

42) Which of the following is a potential consequence of *occupational crime*?
a) Increased workplace productivity
b) Legal consequences and loss of reputation
c) Improvement in company safety standards
d) Higher employee satisfaction

43) Risk reduction in engineering refers to: _____
a) Implementing measures to lower the chances of accidents
b) Increasing the number of hazards in the work environment
c) Ignoring potential risks
d) Cutting costs by removing safety measures

44) Public safety regulations are primarily designed to: _____
a) Ensure the safety of the company's assets
b) Protect the general public from potential harm
c) Increase revenue for the government
d) Focus only on preventing natural disasters

45) Multinational corporations (MNCs) are characterized by: _____
a) Operations in multiple countries with a centralized headquarters
b) Operating only in their home country
c) Limited influence on global markets
d) No responsibility toward environmental concerns

46) Environmental ethics primarily deals with: _____
a) Human responsibility to manage the environment and natural resources
b) Minimizing corporate profits
c) Technological advancements in engineering
d) Treating employees equally

47) Which of the following is NOT an example of environmental ethics?
a) Reducing pollution and waste
b) Maximizing resource use regardless of environmental impact
c) Preserving biodiversity
d) Sustainable development

48) Computer ethics involves: _____
a) Programming and coding without considering social consequences
b) Understanding the moral implications of computing technologies
c) Focusing only on technological innovation
d) Ignoring privacy issues

49) Weapons development ethics deals with: _____
a) The development of new technologies to enhance military capabilities
b) Restricting the use of all technological advancements
c) Focusing only on civilian safety
d) Only addressing the legal aspects of weapon development

50) Engineers as managers are expected to: _____
a) Focus solely on technical tasks
b) Lead teams, make strategic decisions, and manage projects
c) Ignore the business aspects of their work
d) Avoid taking responsibility for team outcomes

Answer

Q.1 Choose the correct alternatives from the options.

1) The primary meaning of "ethics"?
a) Financial management
b) Principles governing the behavior of individuals
c) Rules for social interaction
d) Legal frameworks for business

2) The following is an example of a moral value?
a) Earning money b) Achieving fame
c) Helping others in need d) Increasing personal wealth

3) Integrity refers to: _____
a) Working hard at any cost
b) Being honest and having strong moral principles
c) Competing with others
d) Disregarding rules for personal gain

4) The concept of "work ethics" includes: _____
a) The right to leave work early
b) Consistently producing quality work
c) Avoiding all responsibilities
d) Expecting promotions without effort

5) The primary purpose of service learning is _____.
a) Earning money while volunteering
b) Acquiring knowledge through practical experiences
c) Participating in online courses
d) Building a professional career

6) Civic virtue is: _____
a) Attending religious services
b) Demonstrating good behavior and contributing to the welfare of society
c) Building personal wealth
d) Following family traditions

7) The following is an example of "respect for others" is _____.
a) Ignoring people's opinions
b) Listening attentively to others and valuing their viewpoints
c) Interrupting others in conversations
d) Arguing to prove your point

8) Living peacefully involves: _____
a) Suppressing all emotions
b) Treating others with kindness and understanding
c) Avoiding any conflict
d) Always agreeing with others

9) The value of "caring" means: _____
a) Always focusing on personal success
b) Showing concern and compassion for others
c) Ignoring the needs of others
d) Only helping when there is a reward

10) Honesty is best defined as: _____
a) Telling the truth regardless of the consequences
b) Saying only what others want to hear
c) Keeping secrets for friends
d) Telling lies to avoid conflict

11) According to Kohlberg's theory, the highest stage of moral development is: _____
a) Obedience and punishment orientation
b) Conventional morality
c) Post-conventional morality
d) Self-interest orientation

12) Which of the following is a key characteristic of Gilligan's moral development theory?
a) Emphasis on justice and rights
b) Focus on the value of relationships and care
c) Focus on maximizing personal gain
d) Belief that all moral issues are universal and objective

13) Which of the following models of professional roles emphasizes the engineer's responsibility to society and the public welfare?

a) The Engineer as Technocrat
b) The Engineer as Contractor
c) The Engineer as Guardian
d) The Engineer as Entrepreneur

14) Which theory of moral development emphasizes the importance of care and relationships, particularly for women?

a) Kohlberg's theory
b) Aristotle's virtue ethics
c) Gilligan's theory
d) Rawls' theory of justice

15) Which model of professional role in engineering sees the engineer as a neutral expert, focused only on technical competence without concern for social values?

a) The Engineer as Guardian
b) The Engineer as Technocrat
c) The Engineer as Entrepreneur
d) The Engineer as Contractor

16) Which ethical theory suggests that individuals should act in ways that maximize their own happiness and well-being?

a) Deontological ethics
b) Utilitarianism
c) Ethical egoism
d) Virtue ethics

17) The concept of "professional ethics" in engineering involves: _____

a) The personal beliefs of engineers
b) The specific ethical standards and principles set by professional organizations
c) The opinions of senior management
d) The religious views of the engineers

18) In engineering ethics, a "conflict of interest" occurs when: _____

a) Engineers prioritize their personal interests over their professional duties
b) Engineers follow the orders of their superiors without question
c) Engineers act in ways that promote the well-being of society
d) Engineers make decisions based solely on technical expertise

19) In engineering ethics, what is the purpose of "risk assessment"?

a) To identify and mitigate potential dangers and harm to society
b) To increase profits and minimize costs
c) To ensure that engineers do not make mistakes
d) To promote the engineer's personal career advancement

20) What does "ethical responsibility" in engineering imply?
a) Only following orders from superiors
b) Making decisions that benefit only the company
c) Balancing technical, legal, and moral considerations to ensure public safety and well-being
d) Prioritizing efficiency over quality

21) Safety and risk primarily deal with: _____
a) Managing hazards and assessing potential harm
b) Legal contracts
c) Maximizing productivity
d) Reducing work hours

22) Risk-benefit analysis involves: _____
a) Estimating the cost of a project
b) Evaluating potential risks against possible benefits
c) Managing legal liabilities
d) Defining workplace responsibilities

23) The Chernobyl disaster is an example of: _____
a) A technological breakthrough
b) An ethical failure in managing risks
c) A successful safety protocol implementation
d) An engineering success

24) Which of the following is a key factor in assessing safety and risk?
a) The cost of implementation
b) The likelihood and impact of potential hazards
c) The speed of technology adoption
d) The market demand for a product

25) The Three Mile Island incident was caused by: _____
a) Technological failure
b) Natural disasters
c) Lack of training for engineers
d) Poor risk assessment and safety protocol failures

26) Collegiality in a professional setting refers to: _____
a) Loyalty to your employer
b) Cooperation and mutual respect among colleagues
c) Competing for individual success
d) Avoiding work conflicts

27) Professional loyalty involves: _____
a) Reporting colleagues' mistakes publicly
b) Protecting the interests of the team or organization
c) Ignoring safety violations to avoid
d) Disclosing confidential information for personal conflict gain

28) Employee rights include: _____
a) The right to work without discrimination
b) The right to disregard company policies
c) The right to personal opinion but not affecting work
d) The right to ignore workplace safety standards

29) Intellectual Property Rights (IPR) protect: _____
a) The financial interests of corporations
b) The ownership and use of creative ideas and inventions
c) The physical assets of a company
d) Workplace performance evaluations

30) *Risk assessment* is important because it helps in: _____
a) Evaluating the potential impact of hazards on health and safety
b) Minimizing workplace productivity
c) Defining job roles
d) Ignoring environmental issues

31) In risk management, mitigation strategies aim to: _____
a) Accept all risks in the workplace
b) Reduce or eliminate identified risks
c) Increase the likelihood of hazards
d) Focus only on maximizing profits

32) Which of the following is a potential consequence of *occupational crime*?
a) Increased workplace productivity
b) Legal consequences and loss of reputation
c) Improvement in company safety standards
d) Higher employee satisfaction

33) Risk reduction in engineering refers to: _____
a) Implementing measures to lower the chances of accidents
b) Increasing the number of hazards in the work environment
c) Ignoring potential risks
d) Cutting costs by removing safety measures

34) Public safety regulations are primarily designed to: _____
a) Ensure the safety of the company's assets
b) Protect the general public from potential harm
c) Increase revenue for the government
d) Focus only on preventing natural disasters

35) Multinational corporations (MNCs) are characterized by: _____
a) Operations in multiple countries with a centralized headquarters
b) Operating only in their home country
c) Limited influence on global markets
d) No responsibility toward environmental concerns

36) Environmental ethics primarily deals with: _____
a) Human responsibility to manage the environment and natural resources
b) Minimizing corporate profits
c) Technological advancements in engineering
d) Treating employees equally

37) Which of the following is NOT an example of environmental ethics?
a) Reducing pollution and waste
b) Maximizing resource use regardless of environmental impact
c) Preserving biodiversity
d) Sustainable development

38) Computer ethics involves: _____
a) Programming and coding without considering social consequences
b) Understanding the moral implications of computing technologies
c) Focusing only on technological innovation
d) Ignoring privacy issues

39) Weapons development ethics deals with: _____
a) The development of new technologies to enhance military capabilities
b) Restricting the use of all technological advancements
c) Focusing only on civilian safety
d) Only addressing the legal aspects of weapon development

40) Engineers as managers are expected to: _____
a) Focus solely on technical tasks
b) Lead teams, make strategic decisions, and manage projects
c) Ignore the business aspects of their work
d) Avoid taking responsibility for team outcomes

41) Consulting engineers are hired to: _____
a) Work on projects within the company they are employed
b) Provide expert advice on technical and engineering problems
c) Manage public relations for a company
d) Conduct legal investigations

42) Engineers acting as expert witnesses typically: _____
a) Present evidence and offer testimony in legal cases
b) Focus on public relations during a case
c) Manage engineering projects for legal firms
d) Directly represent the interests of a company in court

43) Sample Code of Ethics of professional organizations typically includes: _____
a) Guidelines for acceptable behavior and decision-making
b) Rules for maximizing profits at any cost
c) Detailed technical specifications for projects
d) Guidelines for political involvement in engineering

44) ASME stands for: _____
a) American Society of Mechanical Engineers
b) American Society of Management Engineers
c) Association of Safety and Mechanical Engineers
d) Association of Scientific and Mechanical Engineers

45) The ASCE Code of Ethics emphasizes: _____
a) Following only local regulations
b) Maintaining professional integrity and responsibility
c) Focusing on personal financial gain
d) Ignoring environmental impacts

46) **T**he IEEE Code of Ethics is primarily concerned with: _____
a) Fostering professional competence and integrity
b) Protecting corporate secrets
c) Maximizing technological advancements at any cost
d) Developing weapons for defense purposes

47) Global issues in engineering ethics include: _____
a) Cultural differences in engineering practices
b) Lack of understanding between technical and ethical concerns
c) Addressing both local and international engineering challenges
d) All of the above

48) A key challenge faced by multinational corporations is: _____
a) Balancing profits with social and environmental
b) Competing only within their home country responsibilities
c) Focusing solely on domestic issues
d) Ignoring corporate social responsibility

49) Empathy is the ability to: _____
a) Solve problems logically
b) Understand and share the feelings of others
c) Be indifferent to others' emotions
d) Only care about your own well-being

50) The quality of "caring" includes: _____
a) Showing concern for others' well-being
b) Ignoring the needs of others
c) Only helping family and friends
d) Seeking praise for helping others

a) Solve problems logically
b) Understand and share the feelings of others
c) Be indifferent to others' emotions
d) Only care about your own well-being

20) The quality of "caring" includes: _____
a) Showing concern for others' well-being
b) Ignoring the needs of others
c) Only helping family and friends
d) Seeking praise for helping others

21) The primary meaning of "ethics"?
a) Financial management
b) Principles governing the behavior of individuals
c) Rules for social interaction
d) Legal frameworks for business

22) The following is an example of a moral value?
a) Earning money
b) Achieving fame
c) Helping others in need
d) Increasing personal wealth

23) Integrity refers to: _____
a) Working hard at any cost
b) Being honest and having strong moral principles
c) Competing with others
d) Disregarding rules for personal gain

24) The concept of "work ethics" includes: _____
a) The right to leave work early
b) Consistently producing quality work
c) Avoiding all responsibilities
d) Expecting promotions without effort

25) The primary purpose of service learning is _____.
a) Earning money while volunteering
b) Acquiring knowledge through practical experiences
c) Participating in online courses
d) Building a professional career

26) Civic virtue is: _____
a) Attending religious services
b) Demonstrating good behavior and contributing to the welfare of society
c) Building personal wealth
d) Following family traditions

27) The following is an example of "respect for others" is _____.
a) Ignoring people's opinions
b) Listening attentively to others and valuing their viewpoints
c) Interrupting others in conversations
d) Arguing to prove your point

28) Living peacefully involves: _____
a) Suppressing all emotions
b) Treating others with kindness and understanding
c) Avoiding any conflict
d) Always agreeing with others

29) The value of "caring" means: _____
a) Always focusing on personal success
b) Showing concern and compassion for others
c) Ignoring the needs of others
d) Only helping when there is a reward

30) Honesty is best defined as: _____
a) Telling the truth regardless of the consequences
b) Saying only what others want to hear
c) Keeping secrets for friends
d) Telling lies to avoid conflict

31) According to Kohlberg's theory, the highest stage of moral development is: _____
a) Obedience and punishment orientation
b) Conventional morality
c) Post-conventional morality
d) Self-interest orientation

32) Which of the following is a key characteristic of Gilligan's moral development theory?
a) Emphasis on justice and rights
b) Focus on the value of relationships and care
c) Focus on maximizing personal gain
d) Belief that all moral issues are universal and objective

33) Which of the following models of professional roles emphasizes the engineer's responsibility to society and the public welfare?
a) The Engineer as Technocrat
b) The Engineer as Contractor
c) The Engineer as Guardian
d) The Engineer as Entrepreneur

