F.Y. (B.Tech.) (Semester - I) (New) (NEP CBCS) Examination: March/April - 2025
Engineering Mathematics – I (BTCE0103) /(BTCSE0103)/ (BTETE0103)/ (BTEE0103)/ (BTME0103)/(BTECE0103)

Day & Date: Saturday 17-05-2025 Max. Marks: 70
Time: 10:00 AM To 01:00 PM

Instructions: 1) Q. No. 1 is compulsory. It should be solved in the first 30 minutes in Answer Book Page no 03 (Starting page of the Answer Book). Each question carries one mark.
2) Don't forget to Mention question paper set (P/Q/R/S) on top of page.
3) Figures to the right indicates full marks.
4) Use of non-programable calculator is allowed.

MCQ/Objective Type Questions

Duration: 30 Minutes Marks:14

Q.1 Choose the Correct Alternatives. **14**

1) If $L = \lim_{x\to\infty} x^2 e^{-x}$ then $L =$ _____.

a) 0 b) 1
c) 2 d) -2

2) If $y = cos^2 x$ then $y_n =$ _____.

a) $-2^{n-1}\cos\left(2x+\frac{n\pi}{2}\right)$ b) $2^{n-1}\cos\left(2x+\frac{n\pi}{2}\right)$
c) $2^{n-1}\sin\left(2x+\frac{n\pi}{2}\right)$ d) $2^{n+1}\sin\left(\frac{n\pi}{2}\right)$

3) If $y = (2x-5)^n$ then $y_n =$ _____.

a) 0 b) $2^n n!$
c) 2^n d) $2^n(n-1)!$

4) If $y = \log(3x-7)$ then $y_n =$ _____.

a) $\frac{(-1)^n(n)!}{(3x-7)^n}$ b) $\frac{(-1)^n(n-1)!}{(3x-7)^n}$
c) $\frac{(-1)^{n-1}(n)!}{(3x-7)^{n+1}}$ d) $\frac{(-1)^{n-1}(n-1)!\,3^n}{(3x-7)^n}$

5) The expansion of $f(x)$ in powers of $(x-a)$ is _____.

a) $f(a)+(x-a)f'(a)+\frac{(x-a)^2}{2!}f''(a)+\cdots$

b) $f(-a)+(x-a)f'(-a)+\frac{(x-a)^2}{2!}f''(-a)+\cdots$

c) $f(x)+(x-a)f'(x)+\frac{(x-a)^2}{2!}f''(x)+\cdots$

d) $f(x)-af'(x)+\frac{a^2}{2!}f''(x)-\cdots$

____

6) If $2,-2,3$ are eigen values of matrix A, then eigen values of A^{-1} are _____.

a) $2,-2,3$

b) $\frac{-1}{2},\frac{-1}{2},\frac{1}{3}$

c) $\frac{-1}{2},\frac{1}{2},\frac{-1}{3}$

d) $\frac{1}{2},\frac{-1}{2},\frac{1}{3}$

7) If $0,2,7$ are are eigen values and $1,3,K$ are diagonal elements of matrix $[A]_{3\times3}$, then the value of K equals _____.

a) 0

b) 1

c) 2

d) 6

8) $\nabla\cdot\bar{r}=?$

a) $i+j+k$

b) 0

c) 3

d) $\sqrt{3}$

9) If $\bar{a}$ is constant vector and $\bar{r}=xi+yj+zk$ then grad $(\bar{a}\cdot\bar{r})=$ _____.

a) $2\bar{a}$

b) $\bar{a}$

c) $\bar{r}$

d) $2\bar{r}$

10) Directional derivative is maximum along _____.

a) Any unit vector

b) Co-ordinate axes

c) Tangent to the surface

d) Normal to the surface

11) If $z=\tan^{-1}\left(\frac{y}{x}\right)$ then the value of $\frac{\partial z}{\partial y}$ = _____.

a) $\frac{x}{x^2+y^2}$

b) $\frac{x}{\sqrt{x^2-y^2}}$

c) $\frac{y}{x^2+y^2}$

d) $-\frac{x}{x^2+y^2}$

12) If $u=xy, v=x+y$ then the value of $J\left(\frac{u,v}{x,y}\right)=$ _____.

a) $x-y$

b) $x+y$

c) 1

d) 0

13) If $z = f(x, y)$, then the error δz in z is _____.

a) $\frac{\partial z}{\partial x}dx + \frac{\partial z}{\partial y}dy$

b) $\frac{\partial z}{\partial x}dx - \frac{\partial z}{\partial y}dy$

c) $\frac{\partial z}{\partial x}\delta x - \frac{\partial z}{\partial y}\delta y$

d) $\frac{\partial z}{\partial x}\delta x + \frac{\partial z}{\partial y}\delta y$

14) If $f(x, y) = 0$ then $\frac{dy}{dx} =$ _____.

a) $\frac{f_x}{f_y}$

b) $-\frac{f_x}{f_y}$

c) $\frac{f_y}{f_x}$

d) $-\frac{f_y}{f_x}$

F.Y. (B.Tech.) (Semester - I) (New) (NEP CBCS) Examination: March/April – 2025
Engineering Mathematics – I (BTCE0103) /(BTCSE0103)/ (BTETE0103)/ (BTEE0103)/ (BTME0103)/(BTECE0103)

Day & Date: Saturday 17-05-2025 Max. Marks: 56
Time: 10:00 AM To 01:00 PM

Instructions: 1) All questions are compulsory.
2) Figures to the right indicate full marks.
3) Use of non-programmable calculator is allowed.

Section – I

Q.2 Attempt any THREE questions from the following. **09**

a) Find the rank of the matrix by reducing it to Normal form
$\begin{pmatrix} 8 & 1 & 3 & 6 \\ 0 & 3 & 2 & 2 \\ -8 & -1 & -3 & 4 \end{pmatrix}$

b) Find the nth derivative of $y = \sin x \cos 3x$

c) Investigate for what value of a and b the equations $x + 2y + 3z = 4, x + 3y + 4z = 5, x + 3y + az = b$ will have
i) no solution,
ii) infinite solutions
iii) Unique solution

d) Expand $2x^3 + 3x^2 - 8x + 7$ in powers of $(x - 2)$.

e) Expand $e^x \sin x$ in powers of x up to x^3.

Q.3 Attempt any THREE questions from the following. **09**

a) Verify Cayley Hamilton theorem for A where $A = \begin{pmatrix} 1 & 2 & 3 \\ 3 & 1 & 1 \\ 0 & 1 & 2 \end{pmatrix}$

b) Find the nth derivative of $y = \frac{x^3}{x^2-1}$

c) Prove that $\cos^{-1}\left(\frac{x-x^{-1}}{x+x^{-1}}\right) = \pi - 2\left[x - \frac{x^3}{3} + \frac{x^5}{5} - \frac{x^7}{7} + \cdots\right]$

d) Find the nth derivative of $y = e^x . x^2 . \sin x$

e) Examine the vector for Linear Dependance and Independence $[1, 1, 1], [1, 2, 3], [2, 3, 8]$

Q.4 Attempt any TWO questions from the following. **10**

a) Find the Eigen Values and Eigen Vector for the largest Eigen Value for $A = \begin{pmatrix} 3 & -1 & 1 \\ -1 & 5 & -1 \\ 1 & -1 & 3 \end{pmatrix}$

b) Find the values of a, b, c such that $\lim_{x\to 0} \frac{ae^x - be^{-x} + cx}{x - \sin x} = 4$

c) If $y = \sin(m \sin^{-1} x)$ then prove that $(1 - x^2)y_{n+2} - (2n + 1)xy_{n+1} + (m^2 - n^2)y_n = 0$

Section – II

Q.5 Attempt any THREE questions from the following. **09**

a) Find magnitude of velocity and acceleration of a particle which moves along the curve $x = t^3 + 2t, y = -3e^{-t}, z = 2 \sin 5t$ at $t = 0$.

b) Find the directional derivative of $\emptyset = x^2 y \cos z$ at $(1, 2, \pi/2)$ in the direction of $2i + 3j + 2k$

c) If $u = e^{xyz}$ find $\frac{\partial^3 u}{\partial x \partial y \partial z}$

d) If $z = f(x, y), x = u + v, y = uv$, prove that $\frac{\partial^2 z}{\partial x^2} - y\frac{\partial^2 z}{\partial y^2} = \frac{1}{u - v}\left(u\frac{\partial^2 z}{\partial u^2} - v\frac{\partial^2 z}{\partial v^2}\right)$

e) Find the percentage error in s where $s = kp^{\frac{1}{2}}v^2$ if the percentage errors in p and v are respectively 2 and 1.5.

Q.6 Attempt any THREE questions from the following. **09**

a) If $u = F(e^{x-y}, e^{y-z}, e^{z-x})$ prove that $u_x + u_y + u_z = 0$

b) If $x = a \cosh u \cos v, y = a \sinh u \sin v$ find $\frac{\partial(x,y)}{\partial(u,v)}$ (Note: Derivative of $\cosh x$ is $\sinh x$, derivative of $\sinh x$ is $\cosh x$ w.r.t. x)

c) Find the angle between the normal to the surfaces $x^2 y + z = 3$ and $x \log z - y^2 + 4 = 0$ at $(-1,2,1)$

d) A particle moves along the curve $\bar{r} = (t^3 - 4t)i + (t^2 + 4t)j + (8t^2 - 3t^2)k$ where t denotes time. Show that the magnitudes of acceleration along the tangent and normal at $t = 2$ are 16 and $2\sqrt{73}$ respectively.

e) Prove that $\nabla \frac{1}{r^3} = \frac{-3\vec{r}}{r^5}$

Q.7 Attempt any TWO questions from the following. **10**

a) Prove that $\bar{F} = (x^2 - yz)i + (y^2 - zx)j + (z^2 - xy)k$ is irrotational. Find the function $\emptyset$ such that $\bar{F} = \nabla\emptyset$

b) Find the stationary value of $x^3 + 3xy^2 - 15x^2 - 15y^2 + 72x$

c) If $u = \sin^{-1}\left(\frac{x+y}{\sqrt{x}+\sqrt{y}}\right)$

Prove that

i) $x\frac{\partial u}{\partial x} + y\frac{\partial u}{\partial y} = \frac{1}{2}\tan u$

ii) $x^2\frac{\partial^2 u}{\partial x^2} + 2xy\frac{\partial^2 u}{\partial x \partial y} + y^2\frac{\partial^2 u}{\partial y^2} = \frac{1}{4}(\tan^3 u - \tan u)$

F.Y. (B.Tech.) (Semester - I) (New) (NEP CBCS) Examination: March/April – 2025
Engineering Mathematics – I (BTCE0103) /(BTCSE0103)/ (BTETE0103)/ (BTEE0103)/ (BTME0103)/(BTECE0103)

Day & Date: Saturday 17-05-2025 Max. Marks: 70
Time: 10:00 AM To 01:00 PM

Instructions: 1) Q. No. 1 is compulsory. It should be solved in the first 30 minutes in Answer Book Page no 03 (Starting page of the Answer Book). Each question carries one mark.
2) Don't forget to Mention question paper set (P/Q/R/S) on top of page.
3) Figures to the right indicates full marks.
4) Use of non-programable calculator is allowed.

MCQ/Objective Type Questions

Duration: 30 Minutes Marks:14

Q.1 Choose the Correct Alternatives. 14

1) $\nabla \cdot \bar{r} = ?$

a) $i + j + k$ b) 0
c) 3 d) $\sqrt{3}$

2) If $\bar{a}$ is constant vector and $\bar{r} = xi + yj + zk$ then grad $(\bar{a} \cdot \bar{r}) =$ _____.

a) $2\bar{a}$ b) $\bar{a}$
c) $\bar{r}$ d) $2\bar{r}$

3) Directional derivative is maximum along _____.

a) Any unit vector b) Co-ordinate axes
c) Tangent to the surface d) Normal to the surface

4) If $z = \tan^{-1}\left(\frac{y}{x}\right)$ then the value of $\frac{\partial z}{\partial y}$ = _____.

a) $\frac{x}{x^2 + y^2}$ b) $\frac{x}{\sqrt{x^2 - y^2}}$
c) $\frac{y}{x^2 + y^2}$ d) $-\frac{x}{x^2 + y^2}$

5) If $u = xy, v = x + y$ then the value of $J\left(\frac{u,v}{x,y}\right) =$ _____.

a) $x - y$ b) $x + y$
c) 1 d) 0

6) If $z = f(x, y)$, then the error δz in z is _____.

a) $\frac{\partial z}{\partial x}dx + \frac{\partial z}{\partial y}dy$ b) $\frac{\partial z}{\partial x}dx - \frac{\partial z}{\partial y}dy$

c) $\frac{\partial z}{\partial x}\delta x - \frac{\partial z}{\partial y}\delta y$ d) $\frac{\partial z}{\partial x}\delta x + \frac{\partial z}{\partial y}\delta y$

7) If $f(x, y) = 0$ then $\frac{dy}{dx} =$ _____.

a) $\frac{f_x}{f_y}$ b) $-\frac{f_x}{f_y}$

c) $\frac{f_y}{f_x}$ d) $-\frac{f_y}{f_x}$

8) If $L = \lim_{x\to\infty} x^2 e^{-x}$ then $L =$ _____.

a) 0 b) 1

c) 2 d) -2

9) If $y = cos^2 x$ then $y_n =$ _____.

a) $-2^{n-1}\cos\left(2x + \frac{n\pi}{2}\right)$ b) $2^{n-1}\cos\left(2x + \frac{n\pi}{2}\right)$

c) $2^{n-1}\sin\left(2x + \frac{n\pi}{2}\right)$ d) $2^{n+1}\sin\left(\frac{n\pi}{2}\right)$

10) If $y = (2x - 5)^n$ then $y_n =$ _____.

a) 0 b) $2^n n!$

c) 2^n d) $2^n(n-1)!$

11) If $y = \log(3x - 7)$ then $y_n =$ _____.

a) $\frac{(-1)^n(n)!}{(3x-7)^n}$ b) $\frac{(-1)^n(n-1)!}{(3x-7)^n}$

c) $\frac{(-1)^{n-1}(n)!}{(3x-7)^{n+1}}$ d) $\frac{(-1)^{n-1}(n-1)!\,3^n}{(3x-7)^n}$

12) The expansion of $f(x)$ in powers of $(x - a)$ is _____.

a) $f(a) + (x-a)f'(a) + \frac{(x-a)^2}{2!}f''(a) + \cdots$

b) $f(-a) + (x-a)f'(-a) + \frac{(x-a)^2}{2!}f''(-a) + \cdots$

c) $f(x) + (x-a)f'(x) + \frac{(x-a)^2}{2!}f''(x) + \cdots$

d) $f(x) - af'(x) + \frac{a^2}{2!}f''(x) - \cdots$

___

13) If $2, -2, 3$ are eigen values of matrix A, then eigen values of A^{-1} are _____.

a) $2, -2, 3$

b) $\frac{-1}{2}, \frac{-1}{2}, \frac{1}{3}$

c) $\frac{-1}{2}, \frac{1}{2}, \frac{-1}{3}$

d) $\frac{1}{2}, \frac{-1}{2}, \frac{1}{3}$

14) If $0, 2, 7$ are are eigen values and $1, 3, K$ are diagonal elements of matrix $[A]_{3\times3}$, then the value of K equals _____.

a) 0

b) 1

c) 2

d) 6

Q.2 Attempt any THREE questions from the following. **09**

a) Find the rank of the matrix by reducing it to Normal form
$\begin{pmatrix} 8 & 1 & 3 & 6 \\ 0 & 3 & 2 & 2 \\ -8 & -1 & -3 & 4 \end{pmatrix}$

b) Find the nth derivative of $y = \sin x \cos 3x$

c) Investigate for what value of a and b the equations $x + 2y + 3z = 4, x + 3y + 4z = 5, x + 3y + az = b$ will have
i) no solution,
ii) infinite solutions
iii) Unique solution

d) Expand $2x^3 + 3x^2 - 8x + 7$ in powers of $(x - 2)$.

e) Expand $e^x \sin x$ in powers of x up to x^3.

Q.3 Attempt any THREE questions from the following. **09**

a) Verify Cayley Hamilton theorem for A where $A = \begin{pmatrix} 1 & 2 & 3 \\ 3 & 1 & 1 \\ 0 & 1 & 2 \end{pmatrix}$

b) Find the nth derivative of $y = \frac{x^3}{x^2-1}$

c) Prove that $\cos^{-1}\left(\frac{x-x^{-1}}{x+x^{-1}}\right) = \pi - 2\left[x - \frac{x^3}{3} + \frac{x^5}{5} - \frac{x^7}{7} + \cdots\right]$

d) Find the nth derivative of $y = e^x . x^2 . \sin x$

e) Examine the vector for Linear Dependance and Independence $[1, 1, 1], [1, 2, 3], [2, 3, 8]$

Q.4 Attempt any TWO questions from the following. **10**

a) Find the Eigen Values and Eigen Vector for the largest Eigen Value for $A = \begin{pmatrix} 3 & -1 & 1 \\ -1 & 5 & -1 \\ 1 & -1 & 3 \end{pmatrix}$

b) Find the values of a, b, c such that $\lim_{x \to 0} \frac{ae^x - be^{-x} + cx}{x - \sin x} = 4$

c) If $y = \sin(m \sin^{-1} x)$ then prove that $(1 - x^2)y_{n+2} - (2n + 1)xy_{n+1} + (m^2 - n^2)y_n = 0$

Section – II

Q.5 Attempt any THREE questions from the following. **09**

a) Find magnitude of velocity and acceleration of a particle which moves along the curve $x = t^3 + 2t, y = -3e^{-t}, z = 2 \sin 5t$ at $t = 0$.

b) Find the directional derivative of $\emptyset = x^2 y \cos z$ at $(1, 2, \pi/2)$ in the direction of $2i + 3j + 2k$

c) If $u = e^{xyz}$ find $\frac{\partial^3 u}{\partial x \partial y \partial z}$

d) If $z = f(x, y), x = u + v, y = uv$, prove that $\frac{\partial^2 z}{\partial x^2} - y\frac{\partial^2 z}{\partial y^2} = \frac{1}{u - v}\left(u\frac{\partial^2 z}{\partial u^2} - v\frac{\partial^2 z}{\partial v^2}\right)$

e) Find the percentage error in s where $s = kp^{\frac{1}{2}}v^2$ if the percentage errors in p and v are respectively 2 and 1.5.

Q.6 Attempt any THREE questions from the following. **09**

a) If $u = F(e^{x-y}, e^{y-z}, e^{z-x})$ prove that $u_x + u_y + u_z = 0$

b) If $x = a \cosh u \cos v, y = a \sinh u \sin v$ find $\frac{\partial(x,y)}{\partial(u,v)}$ (Note: Derivative of $\cosh x$ is $\sinh x$, derivative of $\sinh x$ is $\cosh x$ w.r.t. x)

c) Find the angle between the normal to the surfaces $x^2 y + z = 3$ and $x \log z - y^2 + 4 = 0$ at $(-1,2,1)$

d) A particle moves along the curve $\bar{r} = (t^3 - 4t)i + (t^2 + 4t)j + (8t^2 - 3t^2)k$ where t denotes time. Show that the magnitudes of acceleration along the tangent and normal at $t = 2$ are 16 and $2\sqrt{73}$ respectively.

e) Prove that $\nabla \frac{1}{r^3} = \frac{-3\vec{r}}{r^5}$

Q.7 Attempt any TWO questions from the following. **10**

a) Prove that $\bar{F} = (x^2 - yz)i + (y^2 - zx)j + (z^2 - xy)k$ is irrotational. Find the function $\emptyset$ such that $\bar{F} = \nabla\emptyset$

b) Find the stationary value of $x^3 + 3xy^2 - 15x^2 - 15y^2 + 72x$

c) If $u = \sin^{-1}\left(\frac{x+y}{\sqrt{x}+\sqrt{y}}\right)$

Prove that

i) $x\frac{\partial u}{\partial x} + y\frac{\partial u}{\partial y} = \frac{1}{2}\tan u$

ii) $x^2\frac{\partial^2 u}{\partial x^2} + 2xy\frac{\partial^2 u}{\partial x \partial y} + y^2\frac{\partial^2 u}{\partial y^2} = \frac{1}{4}(\tan^3 u - \tan u)$

MCQ/Objective Type Questions

Duration: 30 Minutes Marks:14

Q.1 Choose the Correct Alternatives. **14**

1) If $z = \tan^{-1}\left(\frac{y}{x}\right)$ then the value of $\frac{\partial z}{\partial y}$ = _____.

a) $\frac{x}{x^2+y^2}$ b) $\frac{x}{\sqrt{x^2-y^2}}$

c) $\frac{y}{x^2+y^2}$ d) $-\frac{x}{x^2+y^2}$

2) If $u = xy, v = x + y$ then the value of $J\left(\frac{u,v}{x,y}\right) =$ _____.

a) $x - y$ b) $x + y$

c) 1 d) 0

3) If $z = f(x, y)$, then the error δz in z is _____.

a) $\frac{\partial z}{\partial x}dx + \frac{\partial z}{\partial y}dy$ b) $\frac{\partial z}{\partial x}dx - \frac{\partial z}{\partial y}dy$

c) $\frac{\partial z}{\partial x}\delta x - \frac{\partial z}{\partial y}\delta y$ d) $\frac{\partial z}{\partial x}\delta x + \frac{\partial z}{\partial y}\delta y$

4) If $f(x, y) = 0$ then $\frac{dy}{dx} =$ _____.

a) $\frac{f_x}{f_y}$ b) $-\frac{f_x}{f_y}$

c) $\frac{f_y}{f_x}$ d) $-\frac{f_y}{f_x}$

5) If $L = \lim_{x\to\infty} x^2 e^{-x}$ then $L =$ _____.

a) 0 b) 1

c) 2 d) -2

6) If $y = cos^2 x$ then $y_n =$ _____.

a) $-2^{n-1}\cos\left(2x + \frac{n\pi}{2}\right)$ b) $2^{n-1}\cos\left(2x + \frac{n\pi}{2}\right)$

c) $2^{n-1}\sin\left(2x + \frac{n\pi}{2}\right)$ d) $2^{n+1}\sin\left(\frac{n\pi}{2}\right)$

7) If $y = (2x-5)^n$ then $y_n =$ _____.

a) 0 b) $2^n n!$

c) 2^n d) $2^n(n-1)!$

8) If $y = \log(3x-7)$ then $y_n =$ _____.

a) $\frac{(-1)^n(n)!}{(3x-7)^n}$ b) $\frac{(-1)^n(n-1)!}{(3x-7)^n}$

c) $\frac{(-1)^{n-1}(n)!}{(3x-7)^{n+1}}$ d) $\frac{(-1)^{n-1}(n-1)!\,3^n}{(3x-7)^n}$

9) The expansion of $f(x)$ in powers of $(x-a)$ is _____.

a) $f(a) + (x-a)f'(a) + \frac{(x-a)^2}{2!}f''(a) + \cdots$

b) $f(-a) + (x-a)f'(-a) + \frac{(x-a)^2}{2!}f''(-a) + \cdots$

c) $f(x) + (x-a)f'(x) + \frac{(x-a)^2}{2!}f''(x) + \cdots$

d) $f(x) - af'(x) + \frac{a^2}{2!}f''(x) - \cdots$

10) If $2, -2, 3$ are eigen values of matrix A, then eigen values of A^{-1} are _____.

a) $2, -2, 3$ b) $\frac{-1}{2}, \frac{-1}{2}, \frac{1}{3}$

c) $\frac{-1}{2}, \frac{1}{2}, \frac{-1}{3}$ d) $\frac{1}{2}, \frac{-1}{2}, \frac{1}{3}$

11) If $0, 2, 7$ are are eigen values and $1, 3, K$ are diagonal elements of matrix $[A]_{3\times3}$, then the value of K equals _____.

a) 0 b) 1

c) 2 d) 6

12) $\nabla \cdot \bar{r} =?$

a) $i + j + k$ b) 0

c) 3 d) $\sqrt{3}$

13) If $\bar{a}$ is constant vector and $\bar{r} = xi + yj + zk$ then grad $(\bar{a} \cdot \bar{r}) =$ _____.

a) $2\bar{a}$ b) $\bar{a}$

c) $\bar{r}$ d) $2\bar{r}$

14) Directional derivative is maximum along _____.

a) Any unit vector b) Co-ordinate axes

c) Tangent to the surface d) Normal to the surface

F.Y. (B.Tech.) (Semester - I) (New) (NEP CBCS) Examination: March/April – 2025
Engineering Mathematics – I (BTCE0103) /(BTCSE0103)/ (BTETE0103)/ (BTEE0103)/ (BTME0103)/(BTECE0103)

Day & Date: Saturday 17-05-2025 Max. Marks: 56
Time: 10:00 AM To 01:00 PM

Instructions: 1) All questions are compulsory.
2) Figures to the right indicate full marks.
3) Use of non-programmable calculator is allowed.

Section – I

Q.2 Attempt any THREE questions from the following. **09**

a) Find the rank of the matrix by reducing it to Normal form
$\begin{pmatrix} 8 & 1 & 3 & 6 \\ 0 & 3 & 2 & 2 \\ -8 & -1 & -3 & 4 \end{pmatrix}$

b) Find the nth derivative of $y = \sin x \cos 3x$

c) Investigate for what value of a and b the equations $x + 2y + 3z = 4, x + 3y + 4z = 5, x + 3y + az = b$ will have
i) no solution,
ii) infinite solutions
iii) Unique solution

d) Expand $2x^3 + 3x^2 - 8x + 7$ in powers of $(x - 2)$.

e) Expand $e^x \sin x$ in powers of x up to x^3.

Q.3 Attempt any THREE questions from the following. **09**

a) Verify Cayley Hamilton theorem for A where $A = \begin{pmatrix} 1 & 2 & 3 \\ 3 & 1 & 1 \\ 0 & 1 & 2 \end{pmatrix}$

b) Find the nth derivative of $y = \frac{x^3}{x^2-1}$

c) Prove that $\cos^{-1}\left(\frac{x-x^{-1}}{x+x^{-1}}\right) = \pi - 2\left[x - \frac{x^3}{3} + \frac{x^5}{5} - \frac{x^7}{7} + \cdots\right]$

d) Find the nth derivative of $y = e^x . x^2 . \sin x$

e) Examine the vector for Linear Dependance and Independence $[1, 1, 1], [1, 2, 3], [2, 3, 8]$

Q.4 Attempt any TWO questions from the following. **10**

a) Find the Eigen Values and Eigen Vector for the largest Eigen Value for $A = \begin{pmatrix} 3 & -1 & 1 \\ -1 & 5 & -1 \\ 1 & -1 & 3 \end{pmatrix}$

b) Find the values of a, b, c such that $\lim_{x\to 0} \frac{ae^x - be^{-x} + cx}{x - \sin x} = 4$

c) If $y = \sin(m \sin^{-1} x)$ then prove that $(1 - x^2)y_{n+2} - (2n + 1)xy_{n+1} + (m^2 - n^2)y_n = 0$

Section – II

Q.5 Attempt any THREE questions from the following. **09**

a) Find magnitude of velocity and acceleration of a particle which moves along the curve $x = t^3 + 2t, y = -3e^{-t}, z = 2 \sin 5t$ at $t = 0$.

b) Find the directional derivative of $\emptyset = x^2 y \cos z$ at $(1, 2, \pi/2)$ in the direction of $2i + 3j + 2k$

c) If $u = e^{xyz}$ find $\frac{\partial^3 u}{\partial x \partial y \partial z}$

d) If $z = f(x, y), x = u + v, y = uv$, prove that $\frac{\partial^2 z}{\partial x^2} - y\frac{\partial^2 z}{\partial y^2} = \frac{1}{u - v}\left(u\frac{\partial^2 z}{\partial u^2} - v\frac{\partial^2 z}{\partial v^2}\right)$

e) Find the percentage error in s where $s = kp^{\frac{1}{2}}v^2$ if the percentage errors in p and v are respectively 2 and 1.5.

Q.6 Attempt any THREE questions from the following. **09**

a) If $u = F(e^{x-y}, e^{y-z}, e^{z-x})$ prove that $u_x + u_y + u_z = 0$

b) If $x = a \cosh u \cos v, y = a \sinh u \sin v$ find $\frac{\partial(x,y)}{\partial(u,v)}$ (Note: Derivative of $\cosh x$ is $\sinh x$, derivative of $\sinh x$ is $\cosh x$ w.r.t. x)

c) Find the angle between the normal to the surfaces $x^2 y + z = 3$ and $x \log z - y^2 + 4 = 0$ at $(-1,2,1)$

d) A particle moves along the curve $\bar{r} = (t^3 - 4t)i + (t^2 + 4t)j + (8t^2 - 3t^2)k$ where t denotes time. Show that the magnitudes of acceleration along the tangent and normal at $t = 2$ are 16 and $2\sqrt{73}$ respectively.

e) Prove that $\nabla \frac{1}{r^3} = \frac{-3\vec{r}}{r^5}$

Q.7 Attempt any TWO questions from the following. **10**

a) Prove that $\bar{F} = (x^2 - yz)i + (y^2 - zx)j + (z^2 - xy)k$ is irrotational. Find the function $\emptyset$ such that $\bar{F} = \nabla\emptyset$

b) Find the stationary value of $x^3 + 3xy^2 - 15x^2 - 15y^2 + 72x$

c) If $u = \sin^{-1}\left(\frac{x+y}{\sqrt{x}+\sqrt{y}}\right)$

Prove that

i) $x\frac{\partial u}{\partial x} + y\frac{\partial u}{\partial y} = \frac{1}{2}\tan u$

ii) $x^2\frac{\partial^2 u}{\partial x^2} + 2xy\frac{\partial^2 u}{\partial x \partial y} + y^2\frac{\partial^2 u}{\partial y^2} = \frac{1}{4}(\tan^3 u - \tan u)$

F.Y. (B.Tech.) (Semester - I) (New) (NEP CBCS) Examination: March/April – 2025
Engineering Mathematics – I (BTCE0103) /(BTCSE0103)/ (BTETE0103)/ (BTEE0103)/ (BTME0103)/(BTECE0103)

Day & Date: Saturday 17-05-2025 Max. Marks: 70
Time: 10:00 AM To 01:00 PM

Instructions: 1) Q. No. 1 is compulsory. It should be solved in the first 30 minutes in Answer Book Page no 03 (Starting page of the Answer Book). Each question carries one mark.
2) Don't forget to Mention question paper set (P/Q/R/S) on top of page.
3) Figures to the right indicates full marks.
4) Use of non-programable calculator is allowed.

MCQ/Objective Type Questions

Duration: 30 Minutes Marks:14

Q.1 Choose the Correct Alternatives. **14**

1) If $2, -2, 3$ are eigen values of matrix A, then eigen values of A^{-1} are _____.

a) $2, -2, 3$ b) $\frac{-1}{2}, \frac{-1}{2}, \frac{1}{3}$

c) $\frac{-1}{2}, \frac{1}{2}, \frac{-1}{3}$ d) $\frac{1}{2}, \frac{-1}{2}, \frac{1}{3}$

2) If $0, 2, 7$ are are eigen values and $1, 3, K$ are diagonal elements of matrix $[A]_{3\times3}$, then the value of K equals _____.

a) 0 b) 1
c) 2 d) 6

3) $\nabla \cdot \bar{r} = ?$

a) $i + j + k$ b) 0
c) 3 d) $\sqrt{3}$

4) If $\bar{a}$ is constant vector and $\bar{r} = xi + yj + zk$ then grad $(\bar{a} \cdot \bar{r}) =$ _____.

a) $2\bar{a}$ b) $\bar{a}$
c) $\bar{r}$ d) $2\bar{r}$

5) Directional derivative is maximum along _____.

a) Any unit vector b) Co-ordinate axes
c) Tangent to the surface d) Normal to the surface

6) If $z = \tan^{-1}\left(\frac{y}{x}\right)$ then the value of $\frac{\partial z}{\partial y}$ = _____.

a) $\frac{x}{x^2+y^2}$ b) $\frac{x}{\sqrt{x^2-y^2}}$

c) $\frac{y}{x^2+y^2}$ d) $-\frac{x}{x^2+y^2}$

7) If $u = xy, v = x + y$ then the value of $J\left(\frac{u,v}{x,y}\right) =$ _____.

a) $x - y$ b) $x + y$

c) 1 d) 0

8) If $z = f(x, y)$, then the error δz in z is _____.

a) $\frac{\partial z}{\partial x}dx + \frac{\partial z}{\partial y}dy$ b) $\frac{\partial z}{\partial x}dx - \frac{\partial z}{\partial y}dy$

c) $\frac{\partial z}{\partial x}\delta x - \frac{\partial z}{\partial y}\delta y$ d) $\frac{\partial z}{\partial x}\delta x + \frac{\partial z}{\partial y}\delta y$

9) If $f(x, y) = 0$ then $\frac{dy}{dx} =$ _____.

a) $\frac{f_x}{f_y}$ b) $-\frac{f_x}{f_y}$

c) $\frac{f_y}{f_x}$ d) $-\frac{f_y}{f_x}$

10) If $L = \lim_{x\to\infty} x^2 e^{-x}$ then $L =$ _____.

a) 0 b) 1

c) 2 d) -2

11) If $y = cos^2 x$ then $y_n =$ _____.

a) $-2^{n-1}\cos\left(2x + \frac{n\pi}{2}\right)$ b) $2^{n-1}\cos\left(2x + \frac{n\pi}{2}\right)$

c) $2^{n-1}\sin\left(2x + \frac{n\pi}{2}\right)$ d) $2^{n+1}\sin\left(\frac{n\pi}{2}\right)$

12) If $y = (2x - 5)^n$ then $y_n =$ _____.

a) 0 b) $2^n n!$

c) 2^n d) $2^n(n-1)!$

13) If $y = \log(3x - 7)$ then $y_n =$ _____.

a) $\frac{(-1)^n(n)!}{(3x-7)^n}$ b) $\frac{(-1)^n(n-1)!}{(3x-7)^n}$

c) $\frac{(-1)^{n-1}(n)!}{(3x-7)^{n+1}}$ d) $\frac{(-1)^{n-1}(n-1)!\,3^n}{(3x-7)^n}$

14) The expansion of $f(x)$ in powers of $(x-a)$ is _____.

a) $f(a)+(x-a)f'(a)+\frac{(x-a)^2}{2!}f''(a)+\cdots$

b) $f(-a)+(x-a)f'(-a)+\frac{(x-a)^2}{2!}f''(-a)+\cdots$

c) $f(x)+(x-a)f'(x)+\frac{(x-a)^2}{2!}f''(x)+\cdots$

d) $f(x)-af'(x)+\frac{a^2}{2!}f''(x)-\cdots$ ____

Q.2 Attempt any THREE questions from the following. **09**

a) Find the rank of the matrix by reducing it to Normal form
$\begin{pmatrix} 8 & 1 & 3 & 6 \\ 0 & 3 & 2 & 2 \\ -8 & -1 & -3 & 4 \end{pmatrix}$

b) Find the nth derivative of $y = \sin x \cos 3x$

c) Investigate for what value of a and b the equations $x + 2y + 3z = 4, x + 3y + 4z = 5, x + 3y + az = b$ will have
i) no solution,
ii) infinite solutions
iii) Unique solution

d) Expand $2x^3 + 3x^2 - 8x + 7$ in powers of $(x - 2)$.

e) Expand $e^x \sin x$ in powers of x up to x^3.

Q.3 Attempt any THREE questions from the following. **09**

a) Verify Cayley Hamilton theorem for A where $A = \begin{pmatrix} 1 & 2 & 3 \\ 3 & 1 & 1 \\ 0 & 1 & 2 \end{pmatrix}$

b) Find the nth derivative of $y = \frac{x^3}{x^2-1}$

c) Prove that $\cos^{-1}\left(\frac{x-x^{-1}}{x+x^{-1}}\right) = \pi - 2\left[x - \frac{x^3}{3} + \frac{x^5}{5} - \frac{x^7}{7} + \cdots\right]$

d) Find the nth derivative of $y = e^x . x^2 . \sin x$

e) Examine the vector for Linear Dependance and Independence $[1, 1, 1], [1, 2, 3], [2, 3, 8]$

Set S

Q.4 Attempt any TWO questions from the following. **10**

a) Find the Eigen Values and Eigen Vector for the largest Eigen Value for $A = \begin{pmatrix} 3 & -1 & 1 \\ -1 & 5 & -1 \\ 1 & -1 & 3 \end{pmatrix}$

b) Find the values of a, b, c such that $\lim_{x \to 0} \frac{ae^x - be^{-x} + cx}{x - \sin x} = 4$

c) If $y = \sin(m \sin^{-1} x)$ then prove that $(1 - x^2)y_{n+2} - (2n + 1)xy_{n+1} + (m^2 - n^2)y_n = 0$

Section – II

Q.5 Attempt any THREE questions from the following. **09**

a) Find magnitude of velocity and acceleration of a particle which moves along the curve $x = t^3 + 2t, y = -3e^{-t}, z = 2 \sin 5t$ at $t = 0$.

b) Find the directional derivative of $\emptyset = x^2 y \cos z$ at $(1, 2, \pi/2)$ in the direction of $2i + 3j + 2k$

c) If $u = e^{xyz}$ find $\frac{\partial^3 u}{\partial x \partial y \partial z}$

d) If $z = f(x, y), x = u + v, y = uv$, prove that $\frac{\partial^2 z}{\partial x^2} - y\frac{\partial^2 z}{\partial y^2} = \frac{1}{u - v}\left(u\frac{\partial^2 z}{\partial u^2} - v\frac{\partial^2 z}{\partial v^2}\right)$

e) Find the percentage error in s where $s = kp^{\frac{1}{2}}v^2$ if the percentage errors in p and v are respectively 2 and 1.5.

Q.6 Attempt any THREE questions from the following. **09**

a) If $u = F(e^{x-y}, e^{y-z}, e^{z-x})$ prove that $u_x + u_y + u_z = 0$

b) If $x = a \cosh u \cos v, y = a \sinh u \sin v$ find $\frac{\partial(x,y)}{\partial(u,v)}$ (Note: Derivative of $\cosh x$ is $\sinh x$, derivative of $\sinh x$ is $\cosh x$ w.r.t. x)

c) Find the angle between the normal to the surfaces $x^2 y + z = 3$ and $x \log z - y^2 + 4 = 0$ at $(-1,2,1)$

d) A particle moves along the curve $\bar{r} = (t^3 - 4t)i + (t^2 + 4t)j + (8t^2 - 3t^2)k$ where t denotes time. Show that the magnitudes of acceleration along the tangent and normal at $t = 2$ are 16 and $2\sqrt{73}$ respectively.

e) Prove that $\nabla \frac{1}{r^3} = \frac{-3\vec{r}}{r^5}$

Set S

Q.7 Attempt any TWO questions from the following. **10**

a) Prove that $\bar{F} = (x^2 - yz)i + (y^2 - zx)j + (z^2 - xy)k$ is irrotational. Find the function $\emptyset$ such that $\bar{F} = \nabla\emptyset$

b) Find the stationary value of $x^3 + 3xy^2 - 15x^2 - 15y^2 + 72x$

c) If $u = \sin^{-1}\left(\frac{x+y}{\sqrt{x}+\sqrt{y}}\right)$

Prove that

i) $x\frac{\partial u}{\partial x} + y\frac{\partial u}{\partial y} = \frac{1}{2}\tan u$

ii) $x^2\frac{\partial^2 u}{\partial x^2} + 2xy\frac{\partial^2 u}{\partial x \partial y} + y^2\frac{\partial^2 u}{\partial y^2} = \frac{1}{4}(\tan^3 u - \tan u)$

MCQ/Objective Type Questions

Duration: 30 Minutes Marks:14

Q.1 Select the correct option. **14**

1) If a body is in equilibrium, we may a conclude that _____.
a) No force is acting on the body
b) The resultant of all forced acting on it is zero
c) Algebraic sum of moments of force about any point is zero
d) Both (b) and (c)

2) The type of beam support to that can resist a Moment is called as ____.
a) Roller support b) Hinged Support
c) Pin support d) Fixed support

3) Coefficient of friction depend upon _____.
a) Area of contact only b) Nature of contact surface only
c) Both (a) and(b) d) None

4) A framed structure of triangular shape is _____.
a) Perfect b) Imperfect
c) Difficult d) Redundant

5) To solve a truss by the method of Joint, the number of unknown forces at a joint should not be _____.
a) Less than two b) More than two
c) More than three d) Cannot said

6) A motion of moving car is given by an equation $s = t^3 + 3t^2 + 5$ where S is the distance traveled in m & t is the time in sec. the velocity of car after 2 second will be _____.
a) 4m/sec b) 8m/sec
c) 20m/sec d) 24m/sec

7) The horizontal range of a projectile is maximum when an angle of projection is _____.

a) 30° b) 45°
c) 60° d) 75°

8) Centroidal Rotation of body about _____.

a) Axis Parallel to its centroidal axis
b) Axis perpendicular to its plane of rotation & passing through its center
c) Both (a) & (b)
d) None of these

9) Inertia force during retardation acts in _____.

a) Same direction of motion
b) Opposite direction of motion
c) Perpendicular direction motion
d) Both (a) & (b)

10) D Alembert Principle basically depends upon _____.

a) Newton's Ist Law b) Newton's IInd Law
c) Newton's IIIrd d) None of these

11) Impulse is product of _____.

a) Force x distance b) Force x acceleration
c) Force x time d) Force x mass

12) SI unit of Work is _____.

a) $N.m$ b) $\frac{N.m}{sec}$

c) $\frac{N.m}{sec2}$ d) None of these

13) If axis symmetry exists then it passes through the _____.

a) Centroid b) Base
c) Top of web d) Side flange

14) M-I of triangular about centroidal horizontal axis of breadth 'b' & height 'h' _____.

a) $\frac{bh^3}{36}$ b) $\frac{bh^3}{12}$
c) $\frac{bh^3}{4}$ d) none

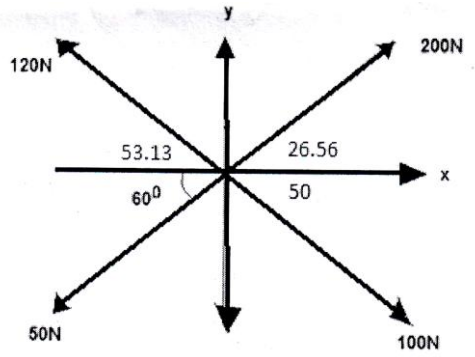
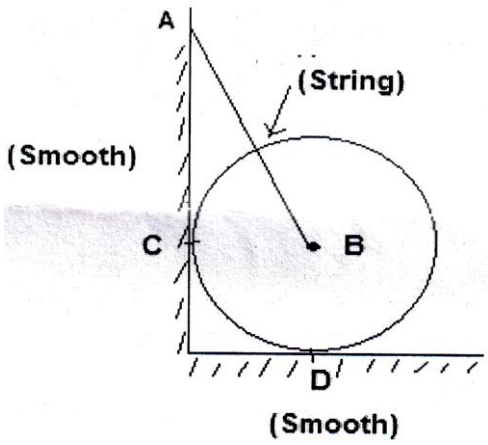
Section – I

Q.2 Attempt any Four of the following questions. **12**

a) State & Explain Lamis Theorem.
b) Explain couple & characteristics of couple.
c) State assumption made in analysis of pin jointed truss.
d) Determine the Resultant of the following force system.



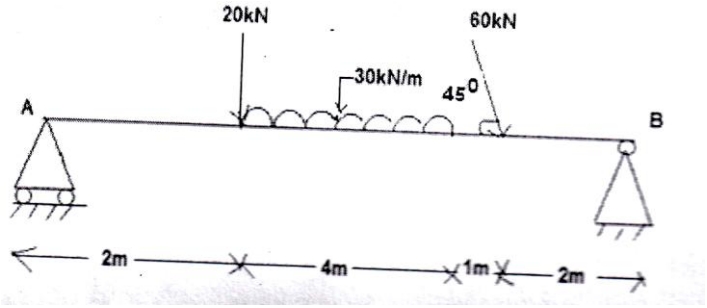
e) Draw Free body diagram of sphere resting against smooth vertical wall & smooth floor. Having weight W supported by string AB.



f) Derive any two equations of Linear motion, with uniform accelerations.

Q.3 Attempt any Two of the following questions. **16**

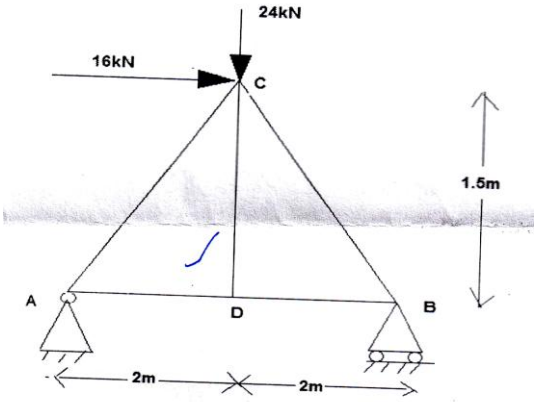
a) Find the Reactions developed at support A & B of the beam as shown in fig.



b) A projectile is fired at velocity of 800m/sec at angle 40° measured from the horizontal on level Ground. Determine.

i) The total time of flight
ii) Horizontal Range
iii) The greatest height reached
iv) Its Position after 35 Second

c) Determine the forces in member of truss as shown in fig.



Section – II

Q.4 Attempt any Four of the following questions. **12**

a) Explain D Alembert Principle.

b) Define

i) Torque
ii) Mass moment of Inertia
iii) Angular momentum

c) Define

i) Work
ii) Power
iii) Energy

d) Explain & prove Work-Energy equation.

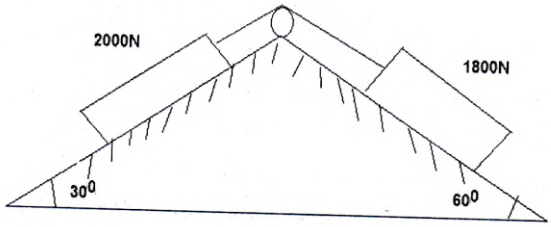
e) State parallel axis Theorem.

f) State centroid & radius of gyration.

Q.5 Attempt any Two of the following questions. **16**

a) A mine cage weight 12KN & can carry a maximum load of 20KN. The average frictional resistance of the side guides is 500N. What constant cable tension is required to give loaded cage an upward velocity of 3m/sec, start from rest in the distance of 3m?

b) Determine the time required for the weights as shown in fig. to attain a velocity of 9.81 m/sec. from rest. Take μ=0.2 for both planes. Assume friction less pulley. Also Find tension in chord?



c) Determine M-I about centroidal Horizontal axis & also determine radius of gyration about same axis. For following L section.

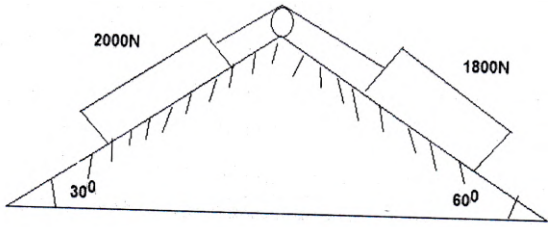
f) State centroid & radius of gyration.

Q.5 Attempt any Two of the following questions. **16**

a) A mine cage weight 12KN & can carry a maximum load of 20KN. The average frictional resistance of the side guides is 500N. What constant cable tension is required to give loaded cage an upward velocity of 3m/sec, start from rest in the distance of 3m?

b) Determine the time required for the weights as shown in fig. to attain a velocity of 9.81 m/sec. from rest. Take μ=0.2 for both planes. Assume friction less pulley. Also Find tension in chord?



c) Determine M-I about centroidal Horizontal axis & also determine radius of gyration about same axis. For following L section.

Engineering Mechanics (BTCE0106)/ (BTCSE0106) / (BTETE0106)/ (BTEE0106)/ (BTME0106)/(BTECE0106)

Day & Date: Monday 19-05-2025 Max. Marks: 70
Time: 10:00 AM To 01:00 PM

Instructions: 1) Q. No. 1 is compulsory. It should be solved in the first 30 minutes in Answer Book Page no 03 (Starting page of the Answer Book). Each question carries one mark.
2) Don't forget to Mention question paper set (P/Q/R/S) on top of page.
3) Figure to the right indicate full marks.

MCQ/Objective Type Questions

Duration: 30 Minutes Marks:14

Q.1 Select the correct option. **14**

1) Impulse is product of _____.
a) Force x distance b) Force x acceleration
c) Force x time d) Force x mass

2) SI unit of Work is _____.
a) $N.m$ b) $\frac{N.m}{sec}$
c) $\frac{N.m}{sec2}$ d) None of these

3) If axis symmetry exists then it passes through the _____.
a) Centroid b) Base
c) Top of web d) Side flange

4) M-I of triangular about centroidal horizontal axis of breadth 'b' & height 'h' _____.
a) $\frac{bh^3}{36}$ b) $\frac{bh^3}{12}$
c) $\frac{bh^3}{4}$ d) none

5) If a body is in equilibrium, we may a conclude that _____.
a) No force is acting on the body
b) The resultant of all forced acting on it is zero
c) Algebraic sum of moments of force about any point is zero
d) Both (b) and (c)

6) The type of beam support to that can resist a Moment is called as ____.
a) Roller support b) Hinged Support
c) Pin support d) Fixed support

7) Coefficient of friction depend upon _____.
a) Area of contact only b) Nature of contact surface only
c) Both (a) and(b) d) None

8) A framed structure of triangular shape is _____.
a) Perfect b) Imperfect
c) Difficult d) Redundant

9) To solve a truss by the method of Joint, the number of unknown forces at a joint should not be _____.
a) Less than two b) More than two
c) More than three d) Cannot said

10) A motion of moving car is given by an equation $s = t^3 + 3t^2 + 5$ where S is the distance traveled in m & t is the time in sec. the velocity of car after 2 second will be _____.
a) 4m/sec b) 8m/sec
c) 20m/sec d) 24m/sec

11) The horizontal range of a projectile is maximum when an angle of projection is _____.
a) 30° b) 45°
c) 60° d) 75°

12) Centroidal Rotation of body about _____.
a) Axis Parallel to its centroidal axis
b) Axis perpendicular to its plane of rotation & passing through its center
c) Both (a) & (b)
d) None of these

13) Inertia force during retardation acts in _____.
a) Same direction of motion
b) Opposite direction of motion
c) Perpendicular direction motion
d) Both (a) & (b)

14) D Alembert Principle basically depends upon _____.
a) Newton's Ist Law b) Newton's IInd Law
c) Newton's IIIrd d) None of these

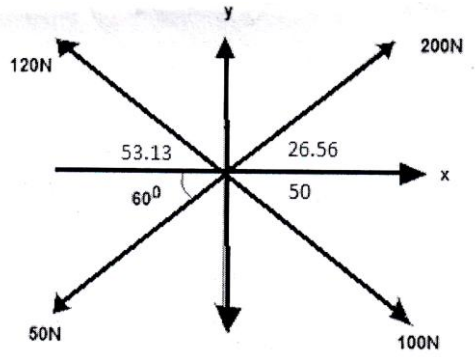
Day & Date: Monday 19-05-2025 Max. Marks: 56
Time: 10:00 AM To 01:00 PM

Instructions: 1) All questions are compulsory.
2) Figures to right indicate full marks.

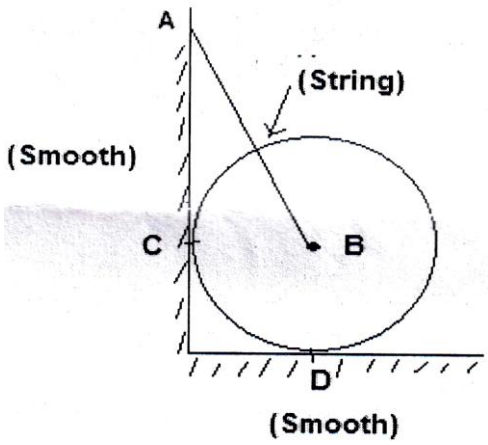
Section – I

Q.2 Attempt any Four of the following questions. **12**

a) State & Explain Lamis Theorem.
b) Explain couple & characteristics of couple.
c) State assumption made in analysis of pin jointed truss.
d) Determine the Resultant of the following force system.



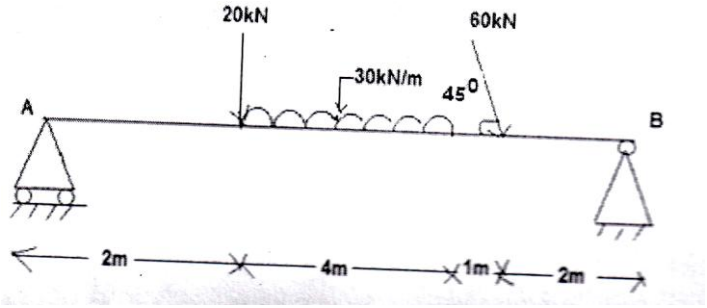
e) Draw Free body diagram of sphere resting against smooth vertical wall & smooth floor. Having weight W supported by string AB.



f) Derive any two equations of Linear motion, with uniform accelerations.

Q.3 Attempt any Two of the following questions. **16**

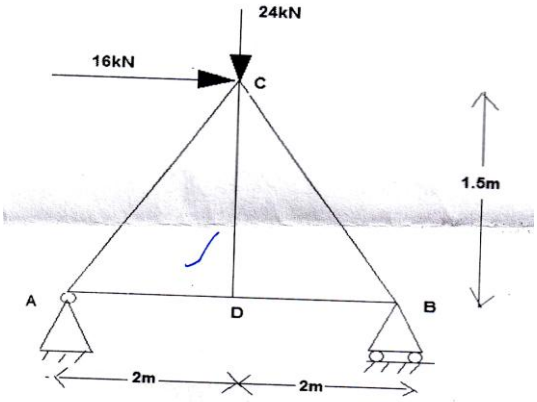
a) Find the Reactions developed at support A & B of the beam as shown in fig.



b) A projectile is fired at velocity of 800m/sec at angle 40° measured from the horizontal on level Ground. Determine.

i) The total time of flight
ii) Horizontal Range
iii) The greatest height reached
iv) Its Position after 35 Second

c) Determine the forces in member of truss as shown in fig.



Section – II

Q.4 Attempt any Four of the following questions. **12**

a) Explain D Alembert Principle.

b) Define

i) Torque
ii) Mass moment of Inertia
iii) Angular momentum

c) Define

i) Work
ii) Power
iii) Energy

d) Explain & prove Work-Energy equation.

e) State parallel axis Theorem.

f) State centroid & radius of gyration.

Q.5 Attempt any Two of the following questions. **16**

a) A mine cage weight 12KN & can carry a maximum load of 20KN. The average frictional resistance of the side guides is 500N. What constant cable tension is required to give loaded cage an upward velocity of 3m/sec, start from rest in the distance of 3m?

Constants: 1) Avogadro's no., N = 6.02 x 10^{26} / k.mol
2) Velocity of light, c = 3 x 10^{8} m/sec.
3) Charge of electron, e = 1.6 x 10^{-19} C.

MCQ/Objective Type Questions

Duration: 30 Minutes Marks:14

Q.1 Choose the correct option from the following. **14**

1) The band gap energy of silicon (Si) is approximately _____.
a) 0.3 eV b) 1.1 eV
c) 0.7 eV d) 2.5 eV

2) The mobility (μ) is given by _____.
a) $\mu = \rho . RH$ b) $\mu = \rho / RH$
c) $\mu = \sigma . RH$ s) $\mu = \sigma / RH$

3) The atomic radius of FCC lattice is _____.
a) $\frac{\sqrt{2}.a}{4}$ b) $\frac{\sqrt{3}.a}{4}$
c) $-\sqrt{2}.a$ d) $-\sqrt{3}.a$

4) The co-ordination number in case of SC structure is _____.
a) 10 b) 12
c) 8 d) 6

5) The no. of atoms in a unit cell of BCC structure is _____.
a) 1 b) 3
c) 2 d) 4

6) Optimum reverberation time for speech is _____.
a) 0.5 to 1 sec b) 0 to 1 sec
c) 1 to 2 sec d) 2 to 3 sec

7) The sound waves with frequency less than 20 Hz are called _____.
a) audible waves b) infrasonic waves
c) ultrasonic waves d) above all

8) Bending of the light at corners of slit and penetration of waves into the regions of geometrical shadow is known as _____.
a) Polarization b) Diffraction
c) Dispersion d) Interference

9) Along optic axis, the speed of o-ray and e-ray is _____.
a) Ve = Vo b) Ve > Vo
c) Ve < Vo d) none of these

10) For population inversion _____.
a) $N_1 \gg N_2$ b) $N_1 = N_2$
c) $N_2 \gg N_1$ d) $N_2 = N_1$

11) The wavelength of emission from He-Ne laser is _____.
a) 545.5 nm b) 632.8 nm
c) 794.3 nm d) 337.5 nm

12) Holography means _____.
a) To get zero dimension image
b) To get 2D image of 3D object
c) To get 3D image of 3D object
d) To get 3D image of 2D object

13) The critical angle Φ_c for fiber optics is _____.
a) $\sin\left(\frac{n_1}{n_2}\right)$ b) $\sin^{-1}\left(\frac{n_1}{n_2}\right)$
c) $\sin\left(\frac{n_2}{n_1}\right)$ d) $\sin^{-1}\left(\frac{n_2}{n_1}\right)$

14) Dimensions of nanomaterials ranging from _____.
a) 2 to 5 nm b) 1 to 100 nm
c) 100 to 200 nm d) 0.1 to 10 nm

3) Make suitable assumptions if necessary.

Section – I

Q.2 Attempt any SIX of the following: **18**

a) Classify: insulator, semiconductor and conductor on the basis of energy band structure.

b) Represent with diagrams the position of Fermi level in
i) P-type, and
ii) N-type semiconductors.

c) Define atomic packing factor and obtain its values for SC and BCC.

d) Define Coordination number and obtain the values for SC, BCC and FCC structure.

e) Write applications of ultrasonic waves.

f) What are the basic acoustic requirements of a good auditorium?

g) A semiconducting crystal 12 mm long, 5 mm wide and 1 mm thick has a magnetic flux density of 0.5 wb/m^2 applied from front to back perpendicular to largest faces. When a current of 20 mA flows lengthwise through the specimen, the voltage measured across its width is found to be 37 μV. What is the Hall coefficient of this semiconductor?

h) Lead is FCC with an atomic radius of r = 1.746 A^0. Find the spacing of:
i) (200) planes
ii) (220) planes

Q.3 Attempt any TWO of the following: **10**

a) State Hall effect? Derive the relation for Hall voltage (V_H) and Hall coefficient (R_H).

b) Explain the term Miller indices. Derive the relation between lattice constant and interplanar spacing for cubic crystal.

$$d = \frac{a}{\sqrt{h^2 + k^2 + l^2}}$$

c) State and explain the factors affecting the architectural acoustics and their remedies.

d) i) Calculate the interplanar spacing (201) planes in a cubic crystal of lattice constant 4.3 x 10^{-8} cm.

ii) The average reverberation time of a hall is 1.5 sec and the area of the interior surface is 3340 m^2. If the volume of the hall is 12000 m^3, find the absorption coefficient.

Section – II

Q.4 Attempt any SIX of the following: **18**

a) Explain: Rayleigh's criterion of resolution.

b) State and explain: Mauls law.

c) Explain:

i) Stimulated Emission and ii) Spontaneous Emission

d) State properties of LASER.

e) Explain: Structure of optical fibers with neat labeled diagrams.

f) Explain: Types of carbon nano tubes (CNTs).

g) Elow many orders will be visible if the wavelength of the incident radiation is 6500 AU and the number of lines/cm on the grating is 5000.

h) Calculate the numerical aperture and acceptance angle for an optical fibre with core and cladding refractive indices being 1.48 and 1.40 respectively.

Q.5 Attempt any TWO questions. **10**

a) Obtain the expression for acceptance angle, acceptance cone, numerical aperture and fractional refractive index change of an optical fiber.

b) What is diffraction grating? Derive an expression for the resolving power of a diffraction grating $(\lambda/d\lambda = n.N)$.

c) i) Calculate specific rotation, if the plane of polarization is rotated through 25°. Length of tube is 20 cm. Given: concentration of sugar solution 20%.

ii) Determine NA of a step index fibre when core refractive index n_1 = 1.5 and cladding refractive index n_2 = 1.48. Find maximum angle for entrance of light if fibre is placed in air.

d) Explain: He-Ne gas laser with neat energy and transition diagram.

Instructions: 1) Q. No. 1 is compulsory. It should be solved in the first 30 minutes in Answer Book Page no 03 (Starting page of the Answer Book). Each question carries one mark.
2) Don't forget to Mention question paper set (P/Q/R/S) on top of page.
3) Figures to the right indicates full marks.
4) Make suitable assumptions if necessary.

Constants: 1) Avogadro's no., N = 6.02 x 10^{26} / k.mol
2) Velocity of light, c = 3 x 10^{8} m/sec.
3) Charge of electron, e = 1.6 x 10^{-19} C.

MCQ/Objective Type Questions

Duration: 30 Minutes Marks:14

Q.1 Choose the correct option from the following. **14**

1) The wavelength of emission from He-Ne laser is _____.
a) 545.5 nm b) 632.8 nm
c) 794.3 nm d) 337.5 nm

2) Holography means _____.
a) To get zero dimension image
b) To get 2D image of 3D object
c) To get 3D image of 3D object
d) To get 3D image of 2D object

3) The critical angle Φ_c for fiber optics is _____.
a) $\sin\left(\frac{n_1}{n_2}\right)$ b) $\sin^{-1}\left(\frac{n_1}{n_2}\right)$
c) $\sin\left(\frac{n_2}{n_1}\right)$ d) $\sin^{-1}\left(\frac{n_2}{n_1}\right)$

4) Dimensions of nanomaterials ranging from _____.
a) 2 to 5 nm b) 1 to 100 nm
c) 100 to 200 nm d) 0.1 to 10 nm

5) The band gap energy of silicon (Si) is approximately _____.
a) 0.3 eV b) 1.1 eV
c) 0.7 eV d) 2.5 eV

6) The mobility (μ) is given by _____.

a) $\mu = \rho.\mathrm{RH}$ b) $\mu = \rho/\mathrm{RH}$

c) $\mu = \sigma.\mathrm{RH}$ s) $\mu = \sigma/\mathrm{RH}$

7) The atomic radius of FCC lattice is _____.

a) $\frac{\sqrt{2}.a}{4}$ b) $\frac{\sqrt{3}.a}{4}$

c) $-\sqrt{2}.a$ d) $-\sqrt{3}.a$

8) The co-ordination number in case of SC structure is _____.

a) 10 b) 12

c) 8 d) 6

9) The no. of atoms in a unit cell of BCC structure is _____.

a) 1 b) 3

c) 2 d) 4

10) Optimum reverberation time for speech is _____.

a) 0.5 to 1 sec b) 0 to 1 sec

c) 1 to 2 sec d) 2 to 3 sec

11) The sound waves with frequency less than 20 Hz are called _____.

a) audible waves b) infrasonic waves

c) ultrasonic waves d) above all

12) Bending of the light at corners of slit and penetration of waves into the regions of geometrical shadow is known as _____.

a) Polarization b) Diffraction

c) Dispersion d) Interference

13) Along optic axis, the speed of o-ray and e-ray is _____.

a) Ve = Vo b) Ve > Vo

c) Ve < Vo d) none of these

14) For population inversion _____.

a) $\mathrm{N}_1 \gg \mathrm{N}_2$ b) $\mathrm{N}_1 = \mathrm{N}_2$

c) $\mathrm{N}_2 \gg \mathrm{N}_1$ d) $\mathrm{N}_2 = \mathrm{N}_1$

F.Y. (B. Tech) (Sem-I) (New) (NEP CBCS) Examination: March/April-2025

Engineering Physics

(BTCE0101) / (BTCSE0101) / (BTETE0101) / (BTEE0101) / (BTME0101) / (BTECE0101)

Day & Date: Tuesday 27-05-2025 Max. Marks: 56
Time: 03:00 PM To 06:00 PM

Instructions: 1) All questions are compulsory.
2) Figures to the right indicate full marks.
3) Make suitable assumptions if necessary.

Section – I

Q.2 Attempt any SIX of the following: **18**

a) Classify: insulator, semiconductor and conductor on the basis of energy band structure.

b) Represent with diagrams the position of Fermi level in
i) P-type, and
ii) N-type semiconductors.

c) Define atomic packing factor and obtain its values for SC and BCC.

d) Define Coordination number and obtain the values for SC, BCC and FCC structure.

e) Write applications of ultrasonic waves.

f) What are the basic acoustic requirements of a good auditorium?

g) A semiconducting crystal 12 mm long, 5 mm wide and 1 mm thick has a magnetic flux density of 0.5 wb/m^2 applied from front to back perpendicular to largest faces. When a current of 20 mA flows lengthwise through the specimen, the voltage measured across its width is found to be 37 μV. What is the Hall coefficient of this semiconductor?

h) Lead is FCC with an atomic radius of r = 1.746 A^0. Find the spacing of:
i) (200) planes
ii) (220) planes

Q.3 Attempt any TWO of the following: **10**

a) State Hall effect? Derive the relation for Hall voltage (V_H) and Hall coefficient (R_H).

b) Explain the term Miller indices. Derive the relation between lattice constant and interplanar spacing for cubic crystal.

$$d = \frac{a}{\sqrt{h^2 + k^2 + l^2}}$$

c) State and explain the factors affecting the architectural acoustics and their remedies.

d) i) Calculate the interplanar spacing (201) planes in a cubic crystal of lattice constant 4.3 x 10^{-8} cm.

ii) The average reverberation time of a hall is 1.5 sec and the area of the interior surface is 3340 m^2. If the volume of the hall is 12000 m^3, find the absorption coefficient.

Section – II

Q.4 Attempt any SIX of the following: **18**

a) Explain: Rayleigh's criterion of resolution.

b) State and explain: Mauls law.

c) Explain:

i) Stimulated Emission and ii) Spontaneous Emission

d) State properties of LASER.

e) Explain: Structure of optical fibers with neat labeled diagrams.

f) Explain: Types of carbon nano tubes (CNTs).

g) Elow many orders will be visible if the wavelength of the incident radiation is 6500 AU and the number of lines/cm on the grating is 5000.

h) Calculate the numerical aperture and acceptance angle for an optical fibre with core and cladding refractive indices being 1.48 and 1.40 respectively.

Q.5 Attempt any TWO questions. **10**

a) Obtain the expression for acceptance angle, acceptance cone, numerical aperture and fractional refractive index change of an optical fiber.

b) What is diffraction grating? Derive an expression for the resolving power of a diffraction grating $(\lambda/d\lambda = n.N)$.

c) i) Calculate specific rotation, if the plane of polarization is rotated through 25°. Length of tube is 20 cm. Given: concentration of sugar solution 20%.

ii) Determine NA of a step index fibre when core refractive index n_1 = 1.5 and cladding refractive index n_2 = 1.48. Find maximum angle for entrance of light if fibre is placed in air.

d) Explain: He-Ne gas laser with neat energy and transition diagram.

4) Draw neat and labeled diagrams wherever necessary.

MCQ/Objective Type Questions

Duration: 30 Minutes Marks:14

Q.1 Choose the correct alternatives from the options. 14

1) Water is hard when it contains _____.
a) acid solution b) precipitate in suspension
c) dissolved sodium salts d) dissolved Ca and Mg salts

2) Most popular and ideal disinfectant in water works is _____.
a) Soda b) Ozone
c) Chlorine d) Lime

3) Water matching distilled water is obtained by using _____.
a) Zeolite process b) Ion exchange process
c) lime soda process d) Boiling

4) Lubricant used in a machine working at low temperature should Possess _____.
a) high pour point b) low flash point
c) high cloud point d) low pour point

5) Oiliness is least in case of _____.
a) greases b) mineral oils
c) animal oils d) palm oils

6) During galvanic corrosion, the more noble metals acts as _____.
a) anode b) cathode
c) anode as well as cathode d) corroding metal

7) Metal at the top of electrochemical series is _____.
a) most stable b) least active
c) most noble d) most active

8) A good fuel should have _____.
a) high moisture content
b) Low calorific value
c) moderate ignition temperature
d) High ash content

9) Charcoal is a secondary fuel derived from _____.
a) Wood b) Lignite
c) Petroleum d) Coke

10) A thermoplastic is formed by the phenomenon of _____.
a) Chlorination
b) condensation polymerization
c) nitration
d) chain polymerization

11) Structural units of high polymers, are called _____.
a) fibres b) thermo units
c) monomers d) fabrics

12) Which of the following is an elastomer?
a) PVC b) Bakelite
c) Natural rubber d) Nylon

13) Which of the following technique is used to detect the steroid consumed by athletes in international sports competition?
a) IR spectroscopy b) Gas chromatography
c) UV spectroscopy d) pH measurement

14) The commonly used carrier gas in GLC is _____.
a) F_2 b) Br_2
c) Cl_2 d) N_2

4) Draw neat and labeled diagrams wherever necessary.

Section – I

Q.2 Attempt any Four. **16**

a) A sample of water on analysis was found to contain the following impurities in mg/lit:

	Amount	Mo. Wt.
$Ca(HCO_3)_2$	20.15	162
$Mg(HCO_3)_2$	38.73	146
$MgSO_4$	44.10	120
$CaCl_2$	53.90	111
$CaSO_4$	67.00	136

Calculate the temporary, permanent and total hardness of water in mg/lit.

b) Define desalination. Explain desalination of water by reverse osmosis process.

c) Define following terms
i) Oiliness
ii) Acid value
iii) Flash point
iv) Aniline point

d) Select proper lubricants for
i) Gears
ii) Refrigeration systems

e) Explain Hydrogen evolution mechanism and oxygen absorption mechanism in electrochemical corrosion.

f) Describe cathodic protection in corrosion control.

Q.3 Attempt any Four. **12**

a) Define disinfection. Explain disinfection of water by bleaching powder.

b) Define COD. Explain determination of COD. Explain is its significance.

c) Define lubrication. Explain mechanism of thick film lubrication.

d) 6 gm of an oil sample after saponification with 75 ml of N/2 alcoholic KOH solution and subsequent titration with N/2 HCl gave the titre value of 12 ml to phenolphthalein end point. A blank experiment was conducted without taking oil sample. On repeating same procedure gave a titer value of 75 ml. Calculate saponification value of an oil sample.

e) Explain composition, properties and applications of cast iron.

f) Explain testing and measurement of corrosion by weight loss method.

Section – II

Q.4 Attempt any Four. **16**

a) During the determination of calorific value of a gaseous fuel by Boy's calorimeter, the following results were obtained:

Volume of the gaseous fuel burnt at STP	= 0.12 m^3
Weight of water used for cooling	= 35.2 Kg
Weight of steam condensed	= 0.054 Kg
Temperature of Inlet water	= 23.1^0 C
Temperature of Outlet water	= 37.5^0 C

Determine the gross and net calorific values of gaseous fuel.
(Take latent heat of condensation of steam = 587 kcal/kg)

b) Explain construction and working of bomb calorimeter.

c) Compare liquid and gaseous fuels.

d) Explain molding of plastics in to articles by following methods.
i) Injection molding
ii) Transfer molding

e) Explain vulcanization of natural rubber. List advantages of vulcanization of rubber.

f) Explain how components of mixture are separated by GLC.

Q.5 Attempt any Four. **12**

a) Explain characteristics of batteries.

b) Define biodiesel. Explain preparation of biodiesel by transesterification process.

c) Explain synthesis, properties and applications of BUNA-S rubber.

d) Explain instrumentation of TGA.

e) Calculate Molecular weight of polyvinyl chloride having degree of polymerization 350.
(Mol. wt. of vinyl chloride = 62.5)

f) Calculate weight of $AgNO_3$ required to prepare 0.07 M 500 ml solution.
(Mol. wt. of $AgNO_3$ = 170)

3) Figures to the right indicates full marks.
4) Draw neat and labeled diagrams wherever necessary.

MCQ/Objective Type Questions

Duration: 30 Minutes Marks:14

Q.1 Choose the correct alternatives from the options. 14

1) Structural units of high polymers, are called _____.
a) fibres b) thermo units
c) monomers d) fabrics

2) Which of the following is an elastomer?
a) PVC b) Bakelite
c) Natural rubber d) Nylon

3) Which of the following technique is used to detect the steroid consumed by athletes in international sports competition?
a) IR spectroscopy b) Gas chromatography
c) UV spectroscopy d) pH measurement

4) The commonly used carrier gas in GLC is _____.
a) F_2 b) Br_2
c) Cl_2 d) N_2

5) Water is hard when it contains _____.
a) acid solution b) precipitate in suspension
c) dissolved sodium salts d) dissolved Ca and Mg salts

6) Most popular and ideal disinfectant in water works is _____.
a) Soda b) Ozone
c) Chlorine d) Lime

7) Water matching distilled water is obtained by using _____.
a) Zeolite process b) Ion exchange process
c) lime soda process d) Boiling

8) Lubricant used in a machine working at low temperature should Possess _____.
a) high pour point b) low flash point
c) high cloud point d) low pour point

9) Oiliness is least in case of _____.
a) greases b) mineral oils
c) animal oils d) palm oils

10) During galvanic corrosion, the more noble metals acts as _____.
a) anode b) cathode
c) anode as well as cathode d) corroding metal

11) Metal at the top of electrochemical series is _____.
a) most stable b) least active
c) most noble d) most active

12) A good fuel should have _____.
a) high moisture content
b) Low calorific value
c) moderate ignition temperature
d) High ash content

13) Charcoal is a secondary fuel derived from _____.
a) Wood b) Lignite
c) Petroleum d) Coke

14) A thermoplastic is formed by the phenomenon of _____.
a) Chlorination
b) condensation polymerization
c) nitration
d) chain polymerization

F.Y (B. Tech.) (Sem-I) (New) (NEP CBCS) Examination: March/April-2025

Engineering Chemistry

(BTCE0102) / (BTCSE0102) / (BTETE0102) / (BTEE0102) / (BTME0102) / (BTECE0102)

Day & Date: Thursday 29-05-2025 Max. Marks: 56
Time: 03:00 PM To 06:00 PM

Instructions: 1) All questions are compulsory.
2) Figures to the right indicate full marks.
3) Assume suitable data if required.
4) Draw neat and labeled diagrams wherever necessary.

Section – I

Q.2 Attempt any Four. **16**

a) A sample of water on analysis was found to contain the following impurities in mg/lit:

	Amount	Mo. Wt.
$Ca(HCO_3)_2$	20.15	162
$Mg(HCO_3)_2$	38.73	146
$MgSO_4$	44.10	120
$CaCl_2$	53.90	111
$CaSO_4$	67.00	136

Calculate the temporary, permanent and total hardness of water in mg/lit.

b) Define desalination. Explain desalination of water by reverse osmosis process.

c) Define following terms
i) Oiliness
ii) Acid value
iii) Flash point
iv) Aniline point

d) Select proper lubricants for
i) Gears
ii) Refrigeration systems

e) Explain Hydrogen evolution mechanism and oxygen absorption mechanism in electrochemical corrosion.

f) Describe cathodic protection in corrosion control.

Q.3 Attempt any Four. **12**

a) Define disinfection. Explain disinfection of water by bleaching powder.

b) Define COD. Explain determination of COD. Explain is its significance.

c) Define lubrication. Explain mechanism of thick film lubrication.

d) 6 gm of an oil sample after saponification with 75 ml of N/2 alcoholic KOH solution and subsequent titration with N/2 HCl gave the titre value of 12 ml to phenolphthalein end point. A blank experiment was conducted without taking oil sample. On repeating same procedure gave a titer value of 75 ml. Calculate saponification value of an oil sample.

e) Explain composition, properties and applications of cast iron.

f) Explain testing and measurement of corrosion by weight loss method.

Section – II

Q.4 Attempt any Four. **16**

a) During the determination of calorific value of a gaseous fuel by Boy's calorimeter, the following results were obtained:

Volume of the gaseous fuel burnt at STP	= 0.12 m^3
Weight of water used for cooling	= 35.2 Kg
Weight of steam condensed	= 0.054 Kg
Temperature of Inlet water	= 23.1^0 C
Temperature of Outlet water	= 37.5^0 C

Determine the gross and net calorific values of gaseous fuel.
(Take latent heat of condensation of steam = 587 kcal/kg)

b) Explain construction and working of bomb calorimeter.

c) Compare liquid and gaseous fuels.

d) Explain molding of plastics in to articles by following methods.
i) Injection molding
ii) Transfer molding

e) Explain vulcanization of natural rubber. List advantages of vulcanization of rubber.

f) Explain how components of mixture are separated by GLC.

Q.5 Attempt any Four. **12**

a) Explain characteristics of batteries.

b) Define biodiesel. Explain preparation of biodiesel by transesterification process.

c) Explain synthesis, properties and applications of BUNA-S rubber.

d) Explain instrumentation of TGA.

e) Calculate Molecular weight of polyvinyl chloride having degree of polymerization 350.
(Mol. wt. of vinyl chloride = 62.5)

f) Calculate weight of $AgNO_3$ required to prepare 0.07 M 500 ml solution.
(Mol. wt. of $AgNO_3$ = 170)

MCQ/Objective Type Questions

Duration: 30 Minutes Marks: 07

Q.1 Choose the correct option from the following. **07**

1) Following is the branch of Civil Engineering _____.
a) Mechanical Engineering b) Electrical Engineering
c) Environmental Engineering d) None of these

2) Following is the branch of Transportation Engineering _____.
a) Airport Engineering b) Bridge Engineering
c) Railway Engineering d) All of the above

3) The lowest part of a structure which transfers the load to the soil is known as _____.
a) Super structure b) Sub structure
c) Plinth d) Basement

4) The following element of a framed structure is designed to carry slab load only.
a) Foundation b) Wall
c) Column d) Beam

5) The process of killing the infective bacteria from the water and making it safe to the user is called _____.
a) Softening b) Coagulation
c) Flocculation d) Disinfection

6) Wastes that cause a great danger to human, animal and plant because of its toxicity reactivity, corrosivity and ignitability is termed as _____.

a) Sewage
b) Municipal waste
c) Hazardous waste
d) Refuse

7) The main principle of surveying is to work from _____.

a) The centre to the boundary
b) The whole to part
c) The part to the whole
d) All of the above

Section – II

MCQ/Objective Type Questions

Duration: 30 Minutes Marks: 07

Q.1 Choose the correct option from the following. **07**

1) To increase the pressure of air or gas, machine driven by prime mover is used. This is known as _____.

a) steam turbine b) gas turbine
c) compressor d) I.C. engine

2) Which of the following is a general-purpose machine tools _____.

a) Milling b) Lathe
c) Drilling d) Cutting

3) Most commonly used flame in gas welding is _____.

a) Neutral b) Oxidizing
c) Carburizing d) none

4) Which type of belt arrangement is used to transmit power between two shafts having same direction of rotation?

a) Open belt b) Cross belt
c) Continuous belt d) None of above

5) The refrigerator and heat pump are works on which principle _____.

a) First law of thermodynamics
b) Second law of thermodynamics
c) Third law of thermodynamics
d) Zeroth law of thermodynamics

6) During a cycle, the heat transfer are given by: 120kJ, -60kJ, -48kJ, and 12kJ then the network transfer in the cycle is _____.

a) 60000Nm b) 24000Nm
c) 12000Nm d) 4400Nm

7) A system comprising of a single phase, is known as _____.

a) Open system b) Closed system
c) Heterogeneous system d) Homogeneous system

Section – I

Q.2 Attempt any Five. **15**

a) Differentiate or compare between substructure and superstructure. **03**
b) What is the role of civil engineering in various construction activities? **03**
c) What are the sub branches of civil engineering? Explain any one in short. **03**
d) Explain application of Civil Engineering to Mechanical and Computer Engineering. **03**
e) What is GPS? Give its applications in various fields. **03**
f) Explain Operation of Effluent treatment system. **03**
g) Write note on Green Building. **03**

Q.3 Solve any one out of (a) and (b) and solve any two out of (c) to (f). **13**

a) The following consecutive readings were taken with a dumpy level. 1.580, 0.635, 2.035,1.765,1.660, 0.925,1.035, 1.960. The level was shifted after 3rd and 5th readings. The first reading was taken on the bench mark of RL 950.000. Calculate the reduced levels of the change points and the difference of level between first and last points. (Use Rise and fall method.) **05**
b) Explain the temporary adjustment of dumpy Level. **05**
c) Explain with neat sketch any two types of shallow foundation. **04**
d) Differentiate between Plane Surveying and Geodetic Surveying. **04**
e) Draw a neat sketch of component of Buildings. **04**
f) Explain the IRC classification of roads. **04**

Section – II

Q.4 Answer any five of the following. **15**

a) Explain Vane Blower with neat sketch. **03**

b) Explain Double acting Reciprocating Pump. **03**

c) Explain Resistance welding with neat sketch. **03**

d) Explain types of equilibrium in thermodynamic system. **03**

e) Compare chain drive and belt drive. **03**

f) Explain Kelvin Plank & Classuis statements. **03**

g) Explain working of single acting reciprocating pump. **03**

Q.5 Solve any one out of (a) and (b) and solve any two out of (c) to (f) **13**

a) A cross belt connects two pulleys of 600 mm diameter 3 m apart. The initial tension in the belt is 500 N. If the coefficient of friction in the belt and pulley is 0.3. Find the power transmitted at 600 rpm. Also calculate length of belt. **05**

b) Describe Pillar Drilling Machine in detail. **05**

c) A cycle comprises three processes. The energy transfers in each are tabulated below. Complete the table. **04**

Process	Q(KJ)	W(KJ)	ΔU(KJ)
1-2	+80	+30	---
2-3	---	-50	+20
3-1	+50	---	---

d) Explain with neat sketch working of Francis turbine. **04**

e) Derive an expression for length of open belt drive. **04**

f) Explain Turning and Facing operation on lathe machine in detail. **04**

b) Bridge Engineering
c) Railway Engineering
d) All of the above

Section – II

MCQ/Objective Type Questions

Duration: 30 Minutes Marks: 07

Q.1 Choose the correct option from the following. **07**

1) Most commonly used flame in gas welding is _____.
a) Neutral b) Oxidizing
c) Carburizing d) none

2) Which type of belt arrangement is used to transmit power between two shafts having same direction of rotation?
a) Open belt b) Cross belt
c) Continuous belt d) None of above

3) The refrigerator and heat pump are works on which principle _____.
a) First law of thermodynamics
b) Second law of thermodynamics
c) Third law of thermodynamics
d) Zeroth law of thermodynamics

4) During a cycle, the heat transfer are given by: 120kJ, -60kJ, -48kJ, and 12kJ then the network transfer in the cycle is _____.
a) 60000Nm b) 24000Nm
c) 12000Nm d) 4400Nm

5) A system comprising of a single phase, is known as _____.
a) Open system b) Closed system
c) Heterogeneous system d) Homogeneous system

6) To increase the pressure of air or gas, machine driven by prime mover is used. This is known as _____.
a) steam turbine b) gas turbine
c) compressor d) I.C. engine

7) Which of the following is a general-purpose machine tools _____.
a) Milling b) Lathe
c) Drilling d) Cutting

Day & Date: Monday, 02-06-2025 Max. Marks: 56
Time: 03:00 PM To 06:00 PM

Instructions: 1) All questions are compulsory.
2) Figures to the right indicates full marks
3) Q.No.2 and Q.No.4 are short answer type question.
4) Q.No.3 and Q.No.5 are long answer type question.
5) Assume suitable data if required.
6) Use of non-programmable single memory calculator is allowed.

Section – I

Q.2 Attempt any Five. **15**

a) Differentiate or compare between substructure and superstructure. **03**
b) What is the role of civil engineering in various construction activities? **03**
c) What are the sub branches of civil engineering? Explain any one in short. **03**
d) Explain application of Civil Engineering to Mechanical and Computer Engineering. **03**
e) What is GPS? Give its applications in various fields. **03**
f) Explain Operation of Effluent treatment system. **03**
g) Write note on Green Building. **03**

Q.3 Solve any one out of (a) and (b) and solve any two out of (c) to (f). **13**

a) The following consecutive readings were taken with a dumpy level. 1.580, 0.635, 2.035,1.765,1.660, 0.925,1.035, 1.960. The level was shifted after 3rd and 5th readings. The first reading was taken on the bench mark of RL 950.000. Calculate the reduced levels of the change points and the difference of level between first and last points. (Use Rise and fall method.) **05**
b) Explain the temporary adjustment of dumpy Level. **05**
c) Explain with neat sketch any two types of shallow foundation. **04**
d) Differentiate between Plane Surveying and Geodetic Surveying. **04**
e) Draw a neat sketch of component of Buildings. **04**
f) Explain the IRC classification of roads. **04**

Section – II

Q.4 Answer any five of the following. **15**

a) Explain Vane Blower with neat sketch. **03**

b) Explain Double acting Reciprocating Pump. **03**

c) Explain Resistance welding with neat sketch. **03**

d) Explain types of equilibrium in thermodynamic system. **03**

e) Compare chain drive and belt drive. **03**

f) Explain Kelvin Plank & Classuis statements. **03**

g) Explain working of single acting reciprocating pump. **03**

Q.5 Solve any one out of (a) and (b) and solve any two out of (c) to (f) **13**

a) A cross belt connects two pulleys of 600 mm diameter 3 m apart. The initial tension in the belt is 500 N. If the coefficient of friction in the belt and pulley is 0.3. Find the power transmitted at 600 rpm. Also calculate length of belt. **05**

b) Describe Pillar Drilling Machine in detail. **05**

c) A cycle comprises three processes. The energy transfers in each are tabulated below. Complete the table. **04**

Process	Q(KJ)	W(KJ)	ΔU(KJ)
1-2	+80	+30	---
2-3	---	-50	+20
3-1	+50	---	---

d) Explain with neat sketch working of Francis turbine. **04**

e) Derive an expression for length of open belt drive. **04**

f) Explain Turning and Facing operation on lathe machine in detail. **04**

MCQ/Objective Type Questions

Duration: 30 Minutes Marks: 07

Q.1 Choose the correct option from the following. **07**

1) The main principle of surveying is to work from _____.
a) The centre to the boundary b) The whole to part
c) The part to the whole d) All of the above

2) Following is the branch of Civil Engineering _____.
a) Mechanical Engineering b) Electrical Engineering
c) Environmental Engineering d) None of these

3) Following is the branch of Transportation Engineering _____.
a) Airport Engineering b) Bridge Engineering
c) Railway Engineering d) All of the above

4) The lowest part of a structure which transfers the load to the soil is known as _____.
a) Super structure b) Sub structure
c) Plinth d) Basement

5) The following element of a framed structure is designed to carry slab load only.
a) Foundation b) Wall
c) Column d) Beam

6) The process of killing the infective bacteria from the water and making it safe to the user is called _____.

a) Softening
b) Coagulation
c) Flocculation
d) Disinfection

7) Wastes that cause a great danger to human, animal and plant because of its toxicity reactivity, corrosivity and ignitability is termed as _____.

a) Sewage
b) Municipal waste
c) Hazardous waste
d) Refuse

MCQ/Objective Type Questions

Duration: 30 Minutes Marks:14

Q.1 Choose the correct answer: **14**

1) KVL is concerned with _____
a) Junction voltages b) Junction currents
c) IR drop & emfs d) Both a & b

2) A sinusoidal alternating current has a maximum value of Im. Its average value will be _____
a) Im/π b) $\mathrm{Im}/2\pi$
c) $2\mathrm{Im}/\pi$ d) None of these

3) The reluctance of a magnetic circuit is _____
a) directly proportional to length and area
b) directly proportional to length and inversely proportional to area
c) directly proportional to area and inversely proportional to length
d) none of these

4) The reluctance of the magnetic circuit is _____
a) MMF/current b) MMF/flux
c) flux/current d) flux/MMF

5) If alternating voltage is given by, v= 230 sin (314.16t), then the frequency is _____
a) 60 Hz b) 50 Hz
c) 40 Hz d) 200 Hz

6) The peak factor of sinusoidal quantity is _____
a) 1.414 b) 1.57
c) 1.11 d) 0.637

7) A DC motor converts _____
   a) Electrical energy into mechanical energy
   b) Mechanical energy into electrical energy
   c) Electrical energy into magnetic energy
   d) Magnetic energy into electrical energy

8) PIV in full wave rectifier used in a centre tapped transformer is _____
   a) Vm/π b) $2\mathrm{Vm}/\pi$
   c) $2\ \mathrm{Vm}$ d) Vm

9) Ideal diode in reverse bias offers _____ resistance and is equivalent to _____ switch.
   a) Zero, open b) Zero, closed
   c) Infinite, closed d) Infinite, open

10) Transistor is operated as open switch in _____ region.
   a) Saturation b) Cut-off
   c) Active region d) None of these

11) The base of transistor is _____
   a) Lightly doped b) Moderately doped
   c) Heavily doped d) None

12) Octal equivalent of decimal number 375 is _____
   a) 560 b) 576
   c) 565 d) 567

13) Which of the following gate cannot be used as inverter?
   a) XNOR b) NOR
   c) NAND d) AND

14) The output of an AND gate is high when _____
   a) Any input is high b) All inputs are high
   c) No inputs are high d) Both a and b

Q.2 Solve any four **16**

a) State and explain Ohm's law with its limitations.

b) Derive the expression for the division of current through three branches in parallel.

c) Explain series magnetic circuit with air-gap. Also derive the formula for total MMF.

d) Describe the working principle of single phase transformer with neat diagram.

e) Derive expression for purely inductive circuit. Draw phasor diagram.

f) A sinusoidal voltage is given by $v = 325.296 \sin(\omega t)$ volts at 50 Hz. Determine the RMS value, average value, angular frequency, time period of the voltage.

Q.3 Solve any two **12**

a) Derive the equation for converting delta resistances into equivalent star resistances.

b) An iron ring with mean length 80 cm and cross-sectional area 10 cm^2 is uniformly wound with 500 turns of wire, determine the current required to set up a flux density of 12 Wb/m^2 in the ring. Also find the value of magnetic flux and magnetic field strength. Assume relative permeability of iron is 1000.

c) Explain series R-L-C circuit for the condition $X_C > X_L$, with voltage triangle, impedance triangle and phasor diagram.

Section – II

Q.4 Solve any four. **16**

a) Explain VI characteristics of PN junction diode with neat diagram.

b) What is need of filter? Explain capacitor filter with neat diagram.

c) Explain working of BJT as switch.

d) Explain input and output characteristics of common emitter (CE) configuration of transistor.

e) State and prove distributive and commutative law.

f) Explain following logic gates with symbol, equation and truth table.
i) XOR ii) NAND iii) NOR iv) AND

Q.5 Solve any two. **12**

a) Explain half wave rectifier with suitable diagram and derive expression for ripple factor and efficiency.

b) Compare different transistor configurations on the basis of input resistance, output resistance, voltage gain and current gain.

c) Perform following subtraction using 2's complement method. Show the result in octal form.

i) $(512)_8 - (345)_8$

ii) $(275)_8 - (155)_8$

d) Describe the working principle of single phase transformer with neat diagram.

e) Derive expression for purely inductive circuit. Draw phasor diagram.

f) A sinusoidal voltage is given by $v = 325.296 \sin(\omega t)$ volts at 50 Hz. Determine the RMS value, average value, angular frequency, time period of the voltage.

Q.3 Solve any two **12**

a) Derive the equation for converting delta resistances into equivalent star resistances.

b) An iron ring with mean length 80 cm and cross-sectional area 10 cm^2 is uniformly wound with 500 turns of wire, determine the current required to set up a flux density of 12 Wb/m^2 in the ring. Also find the value of magnetic flux and magnetic field strength. Assume relative permeability of iron is 1000.

c) Explain series R-L-C circuit for the condition $X_C > X_L$, with voltage triangle, impedance triangle and phasor diagram.

