2) Which of the following is NOT an impediment to improving supply chain performance?
a) Lack of information sharing
b) Advanced technological integration
c) Resistance to change
d) Fragmented decision-making

3) Measuring logistics cost in performance evaluation includes which of the following components?
a) Transportation costs b) Warehousing costs
c) Inventory holding costs d) All of the above

4) Which of the trends is transforming international supply chain management?
a) Increased reliance on manual processes
b) Adoption of digital technologies like AI and blockchain
c) Reduced focus on sustainability
d) Avoidance of data-driven decision-making

5) Which of the following best describes "Co-Makership" in supply chain management?
   a) A strategy for cost reduction by eliminating partnerships
   b) A collaboration where suppliers and manufacturers jointly work to improve product development
   c) A conflict management technique between supply chain partners
   d) Outsourcing all operations to third-party service providers

6) What role does Distribution Resource Planning (DRP) play in supply chain management?
   a) Forecasting customer demand
   b) Managing inventory levels across distribution centres
   c) Optimizing replenishment schedules
   d) All of the above

7) What differentiates World-Class Supply Chain Management from traditional practices?
   a) Emphasis on localized operations only
   b) Adoption of advanced technology, agility, and customer-centric approaches
   c) Complete reliance on manual processes
   d) Avoidance of sustainability and innovation

8) In the cycle view of Supply Chain, which cycle involves the manufacturer and supplier?
   a) Customer Order Cycle b) Procurement Cycle
   c) Replenishment Cycle d) Manufacturing Cycle

9) What is the “typology of supply chains” primarily concerned with?
   a) Classification of supply chain based on customer needs and product flow
   b) Designing warehouse locations
   c) Determining the exact number of suppliers
   d) Evaluating employee performance

10) Which of the following is NOT a common problem in Supply Chain Management?
   a) Bullwhip Effect
   b) Poor Inventory Management
   c) Low Collaboration among Partners
   d) Excessive Focus on Automation

11) What is the main effect of a lack of coordination on supply chain performance?
   a) Increased transparency across the supply chain
   b) Lower levels of inventory buildup
   c) Higher costs and reduced customer satisfaction
   d) Improved forecasting accuracy

12) Which of the following strategies can help to achieve coordination in a supply chain?
   a) Siloed decision-making across supply chain members
   b) Establishing a culture of secrecy among partners
   c) Information sharing and collaborative forecasting
   d) Eliminating all intermediaries in the supply chain

13) Structuring supply chain capabilities involves: ____.
   a) Creating separate strategies for marketing and supply chain processes
   b) Building specific skills and infrastructure to support business objectives
   c) Designing independent functions without integration
   d) Avoiding investments in logistics and distribution

14) Matching supply chain design with business strategy focuses on: ___.
   a) Prioritizing low costs irrespective of customer needs
   b) Ensuring the supply chain aligns with the company's competitive priorities
   c) Avoiding flexibility in supply chain operations
   d) Eliminating redundancies regardless of operational risks

Set **Q**

Fourth. Y. (B. Tech) (Sem-I) (New) (CBCS) Examination: March/April-2025
MECHANICAL ENGINEERING
Supply Chain Management (BTN02714)

Day & Date: Monday, 09-June-2025 Max. Marks: 56
Time: 03:00 PM To 06:00 PM

Instructions: 1) Solve any 2 questions from each section.
2) Figures to the right indicate full marks.
3) Assume suitable data if required & state it clearly.
4) Use of non-programmable calculator is allowed.

Section - I

Q.2	**a)**	What are the key problems in Supply Chain Management, and what solutions are suggested?	**05**
	b)	What are the key drivers of Supply Chain Management, and how do they impact its performance?	**05**
	c)	Compare the different types of Supply Chain Management (SCM).	**04**
Q.3	**a)**	Explain the obstacles for achieving coordination in a supply chain.	**05**
	b)	Explain the strategies to achieve better coordination in a supply chain.	**05**
	c)	Explain the methods and strategies for building strategic partnerships and fostering trust within a supply chain.	**04**
Q.4	**a)**	Explain in detail How does a company align its supply chain design with its overall business strategy?	**05**
	b)	Explain the key factors that companies need to consider when developing a global supply chain strategy.	**05**
	c)	Explain companies supply chain structure to support their strategic goals.	**04**

Section - II

Q.5	**a)**	Describe the role of safety stock and the factors affecting its determination.	**05**
	b)	Discuss common inventory models used in supply chain management.	**05**
	c)	Explain forecasting models and their significance in inventory flow management.	**04**
Q.6	**a)**	Discuss the common impediments for improving supply chain performance.	**05**
	b)	Explain the methods to measure logistics costs and performance in a supply chain.	**05**
	c)	Explain How do trends in international supply chain management impact performance measurement.	**04**

Q.7	**a)**	What are the recent developments in supply chain management, and how do they address current challenges?	**05**
	b)	Explain the main characteristics of World-Class Supply Chain Management.	**05**
	c)	Discuss the significance of Distribution Resource Planning (DRP) in supply chain management.	**04**

Fourth. Y. (B. Tech) (Sem-I) (New) (CBCS) Examination: March/April-2025
MECHANICAL ENGINEERING
Supply Chain Management (BTN02714)

Day & Date: Monday, 09-June-2025 Max. Marks: 70
Time: 03:00 PM To 06:00 PM

Instructions: 1) Q. No. 1 is compulsory. It should be solved in the first 30 minutes in Answer Book Page no 03 (Starting page of the Answer Book). Each question carries one mark.
2) Don't forget to Mention question paper set (P/Q/R/S) on top of page.
3) Figures to the right indicates full marks.
4) Assume suitable data if required & state it clearly.
5) Use of non-programmable calculator is allowed.

MCQ/Objective Type Questions

Duration: 30 Minutes Marks:14

Q.1 Choose the correct Answer. **14**

1) Which of the trends is transforming international supply chain management?
a) Increased reliance on manual processes
b) Adoption of digital technologies like Al and blockchain
c) Reduced focus on sustainability
d) Avoidance of data-driven decision-making

2) Which of the following best describes "Co-Makership" in supply chain management?
a) A strategy for cost reduction by eliminating partnerships
b) A collaboration where suppliers and manufacturers jointly work to improve product development
c) A conflict management technique between supply chain partners
d) Outsourcing all operations to third-party service providers

3) What role does Distribution Resource Planning (DRP) play in supply chain management?
a) Forecasting customer demand
b) Managing inventory levels across distribution centres
c) Optimizing replenishment schedules
d) All of the above

4) What differentiates World-Class Supply Chain Management from traditional practices?
a) Emphasis on localized operations only
b) Adoption of advanced technology, agility, and customer-centric approaches
c) Complete reliance on manual processes
d) Avoidance of sustainability and innovation

5) In the cycle view of Supply Chain, which cycle involves the manufacturer and supplier?
   a) Customer Order Cycle b) Procurement Cycle
   c) Replenishment Cycle d) Manufacturing Cycle

6) What is the "typology of supply chains" primarily concerned with?
   a) Classification of supply chain based on customer needs and product flow
   b) Designing warehouse locations
   c) Determining the exact number of suppliers
   d) Evaluating employee performance

7) Which of the following is NOT a common problem in Supply Chain Management?
   a) Bullwhip Effect
   b) Poor Inventory Management
   c) Low Collaboration among Partners
   d) Excessive Focus on Automation

8) What is the main effect of a lack of coordination on supply chain performance?
   a) Increased transparency across the supply chain
   b) Lower levels of inventory buildup
   c) Higher costs and reduced customer satisfaction
   d) Improved forecasting accuracy

9) Which of the following strategies can help to achieve coordination in a supply chain?
   a) Siloed decision-making across supply chain members
   b) Establishing a culture of secrecy among partners
   c) Information sharing and collaborative forecasting
   d) Eliminating all intermediaries in the supply chain

10) Structuring supply chain capabilities involves: ____.
   a) Creating separate strategies for marketing and supply chain processes
   b) Building specific skills and infrastructure to support business objectives
   c) Designing independent functions without integration
   d) Avoiding investments in logistics and distribution

11) Matching supply chain design with business strategy focuses on: ___.
   a) Prioritizing low costs irrespective of customer needs
   b) Ensuring the supply chain aligns with the company's competitive priorities
   c) Avoiding flexibility in supply chain operations
   d) Eliminating redundancies regardless of operational risks

12) Which inventory model is best suited for managing demand that is both constant and known?

a) Economic Order Quantity (EOQ) model
b) Periodic Review model
c) Just-in-Time (JIT) inventory system
d) ABC classification model

13) Which of the following is NOT an impediment to improving supply chain performance?

a) Lack of information sharing
b) Advanced technological integration
c) Resistance to change
d) Fragmented decision-making

14) Measuring logistics cost in performance evaluation includes which of the following components?

a) Transportation costs
b) Warehousing costs
c) Inventory holding costs
d) All of the above

MCQ/Objective Type Questions

Duration: 30 Minutes Marks:14

Q.1 Choose the correct Answer. **14**

1) Shape function is usually ____.
a) The coefficient that appears in the interpolation polynomial
b) Written for each individual node of finite element
c) Interchanged with the terminology interpolation polynomial
d) All of the above

2) If element size is reduced, number of elements ____.
a) increases b) decreases
c) remains constant d) gets deleted

3) The loading, constraints and other external effects applied to a model is ____.
a) Boundary conditions b) Meshing
c) Constraining d) Modeling

4) Preprocessing means ____.
a) Solving b) Meshing
c) Result analysis d) None of the above

5) Sum of all the natural coordinates of the node is ____.
a) One b) Zero
c) Can not be predicted d) None of the above

6) The interpolation function for a CST element is given by ____.
a) $U = a_1 + a_2x + a_3y$ b) $U = a_1 + a_2x + a_3x^2$
c) $U = a_1 + a_2x + a_3x^2 + a_4y$ d) $U = a_1 + a_2x + a_3y + a_4z$

7) Complex elements are defined as those elements which ____.
a) have higher order interpolation polynomials
b) have sides parallel to coordinate system
c) have sides parallel to coordinate system and use higher order interpolation polynomials
d) have polynomials with only linear and constant terms

8) Each node of beam element is having following degree of freedom ____.
a) 3 b) 4
c) 2 d) 1

9) In ____ element the value of field variable remains unchanged in the circumferential direction.
a) 1D and 2D b) Beam
c) Truss d) Axisymmetric

10) Size of shape function matrix of 2D element having 3 nodes is ____.
a) 2 x 6 b) 3 x 3
c) 4 x 6 d) 2 x 5

11) Formula for Galerkin method is _____.
a) $f(x)R(x)dx = 0$ b) $\int R(x)dx = 0$
c) $R(x) = 0$ d) $\int R2(x)dx = 0$

12) A measure of distortion of an element is ____.
a) Bandwidth b) Damping ratio
c) Aspect ratio d) Shape function

13) A problem which is not a function of a time ____.
a) Eigenvalue problem b) Steady state problem
c) Transient problem d) Propagation problem

14) The three most common cases on non-linearity are ____.
a) Fluttering, Geometric, Material
b) Material, Geometric, Contact
c) Material, Fluttering, plasticity
d) Creep, Fluttering, Contact

Seat No.	

Set **P**

Fourth. Y. (B. Tech.) (Sem-I) (New) (CBCS) Examination: March/April-2025
MECHANICAL ENGINEERING
Finite Element Method (BTN02715)

Day & Date: Monday, 09-June-2025 Max. Marks: 56
Time: 03:00 PM To 06:00 PM

Instructions: 1) Answer any two questions from Section I and Section II.
2) Figures to the right indicate full marks.
3) Use of non-programmable scientific calculator is allowed.
4) Assume suitable data if necessary and mention it clearly.

Section - I

Q.2 **a)** Obtain solution of differential equation by using Galerkin's method. **07**

$$\frac{\partial^2 u}{\partial x^2} + u - x^2 = 0, \qquad 0 \le x \le 1$$

Take boundary conditions as $u(0) = 0$, $\frac{du}{dx}(1) = 1$

b) Explain Simplex, Complex and Multiplex elements. **07**

Q.3 **a)** Find nodal displacement in stepped bar as shown in figure 1. **07**
Take $A_1 = 20\ mm^2, A_2 = 10\ mm^2$
$L_1 = L_2 = 100\ mm$, $E_1 = E_2 = 200 \times 10^3$ MPa

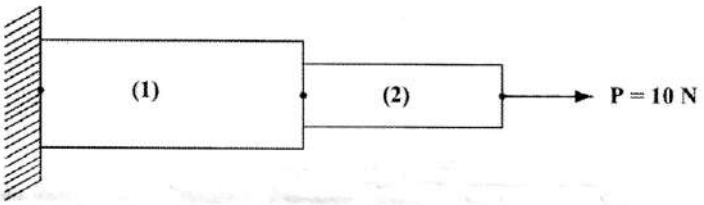

Figure 1

b) Explain discretization in FEM with suitable example and also brief p-refinement and h- refinement. **07**

Q.4 **Attempt the following.**
a) What are the properties of Stiffness matrix? Explain. **04**
b) Write a note on FEM steps. **04**
c) Shape functions for 1D element in global and natural coordinates. **06**

Section - II

Q.5 **a)** Calculate the value of field variable at the point A (2.5, 2.5), which is located inside the triangles shown in figure 2. The nodal values for field variable are U_i = 3.5, U_j = 2.2 and U_k = 4.4 **07**

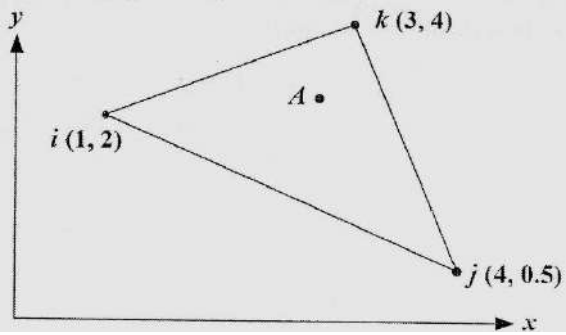

Figure 2

b) Explain static analysis and modal analysis. **07**

Q.6 **a)** Solve the following problem for all unknowns. Impose the boundary conditions using the penalty method. Refer figure 3. **12**

A_1 = 900 mm^2, A_2 = 400 mm^2, A_3 = 200 mm^2

L_1 = 80 mm, L_2 = 80 mm, L_3 = 70 mm

E_1 = 70 GPa, E_2 = 105 GPa, E_3 = 200G Pa

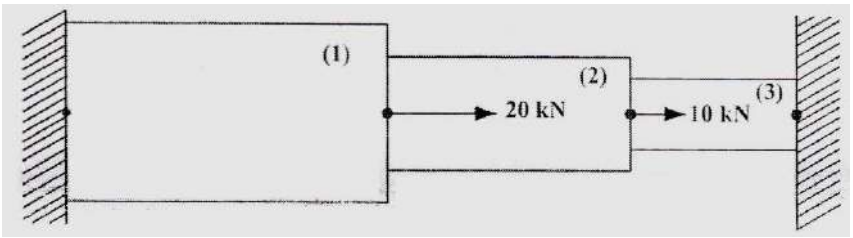

Figure 3

b) What are the 3D elements? **02**

Q.7 **Write short Notes on: (Any Three)** **14**

- **a)** Size and number of elements
- **b)** Interpolation functions
- **c)** Axisymmetric problems and axisymmetric elements
- **d)** Transient thermal analysis

a) What are the properties of Stiffness matrix? Explain. **04**
b) Write a note on FEM steps. **04**
c) Shape functions for 1D element in global and natural coordinates. **06**

Section - II

Q.5 **a)** Calculate the value of field variable at the point A (2.5, 2.5), which is located inside the triangles shown in figure 2. The nodal values for field variable are U_i = 3.5, U_j = 2.2 and U_k = 4.4 **07**

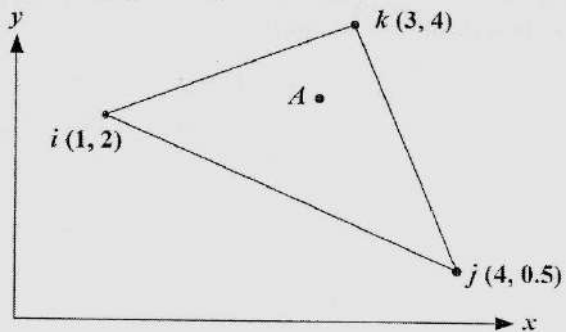

Figure 2

b) Explain static analysis and modal analysis. **07**

Q.6 **a)** Solve the following problem for all unknowns. Impose the boundary conditions using the penalty method. Refer figure 3. **12**

A_1 = 900 mm^2, A_2 = 400 mm^2, A_3 = 200 mm^2

L_1 = 80 mm, L_2 = 80 mm, L_3 = 70 mm

E_1 = 70 GPa, E_2 = 105 GPa, E_3 = 200G Pa

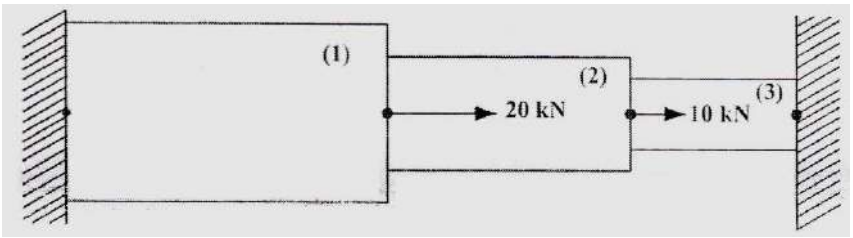

Figure 3

b) What are the 3D elements? **02**

Q.7 **Write short Notes on: (Any Three)** **14**

- **a)** Size and number of elements
- **b)** Interpolation functions
- **c)** Axisymmetric problems and axisymmetric elements
- **d)** Transient thermal analysis

Seat No.

Fourth. Y. (B. Tech.) (Sem-I) (New) (CBCS) Examination: March/April-2025
MECHANICAL ENGINEERING
Finite Element Method (BTN02715)

Day & Date: Monday, 09-June-2025 Max. Marks: 70
Time: 03:00 PM To 06:00 PM

Instructions: 1) Q. No. 1 is compulsory. It should be solved in the first 30 minutes in Answer Book Page no 03 (Starting page of the Answer Book). Each question carries one mark.
2) Don't forget to Mention question paper set (P/Q/R/S) on top of page.
3) Figures to the right indicates full marks.
4) Use of non-programable scientific calculator is allowed.
5) Assume suitable data if necessary.

MCQ/Objective Type Questions

Duration: 30 Minutes Marks:14

Q.1 Choose the correct Answer. **14**

1) Formula for Galerkin method is _____.
a) $f(x)R(x)dx = 0$ b) $\int R(x)dx = 0$
c) $R(x) = 0$ d) $\int R2(x)dx = 0$

2) A measure of distortion of an element is _____.
a) Bandwidth b) Damping ratio
c) Aspect ratio d) Shape function

3) A problem which is not a function of a time _____.
a) Eigenvalue problem b) Steady state problem
c) Transient problem d) Propagation problem

4) The three most common cases on non-linearity are _____.
a) Fluttering, Geometric, Material
b) Material, Geometric, Contact
c) Material, Fluttering, plasticity
d) Creep, Fluttering, Contact

5) Shape function is usually _____.
a) The coefficient that appears in the interpolation polynomial
b) Written for each individual node of finite element
c) Interchanged with the terminology interpolation polynomial
d) All of the above

6) If element size is reduced, number of elements _____.
a) increases b) decreases
c) remains constant d) gets deleted

7) The loading, constraints and other external effects applied to a model is _____.

a) Boundary conditions b) Meshing
c) Constraining d) Modeling

8) Preprocessing means _____.

a) Solving b) Meshing
c) Result analysis d) None of the above

9) Sum of all the natural coordinates of the node is _____.

a) One b) Zero
c) Can not be predicted d) None of the above

10) The interpolation function for a CST element is given by _____.

a) $U = a_1 + a_2x + a_3y$ b) $U = a_1 + a_2x + a_3x^2$
c) $U = a_1 + a_2x + a_3x^2 + a_4y$ d) $U = a_1 + a_2x + a_3y + a_4z$

11) Complex elements are defined as those elements which _____.

a) have higher order interpolation polynomials
b) have sides parallel to coordinate system
c) have sides parallel to coordinate system and use higher order interpolation polynomials
d) have polynomials with only linear and constant terms

12) Each node of beam element is having following degree of freedom _____.

a) 3 b) 4
c) 2 d) 1

13) In _____ element the value of field variable remains unchanged in the circumferential direction.

a) 1D and 2D b) Beam
c) Truss d) Axisymmetric

14) Size of shape function matrix of 2D element having 3 nodes is _____.

a) 2 x 6 b) 3 x 3
c) 4 x 6 d) 2 x 5

Seat No.

Fourth. Y. (B. Tech.) (Sem-I) (New) (CBCS) Examination: March/April-2025
MECHANICAL ENGINEERING
Finite Element Method (BTN02715)

Day & Date: Monday, 09-June-2025 Max. Marks: 56
Time: 03:00 PM To 06:00 PM

Instructions: 1) Answer any two questions from Section I and Section II.
2) Figures to the right indicate full marks.
3) Use of non-programmable scientific calculator is allowed.
4) Assume suitable data if necessary and mention it clearly.

Section - I

Q.2 **a)** Obtain solution of differential equation by using Galerkin's method. **07**

$$\frac{\partial^2 u}{\partial x^2} + u - x^2 = 0, \qquad 0 \le x \le 1$$

Take boundary conditions as $u(0) = 0$, $\frac{du}{dx}(1) = 1$

b) Explain Simplex, Complex and Multiplex elements. **07**

Q.3 **a)** Find nodal displacement in stepped bar as shown in figure 1. **07**
Take $A_1 = 20\ mm^2, A_2 = 10\ mm^2$
$L_1 = L_2 = 100\ mm$, $E_1 = E_2 = 200 \times 10^3$ MPa

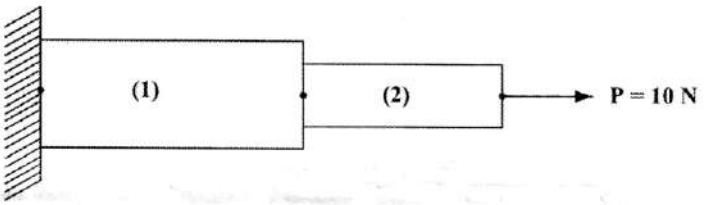

Figure 1

b) Explain discretization in FEM with suitable example and also brief p-refinement and h- refinement. **07**

Q.4 **Attempt the following.**
a) What are the properties of Stiffness matrix? Explain. **04**
b) Write a note on FEM steps. **04**
c) Shape functions for 1D element in global and natural coordinates. **06**

Section - II

Q.5 **a)** Calculate the value of field variable at the point A (2.5, 2.5), which is located inside the triangles shown in figure 2. The nodal values for field variable are U_i = 3.5, U_j = 2.2 and U_k = 4.4 **07**

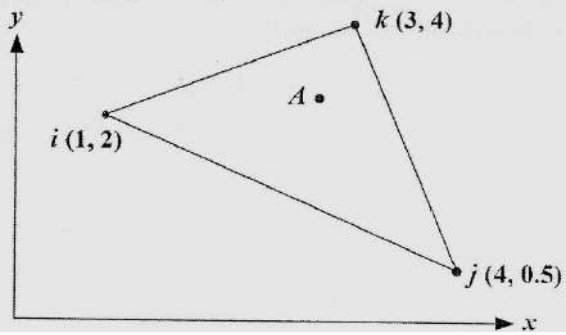

Figure 2

b) Explain static analysis and modal analysis. **07**

Q.6 **a)** Solve the following problem for all unknowns. Impose the boundary conditions using the penalty method. Refer figure 3. **12**

A_1 = 900 mm^2, A_2 = 400 mm^2, A_3 = 200 mm^2

L_1 = 80 mm, L_2 = 80 mm, L_3 = 70 mm

E_1 = 70 GPa, E_2 = 105 GPa, E_3 = 200G Pa

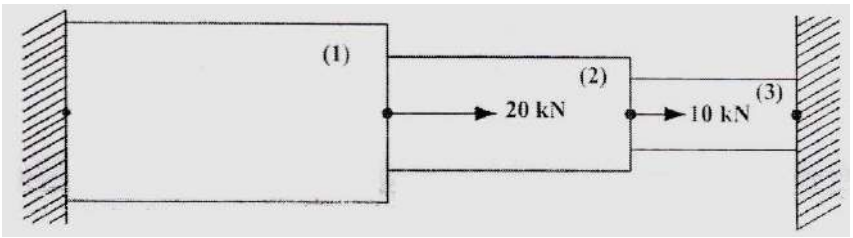

Figure 3

b) What are the 3D elements? **02**

Q.7 **Write short Notes on: (Any Three)** **14**

- **a)** Size and number of elements
- **b)** Interpolation functions

Time: 03:00 PM To 06:00 PM

Instructions: 1) Q. No. 1 is compulsory. It should be solved in the first 30 minutes in Answer Book Page No. 03 (Starting page of the Answer Book). Each question carries one mark.
2) Don't forget to Mention question paper Set (P/Q/R/S) on top of page.
3) Figures to the right indicates full marks.
4) Make suitable assumptions if necessary and state them clearly.

MCQ/Objective Type Questions

Duration: 30 Minutes Marks:14

Q.1 Choose the correct answer. **14**

1) Which of the following is a component of Artificial Intelligence?
a) Learning b) Training
c) Designing d) Puzzling

2) When the joint angles and the different configurations of manipulator are derived from the position orientation, the scheme is known as
a) Forward kinematics b) inverse kinematics
c) transformation d) none of these

3) Segmentation is the process of…….
a) Noise reduction b) object recognition
c) divide the image d) none of these

4) The term UGV stands for_____.
a) Unnamed Ground Vehicle b) Unknown Ground Vehicle
c) Universal Ground Vehicle d) Unmanned Ground Vehicle

5) Which type of joints used in robots.
a) Knuckle joint b) Prismatic joint
c) Universal joint d) None of these

6) Work envelope generated by Cartesian coordinate robot is
a) Sphere b) cylinder
c) rectangular box d) triangle

7) What is Artificial Intelligence?
a) A field that aims to make humans more intelligent
b) A field that aims to improve the security
c) A field that aims to develop intelligent machines
d) A field that aims to mine the data

8) Binary sensors having _____ is the contact device
a) fingers b) micro switch
c) wrist d) none of these

9) The envelope or space within which robot can manipulate the wrist is known as
a) Repeatability b) Accuracy
c) Work volume d) Stability

10) Robot grippers for industrial robots typically employ ___ actuators.
a) Pneumatic b) Hydraulic
c) Magnetic d) Electric

11) The non-manufacturing areas of robotics are
a) Mining b) agriculture
c) assembly d) nuclear

12) Which of the following drives used for control the robots?
a) Hydraulic b) pneumatic
c) electrical d) solenoid

13) Which of the following are tactile sensors?

Robotics and Artificial Intelligence (197041703)

Day & Date: Wednesday, 04-06-2025 Max. Marks: 56
Time: 03:00 PM To 06:00 PM

Instructions: 1) Q. No. 2 is compulsory; answer any two from remaining questions from Sec – I.
2) Q. 6 is compulsory; answer any two from remaining questions from Sec – II.
3) Figures to the right indicate full marks.
4) Make suitable assumptions if necessary and state them clearly.

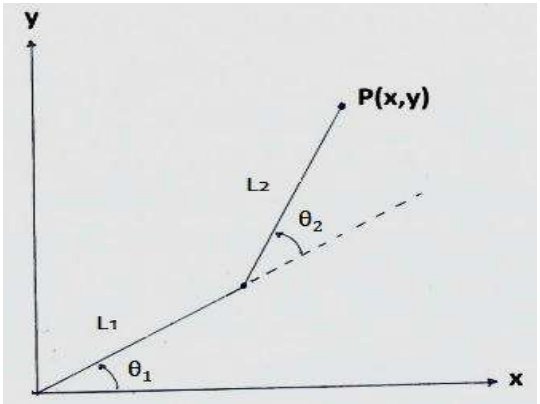
Section – I

Q.2 **a)** Explain selection criteria for sensors. **04**
b) Explain the five basic robot types according to the work envelope geometries. **06**

Q.3 **a)** Discuss the construction and working of stepper motors. List its applications. **05**
b) Explain briefly following sensors **04**
i) Force sensors
ii) Eddy current sensors

Q.4 **a)** Explain following industrial automation **05**
i) Fixed automation
ii) Programmable automation
iii) Flexible automation **04**
b) Define robot vision system & explain with block diagram.

Q.5 **a)** What are the different specifications used in Robots. **05**
b) It is a desired to determine the value to which the angles $\theta 1$ and $\theta 2$ must be set in order to achieve a certain point in space for manipulator as shown in fig. the length of joint - 1 LI =12", and the length of joint - 2 L2=10". The point 'p' which the robot must achieve is defined by co-ordinates x = 15.7 and y = 12.6 using reverse transformation method determine the angles θ_1 and θ_2. **04**



Section - II

Q.5	**a)**	Explain Artificial Neural Network (ANN) With suitable example.	**04**
	b)	Explain segmentation process.	**06**
Q.6	**a)**	Explain the applications of robot in following i) Medical ii) Assembly	**05**
	b)	Explain the applications of robot in following i) Material handling ii) Spray painting/coating	**04**
Q.7	**a)**	Explain Genetic Algorithm (GA). With neat sketch.	**05**

Fourth Y. (B.Tech.) (Sem - I) (CBCS) Examination: March/April - 2025
MECHANICAL ENGINEERING
Robotics and Artificial Intelligence (197041703)

Day & Date: Wednesday, 04-06-2025 Max. Marks: 70
Time: 03:00 PM To 06:00 PM

Instructions: 1) Q. No. 1 is compulsory. It should be solved in the first 30 minutes in Answer Book Page No. 03 (Starting page of the Answer Book). Each question carries one mark.
2) Don't forget to Mention question paper Set (P/Q/R/S) on top of page.
3) Figures to the right indicates full marks.
4) Make suitable assumptions if necessary and state them clearly.

MCQ/Objective Type Questions

Duration: 30 Minutes Marks:14

Q.1 Choose the correct answer. **14**

1) Work envelope generated by Cartesian coordinate robot is
a) Sphere b) cylinder
c) rectangular box d) triangle

2) What is Artificial Intelligence?
a) A field that aims to make humans more intelligent
b) A field that aims to improve the security
c) A field that aims to develop intelligent machines
d) A field that aims to mine the data

3) Binary sensors having _____ is the contact device
a) fingers b) micro switch
c) wrist d) none of these

4) The envelope or space within which robot can manipulate the wrist is known as
a) Repeatability b) Accuracy
c) Work volume d) Stability

5) Robot grippers for industrial robots typically employ ___ actuators.
a) Pneumatic b) Hydraulic
c) Magnetic d) Electric

6) The non-manufacturing areas of robotics are
a) Mining b) agriculture
c) assembly d) nuclear

7) Which of the following drives used for control the robots?
a) Hydraulic b) pneumatic
c) electrical d) solenoid

8) Which of the following are tactile sensors?
a) Magnetic sensor b) piezoelectric
c) encoder d) range sensor

9) Which is the higher level vision?
a) Smoothing b) Segmentation
c) Thresholding d) Region growing

10) Which of the following is a component of Artificial Intelligence?
a) Learning b) Training
c) Designing d) Puzzling

11) When the joint angles and the different configurations of manipulator are derived from the position orientation, the scheme is known as
a) Forward kinematics b) inverse kinematics
c) transformation d) none of these

12) Segmentation is the process of…….
a) Noise reduction b) object recognition
c) divide the image d) none of these

13) The term UGV stands for_____.
a) Unnamed Ground Vehicle b) Unknown Ground Vehicle
c) Universal Ground Vehicle d) Unmanned Ground Vehicle

14) Which type of joints used in robots.
a) Knuckle joint b) Prismatic joint
c) Universal joint d) None of these

Seat No.		Set	S

Fourth Y. (B.Tech.) (Sem - I) (CBCS) Examination: March/April - 2025
MECHANICAL ENGINEERING
Robotics and Artificial Intelligence (197041703)

Day & Date: Wednesday, 04-06-2025 Max. Marks: 56
Time: 03:00 PM To 06:00 PM

Instructions: 1) Q. No. 2 is compulsory; answer any two from remaining questions from Sec – I.
2) Q. 6 is compulsory; answer any two from remaining questions from Sec – II.
3) Figures to the right indicate full marks.
4) Make suitable assumptions if necessary and state them clearly.

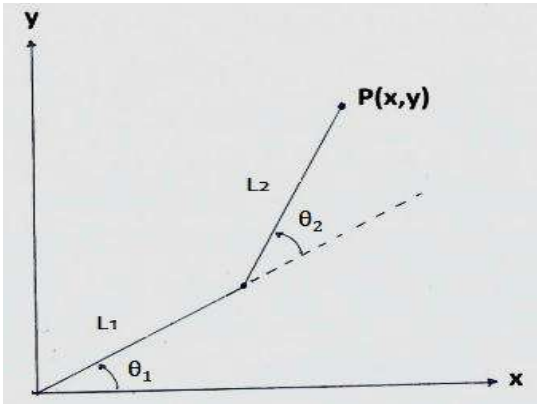
Section – I

Q.2 **a)** Explain selection criteria for sensors. **04**
b) Explain the five basic robot types according to the work envelope geometries. **06**

Q.3 **a)** Discuss the construction and working of stepper motors. List its applications. **05**
b) Explain briefly following sensors **04**
i) Force sensors
ii) Eddy current sensors

Q.4 **a)** Explain following industrial automation **05**
i) Fixed automation
ii) Programmable automation
iii) Flexible automation **04**
b) Define robot vision system & explain with block diagram.

Q.5 **a)** What are the different specifications used in Robots. **05**
b) It is a desired to determine the value to which the angles $\theta 1$ and $\theta 2$ must be set in order to achieve a certain point in space for manipulator as shown in fig. the length of joint - 1 LI =12", and the length of joint - 2 L2=10". The point 'p' which the robot must achieve is defined by co-ordinates x = 15.7 and y = 12.6 using reverse transformation method determine the angles θ_1 and θ_2. **04**



Section - II

Q.5	**a)**	Explain Artificial Neural Network (ANN) With suitable example.	**04**
	b)	Explain segmentation process.	**06**
Q.6	**a)**	Explain the applications of robot in following i) Medical ii) Assembly	**05**
	b)	Explain the applications of robot in following i) Material handling ii) Spray painting/coating	**04**
Q.7	**a)**	Explain Genetic Algorithm (GA). With neat sketch.	**05**
	b)	Explain template matching technique for image processing.	**04**
Q.8	**a)**	Compare online and offline programming.	**05**
	b)	Discuss the application of the wheeled robot.	**04**

Set P

T.Y. (B.Tech.) (Electronics Engineering) (Semester - I) (New) (CBCS)
Examination: March/April - 2025
Digital Communication (BTN04501)

Day & Date: Saturday 17-05-2025 Max. Marks: 70
Time: 10:00 AM To 01:00 PM

Instructions: 1) Q. No. 1 is compulsory. It should be solved in the first 30 minutes in Answer Book Page no 03 (Starting page of the Answer Book). Each question carries one mark.
2) Don't forget to Mention question paper set (P/Q/R/S) on top of page.
3) Figures to the right indicates full marks.
4) Assume suitable data if necessary.

MCQ/Objective Type Questions

Duration: 30 Minutes Marks:14

Q.1 Select suitable option. **14**

1) Matched filter may be optimally used only for _____.
a) Gaussian noise b) Transit time noise
c) Flicker d) All of the above

2) In uniform quantization process _____.
a) The step size remains same
b) Step size varies according to the values of the input signal
c) The quantizer has linear characteristics
d) Both a and c are correct

3) The modulation techniques used to convert analog signal into digital signal are _____.
a) Pulse code modulation b) Delta modulation
c) Adaptive delta modulation d) All of the above

4) One of the disadvantages of PCM is _____.
a) It requires large bandwidth b) very high noise
c) cannot be decoded easily d) All of the above

5) The channel capacity according to Shannon's equation is _____.
a) Maximum error free communication
b) Defined for optimum system
c) Information transmitted
d) All of the above

6) The information rate R for given average information H = 2.0 for analog signal band limited to B Hz is _____.

a) 8 B bits/sec
b) 4 B bits/sec
c) 2 B bits/sec
d) 16 B bits/sec

7) For decoding in convolution coding, in a code tree, _____.

a) Diverge upward when a bit is 0 and diverge downward when the bit is 1
b) Diverge downward when a bit is 0 and diverge upward when the bit is 1
c) Diverge left when a bit is 0 and diverge right when the bit is 1
d) Diverge right when a bit is 0 and diverge left when the bit is 1

8) Parity check bit coding is used for _____.

a) Error correction
b) Error detection
c) Error correction and detection
d) None of the above

9) The probability of error of DPSK is _____ than that of BPSK.

a) Higher
b) Lower
c) Same
d) Not predictable

10) QPSK is a modulation scheme where each symbol consists of _____.

a) 4 bits
b) 2 bits
c) 1 bits
d) M number of bits, depending upon the requirement

11) The data rate of QPSK is _____ of BPSK.

a) Thrice
b) Four times
c) Twice
d) Same

12) One of the disadvantages of PCM is _____.

a) It requires large bandwidth
b) Very high noise
c) cannot be decoded easily
d) All of the above

13) The sequence of operations in which PCM is done is _____.

a) Sampling, quantizing, encoding
b) Quantizing, encoding, sampling
c) Quantizing, sampling, encoding
d) None of the above

14) Minimum shift keying is similar to _____.

a) Continuous phase frequency shift keying
b) Binary phase shift keying
c) Binary frequency shift keying
d) QPSK

Seat No.		Set	P

Examination: March/April - 2025
Digital Communication (BTN04501)

Day & Date: Saturday 17-05-2025 Max. Marks: 56
Time: 10:00 AM To 01:00 PM

Instructions: 1) All questions are compulsory.
2) Figures to the right indicate full marks.
3) Assume suitable data if necessary.

Section – I

Q.2 Attempt Any Four. **16**

a) Compare Analog Communication and digital Communication.
b) Explain PPM using IC555.
c) Define the Information Theory and Mutual information.
d) Why companding is necessary?
e) Determine the Nyquist sampling rate & sampling interval for the following signal
$x(t) = 6\cos(50\pi\, t) + 20\sin(300\pi t) - 10\cos(100\pi t)$

Q.3 Attempt Any Two. **12**

a) Compare PCM, DPCM, DM and ADM.
b) Derive the expression for condition of maximum entropy.
c) A DMS X has five symbols x1, x2, x3, x4 and x5 with 0.4, 0.19, 0.16, 0.15 and 0.1 respectively
i) Construct a Shannon Fano code for X and calculate the efficiency of the code.
ii) Repeat for Huffman code and compare the result.

Section – II

Q.4 Attempt Any Four. **16**

a) What is coherent and non coherent detection?
b) Explain Matched Filter BPSK Detector.
c) Explain convolution code with Example.
d) In an (n, k) linear block code, how many code words will be there? Justify your answer.
e) With suitable example explain baseband modulation and band pass modulation.

Q.5 Attempt any two. **12**

a) With suitable waveforms explain QPSK & OQPSK.

b) For a (7,4) code the generator matrix G is given by

$$G = \begin{matrix} 1 & 0 & 0 & 0 & 1 & 0 & 1 \\ 0 & 1 & 0 & 0 & 1 & 1 & 1 \\ 0 & 0 & 1 & 0 & 1 & 1 & 0 \\ 0 & 0 & 0 & 1 & 0 & 1 & 1 \end{matrix}$$

i) Find the code Vector for Message $1 \quad 1 \quad 0 \quad 1$

ii) Find the parity Check Matrix

c) Explain frame synchronization.

4) Assume suitable data if necessary.

MCQ/Objective Type Questions

Duration: 30 Minutes Marks:14

Q.1 Choose the correct Answer. 14

1) The value of the twiddle factor W_4^5 is _____.
a) j b) 1
c) -0.707 + j0.707 d) -j

2) The following realization minimizes the delay elements.
a) Direct form-I realization b) Direct form-II realization
c) Cascade form realization d) Parallel realization

3) The ROC of Z-Transform of $x[n] = \delta[n]$ is_____
a) Entire Z-plane b) Entire Z-plane expect $Z = 0$
c) Entire Z-plane expect $Z = \infty$ d) none of above

4) Number of delay elements are required for direct form I realization of $y(n) = 1.5y(n-1) - 0.45y(n-2) + x(n) + 0.25x(n-2)$ are ____
a) 1 b) 2
c) 3 d) 4

5) DFT of a impulse function is _____.
a) $\delta[n]$ b) 1
c) $\delta[n-1]$ d) None

6) With signal $x(n) = \{1, 4, 6, 7, 8\}$, if $x1(n) = x\big((n-1)\big)_5$ then $x1(n)$ will be
a) {1, 7, 8, 6, 4} b) {7, 8, 1, 4, 6}
c) {4, 6, 7, 8, 1} d) {1, 4, 6, 7, 8}

7) The number of complex additions required DIT FFT algorithm to compute N point DFT is _____.
a) N^2 b) $N\log_2 N$
c) $(N/2)\log_2 2$ d) None of the above

8) The addressing mode that is convenient for FFT computation is ____.
a) Indirect addressing b) Circular mode addressing
c) Bit reversed addressing d) Memory mapped addressing

9) The frequency mapping from s domain to z domain using impulse invariant technique is _____.
a) Many to many b) Many to one
c) One to many d) None of above

10) Butterworth filters have _____.
a) Wide transition region
b) Sharp transition region
c) Oscillation in transition region
d) Maximally flat passband

11) Which of the following is not true for IIR filters?
a) Impulse response duration is infinite
b) They have poles
c) They give linear phase response
d) All of these

12) The FIR filter of order M gives linear phase response if _____.
a) $h(n) < \infty$ b) $h(n) = h(-n)$
c) $h(n) = h(M-1-n)$ d) none of these

13) The hardware used in digital signal processor to scale down or scale up operands is _____.
a) Barrel shifter b) MAC
c) Multiplier d) ALU

14) In Bilinear transformation the relation between Ω and ω is _____.
a) $\Omega = \omega \mathrm{T}$ b) $\Omega = \omega/\mathrm{T}$
c) $\omega = \tan(\Omega \mathrm{T})$ d) $\Omega = (2/\mathrm{T})\tan(\omega/2)$

T. Y. (B.Tech.) (Sem - I) (New) (CBCS) Examination: March/April-2025
ELECTRONICS ENGINEERING
Digital Signal Processing (BTN04502)

Day & Date: Monday 19-05-2025 Max. Marks: 56
Time: 10:00 AM To 01:00 PM

Instructions: 1) All questions are compulsory.
2) Figures to the right indicate full marks.
3) Assume suitable data if necessary.

