9) When the axes of first and last gear are co-axial, then gear train is known as _____
a) simple gear train b) compound gear train
c) reverted gear train d) epicyclic gear train

10) A differential gear in an automobile is a _____
a) simple gear train b) epicyclic gear train
c) compound gear train d) none of these

11) When the sleeve of a Porter governor moves upwards, the governor speed _____.
a) increase b) decreases
c) remains unaffected d) may increase or decrease

12) A Hartnell governor is a _____
a) pendulum type governor b) spring loaded governor
c) dead weight governor d) inertia governor

13) For static balancing of a shaft, _____
a) the net dynamic force acting on the shaft is equal to zero
b) the net couple due to the dynamic forces acting on the shaft is equal to zero
c) both (a) and (b)
d) none of the above

14) In order to have a complete balance of the several revolving masses in different planes _____
a) the resultant force must be zero
b) the resultant couple must be zero
c) both the resultant force and couple must be zero
d) none of the above

S.Y. (B.Tech.) (Sem - II) (New) (CBCS) Examination: March/April-2025
MECHANICAL ENGINEERING
Kinematics and Theory of Machine (MECHPCC-04)

Day & Date: Monday 26-05-2025 Max. Marks: 56
Time: 10:00 AM To 01:00 PM

Instructions: 1) Solve any two questions from each Section.
2) Use of scientific calculator is allowed.
3) Figures to right indicate full marks.
4) Assume additional suitable data if necessary and state it clearly.
5) Use university graph paper & semi-log paper if required.

SECTION – I

Q.2 Attempt the following.

a) Explain different kinds of kinematic pairs giving example for each of them. **04**

b) Explain Kutzbach's criterion for planar mechanisms with suitable examples. **04**

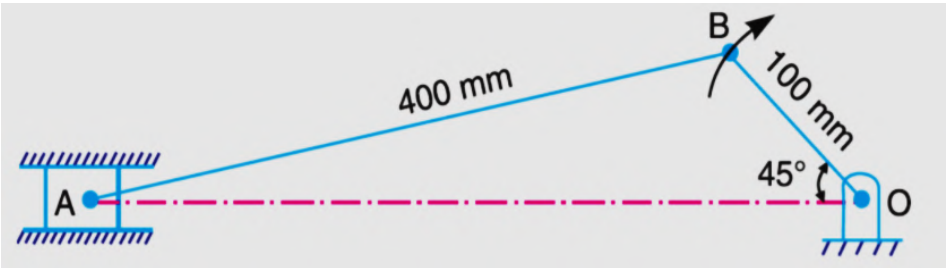
c) In a four-bar chain ABCD, AD is fixed and is 150 mm long. The crank AB is 40 mm long and rotates at 120 r.p.m. clockwise, while the link CD = 80 mm oscillates about D. BC and AD are of equal length. Find the angular velocity of link CD when angle BAD = 60°. **06**

Q.3 Attempt the following.

a) What is inversion of mechanism? Explain any two inversions of slider crank mechanism. **06**

b) Locate all the instantaneous centres of the slider crank mechanism as shown in below figure. The lengths of crank OB and connecting rod AB are 100 mm and 400 mm respectively. If the crank rotates clockwise with an angular velocity of 10 rad/s, find: **08**

i) Velocity of the slider A, and
ii) Angular velocity of the connecting rod AB.



Q.4 Attempt the following.

a) Explain with neat sketch different types of cams and followers. **06**

b) A cam is to be designed for a knife edge follower with the following data: **08**

i) Cam lift = 40 mm during 90° of cam rotation with simple harmonic motion.

ii) Dwell for the next 30°.

iii) During the next 60° of cam rotation, the follower returns to its original position with simple harmonic motion.

iv) Dwell during the remaining 180°.

Draw the profile of the cam when the line of stroke of the follower passes through the axis of the cam shaft. The radius of the base circle of the cam is 40 mm. Determine the maximum velocity and acceleration of the follower during its ascent and descent, if the cam rotates at 240 r.p.m.

SECTION – II

Q.5 Attempt the following.

a) Define the following terms. **04**

i) Addendum

ii) Dedendum

iii) Module

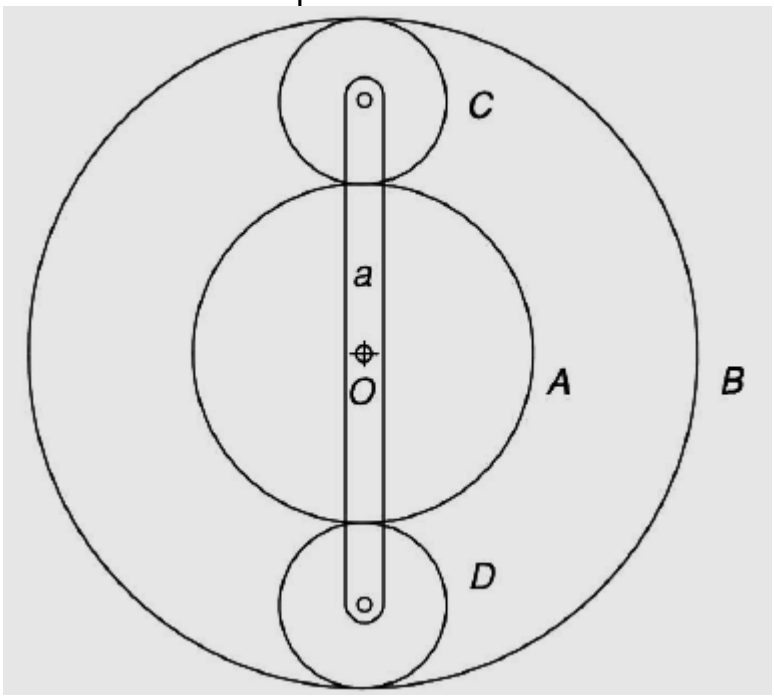
iv) Circular Pitch

b) Differentiate between Involute & Cycloidal Gear Teeth Profile. **04**

c) An Epicyclic gear train is as shown in figure below. The number of teeth on A and B are 80 and 200. Determine the speed of the arm a **06**

i) if A rotates at 100 rpm clockwise and B at 50 rpm counterclockwise.

ii) if A rotates at 100 rpm clockwise and B is stationary.



Q.6 Attempt the following.

a) Define and explain the following terms relating to governors: **06**
- i) Stability
- ii) Sensitiveness
- iii) Isochronous governor
- iv) Hunting
- v) Effort of a governor
- vi) Power of a governor

b) The arms of a Porter governor are each 250 mm long and pivoted on the governor axis. The mass of each ball is 5 kg and the mass of the central sleeve is 30 kg. The radius of rotation of the balls is 150 mm when the sleeve begins to rise and reaches a value of 200 mm for maximum speed. Determine the speed range of the governor. If the friction at the sleeve is equivalent of 20 N of load at the sleeve, determine how the speed range is modified. **08**

Q.7 Attempt the following.

a) Write a short note on static balancing and dynamic balancing. **04**

b) A, B, C and D are four masses carried by a rotating shaft at radii 100, 125, 200 and 150 mm respectively. The planes in which the masses revolve are spaced 600 mm apart and the mass of B, C and D are 10 kg, 5 kg, and 4 kg respectively. **10**

Find the required mass A and the relative angular settings of the four masses so that the shaft shall be in complete balance.

Kinematics and Theory of Machine (MECHPCC-04)

Day & Date: Monday 26-05-2025 Max. Marks: 70
Time: 10:00 AM To 01:00 PM

Instructions: 1) Q. No. 1 is compulsory. It should be solved in the first 30 minutes in Answer Book Page no 03 (Starting page of the Answer Book). Each question carries one mark.
2) Don't forget to Mention question paper set (P/Q/R/S) on top of page.
3) Figures to the right indicates full marks.

MCQ/Objective Type Questions

Duration: 30 Minutes Marks: 14

Q.1 Choose the correct answer: 14

1) The type of gears used to connect two non-parallel non-intersecting shafts are _____

a) spur gears b) helical gears
c) spiral gears d) none of these

2) When the axes of first and last gear are co-axial, then gear train is known as _____

a) simple gear train b) compound gear train
c) reverted gear train d) epicyclic gear train

3) A differential gear in an automobile is a _____

a) simple gear train b) epicyclic gear train
c) compound gear train d) none of these

4) When the sleeve of a Porter governor moves upwards, the governor speed _____.

a) increase b) decreases
c) remains unaffected d) may increase or decrease

5) A Hartnell governor is a _____

a) pendulum type governor b) spring loaded governor
c) dead weight governor d) inertia governor

6) For static balancing of a shaft, _____

a) the net dynamic force acting on the shaft is equal to zero
b) the net couple due to the dynamic forces acting on the shaft is equal to zero
c) both (a) and (b)
d) none of the above

7) In order to have a complete balance of the several revolving masses in different planes _____
a) the resultant force must be zero
b) the resultant couple must be zero
c) both the resultant force and couple must be zero
d) none of the above

8) In a mechanism which one is true _____
a) All links fixed b) One link is fixed
c) All links free d) None of the above

9) The lead screw of a lathe with nut forms a _____
a) sliding pair b) rolling pair
c) screw pair d) turning pair

10) The mechanism forms a structure, when the number of degrees of freedom (n) is equal to _____
a) 0 b) 1
c) 2 d) -1

11) The component of acceleration along the link is called as _____
a) Radial component b) Tangential component
c) Coriolis component d) None

12) The direction of linear velocity of any point on a link with respect to another point on the same link is _____
a) parallel to the link joining the points
b) perpendicular to the link joining the points
c) at 45° to the link joining the points
d) none of these

13) The size of cam depends upon _____
a) base circle b) pitch circle
c) Prime circle d) Pitch curve

14) Offset is provided to a cam follower mechanism to _____
a) minimize the side thrust b) accelerate
c) avoid jerk d) none of these

MCQ/Objective Type Questions

Duration: 30 Minutes Marks:14

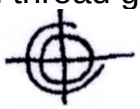
Q.1 Choose the correct answer.

Type - 1: Straight Objective Type / classical MCQ **05**
(Each bit one Mark each).

1) The length to width ratio of an arrowhead should be limited to
a) 1 : 2 b) 1 : 3
c) 3 : 1 d) 2 : 1

2) Standard size for A2 drawing sheet is as per BIS in mm is ____
a) 594×841 b) 297×420
c) 210×297 d) 420×594

3) This is the symbol for internal thread geometry.



a) True b) False

4) Angle of Knuckle thread is _____ degrees.
a) 90° b) 50°
c) 45° d) 30°

5) In the solid flanged couplings, the flange is ____.
a) Separate, mounted using a sunk key
b) Integral with the shaft
c) Fitted with interference fit
d) Fitted with clearance fit

Type - 2 Correct or Incorrect (Attempt any two) **02**
(Each bit One Mark each)

1) A hole whose lower deviation is zero is called as Hole basic hole.
2) Woodruff key is a type of sunk key.
3) The size across flats in hexagonal nut is 2D

Type - 3 multiple correct answer type. (Solve any two) **04**
(Each correct bit 2 mark)

1) In bushed journal bearing bush usually made of soft material such as _____.

a) Cast Iron b) Brass
c) Bronze d) Linoleum

2) $8.70^{\pm 0.10, 0.00}$ is example of _____ tolerance.

a) Unilateral b) Bilateral
c) Geometrical d) None of the above

3) 
Fig represents dimensioning of _____

a) Arc b) Diameter
c) Radius d) Flat

Q.3 a) Solve any Four out of five. (Every bit has 2 marks) **08**

Draw the BIS Convention of

1) Splined Shaft
2) Bevel Gear
3) Single Bevel Butt Weld
4) Draw any four dimensioning Common Feature
5) Draw Chain and parallel placing of Dimensioning

b) Freehand sketching for the Following (Any One) **05**

1) Knuckle Joint
2) Eye Foundation Bolt

Q.4 a) Draw the BIS Convention for Following (Any Two) **04**

1) Solid Journal Bearing
2) Hexagonal headed Bolt
3) Flat belt pulley

b) Draw the Freehand Sketching for the Following (Any One) **06**

1) Protected Flange Coupling
2) Double Riveted Double Strap Butt Joint

Q.5 Solve the Following:

a) Define following Term and Show it by drawing hole and shaft figure **05**
i) Basic Size ii) Zero line iii) Deviation iv) Limits

b) Redraw the fig. with given dimension and show following geometrical symbol and tolerance **06**

1) Concentricity of 50mm has bilateral tolerance of 0.01 mm.
2) Surface A Straight with 0.01 mm.
3) Surface B grounded with Ra value 10 Micron.

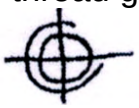
MCQ/Objective Type Questions

Duration: 30 Minutes Marks:14

Q.1 Choose the correct answer.

Type - 1: Straight Objective Type / classical MCQ **05**
(Each bit one Mark each).

1) This is the symbol for internal thread geometry.



a) True b) False

2) Angle of Knuckle thread is _____ degrees.
a) 90° b) 50°
c) 45° d) 30°

3) In the solid flanged couplings, the flange is ____.
a) Separate, mounted using a sunk key
b) Integral with the shaft
c) Fitted with interference fit
d) Fitted with clearance fit

4) The length to width ratio of an arrowhead should be limited to
a) 1 : 2 b) 1 : 3
c) 3 : 1 d) 2 : 1

5) Standard size for A2 drawing sheet is as per BIS in mm is ____
a) 594×841 b) 297×420
c) 210×297 d) 420×594

Type - 2 Correct or Incorrect (Attempt any two) **02**
(Each bit One Mark each)

1) A hole whose lower deviation is zero is called as Hole basic hole.
2) Woodruff key is a type of sunk key.
3) The size across flats in hexagonal nut is 2D

Type - 3 multiple correct answer type. (Solve any two) **04**
(Each correct bit 2 mark)

1) In bushed journal bearing bush usually made of soft material such as _____.

a) Cast Iron b) Brass
c) Bronze d) Linoleum

2) $8.70^{\pm 0.10, 0.00}$ is example of _____ tolerance.

a) Unilateral b) Bilateral
c) Geometrical d) None of the above

3) 
Fig represents dimensioning of _____

MCQ/Objective Type Questions

Duration: 30 Minutes Marks:14

Q.1 Choose the correct answer: **14**

1) Pelton turbine is _____
a) Tangential flow b) Radial flow
c) Axial flow d) Mixed flow

2) The S.I. unit of total pressure on a plane immersed surface is _____
a) Newton per meter square
b) Newton
c) Newton square per meter
d) Newton per meter cube

3) Buoyancy acts on a floating body _____
a) vertically upward
b) horizontally
c) vertically downward
d) both vertically upward and horizontally

4) A large Reynolds number is indication of _____
a) Smooth and streamline flow b) Laminar flow
c) Steady flow d) Highly turbulent flow

5) The Bernoulli's equation refers to conservation of _____
a) mass b) linear momentum
c) angular momentum d) energy

6) Hydraulic Gradient Line is always ____ Total Energy Line.
a) Above b) Below
c) Parallel to d) None of the above

7) Minor losses occur due to _____
a) Sudden enlargement in pipe b) Bends in pipe
c) Sudden contraction in pipe d) All of these

8) The velocity of water in an open channel can be measured by _____
a) Venturimeter b) Rotameter
c) Pitot tube d) Orifice plate

9) The Buckingham-Pi theorem is widely used in the dimensional analysis and expresses the resulting equation in terms of _____
a) the dependent and independent variables
b) n dimensionless parameters
c) (n - m) dimensionless parameters
d) geometric, kinematic and dynamic variables

10) The process of filling the liquid into the suction pipe and the pump casing up to the level of the delivery valve is called _____
a) Filling b) Pumping
c) Priming d) Leveling

11) The turbine preferred for 0 to 25 m head of water is _____
a) Pelton wheel b) Kaplan turbine
c) Tube turbine d) Francis turbine

12) Design of Pelton wheel means the following data is to be determined.
a) Width of buckets b) Number of buckets
c) Depth of buckets d) All of the mentioned

13) In a centrifugal pump, the liquid enters the pump _____
a) at the top b) at the bottom
c) at the centre d) from sides

14) What is the unit of the drag coefficient?
a) N/sec b) m/sec
c) kg/N d) Dimensionless quantity

Seat No.		Set	P

S.Y. (B.Tech.) (Sem - II) (New) (CBCS) Examination: March/April-2025
MECHANICAL ENGINEERING
Fluid mechanics and Fluid Machines (MECHPCC-06)

Day & Date: Friday 30-05-2025 Max. Marks: 56
Time: 10:00 AM To 01:00 PM

Instructions: 1) Solve any two questions from each section.
2) Use of scientific calculator is allowed.
3) Figures to the right indicate full marks.
3) Assume additional suitable data if necessary and state it clearly.
4) Use university graph paper & semi-log paper if required.

Section – I

Q.2 Attempt of the following

a) With a neat sketch explain the conditions of the equilibrium for submerged body. **04**

b) Derive an expression for total pressure and center of pressure on a vertical plane surface immersed in a static liquid. **05**

c) An isosceles triangular plate of base 4m & altitude 4m is immersed vertically in an oil of specific gravity 0.9. The base of plate coincides with free surface of oil. Determine total pressure & centre of pressure. **05**

Q.3 Attempt the following

a) What are the different types of fluid flow? Explain with an example. **05**

b) Define : **04**
1) Stream line 2) Streak Line 3) Path line 4) Equipotential Line

c) An oil of specific gravity 0.8 is flowing through a venturimeter having diameter 20 cm and throat diameter 10 cm. The oil mercury differential manometer shows a reading of 25 cm. Calculate the discharge of the oil through the horizontal venturimeter. Take C_d = 0.98. **05**

Q.4 Attempt the following

a) Explain the different losses that occur in the pipeline connection, with the help of formulae. **05**

b) Derive Dupit's equation for equivalent pipes. **04**

c) The difference in water surface levels in two tanks, which are connected by three pipes in series of lengths 300 m, 170 m and 210 m and of diameters 300 mm, 200 mm and 400 mm respectively, is 12 m. Determine the rate of flow of water if the coefficient of friction are 0.005, 0.0052 and 0.0048 respectively, by neglecting minor losses. **05**

Section – II

Q.5 Attempt the following.

a) The frictional torque T of a disc of diameter D rotating at a speed N in a fluid of viscosity μ and density ρ in a turbulent flow is given by $T = D^5 N^2 \rho \, \phi \, [\mu / D^2 N \rho]$, Prove this by the method of dimensions. **05**

b) Explain the terms: **04**
i) Drag ii) Lift

c) How do you classify water turbines? **05**

Q.6 Attempt the following.

a) A Pelton wheel has a mean bucket speed of 10 m/sec with jet of water flowing at the rate of 700 lit /s under a head of 30 meters. The buckets deflect the jet through an angle of 160°. Calculate the power given by water to the runner and the hydraulic efficiency of the turbine. Assume coefficient of velocity as 0.98. **05**

b) State the difference between Impulse Turbine and Reaction Turbine. **05**

c) Explain types of draft tube. What are the functions of the draft tube? **04**

Q.7 Attempt the following

a) A Francis turbine works at 450 rpm under a head of 120 m. The diameter of runner at inlet is 1.2 m and flow area of 0.4 m^2. At the inlet the absolute and relative velocities makes an angle of 20° and 60° respectively with tangential velocity. Determine i) The volume flow rate ii) runner power and iii) hydraulic efficiency. Assume the velocity of whirl at the outlet to be zero. **05**

b) Define the terms **04**
i) Suction head ii) Delivery head iii) Static head iv) Manometric head

c) Explain multistage pumps. **05**

a) With a neat sketch explain the conditions of the equilibrium for submerged body. **04**

b) Derive an expression for total pressure and center of pressure on a vertical plane surface immersed in a static liquid. **05**

c) An isosceles triangular plate of base 4m & altitude 4m is immersed vertically in an oil of specific gravity 0.9. The base of plate coincides with free surface of oil. Determine total pressure & centre of pressure. **05**

Q.3 Attempt the following

a) What are the different types of fluid flow? Explain with an example. **05**

b) Define : **04**
1) Stream line 2) Streak Line 3) Path line 4) Equipotential Line

c) An oil of specific gravity 0.8 is flowing through a venturimeter having diameter 20 cm and throat diameter 10 cm. The oil mercury differential manometer shows a reading of 25 cm. Calculate the discharge of the oil through the horizontal venturimeter. Take C_d = 0.98. **05**

Q.4 Attempt the following

a) Explain the different losses that occur in the pipeline connection, with the help of formulae. **05**

b) Derive Dupit's equation for equivalent pipes. **04**

c) The difference in water surface levels in two tanks, which are connected by three pipes in series of lengths 300 m, 170 m and 210 m and of diameters 300 mm, 200 mm and 400 mm respectively, is 12 m. Determine the rate of flow of water if the coefficient of friction are 0.005, 0.0052 and 0.0048 respectively, by neglecting minor losses. **05**

Section – II

Q.5 Attempt the following.

a) The frictional torque T of a disc of diameter D rotating at a speed N in a fluid of viscosity μ and density ρ in a turbulent flow is given by $T = D^5 N^2 \rho \, \phi \, [\mu / D^2 N \rho]$, Prove this by the method of dimensions. **05**

b) Explain the terms: **04**
i) Drag ii) Lift

c) How do you classify water turbines? **05**

Q.6 Attempt the following.

a) A Pelton wheel has a mean bucket speed of 10 m/sec with jet of water flowing at the rate of 700 lit /s under a head of 30 meters. The buckets deflect the jet through an angle of 160°. Calculate the power given by water to the runner and the hydraulic efficiency of the turbine. Assume coefficient of velocity as 0.98. **05**

b) State the difference between Impulse Turbine and Reaction Turbine. **05**

c) Explain types of draft tube. What are the functions of the draft tube? **04**

Q.7 Attempt the following

a) A Francis turbine works at 450 rpm under a head of 120 m. The diameter of runner at inlet is 1.2 m and flow area of 0.4 m^2. At the inlet the absolute and relative velocities makes an angle of 20° and 60° respectively with tangential velocity. Determine i) The volume flow rate ii) runner power and iii) hydraulic efficiency. Assume the velocity of whirl at the outlet to be zero. **05**

b) Define the terms **04**
i) Suction head ii) Delivery head iii) Static head iv) Manometric head

c) Explain multistage pumps. **05**

S.Y. (B.Tech.) (Sem - II) (New) (CBCS) Examination: March/April-2025
MECHANICAL ENGINEERING
Fluid mechanics and Fluid Machines (MECHPCC-06)

Day & Date: Friday 30-05-2025 Max. Marks: 70
Time: 10:00 AM To 01:00 PM

Instructions: 1) Q. No. 1 is compulsory. It should be solved in the first 30 minutes in Answer Book Page no 03 (Starting page of the Answer Book). Each question carries one mark.
2) Don't forget to Mention question paper set (P/Q/R/S) on top of page.
3) Figures to the right indicates full marks.
4) Assume suitable data if necessary.

MCQ/Objective Type Questions

Duration: 30 Minutes Marks:14

Q.1 Choose the correct answer: **14**

1) The turbine preferred for 0 to 25 m head of water is _____
a) Pelton wheel b) Kaplan turbine
c) Tube turbine d) Francis turbine

2) Design of Pelton wheel means the following data is to be determined.
a) Width of buckets b) Number of buckets
c) Depth of buckets d) All of the mentioned

3) In a centrifugal pump, the liquid enters the pump _____
a) at the top b) at the bottom
c) at the centre d) from sides

4) What is the unit of the drag coefficient?
a) N/sec b) m/sec
c) kg/N d) Dimensionless quantity

5) Pelton turbine is _____
a) Tangential flow b) Radial flow
c) Axial flow d) Mixed flow

6) The S.I. unit of total pressure on a plane immersed surface is _____
a) Newton per meter square
b) Newton
c) Newton square per meter
d) Newton per meter cube

7) Buoyancy acts on a floating body _____
a) vertically upward
b) horizontally
c) vertically downward
d) both vertically upward and horizontally

8) A large Reynolds number is indication of _____
a) Smooth and streamline flow b) Laminar flow
c) Steady flow d) Highly turbulent flow

9) The Bernoulli's equation refers to conservation of _____
a) mass b) linear momentum
c) angular momentum d) energy

10) Hydraulic Gradient Line is always ____ Total Energy Line.
a) Above b) Below
c) Parallel to d) None of the above

11) Minor losses occur due to _____
a) Sudden enlargement in pipe b) Bends in pipe
c) Sudden contraction in pipe d) All of these

12) The velocity of water in an open channel can be measured by _____
a) Venturimeter b) Rotameter
c) Pitot tube d) Orifice plate

13) The Buckingham-Pi theorem is widely used in the dimensional analysis and expresses the resulting equation in terms of _____
a) the dependent and independent variables
b) n dimensionless parameters
c) (n - m) dimensionless parameters
d) geometric, kinematic and dynamic variables

14) The process of filling the liquid into the suction pipe and the pump casing up to the level of the delivery valve is called _____
a) Filling b) Pumping
c) Priming d) Leveling

MCQ/Objective Type Questions

Duration: 30 Minutes Marks:14

Q.1 Choose the correct Answer. **14**

1) Innovation can be best described as: _____
a) A new idea only
b) The process of creating value through ideas
c) Invention
d) None of the above

2) Entrepreneurship is primarily related to: _____
a) Administration b) Risk-taking
c) Planning d) None of these

3) Which of the following is not an entrepreneurial competency?
a) Innovation b) Leadership
c) Laziness d) Decision making

4) An entrepreneur operates: _____
a) Outside the organization b) Within an existing company
c) As a freelancer d) None

5) "Push" type innovation comes from: _____
a) Market needs b) Customer demands
c) Internal ideas d) Suppliers

6) Agile management promotes: _____
a) Linear process b) Flexibility and iteration
c) Bureaucracy d) None

7) Blue Ocean strategy refers to: _____
a) Competing in existing markets
b) Creating new market space
c) Losing market share
d) None

8) Which of these is not a barrier to innovation?
a) Risk-taking culture b) Resistance to change
c) Lack of resources d) Poor leadership

9) The shifting composition of the economy refers to: _____
a) Stable industries b) Changing business models
c) Static job roles d) None

10) Lean start-up encourages: _____
a) High upfront investment b) Rapid prototyping
c) Formal structure d) None

11) Legal considerations for entrepreneurs include: _____
a) Taxation b) IP protection
c) Contracts d) All of these

12) One of the seven sources of innovation is: _____
a) Competitor's failure b) Demographics
c) Inflation d) GDP

13) Entrepreneurial opportunity recognition is: _____
a) Unimportant b) Intuition-based only
c) Structured process d) Not taught

14) Six Thinking Hats is a method for: _____
a) Innovation testing b) Decision-making
c) Funding d) Legal advice

S.Y. (B.Tech.) (Sem - II) (New) (CBCS) Examination: March/April - 2025
MECHANICAL ENGINEERING
Entrepreneurship and Innovation (OE-02A)

Day & Date: Tuesday 03-06-2025 Max. Marks: 70
Time: 10:00 AM To 01:00 PM

Instructions: 1) Q. No. 1 is compulsory. It should be solved in the first 30 minutes in Answer Book Page no 03 (Starting page of the Answer Book). Each question carries one mark.
2) Don't forget to Mention question paper set (P/Q/R/S) on top of page.
3) Figures to the right indicates full marks.
4) Use of non-programmable calculators is allowed.

MCQ/Objective Type Questions

Duration: 30 Minutes Marks:14

Q.1 Choose the correct Answer. **14**

1) Agile management promotes: _____
a) Linear process b) Flexibility and iteration
c) Bureaucracy d) None

2) Blue Ocean strategy refers to: _____
a) Competing in existing markets
b) Creating new market space
c) Losing market share
d) None

3) Which of these is not a barrier to innovation?
a) Risk-taking culture b) Resistance to change
c) Lack of resources d) Poor leadership

4) The shifting composition of the economy refers to: _____
a) Stable industries b) Changing business models
c) Static job roles d) None

5) Lean start-up encourages: _____
a) High upfront investment b) Rapid prototyping
c) Formal structure d) None

6) Legal considerations for entrepreneurs include: _____
a) Taxation b) IP protection
c) Contracts d) All of these

7) One of the seven sources of innovation is: _____
a) Competitor's failure b) Demographics
c) Inflation d) GDP

8) Entrepreneurial opportunity recognition is: _____
a) Unimportant b) Intuition-based only
c) Structured process d) Not taught

9) Six Thinking Hats is a method for: _____
a) Innovation testing b) Decision-making
c) Funding d) Legal advice

10) Innovation can be best described as: _____
a) A new idea only
b) The process of creating value through ideas
c) Invention
d) None of the above

11) Entrepreneurship is primarily related to: _____
a) Administration b) Risk-taking
c) Planning d) None of these

12) Which of the following is not an entrepreneurial competency?
a) Innovation b) Leadership
c) Laziness d) Decision making

13) An entrepreneur operates: _____
a) Outside the organization b) Within an existing company
c) As a freelancer d) None

14) "Push" type innovation comes from: _____
a) Market needs b) Customer demands
c) Internal ideas d) Suppliers

Entrepreneurship and Innovation (OE-02A)

Day & Date: Tuesday 03-06-2025 Max. Marks: 56
Time: 10:00 AM To 01:00 PM

Instructions: 1) All questions are compulsory.
2) Figures to the right indicate full marks.

Section – I

Q.2 All questions are compulsory.

a) Define innovation. Explain its relationship with entrepreneurship. **06**
b) Distinguish between Entrepreneur, Manager, and Intrapreneur. **04**

Q.3 Solve any three questions.

a) Explain classification of innovation. **06**
b) Describe the economic theories of entrepreneurship. **06**
c) Discuss need and importance of Entrepreneurship Development. **06**
d) Describe sources of innovation with examples. **06**
e) Explain Agile management and NUF test in innovation. **06**

Section – II

Q.4 All questions are compulsory.

a) Explain the purpose and process of innovation. **06**
b) What are the needs for continuous learning in innovation? **04**

Q.5 Solve any three questions.

a) Explain different types of innovative strategies. **06**
b) Describe Red Ocean vs Blue Ocean strategies. **06**
c) List barriers to innovation and explain with examples. **06**
d) Explain the entrepreneurial process and opportunity recognition. **06**
e) Write short note on Lean start-up methodology. **06**

Time: 10:00 AM To 01:00 PM

Instructions: 1) Q. No. 1 is compulsory. It should be solved in the first 30 minutes in Answer Book Page no 03 (Starting page of the Answer Book). Each question carries one mark.
2) Don't forget to Mention question paper set (P/Q/R/S) on top of page.
3) Figures to the right indicates full marks.

MCQ/Objective Type Questions

Duration: 30 Minutes Marks:14

Q.1 Choose the correct alternatives from the options. **14**

1) The Occupational Health and Safety Management System (OHSMS) primarily aims to: _____
a) Increase industrial profits
b) Reduce energy consumption
c) Ensure worker safety and reduce health risks in workplaces
d) Promote environmental tourism

2) In-situ conservation refers to: _____
a) Conservation of species in zoos
b) Conservation using biotechnology
c) Conservation in gene banks
d) Conservation of species in their natural habitats

3) Carbon footprint is a measure of: _____
a) Land occupied by forests
b) Energy consumption in a home
c) Greenhouse gas emissions by an activity or person
d) Amount of carbon in plants

4) The main goal of sustainability is to: _____
a) Meet present needs without compromising future needs
b) Increase profit only
c) Eliminate economic development
d) Promote urbanization

5) Which of the following is an example of hazardous waste?
a) Expired medicines b) Plastic bottles
c) Food scraps d) Paper waste

6) Biodiversity hotspots in India include: _____
a) Eastern Ghats and Indo-Gangetic Plain
b) Western Ghats and the Himalayas
c) Thar Desert and Sundarbans only
d) Deccan Plateau and Indo-Gangetic Basin

7) The 3R concept stands for: _____
a) Reuse, Reduce, Rebuild
b) Reduce, Reuse, Recycle
c) Replace, Reuse, Restore
d) Recycle, Recover, Rebuild

8) The ISO 14000 Series deals with: _____
a) Energy-efficient building design
b) Environmental Management Systems
c) Industrial Safety Standards
d) Economic Performance Indicators

9) Which of the following is a non-conventional source of energy?
a) Coal
b) Natural Gas
c) Wind
d) Diesel

10) The main goal of a circular economy is to: _____
a) Increase fossil fuel usage
b) Promote single-use products
c) Minimize waste and resource use
d) Maximize profit only

11) The first step in preparing an Environmental Impact Assessment (EIA) report is: _____
a) Cost-benefit analysis
b) Monitoring
c) Screening
d) Public hearing

12) Which of the following is not a principle of Environmental Management?
a) Polluter pays
b) Sustainability
c) Preventive action
d) Maximum profit generation

13) Cost-Benefit Analysis (CBA) in environmental policies is used to: _____
a) Maximize pollution
b) Evaluate environmental legislation
c) Compare environmental costs with economic benefits
d) Promote industrialization

14) An ecosystem consists of: _____
a) Living organisms only
b) Non-living components only
c) Living organisms and their physical environment
d) Plants and animals only

Time: 10:00 AM To 01:00 PM

Instructions: 1) All questions are compulsory.
2) Figures to the right indicate full marks.

Section – I

Q.2 Attempt the following **12**

a) Define the term "environment". Discuss the scope and importance of environmental studies. Why is there a need for public awareness?
b) Describe the causes and effects of air and water pollution. Suggest two preventive measures for each.
c) Define sustainability. Discuss any two major challenges in achieving sustainable development.

Q.3 Attempt Any Two **10**

a) What are hazardous wastes and e-wastes? How should they be managed?
b) What are carbon credits and carbon footprints? Explain with examples.
c) List any two Millennium Development Goals (MDGs). Mention one environmental protocol.

Q.4 Write short notes on any two of the following: **06**

a) Genetic diversity
b) India as a mega-diversity nation
c) In-situ and Ex-situ conservation

Section – II

Q.5 Write short notes on any two of the following: **10**

a) ISO 14000 Series
b) Sustainable Habitat - Green Buildings
c) Non-conventional energy sources

Q.6 Attempt the following **10**

a) Define Environmental Management. Discuss its nature, scope, and components.
b) Define the 3R concept and explain how it supports the zero waste approach.

Q.7 Attempt any two **08**

a) Define Environmental Management. Discuss its nature, scope, and components.

b) What is Environmental Policy Analysis? Distinguish between macro-level and micro-level analysis.

c) Outline the steps involved in the Environmental Impact Assessment (EIA) process.

MCQ/Objective Type Questions

Duration: 30 Minutes Marks:14

Q.1 Choose the correct Answer. **14**

1) Which is the primary advantage of using solar energy power generation?
a) Low initial coast
b) Reduce environmental impact
c) Do not require large area
d) Simple storage method

2) OTEC stands for _____.
a) Ocean thermal energy conversion
b) Ocean thermal energy Component
c) Ocean thermal energy contact
d) Ocean thermodynamic energy conversion

3) Which of the following common application of solar energy?
a) Generating electricity
b) Heating water
c) Providing power for electronic device
d) All of the above

4) Passive solar energy refers to trapping the Suns energy _____.
a) Using mechanical devices
b) without using mechanical devices
c) Using chemical
d) Incineration

5) The process or digestion taking place in the presence of air is called as _____.
a) Aerobic digestion
b) Anaerobic digestion
c) Hydrolysis
d) None of these

6) Which type of renewable energy resources generate low power energy?

a) Biomass b) Solar
c) Wind d) All of the above

7) In wind turbine gear box is used to _____.

a) Step up the speed b) Reduce the speed
c) shut down d) None of these

8) Geothermal energy present _____ of the earth.

a) Rotation b) Exterior
c) North side d) Interior

9) Biogas is the gaseous fuel which is obtained from biomass by means of _____ fermentation.

a) Aerobic b) Anaerobic
c) Constant d) None of the above

10) _____ is produced by blending of vegetable oil.

a) CNG b) Methane gas
c) Biofuel d) Biodisel

11) Availability of Solar energy on the earth surface is _____MW.

a) 190 billion b) 178 billion
c) 150 billion d) 250 billion

12) Energy is _____ of substance or a body to do work.

a) Obesity b) Power
c) Capacity d) None of the above

13) Wind energy used from _____ years ago.

a) 3000 b) 2000
c) 6000 d) 5000

14) The major source of the Geothermal energy is _____.

a) Water b) Hot water reservoir
c) Oil d) Gas

Section – I

Q.2 Attempt any Four **16**

a) Explain advantages of biomass energy.
b) Explain in detail scope of renewable energy.
c) What is biomass energy and explain resources of biomass energy.
d) Write a note on applications of solar energy.
e) Explain function of biogas digester.
f) Write a note on aerobic and anaerobic digestion.

Q.3 Attempt any two. **12**

a) Explain Solar photovoltaic technology.
b) Explain Basic components of wind energy conversion system.
c) Explain in detail advantages and disadvantages of renewable energy.
d) Explain in detail advantage and disadvantage of Solar energy.

Section – II

Q.4 Attempt any Four. **16**

a) Write a note on wave energy.
b) Merits and demerits of hydropower energy.
c) Explain specifications of energy storage devices.
d) Main parts of hydropower station.
e) Importance of tidal energy.
f) Importance of energy storage devices

Q.5 Attempt any two. **12**

a) Write a note on potential of wave energy in India.
b) Explain different methods of energy storage.
c) Explain with neat diagram hydropower plant.
d) Explain in detail ocean thermal energy conversion (OTEC) .

Instructions: 1) Q. No. 1 is compulsory. It should be solved in the first 30 minutes in Answer Book Page no 03 (Starting page of the Answer Book). Each question carries one mark.
2) Don't forget to Mention question paper set (P/Q/R/S) on top of page.
3) Figures to the right indicates full marks.
4) Assume suitable data if necessary.

MCQ/Objective Type Questions

Duration: 30 Minutes Marks:14

Q.1 Choose the correct Answer. **14**

1) Geothermal energy present _____ of the earth.
a) Rotation b) Exterior
c) North side d) Interior

2) Biogas is the gaseous fuel which is obtained from biomass by means of _____ fermentation.
a) Aerobic b) Anaerobic
c) Constant d) None of the above

3) _____ is produced by blending of vegetable oil.
a) CNG b) Methane gas
c) Biofuel d) Biodisel

4) Availability of Solar energy on the earth surface is _____MW.
a) 190 billion b) 178 billion
c) 150 billion d) 250 billion

5) Energy is _____ of substance or a body to do work.
a) Obesity b) Power
c) Capacity d) None of the above

6) Wind energy used from _____ years ago.
a) 3000 b) 2000
c) 6000 d) 5000

7) The major source of the Geothermal energy is _____.
a) Water b) Hot water reservoir
c) Oil d) Gas

8) Which is the primary advantage of using solar energy power generation?
a) Low initial coast
b) Reduce environmental impact
c) Do not require large area
d) Simple storage method

9) OTEC stands for _____.
a) Ocean thermal energy conversion
b) Ocean thermal energy Component
c) Ocean thermal energy contact
d) Ocean thermodynamic energy conversion

10) Which of the following common application of solar energy?
a) Generating electricity
b) Heating water
c) Providing power for electronic device
d) All of the above

11) Passive solar energy refers to trapping the Suns energy _____.
a) Using mechanical devices
b) without using mechanical devices
c) Using chemical
d) Incineration

12) The process or digestion taking place in the presence of air is called as _____.
a) Aerobic digestion b) Anaerobic digestion
c) Hydrolysis d) None of these

13) Which type of renewable energy resources generate low power energy?
a) Biomass b) Solar
c) Wind d) All of the above

14) In wind turbine gear box is used to _____.
a) Step up the speed b) Reduce the speed
c) shut down d) None of these

Set Q

S. Y. (B. Tech.) (Sem-II) (New) (CBCS) Examination: March/April-2025
MECHANICAL ENGINEERING
Renewable Energy (OE-02C)

Day & Date: Tuesday, 03-June-2025 Max. Marks: 56
Time: 10:00 AM To 01:00 PM

Instructions: 1) All questions are compulsory.
2) Figures to the right indicate full marks.
3) Assume suitable data if necessary.

Section – I

Q.2 Attempt any Four **16**

a) Explain advantages of biomass energy.
b) Explain in detail scope of renewable energy.
c) What is biomass energy and explain resources of biomass energy.
d) Write a note on applications of solar energy.
e) Explain function of biogas digester.
f) Write a note on aerobic and anaerobic digestion.

Q.3 Attempt any two. **12**

a) Explain Solar photovoltaic technology.
b) Explain Basic components of wind energy conversion system.
c) Explain in detail advantages and disadvantages of renewable energy.
d) Explain in detail advantage and disadvantage of Solar energy.

Section – II

Q.4 Attempt any Four. **16**

a) Write a note on wave energy.
b) Merits and demerits of hydropower energy.
c) Explain specifications of energy storage devices.
d) Main parts of hydropower station.
e) Importance of tidal energy.
f) Importance of energy storage devices

Q.5 Attempt any two. **12**

a) Write a note on potential of wave energy in India.
b) Explain different methods of energy storage.
c) Explain with neat diagram hydropower plant.
d) Explain in detail ocean thermal energy conversion (OTEC).

MCQ/Objective Type Questions

Duration: 30 Minutes Marks:14

Q.1 Choose the correct answer. **14**

1) An instrument transformer is used to extend the range of _____.
a) induction instrument b) electrostatic instrument
c) moving coil instrument d) any of the above

2) The internal resistance of an ammeter should be _____.
a) Very small b) Medium
c) High d) Infinity

3) The smallest change which a sensor can detect is termed: _____
a) Accuracy b) Precision
c) Resolution d) Scale

4) Sensor effectiveness depends on _____ parameter.
a) Sensitivity b) Radiation
c) Restively d) All the above

5) The desirable static characteristics of a measuring system are _____
a) accuracy and drift
b) accuracy, sensitivity and reproducibility
c) drift and dead zone
d) static error

6) A _____ device prevents the oscillation of the moving system and enables the latter to reach its final position quickly.
a) Deflecting b) Controlling
c) Damping d) any of the above

7) _____ is an instrument which measures the insulation resistance of an electric circuit relative to earth and one another.
a) Tangent galvanometer
b) Megger
c) Current transformer
d) None of the above

8) Which of the following is a key characteristic of a sensor?
a) It can only measure temperature
b) It is an active component
c) It converts physical parameters into an electrical signal
d) Il requires no external power

9) Which of the following is a type of magnetic sensor?
a) Thermistor
b) Strain gauge
c) Hall effect sensor
d) LVDT

10) Typical conversion speed of ADC is _____
a) Less than 1 μs
b) Less than 100 μs
c) Less than 500 μs
d) Greater than 1000 μs

11) What is signal conditioning?
a) To analyze any signal
b) Conversion or modification is referred to as conditioning
c) Conversion from analog to digital is signal conditioning
d) Conversion from digital to analog is signal conditioning

12) Touch screen devices use which sensor?
a) Touch sensor
b) Temperature sensor
c) Humidity sensor
d) Pressure sensor

13) ENOB in ADC stand for _____
a) Effective number of bytes
b) Effective number of bits
c) Effective nibble baud
d) None of the mentioned

14) A simple bridge circuit consists of a network of _____
a) 3 resistance arms
b) 2 resistance arms
c) 4 resistance arms
d) 6 resistance arms

d) None of the above

3) Which of the following is a key characteristic of a sensor?
a) It can only measure temperature
b) It is an active component
c) It converts physical parameters into an electrical signal
d) Il requires no external power

4) Which of the following is a type of magnetic sensor?
a) Thermistor b) Strain gauge
c) Hall effect sensor d) LVDT

5) Typical conversion speed of ADC is _____
a) Less than 1 μs b) Less than 100 μs
c) Less than 500 μs d) Greater than 1000 μs

6) What is signal conditioning?
a) To analyze any signal
b) Conversion or modification is referred to as conditioning
c) Conversion from analog to digital is signal conditioning
d) Conversion from digital to analog is signal conditioning

7) Touch screen devices use which sensor?
a) Touch sensor b) Temperature sensor
c) Humidity sensor d) Pressure sensor

8) ENOB in ADC stand for _____
a) Effective number of bytes b) Effective number of bits
c) Effective nibble baud d) None of the mentioned

9) A simple bridge circuit consists of a network of _____
a) 3 resistance arms b) 2 resistance arms
c) 4 resistance arms d) 6 resistance arms

10) An instrument transformer is used to extend the range of _____.
a) induction instrument b) electrostatic instrument
c) moving coil instrument d) any of the above

11) The internal resistance of an ammeter should be _____.
a) Very small b) Medium
c) High d) Infinity

12) The smallest change which a sensor can detect is termed: _____
a) Accuracy b) Precision
c) Resolution d) Scale

13) Sensor effectiveness depends on _____ parameter.
a) Sensitivity b) Radiation
c) Restively d) All the above

14) The desirable static characteristics of a measuring system are _____
a) accuracy and drift
b) accuracy, sensitivity and reproducibility
c) drift and dead zone
d) static error

Seat No.		Set	S

S. Y. (B. Tech.) (Sem-II) (New) (CBCS) Examination: March/April-2025
MECHANICAL ENGINEERING
Measurement, Instrumentation and Sensors (OE-02D)

Day & Date: Tuesday, 03-June-2025 Max. Marks: 56
Time: 10:00 AM To 01:00 PM

Instructions: 1) All questions are compulsory.
2) Figures to the right indicate full marks.
3) Assume suitable data if necessary.
4) Draw neat diagrams whenever necessary.

Section – I

Q.2 Attempt any four of the following: 16

a) Define standard & explain types of standards.
b) Define the following characteristics
1) Linearity 2) Accuracy 3) Repeatability 4) Sensitivity
c) Derive the expression for unknown capacitance with phasor diagram by using Schering Bridge.
d) Write difference between Current Transformer and Potential Transformer.
e) Explain working of digital storage oscilloscope with suitable block diagram.

Q.3 Attempt any two of the following: 12

a) Illustrate and derive the torque equation for a Moving iron instrument with neat diagram.
b) Draw the equivalent circuit and phasor diagram of a CT. Derive the expressions for ratio and phase angle errors.
c) Explain digital ramp type and dual slope integrating type digital voltmeter.

Section – II

Q.4 Attempt any four of the following: 16

a) Explain the principle of working of Hall effect sensor.
b) Explain different types of temperature sensor with details.
c) Discuss Classification of sensor and explain active and passive sensor.
d) State and explain the methods of data transmission.
e) State and Explain the Modes of Heat transfer.

Q.5 Attempt any two of the following: 12

a) Stale the sensors used for Velocity and Acceleration application and explain any one of them.
b) Slate and explain the sensors used for occupancy and motion detector application.
c) Define the temperature and explain the thermal properties of material.

S. Y. (B.Tech.) (Sem - II) (New) (CBCS) Examination: March/April-2025
MECHANICAL ENGINEERING
Operation Research (OE-02E)

Day & Date: Tuesday 03-06-2025 Max. Marks: 70
Time: 10:00 AM To 01:00 PM

Instructions: 1) Q. No. 1 is compulsory. It should be solved in the first 30 minutes in Answer Book Page no 03 (Starting page of the Answer Book). Each question carries one mark.
2) Don't forget to Mention question paper set (P/Q/R/S) on top of page.
3) Figures to the right indicates full marks.

MCQ/Objective Type Questions

Duration: 30 Minutes Marks:14

Q.1 Choose the correct alternatives from the options. 14

1) Linear programming deals with the optimization of a function of variables is, known as _____
a) Subjective function b) Objective function
c) Combined Equation d) None of these

2) What is the condition of Balance Assignment Problem?
a) Σ Demand$=\Sigma$ Supply
b) No. of rows $>$ No. of column
c) No. of rows $<$ No. of column
d) No. of rows $=$ No. of columns

3) EOQ means: _____
a) Economic Offering Quantity b) Empty Order Quantity
c) Economic Order Quantity d) Economic Order Quality

4) In ABC analysis, high monitoring and control are required for: _____
a) A class items b) B class items
c) C class items d) All of these

5) Graphical method, simplex method, and transportation method are concerned with _____.
a) Break-even analysis b) Value analysis
c) Linear programming d) Queueing theory

6) The cost of keeping items in inventory is called _____
a) Set up cost b) Holding cost
c) Shortage cost d) None of these

7) Dual of the Dual is _____
a) Dual b) Primal
c) Zero d) Infinity

8) At the Break-Even Point _____
a) Profit > Loss
b) Profit < Loss
c) Profit = Loss
d) None of these

9) The PERT in project management means Program Evaluation and _____ Technique.
a) Resource
b) Reconciliation
c) Reconsideration
d) Review

10) _____ Stock is the lower limit of stock below which the stock should not be allowed to fall.
a) Maximum
b) Average
c) Safety
d) Standard

11) Optimization Means _____.
a) Maximization
b) Minimization
c) Minimization or Maximization
d) Mean of Minimization & Maximization

12) A feasible solution to LPP _____.
a) Must satisfy all the constraints simultaneously
b) Need not satisfy all the constraints
c) Must be a corner point of feasible region
d) Must optimize the objective function

13) In a project network, the critical path _____.
a) May be the shortest path
b) Is the longest path
c) May be the longest path
d) Is the shortest path

14) The inventory carrying costs are also called as _____.
a) Procurement costs
b) Set-up costs
c) Storage costs
d) None of the above

Instructions: 1) All questions are compulsory.
2) Figures to the right indicate full marks.
3) Assume suitable data wherever necessary and mention it clearly.
4) Use of non-programmable calculator is allowed.

Section – I

Q.2 Attempt Any Three. **24**

a) Using Graphical method, Solve

Maximize $Z = 10X_1 + 8X_2$
Subject to, $2X_1 + X_2 \leq 40;$
$2X_1 + 3X_2 \leq 80;$
$0 \leq X_1; 0 \leq X_2$

b) Solve the following assignment model for minimum processing time.

		Machines			
		M1	M2	M3	M4
Jobs	J1	51	77	49	55
	J2	32	34	59	68
	J3	37	44	70	54
	J4	55	55	58	55

c) Find the initial basic feasible solution by Least Cost Method.

	W1	W2	W3	W4	Supply
F1	48	60	56	58	140
F2	45	55	53	60	260
F3	50	65	60	62	360
F4	52	64	55	61	220
Demand	200	320	250	210	

d) What are the different Limitations & Applications of 'Operation Research'?
e) How do you solve unbalanced transportation problem? What are different methods to solve Transportation Model? Explain in details.

Q.3 Answer any one. **04**

a) What is LPP? What are different components of LPP?
b) How assignment model is useful in practical life?

Section – II

Q.4 Attempt Any Three. **24**

a) A construction company consumes 4000 bags of cement per month. Price per bag of cement is Rs. 320/-. Inventory carrying cost per bag per year is Rs. 30/- and procurement cost per order is Rs. 500/- Find economic order quantity and number of orders to be placed per month?

b) Write a note various types inventory cost.

c) Draw network, find out CP & PD. Calculate All floats of each non-critical Activity.

Activity	A	B	C	D	E	F	G	H	I	J	K	L	M	N
Immediate Predecessor	-	-	-	B	A	A	B	C,D	C,D	E	F,G,H	F,G,H	I	J,K
Time in Months	2	6	4	3	6	8	3	7	2	5	4	3	13	7

d) A small project consists of seven activities. The time estimates in weeks of different activities are given below. Find out probability of completing the project in 18 weeks.

Activity	Estimated Time		
	to	tm	tp
1-2	1	1	7
1-3	1	4	7
1-4	2	2	8
2-5	1	1	1
3-5	2	5	14
4-6	2	5	8
5-6	3	6	15

Probability Factor	Probability
0	50%
1	84.13%
2	97.72%
3	99.87%

e) Explain Sequencing Problem Technique. What are its Different Elements, also elaborate its assumptions.

Q.3 Attempt Any One. **04**

a) What is EOQ? What is its important?

b) Distinguish between CPM & PERT (At least 4 points)

Seat No.

Section – II

Q.4 Attempt Any Three. **24**

a) A construction company consumes 4000 bags of cement per month. Price per bag of cement is Rs. 320/-. Inventory carrying cost per bag per year is Rs. 30/- and procurement cost per order is Rs. 500/- Find economic order quantity and number of orders to be placed per month?

b) Write a note various types inventory cost.

c) Draw network, find out CP & PD. Calculate All floats of each non-critical Activity.

Activity	A	B	C	D	E	F	G	H	I	J	K	L	M	N
Immediate Predecessor	-	-	-	B	A	A	B	C,D	C,D	E	F,G,H	F,G,H	I	J,K
Time in Months	2	6	4	3	6	8	3	7	2	5	4	3	13	7

d) A small project consists of seven activities. The time estimates in weeks of different activities are given below. Find out probability of completing the project in 18 weeks.

Activity	Estimated Time		
	to	tm	tp
1-2	1	1	7
1-3	1	4	7
1-4	2	2	8
2-5	1	1	1
3-5	2	5	14
4-6	2	5	8
5-6	3	6	15

Probability Factor	Probability
0	50%
1	84.13%
2	97.72%
3	99.87%

e) Explain Sequencing Problem Technique. What are its Different Elements, also elaborate its assumptions.

Q.3 Attempt Any One. **04**

a) What is EOQ? What is its important?

b) Distinguish between CPM & PERT (At least 4 points)

S.Y. (B.Tech.) (Sem-II) (New) (CBCS) Examination: March/April - 2025
MECHANICAL ENGINEERING
Computational Mathematics (OE-02F)

Day & Date: Tuesday 03-06-2025 Max. Marks: 70
Time: 10:00 AM To 01:00 PM

Instructions: 1) Q. No. 1 is compulsory. It should be solved in the first 30 minutes in Answer Book Page no 03 (Starting page of the Answer Book). Each question carries one mark.
2) Don't forget to Mention question paper set (P/Q/R/S) on top of page.
3) Figures to the right indicates full marks.

MCQ/Objective Type Questions

Duration: 30 Minutes Marks:14

Q.1 Choose the correct option. **14**

1) A transcendental equation is an equation that involves _____.
a) Only algebraic terms
b) Only transcendental functions
c) Both algebraic and transcendental functions
d) Linear terms only

2) The interval in which a real root of the equation $x^3 - 2x - 5 = 0$ lies is _____.
a) $(1,2)$ b) $(0,1)$
c) $(2,3)$ d) $(3,4)$

3) The Gauss-Seidel method is used for solving _____.
a) Nonlinear equations
b) Systems of linear equations
c) Ordinary differential equations
d) Partial differential equations

4) Which of the following is a disadvantage of the Gauss-Jacobi method?
a) It converges faster than most direct methods
b) It requires a large number of iterations for a good approximation
c) It cannot be used for systems with more than two equations
d) It works only for symmetric systems

5) The use of Romberg's method is _____.
a) To solve simultaneous linear equation
b) To find root of linear equation
c) To evaluate definite integration
d) To find the Eigen values

6) The order of convergence of Newton-Raphson method is _____.

a) 1 b) 2

c) $\sqrt{2}$ d) 1.6

7) Power Method is used to find _____.

a) Negative Eigen Value b) Largest Eigen value

c) Positive Eigen Value d) None of these

8) To find the Numerically largest Eigen value using iterative Method we use the equation _____.

a) $A = \lambda X$ b) $AX = X$

c) $X = \lambda X$ d) $AX = \lambda X$

9) If $\frac{dy}{dx} = x - y$ and $y(0) = 1$ then by Picard's method the value of $y_1(1)$ is _____.

a) 0.905 b) 1.905

c) 2.905 d) none

10) Runge-Kutta method is self-starting method _____.

a) true d) false

c) we can't say d) none

11) If the data is equally spaced and interpolation is near the beginning of the data then _____ Interpolation formula is used.

a) Newton's backward difference

b) Newton's divided difference

c) Newton's forward difference

d) Lagrange's

12) The process of finding the value inside the interval (x_0, x_n) is called ___.

a) Interpolation b) Extrapolation

c) Iterative d) polynomial equation

13) Using Newton-Raphson method the first approximation to the root of the equation $x^4 - x - 10 = 0$ near to $x_0 = 2$ is _____.

a) 1.671 b) 2.271

c) 2.071 d) 1.871

14) To apply Simpson's one-third rule the number of sub-intervals must be _____.

a) Even b) Odd

c) Multiple of 3 d) Multiple of 6

Instructions: 1) All questions are compulsory.
2) Figures to the right indicate full marks.

Section – I

Q.2 Answer any three. **09**

a) Find the double root of the equation $x^3 - 5.4x^2 + 9.24x - 5.096 = 0$ given that it is nearer to 1.5.

b) Solve the system of equations by Jacobi's iterative method (perform 3 iterations) $27x + 6y - z = 85,\ 6x + 15y + 2z = 72,\ x + y + 54z = 110$

c) Find positive real root of the equation $x \sin x + \cos x = 0$ using Newton Raphson method correct to 3 decimal places.

d) Solve the system of equation by using Gauss-Elimination method. $x + 4y - z = -5, x + y - 6z = -12, -3x - y - z = 4$

e) Solve $\frac{dy}{dx} = -xy$ with $x_0 = 0\ ,\ y_0 = 1$ using Picard's method upto 3rd approximation.

Q.3 Answer any three. **09**

a) Solve $\frac{dy}{dx} = x + y$ with $x_0 = 0\ , y_0 = 1$ using Range kutta forth order method and find approximate value of y when $x = 0.2$

b) Solve $\frac{dy}{dx} = 1 + xy$ with $y(0) = 1$ using Picard's method take first approximation and find y for $x = 0.1$

c) Solve by Gauss Seidel Method, the equations $20x + y - 2z = 17, 3x + 20y - z = -18, 2x - 3y + 20z = 25$ Perform 3 iteration.

d) Find the value of $\sqrt{5}$ using newton's iterative formula. Perform 3 iteration.

e) Find the positive root of $f(x) = 2x^3 - 3x - 6$ by Newton's Raphson method perform 3 iteration.

Q.4 Answer any two. **10**

a) Perform 2-iteration by Newton's Raphson Method to Solve the non-linear equation $x = x^2 + y^2,\ y = x^2 - y^2$ Take initial approximation $x_0 = 0.8, y_0 = 0.4$

b) Solve the system of equation by LU decomposition Method $3x + 2y + 7z = 4,\quad 2x + 3y + z = 5,\quad 3x + 4y + z = 7$

c) Solve differential equation $\frac{dy}{dx} = 1 + xz,\ \frac{dz}{dx} = -xy$ for $x = 0.3$ using 4th order Runge-Kutta Method Initial Values are $x = 0,\ y = 0,\ z = 1$

Section – II

Q.5 Answer any Three. **09**

a) Evaluate the integral $\int_0^1 \frac{x^2}{1+x^3}\,dx$ using Simpson's $\frac{1}{3}$rd rule, Take $h = 0.25$

b) Determine the largest Eigen value and corresponding Eigen vector of the matrix $\begin{bmatrix} 5 & 4 \\ 1 & 2 \end{bmatrix}$ by using power method perform three iteration.

c) Use Trapezoidal Rule to compute $\int_0^1 \frac{1}{1+x^2}\,dx$ Take h as 0.5

d) Using Newton's divided difference formula, find the value of $f(2)$. Given the following table.

x	4	5	7	10	11	13
$f(x)$	48	100	294	900	1210	2028

e) Construct Newton's Forward interpolation polynomial for the following data:

x	4	6	8	10
y	1	3	8	16

Hence find the value of y for $x = 5$

Q.6 Answer any Three. **09**

a) Solve the integral $\int_0^{1/2} \frac{1}{\sqrt{1-x^2}}\,dx$ using Weddle's rule Taking $n = 6$

b) Solve $\int_3^5 \frac{4}{(2x^2)}\,dx$ Using Gauss Formula for $n = 2$ and $n = 3$.

c) Find all Eigen values and Eigen vectors of the following matrix by using Gauss Jacobi's Method. $\begin{bmatrix} 2 & 3 \\ 3 & 2 \end{bmatrix}$

d) Solve $\int_0^6 \frac{dx}{1+x^2}$ by using Simpsons 3/8th rule take $h = 1$

e) Using Newton's Backward formula, find the value of $f(2)$ if

x	1	1.4	1.8	2.2
$f(x)$	3.49	4.82	5.96	6.5

Q.7 Answer any two. **10**

a) Find the largest eigen value and the corresponding eigen vector of the matrix:

$\begin{bmatrix} 25 & 1 & 2 \\ 1 & 3 & 0 \\ 2 & 0 & -4 \end{bmatrix}$ by using power method

Take $[1 \quad 0 \quad 0]^r$ as initial eigen vector (perform 5 iterations)

b) Use Romberg's method to compute $\int_0^1 \frac{1}{1+x^2}\,dx$ Take h as $0.5, 0.25, 0.125$

c) Given the Values

x	5	7	11	13	17
$f(x)$	150	392	1452	2366	5202

Evaluate $f(9)$,using Lagrange's Formula.

a) Perform 2-iteration by Newton's Raphson Method to Solve the non-linear equation $x = x^2 + y^2,\ y = x^2 - y^2$ Take initial approximation $x_0 = 0.8, y_0 = 0.4$

b) Solve the system of equation by LU decomposition Method $3x + 2y + 7z = 4,\quad 2x + 3y + z = 5,\quad 3x + 4y + z = 7$

c) Solve differential equation $\frac{dy}{dx} = 1 + xz,\ \frac{dz}{dx} = -xy$ for $x = 0.3$ using 4th order Runge-Kutta Method Initial Values are $x = 0,\ y = 0,\ z = 1$

Section – II

Q.5 Answer any Three. **09**

a) Evaluate the integral $\int_0^1 \frac{x^2}{1+x^3}\,dx$ using Simpson's $\frac{1}{3}$rd rule, Take $h = 0.25$

b) Determine the largest Eigen value and corresponding Eigen vector of the matrix $\begin{bmatrix} 5 & 4 \\ 1 & 2 \end{bmatrix}$ by using power method perform three iteration.

c) Use Trapezoidal Rule to compute $\int_0^1 \frac{1}{1+x^2}\,dx$ Take h as 0.5

d) Using Newton's divided difference formula, find the value of $f(2)$. Given the following table.

x	4	5	7	10	11	13
$f(x)$	48	100	294	900	1210	2028

e) Construct Newton's Forward interpolation polynomial for the following data:

x	4	6	8	10
y	1	3	8	16

Hence find the value of y for $x = 5$

Q.6 Answer any Three. **09**

a) Solve the integral $\int_0^{1/2} \frac{1}{\sqrt{1-x^2}}\,dx$ using Weddle's rule Taking $n = 6$

b) Solve $\int_3^5 \frac{4}{(2x^2)}\,dx$ Using Gauss Formula for $n = 2$ and $n = 3$.

c) Find all Eigen values and Eigen vectors of the following matrix by using Gauss Jacobi's Method. $\begin{bmatrix} 2 & 3 \\ 3 & 2 \end{bmatrix}$

d) Solve $\int_0^6 \frac{dx}{1+x^2}$ by using Simpsons 3/8th rule take $h = 1$

e) Using Newton's Backward formula, find the value of $f(2)$ if

x	1	1.4	1.8	2.2
$f(x)$	3.49	4.82	5.96	6.5

Q.7 Answer any two. **10**

a) Find the largest eigen value and the corresponding eigen vector of the matrix:

$\begin{bmatrix} 25 & 1 & 2 \\ 1 & 3 & 0 \\ 2 & 0 & -4 \end{bmatrix}$ by using power method

Take $[1 \quad 0 \quad 0]^r$ as initial eigen vector (perform 5 iterations)

b) Use Romberg's method to compute $\int_0^1 \frac{1}{1+x^2}\,dx$ Take h as $0.5, 0.25, 0.125$

c) Given the Values

x	5	7	11	13	17
$f(x)$	150	392	1452	2366	5202

Evaluate $f(9)$,using Lagrange's Formula.

S.Y. (B.Tech.) (Sem-II) (New) (CBCS) Examination: March/April - 2025
MECHANICAL ENGINEERING
Computational Mathematics (OE-02F)

Day & Date: Tuesday 03-06-2025 Max. Marks: 70
Time: 10:00 AM To 01:00 PM

Instructions: 1) Q. No. 1 is compulsory. It should be solved in the first 30 minutes in Answer Book Page no 03 (Starting page of the Answer Book). Each question carries one mark.
2) Don't forget to Mention question paper set (P/Q/R/S) on top of page.
3) Figures to the right indicates full marks.

MCQ/Objective Type Questions

Duration: 30 Minutes Marks:14

Q.1 Choose the correct option. **14**

1) The order of convergence of Newton-Raphson method is _____.
a) 1 b) 2
c) $\sqrt{2}$ d) 1.6

2) Power Method is used to find _____.
a) Negative Eigen Value b) Largest Eigen value
c) Positive Eigen Value d) None of these

3) To find the Numerically largest Eigen value using iterative Method we use the equation _____.
a) $A = \lambda X$ b) $AX = X$
c) $X = \lambda X$ d) $AX = \lambda X$

4) If $\frac{dy}{dx} = x - y$ and $y(0) = 1$ then by Picard's method the value of $y_1(1)$ is _____.
a) 0.905 b) 1.905
c) 2.905 d) none

5) Runge-Kutta method is self-starting method _____.
a) true d) false
c) we can't say d) none

6) If the data is equally spaced and interpolation is near the beginning of the data then _____ Interpolation formula is used.
a) Newton's backward difference
b) Newton's divided difference
c) Newton's forward difference
d) Lagrange's

7) The process of finding the value inside the interval (x_0, x_n) is called ___.
a) Interpolation b) Extrapolation
c) Iterative d) polynomial equation

8) Using Newton-Raphson method the first approximation to the root of the equation $x^4 - x - 10 = 0$ near to $x_0 = 2$ is _____.
a) 1.671 b) 2.271
c) 2.071 d) 1.871

9) To apply Simpson's one-third rule the number of sub-intervals must be _____.
a) Even b) Odd
c) Multiple of 3 d) Multiple of 6

10) A transcendental equation is an equation that involves _____.
a) Only algebraic terms
b) Only transcendental functions
c) Both algebraic and transcendental functions
d) Linear terms only

11) The interval in which a real root of the equation $x^3 - 2x - 5 = 0$ lies is _____.
a) $(1,2)$ b) $(0,1)$
c) $(2,3)$ d) $(3,4)$

12) The Gauss-Seidel method is used for solving _____.
a) Nonlinear equations
b) Systems of linear equations
c) Ordinary differential equations
d) Partial differential equations

13) Which of the following is a disadvantage of the Gauss-Jacobi method?
a) It converges faster than most direct methods
b) It requires a large number of iterations for a good approximation
c) It cannot be used for systems with more than two equations
d) It works only for symmetric systems

14) The use of Romberg's method is _____.
a) To solve simultaneous linear equation
b) To find root of linear equation
c) To evaluate definite integration
d) To find the Eigen values

Day & Date: Tuesday 03-06-2025 Max. Marks: 56
Time: 10:00 AM To 01:00 PM

Instructions: 1) All questions are compulsory.
2) Figures to the right indicate full marks.

Section – I

Q.2 Answer any three. **09**

a) Find the double root of the equation $x^3 - 5.4x^2 + 9.24x - 5.096 = 0$ given that it is nearer to 1.5.

b) Solve the system of equations by Jacobi's iterative method (perform 3 iterations) $27x + 6y - z = 85,\ 6x + 15y + 2z = 72,\ x + y + 54z = 110$

c) Find positive real root of the equation $x \sin x + \cos x = 0$ using Newton Raphson method correct to 3 decimal places.

d) Solve the system of equation by using Gauss-Elimination method. $x + 4y - z = -5, x + y - 6z = -12, -3x - y - z = 4$

e) Solve $\frac{dy}{dx} = -xy$ with $x_0 = 0\ ,\ y_0 = 1$ using Picard's method upto 3rd approximation.

Q.3 Answer any three. **09**

a) Solve $\frac{dy}{dx} = x + y$ with $x_0 = 0\ , y_0 = 1$ using Range kutta forth order method and find approximate value of y when $x = 0.2$

b) Solve $\frac{dy}{dx} = 1 + xy$ with $y(0) = 1$ using Picard's method take first approximation and find y for $x = 0.1$

c) Solve by Gauss Seidel Method, the equations $20x + y - 2z = 17, 3x + 20y - z = -18, 2x - 3y + 20z = 25$ Perform 3 iteration.

d) Find the value of $\sqrt{5}$ using newton's iterative formula. Perform 3 iteration.

e) Find the positive root of $f(x) = 2x^3 - 3x - 6$ by Newton's Raphson method perform 3 iteration.

Q.4 Answer any two. **10**

a) Perform 2-iteration by Newton's Raphson Method to Solve the non-linear equation $x = x^2 + y^2,\ y = x^2 - y^2$ Take initial approximation $x_0 = 0.8, y_0 = 0.4$

b) Solve the system of equation by LU decomposition Method $3x + 2y + 7z = 4,\quad 2x + 3y + z = 5,\quad 3x + 4y + z = 7$

c) Solve differential equation $\frac{dy}{dx} = 1 + xz,\ \frac{dz}{dx} = -xy$ for $x = 0.3$ using 4th order Runge-Kutta Method Initial Values are $x = 0,\ y = 0,\ z = 1$

Section – II

Q.5 Answer any Three. **09**

a) Evaluate the integral $\int_0^1 \frac{x^2}{1+x^3}\,dx$ using Simpson's $\frac{1}{3}$rd rule, Take $h = 0.25$

b) Determine the largest Eigen value and corresponding Eigen vector of the matrix $\begin{bmatrix} 5 & 4 \\ 1 & 2 \end{bmatrix}$ by using power method perform three iteration.

c) Use Trapezoidal Rule to compute $\int_0^1 \frac{1}{1+x^2}\,dx$ Take h as 0.5

d) Using Newton's divided difference formula, find the value of $f(2)$. Given the following table.

x	4	5	7	10	11	13
$f(x)$	48	100	294	900	1210	2028

e) Construct Newton's Forward interpolation polynomial for the following data:

x	4	6	8	10
y	1	3	8	16

Hence find the value of y for $x = 5$

Q.6 Answer any Three. **09**

a) Solve the integral $\int_0^{1/2} \frac{1}{\sqrt{1-x^2}}\,dx$ using Weddle's rule Taking $n = 6$

b) Solve $\int_3^5 \frac{4}{(2x^2)}\,dx$ Using Gauss Formula for $n = 2$ and $n = 3$.

c) Find all Eigen values and Eigen vectors of the following matrix by using Gauss Jacobi's Method. $\begin{bmatrix} 2 & 3 \\ 3 & 2 \end{bmatrix}$

d) Solve $\int_0^6 \frac{dx}{1+x^2}$ by using Simpsons 3/8th rule take $h = 1$

e) Using Newton's Backward formula, find the value of $f(2)$ if

x	1	1.4	1.8	2.2
$f(x)$	3.49	4.82	5.96	6.5

Q.7 Answer any two. **10**

a) Find the largest eigen value and the corresponding eigen vector of the matrix:

$\begin{bmatrix} 25 & 1 & 2 \\ 1 & 3 & 0 \\ 2 & 0 & -4 \end{bmatrix}$ by using power method

Take $[1 \quad 0 \quad 0]^r$ as initial eigen vector (perform 5 iterations)

b) Use Romberg's method to compute $\int_0^1 \frac{1}{1+x^2}\,dx$ Take h as $0.5, 0.25, 0.125$

c) Given the Values

x	5	7	11	13	17
$f(x)$	150	392	1452	2366	5202

Evaluate $f(9)$,using Lagrange's Formula.

MCQ/Objective Type Questions

Duration: 30 Minutes Marks:14

Q.1 Choose the correct alternatives from the options. 14

1) In communication, _____ is the person who receives and decodes the message.
a) Sender b) Receiver
c) Driver d) Cleaner

2) Which among the following is not a manmade channel of communication?
a) Telephone b) Cell phone
c) Fax d) Air

3) Communication is the part of _____ skills.
a) Rough b) Soft
c) Hard d) Short

4) Which among the following are the barriers to communication?
a) Physical b) Mechanical
c) Psychological d) All of above

5) To overcome language barrier, which of the ways should not be followed?
a) Easy and understandable words should be used.
b) Jokes should be told to the audience.
c) The language of audience should be used.
d) Non-verbal ways should be used to the extent possible.

6) Which of the following is not among 7Cs?
a) Conciseness b) Completeness
c) Clarity d) Charity

7) Posters fall under _____ communication.
a) oral b) visual
c) written d) spoken

8) On the _____ it is possible to get immediate feedback.
a) letter b) e-mail
c) fax d) telephone

9) The response to a sender's message is called as _____.
a) Reply b) Feedback
c) Answer d) None of the above

10) _____ is the soul of communication.
a) Sender b) Receiver
c) Message d) Feedback

11) Which of these is not an element of non-verbal communication?
a) Personal appearance b) Posture
c) Eye contact d) Name of the speaker

12) Telephonic conversation is a form of: _____
a) verbal communication b) non-verbal communication
c) visual communication d) Written

13) To give a good presentation, full rehearsal is: _____
a) Optional b) Necessary
c) Useless d) Audience based

14) Which of the following is not an advantage of oral presentation?
a) Flexibility b) Scope for body language
c) Expensive d) Time-saving

Section – I

Q.2 Attempt Any Three. **12**

a) Explain how communication is necessary for business.
b) What is feedback? Explain its necessity in communication.
c) Write short note on: Different channels of communication.
d) Explain language barriers to communication with the ways to overcome them.
e) Explain language as a tool of communication.

Q.3 Attempt Any Four. **16**

a) Explain seven C's of effective communication.
b) Explain various types of barriers to communication and the ways to overcome them.
c) What is oral communication? Explain its advantages.
d) Explain various steps in the process of communication.
e) What is written communication? Explain its benefits.

Section – II

Q.4 Attempt Any Three. **12**

a) Explain the difference between formal and informal communication.
b) Explain vertical communication with its types.
c) Explain farewell speech by the departing person, with an example
d) Explain the speech for vote of thanks, with an example.
e) Write short note on: Non- verbal aspects of presentation.

Q.5 Attempt Any Four. **16**

a) Explain the structure of a business letter with its various components.
b) Explain the steps in the process of presentation.
c) You had purchased some furniture items from a vendor. Afterwards you found that the furniture items are in a damaged condition. Write a letter of complaint and ask for replacement.
d) Explain four P's of effective presentations.
e) You are in need of some computer hardware parts. Prepare a letter placing order to the supplier. Specify the terms and conditions of purchase.

a) Polymer matrix composites b) Carbon-carbon composites
c) Metal matrix composites d) Pure aluminum

2) The main role of the matrix in a composite material is to: _____.
a) Provide reinforcement
b) Transfer load and protect fibers
c) Reduce weight
d) Act as an insulator

3) What are organic matrix composites made of?
a) Metal alloys b) Ceramics
c) Polymers d) Natural fibers

4) What is a major advantage of nanoscale materials?
a) Lower durability b) High reactivity
c) Large weight d) Reduced surface energy

5) Why do nanoparticles exhibit different thermal properties compared to bulk materials?
a) They have high density b) Due to quantum size effects
c) They are less stable d) They are heavier

6) What property of nanomaterials makes them effective as antibacterial agents?
a) Electrical conductivity b) Large size
c) High surface energy d) Thermal conductivity

7) What is a nanofluid?
a) Solid fluid
b) Fluid with nanoparticles
c) Gas-like fluid
d) Pure liquid

8) How do nanopore filters benefit water treatment?
a) Increase hardness
b) Remove contaminants
c) Add minerals
d) Change color

9) Why are nanomaterials suitable for self-cleaning surfaces?
a) High friction
b) Hydrophobic properties
c) High absorption
d) High conductivity

10) What is the effect of impurities on the resistivity of metals?
a) Increase resistivity
b) Decrease resistivity
c) No effect
d) Increase conductivity

11) CMOS technology is widely used in: _____.
a) Power generation
b) Microelectronics
c) Chemical reactions
d) Thermal conduction

12) Which of the following materials is ferromagnetic?
a) Copper
b) Aluminum
c) Iron
d) Glass

13) Saturation magnetization refers to: _____.
a) Maximum magnetic field
b) Maximum magnetic moment per unit volume
c) Zero magnetization
d) High resistance

14) What is the role of a coolant in a nuclear reactor?
a) Absorb neutrons
b) Transfer heat
c) Generate electricity
d) Contain radioactive waste

Seat No.		Set	P

S. Y. (B.Tech.) (Sem - II) (New) (CBCS) Examination: March/April - 2025
CIVIL ENGINEERING
Materials for Technology Development (MECHMDM-02A)

Day & Date: Thursday, 05-June-2025 Max. Marks: 56
Time: 10:00 AM To 01:00 PM

Instructions: 1) All questions are compulsory.
2) Figures to the right indicate full marks.
3) Draw neat and proper diagram wherever necessary.

Section – I

Q.2 Attempt Any Two Questions

a) Explain the classification of composites based on matrix materials, including polymer matrix composites (PMC) and carbon-carbon composites. **05**

b) What is the role of reinforcement materials in composites? How are they selected for specific applications? **05**

c) Explain the sol-gel method for making nanomaterials. **05**

Q.3 Attempt Any Two Questions

a) Explain with neat sketch is lithography. How is it different from chemical vapor deposition? **05**

b) Explain with neat sketch how does physical vapor deposition work as a bottom-up technique? **05**

c) Compare with neat sketches atomic layer deposition and combustion methods as bottom-up approaches. **05**

Q.4 Write short notes on (Any Two)

a) Explain the role of green chemistry in nanomaterial synthesis. **04**

b) List and explain different types of nanomaterials and give one example of each type. **04**

c) What are the key mechanical tests performed on composite materials? Explain tensile and compressive testing procedures. **04**

Section – II

Q.5 Attempt Any Two Questions

a) Explain with neat sketch the skin effect and its significance in electrical conduction. **05**

b) Describe the manufacturing process of silicon wafers for microelectronics. **05**

c) Differentiate between soft and hard magnetic materials, providing their applications. **05**

Q.6 Attempt Any Two Questions

a)	Explain the properties and applications of ferrites in magnetic recording materials.	**05**
b)	What are moderators in nuclear reactors? Describe the materials used as moderators and their properties.	**05**
c)	What are the applications of zirconium in nuclear reactors? Highlight its key properties.	**05**

Q.7 Write short notes on (Any Two)

a)	Explain why a low capture cross-section for neutrons is critical in the selection of nuclear materials.	**04**
b)	Explain the properties and applications of ferrites in magnetic recording materials.	**04**
c)	Define quantum efficiency in solar cells and explain its importance in device performance.	**04**

Set **Q**

S. Y. (B.Tech.) (Sem - II) (New) (CBCS) Examination: March/April - 2025
CIVIL ENGINEERING
Materials for Technology Development (MECHMDM-02A)

Day & Date: Thursday, 05-June-2025 Max. Marks: 70
Time: 10:00 AM To 01:00 PM

Instructions: 1) Q. No. 1 is compulsory. It should be solved in the first 30 minutes in Answer Book Page no 03 (Starting page of the Answer Book). Each question carries one mark.
2) Don't forget to Mention question paper set (P/Q/R/S) on top of page.
3) Figures to the right indicates full marks.
4) Draw neat and proper diagram wherever necessary.

MCQ/Objective Type Questions

Duration: 30 Minutes Marks:14

Q.1 Choose the correct Alternatives. **14**

1) How do nanopore filters benefit water treatment?
a) Increase hardness b) Remove contaminants
c) Add minerals d) Change color

2) Why are nanomaterials suitable for self-cleaning surfaces?
a) High friction b) Hydrophobic properties
c) High absorption d) High conductivity

3) What is the effect of impurities on the resistivity of metals?
a) Increase resistivity b) Decrease resistivity
c) No effect d) Increase conductivity

4) CMOS technology is widely used in: _____.
a) Power generation b) Microelectronics
c) Chemical reactions d) Thermal conduction

5) Which of the following materials is ferromagnetic?
a) Copper b) Aluminum
c) Iron d) Glass

6) Saturation magnetization refers to: _____.
a) Maximum magnetic field
b) Maximum magnetic moment per unit volume
c) Zero magnetization
d) High resistance

7) What is the role of a coolant in a nuclear reactor?
a) Absorb neutrons
b) Transfer heat
c) Generate electricity
d) Contain radioactive waste

8) Which of the following is NOT a type of composite material?
a) Polymer matrix composites b) Carbon-carbon composites
c) Metal matrix composites d) Pure aluminum

9) The main role of the matrix in a composite material is to: _____.
a) Provide reinforcement
b) Transfer load and protect fibers
c) Reduce weight
d) Act as an insulator

10) What are organic matrix composites made of?

Q.5 Attempt Any Two Questions

a) Explain with neat sketch the skin effect and its significance in electrical conduction. **05**

b) Describe the manufacturing process of silicon wafers for microelectronics. **05**

c) Differentiate between soft and hard magnetic materials, providing their applications. **05**

Q.6 Attempt Any Two Questions

a)	Explain the properties and applications of ferrites in magnetic recording materials.	**05**
b)	What are moderators in nuclear reactors? Describe the materials used as moderators and their properties.	**05**
c)	What are the applications of zirconium in nuclear reactors? Highlight its key properties.	**05**

Q.7 Write short notes on (Any Two)

a)	Explain why a low capture cross-section for neutrons is critical in the selection of nuclear materials.	**04**
b)	Explain the properties and applications of ferrites in magnetic recording materials.	**04**
c)	Define quantum efficiency in solar cells and explain its importance in device performance.	**04**

Set R

S. Y. (B.Tech.) (Sem - II) (New) (CBCS) Examination: March/April - 2025
COMPUTER SCIENCE AND ENGINEERING
Materials for Technology Development (MECHMDM-02A)

Day & Date: Thursday, 05-June-2025 Max. Marks: 70
Time: 10:00 AM To 01:00 PM

Instructions: 1) Q. No. 1 is compulsory. It should be solved in the first 30 minutes in Answer Book Page no 03 (Starting page of the Answer Book). Each question carries one mark.
2) Don't forget to Mention question paper set (P/Q/R/S) on top of page.
3) Figures to the right indicates full marks.
4) Draw neat and proper diagram wherever necessary.

MCQ/Objective Type Questions

Duration: 30 Minutes Marks:14

Q.1 Choose the correct Alternatives. **14**

1) CMOS technology is widely used in: _____.
a) Power generation b) Microelectronics
c) Chemical reactions d) Thermal conduction

2) Which of the following materials is ferromagnetic?
a) Copper b) Aluminum
c) Iron d) Glass

3) Saturation magnetization refers to: _____.
a) Maximum magnetic field
b) Maximum magnetic moment per unit volume
c) Zero magnetization
d) High resistance

4) What is the role of a coolant in a nuclear reactor?
a) Absorb neutrons
b) Transfer heat
c) Generate electricity
d) Contain radioactive waste

5) Which of the following is NOT a type of composite material?
a) Polymer matrix composites b) Carbon-carbon composites
c) Metal matrix composites d) Pure aluminum

6) The main role of the matrix in a composite material is to: _____.
a) Provide reinforcement
b) Transfer load and protect fibers
c) Reduce weight
d) Act as an insulator

7) What are organic matrix composites made of?
a) Metal alloys b) Ceramics
c) Polymers d) Natural fibers

8) What is a major advantage of nanoscale materials?
a) Lower durability b) High reactivity
c) Large weight d) Reduced surface energy

9) Why do nanoparticles exhibit different thermal properties compared to bulk materials?
a) They have high density b) Due to quantum size effects
c) They are less stable d) They are heavier

10) What property of nanomaterials makes them effective as antibacterial agents?
a) Electrical conductivity b) Large size
c) High surface energy d) Thermal conductivity

11) What is a nanofluid?
a) Solid fluid b) Fluid with nanoparticles
c) Gas-like fluid d) Pure liquid

12) How do nanopore filters benefit water treatment?
a) Increase hardness b) Remove contaminants
c) Add minerals d) Change color

13) Why are nanomaterials suitable for self-cleaning surfaces?
a) High friction b) Hydrophobic properties
c) High absorption d) High conductivity

14) What is the effect of impurities on the resistivity of metals?
a) Increase resistivity b) Decrease resistivity
c) No effect d) Increase conductivity

a) Lower durability b) High reactivity
c) Large weight d) Reduced surface energy

14) Why do nanoparticles exhibit different thermal properties compared to bulk materials?
a) They have high density b) Due to quantum size effects
c) They are less stable d) They are heavier

Seat No.		Set	S

S.Y. (B.Tech.) (Sem - II) (New)(NEP CBCS) Examination: March/April- 2025
ELECTRICAL ENGINEERING
Materials for Technology Development (MECHMDM-02A)

Day & Date: Thursday, 05-June-2025 Max. Marks: 56
Time: 10:00 AM To 01:00 PM

Instructions: 1) All questions are compulsory.
2) Figures to the right indicate full marks.
3) Draw neat and proper diagram wherever necessary.

Section – I

Q.2 Attempt Any Two Questions

a) Explain the classification of composites based on matrix materials, including polymer matrix composites (PMC) and carbon-carbon composites. **05**

b) What is the role of reinforcement materials in composites? How are they selected for specific applications? **05**

c) Explain the sol-gel method for making nanomaterials. **05**

Q.3 Attempt Any Two Questions

a) Explain with neat sketch is lithography. How is it different from chemical vapor deposition? **05**

b) Explain with neat sketch how does physical vapor deposition work as a bottom-up technique? **05**

c) Compare with neat sketches atomic layer deposition and combustion methods as bottom-up approaches. **05**

Q.4 Write short notes on (Any Two)

a) Explain the role of green chemistry in nanomaterial synthesis. **04**

b) List and explain different types of nanomaterials and give one example of each type. **04**

c) What are the key mechanical tests performed on composite materials? Explain tensile and compressive testing procedures. **04**

Section – II

Q.5 Attempt Any Two Questions

a) Explain with neat sketch the skin effect and its significance in electrical conduction. **05**

b) Describe the manufacturing process of silicon wafers for microelectronics. **05**

c) Differentiate between soft and hard magnetic materials, providing their applications. **05**

Q.6 Attempt Any Two Questions

a)	Explain the properties and applications of ferrites in magnetic recording materials.	**05**
b)	What are moderators in nuclear reactors? Describe the materials used as moderators and their properties.	**05**
c)	What are the applications of zirconium in nuclear reactors? Highlight its key properties.	**05**

Q.7 Write short notes on (Any Two)

a)	Explain why a low capture cross-section for neutrons is critical in the selection of nuclear materials.	**04**
b)	Explain the properties and applications of ferrites in magnetic recording materials.	**04**
c)	Define quantum efficiency in solar cells and explain its importance in device performance.	**04**

Day & Date: Thursday, 05-June-2025 Max. Marks: 70
Time: 10:00 AM To 01:00 PM

Instructions: 1) Q. No. 1 is compulsory. It should be solved in the first 30 minutes in Answer Book Page no 03 (Starting page of the Answer Book). Each question carries one mark.
2) Don't forget to Mention question paper set (P/Q/R/S) on top of page.
3) Figures to the right indicates full marks.
4) Draw neat and proper diagram wherever necessary.

MCQ/Objective Type Questions

Duration: 30 Minutes Marks:14

Q.1 Choose the correct Alternatives. **14**

1) Which of the following is NOT a type of composite material?
a) Polymer matrix composites b) Carbon-carbon composites
c) Metal matrix composites d) Pure aluminum

2) The main role of the matrix in a composite material is to: _____.
a) Provide reinforcement
b) Transfer load and protect fibers
c) Reduce weight
d) Act as an insulator

3) What are organic matrix composites made of?
a) Metal alloys b) Ceramics
c) Polymers d) Natural fibers

4) What is a major advantage of nanoscale materials?
a) Lower durability b) High reactivity
c) Large weight d) Reduced surface energy

5) Why do nanoparticles exhibit different thermal properties compared to bulk materials?
a) They have high density b) Due to quantum size effects
c) They are less stable d) They are heavier

6) What property of nanomaterials makes them effective as antibacterial agents?
a) Electrical conductivity b) Large size
c) High surface energy d) Thermal conductivity

7) What is a nanofluid?
a) Solid fluid
b) Fluid with nanoparticles
c) Gas-like fluid
d) Pure liquid

8) How do nanopore filters benefit water treatment?
a) Increase hardness
b) Remove contaminants
c) Add minerals
d) Change color

9) Why are nanomaterials suitable for self-cleaning surfaces?
a) High friction
b) Hydrophobic properties
c) High absorption
d) High conductivity

10) What is the effect of impurities on the resistivity of metals?
a) Increase resistivity
b) Decrease resistivity
c) No effect
d) Increase conductivity

11) CMOS technology is widely used in: _____.
a) Power generation
b) Microelectronics
c) Chemical reactions
d) Thermal conduction

12) Which of the following materials is ferromagnetic?
a) Copper
b) Aluminum
c) Iron
d) Glass

13) Saturation magnetization refers to: _____.
a) Maximum magnetic field
b) Maximum magnetic moment per unit volume
c) Zero magnetization
d) High resistance

14) What is the role of a coolant in a nuclear reactor?
a) Absorb neutrons
b) Transfer heat
c) Generate electricity
d) Contain radioactive waste

2) Don't forget to Mention question paper set (P/Q/R/S) on top of page.
3) Figures to the right indicates full marks.
4) Draw neat and proper diagram wherever necessary.

MCQ/Objective Type Questions

Duration: 30 Minutes Marks:14

Q.1 Choose the correct Alternatives. **14**

1) How do nanopore filters benefit water treatment?
a) Increase hardness b) Remove contaminants
c) Add minerals d) Change color

2) Why are nanomaterials suitable for self-cleaning surfaces?
a) High friction b) Hydrophobic properties
c) High absorption d) High conductivity

3) What is the effect of impurities on the resistivity of metals?
a) Increase resistivity b) Decrease resistivity
c) No effect d) Increase conductivity

4) CMOS technology is widely used in: _____.
a) Power generation b) Microelectronics
c) Chemical reactions d) Thermal conduction

5) Which of the following materials is ferromagnetic?
a) Copper b) Aluminum
c) Iron d) Glass

6) Saturation magnetization refers to: _____.
a) Maximum magnetic field
b) Maximum magnetic moment per unit volume
c) Zero magnetization
d) High resistance

7) What is the role of a coolant in a nuclear reactor?
a) Absorb neutrons
b) Transfer heat
c) Generate electricity
d) Contain radioactive waste

8) Which of the following is NOT a type of composite material?
a) Polymer matrix composites b) Carbon-carbon composites
c) Metal matrix composites d) Pure aluminum

9) The main role of the matrix in a composite material is to: _____.
a) Provide reinforcement
b) Transfer load and protect fibers
c) Reduce weight
d) Act as an insulator

10) What are organic matrix composites made of?
a) Metal alloys b) Ceramics
c) Polymers d) Natural fibers

11) What is a major advantage of nanoscale materials?
a) Lower durability b) High reactivity
c) Large weight d) Reduced surface energy

12) Why do nanoparticles exhibit different thermal properties compared to bulk materials?
a) They have high density b) Due to quantum size effects
c) They are less stable d) They are heavier

13) What property of nanomaterials makes them effective as antibacterial agents?
a) Electrical conductivity b) Large size
c) High surface energy d) Thermal conductivity

14) What is a nanofluid?
a) Solid fluid b) Fluid with nanoparticles
c) Gas-like fluid d) Pure liquid

Seat No.	

Set **Q**

S. Y. (B.Tech.) (Sem - II) (New) (CBCS) Examination: March/April - 2025
MECHANICAL ENGINEERING
Materials for Technology Development (MECHMDM-02A)

Day & Date: Thursday, 05-June-2025 Max. Marks: 56
Time: 10:00 AM To 01:00 PM

Instructions: 1) All questions are compulsory.
2) Figures to the right indicate full marks.
3) Draw neat and proper diagram wherever necessary.

Section – I

Q.2 Attempt Any Two Questions

a) Explain the classification of composites based on matrix materials, including polymer matrix composites (PMC) and carbon-carbon composites. **05**

b) What is the role of reinforcement materials in composites? How are they selected for specific applications? **05**

c) Explain the sol-gel method for making nanomaterials. **05**

Q.3 Attempt Any Two Questions

a) Explain with neat sketch is lithography. How is it different from chemical vapor deposition? **05**

b) Explain with neat sketch how does physical vapor deposition work as a bottom-up technique? **05**

c) Compare with neat sketches atomic layer deposition and combustion methods as bottom-up approaches. **05**

Q.4 Write short notes on (Any Two)

a) Explain the role of green chemistry in nanomaterial synthesis. **04**

b) List and explain different types of nanomaterials and give one example of each type. **04**

c) What are the key mechanical tests performed on composite materials? Explain tensile and compressive testing procedures. **04**

Section – II

Q.5 Attempt Any Two Questions

a) Explain with neat sketch the skin effect and its significance in electrical conduction. **05**

b) Describe the manufacturing process of silicon wafers for microelectronics. **05**

c) Differentiate between soft and hard magnetic materials, providing their applications. **05**

Q.6 Attempt Any Two Questions

a)	Explain the properties and applications of ferrites in magnetic recording materials.	**05**
b)	What are moderators in nuclear reactors? Describe the materials used as moderators and their properties.	**05**
c)	What are the applications of zirconium in nuclear reactors? Highlight its key properties.	**05**

Q.7 Write short notes on (Any Two)

a)	Explain why a low capture cross-section for neutrons is critical in the selection of nuclear materials.	**04**
b)	Explain the properties and applications of ferrites in magnetic recording materials.	**04**
c)	Define quantum efficiency in solar cells and explain its importance in device performance.	**04**

Seat No.