Section – II

Q.4 Solve any four. **16**

a) Explain VI characteristics of PN junction diode with neat diagram.

b) What is need of filter? Explain capacitor filter with neat diagram.

c) Explain working of BJT as switch.

d) Explain input and output characteristics of common emitter (CE) configuration of transistor.

e) State and prove distributive and commutative law.

f) Explain following logic gates with symbol, equation and truth table.
i) XOR ii) NAND iii) NOR iv) AND

Q.5 Solve any two. **12**

a) Explain half wave rectifier with suitable diagram and derive expression for ripple factor and efficiency.

b) Compare different transistor configurations on the basis of input resistance, output resistance, voltage gain and current gain.

c) Perform following subtraction using 2's complement method. Show the result in octal form.

i) $(512)_8 - (345)_8$

ii) $(275)_8 - (155)_8$

Basic Electrical & Electronics Engineering

(BTCE0105) / (BTCSE0105) / (BTETE0105) / (BTEE0105) / (BTME0105) / (BTECE0105)

Day & Date: Wednesday, 04-June-2025 Max. Marks: 70
Time: 03:00 PM To 06:00 PM

Instructions: 1) Q. No. 1 is compulsory. It should be solved in the first 30 minutes in Answer Book Page no 03 (Starting page of the Answer Book). Each question carries one mark.
2) Don't forget to Mention question paper set (P/Q/R/S) on top of page.
3) Figures to the right indicates full marks.
4) Assume suitable data if necessary.

MCQ/Objective Type Questions

Duration: 30 Minutes Marks:14

Q.1 Choose the correct answer: **14**

1) The peak factor of sinusoidal quantity is _____
a) 1.414 b) 1.57
c) 1.11 d) 0.637

2) A DC motor converts _____
a) Electrical energy into mechanical energy
b) Mechanical energy into electrical energy
c) Electrical energy into magnetic energy
d) Magnetic energy into electrical energy

3) PIV in full wave rectifier used in a centre tapped transformer is _____
a) Vm/π b) $2\mathrm{Vm}/\pi$
c) $2\ \mathrm{Vm}$ d) Vm

4) Ideal diode in reverse bias offers _____ resistance and is equivalent to _____ switch.
a) Zero, open b) Zero, closed
c) Infinite, closed d) Infinite, open

5) Transistor is operated as open switch in _____ region.
a) Saturation b) Cut-off
c) Active region d) None of these

6) The base of transistor is _____
a) Lightly doped b) Moderately doped
c) Heavily doped d) None

7) Octal equivalent of decimal number 375 is _____
a) 560 b) 576
c) 565 d) 567

8) Which of the following gate cannot be used as inverter?
a) XNOR b) NOR
c) NAND d) AND

9) The output of an AND gate is high when _____
a) Any input is high b) All inputs are high
c) No inputs are high d) Both a and b

10) KVL is concerned with _____
a) Junction voltages b) Junction currents
c) IR drop & emfs d) Both a & b

11) A sinusoidal alternating current has a maximum value of Im. Its average value will be _____
a) Im/π b) $\mathrm{Im}/2\pi$
c) $2\mathrm{Im}/\pi$ d) None of these

12) The reluctance of a magnetic circuit is _____
a) directly proportional to length and area
b) directly proportional to length and inversely proportional to area
c) directly proportional to area and inversely proportional to length
d) none of these

13) The reluctance of the magnetic circuit is _____
a) MMF/current b) MMF/flux
c) flux/current d) flux/MMF

14) If alternating voltage is given by, v= 230 sin (314.16t), then the frequency is _____
a) 60 Hz b) 50 Hz
c) 40 Hz d) 200 Hz

Constants: 1) Avogadro's no., N = 6.02 x 10^{26} / k.mol
2) Velocity of light, c = 3 x 10^{8} m/sec.
3) Charge of electron, e = 1.6 x 10^{-19} C.

MCQ/Objective Type Questions

Duration: 30 Minutes Marks:14

Q.1 Choose the correct option from the following. **14**

1) In N type semiconductor majority charge Carriers are _____.
a) positive holes b) negative electrons
c) neutrons d) none of the above

2) The band gap energy of Ge is approximately _____.
a) 0.7eV b) 1.1eV
c) 0.3eV s) 2.0eV

3) Effective no. of atoms belonging to BCC _____.
a) 1 b) 3
c) 2 d) 4

4) Atomic packing fraction for face centered cubic structure is _____.
a) 0.52 b) 0.68
c) 0.74 d) 0.26

5) For cubic crystal four fold (tetrads) axes of symmetry are _____.
a) 3 b) 6
c) 4 d) 2

6) The persistence or prolongation of sound in the hall even after the source has been stopped is known as _____.
a) Echo b) Reverberation
c) Pitch d) Loudness

7) The waves used in Sonography are _____.
a) micro waves b) infrasonic waves
c) ultrasonic waves d) radio waves

8) Birefriengence or amount of double refraction for positive crystal is _____.
a) positive b) negative
c) finite d) infinite

9) The resolving power of a grating is directly proportional to _____.
a) order of diffraction b) wavelength
c) phase d) frequency

10) Emission of a photon by an atom without an external energy is called _____.
a) stimulated emission b) induced emission
c) amplified emission d) spontaneous emission

11) In He-Ne lasers, the ratio of He-Ne is in the order _____.
a) 1:10 b) 10:1
c) 1:1 d) 2:1

12) The hologram records _____ of the object.
a) Both intensity variation and phase distribution
b) Only intensity variation
c) Only phase distribution
d) None

13) The fractional refractive index change is _____.
a) $\Delta = (n_1 - n_2)/n_1$ b) $\Delta = n_1 - n_2$
c) $\Delta = n_2 - n_1$ d) $\Delta = (n_2 - n_1)/n_1$

14) The chirality of Zig-Zag CNT is _____.
a) (a, a) b) (a, b)
c) (0, b) d) (a, 0)

Day & Date: Tuesday 27-05-2025 Max. Marks: 56
Time: 03:00 PM To 06:00 PM

Instructions: 1) All questions are compulsory.
2) Figures to the right indicate full marks.
3) Make suitable assumptions if necessary.

Section – I

Q.2 Attempt any SIX of the following: **18**

a) Classify solids on the basis of band theory. (Insulators, semiconductors, conductors)

b) Show that in intrinsic semiconductors Fermi level lies in the middle of valence and conduction band.

c) Find the relation between lattice constant (a) and atomic radius (r) for SC and FCC.

d) Explain: Plane of symmetry

e) Define:
i) Reverberation time
ii) reverberation
iii) absorption coefficient

f) Write applications of ultrasonic waves.

g) A concrete hall of volume 2500 m^3 has total surface absorption of 205. Find reverberation time. What will be the effect if you increase the total absorption of the hall?

h) An n-type germanium sample has a donor density of $10^{21}/m^3$. It is arranged in a Hall experiment having magnetic field of 0.5 T and the current density is 500 A/m^2. Determine the Hall voltage if the sample is 3 mm wide.

Q.3 Attempt any TWO of the following: **10**

a) State Hall Effect. Derive expression for Hall voltage. State the applications of Hall Effect.

b) Explain: Miller indices. Derive an expression for the spacing between consecutive parallel planes in cubic crystal of Miller indices $(h\ k\ l)$ is given by,

$$d_{hkl} = \frac{a}{\sqrt{h^2 + k^2 + l^2}}$$

c) Write down the factors affecting the architectural acoustics and their remedies

d) Solve:

i) A classroom has dimensions 20 X 15 X 10 m^3. The reverberation time is 3.0 sec. Calculate the total absorption of its surface and the average absorption coefficient.

ii) Polonium belongs to SC lattice. If the lattice constant is 3.36Å, calculate its density. The atomic weight of polonium is 209

Section – II

Q.4 Attempt any SIX of the following: **18**

a) Explain: Rayleigh's criterion of resolution.

b) Explain: Positive and negative crystals.

c) Explain:

i) Population Inversion and

ii) Metastable state

d) State properties of LASER.

e) Explain types of optical fiber with diagram.

f) Write applications of nanotechnology in various fields.

g) What is the highest order spectrum which may be seen with monochromatic light of wavelength 6000 AU by means of diffraction grating with 5000 liens per cm.

h) The numerical aperture of an optical fiber is 0.5 and the refractive index is 1.54 Find the refractive index of the cladding.

Q.5 Attempt any TWO questions. **10**

a) What is diffraction grating? Derive an expression for the resolving power of a diffraction grating.

b) Explain: He-Ne gas laser with neat energy and transition diagram.

c) Obtain the expression for acceptance angle. Hence define acceptance cone angle.

d) i) A 20 cm long glass tube containing sugar solution rotates the plane of polarization by 11°. If the specific rotation of sugar is 66°, calculate the strength of the solution.

ii) In step index fiber, core index $n_1 = 1.45$ and cladding index $n_2 = 1.41$

Find:

i) NA

ii) Δ

iii) Acceptance angle

Day & Date: Tuesday 27-05-2025 Max. Marks: 70
Time: 03:00 PM To 06:00 PM

Instructions: 1) Q. No. 1 is compulsory. It should be solved in the first 30 minutes in Answer Book Page no 03 (Starting page of the Answer Book). Each question carries one marks.
2) Don't forget to Mention question paper set (P/Q/R/S) on top of page.
3) Figures to the right indicates full marks.
4) Make suitable assumptions if necessary.

Constants: 1) Avogadro's no., N = 6.02 x 10^{26} / k.mol
2) Velocity of light, c = 3 x 10^{8} m/sec.
3) Charge of electron, e = 1.6 x 10^{-19} C.

MCQ/Objective Type Questions

Duration: 30 Minutes Marks:14

Q.1 Choose the correct option from the following. **14**

1) The persistence or prolongation of sound in the hall even after the source has been stopped is known as _____.
a) Echo b) Reverberation
c) Pitch d) Loudness

2) The waves used in Sonography are _____.
a) micro waves b) infrasonic waves
c) ultrasonic waves d) radio waves

3) Birefriengence or amount of double refraction for positive crystal is _____.
a) positive b) negative
c) finite d) infinite

4) The resolving power of a grating is directly proportional to _____.
a) order of diffraction b) wavelength
c) phase d) frequency

5) Emission of a photon by an atom without an external energy is called _____.
a) stimulated emission b) induced emission
c) amplified emission d) spontaneous emission

6) In He-Ne lasers, the ratio of He-Ne is in the order _____.
a) 1:10 b) 10:1
c) 1:1 d) 2:1

7) The hologram records _____ of the object.
a) Both intensity variation and phase distribution
b) Only intensity variation
c) Only phase distribution
d) None

8) The fractional refractive index change is _____.
a) $\Delta = (n_1 - n_2)/n_1$ b) $\Delta = n_1 - n_2$
c) $\Delta = n_2 - n_1$ d) $\Delta = (n_2 - n_1)/n_1$

9) The chirality of Zig-Zag CNT is _____.
a) (a, a) b) (a, b)
c) (0, b) d) (a, 0)

10) In N type semiconductor majority charge Carriers are _____.
a) positive holes b) negative electrons
c) neutrons d) none of the above

11) The band gap energy of Ge is approximately _____.
a) 0.7eV b) 1.1eV
c) 0.3eV s) 2.0eV

12) Effective no. of atoms belonging to BCC _____.
a) 1 b) 3
c) 2 d) 4

13) Atomic packing fraction for face centered cubic structure is _____.
a) 0.52 b) 0.68
c) 0.74 d) 0.26

14) For cubic crystal four fold (tetrads) axes of symmetry are _____.
a) 3 b) 6
c) 4 d) 2

F. Y (B. Tech) (Sem-II) (New) (NEP CBCS) Examination: March/April-2025

Engineering Physics

(BTCE0201 / BTME0201 / BTETE0201 / BTCSE0201 / BTEE0201) / (BTECE0201)

Day & Date: Tuesday 27-05-2025 Max. Marks: 56
Time: 03:00 PM To 06:00 PM

Instructions: 1) All questions are compulsory.
2) Figures to the right indicate full marks.
3) Make suitable assumptions if necessary.

Section – I

Q.2 Attempt any SIX of the following: **18**

a) Classify solids on the basis of band theory. (Insulators, semiconductors, conductors)

b) Show that in intrinsic semiconductors Fermi level lies in the middle of valence and conduction band.

c) Find the relation between lattice constant (a) and atomic radius (r) for SC and FCC.

d) Explain: Plane of symmetry

e) Define:
i) Reverberation time
ii) reverberation
iii) absorption coefficient

f) Write applications of ultrasonic waves.

g) A concrete hall of volume 2500 m^3 has total surface absorption of 205. Find reverberation time. What will be the effect if you increase the total absorption of the hall?

h) An n-type germanium sample has a donor density of $10^{21}/m^3$. It is arranged in a Hall experiment having magnetic field of 0.5 T and the current density is 500 A/m^2. Determine the Hall voltage if the sample is 3 mm wide.

Q.3 Attempt any TWO of the following: **10**

a) State Hall Effect. Derive expression for Hall voltage. State the applications of Hall Effect.

b) Explain: Miller indices. Derive an expression for the spacing between consecutive parallel planes in cubic crystal of Miller indices $(h\ k\ l)$ is given by,

$$d_{hkl} = \frac{a}{\sqrt{h^2 + k^2 + l^2}}$$

c) Write down the factors affecting the architectural acoustics and their remedies

d) Solve:

i) A classroom has dimensions 20 X 15 X 10 m^3. The reverberation time is 3.0 sec. Calculate the total absorption of its surface and the average absorption coefficient.

ii) Polonium belongs to SC lattice. If the lattice constant is 3.36Å, calculate its density. The atomic weight of polonium is 209

Section – II

Q.4 Attempt any SIX of the following: **18**

a) Explain: Rayleigh's criterion of resolution.

b) Explain: Positive and negative crystals.

c) Explain:

i) Population Inversion and

ii) Metastable state

d) State properties of LASER.

e) Explain types of optical fiber with diagram.

f) Write applications of nanotechnology in various fields.

g) What is the highest order spectrum which may be seen with monochromatic light of wavelength 6000 AU by means of diffraction grating with 5000 liens per cm.

h) The numerical aperture of an optical fiber is 0.5 and the refractive index is 1.54 Find the refractive index of the cladding.

Q.5 Attempt any TWO questions. **10**

a) What is diffraction grating? Derive an expression for the resolving power of a diffraction grating.

b) Explain: He-Ne gas laser with neat energy and transition diagram.

c) Obtain the expression for acceptance angle. Hence define acceptance cone angle.

d) i) A 20 cm long glass tube containing sugar solution rotates the plane of polarization by 11°. If the specific rotation of sugar is 66°, calculate the strength of the solution.

ii) In step index fiber, core index $n_1 = 1.45$ and cladding index $n_2 = 1.41$

Find:

i) NA

ii) Δ

iii) Acceptance angle

4) Draw neat and labeled diagrams wherever necessary

MCQ/Objective Type Questions

Duration: 30 Minutes Marks:14

Q.1 Choose the correct alternatives from the options. 14

1) Water containing magnesium bicarbonate and calcium chloride is: ____.
a) Soft only b) Temporary hard only
c) Permanent hard only d) Both temporary and permanent hard

2) Water is hard when it contains: ____.
a) acid solution b) precipitate in suspension
c) dissolved sodium salts d) dissolved Ca and Mg salts

3) Water matching distilled water is obtained by using: ____.
a) Zeolite process b) Ion exchange process
c) lime soda process d) Boiling

4) When graphite is dispersed in oil, it is called: ____.
a) greases b) aquadag
c) oildag d) blended oil

5) Oiliness is least in case of: ____.
a) greases b) mineral oils
c) animal oils d) palm oils

6) Corrosion is an example of: _____.
a) Oxidation b) Reduction
c) Electrolysis d) Extraction of metal

7) Nonvolatile film-forming constituents of a paint is called ____.
a) drier b) pigments
c) thinner d) drying oil

8) A good fuel should have _____.
a) high moisture content
b) low calorific value
c) moderate ignition temperature
d) high ash content

9) A good fuel should possess ____.
a) low calorific value b) high ignition temperature
c) high calorific value d) high ash content

10) Structural units of high polymers, are called _____.
a) Fibers b) thermo units
c) Monomers d) Fabrics

11) Most commonly used vulcanizing agent is ____.
a) Graphite b) Carbon black
c) Dry ice d) Sulphur

12) Which of the following is an elastomer?
a) PVC b) Bakelite
c) Natural rubber d) Nylon

13) Which of the following technique is used to detect the steroid consumed by athletes in international sports competition?
a) IR spectroscopy b) Gas chromatography
c) UV spectroscopy d) pH measurement

14) Which of the following gas cannot be used as carrier gas in chromatography?
a) Nitrogen b) Argon
c) Oxygen d) All of these

Time: 03:00 PM To 06:00 PM

Instructions: 1) All questions are compulsory.
2) Figures to the right indicate full marks.
3) Draw neat and labeled diagrams wherever necessary.

Section – I

Q.2 Attempt the following: (Any Four) **16**

a) A sample of water on analysis was found to contain the following impurities in mg/lit:

	Amount	**Mo. Wt.**
$Ca(HCO_3)_2$	20.15	162
$Mg(HCO_3)_2$	38.73	146
$MgSO_4$	44.10	120
$CaCl_2$	53.90	111

Calculate the temporary, permanent, and total hardness of water in mg/lit.

b) Define aeration Explain different types of aerators.

c) Define following terms
i) Oiliness
ii) Acid value
iii) Flash point
iv) Aniline point

d) Select proper lubricants for
i) Gears
ii) Refrigeration systems

e) Define corrosion. Explain Hydrogen evolution mechanism in electrochemical corrosion.

f) Explain prevention of corrosion by galvanizing and tinning.

Q.3 Attempt the following: (Any Four) **12**

a) Define disinfection. Explain disinfection of water by chloramine.

b) Define COD. Explain determination of COD. Explain is its significance.

c) Explain mechanism of extreme pressure lubrication.

d) 7 gm of an oil sample after saponification with 75 ml of N/2 alcoholic KOH solution and subsequent titration with N/2 HCl gave the titre value of 15 ml to phenolphthalein end point. A blank experiment was conducted without taking oil sample. On repeating same procedure gave a titer value of 75 ml. Calculate saponification value of an oil sample.

e) Explain composition, properties, and applications of cast iron.

f) Explain testing and measurement of corrosion by electrical resistance method.

Section – II

Q.4 Attempt the following: (Any Four) **16**

a) During the determination of calorific value of a gaseous fuel by Boy's calorimeter, the following results were obtained:

Volume of the gaseous fuel burnt at STP	= 0.12 m^3
Weight of water used for cooling	= 35.2 Kg
Weight of steam condensed	= 0.055 Kg
Temperature of Inlet water	= 26.1^{0}C
Temperature of Outlet water	= 40.5^{0}C

Determine the gross and net calorific values of gaseous fuel.
(Take latent heat of condensation of steam = 587 kcal/kg)

b) Explain construction and working of bomb calorimeter.

c) Compare solid and gaseous fuels.

d) Explain molding of plastics in to articles by following methods.
i) Injection molding
ii) Transfer molding

e) Explain thermosoftening and thermosetting plastics.

f) Explain how components of mixture are separated by GLC.

Q.5 Attempt the following: (Any Four) **12**

a) Explain charging & discharging of Li-ion batteries.

b) Define biodiesel. Explain preparation of biodiesel by transesterification process.

c) Explain synthesis, properties, and applications of PVC.

d) Explain instrumentation of TGA.

e) A polymer has following population
15 molecules have molecular weight each 19000
20 molecules have molecular weight each 22000
25 molecules have molecular weight each 24000
30 molecules have molecular weight each 26000
Calculate its number average molecular weight.

f) Calculate weight of $AgNO_3$ required to prepare 0.07 M 500 ml solution. (Mol. Wt. of $AgNO_3$ = 170)

c) dissolved sodium salts d) dissolved Ca and Mg salts

12) Water matching distilled water is obtained by using: ____.

a) Zeolite process b) Ion exchange process
c) lime soda process d) Boiling

13) When graphite is dispersed in oil, it is called: ____.

a) greases b) aquadag
c) oildag d) blended oil

14) Oiliness is least in case of: ____.

a) greases b) mineral oils
c) animal oils d) palm oils

F.Y (B. Tech) (Sem-II) (New) (NEP CBCS) Examination: March/April-2025
Engineering Chemistry
(BTCE0202 / BTME0202 / BTETE0202 / BTCSE0202 / BTEE0202) / (BTECE0202)

Day & Date: Thursday 29-05-2025 Max. Marks: 56
Time: 03:00 PM To 06:00 PM

Instructions: 1) All questions are compulsory.
2) Figures to the right indicate full marks.
3) Draw neat and labeled diagrams wherever necessary.

Section – I

Q.2 Attempt the following: (Any Four) **16**

a) A sample of water on analysis was found to contain the following impurities in mg/lit:

	Amount	Mo. Wt.
$Ca(HCO_3)_2$	20.15	162
$Mg(HCO_3)_2$	38.73	146
$MgSO_4$	44.10	120
$CaCl_2$	53.90	111

Calculate the temporary, permanent, and total hardness of water in mg/lit.

b) Define aeration Explain different types of aerators.

c) Define following terms
i) Oiliness
ii) Acid value
iii) Flash point
iv) Aniline point

d) Select proper lubricants for
i) Gears
ii) Refrigeration systems

e) Define corrosion. Explain Hydrogen evolution mechanism in electrochemical corrosion.

f) Explain prevention of corrosion by galvanizing and tinning.

Q.3 Attempt the following: (Any Four) **12**

a) Define disinfection. Explain disinfection of water by chloramine.

b) Define COD. Explain determination of COD. Explain is its significance.

c) Explain mechanism of extreme pressure lubrication.

d) 7 gm of an oil sample after saponification with 75 ml of N/2 alcoholic KOH solution and subsequent titration with N/2 HCl gave the titre value of 15 ml to phenolphthalein end point. A blank experiment was conducted without taking oil sample. On repeating same procedure gave a titer value of 75 ml. Calculate saponification value of an oil sample.

e) Explain composition, properties, and applications of cast iron.

f) Explain testing and measurement of corrosion by electrical resistance method.

Section – II

Q.4 Attempt the following: (Any Four) **16**

a) During the determination of calorific value of a gaseous fuel by Boy's calorimeter, the following results were obtained:

Volume of the gaseous fuel burnt at STP	= 0.12 m^3
Weight of water used for cooling	= 35.2 Kg
Weight of steam condensed	= 0.055 Kg
Temperature of Inlet water	= 26.1^{0}C
Temperature of Outlet water	= 40.5^{0}C

Determine the gross and net calorific values of gaseous fuel.
(Take latent heat of condensation of steam = 587 kcal/kg)

b) Explain construction and working of bomb calorimeter.

c) Compare solid and gaseous fuels.

d) Explain molding of plastics in to articles by following methods.
i) Injection molding
ii) Transfer molding

e) Explain thermosoftening and thermosetting plastics.

f) Explain how components of mixture are separated by GLC.

Q.5 Attempt the following: (Any Four) **12**

a) Explain charging & discharging of Li-ion batteries.

b) Define biodiesel. Explain preparation of biodiesel by transesterification process.

c) Explain synthesis, properties, and applications of PVC.

d) Explain instrumentation of TGA.

e) A polymer has following population
15 molecules have molecular weight each 19000
20 molecules have molecular weight each 22000
25 molecules have molecular weight each 24000
30 molecules have molecular weight each 26000
Calculate its number average molecular weight.

f) Calculate weight of $AgNO_3$ required to prepare 0.07 M 500 ml solution. (Mol. Wt. of $AgNO_3$ = 170)

Day & Date: Monday, 02-06-2025 Max. Marks: 70
Time: 03:00 PM To 06:00 PM

Instructions: 1) Q. No. 1 is compulsory. It should be solved in the first 30 minutes in Answer Book Page no. 03 (Starting page of the Answer Book). Each question carries one mark.
2) Don't forget to Mention question paper set (P/Q/R/S) on top on page.
3) Figures to the right indicates full marks.
4) Make suitable assumptions if necessary and state them clearly.
5) Use of non-programmable single memory calculator is allowed.

Section - I

MCQ/Objective Type Questions

Duration: 30 Minutes Marks: 07

Q.1 Multiple Choice Questions. **07**

1) The process of killing the infective bacteria from the water and making it safe to the user is called _____.
a) Softening b) Disinfection
c) Coagulation d) Flocculation

2) Following sub branch of Civil Engineering is related with supply of water to crops.
a) Irrigation b) Environmental Engineering
c) Foundation Engineering d) Soil Mechanics

3) Portion of structure between ground level and floor level is called as _____.
a) Plinth b) Superstructure
c) Substructure d) None of the above

4) GPS stand for _____.
a) Government Public System
b) Global Positioning System
c) Global Police System
d) Geographic Positioning Sharing

5) Green buildings are recommended to _____.
a) Use green color b) Use farm house
c) Reduce global warming d) Achieve economy

6) A point on which both fore sight and back sight readings are taken is known as ____.

a) Change point
b) Fore sight point
c) Back sight point
d) None of the above

7) Following is the branch of Civil Engineering _____.

a) Mechanical Engineering
b) Electrical Engineering
c) Environmental Engineering
d) None of these

Section - II

MCQ/Objective Type Questions

Duration: 30 Minutes Marks: 07

Q.1 Choose the correct answer. **07**

1) Pressure cooker is _____ system.
a) open system b) close system
c) Isolated system d) Adiabatic System

2) The devices, pumps, compressor, refrigerators, air conditioners which require input energy for their operation are called _____.
a) power absorbing devices
b) power producing devices
c) power transferring devices
d) none

3) It is impossible to construct a heat engine which operates in a cycle produces no effect except production of work & exchange of heat with single reservoir.
a) Kelvin plank law b) Clausius law
c) Carnot theorem d) None

4) Which of the following is sliding part of lathe?
a) Headstock b) Tailstock
c) Both a and b d) None of these

5) Generally sheet metals are welded by following joining process _____.
a) Arc welding b) Spot welding
c) TIG welding d) None of these

6) The coefficient of friction in belt drive depends upon _____.
a) material of belt b) material of pulley
c) materials of belt and pulley d) belt velocity

7) Which of the following is not an extensive property of a thermodynamic system?
a) total mass b) total volume
c) total internal energy d) temperature

Day & Date: Monday, 02-06-2025 Max. Marks: 70
Time: 03:00 PM To 06:00 PM

Instructions: 1) Q.No.2 and Q.No.4 are short answer type questions.
2) Q.No.3 and Q.No.5 are long answer type questions.
3) Use of non-programmable single memory calculator is allowed.
4) Assume suitable data if required.

Section - I

Q.2 Answer any FIVE of the following. **15**

a) Which are the sub branches of civil engineering? Describe anyone. **03**

b) Write note on rain water harvesting. **03**

c) State the unit operations of water treatment plant & explain aeration. **03**

d) Explain the relevance of Civil Engineering branch with Mechanical engineering. **03**

e) State the function of following: **03**
i) Wall
ii) Chajja
iii) Lintel

f) State and explain classification of Solid waste. **03**

g) Explain the application of Remote Sensing Technique. **03**

Q.3 Solve any one out of (a) and (b) and solve any two out of (c) to (f). **13**

a) Following readings were taken with dumpy level: **05**
1.580, 0.635, 2.035, 1.765, 1.660, 0.925, 1.035, 1.960.
The instrument was shifted after third and fifth reading. The RL of first point was 950.000 m. Calculate the RL's of all other points by Rise and Fall method and apply check.

b) The following reading were taken with dumpy level and a 4m staff at every 20 m. 1.360, 1.745, 1.920, 0.970, 1.860, 2.340, 2.675, 1.895, 2.415, 2.630, 1.970, 2.320. The instrument was shifted after 3rd, 7th and 10th reading. The RL of first point was 170.000 m. Calculate the RL's of all other points by Height of Instrument method and apply check. **05**

c) Differentiate between load bearing structure & framed structure. **04**

d) Explain principles of surveying. **04**

e) Write a note on green building. **04**

f) State the classification of survey. **04**

Section – II

Q.2 Answer any FIVE of the following. **15**

a) Explain with neat sketch Centrifugal pump.

b) Derive an expression for velocity of fluid at the exit of nozzle, by applying Steady Flow Energy Equation (SFEE).

c) Explain Thermodynamic Property and its Types.

d) State and Explain Second law of Thermodynamics

e) What are the different modes of mechanical power transmission?

f) Difference between Flat Belt drive and V belt drive.

g) Compare Electrical Arc welding with Electrical resistance welding.

Q.3 Solve any one out of (a) and (b) and solve any two out of (c) to (f) **13**

a) Explain with neat sketch oxyacetylene welding. **05**

b) A cross belt connects two pulleys of 50 cm and 90 cm radius. The distance between shafts is 2 m. The initial tension in the belt is 700 N. If the coefficient of friction between belt and pulley is 0.3. Find the power transmitted if the smaller pulley rotates at 800 rpm. Also calculate the length of the belt. **05**

c) Explain with neat sketch Reciprocating Compressor. **04**

d) A system undergoes a cycle consisting of 3 Processes. The heat and work transfer are tabulated below. Determine the change in internal energy for each process. **04**

Process	Q (KJ)	W (KJ)	dU (KJ)
a-b	1800	520	-
b-c	-1400	0	-
c-d	-800	-325	-
d-a	1020	50	-

e) Sketch and describe in brief pillar drilling machine. **04**

f) Explain lathe machines operations with neat sketch. **04**

MCQ/Objective Type Questions

Duration: 30 Minutes Marks: 07

Q.1 Choose the correct answer. **07**

1) Which of the following is not an extensive property of a thermodynamic system?

a) total mass b) total volume
c) total internal energy d) temperature

2) Pressure cooker is _____ system.

a) open system b) close system
c) Isolated system d) Adiabatic System

3) The devices, pumps, compressor, refrigerators, air conditioners which require input energy for their operation are called _____.

a) power absorbing devices
b) power producing devices
c) power transferring devices
d) none

4) It is impossible to construct a heat engine which operates in a cycle produces no effect except production of work & exchange of heat with single reservoir.

a) Kelvin plank law b) Clausius law
c) Carnot theorem d) None

5) Which of the following is sliding part of lathe?

a) Headstock b) Tailstock
c) Both a and b d) None of these

6) Generally sheet metals are welded by following joining process _____.

a) Arc welding b) Spot welding
c) TIG welding d) None of these

7) The coefficient of friction in belt drive depends upon _____.

a) material of belt b) material of pulley
c) materials of belt and pulley d) belt velocity

F.Y. (B. Tech) (Sem-II) (New) (NEP CBCS) Examination: March/April-2025
Basics of Civil and Mechanical Engineering (BTCE0204/ BTME0204/ BTETE0204/ BTCSE0204/ BTEE0204)/ (BTECE0204)

Day & Date: Monday, 02-06-2025 Max. Marks: 70
Time: 03:00 PM To 06:00 PM

Instructions: 1) Q.No.2 and Q.No.4 are short answer type questions.
2) Q.No.3 and Q.No.5 are long answer type questions.
3) Use of non-programmable single memory calculator is allowed.
4) Assume suitable data if required.

Section - I

Q.2 Answer any FIVE of the following. **15**

a) Which are the sub branches of civil engineering? Describe anyone. **03**

b) Write note on rain water harvesting. **03**

c) State the unit operations of water treatment plant & explain aeration. **03**

d) Explain the relevance of Civil Engineering branch with Mechanical engineering. **03**

e) State the function of following: **03**
i) Wall
ii) Chajja
iii) Lintel

f) State and explain classification of Solid waste. **03**

g) Explain the application of Remote Sensing Technique. **03**

Q.3 Solve any one out of (a) and (b) and solve any two out of (c) to (f). **13**

a) Following readings were taken with dumpy level: **05**
1.580, 0.635, 2.035, 1.765, 1.660, 0.925, 1.035, 1.960.
The instrument was shifted after third and fifth reading. The RL of first point was 950.000 m. Calculate the RL's of all other points by Rise and Fall method and apply check.

b) The following reading were taken with dumpy level and a 4m staff at every 20 m. 1.360, 1.745, 1.920, 0.970, 1.860, 2.340, 2.675, 1.895, 2.415, 2.630, 1.970, 2.320. The instrument was shifted after 3rd, 7th and 10th reading. The RL of first point was 170.000 m. Calculate the RL's of all other points by Height of Instrument method and apply check. **05**

c) Differentiate between load bearing structure & framed structure. **04**

d) Explain principles of surveying. **04**

e) Write a note on green building. **04**

f) State the classification of survey. **04**

Section – II

Q.2 Answer any FIVE of the following. **15**

a) Explain with neat sketch Centrifugal pump.

b) Derive an expression for velocity of fluid at the exit of nozzle, by applying Steady Flow Energy Equation (SFEE).

c) Explain Thermodynamic Property and its Types.

d) State and Explain Second law of Thermodynamics

e) What are the different modes of mechanical power transmission?

f) Difference between Flat Belt drive and V belt drive.

g) Compare Electrical Arc welding with Electrical resistance welding.

Q.3 Solve any one out of (a) and (b) and solve any two out of (c) to (f) **13**

a) Explain with neat sketch oxyacetylene welding. **05**

b) A cross belt connects two pulleys of 50 cm and 90 cm radius. The distance between shafts is 2 m. The initial tension in the belt is 700 N. If the coefficient of friction between belt and pulley is 0.3. Find the power transmitted if the smaller pulley rotates at 800 rpm. Also calculate the length of the belt. **05**

c) Explain with neat sketch Reciprocating Compressor. **04**

d) A system undergoes a cycle consisting of 3 Processes. The heat and work transfer are tabulated below. Determine the change in internal energy for each process. **04**

Process	Q (KJ)	W (KJ)	dU (KJ)
a-b	1800	520	-
b-c	-1400	0	-
c-d	-800	-325	-
d-a	1020	50	-

e) Sketch and describe in brief pillar drilling machine. **04**

f) Explain lathe machines operations with neat sketch. **04**

Day & Date: Wednesday 04-June-2025 Max. Marks: 70
Time: 03:00 PM To 06:00 PM

Instructions: 1) Q. No. 1 is compulsory. It should be solved in the first 30 minutes in Answer Book Page no 03 (Starting page of the Answer Book). Each question carries one mark.
2) Don't forget to Mention question paper set (P/Q/R/S) on top of page.
3) Figures to the right indicates full marks.

MCQ/Objective Type Questions

Duration: 30 Minutes Marks:14

Q.1 Write the Correct Option **14**

1) Kirchhoff's voltage law is related to _____
a) junction voltages b) battery e.m.fs.
c) IR drops d) both (a) and (b)

2) Flux density B =?
a) $\mu_0\mu_r/\mathrm{H}$ b) $\mu_0\mathrm{H}/\mu_r$
c) $\mu_0\mu_r\mathrm{H}$ d) $(\mu_0)^2\ \mathrm{H}$

3) Magnetomotive force is mmf = ?
a) NS b) NI
c) Iϕ d) None of the above

4) The Reluctance of magnetic circuit is _____
a) mmf/ ϕ b) $\mu_0\mu_r/\mathrm{H}$
c) B/H d) None of the above

5) Ohms law state the current flowing through conductor is directly proportional to supply voltage.
a) True b) False

6) What is value of phase difference for voltage and current in purely Resistive circuit?
a) 180 degree b) 90 degree
c) 0 degree d) All of the above

7) For a certain load, the true power is 150 W and the reactive power is 125 VAR. The apparent power is _____
a) 19.52 W b) 195.2 W
c) 275 W d) 25 W

8) Addition of trivalent impurity to a semiconductor creates many _____
a) holes b) free electrons
c) valence electrons d) bound electrons

9) The forward voltage drop across the silicon diode is about _____
a) 2.5 V b) 0.3 V
c) 10 V d) 0.7 V

10) Ripple factor of full wave rectifier without filter is _____
a) 0.2 b) 0.48
c) 0.24 d) 1.21

11) The collector of transistor is _____ doped.
a) heavily b) moderately
c) lightly d) none of above

12) A transistor connected in common base configuration has _____
a) high input and low output resistance
b) low input and high output resistance
c) low input and low output resistance
d) high input and high output resistance

13) Which of the following expresses distributive law of Boolean algebra?
a) A.B.C = A.B + C b) A + (B + C) = (A + B) + (A + C)
c) A.(B + C) = (A.B) + (A. C) d) (A + B) + C = A + (B + C)

14) Octal equivalent of decimal number 375 is _____
a) 560 b) 576
c) 565 d) 567

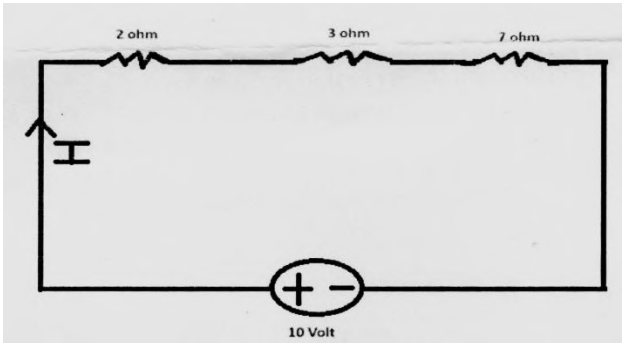
Section – I

Q.2 Solve any four **16**

a) State and explain Kirchhoff's laws with sign conventions and enlist its applications.

b) Calculate total resistance and power in each resistance.



c) Define and explain Faraday's Laws of electromagnetic Induction.

d) A mild steel ring has a radius of 50 mm and a cross-sectional area of 400 mm^2. A current of 0.5 A flows in a coil wound uniformly around the ring and the flux produced is 0.1 mWb. If the relative permeability at this value of current is 200 find (a) the reluctance of the mild steel and (b) the number of turns on the coil.

e) Define and derive the average value of alternating quantity.

f) A capacitance of 20 μF and a resistance of 100 ohms are connected in series across 120 V, 60 Hz mains. Determine the current and average power expended in the circuit.

Q.3 Solve any two **12**

a) Derive the equation for converting star-delta transformation.

b) Explain principle of operation, working and construction of Single-Phase transformer.

c) A coil is wound with 300 turns over a steel ring if relative permeability 900 having a mean circumference of 40 cm and a cross sectional area of 5 cm^2 and magnetic flux density 1.2 wb/m^2. If the coil has a resistance of 100 ohm and connected to 250 Volts supply, calculate a) the coil mmf b) field strength c) total flux d) reluctance of ring.

Section – II

Q.4 Solve any four. **16**

a) Explain formation of N-type & P-type extrinsic semiconductors.

b) Explain the operation of bridge rectifier with help of neat circuit diagram & waveform.

c) What are different configurations in which transistor can be operated? Compare all the configurations.

d) State and prove Demorgan's theorem.

e) Perform subtraction using 2's complement and convert it into Octal. $(175)_8$ - $(100)_8$

Q.5 Solve any two. **12**

a) Draw and explain basic and derived logic gates with symbol, truth table and equation. Also write the name of Universal logic gates.

b) Draw and explain input-output characteristics for CE configuration.

c) Compare Half wave, Center tap full wave and Bridge rectifier circuit.

a) Derive the equation for converting star-delta transformation.

b) Explain principle of operation, working and construction of Single-Phase transformer.

c) A coil is wound with 300 turns over a steel ring if relative permeability 900 having a mean circumference of 40 cm and a cross sectional area of 5 cm^2 and magnetic flux density 1.2 wb/m^2. If the coil has a resistance of 100 ohm and connected to 250 Volts supply, calculate a) the coil mmf b) field strength c) total flux d) reluctance of ring.

Section – II

Q.4 Solve any four. **16**

a) Explain formation of N-type & P-type extrinsic semiconductors.

b) Explain the operation of bridge rectifier with help of neat circuit diagram & waveform.

c) What are different configurations in which transistor can be operated? Compare all the configurations.

d) State and prove Demorgan's theorem.

e) Perform subtraction using 2's complement and convert it into Octal. $(175)_8$ - $(100)_8$

Q.5 Solve any two. **12**

a) Draw and explain basic and derived logic gates with symbol, truth table and equation. Also write the name of Universal logic gates.

b) Draw and explain input-output characteristics for CE configuration.

c) Compare Half wave, Center tap full wave and Bridge rectifier circuit.

Engineering Mathematics – II
(BTCE0203 / BTME0203 / BTETE0203 / BTCSE0203 / BTEE0203 / BTECE0203)

Day & Date: Friday, 06-June-2025 Max. Marks: 70
Time: 03:00 PM To 06:00 PM

Instructions: 1) Q. No. 1 is compulsory. It should be solved in the first 30 minutes in Answer Book Page no 03 (Starting page of the Answer Book). Each question carries one mark.
2) Don't forget to Mention question paper set (P/Q/R/S) on top of page.
3) Figures to the right indicates full marks.

MCQ/Objective Type Questions

Duration: 30 Minutes Marks:14

Q.1 Choose the correct alternatives from the options. **14**

1) The differential equation $\frac{dy}{dx} = \frac{a_1x+b_1y+c_1}{a_2x+b_2y+c_2}$ will be exact if _____.

a) $b_2 = -a_1$ b) $a_2 = -b_1$
c) $b_1 = a_2$ d) $a_1 = b_2$

2) The orthogonal trajectories of family of curve $xy = a$ is _____.

a) $x^2 + y^2 = c$ b) $y^2 = 4ax$
c) $x = cy$ d) $y^2 - x^2 = c$

3) The factorial series $\sum \frac{1}{n!}$ is _____.

a) Convergent b) Divergent
c) Oscillatory d) Absolutely convergent

4) The p −series $\sum_{n=1}^{\infty} \frac{1}{n^p}$ is convergent if ____.

a) $p \leq 1$ b) $p = 0$
c) $p > 1$ d) $p = \frac{1}{2}$

5) Analytic function is also called as _____.

a) Holomorphic b) Irregular
c) Harmonic d) Laplace

6) $\cos(x + iy) =$ _____.

a) $\cos x \cos y + \sin x \sin y$ b) $\cos x \cos hy + i \sin x \sin hy$
c) $\cos x \cos hy - i \sin x \sin hy$ d) $\cos hx \sin hy - i \sin hx \sin hy$

7) $[\cos\theta - i\sin\theta]^4 =$ _____

a) $\sin 4\theta - i\ \cos 4\theta$ b) $\cos 4\theta + i\ \sin 4\theta$

c) $\cos 4\theta - i\ \sin 4\theta$ d) $\sin 4\theta + i\ \cos 4\theta$

8) $\frac{B(m+1,n)}{B(m,n)}$ is equal to _____.

a) $\frac{m}{n}$ b) $\frac{m+1}{n}$

c) $\frac{m-1}{n}$ d) $\frac{m}{m+n}$

9) Which of the following is not true?

a) $\left\lceil \frac{1}{2} \right\rceil = \sqrt{\pi}$ b) $\left\lceil \frac{1}{4} \right\rceil \left\lceil \frac{3}{4} \right\rceil = \sqrt{2\pi}$

c) $\lceil n+1 \rceil = n \lceil n \rceil$ d) $\lceil -2 \rceil = \infty$

10) The numbers of loops of $r = a\sin 2\theta$ are _____.

a) Two b) Three

c) Four d) eight

11) For the curve $y^2(2a - x) = x^3$, the origin is _____.

a) Node b) Cusp

c) Isolated point d) None of these

12) The value of $\int_0^{\pi/2}\int_0^{\pi/2} \sin(x+y)dx\,dy$ is _____.

a) 0 b) 2

c) π d) -2

13) For $\int_0^{\infty}\int_x^{\infty} f(x,y)\,dydx$ by the change of order of integration, we get _____.

a) $\int_0^{\infty}\int_0^{x} f(x,y)\,dxdy$ b) $\int_x^{\infty}\int_0^{\infty} f(x,y)\,dxdy$

c) $\int_0^{\infty}\int_y^{\infty} f(x,y)\,dxdy$ d) $\int_0^{\infty}\int_0^{y} f(x,y)\,dxdy$

14) If density ρ (rho) at any point varies as the distance of the point from $y-$ axis then ρ equals to _____.

a) kx b) kxy

c) ky d) $k(x^2+y^2)$

Engineering Mathematics – II
(BTCE0203 / BTME0203 / BTETE0203 / BTCSE0203 / BTEE0203 / BTECE0203)

Day & Date: Friday, 06-June-2025 Max. Marks: 56
Time: 03:00 PM To 06:00 PM

Instructions: 1) All questions are compulsory.
2) Figures to the right indicate full marks.
3) Use of non-programmable calculator is allowed.

Section – I

Q.2 Solve any three of the following questions. **09**

a) Solve: $(2x - 2y + 5)dy = (x - y + 3)dx$

b) Solve $y(1 + xy)dx - x(1 - xy)dy = 0$

c) Find the analytic function whose real part is $e^x \cos y$

d) Find all the values of $x^4 + x^3 + x^2 + x + 1 = 0$

e) Test the convergence of $\frac{3}{4} + \left(\frac{4}{5}\right)^2 + \left(\frac{5}{6}\right)^3 + \cdots + \left(\frac{n+2}{n+3}\right)^n + \cdots$ by using Cauchy n^{th} root test.

Q.3 Solve any three of the following questions. **09**

a) Solve: $\frac{dy}{dx} + \frac{2x}{x^2+1}y = \frac{4x^2}{x^2+1}$

b) Find the orthogonal trajectory of family of cardioids $r = a(1 + \cos\theta)$

c) Check whether following function is analytic or not. If analytic then find its derivatives. $f(z) = z^2 + \bar{z}$

d) Find k such that $f(z) = \frac{1}{2}\log(x^2 + y^2) + i\tan^{-1}\frac{ky}{x}$ is analytic.

e) Test the convergence of $\sum \frac{3^n}{2^{n+3}}$

Q.4 Solve any two of the following questions. **10**

a) The charge q on the plate of the condenser of capacity C, charged through a resistance R by a steady voltage V satisfies the differential equation
$R\frac{dq}{dt} + \frac{q}{C} = V$. And $q = 0$ when $t = 0$. Show that $q = C.V.(1 - e^{-t/CR})$

b) Define absolute and conditional convergence. Examine the convergence of the series, $\sum \frac{(-1)^n(n^2+1)}{n^3}$

c) Show that $u = \cos x \cosh y$ is a harmonic function. Find its harmonic conjugate and corresponding harmonic function.

Section – II

Q.5 Solve any three of the following questions. **09**

a) Evaluate $\int_0^{\infty} x^4 e^{-x^6} dx$

b) Evaluate by using DUIS rule: $\int_0^{\infty} \frac{e^{-x}(1-\cos ax)}{x} dx$

c) Trace the following curves with full justification $r = a\,(1-\cos\theta\,)$

d) Change to polar co-ordinate system and evaluate $\int_0^a \int_y^a \frac{x\,dxdy}{(x^2+y^2)}$

e) Find the area by double integration common of the circles $r = a$ and $r = 2\,\alpha\cos\theta$

Q.6 Solve any three of the following questions. **09**

a) Evaluate $\int_0^3 x^3\,(3-x)^4 dx$

b) Trace the curve $x = a(t-\sin t), y = a(1+\cos t)$

c) Evaluate $\int_0^2 \int_1^2 \int_0^{yz} xyz\,dx\,dy\,dz$

d) Evaluate $\int\int e^{3x+4y} dxdy$ over the triangle $x = 0, y = 0, x+y = 1$

e) Find by double integration the mass of a thin plate bounded by $y^2 = x$ and $x^2 = y$. If the density at any point varies as the square of its distance from the origin.

Q.7 Solve any two of the following questions. **10**

a) State and Prove Duplication Formula.

b) Trace the following curves with full justification $xy^2 = a^2(a-x)$

c) Change the order of integration and evaluate $\int_0^{\infty} \int_0^{x} e^{\frac{-x^2}{y}} x\,dx\,dy$

Duration: 30 Minutes Marks:14

Q.1 Choose the correct alternatives from the options. **14**

1) $\cos(x+iy) =$ _____.

a) $\cos x \cos y + \sin x \sin y$ b) $\cos x \cos hy + i \sin x \sin hy$

c) $\cos x \cos hy - i \sin x \sin hy$ d) $\cos hx \sin hy - i \sin hx \sin hy$

2) $[\cos\theta - i \sin\theta]^4 =$ _____

a) $\sin 4\theta - i \cos 4\theta$ b) $\cos 4\theta + i \sin 4\theta$

c) $\cos 4\theta - i \sin 4\theta$ d) $\sin 4\theta + i \cos 4\theta$

3) $\frac{B(m+1,n)}{B(m,n)}$ is equal to _____.

a) $\frac{m}{n}$ b) $\frac{m+1}{n}$

c) $\frac{m-1}{n}$ d) $\frac{m}{m+n}$

4) Which of the following is not true?

a) $\lceil \frac{1}{2} = \sqrt{\pi}$ b) $\lceil \frac{1}{4} \lceil \frac{3}{4} = \sqrt{2\pi}$

c) $\lceil n+1 = n \lceil n$ d) $\lceil -2 = \infty$

5) The numbers of loops of $r = a \sin 2\theta$ are _____.

a) Two b) Three

c) Four d) eight

6) For the curve $y^2(2a-x) = x^3$, the origin is _____.

a) Node b) Cusp

c) Isolated point d) None of these

7) The value of $\int_0^{\pi/2}\int_0^{\pi/2}\sin(x+y)dx\,dy$ is _____.

a) 0 b) 2

c) π d) -2

8) For $\int_0^{\infty}\int_x^{\infty} f(x,y)\,dydx$ by the change of order of integration, we get _____.

a) $\int_0^{\infty}\int_0^{x} f(x,y)\,dxdy$ b) $\int_x^{\infty}\int_0^{\infty} f(x,y)\,dxdy$

c) $\int_0^{\infty}\int_y^{\infty} f(x,y)\,dxdy$ d) $\int_0^{\infty}\int_0^{y} f(x,y)\,dxdy$

9) If density ρ (rho) at any point varies as the distance of the point from $y-$ axis then ρ equals to _____.

a) kx b) kxy

c) ky d) $k(x^2+y^2)$

10) The differential equation $\frac{dy}{dx}=\frac{a_1x+b_1y+c_1}{a_2x+b_2y+c_2}$ will be exact if _____.

a) $b_2=-a_1$ b) $a_2=-b_1$

c) $b_1=a_2$ d) $a_1=b_2$

11) The orthogonal trajectories of family of curve $xy=a$ is _____.

a) $x^2+y^2=c$ b) $y^2=4ax$

c) $x=cy$ d) $y^2-x^2=c$

12) The factorial series $\sum\frac{1}{n!}$ is _____.

a) Convergent b) Divergent

c) Oscillatory d) Absolutely convergent

13) The $p-$series $\sum_{n=1}^{\infty}\frac{1}{n^p}$ is convergent if ____.

a) $p\leq 1$ b) $p=0$

c) $p>1$ d) $p=\frac{1}{2}$

14) Analytic function is also called as _____.

a) Holomorphic b) Irregular

c) Harmonic d) Laplace

F.Y (B. Tech.) (Sem-II) (New) (NEP CBCS) Examination: March/April-2025
Engineering Mathematics – II
(BTCE0203 / BTME0203 / BTETE0203 / BTCSE0203 / BTEE0203 / BTECE0203)

Day & Date: Friday, 06-June-2025 Max. Marks: 56
Time: 03:00 PM To 06:00 PM

Instructions: 1) All questions are compulsory.
2) Figures to the right indicate full marks.
3) Use of non-programmable calculator is allowed.

Section – I

Q.2 Solve any three of the following questions. **09**

a) Solve: $(2x - 2y + 5)dy = (x - y + 3)dx$

b) Solve $y(1 + xy)dx - x(1 - xy)dy = 0$

c) Find the analytic function whose real part is $e^x \cos y$

d) Find all the values of $x^4 + x^3 + x^2 + x + 1 = 0$

e) Test the convergence of $\frac{3}{4} + \left(\frac{4}{5}\right)^2 + \left(\frac{5}{6}\right)^3 + \cdots + \left(\frac{n+2}{n+3}\right)^n + \cdots$ by using Cauchy n^{th} root test.

Q.3 Solve any three of the following questions. **09**

a) Solve: $\frac{dy}{dx} + \frac{2x}{x^2+1}y = \frac{4x^2}{x^2+1}$

b) Find the orthogonal trajectory of family of cardioids $r = a(1 + \cos\theta)$

c) Check whether following function is analytic or not. If analytic then find its derivatives. $f(z) = z^2 + \bar{z}$

d) Find k such that $f(z) = \frac{1}{2}\log(x^2 + y^2) + i\tan^{-1}\frac{ky}{x}$ is analytic.

e) Test the convergence of $\sum \frac{3^n}{2^{n+3}}$

Q.4 Solve any two of the following questions. **10**

a) The charge q on the plate of the condenser of capacity C, charged through a resistance R by a steady voltage V satisfies the differential equation $R\frac{dq}{dt} + \frac{q}{C} = V$. And $q = 0$ when $t = 0$. Show that $q = C.V.(1 - e^{-t/CR})$

b) Define absolute and conditional convergence. Examine the convergence of the series, $\sum \frac{(-1)^n(n^2+1)}{n^3}$

c) Show that $u = \cos x \cosh y$ is a harmonic function. Find its harmonic conjugate and corresponding harmonic function.

Section – II

Q.5 Solve any three of the following questions. **09**

a) Evaluate $\int_0^{\infty} x^4 e^{-x^6} dx$

b) Evaluate by using DUIS rule: $\int_0^{\infty} \frac{e^{-x}(1-\cos ax)}{x} dx$

c) Trace the following curves with full justification $r = a\,(1-\cos\theta\,)$

d) Change to polar co-ordinate system and evaluate $\int_0^a \int_y^a \frac{x\,dxdy}{(x^2+y^2)}$

e) Find the area by double integration common of the circles $r = a$ and $r = 2\,\alpha\cos\theta$

Q.6 Solve any three of the following questions. **09**

a) Evaluate $\int_0^3 x^3\,(3-x)^4 dx$

b) Trace the curve $x = a(t-\sin t), y = a(1+\cos t)$

c) Evaluate $\int_0^2 \int_1^2 \int_0^{yz} xyz\,dx\,dy\,dz$

d) Evaluate $\int\int e^{3x+4y} dxdy$ over the triangle $x = 0, y = 0, x+y = 1$

e) Find by double integration the mass of a thin plate bounded by $y^2 = x$ and $x^2 = y$. If the density at any point varies as the square of its distance from the origin.

Q.7 Solve any two of the following questions. **10**

a) State and Prove Duplication Formula.

b) Trace the following curves with full justification $xy^2 = a^2(a-x)$

c) Change the order of integration and evaluate $\int_0^{\infty} \int_0^{x} e^{\frac{-x^2}{y}} x\,dx\,dy$

S.Y. (B.Tech.) (Civil Engineering) (Semester - I) (New) (NEP CBCS)
Examination: March/April – 2025
Structural Mechanics – I (CIVPCC-01)

Day & Date: Saturday 17-05-2025 Max. Marks: 70
Time: 03:00 PM To 06:00 PM

Instructions: 1) Q. No. 1 is compulsory. It should be solved in the first 30 minutes in Answer Book Page no 03 (Starting page of the Answer Book). Each question carries one mark.
2) Don't forget to Mention question paper set (P/Q/R/S) on top of page.
3) Figures to the right indicates full marks.

MCQ/Objective Type Questions

Duration: 30 Minutes Marks:14

Q.1 Choose correct alternative. **14**

1) The relation between modulus of elasticity (E), modulus of rigidity (G) and bulk modulus (K) is given as _____.
a) K+G / (3K+ G) b) 3 KG / (3K+ G)
c) 3 KG / (9K+ G) d) 9 KG / (3K+ G)

2) Modulus of rigidity is the ratio of _____.
a) Lateral strain and linear strain
b) linear stress and lateral strain
c) Shear stress and shear Strain
d) Shear strain and shear stress

3) The value on shear stress on principal plane is _____.
a) Zero b) maximum
c) minimum but positive d) Average value

4) The point of contra flexure is the point where _____.
a) B. M. changes its sign b) B. M. is minimum
c) S. F. is zero d) B. M. is maximum

5) A simply supported beam carries couple at a point on its span the shear force is _____.
a) Varies by cubic law b) Varies by parabolic law
c) Varies linearly d) Is uniform throughout

6) Polar moment of inertia of solid circular shaft of diameter D is given by _____.
a) $\pi D^3/32$ b) $\pi D^4/32$
c) $\pi D^3/64$ d) $\pi D^4/64$

7) A Shaft is simultaneously subjected to torque T and bending moment M. The ratio of maximum shear stress to bending stress is _____.
a) M/T b) T/M
c) 2M/T d) T/2M

8) Top most portion of three hinged arch is called as _____.
a) Crown b) Rise
c) Span d) Thrust

9) Where the bending stress of the section of beam is zero _____.
a) Top fiber
b) Bottom Fiber
c) Depend on the section of beam
d) Neutral axis of the section

10) The strength of beam section is determined by its _____.
a) Compressive stress b) Section modulus
c) Shear modulus d) Tensile stress

11) As per assumption of theory of bending, the beam is subjected to _____.
a) Pure bending b) Pure shear
c) Pure tension d) Simple shear

12) For T section maximum shear stress occurs at _____.
a) Top fiber of section b) Bottomfiber of section
c) At neutral axis of section d) None of above

13) For which structure influence line are drawn?
a) Statically indeterminate structure
b) Statically Determinate
c) Pin Jointed Truss
d) All of the above

14) If unit loads moves from left to right on S.S. beam the nature of ILD for reaction is?
a) Parabolic b) Hyperbolic
c) Inclined straight line d) Horizontal Straight line

Day & Date: Saturday 17-05-2025 Max. Marks: 56
Time: 03:00 PM To 06:00 PM

Instructions: 1) Q. No. 2 and Q. No. 6 are compulsory.
2) Solve any two from the remaining question of each section.
2) Figures to the right indicate full marks.
3) Assume suitable data is necessary and mention it clearly.

Section – I

Q.2 member LMNP is subjected to point load as shown in fig-I calculate force 'P' & change in length of the bar take E = 210 GPa. **10**

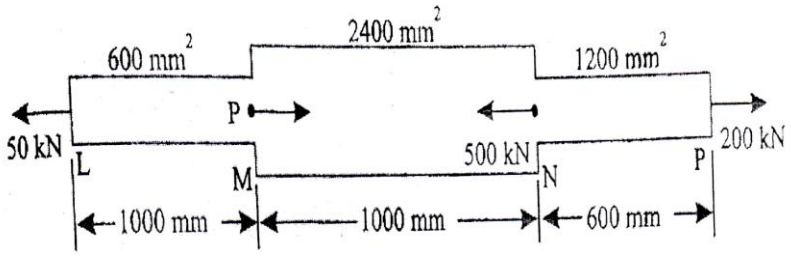

Fig-I

Q.3 At a point in a strained material within abody subjected to two mutually perpendicular directions, the stresses are 80 N/mm^2 (tensile) and 40 N/mm^2 (tensile) as shown in fig-II. Each of the above stresses is accompanied by a shear stress of 60 N/mm^2. Determine the normal stress, shear stress & resultant stress on plane inclined at 45^0 with axis of minor tensile stress. **09**

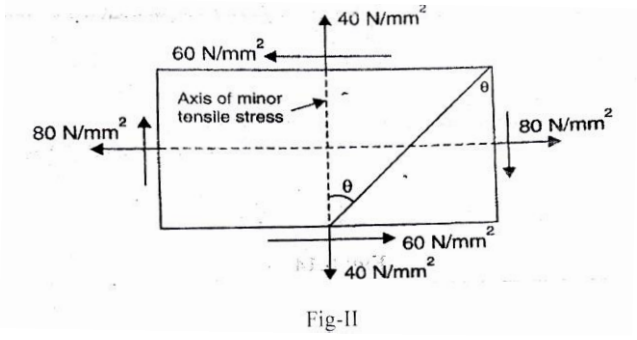

Fig-II

Q.4 Solid shaft is subjected to a bending moment of of 2.3 kNm and a twisting moment of 3.45 kNm. Find the diameter of the shaft when permissible tensile & shear stresses for the material of the shaft limited to 703 MN/m^2 & 421.8 MN/m^2 respectively. **09**

Q.5 Three hinged parabolic arch is loaded & supported as shown in fig-III. Determine normal thrust & radial shear at 4 m from the left support. **09**

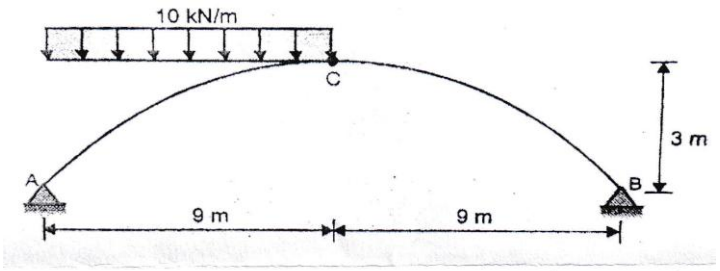

fig-III

Section – II

Q.6 Draw SFD and BMD for a beam as shown in fig-IV. **10**

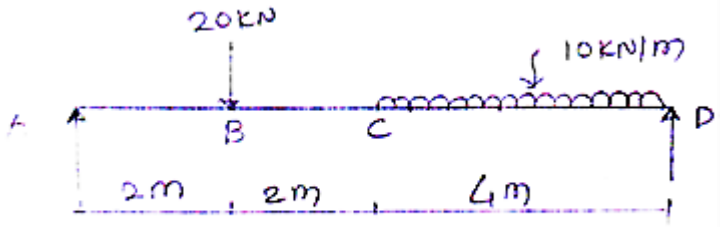

fig-IV

Q.7 Symmetric I section is 150 mm wide and 200mm deep. The flange thickness and web thickness is 10 mm. this section is used for cantilever beam having a span of 3 m subjected to uniformly distributed load. Find the maximum u.d.1. that can be supported if E= 200GPa and maximum allowable stress is180 MPa. Refer fig-V. **09**

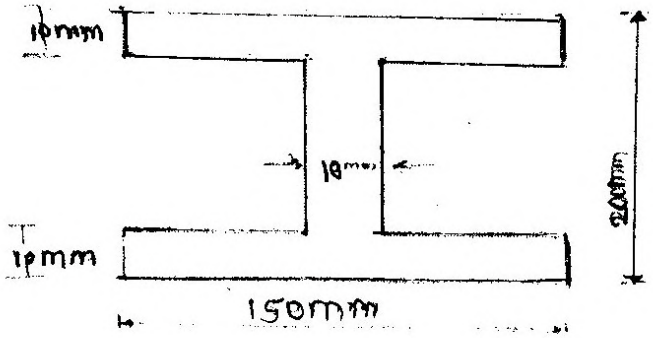

fig-V

Q.8 Simply supported beam of span 4 m. Carries UDL of 80 kN/m over the entire span. Draw the shear stress distribution diagram at support indicating all important values Refer fig-VI. **09**

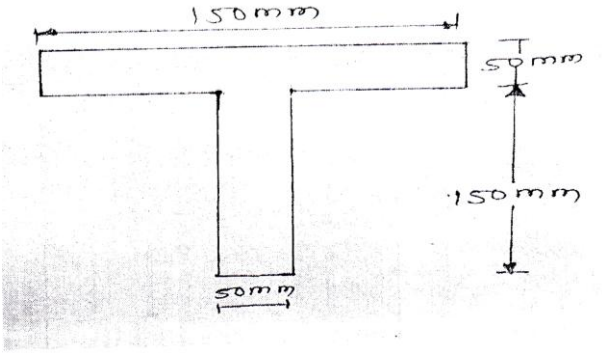

fig-VI

Q.9 Two wheel loads of 80 kN & 100 kN are spaced at 3 m. These loads are moving on a girder CD of span 13 m. Any wheel load can lead the other. Find the maximum positive & negative shear force at 5m from C. **09**

Time: 03:00 PM To 06:00 PM

Instructions: 1) Q. No. 2 and Q. No. 6 are compulsory.
2) Solve any two from the remaining question of each section.
2) Figures to the right indicate full marks.
3) Assume suitable data is necessary and mention it clearly.

Section – I

Q.2 member LMNP is subjected to point load as shown in fig-I calculate force 'P' & change in length of the bar take E = 210 GPa. **10**

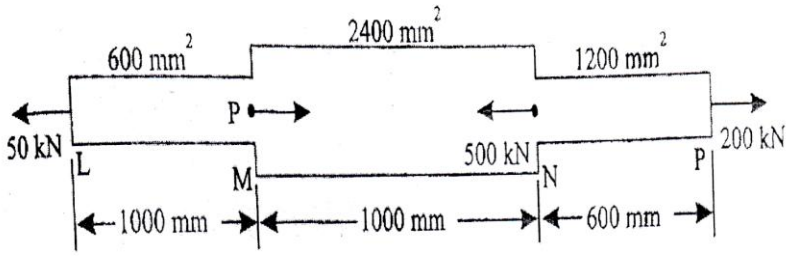

Fig-I

Q.3 At a point in a strained material within abody subjected to two mutually perpendicular directions, the stresses are 80 N/mm^2 (tensile) and 40 N/mm^2 (tensile) as shown in fig-II. Each of the above stresses is accompanied by a shear stress of 60 N/mm^2. Determine the normal stress, shear stress & resultant stress on plane inclined at 45^0 with axis of minor tensile stress. **09**

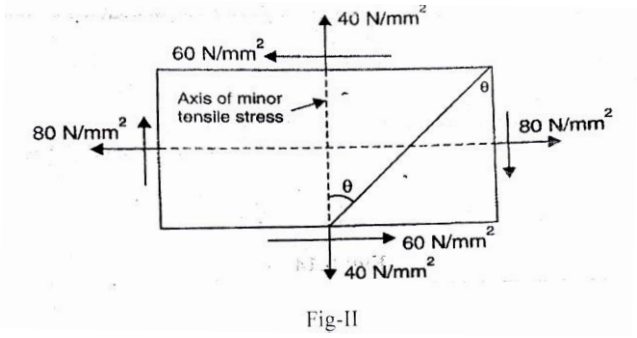

Fig-II

Q.4 Solid shaft is subjected to a bending moment of of 2.3 kNm and a twisting moment of 3.45 kNm. Find the diameter of the shaft when permissible tensile & shear stresses for the material of the shaft limited to 703 MN/m^2 & 421.8 MN/m^2 respectively. **09**

Q.5 Three hinged parabolic arch is loaded & supported as shown in fig-III. Determine normal thrust & radial shear at 4 m from the left support. **09**

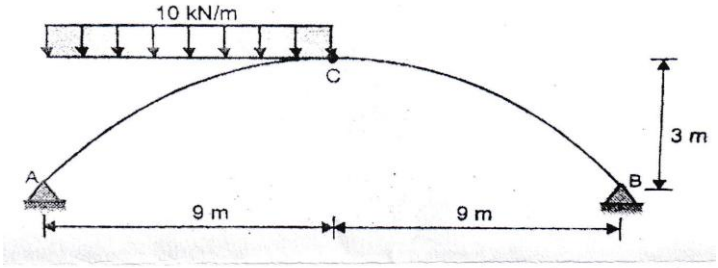

fig-III

Section – II

Q.6 Draw SFD and BMD for a beam as shown in fig-IV. **10**

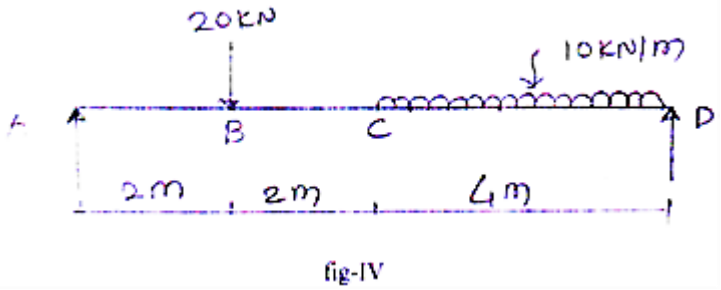

fig-IV

Q.7 Symmetric I section is 150 mm wide and 200mm deep. The flange thickness and web thickness is 10 mm. this section is used for cantilever beam having a span of 3 m subjected to uniformly distributed load. Find the maximum u.d.1. that can be supported if E= 200GPa and maximum allowable stress is180 MPa. Refer fig-V. **09**

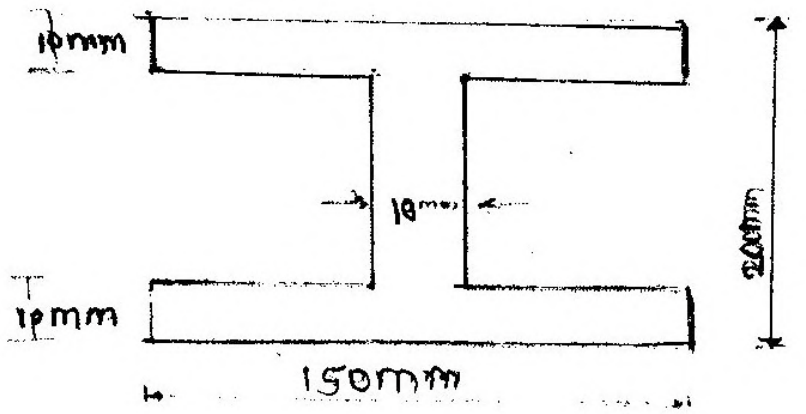

fig-V

Q.8 Simply supported beam of span 4 m. Carries UDL of 80 kN/m over the entire span. Draw the shear stress distribution diagram at support indicating all important values Refer fig-VI. **09**

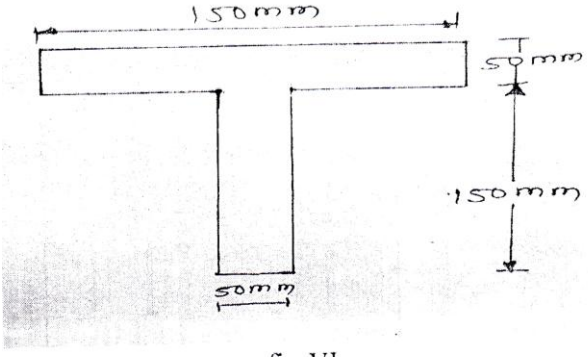

fig-VI

Q.9 Two wheel loads of 80 kN & 100 kN are spaced at 3 m. These loads are moving on a girder CD of span 13 m. Any wheel load can lead the other. Find the maximum positive & negative shear force at 5m from C. **09**

S.Y. (B.Tech.) (Sem-I) (New) (NEP CBCS) Examination: March/April-2025
CIVIL ENGINEERING
Fluid Mechanics and Machines (CIVPCC-02)

Day & Date: Monday 19-05-2025 Max. Marks: 70
Time: 03:00 PM To 06:00 PM

Instructions: 1) Q. No. 1 is compulsory. It should be solved in the first 30 minutes in Answer Book Page no 03 (Starting page of the Answer Book). Each question carries one mark.
2) Don't forget to Mention question paper set (P/Q/R/S) on top of page.
3) Assume suitable data if necessary and state it clearly.
4) Figures to the right indicates full marks.

MCQ/Objective Type Questions

Duration: 30 Minutes Marks:14

Q.1 Choose the correct alternatives from the given options. 14

1) Newton's law of viscosity is given by the relation _____.

a) $\tau = \mu^2 dudy$ b) $\tau = \sqrt{\mu} dudyc$

c) $\tau = \mu \frac{du}{dy}$ d) $\tau = \mu^{3/2} dudy$

2) Raindrops are spherical in shape because of _____.

a) Capillarity b) Surface Tension
c) Downward motion d) Acceleration due to gravity

3) Submerged body will be in stable equilibrium when _____.

a) M is above G b) M is below G
c) B is above G d) B is below G

4) The line traced out by a given particle as it flows from one point to another is called _____.

a) path line b) Streamline
c) streak line d) none of the above

5) The point of application of the total pressure on the surface is _____.

a) centroid of the surface b) centre of pressure
c) either of the above d) none of the above

6) The length of a convergent section of the Venturimeter is _____ divergent section.

a) is equal to b) is more than
c) is less than d) none of the above

7) If the liquid hasa specific weight of 7000 N/m^3 then its specific gravity is _____.

a) 0.832 b) 0.981
c) 0.965 d) 0.713

8) When pipes are connected in series, the rate of flow _____.

a) is the same as flowing through each pipe
b) is equal to the sum of the rate of flow in each pipe
c) is equal to the reciprocal of the sum of the rate of flow in each pipe
d) None of the above

9) The following is not a minor head loss _____.

a) loss at the exit of the pipe
b) loss at the entrance of the pipe
c) friction loss
d) Noe of these

10) Given that, N = speed; P = power, H = head, the specific speed of a hydraulic turbine is given by _____.

a) $\frac{N\sqrt{P}}{H^{3/2}}$ b) $\frac{N\sqrt{P}}{H^{5/4}}$
c) $\frac{N\sqrt{P}}{H^{4/5}}$ d) $\frac{P\sqrt{N}}{H^{5/4}}$

11) The force exerted by the jet of water on a stationary vertical plate in the direction of motion of the plate is given by _____.

a) ρaV b) ρaV^3
c) ρa^2V d) ρaV^2

12) In a centrifugal pump the regulating valve is provided on _____.

a) the suction pipe b) the delivery pipe
c) the casing d) none of the above

13) Total Energy Line (T.E.L.) represents the sum of _____.

a) pressure head, kinetic head and datum head
b) pressure head and kinetic head
c) kinetic head and datum head
d) pressure head and datum head

14) Which of the following turbines is not the reaction turbine?

a) Kaplan b) Propeller
c) Francis d) Pelton wheel

Set **P**

S.Y. (B.Tech.) (Sem-I) (New) (NEP CBCS) Examination: March/April-2025
CIVIL ENGINEERING
Fluid Mechanics and Machines (CIVPCC-02)

Day & Date: Monday 19-05-2025 Max. Marks: 56
Time: 03:00 PM To 06:00 PM

Instructions: 1) In Section - I, all questions are compulsory.
2) In Section II, Q. 5 is compulsory, and you must attempt any two questions from the remaining questions.
3) Figures to the right indicate full marks.
4) Assume suitable data if necessary and state it clearly.
5) Use of a non-programmable calculator is allowed.

Section – I

Q.2 Attempt any Two. **08**

a) Define and Write the Units.
i) Viscosity
ii) Specific Gravity
iii) Compressibility
iv) Capillarity

b) A rectangular plate 1.2m X 0.4 m, weighing 970 N slides down a 45° inclined surface at a uniform velocity of 2.25 m/s. If a 2mm gap between the plate and the inclined surface is filled with oil, determine the oil's viscosity.

c) With a neat sketch explain the conditions of the equilibrium for floating and submerged body.

Q.3 Attempt any Two. **10**

a) Derive an expression with a neat sketch for the total pressure and centre of pressure for the inclined plane surface submerged in the liquid.

b) Determine the total pressure on a circular plate of diameter 1.5 m which is placed vertically in water in such a way that the center of the plate is 3 m below the free surface of the water. Find the position of the centre of pressure also.

c) The right limb of a simple U-tube manometer containing mercury is open to the atmosphere while the left limb is connected to a pipe in which a fluid of sp.gr. 0.9 is flowing. The centre of the pipe is 12 cm below the level of mercury in the right limb. Find the pressure of fluid in the pipe if the difference in mercury level in the two limbs is 20 cm.

Q.4 Solve any Two of the following. **10**

a) Define:
- i) Steady flow
- ii) Uniform flow
- iii) Compressible flow
- iv) Laminar flow
- v) Rate of flow

b) The velocity potential function $\phi = 5(x^2 - y^2)$. Calculate velocity components at the point (4, 5); also find the magnitude and direction of resultant velocity.

c) An oil of specific gravity 0.8 is flowing through a venturi meter having an inlet diameter of 20 cm and a throat diameter of 10 cm. The oil-mercury differential manometer shows a reading of 25 cm. Calculate the discharge of oil through a horizontal Venturimeter. Take Cd=0.98

Section – II

Q.5 Solve any two of the following. **10**

a) Find the discharge of water flowing over a rectangular notch of 2m length when the constant head over the notch is 300mm. Take Cd = 0.62.

b) Find the displacement thickness, momentum thickness, energy thickness and shape factor for the velocity distribution in the boundary layer given by $u/U = y/\delta$.

c) Show that for triangular notch 1% of error in measurement of the head causes a 2.5% error in measurement of discharge.

Q.6 a) Derive Darcy Weisbach equation for head loss due to friction in pipe flow. Draw the sketch. **04**

b) Determine the difference in elevation between water surfaces in two tanks which are connected by horizontal pipe of diameter 30cm and length 400m.The discharge through the pipe is 300 lps. Consider all losses and assume f=0.008 **05**

Q.7 a) Derive an expression for force exerted by a jet on a stationary curved plate, when the jet strikes at the centre of a symmetrically curved plate. **04**

b) A centrifugal pump delivers water against a net head of 14.5m and a design speed of 1000 rpm. The vane angle is 30° curved back. If the impeller diameter is 300 mm and the outlet width is 50 mm. Determine discharge of pump if manometric efficiency is 95% **05**

Q.8 a) What are the different efficiencies of centrifugal pump? Explain them. **04**

b) A turbine is to operate under a head of 25m at 200 rpm. The discharge is $9m^3/s$. If the efficiency is 90%, Determine: **05**
- i) Power generated
- ii) Specific speed of turbine
- iii) Identify the type of turbine

10) Newton's law of viscosity is given by the relation _____.

a) $\tau = \mu^2 dudy$ b) $\tau = \sqrt{\mu} dudyc$

c) $\tau = \mu \frac{du}{dy}$ d) $\tau = \mu^{3/2} dudy$

11) Raindrops are spherical in shape because of _____.

a) Capillarity b) Surface Tension

c) Downward motion d) Acceleration due to gravity

12) Submerged body will be in stable equilibrium when _____.

a) M is above G b) M is below G

c) B is above G d) B is below G

13) The line traced out by a given particle as it flows from one point to another is called _____.

a) path line b) Streamline

c) streak line d) none of the above

14) The point of application of the total pressure on the surface is _____.

a) centroid of the surface b) centre of pressure

c) either of the above d) none of the above

Seat No.		Set	S

S.Y. (B.Tech.) (Sem-I) (New) (NEP CBCS) Examination: March/April-2025
CIVIL ENGINEERING
Fluid Mechanics and Machines (CIVPCC-02)

Day & Date: Monday 19-05-2025 Max. Marks: 56
Time: 03:00 PM To 06:00 PM

Instructions: 1) In Section - I, all questions are compulsory.
2) In Section II, Q. 5 is compulsory, and you must attempt any two questions from the remaining questions.
3) Figures to the right indicate full marks.
4) Assume suitable data if necessary and state it clearly.
5) Use of a non-programmable calculator is allowed.

Section – I

Q.2 Attempt any Two. **08**

a) Define and Write the Units.
i) Viscosity
ii) Specific Gravity
iii) Compressibility
iv) Capillarity

b) A rectangular plate 1.2m X 0.4 m, weighing 970 N slides down a 45° inclined surface at a uniform velocity of 2.25 m/s. If a 2mm gap between the plate and the inclined surface is filled with oil, determine the oil's viscosity.

c) With a neat sketch explain the conditions of the equilibrium for floating and submerged body.

Q.3 Attempt any Two. **10**

a) Derive an expression with a neat sketch for the total pressure and centre of pressure for the inclined plane surface submerged in the liquid.

b) Determine the total pressure on a circular plate of diameter 1.5 m which is placed vertically in water in such a way that the center of the plate is 3 m below the free surface of the water. Find the position of the centre of pressure also.

c) The right limb of a simple U-tube manometer containing mercury is open to the atmosphere while the left limb is connected to a pipe in which a fluid of sp.gr. 0.9 is flowing. The centre of the pipe is 12 cm below the level of mercury in the right limb. Find the pressure of fluid in the pipe if the difference in mercury level in the two limbs is 20 cm.

Q.4 Solve any Two of the following. **10**

a) Define:
- i) Steady flow
- ii) Uniform flow
- iii) Compressible flow
- iv) Laminar flow
- v) Rate of flow

b) The velocity potential function $\phi = 5(x^2 - y^2)$. Calculate velocity components at the point (4, 5); also find the magnitude and direction of resultant velocity.

c) An oil of specific gravity 0.8 is flowing through a venturi meter having an inlet diameter of 20 cm and a throat diameter of 10 cm. The oil-mercury differential manometer shows a reading of 25 cm. Calculate the discharge of oil through a horizontal Venturimeter. Take Cd=0.98

Section – II

Q.5 Solve any two of the following. **10**

a) Find the discharge of water flowing over a rectangular notch of 2m length when the constant head over the notch is 300mm. Take Cd = 0.62.

b) Find the displacement thickness, momentum thickness, energy thickness and shape factor for the velocity distribution in the boundary layer given by $u/U = y/\delta$.

c) Show that for triangular notch 1% of error in measurement of the head causes a 2.5% error in measurement of discharge.

Q.6 a) Derive Darcy Weisbach equation for head loss due to friction in pipe flow. Draw the sketch. **04**

b) Determine the difference in elevation between water surfaces in two tanks which are connected by horizontal pipe of diameter 30cm and length 400m.The discharge through the pipe is 300 lps. Consider all losses and assume f=0.008 **05**

Q.7 a) Derive an expression for force exerted by a jet on a stationary curved plate, when the jet strikes at the centre of a symmetrically curved plate. **04**

b) A centrifugal pump delivers water against a net head of 14.5m and a design speed of 1000 rpm. The vane angle is 30° curved back. If the impeller diameter is 300 mm and the outlet width is 50 mm. Determine discharge of pump if manometric efficiency is 95% **05**

Q.8 a) What are the different efficiencies of centrifugal pump? Explain them. **04**

b) A turbine is to operate under a head of 25m at 200 rpm. The discharge is $9m^3/s$. If the efficiency is 90%, Determine: **05**
- i) Power generated
- ii) Specific speed of turbine
- iii) Identify the type of turbine

Day & Date: Tuesday 20-05-2025 Max. Marks: 70
Time: 03:00 PM To 06:00 PM

Instructions: 1) Q. No. 1 is compulsory. It should be solved in the first 30 minutes in Answer Book Page no 03 (Starting page of the Answer Book). Each question carries one mark.
2) Don't forget to Mention question paper set (P/Q/R/S) on top of page.
3) Figures to the right indicates full marks.

MCQ/Objective Type Questions

Duration: 30 Minutes Marks:14

Q.1 Choose the correct Answer. **14**

1) The line joining points of equal elevation is known as a _____.
a) Horizontal line b) Contour line
c) Level line d) None

2) The vertical distance between Two adjacent contour lines is called a _____.
a) Contour gradient b) Vertical equivalent
c) Contour internal d) None

3) Balancing of traverse is done according to the _____.
a) Transit rule b) Primordial rule
c) Trapezoidal rule d) None

4) Levelling deals with measurement in _____.
a) Vertical plane b) Horizontal plane
c) Inclined plane d) All the above

5) Staff reading taken over a station whose elevation is known is called _____.
a) Back sight b) Fore sight
c) Intermediate sight d) None of above

6) A series of straight parallel and equally spaced contours represent ____.
a) Hills b) Ponds
c) Plane surface d) Desert

7) The usual longitudinal overlap in Aerial photogrammetry is _____.
a) 25% b) 30%
c) 50% d) 60%

8) The characteristics of Gales traverse table is that independent coordinates of all points are brought to the _____.

a) fourth quadrant b) first quadrant
c) third quadrant d) none

9) The Speed of Light is _____.

a) $3 \times 10^8 \text{ m/s}$ b) $2 \times 10^9 \text{ m/s}$
c) $3 \times 10^9 \text{ m/s}$ d) $2 \times 10^8 \text{ m/s}$

10) The distance in EDM is measured by _____.

a) Time taken for an electromagnetic wave to travel between two points and multiplying speed of wave
b) Frequency of wave
c) wave length
d) none of above

11) Total station can be used for _____.

a) Missing line measurement b) Remote elevation measurement
c) Slake out d) All of these

12) If θ be the RB of a line of length L then Latitude is given by _____.

a) $L \cos\theta$ b) $L \sin\theta$
c) $L \operatorname{cosec}\theta$ d) none

13) The Number of orbital planes and satellites in each orbits are respective _____.

a) 6, 4 b) 4, 6
c) 4, 3 d) 3, 4

14) Aerial photographs are _____.

a) Perspective projections b) Orthographic projection
c) Iso metric Projection d) Gnomonic Projection

MCQ/Objective Type Questions

Duration: 30 Minutes Marks:14

Q.1 Choose the correct Answer. **14**

1) If a linear differential equation with constant coefficients and r.h.s. equal to zero has a real root m_1 repeated Two times, then the corresponding part of the integral is _____.

a) $(c_1 + c_2)e^{m_1 X}$ b) $(c_1 + c_2 x)e^{m_1 X}$

c) $(c_1 x + c_2 x^2)e^{m_1 X}$ d) $(c_1 + c_2 x^3)e^{m_1 X}$

2) $\frac{1}{D-a} X$ is equal to _____.

a) $\int X e^{ax} dx$ b) $e^{ax} \int X . e^{-ax} dx$

c) $\int X e^{-ax} dx$ d) $e^{-ax} \int X e^{-ax} dx$

3) $\frac{1}{D+1}(\log x + \frac{1}{x})$ is equal to _____.

a) e^x b) 1

c) x d) $\log x$

4) The solution of $q = e^{-p}$ is _____.

a) $z = ax + by + c$ b) $z = a^x + b^y + c$

c) $z = ax + y^{-b} + c$ d) $z = ax + e^{-a} y + c$

5) The solution of the equation $pq = p + q$ is _____.

a) $z = ax + (a+1)y + c$

b) $z = (a+1)x + a(a-1)y + c$

c) $z = (a-1)x + a(a+1)y + c$

d) $z(a-1) = a(a-1)x + ay + c$

6) If μ_1', μ_2', μ_3', μ_4' are the first four moments of the distribution about certain number then fourth moment μ_4 of the distribution about the arithmetic mean is given by _____.

a) $\mu_4' + 4\mu_3'\mu_1' + 6\mu_2'(\mu_1')^4 + 3(\mu_1')^4$

b) $\mu_4' - 4\mu_3'\mu_1' + 6\mu_2'(\mu_1')^2 - 3(\mu_1')^4$

c) $\mu_4' + 4\mu_3'\mu_1' - 6\mu_2'(\mu_1')^4 - 3(\mu_1')^4$

d) $\mu_4' + 2\mu_3'\mu_1' + 6\mu_2'(\mu_1')^4 - 3(\mu_1')^4$

7) Coefficient of kurtosis β_2 is given by _____.

a) $\frac{\mu_4}{\mu_3}$ b) $\frac{\mu_4}{\mu_2^2}$

c) $\frac{\mu_3}{\mu_2^2}$ d) $\frac{\mu_4}{\mu_2^3}$

8) If value of x for normal distribution is 35, mean of normal distribution is 65 and standard deviation is 25 then standardized random variable is ___.

a) -1.5 b) -1.7

c) -1.2 d) -4

9) A continuous random variable has the following probability density function $f(x) = kx(1-x), 0 \le x \le 1$ then $k =$ _____.

a) 6 b) 2

c) 3 d) 5

10) The area under the standard normal curve from $z = -\infty$ to $z = 0$ is ___.

a) 1 b) ½

c) 3/2 d) 0

11) If X, Y denotes the deviations from their means and if $\sum X^2 = 40, \sum Y^2 = 100, \sum XY = 50,$ then $r =$ _____.

a) 0.63 b) 0.82

c) 0.91 d) 0.79

12) The line of regression of x and y is given by _____.

a) $x - \bar{x} = b_{xy}(y - \bar{y})$ b) $x - \bar{y} = b_{xy}(x - \bar{x})$

c) $x - \bar{x} = b_{xx}(y - \bar{y})$ d) $x - \bar{x} = b_{yx}(y - \bar{y})$

13) The following mistakes per page were found in a book.

No. of mistakes:	0	1	2	3	4
Pages:	211	90	19	5	0

Then χ^2 is _____.

a) 0.59 b) 0.069

c) 0.81 d) 0.79

14) The 't-statistic' is defined as _____.

a) $\frac{\bar{x}-\mu}{\sigma/\sqrt{n}}$ b) $\frac{\bar{x}-\mu}{s/\sqrt{n}}$

c) $\frac{\bar{x}-\mu}{\sigma/n}$ d) $\frac{\bar{x}-\mu}{s/n}$

Set P

S. Y. (B.Tech.) (Sem-I) (New) (NEP CBCS) Examination: March/April-2025
CIVIL ENGINEERING
Advanced Mathematics and Statistics (OE-01A)

Day & Date: Wednesday 21-05-2025 Max. Marks: 56
Time: 03:00 PM To 06:00 PM

Instructions: 1) All questions are compulsory.
2) Figures to the right indicate full marks.

Section – I

Q.2 Attempt any Three. **09**

a) Find the Arithmetic mean, Median and standard deviation for the following frequency distribution.

x	5	9	12	15	20	24	30	35	42	49
f	3	6	8	8	9	10	8	7	6	2

b) Solve $(D^2 - 4D + 4)y = 8.x^2e^{2x}\sin 2x$

c) Solve $(D^2 + D + 1)y = \sin 2x$

d) Calculate Mode for the following frequency distribution.

C.I.	00-10	10-20	20-30	30-40	40-50	50-60	60-70
Frequency (f)	4	7	8	12	25	18	10

e) Solve $p^2q^3 = x^2y^3$

Q.3 Attempt any Three. **09**

a) Solve: $(2D + 1)^2y = 4e^{-x/2}$

b) Solve: $p + q = pqz$

c) Find Q_1, Q_2, Q_3 from the following data.
5,7,12,14,15,22,25,30,36,42,53

d) Solve $x(y - z)p + y(z - x)q = z(x - y)$

e) Solve $(D^3 - 3D + 2)y = x$

Q.4 Attempt any Two **10**

a) The first four moments of a distribution about the value 5 are 2,20,40 and 50. from the given information obtain the first four central moments, coefficient of skewness and kurtosis.

b) Solve the following differential equation by the method of separation of variables.
$\frac{\partial z}{\partial x} - 2\frac{\partial z}{\partial y} = z$ given that $z(x, 0) = 3e^{-5x}$

c) Solve: $(D^2 - D - 2)y = 2\log x + \frac{1}{x} + \frac{1}{x^2}$

Section – II

Q.5 Attempt any three of the following. **09**

a) Find the value of k if each of the following functions is a probability density function.

$$f(x) = \begin{cases} kx^2(1-x^3), & 0 \le x \le 1 \\ 0, & \text{otherwise} \end{cases}$$

b) The mean life time of 100 fluorescent light bulbs produced by a Company is computed to be 1570 Hrs. with S.D. of 120 Hrs. If μ is the mean lifetime of all the bulbs produced by the Company, Test the Hypothesis $\mu = 1600$ Hrs. Against the alternative Hypothesis $\mu \neq 1600$ Hrs. using 5% level of Significance.
(Given Expected value at 5% LOS is 1.96)

c) Calculate the coefficient of correlation between height of father and height of son from the following data.

Height of father	64	65	66	67	68	69	70
Height of son	66	67	65	68	70	68	71

d) Two independent random sample have the following data,
$\overline{x_1} = 110, \sigma_1 = 25, n_1 = 16$
$\overline{x_2} = 120, \sigma_2 = 30, n_2 = 9$
If σ_1 and σ_2 are the S. D. of the populations. Test the hypothesis that $\mu_1 = \mu_2$ at 5% level of significance. (The table value of t at $\alpha = 0.05$ for $v = 23$ degrees of freedom is 2.069)

e) If in a lot of 500 solenoids 25 are defective, find the probability that there will be 0, 1, 2 defective solenoids in a random sample of 20 solenoids.

Q.6 Attempt any three of the following. **09**

a) If two independent random samples of sizes 15 and 8 have respectively the following mean and population standard deviations, $\overline{x_1} = 980, \overline{x_2} = 1012; \sigma_1 = 75, \sigma_2 = 80$. Test the hypothesis that $\mu_1 = \mu_2$ at 5% level of significance.
(Given Expected value at 5% LOS with 21 DF is 2.080)

b) The number of telephone calls received by an operator in a ten-minute interval follows a Poisson distribution with mean 1. What is the probability of receiving (i) no call, (ii) less than four calls, in the interval? What is the most likely number of calls?

c) Calculate the equations of the lines of regression. Given
Mean of $x = 50.07$, S.D. of $x = 5.26$
Mean of $y = 9.98$, S.D. of $y = 2.59$
$r = 0.898$

d) In an intelligence test administered to 1000 children the mean score was, 42 with s.d. 24. Find the number of children (i) scoring more than 60 and (ii) between 20 and 40 assuming the distribution to be normal.
(Given: For S.N.V. z area from z = 0 to z = 0.75 is 0.2734, that between z = 0 and z = 0.9167 is 0.3202 and that between z = 0 to z = 0.08333 is 0.0332.)

e) Fit a Straight line $y = a + bx$ to the following data.

x	0	1	2	3	4	5
y	1	2	3	4.5	6	7.5

Q.7 Attempt any Two. **10**

a) Fit a Poisson's distribution to the following data :

X	0	1	2	3	4	Total
f	112	63	20	4	1	200

b) Obtain a second-degree curve to the following data.