Section – I

Q.2 Solve any four of the following. **16**

a) State and prove circular time shift property of DFT of a DT signal.

b) If $x(n) = \{\ 6,5,3,2\ \}$ Determine
1) $x1(n) = x\big((-n)\big)_4$
2) $x2(n) = x\big((n+1)\big)_4$

c) Compute circular convolution of the signal
$x1[n] = \{3,1,4,2\}$ & $x2[n] = \{2,3,5,4\}$.

d) Compute IDFT of $X(k) = \{\ 6,0,2,0\ \}$

e) Obtain the direct form realization of the system characterized by transfer function
$H(z) = 1 + 1/3Z^{-1} + 1/2Z^{-2} + 2Z^{-3} + 3z^{-4}$

Q.3 Solve any two of the followings. **12**

a) Realize the FIR system given below in
1) Direct Form I
2) Direct form II
$y(n) = -3y(n-1) + 2y(n-2) + x(n) + 3x(n-1) + 2x(n-2) - x(n-3)$

b) Prove that the multiplication of the DFT's of two sequences is equivalent to the DFT of time domain circular convolution of two sequences.

c) Obtain the output of a filter using overlap & add method whose input & impulse response are as below.
$x(n) = \{3,2,1,3,1,4,1,2,1,4\}$ & $h(n) = \{1\ 2\ \ 5\}$

Section – II

Q.4 Solve any four of the following. **16**

a) Consider the analog transfer function.

$$H(s) = \frac{1}{(s-3)} + \frac{3}{(s \mp 2)}$$

Obtain the digital transfer function H(z) using impulse invariant method. Use T = 1 s

b) Draw and explain the barrel shifter block of DSP chip.

c) Draw and explain the architecture of TMS 320C54 DSP.

d) Design the first order high pass filter with fc = 1 kHz and sampling frequency fs = 10000 sps. Use bilinear transformation method.

e) Given the desired specifications $\Omega p, \Omega s, \delta 1, \delta 2$ of Butterworth filter derive the relation for obtaining order N & cutoff frequency Ωc.

f) Explain finite word length effect in designing FIR filters.

Q.5 Solve any two of the followings. **12**

a) Explain Impulse Invariant Technique along with mapping between s domain & z domain in this method.

b) The desired frequency response of a low pass filter is

$$Hd(e^{jw}) = \begin{cases} e^{-2jw} & -\frac{\pi}{4} \le \omega \le \pi/4 \\ 0 & \frac{\pi}{4} \le |\omega| \le \pi \end{cases}$$

Determine hd(n). Also determine h(n) using symmetric Rectangular window of length 5.

c) Design a digital Butterworth filter to meet the following constraints.

$0.9 \le \left|H(e^{jw})\right| \le 1 \quad 0 \le \omega \le 0.5\pi$

$a. |H(e^{jw})| \le 0.2 \quad 0.75\pi \le \omega \le \pi$

Use bilinear transformation. Use T = 1 sec.

c) Design a digital Butterworth filter to meet the following constraints.

$0.9 \le \left|H(e^{jw})\right| \le 1$ $\quad 0 \le \omega \le 0.5\pi$

$a. |H(e^{jw})| \le 0.2$ $\quad 0.75\pi \le \omega \le \pi$

Use bilinear transformation. Use T = 1 sec.

Microcontrollers (BTN04503)

Day & Date: Tuesday, 20-05-2025 Max. Marks: 70
Time: 10:00 AM To 01:00 PM

Instructions: 1) Q. No. 1 is compulsory. It should be solved in the first 30 minutes in Answer Book Page no 03 (Starting page of the Answer Book). Each question carries one mark.
2) Don't forget to Mention question paper set (P/Q/R/S) on top of page.
3) Figures to the right indicates full marks.
4) Assume suitable data if necessary.

MCQ/Objective Type Questions

Duration: 30 Minutes Marks:14

Q.1 Objective questions. **14**

1) What is the address range of SFR in internal RAM of 8051?
a) 00H-77H b) 40H-80H
c) 80H-7FH d) 80H-FFH

2) In 8051 Serial port interrupt vector address is _____.
a) 0003H b) 0023H
c) 0013H d) 001BH

3) In PIC to make Port B an output port, we must place _____ in register _____.
a) 00 h, PORTB b) FF h, PORTB
c) 00 h, TRISB d) FF h, TRISB

4) In PIC 16F877 has interrupt capability up to _____ sources.
a) 11 b) 13
c) 14 d) 20

5) Timer 1 of the PIC 16F877 is _____ bit, accessed as _____.
a) 8, timer/counter b) 16, timer/counter
c) 8, timer d) 8, counter

6) The ____ pins can become the I/O control inputs for the parallel slave port.
a) PORT A b) PORT B
c) PORT D d) PORT E

7) The PIC 16F877 MSSP module in I^2C mode, implements ____ bit and ____ bit addressing.
a) 7, 10 b) 10, 8
c) 7, 8 d) 11, 7

8) Which of the following instructions will load the value 35H into the high byte of timer 0?

a) MOV TH0, #35H
b) MOV TH0, 35H
c) MOV T0, #35H
d) MOV T0, 35H ___

9) Bit-addressable memory locations are _____.

a) 10H through 1FH
b) 20H through 2FH
c) 30H through 3FH
d) 40H through 4FH

10) The 8-bit address bus allows access to an address range of _____.

a) 0000 to FFFFH
b) 000 to FFFH
c) 00 to FFH
d) 0 to FH

11) The contents of the accumulator after this operation _____.

MOV A,#0BH
ANL A,#2CH
will be

a) 11010111
b) 11011010
c) 00001000
d) 00101000

12) Which of the following statements will add the accumulator and register 3?

a) ADD @R3, @A
b) ADD @A; R3
c) ADD R3, A
d) ADD A, R3

13) In 8051, serial communication mode 0, the baud rate will be _____.

a) variable
b) fosc/164
c) fosc/32
d) fosc/12

14) Which of the following signal(s) of 8051 must be used in accessing external data RAM?

a) RD
b) WR
c) PSEN
d) both (a) and (b)

T. Y. (B.Tech.) (Sem-I) (New) (CBCS) Examination: March/April-2025
ELECTRONICS ENGINEERING
Microcontrollers (BTN04503)

Day & Date: Tuesday, 20-05-2025 Max. Marks: 56
Time: 10:00 AM To 01:00 PM

Instructions: 1) All questions are compulsory.
2) Figures to the right indicate full marks.
3) Assume suitable data if necessary.

Section – I

Q.2 Solve any four. **16**

a) Write a 8051 assembly program to find largest number from given array of ten elements.
b) Compare microprocessor and microcontroller.
c) Define addressing mode. Explain the different addressing modes in 8051 with suitable example.
d) Draw and Explain memory organization in 8051.
e) Write 8051 assembly program to turn on and off eight LEDs connected to PORT B by a delay of 25 msec. Use Timer1 interrupt.
Assume crystal (XTAL) = 11.0592 MHZ

Q.3 Solve any two. **12**

a) Write an 8051 assembly or C program to generate a square wave of 50 Hz frequency on pin P2.3. Assume XTAL= 11.0592MHz. Use Timer interrupt.
b) Write a 8051 assembly program to add respective elements of two arrays of ten elements.
c) What happens in the following instructions?
1) Here: SJMP Here
2) MOV SP, #74
3) JZ FEh
4) JC 02
5) INC @R3
6) DEC 51h
7) CPL 91h

Section – II

Q.4 Solve any four. **16**

a) Draw and explain addressing modes in PIC 16F877.

b) With block diagram Explain Timer-0 module used in PIC microcontroller.

c) Write PIC program to clear memory location 20 h to 2F h with indirect addressing mode. Also explain meaning of each used instructions.

d) Explain PWM mode used in PIC microcontroller.

e) Explain PSW (Status) register bit format in PIC 16F877.

Q.5 Solve any two. **12**

a) Interface ADC 0808/09 to 8051. Write a program to covert analog voltage on channel 1 to digital.

b) Draw and explain interfacing of 16K x 8 Data ROM to 8051. Write a assembly program to read 10 bytes starting at 2000h in external ROM.

c) Interface one seven segment display to 8051 and write a program to display decimal values “0” to “9”.

MCQ/Objective Type Questions

Duration: 30 Minutes Marks:14

Q.1 Choose the correct Answer. **14**

1) _____ is the automated control of imaged and electronic documents through their life cycle within an organization.
a) ERP b) SCM
c) ECM d) ADW

2) _____ is a central repository of integrated data from one or more disparate sources.
a) Data warehouse b) Data content
c) Database d) All of these

3) Which of below is not an advantage of e-auctions?
a) shortening the cycle time b) broadening customer
c) no transparency d) paperless transactions

4) _____ represent a business model in which a company offers basic features to users at no cost and charges a premium for supplemental or advanced features.
a) SCM b) Freemium
c) Community d) COCO

5) Software project management consists of _____.
a) planning b) implementing
c) monitoring d) all of these

6) In a software project, dependencies on technology platform is an example of _____.
a) internal risk b) external risk
c) assumption d) mitigation

7) Which of below is not true about software project?
a) it consists of only tasks which are independent of each other
b) it has purpose
c) progressive elaboration
d) it requires people with different roles

8) A rule based IS that helps a manager to take a decision about loan to be given to a customer is an example of _____.
a) data driven DSS
b) model driven DSS
c) customer relationship management
d) OLTP

9) The major cost incurred in implementing ERP is due to _____.
a) hardware b) software
c) training d) reengineering

10) What for IS & IT are used in digital enterprises?
a) research b) to boost employee productivity
c) customer support d) all of these

11) _____ a is logical group of related files.
a) Data b) Information
c) Database d) Datamart

12) Which of below is not true about organizations?
a) closed system b) social unit
c) interact with environment d) have a structure

13) Take odd man out – NEFT, ERP, RTGS, UPI
a) NEFT b) ERP
c) RTGS d) UPI

14) Take odd man out- MS Project, MS Access, DB2, Oracle.
a) MS Word b) MS Access
c) DB2 d) Oracle

ELECTRONICS ENGINEERING
Information Technology and Management (BTN04513)

Day & Date: Wednesday 21-05-2025 Max. Marks: 56
Time: 10:00 AM To 01:00 PM

Instructions: 1) All questions are compulsory.
2) Figures to the right indicate full marks.
3) Make suitable assumptions if necessary and state them clearly.

Section – I

Q.2 Solve Any Two **12**

a) Explain partitioned database with - diagram, advantages and disadvantages
b) What are components of information system? Discuss with suitable diagram.
c) Discuss need of and how enterprise content management system is being implemented.

Q.3 Solve Any Four. **16**

a) Discuss cloud computing - SAAS model
b) How IT infrastructure for a typical organization is decided?
c) With suitable example explain B2C and C2B transactions.
d) Differentiate - data mart Vs data warehouse.
e) What is business analytics? What are its types?

Section – II

Q.4 Solve any Two. **12**

a) Justify: IT projects are as complex as other engineering projects.
b) Explain economical impact of IS on organization.
c) Discuss need of and how supply chain management system is being implemented.

Q.5 Solve Any Four. **16**

a) Discuss social issues related to information systems.
b) Discuss types of intellectual property rights.
c) With a typical example explain -decision support system.
d) With suitable example explain how ERP is beneficial for organizations.
e) Discuss pros and cons of waterfall SDLC model.

Seat No.		Set	Q

T. Y. (B. Tech) (Sem-I) (New) (CBCS) Examination: March/April-2025
ELECTRONICS ENGINEERING
Information Technology and Management (BTN04513)

Day & Date: Wednesday 21-05-2025 Max. Marks: 70
Time: 10:00 AM To 01:00 PM

Instructions: 1) Q. No. 1 is compulsory. It should be solved in the first 30 minutes in Answer Book Page no 03 (Starting page of the Answer Book). Each question carries one mark.
2) Don't forget to Mention question paper set (P/Q/R/S) on top of page.
3) Figures to the right indicates full marks.
4) Make suitable assumptions if necessary and state them clearly.

MCQ/Objective Type Questions

Duration: 30 Minutes Marks:14

Q.1 Choose the correct Answer. 14

1) A rule based IS that helps a manager to take a decision about loan to be given to a customer is an example of _____.
a) data driven DSS
b) model driven DSS
c) customer relationship management
d) OLTP

2) The major cost incurred in implementing ERP is due to _____.
a) hardware b) software
c) training d) reengineering

3) What for IS & IT are used in digital enterprises?
a) research b) to boost employee productivity
c) customer support d) all of these

4) _____ a is logical group of related files.
a) Data b) Information
c) Database d) Datamart

5) Which of below is not true about organizations?
a) closed system b) social unit
c) interact with environment d) have a structure

6) Take odd man out – NEFT, ERP, RTGS, UPI
a) NEFT b) ERP
c) RTGS d) UPI

7) Take odd man out- MS Project, MS Access, DB2, Oracle.
a) MS Word b) MS Access
c) DB2 d) Oracle

8) _____ is the automated control of imaged and electronic documents through their life cycle within an organization.

a) ERP b) SCM
c) ECM d) ADW

9) _____ is a central repository of integrated data from one or more disparate sources.

a) Data warehouse b) Data content
c) Database d) All of these

10) Which of below is not an advantage of e-auctions?

a) shortening the cycle time b) broadening customer
c) no transparency d) paperless transactions

11) _____ represent a business model in which a company offers basic features to users at no cost and charges a premium for supplemental or advanced features.

a) SCM b) Freemium
c) Community d) COCO

12) Software project management consists of _____.

a) planning b) implementing
c) monitoring d) all of these

13) In a software project, dependencies on technology platform is an example of _____.

a) internal risk b) external risk
c) assumption d) mitigation

14) Which of below is not true about software project?

a) it consists of only tasks which are independent of each other
b) it has purpose
c) progressive elaboration
d) it requires people with different roles

Managerial Economics (BTN04514)

Day & Date: Wednesday 21-05-2025 Max. Marks: 70
Time: 10:00 AM To 01:00 PM

Instructions: 1) Q. No. 1 is compulsory. It should be solved in the first 30 minutes in Answer Book Page no 03 (Starting page of the Answer Book). Each question carries one mark.
2) Don't forget to Mention question paper set (P/Q/R/S) on top of page.
3) Figures to the right indicates full marks.

MCQ/Objective Type Questions

Duration: 30 Minutes Marks:14

Q.1 Choose the correct Answer. **14**

1) What is the primary focus of Managerial Economics?
a) Studying individual consumer behaviour
b) Analyzing market equilibrium
c) Applying economic principles to managerial decision-making
d) Investigating government policies

2) Which branch of economics primarily deals with the aggregate behavior of the economy?
a) Managerial Economics b) Microeconomics
c) Macroeconomics d) Behavioral Economics

3) What does the demand curve illustrate in economics?
a) The relationship between price and quantity supplied
b) The relationship between price and quantity demanded
c) The equilibrium points in the market
d) The effect of government interventions on market prices

4) In consumer demand analysis, which approach focuses on assigning numerical values to the satisfaction derived from consuming goods?
a) Cardinal approach b) Ordinal approach
c) Indifference curve analysis d) Utility maximization theory

5) What does price elasticity of demand measure?
a) The responsiveness of quantity demanded to changes in price
b) The change in total revenue due to changes in price
c) The sensitivity of quantity demanded to changes in income
d) The relationship between quantity supplied and price changes

6) Which factor does NOT typically influence the price elasticity of demand?
a) Availability of substitutes b) Time horizon
c) Consumer preferences d) Total revenue

7) What is the relationship between total revenue and price elasticity of demand when demand is elastic?
a) Total revenue increases as price increases
b) Total revenue remains constant as price changes
c) Total revenue decreases as price increases
d) Total revenue is maximized at the midpoint of the demand curve

8) What does the production function represent in economics?
a) The relationship between inputs and outputs in the production process
b) The total revenue generated from production
c) The cost structure of the firm
d) The market demand for the produced goods

9) Which of the following is NOT a determinant of costs in production?
a) Input prices b) Technological advancements
c) Government regulations d) Market demand

10) What is one of the primary objectives of studying market structure in economics?
a) Analyzing consumer preferences
b) Understanding the behavior of individual firms
c) Identifying opportunities for market entry
d) Evaluating the level of competition within a market

11) What aspect of the market does the demand side primarily focus on?
a) Determining production costs
b) Analyzing consumer behavior and preferences
c) Evaluating government regulations
d) Assessing technological advancements

12) Which factor is NOT typically considered as part of the supply side of the market?
a) Input prices b) Technology
c) Consumer income levels d) Government policies

13) In a market with perfect competition, how are prices determined?
a) By government regulations
b) By the dominant firm in the market
c) Through negotiation between buyers and sellers
d) Through the interaction of supply and demand forces

14) Pen and Ink are the example of the _____.
a) Complementary Goods b) Supplementary Goods
c) Consumer Goods d) Normal Goods

T. Y. (B.Tech.) (Sem-I) (New) (CBCS) Examination: March/April-2025
ELECTRONICS ENGINEERING
Managerial Economics (BTN04514)

Day & Date: Wednesday 21-05-2025 Max. Marks: 70
Time: 10:00 AM To 01:00 PM

Instructions: 1) Q. No. 1 is compulsory. It should be solved in the first 30 minutes in Answer Book Page no 03 (Starting page of the Answer Book). Each question carries one mark.
2) Don't forget to Mention question paper set (P/Q/R/S) on top of page.
3) Figures to the right indicates full marks.

MCQ/Objective Type Questions

Duration: 30 Minutes Marks:14

Q.1 Choose the correct Answer. **14**

1) Which factor does NOT typically influence the price elasticity of demand?
a) Availability of substitutes b) Time horizon
c) Consumer preferences d) Total revenue

2) What is the relationship between total revenue and price elasticity of demand when demand is elastic?
a) Total revenue increases as price increases
b) Total revenue remains constant as price changes
c) Total revenue decreases as price increases
d) Total revenue is maximized at the midpoint of the demand curve

3) What does the production function represent in economics?
a) The relationship between inputs and outputs in the production process
b) The total revenue generated from production
c) The cost structure of the firm
d) The market demand for the produced goods

4) Which of the following is NOT a determinant of costs in production?
a) Input prices b) Technological advancements
c) Government regulations d) Market demand

5) What is one of the primary objectives of studying market structure in economics?
a) Analyzing consumer preferences
b) Understanding the behavior of individual firms
c) Identifying opportunities for market entry
d) Evaluating the level of competition within a market

6) What aspect of the market does the demand side primarily focus on?
a) Determining production costs
b) Analyzing consumer behavior and preferences
c) Evaluating government regulations
d) Assessing technological advancements

7) Which factor is NOT typically considered as part of the supply side of the market?
a) Input prices
b) Technology
c) Consumer income levels
d) Government policies

8) In a market with perfect competition, how are prices determined?
a) By government regulations
b) By the dominant firm in the market
c) Through negotiation between buyers and sellers
d) Through the interaction of supply and demand forces

9) Pen and Ink are the example of the _____.
a) Complementary Goods
b) Supplementary Goods
c) Consumer Goods
d) Normal Goods

10) What is the primary focus of Managerial Economics?
a) Studying individual consumer behaviour
b) Analyzing market equilibrium
c) Applying economic principles to managerial decision-making
d) Investigating government policies

11) Which branch of economics primarily deals with the aggregate behavior of the economy?
a) Managerial Economics
b) Microeconomics
c) Macroeconomics
d) Behavioral Economics

12) What does the demand curve illustrate in economics?
a) The relationship between price and quantity supplied
b) The relationship between price and quantity demanded
c) The equilibrium points in the market
d) The effect of government interventions on market prices

13) In consumer demand analysis, which approach focuses on assigning numerical values to the satisfaction derived from consuming goods?
a) Cardinal approach
b) Ordinal approach
c) Indifference curve analysis
d) Utility maximization theory

14) What does price elasticity of demand measure?
a) The responsiveness of quantity demanded to changes in price
b) The change in total revenue due to changes in price
c) The sensitivity of quantity demanded to changes in income
d) The relationship between quantity supplied and price changes

2) Figures to the right indicate full marks.

Section – I

Q.2 Solve any four of the following. **16**

a) "How does Managerial Economics contribute to effective managerial decision-making? Provide examples to illustrate its impact."
b) Write short note on Microeconomics.
c) Explain the demand curve.
Explain the factors affecting the elasticity of supply.
d) Define Monopoly with example.
e) Define the term Total Revenue and Marginal Revenue.

Q.3 Solve any two of the followings. **12**

a) What is Goods? Explain any two types with example.
b) Explain the importance of elasticity of Demand.
c) Explain the concept Price of celling and Price Floors.

Section – II

Q.4 Solve any four of the following. **16**

a) Explain any two applications of linear Programming Techniques.
b) What are the determinants of costs explain any two.
c) Explain the various costs of production in details.
d) Explain the concept of demand side of market.
e) Explain the concept profit margin of safety.

Q.5 Solve any two of the followings. **12**

a) Describe Survey methods for demand Forecasting.

MCQ/Objective Type Questions

Duration: 30 Minutes Marks:14

Q.1 Choose the correct Answer. **14**

1) Which one of the following is not principle business ethics?
a) Principle of universality b) Principle of humanity
c) Principle of autonomy d) Principle of dissatisfaction

2) Code of conduct does not include _____.
a) Dishonesty b) Rules
c) Morality d) integrity

3) Which of the following is not one the underlying principles of the corporate governance Combined Code of Practice?
a) Integrity b) Accountability
c) Openness d) Acceptability

4) Ethics should guide the technology towards _____.
a) Political justice b) Cultural justice
c) Social justice d) None of the above

5) Most companies begin the process of establishing organizational ethics programs by developing: _____.
a) ethics training programs
b) codes of conduct
c) ethics enforcement mechanisms
d) hidden agendas

6) Which is not one of the natures of ethics?
a) Focus on human values b) Social work
c) Branch of philosophy d) Applies moral principles

7) Which of the following relating to CSR theories is correct?
a) Institutional theory is based on the shareholder concept
b) Social contract is the key concept of legitimacy theory.
c) The key concept of enlightened self-interest is stakeholder relations.
d) Stakeholder theory requires organizations to manage community perceptions to survive

8) The moral principles, standards of behavior, or set of values that guide a person's actions in the workplace is called _____
a) Office place ethics b) Factory place ethics
c) Behavioral ethics d) Workplace ethics

9) Which legislation relates to the concept of business ethics?
a) Freedom of Information Act b) Food Act
c) Building regulations d) All of these

10) Who are organisational stakeholders?
a) Government b) Employees
c) Customers d) All of the above

11) The _____ dimension of social responsibility refers to a business's societal contribution of time, money, and other resources.
a) Ethical b) Philanthropic
c) Volunteerism d) Strategic

12) A _____sets out the purpose and general direction for the organization?
a) Mission statement b) Purpose statement
c) Vision d) Profit statement

13) The hand-of-government refers to the _____.
a) ability of the government to interfere in business negotiations
b) role of corporations to be profitable within the law
c) effect of national politics on business decisions
d) impact of changing government regulations

14) Why business ethics are important?
a) It formulates the firm's image and builds the brand
b) It influences the buying decision of the customers
c) Build confidence within employees

MCQ/Objective Type Questions

Duration: 30 Minutes Marks:14

Q.1 Choose the correct Answer. **14**

1) What is Artificial intelligence?
a) Putting your intelligence into Computer
b) Programming with your own intelligence
c) Making a Machine intelligent
d) Playing a Game

2) Which is not the commonly used programming language for Al?
a) PROLOG b) Java
c) LISP d) Perl

3) What is state space?
a) The whole problem
b) Your Definition to a problem
c) Problem you design
d) Representing your problem with variable and parameter

4) A production rule consists of _____.
a) A set of Rule
b) A sequence of steps
c) Both (a) and (b)
d) Arbitrary representation to problem

5) Which search method takes less memory?
a) Depth-First Search b) Breadth-First search
c) Both (a) and (b) d) Linear Search

6) A heuristic is a way of trying _____.
a) To discover something or an idea embedded in a program
b) To search and measure how far a node in a search tree seems to be from a goal
c) To compare two nodes in a search tree to see if one is better than the other
d) Only (a), (b) and (c)

7) A* algorithm is based on _____.
a) Breadth-First-Search b) Depth-First-Search
c) Best-First-Search d) Hill climbing

8) Which is the best way to go for Game playing problem?
a) Linear approach b) Heuristic approach
c) Random approach d) Optimal approach

9) Which is not a property of representation of knowledge?
a) Representational Verification b) Representational Adequacy
c) Inferential Adequacy d) Inferential Efficiency

10) The core idea of develop Al is building machines and algorithms to ____.
a) functions like anything
b) perform computation tasks and functions like human brain
c) perform only arithmetic tasks
d) perform logical comparisons only

11) Which if the following most advanced form of Al?
a) Neural Network b) Machine Learning
c) Data Science d) Deep Learning

12) Procedural Domain Knowledge in a rule-based system, is in the form of?
a) Meta Rule b) Control Rule
c) Production Rule d) None of the above

13) The available ways to solve a problem of state-space-search.
a) 1 b) 2
c) 3 d) 4

14) An Al agent perceives and acts upon the environment using _____.
a) Sensors b) Perceiver
c) Actuators d) Both a and c

Set **Q**

T.Y. (B.Tech.) (Sem - I) (New) (CBCS) Examination: March/April-2025
ELECTRONICS ENGINEERING
Artificial Intelligence (BTN04517)

Day & Date: Thursday 22-05-2025 Max. Marks: 70
Time: 10:00 AM To 01:00 PM

Instructions: 1) Q. No. 1 is compulsory. It should be solved in the first 30 minutes in Answer Book Page no 03 (Starting page of the Answer Book). Each question carries one mark.
2) Don't forget to Mention question paper set (P/Q/R/S) on top of page.
3) Figures to the right indicates full marks.
4) Make suitable assumptions (if necessary and state them clearly).
5) Draw neat sketches wherever necessary.
6) Use of nonprogrammable calculator is permitted.

MCQ/Objective Type Questions

Duration: 30 Minutes Marks:14

Q.1 Choose the correct Answer. **14**

1) Which is the best way to go for Game playing problem?
a) Linear approach b) Heuristic approach
c) Random approach d) Optimal approach

2) Which is not a property of representation of knowledge?
a) Representational Verification b) Representational Adequacy
c) Inferential Adequacy d) Inferential Efficiency

3) The core idea of develop Al is building machines and algorithms to ____.
a) functions like anything
b) perform computation tasks and functions like human brain
c) perform only arithmetic tasks
d) perform logical comparisons only

4) Which if the following most advanced form of Al?
a) Neural Network b) Machine Learning
c) Data Science d) Deep Learning

5) Procedural Domain Knowledge in a rule-based system, is in the form of?
a) Meta Rule b) Control Rule
c) Production Rule d) None of the above

6) The available ways to solve a problem of state-space-search.
a) 1 b) 2
c) 3 d) 4

7) An Al agent perceives and acts upon the environment using _____.
a) Sensors b) Perceiver
c) Actuators d) Both a and c

8) What is Artificial intelligence?
a) Putting your intelligence into Computer
b) Programming with your own intelligence
c) Making a Machine intelligent
d) Playing a Game

9) Which is not the commonly used programming language for Al?
a) PROLOG b) Java
c) LISP d) Perl

10) What is state space?
a) The whole problem
b) Your Definition to a problem
c) Problem you design
d) Representing your problem with variable and parameter

11) A production rule consists of _____.
a) A set of Rule
b) A sequence of steps
c) Both (a) and (b)
d) Arbitrary representation to problem

12) Which search method takes less memory?
a) Depth-First Search b) Breadth-First search
c) Both (a) and (b) d) Linear Search

13) A heuristic is a way of trying _____.
a) To discover something or an idea embedded in a program
b) To search and measure how far a node in a search tree seems to be from a goal
c) To compare two nodes in a search tree to see if one is better than the other
d) Only (a), (b) and (c)

14) A* algorithm is based on _____.
a) Breadth-First-Search b) Depth-First-Search
c) Best-First-Search d) Hill climbing

T.Y. (B.Tech.) (Sem - I) (New) (CBCS) Examination: March/April-2025
ELECTRONICS ENGINEERING
Artificial Intelligence (BTN04517)

Day & Date: Thursday 22-05-2025 Max. Marks: 56
Time: 10:00 AM To 01:00 PM

Instructions: 1) All questions are compulsory.
2) Figures to the right indicate full marks.
3) Make suitable assumptions if necessary and state them clearly.
4) Draw neat sketches wherever necessary.
5) Use of nonprogrammable calculator is permitted.

Section – I

Q.2 Solve any three. **12**

a) What is an Agent in Al? Explain any two types of Agents in Artificial Intelligence.
b) Explain MIN-MAX Algorithm.
c) Explain any Stochastic Search with example.
d) Explain various approaches to knowledge Representation.

Q.3 Solve any two. **16**

a) Differentiate between informed and uninformed search in detail.
b) Explain reasoning with defaults in Al.
c) Explain FOL in detail with examples.

Section – II

Q.4 Solve any three. **12**

a) Explain Bayes Rule with suitable example.
b) Explain reasoning with examples.
c) Explain elementary game theory.
d) Explain sequential decision problems.

Q.5 Solve any two. **16**

a) State the difference between supervised and unsupervised and semi supervised learning.
b) Justify any two application of machine learning with block diagram in Artificial Intelligence.
c) Explain the problems related to learning to knowledge and data acquisition.

MCQ/Objective Type Questions

Duration: 30 Minutes Marks:14

Q.1 Choose the correct Answer. **14**

1) Which tool is used for connecting devices and orchestrating data workflows on the edge?
a) TensorFlow b) Stream Manager
c) IoT Greengrass d) Apache Kafka

2) What distinguishes a modern, smart home solution from traditional home automation systems?
a) Increased reliance on cloud computing
b) Integration of machine learning at the edge
c) Use of proprietary protocols for communication
d) Focus on centralized control and management

3) Why is reducing latency crucial in smart home and industrial IoT environments?
a) To minimize energy consumption
b) To enhance security measures
c) To enable real-time decision-making
d) To optimize data storage

4) What is the primary purpose of IoT Greengrass in the context of edge ML solutions?
a) Cloud-based data storage
b) Edge device management and orchestration
c) Machine learning model deployment
d) Real-time data analysis

5) What role does IoT Greengrass play in the anatomy of an edge ML solution?
a) Data processing at the cloud
b) Data ingestion from edge devices
c) Edge device management and communication
d) Machine learning model training

6) How does exploring the topology of the edge contribute to system efficiency?
a) By reducing latency in data transmission
b) By optimizing cloud storage utilization
c) By enhancing machine learning model accuracy
d) By improving network security measures

7) What is the role of security protocols in edge computing?
a) Minimizing device compatibility issues
b) Preventing unauthorized access and data breaches
c) Optimizing machine learning model training
d) Enhancing cloud synchronization efficiency

8) Which device characteristic is essential for effective sensing at the edge?
a) High computational power
b) Low power consumption
c) Large storage capacity
d) High-speed network connectivity

9) How does remote deployment contribute to the scalability of edge computing solutions?
a) By reducing edge device compatibility issues
b) By optimizing cloud storage utilization
c) By enabling rapid deployment across distributed environments
d) By minimizing machine learning model complexity

10) What is a primary challenge of storing logs in the cloud?
a) Data inconsistency
b) Security vulnerabilities
c) Network latency
d) Limited storage capacity

11) How does streaming from the edge to a data lake on the cloud enhance analytics capabilities?
a) By minimizing data transmission
b) By centralizing data processing
c) By optimizing machine learning model training
d) By enabling real-time data analysis

12) Which tool is used for defining data models for IoT workloads?
a) TensorFlow
b) AWS IoT Core
c) Stream Manager
d) EdgeML Toolkit

13) How does Domain-Driven Design (DDD) contribute to processing data on the cloud?

a) By optimizing machine learning model training
b) By ensuring data consistency and integrity
c) By facilitating efficient data flow patterns
d) By automating device management tasks

14) What is the purpose of designing data flow patterns on the cloud?

a) Centralizing data processing
b) Enhancing machine learning model accuracy
c) Optimizing network bandwidth utilization
d) Ensuring efficient data processing workflows

b) Explain the importance of network connectivity in the context of IoT Greengrass installation.
c) Evaluate the significance of actuating at the edge in enabling real-time responses to sensor data.
d) Explain the process of creating and deploying remotely in the context of edge computing.

Q.3 Solve any two. **16**

a) Explain the process of deploying the first edge component in IoT Greengrass and its implications.
b) Discuss the implications of data flow patterns for optimizing efficiency in edge computing environments.
c) Discuss the challenges and advantages of extending the cloud to the edge in IoT environments.

Section – II

Q.4 Solve any three. **12**

a) Evaluate the role of cloud storage in enhancing the accessibility and availability of data in edge computing.
b) Explain the process of deploying the first ML model in an edge computing environment and its implications.
c) Analyze the role of data patterns in facilitating efficient data processing workflows and scalability in edge computing deployments.
d) Evaluate the challenges and opportunities of processing and consuming data on the cloud in the context of edge computing, including scalability, security, and cost-effectiveness.

Q.5 Solve any two. **16**

a) Discuss the importance of Stream Manager in orchestrating data ingestion and streaming from the edge and its implications for real-time data processing.

b) Discuss the process of installing IoT Greengrass on edge devices, highlighting the key steps involved.

c) Evaluate the significance of Domain-Driven Design (DDD) in optimizing data interpretation, analysis, and visualization in cloud-based IoT environments.

T.Y. (B.Tech.) (Sem - I) (New) (CBCS) Examination: March/April-2025
ELECTRONICS ENGINEERING
Industrial IoT (BTN04519)

Day & Date: Thursday 22-05-2025 Max. Marks: 70
Time: 10:00 AM To 01:00 PM

Instructions: 1) Q. No. 1 is compulsory. It should be solved in the first 30 minutes in Answer Book Page no 03 (Starting page of the Answer Book). Each question carries one mark.
2) Don't forget to Mention question paper set (P/Q/R/S) on top of page.
3) Figures to the right indicates full marks.

MCQ/Objective Type Questions

Duration: 30 Minutes Marks:14

Q.1 Choose the correct Answer. **14**

1) How does exploring the topology of the edge contribute to system efficiency?
a) By reducing latency in data transmission
b) By optimizing cloud storage utilization
c) By enhancing machine learning model accuracy
d) By improving network security measures

2) What is the role of security protocols in edge computing?
a) Minimizing device compatibility issues
b) Preventing unauthorized access and data breaches
c) Optimizing machine learning model training
d) Enhancing cloud synchronization efficiency

3) Which device characteristic is essential for effective sensing at the edge?
a) High computational power
b) Low power consumption
c) Large storage capacity
d) High-speed network connectivity

4) How does remote deployment contribute to the scalability of edge computing solutions?
a) By reducing edge device compatibility issues
b) By optimizing cloud storage utilization
c) By enabling rapid deployment across distributed environments
d) By minimizing machine learning model complexity

5) What is a primary challenge of storing logs in the cloud?
a) Data inconsistency b) Security vulnerabilities
c) Network latency d) Limited storage capacity

6) How does streaming from the edge to a data lake on the cloud enhance analytics capabilities?
a) By minimizing data transmission
b) By centralizing data processing
c) By optimizing machine learning model training
d) By enabling real-time data analysis

7) Which tool is used for defining data models for IoT workloads?
a) TensorFlow
b) AWS IoT Core
c) Stream Manager
d) EdgeML Toolkit

8) How does Domain-Driven Design (DDD) contribute to processing data on the cloud?
a) By optimizing machine learning model training
b) By ensuring data consistency and integrity
c) By facilitating efficient data flow patterns
d) By automating device management tasks

9) What is the purpose of designing data flow patterns on the cloud?
a) Centralizing data processing
b) Enhancing machine learning model accuracy
c) Optimizing network bandwidth utilization
d) Ensuring efficient data processing workflows

10) Which tool is used for connecting devices and orchestrating data workflows on the edge?
a) TensorFlow
b) Stream Manager
c) IoT Greengrass
d) Apache Kafka

11) What distinguishes a modern, smart home solution from traditional home automation systems?
a) Increased reliance on cloud computing
b) Integration of machine learning at the edge
c) Use of proprietary protocols for communication
d) Focus on centralized control and management

12) Why is reducing latency crucial in smart home and industrial IoT environments?
a) To minimize energy consumption
b) To enhance security measures
c) To enable real-time decision-making
d) To optimize data storage

13) What is the primary purpose of IoT Greengrass in the context of edge ML solutions?
a) Cloud-based data storage
b) Edge device management and orchestration
c) Machine learning model deployment
d) Real-time data analysis

14) What role does IoT Greengrass play in the anatomy of an edge ML solution?

a) Data processing at the cloud
b) Data ingestion from edge devices
c) Edge device management and communication
d) Machine learning model training

2) Don't forget to Mention question paper set (P/Q/R/S) on top of page.
3) Figures to the right indicates full marks.
4) Assume suitable data if required and state it clearly.

MCQ/Objective Type Questions

Duration: 20 Minutes Marks: 10

Q.1 Choose the correct alternatives from the options. 10

1) Which of the following market structures has a predominant feature of price leadership?
a) Perfectly competitive b) Monopoly
c) Oligopoly d) Monopolistic

2) Average revenue is _____
a) Total revenue divided by the number of units sold
b) Revenue earned by all the units of the output
c) Revenue earned by the average sized firm in the industry
d) Net addition made to the total revenue by selling one more unit of a commodity

3) Which of these is an economic activity?
a) Father teaching his son at home instead of spending on coaching
b) A housewife making food for the family on her own
c) A hair dresser doing hair cut designing on payment
d) A singer giving a show on his son's wedding anniversary

4) Which of the following is NOT an account in the Balance of Payments?
a) Current Account b) Capital Account
c) Financial Account d) Future Account

5) Which of the following is not a regulatory institution in Indian financial system?
a) RBI b) CIBIL
c) SEBI d) IRDA

6) In a mixed economy which sector (s) is 1 are found _____

a) Private only
b) Public only
c) None
d) Both (a) Private and (b)Public

7) Who is known as father of economics?

a) Adam Smith
b) Prof. A. Samulson
c) Alfred Marshall
d) J. R. Hicks

8) Micro and Macro are not two independent approaches to economic analysis but they are complementary to each other.

a) False
b) True
c) Partly true
d) Partly False

9) Which one of the following is not the function of money?

a) Medium of exchange
b) Measure of Happiness
c) Standard of deferred payment
d) Store of value

10) Which one of the following cost can never become zero?

a) Average cost
b) Fixed cost
c) Marginal cost
d) Variable cost

Stress and Coping (BTN04509)

Day & Date: Sunday, 25-05-2025 Max. Marks: 40
Time: 10:00 AM To 12:00 PM

Instructions: 1) Attempt any four questions out of Q.2 to Q.7.
2) Figures to the right indicate full marks.

Q.2 Define Stress & explain current and historical status of stress. **10**

Q.3 Describe various consequences due to stress. **10**

Q.4 Describe in detail the different causes of stress. **10**

Q.5 Discuss the nature of stress response. **10**

Q.6 What are some effective techniques for managing stress. **10**

Q.7 How does social support contribute to stress mitigation. **10**

Stress and Coping (BTN04509)

Day & Date: Sunday, 25-05-2025 Max. Marks: 50
Time: 10:00 AM To 12:00 PM

Instructions:1) Q. No. 1 is compulsory. It should be solved in the first 20 minutes in answer bookPage no 03 (Starting page of the Answer Book). Each question carries one mark.
2) Don't forget to Mention question paper set (P/Q/R/S) on top of page
3) Figures to the right indicates full marks.
4) Assume suitable data wherever needed & mention it clearly.

MCQ/Objective Type Questions

Duration: 20 Minutes Marks: 10

Q.1 Choose the correct alternatives from the given options. **10**

1) Which of the following is a relaxation technique often used for stress management?
a) Procrastination b) Meditation
c) Caffeine consumption d) Multitasking

2) What is the purpose of time management in stress reduction?
a) To increase stress by overloading schedules
b) To create a sense of urgency
c) To prioritize tasks and reduce overwhelm
d) To eliminate breaks and relaxation time

3) Which of the following is a potential source of social support?
a) Isolation from friends and family
b) Engaging in negative self-talk
c) Seeking help from friends, family, or support groups
d) Avoiding all forms of communication

4) When a task appears overwhelming, it is best to _____
a) Put it aside till later
b) Drink alcohol to relax
c) Break it down into smaller task
d) Avoid the task

5) Anxiety can cause the following moods _____
a) Irritable b) Nervous
c) Anxious d) All of the above

6) The following are the characteristics of Positive Stress.
a) It improves performance
b) It feels exciting
c) It motivates
d) All of the above

7) A good way to prevent stress is _____
a) Drinking beverages high in caffeine
b) Sitting ideal doing nothing
c) Overeating
d) Taking time out for relaxation

8) Absenteeism, turnover and less productivity are _____ symptoms of stress.
a) Medical
b) Psychological
c) Behavioral
d) None of these

9) What is stress?
a) A state of physical tiredness
b) The body's response to a demand or challenge
c) A type of exercise
d) A form of relaxation

10) Which of the following is a healthy way to cope with stress?
a) Concentrating the stressor
b) Engaging in regular physical activity
c) Investing time on social media
d) Consuming excessive amounts of caffeine

MCQ/Objective Type Questions

Duration: 20 Minutes Marks:10

Q.1 Choose amongst the alternatives. **10**

1) Ethics is the word that refers to _____.
a) Human tendency b) Morals, values, and beliefs
c) Only Values d) Psychology

2) Word ethichs is definded as a _____
a) Motivation
b) Set of attitudes concerned with the value of work
c) Attitude
d) Values

3) _____ is defined as the duty, obligation or even authority.
a) Work b) Responsibility
c) Democracy d) Authority

4) The study on ethics helps to know the people's _____.
a) Learn good or bad things
b) Copyright
c) Morality
d) Beliefs, values, and morals

5) The objectives of professional ethics in engineering are _____.
a) To understand the moral values that ought to guide the Engineering profession
b) To resolve the moral issues in the profession, and
c) To justify the moral judgment concerning the profession
d) All the above

6) The main core human values are _____.

a) Right conduct b) Peace
c) Both a & b d) None of these

7) Preconditioning is ____.

a) Assuming without knowing b) Knowing without assuming
c) Only assuming d) Only knowing

8) Value education deals with ____.

a) What is universally valuable to all of us
b) What is conductive to our individual and collective of us
c) Enables to be in harmony with ourselves, other and rest of nature
d) All of the above

9) Courage is the tendency to accept and face ____.

a) Self-confidence
b) Risks and difficult tasks in rational ways
c) Physical courage
d) Social courage

10) Human life is lived at four levels individuals, family, society and ____.

a) Nature b) Nurture
c) World d) Universe

MCQ/Objective Type Questions

Duration: 30 Minutes Marks:14

Q.1 Choose the correct Answer. **14**

1) Network device Switch is ____ layer device.
a) Physical b) Data Link
c) Network d) Application

2) The MAC id 06:12:EA:4F:30:98 is ____ type.
a) Unicast b) Multicast
c) Broadcast d) None of these

3) The ARQ stands for ____.
a) All Repeat Queue b) Automatic Repeat Request
c) Automatic Resolve Question d) None of these

4) Physical or logical arrangement of network is ____.
a) Topology b) Routing
c) Group d) None of these

5) Error detection at the data link level is achieved by ____.
a) Bit stuffing b) CRC
c) Frame formation d) Equalization

6) The maximum throughput for pure ALOHA is ____ percent.
a) 12.2 b) 18.4
c) 36.8 d) None of these

7) The network address (MAC) or Physical address present for each node in the network is of ____ bits.
a) 12 b) 32
c) 48 d) 64

8) The IP address 229.155.66.63 belongs to ____.
a) Class A b) Class B
c) Class C d) Class D

9) The data unit in transport layer in TCP/IP is called ____.
a) A datagram b) A segment
c) Frame d) Bit-string

10) Which of the following is false with respect to UDP?
a) Connection oriented b) Unreliable
c) Transport layer protocol d) All of the mentioned

11) UDP packets have a fixed-size header of ____ bytes.
a) 8 b) 16
c) 40 d) 64

12) Router can recognize and work with ____ addresses.
a) Data Link Layer b) Physical Layer
c) Network Layer d) Session Layer

13) Count to infinity problem is present ____ Routing Protocol.
a) Shortest Path b) Distance Vector
c) Link State d) None of these

14) A ____ is one endpoint of a two-way communication link between two programs running on the network.
a) Gateway b) Semaphore
c) Socket d) None of these

T. Y. (B. Tech) (Sem - II) (New) (CBCS) Examination: March/April-2025
ELECTRONICS ENGINEERING
Computer Networks (BTN04601)

Day & Date: Tuesday 27-05-2025 Max. Marks: 56
Time: 10:00 AM To 01:00 PM

Instructions: 1) All questions are compulsory.
2) Figures to the right indicate full marks.
3) Make suitable assumptions if necessary and state them clearly.