MCQ/Objective Type Questions

Duration: 30 Minutes Marks:14

Q.1 Choose the correct Answer **14**

1) When ordering cost is increased to 4 times, the EOQ will be increased to _____
a) 2 times b) 3 times
c) 8 times d) 4 times

2) The value of α (smoothening constant) in exponential smoothening method is _____.
a) Between -1 to +1 b) between 0 to 1
c) Between -2 to +2 d) can't be defined

3) JIT is targeted for _____.
a) Average inventory b) zero inventory
c) high inventory d) none of these

4) The length of time between placing an order & receipt of material is ____.
a) order time b) lead time
c) cycle time d) none

5) Comparing actual production output with production schedule reporting deviation is _____.
a) capacity planning b) forecasting
c) inventory management d) None

6) The control tool that keeps a close observation on the progress of the work is _____.
a) Routing b) Expediting
c) Dispatching d) none

7) The process of setting production activities in motion through release of orders & instructions is _____.

a) Dispatching b) Routing
c) Loading d) none

8) Preparation of machine loads & fixation of starting & completion dates for each of operation is _____.

a) Estimating b) Routing
c) Scheduling d) none

9) Condition Based Maintenance is used in _____ maintenance.

a) Breakdown b) Preventive
c) Predictive d) none of these

10) Penalty cost is included in _____

a) shortage cost b) ordering cost
c) holding cost d) none

11) In ABC Analysis, A items require _____

a) No safety stock b) low safety stock
c) moderate safety stock d) none

12) Which of these uses historical data for forecasting?

a) Associative models b) Time series forecasts
c) Judgmental forecast d) none

13) The word KANBAN is most appropriately associated with _____.

a) EOQ b) JIT
c) Capacity planning d) product design

14) Bill of Material does not consist of _____.

a) Part number b) Specification of part
c) Name of Part d) Price of Part

S.Y. (B.Tech.) (Sem-II) (New) (CBCS) Examination: March/April-2025
CIVIL ENGINEERING
Production and Operation Management (MECHMDM-02B)

Day & Date: Thursday, 05-June-2025 Max. Marks: 70
Time: 10:00 AM To 01:00 PM

Instructions: 1) Q. No. 1 is compulsory. It should be solved in the first 30 minutes in Answer Book Page no 03 (Starting page of the Answer Book). Each question carries one mark.
2) Don't forget to Mention question paper set (P/Q/R/S) on top of page.
3) Figures to the right indicates full marks.

MCQ/Objective Type Questions

Duration: 30 Minutes Marks:14

Q.1 Choose the correct Answer **14**

1) The control tool that keeps a close observation on the progress of the work is _____.
a) Routing b) Expediting
c) Dispatching d) none

2) The process of setting production activities in motion through release of orders & instructions is _____.
a) Dispatching b) Routing
c) Loading d) none

3) Preparation of machine loads & fixation of starting & completion dates for each of operation is _____.
a) Estimating b) Routing
c) Scheduling d) none

4) Condition Based Maintenance is used in _____ maintenance.
a) Breakdown b) Preventive
c) Predictive d) none of these

5) Penalty cost is included in _____
a) shortage cost b) ordering cost
c) holding cost d) none

6) In ABC Analysis, A items require _____
a) No safety stock b) low safety stock
c) moderate safety stock d) none

7) Which of these uses historical data for forecasting?
a) Associative models b) Time series forecasts
c) Judgmental forecast d) none

8) The word KANBAN is most appropriately associated with _____.
a) EOQ b) JIT
c) Capacity planning d) product design

9) Bill of Material does not consist of _____.
a) Part number b) Specification of part
c) Name of Part d) Price of Part

10) When ordering cost is increased to 4 times, the EOQ will be increased to _____
a) 2 times b) 3 times
c) 8 times d) 4 times

11) The value of α (smoothening constant) in exponential smoothening method is _____.
a) Between -1 to +1 b) between 0 to 1
c) Between -2 to +2 d) can't be defined

12) JIT is targeted for _____.
a) Average inventory b) zero inventory
c) high inventory d) none of these

13) The length of time between placing an order & receipt of material is ____.
a) order time b) lead time
c) cycle time d) none

14) Comparing actual production output with production schedule reporting deviation is _____.
a) capacity planning b) forecasting
c) inventory management d) None

Instructions: 1) Slove any two questions from each Section.
2) Draw neat sketches wherever necessary.
3) Figures to the right indicate full marks.
4) Assume additional suitable data if necessary and state it clearly.

Section – I

Q.2 a) Define Manufacturing System. Explain classification of Manufacturing systems with one example of each. **07**

b) Discuss in detail procedure for Capacity Planning with block diagram. **07**

Q.3 a) What is forecasting? Explain in brief need of forecasting & also state various types of forecasting. **07**

b) The past data regarding the sales of a company for last five years is given. Using the least square method, fit a straight line, Estimate the sales for year 1996 & 1997. **07**

Year	1991	1992	1993	1994	1994
Sales('00)	35	56	79	80	40

Q.4 a) Discuss the objectives & Explain the functions of PPC in detail. **07**

b) Explain the objectives & scope of production & operations management in detail. **07**

Section – II

Q.5 a) A manufacturer has to supply his customers 3600 units of his product per year. Shortages are not permitted. Inventory carrying cost amounts Rs 1.2 per unit per annum. The set up cost is Rs 80. Find

i) EOQ **03**
ii) Optimum number of orders per annum **02**
iii) Average Annual Inventory cost **02**

b) Give in detail classification of Inventory models. Explain in detail EOQ Model with derivation. **07**

Q.6 a) Explain preventive maintenance & its benefits. **05**

b) Explain the need & objectives of Plant maintenance. **05**

c) Discuss in detail the working of KANBAN system. **04**

Q.7	**a)**	Explain the phases of Value Analysis.	**05**
	b)	Explain the concept of Six sigma in detail.	**05**
	c)	Write a short note on Just In Time concept.	**04**

Set **Q**

S.Y. (B.Tech.) (Sem-II) (New) (NEP CBCS) Examination: March/April-2025
ELECTRICAL ENGINEERING
Production and Operation Management (MECHMDM-02B)

Day & Date: Thursday, 05-June-2025 Max. Marks: 70
Time: 10:00 AM To 01:00 PM

Instructions: 1) Q. No. 1 is compulsory. It should be solved in the first 30 minutes in Answer Book Page no 03 (Starting page of the Answer Book). Each question carries one mark.
2) Don't forget to Mention question paper set (P/Q/R/S) on top of page.
3) Figures to the right indicates full marks.

MCQ/Objective Type Questions

Duration: 30 Minutes Marks:14

Q.1 Choose the correct Answer **14**

1) Preparation of machine loads & fixation of starting & completion dates for each of operation is _____.
a) Estimating b) Routing
c) Scheduling d) none

2) Condition Based Maintenance is used in _____ maintenance.
a) Breakdown b) Preventive
c) Predictive d) none of these

3) Penalty cost is included in _____
a) shortage cost b) ordering cost
c) holding cost d) none

4) In ABC Analysis, A items require _____
a) No safety stock b) low safety stock
c) moderate safety stock d) none

5) Which of these uses historical data for forecasting?
a) Associative models b) Time series forecasts
c) Judgmental forecast d) none

6) The word KANBAN is most appropriately associated with _____.
a) EOQ b) JIT
c) Capacity planning d) product design

7) Bill of Material does not consist of _____.
a) Part number b) Specification of part
c) Name of Part d) Price of Part

8) When ordering cost is increased to 4 times, the EOQ will be increased to _____

a) 2 times b) 3 times
c) 8 times d) 4 times

9) The value of α (smoothening constant) in exponential smoothening method is _____.

a) Between -1 to +1 b) between 0 to 1
c) Between -2 to +2 d) can't be defined

10) JIT is targeted for _____.

a) Average inventory b) zero inventory
c) high inventory d) none of these

11) The length of time between placing an order & receipt of material is ____.

a) order time b) lead time
c) cycle time d) none

12) Comparing actual production output with production schedule reporting deviation is _____.

a) capacity planning b) forecasting
c) inventory management d) None

13) The control tool that keeps a close observation on the progress of the work is _____.

a) Routing b) Expediting
c) Dispatching d) none

14) The process of setting production activities in motion through release of orders & instructions is _____.

a) Dispatching b) Routing
c) Loading d) none

S.Y. (B.Tech.) (Sem-II) (New) (NEP CBCS) Examination: March/April-2025
ELECTRONICS & TELECOMMUNICATION ENGINEERING
Production and Operation Management (MECHMDM-02B)

Day & Date: Thursday, 05-June-2025 Max. Marks: 56
Time: 10:00 AM To 01:00 PM

Instructions: 1) Slove any two questions from each Section.
2) Draw neat sketches wherever necessary.
3) Figures to the right indicate full marks.
4) Assume additional suitable data if necessary and state it clearly.

Section – I

Q.2 **a)** Define Manufacturing System. Explain classification of Manufacturing systems with one example of each. **07**

b) Discuss in detail procedure for Capacity Planning with block diagram. **07**

Q.3 **a)** What is forecasting? Explain in brief need of forecasting & also state various types of forecasting. **07**

b) The past data regarding the sales of a company for last five years is given. Using the least square method, fit a straight line, Estimate the sales for year 1996 & 1997. **07**

Year	1991	1992	1993	1994	1994
Sales('00)	35	56	79	80	40

Q.4 **a)** Discuss the objectives & Explain the functions of PPC in detail. **07**

b) Explain the objectives & scope of production & operations management in detail. **07**

Section – II

Q.5 **a)** A manufacturer has to supply his customers 3600 units of his product per year. Shortages are not permitted. Inventory carrying cost amounts Rs 1.2 per unit per annum. The set up cost is Rs 80. Find

i) EOQ **03**
ii) Optimum number of orders per annum **02**
iii) Average Annual Inventory cost **02**

b) Give in detail classification of Inventory models. Explain in detail EOQ Model with derivation. **07**

Q.6 **a)** Explain preventive maintenance & its benefits. **05**

b) Explain the need & objectives of Plant maintenance. **05**

c) Discuss in detail the working of KANBAN system. **04**

Q.7	**a)**	Explain the phases of Value Analysis.	**05**
	b)	Explain the concept of Six sigma in detail.	**05**
	c)	Write a short note on Just In Time concept.	**04**

Time: 10:00 AM To 01:00 PM

Instructions: 1) Q. No. 1 is compulsory. It should be solved in the first 30 minutes in Answer Book Page no 03 (Starting page of the Answer Book). Each question carries one mark.
2) Don't forget to Mention question paper set (P/Q/R/S) on top of page.
3) Figures to the right indicates full marks.

MCQ/Objective Type Questions

Duration: 30 Minutes Marks:14

Q.1 Choose the correct Answer **14**

1) The control tool that keeps a close observation on the progress of the work is _____.
a) Routing b) Expediting
c) Dispatching d) none

2) The process of setting production activities in motion through release of orders & instructions is _____.
a) Dispatching b) Routing
c) Loading d) none

3) Preparation of machine loads & fixation of starting & completion dates for each of operation is _____.
a) Estimating b) Routing
c) Scheduling d) none

4) Condition Based Maintenance is used in _____ maintenance.
a) Breakdown b) Preventive
c) Predictive d) none of these

5) Penalty cost is included in _____
a) shortage cost b) ordering cost
c) holding cost d) none

6) In ABC Analysis, A items require _____
a) No safety stock b) low safety stock
c) moderate safety stock d) none

7) Which of these uses historical data for forecasting?
a) Associative models b) Time series forecasts
c) Judgmental forecast d) none

8) The word KANBAN is most appropriately associated with _____.
a) EOQ b) JIT
c) Capacity planning d) product design

9) Bill of Material does not consist of _____.
a) Part number b) Specification of part
c) Name of Part d) Price of Part

10) When ordering cost is increased to 4 times, the EOQ will be increased to _____
a) 2 times b) 3 times
c) 8 times d) 4 times

11) The value of α (smoothening constant) in exponential smoothening method is _____.
a) Between -1 to +1 b) between 0 to 1
c) Between -2 to +2 d) can't be defined

12) JIT is targeted for _____.
a) Average inventory b) zero inventory
c) high inventory d) none of these

13) The length of time between placing an order & receipt of material is ____.
a) order time b) lead time
c) cycle time d) none

14) Comparing actual production output with production schedule reporting deviation is _____.
a) capacity planning b) forecasting
c) inventory management d) None

2) Volumetric energy density is the measure of: ____.
a) The speed of the vehicle
b) The weight of the battery
c) Energy stored per unit volume of a battery
d) Fuel efficiency

3) Swapped batteries in electric vehicles are used to: ____.
a) Allow for quick battery replacement and extend range
b) Reduce vehicle weight
c) Charge the vehicle at a slower rate
d) Increase motor efficiency

4) Tractive effort in electric vehicles is primarily responsible for: ____.
a) Fuel consumption b) Engine temperature
c) Propelling the vehicle forward d) Charging the battery

5) The performance of an electric vehicle is typically evaluated based on ____.
b) Noise levels b) Acceleration and top speed
c) Efficiency and range d) Vehicle size

6) Tractive effort in electric vehicles is primarily determined by: ____.
a) The motor torque and wheel size
b) The battery voltage
c) The color of the vehicle
d) The number of passengers

7) What is the main principle of operation of a DC motor?
a) Magnetic fields create a rotating magnetic field in the stator
b) Current-carrying conductors in a magnetic field experience a force
c) Current is induced in the rotor
d) The rotor creates a constant magnetic field

8) The rotor of a DC motor is connected to the: ____.
a) Stator b) Bearings
c) Armature d) Capacitor

9) In a synchronous motor, the rotor: ____.
a) Always moves at a speed slower than the synchronous speed
b) Rotates at the same speed as the magnetic field generated by the stator
c) Is completely independent of the stator's magnetic field
d) Is not necessary for operation

10) A chopper is used for: ____.
a) Converting DC to AC b) Converting DC voltage levels
c) Controlling motor speed d) Filtering high-frequency signals

11) An inverter is used to: ____.
a) Convert AC to DC b) Convert DC to AC
c) Increase the motor torque d) Control motor speed

12) A drive cycle is used to: ____.
a) Measure the efficiency of an internal combustion engine
b) Simulate vehicle conditions for testing energy consumption and emissions
c) Represent typical vehicle usage patterns for energy efficiency testing
d) Control the acceleration of electric vehicles

13) Regeneration efficiency in electric vehicles refers to: ____.
a) The effectiveness with which the vehicle converts braking energy into stored energy
b) The amount of energy used for acceleration
c) The amount of energy consumed during idling
d) The amount of energy lost in the motor

14) The traction energy for a drive cycle refers to: ____.
a) Energy used by the vehicle's accessories
b) The energy required to move the vehicle forward
c) Energy consumed during idle periods
d) Energy used in accelerating to top speed

S.Y. (B. Tech) (Sem-II) (New) (CBCS) Examination: March/April-2025
MECHANICAL ENGINEERING
Introduction to Electric and Hybrid Vehicles (MechHon-02B)

Day & Date: Monday, 09-June-2025 Max. Marks: 56
Time: 10:00 AM To 01:00 PM

Instructions: 1) Solve any two questions from each section.
2) Figures to the right indicate full marks.

Section – I

Q.2	**a)**	What are the major components of an electric vehicle? Explain their functions.	**05**
	b)	Discuss the current market trends for electric vehicles globally and in India.	**05**
	c)	Explain the historical development of electric vehicles from the 19th century to the present day.	**04**
Q.3	**a)**	What are the different configurations of electric vehicles?	**05**
	b)	Define tractive effort and discuss its role in vehicle performance.	**05**
	c)	How does regenerative braking help in improving energy efficiency?	**04**
Q.4	**a)**	What are the key differences between series and parallel hybrid electric drive trains?	**05**
	b)	What is the significance of plug-in hybrid electric vehicles (PHEVs)?	**05**
	c)	What are the major components of an HEV powertrain?	**04**

Section – II

Q.5	**a)**	Explain the basic construction and working principle of a DC motor.	**05**
	b)	Explain the role of permanent magnets in BLDC and synchronous motors.	**05**
	c)	Discuss the construction and working principle of a Switch Reluctance Motor (SRM).	**04**
Q.6	**a)**	What is a chopper circuit? Explain its role in DC motor control.	**05**
	b)	What is a Variable Frequency Drive (VFD)? How does it control AC motor speed?	**05**
	c)	Describe the working of an inverter and its applications.	**04**
Q.7	**a)**	Explain how energy efficiency is measured in electric vehicle drive cycles.	**05**
	b)	What are the characteristics of the Indian Drive Cycle (IDC)?	**05**
	c)	Describe the energy consumption characteristics of an Electric Compact Sedan.	**04**

MECHANICAL ENGINEERING
Introduction to Electric and Hybrid Vehicles (MechHon-02B)

Day & Date: Monday, 09-June-2025 Max. Marks: 70
Time: 10:00 AM To 01:00 PM

Instructions: 1) Q. No. 1 is compulsory. It should be solved in the first 30 minutes in Answer Book Page no 03 (Starting page of the Answer Book). Each question carries one mark.
2) Don't forget to Mention question paper set (P/Q/R/S) on top of page.
3) Figures to the right indicates full marks.

MCQ/Objective Type Questions

Duration: 30 Minutes Marks:14

Q.1 Choose the correct Answer. **14**

1) The rotor of a DC motor is connected to the: ____.
a) Stator b) Bearings
c) Armature d) Capacitor

2) In a synchronous motor, the rotor: ____.
a) Always moves at a speed slower than the synchronous speed
b) Rotates at the same speed as the magnetic field generated by the stator
c) Is completely independent of the stator's magnetic field
d) Is not necessary for operation

3) A chopper is used for: ____.
a) Converting DC to AC b) Converting DC voltage levels
c) Controlling motor speed d) Filtering high-frequency signals

4) An inverter is used to: ____.
a) Convert AC to DC b) Convert DC to AC
c) Increase the motor torque d) Control motor speed

5) A drive cycle is used to: ____.
a) Measure the efficiency of an internal combustion engine
b) Simulate vehicle conditions for testing energy consumption and emissions
c) Represent typical vehicle usage patterns for energy efficiency testing
d) Control the acceleration of electric vehicles

6) Regeneration efficiency in electric vehicles refers to: ____.
a) The effectiveness with which the vehicle converts braking energy into stored energy
b) The amount of energy used for acceleration
c) The amount of energy consumed during idling
d) The amount of energy lost in the motor

7) The traction energy for a drive cycle refers to: ____.
a) Energy used by the vehicle's accessories
b) The energy required to move the vehicle forward
c) Energy consumed during idle periods
d) Energy used in accelerating to top speed

8) Electric motor ratings arc typically specified in: ____.
a) Liters
b) Miles per hour (mph)
c) Kilowatts (kW)
d) Pounds

9) Volumetric energy density is the measure of: ____.
a) The speed of the vehicle
b) The weight of the battery
c) Energy stored per unit volume of a battery
d) Fuel efficiency

10) Swapped batteries in electric vehicles are used to: ____.
a) Allow for quick battery replacement and extend range
b) Reduce vehicle weight
c) Charge the vehicle at a slower rate
d) Increase motor efficiency

11) Tractive effort in electric vehicles is primarily responsible for: ____.
a) Fuel consumption
b) Engine temperature
c) Propelling the vehicle forward
d) Charging the battery

12) The performance of an electric vehicle is typically evaluated based on ____.
b) Noise levels
b) Acceleration and top speed
c) Efficiency and range
d) Vehicle size

13) Tractive effort in electric vehicles is primarily determined by: ____.
a) The motor torque and wheel size
b) The battery voltage
c) The color of the vehicle
d) The number of passengers

14) What is the main principle of operation of a DC motor?
a) Magnetic fields create a rotating magnetic field in the stator
b) Current-carrying conductors in a magnetic field experience a force
c) Current is induced in the rotor
d) The rotor creates a constant magnetic field

MCQ/Objective Type Questions

Duration: 30 Minutes Marks:14

Q.1 Choose the correct Answer. **14**

1) The complete solution of $(D^3 - 7D - 6)y = 0$ is _____.
a) $c_1e^x + c_2e^{-2x} + c_3e^{-3x}$ b) $c_1e^{-x} + c_2e^{-2x} + c_3e^{3x}$
c) $c_1e^{-x} + c_2e^{-2x} + c_3e^{-3x}$ d) None of these

2) The P.I. of $y'' - 3y' + 2y = 12$ is _____.
a) $c_1e^x + c_2e^{2x}$ b) $c_1e^{-x} + c_2e^{2x}$
c) 12 d) 6

3) $\frac{1}{D^2+a^2}\cos ax$ is equal to _____.
a) $\frac{x}{2a}\cos ax$ b) $\frac{x}{2a}\sin ax$
c) $\frac{x}{2a^2}\cos ax$ d) $\frac{x}{2a^2}\sin ax$

4) The solution of $q = 3p^2$ is _____.
a) $z = ax + 3a^2y + c$ b) $z = 3ax + a^2y + c$
c) $z = 3ax^2 + by$ d) $z = ax + \frac{a^2}{3}y + c$

5) Which of the following is Lagrange's equation?
a) $p^2x + q^2y = z$ b) $qy = px + z$
c) $px + q^2y = z$ d) $p^2x - qy = z^2$

6) The coefficient of $\cos(nx)$ in the Fourier series of $f(x) = x^3$ in $(-\pi, \pi)$ is _____.
a) 0 b) $\frac{1}{n}$
c) $\frac{4(-1)^n}{n^2}$ d) $\frac{-2(-1)^n}{n}$

7) In the interval $(0, \pi)$ the constant term in the half range consine series of $f(x) = x$ is _____.

a) π b) π^2

c) $\frac{\pi^2}{2}$ d) $\frac{\pi}{2}$

8) $L\{t^n e^{-at}\} =$ _____.

a) $\frac{n!}{(s+a)^{n+1}}$ b) $\frac{(n+1)!}{(s-a)^{n+1}}$

c) $\frac{n!}{(s+a)^n}$ d) $\frac{1}{(s+a)^n}$

9) $L^{-1}\left\{\frac{1}{(s-3)^2+16}\right\} =$ _____.

a) $\frac{e^{3t}}{4}\sin 4t$ b) $\frac{e^{-3t}}{4}sin4t$

c) $e^{3t}\cos 4t$ d) $e^{-3t}\cos 4t$

10) If $L\{f(t)\} = \varphi(s)$, then $L\{f(at)\} =$ _____.

a) $\varphi(s/a)$ b) $\frac{1}{s}\varphi(s/a)$

c) $\frac{1}{a}\varphi(s/a)$ d) None of these

11) For binomial distribution the mean in 2 and standard deviation is 1. Hence the value of n is equal to_____.

a) 2 b) 4

c) 3 d) 1

12) The lines of regression are given by $10y = x + 17$ and $x = 5y - 7$. Then mean x and mean y are _____.

a) 1 and 10 b) 1 and 5

c) 2 and 3 d) 3 and 2

13) The value of correlation coefficient r lies between _____

a) -1 and 1 b) $-\infty$ and ∞

c) 0 and ∞ d) none of these

14) The area under the standard normal curve from $z = -\infty$ to $z = 0$ is _____.

a) 1 b) 0

c) 1.5 d) 0.5

Set P

S. Y. (B. Tech) (Sem-II) (New/Old) (CBCS) Examination: March/April-2025
Mechanical Engineering
Engineering Mathematics–III(BTN02401)

Day & Date: Monday, 26-05-2025 Max. Marks: 56
Time: 10:00 AM To 01:00 PM

Instructions: 1) All questions are compulsory.
2) Figures to the right indicate full marks.
3) Use of non-programmable calculate is allowed.

SECTION – I

Q.2 Solve any three of the following questions. **09**

a) Solve: $(D^2 + 2D + 4)y = e^{2x}$

b) Solve: $px - qy = y^2 - x^2$

c) Solve: $(D^2 + 4)y = \sin x$

d) Solve: $pq = x^4y^3z^4$

e) Find Fourier series of $f(x) = x^2$ in $(0, 2\pi)$

Q.3 Solve any three of the following questions. **09**

a) Solve: $(D^2 - 1)y = e^x \cos x$

b) Solve: $(p^3 + q^3) = 27z$

c) Solve: $(5z - 7y)p + (7x - 3z)q = 3y - 5x$

d) Solve: $(D^2 + 3D + 2)y = e^{e^x}$

e) Obtain half range cosine series for $f(x) = x - x^2, 0 \le x \le 1$

Q.4 Solve any two of the following questions. **10**

a) The deflection of a strut with one end built-in and other supported and subjected to end-thrust P satisfies the equation.
$\frac{d^2y}{dx^2} + a^2y = \frac{a^2R}{P}(l - x)$ Given that $\frac{dy}{dx} = 0, y = 0$
when $x = 0$ & $y = 0$ $when x = l$. Prove that $y = \frac{R}{P}\left[\frac{\sin ax}{a} - l\cos ax + l - x\right]$
where $al = \tan al$ and l is the length of the strut.

b) Find Fourier series of $f(x) = e^{-x}, 0 < x < 2\pi$. Hence deduce the value of $\sum_{n=1}^{\infty} \frac{(-1)^n}{(n^2 + 1)}$

c) Solve the P.D.E. $\frac{\partial u}{\partial x} - 4\frac{\partial u}{\partial t} = 0$, given $u(0, t) = 8e^{-3t}$ by the method of separation of variables.

SECTION - II

Q.5 Solve any three of the followings. **09**

a) Find $L\left\{\int_0^t e^{-3t}\sin 5t\sin 3t dt\right\}$

b) Find the Laplace Transform of $\int_0^t \frac{\sin u}{u}\,du$

c) Find a real positive root of the equation $x^3 - 2x - 5 = 0$ by false position method correct to three places of decimals.

d) Find The positive root of $x^4 - x = 10$ correct to three decimal places by Newton-Raphson method. Take $x_0 = 2$ as initial approximation (Perform three iterations).

e) To find correlation coefficient of bivariate data, following results were obtained:$n = 25, \sum x = 125, \sum y = 100, \sum x^2 = 650, \sum y^2 = 460,$ $\sum xy = 508$. At the time of checking it was discovered that two pairs of (x, y): $(8,12), (6,8)$ were wrongly recorded as $(6,14), (8,6)$. Find the correct correlation.

Q.6 Solve any three of the following questions. **09**

a) If 10% bolts produced by a machine are defective, calculate the probability that out of a sample selected at random of 10 bolts, not more than one bolt will be defective.

b) In a sample of 1000 students, the mean and standard deviation of marks obtained by the students in a certain test are 14 & 2.5 Assuming the distribution to be normal find the number of students getting marks between 12 & 15.

[Given: For S.N.V. z, area between $z = 0 \& z = 0.4$ is 0.1554 and that between $z = 0 \& z = 0.8$ is 0.2881, that between $z = 0 \& z = 1.6$ is 0.4452 and that between $z = 0 \& z = 2.4$ is 0.4918.]

c) Find $L\left\{\frac{\cos 2t \sin 2t}{t}\right\}$

d) Evaluate by using Laplace transform

$$\int_0^\infty e^{-3t}\,\frac{(e^{-2t} - e^{-t})}{t}\,dt$$

e) Compute

$\int_0^6 \frac{dx}{1+x^2}$ by using Trapezoidal rule.

Q.7 Solve any two of the following questions. **10**

a) Evaluate $\int_0^1 e^x dx$ by using Simpsons $\left(\frac{1}{3}\right)^{rd}$ and $\left(\frac{3}{8}\right)^{th}$ rule

b) Calculate inverse Laplace transform of $\frac{s^2}{(s^2+4)(s^2+9)}$ by using Convolution method.

c) Find the equations of both lines of regression and also the coefficient of correlation from the following data.

(x)	62	64	65	69	70	71	72	74
(y)	126	125	139	145	165	152	180	208

Set **Q**

S. Y. (B. Tech) (Sem-II) (New/Old) (CBCS) Examination: March/April-2025
Mechanical Engineering
Engineering Mathematics–III(BTN02401)

Day & Date: Monday, 26-05-2025 Max. Marks: 70
Time: 10:00 AM To 01:00 PM

Instructions: 1) Q. No. 1 is compulsory. It should be solved in the first 30 minutes in Answer Book Page no 03 (Starting page of the Answer Book). Each question carries one mark.
2) Don't forget to Mention question paper set (P/Q/R/S) on top of page.
3) Figures to the right indicates full marks.
4) Make suitable assumptions (if necessary and state them clearly).

MCQ/Objective Type Questions

Duration: 30 Minutes Marks:14

Q.1 Choose the correct Answer. **14**

1) $L\{t^n e^{-at}\} =$ _____.

a) $\frac{n!}{(s+a)^{n+1}}$ b) $\frac{(n+1)!}{(s-a)^{n+1}}$

c) $\frac{n!}{(s+a)^n}$ d) $\frac{1}{(s+a)^n}$

2) $L^{-1}\left\{\frac{1}{(s-3)^2+16}\right\} =$ _____.

a) $\frac{e^{3t}}{4}\sin 4t$ b) $\frac{e^{-3t}}{4}sin4t$

c) $e^{3t}\cos 4t$ d) $e^{-3t}\cos 4t$

3) If $L\{f(t)\} = \varphi(s)$, then $L\{f(at)\} =$ _____.

a) $\varphi(s/a)$ b) $\frac{1}{s}\varphi(s/a)$

c) $\frac{1}{a}\varphi(s/a)$ d) None of these

4) For binomial distribution the mean in 2 and standard deviation is 1. Hence the value of n is equal to_____.

a) 2 b) 4
c) 3 d) 1

5) The lines of regression are given by $10y = x + 17$ and $x = 5y - 7$. Then mean x and mean y are _____.

a) 1 and 10 b) 1 and 5
c) 2 and 3 d) 3 and 2

6) The value of correlation coefficient r lies between _____

a) -1 and 1 b) $-\infty$ and ∞

c) 0 and ∞ d) none of these

7) The area under the standard normal curve from $z = -\infty$ to $z = 0$ is _____.

a) 1 b) 0

c) 1.5 d) 0.5

8) The complete solution of $(D^3 - 7D - 6)y = 0$ is _____.

a) $c_1e^x + c_2e^{-2x} + c_3e^{-3x}$ b) $c_1e^{-x} + c_2e^{-2x} + c_3e^{3x}$

c) $c_1e^{-x} + c_2e^{-2x} + c_3e^{-3x}$ d) None of these

9) The P.I. of $y'' - 3y' + 2y = 12$ is _____.

a) $c_1e^x + c_2e^{2x}$ b) $c_1e^{-x} + c_2e^{2x}$

c) 12 d) 6

10) $\frac{1}{D^2+a^2}\cos ax$ is equal to _____.

a) $\frac{x}{2a}\cos ax$ b) $\frac{x}{2a}\sin ax$

c) $\frac{x}{2a^2}\cos ax$ d) $\frac{x}{2a^2}\sin ax$

11) The solution of $q = 3p^2$ is _____.

a) $z = ax + 3a^2y + c$ b) $z = 3ax + a^2y + c$

c) $z = 3ax^2 + by$ d) $z = ax + \frac{a^2}{3}y + c$

12) Which of the following is Lagrange's equation?

a) $p^2x + q^2y = z$ b) $qy = px + z$

c) $px + q^2y = z$ d) $p^2x - qy = z^2$

13) The coefficient of $\cos(nx)$ in the Fourier series of $f(x) = x^3$ in $(-\pi, \pi)$ is _____.

a) 0 b) $\frac{1}{n}$

c) $\frac{4(-1)^n}{n^2}$ d) $\frac{-2(-1)^n}{n}$

14) In the interval $(0, \pi)$ the constant term in the half range consine series of $f(x) = x$ is _____.

a) π b) π^2

c) $\frac{\pi^2}{2}$ d) $\frac{\pi}{2}$

Seat No.	

Set **Q**

S. Y. (B. Tech) (Sem-II) (New/Old) (CBCS) Examination: March/April-2025
Mechanical Engineering
Engineering Mathematics–III(BTN02401)

Day & Date: Monday, 26-05-2025 Max. Marks: 56
Time: 10:00 AM To 01:00 PM

Instructions: 1) All questions are compulsory.
2) Figures to the right indicate full marks.
3) Use of non-programmable calculate is allowed.

SECTION – I

Q.2 Solve any three of the following questions. **09**

a) Solve: $(D^2 + 2D + 4)y = e^{2x}$

b) Solve: $px - qy = y^2 - x^2$

c) Solve: $(D^2 + 4)y = \sin x$

d) Solve: $pq = x^4y^3z^4$

e) Find Fourier series of $f(x) = x^2$ in $(0, 2\pi)$

Q.3 Solve any three of the following questions. **09**

a) Solve: $(D^2 - 1)y = e^x \cos x$

b) Solve: $(p^3 + q^3) = 27z$

c) Solve: $(5z - 7y)p + (7x - 3z)q = 3y - 5x$

d) Solve: $(D^2 + 3D + 2)y = e^{e^x}$

e) Obtain half range cosine series for $f(x) = x - x^2, 0 \le x \le 1$

Q.4 Solve any two of the following questions. **10**

a) The deflection of a strut with one end built-in and other supported and subjected to end-thrust P satisfies the equation.
$\frac{d^2y}{dx^2} + a^2y = \frac{a^2R}{P}(l - x)$ Given that $\frac{dy}{dx} = 0, y = 0$
when $x = 0$ & $y = 0$ $when x = l$. Prove that $y = \frac{R}{P}\left[\frac{\sin ax}{a} - l\cos ax + l - x\right]$
where $al = \tan al$ and l is the length of the strut.

b) Find Fourier series of $f(x) = e^{-x}, 0 < x < 2\pi$. Hence deduce the value of $\sum_{n=1}^{\infty} \frac{(-1)^n}{(n^2 + 1)}$

c) Solve the P.D.E. $\frac{\partial u}{\partial x} - 4\frac{\partial u}{\partial t} = 0$, given $u(0, t) = 8e^{-3t}$ by the method of separation of variables.

SECTION - II

Q.5 Solve any three of the followings. **09**

a) Find $L\left\{\int_0^t e^{-3t}\sin 5t\sin 3t dt\right\}$

b) Find the Laplace Transform of $\int_0^t \frac{\sin u}{u}\,du$

c) Find a real positive root of the equation $x^3 - 2x - 5 = 0$ by false position method correct to three places of decimals.

d) Find The positive root of $x^4 - x = 10$ correct to three decimal places by Newton-Raphson method. Take $x_0 = 2$ as initial approximation (Perform three iterations).

e) To find correlation coefficient of bivariate data, following results were obtained:$n = 25, \sum x = 125, \sum y = 100, \sum x^2 = 650, \sum y^2 = 460,$ $\sum xy = 508$. At the time of checking it was discovered that two pairs of (x, y): $(8,12), (6,8)$ were wrongly recorded as $(6,14), (8,6)$. Find the correct correlation.

Q.6 Solve any three of the following questions. **09**

a) If 10% bolts produced by a machine are defective, calculate the probability that out of a sample selected at random of 10 bolts, not more than one bolt will be defective.

b) In a sample of 1000 students, the mean and standard deviation of marks obtained by the students in a certain test are 14 & 2.5 Assuming the distribution to be normal find the number of students getting marks between 12 & 15.

[Given: For S.N.V. z, area between $z = 0 \& z = 0.4$ is 0.1554 and that between $z = 0 \& z = 0.8$ is 0.2881, that between $z = 0 \& z = 1.6$ is 0.4452 and that between $z = 0 \& z = 2.4$ is 0.4918.]

c) Find $L\left\{\frac{\cos 2t \sin 2t}{t}\right\}$

d) Evaluate by using Laplace transform

$$\int_0^\infty e^{-3t}\,\frac{(e^{-2t} - e^{-t})}{t}\,dt$$

e) Compute

$\int_0^6 \frac{dx}{1+x^2}$ by using Trapezoidal rule.

Q.7 Solve any two of the following questions. **10**

a) Evaluate $\int_0^1 e^x dx$ by using Simpsons $\left(\frac{1}{3}\right)^{rd}$ and $\left(\frac{3}{8}\right)^{th}$ rule

b) Calculate inverse Laplace transform of $\frac{s^2}{(s^2+4)(s^2+9)}$ by using Convolution method.

c) Find the equations of both lines of regression and also the coefficient of correlation from the following data.

(x)	62	64	65	69	70	71	72	74
(y)	126	125	139	145	165	152	180	208

MCQ/Objective Type Questions

Duration: 30 Minutes Marks:14

Q.1 Choose the correct Answer. **14**

1) The coefficient of $\cos(nx)$ in the Fourier series of $f(x) = x^3$ in $(-\pi, \pi)$ is _____.

a) 0 b) $\frac{1}{n}$

c) $\frac{4(-1)^n}{n^2}$ d) $\frac{-2(-1)^n}{n}$

2) In the interval $(0, \pi)$ the constant term in the half range consine series of $f(x) = x$ is _____.

a) π b) π^2

c) $\frac{\pi^2}{2}$ d) $\frac{\pi}{2}$

3) $L\{t^n e^{-at}\} =$ _____.

a) $\frac{n!}{(s+a)^{n+1}}$ b) $\frac{(n+1)!}{(s-a)^{n+1}}$

c) $\frac{n!}{(s+a)^n}$ d) $\frac{1}{(s+a)^n}$

4) $L^{-1}\left\{\frac{1}{(s-3)^2+16}\right\} =$ _____.

a) $\frac{e^{3t}}{4}\sin 4t$ b) $\frac{e^{-3t}}{4}sin4t$

c) $e^{3t}\cos 4t$ d) $e^{-3t}\cos 4t$

5) If $L\{f(t)\} = \varphi(s)$, then $L\{f(at)\} =$ _____.

a) $\varphi(s/a)$ b) $\frac{1}{s}\varphi(s/a)$

c) $\frac{1}{a}\varphi(s/a)$ d) None of these

6) For binomial distribution the mean in 2 and standard deviation is 1. Hence the value of n is equal to_____.

a) 2 b) 4

c) 3 d) 1

7) The lines of regression are given by $10y = x + 17$ and $x = 5y - 7$. Then mean x and mean y are _____.

a) 1 and 10 b) 1 and 5

c) 2 and 3 d) 3 and 2

8) The value of correlation coefficient r lies between _____

a) -1 and 1 b) $-\infty$ and ∞

c) 0 and ∞ d) none of these

9) The area under the standard normal curve from $z = -\infty$ to $z = 0$ is _____.

a) 1 b) 0

c) 1.5 d) 0.5

10) The complete solution of $(D^3 - 7D - 6)y = 0$ is _____.

a) $c_1e^x + c_2e^{-2x} + c_3e^{-3x}$ b) $c_1e^{-x} + c_2e^{-2x} + c_3e^{3x}$

c) $c_1e^{-x} + c_2e^{-2x} + c_3e^{-3x}$ d) None of these

11) The P.I. of $y'' - 3y' + 2y = 12$ is _____.

a) $c_1e^x + c_2e^{2x}$ b) $c_1e^{-x} + c_2e^{2x}$

c) 12 d) 6

12) $\frac{1}{D^2+a^2}\cos ax$ is equal to _____.

a) $\frac{x}{2a}\cos ax$ b) $\frac{x}{2a}\sin ax$

c) $\frac{x}{2a^2}\cos ax$ d) $\frac{x}{2a^2}\sin ax$

13) The solution of $q = 3p^2$ is _____.

a) $z = ax + 3a^2y + c$ b) $z = 3ax + a^2y + c$

c) $z = 3ax^2 + by$ d) $z = ax + \frac{a^2}{3}y + c$

14) Which of the following is Lagrange's equation?

Q.3 Solve any three of the following questions. **09**

a) Solve: $(D^2 - 1)y = e^x \cos x$

b) Solve: $(p^3 + q^3) = 27z$

c) Solve: $(5z - 7y)p + (7x - 3z)q = 3y - 5x$

d) Solve: $(D^2 + 3D + 2)y = e^{e^x}$

e) Obtain half range cosine series for $f(x) = x - x^2, 0 \le x \le 1$

Q.4 Solve any two of the following questions. **10**

a) The deflection of a strut with one end built-in and other supported and subjected to end-thrust P satisfies the equation.
$\frac{d^2y}{dx^2} + a^2y = \frac{a^2R}{P}(l - x)$ Given that $\frac{dy}{dx} = 0, y = 0$
when $x = 0$ & $y = 0$ $when x = l$. Prove that $y = \frac{R}{P}\left[\frac{\sin ax}{a} - l\cos ax + l - x\right]$
where $al = \tan al$ and l is the length of the strut.

b) Find Fourier series of $f(x) = e^{-x}, 0 < x < 2\pi$. Hence deduce the value of $\sum_{n=1}^{\infty} \frac{(-1)^n}{(n^2 + 1)}$

c) Solve the P.D.E. $\frac{\partial u}{\partial x} - 4\frac{\partial u}{\partial t} = 0$, given $u(0, t) = 8e^{-3t}$ by the method of separation of variables.

SECTION - II

Q.5 Solve any three of the followings. **09**

a) Find $L\left\{\int_0^t e^{-3t}\sin 5t\sin 3t dt\right\}$

b) Find the Laplace Transform of $\int_0^t \frac{\sin u}{u}\,du$

c) Find a real positive root of the equation $x^3 - 2x - 5 = 0$ by false position method correct to three places of decimals.

d) Find The positive root of $x^4 - x = 10$ correct to three decimal places by Newton-Raphson method. Take $x_0 = 2$ as initial approximation (Perform three iterations).

e) To find correlation coefficient of bivariate data, following results were obtained:$n = 25, \sum x = 125, \sum y = 100, \sum x^2 = 650, \sum y^2 = 460,$ $\sum xy = 508$. At the time of checking it was discovered that two pairs of (x, y): $(8,12), (6,8)$ were wrongly recorded as $(6,14), (8,6)$. Find the correct correlation.

Q.6 Solve any three of the following questions. **09**

a) If 10% bolts produced by a machine are defective, calculate the probability that out of a sample selected at random of 10 bolts, not more than one bolt will be defective.

b) In a sample of 1000 students, the mean and standard deviation of marks obtained by the students in a certain test are 14 & 2.5 Assuming the distribution to be normal find the number of students getting marks between 12 & 15.

[Given: For S.N.V. z, area between $z = 0 \& z = 0.4$ is 0.1554 and that between $z = 0 \& z = 0.8$ is 0.2881, that between $z = 0 \& z = 1.6$ is 0.4452 and that between $z = 0 \& z = 2.4$ is 0.4918.]

c) Find $L\left\{\frac{\cos 2t \sin 2t}{t}\right\}$

d) Evaluate by using Laplace transform

$$\int_0^\infty e^{-3t}\,\frac{(e^{-2t} - e^{-t})}{t}\,dt$$

e) Compute

$\int_0^6 \frac{dx}{1+x^2}$ by using Trapezoidal rule.

Q.7 Solve any two of the following questions. **10**

a) Evaluate $\int_0^1 e^x dx$ by using Simpsons $\left(\frac{1}{3}\right)^{rd}$ and $\left(\frac{3}{8}\right)^{th}$ rule

b) Calculate inverse Laplace transform of $\frac{s^2}{(s^2+4)(s^2+9)}$ by using Convolution method.

c) Find the equations of both lines of regression and also the coefficient of correlation from the following data.

(x)	62	64	65	69	70	71	72	74
(y)	126	125	139	145	165	152	180	208

S. Y (B. Tech) (Sem-II) (New/Old) (CBCS) Examination: March/April-2024
MECHANICAL ENGINEERING
Manufacturing Technology (BTN02402)

Day & Date: Wednesday, 28-05-2025 Max. Marks: 70
Time: 10:00 AM To 01:00 PM

Instructions: 1) Q. No. 1 is compulsory. It should be solved in the first 20 minutes In Answer Book Page no 03 (Starting page of the Answer Book). Each Question carries one mark.
2) Don't forget to Mention question paper set (P/Q/R/S) on top of page.
3) Figures to the right indicates full marks.
4) Make suitable assumptions (if necessary and state them clearly).

MCQ/Objective Type Questions

Duration: 30 Minutes Marks:14

Q.1 Choose the correct answer. **14**

1) The gear shaving is the process of _____.
a) Gear generation b) Gear finishing
c) Gear forging d) Gear casting

2) The job reciprocates in _____.
a) Shaping machine b) Planing machine
c) Slotting machine d) All of the above

3) Up milling is a conventional milling and during process lot of heat is generated _____.
a) True b) False

4) The primary mechanism of material removal in electrochemical machining (ECM) is _____.
a) chemical corrosion b) etching
c) ionic dissolution d) spark erosion

5) In the grinding wheel specification, WC20M6V18 what V stands for?
a) Abrasive b) Structure
c) Grade d) Bond

6) Point to point (PTP) in CNC machines is the type of _____.
a) CNC drilling b) CNC turning
c) CNC milling d) CNC grinding

7) Table contains _____ slots.
a) L-slots b) T-Slots
c) H-Slots d) All of these

8) In simple indexing method, one complete rotation of spindle makes rotation of index crank _____.

a) 24 b) 40
c) 20 d) 30

9) Most widely used bond is _____.

a) Oxy chloride bond b) Vitrified bond
c) Rubber bond d) Shellac bond

10) The cylindrical work pieces are held in the drilling machine to carry the operations in _____.

a) C-clamp b) Machine Vice
c) V block d) T-bolt

11) The chips are maximum at the initial and minimum at end when cut terminates in _____.

a) Down Milling b) Form Milling
c) Side Milling d) Conventional Milling

12) The reaming is an operation which _____.

a) finish the drilled hole b) enlarge pre drilled hole
c) Internal thread d) form external thread

13) Tapping operation can perform in _____.

a) Lathe machine b) Slotting machine
c) Grinding machine d) Drilling machine

14) Grinding is the process of removing material by a _____action.

a) Rubbing b) Cutting
c) Polishing d) Wearing

Manufacturing Technology (BTN02402)

Day & Date: Wednesday, 28-05-2025 Max. Marks: 56
Time: 10:00 AM To 01:00 PM

Instructions: 1) In Section - 1. Q. 2 is compulsory. Attempt any two questions from the remaining questions.
2) In Section - II, attempt any two questions from given questions.
3) Figures to the right indicate full marks.
4) Make suitable assumptions, if required and state them clearly.
5) Use of non-programmable calculator is allowed.

Section – I

Q.2 Solve:
- **a)** Explain with neat diagram the taper turning by Swiveling compound rest. **05**
- **b)** List the different accessories used in lathe machine. Explain three jaw chuck. **05**

Q.3 Solve:
- **a)** Explain construction and working of vertical boring machine with neat sketch. **05**
- **b)** Compare shaper and planer machine. **04**

Q.4 Solve:
- **a)** Classify broaching machine and explain with neat sketch pull type broach. **05**
- **b)** Explain Slotting machine. **04**

Q.5 Answer the following questions. (Any Three) **09**
- **a)** Turret indexing mechanism
- **b)** Types of reciprocating machines
- **c)** Classification of CNC machine
- **d)** Capstan lathe
- **e)** Lathe attachments

Section – II

Q.6 Solve:

a)	With neat diagram explain construction a working of column a knee type of milling machine.	**05**
b)	Explain gear cutting on milling machine.	**05**
c)	Difference between up milling and down milling.	**04**

Q.7 Solve:

a)	Classify the grinding machines. Explain any one.	**05**
b)	Explain the construction and working of gear Hobbing machine?	**05**
c)	Explain jig boring machine.	**04**

Q.8 Write short notes. (Any Four) **14**

a) Gear shaving
b) ECM
c) Difference between Conventional and Non-conventional machining
d) EDM
e) A WJM

MCQ/Objective Type Questions

Duration: 30 Minutes Marks:14

Q.1 Choose the correct Answer. **14**

1) The position of the Center of pressure for the inclined plane surface is always _____ the Centre of Gravity.
a) above b) below
c) coincide d) can't predict

2) The metacentric height is the distance between the _____.
a) centre of gravity of the floating body and the centre of buoyancy
b) centre of gravity of the floating body and the metacentre
c) metacentre and centre of buoyancy
d) original centre of buoyancy and new centre of buoyancy

3) Streamlines, path lines and streak lines are identical in _____.
a) uniform flow b) compressible flow
c) steady flow d) highly viscous flow

4) A negative derivative of the velocity function with respect to a given direction will give the _____.
a) Velocity in the perpendicular direction
b) Velocity in the same direction
c) Velocity in any direction
d) none of the above

5) The major loss of energy in long pipes is due to _____.
a) sudden enlargement
b) sudden contraction
c) gradual contraction on enlargement
d) friction

6) In Venturimeter, the velocity of the liquid at the throat is _____ as compared to the inlet velocity of the liquid.

a) higher b) lower
c) equal d) can't predict

7) For laminar flow in circular pipes, Darcy's friction factor f is equal to _____ where Re is Reynold's, number.

a) 16/Re b) 32/Re
c) 64/Re d) none of the above

8) The dimensions of the coefficient of viscosity (μ) are: _____.

a) ML^1T^{-2} b) $M^2L^1T^1$
c) $ML^{-1}T^{-1}$ d) $ML^{-1}T^{-2}$

9) When a pump casing is filled with liquid before it is started, it is called as _____.

a) Efficiency of pump b) Priming
c) Suction head d) Net positive suction head

10) Generally, the value of the specific speed of the Kaplan turbine is _____ that of the Pelton turbine.

a) lower than b) higher than
c) same as d) unpredictable

11) In the case of Francis Turbine _____ allow the water to strike the vanes fixed on a runner without shock at the inlet.

a) Casing b) Guide vanes
c) Runner d) Draft tube

12) The value of Drag Force & Lift Force is zero for _____.

a) Square Plate b) Triangular Plate
c) Sphere d) All of the above

13) The number of Buckets of the Pelton wheel is obtained by the equation _____.

a) Z = 15 + (2D/d) b) Z = 15 + (2d/D)
c) Z = 15 + (D/2d) d) Z = 15 + (d/2D)

14) The multistage centrifugal pump required for High Head is to be connected in _____.

a) parallel b) axial
c) radial d) series

Time: 10:00 AM To 01:00 PM

Instructions: 1) Slove any two questions from each section.
2) Figures to the right indicate full marks.
3) Make suitable assumptions if necessary and state them clearly.

Section – I

Q.2 Solve the Followings.

a) What is a minor loss in case of flow through pipes? List all types of minor losses along with the formulae. **05**

b) Derive the expression for Total Pressure force & Position of centre of pressure for vertical Plane Surface. **05**

c) A pipe of diameter 300 mm and length 3500 m is used for the transmission of power by water. The total head at the inlet of the pipe is 500 m. Find the maximum power available at the outlet of the pipe, if the value of f=0.006. **04**

Q.3 Solve the Followings.

a) What is a Veturimeter? Derive an expression for the discharge through a venturimeter. **05**

b) A circular plate 1.5 m in diameter is immersed in water, its greatest and least depth below the free surface being 2 m and 0.75 m respectively. Find. **05**
1) The total pressure on one face of the plate
2) Position of centre of pressure

c) Explain Pipes in Series and Pipes in Parallel. **04**

Q.4 Solve the Followings.

a) With a neat sketch explain the conditions of the equilibrium for the Submerged body. **05**

b) In a two-dimensional incompressible flow, the fluid velocity components are given by $u = x - 4y$ and $v = -y - 4x$. **05**
Show that the velocity potential function exists and determine its form. Also, find the stream function.

c) Explain the different types of hydraulic coefficients. **04**

Section – II

Q.5 Solve the Followings.

a) Explain the construction and working of a centrifugal pump with a neat sketch. **05**

b) An inward-flow reaction turbine has external & internal diameters of 0.9 m & 0.45 m respectively. The turbine is running at 200 rpm & the width of the turbine at inlet is 200 mm. The velocity of flow through the runner is constant & is equal to 1.8 m/sec. The guide blade makes an angle of 10° to the tangent of the wheel & discharge at the outlet is radial. **05**

Draw inlet & outlet velocity triangle & determine

1) Absolute Velocity of Water at the inlet of Runner
2) Velocity of Whirl at Inlet
3) Runner blade angles
4) Width of the runner at the outlet

c) Write down the rules for selecting repeating variables in dimensional analysis. **04**

Q.6 Solve the Followings.

a) The resisting force (R) of the supersonic plane during the flight can be considered as dependent upon the length of the aircraft (L), velocity (V), dynamic viscosity (μ), air density (ρ) and bulk modulus of air (K). Express the functional relationship between these variables and resisting force. **05**

b) Obtain an expression for the work done per second by water on the runner of a Pelton wheel. **05**

c) Derive an expression for the minimum starting speed of the Centrifugal Pump. **04**

Q.7 Solve the Followings.

a) Why multistaging of centrifugal pumps required? Explain Pumps in Series & Pumps in Parallel. **05**

b) Explain governing of water turbines. **05**

c) A flat plate 2 m x 2 m moves at 40 km/hr in a stationary air of density 1.2 kg/m^3. If the co-efficient of drag and lift are 0.1 and 0.5 respectively, find: **04**

1) the lift force
2) the drag force
3) the resultant force, and
4) the power required to keep the plate in motion

Set Q

S. Y. (B. Tech) (Sem-II) (New/Old) (CBCS) Examination: March/April-2025
MECHANICAL ENGINEERING
Fluid Mechanics & Fluid Machines (BTN02403)

Day & Date: Friday 30-05-2025 Max. Marks: 70
Time: 10:00 AM To 01:00 PM

Instructions: 1) Q. No. 1 is compulsory. It should be solved in the first 30 minutes in Answer Book Page no 03 (Starting page of the Answer Book). Each question carries one mark.
2) Don't forget to Mention question paper set (P/Q/R/S) on top of page.
3) Figures to the right indicates full marks.
4) Make suitable assumptions if necessary and state them clearly.

MCQ/Objective Type Questions

Duration: 30 Minutes Marks:14

Q.1 Choose the correct Answer. **14**

1) The dimensions of the coefficient of viscosity (μ) are: _____.
a) ML^1T^{-2} b) $M^2L^1T^1$
c) $ML^{-1}T^{-1}$ d) $ML^{-1}T^{-2}$

2) When a pump casing is filled with liquid before it is started, it is called as _____.
a) Efficiency of pump b) Priming
c) Suction head d) Net positive suction head

3) Generally, the value of the specific speed of the Kaplan turbine is _____ that of the Pelton turbine.
a) lower than b) higher than
c) same as d) unpredictable

4) In the case of Francis Turbine _____ allow the water to strike the vanes fixed on a runner without shock at the inlet.
a) Casing b) Guide vanes
c) Runner d) Draft tube

5) The value of Drag Force & Lift Force is zero for _____.
a) Square Plate b) Triangular Plate
c) Sphere d) All of the above

6) The number of Buckets of the Pelton wheel is obtained by the equation _____.
a) Z = 15 + (2D/d) b) Z = 15 + (2d/D)
c) Z = 15 + (D/2d) d) Z = 15 + (d/2D)

7) The multistage centrifugal pump required for High Head is to be connected in _____.

a) parallel b) axial
c) radial d) series

8) The position of the Center of pressure for the inclined plane surface is always _____ the Centre of Gravity.

a) above b) below
c) coincide d) can't predict

9) The metacentric height is the distance between the _____.

a) centre of gravity of the floating body and the centre of buoyancy
b) centre of gravity of the floating body and the metacentre
c) metacentre and centre of buoyancy
d) original centre of buoyancy and new centre of buoyancy

10) Streamlines, path lines and streak lines are identical in _____.

a) uniform flow b) compressible flow
c) steady flow d) highly viscous flow

11) A negative derivative of the velocity function with respect to a given direction will give the _____.

a) Velocity in the perpendicular direction
b) Velocity in the same direction
c) Velocity in any direction
d) none of the above

12) The major loss of energy in long pipes is due to _____.

a) sudden enlargement
b) sudden contraction
c) gradual contraction on enlargement
d) friction

13) In Venturimeter, the velocity of the liquid at the throat is _____ as compared to the inlet velocity of the liquid.

a) higher b) lower
c) equal d) can't predict

14) For laminar flow in circular pipes, Darcy's friction factor f is equal to _____ where Re is Reynold's, number.

a) 16/Re b) 32/Re
c) 64/Re d) none of the above

Day & Date: Friday 30-05-2025 Max. Marks: 56
Time: 10:00 AM To 01:00 PM

Instructions: 1) Slove any two questions from each section.
2) Figures to the right indicate full marks.
3) Make suitable assumptions if necessary and state them clearly.

Section – I

Q.2 Solve the Followings.

a) What is a minor loss in case of flow through pipes? List all types of minor losses along with the formulae. **05**

b) Derive the expression for Total Pressure force & Position of centre of pressure for vertical Plane Surface. **05**

c) A pipe of diameter 300 mm and length 3500 m is used for the transmission of power by water. The total head at the inlet of the pipe is 500 m. Find the maximum power available at the outlet of the pipe, if the value of f=0.006. **04**

Q.3 Solve the Followings.

a) What is a Veturimeter? Derive an expression for the discharge through a venturimeter. **05**

b) A circular plate 1.5 m in diameter is immersed in water, its greatest and least depth below the free surface being 2 m and 0.75 m respectively. Find. **05**
1) The total pressure on one face of the plate
2) Position of centre of pressure

c) Explain Pipes in Series and Pipes in Parallel. **04**

Q.4 Solve the Followings.

a) With a neat sketch explain the conditions of the equilibrium for the Submerged body. **05**

b) In a two-dimensional incompressible flow, the fluid velocity components are given by $u = x - 4y$ and $v = -y - 4x$. **05**
Show that the velocity potential function exists and determine its form. Also, find the stream function.

c) Explain the different types of hydraulic coefficients. **04**

MCQ/Objective Type Questions

Duration: 30 Minutes Marks:14

Q.1 Choose the correct Answer. 14

1) The mechanism forms a structure, when the number of degrees of freedom (n) is equal to _____.
a) 0 b) 1
c) 2 d) -1

2) The total number of instantaneous centres for a mechanism consisting of n links are _____.
a) n/2 b) n
c) n-1/2 d) n (n-1)/2

3) The motion of a piston in the cylinder of a steam engine is an example of _____.
a) completely constrained motion
b) incompletely constrained motion
c) successfully constrained motion
d) none of these

4) Which of the following is an inversion of double slider crank chain?
a) Coupling rod of a locomotive
b) Pendulum pump
c) Elliptical trammels
d) Oscillating cylinder engine

5) Which of the following is a turning pair?
a) Piston and cylinder of a reciprocating steam engine
b) Shaft with collars at both ends fitted in a circular hole
c) Lead screw of a lathe with nut
d) Ball and socket joint

6) Which of the following displacement diagrams should be chosen for better dynamic performance of a cam-follower mechanism?
a) simple harmonic motion b) parabolic motion
c) cycloidal motion d) None of these

7) In a radial cam, the follower moves _____.
a) in a direction perpendicular to the cam axis
b) in a direction parallel to the cam axis
c) in any direction irrespective of the cam axis
d) along the cam axis

8) The magnitude of linear velocity of a point B on a link AB relative to point A is _____.
a) $\omega . AB$ b) $\omega (AB)^2$
c) $\omega^2 . AB$ d) $(\omega^2 . AB)^2$

9) In a simple gear train, if the number of idle gears is odd, then the motion of driven gear will _____
a) be same as that of driving gear
b) be opposite as that of driving gear
c) depend upon the number of teeth on the driving gear
d) none of the above

10) A differential gear in automobiles is used to _____.
a) reduce speed
b) assist in changing speed
c) provide jerk-free movement of vehicle
d) help in turning

11) A Hartnell governor is a _____.
a) pendulum type governor b) spring loaded governor
c) dead weight governor d) Inertia governor

12) A hunting governor is _____.
a) more stable b) less sensitive
c) more sensitive d) None of these

13) For static balancing of a shaft, _____.
a) the net dynamic force acting on the shaft is equal to zero
b) the net couple due to the dynamic forces acting on the shaft is equal to zero
c) both (a) and (b)
d) none of the above

14) Secondary forces in reciprocating mass on engine frame are _____.
a) of same frequency as of primary forces
b) twice the frequency as of primary forces
c) four times the frequency as of primary forces
d) none of the above

Kinematics &Theory of Machines (BTN02404)

Day & Date: Tuesday, 03-June-2025 Max. Marks: 56
Time: 10:00 AM To 01:00 PM

Instructions: 1) Answer any two questions from each section.
2) Make suitable assumptions if necessary and state them clearly.
3) Draw neat diagram wherever necessary.

Section – I

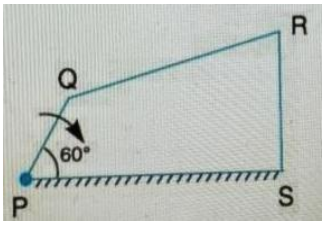
Q.2 **a)** Define Kinematic Pair and describe any 3 type of kinematic pairs. **04**

b) Define inversion of mechanism and draw any one inversion of double slider crank chain. **04**

c) Describe the following motions with neat sketches: **06**
1) Completely constrained motion
2) Incompletely constrained motions
3) Successfully constrained motion

Q.3 **a)** Locate the instantaneous centers and draw the circle diagram for the four bar mechanism. **06**

b) PQRS is a four bar chain with link PS fixed. The lengths of the links are PQ = 62.5 mm; QR = 175 mm; RS = 112.5 mm; and PS = 200 mm. The crank PQ rotates at 10 rad/s clockwise. Draw the velocity and acceleration diagram when angle QPS = 60° and Q and R lie on the same side of PS. Find the angular velocity and angular acceleration of links QR. **08**



Q.4 **a)** Define the following terms with reference to cams: **06**
1) Base circle 2) Pressure angle 3) Lift i

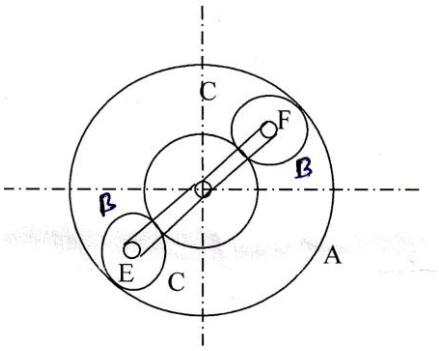
b) A cam, with a minimum radius of 50 mm, rotating clockwise at a uniform speed, is required to give a knife edge follower the motion as described below: **08**
1) To move outwards through 40 mm during 100° rotation of the cam;
2) To dwell for next 80°
3) To return to its starting position during next 90°, and
4) To dwell for the rest period of a revolution i.e. 90°

Draw the profile of the cam when the line of stroke of the follower passes through the centre of the cam shaft.

Section – II

Q.5 **a)** Compare cycloid and involute tooth profiles. **06**

b) An epicyclic gear consists of three gears A, B and C as shown in Fig. The gear A has 72 internal teeth and gear C has 32 external teeth. The gear B meshes with both A and C and is carried on an arm EF which rotates about the centre of A at 18 r.p.m. If the gear A is fixed, determine the speed of gears B and C. **08**



Q.6 **a)** For governors explain: **06**

1) Sensitiveness
2) stability
3) isochronism

b) The arms of a Porter governor are each 250 mm long and pivoted on the governor axis. The mass of each ball is 5 kg and the mass of the central sleeve is 30 kg. The radius of rotation of the balls is 150 mm when the sleeve begins to rise and reaches a value of 200 mm for maximum speed. Determine the speed range of the governor. If the friction at the sleeve is equivalent of 20 N of load at the sleeve, determine how the speed range is modified. **08**

Q.7 **a)** Describe balancing of several masses in several plain. **06**

b) A, B, C and D are four masses carried by a rotating shaft at radii 100, 125, 200 and 150 mm respectively. The planes in which the masses revolve are spaced 600 mm apart and the mass of B, C and D are 10 kg, 5 kg, and 4 kg respectively. **08**

Find the required mass A and the relative angular settings of the four masses so that the shaft shall be in complete balance.

Set Q

S.Y. (B. Tech.) (Sem-II) (New/Old) (CBCS) Examination: March/April-2025
MECHANICAL ENGINEERING
Kinematics &Theory of Machines (BTN02404)

Day & Date: Tuesday, 03-June-2025 Max. Marks: 70
Time: 10:00 AM To 01:00 PM

Instructions: 1) Q. No. 1 is compulsory. It should be solved in the first 30 minutes in answer Book Page no 03 (Starting page of the Answer Book). Each question carries one mark.
2) Don't forget to Mention question paper set (P/Q/R/S) on top of page.
3) Figures to the right indicates full marks.
4) Make suitable assumptions if necessary and state them clearly.

MCQ/Objective Type Questions

Duration: 30 Minutes Marks:14

Q.1 Choose the correct Answer. **14**

1) The magnitude of linear velocity of a point B on a link AB relative to point A is _____.
a) $\omega.AB$ b) $\omega(AB)^2$
c) $\omega^2.AB$ d) $(\omega^2.AB)^2$

2) In a simple gear train, if the number of idle gears is odd, then the motion of driven gear will _____
a) be same as that of driving gear
b) be opposite as that of driving gear
c) depend upon the number of teeth on the driving gear
d) none of the above

3) A differential gear in automobiles is used to _____.
a) reduce speed
b) assist in changing speed
c) provide jerk-free movement of vehicle
d) help in turning

4) A Hartnell governor is a _____.
a) pendulum type governor b) spring loaded governor
c) dead weight governor d) Inertia governor

5) A hunting governor is _____.
a) more stable b) less sensitive
c) more sensitive d) None of these

6) For static balancing of a shaft, _____.
a) the net dynamic force acting on the shaft is equal to zero
b) the net couple due to the dynamic forces acting on the shaft is equal to zero
c) both (a) and (b)
d) none of the above

7) Secondary forces in reciprocating mass on engine frame are _____.
a) of same frequency as of primary forces
b) twice the frequency as of primary forces
c) four times the frequency as of primary forces
d) none of the above

8) The mechanism forms a structure, when the number of degrees of freedom (n) is equal to _____.
a) 0 b) 1
c) 2 d) -1

9) The total number of instantaneous centres for a mechanism consisting of n links are _____.
a) n/2 b) n
c) n-1/2 d) n (n-1)/2

10) The motion of a piston in the cylinder of a steam engine is an example of _____.
a) completely constrained motion
b) incompletely constrained motion
c) successfully constrained motion
d) none of these

11) Which of the following is an inversion of double slider crank chain?
a) Coupling rod of a locomotive
b) Pendulum pump
c) Elliptical trammels
d) Oscillating cylinder engine

12) Which of the following is a turning pair?
a) Piston and cylinder of a reciprocating steam engine
b) Shaft with collars at both ends fitted in a circular hole
c) Lead screw of a lathe with nut
d) Ball and socket joint

13) Which of the following displacement diagrams should be chosen for better dynamic performance of a cam-follower mechanism?
a) simple harmonic motion b) parabolic motion
c) cycloidal motion d) None of these

14) In a radial cam, the follower moves _____.

a) in a direction perpendicular to the cam axis
b) in a direction parallel to the cam axis
c) in any direction irrespective of the cam axis
d) along the cam axis

Set **Q**

S.Y. (B. Tech.) (Sem-II) (New/Old) (CBCS) Examination: March/April-2025
MECHANICAL ENGINEERING
Kinematics &Theory of Machines (BTN02404)

Day & Date: Tuesday, 03-June-2025 Max. Marks: 56
Time: 10:00 AM To 01:00 PM

Instructions: 1) Answer any two questions from each section.
2) Make suitable assumptions if necessary and state them clearly.
3) Draw neat diagram wherever necessary.

Section – I

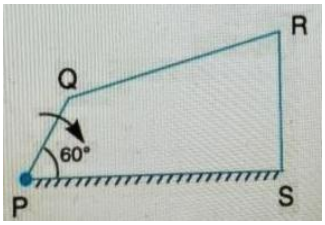
Q.2 **a)** Define Kinematic Pair and describe any 3 type of kinematic pairs. **04**

b) Define inversion of mechanism and draw any one inversion of double slider crank chain. **04**

c) Describe the following motions with neat sketches: **06**
1) Completely constrained motion
2) Incompletely constrained motions
3) Successfully constrained motion

Q.3 **a)** Locate the instantaneous centers and draw the circle diagram for the four bar mechanism. **06**

b) PQRS is a four bar chain with link PS fixed. The lengths of the links are PQ = 62.5 mm; QR = 175 mm; RS = 112.5 mm; and PS = 200 mm. The crank PQ rotates at 10 rad/s clockwise. Draw the velocity and acceleration diagram when angle QPS = 60° and Q and R lie on the same side of PS. Find the angular velocity and angular acceleration of links QR. **08**



Q.4 **a)** Define the following terms with reference to cams: **06**
1) Base circle 2) Pressure angle 3) Lift i

b) A cam, with a minimum radius of 50 mm, rotating clockwise at a uniform speed, is required to give a knife edge follower the motion as described below: **08**
1) To move outwards through 40 mm during 100° rotation of the cam;
2) To dwell for next 80°
3) To return to its starting position during next 90°, and
4) To dwell for the rest period of a revolution i.e. 90°

Draw the profile of the cam when the line of stroke of the follower passes through the centre of the cam shaft.

MCQ/Objective Type Questions

Duration: 30 Minutes Marks:14

Q.1 Choose the correct Answer. **14**

1) Which of the following is a key element of Mechatronics?
a) Purely mechanical systems
b) Only electrical systems
c) Integration of mechanical, electrical, and computer systems
d) Chemical systems

2) What is a characteristic of Industry 4.0?
a) Manual labor-intensive processes
b) Decentralized decision-making
c) Limited use of automation
d) Isolated systems

3) Which of the following is an example of a Mechatronics system?
a) Traditional clock b) Basic electrical circuit
c) CNC machine d) Simple lever

4) What is the function of ABS in modem automobiles?
a) Air Bag System b) Automatic Braking System
c) Audio Broadcasting System d) Advanced Battery System

5) Which sensor is used to measure distance without physical contact?
a) Force sensor b) Temperature sensor
c) Ultrasonic sensor d) Acceleration sensor

6) What type of actuator is commonly used in hydraulic systems?
a) Stepper motor b) Piezoelectric actuator
c) DC motor d) Hydraulic cylinder

7) Which sensor is suitable for measuring rotational motion?
a) Acceleration sensor b) Temperature sensor
c) Linear sensor d) Gyroscope sensor

8) What type of actuator is an AC motor?
a) Hydraulic actuator b) Pneumatic actuator
c) Electrical actuator d) Mechanical actuator

9) Which microcontroller is commonly used in embedded systems?
a) 8085 microprocessors b) 8051 microcontrollers
c) Arduino Uno d) Raspberry Pi

10) What is the main function of a microcontroller?
a) Data storage b) Data processing
c) Data transmission d) Data conversion

11) Which development board is commonly used for prototyping mechatronic systems?
a) Arduino b) Raspberry Pi
c) Beagle Bone d) ESP32

12) What is the purpose of ADC?
a) Analog-to-Digital Conversion b) Digital-to-Analog Conversion
c) Data Compression d) Data Encryption

13) Which protocol is commonly used for serial communication?
a) USB b) RS232
c) Ethernet d) HDMI

14) What is the primary function of PLC in automation?
a) Process control b) Data storage
c) Web browsing d) Word processing

Mechatronic Systems (BTN02408)

Day & Date: Thursday, 05-June-2025 Max. Marks: 56
Time: 10:00 AM To 01:00 PM

Instructions: 1) All questions are compulsory.
2) Figures to the right indicate full marks.

SECTION - I

Q.2 Solve the following: (Any Four) **16**

a) Define mechatronics and outline its key elements.
b) Classify sensors based on their principle of operation and provide examples of each type.
c) Differentiate between microprocessors and microcontrollers.
d) Discuss the role of Arduino and Raspberry Pi development boards in mechatronics.
e) Explain the operation of LVDT. Draw net diagram of LVDT.

Q.3 Solve the following: (Any Two) **12**

a) What are the types of Flow Meters? Explain the Operation of Ultrasonic Flow Meters.
b) Draw net diagram to Interface the ultrasonic sensor to Arduino. And write program to glow led connected at pin no 4 of Arduino, if the distance measured is below 30cm.
c) Draw and explain the block diagram of 8051 Microcontroller.

SECTION - II

Q.4 Attempt the following: (Any Four) **16**

a) Explain the concept of Pull up and pull-down Register.
b) Write a short note on USB.
c) Compare LAN, WAN, and MAN technologies.
d) What is network topology? Explain types of topologies with net diagram.
e) Write a short note on Ladder Programming in PLC.

Q.5 Attempt the following: (Any Two) **12**

a) Draw the net Diagram of OSI Model. Explain the function of Each layer.
b) Explain the logical AND, OR Functions in PLC Programming.
c) Explain the Following Serial Standards.
A) RS232 B) RS422 C) RS485

Duration: 30 Minutes Marks:14

Q.1 Choose the correct Answer. **14**

1) What type of actuator is an AC motor?
a) Hydraulic actuator b) Pneumatic actuator
c) Electrical actuator d) Mechanical actuator

2) Which microcontroller is commonly used in embedded systems?
a) 8085 microprocessors b) 8051 microcontrollers
c) Arduino Uno d) Raspberry Pi

3) What is the main function of a microcontroller?
a) Data storage b) Data processing
c) Data transmission d) Data conversion

4) Which development board is commonly used for prototyping mechatronic systems?
a) Arduino b) Raspberry Pi
c) Beagle Bone d) ESP32

5) What is the purpose of ADC?
a) Analog-to-Digital Conversion b) Digital-to-Analog Conversion
c) Data Compression d) Data Encryption

6) Which protocol is commonly used for serial communication?
a) USB b) RS232
c) Ethernet d) HDMI

7) What is the primary function of PLC in automation?
a) Process control b) Data storage
c) Web browsing d) Word processing

8) Which of the following is a key element of Mechatronics?
a) Purely mechanical systems
b) Only electrical systems
c) Integration of mechanical, electrical, and computer systems
d) Chemical systems

9) What is a characteristic of Industry 4.0?
a) Manual labor-intensive processes
b) Decentralized decision-making
c) Limited use of automation
d) Isolated systems

10) Which of the following is an example of a Mechatronics system?
a) Traditional clock
b) Basic electrical circuit
c) CNC machine
d) Simple lever

11) What is the function of ABS in modem automobiles?
a) Air Bag System
b) Automatic Braking System
c) Audio Broadcasting System
d) Advanced Battery System

12) Which sensor is used to measure distance without physical contact?
a) Force sensor
b) Temperature sensor
c) Ultrasonic sensor
d) Acceleration sensor

13) What type of actuator is commonly used in hydraulic systems?
a) Stepper motor
b) Piezoelectric actuator
c) DC motor
d) Hydraulic cylinder

14) Which sensor is suitable for measuring rotational motion?
a) Acceleration sensor
b) Temperature sensor
c) Linear sensor
d) Gyroscope sensor

Seat No.	

Set **Q**

S.Y. (B. Tech) (Sem-II) (New/Old) (CBCS) Examination: March/April-2025
MECHANICAL ENGINEERING
Mechatronic Systems (BTN02408)

Day & Date: Thursday, 05-June-2025 Max. Marks: 56
Time: 10:00 AM To 01:00 PM

Instructions: 1) All questions are compulsory.
2) Figures to the right indicate full marks.

SECTION - I

Q.2 Solve the following: (Any Four) **16**

a) Define mechatronics and outline its key elements.
b) Classify sensors based on their principle of operation and provide examples of each type.
c) Differentiate between microprocessors and microcontrollers.
d) Discuss the role of Arduino and Raspberry Pi development boards in mechatronics.
e) Explain the operation of LVDT. Draw net diagram of LVDT.

Q.3 Solve the following: (Any Two) **12**

a) What are the types of Flow Meters? Explain the Operation of Ultrasonic Flow Meters.
b) Draw net diagram to Interface the ultrasonic sensor to Arduino. And write program to glow led connected at pin no 4 of Arduino, if the distance measured is below 30cm.
c) Draw and explain the block diagram of 8051 Microcontroller.

SECTION - II

Q.4 Attempt the following: (Any Four) **16**

a) Explain the concept of Pull up and pull-down Register.
b) Write a short note on USB.
c) Compare LAN, WAN, and MAN technologies.
d) What is network topology? Explain types of topologies with net diagram.
e) Write a short note on Ladder Programming in PLC.

Q.5 Attempt the following: (Any Two) **12**

a) Draw the net Diagram of OSI Model. Explain the function of Each layer.
b) Explain the logical AND, OR Functions in PLC Programming.
c) Explain the Following Serial Standards.
A) RS232 B) RS422 C) RS485

Seat No.	

Set **R**

S.Y. (B. Tech) (Sem-II) (New/Old) (CBCS) Examination: March/April-2025
MECHANICAL ENGINEERING
Mechatronic Systems (BTN02408)

Day & Date: Thursday, 05-June-2025 Max. Marks: 70
Time: 10:00 AM To 01:00 PM

Instructions: 1) Q. No. 1 is compulsory. It should be solved in the first 30 minutes in Answer Book Page no 03 (Starting page of the Answer Book). Each question carries one mark.
2) Don't forget to Mention question paper set (P/Q/R/S) on top of page.
3) Figures to the right indicates full marks.

MCQ/Objective Type Questions

Duration: 30 Minutes Marks:14

Q.1 Choose the correct Answer. **14**

1) Which development board is commonly used for prototyping mechatronic systems?
a) Arduino b) Raspberry Pi
c) Beagle Bone d) ESP32

2) What is the purpose of ADC?
a) Analog-to-Digital Conversion b) Digital-to-Analog Conversion
c) Data Compression d) Data Encryption

3) Which protocol is commonly used for serial communication?
a) USB b) RS232
c) Ethernet d) HDMI

4) What is the primary function of PLC in automation?
a) Process control b) Data storage
c) Web browsing d) Word processing

5) Which of the following is a key element of Mechatronics?
a) Purely mechanical systems
b) Only electrical systems
c) Integration of mechanical, electrical, and computer systems
d) Chemical systems

6) What is a characteristic of Industry 4.0?
a) Manual labor-intensive processes
b) Decentralized decision-making

MCQ/Objective Type Questions

Duration: 30 Minutes Marks:14

Q.1 Choose the correct Answer. **14**

1) Annual depreciation cost calculated by ____.
a) sinking fund method b) straight method
c) both (a) and (b) d) estimates values

2) A pyranometer is used for measurement of ____.
a) Direct radiation only
b) Diffuse radiation only
c) Direct as well as diffuse radiation
d) All of the above

3) Kinetic energy that results from the oscillation of water is called____.
a) Ocean thermal energy b) Tidal energy
c) Wave energy d) Hydro energy

4) Identify the non-renewable energy resource from the following: ____.
a) Wave power b) Coal
c) Wind power d) Fuel cells

5) The objective of energy management includes ____.
a) Minimizing energy costs
b) Minimizing waste
c) Minimizing environmental degradation
d) All the above

6) Economizer is used to heat ____.
a) Flue gases b) Air
c) Feed water d) All of the above

7) What does WECS stands for?
a) Wind engine comparison system
b) Wind engine control system
c) Wind energy combined system
d) Wind energy conversion system

8) The solar constant value is ____.
a) 1366 W/m^2 b) 1327 W/m^2
c) 1357 W/m^2 d) 1377 W/m^2

9) A load curve is a plot of ____.
a) Load versus generation capacity
b) Load versus current
c) Load versus time
d) Load versus cost of power

10) The Function of solar collectors to convert ____.
a) Solar energy into thermal energy
b) Solar energy into radiations
c) Solar energy into electricity
d) none of these

11) Which one of the following is the maximum energy producing sector in India?
a) Nuclear b) Hydro
c) Thermal d) Diesel

12) Reflecting mirrors used for exploiting solar energy are called ____.
a) Mantle b) Ponds
c) Diffusers d) Heliostats

13) An energy audit team is formed during ____.
a) post audit phase b) pre-audit phase
c) audit phase d) the time of study

14) If there is one power plant only, the installed capacity of that power plant should be equal to ____.
a) Average load b) Base load
c) Peak load d) Minimum load

c) Wind energy combined system
d) Wind energy conversion system

3) The solar constant value is ____.
a) 1366 W/m^2 b) 1327 W/m^2
c) 1357 W/m^2 d) 1377 W/m^2

4) A load curve is a plot of ____.
a) Load versus generation capacity
b) Load versus current
c) Load versus time
d) Load versus cost of power

5) The Function of solar collectors to convert ____.
a) Solar energy into thermal energy
b) Solar energy into radiations
c) Solar energy into electricity
d) none of these

6) Which one of the following is the maximum energy producing sector in India?
a) Nuclear b) Hydro
c) Thermal d) Diesel

7) Reflecting mirrors used for exploiting solar energy are called ____.
a) Mantle b) Ponds
c) Diffusers d) Heliostats

8) An energy audit team is formed during ____.
a) post audit phase b) pre-audit phase
c) audit phase d) the time of study

9) If there is one power plant only, the installed capacity of that power plant should be equal to ____.
a) Average load b) Base load
c) Peak load d) Minimum load

10) Annual depreciation cost calculated by ____.
a) sinking fund method b) straight method
c) both (a) and (b) d) estimates values

11) A pyranometer is used for measurement of ____.
a) Direct radiation only
b) Diffuse radiation only
c) Direct as well as diffuse radiation
d) All of the above

12) Kinetic energy that results from the oscillation of water is called____.
a) Ocean thermal energy b) Tidal energy
c) Wave energy d) Hydro energy

13) Identify the non-renewable energy resource from the following: ____.
a) Wave power b) Coal
c) Wind power d) Fuel cells

14) The objective of energy management includes ____.
a) Minimizing energy costs
b) Minimizing waste
c) Minimizing environmental degradation
d) All the above

Set | **S**

S.Y. (B. Tech) (Sem-II) (New/Old) (CBCS) Examination: March/April-2025
MECHANICAL ENGINEERING
Power Plant and Energy Engineering (BTN02409)

Day & Date: Thursday, 05-June-2025 Max. Marks: 56
Time: 10:00 AM To 01:00 PM

Instructions: 1) Solve any two questions from each section.
2) Use of a calculator is allowed.
3) Figures to the right indicate full marks.
4) Assume additional data if, required and mention it clearly.

Section – I

Q.2	**a)**	What is meant by Load Curve? Explain any two load curves with neat sketch.	**07**
	b)	What are the various factors considered during Selection of Site for Power Station?	**07**
Q.3	**a)**	Write a short note on Depreciation Cost.	**04**
	b)	What is Tariff? What are the objectives of Tariff? Explain any one Tariff Method.	**05**
	c)	Write a short note on Selection of Boilers for Prime Mover.	**05**
Q.4	**a)**	Explain the role of NTPC and NPCIL in Power Development.	**07**
	b)	Give the difference between Renewable & Non-Renewable Energy Sources.	**07**

Section – II

Q.5	**a)**	What are the different types of Concentrators? Explain any two with neat sketch.	**07**
	b)	Explain Liquid Flat Plate Collector with neat sketch. Give its advantages & disadvantages.	**07**
Q.6	**a)**	What is Energy Audit? Give the objectives of Energy Audit. Explain Energy Audit methods in short.	**07**
	b)	What is Energy Conservation? Give the various levels for conservation of energy. Explain Energy Conservation Act 2001.	**07**
Q.7	**a)**	What is Tidal Energy? Explain Single Basin System Tidal Power Plant.	**05**
	b)	Write a short not on OTEC Cycle Power Plant.	**04**
	c)	Explain the basic components of the Wind Energy Conversion System with a neat sketch.	**05**

Seat No.		Set	P

S.Y. (B. Tech.) (Sem - II) (New/Old) (CBCS) Examination: March/April-2025
MECHANICAL ENGINEERING
Solid Mechanics (BTN02410)

Day & Date: Thursday, 05-June-2025 Max. Marks: 70
Time: 10:00 AM To 01:00 PM

Instructions: 1) Q. No. 1 is compulsory. It should be solved in the first 30 minutes in Answer Book Page no 03 (Starting page of the Answer Book). Each question carries one mark.
2) Don't forget to Mention question paper set (P/Q/R/S) on top of page.
3) Figures to the right indicates full marks.
4) Assume suitable data if necessary.

MCQ/Objective Type Questions

Duration: 30 Minutes Marks:14

Q.1 Choose the correct Answer. **14**

1) Following are the basic types of stress except _____
a) Tensile stress b) Compressive stress
c) Shear stress d) Volumetric stress

2) The property of a material by which it can be beaten or rolled into thin sheets, is called _____
a) Elasticity b) Malleability
c) Plasticity d) Ductility

3) If a material has different properties in all directions, it is called _____
a) Elastic b) Plastic
c) Isotropic d) None of these

4) Which of the following is a dimensionless quantity?
a) Strain b) Poisson's ratio
c) a & b d) None of these

5) The stress function was introduced by _____
a) G.B. Airy b) Terzaghi
c) Darcy d) None of these

6) A thin spherical shell under internal pressure will fail under _____
a) Maximum shear stress
b) Principal compressive stress
c) Principal tensile stress
d) None

7) Lame's Equation is applicable to _____
a) Pressure vessels b) Thin cylinders
c) Thick cylinders d) All of the above

8) Which of the following statements about the shear center is true?
- a) The shear center always lies at the centroid of the cross-section of the member.
- b) For a symmetrical solid section (e.g. a circular or square section), the shear center coincides with the centroid.
- c) The shear center is always located at the center of gravity of the section.
- d) The shear center is a point where the shear force can be applied without causing bending.

9) For a symmetric I-beam cross-section the shear center is located _____
- a) At the centroid of the cross-section
- b) At the mid-height of the web
- c) At the top flange
- d) Outside the cross-section

10) For a thin-walled open section, the shear center is determined by _____
- a) Distribution of normal stresses
- b) Geometry of the cross-section and the distribution of shear flow
- c) Position of the centroid
- d) Material properties of the section

11) The critical load at which a slender column will buckle is given by _____
- a) Euler's formula
- b) Hooke's law
- c) Newton's second law
- d) Bernoulli's principle

12) Which of the following statements about slenderness ratio is true?
- a) A higher slenderness ratio indicates that the column is more resistant to buckling.
- b) A lower slenderness ratio indicates that the column is more likely to buckle under compression.
- c) A higher slenderness ratio indicates that the column is more susceptible to buckling
- d) Slenderness ratio is not a factor in determining a column buckling behavior.

13) The principle of virtual work states that, for a body to be in equilibrium, the virtual work should be _____
- a) Any value between zero and one
- b) Zero
- c) Maximum
- d) Minimum

14) In virtual work Principle, the work done by self-weight of the body is taken into consideration, when _____
- a) Center of gravity moves vertically
- b) Center of gravity moves horizontally
- c) Shear center moves horizontally
- d) Shear center moves vertically

Duration: 30 Minutes Marks:14

Q.1 Choose the correct Answer. **14**

1) What is the function of a frame grabber?
a) Sensing the object b) Digitizing
c) Storing d) None of these

2) When the joint angles and the different configurations of manipulator are derived from the position orientation, the scheme is known as ____.
a) Forward kinematics b) Inverse kinematics
c) Transformation d) None of these

3) The process of finding the position of the end effector when the joint variable are known is called ____.
a) Forward Kinematics b) Inverse Kinematics
c) Forward Dynamics d) Inverse Dynamics

4) Trajectory planning is done in ____.
a) Joint Space & Cartesian Space
b) Joint Space & Local Space
c) Joint Space & Global Space
d) Global Space & Cartesian Space

5) When the determinant of the manipulator Jacobian is zero, the configuration of the manipulator is said to be ____.
a) Angular b) Rectangular
c) Singular d) Spiral

6) The process of transforming variable from tool configuration space to joint space is called kinematics.
a) Forward b) Inward
c) Inverse d) Reverse

7) The order of the polynomial used for formulating the robot trajectory is usually a order polynomial.

a) First b) Second
c) Third d) Fourth

8) A gripper used in assembly operations needs to be equipped with an arrangement which will allow a certain amount of flexibility in its wrist. This is to ensure assembly even if the axis of the part during insertion is slightly off-center. This type of compliance is compliance.

a) Active b) Passive
c) Mutual d) Progressive

9) The minimum number of wheels required for both static and dynamic balance of wheeled robots is ____.

a) 2 b) 3
c) 4 d) 6

10) Binary sensors have ____ as the contact device.

a) Fingers b) Micro switch
c) Wrist d) None of these

11) Suction or vacuum grippers are used for ____ objects.

a) Magnetic b) Flat
c) Hole d) None of these

12) Which type of robot used for assembly purpose?

a) Jointed arm b) PUMA
c) SCARA d) None of these

13) For short range distance measurements, which type of sensor in more suitable?

a) Tactile sensor b) Ultrasonic sensor
c) Optical sensor d) Laser sensor

14) Majority of industrial robots used in welding are built in ___ configuration.

a) Cylindrical b) Spherical
c) Jointed arm d) SCARA

S.Y. (B. Tech.) (Sem-II) (New/Old) (CBCS) Examination: March/April-2025
MECHANICAL ENGINEERING
Industrial Robotics (BTN02411)

Day & Date: Monday, 09-June-2025 Max. Marks: 56
Time: 10:00 AM To 01:00 PM

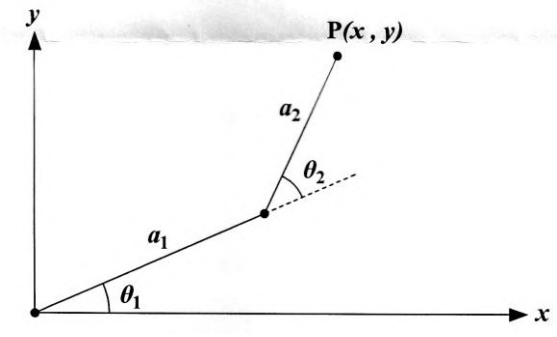
Instructions: 1) Answer any two questions from Section I and Section II.
2) Figures to the right indicate full marks.
3) Use of non-programmable scientific calculator is allowed.
4) Assume suitable data if necessary.

SECTION-I

Q.2 **a)** Define robot and explain basic components of robots with functions. **08**
b) Derive the inverse kinematic equations for a 2 DOF jointed arm robot. **06**

Q.3 **a)** A vector $\overline{v} = 2\hat{\imath} + 5\hat{\jmath} + 3\hat{k}$ is rotated by 45^o about the x axis of the reference frame. It is then translated by 3,4 and 5 units in $x, y \; and \; z$ direction respectively. Find the vector with reference to the reference frame. **08**
b) What are the different factors to be considered when selecting grippers as EOAT (End of Arm Tooling) attachment for industrial robots? **06**

Q.4 **a)** Derive the equation for the Jacobian of a 2 DOF jointed arm manipulator. In the figure given. below the lengths of the links a_1 and a_2 of the manipulator are 200 mm each. Link angles θ_1 and θ_2 measure 20° and 30° respectively. If the tool velocity is 100 mm/s in both x and y directions calculate rotational speeds of link 1 and link 2 in degrees/sec. **08**



b) Define the following terms: Workspace, forward kinematics, inverse kinematics, Jacobian (of the manipulator), trajectory, repeatability. **06**

Section-II

Q.5	**a)**	Explain with the help of block diagram the control of a DC servomotor used as actuator for robot joints.	**08**
	b)	Explain with the help of neat sketch a typical control architecture for industrial robots.	**06**
Q.6	**a)**	What is an AGV? Discuss the different navigation techniques used for industrial AGVs.	**08**
	b)	Compare wheeled robot and tracked robot in detail.	**06**
Q.7	**a)**	Discuss use of industrial robots for welding applications. State the robot configuration DOF, choice of drives and sensors clearly and given justification for the same.	**08**
	b)	Discuss in detail various applications of mobile robots.	**06**

MECHANICAL ENGINEERING
Industrial Robotics (BTN02411)

Day & Date: Monday, 09-June-2025 Max. Marks: 70
Time: 10:00 AM To 01:00 PM

Instructions: 1) Q. No. 1 is compulsory. It should be solved in the first 30 minutes in Answer Book Page no 03 (Starting page of the Answer Book). Each question carries one mark.
2) Don't forget to Mention question paper set (P/Q/R/S) on top of page.
3) Figures to the right indicates full marks.
4) Make suitable assumptions (if necessary and state them clearly).
5) Use of non-programmable scientific calculator is allowed.
6) Assume suitable data if necessary.

MCQ/Objective Type Questions

Duration: 30 Minutes Marks:14

Q.1 Choose the correct Answer. **14**

1) A gripper used in assembly operations needs to be equipped with an arrangement which will allow a certain amount of flexibility in its wrist. This is to ensure assembly even if the axis of the part during insertion is slightly off-center. This type of compliance is compliance.
a) Active b) Passive
c) Mutual d) Progressive

2) The minimum number of wheels required for both static and dynamic balance of wheeled robots is ____.
a) 2 b) 3
c) 4 d) 6

3) Binary sensors have ____ as the contact device.
a) Fingers b) Micro switch
c) Wrist d) None of these

4) Suction or vacuum grippers are used for ____ objects.
a) Magnetic b) Flat
c) Hole d) None of these

5) Which type of robot used for assembly purpose?
a) Jointed arm b) PUMA
c) SCARA d) None of these

6) For short range distance measurements, which type of sensor in more suitable?
a) Tactile sensor b) Ultrasonic sensor
c) Optical sensor d) Laser sensor

7) Majority of industrial robots used in welding are built in ___ configuration.
a) Cylindrical b) Spherical
c) Jointed arm d) SCARA

8) What is the function of a frame grabber?
a) Sensing the object b) Digitizing
c) Storing d) None of these

9) When the joint angles and the different configurations of manipulator are derived from the position orientation, the scheme is known as ____.
a) Forward kinematics b) Inverse kinematics
c) Transformation d) None of these

10) The process of finding the position of the end effector when the joint variable are known is called ____.
a) Forward Kinematics b) Inverse Kinematics
c) Forward Dynamics d) Inverse Dynamics

11) Trajectory planning is done in ____.
a) Joint Space & Cartesian Space
b) Joint Space & Local Space
c) Joint Space & Global Space
d) Global Space & Cartesian Space

12) When the determinant of the manipulator Jacobian is zero, the configuration of the manipulator is said to be ____.
a) Angular b) Rectangular
c) Singular d) Spiral

13) The process of transforming variable from tool configuration space to joint space is called kinematics.
a) Forward b) Inward
c) Inverse d) Reverse

14) The order of the polynomial used for formulating the robot trajectory is usually a order polynomial.