34) Which theory of moral development emphasizes the importance of care and relationships, particularly for women?
a) Kohlberg's theory
b) Aristotle's virtue ethics
c) Gilligan's theory
d) Rawls' theory of justice

35) Which model of professional role in engineering sees the engineer as a neutral expert, focused only on technical competence without concern for social values?
a) The Engineer as Guardian
b) The Engineer as Technocrat
c) The Engineer as Entrepreneur
d) The Engineer as Contractor

36) Which ethical theory suggests that individuals should act in ways that maximize their own happiness and well-being?

a) Deontological ethics b) Utilitarianism
c) Ethical egoism d) Virtue ethics

37) The concept of "professional ethics" in engineering involves: _____

a) The personal beliefs of engineers
b) The specific ethical standards and principles set by professional organizations
c) The opinions of senior management
d) The religious views of the engineers

38) In engineering ethics, a "conflict of interest" occurs when: _____

a) Engineers prioritize their personal interests over their professional duties
b) Engineers follow the orders of their superiors without question
c) Engineers act in ways that promote the well-being of society
d) Engineers make decisions based solely on technical expertise

39) In engineering ethics, what is the purpose of "risk assessment"?

a) To identify and mitigate potential dangers and harm to society
b) To increase profits and minimize costs
c) To ensure that engineers do not make mistakes
d) To promote the engineer's personal career advancement

40) What does "ethical responsibility" in engineering imply?

a) Only following orders from superiors
b) Making decisions that benefit only the company
c) Balancing technical, legal, and moral considerations to ensure public safety and well-being
d) Prioritizing efficiency over quality

41) Safety and risk primarily deal with: _____

a) Managing hazards and assessing potential harm
b) Legal contracts
c) Maximizing productivity
d) Reducing work hours

42) Risk-benefit analysis involves: _____

a) Estimating the cost of a project
b) Evaluating potential risks against possible benefits
c) Managing legal liabilities
d) Defining workplace responsibilities

43) The Chernobyl disaster is an example of: _____

a) A technological breakthrough
b) An ethical failure in managing risks
c) A successful safety protocol implementation
d) An engineering success

44) Which of the following is a key factor in assessing safety and risk?
a) The cost of implementation
b) The likelihood and impact of potential hazards
c) The speed of technology adoption
d) The market demand for a product

45) The Three Mile Island incident was caused by: _____
a) Technological failure
b) Natural disasters
c) Lack of training for engineers
d) Poor risk assessment and safety protocol failures

46) Collegiality in a professional setting refers to: _____
a) Loyalty to your employer
b) Cooperation and mutual respect among colleagues
c) Competing for individual success
d) Avoiding work conflicts

47) Professional loyalty involves: _____
a) Reporting colleagues' mistakes publicly
b) Protecting the interests of the team or organization
c) Ignoring safety violations to avoid
d) Disclosing confidential information for personal conflict gain

48) Employee rights include: _____
a) The right to work without discrimination
b) The right to disregard company policies
c) The right to personal opinion but not affecting work
d) The right to ignore workplace safety standards

49) Intellectual Property Rights (IPR) protect: _____
a) The financial interests of corporations
b) The ownership and use of creative ideas and inventions
c) The physical assets of a company
d) Workplace performance evaluations

50) *Risk assessment* is important because it helps in: _____
a) Evaluating the potential impact of hazards on health and safety
b) Minimizing workplace productivity
c) Defining job roles
d) Ignoring environmental issues

COMPUTER SCIENCE AND ENGINEERING
Professional Ethics (VEC-02)

Day & Date: Wednesday, 11-06-2025 Max. Marks: 50
Time: 10:00 AM To 11:30 AM

Instructions: 1) All questions are compulsory.
2) Figures to the right indicate full marks.
3) Mention Question Paper Set (P/Q/R/S) on Top of Page.

Answer

Q.1 Choose the correct alternatives from the options.

1) According to Kohlberg's theory, the highest stage of moral development is: _____
a) Obedience and punishment orientation
b) Conventional morality
c) Post-conventional morality
d) Self-interest orientation

2) Which of the following is a key characteristic of Gilligan's moral development theory?
a) Emphasis on justice and rights
b) Focus on the value of relationships and care
c) Focus on maximizing personal gain
d) Belief that all moral issues are universal and objective

3) Which of the following models of professional roles emphasizes the engineer’s responsibility to society and the public welfare?
a) The Engineer as Technocrat
b) The Engineer as Contractor
c) The Engineer as Guardian
d) The Engineer as Entrepreneur

4) Which theory of moral development emphasizes the importance of care and relationships, particularly for women?
a) Kohlberg's theory b) Aristotle's virtue ethics
c) Gilligan's theory d) Rawls' theory of justice

5) Which model of professional role in engineering sees the engineer as a neutral expert, focused only on technical competence without concern for social values?

a) The Engineer as Guardian
b) The Engineer as Technocrat
c) The Engineer as Entrepreneur
d) The Engineer as Contractor

6) Which ethical theory suggests that individuals should act in ways that maximize their own happiness and well-being?

a) Deontological ethics b) Utilitarianism
c) Ethical egoism d) Virtue ethics

7) The concept of "professional ethics" in engineering involves: _____

a) The personal beliefs of engineers
b) The specific ethical standards and principles set by professional organizations
c) The opinions of senior management
d) The religious views of the engineers

8) In engineering ethics, a "conflict of interest" occurs when: _____

a) Engineers prioritize their personal interests over their professional duties
b) Engineers follow the orders of their superiors without question
c) Engineers act in ways that promote the well-being of society
d) Engineers make decisions based solely on technical expertise

9) In engineering ethics, what is the purpose of "risk assessment"?

a) To identify and mitigate potential dangers and harm to society
b) To increase profits and minimize costs
c) To ensure that engineers do not make mistakes
d) To promote the engineer's personal career advancement

10) What does "ethical responsibility" in engineering imply?

a) Only following orders from superiors
b) Making decisions that benefit only the company
c) Balancing technical, legal, and moral considerations to ensure public safety and well-being
d) Prioritizing efficiency over quality

11) Safety and risk primarily deal with: _____

a) Managing hazards and assessing potential harm
b) Legal contracts
c) Maximizing productivity
d) Reducing work hours

12) Risk-benefit analysis involves: _____
a) Estimating the cost of a project
b) Evaluating potential risks against possible benefits
c) Managing legal liabilities
d) Defining workplace responsibilities

13) The Chernobyl disaster is an example of: _____
a) A technological breakthrough
b) An ethical failure in managing risks
c) A successful safety protocol implementation
d) An engineering success

14) Which of the following is a key factor in assessing safety and risk?
a) The cost of implementation
b) The likelihood and impact of potential hazards
c) The speed of technology adoption
d) The market demand for a product

15) The Three Mile Island incident was caused by: _____
a) Technological failure
b) Natural disasters
c) Lack of training for engineers
d) Poor risk assessment and safety protocol failures

16) Collegiality in a professional setting refers to: _____
a) Loyalty to your employer
b) Cooperation and mutual respect among colleagues
c) Competing for individual success
d) Avoiding work conflicts

17) Professional loyalty involves: _____
a) Reporting colleagues' mistakes publicly
b) Protecting the interests of the team or organization
c) Ignoring safety violations to avoid
d) Disclosing confidential information for personal conflict gain

18) Employee rights include: _____
a) The right to work without discrimination
b) The right to disregard company policies
c) The right to personal opinion but not affecting work
d) The right to ignore workplace safety standards

19) Intellectual Property Rights (IPR) protect: _____
a) The financial interests of corporations
b) The ownership and use of creative ideas and inventions
c) The physical assets of a company
d) Workplace performance evaluations

20) *Risk assessment* is important because it helps in: _____
a) Evaluating the potential impact of hazards on health and safety
b) Minimizing workplace productivity
c) Defining job roles
d) Ignoring environmental issues

21) In risk management, mitigation strategies aim to: _____
a) Accept all risks in the workplace
b) Reduce or eliminate identified risks
c) Increase the likelihood of hazards
d) Focus only on maximizing profits

22) Which of the following is a potential consequence of *occupational crime*?
a) Increased workplace productivity
b) Legal consequences and loss of reputation
c) Improvement in company safety standards
d) Higher employee satisfaction

23) Risk reduction in engineering refers to: _____
a) Implementing measures to lower the chances of accidents
b) Increasing the number of hazards in the work environment
c) Ignoring potential risks
d) Cutting costs by removing safety measures

24) Public safety regulations are primarily designed to: _____
a) Ensure the safety of the company's assets
b) Protect the general public from potential harm
c) Increase revenue for the government
d) Focus only on preventing natural disasters

25) Multinational corporations (MNCs) are characterized by: _____
a) Operations in multiple countries with a centralized headquarters
b) Operating only in their home country
c) Limited influence on global markets
d) No responsibility toward environmental concerns

26) Environmental ethics primarily deals with: _____
a) Human responsibility to manage the environment and natural resources
b) Minimizing corporate profits
c) Technological advancements in engineering
d) Treating employees equally

27) Which of the following is NOT an example of environmental ethics?
a) Reducing pollution and waste
b) Maximizing resource use regardless of environmental impact
c) Preserving biodiversity
d) Sustainable development

28) Computer ethics involves: _____
a) Programming and coding without considering social consequences
b) Understanding the moral implications of computing technologies
c) Focusing only on technological innovation
d) Ignoring privacy issues

29) Weapons development ethics deals with: _____
a) The development of new technologies to enhance military capabilities
b) Restricting the use of all technological advancements
c) Focusing only on civilian safety
d) Only addressing the legal aspects of weapon development

30) Engineers as managers are expected to: _____
a) Focus solely on technical tasks
b) Lead teams, make strategic decisions, and manage projects
c) Ignore the business aspects of their work
d) Avoid taking responsibility for team outcomes

31) Consulting engineers are hired to: _____
a) Work on projects within the company they are employed
b) Provide expert advice on technical and engineering problems
c) Manage public relations for a company
d) Conduct legal investigations

32) Engineers acting as expert witnesses typically: _____
a) Present evidence and offer testimony in legal cases
b) Focus on public relations during a case
c) Manage engineering projects for legal firms
d) Directly represent the interests of a company in court

33) Sample Code of Ethics of professional organizations typically includes: _____
a) Guidelines for acceptable behavior and decision-making
b) Rules for maximizing profits at any cost
c) Detailed technical specifications for projects
d) Guidelines for political involvement in engineering

34) ASME stands for: _____
a) American Society of Mechanical Engineers
b) American Society of Management Engineers
c) Association of Safety and Mechanical Engineers
d) Association of Scientific and Mechanical Engineers

35) The ASCE Code of Ethics emphasizes: _____
a) Following only local regulations
b) Maintaining professional integrity and responsibility
c) Focusing on personal financial gain
d) Ignoring environmental impacts

36) **T**he IEEE Code of Ethics is primarily concerned with: _____
a) Fostering professional competence and integrity
b) Protecting corporate secrets
c) Maximizing technological advancements at any cost
d) Developing weapons for defense purposes

37) Global issues in engineering ethics include: _____
a) Cultural differences in engineering practices
b) Lack of understanding between technical and ethical concerns
c) Addressing both local and international engineering challenges
d) All of the above

38) A key challenge faced by multinational corporations is: _____
a) Balancing profits with social and environmental
b) Competing only within their home country responsibilities
c) Focusing solely on domestic issues
d) Ignoring corporate social responsibility

39) Empathy is the ability to: _____
a) Solve problems logically
b) Understand and share the feelings of others
c) Be indifferent to others' emotions
d) Only care about your own well-being

40) The quality of "caring" includes: _____
a) Showing concern for others' well-being
b) Ignoring the needs of others
c) Only helping family and friends
d) Seeking praise for helping others

41) The primary meaning of "ethics"?
a) Financial management
b) Principles governing the behavior of individuals
c) Rules for social interaction
d) Legal frameworks for business

42) The following is an example of a moral value?

a) Earning money b) Achieving fame
c) Helping others in need d) Increasing personal wealth

43) Integrity refers to: _____

a) Working hard at any cost
b) Being honest and having strong moral principles
c) Competing with others
d) Disregarding rules for personal gain

44) The concept of "work ethics" includes: _____

a) The right to leave work early
b) Consistently producing quality work
c) Avoiding all responsibilities
d) Expecting promotions without effort

45) The primary purpose of service learning is _____.

a) Earning money while volunteering
b) Acquiring knowledge through practical experiences
c) Participating in online courses
d) Building a professional career

46) Civic virtue is: _____

a) Attending religious services
b) Demonstrating good behavior and contributing to the welfare of society
c) Building personal wealth
d) Following family traditions

47) The following is an example of "respect for others" is _____.

a) Ignoring people's opinions
b) Listening attentively to others and valuing their viewpoints
c) Interrupting others in conversations
d) Arguing to prove your point

48) Living peacefully involves: _____

a) Suppressing all emotions
b) Treating others with kindness and understanding
c) Avoiding any conflict
d) Always agreeing with others

49) The value of "caring" means: _____

a) Always focusing on personal success
b) Showing concern and compassion for others
c) Ignoring the needs of others
d) Only helping when there is a reward

50) Honesty is best defined as: _____

a) Telling the truth regardless of the consequences
b) Saying only what others want to hear
c) Keeping secrets for friends
d) Telling lies to avoid conflict

a) Earning money
b) Achieving fame
c) Helping others in need
d) Increasing personal wealth

13) Integrity refers to: _____
a) Working hard at any cost
b) Being honest and having strong moral principles
c) Competing with others
d) Disregarding rules for personal gain

14) The concept of "work ethics" includes: _____
a) The right to leave work early
b) Consistently producing quality work
c) Avoiding all responsibilities
d) Expecting promotions without effort

15) The primary purpose of service learning is _____.
a) Earning money while volunteering
b) Acquiring knowledge through practical experiences
c) Participating in online courses
d) Building a professional career

16) Civic virtue is: _____
a) Attending religious services
b) Demonstrating good behavior and contributing to the welfare of society
c) Building personal wealth
d) Following family traditions