Year	1965	1966	1967	1968	1969	1970	1971	1972
Profit (in Corers Rs.)	125	140	165	195	200	215	220	230

Also estimate the profit in 1973.

c) Ten school boys were given a test in Statistics and their scores were recorded. They were given a month's special coaching and a second test was given to them in the same subject at the end of the coaching period. Test if the marks given below give evidence to the fact that the students are benefitted by coaching.
Marks in test I: 70, 68, 56, 75, 80, 90, 68, 75, 56, 58
Marks in Test II: 68, 70, 52, 73, 75, 78, 80, 92, 54, 55
(Given that value of t_α at 5 % LOS for v = 9 degrees of freedom is 1.86 for one tailed test)

Seat No.

S. Y. (B.Tech.) (Sem-I) (New) (NEP CBCS) Examination: March/April-2025
CIVIL ENGINEERING
Advanced Mathematics and Statistics (OE-01A)

Day & Date: Wednesday 21-05-2025 Max. Marks: 70
Time: 03:00 PM To 06:00 PM

Instructions: 1) Q. No. 1 is compulsory. It should be solved in the first 30 minutes in Answer Book Page no 03 (Starting page of the Answer Book). Each question carries one mark.
2) Don't forget to Mention question paper set (P/Q/R/S) on top of page.
3) Figures to the right indicates full marks.

MCQ/Objective Type Questions

Duration: 30 Minutes Marks:14

Q.1 Choose the correct Answer. 14

1) If value of x for normal distribution is 35, mean of normal distribution is 65 and standard deviation is 25 then standardized random variable is ___.
a) -1.5 b) -1.7
c) -1.2 d) -4

2) A continuous random variable has the following probability density function $f(x) = kx(1-x), 0 \le x \le 1$ then $k =$ _____.
a) 6 b) 2
c) 3 d) 5

3) The area under the standard normal curve from $z = -\infty$ to $z = 0$ is ___.
a) 1 b) ½
c) 3/2 d) 0

4) If X, Y denotes the deviations from their means and if $\sum X^2 = 40, \sum Y^2 = 100, \sum XY = 50,$ then $r =$ _____.
a) 0.63 b) 0.82
c) 0.91 d) 0.79

5) The line of regression of x and y is given by _____.
a) $x - \bar{x} = b_{xy}(y - \bar{y})$ b) $x - \bar{y} = b_{xy}(x - \bar{x})$
c) $x - \bar{x} = b_{xx}(y - \bar{y})$ d) $x - \bar{x} = b_{yx}(y - \bar{y})$

6) The following mistakes per page were found in a book.

No. of mistakes:	0	1	2	3	4
Pages:	211	90	19	5	0

Then χ^2 is _____.
a) 0.59 b) 0.069
c) 0.81 d) 0.79

7) The 't-statistic' is defined as _____.

a) $\frac{\bar{x}-\mu}{\sigma/\sqrt{n}}$ b) $\frac{\bar{x}-\mu}{s/\sqrt{n}}$

c) $\frac{\bar{x}-\mu}{\sigma/n}$ d) $\frac{\bar{x}-\mu}{s/n}$

8) If a linear differential equation with constant coefficients and r.h.s. equal to zero has a real root m_1 repeated Two times, then the corresponding part of the integral is _____.

a) $(c_1 + c_2)e^{m_1 X}$ b) $(c_1 + c_2 x)e^{m_1 X}$

c) $(c_1 x + c_2 x^2)e^{m_1 X}$ d) $(c_1 + c_2 x^3)e^{m_1 X}$

9) $\frac{1}{D-a}X$ is equal to _____.

a) $\int Xe^{ax}dx$ b) $e^{ax}\int X.e^{-ax}dx$

c) $\int Xe^{-ax}dx$ d) $e^{-ax}\int Xe^{-ax}dx$

10) $\frac{1}{D+1}(\log x + \frac{1}{x})$ is equal to _____.

a) e^x b) 1

c) x d) $\log x$

11) The solution of $q = e^{-p}$ is _____.

a) $z = ax + by + c$ b) $z = a^x + b^y + c$

c) $z = ax + y^{-b} + c$ d) $z = ax + e^{-a}y + c$

12) The solution of the equation $pq = p + q$ is _____.

a) $z = ax + (a+1)y + c$

b) $z = (a+1)x + a(a-1)y + c$

c) $z = (a-1)x + a(a+1)y + c$

d) $z(a-1) = a(a-1)x + ay + c$

13) If μ_1', μ_2', μ_3', μ_4' are the first four moments of the distribution about certain number then fourth moment μ_4 of the distribution about the arithmetic mean is given by _____.

a) $\mu_4' + 4\mu_3'\mu_1' + 6\mu_2'(\mu_1')^4 + 3(\mu_1')^4$

b) $\mu_4' - 4\mu_3'\mu_1' + 6\mu_2'(\mu_1')^2 - 3(\mu_1')^4$

c) $\mu_4' + 4\mu_3'\mu_1' - 6\mu_2'(\mu_1')^4 - 3(\mu_1')^4$

d) $\mu_4' + 2\mu_3'\mu_1' + 6\mu_2'(\mu_1')^4 - 3(\mu_1')^4$

14) Coefficient of kurtosis β_2 is given by _____.

a) $\frac{\mu_4}{\mu_3}$ b) $\frac{\mu_4}{\mu_2^2}$

c) $\frac{\mu_3}{\mu_2^2}$ d) $\frac{\mu_4}{\mu_2^3}$

MCQ/Objective Type Questions

Duration: 30 Minutes Marks:14

Q.1 Choose the correct Answer. **14**

1) If X, Y denotes the deviations from their means and if $\sum X^2 = 40, \sum Y^2 = 100, \sum XY = 50,$ then $r =$ _____.
a) 0.63 b) 0.82
c) 0.91 d) 0.79

2) The line of regression of x and y is given by _____.
a) $x - \bar{x} = b_{xy}(y - \bar{y})$ b) $x - \bar{y} = b_{xy}(x - \bar{x})$
c) $x - \bar{x} = b_{xx}(y - \bar{y})$ d) $x - \bar{x} = b_{yx}(y - \bar{y})$

3) The following mistakes per page were found in a book.

No. of mistakes:	0	1	2	3	4
Pages:	211	90	19	5	0

Then χ^2 is _____.
a) 0.59 b) 0.069
c) 0.81 d) 0.79

4) The 't-statistic' is defined as _____.
a) $\frac{\bar{x}-\mu}{\sigma/\sqrt{n}}$ b) $\frac{\bar{x}-\mu}{s/\sqrt{n}}$
c) $\frac{\bar{x}-\mu}{\sigma/n}$ d) $\frac{\bar{x}-\mu}{s/n}$

5) If a linear differential equation with constant coefficients and r.h.s. equal to zero has a real root m_1 repeated Two times, then the corresponding part of the integral is _____.
a) $(c_1 + c_2)e^{m_1 X}$ b) $(c_1 + c_2 x)e^{m_1 X}$
c) $(c_1 x + c_2 x^2)e^{m_1 X}$ d) $(c_1 + c_2 x^3)e^{m_1 X}$

6) $\frac{1}{D-a}X$ is equal to _____.

a) $\int Xe^{ax}dx$ b) $e^{ax}\int X.e^{-ax}dx$

c) $\int Xe^{-ax}dx$ d) $e^{-ax}\int Xe^{-ax}dx$

7) $\frac{1}{D+1}(\log x+\frac{1}{x})$ is equal to _____.

a) e^x b) 1

c) x d) $\log x$

8) The solution of $q=e^{-p}$ is _____.

a) $z=ax+by+c$ b) $z=a^x+b^y+c$

c) $z=ax+y^{-b}+c$ d) $z=ax+e^{-a}y+c$

9) The solution of the equation $pq=p+q$ is _____.

a) $z=ax+(a+1)y+c$

b) $z=(a+1)x+a(a-1)y+c$

c) $z=(a-1)x+a(a+1)y+c$

d) $z(a-1)=a(a-1)x+ay+c$

10) If μ_1', μ_2', μ_3', μ_4' are the first four moments of the distribution about certain number then fourth moment μ_4 of the distribution about the arithmetic mean is given by _____.

a) $\mu_4'+4\mu_3'\mu_1'+6\mu_2'(\mu_1')^4+3(\mu_1')^4$

b) $\mu_4'-4\mu_3'\mu_1'+6\mu_2'(\mu_1')^2-3(\mu_1')^4$

c) $\mu_4'+4\mu_3'\mu_1'-6\mu_2'(\mu_1')^4-3(\mu_1')^4$

d) $\mu_4'+2\mu_3'\mu_1'+6\mu_2'(\mu_1')^4-3(\mu_1')^4$

11) Coefficient of kurtosis β_2 is given by _____.

a) $\frac{\mu_4}{\mu_3}$ b) $\frac{\mu_4}{\mu_2^2}$

c) $\frac{\mu_3}{\mu_2^2}$ d) $\frac{\mu_4}{\mu_2^3}$

12) If value of x for normal distribution is 35, mean of normal distribution is 65 and standard deviation is 25 then standardized random variable is ___.

a) -1.5 b) -1.7

c) -1.2 d) -4

13) A continuous random variable has the following probability density function $f(x)=kx(1-x),0\le x\le 1$ then $k=$ _____.

a) 6 b) 2

c) 3 d) 5

14) The area under the standard normal curve from $z = -\infty$ to $z = 0$ is ___.

a) 1 b) ½

c) 3/2 d) 0

S. Y. (B.Tech.) (Sem-I) (New) (NEP CBCS) Examination: March/April-2025
CIVIL ENGINEERING
Advanced Mathematics and Statistics (OE-01A)

Day & Date: Wednesday 21-05-2025 Max. Marks: 56
Time: 03:00 PM To 06:00 PM

Instructions: 1) All questions are compulsory.
2) Figures to the right indicate full marks.

Section – I

Q.2 Attempt any Three. **09**

a) Find the Arithmetic mean, Median and standard deviation for the following frequency distribution.

x	5	9	12	15	20	24	30	35	42	49
f	3	6	8	8	9	10	8	7	6	2

b) Solve $(D^2 - 4D + 4)y = 8.x^2e^{2x}\sin 2x$

c) Solve $(D^2 + D + 1)y = \sin 2x$

d) Calculate Mode for the following frequency distribution.

C.I.	00-10	10-20	20-30	30-40	40-50	50-60	60-70
Frequency (f)	4	7	8	12	25	18	10

e) Solve $p^2q^3 = x^2y^3$

Q.3 Attempt any Three. **09**

a) Solve: $(2D + 1)^2y = 4e^{-x/2}$

b) Solve: $p + q = pqz$

c) Find Q_1, Q_2, Q_3 from the following data.
5,7,12,14,15,22,25,30,36,42,53

d) Solve $x(y - z)p + y(z - x)q = z(x - y)$

e) Solve $(D^3 - 3D + 2)y = x$

Q.4 Attempt any Two **10**

a) The first four moments of a distribution about the value 5 are 2,20,40 and 50. from the given information obtain the first four central moments, coefficient of skewness and kurtosis.

b) Solve the following differential equation by the method of separation of variables.
$\frac{\partial z}{\partial x} - 2\frac{\partial z}{\partial y} = z$ given that $z(x, 0) = 3e^{-5x}$

c) Solve: $(D^2 - D - 2)y = 2\log x + \frac{1}{x} + \frac{1}{x^2}$

Section – II

Q.5 Attempt any three of the following. **09**

a) Find the value of k if each of the following functions is a probability density function.

$$f(x) = \begin{cases} kx^2(1-x^3), & 0 \le x \le 1 \\ 0, & \text{otherwise} \end{cases}$$

b) The mean life time of 100 fluorescent light bulbs produced by a Company is computed to be 1570 Hrs. with S.D. of 120 Hrs. If μ is the mean lifetime of all the bulbs produced by the Company, Test the Hypothesis $\mu = 1600$ Hrs. Against the alternative Hypothesis $\mu \neq 1600$ Hrs. using 5% level of Significance.
(Given Expected value at 5% LOS is 1.96)

c) Calculate the coefficient of correlation between height of father and height of son from the following data.

Height of father	64	65	66	67	68	69	70
Height of son	66	67	65	68	70	68	71

d) Two independent random sample have the following data,
$\overline{x_1} = 110, \sigma_1 = 25, n_1 = 16$
$\overline{x_2} = 120, \sigma_2 = 30, n_2 = 9$
If σ_1 and σ_2 are the S. D. of the populations. Test the hypothesis that $\mu_1 = \mu_2$ at 5% level of significance. (The table value of t at $\alpha = 0.05$ for $v = 23$ degrees of freedom is 2.069)

e) If in a lot of 500 solenoids 25 are defective, find the probability that there will be 0, 1, 2 defective solenoids in a random sample of 20 solenoids.

Q.6 Attempt any three of the following. **09**

a) If two independent random samples of sizes 15 and 8 have respectively the following mean and population standard deviations, $\overline{x_1} = 980, \overline{x_2} = 1012; \sigma_1 = 75, \sigma_2 = 80$. Test the hypothesis that $\mu_1 = \mu_2$ at 5% level of significance.
(Given Expected value at 5% LOS with 21 DF is 2.080)

b) The number of telephone calls received by an operator in a ten-minute interval follows a Poisson distribution with mean 1. What is the probability of receiving (i) no call, (ii) less than four calls, in the interval? What is the most likely number of calls?

c) Calculate the equations of the lines of regression. Given
Mean of $x = 50.07$, S.D. of $x = 5.26$
Mean of $y = 9.98$, S.D. of $y = 2.59$
$r = 0.898$

d) In an intelligence test administered to 1000 children the mean score was, 42 with s.d. 24. Find the number of children (i) scoring more than 60 and (ii) between 20 and 40 assuming the distribution to be normal.
(Given: For S.N.V. z area from z = 0 to z = 0.75 is 0.2734, that between z = 0 and z = 0.9167 is 0.3202 and that between z = 0 to z = 0.08333 is 0.0332.)

e) Fit a Straight line $y = a + bx$ to the following data.

x	0	1	2	3	4	5
y	1	2	3	4.5	6	7.5

Q.7 Attempt any Two. **10**

a) Fit a Poisson's distribution to the following data :

X	0	1	2	3	4	Total
f	112	63	20	4	1	200

b) Obtain a second-degree curve to the following data.

Year	1965	1966	1967	1968	1969	1970	1971	1972
Profit (in Corers Rs.)	125	140	165	195	200	215	220	230

Also estimate the profit in 1973.

c) Ten school boys were given a test in Statistics and their scores were recorded. They were given a month's special coaching and a second test was given to them in the same subject at the end of the coaching period. Test if the marks given below give evidence to the fact that the students are benefitted by coaching.
Marks in test I: 70, 68, 56, 75, 80, 90, 68, 75, 56, 58
Marks in Test II: 68, 70, 52, 73, 75, 78, 80, 92, 54, 55
(Given that value of t_α at 5 % LOS for v = 9 degrees of freedom is 1.86 for one tailed test)

Seat No.		Set	S

S. Y. (B.Tech.) (Sem-I) (New) (NEP CBCS) Examination: March/April-2025
CIVIL ENGINEERING
Advanced Mathematics and Statistics (OE-01A)

Day & Date: Wednesday 21-05-2025 Max. Marks: 70
Time: 03:00 PM To 06:00 PM

Instructions: 1) Q. No. 1 is compulsory. It should be solved in the first 30 minutes in Answer Book Page no 03 (Starting page of the Answer Book). Each question carries one mark.
2) Don't forget to Mention question paper set (P/Q/R/S) on top of page.
3) Figures to the right indicates full marks.

MCQ/Objective Type Questions

Duration: 30 Minutes Marks:14

Q.1 Choose the correct Answer. **14**

1) If $\mu_1', \mu_2', \mu_3', \mu_4'$ are the first four moments of the distribution about certain number then fourth moment μ_4 of the distribution about the arithmetic mean is given by _____.

a) $\mu_4' + 4\mu_3'\mu_1' + 6\mu_2'(\mu_1')^4 + 3(\mu_1')^4$

b) $\mu_4' - 4\mu_3'\mu_1' + 6\mu_2'(\mu_1')^2 - 3(\mu_1')^4$

c) $\mu_4' + 4\mu_3'\mu_1' - 6\mu_2'(\mu_1')^4 - 3(\mu_1')^4$

d) $\mu_4' + 2\mu_3'\mu_1' + 6\mu_2'(\mu_1')^4 - 3(\mu_1')^4$

2) Coefficient of kurtosis β_2 is given by _____.

a) $\frac{\mu_4}{\mu_3}$ b) $\frac{\mu_4}{\mu_2^2}$

c) $\frac{\mu_3}{\mu_2^2}$ d) $\frac{\mu_4}{\mu_2^3}$

3) If value of x for normal distribution is 35, mean of normal distribution is 65 and standard deviation is 25 then standardized random variable is ___.

a) -1.5 b) -1.7
c) -1.2 d) -4

4) A continuous random variable has the following probability density function $f(x) = kx(1-x), 0 \le x \le 1$ then $k =$ _____.

a) 6 b) 2
c) 3 d) 5

5) The area under the standard normal curve from $z = -\infty$ to $z = 0$ is ___.

a) 1 b) ½
c) 3/2 d) 0

6) If X, Y denotes the deviations from their means and if $\sum X^2 = 40, \sum Y^2 = 100, \sum XY = 50,$ then $r =$ _____.

a) 0.63 b) 0.82

c) 0.91 d) 0.79

7) The line of regression of x and y is given by _____.

a) $x - \bar{x} = b_{xy}(y - \bar{y})$ b) $x - \bar{y} = b_{xy}(x - \bar{x})$

c) $x - \bar{x} = b_{xx}(y - \bar{y})$ d) $x - \bar{x} = b_{yx}(y - \bar{y})$

8) The following mistakes per page were found in a book.

No. of mistakes:	0	1	2	3	4
Pages:	211	90	19	5	0

Then χ^2 is _____.

a) 0.59 b) 0.069

c) 0.81 d) 0.79

9) The 't-statistic' is defined as _____.

a) $\frac{\bar{x}-\mu}{\sigma/\sqrt{n}}$ b) $\frac{\bar{x}-\mu}{s/\sqrt{n}}$

c) $\frac{\bar{x}-\mu}{\sigma/n}$ d) $\frac{\bar{x}-\mu}{s/n}$

10) If a linear differential equation with constant coefficients and r.h.s. equal to zero has a real root m_1 repeated Two times, then the corresponding part of the integral is _____.

a) $(c_1 + c_2)e^{m_1 X}$ b) $(c_1 + c_2 x)e^{m_1 X}$

c) $(c_1 x + c_2 x^2)e^{m_1 X}$ d) $(c_1 + c_2 x^3)e^{m_1 X}$

11) $\frac{1}{D-a}X$ is equal to _____.

a) $\int Xe^{ax}dx$ b) $e^{ax}\int X.e^{-ax}dx$

c) $\int Xe^{-ax}dx$ d) $e^{-ax}\int Xe^{-ax}dx$

12) $\frac{1}{D+1}(\log x + \frac{1}{x})$ is equal to _____.

a) e^x b) 1

c) x d) $\log x$

13) The solution of $q = e^{-p}$ is _____.

a) $z = ax + by + c$ b) $z = a^x + b^y + c$

c) $z = ax + y^{-b} + c$ d) $z = ax + e^{-a}y + c$

14) The solution of the equation $pq = p + q$ is _____.

a) $z = ax + (a+1)y + c$

b) $z = (a+1)x + a(a-1)y + c$

c) $z = (a-1)x + a(a+1)y + c$

d) $z(a-1) = a(a-1)x + ay + c$

MCQ/Objective Type Questions

Duration: 30 Minutes Marks:14

Q.1 Choose the correct Answer. **14**

1) Which dimension of e-commerce enables commerce beyond the boundaries of the country?
a) Richness b) Interactivity
c) Global Reach d) Ubiquity

2) Which of the following describes the definition of electronic commerce?
a) Doing business
b) Sale and purchase of goods
c) Doing business electronically
d) All of the above mentioned

3) Which e-commerce model involves the sale of goods or services from businesses to the general public?
a) Business to Government b) Business to Consumer
c) Business to Business d) Consumer to Business

4) All of the following are major B2C business models except _____.
a) content provider b) industry consortium
c) transaction broker d) service provider

5) Which of the following advantage of E-commerce?
a) Ability to operate 24/7
b) Inability to personalize the shopping
c) Higher operational cost
d) Limited reach CO1 I

6) Which e-commerce transaction provides the benefits of eliminating the requirement of a middleman?

a) Business to Business b) Business to Government
c) Consumer to Business d) Business to Consumer

7) After completing an E-Commerce transaction, the seller and buyer should be provided an opportunity to _____ their transaction experience.

a) undo b) regret
c) provide rating for d) forget

8) Which of the following is a common digital marketing strategy used in E-commerce?

a) Search Engine Optimization (SEO)
b) Traditional print advertising
c) Cold-calling potential customers
d) Distributing flyers in local neighborhoods

9) Digital Cash has following characteristic _____.

a) Anonymity b) Security
c) Confidentiality d) All above

10) Which component of E-commerce ensures secure online transactions and customer data protection?

a) Payment gateways b) Shopping carts
c) Product catalogs d) Data warehouses

11) Which type of attack is a method of defeating a cryptographic scheme of trying a large number of possibilities?

a) Teardrop attack b) Brute force attack
c) Phlashing d) Smurf attack

12) What is the another name called PDoS?

a) Brute force attack b) Non technical attack
c) Phlashing d) Smurf attack

13) What does the term “data security” refer to in E-commerce?

a) The use of cookies to track customer behavior
b) The protection of customer data from unauthorized access and breaches
c) The analysis of customer browsing history for personalized recommendations
d) The process of categorizing customer data for marketing purposes

14) Which of the following is a characteristic of E-commerce marketplaces?

a) They only allow B2C transactions
b) They sell physical products exclusively
c) They are limited to a specific geographical area
d) Multiple sellers can list their products to reach a broader audience

4) Assume suitable data if necessary and mention it clearly.

MCQ/Objective Type Questions

Duration: 30 Minutes Marks:14

Q.1 Choose the correct Answer. **14**

1) _____ is defined as "the discipline dealing with what is good & bad & with moral duty & obligation".
a) Rule b) Organisation culture
c) Protocol d) Ethics

2) _____ involves establishing the amount of work to be done & the time when each element of the work will start.
a) Planning b) Routing
c) Scheduling d) Organizing

3) In _____ concept product enjoys the supreme importance.
a) Selling b) Marketing
c) Manufacturing d) Business

4) _____ are the greatest importance at the supervisory level.
a) Supervisory skills b) Human relation skills
c) Technical skills d) Planning skills

5) The responsibilities of the operations manager include _____.
a) Planning , organizing , staffing , procuring , and reviewing
b) Forecasting , designing , planning , organizing , and controlling
c) Forecasting , designing , operating , procuring , and reviewing
d) Planning , organizing , staffing , leading , and controlling
e) Designing & operating

6) Self-esteem, status affiliation with others, affection those come under _____ needs.
a) Basic b) Primary
c) Third level of d) Secondary

7) _____ is ability of individual or group to induce or influence the beliefs or action of other person or group.

a) Power b) Authority
c) Post d) Leadership

8) The basic objective of quality control in any organization is to _____.

a) Quality development, quality maintenance and quality improvement activities in organization
b) Achieve optimum cost
c) Achieve customer's satisfaction
d) Achieve all the above

9) Cost associated with defective products being shipped to the customers are called as _____.

a) Cost of internal failure b) Total cost of failure
c) Rejection cost d) Cost of external failure

10) For identification of vital few for the given data, the tool used is _____.

a) Cause-Effect diagram b) Scatter diagram
c) Pareto Analysis d) Check Sheet

11) Total quality management (TQM) mainly aims for _____.

a) Control for quality b) Usefulness of product
c) Customer satisfaction d) Cost control

12) The statistician who invented the control chart for use in industrial quality control was: _____.

a) Deming b) Taguchi
c) Pareto d) Shewhart
e) None of the above

13) The method of accepting or rejecting the lot is known as _____.

a) Lot sampling b) Acceptance sampling
c) Batch sampling d) Quality control

14) In double sampling plan, second sample is taken when the number of defectives _____.

a) > C1 but < C2 b) > C1
c) > C1 and C2 d) < C2

Set P

S.Y. (B.Tech.) (Sem-I) (New) (NEP CBCS) Examination: March/April-2025
CIVIL ENGINEERING
Industrial and Quality Management (OE-01D)

Day & Date: Wednesday 21-05-2025 Max. Marks: 56
Time: 03:00 PM To 06:00 PM

Instructions: 1) Attempt any two questions from each section.
2) Figures to the right indicate full marks.
3) Assume suitable data if necessary and mention it clearly.

Section – I

Q.2	**a)**	Explain the Social responsibilities and ethics in management.	**07**
	b)	Explain decision making process with types of decision.	**07**
Q.3	**a)**	What is planning process? Explain steps in planning.	**07**
	b)	What is leadership? Explain any four styles.	**07**
Q.4	**a)**	Explain communication and Various types of communications.	**07**
	b)	What is motivation? Explain Maslow's theory of motivation.	**07**

Section – II

Q.5	**a)**	Define quality and state the Steps in quality control.	**07**
	b)	Explain Benchmarking with advantages and disadvantages.	**07**
Q.6	**a)**	Explain Deming Wheel with suitable example.	**07**
	b)	Explain the following as applied to quality control: 1) Appraisal costs 2) Prevention costs 3) Failure costs 4) Optimum costs	**07**

Q.7 **a)** In a manufacturing process the number of defectives found in the inspection of 20 lots of 100 samples is given below. **07**

1) Determine the control limit of P chart and state whether the process is in control or not.
2) Determine the new value of mean fraction defective if some points are out of control. Compute the corresponding control limits and state whether the process is still in control or not.

Lot No.	No. of defectives	Lot No.	No. of Defectives
1	5	11	7

MCQ/Objective Type Questions

Duration: 30 Minutes Marks:14

Q.1 Choose the correct Answer. **14**

1) Laplace transform of $\int_0^t u^3 du =$_____.

a) $\frac{3}{s^5}$ b) $\frac{6}{s^5}$

c) $\frac{1}{s^5}$ d) $\frac{6}{s^4}$

2) If $L\{f(t)\} = \emptyset(s)$, then $L\{f(at)\} =$ _____.

a) $\emptyset\left(\frac{s}{a}\right)$ b) $\frac{1}{s}\emptyset\left(\frac{s}{a}\right)$

c) $\emptyset'\left(\frac{s}{a}\right)$ d) $\frac{1}{a}\emptyset\left(\frac{s}{a}\right)$

3) $L^{-1}\left\{\frac{1}{s^2+3^2}\right\} =$_____.

a) $\frac{1}{3}\sin 3t$ b) $\frac{1}{3}\cos 3t$

c) $\frac{1}{3}\cosh 3t$ d) $\frac{1}{3}\sinh 3t$

4) For $\frac{d^2y}{dx^2} + 4\frac{dy}{dx} + 3y = 3e^{2x}$, the particular integral is _____.

a) $\frac{1}{15}e^{2x}$ b) $3e^{2x}$

c) $\frac{1}{5}e^{2x}$ d) $C_1e^{-x} + C_2e^{-2x}$

5) The general solution of the equation $(D^3 - 7D - 6)y = 0$ is _____.

a) $y = c_1e^{-x} + c_2e^{2x} + c_3e^{-3x}$

b) $y = c_1e^{-x} + c_2e^{2x} + c_3e^{3x}$

c) $y = c_1e^{-x} + c_2e^{-2x} + c_3e^{-3x}$

d) None of these

6) $z\{k\} =$_____ for $|z| > 1$

a) $\frac{z}{z-1}$ b) $\frac{1}{(z-1)^2}$

c) $\frac{z}{(z-1)^2}$ d) $\frac{z}{(z+1)^2}$

7) If $z\{f(k)\} = F(z)$, then $z\{a^k f(k)\} =$ _____.

a) $f\left(\frac{a}{z}\right)$ b) $f\left(\frac{z}{a}\right)$

c) $\frac{1}{a}f\left(\frac{z}{a}\right)$ d) None

8) $Z\left\{\frac{1}{k!}\right\} =?$ for $k \geq 0$

a) e^z b) $e^{\frac{1}{z}}$

c) $\frac{1}{z}$ d) $\frac{1}{1-z}$

9) The Fourier sine transform of $f(x)$ is given by _____.

a) $\sqrt{\frac{2}{\pi}}\int_{-\infty}^{\infty} f(x)\sin sx\, dx$ b) $\int_{-\infty}^{\infty} f(x)\cos sx\, dx$

c) $\sqrt{\frac{2}{\pi}}\int_{0}^{\infty} f(x)\sin sx\, dx$ d) $\sqrt{\frac{\pi}{2}}\int_{0}^{\infty} f(x)\sin sx\, dx$

10) From the result $\int_{-\infty}^{\infty} \frac{\cos sx.\sin sk}{s} ds = \begin{cases} \pi & , \ |x| < k \\ 0 & , \ |x| > k \end{cases}$ we can deduce that $\int_0^{\infty} \frac{\sin sk}{s}\, ds =$ _____.

a) 0 b) 1

c) π d) $\frac{\pi}{2}$

11) The first real positive root of $x^3 = 6x - 4$ by Newton Raphson method near $x_0 = 1$ is _____.

a) 0.6667 b) 0.6

c) 0.4 d) 0.3

12) How many steps does the fourth-order Runge-Kutta method use?

a) Two steps b) Five steps

c) Four steps d) Three steps

13) In the interval $(0, a)$ the constant term in the Fourier series of $f(x) = \frac{a}{2} - x$ is _____.

a) 0 b) 1

c) $\frac{a^2}{2\pi}$ d) $\frac{a^2}{4\pi}$

14) Fourier series of $f(x) = x\ in(-\pi, \pi)$ will contain ____

a) No sine term b) No cosine term

c) Both cosine and sine term d) None of these

Time: 03:00 PM To 06:00 PM

Instructions: 1) All questions are compulsory.
2) Figures to the right indicate full marks.
3) Use of non-programmable calculator is allowed.

Section – I

Q.2 Attempt any three **09**

a) Solve : $(D^2 + 4D + 5)y = -2\cos hx + 2^x$

b) Solve $(D^2 + 2D + 1)y = x\cos x$

c) Find Z-transform of $x_k = 2^k \cos(3k + 2)\,, k \geq 0$

d) Find Z-transform of $x_k = k^2 e^{-ak}, k \geq 0$

e) Find the inverse Laplace transform of following by using the Convolution theorem of $\left[\frac{1}{s(s^2+4)}\right]$

Q.3 Attempt any three of the following. **09**

a) Evaluate by using Laplace transform $\int_0^\infty \left(\frac{e^{-t}-e^{-3t}}{t}\right) dt$

b) Find the inverse Z-transform of $f(k) = \begin{cases} 4^k, & k < 0 \\ 3^k, & k \geq 0 \end{cases}$

c) Find $Z\{e^{-3k}\sin 2k\}, k \geq 0$

d) Solve $(D^2 - 1)y = (1 + e^{-x})^2$

e) Find Laplace Transform of $\{t\cos 2t\}$

Q.4 Attempt any two **10**

a) Find the inverse Z-transform of $\frac{1}{(z-a)^2}$ if

1) $|z| < a$,
2) $|z| > a$,

b) Find the inverse Laplace transform of following by using the Convolution theorem of $\left[\frac{s^2}{(s^2+a^2)(s^2+b^2)}\right]$

c) Solve $(D^2 - 6D + 13)y = e^{x\log 2} + 8e^{3x}\sin 4x$

Section – II

Q.5 Attempt any three **09**

a) Evaluate $\int_0^5 \frac{1}{4x+5} dx$ using $n = 5$ by Trapezoidal rule.

b) Evaluate $I = \int_0^2 e^{-x} dx$ by using the Simpson's 1/3rd rule given h= 0.5

c) Obtain half range cosine series $f(x) = x$ in $0 < x < 1$

d) Find the Fourier series expansion of $f(x) = x^2$ in $(-\pi, \pi)$

e) Find the Fourier transform of $f(x) = \begin{cases} \frac{1}{2\epsilon}, & |x| \leq \epsilon \\ 0, & |x| > \epsilon \end{cases}$

Q.6 Attempt any three **09**

a) Find f(x) if its Fourier sine transform e^{-as}

b) Find the Fourier cosine transform of

$f(x)$, if $f(x) = \begin{cases} 1, & 0 \leq x < 1 \\ 0, & x \geq 1 \end{cases}$

c) Find the Fourier series expansion of $f(x) = x$ in $(-\pi, \pi)$

d) Solve by Newton Raphson method $x^4 - x = 10$ correct to four decimal places. (perform two iterations only)

e) Find $\int_0^6 \frac{1}{1+x^2} dx\ n = 6$ using Simpson's 3/8th rule.

Q.7 Attempt any two. **10**

a) Find $\int_1^8 \frac{1}{1+x} dx\ h = 1$ by using Trapezoidal rule and Simpson's 1/3rd rule.

b) Find Fourier transform of

$f(x) = 1\ |x| < k$

$= 0\ |x| > k$ and

Hence evaluate i) $\int_{-\infty}^{\infty} \frac{\sin sk . \cos sk}{s} ds$ ii) $\int_{-\infty}^{\infty} \frac{sin\ ks}{s} ds$

c) Find the Fourier series expansion of the function $f(x) = e^{-\alpha x}$ in $(0, 2\pi)$

Set Q

S.Y. (B. Tech) (Sem-I) (New) (NEP CBCS) Examination: March/April-2025
CIVIL ENGINEERING
Mathematics for Software and Hardware (OE-01E)

Day & Date: Wednesday 21-05-2025 Max. Marks: 70
Time: 03:00 PM To 06:00 PM

Instructions: 1) Q. No. 1 is compulsory. It should be solved in the first 30 minutes in Answer Book Page no 03 (Starting page of the Answer Book). Each question carries one mark.
2) Don't forget to Mention question paper set (P/Q/R/S) on top of page.
3) Figures to the right indicates full marks.
4) Use of non-programmable calculator is allowed.

MCQ/Objective Type Questions

Duration: 30 Minutes Marks:14

Q.1 Choose the correct Answer. **14**

1) $Z\left\{\frac{1}{k!}\right\} = ?$ for $k \geq 0$

a) e^z b) $e^{\frac{1}{z}}$

c) $\frac{1}{z}$ d) $\frac{1}{1-z}$

2) The Fourier sine transform of $f(x)$ is given by _____.

a) $\sqrt{\frac{2}{\pi}}\int_{-\infty}^{\infty} f(x)\sin sx\, dx$ b) $\int_{-\infty}^{\infty} f(x)\cos sx\, dx$

c) $\sqrt{\frac{2}{\pi}}\int_{0}^{\infty} f(x)\sin sx\, dx$ d) $\sqrt{\frac{\pi}{2}}\int_{0}^{\infty} f(x)\sin sx\, dx$

3) From the result $\int_{-\infty}^{\infty}\frac{\cos sx.\sin sk}{s}ds = \begin{cases}\pi & , \ |x| < k \\ 0 & , \ |x| > k\end{cases}$ we can deduce that $\int_0^{\infty}\frac{\sin sk}{s}\, ds =$ _____.

a) 0 b) 1

c) π d) $\frac{\pi}{2}$

4) The first real positive root of $x^3 = 6x - 4$ by Newton Raphson method near $x_0 = 1$ is _____.

a) 0.6667 b) 0.6

c) 0.4 d) 0.3

5) How many steps does the fourth-order Runge-Kutta method use?

a) Two steps b) Five steps

c) Four steps d) Three steps

6) In the interval $(0, a)$ the constant term in the Fourier series of $f(x) = \frac{a}{2} - x$ is _____.

a) 0 b) 1

c) $\frac{a^2}{2\pi}$ d) $\frac{a^2}{4\pi}$

7) Fourier series of $f(x) = x\ in(-\pi, \pi)$ will contain _____

a) No sine term b) No cosine term

c) Both cosine and sine term d) None of these

8) Laplace transform of $\int_0^t u^3 du =$_____.

a) $\frac{3}{s^5}$ b) $\frac{6}{s^5}$

c) $\frac{1}{s^5}$ d) $\frac{6}{s^4}$

9) If $L\{f(t)\} = \emptyset(s)$, then $L\{f(at)\} =$ _____.

a) $\emptyset\left(\frac{s}{a}\right)$ b) $\frac{1}{s}\emptyset\left(\frac{s}{a}\right)$

c) $\emptyset'\left(\frac{s}{a}\right)$ d) $\frac{1}{a}\emptyset\left(\frac{s}{a}\right)$

10) $L^{-1}\left\{\frac{1}{s^2+3^2}\right\} =$_____.

a) $\frac{1}{3}\sin 3t$ b) $\frac{1}{3}\cos 3t$

c) $\frac{1}{3}\cosh 3t$ d) $\frac{1}{3}\sinh 3t$

11) For $\frac{d^2y}{dx^2} + 4\frac{dy}{dx} + 3y = 3e^{2x}$, the particular integral is _____.

a) $\frac{1}{15}e^{2x}$ b) $3e^{2x}$

c) $\frac{1}{5}e^{2x}$ d) $C_1e^{-x} + C_2e^{-2x}$

12) The general solution of the equation $(D^3 - 7D - 6)y = 0$ is _____.

a) $y = c_1e^{-x} + c_2e^{2x} + c_3e^{-3x}$

b) $y = c_1e^{-x} + c_2e^{2x} + c_3e^{3x}$

c) $y = c_1e^{-x} + c_2e^{-2x} + c_3e^{-3x}$

d) None of these

13) $z\{k\} =$_____ for $|z| > 1$

a) $\frac{z}{z-1}$ b) $\frac{1}{(z-1)^2}$

c) $\frac{z}{(z-1)^2}$ d) $\frac{z}{(z+1)^2}$

14) If $z\{f(k)\} = F(z)$, then $z\{a^k f(k)\} =$ _____.

a) $f\left(\frac{a}{z}\right)$ b) $f\left(\frac{z}{a}\right)$

c) $\frac{1}{a} f\left(\frac{z}{a}\right)$ d) None

Set **Q**

S.Y. (B. Tech) (Sem-I) (New) (NEP CBCS) Examination: March/April-2025
CIVIL ENGINEERING
Mathematics for Software and Hardware (OE-01E)

Day & Date: Wednesday 21-05-2025 Max. Marks: 56
Time: 03:00 PM To 06:00 PM

Instructions: 1) All questions are compulsory.
2) Figures to the right indicate full marks.
3) Use of non-programmable calculator is allowed.

Section – I

Q.2 Attempt any three **09**

a) Solve : $(D^2 + 4D + 5)y = -2\cos hx + 2^x$

b) Solve $(D^2 + 2D + 1)y = x\cos x$

c) Find Z-transform of $x_k = 2^k \cos(3k + 2)\,, k \geq 0$

d) Find Z-transform of $x_k = k^2 e^{-ak}, k \geq 0$

e) Find the inverse Laplace transform of following by using the Convolution theorem of $\left[\frac{1}{s(s^2+4)}\right]$

Q.3 Attempt any three of the following. **09**

a) Evaluate by using Laplace transform $\int_0^\infty \left(\frac{e^{-t}-e^{-3t}}{t}\right) dt$

b) Find the inverse Z-transform of $f(k) = \begin{cases} 4^k, & k < 0 \\ 3^k, & k \geq 0 \end{cases}$

c) Find $Z\{e^{-3k}\sin 2k\}, k \geq 0$

d) Solve $(D^2 - 1)y = (1 + e^{-x})^2$

e) Find Laplace Transform of $\{t\cos 2t\}$

Q.4 Attempt any two **10**

a) Find the inverse Z-transform of $\frac{1}{(z-a)^2}$ if

1) $|z| < a$,
2) $|z| > a$,

b) Find the inverse Laplace transform of following by using the Convolution theorem of $\left[\frac{s^2}{(s^2+a^2)(s^2+b^2)}\right]$

c) Solve $(D^2 - 6D + 13)y = e^{x\log 2} + 8e^{3x}\sin 4x$

Section – II

Q.5 Attempt any three **09**

a) Evaluate $\int_0^5 \frac{1}{4x+5} dx$ using $n = 5$ by Trapezoidal rule.

b) Evaluate $I = \int_0^2 e^{-x} dx$ by using the Simpson's 1/3rd rule given h= 0.5

c) Obtain half range cosine series $f(x) = x$ in $0 < x < 1$

d) Find the Fourier series expansion of $f(x) = x^2$ in $(-\pi, \pi)$

e) Find the Fourier transform of $f(x) = \begin{cases} \frac{1}{2\epsilon}, & |x| \leq \epsilon \\ 0, & |x| > \epsilon \end{cases}$

Q.6 Attempt any three **09**

a) Find f(x) if its Fourier sine transform e^{-as}

b) Find the Fourier cosine transform of

$f(x)$, if $f(x) = \begin{cases} 1, & 0 \leq x < 1 \\ 0, & x \geq 1 \end{cases}$

c) Find the Fourier series expansion of $f(x) = x$ in $(-\pi, \pi)$

d) Solve by Newton Raphson method $x^4 - x = 10$ correct to four decimal places. (perform two iterations only)

e) Find $\int_0^6 \frac{1}{1+x^2} dx \; n = 6$ using Simpson's 3/8th rule.

Q.7 Attempt any two. **10**

a) Find $\int_1^8 \frac{1}{1+x} dx \; h = 1$ by using Trapezoidal rule and Simpson's 1/3rd rule.

b) Find Fourier transform of

$f(x) = 1 \; |x| < k$

$= 0 \; |x| > k$ and

Hence evaluate i) $\int_{-\infty}^{\infty} \frac{\sin sk . \cos sk}{s} ds$ ii) $\int_{-\infty}^{\infty} \frac{\sin ks}{s} ds$

c) Find the Fourier series expansion of the function $f(x) = e^{-\alpha x}$ in $(0, 2\pi)$

a) Evaluate $\int_0^5 \frac{1}{4x+5} dx$ using $n = 5$ by Trapezoidal rule.

b) Evaluate $I = \int_0^2 e^{-x} dx$ by using the Simpson's 1/3rd rule given h= 0.5

c) Obtain half range cosine series $f(x) = x$ in $0 < x < 1$

d) Find the Fourier series expansion of $f(x) = x^2$ in $(-\pi, \pi)$

e) Find the Fourier transform of $f(x) = \begin{cases} \frac{1}{2\epsilon}, & |x| \leq \epsilon \\ 0, & |x| > \epsilon \end{cases}$

Q.6 Attempt any three **09**

a) Find f(x) if its Fourier sine transform e^{-as}

b) Find the Fourier cosine transform of

$f(x)$, if $f(x) = \begin{cases} 1, & 0 \leq x < 1 \\ 0, & x \geq 1 \end{cases}$

c) Find the Fourier series expansion of $f(x) = x$ in $(-\pi, \pi)$

d) Solve by Newton Raphson method $x^4 - x = 10$ correct to four decimal places. (perform two iterations only)

e) Find $\int_0^6 \frac{1}{1+x^2} dx \; n = 6$ using Simpson's 3/8th rule.

Q.7 Attempt any two. **10**

a) Find $\int_1^8 \frac{1}{1+x} dx \; h = 1$ by using Trapezoidal rule and Simpson's 1/3rd rule.

b) Find Fourier transform of

$f(x) = 1 \; |x| < k$

$= 0 \; |x| > k$ and

Hence evaluate i) $\int_{-\infty}^{\infty} \frac{\sin sk . \cos sk}{s} ds$ ii) $\int_{-\infty}^{\infty} \frac{sin\, ks}{s} ds$

c) Find the Fourier series expansion of the function $f(x) = e^{-\alpha x}$ in $(0, 2\pi)$

S. Y. (B.Tech.) (Sem-I) (New) (NEP CBCS) Examination: March/April-2025
CIVIL ENGINEERING
Soft Skills and Personality Development (OE-01F)

Day & Date: Wednesday 21-05-2025 Max. Marks: 70
Time: 03:00 PM To 06:00 PM

Instructions: 1) Q. No. 1 is compulsory. It should be solved in the first 30 minutes in Answer Book Page no 03 (Starting page of the Answer Book). Each question carries one mark.
2) Don't forget to Mention question paper set (P/Q/R/S) on top of page.
3) Figures to the right indicates full marks.

MCQ/Objective Type Questions

Duration: 30 Minutes Marks:14

Q.1 Choose the correct Answer. **14**

1) What is feedback in communication?
a) The process of encoding a message.
b) The process of transmitting the message.
c) The response or reaction to a message.
d) The process of decoding a message.

2) In the process of communication 'Encoding' means _____.
a) Using symbol to express an idea
b) Deciphering the message
c) Creating noise in the communication
d) Interpreting the meaning of message

3) Empathy refers to: _____.
a) Capacity to understand or feel what another person feels
b) Having better understanding of partner's emotions
c) The higher the likelihood of self harm
d) Getting what one wants out of the relationship

4) Repots, suggestions, appeals grievances etc. are examples of: _____.
a) Down ward communication
b) Upward communication
c) Horizontal communication
d) Informal communication

5) Informal communication is commonly known as: _____.
a) Down ward communication b) Upward communication
c) Horizontal communication d) Grapevine

6) _____ is not a communication barrier?
a) Language b) Culture
c) Habits d) Physical

7) Which of the following is NOT a component of communication?
a) Sender b) Message
c) Receiver d) Translator

8) Emotional Intelligence primarily refers to the ability to: _____.
a) Understand and manage one's own emotions and the emotions of others
b) Solve mathematical problems
c) Memorize large amounts of information
d) Make logical decisions without emotions

9) Time management can help reduce stress by: _____
a) Creating unnecessary pressure
b) Organizing tasks and prioritizing effectively
c) Avoiding responsibilities altogether
d) Increasing the workload

10) The term “self-regulation” in Emotional Intelligence means: _____.
a) Hiding your emotions from others
b) Controlling impulsive behaviours and adapting to changing circumstances
c) Ignoring your emotional responses
d) Following strict rules without considering emotions

11) What is the primary purpose of a job interview?
a) To test the candidate's academic knowledge
b) To compare the candidate's qualifications with others
c) To discuss salary expectations only
d) To assess the candidate’s suitability for the job role

12) What kind of information will you collect before going to an interview?
a) About the job you are applying for
b) About the company
c) About the work culture
d) All of the above

13) Which of the following is an effective stress management technique?
a) Procrastination
b) Deep breathing and relaxation exercises
c) Avoiding physical activity
d) Excessive multitasking

14) Which of the following is an important step to prepare for an interview?
a) Memorizing answers word for word
b) Arriving late to showcase confidence
c) Avoiding practice to appear natural
d) Researching the company and role

Instructions: 1) All questions are compulsory.
2) Figures to the right indicate full marks.

Section – I

Q.2 Attempt any Two. **12**

a) Define human communication and explain importance of communication.
b) Explain in brief:
1) Personal Barrier
2) Social Barrier
c) Enlighten in a brief strategy to improve emotional intelligence.

Q.3 Attempt any Four. **16**

a) Explain importance of emotional intelligence.
b) State advantages and disadvantages of informal communication.
c) Describe different modes of communication.
d) Highlight role of social awareness as key factor of emotional intelligence.
e) Explain relationship management as key factor of emotional intelligence.

Section – II

Q.4 Attempt any Two. **12**

a) What is interview? Explain various steps in the process of interview.
b) Explain importance of time management.
c) Explain the four P's of effective presentation.

Q.5 Attempt any Four. **16**

a) Explain importance of stress management.
b) Explain various types of interviews.
c) Describe various strategies for effective time management.
d) Explain various strategies of stress management.
e) Write short note on: Non- verbal aspects of presentation.

4) Make suitable assumptions if necessary and state them clearly.

MCQ/Objective Type Questions

Duration: 30 Minutes Marks:14

Q.1 Choose the correct Answer. **14**

1) Which of the following is not a primary classification of engineering materials?
a) Metals b) Ceramics
c) Gases d) Polymers

2) Which property is most associated with metals?
a) High electrical conductivity b) High brittleness
c) Low melting point d) Low density

3) The Gibbs phase rule is given by:
a) $P + F = C - 1$ b) $P + F = C + 1$
c) $F = C - P + 2$ d) $F = C + P - 2$

4) Non-ferrous metals are primarily used for their:
a) High strength
b) High corrosion resistance and low density
c) Magnetic properties
d) Low melting point

5) In the eutectic transformation, liquid transforms into:
a) One solid phase b) Two solid phases
c) One liquid and one solid phase d) Three solid phases

6) Which of the following is a characteristic of brass alloy?
a) Primarily composed of copper and tin
b) Primarily composed of copper and zinc
c) Primarily composed, of copper and aluminum
d) Primarily composed of copper ana nickel

7) Bronze alloys are primarily composed of copper and:
a) Zinc b) Aluminum
c) Nickel d) Tin

8) Which of the following is an example of a thermoplastic polymer?
a) Bakelite b) Epoxy resin
c) Polystyrene d) Rubber

9) The ability of a polymer to return to its original shape after deformation is known as:
a) Ductility b) Elasticity
c) Malleability d) Toughness

10) Which of the following properties is enhanced by vulcanization of rubber?
a) High flexibility
b) Increased strength and resistance to wear
c) Decreased thermal stability
d) Decreased electrical resistance

11) Which of the following is NOT a characteristic of ceramic materials?
a) High melting points b) High electrical conductivity
c) Brittle nature d) Good wear resistance

12) Advanced ceramics are typically characterized by:
a) High ductility
b) Low strength
c) High thermal and electrical conductivity
d) High performance at high temperatures

13) Composite materials are widely used in the aerospace industry because they:
a) Are cost-effective and easily available
b) Provide high strength-to-weight ratio
c) Have low thermal resistance
d) Are magnetic in nature

14) Nanomaterials are commonly used in which of the following fields?
a) Drug delivery systems
b) Large-scale structural applications
c) Agricultural machinery
d) Waste disposal

2) Figures to the right indicate full marks.
3) Make suitable assumptions if necessary and state them clearly.

SECTION – I

Q.2	**a)**	What are engineering materials, and how are they classified?	**07**
	b)	What is a phase diagram? Explain the different types of phase diagrams.	**07**
Q.3	**a)**	Discuss the phases present in the Fe-Fe_3C diagram at different compositions of carbon.	**07**
	b)	Discuss the composition and properties of plain carbon steels.	**07**
Q.4	**a)**	Discuss the composition and properties of brass and bronze.	**07**
	b)	Explain the properties and applications of Al-Cu alloys.	**07**

SECTION – II

Q.5	**a)**	Discuss the differences between thermoplastic and thermosetting polymers.	**07**
	b)	Explain how vulcanization is used to modify the physical properties of natural rubber.	**07**
Q.6	**a)**	What are ceramics, and what makes them different from metals and polymers?	**07**
	b)	Discuss the role of ceramics in the aerospace industry.	**07**
Q.7	**a)**	Explain the classification of composite materials.	**07**
	b)	Explain the role of nanomaterials in electronics and semiconductors.	**07**

S. Y. (B.Tech.) (Sem-I) (New) (NEP CBCS) Examination: March/April-2025
CIVIL ENGINEERING
Fundamentals of Material science and Engineering (MECHMDM-01A)

Day & Date: Thursday 22-05-2025 Max. Marks: 70
Time: 03:00 PM To 06:00 PM

Instructions: 1) Q. No. 1 is compulsory. It should be solved in the first 30 minutes in Answer Book Page no 03 (Starting page of the Answer Book). Each question carries one mark.
2) Don't forget to Mention question paper set (P/Q/R/S) on top of page.
3) Figures to the right indicates full marks.
4) Make suitable assumptions if necessary and state them clearly.

MCQ/Objective Type Questions

Duration: 30 Minutes Marks:14

Q.1 Choose the correct Answer. **14**

1) Which of the following is NOT a characteristic of ceramic materials?
a) High melting points b) High electrical conductivity
c) Brittle nature d) Good wear resistance

2) Advanced ceramics are typically characterized by:
a) High ductility
b) Low strength
c) High thermal and electrical conductivity
d) High performance at high temperatures

3) Composite materials are widely used in the aerospace industry because they:
a) Are cost-effective and easily available
b) Provide high strength-to-weight ratio
c) Have low thermal resistance
d) Are magnetic in nature

4) Nanomaterials are commonly used in which of the following fields?
a) Drug delivery systems
b) Large-scale structural applications
c) Agricultural machinery
d) Waste disposal

5) Which of the following is not a primary classification of engineering materials?
a) Metals b) Ceramics
c) Gases d) Polymers

6) Which property is most associated with metals?
a) High electrical conductivity b) High brittleness
c) Low melting point d) Low density

7) The Gibbs phase rule is given by:
a) $P + F = C - 1$ b) $P + F = C + 1$
c) $F = C - P + 2$ d) $F = C + P - 2$

8) Non-ferrous metals are primarily used for their:
a) High strength
b) High corrosion resistance and low density
c) Magnetic properties
d) Low melting point

9) In the eutectic transformation, liquid transforms into:
a) One solid phase b) Two solid phases
c) One liquid and one solid phase d) Three solid phases

10) Which of the following is a characteristic of brass alloy?
a) Primarily composed of copper and tin
b) Primarily composed of copper and zinc
c) Primarily composed, of copper and aluminum
d) Primarily composed of copper ana nickel

11) Bronze alloys are primarily composed of copper and:
a) Zinc b) Aluminum
c) Nickel d) Tin

12) Which of the following is an example of a thermoplastic polymer?
a) Bakelite b) Epoxy resin
c) Polystyrene d) Rubber

13) The ability of a polymer to return to its original shape after deformation is known as:
a) Ductility b) Elasticity
c) Malleability d) Toughness

14) Which of the following properties is enhanced by vulcanization of rubber?
a) High flexibility
b) Increased strength and resistance to wear
c) Decreased thermal stability
d) Decreased electrical resistance

MCQ/Objective Type Questions

Duration: 30 Minutes Marks:14

Q.1 Choose the correct Answer. **14**

1) What is the primary purpose of management?
a) To maximize profits
b) To achieve organizational goals efficiently
c) To manage resources effectively
d) To implement policies

2) Which approach emphasizes the interdependence of various organizational functions?
a) Classical Approach b) Systems Approach
c) Behavioral Approach d) Contingency Approach

3) What is NOT a function of managers?
a) Planning b) Organizing
c) Playing d) Controlling

4) Which of the following is a responsibility of managers regarding social responsibility?
a) Maximizing shareholder wealth
b) Ensuring employee satisfaction
c) Contributing to community welfare
d) Minimizing costs

5) What is the first step in the planning process?
a) Developing alternatives b) Setting objectives
c) Implementing plans d) Evaluating results

6) Which type of plan is designed to cover a short period?
a) Strategic Plan b) Tactical Plan
c) Operational Plan d) Contingency Plan

7) Which of the following is a part of the staffing function?
a) Budgeting b) Training
c) Planning d) Controlling

8) Which theory focuses on the hierarchy of needs to motivate employees?
a) Herzberg's Two-Factor Theory
b) McGregor's Theory X and Y
c) Maslow's Hierarchy of Needs
d) Adams' Equity Theory

9) What is the main purpose of controlling in management?
a) To set goals
b) To ensure that organizational activities are aligned with plans
c) To improve employee morale
d) To increase production

10) What type of costs includes costs associated with preventing defects?
a) Internal failure costs b) External failure costs
c) Appraisal costs d) Prevention costs

11) Which quality guru is known for his work in the field of quality improvement through statistical methods?
a) Philip Crosby b) W. Edwards Deming
c) Joseph Juran d) Kaoru Ishikawa

12) Which chart is used to monitor the mean of a process over time?
a) R-chart b) P-chart
c) C-chart d) X-bar chart

13) Acceptance sampling is primarily concerned with:
a) Evaluating the entire production process
b) Inspecting all items produced
c) Testing a sample to infer about the quality of the entire lot
d) Conducting customer satisfaction surveys

14) What is the primary goal of employee involvement in TQM?
a) To increase profits
b) To enhance product quality through teamwork and engagement
c) To reduce the number of employees
d) To focus solely on production output

2) Which of the following is a part of the staffing function?
a) Budgeting b) Training
c) Planning d) Controlling

3) Which theory focuses on the hierarchy of needs to motivate employees?
a) Herzberg's Two-Factor Theory
b) McGregor's Theory X and Y
c) Maslow's Hierarchy of Needs
d) Adams' Equity Theory

4) What is the main purpose of controlling in management?
a) To set goals
b) To ensure that organizational activities are aligned with plans
c) To improve employee morale
d) To increase production

5) What type of costs includes costs associated with preventing defects?
a) Internal failure costs b) External failure costs
c) Appraisal costs d) Prevention costs

6) Which quality guru is known for his work in the field of quality improvement through statistical methods?
a) Philip Crosby b) W. Edwards Deming
c) Joseph Juran d) Kaoru Ishikawa

7) Which chart is used to monitor the mean of a process over time?
a) R-chart b) P-chart
c) C-chart d) X-bar chart

8) Acceptance sampling is primarily concerned with:
a) Evaluating the entire production process
b) Inspecting all items produced
c) Testing a sample to infer about the quality of the entire lot
d) Conducting customer satisfaction surveys

9) What is the primary goal of employee involvement in TQM?
a) To increase profits
b) To enhance product quality through teamwork and engagement
c) To reduce the number of employees
d) To focus solely on production output

10) What is the primary purpose of management?
a) To maximize profits
b) To achieve organizational goals efficiently
c) To manage resources effectively
d) To implement policies

11) Which approach emphasizes the interdependence of various organizational functions?
a) Classical Approach b) Systems Approach
c) Behavioral Approach d) Contingency Approach

12) What is NOT a function of managers?
a) Planning b) Organizing
c) Playing d) Controlling

13) Which of the following is a responsibility of managers regarding social responsibility?
a) Maximizing shareholder wealth
b) Ensuring employee satisfaction
c) Contributing to community welfare
d) Minimizing costs

14) What is the first step in the planning process?
a) Developing alternatives b) Setting objectives
c) Implementing plans d) Evaluating results

Set S

S.Y. (B.Tech.) (Sem-I) (New) (NEP CBCS) Examination: March/April-2025
CIVIL ENGINEERING
Industrial Management (MECHMDM-01B)

Day & Date: Thursday 22-05-2025 Max. Marks: 56
Time: 03:00 PM To 06:00 PM

Instructions: 1) In Section – I, Q. No. 3 is compulsory and attempt any two questions from the remaining questions.
1) In Section – II, Q. No. 6 is compulsory and attempt any two questions from the remaining questions.
2) Figures to the right indicate full marks.
3) Make suitable assumptions if necessary and state them clearly.
4) Draw neat-labelled diagrams wherever necessary.
5) Use of log table and calculators is allowed.

Section – I

Q.2	**a)**	What are managerial skills and managerial roles?	**05**
	b)	Explain the Social responsibilities and ethics in management.	**04**
Q.3	**a)**	What is planning? Explain advantages and disadvantages of planning?	**05**
	b)	What are the types of organizations? Explain Problems with organizational level.	**05**
Q.4	**a)**	Define Leadership. Explain four extreme styles.	**05**
	b)	Discuss types of communication by taking suitable example.	**04**

Q.5 Write short note on any three. **09**
a) Channel of distribution
b) Functions of Managers
c) Methods of Departmentation
d) Explain Maslow's theory
e) Decision making

Section – II

Q.6	**a)**	Define productivity. How does material management impact the productivity of a manufacturing unit?	**05**
	b)	Explain how the production process is planned and controlled in batch production systems.	**05**

Q.7	**a)**	Describe the importance of supplier partnerships in Total Quality Management. What are the key aspects that define a successful supplier partnership?	**05**
	b)	Explain the concept of employee involvement in TQM. How does fostering employee participation contribute to improved quality and productivity?	**04**
Q.8	**a)**	Explain the importance of Training and Development in enhancing employee performance. How can training programs be aligned with organizational goals?	**05**
	b)	What are the objectives of Human Resource Management (HRM)? Discuss how HRM helps in managing employee relations and improving organizational efficiency.	**04**

Q.9 Write short note on any three. **09**

- **a)** Material Requirement Planning (MRP)
- **b)** Batch Production
- **c)** Factors to improve productivity
- **d)** Functions of Production Planning and Control (PPC)
- **e)** Mass Production - Advantages and Disadvantages

Day & Date: Thursday 22-05-2025 Max. Marks: 70
Time: 03:00 PM To 06:00 PM

Instructions: 1) Q. No. 1 is compulsory. It should be solved in the first 30 minutes in Answer Book Page no 03 (Starting page of the Answer Book). Each question carries one mark.
2) Don't forget to Mention question paper set (P/Q/R/S) on top of page.
3) Figures to the right indicates full marks.

MCQ/Objective Type Questions

Duration: 30 Minutes Marks:14

Q.1 Choose the correct Answer. **14**

1) The terms in SOP are called _____.
a) max terms b) min terms
c) mid terms d) sum terms

2) The number of cells in a K-map with n- variables.
a) 2n b) n^2
c) 2^n d) n

3) The logical sum of two or more logical product terms is called _____.
a) SOP b) POS
c) OR operation d) NAND operation

4) A Karnaugh map (K-map) is an abstract form of _____ diagram organized as a matrix of squares.
a) Venn Diagram b) Cycle Diagram
c) Block diagram d) Triangular Diagram

5) If A and B are the inputs of a half adder, the sum is given by _____.
a) A AND B b) A OR B
c) A XOR B d) A EX-NOR B

6) Let A and B is the input of a Subtractor, then the output will be _____.
a) A XOR B b) A AND B
c) A OR B d) A EX-NOR B

7) What is a multiplexer?

a) It is a type of decoder which decodes several inputs and gives one output
b) A multiplexer is a device which converts many signals into one
c) It takes one input and results into many output
d) It is a type of encoder which decodes several inputs and gives one output

8) A basic S-R flip-flop can be constructed by cross-coupling of which basic logic gates?

a) AND or OR gates
b) XOR or XNOR gates
c) NOR or NAND gates
d) AND or NOR gates

9) In S-R flip-flop, if Q = 0 the output is said to be _____.

a) Set
b) Reset
c) Previous state
d) Current state

10) A D-Flip flop is said to be transparent, when _____.

a) the output is Low
b) the output is High
c) the output follows clock
d) the output follows input

11) How many stable state/states present in flip-flop?

a) 1
b) 0
c) 2
d) 4

12) How many natural states will there be in a 4-bit ripple counter?

a) 4
b) 8
c) 16
d) 32

13) How many flip-flops are required to construct a decade counter?

a) 4
b) 8
c) 5
d) 10

14) A 4-bit counter has a maximum modulus of _____.

a) 3
b) 6
c) 8
d) 16

2) Figures to the right indicate full marks.

Section – I

Q.2 Attempt any Four. **16**

a) Explain Standard representation of logic function.
b) Express Boolean function $F = xy + x'z$ as a product of Max-terms.
c) Explain Half Adder with logic diagram.
d) Explain 1:4 De-Multiplexer with truth Table and logic diagram.
e) Explain stepwise procedure for K-map solution.

Q.3 Attempt any two. **12**

a) Explain Binary to Gray conversion in details.
b) Explain Full Adder with suitable diagram
c) Solve using K Map -

$$F\ (A, B, C, D)\ = \sum (0, 2, 5, 7, 8, 10, 13, 15)$$

Section – II

Q.4 Attempt any Four. **16**

a) Explain basic SR Flip-flop using logic gates.
b) Explain D-Flip-Flop with suitable diagram.
c) Differentiate between Synchronous and Asynchronous sequential circuit.
d) Explain PISO shift register.
e) Explain Race-Round condition. How this condition will overcome?

Q.5 Attempt any two. **12**

a) Design MOD-10 Counter.
b) Explain JK Flip flop with suitable diagram, and truth table.
c) Explain 4-bit UP/DOWN counter with suitable diagram.

MCQ/Objective Type Questions

Duration: 30 Minutes Marks:14

Q.1 Choose the correct Answer. **14**

1) Thermocouple generate output voltage according to _____.
a) Circuit parameters b) Humidity
c) Temperature d) Voltage

2) Sensor is a type of transducer.
a) True b) False

3) Which factor affects the least while selection of sensor?
a) Size b) Accuracy
c) Colour d) Durability

4) Which sensor should one prefer for accurate measurement of distance upto 1 meter?
a) Ultrasonic sensor b) Infrared sensor
c) PIR sensor d) Photoresistor sensor

5) IR sensors can't work in dark environment.
a) True b) False

6) Which sensor should be used for calculating humidity?
a) DHT11 b) LM335Z/NOPB
c) HC-SR04 d) MPX10DP

7) What is the primary purpose of a strain gauge?
a) Measure temperature
b) Measure pressure
c) Measure deformation or strain
d) Measure voltage

8) What is a Wheatstone bridge used for in the context of strain gauges?
a) To amplify the signal
b) To convert mechanical strain to a voltage output
c) To filter noise from the signal
d) To measure temperature

9) Signal conditioning is carried out in _____.
a) Transducer housing b) Processor
c) Network interface d) None of the mentioned

10) What principle does a thermocouple operate on?
a) Seebeck effect b) Peltier effect
c) Joule heating d) Hall effect

11) Which material is most commonly used in RTDs for temperature sensing?
a) Copper b) Aluminum
c) Platinum d) Nickel

12) What is the typical temperature range for standard RTDs?
a) -200 to 500 °C b) -50 to 200 °C
c) 0 to 100 °C d) -100 to 1000 °C

13) What type of electrode is commonly used in a pHsensor?
a) Reference electrode b) Glass electrode
c) Metal electrode d) Carbon electrode

14) What is the output of atypical pHsensor?
a) Voltage b) Resistance
c) Current d) Frequency

3) Use of non-programmable calculator is allowed.

Section – I

Q.2 Attempt any Four. **16**

a) Define Motion Transducer. Explain different types of motion sensor with example.
b) Write a short note on sensor selection.
c) Define Sensor & Transducer. How do they differ from each other?
d) What is Calibration? With the help of block diagram explain procedure of calibration.
e) Explain concept of strain gauge & light intensity.
f) Describe concept of motion transducer in detail.

Q.3 Attempt any two. **12**

a) Discuss the classification of sensor based on Measurand. Provide the example of each type and their application.
b) State the working principle of LDR. Explain the construction & working of it. Also state advantages, disadvantages & application of it.
c) Write a note on:-
1) Temperature sensing
2) Light Intensity
3) Strain gauge
4) Magnetic field Sensor

Section – II

Q.4 Attempt any Four. **16**

a) With the help of neat sketch explain concept of LVDT.
b) Illustrate concept of ultrasonic sensor & Chemical sensor in detail
c) With the help of explain RTD.
d) With the help of neat sketch explain concept of RVDT.
e) Describe the concept of motion transducer.

Q.5 Attempt any two. **12**

a) With the help of neat sketch explain concept of AC Tachometer & DC Tachometer.

b) Define following concepts:

1) Humidity Sensor
2) Vibration Sensor
3) Gas Sensor

c) With the help of neat sketch explain Thermocouple & Thermistor.

Sensor Technology (ENTMDM-01B)

Day & Date: Thursday 22-05-2025 Max. Marks: 70
Time: 03:00 PM To 06:00 PM

Instructions: 1) Q. No. 1 is compulsory. It should be solved in the first 30 minutes in Answer Book Page no 03 (Starting page of the Answer Book). Each question carries one mark.
2) Don't forget to Mention question paper set (P/Q/R/S) on top of page.
3) Figures to the right indicates full marks.
4) Use of non-programmable calculator is allowed.

MCQ/Objective Type Questions

Duration: 30 Minutes Marks:14

Q.1 Choose the correct Answer. 14

1) What is a Wheatstone bridge used for in the context of strain gauges?
a) To amplify the signal
b) To convert mechanical strain to a voltage output
c) To filter noise from the signal
d) To measure temperature

2) Signal conditioning is carried out in _____.
a) Transducer housing b) Processor
c) Network interface d) None of the mentioned

3) What principle does a thermocouple operate on?
a) Seebeck effect b) Peltier effect
c) Joule heating d) Hall effect

4) Which material is most commonly used in RTDs for temperature sensing?
a) Copper b) Aluminum
c) Platinum d) Nickel

5) What is the typical temperature range for standard RTDs?
a) -200 to 500 °C b) -50 to 200 °C
c) 0 to 100 °C d) -100 to 1000 °C

6) What type of electrode is commonly used in a pHsensor?
a) Reference electrode b) Glass electrode
c) Metal electrode d) Carbon electrode

7) What is the output of atypical pHsensor?
a) Voltage b) Resistance
c) Current d) Frequency

8) Thermocouple generate output voltage according to _____.
a) Circuit parameters b) Humidity
c) Temperature d) Voltage

9) Sensor is a type of transducer.
a) True b) False

10) Which factor affects the least while selection of sensor?
a) Size b) Accuracy
c) Colour d) Durability

11) Which sensor should one prefer for accurate measurement of distance upto 1 meter?
a) Ultrasonic sensor b) Infrared sensor
c) PIR sensor d) Photoresistor sensor

12) IR sensors can't work in dark environment.
a) True b) False

13) Which sensor should be used for calculating humidity?
a) DHT11 b) LM335Z/NOPB
c) HC-SR04 d) MPX10DP

14) What is the primary purpose of a strain gauge?
a) Measure temperature
b) Measure pressure
c) Measure deformation or strain
d) Measure voltage

Set Q

S.Y. (B.Tech.) (Sem-I) (NEP New) (CBCS) Examination: March/April-2025
CIVIL ENGINEERING
Sensor Technology (ENTMDM-01B)

Day & Date: Thursday 22-05-2025 Max. Marks: 56
Time: 03:00 PM To 06:00 PM

Instructions: 1) All questions are compulsory.
2) Figures to the right indicate full marks.
3) Use of non-programmable calculator is allowed.

Section – I

Q.2 Attempt any Four. **16**

a) Define Motion Transducer. Explain different types of motion sensor with example.
b) Write a short note on sensor selection.
c) Define Sensor & Transducer. How do they differ from each other?
d) What is Calibration? With the help of block diagram explain procedure of calibration.
e) Explain concept of strain gauge & light intensity.
f) Describe concept of motion transducer in detail.

Q.3 Attempt any two. **12**

a) Discuss the classification of sensor based on Measurand. Provide the example of each type and their application.
b) State the working principle of LDR. Explain the construction & working of it. Also state advantages, disadvantages & application of it.
c) Write a note on:-
1) Temperature sensing
2) Light Intensity
3) Strain gauge
4) Magnetic field Sensor

Section – II

Q.4 Attempt any Four. **16**

a) With the help of neat sketch explain concept of LVDT.
b) Illustrate concept of ultrasonic sensor & Chemical sensor in detail
c) With the help of explain RTD.
d) With the help of neat sketch explain concept of RVDT.
e) Describe the concept of motion transducer.

Q.5 Attempt any two. **12**

a) With the help of neat sketch explain concept of AC Tachometer & DC Tachometer.

b) Define following concepts:

1) Humidity Sensor
2) Vibration Sensor
3) Gas Sensor

c) With the help of neat sketch explain Thermocouple & Thermistor.

MCQ/Objective Type Questions

Duration: 30 Minutes Marks:14

Q.1 Choose the correct Answer. **14**

1) What is the output of print(3 * 4.5 // 2)?
a) 5 b) 6
c) 7 d) 8

2) Which data type is mutable in Python?
a) int b) float
c) tuple d) list

3) What is the primary purpose of the Python interpreter?
a) To convert Python code into machine code directly.
b) To compile Python code into a .exe file.
c) To interpret and execute Python code line by line.
d) To optimize Python code for faster execution.

4) How do you import a function myfunc from a module mymodule?
a) import mymodule .myfunc
b) from mymodule import myfunc
c) import myfunc from mymodule
d) from myfunc import mymodule

5) Which statement about tuples in Python is true?
a) Tuples can be modified after creation.
b) Tuples are indexed starting from 1.
c) Tuples use square brackets for element access.
d) Tuples are immutable.

6) Given s = 'Hello World!', what does s[1:5] evaluate to?
a) 'Hell' b) 'ello'
c) 'ello ' d) None of the above

7) Which keyword is used to handle exceptions in Python?

a) catch b) except
c) handle d) recover

8) What does the self parameter represent in Python class methods?

a) It refers to the current instance of the class.
b) It is used to denote private attributes.
c) It is used for method overloading.
d) It refers to the superclass.

9) What does the following code output?

```
class MyClass:
    def greet(self):
    return "Hello!"
obj = MyClass()
print(obj.greet())
```

a) Hello! b) greet
c) Error d) None

10) How do you open a file myfile.txt in read mode in Python?

a) file = open('myfile.txt', 'r')
b) file = open('myfile.txf)
c) file = open('myfile.txt', mode='read')
d) file = open('myfile.txt', mode='w')

11) Which Python library is used for numerical operations and array manipulations?

a) numpy b) math
c) scipy d) statistics

12) Which Python module is commonly used for writing unit tests?

a) unittest b) pytest
c) testing d) check

13) Which module is used to generate pseudo-random numbers in Python?

a) random b) numpy
c) math d) os

14) What is the default logging level in Python?

a) DEBUG b) INFO
c) WARNING d) ERROR

e) Explain Logging facility in python with all levels of logging.

Q.5 Attempt any two. **12**

a) Explain mathematical functions and pseudo random functions with syntax and example.
b) Define data persistence and implement program for read & write operations on .csv file.
c) Explain the methods of testing and debugging in python. Explain unit test in python.

Seat No.		Set	S

S.Y. (B.Tech.) (Sem-I) (NEP New) (CBCS) Examination: March/April-2025
CIVIL ENGINEERING
Programming basics using Python (CSEMDM-01A)

Day & Date: Thursday 22-05-2025 Max. Marks: 70
Time: 03:00 PM To 06:00 PM

Instructions: 1) Q. No. 1 is compulsory. It should be solved in the first 30 minutes in Answer Book Page no 03 (Starting page of the Answer Book). Each question carries one mark.
2) Don't forget to Mention question paper set (P/Q/R/S) on top of page.
3) Figures to the right indicates full marks.

MCQ/Objective Type Questions

Duration: 30 Minutes Marks:14

Q.1 Choose the correct Answer. **14**

1) Given s = 'Hello World!', what does s[1:5] evaluate to?
a) 'Hell' b) 'ello'
c) 'ello ' d) None of the above

2) Which keyword is used to handle exceptions in Python?
a) catch b) except
c) handle d) recover

3) What does the self parameter represent in Python class methods?
a) It refers to the current instance of the class.
b) It is used to denote private attributes.
c) It is used for method overloading.
d) It refers to the superclass.

4) What does the following code output?

```
class MyClass:
    def greet(self):
    return "Hello!"
obj = MyClass()
print(obj.greet())
```

a) Hello! b) greet
c) Error d) None

5) How do you open a file myfile.txt in read mode in Python?
a) file = open('myfile.txt', 'r')
b) file = open('myfile.txf)
c) file = open('myfile.txt', mode='read')
d) file = open('myfile.txt', mode='w')

6) Which Python library is used for numerical operations and array manipulations?

a) numpy b) math
c) scipy d) statistics

7) Which Python module is commonly used for writing unit tests?

a) unittest b) pytest
c) testing d) check

8) Which module is used to generate pseudo-random numbers in Python?

a) random b) numpy
c) math d) os

9) What is the default logging level in Python?

a) DEBUG b) INFO
c) WARNING d) ERROR

10) What is the output of print(3 * 4.5 // 2)?

a) 5 b) 6
c) 7 d) 8

11) Which data type is mutable in Python?

a) int b) float
c) tuple d) list

12) What is the primary purpose of the Python interpreter?

a) To convert Python code into machine code directly.
b) To compile Python code into a .exe file.
c) To interpret and execute Python code line by line.
d) To optimize Python code for faster execution.

13) How do you import a function myfunc from a module mymodule?

a) import mymodule .myfunc
b) from mymodule import myfunc
c) import myfunc from mymodule
d) from myfunc import mymodule

14) Which statement about tuples in Python is true?

a) Tuples can be modified after creation.
b) Tuples are indexed starting from 1.
c) Tuples use square brackets for element access.
d) Tuples are immutable.

S.Y. (B.Tech.) (Sem-I) (NEP New) (CBCS) Examination: March/April-2025
CIVIL ENGINEERING
Programming basics using Python (CSEMDM-01A)

Day & Date: Thursday 22-05-2025 Max. Marks: 56
Time: 03:00 PM To 06:00 PM

Instructions: 1) All questions are compulsory.
2) Figures to the right indicate full marks.

Section – I

Q.2 Attempt any Four. **16**

a) What is python interpreter? Explain with neat diagram.
b) Differentiate between list and tuples in python.
c) Write a python program to check whether a given string is palindrome.
d) What are the class and objects in python? Explain with syntax and example.
e) What is exceptional handling in python? How it is implemented using try, except and finally block?

Q.3 Attempt any two. **12**

a) Illustrate following control structures and write syntax for each type of control structure.
1) Decision making statements
2) Iterative statements (Loop control statements)
3) Transfer statements
b) Explain string handling functions with syntax and example.
c) Explain inheritance in python with their types.

Section – II

Q.4 Attempt any Four. **16**

a) Explain basic date and time types with syntax and example.
b) Differentiate between shallow copy and deep copy operations.
c) Write a python program to create a 2D Numpy array and perform basic operations like addition, subtraction, division and multiplication.
d) Implement a program to measure execution time of small code snippets.
e) Explain Logging facility in python with all levels of logging.

Q.5 Attempt any two. **12**

a) Explain mathematical functions and pseudo random functions with syntax and example.
b) Define data persistence and implement program for read & write operations on .csv file.
c) Explain the methods of testing and debugging in python. Explain unit test in python.

Day & Date: Thursday 22-05-2025 Max. Marks: 70
Time: 03:00 PM To 06:00 PM

Instructions: 1) Q. No. 1 is compulsory. It should be solved in the first 30 minutes in Answer Book Page no 03 (Starting page of the Answer Book). Each question carries one mark.
2) Don't forget to Mention question paper set (P/Q/R/S) on top of page.
3) Figures to the right indicates full marks.
4) Assume suitable data wherever necessary.

MCQ/Objective Type Questions

Duration: 30 Minutes Marks:14

Q.1 Choose the correct Answer. **14**

1) _____ model is good for well understood problems, short duration project, and automation of existing manual systems.
a) Waterfall b) Iterative enhancement
c) Prototyping d) Spiral

2) Software consists of ____.
a) Set of instructions + operating procedures
b) Set of programs
c) Programs + documentation + operating procedures
d) Programs + hardware manuals

3) SDLC is framework for ____
a) Requirement b) Design
c) Code & Test d) All of above

4) Black box testing is also called as ____.
a) Structural testing b) Interface testing
c) Stress testing d) Functional testing

5) A detailed project schedule is never ____.
a) fixed b) variable
c) dynamic d) static

6) What is the sequence of maturity levels in CMM framework?
a) Initial, defined, repeatable, managed, and optimizing
b) Initial, defined, repeatable, optimizing, and managed
c) Initial, repeatable, defined, managed, and optimizing
d) Initial, repeatable, defined, optimizing, and managed

7) A ____ is logically separable part of program. It is a program unit that is discrete and identifiable with respect to compiling and loading.

a) Component b) Connector
c) Module d) None of above

8) Risk Management aims to ____ and then take action to minimize their effect on project.

a) Identify cost and estimation
b) Identify risks
c) Identify plan
d) All of above

9) The output of requirement process is ____

a) Validated SRS b) Validation
c) Problem analysis d) Verification

10) White Box Testing is also called as ____.

a) Functional testing b) Structural testing
c) Stress testing d) Interface testing

11) Agile Software Development is depends on ____.

a) Incremental Development
b) Iterative Development
c) Linear Development
d) Both Incremental and Iterative Development

12) ____ is a first level of testing.

a) Unit testing b) Integration Testing
c) System Testing d) None of above

13) CMM means ____.

a) Common Maturity Model b) Cost Maturity Model
c) Capability Maturity Model d) All

14) Which of the following is/are characteristics of SRS?

a) Unambiguous b) Verifiable
c) Consistent d) All of above

MCQ/Objective Type Questions

Duration: 30 Minutes Marks:14

Q.1 Choose the correct Answer. 14

1) Which of the following is an advantage of electronic energy meters over induction-type meters?
a) Higher accuracy b) More moving parts
c) More expensive d) Require more maintenance

2) Moving iron instruments have _____.
a) Uniform scale b) Squared scale
c) Log scale d) Linear scale

3) Digital voltmeters convert _____.
a) Analog to digital signal b) Digital to analog signal
c) Current to voltage d) Resistance to voltage

4) In a separately excited DC motor, the field windings are _____.
a) Connected in series with the armature
b) Supplied from an independent source
c) Connected to the same supply as the armature
d) None of above

5) A single-phase induction motor is inherently _____.
a) Self-starting
b) Not self-starting
c) More efficient than a three-phase motor
d) Can operate on both AC and DC supplies

6) The synchronous speed of a synchronous generator is dependent on __.
a) Rotor size
b) Number of poles and frequency
c) Magnetic field strength
d) Load current

7) The synchronous generator operates at _____.
a) A variable speed
b) A constant speed
c) A speed proportional to the load
d) A speed inversely proportional to the load

8) What is the main advantage of a permanent magnet DC motor over a conventional DC motor?
a) No need for a field winding b) Higher efficiency at low speeds
c) Reduced cost of construction d) All of the above

9) Which of the following is an application of PMSMs?
a) Fans b) Electric vehicles
c) HVAC systems d) All of the above

10) What is the purpose of laminated cores in AC machines?
a) Reduce mechanical stress
b) Minimize eddy current losses
c) Increase the resistance of the windings
d) Improve heat dissipation

11) In energy-efficient AC motors, the stator windings are often made of _____.
a) Aluminum b) Copper
c) Steel d) Brass

12) Which of the following does not change in a transformer?
a) Current b) Voltage
c) Frequency d) All of the above

13) When a transformer is loaded, the primary current?
a) Increases b) Decreases
c) Remains constant d) Becomes zero

14) Open circuit test on transformers is conducted to determine _____.
a) hysteresis losses b) copper losses
c) core losses d) eddy current losses

S.Y. (B.Tech.) (Sem-I) (New) (NEP CBCS) Examination: March/April-2025
ELECTRICAL ENGINEERING
Electrical Technology (EEMDM-01A)

Day & Date: Thursday 22-05-2025 Max. Marks: 56
Time: 03:00 PM To 06:00 PM

Instructions: 1) All questions are compulsory.
2) Figures to the right indicate full marks.

Section – I

Q.2 Attempt any Four. **16**

a) With neat sketch explain PMMC type instrument.
b) A 3-phase 500V motor load has a power factor of 0.4 two wattmeter connected to measure input. They show input to be 30 KW. Find the reading of each instrument.
c) With neat sketch explain the construction of DC machine.
d) What is the purpose of the auxiliary winding in a single-phase induction motor?
e) Explain the working principle of a synchronous generator.

Q.3 Attempt any two. **12**

a) Explain 1 - ø induction energy meter with neat diagram.
b) Explain the speed control techniques of separately excited dc motor.
c) Explain the principle of operation of 3ø induction motor. With the help of phasor diagram explain how rotating magnetic field is produced?

Section – II

Q.4 Attempt any Four. **16**

a) Explain with neat sketch construction of permanent magnet brushless DC motor.
b) Explain the principle of operation of a linear induction motor.
c) Discuss the techniques used to reduce iron losses in energy-efficient AC machines.
d) A 230/2300V transformer takes a no-load current of 6.5 A and absorbs 187W if the resistance of the primary is 0.6 Ω. Find.
1) the core loss
2) no load power factor
3) active component of current
4) magnetizing current
e) Derive the expression for saving of copper in autotransformer.

Q.5 Attempt any two. **12**

a) What are the applications of Synchronous Reluctance Motor? Explain with phasor diagram torque speed characteristics of Synchronous Reluctance Motor.

b) An energy-efficient AC motor has the following loss components:
Copper losses: 2 kW
Iron losses: 1.5 kW
Friction and windage losses: 0.5 kW
The input power is 25 kW. Calculate the efficiency of the motor.

c) With neat sketch explain open circuit and short circuit test of transformer. How equivalent circuit parameters and efficiency of a transformer are computed?

3) Figures to the right indicates full marks.
4) Make suitable assumptions if necessary and state them clearly.

MCQ/Objective Type Questions

Duration: 30 Minutes Marks:14

Q.1 Choose the correct Answer. 14

1) What is the main advantage of a permanent magnet DC motor over a conventional DC motor?
a) No need for a field winding b) Higher efficiency at low speeds
c) Reduced cost of construction d) All of the above

2) Which of the following is an application of PMSMs?
a) Fans b) Electric vehicles
c) HVAC systems d) All of the above

3) What is the purpose of laminated cores in AC machines?
a) Reduce mechanical stress
b) Minimize eddy current losses
c) Increase the resistance of the windings
d) Improve heat dissipation

4) In energy-efficient AC motors, the stator windings are often made of _____.
a) Aluminum b) Copper
c) Steel d) Brass

5) Which of the following does not change in a transformer?
a) Current b) Voltage
c) Frequency d) All of the above

6) When a transformer is loaded, the primary current?
a) Increases b) Decreases
c) Remains constant d) Becomes zero

7) Open circuit test on transformers is conducted to determine _____.
a) hysteresis losses b) copper losses
c) core losses d) eddy current losses

8) Which of the following is an advantage of electronic energy meters over induction-type meters?
a) Higher accuracy b) More moving parts
c) More expensive d) Require more maintenance

9) Moving iron instruments have _____.
a) Uniform scale b) Squared scale
c) Log scale d) Linear scale

10) Digital voltmeters convert _____.
a) Analog to digital signal b) Digital to analog signal
c) Current to voltage d) Resistance to voltage

11) In a separately excited DC motor, the field windings are _____.
a) Connected in series with the armature
b) Supplied from an independent source
c) Connected to the same supply as the armature
d) None of above

12) A single-phase induction motor is inherently _____.
a) Self-starting
b) Not self-starting
c) More efficient than a three-phase motor
d) Can operate on both AC and DC supplies

13) The synchronous speed of a synchronous generator is dependent on __.
a) Rotor size
b) Number of poles and frequency
c) Magnetic field strength
d) Load current

14) The synchronous generator operates at _____.
a) A variable speed
b) A constant speed
c) A speed proportional to the load
d) A speed inversely proportional to the load

Set Q

S.Y. (B.Tech.) (Sem-I) (New) (NEP CBCS) Examination: March/April-2025
ELECTRICAL ENGINEERING
Electrical Technology (EEMDM-01A)

Day & Date: Thursday 22-05-2025 Max. Marks: 56
Time: 03:00 PM To 06:00 PM

Instructions: 1) All questions are compulsory.
2) Figures to the right indicate full marks.

Section – I

Q.2 Attempt any Four. **16**

a) With neat sketch explain PMMC type instrument.
b) A 3-phase 500V motor load has a power factor of 0.4 two wattmeter connected to measure input. They show input to be 30 KW. Find the reading of each instrument.
c) With neat sketch explain the construction of DC machine.
d) What is the purpose of the auxiliary winding in a single-phase induction motor?
e) Explain the working principle of a synchronous generator.

Q.3 Attempt any two. **12**

a) Explain 1 - ø induction energy meter with neat diagram.
b) Explain the speed control techniques of separately excited dc motor.
c) Explain the principle of operation of 3ø induction motor. With the help of phasor diagram explain how rotating magnetic field is produced?

Section – II

Q.4 Attempt any Four. **16**

a) Explain with neat sketch construction of permanent magnet brushless DC motor.
b) Explain the principle of operation of a linear induction motor.
c) Discuss the techniques used to reduce iron losses in energy-efficient AC machines.
d) A 230/2300V transformer takes a no-load current of 6.5 A and absorbs 187W if the resistance of the primary is 0.6 Ω. Find.
1) the core loss
2) no load power factor
3) active component of current
4) magnetizing current
e) Derive the expression for saving of copper in autotransformer.

Q.5 Attempt any two. **12**

a) What are the applications of Synchronous Reluctance Motor? Explain with phasor diagram torque speed characteristics of Synchronous Reluctance Motor.

b) An energy-efficient AC motor has the following loss components:
Copper losses: 2 kW
Iron losses: 1.5 kW
Friction and windage losses: 0.5 kW
The input power is 25 kW. Calculate the efficiency of the motor.

c) With neat sketch explain open circuit and short circuit test of transformer. How equivalent circuit parameters and efficiency of a transformer are computed?

MCQ/Objective Type Questions

Duration: 30 Minutes Marks:14

Q.1 Choose the correct Answer. **14**

1) What is an electric vehicle?
a) Vehicle powered by gasoline
b) Vehicle powered by Electricity
c) Vehicle powered by Diesel
d) Vehicle powered by solar energy

2) What is the function of electric motor in an EV?
a) To charge the battery b) To power the wheels
c) To generate electricity d) To cool the vehicle

3) What is the purpose of battery management system (BMS) in an EV?
a) To monitor and control the battery's state of charge
b) To power the electric motor
c) To generate electricity
d) To cool the vehicle

4) What is the primary advantage of hybrid electric vehicle?
a) Increase driving range
b) Decreased operating cost
c) Reduced Greenhouse gas emissions
d) All of above

5) What type of battery is commonly used in Battery Electric Vehicles?
a) Lead -acid battery b) Nickel- metal hybrid battery
c) Lithium- ion battery d) All of above

6) Which is the types of electric vehicle charging?
a) Level one charging b) Level two charging
c) DC fast charging d) All of the above

7) Which of the following affects battery lifespan?
a) Depth of discharge (DOD) b) Temperature
c) Charging Frequency d) All of above

8) What type of fuel do Fuel Cell Electric Vehicles use?
a) Gasoline b) Diesel
c) Hydrogen d) Natural gas

9) What is the primary cause of battery degradation?
a) Overcharge b) Undercharge
c) Depth of discharge d) High temperature

10) How does battery storage system help in grid stability?
a) By supplying reactive power
b) By absorbing excess energy
c) By providing frequency regulation
d) All of above

11) Which of the following is the benefit of Electric Vehicles?
a) Zero emission b) Lower operating cost
c) Improved performance d) All of above

12) What is the purpose of power electronic controller in electric vehicle?
a) To regulate the flow of electrical energy
b) To monitor the vehicles speed
c) To control the onboard charger
d) To regulate the battery's state of charge

13) What is the purpose of equalization in battery Storage?
a) To balance cell voltage b) To increase battery capacity
c) To reduce charging time d) To improve discharge rate

14) What is the primary function of the on board charger in electric vehicle?
a) To charge the battery from an external power source
b) To convert AC power to DC power
c) To regulate battery's state of charge
d) To monitor the vehicles speed

c) State and explain alternative novel energy source solar photovoltaic cells, fuel cells, super capacitors and flywheels.
d) State and explain HEVs basic architecture.
e) Compare between Hybrid electric vehicle and Fuel cell electric vehicle.

Q.5 Attempt any two. **12**

a) State and explain overview of batteries and battery parameters, battery charging, regenerative braking.
b) State and Explain classification of HEVs: Conventional HEVs, Grid able HEVs.
c) State and explain fuel efficiency in HEV.

S.Y. (B. Tech) (Sem-I) (New) (NEP CBCS) Examination: March/April-2025
CIVIL ENGINEERING
Basics of Electrical Vehicle (EEMDM-01B)

Day & Date: Thursday 22-05-2025 Max. Marks: 70
Time: 03:00 PM To 06:00 PM

Instructions: 1) Q. No. 1 is compulsory. It should be solved in the first 30 minutes in Answer Book Page no 03 (Starting page of the Answer Book). Each question carries one mark.
2) Don't forget to Mention question paper set (P/Q/R/S) on top of page.
3) Figures to the right indicates full marks.