Section – I

Q.2 Answer the following: (Any Four) **16**

a) With the help of diagram and example explain EIA232 Serial Communication Protocol.
b) How CRC is used to detect the error in message transmission? For given message bits "1110111101" and divisor polynomial "1011" calculate CRC.
c) Calculate Hamming code-word for an ASCII character - 1011110. Assume even parity during transmission.
d) With neat diagram discuss the stop and wait protocol in detail.
e) Draw frame format of IEEE 802.3 LAN and explain each field in detail.

Q.3 Solve the following: (Any Two) **12**

a) Explain in detail IEEE 802.15 Bluetooth Protocol.
b) Draw and explain ISO-OSI reference model and discuss various issues handled by the layers.
c) What are different types of network devices? Discuss any two in detail.

Section – II

Q.4 Answer the following: (Any Four) **16**

a) Draw UDP packet format and explain its header in detail.
b) What are different IP address classes? Write ranges of different IP addresses. What is network mask for IP address 192.168.110.125?
c) Explain IP packet Header in detail with help of diagram.
d) Give the difference between circuit switching and packet switching techniques.
e) Explain Shortest path routing Protocol in computer networks.

Q.5 Answer the following: (Any Two) **12**

a) What encapsulation and decapsulation in TCP/IP? Discuss three ways handshake in TCP.
b) With neat diagram explain Link State Routing in detail.
c) With the help of Diagram Explain Client - Server Architecture.

a) 8 b) 16
c) 40 d) 64

2) Router can recognize and work with ____ addresses.
a) Data Link Layer b) Physical Layer
c) Network Layer d) Session Layer

3) Count to infinity problem is present ____ Routing Protocol.
a) Shortest Path b) Distance Vector
c) Link State d) None of these

4) A ____ is one endpoint of a two-way communication link between two programs running on the network.
a) Gateway b) Semaphore
c) Socket d) None of these

5) Network device Switch is ____ layer device.
a) Physical b) Data Link
c) Network d) Application

6) The MAC id 06:12:EA:4F:30:98 is ____ type.
a) Unicast b) Multicast
c) Broadcast d) None of these

7) The ARQ stands for ____.
a) All Repeat Queue b) Automatic Repeat Request
c) Automatic Resolve Question d) None of these

8) Physical or logical arrangement of network is ____.
a) Topology b) Routing
c) Group d) None of these

9) Error detection at the data link level is achieved by ____.
a) Bit stuffing b) CRC
c) Frame formation d) Equalization

10) The maximum throughput for pure ALOHA is ____ percent.
a) 12.2 b) 18.4
c) 36.8 d) None of these

11) The network address (MAC) or Physical address present for each node in the network is of ____ bits.
a) 12 b) 32
c) 48 d) 64

12) The IP address 229.155.66.63 belongs to ____.
a) Class A b) Class B
c) Class C d) Class D

13) The data unit in transport layer in TCP/IP is called ____.
a) A datagram b) A segment
c) Frame d) Bit-string

14) Which of the following is false with respect to UDP?
a) Connection oriented b) Unreliable
c) Transport layer protocol d) All of the mentioned

T. Y. (B. Tech) (Sem - II) (New) (CBCS) Examination: March/April-2025
ELECTRONICS ENGINEERING
Computer Networks (BTN04601)

Day & Date: Tuesday 27-05-2025 Max. Marks: 56
Time: 10:00 AM To 01:00 PM

Instructions: 1) All questions are compulsory.
2) Figures to the right indicate full marks.
3) Make suitable assumptions if necessary and state them clearly.

Section – I

Q.2 Answer the following: (Any Four) **16**

a) With the help of diagram and example explain EIA232 Serial Communication Protocol.
b) How CRC is used to detect the error in message transmission? For given message bits "1110111101" and divisor polynomial "1011" calculate CRC.
c) Calculate Hamming code-word for an ASCII character - 1011110. Assume even parity during transmission.
d) With neat diagram discuss the stop and wait protocol in detail.
e) Draw frame format of IEEE 802.3 LAN and explain each field in detail.

Q.3 Solve the following: (Any Two) **12**

a) Explain in detail IEEE 802.15 Bluetooth Protocol.
b) Draw and explain ISO-OSI reference model and discuss various issues handled by the layers.
c) What are different types of network devices? Discuss any two in detail.

Section – II

Q.4 Answer the following: (Any Four) **16**

a) Draw UDP packet format and explain its header in detail.
b) What are different IP address classes? Write ranges of different IP addresses. What is network mask for IP address 192.168.110.125?
c) Explain IP packet Header in detail with help of diagram.
d) Give the difference between circuit switching and packet switching techniques.
e) Explain Shortest path routing Protocol in computer networks.

Q.5 Answer the following: (Any Two) **12**

a) What encapsulation and decapsulation in TCP/IP? Discuss three ways handshake in TCP.
b) With neat diagram explain Link State Routing in detail.
c) With the help of Diagram Explain Client - Server Architecture.

Day & Date: Tuesday 27-05-2025 Max. Marks: 70
Time: 10:00 AM To 01:00 PM

Instructions: 1) Q. No.1 is compulsory. It should be solved in the first 30 minutes in Answer Book Page no 03 (Starting page of the Answer Book). Each question carries one mark.
2) Don't forget to Mention question paper set (P/Q/R/S) on top of page.
3) Figures to the right indicates full marks.
4) Make suitable assumptions if necessary and state them clearly.

MCQ/Objective Type Questions

Duration: 30 Minutes Marks:14

Q.1 Choose the correct Answer. **14**

1) The maximum throughput for pure ALOHA is ____ percent.
a) 12.2 b) 18.4
c) 36.8 d) None of these

2) The network address (MAC) or Physical address present for each node in the network is of ____ bits.
a) 12 b) 32
c) 48 d) 64 ____

3) The IP address 229.155.66.63 belongs to ____.
a) Class A b) Class B
c) Class C d) Class D

4) The data unit in transport layer in TCP/IP is called ____.
a) A datagram b) A segment
c) Frame d) Bit-string

5) Which of the following is false with respect to UDP?
a) Connection oriented b) Unreliable
c) Transport layer protocol d) All of the mentioned

6) UDP packets have a fixed-size header of ____ bytes.
a) 8 b) 16
c) 40 d) 64

7) Router can recognize and work with ____ addresses.
a) Data Link Layer b) Physical Layer
c) Network Layer d) Session Layer

8) Count to infinity problem is present ____ Routing Protocol.
a) Shortest Path b) Distance Vector
c) Link State d) None of these

9) A ____ is one endpoint of a two-way communication link between two programs running on the network.

MCQ/Objective Type Questions

Duration: 30 Minutes Marks:14

Q.1 Choose the correct alternatives from the options. 14

1) The on-chip ADC's of LPC2148 has _____ bit resolution and _____ conversion time.
a) 8, 2.44 μsec b) 10, 2.44 μsec
c) 12, 1.44 μsec d) 10, 1.44 μsec

2) In LPC2148 the _____ register is used to select the direction of port pins P1.0 to P1.31.
a) IOCLR1 b) IODIR0
c) PINSEL d) IODIR1

3) The SPI bus can operate with a _____ master device/s and with _____ slave device/s.
a) single, one b) single, one or more
c) two, single d) two, two

4) Information about a task is maintained in a _____.
a) Stack
b) Translation Look aside Buffer
c) Task Control Block
d) Task Condition Block

5) A _____ is software for controlling, receiving, and sending a byte or stream of bytes from or to device.
a) Kernel b) Shell
c) Processor d) Device Driver

6) Binary, Mutual exclusion, Counting are the types of _____.
a) Queues b) Pipes
c) Semaphores d) Mailboxes

7) Inter task communication can be done through _____.
a) Mailboxes b) Queues
c) Pipes d) all of above

8) A _____ processor has large number of general purpose registers.
a) CICS b) RISC
c) Both a & b d) None of the above

9) _____ mode is used when the processor encounters an instruction that is not supported by the implementation.
a) Supervisor b) System
c) Undefined d) Abort

10) Let r0=0x02020202 and r1 =0x00009000. What will be the content of r1 after execution of instruction "LDR r0, [r1], #4”?
a) 0x00009000 b) 0x02020202
c) 0x00009004 d) 0x00008ffb

11) In ARM _____ exception is having the highest priority.
a) Reset b) Supervisor
c) System d) Interrupt request

12) ARM uses the thumb _____ bit instruction set to improve code density.
a) 32 b) 8
c) 64 d) 16

13) Let r0=0x00000000 and r1=0x00000005. What will be the content of r0 after execution of instruction "ADD r0, r1, r1, LSL #1”?
a) 0x00000000 b) 0x00000005
c) 0x0000000a d) 0x0000000f

14) The ARM register _____ is the program counter.
a) R12 b) R13
c) R14 d) R15

Day & Date: Thursday 29-05-2025 Max. Marks: 56
Time: 10:00 AM To 01:00 PM

Instructions: 1) All questions are compulsory.
2) Figures to the right indicate full marks.
3) Assume suitable data wherever necessary.

Section – I

Q.2 Solve any four. **16**

a) Write an ARM assembly program to add two 64 bit numbers.
b) Explain the use of R13, R14, R15 registers in ARM7.
c) Explain ARM7TDMI nomenclature used for ARM processors.
d) Explain different addressing modes of ARM7 with examples.
e) Define embedded system. Explain major characteristics which differs embedded system from desktop computer.

Q.3 Solve any two. **12**

a) Explain concept of instruction pipeline with suitable example.
b) Draw and explain ARM programmer's data flow model.
c) Explain hardware and software architecture of embedded system.

Section – II

Q.4 Solve any four. **16**

a) What is a task? Draw and explain task status diagram.
b) List out the features of LPC2148.
c) Explain different inter-process communication techniques.
d) Define RTOS. Explain its function.
e) Explain the use of IOSET and IOCLR registers in LPC2148 with example.

Q.5 Solve any two. **12**

a) Interface 4 LED's to LPC2148 port pins P0.2 to P0.5. Write an embedded C program to blink them continuously.
b) Sketch and discuss interfacing of 16*2 LCD with LPC2148.
c) What is context switch or task switch? Explain with neat diagram.

T. Y (B. Tech.) (Sem-II) (New) (CBCS) Examination: March/April-2025
ELECTRONICS ENGINEERING
VLSI Design (BTN04603)

Day & Date: Monday 02-06-2025 Max. Marks: 70
Time: 10:00 AM To 01:00 PM

Instructions: 1) Q. No. 1 is compulsory. It should be solved in the first 30 minutes in Answer Book Page no 03 (Starting page of the Answer Book). Each question carries one mark
2) Don't forget to Mention question paper set (P/Q/R/S) on top on page.
3) Figures to the right indicates full marks.
4) Make suitable assumptions if necessary and state them clearly.

MCQ/Objective Type Questions

Duration: 30 Minutes Marks:14

Q.1 Choose the correct option. **14**

1) In a VHDL code, * * operator represents _____.
a) Mod operator b) Remainder operator
c) Exponentiation operator d) Concatenation operator

2) Which is default delay in VHDL?
a) Delta delay b) Inertial delay
c) Transport delay d) None of the above

3) Which of the following feature can be used to specify the parameters for a component at the time of instantiation?
a) Generate b) Attribute
c) Generics d) Signals

4) Process in VHDL becomes active, when _____.
a) there is change in the value of signal in sensitivity list
b) change in clock statement
c) change in reset signal
d) none of the signal

5) Which of the following is sequential statement?
a) Signal assignment b) Variable assignment
c) wait statement d) All of these

6) In the signal assignment statement y <= a and b after 5 ns which delay model is used?
a) Transport delay b) Inertial delay
c) Delta delay d) Wire delay

7) VHDL statement
Op <= input when e = '1' else 'z'; infers _____.
a) 2 : 1 multiplexer b) Tristate buffer
c) Buffer d) None of these

8) The functional blocks that perform combinatorial or sequential logic, and also have the added flexibility for true or complement, along with varied feedback paths in a CPLD are known as _____.
a) Product term allocator b) Macrocell
c) Programmable switch matrix d) None of these

9) Input Resistance of CMOS Inverter is _____.
a) Extremely LOW b) Extremely High
c) Infinity d) Zero

10) Synthesis means _____.
a) Checking correctness of the Design
b) Conversion of the Design to actual component
c) Implement design into target technology
d) None of Above

11) A single pattern that may be interpreted as a result of all the applied tests in testing is _____.
a) MIC b) PRBSG
c) SIC d) Signature

12) RTL simulation does _____.
a) Preparation of Net lists b) Verifying correctness
c) Preparing Timing analysis d) None of above

13) Under steady state condition power dissipated in CMOS circuit is _____.
a) 0 w b) 10 μw
c) 0.1 μw d) None of above

14) CMOS logic consists of _____.
a) pull up network b) pull down network
c) Both a) and b) d) None of above

T. Y (B. Tech.) (Sem-II) (New) (CBCS) Examination: March/April-2025
ELECTRONICS ENGINEERING
VLSI Design (BTN04603)

Day & Date: Monday 02-06-2025 Max. Marks: 56
Time: 10:00 AM To 01:00 PM

Instructions: 1) All questions are compulsory.
2) Figures to the right indicate full marks.

Section – I

Q.2 Attempt any FOUR of the following. **16**

a) Explain following attributes of VHDL with suitable example of using these attributes.
i) T'LOW
ii) S'Delayed(T)
iii) S'Active
iv) S'Event

b) Write VHDL code for half adder.

c) Write VHDL code for D Flip flop.

d) Explain with suitable example different forms of wait statement. What is the significance of wait for 0 ns?

e) Explain the transport and inertial delays in VHDL with suitable examples.

Q.3 Attempt any TWO of the following. **12**

a) Write VHDL code for 3 bit counter with synchronous reset.

b) Explain following statement of VHDL with suitable example.
i) if - else,
ii) case
iii) Loop statement
iv) When else

c) Compare following:
i) Functions and Procedures in VHDL
ii) Process with sensitivity list & Process without sensitivity list

Section – II

Q.4 Attempt any FOUR of the following. **16**

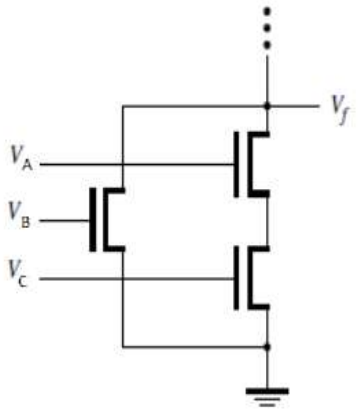
a) Explain in brief how to derive test set using path sensitizing method with suitable example.

b) Explain in brief RTL simulation.

c) Draw and Explain 2 input CMOS NOR gate.

d) Explain built in self-test method to test the circuits.

e) Following figure shows half of a CMOS circuit. Derive the other half that contains the PMOS transistors. Also derive the Boolean expression for Vf.



Q.5 Attempt any TWO of the following. **12**

a) Explain the CMOS noise margin in detail.

b) Draw and Explain Xilinx 9500 series CPLD architecture.

c) Elaborate the synthesis process, outlining the key steps involved.

MCQ/Objective Type Questions

Duration: 30 Minutes Marks:14

Q.1 Choose the correct alternatives from the options. 14

1) A continuous image is digitized at ____ points.
a) random b) vertex
c) contour d) sampling

2) Images quantized with insufficient brightness levels will lead to the occurrence of _____
a) Pixilation b) blurring
c) False Contours d) none of the mentioned

3) What is the tool used in tasks such as zooming, shrinking, rotating, etc.?
a) Sampling b) Interpolation
c) Filters d) None of the mentioned

4) The type of Interpolation where the intensity of the FOUR neighbouring pixels is used to obtain intensity a new location is called _____
a) cubic interpolation
b) nearest neighbor interpolation
c) bilinear interpolation
d) bicubic interpolation

5) For line detection we use mask that is _____
a) Gaussian b) Laplacian
c) Ideal d) Butterworth

6) The process of extracting information from the image is called as _____
a) Image enhancement b) Image restoration
c) Image Analysis d) Image compression

7) Basic steps for filtering in the frequency domain: _____
a) Fourier transform b) filter function
c) Inverse Fourier transform d) all of these

8) Image negatives a gray level transformation is defined as: _____
a) $s = L - 1 - r$ b) $s = L - r$
c) $s = r - 1 - L$ d) None

9) _____ should stop when the objects of interest in an application have been isolated.
a) Segmentation b) Fragment
c) Addition d) none of above

10) What kind of information we can use for Image Representation and Description?
a) Boundary, shape b) Region
c) Texture d) All of these

11) A chain code: 10103322 –
a) The first difference = 3133030 b) The first difference = 3130030
c) The first difference = 3100030 d) none of above

12) region-based segmentation (seeded region growing)
a) advantage: With edge connectivity
b) advantage: With loose connectivity
c) advantage: With good connectivity
d) none of above

13) Giving one period of the periodic convolution is called _____
a) periodic convolution b) aperiodic convolution
c) correlation d) circular convolution

14) Fourier transform of two continuous functions, that are inverse of each other is called _____
a) Fourier series pair b) Fourier transform pair
c) Fourier series d) Fourier transform

Q.2 Attempt Any Four **16**

a) Write a note on intensity level slicing.
b) What is geometric transformation?
c) Explain singular value decomposition and specify its properties.
d) What is adjacency & different types of adjacency?
e) What is contrast stretching?

Q.3 Attempt Any Two **12**

a) Explain Fourier Transform: Discrete and Continuous and Give Properties of Fourier Transform.
b) Explain different techniques to sharpen the image in frequency domain.
c) Specify the objective of image enhancement technique. What is meant by histogram equalization?

Section – II

Q.4 Attempt Any Four **16**

a) What is Image Segmentation? Explain line detection technique.
b) What is edge linking? How to achieve this using local processing method?
c) What is Data Compression and state its types?
d) What is the need of Image Compression?
e) Explain texture and statistical texture description.

Q.5 Attempt Any Two **12**

a) Explain Hough transform based edge linking.
b) With suitable example, explain Fourier descriptor. What are its advantages over other descriptor?
c) Explain region splitting and merging technique for image segmentation.

Set Q

T.Y. (B.Tech.) (Sem - II) (New) (CBCS) Examination: March/April-2025
ELECTRONICS ENGINEERING
Image Processing (BTN04609)

Day & Date: Wednesday, 04-June-2025 Max. Marks: 56
Time: 10:00 AM To 01:00 PM

Instructions: 1) All questions are compulsory.
2) Figures to the right indicate full marks.
3) Assume suitable data if necessary.

Section – I

Q.2 Attempt Any Four **16**

a) Write a note on intensity level slicing.
b) What is geometric transformation?
c) Explain singular value decomposition and specify its properties.
d) What is adjacency & different types of adjacency?
e) What is contrast stretching?

Q.3 Attempt Any Two **12**

a) Explain Fourier Transform: Discrete and Continuous and Give Properties of Fourier Transform.
b) Explain different techniques to sharpen the image in frequency domain.
c) Specify the objective of image enhancement technique. What is meant by histogram equalization?

Section – II

Q.4 Attempt Any Four **16**

a) What is Image Segmentation? Explain line detection technique.
b) What is edge linking? How to achieve this using local processing method?
c) What is Data Compression and state its types?
d) What is the need of Image Compression?
e) Explain texture and statistical texture description.

Q.5 Attempt Any Two **12**

a) Explain Hough transform based edge linking.
b) With suitable example, explain Fourier descriptor. What are its advantages over other descriptor?
c) Explain region splitting and merging technique for image segmentation.

Seat No.	

Set **R**

T.Y. (B.Tech.) (Sem - II) (New) (CBCS) Examination: March/April-2025
ELECTRONICS ENGINEERING
Image Processing (BTN04609)

Day & Date: Wednesday, 04-June-2025 Max. Marks: 70
Time: 10:00 AM To 01:00 PM

Instructions: 1) Q. No. 1 is compulsory. It should be solved in the first 30 minutes in Answer Book Page no 03 (Starting page of the Answer Book). Each question carries one mark.
2) Don't forget to Mention question paper set (P/Q/R/S) on top of page.
3) Figures to the right indicates full marks.
4) Assume suitable data if necessary.

MCQ/Objective Type Questions

Duration: 30 Minutes Marks:14

Q.1 Choose the correct alternatives from the options. 14

1) A chain code: 10103322 –
a) The first difference = 3133030 b) The first difference = 3130030
c) The first difference = 3100030 d) none of above

2) region-based segmentation (seeded region growing)
a) advantage: With edge connectivity
b) advantage: With loose connectivity
c) advantage: With good connectivity
d) none of above

3) Giving one period of the periodic convolution is called _____
a) periodic convolution b) aperiodic convolution
c) correlation d) circular convolution

4) Fourier transform of two continuous functions, that are inverse of each other is called _____
a) Fourier series pair b) Fourier transform pair
c) Fourier series d) Fourier transform

5) A continuous image is digitized at ____ points.
a) random b) vertex
c) contour d) sampling

6) Images quantized with insufficient brightness levels will lead to the occurrence of _____
a) Pixilation b) blurring
c) False Contours d) none of the mentioned

7) What is the tool used in tasks such as zooming, shrinking, rotating, etc.?

a) Sampling
b) Interpolation
c) Filters
d) None of the mentioned

8) The type of Interpolation where the intensity of the FOUR neighbouring pixels is used to obtain intensity a new location is called _____

a) cubic interpolation
b) nearest neighbor interpolation
c) bilinear interpolation
d) bicubic interpolation

9) For line detection we use mask that is _____

a) Gaussian
b) Laplacian
c) Ideal
d) Butterworth

10) The process of extracting information from the image is called as _____

a) Image enhancement
b) Image restoration
c) Image Analysis
d) Image compression

11) Basic steps for filtering in the frequency domain: _____

a) Fourier transform
b) filter function
c) Inverse Fourier transform
d) all of these

12) Image negatives a gray level transformation is defined as: _____

a) $s = L - 1 - r$
b) $s = L - r$
c) $s = r - 1 - L$
d) None

13) _____ should stop when the objects of interest in an application have been isolated.

a) Segmentation
b) Fragment
c) Addition
d) none of above

14) What kind of information we can use for Image Representation and Description?

a) Boundary, shape
b) Region
c) Texture
d) All of these

MCQ/Objective Type Questions

Duration: 30 Minutes Marks:14

Q.1 Choose the correct Answer. **14**

1) To ensure difficulties do not arise in the readers - writers problem, _____ are given exclusive access to the shared object.
a) readers b) writers
c) both a and b d) None of these

2) In the Many to One model, if a thread makes a blocking system call: ____
a) the entire process will be blocked
b) a part of the process will stay blocked, with the rest running
c) the entire process will run
d) None of these

3) Which of the following state transition is not possible?
a) ready ⟶ running b) running ⟶ waiting
c) ready ⟶ waiting d) waiting ⟶ ready

4) The interval from the time of submission of a process to the time of completion is termed as _____
a) waiting time b) turnaround time
c) response time d) throughput

5) The degree of multi-programming is: _____
a) the number of processes executed per unit time
b) the number of processes in the ready queue
c) the number of processes in the I/O queue
d) the number of processes in memory

6) The bounded buffer problem is also known as: _____
a) Readers – Writers problem
b) Dining – Philosophers problems
c) Producer – Consumer problem
d) None of these

7) Round robin scheduling falls under the category of: _____
a) Non preemptive scheduling b) Preemptive scheduling
c) both a and b d) None of these

8) Logical memory is broken into blocks of the same size called _____.
a) frames b) pages
c) backing store d) none of the mentioned

9) For every process there is a _____.
a) page table b) copy of page table
c) pointer to page table d) all of the mentioned

10) The circular wait condition can be prevented by _____.
a) defining a linear ordering of resource types
b) using thread
c) using pipes
d) all of the mentioned

11) In segmentation, each address is specified by _____
a) a segment number & offset b) an offset & value
c) a value & segment number d) a key & value

12) The segment limit contains the _____.
a) starting logical address of the process
b) starting physical address of the segment in memory
c) segment length
d) none of the mentioned

13) By using the specific system call, we can _____.
a) open the file b) read the file
c) write into the file d) all of the mentioned

14) _____ is a unique tag, usually a number identifies the file within the file system.
a) File identifier b) File name
c) File type d) None of the mentioned

Operating Systems (BTN04605)

Day & Date: Friday, 06-June-2025 Max. Marks: 56
Time: 10:00 AM To 01:00 PM

Instructions: 1) All questions are compulsory
2) Figures to the right indicate full marks.
3) Assume suitable data if necessary.

Section – I

Q.2 Attempt any four: **16**

a) Write a short note on distributed operating systems.
b) Describe the Round Robin scheduling algorithm with one example.
c) State and explain the various states that a process can be in with a neat sketch of process state diagram.
d) Define thread. List some advantages of threads over the traditional processes.
e) Analyze bounded buffer problem as classical problems of synchronization.

Q.3 Attempt any two: **12**

a) Write short note on:
i) Semaphores
ii) System calls

b) Consider five processes P1, P2, P3 and P4 with their arrival times and with their required CPU burst in milliseconds

Process	CPU burst time (ms)	Arrival time
P1	7	0
P2	5	1
P3	2	3
P4	3	4

i) How will these processes be scheduled according to SJF scheduling algorithm?
ii) Draw the Gantt chart for SJF scheduling algorithm.
iii) Compute the average waiting time and average turnaround time.

c) Explain process creation and termination operations in detail.

Section – II

Q.4 Attempt any four: **16**

a) What is deadlock? Describe different deadlock handling policies.

b) How is memory allocated to new program in secondary storage? Describe briefly any two memory allocation methods.

c) What are the steps adopted to handle a page fault in demand paging in OS?

d) Consider page reference string 6, 7, 8, 9, 6, 7, 1, 6, 7, 8, 9, 1, 7, 9, 6. Find out the number of page faults if 3-page frames are provided in case of and optimal page replacement.

e) What is the concept of free space management in OS. Discuss commonly adopted free space techniques.

Q.5 Attempt any two: **12**

a) What is the degree of multiprogramming? How is degree of multiprogramming is related to CPU utilization? Describe thrashing and policies to avoid thrashing.

b) Describe various file access methods in OS.

c) Elaborate address translation in segmentation.

a) defining a linear ordering of resource types
b) using thread
c) using pipes
d) all of the mentioned

6) In segmentation, each address is specified by _____
a) a segment number & offset b) an offset & value
c) a value & segment number d) a key & value

7) The segment limit contains the _____.
a) starting logical address of the process
b) starting physical address of the segment in memory
c) segment length
d) none of the mentioned

8) By using the specific system call, we can _____.
a) open the file
b) read the file
c) write into the file
d) all of the mentioned

9) _____ is a unique tag, usually a number identifies the file within the file system.
a) File identifier
b) File name
c) File type
d) None of the mentioned

10) To ensure difficulties do not arise in the readers - writers problem, _____ are given exclusive access to the shared object.
a) readers
b) writers
c) both a and b
d) None of these

11) In the Many to One model, if a thread makes a blocking system call: ____
a) the entire process will be blocked
b) a part of the process will stay blocked, with the rest running
c) the entire process will run
d) None of these

12) Which of the following state transition is not possible?
a) ready ⟶ running
b) running ⟶ waiting
c) ready ⟶ waiting
d) waiting ⟶ ready

13) The interval from the time of submission of a process to the time of completion is termed as _____
a) waiting time
b) turnaround time
c) response time
d) throughput

14) The degree of multi-programming is: _____
a) the number of processes executed per unit time
b) the number of processes in the ready queue
c) the number of processes in the I/O queue
d) the number of processes in memory

Set | S

T. Y. (B. Tech.) (Sem-II) (New) (CBCS) Examination: March/April-2025
ELECTRONICS ENGINEERING
Operating Systems (BTN04605)

Day & Date: Friday, 06-June-2025 Max. Marks: 56
Time: 10:00 AM To 01:00 PM

Instructions: 1) All questions are compulsory
2) Figures to the right indicate full marks.
3) Assume suitable data if necessary.

Section – I

Q.2 Attempt any four: **16**

a) Write a short note on distributed operating systems.
b) Describe the Round Robin scheduling algorithm with one example.
c) State and explain the various states that a process can be in with a neat sketch of process state diagram.
d) Define thread. List some advantages of threads over the traditional processes.
e) Analyze bounded buffer problem as classical problems of synchronization.

Q.3 Attempt any two: **12**

a) Write short note on:
i) Semaphores
ii) System calls

b) Consider five processes P1, P2, P3 and P4 with their arrival times and with their required CPU burst in milliseconds

Process	CPU burst time (ms)	Arrival time
P1	7	0
P2	5	1
P3	2	3
P4	3	4

i) How will these processes be scheduled according to SJF scheduling algorithm?
ii) Draw the Gantt chart for SJF scheduling algorithm.
iii) Compute the average waiting time and average turnaround time.

c) Explain process creation and termination operations in detail.

Section – II

Q.4 Attempt any four: **16**

a) What is deadlock? Describe different deadlock handling policies.

b) How is memory allocated to new program in secondary storage? Describe briefly any two memory allocation methods.

c) What are the steps adopted to handle a page fault in demand paging in OS?

d) Consider page reference string 6, 7, 8, 9, 6, 7, 1, 6, 7, 8, 9, 1, 7, 9, 6. Find out the number of page faults if 3-page frames are provided in case of and optimal page replacement.

e) What is the concept of free space management in OS. Discuss commonly adopted free space techniques.

Q.5 Attempt any two: **12**

a) What is the degree of multiprogramming? How is degree of multiprogramming is related to CPU utilization? Describe thrashing and policies to avoid thrashing.

b) Describe various file access methods in OS.

c) Elaborate address translation in segmentation.

T. Y (B. Tech) (Sem-II) (New) (CBCS) Examination: March/April-2025
ELECTRONICS ENGINEERING
Data Science Machine Learning (BTN04613)

Day & Date: Tuesday, 10-June-2025 Max. Marks: 70
Time: 10:00 AM To 01:00 PM

Instructions: 1) Q. No. 1 is compulsory. It should be solved in the first 30 minutes in Answer Book Page no 03 (Starting page of the Answer Book). Each question carries one mark.
2) Don't forget to Mention question paper set (P/Q/R/S) on top of page.

MCQ/Objective Type Questions

Duration: 30 Minutes Marks:14

Q.1 Choose correct option. **14**

1) _____ is a widely used and effective machine learning algorithm based on the idea of bagging.
a) Regression b) Classification
c) Decision Tree d) Random Forest

2) Sentiment analysis is an example of _____.
i) Regression
ii) Classification
iii) Clustering
iv) Reinforcement Learning
a) (i) only b) (i) & (ii)
c) (i) & (iii) d) (i), (ii) & (iii)

3) A Machine learning technique that helps in detecting the outliers in data _____.
a) Clustering b) Clustering
c) Anamoly Detection d) All of the above

4) Which ONE of the following are regression tasks?
a) Predict the age of a person
b) Predict the country from where the person comes from
c) Predict whether the price of petroleum will increase tomorrow
d) Predict whether a document is related to science

5) Real-Time decisions, Game Al, Learning Tasks, Skill Acquisition, and Robot Navigation are applications of which of the following.
a) Supervised Learning: Classification
b) Reinforcement Learning
c) Unsupervised Learning: Clustering
d) Unsupervised Learning: Regression

6) Logistic regression is _____ regression technique that is used to model data having _____ outcome.

a) Linear, Numeric
b) Linear, Binary
c) Non Linear, Numeric
d) Non Linear, Binary

7) In which of the following cases will K-means clustering fail to give good results?

i) Data point with outliers
ii) Data point with different densities
iii) Data point with non- convex shapes

a) (i) & (ii)
b) (ii) & (iii)
c) (i) & (iii)
d) All of the above

8) Which of the following statement is TRUE about the Association rule method?

a) It determines how strongly or how weakly two objects are connected
b) It determines the relation between two objects
c) Relation between particular objects
d) Relation between frequent item set

9) Which of the following is true about Naïve Bayes?

a) Assumes that all the features in the dataset are equally important
b) Assumes that all the features in the dataset are independent
c) Both A&B
d) None of the above

10) What is back propagation?

a) It is another name given to the curvy function in the Perceptron
b) It is the transmission of error back through the network to allow weights to be adjusted so that the network can learn
c) It is another name given to the curvy function in the Perceptron
d) None of the above

11) What strategies can help reduce overfitting in decision trees?

i) Enforce a maximum depth for the tree
ii) Enforce a minimum number of samples in leaf nodes
iii) Pruning
iv) Make sure each leaf node is one pure class

a) All the above
b) (i), (ii) and (iii)
c) (i), (iii), (iv)
d) None of above

12) Applications of NN (Neural Network) _____.

a) Risk management
b) Data validation
c) Sales forecasting
d) All of the above

13) The Bayesian network can be used to answer any query by Using _____.

a) Full distribution
b) Joint distribution
c) Partial distribution
d) All of the above

14) Bayes rule can be used for: _____.

a) Solving queries
b) Increasing complexity
c) Answering probabilistic query
d) Decreasing Complexity

MCQ/Objective Type Questions

Duration: 30 Minutes Marks:14

Q.1 Choose the correct options. **14**

1) What is the main purpose of the AWS dashboard?
a) Managing user accounts
b) Monitoring AWS service usage
c) Configuring virtual machines
d) Developing applications

2) What is the first step to create a new AWS account?
a) Choose a billing plan
b) Provide payment information
c) Verify email address
d) Set up multi-factor authentication

3) Which AWS account type has full administrative access and control over all AWS resources?
a) Root user
b) Non-root user
c) IAM user
d) Service account

4) In IAM, what is a group?
a) A collection of IAM policies
b) A group of users with similar access requirements
c) A role assigned to an IAM user
d) A policy that defines resource permissions

5) What is an IAM role in AWS?
a) A group of users with administrative privileges
b) A temporary session to assume different user identities
c) A policy that defines permissions for a specific resource
d) An identity with specific permissions that can be assumed by AWS services or users

6) Which component of IAM defines what actions are allowed or denied on AWS resources?

a) Users
b) Roles
c) Policies
d) Groups

7) Which AWS service provides firewall security for your VPC?

a) Amazon EC2
b) Amazon S3
c) Amazon VPC Security Groups
d) Amazon Route 53

8) What is NAT in the context of AWS VPC?

a) Network Address Translation
b) Network Access Token
c) Network Availability Test
d) Network Attached Storage

9) What is the primary purpose of Elastic Block Store (EBS) in EC2?

a) Storing and retrieving data from S3
b) Managing containerized applications
c) Providing virtual network connectivity
d) Offering persistent block-level storage for EC2 instances

10) Which of the following, is NOT an EC2 instance type?

a) t3.micro
b) m5.large
c) g2.2xlarge
d) n2.nano

11) What are CloudWatch dashboards in AWS?

a) Customizable visualizations of CloudWatch metrics and alarms
b) Configurable firewall rules for inbound and outbound traffic
c) Instances with preconfigured monitoring settings
d) Predefined templates for launching EC2 instances

12) What are the two monitoring types available in Amazon CloudWatch?

a) Basic and advanced
b) Real-time and historical
c) Manual and automated
d) Basic and detailed

13) What are objects in Amazon S3?

a) Containers for organizing multiple buckets
b) Virtual machines for running applications
c) Data entities stored in S3 buckets
d) Access control policies for S3 buckets

14) What is versioning in Amazon S3?

a) A feature for managing different versions of an object in a bucket
b) A way to categorize objects based on their content type
c) A process for automatically migrating data between S3 storage classes
d) A mechanism for distributing data across multiple S3 regions

Seat No.		Set	P

T. Y (B. Tech) (Sem-II) (New) (CBCS) Examination: March/April-2025
ELECTRONICS ENGINEERING
IoT Cloud Platform (BTN04614)

Day & Date: Tuesday, 10-June-2025 Max. Marks: 56
Time: 10:00 AM To 01:00 PM

Instructions: 1) All questions are compulsory.
2) Figures to the right indicate full marks.
3) Make suitable assumptions (if necessary and state them clearly).

Section – I

Q.2 Attempt any three questions. **12**

a) Describe the differences between SaaS, PaaS, and IaaS in the context of AWS.
b) What is virtualization and how does it work in AWS? How is it related to elasticity and scalability?
c) How can you create a new AWS account and what are the steps to delete an AWS account?
d) What is the AWS root user? Why is it important to understand the root user account?

Q.3 Attempt any two questions. **16**

a) What are some best practices for IAM in AWS? Discuss common IAM security risks and how to mitigate them.
b) What is the process for creating a VPC in AWS? Describe the key steps involved in creating a VPC and the options available for customizing its configuration.
c) What is a VPC endpoint? Describe the different types of VPC endpoints available in AWS and how they can be used to securely access AWS services.

Section – II

Q.4 Attempt any three questions. **12**

a) What are some best practices for managing EC2 instances effectively?
b) How can you optimize EC2 instance performance and cost efficiency?
c) What are the different types of EC2 instances available and how do they differ?
d) Explain the key elements of Amazon CloudWatch and their functions?

Q.5 Attempt any two questions. **16**

a) How does lifecycle management in S3 allow for the automatic transition of objects between different storage classes or deletion based on predefined rules?

b) How do you create a bucket in Amazon S3 and what are some considerations when naming a bucket?

c) What is ClassicLink in VPC? Explain how ClassicLink can be used to connect EC2 instances in VPC to instances in the EC2-Classic platform.

Set Q

T. Y (B. Tech) (Sem-II) (New) (CBCS) Examination: March/April-2025
ELECTRONICS ENGINEERING
IoT Cloud Platform (BTN04614)

Day & Date: Tuesday, 10-June-2025 Max. Marks: 70
Time: 10:00 AM To 01:00 PM

Instructions: 1) Q. No. 1 is compulsory. It should be solved in the first 30 minutes in Answer Book Page no 03 (Starting page of the Answer Book). Each question carries one mark.
2) Don't forget to Mention question paper set (P/Q/R/S) on top of page.
3) Figures to the right indicates full marks.

MCQ/Objective Type Questions

Duration: 30 Minutes Marks:14

Q.1 Choose the correct options. **14**

1) What is NAT in the context of AWS VPC?
a) Network Address Translation b) Network Access Token
c) Network Availability Test d) Network Attached Storage

2) What is the primary purpose of Elastic Block Store (EBS) in EC2?
a) Storing and retrieving data from S3
b) Managing containerized applications
c) Providing virtual network connectivity
d) Offering persistent block-level storage for EC2 instances

3) Which of the following, is NOT an EC2 instance type?
a) t3.micro b) m5.large
c) g2.2xlarge d) n2.nano

4) What are CloudWatch dashboards in AWS?
a) Customizable visualizations of CloudWatch metrics and alarms
b) Configurable firewall rules for inbound and outbound traffic
c) Instances with preconfigured monitoring settings
d) Predefined templates for launching EC2 instances

5) What are the two monitoring types available in Amazon CloudWatch?
a) Basic and advanced b) Real-time and historical
c) Manual and automated d) Basic and detailed

6) What are objects in Amazon S3?
a) Containers for organizing multiple buckets
b) Virtual machines for running applications
c) Data entities stored in S3 buckets
d) Access control policies for S3 buckets

7) What is versioning in Amazon S3?
   a) A feature for managing different versions of an object in a bucket
   b) A way to categorize objects based on their content type
   c) A process for automatically migrating data between S3 storage classes
   d) A mechanism for distributing data across multiple S3 regions

8) What is the main purpose of the AWS dashboard?
   a) Managing user accounts
   b) Monitoring AWS service usage
   c) Configuring virtual machines
   d) Developing applications

9) What is the first step to create a new AWS account?
   a) Choose a billing plan
   b) Provide payment information
   c) Verify email address
   d) Set up multi-factor authentication

10) Which AWS account type has full administrative access and control over all AWS resources?
   a) Root user
   b) Non-root user
   c) IAM user
   d) Service account

11) In IAM, what is a group?
   a) A collection of IAM policies
   b) A group of users with similar access requirements
   c) A role assigned to an IAM user
   d) A policy that defines resource permissions

12) What is an IAM role in AWS?
   a) A group of users with administrative privileges
   b) A temporary session to assume different user identities
   c) A policy that defines permissions for a specific resource
   d) An identity with specific permissions that can be assumed by AWS services or users

13) Which component of IAM defines what actions are allowed or denied on AWS resources?
   a) Users
   b) Roles
   c) Policies
   d) Groups

14) Which AWS service provides firewall security for your VPC?
   a) Amazon EC2
   b) Amazon S3
   c) Amazon VPC Security Groups
   d) Amazon Route 53

Time: 03:00 PM To 06:00 PM

Instructions: 1) Q. No. 1 is compulsory. It should be solved in the first 30 minutes on answer book Page No. 03 (Starting page of the Answer Book). Each question carries one mark.
2) Don't forget to Mention question paper Set (P/Q/R/S) on top of page.
3) Figures to the right indicates full marks.
4) Make suitable assumptions if necessary and state them clearly.