17) The following is an example of "respect for others" is _____.
a) Ignoring people's opinions
b) Listening attentively to others and valuing their viewpoints
c) Interrupting others in conversations
d) Arguing to prove your point

18) Living peacefully involves: _____
a) Suppressing all emotions
b) Treating others with kindness and understanding
c) Avoiding any conflict
d) Always agreeing with others

19) The value of "caring" means: _____
a) Always focusing on personal success
b) Showing concern and compassion for others
c) Ignoring the needs of others
d) Only helping when there is a reward

20) Honesty is best defined as: _____
a) Telling the truth regardless of the consequences
b) Saying only what others want to hear
c) Keeping secrets for friends
d) Telling lies to avoid conflict

21) According to Kohlberg's theory, the highest stage of moral development is: _____

a) Obedience and punishment orientation
b) Conventional morality
c) Post-conventional morality
d) Self-interest orientation

22) Which of the following is a key characteristic of Gilligan's moral development theory?

a) Emphasis on justice and rights
b) Focus on the value of relationships and care
c) Focus on maximizing personal gain
d) Belief that all moral issues are universal and objective

23) Which of the following models of professional roles emphasizes the engineer's responsibility to society and the public welfare?

a) The Engineer as Technocrat
b) The Engineer as Contractor
c) The Engineer as Guardian
d) The Engineer as Entrepreneur

24) Which theory of moral development emphasizes the importance of care and relationships, particularly for women?

a) Kohlberg's theory
b) Aristotle's virtue ethics
c) Gilligan's theory
d) Rawls' theory of justice

25) Which model of professional role in engineering sees the engineer as a neutral expert, focused only on technical competence without concern for social values?

a) The Engineer as Guardian
b) The Engineer as Technocrat
c) The Engineer as Entrepreneur
d) The Engineer as Contractor

26) Which ethical theory suggests that individuals should act in ways that maximize their own happiness and well-being?

a) Deontological ethics
b) Utilitarianism
c) Ethical egoism
d) Virtue ethics

27) The concept of "professional ethics" in engineering involves: _____

a) The personal beliefs of engineers
b) The specific ethical standards and principles set by professional organizations
c) The opinions of senior management
d) The religious views of the engineers

28) In engineering ethics, a "conflict of interest" occurs when: _____
a) Engineers prioritize their personal interests over their professional duties
b) Engineers follow the orders of their superiors without question
c) Engineers act in ways that promote the well-being of society
d) Engineers make decisions based solely on technical expertise

29) In engineering ethics, what is the purpose of "risk assessment"?
a) To identify and mitigate potential dangers and harm to society
b) To increase profits and minimize costs
c) To ensure that engineers do not make mistakes
d) To promote the engineer's personal career advancement

30) What does "ethical responsibility" in engineering imply?
a) Only following orders from superiors
b) Making decisions that benefit only the company
c) Balancing technical, legal, and moral considerations to ensure public safety and well-being
d) Prioritizing efficiency over quality

31) Safety and risk primarily deal with: _____
a) Managing hazards and assessing potential harm
b) Legal contracts
c) Maximizing productivity
d) Reducing work hours

32) Risk-benefit analysis involves: _____
a) Estimating the cost of a project
b) Evaluating potential risks against possible benefits
c) Managing legal liabilities
d) Defining workplace responsibilities

33) The Chernobyl disaster is an example of: _____
a) A technological breakthrough
b) An ethical failure in managing risks
c) A successful safety protocol implementation
d) An engineering success

34) Which of the following is a key factor in assessing safety and risk?
a) The cost of implementation
b) The likelihood and impact of potential hazards
c) The speed of technology adoption
d) The market demand for a product

35) The Three Mile Island incident was caused by: _____
a) Technological failure
b) Natural disasters
c) Lack of training for engineers
d) Poor risk assessment and safety protocol failures

36) Collegiality in a professional setting refers to: _____
a) Loyalty to your employer
b) Cooperation and mutual respect among colleagues
c) Competing for individual success
d) Avoiding work conflicts

37) Professional loyalty involves: _____
a) Reporting colleagues' mistakes publicly
b) Protecting the interests of the team or organization
c) Ignoring safety violations to avoid
d) Disclosing confidential information for personal conflict gain

38) Employee rights include: _____
a) The right to work without discrimination
b) The right to disregard company policies
c) The right to personal opinion but not affecting work
d) The right to ignore workplace safety standards

39) Intellectual Property Rights (IPR) protect: _____
a) The financial interests of corporations
b) The ownership and use of creative ideas and inventions
c) The physical assets of a company
d) Workplace performance evaluations

40) *Risk assessment* is important because it helps in: _____
a) Evaluating the potential impact of hazards on health and safety
b) Minimizing workplace productivity
c) Defining job roles
d) Ignoring environmental issues

41) In risk management, mitigation strategies aim to: _____
a) Accept all risks in the workplace
b) Reduce or eliminate identified risks
c) Increase the likelihood of hazards
d) Focus only on maximizing profits

42) Which of the following is a potential consequence of *occupational crime*?
a) Increased workplace productivity
b) Legal consequences and loss of reputation
c) Improvement in company safety standards
d) Higher employee satisfaction

43) Risk reduction in engineering refers to: _____
a) Implementing measures to lower the chances of accidents
b) Increasing the number of hazards in the work environment
c) Ignoring potential risks
d) Cutting costs by removing safety measures

44) Public safety regulations are primarily designed to: _____
a) Ensure the safety of the company's assets
b) Protect the general public from potential harm
c) Increase revenue for the government
d) Focus only on preventing natural disasters

45) Multinational corporations (MNCs) are characterized by: _____
a) Operations in multiple countries with a centralized headquarters
b) Operating only in their home country
c) Limited influence on global markets
d) No responsibility toward environmental concerns

46) Environmental ethics primarily deals with: _____
a) Human responsibility to manage the environment and natural resources
b) Minimizing corporate profits
c) Technological advancements in engineering
d) Treating employees equally

47) Which of the following is NOT an example of environmental ethics?
a) Reducing pollution and waste
b) Maximizing resource use regardless of environmental impact
c) Preserving biodiversity
d) Sustainable development

48) Computer ethics involves: _____
a) Programming and coding without considering social consequences
b) Understanding the moral implications of computing technologies
c) Focusing only on technological innovation

a) Only following orders from superiors
b) Making decisions that benefit only the company
c) Balancing technical, legal, and moral considerations to ensure public safety and well-being
d) Prioritizing efficiency over quality

21) Safety and risk primarily deal with: _____
a) Managing hazards and assessing potential harm
b) Legal contracts
c) Maximizing productivity
d) Reducing work hours

22) Risk-benefit analysis involves: _____
a) Estimating the cost of a project
b) Evaluating potential risks against possible benefits
c) Managing legal liabilities
d) Defining workplace responsibilities

23) The Chernobyl disaster is an example of: _____
a) A technological breakthrough
b) An ethical failure in managing risks
c) A successful safety protocol implementation
d) An engineering success

24) Which of the following is a key factor in assessing safety and risk?
a) The cost of implementation
b) The likelihood and impact of potential hazards
c) The speed of technology adoption
d) The market demand for a product

25) The Three Mile Island incident was caused by: _____
a) Technological failure
b) Natural disasters
c) Lack of training for engineers
d) Poor risk assessment and safety protocol failures

26) Collegiality in a professional setting refers to: _____
a) Loyalty to your employer
b) Cooperation and mutual respect among colleagues
c) Competing for individual success
d) Avoiding work conflicts

27) Professional loyalty involves: _____
a) Reporting colleagues' mistakes publicly
b) Protecting the interests of the team or organization
c) Ignoring safety violations to avoid
d) Disclosing confidential information for personal conflict gain

28) Employee rights include: _____
a) The right to work without discrimination
b) The right to disregard company policies
c) The right to personal opinion but not affecting work
d) The right to ignore workplace safety standards

29) Intellectual Property Rights (IPR) protect: _____
a) The financial interests of corporations
b) The ownership and use of creative ideas and inventions
c) The physical assets of a company
d) Workplace performance evaluations

30) *Risk assessment* is important because it helps in: _____
a) Evaluating the potential impact of hazards on health and safety
b) Minimizing workplace productivity
c) Defining job roles
d) Ignoring environmental issues

31) In risk management, mitigation strategies aim to: _____
a) Accept all risks in the workplace
b) Reduce or eliminate identified risks
c) Increase the likelihood of hazards
d) Focus only on maximizing profits

32) Which of the following is a potential consequence of *occupational crime*?
a) Increased workplace productivity
b) Legal consequences and loss of reputation
c) Improvement in company safety standards
d) Higher employee satisfaction

33) Risk reduction in engineering refers to: _____
a) Implementing measures to lower the chances of accidents
b) Increasing the number of hazards in the work environment
c) Ignoring potential risks
d) Cutting costs by removing safety measures

34) Public safety regulations are primarily designed to: _____
a) Ensure the safety of the company's assets
b) Protect the general public from potential harm
c) Increase revenue for the government
d) Focus only on preventing natural disasters

35) Multinational corporations (MNCs) are characterized by: _____
a) Operations in multiple countries with a centralized headquarters
b) Operating only in their home country
c) Limited influence on global markets
d) No responsibility toward environmental concerns

36) Environmental ethics primarily deals with: _____
a) Human responsibility to manage the environment and natural resources
b) Minimizing corporate profits
c) Technological advancements in engineering
d) Treating employees equally

37) Which of the following is NOT an example of environmental ethics?
a) Reducing pollution and waste
b) Maximizing resource use regardless of environmental impact
c) Preserving biodiversity
d) Sustainable development

38) Computer ethics involves: _____
a) Programming and coding without considering social consequences
b) Understanding the moral implications of computing technologies
c) Focusing only on technological innovation
d) Ignoring privacy issues

39) Weapons development ethics deals with: _____
a) The development of new technologies to enhance military capabilities
b) Restricting the use of all technological advancements
c) Focusing only on civilian safety
d) Only addressing the legal aspects of weapon development

40) Engineers as managers are expected to: _____
a) Focus solely on technical tasks
b) Lead teams, make strategic decisions, and manage projects
c) Ignore the business aspects of their work
d) Avoid taking responsibility for team outcomes

41) Consulting engineers are hired to: _____
a) Work on projects within the company they are employed
b) Provide expert advice on technical and engineering problems
c) Manage public relations for a company
d) Conduct legal investigations

42) Engineers acting as expert witnesses typically: _____
a) Present evidence and offer testimony in legal cases
b) Focus on public relations during a case
c) Manage engineering projects for legal firms
d) Directly represent the interests of a company in court

43) Sample Code of Ethics of professional organizations typically includes: _____
a) Guidelines for acceptable behavior and decision-making
b) Rules for maximizing profits at any cost
c) Detailed technical specifications for projects
d) Guidelines for political involvement in engineering

44) ASME stands for: _____
a) American Society of Mechanical Engineers
b) American Society of Management Engineers
c) Association of Safety and Mechanical Engineers
d) Association of Scientific and Mechanical Engineers

45) The ASCE Code of Ethics emphasizes: _____
a) Following only local regulations
b) Maintaining professional integrity and responsibility
c) Focusing on personal financial gain
d) Ignoring environmental impacts

46) **T**he IEEE Code of Ethics is primarily concerned with: _____
a) Fostering professional competence and integrity
b) Protecting corporate secrets
c) Maximizing technological advancements at any cost
d) Developing weapons for defense purposes

47) Global issues in engineering ethics include: _____
a) Cultural differences in engineering practices
b) Lack of understanding between technical and ethical concerns
c) Addressing both local and international engineering challenges
d) All of the above

48) A key challenge faced by multinational corporations is: _____
a) Balancing profits with social and environmental
b) Competing only within their home country responsibilities
c) Focusing solely on domestic issues
d) Ignoring corporate social responsibility

49) Empathy is the ability to: _____
a) Solve problems logically
b) Understand and share the feelings of others
c) Be indifferent to others' emotions
d) Only care about your own well-being

50) The quality of "caring" includes: _____
a) Showing concern for others' well-being
b) Ignoring the needs of others
c) Only helping family and friends
d) Seeking praise for helping others

S. Y. (B.Tech.) (Sem - II) (New)(NEP CBCS) Examination: March/April-2025
ELECTRONICS & TELECOMMUNICATION ENGINEERING
Professional Ethics (VEC-02)

Day & Date: Wednesday, 11-06-2025 Max. Marks: 50
Time: 10:00 AM To 11:30 AM

Instructions: 1) All questions are compulsory.
2) Figures to the right indicate full marks.
3) Mention Question Paper Set (P/Q/R/S) on Top of Page.

Answer

Q.1 Choose the correct alternatives from the options.