MCQ/Objective Type Questions

Duration: 30 Minutes Marks:14

Q.1 Choose the correct Answer. **14**

1) Which is the types of electric vehicle charging?
a) Level one charging b) Level two charging
c) DC fast charging d) All of the above

2) Which of the following affects battery lifespan?
a) Depth of discharge (DOD) b) Temperature
c) Charging Frequency d) All of above

3) What type of fuel do Fuel Cell Electric Vehicles use?
a) Gasoline b) Diesel
c) Hydrogen d) Natural gas

4) What is the primary cause of battery degradation?
a) Overcharge b) Undercharge
c) Depth of discharge d) High temperature

5) How does battery storage system help in grid stability?
a) By supplying reactive power
b) By absorbing excess energy
c) By providing frequency regulation
d) All of above

6) Which of the following is the benefit of Electric Vehicles?
a) Zero emission b) Lower operating cost
c) Improved performance d) All of above

7) What is the purpose of power electronic controller in electric vehicle?
a) To regulate the flow of electrical energy
b) To monitor the vehicles speed
c) To control the onboard charger
d) To regulate the battery's state of charge

8) What is the purpose of equalization in battery Storage?
a) To balance cell voltage
b) To increase battery capacity
c) To reduce charging time
d) To improve discharge rate

9) What is the primary function of the on board charger in electric vehicle?
a) To charge the battery from an external power source
b) To convert AC power to DC power
c) To regulate battery's state of charge
d) To monitor the vehicles speed

10) What is an electric vehicle?
a) Vehicle powered by gasoline
b) Vehicle powered by Electricity
c) Vehicle powered by Diesel
d) Vehicle powered by solar energy

11) What is the function of electric motor in an EV?
a) To charge the battery
b) To power the wheels
c) To generate electricity
d) To cool the vehicle

12) What is the purpose of battery management system (BMS) in an EV?
a) To monitor and control the battery's state of charge
b) To power the electric motor
c) To generate electricity
d) To cool the vehicle

13) What is the primary advantage of hybrid electric vehicle?
a) Increase driving range
b) Decreased operating cost
c) Reduced Greenhouse gas emissions
d) All of above

14) What type of battery is commonly used in Battery Electric Vehicles?
a) Lead -acid battery
b) Nickel- metal hybrid battery
c) Lithium- ion battery
d) All of above

CIVIL ENGINEERING
Basics of Electrical Vehicle (EEMDM-01B)

Day & Date: Thursday 22-05-2025 Max. Marks: 56
Time: 03:00 PM To 06:00 PM

Instructions: 1) All questions are compulsory.
2) Figures to the right indicate full marks.

Section – I

Q.2 Attempt any Four **16**

a) State and explain challenges faced by Hybrid electric vehicle.
b) State and explain Economics and Environmental impacts of using electrical vehicles.
c) State and explain need of Electrical Vehicle.
d) State and Explain common part between ICE and EV drivetrain.
e) State and explain battery pack and battery management system.

Q.3 Attempt any two. **12**

a) State and explain major requirements of electrical vehicles.
b) State and explain types of electric vehicles in brief.
c) State and explain electric vehicle configuration in brief.

Section – II

Q.4 Attempt any Four. **16**

a) State and explain battery based energy storage system.
b) State and Explain components of HEVs drive train system.
c) State and explain alternative novel energy source solar photovoltaic cells, fuel cells, super capacitors and flywheels.
d) State and explain HEVs basic architecture.
e) Compare between Hybrid electric vehicle and Fuel cell electric vehicle.

Q.5 Attempt any two. **12**

a) State and explain overview of batteries and battery parameters, battery charging, regenerative braking.
b) State and Explain classification of HEVs: Conventional HEVs, Grid able HEVs.
c) State and explain fuel efficiency in HEV.

3) Figures to the right indicates full marks.
4) Make suitable assumptions if necessary and state them clearly.

MCQ/Objective Type Questions

Duration: 30 Minutes Marks:14

Q.1 Choose the correct answer. **14**

1) Which act provide levy from persons adhered to Water Act 1974.
a) Water Cess Act b) Air Act
c) PLC Act d) All of the above

2) Core values of ElA is/are _____.
a) Integrity b) Utility
c) Sustainability d) All of the above

3) According to PLI Act 1991, the inquiry of an application for relief is conducted by _____.
a) Senior Judge b) Collector
c) Police Commissioner d) C.E.O.

4) _____ enforces owner of industry to take out life insurance policies.
a) Water Cess Act
b) Environmental Protection Act
c) PLI Act
d) All of the above

5) Air Act is not applicable in _____.
a) Jammu and Kashmir b) Delhi
c) Punjab d) None of the above

6) Water Cess is collected by _____.
a) State Government b) Central Government
c) Local Authority d) All of the above

7) Objective of EIA report is to achieve _____ development.
a) Livable
b) Equitable
c) Sustainable
d) All of the above

8) Which act provides provision for affixing of water meters?
a) Water Cess Act
b) Water Act
c) Environmental Protection Act
d) All of the above

9) Which statement dictates the relation between functional unit and reference flows?
a) Reference flows indicates the amounts of input necessary to fulfill the amount of function specified by the functional unit
b) Reference flow provides the basis for functional unit determination
c) Reference flow has no correlation with functional unit
d) Reference flow is the functional unit multiplied by impact factor

10) Choose the correct option _____.
a) Consistency check ensures that all relevant information and data needed were available and used
b) Completeness check determines whether the assumptions, methods and data were aligned with the goals and scopes
c) The ISO standard is referred to identify the significant issues while interpreting results for a specific case
d) The interpretation of results ultimately reports the conclusions, recommendations and limitations of the study

11) Which of the following stage is not included in ISO-14040 framework for life cycle assessment?
a) Life Cycle Impact Assessment (LCIA)
b) Goal and Scope Definition
c) Life Cycle Enhancement (LCE)
d) Life Cycle Inventory (LCI)

12) Which of the below is an advantage of aggregated life cycle inventory database?
a) Possibility for contribution analysis
b) User-friendly
c) Possibility to adapt datasets
d) Possibility to create datasets

13) Which of the following is a common data issue in inventory analysis?
a) Lack of standardized templates for reporting
b) Difficulty in collecting accurate and complete data
c) Reuse of materials during the raw material acquisition stage
d) Increased waste management costs

14) In life cycle inventory analysis, which stage specifically focuses on the extraction and processing of resources for further production?

a) Use/Reuse/Maintenance stage
b) Recycle/Waste Management stage
c) Raw Material acquisition stage
d) Manufacturing stage

Day & Date: Friday, 23-05-2025 Max. Marks: 56
Time: 03:00 PM To 06:00 PM

Instructions: 1) Q. No. 2 is compulsory in section I, and solve any two questions from the remaining.
2) Q. No. 6 is compulsory in section II, and solve any two questions from the remaining.
3) Assume suitable data wherever necessary and mention it clearly.
4) Use of non-programmable calculator is allowed.

Section – I

Q.2	**a)**	Relate the role of State Pollution Control Board in balancing the power in various state for improvement in pollution.	**05**
	b)	Demonstrate importance of various authorities in implementing Water Cess act 1977 in India.	**05**
Q.3	**a)**	Enumerate various core values and principles of EIA in detail.	**05**
	b)	Discuss importance of numerous elements in Checklist method of EIA methodology.	**04**
Q.4	**a)**	Interpret importance of numerous elements in Adhoc method of EIA methodology.	**05**
	b)	Examine in detail a Trippie Bottom Line approach as a tool for LCA.	**04**
Q.5	**a)**	Demonstrate numerous steps in conducting LCA of partially construction site?	**05**
	b)	Support how does LCA contribute to sustainable development and environmental management strategies in detail?	**04**

Section – II

Q.6	**a)**	Examine how does the WLPA, 1972 establish protected areas, wildlife sanctuaries, and national parks for the conservation of biodiversity?	**05**
	b)	Relate the role of regulatory authorities, such as the Central Pollution Control Board (CPCB) and State Pollution Control Boards (SPCBs), play in the implementation and enforcement of the Wate Act 1974?	**05**

Q.7	**a)**	Demonstrate numerous penalties or consequences determined for violations of the provisions of the EPA, 1986?	**05**
	b)	Enumerate how do the findings and recommendations of an EIA influence decision-making regarding the approval or rejection of proposed projects or developments.	**04**
Q.8	**a)**	Describe the environmental and socioeconomic impacts assessed during the construction stage, including resource use, media quality, health, and safety risks. How do these factors contribute to an integrated impact analysis?	**05**
	b)	Describe the unique considerations of the use, reuse, and maintenance stage in inventory analysis. How does this stage contribute to the overall environmental impact assessment?	**04**
Q.9	**a)**	Discuss how templates are used in inventory analysis to standardize data collection and reporting across different life cycle stages. Why is standardization important?	**05**
	b)	Explain the challenges specific to the recycling and waste management stage in inventory analysis. How do these challenges affect overall life cycle assessment results?	**04**

	b)	Examine in detail a Trippie Bottom Line approach as a tool for LCA.	**04**
Q.5	**a)**	Demonstrate numerous steps in conducting LCA of partially construction site?	**05**
	b)	Support how does LCA contribute to sustainable development and environmental management strategies in detail?	**04**

Section – II

Q.6	**a)**	Examine how does the WLPA, 1972 establish protected areas, wildlife sanctuaries, and national parks for the conservation of biodiversity?	**05**
	b)	Relate the role of regulatory authorities, such as the Central Pollution Control Board (CPCB) and State Pollution Control Boards (SPCBs), play in the implementation and enforcement of the Wate Act 1974?	**05**

Q.7	**a)**	Demonstrate numerous penalties or consequences determined for violations of the provisions of the EPA, 1986?	**05**
	b)	Enumerate how do the findings and recommendations of an EIA influence decision-making regarding the approval or rejection of proposed projects or developments.	**04**
Q.8	**a)**	Describe the environmental and socioeconomic impacts assessed during the construction stage, including resource use, media quality, health, and safety risks. How do these factors contribute to an integrated impact analysis?	**05**
	b)	Describe the unique considerations of the use, reuse, and maintenance stage in inventory analysis. How does this stage contribute to the overall environmental impact assessment?	**04**
Q.9	**a)**	Discuss how templates are used in inventory analysis to standardize data collection and reporting across different life cycle stages. Why is standardization important?	**05**
	b)	Explain the challenges specific to the recycling and waste management stage in inventory analysis. How do these challenges affect overall life cycle assessment results?	**04**

Set P

S. Y. (B.Tech.) (Sem-I) (New) (NEP CBCS) Examination: March/April-2025
CIVIL ENGINEERING
Applications of Information Technology and Information systems
(CIVHON-01B)

Day & Date: Friday, 23-05-2025 Max. Marks: 70
Time: 03:00 PM To 06:00 PM

Instructions: 1) Q. No. 1 is compulsory. It should be solved in the first 30 minutes in Answer Book Page no 03 (Starting page of the Answer Book). Each.
2) Don't forget to Mention question paper set (P/Q/R/S) on top of page.
3) Figures to the right indicates full marks.
4) Make suitable assumptions if necessary and state them clearly.

MCQ/Objective Type Questions

Duration: 30 Minutes Marks:14

Q.1 Choose the correct alternative from the options. 14

1) Minimization problems are used for _____ computations.
a) Outgoings b) Loss
c) Manufacturing Cost d) All of above

2) GIS uses the information from which of the following sources?
a) Non-spatial information system
b) Spatial information system
c) Global information system
d) Position information system

3) Maintaining ____ level of inventory is the primary objective of different inventory models.
a) Maximum b) Minimum
c) Optimum d) None

4) In _____ inventory model, it is assumed that there is no uncertainty associated with demand.
a) Deterministic b) Probabilistic
c) Both a & b d) None

5) Every optimization problem has three components viz _____.
a) objective function, guided path, distribution
b) objective function, decision variables, guided path
c) objective function, decision variables, constraints
d) All of the above

6) In optimization of a design, the design objective could be simply to ____.
a) Minimize the cost of production
b) maximize the efficiency of production
c) a & b both
d) none

7) Graphical method for solution of linear problems is useful up to _____ variables only.
a) 0 b) 2
c) 4 d) 6

8) Information technology deals with _____.
a) Information b) Data
c) Knowledge d) All of these

9) Which software is primarily used for project scheduling and management in construction?
a) AutoCAD b) STAAD.Pro
c) MS Project (MSP) d) Revit

10) What does CAD stand for in the context of civil engineering?
a) Computer-Aided Drawing b) Computer-Assisted Design
c) Construction-Aided Design d) Computer-Aided Design

11) The 'Constraints' in an optimization problem represent _____.
a) The goals to be achieved
b) The variables that can be changed
c) The limitations or restrictions
d) The final solution

12) Which technology allows for overlaying digital information onto the real world?
a) Virtual Reality (VR)
b) 3D Printing
c) Augmented Reality (AR)
d) Geographic Information System (GIS)

13) What is a key benefit of using Building Information Modeling (BIM)?
a) Reduced material cost only
b) Faster concrete setting time
c) Improved collaboration and clash detection
d) Automated drone surveying

14) Linear Programming is a technique used for _____.
a) Resource allocation optimization
b) Structural analysis
c) Material testing
d) Surveying calculations

MCQ/Objective Type Questions

Duration: 30 Minutes Marks:14

Q.1 Choose the correct answer. **14**

1) Design Thinking is a Linear Process. True or False?
a) True b) False

2) Which of the Following Represents the Correct Steps of the Design Thinking Process?
a) Understand > Draw > Ideate > Create > Test > Implement
b) Empathize > Define > Ideate > Prototype > Test > Implement
c) Empathize > Design > Implement > Produce > Test
d) Understand > Define > Ideate > Produce > Try

3) Once the problem is defined, the next step in the design thinking process is to _____.
a) Test b) Prototype
c) Ideate d) Empathize

4) Design Thinking Skills _____.
a) Emotional Intelligence b) Consensus Building
c) Both (a) and (b) d) None of these

5) Establishing the relative importance of customer need can be done only after _____.
a) Organizing data into a hierarchy of customer needs
b) Collecting raw data from customers
c) Reflecting on the results and the process of identifying customer need
d) None of the above

6) Focus groups are one of the methods for _____.
a) Interpreting raw data collected from customers
b) Organizing data into a hierarchy of customer needs
c) Gathering raw data from customers
d) Reflecting on the results and the process of identifying customer need

7) Which phase of the product development process is most associated with creativity and brainstorming?
a) Testing
b) Prototyping
c) Ideation
d) Marketing

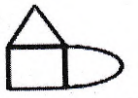
8) What is the role of prototyping in product development?
a) To finalize the product design
b) To visualize and test design ideas or replica of your product or model
c) To conduct market research
d) To increase production costs

9) What is an aspect of service design?
a) Resources to connect people and/or machines
b) Environmental
c) Process and experience
d) All of above

10) What is a service?
a) A provided way for performing a task
b) How the user interacts with a product
c) When a person helps the user buys something
d) A way to evaluate whether a task is achieved or not

11) Design Service Process dependencies should be kept to a _____.
a) Minimum
b) Maximum
c) Equal
d) None of above

12) Figure shows the conceptual drawing of a (n) _____ architecture.



a) Slot-modular
b) Bus-modular
c) Sectional-modular
d) Integral

13) Environmental impact that affect the product life cycle.
a) Global warming
b) Solid waste
c) Water pollution
d) All of These

14) Design for Environment (DFE) is a method to _____ environmental impact of product over its life cycle.
a) Maximize
b) Minimize
c) Equal
d) None of above

2) Q. No. 6 is compulsory in section II, and solve any two questions from the remaining.
3) Assume suitable data wherever necessary and mention it clearly.
4) Use of non-programmable calculator is allowed.

Section – I

Q.2	**a)**	How does design thinking differ from traditional approaches?	**06**
	b)	Enlist and Briefly Explain Various Design Thinking Skills?	**04**
Q.3	**a)**	What are the different goals of customer needs identification?	**04**
	b)	Explain the term identify the customer need. What are the different methods to identify the customer need and explain in brief?	**05**
Q.4	**a)**	What is Creativity? How is Creativity Applied Effectively in Problem-Solving?	**04**
	b)	What is Concept Generation? Explain the Five-Step Concept Generation Process with a Flow Diagram.	**05**
Q.5	**a)**	Enlist and briefly explain the various mindsets in Design thinking.	**04**
	b)	Explain the Term "Prototyping" and describe the various types of Prototypes.	**05**

Section – II

Q.6 Attempt following Question. (Any 2)

a)	What do you mean by Service Design? Explain Service Design in brief.	**05**
b)	Explain the concept of Product Development Framework.	**05**
c)	What are the different tools used in Service Design? Briefly explain each tool.	**05**

Q.7 Attempt following Question. (Any 3) **09**

a) What are the difference between Modular Product Architecture and Integral Product Architecture?

b) What is Financial Analysis? Explain it briefly along with its different needs.

c) Explain the term "Product Architecture" in brief.

d) Explain Modular Product Architecture and describe its different types with examples.

Q.8 Attempt following Question. (Any 3) **09**

a) What is the Spiral Product Development Process? Explain it briefly.

b) Draw and briefly explain the design for Environment Process.

c) What is the environmental impact over the Product Life Cycle?

d) What does the term "Design for Environment" mean, explain it in brief?

CIVIL ENGINEERING
Design Thinking (CIVHON-01A)

Day & Date: Friday,23-05-2025 Max. Marks: 70
Time: 03:00 PM To 06:00 PM

Instructions: 1) Q. No. 1 is compulsory. It should be solved in the first 30 minutes in Answer Book Page no 03 (Starting page of the Answer Book). Each.
2) Don't forget to Mention question paper set (P/Q/R/S) on top of page.
3) Figures to the right indicates full marks.
4) Make suitable assumptions if necessary and state them clearly.

MCQ/Objective Type Questions

Duration: 30 Minutes Marks:14

Q.1 Choose the correct answer. **14**

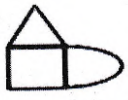
1) What is the role of prototyping in product development?
a) To finalize the product design
b) To visualize and test design ideas or replica of your product or model
c) To conduct market research
d) To increase production costs

2) What is an aspect of service design?
a) Resources to connect people and/or machines
b) Environmental
c) Process and experience
d) All of above

3) What is a service?
a) A provided way for performing a task
b) How the user interacts with a product
c) When a person helps the user buys something
d) A way to evaluate whether a task is achieved or not

4) Design Service Process dependencies should be kept to a _____.
a) Minimum b) Maximum
c) Equal d) None of above

5) Figure shows the conceptual drawing of a (n) _____ architecture.



a) Slot-modular b) Bus-modular
c) Sectional-modular d) Integral

6) Environmental impact that affect the product life cycle.
a) Global warming
b) Solid waste
c) Water pollution
d) All of These

7) Design for Environment (DFE) is a method to _____ environmental impact of product over its life cycle.
a) Maximize
b) Minimize
c) Equal
d) None of above

8) Design Thinking is a Linear Process. True or False?
a) True
b) False

9) Which of the Following Represents the Correct Steps of the Design Thinking Process?
a) Understand > Draw > Ideate > Create > Test > Implement
b) Empathize > Define > Ideate > Prototype > Test > Implement
c) Empathize > Design > Implement > Produce > Test
d) Understand > Define > Ideate > Produce > Try

10) Once the problem is defined, the next step in the design thinking process is to _____.
a) Test
b) Prototype
c) Ideate
d) Empathize

11) Design Thinking Skills _____.
a) Emotional Intelligence
b) Consensus Building
c) Both (a) and (b)
d) None of these

12) Establishing the relative importance of customer need can be done only after _____.
a) Organizing data into a hierarchy of customer needs
b) Collecting raw data from customers
c) Reflecting on the results and the process of identifying customer need
d) None of the above

13) Focus groups are one of the methods for _____.
a) Interpreting raw data collected from customers
b) Organizing data into a hierarchy of customer needs
c) Gathering raw data from customers
d) Reflecting on the results and the process of identifying customer need

14) Which phase of the product development process is most associated with creativity and brainstorming?
a) Testing
b) Prototyping
c) Ideation
d) Marketing

Set Q

S. Y. (B.Tech.) (Sem-I) (New) (NEP CBCS) Examination: March/April-2025
CIVIL ENGINEERING
Design Thinking (CIVHON-01A)

Day & Date: Friday,23-05-2025 Max. Marks: 56
Time: 03:00 PM To 06:00 PM

Instructions: 1) Q. No. 2 is compulsory in section I, and solve any two questions from the remaining.
2) Q. No. 6 is compulsory in section II, and solve any two questions from the remaining.
3) Assume suitable data wherever necessary and mention it clearly.
4) Use of non-programmable calculator is allowed.

Section – I

Q.2	**a)**	How does design thinking differ from traditional approaches?	**06**
	b)	Enlist and Briefly Explain Various Design Thinking Skills?	**04**
Q.3	**a)**	What are the different goals of customer needs identification?	**04**
	b)	Explain the term identify the customer need. What are the different methods to identify the customer need and explain in brief?	**05**
Q.4	**a)**	What is Creativity? How is Creativity Applied Effectively in Problem-Solving?	**04**
	b)	What is Concept Generation? Explain the Five-Step Concept Generation Process with a Flow Diagram.	**05**
Q.5	**a)**	Enlist and briefly explain the various mindsets in Design thinking.	**04**
	b)	Explain the Term "Prototyping" and describe the various types of Prototypes.	**05**

Section – II

Q.6 Attempt following Question. (Any 2)

a)	What do you mean by Service Design? Explain Service Design in brief.	**05**
b)	Explain the concept of Product Development Framework.	**05**
c)	What are the different tools used in Service Design? Briefly explain each tool.	**05**

Q.7 Attempt following Question. (Any 3) **09**

a) What are the difference between Modular Product Architecture and Integral Product Architecture?

b) What is Financial Analysis? Explain it briefly along with its different needs.

c) Explain the term "Product Architecture" in brief.

d) Explain Modular Product Architecture and describe its different types with examples.

Q.8 Attempt following Question. (Any 3) **09**

a) What is the Spiral Product Development Process? Explain it briefly.

b) Draw and briefly explain the design for Environment Process.

c) What is the environmental impact over the Product Life Cycle?

d) What does the term "Design for Environment" mean, explain it in brief?

Railway Track Structure (CIVHON-01D)

Day & Date: Friday, 23-05-2025 Max. Marks: 70
Time: 03:00 PM To 06:00 PM

Instructions: 1) Q. No. 1 is compulsory. It should be solved in the first 30 minutes in Answer Book Page no 03 (Starting page of the Answer Book). Each.
2) Don't forget to Mention question paper set (P/Q/R/S) on top of page.
3) Figures to the right indicates full marks.
4) Make suitable assumptions if necessary and state them clearly.

MCQ/Objective Type Questions

Duration: 30 Minutes Marks:14

Q.1 Choose the correct alternatives from the options and rewrite the sentences. **14**

1) Which gauge is most used on Indian Railways?
a) Narrow Gauge b) Standard Gauge
c) Broad Gauge d) Meter Gauge

2) What is the purpose of the Long-Term Corporate Plan of Indian Railways?
a) To privatize the railway system completely
b) To ensure the financial autonomy of Indian Railways
c) To provide a roadmap for infrastructure, technology, and operational development
d) To reduce railway tariffs for passengers

3) Which type of survey is primarily used to estimate passenger and freight volumes for a proposed railway line?
a) Traffic Survey b) Preliminary Survey
c) Reconnaissance Survey d) Final Location Survey

4) What does a Preliminary Engineering-cum-Traffic Survey aim to achieve?
a) To determine the technical feasibility and cost estimates
b) To finalize the alignment of the railway line
c) To conduct land acquisition activities
d) To test soil conditions for track laying

5) What is the primary purpose of superelevation on a curve?
a) To allow higher permissible speeds
b) To prevent derailment by counteracting centrifugal force
c) To improve passenger comfort
d) All of the above

6) What is the term used for increasing the width of the gauge on curves to ensure safety and minimize wear and tear?
a) Extra clearance
b) Gauge widening
c) Grade Compensation
d) Superelevation

7) Which of the following is a key requirement for an ideal rail section?
a) High tensile strength and resistance to wear
b) Low weight to reduce manufacturing costs
c) Easy transportation and installation
d) Ability to withstand extreme weather conditions

8) What is the main advantage of concrete sleepers over wooden sleepers?
a) Greater durability and longer life span
b) Lower cost of production
c) Higher flexibility in track design
d) Easier to transport and install

9) What is one of the main causes of creep in railway tracks?
a) Excessive axle load
b) Friction between the wheel and rail
c) Temperature variations causing expansion and contraction
d) Lack of maintenance of fastenings

10) Which portion of the railway track is most susceptible to creep?
a) Gradient sections
b) Curves
c) Level crossings
d) Points and crossings

11) What is the purpose of grade compensation on curves?
a) To decrease the gradient for easier climbing
b) To counterbalance additional resistance caused by curvature
c) To improve visibility on sharp curves
d) To increase train speed on curves

12) What is the primary function of the ballast in railway track structure?
a) To provide stability to the track
b) To reduce vibration and noise
c) To support the weight of the train
d) All of the above

13) Which of the following is true regarding the inspection and maintenance of points and crossings?

a) Regular lubrication of all movable parts is unnecessary.
b) Broken switches and crossings can be ignored during inspection.
c) Frequent monitoring prevents derailments and ensures safe operation.
d) Worn-out parts must be reconditioned without following specifications

14) What is the standard slope for the formation of railway embankments to ensure stability?

a) 1:1 b) 2:1
c) 3:1 d) 4:1

MCQ/Objective Type Questions

Duration: 30 Minutes Marks:14

Q.1 Choose the correct alternatives from the options and rewrite the sentences. **14**

1) What is the purpose of grade compensation on curves?
a) To decrease the gradient for easier climbing
b) To counterbalance additional resistance caused by curvature
c) To improve visibility on sharp curves
d) To increase train speed on curves

2) What is the primary function of the ballast in railway track structure?
a) To provide stability to the track
b) To reduce vibration and noise
c) To support the weight of the train
d) All of the above

3) Which of the following is true regarding the inspection and maintenance of points and crossings?
a) Regular lubrication of all movable parts is unnecessary.
b) Broken switches and crossings can be ignored during inspection.
c) Frequent monitoring prevents derailments and ensures safe operation.
d) Worn-out parts must be reconditioned without following specifications

4) What is the standard slope for the formation of railway embankments to ensure stability?
a) 1:1 b) 2:1
c) 3:1 d) 4:1

5) Which gauge is most used on Indian Railways?
a) Narrow Gauge b) Standard Gauge
c) Broad Gauge d) Meter Gauge

6) What is the purpose of the Long-Term Corporate Plan of Indian Railways?
a) To privatize the railway system completely
b) To ensure the financial autonomy of Indian Railways
c) To provide a roadmap for infrastructure, technology, and operational development
d) To reduce railway tariffs for passengers

7) Which type of survey is primarily used to estimate passenger and freight volumes for a proposed railway line?
a) Traffic Survey
b) Preliminary Survey
c) Reconnaissance Survey
d) Final Location Survey

8) What does a Preliminary Engineering-cum-Traffic Survey aim to achieve?
a) To determine the technical feasibility and cost estimates
b) To finalize the alignment of the railway line
c) To conduct land acquisition activities
d) To test soil conditions for track laying

9) What is the primary purpose of superelevation on a curve?
a) To allow higher permissible speeds
b) To prevent derailment by counteracting centrifugal force
c) To improve passenger comfort
d) All of the above

10) What is the term used for increasing the width of the gauge on curves to ensure safety and minimize wear and tear?
a) Extra clearance
b) Gauge widening
c) Grade Compensation
d) Superelevation

11) Which of the following is a key requirement for an ideal rail section?
a) High tensile strength and resistance to wear
b) Low weight to reduce manufacturing costs
c) Easy transportation and installation
d) Ability to withstand extreme weather conditions

12) What is the main advantage of concrete sleepers over wooden sleepers?
a) Greater durability and longer life span
b) Lower cost of production
c) Higher flexibility in track design
d) Easier to transport and install

13) What is one of the main causes of creep in railway tracks?
a) Excessive axle load
b) Friction between the wheel and rail
c) Temperature variations causing expansion and contraction
d) Lack of maintenance of fastenings

14) Which portion of the railway track is most susceptible to creep?

a) Gradient sections
b) Curves
c) Level crossings
d) Points and crossings

Set R

S.Y. (B.Tech.) (Sem-I) (New) (NEP CBCS) Examination: March/April-2025
CIVIL ENGINEERING
Railway Track Structure (CIVHON-01D)

Day & Date: Friday, 23-05-2025 Max. Marks: 56
Time: 03:00 PM To 06:00 PM

Instructions: 1) Q. No. 2 is compulsory in section I, and solve any two questions from the remaining.
2) Q. No. 6 is compulsory in section II, and solve any two questions from the remaining.
3) Assume suitable data wherever necessary and mention it clearly.
4) Use of non-programmable calculator is allowed.

Section – I

Q.2 Solve the following questions. **08**
a) Write the Plan of Indian Railways.
b) What are the different modes of Transport?

Q.3 Solve the following questions. **10**
a) What are the Modern Surveying techniques for Difficult Terrain?
b) Write the importance of surveying in construction of Railway line.

Q.4 Solve the following questions. **10**
a) Explain horizontal and Vertical curves.
b) What is Superelevation, Safe Speed on Curves?

Q.5 Solve the following questions. **10**
a) What are the Different Gauges on Indian Railways? Explain in detail.
e) What is the necessity for Geometric Design of curve in railway line?

Section – II

Q.6 Solve the following questions. **08**
a) What are the functions and requirements of Sleepers?
b) What are the Laboratory Tests for Physical Properties of Ballast?

Q.7 Solve the following questions. **10**
a) Write a note on Blanket and Blanketing Material.
b) Explain the methods and challenges involved in the execution of earthwork in embankments and cuttings for railway tracks.

Q.8 Solve the following questions. **10**

a) What are the cautions considered in inspection and maintenance of Points and Crossings?

b) What are the different types of railway curves, and how are they classified?

Q.8 Solve the following questions. **10**

a) What is the creep in rial, causes of Development of Creep?

b) What are Switches, Tongue Rails, Crossing, Angle of Crossing?

Answer

Q.1 Choose the correct alternatives from the options.

1) Basic unit of human interaction is _____.
a) Family b) Society
c) Group d) None of the above

2) The Self(I) is the seer, _____.
a) Doer b) Enjoyer
c) Doer & Enjoyer d) None

3) PROSPERITY deals with _____.
a) Right understanding in the self
b) Fulfilment in relationship
c) Ensuring more than required physical facility
d) None

4) When we expect feelings from others for our happiness, it is a state of _____.
a) Swatantrata b) Partantrata
c) Prosperity d) None

5) For continuity of happiness, what is essential?
a) Right understanding in the Self
b) Right feeling and right thought in the Self
c) Recognition of needs, ensure more than required, make right utilisation of it
d) All the above

6) Right Understanding and Right Feeling is matter of _____.
a) Self b) Body
c) Both d) None

7) Acceptance of excellence in others is called _____.

a) Gratitude b) Reverence
c) Glory d) None of above

8) Self and _____ are different in nature, materiality, needs and activities.

a) Prosperity b) Right Understanding
c) Body d) None of above

9) _____ is assuming without knowing.

a) Knowing b) Assuming
c) Preconditioning d) Relationship

10) Imagination is combination of _____.

a) Desire & thought
b) Desire, thought & expectation
c) Expectation & thought
d) None of above

11) Following are the basic guidelines for value education except _____.

a) Universal b) Personal
c) Rational d) Natural

12) Natural acceptance and _____ are the two processes of knowing.

a) Self-Actualization b) Self-exploration
c) Self Evaluation d) Self control

13) Human Life is lived at four levels: Individual, Family, and Society and _____.

a) Nature b) Nurture
c) World d) Universe

14) Value education should not be based on dogmas or blind beliefs _____.

a) True b) False

15) Value of an entity is _____.

a) Physical Facility
b) Prosperity
c) Its participation in the larger order of which it is part
d) both a and b

16) _____ are as Basic Human Aspirations.

a) Money
b) Relationship without money
c) Physical Facility
d) Continuous Happiness and Prosperity

17) Please give the correct priority for Physical Facilities, Right Understanding and Relationship _____.

a) Physical Facilities, Right Understanding and Relationship
b) Relationship, Right Understanding and Physical Facilities
c) Right Understanding, Relationship and Physical Facilities
d) None of the above

18) Right Understanding in relationship lead to _____.

a) Mutual Happiness b) Mutual Prosperity
c) Both a and b d) All are wrong

19) SSDD stands for _____.

a) Sadhan Viheen Dukhi Daridra
b) Sadhan Sampan Dukhi Daridra
c) Sadhan Sampan Sukhi Samridha
d) None of the above

20) Natural acceptance does not change with _____.

a) Time b) Place
c) Beliefs d) All of above

21) Human being is co-existence of the _____ and the _____.

a) self, self b) body, body
c) self, body d) None

22) _____ is the feeling of responsibility for nurturing, protecting and right utilizing the body.

a) Swasthya b) Sanyam
c) Prosperity d) None

23) The _____ is an instrument of _____.

a) I, Body b) Body, I
c) Both a and b d) None

24) _____ is the information we get from the Body through the five sense organs.

a) Precondition b) Sensation
c) Natural acceptance d) None

25) Which of the following is NOT a response of the Self?

a) Knowing b) Assuming
c) Recognising d) Preconditioning

26) Needs of Body are quantitative whereas needs of Self are qualitative _____.

a) True b) False

27) Sah-astitva means _____.

a) Co-existence b) Co-operation
c) Cooption d) Corporate identity

28) Ensuring justice in the relationship, on the basis of values leads to _____ in society.

a) Fearlessness b) Confusion
c) Confidence d) Fear

29) _____ is the complete value in relationship.

a) Respect b) Love
c) Trust d) Glory

30) The feeling to nurture and protect the body of our relative is called _____.

a) Care b) Affection
c) Gratitude d) Respect

31) _____ is the feeling of acceptance for those who have made efforts for my excellence.

a) Reverence b) Glory
c) Gratitude d) Guidance

32) We all are similar at the level of our _____ but differ in our _____.

a) Competence, Intension b) Intension, Competence
c) Competence, Competence d) None

33) Abhay means _____.

a) Right understanding b) Trust and fearlessness
c) Prosperity d) Co-existance

34) All the units of nature can be classified into _____ orders.

a) Two b) Three
c) Four d) Six

35) Which of the following does not form an order in nature?

a) Bio b) Animal
c) Consciousness d) Human

36) According to quantity, which of the following is true for the orders in nature?

a) Bio order >> Physical order >> Animal order >> Human order
b) Animal order >> Bio order >> Physical order >> Human order
c) Physical order >> Bio order >> Animal order >> Human order
d) Physical order >> Animal order >> Bio order >> Human order

37) What is NOT acceptable naturally in the nature?

a) Enrichment of nature b) Pollution in nature
c) Protection of nature d) Right Utilization of nature

38) Which of the following is NOT a unit of physical order?

a) Soil b) Air
c) Tree d) Water

39) There is justice in relationship when there is _____.
a) Self-regulation b) Freedom
c) Mutual fulfillment d) None

40) Justice from family to world family leads to _____.
a) Powerful nation
b) Strong political ties between nations
c) Undivided society
d) Disruption of the family structure

41) _____ is and it exists between one self (I1) and other self (I2).
a) Body b) Relationship
c) Health d) All

42) Which of the following results from over-evaluation _____.
a) Ego b) Depression
c) Self-confidence d) Trust

43) Which of the following statement is true?
a) Intention of a human being is always doubtful
b) One's intension is always to make the other happy
c) Intension of a human keeps varying from time to time
d) Intension of a human being can never be understood

44) Feeling of relationship exist between _____.
a) Self and self b) Body and Body
c) Self and body d) None of the above

45) Which of the following is NOT one of the goals at the level of society?
a) Right Understanding b) Fearlessness
c) Madness for profit d) Prosperity

46) Intension of a human being is the same as _____.
a) Natural acceptance b) Competence
c) Thought d) Pre-conditioning

47) Harmony should be maintained in _____.
a) Between body and life b) Between self and body
c) Between self and society d) All of the above

48) If something is _____ to us without any force or compulsion, then it is often correct and does not change with time and people.
a) Not acceptable b) Completely acceptable
c) Naturally acceptable d) Less acceptable

49) Nurturing on the Body depends upon _____.
a) Ingestion b) Digestion
c) Excretion d) All of the above

50) Sensation is related to _____.

a) Body
b) Self 'I'
c) Both a and b
d) None of the above

14) _____ is the information we get from the Body through the five sense organs.

a) Precondition b) Sensation
c) Natural acceptance d) None

15) Which of the following is NOT a response of the Self?

a) Knowing b) Assuming
c) Recognising d) Preconditioning

16) Needs of Body are quantitative whereas needs of Self are qualitative _____.

a) True b) False

17) Sah-astitva means _____.

a) Co-existence b) Co-operation
c) Cooption d) Corporate identity

18) Ensuring justice in the relationship, on the basis of values leads to _____ in society.

a) Fearlessness b) Confusion
c) Confidence d) Fear

19) _____ is the complete value in relationship.

a) Respect b) Love
c) Trust d) Glory

20) The feeling to nurture and protect the body of our relative is called _____.

a) Care b) Affection
c) Gratitude d) Respect

21) _____ is the feeling of acceptance for those who have made efforts for my excellence.

a) Reverence b) Glory
c) Gratitude d) Guidance

22) We all are similar at the level of our _____ but differ in our _____.

a) Competence, Intension b) Intension, Competence
c) Competence, Competence d) None

23) Abhay means _____.

a) Right understanding b) Trust and fearlessness
c) Prosperity d) Co-existance

24) All the units of nature can be classified into _____ orders.

a) Two b) Three
c) Four d) Six

25) Which of the following does not form an order in nature?

a) Bio b) Animal
c) Consciousness d) Human

26) According to quantity, which of the following is true for the orders in nature?

a) Bio order >> Physical order >> Animal order >> Human order
b) Animal order >> Bio order >> Physical order >> Human order
c) Physical order >> Bio order >> Animal order >> Human order
d) Physical order >> Animal order >> Bio order >> Human order

27) What is NOT acceptable naturally in the nature?

a) Enrichment of nature b) Pollution in nature
c) Protection of nature d) Right Utilization of nature

28) Which of the following is NOT a unit of physical order?

a) Soil b) Air
c) Tree d) Water

29) There is justice in relationship when there is _____.
a) Self-regulation b) Freedom
c) Mutual fulfillment d) None

30) Justice from family to world family leads to _____.
a) Powerful nation
b) Strong political ties between nations
c) Undivided society
d) Disruption of the family structure

31) _____ is and it exists between one self (I1) and other self (I2).
a) Body b) Relationship
c) Health d) All

32) Which of the following results from over-evaluation _____.
a) Ego b) Depression
c) Self-confidence d) Trust

33) Which of the following statement is true?
a) Intention of a human being is always doubtful
b) One's intension is always to make the other happy
c) Intension of a human keeps varying from time to time
d) Intension of a human being can never be understood

34) Feeling of relationship exist between _____.
a) Self and self b) Body and Body
c) Self and body d) None of the above

35) Which of the following is NOT one of the goals at the level of society?
a) Right Understanding b) Fearlessness
c) Madness for profit d) Prosperity

36) Intension of a human being is the same as _____.
a) Natural acceptance b) Competence
c) Thought d) Pre-conditioning

37) Harmony should be maintained in _____.
a) Between body and life b) Between self and body
c) Between self and society d) All of the above

38) If something is _____ to us without any force or compulsion, then it is often correct and does not change with time and people.
a) Not acceptable b) Completely acceptable
c) Naturally acceptable d) Less acceptable

39) Nurturing on the Body depends upon _____.
a) Ingestion b) Digestion
c) Excretion d) All of the above

40) Sensation is related to _____.

a) Body b) Self 'I'

c) Both a and b d) None of the above

41) Basic unit of human interaction is _____.

a) Family b) Society

c) Group d) None of the above

42) The Self(I) is the seer, _____.

a) Doer b) Enjoyer

c) Doer & Enjoyer d) None

43) PROSPERITY deals with _____.

a) Right understanding in the self

b) Fulfilment in relationship

c) Ensuring more than required physical facility

d) None

44) When we expect feelings from others for our happiness, it is a state of _____.

a) Swatantrata b) Partantrata

c) Prosperity d) None

45) For continuity of happiness, what is essential?

a) Right understanding in the Self

b) Right feeling and right thought in the Self

c) Recognition of needs, ensure more than required, make right utilisation of it

d) All the above

46) Right Understanding and Right Feeling is matter of _____.

a) Self b) Body

c) Both d) None

47) Acceptance of excellence in others is called _____.

a) Gratitude b) Reverence

c) Glory d) None of above

48) Self and _____ are different in nature, materiality, needs and activities.

a) Prosperity b) Right Understanding

c) Body d) None of above

49) _____ is assuming without knowing.

a) Knowing b) Assuming

c) Preconditioning d) Relationship

50) Imagination is combination of _____.

a) Desire & thought
b) Desire, thought & expectation
c) Expectation & thought
d) None of above

S. Y. (B.Tech.) (Sem - I) (New) (NEP CBCS) Examination: March/April-2025
CIVIL ENGINEERING
Universal Human Values (VEC-01)

Day & Date: Saturday, 24-05-2025 Max. Marks: 50
Time: 03:00 PM To 4:30 PM

Instructions: 1) All questions are compulsory.
2) Figures to the right indicate full marks.
3) Mention Question Paper Set (P/Q/R/S) on Top of Page.

Answer

Q.1 Choose the correct alternatives from the options.

1) _____ is and it exists between one self (I1) and other self (I2).
a) Body b) Relationship
c) Health d) All

2) Which of the following results from over-evaluation _____.
a) Ego b) Depression
c) Self-confidence d) Trust

3) Which of the following statement is true?
a) Intention of a human being is always doubtful
b) One's intension is always to make the other happy
c) Intension of a human keeps varying from time to time
d) Intension of a human being can never be understood

4) Feeling of relationship exist between _____.
a) Self and self b) Body and Body
c) Self and body d) None of the above

5) Which of the following is NOT one of the goals at the level of society?
a) Right Understanding b) Fearlessness
c) Madness for profit d) Prosperity

6) Intension of a human being is the same as _____.
a) Natural acceptance b) Competence
c) Thought d) Pre-conditioning

7) Harmony should be maintained in _____.
a) Between body and life b) Between self and body
c) Between self and society d) All of the above

8) If something is _____ to us without any force or compulsion, then it is often correct and does not change with time and people.

a) Not acceptable b) Completely acceptable
c) Naturally acceptable d) Less acceptable

9) Nurturing on the Body depends upon _____.

a) Ingestion b) Digestion
c) Excretion d) All of the above

10) Sensation is related to _____.

a) Body b) Self 'I'
c) Both a and b d) None of the above

11) Basic unit of human interaction is _____.

a) Family b) Society
c) Group d) None of the above

12) The Self(I) is the seer, _____.

a) Doer b) Enjoyer
c) Doer & Enjoyer d) None

13) PROSPERITY deals with _____.

a) Right understanding in the self
b) Fulfilment in relationship
c) Ensuring more than required physical facility
d) None

14) When we expect feelings from others for our happiness, it is a state of _____.

a) Swatantrata b) Partantrata
c) Prosperity d) None

15) For continuity of happiness, what is essential?

a) Right understanding in the Self
b) Right feeling and right thought in the Self
c) Recognition of needs, ensure more than required, make right utilisation of it
d) All the above

16) Right Understanding and Right Feeling is matter of _____.

a) Self b) Body
c) Both d) None

17) Acceptance of excellence in others is called _____.

a) Gratitude b) Reverence
c) Glory d) None of above

18) Self and _____ are different in nature, materiality, needs and activities.

a) Prosperity b) Right Understanding
c) Body d) None of above

19) _____ is assuming without knowing.

a) Knowing b) Assuming
c) Preconditioning d) Relationship

20) Imagination is combination of _____.

a) Desire & thought
b) Desire, thought & expectation
c) Expectation & thought
d) None of above

21) Following are the basic guidelines for value education except _____.

a) Universal b) Personal
c) Rational d) Natural

22) Natural acceptance and _____ are the two processes of knowing.

a) Self-Actualization b) Self-exploration
c) Self Evaluation d) Self control

23) Human Life is lived at four levels: Individual, Family, and Society and _____.

a) Nature b) Nurture
c) World d) Universe

24) Value education should not be based on dogmas or blind beliefs _____.

a) True b) False

25) Value of an entity is _____.

a) Physical Facility
b) Prosperity
c) Its participation in the larger order of which it is part
d) both a and b

26) _____ are as Basic Human Aspirations.

a) Money
b) Relationship without money
c) Physical Facility
d) Continuous Happiness and Prosperity

27) Please give the correct priority for Physical Facilities, Right Understanding and Relationship _____.

a) Physical Facilities, Right Understanding and Relationship
b) Relationship, Right Understanding and Physical Facilities
c) Right Understanding, Relationship and Physical Facilities
d) None of the above

28) Right Understanding in relationship lead to _____.

a) Mutual Happiness b) Mutual Prosperity
c) Both a and b d) All are wrong

29) SSDD stands for _____.

a) Sadhan Viheen Dukhi Daridra
b) Sadhan Sampan Dukhi Daridra
c) Sadhan Sampan Sukhi Samridha
d) None of the above

30) Natural acceptance does not change with _____.

a) Time b) Place
c) Beliefs d) All of above

31) Human being is co-existence of the _____ and the _____.

a) self, self b) body, body
c) self, body d) None

32) _____ is the feeling of responsibility for nurturing, protecting and right utilizing the body.

a) Swasthya b) Sanyam
c) Prosperity d) None

33) The _____ is an instrument of _____.

a) I, Body b) Body, I
c) Both a and b d) None

34) _____ is the information we get from the Body through the five sense organs.

a) Precondition b) Sensation
c) Natural acceptance d) None

35) Which of the following is NOT a response of the Self?

a) Knowing b) Assuming
c) Recognising d) Preconditioning

36) Needs of Body are quantitative whereas needs of Self are qualitative _____.

a) True b) False

37) Sah-astitva means _____.

a) Co-existence b) Co-operation
c) Cooption d) Corporate identity

38) Ensuring justice in the relationship, on the basis of values leads to _____ in society.

a) Fearlessness b) Confusion
c) Confidence d) Fear

39) _____ is the complete value in relationship.

a) Respect b) Love
c) Trust d) Glory

40) The feeling to nurture and protect the body of our relative is called _____.

a) Care b) Affection
c) Gratitude d) Respect

41) _____ is the feeling of acceptance for those who have made efforts for my excellence.

a) Reverence b) Glory
c) Gratitude d) Guidance

42) We all are similar at the level of our _____ but differ in our _____.

a) Competence, Intension b) Intension, Competence
c) Competence, Competence d) None

43) Abhay means _____.

a) Right understanding b) Trust and fearlessness
c) Prosperity d) Co-existance

44) All the units of nature can be classified into _____ orders.

a) Two b) Three
c) Four d) Six

45) Which of the following does not form an order in nature?

a) Bio b) Animal
c) Consciousness d) Human

46) According to quantity, which of the following is true for the orders in nature?

a) Bio order >> Physical order >> Animal order >> Human order
b) Animal order >> Bio order >> Physical order >> Human order
c) Physical order >> Bio order >> Animal order >> Human order
d) Physical order >> Animal order >> Bio order >> Human order

47) What is NOT acceptable naturally in the nature?

a) Enrichment of nature b) Pollution in nature
c) Protection of nature d) Right Utilization of nature

48) Which of the following is NOT a unit of physical order?

a) Soil b) Air
c) Tree d) Water

49) There is justice in relationship when there is _____.

a) Self-regulation b) Freedom

c) Mutual fulfillment d) None

50) Justice from family to world family leads to _____.

a) Powerful nation

b) Strong political ties between nations

c) Undivided society

d) Disruption of the family structure

S.Y. (B.Tech.) (Civil Engineering) (Semester - I) (Old) (CBCS)
Examination: March/April - 2025
Surveying & Geomatics (BTN01301)

Day & Date: Saturday 17-05-2025 Max. Marks: 70
Time: 03:00 PM To 06:00 PM

Instructions: 1) Q. No. 1 is compulsory. It should be solved in the first 30 minutes in Answer Book Page no 03 (Starting page of the Answer Book). Each question carries one mark.
2) Don't forget to Mention question paper set (P/Q/R/S) on top of page.
3) Figures to the right indicates full marks.

MCQ/Objective Type Questions

Duration: 30 Minutes Marks:14

Q.1 Choose the correct answer. **14**

1) Global Positioning Service (GPS) uses 24 satellites in _____.
a) 9 Orbits b) 8 Orbits
c) 7 Orbits d) 6 Orbits

2) Global Positioning Service (GPS) is based on a principle called _____.
a) Transmission b) Trilateration
c) Obliteration d) Globalization

3) Major differences between Vector and Raster data models _____.
a) Vector and raster are same data models
b) Vector is continuous, whereas raster data model is discrete
c) Vector and raster both are discrete
d) Vector is discrete, whereas raster data model is continuous

4) Spatial referencing is the process of which of the following?
a) Combing attribute values with locational information
b) Referencing geo-relational tables
c) Computing the reference between items in databases
d) Establishing the topology of spatial objects

5) What is angle of intersection of a contour and ridge line?
a) 30° b) 0°
c) 180° d) 90°

6) Two contour lines of different elevations unite to form one line only in the case of _____.
a) Hills b) Vertical cliff
c) Horizontal cliff d) Overhanging Cliff

7) Among the following, which describes Stefan- Boltzmann formula?
a) $M = \sigma / T^4$ b) $M = \sigma - T^4$
c) $M = \sigma + T^4$ d) $M = \sigma^* T^4$

8) Which of the following cannot be done with the help of theodolite in surveying?
a) Laying off horizontal angles
b) Locating points on lines
c) Prolonging survey lines
d) Measuring horizontal distances

9) The distance in EDM is measured by _____.
a) Frequency of the wave b) Wave length
c) Phase difference d) Amplitude

10) Which of the following can be affected by atmospheric path disturbances?
a) Modern GPS surveying b) Conventional GPS
c) Absolute positioning d) Resection method

11) Geodimeter can be used for _____.
a) Day time observations b) Night observations
c) Both day-night observations d) None of these

12) The relation between velocity, wavelength and frequency can be given as _____.
a) $\lambda = c \ / \ r$ b) $\lambda = c/f$
c) $\lambda = c/h$ d) $\lambda = h^* c/f$

13) Total station can be used for _____.
a) Missing line measurement
b) Remote elevation measurement
c) Stake out
d) All of these

14) Flying height in Aerial Photogrammetry refers to _____.
a) Upper portion of the exposure station
b) Bottom of the exposure station
c) Depression of the exposure station
d) Elevation of the exposure station

Set | P

S.Y. (B.Tech.) (Civil Engineering) (Semester - I) (Old) (CBCS)
Examination: March/April - 2025
Surveying & Geomatics (BTN01301)

Day & Date: Saturday 17-05-2025 Max. Marks: 56
Time: 03:00 PM To 06:00 PM

Instructions: 1) Assume any suitable data wherever necessary.
2) Q.2 & Q.6 are Compulsory.
3) Solve any two questions out of Q.no. 3, 4 and 5.
4) Solve any two questions out of Q.no. 7, 8 and 9.

Section – I

Q.2 **a)** With the help of a diagram, describe the types of Contour. **05**
b) Discuss the temporary and permanent adjustments of Auto Level. **05**

Q.3 **a)** Describe indirect method of contouring. **04**
b) With a neat diagram explain reiteration method in theodolite. **05**

Q.4 **a)** Discuss the procedure for Stake out using a Total Station. **05**
b) With the help of a diagram, explain the working of Photo-theodolite. **04**

Q.5 **Define: (Any three)** **09**
a) Face Right observations.
b) Area calculation in Total Station.
c) Transiting the telescope.
d) EMR Spectrum.

Section – II

Q.6 **a)** Differentiate between Digitizer and Scanner. **05**
b) Classify the types of Platforms used in remote sensing & GIS. **05**

Q.7 **a)** What are the major Software components of GIS. **04**
b) With the help diagram, explain the process of Trilateration for GPS Navigation. **05**

Q.8 **Explain the Project Survey for**
a) Building **04**
b) Canal **05**

Q.9 **Define: (Any three)** **09**
a) Components of GPS.
b) Flight Planning.
c) Mirror Stereoscope.
d) Types of Sensors in Remote Sensing.

Set **S**

S.Y. (B.Tech.) (Civil Engineering) (Semester - I) (Old) (CBCS)
Examination: March/April - 2025
Surveying & Geomatics (BTN01301)

Day & Date: Saturday 17-05-2025 Max. Marks: 70
Time: 03:00 PM To 06:00 PM

Instructions: 1) Q. No. 1 is compulsory. It should be solved in the first 30 minutes in Answer Book Page no 03 (Starting page of the Answer Book). Each question carries one mark.
2) Don't forget to Mention question paper set (P/Q/R/S) on top of page.
3) Figures to the right indicates full marks.

MCQ/Objective Type Questions

Duration: 30 Minutes Marks:14

Q.1 Choose the correct answer. **14**

1) Two contour lines of different elevations unite to form one line only in the case of _____.
a) Hills b) Vertical cliff
c) Horizontal cliff d) Overhanging Cliff

2) Among the following, which describes Stefan- Boltzmann formula?
a) $M = \sigma/T^4$ b) $M = \sigma - T^4$
c) $M = \sigma + T^4$ d) $M = \sigma^* T^4$

3) Which of the following cannot be done with the help of theodolite in surveying?
a) Laying off horizontal angles
b) Locating points on lines
c) Prolonging survey lines
d) Measuring horizontal distances

4) The distance in EDM is measured by _____.
a) Frequency of the wave b) Wave length
c) Phase difference d) Amplitude

5) Which of the following can be affected by atmospheric path disturbances?
a) Modern GPS surveying b) Conventional GPS
c) Absolute positioning d) Resection method

6) Geodimeter can be used for _____.
a) Day time observations b) Night observations
c) Both day-night observations d) None of these

7) The relation between velocity, wavelength and frequency can be given as _____.

a) $\lambda = c \,/\, r$ b) $\lambda = c/f$

c) $\lambda = c/h$ d) $\lambda = h^{*}c/f$

8) Total station can be used for _____.

a) Missing line measurement
b) Remote elevation measurement
c) Stake out
d) All of these

9) Flying height in Aerial Photogrammetry refers to _____.

a) Upper portion of the exposure station
b) Bottom of the exposure station
c) Depression of the exposure station
d) Elevation of the exposure station

10) Global Positioning Service (GPS) uses 24 satellites in _____.

a) 9 Orbits b) 8 Orbits

c) 7 Orbits d) 6 Orbits

11) Global Positioning Service (GPS) is based on a principle called _____.

a) Transmission b) Trilateration

c) Obliteration d) Globalization

12) Major differences between Vector and Raster data models _____.

a) Vector and raster are same data models
b) Vector is continuous, whereas raster data model is discrete
c) Vector and raster both are discrete
d) Vector is discrete, whereas raster data model is continuous

13) Spatial referencing is the process of which of the following?

a) Combing attribute values with locational information
b) Referencing geo-relational tables
c) Computing the reference between items in databases
d) Establishing the topology of spatial objects

14) What is angle of intersection of a contour and ridge line?

a) 30° b) 0°

c) 180° d) 90°

Seat No.		Set	S

S.Y. (B.Tech.) (Civil Engineering) (Semester - I) (Old) (CBCS)
Examination: March/April - 2025
Surveying & Geomatics (BTN01301)

Day & Date: Saturday 17-05-2025 Max. Marks: 56
Time: 03:00 PM To 06:00 PM

Instructions: 1) Assume any suitable data wherever necessary.
2) Q.2 & Q.6 are Compulsory.
3) Solve any two questions out of Q.no. 3, 4 and 5.
4) Solve any two questions out of Q.no. 7, 8 and 9.

Section – I

Q.2 **a)** With the help of a diagram, describe the types of Contour. **05**
b) Discuss the temporary and permanent adjustments of Auto Level. **05**

Q.3 **a)** Describe indirect method of contouring. **04**
b) With a neat diagram explain reiteration method in theodolite. **05**

Q.4 **a)** Discuss the procedure for Stake out using a Total Station. **05**
b) With the help of a diagram, explain the working of Photo-theodolite. **04**

Q.5 **Define: (Any three)** **09**
a) Face Right observations.
b) Area calculation in Total Station.
c) Transiting the telescope.
d) EMR Spectrum.

Section – II

Q.6 **a)** Differentiate between Digitizer and Scanner. **05**
b) Classify the types of Platforms used in remote sensing & GIS. **05**

Q.7 **a)** What are the major Software components of GIS. **04**
b) With the help diagram, explain the process of Trilateration for GPS Navigation. **05**

Q.8 **Explain the Project Survey for**
a) Building **04**
b) Canal **05**

Q.9 **Define: (Any three)** **09**
a) Components of GPS.
b) Flight Planning.
c) Mirror Stereoscope.
d) Types of Sensors in Remote Sensing.

Fluid Mechanics and Fluid Machines (BTN01302)

Day & Date: Monday, 19-05-2025 Max. Marks: 70
Time: 03:00 PM To 06:00 PM

Instructions: 1) Q. No. 1 is compulsory. It should be solved in the first 30 minutes in Answer Book Page no 03 (Starting page of the Answer Book). Each question carries one mark.
2) Don't forget to Mention question paper set (P/Q/R/S) on top of page.
3) Assume suitable data if necessary and state it clearly.
4) Figures to the right indicates full marks.

MCQ/Objective Type Questions

Duration: 30 Minutes Marks:14

Q.1 Choose the correct answer. **14**

1) Ideal fluid is fluid having _____.
a) viscosity b) compressible
c) both a and b d) none of these

2) Capillarity of fluid depends on _____.
a) diameter of capillary tube b) specific weight if fluid
c) surface tension of fluid d) all of these

3) For measurement of low pressure _____ is used.
a) inverted U tube manometer
b) Bourdon tube
c) inclined tube manometer
d) vertical single column manometer

4) An opening provided in the side of a tank or vessel such that the liquid surface in the tank is below the top edge of the opening is known as _____.
a) Weir b) Notch
c) Orifice d) Venturi meter

5) The error in discharge due to the error in the measurement of head over a rectangular notch or weir is given by _____.
a) $\frac{dQ}{Q} = \frac{1}{2}\frac{dH}{H}$ b) $\frac{dQ}{Q} = \frac{3}{2}\frac{dH}{H}$
c) $\frac{dQ}{Q} = \frac{3}{4}\frac{dH}{H}$ d) None of these

6) Venturi-meter is used for measurement of _____.
a) high pressure b) low pressure
c) negative pressure d) discharge

7) Manometers are used for measurement of _____.
a) discharge b) velocity
c) pressure d) viscosity

8) The ratio of average velocity to maximum velocity for steady laminar flow in circular pipe is _____.
a) 3/2 b) 2/3
c) 1/2 d) 2

9) Boundary layer separation is caused by _____.
a) Negative pressure gradient b) Positive pressure gradient
c) Zero pressure gradient d) None of the above

10) For high discharge the pumps are connected in _____.
a) Parallel b) Series
c) both and b d) none of these

11) An impulse turbine requires _____.
a) high head and small quantity of flow
b) low head and small quantity of flow
c) low head and high rate of flow
d) none of the above

12) When a steady jet impinges on a fixed inclined surface _____.
a) the flow is divided into parts proportional to the angle of inclination of the surface
b) no force is exerted by the jet on the vane
c) the momentum component is unchanged parallel to the surface
d) none of the above

13) Dimensional analysis is used to _____.
a) test the dimensional homogeneity of any equation of fluid motion
b) derive rational formulae for a flow phenomenon
c) derive equations expressed in terms of non-dimensional parameters
d) all of the above

14) If ‘n’ variables in a physical phenomenon contained ‘m’ fundamental dimensions, then the variables can be arranged into _____.
a) n dimensionless terms
b) m dimensionless terms
c) (n - m) dimensionless terms
d) (n + m) dimensionless terms

CIVIL ENGINEERING
Fluid Mechanics and Fluid Machines (BTN01302)

Day & Date: Monday, 19-05-2025 Max. Marks: 56
Time: 03:00 PM To 06:00 PM

Instructions: 1) In Section - I, Q. 2 is compulsory and you must attempt any two questions from the remaining questions.
2) In Section - II, Q. 6 is compulsory and you must attempt any two questions from the remaining questions.
3) Figures to the right indicate full marks.
4) Assume suitable data if necessary and state it clearly.

Section – I

Q.2 **a)** Give the detailed classification of fluids. **05**
b) A fluid is placed in between two plates, and one of the plates is moving at 0.6 m/s which is at a distance of 0.02 mm from other plate which is fixed. If the force required to maintain the speed is 3N/m^2 determine viscosity of fluid. **05**

Q.3 **a)** Explain different types of pressures with neat sketch. **04**
b) A rectangular plane surface of dimensions 3 m width and 4 m depth lies in vertical plane in water. Determine the total pressure force and center of pressure on surface when it is immersed at 3.5 m from free water surface and 3 m dimension is parallel to the free water surface. **05**

Q.4 **a)** What are the different types fluid flows? Explain them. **04**
b) For a velocity function given by the equation $\Psi = 5x - 6y$. Determine the components of velocity and resultant velocity along with its direction. **05**

Q.5 **a)** Derive the expression for total time required to empty a reservoir/tank by triangular notch. **04**
b) What will be the length of rectangular weir if it discharges 0.582 m^3/s, at a head of 300mm and coefficient of discharge 0.6. **05**

Section – II

Q.6 **a)** Derive the expression for force exerted by a jet on station vertical plate. **05**

b) A hydraulic turbine is to be operated under a head of 25 m at 200 rpm and discharge of 9 cumec. If the efficiency of turbine is 90% determine specific speed of turbine, power generated and also state the type of turbine. **05**

Q.7 **a)** Define the terms: boundary layer thickness, displacement thickness, momentum thickness and energy thickness. **04**

b) A 10 cm diameter pipe suddenly enlarge to 20 cm diameter. Determine the discharge through the pipe if head loss due to sudden enlargement is 30 cm of water. **05**

Q.8 **a)** What is mean by repeating variables? How they are selected? **04**

b) The pressure difference ΔP in a pipe of diameter D and length L due to viscous flow depends upon the velocity V, Viscosity μ and density ρ, using Buckingham π method obtain expression for ΔP. **05**

Q.9 **a)** With neat sketch explain different components of centrifugal pump. **04**

b) A centrifugal pump has to discharge 0.3 m^3/s at 1500 rpm against a head of 22m. the impeller diameter is 250 mm and its width at outlet is 50 mm. If the manometric efficiency is 80% determine, vane angle at outlet periphery of impeller. **05**

Time: 03:00 PM To 06:00 PM

Instructions: 1) In Section - I, Q. 2 is compulsory and you must attempt any two questions from the remaining questions.
2) In Section - II, Q. 6 is compulsory and you must attempt any two questions from the remaining questions.
3) Figures to the right indicate full marks.
4) Assume suitable data if necessary and state it clearly.

Section – I

Q.2 **a)** Give the detailed classification of fluids. **05**
b) A fluid is placed in between two plates, and one of the plates is moving at 0.6 m/s which is at a distance of 0.02 mm from other plate which is fixed. If the force required to maintain the speed is 3N/m^2 determine viscosity of fluid. **05**

Q.3 **a)** Explain different types of pressures with neat sketch. **04**
b) A rectangular plane surface of dimensions 3 m width and 4 m depth lies in vertical plane in water. Determine the total pressure force and center of pressure on surface when it is immersed at 3.5 m from free water surface and 3 m dimension is parallel to the free water surface. **05**

Q.4 **a)** What are the different types fluid flows? Explain them. **04**
b) For a velocity function given by the equation $\Psi = 5x - 6y$. Determine the components of velocity and resultant velocity along with its direction. **05**

Q.5 **a)** Derive the expression for total time required to empty a reservoir/tank by triangular notch. **04**
b) What will be the length of rectangular weir if it discharges 0.582 m^3/s, at a head of 300mm and coefficient of discharge 0.6. **05**

Section – II

Q.6 **a)** Derive the expression for force exerted by a jet on station vertical plate. **05**

b) A hydraulic turbine is to be operated under a head of 25 m at 200 rpm and discharge of 9 cumec. If the efficiency of turbine is 90% determine specific speed of turbine, power generated and also state the type of turbine. **05**

Q.7 **a)** Define the terms: boundary layer thickness, displacement thickness, momentum thickness and energy thickness. **04**

b) A 10 cm diameter pipe suddenly enlarge to 20 cm diameter. Determine the discharge through the pipe if head loss due to sudden enlargement is 30 cm of water. **05**

Q.8 **a)** What is mean by repeating variables? How they are selected? **04**

b) The pressure difference ΔP in a pipe of diameter D and length L due to viscous flow depends upon the velocity V, Viscosity μ and density ρ, using Buckingham π method obtain expression for ΔP. **05**

Q.9 **a)** With neat sketch explain different components of centrifugal pump. **04**

b) A centrifugal pump has to discharge 0.3 m^3/s at 1500 rpm against a head of 22m. the impeller diameter is 250 mm and its width at outlet is 50 mm. If the manometric efficiency is 80% determine, vane angle at outlet periphery of impeller. **05**

Set P

S.Y. (B.Tech.) (Civil Engineering) (Semester - I) (Old) (CBCS) Examination: March/April - 2025

Concrete Technology, Material Testing & Evaluation (BTN01303)

Day & Date: Tuesday, 20-May-2025 Max. Marks: 70
Time: 03:00 PM To 06:00 PM

Instructions: 1) Q. No. 1 is compulsory. It should be solved in the first 30 minutes in answer book. Page no 03 (Starting page of the Answer Book). Each question carries one mark.
2) Don't forget to Mention question paper set (P/Q/R/S) on top of page.
3) Figures to the right indicates full marks.
4) Assume data wherever necessary.

MCQ/Objective Type Questions

Duration: 30 Minutes Marks:14

Q.1 Choose the correct Answer. **14**

1) The maximum % of chemical ingredient of cement if that of _____
a) Aluminia b) Silica
c) Gypsum d) Lime

2) Setting time of cement increases by adding ____.
a) Gypsum b) Calcium chloride
c) Hydrogen peroxide d) Sodium oxide

3) Slump test of concrete is a measure of its ____
a) compressive strength b) consistency
c) tensile strength d) all of the above

4) Excess vibration during compacting can lead to: ____
a) Bleeding b) Segregation
c) High strength d) Air bubbles

5) The strength and quality of concrete, depend upon _____
a) grading of aggregates b) surface area of aggregates
c) shape of aggregates d) all the above

6) Water cement ratio is ____.
a) weight of concrete to that of water
b) volume of concrete to that of water
c) weight of water to that of cement
d) both (a) and (b) of the above

7) Which is not use to make Portland Cement (PC)?
a) Calcareous Rocks b) Argillocalcareous Rocks
c) Argillaceous Rocks d) Sand

8) Air entrainment in the concrete increases ____.
a) Strength
b) Workability
c) The effects of temperature variations
d) The unit weight

9) Steam curing is adopted for: _____.
a) Walls b) Columns
c) Beams d) Precast structures

10) Increase in the moisture content in concrete ____
a) Reduces the strength
b) Increases the strength
c) Does not change the strength
d) All of the above

11) Setting time for cement is measured by _____
a) Vicat's Apparatus b) Le Chatelier's
c) Hygrometer d) None of these

12) Use of right quality fly ash, results in _____ of water demand for desired Slump.
a) increase b) retention
c) reduction d) none

13) Tensile test can be performed on ____.
a) Impact testing machine b) Universal testing machine
c) Rockwell Tester d) None

14) IS Provision for concrete mix design is given by ____.
a) IS 456-2000 b) IS 10262-2009
c) IS 383-1970 d) None

Time: 03:00 PM To 06:00 PM

Instructions: 1) All questions are compulsory.
2) Figures to the right indicate full marks.
3) Use of non-programmable calculators is allowed.
4) Assume suitable data if necessary and mention it clearly.

Section – I

Q.2 Answer the following: (Any Seven) **28**

a) Write a brief note on Retarders and Accelerators.
b) What are Bogue's compounds? State their influence on cement strength.
c) Differentiate between "Segregation and Bleeding".
d) Write a note on bulking of Sand.
e) Enlist factor affecting workability of concrete & explain any Two.
f) Explain the manufacturing process of Cement by Wet Process with flow chart construction.
g) Write a note in compaction of concrete.
h) Write a note on Effect of W/C ratio on strength of Concrete.
i) Write a note on Plasticizers & Super plasticizers.
j) Write a note on Batching of concrete.

Section- II

Q.3 Answer the following: (Any Three) **12**

a) Quality Control of Concrete
b) Write a note of sulphate or chloride attack on concrete.
c) Factor affecting Creep of concrete
d) Tension test on mild Steel
e) Shrinkage Control

Q.4 Answer the following: (Any Two) **16**

a) Explain in detail Procedure of ACI method of Concrete Mix design.
b) Elaborate on steps followed in performing concrete mix design as per I.S. Method.
c) Explain is "High Strength Concrete and High-Performance Concrete." Discuss their advantages and disadvantages.
d) Which are the durability requirements of concrete as per I.S. 456-2000?

MCQ/Objective Type Questions

Duration: 30 Minutes Marks:14

Q.1 Choose the correct Answer. **14**

1) A rod, 120cm long and of diameter 3.0 cm is subjected to an axial pull of 18 kN. The stress in N/mn^2
a) 22.57 b) 23.47
c) 24.57 d) 25.47

2) The property of a material by which it can be drawn to a smaller section by applying a tensile load is called _____.
a) Elasticity b) Plasticity
c) Ductility d) Malleability

3) Which of the following is maximum in the principal Plane?
a) Normal stress b) Shear stress
c) shear strain d) None of the above

4) Principal stress is to the principal plane _____.
a) Tangential b) 45°
c) Normal d) 180°

5) The Maximum shear stress occurs at _____.
a) 30° b) 45°
c) 90° d) 180°

6) _____ is a Saint Venant theory.
a) Maximum shear stress theory
b) Maximum strain energy theory
c) Maximum principle strain theory
d) Distortion energy theory

7) Maximum shear stress theory is applicable to _____.
a) Ductile materials b) Brittle materials
c) Composite materials d) None

8) Bending moment on a section is maximum where shearing force is ____.
a) minimum b) maximum
c) equal d) zero

9) For a simply supported beam of span L, loaded with U.D.L. w/m over the whole span, the maximum B.M will be _____.
a) wL/4 b) $wL^2/8$
c) $wL^2/4$ d) $WwL^2/2$

10) What is the S.I. unit of sectional modulus?
a) mm^4 b) mm^3
c) mm^2 d) m

11) Shear stress variation is (a) Outermost fiber _____.
a) Linear b) Polynomial
c) Parabolic d) None

12) What The section modulus of a rectangular section about an axis through its C.G., is _____.
a) b/2 b) d/2
c) $bd^2/2$ d) $bd^2/6$

13) When a beam is subjected to a bending moment the bending stress in a layer is _____the distance from the neutral axis.
a) Independent of b) Directly proportional to
c) Inversely proportional to d) None of these

14) For drawing ILD, what value of test load is assumed?
a) 1 unit b) Arbitrary
c) Depends upon structure d) 0

2) Don't forget to Mention question paper set (P/Q/R/S) on top of page.
3) Figures to the right indicates full marks.
4) Make suitable assumptions (if necessary and state them clearly).

MCQ/Objective Type Questions

Duration: 30 Minutes Marks:14

Q.1 Choose the correct Answer. **14**

1) Bending moment on a section is maximum where shearing force is ____.
a) minimum b) maximum
c) equal d) zero

2) For a simply supported beam of span L, loaded with U.D.L. w/m over the whole span, the maximum B.M will be _____.
a) wL/4 b) $wL^2/8$
c) $wL^2/4$ d) $WwL^2/2$

3) What is the S.I. unit of sectional modulus?
a) mm^4 b) mm^3
c) mm^2 d) m

4) Shear stress variation is (a) Outermost fiber _____.
a) Linear b) Polynomial
c) Parabolic d) None

5) What The section modulus of a rectangular section about an axis through its C.G., is _____.
a) b/2 b) d/2
c) $bd^2/2$ d) $bd^2/6$

6) When a beam is subjected to a bending moment the bending stress in a layer is _____the distance from the neutral axis.
a) Independent of b) Directly proportional to
c) Inversely proportional to d) None of these

7) For drawing ILD, what value of test load is assumed?
a) 1 unit b) Arbitrary
c) Depends upon structure d) 0

8) A rod, 120cm long and of diameter 3.0 cm is subjected to an axial pull of 18 kN. The stress in N/mn^2

a) 22.57 b) 23.47
c) 24.57 d) 25.47

9) The property of a material by which it can be drawn to a smaller section by applying a tensile load is called _____.

a) Elasticity b) Plasticity
c) Ductility d) Malleability

10) Which of the following is maximum in the principal Plane?

a) Normal stress b) Shear stress
c) shear strain d) None of the above

11) Principal stress is to the principal plane _____.

a) Tangential b) 45°
c) Normal d) 180°

12) The Maximum shear stress occurs at _____.

a) 30° b) 45°
c) 90° d) 180°

13) _____ is a Saint Venant theory.

a) Maximum shear stress theory
b) Maximum strain energy theory
c) Maximum principle strain theory
d) Distortion energy theory

14) Maximum shear stress theory is applicable to _____.

a) Ductile materials b) Brittle materials
c) Composite materials d) None

Set **Q**

S.Y. (B. Tech) (Sem-I) (Old) (CBCS) Examination: March/April-2025
CIVIL ENGINEERING
Structural Mechanics - I (BTN01305)

Day & Date: Wednesday 21-05-2025 Max. Marks: 56
Time: 03:00 PM To 06:00 PM

Instructions: 1) In Section I, Q. No. 2 is compulsory and solve any two questions from the remaining questions.
2) In Section I, Q. No. 6 is compulsory and solve any two questions from the remaining questions.
3) Figures to the right indicate full marks.
4) Make suitable assumptions if necessary and state them clearly.
5) Use of non-programable calculator is allowed.

Section – I

Q.2 A brass bar having cross sectional area is 1000 mm^2 is subjected to axial forces as shown in Fig. No. 1. Find the total elongation of the bar. Take E = $1.05X10^5$ N/mm^2 **10**

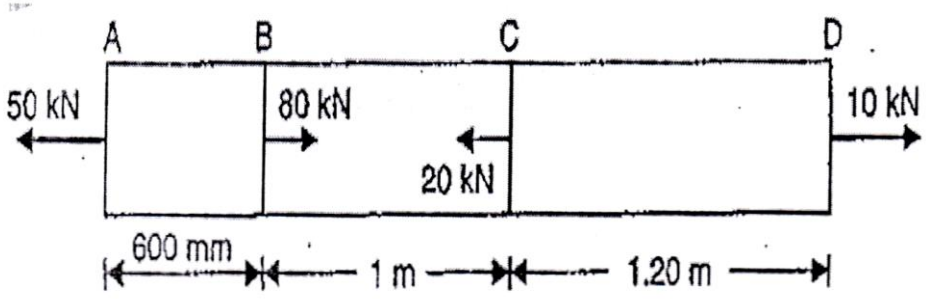

Fig. No. 1

Q.3 Find normal & tangential stresses and the resultant stresses and its obliquity on a plane at 30° to the axis of the minor stress. Take major principle stress as 120 N/mm^2 (Tensile) & minor principle stress as 60 N/mm^2 (Tensile) **09**

Q.4 A circular shaft transmits 60 kw at 2 Hz it is supported in bearings 3 m apart and at 1 m from one bearing, it carries a pulley exerting a transverse load of 36 kN on the shaft. Determine a suitable diameter for the shaft if. **09**
a) The maximum direct stress is not to exceed 100 N/mm^2
b) The maximum shear stress is not to exceed 50 N/mm^2

Q.5 A solid circular shaft of diameter 120mm carries bending moment and twisting moment of magnitudes 35 kN.m and 25 kN.m Find the major principal stress induced in the section and where does it develop. **09**

Section – II

Q.6 Draw SFD & BMD for beam as shown in fig. No. 2 below. **10**

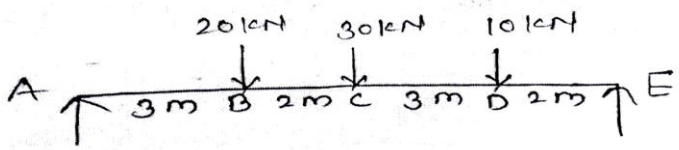

Fig. No. 2

Q.7 A rolled steel joist of I-section has the dimensions as shown in Fig. No. 3. The beam of I section carries a u.d.l of 40 kN/m is simply supported on a span of 10 m. Calculate the maximum stresses produced due to bending. **09**

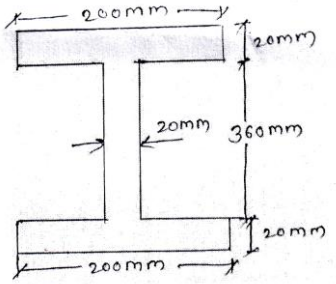

Fig. No. 3

Q.8 Draw the shear stress distribution diagram for the T-section shown in the fig. no.4 below. Take shear force of 1000 kN. **09**

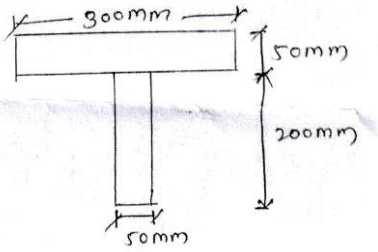

Fig. No. 4

Q.9 Two-wheel loads 8 kN and 20 kN spaced at 2 m apart move along the span of girder of span 16 m. Find the maximum BM that can occur at a section of 6 m from the left end. Any wheel load can lead the other. **09**

Seat No.	

Set **R**

S.Y. (B. Tech) (Sem-I) (Old) (CBCS) Examination: March/April-2025
CIVIL ENGINEERING
Structural Mechanics - I (BTN01305)

Day & Date: Wednesday 21-05-2025 Max. Marks: 70
Time: 03:00 PM To 06:00 PM

Instructions: 1) Q. No. 1 is compulsory. It should be solved in the first 30 minutes in Answer Book Page no 03 (Starting page of the Answer Book). Each question carries one mark.
2) Don't forget to Mention question paper set (P/Q/R/S) on top of page.
3) Figures to the right indicates full marks.
4) Make suitable assumptions (if necessary and state them clearly).

MCQ/Objective Type Questions

Duration: 30 Minutes Marks:14

Q.1 Choose the correct Answer. **14**

1) Shear stress variation is (a) Outermost fiber _____.
a) Linear b) Polynomial
c) Parabolic d) None

2) What The section modulus of a rectangular section about an axis through its C.G., is _____.
a) b/2 b) d/2
c) $bd^2/2$ d) $bd^2/6$

3) When a beam is subjected to a bending moment the bending stress in a layer is _____the distance from the neutral axis.
a) Independent of b) Directly proportional to
c) Inversely proportional to d) None of these

4) For drawing ILD, what value of test load is assumed?
a) 1 unit b) Arbitrary
c) Depends upon structure d) 0

5) A rod, 120cm long and of diameter 3.0 cm is subjected to an axial pull of 18 kN. The stress in N/mn^2
a) 22.57 b) 23.47
c) 24.57 d) 25.47

6) The property of a material by which it can be drawn to a smaller section by applying a tensile load is called _____.
a) Elasticity b) Plasticity
c) Ductility d) Malleability

7) Which of the following is maximum in the principal Plane?
a) Normal stress b) Shear stress
c) shear strain d) None of the above

8) Principal stress is to the principal plane _____.
a) Tangential b) 45°
c) Normal d) 180°

9) The Maximum shear stress occurs at _____.
a) 30° b) 45°
c) 90° d) 180°

10) _____ is a Saint Venant theory.
a) Maximum shear stress theory
b) Maximum strain energy theory
c) Maximum principle strain theory
d) Distortion energy theory

11) Maximum shear stress theory is applicable to _____.
a) Ductile materials b) Brittle materials
c) Composite materials d) None

12) Bending moment on a section is maximum where shearing force is ____.
a) minimum b) maximum
c) equal d) zero

13) For a simply supported beam of span L, loaded with U.D.L. w/m over the whole span, the maximum B.M will be _____.
a) wL/4 b) $wL^2/8$
c) $wL^2/4$ d) $WwL^2/2$

14) What is the S.I. unit of sectional modulus?
a) mm^4 b) mm^3
c) mm^2 d) m

6) Show various fixtures at proper location.

OR

a) Draw to the scale of 1 :10 elevation and plan of alternate courses of 'L' shaped one brick and one and half brick thick brick wall in English bond.

Q.3 **b)** Design and draw to scale 1:30, plan and vertical section for quarter turn RCC stair for residential building. Use following data: **14**

1) Storey height = 3100 mm
2) Width of flight = 1000 mm
3) Railing - 50 mm thick RCC pardi
4) Reinforcement details not expected
5) Write step by step calculation on sheet with pencil only.

OR

b) Draw to scale 1:20 cross section of a RCC slab floor with ceramic tile flooring laid on cement mortar bed with cement float. Use following data and dimension.

1) RCC slab thickness = 150 mm
2) Cement mortar bed thickness = 30 mm
3) Cement float thickness = 02 mm
4) Ceramic tile thickness = 15 mm
5) Ceramic tile size in plan = 300x300 mm

CIVIL ENGINEERING
Building Construction & Drawing (BTN01304)

Day & Date: Thursday 22-05-2025 Max. Marks: 70
Time: 03:00 PM To 07:00 PM

Instructions: 1) Q. No. 1 is compulsory. It should be solved in the first 30 minutes in Answer Book Page no 03 (Starting page of the Answer Book). Each question carries one mark.
2) Don't forget to Mention question paper set (P/Q/R/S) on top of page.
3) Figures to the right indicates full marks.
4) Assume correct data wherever necessary.

MCQ/Objective Type Questions

Duration: 30 Minutes Marks:14

Q.1 State whether following statements are correct or incorrect. 14

1) If depth of footing is less than or equal to width of footing then it is called as shallow foundation.
2) Stile is part of door frame.
3) Landing width is equal to flight width of staircase.
4) Wall footing is provided in Load bearing structure.
5) Combined footing is provided for single column.
6) UCR is a type of stone masonry.
7) The switch boards are fixed at sill height in residential buildings.
8) Purpose to providing traps in drainage system to avoid entry foul gases in building.
9) Plastering is the process of covering rough surfaces of wall, column, and ceiling etc.
10) The term pointing is applied to the finishing of mortar joints in masonry.
11) Driers are used to accelerate the process of drying in painting.
12) The area of a both rooms shall not be less than 1.8 sq.m.
13) Roof sloping in two directions is called as hip roof.
14) A.C. sheets mean Asbestos Cement sheets.

CIVIL ENGINEERING
Building Construction & Drawing (BTN01304)

Day & Date: Thursday 22-05-2025 Max. Marks: 56
Time: 03:00 PM To 07:00 PM

Instructions: 1) All questions are compulsory.
2) Figures to the right indicate full marks.
3) Assume correct data wherever necessary.

Section – I

Q.2 Write the answers for followings. **28**

a) Explain importance of through stone in stone masonry with neat sketch.
b) Write in detail requirements of building stone.
c) Draw neat sketches for any two of door hinges.
d) Explain system of Air - Conditioning in winter?
e) Draw neat labelled elevation of semi-circular arch.
f) Compare strap footing with combined footing with sketches
g) Draw a neat sketch of Gully Trap and Intercepting Trap.
h) Define following terms:
1) Queen Closer
2) King Closer
3) Closer
4) Bevelled closer
i) Draw labelled cross-section of fixing Vitrified tiles on RCC slab.
j) Enlist different types of doors and draw neat labelled elevation of anyone.

Section – II

Q.3 a) Draw to a scale of 1: 10, detailed section, front elevation and sectional elevation for framed T. W. Double leaf door half glazed and half panelled. Use following data (All dimensions are in mm): **14**
1) Clear operating = 1200 x 2100
2) Wood Section for frame = 100 x 75
3) Wood section for styles and rails = 100 x 40
4) Obscured Glass = 5 mm thick at top-side of shutter
5) Panel - 20 mm thick plywood
6) Show various fixtures at proper location.

OR

a) Draw to the scale of 1 :10 elevation and plan of alternate courses of 'L' shaped one brick and one and half brick thick brick wall in English bond.

Q.3 **b)** Design and draw to scale 1:30, plan and vertical section for quarter turn RCC stair for residential building. Use following data: **14**

1) Storey height = 3100 mm
2) Width of flight = 1000 mm
3) Railing - 50 mm thick RCC pardi
4) Reinforcement details not expected
5) Write step by step calculation on sheet with pencil only.

OR

b) Draw to scale 1:20 cross section of a RCC slab floor with ceramic tile flooring laid on cement mortar bed with cement float. Use following data and dimension.

1) RCC slab thickness = 150 mm
2) Cement mortar bed thickness = 30 mm
3) Cement float thickness = 02 mm
4) Ceramic tile thickness = 15 mm
5) Ceramic tile size in plan = 300x300 mm

3) Figures to the right indicates full marks.

MCQ/Objective Type Questions

Duration: 30 Minutes Marks:14

Q.1 MCQs. **14**

1) The Eccentric Vertical Load generates _____
a) Only Direct Stress
b) Only Bending Stress
c) Combined Bending and Direct Stress
d) Shear Stress

2) The Section modulus of a rectangular section along of breadth b and depth d is _____
a) $db^2/4$ b) $db^2/8$
c) $bd^2/4$ d) $bd^2/6$

3) A column of length 'l' is hinged at the both ends, its equivalent length will be equals to _____
a) 21 b) 1
c) 0.51 d) 0.7071

4) The ratio of the effective length of a column and minimum radius of gyration of its cross-sectional area, is known _____
a) Buckling factor b) Slenderness ratio
c) Crippling factor d) None of these

5) In simply supported beams, deflection is zero at _____
a) Mid span b) Supports
c) Throughout d) Point of action of load

6) Unit of deflection is _____
a) kNm b) kN/m
c) Kn d) m

7) Fixed joint is replaced by _____ in conjugate beam.

a) Roller b) Pin
c) Free end d) Link

8) What is kinematic indeterminacy for the given figure considering axial deformation?

a) 0 b) 4
c) 6 d) 10

9) Flexibility matrix is always _____

a) symmetric b) non-symmetric
c) anti-symmetric d) depends upon loads applies

10) In moment distribution method, the sum of distribution factors of all the members meeting at any joint is always ____

a) Zero b) Less than 1
c) One d) Greater than 1

11) Fixed End Moment for a Fixed Beam Carrying a Central Point Load is _____

a) WL/8 b) WL/12
c) WL/2 d) WL/4

12) The Size of stiffness matrix is equals to _____

a) DSI b) DKI
c) DSI+DKI d) DSI-DKI

13) If a continuous beam ABC is simply supported at A, B and C, then the size of matrix in stiffness matrix method is _____

a) 3 x 2 b) 2 x 2
c) 2 x 3 d) 3 x 3

14) The moment distribution method in structural analysis can be treated as _____

a) Force method b) Displacement method
c) Flexibility method d) None of these

Day & Date: Monday 26-05-2025 Max. Marks: 56
Time: 10:00 AM To 01:00 PM

Instructions: 1) In Section I, Q. No. 2 is compulsory and attempt any two questions from the remaining.
2) In Section II, Q. No. 6 is compulsory and attempt any two questions from the remaining.
3) Assume suitable data wherever necessary and mention it clearly.
4) Use of non-programmable calculator is allowed

SECTION – I

Q.2 Determine the maximum and minimum stresses at the base of dam. The masonry trapezoidal dam retains water on vertical face. The height of the dam is 5m and dam water level is upto 4.5m. Top width of the dam is 1m whereas bottom width is 3m. Take weight of water as 10kN/m^3 and masonry as 20kN/m^3. **10**

Q.3 A 2.0 m long column has a circular cross-section of 6 cm diameter. One of the ends of the column is fixed and other end is free. Taking factor of safety as 3, calculate the safe load using **09**
1) Rankine's formula with f_c = 550 N/mm^2 & Rankine's constant is 1/1600
2) Eulers formula with E = 1.3X10^5 N/mm^2

Q.4 A simply supported beam of length 4 m carries a point load of 3 kN at a distance of 1 m from each end. If E = 2 x 105 N/mm^2 and I =10 mm^2 for the beam, then using conjugate beam method determine: **09**
1) Slope at each end
2) Deflection under each load and at the centre.

Q.5 **a)** Find the kernel of circular section of diameter 'd'. **03**
b) Enlist different end conditions of columns and state their effective lengths. Draw neat sketches of effective lengths. **03**
c) Explain conjugate beam method. **03**

SECTION - II

Q.6 Analyze the frame as shown in Fig.No.1 by moment distribution method and draw bending moment diagram. **10**

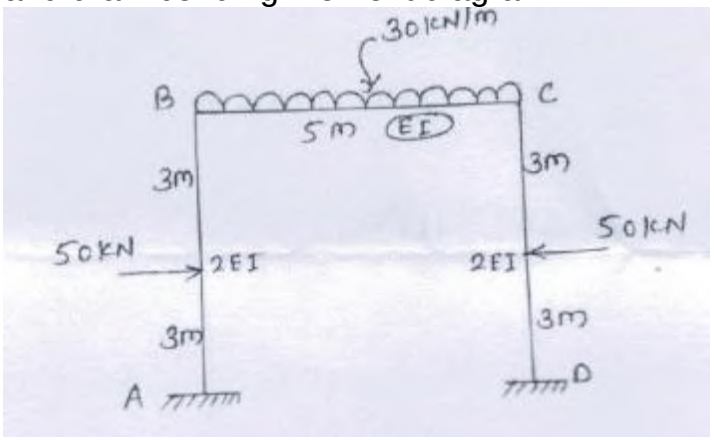

Fig.No.1

Q.7 Analyze the beam using flexibility method shown in Fig. No. 2 and draw bending moment diagram. **09**

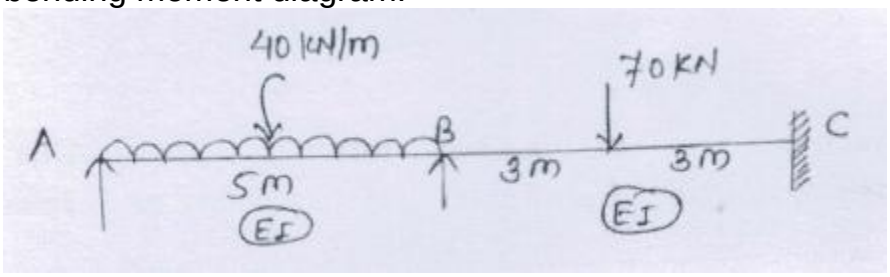

Fig.No.2

Q.8 Analyze the beam shown in Fig. No.3 by stiffness matrix method and draw bending moment diagram. **09**

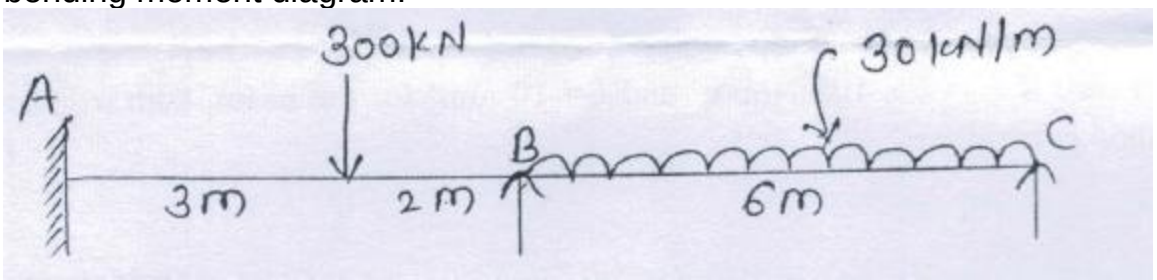

Fig.No.3

Q.9 Attempt the following questions.

a) Explain the difference between force method and displacement methods. **04**

b) Find the distribution factors of joint 'O' refer Fig. No. 4 **03**

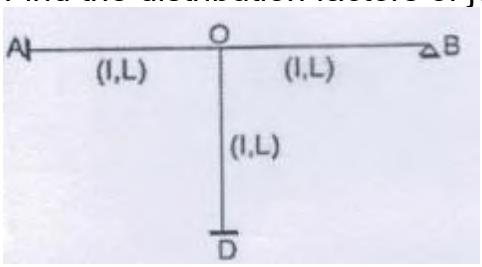

Fig.No.4

c) Find the DSI and DKI of truss by shown in Fig. No.5 **02**

Day & Date: Wednesday 28-05-2025 Max. Marks: 70
Time: 10:00 AM To 01:00 PM

Instructions: 1) Q. No. 1 is compulsory. It should be solved in the first 30 minutes in Answer Book Page no 03 (Starting page of the Answer Book). Each question carries one mark.
2) Don't forget to Mention question paper set (P/Q/R/S) on top of page.
3) Figures to the right indicates full marks.
4) Assume suitable data wherever necessary and mention it clearly.