MCQ/Objective Type Questions

Duration: 30 Minutes Marks:14

Q.1 Choose the correct Answer. **14**

1) The process of obtaining a geometric CAD model from 3D points acquired by scanning/digitizing existing parts products is best known as: ____.
a) Forward Engineering b) Backward Engineering
c) Reverse Engineering d) Product Engineering

2) In the entire reverse engineering process for product design, which one is the first step?
a) CAD model updating b) CAD modeling
c) Data pre-processing d) Data capturing

3) Which of the following RP system is not developed by 3D systems?
a) Selective Laser Sintering (SLS)
b) Multi-Jet Modeling System (MJM)
c) Paper Lamination Technology (PLT)
d) Stereolithography Apparatus (SLA)

4) Which of the following is used as base material in Stereolithography (SLA) process?
a) Thermoplastics, Metals powders
b) Thermoplastics, Eutectic metals.
c) Photopolymer
d) Titanium alloys

5) What is the third step in Reverse Engineering?
a) Digitization of the object b) Creation of CAD model
c) Prototype d) None of these

6) Which of the following advantage does not possess by the rapid prototyping process over the traditional prototyping process?
   a) It consumes less time
   b) Gives better quality
   c) Reduces product launch time
   d) It's cheaper

7) STL file format is represented by interaction of ____.
   a) lines and hexagons
   b) lines and rectangles
   c) lines and triangles
   d) lines and circles

8) Which material can be efficiently used as a support material?
   a) ABS
   b) PLA
   c) Nylon
   d) INF

9) The starting material of the Stereolithography method is ____.
   a) Solid
   b) Liquid
   c) Powder
   d) Gas

10) Which one of the processes is subtractive prototyping?
   a) 5 axis CNC Milling
   b) Fused Deposition Modeling
   c) Digital Light Process (DLP)
   d) Stereolithography Apparatus

11) Which of the following is the process of pre-processing stage?
   a) Remove support
   b) Checking 3D CAD data
   c) De-powdering loose material
   d) Dip in binder to strengthen the part

12) What were the variable we used in Tinkercad?
   a) x,y,z
   b) a,b,c
   c) x,y
   d) none of the above

13) Creation, analysis, modification and optimization is ____.
   a) CAD
   b) CAM
   c) CAE
   d) None of above

14) Geometric modelling corresponds to ____.
   a) Synthesis phase of CAD
   b) Analysis phase of CAD
   c) Synthesis and Analysis phase of CAD
   d) None of the above

Set Q

S.Y. (B. Tech.) (Sem-II) (New/Old) (CBCS) Examination: March/April-2025
MECHANICAL ENGINEERING
Introduction to 3D Printing (BTN02412)

Day & Date: Monday, 09-June-2025 Max. Marks: 56
Time: 10:00 AM To 01:00 PM

Instructions: 1) Question no. 2 is compulsory in section I, and solve any two questions from the remaining and
2) Question no. 6 is compulsory in section II. and solve any two questions from the remaining
3) Use of scientific calculator is allowed.
4) Figures to the right indicate full marks.
5) Assume suitable data if required.

Section – I

	Solve Any Three from Q. No. 2 to Q. No.5.	**28**
Q.2	Explain the need of additive manufacturing with respect to industry applications.	**10**
Q.3	Describe the methodologies of Additive manufacturing.	**09**
Q.4	Discuss Stereolithography Additive manufacturing machine with specification and applications.	**09**
Q.5	What is meant by Computer Aided Design (CAD)? Explain importance of CAD in industries with applications?	**09**

Section – II

	Solve Any Three from Q. No. 6 to Q. No.9	**28**
Q.6	Discuss the importance of parametric modeling in CAD software and how it can benefit the additive manufacturing process.	**10**
Q.7	Illustrate feature-based modeling in CAD for 3D printing?	**09**
Q.8	Enlist different polymer materials used in 3D printing and explain any 02 with applications.	**09**
Q.9	Describe different applications of 3D printing in the field of Automobile, Medical and Aerospace sector.	**09**

MECHANICAL ENGINEERING
Introduction to 3D Printing (BTN02412)

Day & Date: Monday, 09-June-2025 Max. Marks: 70
Time: 10:00 AM To 01:00 PM

Instructions: 1) Q. No. 1 is compulsory. It should be solved in the first 30 minutes in Answer Book Page no 03 (Starting page of the Answer Book). Each question carries one mark.
2) Don't forget to Mention question paper set (P/Q/R/S) on top of page.
3) Figures to the right indicates full marks.
4) Assume suitable data if required.
5) Use of scientific calculator is allowed.

MCQ/Objective Type Questions

Duration: 30 Minutes Marks:14

Q.1 Choose the correct Answer. **14**

1) Which of the following is the process of pre-processing stage?
a) Remove support
b) Checking 3D CAD data
c) De-powdering loose material
d) Dip in binder to strengthen the part

2) What were the variable we used in Tinkercad?
a) x,y,z b) a,b,c
c) x,y d) none of the above

3) Creation, analysis, modification and optimization is ____.
a) CAD b) CAM
c) CAE d) None of above

4) Geometric modelling corresponds to ____.
a) Synthesis phase of CAD
b) Analysis phase of CAD
c) Synthesis and Analysis phase of CAD
d) None of the above

5) The process of obtaining a geometric CAD model from 3D points acquired by scanning/digitizing existing parts products is best known as: ____.
a) Forward Engineering b) Backward Engineering
c) Reverse Engineering d) Product Engineering

6) In the entire reverse engineering process for product design, which one is the first step?
a) CAD model updating b) CAD modeling
c) Data pre-processing d) Data capturing

7) Which of the following RP system is not developed by 3D systems?
a) Selective Laser Sintering (SLS)
b) Multi-Jet Modeling System (MJM)
c) Paper Lamination Technology (PLT)
d) Stereolithography Apparatus (SLA)

8) Which of the following is used as base material in Stereolithography (SLA) process?
a) Thermoplastics, Metals powders
b) Thermoplastics, Eutectic metals.
c) Photopolymer
d) Titanium alloys

9) What is the third step in Reverse Engineering?
a) Digitization of the object b) Creation of CAD model
c) Prototype d) None of these

10) Which of the following advantage does not possess by the rapid prototyping process over the traditional prototyping process?
a) It consumes less time
b) Gives better quality
c) Reduces product launch time
d) It's cheaper

11) STL file format is represented by interaction of ____.
a) lines and hexagons b) lines and rectangles
c) lines and triangles d) lines and circles

12) Which material can be efficiently used as a support material?
a) ABS b) PLA
c) Nylon d) INF

13) The starting material of the Stereolithography method is ____.
a) Solid b) Liquid
c) Powder d) Gas

14) Which one of the processes is subtractive prototyping?
a) 5 axis CNC Milling
b) Fused Deposition Modeling
c) Digital Light Process (DLP)
d) Stereolithography Apparatus

MCQ/Objective Type Questions

Duration: 30 Minutes Marks:14

Q.1 Choose the correct Answer. **14**

1) What is the primary advantage of using solar energy as a renewable resource?
a) It produces no greenhouse gas emissions
b) It requires minimal land area for installation
c) It is available 24/7, regardless of weather conditions
d) It is the most cost-effective renewable energy source

2) Photovoltaic cells convert sunlight directly into: ____.
a) Mechanical energy b) Thermal energy
c) Electrical energy d) Chemical energy

3) Which of the following is NOT a type of solar thermal collector?
a) Flat plate collector b) Photovoltaic collector
c) Evacuated tube collector d) Compound parabolic collector

4) Solar ponds utilize the principle of: ____.
a) Reflection b) Convection
c) Conduction d) Absorption

5) The manufacturing process of solar cells typically involves: ____.
a) Injection molding b) Chemical vapor deposition
c) Extrusion d) Casting

6) Balance of System (BoS) in a PV system includes: ____.
a) Only the solar panels
b) All components excluding the solar panels
c) Only the electrical wiring
d) The support structure for the solar panels

7) Standalone PV systems are primarily used: ____.
a) In urban areas with access to grid electricity
b) In rural areas without access to grid electricity
c) For large-scale industrial applications
d) For backup power generation in case of grid failures

8) Biomass energy is derived from: ____.
a) Fossilized plants and animals
b) Sunlight
c) Organic matter such as wood and crop residues
d) Nuclear reactions

9) Gasification is a process that converts organic materials into: ____.
a) Liquid fuels
b) Gaseous fuels
c) Solid fuels
d) Electricity

10) Which of the following is NOT a type of digester used in bioenergy production?
a) Anaerobic lagoon
b) Plug flow digester
c) Batch digester
d) Aerobic digester

11) Selection of components in a wind turbine system involves consideration of: ____.
a) Blade materials only
b) Tower height only
c) Generator type and capacity, blade design, and tower specifications
d) Electrical wiring only

12) Various methods of controlling wind turbines include: ____.
a) Pitch control and yaw control
b) Sun tracking and moon tracking
c) Rainwater harvesting and irrigation control
d) Animal deterrent and pest control

13) Which renewable energy source relies on the heat stored beneath the Earth's surface?
a) Biomass energy
b) Wind power
c) Geothermal energy
d) Hydropower

14) Which renewable energy source harnesses the kinetic energy of ocean currents and tides?
a) Geothermal energy
b) Hydroelectric power

Instructions: 1) All questions are compulsory.
2) Figures to the right indicate full marks.
3) Use of a calculator is allowed.
4) Assume additional suitable data, if necessary and mention it clearly.

Section - I

Q.2 Solve the following: (Any Four) **16**

a) Differentiate between Renewable and Non-Renewable Sources of Energy.
b) Compare and contrast the world energy status with the energy scenario in India.
c) Discuss types of solar thermal collectors and their applications.
d) Explore methods of solar power generation, focusing on power towers.
e) Explain the physics underlying the operation of solar cells.
f) Explain the concept of solar energy and its derivation from the Sun.

Q.3 Solve the following: (Any Two) **12**

a) Describe the instruments used for measuring solar radiation. Explain their principles of operation and the parameters they measure to quantify solar radiation.
b) Explore the applications of solar air heaters, solar dryers, and solar stills in thermal energy generation.
c) Describe the applications of photovoltaic systems in standalone and grid- connected configurations.

Section - II

Q.4 Solve the following: (Any Four) **16**

a) Discuss the process of energy generation through fermentation.
b) Compare and contrast various types of gasifiers used in the gasification process.
c) Describe different types of wind turbines used in wind energy generation.
d) Explore the concept of offshore wind farms and their advantages over onshore wind farms.
e) Discuss the introduction of small hydropower (SHP) systems, highlighting their significance in renewable energy generation.
f) Explain the concept of energy generation through waves and tides.

Q.5 Attempt the following: (Any Two) **12**

a) Explain the process of site selection for wind farm development.
b) Explore power generation through Ocean Thermal Energy Conversion (OTEC) systems.
c) Describe different types of digesters used in anaerobic digestion processes.

4) Use of a calculator is allowed.
5) Assume additional suitable data, if necessary and mention it clearly.

MCQ/Objective Type Questions

Duration: 30 Minutes Marks:14

Q.1 Choose the correct Answer. **14**

1) Balance of System (BoS) in a PV system includes: ____.
a) Only the solar panels
b) All components excluding the solar panels
c) Only the electrical wiring
d) The support structure for the solar panels

2) Standalone PV systems are primarily used: ____.
a) In urban areas with access to grid electricity
b) In rural areas without access to grid electricity
c) For large-scale industrial applications
d) For backup power generation in case of grid failures

3) Biomass energy is derived from: ____.
a) Fossilized plants and animals
b) Sunlight
c) Organic matter such as wood and crop residues
d) Nuclear reactions

4) Gasification is a process that converts organic materials into: ____.
a) Liquid fuels b) Gaseous fuels
c) Solid fuels d) Electricity

5) Which of the following is NOT a type of digester used in bioenergy production?
a) Anaerobic lagoon b) Plug flow digester
c) Batch digester d) Aerobic digester

6) Selection of components in a wind turbine system involves consideration of: ____.
a) Blade materials only
b) Tower height only
c) Generator type and capacity, blade design, and tower specifications
d) Electrical wiring only

7) Various methods of controlling wind turbines include: ____.
a) Pitch control and yaw control
b) Sun tracking and moon tracking
c) Rainwater harvesting and irrigation control
d) Animal deterrent and pest control

8) Which renewable energy source relies on the heat stored beneath the Earth's surface?
a) Biomass energy
b) Wind power
c) Geothermal energy
d) Hydropower

9) Which renewable energy source harnesses the kinetic energy of ocean currents and tides?
a) Geothermal energy
b) Hydroelectric power
c) Tidal energy
d) Wave energy

10) What is the primary advantage of using solar energy as a renewable resource?
a) It produces no greenhouse gas emissions
b) It requires minimal land area for installation
c) It is available 24/7, regardless of weather conditions
d) It is the most cost-effective renewable energy source

11) Photovoltaic cells convert sunlight directly into: ____.
a) Mechanical energy
b) Thermal energy
c) Electrical energy
d) Chemical energy

12) Which of the following is NOT a type of solar thermal collector?
a) Flat plate collector
b) Photovoltaic collector
c) Evacuated tube collector
d) Compound parabolic collector

13) Solar ponds utilize the principle of: ____.
a) Reflection
b) Convection
c) Conduction
d) Absorption

14) The manufacturing process of solar cells typically involves: ____.
a) Injection molding
b) Chemical vapor deposition
c) Extrusion
d) Casting

Set | S

S.Y. (B. Tech.) (Sem-II) (New/Old) (CBCS) Examination: March/April-2025
MECHANICAL ENGINEERING
Renewable Energy Sources (BTN02413)

Day & Date: Monday, 09-June-2025 Max. Marks: 56
Time: 10:00 AM To 01:00 PM

Instructions: 1) All questions are compulsory.
2) Figures to the right indicate full marks.
3) Use of a calculator is allowed.
4) Assume additional suitable data, if necessary and mention it clearly.

Section - I

Q.2 Solve the following: (Any Four) **16**

a) Differentiate between Renewable and Non-Renewable Sources of Energy.
b) Compare and contrast the world energy status with the energy scenario in India.
c) Discuss types of solar thermal collectors and their applications.
d) Explore methods of solar power generation, focusing on power towers.
e) Explain the physics underlying the operation of solar cells.
f) Explain the concept of solar energy and its derivation from the Sun.

Q.3 Solve the following: (Any Two) **12**

a) Describe the instruments used for measuring solar radiation. Explain their principles of operation and the parameters they measure to quantify solar radiation.
b) Explore the applications of solar air heaters, solar dryers, and solar stills in thermal energy generation.
c) Describe the applications of photovoltaic systems in standalone and grid- connected configurations.

Section - II

Q.4 Solve the following: (Any Four) **16**

a) Discuss the process of energy generation through fermentation.
b) Compare and contrast various types of gasifiers used in the gasification process.
c) Describe different types of wind turbines used in wind energy generation.
d) Explore the concept of offshore wind farms and their advantages over onshore wind farms.
e) Discuss the introduction of small hydropower (SHP) systems, highlighting their significance in renewable energy generation.
f) Explain the concept of energy generation through waves and tides.

Q.5 Attempt the following: (Any Two) **12**

a) Explain the process of site selection for wind farm development.
b) Explore power generation through Ocean Thermal Energy Conversion (OTEC) systems.
c) Describe different types of digesters used in anaerobic digestion processes.

S.Y. (B. Tech.) (Sem-II) (New/Old) (CBCS) Examination: March/April-2025
MECHANICAL ENGINEERING
Introduction to Automobile Engineering (BTN02414)

Day & Date: Monday, 09-June-2025 Max. Marks: 70
Time: 10:00 AM To 01:00 PM

Instructions: 1) Q. No. 1 is compulsory. It should be solved in the first 30 minutes in Answer Book Page no 03 (Starting page of the Answer Book). Each question carries one mark.
2) Don't forget to Mention question paper set (P/Q/R/S) on top of page.
3) Figures to the right indicates full marks.
4) Make suitable assumptions (if necessary and state them clearly).

MCQ/Objective Type Questions

Duration: 30 Minutes Marks:14

Q.1 Choose the correct alternatives from the options. 14

1) Which of the following parts of the cover assembly that hold the pressure plate against the clutch plate?
a) Springs b) Thrust bearings
c) Struts d) Lever

2) Where is the over drive located?
a) Between transmission and engine
b) Between transmission and rear axle
c) Between transmission and propeller shaft
d) Between transmission and differential

3) The gear shift lever requires two separate motions to shift gears, and the first movement?
a) moves the synchronizer b) selects the synchronizer
c) meshes the gears d) operates the clutch

4) Which one of the following statements correctly describes the construction of a planetary gear type differential?
a) The six planetary pinions rotate in constant mesh with the internal gears
b) One drive shaft is splined to the central gear and the other to the planetary gear.
c) Each planetary pinion gear meshes with both the central gear and the internal gear.
d) The internal gear is fixed to the planetary gear

5) The device for smoothening out the power impulses from the engine is called ____.
a) clutch b) differentia
c) flywheel d) torque converter

6) Clutch facings are usually attached to the plate by ____.
- a) steel rivets
- b) brass rivets
- c) aluminum screws
- d) steel screws

7) The torque converter uses ____ to transfer torque.
- a) air
- b) automatic transmission fluid (ATF)
- c) gears
- d) steel belt

8) The sequence in which the force is transmitted through a brake system when the brake pedal is depressed is ____.
- a) brake pedal - master cylinder - brake lines - vacuum servo mechanism - brake pads
- b) brake pedal - vacuum servo mechanism - master cylinder - brake lines - brake pads
- c) brake pedal - master cylinder - vacuum servo mechanism - brake lines - brake pads
- d) brake pedal - brake lines - vacuum servo mechanism - master cylinder - brake pads

9) Which is the of the following disadvantage of the open differential?
- a) High in cost
- b) Not reliable
- c) Complex design
- d) Sends most of the power to the wheel having less traction

10) Which types of wheels cannot be used with a tubeless tire?
- a) Disc wheel
- b) Light alloy wheel
- c) Composite wheel
- d) Wire wheel

11) If the of front wheels is inside and rear of fro are apart when the vehicle is at rest, then the configuration is called? front of the front wheels is inside and rear ____.
- a) Toe-in
- b) Toe out
- c) Positive camber
- d) Positive castor

12) What is called the cornering force over the slip angle?
- a) Castor trail
- b) Cornering power
- c) Self-righting torque
- d) Pneumatic trail

13) What is actual power delivered by the engine known as?
- a) Shaft power
- b) Horse power
- c) Brake power
- d) None of the mentioned

14) What is the differential located?
- a) Between engine and transmission
- b) Between transmission and rear axle
- c) Between two propeller shafts
- d) Between steering wheel and steering column

4) Make suitable assumptions (if necessary and state them clearly).
5) Use of non-programmable calculator is allowed.

MCQ/Objective Type Questions

Duration: 30 Minutes Marks:14

Q.1 Choose the correct alternatives from the options. **14**

1) The P.I of $(D^2 + 4D + 3)y = 3e^{2x}$ is _____.

a) $\frac{1}{15}e^{2x}$ b) $3e^{2x}$

c) $\frac{1}{5}e^{2x}$ d) $C_1e^{-x} + C_2e^{-2x}$

2) If the characteristic equation of the differential equation $\frac{d^2y}{dx^2} + 2\alpha\frac{dy}{dx} + y = 0$ has two equal roots then the values of α are

a) ± 1 b) 0,0

c) $\pm i$ d) $\pm\frac{1}{2}$

3) If $Z\{f(k)\} = F(z)$, then $Z\{kf(k)\} =$ _____.

a) $\frac{d}{dz}F(z)$, b) $-z\frac{d}{dz}F(z)$,

c) $-\frac{d}{dz}F(z)$ d) $z\frac{d}{dz}F(z)$

4) The Laplace Transform of $\sin h\,(at)$ is

a) $\frac{1}{s^2 - a^2}$ b) $\frac{1}{s^2 + a^2}$

c) $\frac{s}{s^2 - a^2}$ d) $\frac{s}{s^2 + a^2}$

5) If $L\{f(t)\} = \phi(s)$, then $L\{e^{-at}f(t)\} =$ _____.

a) $\phi(s - a)$ b) $\frac{1}{a}\phi(s)$

c) $\phi(sa)$ d) $\phi(s + a)$

6) The value of coefficient of correlation r lies between

a) 0 and 1 b) -1 and 0

c) 0 and 2 d) -1 and 1

7) Which of the following is true?

a) $r = b_{xy} \cdot b_{yx}$ b) $r = b_{xy} + b_{yx}$

c) $r = \sqrt{b_{xy} \cdot b_{yx}}$ d) $r = \sqrt{b_{xy} + b_{yx}}$

8) The conditions for expansion of a function as a Fourier series are known as _____.

a) Harmonic b) Periodic

c) Dirichlet's conditions d) Riemann conditions

9) In solving simultaneous linear equations $AX = B$ in which method as soon as getting the value of unknown is immediately used to compute the next unknown?

a) Jacobi b) Gauss-Seidal

c) Gauss elimination d) Euler's

10) If $\{1\} = \frac{z}{z-1}$, then $Z\{a^k\} =$ _____, for $k \geq 0$

a) $\frac{z}{z-a}$ b) $\frac{z}{a(z-1)}$

c) $\frac{a}{z-a}$ d) $\frac{z}{az-1}$

11) The order of convergence by Newton-Raphson method is _____.

a) 1.6 b) 2

c) 1 d) 0

12) The value of $L^{-1}\left\{\frac{1}{s}\right\}$ is _____.

a) t b) 1

c) 0 d) 0

13) The equation of line of Regression of y on x is given by _____.

a) $y - \bar{Y} = b_{yx}(x - \bar{x})$ b) $y - \bar{y} = b_{xy}(x - \bar{x})$

c) $x - \bar{x} = b_{xy}(y - \bar{y})$ d) $x - \bar{y} = b_{xy}(y - \bar{y}$

14) The relation between mean and variance of Binomial distribution is _____.

a) $Mean < Variance$ b) $Mean = Variance$

c) $Mean > Variance$ d) $Mean = \frac{1}{2} Variance$

Set P

S.Y. (B. Tech) (Sem-I) (Old) (CBCS) Examination: March/April - 2025
ELECTRONICS ENGINEERING
Engineering Mathematics– III(BTN04301)

Day & Date: Saturday 17-05-2025 Max. Marks: 56
Time: 03:00 PM To 06:00 PM

Instructions: 1) All questions are compulsory.
2) Figures to the right indicate full marks.
3) Use of non-programmable calculator is allowed.

Section – I

Q.2 Attempt any Three of the following. **09**

a) Solve $(D^3 + D^2 + D + 1)y = sin2x.$

b) Solve $(D^2 - 1)y = e^x cosx$

c) Obtain Fourier series of $f(x) = x\ in\ (-1,1)$

d) Find z-transform of $f(x) = 2^{|k|}$ for all k.

e) Find inverse z-transform of $\frac{1}{(z-3)(z-2)}$ if its Region of Convergence is $|z| < 2$

Q.3 Attempt any Three of the following. **09**

a) Solve $(D^3 + 3D^2 + 3D + 1)y = e^{-x}$

b) Obtain half range Fourier sine series for $f(x) = \begin{cases} x & ; \quad 0 \le x \le 1 \\ 2 - x & ; \quad 1 \le x \le 2 \end{cases}$

c) Find Fourier series for $f(x) = \begin{cases} -k & ; -\pi < x < 0 \\ k & ; \ 0 < x < \pi \end{cases}$

d) Solve $(D^2 + 2D + 1)y = xsinx$

e) Find z-transform of $\{3^k\}$ for $k \ge 0$. Express its region of convergence.

Q.4 Attempt any Two of the following. **10**

a) Solve $(D^2 + D)y = x^2 + 2x + 4$

b) Find Z-transform of $f(k) = \cos(\alpha k)\,, for\ k \ge 0$

c) Find Fourier series for $f(x) = \begin{cases} -\pi & ; -\pi < x < 0 \\ x & ; 0 < x \le \pi \end{cases}$

Section – II

Q.5 Attempt any Three of the following. **09**

a) Find Laplace transform of $f(t) = tsint$

b) Find Laplace transform of $\frac{1}{t}\ (1 - cost)$

c) If the mean of Binomial distribution is 2 and variance is $\frac{4}{3}$ then find the probability of i) Two success, ii) Less than two successes.

d) Weights of 4000 students are found to be normally distributed with mean 50 kgs and S.D. 5kgs. Find the number of students with weight between 45 and 60 kgs. (Given for SNV z area under curve between $z = 0$ and $z = 1$ is 0.3431 and between $z = 0$ and $z = 2$ is 0.4772).

e) Find the positive root of $x^4 - x = 10$ correct to three decimal places by Newton-Raphson method by taking $x_0 = 2$ (perform only three iterations)

Q.6 Attempt any three of the following. **09**

a) Find $L\{te^{-4t}\sin(3t)\}$

b) Solve the following system of linear equations by using Jacobi's method (performance only three iterations).

$$10x - 5y - 2z = 3, 4x - 10y + 3z = -3, x + 6y + 10z = -3$$

c) Solve the following system of linear equations by using Gauss elimination method

$$x + y + z = 9, 2x - 3y + 4z = 13, 3x + 4y + 5z = 40$$

d) Find equation of line regression of Y on X from the following data

X	10	14	18	22	26	30
Y	18	12	24	6	30	36

e) Solve the equation by Regula-Falsi method $x\log_{10} x - 1.2 = 0$ (perform only two iterations)

Q.7 Attempt any two of the following. **10**

a) Find inverse Laplace transform of $\frac{1}{S(S+1)}$ by Convolution theorem.

b) Calculate coefficient of correlation r from the following data

x	64	65	66	67	68	69	70
y	66	67	65	68	70	68	71

c) Find inverse Laplace transform of $\frac{1}{s}\log\left(1 + \frac{1}{S^2}\right)$

S.Y. (B.Tech.) (Sem-I) (Old) (CBCS) Examination: March/April-2025
ELECTRONICS ENGINEERING
Network Theory and Analysis (BTN04303)

Day & Date: Monday, 19-05-2025 Max. Marks: 70
Time: 03:00 PM To 06:00 PM

Instructions: 1) Q. No. 1 is compulsory. It should be solved in the first 30 minutes in Answer Book Page no 03 (Starting page of the Answer Book). Each question carries one mark.
2) Don't forget to Mention question paper set (P/Q/R/S) on top of page.
3) Figures to the right indicate full marks.
4) Assume suitable data if necessary.

MCQ/Objective Type Questions

Duration: 30 Minutes Marks:14

Q.1 Tick marks the correct answer: **14**

1) Quality factor of series circuit RLC circuit is _____.

a) $\frac{\omega R}{L}$ b) $\frac{\omega L}{R}$

c) $\frac{\omega C}{R}$ d) $\frac{\omega R}{C}$

2) The time constant of a series RC circuit is _____.

a) RC b) $\frac{C}{R}$

c) $\frac{R}{C}$ d) e^{-tRC}

3) Maximum power is transferred when the load impedance is equal To _____.

a) Source impedance b) Zero
c) Half of Source Impedance d) None

4) Which of the following circuits appears as a very low resistance at resonance?

a) series & parallel resonant b) series resonant
c) parallel resonant d) none of the above

5) The h parameters h_{12} and h_{22} are obtained by _____.

a) by shorting input terminals b) by shorting output terminals
c) by opening input terminals d) by opening output terminals

6) Which of the following circuits appears as a very high resistance at resonance?
a) series & parallel resonant
b) series resonant
c) parallel resonant
d) none of the above

7) The reciprocity theorem is applicable to _____.
a) linear networks
b) linear & bilateral networks
c) bilateral networks only
d) none of above

8) When two port networks are connected in series, the parameters of the interconnected network can be conveniently expressed with help of _____.
a) Z parameter
b) h parameter
c) Y parameter
d) Transmission parameter

9) A band elimination filter is the one _____.
a) which attenuates all the frequencies less than lower cut off frequency
b) which attenuates all the frequencies greater than upper cut off frequency
c) frequencies lying between f1 and f2 are attenuated and all other frequencies are passed
d) frequencies lying between LC are passed and all other are attenuated

10) The transient current in loss free LC circuit when excited from AC source is an ____ Sine wave.
a) un damped
b) over damped
c) under damped
d) critically damped

11) The driving admittance $(Y_{11}(S))$ is defined as _____.
a) The ratio of transform voltage to transform current at the same port
b) The ratio of transform voltage at one port to transform current at the other port
c) The ratio of transform current at one port to transform voltage at the same port
d) The ratio of transform voltage at one port to transform voltage at the other port

12) If a high pass filter having L=47.74mH and C=0.133 μF then design impedance K will be _____.
a) 400 ohm
b) 500 ohm
c) 600 ohm
d) 650 ohm

13) In the m-derived high pass filters the resonant frequency is to be chosen so that it is _____.
a) Above the cut-off frequency
b) Below the cut-off frequency
c) Equal to the cut-off frequency
d) None of the above

14) The system is said to be unstable if _____.

a) all the poles lie on right half of s plane
b) all the poles lie on left half of s plane
c) all poles does not lie on right half of s plane
d) both a and b

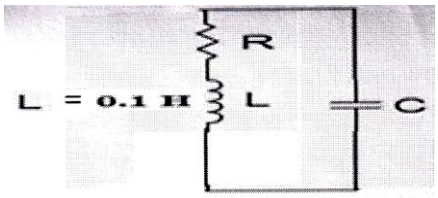
2) Assume suitable data if required.
3) Figures to right indicate maximum marks.

Section – I

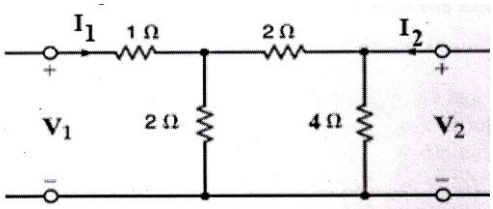
Q.2 Attempt any four. **16**

a) For above circuit an inductance of 0.1H having quality factor of 5 is in parallel with capacitor. Determine value of C and coil resistance at resonant frequency 500 rad/sec.

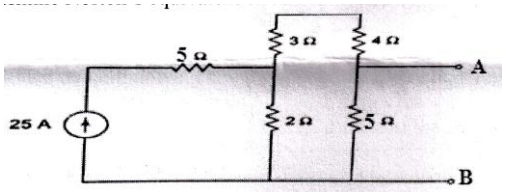


b) A Series RLC Circuit has a quality factor of 5 at 50 rad/sec. The current flowing through the circuit at resonance is 10A and the supply voltage is 100 V. The total impedance of the circuit is 20 Ω. Find the circuit constants R, L & C.

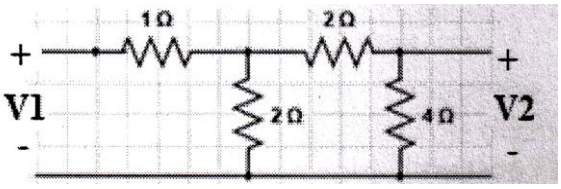
c) Find Z parameters of above circuit.



d) Determine Norton's equivalent circuit for above circuit.



e) Find h parameter for above network.

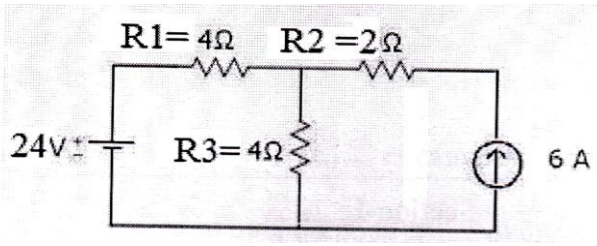


Q.3 Attempt any two. **12**

a) Prove that bandwidth of series RLC circuit is $BW = \frac{R}{2\pi L}$ and $Q = \frac{fr}{BW}$

b) Derive ABCD parameters in terms of Z and Y parameters.

c) Find current in various branches using superposition theorem.



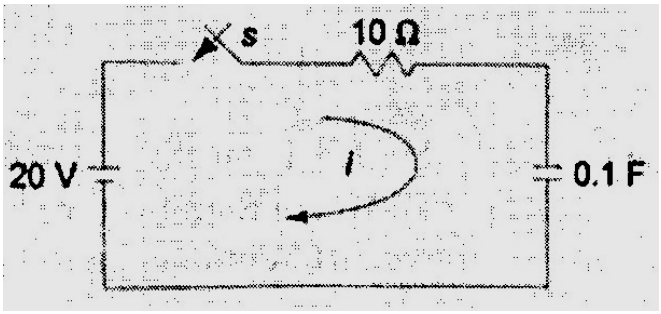
Section – II

Q.4 Attempt any four. **16**

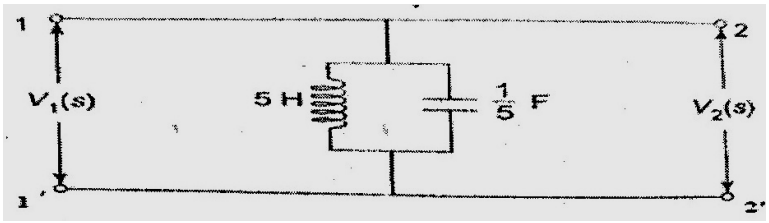
a) Prove that cut off frequency for constant K low pass filter is $F_c = \frac{1}{\pi\sqrt{LC}}$

b) Design a π type attenuator to give 20dB attenuation & to have characteristics impedance of 100Ω.

c) A series RC circuit consists of resistor of 10 Ω and capacitor of 0.1 F as shown in figure. A constant voltage of 20V is applied to the circuit at t=0. Obtain the current equation. Determine the voltage across the resistor and the capacitor.



d) For above network determine $Z_{21(S)}, G_{21(S)}, Y_{12(S)}$



e) Check stability of following polynomial by applying Routh criteria $Q(S) = S^3 + S^2 + 3S + 8$

Q.5 Attempt any two. **12**

a) Derive an expression of current, V_R & V_C for dc response of series RC circuit.

b) Derive the design equation for L, C & Z_{OT} for constant K high pass filter.

c) Draw the pole-zero plot for the given network function and hence obtain $V(t)$.

$$V(s) = \frac{10s}{(s+3)(S+2)}$$

S.Y. (B.Tech.) (Sem-I) (Old) (CBCS) Examination: March/April-2025
ELECTRONICS ENGINEERING
Network Theory and Analysis (BTN04303)

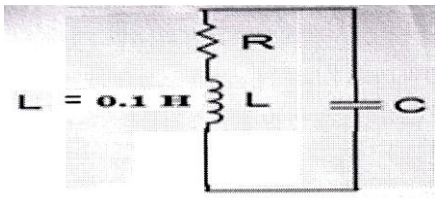
Day & Date: Monday, 19-05-2025 Max. Marks: 56
Time: 03:00 PM To 06:00 PM

Instructions: 1) All questions are compulsory.
2) Assume suitable data if required.
3) Figures to right indicate maximum marks.

Section – I

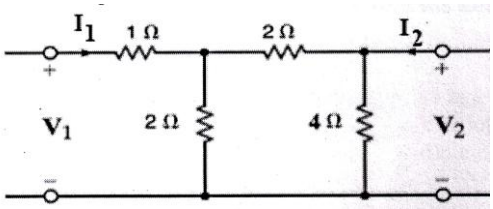
Q.2 Attempt any four. **16**

a) For above circuit an inductance of 0.1H having quality factor of 5 is in parallel with capacitor. Determine value of C and coil resistance at resonant frequency 500 rad/sec.

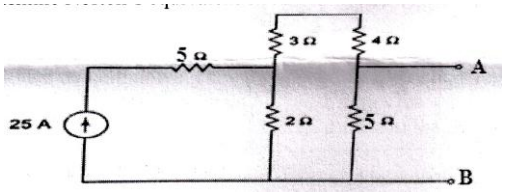


b) A Series RLC Circuit has a quality factor of 5 at 50 rad/sec. The current flowing through the circuit at resonance is 10A and the supply voltage is 100 V. The total impedance of the circuit is 20 Ω. Find the circuit constants R, L & C.

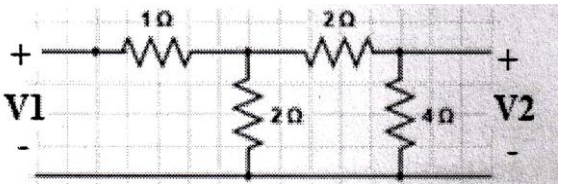
c) Find Z parameters of above circuit.



d) Determine Norton's equivalent circuit for above circuit.



e) Find h parameter for above network.

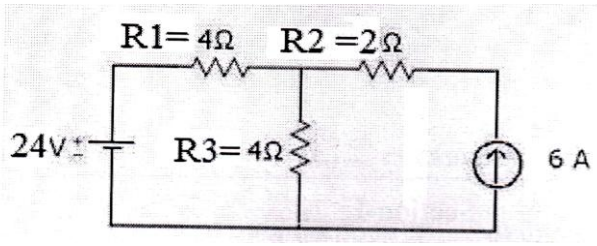


Q.3 Attempt any two. **12**

a) Prove that bandwidth of series RLC circuit is $BW = \frac{R}{2\pi L}$ and $Q = \frac{fr}{BW}$

b) Derive ABCD parameters in terms of Z and Y parameters.

c) Find current in various branches using superposition theorem.



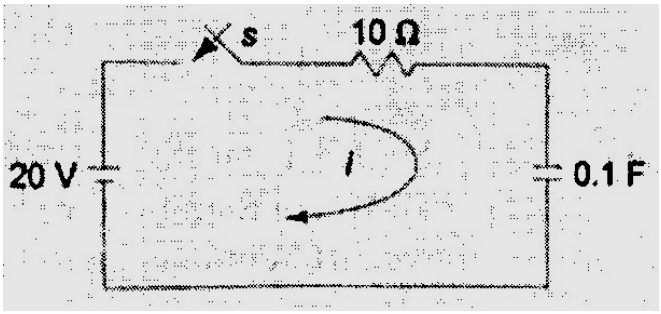
Section – II

Q.4 Attempt any four. **16**

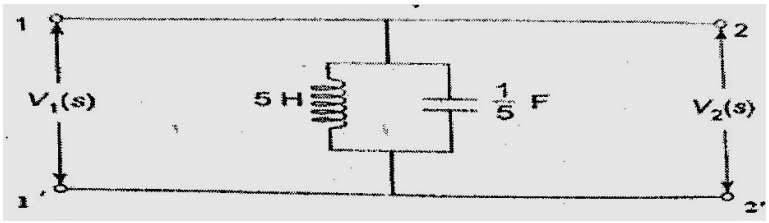
a) Prove that cut off frequency for constant K low pass filter is $F_c = \frac{1}{\pi\sqrt{LC}}$

b) Design a π type attenuator to give 20dB attenuation & to have characteristics impedance of 100Ω.

c) A series RC circuit consists of resistor of 10 Ω and capacitor of 0.1 F as shown in figure. A constant voltage of 20V is applied to the circuit at t=0. Obtain the current equation. Determine the voltage across the resistor and the capacitor.



d) For above network determine $Z_{21(S)}, G_{21(S)}, Y_{12(S)}$



e) Check stability of following polynomial by applying Routh criteria $Q(S) = S^3 + S^2 + 3S + 8$

Q.5 Attempt any two. **12**

a) Derive an expression of current, V_R & V_C for dc response of series RC circuit.

b) Derive the design equation for L, C & Z_{OT} for constant K high pass filter.

c) Draw the pole-zero plot for the given network function and hence obtain $V(t)$.

$$V(s) = \frac{10s}{(s+3)(S+2)}$$

Electrical Machnies (BTN04304)

Day & Date: Tuesday, 20-05-2025 Max. Marks: 70
Time: 03:00 PM To 06:00 PM

Instructions: 1) Q. No. 1 is compulsory. It should be solved in the first 30 minutes in answer book. Page no 03 (Starting page of the Answer Book). Each question carries one mark.
2) Don't forget to Mention question paper set (P/Q/R/S) on top of page.
3) Figures to the right indicates full marks.
4) Assume data wherever necessary.

MCQ/Objective Type Questions

Duration: 30 Minutes Marks:14

Q.1 Choose the correct alternatives from the given options. 14

1) In a split-phase motor, the running winding should have ____
a) High resistance and low inductance
b) High resistance and High inductance
c) Low resistance and high inductance
d) Low resistance and low inductance

2) If the capacitor of a single-phase motor is short-circuited ____
a) The motor will not start
b) The motor will run in the same direction at a reduced speed
c) The motor will run in the reverse direction
d) None of the above

3) In a D.C. generator the critical resistance can be increased by ____
a) Increasing its field resistance
b) Decreasing its field resistance
c) Increasing its speed
d) Decreasing its speed

4) One D.C. motor drives another D.C. motor. The second D.C. motor when excited and driven ____
a) Does not run as a generator
b) Also runs as a motor comes to stop after sometime
c) Runs as a generator
d) None of these

5) D.C. generator works on the principle of ____
a) Lenz's law
b) Ohm's law
c) Faraday's law of electromagnetic induction
d) None of the above

6) In a low power factor wattmeter, the compensating coil is connected ____
a) In series with current coil
b) In parallel with current coil
c) In series with pressure coil
d) In parallel with pressure coil

7) The transformer which is more feasible to use in the distribution ends should be ____
a) star-delta b) delta-star
c) Scott d) delta-delta

8) The open delta connection (V-V) is frequently used for ____
a) two auto-transformers
b) three auto-transformers
c) four auto-transformers
d) five auto-transformers

9) In a 3-phase power measurement by two wattmeter method, both the wattmeter's had identical readings. The power factor of the load was ____.
a) Unity b) 0.8 lagging
c) 0.8 leading d) Zero

10) A 3-phase 440 V, 50 Hz induction motor has 4% slip. The frequency of rotor current will be ____.
a) 50 Hz b) 25 Hz
c) 5 Hz d) 2 Hz

11) A 50 Hz, 3-phase induction motor has a full load speed of 1500 rpm. The number of poles in the motor is ____.
a) 2 poles b) 4 poles
c) 6 poles d) 8 poles

12) As compared to DOL starting method the star delta starting method should have ____.
a) High torque b) Low starting current
c) High starting current d) Smooth acceleration

13) In a D.C. generator the critical resistance refers to the resistance of ____
a) Brushes b) Field
c) Armature d) Load

14) Which of the following law/rule can he used to determine the direction of rotation of D.C. motor?
a) Lenz's law b) Faraday's law
c) Coulomb's law d) Fleming's left-hand rule

3) Assume suitable data if required.

Section – I

Q.2 Solve the following (Any Four) **16**

a) Derive the torque equation of a DC motor.
b) Explain working principle of DC generator? Derive the EMF equation of a DC generator.
c) A dc shunt motor takes a load current of 50A from a 240V dc power supply the armature and field resistance are 0.25 Ω and 220 Ω respectively. Find the armature torque when the motor runs at 960rpm.
d) A dc generator generates an EMF of 2000V and has 900 armature conductors, flux per pole of 0.014 wb, speed of 1400 rpm and the armature winding has 4 parallel paths, find the number of poles.
e) Discuss the power factor and causes of low power factor.

Q.3 Solve the following (Any Two) **12**

a) An 8 pole d.c. shunt generator with 780 wave connected armature conductors and running at 600 rpm supplies load of 14.5 Ω resistance at terminal voltage of 50V. The armature resistance is 0.24 Ω and field resistance is 450 Ω. Find armature current, induced emf and flux per pole.
b) Describe various schemes of speed control of dc motor.
c) Explain two wattmeter method for three phase power measurement

Section – II

Q.4 Solve the following. (Any Four) **16**

a) A 3ph delta/star connected 11000/440V, 50Hz transformer takes line current of 5 amp, when secondary load of 0.8 Lagging power factor is connected. Determine each coil current and output of transformer.
b) Explain working of capacitor start single phase induction motor.
c) A 4 pole, 60 (Hz) three phase induction motor running with speed 1500 (rpm). Find synchronous speed, slip speed, slip for this condition.
d) Draw neat diagram of star delta starter and explain its operation.
e) On which factor the speed of three phase induction motor depends? And how to control the speed of three phase induction motor?

Q.5 Solve the following. (Any Two) **12**

a) Discuss about the working, types, characteristics, and applications of universal motor.

b) A 3-phase induction motor is wound for 4 poles, & is supplied from 50HZ system calculate a) The synchronous speed b) The speed of motor when the slip is 4% c) The rotor current frequency when the motor runs at 600rpm

c) Explain star- delta three phase transformer connections with suitable diagram. Compare star delta and delta- star three phase transformer connection.

MCQ/Objective Type Questions

Duration: 30 Minutes Marks:14

Q.1 Tick marks the correct answer: **14**

1) A bulb in a staircase has two switches, one switch being at the ground floor and the other one at the first floor. The bulb can be turned ON and also can be turned OFF by any one of the switches irrespective of the state of the other switch. The logic of switching of the bulb resembles ____

a) AND gate b) OR gate
c) XOR gate d) NAND gate

2) The equation of the cumulative law is ____

a) $A + B = B + A$
b) $A + (B + C) = (A + B) + C$
c) $A(B - C) = AB - AC$
d) None of the given options

3) If both inputs are high, out is low in ____ gate.

a) OR b) AND
c) NOR and NAND d) None of the given options

4) Which of the following correctly describes the distributive law.

a) $(A + B)(C + D) = AB + CD$
b) $(A + B).C = AC + BC$
c) $(AB)(A + B) = AB$
d) $(A.B)C - AC.AB$

5) What is the function of an enable input on a multiplexer chip?

a) To apply Vcc
b) To connect ground
c) To active the entire chip
d) To active one half of the chip

6) In a multiplexer, the selection of a particular input line is controlled by ____
a) Data controller
b) Selected lines
c) Logic gates
d) Both data controller and selected lines

7) How many NOT gates are required for the construction of a 4-to-1 multiplexer?
a) 3 b) 4
c) 2 d) 5

8) A Karnaugh map (K-map) is an abstract form of _____ diagram organized matrix of squares.
a) Venn Diagram b) Cycle Diagram
c) Block diagram d) Triangular Diagram

9) A basic S-R flip-flop can be constructed by cross-coupling of which basic logic gates?
a) AND or OR gates b) XOR or XNOR gates
c) NOR or NAND gates d) AND or NOR gates

10) In a JK-Flip Flop, when J=1 and K=1 then it will be considered as ____
a) Set condition b) Reset condition
c) No Change d) Toggle condition

11) Mealy machine is ____
a) Complex in design b) Easy to design
c) Reacts slower to input d) None of the given options

12) Moore machine is ____
a) Complex in design b) Easy to design
c) Reacts faster to input d) None of the given options

13) A Digital word has even parity ____
a) if it has even numbers of 1s
b) if it has even numbers of 0s
c) if the decimal value of word is even
d) None of these

14) The output of two input NOR is high ____
a) Only if both the inputs are high
b) Only if both the inputs are low
c) Only if one of the inputs is high and the other is low
d) None

Seat No.	

Set | P

S. Y. (B. Tech) (Sem - I) (Old) (CBCS) Examination: March/April-2025
ELECTRONICS ENGINEERING
Digital Techniques (BTN04305)

Day & Date: Wednesday, 21-05-2024 Max. Marks: 56
Time: 03:00 PM To 06:00 PM

Instructions: 1) All questions are compulsory.
2) Figure to right indicate full marks.
3) Assume additional suitable data if necessary and state it clearly.

Section – I

Q.2 Attempt the following (Any Four) **16**

a) Convert binary equivalent 10111011 to Gray code number.
Convert gray equivalent 100111 to binary code number.

b) Simplify using K – map.

$\overline{A}B\overline{C}\overline{D} + AB\overline{C}\overline{D}$

c) Construct half adder using logic gates.

d) Design and implement a 2-line to 4-line deoder using basic gates.

e) Design and implement 1 bit magnitude comparator using basic gates.

Q.3 Attempt the following (Any Two) **12**

a) The message coded in 7-bit Hamming code 0111001 is transmitted through noisy channel. Decode the message assuming that at most a single error occurred.

b) Minimize the following Boolean expression using K map and realize it using basic gates
$Y = \Sigma m\ (1,3,5,9,11,13)$

c) What is multiplexer? Design and implement 4:1 multiplexer using basic gates.

Section – II

Q.4 Attempt the following. (Any Four) **16**

a) What is Mealy machine? Explain with suitable logic diagram. Compare Moore and Mealy machine.

b) Construct positive level triggered SR latch using NAND gate and tabulate characteristics table

c) Discuss a 3 bit asynchronous up counter. Draw neat logic diagram and waveforms.

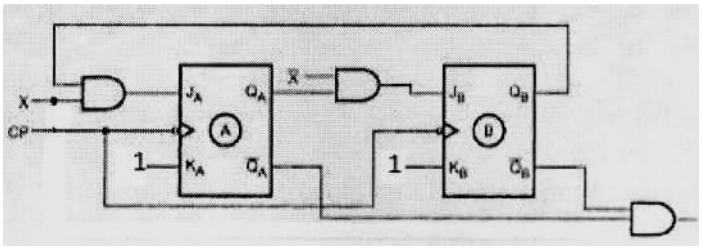
d) Construct T flip flop using JK flip flop and tabulate characteristics table.

e) Construct positive level triggered D flip flop and tabulate characteristics table.

Q.5 Attempt the following. (Any Two) **12**

a) Implement following minters expression using PROM
F_1 (A, B, C) = ∑m (0,1,5,6,7) F_2 (A, B, C) = ∑m (0,1,3,5,6,7)

b) Identify the given circuit, construct the excitation table, transition table and state diagram for circuit given below.



c) The initial content of 4-bit serial-in-serial out, right shift, shift register is 1111. How data is transferred? Draw neat logic diagram and waveforms.

S. Y. (B. Tech) (Sem - I) (Old) (CBCS) Examination: March/April-2025
ELECTRONICS ENGINEERING
Digital Techniques (BTN04305)

Day & Date: Wednesday, 21-05-2024 Max. Marks: 70
Time: 03:00 PM To 06:00 PM

Instructions: 1) Q. No. 1 is compulsory. It should be solved in the first 30 minutes in Answer Book Page no 03 (Starting page of the Answer Book). Each question carries one mark.
2) Don't forget to Mention question paper set (P/Q/R/S) on top of page.
3) Figures to the right indicates full marks.
4) Make suitable assumptions if necessary and state them clearly.

MCQ/Objective Type Questions

Duration: 30 Minutes Marks:14

Q.1 Tick marks the correct answer: **14**

1) A Karnaugh map (K-map) is an abstract form of _____ diagram organized matrix of squares.
a) Venn Diagram b) Cycle Diagram
c) Block diagram d) Triangular Diagram

2) A basic S-R flip-flop can be constructed by cross-coupling of which basic logic gates?
a) AND or OR gates b) XOR or XNOR gates
c) NOR or NAND gates d) AND or NOR gates

3) In a JK-Flip Flop, when J=1 and K=1 then it will be considered as ____
a) Set condition b) Reset condition
c) No Change d) Toggle condition

4) Mealy machine is ____
a) Complex in design b) Easy to design
c) Reacts slower to input d) None of the given options

5) Moore machine is ____
a) Complex in design b) Easy to design
c) Reacts faster to input d) None of the given options

6) A Digital word has even parity ____
a) if it has even numbers of 1s
b) if it has even numbers of 0s
c) if the decimal value of word is even
d) None of these

7) The output of two input NOR is high ____
a) Only if both the inputs are high
b) Only if both the inputs are low
c) Only if one of the inputs is high and the other is low
d) None

8) A bulb in a staircase has two switches, one switch being at the ground floor and the other one at the first floor. The bulb can be turned ON and also can be turned OFF by any one of the switches irrespective of the state of the other switch. The logic of switching of the bulb resembles ____
a) AND gate
b) OR gate
c) XOR gate
d) NAND gate

9) The equation of the cumulative law is ____
a) $A + B = B + A$
b) $A + (B + C) = (A + B) + C$
c) $A(B - C) = AB - AC$
d) None of the given options

10) If both inputs are high, out is low in ____ gate.
a) OR
b) AND
c) NOR and NAND
d) None of the given options

11) Which of the following correctly describes the distributive law.
a) $(A + B)(C + D) = AB + CD$
b) $(A + B).C = AC + BC$
c) $(AB)(A + B) = AB$
d) $(A.B)C - AC.AB$

a) Venn Diagram b) Cycle Diagram
c) Block diagram d) Triangular Diagram

4) A basic S-R flip-flop can be constructed by cross-coupling of which basic logic gates?
a) AND or OR gates b) XOR or XNOR gates
c) NOR or NAND gates d) AND or NOR gates

5) In a JK-Flip Flop, when J=1 and K=1 then it will be considered as ____
a) Set condition b) Reset condition
c) No Change d) Toggle condition

6) Mealy machine is ____
a) Complex in design
b) Easy to design
c) Reacts slower to input
d) None of the given options

7) Moore machine is ____
a) Complex in design
b) Easy to design
c) Reacts faster to input
d) None of the given options

8) A Digital word has even parity ____
a) if it has even numbers of 1s
b) if it has even numbers of 0s
c) if the decimal value of word is even
d) None of these

9) The output of two input NOR is high ____
a) Only if both the inputs are high
b) Only if both the inputs are low
c) Only if one of the inputs is high and the other is low
d) None

10) A bulb in a staircase has two switches, one switch being at the ground floor and the other one at the first floor. The bulb can be turned ON and also can be turned OFF by any one of the switches irrespective of the state of the other switch. The logic of switching of the bulb resembles ____
a) AND gate
b) OR gate
c) XOR gate
d) NAND gate

11) The equation of the cumulative law is ____
a) $A + B = B + A$
b) $A + (B + C) = (A + B) + C$
c) $A(B - C) = AB - AC$
d) None of the given options

12) If both inputs are high, out is low in ____ gate.
a) OR
b) AND
c) NOR and NAND
d) None of the given options

13) Which of the following correctly describes the distributive law.
a) $(A + B)(C + D) = AB + CD$
b) $(A + B).C = AC + BC$
c) $(AB)(A + B) = AB$
d) $(A.B)C - AC.AB$

MCQ/Objective Type Questions

Duration: 30 Minutes Marks:14

Q.1 Choose the correct Answer. 14

1) The ripple by a capacitor filter to heavy loads is _____.
a) high b) depends on temperature
c) low d) no ripple at all

2) The main reason of bleeder resistor in LC filter is to _____.
a) improve filtering action
b) improve voltage regulation
c) ensure continuous current in load resistor
d) both (a) and (b)

3) Which of the following is not a necessary component in a clamper circuit?
a) Diode b) Capacitor
c) Resistor d) independent DC supply

4) The charge (q) lost by the capacitor during the discharge time for shunt capacitor filter.
a) I_{DC}*T b) I_{DC} /T
c) I_{DC}*2T d) I_{DC}/2T

5) The ripple factor for an 1 section filter is _____.
a) $r = 1/6\sqrt{2}\omega 2LC$ b) $r = 6\sqrt{2}\omega 2LC$
c) $r = 6\sqrt{3}\omega 2LC$ d) $r = 1/6\sqrt{3}\omega 2LC$

6) A JFET is a _____ driven device.
a) voltage b) current
c) both current and voltage d) none of the above

7) For a condition, drain voltage equals the pinch-off-voltage, the drain current _____ with the increase in drain voltage.

a) decreases b) increases
c) remains constant d) none of the above

8) For VVR application MOSFET is operated in _____region.

a) ohmic b) saturation
c) pinch-off d) both b& c

9) With the E-MOSFET, when gate input voltage is zero, drain current is _____.

a) saturation current
b) zero
c) steady state drain current (IDSS)
d) widening the channel

10) In a LC filter, the ripple factor, _____.

a) increases with the load current
b) increases with the load resistance
c) independent of load current
d) has the lowest value

11) When negative voltage feedback is applied to an amplifier, its voltage gain _____.

a) is increased b) is reduced
c) remains the same d) none of the above

12) A feedback circuit usually employs _____ network.

a) resistive b) capacitive
c) inductive d) none of the above

13) Emitter follower is a _____ circuit.

a) voltage feedback
b) current feedback
c) both voltage and current feedback
d) none of the above

14) The dc current gain in common base configuration is given by _____.

a) α b) β
c) $\beta + 1$ d) $\alpha + 1$

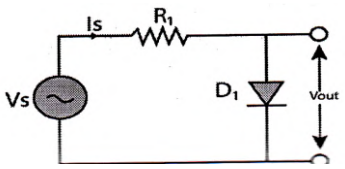
Instructions: 1) All questions are compulsory.
2) Figures to the right indicate full marks.
3) Make suitable assumptions if necessary and state them clearly.

Section – I

Q.2 Attempt any Four **16**

a) What is α and β in the case of BJT. Find the relation between α and β.

b) Plot the output voltage waveforms of circuit shown below supplied with 20 V peat to peak (Vs) sinusoidal voltage. Justify the output voltages levels with proper analysis. Assume ideal diode in the circuit.



c) Draw circuit diagram of LC filter with FWR. What is the critical inductor in LC filter?

d) Explain procedure to draw dc load-line in case of CE BJT amplifier.

e) Draw voltage divider bias circuit and derive formula of its stability factor.

Q.3 Attempt any two. **12**

a) Draw circuit diagram of capacitor shunt filter connected with full wave rectifier and describe its functioning. Draw the waveform of voltage across load resistor and current through diode.

b) Describe thermal runaway related to BJT. How thermal runaway consequences can be avoided?

c) What is bias stabilization in BJT? Describe different bias compensation techniques for BJT.

Section – II

Q.4 Attempt any Four. **16**

a) Draw single stage CE amplifier diagram and describe its functioning.

b) What are different types of couplings in multistage amplifiers? Describe RC coupled CE amplifier.

c) Draw block diagram for negative feedback in amplifier and derive generalized expression for gain with feedback. What is loop gain?

d) Compare JFET and MOSFET.

e) Draw circuit of emitter follower and determine its voltage gain.

Q.5 Attempt any two. **12**

a) Describe thermal runaway and punch through effect related to BJT. How these effects can be avoided?

b) An amplifier with 5K input resistance and 50 K output resistance has a voltage-gain of 50.
The amplifier has now provided with 15 % negative feedback, calculate-

1) Voltage-gain with feedback
2) Input resistance with feedback
3) Output resistance with feedback
4) loop-gain

c) Draw drain characteristics and transfer characteristics in case of FET. Define different FET parameters.

Set Q

S. Y. (B. Tech) (Sem-I) (Old) (CBCS) Examination: March/April-2025
ELECTRONICS ENGINEERING
Electronic Circuit Analysis and Design (BTN04302)

Day & Date: Thursday 22-05-2025 Max. Marks: 70
Time: 03:00 PM To 06:00 PM

Instructions: 1) Q. No. 1 is compulsory. It should be solved in the first 30 minutes in Answer Book Page no 03 (Starting page of the Answer Book). Each question carries one mark.
2) Don't forget to Mention question paper set (P/Q/R/S) on top of page.
3) Figures to the right indicates full marks.
4) Make suitable assumptions if necessary and state them clearly.

MCQ/Objective Type Questions

Duration: 30 Minutes Marks:14

Q.1 Choose the correct Answer. **14**

1) For VVR application MOSFET is operated in _____region.
a) ohmic b) saturation
c) pinch-off d) both b& c

2) With the E-MOSFET, when gate input voltage is zero, drain current is _____.
a) saturation current
b) zero
c) steady state drain current (IDSS)
d) widening the channel

3) In a LC filter, the ripple factor, _____.
a) increases with the load current
b) increases with the load resistance
c) independent of load current
d) has the lowest value

4) When negative voltage feedback is applied to an amplifier, its voltage gain _____.
a) is increased b) is reduced
c) remains the same d) none of the above

5) A feedback circuit usually employs _____ network.
a) resistive b) capacitive
c) inductive d) none of the above

6) Emitter follower is a _____ circuit.
a) voltage feedback
b) current feedback
c) both voltage and current feedback
d) none of the above

7) The dc current gain in common base configuration is given by _____.
a) α b) β
c) $\beta + 1$ d) $\alpha + 1$

8) The ripple by a capacitor filter to heavy loads is _____.
a) high b) depends on temperature
c) low d) no ripple at all

9) The main reason of bleeder resistor in LC filter is to _____.
a) improve filtering action
b) improve voltage regulation
c) ensure continuous current in load resistor
d) both (a) and (b)

10) Which of the following is not a necessary component in a clamper circuit?
a) Diode b) Capacitor
c) Resistor d) independent DC supply

11) The charge (q) lost by the capacitor during the discharge time for shunt capacitor filter.
a) I_{DC}*T b) I_{DC} /T
c) I_{DC}*2T d) I_{DC}/2T

12) The ripple factor for an 1 section filter is _____.
a) $r = 1/6\sqrt{2}\omega 2LC$ b) $r = 6\sqrt{2}\omega 2LC$
c) $r = 6\sqrt{3}\omega 2LC$ d) $r = 1/6\sqrt{3}\omega 2LC$

13) A JFET is a _____ driven device.
a) voltage b) current
c) both current and voltage d) none of the above

14) For a condition, drain voltage equals the pinch-off-voltage, the drain current _____ with the increase in drain voltage.
a) decreases b) increases
c) remains constant d) none of the above

Set **Q**

S. Y. (B. Tech) (Sem-I) (Old) (CBCS) Examination: March/April-2025
ELECTRONICS ENGINEERING
Electronic Circuit Analysis and Design (BTN04302)

Day & Date: Thursday 22-05-2025 Max. Marks: 56
Time: 03:00 PM To 06:00 PM

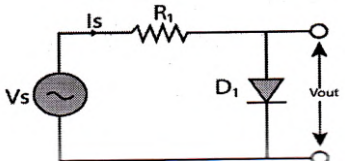
Instructions: 1) All questions are compulsory.
2) Figures to the right indicate full marks.
3) Make suitable assumptions if necessary and state them clearly.

Section – I

Q.2 Attempt any Four **16**

a) What is α and β in the case of BJT. Find the relation between α and β.

b) Plot the output voltage waveforms of circuit shown below supplied with 20 V peat to peak (Vs) sinusoidal voltage. Justify the output voltages levels with proper analysis. Assume ideal diode in the circuit.



c) Draw circuit diagram of LC filter with FWR. What is the critical inductor in LC filter?

d) Explain procedure to draw dc load-line in case of CE BJT amplifier.

e) Draw voltage divider bias circuit and derive formula of its stability factor.

Q.3 Attempt any two. **12**

a) Draw circuit diagram of capacitor shunt filter connected with full wave rectifier and describe its functioning. Draw the waveform of voltage across load resistor and current through diode.

b) Describe thermal runaway related to BJT. How thermal runaway consequences can be avoided?

c) What is bias stabilization in BJT? Describe different bias compensation techniques for BJT.

Section – II

Q.4 Attempt any Four. **16**

a) Draw single stage CE amplifier diagram and describe its functioning.

b) What are different types of couplings in multistage amplifiers? Describe RC coupled CE amplifier.

c) Draw block diagram for negative feedback in amplifier and derive generalized expression for gain with feedback. What is loop gain?

d) Compare JFET and MOSFET.

e) Draw circuit of emitter follower and determine its voltage gain.

Q.5 Attempt any two. **12**

a) Describe thermal runaway and punch through effect related to BJT. How these effects can be avoided?

b) An amplifier with 5K input resistance and 50 K output resistance has a voltage-gain of 50.
The amplifier has now provided with 15 % negative feedback, calculate-

1) Voltage-gain with feedback
2) Input resistance with feedback
3) Output resistance with feedback
4) loop-gain

c) Draw drain characteristics and transfer characteristics in case of FET. Define different FET parameters.

MCQ/Objective Type Questions

Duration: 30 Minutes Marks:14

Q.1 Choose the correct Answer. **14**

1) The output of LTI system with input $x(t) = u(t)$ and impulse response $h(t) = \delta(t-1)$ is _____

a) $u(t)$ b) $u(t-1)$
c) $u(t-4)$ d) $\delta(t-2)$

2) A memory less system is also known as _____ System

a) Casual b) Static
c) Dynamic d) Non casual

3) Fourier transform of unity is _____.

a) $\delta(w)$ b) $\pi\,\delta(w)$
c) $2\pi\,\delta(w)$ d) Unit step signal

4) A discrete time LTI system is casual if _____

a) $h[n] = 0$ for $n = 0$ b) $h[n] = 0$ for $n < 0$
c) $h[n] = 0$ for $n \neq 0$ d) $h[n] = 0$ for $n > 0$

5) The signal $u(t) - u(t-10)$ is _____

a) Periodic b) A periodic
c) Casual d) Aperiodic & casual

6) If $x[n] = \{1,2,3\}$ and $h[n] = \{3,4,5\}$ and $y[n] = x[n]^* h[n]$, the length of $y[n]$ is _____

a) 5 b) 6
c) 7 d) 3

7) Which of the following is the method used for reconstruction of signal from its samples?

a) Zero order hold
b) Linear interpolation
c) Both a and b
d) None of these

8) What is the Nyquist frequency for the signal $x(t) = 3\cos 50\,\pi t + 10\sin 300\pi t - \cos 100\pi t$?

a) 50Hz
b) 100Hz
c) 200Hz
d) 300Hz

9) The DC coefficient a_0 for the signal $x(t) = 5\cos(2t)$ is _____

a) 2
b) 5
c) 0
d) None of these

10) A system is having impulse response $h(t)$ will be BIBO stable if _____

a) $\int_{-\infty}^{\infty}|h(t)| > \infty$
b) $\int_{-\infty}^{\infty}|h(t)| < \infty$
c) $\int_{-\infty}^{\infty}|h(t)| = 0$
d) $\int_{-\infty}^{\infty}|h(t)| = 1$

11) A signal $x(t)$ is said to be even if _____

a) $x(t) = -x(t)$
b) $x(t) = x(-t)$
c) $x(t) = -x(-t)$
d) $-x(t) = x(-t)$

12) An LTI system is stable if and only if the ROC of its system function $H(z)$ _____

a) Exterior to a circle
b) Interior of a circle
c) Includes unity circle
d) None of these

13) If $X(\omega)$ is the Fourier transform of the signal $x(n)$, then what is the Fourier transform of the signal $x(n-k)$?

a) $e^{j\omega k}.X(-\omega)$
b) $e^{j\omega k}.X(\omega)$
c) $e^{-j\omega k}.X(-\omega)$
d) $e^{-j\omega k}.X(\omega)$

14) A function having frequency f is to be sampled. The sampling time T should be _____

a) $T = \frac{1}{2f}$
b) $T > \frac{1}{2f}$
c) $T < \frac{1}{2f}$
d) $T \geq \frac{1}{2f}$

Time: 10:00 AM To 01:00 PM

Instructions: 1) All questions are compulsory.
2) Figures to the right indicate full marks.
3) Assume Suitable data if required & state the assumptions.

Section – I

Q.2 Solve the following (Any Four) **16**

a) Obtain and sketch the even and odd parts of the discrete time signal $x[n]$ shown below

$$x[n] = \{5,2,1,4\}$$
$$\uparrow$$

b) Determine whether or not the following signals are periodic or not. If the signal is periodic determine the fundamental period.

i) $3\cos(3t + \pi/4)$

ii) $x[n] = \sin(2\pi n/5 + 2)$

c) Give expression for Exponential Fourier series & derive the expression for computing the coefficients a_0 and a_k of Exponential Fourier Series

d) If $u(t)$ is unit step signal and $\delta(t)$ is unit impulse sequence sketch & label following signals

i) $u(t+1)$

ii) $\delta(t+1) - \delta(t+2)$

iii) $u(t) + u(t-1)$

iv) $u(t) - u(t-2)$

e) Consider the signal $x(t)$ as given below.

$$x(t) = \begin{cases} 1 & 0 < t < 1 \\ -1 & 1 \leq t \leq 3 \end{cases}$$

Sketch and label following signals

i) $x(t+1)$

ii) $x(-t)$

iii) $x(t)u(t-1)$

Q.3 Solve the following (Any Two) **12**

a) Obtain the convolution sum of following signals

$x[n] = \{1,2,\}$ and $h[n] = \{3,2,1\}$

$\uparrow$ $\uparrow$

b) Determine the Exponential Fourier series representation for the following signals

$x(t)$ periodic with period 2 and

$$x(t) = \begin{cases} 1 & 0 < t < 1 \\ -1 & 1 \leq t \leq 2 \end{cases}$$

c) Consider the cascade connection of two LTI systems with impulse responses $h1(t)$ and $h2(t)$ where

$h1(t) = u(t-1)$ and $h2(t) = u(t)$

Compute the impulse response of overall system

Section – II

Q.4 Solve the following (Any Four) **16**

a) Explain in brief sample with zero order hold.

b) State the conditions for ROC of system function $H(z)$ of an LTI system for stable system. Obtain impulse response of system if following system is stable.

$$H(z) = \frac{z}{z-2} + \frac{z}{z-1/4}$$

c) The analog signal $x(t)$ is given below

$$x(t) = 3\sin(2000\pi t) + 10\cos(1400\pi t) - \sin(2500\pi t)$$

Calculate the Nyquist sampling rate for the signal. Also find the discrete time signal if sampled with $Fs = 3000\text{Hz}$

d) Given the Fourier transform of $x(t)$ as $X(j\omega)$, express the Fourier transform of following signal in terms of $X(j\omega)$ using the suitable properties of Fourier transform. State the properties used.

$$x1(t) = x(t-1)$$

e) State & prove following properties of continuous time Fourier transform

i) Time Shifting

ii) Time and frequency Scaling

Q.5 Solve the following (Any Two) **12**

a) State sampling theorem. Explain with suitable equations & diagrams how the original signal can be reconstructed from the samples using ideal low pass filter

b) Consider an LTI system with the system function

$$H(s) = \frac{s-1}{(s+1)(s-3)}$$

Obtain the impulse response $h(t)$ of the system and state the region of convergence of the system if the system is

i) casual

ii) anti casual & stable

c) Obtain the Fourier transform of following signals

i) $x(t) = e^{-3|t|}$

ii) $x(t) = \delta(t-3)$

MCQ/Objective Type Questions

Duration: 30 Minutes Marks:14

Q.1 Choose the correct Answer. **14**

1) What is the Nyquist frequency for the signal $x(t) = 3\cos 50\,\pi t + 10\sin 300\pi t - \cos 100\pi t$?
a) 50Hz b) 100Hz
c) 200Hz d) 300Hz

2) The DC coefficient a_0 for the signal $x(t) = 5\cos(2t)$ is _____
a) 2 b) 5
c) 0 d) None of these

3) A system is having impulse response $h(t)$ will be BIBO stable if _____
a) $\int_{-\infty}^{\infty}|h(t)| > \infty$ b) $\int_{-\infty}^{\infty}|h(t)| < \infty$
c) $\int_{-\infty}^{\infty}|h(t)| = 0$ d) $\int_{-\infty}^{\infty}|h(t)| = 1$

4) A signal $x(t)$ is said to be even if _____
a) $x(t) = -x(t)$ b) $x(t) = x(-t)$
c) $x(t) = -x(-t)$ d) $-x(t) = x(-t)$

5) An LTI system is stable if and only if the ROC of its system function $H(z)$ _____
a) Exterior to a circle b) Interior of a circle
c) Includes unity circle d) None of these

6) If $X(\omega)$ is the Fourier transform of the signal $x(n)$, then what is the Fourier transform of the signal $x(n-k)$?
a) $e^{j\omega k}.X(-\omega)$ b) $e^{j\omega k}.X(\omega)$
c) $e^{-j\omega k}.X(-\omega)$ d) $e^{-j\omega k}.X(\omega)$

7) A function having frequency f is to be sampled. The sampling time T should be _____

a) $T = \frac{1}{2f}$ b) $T > \frac{1}{2f}$

c) $T < \frac{1}{2f}$ d) $T \geq \frac{1}{2f}$

8) The output of LTI system with input $x(t) = u(t)$ and impulse response $h(t) = \delta(t-1)$ is _____

a) $u(t)$ b) $u(t-1)$

c) $u(t-4)$ d) $\delta(t-2)$

9) A memory less system is also known as _____ System

a) Casual b) Static

c) Dynamic d) Non casual

10) Fourier transform of unity is _____.

a) $\delta(w)$ b) $\pi\,\delta(w)$

c) $2\pi\,\delta(w)$ d) Unit step signal

11) A discrete time LTI system is casual if _____

a) $h[n] = 0$ for $n = 0$ b) $h[n] = 0$ for $n < 0$

c) $h[n] = 0$ for $n \neq 0$ d) $h[n] = 0$ for $n > 0$

12) The signal $u(t) - u(t-10)$ is _____

a) Periodic b) A periodic

c) Casual d) Aperiodic & casual

13) If $x[n] = \{1,2,3\}$ and $h[n] = \{3,4,5\}$ and $y[n] = x[n]^* h[n]$, the length of $y[n]$ is _____

a) 5 b) 6

c) 7 d) 3

14) Which of the following is the method used for reconstruction of signal from its samples?

a) Zero order hold b) Linear interpolation

c) Both a and b d) None of these

Set **Q**

S. Y. (B. Tech) (Sem - II) (New) (CBCS) Examination: March/April-2025
ELECTRONICS ENGGNIRING
Signals & Systems (BTN04401)

Day & Date: Monday 26-05-2025 Max. Marks: 56
Time: 10:00 AM To 01:00 PM

Instructions: 1) All questions are compulsory.
2) Figures to the right indicate full marks.
3) Assume Suitable data if required & state the assumptions.

Section – I

Q.2 Solve the following (Any Four) **16**

a) Obtain and sketch the even and odd parts of the discrete time signal $x[n]$ shown below

$$x[n] = \{5,2,1,4\}$$
$$\uparrow$$

b) Determine whether or not the following signals are periodic or not. If the signal is periodic determine the fundamental period.

i) $3\cos(3t + \pi/4)$

ii) $x[n] = \sin(2\pi n/5 + 2)$

c) Give expression for Exponential Fourier series & derive the expression for computing the coefficients a_0 and a_k of Exponential Fourier Series

d) If $u(t)$ is unit step signal and $\delta(t)$ is unit impulse sequence sketch & label following signals

i) $u(t+1)$

ii) $\delta(t+1) - \delta(t+2)$

iii) $u(t) + u(t-1)$

iv) $u(t) - u(t-2)$

e) Consider the signal $x(t)$ as given below.

$$x(t) = \begin{cases} 1 & 0 < t < 1 \\ -1 & 1 \leq t \leq 3 \end{cases}$$

Sketch and label following signals

i) $x(t+1)$

ii) $x(-t)$

iii) $x(t)u(t-1)$

Q.3 Solve the following (Any Two) **12**

a) Obtain the convolution sum of following signals

$x[n] = \{1,2,\}$ and $h[n] = \{3,2,1\}$

$\uparrow$ $\uparrow$

b) Determine the Exponential Fourier series representation for the following signals

$x(t)$ periodic with period 2 and

$$x(t) = \begin{cases} 1 & 0 < t < 1 \\ -1 & 1 \leq t \leq 2 \end{cases}$$

c) Consider the cascade connection of two LTI systems with impulse responses $h1(t)$ and $h2(t)$ where

$h1(t) = u(t-1)$ and $h2(t) = u(t)$

Compute the impulse response of overall system

Section – II

Q.4 Solve the following (Any Four) **16**

a) Explain in brief sample with zero order hold.

b) State the conditions for ROC of system function $H(z)$ of an LTI system for stable system. Obtain impulse response of system if following system is stable.

$$H(z) = \frac{z}{z-2} + \frac{z}{z-1/4}$$

c) The analog signal $x(t)$ is given below

$$x(t) = 3\sin(2000\pi t) + 10\cos(1400\pi t) - \sin(2500\pi t)$$

Calculate the Nyquist sampling rate for the signal. Also find the discrete time signal if sampled with $Fs = 3000\text{Hz}$

d) Given the Fourier transform of $x(t)$ as $X(j\omega)$, express the Fourier transform of following signal in terms of $X(j\omega)$ using the suitable properties of Fourier transform. State the properties used.

$$x1(t) = x(t-1)$$

e) State & prove following properties of continuous time Fourier transform

i) Time Shifting

ii) Time and frequency Scaling

Q.5 Solve the following (Any Two) **12**

a) State sampling theorem. Explain with suitable equations & diagrams how the original signal can be reconstructed from the samples using ideal low pass filter

b) Consider an LTI system with the system function

$$H(s) = \frac{s-1}{(s+1)(s-3)}$$

Obtain the impulse response $h(t)$ of the system and state the region of convergence of the system if the system is

i) casual

ii) anti casual & stable

c) Obtain the Fourier transform of following signals

i) $x(t) = e^{-3|t|}$

ii) $x(t) = \delta(t-3)$

S. Y. (B. Tech) (Sem - II) (New) (CBCS) Examination: March/April-2025
ELECTRONICS ENGGNIRING
Signals & Systems (BTN04401)

Day & Date: Monday 26-05-2025 Max. Marks: 70
Time: 10:00 AM To 01:00 PM

Instructions: 1) Q. No. 1 is compulsory. It should be solved in the first 30 minutes in Answer Book Page no 03 (Starting page of the Answer Book). Each question carries one mark.
2) Don't forget to Mention question paper set (P/Q/R/S) on top of page.
3) Figures to the right indicates full marks.
4) Make suitable assumptions if necessary and state them clearly.

MCQ/Objective Type Questions

Duration: 30 Minutes Marks:14

Q.1 Choose the correct Answer. **14**

1) A signal $x(t)$ is said to be even if _____
a) $x(t) = -x(t)$ b) $x(t) = x(-t)$
c) $x(t) = -x(-t)$ d) $-x(t) = x(-t)$

2) An LTI system is stable if and only if the ROC of its system function $H(z)$ _____
a) Exterior to a circle b) Interior of a circle
c) Includes unity circle d) None of these

3) If $X(\omega)$ is the Fourier transform of the signal $x(n)$, then what is the Fourier transform of the signal $x(n-k)$?
a) $e^{j\omega k}.X(-\omega)$ b) $e^{j\omega k}.X(\omega)$
c) $e^{-j\omega k}.X(-\omega)$ d) $e^{-j\omega k}.X(\omega)$

4) A function having frequency f is to be sampled. The sampling time T should be _____
a) $T = \frac{1}{2f}$ b) $T > \frac{1}{2f}$
c) $T < \frac{1}{2f}$ d) $T \geq \frac{1}{2f}$

5) The output of LTI system with input $x(t) = u(t)$ and impulse response $h(t) = \delta(t-1)$ is _____
a) $u(t)$ b) $u(t-1)$
c) $u(t-4)$ d) $\delta(t-2)$

6) A memory less system is also known as _____ System
a) Casual b) Static
c) Dynamic d) Non casual

7) Fourier transform of unity is _____.

a) $\delta(w)$ b) $\pi\,\delta(w)$

c) $2\pi\,\delta(w)$ d) Unit step signal

8) A discrete time LTI system is casual if _____

a) $h[n] = 0$ for $n = 0$ b) $h[n] = 0$ for $n < 0$

c) $h[n] = 0$ for $n \neq 0$ d) $h[n] = 0$ for $n > 0$

9) The signal $u(t) - u(t-10)$ is _____

a) Periodic b) A periodic

c) Casual d) Aperiodic & casual

10) If $x[n] = \{1,2,3\}$ and $h[n] = \{3,4,5\}$ and $y[n] = x[n]^* h[n]$, the length of $y[n]$ is _____

a) 5 b) 6

c) 7 d) 3

11) Which of the following is the method used for reconstruction of signal from its samples?

a) Zero order hold b) Linear interpolation

c) Both a and b d) None of these

12) What is the Nyquist frequency for the signal $x(t) = 3\cos 50\,\pi t + 10\sin 300\pi t - \cos 100\pi t$?

a) 50Hz b) 100Hz

c) 200Hz d) 300Hz

9) The DC coefficient a_0 for the signal $x(t) = 5\cos(2t)$ is _____

a) 2 b) 5

c) 0 d) None of these

10) A system is having impulse response $h(t)$ will be BIBO stable if _____

a) $\int_{-\infty}^{\infty} |h(t)| > \infty$ b) $\int_{-\infty}^{\infty} |h(t)| < \infty$

c) $\int_{-\infty}^{\infty} |h(t)| = 0$ d) $\int_{-\infty}^{\infty} |h(t)| = 1$

MCQ/Objective Type Questions

Duration: 30 Minutes Marks:14

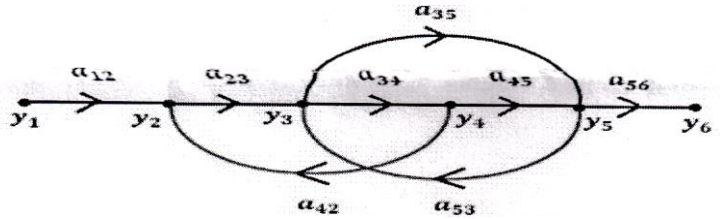
Q.1 Tick marks the correct answer: 14

1) The output of the closed loop control systems is the function of _____.
a) Input b) Output
c) Input and feedback signal d) Output and feedback signal

2) A stepping motor is a _____ device.
a) mechanical b) electrical
c) analogue d) incremental

3) Which of the following synchro's are used for error detection in a servo control system?
a) control transmitter b) control transformer
c) control receiver d) both (a) and (b)

4) The _____ number of forward paths and number of loops _____ are present in given SFG.



a) 2, 2 b) 2, 3
c) 1, 2 d) 1, 3

5) Loops which do not possess any common node are called as _____.
a) Forward loops b) Feedback loops
c) Touching loops d) Nontouching loops

6) A control system having damping factor between 0 and 1, will give ____.
a) Critically damped response b) Underdamped response
c) Undamped response d) No response

7) As type of system is increased _____.
a) More errors are eliminated b) More errors are introduced
c) there is no effect on errors d) none of these

8) The phase lead compensation is used to _____.
a) Increase rise time and decrease overshoot
b) Decrease both rise time and overshoot
c) Increase both rise time and overshoot
d) Decrease rise time and increase overshoot

9) Bandwidth is increased when compensator used is _____.
a) Lead b) Lag
c) Lag-Lead d) None of these

10) Consider the loop transfer function $\frac{K(s+4)}{(s+3)(s+3)}$ in the root locus diagram the centroid will be located at _____.
a) -4 b) -1
c) -2 d) -3

11) The gain margin of a system is 0dB. It represents a _____.
a) stable system b) unstable system
c) marginally stable systems d) conditionally stable system

12) At the gain crossover frequency $|G(j\omega)H(j\omega)| =$ _____.
a) 0db b) 1dB
c) -20dB d) 20dB

13) At which frequency does the magnitude of the system becomes zero dB?
a) Resonant frequency b) Cut-off frequency
c) Gain crossover frequency d) Phase crossover frequency

14) The phase margin of a system is 0^0. It represents a _____.
a) stable system b) unstable system
c) marginally stable systems d) conditionally stable system

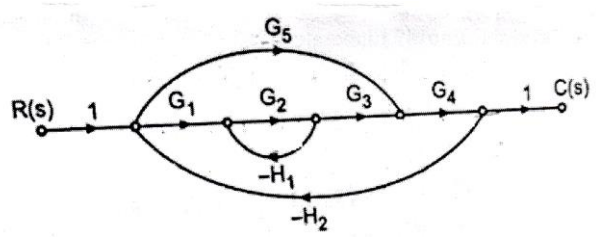
Q.2 Solve: (Any Four) **16**

a) Using Masons gain formula find the gain of the following system



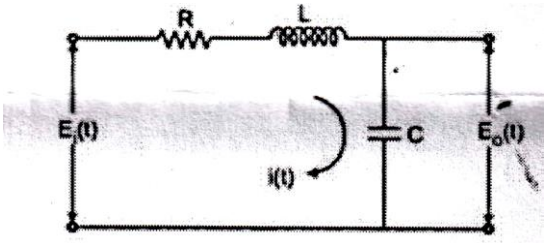
b) A unity feedback control system has $G(S) = \frac{24(s+1)}{s(s+3)(s+4)}$ Determine

i) Type of system
ii) All error coefficients
iii) Error for ramp input with magnitude 4.

c) Derive the expressions of steady state error for Type 0, Type 1 system for step input.

d) Describe construction and working of permanent magnet stepper motor.

e) Determine transfer function of following electrical system.

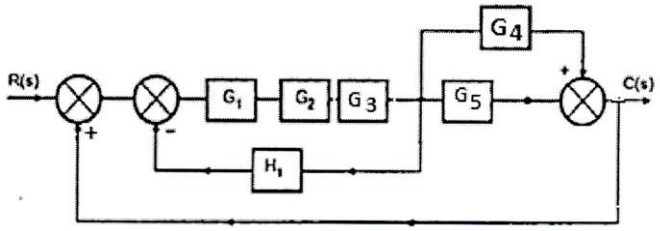


Q.3 Solve: (Any Two) **12**

a) Derive transfer function of armature controlled D.C servometer. Prove that it acts as a closed loop system.

b) A second order system is given by $\frac{C(S)}{R(S)} = \frac{25}{(s^2+6s+25)}$
Find its rise time, percentage over shoot, peak time and settling time.

c) Obtain transfer function for the given system by using block diagram reduction technique.



Section – II

Q.4 Attempt the following. (Any Four) **16**

a) What do you mean by proportional control? Elaborate effect of proportional controller on the performance of system.

b) What is polar plot? Sketch polar plot for Type two system.

c) Consider characteristics equation $s^5 + s^4 + 3s^3 + 2s^2 + 6s + 25 = 0$. Determine stability using Rouths's criterion.

d) Explain frequency domain specifications.

e) Consider a system $G(s)H(s) = \frac{K}{S(S+4)}$ Test a point $S = -3 + j6$ for its existence on root locus and also find corresponding K.

Q.5 Attempt the following. (Any Two) **12**

a) Sketch root locus for system $G(s)H(s) = \frac{K}{s(s+2)(s+4)}$ Comment on stability.

b) A feedback system has $G(s)H(s) = \frac{600(s+4)}{s^2(s+8)(s+24)}$ Sketch the Bode plot and comment on stability.

c) What is compensator? Derive transfer function of lag lead compensator and also explain its polar plot.

3) Consider the loop transfer function $\frac{K(s+4)}{(s+3)(s+3)}$ in the root locus diagram the centroid will be located at _____.
a) -4 b) -1
c) -2 d) -3

4) The gain margin of a system is 0dB. It represents a _____.
a) stable system b) unstable system
c) marginally stable systems d) conditionally stable system

5) At the gain crossover frequency $|G(j\omega)H(j\omega)| =$ _____.
a) 0db b) 1dB
c) -20dB d) 20dB

6) At which frequency does the magnitude of the system becomes zero dB?
a) Resonant frequency b) Cut-off frequency
c) Gain crossover frequency d) Phase crossover frequency

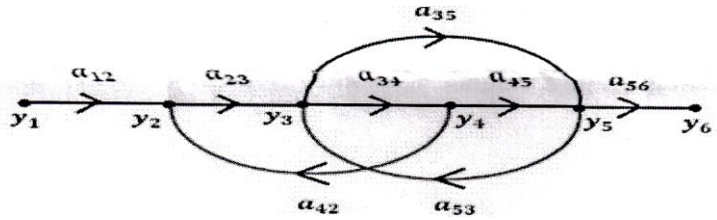
7) The phase margin of a system is 0^0. It represents a _____.
a) stable system b) unstable system
c) marginally stable systems d) conditionally stable system

8) The output of the closed loop control systems is the function of _____.
a) Input b) Output
c) Input and feedback signal d) Output and feedback signal

9) A stepping motor is a _____ device.
a) mechanical b) electrical
c) analogue d) incremental

10) Which of the following synchro's are used for error detection in a servo control system?
a) control transmitter b) control transformer
c) control receiver d) both (a) and (b)

11) The _____ number of forward paths and number of loops _____ are present in given SFG.



a) 2, 2 b) 2, 3
c) 1, 2 d) 1, 3

12) Loops which do not possess any common node are called as _____.
a) Forward loops b) Feedback loops
c) Touching loops d) Nontouching loops

13) A control system having damping factor between 0 and 1, will give ____.
a) Critically damped response b) Underdamped response
c) Undamped response d) No response

14) As type of system is increased _____.
a) More errors are eliminated b) More errors are introduced
c) there is no effect on errors d) none of these

Seat No.	

Set **Q**

S.Y (B.Tech.) (Sem - II) (New) (CBCS) Examination: March/April-2025
ELECTRONICS ENGINEERING
Control Systems (BTN04402)

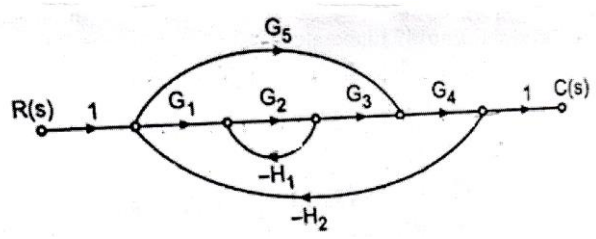
Day & Date: Wednesday 28-05-2025 Max. Marks: 56
Time: 10:00 AM To 01:00 PM

Instructions: 1) All questions are compulsory.
2) Figures to right indicate maximum marks.
3) Assume suitable data if required.

Section – I

Q.2 Solve: (Any Four) **16**

a) Using Masons gain formula find the gain of the following system



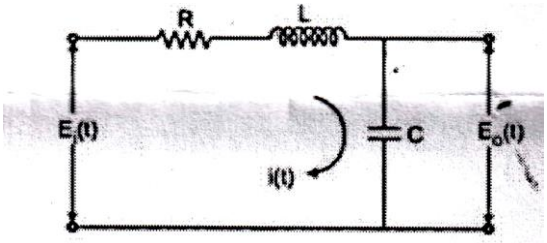
b) A unity feedback control system has $G(S) = \frac{24(s+1)}{s(s+3)(s+4)}$ Determine

i) Type of system
ii) All error coefficients
iii) Error for ramp input with magnitude 4.

c) Derive the expressions of steady state error for Type 0, Type 1 system for step input.

d) Describe construction and working of permanent magnet stepper motor.

e) Determine transfer function of following electrical system.

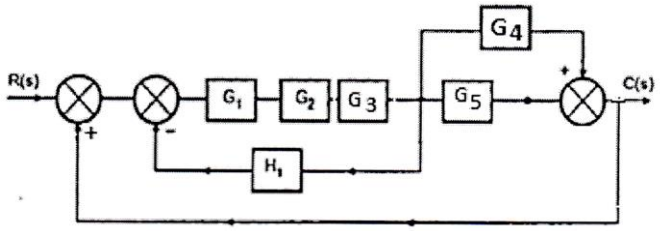


Q.3 Solve: (Any Two) **12**

a) Derive transfer function of armature controlled D.C servometer. Prove that it acts as a closed loop system.

b) A second order system is given by $\frac{C(S)}{R(S)} = \frac{25}{(s^2+6s+25)}$
Find its rise time, percentage over shoot, peak time and settling time.

c) Obtain transfer function for the given system by using block diagram reduction technique.



Section – II

Q.4 Attempt the following. (Any Four) **16**

a) What do you mean by proportional control? Elaborate effect of proportional controller on the performance of system.

b) What is polar plot? Sketch polar plot for Type two system.

c) Consider characteristics equation $s^5 + s^4 + 3s^3 + 2s^2 + 6s + 25 = 0$. Determine stability using Rouths's criterion.

d) Explain frequency domain specifications.

e) Consider a system $G(s)H(s) = \frac{K}{S(S+4)}$ Test a point $S = -3 + j6$ for its existence on root locus and also find corresponding K.

Q.5 Attempt the following. (Any Two) **12**

a) Sketch root locus for system $G(s)H(s) = \frac{K}{s(s+2)(s+4)}$ Comment on stability.

b) A feedback system has $G(s)H(s) = \frac{600(s+4)}{s^2(s+8)(s+24)}$ Sketch the Bode plot and comment on stability.

c) What is compensator? Derive transfer function of lag lead compensator and also explain its polar plot.

Control Systems (BTN04402)

Day & Date: Wednesday 28-05-2025 Max. Marks: 70
Time: 10:00 AM To 01:00 PM

Instructions: 1) Q. No. 1 is compulsory. It should be solved in the first 30 minutes in Answer Book Page no 03 (Starting page of the Answer Book). Each Question carries one mark.
2) Don't forget to Mention question paper set (P/Q/R/S) on top of page.
3) Figures to the right indicates full marks.
4) Assume suitable data if required.

MCQ/Objective Type Questions

Duration: 30 Minutes Marks:14

Q.1 Tick marks the correct answer: 14

1) The gain margin of a system is 0dB. It represents a _____.
a) stable system b) unstable system
c) marginally stable systems d) conditionally stable system

2) At the gain crossover frequency $|G(j\omega)H(j\omega)| =$ _____.
a) 0db b) 1dB
c) -20dB d) 20dB

3) At which frequency does the magnitude of the system becomes zero dB?
a) Resonant frequency b) Cut-off frequency
c) Gain crossover frequency d) Phase crossover frequency

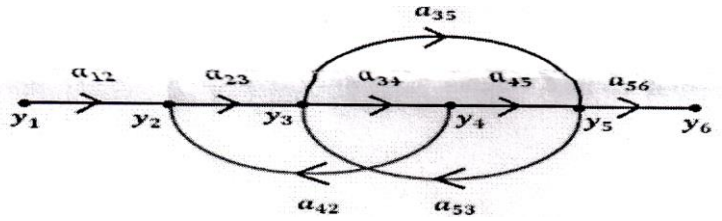
4) The phase margin of a system is 0^0. It represents a _____.
a) stable system b) unstable system
c) marginally stable systems d) conditionally stable system

5) The output of the closed loop control systems is the function of _____.
a) Input b) Output
c) Input and feedback signal d) Output and feedback signal

6) A stepping motor is a _____ device.
a) mechanical b) electrical
c) analogue d) incremental

7) Which of the following synchro's are used for error detection in a servo control system?
a) control transmitter b) control transformer
c) control receiver d) both (a) and (b)

8) The _____ number of forward paths and number of loops _____ are present in given SFG.



a) 2, 2 b) 2, 3
c) 1, 2 d) 1, 3

9) Loops which do not possess any common node are called as _____.
a) Forward loops b) Feedback loops
c) Touching loops d) Nontouching loops

10) A control system having damping factor between 0 and 1, will give ____.
a) Critically damped response b) Underdamped response
c) Undamped response d) No response

11) As type of system is increased _____.
a) More errors are eliminated b) More errors are introduced
c) there is no effect on errors d) none of these

12) The phase lead compensation is used to _____.
a) Increase rise time and decrease overshoot
b) Decrease both rise time and overshoot
c) Increase both rise time and overshoot
d) Decrease rise time and increase overshoot

13) Bandwidth is increased when compensator used is _____.
a) Lead b) Lag
c) Lag-Lead d) None of these

14) Consider the loop transfer function $\frac{K(s+4)}{(s+3)(s+3)}$ in the root locus diagram the centroid will be located at _____.
a) -4 b) -1
c) -2 d) -3

4) Assume suitable data if necessary.