1) In risk management, mitigation strategies aim to: _____
a) Accept all risks in the workplace
b) Reduce or eliminate identified risks
c) Increase the likelihood of hazards
d) Focus only on maximizing profits

2) Which of the following is a potential consequence of *occupational crime*?
a) Increased workplace productivity
b) Legal consequences and loss of reputation
c) Improvement in company safety standards
d) Higher employee satisfaction

3) Risk reduction in engineering refers to: _____
a) Implementing measures to lower the chances of accidents
b) Increasing the number of hazards in the work environment
c) Ignoring potential risks
d) Cutting costs by removing safety measures

4) Public safety regulations are primarily designed to: _____
a) Ensure the safety of the company's assets
b) Protect the general public from potential harm
c) Increase revenue for the government
d) Focus only on preventing natural disasters

5) Multinational corporations (MNCs) are characterized by: _____
a) Operations in multiple countries with a centralized headquarters
b) Operating only in their home country
c) Limited influence on global markets
d) No responsibility toward environmental concerns

6) Environmental ethics primarily deals with: _____
a) Human responsibility to manage the environment and natural resources
b) Minimizing corporate profits
c) Technological advancements in engineering
d) Treating employees equally

7) Which of the following is NOT an example of environmental ethics?
a) Reducing pollution and waste
b) Maximizing resource use regardless of environmental impact
c) Preserving biodiversity
d) Sustainable development

8) Computer ethics involves: _____
a) Programming and coding without considering social consequences
b) Understanding the moral implications of computing technologies
c) Focusing only on technological innovation
d) Ignoring privacy issues

9) Weapons development ethics deals with: _____
a) The development of new technologies to enhance military capabilities
b) Restricting the use of all technological advancements
c) Focusing only on civilian safety
d) Only addressing the legal aspects of weapon development

10) Engineers as managers are expected to: _____
a) Focus solely on technical tasks
b) Lead teams, make strategic decisions, and manage projects
c) Ignore the business aspects of their work
d) Avoid taking responsibility for team outcomes

11) Consulting engineers are hired to: _____
a) Work on projects within the company they are employed
b) Provide expert advice on technical and engineering problems
c) Manage public relations for a company
d) Conduct legal investigations

12) Engineers acting as expert witnesses typically: _____
a) Present evidence and offer testimony in legal cases
b) Focus on public relations during a case
c) Manage engineering projects for legal firms
d) Directly represent the interests of a company in court

13) Sample Code of Ethics of professional organizations typically includes: _____
a) Guidelines for acceptable behavior and decision-making
b) Rules for maximizing profits at any cost
c) Detailed technical specifications for projects
d) Guidelines for political involvement in engineering

14) ASME stands for: _____
a) American Society of Mechanical Engineers
b) American Society of Management Engineers
c) Association of Safety and Mechanical Engineers
d) Association of Scientific and Mechanical Engineers

15) The ASCE Code of Ethics emphasizes: _____
a) Following only local regulations
b) Maintaining professional integrity and responsibility
c) Focusing on personal financial gain
d) Ignoring environmental impacts

16) **T**he IEEE Code of Ethics is primarily concerned with: _____
a) Fostering professional competence and integrity
b) Protecting corporate secrets
c) Maximizing technological advancements at any cost
d) Developing weapons for defense purposes

17) Global issues in engineering ethics include: _____
a) Cultural differences in engineering practices
b) Lack of understanding between technical and ethical concerns
c) Addressing both local and international engineering challenges
d) All of the above

18) A key challenge faced by multinational corporations is: _____
a) Balancing profits with social and environmental
b) Competing only within their home country responsibilities
c) Focusing solely on domestic issues
d) Ignoring corporate social responsibility

19) Empathy is the ability to: _____
a) Solve problems logically
b) Understand and share the feelings of others
c) Be indifferent to others' emotions
d) Only care about your own well-being

20) The quality of "caring" includes: _____
a) Showing concern for others' well-being
b) Ignoring the needs of others
c) Only helping family and friends
d) Seeking praise for helping others

21) The primary meaning of "ethics"?
a) Financial management
b) Principles governing the behavior of individuals
c) Rules for social interaction
d) Legal frameworks for business

22) The following is an example of a moral value?
a) Earning money
b) Achieving fame
c) Helping others in need
d) Increasing personal wealth

23) Integrity refers to: _____
a) Working hard at any cost
b) Being honest and having strong moral principles
c) Competing with others
d) Disregarding rules for personal gain

24) The concept of "work ethics" includes: _____
a) The right to leave work early
b) Consistently producing quality work
c) Avoiding all responsibilities
d) Expecting promotions without effort

25) The primary purpose of service learning is _____.
a) Earning money while volunteering
b) Acquiring knowledge through practical experiences
c) Participating in online courses
d) Building a professional career

26) Civic virtue is: _____
a) Attending religious services
b) Demonstrating good behavior and contributing to the welfare of society
c) Building personal wealth
d) Following family traditions

27) The following is an example of "respect for others" is _____.
a) Ignoring people's opinions
b) Listening attentively to others and valuing their viewpoints
c) Interrupting others in conversations
d) Arguing to prove your point

28) Living peacefully involves: _____
a) Suppressing all emotions
b) Treating others with kindness and understanding
c) Avoiding any conflict
d) Always agreeing with others

29) The value of "caring" means: _____
a) Always focusing on personal success
b) Showing concern and compassion for others
c) Ignoring the needs of others
d) Only helping when there is a reward

30) Honesty is best defined as: _____
a) Telling the truth regardless of the consequences
b) Saying only what others want to hear
c) Keeping secrets for friends
d) Telling lies to avoid conflict

31) According to Kohlberg's theory, the highest stage of moral development is: _____
a) Obedience and punishment orientation
b) Conventional morality
c) Post-conventional morality
d) Self-interest orientation

32) Which of the following is a key characteristic of Gilligan's moral development theory?
a) Emphasis on justice and rights
b) Focus on the value of relationships and care
c) Focus on maximizing personal gain
d) Belief that all moral issues are universal and objective

33) Which of the following models of professional roles emphasizes the engineer's responsibility to society and the public welfare?
a) The Engineer as Technocrat
b) The Engineer as Contractor
c) The Engineer as Guardian
d) The Engineer as Entrepreneur

34) Which theory of moral development emphasizes the importance of care and relationships, particularly for women?
a) Kohlberg's theory
b) Aristotle's virtue ethics
c) Gilligan's theory
d) Rawls' theory of justice

35) Which model of professional role in engineering sees the engineer as a neutral expert, focused only on technical competence without concern for social values?
a) The Engineer as Guardian
b) The Engineer as Technocrat
c) The Engineer as Entrepreneur
d) The Engineer as Contractor

36) Which ethical theory suggests that individuals should act in ways that maximize their own happiness and well-being?

a) Deontological ethics b) Utilitarianism
c) Ethical egoism d) Virtue ethics

37) The concept of "professional ethics" in engineering involves: _____

a) The personal beliefs of engineers
b) The specific ethical standards and principles set by professional organizations
c) The opinions of senior management
d) The religious views of the engineers

38) In engineering ethics, a "conflict of interest" occurs when: _____

a) Engineers prioritize their personal interests over their professional duties
b) Engineers follow the orders of their superiors without question
c) Engineers act in ways that promote the well-being of society
d) Engineers make decisions based solely on technical expertise

39) In engineering ethics, what is the purpose of "risk assessment"?

a) To identify and mitigate potential dangers and harm to society
b) To increase profits and minimize costs
c) To ensure that engineers do not make mistakes
d) To promote the engineer's personal career advancement

40) What does "ethical responsibility" in engineering imply?

a) Only following orders from superiors
b) Making decisions that benefit only the company
c) Balancing technical, legal, and moral considerations to ensure public safety and well-being
d) Prioritizing efficiency over quality

41) Safety and risk primarily deal with: _____

a) Managing hazards and assessing potential harm
b) Legal contracts
c) Maximizing productivity
d) Reducing work hours

42) Risk-benefit analysis involves: _____

a) Estimating the cost of a project
b) Evaluating potential risks against possible benefits
c) Managing legal liabilities
d) Defining workplace responsibilities

43) The Chernobyl disaster is an example of: _____

a) A technological breakthrough
b) An ethical failure in managing risks
c) A successful safety protocol implementation
d) An engineering success

44) Which of the following is a key factor in assessing safety and risk?
a) The cost of implementation
b) The likelihood and impact of potential hazards
c) The speed of technology adoption
d) The market demand for a product

45) The Three Mile Island incident was caused by: _____
a) Technological failure
b) Natural disasters
c) Lack of training for engineers
d) Poor risk assessment and safety protocol failures

46) Collegiality in a professional setting refers to: _____
a) Loyalty to your employer
b) Cooperation and mutual respect among colleagues
c) Competing for individual success
d) Avoiding work conflicts

47) Professional loyalty involves: _____
a) Reporting colleagues' mistakes publicly
b) Protecting the interests of the team or organization
c) Ignoring safety violations to avoid
d) Disclosing confidential information for personal conflict gain

48) Employee rights include: _____
a) The right to work without discrimination
b) The right to disregard company policies
c) The right to personal opinion but not affecting work
d) The right to ignore workplace safety standards

49) Intellectual Property Rights (IPR) protect: _____
a) The financial interests of corporations
b) The ownership and use of creative ideas and inventions
c) The physical assets of a company
d) Workplace performance evaluations

50) *Risk assessment* is important because it helps in: _____
a) Evaluating the potential impact of hazards on health and safety
b) Minimizing workplace productivity
c) Defining job roles
d) Ignoring environmental issues

Answer

Q.1 Choose the correct alternatives from the options.

1) According to Kohlberg's theory, the highest stage of moral development is: _____
a) Obedience and punishment orientation
b) Conventional morality
c) Post-conventional morality
d) Self-interest orientation

2) Which of the following is a key characteristic of Gilligan's moral development theory?
a) Emphasis on justice and rights
b) Focus on the value of relationships and care
c) Focus on maximizing personal gain
d) Belief that all moral issues are universal and objective

3) Which of the following models of professional roles emphasizes the engineer’s responsibility to society and the public welfare?
a) The Engineer as Technocrat
b) The Engineer as Contractor
c) The Engineer as Guardian
d) The Engineer as Entrepreneur

4) Which theory of moral development emphasizes the importance of care and relationships, particularly for women?
a) Kohlberg's theory b) Aristotle's virtue ethics
c) Gilligan's theory d) Rawls' theory of justice

5) Which model of professional role in engineering sees the engineer as a neutral expert, focused only on technical competence without concern for social values?

a) The Engineer as Guardian
b) The Engineer as Technocrat
c) The Engineer as Entrepreneur
d) The Engineer as Contractor

6) Which ethical theory suggests that individuals should act in ways that maximize their own happiness and well-being?

a) Deontological ethics b) Utilitarianism
c) Ethical egoism d) Virtue ethics

7) The concept of "professional ethics" in engineering involves: _____

a) The personal beliefs of engineers
b) The specific ethical standards and principles set by professional organizations
c) The opinions of senior management
d) The religious views of the engineers

8) In engineering ethics, a "conflict of interest" occurs when: _____

a) Engineers prioritize their personal interests over their professional duties
b) Engineers follow the orders of their superiors without question
c) Engineers act in ways that promote the well-being of society
d) Engineers make decisions based solely on technical expertise

9) In engineering ethics, what is the purpose of "risk assessment"?

a) To identify and mitigate potential dangers and harm to society
b) To increase profits and minimize costs
c) To ensure that engineers do not make mistakes
d) To promote the engineer's personal career advancement

10) What does "ethical responsibility" in engineering imply?

a) Only following orders from superiors
b) Making decisions that benefit only the company
c) Balancing technical, legal, and moral considerations to ensure public safety and well-being
d) Prioritizing efficiency over quality

11) Safety and risk primarily deal with: _____

a) Managing hazards and assessing potential harm
b) Legal contracts
c) Maximizing productivity
d) Reducing work hours

12) Risk-benefit analysis involves: _____
a) Estimating the cost of a project
b) Evaluating potential risks against possible benefits
c) Managing legal liabilities
d) Defining workplace responsibilities

13) The Chernobyl disaster is an example of: _____
a) A technological breakthrough
b) An ethical failure in managing risks
c) A successful safety protocol implementation
d) An engineering success

14) Which of the following is a key factor in assessing safety and risk?
a) The cost of implementation
b) The likelihood and impact of potential hazards
c) The speed of technology adoption
d) The market demand for a product

15) The Three Mile Island incident was caused by: _____
a) Technological failure
b) Natural disasters
c) Lack of training for engineers
d) Poor risk assessment and safety protocol failures

16) Collegiality in a professional setting refers to: _____
a) Loyalty to your employer
b) Cooperation and mutual respect among colleagues
c) Competing for individual success
d) Avoiding work conflicts

17) Professional loyalty involves: _____
a) Reporting colleagues' mistakes publicly
b) Protecting the interests of the team or organization
c) Ignoring safety violations to avoid
d) Disclosing confidential information for personal conflict gain

18) Employee rights include: _____
a) The right to work without discrimination
b) The right to disregard company policies
c) The right to personal opinion but not affecting work
d) The right to ignore workplace safety standards

19) Intellectual Property Rights (IPR) protect: _____
a) The financial interests of corporations
b) The ownership and use of creative ideas and inventions
c) The physical assets of a company
d) Workplace performance evaluations

20) *Risk assessment* is important because it helps in: _____
a) Evaluating the potential impact of hazards on health and safety
b) Minimizing workplace productivity
c) Defining job roles
d) Ignoring environmental issues

21) In risk management, mitigation strategies aim to: _____
a) Accept all risks in the workplace
b) Reduce or eliminate identified risks
c) Increase the likelihood of hazards
d) Focus only on maximizing profits

22) Which of the following is a potential consequence of *occupational crime*?
a) Increased workplace productivity
b) Legal consequences and loss of reputation
c) Improvement in company safety standards
d) Higher employee satisfaction

23) Risk reduction in engineering refers to: _____
a) Implementing measures to lower the chances of accidents
b) Increasing the number of hazards in the work environment
c) Ignoring potential risks
d) Cutting costs by removing safety measures

24) Public safety regulations are primarily designed to: _____
a) Ensure the safety of the company's assets
b) Protect the general public from potential harm
c) Increase revenue for the government
d) Focus only on preventing natural disasters

25) Multinational corporations (MNCs) are characterized by: _____
a) Operations in multiple countries with a centralized headquarters
b) Operating only in their home country
c) Limited influence on global markets
d) No responsibility toward environmental concerns

26) Environmental ethics primarily deals with: _____
a) Human responsibility to manage the environment and natural resources
b) Minimizing corporate profits
c) Technological advancements in engineering
d) Treating employees equally

27) Which of the following is NOT an example of environmental ethics?
a) Reducing pollution and waste
b) Maximizing resource use regardless of environmental impact
c) Preserving biodiversity
d) Sustainable development

28) Computer ethics involves: _____
a) Programming and coding without considering social consequences
b) Understanding the moral implications of computing technologies
c) Focusing only on technological innovation
d) Ignoring privacy issues