MCQ/Objective Type Questions

Duration: 30 Minutes Marks:14

Q.1 Choose the correct Answer. **14**

1) _____ arrangement consists of a system of overhead pipe which are fixed in the ceiling of the roof.
a) Fire extinguishers b) Internal hydrants
c) Automatic sprinkler d) Water pipes

2) During fire, the human body can withstand temperature up to ____.
a) 150°C b) 120°C
c) 200°C d) 80°C

3) A _____ is defined at the upper most part of the building which is constructed in the form of a framework to give protection to the building against rain, heat, snow, wind, etc.
a) Roof b) Truss
c) Chajja d) Lintels

4) The lowest edge of the sloping surface of roof is called _____.
a) Ridge b) Rafters
c) Pitch d) Eaves

5) What is the minimum depth of water seal in floor trap?
a) 25 mm b) 50 mm
c) 75 mm d) 100 mm

6) Partially ventilated single stack system is the modified form of ____.
a) Single stack system and two-pipe system
b) Single stack system and one pipe system
c) One pipe system and two-pipe system
d) Two pipe system

7) _____ is a measure of quantity of sound energy.

a) Wavelength b) Frequency
c) Intensity d) Loudness

8) The speed of sound is taken as _____.

a) 340 m/s b) 3.40 m/s
c) 3400 m/s d) 0.34 m/s

9) Which of the following is NOT a factor affecting site selection for a building?

a) Topography b) Soil condition
c) Color of the building d) Accessibility

10) Which climatic zone in India is characterized by extreme temperatures in both summer and winter?

a) Warm and humid zone b) Composite zone
c) Hot and dry zone d) Cold zone

11) ____ system, the partial vacuum is created inside of the room by exhausting the vitiated inside air by fans or blowers.

a) Supply b) Plenum
c) Air conditioning d) Exhaust

12) Where people are working, there has to be ____ to cause proper ventilation of the premises.

a) Air change b) Humidity
c) Temperature d) Moisture

13) ____ is the Plastering defect which is particularly seen in case of plastered surfaces inside the building.

a) Softness b) Cracks
c) Peeling d) Blistering

14) ____ are cheaper varieties of paint.

a) Color wash b) Pointing
c) Distempers d) Acrylics

Set **P**

S.Y. (B. Tech) (Sem - II) (New) (CBCS) Examination: March/April - 2025
CIVIL ENGINEERING
Building and Infrastructure Planning (CIVPCC-05)

Day & Date: Wednesday 28-05-2025 Max. Marks: 56
Time: 10:00 AM To 01:00 PM

Instructions: 1) All questions are compulsory.
2) Figures to the right indicate full marks.
3) Assume suitable data wherever necessary and mention it clearly.

Section – I

Q.2 Attempt the following. (Any Seven) **28**

a) Write a note on site selection criteria for building.

b) What is the significance of sun path diagram in building planning?

c) List the basic climatic zones of India that effect building orientation?

d) Describe briefly the functional requirements of a good ventilation systems.

e) What do you understand by thermal insulation of building? Why is it necessary? Give its various advantages.

f) Explain the objective of lighting and Principles of Good lighting.

g) Explain various defects in plastering.

h) Enlist the good requirements of plaster.

i) Enlist the objectives, and good characteristics of painting.

Section – II

Q.3 Attempt the following. (Any Four) **28**

a) Enlist acoustical defects and describe any three of them.

b) Explain behavior of sound in closed space.

c) Write a note on Systems of Plumbing in details.

d) Write a note on factors for selection of flooring materials and explain its types in detail.

e) What is Fire resistant structures? Explain the characteristics of fire-resistant materials.

f) Explain in brief types of Fire load.

MCQ/Objective Type Questions

Duration: 30 Minutes Marks:14

Q.1 Choose the correct Answer. 14

1) What is the primary purpose of assessing water quality?
a) To determine water quantity
b) To identify water sources
c) To ensure water is safe for consumption
d) To calculate water demand

2) Which parameter measures the amount of oxygen required to break down organic matter?
a) pH b) Turbidity
c) BOD d) COD

3) What is the benefit of using tube settlers in sedimentation tanks?
a) Increased detention time b) Reduced settling velocity
c) Increased settling area d) Decreased water quality

4) Which of the following factors affects disinfection efficiency?
a) Contact time b) Disinfectant dose
c) Water temperature d) All of the above

5) What is break-point chlorination?
a) Adding chlorine to water to kill pathogens
b) Adding chlorine to water to remove suspended solids
c) Adding chlorine to water until free chlorine residual appears
d) Removing chlorine from water

6) Which of the following methods can be used for defluoridation?
a) Ion-exchange process b) Reverse osmosis
c) Activated alumina d) All of the above

7) Which method of water distribution uses elevated tanks to provide water pressure?

a) Direct Pumping System b) Overhead Tank System
c) Hydro-Pneumatic System d) Dead End System

8) Which of the following appurtenances is used to prevent backflow?

a) Check valve b) Gate valve
c) Globe valve d) Ball valve

9) What type of sewer carries both sanitary sewage and stormwater?

a) Sanitary sewer b) Stormwater sewer
c) Combined sewer d) Separate sewer

10) What is the typical BOD5 (Biochemical Oxygen Demand) range for untreated domestic wastewater?

a) 100-200 mg/L b) 200-400 mg/L
c) 400-600 mg/L d) 600-800 mg/L

11) What is the primary factor that determines the efficiency of a trickling filter?

a) Hydraulic loading rate b) Organic loading rate
c) Media type and size d) All of the above

12) What is the effect of increasing the hydraulic retention time (HRT) in an activated sludge process?

a) Increased BOD removal efficiency
b) Decreased sludge production
c) Increased oxygen demand
d) All of the above

13) What does the DO sag curve represent?

a) The variation of dissolved oxygen levels with time
b) The variation of BOD with distance downstream
c) The variation of dissolved oxygen levels with distance downstream
d) The variation of flow rate with distance downstream

14) In which reactor design do microorganisms form dense granules, allowing for efficient treatment of wastewater with high organic loads?

a) UASB reactor b) Anaerobic baffled reactor
c) Fluidized bed reactor d) Fixed bed reactor

Day & Date: Friday 30-05-2025 Max. Marks: 56
Time: 10:00 AM To 01:00 PM

Instructions: 1) In section – I, Q.2 is compulsory and solve any Two question from remaining questions (Q. No. 3, 4 & 5).
2) In Section – II, Q.6 is compulsory and solve any Two question from remaining questions from (Q. No. 7, 8 & 9).
3) Figures to the right indicate full marks.
4) Make suitable assumptions, if required and mention it clearly.
5) Use of non- programmable calculator is allowed.

Section – I

Q.2 **a)** Find the population of a city in 2051 by Incremental Increase Method. The data is given below. **06**

Year	1961	1971	1981	1991	2001	2011
Population	50,000	65,000	70,000	82,000	1,10,000	2,12,000

b) Calculate the all four fire demand for the same city having population of year 2051 for above given question (Q. No. 2 A). **04**

Q.3 **a)** Explain working principle of rapid sand filter with neat sketch. **05**
b) Explain the necessity of aeration in water treatment. Describe different methods of aeration. **04**

Q.4 **a)** Describe the different methods of distributing water in a water supply system. **05**
b) What are the types of distribution reservoir? **04**

Q.5 **a)** Write down standards for the following parameters for water (Permissible and acceptable limit). **05**
1) pH
2) Turbidity
3) Chloride
4) Hardness
5) MPN

b) Explain the horizontal flow type sedimentation tank with neat sketch. **04**

Section – II

Q.6 **a)** Under what circumstances pumping stations are provided? Discuss in details. What are problems associated with sewage pumping? Draw a sketch of a typical sewage pumping station. **06**

b) Write short notes on: Types of sewers. **04**

Q.7 **a)** Draw complete and neat sketch of Activated Sludge treatment plant and discuss each part. **05**

b) Explain Principle and operation of waste stabilization pond. **04**

Q.8 **a)** The data of river and wastewater is as follows. **05**

Parameter	Waste water	River
BOD_5	250 mg/lit	5 mg/lit
DO	0 mg/lit	9.1 mg/lit
Flow	3 m^3/sec	35 m^3/sec

The deoxygenation constant is 0.10 per day and reoxygenation constant is 0.30 per day to the base 10. The saturation DO is 9.2 mg/lit. Find DO at the end of 5 days.

b) Discuss the zones of pollution in stream with the help of diagram. **04**

Q.9 **a)** Explain Up flow Anaerobic Sludge Blanket (UASB) with neat sketch. **05**

b) Write a note on Moving Bed Biofilm Reactor (MBBR). **04**

4) Make suitable assumptions, if required and mention it clearly.
5) Use of non- programmable calculator is allowed.

Section – I

Q.2 **a)** Find the population of a city in 2051 by Incremental Increase Method. The data is given below. **06**

Year	1961	1971	1981	1991	2001	2011
Population	50,000	65,000	70,000	82,000	1,10,000	2,12,000

b) Calculate the all four fire demand for the same city having population of year 2051 for above given question (Q. No. 2 A). **04**

Q.3 **a)** Explain working principle of rapid sand filter with neat sketch. **05**
b) Explain the necessity of aeration in water treatment. Describe different methods of aeration. **04**

Q.4 **a)** Describe the different methods of distributing water in a water supply system. **05**
b) What are the types of distribution reservoir? **04**

Q.5 **a)** Write down standards for the following parameters for water (Permissible and acceptable limit). **05**
1) pH
2) Turbidity
3) Chloride
4) Hardness
5) MPN

b) Explain the horizontal flow type sedimentation tank with neat sketch. **04**

Section – II

Q.6 **a)** Under what circumstances pumping stations are provided? Discuss in details. What are problems associated with sewage pumping? Draw a sketch of a typical sewage pumping station. **06**

b) Write short notes on: Types of sewers. **04**

Q.7 **a)** Draw complete and neat sketch of Activated Sludge treatment plant and discuss each part. **05**

b) Explain Principle and operation of waste stabilization pond. **04**

Q.8 **a)** The data of river and wastewater is as follows. **05**

Parameter	Waste water	River
BOD_5	250 mg/lit	5 mg/lit
DO	0 mg/lit	9.1 mg/lit
Flow	3 m^3/sec	35 m^3/sec

The deoxygenation constant is 0.10 per day and reoxygenation constant is 0.30 per day to the base 10. The saturation DO is 9.2 mg/lit. Find DO at the end of 5 days.

b) Discuss the zones of pollution in stream with the help of diagram. **04**

Q.9 **a)** Explain Up flow Anaerobic Sludge Blanket (UASB) with neat sketch. **05**

b) Write a note on Moving Bed Biofilm Reactor (MBBR). **04**

Set R

S.Y. (B. Tech.) (Sem-II) (New) (CBCS) Examination: March/April-2025
CIVIL ENGINEERING
Environmental Engineering (CIVPCC-06)

Day & Date: Friday 30-05-2025 Max. Marks: 70
Time: 10:00 AM To 01:00 PM

Instructions: 1) Q. No. 1 is compulsory. It should be solved in the first 30 minutes in Answer Book Page no 03 (Starting page of the Answer Book). Each question carries one mark.
2) Don't forget to Mention question paper set (P/Q/R/S) on top of page.
3) Figures to the right indicates full marks.
4) Make suitable assumptions if necessary and state them clearly.
5) Use of non- programmable calculator is allowed.

MCQ/Objective Type Questions

Duration: 30 Minutes Marks:14

Q.1 Choose the correct Answer. 14

1) What is the primary factor that determines the efficiency of a trickling filter?
a) Hydraulic loading rate b) Organic loading rate
c) Media type and size d) All of the above

2) What is the effect of increasing the hydraulic retention time (HRT) in an activated sludge process?
a) Increased BOD removal efficiency
b) Decreased sludge production
c) Increased oxygen demand
d) All of the above

3) What does the DO sag curve represent?
a) The variation of dissolved oxygen levels with time
b) The variation of BOD with distance downstream
c) The variation of dissolved oxygen levels with distance downstream
d) The variation of flow rate with distance downstream

4) In which reactor design do microorganisms form dense granules, allowing for efficient treatment of wastewater with high organic loads?
a) UASB reactor b) Anaerobic baffled reactor
c) Fluidized bed reactor d) Fixed bed reactor

5) What is the primary purpose of assessing water quality?
a) To determine water quantity
b) To identify water sources
c) To ensure water is safe for consumption
d) To calculate water demand

6) Which parameter measures the amount of oxygen required to break down organic matter?

a) pH b) Turbidity
c) BOD d) COD

7) What is the benefit of using tube settlers in sedimentation tanks?

a) Increased detention time b) Reduced settling velocity
c) Increased settling area d) Decreased water quality

8) Which of the following factors affects disinfection efficiency?

a) Contact time b) Disinfectant dose
c) Water temperature d) All of the above

9) What is break-point chlorination?

a) Adding chlorine to water to kill pathogens
b) Adding chlorine to water to remove suspended solids
c) Adding chlorine to water until free chlorine residual appears
d) Removing chlorine from water

10) Which of the following methods can be used for defluoridation?

a) Ion-exchange process b) Reverse osmosis
c) Activated alumina d) All of the above

11) Which method of water distribution uses elevated tanks to provide water pressure?

a) Direct Pumping System b) Overhead Tank System
c) Hydro-Pneumatic System d) Dead End System

12) Which of the following appurtenances is used to prevent backflow?

a) Check valve b) Gate valve
c) Globe valve d) Ball valve

13) What type of sewer carries both sanitary sewage and stormwater?

a) Sanitary sewer b) Stormwater sewer
c) Combined sewer d) Separate sewer

14) What is the typical BOD5 (Biochemical Oxygen Demand) range for untreated domestic wastewater?

a) 100-200 mg/L b) 200-400 mg/L
c) 400-600 mg/L d) 600-800 mg/L

MCQ/Objective Type Questions

Duration: 30 Minutes Marks:14

Q.1 Choose the correct Answer. **14**

1) Innovation can be best described as: _____
a) A new idea only
b) The process of creating value through ideas
c) Invention
d) None of the above

2) Entrepreneurship is primarily related to: _____
a) Administration b) Risk-taking
c) Planning d) None of these

3) Which of the following is not an entrepreneurial competency?
a) Innovation b) Leadership
c) Laziness d) Decision making

4) An entrepreneur operates: _____
a) Outside the organization b) Within an existing company
c) As a freelancer d) None

5) "Push" type innovation comes from: _____
a) Market needs b) Customer demands
c) Internal ideas d) Suppliers

6) Agile management promotes: _____
a) Linear process b) Flexibility and iteration
c) Bureaucracy d) None

7) Blue Ocean strategy refers to: _____
a) Competing in existing markets
b) Creating new market space
c) Losing market share
d) None

8) Which of these is not a barrier to innovation?
a) Risk-taking culture b) Resistance to change
c) Lack of resources d) Poor leadership

9) The shifting composition of the economy refers to: _____
a) Stable industries b) Changing business models
c) Static job roles d) None

10) Lean start-up encourages: _____
a) High upfront investment b) Rapid prototyping
c) Formal structure d) None

11) Legal considerations for entrepreneurs include: _____
a) Taxation b) IP protection
c) Contracts d) All of these

12) One of the seven sources of innovation is: _____
a) Competitor's failure b) Demographics
c) Inflation d) GDP

13) Entrepreneurial opportunity recognition is: _____
a) Unimportant b) Intuition-based only
c) Structured process d) Not taught

14) Six Thinking Hats is a method for: _____
a) Innovation testing b) Decision-making
c) Funding d) Legal advice

c) Bureaucracy d) None

2) Blue Ocean strategy refers to: _____
a) Competing in existing markets
b) Creating new market space
c) Losing market share
d) None

3) Which of these is not a barrier to innovation?
a) Risk-taking culture b) Resistance to change
c) Lack of resources d) Poor leadership

4) The shifting composition of the economy refers to: _____
a) Stable industries b) Changing business models
c) Static job roles d) None

5) Lean start-up encourages: _____
a) High upfront investment b) Rapid prototyping
c) Formal structure d) None

6) Legal considerations for entrepreneurs include: _____
a) Taxation b) IP protection
c) Contracts d) All of these

7) One of the seven sources of innovation is: _____
a) Competitor's failure b) Demographics
c) Inflation d) GDP

8) Entrepreneurial opportunity recognition is: _____
a) Unimportant
b) Intuition-based only
c) Structured process
d) Not taught

9) Six Thinking Hats is a method for: _____
a) Innovation testing
b) Decision-making
c) Funding
d) Legal advice

10) Innovation can be best described as: _____
a) A new idea only
b) The process of creating value through ideas
c) Invention
d) None of the above

11) Entrepreneurship is primarily related to: _____
a) Administration
b) Risk-taking
c) Planning
d) None of these

12) Which of the following is not an entrepreneurial competency?
a) Innovation
b) Leadership
c) Laziness
d) Decision making

13) An entrepreneur operates: _____
a) Outside the organization
b) Within an existing company
c) As a freelancer
d) None

14) "Push" type innovation comes from: _____
a) Market needs
b) Customer demands
c) Internal ideas
d) Suppliers

Entrepreneurship and Innovation (OE-02A)

Day & Date: Tuesday 03-06-2025 Max. Marks: 56
Time: 10:00 AM To 01:00 PM

Instructions: 1) All questions are compulsory.
2) Figures to the right indicate full marks.

Section – I

Q.2 All questions are compulsory.

a) Define innovation. Explain its relationship with entrepreneurship. **06**
b) Distinguish between Entrepreneur, Manager, and Intrapreneur. **04**

Q.3 Solve any three questions.

a) Explain classification of innovation. **06**
b) Describe the economic theories of entrepreneurship. **06**
c) Discuss need and importance of Entrepreneurship Development. **06**
d) Describe sources of innovation with examples. **06**
e) Explain Agile management and NUF test in innovation. **06**

Section – II

Q.4 All questions are compulsory.

a) Explain the purpose and process of innovation. **06**
b) What are the needs for continuous learning in innovation? **04**

Q.6 Solve any three questions.

a) Explain different types of innovative strategies. **06**
b) Describe Red Ocean vs Blue Ocean strategies. **06**
c) List barriers to innovation and explain with examples. **06**
d) Explain the entrepreneurial process and opportunity recognition. **06**
e) Write short note on Lean start-up methodology. **06**

Environmental Sustainability (OE-02B)

Day & Date: Tuesday 03-06-2025 Max. Marks: 70
Time: 10:00 AM To 01:00 PM

Instructions: 1) Q. No. 1 is compulsory. It should be solved in the first 30 minutes in Answer Book Page no 03 (Starting page of the Answer Book). Each question carries one mark.
2) Don't forget to Mention question paper set (P/Q/R/S) on top of page.
3) Figures to the right indicates full marks.

MCQ/Objective Type Questions

Duration: 30 Minutes Marks:14

Q.1 Choose the correct alternatives from the options. **14**

1) The Occupational Health and Safety Management System (OHSMS) primarily aims to: _____
a) Increase industrial profits
b) Reduce energy consumption
c) Ensure worker safety and reduce health risks in workplaces
d) Promote environmental tourism

2) In-situ conservation refers to: _____
a) Conservation of species in zoos
b) Conservation using biotechnology
c) Conservation in gene banks
d) Conservation of species in their natural habitats

3) Carbon footprint is a measure of: _____
a) Land occupied by forests
b) Energy consumption in a home
c) Greenhouse gas emissions by an activity or person
d) Amount of carbon in plants

4) The main goal of sustainability is to: _____
a) Meet present needs without compromising future needs
b) Increase profit only
c) Eliminate economic development
d) Promote urbanization

5) Which of the following is an example of hazardous waste?
a) Expired medicines b) Plastic bottles
c) Food scraps d) Paper waste

6) Biodiversity hotspots in India include: _____
a) Eastern Ghats and Indo-Gangetic Plain
b) Western Ghats and the Himalayas
c) Thar Desert and Sundarbans only
d) Deccan Plateau and Indo-Gangetic Basin

7) The 3R concept stands for: _____
a) Reuse, Reduce, Rebuild
b) Reduce, Reuse, Recycle
c) Replace, Reuse, Restore
d) Recycle, Recover, Rebuild

8) The ISO 14000 Series deals with: _____
a) Energy-efficient building design
b) Environmental Management Systems
c) Industrial Safety Standards
d) Economic Performance Indicators

9) Which of the following is a non-conventional source of energy?
a) Coal
b) Natural Gas
c) Wind
d) Diesel

10) The main goal of a circular economy is to: _____
a) Increase fossil fuel usage
b) Promote single-use products
c) Minimize waste and resource use
d) Maximize profit only

11) The first step in preparing an Environmental Impact Assessment (EIA) report is: _____
a) Cost-benefit analysis
b) Monitoring
c) Screening
d) Public hearing

12) Which of the following is not a principle of Environmental Management?
a) Polluter pays
b) Sustainability
c) Preventive action
d) Maximum profit generation

13) Cost-Benefit Analysis (CBA) in environmental policies is used to: _____
a) Maximize pollution
b) Evaluate environmental legislation
c) Compare environmental costs with economic benefits
d) Promote industrialization

14) An ecosystem consists of: _____
a) Living organisms only
b) Non-living components only
c) Living organisms and their physical environment
d) Plants and animals only

2) Figures to the right indicate full marks.

Section – I

Q.2 Attempt the following **12**

a) Define the term "environment". Discuss the scope and importance of environmental studies. Why is there a need for public awareness?
b) Describe the causes and effects of air and water pollution. Suggest two preventive measures for each.
c) Define sustainability. Discuss any two major challenges in achieving sustainable development.

Q.3 Attempt Any Two **10**

a) What are hazardous wastes and e-wastes? How should they be managed?
b) What are carbon credits and carbon footprints? Explain with examples.
c) List any two Millennium Development Goals (MDGs). Mention one environmental protocol.

Q.4 Write short notes on any two of the following: **06**

a) Genetic diversity
b) India as a mega-diversity nation
c) In-situ and Ex-situ conservation

Section – II

Q.5 Write short notes on any two of the following: **10**

a) ISO 14000 Series
b) Sustainable Habitat - Green Buildings
c) Non-conventional energy sources

Q.6 Attempt the following **10**

a) Define Environmental Management. Discuss its nature, scope, and components.
b) Define the 3R concept and explain how it supports the zero waste approach.

Q.7 Attempt any two **08**

a) Define Environmental Management. Discuss its nature, scope, and components.

b) What is Environmental Policy Analysis? Distinguish between macro-level and micro-level analysis.

c) Outline the steps involved in the Environmental Impact Assessment (EIA) process.

MCQ/Objective Type Questions

Duration: 30 Minutes Marks:14

Q.1 Choose the correct Answer. **14**

1) Which is the primary advantage of using solar energy power generation?
a) Low initial coast
b) Reduce environmental impact
c) Do not require large area
d) Simple storage method

2) OTEC stands for _____.
a) Ocean thermal energy conversion
b) Ocean thermal energy Component
c) Ocean thermal energy contact
d) Ocean thermodynamic energy conversion

3) Which of the following common application of solar energy?
a) Generating electricity
b) Heating water
c) Providing power for electronic device
d) All of the above

4) Passive solar energy refers to trapping the Suns energy _____.
a) Using mechanical devices
b) without using mechanical devices
c) Using chemical
d) Incineration

5) The process or digestion taking place in the presence of air is called as _____.
a) Aerobic digestion b) Anaerobic digestion
c) Hydrolysis d) None of these

6) Which type of renewable energy resources generate low power energy?

a) Biomass b) Solar
c) Wind d) All of the above

7) In wind turbine gear box is used to _____.

a) Step up the speed b) Reduce the speed
c) shut down d) None of these

8) Geothermal energy present _____ of the earth.

a) Rotation b) Exterior
c) North side d) Interior

9) Biogas is the gaseous fuel which is obtained from biomass by means of _____ fermentation.

a) Aerobic b) Anaerobic
c) Constant d) None of the above

10) _____ is produced by blending of vegetable oil.

a) CNG b) Methane gas
c) Biofuel d) Biodisel

11) Availability of Solar energy on the earth surface is _____MW.

a) 190 billion b) 178 billion
c) 150 billion d) 250 billion

12) Energy is _____ of substance or a body to do work.

a) Obesity b) Power
c) Capacity d) None of the above

13) Wind energy used from _____ years ago.

a) 3000 b) 2000
c) 6000 d) 5000

14) The major source of the Geothermal energy is _____.

a) Water b) Hot water reservoir
c) Oil d) Gas

c) 150 billion d) 250 billion

5) Energy is _____ of substance or a body to do work.
a) Obesity b) Power
c) Capacity d) None of the above

6) Wind energy used from _____ years ago.
a) 3000 b) 2000
c) 6000 d) 5000

7) The major source of the Geothermal energy is _____.
a) Water b) Hot water reservoir
c) Oil d) Gas

8) Which is the primary advantage of using solar energy power generation?
a) Low initial coast
b) Reduce environmental impact
c) Do not require large area
d) Simple storage method

9) OTEC stands for _____.
a) Ocean thermal energy conversion
b) Ocean thermal energy Component
c) Ocean thermal energy contact
d) Ocean thermodynamic energy conversion

10) Which of the following common application of solar energy?
a) Generating electricity
b) Heating water
c) Providing power for electronic device
d) All of the above

11) Passive solar energy refers to trapping the Suns energy _____.
a) Using mechanical devices
b) without using mechanical devices
c) Using chemical
d) Incineration

12) The process or digestion taking place in the presence of air is called as _____.
a) Aerobic digestion b) Anaerobic digestion
c) Hydrolysis d) None of these

13) Which type of renewable energy resources generate low power energy?
a) Biomass b) Solar
c) Wind d) All of the above

14) In wind turbine gear box is used to _____.
a) Step up the speed b) Reduce the speed
c) shut down d) None of these

Set Q

S. Y. (B. Tech.) (Sem-II) (New) (CBCS) Examination: March/April-2025
CIVIL ENGINEERING
Renewable Energy (OE-02C)

Day & Date: Tuesday, 03-June-2025 Max. Marks: 56
Time: 10:00 AM To 01:00 PM

Instructions: 1) All questions are compulsory.
2) Figures to the right indicate full marks.
3) Assume suitable data if necessary.

Section – I

Q.2 Attempt any Four **16**

a) Explain advantages of biomass energy.
b) Explain in detail scope of renewable energy.
c) What is biomass energy and explain resources of biomass energy.
d) Write a note on applications of solar energy.
e) Explain function of biogas digester.
f) Write a note on aerobic and anaerobic digestion.

Q.3 Attempt any two. **12**

a) Explain Solar photovoltaic technology.
b) Explain Basic components of wind energy conversion system.
c) Explain in detail advantages and disadvantages of renewable energy.
d) Explain in detail advantage and disadvantage of Solar energy.

Section – II

Q.4 Attempt any Four. **16**

a) Write a note on wave energy.
b) Merits and demerits of hydropower energy.
c) Explain specifications of energy storage devices.
d) Main parts of hydropower station.
e) Importance of tidal energy.
f) Importance of energy storage devices

Q.5 Attempt any two. **12**

a) Write a note on potential of wave energy in India.
b) Explain different methods of energy storage.
c) Explain with neat diagram hydropower plant.
d) Explain in detail ocean thermal energy conversion (OTEC).

Set **R**

S. Y. (B. Tech.) (Sem-II) (New) (CBCS) Examination: March/April-2025
CIVIL ENGINEERING
Renewable Energy (OE-02C)

Day & Date: Tuesday, 03-June-2025 Max. Marks: 70
Time: 10:00 AM To 01:00 PM

Instructions: 1) Q. No. 1 is compulsory. It should be solved in the first 30 minutes in Answer Book Page no 03 (Starting page of the Answer Book). Each question carries one mark.
2) Don't forget to Mention question paper set (P/Q/R/S) on top of page.
3) Figures to the right indicates full marks.
4) Assume suitable data if necessary.

MCQ/Objective Type Questions

Duration: 30 Minutes Marks:14

Q.1 Choose the correct Answer. **14**

1) Availability of Solar energy on the earth surface is _____MW.
a) 190 billion b) 178 billion
c) 150 billion d) 250 billion

2) Energy is _____ of substance or a body to do work.
a) Obesity b) Power
c) Capacity d) None of the above

3) Wind energy used from _____ years ago.
a) 3000 b) 2000
c) 6000 d) 5000

4) The major source of the Geothermal energy is _____.
a) Water b) Hot water reservoir
c) Oil d) Gas

5) Which is the primary advantage of using solar energy power generation?
a) Low initial coast
b) Reduce environmental impact
c) Do not require large area
d) Simple storage method

6) OTEC stands for _____.
a) Ocean thermal energy conversion
b) Ocean thermal energy Component
c) Ocean thermal energy contact
d) Ocean thermodynamic energy conversion

7) Which of the following common application of solar energy?
a) Generating electricity
b) Heating water
c) Providing power for electronic device
d) All of the above

8) Passive solar energy refers to trapping the Suns energy _____.
a) Using mechanical devices
b) without using mechanical devices
c) Using chemical
d) Incineration

9) The process or digestion taking place in the presence of air is called as _____.
a) Aerobic digestion
b) Anaerobic digestion
c) Hydrolysis
d) None of these

10) Which type of renewable energy resources generate low power energy?
a) Biomass
b) Solar
c) Wind
d) All of the above

11) In wind turbine gear box is used to _____.
a) Step up the speed
b) Reduce the speed
c) shut down
d) None of these

12) Geothermal energy present _____ of the earth.
a) Rotation
b) Exterior
c) North side
d) Interior

13) Biogas is the gaseous fuel which is obtained from biomass by means of _____ fermentation.
a) Aerobic
b) Anaerobic
c) Constant
d) None of the above

14) _____ is produced by blending of vegetable oil.
a) CNG
b) Methane gas
c) Biofuel
d) Biodisel

MCQ/Objective Type Questions

Duration: 30 Minutes Marks:14

Q.1 Choose the correct answer. **14**

1) An instrument transformer is used to extend the range of _____.
a) induction instrument b) electrostatic instrument
c) moving coil instrument d) any of the above

2) The internal resistance of an ammeter should be _____.
a) Very small b) Medium
c) High d) Infinity

3) The smallest change which a sensor can detect is termed: _____
a) Accuracy b) Precision
c) Resolution d) Scale

4) Sensor effectiveness depends on _____ parameter.
a) Sensitivity b) Radiation
c) Restively d) All the above

5) The desirable static characteristics of a measuring system are _____
a) accuracy and drift
b) accuracy, sensitivity and reproducibility
c) drift and dead zone
d) static error

6) A _____ device prevents the oscillation of the moving system and enables the latter to reach its final position quickly.
a) Deflecting b) Controlling
c) Damping d) any of the above

7) _____ is an instrument which measures the insulation resistance of an electric circuit relative to earth and one another.
a) Tangent galvanometer
b) Megger
c) Current transformer
d) None of the above

8) Which of the following is a key characteristic of a sensor?
a) It can only measure temperature
b) It is an active component
c) It converts physical parameters into an electrical signal
d) Il requires no external power

9) Which of the following is a type of magnetic sensor?
a) Thermistor
b) Strain gauge
c) Hall effect sensor
d) LVDT

10) Typical conversion speed of ADC is _____
a) Less than 1 μs
b) Less than 100 μs
c) Less than 500 μs
d) Greater than 1000 μs

11) What is signal conditioning?
a) To analyze any signal
b) Conversion or modification is referred to as conditioning
c) Conversion from analog to digital is signal conditioning
d) Conversion from digital to analog is signal conditioning

12) Touch screen devices use which sensor?
a) Touch sensor
b) Temperature sensor
c) Humidity sensor
d) Pressure sensor

13) ENOB in ADC stand for _____
a) Effective number of bytes
b) Effective number of bits
c) Effective nibble baud
d) None of the mentioned

14) A simple bridge circuit consists of a network of _____
a) 3 resistance arms
b) 2 resistance arms
c) 4 resistance arms
d) 6 resistance arms

4) Draw neat diagrams whenever necessary.

Section – I

Q.2 Attempt any four of the following: 16

a) Define standard & explain types of standards.
b) Define the following characteristics
1) Linearity 2) Accuracy 3) Repeatability 4) Sensitivity
c) Derive the expression for unknown capacitance with phasor diagram by using Schering Bridge.
d) Write difference between Current Transformer and Potential Transformer.
e) Explain working of digital storage oscilloscope with suitable block diagram.

Q.3 Attempt any two of the following: 12

a) Illustrate and derive the torque equation for a Moving iron instrument with neat diagram.
b) Draw the equivalent circuit and phasor diagram of a CT. Derive the expressions for ratio and phase angle errors.
c) Explain digital ramp type and dual slope integrating type digital voltmeter.

Section – II

Q.4 Attempt any four of the following: 16

a) Explain the principle of working of Hall effect sensor.
b) Explain different types of temperature sensor with details.
c) Discuss Classification of sensor and explain active and passive sensor.
d) State and explain the methods of data transmission.
e) State and Explain the Modes of Heat transfer.

Q.5 Attempt any two of the following: 12

a) Stale the sensors used for Velocity and Acceleration application and explain any one of them.
b) Slate and explain the sensors used for occupancy and motion detector application.
c) Define the temperature and explain the thermal properties of material.

c) Effective nibble baud d) None of the mentioned

9) A simple bridge circuit consists of a network of _____
a) 3 resistance arms b) 2 resistance arms
c) 4 resistance arms d) 6 resistance arms

10) An instrument transformer is used to extend the range of _____.
a) induction instrument b) electrostatic instrument
c) moving coil instrument d) any of the above

11) The internal resistance of an ammeter should be _____.
a) Very small b) Medium
c) High d) Infinity

12) The smallest change which a sensor can detect is termed: _____
a) Accuracy b) Precision
c) Resolution d) Scale

13) Sensor effectiveness depends on _____ parameter.
a) Sensitivity b) Radiation
c) Restively d) All the above

14) The desirable static characteristics of a measuring system are _____
a) accuracy and drift
b) accuracy, sensitivity and reproducibility
c) drift and dead zone
d) static error

Seat No.		Set	S

S. Y. (B. Tech.) (Sem-II) (New) (CBCS) Examination: March/April-2025
CIVIL ENGINEERING
Measurement, Instrumentation and Sensors (OE-02D)

Day & Date: Tuesday, 03-June-2025 Max. Marks: 56
Time: 10:00 AM To 01:00 PM

Instructions: 1) All questions are compulsory.
2) Figures to the right indicate full marks.
3) Assume suitable data if necessary.
4) Draw neat diagrams whenever necessary.

Section – I

Q.2 Attempt any four of the following: 16

a) Define standard & explain types of standards.
b) Define the following characteristics
1) Linearity 2) Accuracy 3) Repeatability 4) Sensitivity
c) Derive the expression for unknown capacitance with phasor diagram by using Schering Bridge.
d) Write difference between Current Transformer and Potential Transformer.
e) Explain working of digital storage oscilloscope with suitable block diagram.

Q.3 Attempt any two of the following: 12

a) Illustrate and derive the torque equation for a Moving iron instrument with neat diagram.
b) Draw the equivalent circuit and phasor diagram of a CT. Derive the expressions for ratio and phase angle errors.
c) Explain digital ramp type and dual slope integrating type digital voltmeter.

Section – II

Q.4 Attempt any four of the following: 16

a) Explain the principle of working of Hall effect sensor.
b) Explain different types of temperature sensor with details.
c) Discuss Classification of sensor and explain active and passive sensor.
d) State and explain the methods of data transmission.
e) State and Explain the Modes of Heat transfer.

Q.5 Attempt any two of the following: 12

a) Stale the sensors used for Velocity and Acceleration application and explain any one of them.
b) Slate and explain the sensors used for occupancy and motion detector application.
c) Define the temperature and explain the thermal properties of material.

S. Y. (B.Tech.) (Sem - II) (New) (CBCS) Examination: March/April-2025
CIVIL ENGINEERING
Operation Research (OE-02E)

Day & Date: Tuesday 03-06-2025 Max. Marks: 70
Time: 10:00 AM To 01:00 PM

Instructions: 1) Q. No. 1 is compulsory. It should be solved in the first 30 minutes in Answer Book Page no 03 (Starting page of the Answer Book). Each question carries one mark.
2) Don't forget to Mention question paper set (P/Q/R/S) on top of page.
3) Figures to the right indicates full marks.

MCQ/Objective Type Questions

Duration: 30 Minutes Marks:14

Q.1 Choose the correct alternatives from the options. **14**

1) Linear programming deals with the optimization of a function of variables is, known as _____
a) Subjective function b) Objective function
c) Combined Equation d) None of these

2) What is the condition of Balance Assignment Problem?
a) Σ Demand$=\Sigma$ Supply
b) No. of rows $>$ No. of column
c) No. of rows $<$ No. of column
d) No. of rows $=$ No. of columns

3) EOQ means: _____
a) Economic Offering Quantity b) Empty Order Quantity
c) Economic Order Quantity d) Economic Order Quality

4) In ABC analysis, high monitoring and control are required for: _____
a) A class items b) B class items
c) C class items d) All of these

5) Graphical method, simplex method, and transportation method are concerned with _____.
a) Break-even analysis b) Value analysis
c) Linear programming d) Queueing theory

6) The cost of keeping items in inventory is called _____
a) Set up cost b) Holding cost
c) Shortage cost d) None of these

7) Dual of the Dual is _____
a) Dual b) Primal
c) Zero d) Infinity

8) At the Break-Even Point _____
a) Profit > Loss
b) Profit < Loss
c) Profit = Loss
d) None of these

9) The PERT in project management means Program Evaluation and _____ Technique.
a) Resource
b) Reconciliation
c) Reconsideration
d) Review

10) _____ Stock is the lower limit of stock below which the stock should not be allowed to fall.
a) Maximum
b) Average
c) Safety
d) Standard

11) Optimization Means _____.
a) Maximization
b) Minimization
c) Minimization or Maximization
d) Mean of Minimization & Maximization

12) A feasible solution to LPP _____.
a) Must satisfy all the constraints simultaneously
b) Need not satisfy all the constraints
c) Must be a corner point of feasible region
d) Must optimize the objective function

13) In a project network, the critical path _____.
a) May be the shortest path
b) Is the longest path
c) May be the longest path
d) Is the shortest path

14) The inventory carrying costs are also called as _____.
a) Procurement costs
b) Set-up costs
c) Storage costs
d) None of the above

Time: 10:00 AM To 01:00 PM

Instructions: 1) All questions are compulsory.
2) Figures to the right indicate full marks.
3) Assume suitable data wherever necessary and mention it clearly.
4) Use of non-programmable calculator is allowed.

Section – I

Q.2 Attempt Any Three. **24**

a) Using Graphical method, Solve

Maximize $Z = 10X_1 + 8X_2$
Subject to, $2X_1 + X_2 \leq 40;$
$2X_1 + 3X_2 \leq 80;$
$0 \leq X_1; 0 \leq X_2$

b) Solve the following assignment model for minimum processing time.

		Machines			
		M1	M2	M3	M4
Jobs	J1	51	77	49	55
	J2	32	34	59	68
	J3	37	44	70	54
	J4	55	55	58	55

c) Find the initial basic feasible solution by Least Cost Method.

	W1	W2	W3	W4	Supply
F1	48	60	56	58	140
F2	45	55	53	60	260
F3	50	65	60	62	360
F4	52	64	55	61	220
Demand	200	320	250	210	

d) What are the different Limitations & Applications of 'Operation Research'?
e) How do you solve unbalanced transportation problem? What are different methods to solve Transportation Model? Explain in details.

Q.3 Answer any one. **04**

a) What is LPP? What are different components of LPP?
b) How assignment model is useful in practical life?

Section – II

Q.4 Attempt Any Three. **24**

a) A construction company consumes 4000 bags of cement per month. Price per bag of cement is Rs. 320/-. Inventory carrying cost per bag per year is Rs. 30/- and procurement cost per order is Rs. 500/- Find economic order quantity and number of orders to be placed per month?

b) Write a note various types inventory cost.

c) Draw network, find out CP & PD. Calculate All floats of each non-critical Activity.

Activity	A	B	C	D	E	F	G	H	I	J	K	L	M	N
Immediate Predecessor	-	-	-	B	A	A	B	C,D	C,D	E	F,G,H	F,G,H	I	J,K
Time in Months	2	6	4	3	6	8	3	7	2	5	4	3	13	7

d) A small project consists of seven activities. The time estimates in weeks of different activities are given below. Find out probability of completing the project in 18 weeks.

Activity	Estimated Time		
	to	tm	tp
1-2	1	1	7
1-3	1	4	7
1-4	2	2	8
2-5	1	1	1
3-5	2	5	14
4-6	2	5	8
5-6	3	6	15

Probability Factor	Probability
0	50%
1	84.13%
2	97.72%
3	99.87%

e) Explain Sequencing Problem Technique. What are its Different Elements, also elaborate its assumptions.

Q.3 Attempt Any One. **04**

a) What is EOQ? What is its important?

b) Distinguish between CPM & PERT (At least 4 points)

Seat No.

S.Y. (B.Tech.) (Sem-II) (New) (CBCS) Examination: March/April - 2025
CIVIL ENGINEERING
Computational Mathematics (OE-02F)

Day & Date: Tuesday 03-06-2025 Max. Marks: 70
Time: 10:00 AM To 01:00 PM

Instructions: 1) Q. No. 1 is compulsory. It should be solved in the first 30 minutes in Answer Book Page no 03 (Starting page of the Answer Book). Each question carries one mark.
2) Don't forget to Mention question paper set (P/Q/R/S) on top of page.
3) Figures to the right indicates full marks.

MCQ/Objective Type Questions

Duration: 30 Minutes Marks:14

Q.1 Choose the correct option. **14**

1) A transcendental equation is an equation that involves _____.
a) Only algebraic terms
b) Only transcendental functions
c) Both algebraic and transcendental functions
d) Linear terms only

2) The interval in which a real root of the equation $x^3 - 2x - 5 = 0$ lies is _____.
a) $(1,2)$ b) $(0,1)$
c) $(2,3)$ d) $(3,4)$

3) The Gauss-Seidel method is used for solving _____.
a) Nonlinear equations
b) Systems of linear equations
c) Ordinary differential equations
d) Partial differential equations

4) Which of the following is a disadvantage of the Gauss-Jacobi method?
a) It converges faster than most direct methods
b) It requires a large number of iterations for a good approximation
c) It cannot be used for systems with more than two equations
d) It works only for symmetric systems

5) The use of Romberg's method is _____.
a) To solve simultaneous linear equation
b) To find root of linear equation
c) To evaluate definite integration
d) To find the Eigen values

6) The order of convergence of Newton-Raphson method is _____.

a) 1 b) 2

c) $\sqrt{2}$ d) 1.6

7) Power Method is used to find _____.

a) Negative Eigen Value b) Largest Eigen value

c) Positive Eigen Value d) None of these

8) To find the Numerically largest Eigen value using iterative Method we use the equation _____.

a) $A = \lambda X$ b) $AX = X$

c) $X = \lambda X$ d) $AX = \lambda X$

9) If $\frac{dy}{dx} = x - y$ and $y(0) = 1$ then by Picard's method the value of $y_1(1)$ is _____.

a) 0.905 b) 1.905

c) 2.905 d) none

10) Runge-Kutta method is self-starting method _____.

a) true d) false

c) we can't say d) none

11) If the data is equally spaced and interpolation is near the beginning of the data then _____ Interpolation formula is used.

a) Newton's backward difference

b) Newton's divided difference

c) Newton's forward difference

d) Lagrange's

12) The process of finding the value inside the interval (x_0, x_n) is called ___.

a) Interpolation b) Extrapolation

c) Iterative d) polynomial equation

13) Using Newton-Raphson method the first approximation to the root of the equation $x^4 - x - 10 = 0$ near to $x_0 = 2$ is _____.

a) 1.671 b) 2.271

c) 2.071 d) 1.871

14) To apply Simpson's one-third rule the number of sub-intervals must be _____.

a) Even b) Odd

c) Multiple of 3 d) Multiple of 6

Time: 10:00 AM To 01:00 PM

Instructions: 1) All questions are compulsory.
2) Figures to the right indicate full marks.

Section – I

Q.2 Answer any three. **09**

a) Find the double root of the equation $x^3 - 5.4x^2 + 9.24x - 5.096 = 0$ given that it is nearer to 1.5.

b) Solve the system of equations by Jacobi's iterative method (perform 3 iterations) $27x + 6y - z = 85,\ 6x + 15y + 2z = 72,\ x + y + 54z = 110$

c) Find positive real root of the equation $x \sin x + \cos x = 0$ using Newton Raphson method correct to 3 decimal places.

d) Solve the system of equation by using Gauss-Elimination method. $x + 4y - z = -5, x + y - 6z = -12, -3x - y - z = 4$

e) Solve $\frac{dy}{dx} = -xy$ with $x_0 = 0\ ,\ y_0 = 1$ using Picard's method upto 3rd approximation.

Q.3 Answer any three. **09**

a) Solve $\frac{dy}{dx} = x + y$ with $x_0 = 0\ , y_0 = 1$ using Range kutta forth order method and find approximate value of y when $x = 0.2$

b) Solve $\frac{dy}{dx} = 1 + xy$ with $y(0) = 1$ using Picard's method take first approximation and find y for $x = 0.1$

c) Solve by Gauss Seidel Method, the equations $20x + y - 2z = 17, 3x + 20y - z = -18, 2x - 3y + 20z = 25$ Perform 3 iteration.

d) Find the value of $\sqrt{5}$ using newton's iterative formula. Perform 3 iteration.

e) Find the positive root of $f(x) = 2x^3 - 3x - 6$ by Newton's Raphson method perform 3 iteration.

Q.4 Answer any two. **10**

a) Perform 2-iteration by Newton's Raphson Method to Solve the non-linear equation $x = x^2 + y^2,\ y = x^2 - y^2$ Take initial approximation $x_0 = 0.8, y_0 = 0.4$

b) Solve the system of equation by LU decomposition Method $3x + 2y + 7z = 4,\quad 2x + 3y + z = 5,\quad 3x + 4y + z = 7$

c) Solve differential equation $\frac{dy}{dx} = 1 + xz,\ \frac{dz}{dx} = -xy$ for $x = 0.3$ using 4th order Runge-Kutta Method Initial Values are $x = 0,\ y = 0,\ z = 1$

Section – II

Q.5 Answer any Three. **09**

a) Evaluate the integral $\int_0^1 \frac{x^2}{1+x^3}\,dx$ using Simpson's $\frac{1}{3}$rd rule, Take $h = 0.25$

b) Determine the largest Eigen value and corresponding Eigen vector of the matrix $\begin{bmatrix} 5 & 4 \\ 1 & 2 \end{bmatrix}$ by using power method perform three iteration.

c) Use Trapezoidal Rule to compute $\int_0^1 \frac{1}{1+x^2}\,dx$ Take h as 0.5

d) Using Newton's divided difference formula, find the value of $f(2)$. Given the following table.

x	4	5	7	10	11	13
$f(x)$	48	100	294	900	1210	2028

e) Construct Newton's Forward interpolation polynomial for the following data:

x	4	6	8	10
y	1	3	8	16

Hence find the value of y for $x = 5$

Q.6 Answer any Three. **09**

a) Solve the integral $\int_0^{1/2} \frac{1}{\sqrt{1-x^2}}\,dx$ using Weddle's rule Taking $n = 6$

b) Solve $\int_3^5 \frac{4}{(2x^2)}\,dx$ Using Gauss Formula for $n = 2$ and $n = 3$.

c) Find all Eigen values and Eigen vectors of the following matrix by using Gauss Jacobi's Method. $\begin{bmatrix} 2 & 3 \\ 3 & 2 \end{bmatrix}$

d) Solve $\int_0^6 \frac{dx}{1+x^2}$ by using Simpsons 3/8th rule take $h = 1$

e) Using Newton's Backward formula, find the value of $f(2)$ if

x	1	1.4	1.8	2.2
$f(x)$	3.49	4.82	5.96	6.5

Q.7 Answer any two. **10**

a) Find the largest eigen value and the corresponding eigen vector of the matrix:

$\begin{bmatrix} 25 & 1 & 2 \\ 1 & 3 & 0 \\ 2 & 0 & -4 \end{bmatrix}$ by using power method

Take $[1 \quad 0 \quad 0]^r$ as initial eigen vector (perform 5 iterations)

b) Use Romberg's method to compute $\int_0^1 \frac{1}{1+x^2}\,dx$ Take h as $0.5, 0.25, 0.125$

c) Given the Values

x	5	7	11	13	17
$f(x)$	150	392	1452	2366	5202

Evaluate $f(9)$,using Lagrange's Formula.

MCQ/Objective Type Questions

Duration: 30 Minutes Marks:14

Q.1 Choose the correct option. **14**

1) The order of convergence of Newton-Raphson method is _____.
a) 1 b) 2
c) $\sqrt{2}$ d) 1.6

2) Power Method is used to find _____.
a) Negative Eigen Value b) Largest Eigen value
c) Positive Eigen Value d) None of these

3) To find the Numerically largest Eigen value using iterative Method we use the equation _____.
a) $A = \lambda X$ b) $AX = X$
c) $X = \lambda X$ d) $AX = \lambda X$

4) If $\frac{dy}{dx} = x - y$ and $y(0) = 1$ then by Picard's method the value of $y_1(1)$ is _____.
a) 0.905 b) 1.905
c) 2.905 d) none

5) Runge-Kutta method is self-starting method _____.
a) true d) false
c) we can't say d) none

6) If the data is equally spaced and interpolation is near the beginning of the data then _____ Interpolation formula is used.
a) Newton's backward difference
b) Newton's divided difference
c) Newton's forward difference
d) Lagrange's

7) The process of finding the value inside the interval (x_0, x_n) is called ___.
a) Interpolation b) Extrapolation
c) Iterative d) polynomial equation

8) Using Newton-Raphson method the first approximation to the root of the equation $x^4 - x - 10 = 0$ near to $x_0 = 2$ is _____.
a) 1.671 b) 2.271
c) 2.071 d) 1.871

9) To apply Simpson's one-third rule the number of sub-intervals must be _____.
a) Even b) Odd
c) Multiple of 3 d) Multiple of 6

10) A transcendental equation is an equation that involves _____.
a) Only algebraic terms
b) Only transcendental functions
c) Both algebraic and transcendental functions
d) Linear terms only

11) The interval in which a real root of the equation $x^3 - 2x - 5 = 0$ lies is _____.
a) $(1,2)$ b) $(0,1)$
c) $(2,3)$ d) $(3,4)$

12) The Gauss-Seidel method is used for solving _____.
a) Nonlinear equations
b) Systems of linear equations
c) Ordinary differential equations
d) Partial differential equations

13) Which of the following is a disadvantage of the Gauss-Jacobi method?
a) It converges faster than most direct methods
b) It requires a large number of iterations for a good approximation
c) It cannot be used for systems with more than two equations
d) It works only for symmetric systems

14) The use of Romberg's method is _____.
a) To solve simultaneous linear equation
b) To find root of linear equation
c) To evaluate definite integration
d) To find the Eigen values

S.Y. (B.Tech.) (Sem-II) (New) (CBCS) Examination: March/April - 2025
CIVIL ENGINEERING
Computational Mathematics (OE-02F)

Day & Date: Tuesday 03-06-2025 Max. Marks: 56
Time: 10:00 AM To 01:00 PM

Instructions: 1) All questions are compulsory.
2) Figures to the right indicate full marks.

Section – I

Q.2 Answer any three. **09**

a) Find the double root of the equation $x^3 - 5.4x^2 + 9.24x - 5.096 = 0$ given that it is nearer to 1.5.

b) Solve the system of equations by Jacobi's iterative method (perform 3 iterations) $27x + 6y - z = 85,\ 6x + 15y + 2z = 72,\ x + y + 54z = 110$

c) Find positive real root of the equation $x \sin x + \cos x = 0$ using Newton Raphson method correct to 3 decimal places.

d) Solve the system of equation by using Gauss-Elimination method. $x + 4y - z = -5, x + y - 6z = -12, -3x - y - z = 4$

e) Solve $\frac{dy}{dx} = -xy$ with $x_0 = 0\ ,\ y_0 = 1$ using Picard's method upto 3rd approximation.

Q.3 Answer any three. **09**

a) Solve $\frac{dy}{dx} = x + y$ with $x_0 = 0\ , y_0 = 1$ using Range kutta forth order method and find approximate value of y when $x = 0.2$

b) Solve $\frac{dy}{dx} = 1 + xy$ with $y(0) = 1$ using Picard's method take first approximation and find y for $x = 0.1$

c) Solve by Gauss Seidel Method, the equations $20x + y - 2z = 17, 3x + 20y - z = -18, 2x - 3y + 20z = 25$ Perform 3 iteration.

d) Find the value of $\sqrt{5}$ using newton's iterative formula. Perform 3 iteration.

e) Find the positive root of $f(x) = 2x^3 - 3x - 6$ by Newton's Raphson method perform 3 iteration.

Q.4 Answer any two. **10**

a) Perform 2-iteration by Newton's Raphson Method to Solve the non-linear equation $x = x^2 + y^2,\ y = x^2 - y^2$ Take initial approximation $x_0 = 0.8, y_0 = 0.4$

b) Solve the system of equation by LU decomposition Method $3x + 2y + 7z = 4,\quad 2x + 3y + z = 5,\quad 3x + 4y + z = 7$

c) Solve differential equation $\frac{dy}{dx} = 1 + xz,\ \frac{dz}{dx} = -xy$ for $x = 0.3$ using 4th order Runge-Kutta Method Initial Values are $x = 0,\ y = 0,\ z = 1$

Section – II

Q.5 Answer any Three. **09**

a) Evaluate the integral $\int_0^1 \frac{x^2}{1+x^3}\,dx$ using Simpson's $\frac{1}{3}$rd rule, Take $h = 0.25$

b) Determine the largest Eigen value and corresponding Eigen vector of the matrix $\begin{bmatrix} 5 & 4 \\ 1 & 2 \end{bmatrix}$ by using power method perform three iteration.

c) Use Trapezoidal Rule to compute $\int_0^1 \frac{1}{1+x^2}\,dx$ Take h as 0.5

d) Using Newton's divided difference formula, find the value of $f(2)$. Given the following table.

x	4	5	7	10	11	13
$f(x)$	48	100	294	900	1210	2028

e) Construct Newton's Forward interpolation polynomial for the following data:

x	4	6	8	10
y	1	3	8	16

Hence find the value of y for $x = 5$

Q.6 Answer any Three. **09**

a) Solve the integral $\int_0^{1/2} \frac{1}{\sqrt{1-x^2}}\,dx$ using Weddle's rule Taking $n = 6$

b) Solve $\int_3^5 \frac{4}{(2x^2)}\,dx$ Using Gauss Formula for $n = 2$ and $n = 3$.

c) Find all Eigen values and Eigen vectors of the following matrix by using Gauss Jacobi's Method. $\begin{bmatrix} 2 & 3 \\ 3 & 2 \end{bmatrix}$

d) Solve $\int_0^6 \frac{dx}{1+x^2}$ by using Simpsons 3/8th rule take $h = 1$

e) Using Newton's Backward formula, find the value of $f(2)$ if

x	1	1.4	1.8	2.2
$f(x)$	3.49	4.82	5.96	6.5

Q.7 Answer any two. **10**

a) Find the largest eigen value and the corresponding eigen vector of the matrix:

$\begin{bmatrix} 25 & 1 & 2 \\ 1 & 3 & 0 \\ 2 & 0 & -4 \end{bmatrix}$ by using power method

Take $[1 \quad 0 \quad 0]^r$ as initial eigen vector (perform 5 iterations)

b) Use Romberg's method to compute $\int_0^1 \frac{1}{1+x^2}\,dx$ Take h as $0.5, 0.25, 0.125$

c) Given the Values

x	5	7	11	13	17
$f(x)$	150	392	1452	2366	5202

Evaluate $f(9)$,using Lagrange's Formula.

Professional Business Communication (OE-02G)

Day & Date: Tuesday 03-06-2025 Max. Marks: 70
Time: 10:00 AM To 01:00 PM

Instructions: 1) Q. No. 1 is compulsory. It should be solved in the first 30 minutes in Answer Book Page no 03 (Starting page of the Answer Book). Each question carries one mark.
2) Don't forget to Mention question paper set (P/Q/R/S) on top of page.
3) Figures to the right indicates full marks.

MCQ/Objective Type Questions

Duration: 30 Minutes Marks:14

Q.1 Choose the correct alternatives from the options. 14

1) In communication, _____ is the person who receives and decodes the message.
a) Sender b) Receiver
c) Driver d) Cleaner

2) Which among the following is not a manmade channel of communication?
a) Telephone b) Cell phone
c) Fax d) Air

3) Communication is the part of _____ skills.
a) Rough b) Soft
c) Hard d) Short

4) Which among the following are the barriers to communication?
a) Physical b) Mechanical
c) Psychological d) All of above

5) To overcome language barrier, which of the ways should not be followed?
a) Easy and understandable words should be used.
b) Jokes should be told to the audience.
c) The language of audience should be used.
d) Non-verbal ways should be used to the extent possible.

6) Which of the following is not among 7Cs?
a) Conciseness b) Completeness
c) Clarity d) Charity

7) Posters fall under _____ communication.
a) oral b) visual
c) written d) spoken

8) On the _____ it is possible to get immediate feedback.
a) letter b) e-mail
c) fax d) telephone

9) The response to a sender's message is called as _____.
a) Reply b) Feedback
c) Answer d) None of the above

10) _____ is the soul of communication.
a) Sender b) Receiver
c) Message d) Feedback

11) Which of these is not an element of non-verbal communication?
a) Personal appearance b) Posture
c) Eye contact d) Name of the speaker

12) Telephonic conversation is a form of: _____
a) verbal communication b) non-verbal communication
c) visual communication d) Written

13) To give a good presentation, full rehearsal is: _____
a) Optional b) Necessary
c) Useless d) Audience based

14) Which of the following is not an advantage of oral presentation?
a) Flexibility b) Scope for body language
c) Expensive d) Time-saving

Section – I

Q.2 Attempt Any Three. **12**

a) Explain how communication is necessary for business.
b) What is feedback? Explain its necessity in communication.
c) Write short note on: Different channels of communication.
d) Explain language barriers to communication with the ways to overcome them.
e) Explain language as a tool of communication.

Q.3 Attempt Any Four. **16**

a) Explain seven C's of effective communication.
b) Explain various types of barriers to communication and the ways to overcome them.
c) What is oral communication? Explain its advantages.
d) Explain various steps in the process of communication.
e) What is written communication? Explain its benefits.

Section – II

Q.4 Attempt Any Three. **12**

a) Explain the difference between formal and informal communication.
b) Explain vertical communication with its types.
c) Explain farewell speech by the departing person, with an example
d) Explain the speech for vote of thanks, with an example.
e) Write short note on: Non- verbal aspects of presentation.

Q.5 Attempt Any Four. **16**

a) Explain the structure of a business letter with its various components.
b) Explain the steps in the process of presentation.
c) You had purchased some furniture items from a vendor. Afterwards you found that the furniture items are in a damaged condition. Write a letter of complaint and ask for replacement.
d) Explain four P's of effective presentations.
e) You are in need of some computer hardware parts. Prepare a letter placing order to the supplier. Specify the terms and conditions of purchase.

MCQ/Objective Type Questions

Duration: 30 Minutes Marks:14

Q.1 Choose the correct Alternatives. **14**

1) An entrepreneur is best described as: _____.
a) A manager b) A risk taker
c) A consumer d) A government official

2) Innovation contributes to the economy by: _____.
a) Creating jobs and new markets
b) Limiting technological growth
c) Increasing taxes only
d) Promoting monopolies

3) The entrepreneurial journey begins with: _____.
a) Launching a website b) Registering a business
c) Idea generation d) Finding a supplier

4) Which of the following is not a leadership theory?
a) Trait theory b) Behavioral theory
c) Structure theory d) Contingency theory

5) A flat organizational structure is characterized by: _____.
a) Many layers of management
b) Centralized control
c) Few hierarchical levels
d) Complex chains of command

6) Agile project management is suitable for: _____.
a) Static and unchanging projects
b) Innovative and dynamic projects
c) Government tenders
d) Predictable production

7) Seed funding refers to: _____.
a) Investment after IPO
b) Government pension schemes
c) Early-stage capital for startups
d) Tax planning

8) Risk management includes: _____.
a) Ignoring failures
b) Avoiding innovation
c) Identifying, assessing, and mitigating risks
d) Hiring friends only

9) Guerrilla marketing is characterized by: _____.
a) Large budget campaigns
b) Expensive celebrity endorsements
c) Creative and unconventional promotion
d) Full-page newspaper ads

10) Retention in customer relationship means: _____.
a) Losing customers quickly b) Maintaining customer loyalty
c) Cold calling d) Increasing prices suddenly

11) Cash flow refers to: _____.
a) Money spent on marketing b) Total debts incurred
c) Inflow and outflow of cash d) Discounts offered to customers

Section – I

Q.2 All questions are compulsory

a)	Define "Enterprise," "Entrepreneur," and "Innovation." Explain how they are interrelated in business development.	**06**
b)	Explain the key theories of entrepreneurship (economic, psychological, and sociological).	**04**

Q.3 Solve any three questions.

a)	Discuss current trends in innovation and entrepreneurship.	**06**
b)	Describe different types of businesses and entrepreneurship.	**06**
c)	Explain the entrepreneurial journey with its key steps.	**06**
d)	What are the challenges in innovation and how can they be overcome?	**06**
e)	Explain the impact of organizational structure on company performance.	**06**

Section – II

Q.4 All questions are compulsory

a)	Explain budgeting and funding sources for innovation projects.	**06**
b)	What is calculated risk? How is it different from general risk-taking?	**04**

Q.5 Solve any three questions.

a)	Describe guerrilla marketing with a real-life example.	**06**
b)	Explain customer acquisition, retention, and repetition with examples.	**06**
c)	Define cash flow and burn rate. Why are they critical for a startup?	**06**
d)	Discuss sustainable entrepreneurship practices.	**06**
e)	What are scaling-up strategies? How do startups expand?	**06**

b) Expensive celebrity endorsements
c) Creative and unconventional promotion
d) Full-page newspaper ads

5) Retention in customer relationship means: _____.
a) Losing customers quickly b) Maintaining customer loyalty
c) Cold calling d) Increasing prices suddenly

6) Cash flow refers to: _____.
a) Money spent on marketing
b) Total debts incurred
c) Inflow and outflow of cash
d) Discounts offered to customers

7) Burn rate is: _____.
a) Speed of market entry
b) Rate of cash consumption
c) Value of sales revenue
d) None of the above

8) Scaling a startup means: _____.
a) Downsizing workforce
b) Reducing marketing spend
c) Growing operations to handle more demand
d) Launching fewer products

9) Sustainable entrepreneurship includes: _____.
a) Ignoring social impact
b) Maximizing profits only
c) Balancing profit with environmental/social goals
d) Selling only eco-friendly products

10) An entrepreneur is best described as: _____.
a) A manager
b) A risk taker
c) A consumer
d) A government official

11) Innovation contributes to the economy by: _____.
a) Creating jobs and new markets
b) Limiting technological growth
c) Increasing taxes only
d) Promoting monopolies

12) The entrepreneurial journey begins with: _____.
a) Launching a website
b) Registering a business
c) Idea generation
d) Finding a supplier

13) Which of the following is not a leadership theory?
a) Trait theory
b) Behavioral theory
c) Structure theory
d) Contingency theory

14) A flat organizational structure is characterized by: _____.
a) Many layers of management
b) Centralized control
c) Few hierarchical levels
d) Complex chains of command

MCQ/Objective Type Questions

Duration: 30 Minutes Marks:14

Q.1 Choose the correct alternative from the given options **14**

1) One of the concrete technical aspects defining urban is ____
a) Population size b) Cultural heritage
c) Historical significance d) Natural resources

2) One of the definitions of urban planning according to scholars is ____
a) The study of rural areas
b) The discipline of designing and regulating space
c) The process of agricultural development
d) The management of natural resources

3) The first step in the physical planning process is ____
a) Survey and data collection
b) Identification of the problems and needs of the area
c) Formulation of alternative strategies
d) Implementation of the plan

4) What is a characteristic of a city?
a) It is primarily focused on agriculture
b) It has a small population density
c) It is a politically autonomous settlement
d) It is a temporary settlement

5) The natural factors that can force populations to move to cities ____
a) Economic opportunities
b) Environmental and climatic changes
c) Historical events
d) Urban planning

6) What is a major cause of urbanization related to employment?
a) Rural-urban transformation b) Increased agricultural jobs
c) Decline in industrial jobs d) Higher birth rates

7) What is a potential risk associated with urban growth?
a) Lower crime rates
b) Higher chances of disasters and resource loss
c) Improved infrastructure
d) Increased agricultural output

8) The one of the administrative measures for urban renewal is ____
a) To demolish all buildings
b) To restore the area to its original functions
c) To build new skyscrapers
d) To increase traffic congestion

9) The relevance of urban design in planning and architecture is to ____
a) create aesthetically pleasing environments
b) focus solely on economic development
c) ignore community needs
d) only concern with transportation

10) What does urban design help to inform?
a) Land use planning b) Only transportation systems
c) Only economic policies d) Only aesthetic policies

11) What does the concept of legibility refer to?
a) The aesthetic appeal of a city
b) The ease of understanding the layout of a place
c) The number of buildings in a city
d) The historical significance of urban areas

12) What are the three main types of urban form aspects?
a) Density, grain, and spatial pattern
b) Height, width, and depth
c) colour, shape, and size
d) Population, traffic, and land use

13) Urban aesthetics refer to ____
a) The visual and sensory experiences created by urban design
b) The economic status of a city
c) The historical significance of urban areas

3) Draw neat sketch wherever necessary.

Section – I

Q.2 Solve any four. **16**

a) Describe the concentric zone model.
b) Explain density control in detail
c) Explain the urban concentrations factors.
d) Explain the urban settlements.
e) Describe why cities are complex and adaptive with key features.
f) Describe the positive impacts of city growth.

Q.3 Solve any two. **12**

a) Describe the cities' role in national development.
b) Describe the essential characteristics of a city or town.
c) Describe levels of an urban planning or forms of planning.

Section – II

Q.4 Solve any four. **16**

a) Describe in detail an urban renewal.
b) Explain in detail need for an urban design.
c) Describe in detail with sketch vista and skyline.
d) Describe in detail the public realm.
e) Describe about survey for an urban design.
f) Describe about an urban design scheme.

Q.5 Solve any two. **12**

a) Explain relevance of an urban design in planning and an architecture.
b) Describe in detail elements of city by Kevin Lynch with sketches.
c) Describe in detail contents of an aesthetic plan.

Set Q

S. Y. (B.Tech.) (Sem-II) (New) (CBCS) Examination: March/April - 2025
COMPUTER SCIENCE AND ENGINEERING
Urban Planning and Design (CIVMDM-02B)

Day & Date: Thursday, 05-June-2025 Max. Marks: 70
Time: 10:00 AM To 01:00 PM

Instructions: 1) Q. No. 1 is compulsory. It should be solved in the first 30 minutes in Answer Book Page no 03 (Starting page of the Answer Book). Each question carries one mark.
2) Don't forget to Mention question paper set (P/Q/R/S) on top of page.
3) Figures to the right indicates full marks

MCQ/Objective Type Questions

Duration: 30 Minutes Marks:14

Q.1 Choose the correct alternative from the given options **14**

1) The one of the administrative measures for urban renewal is ____
a) To demolish all buildings
b) To restore the area to its original functions
c) To build new skyscrapers
d) To increase traffic congestion

2) The relevance of urban design in planning and architecture is to ____
a) create aesthetically pleasing environments
b) focus solely on economic development
c) ignore community needs
d) only concern with transportation

3) What does urban design help to inform?
a) Land use planning b) Only transportation systems
c) Only economic policies d) Only aesthetic policies

4) What does the concept of legibility refer to?
a) The aesthetic appeal of a city
b) The ease of understanding the layout of a place
c) The number of buildings in a city
d) The historical significance of urban areas

5) What are the three main types of urban form aspects?
a) Density, grain, and spatial pattern
b) Height, width, and depth
c) colour, shape, and size
d) Population, traffic, and land use

6) Urban aesthetics refer to ____
a) The visual and sensory experiences created by urban design
b) The economic status of a city
c) The historical significance of urban areas
d) The geographical layout of a town

7) What does the Economic Survey classify workers by?
a) Nature of employment b) Age
c) Education level d) Housing status

8) One of the concrete technical aspects defining urban is ____
a) Population size b) Cultural heritage
c) Historical significance d) Natural resources

9) One of the definitions of urban planning according to scholars is ____
a) The study of rural areas
b) The discipline of designing and regulating space
c) The process of agricultural development
d) The management of natural resources

10) The first step in the physical planning process is ____
a) Survey and data collection
b) Identification of the problems and needs of the area
c) Formulation of alternative strategies
d) Implementation of the plan

11) What is a characteristic of a city?
a) It is primarily focused on agriculture
b) It has a small population density
c) It is a politically autonomous settlement
d) It is a temporary settlement

12) The natural factors that can force populations to move to cities ____
a) Economic opportunities
b) Environmental and climatic changes
c) Historical events
d) Urban planning

13) What is a major cause of urbanization related to employment?
a) Rural-urban transformation b) Increased agricultural jobs
c) Decline in industrial jobs d) Higher birth rates

14) What is a potential risk associated with urban growth?
a) Lower crime rates
b) Higher chances of disasters and resource loss
c) Improved infrastructure
d) Increased agricultural output

e) Describe why cities are complex and adaptive with key features.
f) Describe the positive impacts of city growth.

Q.3 Solve any two. **12**

a) Describe the cities' role in national development.
b) Describe the essential characteristics of a city or town.
c) Describe levels of an urban planning or forms of planning.

Section – II

Q.4 Solve any four. **16**

a) Describe in detail an urban renewal.
b) Explain in detail need for an urban design.
c) Describe in detail with sketch vista and skyline.
d) Describe in detail the public realm.
e) Describe about survey for an urban design.
f) Describe about an urban design scheme.

Q.5 Solve any two. **12**

a) Explain relevance of an urban design in planning and an architecture.
b) Describe in detail elements of city by Kevin Lynch with sketches.
c) Describe in detail contents of an aesthetic plan.

S.Y. (B.Tech.) (Sem-II) (New)(NEP CBCS) Examination: March/April-2025
ELECTRICAL ENGINEERING
Urban Planning and Design (CIVMDM-02B)

Day & Date: Thursday, 05-June-2025 Max. Marks: 70
Time: 10:00 AM To 01:00 PM

Instructions: 1) Q. No. 1 is compulsory. It should be solved in the first 30 minutes in Answer Book Page no 03 (Starting page of the Answer Book). Each question carries one mark.
2) Don't forget to Mention question paper set (P/Q/R/S) on top of page.
3) Figures to the right indicates full marks

MCQ/Objective Type Questions

Duration: 30 Minutes Marks:14

Q.1 Choose the correct alternative from the given options **14**

1) What is a major cause of urbanization related to employment?
a) Rural-urban transformation b) Increased agricultural jobs
c) Decline in industrial jobs d) Higher birth rates

2) What is a potential risk associated with urban growth?
a) Lower crime rates
b) Higher chances of disasters and resource loss
c) Improved infrastructure
d) Increased agricultural output

3) The one of the administrative measures for urban renewal is ____
a) To demolish all buildings
b) To restore the area to its original functions
c) To build new skyscrapers
d) To increase traffic congestion

4) The relevance of urban design in planning and architecture is to ____
a) create aesthetically pleasing environments
b) focus solely on economic development
c) ignore community needs
d) only concern with transportation

5) What does urban design help to inform?
a) Land use planning b) Only transportation systems
c) Only economic policies d) Only aesthetic policies

6) What does the concept of legibility refer to?
a) The aesthetic appeal of a city
b) The ease of understanding the layout of a place
c) The number of buildings in a city
d) The historical significance of urban areas

7) What are the three main types of urban form aspects?
a) Density, grain, and spatial pattern
b) Height, width, and depth
c) colour, shape, and size
d) Population, traffic, and land use

8) Urban aesthetics refer to ____
a) The visual and sensory experiences created by urban design
b) The economic status of a city
c) The historical significance of urban areas
d) The geographical layout of a town

9) What does the Economic Survey classify workers by?
a) Nature of employment b) Age
c) Education level d) Housing status

10) One of the concrete technical aspects defining urban is ____
a) Population size b) Cultural heritage
c) Historical significance d) Natural resources

11) One of the definitions of urban planning according to scholars is ____
a) The study of rural areas
b) The discipline of designing and regulating space
c) The process of agricultural development
d) The management of natural resources

12) The first step in the physical planning process is ____
a) Survey and data collection
b) Identification of the problems and needs of the area
c) Formulation of alternative strategies
d) Implementation of the plan

13) What is a characteristic of a city?
a) It is primarily focused on agriculture
b) It has a small population density
c) It is a politically autonomous settlement
d) It is a temporary settlement

14) The natural factors that can force populations to move to cities ____
a) Economic opportunities
b) Environmental and climatic changes
c) Historical events
d) Urban planning

Set Q

S. Y. (B.Tech.) (Sem-II) (New) (CBCS) Examination: March/April - 2025
MECHANICAL ENGINEERING
Urban Planning and Design (CIVMDM-02B)

Day & Date: Thursday, 05-June-2025 Max. Marks: 70
Time: 10:00 AM To 01:00 PM

Instructions: 1) Q. No. 1 is compulsory. It should be solved in the first 30 minutes in Answer Book Page no 03 (Starting page of the Answer Book). Each question carries one mark.
2) Don't forget to Mention question paper set (P/Q/R/S) on top of page.
3) Figures to the right indicates full marks

MCQ/Objective Type Questions

Duration: 30 Minutes Marks:14

Q.1 Choose the correct alternative from the given options **14**

1) The one of the administrative measures for urban renewal is ____
a) To demolish all buildings
b) To restore the area to its original functions
c) To build new skyscrapers
d) To increase traffic congestion

2) The relevance of urban design in planning and architecture is to ____
a) create aesthetically pleasing environments
b) focus solely on economic development
c) ignore community needs
d) only concern with transportation

3) What does urban design help to inform?
a) Land use planning b) Only transportation systems
c) Only economic policies d) Only aesthetic policies

4) What does the concept of legibility refer to?
a) The aesthetic appeal of a city
b) The ease of understanding the layout of a place
c) The number of buildings in a city
d) The historical significance of urban areas

5) What are the three main types of urban form aspects?
a) Density, grain, and spatial pattern
b) Height, width, and depth
c) colour, shape, and size
d) Population, traffic, and land use

6) Urban aesthetics refer to ____
a) The visual and sensory experiences created by urban design
b) The economic status of a city
c) The historical significance of urban areas
d) The geographical layout of a town

7) What does the Economic Survey classify workers by?
a) Nature of employment b) Age
c) Education level d) Housing status

8) One of the concrete technical aspects defining urban is ____
a) Population size b) Cultural heritage
c) Historical significance d) Natural resources

9) One of the definitions of urban planning according to scholars is ____
a) The study of rural areas
b) The discipline of designing and regulating space
c) The process of agricultural development
d) The management of natural resources

10) The first step in the physical planning process is ____
a) Survey and data collection
b) Identification of the problems and needs of the area
c) Formulation of alternative strategies
d) Implementation of the plan

11) What is a characteristic of a city?
a) It is primarily focused on agriculture
b) It has a small population density
c) It is a politically autonomous settlement
d) It is a temporary settlement

12) The natural factors that can force populations to move to cities ____
a) Economic opportunities
b) Environmental and climatic changes
c) Historical events
d) Urban planning

13) What is a major cause of urbanization related to employment?
a) Rural-urban transformation b) Increased agricultural jobs
c) Decline in industrial jobs d) Higher birth rates

14) What is a potential risk associated with urban growth?
a) Lower crime rates
b) Higher chances of disasters and resource loss
c) Improved infrastructure
d) Increased agricultural output

Duration: 30 Minutes Marks:14

Q.1 Choose the correct answer: 14

1) Planning is considered _____ with innovation in entrepreneurship.
a) Compatible b) Irrelevant
c) Incompatible d) Essential

2) Which of the following strategies helps in introducing innovation?
a) Routine planning b) Budget allocation
c) Market differentiation d) Employee orientation

3) The need for achievement in entrepreneurship is best described by: ____
a) Motivation to make profits
b) Desire to be famous
c) Inner urge to achieve goals
d) External rewards

4) nAch is related to: _____
a) Financial success b) Need for Achievement
c) National Achievement d) None of the above

5) Continuous learning in entrepreneurship implies: _____
a) Attending more meetings b) Regular assessments
c) Lifelong updating of skills d) Starting multiple businesses

6) Which of the following best defines international entrepreneurship?
a) Export only business b) Domestic expansion
c) Global business ventures d) Outsourcing work

7) Strategic issues in international entrepreneurship include: _____
a) Tax filing b) Product returns
c) Market entry, alliances, IP d) Daily operations

8) Ethics in international entrepreneurship requires: _____
a) Hiding losses b) Transparency and fair trade
c) Higher taxes d) None of the above

9) Problem identification involves: _____
a) Avoiding issues b) Recognizing the root cause
c) Hiring a manager d) Launching new products

10) Who is considered the father of modern entrepreneurship theory?
a) Peter Drucker b) Joseph Schumpeter
c) Steve Jobs d) Elon Musk

11) Which of the following is not an entrepreneurial competency?
a) Innovation b) Risk taking
c) Delegation d) Procrastination

12) Purposeful innovation aims to: _____
a) Copy existing products b) Increase production only
c) Create customer value d) Avoid competition

13) Which of the following is not among Drucker's 7 sources of innovation?
a) Unexpected occurrences b) Industry trends
c) Incongruities d) Demographics

14) The innovation process starts with: _____
a) Commercialization b) Brainstorming
c) Idea generation d) Market research

Seat No.		Set	S

S. Y. (B. Tech) (Sem-II) (New) (CBCS) Examination: March/April-2025
CIVIL ENGINEERING
Managing Innovation and Entrepreneurship (CIVHON-02A)

Day & Date: Monday, 09-June-2025 Max. Marks: 56
Time: 10:00 AM To 01:00 PM

Instructions: 1) All questions are compulsory.
2) Figures to the right indicate full marks.
3) Use of non-programmable calculators is allowed.

Section – I

Q.2 All questions are compulsory.

a) Explain the evolution of entrepreneurship from economic theory. **06**
b) Define innovation and explain any two sources of innovation. **04**

Q.3 Solve any three questions.

a) Describe the key competencies required for successful entrepreneurship. **06**
b) Explain the shift in the economy and its impact on innovation. **06**
c) Explain the role of strategy in introducing innovation in a company. **06**
d) What are the challenges in combining planning with innovation? **06**
e) Illustrate with examples how innovation and entrepreneurship go hand in hand. **06**

Section – II

Q.4 All questions are compulsory.

a) Explain the concept of entrepreneurial motivation with the help of the nAch story. **06**
b) Write a short note on the need for continuous learning in entrepreneurship. **04**

Q.5 Solve any three questions.

a) Discuss the nature and concepts of international entrepreneurship. **06**
b) What are the ethical considerations in international entrepreneurship? **06**
c) Explain the importance of innovation in problem-solving. **06**
d) How does diversification contribute to entrepreneurial growth? **06**
e) Illustrate the process of problem identification with a suitable example. **06**

Planning and Design of Rural Roads (CIVHON-02B)

Day & Date: Monday, 09-06-2025 Max. Marks: 70
Time: 10:00 AM To 01:00 PM

Instructions: 1) Q. No. 1 is compulsory. It should be solved in the first 30 minutes in Answer Book Page no 03 (Starting page of the Answer Book). Each question carries one mark.
2) Don't forget to Mention question paper set (P/Q/R/S) on top of page.
3) Figures to the right indicates full marks.
4) Assume suitable data wherever needed & mention it clearly.
5) Draw neat sketches wherever necessary.

MCQ/Objective Type Questions

Duration: 30 Minutes Marks:14

Q.1 Choose the correct Answer. 14

1) Intermediate sight distance is defined as the stopping sight distance.
a) Three time b) one time
c) Twice d) Four time

2) Transition curve is provided at both ends of _____ Curve.
a) Horizontal b) vertical
c) widening d) None of the above

3) What is the Side slope (H: V) for rural Roads when the condition is Embankment in silty/sandy/gravelly soil?
a) 2.5:1 to 3:1 b) 2:1
c) 1:1 to 0.5:1 d) 1/12:1 to 1/16:1

4) The required value of camber is dependent on the type of and rainfall.
a) Pavement b) Embankment
c) Rural d) None of these

5) The maximum super elevation on hill roads should not exceed ____
a) 7% b) 8%
c) 9% d) 10%

6) The type of transition Curve that is generally provided on hill road is _____.
a) Circular b) Cubic parabola
c) Lemniscate spiral d) Spiral

7) The Type of transition Curve that is generally provided on hill road is ____

a) Circular
b) Cubic parabola
c) Lemniscate spiral
d) Spiral

8) The sight distance is measured along the middle of the _____.

a) Inner lane
b) Outer lane
c) Middle lane
d) None of these

9) Minimum thickness of the base of a flexible pavement is _____.

a) 15 cm
b) 20 cm
c) 10 cm
d) 5 cm

10) Which of the following it NOT a critical parameter to control cracking and rutting in a flexible pavement?

a) Tensile strain near the surface close to the edge of the wheel
b) Vertical sub-base strain
c) Vertical subgrade strain
d) Tensile strain at the bottom of bituminous layer

11) What is normally the primary objective of a Self Help Group (SHG)?

a) To provide micro-finance to groups
b) To improve technology of farming
c) To provide high quality seeds
d) To provide education needs

12) The interface treatment provided to plug in the voids of porous surfaces and to bond loose particles in bituminous pavements is called: ____

a) Tack coat
b) Prime coat
c) Seal coat
d) Surface dressing

13) Causeways are the type of _____.

a) Cross drainage structure
b) side drains
c) Sub-surface drainage structure
d) Jelly drains

14) The see page flow is present in _____.

a) Surface drainage
b) Sub surface drainage
c) Camber
d) Cross slope

MCQ/Objective Type Questions

Duration: 30 Minutes Marks:14

Q.1 Choose the correct Answer. **14**

1) The ideal location for a railway bridge is: _____
a) Upstream of river bends
b) On a sharp meander
c) On a straight reach of the river
d) In a delta region

2) Hydrological investigation includes _____
a) Soil classification b) River cross-sectional survey
c) Flood discharge estimation d) Construction methods

3) What does the term "setting out" in bridge construction refer to?
a) Pouring concrete
b) Fixing bearings
c) Establishing the position of piers and abutments
d) Painting steel girders

4) Which structure transfers loads from superstructure to the foundation?
a) Deck b) Bearing
c) Pier d) Handrail

5) Which component of a girder primarily resists bending moments?
a) Web b) Bottom flange
c) Top flange d) Both b and c

6) Biaxial bending in gantry girders occurs due to _____
a) Wind pressure b) Unsymmetrical loading
c) Eccentric crane loads d) Torsional twist

7) During bridge inspection, a crack width of more than 0.3 mm in concrete indicates: _____

a) Normal condition
b) Minor damage
c) Moderate damage
d) Severe distress

8) Which of the following is a non-destructive testing method used during bridge inspection?

a) Core cutting
b) Rebound hammer
c) Slump test
d) Cube crushing

9) Which test is not directly related to compaction control in embankments?

a) Sand replacement test
b) Nuclear density test
c) Dynamic cone penetrometer test
d) Slump test

10) What does a structural drawing typically include?

a) Plumbing details
b) Load calculations
c) Reinforcement details
d) Electrical layout

11) What is the typical material used for superstructure of road over bridges?

a) Timber
b) Aluminum
c) Steel or RCC
d) Plastic

12) Which document formally invites contractors to submit bids for a project?

a) Request for Information (RFI)
b) Notice Inviting Tender (NIT)
c) Letter of Intent (LOI)
d) Memorandum of Understanding (MoU)

13) Arbitration in construction contracts is preferred over litigation because: _____

a) It is more expensive
b) It is a public process
c) It offers a faster resolution
d) It always favours the contractor

14) FIDIC conditions of contract are primarily used for _____

a) Domestic residential projects
b) International construction projects
c) Small-scale renovations
d) Agricultural land leases

S.Y. (B. Tech.) (Sem-II) (New) (CBCS) Examination: March/April-2025
CIVIL ENGINEERING
Elevated structures in Railway (CIVHON-02D)

Day & Date: Monday, 09-June-2025 Max. Marks: 56
Time: 10:00 AM To 01:00 PM

Instructions: 1) Question no. 2 is compulsory in section I, and solve any two questions from the remaining. Question no. 6 is compulsory in section II, and solve any two questions from the remaining
2) Figures to the right indicate full marks.
3) Assume suitable data wherever necessary and mention it clearly.

Section – I

Q.2	**a)**	Give the classification of rivers based on topography and explain any two types.	**05**
	b)	Compare the Driven piles and Cast-in-situ piles.	**05**
Q.3	**a)**	Explain how excavation for pier foundation in dry condition is done.	**05**
	b)	Trace the evolution of loading standards in Indian railway bridge design.	**04**
Q.4	**a)**	Describe the various components of a girder used in steel railway bridges.	**05**
	b)	What hydrological data is required for bridge site investigation?	**04**
Q.5	**a)**	Explain types of Pile foundation based on the method of construction.	**05**
	b)	Explain various types of Girder bridges with neat sketch.	**04**

Section – II

Q.6	**a)**	Write short note on Abutments and Piers inspection.	**05**
	b)	Enlist various tests of compaction. Explain any two.	**05**
Q.7	**a)**	Define approaches in Railway Bridge. Discuss their components with neat labelling.	**05**
	b)	What is tender document? Enlist documents to be attached with tender document.	**04**
Q.8	**a)**	What are Special Conditions of Contract (SCC)? Mention its key elements.	**04**
	b)	Write note on maintenance of Steel Girder bridges.	**05**
Q.9	**a)**	Write a note on Arbitration.	**04**
	b)	Define a railway embankment. Give its objectives.	**05**

Elevated structures in Railway (CIVHON-02D)

Day & Date: Monday, 09-June-2025 Max. Marks: 70
Time: 10:00 AM To 01:00 PM

Instructions: 1) Q. No. 1 is compulsory. It should be solved in the first 30 minutes in Answer Book Page no 03 (Starting page of the Answer Book). Each question carries one mark.
2) Don't forget to Mention question paper set (P/Q/R/S) on top of page.
3) Figures to the right indicates full marks.
4) Assume suitable data if necessary and state it clearly.

MCQ/Objective Type Questions

Duration: 30 Minutes Marks:14

Q.1 Choose the correct Answer. 14

1) Which of the following is a non-destructive testing method used during bridge inspection?
a) Core cutting b) Rebound hammer
c) Slump test d) Cube crushing

2) Which test is not directly related to compaction control in embankments?
a) Sand replacement test
b) Nuclear density test
c) Dynamic cone penetrometer test
d) Slump test

3) What does a structural drawing typically include?
a) Plumbing details b) Load calculations
c) Reinforcement details d) Electrical layout

4) What is the typical material used for superstructure of road over bridges?
a) Timber b) Aluminum
c) Steel or RCC d) Plastic

5) Which document formally invites contractors to submit bids for a project?
a) Request for Information (RFI)
b) Notice Inviting Tender (NIT)
c) Letter of Intent (LOI)
d) Memorandum of Understanding (MoU)

6) Arbitration in construction contracts is preferred over litigation because: _____
a) It is more expensive
b) It is a public process
c) It offers a faster resolution
d) It always favours the contractor

7) FIDIC conditions of contract are primarily used for _____
a) Domestic residential projects
b) International construction projects
c) Small-scale renovations
d) Agricultural land leases

8) The ideal location for a railway bridge is: _____
a) Upstream of river bends
b) On a sharp meander
c) On a straight reach of the river
d) In a delta region

9) Hydrological investigation includes _____
a) Soil classification
b) River cross-sectional survey
c) Flood discharge estimation
d) Construction methods

10) What does the term "setting out" in bridge construction refer to?
a) Pouring concrete
b) Fixing bearings
c) Establishing the position of piers and abutments
d) Painting steel girders

11) Which structure transfers loads from superstructure to the foundation?
a) Deck
b) Bearing
c) Pier
d) Handrail

12) Which component of a girder primarily resists bending moments?
a) Web
b) Bottom flange
c) Top flange
d) Both b and c

13) Biaxial bending in gantry girders occurs due to _____
a) Wind pressure
b) Unsymmetrical loading
c) Eccentric crane loads
d) Torsional twist

14) During bridge inspection, a crack width of more than 0.3 mm in concrete indicates: _____
a) Normal condition

MCQ/Objective Type Questions

Duration: 30 Minutes Marks:14

Q.1 Choose the correct alternatives from the alternatives. 14

1) Total water requirement of a city is generally assessed on the basis of _____
a) Maximum hourly demand
b) Maximum daily demand + fire demand
c) Average daily demand + fire demand
d) Greater of (a) and (b)

2) The suitable method for forecasting population for a young and a rapidly developing city is _____
a) Arithmetic mean method
b) Geometric mean method
c) Comparative graphical method
d) None of these

3) As compared to the geometrical increase method of forecasting population, the arithmetical increase method gives _____
a) lesser value
b) higher value
c) equal value
d) may vary, as it may depend on the population figures.

4) The settling velocity of inorganic particles in a sedimentation tank of a water treatment plant is governed by _____
a) Darcy law b) Stokes law
c) Dupuits law d) None

5) Per capita water demand is defined as the litres of water consumed daily by each person. Naturally it has to be some average value, over a period of time. Over how much period the averaging is done here _____

a) 24 hours b) One years
c) 10 years d) 35 years

6) The multiplying factor, as applied to obtain the maximum daily water demand, in relation to the average i.e. per capita daily demand, i.e.

a) 1.5 b) 1.8
c) 2.0 d) 2.7

7) Which source of water, among the following, is not a surface source?

a) River b) Well
c) Lake d) Ocean

8) The economical diameter of pumping mains is given by formula _____

a) $D = 0.97$ to $01.22\sqrt{Q}$ b) $Q = 0.97\sqrt{D}$
c) $V = \frac{Q}{A}$ d) None

9) Head loss due to friction in pipe by Darcy's equation is given by formula _____

a) $V = 0.85\,CHR^{0.63}$ b) $H_F = \frac{n^2V^2L}{R^{413}}S$
c) $H_F = \frac{F^1LV^2}{2gd}$ d) None

10) For finding chloride content from water sample. The indicator used for titration is _____

a) Methyl orange b) Potassium chromate
c) Ethyl dimen tetra acid d) Phenolphthalein indicator

11) Cleaning of slow sand filter is done by _____

a) back washing b) Scraping and removal of sand
c) Any one of above d) None

12) Air binding phenomenon in rapid sand filters may occurs due to _____

a) Excessive negative pressure b) mud ball formation
c) higher turbidity in the effluent d) low temperature

13) The suitable layout for a water supply distribution, for an irregularly grown town is, _____

a) ring system b) grid iron system
c) dead end system d) radial system

14) The chances for contamination of water are less in ____

a) continuous system b) intermittent system
c) combined system d) None

Day & Date: Monday, 26-05-2025 Max. Marks: 70
Time: 10:00 AM To 01:00 PM

Instructions: 1) In Section - I Q.No. 2 is compulsory and solve any TWO Questions from remaining questions (Q. No.3, 4 and 5)
2) In Section - II, Q.No. 6 is compulsory and solve any TWO Questions from (Q. No.7, 8 and 9)
3) Figures to the right indicates full marks.
4) Use of non-Programmable calculator is allowed.