MCQ/Objective Type Questions

Duration: 30 Minutes Marks:14

Q.1 Choose the correct Answer. **14**

1) Pushing an element into stack already having five elements and stack size of 5, then stack becomes _____.
a) Overflow b) Crash
c) Underflow d) User flow

2) In linked list implementation of a queue, from where is the item deleted?
a) At the tail of the link list
b) At the centre position in the link list
c) At the head of link list
d) None of the mentioned

3) What is the need for a circular queue?
a) effective usage of memory b) easier computations
c) all of the mentioned d) none of the mentioned

4) The result of evaluating the postfix expression 5, 4, 6, +, *, 4, 9, 3, /, +, * is?
a) 600 b) 350
c) 650 d) 588

5) In linked list each node contains minimum of two fields. One field is data field to store the data second field is?
a) Pointer to character b) Pointer to integer
c) Pointer to node d) Node

6) Which of these is an application of linked lists?
a) To implement file systems
b) For separate chaining in hash-tables
c) To implement non-binary trees
d) All of the mentioned

7) Which of the following statements is true?
a) Recursion is always better than iteration
b) Recursion uses more memory compared to iteration
c) Recursion uses less memory compared to iteration
d) Iteration is always better and simpler than recursion

8) The number of edges from the root to the node is called _____ of the tree.
a) Height b) Depth
c) Length d) None of the mentioned

9) What is a hash function?
a) A function has allocated memory to keys
b) A function that computes the location of the key in the array
c) A function that creates an array
d) None of the mentioned

10) Binary Search can be categorized into which of the following?
a) Brute Force technique b) Divide and conquer
c) Greedy algorithm d) Dynamic programming

11) What is the worst case for linear search?
a) O(nlogn) b) O(logn)
c) O(n) d) O(1)

12) What is the specialty about the inorder traversal of a binary search tree?
a) It traverses in a non increasing order
b) It traverses in an increasing order
c) It traverses in a random fashion
d) None of the mentioned

13) The number of elements in the adjacency matrix of a graph having 7 vertices is _____.
a) 7 b) 14
c) 36 d) 49

14) Which traversal algorithm is typically implemented using a stack data structure?
a) Depth First Search b) Breadth First Search
c) Both a) and b) d) Neither a) nor b)

3) Assume suitable data if necessary.

Section – I

Q.2 Attempt any four: **16**

a) What is Avail List? Elaborate with getnode and freenode algorithm.
b) Convert the following infix expression to postfix expression using stack:
(A + B) / (C - D) + E
c) Define queue. Explain the different type of queues with suitable diagram.
d) Write a C program to find the factorial of a number with recursive functions.
e) Explain the addition of two polynomials using linked list.

Q.3 Attempt any two: **12**

a) Evaluate the following postfix expression using stack.
1) 9, 2, 3, +, -, 4, /
2) 6, 2, 2, *, +, 2, /
b) Draw the recursive flowchart. Write a C program to find the multiplication of two numbers with recursive functions.
c) Write a ‘C’ program to implement circular queue using array to perform the operations like enq, deq and display the elements of a queue.

Section – II

Q.4 Attempt any four: **16**

a) Define the following terms of tree:
1) Siblings
2) Leaf node
3) Root node
4) Parent node
b) Explain the algorithm of linear search with example.
c) Explain any two hashing functions with example.
d) Describe the adjacency matrix representation of a graph with example.
e) Explain bubble sort method. Sort the following using bubble sort and show all the iterations.
25, 22,16, 42, 32

Q.5 Attempt any two: **12**

a) What are the different tree traversal methods? Elaborate it with example.

b) Explain any one graph traversal method with flowchart and example.

c) Explain quick sort? Sort the following sequence in ascending order using quick sort.
48, 44, 19, 59, 72, 80, 42, 65, 83, 18, 95, 68

c) At the head of link list
d) None of the mentioned

7) What is the need for a circular queue?
a) effective usage of memory b) easier computations
c) all of the mentioned d) none of the mentioned

8) The result of evaluating the postfix expression 5, 4, 6, +, *, 4, 9, 3, /, +, * is?
a) 600 b) 350
c) 650 d) 588

9) In linked list each node contains minimum of two fields. One field is data field to store the data second field is?
a) Pointer to character b) Pointer to integer
c) Pointer to node d) Node

10) Which of these is an application of linked lists?
a) To implement file systems
b) For separate chaining in hash-tables
c) To implement non-binary trees
d) All of the mentioned

11) Which of the following statements is true?
a) Recursion is always better than iteration
b) Recursion uses more memory compared to iteration
c) Recursion uses less memory compared to iteration
d) Iteration is always better and simpler than recursion

12) The number of edges from the root to the node is called _____ of the tree.
a) Height b) Depth
c) Length d) None of the mentioned

13) What is a hash function?
a) A function has allocated memory to keys
b) A function that computes the location of the key in the array
c) A function that creates an array
d) None of the mentioned

14) Binary Search can be categorized into which of the following?
a) Brute Force technique b) Divide and conquer
c) Greedy algorithm d) Dynamic programming

S. Y. (B. Tech.) (Sem-II) (New) (CBCS) Examination: March/April-2025
ELECTRONICS ENGINEERING
Data Structures and Algorithms (BTN04405)

Day & Date: Friday 30-05-2025 Max. Marks: 56
Time: 10:00 AM To 01:00 PM

Instructions: 1) All questions are compulsory.
2) Figures to the right indicate full marks.
3) Assume suitable data if necessary.

Section – I

Q.2 Attempt any four: **16**

a) What is Avail List? Elaborate with getnode and freenode algorithm.
b) Convert the following infix expression to postfix expression using stack:
(A + B) / (C - D) + E
c) Define queue. Explain the different type of queues with suitable diagram.
d) Write a C program to find the factorial of a number with recursive functions.
e) Explain the addition of two polynomials using linked list.

Q.3 Attempt any two: **12**

a) Evaluate the following postfix expression using stack.
1) 9, 2, 3, +, -, 4, /
2) 6, 2, 2, *, +, 2, /
b) Draw the recursive flowchart. Write a C program to find the multiplication of two numbers with recursive functions.
c) Write a ‘C’ program to implement circular queue using array to perform the operations like enq, deq and display the elements of a queue.

Section – II

Q.4 Attempt any four: **16**

a) Define the following terms of tree:
1) Siblings
2) Leaf node
3) Root node
4) Parent node
b) Explain the algorithm of linear search with example.
c) Explain any two hashing functions with example.
d) Describe the adjacency matrix representation of a graph with example.
e) Explain bubble sort method. Sort the following using bubble sort and show all the iterations.
25, 22,16, 42, 32

Q.5 Attempt any two: **12**

a) What are the different tree traversal methods? Elaborate it with example.

b) Explain any one graph traversal method with flowchart and example.

c) Explain quick sort? Sort the following sequence in ascending order using quick sort.
48, 44, 19, 59, 72, 80, 42, 65, 83, 18, 95, 68

Day & Date: Friday 30-05-2025 Max. Marks: 70
Time: 10:00 AM To 01:00 PM

Instructions: 1) Q. No. 1 is compulsory. It should be solved in the first 30 minutes in Answer Book Page no 03 (Starting page of the Answer Book). Each question carries one mark.
2) Don't forget to Mention question paper set (P/Q/R/S) on top of page.
3) Figures to the right indicates full marks.
4) Assume suitable data if necessary.

MCQ/Objective Type Questions

Duration: 30 Minutes Marks:14

Q.1 Choose the correct Answer. **14**

1) Which of these is an application of linked lists?
a) To implement file systems
b) For separate chaining in hash-tables
c) To implement non-binary trees
d) All of the mentioned

2) Which of the following statements is true?
a) Recursion is always better than iteration
b) Recursion uses more memory compared to iteration
c) Recursion uses less memory compared to iteration
d) Iteration is always better and simpler than recursion

3) The number of edges from the root to the node is called _____ of the tree.
a) Height b) Depth
c) Length d) None of the mentioned

4) What is a hash function?
a) A function has allocated memory to keys
b) A function that computes the location of the key in the array
c) A function that creates an array
d) None of the mentioned

5) Binary Search can be categorized into which of the following?
a) Brute Force technique b) Divide and conquer
c) Greedy algorithm d) Dynamic programming

6) What is the worst case for linear search?
a) O(nlogn) b) O(logn)
c) O(n) d) O(1)

7) What is the specialty about the inorder traversal of a binary search tree?
a) It traverses in a non increasing order
b) It traverses in an increasing order
c) It traverses in a random fashion
d) None of the mentioned

8) The number of elements in the adjacency matrix of a graph having 7 vertices is _____.
a) 7 b) 14
c) 36 d) 49

9) Which traversal algorithm is typically implemented using a stack data structure?
a) Depth First Search b) Breadth First Search
c) Both a) and b) d) Neither a) nor b)

10) Pushing an element into stack already having five elements and stack size of 5, then stack becomes _____.
a) Overflow b) Crash
c) Underflow d) User flow

11) In linked list implementation of a queue, from where is the item deleted?
a) At the tail of the link list
b) At the centre position in the link list
c) At the head of link list
d) None of the mentioned

12) What is the need for a circular queue?
a) effective usage of memory b) easier computations
c) all of the mentioned d) none of the mentioned

13) The result of evaluating the postfix expression 5, 4, 6, +, *, 4, 9, 3, /, +, * is?
a) 600 b) 350
c) 650 d) 588

14) In linked list each node contains minimum of two fields. One field is data field to store the data second field is?
a) Pointer to character b) Pointer to integer
c) Pointer to node d) Node

MCQ/Objective Type Questions

Duration: 30 Minutes Marks:14

Q.1 Choose the correct Answer. **14**

1) The OP-AMP is basically _____ amplifier.
a) Voltage b) Current
c) Power d) Trans resistance

2) The type of feedback used in closed loop inverting amplifier is _____.
a) Voltage series b) Current series
c) Current shunt d) Voltage shunt

3) I to V converter is special case of _____ amplifier.
a) Non-inverting b) Inverting
c) Differential d) Scaling

4) For IC 741 maximum Input bias current at supply voltage ±15 volts dc is _____.
a) 75 nA b) 100 nA
c) 750 nA d) 500 nA

5) The level shifting stage of Operational amplifier is used to _____.
a) Increase voltage level b) Reduce voltage to zero
c) Increase current level d) None of these

6) Slew rate for op-amp is considered for _____.
a) AC applications b) DC applications
c) Both a & b d) None of these

7) Zero crossing detector is special case of _____.
a) Schmitt trigger b) Peak detector
c) Basic comparator d) Window detector

8) OP-AMP Non inverting buffer is nothing but _____.

a) Inverter
b) Voltage follower
c) Comparator
d) Differentiator

9) The output voltage of op-amp triangular wave generator decreases with _____ frequency.

a) Increase in
b) Decrease in
c) constant
d) Can't say

10) What will be the frequency of output waveform of a square wave generator if R2 = 1.16 R1?

a) $\text{fo} = (1/2\text{RC})$
b) $\text{fo} = (\text{In}/2\text{RC})$
c) $\text{fo} = (\text{In}/2 \times \sqrt{\text{RC}})$
d) $\text{fo} = (\text{In}/(2\sqrt{\text{RC}}))$

11) For Wien bridge oscillator if Fo = 965Hz & C =0.05 μF then R=?

a) $10\ \text{k}\Omega$
b) $3.3\ \text{k}\Omega$
c) $1\ \text{k}\Omega$
d) $15.9\ \text{k}\Omega$

12) Square wave generator is also called as _____.

a) Astable Multivibrator
b) Monostable Multivibrator
c) Bistable Multivibrator
d) None of these

13) Select advantages of Active Filter from following: _____.

a) Frequency adjustment flexibility
b) Gain adjustment flexibility
c) No loading effect
d) All of mentioned

14) In phase shift oscillator _____ RC cascaded networks act as feedback circuit.

a) 2
b) 4
c) 3
d) 1

Instructions: 1) All questions are compulsory.
2) Figures to the right indicate full marks.
3) Assume suitable data if necessary.
4) Draw neat diagram wherever necessary.

Section – I

Q.2 Attempt any Four **16**

a) Define CMRR. How to improve CMRR?
b) Derive equation for ideal voltage gain of non-inverting amplifier using virtual ground concept.
c) Define the following electrical parameters of IC 741 with practical & ideal values:
1) Input Offset Current
2) Total output offset voltage
3) Thermal Drift
4) PSRR
d) Explain differentiator and its frequency response.
e) Explain the concept of grounded load V-I converter.

Q.3 Attempt any two. **12**

a) Derive expressions for differential voltage gain. R_{in} and R_{out} for DIBO differential amplifier using AC equivalent circuit.
b) Determine the slew rate of a frequency compensated OP-AMP at room temperature, which has a unity cross-over frequency of 5MHz (Assume V_m = 1 V).
c) Draw high frequency equivalent circuit of op-amp & obtain expression for $A_{OL(f)}$ open loop gain as function of frequency.

Section – II

Q.4 Attempt any Four. **16**

a) Explain with neat diagram operation of OP-AMP as Comparator.
b) Explain with neat diagram the basic concept of antilog amplifier using transistor.
c) What are the design procedures for a first order low pass filter.
d) Explain the concept of Wien Bridge Oscillator with neat diagrams.
e) Explain R -2R Ladder DAC technique with circuit diagram & waveforms.

Q.5 Attempt any two. **12**

a) Explain the concept of positive and negative clippers.

b) Design a second order low-pass filter for a cut-off frequency of 1 kHz with a pass band gain of 1.586
(Assume $C_2 = C_3 = 0.005\mu F$ and $R_1 = 33k\Omega$).

c) Explain the operation of Successive Approximation ADC with neat diagrams.

- b) Current
- c) Power
- d) Trans resistance

11) The type of feedback used in closed loop inverting amplifier is _____.
- a) Voltage series
- b) Current series
- c) Current shunt
- d) Voltage shunt

12) I to V converter is special case of _____ amplifier.
- a) Non-inverting
- b) Inverting
- c) Differential
- d) Scaling

13) For IC 741 maximum Input bias current at supply voltage ±15 volts dc is _____.
- a) 75 nA
- b) 100 nA
- c) 750 nA
- d) 500 nA

14) The level shifting stage of Operational amplifier is used to _____.
- a) Increase voltage level
- b) Reduce voltage to zero
- c) Increase current level
- d) None of these

S. Y. (B. Tech.) (Sem-II) (New) (CBCS) Examination: March/April-2025
ELECTRONICS ENGINEERING
Analog Integrated Circuits (BTN04403)

Day & Date: Tuesday, 03-June-2025 Max. Marks: 56
Time: 10:00 AM To 01:00 PM

Instructions: 1) All questions are compulsory.
2) Figures to the right indicate full marks.
3) Assume suitable data if necessary.
4) Draw neat diagram wherever necessary.

Section – I

Q.2 Attempt any Four **16**

a) Define CMRR. How to improve CMRR?
b) Derive equation for ideal voltage gain of non-inverting amplifier using virtual ground concept.
c) Define the following electrical parameters of IC 741 with practical & ideal values:
1) Input Offset Current
2) Total output offset voltage
3) Thermal Drift
4) PSRR
d) Explain differentiator and its frequency response.
e) Explain the concept of grounded load V-I converter.

Q.3 Attempt any two. **12**

a) Derive expressions for differential voltage gain. R_{in} and R_{out} for DIBO differential amplifier using AC equivalent circuit.
b) Determine the slew rate of a frequency compensated OP-AMP at room temperature, which has a unity cross-over frequency of 5MHz (Assume V_m = 1 V).
c) Draw high frequency equivalent circuit of op-amp & obtain expression for $A_{OL(f)}$ open loop gain as function of frequency.

Section – II

Q.4 Attempt any Four. **16**

a) Explain with neat diagram operation of OP-AMP as Comparator.
b) Explain with neat diagram the basic concept of antilog amplifier using transistor.
c) What are the design procedures for a first order low pass filter.
d) Explain the concept of Wien Bridge Oscillator with neat diagrams.
e) Explain R -2R Ladder DAC technique with circuit diagram & waveforms.

Q.5 Attempt any two. **12**

a) Explain the concept of positive and negative clippers.

b) Design a second order low-pass filter for a cut-off frequency of 1 kHz with a pass band gain of 1.586
(Assume $C_2 = C_3 = 0.005\mu F$ and $R_1 = 33k\Omega$).

c) Explain the operation of Successive Approximation ADC with neat diagrams.

S.Y. (B. Tech.) (Sem-II) (New) (CBCS) Examination: March/April-2025
ELECTRONICS ENGINEERING
Computational Statistics (BTN04407)

Day & Date: Monday, 09-June-2025 Max. Marks: 70
Time: 10:00 AM To 01:00 PM

Instructions: 1) Q. No. 1 is compulsory. It should be solved in the first 30 minutes in Answer Book Page no 03 (Starting page of the Answer Book). Each question carries one mark.
2) Don't forget to Mention question paper set (P/Q/R/S) on top of page.
3) Figures to the right indicates full marks.
4) Assume suitable data if required.

MCQ/Objective Type Questions

Duration: 30 Minutes Marks:14

Q.1 Choose the correct Answer. **14**

1) Three companies A, B and C supply 25%, 35% and 40% of the notebooks to a school. Past experience shows that 5%, 4% and 2% of the notebooks produced by these companies are defective. If a notebook was found to be defective, what is the probability that the notebook was supplied by A?

a) $^{44}/_{69}$ b) $^{25}/_{69}$

c) $^{13}/_{24}$ d) $^{11}/_{24}$

2) What is the probability of getting a number greater than 6 on dice?

a) 1 b) 1/3

c) $^{1}/_{2}$ d) 0

3) ____ is an incredibly powerful tool for analyzing data.

a) Linear regression b) Logistic regression

c) Gradient Descent d) Greedy algorithms

4) In syntax of linear model 1m(formula, data,), data refers to ____.

a) Matrix b) Vector

c) Array d) List

5) The matrix which follows the conditions m=n is called?

a) Square matrix b) Rectangular matrix

c) Scalar matrix d) Diagonal matrix

6) How many coefficients do you need to estimate in a simple linear regression model (One independent variable)?

a) 1 b) 2

c) 3 d) 4

7) How many outcomes are possible when drawing a card from deck of cards?

a) 1 b) 13
c) 52 d) 26

8) PCA reduce dimensionality of the data using feature extraction.

a) True b) False

9) If machine learning model output doesn't involve target variable, then that model is called as ____.

a) predictive model b) descriptive model
c) reinforcement learning d) all of the above

10) Identify the kind of learning algorithm for “facial identities for facial expressions”.

a) Prediction b) Pattern recognition
c) Recognize anomalies d) Generating Pattern

11) Identify the type of learning in which labelled training data is used.

a) Semi supervised b) Supervised learning
c) Reinforcement learning d) Unsupervised learning

12) Which of the following are common classes of problems in machine learning?

a) Regression b) Classification
c) Clustering d) All of above

13) Choose a disadvantage of decision trees among the following.

a) Decision trees are robust to outliers
b) Factor analysis
c) Decision trees are prone to overfit
d) All of above

14) What will happen when eigenvalues are roughly equal?

a) PCA will perform outstandingly b) PCA will perform badly
c) Can't Say d) None of above

2) Figures to the right indicate full marks.

SECTION - I

Q.2 Solve the following questions. (Any Four) **16**

a) Define the following terms:
i) Learning
ii) LMS weight update rule
iii) Consistent Hypothesis
iv) General Boundary

b) Explain various rules in probability with proper example

c) Explain Gaussian process with example.

d) Write note of Problem Formulation

e) Differentiate between regression and classification.

Q.3 Solve the following questions. (Any Two) **12**

a) Enlist & explain steps involved in development of regression model.

b) Write short note on construction of probability space. Explain Discrete and Continuous Probabilities.

c) Develop procedure in parameter estimation for Bayesian parameter estimation.

SECTION - II

Q.4 Solve the following questions. (Any Four) **16**

a) Differentiate between Supervised, Unsupervised in detail.

b) Explain overfitting and under fitting with an example.

c) What is training data, labeled data & unlabeled data? What are key steps involved in developing training data?

d) Explain curse of dimensionality with suitable diagram.

e) What are the basic design issues and approaches to machine learning?

Q.5 Solve the following questions. (Any Two) **12**

a) What do you mean by a well-posed learning problem? Explain the important features that are required to well-define a learning problem.

b) Write a note on Decision theory and Information Theory.

c) What is principal component analysis? Explain the sort of problems you would use PCA for? Also explain its limitations as a method.

MCQ/Objective Type Questions

Duration: 30 Minutes Marks:14

Q.1 Choose the correct Answer. **14**

1) DDL stands for ____.
a) Data declaration language
b) Declaration data language
c) Document declaration language
d) Data definition language

2) _____ operation can be visualized as a horizontal partition of the relation into two set of tuples.
a) JOIN b) PARTITION
c) SELECT d) PROJECT

3) 'AS' clause is used in SQL for ____.
a) selection b) rename
c) join d) projection

4) What key links records from one database table to a record or records in another database table?
a) Primary key b) Principal Key
c) Foreign key d) Link key

5) Which of the following contains information about the structure of a database?
a) Database management system
b) Data dictionary
c) Data repository
d) Data warehouse

6) The language which has recently become the defacto standard for interfacing application programs with relational database system is _____.
a) Oracle b) SQL
c) DBase d) 4GL

7) By normalizing relations or sets of relations, one minimizes ____.
a) Data b) Fields
c) Redundancy d) Database

8) Which of the following is a type of Normal Form?
a) ACNF b) BCNF
c) CCNF d) DCNF

9) Domain constraints, functional dependency and referential integrity are special forms of ____.
a) Foreign key b) Primary key
c) Assertion d) Referential constraint

10) The database administrator who authorizes all the new users, modifies the database, and takes grants privilege is ____.
a) Super user b) Administrator
c) Operator of operating system d) All

11) If we wish to grant a privilege and to allow the recipient to pass the privilege on to other users, we append the ____ clause to the appropriate grant command.
a) With grant b) Grant user
c) Grant pass privilege d) With grant option

12) Which of the following is the syntax for views where v is view name?
a) Create view v as “query name”;
b) Create “query expression” as view;
c) Create view v as “query expression”;
d) Create view “query expression”;

13) Key value pairs are usually seen in ____.
a) Hash tables b) Heaps
c) Both Hash tables and Heaps d) Skip list

6) Key value pairs are usually seen in ____.
a) Hash tables b) Heaps
c) Both Hash tables and Heaps d) Skip list

7) A system is in a ____ state if there exists a set of transactions such that every transaction in the set is waiting for another transaction in the set.

a) Idle b) Waiting
c) Deadlock d) Ready

8) DDL stands for ____.

a) Data declaration language
b) Declaration data language
c) Document declaration language
d) Data definition language

9) _____ operation can be visualized as a horizontal partition of the relation into two set of tuples.

a) JOIN b) PARTITION
c) SELECT d) PROJECT

10) 'AS' clause is used in SQL for ____.

a) selection b) rename
c) join d) projection

11) What key links records from one database table to a record or records in another database table?

a) Primary key b) Principal Key
c) Foreign key d) Link key

12) Which of the following contains information about the structure of a database?

a) Database management system
b) Data dictionary
c) Data repository
d) Data warehouse

13) The language which has recently become the defacto standard for interfacing application programs with relational database system is _____.

a) Oracle b) SQL
c) DBase d) 4GL

14) By normalizing relations or sets of relations, one minimizes ____.

a) Data b) Fields
c) Redundancy d) Database

Seat No.	

Set **Q**

S.Y. (B. Tech) (Sem-II) (New) (CBCS) Examination: March/April-2025
ELECTRONICS ENGINEERING
Database Management Systems (BTN04408)

Day & Date: Monday, 09-June-2025 Max. Marks: 56
Time: 10:00 AM To 01:00 PM

Instructions: 1) All questions are compulsory.
2) Figures to the right indicate full marks.

Section - I

Q.2 Solve the following: (Any Four) **16**

a) What is DBMS? And which are the application database system?
b) Which are the constraints in DBMS explain with example.
c) Explain Relational Query languages.
d) What are the different design issues in ER model?
e) Explain view in SQL with example.

Q.3 Solve the following: (Any Two) **12**

a) Which are the types of Database Languages? Explain with its commands.
b) Explain Basic SQL clauses.
c) Explain Extended Relational Algebra operation with example.

Section - II

Q.4 Attempt the following: (Any Four) **16**

a) Write a short note on Nested subqueries with example.
b) Explain Atomic Domains.
c) Explain ordered indices in detail.
d) Explain the transaction states with neat diagram.
e) What is functional dependency? Give example.

Q.5 Attempt the following: (Any Two) **12**

a) List the different Aggregate operations in SQL? Explain any 3 Aggregate operations with queries.
b) Differentiate between B+ tree and B tree index files.
c) Explain Time stamp ordering protocol with example.

Seat No.	

Set **R**

S.Y. (B. Tech) (Sem-II) (New) (CBCS) Examination: March/April-2025
ELECTRONICS ENGINEERING
Database Management Systems (BTN04408)

Day & Date: Monday, 09-June-2025 Max. Marks: 70
Time: 10:00 AM To 01:00 PM

Instructions: 1) Q. No. 1 is compulsory. It should be solved in the first 30 minutes in Answer Book Page no 03 (Starting page of the Answer Book). Each question carries one mark.
2) Don't forget to Mention question paper set (P/Q/R/S) on top of page.
3) Figures to the right indicates full marks.
4) Assume suitable data if required.

MCQ/Objective Type Questions

Duration: 30 Minutes Marks:14

Q.1 Choose the correct Answer. 14

1) If we wish to grant a privilege and to allow the recipient to pass the privilege on to other users, we append the ____ clause to the appropriate grant command.
a) With grant b) Grant user
c) Grant pass privilege d) With grant option

2) Which of the following is the syntax for views where v is view name?
a) Create view v as "query name";
b) Create "query expression" as view;
c) Create view v as "query expression";
d) Create view "query expression";

3) Key value pairs are usually seen in ____.
a) Hash tables b) Heaps
c) Both Hash tables and Heaps d) Skip list

4) A system is in a ____ state if there exists a set of transactions such that every transaction in the set is waiting for another transaction in the set.
a) Idle b) Waiting
c) Deadlock d) Ready

5) DDL stands for ____.
a) Data declaration language
b) Declaration data language
c) Document declaration language
d) Data definition language

6) _____ operation can be visualized as a horizontal partition of the relation into two set of tuples.
a) JOIN b) PARTITION
c) SELECT d) PROJECT

7) 'AS' clause is used in SQL for ____.

a) selection b) rename
c) join d) projection

8) What key links records from one database table to a record or records in another database table?

a) Primary key b) Principal Key
c) Foreign key d) Link key

9) Which of the following contains information about the structure of a database?

a) Database management system
b) Data dictionary
c) Data repository
d) Data warehouse

10) The language which has recently become the defacto standard for interfacing application programs with relational database system is _____.

a) Oracle b) SQL
c) DBase d) 4GL

11) By normalizing relations or sets of relations, one minimizes ____.

a) Data b) Fields
c) Redundancy d) Database

12) Which of the following is a type of Normal Form?

a) ACNF b) BCNF
c) CCNF d) DCNF

13) Domain constraints, functional dependency and referential integrity are special forms of ____.

a) Foreign key b) Primary key
c) Assertion d) Referential constraint

14) The database administrator who authorizes all the new users, modifies the database, and takes grants privilege is ____.

a) Super user b) Administrator
c) Operator of operating system d) All

ELECTRONICS ENGINEERING
Fundamentals of IOT(BTN04409)

Day & Date: Monday, 09-June-2025 Max. Marks: 70
Time: 10:00 AM To 01:00 PM

Instructions: 1) Q. No. 1 is compulsory. It should be solved in the first 30 minutes in Answer Book Page no 03 (Starting page of the Answer Book). Each question carries one mark.
2) Don't forget to Mention question paper set (P/Q/R/S) on top of page.
3) Figures to the right indicates full marks.
4) Make suitable assumptions (if necessary and state them clearly).

MCQ/Objective Type Questions

Duration: 30 Minutes Marks:14

Q.1 Choose the correct Answer. **14**

1) How does IoT contribute to the development of smart cities?
a) By promoting online gaming
b) By enhancing communication systems
c) By improving urban infrastructure and management
d) By increasing social media usage

2) What is the role of communication systems in IoT?
a) Real-time processing
b) Data storage in the cloud
c) Interconnecting devices
d) Embedded system development

3) What are the challenges associated with developing embedded systems for IoT?
a) Increased power consumption
b) Real-time requirements, resource constraints
c) Limited communication options
d) Lack of sensor integration

4) What is firmware in the context of embedded systems?
a) A type of hardware component
b) An embedded operating system
c) A type of software that provides low-level control for the device's specific hardware
d) Cloud-based storage system

5) Which of the following is NOT a type of sensor?
a) Accelerometer b) Light detector
c) Communication system d) Humidity sensor

6) Which type of noise can affect sensor measurements?
a) Social noise b) Environmental noise
c) Power noise d) Data noise

7) In which domain are displacement sensors commonly used?
a) Healthcare b) Manufacturing
c) Entertainment d) Social networking

8) How do temperature sensors contribute to energy efficiency in IoT applications?
a) Adjusting ambient light
b) Regulating heating and cooling systems
c) Monitoring human presence
d) Enhancing communication between devices

9) Which of the following is NOT a characteristic of sensors?
a) Sensitivity b) Accuracy
c) Speed d) Resolution

10) Which communication technology is commonly used for long-range communication in IoT devices?
a) Bluetooth Low Energy (BLE) b) RFID
c) WiFi d) Zigbee

11) What is the primary role of Zigbee technology in home automation systems?
a) Long communication range b) High data transfer speed
c) Low power consumption d) Real-time data transfer

12) Which communication technology is commonly used for IoT applications in environmental monitoring?
a) Cellular b) Zigbee
c) LoRa (Long Range) d) Bluetooth Low Energy (BLE)

13) In the context of IoT development, what advantage does Python offer over other languages?
a) Efficiency b) Low-level control
c) Simplicity d) Real-time processing

14) What future advancements could address challenges in IoT development with Raspberry Pi?
a) Enhanced hardware security b) Reduction in Python support
c) Decreased device compatibility d) Limited community support

S.Y. (B. Tech.) (Sem-II) (New) (CBCS) Examination: March/April-2025
ELECTRONICS ENGINEERING
Fundamentals of IOT(BTN04409)

Day & Date: Monday, 09-June-2025 Max. Marks: 56
Time: 10:00 AM To 01:00 PM

Instructions: 1) All questions are compulsory.
2) Figures to the right indicate full marks.

Section – I

Q.2 Solve the following: (Any Four) **16**

a) Discuss the impact of IoT on smart cities.
b) Identify and discuss the challenges and security considerations associated with the implementation of IoT in various domains.
c) Describe the components of an embedded system.
d) Discuss the challenges associated with developing embedded systems for IoT, including power consumption, real-time requirements, and resource constraints.
e) Discuss the fundamentals of signals and systems in the context of sensors.

Q.3 Solve the following: (Any Two) **12**

a) Explain the role of cloud computing in supporting IoT applications. How does cloud computing enhance the capabilities of IoT devices?
b) Explain the significance of integrated development environments (IDEs) in embedded development. Discuss different IDEs used for embedded systems and their features, emphasizing their role in simplifying the development process.
c) Explain the units of measurement commonly used in sensor technology. Discuss the significance of standard units and the importance of consistent measurement in IoT applications.

Section – II

Q.4 Attempt the following: (Any Four) **16**

a) Discuss the challenges and considerations in implementing sensor applications in real-world scenarios.
b) Discuss the role of temperature sensors in various IoT applications.
c) Discuss the applications of occupancy and motion detectors in IoT.
d) Examine the principles of Radio-Frequency Identification (RFID) technology.
e) Detail the process of installing Raspbian OS on a Raspberry Pi.

Q.5 Attempt the following: (Any Two) **12**

a) Discuss the power consumption parameters of communication technologies in IoT. Explore strategies to optimize power consumption, especially in battery-operated IoT devices, and address the trade-offs between power efficiency and communication performance.

b) Explain the applications of light detectors in different domains. Discuss how light sensors are used for tasks such as ambient light adjustment, security, and in consumer electronics.

c) Discuss the structure of the file system in Raspberry Pi, highlighting the importance of specific directories.

c) Power noise d) Data noise

2) In which domain are displacement sensors commonly used?
a) Healthcare b) Manufacturing
c) Entertainment d) Social networking

3) How do temperature sensors contribute to energy efficiency in IoT applications?
a) Adjusting ambient light
b) Regulating heating and cooling systems
c) Monitoring human presence
d) Enhancing communication between devices

4) Which of the following is NOT a characteristic of sensors?
a) Sensitivity b) Accuracy
c) Speed d) Resolution

5) Which communication technology is commonly used for long-range communication in IoT devices?
a) Bluetooth Low Energy (BLE) b) RFID
c) WiFi d) Zigbee

6) What is the primary role of Zigbee technology in home automation systems?
a) Long communication range b) High data transfer speed
c) Low power consumption d) Real-time data transfer

7) Which communication technology is commonly used for IoT applications in environmental monitoring?

a) Cellular
b) Zigbee
c) LoRa (Long Range)
d) Bluetooth Low Energy (BLE)

8) In the context of IoT development, what advantage does Python offer over other languages?

a) Efficiency
b) Low-level control
c) Simplicity
d) Real-time processing

9) What future advancements could address challenges in IoT development with Raspberry Pi?

a) Enhanced hardware security
b) Reduction in Python support
c) Decreased device compatibility
d) Limited community support

10) How does IoT contribute to the development of smart cities?

a) By promoting online gaming
b) By enhancing communication systems
c) By improving urban infrastructure and management
d) By increasing social media usage

11) What is the role of communication systems in IoT?

a) Real-time processing
b) Data storage in the cloud
c) Interconnecting devices
d) Embedded system development

12) What are the challenges associated with developing embedded systems for IoT?

a) Increased power consumption
b) Real-time requirements, resource constraints
c) Limited communication options
d) Lack of sensor integration

13) What is firmware in the context of embedded systems?

a) A type of hardware component
b) An embedded operating system
c) A type of software that provides low-level control for the device's specific hardware
d) Cloud-based storage system

14) Which of the following is NOT a type of sensor?

a) Accelerometer
b) Light detector
c) Communication system
d) Humidity sensor

Seat No.		Set	S

S.Y. (B. Tech.) (Sem-II) (New) (CBCS) Examination: March/April-2025
ELECTRONICS ENGINEERING
Fundamentals of IOT(BTN04409)

Day & Date: Monday, 09-June-2025 Max. Marks: 56
Time: 10:00 AM To 01:00 PM

Instructions: 1) All questions are compulsory.
2) Figures to the right indicate full marks.

Section – I

Q.2 Solve the following: (Any Four) **16**

a) Discuss the impact of IoT on smart cities.
b) Identify and discuss the challenges and security considerations associated with the implementation of IoT in various domains.
c) Describe the components of an embedded system.
d) Discuss the challenges associated with developing embedded systems for IoT, including power consumption, real-time requirements, and resource constraints.
e) Discuss the fundamentals of signals and systems in the context of sensors.

Q.3 Solve the following: (Any Two) **12**

a) Explain the role of cloud computing in supporting IoT applications. How does cloud computing enhance the capabilities of IoT devices?
b) Explain the significance of integrated development environments (IDEs) in embedded development. Discuss different IDEs used for embedded systems and their features, emphasizing their role in simplifying the development process.
c) Explain the units of measurement commonly used in sensor technology. Discuss the significance of standard units and the importance of consistent measurement in IoT applications.

Section – II

Q.4 Attempt the following: (Any Four) **16**

a) Discuss the challenges and considerations in implementing sensor applications in real-world scenarios.
b) Discuss the role of temperature sensors in various IoT applications.
c) Discuss the applications of occupancy and motion detectors in IoT.
d) Examine the principles of Radio-Frequency Identification (RFID) technology.
e) Detail the process of installing Raspbian OS on a Raspberry Pi.

Q.5 Attempt the following: (Any Two) **12**

a) Discuss the power consumption parameters of communication technologies in IoT. Explore strategies to optimize power consumption, especially in battery-operated IoT devices, and address the trade-offs between power efficiency and communication performance.

b) Explain the applications of light detectors in different domains. Discuss how light sensors are used for tasks such as ambient light adjustment, security, and in consumer electronics.

c) Discuss the structure of the file system in Raspberry Pi, highlighting the importance of specific directories.

Set P

S.Y. (B.Tech.) (Computer Science & Engg.) (Semester - I) (New) (CBCS)
Examination: March/April - 2025
Discrete Mathematical Structure (CSEPCC-01)

Day & Date: Saturday 17-05-2025 Max. Marks: 70
Time: 03:00 PM To 06:00 PM

Instructions: 1) Q. No. 1 is compulsory. It should be solved in the first 30 minutes in Answer Book Page no 03 (Starting page of the Answer Book). Each question carries one mark.
2) Don't forget to Mention question paper set (P/Q/R/S) on top of page.
3) Figures to the right indicates full marks.

MCQ/Objective Type Questions

Duration: 30 Minutes Marks:14

Q.1 Choose the correct Answer. **14**

1) The Duality Law states that:
a) The negation of a conjunction is always a disjunction
b) A formula can be dual by interchanging ∧ and ∨, and replacing T with F and F with T
c) The negation of a disjunction is always a conjunction
d) If a formula is a tautology, its dual is a contradiction

2) A Partial order relation is Transitive, reflexive & _____.
a) Anti symmetric b) Irreflexive
c) Symmetric d) none of these

3) Let $f(x) = 2x$ and $g(x) = 2x$, what is $(g\ o\ f)(3) =$
a) 16 b) 12
c) 24 d) 27

4) The function of $f: N \to N$(N is set of natural numbers) is defined by $f(n) = 2n + 3$ is _____.
a) one to one b) into
c) Onto d) Both a & b

5) Condition for monoid is _____.
a) $(a + e) = a$ b) $(a^{*}e) = (a + e)$
c) $a = (a^{*}(a + e)$ d) $(a^{*}e) = (e^{*}a) = a$

6) Which of the following is the correct truth table for the conditional statement $p \rightarrow q$?
a) True if p is true and q is false
b) True if p is false and q is true
c) False if p is true and q is false
d) False if p is false and q is true

7) A Poset in which every pair of elements has both a least upper bound and a greatest lower bound is termed as _____.
a) sublattice b) lattice
c) trail d) walk

8) The binary relation {(1,1), (2,1), (2,2), (2,3), (2,4), (3,1), (3,2)} on the set {1,2, 3} is _____.
a) reflective, symmetric and transitive
b) irreflexive, symmetric and transitive
c) neither reflective, nor irreflexive but transitive
d) irreflexive and antisymmetric

9) A cyclic group is always _____.
a) abelian group b) monoid
c) semigroup d) subgroup

10) Which of the following is the Cartesian product of two sets $A = \{1,2\}$ and $B = \{a, b\}$?
a) $A \times B = \{(1, a), (1, b), (2, a), (2, b)\}$
b) $A \times B = \{1a, 1b, 2a, 2b\}$
c) $A \times B = \{(1,1), (2,2)\}$
d) $A \times B = \{1,2, a, b\}$

11) Identify the valid conclusion from the premises $Pv\ Q, Q \rightarrow R, P \rightarrow M, \urcorner M$
a) $P \wedge (R \vee R)$ b) $P \wedge (P \wedge R)$
c) $\mathrm{R} \wedge (P \vee Q)$ d) $Q \wedge (P \vee R)$

12) The members of the set $S = \{x | x$ is the square of an integer and $x < 100\}$ is _____.
a) $\{0, 2,4, 5, 9,58, 49, 56, 99, 12\}$ b) $\{0, 1,4,9, 16,25,36,49, 64,81\}$
c) $\{1,4, 9, 16,25,36,64,81,85,99\}$ d) $\{0, 1,4,9, 16,25, 36, 49, 64, 121\}$

13) Let $X = \{2, 3, 6, 12, 24\}$, and $\leq$ be the partial order defined by $X \leq Y$ if X divides Y. Number of edges in the Hasse diagram of $(X, \leq)$ is
a) 3 b) 4
c) 5 d) None of these

14) Which of the following properties of relations is characterized by a matrix with only 1's along the diagonal?
a) Symmetric b) Reflexive
c) Transitive d) Anti-symmetric

Seat No.

3) Make suitable assumptions (if necessary and state them clearly).

Section – I

Q.2 Solve the following. (Any Three) **12**

a) Explain conjunctive normal from and disjunctive normal form.

b) What is equivalence of formula? Show that following equivalence without constructing truth table $(\neg P \wedge \neg Q \wedge R) \vee Q \wedge R \vee (P \wedge R) \Leftrightarrow R$

c) Define the following terms
i) Set inclusion and equality of sets
ii) Partition and covering of sets

d) Consider the relation
$R = \{< 1,3 >, < 1,4 >, < 3,2 >, < 3,3 >, < 3,4 >\} on\ A = \{1,2,3,4\}$
i) Find the matrix M_R of R
ii) Find the Domain and Range of R

Q.3 a) Let $A = \{4,5,6,7,8\}$. State whether following are covering or partition along with reason. **16**
1) $\{\{4,5\},\{6\},\{7,8,4\}\}$
2) $\{\{4\},\{7,6\},\{5\}\}$
3) $\{\{4,5\},\{7\},\{6,8\}\}$
4) $\{\{4,5\},\{5,6\},\{4,7,8\}\}$

b) 1) $(\urcorner p \rightarrow \urcorner q) \rightarrow (p \leftrightarrow \urcorner q)$
2) $p \vee (\urcorner p \rightarrow (q \vee (\urcorner q \rightarrow r))$

Q.4 Attempt the Following. (Any Three) **12**

a) What are the different type of functions?
b) Explain subgroup with an example.
c) Define sub lattice, complete lattice. Bounded lattice, Lattice
d) Explain properties of Algebraic system

Q.5 Solve any TWO. **16**

a) Define polish expression and translate the infix string $(a + b \uparrow c \uparrow d)^*(e + f/g)$ to reverse polish (suffix) expression.

b) Define functions: Consider $X = \{a, b, c\} Y = \{0,1\}$ are sets for the mapping set X to set Y. List all the possible function. Indicate in each whether the function is one-to-one. is on to. or is one- to-one on to.

c) Consider the poset $(X, \leq)$where $X = \{1, 2, 3, 5, 30\}$ and the partial ordered relation $\leq$ is defined as i.e. if x and y then $y \in X$ means $x \leq y$ divides x. Then show that poset (X. <) is a lattice.

b) $A \times B = \{1a, 1b, 2a, 2b\}$
c) $A \times B = \{(1,1), (2,2)\}$
d) $A \times B = \{1,2, a, b\}$

6) Identify the valid conclusion from the premises $Pv\ Q, Q \rightarrow R, P \rightarrow M, \urcorner M$
a) $P^{\wedge}(R \vee R)$ b) $P^{\wedge}(P^{\wedge}R)$
c) $\mathrm{R}^{\wedge}(P \vee Q)$ d) $Q^{\wedge}(P \vee R)$

7) The members of the set $S = \{x | x$ is the square of an integer and $x < 100\}$ is _____.
a) $\{0, 2,4, 5, 9,58, 49, 56, 99, 12\}$ b) $\{0, 1,4,9, 16,25,36,49, 64,81\}$
c) $\{1,4, 9, 16,25,36,64,81,85,99\}$ d) $\{0, 1,4,9, 16,25, 36, 49, 64, 121\}$

8) Let $X = \{2, 3, 6, 12, 24\}$, and $\leq$ be the partial order defined by $X \leq Y$ if X divides Y. Number of edges in the Hasse diagram of $(X, \leq)$ is
a) 3 b) 4
c) 5 d) None of these

9) Which of the following properties of relations is characterized by a matrix with only 1's along the diagonal?
a) Symmetric b) Reflexive
c) Transitive d) Anti-symmetric

10) The Duality Law states that:
a) The negation of a conjunction is always a disjunction
b) A formula can be dual by interchanging ∧ and ∨, and replacing T with F and F with T
c) The negation of a disjunction is always a conjunction
d) If a formula is a tautology, its dual is a contradiction

11) A Partial order relation is Transitive, reflexive & _____.
a) Anti symmetric b) Irreflexive
c) Symmetric d) none of these

12) Let $f(x) = 2x$ and $g(x) = 2x$, what is $(g\ o\ f)(3) =$
a) 16 b) 12
c) 24 d) 27

13) The function of $f: N \rightarrow N$(N is set of natural numbers) is defined by $f(n) = 2n + 3$ is _____.
a) one to one b) into
c) Onto d) Both a & b

14) Condition for monoid is _____.

a) $(a + e) = a$ b) $(a\,^{*}e) = (a + e)$

c) $a = (a\,^{*}(a + e)$ d) $(a\,^{*}e) = (e\,^{*}a) = a$

Seat No.		Set	S

S.Y. (B.Tech.) (Computer Science & Engg.) (Semester - I) (New) (CBCS)
Examination: March/April - 2025
Discrete Mathematical Structure (CSEPCC-01)

Day & Date: Saturday 17-05-2025 Max. Marks: 56
Time: 03:00 PM To 06:00 PM

Instructions: 1) All questions are compulsory.
2) Figures to the right indicate full marks.
3) Make suitable assumptions (if necessary and state them clearly).

Section – I

Q.2 Solve the following. (Any Three) **12**

a) Explain conjunctive normal from and disjunctive normal form.

b) What is equivalence of formula? Show that following equivalence without constructing truth table $(\neg P \wedge \neg Q \wedge R) \vee Q \wedge R \vee (P \wedge R) \Leftrightarrow R$

c) Define the following terms
i) Set inclusion and equality of sets
ii) Partition and covering of sets

d) Consider the relation
$R = \{< 1,3 >, < 1,4 >, < 3,2 >, < 3,3 >, < 3,4 >\} on\ A = \{1,2,3,4\}$
i) Find the matrix M_R of R
ii) Find the Domain and Range of R

Q.3 a) Let $A = \{4,5,6,7,8\}$. State whether following are covering or partition along with reason. **16**
1) $\{\{4,5\},\{6\},\{7,8,4\}\}$
2) $\{\{4\},\{7,6\},\{5\}\}$
3) $\{\{4,5\},\{7\},\{6,8\}\}$
4) $\{\{4,5\},\{5,6\},\{4,7,8\}\}$

b) 1) $(\urcorner p \rightarrow \urcorner q) \rightarrow (p \leftrightarrow \urcorner q)$
2) $p \vee (\urcorner p \rightarrow (q \vee (\urcorner q \rightarrow r))$

Q.4 Attempt the Following. (Any Three) **12**

a) What are the different type of functions?
b) Explain subgroup with an example.
c) Define sub lattice, complete lattice. Bounded lattice, Lattice
d) Explain properties of Algebraic system

Q.5 Solve any TWO. **16**

a) Define polish expression and translate the infix string $(a + b \uparrow c \uparrow d)^*(e + f/g)$ to reverse polish (suffix) expression.

b) Define functions: Consider $X = \{a, b, c\} Y = \{0,1\}$ are sets for the mapping set X to set Y. List all the possible function. Indicate in each whether the function is one-to-one. is on to. or is one- to-one on to.

c) Consider the poset $(X, \leq)$where $X = \{1, 2, 3, 5, 30\}$ and the partial ordered relation $\leq$ is defined as i.e. if x and y then $y \in X$ means $x \leq y$ divides x. Then show that poset (X. <) is a lattice.

Computer Graphics (CSEPCC-02)

Day & Date: Monday, 19-05-2025 Max. Marks: 70
Time: 03:00 PM To 06:00 PM

Instructions: 1) Q. No. 1 is compulsory. It should be solved in the first 30 minutes in Answer Book Page no 03 (Starting page of the Answer Book). Each question carries one mark.
2) Don't forget to Mention question paper set (P/Q/R/S) on top of page.
3) Assume suitable data if necessary and state it clearly.
4) Figures to the right indicates full marks.

MCQ/Objective Type Questions

Duration: 30 Minutes Marks:14

Q.1 Choose the correct answer: **14**

1) Interactive graphics is useful in ____.
a) Training pilots b) Computer aided design
c) Process control d) All of these

2) At end of each scan line the electron beam return to the left side on the screen to begin next scan line is called, ____.
a) Vertical refresh b) Horizontal refresh
c) Scanning d) Both a & b

3) The process of determining the suitable or appropriate pixels for representing image or graphic object is called ____
a) Animation b) Rasterization
c) Scan-Conversion d) Quantization

4) In the generation of circle by Bresnahan's algorithm, it is simple to generate ____
a) All octants
b) One octant first and others by successive reflection
c) One octant first and others by successive rotation
d) None of these

5) The basic geometric transformations are ____.
a) Translation b) Rotation
c) Scaling d) All of the mentioned

6) ____ is the ratio of horizontal points to vertical points necessary to produce equal length lines in both directions.
a) Aspect Ratio b) Dot Pitch
c) Resolution d) Height-Width Ratio

7) The end point of polygon are called as ____.
a) Edges b) Line
c) Vertices d) None of these

8) Cohen-Sutherland subdivision line clipping algorithm uses regions with different codes ____
a) 8 b) 6
c) 4 d) 9

9) The process of selecting and viewing the picture with different views is called ___.
a) Clipping b) Windowing
c) Segmenting d) All of above

10) A closed polyline is called a ____.
a) Polychain b) Polygon
c) Polyclosed d) Closed chain

11) The shape of the Bezier curve is controlled by ____.
a) control points b) Knots
c) end points d) All of the mentioned

12) What should be sequence of transformations that are required to perform rotation of an object around an arbitrary point?
a) Inverse Translation, Rotation, Translation
b) Scaling, Translation, Rotation
c) Translation, Rotation. Inverse Translation
d) Rotation, Translation, Scaling

13) Cohen-Sutherland clipping is an example of ____.
a) polygon clipping b) text clipping
c) line clipping d) curve clipping

14) Window Port In computer graphics Window Port is ____.
a) It represents real world coordinate system
b) A window port can be defined with the help of a GWINDOW statement
c) Window port is the coordinate area specially selected for the display
d) All of the above

4) Assume data wherever necessary.

MCQ/Objective Type Questions

Duration: 30 Minutes Marks:14

Q.1 Choose the correct answers. **14**

1) Which of the following is non-linear data structure?
a) Trees b) Array
c) Stacks d) Linked List

2) ____ sort is the method used by card sorter.
a) Quick b) Radix
c) Selection d) Bubble

3) What is a hash table?
a) A structure that maps values to keys
b) A structure that maps keys to values
c) A structure used for storage
d) A structure used to implement stack and queue

4) What is the primary function of a Stack data structure?
a) FIFO operation b) LIFO operation
c) Both LIFO & FIFO d) LILO operation

5) In a stack, if a user tries to remove an element from empty stack it is called ____.
a) Underflow b) Empty collection
c) Overflow d) Garbage Collection

6) If the elements "A", "B", "C" and "D" are placed in a queue and are deleted one at a time, in what order will they be removed?
a) ABCD b) DCBA
c) DCAB d) ABDC

7) Linked list is considered as an example of ____ type of memory.
a) Compile time b) Static
c) Dynamic d) None of the mentioned

8) A complete binary tree of level 5 has how many nodes?
a) 15 b) 63
c) 25 d) 30

9) A multi-way search tree has n items. The number of external nodes is _____
a) n^2 b) $\log n$
c) n d) $n+1$

10) What is the maximum height of an AVL tree with p nodes?
a) p b) log(p)
c) log(p)/2 d) p/2

11) Why we need to a binary tree which is height balanced?
a) to avoid formation of skew trees
b) to save memory
c) to attain faster memory access
d) to simplify storing

12) Which of the following is the most widely used external memory data structure.
a) AVL tree b) B-tree
c) Red-black tree d) Both AVL tree and Red-black tree

13) Graphs are represented using ____.
a) Adjacency tree b) Adjacency linked list
c) Adjacency graph d) Adjacency queue

14) Which of the following properties does a simple graph not hold?
a) Must be connected
b) Must have no loops or multiple edges
c) Must be unweighted
d) Must have no multiple edges

Q.2 Attempt the following questions: (Any Two) **10**

a) Define data structure. Explain its types along with example.
b) Define queue. Explain its operations using array.
c) Describe circular linked list with suitable diagram. Also state advantage of circular linked list over linear linked list.

Q.3 Attempt the following: (Any Three) **18**

a) Write a menu-driven program to implement a stack showing operations.
i) Insertion
ii) Deletion
iii) Display

b) Write a program to implement a doubly linked list.
i) Insert a node at the beginning of the list.
ii) Insert a node at the end of the list.
iii) Display the linked list.

c) Elaborate the steps for performing bubble sort for given elements of array.
A={54,26,93,17,77,31,44,55,20}

d) Define Hashing. List collision resolution technique? Explain Linear Probing with example.

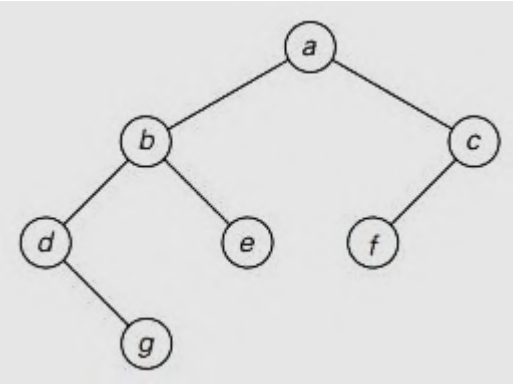
Section – II

Q.4 Attempt the following: (Any Two) **10**

a) Construct a binary search tree for following elements: 30,100,90,15,2,25,36,72,78,10 show each step of construction of BST.
b) Explain DFS & BFS in Graph with example.
c) Compare B tree & B+ tree with an example.

Q.5 Attempt the following: (Any Three) **18**

a) Traverse the following tree by the in-order, pre-order and post-order methods:



b) Define following terminologies in Graph

a) Neighbors
b) degree of a node
c) regular graph
d) Path
e) Cycle
f) Complete graph

c) Construct AVL tree for the following elements.
21, 26, 30, 09, 04, 14, 28, 18, 15,10, 2, 3, 7

d) Explain B tree. Show the growth of the B tree of order 4 by inserting the following keys (show each step).
01, 05, 06, 02, 08, 12, 14, 15, 20, 07, 10

Set **Q**

S.Y. (B. Tech) (Sem-I) (New) (NEP CBCS) Examination: March/April-2025
COMPUTER SCIENCE AND ENGINEERING
Data Structure (CSEPCC-03)

Day & Date: Tuesday, 20-05-2025 Max. Marks: 70
Time: 03:00 PM To 06:00 PM

Instructions: 1) Q. No. 1 is compulsory. It should be solved in the first 30 minutes in answer book. Page no 03 (Starting page of the Answer Book). Each question carries one mark.
2) Don't forget to Mention question paper set (P/Q/R/S) on top of page.
3) Figures to the right indicates full marks.
4) Assume data wherever necessary.

MCQ/Objective Type Questions

Duration: 30 Minutes Marks:14

Q.1 Choose the correct answers. **14**

1) A complete binary tree of level 5 has how many nodes?
a) 15 b) 63
c) 25 d) 30

2) A multi-way search tree has n items. The number of external nodes is _____
a) n^2 b) $\log n$
c) n d) $n+1$

3) What is the maximum height of an AVL tree with p nodes?
a) p b) log(p)
c) log(p)/2 d) p/2

4) Why we need to a binary tree which is height balanced?
a) to avoid formation of skew trees
b) to save memory
c) to attain faster memory access
d) to simplify storing

5) Which of the following is the most widely used external memory data structure.
a) AVL tree b) B-tree
c) Red-black tree d) Both AVL tree and Red-black tree

6) Graphs are represented using ____.
a) Adjacency tree b) Adjacency linked list
c) Adjacency graph d) Adjacency queue

7) Which of the following properties does a simple graph not hold?
a) Must be connected
b) Must have no loops or multiple edges
c) Must be unweighted
d) Must have no multiple edges

8) Which of the following is non-linear data structure?
a) Trees b) Array
c) Stacks d) Linked List

9) ____ sort is the method used by card sorter.
a) Quick b) Radix
c) Selection d) Bubble

10) What is a hash table?
a) A structure that maps values to keys
b) A structure that maps keys to values
c) A structure used for storage
d) A structure used to implement stack and queue

11) What is the primary function of a Stack data structure?
a) FIFO operation b) LIFO operation
c) Both LIFO & FIFO d) LILO operation

12) In a stack, if a user tries to remove an element from empty stack it is called ____.
a) Underflow b) Empty collection
c) Overflow d) Garbage Collection

13) If the elements “A”, “B”, “C” and “D” are placed in a queue and are deleted one at a time, in what order will they be removed?
a) ABCD b) DCBA
c) DCAB d) ABDC

14) Linked list is considered as an example of ____ type of memory.
a) Compile time b) Static
c) Dynamic d) None of the mentioned

MCQ/Objective Type Questions

Duration: 30 Minutes Marks:14

Q.1 Choose the correct Answer. **14**

1) If a linear differential equation with constant coefficients and r.h.s. equal to zero has a real root m_1 repeated Two times, then the corresponding part of the integral is _____.

a) $(c_1 + c_2)e^{m_1 X}$ b) $(c_1 + c_2 x)e^{m_1 X}$

c) $(c_1 x + c_2 x^2)e^{m_1 X}$ d) $(c_1 + c_2 x^3)e^{m_1 X}$

2) $\frac{1}{D-a}X$ is equal to _____.

a) $\int Xe^{ax}dx$ b) $e^{ax}\int X.e^{-ax}dx$

c) $\int Xe^{-ax}dx$ d) $e^{-ax}\int Xe^{-ax}dx$

3) $\frac{1}{D+1}(\log x + \frac{1}{x})$ is equal to _____.

a) e^x b) 1

c) x d) $\log x$

4) The solution of $q = e^{-p}$ is _____.

a) $z = ax + by + c$ b) $z = a^x + b^y + c$

c) $z = ax + y^{-b} + c$ d) $z = ax + e^{-a}y + c$

5) The solution of the equation $pq = p + q$ is _____.

a) $z = ax + (a+1)y + c$

b) $z = (a+1)x + a(a-1)y + c$

c) $z = (a-1)x + a(a+1)y + c$

d) $z(a-1) = a(a-1)x + ay + c$

6) If μ_1', μ_2', μ_3', μ_4' are the first four moments of the distribution about certain number then fourth moment μ_4 of the distribution about the arithmetic mean is given by _____.

a) $\mu_4' + 4\mu_3'\mu_1' + 6\mu_2'(\mu_1')^4 + 3(\mu_1')^4$

b) $\mu_4' - 4\mu_3'\mu_1' + 6\mu_2'(\mu_1')^2 - 3(\mu_1')^4$

c) $\mu_4' + 4\mu_3'\mu_1' - 6\mu_2'(\mu_1')^4 - 3(\mu_1')^4$

d) $\mu_4' + 2\mu_3'\mu_1' + 6\mu_2'(\mu_1')^4 - 3(\mu_1')^4$

7) Coefficient of kurtosis β_2 is given by _____.

a) $\frac{\mu_4}{\mu_3}$ b) $\frac{\mu_4}{\mu_2^2}$

c) $\frac{\mu_3}{\mu_2^2}$ d) $\frac{\mu_4}{\mu_2^3}$

8) If value of x for normal distribution is 35, mean of normal distribution is 65 and standard deviation is 25 then standardized random variable is ___.

a) -1.5 b) -1.7

c) -1.2 d) -4

9) A continuous random variable has the following probability density function $f(x) = kx(1-x), 0 \le x \le 1$ then $k =$ _____.

a) 6 b) 2

c) 3 d) 5

10) The area under the standard normal curve from $z = -\infty$ to $z = 0$ is ___.

a) 1 b) ½

c) 3/2 d) 0

11) If X, Y denotes the deviations from their means and if $\sum X^2 = 40, \sum Y^2 = 100, \sum XY = 50,$ then $r =$ _____.

a) 0.63 b) 0.82

c) 0.91 d) 0.79

12) The line of regression of x and y is given by _____.

a) $x - \bar{x} = b_{xy}(y - \bar{y})$ b) $x - \bar{y} = b_{xy}(x - \bar{x})$

c) $x - \bar{x} = b_{xx}(y - \bar{y})$ d) $x - \bar{x} = b_{yx}(y - \bar{y})$

13) The following mistakes per page were found in a book.

No. of mistakes:	0	1	2	3	4
Pages:	211	90	19	5	0

Then χ^2 is _____.

a) 0.59 b) 0.069

c) 0.81 d) 0.79

14) The 't-statistic' is defined as _____.

a) $\frac{\bar{x}-\mu}{\sigma/\sqrt{n}}$ b) $\frac{\bar{x}-\mu}{s/\sqrt{n}}$

c) $\frac{\bar{x}-\mu}{\sigma/n}$ d) $\frac{\bar{x}-\mu}{s/n}$

Seat No.

Advanced Mathematics and Statistics (OE-01A)

Day & Date: Wednesday 21-05-2025 Max. Marks: 56
Time: 03:00 PM To 06:00 PM

Instructions: 1) All questions are compulsory.
2) Figures to the right indicate full marks.

Section – I

Q.2 Attempt any Three. **09**

a) Find the Arithmetic mean, Median and standard deviation for the following frequency distribution.

x	5	9	12	15	20	24	30	35	42	49
f	3	6	8	8	9	10	8	7	6	2

b) Solve $(D^2 - 4D + 4)y = 8.x^2e^{2x}\sin 2x$

c) Solve $(D^2 + D + 1)y = \sin 2x$

d) Calculate Mode for the following frequency distribution.

C.I.	00-10	10-20	20-30	30-40	40-50	50-60	60-70
Frequency (f)	4	7	8	12	25	18	10

e) Solve $p^2q^3 = x^2y^3$

Q.3 Attempt any Three. **09**

a) Solve: $(2D + 1)^2y = 4e^{-x/2}$

b) Solve: $p + q = pqz$

c) Find Q_1, Q_2, Q_3 from the following data.
5,7,12,14,15,22,25,30,36,42,53

d) Solve $x(y - z)p + y(z - x)q = z(x - y)$

e) Solve $(D^3 - 3D + 2)y = x$

Q.4 Attempt any Two **10**

a) The first four moments of a distribution about the value 5 are 2,20,40 and 50. from the given information obtain the first four central moments, coefficient of skewness and kurtosis.

b) Solve the following differential equation by the method of separation of variables.
$\frac{\partial z}{\partial x} - 2\frac{\partial z}{\partial y} = z$ given that $z(x, 0) = 3e^{-5x}$

c) Solve: $(D^2 - D - 2)y = 2\log x + \frac{1}{x} + \frac{1}{x^2}$

Section – II

Q.5 Attempt any three of the following. **09**

a) Find the value of k if each of the following functions is a probability density function.

$$f(x) = \begin{cases} kx^2(1-x^3), & 0 \le x \le 1 \\ 0, & \text{otherwise} \end{cases}$$

b) The mean life time of 100 fluorescent light bulbs produced by a Company is computed to be 1570 Hrs. with S.D. of 120 Hrs. If μ is the mean lifetime of all the bulbs produced by the Company, Test the Hypothesis $\mu = 1600$ Hrs. Against the alternative Hypothesis $\mu \neq 1600$ Hrs. using 5% level of Significance.
(Given Expected value at 5% LOS is 1.96)

c) Calculate the coefficient of correlation between height of father and height of son from the following data.

Height of father	64	65	66	67	68	69	70
Height of son	66	67	65	68	70	68	71

d) Two independent random sample have the following data,
$\overline{x_1} = 110, \sigma_1 = 25, n_1 = 16$
$\overline{x_2} = 120, \sigma_2 = 30, n_2 = 9$
If σ_1 and σ_2 are the S. D. of the populations. Test the hypothesis that $\mu_1 = \mu_2$ at 5% level of significance. (The table value of t at $\alpha = 0.05$ for $v = 23$ degrees of freedom is 2.069)

e) If in a lot of 500 solenoids 25 are defective, find the probability that there will be 0, 1, 2 defective solenoids in a random sample of 20 solenoids.

Q.6 Attempt any three of the following. **09**

a) If two independent random samples of sizes 15 and 8 have respectively the following mean and population standard deviations, $\overline{x_1} = 980, \overline{x_2} = 1012; \sigma_1 = 75, \sigma_2 = 80$. Test the hypothesis that $\mu_1 = \mu_2$ at 5% level of significance.
(Given Expected value at 5% LOS with 21 DF is 2.080)

b) The number of telephone calls received by an operator in a ten-minute interval follows a Poisson distribution with mean 1. What is the probability of receiving (i) no call, (ii) less than four calls, in the interval? What is the most likely number of calls?

c) Calculate the equations of the lines of regression. Given
Mean of $x = 50.07$, S.D. of $x = 5.26$
Mean of $y = 9.98$, S.D. of $y = 2.59$
$r = 0.898$

d) In an intelligence test administered to 1000 children the mean score was, 42 with s.d. 24. Find the number of children (i) scoring more than 60 and (ii) between 20 and 40 assuming the distribution to be normal.
(Given: For S.N.V. z area from z = 0 to z = 0.75 is 0.2734, that between z = 0 and z = 0.9167 is 0.3202 and that between z = 0 to z = 0.08333 is 0.0332.)

e) Fit a Straight line $y = a + bx$ to the following data.

x	0	1	2	3	4	5
y	1	2	3	4.5	6	7.5

Q.7 Attempt any Two. **10**

a) Fit a Poisson's distribution to the following data :

X	0	1	2	3	4	Total
f	112	63	20	4	1	200

b) Obtain a second-degree curve to the following data.

Year	1965	1966	1967	1968	1969	1970	1971	1972
Profit (in Corers Rs.)	125	140	165	195	200	215	220	230

Also estimate the profit in 1973.

c) Ten school boys were given a test in Statistics and their scores were recorded. They were given a month's special coaching and a second test was given to them in the same subject at the end of the coaching period. Test if the marks given below give evidence to the fact that the students are benefitted by coaching.
Marks in test I: 70, 68, 56, 75, 80, 90, 68, 75, 56, 58
Marks in Test II: 68, 70, 52, 73, 75, 78, 80, 92, 54, 55
(Given that value of t_α at 5 % LOS for v = 9 degrees of freedom is 1.86 for one tailed test)

Set **Q**

S. Y. (B.Tech.) (Sem-I) (New) (NEP CBCS) Examination: March/April-2025
COMPUTER SCIENCE AND ENGINEERING
Advanced Mathematics and Statistics (OE-01A)

Day & Date: Wednesday 21-05-2025 Max. Marks: 70
Time: 03:00 PM To 06:00 PM

Instructions: 1) Q. No. 1 is compulsory. It should be solved in the first 30 minutes in Answer Book Page no 03 (Starting page of the Answer Book). Each question carries one mark.
2) Don't forget to Mention question paper set (P/Q/R/S) on top of page.
3) Figures to the right indicates full marks.

MCQ/Objective Type Questions

Duration: 30 Minutes Marks:14

Q.1 Choose the correct Answer. 14

1) If value of x for normal distribution is 35, mean of normal distribution is 65 and standard deviation is 25 then standardized random variable is ___.
a) -1.5 b) -1.7
c) -1.2 d) -4

2) A continuous random variable has the following probability density function $f(x) = kx(1-x), 0 \le x \le 1$ then $k =$ _____.
a) 6 b) 2
c) 3 d) 5

3) The area under the standard normal curve from $z = -\infty$ to $z = 0$ is ___.
a) 1 b) ½
c) 3/2 d) 0

4) If X, Y denotes the deviations from their means and if $\sum X^2 = 40, \sum Y^2 = 100, \sum XY = 50,$ then $r =$ _____.
a) 0.63 b) 0.82
c) 0.91 d) 0.79

5) The line of regression of x and y is given by _____.
a) $x - \bar{x} = b_{xy}(y - \bar{y})$ b) $x - \bar{y} = b_{xy}(x - \bar{x})$
c) $x - \bar{x} = b_{xx}(y - \bar{y})$ d) $x - \bar{x} = b_{yx}(y - \bar{y})$

6) The following mistakes per page were found in a book.

No. of mistakes:	0	1	2	3	4
Pages:	211	90	19	5	0

Then χ^2 is _____.
a) 0.59 b) 0.069
c) 0.81 d) 0.79

7) The 't-statistic' is defined as _____.

a) $\frac{\bar{x}-\mu}{\sigma/\sqrt{n}}$ b) $\frac{\bar{x}-\mu}{s/\sqrt{n}}$

c) $\frac{\bar{x}-\mu}{\sigma/n}$ d) $\frac{\bar{x}-\mu}{s/n}$

8) If a linear differential equation with constant coefficients and r.h.s. equal to zero has a real root m_1 repeated Two times, then the corresponding part of the integral is _____.

a) $(c_1 + c_2)e^{m_1 X}$ b) $(c_1 + c_2 x)e^{m_1 X}$

c) $(c_1 x + c_2 x^2)e^{m_1 X}$ d) $(c_1 + c_2 x^3)e^{m_1 X}$

9) $\frac{1}{D-a}X$ is equal to _____.

a) $\int Xe^{ax}dx$ b) $e^{ax}\int X.e^{-ax}dx$

c) $\int Xe^{-ax}dx$ d) $e^{-ax}\int Xe^{-ax}dx$

10) $\frac{1}{D+1}(\log x + \frac{1}{x})$ is equal to _____.

a) e^x b) 1

c) x d) $\log x$

11) The solution of $q = e^{-p}$ is _____.

a) $z = ax + by + c$ b) $z = a^x + b^y + c$

c) $z = ax + y^{-b} + c$ d) $z = ax + e^{-a}y + c$

12) The solution of the equation $pq = p + q$ is _____.

a) $z = ax + (a+1)y + c$

b) $z = (a+1)x + a(a-1)y + c$

c) $z = (a-1)x + a(a+1)y + c$

d) $z(a-1) = a(a-1)x + ay + c$

13) If μ_1', μ_2', μ_3', μ_4' are the first four moments of the distribution about certain number then fourth moment μ_4 of the distribution about the arithmetic mean is given by _____.

a) $\mu_4' + 4\mu_3'\mu_1' + 6\mu_2'(\mu_1')^4 + 3(\mu_1')^4$

b) $\mu_4' - 4\mu_3'\mu_1' + 6\mu_2'(\mu_1')^2 - 3(\mu_1')^4$

c) $\mu_4' + 4\mu_3'\mu_1' - 6\mu_2'(\mu_1')^4 - 3(\mu_1')^4$

d) $\mu_4' + 2\mu_3'\mu_1' + 6\mu_2'(\mu_1')^4 - 3(\mu_1')^4$

14) Coefficient of kurtosis β_2 is given by _____.

a) $\frac{\mu_4}{\mu_3}$ b) $\frac{\mu_4}{\mu_2^2}$

c) $\frac{\mu_3}{\mu_2^2}$ d) $\frac{\mu_4}{\mu_2^3}$

Seat No.	

Set Q

S. Y. (B.Tech.) (Sem-I) (New) (NEP CBCS) Examination: March/April-2025
COMPUTER SCIENCE AND ENGINEERING
Advanced Mathematics and Statistics (OE-01A)

Day & Date: Wednesday 21-05-2025 Max. Marks: 56
Time: 03:00 PM To 06:00 PM

Instructions: 1) All questions are compulsory.
2) Figures to the right indicate full marks.

Section – I

Q.2 Attempt any Three. **09**

a) Find the Arithmetic mean, Median and standard deviation for the following frequency distribution.

x	5	9	12	15	20	24	30	35	42	49
f	3	6	8	8	9	10	8	7	6	2

b) Solve $(D^2 - 4D + 4)y = 8.x^2e^{2x}\sin 2x$

c) Solve $(D^2 + D + 1)y = \sin 2x$

d) Calculate Mode for the following frequency distribution.

C.I.	00-10	10-20	20-30	30-40	40-50	50-60	60-70
Frequency (f)	4	7	8	12	25	18	10

e) Solve $p^2q^3 = x^2y^3$

Q.3 Attempt any Three. **09**

a) Solve: $(2D + 1)^2y = 4e^{-x/2}$

b) Solve: $p + q = pqz$

c) Find Q_1, Q_2, Q_3 from the following data.
5,7,12,14,15,22,25,30,36,42,53

d) Solve $x(y - z)p + y(z - x)q = z(x - y)$

e) Solve $(D^3 - 3D + 2)y = x$

Q.4 Attempt any Two **10**

a) The first four moments of a distribution about the value 5 are 2,20,40 and 50. from the given information obtain the first four central moments, coefficient of skewness and kurtosis.

b) Solve the following differential equation by the method of separation of variables.
$\frac{\partial z}{\partial x} - 2\frac{\partial z}{\partial y} = z$ given that $z(x, 0) = 3e^{-5x}$

c) Solve: $(D^2 - D - 2)y = 2\log x + \frac{1}{x} + \frac{1}{x^2}$

Section – II

Q.5 Attempt any three of the following. **09**

a) Find the value of k if each of the following functions is a probability density function.

$$f(x) = \begin{cases} kx^2(1-x^3), & 0 \le x \le 1 \\ 0, & \text{otherwise} \end{cases}$$

b) The mean life time of 100 fluorescent light bulbs produced by a Company is computed to be 1570 Hrs. with S.D. of 120 Hrs. If μ is the mean lifetime of all the bulbs produced by the Company, Test the Hypothesis $\mu = 1600$ Hrs. Against the alternative Hypothesis $\mu \neq 1600$ Hrs. using 5% level of Significance.
(Given Expected value at 5% LOS is 1.96)

c) Calculate the coefficient of correlation between height of father and height of son from the following data.

Height of father	64	65	66	67	68	69	70
Height of son	66	67	65	68	70	68	71

d) Two independent random sample have the following data,
$\overline{x_1} = 110, \sigma_1 = 25, n_1 = 16$
$\overline{x_2} = 120, \sigma_2 = 30, n_2 = 9$
If σ_1 and σ_2 are the S. D. of the populations. Test the hypothesis that $\mu_1 = \mu_2$ at 5% level of significance. (The table value of t at $\alpha = 0.05$ for $v = 23$ degrees of freedom is 2.069)

e) If in a lot of 500 solenoids 25 are defective, find the probability that there will be 0, 1, 2 defective solenoids in a random sample of 20 solenoids.

Q.6 Attempt any three of the following. **09**

a) If two independent random samples of sizes 15 and 8 have respectively the following mean and population standard deviations, $\overline{x_1} = 980, \overline{x_2} = 1012; \sigma_1 = 75, \sigma_2 = 80$. Test the hypothesis that $\mu_1 = \mu_2$ at 5% level of significance.
(Given Expected value at 5% LOS with 21 DF is 2.080)

b) The number of telephone calls received by an operator in a ten-minute interval follows a Poisson distribution with mean 1. What is the probability of receiving (i) no call, (ii) less than four calls, in the interval? What is the most likely number of calls?

c) Calculate the equations of the lines of regression. Given
Mean of $x = 50.07$, S.D. of $x = 5.26$
Mean of $y = 9.98$, S.D. of $y = 2.59$
$r = 0.898$

d) In an intelligence test administered to 1000 children the mean score was, 42 with s.d. 24. Find the number of children (i) scoring more than 60 and (ii) between 20 and 40 assuming the distribution to be normal.
(Given: For S.N.V. z area from z = 0 to z = 0.75 is 0.2734, that between z = 0 and z = 0.9167 is 0.3202 and that between z = 0 to z = 0.08333 is 0.0332.)

e) Fit a Straight line $y = a + bx$ to the following data.

x	0	1	2	3	4	5
y	1	2	3	4.5	6	7.5

Q.7 Attempt any Two. **10**

a) Fit a Poisson's distribution to the following data :

X	0	1	2	3	4	Total
f	112	63	20	4	1	200

b) Obtain a second-degree curve to the following data.

Year	1965	1966	1967	1968	1969	1970	1971	1972
Profit (in Corers Rs.)	125	140	165	195	200	215	220	230

Also estimate the profit in 1973.

c) Ten school boys were given a test in Statistics and their scores were recorded. They were given a month's special coaching and a second test was given to them in the same subject at the end of the coaching period. Test if the marks given below give evidence to the fact that the students are benefitted by coaching.
Marks in test I: 70, 68, 56, 75, 80, 90, 68, 75, 56, 58
Marks in Test II: 68, 70, 52, 73, 75, 78, 80, 92, 54, 55
(Given that value of t_α at 5 % LOS for v = 9 degrees of freedom is 1.86 for one tailed test)

MCQ/Objective Type Questions

Duration: 30 Minutes Marks:14

Q.1 Choose the correct Answer. **14**

1) If X, Y denotes the deviations from their means and if $\sum X^2 = 40, \sum Y^2 = 100, \sum XY = 50,$ then $r =$ _____.
a) 0.63 b) 0.82
c) 0.91 d) 0.79

2) The line of regression of x and y is given by _____.
a) $x - \bar{x} = b_{xy}(y - \bar{y})$ b) $x - \bar{y} = b_{xy}(x - \bar{x})$
c) $x - \bar{x} = b_{xx}(y - \bar{y})$ d) $x - \bar{x} = b_{yx}(y - \bar{y})$

3) The following mistakes per page were found in a book.

No. of mistakes:	0	1	2	3	4
Pages:	211	90	19	5	0

Then χ^2 is _____.
a) 0.59 b) 0.069
c) 0.81 d) 0.79

4) The 't-statistic' is defined as _____.
a) $\frac{\bar{x}-\mu}{\sigma/\sqrt{n}}$ b) $\frac{\bar{x}-\mu}{s/\sqrt{n}}$
c) $\frac{\bar{x}-\mu}{\sigma/n}$ d) $\frac{\bar{x}-\mu}{s/n}$

5) If a linear differential equation with constant coefficients and r.h.s. equal to zero has a real root m_1 repeated Two times, then the corresponding part of the integral is _____.
a) $(c_1 + c_2)e^{m_1 X}$ b) $(c_1 + c_2 x)e^{m_1 X}$
c) $(c_1 x + c_2 x^2)e^{m_1 X}$ d) $(c_1 + c_2 x^3)e^{m_1 X}$

6) $\frac{1}{D-a}X$ is equal to _____.

a) $\int Xe^{ax}dx$ b) $e^{ax}\int X.e^{-ax}dx$

c) $\int Xe^{-ax}dx$ d) $e^{-ax}\int Xe^{-ax}dx$

7) $\frac{1}{D+1}(\log x+\frac{1}{x})$ is equal to _____.

a) e^x b) 1

c) x d) $\log x$

8) The solution of $q=e^{-p}$ is _____.

a) $z=ax+by+c$ b) $z=a^x+b^y+c$

c) $z=ax+y^{-b}+c$ d) $z=ax+e^{-a}y+c$

9) The solution of the equation $pq=p+q$ is _____.

a) $z=ax+(a+1)y+c$

b) $z=(a+1)x+a(a-1)y+c$

c) $z=(a-1)x+a(a+1)y+c$

d) $z(a-1)=a(a-1)x+ay+c$

10) If μ_1', μ_2', μ_3', μ_4' are the first four moments of the distribution about certain number then fourth moment μ_4 of the distribution about the arithmetic mean is given by _____.

a) $\mu_4'+4\mu_3'\mu_1'+6\mu_2'(\mu_1')^4+3(\mu_1')^4$

b) $\mu_4'-4\mu_3'\mu_1'+6\mu_2'(\mu_1')^2-3(\mu_1')^4$

c) $\mu_4'+4\mu_3'\mu_1'-6\mu_2'(\mu_1')^4-3(\mu_1')^4$

d) $\mu_4'+2\mu_3'\mu_1'+6\mu_2'(\mu_1')^4-3(\mu_1')^4$

11) Coefficient of kurtosis β_2 is given by _____.

a) $\frac{\mu_4}{\mu_3}$ b) $\frac{\mu_4}{\mu_2^2}$

c) $\frac{\mu_3}{\mu_2^2}$ d) $\frac{\mu_4}{\mu_2^3}$

12) If value of x for normal distribution is 35, mean of normal distribution is 65 and standard deviation is 25 then standardized random variable is ___.

a) -1.5 b) -1.7

c) -1.2 d) -4

13) A continuous random variable has the following probability density function $f(x)=kx(1-x),0\leq x\leq 1$ then $k=$ _____.

a) 6 b) 2

c) 3 d) 5

14) The area under the standard normal curve from $z = -\infty$ to $z = 0$ is ___.

a) 1 b) ½

c) 3/2 d) 0

Section – I

Q.2 Attempt any Three. **09**

a) Find the Arithmetic mean, Median and standard deviation for the following frequency distribution.

x	5	9	12	15	20	24	30	35	42	49
f	3	6	8	8	9	10	8	7	6	2

b) Solve $(D^2 - 4D + 4)y = 8.x^2e^{2x}\sin 2x$

c) Solve $(D^2 + D + 1)y = \sin 2x$

d) Calculate Mode for the following frequency distribution.

C.I.	00-10	10-20	20-30	30-40	40-50	50-60	60-70
Frequency (f)	4	7	8	12	25	18	10

e) Solve $p^2q^3 = x^2y^3$

Q.3 Attempt any Three. **09**

a) Solve: $(2D + 1)^2y = 4e^{-x/2}$

b) Solve: $p + q = pqz$

c) Find Q_1, Q_2, Q_3 from the following data.
5,7,12,14,15,22,25,30,36,42,53

d) Solve $x(y - z)p + y(z - x)q = z(x - y)$

e) Solve $(D^3 - 3D + 2)y = x$

Q.4 Attempt any Two **10**

a) The first four moments of a distribution about the value 5 are 2,20,40 and 50. from the given information obtain the first four central moments, coefficient of skewness and kurtosis.

b) Solve the following differential equation by the method of separation of variables.
$\frac{\partial z}{\partial x} - 2\frac{\partial z}{\partial y} = z$ given that $z(x, 0) = 3e^{-5x}$

c) Solve: $(D^2 - D - 2)y = 2\log x + \frac{1}{x} + \frac{1}{x^2}$

Section – II

Q.5 Attempt any three of the following. **09**

a) Find the value of k if each of the following functions is a probability density function.

$$f(x) = \begin{cases} kx^2(1-x^3), & 0 \le x \le 1 \\ 0, & \text{otherwise} \end{cases}$$

b) The mean life time of 100 fluorescent light bulbs produced by a Company is computed to be 1570 Hrs. with S.D. of 120 Hrs. If μ is the mean lifetime of all the bulbs produced by the Company, Test the Hypothesis $\mu = 1600$ Hrs. Against the alternative Hypothesis $\mu \neq 1600$ Hrs. using 5% level of Significance.
(Given Expected value at 5% LOS is 1.96)

c) Calculate the coefficient of correlation between height of father and height of son from the following data.

Height of father	64	65	66	67	68	69	70
Height of son	66	67	65	68	70	68	71

d) Two independent random sample have the following data,
$\overline{x_1} = 110, \sigma_1 = 25, n_1 = 16$
$\overline{x_2} = 120, \sigma_2 = 30, n_2 = 9$
If σ_1 and σ_2 are the S. D. of the populations. Test the hypothesis that $\mu_1 = \mu_2$ at 5% level of significance. (The table value of t at $\alpha = 0.05$ for $v = 23$ degrees of freedom is 2.069)

e) If in a lot of 500 solenoids 25 are defective, find the probability that there will be 0, 1, 2 defective solenoids in a random sample of 20 solenoids.

Q.6 Attempt any three of the following. **09**

a) If two independent random samples of sizes 15 and 8 have respectively the following mean and population standard deviations, $\overline{x_1} = 980, \overline{x_2} = 1012; \sigma_1 = 75, \sigma_2 = 80$. Test the hypothesis that $\mu_1 = \mu_2$ at 5% level of significance.
(Given Expected value at 5% LOS with 21 DF is 2.080)

b) The number of telephone calls received by an operator in a ten-minute interval follows a Poisson distribution with mean 1. What is the probability of receiving (i) no call, (ii) less than four calls, in the interval? What is the most likely number of calls?

c) Calculate the equations of the lines of regression. Given
Mean of $x = 50.07$, S.D. of $x = 5.26$
Mean of $y = 9.98$, S.D. of $y = 2.59$
$r = 0.898$

d) In an intelligence test administered to 1000 children the mean score was, 42 with s.d. 24. Find the number of children (i) scoring more than 60 and (ii) between 20 and 40 assuming the distribution to be normal.
(Given: For S.N.V. z area from z = 0 to z = 0.75 is 0.2734, that between z = 0 and z = 0.9167 is 0.3202 and that between z = 0 to z = 0.08333 is 0.0332.)

e) Fit a Straight line $y = a + bx$ to the following data.

x	0	1	2	3	4	5
y	1	2	3	4.5	6	7.5

Q.7 Attempt any Two. **10**

a) Fit a Poisson's distribution to the following data :

X	0	1	2	3	4	Total
f	112	63	20	4	1	200

b) Obtain a second-degree curve to the following data.

Year	1965	1966	1967	1968	1969	1970	1971	1972
Profit (in Corers Rs.)	125	140	165	195	200	215	220	230

Also estimate the profit in 1973.

c) Ten school boys were given a test in Statistics and their scores were recorded. They were given a month's special coaching and a second test was given to them in the same subject at the end of the coaching period. Test if the marks given below give evidence to the fact that the students are benefitted by coaching.
Marks in test I: 70, 68, 56, 75, 80, 90, 68, 75, 56, 58
Marks in Test II: 68, 70, 52, 73, 75, 78, 80, 92, 54, 55
(Given that value of t_α at 5 % LOS for v = 9 degrees of freedom is 1.86 for one tailed test)

MCQ/Objective Type Questions

Duration: 30 Minutes Marks:14

Q.1 Choose the correct Answer. **14**

1) If $\mu_1', \mu_2', \mu_3', \mu_4'$ are the first four moments of the distribution about certain number then fourth moment μ_4 of the distribution about the arithmetic mean is given by _____.

a) $\mu_4' + 4\mu_3'\mu_1' + 6\mu_2'(\mu_1')^4 + 3(\mu_1')^4$

b) $\mu_4' - 4\mu_3'\mu_1' + 6\mu_2'(\mu_1')^2 - 3(\mu_1')^4$

c) $\mu_4' + 4\mu_3'\mu_1' - 6\mu_2'(\mu_1')^4 - 3(\mu_1')^4$

d) $\mu_4' + 2\mu_3'\mu_1' + 6\mu_2'(\mu_1')^4 - 3(\mu_1')^4$

2) Coefficient of kurtosis β_2 is given by _____.

a) $\frac{\mu_4}{\mu_3}$ b) $\frac{\mu_4}{\mu_2^2}$

c) $\frac{\mu_3}{\mu_2^2}$ d) $\frac{\mu_4}{\mu_2^3}$

3) If value of x for normal distribution is 35, mean of normal distribution is 65 and standard deviation is 25 then standardized random variable is ___.

a) -1.5 b) -1.7
c) -1.2 d) -4

4) A continuous random variable has the following probability density function $f(x) = kx(1-x), 0 \le x \le 1$ then $k =$ _____.

a) 6 b) 2
c) 3 d) 5

5) The area under the standard normal curve from $z = -\infty$ to $z = 0$ is ___.

a) 1 b) ½
c) 3/2 d) 0

6) If X, Y denotes the deviations from their means and if $\sum X^2 = 40, \sum Y^2 = 100, \sum XY = 50,$ then $r =$ _____.

a) 0.63 b) 0.82
c) 0.91 d) 0.79

7) The line of regression of x and y is given by _____.

a) $x - \bar{x} = b_{xy}(y - \bar{y})$ b) $x - \bar{y} = b_{xy}(x - \bar{x})$
c) $x - \bar{x} = b_{xx}(y - \bar{y})$ d) $x - \bar{x} = b_{yx}(y - \bar{y})$

8) The following mistakes per page were found in a book.

No. of mistakes:	0	1	2	3	4
Pages:	211	90	19	5	0

Then χ^2 is _____.

a) 0.59 b) 0.069
c) 0.81 d) 0.79

9) The 't-statistic' is defined as _____.

a) $\frac{\bar{x}-\mu}{\sigma/\sqrt{n}}$ b) $\frac{\bar{x}-\mu}{s/\sqrt{n}}$
c) $\frac{\bar{x}-\mu}{\sigma/n}$ d) $\frac{\bar{x}-\mu}{s/n}$

10) If a linear differential equation with constant coefficients and r.h.s. equal to zero has a real root m_1 repeated Two times, then the corresponding part of the integral is _____.

a) $(c_1 + c_2)e^{m_1 X}$ b) $(c_1 + c_2 x)e^{m_1 X}$
c) $(c_1 x + c_2 x^2)e^{m_1 X}$ d) $(c_1 + c_2 x^3)e^{m_1 X}$

11) $\frac{1}{D-a}X$ is equal to _____.

a) $\int Xe^{ax}dx$ b) $e^{ax}\int X.e^{-ax}dx$
c) $\int Xe^{-ax}dx$ d) $e^{-ax}\int Xe^{-ax}dx$

12) $\frac{1}{D+1}(\log x + \frac{1}{x})$ is equal to _____.

a) e^x b) 1
c) x d) $\log x$

13) The solution of $q = e^{-p}$ is _____.

a) $z = ax + by + c$ b) $z = a^x + b^y + c$
c) $z = ax + y^{-b} + c$ d) $z = ax + e^{-a}y + c$

14) The solution of the equation $pq = p + q$ is _____.

a) $z = ax + (a+1)y + c$
b) $z = (a+1)x + a(a-1)y + c$
c) $z = (a-1)x + a(a+1)y + c$

d) $z(a-1) = a(a-1)x + ay + c$

Set S

S. Y. (B.Tech.) (Sem-I) (New) (NEP CBCS) Examination: March/April-2025
COMPUTER SCIENCE AND ENGINEERING
Advanced Mathematics and Statistics (OE-01A)

Day & Date: Wednesday 21-05-2025 Max. Marks: 56
Time: 03:00 PM To 06:00 PM

Instructions: 1) All questions are compulsory.
2) Figures to the right indicate full marks.

Section – I

Q.2 Attempt any Three. **09**

a) Find the Arithmetic mean, Median and standard deviation for the following frequency distribution.

x	5	9	12	15	20	24	30	35	42	49
f	3	6	8	8	9	10	8	7	6	2

b) Solve $(D^2 - 4D + 4)y = 8.x^2e^{2x}\sin 2x$

c) Solve $(D^2 + D + 1)y = \sin 2x$

d) Calculate Mode for the following frequency distribution.

C.I.	00-10	10-20	20-30	30-40	40-50	50-60	60-70
Frequency (f)	4	7	8	12	25	18	10

e) Solve $p^2q^3 = x^2y^3$

Q.3 Attempt any Three. **09**

a) Solve: $(2D + 1)^2y = 4e^{-x/2}$

b) Solve: $p + q = pqz$

c) Find Q_1, Q_2, Q_3 from the following data.
5,7,12,14,15,22,25,30,36,42,53

d) Solve $x(y - z)p + y(z - x)q = z(x - y)$

e) Solve $(D^3 - 3D + 2)y = x$

Q.4 Attempt any Two **10**

a) The first four moments of a distribution about the value 5 are 2,20,40 and 50. from the given information obtain the first four central moments, coefficient of skewness and kurtosis.

b) Solve the following differential equation by the method of separation of variables.
$\frac{\partial z}{\partial x} - 2\frac{\partial z}{\partial y} = z$ given that $z(x, 0) = 3e^{-5x}$

c) Solve: $(D^2 - D - 2)y = 2\log x + \frac{1}{x} + \frac{1}{x^2}$

Section – II

Q.5 Attempt any three of the following. **09**

a) Find the value of k if each of the following functions is a probability density function.

$$f(x) = \begin{cases} kx^2(1-x^3), & 0 \le x \le 1 \\ 0, & \text{otherwise} \end{cases}$$

b) The mean life time of 100 fluorescent light bulbs produced by a Company is computed to be 1570 Hrs. with S.D. of 120 Hrs. If μ is the mean lifetime of all the bulbs produced by the Company, Test the Hypothesis $\mu = 1600$ Hrs. Against the alternative Hypothesis $\mu \neq 1600$ Hrs. using 5% level of Significance.
(Given Expected value at 5% LOS is 1.96)

c) Calculate the coefficient of correlation between height of father and height of son from the following data.

Height of father	64	65	66	67	68	69	70
Height of son	66	67	65	68	70	68	71

d) Two independent random sample have the following data,
$\overline{x_1} = 110, \sigma_1 = 25, n_1 = 16$
$\overline{x_2} = 120, \sigma_2 = 30, n_2 = 9$
If σ_1 and σ_2 are the S. D. of the populations. Test the hypothesis that $\mu_1 = \mu_2$ at 5% level of significance. (The table value of t at $\alpha = 0.05$ for $v = 23$ degrees of freedom is 2.069)

e) If in a lot of 500 solenoids 25 are defective, find the probability that there will be 0, 1, 2 defective solenoids in a random sample of 20 solenoids.