MCQ/Objective Type Questions

Duration: 30 Minutes Marks:14

Q.1 Select suitable option. **14**

1) The modes in the reflex Klystron _____.
a) give same frequency but different transit time.
b) are caused by spurious frequency modulation.
c) are just for theoretical consideration.
d) result from excessive transit time across resonator gap

2) If Pi is incident power Pf is forward power Pb is back power then coupling factor (c) is given by _____.
a) c=10log10Pi/Pf b) c=20log19Pi/Pf
c) c=10log10Pf/Pi d) c=10log10Pi/Pb

3) Directivity of directional coupler is measure of _____.
a) how much incident power is being sampled
b) how well directional coupler distinguishes between forward and reverse travelling power
c) both a & b
d) none

4) Magic Tee is used as _____.
a) duplexer b) mixer
c) isolator d) both a & c

5) Wave guides can carry _____.
a) TE mode b) TM mode
c) Mixed mode d) All

6) Reflective attenuation comes into being when the frequency of the wave is _____.

a) <cut off frequency
b) >cut off frequency
c) Both
d) None

7) Magnetron is an _____.

a) Amplifier
b) Oscillator
c) Phase shifter
d) Both phase shifter and amplifier

8) The directive gain of a transmitting antenna is proportional to _____.

a) proportional to wavelength
b) inversely proportional to wavelength
c) proportional to square of wavelength
d) inversely proportional to square of wavelength

9) In a TWT the axial component of electric field advances along the tube.

a) at a velocity that is almost equal to speed of light
b) at a velocity that is a small fraction of speed of light
c) at a velocity that is about 50% of speed of light
d) at a velocity that may be even more than speed of light

10) In a backward wave oscillator, the wave _____.

a) travelling along the line winds itself back and forth
b) Processes only in forward direction
c) Processes only in backward direction
d) Either a) or c)

11) Which of the following is not the factor affecting range of radar _____?

a) Transmitter power
b) Frequency
c) Temperature
d) Target cross-sectional area

12) The location of target includes _____,_____and _____ parameter.

a) Range, Angle and Velocity.
b) Range, temperature and Velocity.
c) Temperature, Angle and Velocity.
d) Range, Angle and temperature.

13) Tracking system is used _____.

a) To collect data from different sensors & sends to the control earth station
b) For the determination of the current orbit and position of the space craft
c) For making changes in altitude & orbit correction
d) For controlling communication system

14) In a circular orbit the speed if revolution is _____ while in elliptical orbit it depends on _____ of the satellite above the earth.

a) Variable, height
b) Constant, width
c) Constant, height
d) Increases, height

Q.2 Attempt Any Two. **12**

a) Draw block diagram of Pulse radar system and explain working of each block.
b) Explain construction and working of π- mode magnetron. State its performance parameters.
c) Draw and explain working of directional coupler. Derive the scattering matrix of a directional coupler.

Q.3 Attempt Any Four. **16**

a) What is the Microwave frequency range, state its applications.
b) State the radar range equation and explain the factor effecting the radar range equation.
c) Explain why oscillations are sustained in Gunn diode.
d) Write a note on FM-CW Radar.
e) Explain construction and working of IMPATT diode.

Section – II

Q.4 Attempt Any Two. **12**

a) With suitable block diagrams explain earth station.
b) Describe construction and the operating principles of the semiconductor junction laser.
c) Explain working of DBS-TV receiver.

Q.5 Attempt Any Four. **16**

a) Compare pre assignment and demand assignment multiple access system.
b) List the application and benefits of fiber optic cables.
c) Explain bending losses in optical fiber.
d) Explain single conversion and double conversion transponder system.
e) Explain the procedure of locating the satellite in the orbit.

Fourth.Y. (B. Tech) (Sem-I) (New) (CBCS) Examination: March/April-2025
ELECTRONICS ENGINEERING
Advanced Communication Engineering (BTN04701)

Day & Date: Monday, 02-06-2025 Max. Marks: 70
Time: 03:00 PM To 06:00 PM

Instructions: 1) Q. No. 1 is compulsory. It should be solved in the first 30 minutes on answer book Page No. 03 (Starting page of the Answer Book). Each question carries one mark.
2) Don't forget to Mention question paper Set (P/Q/R/S) on top of page.
3) Figures to the right indicates full marks.
4) Make suitable assumptions if necessary and state them clearly.

MCQ/Objective Type Questions

Duration: 30 Minutes Marks:14

Q.1 Select suitable option. 14

1) Which of the following is not the factor affecting range of radar _____?
a) Transmitter power b) Frequency
c) Temperature d) Target cross-sectional area

2) The location of target includes _____,_____and _____ parameter.
a) Range, Angle and Velocity.
b) Range, temperature and Velocity.
c) Temperature, Angle and Velocity.
d) Range, Angle and temperature.

3) Tracking system is used _____.
a) To collect data from different sensors & sends to the control earth station
b) For the determination of the current orbit and position of the space craft
c) For making changes in altitude & orbit correction
d) For controlling communication system

4) In a circular orbit the speed if revolution is _____ while in elliptical orbit it depends on _____ of the satellite above the earth.
a) Variable, height b) Constant, width
c) Constant, height d) Increases, height

5) The modes in the reflex Klystron _____.
a) give same frequency but different transit time.
b) are caused by spurious frequency modulation.
c) are just for theoretical consideration.
d) result from excessive transit time across resonator gap

6) If Pi is incident power Pf is forward power Pb is back power then coupling factor (c) is given by _____.

a) c=10log10Pi/Pf b) c=20log19Pi/Pf
c) c=10log10Pf/Pi d) c=10log10Pi/Pb

7) Directivity of directional coupler is measure of _____.

a) how much incident power is being sampled
b) how well directional coupler distinguishes between forward and reverse travelling power
c) both a & b
d) none

8) Magic Tee is used as _____.

a) duplexer b) mixer
c) isolator d) both a & c

9) Wave guides can carry _____.

a) TE mode b) TM mode
c) Mixed mode d) All

10) Reflective attenuation comes into being when the frequency of the wave is _____.

a) <cut off frequency b) >cut off frequency
c) Both d) None

11) Magnetron is an _____.

a) Amplifier
b) Oscillator
c) Phase shifter
d) Both phase shifter and amplifier

12) The directive gain of a transmitting antenna is proportional to _____.

a) proportional to wavelength
b) inversely proportional to wavelength
c) proportional to square of wavelength
d) inversely proportional to square of wavelength

13) In a TWT the axial component of electric field advances along the tube.

a) at a velocity that is almost equal to speed of light
b) at a velocity that is a small fraction of speed of light
c) at a velocity that is about 50% of speed of light
d) at a velocity that may be even more than speed of light

14) In a backward wave oscillator, the wave _____.

a) travelling along the line winds itself back and forth
b) Processes only in forward direction
c) Processes only in backward direction
d) Either a) or c)

Day & Date: Monday, 02-06-2025 Max. Marks: 56
Time: 03:00 PM To 06:00 PM

Instructions: 1) All questions are compulsory.
2) Figures to the right indicate full marks.
3) Assume suitable data if necessary.

Section – I

Q.2 Attempt Any Two. **12**

a) Draw block diagram of Pulse radar system and explain working of each block.
b) Explain construction and working of π- mode magnetron. State its performance parameters.
c) Draw and explain working of directional coupler. Derive the scattering matrix of a directional coupler.

Q.3 Attempt Any Four. **16**

a) What is the Microwave frequency range, state its applications.
b) State the radar range equation and explain the factor effecting the radar range equation.
c) Explain why oscillations are sustained in Gunn diode.
d) Write a note on FM-CW Radar.
e) Explain construction and working of IMPATT diode.

Section – II

Q.4 Attempt Any Two. **12**

a) With suitable block diagrams explain earth station.
b) Describe construction and the operating principles of the semiconductor junction laser.
c) Explain working of DBS-TV receiver.

Q.5 Attempt Any Four. **16**

a) Compare pre assignment and demand assignment multiple access system.
b) List the application and benefits of fiber optic cables.
c) Explain bending losses in optical fiber.
d) Explain single conversion and double conversion transponder system.
e) Explain the procedure of locating the satellite in the orbit.

MCQ/Objective Type Questions

Duration: 30 Minutes Marks:14

Q.1 Choose the correct Answer. **14**

1) R-C snubber is used in parallel with the thyristor to _____.
a) reduce dv/dt across it b) protect against di/dt
c) protect over current d) trigger thyristor

2) Thyristor is a _____.
a) Latching device b) Un- controlled device
c) latch proof device d) voltage controlled device

3) PIV for single phase full bridge rectifier is _____.
a) 2 Vm b) Vm
c) 3 Vm d) 4Vm

4) Ripple frequency for single phase semi converter is _____.
a) Same as supply frequency
b) Two times supply frequency
c) Three times supply frequency
d) Four times supply frequency

5) A converter which can operate as 3 pulse converter is a _____.
a) 3-phase half wave b) 3-phase full-converter
c) 1-phase semiconverter d) 1-phase dual converter

6) In Three phase full controlled bridge rectifier PIV across any thyristor is _____.
a) $\sqrt{2}\,V_m$ b) $\sqrt{3}\,V_m$
c) V_m d) $\sqrt{3}\,V_{LL}$

7) The average value of the output voltage in a step - down dc chopper is given by _____.

a) $V_0 = V_s$ b) $V_0 = K V_s$
c) $V_0 = V_s / K$ d) $V_0 = V_s / (1 – K)$

8) Class A and Class B choppers _____.

a) Two quadrant converters b) Three quadrant converters
c) Single quadrant converters d) None

9) In thyristor dc chopper _____ type of commutation results in best performance.

a) voltage commutation b) current commutation
c) load commutation d) supply commutation

10) Cycloconverter is a combination of _____.

a) Positive and negative converter
b) Two positive converter
c) Two negative converter
d) None

11) The number of thyristors required for single phase bridge type cycloconverters _____.

a) 8 b) 6
c) 4 d) 2

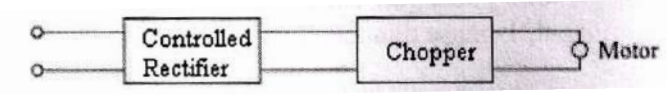
12) In Three phase 120° conduction mode _____.

a) At any instant of time two thyristors are ON
b) Triplen harmonics are absent
c) No possibility of short circuit
d) All above

13) Square wave PWM technique allows _____.

a) Voltage & harmonics control
b) only harmonics control
c) only voltage control
d) only frequency control

14) For the large D.C. motor control shown below, if the duty cycle of chopper circuit is increased then _____.



a) motor speed will increases
b) motor speed will decrease
c) the speed will not be effected
d) None of above

Section – I

Q.2 Attempt any Four. **16**

a) Explain high di/dt and high dv/dt protection circuit of SCR.

b) A single phase fully controlled rectifier supplies an inductive load. Assuming I_L is constant 5A. Determine average DC voltage and supply rms current if supply voltage is 240V, 50Hz and firing angle is 90°.

c) Illustrate the different mechanisms by which thyristor may be turn on.

d) A three phase semiconverter is operated from three phase 410V 50Hz mains supply and delivers power to sufficiently large inductive load having resistance of 30Ω. If it is required that average output voltage should be 55% of maximum possible voltage. Calculate
1) Firing angle
2) Average dc load voltage

e) Derive an expression for average dc output voltage for three phase half wave controlled rectifier with resistive load for continuous conduction mode. Sketch voltage waveform for $\alpha = 30°$

Q.3 Attempt any two. **12**

a) Design microcontroller based firing scheme for single phase fully controlled rectifiers.

b) What do you meant by voltage commutation? Elaborate the process of commutation in class D auxiliary commutation. Sketch associated waveforms.

c) Derive an exp for average voltage and RMS voltage for three phase full wave controlled bridge rectifier with highly inductive load. Sketch voltage waveform for $\alpha = 60°$

Section – II

Q.4 Attempt any Four. **16**

a) Design the control scheme for three phase cycloconverter.

b) Derive an expression for output voltage, duty cycle and effective input resistance for step down chopper.

c) Explain operation of single phase half bridge voltage source inverter with resistive load. Draw associate waveforms.

d) With suitable circuit explain operation of basic parallel inverter. Draw associated waveforms.

e) With suitable circuit diagram explain working of Class C chopper.

Q.5 Attempt any two. **12**

a) Explain working of multiphase chopper circuit. Compare In phase and Phase shifted operating mode of multiphase chopper circuit.

b) With suitable block diagram analyze the speed control of AC drive using fuzzy logic controller.

c) Derive an expression of RMS output voltage for single pulse modulation technique. Prove that to eliminate n^{th} harmonic component from output voltage pulse width should be $2\pi/n$.

Duration: 30 Minutes Marks:14

Q.1 Choose the correct Answer. **14**

1) In Three phase full controlled bridge rectifier PIV across any thyristor is _____.
a) $\sqrt{2}\,V_m$ b) $\sqrt{3}\,V_m$
c) V_m d) $\sqrt{3}\,V_{LL}$

2) The average value of the output voltage in a step - down dc chopper is given by _____.
a) $V_0 = V_s$ b) $V_0 = K V_s$
c) $V_0 = V_s / K$ d) $V_0 = V_s / (1 – K)$

3) Class A and Class B choppers _____.
a) Two quadrant converters b) Three quadrant converters
c) Single quadrant converters d) None

4) In thyristor dc chopper _____ type of commutation results in best performance.
a) voltage commutation b) current commutation
c) load commutation d) supply commutation

5) Cycloconverter is a combination of _____.
a) Positive and negative converter
b) Two positive converter
c) Two negative converter
d) None

6) The number of thyristors required for single phase bridge type cycloconverters _____.
a) 8 b) 6
c) 4 d) 2

7) In Three phase 120° conduction mode _____.
   a) At any instant of time two thyristors are ON
   b) Triplen harmonics are absent
   c) No possibility of short circuit
   d) All above

8) Square wave PWM technique allows _____.
   a) Voltage & harmonics control
   b) only harmonics control
   c) only voltage control
   d) only frequency control

9) For the large D.C. motor control shown below, if the duty cycle of chopper circuit is increased then _____.

   a) motor speed will increases
   b) motor speed will decrease
   c) the speed will not be effected
   d) None of above

10) R-C snubber is used in parallel with the thyristor to _____.
   a) reduce dv/dt across it b) protect against di/dt
   c) protect over current d) trigger thyristor

11) Thyristor is a _____.
   a) Latching device b) Un- controlled device
   c) latch proof device d) voltage controlled device

12) PIV for single phase full bridge rectifier is _____.
   a) 2 Vm b) Vm
   c) 3 Vm d) 4Vm

13) Ripple frequency for single phase semi converter is _____.
   a) Same as supply frequency
   b) Two times supply frequency
   c) Three times supply frequency
   d) Four times supply frequency

14) A converter which can operate as 3 pulse converter is a _____.
   a) 3-phase half wave b) 3-phase full-converter
   c) 1-phase semiconverter d) 1-phase dual converter

Fourth. Y.(B.Tech.) (Sem - I) (New) (CBCS) Examination: March/April-2025
ELECTRONICS ENGINEERING
Power Electronics (BTN04702)

Day & Date: Tuesday 03-06-2025 Max. Marks: 56
Time: 03:00 PM To 06:00 PM

Instructions: 1) All questions are compulsory.
2) Figures to the right indicate full marks.
3) Make suitable assumptions (if necessary and state them clearly).

Section – I

Q.2 Attempt any Four. **16**

a) Explain high di/dt and high dv/dt protection circuit of SCR.

b) A single phase fully controlled rectifier supplies an inductive load. Assuming I_L is constant 5A. Determine average DC voltage and supply rms current if supply voltage is 240V, 50Hz and firing angle is 90°.

c) Illustrate the different mechanisms by which thyristor may be turn on.

d) A three phase semiconverter is operated from three phase 410V 50Hz mains supply and delivers power to sufficiently large inductive load having resistance of 30Ω. If it is required that average output voltage should be 55% of maximum possible voltage. Calculate
1) Firing angle
2) Average dc load voltage

e) Derive an expression for average dc output voltage for three phase half wave controlled rectifier with resistive load for continuous conduction mode. Sketch voltage waveform for $\alpha = 30°$

Q.3 Attempt any two. **12**

a) Design microcontroller based firing scheme for single phase fully controlled rectifiers.

b) What do you meant by voltage commutation? Elaborate the process of commutation in class D auxiliary commutation. Sketch associated waveforms.

c) Derive an exp for average voltage and RMS voltage for three phase full wave controlled bridge rectifier with highly inductive load. Sketch voltage waveform for $\alpha = 60°$

Section – II

Q.4 Attempt any Four. **16**

a) Design the control scheme for three phase cycloconverter.

b) Derive an expression for output voltage, duty cycle and effective input resistance for step down chopper.

c) Explain operation of single phase half bridge voltage source inverter with resistive load. Draw associate waveforms.

d) With suitable circuit explain operation of basic parallel inverter. Draw associated waveforms.

e) With suitable circuit diagram explain working of Class C chopper.

Q.5 Attempt any two. **12**

a) Explain working of multiphase chopper circuit. Compare In phase and Phase shifted operating mode of multiphase chopper circuit.

b) With suitable block diagram analyze the speed control of AC drive using fuzzy logic controller.

c) Derive an expression of RMS output voltage for single pulse modulation technique. Prove that to eliminate n^{th} harmonic component from output voltage pulse width should be $2\pi/n$.

Mobile Technology (BTN04703)

Day & Date: Wednesday, 04-June-2025 Max. Marks: 70
Time: 03:00 PM To 06:00 PM

Instructions: 1) Q. No. 1 is compulsory. It should be solved in the first 30 minutes in Answer Book Page no 03 (Starting page of the Answer Book). Each question carries one mark.
2) Don't forget to Mention question paper set (P/Q/R/S) on top of page.
3) Figures to the right indicates full marks.
4) Assume suitable data if necessary.

MCQ/Objective Type Questions

Duration: 30 Minutes Marks:14

Q.1 Choose the correct Answer. **14**

1) Which of the following is a type of wireless communication.
a) LAN b) WAN
c) PAN d) All mentioned

2) Small scale fading describes the _____ fluctuations of the amplitude, phases of a signal.
a) Rapid b) Slow
c) Instantaneous d) Different

3) Slow frequency hopping is _____.
a) several hops per modulation
b) several modulations per hop
c) several symbols per modulation
d) none of the mentioned

4) Spread spectrum is _____ technique.
a) decoding
b) encoding
c) both encoding and decoding
d) none of mentioned

5) Which of the following memory devices stores information such as subscriber's identification number in GSM?
a) Register b) Flip flop
c) SIM d) SMS

6) Which one of the following enables us to use the entire bandwidth simultaneously?
a) TDMA b) CDMA
c) FDMA d) all mentioned

7) Which of the following uses wireless as the mode of communication for transferring or exchanging data between various mobiles over a short-range?
a) Ad hoc computing
b) Mobile computing
c) Bluetooth technology
d) None of the above

8) Mobile Computing allows transmission of data from one wireless-enabled device to another _____.
a) Any device
b) Wired device
c) Wireless-enabled device
d) All mentioned above

9) Which of the following is considered as the heart of the Global Systems for Mobiles (or GSM)?
a) Networks Switching Sub System
b) Operational Support Sub-system
c) base Station Subsystem
d) None of the above

10) Which one of the following can help in avoiding the interferences between the neighbouring base station?
a) Assigning different group of channels
b) Using transmitters with the different power level
c) Using different antennas
d) All of the above

11) The hexagon shape is used for radio coverage because _____.
a) It uses the maximum area for coverage
b) Fewer number of cells are required
c) It approximates a circular radiation pattern
d) All of the above

12) In mobile IP the _____ procedure the mobile node informs its home agent of its care-of address.
a) Discovery
b) Registration
c) Tunnelling
d) Termination

13) Mobile IP allows the mobile node to use two IP addresses called home address and _____.
a) Visitor Location Register
b) Virtual Address
c) Care of address
d) Temporary Address

14) GPRS uses the _____ architecture for voice.
a) NSS
b) CDMA
c) GSM
d) ESS

2) Figures to the right indicate full marks.
3) Assume suitable data if necessary.

Section – I

Q.2 Answer any four. **16**

a) Explain following terms related to wireless communication.
1) modes of propagation
2) fading and shadowing

b) Describe various multiple access methods used in mobile communication.

c) Discuss functioning of FHSS in detail. What are the advantages and disadvantages of FHSS?

d) What is the necessity of hand-off in mobile communication? Describe various hand-off scenarios of GSM.

e) Demonstrate call initiation and call termination process in case of GSM system.

Q.3 Answer any two: **12**

a) Draw GSM architecture and describe different terms and their operations associated with GSM.

b) Elaborate GPRS architecture to enable packet data access in TDMA.

c) Consider total 40 channels available and cluster size of 4 is repeated 10 times to cover certain area, find total capacity of mobile network. What is the effect of interference in mobile communication? How the effect of interference can be reduced?

Section – II

Q.4 Answer any four. **16**

a) Differentiate between Bluetooth and wireless PAN standard.

b) What is Hidden & Exposed Terminal Problem in mobile network? How this problem can be resolved.

c) Describe architecture of infrastructure and ad-hoc networks.

d) What is tunneling? What is its requirement?

e) With suitable example describe concept of piconet and scatternet.

Q.5 Answer any two. **12**

a) What is Wi-Fi standard? Explain different types of Wi-Fi standards.

b) Draw protocol stack of Bluetooth and describe its operation.

c) How packet data is transferred from fixed node to a mobile node presently available in foreign network.

MCQ/Objective Type Questions

Duration: 30 Minutes Marks:14

Q.1 Choose the correct Answer. **14**

1) If n-transistor conducts and has large voltage between source and drain, then it is said to be in _____ region.
a) linear b) saturation
c) non saturation d) cut-off

2) In the region where inverter exhibits gain, the two transistors are in _____ region.
a) linear b) cut-off
c) non saturation d) saturation

3) Why the PUN is constructed using PMOS devices?
a) PMOS transistors produce "strong zeros".
b) PMOS transistors produce "strong ones".
c) PMOS transistors produce "high impedance".
d) None of the mentioned

4) In the positive latch, the D input is selected when clock is _____, and the output is held (using feedback) when clock is _____.
a) Low, high b) High, high
c) Low, low d) High, low

5) Increasing fan-out _____ the propagation delay.
a) increases b) decreases
c) does not affect d) exponentially decreases

6) Which of the following approaches may be used to reduce a delay in large fan-in circuits?
a) Transistor Sizing b) Progressive Transistor Sizing
c) Input Re-Ordering d) All of the above

7) A stored value remains valid as long as the supply voltage is applied to the circuit, hence the name _____.
a) Static b) Dynamic
c) Flip-flop d) Latch

8) What is the standard form of C^2MOS?
a) Common CMOS Register b) CMOS Clocked Register
c) Clocked CMOS Register d) None of these

9) In input Re-Ordering mechanism putting the critical-path transistors closer to the output of the gate can result in a _____
a) Speedup b) Voltage
c) Current d) Output impedance

10) When the pass transistor pulls a node high, the output only charges up to _____.
a) VDD – VTn b) VDD + VTn
c) VDD – VTp d) VDD + VTp

11) Static memories use _____ to create a bistable circuit _____ a circuit having two stable states that represent 0 and 1.
a) negative feedback b) no feedback
c) positive feedback d) all of these

12) Clocked sequential circuits are _____.
a) two phase overlapping clock
b) two phase non overlapping clock
c) four phase overlapping clock
d) four phase non overlapping clock

13) In Differential Cascade Voltage Switch Logic (or DCVSL), the pull-down networks PDN1 and PDN2 use NMOS devices and are _____.
a) mutually not exclusive
b) Both PDN1 and PDN2 turn ON at the same time
c) mutually exclusive
d) Both PDN1 and PDN2 turn OFF at the same time

14) The drain current is varied by: _____.
a) Gate to source voltage b) Gate current
c) Source Voltage d) None of the mentioned

Fourth. Y. (B. Tech) (Sem-I) (New) (CBCS) Examination: March/April-2025
ELECTRONICS ENGINEERING
CMOS VLSI Design (BTN04706)

Day & Date: Thursday 05-June-2025 Max. Marks: 56
Time: 03:00 PM To 06:00 PM

Instructions: 1) All questions are compulsory.
2) Figures to the right indicate full marks.
3) Assume suitable data wherever necessary.

Section – I

Q.2 Solve: (Any Four) **16**

a) Explain in detail I-V characteristics of n-MOS transistor.
b) Draw the MOS Diffusion Capacitance Model and Explain the effective capacitance.
c) Explain Static and dynamic power Dissipation. Derive an expression for total power dissipation.
d) Implement Dynamic CMOS 2 input NAND Gate.
Gate and justify the implementation.
e) How Dynamic CMOS Logic is used in CMOS Design explain using example?

Q.3 Solve: (Any Two) **12**

a) Design and comment on number of transistors and power dissipation of Static CMOS 2 input NAND Gate and Ratioed Logic 2 input NAND Gate.
b) Discuss the any two approaches to be used to reduce delays in large fan-in circuits.
c) Synthesis compliment of A = P + Q + (B . C) Using complementary CMOS logic and justify it.

Section – II

Q.4 Solve: (Any Four) **16**

a) What is transmission gate? How it is used to implement Latch.
b) With help of diagram explain SR Latch implementation using CMOS Logic devices.
c) What is dynamic latch or register? How it operates?
d) Explain timing classification in interconnect design.
e) List different fast adder circuits and explain any one in detail.

Q.5 Solve: (Any Two) **12**

a) What is multiplexer based latch? Explain the use of multiplexer based latch to implement D Latch.

b) Explain briefly Plesiochronous interconnect and Asynchronous interconnect

c) What is synchronous design? What are the challenges in synchronous design?

Seat No.	

Set **Q**

Fourth. Y. (B. Tech) (Sem-I) (New) (CBCS) Examination: March/April-2025
ELECTRONICS ENGINEERING
CMOS VLSI Design (BTN04706)

Day & Date: Thursday 05-June-2025 Max. Marks: 70
Time: 03:00 PM To 06:00 PM

Instructions: 1) Q. No. 1 is compulsory. It should be solved in the first 30 minutes in Answer Book Page no 03 (Starting page of the Answer Book). Each question carries one mark.
2) Don't forget to Mention question paper set (P/Q/R/S) on top of page.
3) Figures to the right indicates full marks.
4) Assume suitable data wherever necessary.

MCQ/Objective Type Questions

Duration: 30 Minutes Marks:14

Q.1 Choose the correct Answer. **14**

1) What is the standard form of C^2MOS?
a) Common CMOS Register b) CMOS Clocked Register
c) Clocked CMOS Register d) None of these

2) In input Re-Ordering mechanism putting the critical-path transistors closer to the output of the gate can result in a _____
a) Speedup b) Voltage
c) Current d) Output impedance

3) When the pass transistor pulls a node high, the output only charges up to _____.
a) VDD – VTn b) VDD + VTn
c) VDD – VTp d) VDD + VTp

4) Static memories use _____ to create a bistable circuit _____ a circuit having two stable states that represent 0 and 1.
a) negative feedback b) no feedback
c) positive feedback d) all of these

5) Clocked sequential circuits are _____.
a) two phase overlapping clock
b) two phase non overlapping clock
c) four phase overlapping clock
d) four phase non overlapping clock

6) In Differential Cascade Voltage Switch Logic (or DCVSL), the pull-down networks PDN1 and PDN2 use NMOS devices and are _____.
a) mutually not exclusive
b) Both PDN1 and PDN2 turn ON at the same time
c) mutually exclusive
d) Both PDN1 and PDN2 turn OFF at the same time

7) The drain current is varied by: _____.
a) Gate to source voltage b) Gate current
c) Source Voltage d) None of the mentioned

8) If n-transistor conducts and has large voltage between source and drain, then it is said to be in _____ region.
a) linear b) saturation
c) non saturation d) cut-off

9) In the region where inverter exhibits gain, the two transistors are in _____ region.
a) linear b) cut-off
c) non saturation d) saturation

10) Why the PUN is constructed using PMOS devices?
a) PMOS transistors produce “strong zeros”.
b) PMOS transistors produce "strong ones”.
c) PMOS transistors produce “high impedance”.
d) None of the mentioned

11) In the positive latch, the D input is selected when clock is _____, and the output is held (using feedback) when clock is _____.
a) Low, high b) High, high
c) Low, low d) High, low

12) Increasing fan-out _____ the propagation delay.
a) increases b) decreases
c) does not affect d) exponentially decreases

13) Which of the following approaches may be used to reduce a delay in large fan-in circuits?
a) Transistor Sizing b) Progressive Transistor Sizing
c) Input Re-Ordering d) All of the above

14) A stored value remains valid as long as the supply voltage is applied to the circuit, hence the name _____.
a) Static b) Dynamic
c) Flip-flop d) Latch

2) Don't forget to Mention question paper set (P/Q/R/S) on top of page.
3) Figures to the right indicates full marks.
4) Make suitable assumptions (if necessary and state them clearly).

MCQ/Objective Type Questions

Duration: 30 Minutes Marks: 14

Q.1 Choose the correct alternatives from the options and rewrite the sentence. **14**

1) Which of the following application uses voltage to current converter?
a) Low voltage dc and ac voltmeter
b) Diode match finding
c) Light emitting diode
d) All of the mentioned

2) Which of the following is not of importance when a conveyor is designed?
a) Type of industry where the conveyor is being used
b) Type of material being carried by the conveyor
c) Cost
d) Length of travel of the conveyor

3) What do you mean by 'Conveyor control'?
a) Controlling the material flow, according to conveyor speed, to reduce power consumption
b) Controlling the conveyor speed, according to material flow, manually
c) Controlling the material flow, according to conveyor speed manually or using feedback drives
d) Controlling the conveyor speed, according to material flow to, reduce power consumption

4) Based on how binary information is entered or shifted out, shift registers are classified into _____ categories.
a) 2 b) 3
c) 4 d) 5

5) The PLC is used in _____.
a) machine tools
b) automated assembly equipment
c) moulding and extrusion machines
d) all of the above

6) Noise reduction techniques should be utilized to avoid interfering voltages that might be otherwise generated in the system.
a) True b) False

7) The objective of process control is to keep key process operating parameters within narrow bounds of the _____.
a) reference value b) spot
c) pith d) inception point

8) The most popular language for PLCs is: _____.
a) Ladder diagram b) C++
c) OOP+ d) VHDL

9) Very often relays and valves are connected to _____.
a) Input modules b) Output modules
c) Any of these d) None of the above

10) PLCs that have a fixed amount of I/O capability built into the unit are known as PLCs that have a fixed amount of I/O capability built into the unit are known as: _____.
a) Rack PLCs b) Monolithic PLCs
c) Modular PLCs d) None of these

11) Voltage to current converter is also called as _____.
a) Current series positive feedback amplifier
b) Voltage series negative feedback amplifier
c) Current series negative feedback amplifier
d) Voltage series positive feedback amplifier

12) In PLC programming, a retentive function is one that: _____.
a) defaults to the “on” state
b) comes last in the program
c) defaults to the “off” state
d) is not reset after a power cycle

13) Ladder logic programming consists primarily of: _____.
a) virtual relay contacts and coils
b) logic gate symbols with connecting lines
c) function blocks with connecting lines
d) text-based code
e) Hieroglyphics

14) The _____ of metals is a function of temperature and increases with increasing temperature.

a) Coefficient of material
b) Resistance
c) Conductivity
d) Kappa

c) function blocks with connecting lines
d) text-based code
e) Hieroglyphics

4) The _____ of metals is a function of temperature and increases with increasing temperature.
a) Coefficient of material b) Resistance
c) Conductivity d) Kappa

5) Which of the following application uses voltage to current converter?
a) Low voltage dc and ac voltmeter
b) Diode match finding
c) Light emitting diode
d) All of the mentioned

6) Which of the following is not of importance when a conveyor is designed?
a) Type of industry where the conveyor is being used
b) Type of material being carried by the conveyor
c) Cost
d) Length of travel of the conveyor

7) What do you mean by 'Conveyor control'?
a) Controlling the material flow, according to conveyor speed, to reduce power consumption
b) Controlling the conveyor speed, according to material flow, manually
c) Controlling the material flow, according to conveyor speed manually or using feedback drives
d) Controlling the conveyor speed, according to material flow to, reduce power consumption

8) Based on how binary information is entered or shifted out, shift registers are classified into _____ categories.
a) 2 b) 3
c) 4 d) 5

9) The PLC is used in _____.
a) machine tools
b) automated assembly equipment
c) moulding and extrusion machines
d) all of the above

10) Noise reduction techniques should be utilized to avoid interfering voltages that might be otherwise generated in the system.
a) True b) False

11) The objective of process control is to keep key process operating parameters within narrow bounds of the _____.
a) reference value b) spot
c) pith d) inception point

12) The most popular language for PLCs is: _____.
a) Ladder diagram b) C++
c) OOP+ d) VHDL

13) Very often relays and valves are connected to _____.
a) Input modules b) Output modules
c) Any of these d) None of the above

14) PLCs that have a fixed amount of I/O capability built into the unit are known as PLCs that have a fixed amount of I/O capability built into the unit are known as: _____.

a) Rack PLCs
b) Monolithic PLCs
c) Modular PLCs
d) None of these

Set R

Fourth. Y. (B. Tech.) (Sem-I) (New) (CBCS) Examination: March/April-2025
ELECTRONICS ENGINEERING
PLC and Industrial Controllers (BTN04707)

Day & Date: Thursday, 05-June-2025 Max. Marks: 56
Time: 03:00 PM To 06:00 PM

Instructions: 1) All questions are compulsory.
2) Figures to the right indicate full marks.
3) Make suitable assumptions (if necessary and state them clearly).

SECTION – I

Q.2 Answer the following questions: (Any Four) **16**
a) Explain the function of ON-OFF delay timer.
b) Explain sequential function charts with suitable example.
c) Draw and explain the ladder diagrams of basic gates using two inputs.
d) Explain in detail subroutines used in PLC.
e) Draw and explain instruction list programming method using in PLC.

Q.3 Answer the following questions: (Any Two) **12**
a) What is Central heating system? Explain in detail.
b) Draw and explain applications of internal relay used in PLC.
c) State & explain the shift register with ladder diagram.

SECTION – II

Q.4 Answer the following questions: (Any Four) **16**
a) Compare between PI & PD controller.
b) Compare between hydraulic actuation system, pneumatic actuators.
c) What is P controller? Explain with mathematical model.
d) Explain the working of pressure sensor with suitable example.
e) Write short note on temperature sensors.

Q.5 Answer the following questions: (Any Two) **12**
a) Explain the advantages, disadvantages of PI, PD & PID controllers.
b) Explain different types of actuators with suitable example.
c) Explain Data Acquisition System using microcontrollers.

Seat No.		Set	S

Fourth. Y. (B. Tech.) (Sem-I) (New) (CBCS) Examination: March/April-2025
ELECTRONICS ENGINEERING
PLC and Industrial Controllers (BTN04707)

Day & Date: Thursday, 05-June-2025 Max. Marks: 70
Time: 03:00 PM To 06:00 PM

Instructions: 1) Q. No. 1 is compulsory. It should be solved in the first 30 minutes in Answer Book Page No. 03 (Starting page of the Answer Book). Each question carries one mark.
2) Don't forget to Mention question paper set (P/Q/R/S) on top of page.
3) Figures to the right indicates full marks.
4) Make suitable assumptions (if necessary and state them clearly).

MCQ/Objective Type Questions

Duration: 30 Minutes Marks: 14

Q.1 Choose the correct alternatives from the options and rewrite the sentence. **14**

1) Noise reduction techniques should be utilized to avoid interfering voltages that might be otherwise generated in the system.
a) True b) False

2) The objective of process control is to keep key process operating parameters within narrow bounds of the _____.
a) reference value b) spot
c) pith d) inception point

3) The most popular language for PLCs is: _____.
a) Ladder diagram b) C++
c) OOP+ d) VHDL

4) Very often relays and valves are connected to _____.
a) Input modules b) Output modules
c) Any of these d) None of the above

5) PLCs that have a fixed amount of I/O capability built into the unit are known as PLCs that have a fixed amount of I/O capability built into the unit are known as: _____.
a) Rack PLCs b) Monolithic PLCs
c) Modular PLCs d) None of these

6) Voltage to current converter is also called as _____.
a) Current series positive feedback amplifier
b) Voltage series negative feedback amplifier
c) Current series negative feedback amplifier
d) Voltage series positive feedback amplifier

7) In PLC programming, a retentive function is one that: _____.
a) defaults to the “on” state
b) comes last in the program
c) defaults to the “off” state
d) is not reset after a power cycle

8) Ladder logic programming consists primarily of: _____.
a) virtual relay contacts and coils
b) logic gate symbols with connecting lines
c) function blocks with connecting lines
d) text-based code
e) Hieroglyphics

9) The _____ of metals is a function of temperature and increases with increasing temperature.
a) Coefficient of material
b) Resistance
c) Conductivity
d) Kappa

10) Which of the following application uses voltage to current converter?
a) Low voltage dc and ac voltmeter
b) Diode match finding
c) Light emitting diode
d) All of the mentioned

11) Which of the following is not of importance when a conveyor is designed?
a) Type of industry where the conveyor is being used
b) Type of material being carried by the conveyor
c) Cost
d) Length of travel of the conveyor

12) What do you mean by ‘Conveyor control’?
a) Controlling the material flow, according to conveyor speed, to reduce power consumption
b) Controlling the conveyor speed, according to material flow, manually
c) Controlling the material flow, according to conveyor speed manually or using feedback drives
d) Controlling the conveyor speed, according to material flow to, reduce power consumption

13) Based on how binary information is entered or shifted out, shift registers are classified into _____ categories.
a) 2
b) 3
c) 4
d) 5

14) The PLC is used in _____.

a) machine tools
b) automated assembly equipment
c) moulding and extrusion machines
d) all of the above

4) Make suitable assumptions (if necessary and state them clearly).

MCQ/Objective Type Questions

Duration: 30 Minutes Marks:14

Q.1 Choose the correct Answer. **14**

1) What is a primary objective of the software development process?
a) Generating user documentation
b) Meeting customer requirements
c) Reducing development costs
d) Enhancing project timelines

2) What is the primary goal of the Time Boxing model?
a) Minimizing development costs
b) Maximizing customer involvement
c) Controlling project duration
d) Improving code quality

3) Why is involving end-users in the requirement gathering process important?
a) To reduce project costs
b) To avoid documenting requirements
c) To complete the requirement process quickly
d) To get insights into the system's intended use and needs

4) What does a use case diagram represent in software engineering?
a) The flow of data in the system
b) The functionalities and interactions of the system with its users
c) The system's database structure
d) The system's performance metrics

5) Which design principle encourages extending the functionality of software module without modifying its source code?
a) Open Closed Principle b) Coupling
c) Cohesion d) Functional Design

6) Which design level focuses on refining the high-level design and making it more detailed and specific?

a) Conceptual Design b) High-Level Design
c) Detailed Design d) Technical Design

7) In design, what is the significance of "coupling"?

a) It refers to the strength of the relationship between software components
b) It refers to how well a component performs its intended function
c) It refers to the number of functions within a software component
d) It refers to the number of software components

8) What type of testing examines the software from the user's perspective without knowledge of its internal structure?

a) Black-box testing b) White-box testing
c) Functional testing d) System testing

9) What is the primary goal of software testing?

a) To find and fix bugs in the software
b) To design the software architecture
c) To write the initial code for the software
d) To create software documentation

10) What is the focus of "quality planning" in project management?

a) Identifying project risks
b) Planning for quality throughout the project
c) Identifying project requirements
d) Planning for project staffing

11) In project management, what does "staffing" primarily involve?

a) Allocating tasks to team members
b) Setting the project budget
c) Defining the project scope
d) Identifying potential risks

12) What does APM stand for in project management?

a) Agile Project Management
b) Advanced Project Metrics
c) Automated Project Management
d) Associated Project Methodology

13) What is a fundamental aspect of Agile methodologies like Scrum?

a) Extensive upfront planning
b) Fixed scope and requirements
c) Iterative cycles of work and continuous feedback
d) Linear progression of project phases

14) Which toolkit is often utilized to enhance project management efficiency and effectiveness?

a) Gantt Chart
b) APM Toolkit
c) RACI Matrix
d) SWOT Analysis

SECTION – I

Q.2 Attempt: (Any Four) **16**

a) What is Software Engineering? Explain the steps involved in Software Development Life Cycle.

b) How time boxing model is useful in Software Development explain with help of example.

c) How Software Requirement Specification (SRS) document is important in Software Development explain with help of Characteristics of SRS.

d) With the help of Use case diagram explain Online commerce business model.

e) Explain the role of software architecture in the development of complex software systems. Discuss the key responsibilities and goals of software architects.

f) Explain the "Open Closed Principle" in software design and why it's essential for creating flexible and extensible software.

Q.3 Attempt: (Any Two) **12**

a) The Training Institute is in process of developing new student management software from Company PQR. With the help of Use case diagram explain Module of Student enrollment in the Course.

b) Explain the concept of "component and connector view" in software architecture and why it's important to visualize how different parts of the software connect.

c) With the help of example and neat diagram explain how Prototype Model is used in software development.

SECTION – II

Q.4 Attempt: (Any Four) **16**

a) What are the levels of Testing and illustrate its importance at every level?

b) Explain the concepts of black-box testing and white-box testing.

c) Differentiate between Procedural and Quantitative Approaches of Quality Planning.

d) Discuss risk management planning in software engineering projects. Explain the process of identifying, analyzing, and mitigating risks throughout the project lifecycle.

e) How the "iterative project management life cycle" works and why it is beneficial for managing projects?

f) Explain the role of the "APM Toolkit" in Agile Project Management and how it helps in managing projects efficiently.

Q.5 Attempt: (Any Two) **12**

a) What are Test Cases and Test Criteria? Prepare the test cases used for testing of User Authentication Page.

b) You are working as Software Development Team member illustrate with help of example following Terminologies used in the Agile Project Management.

1) Sprint
2) Sprint review
3) Scrum Master
4) Backlog
5) Sprint retrospective
6) Product Owner

c) With help of example explain Project management process.

10) What is a primary objective of the software development process?
a) Generating user documentation
b) Meeting customer requirements
c) Reducing development costs
d) Enhancing project timelines

11) What is the primary goal of the Time Boxing model?
a) Minimizing development costs
b) Maximizing customer involvement
c) Controlling project duration
d) Improving code quality

12) Why is involving end-users in the requirement gathering process important?
a) To reduce project costs
b) To avoid documenting requirements
c) To complete the requirement process quickly
d) To get insights into the system's intended use and needs

13) What does a use case diagram represent in software engineering?
a) The flow of data in the system
b) The functionalities and interactions of the system with its users
c) The system's database structure
d) The system's performance metrics

14) Which design principle encourages extending the functionality of software module without modifying its source code?

a) Open Closed Principle
b) Coupling
c) Cohesion
d) Functional Design

SLR-BD-436

Seat No.		Set	S

Fourth. Y. (B. Tech) (Sem-I) (New) (CBCS) Examination: March/April-2025
ELECTRONICS ENGINEERING
Software Engineering (BTN04708)

Day & Date: Thursday, 05-June-2025 Max. Marks: 56
Time: 03:00 PM To 06:00 PM

Instructions: 1) All questions are compulsory.
2) Figures to the right indicate full marks.
3) Make suitable assumptions (if necessary and state them clearly).
4) Draw neat diagrams.