29) Weapons development ethics deals with: _____
a) The development of new technologies to enhance military capabilities
b) Restricting the use of all technological advancements
c) Focusing only on civilian safety
d) Only addressing the legal aspects of weapon development

30) Engineers as managers are expected to: _____
a) Focus solely on technical tasks
b) Lead teams, make strategic decisions, and manage projects
c) Ignore the business aspects of their work
d) Avoid taking responsibility for team outcomes

31) Consulting engineers are hired to: _____
a) Work on projects within the company they are employed
b) Provide expert advice on technical and engineering problems
c) Manage public relations for a company
d) Conduct legal investigations

32) Engineers acting as expert witnesses typically: _____
a) Present evidence and offer testimony in legal cases
b) Focus on public relations during a case
c) Manage engineering projects for legal firms
d) Directly represent the interests of a company in court

33) Sample Code of Ethics of professional organizations typically includes: _____
a) Guidelines for acceptable behavior and decision-making
b) Rules for maximizing profits at any cost
c) Detailed technical specifications for projects
d) Guidelines for political involvement in engineering

34) ASME stands for: _____
a) American Society of Mechanical Engineers
b) American Society of Management Engineers
c) Association of Safety and Mechanical Engineers
d) Association of Scientific and Mechanical Engineers

35) The ASCE Code of Ethics emphasizes: _____
a) Following only local regulations
b) Maintaining professional integrity and responsibility
c) Focusing on personal financial gain
d) Ignoring environmental impacts

36) **T**he IEEE Code of Ethics is primarily concerned with: _____
a) Fostering professional competence and integrity
b) Protecting corporate secrets
c) Maximizing technological advancements at any cost
d) Developing weapons for defense purposes

37) Global issues in engineering ethics include: _____
a) Cultural differences in engineering practices
b) Lack of understanding between technical and ethical concerns
c) Addressing both local and international engineering challenges
d) All of the above

38) A key challenge faced by multinational corporations is: _____
a) Balancing profits with social and environmental
b) Competing only within their home country responsibilities
c) Focusing solely on domestic issues
d) Ignoring corporate social responsibility

39) Empathy is the ability to: _____
a) Solve problems logically
b) Understand and share the feelings of others
c) Be indifferent to others' emotions
d) Only care about your own well-being

40) The quality of "caring" includes: _____
a) Showing concern for others' well-being
b) Ignoring the needs of others
c) Only helping family and friends
d) Seeking praise for helping others

41) The primary meaning of "ethics"?
a) Financial management
b) Principles governing the behavior of individuals
c) Rules for social interaction
d) Legal frameworks for business

42) The following is an example of a moral value?
a) Earning money b) Achieving fame
c) Helping others in need d) Increasing personal wealth

43) Integrity refers to: _____
a) Working hard at any cost
b) Being honest and having strong moral principles
c) Competing with others
d) Disregarding rules for personal gain

44) The concept of "work ethics" includes: _____
a) The right to leave work early
b) Consistently producing quality work
c) Avoiding all responsibilities
d) Expecting promotions without effort

45) The primary purpose of service learning is _____.
a) Earning money while volunteering
b) Acquiring knowledge through practical experiences
c) Participating in online courses
d) Building a professional career

46) Civic virtue is: _____
a) Attending religious services
b) Demonstrating good behavior and contributing to the welfare of society
c) Building personal wealth
d) Following family traditions

47) The following is an example of "respect for others" is _____.
a) Ignoring people's opinions
b) Listening attentively to others and valuing their viewpoints
c) Interrupting others in conversations
d) Arguing to prove your point

48) Living peacefully involves: _____
a) Suppressing all emotions
b) Treating others with kindness and understanding
c) Avoiding any conflict
d) Always agreeing with others

49) The value of "caring" means: _____
a) Always focusing on personal success
b) Showing concern and compassion for others
c) Ignoring the needs of others
d) Only helping when there is a reward

50) Honesty is best defined as: _____

a) Telling the truth regardless of the consequences
b) Saying only what others want to hear
c) Keeping secrets for friends
d) Telling lies to avoid conflict

d) Seeking praise for helping others

11) The primary meaning of "ethics"?
a) Financial management
b) Principles governing the behavior of individuals
c) Rules for social interaction
d) Legal frameworks for business

12) The following is an example of a moral value?
a) Earning money
b) Achieving fame
c) Helping others in need
d) Increasing personal wealth

13) Integrity refers to: _____
a) Working hard at any cost
b) Being honest and having strong moral principles
c) Competing with others
d) Disregarding rules for personal gain

14) The concept of "work ethics" includes: _____
a) The right to leave work early
b) Consistently producing quality work
c) Avoiding all responsibilities
d) Expecting promotions without effort

15) The primary purpose of service learning is _____.
a) Earning money while volunteering
b) Acquiring knowledge through practical experiences
c) Participating in online courses
d) Building a professional career

16) Civic virtue is: _____
a) Attending religious services
b) Demonstrating good behavior and contributing to the welfare of society
c) Building personal wealth
d) Following family traditions

17) The following is an example of "respect for others" is _____.
a) Ignoring people's opinions
b) Listening attentively to others and valuing their viewpoints
c) Interrupting others in conversations
d) Arguing to prove your point

18) Living peacefully involves: _____
a) Suppressing all emotions
b) Treating others with kindness and understanding
c) Avoiding any conflict
d) Always agreeing with others

19) The value of "caring" means: _____
a) Always focusing on personal success
b) Showing concern and compassion for others
c) Ignoring the needs of others
d) Only helping when there is a reward

20) Honesty is best defined as: _____
a) Telling the truth regardless of the consequences
b) Saying only what others want to hear
c) Keeping secrets for friends
d) Telling lies to avoid conflict

21) According to Kohlberg's theory, the highest stage of moral development is: _____

a) Obedience and punishment orientation
b) Conventional morality
c) Post-conventional morality
d) Self-interest orientation

22) Which of the following is a key characteristic of Gilligan's moral development theory?

a) Emphasis on justice and rights
b) Focus on the value of relationships and care
c) Focus on maximizing personal gain
d) Belief that all moral issues are universal and objective

23) Which of the following models of professional roles emphasizes the engineer's responsibility to society and the public welfare?

a) The Engineer as Technocrat
b) The Engineer as Contractor
c) The Engineer as Guardian
d) The Engineer as Entrepreneur

24) Which theory of moral development emphasizes the importance of care and relationships, particularly for women?

a) Kohlberg's theory
b) Aristotle's virtue ethics
c) Gilligan's theory
d) Rawls' theory of justice

25) Which model of professional role in engineering sees the engineer as a neutral expert, focused only on technical competence without concern for social values?

a) The Engineer as Guardian
b) The Engineer as Technocrat
c) The Engineer as Entrepreneur
d) The Engineer as Contractor

26) Which ethical theory suggests that individuals should act in ways that maximize their own happiness and well-being?

a) Deontological ethics
b) Utilitarianism
c) Ethical egoism
d) Virtue ethics

27) The concept of "professional ethics" in engineering involves: _____

a) The personal beliefs of engineers
b) The specific ethical standards and principles set by professional organizations
c) The opinions of senior management
d) The religious views of the engineers

28) In engineering ethics, a "conflict of interest" occurs when: _____
a) Engineers prioritize their personal interests over their professional duties
b) Engineers follow the orders of their superiors without question
c) Engineers act in ways that promote the well-being of society
d) Engineers make decisions based solely on technical expertise

29) In engineering ethics, what is the purpose of "risk assessment"?
a) To identify and mitigate potential dangers and harm to society
b) To increase profits and minimize costs
c) To ensure that engineers do not make mistakes
d) To promote the engineer's personal career advancement

30) What does "ethical responsibility" in engineering imply?
a) Only following orders from superiors
b) Making decisions that benefit only the company
c) Balancing technical, legal, and moral considerations to ensure public safety and well-being
d) Prioritizing efficiency over quality

31) Safety and risk primarily deal with: _____
a) Managing hazards and assessing potential harm
b) Legal contracts
c) Maximizing productivity
d) Reducing work hours

32) Risk-benefit analysis involves: _____
a) Estimating the cost of a project
b) Evaluating potential risks against possible benefits
c) Managing legal liabilities
d) Defining workplace responsibilities

33) The Chernobyl disaster is an example of: _____
a) A technological breakthrough
b) An ethical failure in managing risks
c) A successful safety protocol implementation
d) An engineering success

34) Which of the following is a key factor in assessing safety and risk?
a) The cost of implementation
b) The likelihood and impact of potential hazards
c) The speed of technology adoption
d) The market demand for a product

35) The Three Mile Island incident was caused by: _____
a) Technological failure
b) Natural disasters
c) Lack of training for engineers
d) Poor risk assessment and safety protocol failures

36) Collegiality in a professional setting refers to: _____
a) Loyalty to your employer
b) Cooperation and mutual respect among colleagues
c) Competing for individual success
d) Avoiding work conflicts

37) Professional loyalty involves: _____
a) Reporting colleagues' mistakes publicly
b) Protecting the interests of the team or organization
c) Ignoring safety violations to avoid
d) Disclosing confidential information for personal conflict gain

38) Employee rights include: _____
a) The right to work without discrimination
b) The right to disregard company policies
c) The right to personal opinion but not affecting work
d) The right to ignore workplace safety standards

39) Intellectual Property Rights (IPR) protect: _____
a) The financial interests of corporations
b) The ownership and use of creative ideas and inventions
c) The physical assets of a company
d) Workplace performance evaluations

40) *Risk assessment* is important because it helps in: _____
a) Evaluating the potential impact of hazards on health and safety
b) Minimizing workplace productivity
c) Defining job roles
d) Ignoring environmental issues

41) In risk management, mitigation strategies aim to: _____
a) Accept all risks in the workplace
b) Reduce or eliminate identified risks
c) Increase the likelihood of hazards
d) Focus only on maximizing profits

42) Which of the following is a potential consequence of *occupational crime*?
a) Increased workplace productivity
b) Legal consequences and loss of reputation
c) Improvement in company safety standards
d) Higher employee satisfaction

43) Risk reduction in engineering refers to: _____
a) Implementing measures to lower the chances of accidents
b) Increasing the number of hazards in the work environment
c) Ignoring potential risks
d) Cutting costs by removing safety measures

44) Public safety regulations are primarily designed to: _____
a) Ensure the safety of the company's assets
b) Protect the general public from potential harm
c) Increase revenue for the government
d) Focus only on preventing natural disasters

45) Multinational corporations (MNCs) are characterized by: _____
a) Operations in multiple countries with a centralized headquarters
b) Operating only in their home country
c) Limited influence on global markets
d) No responsibility toward environmental concerns

46) Environmental ethics primarily deals with: _____
a) Human responsibility to manage the environment and natural resources
b) Minimizing corporate profits
c) Technological advancements in engineering
d) Treating employees equally

47) Which of the following is NOT an example of environmental ethics?
a) Reducing pollution and waste
b) Maximizing resource use regardless of environmental impact
c) Preserving biodiversity
d) Sustainable development

48) Computer ethics involves: _____
a) Programming and coding without considering social consequences
b) Understanding the moral implications of computing technologies
c) Focusing only on technological innovation
d) Ignoring privacy issues

49) Weapons development ethics deals with: _____
a) The development of new technologies to enhance military capabilities
b) Restricting the use of all technological advancements
c) Focusing only on civilian safety
d) Only addressing the legal aspects of weapon development

50) Engineers as managers are expected to: _____
a) Focus solely on technical tasks
b) Lead teams, make strategic decisions, and manage projects
c) Ignore the business aspects of their work
d) Avoid taking responsibility for team outcomes

Professional Ethics (VEC-02)

Day & Date: Wednesday, 11-06-2025 Max. Marks: 50
Time: 10:00 AM To 11:30 AM

Instructions: 1) All questions are compulsory.
2) Figures to the right indicate full marks.
3) Mention Question Paper Set (P/Q/R/S) on Top of Page.

Answer

Q.1 Choose the correct alternatives from the options.