Q.6 Attempt any three of the following. **09**

a) If two independent random samples of sizes 15 and 8 have respectively the following mean and population standard deviations, $\overline{x_1} = 980, \overline{x_2} = 1012; \sigma_1 = 75, \sigma_2 = 80$. Test the hypothesis that $\mu_1 = \mu_2$ at 5% level of significance.
(Given Expected value at 5% LOS with 21 DF is 2.080)

b) The number of telephone calls received by an operator in a ten-minute interval follows a Poisson distribution with mean 1. What is the probability of receiving (i) no call, (ii) less than four calls, in the interval? What is the most likely number of calls?

c) Calculate the equations of the lines of regression. Given
Mean of $x = 50.07$, S.D. of $x = 5.26$
Mean of $y = 9.98$, S.D. of $y = 2.59$
$r = 0.898$

d) In an intelligence test administered to 1000 children the mean score was, 42 with s.d. 24. Find the number of children (i) scoring more than 60 and (ii) between 20 and 40 assuming the distribution to be normal.
(Given: For S.N.V. z area from z = 0 to z = 0.75 is 0.2734, that between z = 0 and z = 0.9167 is 0.3202 and that between z = 0 to z = 0.08333 is 0.0332.)

e) Fit a Straight line $y = a + bx$ to the following data.

x	0	1	2	3	4	5
y	1	2	3	4.5	6	7.5

Q.7 Attempt any Two. **10**

a) Fit a Poisson's distribution to the following data :

X	0	1	2	3	4	Total
f	112	63	20	4	1	200

b) Obtain a second-degree curve to the following data.

Year	1965	1966	1967	1968	1969	1970	1971	1972
Profit (in Corers Rs.)	125	140	165	195	200	215	220	230

Also estimate the profit in 1973.

c) Ten school boys were given a test in Statistics and their scores were recorded. They were given a month's special coaching and a second test was given to them in the same subject at the end of the coaching period. Test if the marks given below give evidence to the fact that the students are benefitted by coaching.
Marks in test I: 70, 68, 56, 75, 80, 90, 68, 75, 56, 58
Marks in Test II: 68, 70, 52, 73, 75, 78, 80, 92, 54, 55
(Given that value of t_α at 5 % LOS for v = 9 degrees of freedom is 1.86 for one tailed test)

MCQ/Objective Type Questions

Duration: 30 Minutes Marks:14

Q.1 Choose the correct Answer. **14**

1) Which dimension of e-commerce enables commerce beyond the boundaries of the country?
a) Richness b) Interactivity
c) Global Reach d) Ubiquity

2) Which of the following describes the definition of electronic commerce?
a) Doing business
b) Sale and purchase of goods
c) Doing business electronically
d) All of the above mentioned

3) Which e-commerce model involves the sale of goods or services from businesses to the general public?
a) Business to Government b) Business to Consumer
c) Business to Business d) Consumer to Business

4) All of the following are major B2C business models except _____.
a) content provider b) industry consortium
c) transaction broker d) service provider

5) Which of the following advantage of E-commerce?
a) Ability to operate 24/7
b) Inability to personalize the shopping
c) Higher operational cost
d) Limited reach CO1 I

6) Which e-commerce transaction provides the benefits of eliminating the requirement of a middleman?

a) Business to Business b) Business to Government
c) Consumer to Business d) Business to Consumer

7) After completing an E-Commerce transaction, the seller and buyer should be provided an opportunity to _____ their transaction experience.

a) undo b) regret
c) provide rating for d) forget

8) Which of the following is a common digital marketing strategy used in E-commerce?

a) Search Engine Optimization (SEO)
b) Traditional print advertising
c) Cold-calling potential customers
d) Distributing flyers in local neighborhoods

9) Digital Cash has following characteristic _____.

a) Anonymity b) Security
c) Confidentiality d) All above

10) Which component of E-commerce ensures secure online transactions and customer data protection?

a) Payment gateways b) Shopping carts
c) Product catalogs d) Data warehouses

11) Which type of attack is a method of defeating a cryptographic scheme of trying a large number of possibilities?

a) Teardrop attack b) Brute force attack
c) Phlashing d) Smurf attack

12) What is the another name called PDoS?

a) Brute force attack b) Non technical attack
c) Phlashing d) Smurf attack

13) What does the term “data security” refer to in E-commerce?

a) The use of cookies to track customer behavior
b) The protection of customer data from unauthorized access and breaches
c) The analysis of customer browsing history for personalized recommendations
d) The process of categorizing customer data for marketing purposes

14) Which of the following is a characteristic of E-commerce marketplaces?

a) They only allow B2C transactions
b) They sell physical products exclusively
c) They are limited to a specific geographical area
d) Multiple sellers can list their products to reach a broader audience

MCQ/Objective Type Questions

Duration: 30 Minutes Marks:14

Q.1 Choose the correct Answer. **14**

1) The main focus of the humanities is: _____.
a) Scientific experiments
b) Human culture and expression
c) Market trends and economies
d) Medical advancements

2) Which of the following does not come under the humanities?
a) Philosophy b) Literature
c) Physics d) Art History

3) The main focus of social sciences is on:
a) The physical and natural world
b) Human society and social relationships
c) Ancient artifacts
d) Chemical compositions

4) The study of language structure and its evolution is called: _____.
a) Sociology b) Linguistics
c) Psychology d) Anthropology

5) Identify the key person in philosophy _____.
a) Isaac Newton b) Leonardo da Vinci
c) Aristotle d) Charles Darwin

6) The archaeology focuses on: _____.
a) Economic theories
b) The study of celestial bodies
c) Material remains of past societies
d) Genetic research

7) Which of the following disciplines deals with political systems and governance?

a) Economics b) Political Science
c) Sociology d) Cultural Studies

8) Sociology mainly focuses on: _____.

a) Artistic techniques
b) Social behaviour and societal structures
c) Social economics
d) Historical events

9) Which discipline studies the production, distribution, and consumption of goods and services?

a) Sociology b) Political Science
c) Economics d) History

10) In which ancient civilization did the term "democracy" originate?

a) Ancient Egypt b) Ancient Greece
c) Ancient Rome d) Mesopotamia

11) Identify the primary focus of ethics in philosophy _____.

a) Logic and reasoning b) Moral principles and conduct
c) Aesthetics and beauty d) Scientific discovery

12) Feminism primarily addresses issues related to: _____.

a) Economic inequality
b) Gender equality and women's rights
c) Political ideologies
d) Technological advancements

13) What is the fundamental problem of economics?

a) Production of goods b) Scarcity of resources
c) Inflation d) Trade barriers

14) Dr. Sigmund Freud is best known for his contributions to: _____.

a) Political science b) Psychoanalysis
c) Economic theory d) Structural linguistics

Set **Q**

S.Y. (B.Tech.) (Sem-I) (New) (NEP CBCS) Examination: March/April-2025
COMPUTER SCIENCE AND ENGINEERING
Industrial and Quality Management (OE-01D)

Day & Date: Wednesday 21-05-2025 Max. Marks: 56
Time: 03:00 PM To 06:00 PM

Instructions: 1) Attempt any two questions from each section.
2) Figures to the right indicate full marks.
3) Assume suitable data if necessary and mention it clearly.

Section – I

Q.2	**a)**	Explain the Social responsibilities and ethics in management.	**07**
	b)	Explain decision making process with types of decision.	**07**
Q.3	**a)**	What is planning process? Explain steps in planning.	**07**
	b)	What is leadership? Explain any four styles.	**07**
Q.4	**a)**	Explain communication and Various types of communications.	**07**
	b)	What is motivation? Explain Maslow's theory of motivation.	**07**

Section – II

Q.5	**a)**	Define quality and state the Steps in quality control.	**07**
	b)	Explain Benchmarking with advantages and disadvantages.	**07**
Q.6	**a)**	Explain Deming Wheel with suitable example.	**07**
	b)	Explain the following as applied to quality control: 1) Appraisal costs 2) Prevention costs 3) Failure costs 4) Optimum costs	**07**

Q.7 **a)** In a manufacturing process the number of defectives found in the inspection of 20 lots of 100 samples is given below. **07**

1) Determine the control limit of P chart and state whether the process is in control or not.
2) Determine the new value of mean fraction defective if some points are out of control. Compute the corresponding control limits and state whether the process is still in control or not.

Lot No.	No. of defectives	Lot No.	No. of Defectives
1	5	11	7
2	4	12	6
3	3	13	3
4	5	14	5
5	4	15	4
6	6	16	2
7	9	17	8
8	15	18	7
9	11	19	6
10	6	20	4

b) Differentiate between single sampling plan & double sampling plan. **07**

Seat No.	

Set **R**

S.Y. (B.Tech.) (Sem-I) (New) (NEP CBCS) Examination: March/April-2025
COMPUTER SCIENCE AND ENGINEERING
Industrial and Quality Management (OE-01D)

Day & Date: Wednesday 21-05-2025 Max. Marks: 70
Time: 03:00 PM To 06:00 PM

Instructions: 1) Q. No. 1 is compulsory. It should be solved in the first 30 minutes in Answer Book Page no 03 (Starting page of the Answer Book). Each question carries one mark.
2) Don't forget to Mention question paper set (P/Q/R/S) on top of page.
3) Figures to the right indicates full marks.
4) Assume suitable data if necessary and mention it clearly.

MCQ/Objective Type Questions

Duration: 30 Minutes Marks:14

Q.1 Choose the correct Answer. **14**

1) Total quality management (TQM) mainly aims for _____.
a) Control for quality b) Usefulness of product
c) Customer satisfaction d) Cost control

2) The statistician who invented the control chart for use in industrial quality control was: _____.
a) Deming b) Taguchi
c) Pareto d) Shewhart
e) None of the above

3) The method of accepting or rejecting the lot is known as _____.
a) Lot sampling b) Acceptance sampling
c) Batch sampling d) Quality control

4) In double sampling plan, second sample is taken when the number of defectives _____.
a) > C1 but < C2 b) > C1
c) > C1 and C2 d) < C2

5) _____ is defined as "the discipline dealing with what is good & bad & with moral duty & obligation".
a) Rule b) Organisation culture
c) Protocol d) Ethics

6) _____ involves establishing the amount of work to be done & the time when each element of the work will start.
a) Planning b) Routing
c) Scheduling d) Organizing

7) In _____ concept product enjoys the supreme importance.
a) Selling b) Marketing
c) Manufacturing d) Business

8) _____ are the greatest importance at the supervisory level.
a) Supervisory skills b) Human relation skills
c) Technical skills d) Planning skills

9) The responsibilities of the operations manager include _____.
a) Planning , organizing , staffing , procuring , and reviewing
b) Forecasting , designing , planning , organizing , and controlling
c) Forecasting , designing , operating , procuring , and reviewing
d) Planning , organizing , staffing , leading , and controlling
e) Designing & operating

10) Self-esteem, status affiliation with others, affection those come under _____ needs.
a) Basic b) Primary
c) Third level of d) Secondary

11) _____ is ability of individual or group to induce or influence the beliefs or action of other person or group.
a) Power b) Authority
c) Post d) Leadership

12) The basic objective of quality control in any organization is to _____.
a) Quality development, quality maintenance and quality improvement activities in organization
b) Achieve optimum cost
c) Achieve customer's satisfaction
d) Achieve all the above

13) Cost associated with defective products being shipped to the customers are called as _____.
a) Cost of internal failure b) Total cost of failure
c) Rejection cost d) Cost of external failure

14) For identification of vital few for the given data, the tool used is _____.
a) Cause-Effect diagram b) Scatter diagram
c) Pareto Analysis d) Check Sheet

MCQ/Objective Type Questions

Duration: 30 Minutes Marks:14

Q.1 Choose the correct Answer. **14**

1) Laplace transform of $\int_0^t u^3 du =$_____.

a) $\frac{3}{s^5}$ b) $\frac{6}{s^5}$

c) $\frac{1}{s^5}$ d) $\frac{6}{s^4}$

2) If $L\{f(t)\} = \emptyset(s)$, then $L\{f(at)\} =$ _____.

a) $\emptyset\left(\frac{s}{a}\right)$ b) $\frac{1}{s}\emptyset\left(\frac{s}{a}\right)$

c) $\emptyset'\left(\frac{s}{a}\right)$ d) $\frac{1}{a}\emptyset\left(\frac{s}{a}\right)$

3) $L^{-1}\left\{\frac{1}{s^2+3^2}\right\} =$_____.

a) $\frac{1}{3}\sin 3t$ b) $\frac{1}{3}\cos 3t$

c) $\frac{1}{3}\cosh 3t$ d) $\frac{1}{3}\sinh 3t$

4) For $\frac{d^2y}{dx^2} + 4\frac{dy}{dx} + 3y = 3e^{2x}$, the particular integral is _____.

a) $\frac{1}{15}e^{2x}$ b) $3e^{2x}$

c) $\frac{1}{5}e^{2x}$ d) $C_1e^{-x} + C_2e^{-2x}$

5) The general solution of the equation $(D^3 - 7D - 6)y = 0$ is _____.

a) $y = c_1e^{-x} + c_2e^{2x} + c_3e^{-3x}$

b) $y = c_1e^{-x} + c_2e^{2x} + c_3e^{3x}$

c) $y = c_1e^{-x} + c_2e^{-2x} + c_3e^{-3x}$

d) None of these

6) $z\{k\} =$_____ for $|z| > 1$

a) $\frac{z}{z-1}$ b) $\frac{1}{(z-1)^2}$

c) $\frac{z}{(z-1)^2}$ d) $\frac{z}{(z+1)^2}$

7) If $z\{f(k)\} = F(z)$, then $z\{a^k f(k)\} =$ _____.

a) $f\left(\frac{a}{z}\right)$ b) $f\left(\frac{z}{a}\right)$

c) $\frac{1}{a}f\left(\frac{z}{a}\right)$ d) None

8) $Z\left\{\frac{1}{k!}\right\} =?$ for $k \geq 0$

a) e^z b) $e^{\frac{1}{z}}$

c) $\frac{1}{z}$ d) $\frac{1}{1-z}$

9) The Fourier sine transform of $f(x)$ is given by _____.

a) $\sqrt{\frac{2}{\pi}}\int_{-\infty}^{\infty} f(x)\sin sx\, dx$ b) $\int_{-\infty}^{\infty} f(x)\cos sx\, dx$

c) $\sqrt{\frac{2}{\pi}}\int_{0}^{\infty} f(x)\sin sx\, dx$ d) $\sqrt{\frac{\pi}{2}}\int_{0}^{\infty} f(x)\sin sx\, dx$

10) From the result $\int_{-\infty}^{\infty} \frac{\cos sx.\sin sk}{s} ds = \begin{cases} \pi & , \ |x| < k \\ 0 & , \ |x| > k \end{cases}$ we can deduce that $\int_0^{\infty} \frac{\sin sk}{s}\, ds =$ _____.

a) 0 b) 1

c) π d) $\frac{\pi}{2}$

11) The first real positive root of $x^3 = 6x - 4$ by Newton Raphson method near $x_0 = 1$ is _____.

a) 0.6667 b) 0.6

c) 0.4 d) 0.3

12) How many steps does the fourth-order Runge-Kutta method use?

a) Two steps b) Five steps

c) Four steps d) Three steps

13) In the interval $(0, a)$ the constant term in the Fourier series of $f(x) = \frac{a}{2} - x$ is _____.

a) 0 b) 1

c) $\frac{a^2}{2\pi}$ d) $\frac{a^2}{4\pi}$

14) Fourier series of $f(x) = x\ in(-\pi, \pi)$ will contain ____

a) No sine term b) No cosine term

c) Both cosine and sine term d) None of these

Seat No.

Time: 03:00 PM To 06:00 PM

Instructions: 1) All questions are compulsory.
2) Figures to the right indicate full marks.
3) Use of non-programmable calculator is allowed.

Section – I

Q.2 Attempt any three **09**

a) Solve : $(D^2 + 4D + 5)y = -2\cos hx + 2^x$

b) Solve $(D^2 + 2D + 1)y = x\cos x$

c) Find Z-transform of $x_k = 2^k \cos(3k + 2)\,, k \geq 0$

d) Find Z-transform of $x_k = k^2 e^{-ak}, k \geq 0$

e) Find the inverse Laplace transform of following by using the Convolution theorem of $\left[\frac{1}{s(s^2+4)}\right]$

Q.3 Attempt any three of the following. **09**

a) Evaluate by using Laplace transform $\int_0^\infty \left(\frac{e^{-t}-e^{-3t}}{t}\right) dt$

b) Find the inverse Z-transform of $f(k) = \begin{cases} 4^k, & k < 0 \\ 3^k, & k \geq 0 \end{cases}$

c) Find $Z\{e^{-3k}\sin 2k\}, k \geq 0$

d) Solve $(D^2 - 1)y = (1 + e^{-x})^2$

e) Find Laplace Transform of $\{t\cos 2t\}$

Q.4 Attempt any two **10**

a) Find the inverse Z-transform of $\frac{1}{(z-a)^2}$ if

1) $|z| < a$,
2) $|z| > a$,

b) Find the inverse Laplace transform of following by using the Convolution theorem of $\left[\frac{s^2}{(s^2+a^2)(s^2+b^2)}\right]$

c) Solve $(D^2 - 6D + 13)y = e^{x\log 2} + 8e^{3x}\sin 4x$

Section – II

Q.5 Attempt any three **09**

a) Evaluate $\int_0^5 \frac{1}{4x+5} dx$ using $n = 5$ by Trapezoidal rule.

b) Evaluate $I = \int_0^2 e^{-x} dx$ by using the Simpson's 1/3rd rule given h= 0.5

c) Obtain half range cosine series $f(x) = x$ in $0 < x < 1$

d) Find the Fourier series expansion of $f(x) = x^2$ in $(-\pi, \pi)$

e) Find the Fourier transform of $f(x) = \begin{cases} \frac{1}{2\epsilon}, & |x| \leq \epsilon \\ 0, & |x| > \epsilon \end{cases}$

Q.6 Attempt any three **09**

a) Find f(x) if its Fourier sine transform e^{-as}

b) Find the Fourier cosine transform of

$f(x)$, if $f(x) = \begin{cases} 1, & 0 \leq x < 1 \\ 0, & x \geq 1 \end{cases}$

c) Find the Fourier series expansion of $f(x) = x$ in $(-\pi, \pi)$

d) Solve by Newton Raphson method $x^4 - x = 10$ correct to four decimal places. (perform two iterations only)

e) Find $\int_0^6 \frac{1}{1+x^2} dx\ n = 6$ using Simpson's 3/8th rule.

Q.7 Attempt any two. **10**

a) Find $\int_1^8 \frac{1}{1+x} dx\ h = 1$ by using Trapezoidal rule and Simpson's 1/3rd rule.

b) Find Fourier transform of

$f(x) = 1\ |x| < k$

$= 0\ |x| > k$ and

Hence evaluate i) $\int_{-\infty}^{\infty} \frac{\sin sk . \cos sk}{s} ds$ ii) $\int_{-\infty}^{\infty} \frac{sin\ ks}{s} ds$

c) Find the Fourier series expansion of the function $f(x) = e^{-\alpha x}$ in $(0, 2\pi)$

MCQ/Objective Type Questions

Duration: 30 Minutes Marks:14

Q.1 Choose the correct Answer. **14**

1) $Z\left\{\frac{1}{k!}\right\} = ?$ for $k \geq 0$

a) e^z b) $e^{\frac{1}{z}}$

c) $\frac{1}{z}$ d) $\frac{1}{1-z}$

2) The Fourier sine transform of $f(x)$ is given by _____.

a) $\sqrt{\frac{2}{\pi}}\int_{-\infty}^{\infty} f(x)\sin sx\, dx$ b) $\int_{-\infty}^{\infty} f(x)\cos sx\, dx$

c) $\sqrt{\frac{2}{\pi}}\int_{0}^{\infty} f(x)\sin sx\, dx$ d) $\sqrt{\frac{\pi}{2}}\int_{0}^{\infty} f(x)\sin sx\, dx$

3) From the result $\int_{-\infty}^{\infty}\frac{\cos sx.\sin sk}{s}ds = \begin{cases}\pi & , \ |x| < k \\ 0 & , \ |x| > k\end{cases}$ we can deduce that $\int_0^{\infty}\frac{\sin sk}{s}\, ds =$ _____.

a) 0 b) 1

c) π d) $\frac{\pi}{2}$

4) The first real positive root of $x^3 = 6x - 4$ by Newton Raphson method near $x_0 = 1$ is _____.

a) 0.6667 b) 0.6

c) 0.4 d) 0.3

5) How many steps does the fourth-order Runge-Kutta method use?

a) Two steps b) Five steps

c) Four steps d) Three steps

6) In the interval $(0, a)$ the constant term in the Fourier series of $f(x) = \frac{a}{2} - x$ is _____.

a) 0 b) 1

c) $\frac{a^2}{2\pi}$ d) $\frac{a^2}{4\pi}$

7) Fourier series of $f(x) = x\ in(-\pi, \pi)$ will contain _____

a) No sine term b) No cosine term

c) Both cosine and sine term d) None of these

8) Laplace transform of $\int_0^t u^3 du =$_____.

a) $\frac{3}{s^5}$ b) $\frac{6}{s^5}$

c) $\frac{1}{s^5}$ d) $\frac{6}{s^4}$

9) If $L\{f(t)\} = \emptyset(s)$, then $L\{f(at)\} =$ _____.

a) $\emptyset\left(\frac{s}{a}\right)$ b) $\frac{1}{s}\emptyset\left(\frac{s}{a}\right)$

c) $\emptyset'\left(\frac{s}{a}\right)$ d) $\frac{1}{a}\emptyset\left(\frac{s}{a}\right)$

10) $L^{-1}\left\{\frac{1}{s^2+3^2}\right\} =$_____.

a) $\frac{1}{3}\sin 3t$ b) $\frac{1}{3}\cos 3t$

c) $\frac{1}{3}\cosh 3t$ d) $\frac{1}{3}\sinh 3t$

11) For $\frac{d^2y}{dx^2} + 4\frac{dy}{dx} + 3y = 3e^{2x}$, the particular integral is _____.

a) $\frac{1}{15}e^{2x}$ b) $3e^{2x}$

c) $\frac{1}{5}e^{2x}$ d) $C_1e^{-x} + C_2e^{-2x}$

12) The general solution of the equation $(D^3 - 7D - 6)y = 0$ is _____.

a) $y = c_1e^{-x} + c_2e^{2x} + c_3e^{-3x}$

b) $y = c_1e^{-x} + c_2e^{2x} + c_3e^{3x}$

c) $y = c_1e^{-x} + c_2e^{-2x} + c_3e^{-3x}$

d) None of these

13) $z\{k\} =$_____ for $|z| > 1$

a) $\frac{z}{z-1}$ b) $\frac{1}{(z-1)^2}$

c) $\frac{z}{(z-1)^2}$ d) $\frac{z}{(z+1)^2}$

14) If $z\{f(k)\} = F(z)$, then $z\{a^k f(k)\} =$ _____.

a) $f\left(\frac{a}{z}\right)$ b) $f\left(\frac{z}{a}\right)$

c) $\frac{1}{a} f\left(\frac{z}{a}\right)$ d) None

c) Find Z-transform of $x_k = 2^k \cos(3k + 2)\,, k \geq 0$

d) Find Z-transform of $x_k = k^2 e^{-ak}, k \geq 0$

e) Find the inverse Laplace transform of following by using the Convolution theorem of $\left[\frac{1}{s(s^2+4)}\right]$

Q.3 Attempt any three of the following. **09**

a) Evaluate by using Laplace transform $\int_0^\infty \left(\frac{e^{-t}-e^{-3t}}{t}\right) dt$

b) Find the inverse Z-transform of $f(k) = \begin{cases} 4^k, & k < 0 \\ 3^k, & k \geq 0 \end{cases}$

c) Find $Z\{e^{-3k}\sin 2k\}, k \geq 0$

d) Solve $(D^2 - 1)y = (1 + e^{-x})^2$

e) Find Laplace Transform of $\{t\cos 2t\}$

Q.4 Attempt any two **10**

a) Find the inverse Z-transform of $\frac{1}{(z-a)^2}$ if

1) $|z| < a$,
2) $|z| > a$,

b) Find the inverse Laplace transform of following by using the Convolution theorem of $\left[\frac{s^2}{(s^2+a^2)(s^2+b^2)}\right]$

c) Solve $(D^2 - 6D + 13)y = e^{x\log 2} + 8e^{3x}\sin 4x$

Section – II

Q.5 Attempt any three **09**

a) Evaluate $\int_0^5 \frac{1}{4x+5} dx$ using $n = 5$ by Trapezoidal rule.

b) Evaluate $I = \int_0^2 e^{-x} dx$ by using the Simpson's 1/3rd rule given h= 0.5

c) Obtain half range cosine series $f(x) = x$ in $0 < x < 1$

d) Find the Fourier series expansion of $f(x) = x^2$ in $(-\pi, \pi)$

e) Find the Fourier transform of $f(x) = \begin{cases} \frac{1}{2\epsilon}, & |x| \leq \epsilon \\ 0, & |x| > \epsilon \end{cases}$

Q.6 Attempt any three **09**

a) Find f(x) if its Fourier sine transform e^{-as}

b) Find the Fourier cosine transform of

$f(x)$, if $f(x) = \begin{cases} 1, & 0 \leq x < 1 \\ 0, & x \geq 1 \end{cases}$

c) Find the Fourier series expansion of $f(x) = x$ in $(-\pi, \pi)$

d) Solve by Newton Raphson method $x^4 - x = 10$ correct to four decimal places. (perform two iterations only)

e) Find $\int_0^6 \frac{1}{1+x^2} dx \; n = 6$ using Simpson's 3/8th rule.

Q.7 Attempt any two. **10**

a) Find $\int_1^8 \frac{1}{1+x} dx \; h = 1$ by using Trapezoidal rule and Simpson's 1/3rd rule.

b) Find Fourier transform of

$f(x) = 1 \; |x| < k$

$= 0 \; |x| > k$ and

Hence evaluate i) $\int_{-\infty}^{\infty} \frac{\sin sk . \cos sk}{s} ds$ ii) $\int_{-\infty}^{\infty} \frac{\sin ks}{s} ds$

c) Find the Fourier series expansion of the function $f(x) = e^{-\alpha x}$ in $(0, 2\pi)$

S.Y. (B. Tech) (Sem-I) (New) (NEP CBCS) Examination: March/April-2025
COMPUTER SCIENCE AND ENGINEERING
Mathematics for Software and Hardware (OE-01E)

Day & Date: Wednesday 21-05-2025 Max. Marks: 70
Time: 03:00 PM To 06:00 PM

Instructions: 1) Q. No. 1 is compulsory. It should be solved in the first 30 minutes in Answer Book Page no 03 (Starting page of the Answer Book). Each question carries one mark.
2) Don't forget to Mention question paper set (P/Q/R/S) on top of page.
3) Figures to the right indicates full marks.
4) Use of non-programmable calculator is allowed.

MCQ/Objective Type Questions

Duration: 30 Minutes Marks:14

Q.1 Choose the correct Answer. **14**

1) The first real positive root of $x^3 = 6x - 4$ by Newton Raphson method near $x_0 = 1$ is _____.

a) 0.6667 b) 0.6
c) 0.4 d) 0.3

2) How many steps does the fourth-order Runge-Kutta method use?

a) Two steps b) Five steps
c) Four steps d) Three steps

3) In the interval $(0, a)$ the constant term in the Fourier series of $f(x) = \frac{a}{2} - x$ is _____.

a) 0 b) 1
c) $\frac{a^2}{2\pi}$ d) $\frac{a^2}{4\pi}$

4) Fourier series of $f(x) = x\ in(-\pi, \pi)$ will contain ____

a) No sine term b) No cosine term
c) Both cosine and sine term d) None of these

5) Laplace transform of $\int_0^t u^3 du$ =_____.

a) $\frac{3}{s^5}$ b) $\frac{6}{s^5}$
c) $\frac{1}{s^5}$ d) $\frac{6}{s^4}$

6) If $L\{f(t)\} = \emptyset(s)$, then $L\{f(at)\} =$ _____.

a) $\emptyset\left(\frac{s}{a}\right)$ b) $\frac{1}{s}\emptyset\left(\frac{s}{a}\right)$

c) $\emptyset'\left(\frac{s}{a}\right)$ d) $\frac{1}{a}\emptyset\left(\frac{s}{a}\right)$

7) $L^{-1}\left\{\frac{1}{s^2+3^2}\right\} =$_____.

a) $\frac{1}{3}\sin 3t$ b) $\frac{1}{3}\cos 3t$

c) $\frac{1}{3}\cosh 3t$ d) $\frac{1}{3}\sinh 3t$

8) For $\frac{d^2y}{dx^2} + 4\frac{dy}{dx} + 3y = 3e^{2x}$, the particular integral is _____.

a) $\frac{1}{15}e^{2x}$ b) $3e^{2x}$

c) $\frac{1}{5}e^{2x}$ d) $C_1e^{-x} + C_2e^{-2x}$

9) The general solution of the equation $(D^3 - 7D - 6)y = 0$ is _____.

a) $y = c_1e^{-x} + c_2e^{2x} + c_3e^{-3x}$

b) $y = c_1e^{-x} + c_2e^{2x} + c_3e^{3x}$

c) $y = c_1e^{-x} + c_2e^{-2x} + c_3e^{-3x}$

d) None of these

10) $z\{k\} =$_____ for $|z| > 1$

a) $\frac{z}{z-1}$ b) $\frac{1}{(z-1)^2}$

c) $\frac{z}{(z-1)^2}$ d) $\frac{z}{(z+1)^2}$

11) If $z\{f(k)\} = F(z)$, then $z\{a^k f(k)\} =$ _____.

a) $f\left(\frac{a}{z}\right)$ b) $f\left(\frac{z}{a}\right)$

c) $\frac{1}{a}f\left(\frac{z}{a}\right)$ d) None

12) $Z\left\{\frac{1}{k!}\right\} =$? for $k \geq 0$

a) e^z b) $e^{\frac{1}{z}}$

c) $\frac{1}{z}$ d) $\frac{1}{1-z}$

13) The Fourier sine transform of $f(x)$ is given by _____.

a) $\sqrt{\frac{2}{\pi}}\int_{-\infty}^{\infty} f(x)\sin sx\ dx$

b) $\int_{-\infty}^{\infty} f(x)\cos sx\ dx$

c) $\sqrt{\frac{2}{\pi}}\int_{0}^{\infty} f(x)\sin sx\ dx$

d) $\sqrt{\frac{\pi}{2}}\int_{0}^{\infty} f(x)\sin sx\ dx$

14) From the result $\int_{-\infty}^{\infty}\frac{\cos sx.\sin sk}{s}ds = \begin{cases}\pi & , \ |x| < k \\ 0 & , \ |x| > k\end{cases}$ we can deduce that $\int_{0}^{\infty}\frac{\sin sk}{s}\ ds =$ _____.

a) 0

b) 1

c) π

d) $\frac{\pi}{2}$

MCQ/Objective Type Questions

Duration: 30 Minutes Marks:14

Q.1 Choose the correct Answer. **14**

1) What is feedback in communication?
a) The process of encoding a message.
b) The process of transmitting the message.
c) The response or reaction to a message.
d) The process of decoding a message.

2) In the process of communication 'Encoding' means _____.
a) Using symbol to express an idea
b) Deciphering the message
c) Creating noise in the communication
d) Interpreting the meaning of message

3) Empathy refers to: _____.
a) Capacity to understand or feel what another person feels
b) Having better understanding of partner's emotions
c) The higher the likelihood of self harm
d) Getting what one wants out of the relationship

4) Repots, suggestions, appeals grievances etc. are examples of: _____.
a) Down ward communication
b) Upward communication
c) Horizontal communication
d) Informal communication

5) Informal communication is commonly known as: _____.
a) Down ward communication b) Upward communication
c) Horizontal communication d) Grapevine

6) _____ is not a communication barrier?
a) Language b) Culture
c) Habits d) Physical

7) Which of the following is NOT a component of communication?
a) Sender b) Message
c) Receiver d) Translator

8) Emotional Intelligence primarily refers to the ability to: _____.
a) Understand and manage one's own emotions and the emotions of others
b) Solve mathematical problems
c) Memorize large amounts of information
d) Make logical decisions without emotions

9) Time management can help reduce stress by: _____
a) Creating unnecessary pressure
b) Organizing tasks and prioritizing effectively
c) Avoiding responsibilities altogether
d) Increasing the workload

10) The term “self-regulation” in Emotional Intelligence means: _____.
a) Hiding your emotions from others
b) Controlling impulsive behaviours and adapting to changing circumstances
c) Ignoring your emotional responses
d) Following strict rules without considering emotions

11) What is the primary purpose of a job interview?
a) To test the candidate's academic knowledge
b) To compare the candidate's qualifications with others
c) To discuss salary expectations only
d) To assess the candidate’s suitability for the job role

12) What kind of information will you collect before going to an interview?
a) About the job you are applying for
b) About the company
c) About the work culture
d) All of the above

13) Which of the following is an effective stress management technique?
a) Procrastination
b) Deep breathing and relaxation exercises
c) Avoiding physical activity
d) Excessive multitasking

14) Which of the following is an important step to prepare for an interview?
a) Memorizing answers word for word
b) Arriving late to showcase confidence
c) Avoiding practice to appear natural
d) Researching the company and role

S. Y. (B.Tech.) (Sem-I) (New) (NEP CBCS) Examination: March/April-2025
COMPUTER SCIENCE AND ENGINEERING
Soft Skills and Personality Development (OE-01F)

Day & Date: Wednesday 21-05-2025 Max. Marks: 56
Time: 03:00 PM To 06:00 PM

Instructions: 1) All questions are compulsory.
2) Figures to the right indicate full marks.

Section – I

Q.2 Attempt any Two. **12**

a) Define human communication and explain importance of communication.
b) Explain in brief:
1) Personal Barrier
2) Social Barrier
c) Enlighten in a brief strategy to improve emotional intelligence.

Q.3 Attempt any Four. **16**

a) Explain importance of emotional intelligence.
b) State advantages and disadvantages of informal communication.
c) Describe different modes of communication.
d) Highlight role of social awareness as key factor of emotional intelligence.
e) Explain relationship management as key factor of emotional intelligence.

Section – II

Q.4 Attempt any Two. **12**

a) What is interview? Explain various steps in the process of interview.
b) Explain importance of time management.
c) Explain the four P's of effective presentation.

Q.5 Attempt any Four. **16**

a) Explain importance of stress management.
b) Explain various types of interviews.
c) Describe various strategies for effective time management.
d) Explain various strategies of stress management.
e) Write short note on: Non- verbal aspects of presentation.

MCQ/Objective Type Questions

Duration: 30 Minutes Marks:14

Q.1 Choose the correct Answer. **14**

1) What is the primary purpose of a job interview?
a) To test the candidate's academic knowledge
b) To compare the candidate's qualifications with others
c) To discuss salary expectations only
d) To assess the candidate's suitability for the job role

2) What kind of information will you collect before going to an interview?
a) About the job you are applying for
b) About the company
c) About the work culture
d) All of the above

3) Which of the following is an effective stress management technique?
a) Procrastination
b) Deep breathing and relaxation exercises
c) Avoiding physical activity
d) Excessive multitasking

4) Which of the following is an important step to prepare for an interview?
a) Memorizing answers word for word
b) Arriving late to showcase confidence
c) Avoiding practice to appear natural
d) Researching the company and role

5) What is feedback in communication?
a) The process of encoding a message.
b) The process of transmitting the message.
c) The response or reaction to a message.
d) The process of decoding a message.

6) In the process of communication 'Encoding' means _____.
a) Using symbol to express an idea
b) Deciphering the message

MCQ/Objective Type Questions

Duration: 30 Minutes Marks:14

Q.1 Choose the correct Answer. **14**

1) What is the primary focus of Design Thinking?
a) Maximizing shareholder
b) Developing innovative and user-centered solutions
c) Streamlining manufacturing processes
d) Enhancing employee productivity

2) Which of the following correctly lists the first three phases of the Design Thinking process?
a) Empathize, Ideate, Prototype
b) Define, Ideate, Test
c) Empathize, Define, Ideate
d) Prototype, Test, Implement

3) In the context of Design Thinking, what is "brainstorming" used for?
a) Generating a wide range of ideas
b) Testing final products
c) Developing financial models
d) Identifying user pain points

4) What does a "customer journey map" help to visualize?
a) The financial cost of product development
b) The steps a customer goes through while interacting with a product or service
c) The design specifications of a product
d) The competitive landscape of a market

5) Which tool in Design Thinking helps in understanding the target user's needs and behaviors?
a) Prototype b) Persona
c) SWOT analysis d) Business model canvas

6) What is the final phase in the Design Thinking process?
a) Test b) Implement
c) Prototype d) Ideate

7) Which of the following is NOT an objective of design thinking?
a) To create user-friendly products
b) To streamline manufacturing processes
c) To encourage iterative prototyping
d) To enhance collaboration among teams

8) Which of the following is a benefit of using design thinking?
a) Reduces product variety b) Increases customer satisfaction
c) Limits team collaboration d) Eliminates risk in decision-making

9) What role does technology play in innovation management?
a) It complicates processes
b) It is irrelevant to innovation
c) It serves as a tool for enhancing efficiency and creativity
d) It replaces human input

10) Which leadership style involves making decisions based on input from team members?
a) Autocratic b) Laissez-faire
c) Democratic d) Transactional

11) What does "Product Solution Fit" refer to?
a) The alignment of the product with customer needs and problems
b) The product's price in relation to competitors
c) The marketing strategy for the product
d) The technical specifications of the product

12) Which of the following best defines "Product Market Fit"?
a) The degree to which a product meets the demands of a specific market
b) The number of products available in the market
c) The financial performance of a product
d) The product's popularity on social media

13) What is the primary goal of service design?
a) To reduce costs
b) To enhance customer experience
c) To standardize services
d) To simplify service offerings

14) Which of the following is a key principle of service design?
a) Focus on profitability over customer satisfaction
b) User-centered design
c) Minimal feedback from users
d) Rigid service processes

6) What does "Product Solution Fit" refer to?
a) The alignment of the product with customer needs and problems
b) The product's price in relation to competitors
c) The marketing strategy for the product
d) The technical specifications of the product

7) Which of the following best defines "Product Market Fit"?
- a) The degree to which a product meets the demands of a specific market
- b) The number of products available in the market
- c) The financial performance of a product
- d) The product's popularity on social media

8) What is the primary goal of service design?
- a) To reduce costs
- b) To enhance customer experience
- c) To standardize services
- d) To simplify service offerings

9) Which of the following is a key principle of service design?
- a) Focus on profitability over customer satisfaction
- b) User-centered design
- c) Minimal feedback from users
- d) Rigid service processes

10) What is the primary focus of Design Thinking?
- a) Maximizing shareholder
- b) Developing innovative and user-centered solutions
- c) Streamlining manufacturing processes
- d) Enhancing employee productivity

11) Which of the following correctly lists the first three phases of the Design Thinking process?
- a) Empathize, Ideate, Prototype
- b) Define, Ideate, Test
- c) Empathize, Define, Ideate
- d) Prototype, Test, Implement

12) In the context of Design Thinking, what is "brainstorming" used for?
- a) Generating a wide range of ideas
- b) Testing final products
- c) Developing financial models
- d) Identifying user pain points

13) What does a "customer journey map" help to visualize?
- a) The financial cost of product development
- b) The steps a customer goes through while interacting with a product or service
- c) The design specifications of a product
- d) The competitive landscape of a market

14) Which tool in Design Thinking helps in understanding the target user's needs and behaviors?
- a) Prototype
- b) Persona
- c) SWOT analysis
- d) Business model canvas

Set S

S. Y. (B.Tech.) (Sem-I) (New) (NEP CBCS) Examination: March/April-2025
COMPUTER SCIENCE AND ENGINEERING
Design Thinking: Business Innovation Framework (CIVMDM-01A)

Day & Date: Thursday 22-05-2025 Max. Marks: 56
Time: 03:00 PM To 06:00 PM

Instructions: 1) All questions are compulsory.
2) Figures to the right indicate full marks.

Section – I

Q.2 **a)** Describe each phase of the Design Thinking process in detail, explaining how they contribute to the overall methodology. **06**

b) Provide a comprehensive definition of Design Thinking, including its essential characteristics and principles. **04**

Q.3 **Attempt any three.** **18**

a) Discuss the role of creativity and innovation in organizations and their impact on business performance.

b) What is the importance of empathy in Design Thinking?

c) Define leadership and explain its different types. How can effective leadership influence the success of an organization? Provide examples.

d) Explain the utilization of cognitive technology in decision-making processes.

e) Explain exemplary practices of effective leadership with relevant case studies.

Section – II

Q.4 **a)** Explain exemplary practices of effective leadership with relevant case studies. **06**

b) What is product solution fit, and how does it differ from product market fit? **04**

Q.5 **Attempt any three.** **18**

a) Define the development lifecycle and explain its significance in product development.

b) What are the benefits of implementing service design in organizations?

c) How can organizations effectively design a service to meet customer needs?

d) How does Intellectual Property (IP) play a role in product development and design thinking?

e) Explain any two successful case studies demonstrating design thinking in various engineering sectors.

S. Y (B. Tech) (Sem-I) (New) (NEP CBCS) Examination: March/April-2025
COMPUTER SCIENCE AND ENGINEERING
Introduction to Geographic Information System (CIVMDM-01B)

Day & Date: Thursday, 22-05-2025 Max. Marks: 70
Time: 03:00 PM To 06:00 PM

Instructions: 1) Q. No. 1 is compulsory. It should be solved in the first 30 minutes in Answer Book Page no 03 (Starting page of the Answer Book). Each question carries one mark.
2) Don't forget to Mention question paper set (P/Q/R/S) on top of page.
3) Figures to the right indicates full marks.

MCQ/Objective Type Questions

Duration: 30 Minutes Marks:14

Q.1 Choose the correct alternative from the given options. 14

1) What does GIS integrate spatial data with?
a) Other data resources b) Only tabular data
c) Only hard copy maps d) Only digital maps

2) What is the purpose of GIS software?
a) Data management and analysis
b) Creating physical maps
c) Collecting data only
d) Storing non-spatial data

3) Which of the following is a key function of an information system?
a) Data storage only
b) Data collection and processing
c) Document shredding
d) Manual calculations

4) Statistical data in GIS is primarily used for _____.
a) Data visualization b) Data analysis and interpretation
c) Data storage d) Data collection

5) Satellite data is most commonly used in GIS for _____.
a) Remote sensing b) Data entry
c) Statistical analysis d) Map digitization

6) A zone with a width created around a spatial feature is called as ____.
a) dissolve b) buffer
c) relation d) overlay

7) Network databases is to support relationships of _____.
a) many to many b) one to many
c) none of above d) all of above

8) The sensitivity of a sensor to detect slight differences in energy (brightness) is _____.
a) Spectral resolution b) Spatial resolution
c) Temporal resolution d) Radiometric resolution

9) Descriptive information provides qualitative data about the characteristics and conditions of Earth's surface features _____.
a) qualitative b) quantitative
c) both d) none

10) The instruments which provide electromagnetic radiation of specified wave length or a band of wave lengths to illuminate the earth surface, are called _____.
a) scanner b) passive sensors
c) active sensors d) none of these

11) Canal site selection using GIS is primarily concerned with _____.
a) Mapping the soil composition along the canal route
b) Studying land use in the surrounding areas
c) Identifying areas with the most water flow potential
d) Both a and c

12) What is the primary application of GIS in map revision?
a) To create new maps from scratch
b) To update and modify existing maps with current data
c) To design and print physical maps
d) To analyze spatial data for new projects

13) Which phase of GIS project planning involves the most detailed work on defining technical requirements and hardware/software needs?
a) feasibility study
b) planning and requirements analysis
c) design phase
d) testing phase

14) Which of the following is an example of a GIS design project task?
a) data model development
b) stakeholder consultation
c) site analysis and requirement definition
d) all of these

Instructions: 1) All questions are compulsory.
2) Figures to the right indicate full marks.
3) Draw neat sketch whenever necessary.

Section - I

Q.2 Attempt any four from the following. **16**
a) Describe commercial & open source GIS softwares.
b) Describe in detail data organisation method-layered based approach.
c) Describe field data & its collection methods.
d) Discuss advantages & disadvantages of aerial photographs.
e) Describe in detail run-length encoding.
f) Describe in detail about data analysis.

Q.3 Attempt any two from the following. **12**
a) Describe in detail digitizers, its process, advantages & disadvantages.
b) Describe the organisation of data in GIS.
c) Explain various data models used in DBMS in detail.

Section - II

Q.4 Attempt any four from the following. **16**
a) Explain in detail passive & active remote sensing with sketch.
b) Describe in detail metric information.
c) Describe application of GIS in dam site selection.
d) Describe application of GIS in soil erosion.
e) Explain in detail phases of planning & implementation.
f) Describe characteristics of advanced GIS projects.

Q.5 Attempt any two from the following. **12**
a) Describe need of integration of remote sensing & GIS in detail.
b) Describe key application of GIS in map revision.
c) Describe benefits of GIS implementation plan.

COMPUTER SCIENCE & ENGINEERING
Fundamentals of Material science and Engineering (MECHMDM-01A)

Day & Date: Thursday 22-05-2025 Max. Marks: 70
Time: 03:00 PM To 06:00 PM

Instructions: 1) Q. No. 1 is compulsory. It should be solved in the first 30 minutes in Answer Book Page no 03 (Starting page of the Answer Book). Each question carries one mark.
2) Don't forget to Mention question paper set (P/Q/R/S) on top of page.
3) Figures to the right indicates full marks.
4) Make suitable assumptions if necessary and state them clearly.

MCQ/Objective Type Questions

Duration: 30 Minutes Marks:14

Q.1 Choose the correct Answer. **14**

1) Which of the following is not a primary classification of engineering materials?
a) Metals b) Ceramics
c) Gases d) Polymers

2) Which property is most associated with metals?
a) High electrical conductivity b) High brittleness
c) Low melting point d) Low density

3) The Gibbs phase rule is given by:
a) $P + F = C - 1$ b) $P + F = C + 1$
c) $F = C - P + 2$ d) $F = C + P - 2$

4) Non-ferrous metals are primarily used for their:
a) High strength
b) High corrosion resistance and low density
c) Magnetic properties
d) Low melting point

5) In the eutectic transformation, liquid transforms into:
a) One solid phase b) Two solid phases
c) One liquid and one solid phase d) Three solid phases

6) Which of the following is a characteristic of brass alloy?
a) Primarily composed of copper and tin
b) Primarily composed of copper and zinc
c) Primarily composed, of copper and aluminum
d) Primarily composed of copper ana nickel

7) Bronze alloys are primarily composed of copper and:
a) Zinc b) Aluminum
c) Nickel d) Tin

8) Which of the following is an example of a thermoplastic polymer?
a) Bakelite b) Epoxy resin
c) Polystyrene d) Rubber

9) The ability of a polymer to return to its original shape after deformation is known as:
a) Ductility b) Elasticity
c) Malleability d) Toughness

10) Which of the following properties is enhanced by vulcanization of rubber?
a) High flexibility
b) Increased strength and resistance to wear
c) Decreased thermal stability
d) Decreased electrical resistance

11) Which of the following is NOT a characteristic of ceramic materials?
a) High melting points b) High electrical conductivity
c) Brittle nature d) Good wear resistance

12) Advanced ceramics are typically characterized by:
a) High ductility
b) Low strength
c) High thermal and electrical conductivity
d) High performance at high temperatures

13) Composite materials are widely used in the aerospace industry because they:
a) Are cost-effective and easily available
b) Provide high strength-to-weight ratio
c) Have low thermal resistance
d) Are magnetic in nature

14) Nanomaterials are commonly used in which of the following fields?
a) Drug delivery systems
b) Large-scale structural applications
c) Agricultural machinery
d) Waste disposal

6) Composite materials are widely used in the aerospace industry because they:
a) Are cost-effective and easily available
b) Provide high strength-to-weight ratio
c) Have low thermal resistance
d) Are magnetic in nature

7) Nanomaterials are commonly used in which of the following fields?
a) Drug delivery systems
b) Large-scale structural applications
c) Agricultural machinery
d) Waste disposal

8) Which of the following is not a primary classification of engineering materials?
a) Metals
b) Ceramics
c) Gases
d) Polymers

9) Which property is most associated with metals?
a) High electrical conductivity
b) High brittleness
c) Low melting point
d) Low density

10) The Gibbs phase rule is given by:
a) $\mathrm{P} + \mathrm{F} = \mathrm{C} - 1$
b) $\mathrm{P} + \mathrm{F} = \mathrm{C} + 1$
c) $\mathrm{F} = \mathrm{C} - \mathrm{P} + 2$
d) $\mathrm{F} = \mathrm{C} + \mathrm{P} - 2$

11) Non-ferrous metals are primarily used for their:
a) High strength
b) High corrosion resistance and low density
c) Magnetic properties
d) Low melting point

12) In the eutectic transformation, liquid transforms into:
a) One solid phase
b) Two solid phases
c) One liquid and one solid phase
d) Three solid phases

13) Which of the following is a characteristic of brass alloy?
a) Primarily composed of copper and tin
b) Primarily composed of copper and zinc
c) Primarily composed, of copper and aluminum
d) Primarily composed of copper ana nickel

14) Bronze alloys are primarily composed of copper and:
a) Zinc
b) Aluminum
c) Nickel
d) Tin

Set **Q**

S. Y. (B.Tech.) (Sem-I) (New) (NEP CBCS) Examination: March/April-2025
COMPUTER SCIENCE & ENGINEERING
Fundamentals of Material science and Engineering (MECHMDM-01A)

Day & Date: Thursday 22-05-2025 Max. Marks: 56
Time: 03:00 PM To 06:00 PM

Instructions: 1) Attempt any two full questions from each section.
2) Figures to the right indicate full marks.
3) Make suitable assumptions if necessary and state them clearly.

SECTION – I

Q.2	**a)**	What are engineering materials, and how are they classified?	**07**
	b)	What is a phase diagram? Explain the different types of phase diagrams.	**07**
Q.3	**a)**	Discuss the phases present in the Fe-Fe_3C diagram at different compositions of carbon.	**07**
	b)	Discuss the composition and properties of plain carbon steels.	**07**
Q.4	**a)**	Discuss the composition and properties of brass and bronze.	**07**
	b)	Explain the properties and applications of Al-Cu alloys.	**07**

SECTION – II

Q.5	**a)**	Discuss the differences between thermoplastic and thermosetting polymers.	**07**
	b)	Explain how vulcanization is used to modify the physical properties of natural rubber.	**07**
Q.6	**a)**	What are ceramics, and what makes them different from metals and polymers?	**07**
	b)	Discuss the role of ceramics in the aerospace industry.	**07**
Q.7	**a)**	Explain the classification of composite materials.	**07**
	b)	Explain the role of nanomaterials in electronics and semiconductors.	**07**

Seat No.		Set	R

COMPUTER SCIENCE & ENGINEERING
Fundamentals of Material science and Engineering (MECHMDM-01A)

Day & Date: Thursday 22-05-2025 Max. Marks: 70
Time: 03:00 PM To 06:00 PM

Instructions: 1) Q. No. 1 is compulsory. It should be solved in the first 30 minutes in Answer Book Page no 03 (Starting page of the Answer Book). Each question carries one mark.
2) Don't forget to Mention question paper set (P/Q/R/S) on top of page.
3) Figures to the right indicates full marks.
4) Make suitable assumptions if necessary and state them clearly.

MCQ/Objective Type Questions

Duration: 30 Minutes Marks:14

Q.1 Choose the correct Answer. **14**

1) Which of the following is NOT a characteristic of ceramic materials?
a) High melting points b) High electrical conductivity
c) Brittle nature d) Good wear resistance

2) Advanced ceramics are typically characterized by:
a) High ductility
b) Low strength
c) High thermal and electrical conductivity
d) High performance at high temperatures

3) Composite materials are widely used in the aerospace industry because they:
a) Are cost-effective and easily available
b) Provide high strength-to-weight ratio
c) Have low thermal resistance
d) Are magnetic in nature

4) Nanomaterials are commonly used in which of the following fields?
a) Drug delivery systems
b) Large-scale structural applications
c) Agricultural machinery
d) Waste disposal

5) Which of the following is not a primary classification of engineering materials?
a) Metals b) Ceramics
c) Gases d) Polymers

6) Which property is most associated with metals?
a) High electrical conductivity b) High brittleness
c) Low melting point d) Low density

7) The Gibbs phase rule is given by:
a) $P + F = C - 1$ b) $P + F = C + 1$
c) $F = C - P + 2$ d) $F = C + P - 2$

8) Non-ferrous metals are primarily used for their:
a) High strength
b) High corrosion resistance and low density
c) Magnetic properties
d) Low melting point

9) In the eutectic transformation, liquid transforms into:
a) One solid phase b) Two solid phases
c) One liquid and one solid phase d) Three solid phases

10) Which of the following is a characteristic of brass alloy?
a) Primarily composed of copper and tin
b) Primarily composed of copper and zinc
c) Primarily composed, of copper and aluminum
d) Primarily composed of copper ana nickel

11) Bronze alloys are primarily composed of copper and:
a) Zinc b) Aluminum
c) Nickel d) Tin

12) Which of the following is an example of a thermoplastic polymer?
a) Bakelite b) Epoxy resin
c) Polystyrene d) Rubber

13) The ability of a polymer to return to its original shape after deformation is known as:
a) Ductility b) Elasticity
c) Malleability d) Toughness

14) Which of the following properties is enhanced by vulcanization of rubber?
a) High flexibility
b) Increased strength and resistance to wear
c) Decreased thermal stability
d) Decreased electrical resistance

MCQ/Objective Type Questions

Duration: 30 Minutes Marks:14

Q.1 Choose the correct Answer. **14**

1) What is the primary purpose of management?
a) To maximize profits
b) To achieve organizational goals efficiently
c) To manage resources effectively
d) To implement policies

2) Which approach emphasizes the interdependence of various organizational functions?
a) Classical Approach b) Systems Approach
c) Behavioral Approach d) Contingency Approach

3) What is NOT a function of managers?
a) Planning b) Organizing
c) Playing d) Controlling

4) Which of the following is a responsibility of managers regarding social responsibility?
a) Maximizing shareholder wealth
b) Ensuring employee satisfaction
c) Contributing to community welfare
d) Minimizing costs

5) What is the first step in the planning process?
a) Developing alternatives b) Setting objectives
c) Implementing plans d) Evaluating results

6) Which type of plan is designed to cover a short period?
a) Strategic Plan b) Tactical Plan
c) Operational Plan d) Contingency Plan

7) Which of the following is a part of the staffing function?
a) Budgeting b) Training
c) Planning d) Controlling

8) Which theory focuses on the hierarchy of needs to motivate employees?
a) Herzberg's Two-Factor Theory
b) McGregor's Theory X and Y
c) Maslow's Hierarchy of Needs
d) Adams' Equity Theory

9) What is the main purpose of controlling in management?
a) To set goals
b) To ensure that organizational activities are aligned with plans
c) To improve employee morale
d) To increase production

10) What type of costs includes costs associated with preventing defects?
a) Internal failure costs b) External failure costs
c) Appraisal costs d) Prevention costs

11) Which quality guru is known for his work in the field of quality improvement through statistical methods?
a) Philip Crosby b) W. Edwards Deming
c) Joseph Juran d) Kaoru Ishikawa

12) Which chart is used to monitor the mean of a process over time?
a) R-chart b) P-chart
c) C-chart d) X-bar chart

13) Acceptance sampling is primarily concerned with:
a) Evaluating the entire production process
b) Inspecting all items produced
c) Testing a sample to infer about the quality of the entire lot
d) Conducting customer satisfaction surveys

14) What is the primary goal of employee involvement in TQM?
a) To increase profits
b) To enhance product quality through teamwork and engagement
c) To reduce the number of employees
d) To focus solely on production output

S.Y. (B.Tech.) (Sem-I) (New) (NEP CBCS) Examination: March/April-2025
COMPUTER SCIENCE AND ENGINEERING
Industrial Management (MECHMDM-01B)

Day & Date: Thursday 22-05-2025 Max. Marks: 70
Time: 03:00 PM To 06:00 PM

Instructions: 1) Q. No. 1 is compulsory. It should be solved in the first 30 minutes in Answer Book Page no 03 (Starting page of the Answer Book). Each question carries one mark.
2) Don't forget to Mention question paper set (P/Q/R/S) on top of page.
3) Figures to the right indicates full marks.
4) Make suitable assumptions if necessary and state them clearly.

MCQ/Objective Type Questions

Duration: 30 Minutes Marks:14

Q.1 Choose the correct Answer. **14**

1) Which type of plan is designed to cover a short period?
a) Strategic Plan b) Tactical Plan
c) Operational Plan d) Contingency Plan

2) Which of the following is a part of the staffing function?
a) Budgeting b) Training
c) Planning d) Controlling

3) Which theory focuses on the hierarchy of needs to motivate employees?
a) Herzberg's Two-Factor Theory
b) McGregor's Theory X and Y
c) Maslow's Hierarchy of Needs
d) Adams' Equity Theory

4) What is the main purpose of controlling in management?
a) To set goals
b) To ensure that organizational activities are aligned with plans
c) To improve employee morale
d) To increase production

5) What type of costs includes costs associated with preventing defects?
a) Internal failure costs b) External failure costs
c) Appraisal costs d) Prevention costs

6) Which quality guru is known for his work in the field of quality improvement through statistical methods?
a) Philip Crosby b) W. Edwards Deming
c) Joseph Juran d) Kaoru Ishikawa

7) Which chart is used to monitor the mean of a process over time?
a) R-chart b) P-chart
c) C-chart d) X-bar chart

8) Acceptance sampling is primarily concerned with:
a) Evaluating the entire production process
b) Inspecting all items produced
c) Testing a sample to infer about the quality of the entire lot
d) Conducting customer satisfaction surveys

9) What is the primary goal of employee involvement in TQM?
a) To increase profits
b) To enhance product quality through teamwork and engagement
c) To reduce the number of employees
d) To focus solely on production output

10) What is the primary purpose of management?
a) To maximize profits
b) To achieve organizational goals efficiently
c) To manage resources effectively
d) To implement policies

11) Which approach emphasizes the interdependence of various organizational functions?
a) Classical Approach b) Systems Approach
c) Behavioral Approach d) Contingency Approach

12) What is NOT a function of managers?
a) Planning b) Organizing
c) Playing d) Controlling

13) Which of the following is a responsibility of managers regarding social responsibility?
a) Maximizing shareholder wealth
b) Ensuring employee satisfaction
c) Contributing to community welfare
d) Minimizing costs

14) What is the first step in the planning process?
a) Developing alternatives b) Setting objectives
c) Implementing plans d) Evaluating results

Set **S**

S.Y. (B.Tech.) (Sem-I) (New) (NEP CBCS) Examination: March/April-2025
COMPUTER SCIENCE AND ENGINEERING
Industrial Management (MECHMDM-01B)

Day & Date: Thursday 22-05-2025 Max. Marks: 56
Time: 03:00 PM To 06:00 PM

Instructions: 1) In Section – I, Q. No. 3 is compulsory and attempt any two questions from the remaining questions.
1) In Section – II, Q. No. 6 is compulsory and attempt any two questions from the remaining questions.
2) Figures to the right indicate full marks.
3) Make suitable assumptions if necessary and state them clearly.
4) Draw neat-labelled diagrams wherever necessary.
5) Use of log table and calculators is allowed.

Section – I

Q.2 **a)** What are managerial skills and managerial roles? **05**
b) Explain the Social responsibilities and ethics in management. **04**

Q.3 **a)** What is planning? Explain advantages and disadvantages of planning? **05**
b) What are the types of organizations? Explain Problems with organizational level. **05**

Q.4 **a)** Define Leadership. Explain four extreme styles. **05**
b) Discuss types of communication by taking suitable example. **04**

Q.5 **Write short note on any three.** **09**
a) Channel of distribution
b) Functions of Managers
c) Methods of Departmentation
d) Explain Maslow's theory
e) Decision making

Section – II

Q.6 **a)** Define productivity. How does material management impact the productivity of a manufacturing unit? **05**
b) Explain how the production process is planned and controlled in batch production systems. **05**

Q.7	**a)**	Describe the importance of supplier partnerships in Total Quality Management. What are the key aspects that define a successful supplier partnership?	**05**
	b)	Explain the concept of employee involvement in TQM. How does fostering employee participation contribute to improved quality and productivity?	**04**
Q.8	**a)**	Explain the importance of Training and Development in enhancing employee performance. How can training programs be aligned with organizational goals?	**05**
	b)	What are the objectives of Human Resource Management (HRM)? Discuss how HRM helps in managing employee relations and improving organizational efficiency.	**04**

Q.9 Write short note on any three. **09**

- **a)** Material Requirement Planning (MRP)
- **b)** Batch Production
- **c)** Factors to improve productivity

Time: 03:00 PM To 06:00 PM

Instructions: 1) Q. No. 1 is compulsory. It should be solved in the first 30 minutes in Answer Book Page no 03 (Starting page of the Answer Book). Each question carries one mark.
2) Don't forget to Mention question paper set (P/Q/R/S) on top of page.
3) Figures to the right indicates full marks.

MCQ/Objective Type Questions

Duration: 30 Minutes Marks:14

Q.1 Choose the correct Answer. **14**

1) The terms in SOP are called _____.
a) max terms b) min terms
c) mid terms d) sum terms

2) The number of cells in a K-map with n- variables.
a) 2n b) n^2
c) 2^n d) n

3) The logical sum of two or more logical product terms is called _____.
a) SOP b) POS
c) OR operation d) NAND operation

4) A Karnaugh map (K-map) is an abstract form of _____ diagram organized as a matrix of squares.
a) Venn Diagram b) Cycle Diagram
c) Block diagram d) Triangular Diagram

5) If A and B are the inputs of a half adder, the sum is given by _____.
a) A AND B b) A OR B
c) A XOR B d) A EX-NOR B

6) Let A and B is the input of a Subtractor, then the output will be _____.
a) A XOR B b) A AND B
c) A OR B d) A EX-NOR B

7) What is a multiplexer?

a) It is a type of decoder which decodes several inputs and gives one output
b) A multiplexer is a device which converts many signals into one
c) It takes one input and results into many output
d) It is a type of encoder which decodes several inputs and gives one output

8) A basic S-R flip-flop can be constructed by cross-coupling of which basic logic gates?

a) AND or OR gates
b) XOR or XNOR gates
c) NOR or NAND gates
d) AND or NOR gates

9) In S-R flip-flop, if Q = 0 the output is said to be _____.

a) Set
b) Reset
c) Previous state
d) Current state

10) A D-Flip flop is said to be transparent, when _____.

a) the output is Low
b) the output is High
c) the output follows clock
d) the output follows input

11) How many stable state/states present in flip-flop?

a) 1
b) 0
c) 2
d) 4

12) How many natural states will there be in a 4-bit ripple counter?

a) 4
b) 8
c) 16
d) 32

13) How many flip-flops are required to construct a decade counter?

a) 4
b) 8
c) 5
d) 10

14) A 4-bit counter has a maximum modulus of _____.

a) 3
b) 6
c) 8
d) 16

Section – I

Q.2 Attempt any Four. **16**

a) Explain Standard representation of logic function.
b) Express Boolean function $F = xy + x'z$ as a product of Max-terms.
c) Explain Half Adder with logic diagram.
d) Explain 1:4 De-Multiplexer with truth Table and logic diagram.
e) Explain stepwise procedure for K-map solution.

Q.3 Attempt any two. **12**

a) Explain Binary to Gray conversion in details.
b) Explain Full Adder with suitable diagram
c) Solve using K Map -

$$F\ (A, B, C, D)\ = \sum (0, 2, 5, 7, 8, 10, 13, 15)$$

Section – II

Q.4 Attempt any Four. **16**

a) Explain basic SR Flip-flop using logic gates.
b) Explain D-Flip-Flop with suitable diagram.
c) Differentiate between Synchronous and Asynchronous sequential circuit.
d) Explain PISO shift register.
e) Explain Race-Round condition. How this condition will overcome?

Q.5 Attempt any two. **12**

a) Design MOD-10 Counter.
b) Explain JK Flip flop with suitable diagram, and truth table.
c) Explain 4-bit UP/DOWN counter with suitable diagram.

MCQ/Objective Type Questions

Duration: 30 Minutes Marks:14

Q.1 Choose the correct Answer. **14**

1) Thermocouple generate output voltage according to _____.
a) Circuit parameters b) Humidity
c) Temperature d) Voltage

2) Sensor is a type of transducer.
a) True b) False

3) Which factor affects the least while selection of sensor?
a) Size b) Accuracy
c) Colour d) Durability

4) Which sensor should one prefer for accurate measurement of distance upto 1 meter?
a) Ultrasonic sensor b) Infrared sensor
c) PIR sensor d) Photoresistor sensor

5) IR sensors can't work in dark environment.
a) True b) False

6) Which sensor should be used for calculating humidity?
a) DHT11 b) LM335Z/NOPB
c) HC-SR04 d) MPX10DP

7) What is the primary purpose of a strain gauge?
a) Measure temperature
b) Measure pressure
c) Measure deformation or strain
d) Measure voltage

8) What is a Wheatstone bridge used for in the context of strain gauges?
a) To amplify the signal
b) To convert mechanical strain to a voltage output
c) To filter noise from the signal
d) To measure temperature

9) Signal conditioning is carried out in _____.
a) Transducer housing b) Processor
c) Network interface d) None of the mentioned

10) What principle does a thermocouple operate on?
a) Seebeck effect b) Peltier effect
c) Joule heating d) Hall effect

11) Which material is most commonly used in RTDs for temperature sensing?
a) Copper b) Aluminum
c) Platinum d) Nickel

12) What is the typical temperature range for standard RTDs?
a) -200 to 500 °C b) -50 to 200 °C
c) 0 to 100 °C d) -100 to 1000 °C

13) What type of electrode is commonly used in a pHsensor?
a) Reference electrode b) Glass electrode
c) Metal electrode d) Carbon electrode

14) What is the output of atypical pHsensor?
a) Voltage b) Resistance
c) Current d) Frequency

Section – I

Q.2 Attempt any Four. **16**

a) Define Motion Transducer. Explain different types of motion sensor with example.
b) Write a short note on sensor selection.
c) Define Sensor & Transducer. How do they differ from each other?
d) What is Calibration? With the help of block diagram explain procedure of calibration.
e) Explain concept of strain gauge & light intensity.
f) Describe concept of motion transducer in detail.

Q.3 Attempt any two. **12**

a) Discuss the classification of sensor based on Measurand. Provide the example of each type and their application.
b) State the working principle of LDR. Explain the construction & working of it. Also state advantages, disadvantages & application of it.
c) Write a note on:-
1) Temperature sensing
2) Light Intensity
3) Strain gauge
4) Magnetic field Sensor

Section – II

Q.4 Attempt any Four. **16**

a) With the help of neat sketch explain concept of LVDT.
b) Illustrate concept of ultrasonic sensor & Chemical sensor in detail
c) With the help of explain RTD.
d) With the help of neat sketch explain concept of RVDT.
e) Describe the concept of motion transducer.

Q.5 Attempt any two. **12**

a) With the help of neat sketch explain concept of AC Tachometer & DC Tachometer.

b) Define following concepts:

1) Humidity Sensor
2) Vibration Sensor
3) Gas Sensor

c) With the help of neat sketch explain Thermocouple & Thermistor.

Set Q

S.Y. (B.Tech.) (Sem-I) (NEP New) (CBCS) Examination: March/April-2025
COMPUTER SCIENCE AND ENGINEERING
Sensor Technology (ENTMDM-01B)

Day & Date: Thursday 22-05-2025 Max. Marks: 70
Time: 03:00 PM To 06:00 PM

Instructions: 1) Q. No. 1 is compulsory. It should be solved in the first 30 minutes in Answer Book Page no 03 (Starting page of the Answer Book). Each question carries one mark.
2) Don't forget to Mention question paper set (P/Q/R/S) on top of page.
3) Figures to the right indicates full marks.
4) Use of non-programmable calculator is allowed.

MCQ/Objective Type Questions

Duration: 30 Minutes Marks:14

Q.1 Choose the correct Answer. 14

1) What is a Wheatstone bridge used for in the context of strain gauges?
a) To amplify the signal
b) To convert mechanical strain to a voltage output
c) To filter noise from the signal
d) To measure temperature

2) Signal conditioning is carried out in _____.
a) Transducer housing b) Processor
c) Network interface d) None of the mentioned

3) What principle does a thermocouple operate on?
a) Seebeck effect b) Peltier effect
c) Joule heating d) Hall effect

4) Which material is most commonly used in RTDs for temperature sensing?
a) Copper b) Aluminum
c) Platinum d) Nickel

5) What is the typical temperature range for standard RTDs?
a) -200 to 500 °C b) -50 to 200 °C
c) 0 to 100 °C d) -100 to 1000 °C

6) What type of electrode is commonly used in a pHsensor?
a) Reference electrode b) Glass electrode
c) Metal electrode d) Carbon electrode

7) What is the output of atypical pHsensor?
a) Voltage b) Resistance
c) Current d) Frequency

8) Thermocouple generate output voltage according to _____.
a) Circuit parameters b) Humidity
c) Temperature d) Voltage

9) Sensor is a type of transducer.
a) True b) False

10) Which factor affects the least while selection of sensor?
a) Size b) Accuracy
c) Colour d) Durability

11) Which sensor should one prefer for accurate measurement of distance upto 1 meter?
a) Ultrasonic sensor b) Infrared sensor
c) PIR sensor d) Photoresistor sensor

12) IR sensors can't work in dark environment.
a) True b) False

13) Which sensor should be used for calculating humidity?
a) DHT11 b) LM335Z/NOPB
c) HC-SR04 d) MPX10DP

14) What is the primary purpose of a strain gauge?
a) Measure temperature
b) Measure pressure
c) Measure deformation or strain
d) Measure voltage

Seat No.

MCQ/Objective Type Questions

Duration: 30 Minutes Marks:14

Q.1 Choose the correct Answer. **14**

1) Which of the following is an advantage of electronic energy meters over induction-type meters?
a) Higher accuracy b) More moving parts
c) More expensive d) Require more maintenance

2) Moving iron instruments have _____.
a) Uniform scale b) Squared scale
c) Log scale d) Linear scale

3) Digital voltmeters convert _____.
a) Analog to digital signal b) Digital to analog signal
c) Current to voltage d) Resistance to voltage

4) In a separately excited DC motor, the field windings are _____.
a) Connected in series with the armature
b) Supplied from an independent source
c) Connected to the same supply as the armature
d) None of above

5) A single-phase induction motor is inherently _____.
a) Self-starting
b) Not self-starting
c) More efficient than a three-phase motor
d) Can operate on both AC and DC supplies

6) The synchronous speed of a synchronous generator is dependent on __.
a) Rotor size
b) Number of poles and frequency
c) Magnetic field strength
d) Load current

7) The synchronous generator operates at _____.
a) A variable speed
b) A constant speed
c) A speed proportional to the load
d) A speed inversely proportional to the load

8) What is the main advantage of a permanent magnet DC motor over a conventional DC motor?
a) No need for a field winding b) Higher efficiency at low speeds
c) Reduced cost of construction d) All of the above

9) Which of the following is an application of PMSMs?
a) Fans b) Electric vehicles
c) HVAC systems d) All of the above

10) What is the purpose of laminated cores in AC machines?
a) Reduce mechanical stress
b) Minimize eddy current losses
c) Increase the resistance of the windings
d) Improve heat dissipation

11) In energy-efficient AC motors, the stator windings are often made of _____.
a) Aluminum b) Copper
c) Steel d) Brass

12) Which of the following does not change in a transformer?
a) Current b) Voltage
c) Frequency d) All of the above

13) When a transformer is loaded, the primary current?
a) Increases b) Decreases
c) Remains constant d) Becomes zero

14) Open circuit test on transformers is conducted to determine _____.
a) hysteresis losses b) copper losses
c) core losses d) eddy current losses

Time: 03:00 PM To 06:00 PM

Instructions: 1) All questions are compulsory.
2) Figures to the right indicate full marks.

Section – I

Q.2 Attempt any Four. **16**

a) With neat sketch explain PMMC type instrument.
b) A 3-phase 500V motor load has a power factor of 0.4 two wattmeter connected to measure input. They show input to be 30 KW. Find the reading of each instrument.
c) With neat sketch explain the construction of DC machine.
d) What is the purpose of the auxiliary winding in a single-phase induction motor?
e) Explain the working principle of a synchronous generator.

Q.3 Attempt any two. **12**

a) Explain 1 - ø induction energy meter with neat diagram.
b) Explain the speed control techniques of separately excited dc motor.
c) Explain the principle of operation of 3ø induction motor. With the help of phasor diagram explain how rotating magnetic field is produced?

Section – II

Q.4 Attempt any Four. **16**

a) Explain with neat sketch construction of permanent magnet brushless DC motor.
b) Explain the principle of operation of a linear induction motor.
c) Discuss the techniques used to reduce iron losses in energy-efficient AC machines.
d) A 230/2300V transformer takes a no-load current of 6.5 A and absorbs 187W if the resistance of the primary is 0.6 Ω. Find.
1) the core loss
2) no load power factor
3) active component of current
4) magnetizing current
e) Derive the expression for saving of copper in autotransformer.

Q.5 Attempt any two. **12**

a) What are the applications of Synchronous Reluctance Motor? Explain with phasor diagram torque speed characteristics of Synchronous Reluctance Motor.

b) An energy-efficient AC motor has the following loss components:
Copper losses: 2 kW
Iron losses: 1.5 kW
Friction and windage losses: 0.5 kW
The input power is 25 kW. Calculate the efficiency of the motor.

c) With neat sketch explain open circuit and short circuit test of transformer. How equivalent circuit parameters and efficiency of a transformer are computed?

Seat No.

S.Y. (B.Tech.) (Sem-I) (New) (NEP CBCS) Examination: March/April-2025
COMPUTER SCIENCE AND ENGINEERING
Electrical Technology (EEMDM-01A)

Day & Date: Thursday 22-05-2025 Max. Marks: 56
Time: 03:00 PM To 06:00 PM

Instructions: 1) All questions are compulsory.
2) Figures to the right indicate full marks.

Section – I

Q.2 Attempt any Four. **16**

a) With neat sketch explain PMMC type instrument.
b) A 3-phase 500V motor load has a power factor of 0.4 two wattmeter connected to measure input. They show input to be 30 KW. Find the reading of each instrument.
c) With neat sketch explain the construction of DC machine.
d) What is the purpose of the auxiliary winding in a single-phase induction motor?
e) Explain the working principle of a synchronous generator.

Q.3 Attempt any two. **12**

a) Explain 1 - ø induction energy meter with neat diagram.
b) Explain the speed control techniques of separately excited dc motor.
c) Explain the principle of operation of 3ø induction motor. With the help of phasor diagram explain how rotating magnetic field is produced?

Section – II

Q.4 Attempt any Four. **16**

a) Explain with neat sketch construction of permanent magnet brushless DC motor.
b) Explain the principle of operation of a linear induction motor.
c) Discuss the techniques used to reduce iron losses in energy-efficient AC machines.
d) A 230/2300V transformer takes a no-load current of 6.5 A and absorbs 187W if the resistance of the primary is 0.6 Ω. Find.
1) the core loss
2) no load power factor
3) active component of current
4) magnetizing current
e) Derive the expression for saving of copper in autotransformer.

Q.5 Attempt any two. **12**

a) What are the applications of Synchronous Reluctance Motor? Explain with phasor diagram torque speed characteristics of Synchronous Reluctance Motor.

b) An energy-efficient AC motor has the following loss components:
Copper losses: 2 kW
Iron losses: 1.5 kW
Friction and windage losses: 0.5 kW
The input power is 25 kW. Calculate the efficiency of the motor.

c) With neat sketch explain open circuit and short circuit test of transformer. How equivalent circuit parameters and efficiency of a transformer are computed?

Seat No.

S.Y. (B.Tech.) (Sem-I) (New) (NEP CBCS) Examination: March/April-2025
COMPUTER SCIENCE AND ENGINEERING
Electrical Technology (EEMDM-01A)

Day & Date: Thursday 22-05-2025 Max. Marks: 70
Time: 03:00 PM To 06:00 PM

Instructions: 1) Q. No. 1 is compulsory. It should be solved in the first 30 minutes in Answer Book Page no 03 (Starting page of the Answer Book). Each question carries one mark.
2) Don't forget to Mention question paper set (P/Q/R/S) on top of page.
3) Figures to the right indicates full marks.
4) Make suitable assumptions if necessary and state them clearly.

MCQ/Objective Type Questions

Duration: 30 Minutes Marks:14

Q.1 Choose the correct Answer. 14

1) The synchronous speed of a synchronous generator is dependent on __.
a) Rotor size
b) Number of poles and frequency
c) Magnetic field strength
d) Load current

2) The synchronous generator operates at _____.
a) A variable speed
b) A constant speed
c) A speed proportional to the load
d) A speed inversely proportional to the load

3) What is the main advantage of a permanent magnet DC motor over a conventional DC motor?
a) No need for a field winding b) Higher efficiency at low speeds
c) Reduced cost of construction d) All of the above

4) Which of the following is an application of PMSMs?
a) Fans b) Electric vehicles
c) HVAC systems d) All of the above

5) What is the purpose of laminated cores in AC machines?
a) Reduce mechanical stress
b) Minimize eddy current losses
c) Increase the resistance of the windings
d) Improve heat dissipation

6) In energy-efficient AC motors, the stator windings are often made of _____.
a) Aluminum b) Copper
c) Steel d) Brass

7) Which of the following does not change in a transformer?
a) Current b) Voltage
c) Frequency d) All of the above

8) When a transformer is loaded, the primary current?
a) Increases b) Decreases
c) Remains constant d) Becomes zero

9) Open circuit test on transformers is conducted to determine _____.
a) hysteresis losses b) copper losses
c) core losses d) eddy current losses

10) Which of the following is an advantage of electronic energy meters over induction-type meters?
a) Higher accuracy b) More moving parts
c) More expensive d) Require more maintenance

11) Moving iron instruments have _____.
a) Uniform scale b) Squared scale
c) Log scale d) Linear scale

12) Digital voltmeters convert _____.
a) Analog to digital signal b) Digital to analog signal
c) Current to voltage d) Resistance to voltage

13) In a separately excited DC motor, the field windings are _____.
a) Connected in series with the armature
b) Supplied from an independent source
c) Connected to the same supply as the armature
d) None of above

14) A single-phase induction motor is inherently _____.
a) Self-starting
b) Not self-starting
c) More efficient than a three-phase motor
d) Can operate on both AC and DC supplies

Seat No.

MCQ/Objective Type Questions

Duration: 30 Minutes Marks:14

Q.1 Choose the correct Answer. **14**

1) What is an electric vehicle?
a) Vehicle powered by gasoline
b) Vehicle powered by Electricity
c) Vehicle powered by Diesel
d) Vehicle powered by solar energy

2) What is the function of electric motor in an EV?
a) To charge the battery b) To power the wheels
c) To generate electricity d) To cool the vehicle

3) What is the purpose of battery management system (BMS) in an EV?
a) To monitor and control the battery's state of charge
b) To power the electric motor
c) To generate electricity
d) To cool the vehicle

4) What is the primary advantage of hybrid electric vehicle?
a) Increase driving range
b) Decreased operating cost
c) Reduced Greenhouse gas emissions
d) All of above

5) What type of battery is commonly used in Battery Electric Vehicles?
a) Lead -acid battery b) Nickel- metal hybrid battery
c) Lithium- ion battery d) All of above

6) Which is the types of electric vehicle charging?
a) Level one charging b) Level two charging
c) DC fast charging d) All of the above

7) Which of the following affects battery lifespan?
a) Depth of discharge (DOD) b) Temperature
c) Charging Frequency d) All of above

8) What type of fuel do Fuel Cell Electric Vehicles use?
a) Gasoline b) Diesel
c) Hydrogen d) Natural gas

9) What is the primary cause of battery degradation?
a) Overcharge b) Undercharge
c) Depth of discharge d) High temperature

10) How does battery storage system help in grid stability?
a) By supplying reactive power
b) By absorbing excess energy
c) By providing frequency regulation
d) All of above

11) Which of the following is the benefit of Electric Vehicles?
a) Zero emission b) Lower operating cost
c) Improved performance d) All of above

12) What is the purpose of power electronic controller in electric vehicle?
a) To regulate the flow of electrical energy
b) To monitor the vehicles speed
c) To control the onboard charger
d) To regulate the battery's state of charge

13) What is the purpose of equalization in battery Storage?
a) To balance cell voltage b) To increase battery capacity
c) To reduce charging time d) To improve discharge rate

14) What is the primary function of the on board charger in electric vehicle?
a) To charge the battery from an external power source
b) To convert AC power to DC power
c) To regulate battery's state of charge
d) To monitor the vehicles speed

MCQ/Objective Type Questions

Duration: 30 Minutes Marks:14

Q.1 Choose the correct Answer. **14**

1) Which are not the approaches of machine learning?
a) Reinforcement Learning b) Unsupervised Learning
c) Semi-supervised Learning d) Natural language processing

2) Do you need maths for machine learning.
a) Yes b) No

3) Identify the successful applications of ML.
a) Learning to classify new astronomical structures
b) Learning to recognize spoken words
c) Learning to drive an autonomous vehicle
d) All of the above

4) Machine learning model which is built on sample data is known as _.
a) Transfer data b) Training data
c) Clean data d) None of the above

5) Analysis of ML algorithm needs _____.
a) Statistical learning theory b) Computational learning theory
c) Both a and b d) None of the above

6) Gradient Descent is an optimization algorithm used for, _____.
a) Certain Changes in algorithm
b) Minimizing the cost function in various machine learning algorithms
c) Maximizing the cost function in various machine learning algorithms
d) Remaining same the cost function in various machine learning algorithms

7) _____, the algorithm follows a straight path towards the minimum.
a) Batch Gradient Descent b) Stochastic Gradient Descent
c) Mini Batch gradient descent d) None of the above

8) Automatic speech recognition find a wide variety of applications in the _____ domains.
a) Medical Assistance b) Industrial Robotics
c) Defence and Aviation d) All of the above

9) What is linear regression used for _____.
a) It is used to predict the value of a variable based on the value of another variable
b) To calculate the sum of 2 numbers
c) To predict the value
d) None of this

10) Which of the following is not supervised learning?
a) Naive Bayesian b) Linear Regression
c) PCA d) Decision Tree

11) What is the application of a machine learning method to a large dataset called?
a) Database b) Data Mining
c) Supervised Learning d) None of the above

12) _____ is the machine learning algorithms that can be used with unlabeled data.
a) Regression Algorithms b) Clustering Algorithms
c) Association Algorithms d) All of the above

13) What kind of learning algorithm for “Facial identities or facial expressions”?
a) Prediction b) Recognition Patterns
c) Generating Patterns d) Recognizing Anomalies

14) _____ of hypothesis h with respect to target concept c and distribution D, is the probability that h will misclassify an instance drawn at random according to D.
a) True Error b) Type 1 Error
c) Type 2 Error d) None of these

S. Y. (B. Tech) (Sem-I) (New) (NEP CBCS) Examination: March/April-2025
COMPUTER SCIENCE & ENGINEERING
Machine Learning (CSEHON-01A)

Day & Date: Friday 23-05-2025 Max. Marks: 56
Time: 03:00 PM To 06:00 PM

Instructions: 1) All questions are compulsory.
2) Figures to the right indicate full marks.

Section – I

Q.2 Answer any four: **12**
- **a)** Explain Cost Function in detail.
- **b)** Write a note on Data Mining and Statistics in machine learning.
- **c)** Explain the Leveraging the Power of Machine Learning.
- **d)** Write a difference between descriptive and inferential statistics.

Q.3 Answer any one: **16**
- **a)** Explain Applications of machine learning in detail.
- **b)** Explain Types of Machine Learning.
- **c)** Explain Machine Learning Life Cycle.

Section – II

Q.4 Answer any four: **12**
- **a)** Explain K-Fold Cross validation in detail.
- **b)** What are different Out_of_Sample Errors in validation.
- **c)** Explain Greedy Classification Trees with the help of examples.
- **d)** Write a note on Averaging model and Stacking Model.

Q.5 Answer any one: **16**
- **a)** Explain Feature Engineering.
- **b)** Explain the Classification of images application step by step with an example.
- **c)** Explain different validation techniques.

Set **Q**

S. Y. (B. Tech) (Sem-I) (New) (NEP CBCS) Examination: March/April-2025
COMPUTER SCIENCE & ENGINEERING
Machine Learning (CSEHON-01A)

Day & Date: Friday 23-05-2025 Max. Marks: 70
Time: 03:00 PM To 06:00 PM

Instructions: 1) Q. No. 1 is compulsory. It should be solved in the first 30 minutes in Answer Book Page no 03 (Starting page of the Answer Book). Each question carries one mark.
2) Don't forget to Mention question paper set (P/Q/R/S) on top of page.
3) Figures to the right indicates full marks.

MCQ/Objective Type Questions

Duration: 30 Minutes Marks:14

Q.1 Choose the correct Answer. **14**

1) Automatic speech recognition find a wide variety of applications in the _____ domains.
a) Medical Assistance b) Industrial Robotics
c) Defence and Aviation d) All of the above

2) What is linear regression used for _____.
a) It is used to predict the value of a variable based on the value of another variable
b) To calculate the sum of 2 numbers
c) To predict the value
d) None of this

3) Which of the following is not supervised learning?
a) Naive Bayesian b) Linear Regression
c) PCA d) Decision Tree

4) What is the application of a machine learning method to a large dataset called?
a) Database b) Data Mining
c) Supervised Learning d) None of the above

5) _____ is the machine learning algorithms that can be used with unlabeled data.
a) Regression Algorithms b) Clustering Algorithms
c) Association Algorithms d) All of the above

6) What kind of learning algorithm for "Facial identities or facial expressions"?
a) Prediction b) Recognition Patterns
c) Generating Patterns d) Recognizing Anomalies

7) _____ of hypothesis h with respect to target concept c and distribution D, is the probability that h will misclassify an instance drawn at random according to D.

a) True Error b) Type 1 Error
c) Type 2 Error d) None of these

8) Which are not the approaches of machine learning?

a) Reinforcement Learning b) Unsupervised Learning
c) Semi-supervised Learning d) Natural language processing

9) Do you need maths for machine learning.

a) Yes b) No

10) Identify the successful applications of ML.

a) Learning to classify new astronomical structures
b) Learning to recognize spoken words
c) Learning to drive an autonomous vehicle
d) All of the above

11) Machine learning model which is built on sample data is known as _.

a) Transfer data b) Training data
c) Clean data d) None of the above

12) Analysis of ML algorithm needs _____.

a) Statistical learning theory b) Computational learning theory
c) Both a and b d) None of the above

13) Gradient Descent is an optimization algorithm used for, _____.

a) Certain Changes in algorithm
b) Minimizing the cost function in various machine learning algorithms
c) Maximizing the cost function in various machine learning algorithms
d) Remaining same the cost function in various machine learning algorithms

14) _____, the algorithm follows a straight path towards the minimum.

a) Batch Gradient Descent b) Stochastic Gradient Descent
c) Mini Batch gradient descent d) None of the above

MCQ/Objective Type Questions

Duration: 30 Minutes Marks:14

Q.1 Choose the correct Answer. **14**

1) A substitution technique in which every new message requires a new key of the same length as the new message is known as ___.
a) Hill Cipher b) Playfair Cipher
c) One-time Pad d) Caesar Cipher

2) Use Caesar's Cipher to decipher the following text "HQFUBSWHG WHAW"
a) ABANDONED LOCK b) ENCRYPTED TEXT
c) BANDONED TEXT d) ENCRYPTED LOCK

3) ITU-T Recommendation X-800 defines _____.
a) Security attacks b) Security services
c) Security mechanisms d) All the above

4) With Rail Fence Technique having height/level/rows 3 what will be ciphertext of following plaintext = solapuruniversitysolapur.
a) spnryaoauuiestslprlrviou b) slprnvriyoauoauuiestslpr
c) srroouuesslrlpnviyauaitp d) srnrayoauuiestslprlrviou

5) NIST stands for _____.
a) National Information Security Technology
b) National Information Standard Technology
c) National Institute of Standard and Technology
c) National Institute of Security Technology

6) How many round does AES-192 perform?
a) 10 b) 12
c) 14 d) 16

7) In AES Algorithm following operation need not be performed in last round.

a) Add round key b) Mix column
c) Shift row d) Byte Substitution

8) Amitabh digitally signs a message and sends it to Jaya. Verification of the signature by jaya requires.

a) Amitabh's public key b) Amitabh's private key
c) Jaya's public key d) Jaya's private key

9) If end to end connection is done at a network or IP level, and if there are N hosts, then what is the number of keys required?

a) N(N-1)/2 b) N
c) N(N+1)/2 d) N/2

10) The _____ property protects against a sophisticated class of attack known as the birthday attack.

a) collision resistant b) one-way
c) preimage resistant d) second preimage resistant

11) A hash function guarantees the integrity of a message. It guarantees that the message has not be _____.

a) Replaced b) Over view
c) Changed d) Violated

12) Hashed message is signed by a sender using _____.

a) his public key b) his private key
c) receiver’s public key d) receiver’s private key

13) Which of the following is the least secure method of authentication?

a) Key card b) Fingerprint
c) Retina pattern d) Password

14) What are the common security threats?

a) File Shredding b) File sharing and permission
c) File corrupting d) File integrity

Section – I

Q.2 Answer any three: **12**

a) Differentiate between substitution and transposition technique.
b) What is the ciphertext of the word "MAHARASHTRA" if we use a key of 4 in the Caesar Cipher?
c) Write short note on Steganography.
d) Explain in details AddRoundkey() function of AES.

Q.3 Answer any two: **16**

a) Explain the fundamental difference between an active attack and a passive attack in network security, providing examples of each.
b) Construct the playfair matrix with the key "SECURITY" and use it to encrypt the message "ENCRYPTION IS FUN".
c) Explain the working of DES with neat diagram.

Section – II

Q.4 Answer any three: **12**

a) Explain principles of public key cryptosystem.
b) Perform the encryption and decryption of RSA Algorithm for p=5, q=7, e=7 and M=12.
c) List and explain five properties of digital signature.
d) Explain identity management architecture.

Q.5 Answer any two: **16**

a) Explain Diffe-Helman key exchange protocol. For Users A and B, the Diffie-Hellman key exchange technique with a common prime q=83 and primitive root $\alpha = 5$. If A has a private key XA= 6, Calculate A's public key YA?
b) Describe with diagram three basic uses of Message Authentication Code.

Cryptography (CSEHON-01B)

Day & Date: Friday, 23-05-2025 Max. Marks: 56
Time: 03:00 PM To 06:00 PM

Instructions: 1) All questions are compulsory.
2) Figures to the right indicate full marks.

Section – I

Q.2 Answer any three: **12**

a) Differentiate between substitution and transposition technique.
b) What is the ciphertext of the word "MAHARASHTRA" if we use a key of 4 in the Caesar Cipher?
c) Write short note on Steganography.
d) Explain in details AddRoundkey() function of AES.

Q.3 Answer any two: **16**

a) Explain the fundamental difference between an active attack and a passive attack in network security, providing examples of each.
b) Construct the playfair matrix with the key "SECURITY" and use it to encrypt the message "ENCRYPTION IS FUN".
c) Explain the working of DES with neat diagram.

Section – II

Q.4 Answer any three: **12**

a) Explain principles of public key cryptosystem.
b) Perform the encryption and decryption of RSA Algorithm for p=5, q=7, e=7 and M=12.
c) List and explain five properties of digital signature.
d) Explain identity management architecture.

Q.5 Answer any two: **16**

a) Explain Diffe-Helman key exchange protocol. For Users A and B, the Diffie-Hellman key exchange technique with a common prime q=83 and primitive root $\alpha = 5$. If A has a private key XA= 6, Calculate A's public key YA?
b) Describe with diagram three basic uses of Message Authentication Code.
c) Explain working of Kerberos version 4 and summarise Message exchange.

Set **S**

S. Y. (B. Tech) (Sem-I) (New) (NEP CBCS) Examination: March/April-2025
COMPUTER SCIENCE & ENGINEERING
Cryptography (CSEHON-01B)

Day & Date: Friday, 23-05-2025 Max. Marks: 70
Time: 03:00 PM To 06:00 PM

Instructions: 1) Q. No. 1 is compulsory. It should be solved in the first 30 minutes in Answer Book Page no 03 (Starting page of the Answer Book). Each question carries one mark.
2) Don't forget to Mention question paper set (P/Q/R/S) on top of page.
3) Figures to the right indicates full marks.

MCQ/Objective Type Questions

Duration: 30 Minutes Marks:14

Q.1 Choose the correct Answer. **14**

1) How many round does AES-192 perform?
a) 10 b) 12
c) 14 d) 16

2) In AES Algorithm following operation need not be performed in last round.
a) Add round key b) Mix column
c) Shift row d) Byte Substitution

3) Amitabh digitally signs a message and sends it to Jaya. Verification of the signature by jaya requires.
a) Amitabh's public key b) Amitabh's private key
c) Jaya's public key d) Jaya's private key

4) If end to end connection is done at a network or IP level, and if there are N hosts, then what is the number of keys required?
a) N(N-1)/2 b) N
c) N(N+1)/2 d) N/2

5) The _____ property protects against a sophisticated class of attack known as the birthday attack.
a) collision resistant b) one-way
c) preimage resistant d) second preimage resistant

6) A hash function guarantees the integrity of a message. It guarantees that the message has not be _____.
a) Replaced b) Over view
c) Changed d) Violated

7) Hashed message is signed by a sender using _____.
a) his public key b) his private key
c) receiver's public key d) receiver's private key

8) Which of the following is the least secure method of authentication?
a) Key card b) Fingerprint
c) Retina pattern d) Password

9) What are the common security threats?
a) File Shredding b) File sharing and permission
c) File corrupting d) File integrity

10) A substitution technique in which every new message requires a new key of the same length as the new message is known as ___.
a) Hill Cipher b) Playfair Cipher
c) One-time Pad d) Caesar Cipher

11) Use Caesar's Cipher to decipher the following text "HQFUBSWHG WHAW"
a) ABANDONED LOCK b) ENCRYPTED TEXT
c) BANDONED TEXT d) ENCRYPTED LOCK

12) ITU-T Recommendation X-800 defines _____.
a) Security attacks b) Security services
c) Security mechanisms d) All the above

13) With Rail Fence Technique having height/level/rows 3 what will be ciphertext of following plaintext = solapuruniversitysolapur.
a) spnryaoauuiestslprlrviou b) slprnvriyoauoauuiestslpr
c) srroouuesslrlpnviyauaitp d) srnrayoauuiestslprlrviou

14) NIST stands for _____.
a) National Information Security Technology
b) National Information Standard Technology
c) National Institute of Standard and Technology
c) National Institute of Security Technology

Day & Date: Saturday, 24-05-2025 Max. Marks: 50
Time: 03:00 PM To 4:30 PM

Instructions: 1) All questions are compulsory.
2) Figures to the right indicate full marks.
3) Mention Question Paper Set (P/Q/R/S) on Top of Page.