Section – I

Q.2 Attempt the following **06**

a) Find the population on 2000 by Geometrical increase method

Year	1930	1940	1950	1960	1970
Population	25000	28000	34000	42000	47000

b) Explain the factors affecting per capita demand. **04**

Q.3 Attempt the following

a) Explain with neat sketch various sources of water supply. **04**

b) Settling tank is designed for an overflow rate of 4000 lit/m^2/hour. What percentage of particles of diameter a) 0.05 mm b) 0.02 mm will be removed in this tank at 10°C. **05**

Q.4 Attempt the following

a) Explain with sketch Tube settler. **04**

b) Find the setting velocity of discrete particle in water under conditions when Reynolds number is less than 0.5 .The diameter and specific gravity of particle is $5x10^{-3}$ cm & 2.65 respectively. Water temp is 20° c & kinematic viscosity of water at 20° c = $1.01x10^{-2}$ cm^2/sec. **05**

Q.5 Attempt the following

a) Draw layout of water treatment plant and explain each unit. **05**

b) Explain the various forces acting on pressure pipes. **04**

Section – II

Q.6 Attempt the following

a) Explain with neat sketch construction and working of rapid sand Filter. **06**

b) Explain with graph Break point chlorination. **04**

Q.7 Attempt the following

a) Enlist layout of water distribution system and explain with neat sketch Dead end system. **05**

b) Write short note on Reverse osmosis. **04**

Q.8 Attempt the following

a) Explain with sketch Desalination by Electro dialysis method. **04**

b) A town with a population of 1 million has a continuous water supply. Average supply is 270 lpcd, the water being supplied by direct pumping. The total supply of 270 lpcd is phased as follows. **05**

Time	lpc
5 AM to 11 AM	90
11 AM to 3 PM	54
3 PM to 9 PM	81
9 PM to 12 midnight	27
12 Midnight to 5 AM	18

Water is supplied from treatment plant at a uniform rate of 11.25 million litres per hour, for all 24 hours. Find the capacity of reservoir required for distribution of water. Assume no loss or drawl from trunk main.

Q.9 Write short note on (Any Three) **09**

a) Jar test

b) Maintenance of distribution system

c) Corrosion and its control

d) Thrust block design

e) River intake

a) Arithmetic mean method
b) Geometric mean method
c) Comparative graphical method
d) None of these

10) As compared to the geometrical increase method of forecasting population, the arithmetical increase method gives _____
a) lesser value
b) higher value
c) equal value
d) may vary, as it may depend on the population figures.

11) The settling velocity of inorganic particles in a sedimentation tank of a water treatment plant is governed by _____
a) Darcy law b) Stokes law
c) Dupuits law d) None

12) Per capita water demand is defined as the litres of water consumed daily by each person. Naturally it has to be some average value, over a period of time. Over how much period the averaging is done here _____
a) 24 hours b) One years
c) 10 years d) 35 years

13) The multiplying factor, as applied to obtain the maximum daily water demand, in relation to the average i.e. per capita daily demand, i.e.
a) 1.5 b) 1.8
c) 2.0 d) 2.7

14) Which source of water, among the following, is not a surface source?
a) River b) Well
c) Lake d) Ocean

Set Q

S.Y. (B.Tech.) (Sem - II) (New/Old) (CBCS) Examination: March/April-2025
CIVIL ENGINEERING
Environmental Engineering - I (BTN01401)

Day & Date: Monday, 26-05-2025 Max. Marks: 70
Time: 10:00 AM To 01:00 PM

Instructions: 1) In Section - I Q.No. 2 is compulsory and solve any TWO Questions from remaining questions (Q. No.3, 4 and 5)
2) In Section - II, Q.No. 6 is compulsory and solve any TWO Questions from (Q. No.7, 8 and 9)
3) Figures to the right indicates full marks.
4) Use of non-Programmable calculator is allowed.

Section – I

Q.2 Attempt the following **06**

a) Find the population on 2000 by Geometrical increase method

Year	1930	1940	1950	1960	1970
Population	25000	28000	34000	42000	47000

b) Explain the factors affecting per capita demand. **04**

Q.3 Attempt the following

a) Explain with neat sketch various sources of water supply. **04**

b) Settling tank is designed for an overflow rate of 4000 lit/m^2/hour. **05**
What percentage of particles of diameter a) 0.05 mm b) 0.02 mm will be removed in this tank at 10°C.

Q.4 Attempt the following

a) Explain with sketch Tube settler. **04**

b) Find the setting velocity of discrete particle in water under conditions when Reynolds number is less than 0.5 .The diameter and specific gravity of particle is $5x10^{-3}$ cm & 2.65 respectively. Water temp is 20° c & kinematic viscosity of water at 20° c = $1.01x10^{-2}$ cm^2/sec. **05**

Q.5 Attempt the following

a) Draw layout of water treatment plant and explain each unit. **05**

b) Explain the various forces acting on pressure pipes. **04**

Section – II

Q.6 Attempt the following

a) Explain with neat sketch construction and working of rapid sand Filter. **06**

b) Explain with graph Break point chlorination. **04**

Q.7 Attempt the following

a) Enlist layout of water distribution system and explain with neat sketch Dead end system. **05**

b) Write short note on Reverse osmosis. **04**

Q.8 Attempt the following

a) Explain with sketch Desalination by Electro dialysis method. **04**

b) A town with a population of 1 million has a continuous water supply. Average supply is 270 lpcd, the water being supplied by direct pumping. The total supply of 270 lpcd is phased as follows. **05**

Time	lpc
5 AM to 11 AM	90
11 AM to 3 PM	54
3 PM to 9 PM	81
9 PM to 12 midnight	27
12 Midnight to 5 AM	18

Water is supplied from treatment plant at a uniform rate of 11.25 million litres per hour, for all 24 hours. Find the capacity of reservoir required for distribution of water. Assume no loss or drawl from trunk main.

Q.9 Write short note on (Any Three) **09**

a) Jar test

b) Maintenance of distribution system

c) Corrosion and its control

d) Thrust block design

e) River intake

CIVIL ENGINEERING
Environmental Engineering - I (BTN01401)

Day & Date: Monday, 26-05-2025 Max. Marks: 70
Time: 10:00 AM To 01:00 PM

Instructions: 1) Q. No. 1 is compulsory. It should be solved in the first 30 minutes in Answer Book Page no 03 (Starting page of the Answer Book). Each question carries one mark.
2) Don't forget to Mention question paper set (P/Q/R/S) on top of page.
3) Figures to the right indicates full marks.
4) Use of non- programmable calculator is allowed.

MCQ/Objective Type Questions

Duration: 30 Minutes Marks:14

Q.1 Choose the correct alternatives from the alternatives. 14

1) Cleaning of slow sand filter is done by _____
a) back washing b) Scraping and removal of sand
c) Any one of above d) None

2) Air binding phenomenon in rapid sand filters may occurs due to _____
a) Excessive negative pressure b) mud ball formation
c) higher turbidity in the effluent d) low temperature

3) The suitable layout for a water supply distribution, for an irregularly grown town is, _____
a) ring system b) grid iron system
c) dead end system d) radial system

4) The chances for contamination of water are less in ____
a) continuous system b) intermittent system
c) combined system d) None

5) Total water requirement of a city is generally assessed on the basis of _____
a) Maximum hourly demand
b) Maximum daily demand + fire demand
c) Average daily demand + fire demand
d) Greater of (a) and (b)

6) The suitable method for forecasting population for a young and a rapidly developing city is _____
a) Arithmetic mean method
b) Geometric mean method
c) Comparative graphical method
d) None of these

7) As compared to the geometrical increase method of forecasting population, the arithmetical increase method gives _____
a) lesser value
b) higher value
c) equal value
d) may vary, as it may depend on the population figures.

8) The settling velocity of inorganic particles in a sedimentation tank of a water treatment plant is governed by _____
a) Darcy law b) Stokes law
c) Dupuits law d) None

9) Per capita water demand is defined as the litres of water consumed daily by each person. Naturally it has to be some average value, over a period of time. Over how much period the averaging is done here _____
a) 24 hours b) One years
c) 10 years d) 35 years

10) The multiplying factor, as applied to obtain the maximum daily water demand, in relation to the average i.e. per capita daily demand, i.e.
a) 1.5 b) 1.8
c) 2.0 d) 2.7

11) Which source of water, among the following, is not a surface source?
a) River b) Well
c) Lake d) Ocean

12) The economical diameter of pumping mains is given by formula _____
a) $D = 0.97$ to $01.22\sqrt{Q}$ b) $Q = 0.97\sqrt{D}$
c) $V = \frac{Q}{A}$ d) None

13) Head loss due to friction in pipe by Darcy's equation is given by formula _____
a) $V = 0.85\, CHR^{0.63}$ b) $H_F = \frac{n^2V^2L}{R^{413}}S$
c) $H_F = \frac{F^1LV^2}{2gd}$ d) None

14) For finding chloride content from water sample. The indicator used for titration is _____
a) Methyl orange b) Potassium chromate
c) Ethyl dimen tetra acid d) Phenolphthalein indicator

4) Assume suitable data whenever needed and mention it clearly.

MCQ/Objective Type Questions

Duration: 20 Minutes Marks:07

Q.1 Choose the correct alternative from the options given below. **07**

1) Combining two or more plots as a single plot is called _____.
a) Amalgamation b) Frontage
c) Bifurcation d) Building setback

2) For kitchen cum dining room the minimum area should be _____.
a) 5 sq. m b) 9.5 sq. m
c) 6 sq. m d) 15 sq. m

3) For built-up area calculations _____ is drawn on the building permission drawing.
a) Terrace plan b) Plan
c) Site plan d) Block plan

4) If object is on picture plane, then the size perspective will be _____.
a) enlarged b) reduced
c) remains same d) all of the above

5) For Bedroom Aspect it needs at _____.
a) E-aspect b) S-aspect
c) SW-aspect d) W-aspect

6) The green building process can be applied to which of these?
a) buildings b) materials
c) interiors d) all of above

7) The earthing wire should have _____.
a) high resistance b) medium resistance
c) negligible resistance d) any of the above

S. Y. (B. Tech) (Sem - II) (New/Old) (CBCS) Examination: March/April-2025
CIVIL ENGINEERING
Building Planning & Design (BTN01402)

Day & Date: Wednesday 28-05-2025 Max. Marks: 28
Time: 10:00 AM To 01:00 PM

Instructions: 1) All questions are compulsory.
2) Figures to the right indicate full marks.
3) Assume suitable data whenever needed and mention it clearly.

Section – I

Q.2 Attempt the following. (Any Two) **08**

a) Enlist and explain the in brief "Principles of Building Planning" with neat sketch.
b) Discuss site selection criteria for a residential building.
c) What is Orientation? Explain with sketch about "Orientations of building for various part of India on basis of climatic conditions."
d) Write a note on "Occupancy Certificate."

Q.3 Attempt the following. (Any One) **06**

a) What are the significances of various certificates in building permission?
b) Explain the importance of AUTOCAD and describe any four commands of CAD.

Section – II

Q.4 Attempt the following. (Any Two) **08**

a) What is "Green Building"? Explain in brief.
b) Explain Concept and Design of Rain Water Harvesting.
c) Write a note on "Low-cost Housing"
d) Explain in brief "types of fire load."

Q.5 Attempt the following. (Any One) **06**

a) Explain reverberation and reverberation time using Sabine's formula.
b) Enlist and explain in short materials available for "Sound Insulation."

Day & Date: Friday 30-05-2025 Max. Marks: 70
Time: 10:00 AM To 01:00 PM

Instructions: 1) Q. No. 1 is compulsory. It should be solved in the first 30 minutes in Answer Book Page no 03 (Starting page of the Answer Book). Each question carries one mark.
2) Don't forget to Mention question paper set (P/Q/R/S) on top of page.
3) Figures to the right indicates full marks.
4) Make suitable assumptions (if necessary and state them clearly).

MCQ/Objective Type Questions

Duration: 30 Minutes Marks:14

Q.1 Choose the correct Answer. 14

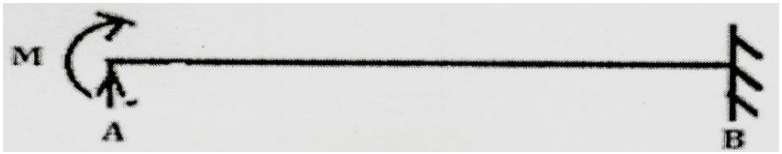
1) A three hinged parabolic arch is subjected to load w at distance L/4 from left support. The rise of the crown is 4m, span is 20 m & w is 80 kN. The horizontal thrust is _____.
a) 40 KN b) 25 KN
c) 80 KN d) 50 KN

2) The size of stiffness matrix equals to _____.
a) DSI b) DKI
c) DSI+DKI d) DSI-DKI

3) Which one of the fallowing doesn't fall under category of force method?
a) Consistent deformation method
b) Flexibility method
c) Stiffness method
d) Energy method

4) Three hinged arch is _____ structure.
a) Determinate b) Indeterminate
c) Both a & b d) All of the above

5) Carryover Moment at end B due to moment M applied at end A for the given beam is _____.



a) +M b) -M
c) +M/2 d) -M/2

6) In moment distribution method, the sum of distribution factors of all the members meeting at any joint is always _____.

a) Zero b) 1
c) Greater than 1 d) less than 1

7) Degree of kinematic indeterminacy of a pin-jointed plane frame is given by _____.

a) 2j – r b) j – 2r
c) 3j – r d) 2j + r

8) Calculate the self-weight of rectangular dam 22 m high and 8 m wide. It contains water up to the height of 20 m. Consider the specific weight of masonary as 250 kN/m^3

a) 3560 kN b) 4400 kN
c) 5432 kN d) 5680 kN

9) Euler's critical load for a column of length 1, moment of inertia 1, modulus of elasticity E and both ends are hinged is given by _____.

a) $\Pi^2 \mathrm{EI}/l^2$ b) $\Pi^2 \mathrm{EI}/4l^2$
c) $\Pi^2 \mathrm{EI}/2l^2$ d) $4\Pi^2 \mathrm{EI}/l^2$

10) An electric pole is 6.5 m high from the ground level. Its effective length for design purpose will be _____.

a) 6.5 m b) 3.25 m
c) 13.0 m d) 12.0 m

11) Bending moment at any section in conjugate beam gives _____ in actual beam.

a) slope b) curvature
c) deflection d) bending moment

12) Deflection of a simply supported beam when subjected to central point load is _____.

a) Wl/16 EI b) Wl^2/16 EI
c) Wl^3/48 EI d) $5Wl^4$/384 EI

13) The central part in the cross section of column joining the points of e-limit such that, it loads acts within this part, there will be no tension induced in the column. This central part is known as _____ of the section.

a) Core b) Eccentricity
c) Kernel d) Both a and c

14) The Eccentric Vertical Load generates _____.

a) Only Direct Stress
b) Only Bending Stress
c) Combined Bending and Direct Stress
d) Shear Stress

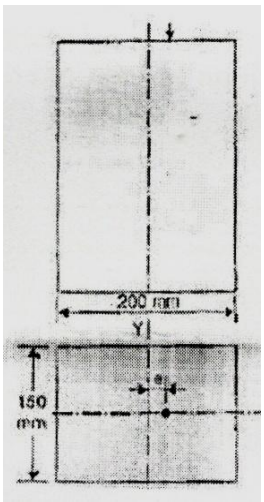
Day & Date: Friday 30-05-2025 Max. Marks: 56
Time: 10:00 AM To 01:00 PM

Instructions: 1) Q. No. 2 and Q. No. 6 are compulsory.
2) Slove any two from Q. No. 3 to Q. No. 5 and Q. No.7 to Q. No. 9 questions from each section.
3) Non programmable calculator are allowed.
4) Draw neat sketch's where required and Assume suitable data if required and state it clearly.

Section – I

Q.2 **a)** Find the kernel of circular section of diameter 'd'. **03**

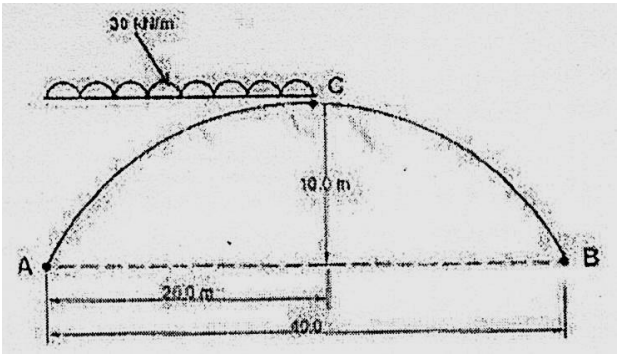
b) A rectangular column of width 200 mm and thickness 150 mm is as shown in fig. -1. The minimum stresses on the section is given zero then find the eccentricity of the point load 240 kN acting on the rectangular column. Also calculate the corresponding maximum stress on the section. **07**



Q.3 Hollow C.I Column whose outside diameter is 200 mm has a thickness of 20mm. It is 4.5m Long and is fixed at both end. Calculate safe load by Rankine's formula using a factor of safety 4. Calculate Eulers and Rankine's Critical Load. For C.I take $\sigma c = 550\ \mathrm{N/mm^2}$ and $\alpha = 1/1600$ and $\mathrm{E} = 8 \times 10^4\ \mathrm{N/mm^2}$. **09**

Q.4 Determine the maximum and minimum stresses at the base of a hollow circular chimney of height 20 m with external diameter 4 m and internal diameter 2 m. The chimney is subjected to a horizontal wind pressure of intensity 1 kN/m^2. The specific weight of the material of chimney is 22 kN/m^3. **09**

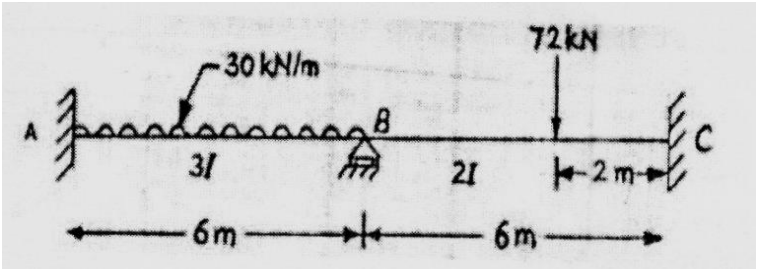
Q.5 A three hinged arch has a span of 40 m & a rise of 10 m carries udl of 30 kN/m on the left half of its span. Determine the horizontal thrust and support reactions. **09**



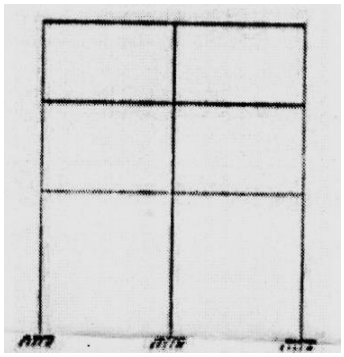
Section – II

Q.6 **a)** Explain the difference between force method and displacement methods. **03**

b) Analyze the continuous beam as shown in fig. by moment distribution method and draw bending moment and shear force diagrams. **07**



Q.7 **a)** Determine the degree of static and kinematic indeterminacy of the frame shown in fig. **02**



b) Analyze the continuous beam as shown in fig. by flexibility method. Take EI constant throughout. **07**

Engineering Geology (BTN01405)

Day & Date: Tuesday, 03-June-2025 Max. Marks: 70
Time: 10:00 AM To 01:00 PM

Instructions: 1) Q. No. 1 is compulsory. It should be solved in the first 30 minutes in Answer Book Page no 03 (Starting page of the Answer Book). Each question carries one mark.
2) Don't forget to Mention question paper set (P/Q/R/S) on top of page.
3) Figures to the right indicates full marks.
4) Make suitable assumptions (if necessary and state them clearly)
5) Draw neat and labeled diagrams wherever necessary.

MCQ/Objective Type Questions

Duration: 30 Minutes Marks:14

Q.1 Choose the correct answer. **14**

1) Granite is igneous _____ rock
a) plutonic, acidic b) hypabyssal, acidic
c) plutonic, basic d) volcanic, basic

2) Composition of Core of the earth _____
a) Ni and Fe b) Si and Al
c) Fe and Mg d) Si and Mg

3) Which of the following physical feature is formed at interface of river and ocean?
a) river capture b) river terrace
c) rejuvenation d) delta

4) Cross bedding structure is commonly found in _____
a) sandstone b) granite
c) marble d) basalt

5) Which of the following statement is True?
a) Sill - discordant intrusion
b) Laccolith - discordant intrusion
c) Dyke - discordant intrusion
d) Phacolith - discordant intrusion

6) Thermal/ contact metamorphism is due to influence of _____
a) directed pressure b) uniform pressure
c) temperature d) Chemical fluids

7) Biotite mineral has_____
a) Fibrous form, 1 set cleavage
b) Foliated form, 2 set cleavage
c) Foliated form, 1 set cleavage
d) 4 hardness, 4 set cleavage

8) RQD is_____
a) Rock Quantity Designation
b) Rock Quality Designation
c) Rock Quantum Designation
d) Rock Quality Determination

9) Which of the following are main causes of land sliding?
a) Heavy rainfall b) Steep slope
c) Loose rocks d) All the above

10) Which of the following is a direct method of geological investigation?
a) Electric resistivity b) core drilling
c) magnetic d) gravity

11) The most desirable condition for dam is presence of_____
a) upstream dipping beds b) vertical beds
c) Joints d) downstream dipping beds

12) The color of building stone mainly depends upon _____
a) texture b) mineral composition
c) structure d) none of these

13) Which of the following represent Artesian well?
a) perched b) unconfined
c) confined d) all of these

14) High porosity is represented by _____
a) granite b) quartzite
c) compact basalt d) shale

Seat No.		Set	P

S. Y. (B. Tech) (Sem-II) (New/Old) (CBCS) Examination: March/April-2025
CIVIL ENGINEERING
Engineering Geology (BTN01405)

Day & Date: Tuesday, 03-June-2025 Max. Marks: 56
Time: 10:00 AM To 01:00 PM

Instructions: 1) All questions are compulsory.
2) Figures to the right indicate full marks.
3) Make suitable assumptions (if necessary and state them clearly).
4) Draw neat and labeled diagram wherever necessary

Section – I

Q.2	**a)**	Define Fold. Describe Symmetrical and Asymmetrical folds.	**06**
	b)	Define Hardness. Describe Moh's Scale of Hardness of minerals.	**06**
		OR	
Q.3	**a)**	Describe Vesicular and Amygdaloidal structures of igneous rocks.	**06**
	b)	Define Weathering. Describe any two types of chemical weathering.	**06**
Q.4		Explain in detail - Internal Structure of the Earth.	**07**
		OR	
Q.5		Define Unconformity. Explain three types of Unconformities.	**07**
Q.6		**Write notes on (Any Three)**	**09**
	a)	Granulose structure	
	b)	Reverse Fault	
	c)	Types of Lava	
	d)	Luster of Minerals	
	e)	Branches of Geology	

Section – II

Q.7	**a)**	Define aquifer. Describe confined & perched aquifers.	**06**
	b)	Define Landslides. Describe any two types of Landslides.	**06**
		OR	
Q.8	**a)**	What are building stones? Add a note on crushing strength and Porosity of building stones.	**06**
	b)	Define earthquake. Explain characteristics of any two types of seismic waves.	**06**
Q.9		Define Reservoir. Explain desirable and undesirable conditions on inclined beds at reservoir site.	**07**
		OR	
Q.10		Define Dam. Explain dams on Anticline and Syncline folds.	**07**

Q.11 Write note on (Any Three) **09**

a) Granite as a building stone
b) Seismograph
c) Electric resistivity method
d) Silting process
e) Focus and Epicenter of earthquake

3) Figures to the right indicates full marks

MCQ/Objective Type Questions

Duration: 30 Minutes Marks:14

Q.1 Choose the correct Answer. **14**

1) The Particular integral of $(D^3 - D^2)y = x$ is _____.

a) $\frac{x^3}{6} + \frac{x^2}{2}$ b) $\frac{-x^3}{6} + \frac{x^2}{2}$

c) $\frac{-x^3}{6} - \frac{x^2}{2}$ d) $\frac{x^3}{6} - \frac{x^2}{2}$

2) In the interval (0,2) the constant term in the Fourier series of $f(x) = x$ is _____.

a) 0 b) π

c) 1 d) 2

3) $L[e^t t^3]$ is _____.

a) $\frac{6}{(s-1)^4}$ b) $\frac{6}{s(s-1)^4}$

c) $\frac{1}{(s-1)^4}$ d) $\frac{1}{s(s-1)^4}$

4) In a Poisson's distribution such that $P(x = 2) = P(x = 3)$ then the mean of distribution is _____.

a) 2 b) 3

c) 2/3 d) 3/2

5) $L^{-1}\left[\frac{(s^2-1)^2}{s^5}\right]$ is _____.

a) $1 - t^2 + \frac{t^4}{24}$ b) $1 - t^2 + \frac{t^3}{24}$

c) $-1 - t^2 + \frac{t^4}{24}$ d) $-1 + t^2 + \frac{t^4}{24}$

6) The value of correlation coefficient r lies between _____.

a) -1 and 1 b) $-\infty$ and ∞

c) 0 and ∞ d) none of these

7) For binomial distribution the mean is 2 and standard deviation is 1. Hence the value of n is equal to _____.

a) 2 b) 4

c) 3 d) 1

8) Fourier series of $f(x) = x\ in\ (-\pi, \pi)$ will contain _____.

a) No sine term b) No cosine term

c) Both cosine and sine term d) None of these

9) The solution of a partial differential equation $p + q = z$ is _____.

a) $f(xy, y \log z\ ) = 0$ b) $f(x + y, y + \log z\ ) = 0$

c) $f(x - y, y - \log z\ ) = 0$ d) $f(x + y, y - \log z\ ) = 0$

10) The solution of $(D^2 - 4)y = 0$ is _____.

a) $C_1 e^{2x} + C_2 e^{-2x}$

b) 0

c) $(C_1 x + C_2)e^{-2x}$

d) $C_1 e^{2x} + C_2 e^{-2x} + (C_3 \cos 2x + C_4 \sin 2x)$

11) The solution of a partial differential equation $q = e^{-p}$ is _____.

a) $z = ax + by + c$ b) $z = ax + e^{-a}y + c$

c) $z = ax + e^{a}y + c$ d) $z = ax + y^{-b} + c$

12) The solution of a partial differential equation $p + q = z$ is _____.

a) $f(xy, y \log z) = 0$ b) $f(x + y, y + \log z) = 0$

c) $f(x - y, y - \log z) = 0$ d) $f(x + y, y - \log z) = 0$

13) The solution of a partial differential equation $xp + yq = z$ is _____.

a) $f(x^2, y^2) = 0$ b) $f(x, y) = 0$

c) $f(xz, yz) = 0$ d) $f\left(\frac{x}{y}, \frac{y}{z}\right) = 0$

14) The condition for expansion of function in Fourier series are known as _____.

a) Harmonic b) Riemann

c) Periodic d) Dirichlet

Engineering Mathematics - III (BTN01404)

Day & Date: Thursday 05-June-2025 Max. Marks: 56
Time: 10:00 AM To 01:00 PM

Instructions: 1) All questions are compulsory.
2) Figures to the right indicate full marks.

Section – I

Q.2 Solve any THREE of the following. **09**

a) Solve $(D^4 - 16)y = \sin 2x$

b) Solve $x^2 \frac{d^2y}{dx^2} + x\frac{dy}{dx} + y = x^2$

c) Solve $p^2 - q^2 = x - y$

d) Solve $q = z^2p(1 - p^2)$

e) Obtain half range cosine series for $f(x) = x^2$ in $0 < x < 2$.

Q.3 Solve any THREE of the following. **09**

a) Solve $(2x + 5)^2 \frac{d^2y}{dx^2} + (2x + 5)\frac{dy}{dx} = x^3 + x$

b) Obtain the Fourier expansion of $f(x) = 9 - x^2$ in the interval $(-3,3)$

c) Solve $px^2 + qy^2 = z^2$

d) Solve $(D^2 - 4D + 4)y = x^3 + 6x$

e) Obtain the Fourier series of $f(x) = \sin x$ in $(-\pi, \pi)$

Q.4 Solve any TWO of the following. **10**

a) The deflection of a strut with one end built-in and other supported and subjected to end-thrust P satisfies the equation $EI\frac{d^2y}{dx^2} = Py - \frac{1}{2}Wx^2$.
Given that $\frac{dy}{dx} = 0, y = 0$ when $x = 0$.
Prove that $y = \frac{w}{Pn^2}(1 - \cosh nx) + \frac{Wx^2}{2P}$; where $n^2 = \frac{P}{EI}$

b) Obtain the Fourier expansion of $f(x) = \left(\frac{\pi - x}{2}\right)^2$ in the interval $(0,2\pi)$ and $f(x + 2\pi) = f(x)$. Also deduce that

$$\frac{\pi^2}{8} = \frac{1}{1^2} + \frac{1}{3^2} + \frac{1}{5^2} + \frac{1}{7^2} + \cdots$$

c) Use variable separable method to solve $\frac{\partial z}{\partial x} + 4\frac{\partial z}{\partial y} = 0$, given $z(0, y) = 8e^{-3y}$

Section – II

Q.5 Solve any THREE of the following. **09**

a) Find $L\left[\int_0^t te^{-4t}\cos 2t\, dt\right]$

b) Find the inverse Laplace transform of $\frac{1}{2}\log\left(\frac{s^2+2^2}{s^2+3^2}\right)$

c) Fit a first degree curve to the following data

x	1	2	3	4	5
y	14	27	40	55	68

d) Fit a second degree parabola to following data :

x	1	2	3	4	5
y	1250	1400	1650	1950	2300

e) Find the value of k, if $f(x)$ is a probability density function

$$f(x) = \begin{cases} kx^2(1-x^3) & 0 \le x \le 1 \\ 0 & \text{otherwise} \end{cases}$$

Q.6 Solve any THREE of the following. **09**

a) Evaluate $\int_0^\infty \frac{e^{-t}-e^{-3t}}{t}$ by using Laplace transform.

b) Find the inverse using Laplace transform of $\left[\frac{s+29}{(s+4)(s^2+9)}\right]$

c) In a large assignment of electric bulbs, 10% are defective. A random sample of 20 is taken for inspection. Using Binomial distribution, find the probability that:

1) All are good bulbs
2) Exactly three are defective bulbs

d) Fit a poison distribution for following data :

x	0	1	2	3	4
f	123	59	14	3	1

e) For the following data fit a curve of the form $y = ax^b$

x	1	2	3	4	5	6
y	12	9	6	2	11	5

Q.7 Solve any TWO of the following. **10**

a) Use Laplace Transform to solve $\frac{d^2y}{dt^2} - \frac{dy}{dt} - 2y = 20\sin 2t$, where $(0) = 1; y'(0) = 2$

b) The marks of 1000 students in a university are found to be normally distributed with mean 70 and standard deviation 5. Estimate the number of students whose marks will be:

1) Between 60 & 75
2) More than 75

(For SNV, z area under the curve between z = 0 and z = 1 is 0.3413 and between z = 0 and z = 2 is 0.4772)

c) Find the equation of lines of regression and also coefficient of correlation from the following:

x:	57	42	38	42	45	44	40	46	44	43	40
y:	10	26	41	29	27	19	18	19	31	29	33

S. Y. (B. Tech) (Sem-II) (New/Old) (CBCS) Examination: March/April-2025
CIVIL ENGINEERING
Engineering Mathematics - III (BTN01404)

Day & Date: Thursday 05-June-2025 Max. Marks: 70
Time: 10:00 AM To 01:00 PM

Instructions: 1) Q. No. 1 is compulsory. It should be solved in the first 30 minutes in Answer Book Page no 03 (Starting page of the Answer Book). Each question carries one mark.
2) Don't forget to Mention question paper set (P/Q/R/S) on top of page.
3) Figures to the right indicates full marks

MCQ/Objective Type Questions

Duration: 30 Minutes Marks:14

Q.1 Choose the correct Answer. **14**

1) Fourier series of $f(x) = x\ in\ (-\pi, \pi)$ will contain _____.
a) No sine term b) No cosine term
c) Both cosine and sine term d) None of these

2) The solution of a partial differential equation $p + q = z$ is _____.
a) $f(xy, y\log z) = 0$ b) $f(x + y, y + \log z) = 0$
c) $f(x - y, y - \log z) = 0$ d) $f(x + y, y - \log z) = 0$

3) The solution of $(D^2 - 4)y = 0$ is _____.
a) $C_1e^{2x} + C_2e^{-2x}$
b) 0
c) $(C_1x + C_2)e^{-2x}$
d) $C_1e^{2x} + C_2e^{-2x} + (C_3\cos 2x + C_4\sin 2x)$

4) The solution of a partial differential equation $q = e^{-p}$ is _____.
a) $z = ax + by + c$ b) $z = ax + e^{-a}y + c$
c) $z = ax + e^{a}y + c$ d) $z = ax + y^{-b} + c$

5) The solution of a partial differential equation $p + q = z$ is _____.
a) $f(xy, y\log z) = 0$ b) $f(x + y, y + \log z) = 0$
c) $f(x - y, y - \log z) = 0$ d) $f(x + y, y - \log z) = 0$

6) The solution of a partial differential equation $xp + yq = z$ is _____.
a) $f(x^2, y^2) = 0$ b) $f(x, y) = 0$
c) $f(xz, yz) = 0$ d) $f\left(\frac{x}{y}, \frac{y}{z}\right) = 0$

7) The condition for expansion of function in Fourier series are known as _____.
a) Harmonic b) Riemann
c) Periodic d) Dirichlet

8) The Particular integral of $(D^3 - D^2)y = x$ is _____.

a) $\frac{x^3}{6} + \frac{x^2}{2}$ b) $\frac{-x^3}{6} + \frac{x^2}{2}$

c) $\frac{-x^3}{6} - \frac{x^2}{2}$ d) $\frac{x^3}{6} - \frac{x^2}{2}$

9) In the interval (0,2) the constant term in the Fourier series of $f(x) = x$ is _____.

a) 0 b) π

c) 1 d) 2

10) $L[e^t t^3]$ is _____.

a) $\frac{6}{(s-1)^4}$ b) $\frac{6}{s(s-1)^4}$

c) $\frac{1}{(s-1)^4}$ d) $\frac{1}{s(s-1)^4}$

11) In a Poisson's distribution such that $P(x = 2) = P(x = 3)$ then the mean of distribution is _____.

a) 2 b) 3

c) 2/3 d) 3/2

12) $L^{-1}\left[\frac{(s^2-1)^2}{s^5}\right]$ is _____.

a) $1 - t^2 + \frac{t^4}{24}$ b) $1 - t^2 + \frac{t^3}{24}$

c) $-1 - t^2 + \frac{t^4}{24}$ d) $-1 + t^2 + \frac{t^4}{24}$

13) The value of correlation coefficient r lies between _____.

a) -1 and 1 b) $-\infty$ and ∞

c) 0 and ∞ d) none of these

14) For binomial distribution the mean is 2 and standard deviation is 1. Hence the value of n is equal to _____.

a) 2 b) 4

c) 3 d) 1

Set **Q**

S. Y. (B. Tech) (Sem-II) (New/Old) (CBCS) Examination: March/April-2025
CIVIL ENGINEERING
Engineering Mathematics - III (BTN01404)

Day & Date: Thursday 05-June-2025 Max. Marks: 56
Time: 10:00 AM To 01:00 PM

Instructions: 1) All questions are compulsory.
2) Figures to the right indicate full marks.

Section – I

Q.2 Solve any THREE of the following. **09**

a) Solve $(D^4 - 16)y = \sin 2x$

b) Solve $x^2 \frac{d^2y}{dx^2} + x\frac{dy}{dx} + y = x^2$

c) Solve $p^2 - q^2 = x - y$

d) Solve $q = z^2p(1 - p^2)$

e) Obtain half range cosine series for $f(x) = x^2$ in $0 < x < 2$.

Q.3 Solve any THREE of the following. **09**

a) Solve $(2x + 5)^2 \frac{d^2y}{dx^2} + (2x + 5)\frac{dy}{dx} = x^3 + x$

b) Obtain the Fourier expansion of $f(x) = 9 - x^2$ in the interval $(-3,3)$

c) Solve $px^2 + qy^2 = z^2$

d) Solve $(D^2 - 4D + 4)y = x^3 + 6x$

e) Obtain the Fourier series of $f(x) = \sin x$ in $(-\pi, \pi)$

Q.4 Solve any TWO of the following. **10**

a) The deflection of a strut with one end built-in and other supported and subjected to end-thrust P satisfies the equation $EI\frac{d^2y}{dx^2} = Py - \frac{1}{2}Wx^2$.
Given that $\frac{dy}{dx} = 0, y = 0$ when $x = 0$.
Prove that $y = \frac{w}{Pn^2}(1 - \cosh nx) + \frac{Wx^2}{2P}$; where $n^2 = \frac{P}{EI}$

b) Obtain the Fourier expansion of $f(x) = \left(\frac{\pi - x}{2}\right)^2$ in the interval $(0,2\pi)$ and $f(x + 2\pi) = f(x)$. Also deduce that

$$\frac{\pi^2}{8} = \frac{1}{1^2} + \frac{1}{3^2} + \frac{1}{5^2} + \frac{1}{7^2} + \cdots$$

c) Use variable separable method to solve $\frac{\partial z}{\partial x} + 4\frac{\partial z}{\partial y} = 0$, given $z(0, y) = 8e^{-3y}$

Section – II

Q.5 Solve any THREE of the following. **09**

a) Find $L\left[\int_0^t te^{-4t}\cos 2t\,dt\right]$

b) Find the inverse Laplace transform of $\frac{1}{2}\log\left(\frac{s^2+2^2}{s^2+3^2}\right)$

c) Fit a first degree curve to the following data

x	1	2	3	4	5
y	14	27	40	55	68

d) Fit a second degree parabola to following data :

x	1	2	3	4	5
y	1250	1400	1650	1950	2300

e) Find the value of k, if $f(x)$ is a probability density function

$$f(x)=\begin{cases} kx^2(1-x^3) & 0\le x\le 1 \\ 0 & \text{otherwise}\end{cases}$$

Q.6 Solve any THREE of the following. **09**

a) Evaluate $\int_0^\infty \frac{e^{-t}-e^{-3t}}{t}$ by using Laplace transform.

b) Find the inverse using Laplace transform of $\left[\frac{s+29}{(s+4)(s^2+9)}\right]$

c) In a large assignment of electric bulbs, 10% are defective. A random sample of 20 is taken for inspection. Using Binomial distribution, find the probability that:

1) All are good bulbs
2) Exactly three are defective bulbs

d) Fit a poison distribution for following data :

x	0	1	2	3	4
f	123	59	14	3	1

e) For the following data fit a curve of the form $y=ax^b$

x	1	2	3	4	5	6
y	12	9	6	2	11	5

Q.7 Solve any TWO of the following. **10**

a) Use Laplace Transform to solve $\frac{d^2y}{dt^2} - \frac{dy}{dt} - 2y = 20\sin 2t$, where $(0) = 1; y'(0) = 2$

Q.5 Solve any THREE of the following. **09**

a) Find $L\left[\int_0^t te^{-4t}\cos 2t\,dt\right]$

b) Find the inverse Laplace transform of $\frac{1}{2}\log\left(\frac{s^2+2^2}{s^2+3^2}\right)$

c) Fit a first degree curve to the following data

x	1	2	3	4	5
y	14	27	40	55	68

d) Fit a second degree parabola to following data :

x	1	2	3	4	5
y	1250	1400	1650	1950	2300

e) Find the value of k, if $f(x)$ is a probability density function

$$f(x)=\begin{cases} kx^2(1-x^3) & 0\le x\le 1 \\ 0 & \text{otherwise}\end{cases}$$

Q.6 Solve any THREE of the following. **09**

a) Evaluate $\int_0^\infty \frac{e^{-t}-e^{-3t}}{t}$ by using Laplace transform.

b) Find the inverse using Laplace transform of $\left[\frac{s+29}{(s+4)(s^2+9)}\right]$

c) In a large assignment of electric bulbs, 10% are defective. A random sample of 20 is taken for inspection. Using Binomial distribution, find the probability that:

1) All are good bulbs
2) Exactly three are defective bulbs

d) Fit a poison distribution for following data :

x	0	1	2	3	4
f	123	59	14	3	1

e) For the following data fit a curve of the form $y=ax^b$

x	1	2	3	4	5	6
y	12	9	6	2	11	5

Q.7 Solve any TWO of the following. **10**

a) Use Laplace Transform to solve $\frac{d^2y}{dt^2} - \frac{dy}{dt} - 2y = 20\sin 2t$, where $(0) = 1; y'(0) = 2$

b) The marks of 1000 students in a university are found to be normally distributed with mean 70 and standard deviation 5. Estimate the number of students whose marks will be:

1) Between 60 & 75
2) More than 75

(For SNV, z area under the curve between z = 0 and z = 1 is 0.3413 and between z = 0 and z = 2 is 0.4772)

c) Find the equation of lines of regression and also coefficient of correlation from the following:

x:	57	42	38	42	45	44	40	46	44	43	40
y:	10	26	41	29	27	19	18	19	31	29	33

S.Y. (B. Tech.) (Sem-II) (New/Old) (CBCS) Examination: March/April-2025
CIVIL ENGINEERING
Environmental Laws and Impact Assessment (BTN01407)

Day & Date: Monday, 09-June-2025 Max. Marks: 70
Time: 10:00 AM To 01:00 PM

Instructions: 1) Q. No. 1 is compulsory. It should be solved in the first 30 minutes in Answer Book Page no 03 (Starting page of the Answer Book). Each question carries one mark.
2) Don't forget to Mention question paper set (P/Q/R/S) on top of page.
3) Figures to the right indicates full marks.
4) Make suitable assumptions (if necessary and state them clearly).

MCQ/Objective Type Questions

Duration: 30 Minutes Marks:14

Q.1 Choose the correct Answer. 14

1) According to FCA 1980," To monitor the effective implementation of act ____ Committee/authority was constituted at the national level.
a) Compensatory Afforestation
b) Forest Control Committee Management & Planning Authority
c) Wildlife Conversation Authority
d) None of these

2) According to FCA 1980 "The law allows diversion of forest land only for ____ purpose.
i) Drinking Water Projects
ii) Irrigation Project
iii) Railway Line
iv) Mining
a) i and ii b) only i
c) i, ii & iii d) i, ii, iii & iv

3) According to which article it is the duty of the State government to protect and improve the natural environment including forests, lakes, rivers, and wildlife.
a) Article 48A b) Article 51A (clause g)
c) Article 19 (1) g d) Article 21

4) Which article provides the right to any person for their life and personal liberty?
a) Article 48A b) Article 21
c) Article 14 d) Article 51

5) Any person or Organization (either based in India or not) obtains any biological resources occurring in India for its research or commercial Utilization is prohibited in which Act.

a) Wildlife Protection Act
b) Biological Diversity Act
c) Forest Conservation Act
d) Water Act

6) ____ states that "parliament has power to make any law for the whole or any part of the country for implementing any treaty, agreement, or convention with any other country.

a) Article 253
b) Article 51
c) Article 21
d) Article 14

7) When the stock Holm conference was conducted.

a) 5-16 JUNE, 1972
b) 5-16 JULY, 1972
c) 17-30 JUNE, 1972
d) 17-30 JULY, 1972

8) Which of the following article promotes international peace and security.

a) Article 51
b) Article 21
c) Article 253
d) Article 14

9) Central government of India under Article 48A enacted a new legislation called ____.

a) forest conservation Act
b) wildlife protection act
c) Indian forest Act
d) Reserve forest act

10) The argument that the "polluters pay" principal is ineffective in terms of reducing pollution is because is to argued that: ____.

a) Richer consumers can easily afford to pay and so essential pollution will still continue to rise
b) It is unfair to penalize richer consumers who will pay more of the taxes
c) The polluters pay principal cannot solve environmental problems on its own population in hundreds
d) It is impossible to work out the size of the necessary act

11) One person to be nominated by each of participating ____ from amongst the members the members of the local authority functioning within the state concerned.

a) Central Government
b) State Government
c) Local Authorities
d) None of these

12) Environment act ____ gives power to this act by which the country shall endeavor to protect and improve the environment and to safeguard the forests and wildlife.

a) Article 48 A
b) Article 51 A
c) Article 41 A
d) Article 58 A

13) The water act comprises of _____ section which are divided into chapter.

a) 96 section 7 b) 68, 6
c) 64,8 d) 67,7

14) To provide for the prevention control and abatement of the air pollution is known as ____.

a) Air act b) Water act
c) Environment act d) None of these

Day & Date: Monday, 09-June-2025 Max. Marks: 70
Time: 10:00 AM To 01:00 PM

Instructions: 1) Q. No. 1 is compulsory. It should be solved in the first 30 minutes in Answer Book Page no 03 (Starting page of the Answer Book). Each question carries one mark.
2) Don't forget to Mention question paper set (P/Q/R/S) on top of page.
3) Figures to the right indicates full marks.
4) Assume suitable data wherever necessary and mention it clearly.
5) Use of non-programmable calculator is allowed.

MCQ/Objective Type Questions

Duration: 30 Minutes Marks:14

Q.1 Choose the correct Answer. **14**

1) The term "Service design" was coined by ____.
a) Lynn Shostack b) Lynn Mayer
c) Lynn Collins d) None of Above

2) Design service Process variation should be kept to a ____.
a) Maximum b) Minimum
c) Equal d) None of above

3) The Control and inspection of process in service design must be kept to a ____.
a) Minimum b) Maximum
c) Equal d) None of above

4) An integral architecture exhibits certain properties, such as ____.
a) Functional elements of the product are implemented using more than one chunk
b) The interactions between chunks are well defined and are generally fundamental to the primary functions of the product
c) Chunks implement one or a few functional elements in their entirety.
d) None of the above

5) Product architecture is the assignment of the ____ elements of a product to ____ building blocks of the product.
a) Functional; conceptual b) Functional; physical
c) Non-functional; conceptual d) Non-functional; physical

6) The Design for environment is done for ____.
a) Part of product b) Entire product
c) Entire life cycle of product d) Any of the above

7) One of the two categories of interactions between chunks is: _____.
a) Modular b) Designing
c) Geometric d) Incidental

8) Design thinking starts with ____.
a) Empathize b) Prototype
c) Test d) Ideate

9) Design thinking Mindsets: ____.
a) Show, don't tell b) Focus on human values
c) Be mindful of process d) All of above

10) An Interview with a customer to gather data usually takes: ____.
a) One to two hours b) Four to five hours
c) Whole day d) Many days

11) Interactions with customers during the data collection process are commonly documented by: ____.
a) Audio and/or video recording b) Taking notes
c) Taking photography d) All of the above

12) Focus groups are one of the methods for: ____.
a) Interpreting raw data collected from customers
b) Organizing data into a hierarchy of customer needs
c) Gathering raw data from customers
d) Reflecting on the result and the process of identifying customer need.

13) Types of Prototypes: ____.
a) Low Fi Prototype b) Medium Fi Prototype
c) High Fi Prototype d) All of Above

14) In Concept Generation Process, dividing a problem into simpler sub problems is called as ____.
a) Problem Decomposition b) Sub Problem
c) Clarify the Problem d) None of Above

Seat No.		Set	P

S.Y. (B. Tech.) (Sem-II) (New/Old) (CBCS) Examination: March/April-2025
CIVIL ENGINEERING
Design Thinking (BTN01409)

Day & Date: Monday, 09-June-2025 Max. Marks: 56
Time: 10:00 AM To 01:00 PM

Instructions: 1) Question no. 2 is compulsory in section I, and solve any two questions from the remaining questions.
2) Section II is compulsory.
3) Figures to the right indicate full marks.
4) Assume suitable data wherever necessary and mention it clearly.
5) Use of non-programmable calculator is allowed.

Section – I

Q.2 **a)** Enlist the various different mindsets of design thinking. Explain in details. **05**
b) What is meant by the Design Thinking? Difference between the design thinking and traditional approaches. **05**

Q.3 **a)** Enlist various methods of the customer need identification and explain in short. **04**
b) What do you meant by the customer need identification? What are the goals of the customer need? **05**

Q.4 **a)** What do you mean by the Creativity? How to apply the creativity. **04**
b) Explain the term of Low- Fi Prototype. Medium Fi- Prototype, and High Fi-Prototype. **05**

Q.5 **a)** Explain the term of brainstorming with various types of brainstorming. **04**
b) Explain the Concept generation process in the brief with diagram. **05**

Section – II

Q.6 Attempt the following: (Any Two)
a) Explain the term of service design with the principles of service design. **05**
b) How the product development process useful for the service design. **05**
c) Explain the Various tools used in the service Design. **05**

Q.7 Attempt the following: (Any Three) **09**
a) Write a note on: Product Architecture.
b) Financial Analysis and Needs of Financial Analysis
c) Difference between modular product architecture and integral product architecture.
d) Modular product architecture and its types

Q.8 Attempt the following: (Any Three) **09**

a) Explain in short, the 7 Steps involved in design for environment process.

b) Draw & explain in short, the DFE to product life cycle. Also mention the three challenges of product design which are represented in life cycle.

c) Agile Product Development Process.

d) Staged Product Development Process.

MCQ/Objective Type Questions

Duration: 30 Minutes Marks:14

Q.1 Choose the correct Answer. **14**

1) Hazards and Disasters are mainly classified as ____.
a) Physical and chemical b) Natural and human-induced
c) Physical and Human d) Social and cultural

2) A hazard is a situation where there is ____.
a) Threat of natural calamity
b) Threat to property and lives from calamities
c) Threat for consequences of disaster
d) All of the above

3) A Disaster is an event arising out of ____.
a) Result of hazard event b) Causes of hazard event
c) Causes of disaster events d) All of the above

4) The typical examples of man-made disasters are____.
a) Chemical explosion b) Leakage of toxic waste
c) War and civil strife d) All of the above

5) What are the consequences of the disaster on a society?
a) Loss of life b) Damage to property
c) Environmental Damages d) All of the above

6) The scientific study of earthquakes is called ____.
a) Seismograph b) Seismology
c) Both a and b d) None of the above

7) What is the name of the instrument used for measuring earthquake intensity?
a) Modified Mercalli Scale b) Metrological scale
c) Vernier scale d) Barometer

8) The primary result of earthquakes is ____.
   a) Building and bridge collapsed
   b) Rapture of water and gas pipelines
   c) Change in course of river and creation of new islands
   d) All of the above

9) What are the major consequences of Tropical cyclones?
   a) Fierce wind
   b) Heavy rain
   c) Storm surge
   d) All of the above

10) The major man-made causes of floods are ____.
   a) Deforestation
   b) Siltation
   c) Bursting of dam
   d) All of the above

11) Mass killing diseases can be referred to as ____.
   a) Biological disaster
   b) Industrial disaster
   c) War disaster
   d) Flood disaster

12) What is the primary purpose of conducting a hazard vulnerability analysis?
   a) To determine the economic losses from potential disasters
   b) To identify areas and populations at greatest risk from hazards
   c) To predict the exact time and location of future hazard events
   d) To assess the effectiveness of post-disaster recovery efforts

13) Which of the following is a secondary effect of earthquakes?
   a) Ground shaking and surface rupture
   b) Tsunamis and landslides
   c) Building collapse and infrastructure damage
   d) All of the above

14) Early warning systems are crucial for disaster management because they: ___.
   a) Prevent the occurrence of natural hazards
   b) Reduce the impact of disasters by providing advance notice
   c) Help in post-disaster reconstruction and rehabilitation
   d) Eliminate the need for evacuation and preparedness measures

7) Early warning systems are crucial for disaster management because they: ___.
   a) Prevent the occurrence of natural hazards
   b) Reduce the impact of disasters by providing advance notice
   c) Help in post-disaster reconstruction and rehabilitation
   d) Eliminate the need for evacuation and preparedness measures

8) Hazards and Disasters are mainly classified as ____.
   a) Physical and chemical
   b) Natural and human-induced
   c) Physical and Human
   d) Social and cultural

9) A hazard is a situation where there is ____.
   a) Threat of natural calamity
   b) Threat to property and lives from calamities
   c) Threat for consequences of disaster
   d) All of the above

10) A Disaster is an event arising out of ____.
   a) Result of hazard event
   b) Causes of hazard event
   c) Causes of disaster events
   d) All of the above

11) The typical examples of man-made disasters are____.
   a) Chemical explosion
   b) Leakage of toxic waste
   c) War and civil strife
   d) All of the above

12) What are the consequences of the disaster on a society?
   a) Loss of life
   b) Damage to property
   c) Environmental Damages
   d) All of the above

13) The scientific study of earthquakes is called ____.
   a) Seismograph
   b) Seismology
   c) Both a and b
   d) None of the above

14) What is the name of the instrument used for measuring earthquake intensity?
   a) Modified Mercalli Scale
   b) Metrological scale
   c) Vernier scale
   d) Barometer

Set | Q

S.Y. (B. Tech.) (Sem-II) (New/Old) (CBCS) Examination: March/April-2025
CIVIL ENGINEERING
Disaster Management (BTN01410)

Day & Date: Monday, 09-June-2025 Max. Marks: 56
Time: 10:00 AM To 01:00 PM

Instructions: 1) Solve any Two between Q.2, Q.3, Q.4 in Section – I.
2) Solve any Two between Q.5, Q.6, Q.7 in Section – II.
3) Figures to the right indicates full marks.

Section – I

Q.2	**a)**	What is the scope of disaster management in a developing country like India?	**07**
	b)	Explain the concept of risk assessment in disaster management.	**07**
Q.3	**a)**	Discuss the impact of climate change on the frequency and intensity of natural disasters.	**07**
	b)	Explain the causes and effects of landslides.	**07**
Q.4	**a)**	Discuss the challenges faced in managing a disaster like the Indian Ocean Tsunami (2004).	**07**
	b)	Explain the importance of disaster preparedness in urban areas.	**07**

Section – II

Q.5	**a)**	How can effective communication help in reducing the impact of a disaster?	**07**
	b)	Explain the role of NGOs in disaster relief and rehabilitation.	**07**
Q.6	**a)**	Discuss the ethical considerations in disaster response.	**07**
	b)	Explain the use of satellite technology in disaster warning systems.	**07**
Q.7	**a)**	What are the benefits of a community-based early warning system?	**07**
	b)	Explain the role of technology in improving disaster resilience.	**07**

S.Y. (B. Tech.) (Sem-II) (New/Old) (CBCS) Examination: March/April-2025
CIVIL ENGINEERING
Disaster Management (BTN01410)

Day & Date: Monday, 09-June-2025 Max. Marks: 70
Time: 10:00 AM To 01:00 PM

Instructions: 1) Q. No. 1 is compulsory. It should be solved in the first 30 minutes in Answer Book Page no 03 (Starting page of the Answer Book). Each question carries one mark.
2) Don't forget to Mention question paper set (P/Q/R/S) on top of page.
3) Figures to the right indicates full marks.

MCQ/Objective Type Questions

Duration: 30 Minutes Marks:14

Q.1 Choose the correct Answer. **14**

1) Mass killing diseases can be referred to as ____.
a) Biological disaster b) Industrial disaster
c) War disaster d) Flood disaster

2) What is the primary purpose of conducting a hazard vulnerability analysis?
a) To determine the economic losses from potential disasters
b) To identify areas and populations at greatest risk from hazards
c) To predict the exact time and location of future hazard events
d) To assess the effectiveness of post-disaster recovery efforts

3) Which of the following is a secondary effect of earthquakes?
a) Ground shaking and surface rupture
b) Tsunamis and landslides
c) Building collapse and infrastructure damage
d) All of the above

4) Early warning systems are crucial for disaster management because they: ___.
a) Prevent the occurrence of natural hazards
b) Reduce the impact of disasters by providing advance notice
c) Help in post-disaster reconstruction and rehabilitation
d) Eliminate the need for evacuation and preparedness measures

5) Hazards and Disasters are mainly classified as ____.
a) Physical and chemical b) Natural and human-induced
c) Physical and Human d) Social and cultural

6) A hazard is a situation where there is ____.
   a) Threat of natural calamity
   b) Threat to property and lives from calamities
   c) Threat for consequences of disaster
   d) All of the above

7) A Disaster is an event arising out of ____.
   a) Result of hazard event b) Causes of hazard event
   c) Causes of disaster events d) All of the above

8) The typical examples of man-made disasters are____.
   a) Chemical explosion b) Leakage of toxic waste
   c) War and civil strife d) All of the above

9) What are the consequences of the disaster on a society?
   a) Loss of life b) Damage to property
   c) Environmental Damages d) All of the above

10) The scientific study of earthquakes is called ____.
   a) Seismograph b) Seismology
   c) Both a and b d) None of the above

11) What is the name of the instrument used for measuring earthquake intensity?
   a) Modified Mercalli Scale b) Metrological scale
   c) Vernier scale d) Barometer

12) The primary result of earthquakes is ____.
   a) Building and bridge collapsed
   b) Rapture of water and gas pipelines
   c) Change in course of river and creation of new islands
   d) All of the above

13) What are the major consequences of Tropical cyclones?
   a) Fierce wind b) Heavy rain
   c) Storm surge d) All of the above

14) The major man-made causes of floods are ____.
   a) Deforestation b) Siltation
   c) Bursting of dam d) All of the above

Day & Date: Saturday, 17-05-2025 Max. Marks: 70
Time: 03:00 PM To 06:00 PM

Instructions: 1) Q. No. 1 is compulsory. It should be solved in the first 30 minutes in Answer Book Page no 03 (Starting page of the Answer Book). Each question carries one mark.
2) Don't forget to Mention question paper set (P/Q/R/S) on top of page.
3) Use of Scientific calculator is allowed.
4) Assume suitable data if required and state it clearly.
5) Neat diagrams must be drawn wherever necessary.

MCQ/Objective Type Questions

Duration: 30 Minutes Marks:14

Q.1 Choose the correct alternatives from the given options. 14

1) Dryness Fraction indicates ____.
a) Quality of steam b) Enthalpy of steam
c) Entropy of steam d) Degree of superheat

2) The term coefficient of performance is related to ____.
a) Heat Pump b) Heat Engine
c) Steam Engine d) Gas Turbine

3) Area under the curve on T-S chart indicates ____.
a) Net heat transfer b) Network transfer
c) Cycle efficiency d) None of the above

4) Kelvin-Planks Law deals with ____.
a) conversion of work b) conversion of heat
c) conversion of mass d) conversion of heat into work

5) The major heat loss in boiler is due to ____.
a) Moisture in fuel b) Dry flue gases
c) steam formation d) Unburnt fuel

6) The ratio of heat actually used in producing the steam to the heat liberated in the furnace is called _____.
a) Equivalent evaporation b) Evaporative capacity
c) Boiler efficiency d) Factor of evaporation

7) The Rankine cycle as compared to Carnot cycle has ____ work ratio.
a) high b) low
c) equal d) half

8) The flow of steam is supersonic ____.
a) at entrance of nozzle
b) at throat of the nozzle
c) in convergent part of the nozzle
d) in divergent part of nozzle

9) In jet type condenser ____.
a) Cooling water passes through tubes and steam surrounds them
b) steam passes through tubes and cooling water surrounds them
c) steam and cooling water mix
d) steam and cooling water do not mix

10) A condenser in steam power plant ____.
a) increases expansion ratio of steam
b) reduces back pressure of steam
c) reduces the temperature of steam
d) all of the above

11) Thermal efficiency of engine with condenser as compared to without condenser, for a given pressure and temperature of steam is ____.
a) higher
b) lower
c) same as long as initial pressure and temperature are unchanged
d) None of the above

12) The compounding of steam turbine is done in order to ____.
a) reduce the speed of rotor b) improve efficiency
c) reduce exit losses d) all of the above

13) With increase in clearance volume, the ideal work of compressing 1 kg of air _____.
a) increases
b) decreases
c) remains same
d) first increases and then decreases

14) In single stage single acting reciprocating compressor without clearance volume, the work done is minimum during ____.
a) isothermal compression b) isentropic compression
c) polytropic compression d) None of the above

Seat No.	

Set **P**

S.Y. (B.Tech.) (Mechanical Engineering) (Semester - I) (New) (NEP CBCS) Examination: March/April - 2025
Applied Thermodynamics (MECHPCC-01)

Day & Date: Saturday, 17-05-2025 Max. Marks: 56
Time: 03:00 PM To 06:00 PM

Instructions: 1) Solve any two questions from each section.
2) Figures to the right indicate full marks.
3) Assume suitable data if necessary and state it clearly.
4) Neat diagrams must be drawn wherever necessary.

Section – I

Q.2 Attempt the following questions:

a) State and explain first law of thermodynamics. What are its limitations? **04**

b) Calculate the standard enthalpy at 298.15 K for the reaction **05**
$4NH_3(g)+50_2(g)\rightarrow 4NO(g)+6H_2O(g)$
Given that standard enthalpy of formation for as
$NH_3(g)$=-46.055 KJ/Kmol
$NO(g)^{=}$ 90.435 KJ/Kmol
H_2O (g)=-24.997 KJ/Kmol
O_2 (g)= O

c) A reversible heat engine operates between three constant temperatures reservoirs at 600 K, 400 K, and 300 K. It receives 2500 KJ of heat from the reservoirs at 600 K and does 1000 KJ of work. Determine the magnitude and direction of the heat interaction with the other two reservoirs. **05**

Q.3 Attempt the following:

a) Explain the classification of boilers in brief. **04**

b) The heat engine receives reversibly 1130 KJ/cycle of heat from a source at 292 °C and rejected heat reversibly to a sink at 12 °C. There is no other heat transfer. Show which of following cases the cycle is irreversible, reversible and impossible **05**
i) 282 KJ cycle is rejected
ii) 855 KJ cycle is rejected
iii) 570 KJ cycle is rejected

c) A boiler produces wet steam having a dryness fraction of 0.98. The working pressure of the boiler is 7.5 bar absolute. It generates steam at the rate of 5400 kg/hr. and consumes coal at the rate of 670 kg/hr. If the calorific value of coal is 31,000 kJ/kg and water is fed at a temperature of 41.5 °C, calculate **05**

i) equivalent evaporation/kg of coal
ii) factor of evaporation
iii) boiler efficiency

Q.4 Attempt the following:

a) Derive an expression for efficiency of Carnot vapour Power Cycle **04**

b) Explain the effect of various operating conditions on the efficiency of the Rankine vapour cycle with the help of T-S diagram. **05**

c) In the Rankine cycle, steam enters the turbine at 140 bar pressure and 550 °C. The exhaust pressure of the turbine is 0.65 bar, and all processes are reversible, find: **05**

i) Rankine cycle efficiency
ii) Work Ratio
iii) Specific Steam Consumption

Section – II

Q.5 Attempt the following:

a) Define steam nozzle? Explain its different types? **04**

b) Differentiate between impulse turbine and reaction turbine **05**

c) Explain the meaning of compounding of steam turbines? Discuss pressure velocity compounding of steam turbine with neat sketch. **05**

Q.6 Attempt the following:

a) Explain the following terms in connection with stem condensers **04**
i) Condenser efficiency
ii) Vacuum efficiency

b) Differentiate between surface condenser and jet condenser **05**

c) Derive an expression for the volumetric efficiency of a reciprocating compressor with usual notations. **05**

Q.7 Attempt the following:

a) Derive an expression for work done per kg for the polytropic compression process without considering the clearance volume. **04**

b) Explain the need of multi-stage in a reciprocating compressor with a suitable PV diagram **05**

c) Atmospheric air is to be compressed ’in a single-state reciprocating compressor from 1.013 bar and 15 °C to 7 bar. Calculate the indicated power required for free air delivery of 0.3 m^3 /min, when the compression process is **05**

i) Isentropic
ii) Polytropic if n = 1.25
iii) Isothermal

Seat No.	

Set **Q**

a) higher
b) lower
c) same as long as initial pressure and temperature are unchanged
d) None of the above

2) The compounding of steam turbine is done in order to ____.
a) reduce the speed of rotor b) improve efficiency
c) reduce exit losses d) all of the above

3) With increase in clearance volume, the ideal work of compressing 1 kg of air _____.
a) increases
b) decreases
c) remains same
d) first increases and then decreases

4) In single stage single acting reciprocating compressor without clearance volume, the work done is minimum during ____.
a) isothermal compression b) isentropic compression
c) polytropic compression d) None of the above

5) Dryness Fraction indicates ____.
a) Quality of steam b) Enthalpy of steam
c) Entropy of steam d) Degree of superheat

6) The term coefficient of performance is related to ____.
a) Heat Pump b) Heat Engine
c) Steam Engine d) Gas Turbine

7) Area under the curve on T-S chart indicates ____.
a) Net heat transfer b) Network transfer
c) Cycle efficiency d) None of the above

8) Kelvin-Planks Law deals with ____.
a) conversion of work b) conversion of heat
c) conversion of mass d) conversion of heat into work

9) The major heat loss in boiler is due to ____.
a) Moisture in fuel b) Dry flue gases
c) steam formation d) Unburnt fuel

10) The ratio of heat actually used in producing the steam to the heat liberated in the furnace is called _____.
a) Equivalent evaporation b) Evaporative capacity
c) Boiler efficiency d) Factor of evaporation

11) The Rankine cycle as compared to Carnot cycle has ____ work ratio.
a) high b) low
c) equal d) half

12) The flow of steam is supersonic ____.
a) at entrance of nozzle
b) at throat of the nozzle
c) in convergent part of the nozzle
d) in divergent part of nozzle

13) In jet type condenser ____.
a) Cooling water passes through tubes and steam surrounds them
b) steam passes through tubes and cooling water surrounds them
c) steam and cooling water mix
d) steam and cooling water do not mix

14) A condenser in steam power plant ____.
a) increases expansion ratio of steam
b) reduces back pressure of steam
c) reduces the temperature of steam
d) all of the above

Set **R**

S.Y. (B.Tech.) (Mechanical Engineering) (Semester - I) (New) (NEP CBCS) Examination: March/April - 2025
Applied Thermodynamics (MECHPCC-01)

Day & Date: Saturday, 17-05-2025 Max. Marks: 56
Time: 03:00 PM To 06:00 PM

Instructions: 1) Solve any two questions from each section.
2) Figures to the right indicate full marks.
3) Assume suitable data if necessary and state it clearly.
4) Neat diagrams must be drawn wherever necessary.

Section – I

Q.2 Attempt the following questions:

a) State and explain first law of thermodynamics. What are its limitations? **04**

b) Calculate the standard enthalpy at 298.15 K for the reaction **05**
$4NH_3(g)+50_2(g)\rightarrow 4NO(g)+6H_2O(g)$
Given that standard enthalpy of formation for as
$NH_3(g)$=-46.055 KJ/Kmol
$NO(g)^{=}$ 90.435 KJ/Kmol
H_2O (g)=-24.997 KJ/Kmol
O_2 (g)= O

c) A reversible heat engine operates between three constant temperatures reservoirs at 600 K, 400 K, and 300 K. It receives 2500 KJ of heat from the reservoirs at 600 K and does 1000 KJ of work. Determine the magnitude and direction of the heat interaction with the other two reservoirs. **05**

Q.3 Attempt the following:

a) Explain the classification of boilers in brief. **04**

b) The heat engine receives reversibly 1130 KJ/cycle of heat from a source at 292 °C and rejected heat reversibly to a sink at 12 °C. There is no other heat transfer. Show which of following cases the cycle is irreversible, reversible and impossible **05**
i) 282 KJ cycle is rejected
ii) 855 KJ cycle is rejected
iii) 570 KJ cycle is rejected

c) A boiler produces wet steam having a dryness fraction of 0.98. The working pressure of the boiler is 7.5 bar absolute. It generates steam at the rate of 5400 kg/hr. and consumes coal at the rate of 670 kg/hr. If the calorific value of coal is 31,000 kJ/kg and water is fed at a temperature of 41.5 °C, calculate **05**

i) equivalent evaporation/kg of coal
ii) factor of evaporation
iii) boiler efficiency

Q.4 Attempt the following:

a) Derive an expression for efficiency of Carnot vapour Power Cycle **04**

b) Explain the effect of various operating conditions on the efficiency of the Rankine vapour cycle with the help of T-S diagram. **05**

c) In the Rankine cycle, steam enters the turbine at 140 bar pressure and 550 °C. The exhaust pressure of the turbine is 0.65 bar, and all processes are reversible, find: **05**

i) Rankine cycle efficiency
ii) Work Ratio
iii) Specific Steam Consumption

Section – II

Q.5 Attempt the following:

a) Define steam nozzle? Explain its different types? **04**

b) Differentiate between impulse turbine and reaction turbine **05**

c) Explain the meaning of compounding of steam turbines? Discuss pressure velocity compounding of steam turbine with neat sketch. **05**

Q.6 Attempt the following:

a) Explain the following terms in connection with stem condensers **04**

i) Condenser efficiency
ii) Vacuum efficiency

b) Differentiate between surface condenser and jet condenser **05**

c) Derive an expression for the volumetric efficiency of a reciprocating compressor with usual notations. **05**

Q.7 Attempt the following:

a) Derive an expression for work done per kg for the polytropic compression process without considering the clearance volume. **04**

b) Explain the need of multi-stage in a reciprocating compressor with a suitable PV diagram **05**

c) Atmospheric air is to be compressed ’in a single-state reciprocating compressor from 1.013 bar and 15 °C to 7 bar. Calculate the indicated power required for free air delivery of 0.3 m^3 /min, when the compression process is **05**

i) Isentropic
ii) Polytropic if n = 1.25
iii) Isothermal

Applied Thermodynamics (MECHPCC-01)

Day & Date: Saturday, 17-05-2025 Max. Marks: 70
Time: 03:00 PM To 06:00 PM

Instructions: 1) Q. No. 1 is compulsory. It should be solved in the first 30 minutes in Answer Book Page no 03 (Starting page of the Answer Book). Each question carries one mark.
2) Don't forget to Mention question paper set (P/Q/R/S) on top of page.
3) Use of Scientific calculator is allowed.
4) Assume suitable data if required and state it clearly.
5) Neat diagrams must be drawn wherever necessary.

MCQ/Objective Type Questions

Duration: 30 Minutes Marks:14

Q.1 Choose the correct alternatives from the given options. 14

1) The ratio of heat actually used in producing the steam to the heat liberated in the furnace is called _____.
a) Equivalent evaporation b) Evaporative capacity
c) Boiler efficiency d) Factor of evaporation

2) The Rankine cycle as compared to Carnot cycle has ____ work ratio.
a) high b) low
c) equal d) half

3) The flow of steam is supersonic ____.
a) at entrance of nozzle
b) at throat of the nozzle
c) in convergent part of the nozzle
d) in divergent part of nozzle

4) In jet type condenser ____.
a) Cooling water passes through tubes and steam surrounds them
b) steam passes through tubes and cooling water surrounds them
c) steam and cooling water mix
d) steam and cooling water do not mix

5) A condenser in steam power plant ____.
a) increases expansion ratio of steam
b) reduces back pressure of steam
c) reduces the temperature of steam
d) all of the above

6) Thermal efficiency of engine with condenser as compared to without condenser, for a given pressure and temperature of steam is ____.
a) higher
b) lower
c) same as long as initial pressure and temperature are unchanged
d) None of the above

7) The compounding of steam turbine is done in order to ____.
a) reduce the speed of rotor b) improve efficiency
c) reduce exit losses d) all of the above

8) With increase in clearance volume, the ideal work of compressing 1 kg of air _____.
a) increases
b) decreases
c) remains same
d) first increases and then decreases

9) In single stage single acting reciprocating compressor without clearance volume, the work done is minimum during ____.
a) isothermal compression b) isentropic compression
c) polytropic compression d) None of the above

10) Dryness Fraction indicates ____.
a) Quality of steam b) Enthalpy of steam
c) Entropy of steam d) Degree of superheat

11) The term coefficient of performance is related to ____.
a) Heat Pump b) Heat Engine
c) Steam Engine d) Gas Turbine

12) Area under the curve on T-S chart indicates ____.
a) Net heat transfer b) Network transfer
c) Cycle efficiency d) None of the above

13) Kelvin-Planks Law deals with ____.
a) conversion of work b) conversion of heat

MCQ/Objective Type Questions

Duration: 30 Minutes Marks:14

Q.1 Choose the correct answer. **14**

1) The furnace commonly used in brass foundries is _____.
a) Direct arc furnaces b) Cupola
c) Induction Furnace d) None of these

2) Which of the following rolling mill gives maximum reduction?
a) Two High b) Four High
c) Cluster d) Five High

3) For joining two parts without melting any base metal, following processes are used _____.
a) Brazing and welding b) Welding and soldering
c) Soldering and brazing d) Any of above

4) Which of the following welding process are is not visible to operator's eye?
a) TIG welding b) MIG welding
c) Submerged arc welding d) MMAW

5) Feeder head (riser) should solidify _____.
a) After solidification of casting
b) Along with casting
c) Before casting
d) any time during solidification of casting

6) Spring back effect in HERF is _____.
a) Large b) Small
c) Negligible d) None of above

7) Which statement is correct for HERF _____.
a) Die costs are relatively lower
b) No or minimum spring back effect on the material after the process
c) Complex shapes / profiles can be made much easily, as compared to conventional forming
d) All of above

8) In explosive forming _____.
a) Preheating of workpiece is required
b) Preheating of workpiece is not required
c) May be or may not be Preheating of workpiece is required
d) None of the above

9) Investment Casting _____.
a) Uses metal pattern
b) Suitable for mass production
c) Does not uses core
d) Used for manufacturing lathe bed

10) Projection welding is _____.
a) Continuous spot welding process
b) Multi spot welding process
c) Used to form rectangle
d) something else

11) Manufacturing of I-beams of mild steels _____.
a) Hot rolling is used
b) Cold rolling is used
c) Hot extrusion is used
d) Drawing is used

12) Carburetor body for a two wheeler is manufactured _____.
a) By die casting
b) Green sand moulding
c) Centrifugal casting
d) Continuous casting

13) Preheating before welding is done to _____.
a) Make the steel softer
b) burn away oil, grease, etc. from the plate surface
c) prevent plate distortion
d) prevent cold crack

14) Chills are used in moulds to _____.
a) Achieve Directional solidification
b) Reduce possibility of blow holes
c) Increase the freezing time
d) Smoothen the metal for reducing spatter

Q.4 **a)** What is 'MMAW' process of welding? Explain its working with applications. **05**

b) Explain with neat sketch Resistance welding. Welding process with advantages, disadvantages and applications. **05**

c) Differentiate clearly between TIG & MIG. **04**

Section – II

Q.5 **a)** Explain process of open die working and give names of two components produced by this process. **05**

b) Differentiate between hot working and cold working operations. **05**

c) Discuss the setup for direct extrusion with neat sketch. **04**

Q.6 **a)** Discuss the process of multipass wire drawing set up with neat sketch. **05**

b) Explain with neat sketches hydro forming process. **05**

c) Explain with neat sketch electrohydraulic forming with advantages, disadvantages, applications. **04**

Q.7	**a)**	Explain Selective Laser Sintering (SLS) with advantages, disadvantages and applications.	**05**
	b)	Explain Fused Deposition Modeling (FDM) with advantages, disadvantages and applications.	**05**
	c)	Explain advantages, disadvantages and applications of Rapid Prototyping.	**04**

S.Y. (B.Tech.) (Sem-I) (New) (NEP CBCS) Examination: March/April-2025
MECHANICAL ENGINEERING
Manufacturing Processes (MECHPCC-02)

Day & Date: Monday 19-05-2025 Max. Marks: 70
Time: 03:00 PM To 06:00 PM

Instructions: 1) Q. No. 1 is compulsory. It should be solved in the first 30 minutes in Answer Book Page no 03 (Starting page of the Answer Book). Each question carries one mark.
2) Don't forget to Mention question paper set (P/Q/R/S) on top of page.
3) Assume suitable data if necessary and state it clearly.
4) Figures to the right indicates full marks.

MCQ/Objective Type Questions

Duration: 30 Minutes Marks:14

Q.1 Choose the correct answer. **14**

1) Spring back effect in HERF is _____.
a) Large b) Small
c) Negligible d) None of above

2) Which statement is correct for HERF _____.
a) Die costs are relatively lower
b) No or minimum spring back effect on the material after the process
c) Complex shapes / profiles can be made much easily, as compared to conventional forming
d) All of above

3) In explosive forming _____.
a) Preheating of workpiece is required
b) Preheating of workpiece is not required
c) May be or may not be Preheating of workpiece is required
d) None of the above

4) Investment Casting _____.
a) Uses metal pattern
b) Suitable for mass production
c) Does not uses core
d) Used for manufacturing lathe bed

5) Projection welding is _____.
a) Continuous spot welding process
b) Multi spot welding process
c) Used to form rectangle
d) something else

6) Manufacturing of I-beams of mild steels _____.
a) Hot rolling is used b) Cold rolling is used
c) Hot extrusion is used d) Drawing is used

7) Carburetor body for a two wheeler is manufactured _____.
a) By die casting b) Green sand moulding
c) Centrifugal casting d) Continuous casting

8) Preheating before welding is done to _____.
a) Make the steel softer
b) burn away oil, grease, etc. from the plate surface
c) prevent plate distortion
d) prevent cold crack

9) Chills are used in moulds to _____.
a) Achieve Directional solidification
b) Reduce possibility of blow holes
c) Increase the freezing time
d) Smoothen the metal for reducing spatter

10) The furnace commonly used in brass foundries is _____.
a) Direct arc furnaces b) Cupola
c) Induction Furnace d) None of these

11) Which of the following rolling mill gives maximum reduction?
a) Two High b) Four High
c) Cluster d) Five High

12) For joining two parts without melting any base metal, following processes are used _____.
a) Brazing and welding b) Welding and soldering
c) Soldering and brazing d) Any of above

13) Which of the following welding process are is not visible to operator's eye?
a) TIG welding b) MIG welding
c) Submerged arc welding d) MMAW

14) Feeder head (riser) should solidify _____.
a) After solidification of casting
b) Along with casting
c) Before casting
d) any time during solidification of casting

Manufacturing Processes (MECHPCC-02)

Day & Date: Monday 19-05-2025 Max. Marks: 56
Time: 03:00 PM To 06:00 PM

Instructions: 1) Solve any two questions from both sections.
2) Figures to the right indicate full marks.
3) Make suitable assumption, if required and state them clearly.

Section – I

Q.2	**a)**	Explain with flow chart, the basic steps in casting 'process. What are the advantages and limitations of sand casting?	**05**
	b)	What do you understand by the term gating system and Risers? Explain in brief the use of Chills.	**05**
	c)	What are the requirements of an effective Riser? Differentiate clearly between open riser and blind riser.	**04**
Q.3	**a)**	What is investment casting? Explain the process in detail with advantages and limitations.	**05**
	b)	Explain the stages of shell molding process in brief.	**05**
	c)	Give any two applications of following casting techniques: i) Investment casting ii) Sand casting iii) Die casting iv) Centrifugal casting	**04**
Q.4	**a)**	What is 'MMAW' process of welding? Explain its working with applications.	**05**
	b)	Explain with neat sketch Resistance welding. Welding process with advantages, disadvantages and applications.	**05**
	c)	Differentiate clearly between TIG & MIG.	**04**

Section – II

Q.5	**a)**	Explain process of open die working and give names of two components produced by this process.	**05**
	b)	Differentiate between hot working and cold working operations.	**05**
	c)	Discuss the setup for direct extrusion with neat sketch.	**04**
Q.6	**a)**	Discuss the process of multipass wire drawing set up with neat sketch.	**05**
	b)	Explain with neat sketches hydro forming process.	**05**
	c)	Explain with neat sketch electrohydraulic forming with advantages, disadvantages, applications.	**04**

Q.7	**a)**	Explain Selective Laser Sintering (SLS) with advantages, disadvantages and applications.	**05**

2) Don't forget to Mention question paper set (P/Q/R/S) on top of page.
3) Figures to the right indicates full marks.
4) Assume data wherever necessary.

MCQ/Objective Type Questions

Duration: 30 Minutes Marks:14

Q.1 Choose the correct alternatives from the given options. 14

1) For a material with Poisson's ratio 0.2, the ratio of Elastic modulus to shear modulus is ____.
a) 2.45 b) 2.4
c) 3.0 d) 1.5

2) The Poisson's ratio is ratio of lateral strain to ____.
a) Shear strain b) Linear strain
c) elastic strain d) None of these

3) For a shaft subjected to torsion, the shear stress developed is ____
a) maximum at axis b) uniform over section
c) maximum at outer surface d) maximum at inner surface

4) In case of a cantilever beam, maximum B.M. and maximum S.F. always occur at ____
a) Couple end b) Fixed end
c) Free end d) Mid span

5) For transmitting same power, all properties remaining same, between a solid and hollow shaft ____
a) hollow shaft is economical b) solid shaft is economical
c) Both are costly d) None of the above

6) In case of Lift application due to sudden stoppage of lift kinetic energy is transformed to ____
a) potential energy b) strain energy
c) shear energy d) mechanical energy

7) For a simply supported beam carrying a couple, its B.M.D. shows ____
a) bending moment changes sign
b) Rise or fall in bending moment
c) Maximum bending moment
d) Maximum shear force

8) For a cantilever beam carrying U.D.L. over entire span, shape of SFD is ____
a) Parabolic
b) Right angle triangle
c) Two equal and opposite rectangles
d) Two equal and opposite triangles

9) When simply supported beam is loaded, maximum tensile stress shall develop at ____
a) at the neutral layer
b) top layer
c) Bottom layer
d) None of above

10) When a circular section of a beam, is subjected to a shearing force the ratio of maximum shear stress to the average shear stress is ____
a) 2
b) 1.5
c) 1.33
d) 1.2

11) The radius of Mohr's stress circle indicates ____
a) Maximum normal stress
b) Minimum normal stress
c) Minimum shear stress
d) Maximum shear stress

12) On a principal plane, the shear stress is ____
a) Maximum
b) Minimum
c) Average
d) Zero

13) For a simply supported beam carrying a U.D.L. on its entire span, the deflection is ____
a) same as slope
b) maximum at center
c) zero at center
d) Zero at support

14) Neutral axis of the beam is the axis at which ____
a) Shear force is zero
b) Moment of inertia is zero
c) Bending stress is zero
d) Bending stress is maximum

3) Assume suitable data if necessary and state it clearly.
4) Use of scientific calculator is allowed.

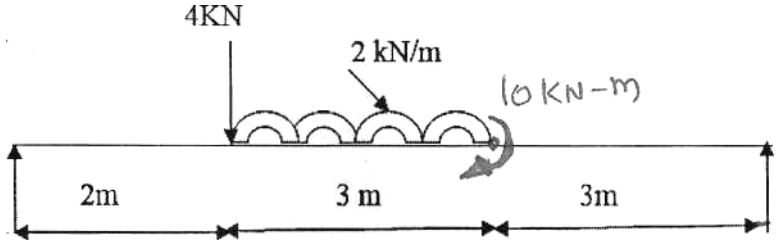
Section – I

Q.2 **a)** A steel bar is centrally enclosed in aluminum tube and is compressed between two rigid parallel palates at the ends by a force of 400 KN. The diameter of steel bar is 30 mm and the inner and outer diameter of the aluminum tubes are 40 mm and 60 mm respectively. The length of bar and the tube is 1200 mm. Determine the change in length of assembly and stresses induced in the steel bar and aluminum tube. Take, E for steel = 2.1 $X10^5$ N/mm^2: E for Aluminum = $70X10^3$ N/mm^2. **08**

b) A trolley of weight 80kN descending a slope at uniform velocity of 2.5m/sec and the end of which a steel cable is wound around the drum. When length of cable laid out is 600 meter, emergency brakes are suddenly applied and trolley brought to rest. If cross sectional area of cable is 600 mm^2, find stress induced in steel cable. Take E=200Gpa, g=9.81m/sec^2 **06**

Q.3 **a)** A steel solid circular shaft is being designed to transmit 150kW at 180 rpm. Maximum shear stress in the shaft must not exceed 80 MPa and the angle of twist is not to exceed 6° in a 4-m length. Determine the permissible diameter of shaft if Modulus of rigidity of shaft is 80Gpa. **06**

b) A simply supported beam as shown in figure carries. Draw SFD, BMD and determine location of bending moment and mark it clearly on BMD. **08**



Q.4 **a)** A steel bar 40 mm in diameter 5 m long is at a temperature of 15°C. Find the free expansion of the bar when it is heated to 70°C with its end clamped before heating. Calculate temperature stress exerted by bar on clamps if **06**

i) expansion of bar is fully prevented
ii) bar is permitted to expand by 0.5 mm
Take: α = 12 X 10^{-6} per °C and E == 200 GN/m^2

b) A tensile load of 30 KN is gradually applied to a circular bar of 25 mm diameter and 6 m long, if E = 200 GPa, Determine. **04**

i) Stress in the bar
ii) Elongation
iii) Strain energy stored in the rod

c) Define following leans: **04**

i) Point of Contra flexure
ii) Thermal stress
iii) Modulus of Resilience
iv) Torsional Stiffness

Section – II

Q.5 **a)** The stresses at a point in a strained material are 110 mpa (tensile) and 45mpa (compressive). Determine magnitude of normal and shear stresses on a plane inclined at an angle of 35° with axis of tensile stress. Also determine the magnitude of resultant stress, angle of obliquity and maximum intensity of shear stress. **06**

b) A beam of T-section of flange 200 x 40 mm and web size 260 x 40 mm is simply supported beam of span 8m and carries UDL of 5kN/m over its entire span. Determine maximum bending stress induced in the beam. **08**

Q.6 **a)** A steel simply supported beam having an I-section with top and bottom flange size 150 x 20 mm, web is 10 x 260 mm. If maximum shear force acting on the beam is 80kN. Determine shear stress across depth of cross section and draw shear stress distribution diagram **08**

b) A simply supported beam of 8-meter span carries point load of 40kN at its midspan. The cross section of beam is rectangle of 120 x 180 mm in size. Calculate the maximum slope at support and maximum deflection at center. **06**
Take E=110Gpa.

Q.7 **a)** Define Slope and Deflection of beam. Describe it in brief for simply supported and cantilever beam. **05**

b) A cantilever beam of uniform rectangular section 150 x 260mm carries UDL of 25 kN/m over its span 4 m. Determine maximum bending stress in the beam. **05**

c) Define the following terms: **04**

i) Theory of pure bending of beam
ii) Major principal stress
iii) Minor principal plane
iv) Angle of Obliquity

Q.6 **a)** A steel simply supported beam having an I-section with top and bottom flange size 150 x 20 mm, web is 10 x 260 mm. If maximum shear force acting on the beam is 80kN. Determine shear stress across depth of cross section and draw shear stress distribution diagram **08**

b) A simply supported beam of 8-meter span carries point load of 40kN at its midspan. The cross section of beam is rectangle of 120 x 180 mm in size. Calculate the maximum slope at support and maximum deflection at center. **06**
Take E=110Gpa.

Q.7 **a)** Define Slope and Deflection of beam. Describe it in brief for simply supported and cantilever beam. **05**

b) A cantilever beam of uniform rectangular section 150 x 260mm carries UDL of 25 kN/m over its span 4 m. Determine maximum bending stress in the beam. **05**

c) Define the following terms: **04**

i) Theory of pure bending of beam
ii) Major principal stress
iii) Minor principal plane
iv) Angle of Obliquity

Day & Date: Tuesday, 20-05-2025 Max. Marks: 70
Time: 03:00 PM To 06:00 PM

Instructions: 1) Q. No. 1 is compulsory. It should be solved in the first 30 minutes in answer book. Page no 03 (Starting page of the Answer Book). Each question carries one mark.
2) Don't forget to Mention question paper set (P/Q/R/S) on top of page.
3) Figures to the right indicates full marks.
4) Assume data wherever necessary.

MCQ/Objective Type Questions

Duration: 30 Minutes Marks:14

Q.1 Choose the correct alternatives from the given options. 14

1) In case of Lift application due to sudden stoppage of lift kinetic energy is transformed to ____
a) potential energy b) strain energy
c) shear energy d) mechanical energy

2) For a simply supported beam carrying a couple, its B.M.D. shows ____
a) bending moment changes sign
b) Rise or fall in bending moment
c) Maximum bending moment
d) Maximum shear force

3) For a cantilever beam carrying U.D.L. over entire span, shape of SFD is ____
a) Parabolic
b) Right angle triangle
c) Two equal and opposite rectangles
d) Two equal and opposite triangles

4) When simply supported beam is loaded, maximum tensile stress shall develop at ____
a) at the neutral layer b) top layer
c) Bottom layer d) None of above

5) When a circular section of a beam, is subjected to a shearing force the ratio of maximum shear stress to the average shear stress is ____
a) 2 b) 1.5
c) 1.33 d) 1.2

6) The radius of Mohr's stress circle indicates ____
a) Maximum normal stress b) Minimum normal stress
c) Minimum shear stress d) Maximum shear stress

7) On a principal plane, the shear stress is ____
a) Maximum b) Minimum
c) Average d) Zero

8) For a simply supported beam carrying a U.D.L. on its entire span, the deflection is ____
a) same as slope b) maximum at center
c) zero at center d) Zero at support

9) Neutral axis of the beam is the axis at which ____
a) Shear force is zero b) Moment of inertia is zero
c) Bending stress is zero d) Bending stress is maximum

10) For a material with Poisson's ratio 0.2, the ratio of Elastic modulus to shear modulus is ____.
a) 2.45 b) 2.4
c) 3.0 d) 1.5

11) The Poisson's ratio is ratio of lateral strain to ____.
a) Shear strain b) Linear strain
c) elastic strain d) None of these

12) For a shaft subjected to torsion, the shear stress developed is ____
a) maximum at axis b) uniform over section
c) maximum at outer surface d) maximum at inner surface

13) In case of a cantilever beam, maximum B.M. and maximum S.F. always occur at ____
a) Couple end b) Fixed end
c) Free end d) Mid span

14) For transmitting same power, all properties remaining same, between a solid and hollow shaft ____
a) hollow shaft is economical b) solid shaft is economical
c) Both are costly d) None of the above

Time: 03:00 PM To 06:00 PM

Instructions: 1) Solve any two questions from each section.
2) Figures to the right indicate full marks.
3) Assume suitable data if necessary and state it clearly.
4) Use of scientific calculator is allowed.

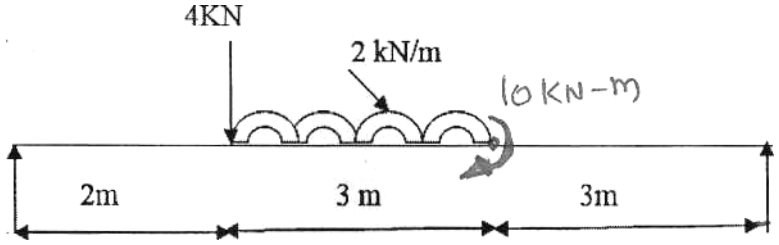
Section – I

Q.2 **a)** A steel bar is centrally enclosed in aluminum tube and is compressed between two rigid parallel palates at the ends by a force of 400 KN. The diameter of steel bar is 30 mm and the inner and outer diameter of the aluminum tubes are 40 mm and 60 mm respectively. The length of bar and the tube is 1200 mm. Determine the change in length of assembly and stresses induced in the steel bar and aluminum tube. Take, E for steel = 2.1 $X10^5$ N/mm^2: E for Aluminum = $70X10^3$ N/mm^2. **08**

b) A trolley of weight 80kN descending a slope at uniform velocity of 2.5m/sec and the end of which a steel cable is wound around the drum. When length of cable laid out is 600 meter, emergency brakes are suddenly applied and trolley brought to rest. If cross sectional area of cable is 600 mm^2, find stress induced in steel cable. Take E=200Gpa, g=9.81m/sec^2 **06**

Q.3 **a)** A steel solid circular shaft is being designed to transmit 150kW at 180 rpm. Maximum shear stress in the shaft must not exceed 80 MPa and the angle of twist is not to exceed 6° in a 4-m length. Determine the permissible diameter of shaft if Modulus of rigidity of shaft is 80Gpa. **06**

b) A simply supported beam as shown in figure carries. Draw SFD, BMD and determine location of bending moment and mark it clearly on BMD. **08**



Q.4 **a)** A steel bar 40 mm in diameter 5 m long is at a temperature of 15°C. Find the free expansion of the bar when it is heated to 70°C with its end clamped before heating. Calculate temperature stress exerted by bar on clamps if **06**

i) expansion of bar is fully prevented
ii) bar is permitted to expand by 0.5 mm
Take: α = 12 X 10^{-6} per °C and E == 200 GN/m^2

b) A tensile load of 30 KN is gradually applied to a circular bar of 25 mm diameter and 6 m long, if E = 200 GPa, Determine. **04**

i) Stress in the bar
ii) Elongation
iii) Strain energy stored in the rod

c) Define following leans: **04**

i) Point of Contra flexure
ii) Thermal stress
iii) Modulus of Resilience
iv) Torsional Stiffness

Section – II

Q.5 **a)** The stresses at a point in a strained material are 110 mpa (tensile) and 45mpa (compressive). Determine magnitude of normal and shear stresses on a plane inclined at an angle of 35° with axis of tensile stress. Also determine the magnitude of resultant stress, angle of obliquity and maximum intensity of shear stress. **06**

b) A beam of T-section of flange 200 x 40 mm and web size 260 x 40 mm is simply supported beam of span 8m and carries UDL of 5kN/m over its entire span. Determine maximum bending stress induced in the beam. **08**

Q.6 **a)** A steel simply supported beam having an I-section with top and bottom flange size 150 x 20 mm, web is 10 x 260 mm. If maximum shear force acting on the beam is 80kN. Determine shear stress across depth of cross section and draw shear stress distribution diagram **08**

b) A simply supported beam of 8-meter span carries point load of 40kN at its midspan. The cross section of beam is rectangle of 120 x 180 mm in size. Calculate the maximum slope at support and maximum deflection at center. **06**
Take E=110Gpa.