1) The primary meaning of "ethics"?
a) Financial management
b) Principles governing the behavior of individuals
c) Rules for social interaction
d) Legal frameworks for business

2) The following is an example of a moral value?
a) Earning money b) Achieving fame
c) Helping others in need d) Increasing personal wealth

3) Integrity refers to: _____
a) Working hard at any cost
b) Being honest and having strong moral principles
c) Competing with others
d) Disregarding rules for personal gain

4) The concept of "work ethics" includes: _____
a) The right to leave work early
b) Consistently producing quality work
c) Avoiding all responsibilities
d) Expecting promotions without effort

5) The primary purpose of service learning is _____.
a) Earning money while volunteering
b) Acquiring knowledge through practical experiences
c) Participating in online courses
d) Building a professional career

6) Civic virtue is: _____
a) Attending religious services
b) Demonstrating good behavior and contributing to the welfare of society
c) Building personal wealth
d) Following family traditions

7) The following is an example of "respect for others" is _____.
a) Ignoring people's opinions
b) Listening attentively to others and valuing their viewpoints
c) Interrupting others in conversations
d) Arguing to prove your point

8) Living peacefully involves: _____
a) Suppressing all emotions
b) Treating others with kindness and understanding
c) Avoiding any conflict
d) Always agreeing with others

9) The value of "caring" means: _____
a) Always focusing on personal success
b) Showing concern and compassion for others
c) Ignoring the needs of others
d) Only helping when there is a reward

10) Honesty is best defined as: _____
a) Telling the truth regardless of the consequences
b) Saying only what others want to hear
c) Keeping secrets for friends
d) Telling lies to avoid conflict

11) According to Kohlberg's theory, the highest stage of moral development is: _____
a) Obedience and punishment orientation
b) Conventional morality
c) Post-conventional morality
d) Self-interest orientation

12) Which of the following is a key characteristic of Gilligan's moral development theory?
a) Emphasis on justice and rights
b) Focus on the value of relationships and care
c) Focus on maximizing personal gain
d) Belief that all moral issues are universal and objective

13) Which of the following models of professional roles emphasizes the engineer's responsibility to society and the public welfare?

a) The Engineer as Technocrat
b) The Engineer as Contractor
c) The Engineer as Guardian
d) The Engineer as Entrepreneur

14) Which theory of moral development emphasizes the importance of care and relationships, particularly for women?

a) Kohlberg's theory
b) Aristotle's virtue ethics
c) Gilligan's theory
d) Rawls' theory of justice

15) Which model of professional role in engineering sees the engineer as a neutral expert, focused only on technical competence without concern for social values?

a) The Engineer as Guardian
b) The Engineer as Technocrat
c) The Engineer as Entrepreneur
d) The Engineer as Contractor

16) Which ethical theory suggests that individuals should act in ways that maximize their own happiness and well-being?

a) Deontological ethics
b) Utilitarianism
c) Ethical egoism
d) Virtue ethics

17) The concept of "professional ethics" in engineering involves: _____

a) The personal beliefs of engineers
b) The specific ethical standards and principles set by professional organizations
c) The opinions of senior management
d) The religious views of the engineers

18) In engineering ethics, a "conflict of interest" occurs when: _____

a) Engineers prioritize their personal interests over their professional duties
b) Engineers follow the orders of their superiors without question
c) Engineers act in ways that promote the well-being of society
d) Engineers make decisions based solely on technical expertise

19) In engineering ethics, what is the purpose of "risk assessment"?

a) To identify and mitigate potential dangers and harm to society
b) To increase profits and minimize costs
c) To ensure that engineers do not make mistakes
d) To promote the engineer's personal career advancement

20) What does "ethical responsibility" in engineering imply?
a) Only following orders from superiors
b) Making decisions that benefit only the company
c) Balancing technical, legal, and moral considerations to ensure public safety and well-being
d) Prioritizing efficiency over quality

21) Safety and risk primarily deal with: _____
a) Managing hazards and assessing potential harm
b) Legal contracts
c) Maximizing productivity
d) Reducing work hours

22) Risk-benefit analysis involves: _____
a) Estimating the cost of a project
b) Evaluating potential risks against possible benefits
c) Managing legal liabilities
d) Defining workplace responsibilities

23) The Chernobyl disaster is an example of: _____
a) A technological breakthrough
b) An ethical failure in managing risks
c) A successful safety protocol implementation
d) An engineering success

24) Which of the following is a key factor in assessing safety and risk?
a) The cost of implementation
b) The likelihood and impact of potential hazards
c) The speed of technology adoption
d) The market demand for a product

25) The Three Mile Island incident was caused by: _____
a) Technological failure
b) Natural disasters
c) Lack of training for engineers
d) Poor risk assessment and safety protocol failures

26) Collegiality in a professional setting refers to: _____
a) Loyalty to your employer
b) Cooperation and mutual respect among colleagues
c) Competing for individual success
d) Avoiding work conflicts

27) Professional loyalty involves: _____
a) Reporting colleagues' mistakes publicly
b) Protecting the interests of the team or organization
c) Ignoring safety violations to avoid
d) Disclosing confidential information for personal conflict gain

28) Employee rights include: _____
a) The right to work without discrimination
b) The right to disregard company policies
c) The right to personal opinion but not affecting work
d) The right to ignore workplace safety standards

29) Intellectual Property Rights (IPR) protect: _____
a) The financial interests of corporations
b) The ownership and use of creative ideas and inventions
c) The physical assets of a company
d) Workplace performance evaluations

30) *Risk assessment* is important because it helps in: _____
a) Evaluating the potential impact of hazards on health and safety
b) Minimizing workplace productivity
c) Defining job roles
d) Ignoring environmental issues

31) In risk management, mitigation strategies aim to: _____
a) Accept all risks in the workplace
b) Reduce or eliminate identified risks
c) Increase the likelihood of hazards
d) Focus only on maximizing profits

32) Which of the following is a potential consequence of *occupational crime*?
a) Increased workplace productivity
b) Legal consequences and loss of reputation
c) Improvement in company safety standards
d) Higher employee satisfaction

33) Risk reduction in engineering refers to: _____
a) Implementing measures to lower the chances of accidents
b) Increasing the number of hazards in the work environment
c) Ignoring potential risks
d) Cutting costs by removing safety measures

34) Public safety regulations are primarily designed to: _____
a) Ensure the safety of the company's assets
b) Protect the general public from potential harm
c) Increase revenue for the government
d) Focus only on preventing natural disasters

35) Multinational corporations (MNCs) are characterized by: _____
a) Operations in multiple countries with a centralized headquarters
b) Operating only in their home country
c) Limited influence on global markets
d) No responsibility toward environmental concerns

36) Environmental ethics primarily deals with: _____
a) Human responsibility to manage the environment and natural resources
b) Minimizing corporate profits
c) Technological advancements in engineering
d) Treating employees equally

37) Which of the following is NOT an example of environmental ethics?
a) Reducing pollution and waste
b) Maximizing resource use regardless of environmental impact
c) Preserving biodiversity
d) Sustainable development

38) Computer ethics involves: _____
a) Programming and coding without considering social consequences
b) Understanding the moral implications of computing technologies
c) Focusing only on technological innovation
d) Ignoring privacy issues

39) Weapons development ethics deals with: _____
a) The development of new technologies to enhance military capabilities
b) Restricting the use of all technological advancements
c) Focusing only on civilian safety
d) Only addressing the legal aspects of weapon development

40) Engineers as managers are expected to: _____
a) Focus solely on technical tasks
b) Lead teams, make strategic decisions, and manage projects
c) Ignore the business aspects of their work
d) Avoid taking responsibility for team outcomes

41) Consulting engineers are hired to: _____
a) Work on projects within the company they are employed
b) Provide expert advice on technical and engineering problems
c) Manage public relations for a company
d) Conduct legal investigations

42) Engineers acting as expert witnesses typically: _____
a) Present evidence and offer testimony in legal cases
b) Focus on public relations during a case
c) Manage engineering projects for legal firms
d) Directly represent the interests of a company in court

43) Sample Code of Ethics of professional organizations typically includes: _____
a) Guidelines for acceptable behavior and decision-making
b) Rules for maximizing profits at any cost
c) Detailed technical specifications for projects
d) Guidelines for political involvement in engineering

44) ASME stands for: _____
a) American Society of Mechanical Engineers
b) American Society of Management Engineers
c) Association of Safety and Mechanical Engineers
d) Association of Scientific and Mechanical Engineers

45) The ASCE Code of Ethics emphasizes: _____
a) Following only local regulations
b) Maintaining professional integrity and responsibility
c) Focusing on personal financial gain
d) Ignoring environmental impacts

46) **T**he IEEE Code of Ethics is primarily concerned with: _____
a) Fostering professional competence and integrity
b) Protecting corporate secrets
c) Maximizing technological advancements at any cost
d) Developing weapons for defense purposes

47) Global issues in engineering ethics include: _____
a) Cultural differences in engineering practices
b) Lack of understanding between technical and ethical concerns
c) Addressing both local and international engineering challenges
d) All of the above

48) A key challenge faced by multinational corporations is: _____
a) Balancing profits with social and environmental
b) Competing only within their home country responsibilities
c) Focusing solely on domestic issues
d) Ignoring corporate social responsibility

49) Empathy is the ability to: _____
a) Solve problems logically
b) Understand and share the feelings of others
c) Be indifferent to others' emotions
d) Only care about your own well-being

50) The quality of "caring" includes: _____
a) Showing concern for others' well-being
b) Ignoring the needs of others
c) Only helping family and friends
d) Seeking praise for helping others

b) Minimizing corporate profits
c) Technological advancements in engineering
d) Treating employees equally

7) Which of the following is NOT an example of environmental ethics?
a) Reducing pollution and waste
b) Maximizing resource use regardless of environmental impact
c) Preserving biodiversity
d) Sustainable development

8) Computer ethics involves: _____
a) Programming and coding without considering social consequences
b) Understanding the moral implications of computing technologies
c) Focusing only on technological innovation
d) Ignoring privacy issues

9) Weapons development ethics deals with: _____
a) The development of new technologies to enhance military capabilities
b) Restricting the use of all technological advancements
c) Focusing only on civilian safety
d) Only addressing the legal aspects of weapon development

10) Engineers as managers are expected to: _____
a) Focus solely on technical tasks
b) Lead teams, make strategic decisions, and manage projects
c) Ignore the business aspects of their work
d) Avoid taking responsibility for team outcomes

11) Consulting engineers are hired to: _____
a) Work on projects within the company they are employed
b) Provide expert advice on technical and engineering problems
c) Manage public relations for a company
d) Conduct legal investigations

12) Engineers acting as expert witnesses typically: _____
a) Present evidence and offer testimony in legal cases
b) Focus on public relations during a case
c) Manage engineering projects for legal firms
d) Directly represent the interests of a company in court

13) Sample Code of Ethics of professional organizations typically includes: _____
a) Guidelines for acceptable behavior and decision-making
b) Rules for maximizing profits at any cost
c) Detailed technical specifications for projects
d) Guidelines for political involvement in engineering

14) ASME stands for: _____
a) American Society of Mechanical Engineers
b) American Society of Management Engineers
c) Association of Safety and Mechanical Engineers
d) Association of Scientific and Mechanical Engineers

15) The ASCE Code of Ethics emphasizes: _____
a) Following only local regulations
b) Maintaining professional integrity and responsibility
c) Focusing on personal financial gain
d) Ignoring environmental impacts

16) **T**he IEEE Code of Ethics is primarily concerned with: _____
a) Fostering professional competence and integrity
b) Protecting corporate secrets
c) Maximizing technological advancements at any cost
d) Developing weapons for defense purposes

17) Global issues in engineering ethics include: _____
a) Cultural differences in engineering practices
b) Lack of understanding between technical and ethical concerns
c) Addressing both local and international engineering challenges
d) All of the above

18) A key challenge faced by multinational corporations is: _____
a) Balancing profits with social and environmental
b) Competing only within their home country responsibilities
c) Focusing solely on domestic issues
d) Ignoring corporate social responsibility

19) Empathy is the ability to: _____
a) Solve problems logically
b) Understand and share the feelings of others
c) Be indifferent to others' emotions
d) Only care about your own well-being

20) The quality of "caring" includes: _____
a) Showing concern for others' well-being
b) Ignoring the needs of others
c) Only helping family and friends
d) Seeking praise for helping others

21) The primary meaning of "ethics"?
a) Financial management
b) Principles governing the behavior of individuals
c) Rules for social interaction
d) Legal frameworks for business

22) The following is an example of a moral value?
a) Earning money
b) Achieving fame
c) Helping others in need
d) Increasing personal wealth

23) Integrity refers to: _____
a) Working hard at any cost
b) Being honest and having strong moral principles
c) Competing with others
d) Disregarding rules for personal gain

24) The concept of "work ethics" includes: _____
a) The right to leave work early
b) Consistently producing quality work
c) Avoiding all responsibilities
d) Expecting promotions without effort

25) The primary purpose of service learning is _____.
a) Earning money while volunteering
b) Acquiring knowledge through practical experiences
c) Participating in online courses
d) Building a professional career

26) Civic virtue is: _____
a) Attending religious services
b) Demonstrating good behavior and contributing to the welfare of society
c) Building personal wealth
d) Following family traditions

27) The following is an example of "respect for others" is _____.
a) Ignoring people's opinions
b) Listening attentively to others and valuing their viewpoints
c) Interrupting others in conversations
d) Arguing to prove your point

28) Living peacefully involves: _____
a) Suppressing all emotions
b) Treating others with kindness and understanding
c) Avoiding any conflict
d) Always agreeing with others

29) The value of "caring" means: _____
a) Always focusing on personal success
b) Showing concern and compassion for others
c) Ignoring the needs of others
d) Only helping when there is a reward

30) Honesty is best defined as: _____
a) Telling the truth regardless of the consequences
b) Saying only what others want to hear
c) Keeping secrets for friends
d) Telling lies to avoid conflict

31) According to Kohlberg's theory, the highest stage of moral development is: _____
a) Obedience and punishment orientation
b) Conventional morality
c) Post-conventional morality
d) Self-interest orientation

32) Which of the following is a key characteristic of Gilligan's moral development theory?
a) Emphasis on justice and rights
b) Focus on the value of relationships and care
c) Focus on maximizing personal gain
d) Belief that all moral issues are universal and objective

33) Which of the following models of professional roles emphasizes the engineer's responsibility to society and the public welfare?
a) The Engineer as Technocrat
b) The Engineer as Contractor
c) The Engineer as Guardian
d) The Engineer as Entrepreneur

34) Which theory of moral development emphasizes the importance of care and relationships, particularly for women?
a) Kohlberg's theory
b) Aristotle's virtue ethics
c) Gilligan's theory
d) Rawls' theory of justice

35) Which model of professional role in engineering sees the engineer as a neutral expert, focused only on technical competence without concern for social values?
a) The Engineer as Guardian
b) The Engineer as Technocrat
c) The Engineer as Entrepreneur
d) The Engineer as Contractor

36) Which ethical theory suggests that individuals should act in ways that maximize their own happiness and well-being?

a) Deontological ethics b) Utilitarianism
c) Ethical egoism d) Virtue ethics

37) The concept of "professional ethics" in engineering involves: _____

a) The personal beliefs of engineers
b) The specific ethical standards and principles set by professional organizations
c) The opinions of senior management
d) The religious views of the engineers

38) In engineering ethics, a "conflict of interest" occurs when: _____

a) Engineers prioritize their personal interests over their professional duties
b) Engineers follow the orders of their superiors without question
c) Engineers act in ways that promote the well-being of society
d) Engineers make decisions based solely on technical expertise

39) In engineering ethics, what is the purpose of "risk assessment"?

a) To identify and mitigate potential dangers and harm to society
b) To increase profits and minimize costs
c) To ensure that engineers do not make mistakes
d) To promote the engineer's personal career advancement

40) What does "ethical responsibility" in engineering imply?

a) Only following orders from superiors
b) Making decisions that benefit only the company
c) Balancing technical, legal, and moral considerations to ensure public safety and well-being
d) Prioritizing efficiency over quality

41) Safety and risk primarily deal with: _____

a) Managing hazards and assessing potential harm
b) Legal contracts
c) Maximizing productivity
d) Reducing work hours

42) Risk-benefit analysis involves: _____

a) Estimating the cost of a project
b) Evaluating potential risks against possible benefits
c) Managing legal liabilities
d) Defining workplace responsibilities

43) The Chernobyl disaster is an example of: _____

a) A technological breakthrough
b) An ethical failure in managing risks
c) A successful safety protocol implementation
d) An engineering success

44) Which of the following is a key factor in assessing safety and risk?
a) The cost of implementation
b) The likelihood and impact of potential hazards
c) The speed of technology adoption
d) The market demand for a product

45) The Three Mile Island incident was caused by: _____
a) Technological failure
b) Natural disasters
c) Lack of training for engineers
d) Poor risk assessment and safety protocol failures

46) Collegiality in a professional setting refers to: _____
a) Loyalty to your employer
b) Cooperation and mutual respect among colleagues
c) Competing for individual success
d) Avoiding work conflicts

47) Professional loyalty involves: _____
a) Reporting colleagues' mistakes publicly
b) Protecting the interests of the team or organization
c) Ignoring safety violations to avoid
d) Disclosing confidential information for personal conflict gain

48) Employee rights include: _____
a) The right to work without discrimination
b) The right to disregard company policies
c) The right to personal opinion but not affecting work
d) The right to ignore workplace safety standards

49) Intellectual Property Rights (IPR) protect: _____
a) The financial interests of corporations
b) The ownership and use of creative ideas and inventions
c) The physical assets of a company
d) Workplace performance evaluations

50) *Risk assessment* is important because it helps in: _____
a) Evaluating the potential impact of hazards on health and safety
b) Minimizing workplace productivity
c) Defining job roles
d) Ignoring environmental issues

Answer

Q.1 Choose the correct alternatives from the options.