SECTION – I

Q.2 Attempt: (Any Four) **16**

a) What is Software Engineering? Explain the steps involved in Software Development Life Cycle.

b) How time boxing model is useful in Software Development explain with help of example.

c) How Software Requirement Specification (SRS) document is important in Software Development explain with help of Characteristics of SRS.

d) With the help of Use case diagram explain Online commerce business model.

e) Explain the role of software architecture in the development of complex software systems. Discuss the key responsibilities and goals of software architects.

f) Explain the "Open Closed Principle" in software design and why it's essential for creating flexible and extensible software.

Q.3 Attempt: (Any Two) **12**

a) The Training Institute is in process of developing new student management software from Company PQR. With the help of Use case diagram explain Module of Student enrollment in the Course.

b) Explain the concept of "component and connector view" in software architecture and why it's important to visualize how different parts of the software connect.

c) With the help of example and neat diagram explain how Prototype Model is used in software development.

SECTION – II

Q.4 Attempt: (Any Four) **16**

a) What are the levels of Testing and illustrate its importance at every level?

b) Explain the concepts of black-box testing and white-box testing.

c) Differentiate between Procedural and Quantitative Approaches of Quality Planning.

d) Discuss risk management planning in software engineering projects. Explain the process of identifying, analyzing, and mitigating risks throughout the project lifecycle.

e) How the "iterative project management life cycle" works and why it is beneficial for managing projects?

f) Explain the role of the "APM Toolkit" in Agile Project Management and how it helps in managing projects efficiently.

Q.5 Attempt: (Any Two) **12**

a) What are Test Cases and Test Criteria? Prepare the test cases used for testing of User Authentication Page.

b) You are working as Software Development Team member illustrate with help of example following Terminologies used in the Agile Project Management.

1) Sprint
2) Sprint review
3) Scrum Master
4) Backlog
5) Sprint retrospective
6) Product Owner

c) With help of example explain Project management process.

Fourth. Y. (B. Tech) (Sem-I) (New) (CBCS) Examination: March/April-2025
ELECTRONICS ENGINEERING
Data Science - Business Intelligence (BTN04712)

Day & Date: Friday 06-June-2025 Max. Marks: 70
Time: 03:00 PM To 06:00 PM

Instructions: 1) Q. No. 1 is compulsory. It should be solved in the first 30 minutes in Answer Book Page no 03 (Starting page of the Answer Book). Each question carries one mark.
2) Don't forget to Mention question paper set (P/Q/R/S) on top of page.
3) Assume suitable data if necessary.

MCQ/Objective Type Questions

Duration: 30 Minutes Marks:14

Q.1 Choose the correct Answer. **14**

1) Information is transformed into _____ when it is used to make decisions and develop the corresponding actions.
a) data b) outcome
c) knowledge d) experience

2) In BI architecture, ETL stands for _____.
a) Evaluate, Transfer, Load b) Extract, Transform, Load
c) Execute, Translate, Launch d) Explore, Test, Learn

3) A decision-making system is primarily designed to: _____.
a) Solve structured problems only
b) Automate all business processes
c) Support structured, semi-structured, and unstructured decisions
d) Replace human decision-makers

4) Depending on scope, decisions can be classified as strategic, tactical and _____.
a) Accurate b) Operational
c) Sequential d) Procedural

5) Which of the following is NOT an application of data mining?
a) Fraud detection b) Predicting customer behavior
c) Data cleaning d) Market segmentation

6) Full form of OLAP: _____.
a) Online analytical process b) Online analog process
c) Online anal process d) Online analogy process

7) The star schema in a data warehouse typically represents: _____.
a) Unstructured data storage
b) A central fact table connected to dimension tables
c) A multidimensional OLAP cube
d) A transactional database

8) Which methodology is commonly used in Six Sigma for problem-solving?
a) ETL
b) DMAIC
c) OLAP
d) SCRUM

9) What does the financial perspective of the Balanced Scorecard focus on?
a) Employee training and development
b) Profitability, revenue growth, and cost management
c) Customer satisfaction metrics
d) Operational efficiency improvements

10) In a marketing case study, the concept of CLV (Customer Lifetime Value) refers to: _____.
a) The total cost of acquiring a customer
b) The duration of a marketing campaign
c) The average transaction size per customer
d) The projected revenue from a customer over their lifetime

11) Relational marketing focuses on: _____.
a) Increasing product prices to maximize profits
b) Building and maintaining long-term relationships with customers
c) Developing standalone marketing campaigns
d) Selling products through unrelated channels

12) Which of the following is not an optimization model?
a) Extra Capacity
b) Multiple Plants
c) Backlogging
d) Maximum Fixed Cost

13) Revenue management relies heavily on which of the following tools for market segmentation?
a) ERP software
b) Data mining models
c) Physical surveys
d) Infinite loop analysis

14) What does backlogging in logistic systems involve?
a) Pre-producing goods to meet future demand
b) Delaying a portion of demand fulfillment to a later period
c) Canceling all unfulfilled orders
d) Increasing inventory costs to meet demand

Time: 03:00 PM To 06:00 PM

Instructions: 1) All questions are compulsory.
2) Figures to the right indicate full marks.
3) Assume suitable data if necessary.

Section – I

Q.2 Answer the following question: (Any Four) **16**

a) Explain the role of mathematical models in BI systems.
b) Trace the evolution of information systems and explain how each stage contributed to modern decision-making tools.
c) Differentiate between data warehouses and data marts.
d) Elaborate the structured, unstructured and semi- structured types of decision according to their nature in a decision making process.
e) Describe the significance of making timely and effective decisions.

Q.3 Answer the following question: (Any Two) **12**

a) Explain the data mining process in detail and illustrate it with an appropriate diagram, highlighting its key steps and methodologies.
b) Explain the components of a Business Intelligence (BI) architecture in detail, and illustrate them with a clear diagram.
c) Describe the phases involved in the development of mathematical models for decision making, providing a detailed explanation of each phase.

Section – II

Q.4 Answer the following question: (Any Four) **16**

a) Explain the concept of supply chain optimization and its significance in logistics.
b) What are the four perspectives that balanced scorecard (BSC) suggests to use to view organizational performance?
c) List and describe the three major categories of business reports.
d) Explain relational marketing and discuss how it contributes to developing and maintaining customer relationships.
e) What is a revenue management system (RMS), and how does it support businesses in maximizing their revenue through dynamic pricing and inventory management?

Q.5 Answer the following question: (Any Two) **12**

a) Describe tactical planning and backlogging in context to optimization models for logistic planning.

b) Describe the basic charts and graphs used in data visualization with examples of situations where each type of chart is most effective.

c) What is salesforce management? Elaborate the decision process in salesforce management with suitable diagram.

MCQ/Objective Type Questions

Duration: 30 Minutes Marks:14

Q.1 Choose the correct Answer. **14**

1) What is the AWS Well-Architected Framework used for?
a) AWS data analytics platform
b) Evaluating the security posture of AWS customers
c) Designing, building, and maintaining secure and efficient infrastructure for applications
d) AWS machine learning services

2) Which AWS service provides on-demand, scalable compute capacity in the cloud?
a) Amazon S3 b) Amazon RDS
c) Amazon EC2 d) Amazon Redshift

3) What AWS service helps manage and automate the deployment of applications across multiple Amazon EC2 instances?
a) Amazon S3 b) Amazon RDS
c) AWS Elastic Beanstalk d) Amazon DynamoDB

4) Which AWS Well-Architected Framework pillar emphasizes the importance of efficiently using resources to reduce costs without sacrificing performance?
a) Cost Optimization b) Operational Excellence
c) Reliability d) Performance Efficiency

5) What is the primary objective of the Performance Efficiency pillar in the AWS Well-Architected Framework?
a) Minimizing costs
b) Ensuring high availability
c) Achieving optimal system performance
d) Maximizing security

6) Which AWS Well-Architected Framework pillar focuses on the ability to recover from infrastructure or service failures and dynamically scale to meet demand?

a) Security
b) Cost Optimization
c) Reliability
d) Performance Efficiency

7) What is the main focus of the Operational Excellence pillar in the AWS Well-Architected Framework?

a) Ensuring high availability of resources
b) Optimizing and automating processes
c) Security and compliance
d) Cost optimization

8) In cloud security, Infrastructure Protection focuses on: _____.

a) Managing user access
b) Protecting the physical data centers
c) Detecting and responding to security incidents
d) Protecting the cloud infrastructure from attacks and vulnerabilities

9) What does Foundations address within the AWS Well-Architected Framework for Reliability?

a) Building the architectural base for workloads
b) Managing changes to the workload
c) Monitoring workload performance
d) Handling operational issues

10) What is the primary role of Foundations in ensuring Reliability within the AWS Well-Architected Framework?

a) Building a strong architectural base for your workloads
b) Managing workload changes
c) Monitoring performance and efficiency
d) Addressing operational issues

11) In the context of the AWS Well-Architected Framework, what is Failure Mode Analysis used for?

a) Identifying potential system failures
b) Ignoring system failures
c) Maximizing system performance
d) Reducing costs

12) Which aspect of Reliability focuses on the ability to quickly recover from failures, ensuring minimal service disruptions?

a) Foundations
b) Workload Architecture
c) Change Management
d) Resiliency

13) Cloud cost optimization is a process that involves: _____.

a) Increasing your cloud expenses
b) Minimizing cloud resource usage
c) Achieving the best value for your cloud investment
d) Eliminating cloud services

14) Which of the following cloud financial management practices focuses on selecting the most cost-effective cloud resources for your specific requirements?

a) Review
b) Trade Offs
c) Cost Optimization
d) Selection

Section – I

Q.2 Answer the following questions. (Any Three) **12**

a) How does AWS contribute to the scalability of applications?

b) Provide an in-depth introduction to Amazon Web Services (AWS) and its evolution in the cloud computing industry. Include some key milestones in AWS's history.

c) How does the AWS Well-Architected Framework address Performance Efficiency? Provide recommendations for optimizing performance in AWS.

d) What are the primary considerations and strategies for achieving Cost Optimization within the AWS Well-Architected Framework?

Q.3 Answer the following questions. (Any Two) **16**

a) Describe the process of selecting an appropriate AWS region for hosting applications. Consider factors like latency, compliance, and data sovereignty.

b) How can organizations strike a balance between innovation and stability in cloud operations while pursuing Operational Excellence?

c) Provide examples of tools and technologies that can assist organizations in managing and optimizing their cloud operations efficiently.

Section – II

Q.4 **Answer the following questions. (Any Three)** **12**

a) In the context of cloud security, what does "Incident Response" entail, and why is it crucial for organizations? Provide an overview of the incident response process.

b) Discuss the role of access controls and permissions in maintaining a secure cloud environment. How can organizations implement the principle of least privilege effectively?

c) Explain how workload architecture plays a crucial role in achieving reliability in a cloud environment. What are some architectural best practices?

d) How does regular performance review and monitoring contribute to maintaining a high level of Performance Efficiency in cloud-based systems?

Q.5 **Answer the following questions. (Any Two)** **16**

a) What are some common challenges organizations face when striving for reliability in cloud-based systems, and how can these challenges be mitigated?

b) Provide real-world examples of organizations that have successfully achieved high reliability in their cloud-based systems. What strategies and practices did they implement to achieve this?

c) Provide examples of cost-effective cloud resources and services that organizations can leverage to optimize their performance while minimizing costs.

Fourth. Y. (B. Tech) (Sem-I) (New) (CBCS) Examination: March/April-2025
ELECTRONICS ENGINEERING
IOT- Architecting IOT Solutions (BTN04714)

Day & Date: Friday 06-June-2025 Max. Marks: 70
Time: 03:00 PM To 06:00 PM

Instructions: 1) Q. No. 1 is compulsory. It should be solved in the first 30 minutes in Answer Book Page no 03 (Starting page of the Answer Book). Each question carries one mark.
2) Don't forget to Mention question paper set (P/Q/R/S) on top of page.
3) Figures to right indicates full marks.

MCQ/Objective Type Questions

Duration: 30 Minutes Marks:14

Q.1 Choose the correct Answer. **14**

1) In cloud security, Infrastructure Protection focuses on: _____.
a) Managing user access
b) Protecting the physical data centers
c) Detecting and responding to security incidents
d) Protecting the cloud infrastructure from attacks and vulnerabilities

2) What does Foundations address within the AWS Well-Architected Framework for Reliability?
a) Building the architectural base for workloads
b) Managing changes to the workload
c) Monitoring workload performance
d) Handling operational issues

3) What is the primary role of Foundations in ensuring Reliability within the AWS Well-Architected Framework?
a) Building a strong architectural base for your workloads
b) Managing workload changes
c) Monitoring performance and efficiency
d) Addressing operational issues

4) In the context of the AWS Well-Architected Framework, what is Failure Mode Analysis used for?
a) Identifying potential system failures
b) Ignoring system failures
c) Maximizing system performance
d) Reducing costs

5) Which aspect of Reliability focuses on the ability to quickly recover from failures, ensuring minimal service disruptions?

a) Foundations
b) Workload Architecture
c) Change Management
d) Resiliency

6) Cloud cost optimization is a process that involves: _____.

a) Increasing your cloud expenses
b) Minimizing cloud resource usage
c) Achieving the best value for your cloud investment
d) Eliminating cloud services

7) Which of the following cloud financial management practices focuses on selecting the most cost-effective cloud resources for your specific requirements?

a) Review
b) Trade Offs
c) Cost Optimization
d) Selection

8) What is the AWS Well-Architected Framework used for?

a) AWS data analytics platform
b) Evaluating the security posture of AWS customers
c) Designing, building, and maintaining secure and efficient infrastructure for applications
d) AWS machine learning services

9) Which AWS service provides on-demand, scalable compute capacity in the cloud?

a) Amazon S3
b) Amazon RDS
c) Amazon EC2
d) Amazon Redshift

10) What AWS service helps manage and automate the deployment of applications across multiple Amazon EC2 instances?

a) Amazon S3
b) Amazon RDS
c) AWS Elastic Beanstalk
d) Amazon DynamoDB

11) Which AWS Well-Architected Framework pillar emphasizes the importance of efficiently using resources to reduce costs without sacrificing performance?

a) Cost Optimization
b) Operational Excellence
c) Reliability
d) Performance Efficiency

12) What is the primary objective of the Performance Efficiency pillar in the AWS Well-Architected Framework?

a) Minimizing costs
b) Ensuring high availability
c) Achieving optimal system performance
d) Maximizing security

13) Which AWS Well-Architected Framework pillar focuses on the ability to recover from infrastructure or service failures and dynamically scale to meet demand?

a) Security
b) Cost Optimization
c) Reliability
d) Performance Efficiency

14) What is the main focus of the Operational Excellence pillar in the AWS Well-Architected Framework?

a) Ensuring high availability of resources
b) Optimizing and automating processes
c) Security and compliance
d) Cost optimization

MCQ/Objective Type Questions

Duration: 30 Minutes Marks:14

Q.1 Choose the correct alternatives from the options and rewrite the sentence. **14**

1) Which control system does not have a stability problem?
a) Open loop system b) Closed loop system
c) Both a. and b. d) None of the above

2) A sensor, for an input of 12V gives a digital output of a word of 10 bits. Resolution approximately is _____.
a) 0.0417 V b) 0.0217 V
c) 0.0117 V d) None of the above

3) A controller is essentially _____.
a) Sensor b) Clipper
c) Comparator d) Amplifier

4) DC motor speed control can be achieved using _____.
a) PWM b) Frequency modulation
c) Amplitude Modulation d) None of these

5) Cam converts _____ to _____.
a) force, energy
b) rotary motion, oscillatory motion
c) kinetic energy, potential energy
d) potential energy, kinetic energy

6) Gear trains are mechanisms which are very widely used to transfer and transform _____.
a) rotational motion b) kinetic energy
c) potential energy d) force

7) The minimum increment in input to which the sensor can respond is referred to as _____.

a) accuracy b) efficiency
c) resolution d) speed

8) In PID controller _____ parameter is responsible for oscillation.

a) KP b) KD
c) PO d) KI

9) Selection of the suitable actuations principle depends on: _____.

a) requirement forces b) amount of motion needed
c) accuracy d) all of the above

10) _____is used to control the operations of electro-mechanical devices especially in tough and hazardous industrial environments.

a) Microprocessor b) PLC
c) Microcontroller d) None of the above

11) _____converts the physical quantity such as the force or displacement into an equivalent electrical signal in the form of voltage or current.

a) Sensors b) Actuators
c) Transducers d) Amplifiers

12) A mechanism that converts any source of energy into action is called _____.

a) Sensor b) Actuator
c) LEDs d) All the above

13) _____ is/are thermal energy measurement sensor.

a) Infrared sensors
b) Thermocouples
c) Semiconductor temperature sensors
d) All of the above

14) Closed loop control systems are _____.

i) More stable than open loop systems.
ii) More complex to design than open loop systems

a) Both i) and ii) are true b) i) is true and ii) is false
c) i) is false and ii) is true d) Both i) and ii) are false

4) Closed loop control systems are _____.
i) More stable than open loop systems.
ii) More complex to design than open loop systems
a) Both i) and ii) are true b) i) is true and ii) is false
c) i) is false and ii) is true d) Both i) and ii) are false

5) Which control system does not have a stability problem?
a) Open loop system b) Closed loop system
c) Both a. and b. d) None of the above

6) A sensor, for an input of 12V gives a digital output of a word of 10 bits. Resolution approximately is _____.

a) 0.0417 V b) 0.0217 V
c) 0.0117 V d) None of the above

7) A controller is essentially _____.

a) Sensor b) Clipper
c) Comparator d) Amplifier

8) DC motor speed control can be achieved using _____.

a) PWM b) Frequency modulation
c) Amplitude Modulation d) None of these

9) Cam converts _____ to _____.

a) force, energy
b) rotary motion, oscillatory motion
c) kinetic energy, potential energy
d) potential energy, kinetic energy

10) Gear trains are mechanisms which are very widely used to transfer and transform _____.

a) rotational motion b) kinetic energy
c) potential energy d) force

11) The minimum increment in input to which the sensor can respond is referred to as _____.

a) accuracy b) efficiency
c) resolution d) speed

12) In PID controller _____ parameter is responsible for oscillation.

a) KP b) KD
c) PO d) KI

13) Selection of the suitable actuations principle depends on: _____.

a) requirement forces b) amount of motion needed
c) accuracy d) all of the above

14) _____is used to control the operations of electro-mechanical devices especially in tough and hazardous industrial environments.

a) Microprocessor b) PLC
c) Microcontroller d) None of the above

Fourth. Y. (B. Tech) (Sem-II) (New)(CBCS) Examination: March/April-2025
ELECTRONICS ENGINEERING
Mechatronics (BTN04807)

Day & Date: Monday 26-05-2025 Max. Marks: 56
Time: 03:00 PM To 06:00 PM

Instructions: 1) All questions are compulsory.
2) Figures to the right indicate full marks.
3) Make suitable assumptions (if necessary and state them clearly).

SECTION – I

Q.2 Attempt any Four. **16**

a) What are the key elements of Mechatronics system?
b) Explain in detail the adaptive control system.
c) What are different parameters used to decide the performance of sensors?
d) How linear cylinder can be used to produce rotation?
e) Write a short note on process control valve.

Q.3 Attempt any Two. **12**

a) How directional control spool and poppet valves operates?
b) How displacement can be measured using LVDT?
c) Write a short note on: Light sensor, proximity switches.

SECTION – II

Q.4 Attempt any Four. **16**

a) Draw and explain the mechanisms of Ratchet and Pawl.
b) List down the differences between traditional design approach and mechatronics approach.
c) Draw and explain the working of Belt drives.
d) Write a short note on relays and solenoids.
e) Explain the speed control of stepper motor.

Q.5 Attempt any Two. **12**

a) Define the factors to be considered for selection of motor drive systems.
b) Explain hardware components in digital camera.
c) Draw and explain hydraulic power supply.

ELECTRONICS ENGINEERING
Mechatronics (BTN04807)

Day & Date: Monday 26-05-2025 Max. Marks: 70
Time: 03:00 PM To 06:00 PM

Instructions: 1) Q. No. 1 is compulsory. It should be solved in the first 30 minutes in Answer Book Page no 03 (Starting page of the Answer Book). Each question carries one mark.
2) Don't forget to Mention question paper set (P/Q/R/S) on top of page.
3) Figures to the right indicates full marks.
4) Make suitable assumptions (if necessary and state them clearly).

MCQ/Objective Type Questions

Duration: 30 Minutes Marks:14

Q.1 Choose the correct alternatives from the options and rewrite the sentence. **14**

1) Gear trains are mechanisms which are very widely used to transfer and transform _____.
a) rotational motion b) kinetic energy
c) potential energy d) force

2) The minimum increment in input to which the sensor can respond is referred to as _____.
a) accuracy b) efficiency
c) resolution d) speed

3) In PID controller _____ parameter is responsible for oscillation.
a) KP b) KD
c) PO d) KI

4) Selection of the suitable actuations principle depends on: _____.
a) requirement forces b) amount of motion needed
c) accuracy d) all of the above

5) _____is used to control the operations of electro-mechanical devices especially in tough and hazardous industrial environments.
a) Microprocessor b) PLC
c) Microcontroller d) None of the above

6) _____converts the physical quantity such as the force or displacement into an equivalent electrical signal in the form of voltage or current.
a) Sensors b) Actuators
c) Transducers d) Amplifiers

7) A mechanism that converts any source of energy into action is called _____.

a) Sensor b) Actuator
c) LEDs d) All the above

8) _____ is/are thermal energy measurement sensor.

a) Infrared sensors
b) Thermocouples
c) Semiconductor temperature sensors
d) All of the above

9) Closed loop control systems are _____.

i) More stable than open loop systems.
ii) More complex to design than open loop systems

a) Both i) and ii) are true b) i) is true and ii) is false
c) i) is false and ii) is true d) Both i) and ii) are false

10) Which control system does not have a stability problem?

a) Open loop system b) Closed loop system
c) Both a. and b. d) None of the above

MCQ/Objective Type Questions

Duration: 30 Minutes Marks:14

Q.1 Choose the correct alternatives from the options and rewrite the sentence. **14**

1) Which of the following best defines cloud computing?
a) A method of storing data on local servers
b) A technology that enables access to computing resources over the internet
c) A system for encrypting data on personal devices
d) A process for managing physical infrastructure in data centres.

2) Which of the following is an example of a cloud computing service model?
a) Virtual Private Network (VPN)
b) Software as a Service (SaaS)
c) Local Area Network (LAN)
d) Hypertext Transfer Protocol (HTTP)

3) In which deployment model are computing resources distributed between an organization's private infrastructure and a public cloud provider, allowing for flexibility and scalability?
a) Public cloud b) Private cloud
c) Hybrid cloud d) Edge cloud

4) Which cloud infrastructure component is responsible for processing and executing tasks, such as running applications and performing calculations?
a) Compute b) Storage
c) Networking d) Security

5) What is the primary function of a hypervisor in virtualization technology?
a) To manage containerized applications
b) To virtualize hardware and create multiple virtual machines (VMs)
c) To provide isolation for software applications
d) To automate software deployment processes

6) In cloud computing, what type of storage is suitable for storing large volumes of unstructured data, such as documents, images, and videos?
a) Object storage
b) Block storage
c) File storage
d) Database storage

7) Which architectural principle emphasizes the use of loosely coupled components and services to maximize flexibility and scalability in cloud applications?
a) Monolithic architecture
b) Microservices architecture
c) Client-server architecture
d) Peer-to-peer architecture

8) Which design pattern involves automatically adjusting the number of resources allocated to an application based on current demand to ensure optimal performance and cost efficiency?
a) Auto-scaling
b) Load balancing
c) Circuit breaker
d) Retry

9) In cloud-native application architecture, what is the purpose of containerization technologies such as Docker and Kubernetes?
a) To deploy virtual machines
b) To isolate and package application components with their dependencies
c) To manage database connections
d) To optimize network performance

10) What role does Kubernetes play in container orchestration?
a) Monitoring network traffic
b) Automating the deployment, scaling, and management of containers
c) Managing virtual machines
d) Encrypting data at rest

11) Which of the following is a best practice to enhance cloud security?
a) Sharing passwords across multiple accounts
b) Storing sensitive data in plain text format
c) Implementing multi-factor authentication
d) Granting unrestricted access to all users

12) In cloud service management, what is the purpose of resource tagging?

a) Identifying and tracking resources for billing and cost allocation
b) Securing access to cloud resources
c) Optimizing network performance
d) Monitoring resource availability and uptime

13) What does IoT stand for?

a) Internet of Technology
b) Internet of Things
c) Internet of Telecommunications
d) Internet of Transactions

14) Which of the following is a component of the IoT architecture?

a) Cloud Gateway
b) Data Center
c) Mobile Application
d) All of the above

Fourth.Y. (B. Tech.) (Sem-II) (New) (CBCS) Examination: March/April-2025
ELECTRONICS ENGINEERING
Electronic Instrumentation (BTN04802)

Day & Date: Wednesday 28-05-2025 Max. Marks: 50
Time: 03:00 PM To 05:00 PM

Instructions: 1) Q. No. 1 is compulsory. It should be solved in the first 20 minutes in answer book Page no 03 (Starting page of the Answer Book). Each question carries one mark.
2) Don't forget to Mention question paper set (P/Q/R/S) on top of page.
3) Figures to the right indicates full marks.
4) Assume suitable data if required and state it clearly.

MCQ/Objective Type Questions

Duration: 20 Minutes Marks: 10

Q.1 Choose the correct alternatives from the options. 10

1) Error is expressed as _____.
a) absolute error b) relative error
c) % error d) % accuracy

2) Error of measurement is the difference between _____.
a) True value & measured Value
b) Precision & True value
c) Measured Value & Precision
d) None of the above

3) Which of the following is not an advantage of implementing a quality system that conforms to ISO standards?
a) Improvement in employee involvement
b) Improvement in housekeeping
c) Improvement in customer satisfaction
d) Inefficient decision making

4) Which of the following cannot be considered a reason for implementing a quality system that conforms to ISO standards?
a) Improvement in safe working
b) Reduction in customer complaints
c) Increased inspection efforts
d) Decreased inspection efforts

5) A single channel data acquisition system consists of _____.
a) signal conditioner b) A/D converter
c) buffer d) All of the above

6) Spectrum Analyzer is time domain instrument.
a) True b) False

7) In FFT Spectrum Analyzer, the attenuator is used to _____.
a) reject unwanted signals
b) sets the level of the signals to be fed to the A/D converter
c) convert analog signals into digital signals
d) converts digital signals into analog signals

8) The full range of audibility in audio frequency oscillator is _____.
a) 0 to 20 Hz b) 20 Hz to 2 kHz
c) 20 Hz to 20 kHz d) 20 Hz to 20 MHz

9) In liquid crystal displays, the liquid crystal exhibits properties of _____.
a) Liquid b) Solids
c) Gases d) Both (a) and (b)

10) Data loggers contains microprocessor.
a) True b) False

Fourth.Y. (B. Tech.) (Sem-II) (New) (CBCS) Examination: March/April-2025
ELECTRONICS ENGINEERING
Electronic Instrumentation (BTN04802)

Day & Date: Wednesday 28-05-2025 Max. Marks: 40
Time: 03:00 PM To 05:00 PM

Instructions: 1) All questions are compulsory.
2) Figures to the right indicate full marks.
3) Make suitable assumptions (if necessary and state them clearly).

Section – I

Q.2 Solve: (Any Two) **08**

a) Explain operation of function generator with help of block diagram.
b) Compare LED & LCD display.
c) Explain static characteristic of electronic instruments.

Q.3 Solve: (Any Two) **12**

a) Explain operation of a Standard Indirect Frequency Synthesizer using swallow counter.
b) Explain construction, operation and dynamic behavior of permanent magnet moving coil mechanism.
c) Explain the various types of static errors encountered in measurements.

Section – II

Q.4 Solve: (Any Two) **08**

a) What is meant by Quality Control and Quality Assurance? Differentiate between the two.
b) Explain working of multichannel DAS with suitable block diagram.
c) With help of suitable block diagram explain operation of Logic Analyzer.

Q.5 Solve: (Any Two) **12**

a) What is the purpose of ISO 9000 Quality Management System? Draw the ISO 9000 architecture.
b) What is DAS? Explain working of generalized DAS with suitable block diagram.
c) Explain with help of suitable block diagram the working of vector analyzer.

MCQ/Objective Type Questions

Duration: 20 Minutes Marks:10

Q.1 Choose the correct alternatives from the options. 10

1) What is the primary objective of cyber security?
a) Enhancing network speed
b) Protecting digital assets
c) Promoting online anonymity
d) Monitoring internet traffic

2) Which group of hackers typically aims to exploit vulnerabilities for personal gain?
a) White-hats b) Black-hats
c) Grey-hats d) Green-hats

3) What is the main purpose of ransomware attacks?
a) Extracting sensitive information
b) Disrupting network connectivity
c) Blocking access to data
d) Spreading malicious software

4) What term describes the process of verifying the identity of a user or system?
a) Authorization b) Authentication
c) Verification d) Validation

5) Which type of malware is specifically designed to record keystrokes?
a) Spyware b) Worm
c) Trojan d) Adware

6) What is the primary function of intrusion detection systems (IDS)?
a) Encrypting network traffic
b) Monitoring for suspicious activity
c) Filtering spam emails
d) Accelerating internet speed

7) What is the primary goal of Distributed Denial of Service (DDoS) attacks?
a) Stealing personal information
b) Disrupting services
c) Modifying network configurations
d) Gaining unauthorized access

8) What technology is commonly used to authenticate users over a network?
a) Biometrics
b) MAC filtering
c) IP addressing
d) Port scanning

9) Which cryptographic technique involves converting plaintext into a fixed-size hash?
a) Encryption
b) Hashing
c) Salting
d) Decryption

10) What is the purpose of encryption in data security?
a) Ensuring data integrity
b) Increasing network speed
c) Blocking unauthorized access
d) Hiding data from attackers

c) IP addressing
d) Port scanning

7) Which cryptographic technique involves converting plaintext into a fixed-size hash?

a) Encryption
b) Hashing
c) Salting
d) Decryption

8) What is the purpose of encryption in data security?

a) Ensuring data integrity
b) Increasing network speed
c) Blocking unauthorized access
d) Hiding data from attackers

9) What is the primary objective of cyber security?

a) Enhancing network speed
b) Protecting digital assets
c) Promoting online anonymity
d) Monitoring internet traffic

10) Which group of hackers typically aims to exploit vulnerabilities for personal gain?

a) White-hats
b) Black-hats
c) Grey-hats
d) Green-hats

Seat No.		Set	S

Fourth. Y. (B.Tech.) (Sem-II) (New) (CBCS) Examination: March/April-2025
ELECTRONICS ENGINEERING
Cyber Security (BTN04804)

Day & Date: Wednesday 28-05-2025 Max. Marks:40
Time: 03:00 PM To 05:00 PM

Instructions: 1) All questions are compulsory.
2) Figures to the right indicate full marks.
3) Make suitable assumptions (if necessary and state them clearly).

Section – I

Q.2 Attempt Any Five. **20**

a) Explain the significance of Black-hat vs White-hat hackers in cyber security.
b) Detail the methods employed by cyber attackers to execute phishing attacks.
c) How does malware pose a threat to digital security? Discuss defense mechanisms against it.
d) Analyze the impact of password thefts and discuss strategies to mitigate such attacks.
e) What is the role of authorization and authentication in ensuring account security?
f) Elaborate on the importance of encryption in safeguarding sensitive information.

Section – II

Q.3 Attempt Any Five. **20**

a) Discuss the fundamentals of network tapping and its implications for network security.
b) Outline the steps involved in setting up a robust firewall configuration to protect against cyber threats.
c) Explain the vulnerabilities associated with cloud computing and suggest measures to strengthen its security.
d) Describe the standards and protocols essential for securing wireless networks from potential attacks.
e) How does cryptography contribute to data confidentiality? Illustrate with examples.
f) Analyze the role of network design in preventing and mitigating cyber-attacks.

T.Y. (B. Tech) (Computer Science & Engineering) (Semester - I) (New) (CBCS) Examination: March/April - 2025
Artificial Intelligence (BTN03501)

Day & Date: Saturday 17-05-2025 Max. Marks: 70

Time: 10:00 AM To 01:00 PM

Instructions: 1) Q. No. 1 is compulsory. It should be solved in the first 30 minutes in Answer Book Page no 03 (Starting page of the Answer Book). Each question carries one mark.
2) Don't forget to Mention question paper set (P/Q/R/S) on top of page.
3) Figures to the right indicates full marks.
4) Assume suitable data if required.

MCQ/Objective Type Questions

Duration: 30 Minutes Marks:14

Q.1 Choose the correct Answer. **14**

1) Which of the following is the branch of Artificial Intelligence?
a) Machine Learning b) Cyber forensics
c) Full-Stack Developer d) Network Design

2) What is the goal of Artificial Intelligence?
a) To solve artificial problems
b) To extract scientific causes
c) To explain various sorts of intelligence
d) To solve real-world problems

3) Which of the following machine requires input from the humans but can interpret the outputs themselves?
a) Actuators b) Sensor
c) Agents d) Al system

4) Procedural Domain Knowledge in a rule-based system is classified in the form of _____.
a) Control Rules b) Production Rules
c) Meta Rules d) None of the above

5) Which algorithm is used in the Game tree to make decisions of Win/Lose?
a) Heuristic Search Algorithm b) DFS/BFS algorithm
c) Greedy Search Algorithm d) Min/Max algorithm

6) Which term describes the common-sense of the judgmental part of problem-solving?
a) Values-based b) Critical
c) Analytical d) Heuristic

7) The Bayesian Network gives _____.
a) A complete description of the problem
b) Partial Description of the domain
c) Both a & b
d) None of the above

8) Which statement is valid for the Heuristic function?
a) The heuristic function is used to solve mathematical problems.
b) The heuristic function takes parameters of type string and returns an integer value.
c) The heuristic function does not have any return type.
d) The heuristic function calculates the cost of an optimal path between the pair of states.

9) The decision tree algorithm reaches its destination using _____.
a) Single Test b) Two Test
c) Sequence of test d) No Test

10) Which is not a property of representation of knowledge?
a) Representational Verification
b) Representational Adequacy
c) Inferential Adequacy
d) Inferential Efficiency

11) What are the main components of the expert systems?
a) Inference Engine
b) Knowledge Base
c) Inference Engine & Knowledge Base
d) None of the mentioned

12) Reinforcement learning is a _____.
a) Prediction-based learning technique
b) Feedback-based learning technique
c) History results-based learning technique
d) None

13) Bayesian Belief Network is also known as?
a) Belief network b) decision network
c) Bayesian model d) All of the above

14) _____ or modelling is the method using which we program a computer to exhibit human intelligence.
a) Simulation b) Psychic Amelioration
c) Duplication d) Cognitization

Instructions: 1) All questions are compulsory.
2) Figure to right indicate full marks.
3) Assume suitable data if required.

Section – I

Q.2 Solve any four of the following. **16**

a) Describe Al Scopes in detail.
b) Give a difference between informed & uninformed search.
c) Explain constraint satisfaction problem or constraint propagation.
d) What are the different issues in knowledge representation?
e) Define and describe frames in slot and filler structure in detail with example.

Q.3 Solve any two of the followings. **12**

a) Will Breadth first search always find optimal Solution. Why explain with example?
b) Write a note on intelligent agents and their types with the example.
c) Explain the semantic net in detail in K-R system.

Section – II

Q.4 Solve any four of the following. **16**

a) Discuss the need and structure of Bayesian Networks.
b) Write a case study on the past, present and future of Al.
c) What is Q learning in Al explain in detail.
d) Differentiate between supervised learning and unsupervised learning.
e) Write a note on Utility Theory.

Q.5 Solve any two of the followings. **12**

a) Explain Markov Decision Process and its working with good example.
b) Explain probability and Baye's Theorem in certainty factor and Rule-Based systems.
c) Elaborate Reinforcement learning with example.

MCQ/Objective Type Questions

Duration: 30 Minutes Marks:14

Q.1 Choose the correct Answer. **14**

1) SPOOLING stands for _____.
a) Spontaneous primary operation online
b) Simultaneous peripheral operation on line
c) Small peripheral operation online
d) None of these

2) _____ is a program that acts as an intermediary between a user of a computer and the computer hardware.
a) A Computer Graphics b) An Overview System
c) A Computer Organization d) An operating system

3) _____ systems were developed to provide interactive use of a computer system at a reasonable cost.
a) Time-sharing b) Multiprogramming
c) Object Oriented d) Batch

4) Dispatch Latency is _____.
a) The time taken by the dispatcher to stop one process and start another
b) The time taken by processor to write a file on disk
c) The Time taken by the dispatcher to bring a process from Swap Space
d) None of the above

5) Aging is _____.
a) Keeping track of cache contents
b) keeping track of what pages are currently residing in memory
c) keeping track of how many times a given page is referenced
d) Increasing the priority of jobs to ensure termination in finite time

6) The segment of code in which the process may change common variables, update tables, write into files is known as: _____.
a) Entry Section b) Remainder Section
c) Critical section d) Exit section

7) The requirements for the solution to critical section problem are _____.
a) Mutual Exclusion b) Progress
c) Bounded Waiting d) All of the above

8) The content of need matrix is _____.
a) Allocation – Available b) Max – Available
c) Allocation – Max d) Max – Allocation

9) A system is in a safe state only if there exists a _____.
a) safe allocation b) safe resource
c) safe sequence d) All of these

10) Thrashing _____.
a) is a natural consequence of virtual memory systems
b) is a high paging activity
c) always occurs on large computers
d) can always be avoided by swapping

11) The _____ algorithm selects the request with the least seek time from the current head position.
a) SSTF Disk Scheduling b) FCFS Disk Scheduling
c) SCAN Scheduling d) C-SCAN Scheduling

12) The _____ is the time for the disk arm to move the heads to the cylinder containing the desired sector.
a) Rotational Latency b) Seek Time
c) Bandwidth d) None of these

13) Suppose that a disk drive has 200 cylinders numbered 0 to 199. Consider a disk queue with I/O requests on the following cylinders in their arriving order: 54, 95, 73, 130, 25, 48, 110, 30, 45, 180, and 190. The disk head is assumed to be at cylinder 24. Starting from the current head position, what is the total distance (in cylinders) the disk arm moves to satisfy all the pending requests for the FCFS disk-scheduling algorithm?
a) 580 cylinders b) 589 cylinders
c) 643 cylinders d) 570 cylinders

14) A problem encountered in multitasking when a process is perpetually denied necessary resources is called _____.
a) aging b) starvation
c) inversion d) deadlock

T. Y. (B.Tech.) (Sem-I) (New) (CBCS) Examination: March/April-2025
COMPUTER SCIENCE & ENGINEERING
Operating Systems (BTN03502)

Day & Date: Monday 19-05-2025 Max. Marks: 56
Time: 10:00 AM To 01:00 PM

Instructions: 1) All questions are compulsory.
2) Figures to the right indicate full marks.

Section – I

Q.2 Attempt any Three. **12**

a) Differentiate between Multiprogramming and Multitasking Operating Systems.
b) Explain Process Life Cycle with diagram.
c) Explain CPU I/O burst Cycle.
d) Explain Multilevel Feedback Queue Scheduling in Detail.

Q.3 Attempt any One. **08**

a) Explain the concept of Operating System along with its functions
b) Apply Priority scheduling and SJF Scheduling algorithm on following example.

Process	Burst Time	Priority
P0	8	2
P1	5	4
P2	7	3
P3	10	1
P4	6	5

1) Draw Gant Chart for both algorithms
2) Calculate total Waiting time & average Waiting time for both algorithms
3) Calculate total turnaround time & average total turnaround time for both algorithms
4) State which algorithm is best along with reason.

Q.4 Explain classical problems of Synchronization in terms of Dining Philosopher problem. **08**

Section – II

Q.5 Attempt any Three. **12**

a) Explain Segmentation as non-contiguous memory management scheme.

b) Explain Deadlock Characterization in detail

c) Explain Demand paging in detail

d) Suppose that a disk drive has 500 cylinders numbered 0 to 499. The drive currently serves a request at cylinder 143; the previous request was at cylinder 125. The queue of pending requests, in FIFO order, is 86, 170, 213, 474, 148, 109, 222, 450, and 330. Starting from the current head position, what is the total distance (in cylinders) the disk arm moves to satisfy all the pending requests for the SSTF disk-scheduling algorithm.

Q.6 Attempt any One. **08**

a) Explain methods for Handing deadlock in detail.

b) Consider following page reference string
5, 0, 2, 1, 0, 3, 0, 2, 4, 3, 0, 3, 2, 1, 3.

Apply FIFO, LRU and Optimal and solve example with 3 frames

1) Calculate total no. of page faults for each algorithm
2) Calculate page faults rate for each algorithm
3) Which algorithm gives minimum page fault?

Q.7 Attempt the following. **08**

Consider a system with five processes Po through P4 and three resource types A, B, C. Resource type A has 10 instances, resource type B has 5 instances, and resource type C has 7 instances. Suppose that, at time to, the following snapshot of the system has been taken:

Process	Allocation			Max			Available		
P0	A	B	C	A	B	C	A	B	C
P1	0	1	0	7	5	3	3	3	2
P2	2	0	0	3	2	2			
P3	3	0	2	9	0	2			
P4	2	1	1	2	2	2			
P5	0	0	2	4	3	3			

1) Find content of need matrix
2) Find whether system in safe state or not
3) Find all possible safe sequence
4) If process P2 arrives with request (1,0,2) Will it granted

MCQ/Objective Type Questions

Duration: 30 Minutes Marks:14

Q.1 Choose the correct Answer. **14**

1) The content of need matrix is _____.
a) Allocation – Available b) Max – Available
c) Allocation – Max d) Max – Allocation

2) A system is in a safe state only if there exists a _____.
a) safe allocation b) safe resource
c) safe sequence d) All of these

3) Thrashing _____.
a) is a natural consequence of virtual memory systems
b) is a high paging activity
c) always occurs on large computers
d) can always be avoided by swapping

4) The _____ algorithm selects the request with the least seek time from the current head position.
a) SSTF Disk Scheduling b) FCFS Disk Scheduling
c) SCAN Scheduling d) C-SCAN Scheduling

5) The _____ is the time for the disk arm to move the heads to the cylinder containing the desired sector.
a) Rotational Latency b) Seek Time
c) Bandwidth d) None of these

6) Suppose that a disk drive has 200 cylinders numbered 0 to 199. Consider a disk queue with I/O requests on the following cylinders in their arriving order: 54, 95, 73, 130, 25, 48, 110, 30, 45, 180, and 190. The disk head is assumed to be at cylinder 24. Starting from the current head position, what is the total distance (in cylinders) the disk arm moves to satisfy all the pending requests for the FCFS disk-scheduling algorithm?

a) 580 cylinders
b) 589 cylinders
c) 643 cylinders
d) 570 cylinders

7) A problem encountered in multitasking when a process is perpetually denied necessary resources is called _____.

a) aging
b) starvation
c) inversion
d) deadlock

8) SPOOLING stands for _____.

a) Spontaneous primary operation online
b) Simultaneous peripheral operation on line
c) Small peripheral operation online
d) None of these

9) _____ is a program that acts as an intermediary between a user of a computer and the computer hardware.

a) A Computer Graphics
b) An Overview System
c) A Computer Organization
d) An operating system

10) _____ systems were developed to provide interactive use of a computer system at a reasonable cost.

a) Time-sharing
b) Multiprogramming
c) Object Oriented
d) Batch

11) Dispatch Latency is _____.

a) The time taken by the dispatcher to stop one process and start another
b) The time taken by processor to write a file on disk
c) The Time taken by the dispatcher to bring a process from Swap Space
d) None of the above

12) Aging is _____.

a) Keeping track of cache contents
b) keeping track of what pages are currently residing in memory
c) keeping track of how many times a given page is referenced
d) Increasing the priority of jobs to ensure termination in finite time

13) The segment of code in which the process may change common variables, update tables, write into files is known as: _____.

a) Entry Section
b) Remainder Section
c) Critical section
d) Exit section

14) The requirements for the solution to critical section problem are _____.

a) Mutual Exclusion
b) Progress
c) Bounded Waiting
d) All of the above

Seat No.	