Q.7 **a)** Define Slope and Deflection of beam. Describe it in brief for simply supported and cantilever beam. **05**

b) A cantilever beam of uniform rectangular section 150 x 260mm carries UDL of 25 kN/m over its span 4 m. Determine maximum bending stress in the beam. **05**

c) Define the following terms: **04**

i) Theory of pure bending of beam
ii) Major principal stress
iii) Minor principal plane
iv) Angle of Obliquity

2) Don't forget to Mention question paper set (P/Q/R/S) on top of page.
3) Figures to the right indicates full marks.

MCQ/Objective Type Questions

Duration: 30 Minutes Marks:14

Q.1 Choose the correct Answer. **14**

1) If a linear differential equation with constant coefficients and r.h.s. equal to zero has a real root m_1 repeated Two times, then the corresponding part of the integral is _____.

a) $(c_1 + c_2)e^{m_1 X}$ b) $(c_1 + c_2 x)e^{m_1 X}$

c) $(c_1 x + c_2 x^2)e^{m_1 X}$ d) $(c_1 + c_2 x^3)e^{m_1 X}$

2) $\frac{1}{D-a}X$ is equal to _____.

a) $\int Xe^{ax}dx$ b) $e^{ax}\int X.e^{-ax}dx$

c) $\int Xe^{-ax}dx$ d) $e^{-ax}\int Xe^{-ax}dx$

3) $\frac{1}{D+1}(\log x + \frac{1}{x})$ is equal to _____.

a) e^x b) 1

c) x d) $\log x$

4) The solution of $q = e^{-p}$ is _____.

a) $z = ax + by + c$ b) $z = a^x + b^y + c$

c) $z = ax + y^{-b} + c$ d) $z = ax + e^{-a}y + c$

5) The solution of the equation $pq = p + q$ is _____.

a) $z = ax + (a+1)y + c$

b) $z = (a+1)x + a(a-1)y + c$

c) $z = (a-1)x + a(a+1)y + c$

d) $z(a-1) = a(a-1)x + ay + c$

6) If μ_1', μ_2', μ_3', μ_4' are the first four moments of the distribution about certain number then fourth moment μ_4 of the distribution about the arithmetic mean is given by _____.

a) $\mu_4' + 4\mu_3'\mu_1' + 6\mu_2'(\mu_1')^4 + 3(\mu_1')^4$

b) $\mu_4' - 4\mu_3'\mu_1' + 6\mu_2'(\mu_1')^2 - 3(\mu_1')^4$

c) $\mu_4' + 4\mu_3'\mu_1' - 6\mu_2'(\mu_1')^4 - 3(\mu_1')^4$

d) $\mu_4' + 2\mu_3'\mu_1' + 6\mu_2'(\mu_1')^4 - 3(\mu_1')^4$

7) Coefficient of kurtosis β_2 is given by _____.

a) $\frac{\mu_4}{\mu_3}$ b) $\frac{\mu_4}{\mu_2^2}$

c) $\frac{\mu_3}{\mu_2^2}$ d) $\frac{\mu_4}{\mu_2^3}$

8) If value of x for normal distribution is 35, mean of normal distribution is 65 and standard deviation is 25 then standardized random variable is ___.

a) -1.5 b) -1.7

c) -1.2 d) -4

9) A continuous random variable has the following probability density function $f(x) = kx(1-x), 0 \le x \le 1$ then $k =$ _____.

a) 6 b) 2

c) 3 d) 5

10) The area under the standard normal curve from $z = -\infty$ to $z = 0$ is ___.

a) 1 b) ½

c) 3/2 d) 0

11) If X, Y denotes the deviations from their means and if $\sum X^2 = 40, \sum Y^2 = 100, \sum XY = 50,$ then $r =$ _____.

a) 0.63 b) 0.82

c) 0.91 d) 0.79

12) The line of regression of x and y is given by _____.

a) $x - \bar{x} = b_{xy}(y - \bar{y})$ b) $x - \bar{y} = b_{xy}(x - \bar{x})$

c) $x - \bar{x} = b_{xx}(y - \bar{y})$ d) $x - \bar{x} = b_{yx}(y - \bar{y})$

13) The following mistakes per page were found in a book.

No. of mistakes:	0	1	2	3	4
Pages:	211	90	19	5	0

Then χ^2 is _____.

a) 0.59 b) 0.069

c) 0.81 d) 0.79

14) The 't-statistic' is defined as _____.

a) $\frac{\bar{x}-\mu}{\sigma/\sqrt{n}}$ b) $\frac{\bar{x}-\mu}{s/\sqrt{n}}$

c) $\frac{\bar{x}-\mu}{\sigma/n}$ d) $\frac{\bar{x}-\mu}{s/n}$

Instructions: 1) All questions are compulsory.
2) Figures to the right indicate full marks.

Section – I

Q.2 Attempt any Three. **09**

a) Find the Arithmetic mean, Median and standard deviation for the following frequency distribution.

x	5	9	12	15	20	24	30	35	42	49
f	3	6	8	8	9	10	8	7	6	2

b) Solve $(D^2 - 4D + 4)y = 8.x^2e^{2x}\sin 2x$

c) Solve $(D^2 + D + 1)y = \sin 2x$

d) Calculate Mode for the following frequency distribution.

C.I.	00-10	10-20	20-30	30-40	40-50	50-60	60-70
Frequency (f)	4	7	8	12	25	18	10

e) Solve $p^2q^3 = x^2y^3$

Q.3 Attempt any Three. **09**

a) Solve: $(2D + 1)^2y = 4e^{-x/2}$

b) Solve: $p + q = pqz$

c) Find Q_1, Q_2, Q_3 from the following data.
5,7,12,14,15,22,25,30,36,42,53

d) Solve $x(y - z)p + y(z - x)q = z(x - y)$

e) Solve $(D^3 - 3D + 2)y = x$

Q.4 Attempt any Two **10**

a) The first four moments of a distribution about the value 5 are 2,20,40 and 50. from the given information obtain the first four central moments, coefficient of skewness and kurtosis.

b) Solve the following differential equation by the method of separation of variables.
$\frac{\partial z}{\partial x} - 2\frac{\partial z}{\partial y} = z$ given that $z(x, 0) = 3e^{-5x}$

c) Solve: $(D^2 - D - 2)y = 2\log x + \frac{1}{x} + \frac{1}{x^2}$

Section – II

Q.5 Attempt any three of the following. **09**

a) Find the value of k if each of the following functions is a probability density function.

$$f(x) = \begin{cases} kx^2(1-x^3), & 0 \le x \le 1 \\ 0, & \text{otherwise} \end{cases}$$

b) The mean life time of 100 fluorescent light bulbs produced by a Company is computed to be 1570 Hrs. with S.D. of 120 Hrs. If μ is the mean lifetime of all the bulbs produced by the Company, Test the Hypothesis $\mu = 1600$ Hrs. Against the alternative Hypothesis $\mu \neq 1600$ Hrs. using 5% level of Significance.
(Given Expected value at 5% LOS is 1.96)

c) Calculate the coefficient of correlation between height of father and height of son from the following data.

Height of father	64	65	66	67	68	69	70
Height of son	66	67	65	68	70	68	71

d) Two independent random sample have the following data,
$\overline{x_1} = 110, \sigma_1 = 25, n_1 = 16$
$\overline{x_2} = 120, \sigma_2 = 30, n_2 = 9$
If σ_1 and σ_2 are the S. D. of the populations. Test the hypothesis that $\mu_1 = \mu_2$ at 5% level of significance. (The table value of t at $\alpha = 0.05$ for $v = 23$ degrees of freedom is 2.069)

e) If in a lot of 500 solenoids 25 are defective, find the probability that there will be 0, 1, 2 defective solenoids in a random sample of 20 solenoids.

Q.6 Attempt any three of the following. **09**

a) If two independent random samples of sizes 15 and 8 have respectively the following mean and population standard deviations, $\overline{x_1} = 980, \overline{x_2} = 1012; \sigma_1 = 75, \sigma_2 = 80$. Test the hypothesis that $\mu_1 = \mu_2$ at 5% level of significance.
(Given Expected value at 5% LOS with 21 DF is 2.080)

b) The number of telephone calls received by an operator in a ten-minute interval follows a Poisson distribution with mean 1. What is the probability of receiving (i) no call, (ii) less than four calls, in the interval? What is the most likely number of calls?

c) Calculate the equations of the lines of regression. Given
Mean of $x = 50.07$, S.D. of $x = 5.26$
Mean of $y = 9.98$, S.D. of $y = 2.59$
$r = 0.898$

d) In an intelligence test administered to 1000 children the mean score was, 42 with s.d. 24. Find the number of children (i) scoring more than 60 and (ii) between 20 and 40 assuming the distribution to be normal.
(Given: For S.N.V. z area from z = 0 to z = 0.75 is 0.2734, that between z = 0 and z = 0.9167 is 0.3202 and that between z = 0 to z = 0.08333 is 0.0332.)

e) Fit a Straight line $y = a + bx$ to the following data.

x	0	1	2	3	4	5
y	1	2	3	4.5	6	7.5

Q.7 Attempt any Two. **10**

a) Fit a Poisson's distribution to the following data :

X	0	1	2	3	4	Total
f	112	63	20	4	1	200

b) Obtain a second-degree curve to the following data.

Year	1965	1966	1967	1968	1969	1970	1971	1972
Profit (in Corers Rs.)	125	140	165	195	200	215	220	230

Also estimate the profit in 1973.

c) Ten school boys were given a test in Statistics and their scores were recorded. They were given a month's special coaching and a second test was given to them in the same subject at the end of the coaching period. Test if the marks given below give evidence to the fact that the students are benefitted by coaching.
Marks in test I: 70, 68, 56, 75, 80, 90, 68, 75, 56, 58
Marks in Test II: 68, 70, 52, 73, 75, 78, 80, 92, 54, 55
(Given that value of t_α at 5 % LOS for v = 9 degrees of freedom is 1.86 for one tailed test)

3) Figures to the right indicates full marks.

MCQ/Objective Type Questions

Duration: 30 Minutes Marks:14

Q.1 Choose the correct Answer. 14

1) If value of x for normal distribution is 35, mean of normal distribution is 65 and standard deviation is 25 then standardized random variable is ___.
a) -1.5 b) -1.7
c) -1.2 d) -4

2) A continuous random variable has the following probability density function $f(x) = kx(1-x), 0 \le x \le 1$ then $k =$ _____.
a) 6 b) 2
c) 3 d) 5

3) The area under the standard normal curve from $z = -\infty$ to $z = 0$ is ___.
a) 1 b) ½
c) 3/2 d) 0

4) If X, Y denotes the deviations from their means and if $\sum X^2 = 40, \sum Y^2 = 100, \sum XY = 50,$ then $r =$ _____.
a) 0.63 b) 0.82
c) 0.91 d) 0.79

5) The line of regression of x and y is given by _____.
a) $x - \bar{x} = b_{xy}(y - \bar{y})$ b) $x - \bar{y} = b_{xy}(x - \bar{x})$
c) $x - \bar{x} = b_{xx}(y - \bar{y})$ d) $x - \bar{x} = b_{yx}(y - \bar{y})$

6) The following mistakes per page were found in a book.

No. of mistakes:	0	1	2	3	4
Pages:	211	90	19	5	0

Then χ^2 is _____.
a) 0.59 b) 0.069
c) 0.81 d) 0.79

7) The 't-statistic' is defined as _____.

a) $\frac{\bar{x}-\mu}{\sigma/\sqrt{n}}$ b) $\frac{\bar{x}-\mu}{s/\sqrt{n}}$

c) $\frac{\bar{x}-\mu}{\sigma/n}$ d) $\frac{\bar{x}-\mu}{s/n}$

8) If a linear differential equation with constant coefficients and r.h.s. equal to zero has a real root m_1 repeated Two times, then the corresponding part of the integral is _____.

a) $(c_1 + c_2)e^{m_1 X}$ b) $(c_1 + c_2 x)e^{m_1 X}$

c) $(c_1 x + c_2 x^2)e^{m_1 X}$ d) $(c_1 + c_2 x^3)e^{m_1 X}$

9) $\frac{1}{D-a}X$ is equal to _____.

a) $\int Xe^{ax}dx$ b) $e^{ax}\int X.e^{-ax}dx$

c) $\int Xe^{-ax}dx$ d) $e^{-ax}\int Xe^{-ax}dx$

10) $\frac{1}{D+1}(\log x + \frac{1}{x})$ is equal to _____.

a) e^x b) 1

c) x d) $\log x$

11) The solution of $q = e^{-p}$ is _____.

a) $z = ax + by + c$ b) $z = a^x + b^y + c$

c) $z = ax + y^{-b} + c$ d) $z = ax + e^{-a}y + c$

12) The solution of the equation $pq = p + q$ is _____.

a) $z = ax + (a+1)y + c$

b) $z = (a+1)x + a(a-1)y + c$

c) $z = (a-1)x + a(a+1)y + c$

d) $z(a-1) = a(a-1)x + ay + c$

13) If μ_1', μ_2', μ_3', μ_4' are the first four moments of the distribution about certain number then fourth moment μ_4 of the distribution about the arithmetic mean is given by _____.

a) $\mu_4' + 4\mu_3'\mu_1' + 6\mu_2'(\mu_1')^4 + 3(\mu_1')^4$

b) $\mu_4' - 4\mu_3'\mu_1' + 6\mu_2'(\mu_1')^2 - 3(\mu_1')^4$

c) $\mu_4' + 4\mu_3'\mu_1' - 6\mu_2'(\mu_1')^4 - 3(\mu_1')^4$

d) $\mu_4' + 2\mu_3'\mu_1' + 6\mu_2'(\mu_1')^4 - 3(\mu_1')^4$

14) Coefficient of kurtosis β_2 is given by _____.

a) $\frac{\mu_4}{\mu_3}$ b) $\frac{\mu_4}{\mu_2^2}$

c) $\frac{\mu_3}{\mu_2^2}$ d) $\frac{\mu_4}{\mu_2^3}$

Section – I

Q.2 Attempt any Three. **09**

a) Find the Arithmetic mean, Median and standard deviation for the following frequency distribution.

x	5	9	12	15	20	24	30	35	42	49
f	3	6	8	8	9	10	8	7	6	2

b) Solve $(D^2 - 4D + 4)y = 8.x^2e^{2x}\sin 2x$

c) Solve $(D^2 + D + 1)y = \sin 2x$

d) Calculate Mode for the following frequency distribution.

C.I.	00-10	10-20	20-30	30-40	40-50	50-60	60-70
Frequency (f)	4	7	8	12	25	18	10

e) Solve $p^2q^3 = x^2y^3$

Q.3 Attempt any Three. **09**

a) Solve: $(2D + 1)^2y = 4e^{-x/2}$

b) Solve: $p + q = pqz$

c) Find Q_1, Q_2, Q_3 from the following data.
5,7,12,14,15,22,25,30,36,42,53

d) Solve $x(y - z)p + y(z - x)q = z(x - y)$

e) Solve $(D^3 - 3D + 2)y = x$

Q.4 Attempt any Two **10**

a) The first four moments of a distribution about the value 5 are 2,20,40 and 50. from the given information obtain the first four central moments, coefficient of skewness and kurtosis.

b) Solve the following differential equation by the method of separation of variables.
$\frac{\partial z}{\partial x} - 2\frac{\partial z}{\partial y} = z$ given that $z(x, 0) = 3e^{-5x}$

c) Solve: $(D^2 - D - 2)y = 2\log x + \frac{1}{x} + \frac{1}{x^2}$

Section – II

Q.5 Attempt any three of the following. **09**

a) Find the value of k if each of the following functions is a probability density function.

$$f(x) = \begin{cases} kx^2(1-x^3), & 0 \le x \le 1 \\ 0, & \text{otherwise} \end{cases}$$

b) The mean life time of 100 fluorescent light bulbs produced by a Company is computed to be 1570 Hrs. with S.D. of 120 Hrs. If μ is the mean lifetime of all the bulbs produced by the Company, Test the Hypothesis $\mu = 1600$ Hrs. Against the alternative Hypothesis $\mu \neq 1600$ Hrs. using 5% level of Significance.
(Given Expected value at 5% LOS is 1.96)

c) Calculate the coefficient of correlation between height of father and height of son from the following data.

Height of father	64	65	66	67	68	69	70
Height of son	66	67	65	68	70	68	71

d) Two independent random sample have the following data,
$\overline{x_1} = 110, \sigma_1 = 25, n_1 = 16$
$\overline{x_2} = 120, \sigma_2 = 30, n_2 = 9$
If σ_1 and σ_2 are the S. D. of the populations. Test the hypothesis that $\mu_1 = \mu_2$ at 5% level of significance. (The table value of t at $\alpha = 0.05$ for $v = 23$ degrees of freedom is 2.069)

e) If in a lot of 500 solenoids 25 are defective, find the probability that there will be 0, 1, 2 defective solenoids in a random sample of 20 solenoids.

Q.6 Attempt any three of the following. **09**

a) If two independent random samples of sizes 15 and 8 have respectively the following mean and population standard deviations, $\overline{x_1} = 980, \overline{x_2} = 1012; \sigma_1 = 75, \sigma_2 = 80$. Test the hypothesis that $\mu_1 = \mu_2$ at 5% level of significance.
(Given Expected value at 5% LOS with 21 DF is 2.080)

b) The number of telephone calls received by an operator in a ten-minute interval follows a Poisson distribution with mean 1. What is the probability of receiving (i) no call, (ii) less than four calls, in the interval? What is the most likely number of calls?

c) Calculate the equations of the lines of regression. Given
Mean of $x = 50.07$, S.D. of $x = 5.26$
Mean of $y = 9.98$, S.D. of $y = 2.59$
$r = 0.898$

d) In an intelligence test administered to 1000 children the mean score was, 42 with s.d. 24. Find the number of children (i) scoring more than 60 and (ii) between 20 and 40 assuming the distribution to be normal.
(Given: For S.N.V. z area from z = 0 to z = 0.75 is 0.2734, that between z = 0 and z = 0.9167 is 0.3202 and that between z = 0 to z = 0.08333 is 0.0332.)

e) Fit a Straight line $y = a + bx$ to the following data.

x	0	1	2	3	4	5
y	1	2	3	4.5	6	7.5

Q.7 Attempt any Two. **10**

a) Fit a Poisson's distribution to the following data :

X	0	1	2	3	4	Total
f	112	63	20	4	1	200

b) Obtain a second-degree curve to the following data.

Year	1965	1966	1967	1968	1969	1970	1971	1972
Profit (in Corers Rs.)	125	140	165	195	200	215	220	230

Also estimate the profit in 1973.

c) Ten school boys were given a test in Statistics and their scores were recorded. They were given a month's special coaching and a second test was given to them in the same subject at the end of the coaching period. Test if the marks given below give evidence to the fact that the students are benefitted by coaching.
Marks in test I: 70, 68, 56, 75, 80, 90, 68, 75, 56, 58
Marks in Test II: 68, 70, 52, 73, 75, 78, 80, 92, 54, 55
(Given that value of t_α at 5 % LOS for v = 9 degrees of freedom is 1.86 for one tailed test)

Seat No.		Set	R

S. Y. (B.Tech.) (Sem-I) (New) (NEP CBCS) Examination: March/April-2025
MECHANICAL ENGINEERING
Advanced Mathematics and Statistics (OE-01A)

Day & Date: Wednesday 21-05-2025 Max. Marks: 70
Time: 03:00 PM To 06:00 PM

Instructions: 1) Q. No. 1 is compulsory. It should be solved in the first 30 minutes in Answer Book Page no 03 (Starting page of the Answer Book). Each question carries one mark.
2) Don't forget to Mention question paper set (P/Q/R/S) on top of page.
3) Figures to the right indicates full marks.

MCQ/Objective Type Questions

Duration: 30 Minutes Marks:14

Q.1 Choose the correct Answer. **14**

1) If X, Y denotes the deviations from their means and if $\sum X^2 = 40, \sum Y^2 = 100, \sum XY = 50,$ then $r =$ _____.
a) 0.63 b) 0.82
c) 0.91 d) 0.79

2) The line of regression of x and y is given by _____.
a) $x - \bar{x} = b_{xy}(y - \bar{y})$ b) $x - \bar{y} = b_{xy}(x - \bar{x})$
c) $x - \bar{x} = b_{xx}(y - \bar{y})$ d) $x - \bar{x} = b_{yx}(y - \bar{y})$

3) The following mistakes per page were found in a book.

No. of mistakes:	0	1	2	3	4
Pages:	211	90	19	5	0

Then χ^2 is _____.
a) 0.59 b) 0.069
c) 0.81 d) 0.79

4) The 't-statistic' is defined as _____.
a) $\frac{\bar{x}-\mu}{\sigma/\sqrt{n}}$ b) $\frac{\bar{x}-\mu}{s/\sqrt{n}}$
c) $\frac{\bar{x}-\mu}{\sigma/n}$ d) $\frac{\bar{x}-\mu}{s/n}$

5) If a linear differential equation with constant coefficients and r.h.s. equal to zero has a real root m_1 repeated Two times, then the corresponding part of the integral is _____.
a) $(c_1 + c_2)e^{m_1 X}$ b) $(c_1 + c_2 x)e^{m_1 X}$
c) $(c_1 x + c_2 x^2)e^{m_1 X}$ d) $(c_1 + c_2 x^3)e^{m_1 X}$

6) $\frac{1}{D-a}X$ is equal to _____.

a) $\int Xe^{ax}dx$ b) $e^{ax}\int X.e^{-ax}dx$

c) $\int Xe^{-ax}dx$ d) $e^{-ax}\int Xe^{-ax}dx$

7) $\frac{1}{D+1}(\log x+\frac{1}{x})$ is equal to _____.

a) e^x b) 1

c) x d) $\log x$

8) The solution of $q=e^{-p}$ is _____.

a) $z=ax+by+c$ b) $z=a^x+b^y+c$

c) $z=ax+y^{-b}+c$ d) $z=ax+e^{-a}y+c$

9) The solution of the equation $pq=p+q$ is _____.

a) $z=ax+(a+1)y+c$

b) $z=(a+1)x+a(a-1)y+c$

c) $z=(a-1)x+a(a+1)y+c$

d) $z(a-1)=a(a-1)x+ay+c$

10) If μ_1', μ_2', μ_3', μ_4' are the first four moments of the distribution about certain number then fourth moment μ_4 of the distribution about the arithmetic mean is given by _____.

a) $\mu_4'+4\mu_3'\mu_1'+6\mu_2'(\mu_1')^4+3(\mu_1')^4$

b) $\mu_4'-4\mu_3'\mu_1'+6\mu_2'(\mu_1')^2-3(\mu_1')^4$

c) $\mu_4'+4\mu_3'\mu_1'-6\mu_2'(\mu_1')^4-3(\mu_1')^4$

d) $\mu_4'+2\mu_3'\mu_1'+6\mu_2'(\mu_1')^4-3(\mu_1')^4$

11) Coefficient of kurtosis β_2 is given by _____.

a) $\frac{\mu_4}{\mu_3}$ b) $\frac{\mu_4}{\mu_2^2}$

c) $\frac{\mu_3}{\mu_2^2}$ d) $\frac{\mu_4}{\mu_2^3}$

12) If value of x for normal distribution is 35, mean of normal distribution is 65 and standard deviation is 25 then standardized random variable is ___.

a) -1.5 b) -1.7

c) -1.2 d) -4

13) A continuous random variable has the following probability density function $f(x)=kx(1-x),0\le x\le 1$ then $k=$ _____.

a) 6 b) 2

c) 3 d) 5

14) The area under the standard normal curve from $z = -\infty$ to $z = 0$ is ___.

a) 1 b) ½

c) 3/2 d) 0

Section – I

Q.2 Attempt any Three. **09**

a) Find the Arithmetic mean, Median and standard deviation for the following frequency distribution.

x	5	9	12	15	20	24	30	35	42	49
f	3	6	8	8	9	10	8	7	6	2

b) Solve $(D^2 - 4D + 4)y = 8.x^2e^{2x}\sin 2x$

c) Solve $(D^2 + D + 1)y = \sin 2x$

d) Calculate Mode for the following frequency distribution.

C.I.	00-10	10-20	20-30	30-40	40-50	50-60	60-70
Frequency (f)	4	7	8	12	25	18	10

e) Solve $p^2q^3 = x^2y^3$

Q.3 Attempt any Three. **09**

a) Solve: $(2D + 1)^2y = 4e^{-x/2}$

b) Solve: $p + q = pqz$

c) Find Q_1, Q_2, Q_3 from the following data.
5,7,12,14,15,22,25,30,36,42,53

d) Solve $x(y - z)p + y(z - x)q = z(x - y)$

e) Solve $(D^3 - 3D + 2)y = x$

Q.4 Attempt any Two **10**

a) The first four moments of a distribution about the value 5 are 2,20,40 and 50. from the given information obtain the first four central moments, coefficient of skewness and kurtosis.

b) Solve the following differential equation by the method of separation of variables.
$\frac{\partial z}{\partial x} - 2\frac{\partial z}{\partial y} = z$ given that $z(x, 0) = 3e^{-5x}$

c) Solve: $(D^2 - D - 2)y = 2\log x + \frac{1}{x} + \frac{1}{x^2}$

Section – II

Q.5 Attempt any three of the following. **09**

a) Find the value of k if each of the following functions is a probability density function.

$$f(x) = \begin{cases} kx^2(1-x^3), & 0 \le x \le 1 \\ 0, & \text{otherwise} \end{cases}$$

b) The mean life time of 100 fluorescent light bulbs produced by a Company is computed to be 1570 Hrs. with S.D. of 120 Hrs. If μ is the mean lifetime of all the bulbs produced by the Company, Test the Hypothesis $\mu = 1600$ Hrs. Against the alternative Hypothesis $\mu \neq 1600$ Hrs. using 5% level of Significance.
(Given Expected value at 5% LOS is 1.96)

c) Calculate the coefficient of correlation between height of father and height of son from the following data.

Height of father	64	65	66	67	68	69	70
Height of son	66	67	65	68	70	68	71

d) Two independent random sample have the following data,
$\overline{x_1} = 110, \sigma_1 = 25, n_1 = 16$
$\overline{x_2} = 120, \sigma_2 = 30, n_2 = 9$
If σ_1 and σ_2 are the S. D. of the populations. Test the hypothesis that $\mu_1 = \mu_2$ at 5% level of significance. (The table value of t at $\alpha = 0.05$ for $v = 23$ degrees of freedom is 2.069)

e) If in a lot of 500 solenoids 25 are defective, find the probability that there will be 0, 1, 2 defective solenoids in a random sample of 20 solenoids.

Q.6 Attempt any three of the following. **09**

a) If two independent random samples of sizes 15 and 8 have respectively the following mean and population standard deviations, $\overline{x_1} = 980, \overline{x_2} = 1012; \sigma_1 = 75, \sigma_2 = 80$. Test the hypothesis that $\mu_1 = \mu_2$ at 5% level of significance.
(Given Expected value at 5% LOS with 21 DF is 2.080)

MCQ/Objective Type Questions

Duration: 30 Minutes Marks:14

Q.1 Choose the correct Answer. **14**

1) If μ_1', μ_2', μ_3', μ_4' are the first four moments of the distribution about certain number then fourth moment μ_4 of the distribution about the arithmetic mean is given by _____.

a) $\mu_4' + 4\mu_3'\mu_1' + 6\mu_2'(\mu_1')^4 + 3(\mu_1')^4$

b) $\mu_4' - 4\mu_3'\mu_1' + 6\mu_2'(\mu_1')^2 - 3(\mu_1')^4$

c) $\mu_4' + 4\mu_3'\mu_1' - 6\mu_2'(\mu_1')^4 - 3(\mu_1')^4$

d) $\mu_4' + 2\mu_3'\mu_1' + 6\mu_2'(\mu_1')^4 - 3(\mu_1')^4$

2) Coefficient of kurtosis β_2 is given by _____.

a) $\frac{\mu_4}{\mu_3}$ b) $\frac{\mu_4}{\mu_2^2}$

c) $\frac{\mu_3}{\mu_2^2}$ d) $\frac{\mu_4}{\mu_2^3}$

3) If value of x for normal distribution is 35, mean of normal distribution is 65 and standard deviation is 25 then standardized random variable is ___.

a) -1.5 b) -1.7
c) -1.2 d) -4

4) A continuous random variable has the following probability density function $f(x) = kx(1-x), 0 \le x \le 1$ then $k =$ _____.

a) 6 b) 2
c) 3 d) 5

5) The area under the standard normal curve from $z = -\infty$ to $z = 0$ is ___.

a) 1 b) ½
c) 3/2 d) 0

6) If X, Y denotes the deviations from their means and if $\sum X^2 = 40, \sum Y^2 = 100, \sum XY = 50,$ then $r =$ _____.

a) 0.63 b) 0.82

c) 0.91 d) 0.79

7) The line of regression of x and y is given by _____.

a) $x - \bar{x} = b_{xy}(y - \bar{y})$ b) $x - \bar{y} = b_{xy}(x - \bar{x})$

c) $x - \bar{x} = b_{xx}(y - \bar{y})$ d) $x - \bar{x} = b_{yx}(y - \bar{y})$

8) The following mistakes per page were found in a book.

No. of mistakes:	0	1	2	3	4
Pages:	211	90	19	5	0

Then χ^2 is _____.

a) 0.59 b) 0.069

c) 0.81 d) 0.79

9) The 't-statistic' is defined as _____.

a) $\frac{\bar{x}-\mu}{\sigma/\sqrt{n}}$ b) $\frac{\bar{x}-\mu}{s/\sqrt{n}}$

c) $\frac{\bar{x}-\mu}{\sigma/n}$ d) $\frac{\bar{x}-\mu}{s/n}$

10) If a linear differential equation with constant coefficients and r.h.s. equal to zero has a real root m_1 repeated Two times, then the corresponding part of the integral is _____.

a) $(c_1 + c_2)e^{m_1 X}$ b) $(c_1 + c_2 x)e^{m_1 X}$

c) $(c_1 x + c_2 x^2)e^{m_1 X}$ d) $(c_1 + c_2 x^3)e^{m_1 X}$

11) $\frac{1}{D-a}X$ is equal to _____.

a) $\int Xe^{ax}dx$ b) $e^{ax}\int X.e^{-ax}dx$

c) $\int Xe^{-ax}dx$ d) $e^{-ax}\int Xe^{-ax}dx$

12) $\frac{1}{D+1}(\log x + \frac{1}{x})$ is equal to _____.

a) e^x b) 1

c) x d) $\log x$

13) The solution of $q = e^{-p}$ is _____.

a) $z = ax + by + c$ b) $z = a^x + b^y + c$

c) $z = ax + y^{-b} + c$ d) $z = ax + e^{-a}y + c$

14) The solution of the equation $pq = p + q$ is _____.

a) $z = ax + (a+1)y + c$

b) $z = (a+1)x + a(a-1)y + c$

c) $z = (a-1)x + a(a+1)y + c$

d) $z(a-1) = a(a-1)x + ay + c$

Q.2 Attempt any Three. **09**

a) Find the Arithmetic mean, Median and standard deviation for the following frequency distribution.

x	5	9	12	15	20	24	30	35	42	49
f	3	6	8	8	9	10	8	7	6	2

b) Solve $(D^2 - 4D + 4)y = 8.x^2e^{2x}\sin 2x$

c) Solve $(D^2 + D + 1)y = \sin 2x$

d) Calculate Mode for the following frequency distribution.

C.I.	00-10	10-20	20-30	30-40	40-50	50-60	60-70
Frequency (f)	4	7	8	12	25	18	10

e) Solve $p^2q^3 = x^2y^3$

Q.3 Attempt any Three. **09**

a) Solve: $(2D + 1)^2y = 4e^{-x/2}$

b) Solve: $p + q = pqz$

c) Find Q_1, Q_2, Q_3 from the following data.
5,7,12,14,15,22,25,30,36,42,53

d) Solve $x(y - z)p + y(z - x)q = z(x - y)$

e) Solve $(D^3 - 3D + 2)y = x$

Q.4 Attempt any Two **10**

a) The first four moments of a distribution about the value 5 are 2,20,40 and 50. from the given information obtain the first four central moments, coefficient of skewness and kurtosis.

b) Solve the following differential equation by the method of separation of variables.
$\frac{\partial z}{\partial x} - 2\frac{\partial z}{\partial y} = z$ given that $z(x, 0) = 3e^{-5x}$

c) Solve: $(D^2 - D - 2)y = 2\log x + \frac{1}{x} + \frac{1}{x^2}$

Section – II

Q.5 Attempt any three of the following. **09**

a) Find the value of k if each of the following functions is a probability density function.

$$f(x) = \begin{cases} kx^2(1-x^3), & 0 \le x \le 1 \\ 0, & \text{otherwise} \end{cases}$$

b) The mean life time of 100 fluorescent light bulbs produced by a Company is computed to be 1570 Hrs. with S.D. of 120 Hrs. If μ is the mean lifetime of all the bulbs produced by the Company, Test the Hypothesis $\mu = 1600$ Hrs. Against the alternative Hypothesis $\mu \neq 1600$ Hrs. using 5% level of Significance.
(Given Expected value at 5% LOS is 1.96)

c) Calculate the coefficient of correlation between height of father and height of son from the following data.

Height of father	64	65	66	67	68	69	70
Height of son	66	67	65	68	70	68	71

d) Two independent random sample have the following data,
$\overline{x_1} = 110, \sigma_1 = 25, n_1 = 16$
$\overline{x_2} = 120, \sigma_2 = 30, n_2 = 9$
If σ_1 and σ_2 are the S. D. of the populations. Test the hypothesis that $\mu_1 = \mu_2$ at 5% level of significance. (The table value of t at $\alpha = 0.05$ for $v = 23$ degrees of freedom is 2.069)

e) If in a lot of 500 solenoids 25 are defective, find the probability that there will be 0, 1, 2 defective solenoids in a random sample of 20 solenoids.

Q.6 Attempt any three of the following. **09**

a) If two independent random samples of sizes 15 and 8 have respectively the following mean and population standard deviations, $\overline{x_1} = 980, \overline{x_2} = 1012; \sigma_1 = 75, \sigma_2 = 80$. Test the hypothesis that $\mu_1 = \mu_2$ at 5% level of significance.
(Given Expected value at 5% LOS with 21 DF is 2.080)

b) The number of telephone calls received by an operator in a ten-minute interval follows a Poisson distribution with mean 1. What is the probability of receiving (i) no call, (ii) less than four calls, in the interval? What is the most likely number of calls?

c) Calculate the equations of the lines of regression. Given
Mean of $x = 50.07$, S.D. of $x = 5.26$
Mean of $y = 9.98$, S.D. of $y = 2.59$
$r = 0.898$

d) In an intelligence test administered to 1000 children the mean score was, 42 with s.d. 24. Find the number of children (i) scoring more than 60 and (ii) between 20 and 40 assuming the distribution to be normal.
(Given: For S.N.V. z area from z = 0 to z = 0.75 is 0.2734, that between z = 0 and z = 0.9167 is 0.3202 and that between z = 0 to z = 0.08333 is 0.0332.)

e) Fit a Straight line $y = a + bx$ to the following data.

x	0	1	2	3	4	5
y	1	2	3	4.5	6	7.5

Q.7 Attempt any Two. **10**

a) Fit a Poisson's distribution to the following data :

X	0	1	2	3	4	Total
f	112	63	20	4	1	200

b) Obtain a second-degree curve to the following data.

Year	1965	1966	1967	1968	1969	1970	1971	1972
Profit (in Corers Rs.)	125	140	165	195	200	215	220	230

Also estimate the profit in 1973.

c) Ten school boys were given a test in Statistics and their scores were recorded. They were given a month's special coaching and a second test was given to them in the same subject at the end of the coaching period. Test if the marks given below give evidence to the fact that the students are benefitted by coaching.
Marks in test I: 70, 68, 56, 75, 80, 90, 68, 75, 56, 58
Marks in Test II: 68, 70, 52, 73, 75, 78, 80, 92, 54, 55
(Given that value of t_α at 5 % LOS for v = 9 degrees of freedom is 1.86 for one tailed test)

2) Don't forget to Mention question paper set (P/Q/R/S) on top of page.
3) Figures to the right indicates full marks.
4) Assume suitable data if necessary.

MCQ/Objective Type Questions

Duration: 30 Minutes Marks:14

Q.1 Choose the correct Answer. **14**

1) Which dimension of e-commerce enables commerce beyond the boundaries of the country?
a) Richness b) Interactivity
c) Global Reach d) Ubiquity

2) Which of the following describes the definition of electronic commerce?
a) Doing business
b) Sale and purchase of goods
c) Doing business electronically
d) All of the above mentioned

3) Which e-commerce model involves the sale of goods or services from businesses to the general public?
a) Business to Government b) Business to Consumer
c) Business to Business d) Consumer to Business

4) All of the following are major B2C business models except _____.
a) content provider b) industry consortium
c) transaction broker d) service provider

5) Which of the following advantage of E-commerce?
a) Ability to operate 24/7
b) Inability to personalize the shopping
c) Higher operational cost
d) Limited reach CO1 I

6) Which e-commerce transaction provides the benefits of eliminating the requirement of a middleman?

a) Business to Business
b) Business to Government
c) Consumer to Business
d) Business to Consumer

7) After completing an E-Commerce transaction, the seller and buyer should be provided an opportunity to _____ their transaction experience.

a) undo
b) regret
c) provide rating for
d) forget

8) Which of the following is a common digital marketing strategy used in E-commerce?

a) Search Engine Optimization (SEO)
b) Traditional print advertising
c) Cold-calling potential customers
d) Distributing flyers in local neighborhoods

9) Digital Cash has following characteristic _____.

a) Anonymity
b) Security
c) Confidentiality
d) All above

10) Which component of E-commerce ensures secure online transactions and customer data protection?

a) Payment gateways
b) Shopping carts
c) Product catalogs
d) Data warehouses

11) Which type of attack is a method of defeating a cryptographic scheme of trying a large number of possibilities?

a) Teardrop attack
b) Brute force attack
c) Phlashing
d) Smurf attack

12) What is the another name called PDoS?

a) Brute force attack
b) Non technical attack
c) Phlashing
d) Smurf attack

13) What does the term “data security” refer to in E-commerce?

a) The use of cookies to track customer behavior
b) The protection of customer data from unauthorized access and breaches
c) The analysis of customer browsing history for personalized recommendations
d) The process of categorizing customer data for marketing purposes

14) Which of the following is a characteristic of E-commerce marketplaces?

a) They only allow B2C transactions
b) They sell physical products exclusively
c) They are limited to a specific geographical area
d) Multiple sellers can list their products to reach a broader audience

Day & Date: Wednesday 21-05-2025 Max. Marks: 56
Time: 03:00 PM To 06:00 PM

Instructions: 1) All questions are compulsory.
2) Figures to the right indicate full marks.

Section – I

Q.2 Attempt any Three. **12**

a) Explain the interdisciplinary nature of disciplines under humanities and social sciences.
b) Write a short note on: Scope of humanities.
c) Explain how perceptual processes shape human behaviour.
d) Write a short note on: Different aspects of perception.
e) Write a short note on: Major philosophical movements and their impact.

Q.3 Attempt any Two. **16**

a) Explain the advantages and disadvantages of democracy.
b) Explain major theories of psychology.
c) Explain how different psychological aspects affect social communication.

Section – II

Q.4 Attempt any Three. **12**

a) Write a short note on: Social Institutions.
b) Explain different elements of culture and society.
c) Write a short note on: Contributions of ancient civilizations to modern society.
d) How did industrial revolution contribute to technical advancements?
e) Write a short note on: Ethics in Engineering.

Q.5 Attempt any Two. **16**

a) What is industrialization? Explain the social and economic consequences of industrialization.
b) Describe different economic theories and thinkers.
c) Explain the technological innovations in 18^{th} & 19^{th} century.

e) None of the above

8) The method of accepting or rejecting the lot is known as _____.

a) Lot sampling b) Acceptance sampling
c) Batch sampling d) Quality control

9) In double sampling plan, second sample is taken when the number of defectives _____.

a) > C1 but < C2 b) > C1
c) > C1 and C2 d) < C2

10) _____ is defined as “the discipline dealing with what is good & bad & with moral duty & obligation”.

a) Rule b) Organisation culture
c) Protocol d) Ethics

11) _____ involves establishing the amount of work to be done & the time when each element of the work will start.

a) Planning b) Routing
c) Scheduling d) Organizing

12) In _____ concept product enjoys the supreme importance.

a) Selling b) Marketing
c) Manufacturing d) Business

13) _____ are the greatest importance at the supervisory level.

a) Supervisory skills b) Human relation skills
c) Technical skills d) Planning skills

14) The responsibilities of the operations manager include _____.

a) Planning , organizing , staffing , procuring , and reviewing
b) Forecasting , designing , planning , organizing , and controlling
c) Forecasting , designing , operating , procuring , and reviewing
d) Planning , organizing , staffing , leading , and controlling
e) Designing & operating

Set S

S.Y. (B.Tech.) (Sem-I) (New) (NEP CBCS) Examination: March/April-2025
MECHANICAL ENGINEERING
Industrial and Quality Management (OE-01D)

Day & Date: Wednesday 21-05-2025 Max. Marks: 56
Time: 03:00 PM To 06:00 PM

Instructions: 1) Attempt any two questions from each section.
2) Figures to the right indicate full marks.
3) Assume suitable data if necessary and mention it clearly.

Section – I

Q.2	**a)**	Explain the Social responsibilities and ethics in management.	**07**
	b)	Explain decision making process with types of decision.	**07**
Q.3	**a)**	What is planning process? Explain steps in planning.	**07**
	b)	What is leadership? Explain any four styles.	**07**
Q.4	**a)**	Explain communication and Various types of communications.	**07**
	b)	What is motivation? Explain Maslow's theory of motivation.	**07**

Section – II

Q.5	**a)**	Define quality and state the Steps in quality control.	**07**
	b)	Explain Benchmarking with advantages and disadvantages.	**07**
Q.6	**a)**	Explain Deming Wheel with suitable example.	**07**
	b)	Explain the following as applied to quality control: 1) Appraisal costs 2) Prevention costs 3) Failure costs 4) Optimum costs	**07**

Q.7 **a)** In a manufacturing process the number of defectives found in the inspection of 20 lots of 100 samples is given below. **07**

1) Determine the control limit of P chart and state whether the process is in control or not.
2) Determine the new value of mean fraction defective if some points are out of control. Compute the corresponding control limits and state whether the process is still in control or not.

Lot No.	No. of defectives	Lot No.	No. of Defectives
1	5	11	7
2	4	12	6
3	3	13	3
4	5	14	5
5	4	15	4
6	6	16	2
7	9	17	8
8	15	18	7
9	11	19	6
10	6	20	4

b) Differentiate between single sampling plan & double sampling plan. **07**

MECHANICAL ENGINEERING
Mathematics for Software and Hardware (OE-01E)

Day & Date: Wednesday 21-05-2025 Max. Marks: 70
Time: 03:00 PM To 06:00 PM

Instructions: 1) Q. No. 1 is compulsory. It should be solved in the first 30 minutes in Answer Book Page no 03 (Starting page of the Answer Book). Each question carries one mark.
2) Don't forget to Mention question paper set (P/Q/R/S) on top of page.
3) Figures to the right indicates full marks.
4) Use of non-programmable calculator is allowed.

MCQ/Objective Type Questions

Duration: 30 Minutes Marks:14

Q.1 Choose the correct Answer. **14**

1) Laplace transform of $\int_0^t u^3 du =$_____.

a) $\frac{3}{s^5}$ b) $\frac{6}{s^5}$

c) $\frac{1}{s^5}$ d) $\frac{6}{s^4}$

2) If $L\{f(t)\} = \emptyset(s)$, then $L\{f(at)\} =$ _____.

a) $\emptyset\left(\frac{s}{a}\right)$ b) $\frac{1}{s}\emptyset\left(\frac{s}{a}\right)$

c) $\emptyset'\left(\frac{s}{a}\right)$ d) $\frac{1}{a}\emptyset\left(\frac{s}{a}\right)$

3) $L^{-1}\left\{\frac{1}{s^2+3^2}\right\} =$_____.

a) $\frac{1}{3}\sin 3t$ b) $\frac{1}{3}\cos 3t$

c) $\frac{1}{3}\cosh 3t$ d) $\frac{1}{3}\sinh 3t$

4) For $\frac{d^2y}{dx^2} + 4\frac{dy}{dx} + 3y = 3e^{2x}$, the particular integral is _____.

a) $\frac{1}{15}e^{2x}$ b) $3e^{2x}$

c) $\frac{1}{5}e^{2x}$ d) $C_1e^{-x} + C_2e^{-2x}$

5) The general solution of the equation $(D^3 - 7D - 6)y = 0$ is _____.

a) $y = c_1e^{-x} + c_2e^{2x} + c_3e^{-3x}$

b) $y = c_1e^{-x} + c_2e^{2x} + c_3e^{3x}$

c) $y = c_1e^{-x} + c_2e^{-2x} + c_3e^{-3x}$

d) None of these

6) $z\{k\} =$_____ for $|z| > 1$

a) $\frac{z}{z-1}$ b) $\frac{1}{(z-1)^2}$

c) $\frac{z}{(z-1)^2}$ d) $\frac{z}{(z+1)^2}$

7) If $z\{f(k)\} = F(z)$, then $z\{a^k f(k)\} =$ _____.

a) $f\left(\frac{a}{z}\right)$ b) $f\left(\frac{z}{a}\right)$

c) $\frac{1}{a}f\left(\frac{z}{a}\right)$ d) None

8) $Z\left\{\frac{1}{k!}\right\} =?$ for $k \geq 0$

a) e^z b) $e^{\frac{1}{z}}$

c) $\frac{1}{z}$ d) $\frac{1}{1-z}$

9) The Fourier sine transform of $f(x)$ is given by _____.

a) $\sqrt{\frac{2}{\pi}}\int_{-\infty}^{\infty} f(x)\sin sx\, dx$ b) $\int_{-\infty}^{\infty} f(x)\cos sx\, dx$

c) $\sqrt{\frac{2}{\pi}}\int_{0}^{\infty} f(x)\sin sx\, dx$ d) $\sqrt{\frac{\pi}{2}}\int_{0}^{\infty} f(x)\sin sx\, dx$

10) From the result $\int_{-\infty}^{\infty} \frac{\cos sx.\sin sk}{s} ds = \begin{cases} \pi & , \ |x| < k \\ 0 & , \ |x| > k \end{cases}$ we can deduce that $\int_0^{\infty} \frac{\sin sk}{s}\, ds =$ _____.

a) 0 b) 1

c) π d) $\frac{\pi}{2}$

11) The first real positive root of $x^3 = 6x - 4$ by Newton Raphson method near $x_0 = 1$ is _____.

a) 0.6667 b) 0.6

c) 0.4 d) 0.3

12) How many steps does the fourth-order Runge-Kutta method use?

a) Two steps b) Five steps

c) Four steps d) Three steps

13) In the interval $(0, a)$ the constant term in the Fourier series of $f(x) = \frac{a}{2} - x$ is _____.

a) 0 b) 1

c) $\frac{a^2}{2\pi}$ d) $\frac{a^2}{4\pi}$

14) Fourier series of $f(x) = x\ in(-\pi, \pi)$ will contain ____

a) No sine term b) No cosine term

c) Both cosine and sine term d) None of these

Seat No.

2) Figures to the right indicate full marks.
3) Use of non-programmable calculator is allowed.

Section – I

Q.2 Attempt any three **09**

a) Solve : $(D^2 + 4D + 5)y = -2\cos hx + 2^x$

b) Solve $(D^2 + 2D + 1)y = x\cos x$

c) Find Z-transform of $x_k = 2^k \cos(3k + 2)\,, k \geq 0$

d) Find Z-transform of $x_k = k^2 e^{-ak}, k \geq 0$

e) Find the inverse Laplace transform of following by using the Convolution theorem of $\left[\frac{1}{s(s^2+4)}\right]$

Q.3 Attempt any three of the following. **09**

a) Evaluate by using Laplace transform $\int_0^\infty \left(\frac{e^{-t}-e^{-3t}}{t}\right) dt$

b) Find the inverse Z-transform of $f(k) = \begin{cases} 4^k, & k < 0 \\ 3^k, & k \geq 0 \end{cases}$

c) Find $Z\{e^{-3k}\sin 2k\}, k \geq 0$

d) Solve $(D^2 - 1)y = (1 + e^{-x})^2$

e) Find Laplace Transform of $\{t\cos 2t\}$

Q.4 Attempt any two **10**

a) Find the inverse Z-transform of $\frac{1}{(z-a)^2}$ if

1) $|z| < a$,
2) $|z| > a$,

b) Find the inverse Laplace transform of following by using the Convolution theorem of $\left[\frac{s^2}{(s^2+a^2)(s^2+b^2)}\right]$

c) Solve $(D^2 - 6D + 13)y = e^{x\log 2} + 8e^{3x}\sin 4x$

Section – II

Q.5 Attempt any three **09**

a) Evaluate $\int_0^5 \frac{1}{4x+5} dx$ using $n = 5$ by Trapezoidal rule.

b) Evaluate $I = \int_0^2 e^{-x} dx$ by using the Simpson's 1/3rd rule given h= 0.5

c) Obtain half range cosine series $f(x) = x$ in $0 < x < 1$

d) Find the Fourier series expansion of $f(x) = x^2$ in $(-\pi, \pi)$

e) Find the Fourier transform of $f(x) = \begin{cases} \frac{1}{2\epsilon}, & |x| \leq \epsilon \\ 0, & |x| > \epsilon \end{cases}$

Q.6 Attempt any three **09**

a) Find f(x) if its Fourier sine transform e^{-as}

b) Find the Fourier cosine transform of

$f(x)$, if $f(x) = \begin{cases} 1, & 0 \leq x < 1 \\ 0, & x \geq 1 \end{cases}$

c) Find the Fourier series expansion of $f(x) = x$ in $(-\pi, \pi)$

d) Solve by Newton Raphson method $x^4 - x = 10$ correct to four decimal places. (perform two iterations only)

e) Find $\int_0^6 \frac{1}{1+x^2} dx \; n = 6$ using Simpson's 3/8th rule.

Q.7 Attempt any two. **10**

a) Find $\int_1^8 \frac{1}{1+x} dx \; h = 1$ by using Trapezoidal rule and Simpson's 1/3rd rule.

b) Find Fourier transform of

$f(x) = 1 \; |x| < k$

$= 0 \; |x| > k$ and

Hence evaluate i) $\int_{-\infty}^{\infty} \frac{\sin sk . \cos sk}{s} ds$ ii) $\int_{-\infty}^{\infty} \frac{\sin ks}{s} ds$

c) Find the Fourier series expansion of the function $f(x) = e^{-\alpha x}$ in $(0, 2\pi)$

MCQ/Objective Type Questions

Duration: 30 Minutes Marks:14

Q.1 Choose the correct Answer. 14

1) The first real positive root of $x^3 = 6x - 4$ by Newton Raphson method near $x_0 = 1$ is _____.

a) 0.6667 b) 0.6
c) 0.4 d) 0.3

2) How many steps does the fourth-order Runge-Kutta method use?

a) Two steps b) Five steps
c) Four steps d) Three steps

3) In the interval $(0, a)$ the constant term in the Fourier series of $f(x) = \frac{a}{2} - x$ is _____.

a) 0 b) 1
c) $\frac{a^2}{2\pi}$ d) $\frac{a^2}{4\pi}$

4) Fourier series of $f(x) = x\ in(-\pi, \pi)$ will contain ____

a) No sine term b) No cosine term
c) Both cosine and sine term d) None of these

5) Laplace transform of $\int_0^t u^3 du$ =_____.

a) $\frac{3}{s^5}$ b) $\frac{6}{s^5}$
c) $\frac{1}{s^5}$ d) $\frac{6}{s^4}$

6) If $L\{f(t)\} = \emptyset(s)$, then $L\{f(at)\} =$ _____.

a) $\emptyset\left(\frac{s}{a}\right)$ b) $\frac{1}{s}\emptyset\left(\frac{s}{a}\right)$

c) $\emptyset'\left(\frac{s}{a}\right)$ d) $\frac{1}{a}\emptyset\left(\frac{s}{a}\right)$

7) $L^{-1}\left\{\frac{1}{s^2+3^2}\right\} =$_____.

a) $\frac{1}{3}\sin 3t$ b) $\frac{1}{3}\cos 3t$

c) $\frac{1}{3}\cosh 3t$ d) $\frac{1}{3}\sinh 3t$

8) For $\frac{d^2y}{dx^2} + 4\frac{dy}{dx} + 3y = 3e^{2x}$, the particular integral is _____.

a) $\frac{1}{15}e^{2x}$ b) $3e^{2x}$

c) $\frac{1}{5}e^{2x}$ d) $C_1e^{-x} + C_2e^{-2x}$

9) The general solution of the equation $(D^3 - 7D - 6)y = 0$ is _____.

a) $y = c_1e^{-x} + c_2e^{2x} + c_3e^{-3x}$

b) $y = c_1e^{-x} + c_2e^{2x} + c_3e^{3x}$

c) $y = c_1e^{-x} + c_2e^{-2x} + c_3e^{-3x}$

d) None of these

10) $z\{k\} =$_____ for $|z| > 1$

a) $\frac{z}{z-1}$ b) $\frac{1}{(z-1)^2}$

c) $\frac{z}{(z-1)^2}$ d) $\frac{z}{(z+1)^2}$

11) If $z\{f(k)\} = F(z)$, then $z\{a^k f(k)\} =$ _____.

a) $f\left(\frac{a}{z}\right)$ b) $f\left(\frac{z}{a}\right)$

c) $\frac{1}{a}f\left(\frac{z}{a}\right)$ d) None

12) $Z\left\{\frac{1}{k!}\right\} =$? for $k \geq 0$

a) e^z b) $e^{\frac{1}{z}}$

c) $\frac{1}{z}$ d) $\frac{1}{1-z}$

13) The Fourier sine transform of $f(x)$ is given by _____.

a) $\sqrt{\frac{2}{\pi}}\int_{-\infty}^{\infty} f(x)\sin sx\ dx$

b) $\int_{-\infty}^{\infty} f(x)\cos sx\ dx$

a) Solve : $(D^2+4D+5)y=-2\cos hx+2^x$

b) Solve $(D^2+2D+1)y=x\cos x$

c) Find Z-transform of $x_k=2^k\cos(3k+2)\,,k\geq 0$

d) Find Z-transform of $x_k=k^2e^{-ak},k\geq 0$

e) Find the inverse Laplace transform of following by using the Convolution theorem of $\left[\frac{1}{s(s^2+4)}\right]$

Q.3 Attempt any three of the following. **09**

a) Evaluate by using Laplace transform $\int_0^\infty\left(\frac{e^{-t}-e^{-3t}}{t}\right)dt$

b) Find the inverse Z-transform of $f(k)=\begin{cases}4^k, & k<0\\3^k, & k\geq 0\end{cases}$

c) Find $Z\{e^{-3k}\sin 2k\},k\geq 0$

d) Solve $(D^2-1)y=(1+e^{-x})^2$

e) Find Laplace Transform of $\{t\cos 2t\}$

Q.4 Attempt any two **10**

a) Find the inverse Z-transform of $\frac{1}{(z-a)^2}$ if

1) $|z|<a$,
2) $|z|>a$,

b) Find the inverse Laplace transform of following by using the Convolution theorem of $\left[\frac{s^2}{(s^2+a^2)(s^2+b^2)}\right]$

c) Solve $(D^2-6D+13)y=e^{x\log 2}+8e^{3x}\sin 4x$

Section – II

Q.5 Attempt any three **09**

a) Evaluate $\int_0^5 \frac{1}{4x+5} dx$ using $n = 5$ by Trapezoidal rule.

b) Evaluate $I = \int_0^2 e^{-x} dx$ by using the Simpson's 1/3rd rule given h= 0.5

c) Obtain half range cosine series $f(x) = x$ in $0 < x < 1$

d) Find the Fourier series expansion of $f(x) = x^2$ in $(-\pi, \pi)$

e) Find the Fourier transform of $f(x) = \begin{cases} \frac{1}{2\epsilon}, & |x| \leq \epsilon \\ 0, & |x| > \epsilon \end{cases}$

Q.6 Attempt any three **09**

a) Find f(x) if its Fourier sine transform e^{-as}

b) Find the Fourier cosine transform of

$f(x)$, if $f(x) = \begin{cases} 1, & 0 \leq x < 1 \\ 0, & x \geq 1 \end{cases}$

c) Find the Fourier series expansion of $f(x) = x$ in $(-\pi, \pi)$

d) Solve by Newton Raphson method $x^4 - x = 10$ correct to four decimal places. (perform two iterations only)

e) Find $\int_0^6 \frac{1}{1+x^2} dx \; n = 6$ using Simpson's 3/8th rule.

Q.7 Attempt any two. **10**

a) Find $\int_1^8 \frac{1}{1+x} dx \; h = 1$ by using Trapezoidal rule and Simpson's 1/3rd rule.

b) Find Fourier transform of

$f(x) = 1 \; |x| < k$

$= 0 \; |x| > k$ and

Hence evaluate i) $\int_{-\infty}^{\infty} \frac{\sin sk . \cos sk}{s} ds$ ii) $\int_{-\infty}^{\infty} \frac{\sin ks}{s} ds$

c) Find the Fourier series expansion of the function $f(x) = e^{-\alpha x}$ in $(0, 2\pi)$

S.Y. (B. Tech) (Sem-I) (New) (NEP CBCS) Examination: March/April-2025
MECHANICAL ENGINEERING
Mathematics for Software and Hardware (OE-01E)

Day & Date: Wednesday 21-05-2025 Max. Marks: 70
Time: 03:00 PM To 06:00 PM

Instructions: 1) Q. No. 1 is compulsory. It should be solved in the first 30 minutes in Answer Book Page no 03 (Starting page of the Answer Book). Each question carries one mark.
2) Don't forget to Mention question paper set (P/Q/R/S) on top of page.
3) Figures to the right indicates full marks.
4) Use of non-programmable calculator is allowed.

MCQ/Objective Type Questions

Duration: 30 Minutes Marks:14

Q.1 Choose the correct Answer. **14**

1) $z\{k\} =$_____ for $|z| > 1$

a) $\frac{z}{z-1}$ b) $\frac{1}{(z-1)^2}$

c) $\frac{z}{(z-1)^2}$ d) $\frac{z}{(z+1)^2}$

2) If $z\{f(k)\} = F(z)$, then $z\{a^k f(k)\} =$ _____.

a) $f\left(\frac{a}{z}\right)$ b) $f\left(\frac{z}{a}\right)$

c) $\frac{1}{a} f\left(\frac{z}{a}\right)$ d) None

3) $Z\left\{\frac{1}{k!}\right\} =?$ for $k \geq 0$

a) e^z b) $e^{\frac{1}{z}}$

c) $\frac{1}{z}$ d) $\frac{1}{1-z}$

4) The Fourier sine transform of $f(x)$ is given by _____.

a) $\sqrt{\frac{2}{\pi}} \int_{-\infty}^{\infty} f(x) \sin sx \, dx$ b) $\int_{-\infty}^{\infty} f(x) \cos sx \, dx$

c) $\sqrt{\frac{2}{\pi}} \int_{0}^{\infty} f(x) \sin sx \, dx$ d) $\sqrt{\frac{\pi}{2}} \int_{0}^{\infty} f(x) \sin sx \, dx$

5) From the result $\int_{-\infty}^{\infty} \frac{\cos sx.\sin sk}{s} ds = \begin{cases} \pi & , \ |x| < k \\ 0 & , \ |x| > k \end{cases}$ we can deduce that $\int_0^{\infty} \frac{\sin sk}{s} \, ds =$ _____.

a) 0 b) 1

c) π d) $\frac{\pi}{2}$

6) The first real positive root of $x^3 = 6x - 4$ by Newton Raphson method near $x_0 = 1$ is _____.

a) 0.6667 b) 0.6

c) 0.4 d) 0.3

7) How many steps does the fourth-order Runge-Kutta method use?

a) Two steps b) Five steps

c) Four steps d) Three steps

8) In the interval $(0, a)$ the constant term in the Fourier series of $f(x) = \frac{a}{2} - x$ is _____.

a) 0 b) 1

c) $\frac{a^2}{2\pi}$ d) $\frac{a^2}{4\pi}$

9) Fourier series of $f(x) = x \ in(-\pi, \pi)$ will contain ____

a) No sine term b) No cosine term

c) Both cosine and sine term d) None of these

10) Laplace transform of $\int_0^t u^3 du =$_____.

a) $\frac{3}{s^5}$ b) $\frac{6}{s^5}$

c) $\frac{1}{s^5}$ d) $\frac{6}{s^4}$

11) If $L\{f(t)\} = \emptyset(s)$, then $L\{f(at)\} =$ _____.

a) $\emptyset\left(\frac{s}{a}\right)$ b) $\frac{1}{s}\emptyset\left(\frac{s}{a}\right)$

c) $\emptyset'\left(\frac{s}{a}\right)$ d) $\frac{1}{a}\emptyset\left(\frac{s}{a}\right)$

12) $L^{-1}\left\{\frac{1}{s^2+3^2}\right\} =$_____.

a) $\frac{1}{3}\sin 3t$ b) $\frac{1}{3}\cos 3t$

c) $\frac{1}{3}\cosh 3t$ d) $\frac{1}{3}\sinh 3t$

13) For $\frac{d^2y}{dx^2} + 4\frac{dy}{dx} + 3y = 3e^{2x}$, the particular integral is _____.

a) $\frac{1}{15}e^{2x}$ b) $3e^{2x}$

c) $\frac{1}{5}e^{2x}$ d) $C_1e^{-x} + C_2e^{-2x}$

14) The general solution of the equation $(D^3 - 7D - 6)y = 0$ is _____.

a) $y = c_1e^{-x} + c_2e^{2x} + c_3e^{-3x}$

b) $y = c_1e^{-x} + c_2e^{2x} + c_3e^{3x}$

c) $y = c_1e^{-x} + c_2e^{-2x} + c_3e^{-3x}$

d) None of these

MCQ/Objective Type Questions

Duration: 30 Minutes Marks:14

Q.1 Choose the correct Answer. **14**

1) What is feedback in communication?
a) The process of encoding a message.
b) The process of transmitting the message.
c) The response or reaction to a message.
d) The process of decoding a message.

2) In the process of communication 'Encoding' means _____.
a) Using symbol to express an idea
b) Deciphering the message
c) Creating noise in the communication
d) Interpreting the meaning of message

3) Empathy refers to: _____.
a) Capacity to understand or feel what another person feels
b) Having better understanding of partner's emotions
c) The higher the likelihood of self harm
d) Getting what one wants out of the relationship

4) Repots, suggestions, appeals grievances etc. are examples of: _____.
a) Down ward communication
b) Upward communication
c) Horizontal communication
d) Informal communication

5) Informal communication is commonly known as: _____.
a) Down ward communication b) Upward communication
c) Horizontal communication d) Grapevine

6) _____ is not a communication barrier?
a) Language b) Culture
c) Habits d) Physical

7) Which of the following is NOT a component of communication?
a) Sender b) Message
c) Receiver d) Translator

8) Emotional Intelligence primarily refers to the ability to: _____.
a) Understand and manage one's own emotions and the emotions of others
b) Solve mathematical problems
c) Memorize large amounts of information
d) Make logical decisions without emotions

9) Time management can help reduce stress by: _____
a) Creating unnecessary pressure
b) Organizing tasks and prioritizing effectively
c) Avoiding responsibilities altogether
d) Increasing the workload

10) The term “self-regulation” in Emotional Intelligence means: _____.
a) Hiding your emotions from others
b) Controlling impulsive behaviours and adapting to changing circumstances
c) Ignoring your emotional responses
d) Following strict rules without considering emotions

11) What is the primary purpose of a job interview?
a) To test the candidate's academic knowledge
b) To compare the candidate's qualifications with others
c) To discuss salary expectations only
d) To assess the candidate’s suitability for the job role

12) What kind of information will you collect before going to an interview?
a) About the job you are applying for
b) About the company
c) About the work culture
d) All of the above

13) Which of the following is an effective stress management technique?
a) Procrastination
b) Deep breathing and relaxation exercises
c) Avoiding physical activity
d) Excessive multitasking

14) Which of the following is an important step to prepare for an interview?
a) Memorizing answers word for word
b) Arriving late to showcase confidence
c) Avoiding practice to appear natural
d) Researching the company and role

a) The process of encoding a message.
b) The process of transmitting the message.
c) The response or reaction to a message.
d) The process of decoding a message.

11) In the process of communication 'Encoding' means _____.
a) Using symbol to express an idea
b) Deciphering the message
c) Creating noise in the communication
d) Interpreting the meaning of message

12) Empathy refers to: _____.
a) Capacity to understand or feel what another person feels
b) Having better understanding of partner's emotions
c) The higher the likelihood of self harm
d) Getting what one wants out of the relationship

13) Repots, suggestions, appeals grievances etc. are examples of: _____.
a) Down ward communication
b) Upward communication
c) Horizontal communication
d) Informal communication

14) Informal communication is commonly known as: _____.
a) Down ward communication b) Upward communication
c) Horizontal communication d) Grapevine

Soft Skills and Personality Development (OE-01F)

Day & Date: Wednesday 21-05-2025 Max. Marks: 56
Time: 03:00 PM To 06:00 PM

Instructions: 1) All questions are compulsory.
2) Figures to the right indicate full marks.

Section – I

Q.2 Attempt any Two. **12**

a) Define human communication and explain importance of communication.
b) Explain in brief:
1) Personal Barrier
2) Social Barrier
c) Enlighten in a brief strategy to improve emotional intelligence.

Q.3 Attempt any Four. **16**

a) Explain importance of emotional intelligence.
b) State advantages and disadvantages of informal communication.
c) Describe different modes of communication.
d) Highlight role of social awareness as key factor of emotional intelligence.
e) Explain relationship management as key factor of emotional intelligence.

Section – II

Q.4 Attempt any Two. **12**

a) What is interview? Explain various steps in the process of interview.
b) Explain importance of time management.
c) Explain the four P's of effective presentation.

Q.5 Attempt any Four. **16**

a) Explain importance of stress management.
b) Explain various types of interviews.
c) Describe various strategies for effective time management.
d) Explain various strategies of stress management.
e) Write short note on: Non- verbal aspects of presentation.

S. Y. (B.Tech.) (Sem-I) (New) (NEP CBCS) Examination: March/April-2025
MECHANICAL ENGINEERING
Design Thinking: Business Innovation Framework (CIVMDM-01A)

Day & Date: Thursday 22-05-2025 Max. Marks: 70
Time: 03:00 PM To 06:00 PM

Instructions: 1) Q. No. 1 is compulsory. It should be solved in the first 30 minutes in Answer Book Page no. 03 (Starting page of the Answer Book). Each question carries one mark.
2) Don't forget to mention question paper set (P/Q/R/S) on top of page.
3) Figures to the right indicates full marks.

MCQ/Objective Type Questions

Duration: 30 Minutes Marks:14

Q.1 Choose the correct Answer. **14**

1) What is the primary focus of Design Thinking?
a) Maximizing shareholder
b) Developing innovative and user-centered solutions
c) Streamlining manufacturing processes
d) Enhancing employee productivity

2) Which of the following correctly lists the first three phases of the Design Thinking process?
a) Empathize, Ideate, Prototype
b) Define, Ideate, Test
c) Empathize, Define, Ideate
d) Prototype, Test, Implement

3) In the context of Design Thinking, what is "brainstorming" used for?
a) Generating a wide range of ideas
b) Testing final products
c) Developing financial models
d) Identifying user pain points

4) What does a "customer journey map" help to visualize?
a) The financial cost of product development
b) The steps a customer goes through while interacting with a product or service
c) The design specifications of a product
d) The competitive landscape of a market

5) Which tool in Design Thinking helps in understanding the target user's needs and behaviors?
a) Prototype b) Persona
c) SWOT analysis d) Business model canvas

6) What is the final phase in the Design Thinking process?
a) Test b) Implement
c) Prototype d) Ideate

7) Which of the following is NOT an objective of design thinking?
a) To create user-friendly products
b) To streamline manufacturing processes
c) To encourage iterative prototyping
d) To enhance collaboration among teams

8) Which of the following is a benefit of using design thinking?
a) Reduces product variety b) Increases customer satisfaction
c) Limits team collaboration d) Eliminates risk in decision-making

9) What role does technology play in innovation management?
a) It complicates processes
b) It is irrelevant to innovation
c) It serves as a tool for enhancing efficiency and creativity
d) It replaces human input

10) Which leadership style involves making decisions based on input from team members?
a) Autocratic b) Laissez-faire
c) Democratic d) Transactional

11) What does "Product Solution Fit" refer to?
a) The alignment of the product with customer needs and problems
b) The product's price in relation to competitors
c) The marketing strategy for the product
d) The technical specifications of the product

12) Which of the following best defines "Product Market Fit"?
a) The degree to which a product meets the demands of a specific market
b) The number of products available in the market
c) The financial performance of a product
d) The product's popularity on social media

13) What is the primary goal of service design?
a) To reduce costs
b) To enhance customer experience
c) To standardize services
d) To simplify service offerings

14) Which of the following is a key principle of service design?
a) Focus on profitability over customer satisfaction
b) User-centered design
c) Minimal feedback from users
d) Rigid service processes

MCQ/Objective Type Questions

Duration: 30 Minutes Marks:14

Q.1 Choose the correct alternative from the given options. 14

1) What does GIS integrate spatial data with?
a) Other data resources b) Only tabular data
c) Only hard copy maps d) Only digital maps

2) What is the purpose of GIS software?
a) Data management and analysis
b) Creating physical maps
c) Collecting data only
d) Storing non-spatial data

3) Which of the following is a key function of an information system?
a) Data storage only
b) Data collection and processing
c) Document shredding
d) Manual calculations

4) Statistical data in GIS is primarily used for _____.
a) Data visualization b) Data analysis and interpretation
c) Data storage d) Data collection

5) Satellite data is most commonly used in GIS for _____.
a) Remote sensing b) Data entry
c) Statistical analysis d) Map digitization

6) A zone with a width created around a spatial feature is called as ____.
a) dissolve b) buffer
c) relation d) overlay

7) Network databases is to support relationships of _____.
a) many to many b) one to many
c) none of above d) all of above

8) The sensitivity of a sensor to detect slight differences in energy (brightness) is _____.
a) Spectral resolution b) Spatial resolution
c) Temporal resolution d) Radiometric resolution

9) Descriptive information provides qualitative data about the characteristics and conditions of Earth's surface features _____.
a) qualitative b) quantitative
c) both d) none

10) The instruments which provide electromagnetic radiation of specified wave length or a band of wave lengths to illuminate the earth surface, are called _____.
a) scanner b) passive sensors
c) active sensors d) none of these

11) Canal site selection using GIS is primarily concerned with _____.
a) Mapping the soil composition along the canal route
b) Studying land use in the surrounding areas
c) Identifying areas with the most water flow potential
d) Both a and c

12) What is the primary application of GIS in map revision?
a) To create new maps from scratch
b) To update and modify existing maps with current data
c) To design and print physical maps
d) To analyze spatial data for new projects

13) Which phase of GIS project planning involves the most detailed work on defining technical requirements and hardware/software needs?
a) feasibility study
b) planning and requirements analysis
c) design phase
d) testing phase

14) Which of the following is an example of a GIS design project task?
a) data model development
b) stakeholder consultation
c) site analysis and requirement definition
d) all of these

6) Which phase of GIS project planning involves the most detailed work on defining technical requirements and hardware/software needs?
a) feasibility study
b) planning and requirements analysis
c) design phase
d) testing phase

7) Which of the following is an example of a GIS design project task?
a) data model development
b) stakeholder consultation
c) site analysis and requirement definition
d) all of these

8) What does GIS integrate spatial data with?
a) Other data resources
b) Only tabular data
c) Only hard copy maps
d) Only digital maps

9) What is the purpose of GIS software?
a) Data management and analysis
b) Creating physical maps
c) Collecting data only
d) Storing non-spatial data

10) Which of the following is a key function of an information system?
a) Data storage only
b) Data collection and processing
c) Document shredding
d) Manual calculations

11) Statistical data in GIS is primarily used for _____.
a) Data visualization
b) Data analysis and interpretation
c) Data storage
d) Data collection

12) Satellite data is most commonly used in GIS for _____.
a) Remote sensing
b) Data entry
c) Statistical analysis
d) Map digitization

13) A zone with a width created around a spatial feature is called as ____.
a) dissolve
b) buffer
c) relation
d) overlay

14) Network databases is to support relationships of _____.
a) many to many
b) one to many
c) none of above
d) all of above

Set Q

S. Y (B. Tech) (Sem-I) (New) (NEP CBCS) Examination: March/April-2025
CIVIL ENGINEERING
Introduction to Geographic Information System (CIVMDM-01B)

Day & Date: Thursday, 22-05-2025 Max. Marks: 56
Time: 03:00 PM To 06:00 PM

Instructions: 1) All questions are compulsory.
2) Figures to the right indicate full marks.
3) Draw neat sketch whenever necessary.

Section - I

Q.2 Attempt any four from the following. **16**
a) Describe commercial & open source GIS softwares.
b) Describe in detail data organisation method-layered based approach.
c) Describe field data & its collection methods.
d) Discuss advantages & disadvantages of aerial photographs.
e) Describe in detail run-length encoding.
f) Describe in detail about data analysis.

Q.3 Attempt any two from the following. **12**
a) Describe in detail digitizers, its process, advantages & disadvantages.
b) Describe the organisation of data in GIS.
c) Explain various data models used in DBMS in detail.

Section - II

Q.4 Attempt any four from the following. **16**
a) Explain in detail passive & active remote sensing with sketch.
b) Describe in detail metric information.
c) Describe application of GIS in dam site selection.
d) Describe application of GIS in soil erosion.
e) Explain in detail phases of planning & implementation.
f) Describe characteristics of advanced GIS projects.

Q.5 Attempt any two from the following. **12**
a) Describe need of integration of remote sensing & GIS in detail.
b) Describe key application of GIS in map revision.
c) Describe benefits of GIS implementation plan.

CIVIL ENGINEERING
Introduction to Geographic Information System (CIVMDM-01B)

Day & Date: Thursday, 22-05-2025 Max. Marks: 70
Time: 03:00 PM To 06:00 PM

Instructions: 1) Q. No. 1 is compulsory. It should be solved in the first 30 minutes in Answer Book Page no 03 (Starting page of the Answer Book). Each question carries one mark.
2) Don't forget to Mention question paper set (P/Q/R/S) on top of page.
3) Figures to the right indicates full marks.

MCQ/Objective Type Questions

Duration: 30 Minutes Marks:14

Q.1 Choose the correct alternative from the given options. 14

1) Canal site selection using GIS is primarily concerned with _____.
a) Mapping the soil composition along the canal route
b) Studying land use in the surrounding areas
c) Identifying areas with the most water flow potential
d) Both a and c

2) What is the primary application of GIS in map revision?
a) To create new maps from scratch
b) To update and modify existing maps with current data
c) To design and print physical maps
d) To analyze spatial data for new projects

3) Which phase of GIS project planning involves the most detailed work on defining technical requirements and hardware/software needs?
a) feasibility study
b) planning and requirements analysis
c) design phase
d) testing phase

4) Which of the following is an example of a GIS design project task?
a) data model development
b) stakeholder consultation
c) site analysis and requirement definition
d) all of these

5) What does GIS integrate spatial data with?
a) Other data resources b) Only tabular data

MCQ/Objective Type Questions

Duration: 30 Minutes Marks:14

Q.1 Choose the correct Answer. **14**

1) The terms in SOP are called _____.
a) max terms b) min terms
c) mid terms d) sum terms

2) The number of cells in a K-map with n- variables.
a) 2n b) n^2
c) 2^n d) n

3) The logical sum of two or more logical product terms is called _____.
a) SOP b) POS
c) OR operation d) NAND operation

4) A Karnaugh map (K-map) is an abstract form of _____ diagram organized as a matrix of squares.
a) Venn Diagram b) Cycle Diagram
c) Block diagram d) Triangular Diagram

5) If A and B are the inputs of a half adder, the sum is given by _____.
a) A AND B b) A OR B
c) A XOR B d) A EX-NOR B

6) Let A and B is the input of a Subtractor, then the output will be _____.
a) A XOR B b) A AND B
c) A OR B d) A EX-NOR B

7) What is a multiplexer?

a) It is a type of decoder which decodes several inputs and gives one output
b) A multiplexer is a device which converts many signals into one
c) It takes one input and results into many output
d) It is a type of encoder which decodes several inputs and gives one output

8) A basic S-R flip-flop can be constructed by cross-coupling of which basic logic gates?

a) AND or OR gates
b) XOR or XNOR gates
c) NOR or NAND gates
d) AND or NOR gates

9) In S-R flip-flop, if Q = 0 the output is said to be _____.

a) Set
b) Reset
c) Previous state
d) Current state

10) A D-Flip flop is said to be transparent, when _____.

a) the output is Low
b) the output is High
c) the output follows clock
d) the output follows input

11) How many stable state/states present in flip-flop?

a) 1
b) 0
c) 2
d) 4

12) How many natural states will there be in a 4-bit ripple counter?

a) 4
b) 8
c) 16
d) 32

13) How many flip-flops are required to construct a decade counter?

a) 4
b) 8
c) 5
d) 10

14) A 4-bit counter has a maximum modulus of _____.

a) 3
b) 6
c) 8
d) 16

a) 4 b) 8
c) 16 d) 32

8) How many flip-flops are required to construct a decade counter?
a) 4 b) 8
c) 5 d) 10

9) A 4-bit counter has a maximum modulus of _____.
a) 3 b) 6
c) 8 d) 16

10) The terms in SOP are called _____.
a) max terms b) min terms
c) mid terms d) sum terms

11) The number of cells in a K-map with n- variables.
a) 2n b) n^2
c) 2^n d) n

12) The logical sum of two or more logical product terms is called _____.
a) SOP b) POS
c) OR operation d) NAND operation

13) A Karnaugh map (K-map) is an abstract form of _____ diagram organized as a matrix of squares.
a) Venn Diagram b) Cycle Diagram
c) Block diagram d) Triangular Diagram

14) If A and B are the inputs of a half adder, the sum is given by _____.
a) A AND B b) A OR B
c) A XOR B d) A EX-NOR B

S.Y. (B. Tech) (Sem-I) (NEP New) (CBCS) Examination: March/April-2025
MECHANICAL ENGINEERING
Digital Techniques (ENTMDM-01A)

Day & Date: Thursday 22-05-2025 Max. Marks: 56
Time: 03:00 PM To 06:00 PM

Instructions: 1) All questions are compulsory.
2) Figures to the right indicate full marks.

Section – I

Q.2 Attempt any Four. **16**

a) Explain Standard representation of logic function.
b) Express Boolean function $F = xy + x'z$ as a product of Max-terms.
c) Explain Half Adder with logic diagram.
d) Explain 1:4 De-Multiplexer with truth Table and logic diagram.
e) Explain stepwise procedure for K-map solution.

Q.3 Attempt any two. **12**

a) Explain Binary to Gray conversion in details.
b) Explain Full Adder with suitable diagram
c) Solve using K Map -

$$F\ (A, B, C, D)\ = \sum (0, 2, 5, 7, 8, 10, 13, 15)$$

Section – II

Q.4 Attempt any Four. **16**

a) Explain basic SR Flip-flop using logic gates.
b) Explain D-Flip-Flop with suitable diagram.
c) Differentiate between Synchronous and Asynchronous sequential circuit.
d) Explain PISO shift register.
e) Explain Race-Round condition. How this condition will overcome?

Q.5 Attempt any two. **12**

a) Design MOD-10 Counter.
b) Explain JK Flip flop with suitable diagram, and truth table.
c) Explain 4-bit UP/DOWN counter with suitable diagram.

MECHANICAL ENGINEERING
Sensor Technology (ENTMDM-01B)

Day & Date: Thursday 22-05-2025 Max. Marks: 70
Time: 03:00 PM To 06:00 PM

Instructions: 1) Q. No. 1 is compulsory. It should be solved in the first 30 minutes in Answer Book Page no 03 (Starting page of the Answer Book). Each question carries one mark.
2) Don't forget to Mention question paper set (P/Q/R/S) on top of page.
3) Figures to the right indicates full marks.
4) Use of non-programmable calculator is allowed.

MCQ/Objective Type Questions

Duration: 30 Minutes Marks:14

Q.1 Choose the correct Answer. **14**

1) Thermocouple generate output voltage according to _____.
a) Circuit parameters b) Humidity
c) Temperature d) Voltage

2) Sensor is a type of transducer.
a) True b) False

3) Which factor affects the least while selection of sensor?
a) Size b) Accuracy
c) Colour d) Durability

4) Which sensor should one prefer for accurate measurement of distance upto 1 meter?
a) Ultrasonic sensor b) Infrared sensor
c) PIR sensor d) Photoresistor sensor

5) IR sensors can't work in dark environment.
a) True b) False

6) Which sensor should be used for calculating humidity?
a) DHT11 b) LM335Z/NOPB
c) HC-SR04 d) MPX10DP

7) What is the primary purpose of a strain gauge?
a) Measure temperature
b) Measure pressure
c) Measure deformation or strain
d) Measure voltage

8) What is a Wheatstone bridge used for in the context of strain gauges?
a) To amplify the signal
b) To convert mechanical strain to a voltage output
c) To filter noise from the signal
d) To measure temperature

9) Signal conditioning is carried out in _____.
a) Transducer housing b) Processor
c) Network interface d) None of the mentioned

10) What principle does a thermocouple operate on?
a) Seebeck effect b) Peltier effect
c) Joule heating d) Hall effect

11) Which material is most commonly used in RTDs for temperature sensing?
a) Copper b) Aluminum
c) Platinum d) Nickel

12) What is the typical temperature range for standard RTDs?
a) -200 to 500 °C b) -50 to 200 °C
c) 0 to 100 °C d) -100 to 1000 °C

13) What type of electrode is commonly used in a pHsensor?
a) Reference electrode b) Glass electrode
c) Metal electrode d) Carbon electrode

14) What is the output of atypical pHsensor?
a) Voltage b) Resistance
c) Current d) Frequency

Section – I

Q.2 Attempt any Four. **16**

a) Define Motion Transducer. Explain different types of motion sensor with example.
b) Write a short note on sensor selection.
c) Define Sensor & Transducer. How do they differ from each other?
d) What is Calibration? With the help of block diagram explain procedure of calibration.
e) Explain concept of strain gauge & light intensity.
f) Describe concept of motion transducer in detail.

Q.3 Attempt any two. **12**

a) Discuss the classification of sensor based on Measurand. Provide the example of each type and their application.
b) State the working principle of LDR. Explain the construction & working of it. Also state advantages, disadvantages & application of it.
c) Write a note on:-
1) Temperature sensing
2) Light Intensity
3) Strain gauge
4) Magnetic field Sensor

Section – II

Q.4 Attempt any Four. **16**

a) With the help of neat sketch explain concept of LVDT.
b) Illustrate concept of ultrasonic sensor & Chemical sensor in detail
c) With the help of explain RTD.
d) With the help of neat sketch explain concept of RVDT.
e) Describe the concept of motion transducer.

Q.5 Attempt any two. **12**

a) With the help of neat sketch explain concept of AC Tachometer & DC Tachometer.

b) Define following concepts:

1) Humidity Sensor
2) Vibration Sensor
3) Gas Sensor

c) With the help of neat sketch explain Thermocouple & Thermistor.

MCQ/Objective Type Questions

Duration: 30 Minutes Marks:14

Q.1 Choose the correct Answer. **14**

1) What is the output of print(3 * 4.5 // 2)?
a) 5 b) 6
c) 7 d) 8

2) Which data type is mutable in Python?
a) int b) float
c) tuple d) list

3) What is the primary purpose of the Python interpreter?
a) To convert Python code into machine code directly.
b) To compile Python code into a .exe file.
c) To interpret and execute Python code line by line.
d) To optimize Python code for faster execution.

4) How do you import a function myfunc from a module mymodule?
a) import mymodule .myfunc
b) from mymodule import myfunc
c) import myfunc from mymodule
d) from myfunc import mymodule

5) Which statement about tuples in Python is true?
a) Tuples can be modified after creation.
b) Tuples are indexed starting from 1.
c) Tuples use square brackets for element access.
d) Tuples are immutable.

6) Given s = 'Hello World!', what does s[1:5] evaluate to?
a) 'Hell' b) 'ello'
c) 'ello ' d) None of the above

7) Which keyword is used to handle exceptions in Python?

a) catch b) except
c) handle d) recover

8) What does the self parameter represent in Python class methods?

a) It refers to the current instance of the class.
b) It is used to denote private attributes.
c) It is used for method overloading.
d) It refers to the superclass.

9) What does the following code output?

```
class MyClass:
    def greet(self):
    return "Hello!"
obj = MyClass()
print(obj.greet())
```

a) Hello! b) greet
c) Error d) None

10) How do you open a file myfile.txt in read mode in Python?

a) file = open('myfile.txt', 'r')
b) file = open('myfile.txf)
c) file = open('myfile.txt', mode='read')
d) file = open('myfile.txt', mode='w')

11) Which Python library is used for numerical operations and array manipulations?

a) numpy b) math
c) scipy d) statistics

12) Which Python module is commonly used for writing unit tests?

a) unittest b) pytest
c) testing d) check

13) Which module is used to generate pseudo-random numbers in Python?

a) random b) numpy
c) math d) os

14) What is the default logging level in Python?

a) DEBUG b) INFO
c) WARNING d) ERROR

9) Which data type is mutable in Python?

a) int b) float
c) tuple d) list

10) What is the primary purpose of the Python interpreter?

a) To convert Python code into machine code directly.
b) To compile Python code into a .exe file.
c) To interpret and execute Python code line by line.
d) To optimize Python code for faster execution.

11) How do you import a function myfunc from a module mymodule?

a) import mymodule .myfunc
b) from mymodule import myfunc
c) import myfunc from mymodule
d) from myfunc import mymodule

12) Which statement about tuples in Python is true?

a) Tuples can be modified after creation.
b) Tuples are indexed starting from 1.
c) Tuples use square brackets for element access.
d) Tuples are immutable.

13) Given s = 'Hello World!', what does s[1:5] evaluate to?

a) 'Hell' b) 'ello'
c) 'ello ' d) None of the above

14) Which keyword is used to handle exceptions in Python?

a) catch b) except
c) handle d) recover

Set Q

S.Y. (B.Tech.) (Sem-I) (NEP New) (CBCS) Examination: March/April-2025
MECHANICAL ENGINEERING
Programming basics using Python (CSEMDM-01A)

Day & Date: Thursday 22-05-2025 Max. Marks: 56
Time: 03:00 PM To 06:00 PM

Instructions: 1) All questions are compulsory.
2) Figures to the right indicate full marks.

Section – I

Q.2 Attempt any Four. **16**

a) What is python interpreter? Explain with neat diagram.
b) Differentiate between list and tuples in python.
c) Write a python program to check whether a given string is palindrome.
d) What are the class and objects in python? Explain with syntax and example.
e) What is exceptional handling in python? How it is implemented using try, except and finally block?

Q.3 Attempt any two. **12**

a) Illustrate following control structures and write syntax for each type of control structure.
1) Decision making statements
2) Iterative statements (Loop control statements)
3) Transfer statements
b) Explain string handling functions with syntax and example.
c) Explain inheritance in python with their types.

Section – II

Q.4 Attempt any Four. **16**

a) Explain basic date and time types with syntax and example.
b) Differentiate between shallow copy and deep copy operations.
c) Write a python program to create a 2D Numpy array and perform basic operations like addition, subtraction, division and multiplication.
d) Implement a program to measure execution time of small code snippets.
e) Explain Logging facility in python with all levels of logging.

Q.5 Attempt any two. **12**

a) Explain mathematical functions and pseudo random functions with syntax and example.
b) Define data persistence and implement program for read & write operations on .csv file.
c) Explain the methods of testing and debugging in python. Explain unit test in python.

Programming basics using Python (CSEMDM-01A)

Day & Date: Thursday 22-05-2025 Max. Marks: 70
Time: 03:00 PM To 06:00 PM

Instructions: 1) Q. No. 1 is compulsory. It should be solved in the first 30 minutes in Answer Book Page no 03 (Starting page of the Answer Book). Each question carries one mark.
2) Don't forget to Mention question paper set (P/Q/R/S) on top of page.
3) Figures to the right indicates full marks.

MCQ/Objective Type Questions

Duration: 30 Minutes Marks:14

Q.1 Choose the correct Answer. **14**

1) Which Python library is used for numerical operations and array manipulations?
a) numpy b) math
c) scipy d) statistics

2) Which Python module is commonly used for writing unit tests?
a) unittest b) pytest
c) testing d) check

3) Which module is used to generate pseudo-random numbers in Python?
a) random b) numpy
c) math d) os

4) What is the default logging level in Python?
a) DEBUG b) INFO
c) WARNING d) ERROR

5) What is the output of print(3 * 4.5 // 2)?
a) 5 b) 6
c) 7 d) 8

6) Which data type is mutable in Python?
a) int b) float
c) tuple d) list

7) What is the primary purpose of the Python interpreter?
a) To convert Python code into machine code directly.
b) To compile Python code into a .exe file.
c) To interpret and execute Python code line by line.
d) To optimize Python code for faster execution.

8) How do you import a function myfunc from a module mymodule?
a) import mymodule .myfunc
b) from mymodule import myfunc
c) import myfunc from mymodule
d) from myfunc import mymodule

9) Which statement about tuples in Python is true?
a) Tuples can be modified after creation.
b) Tuples are indexed starting from 1.
c) Tuples use square brackets for element access.
d) Tuples are immutable.

10) Given s = 'Hello World!', what does s[1:5] evaluate to?
a) 'Hell' b) 'ello'
c) 'ello ' d) None of the above

11) Which keyword is used to handle exceptions in Python?
a) catch b) except
c) handle d) recover

12) What does the self parameter represent in Python class methods?
a) It refers to the current instance of the class.
b) It is used to denote private attributes.
c) It is used for method overloading.
d) It refers to the superclass.

13) What does the following code output?

```
class MyClass:
    def greet(self):
    return "Hello!"
obj = MyClass()
print(obj.greet())
```

a) Hello! b) greet
c) Error d) None

14) How do you open a file myfile.txt in read mode in Python?
a) file = open('myfile.txt', 'r')
b) file = open('myfile.txf)
c) file = open('myfile.txt', mode='read')
d) file = open('myfile.txt', mode='w')

4) Assume suitable data wherever necessary.