1) According to Kohlberg's theory, the highest stage of moral development is: _____
a) Obedience and punishment orientation
b) Conventional morality
c) Post-conventional morality
d) Self-interest orientation

2) Which of the following is a key characteristic of Gilligan's moral development theory?
a) Emphasis on justice and rights
b) Focus on the value of relationships and care
c) Focus on maximizing personal gain
d) Belief that all moral issues are universal and objective

3) Which of the following models of professional roles emphasizes the engineer’s responsibility to society and the public welfare?
a) The Engineer as Technocrat
b) The Engineer as Contractor
c) The Engineer as Guardian
d) The Engineer as Entrepreneur

4) Which theory of moral development emphasizes the importance of care and relationships, particularly for women?
a) Kohlberg's theory b) Aristotle's virtue ethics
c) Gilligan's theory d) Rawls' theory of justice

5) Which model of professional role in engineering sees the engineer as a neutral expert, focused only on technical competence without concern for social values?

a) The Engineer as Guardian
b) The Engineer as Technocrat
c) The Engineer as Entrepreneur
d) The Engineer as Contractor

6) Which ethical theory suggests that individuals should act in ways that maximize their own happiness and well-being?

a) Deontological ethics b) Utilitarianism
c) Ethical egoism d) Virtue ethics

7) The concept of "professional ethics" in engineering involves: _____

a) The personal beliefs of engineers
b) The specific ethical standards and principles set by professional organizations
c) The opinions of senior management
d) The religious views of the engineers

8) In engineering ethics, a "conflict of interest" occurs when: _____

a) Engineers prioritize their personal interests over their professional duties
b) Engineers follow the orders of their superiors without question
c) Engineers act in ways that promote the well-being of society
d) Engineers make decisions based solely on technical expertise

9) In engineering ethics, what is the purpose of "risk assessment"?

a) To identify and mitigate potential dangers and harm to society
b) To increase profits and minimize costs
c) To ensure that engineers do not make mistakes
d) To promote the engineer's personal career advancement

10) What does "ethical responsibility" in engineering imply?

a) Only following orders from superiors
b) Making decisions that benefit only the company
c) Balancing technical, legal, and moral considerations to ensure public safety and well-being
d) Prioritizing efficiency over quality

11) Safety and risk primarily deal with: _____

a) Managing hazards and assessing potential harm
b) Legal contracts
c) Maximizing productivity
d) Reducing work hours

12) Risk-benefit analysis involves: _____
a) Estimating the cost of a project
b) Evaluating potential risks against possible benefits
c) Managing legal liabilities
d) Defining workplace responsibilities

13) The Chernobyl disaster is an example of: _____
a) A technological breakthrough
b) An ethical failure in managing risks
c) A successful safety protocol implementation
d) An engineering success

14) Which of the following is a key factor in assessing safety and risk?
a) The cost of implementation
b) The likelihood and impact of potential hazards
c) The speed of technology adoption
d) The market demand for a product

15) The Three Mile Island incident was caused by: _____
a) Technological failure
b) Natural disasters
c) Lack of training for engineers
d) Poor risk assessment and safety protocol failures

16) Collegiality in a professional setting refers to: _____
a) Loyalty to your employer
b) Cooperation and mutual respect among colleagues
c) Competing for individual success
d) Avoiding work conflicts

17) Professional loyalty involves: _____
a) Reporting colleagues' mistakes publicly
b) Protecting the interests of the team or organization
c) Ignoring safety violations to avoid
d) Disclosing confidential information for personal conflict gain

18) Employee rights include: _____
a) The right to work without discrimination
b) The right to disregard company policies
c) The right to personal opinion but not affecting work
d) The right to ignore workplace safety standards

19) Intellectual Property Rights (IPR) protect: _____
a) The financial interests of corporations
b) The ownership and use of creative ideas and inventions
c) The physical assets of a company
d) Workplace performance evaluations

20) *Risk assessment* is important because it helps in: _____
a) Evaluating the potential impact of hazards on health and safety
b) Minimizing workplace productivity
c) Defining job roles
d) Ignoring environmental issues

21) In risk management, mitigation strategies aim to: _____
a) Accept all risks in the workplace
b) Reduce or eliminate identified risks
c) Increase the likelihood of hazards
d) Focus only on maximizing profits

22) Which of the following is a potential consequence of *occupational crime*?
a) Increased workplace productivity
b) Legal consequences and loss of reputation
c) Improvement in company safety standards
d) Higher employee satisfaction

23) Risk reduction in engineering refers to: _____
a) Implementing measures to lower the chances of accidents
b) Increasing the number of hazards in the work environment
c) Ignoring potential risks
d) Cutting costs by removing safety measures

24) Public safety regulations are primarily designed to: _____
a) Ensure the safety of the company's assets
b) Protect the general public from potential harm
c) Increase revenue for the government
d) Focus only on preventing natural disasters

25) Multinational corporations (MNCs) are characterized by: _____
a) Operations in multiple countries with a centralized headquarters
b) Operating only in their home country
c) Limited influence on global markets
d) No responsibility toward environmental concerns

26) Environmental ethics primarily deals with: _____
a) Human responsibility to manage the environment and natural resources
b) Minimizing corporate profits
c) Technological advancements in engineering
d) Treating employees equally

27) Which of the following is NOT an example of environmental ethics?
a) Reducing pollution and waste
b) Maximizing resource use regardless of environmental impact
c) Preserving biodiversity
d) Sustainable development

28) Computer ethics involves: _____
a) Programming and coding without considering social consequences
b) Understanding the moral implications of computing technologies
c) Focusing only on technological innovation
d) Ignoring privacy issues

29) Weapons development ethics deals with: _____
a) The development of new technologies to enhance military capabilities
b) Restricting the use of all technological advancements
c) Focusing only on civilian safety
d) Only addressing the legal aspects of weapon development

30) Engineers as managers are expected to: _____
a) Focus solely on technical tasks
b) Lead teams, make strategic decisions, and manage projects
c) Ignore the business aspects of their work
d) Avoid taking responsibility for team outcomes

31) Consulting engineers are hired to: _____
a) Work on projects within the company they are employed
b) Provide expert advice on technical and engineering problems
c) Manage public relations for a company
d) Conduct legal investigations

32) Engineers acting as expert witnesses typically: _____
a) Present evidence and offer testimony in legal cases
b) Focus on public relations during a case
c) Manage engineering projects for legal firms
d) Directly represent the interests of a company in court

33) Sample Code of Ethics of professional organizations typically includes: _____
a) Guidelines for acceptable behavior and decision-making
b) Rules for maximizing profits at any cost
c) Detailed technical specifications for projects
d) Guidelines for political involvement in engineering

34) ASME stands for: _____
a) American Society of Mechanical Engineers
b) American Society of Management Engineers
c) Association of Safety and Mechanical Engineers
d) Association of Scientific and Mechanical Engineers

35) The ASCE Code of Ethics emphasizes: _____
a) Following only local regulations
b) Maintaining professional integrity and responsibility
c) Focusing on personal financial gain
d) Ignoring environmental impacts

36) **T**he IEEE Code of Ethics is primarily concerned with: _____
a) Fostering professional competence and integrity
b) Protecting corporate secrets
c) Maximizing technological advancements at any cost
d) Developing weapons for defense purposes

37) Global issues in engineering ethics include: _____
a) Cultural differences in engineering practices
b) Lack of understanding between technical and ethical concerns
c) Addressing both local and international engineering challenges
d) All of the above

38) A key challenge faced by multinational corporations is: _____
a) Balancing profits with social and environmental
b) Competing only within their home country responsibilities
c) Focusing solely on domestic issues
d) Ignoring corporate social responsibility

39) Empathy is the ability to: _____
a) Solve problems logically
b) Understand and share the feelings of others
c) Be indifferent to others' emotions
d) Only care about your own well-being

40) The quality of "caring" includes: _____
a) Showing concern for others' well-being
b) Ignoring the needs of others
c) Only helping family and friends
d) Seeking praise for helping others

41) The primary meaning of "ethics"?
a) Financial management
b) Principles governing the behavior of individuals
c) Rules for social interaction
d) Legal frameworks for business

42) The following is an example of a moral value?
a) Earning money
b) Achieving fame
c) Helping others in need
d) Increasing personal wealth

43) Integrity refers to: _____
a) Working hard at any cost
b) Being honest and having strong moral principles
c) Competing with others
d) Disregarding rules for personal gain

44) The concept of "work ethics" includes: _____
a) The right to leave work early
b) Consistently producing quality work
c) Avoiding all responsibilities
d) Expecting promotions without effort

45) The primary purpose of service learning is _____.
a) Earning money while volunteering
b) Acquiring knowledge through practical experiences
c) Participating in online courses
d) Building a professional career

46) Civic virtue is: _____
a) Attending religious services
b) Demonstrating good behavior and contributing to the welfare of society
c) Building personal wealth
d) Following family traditions

47) The following is an example of "respect for others" is _____.
a) Ignoring people's opinions
b) Listening attentively to others and valuing their viewpoints
c) Interrupting others in conversations
d) Arguing to prove your point

48) Living peacefully involves: _____
a) Suppressing all emotions
b) Treating others with kindness and understanding
c) Avoiding any conflict
d) Always agreeing with others

49) The value of "caring" means: _____
a) Always focusing on personal success
b) Showing concern and compassion for others
c) Ignoring the needs of others
d) Only helping when there is a reward

50) Honesty is best defined as: _____

a) Telling the truth regardless of the consequences
b) Saying only what others want to hear
c) Keeping secrets for friends
d) Telling lies to avoid conflict

Professional Ethics (VEC-02)

Day & Date: Wednesday, 11-06-2025 Max. Marks: 50
Time: 10:00 AM To 11:30 AM

Instructions: 1) All questions are compulsory.
2) Figures to the right indicate full marks.
3) Mention Question Paper Set (P/Q/R/S) on Top of Page.

Answer

Q.1 Choose the correct alternatives from the options.