Set **Q**

T. Y. (B.Tech.) (Sem-I) (New) (CBCS) Examination: March/April-2025
COMPUTER SCIENCE & ENGINEERING
Operating Systems (BTN03502)

Day & Date: Monday 19-05-2025 Max. Marks: 56
Time: 10:00 AM To 01:00 PM

Instructions: 1) All questions are compulsory.
2) Figures to the right indicate full marks.

Section – I

Q.2 Attempt any Three. **12**

a) Differentiate between Multiprogramming and Multitasking Operating Systems.
b) Explain Process Life Cycle with diagram.
c) Explain CPU I/O burst Cycle.
d) Explain Multilevel Feedback Queue Scheduling in Detail.

Q.3 Attempt any One. **08**

a) Explain the concept of Operating System along with its functions
b) Apply Priority scheduling and SJF Scheduling algorithm on following example.

Process	Burst Time	Priority
P0	8	2
P1	5	4
P2	7	3
P3	10	1
P4	6	5

1) Draw Gant Chart for both algorithms
2) Calculate total Waiting time & average Waiting time for both algorithms
3) Calculate total turnaround time & average total turnaround time for both algorithms
4) State which algorithm is best along with reason.

Q.4 Explain classical problems of Synchronization in terms of Dining Philosopher problem. **08**

Section – II

Q.5 Attempt any Three. **12**

a) Explain Segmentation as non-contiguous memory management scheme.

b) Explain Deadlock Characterization in detail

c) Explain Demand paging in detail

d) Suppose that a disk drive has 500 cylinders numbered 0 to 499. The drive currently serves a request at cylinder 143; the previous request was at cylinder 125. The queue of pending requests, in FIFO order, is 86, 170, 213, 474, 148, 109, 222, 450, and 330. Starting from the current head position, what is the total distance (in cylinders) the disk arm moves to satisfy all the pending requests for the SSTF disk-scheduling algorithm.

Q.6 Attempt any One. **08**

a) Explain methods for Handing deadlock in detail.

b) Consider following page reference string
5, 0, 2, 1, 0, 3, 0, 2, 4, 3, 0, 3, 2, 1, 3.

Apply FIFO, LRU and Optimal and solve example with 3 frames

1) Calculate total no. of page faults for each algorithm
2) Calculate page faults rate for each algorithm
3) Which algorithm gives minimum page fault?

Q.7 Attempt the following. **08**

Consider a system with five processes Po through P4 and three resource types A, B, C. Resource type A has 10 instances, resource type B has 5 instances, and resource type C has 7 instances. Suppose that, at time to, the following snapshot of the system has been taken:

Process	Allocation			Max			Available		
P0	A	B	C	A	B	C	A	B	C
P1	0	1	0	7	5	3	3	3	2
P2	2	0	0	3	2	2			
P3	3	0	2	9	0	2			
P4	2	1	1	2	2	2			
P5	0	0	2	4	3	3			

1) Find content of need matrix
2) Find whether system in safe state or not
3) Find all possible safe sequence
4) If process P2 arrives with request (1,0,2) Will it granted

Seat No.	

Set **R**

T. Y. (B.Tech.) (Sem-I) (New) (CBCS) Examination: March/April-2025
COMPUTER SCIENCE & ENGINEERING
Operating Systems (BTN03502)

Day & Date: Monday 19-05-2025 Max. Marks: 70
Time: 10:00 AM To 01:00 PM

Instructions: 1) Q. No. 1 is compulsory. It should be solved in the first 30 minutes in Answer Book Page no 03 (Starting page of the Answer Book). Each question carries one mark.
2) Don't forget to Mention question paper set (P/Q/R/S) on top of page.
3) Figures to the right indicates full marks.

MCQ/Objective Type Questions

Duration: 30 Minutes Marks:14

Q.1 Choose the correct Answer. 14

1) The _____ algorithm selects the request with the least seek time from the current head position.
a) SSTF Disk Scheduling b) FCFS Disk Scheduling
c) SCAN Scheduling d) C-SCAN Scheduling

2) The _____ is the time for the disk arm to move the heads to the cylinder containing the desired sector.
a) Rotational Latency b) Seek Time
c) Bandwidth d) None of these

3) Suppose that a disk drive has 200 cylinders numbered 0 to 199. Consider a disk queue with I/O requests on the following cylinders in their arriving order: 54, 95, 73, 130, 25, 48, 110, 30, 45, 180, and 190. The disk head is assumed to be at cylinder 24. Starting from the current head position, what is the total distance (in cylinders) the disk arm moves to satisfy all the pending requests for the FCFS disk-scheduling algorithm?
a) 580 cylinders b) 589 cylinders
c) 643 cylinders d) 570 cylinders

4) A problem encountered in multitasking when a process is perpetually denied necessary resources is called _____.
a) aging b) starvation
c) inversion d) deadlock

5) SPOOLING stands for _____.
a) Spontaneous primary operation online
b) Simultaneous peripheral operation on line
c) Small peripheral operation online
d) None of these

6) _____ is a program that acts as an intermediary between a user of a computer and the computer hardware.

a) A Computer Graphics b) An Overview System
c) A Computer Organization d) An operating system

7) _____ systems were developed to provide interactive use of a computer system at a reasonable cost.

a) Time-sharing b) Multiprogramming
c) Object Oriented d) Batch

8) Dispatch Latency is _____.

a) The time taken by the dispatcher to stop one process and start another
b) The time taken by processor to write a file on disk
c) The Time taken by the dispatcher to bring a process from Swap Space
d) None of the above

9) Aging is _____.

a) Keeping track of cache contents
b) keeping track of what pages are currently residing in memory
c) keeping track of how many times a given page is referenced
d) Increasing the priority of jobs to ensure termination in finite time

10) The segment of code in which the process may change common variables, update tables, write into files is known as: _____.

a) Entry Section b) Remainder Section
c) Critical section d) Exit section

11) The requirements for the solution to critical section problem are _____.

a) Mutual Exclusion b) Progress
c) Bounded Waiting d) All of the above

12) The content of need matrix is _____.

a) Allocation – Available b) Max – Available
c) Allocation – Max d) Max – Allocation

13) A system is in a safe state only if there exists a _____.

a) safe allocation b) safe resource
c) safe sequence d) All of these

MCQ/Objective Type Questions

Duration: 30 Minutes Marks:14

Q.1 Choose the correct Answer. **14**

1) _____ describes what data are stored in the database, and what relationships exist among those data.
a) Physical level b) Logical level
c) View level d) None

2) In which data model, entities are organised in a graph, in which some entities can be accessed through several path _____.
a) Semi structured Data Model b) Network data model
c) Object-Based Data Model d) Hierarchical data model

3) If entity sets participating in a relationship set are distinct, then roles are _____.
a) Explicit b) Implicit
c) Cannot say d) None

4) Identify the correct relational algebra query for the following output.

Input

A	B	C	D
α	α	1	7
α	β	5	7
β	β	12	3
β	β	23	10

Output

A	B	C	D
α	α	1	7
β	β	23	10

a) $\sigma C = D \wedge D > 5(r)$ b) $\sigma A = B \wedge D < 5(r)$
c) $\sigma A = B \wedge D > 5(r)$ d) None

5) For the class (class_name, age) table, find the names and average age of all classes where the average age of students is greater than 10. Identify the correct, SQL Query for this statement.

a)
```
SELECT class_name, age
FROM class
GROUP BY class_name
HAVING AVG(age) > 10;
```

b)
```
SELECT class_name, age
FROM class
HAVING AVG(age) > 10
GROUP BY class_name;
```

c)
```
SELECT class_name, AVG (age)
FROM class
GROUP BY class_name
HAVING AVG(age) > 10;
```

d)
```
SELECT class_name, AVG (age)
FROM class
HAVING AVG(age) > 10
GROUP BY class_name;
```

6) If 4 sections of ECE-101 were taught in the Fall 2009 semester and 2 sections of ECE-101 were taught in the Spring 2010 semester, then the result of intersect operation would be _____ tuples with ECE-101 in the result.

a) 2 b) 4
c) 6 d) 8

7) For $\mathrm{R} = (\mathrm{A}, \mathrm{B}, \mathrm{C}, \mathrm{G}, \mathrm{H}, \mathrm{I})$ and $\mathrm{F} = \{\mathrm{A} \rightarrow \mathrm{B}, \mathrm{A} \rightarrow \mathrm{C}, \mathrm{CG} \rightarrow \mathrm{H}, \mathrm{CG} \rightarrow \mathrm{I}, \mathrm{B} \rightarrow \mathrm{H}\}$ What is $(\mathrm{AG})^{+}$?

a) ABCGH b) ABCG
c) ABCGHI d) BCGHI

8) In B+ tree, each node that is not a root or a leaf has between _____.

a) $\lceil n/2 \rceil$ and n children b) $\lfloor n/2 \rfloor$ and n children
c) $n/2$ and n children d) None

9) While performing the operation deletion on B+-tree, if the node has too few entries due to the removal, then _____.

a) Redistribute pointers b) Merge siblings
c) Delete node d) None

10) Which of the following is/ are examples of non-volatile storage?

a) Main memory
b) Secondary storage devices
c) The information replicated in several nonvolatile storage media (usually disk) with independent failure modes
d) None

11) A transaction may obtain locks, but may not release any lock in _____.

a) Growing phase b) Shrinking phase
c) Both d) None

12) Let li and lj be two Instructions of transactions Ti and Tj respectively. Instructions li and lj do not conflict if and only if _____.

a) li = read(Q), lj = read(Q) b) li = read(Q), lj = write(Q)
c) li = write(Q), lj = read(Q) d) li = write(Q), lj = write(Q)

13) When a transaction Ti issues a read(Q) operation, the system issues a _____ instruction followed by the _____ instruction.

a) lock-S(Q), read(Q) b) read(Q), lock-S(Q)
c) read(Q), lock-X(Q) d) None

14) Non-volatile storage contents are assumed to not be corrupted by system crash in case of _____.

a) Logical error b) System error
c) Fail-stop assumption d) Disk failure

Seat No.

T. Y. (B.Tech.) (Sem-I) (New) (CBCS) Examination: March/April-2025
COMPUTER SCIENCE & ENGINEERING
Database Engineering (BTN03503)

Day & Date: Tuesday 20-05-2025 Max. Marks: 56
Time: 10:00 AM To 01:00 PM

Instructions: 1) All questions are compulsory.
2) Figures to the right indicate full marks.

Section – I

Q.2 Solve any three. **12**

a) List and explain the data models.

b) Consider the following database schema. Write the queries using tuple relational calculus

branch (branch_name, branch_city, assets)
customer (customer_name, customer_street, customer_city)
loan (loan_number, branch_name, amount)
borrower (customer_name, loan number)
account (account_number, branch_name, balance)
depositor (customer_name, account_number)

1) Find all customers who have an account at a bank.
2) Find all customers who have a loan or an account or both.
3) Find all customers who have a loan but not an account
4) Find all customers who have a loan and an account or both.

c) Explain constraints on generalization with example.

d) Find Prime and Non Prime Attributes using Functional Dependencies:

1) R(ABCDEF) having FDs $\{AB \rightarrow C, C \rightarrow D, D \rightarrow E, F \rightarrow B, E \rightarrow F\}$
2) R(ABCDEF) having FDs $\{AB \rightarrow C, C \rightarrow DE, E \rightarrow F, C \rightarrow B\}$

Q.3 Find if a given functional dependency is implied from a set of Functional Dependencies for: **08**

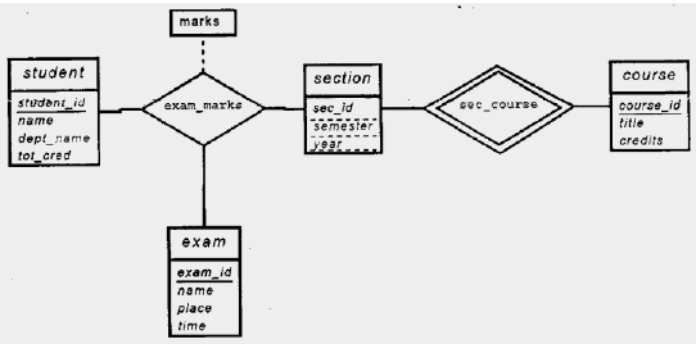
$AB \rightarrow CD, AF \rightarrow D, DE \rightarrow F, C \rightarrow G, F \rightarrow E, G \rightarrow A$

a) Check: $CF \rightarrow DF$
b) Check: $BG \rightarrow E$
c) Check: $AF \rightarrow G$
d) Check: $AB \rightarrow EF$

OR

Consider the E-R diagram in given Figure,

a) List the entity sets along with attributes and their primary keys.
b) List Relationship along with attributes and their primary keys.
c) Reduce this ER model to relational model



Q.4 Explain the following joins with example in SQL. **08**

a) Inner join using conditions NATURAL, ON and USING
b) Right outer join using conditions NATURAL, ON and USING
c) Left outer join using conditions NATURAL, ON and USING
d) Full outer join using conditions NATURAL, ON and USING

Section – II

Q.5 **Solve any three.** **12**

a) What are bitmap indices? In the following table, new_emp is the column to be indexed. What is the content of the bitmap index? (Consider 4-bit data)

employee				
emp_id	emp_name	job	new_emp	salary
e-123	riju	analyst	yes	35000
e-345	neha	salesperson	no	30000
e-567	suresh	clerk	no	25000
e-998	sneha	manager	yes	50000

b) Explain ACID properties.
c) Explain various types of failure that may occur in the system.
d) Explain the concept of lock granularity concurrency control mechanism.

Q.6 Explain log based recovery. Also explain immediate database modification and deferred modification scheme with example. **08**

OR

Explain B- tree with an example. Also explain the insertion and deletion in B+ tree with example.

Q.7 Explain Deadlock with example. Also explain deadlock prevention. **08**

Seat No.	

Set **Q**

COMPUTER SCIENCE & ENGINEERING
Database Engineering (BTN03503)

Day & Date: Tuesday 20-05-2025 Max. Marks: 70
Time: 10:00 AM To 01:00 PM

Instructions: 1) Q. No. 1 is compulsory. It should be solved in the first 30 minutes in Answer Book Page no 03 (Starting page of the Answer Book). Each question carries one mark.
2) Don't forget to Mention question paper set (P/Q/R/S) on top of page.
3) Figures to the right indicates full marks.

MCQ/Objective Type Questions

Duration: 30 Minutes Marks:14

Q.1 Choose the correct Answer. **14**

1) In B+ tree, each node that is not a root or a leaf has between _____.
a) $\lceil n/2 \rceil$ and n children b) $\lfloor n/2 \rfloor$ and n children
c) $n/2$ and n children d) None

2) While performing the operation deletion on B+-tree, if the node has too few entries due to the removal, then _____.
a) Redistribute pointers b) Merge siblings
c) Delete node d) None

3) Which of the following is/ are examples of non-volatile storage?
a) Main memory
b) Secondary storage devices
c) The information replicated in several nonvolatile storage media (usually disk) with independent failure modes
d) None

4) A transaction may obtain locks, but may not release any lock in _____.
a) Growing phase b) Shrinking phase
c) Both d) None

5) Let li and lj be two Instructions of transactions Ti and Tj respectively. Instructions li and lj do not conflict if and only if _____.
a) li = read(Q), lj = read(Q) b) li = read(Q), lj = write(Q)
c) li = write(Q), lj = read(Q) d) li = write(Q), lj = write(Q)

6) When a transaction Ti issues a read(Q) operation, the system issues a _____ instruction followed by the _____ instruction.
a) lock-S(Q), read(Q) b) read(Q), lock-S(Q)
c) read(Q), lock-X(Q) d) None

7) Non-volatile storage contents are assumed to not be corrupted by system crash in case of _____.

a) Logical error
b) System error
c) Fail-stop assumption
d) Disk failure

8) _____ describes what data are stored in the database, and what relationships exist among those data.

a) Physical level
b) Logical level
c) View level
d) None

9) In which data model, entities are organised in a graph, in which some entities can be accessed through several path _____.

a) Semi structured Data Model
b) Network data model
c) Object-Based Data Model
d) Hierarchical data model

10) If entity sets participating in a relationship set are distinct, then roles are _____.

a) Explicit
b) Implicit
c) Cannot say
d) None

11) Identify the correct relational algebra query for the following output.

Input

A	B	C	D
α	α	1	7
α	β	5	7
β	β	12	3
β	β	23	10

Output

A	B	C	D
α	α	1	7
β	β	23	10

a) $\sigma C = D \wedge D > 5(r)$
b) $\sigma A = B \wedge D < 5(r)$
c) $\sigma A = B \wedge D > 5(r)$
d) None

12) For the class (class_name, age) table, find the names and average age of all classes where the average age of students is greater than 10. Identify the correct, SQL Query for this statement.

a)
```
SELECT class_name, age
FROM class
GROUP BY class_name
HAVING AVG(age) > 10;
```

b)
```
SELECT class_name, age
FROM class
HAVING AVG(age) > 10
GROUP BY class_name;
```

c)
```
SELECT class_name, AVG (age)
FROM class
GROUP BY class_name
HAVING AVG(age) > 10;
```

d)
```
SELECT class_name, AVG (age)
FROM class
HAVING AVG(age) > 10
GROUP BY class_name;
```

13) If 4 sections of ECE-101 were taught in the Fall 2009 semester and 2 sections of ECE-101 were taught in the Spring 2010 semester, then the result of intersect operation would be _____ tuples with ECE-101 in the result.

a) 2 b) 4
c) 6 d) 8

14) For $\mathrm{R} = (\mathrm{A}, \mathrm{B}, \mathrm{C}, \mathrm{G}, \mathrm{H}, \mathrm{I})$ and $\mathrm{F} = \{\mathrm{A} \rightarrow \mathrm{B}, \mathrm{A} \rightarrow \mathrm{C}, \mathrm{CG} \rightarrow \mathrm{H}, \mathrm{CG} \rightarrow \mathrm{I}, \mathrm{B} \rightarrow \mathrm{H}\}$ What is $(\mathrm{AG})^{+}$?

a) ABCGH b) ABCG
c) ABCGHI d) BCGHI

Seat No.	

Set **Q**

T. Y. (B.Tech.) (Sem-I) (New) (CBCS) Examination: March/April-2025
COMPUTER SCIENCE & ENGINEERING
Database Engineering (BTN03503)

Day & Date: Tuesday 20-05-2025 Max. Marks: 56
Time: 10:00 AM To 01:00 PM

Instructions: 1) All questions are compulsory.
2) Figures to the right indicate full marks.

Section – I

Q.2 Solve any three. **12**

a) List and explain the data models.

b) Consider the following database schema. Write the queries using tuple relational calculus

branch (branch_name, branch_city, assets)
customer (customer_name, customer_street, customer_city)
loan (loan_number, branch_name, amount)
borrower (customer_name, loan number)
account (account_number, branch_name, balance)
depositor (customer_name, account_number)

1) Find all customers who have an account at a bank.
2) Find all customers who have a loan or an account or both.
3) Find all customers who have a loan but not an account
4) Find all customers who have a loan and an account or both.

c) Explain constraints on generalization with example.

d) Find Prime and Non Prime Attributes using Functional Dependencies:

1) R(ABCDEF) having FDs $\{AB \rightarrow C, C \rightarrow D, D \rightarrow E, F \rightarrow B, E \rightarrow F\}$
2) R(ABCDEF) having FDs $\{AB \rightarrow C, C \rightarrow DE, E \rightarrow F, C \rightarrow B\}$

Q.3 Find if a given functional dependency is implied from a set of Functional Dependencies for: **08**

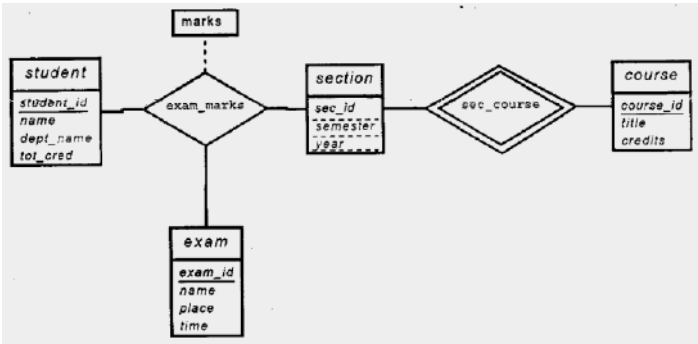
$AB \rightarrow CD, AF \rightarrow D, DE \rightarrow F, C \rightarrow G, F \rightarrow E, G \rightarrow A$

a) Check: $CF \rightarrow DF$
b) Check: $BG \rightarrow E$
c) Check: $AF \rightarrow G$
d) Check: $AB \rightarrow EF$

OR

Consider the E-R diagram in given Figure,

a) List the entity sets along with attributes and their primary keys.
b) List Relationship along with attributes and their primary keys.
c) Reduce this ER model to relational model



Q.4 Explain the following joins with example in SQL. **08**

a) Inner join using conditions NATURAL, ON and USING
b) Right outer join using conditions NATURAL, ON and USING
c) Left outer join using conditions NATURAL, ON and USING
d) Full outer join using conditions NATURAL, ON and USING

Section – II

Q.5 **Solve any three.** **12**

a) What are bitmap indices? In the following table, new_emp is the column to be indexed. What is the content of the bitmap index? (Consider 4-bit data)

employee				
emp_id	emp_name	job	new_emp	salary
e-123	riju	analyst	yes	35000
e-345	neha	salesperson	no	30000
e-567	suresh	clerk	no	25000
e-998	sneha	manager	yes	50000

b) Explain ACID properties.
c) Explain various types of failure that may occur in the system.
d) Explain the concept of lock granularity concurrency control mechanism.

Q.6 Explain log based recovery. Also explain immediate database modification and deferred modification scheme with example. **08**

OR

Explain B- tree with an example. Also explain the insertion and deletion in B+ tree with example.

Q.7 Explain Deadlock with example. Also explain deadlock prevention. **08**

MCQ/Objective Type Questions

Duration: 30 Minutes Marks:14

Q.1 Choose the correct Answer. 14

1) A transaction may obtain locks, but may not release any lock in _____.
a) Growing phase b) Shrinking phase
c) Both d) None

2) Let li and lj be two Instructions of transactions Ti and Tj respectively. Instructions li and lj do not conflict if and only if _____.
a) li = read(Q), lj = read(Q) b) li = read(Q), lj = write(Q)
c) li = write(Q), lj = read(Q) d) li = write(Q), lj = write(Q)

3) When a transaction Ti issues a read(Q) operation, the system issues a _____ instruction followed by the _____ instruction.
a) lock-S(Q), read(Q) b) read(Q), lock-S(Q)
c) read(Q), lock-X(Q) d) None

4) Non-volatile storage contents are assumed to not be corrupted by system crash in case of _____.
a) Logical error b) System error
c) Fail-stop assumption d) Disk failure

5) _____ describes what data are stored in the database, and what relationships exist among those data.
a) Physical level b) Logical level
c) View level d) None

6) In which data model, entities are organised in a graph, in which some entities can be accessed through several path _____.
a) Semi structured Data Model b) Network data model
c) Object-Based Data Model d) Hierarchical data model

7) If entity sets participating in a relationship set are distinct, then roles are _____.

a) Explicit
b) Implicit
c) Cannot say
d) None

8) Identify the correct relational algebra query for the following output.

Input

A	B	C	D
α	α	1	7
α	β	5	7
β	β	12	3
β	β	23	10

Output

A	B	C	D
α	α	1	7
β	β	23	10

a) $\sigma C = D \wedge D > 5(r)$
b) $\sigma A = B \wedge D < 5(r)$
c) $\sigma A = B \wedge D > 5(r)$
d) None

9) For the class (class_name, age) table, find the names and average age of all classes where the average age of students is greater than 10. Identify the correct, SQL Query for this statement.

a)
```
SELECT class_name, age
FROM class
GROUP BY class_name
HAVING AVG(age) > 10;
```
b)
```
SELECT class_name, age
FROM class
HAVING AVG(age) > 10
GROUP BY class_name;
```
c)
```
SELECT class_name, AVG (age)
FROM class
GROUP BY class_name
HAVING AVG(age) > 10;
```
d)
```
SELECT class_name, AVG (age)
FROM class
HAVING AVG(age) > 10
GROUP BY class_name;
```

10) If 4 sections of ECE-101 were taught in the Fall 2009 semester and 2 sections of ECE-101 were taught in the Spring 2010 semester, then the result of intersect operation would be _____ tuples with ECE-101 in the result.

a) 2
b) 4
c) 6
d) 8

11) For $R = (A, B, C, G, H, I)$ and $F = \{A \rightarrow B, A \rightarrow C, CG \rightarrow H, CG \rightarrow I, B \rightarrow H\}$ What is $(AG)^+$?

a) $ABCGH$ b) $ABCG$

c) $ABCGHI$ d) $BCGHI$

12) In B+ tree, each node that is not a root or a leaf has between _____.

a) $\lceil n/2 \rceil$ and n children b) $\lfloor n/2 \rfloor$ and n children

c) $n/2$ and n children d) None

13) While performing the operation deletion on B+-tree, if the node has too few entries due to the removal, then _____.

a) Redistribute pointers b) Merge siblings

c) Delete node d) None

14) Which of the following is/ are examples of non-volatile storage?

a) Main memory

b) Secondary storage devices

c) The information replicated in several nonvolatile storage media (usually disk) with independent failure modes

d) None

c) 6 d) 8

2) For $\mathrm{R} = (\mathrm{A}, \mathrm{B}, \mathrm{C}, \mathrm{G}, \mathrm{H}, \mathrm{I})$ and $\mathrm{F} = \{\mathrm{A} \rightarrow \mathrm{B}, \mathrm{A} \rightarrow \mathrm{C}, \mathrm{CG} \rightarrow \mathrm{H}, \mathrm{CG} \rightarrow \mathrm{I}, \mathrm{B} \rightarrow \mathrm{H}\}$ What is $(\mathrm{AG})^{+}$?
a) ABCGH b) ABCG
c) ABCGHI d) BCGHI

3) In B+ tree, each node that is not a root or a leaf has between _____.
a) $\lceil n/2 \rceil$ and n children b) $\lfloor n/2 \rfloor$ and n children
c) $n/2$ and n children d) None

4) While performing the operation deletion on B+-tree, if the node has too few entries due to the removal, then _____.
a) Redistribute pointers b) Merge siblings
c) Delete node d) None

5) Which of the following is/ are examples of non-volatile storage?
a) Main memory
b) Secondary storage devices
c) The information replicated in several nonvolatile storage media (usually disk) with independent failure modes
d) None

6) A transaction may obtain locks, but may not release any lock in _____.
a) Growing phase b) Shrinking phase
c) Both d) None

7) Let li and lj be two Instructions of transactions Ti and Tj respectively. Instructions li and lj do not conflict if and only if _____.
a) li = read(Q), lj = read(Q) b) li = read(Q), lj = write(Q)
c) li = write(Q), lj = read(Q) d) li = write(Q), lj = write(Q)

8) When a transaction Ti issues a read(Q) operation, the system issues a _____ instruction followed by the _____ instruction.
a) lock-S(Q), read(Q) b) read(Q), lock-S(Q)
c) read(Q), lock-X(Q) d) None

9) Non-volatile storage contents are assumed to not be corrupted by system crash in case of _____.
a) Logical error b) System error
c) Fail-stop assumption d) Disk failure

10) _____ describes what data are stored in the database, and what relationships exist among those data.
a) Physical level b) Logical level
c) View level d) None

11) In which data model, entities are organised in a graph, in which some entities can be accessed through several path _____.
a) Semi structured Data Model b) Network data model
c) Object-Based Data Model d) Hierarchical data model

12) If entity sets participating in a relationship set are distinct, then roles are _____.
a) Explicit b) Implicit
c) Cannot say d) None

13) Identify the correct relational algebra query for the following output.

Input

A	B	C	D
α	α	1	7
α	β	5	7
β	β	12	3
β	β	23	10

Output

A	B	C	D
α	α	1	7
β	β	23	10

a) $\sigma C = D \wedge D > 5(r)$ b) $\sigma A = B \wedge D < 5(r)$
c) $\sigma A = B \wedge D > 5(r)$ d) None

14) For the class (class_name, age) table, find the names and average age of all classes where the average age of students is greater than 10. Identify the correct, SQL Query for this statement.

a)
```
SELECT class_name, age
FROM class
GROUP BY class_name
HAVING AVG(age) > 10;
```

b)
```
SELECT class_name, age
FROM class
HAVING AVG(age) > 10
GROUP BY class_name;
```

c)
```
SELECT class_name, AVG (age)
FROM class
GROUP BY class_name
HAVING AVG(age) > 10;
```

d)
```
SELECT class_name, AVG (age)
FROM class
HAVING AVG(age) > 10
GROUP BY class_name;
```

3) Figures to the right indicates full marks.

MCQ/Objective Type Questions

Duration: 30 Minutes Marks:14

Q.1 Choose the correct Answer. **14**

1) Problems that cannot be solved by any algorithm are called?
a) tractable problems b) intractable problems
c) undecidable problems d) decidable problem

2) Halting problem is an example for?
a) decidable problem b) undecidable problem
c) complete problem d) trackable problem

3) Which of the problems cannot be solved by a backtracking method?
a) n-queen problem b) subset sum problem
c) hamiltonian circuit problem d) travelling salesman problem

4) Backtracking algorithm is implemented by constructing a tree of choices called as?
a) State-space tree b) State-chart tree
c) Node tree d) Backtracking tree

5) The problem of placing n queens in a chessboard such that no two queens attack each other is called as?
a) n-queen problem
b) eight queens puzzle
c) four queens puzzle
d) 1-queen problem

6) Which of the following standard algorithms is not Dynamic Programming based?
a) Bellman-Ford Algorithm for single source shortest path
b) Floyd Warshall Algorithm for all pairs shortest paths
c) 0-1 Knapsack problem
d) Prim\'s Minimum Spanning Tree

7) Prims algorithm is based on _____ method.

a) Divide and conquer method b) Dynamic programming
c) Greedy method d) Branch and bound

8) What is the objective of the knapsack problem?

a) To get maximum total value in the knapsack
b) To get minimum total value in the knapsack
c) To get maximum weight in the knapsack
d) To get minimum weight in the knapsack

9) What is the time complexity of Huffman Coding?

a) O(N) b) O(NlogN)
c) $O(N(logN)^2)$ d) $O(N^2)$

10) Which of the following sorting algorithms is the fastest?

a) Merge sort b) Quick sort
c) Insertion sort d) Shell sort

11) How many subarrays does the quicksort algorithm divide the entire array into?

a) one b) two
c) three d) four

12) What will be the best case time complexity of merge sort?

a) O(n log n) b) $O(n^2)$
c) $O(n^2 \log n)$ d) $O(n \log n^2)$

13) What is a recursive algorithm?

a) An algorithm that uses loops to iterate through data
b) An algorithm that calls itself to solve a problem
c) An algorithm that relies on external libraries
d) An algorithm that only works on recursive data structures

14) The worst case occurs in quick sort when _____.

a) Pivot is the median of the array
b) Pivot is the smallest element
c) Pivot is the middle element
d) None of the mentioned

Q.2 Attempt any Three: **12**

a) Explain practical complexity in detail.

b) Find the time complexity of following algorithm.

```
Algorithm Add(a,b,c,m,n)
{
    for i:=1 to m do
        for j:=1 to n do
            c[i,j]:=a[i,j] + b[i,j];
}
```

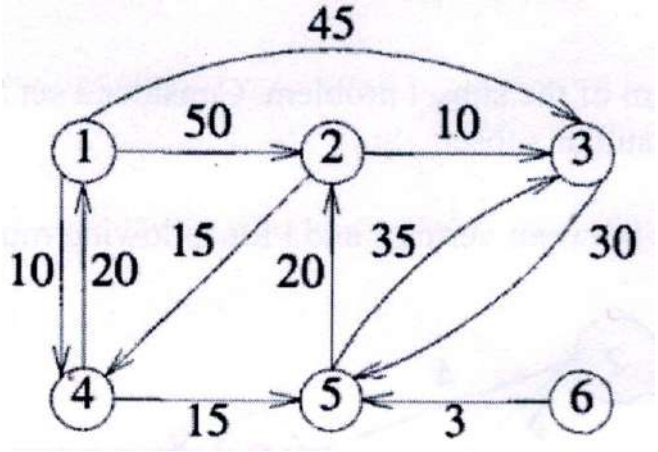
c) Write and explain an algorithm for recursive maximum and minimum.

d) Find an optimal merge pattern for 10 files whose lengths are 28, 32, 12, 5, 84, 53, 91, 35, 3 and 11

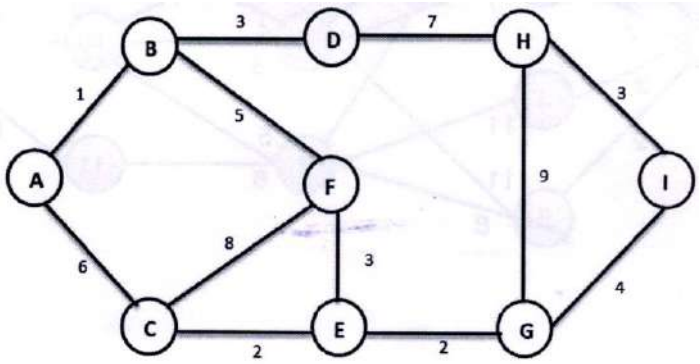
Q.3 Attempt any one: **08**

a) Obtain a set of optimal Huffman codes for message (m1, m2, m3, ...,m7) with relative frequencies (a1, a2, a3,..., a7) = (4, 5, 7, 8, 10, 12, 20). Draw the decode tree for this set of codes

b) Find the shortest path from 1 to all other cities by using the Greedy method.



Q.4 Write Prim's algorithm and find minimum cost spanning tree of following graph. **08**



Section – II

Q.5 **Attempt any Three:** **12**

a) Write a short note on flow shop scheduling.

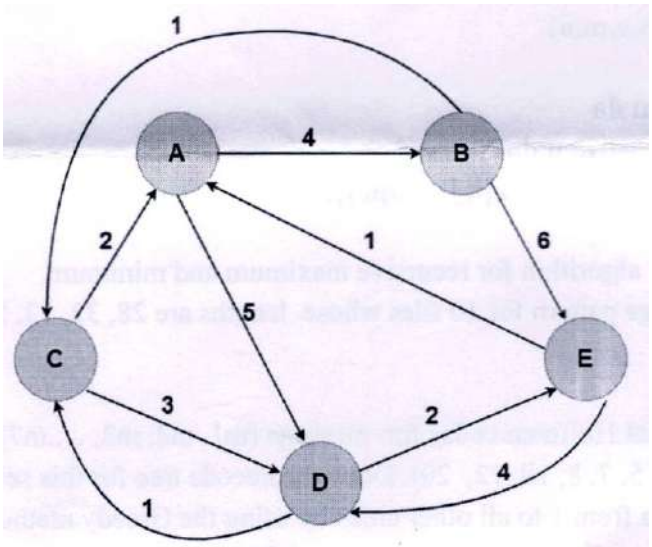
b) State and explain graph coloring problems.

c) Write notes on P, NP, NP-Complete and NP-Hard.

d) Draw portion of solution space tree for 4- Queen problem using backtracking.

Q.6 **Attempt any one:** **08**

a) Find all pairs shortest path using dynamic programming for the following diagraph.



b) Write a short note on the sum of the subset problem. Consider a set S= {5, 10, 12, 13, 15, 18} and m=35. solve it for obtaining a sub of subset.

Q.7 Find minimum path cost between vertex s and t for following multistage graph using dynamic programming. **08**

T. Y. (B. Tech) (Sem-I) (New) (CBCS) Examination: March/April-2025
COMPUTER SCIENCE & ENGINEERING
Design and Analysis of Algorithm (BTN03504)

Day & Date: Wednesday 21-05-2025 Max. Marks: 70
Time: 10:00 AM To 01:00 PM

Instructions: 1) Q. No. 1 is compulsory. It should be solved in the first 30 minutes in Answer Book Page no 03 (Starting page of the Answer Book). Each question carries one mark.
2) Don't forget to Mention question paper set (P/Q/R/S) on top of page.
3) Figures to the right indicates full marks.

MCQ/Objective Type Questions

Duration: 30 Minutes Marks:14

Q.1 Choose the correct Answer. **14**

1) What is the objective of the knapsack problem?
a) To get maximum total value in the knapsack
b) To get minimum total value in the knapsack
c) To get maximum weight in the knapsack
d) To get minimum weight in the knapsack

2) What is the time complexity of Huffman Coding?
a) O(N) b) O(NlogN)
c) $O(N(\log N)^2)$ d) $O(N^2)$

3) Which of the following sorting algorithms is the fastest?
a) Merge sort b) Quick sort
c) Insertion sort d) Shell sort

4) How many subarrays does the quicksort algorithm divide the entire array into?
a) one b) two
c) three d) four

5) What will be the best case time complexity of merge sort?
a) O(n log n) b) $O(n^2)$
c) $O(n^2 \log n)$ d) $O(n \log n^2)$

6) What is a recursive algorithm?
a) An algorithm that uses loops to iterate through data
b) An algorithm that calls itself to solve a problem
c) An algorithm that relies on external libraries
d) An algorithm that only works on recursive data structures

7) The worst case occurs in quick sort when _____.
a) Pivot is the median of the array
b) Pivot is the smallest element
c) Pivot is the middle element
d) None of the mentioned

8) Problems that cannot be solved by any algorithm are called?
a) tractable problems b) intractable problems
c) undecidable problems d) decidable problem

9) Halting problem is an example for?
a) decidable problem b) undecidable problem
c) complete problem d) trackable problem

10) Which of the problems cannot be solved by a backtracking method?
a) n-queen problem b) subset sum problem
c) hamiltonian circuit problem d) travelling salesman problem

11) Backtracking algorithm is implemented by constructing a tree of choices called as?
a) State-space tree b) State-chart tree
c) Node tree d) Backtracking tree

12) The problem of placing n queens in a chessboard such that no two queens attack each other is called as?
a) n-queen problem
b) eight queens puzzle
c) four queens puzzle
d) 1-queen problem

13) Which of the following standard algorithms is not Dynamic Programming based?
a) Bellman-Ford Algorithm for single source shortest path
b) Floyd Warshall Algorithm for all pairs shortest paths
c) 0-1 Knapsack problem
d) Prim\’s Minimum Spanning Tree

14) Prims algorithm is based on _____ method.
a) Divide and conquer method b) Dynamic programming
c) Greedy method d) Branch and bound

Time: 10:00 AM To 01:00 PM

Instructions: 1) All questions are compulsory.
2) Figures to the right indicate full marks.

Section – I

Q.2 Attempt any Three: **12**

a) Explain practical complexity in detail.

b) Find the time complexity of following algorithm.

```
Algorithm Add(a,b,c,m,n)
{
    for i:=1 to m do
        for j:=1 to n do
            c[i,j]:=a[i,j] + b[i,j];
}
```

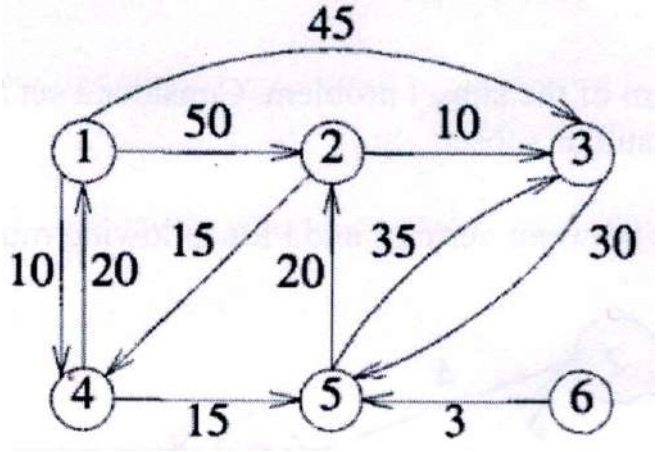
c) Write and explain an algorithm for recursive maximum and minimum.

d) Find an optimal merge pattern for 10 files whose lengths are 28, 32, 12, 5, 84, 53, 91, 35, 3 and 11

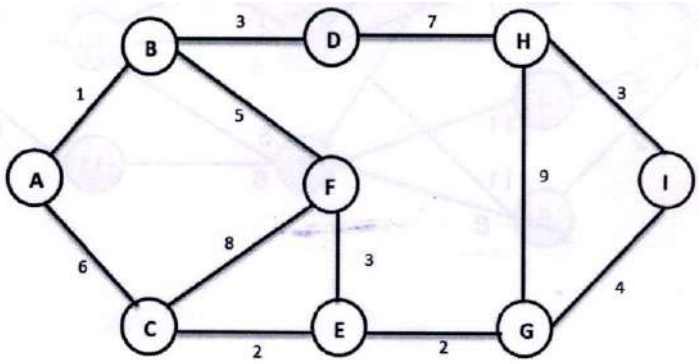
Q.3 Attempt any one: **08**

a) Obtain a set of optimal Huffman codes for message (m1, m2, m3, ...,m7) with relative frequencies (a1, a2, a3,..., a7) = (4, 5, 7, 8, 10, 12, 20). Draw the decode tree for this set of codes

b) Find the shortest path from 1 to all other cities by using the Greedy method.



Q.4 Write Prim's algorithm and find minimum cost spanning tree of following graph. **08**



Section – II

Q.5 **Attempt any Three:** **12**

a) Write a short note on flow shop scheduling.