MCQ/Objective Type Questions

Duration: 30 Minutes Marks:14

Q.1 Choose the correct Answer. **14**

1) _____ model is good for well understood problems, short duration project, and automation of existing manual systems.
a) Waterfall b) Iterative enhancement
c) Prototyping d) Spiral

2) Software consists of ____.
a) Set of instructions + operating procedures
b) Set of programs
c) Programs + documentation + operating procedures
d) Programs + hardware manuals

3) SDLC is framework for ____
a) Requirement b) Design
c) Code & Test d) All of above

4) Black box testing is also called as ____.
a) Structural testing b) Interface testing
c) Stress testing d) Functional testing

5) A detailed project schedule is never ____.
a) fixed b) variable
c) dynamic d) static

6) What is the sequence of maturity levels in CMM framework?
a) Initial, defined, repeatable, managed, and optimizing
b) Initial, defined, repeatable, optimizing, and managed
c) Initial, repeatable, defined, managed, and optimizing
d) Initial, repeatable, defined, optimizing, and managed

7) A ____ is logically separable part of program. It is a program unit that is discrete and identifiable with respect to compiling and loading.

a) Component b) Connector
c) Module d) None of above

8) Risk Management aims to ____ and then take action to minimize their effect on project.

a) Identify cost and estimation
b) Identify risks
c) Identify plan
d) All of above

9) The output of requirement process is ____

a) Validated SRS b) Validation
c) Problem analysis d) Verification

10) White Box Testing is also called as ____.

a) Functional testing b) Structural testing
c) Stress testing d) Interface testing

11) Agile Software Development is depends on ____.

a) Incremental Development
b) Iterative Development
c) Linear Development
d) Both Incremental and Iterative Development

12) ____ is a first level of testing.

a) Unit testing b) Integration Testing
c) System Testing d) None of above

MECHANICAL ENGINEERING
Software Engineering (CSEMDM-01B)

Day & Date: Thursday 22-05-2025 Max. Marks: 56
Time: 03:00 PM To 06:00 PM

Instructions: 1) All questions are compulsory.
2) Figures to the right indicate full marks.
3) Assume suitable data wherever necessary.

SECTION – I

Q.2 Solve: (Any Four) **16**

a) Explain Prototype model.
b) What is SRS? Explain characteristics of SRS.
c) Explain Entity Relationship diagram in detail.
d) Write a short note on Function Oriented Design.
e) Explain characteristics of software process.

Q.3 Solve: (Any Two) **12**

a) Define DFD with all notations and levels. Draw Zero level DFD for Hotel Management System.
b) Draw and Explain waterfall model with its strength and weaknesses.
c) Write a short note on high level design & detailed design.

SECTION – II

Q.4 Solve: (Any Two) **16**

a) Compare White and Black box testing.
b) Explain equivalence partitioning technique of black box testing.
c) Explain CMM with diagram.
d) What are levels of testing? Explain Unit Testing in detail.
e) Write a short note on Agile Project Management.

Q.5 Solve: (Any Two) **12**

a) Explain top down & bottom-up effort estimation technique.
b) Explain Software Configuration Management Process.
c) What is Scrum? Explain in detail Scrum methodology.

MECHANICAL ENGINEERING
Electrical Technology (EEMDM-01A)

Day & Date: Thursday 22-05-2025 Max. Marks: 70
Time: 03:00 PM To 06:00 PM

Instructions: 1) Q. No. 1 is compulsory. It should be solved in the first 30 minutes in Answer Book Page no 03 (Starting page of the Answer Book). Each question carries one mark.
2) Don't forget to Mention question paper set (P/Q/R/S) on top of page.
3) Figures to the right indicates full marks.
4) Make suitable assumptions if necessary and state them clearly.

MCQ/Objective Type Questions

Duration: 30 Minutes Marks:14

Q.1 Choose the correct Answer. **14**

1) Which of the following is an advantage of electronic energy meters over induction-type meters?
a) Higher accuracy b) More moving parts
c) More expensive d) Require more maintenance

2) Moving iron instruments have _____.
a) Uniform scale b) Squared scale
c) Log scale d) Linear scale

3) Digital voltmeters convert _____.
a) Analog to digital signal b) Digital to analog signal
c) Current to voltage d) Resistance to voltage

4) In a separately excited DC motor, the field windings are _____.
a) Connected in series with the armature
b) Supplied from an independent source
c) Connected to the same supply as the armature
d) None of above

5) A single-phase induction motor is inherently _____.
a) Self-starting
b) Not self-starting
c) More efficient than a three-phase motor
d) Can operate on both AC and DC supplies

6) The synchronous speed of a synchronous generator is dependent on __.
a) Rotor size
b) Number of poles and frequency
c) Magnetic field strength
d) Load current

7) The synchronous generator operates at _____.
a) A variable speed
b) A constant speed
c) A speed proportional to the load
d) A speed inversely proportional to the load

8) What is the main advantage of a permanent magnet DC motor over a conventional DC motor?
a) No need for a field winding b) Higher efficiency at low speeds
c) Reduced cost of construction d) All of the above

9) Which of the following is an application of PMSMs?
a) Fans b) Electric vehicles
c) HVAC systems d) All of the above

10) What is the purpose of laminated cores in AC machines?
a) Reduce mechanical stress
b) Minimize eddy current losses
c) Increase the resistance of the windings
d) Improve heat dissipation

11) In energy-efficient AC motors, the stator windings are often made of _____.
a) Aluminum b) Copper
c) Steel d) Brass

12) Which of the following does not change in a transformer?
a) Current b) Voltage
c) Frequency d) All of the above

13) When a transformer is loaded, the primary current?
a) Increases b) Decreases
c) Remains constant d) Becomes zero

14) Open circuit test on transformers is conducted to determine _____.
a) hysteresis losses b) copper losses
c) core losses d) eddy current losses

Time: 03:00 PM To 06:00 PM

Instructions: 1) All questions are compulsory.
2) Figures to the right indicate full marks.

Section – I

Q.2 Attempt any Four. **16**

a) With neat sketch explain PMMC type instrument.
b) A 3-phase 500V motor load has a power factor of 0.4 two wattmeter connected to measure input. They show input to be 30 KW. Find the reading of each instrument.
c) With neat sketch explain the construction of DC machine.
d) What is the purpose of the auxiliary winding in a single-phase induction motor?
e) Explain the working principle of a synchronous generator.

Q.3 Attempt any two. **12**

a) Explain 1 - ø induction energy meter with neat diagram.
b) Explain the speed control techniques of separately excited dc motor.
c) Explain the principle of operation of 3ø induction motor. With the help of phasor diagram explain how rotating magnetic field is produced?

Section – II

Q.4 Attempt any Four. **16**

a) Explain with neat sketch construction of permanent magnet brushless DC motor.
b) Explain the principle of operation of a linear induction motor.
c) Discuss the techniques used to reduce iron losses in energy-efficient AC machines.
d) A 230/2300V transformer takes a no-load current of 6.5 A and absorbs 187W if the resistance of the primary is 0.6 Ω. Find.
1) the core loss
2) no load power factor
3) active component of current
4) magnetizing current
e) Derive the expression for saving of copper in autotransformer.

Q.5 Attempt any two. **12**

a) What are the applications of Synchronous Reluctance Motor? Explain with phasor diagram torque speed characteristics of Synchronous Reluctance Motor.

b) An energy-efficient AC motor has the following loss components:
Copper losses: 2 kW
Iron losses: 1.5 kW
Friction and windage losses: 0.5 kW
The input power is 25 kW. Calculate the efficiency of the motor.

c) With neat sketch explain open circuit and short circuit test of transformer. How equivalent circuit parameters and efficiency of a transformer are computed?

MCQ/Objective Type Questions

Duration: 30 Minutes Marks:14

Q.1 Choose the correct Answer. **14**

1) What is an electric vehicle?
a) Vehicle powered by gasoline
b) Vehicle powered by Electricity
c) Vehicle powered by Diesel
d) Vehicle powered by solar energy

2) What is the function of electric motor in an EV?
a) To charge the battery b) To power the wheels
c) To generate electricity d) To cool the vehicle

3) What is the purpose of battery management system (BMS) in an EV?
a) To monitor and control the battery's state of charge
b) To power the electric motor
c) To generate electricity
d) To cool the vehicle

4) What is the primary advantage of hybrid electric vehicle?
a) Increase driving range
b) Decreased operating cost
c) Reduced Greenhouse gas emissions
d) All of above

5) What type of battery is commonly used in Battery Electric Vehicles?
a) Lead -acid battery b) Nickel- metal hybrid battery
c) Lithium- ion battery d) All of above

6) Which is the types of electric vehicle charging?
a) Level one charging b) Level two charging
c) DC fast charging d) All of the above

7) Which of the following affects battery lifespan?
a) Depth of discharge (DOD) b) Temperature
c) Charging Frequency d) All of above

8) What type of fuel do Fuel Cell Electric Vehicles use?
a) Gasoline b) Diesel
c) Hydrogen d) Natural gas

9) What is the primary cause of battery degradation?
a) Overcharge b) Undercharge
c) Depth of discharge d) High temperature

10) How does battery storage system help in grid stability?
a) By supplying reactive power
b) By absorbing excess energy
c) By providing frequency regulation
d) All of above

11) Which of the following is the benefit of Electric Vehicles?
a) Zero emission b) Lower operating cost
c) Improved performance d) All of above

12) What is the purpose of power electronic controller in electric vehicle?
a) To regulate the flow of electrical energy
b) To monitor the vehicles speed
c) To control the onboard charger
d) To regulate the battery's state of charge

13) What is the purpose of equalization in battery Storage?
a) To balance cell voltage b) To increase battery capacity
c) To reduce charging time d) To improve discharge rate

14) What is the primary function of the on board charger in electric vehicle?
a) To charge the battery from an external power source
b) To convert AC power to DC power
c) To regulate battery's state of charge
d) To monitor the vehicles speed

c) To control the onboard charger
d) To regulate the battery's state of charge

6) What is the purpose of equalization in battery Storage?
a) To balance cell voltage b) To increase battery capacity
c) To reduce charging time d) To improve discharge rate

7) What is the primary function of the on board charger in electric vehicle?
a) To charge the battery from an external power source
b) To convert AC power to DC power
c) To regulate battery's state of charge
d) To monitor the vehicles speed

8) What is an electric vehicle?
a) Vehicle powered by gasoline
b) Vehicle powered by Electricity
c) Vehicle powered by Diesel
d) Vehicle powered by solar energy

9) What is the function of electric motor in an EV?
a) To charge the battery b) To power the wheels
c) To generate electricity d) To cool the vehicle

10) What is the purpose of battery management system (BMS) in an EV?
a) To monitor and control the battery's state of charge
b) To power the electric motor
c) To generate electricity
d) To cool the vehicle

11) What is the primary advantage of hybrid electric vehicle?
a) Increase driving range
b) Decreased operating cost
c) Reduced Greenhouse gas emissions
d) All of above

12) What type of battery is commonly used in Battery Electric Vehicles?
a) Lead -acid battery b) Nickel- metal hybrid battery
c) Lithium- ion battery d) All of above

13) Which is the types of electric vehicle charging?
a) Level one charging b) Level two charging
c) DC fast charging d) All of the above

14) Which of the following affects battery lifespan?
a) Depth of discharge (DOD) b) Temperature
c) Charging Frequency d) All of above

Set Q

S.Y. (B. Tech) (Sem-I) (New) (NEP CBCS) Examination: March/April-2025
MECHANICAL ENGINEERING
Basics of Electrical Vehicle (EEMDM-01B)

Day & Date: Thursday 22-05-2025 Max. Marks: 56
Time: 03:00 PM To 06:00 PM

Instructions: 1) All questions are compulsory.
2) Figures to the right indicate full marks.

Section – I

Q.2 Attempt any Four **16**

a) State and explain challenges faced by Hybrid electric vehicle.
b) State and explain Economics and Environmental impacts of using electrical vehicles.
c) State and explain need of Electrical Vehicle.
d) State and Explain common part between ICE and EV drivetrain.
e) State and explain battery pack and battery management system.

Q.3 Attempt any two. **12**

a) State and explain major requirements of electrical vehicles.
b) State and explain types of electric vehicles in brief.
c) State and explain electric vehicle configuration in brief.

Section – II

Q.4 Attempt any Four. **16**

a) State and explain battery based energy storage system.
b) State and Explain components of HEVs drive train system.
c) State and explain alternative novel energy source solar photovoltaic cells, fuel cells, super capacitors and flywheels.
d) State and explain HEVs basic architecture.
e) Compare between Hybrid electric vehicle and Fuel cell electric vehicle.

Q.5 Attempt any two. **12**

a) State and explain overview of batteries and battery parameters, battery charging, regenerative braking.
b) State and Explain classification of HEVs: Conventional HEVs, Grid able HEVs.
c) State and explain fuel efficiency in HEV.

Set R

S.Y. (B. Tech) (Sem-I) (New) (NEP CBCS) Examination: March/April-2025
MECHANICAL ENGINEERING
Basics of Electrical Vehicle (EEMDM-01B)

Day & Date: Thursday 22-05-2025 Max. Marks: 70
Time: 03:00 PM To 06:00 PM

Instructions: 1) Q. No. 1 is compulsory. It should be solved in the first 30 minutes in Answer Book Page no 03 (Starting page of the Answer Book). Each question carries one mark.
2) Don't forget to Mention question paper set (P/Q/R/S) on top of page.
3) Figures to the right indicates full marks.

MCQ/Objective Type Questions

Duration: 30 Minutes Marks:14

Q.1 Choose the correct Answer. **14**

1) Which of the following is the benefit of Electric Vehicles?
a) Zero emission b) Lower operating cost
c) Improved performance d) All of above

2) What is the purpose of power electronic controller in electric vehicle?
a) To regulate the flow of electrical energy
b) To monitor the vehicles speed
c) To control the onboard charger
d) To regulate the battery's state of charge

3) What is the purpose of equalization in battery Storage?
a) To balance cell voltage b) To increase battery capacity
c) To reduce charging time d) To improve discharge rate

4) What is the primary function of the on board charger in electric vehicle?
a) To charge the battery from an external power source
b) To convert AC power to DC power
c) To regulate battery's state of charge
d) To monitor the vehicles speed

5) What is an electric vehicle?
a) Vehicle powered by gasoline
b) Vehicle powered by Electricity
c) Vehicle powered by Diesel
d) Vehicle powered by solar energy

6) What is the function of electric motor in an EV?
a) To charge the battery b) To power the wheels
c) To generate electricity d) To cool the vehicle

7) What is the purpose of battery management system (BMS) in an EV?
a) To monitor and control the battery's state of charge
b) To power the electric motor
c) To generate electricity
d) To cool the vehicle

8) What is the primary advantage of hybrid electric vehicle?
a) Increase driving range
b) Decreased operating cost
c) Reduced Greenhouse gas emissions
d) All of above

9) What type of battery is commonly used in Battery Electric Vehicles?
a) Lead -acid battery b) Nickel- metal hybrid battery
c) Lithium- ion battery d) All of above

10) Which is the types of electric vehicle charging?
a) Level one charging b) Level two charging
c) DC fast charging d) All of the above

11) Which of the following affects battery lifespan?
a) Depth of discharge (DOD) b) Temperature
c) Charging Frequency d) All of above

12) What type of fuel do Fuel Cell Electric Vehicles use?
a) Gasoline b) Diesel
c) Hydrogen d) Natural gas

13) What is the primary cause of battery degradation?
a) Overcharge b) Undercharge
c) Depth of discharge d) High temperature

14) How does battery storage system help in grid stability?
a) By supplying reactive power
b) By absorbing excess energy
c) By providing frequency regulation
d) All of above

MCQ/Objective Type Questions

Duration: 30 Minutes Marks:14

Q.1 Choose the correct Answer. **14**

1) Work envelope generated by Cartesian coordinate robot is _____.
a) sphere b) cylinder
c) rectangular box d) triangle

2) In which scenario would a legged robot be more suitable than a wheeled robot?
a) Racing on a paved track
b) Navigating uneven terrain with obstacles
c) Transporting heavy payloads over long distances
d) Delivering packages in a warehouse with smooth floors

3) The four basic configurations that can be combined to produce a variety of robotic combinations are Cartesian, articulated, cylindrical and _____.
a) octagonal b) cobot
c) spherical d) square

4) The main objective(s)of Industrial robot is to _____.
a) To minimize the labour requirement
b) To increase productivity
c) To enhance the life of production machines
d) All of the above

5) Precision, speed control and dexterity in robots warrants the use of actuators _____.
a) pneumatic b) hydraulic
c) hybrid d) electric

6) Which type of position can be determined by a position sensor?
a) Mechanical position b) Lateral position
c) Prone position d) Lithotomy position

7) The process of finding the position of the end effectors when the joint variables are known is called _____.

a) Forward Kinematics b) Inverse Kinematics
c) Forward Dynamics d) Inverse Dynamics

8) Pick the configuration which is specifically designed for high-speed Assembly operations _____.

a) SCARA b) Cartesian
c) Cylindrical d) Spherical

9) What is the function of a sensor?

a) To convert physical quantities into electrical signals
b) To convert electrical signals into physical quantities
c) To measure the speed of a moving objects
d) To control the temperature of a system

10) What is the primary function of a LiDAR sensor in robotics?

a) Object manipulation b) Navigation and mapping
c) Tactile feedback d) Speech recognition

11) What is the standard form of PTP?

a) Point to path b) Point to point
c) Path to point d) Path to Path

12) Which programming language is commonly used in robotics?

a) Java b) Python
c) C++ d) All of the above

13) The _____ of a manipulator is a measure of how close the manipulator can come to a given point within its workspace.

a) accuracy b) repeatability
c) efficiency d) resolution

14) Which type of robot is commonly used for tasks in hazardous environments?

2) Figures to the right indicate full marks.
3) Make suitable assumptions if necessary and state them clearly.

Section – I

Q.2 Attempt the following. **14**
a) Define robot and explain basic components of robots with functions?
b) What is an AGV? Discuss are the different navigation techniques used for industrial AGVs.

Q.3 Attempt the following. **14**
a) Explain linear and absolute rotary encoders used in robots.
b) Compare hydraulic, pneumatic and electric actuators used in robotics in detail?

Q.4 Attempt the following. **14**
a) Write a note on End Effectors design and Selection criteria.
b) Explain in detail classification of end effectors.

Section – II

Q.5 Attempt the following. **14**
a) Explain Dynamic models of two-axis planar robots.
b) Derive forward kinematics equation for 2 DOF planar system.

Q.6 Attempt the following. **14**
a) Explain with neat block diagram force control and PID control adaptive control.
b) Explain Trajectory planning and enlist issue with Trajectory Planning.

Q.7 Attempt the following. **14**
a) What are the general considerations for selecting robots for electronic assembly application?
b) What are the general considerations for selecting robots for spot welding application?

c) Transporting heavy payloads over long distances
d) Delivering packages in a warehouse with smooth floors

12) The four basic configurations that can be combined to produce a variety of robotic combinations are Cartesian, articulated, cylindrical and _____.

a) octagonal b) cobot
c) spherical d) square

13) The main objective(s)of Industrial robot is to _____.

a) To minimize the labour requirement
b) To increase productivity
c) To enhance the life of production machines
d) All of the above

14) Precision, speed control and dexterity in robots warrants the use of actuators _____.

a) pneumatic b) hydraulic
c) hybrid d) electric

S. Y. (B.Tech.) (Sem-I) (New) (NEP CBCS) Examination: March/April-2025
MECHANICAL ENGINEERING
Industrial Robotics (MechHon-01A)

Day & Date: Friday 23-05-2025 Max. Marks: 56
Time: 03:00 PM To 06:00 PM

Instructions: 1) Attempt any two questions from each Section I & Section II.
2) Figures to the right indicate full marks.
3) Make suitable assumptions if necessary and state them clearly.

Section – I

Q.2 Attempt the following. **14**
a) Define robot and explain basic components of robots with functions?
b) What is an AGV? Discuss are the different navigation techniques used for industrial AGVs.

Q.3 Attempt the following. **14**
a) Explain linear and absolute rotary encoders used in robots.
b) Compare hydraulic, pneumatic and electric actuators used in robotics in detail?

Q.4 Attempt the following. **14**
a) Write a note on End Effectors design and Selection criteria.
b) Explain in detail classification of end effectors.

Section – II

Q.5 Attempt the following. **14**
a) Explain Dynamic models of two-axis planar robots.
b) Derive forward kinematics equation for 2 DOF planar system.

Q.6 Attempt the following. **14**
a) Explain with neat block diagram force control and PID control adaptive control.
b) Explain Trajectory planning and enlist issue with Trajectory Planning.

Q.7 Attempt the following. **14**
a) What are the general considerations for selecting robots for electronic assembly application?
b) What are the general considerations for selecting robots for spot welding application?

MECHANICAL ENGINEERING
Introduction to Automobile Engineering (MechHon-01B)

Day & Date: Friday 23-05-2025 Max. Marks: 70
Time: 03:00 PM To 06:00 PM

Instructions: 1) Q. No. 1 is compulsory. It should be solved in the first 30 minutes in Answer Book Page no 03 (Starting page of the Answer Book). Each question carries one mark.
2) Don't forget to Mention question paper set (P/Q/R/S) on top of page.
3) Figures to the right indicates full marks.
4) Make suitable assumptions (if necessary and state them clearly).

MCQ/Objective Type Questions

Duration: 30 Minutes Marks:14

Q.1 Choose the correct Answer. **14**

1) Which of these falls under LMV (Light Motor Vehicle) category based on capacity?
a) Motorbikes b) Cars
c) Buses d) Trains

2) The transmission system transmits _____ from engine to wheels.
a) Speed b) Power
c) Current d) Pressure

3) Which of these were or are used in automobiles to provide suspension?
a) Leaf springs b) Coil springs
c) Torsion bars d) All of the mentioned

4) What is the angle between the steering axis and the vertical in the plane of the wheel?
a) Castor b) Camber
c) Steering axis inclination d) Kingpin inclination

5) Which of the following is not a part of the transmission system?
a) Clutch b) Axles
c) Wheels d) Gear box

6) Trucks and Buses use which type of fuel?
a) Petrol b) LPG
c) CNG d) Diesel

7) Where is the clutch located?
a) Between transmission and engine
b) Between transmission and rear axle
c) Between transmission and propeller shaft
d) Between transmission and differential

8) Which types of gears are used in constant mesh gearbox?
a) Spur gear b) Helical gear
c) Bevel gear d) Worm gear

9) What is the angle between the vertical when the top of the wheel slants outward?
a) Negative camber b) Negative castor
c) Positive camber d) Positive castor

10) Generally which brakes are on the front wheels?
a) Drum brake b) Disc brake
c) Shoe brake d) Double shoe brake

11) The function of antilock brake system (ABS) is that is _____.
a) Reduces the stopping distance
b) Minimises the brake fade
c) Maintains directional control during braking by preventing the wheels from locking
d) Prevents nose dives during braking and thereby postpones locking of the wheels

12) The starting system includes _____.
a) A battery, a starter, and an ignition switch
b) A battery, a distributor, and an ignition switch
c) A battery, a starter, and a distributor
d) A distributor, a starter, and an ignition switch

13) Caster is a _____.
a) Forward tilt of the kingpin b) Backward tilt of the kingpin
c) Either 'a' or 'b' d) None of these

14) What is the need of the universal joint?
a) To change inclination
b) To bend sideways
c) To transfer torque at an angle
d) To change length

Instructions: 1) All questions are compulsory.
2) Figures to the right indicate full marks.
3) Mention Question Paper Set (P/Q/R/S) on Top of Page.

Answer

Q.1 Choose the correct alternatives from the options.

1) Basic unit of human interaction is _____.
a) Family b) Society
c) Group d) None of the above

2) The Self(I) is the seer, _____.
a) Doer b) Enjoyer
c) Doer & Enjoyer d) None

3) PROSPERITY deals with _____.
a) Right understanding in the self
b) Fulfilment in relationship
c) Ensuring more than required physical facility
d) None

4) When we expect feelings from others for our happiness, it is a state of _____.
a) Swatantrata b) Partantrata
c) Prosperity d) None

5) For continuity of happiness, what is essential?
a) Right understanding in the Self
b) Right feeling and right thought in the Self
c) Recognition of needs, ensure more than required, make right utilisation of it
d) All the above

6) Right Understanding and Right Feeling is matter of _____.
a) Self b) Body
c) Both d) None

7) Acceptance of excellence in others is called _____.

a) Gratitude b) Reverence
c) Glory d) None of above

8) Self and _____ are different in nature, materiality, needs and activities.

a) Prosperity b) Right Understanding
c) Body d) None of above

9) _____ is assuming without knowing.

a) Knowing b) Assuming
c) Preconditioning d) Relationship

10) Imagination is combination of _____.

a) Desire & thought
b) Desire, thought & expectation
c) Expectation & thought
d) None of above

11) Following are the basic guidelines for value education except _____.

a) Universal b) Personal
c) Rational d) Natural

12) Natural acceptance and _____ are the two processes of knowing.

a) Self-Actualization b) Self-exploration
c) Self Evaluation d) Self control

13) Human Life is lived at four levels: Individual, Family, and Society and _____.

a) Nature b) Nurture
c) World d) Universe

14) Value education should not be based on dogmas or blind beliefs _____.

a) True b) False

15) Value of an entity is _____.

a) Physical Facility
b) Prosperity
c) Its participation in the larger order of which it is part
d) both a and b

16) _____ are as Basic Human Aspirations.

a) Money
b) Relationship without money
c) Physical Facility
d) Continuous Happiness and Prosperity

17) Please give the correct priority for Physical Facilities, Right Understanding and Relationship _____.

a) Physical Facilities, Right Understanding and Relationship
b) Relationship, Right Understanding and Physical Facilities
c) Right Understanding, Relationship and Physical Facilities
d) None of the above

18) Right Understanding in relationship lead to _____.

a) Mutual Happiness b) Mutual Prosperity
c) Both a and b d) All are wrong

19) SSDD stands for _____.

a) Sadhan Viheen Dukhi Daridra
b) Sadhan Sampan Dukhi Daridra
c) Sadhan Sampan Sukhi Samridha
d) None of the above

20) Natural acceptance does not change with _____.

a) Time b) Place
c) Beliefs d) All of above

21) Human being is co-existence of the _____ and the _____.

a) self, self b) body, body
c) self, body d) None

22) _____ is the feeling of responsibility for nurturing, protecting and right utilizing the body.

a) Swasthya b) Sanyam
c) Prosperity d) None

23) The _____ is an instrument of _____.

a) I, Body b) Body, I
c) Both a and b d) None

24) _____ is the information we get from the Body through the five sense organs.

a) Precondition b) Sensation
c) Natural acceptance d) None

25) Which of the following is NOT a response of the Self?

a) Knowing b) Assuming
c) Recognising d) Preconditioning

26) Needs of Body are quantitative whereas needs of Self are qualitative _____.

a) True b) False

27) Sah-astitva means _____.

a) Co-existence b) Co-operation
c) Cooption d) Corporate identity

28) Ensuring justice in the relationship, on the basis of values leads to _____ in society.

a) Fearlessness b) Confusion
c) Confidence d) Fear

29) _____ is the complete value in relationship.

a) Respect b) Love
c) Trust d) Glory

30) The feeling to nurture and protect the body of our relative is called _____.

a) Care b) Affection
c) Gratitude d) Respect

31) _____ is the feeling of acceptance for those who have made efforts for my excellence.

a) Reverence b) Glory
c) Gratitude d) Guidance

32) We all are similar at the level of our _____ but differ in our _____.

a) Competence, Intension b) Intension, Competence
c) Competence, Competence d) None

33) Abhay means _____.

a) Right understanding b) Trust and fearlessness
c) Prosperity d) Co-existance

34) All the units of nature can be classified into _____ orders.

a) Two b) Three
c) Four d) Six

35) Which of the following does not form an order in nature?

a) Bio b) Animal
c) Consciousness d) Human

36) According to quantity, which of the following is true for the orders in nature?

a) Bio order >> Physical order >> Animal order >> Human order
b) Animal order >> Bio order >> Physical order >> Human order
c) Physical order >> Bio order >> Animal order >> Human order
d) Physical order >> Animal order >> Bio order >> Human order

37) What is NOT acceptable naturally in the nature?

a) Enrichment of nature b) Pollution in nature
c) Protection of nature d) Right Utilization of nature

38) Which of the following is NOT a unit of physical order?

a) Soil b) Air
c) Tree d) Water

39) There is justice in relationship when there is _____.
a) Self-regulation b) Freedom
c) Mutual fulfillment d) None

40) Justice from family to world family leads to _____.
a) Powerful nation
b) Strong political ties between nations
c) Undivided society
d) Disruption of the family structure

41) _____ is and it exists between one self (I1) and other self (I2).
a) Body b) Relationship
c) Health d) All

42) Which of the following results from over-evaluation _____.
a) Ego b) Depression
c) Self-confidence d) Trust

43) Which of the following statement is true?
a) Intention of a human being is always doubtful
b) One's intension is always to make the other happy
c) Intension of a human keeps varying from time to time
d) Intension of a human being can never be understood

44) Feeling of relationship exist between _____.
a) Self and self b) Body and Body
c) Self and body d) None of the above

45) Which of the following is NOT one of the goals at the level of society?
a) Right Understanding b) Fearlessness
c) Madness for profit d) Prosperity

46) Intension of a human being is the same as _____.
a) Natural acceptance b) Competence
c) Thought d) Pre-conditioning

47) Harmony should be maintained in _____.
a) Between body and life b) Between self and body
c) Between self and society d) All of the above

48) If something is _____ to us without any force or compulsion, then it is often correct and does not change with time and people.
a) Not acceptable b) Completely acceptable
c) Naturally acceptable d) Less acceptable

49) Nurturing on the Body depends upon _____.
a) Ingestion b) Digestion
c) Excretion d) All of the above

50) Sensation is related to _____.

a) Body
b) Self 'I'
c) Both a and b
d) None of the above

Day & Date: Saturday, 24-05-2025 Max. Marks: 50
Time: 03:00 PM To 4:30 PM

Instructions: 1) All questions are compulsory.
2) Figures to the right indicate full marks.
3) Mention Question Paper Set (P/Q/R/S) on Top of Page.

Answer

Q.1 Choose the correct alternatives from the options.

1) _____ is the feeling of acceptance for those who have made efforts for my excellence.
a) Reverence b) Glory
c) Gratitude d) Guidance

2) We all are similar at the level of our _____ but differ in our _____.
a) Competence, Intension b) Intension, Competence
c) Competence, Competence d) None

3) Abhay means _____.
a) Right understanding b) Trust and fearlessness
c) Prosperity d) Co-existance

4) All the units of nature can be classified into _____ orders.
a) Two b) Three
c) Four d) Six

5) Which of the following does not form an order in nature?
a) Bio b) Animal
c) Consciousness d) Human

6) According to quantity, which of the following is true for the orders in nature?
a) Bio order >> Physical order >> Animal order >> Human order
b) Animal order >> Bio order >> Physical order >> Human order
c) Physical order >> Bio order >> Animal order >> Human order
d) Physical order >> Animal order >> Bio order >> Human order

7) What is NOT acceptable naturally in the nature?
a) Enrichment of nature b) Pollution in nature
c) Protection of nature d) Right Utilization of nature

8) Which of the following is NOT a unit of physical order?
a) Soil b) Air
c) Tree d) Water

9) There is justice in relationship when there is _____.
a) Self-regulation b) Freedom
c) Mutual fulfillment d) None

10) Justice from family to world family leads to _____.
a) Powerful nation
b) Strong political ties between nations
c) Undivided society
d) Disruption of the family structure

11) _____ is and it exists between one self (I1) and other self (I2).
a) Body b) Relationship
c) Health d) All

12) Which of the following results from over-evaluation _____.
a) Ego b) Depression
c) Self-confidence d) Trust

13) Which of the following statement is true?
a) Intention of a human being is always doubtful
b) One's intension is always to make the other happy
c) Intension of a human keeps varying from time to time
d) Intension of a human being can never be understood

14) Feeling of relationship exist between _____.
a) Self and self b) Body and Body
c) Self and body d) None of the above

15) Which of the following is NOT one of the goals at the level of society?
a) Right Understanding b) Fearlessness
c) Madness for profit d) Prosperity

16) Intension of a human being is the same as _____.
a) Natural acceptance b) Competence
c) Thought d) Pre-conditioning

17) Harmony should be maintained in _____.
a) Between body and life b) Between self and body
c) Between self and society d) All of the above

18) If something is _____ to us without any force or compulsion, then it is often correct and does not change with time and people.
a) Not acceptable b) Completely acceptable
c) Naturally acceptable d) Less acceptable

19) Nurturing on the Body depends upon _____.

a) Ingestion b) Digestion
c) Excretion d) All of the above

20) Sensation is related to _____.

a) Body b) Self 'I'
c) Both a and b d) None of the above

21) Basic unit of human interaction is _____.

a) Family b) Society
c) Group d) None of the above

22) The Self(I) is the seer, _____.

a) Doer b) Enjoyer
c) Doer & Enjoyer d) None

23) PROSPERITY deals with _____.

a) Right understanding in the self
b) Fulfilment in relationship
c) Ensuring more than required physical facility
d) None

24) When we expect feelings from others for our happiness, it is a state of _____.

a) Swatantrata b) Partantrata
c) Prosperity d) None

25) For continuity of happiness, what is essential?

a) Right understanding in the Self
b) Right feeling and right thought in the Self
c) Recognition of needs, ensure more than required, make right utilisation of it
d) All the above

26) Right Understanding and Right Feeling is matter of _____.

a) Self b) Body
c) Both d) None

27) Acceptance of excellence in others is called _____.

a) Gratitude b) Reverence
c) Glory d) None of above

28) Self and _____ are different in nature, materiality, needs and activities.

a) Prosperity b) Right Understanding
c) Body d) None of above

29) _____ is assuming without knowing.

a) Knowing b) Assuming
c) Preconditioning d) Relationship

30) Imagination is combination of _____.

a) Desire & thought
b) Desire, thought & expectation
c) Expectation & thought
d) None of above

31) Following are the basic guidelines for value education except _____.

a) Universal b) Personal
c) Rational d) Natural

32) Natural acceptance and _____ are the two processes of knowing.

a) Self-Actualization b) Self-exploration
c) Self Evaluation d) Self control

33) Human Life is lived at four levels: Individual, Family, and Society and _____.

a) Nature b) Nurture
c) World d) Universe

34) Value education should not be based on dogmas or blind beliefs _____.

a) True b) False

35) Value of an entity is _____.

a) Physical Facility
b) Prosperity
c) Its participation in the larger order of which it is part
d) both a and b

36) _____ are as Basic Human Aspirations.

a) Money
b) Relationship without money
c) Physical Facility
d) Continuous Happiness and Prosperity

37) Please give the correct priority for Physical Facilities, Right Understanding and Relationship _____.

a) Physical Facilities, Right Understanding and Relationship
b) Relationship, Right Understanding and Physical Facilities
c) Right Understanding, Relationship and Physical Facilities
d) None of the above

38) Right Understanding in relationship lead to _____.
a) Mutual Happiness b) Mutual Prosperity
c) Both a and b d) All are wrong

39) SSDD stands for _____.
a) Sadhan Viheen Dukhi Daridra
b) Sadhan Sampan Dukhi Daridra
c) Sadhan Sampan Sukhi Samridha
d) None of the above

40) Natural acceptance does not change with _____.
a) Time b) Place
c) Beliefs d) All of above

41) Human being is co-existence of the _____ and the _____.
a) self, self b) body, body
c) self, body d) None

42) _____ is the feeling of responsibility for nurturing, protecting and right utilizing the body.
a) Swasthya b) Sanyam
c) Prosperity d) None

43) The _____ is an instrument of _____.
a) I, Body b) Body, I
c) Both a and b d) None

44) _____ is the information we get from the Body through the five sense organs.
a) Precondition b) Sensation
c) Natural acceptance d) None

45) Which of the following is NOT a response of the Self?
a) Knowing b) Assuming
c) Recognising d) Preconditioning

46) Needs of Body are quantitative whereas needs of Self are qualitative _____.
a) True b) False

47) Sah-astitva means _____.
a) Co-existence b) Co-operation
c) Cooption d) Corporate identity

48) Ensuring justice in the relationship, on the basis of values leads to _____ in society.
a) Fearlessness b) Confusion
c) Confidence d) Fear

49) _____ is the complete value in relationship.

a) Respect b) Love

c) Trust d) Glory

50) The feeling to nurture and protect the body of our relative is called _____.

a) Care b) Affection

c) Gratitude d) Respect

Answer

Q.1 Choose the correct alternatives from the options.

1) Following are the basic guidelines for value education except _____.
a) Universal b) Personal
c) Rational d) Natural

2) Natural acceptance and _____ are the two processes of knowing.
a) Self-Actualization b) Self-exploration
c) Self Evaluation d) Self control

3) Human Life is lived at four levels: Individual, Family, and Society and _____.
a) Nature b) Nurture
c) World d) Universe

4) Value education should not be based on dogmas or blind beliefs _____.
a) True b) False

5) Value of an entity is _____.
a) Physical Facility
b) Prosperity
c) Its participation in the larger order of which it is part
d) both a and b

6) _____ are as Basic Human Aspirations.
a) Money
b) Relationship without money
c) Physical Facility
d) Continuous Happiness and Prosperity

7) Please give the correct priority for Physical Facilities, Right Understanding and Relationship _____.

a) Physical Facilities, Right Understanding and Relationship
b) Relationship, Right Understanding and Physical Facilities
c) Right Understanding, Relationship and Physical Facilities
d) None of the above

8) Right Understanding in relationship lead to _____.

a) Mutual Happiness b) Mutual Prosperity
c) Both a and b d) All are wrong

9) SSDD stands for _____.

a) Sadhan Viheen Dukhi Daridra
b) Sadhan Sampan Dukhi Daridra
c) Sadhan Sampan Sukhi Samridha
d) None of the above

10) Natural acceptance does not change with _____.

a) Time b) Place
c) Beliefs d) All of above

11) Human being is co-existence of the _____ and the _____.

a) self, self b) body, body
c) self, body d) None

12) _____ is the feeling of responsibility for nurturing, protecting and right utilizing the body.

a) Swasthya b) Sanyam
c) Prosperity d) None

13) The _____ is an instrument of _____.

a) I, Body b) Body, I
c) Both a and b d) None

14) _____ is the information we get from the Body through the five sense organs.

a) Precondition b) Sensation
c) Natural acceptance d) None

15) Which of the following is NOT a response of the Self?

a) Knowing b) Assuming
c) Recognising d) Preconditioning

16) Needs of Body are quantitative whereas needs of Self are qualitative _____.

a) True b) False

17) Sah-astitva means _____.

a) Co-existence b) Co-operation
c) Cooption d) Corporate identity

18) Ensuring justice in the relationship, on the basis of values leads to _____ in society.

a) Fearlessness b) Confusion
c) Confidence d) Fear

19) _____ is the complete value in relationship.

a) Respect b) Love
c) Trust d) Glory

20) The feeling to nurture and protect the body of our relative is called _____.

a) Care b) Affection
c) Gratitude d) Respect

21) _____ is the feeling of acceptance for those who have made efforts for my excellence.

a) Reverence b) Glory
c) Gratitude d) Guidance

22) We all are similar at the level of our _____ but differ in our _____.

a) Competence, Intension b) Intension, Competence
c) Competence, Competence d) None

23) Abhay means _____.

a) Right understanding b) Trust and fearlessness
c) Prosperity d) Co-existance

24) All the units of nature can be classified into _____ orders.

a) Two b) Three
c) Four d) Six

25) Which of the following does not form an order in nature?

a) Bio b) Animal
c) Consciousness d) Human

26) According to quantity, which of the following is true for the orders in nature?

a) Bio order >> Physical order >> Animal order >> Human order
b) Animal order >> Bio order >> Physical order >> Human order
c) Physical order >> Bio order >> Animal order >> Human order
d) Physical order >> Animal order >> Bio order >> Human order

27) What is NOT acceptable naturally in the nature?

a) Enrichment of nature b) Pollution in nature
c) Protection of nature d) Right Utilization of nature

28) Which of the following is NOT a unit of physical order?

a) Soil b) Air
c) Tree d) Water

29) There is justice in relationship when there is _____.
a) Self-regulation b) Freedom
c) Mutual fulfillment d) None

30) Justice from family to world family leads to _____.
a) Powerful nation
b) Strong political ties between nations
c) Undivided society
d) Disruption of the family structure

31) _____ is and it exists between one self (I1) and other self (I2).
a) Body b) Relationship
c) Health d) All

32) Which of the following results from over-evaluation _____.
a) Ego b) Depression
c) Self-confidence d) Trust

33) Which of the following statement is true?
a) Intention of a human being is always doubtful
b) One's intension is always to make the other happy
c) Intension of a human keeps varying from time to time
d) Intension of a human being can never be understood

34) Feeling of relationship exist between _____.
a) Self and self b) Body and Body
c) Self and body d) None of the above

35) Which of the following is NOT one of the goals at the level of society?
a) Right Understanding b) Fearlessness
c) Madness for profit d) Prosperity

36) Intension of a human being is the same as _____.
a) Natural acceptance b) Competence
c) Thought d) Pre-conditioning

37) Harmony should be maintained in _____.
a) Between body and life b) Between self and body
c) Between self and society d) All of the above

38) If something is _____ to us without any force or compulsion, then it is often correct and does not change with time and people.
a) Not acceptable b) Completely acceptable
c) Naturally acceptable d) Less acceptable

39) Nurturing on the Body depends upon _____.
a) Ingestion b) Digestion
c) Excretion d) All of the above

40) Sensation is related to _____.

a) Body b) Self 'I'

c) Both a and b d) None of the above

41) Basic unit of human interaction is _____.

a) Family b) Society

c) Group d) None of the above

42) The Self(I) is the seer, _____.

a) Doer b) Enjoyer

c) Doer & Enjoyer d) None

43) PROSPERITY deals with _____.

a) Right understanding in the self

b) Fulfilment in relationship

c) Ensuring more than required physical facility

d) None

44) When we expect feelings from others for our happiness, it is a state of _____.

a) Swatantrata b) Partantrata

c) Prosperity d) None

45) For continuity of happiness, what is essential?

a) Right understanding in the Self

b) Right feeling and right thought in the Self

c) Recognition of needs, ensure more than required, make right utilisation of it

d) All the above

Answer

Q.1 Choose the correct alternatives from the options.

1) _____ is and it exists between one self (I1) and other self (I2).
a) Body b) Relationship
c) Health d) All

2) Which of the following results from over-evaluation _____.
a) Ego b) Depression
c) Self-confidence d) Trust

3) Which of the following statement is true?
a) Intention of a human being is always doubtful
b) One's intension is always to make the other happy
c) Intension of a human keeps varying from time to time
d) Intension of a human being can never be understood

4) Feeling of relationship exist between _____.
a) Self and self b) Body and Body
c) Self and body d) None of the above

5) Which of the following is NOT one of the goals at the level of society?
a) Right Understanding b) Fearlessness
c) Madness for profit d) Prosperity

6) Intension of a human being is the same as _____.
a) Natural acceptance b) Competence
c) Thought d) Pre-conditioning

7) Harmony should be maintained in _____.
a) Between body and life b) Between self and body
c) Between self and society d) All of the above

8) If something is _____ to us without any force or compulsion, then it is often correct and does not change with time and people.

a) Not acceptable
b) Completely acceptable
c) Naturally acceptable
d) Less acceptable

9) Nurturing on the Body depends upon _____.

a) Ingestion
b) Digestion
c) Excretion
d) All of the above

10) Sensation is related to _____.

a) Body
b) Self 'I'
c) Both a and b
d) None of the above

11) Basic unit of human interaction is _____.

a) Family
b) Society
c) Group
d) None of the above

12) The Self(I) is the seer, _____.

a) Doer
b) Enjoyer
c) Doer & Enjoyer
d) None

13) PROSPERITY deals with _____.

a) Right understanding in the self
b) Fulfilment in relationship
c) Ensuring more than required physical facility
d) None

14) When we expect feelings from others for our happiness, it is a state of _____.

a) Swatantrata
b) Partantrata
c) Prosperity
d) None

15) For continuity of happiness, what is essential?

a) Right understanding in the Self
b) Right feeling and right thought in the Self
c) Recognition of needs, ensure more than required, make right utilisation of it
d) All the above

16) Right Understanding and Right Feeling is matter of _____.

a) Self
b) Body
c) Both
d) None

17) Acceptance of excellence in others is called _____.

a) Gratitude
b) Reverence
c) Glory
d) None of above

18) Self and _____ are different in nature, materiality, needs and activities.

a) Prosperity b) Right Understanding
c) Body d) None of above

19) _____ is assuming without knowing.

a) Knowing b) Assuming
c) Preconditioning d) Relationship

20) Imagination is combination of _____.

a) Desire & thought
b) Desire, thought & expectation
c) Expectation & thought
d) None of above

21) Following are the basic guidelines for value education except _____.

a) Universal b) Personal
c) Rational d) Natural

22) Natural acceptance and _____ are the two processes of knowing.

a) Self-Actualization b) Self-exploration
c) Self Evaluation d) Self control

23) Human Life is lived at four levels: Individual, Family, and Society and _____.

a) Nature b) Nurture
c) World d) Universe

24) Value education should not be based on dogmas or blind beliefs _____.

a) True b) False

25) Value of an entity is _____.

a) Physical Facility
b) Prosperity
c) Its participation in the larger order of which it is part
d) both a and b

26) _____ are as Basic Human Aspirations.

a) Money
b) Relationship without money
c) Physical Facility
d) Continuous Happiness and Prosperity

27) Please give the correct priority for Physical Facilities, Right Understanding and Relationship _____.

a) Physical Facilities, Right Understanding and Relationship
b) Relationship, Right Understanding and Physical Facilities
c) Right Understanding, Relationship and Physical Facilities
d) None of the above

28) Right Understanding in relationship lead to _____.

a) Mutual Happiness b) Mutual Prosperity
c) Both a and b d) All are wrong

29) SSDD stands for _____.

a) Sadhan Viheen Dukhi Daridra
b) Sadhan Sampan Dukhi Daridra
c) Sadhan Sampan Sukhi Samridha
d) None of the above

30) Natural acceptance does not change with _____.

a) Time b) Place
c) Beliefs d) All of above

31) Human being is co-existence of the _____ and the _____.

a) self, self b) body, body
c) self, body d) None

32) _____ is the feeling of responsibility for nurturing, protecting and right utilizing the body.

a) Swasthya b) Sanyam
c) Prosperity d) None

33) The _____ is an instrument of _____.

a) I, Body b) Body, I
c) Both a and b d) None

34) _____ is the information we get from the Body through the five sense organs.

a) Precondition b) Sensation
c) Natural acceptance d) None

35) Which of the following is NOT a response of the Self?

a) Knowing b) Assuming
c) Recognising d) Preconditioning

36) Needs of Body are quantitative whereas needs of Self are qualitative _____.

a) True b) False

37) Sah-astitva means _____.

a) Co-existence b) Co-operation
c) Cooption d) Corporate identity

38) Ensuring justice in the relationship, on the basis of values leads to _____ in society.

a) Fearlessness b) Confusion
c) Confidence d) Fear

39) _____ is the complete value in relationship.

a) Respect b) Love
c) Trust d) Glory

40) The feeling to nurture and protect the body of our relative is called _____.

a) Care b) Affection
c) Gratitude d) Respect

41) _____ is the feeling of acceptance for those who have made efforts for my excellence.

a) Reverence b) Glory
c) Gratitude d) Guidance

42) We all are similar at the level of our _____ but differ in our _____.

a) Competence, Intension b) Intension, Competence
c) Competence, Competence d) None

43) Abhay means _____.

a) Right understanding b) Trust and fearlessness
c) Prosperity d) Co-existance

44) All the units of nature can be classified into _____ orders.

a) Two b) Three
c) Four d) Six

45) Which of the following does not form an order in nature?

a) Bio b) Animal
c) Consciousness d) Human

46) According to quantity, which of the following is true for the orders in nature?

a) Bio order >> Physical order >> Animal order >> Human order
b) Animal order >> Bio order >> Physical order >> Human order
c) Physical order >> Bio order >> Animal order >> Human order
d) Physical order >> Animal order >> Bio order >> Human order

47) What is NOT acceptable naturally in the nature?

a) Enrichment of nature b) Pollution in nature
c) Protection of nature d) Right Utilization of nature

48) Which of the following is NOT a unit of physical order?

a) Soil b) Air
c) Tree d) Water

49) There is justice in relationship when there is _____.

a) Self-regulation b) Freedom

c) Mutual fulfillment d) None

50) Justice from family to world family leads to _____.

a) Powerful nation

b) Strong political ties between nations

c) Undivided society

d) Disruption of the family structure

Examination: March/April - 2025
Applied Thermodynamics (BTN02301)

Day & Date: Saturday, 17-05-2025 Max. Marks: 70
Time: 03:00 PM To 06:00 PM

Instructions: 1) Q. No. 1 is compulsory. It should be solved in the first 30 minutes in Answer Book Page no 03 (Starting page of the Answer Book). Each question carries one mark.
2) Don't forget to Mention question paper set (P/Q/R/S) on top of page.
3) Figures to the right indicates full marks.
4) Make suitable assumptions (if necessary and state them clearly).

MCQ/Objective Type Questions

Duration: 30 Minutes Marks:14

Q.1 Attempt the following MCQ: 14

1) Critical point of water is at ____.
a) 221 bar and 374°C b) 100 bar and 273 °C
c) 200 bar and 100°C d) 374 bar and 221 °C

2) The term coefficient of performance is related to _____.
a) Refrigerator b) Heat Engine
c) Steam Engine d) Gas Turbine

3) Area under the curve on P-V chart indicates _____.
a) Net heat transfer b) Network transfer
c) Cycle efficiency d) None of the above

4) Kelvin-Planks Law deals with _____.
a) conversion of work b) conversion of heat
c) conversion of mass d) conversion of heat into work

5) The major heat loss in boiler is due to ____.
a) Moisture in fuel b) Dry flue gases
c) steam formation d) Unburnt fuel

6) The ratio of heat actually used in producing the steam to the heat liberated in the furnace is called _____.
a) Equivalent evaporation b) Evaporative capacity
c) Boiler efficiency d) Factor of evaporation

7) The Rankine cycle as compared to Carnot cycle has ____ work ratio.
a) high b) low
c) equal d) half

8) The flow of steam is subsonic _____.
a) at entrance of nozzle
b) at throat of the nozzle
c) in convergent part of the nozzle
d) in divergent part of nozzle

9) In a shell and tube surface condenser ____.
a) steam and cooling water mix to give the condensate
b) cooling water passes through the tubes and steam surrounds them
c) steam passes the cooling tubes and cooling water surrounds them
d) all of the above varying with situation

10) A condenser in steam power plant ____.
a) increases expansion ratio of steam
b) reduces back pressure of steam
c) reduces the temperature of steam
d) all of the above

11) The cooing section in the surface condenser _____.
a) increases the quantity of vapor extracted along with air
b) reduces the quantity of vapor extracted along with air
c) does not affect vapor quantity extracted but reduces pump capacity of air extraction pump
d) None of these

12) The compounding of steam turbine is done in order to _____.
a) reduce the speed of rotor b) improve efficiency
c) reduce exit losses d) all of the above

13) With increase in clearance volume, the ideal work of compressing 1 kg of air _____.
a) increases
b) decreases
c) remains same
d) first increases and then decreases

14) In single stage single acting reciprocating compressor without clearance volume, the work done is minimum during ____.
a) isothermal compression b) isentropic compression
c) polytropic compression d) None of the above

Day & Date: Saturday, 17-05-2025 Max. Marks: 56
Time: 03:00 PM To 06:00 PM

Instructions: 1) Attempt any two questions from each section.
2) Figures to the right indicate full marks.
3) Use of Scientific calculator is allowed.
4) Use of steam tables is allowed.
5) Assume suitable data if required and state it clearly.
6) Neat diagrams must be drawn wherever necessary.

Section – I

Q.2 Attempt the following questions:

a) State and explain first law of thermodynamics. What are its limitations? **04**

b) Explain the following terms: **05**
1) Standard Enthalpy of Reaction.
2) Standard enthalpy of Formation

c) A reversible heat engine operates between three constant temperatures reservoirs at 600 K, 400 K and 300 K. It receives 2500 KJ of heat from the reservoir at 600 K and does 1000 KJ of work. determine the magnitude and direction of the heat interaction with the other two reservoirs **05**

Q.3 Attempt the following:

a) Explain the classification of steam Boilers in detail. **04**

b) A hot copper block of mass 30 kg having a temperature of 500 °C is dropped in 200 kg of oil at 20 °C. If Cp oil =2.5 kJ/kg.K and Cp_{copper} =0.5 kJ/kgK, find the change in entropy of the universe. Assume adiabatic mixing. **05**

c) A boiler produces wet steam having a dryness fraction of 0.98. The working pressure of the boiler is 7.5 bar absolute. It generates steam at the rate of 5400 kg/hr and consumes coal at the rate of 670 kg/hr. If the calorific value of coal is 31,000 kJ/kg and water is fed at a temperature of 41.5 °C, calculate **05**
1) equivalent evaporation/kg of coal
2) factor of evaporation
3) boiler efficiency

Q.4 Attempt the following:

a) Explain the effect of various operating conditions on the efficiency of the Rankine vapour cycle. **04**

b) Differentiate between Carnot cycle and Rankine cycle. **05**

c) In the Rankine cycle, dry and saturated steam enters the turbine at 20 bar pressure. The exhaust pressure of the turbine is 0.1 bar, and all processes are reversible, find: **05**

1) Cycle thermal efficiency
2) Work ratio
3) Specific steam Consumption

Section – II

Q.5 Attempt the following:

a) Define steam nozzle? Explain its different types? **04**

b) Explain the meaning of compounding of steam turbines? Discuss pressure compounding of steam turbine with neat sketch. **05**

c) Derive an expression for maximum blade efficiency of a single-stage impulse turbine. **05**

Q.6 Attempt the following:

a) Explain the following terms in connection with steam condensers **04**

1) condenser efficiency
2) vacuum efficiency

b) Differentiate between surface condenser and jet condenser **05**

c) Derive an expression for the volumetric efficiency of a reciprocating compressor with usual notations. **05**

Q.7 Attempt the following:

a) Derive an expression for work done per kg for the polytropic compression process without considering the clearance volume. **04**

b) Atmospheric air is to be compressed in a single-state reciprocating compressor from 1.013 bar and 15 °C to 7 bar. Calculate the indicated power required for free air delivery of 0.3 m^3/min, when the compression process is **05**

1) Isentropic
2) Polytropic if n = 1.25.
3) Isothermal

c) A single-stage, single-acting compressor delivers 150 m^3 of free air per minute from 1 bar to 8 bar. The speed of the compressor is 300 rpm. Assuming that compression and expansion follow the law $PV^{13}=C$, and clearance volume is $[1/16t]^{th}$ of swept volume, find the diameter(D) and stroke Length(L) of the compressor. Take L/D=1.5. Assume the temperature and pressure of air at the suction are as atmospheric air. **05**

Set **Q**

S.Y. (B.Tech.) (Mechanical Engineering) (Semester - I) (Old) (CBCS)
Examination: March/April - 2025
Applied Thermodynamics (BTN02301)

Day & Date: Saturday, 17-05-2025 Max. Marks: 70
Time: 03:00 PM To 06:00 PM

Instructions: 1) Q. No. 1 is compulsory. It should be solved in the first 30 minutes in Answer Book Page no 03 (Starting page of the Answer Book). Each question carries one mark.
2) Don't forget to Mention question paper set (P/Q/R/S) on top of page.
3) Figures to the right indicates full marks.
4) Make suitable assumptions (if necessary and state them clearly).

MCQ/Objective Type Questions

Duration: 30 Minutes Marks:14

Q.1 Attempt the following MCQ: **14**

1) The flow of steam is subsonic _____.
a) at entrance of nozzle
b) at throat of the nozzle
c) in convergent part of the nozzle
d) in divergent part of nozzle

2) In a shell and tube surface condenser ____.
a) steam and cooling water mix to give the condensate
b) cooling water passes through the tubes and steam surrounds them
c) steam passes the cooling tubes and cooling water surrounds them
d) all of the above varying with situation

3) A condenser in steam power plant ____.
a) increases expansion ratio of steam
b) reduces back pressure of steam
c) reduces the temperature of steam
d) all of the above

4) The cooing section in the surface condenser _____.
a) increases the quantity of vapor extracted along with air
b) reduces the quantity of vapor extracted along with air
c) does not affect vapor quantity extracted but reduces pump capacity of air extraction pump
d) None of these

5) The compounding of steam turbine is done in order to _____.
a) reduce the speed of rotor b) improve efficiency
c) reduce exit losses d) all of the above

6) With increase in clearance volume, the ideal work of compressing 1 kg of air _____.
a) increases
b) decreases
c) remains same
d) first increases and then decreases

7) In single stage single acting reciprocating compressor without clearance volume, the work done is minimum during ____.
a) isothermal compression b) isentropic compression
c) polytropic compression d) None of the above

8) Critical point of water is at ____.
a) 221 bar and 374°C b) 100 bar and 273 °C
c) 200 bar and 100°C d) 374 bar and 221 °C

9) The term coefficient of performance is related to _____.
a) Refrigerator b) Heat Engine
c) Steam Engine d) Gas Turbine

10) Area under the curve on P-V chart indicates _____.
a) Net heat transfer b) Network transfer
c) Cycle efficiency d) None of the above

11) Kelvin-Planks Law deals with _____.
a) conversion of work b) conversion of heat
c) conversion of mass d) conversion of heat into work

12) The major heat loss in boiler is due to ____.
a) Moisture in fuel b) Dry flue gases
c) steam formation d) Unburnt fuel

13) The ratio of heat actually used in producing the steam to the heat liberated in the furnace is called _____.
a) Equivalent evaporation b) Evaporative capacity
c) Boiler efficiency d) Factor of evaporation

14) The Rankine cycle as compared to Carnot cycle has ____ work ratio.
a) high b) low
c) equal d) half

Mechanics of Materials (BTN02302)

Day & Date: Monday, 19-05-2025 Max. Marks: 70
Time: 03:00 PM To 06:00 PM

Instructions: 1) Q. No. 1 is compulsory. It should be solved in the first 30 minutes in Answer Book Page no 03 (Starting page of the Answer Book). Each question carries one mark.
2) Don't forget to Mention question paper set (P/Q/R/S) on top of page.
3) Figures to the right indicates full marks.

MCQ/Objective Type Questions

Duration: 30 Minutes Marks:14

Q.1 Choose the correct alternatives from the given options. 14

1) The modulus of elasticity for a material is 200 GN/m^2 and Poisson's ratio is 0.25. What is the modulus of rigidity?
a) 80 GN/m^2 b) 125 GN/m^2
c) 250 GN/m^2 d) 320 GN/m^2

2) What is the shear stress acting on the outer surface of a hollow shaft subjected to a torque of 100 Nm (The inner and outer diameter of the shaft is 15 mm and 30 mm respectively)?
a) 50.26Mpa b) 40.24Mpa
c) 20.12Mpa d) 8.74Mpa

3) The relationship between Young's modulus (E) shear modulus (G) and Poisson's ratio (μ) is given by ____
a) $E = 3G (1+2\mu)$ b) $E = 2G (1+ \mu)$
c) $E = 2G (1-3\mu)$ d) $E = 3G (1+ \mu)$

4) The principal stress calculations are carried on ____.
a) normal plane b) vertical plane
c) oblique plane d) Normal point

5) The stress due to suddenly applied load is ____ times the gradually applied load.
a) Three b) Two
c) Four d) Five

6) Modulus of resilience is the ratio of ____.
a) minimum strain energy and unit volume
b) strain and unit volume
c) proof resilience and unit volume
d) resilience and unit area

7) Angle between the principal planes and plane of maximum shear stress is ____.

a) 90° b) 120°
c) 45° d) 30°

8) For a simply supported beam carrying a U.D.L. on its entire span, the slope is ____

a) zero at support b) maximum at center
c) same as deflection d) zero at center

9) In the theory of simple bending, the bending stress in the beam section varies ____.

a) Linearly b) Parabolically
c) Elliptically d) None of these

10) A simply supported beam of span (L) carries point load (W) at the center of the beam. The shear force diagram will be _____.

a) A triangle
b) Two equal and opposite rectangles
c) Two equal and opposite triangles
d) A rectangle

11) The property of material same in all direction is known as ____.

a) Homogeneous b) Elastic
c) Isotropic d) Orthotropic

12) For a cantilever beam loaded with point load at free end, the maximum slope occurs at the ____.

a) Fixed end b) Free end
c) Load point d) Both a and b

13) For an I section ____.

a) Bending stress is maximum at neutral axis
b) Shear stress is zero at neutral axis
c) Bending stress is zero at edges
d) Shear stress is maximum at the neutral axis

14) When a rectangular section of a beam is subjected to a shearing force the ratio of maximum shear stress to the average shear stress is ____.

a) 2 b) 1.75
c) 1.5 d) 1.25

S. Y. (B.Tech.) (Sem - I) (Old) (CBCS) Examination: March/April-2025
MECHANICAL ENGINEERING
Mechanics of Materials (BTN02302)

Day & Date: Monday, 19-05-2025 Max. Marks: 56
Time: 03:00 PM To 06:00 PM

Instructions: 1) Solve any two questions from each section.
2) Use of Scientific calculator is allowed.
3) Figure to right indicate full marks.
4) Assume additional suitable data if necessary and state it clearly.

Section – I

Q.2 Attempt the following questions:

a) A bar of length 500mm and square in cross section 15 x 15mm is subjected to a pull of 20kN in the direction of bar length. Extension along length of bar is found to be 0.2mm while decrease in each lateral direction is 0.0024mm. Determine E, G, K and Poisson's ratio. **08**

b) A weight of 1500N is dropped on the collar attached at the lower end of vertical bar 4meter long and 30mm diameter. Calculate height of drop if maximum instantaneous stress is not to exceed 120Mpa. Also calculate elongation produced Take E=200Gpa. **06**

Q.3 Attempt the following:

a) A plane element in a boiler is subjected to tensile stress of 400Mpa on one plane along X-axis and 150Mpa on the other at right angle to former (Y-axis). Each of above stresses is accompanied by a shear stress of 100 Mpa such that when associated with Major tensile stress tends to rotate the element. Find a) Principal stresses and their directions b) Maximum shearing stress **06**

b) A hollow shaft is to transmit 300 kW at 80 rpm. If the shear stress is not to exceed 60 Mpa and internal diameter is 0.6 of the external diameters, find the external and internal diameters assuming that the maximum torque is 1.4 times the mean. **08**

Q.4 Attempt the following:

a) Prove that E=3K(1-2 μ), where E is modulus of elasticity, K is Bulk modulus and μ is Poisson's ratio. **05**

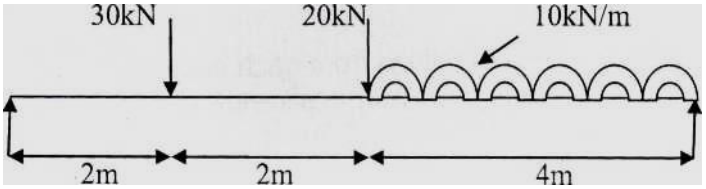
b) At a point in elastic material under strain, there are normal tensile stresses of 50 Mpa and 30 Mpa respectively at the right angles to each other along with a shear stress of 25Mpa. Find graphically principal stresses, position of principal plane and maximum shear stress. **04**

c) A bar of 50mm diameter 2meter long is fixed at upper end and provided with collar at lower end. A weight of 450N is dropped on the collar from height of 250mm. Find a) instantaneous stress b) instantaneous elongation. Take E=200Gpa. **05**

Section – II

Q.5 Attempt the following:

a) A simply supported beam as shown in figure carries two concentrated loads and UDL. Draw SFD and BMD **08**



b) An I section of equal flange 110 x 10 mm and web of 120mm x 10 mm is used over a span of 4meter. Find the intensity of UDL which simply supported beam can carry safely if allowable bending stress is 100 Mpa. **06**

Q.6 Attempt the following:

a) An I Girder is 400 mm deep with 150mm long and 20 mm thick flange and 15mm thick web. Calculate maximum intensity of shear stress if shear force acting at the section is 145kN. **06**

b) A beam of T section having top flange 120mm x 20mm and web 20mm x 100mm simply supported over span of 5m and carries UDL of 3kN/m over entire span. Determine maximum tensile and compressive stresses developed. Also Draw bending stress distribution diagram. **08**

Q.7 Attempt the following:

a) A beam of uniform rectangular section 150 x 200 mm is simply supported at ends. It carries uniformly distributed load of 10 kN/m over entire span of 6 meter. **08**
Find a) slope of support b) Maximum deflection E=11 Gpa

b) Explain the terms Slope and Deflection. **02**

c) Draw SFD and BMD for simply supported beam having length(L) and subjected to point load ‘W’ at center. **04**

2) Don't forget to Mention question paper set (P/Q/R/S) on top of page.
3) Figures to the right indicates full marks.

MCQ/Objective Type Questions

Duration: 30 Minutes Marks:14

Q.1 Choose the correct alternatives from the given options. 14

1) For a simply supported beam carrying a U.D.L. on its entire span, the slope is ____
a) zero at support b) maximum at center
c) same as deflection d) zero at center

2) In the theory of simple bending, the bending stress in the beam section varies ____.
a) Linearly b) Parabolically
c) Elliptically d) None of these

3) A simply supported beam of span (L) carries point load (W) at the center of the beam. The shear force diagram will be _____.
a) A triangle
b) Two equal and opposite rectangles
c) Two equal and opposite triangles
d) A rectangle

4) The property of material same in all direction is known as ____.
a) Homogeneous b) Elastic
c) Isotropic d) Orthotropic

5) For a cantilever beam loaded with point load at free end, the maximum slope occurs at the ____.
a) Fixed end b) Free end
c) Load point d) Both a and b

6) For an I section ____.
a) Bending stress is maximum at neutral axis
b) Shear stress is zero at neutral axis
c) Bending stress is zero at edges
d) Shear stress is maximum at the neutral axis

7) When a rectangular section of a beam is subjected to a shearing force the ratio of maximum shear stress to the average shear stress is ____.

a) 2 b) 1.75
c) 1.5 d) 1.25

8) The modulus of elasticity for a material is 200 GN/m^2 and Poisson's ratio is 0.25. What is the modulus of rigidity?

a) 80 GN/m^2 b) 125 GN/m^2
c) 250 GN/m^2 d) 320 GN/m^2

9) What is the shear stress acting on the outer surface of a hollow shaft subjected to a torque of 100 Nm (The inner and outer diameter of the shaft is 15 mm and 30 mm respectively)?

a) 50.26Mpa b) 40.24Mpa
c) 20.12Mpa d) 8.74Mpa

10) The relationship between Young's modulus (E) shear modulus (G) and Poisson's ratio (μ) is given by ____

a) E = 3G (1+2μ) b) E = 2G (1+ μ)
c) E = 2G (1-3μ) d) E = 3G (1+ μ)

11) The principal stress calculations are carried on ____.

a) normal plane b) vertical plane
c) oblique plane d) Normal point

12) The stress due to suddenly applied load is ____ times the gradually applied load.

a) Three b) Two
c) Four d) Five

13) Modulus of resilience is the ratio of ____.

a) minimum strain energy and unit volume
b) strain and unit volume
c) proof resilience and unit volume
d) resilience and unit area

14) Angle between the principal planes and plane of maximum shear stress is ____.

a) 90° b) 120°
c) 45° d) 30°

MCQ/Objective Type Questions

Duration: 30 Minutes Marks:14

Q.1 Choose the correct answer. **14**

1) Choke is generally provided at ____
a) Gate b) Pouring cup
c) Feeder d) Mould Cavity

2) Sand which is used for core making is ____.
a) Shell sand b) Facing sand
c) Green sand d) Dry Sand

3) In sand molding, the middle part of joining two flask is called ____.
a) Coupe b) Parting line
c) Drag d) Flask-middle

4) Carburetor of two-wheeler is manufactured by ____
a) Sand Casting b) Shell Moulding
c) Permanent Mold casting d) Centrifugal casting

5) The patterns used for the lost wax type investment casting are made of: ____
a) wood b) gypsum
c) frozen mercury d) wax

6) The process of removing unwanted material from casting is called: ___
a) Fettling b) Cleaning
c) Finishing d) Blowing

7) Which one of the following welding processes uses non consumable electrode?
a) Gas metal arc welding b) Submerged arc welding
c) Gas tungsten arc welding d) Flux coated arc welding

8) In ____ process, the molten metal is poured and allowed to solidify, while mold is rotating.

a) Die casting b) Sand molding
c) Permanent mold casting d) Centrifugal casting

9) Tooth paste is manufactured by ____.

a) Direct extrusion b) Indirect Extrusion
c) Impact extrusion d) Hydrostatic Extrusion

10) Which of the following manufacturing processes is mainly considered for producing the components of very high strength?

a) Casting b) Forging
c) Extrusion d) Rolling

11) Which is incorrect statement about results of hot working ____.

a) Annealing operation is not necessary
b) Power requirements are low
c) Surface finish is good
d) Grain refinement is possible

12) In cold working process ____.

a) Good surface finish is obtained
b) Scaling occurs
c) Close tolerance is difficult to achieve
d) All the above

13) From following, the alternative name for RP is ____.

a) Additive Manufacturing b) Layer Manufacturing
c) Direct CAD Manufacturing d) All of the above

14) Gravity dies casting process is used for manufactured of ____

a) Lathe bed b) Drainage pipes
c) Spanner d) Carburetor body

S. Y. (B.Tech.) (Sem - I) (Old) (CBCS) Examination: March/April-2025
MECHANICAL ENGINEERING
Manufacturing Process (BTN02303)

Day & Date: Tuesday, 20-05-2025 Max. Marks: 56
Time: 03:00 PM To 06:00 PM

Instructions: 1) Solve any two questions from each section.
2) Figure to right indicate full marks.
3) Assume additional suitable data if necessary and state it clearly.

Section – I

Q.2	**a)**	Explain with neat sketch Gas tungsten arc welding.	**05**
	b)	Compare between welding and brazing.	**05**
	c)	Explain the basic steps in casting process with flow chart.	**04**
Q.3	**a)**	Explain in brief any three types of molding sand and their properties.	**05**
	b)	Difference between soldering and brazing.	**05**
	c)	Write short note Fettling and cleaning of casting.	**04**
Q.4	**a)**	What is significance of Allowances used in Pattern? Explain any two allowances.	**05**
	b)	Explain soldering process and its applications.	**05**
	c)	Explain centrifugal casting process.	**04**

Section – II

Q.5	**a)**	Explain with neat sketch classification of rolling mill on the basis of no. of rolls.	**05**
	b)	Differentiate between hot rolling and cold rolling operations.	**05**
	c)	State advantages, disadvantages, and applications of RP.	**04**
Q.6	**a)**	Explain with neat sketch open die forging process.	**05**
	b)	Explain with neat sketch hydro mechanical forming process.	**05**
	c)	Explain with neat sketch Fused Deposition modeling.	**04**
Q.7	**Write short note on:**		
	a)	Electro hydraulic forming	**05**
	b)	Bulk forming processes	**05**
	c)	Selective Laser Sintering (SLS)	**04**

MECHANICAL ENGINEERING
Manufacturing Process (BTN02303)

Day & Date: Tuesday, 20-05-2025 Max. Marks: 70
Time: 03:00 PM To 06:00 PM

Instructions: 1) Q. No. 1 is compulsory. It should be solved in the first 30 minutes in answer book. Page no 03 (Starting page of the Answer Book). Each question carries one mark.
2) Don't forget to Mention question paper set (P/Q/R/S) on top of page.
3) Figures to the right indicates full marks.
4) Assume data wherever necessary.

MCQ/Objective Type Questions

Duration: 30 Minutes Marks:14

Q.1 Choose the correct answer. **14**

1) In ____ process, the molten metal is poured and allowed to solidify, while mold is rotating.
a) Die casting b) Sand molding
c) Permanent mold casting d) Centrifugal casting

2) Tooth paste is manufactured by ____.
a) Direct extrusion b) Indirect Extrusion
c) Impact extrusion d) Hydrostatic Extrusion

3) Which of the following manufacturing processes is mainly considered for producing the components of very high strength?
a) Casting b) Forging
c) Extrusion d) Rolling

4) Which is incorrect statement about results of hot working ____.
a) Annealing operation is not necessary
b) Power requirements are low
c) Surface finish is good
d) Grain refinement is possible

5) In cold working process ____.
a) Good surface finish is obtained
b) Scaling occurs
c) Close tolerance is difficult to achieve
d) All the above

6) From following, the alternative name for RP is ____.
a) Additive Manufacturing b) Layer Manufacturing
c) Direct CAD Manufacturing d) All of the above

7) Gravity dies casting process is used for manufactured of ____
a) Lathe bed b) Drainage pipes
c) Spanner d) Carburetor body

8) Choke is generally provided at ____
a) Gate b) Pouring cup
c) Feeder d) Mould Cavity

9) Sand which is used for core making is ____.
a) Shell sand b) Facing sand
c) Green sand d) Dry Sand

10) In sand molding, the middle part of joining two flask is called ____.
a) Coupe b) Parting line
c) Drag d) Flask-middle

11) Carburetor of two-wheeler is manufactured by ____
a) Sand Casting b) Shell Moulding
c) Permanent Mold casting d) Centrifugal casting

12) The patterns used for the lost wax type investment casting are made of: ____
a) wood b) gypsum
c) frozen mercury d) wax

13) The process of removing unwanted material from casting is called: ___
a) Fettling b) Cleaning
c) Finishing d) Blowing

14) Which one of the following welding processes uses non consumable electrode?
a) Gas metal arc welding b) Submerged arc welding
c) Gas tungsten arc welding d) Flux coated arc welding

MCQ/Objective Type Questions

Duration: 30 Minutes Marks:14

Q.1 Choose the correct answer.
Type -1: Straight Objective Type / classical MCQ (Each bit one Mark each). 05

1) Hatching lines are drawn at an angle of ____ to the axis or to the main outline of the sections.
a) 60° b) 45°
c) 30° d) 54°

2) The length to width ratio of an arrowhead should be limited to ___
a) 1: 2 b) 1: 3
c) 3: 1 d) 2: 1

3) Standard size for A2 drawing sheet is as per BIS in mm is ____.
a) 594x841 b) 297x420
c) 210x297 d) 420x594

4) The size across Hats in a hexagonal nut is ____.
a) 1.5D b) 0.9D
c) 1.5D + 3 d) 1.2D

5) In the solid flanged couplings, the flange is ____.
a) Separate, mounted using a sunk key
b) Integral with the shaft
c) Fitted with interference fit
d) Fitted with clearance fit

Type-2 Correct or Incorrect (Attempt any two) (Each bit One Mark each) **02**

1) Zero line-It is the line of zero deviation and represents the basic size.

2) The relationships between the mating parts are called limit

3) The Size of A2 sheet is 420×594.

Type -3 multiple correct answer type. (Solve any two) (Each correct bit 2 mark) **04**

1) In split muff coupling the numbers of bolts will always be ____

a) Odd b) Even

c) Four d) Three

2) In Full section how much part of object is imagined to be removed?

a) Half b) Full

c) Quarter d) Can't predict

3) Which of the following symbols used for showing that "machining is prohibited"?

a)  b)

c) d) 
Type -4 Match the pairs (One marks for each correct answer) **03**

Column I	**Column II**
1)	a) N11
2)	b) N8
3)	c) N5
	d) N3

1) In the solid flanged couplings, the flange is ____.
a) Separate, mounted using a sunk key
b) Integral with the shaft
c) Fitted with interference fit
d) Fitted with clearance fit

2) Hatching lines are drawn at an angle of ____ to the axis or to the main outline of the sections.
a) 60° b) 45°
c) 30° d) 54°

3) The length to width ratio of an arrowhead should be limited to ___
a) 1: 2 b) 1: 3
c) 3: 1 d) 2: 1

4) Standard size for A2 drawing sheet is as per BIS in mm is ____.
a) 594x841 b) 297x420
c) 210x297 d) 420x594

5) The size across Hats in a hexagonal nut is ____.
a) 1.5D b) 0.9D
c) 1.5D + 3 d) 1.2D

Type-2 Correct or Incorrect (Attempt any two) (Each bit One Mark each) **02**

1) Zero line-It is the line of zero deviation and represents the basic size.

2) The relationships between the mating parts are called limit

3) The Size of A2 sheet is 420×594.

Type -3 multiple correct answer type. (Solve any two) (Each correct bit 2 mark) **04**

1) In split muff coupling the numbers of bolts will always be ____

a) Odd b) Even

c) Four d) Three

2) In Full section how much part of object is imagined to be removed?

a) Half b) Full

c) Quarter d) Can't predict

3) Which of the following symbols used for showing that "machining is prohibited"?

a)  b)

c)  d) 
Type -4 Match the pairs (One marks for each correct answer) **03**

Column I	**Column II**
1)	a) N11
2)	b) N8
3)	c) N5
	d) N3

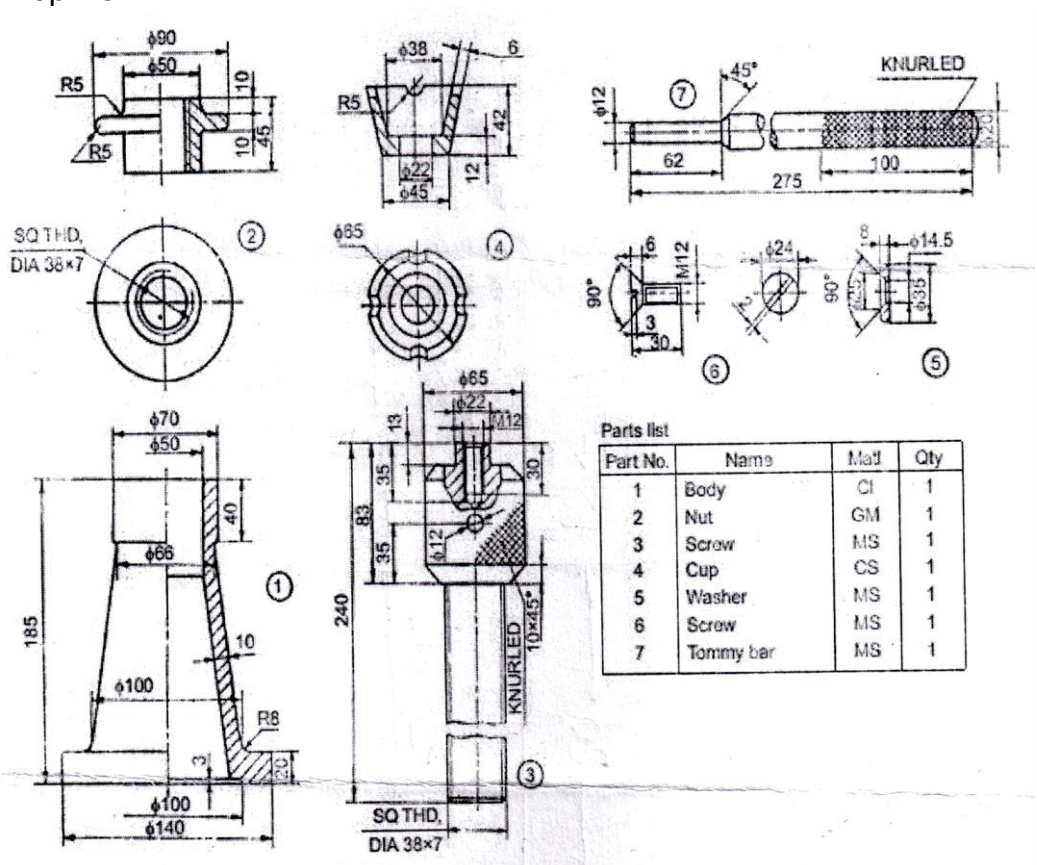
S. Y. (B. Tech) (Sem - I) (Old) (CBCS) Examination: March/April-2025
MECHANICAL ENGINEERING
Machine Drawing & CAD (BTN02304)

Day & Date: Wednesday, 21-05-2025 Max. Marks: 56
Time: 03:00 PM To 06:00 PM

Instructions: 1) All question are compulsory.
2) Assume suitable dimensions if not given.
3) Figure to right indicate full marks.
4) Use first angle Method of projections.

Q.2 Figure No.1 The detail parts of Screw Jack is given, Assemble the parts and show the following views. **22**

1) Front view
2) Top view



Parts list

Part No.	Name	Matl	Qty
1	Body	CI	1
2	Nut	GM	1
3	Screw	MS	1
4	Cup	CS	1
5	Washer	MS	1
6	Screw	MS	1
7	Tommy bar	MS	1

Fig. No. 1

Q.3 **a)** **Solve the following:** **08**

Draw the BIS Convention of

1) Slotted Head
2) Bearing
3) Tension Spring
4) Diamond Knurling

b) **Freehand sketching for the Following (Any One)** **05**

1) Eye Foundation Bolt
2) Double Riveted Lap Joint

Q.4 **a)** **Draw the BIS Convention for Following (Any Two)** **04**

1) Removed Section
2) Bevel Gear
3) Serrated Shalt

b) **Draw the Freehand Sketching for the Following (Any One)** **06**

1) Oldham's coupling
2) Foot Step bearing

Q.5 **Solve the Following:**

a) Draw the Representation of Hole and Shaft Basis System. **04**

b) Redraw the following Figure No. 2 with given dimensions and show following geometrical tolerances on it. **07**

1) Surface C and D Parallel to each other within 0.2 mm
2) Axis of holes ø15 Perpendicular to the axis of ø 24 hole within 0.2 mm
3) Surface E is to be milled with two triangle finish

Day & Date: Wednesday, 21-05-2025 Max. Marks: 70
Time: 03:00 PM To 06:00 PM

Instructions: 1) Q. No. 1 is compulsory. It should be solved in the first 30 minutes in Answer Book Page no 03 (Starting page of the Answer Book). Each question carries one mark.
2) Don't forget to Mention question paper set (P/Q/R/S) on top of page.
3) Figures to the right indicates full marks.
4) Make suitable assumptions (if necessary and state them clearly).

MCQ/Objective Type Questions

Duration: 30 Minutes Marks:14

Q.1 Choose the correct answer.
Type -1: Straight Objective Type / classical MCQ (Each bit one Mark each). 05

1) The length to width ratio of an arrowhead should be limited to ___
a) 1: 2 b) 1: 3
c) 3: 1 d) 2: 1

2) Standard size for A2 drawing sheet is as per BIS in mm is ____.
a) 594x841 b) 297x420
c) 210x297 d) 420x594

3) The size across Hats in a hexagonal nut is ____.
a) 1.5D b) 0.9D
c) 1.5D + 3 d) 1.2D

4) In the solid flanged couplings, the flange is ____.
a) Separate, mounted using a sunk key
b) Integral with the shaft
c) Fitted with interference fit
d) Fitted with clearance fit

5) Hatching lines are drawn at an angle of ____ to the axis or to the main outline of the sections.
a) 60° b) 45°
c) 30° d) 54°

Type-2 Correct or Incorrect (Attempt any two) (Each bit One Mark each) **02**

1) Zero line-It is the line of zero deviation and represents the basic size.

2) The relationships between the mating parts are called limit

3) The Size of A2 sheet is 420×594.

Type -3 multiple correct answer type. (Solve any two) (Each correct bit 2 mark) **04**

1) In split muff coupling the numbers of bolts will always be ____

a) Odd b) Even

c) Four d) Three

2) In Full section how much part of object is imagined to be removed?

a) Half b) Full

c) Quarter d) Can't predict

3) Which of the following symbols used for showing that "machining is prohibited"?

3) Figures to the right indicate full marks.

MCQ/Objective Type Questions

Duration: 30 Minutes Marks:14

Q.1 Choose the correct Answer. **14**

1) Increasing the compression ratio in SI engines the knocking tendency _____.
a) Increases b) Not affected
c) Decreases d) None of the above

2) If the N is the rpm, number of power strokes/min in a two-stroke engine is _____.
a) 2N b) N
c) 4N d) N/2

3) Volumetric efficiency is a measure of _____.
a) speed of the engine
b) power of the engine
c) breathing capacity of the engine
d) pressure rise in the cylinder

4) Octane number of n-heptane is _____.
a) 30 b) 60
c) 100 d) 0

5) Supercharging increases the power output of the engine by _____.
a) Increasing the charge temperature
b) Increasing the speed of engine
c) Increasing the charge pressure
d) None of these

6) Brake power is measured by _____.
a) Morse test b) Burette test
c) Dynamometers d) Motoring test

7) NOx emission is maximum in SI engine when _____.
a) Temperature is more b) Residence time is more
c) Oxygen is more d) All of the above

8) An indication of ignition quality of a diesel fuel is given by _____.
a) Preignition b) Cetane number
c) Detonation d) Octane number

9) Spark advance is usually specified in terms of _____.
a) engine speed in rev/min b) degrees of crank rotation
c) time in seconds d) none of the above

10) Brake specific fuel consumption is defined as _____.
a) fuel consumption per hour
b) fuel consumption per km
c) fuel consumption per brake power
d) fuel consumption per brake power hour

11) D-MPFI System is _____.
a) port fuel injection system b) manifold fuel injection system
c) venture fuel injection system d) none of the above

12) In Air-fuel mixture, the mixture contains more air is called _____.
a) Rich mixture b) Chemically correct mixture
c) Lean mixture d) None of above

13) One of the major exhaust emissions from CI Engine compared to SI Engine _____.
a) Oxides of nitrogen b) Particulates
c) Unburnt hydrocarbons d) CO and CO2

14) The period between start of injection and start of ignition is called _____.
a) Ignition period b) Mixing period
c) Injection delay d) Ignition delay

Q.1 Choose the correct Answer. 14

1) In sandwich composites, which of the following material can be used for filling purposes?
a) Wood b) Cement
c) Polymer d) All of the mentioned

2) Composites can be classified based on _____.
a) Matrix type
b) Reinforcement constituent
c) Matrix type & reinforcement constituent
d) Neither on matrix type nor on reinforcement constituent type

3) The composite constituents of both matrix and reinforcements are softer.
a) True b) False

4) Which of the following has a greater impact on the longitudinal strength of reinforced composites?
a) Fiber orientation b) Fiber strength
c) Fiber length d) Fiber diameter

5) Which of the following does not combine with fiber to give composites?
a) Metals b) Ceramics
c) Non-metals d) Polymers

6) Which of the following may alter the mechanical properties of reinforced composites?
a) Constituent properties b) Fiber length
c) Fiber orientation d) All of the mentioned

7) Hand lay-up process predominantly uses _____ fibers.
a) unidirectional b) bidirectional
c) multidirectional d) none of the above

8) The fire point of composite is high.
a) True b) False

9) Which of the following does not combine with fiber to give composites?
a) Metals b) Ceramics
c) Non-metals d) Polymers

10) Which of the following type of composite is not classified under the category of a number of layers?
a) Unidirectional fiber reinforced b) Laminar
c) Sandwich panels d) Glass-fibre reinforced

11) The matrix phase controls the environmental resistance of the composites.
a) True b) False

12) In _____ it's a challenge to control the fiber volume fraction.
a) Hand lay-up b) Injection molding
c) Pultrusion d) Spray lay-up

13) Hand lay-up method can be easily used for manufacturing _____.
a) automotive parts b) dashboard
c) boat hulls d) all of the mentioned

14) Higher the length to diameter (L/D) ratio, greater opportunity for mixing of polymer and fiber.
a) True b) False

Set P

S. Y. (B. Tech) (Sem-I) (Old) (CBCS) Examination: March/April-2025
MECHANICAL ENGINEERING
Composite Material (BTN02307)

Day & Date: Thursday 22-05-2025 Max. Marks: 56
Time: 03:00 PM To 06:00 PM

Instructions: 1) In Section I, Q. No. 2 is compulsory and attempt any two questions remaining of the questions.
2) In Section II, Q. No. 7 is compulsory and attempt any two questions remaining of the questions.
3) Figures to the right indicate full marks.

Section – I

Q.2	**a)**	Classify composite materials and explain any one with neat sketch.	**05**
	b)	Differentiate between Carbon-Carbon Composites, Metal Matrix Composites.	**05**
Q.3	**a)**	Define Stress, Strain, Elastic Moduli, Strain Energy.	**05**
	b)	Differentiate between Anisotropic Materials and Orthotropic Material.	**04**
Q.4	**a)**	Explain Hooke's Law for a Two-Dimensional Unidirectional Lamina.	**04**
	b)	Explain Engineering Constants of an Angle Lamina.	**05**

Q.5 Write short note on any three. **09**
a) Recycling Fiber-Reinforced Composites
b) Polymer Matrix Composites
c) Transversely Isotropic Material
d) Hooke's Law for a Two-Dimensional Angle Lamina

Section – II

Q.6	**a)**	Explain Density, Void Content.	**04**
	b)	Explain Evaluation of the Four Elastic Moduli.	**05**
Q.7	**a)**	Explain Transverse Young's Modulus.	**05**
	b)	Explain In-Plane Shear Modulus.	**05**
Q.8	**a)**	Explain Injection molding with neat sketch.	**05**
	b)	Differentiate Open and closed mold-processing.	**04**

Q.9 Write short note on any three. **09**
a) Hand lay-up techniques
b) Volume Fractions, Mass Fractions.
c) Bag molding and filament winding
d) Major Poisson's Ratio

Set Q

S. Y. (B. Tech) (Sem-I) (Old) (CBCS) Examination: March/April-2025
MECHANICAL ENGINEERING
Composite Material (BTN02307)

Day & Date: Thursday 22-05-2025 Max. Marks: 70
Time: 03:00 PM To 06:00 PM

Instructions: 1) Q. No. 1 is compulsory. It should be solved in the first 30 minutes in Answer Book Page no 03 (Starting page of the Answer Book). Each question carries one mark.
2) Don't forget to Mention question paper set (P/Q/R/S) on top of page.
3) Figures to the right indicates full marks.
4) Make suitable assumptions (if necessary and state them clearly).

MCQ/Objective Type Questions

Duration: 30 Minutes Marks:14

Q.1 Choose the correct Answer. **14**

1) The fire point of composite is high.
a) True b) False

2) Which of the following does not combine with fiber to give composites?
a) Metals b) Ceramics
c) Non-metals d) Polymers

3) Which of the following type of composite is not classified under the category of a number of layers?
a) Unidirectional fiber reinforced b) Laminar
c) Sandwich panels d) Glass-fibre reinforced

4) The matrix phase controls the environmental resistance of the composites.
a) True b) False

5) In _____ it's a challenge to control the fiber volume fraction.
a) Hand lay-up b) Injection molding
c) Pultrusion d) Spray lay-up

6) Hand lay-up method can be easily used for manufacturing _____.
a) automotive parts b) dashboard
c) boat hulls d) all of the mentioned

7) Higher the length to diameter (L/D) ratio, greater opportunity for mixing of polymer and fiber.
a) True b) False

8) In sandwich composites, which of the following material can be used for filling purposes?

a) Wood
b) Cement
c) Polymer
d) All of the mentioned

9) Composites can be classified based on _____.

a) Matrix type
b) Reinforcement constituent
c) Matrix type & reinforcement constituent
d) Neither on matrix type nor on reinforcement constituent type

10) The composite constituents of both matrix and reinforcements are softer.

a) True
b) False

11) Which of the following has a greater impact on the longitudinal strength of reinforced composites?

a) Fiber orientation
b) Fiber strength
c) Fiber length
d) Fiber diameter

12) Which of the following does not combine with fiber to give composites?

a) Metals
b) Ceramics
c) Non-metals
d) Polymers

13) Which of the following may alter the mechanical properties of reinforced composites?

a) Constituent properties
b) Fiber length
c) Fiber orientation
d) All of the mentioned

14) Hand lay-up process predominantly uses _____ fibers.

a) unidirectional
b) bidirectional
c) multidirectional
d) none of the above

MCQ/Objective Type Questions

Duration: 30 Minutes Marks: 14

Q.1 Choose the correct answer: 14

1) In a mechanism which one is true _____
a) All links fixed b) One link is fixed
c) All links free d) None of the above

2) The lead screw of a lathe with nut forms a _____
a) sliding pair b) rolling pair
c) screw pair d) turning pair

3) The mechanism forms a structure, when the number of degrees of freedom (n) is equal to _____
a) 0 b) 1
c) 2 d) -1

4) The component of acceleration along the link is called as _____
a) Radial component b) Tangential component
c) Coriolis component d) None

5) The direction of linear velocity of any point on a link with respect to another point on the same link is _____
a) parallel to the link joining the points
b) perpendicular to the link joining the points
c) at 45° to the link joining the points
d) none of these

6) The size of cam depends upon _____
a) base circle b) pitch circle
c) Prime circle d) Pitch curve

7) Offset is provided to a cam follower mechanism to _____
a) minimize the side thrust b) accelerate
c) avoid jerk d) none of these

8) The type of gears used to connect two non-parallel non-intersecting shafts are _____
a) spur gears b) helical gears
c) spiral gears d) none of these