Answer

Q.1 Choose the correct alternatives from the options.

1) Basic unit of human interaction is _____.
a) Family b) Society
c) Group d) None of the above

2) The Self(I) is the seer, _____.
a) Doer b) Enjoyer
c) Doer & Enjoyer d) None

3) PROSPERITY deals with _____.
a) Right understanding in the self
b) Fulfilment in relationship
c) Ensuring more than required physical facility
d) None

4) When we expect feelings from others for our happiness, it is a state of _____.
a) Swatantrata b) Partantrata
c) Prosperity d) None

5) For continuity of happiness, what is essential?
a) Right understanding in the Self
b) Right feeling and right thought in the Self
c) Recognition of needs, ensure more than required, make right utilisation of it
d) All the above

6) Right Understanding and Right Feeling is matter of _____.
a) Self b) Body
c) Both d) None

7) Acceptance of excellence in others is called _____.

a) Gratitude b) Reverence
c) Glory d) None of above

8) Self and _____ are different in nature, materiality, needs and activities.

a) Prosperity b) Right Understanding
c) Body d) None of above

9) _____ is assuming without knowing.

a) Knowing b) Assuming
c) Preconditioning d) Relationship

10) Imagination is combination of _____.

a) Desire & thought
b) Desire, thought & expectation
c) Expectation & thought
d) None of above

11) Following are the basic guidelines for value education except _____.

a) Universal b) Personal
c) Rational d) Natural

12) Natural acceptance and _____ are the two processes of knowing.

a) Self-Actualization b) Self-exploration
c) Self Evaluation d) Self control

13) Human Life is lived at four levels: Individual, Family, and Society and _____.

a) Nature b) Nurture
c) World d) Universe

14) Value education should not be based on dogmas or blind beliefs _____.

a) True b) False

15) Value of an entity is _____.

a) Physical Facility
b) Prosperity
c) Its participation in the larger order of which it is part
d) both a and b

16) _____ are as Basic Human Aspirations.

a) Money
b) Relationship without money
c) Physical Facility
d) Continuous Happiness and Prosperity

17) Please give the correct priority for Physical Facilities, Right Understanding and Relationship _____.

a) Physical Facilities, Right Understanding and Relationship
b) Relationship, Right Understanding and Physical Facilities
c) Right Understanding, Relationship and Physical Facilities
d) None of the above

18) Right Understanding in relationship lead to _____.

a) Mutual Happiness b) Mutual Prosperity
c) Both a and b d) All are wrong

19) SSDD stands for _____.

a) Sadhan Viheen Dukhi Daridra
b) Sadhan Sampan Dukhi Daridra
c) Sadhan Sampan Sukhi Samridha
d) None of the above

20) Natural acceptance does not change with _____.

a) Time b) Place
c) Beliefs d) All of above

21) Human being is co-existence of the _____ and the _____.

a) self, self b) body, body
c) self, body d) None

22) _____ is the feeling of responsibility for nurturing, protecting and right utilizing the body.

a) Swasthya b) Sanyam
c) Prosperity d) None

23) The _____ is an instrument of _____.

a) I, Body b) Body, I
c) Both a and b d) None

24) _____ is the information we get from the Body through the five sense organs.

a) Precondition b) Sensation
c) Natural acceptance d) None

25) Which of the following is NOT a response of the Self?

a) Knowing b) Assuming
c) Recognising d) Preconditioning

26) Needs of Body are quantitative whereas needs of Self are qualitative _____.

a) True b) False

27) Sah-astitva means _____.

a) Co-existence b) Co-operation
c) Cooption d) Corporate identity

28) Ensuring justice in the relationship, on the basis of values leads to _____ in society.

a) Fearlessness b) Confusion
c) Confidence d) Fear

29) _____ is the complete value in relationship.

a) Respect b) Love
c) Trust d) Glory

30) The feeling to nurture and protect the body of our relative is called _____.

a) Care b) Affection
c) Gratitude d) Respect

31) _____ is the feeling of acceptance for those who have made efforts for my excellence.

a) Reverence b) Glory
c) Gratitude d) Guidance

32) We all are similar at the level of our _____ but differ in our _____.

a) Competence, Intension b) Intension, Competence
c) Competence, Competence d) None

33) Abhay means _____.

a) Right understanding b) Trust and fearlessness
c) Prosperity d) Co-existance

34) All the units of nature can be classified into _____ orders.

a) Two b) Three
c) Four d) Six

35) Which of the following does not form an order in nature?

a) Bio b) Animal
c) Consciousness d) Human

36) According to quantity, which of the following is true for the orders in nature?

a) Bio order >> Physical order >> Animal order >> Human order
b) Animal order >> Bio order >> Physical order >> Human order
c) Physical order >> Bio order >> Animal order >> Human order
d) Physical order >> Animal order >> Bio order >> Human order

37) What is NOT acceptable naturally in the nature?

a) Enrichment of nature b) Pollution in nature
c) Protection of nature d) Right Utilization of nature

38) Which of the following is NOT a unit of physical order?

a) Soil b) Air
c) Tree d) Water

39) There is justice in relationship when there is _____.
a) Self-regulation b) Freedom
c) Mutual fulfillment d) None

40) Justice from family to world family leads to _____.
a) Powerful nation
b) Strong political ties between nations
c) Undivided society
d) Disruption of the family structure

41) _____ is and it exists between one self (I1) and other self (I2).
a) Body b) Relationship
c) Health d) All

42) Which of the following results from over-evaluation _____.
a) Ego b) Depression
c) Self-confidence d) Trust

43) Which of the following statement is true?
a) Intention of a human being is always doubtful
b) One's intension is always to make the other happy
c) Intension of a human keeps varying from time to time
d) Intension of a human being can never be understood

44) Feeling of relationship exist between _____.
a) Self and self b) Body and Body
c) Self and body d) None of the above

45) Which of the following is NOT one of the goals at the level of society?
a) Right Understanding b) Fearlessness
c) Madness for profit d) Prosperity

46) Intension of a human being is the same as _____.
a) Natural acceptance b) Competence
c) Thought d) Pre-conditioning

47) Harmony should be maintained in _____.
a) Between body and life b) Between self and body
c) Between self and society d) All of the above

48) If something is _____ to us without any force or compulsion, then it is often correct and does not change with time and people.
a) Not acceptable b) Completely acceptable
c) Naturally acceptable d) Less acceptable

49) Nurturing on the Body depends upon _____.
a) Ingestion b) Digestion
c) Excretion d) All of the above

50) Sensation is related to _____.

a) Body
b) Self 'I'
c) Both a and b
d) None of the above

a) Family b) Society
c) Group d) None of the above

42) The Self(I) is the seer, _____.

a) Doer b) Enjoyer
c) Doer & Enjoyer d) None

43) PROSPERITY deals with _____.

a) Right understanding in the self
b) Fulfilment in relationship
c) Ensuring more than required physical facility
d) None

44) When we expect feelings from others for our happiness, it is a state of _____.

a) Swatantrata b) Partantrata
c) Prosperity d) None

45) For continuity of happiness, what is essential?

a) Right understanding in the Self
b) Right feeling and right thought in the Self
c) Recognition of needs, ensure more than required, make right utilisation of it
d) All the above

46) Right Understanding and Right Feeling is matter of _____.

a) Self b) Body
c) Both d) None

47) Acceptance of excellence in others is called _____.

a) Gratitude b) Reverence
c) Glory d) None of above

48) Self and _____ are different in nature, materiality, needs and activities.

a) Prosperity b) Right Understanding
c) Body d) None of above

49) _____ is assuming without knowing.

a) Knowing b) Assuming
c) Preconditioning d) Relationship

50) Imagination is combination of _____.

a) Desire & thought
b) Desire, thought & expectation
c) Expectation & thought
d) None of above

S. Y. (B.Tech.) (Sem - I) (New) (NEP CBCS) Examination: March/April-2025
COMPUTER SCIENCE AND ENGINEERING
Universal Human Values (VEC-01)

Day & Date: Saturday, 24-05-2025 Max. Marks: 50
Time: 03:00 PM To 4:30 PM

Instructions: 1) All questions are compulsory.
2) Figures to the right indicate full marks.
3) Mention Question Paper Set (P/Q/R/S) on Top of Page.

Answer

Q.1 Choose the correct alternatives from the options.

1) _____ is and it exists between one self (I1) and other self (I2).
a) Body b) Relationship
c) Health d) All

2) Which of the following results from over-evaluation _____.
a) Ego b) Depression
c) Self-confidence d) Trust

3) Which of the following statement is true?
a) Intention of a human being is always doubtful
b) One's intension is always to make the other happy
c) Intension of a human keeps varying from time to time
d) Intension of a human being can never be understood

4) Feeling of relationship exist between _____.
a) Self and self b) Body and Body
c) Self and body d) None of the above

5) Which of the following is NOT one of the goals at the level of society?
a) Right Understanding b) Fearlessness
c) Madness for profit d) Prosperity

6) Intension of a human being is the same as _____.
a) Natural acceptance b) Competence
c) Thought d) Pre-conditioning

7) Harmony should be maintained in _____.
a) Between body and life b) Between self and body
c) Between self and society d) All of the above

8) If something is _____ to us without any force or compulsion, then it is often correct and does not change with time and people.

a) Not acceptable
b) Completely acceptable
c) Naturally acceptable
d) Less acceptable

9) Nurturing on the Body depends upon _____.

a) Ingestion
b) Digestion
c) Excretion
d) All of the above

10) Sensation is related to _____.

a) Body
b) Self 'I'
c) Both a and b
d) None of the above

11) Basic unit of human interaction is _____.

a) Family
b) Society
c) Group
d) None of the above

12) The Self(I) is the seer, _____.

a) Doer
b) Enjoyer
c) Doer & Enjoyer
d) None

13) PROSPERITY deals with _____.

a) Right understanding in the self
b) Fulfilment in relationship
c) Ensuring more than required physical facility
d) None

14) When we expect feelings from others for our happiness, it is a state of _____.

a) Swatantrata
b) Partantrata
c) Prosperity
d) None

15) For continuity of happiness, what is essential?

a) Right understanding in the Self
b) Right feeling and right thought in the Self
c) Recognition of needs, ensure more than required, make right utilisation of it
d) All the above

16) Right Understanding and Right Feeling is matter of _____.

a) Self
b) Body
c) Both
d) None

17) Acceptance of excellence in others is called _____.

a) Gratitude
b) Reverence
c) Glory
d) None of above

18) Self and _____ are different in nature, materiality, needs and activities.

a) Prosperity
b) Right Understanding
c) Body
d) None of above

19) _____ is assuming without knowing.

a) Knowing
b) Assuming
c) Preconditioning
d) Relationship

20) Imagination is combination of _____.

a) Desire & thought
b) Desire, thought & expectation
c) Expectation & thought
d) None of above

21) Following are the basic guidelines for value education except _____.

a) Universal
b) Personal
c) Rational
d) Natural

22) Natural acceptance and _____ are the two processes of knowing.

a) Self-Actualization
b) Self-exploration
c) Self Evaluation
d) Self control

23) Human Life is lived at four levels: Individual, Family, and Society and _____.

a) Nature
b) Nurture
c) World
d) Universe

24) Value education should not be based on dogmas or blind beliefs _____.

a) True
b) False

25) Value of an entity is _____.

a) Physical Facility
b) Prosperity
c) Its participation in the larger order of which it is part
d) both a and b

26) _____ are as Basic Human Aspirations.

a) Money
b) Relationship without money
c) Physical Facility
d) Continuous Happiness and Prosperity

27) Please give the correct priority for Physical Facilities, Right Understanding and Relationship _____.

a) Physical Facilities, Right Understanding and Relationship
b) Relationship, Right Understanding and Physical Facilities
c) Right Understanding, Relationship and Physical Facilities
d) None of the above

28) Right Understanding in relationship lead to _____.

a) Mutual Happiness
b) Mutual Prosperity
c) Both a and b
d) All are wrong

29) SSDD stands for _____.

a) Sadhan Viheen Dukhi Daridra
b) Sadhan Sampan Dukhi Daridra
c) Sadhan Sampan Sukhi Samridha
d) None of the above

30) Natural acceptance does not change with _____.

a) Time
b) Place
c) Beliefs
d) All of above

31) Human being is co-existence of the _____ and the _____.

a) self, self
b) body, body
c) self, body
d) None

32) _____ is the feeling of responsibility for nurturing, protecting and right utilizing the body.

a) Swasthya
b) Sanyam
c) Prosperity
d) None

33) The _____ is an instrument of _____.

a) I, Body
b) Body, I
c) Both a and b
d) None

34) _____ is the information we get from the Body through the five sense organs.

a) Precondition
b) Sensation
c) Natural acceptance
d) None

35) Which of the following is NOT a response of the Self?

a) Knowing
b) Assuming
c) Recognising
d) Preconditioning

36) Needs of Body are quantitative whereas needs of Self are qualitative _____.

a) True
b) False

37) Sah-astitva means _____.

a) Co-existence
b) Co-operation
c) Cooption
d) Corporate identity

38) Ensuring justice in the relationship, on the basis of values leads to _____ in society.

a) Fearlessness b) Confusion
c) Confidence d) Fear

39) _____ is the complete value in relationship.

a) Respect b) Love
c) Trust d) Glory

40) The feeling to nurture and protect the body of our relative is called _____.

a) Care b) Affection
c) Gratitude d) Respect

41) _____ is the feeling of acceptance for those who have made efforts for my excellence.

a) Reverence b) Glory
c) Gratitude d) Guidance

42) We all are similar at the level of our _____ but differ in our _____.

a) Competence, Intension b) Intension, Competence
c) Competence, Competence d) None

43) Abhay means _____.

a) Right understanding b) Trust and fearlessness
c) Prosperity d) Co-existance

44) All the units of nature can be classified into _____ orders.

a) Two b) Three
c) Four d) Six

45) Which of the following does not form an order in nature?

a) Bio b) Animal
c) Consciousness d) Human

46) According to quantity, which of the following is true for the orders in nature?

a) Bio order >> Physical order >> Animal order >> Human order
b) Animal order >> Bio order >> Physical order >> Human order
c) Physical order >> Bio order >> Animal order >> Human order
d) Physical order >> Animal order >> Bio order >> Human order

47) What is NOT acceptable naturally in the nature?

a) Enrichment of nature b) Pollution in nature
c) Protection of nature d) Right Utilization of nature

48) Which of the following is NOT a unit of physical order?

a) Soil b) Air
c) Tree d) Water

49) There is justice in relationship when there is _____.

a) Self-regulation b) Freedom

c) Mutual fulfillment d) None

50) Justice from family to world family leads to _____.

a) Powerful nation

b) Strong political ties between nations

c) Undivided society

d) Disruption of the family structure

S.Y. (B.Tech.) (Computer Science & Engineering) (Semester - I) (Old) (CBCS) Examination: March/April - 2025
Applied Mathematics – I (BTN03301)

Day & Date: Saturday 17-05-2025 Max. Marks: 70
Time: 03:00 PM To 06:00 PM

Instructions: 1) Q. No. 1 is compulsory. It should be solved in the first 30 minutes in Answer Book Page no 03 (Starting page of the Answer Book). Each question carries one mark.
2) Don't forget to Mention question paper set (P/Q/R/S) on top of page.
3) Figures to the right indicates full marks.

MCQ/Objective Type Questions

Duration: 30 Minutes Marks:14

Q.1 Choose the correct alternatives from the options. 14

1) The solution of $\frac{d^3y}{dx^3} - 4\frac{dy}{dx} = 0$ is _____.

a) $c_1 + c_2e^{2x} + c_3e^{-2x}$ b) $c_1 + (c_2 + c_3x)e^{2x}$

c) $c_1e^x + c_2e^{2x} + c_3e^{-2x}$ d) $(c_1 + c_2x + c_3x^2)e^{2x}$

2) $\frac{1}{D^2+a^2}\sin ax =$ _____.

a) $-\frac{x}{2a}\sin ax$ b) $\frac{x}{a}\sin ax$

c) $-\frac{x}{2a}\cos ax$ d) $\frac{x}{2a^2}\cos ax$

3) $\frac{1}{D-3}x =$ _____.

a) $\frac{x}{3} - \frac{1}{9}$ b) $\frac{-x}{3} - \frac{1}{9}$

c) $\frac{x}{3} + \frac{1}{9}$ d) $-\frac{x}{3} + \frac{1}{9}$

4) The value of the integral $\int_0^\infty e^{-3t}\cos t dt$ is_____.

a) $\frac{3}{10}$ b) $-\frac{3}{10}$

c) 3 d) 10

5) $L^{-1}\left\{\frac{1}{s^2}\right\} = \cdots$

a) $\frac{t^2}{2!}$ b) $\frac{t}{2}$

c) t^2 d) t

6) Since $Z\{1\} = \frac{z}{z-1}, |z| > 1, Z\{k\} =$ _____.

a) $\frac{1}{z-1}$ b) $\frac{1}{(z-1)^2}$

c) $\frac{z}{(z-1)^2}$ d) $\frac{-z}{(z-1)^2}$

7) If $\delta(k) = \begin{cases} 1, & k = 0 \\ 0, & otherwise \end{cases}$ then $Z\{\delta(k)\} =$ _____.

a) 0 b) 1

c) z d) $1/z$

8) The Fourier series expansion of an even function $f(x)$ in $(-l, l)$ has _____.

a) Both sine and cosine terms b) Only sine terms

c) Only cosine terms d) None of these

9) If $f(x) = x^2$ is expanded as a cosine series in $(0, \pi)$ then the constant term is _____.

a) $\frac{\pi^2}{3}$ b) $\frac{\pi^3}{3}$

c) $\frac{2\pi^2}{3}$ d) $\frac{3\pi^2}{2}$

10) The value of Karl Pearson's coefficient of correlation r lies between _____.

a) -2 and -1 b) -1 and 1

c) 1 and 2 d) 2 and 3

11) A discrete probability distribution is given by, _____.

$p(x) = \frac{x^2+1}{18}, x = 0,1,2,3$, then $p(x = 1 \; or \; x = 3) =$ _____.

a) $1/3$ b) $2/18$

c) $2/3$ d) $2/9$

12) Between 2 and 4 pm average number of phone calls coming to a switch board of a company is 2.5. then the probability that during a minute there will be exactly 3 calls is _____.

a) 0.2138 b) 0.3120

c) 0.2183 d) 0.3821

13) Idle time of queuing system is _____.

a) $1 - \frac{\lambda}{\mu}$ b) $\frac{\lambda}{\mu}$

c) $\frac{\mu}{\lambda}$ d) $1 - \frac{\mu}{\lambda}$

14) In a $M/M/S/\infty$ system with $\lambda = 4$ and $\mu = 4, S = 2, P_0$ is _____.

a) 1 b) $1/2$

c) $1/3$ d) $1/4$

Instructions: 1) All questions are compulsory.
2) Figures to the right indicate full marks.

Section – I

Q.2 Solve any Three of the following. **09**

a) Solve $(D^3+1)y = 3 + e^{-x} + 5e^{2x}$

b) Solve $(D^2+D)y = x^2 + 2x + 4$

c) Calculate $L\{te^{3t}\sin^2 3t\}$

d) Find $L^{-1}\left\{\frac{1}{(s^2+1)(s^2+9}\right\}$ by using convolution theorem.

e) Calculate $Z\{f(k)\}$ and the region of convergence, where $f(k) = k2^k + k3^k, k \geq 0$

Q.3 Solve any Three of the following. **09**

a) Solve $(D^3 - 7D - 6)y = e^{2x}(x+1)$

b) Calculate Z-Transform of $f(k) = 3^k \sin h\alpha k, k \geq 0.$

c) Calculate $L\left\{\int_0^t \frac{e^{-3u}\sin 2u}{u}\,du\right\}$

d) Calculate $Z\{2^{|k|}\}$

e) Calculate inverse Laplace transform of $\tan^{-1}\left(\frac{2}{s}\right)$

Q.4 Solve any Two of the following. **10**

a) Solve $(D^2 - 4D + 4)y = 8.x^2e^{2x}\sin 2x.$

b) Solve by using Laplace transform $\frac{d^2x}{dt^2} + 4\frac{dx}{dt} = -8t, x(0) = 0 = x'(0)$

c) Calculate inverse Z-Transform of $F(z) = \frac{z}{(z-2)(z-3)}$, if ROC is $2 < |z| < 3.$

Section – II

Q.5 Solve any Three of the following. **09**

a) Obtain half range sine series of $f(x) = x^2$ in $(0,1)$.

b) Calculate the correlation co-efficient between x *and* y, if nine students obtained the following percentage of marks in the college examination (x) and in the University examination (y).

x	51	53	73	46	50	60	47	36	60
y	49	72	74	44	58	66	50	30	55

c) Calculate

i) k

ii) $p(x > 5)$

iii) $p(0 \leq x \leq 5)$,

if a random variable x has the following probability distribution

x	1	2	3	4	5	6	7
$p(x)$	k	$2k$	$3k$	k^2	$k^2 + k$	$2k^2$	$4k^2$

d) Obtain the Fourier series of, $f(x) = \frac{\pi^2}{12} - \frac{x^2}{4}$ in $(-\pi, \pi)$

e) Find the probability that a customer has to wait more than 20 minutes to be out of the service station with $\lambda = 8$ per hour and $\mu = 11$ per hour, if the system is $M/M/1/\infty$.

Q.6 Solve any Three of the following. **09**

a) Obtain Fourier Series for the function, $f(x) = \sin 2x$ in $(-l, l)$.

b) Determine what is the probability that out of 10 men, now 60, at least 8 would live up to 70? The probability that a man aged 60 will live up to 70 is 0.65.

c) Calculate what is the number of persons of this group who have income

i) exceeding Rs. 6680

ii) exceeding Rs. 8320? If the income distribution of a group of 10,000 persons was found to be normal with mean Rs. 7500 and standard deviation Rs. 500.
(Given: Area under the standard normal curve between ordinates $\pm$ 1.64 is 0.8990.)

d) A super market has two girls serving at the two counters. The customers arrive in Poisson fashion at the rate of 12 per hour. The service time for each customer is exponential with mean 6 minutes. Find

i) the probability that an arriving customer has to wait.

ii) the average number of customers in the system.

e) The following mistakes per page were observed in a book.

No. of mistakes	0	1	2	3	4	Total
No. of pages	211	90	19	5	0	325

Q.7 Solve any Two of the following. **10**

a) Calculate Karl Pearson's co-efficient of correlation and the equations of the lines of regression from the following data.

Age of husband	18	19	20	21	22	23	24	25	26	27
Age of wife	17	17	18	18	18	19	19	20	21	22

Estimate age of wife when that of husband is 30 and age of husband when that of wife is 25.

b) Obtain the Fourier series of, $f(x) = x^2$, in $(0,2\pi)$ and hence deduce that $\frac{\pi^2}{12} = \frac{1}{1^2} - \frac{1}{2^2} + \frac{1}{3^2} - \frac{1}{4^2} + \cdots$

c) A man earns Rs. 5 per hour on a typewriter. The time to type a job varies according to an exponential distribution with mean of 6 minutes. Jobs arrive according to a Poisson distribution at the average rate of 5 per hour. The typiest works 8 hour a day. Find

i) the percentage of time for which the typiest is idle.
ii) average earning of the typiest per day.
iii) average time a job is in the system.

MCQ/Objective Type Questions

Duration: 30 Minutes Marks:14

Q.1 Choose the correct alternatives from the options. 14

1) The Fourier series expansion of an even function $f(x)$ in $(-l, l)$ has _____.

a) Both sine and cosine terms b) Only sine terms
c) Only cosine terms d) None of these

2) If $f(x) = x^2$ is expanded as a cosine series in $(0, \pi)$ then the constant term is _____.

a) $\frac{\pi^2}{3}$ b) $\frac{\pi^3}{3}$
c) $\frac{2\pi^2}{3}$ d) $\frac{3\pi^2}{2}$

3) The value of Karl Pearson's coefficient of correlation r lies between _____.

a) -2 and -1 b) -1 and 1
c) 1 and 2 d) 2 and 3

4) A discrete probability distribution is given by, _____.
$p(x) = \frac{x^2+1}{18}, x = 0,1,2,3$, then $p(x = 1 \; or \; x = 3) =$ _____.

a) $1/3$ b) $2/18$
c) $2/3$ d) $2/9$

5) Between 2 and 4 pm average number of phone calls coming to a switch board of a company is 2.5. then the probability that during a minute there will be exactly 3 calls is _____.

a) 0.2138 b) 0.3120
c) 0.2183 d) 0.3821

6) Idle time of queuing system is _____.

a) $1-\frac{\lambda}{\mu}$ b) $\frac{\lambda}{\mu}$

c) $\frac{\mu}{\lambda}$ d) $1-\frac{\mu}{\lambda}$

7) In a $M/M/S/\infty$ system with $\lambda = 4$ and $\mu = 4, S = 2, P_0$ is _____.

a) 1 b) $1/2$

c) $1/3$ d) $1/4$

8) The solution of $\frac{d^3y}{dx^3} - 4\frac{dy}{dx} = 0$ is _____.

a) $c_1 + c_2e^{2x} + c_3e^{-2x}$ b) $c_1 + (c_2 + c_3x)e^{2x}$

c) $c_1e^x + c_2e^{2x} + c_3e^{-2x}$ d) $(c_1 + c_2x + c_3x^2)e^{2x}$

9) $\frac{1}{D^2+a^2}\sin ax =$ _____.

a) $-\frac{x}{2a}\sin ax$ b) $\frac{x}{a}\sin ax$

c) $-\frac{x}{2a}\cos ax$ d) $\frac{x}{2a^2}\cos ax$

10) $\frac{1}{D-3}x =$ _____.

a) $\frac{x}{3} - \frac{1}{9}$ b) $\frac{-x}{3} - \frac{1}{9}$

c) $\frac{x}{3} + \frac{1}{9}$ d) $-\frac{x}{3} + \frac{1}{9}$

11) The value of the integral $\int_0^\infty e^{-3t}\cos t dt$ is_____.

a) $\frac{3}{10}$ b) $-\frac{3}{10}$

c) 3 d) 10

12) $L^{-1}\left\{\frac{1}{s^2}\right\} = \cdots$

a) $\frac{t^2}{2!}$ b) $\frac{t}{2}$

c) t^2 d) t

13) Since $Z\{1\} = \frac{z}{z-1}, |z| > 1, Z\{k\} =$ _____.

a) $\frac{1}{z-1}$ b) $\frac{1}{(z-1)^2}$

c) $\frac{z}{(z-1)^2}$ d) $\frac{-z}{(z-1)^2}$

14) If $\delta(k) = \begin{cases} 1, & k = 0 \\ 0, & otherwise \end{cases}$ then $Z\{\delta(k)\} =$ _____.

a) 0 b) 1

c) z d) $1/z$

i) k

ii) $p(x > 5)$

iii) $p(0 \leq x \leq 5)$,

if a random variable x has the following probability distribution

x	1	2	3	4	5	6	7
$p(x)$	k	$2k$	$3k$	k^2	$k^2 + k$	$2k^2$	$4k^2$

d) Obtain the Fourier series of, $f(x) = \frac{\pi^2}{12} - \frac{x^2}{4}$ in $(-\pi, \pi)$

e) Find the probability that a customer has to wait more than 20 minutes to be out of the service station with $\lambda = 8$ per hour and $\mu = 11$ per hour, if the system is $M/M/1/\infty$.

Q.6 Solve any Three of the following. **09**

a) Obtain Fourier Series for the function, $f(x) = \sin 2x$ in $(-l, l)$.

b) Determine what is the probability that out of 10 men, now 60, at least 8 would live up to 70? The probability that a man aged 60 will live up to 70 is 0.65.

c) Calculate what is the number of persons of this group who have income

i) exceeding Rs. 6680

ii) exceeding Rs. 8320? If the income distribution of a group of 10,000 persons was found to be normal with mean Rs. 7500 and standard deviation Rs. 500.
(Given: Area under the standard normal curve between ordinates $\pm$ 1.64 is 0.8990.)

d) A super market has two girls serving at the two counters. The customers arrive in Poisson fashion at the rate of 12 per hour. The service time for each customer is exponential with mean 6 minutes. Find

i) the probability that an arriving customer has to wait.

ii) the average number of customers in the system.

e) The following mistakes per page were observed in a book.

No. of mistakes	0	1	2	3	4	Total
No. of pages	211	90	19	5	0	325

Q.7 Solve any Two of the following. **10**

a) Calculate Karl Pearson's co-efficient of correlation and the equations of the lines of regression from the following data.

Age of husband	18	19	20	21	22	23	24	25	26	27
Age of wife	17	17	18	18	18	19	19	20	21	22

Estimate age of wife when that of husband is 30 and age of husband when that of wife is 25.

b) Obtain the Fourier series of, $f(x) = x^2$, in $(0,2\pi)$ and hence deduce that $\frac{\pi^2}{12} = \frac{1}{1^2} - \frac{1}{2^2} + \frac{1}{3^2} - \frac{1}{4^2} + \cdots$

c) A man earns Rs. 5 per hour on a typewriter. The time to type a job varies according to an exponential distribution with mean of 6 minutes. Jobs arrive according to a Poisson distribution at the average rate of 5 per hour. The typiest works 8 hour a day. Find

i) the percentage of time for which the typiest is idle.
ii) average earning of the typiest per day.
iii) average time a job is in the system.

Day & Date: Saturday 17-05-2025 Max. Marks: 70
Time: 03:00 PM To 06:00 PM

Instructions: 1) Q. No. 1 is compulsory. It should be solved in the first 30 minutes in Answer Book Page no 03 (Starting page of the Answer Book). Each question carries one mark.
2) Don't forget to Mention question paper set (P/Q/R/S) on top of page.
3) Figures to the right indicates full marks.

MCQ/Objective Type Questions

Duration: 30 Minutes Marks:14

Q.1 Choose the correct alternatives from the options. **14**

1) A discrete probability distribution is given by, _____.
$p(x) = \frac{x^2+1}{18}, x = 0,1,2,3$, then $p(x = 1 \; or \; x = 3) =$ _____.

a) $1/3$ b) $2/18$
c) $2/3$ d) $2/9$

2) Between 2 and 4 pm average number of phone calls coming to a switch board of a company is 2.5. then the probability that during a minute there will be exactly 3 calls is _____.

a) 0.2138 b) 0.3120
c) 0.2183 d) 0.3821

3) Idle time of queuing system is _____.

a) $1 - \frac{\lambda}{\mu}$ b) $\frac{\lambda}{\mu}$
c) $\frac{\mu}{\lambda}$ d) $1 - \frac{\mu}{\lambda}$

4) In a $M/M/S/\infty$ system with $\lambda = 4$ and $\mu = 4, S = 2, P_0$ is _____.

a) 1 b) $1/2$
c) $1/3$ d) $1/4$

5) The solution of $\frac{d^3y}{dx^3} - 4\frac{dy}{dx} = 0$ is _____.

a) $c_1 + c_2e^{2x} + c_3e^{-2x}$ b) $c_1 + (c_2 + c_3x)e^{2x}$
c) $c_1e^x + c_2e^{2x} + c_3e^{-2x}$ d) $(c_1 + c_2x + c_3x^2)e^{2x}$

6) $\frac{1}{D^2+a^2}\sin ax =$ _____.

a) $-\frac{x}{2a}\sin ax$ b) $\frac{x}{a}\sin ax$

c) $-\frac{x}{2a}\cos ax$ d) $\frac{x}{2a^2}\cos ax$

7) $\frac{1}{D-3}x =$ _____.

a) $\frac{x}{3}-\frac{1}{9}$ b) $\frac{-x}{3}-\frac{1}{9}$

c) $\frac{x}{3}+\frac{1}{9}$ d) $-\frac{x}{3}+\frac{1}{9}$

8) The value of the integral $\int_0^\infty e^{-3t}\cos tdt$ is_____.

a) $\frac{3}{10}$ b) $-\frac{3}{10}$

c) 3 d) 10

9) $L^{-1}\left\{\frac{1}{s^2}\right\} = \cdots$

a) $\frac{t^2}{2!}$ b) $\frac{t}{2}$

c) t^2 d) t

10) Since $Z\{1\} = \frac{z}{z-1}, |z| > 1, Z\{k\} =$ _____.

a) $\frac{1}{z-1}$ b) $\frac{1}{(z-1)^2}$

c) $\frac{z}{(z-1)^2}$ d) $\frac{-z}{(z-1)^2}$

11) If $\delta(k) = \begin{cases}1, & k=0\\ 0, & otherwise\end{cases}$ then $Z\{\delta(k)\} =$ _____.

a) 0 b) 1

c) z d) $1/z$

12) The Fourier series expansion of an even function $f(x)$ in $(-l, l)$ has _____.

a) Both sine and cosine terms b) Only sine terms

c) Only cosine terms d) None of these

13) If $f(x) = x^2$ is expanded as a cosine series in $(0, \pi)$ then the constant term is _____.

a) $\frac{\pi^2}{3}$ b) $\frac{\pi^3}{3}$

c) $\frac{2\pi^2}{3}$ d) $\frac{3\pi^2}{2}$

14) The value of Karl Pearson's coefficient of correlation r lies between _____.

a) -2 and -1 b) -1 and 1

c) 1 and 2 d) 2 and 3

Section – I

Q.2 Solve any Three of the following. **09**

a) Solve $(D^3+1)y = 3 + e^{-x} + 5e^{2x}$

b) Solve $(D^2+D)y = x^2 + 2x + 4$

c) Calculate $L\{te^{3t}\sin^2 3t\}$

d) Find $L^{-1}\left\{\frac{1}{(s^2+1)(s^2+9}\right\}$ by using convolution theorem.

e) Calculate $Z\{f(k)\}$ and the region of convergence, where $f(k) = k2^k + k3^k, k \geq 0$

Q.3 Solve any Three of the following. **09**

a) Solve $(D^3 - 7D - 6)y = e^{2x}(x+1)$

b) Calculate Z-Transform of $f(k) = 3^k \sin h\alpha k, k \geq 0.$

c) Calculate $L\left\{\int_0^t \frac{e^{-3u}\sin 2u}{u}\,du\right\}$

d) Calculate $Z\{2^{|k|}\}$

e) Calculate inverse Laplace transform of $\tan^{-1}\left(\frac{2}{s}\right)$

Q.4 Solve any Two of the following. **10**

a) Solve $(D^2 - 4D + 4)y = 8.x^2e^{2x}\sin 2x.$

b) Solve by using Laplace transform $\frac{d^2x}{dt^2} + 4\frac{dx}{dt} = -8t, x(0) = 0 = x'(0)$

c) Calculate inverse Z-Transform of $F(z) = \frac{z}{(z-2)(z-3)}$, if ROC is $2 < |z| < 3.$

Section – II

Q.5 Solve any Three of the following. **09**

a) Obtain half range sine series of $f(x) = x^2$ in $(0,1)$.

b) Calculate the correlation co-efficient between x *and* y, if nine students obtained the following percentage of marks in the college examination (x) and in the University examination (y).

x	51	53	73	46	50	60	47	36	60
y	49	72	74	44	58	66	50	30	55

c) Calculate

i) k

ii) $p(x > 5)$

iii) $p(0 \leq x \leq 5)$,

if a random variable x has the following probability distribution

x	1	2	3	4	5	6	7
$p(x)$	k	$2k$	$3k$	k^2	$k^2 + k$	$2k^2$	$4k^2$

d) Obtain the Fourier series of, $f(x) = \frac{\pi^2}{12} - \frac{x^2}{4}$ in $(-\pi, \pi)$

e) Find the probability that a customer has to wait more than 20 minutes to be out of the service station with $\lambda = 8$ per hour and $\mu = 11$ per hour, if the system is $M/M/1/\infty$.

Q.6 Solve any Three of the following. **09**

a) Obtain Fourier Series for the function, $f(x) = \sin 2x$ in $(-l, l)$.

b) Determine what is the probability that out of 10 men, now 60, at least 8 would live up to 70? The probability that a man aged 60 will live up to 70 is 0.65.

c) Calculate what is the number of persons of this group who have income

i) exceeding Rs. 6680

ii) exceeding Rs. 8320? If the income distribution of a group of 10,000 persons was found to be normal with mean Rs. 7500 and standard deviation Rs. 500.
(Given: Area under the standard normal curve between ordinates $\pm$ 1.64 is 0.8990.)

d) A super market has two girls serving at the two counters. The customers arrive in Poisson fashion at the rate of 12 per hour. The service time for each customer is exponential with mean 6 minutes. Find

i) the probability that an arriving customer has to wait.

ii) the average number of customers in the system.

e) The following mistakes per page were observed in a book.

No. of mistakes	0	1	2	3	4	Total
No. of pages	211	90	19	5	0	325

Q.7 Solve any Two of the following. **10**

a) Calculate Karl Pearson's co-efficient of correlation and the equations of the lines of regression from the following data.

Age of husband	18	19	20	21	22	23	24	25	26	27
Age of wife	17	17	18	18	18	19	19	20	21	22

Estimate age of wife when that of husband is 30 and age of husband when that of wife is 25.

b) Obtain the Fourier series of, $f(x) = x^2$, in $(0,2\pi)$ and hence deduce that $\frac{\pi^2}{12} = \frac{1}{1^2} - \frac{1}{2^2} + \frac{1}{3^2} - \frac{1}{4^2} + \cdots$

c) A man earns Rs. 5 per hour on a typewriter. The time to type a job varies according to an exponential distribution with mean of 6 minutes. Jobs arrive according to a Poisson distribution at the average rate of 5 per hour. The typiest works 8 hour a day. Find

i) the percentage of time for which the typiest is idle.
ii) average earning of the typiest per day.
iii) average time a job is in the system.

MCQ/Objective Type Questions

Duration: 30 Minutes Marks:14

Q.1 Choose correct option. 14

1) Which of the following formula/s is/ are not well-formed formula/s?
a) $((\neg Q \wedge P) \wedge Q)$
b) $((P \rightarrow (Q \rightarrow R)) \rightarrow ((P \rightarrow Q) \rightarrow (P \rightarrow R)))$
c) $((\neg P \rightarrow Q) \rightarrow (Q \rightarrow P)))$
d) $((P \wedge Q) \leftrightarrow P)$

2) Which of the following statement formula is contradiction?
a) $\neg(\neg(P \wedge Q) \leftrightarrow (\neg P) \vee (\neg Q))$
b) $\neg(P \wedge Q) \leftrightarrow (\neg P) \vee (\neg Q)$
c) $R \rightarrow \neg R$
d) None

3) Which of the following formula/s is/are PCNF?
a) $(P \vee \neg Q) \wedge (Q \vee R) \wedge (\neg P \vee Q \vee \neg R)$
b) $(P \vee \neg R) \wedge (P \vee \neg Q \vee R) \wedge (\neg P \vee \neg Q \wedge \neg R)$
c) $(P \vee \neg P \vee \neg R) \wedge (P \vee \neg Q \vee R) \wedge (\neg P \vee \neg Q \vee \neg R)$
d) $(P \vee \neg Q \vee \neg R) \wedge (P \vee \neg Q \vee R) \wedge (\neg P \vee \neg Q \vee \neg R)$

4) If the principal disjunctive normal form of a given formula A containing n variables is known, then the principal disjunctive normal form of $\neg A$ will consist of _____.
a) The disjunction of the remaining maxterms which do not appear in the principal disjunctive normal form of A.
b) The disjunction of the remaining minterms which do not appear in the principal disjunctive normal form of A.
c) The conjunction of the remaining minterms which do not appear in the principal disjunctive normal form of A.
d) The conjunction of the remaining maxterms which do not appear in the principal disjunctive normal form of A.

5) Let $P = \{x | 4 \leq x \leq 10$ and x is even$\}$ Then P is equivalent to _____.

a) $\{4, 5, 6, 7, 8, 9, 10\}$ b) $\{6, 8\}$

c) $\{6, 8, 10\}$ d) $\{4, 6, 8, 10\}$

6) Given $A = \{2,5,6\}$ $B = \{3,4,2\}$, then $A + B$ is given by _____.

a) $\{2\}$ b) $\{3, 4\}$

c) $\{5, 6\}$ d) $\{5, 6, 3, 4\}$

7) Consider a set $A = \{1,2,3\}$. The binary relation $R = \{< 1,1 >, < 1,2 >, < 1,3 >, < 3,1 >, < 3,2 >\}$ on A is _____.

a) R is both symmetric and antisymmetric

b) R is not symmetric but antisymmetric

c) R is neither symmetric and nor antisymmetric

d) R is symmetric but not antisymmetric

8) $S = \{a. b, c\}$ and consider the following collections of subsets of S. $A = \{\{a, b\}, \{b, c\}\}, B = \{\{a\}, \{a, c\}\}, C = \{\{a\}, \{b, c\}\}, D = \{\{a, b, c\}\}$, $E = \{\{a\}, \{b\}, \{c\}\}$, and $F = \{\{a\}, \{a, b\}, \{a, c\}\}$. Which of the following set is not covering?

a) $A = \{\{a, b\}, \{b, c\}\}$ b) $B = \{\{a\}, \{a, c\}\}$

c) $C = \{\{a\}, \{b, c\}\}$ d) $D = \{\{a, b, c\}\}$

9) Which of the following is are true?

a) The inverse of a function f exists if f is injective only

b) The inverse of a function f exists if f is surjective only

c) The inverse of a function f is defined if f is both injective and surjective

d) A function that is neither injective e or surjective is sometimes invertible

10) Which of the following algebraic structures form a group?

a) The set of integers under subtraction.

b) The set of integers under addition.

c) The set of rational numbers under multiplication.

d) The set of complex numbers under multiplication.

11) Let g be a homomorphism from $< X, \circ >$ to $< Y, * >$. If g : $X \rightarrow Y$ is one-to-one onto then g is called _____.

a) Automorphism b) Endomorphism

c) Monomorphism d) Isomorphism

12) What is the rank of the equation $abc+$?

a) 1 b) 2

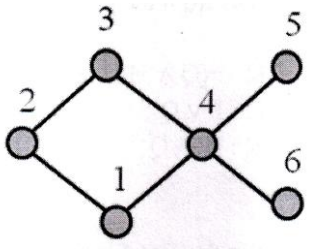
c) 3 d) 4

13) For the following $< Z_5, +5 >$ what is the inverse of element $[3]$.

$+_6$	0	1	2	3	4	5
0	0	1	2	3	4	5
1	1	2	3	4	5	0
2	2	3	4	5	0	1
3	3	4	5	0	1	2
4	4	5	0	1	2	3
5	5	0	1	2	3	4

a) $[1]$ b) $[2]$
c) $[3]$ d) $[4]$

14) What is least element for following diagram?



a) 1 b) 6
c) Both 1 and 6 d) none

Section – I

Q.2 Solve Any Three. **12**

a) Show the following implications
i) $(P \to Q) \to Q \Rightarrow P \vee Q$
ii) $(P \wedge Q) \Rightarrow (P \to Q)$

b) Convert the following prefix and suffix formulas into completely parenthesized form. Also write then in an infix form using the above order of precedence to minimize the number of parentheses.
i) $\to \neg P \vee Q \leftrightarrow R \neg S$
ii) $\to\to PQ \to\to QR \to PR$

c) Given $S = \{a1, a2, a3, a4, a5, a6, a7, a8\}$, what subsets are represented by $B_{15},\ B_{30}$? Also how will you designate the subsets $\{a2, a6, a7\}$ and $\{a1, a8\}$.

d) Given $S = \{1, 2, 3, 4\}$ and a relation R on S defined by $R = \{< 1,2 >, < 4,3 >, < 2,2 >, < 2,1 >, < 3,1 >\}$. Show that R is not transitive. Find a relation $R1 \supseteq R$ such that $R1$ is transitive. Can you find another relation $R2 \supseteq R$ which is also transitive?

Q.3 a) Obtain PDNF for the following and comment whether they are tautology or not **08**
a) $(\urcorner P \vee \urcorner Q) \to (P \leftrightarrow \urcorner Q)$
b) $(Q \to P) \wedge (\urcorner P \wedge Q)$
c) $P \to (P \wedge (Q \to P))$
d) $Q \wedge (P \vee \urcorner Q)$

OR

b) State the different properties of relation with example and solve the following problem. Let $R = \{< 2,3 >, < 4,5 >, < 3,3 >\}$ and $S = \{< 5,3 >, < 4,2 >, < 2,4 >\}$. Find $R \circ S, R \circ R$ and $S \circ S$. **08**

Q.4 Show that the conclusion C follows from the premises $\mathrm{H1}, \mathrm{H2}, \cdots$ in the following cases **08**

a) $\mathrm{H1}: \mathrm{P} \to \mathrm{Q}$ $\mathrm{C}: \mathrm{P} \to (\mathrm{P} \wedge \mathrm{Q})$

b) $\mathrm{H1}: \neg\mathrm{P} \vee \mathrm{Q}$ $\mathrm{H2}: \neg(\mathrm{Q} \wedge \neg\mathrm{P})$ $\mathrm{H3}: \neg\mathrm{R}$ $\mathrm{C}: \mathrm{Q}$

c) $\mathrm{H1}: \neg\mathrm{P}$ $\mathrm{H2}: \mathrm{P} \vee \mathrm{Q}$ $\mathrm{C}: \mathrm{Q}$

d) $\mathrm{H1}: \neg\mathrm{Q}$ $\mathrm{H2}: \mathrm{P} \to \mathrm{Q}$ $\mathrm{C}: \neg\mathrm{P}$

Section – II

Q.5 Solve any three. **12**

a) Let $f: R \to R$ and $g: R \to R$ where R is the set of real numbers. Find $f \circ g$ and $g \circ f$ where $f(x) = x^2 - 2$ and $g(x) = x + 4$.

b) Prove that the set $G = \{0, 1, 2, 3, 4, 5, 6\}$ is a monoid with respect to addition modulo 7.

c) Convert the infix expression $\mathrm{a} + \mathrm{b} * \mathrm{c} - \mathrm{d}/\mathrm{e}$ to reverse polish expression

d) Explain the term lattice with example.

Q.6 **a)** Let A be a given finite set and $\rho(A)$ its power set. Let $\subseteq$ be the inclusion relation on the elements of $\rho(A)$. Draw Hasse diagram of $< \rho(A), \subseteq >$ for **08**

a) $A = \{a\}$

b) $A = \{a, b\}$

c) $A = \{a, b, c\}$

d) $A = \{a, b, c, d\}$

OR

b) Define algebraic system. State and explain its properties with example.

Q.7 Let $X = \{1, 2, 3\}$ and f, g, h and s be the functions from X to X given by **08**

$f = \{< 1, 2 >, < 2, 3 >, < 3, 1 >\}$

$g = \{< 1,2 >, < 2, 1 >, < 3, 3 >\}$

$h = \{< 1, 1 >, < 2, 2 >, < 3, 1 >\}$

$s = \{< 1,1 >, < 2, 2 >, < 3, 3 >\}$

Find

1) $f \circ f$
2) $g \circ g$
3) $f \circ h \circ g$
4) $s \circ g$
5) $g \circ s$
6) $s \circ s$ and
7) $f \circ s$

S.Y. (B.Tech.) (Sem-I) (Old) (CBCS) Examination: March/April-2025
COMPUTAR SCIENCE & ENGINEERING
Discrete Mathematical Structures (BTN03302)

Day & Date: Monday, 19-05-2025 Max. Marks: 70
Time: 03:00 PM To 06:00 PM

Instructions: 1) Q. No. 1 is compulsory. It should be solved in the first 30 minutes in Answer Book Page no 03 (Starting page of the Answer Book). Each question carries one mark.
2) Don't forget to Mention question paper set (P/Q/R/S) on top of page.
3) Figures to the right indicates full marks.

MCQ/Objective Type Questions

Duration: 30 Minutes Marks:14

Q.1 Choose correct option. **14**

1) $S = \{a.b,c\}$ and consider the following collections of subsets of S. $A = \{\{a,b\},\{b,c\}\}, B = \{\{a\},\{a,c\}\}, C = \{\{a\},\{b,c\}\}, D = \{\{a,b,c\}\}$, $E = \{\{a\},\{b\},\{c\}\}$, and $F = \{\{a\},\{a,b\},\{a,c\}\}$. Which of the following set is not covering?

a) $A = \{\{a,b\},\{b,c\}\}$ b) $B = \{\{a\},\{a,c\}\}$
c) $C = \{\{a\},\{b,c\}\}$ d) $D = \{\{a,b,c\}\}$

2) Which of the following is are true?

a) The inverse of a function f exists if f is injective only
b) The inverse of a function f exists if f is surjective only
c) The inverse of a function f is defined if f is both injective and surjective
d) A function that is neither injective e or surjective is sometimes invertible

3) Which of the following algebraic structures form a group?

a) The set of integers under subtraction.
b) The set of integers under addition.
c) The set of rational numbers under multiplication.
d) The set of complex numbers under multiplication.

4) Let g be a homomorphism from $< X, \circ >$ to $< Y, * >$. If g : $X \to Y$ is one-to-one onto then g is called _____.

a) Automorphism b) Endomorphism
c) Monomorphism d) Isomorphism

5) What is the rank of the equation $abc+$?

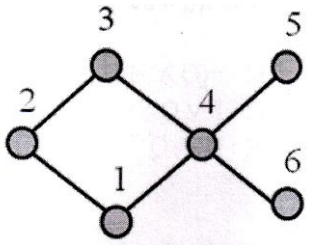
a) 1 b) 2
c) 3 d) 4

6) For the following $< Z_5, +5 >$ what is the inverse of element $[3]$.

$+_6$	0	1	2	3	4	5
0	0	1	2	3	4	5
1	1	2	3	4	5	0
2	2	3	4	5	0	1
3	3	4	5	0	1	2
4	4	5	0	1	2	3
5	5	0	1	2	3	4

a) $[1]$ b) $[2]$
c) $[3]$ d) $[4]$

7) What is least element for following diagram?



a) 1 b) 6
c) Both 1 and 6 d) none

8) Which of the following formula/s is/ are not well-formed formula/s?

a) $((\neg Q \wedge P) \wedge Q)$
b) $((P \rightarrow (Q \rightarrow R)) \rightarrow ((P \rightarrow Q) \rightarrow (P \rightarrow R)))$
c) $((\neg P \rightarrow Q) \rightarrow (Q \rightarrow P)))$
d) $((P \wedge Q) \leftrightarrow P)$

9) Which of the following statement formula is contradiction?

a) $\neg(\neg(P \wedge Q) \leftrightarrow (\neg P) \vee (\neg Q))$
b) $\neg(P \wedge Q) \leftrightarrow (\neg P) \vee (\neg Q)$
c) $R \rightarrow \neg R$
d) None

10) Which of the following formula/s is/are PCNF?

a) $(P \vee \neg Q) \wedge (Q \vee R) \wedge (\neg P \vee Q \vee \neg R)$
b) $(P \vee \neg R) \wedge (P \vee \neg Q \vee R) \wedge (\neg P \vee \neg Q \wedge \neg R)$
c) $(P \vee \neg P \vee \neg R) \wedge (P \vee \neg Q \vee R) \wedge (\neg P \vee \neg Q \vee \neg R)$
d) $(P \vee \neg Q \vee \neg R) \wedge (P \vee \neg Q \vee R) \wedge (\neg P \vee \neg Q \vee \neg R)$

11) If the principal disjunctive normal form of a given formula A containing n variables is known, then the principal disjunctive normal form of $\neg A$ will consist of _____.

a) The disjunction of the remaining maxterms which do not appear in the principal disjunctive normal form of A.
b) The disjunction of the remaining minterms which do not appear in the principal disjunctive normal form of A.
c) The conjunction of the remaining minterms which do not appear in the principal disjunctive normal form of A.
d) The conjunction of the remaining maxterms which do not appear in the principal disjunctive normal form of A.

12) Let $P = \{x | 4 \leq x \leq 10$ and x is even$\}$ Then P is equivalent to _____.

a) $\{4, 5, 6, 7, 8, 9, 10\}$
b) $\{6, 8\}$
c) $\{6, 8, 10\}$
d) $\{4, 6, 8, 10\}$

13) Given $A = \{2,5,6\}$ $B = \{3,4,2\}$, then $A + B$ is given by _____.

a) $\{2\}$
b) $\{3, 4\}$
c) $\{5, 6\}$
d) $\{5, 6, 3, 4\}$

14) Consider a set $A = \{1,2,3\}$. The binary relation $R = \{< 1,1 >, < 1,2 >, < 1,3 >, < 3,1 >, < 3,2 >\}$ on A is _____.

a) R is both symmetric and antisymmetric
b) R is not symmetric but antisymmetric
c) R is neither symmetric and nor antisymmetric
d) R is symmetric but not antisymmetric

a) $\{2\}$ b) $\{3,4\}$
c) $\{5,6\}$ d) $\{5,6,3,4\}$

2) Consider a set $A = \{1,2,3\}$. The binary relation $R = \{< 1,1 >, < 1,2 >, < 1,3 >, < 3,1 >, < 3,2 >\}$ on A is _____.
a) R is both symmetric and antisymmetric
b) R is not symmetric but antisymmetric
c) R is neither symmetric and nor antisymmetric
d) R is symmetric but not antisymmetric

3) $S = \{a.b,c\}$ and consider the following collections of subsets of S. $A = \{\{a,b\},\{b,c\}\}, B = \{\{a\},\{a,c\}\}, C = \{\{a\},\{b,c\}\}, D = \{\{a,b,c\}\}$, $E = \{\{a\},\{b\},\{c\}\}$, and $F = \{\{a\},\{a,b\},\{a,c\}\}$. Which of the following set is not covering?
a) $A = \{\{a,b\},\{b,c\}\}$ b) $B = \{\{a\},\{a,c\}\}$
c) $C = \{\{a\},\{b,c\}\}$ d) $D = \{\{a,b,c\}\}$

4) Which of the following is are true?
a) The inverse of a function f exists if f is injective only
b) The inverse of a function f exists if f is surjective only
c) The inverse of a function f is defined if f is both injective and surjective
d) A function that is neither injective e or surjective is sometimes invertible

5) Which of the following algebraic structures form a group?

a) The set of integers under subtraction.
b) The set of integers under addition.
c) The set of rational numbers under multiplication.
d) The set of complex numbers under multiplication.

6) Let g be a homomorphism from $< X, \circ >$ to $< Y, * >$. If $g : X \to Y$ is one-to-one onto then g is called _____.

a) Automorphism
b) Endomorphism
c) Monomorphism
d) Isomorphism

7) What is the rank of the equation $abc+?$

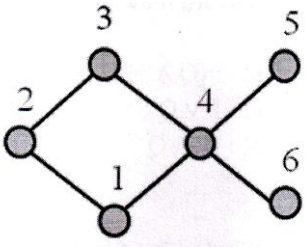
a) 1
b) 2
c) 3
d) 4

8) For the following $< Z_5, +5 >$ what is the inverse of element $[3]$.

$+_6$	0	1	2	3	4	5
0	0	1	2	3	4	5
1	1	2	3	4	5	0
2	2	3	4	5	0	1
3	3	4	5	0	1	2
4	4	5	0	1	2	3
5	5	0	1	2	3	4

a) $[1]$
b) $[2]$
c) $[3]$
d) $[4]$

9) What is least element for following diagram?



a) 1
b) 6
c) Both 1 and 6
d) none

10) Which of the following formula/s is/ are not well-formed formula/s?

a) $((\neg Q \wedge P) \wedge Q)$
b) $((P \to (Q \to R)) \to ((P \to Q) \to (P \to R)))$
c) $((\neg P \to Q) \to (Q \to P)))$
d) $((P \wedge Q) \leftrightarrow P)$

11) Which of the following statement formula is contradiction?

a) $\neg(\neg(P \wedge Q) \leftrightarrow (\neg P) \vee (\neg Q))$
b) $\neg(P \wedge Q) \leftrightarrow (\neg P) \vee (\neg Q)$
c) $R \to \neg R$
d) None

12) Which of the following formula/s is/are PCNF?

a) $(P \vee \neg Q) \wedge (Q \vee R) \wedge (\neg P \vee Q \vee \neg R)$

b) $(P \vee \neg R) \wedge (P \vee \neg Q \vee R) \wedge (\neg P \vee \neg Q \wedge \neg R)$

c) $(P \vee \neg P \vee \neg R) \wedge (P \vee \neg Q \vee R) \wedge (\neg P \vee \neg Q \vee \neg R)$

d) $(P \vee \neg Q \vee \neg R) \wedge (P \vee \neg Q \vee R) \wedge (\neg P \vee \neg Q \vee \neg R)$

13) If the principal disjunctive normal form of a given formula A containing n variables is known, then the principal disjunctive normal form of $\neg A$ will consist of _____.

a) The disjunction of the remaining maxterms which do not appear in the principal disjunctive normal form of A.

b) The disjunction of the remaining minterms which do not appear in the principal disjunctive normal form of A.

c) The conjunction of the remaining minterms which do not appear in the principal disjunctive normal form of A.

d) The conjunction of the remaining maxterms which do not appear in the principal disjunctive normal form of A.

14) Let $P = \{x | 4 \leq x \leq 10$ and x is even$\}$ Then P is equivalent to _____.

a) $\{4, 5, 6, 7, 8, 9, 10\}$ b) $\{6, 8\}$

c) $\{6, 8, 10\}$ d) $\{4, 6, 8, 10\}$

Seat No.		Set	S

S.Y. (B.Tech.) (Sem-I) (Old) (CBCS) Examination: March/April-2025
COMPUTAR SCIENCE & ENGINEERING
Discrete Mathematical Structures (BTN03302)

Day & Date: Monday, 19-05-2025 Max. Marks: 56
Time: 03:00 PM To 06:00 PM

Instructions: 1) All questions are compulsory.
2) Figures to the right indicate full marks.
3) Assume suitable data if necessary.

Section – I

Q.2 Solve Any Three. **12**

a) Show the following implications
i) $(P \to Q) \to Q \Rightarrow P \vee Q$
ii) $(P \wedge Q) \Rightarrow (P \to Q)$

b) Convert the following prefix and suffix formulas into completely parenthesized form. Also write then in an infix form using the above order of precedence to minimize the number of parentheses.
i) $\to \neg P \vee Q \leftrightarrow R \neg S$
ii) $\to\to PQ \to\to QR \to PR$

c) Given $S = \{a1, a2, a3, a4, a5, a6, a7, a8\}$, what subsets are represented by $B_{15},\ B_{30}$? Also how will you designate the subsets $\{a2, a6, a7\}$ and $\{a1, a8\}$.

d) Given $S = \{1, 2, 3, 4\}$ and a relation R on S defined by $R = \{< 1,2 >, < 4,3 >, < 2,2 >, < 2,1 >, < 3,1 >\}$. Show that R is not transitive. Find a relation $R1 \supseteq R$ such that $R1$ is transitive. Can you find another relation $R2 \supseteq R$ which is also transitive?

Q.3 a) Obtain PDNF for the following and comment whether they are tautology or not **08**
a) $(\urcorner P \vee \urcorner Q) \to (P \leftrightarrow \urcorner Q)$
b) $(Q \to P) \wedge (\urcorner P \wedge Q)$
c) $P \to (P \wedge (Q \to P))$
d) $Q \wedge (P \vee \urcorner Q)$

OR

b) State the different properties of relation with example and solve the following problem. Let $R = \{< 2,3 >, < 4,5 >, < 3,3 >\}$ and $S = \{< 5,3 >, < 4,2 >, < 2,4 >\}$. Find $R \circ S, R \circ R$ and $S \circ S$. **08**

Q.4 Show that the conclusion C follows from the premises $\mathrm{H1}, \mathrm{H2}, \cdots$ in the following cases **08**

a) $\mathrm{H1}: \mathrm{P} \to \mathrm{Q}$ $\mathrm{C}: \mathrm{P} \to (\mathrm{P} \wedge \mathrm{Q})$

b) $\mathrm{H1}: \neg\mathrm{P} \vee \mathrm{Q}$ $\mathrm{H2}: \neg(\mathrm{Q} \wedge \neg\mathrm{P})$ $\mathrm{H3}: \neg\mathrm{R}$ $\mathrm{C}: \mathrm{Q}$

c) $\mathrm{H1}: \neg\mathrm{P}$ $\mathrm{H2}: \mathrm{P} \vee \mathrm{Q}$ $\mathrm{C}: \mathrm{Q}$

d) $\mathrm{H1}: \neg\mathrm{Q}$ $\mathrm{H2}: \mathrm{P} \to \mathrm{Q}$ $\mathrm{C}: \neg\mathrm{P}$

Section – II

Q.5 Solve any three. **12**

a) Let $f: R \to R$ and $g: R \to R$ where R is the set of real numbers. Find $f \circ g$ and $g \circ f$ where $f(x) = x^2 - 2$ and $g(x) = x + 4$.

b) Prove that the set $G = \{0, 1, 2, 3, 4, 5, 6\}$ is a monoid with respect to addition modulo 7.

c) Convert the infix expression $\mathrm{a} + \mathrm{b} * \mathrm{c} - \mathrm{d}/\mathrm{e}$ to reverse polish expression

d) Explain the term lattice with example.

Q.6 **a)** Let A be a given finite set and $\rho(A)$ its power set. Let $\subseteq$ be the inclusion relation on the elements of $\rho(A)$. Draw Hasse diagram of $< \rho(A), \subseteq >$ for **08**

a) $A = \{a\}$

b) $A = \{a, b\}$

c) $A = \{a, b, c\}$

d) $A = \{a, b, c, d\}$

OR

b) Define algebraic system. State and explain its properties with example.

Q.7 Let $X = \{1, 2, 3\}$ and f, g, h and s be the functions from X to X given by **08**

$f = \{< 1, 2 >, < 2, 3 >, < 3, 1 >\}$

$g = \{< 1,2 >, < 2, 1 >, < 3, 3 >\}$

$h = \{< 1, 1 >, < 2, 2 >, < 3, 1 >\}$

$s = \{< 1,1 >, < 2, 2 >, < 3, 3 >\}$

Find

1) $f \circ f$
2) $g \circ g$
3) $f \circ h \circ g$
4) $s \circ g$
5) $g \circ s$
6) $s \circ s$ and
7) $f \circ s$

(CBCS) Examination: March/April - 2025
Data Structures (BTN03303)

Day & Date: Tuesday, 20-May-2025 Max. Marks: 70
Time: 03:00 PM To 06:00 PM

Instructions: 1) Q. No. 1 is compulsory. It should be solved in the first 30 minutes in answer book. Page no 03 (Starting page of the Answer Book). Each question carries one mark.
2) Don't forget to Mention question paper set (P/Q/R/S) on top of page.
3) Figures to the right indicates full marks.
4) Assume data wherever necessary

MCQ/Objective Type Questions

Duration: 30 Minutes Marks:14

Q.1 Multiple Choice Questions: **14**

1) Two main measures for the efficiency of an algorithm are ____
a) Processor and memory b) Complexity and capacity
c) Time and space d) Data and space

2) Which data structure allows deleting data elements from front and inserting at rear?
a) Stack b) Queue
c) Dequeue d) None of these

3) Hashing collision resolution techniques are ____.
a) Huffman coding, linear hashing
b) Buket addressing, Huffman coding
c) Chaining, Huffman coding
d) close chaining, open addressing

4) The number of edges in a complete graph of n vertices is ____.
a) n(n+1)/2 b) n(n-1)/2
c) n2/2 d) n

5) The situation when in a linked list START=NULL is ____.
a) Underflow b) Overflow
c) Houseful d) Saturated

6) The keys 12, 18, 13, 2, 3, 23, 5 and 15 are inserted into an initially empty hash table of length 10 using open addressing with hash function h(k) = k mod 10 and linear probing. What is the resultant hash table?

a)

0	
1	
2	2
3	23
4	
5	15
6	
7	
8	18
9	

b)

0	
1	
2	12
3	13
4	
5	5
6	
7	
8	18
9	

c)

0	
1	
2	12
3	13
4	2
5	3
6	23
7	5
8	18
9	15

d)

0	
1	
2	12, 2
3	13, 3, 23
4	
5	5, 15
6	
7	
8	18
9	

7) Suppose the numbers 7, 5, 1, 8, 3, 6, 0, 9, 4, 2 are inserted in that order into an initially empty binary search tree. The binary search tree uses the usual ordering on natural numbers. What is the in-order traversal sequence of the resultant tree?

a) 7 5 1 0 3 2 4 6 8 9
b) 0 2 4 3 1 6 5 9 8 7
c) 0 1 2 3 4 5 6 7 8 9
d) 9 8 6 4 2 3 0 1 5 7

8) Find Postorder of the binary tree with node labels a, b, c, d, e, f and g for which the in order and preorder traversals result in the following sequences:

Inorder a f b c d g e Preorder b f a d c e g

a) b f a d e c
b) a b d f c e g
c) a f c g e d b
d) g e c d a f b

9) Consider the following linked list and linked list representation, what will be the value of following statement?

start→next→next→next→data 10→12→15→25→30→36

a) 12
b) 30
c) 15
d) 25

10) Which indicates pre-order traversal?

a) Left sub-tree, Right sub-tree, and root
b) Right sub-tree, Left sub-tree and root
c) Root, Left sub-tree, Right sub-tree
d) Right sub-tree, root, Left sub-tree

11) If there exist one pain at least, between every pair of vertices in a graph, the Graph is known as ____.

a) complete graph b) Disconnected graph
c) connected graph d) Euler graph

12) The postfix form of A* B+C/D is ____.

a) AB*CD/+ b) A*BCD/+
c) ABCD*/+ d) None

13) In Breadth First Search of Graph, which of the following data structure is used?

a) Stack b) Queue
c) Linked List d) None of the above

14) The operation of visiting each element in the list is known as ____

a) Sorting b) Merging
c) Inserting d) Traversal

3) Use of non-programmable calculators is allowed.
4) Assume suitable data if necessary and mention it clearly.

Section – I

Q.2 Answer the following: (Any Three) **12**

a) Perform Bubble sort (ascending) of following numbers. Show every iteration.
A = {27, 13, 32, 6, 15, 19, 11}

b) Elaborate Data Structures and its types.

c) Write a short note on the collision resolution technique of Linear Probing using suitable example?

d) Evaluate the following postfix expression 7 4 2 * + 9 - using Stack.

Q.3 Answer the following: (Any Two) **16**

a) Explain doubly linked list with insertion and deletion operation.

b) How an infix expression is converted to postfix using stack? Convert following expression into postfix by providing proper explanation and showing content of stack?
(P + Q) * R/S + T ^ U/V

c) Write a program/pseudocode to implement linear queue and perform the operations.
i) Insert
ii) Delete
iii) Display

Section – II

Q.4 Answer the following: (Any Three) **12**

a) Compare between B tree with B+ Tree.

b) Write a note on DFS (Depth First Search) traversal in graph with a suitable example.

c) What is Graph? With an example explain Adjacency Matrix Graph Representation for directed and undirected graph.

d) Define following terminologies in Graph
i) Cycle
ii) degree of a node
iii) regular graph
iv) Path

Q.5 Answer the following: (Any Two) **16**

a) Explain the finding the shortest path in a given graph using Dijkstra algorithm (State and assume suitable data)

b) Explain with example rotations in AVL tree.
Also Give an AVL tree for following elements.
12, 45, 66, 21, 88, 45, 32, 89,14, 76, 46, 91, 33, 28

c) Construct a Binary Search Tree for following elements: 8, 40, 25, 70, 22, 35, 60, 80, 90,10, 30. Traverse the tree using Inorder, Preorder and Postorder traversals.

9	

11) Suppose the numbers 7, 5, 1, 8, 3, 6, 0, 9, 4, 2 are inserted in that order into an initially empty binary search tree. The binary search tree uses the usual ordering on natural numbers. What is the in-order traversal sequence of the resultant tree?
a) 7 5 1 0 3 2 4 6 8 9 b) 0 2 4 3 1 6 5 9 8 7
c) 0 1 2 3 4 5 6 7 8 9 d) 9 8 6 4 2 3 0 1 5 7

12) Find Postorder of the binary tree with node labels a, b, c, d, e, f and g for which the in order and preorder traversals result in the following sequences:

Inorder a f b c d g e Preorder b f a d c e g

a) b f a d e c
b) a b d f c e g
c) a f c g e d b
d) g e c d a f b

13) Consider the following linked list and linked list representation, what will be the value of following statement?

start→next→next→next→data 10→12→15→25→30→36

a) 12
b) 30
c) 15
d) 25

14) Which indicates pre-order traversal?

a) Left sub-tree, Right sub-tree, and root
b) Right sub-tree, Left sub-tree and root
c) Root, Left sub-tree, Right sub-tree
d) Right sub-tree, root, Left sub-tree

S.Y. (B.Tech.) (Computer Science & Engineering) (Semester - I) (Old)
(CBCS) Examination: March/April - 2025
Data Structures (BTN03303)

Day & Date: Tuesday, 20-May-2025 Max. Marks: 56
Time: 03:00 PM To 06:00 PM

Instructions: 1) All questions are compulsory.
2) Figures to the right indicate full marks.
3) Use of non-programmable calculators is allowed.
4) Assume suitable data if necessary and mention it clearly.

Section – I

Q.2 Answer the following: (Any Three) **12**

a) Perform Bubble sort (ascending) of following numbers. Show every iteration.
A = {27, 13, 32, 6, 15, 19, 11}

b) Elaborate Data Structures and its types.

c) Write a short note on the collision resolution technique of Linear Probing using suitable example?

d) Evaluate the following postfix expression 7 4 2 * + 9 - using Stack.

Q.3 Answer the following: (Any Two) **16**

a) Explain doubly linked list with insertion and deletion operation.

b) How an infix expression is converted to postfix using stack? Convert following expression into postfix by providing proper explanation and showing content of stack?
(P + Q) * R/S + T ^ U/V

c) Write a program/pseudocode to implement linear queue and perform the operations.
i) Insert
ii) Delete
iii) Display

Section – II

Q.4 Answer the following: (Any Three) **12**

a) Compare between B tree with B+ Tree.

b) Write a note on DFS (Depth First Search) traversal in graph with a suitable example.

c) What is Graph? With an example explain Adjacency Matrix Graph Representation for directed and undirected graph.

d) Define following terminologies in Graph
i) Cycle
ii) degree of a node
iii) regular graph
iv) Path

Q.5 Answer the following: (Any Two) **16**

a) Explain the finding the shortest path in a given graph using Dijkstra algorithm (State and assume suitable data)

b) Explain with example rotations in AVL tree.
Also Give an AVL tree for following elements.
12, 45, 66, 21, 88, 45, 32, 89,14, 76, 46, 91, 33, 28

c) Construct a Binary Search Tree for following elements: 8, 40, 25, 70, 22, 35, 60, 80, 90,10, 30. Traverse the tree using Inorder, Preorder and Postorder traversals.

3	13
4	2
5	3
6	23
7	5
8	18
9	15

d)

0	
1	
2	12, 2
3	13, 3, 23
4	
5	5, 15
6	
7	
8	18
9	

2) Suppose the numbers 7, 5, 1, 8, 3, 6, 0, 9, 4, 2 are inserted in that order into an initially empty binary search tree. The binary search tree uses the usual ordering on natural numbers. What is the in-order traversal sequence of the resultant tree?

a) 7 5 1 0 3 2 4 6 8 9 b) 0 2 4 3 1 6 5 9 8 7
c) 0 1 2 3 4 5 6 7 8 9 d) 9 8 6 4 2 3 0 1 5 7

3) Find Postorder of the binary tree with node labels a, b, c, d, e, f and g for which the in order and preorder traversals result in the following sequences:

Inorder a f b c d g e Preorder b f a d c e g

a) b f a d e c b) a b d f c e g
c) a f c g e d b d) g e c d a f b

4) Consider the following linked list and linked list representation, what will be the value of following statement?

start→next→next→next→data 10→12→15→25→30→36

a) 12 b) 30
c) 15 d) 25

5) Which indicates pre-order traversal?

a) Left sub-tree, Right sub-tree, and root
b) Right sub-tree, Left sub-tree and root
c) Root, Left sub-tree, Right sub-tree
d) Right sub-tree, root, Left sub-tree

6) If there exist one pain at least, between every pair of vertices in a graph, the Graph is known as ____.

a) complete graph b) Disconnected graph
c) connected graph d) Euler graph

7) The postfix form of A* B+C/D is ____.

a) AB*CD/+ b) A*BCD/+
c) ABCD*/+ d) None

8) In Breadth First Search of Graph, which of the following data structure is used?

a) Stack b) Queue
c) Linked List d) None of the above

9) The operation of visiting each element in the list is known as ____

a) Sorting b) Merging
c) Inserting d) Traversal

10) Two main measures for the efficiency of an algorithm are ____

a) Processor and memory b) Complexity and capacity
c) Time and space d) Data and space

11) Which data structure allows deleting data elements from front and inserting at rear?

a) Stack
b) Queue
c) Dequeue
d) None of these

12) Hashing collision resolution techniques are ____.

a) Huffman coding, linear hashing
b) Buket addressing, Huffman coding
c) Chaining, Huffman coding
d) close chaining, open addressing

13) The number of edges in a complete graph of n vertices is ____.

a) n(n+1)/2
b) n(n-1)/2
c) n2/2
d) n

14) The situation when in a linked list START=NULL is ____.

a) Underflow
b) Overflow
c) Houseful
d) Saturated

MCQ/Objective Type Questions

Duration: 30 Minutes Marks:14

Q.1 Choose the correct Answer. **14**

1) At end of each scan line the electron beam return to the left side on the screen to begin next _____.
a) Vertical refresh b) Horizontal refresh
c) Scanning d) Both a & b

2) The transformation that changes the coordinate positions of an object along a circular path is called ____.
a) Translation b) Scaling
c) Rotation d) Reflection

3) The process of determining the suitable or appropriate pixels for representing image or graphic object is called ____.
a) Animation b) Rasterization
c) Scan-Conversion d) Quantization

4) Which of the following techniques is used in Midpoint Subdivision algorithm?
a) Binary search b) Bubble sort
c) Linear search d) Sequential search

5) The basic geometric transformations are ____.
a) Translation b) Rotation
c) Scaling d) All of the mentioned

6) Back face removal is an example of ____.
a) object space method b) image space method
c) combination of both d) None

7) Clipping algorithm which follows "Divide and conquer" strategy is____.
a) Sutherland - Cohen algorithm b) Cyrus - Beck algorithm
c) Midpoint subdivision d) None of the above

8) The centre region of the screen and the window can be represented as ____.

a) 0000 b) 1111
c) 0110 d) 1001

9) In the Cohen-sutherland line clipping algorithm, if the codes of the two points P and Q are 0101 and 0001 then the line segment joining the points P and Q will be ____ the clipping window.

a) Totally outside b) Partially outside
c) Totally inside d) None

10) Aliasing effect means ____.

a) Staircase effect b) Shading effect
c) Rendering effect d) Cueing effect

11) In Warnock algorithm, the polygon is called as surrounding, if it completely ____ the window.

a) Outside b) Contains
c) Intersects d) None of above

12) ____ are the types of curve representation.

a) Parametric b) Non-parametric
c) Both d) None

13) ____ control points are the points which decides the local shape of a curve.

a) Local b) Global
c) Interpolation d) None

14) In interpolation, curve always passes through ____ control points.

a) Last and second b) First and second
c) First and Last d) All

COMPUTER SCIENCE & ENGINEERING
Computer Graphics (BTN03304)

Day & Date: Wednesday, 21-May-2025 Max. Marks: 56
Time: 03:00 PM To 06:00 PM

Instructions: 1) All questions are compulsory.
2) Figures to the right indicate full marks.
3) Assume suitable data if necessary and mention it clearly.

Section – I

Q.2 Answer the following: (Any Four) **16**
- **a)** Write a note on: Aspect ratio and Frame buffer.
- **b)** Explain 2D Reflection.
- **c)** Define polygon. Explain seed fill polygon filling.
- **d)** Scale the polygon with coordinates A(2,5) B(7,10) C(10,2) by 2 units in both x and 3 units in y direction.
- **e)** Explain Rotation about an arbitrary point.

Q.3 Answer the following: (Any One) **06**
- **a)** Consider a line from (1,1) to (7,8). Use DDA algorithm to rasterize this line.
- **b)** Write a 'C' program for Bresenham's Circle generation algorithm.

Q.4 Answer the following: **06**
Explain the following:
- **a)** Interactive Devices
- **b)** Shadow Mask Technique

Section-II

Q.5 Answer the following: (Any Four) **16**
- **a)** Explain Back Face removal algorithm.
- **b)** Explain Display file compilation?
- **c)** Explain properties of Bezier curve.
- **d)** Explain Z-Buffer algorithm.
- **e)** Explain Painter's algorithm.

Q.6 Answer the following: (Any One) **06**
- **a)** Explain Warnock algorithm.
- **b)** Explain parametric and non-parametric curves.

Q.7 Answer the following: **06**
Explain Cohen-Sutherland Line Clipping algorithm.

S. Y. (B. Tech) (Sem-I) (Old) (CBCS) Examination: March/April-2025
COMPUTAR SCIENCE & ENGINEERING
Microprocessors (BTN03305)

Day & Date: Thursday 22-05-2025 Max. Marks: 70
Time: 03:00 PM To 06:00 PM

Instructions: 1) Q. No. 1 is compulsory. It should be solved in the first 30 minutes in Answer Book Page no 03 (Starting page of the Answer Book). Each question carries one mark.
2) Don't forget to Mention question paper set (P/Q/R/S) on top of page.
3) Figures to the right indicates full marks.

MCQ/Objective Type Questions

Duration: 30 Minutes Marks:14

Q.1 Choose the correct Answer. **14**

1) Which section of the 8085 microprocessor pin diagram typically handles input/output operations?
a) Data bus b) Address bus
c) Control bus d) I/O Ports

2) Which addressing mode is commonly used in the 8086 microprocessor for accessing data located at a fixed memory address?
a) Direct addressing mode b) Indirect addressing mode
c) Register addressing mode d) Immediate addressing mode

3) Which component of the 8086 microprocessor is responsible for executing machine language instructions?
a) CU (Control Unit) b) ALU (Arithmetic Logic Unit)
c) Registers d) Cache Memory

4) Which directive in assembly language is used to define a constant value?
a) MOV b) DB
c) JMP d) CALL

5) Which register is commonly used for storing the result of arithmetic operations in the 8086-instruction set?
a) AX b) BX
c) CX d) DX

6) What does the "MOV" instruction do in the 8086 instruction set?
a) Adds two operands
b) Moves data from one location to another
c) Subtracts two operands
d) Compares two operands

7) Which instruction is used for unconditional branching in the 8086 instruction set?

a) JZ
b) CALL
c) JMP
d) ADC

8) In the minimum mode configuration of 8086, which component is responsible for generating control signals and coordinating operations?

a) CPU
b) Clock Generator
c) Bus Controller
d) Memory Controller

9) What does the HOLD signal indicate in the system timing diagram of the 8086 microprocessor?

a) That the processor has completed an instruction
b) That a DMA (Direct Memory Access) request is pending
c) That the processor requires additional wait states
d) That the processor is resetting

10) In the system timing diagram of the 8086 microprocessor, what does the T1 state represent?

a) Memory read
b) Memory write
c) Opcode fetch
d) Execution of instruction

11) What is the primary function of the Programmable Interrupt Controller (PIC) 8259 in computer systems?

a) To handle memory management
b) To generate interrupts
c) To control input/output operations
d) To manage processor cache

12) What is the primary function of the Numeric Data Processor (NDP) 8087 in conjunction with the 8086 microprocessors?

a) To perform floating-point arithmetic operations
b) To handle interrupt requests
c) To manage memory access
d) To execute control transfer instructions

13) What is the primary function of the Programmable Peripheral Interface (PPI) 8255 in computer systems?

a) To handle memory management
b) To generate interrupts
c) To control input/output operations
d) To manage processor cache

14) Which mode of operation allows bidirectional data transfer on all three ports of the 8255?

a) Mode 3
b) Mode 2
c) Mode 1
d) Mode 0

Day & Date: Thursday 22-05-2025 Max. Marks: 56
Time: 03:00 PM To 06:00 PM

Instructions: 1) All questions are compulsory.
2) Figures to the right indicate full marks.

Section – I

Q.2 Attempt any Four **16**

a) Draw the pin diagram of 8085 and explain the function of following pins.
1) HLDA 2) SID and SOD

b) Explain the Following instruction with example.
1) ADC 2) XOR
3) MOVSB 4) SHL

c) Draw the Falg register of 8086 and explain the conditional and Control Flags.

d) Draw the net diagram of minimum mode of operation of 8086.

e) Write an assembly language Program for the factorial of a number 5.

Q.3 Attempt any two. **12**

a) Draw and explain the system bus timing diagram for READ AND WRITE operation in minimum mode of 8086.

b) Explain the architecture of 8086 in detail.

c) Define the machine cycle instruction? Draw the machine cycle instruction format? Explain the same with example.

Section – II

Q.4 Attempt any Four. **16**

a) Draw and explain the architecture of 8259A.

b) list the features of 8257?

c) Explain the operating modes of 8255 PPI.

d) Explain the real addressing mode of 80286 Microprocessor.

e) Compare the Maskable and Nonmaskable interrupt.

Q.5 Attempt any two. **12**

a) Draw and explain the Architecture of 80386.

b) Explain the architecture of 8257 in detail.

c) Explain any three data types of 8087 NDP Processor.

2) Don't forget to Mention question paper set (P/Q/R/S) on top of page.
3) Figures to the right indicates full marks.
4) Assume suitable data if necessary.

MCQ/Objective Type Questions

Duration: 30 Minutes Marks:14

Q.1 Choose the correct alternatives from the options and rewrite the sentence. **14**

1) Which of the following was used in the first generation of computers?
a) Transistors b) Integrated Circuits
c) Vacuum Tubes d) Microprocessors

2) Which was the first stored program computer developed?
a) ENIAC b) EDVAC
c) Sys. 360 d) Pentium 4

3) In a RISC (Reduced Instruction Set Computer) architecture: ____
a) Instructions are highly complex
b) Execution time is slower
c) Instructions are simple and execute in one clock cycle
d) There is a large number of addressing modes

4) The addressing mode used in instructions like MOV A, B is usually: ____
a) Direct addressing b) Register addressing
c) Immediate addressing d) Indexed addressing

5) The part of a memory address used to identify whether the required block is in the cache is called: ____
a) Offset b) Index
c) Tag d) Block number

6) A multi-core CPU where each core executes its own thread independently is typically classified as: ____
a) SISD b) SIMD
c) MISD d) MIMD

7) Which technique helps reduce the impact of control hazards in pipelining?

a) Cache memory
b) Instruction scheduling
c) Branch prediction
d) Register renaming

8) Which of the following requires minimum CPU intervention during data transfer?

a) Programmed I/O
b) Interrupt-driven I/O
c) DMA
d) Memory-mapped I/O

9) The main goal of memory hierarchy is to: ____

a) Reduce power consumption
b) Increase instruction throughput
c) Minimize cost while maximizing performance
d) Use only cache memory

10) ____ converts data from electrical to other forms of energy during output and from other forms to electrical during input.

a) Compiler
b) Transducer
c) Control logic
d) Interpreter

11) In a pipeline, a control hazard occurs due to: ____

a) Data dependencies between instructions
b) Branch instructions that alter the flow of control
c) Memory access conflicts
d) Cache misses

12) A logical programming model such as Prolog uses: ____

a) A series of instructions that define how to manipulate data
b) A set of mathematical equations to perform computations
c) Facts and rules to infer conclusions
d) Functions that process inputs and outputs

13) In a 5-stage pipeline, the stages are generally: ____

a) Fetch, decode, execute, memory access, and write-back
b) Fetch, write, decode, execute, and return
c) Instruction load, fetch, decode, write-back, and branch
d) Fetch, execute, memory, output, and input

14) Locality of reference is the basis for the effectiveness of: ____

a) Virtual memory
b) Registers
c) Caching
d) Interrupts

2) Figures to the right indicate full marks.

Section – I

Q.2 Attempt any Four **16**

a) Write a short note on the history of computing.
b) Write notes on computer generations.
c) Explain in detail message passing model.
d) Explain in detail Functional and Logic Models.
e) Describe a RISC computer in detail.

Q.3 Attempt any Two **12**

a) Enlist and explain the different addressing modes and explain in detail.
b) Explain Optimizing Compilers for Parallelism
c) Explain memory Hierarchy with different levels of memory.

Section – II

Q.4 Attempt any Four **16**

a) Differentiate between Memory Mapped I/O and I/O Mapped I/O
b) Short note on ILP Dynamic scheduling issues.
c) With neat diagram, explain any one shared memory multiprocessor model.
d) Short note on - Directory based coherence
e) Define I/O module. Explain its function in detail.

Q.5 Attempt any Two **12**

a) With a neat diagram, explain Linear and Non-linear pipeline.
b) Explain basic compiler techniques for exposing ILP.
c) Write a note on
i) External Devices
ii) I/O channels and processors

a) Reduce power consumption
b) Increase instruction throughput
c) Minimize cost while maximizing performance
d) Use only cache memory

3) ____ converts data from electrical to other forms of energy during output and from other forms to electrical during input.
a) Compiler b) Transducer
c) Control logic d) Interpreter

4) In a pipeline, a control hazard occurs due to: ____
a) Data dependencies between instructions
b) Branch instructions that alter the flow of control
c) Memory access conflicts
d) Cache misses

5) A logical programming model such as Prolog uses: ____
a) A series of instructions that define how to manipulate data
b) A set of mathematical equations to perform computations
c) Facts and rules to infer conclusions
d) Functions that process inputs and outputs

6) In a 5-stage pipeline, the stages are generally: ____
a) Fetch, decode, execute, memory access, and write-back
b) Fetch, write, decode, execute, and return
c) Instruction load, fetch, decode, write-back, and branch
d) Fetch, execute, memory, output, and input

7) Locality of reference is the basis for the effectiveness of: ____
a) Virtual memory
b) Registers
c) Caching
d) Interrupts

8) Which of the following was used in the first generation of computers?
a) Transistors
b) Integrated Circuits
c) Vacuum Tubes
d) Microprocessors

9) Which was the first stored program computer developed?
a) ENIAC
b) EDVAC
c) Sys. 360
d) Pentium 4

10) In a RISC (Reduced Instruction Set Computer) architecture: ____
a) Instructions are highly complex
b) Execution time is slower
c) Instructions are simple and execute in one clock cycle
d) There is a large number of addressing modes

11) The addressing mode used in instructions like MOV A, B is usually: ____
a) Direct addressing
b) Register addressing
c) Immediate addressing
d) Indexed addressing

12) The part of a memory address used to identify whether the required block is in the cache is called: ____
a) Offset
b) Index
c) Tag
d) Block number

13) A multi-core CPU where each core executes its own thread independently is typically classified as: ____
a) SISD
b) SIMD
c) MISD
d) MIMD

14) Which technique helps reduce the impact of control hazards in pipelining?
a) Cache memory
b) Instruction scheduling
c) Branch prediction
d) Register renaming

Set Q

S.Y. (B. Tech) (Sem - II) (New) (CBCS) Examination: March/April-2025
COMPUTER SCIENCE & ENGINEERING
Computer Organization and Architecture (CSEPCC-04)

Day & Date: Monday, 26-05-2025 Max. Marks: 56
Time: 10:00 AM To 01:00 PM

Instructions: 1) All questions are compulsory
2) Figures to the right indicate full marks.

Section – I

Q.2 Attempt any Four **16**

a) Write a short note on the history of computing.
b) Write notes on computer generations.
c) Explain in detail message passing model.
d) Explain in detail Functional and Logic Models.
e) Describe a RISC computer in detail.

Q.3 Attempt any Two **12**

a) Enlist and explain the different addressing modes and explain in detail.
b) Explain Optimizing Compilers for Parallelism
c) Explain memory Hierarchy with different levels of memory.

Section – II

Q.4 Attempt any Four **16**

a) Differentiate between Memory Mapped I/O and I/O Mapped I/O
b) Short note on ILP Dynamic scheduling issues.
c) With neat diagram, explain any one shared memory multiprocessor model.
d) Short note on - Directory based coherence
e) Define I/O module. Explain its function in detail.

Q.5 Attempt any Two **12**

a) With a neat diagram, explain Linear and Non-linear pipeline.
b) Explain basic compiler techniques for exposing ILP.
c) Write a note on
i) External Devices
ii) I/O channels and processors

Seat No.	

Set **R**

S.Y. (B. Tech) (Sem - II) (New) (CBCS) Examination: March/April-2025
COMPUTER SCIENCE & ENGINEERING
Computer Organization and Architecture (CSEPCC-04)

Day & Date: Monday, 26-05-2025 Max. Marks: 70
Time: 10:00 AM To 01:00 PM

Instructions: 1) Q. No. 1 is compulsory. It should be solved in the first 30 minutes in Answer Book Page no 03 (Starting page of the Answer Book). Each question carries one mark.
2) Don't forget to Mention question paper set (P/Q/R/S) on top of page.
3) Figures to the right indicates full marks.
4) Assume suitable data if necessary.

MCQ/Objective Type Questions

Duration: 30 Minutes Marks:14

Q.1 Choose the correct alternatives from the options and rewrite the sentence. **14**

1) In a pipeline, a control hazard occurs due to: ____
a) Data dependencies between instructions
b) Branch instructions that alter the flow of control
c) Memory access conflicts
d) Cache misses

2) A logical programming model such as Prolog uses: ____
a) A series of instructions that define how to manipulate data
b) A set of mathematical equations to perform computations
c) Facts and rules to infer conclusions
d) Functions that process inputs and outputs

3) In a 5-stage pipeline, the stages are generally: ____
a) Fetch, decode, execute, memory access, and write-back
b) Fetch, write, decode, execute, and return
c) Instruction load, fetch, decode, write-back, and branch
d) Fetch, execute, memory, output, and input

4) Locality of reference is the basis for the effectiveness of: ____
a) Virtual memory b) Registers
c) Caching d) Interrupts

5) Which of the following was used in the first generation of computers?
a) Transistors b) Integrated Circuits
c) Vacuum Tubes d) Microprocessors

6) Which was the first stored program computer developed?
a) ENIAC b) EDVAC
c) Sys. 360 d) Pentium 4

7) In a RISC (Reduced Instruction Set Computer) architecture: ____
a) Instructions are highly complex
b) Execution time is slower
c) Instructions are simple and execute in one clock cycle
d) There is a large number of addressing modes

8) The addressing mode used in instructions like MOV A, B is usually: ____
a) Direct addressing b) Register addressing
c) Immediate addressing d) Indexed addressing

9) The part of a memory address used to identify whether the required block is in the cache is called: ____
a) Offset b) Index
c) Tag d) Block number

10) A multi-core CPU where each core executes its own thread independently is typically classified as: ____
a) SISD b) SIMD
c) MISD d) MIMD

11) Which technique helps reduce the impact of control hazards in pipelining?
a) Cache memory b) Instruction scheduling
c) Branch prediction d) Register renaming

12) Which of the following requires minimum CPU intervention during data transfer?
a) Programmed I/O b) Interrupt-driven I/O
c) DMA d) Memory-mapped I/O

13) The main goal of memory hierarchy is to: ____
a) Reduce power consumption
b) Increase instruction throughput
c) Minimize cost while maximizing performance
d) Use only cache memory

14) ____ converts data from electrical to other forms of energy during output and from other forms to electrical during input.

MCQ/Objective Type Questions

Duration: 30 Minutes Marks: 14

Q.1 Choose the correct Answer. **14**

1) Which of the following statement is/are false _____.
a) The regular expression $00(1+10)^*$ denotes all strings of 0's and 1's with at least two consecutive 0's
b) The regular expression $(0+\wedge)(1+10)^*$ denotes all strings of 0's and 1's that do not have two consecutive 0's
c) The regular expression $(0+1)^*011$ denotes all strings of 0's and 1's ending with 011
d) The regular expression $(1+10)^*$ denotes all strings of 0's and 1's beginning with '1' and not having two consecutives 0's

2) The length of the shortest string NOT in the language (over $\sum = \{a, b\}$) of the following regular expression is _____.
$a^*b^*(ba)^*a^*$ Select one:
a) 5 b) 2
c) 3 d) 4

3) Given the language $\mathrm{P} = \{\mathrm{ab}, \mathrm{aa}, \mathrm{baa}\}$, which of the following strings are in P^*?
a) abaabaaabaa b) aaaabaaaa
c) baaaaabaa d) All of these

4) Describe in simple English, the language defined by $\mathrm{RE} = (01^*0)^*1$.
a) The strings starting with 1
b) The strings ending with 1 and containing even no. of 0's
c) The strings ending with 1
d) The strings starting with 1 and containing odd no. of 0's

5) The R.E. in which any number of $0'$s followed by any number of $1'$s followed by any num-ber of 2 is _____.

a) $0^*1^*2^*$ b) $(0+1)^*2^*$

c) 0^*+1+2 d) $(0+1+2)^*$

6) Which of the following statement is true?

a) Converting from Mealy into Moore machine and vice versa is possible

b) Mealy machine has no terminating state

c) A Moore machine has no terminating state

d) All of these

7) The given CFG indicates the strings _____.

$S \rightarrow aS \mid bX \mid a \mid b$

$X \rightarrow aSa \mid a$

a) with aa or bb but not both

b) that do not contain aaa

c) do not contain bbb

d) That has no consecutive b's but a's

8) Consider the following grammar.