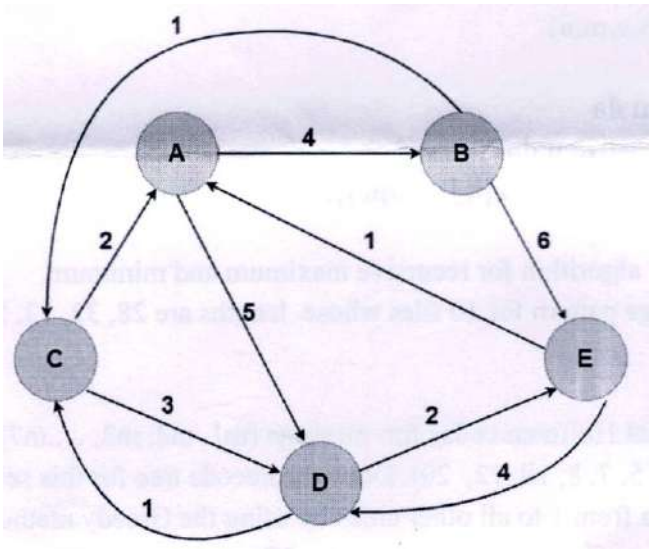
b) State and explain graph coloring problems.

c) Write notes on P, NP, NP-Complete and NP-Hard.

d) Draw portion of solution space tree for 4- Queen problem using backtracking.

Q.6 **Attempt any one:** **08**

a) Find all pairs shortest path using dynamic programming for the following diagraph.



b) Write a short note on the sum of the subset problem. Consider a set S= {5, 10, 12, 13, 15, 18} and m=35. solve it for obtaining a sub of subset.

MCQ/Objective Type Questions

Duration: 30 Minutes Marks:14

Q.1 Choose the correct alternatives from the given options. 14

1) What is the primary challenge addressed by the k-armed bandit problem?
a) Learning a policy for continuous state spaces.
b) Managing a multi-agent environment.
c) Balancing exploration and exploitation.
d) Reducing computational complexity in deep learning.

2) Which of the following is true about reinforcement learning?
a) The agent gets rewards or penalty according to the action
b) It's an online learning
c) The target of an agent is to maximize the rewards
d) All of the above

3) Among the following option identify the one which is not a type of learning _____
a) Supervised Learning
b) Semi Unsupervised learning
c) Unsupervised Learning
d) Reinforcement Learning

4) Which of the following RL element learn from trial and error?
a) Agent b) Reward Signal
c) State d) Action

5) Which is the Application of RL?
a) Robotics b) Data processing
c) Self Driving Car d) All the Above

6) Which component of RL deals with the mapping from states to actions?
a) Policy b) Reward function
c) Value function d) Model

7) In the context of the k-armed Bandit Problem, what does "k" represent?
a) The number of episodes in the learning process
b) The number of states in the environment
c) The number of possible actions or choices
d) The discount factor for future rewards

8) Which of the following algorithms is specifically designed for solving the k-armed Bandit Problem?
a) Monte Carlo Tree Search (MCTS)
b) Proximal Policy Optimization (PPO)
c) Q-Learning
d) K-Means Clustering

9) In reinforcement learning, what is the primary purpose of dynamic programming?
a) To model the environment dynamics accurately
b) To solve problems by breaking them down into simpler subproblems and storing the solutions process
c) To design complex neural network architectures for learning
d) To implement trial and error learning strategies

10) Which of the following elements of reinforcement learning imitates the behavior of the environment?
a) Policy b) Reward Signal
c) Value Function d) Model of the environment

11) What do you mean by SARSA in reinforcement learning?
a) State action reward state action
b) State achievement rewards state action
c) State act reward achievement
d) State act reward act

12) What is the primary advantage of Temporal Difference Learning over Monte Carlo methods?
a) It requires complete episodes for learning.
b) It updates value estimates based on other learned estimates.
c) It uses only one-step updates.
d) It does not require exploration of the state space.

13) How many tuples does MDP consist of?
a) 2 b) 3
c) 4 d) 5

14) The matrix created during the Q- learning algorithm is commonly known as ____

a) Query-table
b) Q-table
c) Quick-matrix
d) Table

Day & Date: Thursday 22-05-2025 Max. Marks: 70
Time: 10:00 AM To 01:00 PM

Instructions: 1) Q. No. 1 is compulsory. It should be solved in the first 30 minutes in Answer Book Page no 03 (Starting page of the Answer Book). Each question carries one mark.
2) Don't forget to Mention question paper set (P/Q/R/S) on top of page.
3) Figures to the right indicates full marks.
4) Make suitable assumptions if necessary and state them clearly.

MCQ/Objective Type Questions

Duration: 30 Minutes Marks:14

Q.1 Choose the correct alternatives from the given options. 14

1) What do you mean by SARSA in reinforcement learning?
a) State action reward state action
b) State achievement rewards state action
c) State act reward achievement
d) State act reward act

2) What is the primary advantage of Temporal Difference Learning over Monte Carlo methods?
a) It requires complete episodes for learning.
b) It updates value estimates based on other learned estimates.
c) It uses only one-step updates.
d) It does not require exploration of the state space.

3) How many tuples does MDP consist of?
a) 2 b) 3
c) 4 d) 5

4) The matrix created during the Q- learning algorithm is commonly known as ____
a) Query-table b) Q-table
c) Quick-matrix d) Table

5) What is the primary challenge addressed by the k-armed bandit problem?
a) Learning a policy for continuous state spaces.
b) Managing a multi-agent environment.
c) Balancing exploration and exploitation.
d) Reducing computational complexity in deep learning.

6) Which of the following is true about reinforcement learning?
a) The agent gets rewards or penalty according to the action
b) It's an online learning
c) The target of an agent is to maximize the rewards
d) All of the above

7) Among the following option identify the one which is not a type of learning _____
a) Supervised Learning
b) Semi Unsupervised learning
c) Unsupervised Learning
d) Reinforcement Learning

8) Which of the following RL element learn from trial and error?
a) Agent b) Reward Signal
c) State d) Action

9) Which is the Application of RL?
a) Robotics b) Data processing
c) Self Driving Car d) All the Above

10) Which component of RL deals with the mapping from states to actions?
a) Policy b) Reward function
c) Value function d) Model

11) In the context of the k-armed Bandit Problem, what does "k" represent?
a) The number of episodes in the learning process
b) The number of states in the environment
c) The number of possible actions or choices
d) The discount factor for future rewards

12) Which of the following algorithms is specifically designed for solving the k-armed Bandit Problem?
a) Monte Carlo Tree Search (MCTS)
b) Proximal Policy Optimization (PPO)
c) Q-Learning
d) K-Means Clustering

13) In reinforcement learning, what is the primary purpose of dynamic programming?
a) To model the environment dynamics accurately
b) To solve problems by breaking them down into simpler subproblems and storing the solutions process
c) To design complex neural network architectures for learning
d) To implement trial and error learning strategies

14) Which of the following elements of reinforcement learning imitates the behavior of the environment?

a) Policy
b) Reward Signal
c) Value Function
d) Model of the environment

Set **R**

T. Y (B.Tech.) (Sem - I) (New) (CBCS) Examination: March/April-2025
COMPUTER SCIENCE & ENGINEERING
Reinforcement Learning (BTN03512)

Day & Date: Thursday 22-05-2025 Max. Marks: 56
Time: 10:00 AM To 01:00 PM

Instructions: 1) All questions are compulsory.
2) Figures to the right indicate full marks.
3) Make suitable assumptions if necessary and state them clearly.

Section – I

Q.2 Attempt Any Four **16**

a) Draw the neat sketch of Reinforcement learning and explain it.
b) What role do Exploration and Exploitation take w.r.t Reinforcement learning?
c) Explain the Concept Goals, Rewards and Return.
d) Define the Unified Notation for Episodic and Continuing Tasks in Reinforcement learning and explain its purpose.
e) Explain the concepts of Optimality and Approximation in Reinforcement Learning.

Q.3 Attempt Any One **06**

a) Discuss Positive and negative Reinforcement Learning with real time example.
b) What is the Markov property? Explain concept of MDP with its elements.

Q.4 List and explain each element of Reinforcement Learning. **06**

Section – II

Q.5 Attempt Any Four **16**

a) Illustrate the working of SARSA (On-Policy TD control) method.
b) Describe Monte Carlo Methods.
c) Explain Asynchronous Dynamic Programming
d) Explain TD-Gammon is a RL algorithm with its features.
e) Explain the significance of Go and AlphaGo in the context of reinforcement learning.

Q.6 Attempt Any One. **06**

a) What is Prioritized sweeping? Why it is needed? Explain it in detail
b) Design Dyna-Q architecture and explain it.

Q.7 Differentiate between model based and model free learning. **06**

Seat No.

Time: 10:00 AM To 01:00 PM

Instructions: 1) Q. No. 1 is compulsory. It should be solved in the first 30 minutes in Answer Book Page no 03 (Starting page of the Answer Book). Each question carries one mark.
2) Don't forget to Mention question paper set (P/Q/R/S) on top of page.
3) Figures to the right indicates full marks.

MCQ/Objective Type Questions

Duration: 30 Minutes Marks:14

Q.1 Choose the correct answer: 14

1) _____ will automatically adjust the axis aspect ratio to match the input data in contour plot.
a) plt.imshow() b) plt.contour()
c) plt.contourf() d) All of the mentioned

2) Which principle is important in data visualization design?
a) Complexity b) Clarity
c) Randomness d) Ambiguity

3) Which function would you use in Matplotlib to create a line plot?
a) plt.bar() b) plt.scatter()
c) plt.plot() d) plt.pie()

4) Data preparation phase include _____ activity
a) Access and combine the data table
b) Look for error
c) Transform data
d) All of the above

5) Which method is commonly used to handle missing values in a dataset?
a) Drop rows b) Fill with median
c) Replace with a constant d) All of the above

6) What is NumPy primarily used for in Python?
a) String manipulation b) Data visualization
c) Numerical computing d) File handling

7) Each column of the table describes a _____ and each row describes an _____

a) Variable, attributes
b) Variables, Observation
c) Variable, features
d) All of the above

8) Multivariate data analysis can be visualized using which of the following chart?

a) Scatter plot matrix
b) Star plots
c) Spider web chart
d) All of the mentioned

9) What is the output of dataframe, head() method?

a) return only the first row
b) return only headers or column name of the DataFrame
c) return the first five rows of the DataFrame
d) throw an exception as it expects parameter(number) in parenthesis

10) In python, Alpha typically refers to the _____ level of a color.

a) Transparency
b) Visibility
c) Clearance
d) Combination

11) Which of the following method is use to show topographical features both on land and under the ocean using Basemap library?

a) bluemarble()
b) etopo()
c) lcc()
d) None

12) Which of the following array is use for getting and setting smaller subarrays within a larger array?

a) Indexing of arrays
b) Reshaping of arrays
c) Slicing of arrays
d) Joining and splitting of arrays

13) The _____ transformation display the range is between 0 and 1.

a) min-max transformation
b) z-score transformation
c) Standard deviation
d) decimal scaling transformation

14) In a dataset, variables like height and weight are examples of which type of variable?

a) Categorical
b) Continuous
c) Ordinal
d) Nominal

Day & Date: Thursday 22-05-2025 Max. Marks: 56
Time: 10:00 AM To 01:00 PM

Instructions: 1) All questions are compulsory.
2) Figures to the right indicate full marks.

Section – I

Q.2 Attempt Any Four (each carried 4 marks) **16**

a) Define the term observation and variable. Describe the types of variables in detail with example.
b) How missing data is handled while preparing the data tables?
c) Write a short note on confidence intervals.
d) Elaborate the process of making sense of data.
e) What do you mean by Fancy Indexing?

Q.3 Attempt Any Two **12**

a) Here are the runs scored by a cricket team in a league of 12 matches - 100, 120, 110, 150, 110, 140, 130, 170, 120, 220, 140, 110. Draw a box plot for the given data and identify the outlier.
b) What do you mean by Central Tendency? Calculate the following statistics with suitable example.
(i) Mode, (ii) Median, (iii) Mean, (iv) Range, (v) Variance,
(vi) Standard deviation
c) Visualize the strong positive correlation between two variables using correlation coefficient method. Use suitable example.

Section – II

Q.4 Attempt Any Four. (each carried 4 marks) **16**

a) Define Exploratory Data Analysis and Elaborate the steps of EDA.
b) Elaborate the features of Pandas.
c) Elaborate Two-Way Contingency Tables with suitable example.
d) What is hierarchical indexing?
e) What is frequency distribution table? Draw a frequency distribution table for suitable example.

Q.5 Attempt Any Two **12**

a) Write the Python code to draw the Scatter Plot, Bar Chart, Histogram using Matplotlib and Seaborn.

b) What are the steps to combine dataset using append, concat & Merge, join in pandas.

c) Design a Radar Chart for product comparison and describe the findings. Let the product is 4 types of smartphones, the axes might include “battery life”, “camera quality”, “screen size”, "processor speed”, “price”. Also list out the benefits and limitations of using Radar chart.

13) Data preparation phase include _____ activity

a) Access and combine the data table
b) Look for error
c) Transform data
d) All of the above

14) Which method is commonly used to handle missing values in a dataset?

a) Drop rows
b) Fill with median
c) Replace with a constant
d) All of the above

Set S

T. Y. (B.Tech.) (Sem-I) (New) (CBCS) Examination: March/April-2025
COMPUTER SCIENCE & ENGINEERING
Data Preprocessing & Visualization (BTN03513)

Day & Date: Thursday 22-05-2025 Max. Marks: 56
Time: 10:00 AM To 01:00 PM

Instructions: 1) All questions are compulsory.
2) Figures to the right indicate full marks.

Section – I

Q.2 Attempt Any Four (each carried 4 marks) **16**

a) Define the term observation and variable. Describe the types of variables in detail with example.
b) How missing data is handled while preparing the data tables?
c) Write a short note on confidence intervals.
d) Elaborate the process of making sense of data.
e) What do you mean by Fancy Indexing?

Q.3 Attempt Any Two **12**

a) Here are the runs scored by a cricket team in a league of 12 matches - 100, 120, 110, 150, 110, 140, 130, 170, 120, 220, 140, 110. Draw a box plot for the given data and identify the outlier.
b) What do you mean by Central Tendency? Calculate the following statistics with suitable example.
(i) Mode, (ii) Median, (iii) Mean, (iv) Range, (v) Variance,
(vi) Standard deviation
c) Visualize the strong positive correlation between two variables using correlation coefficient method. Use suitable example.

Section – II

Q.4 Attempt Any Four. (each carried 4 marks) **16**

a) Define Exploratory Data Analysis and Elaborate the steps of EDA.
b) Elaborate the features of Pandas.
c) Elaborate Two-Way Contingency Tables with suitable example.
d) What is hierarchical indexing?
e) What is frequency distribution table? Draw a frequency distribution table for suitable example.

Q.5 Attempt Any Two **12**

a) Write the Python code to draw the Scatter Plot, Bar Chart, Histogram using Matplotlib and Seaborn.

b) What are the steps to combine dataset using append, concat & Merge, join in pandas.

c) Design a Radar Chart for product comparison and describe the findings. Let the product is 4 types of smartphones, the axes might include “battery life”, “camera quality”, “screen size”, "processor speed”, “price”. Also list out the benefits and limitations of using Radar chart.

Network Security and Secure Coding (BTN03514)

Day & Date: Thursday 22-05-2025 Max. Marks: 70
Time: 10:00 AM To 01:00 PM

Instructions: 1) Q. No. 1 is compulsory. It should be solved in the first 30 minutes in Answer Book Page no 03 (Starting page of the Answer Book). Each question carries one mark.
2) Don't forget to Mention question paper set (P/Q/R/S) on top of page.
3) Figures to the right indicates full marks.
4) Make suitable assumptions if necessary and state them clearly.

MCQ/Objective Type Questions

Duration: 30 Minutes Marks:14

Q.1 Choose the correct option from the options. 14

1) An organization employs hundreds of office workers that use computers to perform their tasks. What is the best plan for informing employees about security issues?
a) Include security policy in the employee handbook
b) Perform security awareness training at the time of hire and annually thereafter
c) Perform security awareness training at the time of hire
d) Require employees to sign the corporate security policy

2) An information system that processes sensitive information is configured to require a valid user id and strong password from any user. This process of accepting and validating this information is known as:
a) Authentication b) Strong authentication
c) Two-factor authentication d) Single sign-on

3) In cryptography, what is cipher?
a) algorithm for performing encryption and decryption
b) encrypted message
c) both (a) and (b)
d) none of the mentioned

4) The is the original message before transformation.
a) ciphertext b) plaintext
c) secret-text d) none of the above

5) _____ is the term used in computer security to protect your data from getting disclosed.
a) Integrity b) Authentication
c) Confidentiality d) Availability

6) Which of the following cannot be achieved by the digital signature in symmetric key encryption?

a) Message authentication b) Data integrity
c) Non-repudiation d) Security of the message

7) What is the existence of weakness in a system or network is known as?

a) Attack b) Exploit
c) Vulnerability d) Threat

8) A _____ attack attempts to learn or make use of information from the system but does not affect system resources.

a) active b) passive
c) none of the above d) all of the above

9) In an asymmetric-key cipher, the sender uses the _____ key.

a) private b) public
c) either (a) or (b) d) neither (a) nor (b)

10) In SHA-512, the message is divided into blocks of size _____ bits for the hash computation.

a) 1024 b) 512
c) 256 d) 1248

11) MACs are also called _____.

a) testword b) checkword
c) testbits d) none of the mentioned

12) Which one of the following is not an application hash functions?

a) One-way password file b) Key wrapping
c) Virus Detection d) Intrusion detection

13) What is the value of opad in the HMAC structure?

a) 00111110 b) 00110010
c) 10110110 d) 01011100

14) What is the PGP stand for?

a) Permuted Gap Permission b) Permuted Great Privacy
c) Pretty Good Permission d) None of the mentioned

Day & Date: Sunday, 25-05-2025 Max. Marks: 50
Time: 10:00 AM To 12:00 PM

Instructions: 1) Q. No. 1 is compulsory. It should be solved in the first 20 minutes in answer book Page no 03 (Starting page of the Answer Book). Each question carries one mark.
2) Don't forget to Mention question paper set (P/Q/R/S) on top of page.
3) Figures to the right indicates full marks.
4) Assume suitable data if required and state it clearly.

MCQ/Objective Type Questions

Duration: 20 Minutes Marks: 10

Q.1 Choose the correct alternatives from the options. 10

1) Which one of the following is not the function of money?
a) Medium of exchange
b) Measure of Happiness
c) Standard of deferred payment
d) Store of value

2) Which one of the following cost can never become zero?
a) Average cost b) Fixed cost
c) Marginal cost d) Variable cost

3) Which of the following market structures has a predominant feature of price leadership?
a) Perfectly competitive b) Monopoly
c) Oligopoly d) Monopolistic

4) Average revenue is _____
a) Total revenue divided by the number of units sold
b) Revenue earned by all the units of the output
c) Revenue earned by the average sized firm in the industry
d) Net addition made to the total revenue by selling one more unit of a commodity

5) Which of these is an economic activity?
a) Father teaching his son at home instead of spending on coaching
b) A housewife making food for the family on her own
c) A hair dresser doing hair cut designing on payment
d) A singer giving a show on his son's wedding anniversary

6) Which of the following is NOT an account in the Balance of Payments?

a) Current Account b) Capital Account
c) Financial Account d) Future Account

7) Which of the following is not a regulatory institution in Indian financial system?

a) RBI b) CIBIL
c) SEBI d) IRDA

8) In a mixed economy which sector (s) is 1 are found _____

a) Private only b) Public only
c) None d) Both (a) Private and (b)Public

9) Who is known as father of economics?

a) Adam Smith b) Prof. A. Samulson
c) Alfred Marshall d) J. R. Hicks

10) Micro and Macro are not two independent approaches to economic analysis but they are complementary to each other.

a) False b) True
c) Partly true d) Partly False

   d) All the above

8) The main core human values are _____.
   a) Right conduct b) Peace
   c) Both a & b d) None of these

9) Preconditioning is ____.
   a) Assuming without knowing b) Knowing without assuming
   c) Only assuming d) Only knowing

10) Value education deals with ____.
   a) What is universally valuable to all of us
   b) What is conductive to our individual and collective of us
   c) Enables to be in harmony with ourselves, other and rest of nature
   d) All of the above

T. Y. (B.Tech.) (Sem - I) (New) (CBCS) Examination: March/April – 2025
COMPUTER SCIENCE AND ENGINEERING
Professional Ethics and Human Value (BTN03510)

Day & Date: Sunday, 25-05-2025 Max. Marks: 40
Time: 10:00 AM To 12:00 PM

Instructions: 1) All questions are compulsory.
2) Figures to the right indicate full marks.
3) Assume additional data, if required and state it clearly.

Q.2 List the human values. Explain any two in detail. **10**

OR

Write a detailed note on assessment of safety and risk.

Q.3 Explain the role of Engineers as manager. **10**

OR

List and explain the skills required to handle moral problems in Engineering Ethics.

Q.4 **Write short notes: (Any Four)** **20**

a) Honesty
b) Self-Confidence
c) The Three Mile Island Theory
d) Character
e) Trade secret
f) Cooperation

Professional Ethics and Human Value (BTN03510)

Day & Date: Sunday, 25-05-2025 Max. Marks: 50
Time: 10:00 AM To 12:00 PM

Instructions:1) Q. No. 1 is compulsory. It should be solved in the first 20 minutes in answer bookPage no 03 (Starting page of the Answer Book). Each question carries one mark.
2) Don't forget to Mention question paper set (P/Q/R/S) on top of page.
3) Figures to the right indicates full marks.
4) Assume suitable data wherever needed & mention it clearly.

MCQ/Objective Type Questions

Duration: 20 Minutes Marks:10

Q.1 Choose amongst the alternatives. **10**

1) _____ is defined as the duty, obligation or even authority.
a) Work b) Responsibility
c) Democracy d) Authority

2) The study on ethics helps to know the people's _____.
a) Learn good or bad things
b) Copyright
c) Morality
d) Beliefs, values, and morals

3) The objectives of professional ethics in engineering are _____.
a) To understand the moral values that ought to guide the Engineering profession
b) To resolve the moral issues in the profession, and
c) To justify the moral judgment concerning the profession
d) All the above

4) The main core human values are _____.
a) Right conduct b) Peace
c) Both a & b d) None of these

5) Preconditioning is ____.
a) Assuming without knowing b) Knowing without assuming
c) Only assuming d) Only knowing

6) Value education deals with ____.
   a) What is universally valuable to all of us
   b) What is conductive to our individual and collective of us
   c) Enables to be in harmony with ourselves, other and rest of nature
   d) All of the above

7) Courage is the tendency to accept and face ____.
   a) Self-confidence
   b) Risks and difficult tasks in rational ways
   c) Physical courage
   d) Social courage

8) Human life is lived at four levels individuals, family, society and ____.
   a) Nature b) Nurture
   c) World d) Universe

9) Ethics is the word that refers to _____.
   a) Human tendency b) Morals, values, and beliefs
   c) Only Values d) Psychology

10) Word ethichs is definded as a _____
   a) Motivation
   b) Set of attitudes concerned with the value of work
   c) Attitude
   d) Values

MCQ/Objective Type Questions

Duration: 30 Minutes Marks:14

Q.1 Multiple Choice Questions **14**

1) Execution gap is the gap between _____
a) Application Domain & Execution Domain
b) Programming Language Domain & Execution Domain
c) Application Domain & Programming Language Domain
d) None of the above

2) Which of the following is/are advanced assembler directives?
a) START b) READ
c) EQU d) PRINT

3) _____ statement indicates an action to be performed during the execution of the assembled program.
a) Declarative b) Imperative
c) Assembler directives d) All of above

4) Assembly language program is called _____
a) Object program b) Source program
c) Oriented program d) All of these

5) The statement used to perform auxiliary function is _____
a) Model statement b) Conditional statement
c) Preprocessor statement d) prototype statement

6) A macro prototype statement consists of _____
a) Actual parameters b) Formal Parameters
c) Model statements d) none of these

7) A model statement is a statement from which a/an _____ language statement may be generated during macro expansion.
a) Machine b) Assembly
c) Target d) None

8) _____ are generated as output of semantic analysis.
a) Parse Trees b) Tokens
c) Sequence of actions d) Intermediate representation

9) Reduction in frequency means _____
a) Replacing run time computation by compile time computation
b) Removing loop invariant computation
c) Removing common sub expression
d) Replacing a costly operation by a relatively cheaper one

10) Compiler bridges a semantic gap between which domains?
a) Application & Execution b) Application & PL
c) PL & execution d) none of these

11) After actual locations for main storage are known, a _____ adjusts relative addresses to these actual locations.
a) Relocating loader b) Locating loader
c) Default loader d) None of these

12) Binding of external reference to the link time address is called _____
a) Translation b) Loading
c) Linking d) None of these

13) In absolute loader function of linking is done by _____
a) Linker b) Loader
c) Programmer d) Assembler

14) In direct linking loader which is not related with object program?
a) ESD b) RLD
c) BSS d) TXT

Time: 10:00 AM To 01:00 PM

Instructions: 1) All questions are compulsory.
2) Figures to the right indicate full marks.

Section – I

Q.2 Attempt any three. **12**

a) List and explain advanced assembler directives.
b) Describe concept of grammar along with its type.
c) Explain types of assembly statements.
d) Explain concept Macro expansion.

Q.3 Attempt any two. **16**

a) Explain the concept of
i) Front end of Toy compiler ii) Back end of Toy compiler
b) List and explain fundamental of language specification.
c) Consider the following code generate
1. Symbol table 2. Literal table 3. Mnemonic table 4. Pool table
5. Intermediate code.

```
        START    200
        MOVER    AREG,    ='5'   200) +04   1   211
        MOV EM   AREG,    A      201) +05   1   217
LOOP    MOVER    AREG,    A      202) +04   1   217
        MOVER    AREG,    B      203) +05   3   218
        ADD      CREG,    B      204) +01   3   212
        …..
        BC       ANY,     NEXT   210) +07   6   214
        LTORG
                 = '5'           211) +00   0   005
                 = '1'           212) +00   0   001
        ……
NEXT    SUB      AREG,    = '1'  214) +02   1   219
        BC       LT, BACK        215) +07   1   202
LAST    STOP                     216) +00   0   000
        ORIGIN   LOOP   +1
        MULT     C      REG, B   204) +03   3   218
        ORIGIN   LAST   +1
A       DS       1               217)
BACK    EQU      LOOP
B       DS       1               218)
        END

Section – I

Q.2 Attempt any three. **12**

a) List and explain advanced assembler directives.
b) Describe concept of grammar along with its type.
c) Explain types of assembly statements.
d) Explain concept Macro expansion.

Q.3 Attempt any two. **16**

a) Explain the concept of
i) Front end of Toy compiler ii) Back end of Toy compiler
b) List and explain fundamental of language specification.
c) Consider the following code generate
1. Symbol table 2. Literal table 3. Mnemonic table 4. Pool table
5. Intermediate code.