1) Consulting engineers are hired to: _____
a) Work on projects within the company they are employed
b) Provide expert advice on technical and engineering problems
c) Manage public relations for a company
d) Conduct legal investigations

2) Engineers acting as expert witnesses typically: _____
a) Present evidence and offer testimony in legal cases
b) Focus on public relations during a case
c) Manage engineering projects for legal firms
d) Directly represent the interests of a company in court

3) Sample Code of Ethics of professional organizations typically includes: _____
a) Guidelines for acceptable behavior and decision-making
b) Rules for maximizing profits at any cost
c) Detailed technical specifications for projects
d) Guidelines for political involvement in engineering

4) ASME stands for: _____
a) American Society of Mechanical Engineers
b) American Society of Management Engineers
c) Association of Safety and Mechanical Engineers
d) Association of Scientific and Mechanical Engineers

5) The ASCE Code of Ethics emphasizes: _____
a) Following only local regulations
b) Maintaining professional integrity and responsibility
c) Focusing on personal financial gain
d) Ignoring environmental impacts

6) **T**he IEEE Code of Ethics is primarily concerned with: _____
a) Fostering professional competence and integrity
b) Protecting corporate secrets
c) Maximizing technological advancements at any cost
d) Developing weapons for defense purposes

7) Global issues in engineering ethics include: _____
a) Cultural differences in engineering practices
b) Lack of understanding between technical and ethical concerns
c) Addressing both local and international engineering challenges
d) All of the above

8) A key challenge faced by multinational corporations is: _____
a) Balancing profits with social and environmental
b) Competing only within their home country responsibilities
c) Focusing solely on domestic issues
d) Ignoring corporate social responsibility

9) Empathy is the ability to: _____
a) Solve problems logically
b) Understand and share the feelings of others
c) Be indifferent to others' emotions
d) Only care about your own well-being

10) The quality of "caring" includes: _____
a) Showing concern for others' well-being
b) Ignoring the needs of others
c) Only helping family and friends
d) Seeking praise for helping others

11) The primary meaning of "ethics"?
a) Financial management
b) Principles governing the behavior of individuals
c) Rules for social interaction
d) Legal frameworks for business

12) The following is an example of a moral value?
a) Earning money
b) Achieving fame
c) Helping others in need
d) Increasing personal wealth

13) Integrity refers to: _____
a) Working hard at any cost
b) Being honest and having strong moral principles
c) Competing with others
d) Disregarding rules for personal gain

14) The concept of "work ethics" includes: _____
a) The right to leave work early
b) Consistently producing quality work
c) Avoiding all responsibilities
d) Expecting promotions without effort

15) The primary purpose of service learning is _____.
a) Earning money while volunteering
b) Acquiring knowledge through practical experiences
c) Participating in online courses
d) Building a professional career

16) Civic virtue is: _____
a) Attending religious services
b) Demonstrating good behavior and contributing to the welfare of society
c) Building personal wealth
d) Following family traditions

17) The following is an example of "respect for others" is _____.
a) Ignoring people's opinions
b) Listening attentively to others and valuing their viewpoints
c) Interrupting others in conversations
d) Arguing to prove your point

18) Living peacefully involves: _____
a) Suppressing all emotions
b) Treating others with kindness and understanding
c) Avoiding any conflict
d) Always agreeing with others

19) The value of "caring" means: _____
a) Always focusing on personal success
b) Showing concern and compassion for others
c) Ignoring the needs of others
d) Only helping when there is a reward

20) Honesty is best defined as: _____
a) Telling the truth regardless of the consequences
b) Saying only what others want to hear
c) Keeping secrets for friends
d) Telling lies to avoid conflict

21) According to Kohlberg's theory, the highest stage of moral development is: _____

a) Obedience and punishment orientation
b) Conventional morality
c) Post-conventional morality
d) Self-interest orientation

22) Which of the following is a key characteristic of Gilligan's moral development theory?

a) Emphasis on justice and rights
b) Focus on the value of relationships and care
c) Focus on maximizing personal gain
d) Belief that all moral issues are universal and objective

23) Which of the following models of professional roles emphasizes the engineer's responsibility to society and the public welfare?

a) The Engineer as Technocrat
b) The Engineer as Contractor
c) The Engineer as Guardian
d) The Engineer as Entrepreneur

24) Which theory of moral development emphasizes the importance of care and relationships, particularly for women?

a) Kohlberg's theory
b) Aristotle's virtue ethics
c) Gilligan's theory
d) Rawls' theory of justice

25) Which model of professional role in engineering sees the engineer as a neutral expert, focused only on technical competence without concern for social values?

a) The Engineer as Guardian
b) The Engineer as Technocrat
c) The Engineer as Entrepreneur
d) The Engineer as Contractor

26) Which ethical theory suggests that individuals should act in ways that maximize their own happiness and well-being?

a) Deontological ethics
b) Utilitarianism
c) Ethical egoism
d) Virtue ethics

27) The concept of "professional ethics" in engineering involves: _____

a) The personal beliefs of engineers
b) The specific ethical standards and principles set by professional organizations
c) The opinions of senior management
d) The religious views of the engineers

28) In engineering ethics, a "conflict of interest" occurs when: _____
a) Engineers prioritize their personal interests over their professional duties
b) Engineers follow the orders of their superiors without question
c) Engineers act in ways that promote the well-being of society
d) Engineers make decisions based solely on technical expertise

29) In engineering ethics, what is the purpose of "risk assessment"?
a) To identify and mitigate potential dangers and harm to society
b) To increase profits and minimize costs
c) To ensure that engineers do not make mistakes
d) To promote the engineer's personal career advancement

30) What does "ethical responsibility" in engineering imply?
a) Only following orders from superiors
b) Making decisions that benefit only the company
c) Balancing technical, legal, and moral considerations to ensure public safety and well-being
d) Prioritizing efficiency over quality

31) Safety and risk primarily deal with: _____
a) Managing hazards and assessing potential harm
b) Legal contracts
c) Maximizing productivity
d) Reducing work hours

32) Risk-benefit analysis involves: _____
a) Estimating the cost of a project
b) Evaluating potential risks against possible benefits
c) Managing legal liabilities
d) Defining workplace responsibilities

33) The Chernobyl disaster is an example of: _____
a) A technological breakthrough
b) An ethical failure in managing risks
c) A successful safety protocol implementation
d) An engineering success

34) Which of the following is a key factor in assessing safety and risk?
a) The cost of implementation
b) The likelihood and impact of potential hazards
c) The speed of technology adoption
d) The market demand for a product

35) The Three Mile Island incident was caused by: _____
a) Technological failure
b) Natural disasters
c) Lack of training for engineers
d) Poor risk assessment and safety protocol failures

36) Collegiality in a professional setting refers to: _____
a) Loyalty to your employer
b) Cooperation and mutual respect among colleagues
c) Competing for individual success
d) Avoiding work conflicts

37) Professional loyalty involves: _____
a) Reporting colleagues' mistakes publicly
b) Protecting the interests of the team or organization
c) Ignoring safety violations to avoid
d) Disclosing confidential information for personal conflict gain

38) Employee rights include: _____
a) The right to work without discrimination
b) The right to disregard company policies
c) The right to personal opinion but not affecting work
d) The right to ignore workplace safety standards

39) Intellectual Property Rights (IPR) protect: _____
a) The financial interests of corporations
b) The ownership and use of creative ideas and inventions
c) The physical assets of a company
d) Workplace performance evaluations

40) *Risk assessment* is important because it helps in: _____
a) Evaluating the potential impact of hazards on health and safety
b) Minimizing workplace productivity
c) Defining job roles
d) Ignoring environmental issues

41) In risk management, mitigation strategies aim to: _____
a) Accept all risks in the workplace
b) Reduce or eliminate identified risks
c) Increase the likelihood of hazards
d) Focus only on maximizing profits

42) Which of the following is a potential consequence of *occupational crime*?
a) Increased workplace productivity
b) Legal consequences and loss of reputation
c) Improvement in company safety standards
d) Higher employee satisfaction

43) Risk reduction in engineering refers to: _____
a) Implementing measures to lower the chances of accidents
b) Increasing the number of hazards in the work environment
c) Ignoring potential risks
d) Cutting costs by removing safety measures

44) Public safety regulations are primarily designed to: _____
a) Ensure the safety of the company's assets
b) Protect the general public from potential harm
c) Increase revenue for the government
d) Focus only on preventing natural disasters

45) Multinational corporations (MNCs) are characterized by: _____
a) Operations in multiple countries with a centralized headquarters
b) Operating only in their home country
c) Limited influence on global markets
d) No responsibility toward environmental concerns

46) Environmental ethics primarily deals with: _____
a) Human responsibility to manage the environment and natural resources
b) Minimizing corporate profits
c) Technological advancements in engineering
d) Treating employees equally

47) Which of the following is NOT an example of environmental ethics?
a) Reducing pollution and waste
b) Maximizing resource use regardless of environmental impact
c) Preserving biodiversity
d) Sustainable development

48) Computer ethics involves: _____
a) Programming and coding without considering social consequences
b) Understanding the moral implications of computing technologies
c) Focusing only on technological innovation
d) Ignoring privacy issues

49) Weapons development ethics deals with: _____
a) The development of new technologies to enhance military capabilities
b) Restricting the use of all technological advancements
c) Focusing only on civilian safety
d) Only addressing the legal aspects of weapon development

50) Engineers as managers are expected to: _____
a) Focus solely on technical tasks
b) Lead teams, make strategic decisions, and manage projects
c) Ignore the business aspects of their work
d) Avoid taking responsibility for team outcomes

Set P

F.Y. (B.Tech.) (Sem - II) (CBCS) Examination: March/April-2025
Engineering Graphics & CAD (BTN10206)

Day & Date: Tuesday, 17-06-2025 Max. Marks: 70
Time: 03:00 PM To 07:00 PM

Instructions: 1) All questions are compulsory.
2) Figures to the right indicates full marks.
3) Retain all construction lines.
4) Assume suitable dimensions, wherever required and mention it clearly.
5) All dimensions are in 'mm'.

Note: Objective type question paper must be returned after first 40 minutes strictly.

Section – I

Duration:40 Minutes **Marks:14**

Q.1 Solve any four objective type question from the following. **14**

1. Attempt any two questions from a) to d)
2. Questions e) & f) are compulsory.

a) **Refer Fig. (a):** Find out distance between parallel lines AB & CD **03**

b) **Refer Fig. (b):** Find out the shortest (perpendicular) distance between point C and given line AB. **03**

c) **Refer Fig. (c):** Complete projection of line PQ and find its true length if **03**
1) Grade is +70% w.r.to 'P'
2) Bearing is S 60 E w.r.to 'P'
3) Top view of line measures 60 mm.

d) R**efer Fig. (d):** Find out grade and bearing of line PQ, if **03**
1) Its inclination with horizontal plane is 30^0
2) Inclination of the line with VP is 60^0
3) True length is 70 mm.

e) **Refer Fig. (e):** Complete projections of plane ABC, if it strikes S45E w.r.to A and dips 30^0 North Easterly. **04**

f) **Refer Fig. (f):** Find the strike and Dip of given Plane ABC. **04**

Q.2 Solve the following

a) A line AB has its front view length of 50 mm with a true length of 70 mm. The inclination with horizontal reference plane is 45^0. Draw the projections of AB & find its true inclination with frontal reference plane. Consider point A 20 mm above horizontal reference plane and 20 mm in front of vertical plane. **04**

b) A line AB has front view length (FVL) of 50 mm and apparent inclination of 45^0 with HRP. The line carries a true inclination of 30^0 with FRP(VP). Complete the projections of the line and determine the true inclination with horizontal reference plane. Consider point A 20 mm above horizontal reference plane and 20 mm in front of vertical plane. **03**

c) A rectangle ABCD of sides 50 mm and 80 mm long has its shorter side in the frontal reference plane (VP). It is inclined to VP (FRP) such that is FV (Elevation) appears as a square. Complete the projections & find inclination of the plane with VP. **04**

Q.3 A pentagon of 30 mm side has its side AB in horizontal reference plane (HP). The surface of the plane makes an angle of 45^0 with the horizontal reference plane and the resting edge makes 30^0 to frontal reference plane (VP). Complete the projections of the plane. **07**

Q.4 A square prism, side of base 40 mm & axis 70 mm long, has a corner of base in Horizontal reference plane (HP) and the axis is inclined at 45^0 to horizontal reference plane. The loner edge through the resting corner makes 30^0 to vertical reference plane (VP). Complete its projections. **10**

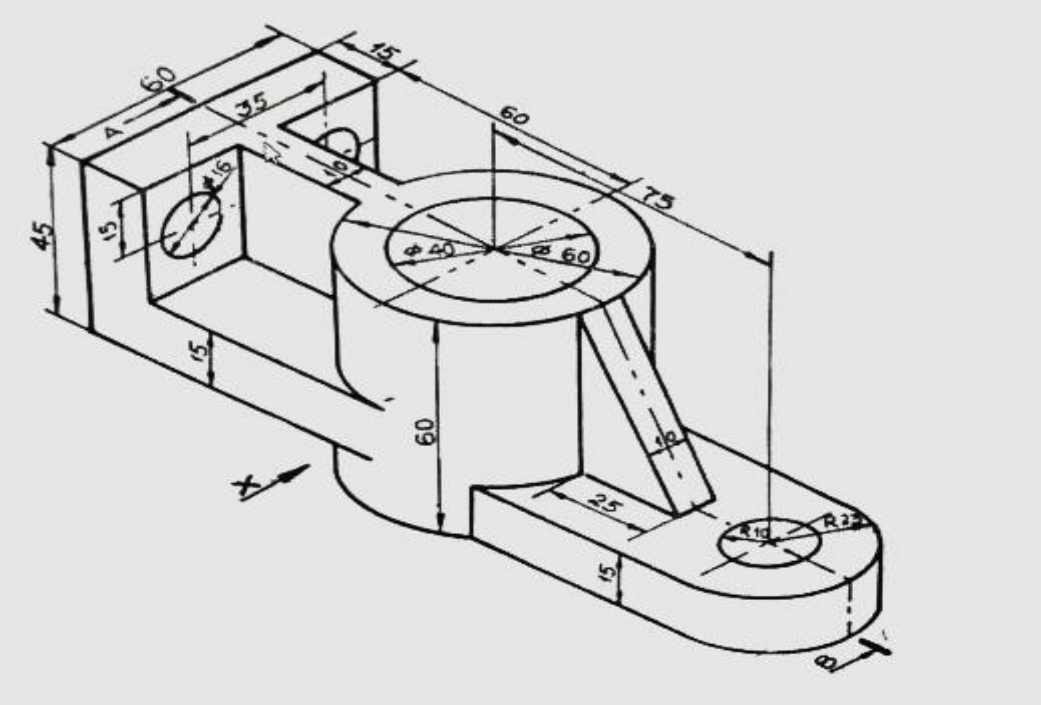
OR

A pentagonal pyramid, base 40 mm side & axis 70 mm long, has side of base in horizontal reference plane & inclined at 30^0 to vertical reference plane. The axis of the pyramid is inclined at 45^0 to horizontal reference plane. Complete its projections, when the apex is nearer to observer.

Section – II

Q.5 Figure shows isometric view of machine component, draw the following views: **18**

a) Sectional F. V. along A-A looking in the direction X
b) Right hand side view
c) Top View



Q.6 A square pyramid, base 30 mm side and axis 60 mm long, stands vertically on the ground (HP) with all the base edges equally inclined to vertical plane. It is cut by a section plane perpendicular to vertical reference plane and inclined at 45^0 to horizontal reference plane which passing through a point on axis 20 mm from apex. Draw the front view, sectional top view and true shape of section. **10**

OR

A cylinder, diameter of base 60 mm & height 80 mm has its base in horizontal reference plane. It is cut by an auxiliary inclined plane in such a way that true shape of section is an ellipse with maximum possible size. Draw front view, sectional top view and true shape of section.