$S \rightarrow AB$

$A \rightarrow a$

$A \rightarrow BaB$

$B \rightarrow bbA$

Which of the following statement is FALSE?

a) No string produced by this grammar has three consecutive a's

b) The length of every string produced by this grammar is even

c) No string produced by this grammar has four consecutive b's

d) The length of substring produced by B is always odd

9) Following CFG

$S \rightarrow AB \mid AS$

$A \rightarrow a \mid aA$

$B \rightarrow b$

generates the language _____

a) aa^*b b) $a(ab)^*b$

c) aa^*b+ d) $(ab)^*$

10) Which type of symbol contains in the stack of PDA?

a) Variables b) Terminals

c) Both a and b d) None of the mentioned

11) While applying Pumping lemma for CFL, we consider a string w that belong to L and fragment it into _____ parts.

a) 2 b) 5

c) 3 d) 6

12) According to Chomsky hierarchy, which of the following is recognized by Recursively Enumerable language?

a) Type 3 b) Type 2
c) Type 1 d) Type 0

13) A Turing machine that is able to simulate other Turing machines _____

a) Nested Turing machines b) Multi tap Turing machine
c) Universal Turing machines d) None of these

14) Halting state of Turing Machine are _____.

a) Start and Stop b) Accept and Reject
c) Start and Reject d) Reject and allow

Seat No.

Instructions: 1) All questions are Compulsory.
2) Figures to the right indicate full marks.

SECTION – I

Q.2 Answer any four of the following. **16**

a) Give the regular expression for following regular language over $\sum = \{0,1\}$
i) The language of all strings of 0's and 1's that have odd length
ii) The set of all strings of 0's and 1's whose second symbol from right is 0.

b) Design the DFA for following regular expression
i) $(11 + 110)^*0$
ii) $(0 + 1)^*1000$

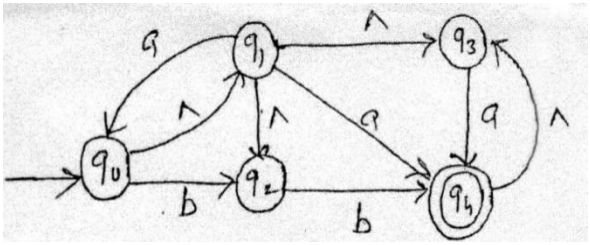
c) Differentiate between Moore machine and Mealy Machine.

d) Give recursive definition of regular language and corresponding regular expression. List and explain at least two applications of regular expression.

e) Define the CFG and give the CFG for the following CFL
$L = \{a^i b^j c^k | i = j \text{ or } j = k\}$

Q.3 Answer any two of the following. **12**

a) Convert following NFA-∧ into NFA and DFA.



b) With the help of union, concatenation and Kleene closure property design the NFA-∧ for following regular expression.
i) $(0 + 1)(01)^*(011)^*$
ii) $(0 + 1)^*(011 + 01010)$

c) Convert following CFG to CNF Notation
S → ASB
A → aAS | a | ∧
B → SbS | A |bb

SECTION – II

Q.4 Answer any four of the following. **16**

a) Prove that following language is not CFL
$L = \{a^i b^j c^k | i, j, k \geq 0\}$

b) State and explain pumping lemma for regular language.

c) Define the PDA and demonstrate the working of it.

d) Design the PDA for following language.
$L = \{a^n b^m c^{n+m} | i, j, k \geq 1\}$

e) Design the TM for $f(n, m) = n - m$, assume $n > m$.

Q.5 Answer any two of the following. **12**

a) Design the Turing Machine for Language of Palindrome over $\sum = \{a, b\}$ and demonstrate the working of string "$abba$"

b) Define the PDA acceptance by Final State and Empty Stack. Design the PDA for $L = \{a^n b^{n+m} c^m | i, j, k \geq 1\}$

c) Explain the following Turing Machines

i) Multitape Turing Machine

ii) Linear Bounded Automata

iii) Off-line Turing Machine

MCQ/Objective Type Questions

Duration: 30 Minutes Marks: 14

Q.1 Choose the correct Answer. **14**

1) Consider the following grammar.
$S \rightarrow AB$
$A \rightarrow a$
$A \rightarrow BaB$
$B \rightarrow bbA$
Which of the following statement is FALSE?
a) No string produced by this grammar has three consecutive a's
b) The length of every string produced by this grammar is even
c) No string produced by this grammar has four consecutive b's
d) The length of substring produced by B is always odd

2) Following CFG
$S \rightarrow AB \mid AS$
$A \rightarrow a \mid aA$
$B \rightarrow b$
generates the language _____
a) aa^*b b) $a(ab)^*b$
c) aa^*b+ d) $(ab)^*$

3) Which type of symbol contains in the stack of PDA?
a) Variables b) Terminals
c) Both a and b d) None of the mentioned

4) While applying Pumping lemma for CFL, we consider a string w that belong to L and fragment it into _____ parts.
a) 2 b) 5
c) 3 d) 6

5) According to Chomsky hierarchy, which of the following is recognized by Recursively Enumerable language?

a) Type 3 b) Type 2
c) Type 1 d) Type 0

6) A Turing machine that is able to simulate other Turing machines _____

a) Nested Turing machines b) Multi tap Turing machine
c) Universal Turing machines d) None of these

7) Halting state of Turing Machine are _____.

a) Start and Stop b) Accept and Reject
c) Start and Reject d) Reject and allow

8) Which of the following statement is/are false _____.

a) The regular expression $00(1+10)^*$ denotes all strings of 0's and 1's with at least two consecutive 0's
b) The regular expression $(0+\wedge)(1+10)^*$ denotes all strings of 0's and 1's that do not have two consecutive 0's
c) The regular expression $(0+1)^*011$ denotes all strings of 0's and 1's ending with 011
d) The regular expression $(1+10)^*$ denotes all strings of 0's and 1's beginning with '1' and not having two consecutives 0's

9) The length of the shortest string NOT in the language (over $\sum = \{a, b\}$) of the following regular expression is _____.
$a^*b^*(ba)^*a^*$ Select one:

a) 5 b) 2
c) 3 d) 4

10) Given the language $\mathrm{P} = \{\mathrm{ab}, \mathrm{aa}, \mathrm{baa}\}$, which of the following strings are in P^*?

a) abaabaaabaa b) aaaabaaaa
c) baaaaabaa d) All of these

11) Describe in simple English, the language defined by $\mathrm{RE} = (01^*0)^*1$.

a) The strings starting with 1
b) The strings ending with 1 and containing even no. of 0's
c) The strings ending with 1
d) The strings starting with 1 and containing odd no. of 0's

12) The R.E. in which any number of $0's$ followed by any number of $1's$ followed by any num-ber of 2 is _____.

a) $0^*1^*2^*$ b) $(0+1)^*2^*$
c) 0^*+1+2 d) $(0+1+2)^*$

a) Type 3 b) Type 2
c) Type 1 d) Type 0

3) A Turing machine that is able to simulate other Turing machines _____
a) Nested Turing machines b) Multi tap Turing machine
c) Universal Turing machines d) None of these

4) Halting state of Turing Machine are _____.
a) Start and Stop b) Accept and Reject
c) Start and Reject d) Reject and allow

5) Which of the following statement is/are false _____.
a) The regular expression $00(1+10)^*$ denotes all strings of 0's and 1's with at least two consecutive 0's
b) The regular expression $(0+\wedge)(1+10)^*$ denotes all strings of 0's and 1's that do not have two consecutive 0's
c) The regular expression $(0+1)^*011$ denotes all strings of 0's and 1's ending with 011
d) The regular expression $(1+10)^*$ denotes all strings of 0's and 1's beginning with '1' and not having two consecutives 0's

6) The length of the shortest string NOT in the language (over $\sum = \{a, b\}$) of the following regular expression is _____.
$a^*b^*(ba)^*a^*$ Select one:

a) 5 b) 2
c) 3 d) 4

7) Given the language $\mathrm{P} = \{\mathrm{ab}, \mathrm{aa}, \mathrm{baa}\}$, which of the following strings are in P^*?

a) abaabaaabaa b) aaaabaaaa
c) baaaaabaa d) All of these

8) Describe in simple English, the language defined by $\mathrm{RE} = (01^*0)^*1$.

a) The strings starting with 1
b) The strings ending with 1 and containing even no. of 0's
c) The strings ending with 1
d) The strings starting with 1 and containing odd no. of 0's

9) The R.E. in which any number of $0's$ followed by any number of $1's$ followed by any num-ber of 2 is _____.

a) $0^*1^*2^*$ b) $(0+1)^*2^*$
c) $0^* + 1 + 2$ d) $(0+1+2)^*$

10) Which of the following statement is true?

a) Converting from Mealy into Moore machine and vice versa is possible
b) Mealy machine has no terminating state
c) A Moore machine has no terminating state
d) All of these

11) The given CFG indicates the strings _____.
$\mathrm{S} \rightarrow \mathrm{aS} \mid \mathrm{bX} \mid \mathrm{a} \mid \mathrm{b}$
$\mathrm{X} \rightarrow \mathrm{aSa} \mid \mathrm{a}$

a) with aa or bb but not both
b) that do not contain aaa
c) do not contain bbb
d) That has no consecutive b's but a's

12) Consider the following grammar.
$\mathrm{S} \rightarrow \mathrm{AB}$
$\mathrm{A} \rightarrow \mathrm{a}$
$\mathrm{A} \rightarrow \mathrm{BaB}$
$\mathrm{B} \rightarrow \mathrm{bbA}$
Which of the following statement is FALSE?

a) No string produced by this grammar has three consecutive a's
b) The length of every string produced by this grammar is even
c) No string produced by this grammar has four consecutive b's
d) The length of substring produced by B is always odd

13) Following CFG

$S \rightarrow AB \mid AS$

$A \rightarrow a \mid aA$

$B \rightarrow b$

generates the language _____

a) aa^*b b) $a(ab)^*b$

c) $aa^*b +$ d) $(ab)^*$

14) Which type of symbol contains in the stack of PDA?

a) Variables b) Terminals

c) Both a and b d) None of the mentioned

Set R

S. Y. (B.Tech.) (Sem - II) (New) (CBCS) Examination: March/April-2025
COMPUTER SCIENCE & ENGINEERING
Theory of Computation (CSEPCC-05)

Day & Date: Wednesday 28-05-2025 Max. Marks: 56
Time: 10:00 AM To 01:00 PM

Instructions: 1) All questions are Compulsory.
2) Figures to the right indicate full marks.

SECTION – I

Q.2 Answer any four of the following. **16**

a) Give the regular expression for following regular language over $\sum = \{0,1\}$
i) The language of all strings of 0's and 1's that have odd length
ii) The set of all strings of 0's and 1's whose second symbol from right is 0.

b) Design the DFA for following regular expression
i) $(11 + 110)^*0$
ii) $(0 + 1)^*1000$

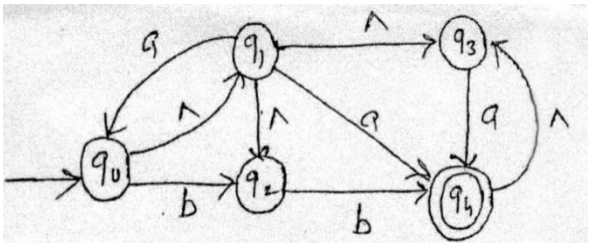
c) Differentiate between Moore machine and Mealy Machine.

d) Give recursive definition of regular language and corresponding regular expression. List and explain at least two applications of regular expression.

e) Define the CFG and give the CFG for the following CFL
$L = \{a^i b^j c^k | i = j \text{ or } j = k\}$

Q.3 Answer any two of the following. **12**

a) Convert following NFA-∧ into NFA and DFA.



b) With the help of union, concatenation and Kleene closure property design the NFA-∧ for following regular expression.
i) $(0 + 1)(01)^*(011)^*$
ii) $(0 + 1)^*(011 + 01010)$

c) Convert following CFG to CNF Notation
$S \rightarrow ASB$
$A \rightarrow aAS \mid a \mid \wedge$
$B \rightarrow SbS \mid A \mid bb$

SECTION – II

Q.4 Answer any four of the following. **16**

a) Prove that following language is not CFL
$L = \{a^i b^j c^k | i, j, k \geq 0\}$

b) State and explain pumping lemma for regular language.

c) Define the PDA and demonstrate the working of it.

d) Design the PDA for following language.
$L = \{a^n b^m c^{n+m} | i, j, k \geq 1\}$

e) Design the TM for $f(n, m) = n - m$, assume $n > m$.

Q.5 Answer any two of the following. **12**

a) Design the Turing Machine for Language of Palindrome over $\sum = \{a, b\}$ and demonstrate the working of string "$abba$"

b) Define the PDA acceptance by Final State and Empty Stack. Design the PDA for $L = \{a^n b^{n+m} c^m | i, j, k \geq 1\}$

c) Explain the following Turing Machines

i) Multitape Turing Machine
ii) Linear Bounded Automata
iii) Off-line Turing Machine

Day & Date: Wednesday 28-05-2025 Max. Marks: 70
Time: 10:00 AM To 01:00 PM

Instructions: 1) Q. No. 1 is compulsory. It should be solved in the first 30 minutes in Answer Book Page no 03 (Starting page of the Answer Book). Each question carries one mark.
2) Don't forget to Mention question paper set (P/Q/R/S) on top of page.
3) Figures to the right indicates full marks.

MCQ/Objective Type Questions

Duration: 30 Minutes Marks: 14

Q.1 Choose the correct Answer. 14

1) Which of the following statement is true?
a) Converting from Mealy into Moore machine and vice versa is possible
b) Mealy machine has no terminating state
c) A Moore machine has no terminating state
d) All of these

2) The given CFG indicates the strings _____.
$S \rightarrow aS \mid bX \mid a \mid b$
$X \rightarrow aSa \mid a$
a) with aa or bb but not both
b) that do not contain aaa
c) do not contain bbb
d) That has no consecutive b's but a's

3) Consider the following grammar.
$S \rightarrow AB$
$A \rightarrow a$
$A \rightarrow BaB$
$B \rightarrow bbA$
Which of the following statement is FALSE?
a) No string produced by this grammar has three consecutive a's
b) The length of every string produced by this grammar is even
c) No string produced by this grammar has four consecutive b's
d) The length of substring produced by B is always odd

4) Following CFG
$S \rightarrow AB \mid AS$
$A \rightarrow a \mid aA$
$B \rightarrow b$
generates the language _____
a) aa^*b b) $a(ab)^*b$
c) aa^*b+ d) $(ab)^*$

5) Which type of symbol contains in the stack of PDA?
a) Variables b) Terminals
c) Both a and b d) None of the mentioned

6) While applying Pumping lemma for CFL, we consider a string w that belong to L and fragment it into _____ parts.
a) 2 b) 5
c) 3 d) 6

7) According to Chomsky hierarchy, which of the following is recognized by Recursively Enumerable language?
a) Type 3 b) Type 2
c) Type 1 d) Type 0

8) A Turing machine that is able to simulate other Turing machines _____
a) Nested Turing machines b) Multi tap Turing machine
c) Universal Turing machines d) None of these

9) Halting state of Turing Machine are _____.
a) Start and Stop b) Accept and Reject
c) Start and Reject d) Reject and allow

10) Which of the following statement is/are false _____.
a) The regular expression $00(1+10)^*$ denotes all strings of 0's and 1's with at least two consecutive 0's
b) The regular expression $(0+\wedge)(1+10)^*$ denotes all strings of 0's and 1's that do not have two consecutive 0's
c) The regular expression $(0+1)^*011$ denotes all strings of 0's and 1's ending with 011
d) The regular expression $(1+10)^*$ denotes all strings of 0's and 1's beginning with '1' and not having two consecutives 0's

11) The length of the shortest string NOT in the language (over $\sum = \{a, b\}$) of the following regular expression is _____.
$a^*b^*(ba)^*a^*$ Select one:
a) 5 b) 2
c) 3 d) 4

12) Given the language $P = \{ab, aa, baa\}$, which of the following strings are in P^*?

a) abaabaaabaa
b) aaaabaaaa
c) baaaaabaa
d) All of these

13) Describe in simple English, the language defined by $RE = (01^*0)^*1$.

a) The strings starting with 1
b) The strings ending with 1 and containing even no. of 0's
c) The strings ending with 1
d) The strings starting with 1 and containing odd no. of 0's

14) The R.E. in which any number of $0's$ followed by any number of $1's$ followed by any num-ber of 2 is _____.

a) $0^*1^*2^*$
b) $(0+1)^*2^*$

MCQ/Objective Type Questions

Duration: 30 Minutes Marks:14

Q.1 Choose the correct Answer. **14**

1) UDP and TCP are both _____ layer protocols.
a) data link b) network
c) transport d) none of the above

2) _____ is a dynamic mapping protocol in which a physical address is found for a given logical address.
a) ARP b) RARP
c) both a and b d) none of the above

3) Identify the class of the following IPv4 address: 193.168.1.2
a) A b) B
c) C d) D

4) The combination of an IP address and a port number is called a _____.
a) transport address b) network address
c) socket address d) none of the above

5) There is no need for a header length field in SCTP because _____.
a) there are no options in the general header
b) the size of the header is fixed
c) both a and b
d) none of the above

6) _____ server can process multiple requests at a time.
a) An iterative b) A concurrent
c) A concurrent or an iterative d) None of the choices

7) A full domain name is a sequence of labels separated by _____.
a) semicolons b) dots
c) colons d) none of the above

8) DNS can use the services of _____ using the well-known port 53.
a) UDP b) TCP
c) either (a) or (b) d) none of the above

9) When the secondary downloads information from the primary, it is called _____ transfer.
a) domain b) zone
c) label d) none of the above

10) When the sender is connected to the mail server via a LAN or a WAN, we need _____.
a) two MTA
b) two UAs and two pairs of MTAs
c) two UAs and a pair of MTAs
d) none of the above

11) NVT uses two sets of characters, one for _____ and one for _____.
a) sending; receiving b) request; reply
c) data; control d) none of the above

12) In the _____ mode, each character typed is sent by the client to the server.
a) default b) character
c) line d) none of the above

13) TELNET uses only one TCP connection. The server uses _____ port and the client uses _____ port.
a) a well-known; another well-known
b) an ephemeral; another ephemeral
c) a well-known; an ephemeral
d) none of the above

14) _____ is more powerful and complex than _____.
a) POP3; IMAP4 b) IMAP4; POP3
c) SMTP; POP3 d) none of the above

Section – I

Q.2 Attempt any four: **16**

a) Compare OSI and TCP/IP Model. Write its advantages & disadvantages.
b) Suppose a computer send a packet at network Layer to the another computer in the internet the logical destinations address in the packet is corrupted, what happens to the packet? how can the sender computer informed about the situation?
c) Explain three-way handshaking in TCP.
d) Explain UDP Header format.
e) Shortly describe with diagram the concept of multihoming service offered by SCTP.

Q.3 Attempt any One. **06**

a) Explain the following system calls with their syntax:
1) socket ( )
2) bind ( )
3) connect ( )
b) Explain the steps to implement connection-oriented concurrent client-server.

Q.4 Attempt the following. **06**

An organization is granted the subnet mask 255.255.255.128(/25) Assume that the network IP Address is **192.168.1.0/25** the administrator want to find.
a) network address
b) number of hosts per subnet
c) First valid IP and Last valid IP of subnet 1
d) Broadcast address of subnet

Section – II

Q.5 Attempt any four: **16**

a) Explain DNS Message format.

b) What is DHCP? Describe the DHCP operation when client and server are on the same network.

c) Write a short note on FTP.

d) Explain the concept of NVT. Also explain NVT Character set.

e) Explain DHCP packet format.

Q.6 Attempt any one. **06**

a) Explain the terms used in DNS: Flat Name Space, Hierarchical Name Space, Zone, FQDN and PQDN

b) Draw the diagram of SSH packet format and briefly describe it's fields.

Q.7 Explain the different scenario of SMTP. **06**

b) Explain the steps to implement connection-oriented concurrent client-server.

Q.4 Attempt the following. **06**

An organization is granted the subnet mask 255.255.255.128(/25) Assume that the network IP Address is **192.168.1.0/25** the administrator want to find.
a) network address
b) number of hosts per subnet
c) First valid IP and Last valid IP of subnet 1
d) Broadcast address of subnet

Section – II

Q.5 Attempt any four: **16**

a) Explain DNS Message format.

b) What is DHCP? Describe the DHCP operation when client and server are on the same network.

c) Write a short note on FTP.

d) Explain the concept of NVT. Also explain NVT Character set.

e) Explain DHCP packet format.

Q.6 Attempt any one. **06**

a) Explain the terms used in DNS: Flat Name Space, Hierarchical Name Space, Zone, FQDN and PQDN

b) Draw the diagram of SSH packet format and briefly describe it's fields.

Q.7 Explain the different scenario of SMTP. **06**

S. Y. (B. Tech.) (Sem-II) (New) (CBCS) Examination: March/April-2025
COMPUTER SCIENCE & ENGINEERING
Computer Networks (CSEPCC-06)

Day & Date: Friday 30-05-2025 Max. Marks: 70
Time: 10:00 AM To 01:00 PM

Instructions: 1) Q. No. 1 is compulsory. It should be solved in the first 30 minutes in Answer Book Page no 03 (Starting page of the Answer Book). Each question carries one mark.
2) Don't forget to Mention question paper set (P/Q/R/S) on top of page.
3) Figures to the right indicates full marks.
4) Make suitable assumptions if necessary and state them clearly.

MCQ/Objective Type Questions

Duration: 30 Minutes Marks:14

Q.1 Choose the correct Answer. **14**

1) _____ server can process multiple requests at a time.
a) An iterative b) A concurrent
c) A concurrent or an iterative d) None of the choices

2) A full domain name is a sequence of labels separated by _____.
a) semicolons b) dots
c) colons d) none of the above

3) DNS can use the services of _____ using the well-known port 53.
a) UDP b) TCP
c) either (a) or (b) d) none of the above

4) When the secondary downloads information from the primary, it is called _____ transfer.
a) domain b) zone
c) label d) none of the above

5) When the sender is connected to the mail server via a LAN or a WAN, we need _____.
a) two MTA
b) two UAs and two pairs of MTAs
c) two UAs and a pair of MTAs
d) none of the above

6) NVT uses two sets of characters, one for _____ and one for _____.
a) sending; receiving b) request; reply
c) data; control d) none of the above

7) In the _____ mode, each character typed is sent by the client to the server.
a) default b) character
c) line d) none of the above

8) TELNET uses only one TCP connection. The server uses _____ port and the client uses _____ port.
a) a well-known; another well-known
b) an ephemeral; another ephemeral
c) a well-known; an ephemeral
d) none of the above

9) _____ is more powerful and complex than _____.
a) POP3; IMAP4 b) IMAP4; POP3
c) SMTP; POP3 d) none of the above

10) UDP and TCP are both _____ layer protocols.
a) data link b) network
c) transport d) none of the above

11) _____ is a dynamic mapping protocol in which a physical address is found for a given logical address.
a) ARP b) RARP
c) both a and b d) none of the above

12) Identify the class of the following IPv4 address: 193.168.1.2
a) A b) B
c) C d) D

13) The combination of an IP address and a port number is called a _____.
a) transport address b) network address
c) socket address d) none of the above

14) There is no need for a header length field in SCTP because _____.
a) there are no options in the general header
b) the size of the header is fixed
c) both a and b
d) none of the above

Day & Date: Friday 30-05-2025 Max. Marks: 56
Time: 10:00 AM To 01:00 PM

Instructions: 1) All questions are compulsory.
2) Figures to the right indicate full marks.
3) Make suitable assumptions if necessary and state them clearly.

Section – I

Q.2 Attempt any four: **16**

a) Compare OSI and TCP/IP Model. Write its advantages & disadvantages.
b) Suppose a computer send a packet at network Layer to the another computer in the internet the logical destinations address in the packet is corrupted, what happens to the packet? how can the sender computer informed about the situation?
c) Explain three-way handshaking in TCP.
d) Explain UDP Header format.
e) Shortly describe with diagram the concept of multihoming service offered by SCTP.

Q.3 Attempt any One. **06**

a) Explain the following system calls with their syntax:
1) socket ( )
2) bind ( )
3) connect ( )
b) Explain the steps to implement connection-oriented concurrent client-server.

Q.4 Attempt the following. **06**

An organization is granted the subnet mask 255.255.255.128(/25) Assume that the network IP Address is **192.168.1.0/25** the administrator want to find.
a) network address
b) number of hosts per subnet
c) First valid IP and Last valid IP of subnet 1
d) Broadcast address of subnet

MCQ/Objective Type Questions

Duration: 30 Minutes Marks:14

Q.1 Choose the correct Answer. **14**

1) Innovation can be best described as: _____
a) A new idea only
b) The process of creating value through ideas
c) Invention
d) None of the above

2) Entrepreneurship is primarily related to: _____
a) Administration b) Risk-taking
c) Planning d) None of these

3) Which of the following is not an entrepreneurial competency?
a) Innovation b) Leadership
c) Laziness d) Decision making

4) An entrepreneur operates: _____
a) Outside the organization b) Within an existing company
c) As a freelancer d) None

5) "Push" type innovation comes from: _____
a) Market needs b) Customer demands
c) Internal ideas d) Suppliers

6) Agile management promotes: _____
a) Linear process b) Flexibility and iteration
c) Bureaucracy d) None

7) Blue Ocean strategy refers to: _____
a) Competing in existing markets
b) Creating new market space
c) Losing market share
d) None

8) Which of these is not a barrier to innovation?
a) Risk-taking culture b) Resistance to change
c) Lack of resources d) Poor leadership

9) The shifting composition of the economy refers to: _____
a) Stable industries b) Changing business models
c) Static job roles d) None

10) Lean start-up encourages: _____
a) High upfront investment b) Rapid prototyping
c) Formal structure d) None

11) Legal considerations for entrepreneurs include: _____
a) Taxation b) IP protection
c) Contracts d) All of these

12) One of the seven sources of innovation is: _____
a) Competitor's failure b) Demographics
c) Inflation d) GDP

13) Entrepreneurial opportunity recognition is: _____
a) Unimportant b) Intuition-based only
c) Structured process d) Not taught

14) Six Thinking Hats is a method for: _____
a) Innovation testing b) Decision-making
c) Funding d) Legal advice

MCQ/Objective Type Questions

Duration: 30 Minutes Marks:14

Q.1 Choose the correct alternatives from the options. **14**

1) The Occupational Health and Safety Management System (OHSMS) primarily aims to: _____
a) Increase industrial profits
b) Reduce energy consumption
c) Ensure worker safety and reduce health risks in workplaces
d) Promote environmental tourism

2) In-situ conservation refers to: _____
a) Conservation of species in zoos
b) Conservation using biotechnology
c) Conservation in gene banks
d) Conservation of species in their natural habitats

3) Carbon footprint is a measure of: _____
a) Land occupied by forests
b) Energy consumption in a home
c) Greenhouse gas emissions by an activity or person
d) Amount of carbon in plants

4) The main goal of sustainability is to: _____
a) Meet present needs without compromising future needs
b) Increase profit only
c) Eliminate economic development
d) Promote urbanization

5) Which of the following is an example of hazardous waste?
a) Expired medicines b) Plastic bottles
c) Food scraps d) Paper waste

6) Biodiversity hotspots in India include: _____
a) Eastern Ghats and Indo-Gangetic Plain
b) Western Ghats and the Himalayas
c) Thar Desert and Sundarbans only
d) Deccan Plateau and Indo-Gangetic Basin

7) The 3R concept stands for: _____
a) Reuse, Reduce, Rebuild
b) Reduce, Reuse, Recycle
c) Replace, Reuse, Restore
d) Recycle, Recover, Rebuild

8) The ISO 14000 Series deals with: _____
a) Energy-efficient building design
b) Environmental Management Systems
c) Industrial Safety Standards
d) Economic Performance Indicators

9) Which of the following is a non-conventional source of energy?
a) Coal
b) Natural Gas
c) Wind
d) Diesel

10) The main goal of a circular economy is to: _____
a) Increase fossil fuel usage
b) Promote single-use products
c) Minimize waste and resource use
d) Maximize profit only

11) The first step in preparing an Environmental Impact Assessment (EIA) report is: _____
a) Cost-benefit analysis
b) Monitoring
c) Screening
d) Public hearing

12) Which of the following is not a principle of Environmental Management?
a) Polluter pays
b) Sustainability
c) Preventive action
d) Maximum profit generation

13) Cost-Benefit Analysis (CBA) in environmental policies is used to: _____
a) Maximize pollution
b) Evaluate environmental legislation
c) Compare environmental costs with economic benefits
d) Promote industrialization

14) An ecosystem consists of: _____
a) Living organisms only
b) Non-living components only
c) Living organisms and their physical environment
d) Plants and animals only

Duration: 30 Minutes Marks:14

Q.1 Choose the correct alternatives from the options. **14**

1) The ISO 14000 Series deals with: _____
a) Energy-efficient building design
b) Environmental Management Systems
c) Industrial Safety Standards
d) Economic Performance Indicators

2) Which of the following is a non-conventional source of energy?
a) Coal b) Natural Gas
c) Wind d) Diesel

3) The main goal of a circular economy is to: _____
a) Increase fossil fuel usage
b) Promote single-use products
c) Minimize waste and resource use
d) Maximize profit only

4) The first step in preparing an Environmental Impact Assessment (EIA) report is: _____
a) Cost-benefit analysis b) Monitoring
c) Screening d) Public hearing

5) Which of the following is not a principle of Environmental Management?
a) Polluter pays b) Sustainability
c) Preventive action d) Maximum profit generation

6) Cost-Benefit Analysis (CBA) in environmental policies is used to: _____
a) Maximize pollution
b) Evaluate environmental legislation
c) Compare environmental costs with economic benefits
d) Promote industrialization

7) An ecosystem consists of: _____
   a) Living organisms only
   b) Non-living components only
   c) Living organisms and their physical environment
   d) Plants and animals only

8) The Occupational Health and Safety Management System (OHSMS) primarily aims to: _____
   a) Increase industrial profits
   b) Reduce energy consumption
   c) Ensure worker safety and reduce health risks in workplaces
   d) Promote environmental tourism

9) In-situ conservation refers to: _____
   a) Conservation of species in zoos
   b) Conservation using biotechnology
   c) Conservation in gene banks
   d) Conservation of species in their natural habitats

10) Carbon footprint is a measure of: _____
   a) Land occupied by forests
   b) Energy consumption in a home
   c) Greenhouse gas emissions by an activity or person
   d) Amount of carbon in plants

11) The main goal of sustainability is to: _____
   a) Meet present needs without compromising future needs
   b) Increase profit only
   c) Eliminate economic development
   d) Promote urbanization

12) Which of the following is an example of hazardous waste?
   a) Expired medicines b) Plastic bottles
   c) Food scraps d) Paper waste

13) Biodiversity hotspots in India include: _____
   a) Eastern Ghats and Indo-Gangetic Plain
   b) Western Ghats and the Himalayas
   c) Thar Desert and Sundarbans only
   d) Deccan Plateau and Indo-Gangetic Basin

14) The 3R concept stands for: _____
   a) Reuse, Reduce, Rebuild b) Reduce, Reuse, Recycle
   c) Replace, Reuse, Restore d) Recycle, Recover, Rebuild

Seat No.		Set	Q

S.Y. (B.Tech.) (Sem - II) (New) (CBCS) Examination: March/April-2025
COMPUTER SCIENCE AND ENGINEERING
Environmental Sustainability (OE-02B)

Day & Date: Tuesday 03-06-2025 Max. Marks: 56
Time: 10:00 AM To 01:00 PM

Instructions: 1) All questions are compulsory.
2) Figures to the right indicate full marks.

Section – I

Q.2 Attempt the following **12**

a) Define the term "environment". Discuss the scope and importance of environmental studies. Why is there a need for public awareness?
b) Describe the causes and effects of air and water pollution. Suggest two preventive measures for each.
c) Define sustainability. Discuss any two major challenges in achieving sustainable development.

Q.3 Attempt Any Two **10**

a) What are hazardous wastes and e-wastes? How should they be managed?
b) What are carbon credits and carbon footprints? Explain with examples.
c) List any two Millennium Development Goals (MDGs). Mention one environmental protocol.

Q.4 Write short notes on any two of the following: **06**

a) Genetic diversity
b) India as a mega-diversity nation
c) In-situ and Ex-situ conservation

Section – II

Q.5 Write short notes on any two of the following: **10**

a) ISO 14000 Series
b) Sustainable Habitat - Green Buildings
c) Non-conventional energy sources

Q.6 Attempt the following **10**

a) Define Environmental Management. Discuss its nature, scope, and components.
b) Define the 3R concept and explain how it supports the zero waste approach.

Q.7 Attempt any two **08**

a) Define Environmental Management. Discuss its nature, scope, and components.

b) What is Environmental Policy Analysis? Distinguish between macro-level and micro-level analysis.

c) Outline the steps involved in the Environmental Impact Assessment (EIA) process.

MCQ/Objective Type Questions

Duration: 30 Minutes Marks:14

Q.1 Choose the correct Answer. **14**

1) Which is the primary advantage of using solar energy power generation?
a) Low initial coast
b) Reduce environmental impact
c) Do not require large area
d) Simple storage method

2) OTEC stands for _____.
a) Ocean thermal energy conversion
b) Ocean thermal energy Component
c) Ocean thermal energy contact
d) Ocean thermodynamic energy conversion

3) Which of the following common application of solar energy?
a) Generating electricity
b) Heating water
c) Providing power for electronic device
d) All of the above

4) Passive solar energy refers to trapping the Suns energy _____.
a) Using mechanical devices
b) without using mechanical devices
c) Using chemical
d) Incineration

5) The process or digestion taking place in the presence of air is called as _____.
a) Aerobic digestion b) Anaerobic digestion
c) Hydrolysis d) None of these

6) Which type of renewable energy resources generate low power energy?

a) Biomass b) Solar
c) Wind d) All of the above

7) In wind turbine gear box is used to _____.

a) Step up the speed b) Reduce the speed
c) shut down d) None of these

8) Geothermal energy present _____ of the earth.

a) Rotation b) Exterior
c) North side d) Interior

9) Biogas is the gaseous fuel which is obtained from biomass by means of _____ fermentation.

a) Aerobic b) Anaerobic
c) Constant d) None of the above

10) _____ is produced by blending of vegetable oil.

a) CNG b) Methane gas
c) Biofuel d) Biodisel

11) Availability of Solar energy on the earth surface is _____MW.

a) 190 billion b) 178 billion
c) 150 billion d) 250 billion

12) Energy is _____ of substance or a body to do work.

a) Obesity b) Power
c) Capacity d) None of the above

13) Wind energy used from _____ years ago.

a) 3000 b) 2000
c) 6000 d) 5000

14) The major source of the Geothermal energy is _____.

a) Water b) Hot water reservoir
c) Oil d) Gas

Section – I

Q.2 Attempt any Four **16**

a) Explain advantages of biomass energy.
b) Explain in detail scope of renewable energy.
c) What is biomass energy and explain resources of biomass energy.
d) Write a note on applications of solar energy.
e) Explain function of biogas digester.
f) Write a note on aerobic and anaerobic digestion.

Q.3 Attempt any two. **12**

a) Explain Solar photovoltaic technology.
b) Explain Basic components of wind energy conversion system.
c) Explain in detail advantages and disadvantages of renewable energy.
d) Explain in detail advantage and disadvantage of Solar energy.

Section – II

Q.4 Attempt any Four. **16**

a) Write a note on wave energy.
b) Merits and demerits of hydropower energy.
c) Explain specifications of energy storage devices.
d) Main parts of hydropower station.
e) Importance of tidal energy.
f) Importance of energy storage devices

Q.5 Attempt any two. **12**

a) Write a note on potential of wave energy in India.
b) Explain different methods of energy storage.
c) Explain with neat diagram hydropower plant.
d) Explain in detail ocean thermal energy conversion (OTEC) .

3) Geothermal energy present _____ of the earth.
a) Rotation b) Exterior
c) North side d) Interior

4) Biogas is the gaseous fuel which is obtained from biomass by means of _____ fermentation.
a) Aerobic b) Anaerobic
c) Constant d) None of the above

5) _____ is produced by blending of vegetable oil.
a) CNG b) Methane gas
c) Biofuel d) Biodisel

6) Availability of Solar energy on the earth surface is _____MW.
a) 190 billion b) 178 billion
c) 150 billion d) 250 billion

7) Energy is _____ of substance or a body to do work.
a) Obesity b) Power
c) Capacity d) None of the above

8) Wind energy used from _____ years ago.
a) 3000 b) 2000
c) 6000 d) 5000

9) The major source of the Geothermal energy is _____.
a) Water b) Hot water reservoir
c) Oil d) Gas

10) Which is the primary advantage of using solar energy power generation?
a) Low initial coast
b) Reduce environmental impact
c) Do not require large area
d) Simple storage method

11) OTEC stands for _____.
a) Ocean thermal energy conversion
b) Ocean thermal energy Component
c) Ocean thermal energy contact
d) Ocean thermodynamic energy conversion

12) Which of the following common application of solar energy?
a) Generating electricity
b) Heating water
c) Providing power for electronic device
d) All of the above

13) Passive solar energy refers to trapping the Suns energy _____.
a) Using mechanical devices
b) without using mechanical devices
c) Using chemical
d) Incineration

14) The process or digestion taking place in the presence of air is called as _____.
a) Aerobic digestion b) Anaerobic digestion
c) Hydrolysis d) None of these

S. Y. (B. Tech.) (Sem-II) (New) (CBCS) Examination: March/April-2025
COMPUTER SCIENCE AND ENGINEERING
Renewable Energy (OE-02C)

Day & Date: Tuesday, 03-June-2025 Max. Marks: 56
Time: 10:00 AM To 01:00 PM

Instructions: 1) All questions are compulsory.
2) Figures to the right indicate full marks.
3) Assume suitable data if necessary.

Section – I

Q.2 Attempt any Four **16**

a) Explain advantages of biomass energy.
b) Explain in detail scope of renewable energy.
c) What is biomass energy and explain resources of biomass energy.
d) Write a note on applications of solar energy.
e) Explain function of biogas digester.
f) Write a note on aerobic and anaerobic digestion.

Q.3 Attempt any two. **12**

a) Explain Solar photovoltaic technology.
b) Explain Basic components of wind energy conversion system.
c) Explain in detail advantages and disadvantages of renewable energy.
d) Explain in detail advantage and disadvantage of Solar energy.

Section – II

Q.4 Attempt any Four. **16**

a) Write a note on wave energy.
b) Merits and demerits of hydropower energy.
c) Explain specifications of energy storage devices.
d) Main parts of hydropower station.
e) Importance of tidal energy.
f) Importance of energy storage devices

Q.5 Attempt any two. **12**

a) Write a note on potential of wave energy in India.
b) Explain different methods of energy storage.
c) Explain with neat diagram hydropower plant.
d) Explain in detail ocean thermal energy conversion (OTEC).

Measurement, Instrumentation and Sensors (OE-02D)

Day & Date: Tuesday, 03-June-2025 Max. Marks: 70
Time: 10:00 AM To 01:00 PM

Instructions: 1) Q. No. 1 is compulsory. It should be solved in the first 30 minutes in Answer Book Page no 03 (Starting page of the Answer Book). Each question carries one mark.
2) Don't forget to Mention question paper set (P/Q/R/S) on top of page
3) Figures to the right indicates full marks.
4) Assume suitable data if necessary.
5) Draw neat diagrams whenever necessary.

MCQ/Objective Type Questions

Duration: 30 Minutes Marks:14

Q.1 Choose the correct answer. **14**

1) An instrument transformer is used to extend the range of _____.
a) induction instrument b) electrostatic instrument
c) moving coil instrument d) any of the above

2) The internal resistance of an ammeter should be _____.
a) Very small b) Medium
c) High d) Infinity

3) The smallest change which a sensor can detect is termed: _____
a) Accuracy b) Precision
c) Resolution d) Scale

4) Sensor effectiveness depends on _____ parameter.
a) Sensitivity b) Radiation
c) Restively d) All the above

5) The desirable static characteristics of a measuring system are _____
a) accuracy and drift
b) accuracy, sensitivity and reproducibility
c) drift and dead zone
d) static error

6) A _____ device prevents the oscillation of the moving system and enables the latter to reach its final position quickly.
a) Deflecting b) Controlling
c) Damping d) any of the above

7) _____ is an instrument which measures the insulation resistance of an electric circuit relative to earth and one another.
a) Tangent galvanometer
b) Megger
c) Current transformer
d) None of the above

8) Which of the following is a key characteristic of a sensor?
a) It can only measure temperature
b) It is an active component
c) It converts physical parameters into an electrical signal
d) Il requires no external power

9) Which of the following is a type of magnetic sensor?
a) Thermistor
b) Strain gauge
c) Hall effect sensor
d) LVDT

10) Typical conversion speed of ADC is _____
a) Less than 1 μs
b) Less than 100 μs
c) Less than 500 μs
d) Greater than 1000 μs

11) What is signal conditioning?
a) To analyze any signal
b) Conversion or modification is referred to as conditioning
c) Conversion from analog to digital is signal conditioning
d) Conversion from digital to analog is signal conditioning

12) Touch screen devices use which sensor?
a) Touch sensor
b) Temperature sensor
c) Humidity sensor
d) Pressure sensor

13) ENOB in ADC stand for _____
a) Effective number of bytes
b) Effective number of bits
c) Effective nibble baud
d) None of the mentioned

14) A simple bridge circuit consists of a network of _____
a) 3 resistance arms
b) 2 resistance arms
c) 4 resistance arms
d) 6 resistance arms

3) Assume suitable data if necessary.
4) Draw neat diagrams whenever necessary.

Section – I

Q.2 Attempt any four of the following: 16

a) Define standard & explain types of standards.
b) Define the following characteristics
1) Linearity 2) Accuracy 3) Repeatability 4) Sensitivity
c) Derive the expression for unknown capacitance with phasor diagram by using Schering Bridge.
d) Write difference between Current Transformer and Potential Transformer.
e) Explain working of digital storage oscilloscope with suitable block diagram.

Q.3 Attempt any two of the following: 12

a) Illustrate and derive the torque equation for a Moving iron instrument with neat diagram.
b) Draw the equivalent circuit and phasor diagram of a CT. Derive the expressions for ratio and phase angle errors.
c) Explain digital ramp type and dual slope integrating type digital voltmeter.

Section – II

Q.4 Attempt any four of the following: 16

a) Explain the principle of working of Hall effect sensor.
b) Explain different types of temperature sensor with details.
c) Discuss Classification of sensor and explain active and passive sensor.
d) State and explain the methods of data transmission.
e) State and Explain the Modes of Heat transfer.

Q.5 Attempt any two of the following: 12

a) Stale the sensors used for Velocity and Acceleration application and explain any one of them.
b) Slate and explain the sensors used for occupancy and motion detector application.
c) Define the temperature and explain the thermal properties of material.

MCQ/Objective Type Questions

Duration: 30 Minutes Marks:14

Q.1 Choose the correct alternatives from the options. 14

1) Linear programming deals with the optimization of a function of variables is, known as _____
a) Subjective function b) Objective function
c) Combined Equation d) None of these

2) What is the condition of Balance Assignment Problem?
a) Σ Demand$=\Sigma$ Supply
b) No. of rows $>$ No. of column
c) No. of rows $<$ No. of column
d) No. of rows $=$ No. of columns

3) EOQ means: _____
a) Economic Offering Quantity b) Empty Order Quantity
c) Economic Order Quantity d) Economic Order Quality

4) In ABC analysis, high monitoring and control are required for: _____
a) A class items b) B class items
c) C class items d) All of these

5) Graphical method, simplex method, and transportation method are concerned with _____.
a) Break-even analysis b) Value analysis
c) Linear programming d) Queueing theory

6) The cost of keeping items in inventory is called _____
a) Set up cost b) Holding cost
c) Shortage cost d) None of these

7) Dual of the Dual is _____
a) Dual b) Primal
c) Zero d) Infinity

8) At the Break-Even Point _____
a) Profit > Loss
b) Profit < Loss
c) Profit = Loss
d) None of these

9) The PERT in project management means Program Evaluation and _____ Technique.
a) Resource
b) Reconciliation
c) Reconsideration
d) Review

10) _____ Stock is the lower limit of stock below which the stock should not be allowed to fall.
a) Maximum
b) Average
c) Safety
d) Standard

11) Optimization Means _____.
a) Maximization
b) Minimization
c) Minimization or Maximization
d) Mean of Minimization & Maximization

12) A feasible solution to LPP _____.
a) Must satisfy all the constraints simultaneously
b) Need not satisfy all the constraints
c) Must be a corner point of feasible region
d) Must optimize the objective function

13) In a project network, the critical path _____.
a) May be the shortest path
b) Is the longest path
c) May be the longest path
d) Is the shortest path

14) The inventory carrying costs are also called as _____.
a) Procurement costs
b) Set-up costs
c) Storage costs
d) None of the above

Time: 10:00 AM To 01:00 PM

Instructions: 1) All questions are compulsory.
2) Figures to the right indicate full marks.
3) Assume suitable data wherever necessary and mention it clearly.
4) Use of non-programmable calculator is allowed.

Section – I

Q.2 Attempt Any Three. **24**

a) Using Graphical method, Solve

Maximize $Z = 10X_1 + 8X_2$
Subject to, $2X_1 + X_2 \leq 40;$
$2X_1 + 3X_2 \leq 80;$
$0 \leq X_1; 0 \leq X_2$

b) Solve the following assignment model for minimum processing time.

		Machines			
		M1	M2	M3	M4
Jobs	J1	51	77	49	55
	J2	32	34	59	68
	J3	37	44	70	54
	J4	55	55	58	55

c) Find the initial basic feasible solution by Least Cost Method.

	W1	W2	W3	W4	Supply
F1	48	60	56	58	140
F2	45	55	53	60	260
F3	50	65	60	62	360
F4	52	64	55	61	220
Demand	200	320	250	210	

d) What are the different Limitations & Applications of 'Operation Research'?

e) How do you solve unbalanced transportation problem? What are different methods to solve Transportation Model? Explain in details.

Q.3 Answer any one. **04**

a) What is LPP? What are different components of LPP?

b) How assignment model is useful in practical life?

Section – II

Q.4 Attempt Any Three. **24**

a) A construction company consumes 4000 bags of cement per month. Price per bag of cement is Rs. 320/-. Inventory carrying cost per bag per year is Rs. 30/- and procurement cost per order is Rs. 500/- Find economic order quantity and number of orders to be placed per month?

b) Write a note various types inventory cost.

c) Draw network, find out CP & PD. Calculate All floats of each non-critical Activity.

Activity	A	B	C	D	E	F	G	H	I	J	K	L	M	N
Immediate Predecessor	-	-	-	B	A	A	B	C,D	C,D	E	F,G,H	F,G,H	I	J,K
Time in Months	2	6	4	3	6	8	3	7	2	5	4	3	13	7

d) A small project consists of seven activities. The time estimates in weeks of different activities are given below. Find out probability of completing the project in 18 weeks.

Activity	Estimated Time		
	to	tm	tp
1-2	1	1	7
1-3	1	4	7

e) Explain Sequencing Problem Technique. What are its Different Elements, also elaborate its assumptions.

Q.3 Attempt Any One. **04**

a) What is EOQ? What is its important?

b) Distinguish between CPM & PERT (At least 4 points)

Seat No.	

Set **Q**

S. Y. (B.Tech.) (Sem - II) (New) (CBCS) Examination: March/April-2025
COMPUTER SCIENCE AND ENGINEERING
Operation Research (OE-02E)

Day & Date: Tuesday 03-06-2025 Max. Marks: 70
Time: 10:00 AM To 01:00 PM

Instructions: 1) Q. No. 1 is compulsory. It should be solved in the first 30 minutes in Answer Book Page no 03 (Starting page of the Answer Book). Each question carries one mark.
2) Don't forget to Mention question paper set (P/Q/R/S) on top of page.
3) Figures to the right indicates full marks.

MCQ/Objective Type Questions

Duration: 30 Minutes Marks:14

Q.1 Choose the correct alternatives from the options. **14**

1) At the Break-Even Point _____
a) Profit > Loss b) Profit < Loss
c) Profit = Loss d) None of these

2) The PERT in project management means Program Evaluation and _____ Technique.
a) Resource b) Reconciliation
c) Reconsideration d) Review

3) _____ Stock is the lower limit of stock below which the stock should not be allowed to fall.
a) Maximum b) Average
c) Safety d) Standard

4) Optimization Means _____.
a) Maximization
b) Minimization
c) Minimization or Maximization
d) Mean of Minimization & Maximization

5) A feasible solution to LPP _____.
a) Must satisfy all the constraints simultaneously
b) Need not satisfy all the constraints
c) Must be a corner point of feasible region
d) Must optimize the objective function

6) In a project network, the critical path _____.
a) May be the shortest path b) Is the longest path
c) May be the longest path d) Is the shortest path

7) The inventory carrying costs are also called as _____.
a) Procurement costs b) Set-up costs
c) Storage costs d) None of the above

8) Linear programming deals with the optimization of a function of variables is, known as _____
a) Subjective function b) Objective function
c) Combined Equation d) None of these

9) What is the condition of Balance Assignment Problem?
a) Σ Demand= Σ Supply
b) No. of rows > No. of column
c) No. of rows < No. of column
d) No. of rows = No. of columns

10) EOQ means: _____
a) Economic Offering Quantity b) Empty Order Quantity
c) Economic Order Quantity d) Economic Order Quality

11) In ABC analysis, high monitoring and control are required for: _____
a) A class items b) B class items
c) C class items d) All of these

12) Graphical method, simplex method, and transportation method are concerned with _____.
a) Break-even analysis b) Value analysis
c) Linear programming d) Queueing theory

13) The cost of keeping items in inventory is called _____
a) Set up cost b) Holding cost
c) Shortage cost d) None of these

14) Dual of the Dual is _____
a) Dual b) Primal
c) Zero d) Infinity

Seat No.	

Set Q

S. Y. (B.Tech.) (Sem - II) (New) (CBCS) Examination: March/April-2025
COMPUTER SCIENCE AND ENGINEERING
Operation Research (OE-02E)

Day & Date: Tuesday 03-06-2025 Max. Marks: 56
Time: 10:00 AM To 01:00 PM

Instructions: 1) All questions are compulsory.
2) Figures to the right indicate full marks.
3) Assume suitable data wherever necessary and mention it clearly.
4) Use of non-programmable calculator is allowed.

Section – I

Q.2 Attempt Any Three. **24**

a) Using Graphical method, Solve

Maximize $Z = 10X_1 + 8X_2$
Subject to, $2X_1 + X_2 \leq 40;$
$2X_1 + 3X_2 \leq 80;$
$0 \leq X_1; 0 \leq X_2$

b) Solve the following assignment model for minimum processing time.

		Machines			
		M1	M2	M3	M4
Jobs	J1	51	77	49	55
	J2	32	34	59	68
	J3	37	44	70	54
	J4	55	55	58	55

c) Find the initial basic feasible solution by Least Cost Method.

	W1	W2	W3	W4	Supply
F1	48	60	56	58	140
F2	45	55	53	60	260
F3	50	65	60	62	360
F4	52	64	55	61	220
Demand	200	320	250	210	

d) What are the different Limitations & Applications of 'Operation Research'?
e) How do you solve unbalanced transportation problem? What are different methods to solve Transportation Model? Explain in details.

Q.3 Answer any one. **04**

a) What is LPP? What are different components of LPP?
b) How assignment model is useful in practical life?

Section – II

Q.4 Attempt Any Three. **24**

a) A construction company consumes 4000 bags of cement per month. Price per bag of cement is Rs. 320/-. Inventory carrying cost per bag per year is Rs. 30/- and procurement cost per order is Rs. 500/- Find economic order quantity and number of orders to be placed per month?

b) Write a note various types inventory cost.

c) Draw network, find out CP & PD. Calculate All floats of each non-critical Activity.

Activity	A	B	C	D	E	F	G	H	I	J	K	L	M	N
Immediate Predecessor	-	-	-	B	A	A	B	C,D	C,D	E	F,G,H	F,G,H	I	J,K
Time in Months	2	6	4	3	6	8	3	7	2	5	4	3	13	7

d) A small project consists of seven activities. The time estimates in weeks of different activities are given below. Find out probability of completing the project in 18 weeks.

Activity	Estimated Time		
	to	tm	tp
1-2	1	1	7
1-3	1	4	7
1-4	2	2	8
2-5	1	1	1
3-5	2	5	14
4-6	2	5	8
5-6	3	6	15

Probability Factor	Probability
0	50%
1	84.13%
2	97.72%
3	99.87%

MCQ/Objective Type Questions

Duration: 30 Minutes Marks:14

Q.1 Choose the correct option. **14**

1) A transcendental equation is an equation that involves _____.
a) Only algebraic terms
b) Only transcendental functions
c) Both algebraic and transcendental functions
d) Linear terms only

2) The interval in which a real root of the equation $x^3 - 2x - 5 = 0$ lies is _____.
a) $(1,2)$ b) $(0,1)$
c) $(2,3)$ d) $(3,4)$

3) The Gauss-Seidel method is used for solving _____.
a) Nonlinear equations
b) Systems of linear equations
c) Ordinary differential equations
d) Partial differential equations

4) Which of the following is a disadvantage of the Gauss-Jacobi method?
a) It converges faster than most direct methods
b) It requires a large number of iterations for a good approximation
c) It cannot be used for systems with more than two equations
d) It works only for symmetric systems

5) The use of Romberg's method is _____.
a) To solve simultaneous linear equation
b) To find root of linear equation
c) To evaluate definite integration
d) To find the Eigen values

6) The order of convergence of Newton-Raphson method is _____.

a) 1 b) 2

c) $\sqrt{2}$ d) 1.6

7) Power Method is used to find _____.

a) Negative Eigen Value b) Largest Eigen value

c) Positive Eigen Value d) None of these

8) To find the Numerically largest Eigen value using iterative Method we use the equation _____.

a) $A = \lambda X$ b) $AX = X$

c) $X = \lambda X$ d) $AX = \lambda X$

9) If $\frac{dy}{dx} = x - y$ and $y(0) = 1$ then by Picard's method the value of $y_1(1)$ is _____.

a) 0.905 b) 1.905

c) 2.905 d) none

10) Runge-Kutta method is self-starting method _____.

a) true d) false

c) we can't say d) none

11) If the data is equally spaced and interpolation is near the beginning of the data then _____ Interpolation formula is used.

a) Newton's backward difference

b) Newton's divided difference

c) Newton's forward difference

d) Lagrange's

12) The process of finding the value inside the interval (x_0, x_n) is called ___.

a) Interpolation b) Extrapolation

c) Iterative d) polynomial equation

13) Using Newton-Raphson method the first approximation to the root of the equation $x^4 - x - 10 = 0$ near to $x_0 = 2$ is _____.

a) 1.671 b) 2.271

c) 2.071 d) 1.871

14) To apply Simpson's one-third rule the number of sub-intervals must be _____.

a) Even b) Odd

c) Multiple of 3 d) Multiple of 6

2) Figures to the right indicate full marks.

Section – I

Q.2 Answer any three. **09**

a) Find the double root of the equation $x^3 - 5.4x^2 + 9.24x - 5.096 = 0$ given that it is nearer to 1.5.

b) Solve the system of equations by Jacobi's iterative method (perform 3 iterations) $27x + 6y - z = 85,\ 6x + 15y + 2z = 72,\ x + y + 54z = 110$

c) Find positive real root of the equation $x \sin x + \cos x = 0$ using Newton Raphson method correct to 3 decimal places.

d) Solve the system of equation by using Gauss-Elimination method. $x + 4y - z = -5, x + y - 6z = -12, -3x - y - z = 4$

e) Solve $\frac{dy}{dx} = -xy$ with $x_0 = 0\ ,\ y_0 = 1$ using Picard's method upto 3rd approximation.

Q.3 Answer any three. **09**

a) Solve $\frac{dy}{dx} = x + y$ with $x_0 = 0\ , y_0 = 1$ using Range kutta forth order method and find approximate value of y when $x = 0.2$

b) Solve $\frac{dy}{dx} = 1 + xy$ with $y(0) = 1$ using Picard's method take first approximation and find y for $x = 0.1$

c) Solve by Gauss Seidel Method, the equations $20x + y - 2z = 17, 3x + 20y - z = -18, 2x - 3y + 20z = 25$ Perform 3 iteration.

d) Find the value of $\sqrt{5}$ using newton's iterative formula. Perform 3 iteration.

e) Find the positive root of $f(x) = 2x^3 - 3x - 6$ by Newton's Raphson method perform 3 iteration.

Q.4 Answer any two. **10**

a) Perform 2-iteration by Newton's Raphson Method to Solve the non-linear equation $x = x^2 + y^2,\ y = x^2 - y^2$ Take initial approximation $x_0 = 0.8, y_0 = 0.4$

b) Solve the system of equation by LU decomposition Method $3x + 2y + 7z = 4,\quad 2x + 3y + z = 5,\quad 3x + 4y + z = 7$

c) Solve differential equation $\frac{dy}{dx} = 1 + xz,\ \frac{dz}{dx} = -xy$ for $x = 0.3$ using 4th order Runge-Kutta Method Initial Values are $x = 0,\ y = 0,\ z = 1$

Section – II

Q.5 Answer any Three. **09**

a) Evaluate the integral $\int_0^1 \frac{x^2}{1+x^3}\,dx$ using Simpson's $\frac{1}{3}$rd rule, Take $h = 0.25$

b) Determine the largest Eigen value and corresponding Eigen vector of the matrix $\begin{bmatrix} 5 & 4 \\ 1 & 2 \end{bmatrix}$ by using power method perform three iteration.

c) Use Trapezoidal Rule to compute $\int_0^1 \frac{1}{1+x^2}\,dx$ Take h as 0.5

d) Using Newton's divided difference formula, find the value of $f(2)$. Given the following table.

x	4	5	7	10	11	13
$f(x)$	48	100	294	900	1210	2028

e) Construct Newton's Forward interpolation polynomial for the following data:

x	4	6	8	10
y	1	3	8	16

Hence find the value of y for $x = 5$

Q.6 Answer any Three. **09**

a) Solve the integral $\int_0^{1/2} \frac{1}{\sqrt{1-x^2}}\,dx$ using Weddle's rule Taking $n = 6$

b) Solve $\int_3^5 \frac{4}{(2x^2)}\,dx$ Using Gauss Formula for $n = 2$ and $n = 3$.

c) Find all Eigen values and Eigen vectors of the following matrix by using Gauss Jacobi's Method. $\begin{bmatrix} 2 & 3 \\ 3 & 2 \end{bmatrix}$

d) Solve $\int_0^6 \frac{dx}{1+x^2}$ by using Simpsons 3/8th rule take $h = 1$

e) Using Newton's Backward formula, find the value of $f(2)$ if

x	1	1.4	1.8	2.2
$f(x)$	3.49	4.82	5.96	6.5

Q.7 Answer any two. **10**

a) Find the largest eigen value and the corresponding eigen vector of the matrix:

$\begin{bmatrix} 25 & 1 & 2 \\ 1 & 3 & 0 \\ 2 & 0 & -4 \end{bmatrix}$ by using power method

Take $[1 \quad 0 \quad 0]^r$ as initial eigen vector (perform 5 iterations)

b) Use Romberg's method to compute $\int_0^1 \frac{1}{1+x^2}\,dx$ Take h as $0.5, 0.25, 0.125$

c) Given the Values

x	5	7	11	13	17
$f(x)$	150	392	1452	2366	5202

Evaluate $f(9)$,using Lagrange's Formula.

Set Q

S.Y. (B.Tech.) (Sem-II) (New) (CBCS) Examination: March/April - 2025
COMPUTER SCIENCE AND ENGINEERING
Computational Mathematics (OE-02F)

Day & Date: Tuesday 03-06-2025 Max. Marks: 70
Time: 10:00 AM To 01:00 PM

Instructions: 1) Q. No. 1 is compulsory. It should be solved in the first 30 minutes in Answer Book Page no 03 (Starting page of the Answer Book). Each question carries one mark.
2) Don't forget to Mention question paper set (P/Q/R/S) on top of page.
3) Figures to the right indicates full marks.

MCQ/Objective Type Questions

Duration: 30 Minutes Marks:14

Q.1 Choose the correct option. **14**

1) To find the Numerically largest Eigen value using iterative Method we use the equation _____.
a) $A = \lambda X$ b) $AX = X$
c) $X = \lambda X$ d) $AX = \lambda X$

2) If $\frac{dy}{dx} = x - y$ and $y(0) = 1$ then by Picard's method the value of $y_1(1)$ is _____.
a) 0.905 b) 1.905
c) 2.905 d) none

3) Runge-Kutta method is self-starting method _____.
a) true d) false
c) we can't say d) none

4) If the data is equally spaced and interpolation is near the beginning of the data then _____ Interpolation formula is used.
a) Newton's backward difference
b) Newton's divided difference
c) Newton's forward difference
d) Lagrange's

5) The process of finding the value inside the interval (x_0, x_n) is called ___.
a) Interpolation b) Extrapolation
c) Iterative d) polynomial equation

6) Using Newton-Raphson method the first approximation to the root of the equation $x^4 - x - 10 = 0$ near to $x_0 = 2$ is _____.
a) 1.671 b) 2.271
c) 2.071 d) 1.871

7) To apply Simpson's one-third rule the number of sub-intervals must be _____.

a) Even b) Odd
c) Multiple of 3 d) Multiple of 6

8) A transcendental equation is an equation that involves _____.

a) Only algebraic terms
b) Only transcendental functions
c) Both algebraic and transcendental functions
d) Linear terms only

9) The interval in which a real root of the equation $x^3 - 2x - 5 = 0$ lies is _____.

a) $(1,2)$ b) $(0,1)$
c) $(2,3)$ d) $(3,4)$

10) The Gauss-Seidel method is used for solving _____.

a) Nonlinear equations
b) Systems of linear equations
c) Ordinary differential equations
d) Partial differential equations

11) Which of the following is a disadvantage of the Gauss-Jacobi method?

a) It converges faster than most direct methods
b) It requires a large number of iterations for a good approximation
c) It cannot be used for systems with more than two equations
d) It works only for symmetric systems

12) The use of Romberg's method is _____.

a) To solve simultaneous linear equation
b) To find root of linear equation
c) To evaluate definite integration
d) To find the Eigen values

13) The order of convergence of Newton-Raphson method is _____.

a) 1 b) 2
c) $\sqrt{2}$ d) 1.6

14) Power Method is used to find _____.

a) Negative Eigen Value b) Largest Eigen value
c) Positive Eigen Value d) None of these

Seat No.	

Set **Q**

S.Y. (B.Tech.) (Sem-II) (New) (CBCS) Examination: March/April - 2025
COMPUTER SCIENCE AND ENGINEERING
Computational Mathematics (OE-02F)

Day & Date: Tuesday 03-06-2025 Max. Marks: 56
Time: 10:00 AM To 01:00 PM

Instructions: 1) All questions are compulsory.
2) Figures to the right indicate full marks.

Section – I

Q.2 Answer any three. **09**

a) Find the double root of the equation $x^3 - 5.4x^2 + 9.24x - 5.096 = 0$ given that it is nearer to 1.5.

b) Solve the system of equations by Jacobi's iterative method (perform 3 iterations) $27x + 6y - z = 85,\ 6x + 15y + 2z = 72,\ x + y + 54z = 110$

c) Find positive real root of the equation $x \sin x + \cos x = 0$ using Newton Raphson method correct to 3 decimal places.

d) Solve the system of equation by using Gauss-Elimination method. $x + 4y - z = -5, x + y - 6z = -12, -3x - y - z = 4$

e) Solve $\frac{dy}{dx} = -xy$ with $x_0 = 0\ ,\ y_0 = 1$ using Picard's method upto 3rd approximation.

Q.3 Answer any three. **09**

a) Solve $\frac{dy}{dx} = x + y$ with $x_0 = 0\ , y_0 = 1$ using Range kutta forth order method and find approximate value of y when $x = 0.2$

b) Solve $\frac{dy}{dx} = 1 + xy$ with $y(0) = 1$ using Picard's method take first approximation and find y for $x = 0.1$

c) Solve by Gauss Seidel Method, the equations $20x + y - 2z = 17, 3x + 20y - z = -18, 2x - 3y + 20z = 25$ Perform 3 iteration.

d) Find the value of $\sqrt{5}$ using newton's iterative formula. Perform 3 iteration.

e) Find the positive root of $f(x) = 2x^3 - 3x - 6$ by Newton's Raphson method perform 3 iteration.

Q.4 Answer any two. **10**

a) Perform 2-iteration by Newton's Raphson Method to Solve the non-linear equation $x = x^2 + y^2,\ y = x^2 - y^2$ Take initial approximation $x_0 = 0.8, y_0 = 0.4$

b) Solve the system of equation by LU decomposition Method $3x + 2y + 7z = 4,\quad 2x + 3y + z = 5,\quad 3x + 4y + z = 7$

c) Solve differential equation $\frac{dy}{dx} = 1 + xz,\ \frac{dz}{dx} = -xy$ for $x = 0.3$ using 4th order Runge-Kutta Method Initial Values are $x = 0,\ y = 0,\ z = 1$

Section – II

Q.5 Answer any Three. **09**

a) Evaluate the integral $\int_0^1 \frac{x^2}{1+x^3}\,dx$ using Simpson's $\frac{1}{3}$rd rule, Take $h = 0.25$

b) Determine the largest Eigen value and corresponding Eigen vector of the matrix $\begin{bmatrix} 5 & 4 \\ 1 & 2 \end{bmatrix}$ by using power method perform three iteration.

c) Use Trapezoidal Rule to compute $\int_0^1 \frac{1}{1+x^2}\,dx$ Take h as 0.5

d) Using Newton's divided difference formula, find the value of $f(2)$. Given the following table.

x	4	5	7	10	11	13
$f(x)$	48	100	294	900	1210	2028

e) Construct Newton's Forward interpolation polynomial for the following data:

x	4	6	8	10
y	1	3	8	16

Hence find the value of y for $x = 5$

Q.6 Answer any Three. **09**

a) Solve the integral $\int_0^{1/2} \frac{1}{\sqrt{1-x^2}}\,dx$ using Weddle's rule Taking $n = 6$

b) Solve $\int_3^5 \frac{4}{(2x^2)}\,dx$ Using Gauss Formula for $n = 2$ and $n = 3$.

c) Find all Eigen values and Eigen vectors of the following matrix by using Gauss Jacobi's Method. $\begin{bmatrix} 2 & 3 \\ 3 & 2 \end{bmatrix}$

d) Solve $\int_0^6 \frac{dx}{1+x^2}$ by using Simpsons 3/8th rule take $h = 1$

e) Using Newton's Backward formula, find the value of $f(2)$ if

x	1	1.4	1.8	2.2
$f(x)$	3.49	4.82	5.96	6.5

Q.7 Answer any two. **10**

a) Find the largest eigen value and the corresponding eigen vector of the matrix:

$\begin{bmatrix} 25 & 1 & 2 \\ 1 & 3 & 0 \\ 2 & 0 & -4 \end{bmatrix}$ by using power method

Take $[1 \quad 0 \quad 0]^r$ as initial eigen vector (perform 5 iterations)

b) Use Romberg's method to compute $\int_0^1 \frac{1}{1+x^2}\,dx$ Take h as $0.5, 0.25, 0.125$

c) Given the Values

x	5	7	11	13	17
$f(x)$	150	392	1452	2366	5202

Evaluate $f(9)$,using Lagrange's Formula.

Q.2 Answer any three. **09**

a) Find the double root of the equation $x^3 - 5.4x^2 + 9.24x - 5.096 = 0$ given that it is nearer to 1.5.

b) Solve the system of equations by Jacobi's iterative method (perform 3 iterations) $27x + 6y - z = 85,\ 6x + 15y + 2z = 72,\ x + y + 54z = 110$

c) Find positive real root of the equation $x \sin x + \cos x = 0$ using Newton Raphson method correct to 3 decimal places.

d) Solve the system of equation by using Gauss-Elimination method. $x + 4y - z = -5, x + y - 6z = -12, -3x - y - z = 4$

e) Solve $\frac{dy}{dx} = -xy$ with $x_0 = 0\ ,\ y_0 = 1$ using Picard's method upto 3rd approximation.

Q.3 Answer any three. **09**

a) Solve $\frac{dy}{dx} = x + y$ with $x_0 = 0\ , y_0 = 1$ using Range kutta forth order method and find approximate value of y when $x = 0.2$

b) Solve $\frac{dy}{dx} = 1 + xy$ with $y(0) = 1$ using Picard's method take first approximation and find y for $x = 0.1$

c) Solve by Gauss Seidel Method, the equations $20x + y - 2z = 17, 3x + 20y - z = -18, 2x - 3y + 20z = 25$ Perform 3 iteration.

d) Find the value of $\sqrt{5}$ using newton's iterative formula. Perform 3 iteration.

e) Find the positive root of $f(x) = 2x^3 - 3x - 6$ by Newton's Raphson method perform 3 iteration.

Q.4 Answer any two. **10**

a) Perform 2-iteration by Newton's Raphson Method to Solve the non-linear equation $x = x^2 + y^2,\ y = x^2 - y^2$ Take initial approximation $x_0 = 0.8, y_0 = 0.4$

b) Solve the system of equation by LU decomposition Method $3x + 2y + 7z = 4,\quad 2x + 3y + z = 5,\quad 3x + 4y + z = 7$

c) Solve differential equation $\frac{dy}{dx} = 1 + xz,\ \frac{dz}{dx} = -xy$ for $x = 0.3$ using 4th order Runge-Kutta Method Initial Values are $x = 0,\ y = 0,\ z = 1$

Section – II

Q.5 Answer any Three. **09**

a) Evaluate the integral $\int_0^1 \frac{x^2}{1+x^3}\,dx$ using Simpson's $\frac{1}{3}$rd rule, Take $h = 0.25$

b) Determine the largest Eigen value and corresponding Eigen vector of the matrix $\begin{bmatrix} 5 & 4 \\ 1 & 2 \end{bmatrix}$ by using power method perform three iteration.

c) Use Trapezoidal Rule to compute $\int_0^1 \frac{1}{1+x^2}\,dx$ Take h as 0.5

d) Using Newton's divided difference formula, find the value of $f(2)$. Given the following table.

x	4	5	7	10	11	13
$f(x)$	48	100	294	900	1210	2028

e) Construct Newton's Forward interpolation polynomial for the following data:

x	4	6	8	10
y	1	3	8	16

Hence find the value of y for $x = 5$

Q.6 Answer any Three. **09**

a) Solve the integral $\int_0^{1/2} \frac{1}{\sqrt{1-x^2}}\,dx$ using Weddle's rule Taking $n = 6$

b) Solve $\int_3^5 \frac{4}{(2x^2)}\,dx$ Using Gauss Formula for $n = 2$ and $n = 3$.

c) Find all Eigen values and Eigen vectors of the following matrix by using Gauss Jacobi's Method. $\begin{bmatrix} 2 & 3 \\ 3 & 2 \end{bmatrix}$

d) Solve $\int_0^6 \frac{dx}{1+x^2}$ by using Simpsons 3/8th rule take $h = 1$

e) Using Newton's Backward formula, find the value of $f(2)$ if

x	1	1.4	1.8	2.2
$f(x)$	3.49	4.82	5.96	6.5

Q.7 Answer any two. **10**

a) Find the largest eigen value and the corresponding eigen vector of the matrix:

$\begin{bmatrix} 25 & 1 & 2 \\ 1 & 3 & 0 \\ 2 & 0 & -4 \end{bmatrix}$ by using power method

Take $[1 \quad 0 \quad 0]^r$ as initial eigen vector (perform 5 iterations)

b) Use Romberg's method to compute $\int_0^1 \frac{1}{1+x^2}\,dx$ Take h as $0.5, 0.25, 0.125$

c) Given the Values

x	5	7	11	13	17
$f(x)$	150	392	1452	2366	5202

Evaluate $f(9)$,using Lagrange's Formula.

S.Y. (B.Tech.) (Sem - II) (New) (CBCS) Examination: March/April - 2025
COMPUTER SCIENCE AND ENGINEERING
Professional Business Communication (OE-02G)

Day & Date: Tuesday 03-06-2025 Max. Marks: 70
Time: 10:00 AM To 01:00 PM

Instructions: 1) Q. No. 1 is compulsory. It should be solved in the first 30 minutes in Answer Book Page no 03 (Starting page of the Answer Book). Each question carries one mark.
2) Don't forget to Mention question paper set (P/Q/R/S) on top of page.
3) Figures to the right indicates full marks.

MCQ/Objective Type Questions

Duration: 30 Minutes Marks:14

Q.1 Choose the correct alternatives from the options. 14

1) In communication, _____ is the person who receives and decodes the message.
a) Sender b) Receiver
c) Driver d) Cleaner

2) Which among the following is not a manmade channel of communication?
a) Telephone b) Cell phone
c) Fax d) Air

3) Communication is the part of _____ skills.
a) Rough b) Soft
c) Hard d) Short

4) Which among the following are the barriers to communication?
a) Physical b) Mechanical
c) Psychological d) All of above

5) To overcome language barrier, which of the ways should not be followed?
a) Easy and understandable words should be used.
b) Jokes should be told to the audience.
c) The language of audience should be used.
d) Non-verbal ways should be used to the extent possible.

6) Which of the following is not among 7Cs?
a) Conciseness b) Completeness
c) Clarity d) Charity

7) Posters fall under _____ communication.
a) oral b) visual
c) written d) spoken

8) On the _____ it is possible to get immediate feedback.
a) letter b) e-mail
c) fax d) telephone

9) The response to a sender's message is called as _____.
a) Reply b) Feedback
c) Answer d) None of the above

10) _____ is the soul of communication.
a) Sender b) Receiver
c) Message d) Feedback

11) Which of these is not an element of non-verbal communication?
a) Personal appearance b) Posture
c) Eye contact d) Name of the speaker

12) Telephonic conversation is a form of: _____
a) verbal communication b) non-verbal communication
c) visual communication d) Written

13) To give a good presentation, full rehearsal is: _____
a) Optional b) Necessary
c) Useless d) Audience based

14) Which of the following is not an advantage of oral presentation?
a) Flexibility b) Scope for body language
c) Expensive d) Time-saving

S.Y. (B.Tech.) (Sem - II) (New) (CBCS) Examination: March/April - 2025
COMPUTER SCIENCE AND ENGINEERING
Professional Business Communication (OE-02G)

Day & Date: Tuesday 03-06-2025 Max. Marks: 56
Time: 10:00 AM To 01:00 PM

Instructions: 1) All questions are compulsory.
2) Figures to the right indicate full marks.

Section – I

Q.2 Attempt Any Three. **12**

a) Explain how communication is necessary for business.
b) What is feedback? Explain its necessity in communication.
c) Write short note on: Different channels of communication.
d) Explain language barriers to communication with the ways to overcome them.
e) Explain language as a tool of communication.

Q.3 Attempt Any Four. **16**

a) Explain seven C's of effective communication.
b) Explain various types of barriers to communication and the ways to overcome them.
c) What is oral communication? Explain its advantages.
d) Explain various steps in the process of communication.
e) What is written communication? Explain its benefits.

Section – II

Q.4 Attempt Any Three. **12**

a) Explain the difference between formal and informal communication.
b) Explain vertical communication with its types.
c) Explain farewell speech by the departing person, with an example
d) Explain the speech for vote of thanks, with an example.
e) Write short note on: Non- verbal aspects of presentation.

Q.5 Attempt Any Four. **16**

a) Explain the structure of a business letter with its various components.
b) Explain the steps in the process of presentation.
c) You had purchased some furniture items from a vendor. Afterwards you found that the furniture items are in a damaged condition. Write a letter of complaint and ask for replacement.
d) Explain four P's of effective presentations.
e) You are in need of some computer hardware parts. Prepare a letter placing order to the supplier. Specify the terms and conditions of purchase.

3) Figures to the right indicates full marks.
4) Assume suitable data if required

MCQ/Objective Type Questions

Duration: 30 Minutes Marks:14

Q.1 Choose the correct option from the following. 14

1) Find out the quartile value (Q3) for a given series of data
3, 4, 7, 2, 3, 7, 4 ,2, 4, 7, 4.
a) 4 b) 6
c) 7 d) 2

2) Which of the following is used to find the indices of the maximum and minimum elements in a NumPy array?
a) argmax() and argmin() b) max() and min()
c) amax() and amin() d) None of these

3) Which of the following is an example of a nominal variable?
a) Blood pressure
b) Eye color
c) Height of individuals
d) Time taken to complete a task

4) Which of the following is NOT a step in preparing data tables for analysis?
a) Data cleaning
b) Data visualization
c) Removing irrelevant observations
d) Converting data into a suitable format for analysis

5)
```
import numpy as np
a = np.array([[1, 2], [3, 4]])
print(a.ndim)
```
a) 0 b) 1
c) 2 d) 3

6) What are the benefits of Data Visualizations?
a) Better Analysis
b) Identifying patterns
c) Exploring Business Insights
d) All of the above

7) Which method can be used to convert text data to numerical values?
a) One-hot encoding
b) Normalization
c) Binning
d) Grouping

8) How to handle the missing values in the dataset?
a) dropping the missing rows & columns
b) Replace with some values
c) Compute with mean/mode/median value
d) All of above

9) What is the output of data frame, head() method?
a) return only the first row
b) return only headers or column name of the Data Frame
c) return the first five rows of the Data Frame
d) throw an exception as it expects parameter(number) in parenthesis

10) After installing Pandas, which command is used to import it in a Python script?
a) import pandas as pd
b) import pandas
c) from pandas import*
d) import pandas as pd as np

11) Which Pandas method is used to remove rows with missing data from a Data Frame?
a) df.dropna()
b) df.fillna()
c) df.isna()
d) df.replace()

12) Which function is used to create a histogram in Seaborn?
a) sns.lineplot()
b) sns.histplot()
c) sns.scatterplot()
d) sns.barplot()

13) Which of the following correctly plots a histogram using Matplotlib?
a) plt.hist(data, bins=10)
b) plt.histogram(data, bins=10)
c) sns.histplot(data=data, bins=10)
d) plt.hist(data, 10)

14) Which is the correct command to install Matplotlib?
a) pip install matplotlib
b) pip install matplotlib.pz
c) pip install matplotlib.*
d) All of these

2) Assume suitable data if required.
3) Figures to the right indicates full marks

Section – I

Q.2 Attempt any Three. **12**

a) Describe the process for making sense of data.
b) What are the different types of Variable?
c) Explain broadcasting. Summarize the rules with example.
d) Explain Data preprocessing steps and write Uses of Data Preprocessing.

Q.3 Attempt any One. **08**

a) The following are test scores on a biology exam:
64, 82, 87, 76, 93, 68, 71, 68, 75, 91, 84, 89.
Calculate: mean, median, mode, range, variance, standard deviation.
b) Why there is a need to generate consistent scale across variables? Describe with example.

Q.4 Compulsory Question. **08**

Normalize the following Original Percentage feature in a given table using.
i) Min-Max scaling method
ii) Z-score Method

Student	Original Percentage
Ajay	50
Vijay	60
Spandan	75
Sakshi	80

Section – II

Q.5 Attempt any Three. **12**

a) What is Data Visualization, identify the design principles of data visualization.

b) Write a program to perform concat and merging operation of two datasets using Pandas library.

c) Explain univariate data visualization & Multivariate Data Visualization with suitable example.

d) How to handle missing values in Pandas, explain with example.

Q.6 Attempt any One. **08**

a) List types of tables. Explain it with Example. How Cross classification table is better than summary table?

b) Write the Python code to visualize the Histogram, Bar Chart & scatter plot Consider suitable dataset.

Q.7 Compulsory Question. **08**

Write a program to create Data Frame from dictionary of Series, and write down the output also.

Q.4 Compulsory Question. **08**

Normalize the following Original Percentage feature in a given table using.
i) Min-Max scaling method
ii) Z-score Method

Student	Original Percentage
Ajay	50
Vijay	60
Spandan	75
Sakshi	80

Section – II

Q.5 Attempt any Three. **12**

a) What is Data Visualization, identify the design principles of data visualization.

b) Write a program to perform concat and merging operation of two datasets using Pandas library.

c) Explain univariate data visualization & Multivariate Data Visualization with suitable example.

d) How to handle missing values in Pandas, explain with example.

Q.6 Attempt any One. **08**

a) List types of tables. Explain it with Example. How Cross classification table is better than summary table?

b) Write the Python code to visualize the Histogram, Bar Chart & scatter plot Consider suitable dataset.

Q.7 Compulsory Question. **08**

Write a program to create Data Frame from dictionary of Series, and write down the output also.

Set **R**

S.Y (B. Tech.) (Sem-II) (New) (CBCS) Examination: March/April-2025
CIVIL ENGINEERING
Data Pre-processing & Visualization (CSEMDM-02A)

Day & Date: Thursday, 05-June-2025 Max. Marks: 70
Time: 10:00 AM To 01:00 PM

Instructions: 1) Q. No. 1 is compulsory. It should be solved in the first 30 minutes in Answer Book Page no 03 (Starting page of the Answer Book). Each question carries one mark.
2) Don't forget to Mention question paper set (P/Q/R/S) on top of page.
3) Figures to the right indicates full marks.
4) Assume suitable data if required

MCQ/Objective Type Questions

Duration: 30 Minutes Marks:14

Q.1 Choose the correct option from the following. **14**

1) Which Pandas method is used to remove rows with missing data from a Data Frame?
a) df.dropna() b) df.fillna()
c) df.isna() d) df.replace()

2) Which function is used to create a histogram in Seaborn?
a) sns.lineplot() b) sns.histplot()
c) sns.scatterplot() d) sns.barplot()

3) Which of the following correctly plots a histogram using Matplotlib?
a) plt.hist(data, bins=10)
b) plt.histogram(data, bins=10)
c) sns.histplot(data=data, bins=10)
d) plt.hist(data, 10)

4) Which is the correct command to install Matplotlib?
a) pip install matplotlib b) pip install matplotlib.pz
c) pip install matplotlib.* d) All of these

5) Find out the quartile value (Q3) for a given series of data 3, 4, 7, 2, 3, 7, 4 ,2, 4, 7, 4.
a) 4 b) 6
c) 7 d) 2

6) Which of the following is used to find the indices of the maximum and minimum elements in a NumPy array?
a) argmax() and argmin() b) max() and min()
c) amax() and amin() d) None of these

7) Which of the following is an example of a nominal variable?
a) Blood pressure
b) Eye color
c) Height of individuals
d) Time taken to complete a task

8) Which of the following is NOT a step in preparing data tables for analysis?
a) Data cleaning
b) Data visualization
c) Removing irrelevant observations
d) Converting data into a suitable format for analysis

9)
```
import numpy as np
a = np.array([[1, 2], [3, 4]])
print(a.ndim)
```
a) 0 b) 1
c) 2 d) 3

10) What are the benefits of Data Visualizations?
a) Better Analysis
b) Identifying patterns
c) Exploring Business Insights
d) All of the above

11) Which method can be used to convert text data to numerical values?
a) One-hot encoding b) Normalization
c) Binning d) Grouping

12) How to handle the missing values in the dataset?
a) dropping the missing rows & columns
b) Replace with some values
c) Compute with mean/mode/median value
d) All of above

13) What is the output of data frame, head() method?
a) return only the first row
b) return only headers or column name of the Data Frame
c) return the first five rows of the Data Frame
d) throw an exception as it expects parameter(number) in parenthesis

14) After installing Pandas, which command is used to import it in a Python script?
a) import pandas as pd b) import pandas
c) from pandas import* d) import pandas as pd as np

Q.5 Attempt any Three. **12**

a) What is Data Visualization, identify the design principles of data visualization.

b) Write a program to perform concat and merging operation of two datasets using Pandas library.

c) Explain univariate data visualization & Multivariate Data Visualization with suitable example.

d) How to handle missing values in Pandas, explain with example.

Q.6 Attempt any One. **08**

a) List types of tables. Explain it with Example. How Cross classification table is better than summary table?

b) Write the Python code to visualize the Histogram, Bar Chart & scatter plot Consider suitable dataset.

Q.7 Compulsory Question. **08**

Write a program to create Data Frame from dictionary of Series, and write down the output also.

Set S

S.Y (B. Tech.) (Sem-II) (New) (CBCS) Examination: March/April-2025
COMPUTER SCIENCE AND ENGINEERING
Data Pre-processing & Visualization (CSEMDM-02A)

Day & Date: Thursday, 05-June-2025 Max. Marks: 70
Time: 10:00 AM To 01:00 PM

Instructions: 1) Q. No. 1 is compulsory. It should be solved in the first 30 minutes in Answer Book Page no 03 (Starting page of the Answer Book). Each question carries one mark.
2) Don't forget to Mention question paper set (P/Q/R/S) on top of page.
3) Figures to the right indicates full marks.
4) Assume suitable data if required

MCQ/Objective Type Questions

Duration: 30 Minutes Marks:14

Q.1 Choose the correct option from the following. **14**

1) What are the benefits of Data Visualizations?
a) Better Analysis
b) Identifying patterns
c) Exploring Business Insights
d) All of the above

2) Which method can be used to convert text data to numerical values?
a) One-hot encoding b) Normalization
c) Binning d) Grouping

3) How to handle the missing values in the dataset?
a) dropping the missing rows & columns
b) Replace with some values
c) Compute with mean/mode/median value
d) All of above

4) What is the output of data frame, head() method?
a) return only the first row
b) return only headers or column name of the Data Frame
c) return the first five rows of the Data Frame
d) throw an exception as it expects parameter(number) in parenthesis

5) After installing Pandas, which command is used to import it in a Python script?
a) import pandas as pd b) import pandas
c) from pandas import* d) import pandas as pd as np

6) Which Pandas method is used to remove rows with missing data from a Data Frame?

a) df.dropna() b) df.fillna()
c) df.isna() d) df.replace()

7) Which function is used to create a histogram in Seaborn?

a) sns.lineplot() b) sns.histplot()
c) sns.scatterplot() d) sns.barplot()

8) Which of the following correctly plots a histogram using Matplotlib?

a) plt.hist(data, bins=10)
b) plt.histogram(data, bins=10)
c) sns.histplot(data=data, bins=10)
d) plt.hist(data, 10)

9) Which is the correct command to install Matplotlib?

a) pip install matplotlib b) pip install matplotlib.pz
c) pip install matplotlib.* d) All of these

10) Find out the quartile value (Q3) for a given series of data
3, 4, 7, 2, 3, 7, 4 ,2, 4, 7, 4.

a) 4 b) 6
c) 7 d) 2

11) Which of the following is used to find the indices of the maximum and minimum elements in a NumPy array?

a) argmax() and argmin() b) max() and min()
c) amax() and amin() d) None of these

12) Which of the following is an example of a nominal variable?

a) Blood pressure
b) Eye color
c) Height of individuals
d) Time taken to complete a task

13) Which of the following is NOT a step in preparing data tables for analysis?

a) Data cleaning
b) Data visualization
c) Removing irrelevant observations
d) Converting data into a suitable format for analysis

14)
```
import numpy as np
a = np.array([[1, 2], [3, 4]])
print(a.ndim)
```

a) 0 b) 1
c) 2 d) 3

Set P

S.Y (B. Tech.) (Sem-II) (New)(NEP CBCS) Examination: March/April-2025
ELECTRONICS & TELECOMMUNICATION ENGINEERING
Data Pre-processing & Visualization (CSEMDM-02A)

Day & Date: Thursday, 05-June-2025 Max. Marks: 70
Time: 10:00 AM To 01:00 PM

Instructions: 1) Q. No. 1 is compulsory. It should be solved in the first 30 minutes in Answer Book Page no 03 (Starting page of the Answer Book). Each question carries one mark.
2) Don't forget to Mention question paper set (P/Q/R/S) on top of page.
3) Figures to the right indicates full marks.
4) Assume suitable data if required

MCQ/Objective Type Questions

Duration: 30 Minutes Marks:14

Q.1 Choose the correct option from the following. 14

1) Find out the quartile value (Q3) for a given series of data
3, 4, 7, 2, 3, 7, 4 ,2, 4, 7, 4.
a) 4 b) 6
c) 7 d) 2

2) Which of the following is used to find the indices of the maximum and minimum elements in a NumPy array?
a) argmax() and argmin() b) max() and min()
c) amax() and amin() d) None of these

3) Which of the following is an example of a nominal variable?
a) Blood pressure
b) Eye color
c) Height of individuals
d) Time taken to complete a task

4) Which of the following is NOT a step in preparing data tables for analysis?
a) Data cleaning
b) Data visualization
c) Removing irrelevant observations
d) Converting data into a suitable format for analysis

5)
```
import numpy as np
a = np.array([[1, 2], [3, 4]])
print(a.ndim)
```
a) 0 b) 1
c) 2 d) 3

6) What are the benefits of Data Visualizations?
a) Better Analysis
b) Identifying patterns
c) Exploring Business Insights
d) All of the above

7) Which method can be used to convert text data to numerical values?
a) One-hot encoding
b) Normalization
c) Binning
d) Grouping

8) How to handle the missing values in the dataset?
a) dropping the missing rows & columns
b) Replace with some values
c) Compute with mean/mode/median value
d) All of above

9) What is the output of data frame, head() method?
a) return only the first row
b) return only headers or column name of the Data Frame
c) return the first five rows of the Data Frame
d) throw an exception as it expects parameter(number) in parenthesis

10) After installing Pandas, which command is used to import it in a Python script?
a) import pandas as pd
b) import pandas
c) from pandas import*
d) import pandas as pd as np

11) Which Pandas method is used to remove rows with missing data from a Data Frame?
a) df.dropna()
b) df.fillna()
c) df.isna()
d) df.replace()

12) Which function is used to create a histogram in Seaborn?
a) sns.lineplot()
b) sns.histplot()
c) sns.scatterplot()
d) sns.barplot()

13) Which of the following correctly plots a histogram using Matplotlib?
a) plt.hist(data, bins=10)
b) plt.histogram(data, bins=10)
c) sns.histplot(data=data, bins=10)
d) plt.hist(data, 10)

14) Which is the correct command to install Matplotlib?
a) pip install matplotlib
b) pip install matplotlib.pz
c) pip install matplotlib.*
d) All of these

ELECTRONICS & TELECOMMUNICATION ENGINEERING
Data Pre-processing & Visualization (CSEMDM-02A)

Day & Date: Thursday, 05-June-2025 Max. Marks: 56
Time: 10:00 AM To 01:00 PM

Instructions: 1) All question are compulsory.
2) Assume suitable data if required.
3) Figures to the right indicates full marks

Section – I

Q.2 Attempt any Three. **12**

a) Describe the process for making sense of data.
b) What are the different types of Variable?
c) Explain broadcasting. Summarize the rules with example.
d) Explain Data preprocessing steps and write Uses of Data Preprocessing.

Q.3 Attempt any One. **08**

a) The following are test scores on a biology exam:
64, 82, 87, 76, 93, 68, 71, 68, 75, 91, 84, 89.
Calculate: mean, median, mode, range, variance, standard deviation.
b) Why there is a need to generate consistent scale across variables? Describe with example.

Q.4 Compulsory Question. **08**

Normalize the following Original Percentage feature in a given table using.
i) Min-Max scaling method
ii) Z-score Method

Student	Original Percentage
Ajay	50
Vijay	60
Spandan	75
Sakshi	80

Section – II

Q.5 Attempt any Three. **12**

a) What is Data Visualization, identify the design principles of data visualization.

b) Write a program to perform concat and merging operation of two datasets using Pandas library.

c) Explain univariate data visualization & Multivariate Data Visualization with suitable example.

d) How to handle missing values in Pandas, explain with example.

Q.6 Attempt any One. **08**

a) List types of tables. Explain it with Example. How Cross classification table is better than summary table?

b) Write the Python code to visualize the Histogram, Bar Chart & scatter plot Consider suitable dataset.

Q.7 Compulsory Question. **08**

Set **Q**

S.Y (B. Tech.) (Sem-II) (New) (CBCS) Examination: March/April-2025
MECHANICAL ENGINEERING
Data Pre-processing & Visualization (CSEMDM-02A)

Day & Date: Thursday, 05-June-2025 Max. Marks: 70
Time: 10:00 AM To 01:00 PM

Instructions: 1) Q. No. 1 is compulsory. It should be solved in the first 30 minutes in Answer Book Page no 03 (Starting page of the Answer Book). Each question carries one mark.
2) Don't forget to Mention question paper set (P/Q/R/S) on top of page.
3) Figures to the right indicates full marks.
4) Assume suitable data if required

MCQ/Objective Type Questions

Duration: 30 Minutes Marks:14

Q.1 Choose the correct option from the following. **14**

1) How to handle the missing values in the dataset?
a) dropping the missing rows & columns
b) Replace with some values
c) Compute with mean/mode/median value
d) All of above

2) What is the output of data frame, head() method?
a) return only the first row
b) return only headers or column name of the Data Frame
c) return the first five rows of the Data Frame
d) throw an exception as it expects parameter(number) in parenthesis

3) After installing Pandas, which command is used to import it in a Python script?
a) import pandas as pd
b) import pandas
c) from pandas import*
d) import pandas as pd as np

4) Which Pandas method is used to remove rows with missing data from a Data Frame?
a) df.dropna()
b) df.fillna()
c) df.isna()
d) df.replace()

5) Which function is used to create a histogram in Seaborn?
a) sns.lineplot()
b) sns.histplot()
c) sns.scatterplot()
d) sns.barplot()

6) Which of the following correctly plots a histogram using Matplotlib?
a) plt.hist(data, bins=10)
b) plt.histogram(data, bins=10)
c) sns.histplot(data=data, bins=10)
d) plt.hist(data, 10)

7) Which is the correct command to install Matplotlib?
a) pip install matplotlib
b) pip install matplotlib.pz
c) pip install matplotlib.*
d) All of these

8) Find out the quartile value (Q3) for a given series of data
3, 4, 7, 2, 3, 7, 4 ,2, 4, 7, 4.
a) 4
b) 6
c) 7
d) 2

9) Which of the following is used to find the indices of the maximum and minimum elements in a NumPy array?
a) argmax() and argmin()
b) max() and min()
c) amax() and amin()
d) None of these

10) Which of the following is an example of a nominal variable?
a) Blood pressure
b) Eye color
c) Height of individuals
d) Time taken to complete a task

11) Which of the following is NOT a step in preparing data tables for analysis?
a) Data cleaning
b) Data visualization
c) Removing irrelevant observations
d) Converting data into a suitable format for analysis

12)
```
import numpy as np
a = np.array([[1, 2], [3, 4]])
print(a.ndim)
```
a) 0
b) 1
c) 2
d) 3

13) What are the benefits of Data Visualizations?
a) Better Analysis
b) Identifying patterns
c) Exploring Business Insights
d) All of the above

14) Which method can be used to convert text data to numerical values?
a) One-hot encoding
b) Normalization
c) Binning
d) Grouping

S.Y (B. Tech.) (Sem-II) (New) (CBCS) Examination: March/April-2025
MECHANICAL ENGINEERING
Data Pre-processing & Visualization (CSEMDM-02A)

Day & Date: Thursday, 05-June-2025 Max. Marks: 56
Time: 10:00 AM To 01:00 PM

Instructions: 1) All question are compulsory.
2) Assume suitable data if required.
3) Figures to the right indicates full marks

Section – I

Q.2 Attempt any Three. **12**

a) Describe the process for making sense of data.
b) What are the different types of Variable?
c) Explain broadcasting. Summarize the rules with example.
d) Explain Data preprocessing steps and write Uses of Data Preprocessing.

Q.3 Attempt any One. **08**

a) The following are test scores on a biology exam:
64, 82, 87, 76, 93, 68, 71, 68, 75, 91, 84, 89.
Calculate: mean, median, mode, range, variance, standard deviation.
b) Why there is a need to generate consistent scale across variables? Describe with example.

Q.4 Compulsory Question. **08**

Normalize the following Original Percentage feature in a given table using.
i) Min-Max scaling method
ii) Z-score Method

Student	Original Percentage
Ajay	50
Vijay	60
Spandan	75
Sakshi	80

Section – II

Q.5 Attempt any Three. **12**

a) What is Data Visualization, identify the design principles of data visualization.

b) Write a program to perform concat and merging operation of two datasets using Pandas library.

c) Explain univariate data visualization & Multivariate Data Visualization with suitable example.

d) How to handle missing values in Pandas, explain with example.

Q.6 Attempt any One. **08**

a) List types of tables. Explain it with Example. How Cross classification table is better than summary table?

b) Write the Python code to visualize the Histogram, Bar Chart & scatter plot Consider suitable dataset.

Q.7 Compulsory Question. **08**

Write a program to create Data Frame from dictionary of Series, and write down the output also.

MCQ/Objective Type Questions

Duration: 30 Minutes Marks:14

Q.1 Choose the correct Answer. **14**

1) This money is considered as an investment by the organization in doing quality work.
a) Blue Money b) White Money
c) Green Money d) Red Money

2) The objective of _____ is to find problems and fix them to improve the quality of a project.
a) Software bug b) Software complexity
c) Software testing d) Software development

3) Defects found in testing are blamed on developers.
a) True b) False

4) Black box testing is also called as ____.
a) Structural testing b) Interface testing
c) Stress testing d) Functional testing

5) Which of the following is NOT a black box testing technique?
a) Equivalence partitioning b) Boundary value analysis
c) White box testing d) Decision table testing

6) It is an activity where we check the work products with reference to standards, guidelines and procedures.
a) Validation b) Quality Assurance
c) Verification d) None

7) Which of the following is considered a primary factor in determining software quality?
   a) Number of developers
   b) User requirements
   c) Project deadline
   d) Programming language used

8) _____ is intended to determine whether the changed components have introduced any error in unchanged components of the system.
   a) Regression Testing b) Stress Testing
   c) Usability Testing d) Installation Testing

9) At which level of testing is the entire system tested to ensure that it meets the specified requirements?
   a) Unit Testing b) Integration Testing
   c) System Testing d) Acceptance Testing

10) White Box Testing is also called as _____
   a) Functional testing b) Structural testing
   c) Stress testing d) Interface testing

11) _____ is the process of methodically reducing the huge set of possible test cases into a much smaller, but still equally effective set.
   a) Test Planning b) Test Strategy
   c) Test Design d) Equivalence Partitioning

12) _____ is a first level of testing.
   a) Unit testing b) Integration Testing
   c) System Testing d) None of above

13) CMM means _____
   a) Common Maturity Model b) Cost Maturity Model
   c) Capability Maturity Model d) All

14) When testing principles are useful?
   a) During testing b) During execution
   c) During review d) Throughout life-cycle

S.Y. (B. Tech) (Sem - II) (New) (CBCS) Examination: March/April-2025
CIVIL ENGINEERING
Software Testing & Quality Assurance (CSEMDM-02B)

Day & Date: Thursday, 05-June-2025 Max. Marks: 56
Time: 10:00 AM To 01:00 PM

Instructions: 1) Answer all the questions from Section-I & Section-II.
2) Figures to the right indicate full marks.
3) Assume suitable data wherever necessary.

Section – I

Q.2 Attempt any four **16**

a) What are the misconceptions about testing?
b) Features of good Testing.
c) Compare White and Black box testing.
d) Explain Compatibility testing in detail.
e) Explain State Testing in brief.

Q.3 Attempt any two **12**

a) Write Short note on Equivalence Partitioning with example.
b) Draw and explain Verification and Validation model.
c) Explain Acceptance testing in detail.

Section – II

Q.4 Attempt any four **16**

a) Explain goals of Test Case Planning.
b) Explain five views of quality.
c) Explain CMM with diagram.
d) Explain Random testing in automation.
e) Explain Software Test Automation.

Q.5 Attempt any two **12**

a) What are the contents in test planning? Explain in detail.
b) Write few benefits of using automation and tools.
c) Explain SQA Processes and Product Characteristics.

Seat No.		Set	S

S.Y. (B. Tech) (Sem - II) (New) (CBCS) Examination: March/April-2025
CIVIL ENGINEERING
Software Testing & Quality Assurance (CSEMDM-02B)

Day & Date: Thursday, 05-June-2025 Max. Marks: 70
Time: 10:00 AM To 01:00 PM

Instructions: 1) Q. No. 1 is compulsory. It should be solved in the first 30 minutes in Answer Book Page no 03 (Starting page of the Answer Book). Each question carries one mark.
2) Don't forget to Mention question paper set (P/Q/R/S) on top of page.
3) Figures to the right indicates full marks.
4) Assume suitable data wherever necessary.

MCQ/Objective Type Questions

Duration: 30 Minutes Marks:14

Q.1 Choose the correct Answer. **14**

1) It is an activity where we check the work products with reference to standards, guidelines and procedures.
a) Validation b) Quality Assurance
c) Verification d) None

2) Which of the following is considered a primary factor in determining software quality?
a) Number of developers
b) User requirements
c) Project deadline
d) Programming language used

3) _____ is intended to determine whether the changed components have introduced any error in unchanged components of the system.
a) Regression Testing b) Stress Testing
c) Usability Testing d) Installation Testing

4) At which level of testing is the entire system tested to ensure that it meets the specified requirements?
a) Unit Testing b) Integration Testing
c) System Testing d) Acceptance Testing

5) White Box Testing is also called as _____
a) Functional testing b) Structural testing
c) Stress testing d) Interface testing

6) _____ is the process of methodically reducing the huge set of possible test cases into a much smaller, but still equally effective set.
a) Test Planning b) Test Strategy
c) Test Design d) Equivalence Partitioning

7) _____ is a first level of testing.
a) Unit testing b) Integration Testing
c) System Testing d) None of above

8) CMM means _____
a) Common Maturity Model b) Cost Maturity Model
c) Capability Maturity Model d) All

9) When testing principles are useful?
a) During testing b) During execution
c) During review d) Throughout life-cycle

10) This money is considered as an investment by the organization in doing quality work.
a) Blue Money b) White Money
c) Green Money d) Red Money

11) The objective of _____ is to find problems and fix them to improve the quality of a project.
a) Software bug b) Software complexity
c) Software testing d) Software development

12) Defects found in testing are blamed on developers.
a) True b) False

13) Black box testing is also called as ____.
a) Structural testing b) Interface testing
c) Stress testing d) Functional testing

14) Which of the following is NOT a black box testing technique?
a) Equivalence partitioning b) Boundary value analysis
c) White box testing d) Decision table testing

a) True
b) False

11) Black box testing is also called as ____.
a) Structural testing
b) Interface testing
c) Stress testing
d) Functional testing

12) Which of the following is NOT a black box testing technique?
a) Equivalence partitioning
b) Boundary value analysis
c) White box testing
d) Decision table testing

13) It is an activity where we check the work products with reference to standards, guidelines and procedures.
a) Validation
b) Quality Assurance
c) Verification
d) None

14) Which of the following is considered a primary factor in determining software quality?
a) Number of developers
b) User requirements
c) Project deadline
d) Programming language used

Set **Q**

S.Y. (B. Tech) (Sem - II) (New) (CBCS) Examination: March/April-2025
MECHANICAL ENGINEERING
Software Testing & Quality Assurance (CSEMDM-02B)

Day & Date: Thursday, 05-June-2025 Max. Marks: 56
Time: 10:00 AM To 01:00 PM

Instructions: 1) Answer all the questions from Section-I & Section-II.
2) Figures to the right indicate full marks.
3) Assume suitable data wherever necessary.

Section – I

Q.2 Attempt any four **16**

a) What are the misconceptions about testing?
b) Features of good Testing.
c) Compare White and Black box testing.
d) Explain Compatibility testing in detail.
e) Explain State Testing in brief.

Q.3 Attempt any two **12**

a) Write Short note on Equivalence Partitioning with example.
b) Draw and explain Verification and Validation model.
c) Explain Acceptance testing in detail.

Section – II

Q.4 Attempt any four **16**

a) Explain goals of Test Case Planning.
b) Explain five views of quality.
c) Explain CMM with diagram.
d) Explain Random testing in automation.
e) Explain Software Test Automation.

Q.5 Attempt any two **12**

a) What are the contents in test planning? Explain in detail.
b) Write few benefits of using automation and tools.
c) Explain SQA Processes and Product Characteristics.

Seat No.		Set	R

S.Y. (B. Tech) (Sem - II) (New) (CBCS) Examination: March/April-2025
MECHANICAL ENGINEERING
Software Testing & Quality Assurance (CSEMDM-02B)

Day & Date: Thursday, 05-June-2025 Max. Marks: 70
Time: 10:00 AM To 01:00 PM

Instructions: 1) Q. No. 1 is compulsory. It should be solved in the first 30 minutes in Answer Book Page no 03 (Starting page of the Answer Book). Each question carries one mark.
2) Don't forget to Mention question paper set (P/Q/R/S) on top of page.
3) Figures to the right indicates full marks.
4) Assume suitable data wherever necessary.

MCQ/Objective Type Questions

Duration: 30 Minutes Marks:14

Q.1 Choose the correct Answer. **14**

1) _____ is the process of methodically reducing the huge set of possible test cases into a much smaller, but still equally effective set.
a) Test Planning b) Test Strategy
c) Test Design d) Equivalence Partitioning

2) _____ is a first level of testing.
a) Unit testing b) Integration Testing
c) System Testing d) None of above

3) CMM means _____
a) Common Maturity Model b) Cost Maturity Model
c) Capability Maturity Model d) All

4) When testing principles are useful?
a) During testing b) During execution
c) During review d) Throughout life-cycle

5) This money is considered as an investment by the organization in doing quality work.
a) Blue Money b) White Money
c) Green Money d) Red Money

6) The objective of _____ is to find problems and fix them to improve the quality of a project.
a) Software bug b) Software complexity
c) Software testing d) Software development

7) Defects found in testing are blamed on developers.
a) True b) False

8) Black box testing is also called as ____.
a) Structural testing b) Interface testing
c) Stress testing d) Functional testing

9) Which of the following is NOT a black box testing technique?
a) Equivalence partitioning b) Boundary value analysis
c) White box testing d) Decision table testing

10) It is an activity where we check the work products with reference to standards, guidelines and procedures.
a) Validation b) Quality Assurance
c) Verification d) None

11) Which of the following is considered a primary factor in determining software quality?
a) Number of developers
b) User requirements
c) Project deadline
d) Programming language used

12) _____ is intended to determine whether the changed components have introduced any error in unchanged components of the system.
a) Regression Testing b) Stress Testing
c) Usability Testing d) Installation Testing

13) At which level of testing is the entire system tested to ensure that it meets the specified requirements?
a) Unit Testing b) Integration Testing
c) System Testing d) Acceptance Testing

14) White Box Testing is also called as _____
a) Functional testing b) Structural testing
c) Stress testing d) Interface testing

a) Validation b) Quality Assurance
c) Verification d) None

7) Which of the following is considered a primary factor in determining software quality?
   a) Number of developers
   b) User requirements
   c) Project deadline
   d) Programming language used

8) _____ is intended to determine whether the changed components have introduced any error in unchanged components of the system.
   a) Regression Testing b) Stress Testing
   c) Usability Testing d) Installation Testing

9) At which level of testing is the entire system tested to ensure that it meets the specified requirements?
   a) Unit Testing b) Integration Testing
   c) System Testing d) Acceptance Testing

10) White Box Testing is also called as _____
   a) Functional testing b) Structural testing
   c) Stress testing d) Interface testing

11) _____ is the process of methodically reducing the huge set of possible test cases into a much smaller, but still equally effective set.
   a) Test Planning b) Test Strategy
   c) Test Design d) Equivalence Partitioning

12) _____ is a first level of testing.
   a) Unit testing b) Integration Testing
   c) System Testing d) None of above

13) CMM means _____
   a) Common Maturity Model b) Cost Maturity Model
   c) Capability Maturity Model d) All

14) When testing principles are useful?
   a) During testing b) During execution
   c) During review d) Throughout life-cycle

Set **P**

S.Y. (B. Tech) (Sem - II) (New) (NEP CBCS) Examination: March/April-2025
ELECTRONICS & TELECOMMUNICATION ENGINEERING
Software Testing & Quality Assurance (CSEMDM-02B)

Day & Date: Thursday, 05-June-2025 Max. Marks: 56
Time: 10:00 AM To 01:00 PM

Instructions: 1) Answer all the questions from Section-I & Section-II.
2) Figures to the right indicate full marks.
3) Assume suitable data wherever necessary.

Section – I

Q.2 Attempt any four **16**

a) What are the misconceptions about testing?
b) Features of good Testing.
c) Compare White and Black box testing.
d) Explain Compatibility testing in detail.
e) Explain State Testing in brief.

Q.3 Attempt any two **12**

a) Write Short note on Equivalence Partitioning with example.
b) Draw and explain Verification and Validation model.
c) Explain Acceptance testing in detail.

Section – II

Q.4 Attempt any four **16**

a) Explain goals of Test Case Planning.
b) Explain five views of quality.
c) Explain CMM with diagram.
d) Explain Random testing in automation.
e) Explain Software Test Automation.

Q.5 Attempt any two **12**

a) What are the contents in test planning? Explain in detail.
b) Write few benefits of using automation and tools.
c) Explain SQA Processes and Product Characteristics.

Seat No.	

Set **Q**

S.Y. (B. Tech) (Sem - II) (New) (NEP CBCS) Examination: March/April-2025
ELECTRONICS & TELECOMMUNICATION ENGINEERING
Software Testing & Quality Assurance (CSEMDM-02B)

Day & Date: Thursday, 05-June-2025 Max. Marks: 70
Time: 10:00 AM To 01:00 PM

Instructions: 1) Q. No. 1 is compulsory. It should be solved in the first 30 minutes in Answer Book Page no 03 (Starting page of the Answer Book). Each question carries one mark.
2) Don't forget to Mention question paper set (P/Q/R/S) on top of page.
3) Figures to the right indicates full marks.
4) Assume suitable data wherever necessary.

MCQ/Objective Type Questions

Duration: 30 Minutes Marks:14

Q.1 Choose the correct Answer. **14**

1) _____ is intended to determine whether the changed components have introduced any error in unchanged components of the system.
a) Regression Testing b) Stress Testing
c) Usability Testing d) Installation Testing

2) At which level of testing is the entire system tested to ensure that it meets the specified requirements?
a) Unit Testing b) Integration Testing
c) System Testing d) Acceptance Testing

3) White Box Testing is also called as _____
a) Functional testing b) Structural testing
c) Stress testing d) Interface testing

4) _____ is the process of methodically reducing the huge set of possible test cases into a much smaller, but still equally effective set.
a) Test Planning b) Test Strategy
c) Test Design d) Equivalence Partitioning

5) _____ is a first level of testing.
a) Unit testing b) Integration Testing
c) System Testing d) None of above

6) CMM means _____
a) Common Maturity Model b) Cost Maturity Model
c) Capability Maturity Model d) All

7) When testing principles are useful?
a) During testing b) During execution
c) During review d) Throughout life-cycle

8) This money is considered as an investment by the organization in doing quality work.
a) Blue Money
b) White Money
c) Green Money
d) Red Money

9) The objective of _____ is to find problems and fix them to improve the quality of a project.
a) Software bug
b) Software complexity
c) Software testing
d) Software development

10) Defects found in testing are blamed on developers.
a) True
b) False

11) Black box testing is also called as ____.
a) Structural testing
b) Interface testing
c) Stress testing
d) Functional testing

12) Which of the following is NOT a black box testing technique?
a) Equivalence partitioning
b) Boundary value analysis
c) White box testing
d) Decision table testing

13) It is an activity where we check the work products with reference to standards, guidelines and procedures.
a) Validation
b) Quality Assurance
c) Verification
d) None

14) Which of the following is considered a primary factor in determining software quality?
a) Number of developers
b) User requirements
c) Project deadline
d) Programming language used

4) Assume suitable data if required.

MCQ/Objective Type Questions

Duration: 30 Minutes Marks:14

Q.1 Choose the correct alternatives from the options. **14**

1) In reinforcement learning, the agent learns by:
a) Labelled data b) Interacting with environment
c) Clustering data d) Using hidden layers

2) The component of RL that defines the goal is:
a) Policy b) Reward signal
c) Environment d) Value function

3) Which of the following is an element of RL?
a) Agent b) Environment
c) Reward d) All of the above

4) Which game was mastered using RL in DeepMind's AlphaGo?
a) Chess b) Go
c) Poker d) Checkers

5) Which algorithm is an example of temporal-difference learning?
a) SARSA b) Q-learning
c) Both a & b d) None

6) A policy in RL is:
a) A function that maps state to action
b) A reward
c) A value estimator
d) An input feature

7) The agent-environment interface includes:
a) Observations b) Rewards
c) Actions d) All of the above

8) The history of reinforcement learning is closely linked to:
a) Statistics b) Control theory
c) Psychology d) All of the above

9) What is the full form of RL?
a) Reasoning Logic b) Reinforcement Learning
c) Recursive Logic d) Random Learning

10) A key difference between supervised and reinforcement learning is:
a) RL uses labelled data b) RL learns from interaction
c) RL uses clustering d) None of these

11) Which method is used for solving the multi-armed bandit problem?
a) Policy Iteration b) Value Iteration
c) Action-value methods d) TD-Learning

12) The Bellman Equation is used in:
a) Data Mining b) Deep Learning
c) Value Function updates d) Supervised Learning

13) Incremental implementation in RL means:
a) Batch updates b) Update after full episode
c) Online updates per step d) None

S. Y. (B. Tech) (Sem-II) (New) (CBCS) Examination: March/April-2025
COMPUTER SCIENCE & ENGINEERING
Reinforcement Learning (CSEHON-02A)

Day & Date: Monday 09-06-2025 Max. Marks: 56
Time: 10:00 AM To 01:00 PM

Instructions: 1) All Questions are compulsory.
2) Figures to the right indicate full marks.

Section – I

Q.2 Attempt any three questions. **12**

a) Define Reinforcement Learning. How does it differ from supervised learning?
b) Explain Unified notation for Episodic and Continuing tasks with diagrams.
c) Describe the interaction between an agent and an environment using a standard RL model. Illustrate with an example.
d) Write a short note on the history and development of Reinforcement Learning.

Q.3 Attempt any one question. **08**

a) Explain with a diagram the key elements of Reinforcement Learning.
b) Explain 10-Armed testbed in detail with diagram.

Q.4 Compulsory Question. **08**

The following table shows the rewards received by an agent over 10 steps. Calculate.

Step	Reward
1	2
2	3
3	5
4	1
5	4
6	3
7	0
8	2
9	1
10	5

a) Total reward
b) Average reward
c) Discounted return with $\gamma = 0.9$ (first 3 steps only)

Section – II

Q.5 Attempt any three questions. **12**

a) Explain the policy evaluation and improvement process in dynamic programming.

b) Describe the concept and working of SARSA algorithm with a diagram.

c) Differentiate between On-policy and Off-policy methods with examples.

d) Write a short note on Monte Carlo Methods in Reinforcement Learning.

Q.6 Attempt any one question. **08**

a) Discuss the Temporal-Difference (TD) learning method and its advantages over Monte Carlo and DP.

b) Describe the Dyna architecture. How does it integrate planning, acting, and learning?

Q.7 Compulsory Question. **08**

Write a case study of **TD-Gammon** or **AlphaGo** highlighting how Reinforcement Learning techniques were applied, what challenges were faced, and what were the outcomes. (Explain any 1 Case study)

a) Total reward
b) Average reward
c) Discounted return with $\gamma = 0.9$ (first 3 steps only)

Section – II

Q.5 Attempt any three questions. **12**

a) Explain the policy evaluation and improvement process in dynamic programming.

b) Describe the concept and working of SARSA algorithm with a diagram.

c) Differentiate between On-policy and Off-policy methods with examples.

d) Write a short note on Monte Carlo Methods in Reinforcement Learning.

Q.6 Attempt any one question. **08**

a) Discuss the Temporal-Difference (TD) learning method and its advantages over Monte Carlo and DP.

b) Describe the Dyna architecture. How does it integrate planning, acting, and learning?

Q.7 Compulsory Question. **08**

Write a case study of **TD-Gammon** or **AlphaGo** highlighting how Reinforcement Learning techniques were applied, what challenges were faced, and what were the outcomes. (Explain any 1 Case study)

Seat No.		Set	S

S. Y. (B. Tech) (Sem-II) (New) (CBCS) Examination: March/April-2025
COMPUTER SCIENCE & ENGINEERING
Reinforcement Learning (CSEHON-02A)

Day & Date: Monday 09-06-2025 Max. Marks: 70
Time: 10:00 AM To 01:00 PM

Instructions: 1) Q. No. 1 is compulsory. It should be solved in the first 30 minutes in Answer Book Page no 03 (Starting page of the Answer Book). Each question carries one mark.
2) Don't forget to Mention question paper set (P/Q/R/S) on top of page.
3) Figures to the right indicates full marks.
4) Assume suitable data if required.

MCQ/Objective Type Questions

Duration: 30 Minutes Marks:14

Q.1 Choose the correct alternatives from the options. **14**

1) A policy in RL is:
a) A function that maps state to action
b) A reward
c) A value estimator
d) An input feature

2) The agent-environment interface includes:
a) Observations b) Rewards
c) Actions d) All of the above

3) The history of reinforcement learning is closely linked to:
a) Statistics b) Control theory
c) Psychology d) All of the above

4) What is the full form of RL?
a) Reasoning Logic b) Reinforcement Learning
c) Recursive Logic d) Random Learning

5) A key difference between supervised and reinforcement learning is:
a) RL uses labelled data b) RL learns from interaction
c) RL uses clustering d) None of these

6) Which method is used for solving the multi-armed bandit problem?
a) Policy Iteration b) Value Iteration
c) Action-value methods d) TD-Learning

7) The Bellman Equation is used in:
a) Data Mining b) Deep Learning
c) Value Function updates d) Supervised Learning

8) Incremental implementation in RL means:
a) Batch updates b) Update after full episode
c) Online updates per step d) None

9) The methods which uses models are called
a) Model based methods b) Model free methods
c) Value oriented methods d) Computational methods

10) In reinforcement learning, the agent learns by:
a) Labelled data b) Interacting with environment
c) Clustering data d) Using hidden layers

11) The component of RL that defines the goal is:
a) Policy b) Reward signal
c) Environment d) Value function

12) Which of the following is an element of RL?
a) Agent b) Environment
c) Reward d) All of the above

13) Which game was mastered using RL in DeepMind's AlphaGo?
a) Chess b) Go
c) Poker d) Checkers

14) Which algorithm is an example of temporal-difference learning?
a) SARSA b) Q-learning
c) Both a & b d) None

Reinforcement Learning (CSEHON-02A)

Day & Date: Monday 09-06-2025 Max. Marks: 56
Time: 10:00 AM To 01:00 PM

Instructions: 1) All Questions are compulsory.
2) Figures to the right indicate full marks.

Section – I

Q.2 Attempt any three questions. **12**

a) Define Reinforcement Learning. How does it differ from supervised learning?
b) Explain Unified notation for Episodic and Continuing tasks with diagrams.
c) Describe the interaction between an agent and an environment using a standard RL model. Illustrate with an example.
d) Write a short note on the history and development of Reinforcement Learning.

Q.3 Attempt any one question. **08**

a) Explain with a diagram the key elements of Reinforcement Learning.
b) Explain 10-Armed testbed in detail with diagram.

Q.4 Compulsory Question. **08**

The following table shows the rewards received by an agent over 10 steps. Calculate.

Step	Reward
1	2
2	3
3	5
4	1
5	4
6	3
7	0
8	2
9	1
10	5

a) Total reward
b) Average reward
c) Discounted return with $\gamma = 0.9$ (first 3 steps only)

MCQ/Objective Type Questions

Duration: 30 Minutes Marks:14

Q.1 Choose the correct Answer. **14**

1) Which of the following is a key weakness of SNMPv1?
a) Lack of encryption
b) No support for network monitoring
c) Incompatibility with IPv4
d) High resource consumption

2) Which of the following tools is commonly used for symbolic execution?
a) Valgrind b) KLEE
c) Metasploit d) Nessus

3) What is a common defense against use-after-free vulnerabilities?
a) Address sanitization b) Data encryption
c) Secure key storage d) Taint analysis

4) Which of the following is an example of an attack that involves altering the data in transmission?
a) Session hijacking b) Buffer overflow
c) ARP spoofing d) Man-in-the-middle

5) Which of the following protocols does TCP use for session management and authentication?
a) IPsec b) ARP
c) TCP handshaking d) TLS/SSL

6) What is the goal of integrity in network security?
a) Ensuring data is only accessible to authorized users
b) Ensuring data has not been tampered with
c) Verifying the identity of the sender
d) Preventing denial of service attacks

7) Which of the following protocols is used for key exchange in IPsec?
a) Diffie-Hellman b) RSA
c) Kerberos d) AES

8) Which of the following is a default community string in SNMPv1?
a) private b) public
c) secret d) admin

9) Which type of threat involves a program that replicates itself to spread to other systems?
a) Worm b) Spyware
c) Trojan d) Virus

10) Which of tire following is a conventional encryption algorithm?
a) RSA b) DES
c) Diffie-Hellman d) ECC

11) Which encryption device location ensures secure end-to-end communication?
a) Link encryption
b) End-to-end encryption
c) Device-to-device encryption
d) Hop-by-hop encryption

12) Which of the following is an example of a public key cryptography algorithm?
a) AES b) DES
c) RSA d) HMAC

13) What does IPsec primarily aim to secure?
a) Email communications
b) Network-layer communication
c) Application-layer communication
d) Physical-layer communication

14) Who is responsible for issuing digital certificates?
a) Certificate Authority b) Kerberos
c) Key Distribution Center d) Public Key Infrastructure

MCQ/Objective Type Questions

Duration: 30 Minutes Marks:14

Q.1 Choose the correct Answer. **14**

1) Which of the following is not a regular expression?
a) $[(a+b)^* - (aa+bb)]^*$
b) $[(0+1) - (0\mathrm{b} + \mathrm{a}1)^*(\mathrm{a}+\mathrm{b})]^*$
c) $(01+11+10)^*$
d) $(1+2+0)^*(1+2)^*$

2) Regular expressions are closed under _____.
a) Union b) Intersection
c) Kleen star d) All of the mentioned

3) Transition function maps.
a) $\sum^* \mathrm{Q} \to \sum$ b) $\mathrm{Q}^* \mathrm{Q} \to \sum$
c) $\sum^* \sum \to \mathrm{Q}$ d) $\mathrm{Q}^* \sum \to \mathrm{Q}$

4) Number of states required to accept a string end with 10.
a) 3 b) 2
c) 1 d) can't be represented

5) Which of the following is not a part of 5-tuple finite automata?
a) Input alphabet b) Transition function
c) Initial State d) Output Alphabet

6) Which is not a part of the diagram a Turing machine?
a) Input tape b) Read - Write head
c) Finite control d) Stack

7) In a mealy machine, the O/P depends upon?
a) State b) Previous State
c) State and Input d) Only Input

8) The set of all strings over the alphabet S={a,b} (including null) is denoted by _____.

a) (a+b)* b) (a+b)+
c) a+b+ d) a*b*

9) A grammar that produces more than one parse tree for some sentence is called _____

a) Ambiguous b) Unambiguous
c) Regular d) None of these

10) The intersection of CFL and regular language _____

a) Is always regular b) Is always context free
c) Both (a) and (b) d) Need not be regular

11) A→ aA| a| b The number of steps to form aab: _____

a) 2 b) 3
c) 4 d) 5

12) The language recognized by Turing machine is: _____

a) Context free language
b) Context sensitive language
c) Recursively enumerable language
d) Regular language

13) Are Multitape and Multitrack Turing machines the same?

a) Yes b) No
c) Somewhat yes d) Cannot tell

14) A regular language over an alphabet Σ is one that cannot be obtained from the basic languages using the operation

a) Union b) Concatenation
c) Kleene* d) All of the mentioned

Day & Date: Monday, 26-05-2025 Max. Marks: 56
Time: 10:00 AM To 01:00 PM

Instructions: 1) All questions are Compulsory.
2) Figures to the right indicate full marks.

Section – I

Q.2 Solve any four **16**

a) Define Moore Machine with an example.

b) For the two regular expressions given below,
i) find a string corresponding to r_2 but not to r_1 and
ii) find a string corresponding to both r_1 and r_2.
$r_1 = a^* + b^* \quad r_2 = ab^* + ba^* + b^*a + (a^*b)^*$

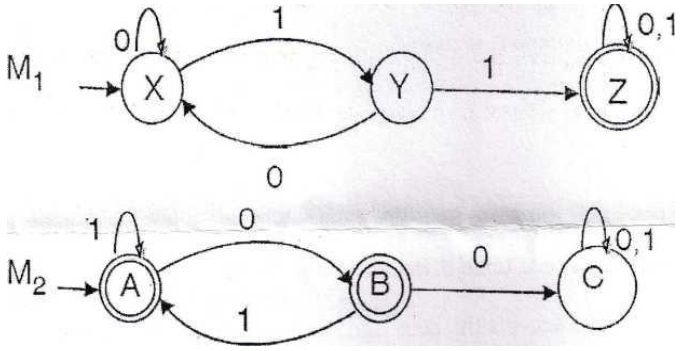
c) Draw DFA for regular expression
1) $ab(a+b)^*ab$
2) $(0+1)^*(00+11)$

d) Find context free grammar generating following language
$\{a^i b^j c^k | i = j \text{ or } i = k\}$

e) Construct deterministic finite automata to recognize odd number of 1's and even number of 0's?

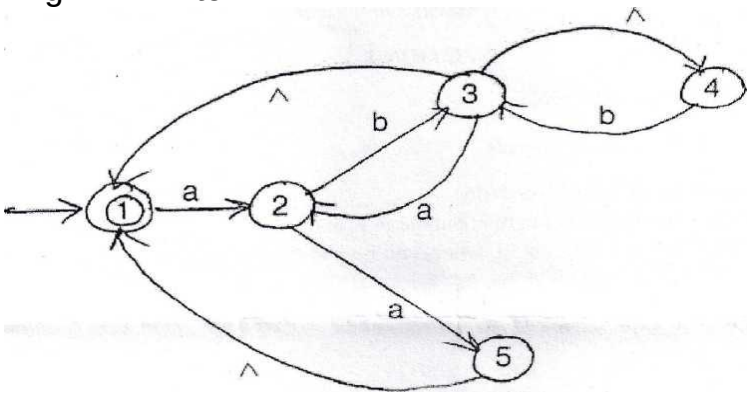
Q.3 Solve any one **06**

a) Following FAs recognize the languages $L1$ and $L2$. Draw FAs recognizing languages $L1 \cup L2,\ L1 \cap L2,\ L1 - L2$



b) State and explain different types of grammar.

Q.4 Convert following NFA- Λ to DFA **06**



Section – II

Q.5 **Attempt any four of the following.** **16**

a) What is PDA? Explain with an example

b) Convert the following CFG to a PDA.
$S \rightarrow aAA$,
$A \rightarrow aS|bS|a$

c) State and explain pumping lemma for Regular language

d) Construct an NPDA for the language $L = \{wcw^R : w \in \{a, b\}^*\}$

e) Explain Multiple Turing machine.

Q.6 **Attempt any one of the following.** **06**

a) Explain in detail universal Turing machine

b) Give transition table for PDA to recognize balanced strings of 2 types "( )" and "[ ]"

Q.7 Construct a Turing Machine that accepts the language **06**
$L = \{a^n b^m a^{n+m} | n > 0, m \geq 1\}$

Seat No.	

Set **Q**

S.Y. (B.Tech.) (Sem-II) (New/Old) (CBCS) Examination: March/April-2025
COMPUTER SCIENCE & ENGINEERING
Theory of Computation (BTN03402)

Day & Date: Monday, 26-05-2025 Max. Marks: 70
Time: 10:00 AM To 01:00 PM

Instructions: 1) Q. No. 1 is compulsory. It should be solved in the first 30 minutes in Answer Book Page no 03 (Starting page of the Answer Book). Each question carries one mark.
2) Don't forget to Mention question paper set (P/Q/R/S) on top of page.
3) Figures to the right indicates full marks.
4) Assume suitable data if necessary.

MCQ/Objective Type Questions

Duration: 30 Minutes Marks:14

Q.1 Choose the correct Answer. 14

1) The set of all strings over the alphabet S={a,b} (including null) is denoted by _____.
a) (a+b)* b) (a+b)+
c) a+b+ d) a*b*

2) A grammar that produces more than one parse tree for some sentence is called _____
a) Ambiguous b) Unambiguous
c) Regular d) None of these

3) The intersection of CFL and regular language _____
a) Is always regular b) Is always context free
c) Both (a) and (b) d) Need not be regular

4) A→ aA| a| b The number of steps to form aab: _____
a) 2 b) 3
c) 4 d) 5

5) The language recognized by Turing machine is: _____
a) Context free language
b) Context sensitive language
c) Recursively enumerable language
d) Regular language

6) Are Multitape and Multitrack Turing machines the same?
a) Yes b) No
c) Somewhat yes d) Cannot tell

7) A regular language over an alphabet Σ is one that cannot be obtained from the basic languages using the operation

a) Union b) Concatenation
c) Kleene* d) All of the mentioned

8) Which of the following is not a regular expression?

a) $[(a+b)^* - (aa+bb)]^*$
b) $[(0+1) - (0\mathrm{b} + \mathrm{a}1)^*(\mathrm{a}+\mathrm{b})]^*$
c) $(01+11+10)^*$
d) $(1+2+0)^*(1+2)^*$

9) Regular expressions are closed under _____.

a) Union b) Intersection
c) Kleen star d) All of the mentioned

10) Transition function maps.

a) $\sum^* \mathrm{Q} \to \sum$ b) $\mathrm{Q}^* \mathrm{Q} \to \sum$
c) $\sum^* \sum \to \mathrm{Q}$ d) $\mathrm{Q}^* \sum \to \mathrm{Q}$

11) Number of states required to accept a string end with 10.

a) 3 b) 2
c) 1 d) can't be represented

12) Which of the following is not a part of 5-tuple finite automata?

a) Input alphabet b) Transition function
c) Initial State d) Output Alphabet

13) Which is not a part of the diagram a Turing machine?

a) Input tape b) Read - Write head
c) Finite control d) Stack

14) In a mealy machine, the O/P depends upon?

a) State b) Previous State
c) State and Input d) Only Input

Seat No.

Day & Date: Monday, 26-05-2025 Max. Marks: 56
Time: 10:00 AM To 01:00 PM

Instructions: 1) All questions are Compulsory.
2) Figures to the right indicate full marks.

Section – I

Q.2 Solve any four **16**

a) Define Moore Machine with an example.

b) For the two regular expressions given below,
i) find a string corresponding to r_2 but not to r_1 and
ii) find a string corresponding to both r_1 and r_2.
$r_1 = a^* + b^* \quad r_2 = ab^* + ba^* + b^*a + (a^*b)^*$

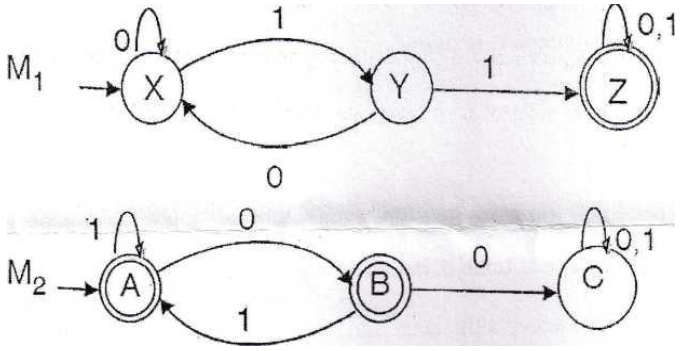
c) Draw DFA for regular expression
1) $ab(a+b)^*ab$
2) $(0+1)^*(00+11)$

d) Find context free grammar generating following language
$\{a^i b^j c^k | i = j \text{ or } i = k\}$

e) Construct deterministic finite automata to recognize odd number of 1's and even number of 0's?

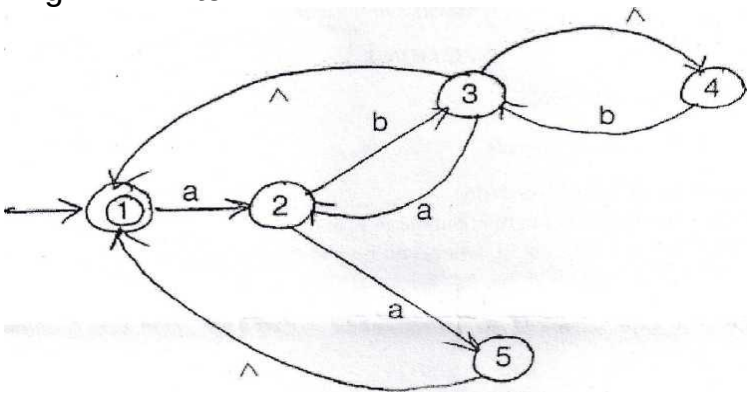
Q.3 Solve any one **06**

a) Following FAs recognize the languages $L1$ and $L2$. Draw FAs recognizing languages $L1 \cup L2,\ L1 \cap L2,\ L1 - L2$



b) State and explain different types of grammar.

Q.4 Convert following NFA- Λ to DFA **06**



Section – II

Q.5 **Attempt any four of the following.** **16**

a) What is PDA? Explain with an example

b) Convert the following CFG to a PDA.
$S \rightarrow aAA$,
$A \rightarrow aS|bS|a$

c) State and explain pumping lemma for Regular language

d) Construct an NPDA for the language $L = \{wcw^R : w \in \{a, b\}^*\}$

e) Explain Multiple Turing machine.

Q.6 **Attempt any one of the following.** **06**

a) Explain in detail universal Turing machine

b) Give transition table for PDA to recognize balanced strings of 2 types "( )" and "[ ]"

Q.7 Construct a Turing Machine that accepts the language **06**

Q.1 Choose the correct alternative from the option and rewrite the sentence. **14**

1) Which architecture is followed by general purpose microprocessors?
a) Harvard architecture b) Von Neumann architecture
c) None of the mentioned d) All of the mentioned

2) Which architecture involves both the volatile and the nonvolatile memory?
a) Harvard architecture b) Von Neumann architecture
c) None of the mentioned d) All of the mentioned

3) Which of the following is a type of computer architecture?
a) Microarchitecture b) Harvard Architecture
c) Von-Neumann Architecture d) All of the mentioned

4) Which of the following is a type of architecture used in the computers nowadays?
a) Microarchitecture b) Harvard Architecture
c) Von-Neumann Architecture d) System Design

5) What is the high speed memory between the main memory and the CPU called?
a) Register Memory b) Cache Memory
c) Storage Memory d) Virtual Memory

6) Computer architecture is abstracted by its _____.
a) Instruction b) Instruction set
c) Organization d) None of the above

7) _____ Model is more suitable for special purpose computations.
a) SIMD b) MISD
c) MIMD d) Both a and b

8) Hazards in pipelines can make it necessary to _____ the pipeline.
a) Stall b) Stake
c) Storm d) None of the above

9) The processors in a multiprocessor system communicate with each other through _____.
a) Shared memory
b) The shared variable in a common memory
c) Both a & b
d) None of the above

10) _____ classification shows the architectural evolution from sequential scalar computers to vector processors and parallel computers.
a) Von-Neumann's b) Nyquist's
c) Flynn's d) None of the above

11) Which of the following is true about DMA?
a) DMA is an approach of performing data transfers in bulk between memory and the external device without the intervention of the processor.
b) The DMA controller acts as a processor for DMA transfers and overlooks the entire process.
c) The DMA controller has 3 registers.
d) All of the above

12) The fetch and execution cycles are interleaved with the help of _____.
a) modification in processor architecture
b) clock
c) special unit
d) control unit

13) To increase the speed of memory access in pipelining, we make use of _____.
a) special memory locations b) special purpose registers
c) Cache d) Buffers

14) The contention for the usage of a hardware device is called _____.
a) Structural hazard b) Stalk
c) Deadlock d) none of the mentioned

a) Microarchitecture b) Harvard Architecture
c) Von-Neumann Architecture d) All of the mentioned

8) Which of the following is a type of architecture used in the computers nowadays?

a) Microarchitecture b) Harvard Architecture
c) Von-Neumann Architecture d) System Design

9) What is the high speed memory between the main memory and the CPU called?

a) Register Memory b) Cache Memory
c) Storage Memory d) Virtual Memory

10) Computer architecture is abstracted by its _____.

a) Instruction b) Instruction set
c) Organization d) None of the above

11) _____ Model is more suitable for special purpose computations.

a) SIMD b) MISD
c) MIMD d) Both a and b

12) Hazards in pipelines can make it necessary to _____ the pipeline.

a) Stall b) Stake
c) Storm d) None of the above

13) The processors in a multiprocessor system communicate with each other through _____.

a) Shared memory
b) The shared variable in a common memory
c) Both a & b
d) None of the above

14) _____ classification shows the architectural evolution from sequential scalar computers to vector processors and parallel computers.

a) Von-Neumann's b) Nyquist's
c) Flynn's d) None of the above

S. Y. (B. Tech) (Sem - II) (New/Old) (CBCS) Examination: March/April-2025
COMPUTER SCIENCE & ENGINEERING
Computer Organization and Architecture (BTN03403)

Day & Date: Wednesday 28-05-2025 Max. Marks: 56
Time: 10:00 AM To 01:00 PM

Instructions: 1) All questions are compulsory.
2) Figures to the right indicate full marks.
3) Assume suitable data if necessary.

Section – I

Q.2 Answer the following. (Any Three) **12**

a) Explain different levels of machines.
b) Explain in detail Von Neumann Architecture in detail.
c) Explain in detail Shared Variable Model.
d) Explain Cache memory hierarchy.

Q.3 Answer the following. (Any Two) **16**

a) Evaluate the equation using zero address, one address, two address instruction and three address.
$X = (A + B)^*(C + D)$
b) What is addressing mode? Explain the different types of addressing mode with example.
c) Explain in detail data parallel model & Object Oriented model.

Section – II

Q.4 Answer the following. (Any Three) **12**

a) Describe IO channels and its types.
b) Describe UMA and NUMA models of multiprocessor.
c) Define Parallelism. Explain in details types of parallelism.
d) Explain in detail Programmed I/O transfer technique.

Q.5 Answer the following. (Any Two) **16**

a) Describe look aside and look-through organization of cache.
b) Describe asynchronous and synchronous model of pipeline.
c) Describe Data Hazards along with its classification.

COMPUTER SCIENCE & ENGINEERING
Computer Organization and Architecture (BTN03403)

Day & Date: Wednesday 28-05-2025 Max. Marks: 70
Time: 10:00 AM To 01:00 PM

Instructions: 1) Q. No. 1 is compulsory. It should be solved in the first 30 minutes in Answer Book Page no 03 (Starting page of the Answer Book). Each Question carries one mark.
2) Don't forget to Mention question paper set (P/Q/R/S) on top of page.
3) Figures to the right indicates full marks.
4) Assume suitable data if necessary.

MCQ/Objective Type Questions

Duration: 30 Minutes Marks:14

Q.1 Choose the correct alternative from the option and rewrite the sentence. **14**

1) Computer architecture is abstracted by its _____.
a) Instruction b) Instruction set
c) Organization d) None of the above

2) _____ Model is more suitable for special purpose computations.
a) SIMD b) MISD
c) MIMD d) Both a and b

3) Hazards in pipelines can make it necessary to _____ the pipeline.
a) Stall b) Stake
c) Storm d) None of the above

4) The processors in a multiprocessor system communicate with each other through _____.
a) Shared memory
b) The shared variable in a common memory
c) Both a & b
d) None of the above

5) _____ classification shows the architectural evolution from sequential scalar computers to vector processors and parallel computers.
a) Von-Neumann's b) Nyquist's
c) Flynn's d) None of the above

6) Which of the following is true about DMA?
a) DMA is an approach of performing data transfers in bulk between memory and the external device without the intervention of the processor.
b) The DMA controller acts as a processor for DMA transfers and overlooks the entire process.
c) The DMA controller has 3 registers.
d) All of the above

7) The fetch and execution cycles are interleaved with the help of _____.
a) modification in processor architecture
b) clock
c) special unit
d) control unit

8) To increase the speed of memory access in pipelining, we make use of _____.
a) special memory locations
b) special purpose registers
c) Cache
d) Buffers

9) The contention for the usage of a hardware device is called _____.
a) Structural hazard
b) Stalk
c) Deadlock
d) none of the mentioned

10) Which architecture is followed by general purpose microprocessors?
a) Harvard architecture
b) Von Neumann architecture
c) None of the mentioned
d) All of the mentioned

11) Which architecture involves both the volatile and the nonvolatile memory?
a) Harvard architecture
b) Von Neumann architecture
c) None of the mentioned
d) All of the mentioned

12) Which of the following is a type of computer architecture?
a) Microarchitecture
b) Harvard Architecture
c) Von-Neumann Architecture
d) All of the mentioned

13) Which of the following is a type of architecture used in the computers nowadays?
a) Microarchitecture
b) Harvard Architecture
c) Von-Neumann Architecture
d) System Design

14) What is the high speed memory between the main memory and the CPU called?
a) Register Memory

MCQ/Objective Type Questions

Duration: 30 Minutes Marks:14

Q.1 Choose the correct Answer. **14**

1) A one-to-one communication between one source and one destination is classified as a _____ communication.
a) Unicast b) Multicast
c) Broadcast d) none of the above

2) One computer can communicate to another computer by using _____.
a) Port address b) Physical address
c) Logical address d) Specific Address

3) The actual mail transfer is done through _____.
a) UA b) MTA
c) SPOOL d) None of the above

4) Which of the following statement is correct?
a) UDP is suitable for request-response communication
b) UDP is suitable transport protocol for multicasting.
c) UDP is used for route updating protocol like RIP
d) All of the above

5) FIN control field of TCP segment is used to _____.
a) Establish the connection b) Terminate the connection
c) Abort the connection d) Reset the connection

6) In TCP, one end can stop sending data while still receiving data. This is called a _____.
a) Half-close b) Half-open
c) One-way termination d) None of the above

7) _____ socket type is designed to be used with a connectionless protocol such as UDP.

a) Stream b) Datagram
c) Raw d) none of the above

8) A computer that uses the _____ system stores the most significant bytes of data in the starting address of the data unit.

a) Little-Endian b) Big-Endian
c) Bothe a and b d) Short-Endian

9) In a DNS, if a label is terminated by null string, it is called _____.

a) FQDN b) PQDN
c) Both a & b d) None of the above

10) The _____ domain section uses two-character country abbreviations.

a) Generic b) Country
c) Inverse d) None of the above

11) In file transfer protocol, data transfer can be done in _____.

a) Stream mode b) Block mode
c) Compressed mode d) All of the mentioned

12) To make control character more effective in special situation, TELNET uses _____signaling.

a) Out of band b) In band
c) Out of out d) none of the above

13) What is the purpose of the DHCP server?

a) To provide storage for email
b) To translate URLs to IP addresses
c) To translate IPv4 addresses to MAC addresses
d) To provide an IP configuration information to hosts

14) When the sender and the receiver of an email are on the same system, we need only _____.

a) One UA b) Two UAs
c) One UA and one MTA d) none of the above

MCQ/Objective Type Questions

Duration: 30 Minutes Marks:14

Q.1 Choose the correct alternatives from the options. **14**

1) _____ method has quadratic convergence.
a) Newton Raphson method b) Regula falsi method
c) Bisection method d) None of these

2) A root of $x - \cos x = 0$ lies between _____.
a) 1 and 2 b) 2 and 3
c) 0 and 1 d) None of these

3) The number of strips required in Simpson's $1/3^{\text{rd}}$ rule is _____.
a) a multiple of 2 b) a multiple of 3
c) a multiple of 6 d) any

4) The use of Romberg's method is _____.
a) To solve simultaneous linear equations
b) To find root of linear equation
c) To evaluate definite integration
d) To find eigen values

5) _____ method is used to find largest eigen value.
a) Gauss Jordan b) Factorization
c) Gauss -Seidel d) Power

6) In Gauss Elimination method the system is reduced to _____ matrix.
a) lower triangular b) upper triangular
c) diagonal d) identity

7) For the data

x:	2	4	6	8
$f(x)$:	3	5	6	7

The value of $\int_2^8 f(x)dx$ by Trapezoidal rule is _____.

a) 18 b) 25
c) 16 d) 32

8) For the fuzzy sets

Elements :	x_1	x_2	x_3
$A(x)$:	0.2	0.5	0.6
$B(x)$:	0.1	0.4	0.5

Then set $A \cup B =$

a) $\frac{0.2}{x_1} + \frac{0.5}{x_2} + \frac{0.6}{x_3}$ b) $\frac{0.1}{x_1} + \frac{0.4}{x_2} + \frac{0.5}{x_3}$

c) $\frac{0.9}{x_1} + \frac{0.5}{x_2} + \frac{0.6}{x_3}$ d) $\frac{1}{x_1} + \frac{1}{x_2} + \frac{0.2}{x_3}$

9) The $\alpha -$ cuts of fuzzy numbers except $0 -$ cut are _____.

a) open intervals b) closed interval
c) bounded interval d) fuzzy sets

10) Which of the following is not true?

a) $S(A,B) = \frac{|A \cap B|}{|B|}$ d) $S(B,A) = \frac{|A \cap B|}{|B|}$

c) $|B| = \sum_{\propto} \frac{\alpha}{|\alpha_B|}$ d) $|A| = \sum_{\propto} \frac{\alpha}{|A|}$

11) A set of values of decision variables that satisfies the linear constraints and non-negativity conditions of an L.P.P. is called its:

a) Unbounded solution b) Optimum solution
c) Feasible solution d) None of these

12) The cost coefficient of slack variable is _____.

a) zero b) one
c) greater than one d) less than one

13) A fuzzy cardinality of fuzzy set is _____.

a) Fuzzy set b) A real number
c) Fuzzy number d) none of these

14) The dummy source or destination in assignment problem u added to _____.

a) satisfy rim conditions
b) prevent solution from becoming degenerate
c) ensure that total cost does not exceed a limit
d) none of these

Set **P**

S.Y (B. Tech) (Sem-II) (New/Old) (CBCS) Examination: March/April-2025
COMPUTER SCIENCE & ENGINEERING
Applied Mathematics - II (BTN03401)

Day & Date: Tuesday, 03-06-2025 Max. Marks: 56
Time: 10:00 AM To 01:00 PM

Instructions: 1) All questions are compulsory.
2) Figures to the right indicate full marks.
3) Assume suitable data if necessary and state them clearly.
4) Use of non-programmable calculators is allowed

Section – I

Q.2 Attempt any three from the following. **09**

a) Find an approximate positive real root of $e^{-x} = \sin x$ by False position method (Perform 2 iterations)

b) Solve by Newton Raphson method $x^4 - x - 13 = 0$ correct to three decimal places.

c) Solve the system of equations by Gauss Elimination method.
$2x + y + z = 10, 3x + 2y + 3z = 18, x + 4y + 9z = 16$

d) Find numerically largest eigen value and corresponding eigen vector by Power method.
$\begin{bmatrix} 2 & -1 & 0 \\ -1 & 2 & -1 \\ 0 & -1 & 2 \end{bmatrix}$ Perform 3 iterations. Take $x_0 = \begin{bmatrix} 1 \\ 0 \\ 0 \end{bmatrix}$ as initial approximation.

e) Evaluate $\int_4^{5.2} \log x \, dx \;\; n = 6$ using Weddel's rule.

Q.3 Attempt any three from the following. **09**

a) Evaluate $\sqrt{37}$ by Newton Raphson method correct to four decimal places by taking initial approximation as $x_0 = 6$.

b) Solve the system of equations by Jacobi's method (Perform 3 iterations)
$3x + y - z = 3, 2x - 8y + z = -5, x - 2y + 9z = 8$

c) Evaluate $\int_0^6 \frac{dx}{1+x^2}$ by using Simpson's 3/8th rule, $n = 6$

d) Evaluate $\int_0^1 \int_0^1 xe^y \, dxdy \qquad h = 0.5, k = 0.5$ by Trapezoidal rule.

e) Solve the simultaneous equations $x^2 + y^2 = 1$, and $xy = x + y$, the initial approximations $x_0 = 0.5$ and $y_0 = -1$ using Newton Raphson method. (Perform one iteration)

Q.4 Attempt the following.

a) Solve the system of equations by Gauss Seidel method. (Perform 4 iterations) **05**

$20x_1 + x_2 - 2x_3 = 17, 3x_1 + 20x_2 - x_3 = -18, 2x_1 - 3x_2 + 20x_3 = 25$

b) Evaluate $\int_0^2 \frac{1}{4+x^2} dx$ using Romberg's method with $n = 2$ **05**

Section – II

Q.5 Attempt any three of the following. **09**

a) Calculate $\propto -$ cut and strong $\propto -$ cut of

$$A(x) = \frac{x}{x+2}, \quad x \in [0,10]$$
$$= 0 \quad \text{otherwise} \qquad \propto = 0.2, 0.5, 1$$

b) For the fuzzy sets

Elements :	x_1	x_2	x_3	x_4	x_5	x_6
$A(x)$:	0.23	0.65	0.81	1	0.72	0.18
$B(x)$:	0.99	0.45	0.5	0.95	0.1	0

Then, find $(A \cup B)'$ and $A' \cap B$

c) Evaluate the following

i) $[-1,3] + [1,5]$
ii) $[-1,3] - [1,5]$
iii) $[-1,3].[1,5]$

d) If $C(x)\ \frac{x}{x+1}$ and $D(x) = 1 - \frac{x}{10}$ are membership functions of fuzzy sets C and D defiend on universal set $X = \{1,2,3,4,5\}$ find $S(C,D)$ and $S(D,C)$.

e) Find I.B.F.S by using Hungarian method.

	I	II	III	IV
A	10	12	19	11
B	5	10	7	8
C	12	14	13	11
D	8	15	11	9

Q.6 Attempt any three of the following. **09**

a) Determine whether the following fuzzy set is a fuzzy number

$A(x) = \min\{1, x\} \quad 0 \le x \le 10$
$= 0 \quad \text{otherwise}$

b) Solve the fuzzy equation $AX = B$
where $\alpha_A = [\alpha + 4, 6 - \alpha]$ and $\propto_B = [10 + 10\alpha, 35 - 15\alpha]$

c) Let A and B are fuzzy sets defined on universal set $X = Z$ (set of integers) as
$A(x) = \frac{0.5}{-1} + \frac{1}{0}$, $B(x) = \frac{0.5}{2} + \frac{1}{3}$ and $f(x_1, x_2) = x_1 x_2$ find $f(A,B)$

d) Maximize $Z = 3x_1 + 4x_2$, subject to
$x_1 - x_2 \le 1, -x_1 + x_2 \le 2, x_1, x_2 \ge 0$

e) Define:

i) Support of fuzzy set

ii) Normal fuzzy set

iii) Height of fuzzy set

Q.7 Attempt the following.

a) Find $A + B$ for the following membership function: **06**

i)
$$A(x) = \frac{x+1}{2} \quad -1 < x \leq 1$$
$$= \frac{3-x}{2} \quad 1 < x < 3$$
$$= 0 \quad \text{otherwise}$$

ii)
$$B(x) = \frac{x-1}{2} \quad 1 < x \leq 3$$
$$= \frac{5-x}{2} \quad 1 < x \leq 5$$
$$= 0 \quad \text{otherwise}$$

b) Solve the Assignment Problem. **04**

Day & Date: Tuesday, 03-06-2025 Max. Marks: 70
Time: 10:00 AM To 01:00 PM

Instructions: 1) Q. No. 1 is compulsory. It should be solved in the first 30 minutes in Answer Book Page no 03 (Starting page of the Answer Book). Each question carries one mark.
2) Don't forget to Mention question paper set (P/Q/R/S) on top of page.
3) Figures to the right indicates full marks.
4) Assume suitable data if necessary and state them clearly.
5) Use of non-programmable calculators is allowed.

MCQ/Objective Type Questions

Duration: 30 Minutes Marks:14

Q.1 Choose the correct alternatives from the options. **14**

1) For the fuzzy sets

Elements	:	x_1	x_2	x_3
$A(x)$	:	0.2	0.5	0.6
$B(x)$	:	0.1	0.4	0.5

Then set $A \cup B =$

a) $\frac{0.2}{x_1}+\frac{0.5}{x_2}+\frac{0.6}{x_3}$ b) $\frac{0.1}{x_1}+\frac{0.4}{x_2}+\frac{0.5}{x_3}$

c) $\frac{0.9}{x_1}+\frac{0.5}{x_2}+\frac{0.6}{x_3}$ d) $\frac{1}{x_1}+\frac{1}{x_2}+\frac{0.2}{x_3}$

2) The $\alpha-$ cuts of fuzzy numbers except $0-$ cut are _____.
a) open intervals b) closed interval
c) bounded interval d) fuzzy sets

3) Which of the following is not true?
a) $S(A,B)=\frac{|A\cap B|}{|B|}$ d) $S(B,A)=\frac{|A\cap B|}{|B|}$
c) $|B|=\sum_{\propto}\frac{\alpha}{|\alpha_B|}$ d) $|A|=\sum_{\propto}\frac{\alpha}{|A|}$

4) A set of values of decision variables that satisfies the linear constraints and non-negativity conditions of an L.P.P. is called its:
a) Unbounded solution b) Optimum solution
c) Feasible solution d) None of these

5) The cost coefficient of slack variable is _____.
a) zero b) one
c) greater than one d) less than one

6) A fuzzy cardinality of fuzzy set is _____.

a) Fuzzy set
b) A real number
c) Fuzzy number
d) none of these

7) The dummy source or destination in assignment problem u added to _____.

a) satisfy rim conditions
b) prevent solution from becoming degenerate
c) ensure that total cost does not exceed a limit
d) none of these

8) _____ method has quadratic convergence.

a) Newton Raphson method
b) Regula falsi method
c) Bisection method
d) None of these

9) A root of $x - \cos x = 0$ lies between _____.

a) 1 and 2
b) 2 and 3
c) 0 and 1
d) None of these

10) The number of strips required in Simpson's $1/3^{\text{rd}}$ rule is _____.

a) a multiple of 2
b) a multiple of 3
c) a multiple of 6
d) any

11) The use of Romberg's method is _____.

a) To solve simultaneous linear equations
b) To find root of linear equation
c) To evaluate definite integration
d) To find eigen values

12) _____ method is used to find largest eigen value.

a) Gauss Jordan
b) Factorization
c) Gauss -Seidel
d) Power

13) In Gauss Elimination method the system is reduced to _____ matrix.

a) lower triangular
b) upper triangular
c) diagonal
d) identity

14) For the data

x:	2	4	6	8
$f(x)$:	3	5	6	7

The value of $\int_2^8 f(x)dx$ by Trapezoidal rule is _____.

a) 18
b) 25
c) 16
d) 32

c) Let A and B are fuzzy sets defined on universal set $X = Z$ (set of integers) as
$A(x) = \frac{0.5}{-1} + \frac{1}{0}$, $B(x) = \frac{0.5}{2} + \frac{1}{3}$ and $f(x_1, x_2) = x_1 x_2$ find $f(A,B)$

d) Maximize $Z = 3x_1 + 4x_2$, subject to
$x_1 - x_2 \le 1, -x_1 + x_2 \le 2, x_1, x_2 \ge 0$

e) Define:

i) Support of fuzzy set

ii) Normal fuzzy set

iii) Height of fuzzy set

Q.7 Attempt the following.

a) Find $A + B$ for the following membership function: **06**

i)
$$A(x) = \frac{x+1}{2} \quad -1 < x \leq 1$$
$$= \frac{3-x}{2} \quad 1 < x < 3$$
$$= 0 \quad \text{otherwise}$$

ii)
$$B(x) = \frac{x-1}{2} \quad 1 < x \leq 3$$
$$= \frac{5-x}{2} \quad 1 < x \leq 5$$
$$= 0 \quad \text{otherwise}$$

b) Solve the Assignment Problem. **04**

S.Y (B. Tech) (Sem-II) (New/Old) (CBCS) Examination: March/April-2025
COMPUTER SCIENCE & ENGINEERING
Applied Mathematics - II (BTN03401)

Day & Date: Tuesday, 03-06-2025 Max. Marks: 70
Time: 10:00 AM To 01:00 PM

Instructions: 1) Q. No. 1 is compulsory. It should be solved in the first 30 minutes in Answer Book Page no 03 (Starting page of the Answer Book). Each question carries one mark.
2) Don't forget to Mention question paper set (P/Q/R/S) on top of page.
3) Figures to the right indicates full marks.
4) Assume suitable data if necessary and state them clearly.
5) Use of non-programmable calculators is allowed.

MCQ/Objective Type Questions

Duration: 30 Minutes Marks:14

Q.1 Choose the correct alternatives from the options. 14

1) In Gauss Elimination method the system is reduced to _____ matrix.
a) lower triangular b) upper triangular
c) diagonal d) identity

2) For the data

x:	2	4	6	8
$f(x)$:	3	5	6	7

The value of $\int_2^8 f(x)dx$ by Trapezoidal rule is _____.
a) 18 b) 25
c) 16 d) 32

3) For the fuzzy sets

Elements :	x_1	x_2	x_3
$A(x)$:	0.2	0.5	0.6
$B(x)$:	0.1	0.4	0.5

Then set $A \cup B =$
a) $\frac{0.2}{x_1}+\frac{0.5}{x_2}+\frac{0.6}{x_3}$ b) $\frac{0.1}{x_1}+\frac{0.4}{x_2}+\frac{0.5}{x_3}$
c) $\frac{0.9}{x_1}+\frac{0.5}{x_2}+\frac{0.6}{x_3}$ d) $\frac{1}{x_1}+\frac{1}{x_2}+\frac{0.2}{x_3}$

4) The $\alpha-$ cuts of fuzzy numbers except $0-$ cut are _____.
a) open intervals b) closed interval
c) bounded interval d) fuzzy sets

5) Which of the following is not true?

a) $S(A,B) = \frac{|A \cap B|}{|B|}$ d) $S(B,A) = \frac{|A \cap B|}{|B|}$

c) $|B| = \sum_{\propto} \frac{\alpha}{|\alpha_B|}$ d) $|A| = \sum_{\propto} \frac{\alpha}{|A|}$

6) A set of values of decision variables that satisfies the linear constraints and non-negativity conditions of an L.P.P. is called its:

a) Unbounded solution b) Optimum solution
c) Feasible solution d) None of these

7) The cost coefficient of slack variable is _____.

a) zero b) one
c) greater than one d) less than one

8) A fuzzy cardinality of fuzzy set is _____.

a) Fuzzy set b) A real number
c) Fuzzy number d) none of these

9) The dummy source or destination in assignment problem u added to _____.

a) satisfy rim conditions
b) prevent solution from becoming degenerate
c) ensure that total cost does not exceed a limit
d) none of these

10) _____ method has quadratic convergence.

a) Newton Raphson method b) Regula falsi method
c) Bisection method d) None of these

11) A root of $x - \cos x = 0$ lies between _____.

a) 1 and 2 b) 2 and 3
c) 0 and 1 d) None of these

12) The number of strips required in Simpson's $1/3^{\text{rd}}$ rule is _____.

a) a multiple of 2 b) a multiple of 3
c) a multiple of 6 d) any

13) The use of Romberg's method is _____.

a) To solve simultaneous linear equations
b) To find root of linear equation
c) To evaluate definite integration
d) To find eigen values

14) _____ method is used to find largest eigen value.

a) Gauss Jordan b) Factorization
c) Gauss -Seidel d) Power

S.Y (B. Tech) (Sem-II) (New/Old) (CBCS) Examination: March/April-2025
COMPUTER SCIENCE & ENGINEERING
Applied Mathematics - II (BTN03401)

Day & Date: Tuesday, 03-06-2025 Max. Marks: 56
Time: 10:00 AM To 01:00 PM

Instructions: 1) All questions are compulsory.
2) Figures to the right indicate full marks.
3) Assume suitable data if necessary and state them clearly.
4) Use of non-programmable calculators is allowed

Section – I

Q.2 Attempt any three from the following. **09**

a) Find an approximate positive real root of $e^{-x} = \sin x$ by False position method (Perform 2 iterations)

b) Solve by Newton Raphson method $x^4 - x - 13 = 0$ correct to three decimal places.

c) Solve the system of equations by Gauss Elimination method.
$2x + y + z = 10, 3x + 2y + 3z = 18, x + 4y + 9z = 16$

d) Find numerically largest eigen value and corresponding eigen vector by Power method.
$\begin{bmatrix} 2 & -1 & 0 \\ -1 & 2 & -1 \\ 0 & -1 & 2 \end{bmatrix}$ Perform 3 iterations. Take $x_0 = \begin{bmatrix} 1 \\ 0 \\ 0 \end{bmatrix}$ as initial approximation.

e) Evaluate $\int_4^{5.2} \log x \, dx \;\; n = 6$ using Weddel's rule.

Q.3 Attempt any three from the following. **09**

a) Evaluate $\sqrt{37}$ by Newton Raphson method correct to four decimal places by taking initial approximation as $x_0 = 6$.

b) Solve the system of equations by Jacobi's method (Perform 3 iterations)
$3x + y - z = 3, 2x - 8y + z = -5, x - 2y + 9z = 8$

c) Evaluate $\int_0^6 \frac{dx}{1+x^2}$ by using Simpson's 3/8th rule, $n = 6$

d) Evaluate $\int_0^1 \int_0^1 xe^y \, dxdy \qquad h = 0.5, k = 0.5$ by Trapezoidal rule.

e) Solve the simultaneous equations $x^2 + y^2 = 1$, and $xy = x + y$, the initial approximations $x_0 = 0.5$ and $y_0 = -1$ using Newton Raphson method. (Perform one iteration)

Q.4 Attempt the following.

a) Solve the system of equations by Gauss Seidel method. (Perform 4 iterations) **05**

$20x_1 + x_2 - 2x_3 = 17, 3x_1 + 20x_2 - x_3 = -18, 2x_1 - 3x_2 + 20x_3 = 25$

b) Evaluate $\int_0^2 \frac{1}{4+x^2} dx$ using Romberg's method with $n = 2$ **05**

Section – II

Q.5 Attempt any three of the following. **09**

a) Calculate $\propto -$ cut and strong $\propto -$ cut of

$$A(x) = \frac{x}{x+2}, \quad x \in [0,10]$$
$$= 0 \quad \text{otherwise} \qquad \propto = 0.2, 0.5, 1$$

b) For the fuzzy sets

Elements :	x_1	x_2	x_3	x_4	x_5	x_6
$A(x)$:	0.23	0.65	0.81	1	0.72	0.18
$B(x)$:	0.99	0.45	0.5	0.95	0.1	0

Then, find $(A \cup B)'$ and $A' \cap B$

c) Evaluate the following

i) $[-1,3] + [1,5]$
ii) $[-1,3] - [1,5]$
iii) $[-1,3].[1,5]$

d) If $C(x)\ \frac{x}{x+1}$ and $D(x) = 1 - \frac{x}{10}$ are membership functions of fuzzy sets C and D defiend on universal set $X = \{1,2,3,4,5\}$ find $S(C,D)$ and $S(D,C)$.

e) Find I.B.F.S by using Hungarian method.

	I	II	III	IV
A	10	12	19	11
B	5	10	7	8
C	12	14	13	11
D	8	15	11	9

Q.6 Attempt any three of the following. **09**

a) Determine whether the following fuzzy set is a fuzzy number

$A(x) = \min\{1, x\} \quad 0 \le x \le 10$
$= 0 \quad \text{otherwise}$

b) Solve the fuzzy equation $AX = B$
where $\alpha_A = [\alpha + 4, 6 - \alpha]$ and $\propto_B = [10 + 10\alpha, 35 - 15\alpha]$

c) Let A and B are fuzzy sets defined on universal set $X = Z$ (set of integers) as
$A(x) = \frac{0.5}{-1} + \frac{1}{0}$, $B(x) = \frac{0.5}{2} + \frac{1}{3}$ and $f(x_1, x_2) = x_1 x_2$ find $f(A,B)$

d) Maximize $Z = 3x_1 + 4x_2$, subject to
$x_1 - x_2 \le 1, -x_1 + x_2 \le 2, x_1, x_2 \ge 0$

e) Define:

i) Support of fuzzy set

ii) Normal fuzzy set

iii) Height of fuzzy set

Q.7 Attempt the following.

a) Find $A + B$ for the following membership function: **06**

i)
$$A(x) = \frac{x+1}{2} \quad -1 < x \leq 1$$
$$= \frac{3-x}{2} \quad 1 < x < 3$$
$$= 0 \quad \text{otherwise}$$

ii)
$$B(x) = \frac{x-1}{2} \quad 1 < x \leq 3$$
$$= \frac{5-x}{2} \quad 1 < x \leq 5$$
$$= 0 \quad \text{otherwise}$$

b) Solve the Assignment Problem. **04**

3) Figures to the right indicates full marks.
4) Make suitable assumptions (if necessary and state them clearly).

MCQ/Objective Type Questions

Duration: 30 Minutes Marks:14

Q.1 Choose the correct Answer. 14

1) Which of the following is an example of a supervised learning problem?
a) Image classification b) Market segmentation
c) Fraud detection d) Social network analysis

2) Which of the following is an example of an unsupervised learning problem?
a) Predicting the stock market
b) Recommending products to users
c) Spam filtering
d) Sentiment analysis

3) What is the purpose of regularization in machine learning?
a) To prevent overfitting
b) To increase the accuracy of the model
c) To reduce the variance of the model
d) To reduce the bias of the model

4) Which of the following is an example of a semi-supervised learning problem?
a) Image classification b) Object detection
c) Text clustering d) Speech recognition

5) Which of the following is a common approach to handling missing data in machine learning?
a) Removing the missing data
b) Filling in the missing data with a constant value
c) Filling in the missing data with the mean or median value
d) Using a separate imputation model to predict the missing values

6) Which of the following is a common approach to reducing dimensionality in machine learning?

a) Feature selection
b) Feature extraction
c) Feature scaling
d) Feature engineering

7) How can you avoid overfitting?

a) by using a lot of data
b) by using inductive machine learning
c) by using validation only
d) none of above

8) What is Training set?

a) training set is used to test the accuracy of the hypotheses generated by the learner
b) a set of data is used to discover the potentially predictive relationship
c) both a & b
d) none of above

9) Commons unsupervised applications include ____.

a) object segmentation
b) similarity detection
c) automatic labelling
d) all above

10) Which of the following are supervised learning applications ____.

a) spam detection, pattern detection, natural language processing
b) image classification, real-time visual tracking
c) autonomous car driving, logistic optimization
d) bioinformatics, speech recognition

11) The parameter ____ allows specifying the percentage of elements to put into the test/training set.

a) test_size
b) training_size
c) all above
d) none of these

12) Which are two techniques of Machine Learning?

a) genetic programming and inductive learning
b) speech recognition and regression
c) both a & b
d) none of the mentioned

13) In reinforcement learning if feedback is negative one it is defined as ___.

a) Penalty
b) Overlearning
c) Reward
d) none of above

14) A supervised scenario is characterized by the concept of a ____.

a) Programmer
b) Teacher
c) Author
d) Farmer

a) Image classification b) Market segmentation
c) Fraud detection d) Social network analysis

11) Which of the following is an example of an unsupervised learning problem?

a) Predicting the stock market
b) Recommending products to users
c) Spam filtering
d) Sentiment analysis

12) What is the purpose of regularization in machine learning?

a) To prevent overfitting
b) To increase the accuracy of the model
c) To reduce the variance of the model
d) To reduce the bias of the model

13) Which of the following is an example of a semi-supervised learning problem?

a) Image classification b) Object detection
c) Text clustering d) Speech recognition

14) Which of the following is a common approach to handling missing data in machine learning?

a) Removing the missing data
b) Filling in the missing data with a constant value
c) Filling in the missing data with the mean or median value
d) Using a separate imputation model to predict the missing values

Machine Learning (BTN03406)

Day & Date: Thursday, 05-June-2025 Max. Marks: 56
Time: 10:00 AM To 01:00 PM

Instructions: 1) All questions are compulsory.
2) Figures to the right indicate full marks.
3) Assume additional data if required and mention it clearly.

Section – I

Q.2 Answer the following: (Any Three) **12**
- **a)** Explain Data Preparation in Machine Learning.
- **b)** How can we Focus on Business Problem in ML
- **c)** Explain the World of Probabilities in Machine Learning.
- **d)** How can we determine the Best Learning Model in ML?

Q.3 Answer the following: (Any One) **08**
- **a)** How can we explore cost functions in Machine Learning?
- **b)** Explain how can we Prepare Data when looking inside ML

Q.4 What is Machine Learning? Explain the types of Machine Learning. **08**

Section – II

Q.5 Answer the following: (Any Three) **12**
- **a)** Explain Growing Greedy Classification Trees in detail.
- **b)** Explain Searching for the Best Hyper-Parameters in Machine Learning.
- **c)** Explore the Resorting to Cross-Validation in ML.
- **d)** Explain selecting features of improve ML models and examples.

Q.6 Answer the following: (Any One) **08**
- **a)** Explain Scoring Opinions and Sentiments in ML.
- **b)** How can we Avoid Sample Bias and Leakage Traps with example in ML.

Q.7 Explain Classifying Images with Machine Learning in detail. **08**

Day & Date: Thursday, 05-June-2025 Max. Marks: 70
Time: 10:00 AM To 01:00 PM

Instructions: 1) Q. No. 1 is compulsory. It should be solved in the first 30 minutes in Answer Book Page no 03 (Starting page of the Answer Book). Each question carries one mark.
2) Don't forget to Mention question paper set (P/Q/R/S) on top of page.
3) Figures to the right indicates full marks.
4) Make suitable assumptions (if necessary and state them clearly).

MCQ/Objective Type Questions

Duration: 30 Minutes Marks:14

Q.1 Choose the correct Answer. **14**

1) What is the rank of a matrix?
a) Number of rows
b) Number of columns
c) Maximum number of linearly independent rows or columns
d) Number of non-zero elements

2) Which of the following is not a measure of central tendency?
a) Mean b) Median
c) Mode d) Variance

3) The determinant of a 2x2 matrix [abcd]\begin{bmatrix} a & b \\ c & d \end{bmartix}[acbd] is: ____
a) ad−bcad - bcad−bc
b) ab−cdab - cdab−cd
c) a+da + da+d
d) a−da - da−d

4) What is the shape of the normal distribution curve?
a) Bell-shaped b) Flat
c) Skewed d) Exponential

5) Which of the following measures distance between two points in space?
a) Dot product b) Cross product
c) Euclidean distance d) Projection

6) In Bayes' Theorem, the term P(A|B)P(A|B)P(A|B) refers to: ____
a) Probability of B given A
b) Probability of A given B
c) Joint probability of A and B
d) Probability of A and B are independent

7) The correlation coefficient lies between: ____

a) 0 and 1 b) -1 and 0

c) -1 and 1 d) -∞ and ∞

8) What is the KKT condition used for?

a) Solving linear equations

b) Testing statistical hypotheses

c) Solving constraint optimization problems

d) Performing gradient descent

9) Which method minimizes the sum of squared errors in fitting a model?

a) Gradient descent

b) Least squares optimization

c) Bayesian inference

d) Cross-validation

10) Simpson's Paradox highlights the issue in: ____

a) Correlation and causation

b) Dependence and independence

c) Conditional probability

d) Random sampling

11) The trace of a square matrix is ____

a) The sum of all elements

b) The sum of diagonal elements

c) The product of diagonal elements

d) None of the above

12) What does the Central Limit Theorem state?

a) The sample mean will approximate the population mean for large samples

b) All distributions are normal for small samples

c) Probability distributions are constant over time

d) The mean and variance are equal for all distributions

13) Which is an example of a continuous random variable?

a) Number of students in a class

b) Height of a person

c) Roll of a die

d) Flipping a coin

14) Gradient descent works by: ____

a) Moving in the direction of increasing gradient

b) Moving in the direction of decreasing gradient

c) Jumping directly to the minimum

d) Finding Eigen values

MCQ/Objective Type Questions

Duration: 30 Minutes Marks:14

Q.1 Choose the correct Answer. **14**

1) Which one of the following algorithms is not used in asymmetric-key cryptography?
a) RSA algorithm
b) Diffie-Hellman algorithm
c) electronic code book algorithm
d) DS Algorithm

2) Block type cipher operates on _____ length of groups.
a) Fixed b) Constant
c) Zero d) All the above

3) In cryptography, the order of the letters in a message is rearranged by ____
a) transpositional ciphers
b) substitution ciphers
c) both transpositional ciphers and substitution ciphers
d) quadratic ciphers

4) What is data encryption standard (DES)?
a) block cipher b) stream cipher
c) bit cipher d) byte cipher

5) Cryptanalysis is used ____
a) to find some insecurity in a cryptographic scheme
b) to increase the speed
c) to encrypt the data
d) to make new ciphers

6) Cryptographic hash function takes an arbitrary block of data and returns ____.
a) fixed size bit string
b) variable size bit string
c) both fixed size bit string and variable size bit string
d) variable sized byte string

7) The sender "sign" a message as ____.
a) Encrypted signature b) Artificial Signature
c) Digital Signature d) All of the above

8) AES stands for ____.
a) Advance encryption server
b) Advance encryption standard
c) Advance encryption system
d) None of the above

9) Decryption algorithm is used to ____.
a) Encrypt input data b) Decrypt input data
c) Decrypt encrypted data d) None of the above

10) Authentication is ____.
a) Verification of data b) Verification of user's identity
c) Both a and b d) None of above

11) Output of encryption algorithm is ____.
a) Plain text b) Cipher text
c) Both a and b d) None of the above

12) Secure hash algorithm is developed by ____.
a) National Institute of Standards and Technology (NIST)
b) IEEE
c) ANSI
d) None of the above

13) ____ is the process of communicating confidential information in an unreadable format between legitimate users.
a) Cryptography b) Symmentricity
c) Asymmenticity d) All the above

a) transpositional ciphers
b) substitution ciphers
c) both transpositional ciphers and substitution ciphers
d) quadratic ciphers

11) What is data encryption standard (DES)?
a) block cipher b) stream cipher
c) bit cipher d) byte cipher

12) Cryptanalysis is used ____
a) to find some insecurity in a cryptographic scheme
b) to increase the speed
c) to encrypt the data
d) to make new ciphers

13) Cryptographic hash function takes an arbitrary block of data and returns ____.
a) fixed size bit string
b) variable size bit string
c) both fixed size bit string and variable size bit string
d) variable sized byte string

14) The sender “sign” a message as ____.
a) Encrypted signature b) Artificial Signature
c) Digital Signature d) All of the above

Set **Q**

S.Y. (B. Tech.) (Sem-II) (New/Old) (CBCS) Examination: March/April-2025
COMPUTER SCIENCE & ENGINEERING
Cryptography (BTN04410)

Day & Date: Thursday, 05-June-2025 Max. Marks: 56
Time: 10:00 AM To 01:00 PM

Instructions: 1) All questions are compulsory.
2) Figures to the right indicate full marks.
3) Assume suitable data if necessary.

SECTION - I

Q.2 Solve the following: (Any Four) **16**

a) What is difference between monoalphabetic cipher and polyalphabetic cipher?
b) Explain Block cipher and Stream cipher in detail.
c) Explain Caesar cipher in detail with example.
d) Explain OSI Security Architecture in detail.
e) Explain Transposition technique in detail.

Q.3 Solve the following: (Any Two) **12**

a) Find the cipher text of given plaintext by using polyalphabetic substitution technique.
Plaintext: We are discovered save yourself
Key: Deceptive
b) Explain security services in detail.
c) Explain the working of DES in detail with diagram.

SECTION - II

Q.4 Attempt the following: (Any Four) **16**

a) Explain Kerberos in detail.
b) Explain applications of public key cryptosystem.
c) Explain Secure Hash Algorithm (SHA) in detail.
d) Explain cryptographic Hash function in detail.
e) Explain four AES Transformation function.

Q.5 Attempt the following: (Any Two) **12**

a) What is MAC? Explain Requirement and security of MAC.
b) Explain techniques for remote user authentication using symmetric encryption.
c) Explain RSA Algorithm in detail.

S.Y. (B. Tech.) (Sem-II) (New/Old) (CBCS) Examination: March/April-2025
COMPUTER SCIENCE & ENGINEERING
Cryptography (BTN04410)

Day & Date: Thursday, 05-June-2025 Max. Marks: 70
Time: 10:00 AM To 01:00 PM

Instructions: 1) Q. No. 1 is compulsory. It should be solved in the first 30 minutes in Answer Book Page no 03 (Starting page of the Answer Book). Each question carries one mark.
2) Don't forget to Mention question paper set (P/Q/R/S) on top of page.
3) Figures to the right indicates full marks.
4) Make suitable assumptions (if necessary and state them clearly).

MCQ/Objective Type Questions

Duration: 30 Minutes Marks:14

Q.1 Choose the correct Answer. **14**

1) Output of encryption algorithm is ____.
a) Plain text b) Cipher text
c) Both a and b d) None of the above

2) Secure hash algorithm is developed by ____.
a) National Institute of Standards and Technology (NIST)
b) IEEE
c) ANSI
d) None of the above

3) ____ is the process of communicating confidential information in an unreadable format between legitimate users.
a) Cryptography b) Symmentricity
c) Asymmenticity d) All the above

4) Which are the ends does cryptography process takes place?
a) Transmitter b) Receiver
c) Channel d) Both a and b

5) Which one of the following algorithms is not used in asymmetric-key cryptography?
a) RSA algorithm
b) Diffie-Hellman algorithm
c) electronic code book algorithm
d) DS Algorithm

6) Block type cipher operates on _____ length of groups.
a) Fixed b) Constant
c) Zero d) All the above

7) In cryptography, the order of the letters in a message is rearranged by ____
a) transpositional ciphers
b) substitution ciphers
c) both transpositional ciphers and substitution ciphers
d) quadratic ciphers

8) What is data encryption standard (DES)?
a) block cipher b) stream cipher
c) bit cipher d) byte cipher

9) Cryptanalysis is used ____
a) to find some insecurity in a cryptographic scheme
b) to increase the speed
c) to encrypt the data
d) to make new ciphers

10) Cryptographic hash function takes an arbitrary block of data and returns ____.
a) fixed size bit string
b) variable size bit string
c) both fixed size bit string and variable size bit string
d) variable sized byte string

11) The sender “sign” a message as ____.
a) Encrypted signature b) Artificial Signature
c) Digital Signature d) All of the above

12) AES stands for ____.
a) Advance encryption server
b) Advance encryption standard
c) Advance encryption system
d) None of the above

13) Decryption algorithm is used to ____.
a) Encrypt input data b) Decrypt input data
c) Decrypt encrypted data d) None of the above

14) Authentication is ____.
a) Verification of data b) Verification of user’s identity
c) Both a and b d) None of above

3) Figures to the right indicates full marks.

MCQ/Objective Type Questions

Duration: 30 Minutes Marks:14

Q.1 Choose the correct option from the following: **14**

1) Under which conditions do the source transformation technique remain directly unapplicable?
a) Only in the absence of impedance in series with a voltage source
b) Only in the absence of impedance in parallel with a current source
c) Both a and b
d) None of the above

2) Superposition theorem is not applicable to network of ____.
a) Nonlinear elements b) Dependent voltage sources
c) dependent current sources d) All of the above

3) What should be done, if the dependent current and voltage sources are present in a circuit while applying 'Superposition Theorem'?
a) Replace them by open circuit
b) Replaced them by short circuit
c) Keep in their original form without replacing by either open or short circuits
d) None of the above

4) If an a.c. signal generator drives a series RLC circuit, then the circuit undergoes resonance only due to variation in ____
a) Supply voltage b) Series resistance
c) Supply frequency d) Phase angle

5) In a series RLC circuit operating below the resonant frequency the current ____.

a) I leads Vs
b) I lags behind Vs
c) I is in phase with Vs
d) none

6) How is the short circuit reverse transfer admittance (y_{12}) calculated in terms of current and voltage ratio?

a) V_2/ I_1 (keeping $I_2 = 0$)
b) I_2/ V_1 (keeping $V_2 = 0$)
c) I_1/ V_2 (keeping $V_1 = 0$)
d) V_1/ I_2 (keeping $I_1 = 0$)

7) Which among the following is regarded as short circuit forward transfer admittance?

a) y11
b) y12
c) y21
d) y22

8) In a steady state, inductors and capacitors are respectively replaced by ____ circuit and ____ circuit.

a) short, open
b) open, short
c) short, short
d) open, open

9) When a series RC circuit is connected to a constant voltage at t=0, the current passing through the circuit is at t=0+ is ____.

a) Infinite
b) Zero
c) V/R
d) $V/\omega C$

10) The function is said to be having simple poles and zeros and only if ____.

a) the poles are not repeated
b) the zeros are not repeated
c) both poles and zeros are not repeated
d) None

11) Which among the following belong/s to the category of critical frequency?

a) Poles
b) Zeros
c) Both a and b
d) None of the above

12) In the m-derived high pass filters the resonant frequency is to be chosen so that it is ____.

a) above the cut off frequency
b) below the cut off frequency
c) between the cut off frequency
d) None

13) An ideal filter should have ____.

a) zero attenuation in the pass band
b) infinite attenuation in the pass band
c) zero attenuation in the attenuation band
d) infinite attenuation in the attenuation band

14) Transients are present in the circuit when the circuit is having ____.

a) C
b) L
c) R
d) Either L or C

Section – I

Q.2 Attempt the following questions: (Any Four) **16**

a) Determine Thevenin's equivalent circuit with reference to terminal ab for circuit shown in figure-2(a)

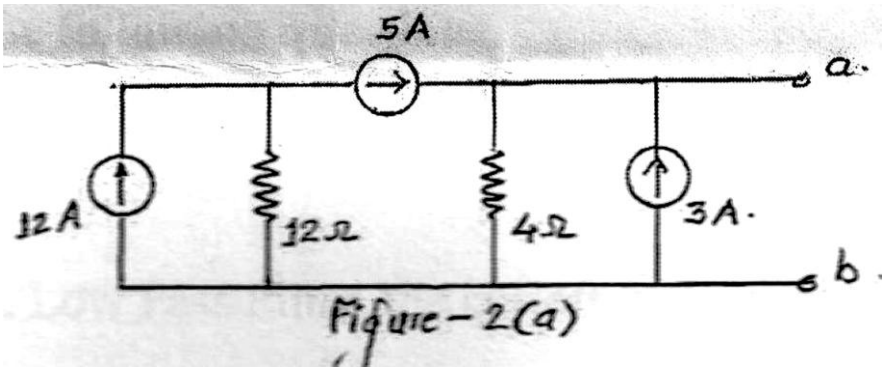

Figure – 2(a)

b) Determine load resistance to receive maximum power from source. Also find the maximum power delivered to the load in the circuit shown in figure 2(b)

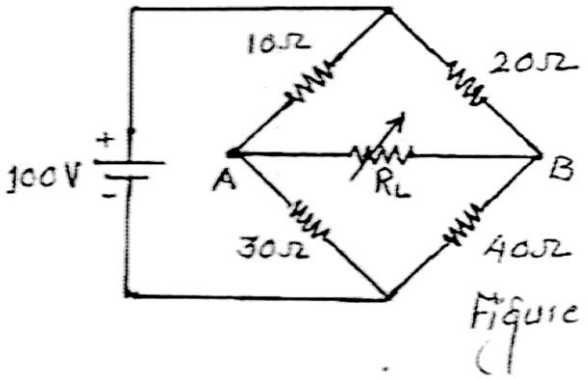

Figure – 2(b).

c) A series RLC circuit consists of R=4 Ω, L=0.5H & variable capacitance in series across a 100V, 50Hz.Calculate,
i) The capacitance to give resonance,
ii) The voltage across capacitor

d) Derive h-parameter equations for two-port network in terms of voltages & currents & give its electrical equivalent circuit.

e) Explain cascade connection of two-port networks.

Q.3 Answer the following: (Any Two) **12**

a) Replace given network shown in figure 3(a) by a single current source in parallel with a resistance.

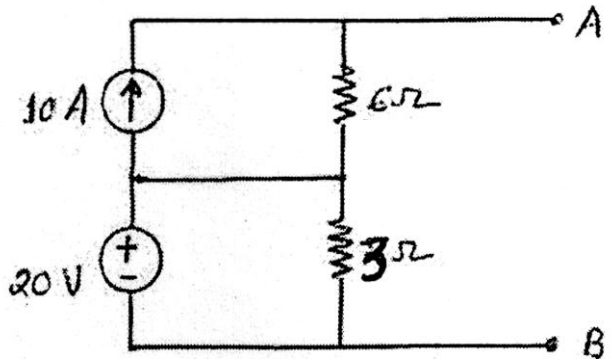

Figure – 3(a)

b) Prove that for an RLC series circuit the resonant frequency is geometric mean of upper & lower half power frequencies.

$\omega o = \sqrt{\omega_1\ \omega_2}$

c) Find the ABCD- parameters for the given π network shown in figure 3(c). Is this network bilateral or not?

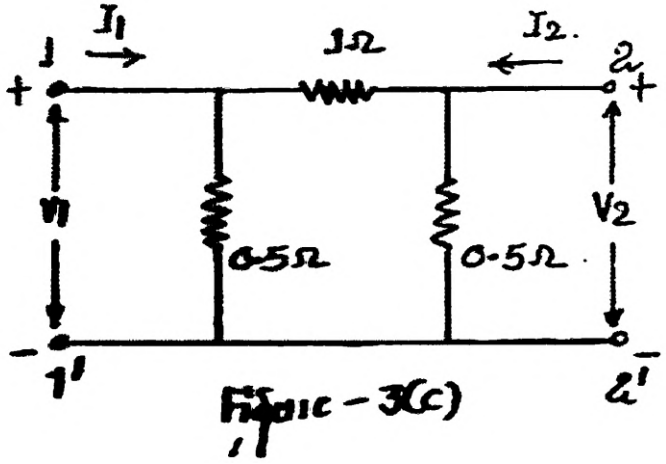

Figure – 3(c)

Section – II

Q.4 Answer the following: (Any Four) **16**

a) Design a T pad attenuator to give an attenuation of 60dB and to work in a line of impedance 500Ω.

b) Prove for Constant-K Low Pass Filter, the cut-off frequency is fc $= \frac{1}{\pi\sqrt{LC}}$

c) Draw T and π sections for m-derived LPF. State the design equations.

d) Draw pole zero plot for given function. Comment on stability of given system from pole zero plot.

$$H(s) = \frac{20(s+1)(s+5)}{s(s^2+2s+2)(s+7)}$$

e) Explain transient response of series RC circuit.

Q.5 Answer the following: (Any Two) **12**

a) Find current i(t) for t > 0 for the circuit shown in figure-5(a)

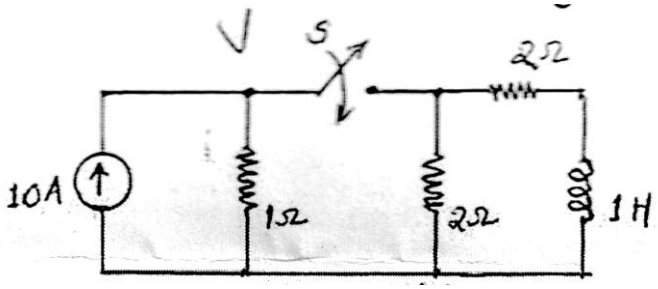

Figure – 5(a)

b) Define poles and zeros of network function. Explain the significance of poles and zeros with suitable examples.

c) Design m-derived LPF both T and π sections with cut-off frequency of 1 KHz, design impedance of 400 Ω and resonant frequency of 1100 Hz.