```
        START    200
        MOVER    AREG,    ='5'   200) +04   1   211
        MOV EM   AREG,    A      201) +05   1   217
LOOP    MOVER    AREG,    A      202) +04   1   217
        MOVER    AREG,    B      203) +05   3   218
        ADD      CREG,    B      204) +01   3   212
        …..
        BC       ANY,     NEXT   210) +07   6   214
        LTORG
                 = '5'           211) +00   0   005
                 = '1'           212) +00   0   001
        ……
NEXT    SUB      AREG,    = '1'  214) +02   1   219
        BC       LT, BACK        215) +07   1   202
LAST    STOP                     216) +00   0   000
        ORIGIN   LOOP   +1
        MULT     C      REG, B   204) +03   3   218
        ORIGIN   LAST   +1
A       DS       1               217)
BACK    EQU      LOOP
B       DS       1               218)
        END
                 = '1'           219) +00   0   001
```

Section – II

Q.4 Attempt any three **12**

a) Explain the concept of control flow analysis and data flow analysis.
b) Explain operand descriptor and register descriptor used in compilation of expressions.
c) Explain Relocation and linking concepts.
d) Explain the concept of Interpreter in detail.

Q.5 Attempt any Two. **16**

a) Explain compilation of expressions in detail.
b) Discuss linking for overlays in detail.
c) List different loading schemes and explain any two.

T.Y. (B.Tech.) (Sem - II) (New) (CBCS) Examination: March/April - 2025
COMPUTER SCIENCE & ENGINEERING
Internet of Things (BTN03602)

Day & Date: Thursday, 29-May-2025 Max. Marks: 70
Time: 10:00 AM To 01:00 PM

Instructions: 1) Q. No. 1 is compulsory. It should be solved in the first 30 minutes in Answer Book Page no 03 (Starting page of the Answer Book). Each question carries one mark.
2) Don't forget to Mention question paper set (P/Q/R/S) on top of page.
3) Figures to the right indicates full marks.
4) Assume suitable data if necessary.

MCQ/Objective Type Questions

Duration: 30 Minutes Marks:14

Q.1 Multiple Choice Questions **14**

1) Which is not an application of IoT?
a) Smart home b) E-Commerce
c) Industrial Automation d) Healthcare

2) Which communication technology is commonly used in IoT?
a) Wi-Fi b) Bluetooth
c) Zigbee d) All of these

3) Sensors are responsible for _____
a) Sending commands b) Sensing data
c) Controlling applications d) None

4) Which of the following protocol is used for data communication?
a) MQTT b) HTTPS
c) POP3 d) DNS

5) Which IEEE standard is used for low power IoT communication?
a) IEEE 802.15.4 b) IEEE 802.11
c) IEEE 802.3 d) IEEE 802.1

6) Which business model is associated with IoT innovation?
a) Subscription based b) Pay-per-use
c) Value creation d) All of these

7) IoT in agriculture used for _____
a) Crop monitoring b) Predictive maintenance
c) Industrial automation d) None

8) Which of the following is a primary concern in IoT security?
a) Cost b) Privacy
c) Scalability d) Speed

9) Which layer of IoT uses 6L0WPAN?
a) Application Layer b) Network Layer
c) Physical Layer d) Transport Layer

10) Which technology is used for proximity communication in IoT?
a) Bluetooth b) RFID
c) ZigBee d) All of these

11) IoT uses _____ to integrate physical devices with digital networks.
a) Sensors and actuators b) Only sensors
c) Only actuators d) Big data tools

12) What is the logical design of IoT primarily concerned with?
a) Physical devices
b) Energy sources
c) Functional blocks and communication models
d) Protocol hardware

13) REST service is characterized by _____
a) Bi-directional model b) Request response model
c) Full duplex model d) Unidirectional model

14) What are the key components of a M2M system?
a) Vortex DDS b) Protocols
c) Sensors and wi-fi d) Smart homes

T.Y. (B.Tech.) (Sem - II) (New) (CBCS) Examination: March/April - 2025
COMPUTER SCIENCE & ENGINEERING
Internet of Things (BTN03602)

Day & Date: Thursday, 29-May-2025 Max. Marks: 56
Time: 10:00 AM To 01:00 PM

Instructions: 1) All questions are compulsory.
2) Figures to the right indicate full marks.
4) Assume suitable data if necessary.

Section – I

Q.2 Solve any three of the following questions **12**

a) Define actuator. Explain different types of it.
b) Explain the features of IoT.
c) Describe an example of IoT service that uses publish-subscriber model.
d) Differentiate between servo motor and stepper motor.

Q.3 Solve any Two **16**

a) Explain Level-1 and level-4 of IoT deployment template with example.
b) What is participatory sensing? Explain Automotive and industrial IoT in detail.
c) Write a note on IoT communication technologies.

Section – II

Q.4 Solve any Three **12**

a) Write a short note on 6LowPAN Protocol
b) Define use case and misuse case. Draw use case and misuse case diagram for smart irrigation system.
c) Write an applications of IoT for healthcare monitoring.
d) Explain REST in detail.

Q.5 Solve any Two **16**

a) Explain CoAP Protocol in detail.
b) Write a note on Value creation in IoT and Business model innovation for IoT.
c) Explain IoT security tomography and layered attacker model.

3) Figures to the right indicates full marks.

MCQ/Objective Type Questions

Duration: 30 Minutes Marks:14

Q.1 Choose the correct alternatives: **14**

1) SDLC stands for _____
a) System Development Life cycle
b) Software Development Life cycle
c) Software Design Life Cycle
d) System Design Life Cycle

2) What is the sequence of maturity levels in CMM framework?
a) Initial, defined, repeatable, managed, and optimizing
b) Initial, defined, repeatable, optimizing, and managed
c) Initial, repeatable, defined, managed, and optimizing
d) Initial, repeatable, defined, optimizing, and managed

3) The second step in software development life cycle is _____
a) System Design
b) Requirement analysis and specification
c) System Testing
d) Coding

4) _____ is defined as the auditing and reporting procedures used to provide the stakeholders with data needed to make well-informed decisions.
a) Quality Control b) Quality Assurance
c) Quality Assessment d) None of these

5) _____ cohesion occurs when there is no meaningful relationship among the elements of a module.
a) Logical b) Temporal
c) Coincidental d) Sequential

6) Black box testing is also called as_____.
a) structural testing b) interface testing
c) stress testing d) Functional testing

7) _____ analysis is the key to learning from the past so to provide future improvements.
a) Project closure b) Functional closure
c) Quality closure d) Risk

8) _____ provide quantitative information to the Management process.
a) Quality b) Metrics
c) Schedule d) Planning

9) CMM means _____
a) Common Maturity Model
b) Cost Maturity Model
c) Capability Maturity Model
d) All

10) An SRS provides a reference for _____ of the final product.
a) Verification b) Implementation
c) Validation d) Justification

11) White Box Testing is also called as _____
a) functional testing b) structural testing
c) stress testing d) interface testing

12) _____ coupling occurs due to methods of a class invoking methods of other classes.
a) Component b) Interaction
c) Inheritance d) Simple

13) Which is the worst type of coupling?
a) Control coupling b) Data coupling
c) Content coupling d) None of the above

Set R

T.Y. (B.Tech.) (Sem - II) (New) (CBCS) Examination: March/April - 2025
COMPUTER SCIENCE & ENGINEERING
Software Engineering (BTN03603)

Day & Date: Monday, 02-June-2025 Max. Marks: 70
Time: 10:00 AM To 01:00 PM

Instructions: 1) Q. No. 1 is compulsory. It should be solved in the first 30 minutes in Answer Book Page no 03 (Starting page of the Answer Book). Each question carries one mark.
2) Don't forget to Mention question paper set (P/Q/R/S) on top of page.
3) Figures to the right indicates full marks.

MCQ/Objective Type Questions

Duration: 30 Minutes Marks:14

Q.1 Choose the correct alternatives: **14**

1) White Box Testing is also called as _____
a) functional testing b) structural testing
c) stress testing d) interface testing

2) _____ coupling occurs due to methods of a class invoking methods of other classes.
a) Component b) Interaction
c) Inheritance d) Simple

3) Which is the worst type of coupling?
a) Control coupling b) Data coupling
c) Content coupling d) None of the above

4) CMM provides a general roadmap to _____
a) Test the software b) Develop the software
c) Improve the software process d) All of these

5) SDLC stands for _____
a) System Development Life cycle
b) Software Development Life cycle
c) Software Design Life Cycle
d) System Design Life Cycle

6) What is the sequence of maturity levels in CMM framework?
a) Initial, defined, repeatable, managed, and optimizing
b) Initial, defined, repeatable, optimizing, and managed
c) Initial, repeatable, defined, managed, and optimizing
d) Initial, repeatable, defined, optimizing, and managed

7) The second step in software development life cycle is _____
a) System Design
b) Requirement analysis and specification
c) System Testing
d) Coding

8) _____ is defined as the auditing and reporting procedures used to provide the stakeholders with data needed to make well-informed decisions.
a) Quality Control
b) Quality Assurance
c) Quality Assessment
d) None of these

9) _____ cohesion occurs when there is no meaningful relationship among the elements of a module.
a) Logical
b) Temporal
c) Coincidental
d) Sequential

10) Black box testing is also called as_____.
a) structural testing
b) interface testing
c) stress testing
d) Functional testing

11) _____ analysis is the key to learning from the past so to provide future improvements.
a) Project closure
b) Functional closure
c) Quality closure
d) Risk

12) _____ provide quantitative information to the Management process.
a) Quality
b) Metrics
c) Schedule
d) Planning

13) CMM means _____
a) Common Maturity Model
b) Cost Maturity Model
c) Capability Maturity Model
d) All

14) An SRS provides a reference for _____ of the final product.
a) Verification
b) Implementation
c) Validation
d) Justification

T.Y. (B.Tech.) (Sem - II) (New) (CBCS) Examination: March/April - 2025
COMPUTER SCIENCE & ENGINEERING
Software Engineering (BTN03603)

Day & Date: Monday, 02-June-2025 Max. Marks: 56
Time: 10:00 AM To 01:00 PM

Instructions: 1) All questions are compulsory.
2) Figures to the right indicate full marks.

Section – I

Q.2 Attempt Any Three. (Each carries 4 marks) **12**

a) What are the different components of SRS?
b) What are the different characteristics of a software process?
c) Explain prototyping model. Give its strength and weaknesses.
d) Explain requirement process.
e) What is cohesion? Describe all types of cohesion used in design.

Q.3 Attempt Any Two. (Each carries 8 marks) **16**

a) What is SRS? Explain different need and characteristics of SRS.
b) Explain in detail coupling and cohesion.
c) Describe Spiral model of software development in detail.

Section – II

Q.4 Attempt Any Three. (Each carries 4 marks) **12**

a) Describe black box testing in detail.
b) Write a short note on CMM.
c) Write a short note on iterative project management life cycle.
d) Explain quality concepts and quality planning.
e) Describe new management responsibilities in agile project management.

Q.5 Attempt Any Two (Each carries 8 marks) **16**

a) Describe white box testing in detail.
b) What is risk management? Explain in detail risk management activities.
c) Explain defect analysis and prevention.

Day & Date: Wednesday, 04-June-2025 Max. Marks: 70
Time: 10:00 AM To 01:00 PM

Instructions: 1) Q. No. 1 is compulsory. It should be solved in the first 30 minutes in Answer Book Page no 03 (Starting page of the Answer Book). Each question carries one mark.
2) Don't forget to Mention question paper set (P/Q/R/S) on top of page.
3) Figures to the right indicates full marks.
4) Assume suitable data if necessary.

MCQ/Objective Type Questions

Duration: 30 Minutes Marks:14

Q.1 Choose the correct alternatives from the options. 14

1) Data should be _____ and _____ in an _____ form for security purpose.
a) Transferred, stored, decrypted
b) Stored, encrypted, transferred
c) Transferred, stored, encrypted
d) None of these

2) Which of the following are the features of cloud computing?
a) Security b) Availability
c) Large Network Access d) All of the mentioned

3) Which component allocates hardware resources to virtual machines?
a) Guest operating system
b) Hypervisor
c) Host operating system
d) Virtual disk manager

4) Which virtualization technology is developed by VMware?
a) Hyper-V b) VirtualBox
c) KVM d) vSphere

5) What is the main advantage of using virtual machines for software testing and development?
a) Ability to run games and graphics-intensive applications
b) Access to a faster internet connection
c) Isolation of testing environments from the host system
d) Integration of multiple operating systems into a single environment

6) What does the “multi-tenancy” feature in SaaS refer to?
a) The ability to serve multiple tenants at different physical locations
b) Running the same software instance for all customers
c) The ability to have multiple user accounts in the same organization
d) Hosting data on multiple servers for redundancy

7) Which of the following is NOT a benefit of SaaS?
a) Centralized management
b) High level of customization
c) Accessible from anywhere with an internet connection
d) Lower total cost of ownership

8) Which of the following is the SaaS's characteristics?
a) Usually, the license is subscription-based or usage-based and is billed on a recurring basis.
b) The software and the service are observed and maintained usually by the vendor.
c) Software mostly available over the internet across the world and can be provided according to the demand through the browser.
d) All of the above

9) _____ refers to cloud users being able to take their tools, applications, virtual images etc. and use them in another cloud environment without having to do any rework.
a) Portability
b) Interoperability
c) Multitenancy
d) None of the Above

10) _____ is a formal contract between a Service Provider (SP) and a Service Consumer (SC).
a) SLO
b) SLA
c) KPI
d) Utility Premium

11) For businesses, the greatest value of IaaS is through a concept known as _____ which is a process of offloading tasks to the cloud during times when the most compute resources are needed.
a) cloud bursting
b) cloud enabler
c) cloud spanning
d) cloud portability

12) Google Apps is a suite of cloud computing _____ applications that includes e-mail (Gmail), Organizer (Google Calendar), Word Processing documents (Google Docs), and others.
a) IaaS
b) PaaS
c) SaaS
d) None of the Above

13) On which one of the following utility computing is based?
a) Grid Computing Model
b) SOA Model
c) Virtual isolation Model
d) Pay-per-Use model

14) _____ where a VM can be moved from one physical machine to another even as it continues to execute.

a) Load balancing
b) Migration
c) Live migration
d) Server consolidation

c) Explain the concept of seven-step model of migration into a cloud.

Section – II

Q.4 Attempt any three **12**

a) Explain the implementation guidelines for Aneka hybrid cloud.
b) Write a note on security service boundary.
c) Explain auditing and compliance in terms of cloud security.
d) Write a note on Windows Azure identity standards.

Q.5 Attempt any two **16**

a) Explain securing data stored in the cloud in terms of:
i) Brokered cloud storage access
ii) Storage location and tenancy
b) Explain autonomic behavior of Comet cloud.
c) Write a note on Commercial and Business Considerations-A Cloud User's Viewpoint.

T.Y. (B.Tech.) (Sem - II) (New) (CBCS) Examination: March/April - 2025
COMPUTER SCIENCE & ENGINEERING
Network Security (BTN03608)

Day & Date: Wednesday, 04-June-2025 Max. Marks: 70
Time: 10:00 AM To 01:00 PM

Instructions: 1) Q. No. 1 is compulsory. It should be solved in the first 30 minutes in Answer Book Page no 03 (Starting page of the Answer Book). Each question carries one mark.
2) Don't forget to Mention question paper set (P/Q/R/S) on top of page.
3) Figures to the right indicates full marks.

MCQ/Objective Type Questions

Duration: 30 Minutes Marks:14

Q.1 Choose the correct option from the following **14**

1) Caesar Cipher is an example of _____
a) Poly-alphabetic Cipher b) Mono-alphabetic Cipher
c) Multi-alphabetic Cipher d) Bi-alphabetic Cipher

2) What is the rule for encryption in playfair cipher if the letters in a pair appear in same column?
a) they are replaced by the letter appearing immediately below them respectively
b) they are replaced by the letter appearing immediately right to them respectively
c) they are replaced by the letters at the corner of the row
d) that pair is neglected

3) The DES algorithm has a key length of _____
a) 128 Bits b) 32 Bits
c) 64 Bits d) 16 Bits

4) Which one of the following is not a cryptographic algorithm - JUPITER, Blowfish, RC6, Rijndael and Serpent?
a) JUPITER b) Blowfish
c) Serpent d) Rijndael

5) How many rounds does the AES-192 perform?
a) 10 b) 12
c) 14 d) 16

6) _____ is the method for keeping sensitive information in email communication & accounts secure against unofficial access, loss, or compromise.
a) Email security b) Email hacking
c) Email protection d) Email safeguarding

7) With respect to IEEE 802.11 Wireless LAN, MSDU stands for _____
a) MAC service data unit
b) Main server data user
c) Multiframe service datagram usage
d) MAC server device usage

8) The authentication scheme CMAC indicates _____
a) Clock MAC b) Cipher-based MAC
c) Caesar MAC d) None of above

9) The process of verifying the identity of a user _____
a) Authentication b) Identification
c) Validation d) Verification

10) SHA-1 produces a hash value of _____
a) 256 bits b) 160 bits
c) 180 bits d) 128 bits

11) Which of the following are used to create a message digest by the network security protocols?
a) RSA b) SHA-1
c) DES d) MD5

12) Rail fence technique is _____
a) Substitution technique b) Transposition technique
c) Mono alphabetic cipher d) none of these

13) PGP (Pretty Good Privacy) provides _____
a) Non repudiation b) Integrity
c) Both a and b d) None of above

14) Which component is included in IP security?
a) Authentication Header (AH)
b) Encapsulating Security Payload (ESP)
c) Internet key Exchange (IKE)
d) All of the mentioned

Time: 10:00 AM To 01:00 PM

Instructions: 1) All questions are compulsory.
2) Figures to the right indicate full marks.

Section – I

Q.2 Solve any four questions. **16**
- **a)** Explain Caeser Cipher with example.
- **b)** Describe OSI Security Architecture.
- **c)** Differentiate between Active Attack and Passive Attack.
- **d)** Describe Diffie - Hellman key exchange algorithm.
- **e)** Write a note on: Cryptographic Hash Functions

Q.3 Solve any two questions. **12**
- **a)** Explain the DES encryption algorithm with a diagram.
- **b)** What is SHA? Explain in detail.
- **c)** Explain Digital Signatures and the Elgamal Digital Signature Scheme in detail.

Section – II

Q.4 Solve any four questions. **16**
- **a)** Explain CMAC with the help of diagram.
- **b)** Differentiate between CCM and GCM.
- **c)** Write a note on MACs Based on Block Ciphers DAA.
- **d)** What is S/MIME? Explain in detail.
- **e)** What are IP Security Policy? Elaborate it.

Q.5 Solve any two questions. **12**
- **a)** What is HMAC? Draw the HMAC structure and write and explain the HMAC Algorithm.
- **b)** Internet Mail Architecture and Email Formats.
- **c)** Explain Pseudorandom Number Generation Using Hash Functions and MACs.

T.Y. (B.Tech.) (Sem - II) (New) (CBCS) Examination: March/April - 2025
COMPUTER SCIENCE & ENGINEERING
Disaster Management (BTN03611)

Day & Date: Friday, 06-June-2025 Max. Marks: 50
Time: 10:00 AM To 01:00 PM

Instructions: 1) Q. No. 1 is compulsory. It should be solved in the first 20 minutes in Answer Book Page no 03 (Starting page of the Answer Book). Each question carries one mark.
2) Don't forget to Mention question paper set (P/Q/R/S) on top of page.
3) Figures to right indicates full marks.

MCQ/Objective Type Questions

Duration: 30 Minutes Marks:10

Q.1 Choose the correct alternative from the options. 10

1) An example of an anthropogenic disaster is ____
a) a road accident b) an earth tremor
c) a landslide d) a volcanic eruption

2) _____ Phase starts after the immediate threat to human life has subsided.
a) Recovery b) Preparedness
c) Response d) Mitigation

3) Tsunami results from _____
a) an Earthquake b) a volcanic eruption
c) a tropical disturbance d) a tropical depression

4) Arson, civil disorder, and terrorism fall under _____
a) political disaster b) industrial disaster
c) human disaster d) sociological disaster

5) Weapons that can be widely dispersed in gas, liquid and solid forms are _____
a) biological weapons b) nuclear weapons
c) radiological weapons d) chemical weapons

6) Disaster management is a science because _____
a) it involves skill in conducting human activity
b) it involves an ongoing scientific investigation and research to find ways for better management of disasters
c) it attains perfection through practice
d) creative and innovative techniques are its pre-requisites

7) The rating parameters for capacity assessment does not include _____
a) sufficient b) satisfactory
c) needs improvement d) deficient

8) The first phase of disaster management cycle is _____

a) preparedness b) mitigation
c) response d) recovery

9) The second emotional phase of disaster affected people is _____

a) acute phase b) reaction phase
c) recovery phase d) reorientation phase

10) Providing food, water and medical help activity belongs to_____ phase of disaster management.

a) Response b) Preparedness
c) Recovery d) Mitigation

Disaster Management (BTN03611)

Day & Date: Friday, 06-June-2025 Max. Marks: 40
Time: 10:00 AM To 01:00 PM

Instructions: 1) All questions are compulsory.
2) Figures to the right indicate full marks.

Section – I

Q.2 Solve: (Any One) **10**
a) Write an account on geomorphic (geological) hazards.
b) Which things we need to consider for the selection of sites for industries and residential buildings? Explain.

Q.3 Solve: (Any One) **10**
a) Discuss the types of disaster, giving suitable example.
b) Describe Disaster mitigation meaning and concept.

Section – II

Q.4 Solve: (Any Two) **10**
a) Elaborate the cyclone early warning system.
b) After disaster, which are the essential services should be made functional on a priority basis according to you?
c) Discuss the role of Indian Meteorological observatories in disaster mitigation activities.

Q.5 Solve: (Any One) **10**
a) Consider a war disaster circumstances in border region of your country, being a Disaster Manager, how will you manage this disaster? Discuss with reference to the Disaster Management Cycle.
b) Discuss major medium- and long-term recovery aspects with example.

MCQ/Objective Type Questions

Duration: 30 Minutes Marks:14

Q.1 MCQ/Objective Types Questions **14**

1) Which of the following includes major tasks of NLP?
a) Automatic Summarization b) Discourse Analysis
c) Machine Translation d) All of the mentioned

2) Choose from the following areas where NLP can be useful.
a) Automatic Text Summarization
b) Automatic Question-Answering Systems.
c) Information Retrieval
d) All of the mentioned

3) What is Morphological Segmentation?
a) Does Discourse Analysis
b) Separate words into individual morphemes and identify the class of morphemes
c) Is an extension of propositional logic
d) None of the mentioned.

4) Natural Language generation is the main task of Natural language processing.
a) True b) False

5) IR (information Retrieval) and IE (information Extraction) are the two same thing.
a) True b) False

6) Many words have more than one meaning; we have to select the meaning which makes the most sense in context. This can be resolved by _____
a) Fuzzy Logic b) Word Sense Disambiguation
c) Sallow Semantic Analysis d) All of the mentioned

7) In linguistic morphology _____ is the process for reducing inflected words to their root form.

a) Rooting
b) Stemming
c) Text-Proofing
d) Both Rooting & Stemming.

8) Which NLP task involves determining the grammatical structure of a sentence, including its parts of speech (e.g., noun, verb, adjective)?

a) Named Entity Recognition
b) Sentiment Analysis
c) Part-of-Speech Tagging
d) Machine Translation

9) Which of the following is a common preprocessing step in NLP for converting text to a uniform format by removing punctuation, capitalization, and stop words?

a) Stemming
b) Tokenization
c) Lemmatization
d) Normalization

10) What is the purpose of “lemmatization’’ in NLP?

a) To group words into topics
b) To split text into individual words or tokens
c) To reduce words to their base or dictionary form
d) To recognize named entities

11) _____ is the step in which an input sentence is converted into a hierarchical structure that corresponds to the units of meaning in the sentence.

a) Syntactic Processing
b) Semantic Processing
c) Graph Processing
d) All of the mentioned

12) “I saw bats” contains which type of ambiguity?

a) Syntactic
b) Semantic
c) Lexical
d) Anaphoric

13) Parsing determines Parse Trees (Grammatical Analysis) for a given sentence.

a) True
b) False

14) Which is a collection of documents?

a) Ngrams
b) Corpus
c) Tokenization
d) Stopwords

Section – I

Q.2 Attempt Any Four: **16**

a) Write a short note on Wiktionary.
b) What the advantages and disadvantages of NLP?
c) Write a short note on phases of NLP.
d) Define inside and outside probability of parse tree.
e) Explain Lexical knowledge Networks in detail.

Q.3 Attempt Any Two. **12**

a) Find the possible parse trees of the given probabilistic grammar and find most likely parse tree.
S→NP VP 1.0 DT→ The 1.0
NP→DT NN 0.5 NN→ gunman 0.5
NP→NNS 0.3 NN→ building 0.5
NP→NP PP 0.2 VBD→ sprayed 1.0
PP→P NP 1.0 NNS→ bullets 1.0
VP→VP PP 0.6 P→ with 1.0
VP→VBD NP 0.4
Sentence: The gunman sprayed the building with bullets.
b) What is wordnet and explain different relations in wordnet with example?
c) Explain different semantic roles with example.

Section – II

Q.4 Attempt Any Four. **16**

a) Write short note on Phonetics and Morphology.
b) Explain need of Name Entity Recognition with example.
c) Explain Morphological diversity of Indian Languages
d) Explain Universal Networking Language with example.
e) Explain Morphology and morphological paradigms in detail.

Q.5 Attempt Any Two. **12**

a) Explain Sentiment analysis with example.
b) Write a short note in Baum Welch Algorithm.
c) Explain passage merging and answer merging multilingual question answering system.

MCQ/Objective Type Questions

Duration: 30 Minutes Marks:14

Q.1 Choose the correct alternatives from the options. 14

1) In Python _____ package offers all the functionality needed to create and manipulate matrices.
a) Scipy b) Numpy
c) Sklearn d) None

2) Which machine learning models are trained to make a series of decisions based on the rewards and feedback they receive for their actions?
a) Supervised learning b) Unsupervised learning
c) Reinforcement learning d) All of the above

3) A feature F1 can take certain value: 'Poor', 'Average', 'Good', 'Excellent' and represents performance of students from a college. Here feature type is _____.
a) Nominal b) Ordinal and categorical
c) Boolean d) None

4) Which of the following is true about bagging?
1. Bagging can be parallel
2. The aim of bagging is to reduce bias not variance
3. Bagging helps in reducing overfitting
a) 1 and 2 b) 2 and 3
c) 1 and 3 d) All of these

5) _____ is a resampling procedure used to evaluate machine learning models on a limited data sample.
a) Cross Validation b) Testing
c) Training d) None

6) Which of following steps are required to apply machine learning technique to support business strategy.

a) What is the business problem you are trying to solve
b) When are the hidden data resources that you can take advantage
c) How can you prepare to get your data
d) All

7) _____ are displays in which you plot the performance of one or more machine learning algorithms with respect to the quantity of data they use for training.

a) Learning curves
b) Under fitting
c) Overfitting
d) All of above

8) If you're looking for an image filter, you can clean up your images using _____.

a) Median filter
b) Total variation denoising
c) Gaussian filter
d) All of these

9) Cross validation is based on _____ method.

a) under fitting
b) overfitting
c) k-fold
d) none

10) Regression is defined as _____.

a) Mathematical relationship between the dependent and independent variable
b) Technique of classification
c) Technique of clustering
d) All

11) In _____ model you build your machine learning models in two (or sometimes even more) stages.

a) stacking
b) averaging
c) testing multiple
d) hyper parameter

12) _____ is the approach to machine learning that is based on neuroscience.

a) Connectionism
b) Neuron
c) Deep learning
d) All of above

13) _____ ways improves machine learning model.

a) error curve method
b) testing multiple model
c) SDLC Model
d) None

14) _____ is a form of Al that enables a system to learn from data rather than through explicit programming.

a) Deep Learning
b) Collective intelligence
c) Machine Learning
d) None of these

Set | P

T. Y. (B. Tech) (Sem-II) (New) (CBCS) Examination: March/April-2025
COMPUTER SCIENCE AND ENGINEERING
Machine Learning (BTN03613)

Day & Date: Tuesday, 10-June-2025 Max. Marks: 56
Time: 10:00 AM To 01:00 PM

Instructions: 1) All questions are compulsory.
2) Figures to the right indicate full marks.
3) Make suitable assumptions (if necessary and state them clearly).

Section – I

Q.2 Attempt Any Four. **16**

a) What are the categorical data? What is its significance in classification problems?
b) Calculate Mean, Median, Mode and standard deviation of 11,22,33,33,44
c) Explain application of machine learning
d) Consider a classification problem with two classes the proportion of positive at node is 30%. Calculate the value of entropy at this node.
e) How Do You Handle Missing or Corrupted Data in a Dataset?

Q.3 Attempt Any One. **06**

a) Explain Machine Learning Cycle
b) A bag I contains 4 white and 6 black balls while another Bag II contains 4 white and 3 black balls. One ball is drawn at random from one of the bags, and it is found to be black. Find the probability that it was drawn from Bag I.

Q.4 Attempt the following. **06**

What is cost function explain its different types.

Section – II

Q.5 Attempt Any Four. **16**

a) Elaborate on the concept of the CART algorithm for decision trees.
b) Write a short note on applying feature engineering.
c) Write short note on Searching for the best hyper parameters.
d) What are the benefits of using Random Forests over Decision Trees?
e) Explain Averaging model.

Q.6 Attempt Any One. **06**

a) Explain LOOCV and K-fold cross validation methods.
b) Explain the discovering the Incredible perceptron.

Q.7 Attempt the following. **06**

What are the ‘training Set’ and ‘test Set’ in a Machine Learning Model? How Much Data Will You Allocate for Your Training, Validation, and Test Sets?

Seat No.	

Set **Q**

T. Y. (B. Tech) (Sem-II) (New) (CBCS) Examination: March/April-2025
COMPUTER SCIENCE AND ENGINEERING
Machine Learning (BTN03613)

Day & Date: Tuesday, 10-June-2025 Max. Marks: 70
Time: 10:00 AM To 01:00 PM

Instructions: 1) Q. No. 1 is compulsory. It should be solved in the first 30 minutes in Answer Book Page no 03 (Starting page of the Answer Book). Each question carries one mark.
2) Don't forget to Mention question paper set (P/Q/R/S) on top of page.
3) Figures to the right indicates full marks.
4) Make suitable assumptions if necessary and state them clearly.

MCQ/Objective Type Questions

Duration: 30 Minutes Marks:14

Q.1 Choose the correct alternatives from the options. 14

1) If you're looking for an image filter, you can clean up your images using _____.
a) Median filter b) Total variation denoising
c) Gaussian filter d) All of these

2) Cross validation is based on _____ method.
a) under fitting b) overfitting
c) k-fold d) none

3) Regression is defined as _____.
a) Mathematical relationship between the dependent and independent variable
b) Technique of classification
c) Technique of clustering
d) All

4) In _____ model you build your machine learning models in two (or sometimes even more) stages.
a) stacking b) averaging
c) testing multiple d) hyper parameter

5) _____ is the approach to machine learning that is based on neuroscience.
a) Connectionism b) Neuron
c) Deep learning d) All of above

6) _____ ways improves machine learning model.
a) error curve method b) testing multiple model
c) SDLC Model d) None

7) _____ is a form of AI that enables a system to learn from data rather than through explicit programming.

a) Deep Learning
b) Collective intelligence
c) Machine Learning
d) None of these

8) In Python _____ package offers all the functionality needed to create and manipulate matrices.

a) Scipy
b) Numpy
c) Sklearn
d) None

9) Which machine learning models are trained to make a series of decisions based on the rewards and feedback they receive for their actions?

a) Supervised learning
b) Unsupervised learning
c) Reinforcement learning
d) All of the above

10) A feature F1 can take certain value: 'Poor', 'Average', 'Good', 'Excellent' and represents performance of students from a college. Here feature type is _____.

a) Nominal
b) Ordinal and categorical
c) Boolean
d) None

11) Which of the following is true about bagging?

1. Bagging can be parallel
2. The aim of bagging is to reduce bias not variance
3. Bagging helps in reducing overfitting

a) 1 and 2
b) 2 and 3
c) 1 and 3
d) All of these

12) _____ is a resampling procedure used to evaluate machine learning models on a limited data sample.

a) Cross Validation
b) Testing
c) Training
d) None

13) Which of following steps are required to apply machine learning technique to support business strategy.

a) What is the business problem you are trying to solve
b) When are the hidden data resources that you can take advantage
c) How can you prepare to get your data
d) All

14) _____ are displays in which you plot the performance of one or more machine learning algorithms with respect to the quantity of data they use for training.

a) Learning curves
b) Under fitting
c) Overfitting
d) All of above

MCQ/Objective Type Questions

Duration: 30 Minutes Marks:14

Q.1 Choose the correct answer **14**

1) Which of the following is an example of cybercrime?
a) Writing a blog post
b) Unauthorized access to someone's email account
c) Purchasing an item from an online store
d) Programming a video game

2) Which of the following is a classification of cybercrime?
a) Organized crime and white-collar crime
b) Financial crime, hacking, and identity theft
c) Domestic theft and shoplifting
d) Political lobbying

3) What is the primary function of a proxy server?
a) Encrypting user data for secure transmission
b) Acting as an intermediary between a user and a server to provide anonymity
c) Cracking passwords for legitimate purposes
d) Detecting and removing viruses

4) Password cracking involves which of the following techniques?
a) Dictionary attacks and brute force attacks
b) SQL injection
c) Setting up firewalls
d) Encrypting passwords for security

5) Which of the following is NOT a component of cyber law?
a) Intellectual property rights b) Cyberstalking laws
c) International monetary policy d) Data protection regulations

6) What is a key reason for the need for cyber laws in India?
a) Growth in e-commerce and digital banking
b) Decline in internet usage
c) Shortage of cybersecurity professionals
d) Increasing demand for physical locks

7) Which section of the Indian IT Act covers digital signatures?
a) Section 43A b) Section 3
c) Section 72 d) Section 66F

8) Computer forensics is most commonly used in which field?
a) Medical diagnostics b) Criminal investigations
c) Agricultural technology d) Manufacturing industries

9) Which was one of the earliest computer networks that laid the foundation for the internet?
a) ARPANET b) TOR Network
c) Wi-Fi Alliance d) Ethernet

10) What does an IP address identify?
a) The physical location of a device
b) A unique address assigned to a device in a network
c) A user's browsing history
d) The model of the router used

11) What is the chain of custody critical for in network forensics?
a) Ensuring the evidence is admissible in court
b) Speeding up data recovery
c) Encrypting evidence for storage
d) Reconstructing lost network configurations

12) Which component in a mobile phone manages cellular communication?
a) Central Processing Unit (CPU) b) SIM card
c) Baseband processor d) Graphics card

13) What is the main function of forensic toolkits for handheld devices?
a) Designing mobile applications
b) Extracting and analyzing data from handheld devices
c) Enhancing mobile performance
d) Monitoring real-time network traffic

14) A major challenge in using handheld device evidence in court is _____.
a) Slow processing speed of devices
b) Ensuring evidence authenticity and integrity
c) The high cost of forensic tools
d) Limited storage capacity of devices

Time: 10:00 AM To 01:00 PM

Instructions: 1) All questions are compulsory.
2) Figures to the right indicate full marks.
3) Assume suitable data if necessary.

Section – I

Q.2 Attempt Any Four. **16**

a) Explain the classification of cybercrimes with suitable examples.
b) What are proxy servers and anonymizers? How are they misused in cybercrimes?
c) What are the key provisions of the Indian IT Act concerning cybercrime?
d) Explain the technique of SQL injection and its consequences in cyberattacks.
e) What is the relationship between cybercrime and information security? Provide examples.

Q.3 Attempt Any Two. **12**

a) Explain the concept of cyberstalking. Discuss its forms, consequences, and measures to combat it.
b) What are phishing attacks? Discuss their techniques, impact on victims, and preventive measures.
c) What is the role of digital signatures in the Indian IT Act? Discuss their legal significance and application.

Section – II

Q.4 Attempt Any Four. **16**

a) Explain the digital forensics life cycle. What are its key stages?
b) What are the major challenges faced in computer forensics? Provide examples.
c) Discuss the role of Internet Protocols (IP) in network forensics.
d) Explain the working characteristics of cell phones relevant to forensic investigations.
e) What types of digital evidence can be extracted from handheld devices, and how is it used in investigations?

Q.5 Attempt Any Two. **12**

a) Explain the process of filtering and data reduction in network forensics. Why is it crucial in digital investigations?

b) What are the key steps involved in analyzing digital evidence from hand-held devices?

c) Analyze the role of cyber forensics in securing and authenticating digital evidence for legal proceedings.

Q.2 Attempt Any Four. **16**

a) Explain the classification of cybercrimes with suitable examples.
b) What are proxy servers and anonymizers? How are they misused in cybercrimes?
c) What are the key provisions of the Indian IT Act concerning cybercrime?
d) Explain the technique of SQL injection and its consequences in cyberattacks.
e) What is the relationship between cybercrime and information security? Provide examples.

Q.3 Attempt Any Two. **12**

a) Explain the concept of cyberstalking. Discuss its forms, consequences, and measures to combat it.
b) What are phishing attacks? Discuss their techniques, impact on victims, and preventive measures.
c) What is the role of digital signatures in the Indian IT Act? Discuss their legal significance and application.

Section – II

Q.4 Attempt Any Four. **16**

a) Explain the digital forensics life cycle. What are its key stages?
b) What are the major challenges faced in computer forensics? Provide examples.
c) Discuss the role of Internet Protocols (IP) in network forensics.
d) Explain the working characteristics of cell phones relevant to forensic investigations.
e) What types of digital evidence can be extracted from handheld devices, and how is it used in investigations?

Q.5 Attempt Any Two. **12**

a) Explain the process of filtering and data reduction in network forensics. Why is it crucial in digital investigations?

b) What are the key steps involved in analyzing digital evidence from hand-held devices?

c) Analyze the role of cyber forensics in securing and authenticating digital evidence for legal proceedings.

T. Y. (B. Tech) (Sem-II) (New) (CBCS) Examination: March/April-2025
COMPUTER SCIENCE AND ENGINEERING
Cyber Forensic (BTN03614)

Day & Date: Tuesday, 10-June-2025 Max. Marks: 70
Time: 10:00 AM To 01:00 PM

Instructions: 1) Q. No. 1 is compulsory. It should be solved in the first 30 minutes in Answer Book Page no 03 (Starting page of the Answer Book). Each question carries one mark.
2) Don't forget to Mention question paper set (P/Q/R/S) on top of page.
3) Make suitable assumptions (if necessary and state them clearly).

MCQ/Objective Type Questions

Duration: 30 Minutes Marks:14

Q.1 Choose the correct answer **14**

1) What is the chain of custody critical for in network forensics?
a) Ensuring the evidence is admissible in court
b) Speeding up data recovery
c) Encrypting evidence for storage
d) Reconstructing lost network configurations

2) Which component in a mobile phone manages cellular communication?
a) Central Processing Unit (CPU) b) SIM card
c) Baseband processor d) Graphics card

3) What is the main function of forensic toolkits for handheld devices?
a) Designing mobile applications
b) Extracting and analyzing data from handheld devices
c) Enhancing mobile performance
d) Monitoring real-time network traffic

4) A major challenge in using handheld device evidence in court is _____.
a) Slow processing speed of devices
b) Ensuring evidence authenticity and integrity
c) The high cost of forensic tools
d) Limited storage capacity of devices

5) Which of the following is an example of cybercrime?
a) Writing a blog post
b) Unauthorized access to someone's email account
c) Purchasing an item from an online store
d) Programming a video game

6) Which of the following is a classification of cybercrime?
a) Organized crime and white-collar crime
b) Financial crime, hacking, and identity theft
c) Domestic theft and shoplifting
d) Political lobbying

7) What is the primary function of a proxy server?
a) Encrypting user data for secure transmission
b) Acting as an intermediary between a user and a server to provide anonymity
c) Cracking passwords for legitimate purposes
d) Detecting and removing viruses

8) Password cracking involves which of the following techniques?
a) Dictionary attacks and brute force attacks
b) SQL injection
c) Setting up firewalls
d) Encrypting passwords for security

9) Which of the following is NOT a component of cyber law?
a) Intellectual property rights
b) Cyberstalking laws
c) International monetary policy
d) Data protection regulations

10) What is a key reason for the need for cyber laws in India?
a) Growth in e-commerce and digital banking
b) Decline in internet usage
c) Shortage of cybersecurity professionals
d) Increasing demand for physical locks

11) Which section of the Indian IT Act covers digital signatures?
a) Section 43A
b) Section 3
c) Section 72
d) Section 66F

12) Computer forensics is most commonly used in which field?
a) Medical diagnostics
b) Criminal investigations
c) Agricultural technology
d) Manufacturing industries

13) Which was one of the earliest computer networks that laid the foundation for the internet?
a) ARPANET
b) TOR Network
c) Wi-Fi Alliance
d) Ethernet

14) What does an IP address identify?
a) The physical location of a device
b) A unique address assigned to a device in a network
c) A user's browsing history
d) The model of the router used

4) Assume suitable data is necessary.
5) Figures must be drawn wherever necessary.

MCQ/Objective Type Questions

Duration: 30 Minutes Marks: 14

Q.1 Choose the correct answer. **14**

1) The problem associated with testing occurs due to _____
a) Failing to define testing objectives
b) Testing at the wrong phase in the life cycle.
c) Using ineffective testing techniques
d) All of the above

2) Defects are less costly if detected in which of the following phases.
a) Coding b) Design
c) Requirements Gathering d) Implementation

3) In _____ testing, the software tester has access to programs code and can examine if for clues to help him with his testing.
a) Beta b) Gamma
c) Black Box d) White Box

4) The simplest form of path testing is called.
a) Line Coverage Testing b) Branch Coverage Testing
c) Equivalence Partitioning d) None

5) You are performing a test to see that it complies with user requirement that a certain field be populated by using a drop-down box containing a list of values. What kind of testing at you doing?
a) White box testing b) Black Box Testing
c) Load Testing d) Regression testing

6) _____ is performed without any formal test plan, test strategies, test scenario, test data or test cases.
a) Sanity Testing b) Execution Testing
c) Adhoc Testing d) All

7) This testing involves testing of high-level design as well as low-level design.
a) Big Bang b) Requirement Testing
c) Design Testing d) Code Testing

8) Test planning is a job that should involve _____ from across the entire product team.
a) Key players only b) Testers
c) Developers d) All

9) The approach/document used to make sure all the requirements are covered when writing test cases
a) Traceability Matrix b) Test bed
c) Checklist d) Test Matrix

10) Degree to which design specifications are followed in manufacturing the product is called
a) Quality Assurance
b) Quality Control
c) Quality of Conformance
d) None

11) The probability of failure free operation of a computer program in a specified environment for a specified time is termed as _____
a) Software Availability b) Software Reliability
c) Software Safety d) All

12) Who identifies, documents and verifies that corrections have been made to the software?
a) Project team b) SQA group
c) Project manager d) All of the mentioned

13) Which of the following is not a tool used in automation testing?
a) Rational Rose b) J unit
c) IBM Rational Functional Tester d) Selenium

14) _____ doesn't know anything about the software being tested. It just clicks or types randomly.
a) dumb monkey b) smart monkey
c) semi smart monkey d) all

b) Testing at the wrong phase in the life cycle.
c) Using ineffective testing techniques
d) All of the above

11) Defects are less costly if detected in which of the following phases.
a) Coding b) Design
c) Requirements Gathering d) Implementation

12) In _____ testing, the software tester has access to programs code and can examine if for clues to help him with his testing.
a) Beta b) Gamma
c) Black Box d) White Box

13) The simplest form of path testing is called.
a) Line Coverage Testing b) Branch Coverage Testing
c) Equivalence Partitioning d) None

14) You are performing a test to see that it complies with user requirement that a certain field be populated by using a drop-down box containing a list of values. What kind of testing at you doing?
a) White box testing b) Black Box Testing
c) Load Testing d) Regression testing

Set **S**

Fourth.Y. (B.Tech.) (Sem-I) (New) (CBCS) Examination: March/April - 2025
COMPUTER SCIENCE AND ENGINEERING
Software Testing and Quality Assurance (BTN03701)

Day & Date: Monday, 02-06-2025 Max. Marks: 56
Time: 03:00 PM To 06:00 PM

Instructions: 1) All questions are compulsory.
2) Figures to the right indicate full marks.
3) Assume suitable data is necessary.

Section – I

Q.2 Answer the following questions. (Any Four) **16**
- **a)** What are the different skills required by tester?
- **b)** What are the misconceptions about testing?
- **c)** Write short note on code coverage.
- **d)** Explain Black box testing and White box testing.
- **e)** Explain Big Bang and Sandwich Testing.
- **f)** Explain GUI testing with different advantages and disadvantages.

Q.3 Answer the following questions. (Any Two) **12**
- **a)** What are the types of approaches in software testing team? Explain approach in details.
- **b)** Explain differences between verification and validation in software testing.
- **c)** Write short notes on Performance testing, Volume testing and Stress testing.

Section – II

Q.4 Answer the following questions. (Any Four) **16**
- **a)** What are the reasons for test case planning?
- **b)** Explain Bug life cycle.
- **c)** What are goals and metrics of software quality?
- **d)** Explain five views of quality.
- **e)** What is reality of using Automation tool?
- **f)** Explain Viewers and Monitors test tool in detail.

Q.5 Answer the following questions. (Any Two) **12**
- **a)** Explain Test Design, Test cases and Test Procedure.
- **b)** Write short notes on:
  1) Elements of SQA
  2) Software Reliability
- **c)** What is automation test? Explain the benefits of automation test.

Fourth. Y. (B.Tech.) (Sem - I) (New) (CBCS) Examination: March/April-2025
COMPUTER SCIENCE AND ENGINEERING
Compiler Construction (BTN03702)

Day & Date: Tuesday 03-06-2025 Max. Marks: 70
Time: 03:00 PM To 06:00 PM

Instructions: 1) Q. No. 1 is compulsory. It should be solved in the first 30 minutes in Answer Book Page no 03 (Starting page of the Answer Book). Each question carries one mark.
2) Don't forget to Mention question paper set (P/Q/R/S) on top of page.
3) Figures to the right indicates full marks.
4) Make suitable assumptions (if necessary and state them clearly).

MCQ/Objective Type Questions

Duration: 30 Minutes Marks:14

Q.1 Choose the correct alternatives from the options. 14

1) Which of the following error can a compiler check?
a) Syntax Error
b) Logical Error
c) Both Logical and Syntax Error
d) Compiler cannot check errors

2) Compiler generates efficient target code in _____ phase.
a) Syntax analysis b) Semantic analysis
c) Code optimization d) None of these

3) Syntax Directed Definition (SDD) contains _____
a) Grammar productions b) Attributes
c) Semantic rules d) All of these

4) Which of the following is/are phases of analysis?
a) Code generation b) Lexical analysis
c) Code optimization d) None of the above

5) Syntax checking of statement is the task of _____
a) Lexical analyzer b) Parser
c) Semantic analyzer d) None of these

6) Which of the following is used for grouping characters into tokens?
a) The lexical analyzer b) Syntax analyzer
c) The code optimizer d) The code generator

7) Which of the following are the bottom-up parsers?
a) LL (1) parser b) Operator precedence parser
c) LR (1) parser d) Both b) and c)

8) A pictorial representation of the value computed by each statement in the basic block is _____

a) Tree
b) DAG
c) Graph
d) None of these

9) An SDD that involves only synthesized attributes is called _____

a) L-Attributed
b) S-Attributed
c) Both a) and b)
d) None of the above

10) Which of the following parsers is more powerful?

a) Simple LR
b) Canonical LR
c) Look ahead LR
d) None of these

11) If 'x' is terminal then FIRST (x) is _____

a) $
b) x
c) Both a and b
d) Can't find

12) A parse tree showing the value of attributes at each node _____

a) Syntax tree
b) Semantic tree
c) Annotated parse tree
d) All of the above

13) In which storage allocation strategy size is required at complier time?

a) Static allocation
b) Dynamic allocation
c) Stack allocation
d) All

14) Peephole optimization is an effective technique for _____ improving the target code.

a) Locally
b) Globally
c) Both a and b
d) None of the above

Time: 03:00 PM To 06:00 PM

Instructions: 1) All questions are compulsory.
2) Figures to the right indicate full marks.
3) Make suitable assumptions (if necessary and state them clearly).

Section – I

Q.2 Attempt Any Three. **12**

a) Explain the language processing system with diagram.
b) Explain input Buffering in Lexical analysis with sentinels.
c) Explain with example S-Attributed definition.
d) What is Syntax Directed Definition (SDD)? Explain it with an arithmetic expression example.

Q.3 Attempt Any Two **16**

a) Explain specification and recognition of tokens.
b) Explain annotated parse tree and dependency graph with example.
c) Explain in detail the SLR parser with suitable example.

Section – II

Q.4 Attempt Any Three. **12**

a) Explain Activation record with its contents.
b) Explain Triples, Quadruples and Indirect triples with any example.
c) Explain issue in design of code generator.
d) What is peephole optimization? Explain its any two characteristics for program transformations.

Q.5 Attempt Any Two. **16**

a) Explain Directed Acyclic Graph (DAG) for expressions and the value number method for constructing DAG's.
b) What is back patching? Explain back patching for Boolean expression.
c) What is basic block? Explain the algorithm for partitioning three-address statements into basic block with example.

4) Make suitable assumptions (if necessary and state them clearly).

MCQ/Objective Type Questions

Duration: 30 Minutes Marks:14

Q.1 Choose the correct answer **14**

1) Data mining can be applied to which of the following types of data?
a) Relational databases
b) Text and multimedia data
c) Web data and spatial data
d) All of the above

2) What is a major challenge in data mining?
a) Handling noisy and incomplete data
b) Data integration from multiple sources
c) Ensuring privacy and security
d) All of the above

3) What is a unique characteristic of pattern mining in multilevel and multidimensional space?
a) It is restricted to single-level datasets
b) It considers hierarchies and multiple dimensions of data simultaneously
c) It does not allow for constraints
d) It is limited to textual data

4) In regression analysis, the target variable is: _____
a) Categorical b) Numerical
c) Ordinal d) Nominal

5) Data warehouse contains _____
a) Database Table b) Online data
c) Flat File d) All of the above

6) The K-Nearest Neighbors (KNN) algorithm primarily relies on: _____
   a) Distance metrics to classify data points
   b) Decision trees to split data
   c) Statistical probabilities of data points
   d) Neural network layers

7) Which of the following can be considered as the classification or mapping of a set or class with some predefined group or classes?
   a) Data set
   b) Data Characterization
   c) Data Sub Structure
   d) Data Discrimination

8) Which one of the following can be defined as the data object which does not comply with the general behavior (or the model of available data)?
   a) Evaluation Analysis
   b) Outliner Analysis
   c) Classification
   d) Prediction

9) What is a key limitation of KNN classifiers?
   a) It cannot handle numerical data
   b) It is computationally expensive for large datasets
   c) It always produces poor results
   d) It ignores distance metrics

10) Euclidean distance measure is can also defined as _____
   a) The process of finding a solution for a problem simply by enumerating all possible solutions according to some predefined order and then testing them
   b) The distance between two points as calculated using the Pythagoras theorem
   c) A stage of the KDD process in which new data is added to the existing selection
   d) All of the above

11) What is classification in data mining?
   a) Setting up a target data
   b) Data mining procedure to sort data
   c) A method to find data
   d) Generalizing structures

12) What is the primary purpose of web mining?
   a) To create new websites
   b) To extract useful information and patterns from web data
   c) To design web pages
   d) To improve internet speed

13) What is Web usage mining?

a) Find suitable data and information about the user's information
b) Find suitable data and information for the web page design
c) Find suitable data and information for the web page architecture
d) none of the above

14) What is the primary function of a web crawler?

a) To visualize website data
b) To navigate the web and collect information from web pages
c) To store user search queries
d) To rank websites in search engines

   c) Ordinal
   d) Nominal

12) Data warehouse contains _____
   a) Database Table
   b) Online data
   c) Flat File
   d) All of the above

13) The K-Nearest Neighbors (KNN) algorithm primarily relies on: _____
   a) Distance metrics to classify data points
   b) Decision trees to split data
   c) Statistical probabilities of data points
   d) Neural network layers

14) Which of the following can be considered as the classification or mapping of a set or class with some predefined group or classes?
   a) Data set
   b) Data Characterization
   c) Data Sub Structure
   d) Data Discrimination

Set **Q**

Fourth. Y. (B.Tech.) (Sem - I) (New) (CBCS) Examination: March/April -2025
COMPUTER SCIENCE AND ENGINEERING
Data Mining (BTN03707)

Day & Date: Wednesday, 04-June-2025 Max. Marks: 56
Time: 03:00 PM To 06:00 PM

Instructions: 1) All questions are compulsory.
2) Figures to the right indicate full marks.
3) Make suitable assumptions (if necessary and state them clearly).

Section – I

Q.2 Attempt any four **16**

a) Explain the significance of data mining in today's data-driven world.
b) Differentiate between classification and clustering in data mining.
c) Discuss needs to preprocess the data.
d) Discuss the advantages and limitations of Bayesian classifiers.
e) Compare Data mining and Knowledge Discovery in Databases.

Q.3 Attempt any Two **12**

a) Explain K-Nearest Neighbors (KNN) algorithm?
b) Explain pattern mining in multilevel and multidimensional space.
c) Explain KDD process.

Section – II

Q.4 Attempt any four **16**

a) Discuss the challenges involved in mining association rules from large datasets.
b) Explain the web crawlers.
c) Explain the Outliers and Outlier Analysis.
d) Explain Large Item sets.
e) Explain Sampling Algorithm.

Q.5 Attempt any two. **12**

a) Explain the working of the Apriori algorithm for discovering frequent itemsets.
b) Discuss the impact of outliers on statistical models and machine learning algorithms.
c) Explain k-Means, k-Medoids partitioning methods.

Seat No.

Fourth. Y. (B.Tech.) (Sem - I) (New) (CBCS) Examination: March/April -2025
COMPUTER SCIENCE AND ENGINEERING
Data Mining (BTN03707)

Day & Date: Wednesday, 04-June-2025 Max. Marks: 70
Time: 03:00 PM To 06:00 PM

Instructions: 1) Q. No. 1 is compulsory. It should be solved in the first 30 minutes in Answer Book Page no 03 (Starting page of the Answer Book). Each question carries one mark.
2) Don't forget to Mention question paper set (P/Q/R/S) on top of page.
3) Figures to the right indicates full marks.
4) Make suitable assumptions (if necessary and state them clearly).

MCQ/Objective Type Questions

Duration: 30 Minutes Marks:14

Q.1 Choose the correct answer **14**

1) What is classification in data mining?
a) Setting up a target data
b) Data mining procedure to sort data
c) A method to find data
d) Generalizing structures

2) What is the primary purpose of web mining?
a) To create new websites
b) To extract useful information and patterns from web data
c) To design web pages
d) To improve internet speed

3) What is Web usage mining?
a) Find suitable data and information about the user's information
b) Find suitable data and information for the web page design
c) Find suitable data and information for the web page architecture
d) none of the above

4) What is the primary function of a web crawler?
a) To visualize website data
b) To navigate the web and collect information from web pages
c) To store user search queries
d) To rank websites in search engines

5) Data mining can be applied to which of the following types of data?
a) Relational databases
b) Text and multimedia data
c) Web data and spatial data
d) All of the above

6) What is a major challenge in data mining?
   a) Handling noisy and incomplete data
   b) Data integration from multiple sources
   c) Ensuring privacy and security
   d) All of the above

7) What is a unique characteristic of pattern mining in multilevel and multidimensional space?
   a) It is restricted to single-level datasets
   b) It considers hierarchies and multiple dimensions of data simultaneously
   c) It does not allow for constraints
   d) It is limited to textual data

8) In regression analysis, the target variable is: _____
   a) Categorical
   b) Numerical
   c) Ordinal
   d) Nominal

9) Data warehouse contains _____
   a) Database Table
   b) Online data
   c) Flat File
   d) All of the above

10) The K-Nearest Neighbors (KNN) algorithm primarily relies on: _____
   a) Distance metrics to classify data points
   b) Decision trees to split data
   c) Statistical probabilities of data points
   d) Neural network layers

11) Which of the following can be considered as the classification or mapping of a set or class with some predefined group or classes?
   a) Data set
   b) Data Characterization
   c) Data Sub Structure
   d) Data Discrimination

12) Which one of the following can be defined as the data object which does not comply with the general behavior (or the model of available data)?
   a) Evaluation Analysis
   b) Outliner Analysis
   c) Classification
   d) Prediction

13) What is a key limitation of KNN classifiers?
   a) It cannot handle numerical data
   b) It is computationally expensive for large datasets
   c) It always produces poor results
   d) It ignores distance metrics

14) Euclidean distance measure is can also defined as _____

a) The process of finding a solution for a problem simply by enumerating all possible solutions according to some predefined order and then testing them
b) The distance between two points as calculated using the Pythagoras theorem
c) A stage of the KDD process in which new data is added to the existing selection
d) All of the above

MCQ/Objective Type Questions

Duration: 30 Minutes Marks:14

Q.1 Multiple Choice Questions. **14**

1) Logical extension of computation migration is _____.
a) process migration b) system migration
c) thread migration d) data migration

2) Processes on the remote systems are identified by _____
a) host ID b) host name and identifier
c) Identifier d) process ID

3) In distributed systems, link and site failure is detected by _____
a) polling b) handshaking
c) token passing d) none of the mentioned

4) What are the characteristics of processor in distributed system?
a) They vary in size and function
b) They are same in size and function
c) They are manufactured with single purpose
d) They are real-time devices

5) Message passing system allows processes to _____
a) communicate with each other without sharing the same address space
b) communicate with one another by resorting to shared data
c) share data
d) name the recipient or sender of the message

6) In the non-blocking send _____
a) the sending process keeps sending until the message is received
b) the sending process sends the message and resumes operation
c) the sending process keeps sending until it receives a message
d) none of the mentioned

7) RPC provides a(an) ____ on the client-side, a separate one for each remote procedure.
a) stub
b) identifier
c) name
d) process identifier

8) To resolve the problem of data representation on different systems RPCs define _____
a) machine dependent representation of data
b) machine representation of data
c) machine-independent representation of data
d) none of the mentioned

9) The segment of code in which the process may change common variables, update tables, write into files is known as _____
a) program
b) critical section
c) non - critical section
d) synchronizing

10) A minimum of _____ variable(s) is/are required to be shared between processes to solve the critical section problem.
a) one
b) two
c) three
d) four

11) A system is in the safe state if _____
a) the system can allocate resources to each process in some order and still avoid a deadlock
b) there exist a safe sequence
c) all of the mentioned
d) none of the mentioned

12) Deadlocks can be prevented using ____
a) Preemption and transaction rollbacks
b) Wait and die scheme
c) Wound-wait scheme
d) All of the mentioned

13) What are characteristic of a DFS?
a) Fault tolerance
b) Scalability
c) Heterogeneity of the system
d) Upgradation

14) What is the advantage of caching in remote file access?
a) Reduced network traffic by retaining recently accessed disk blocks
b) Faster network access
c) Copies of data creates backup automatically
d) None of the mentioned

c) name d) process identifier

3) To resolve the problem of data representation on different systems RPCs define _____
a) machine dependent representation of data
b) machine representation of data
c) machine-independent representation of data
d) none of the mentioned

4) The segment of code in which the process may change common variables, update tables, write into files is known as _____
a) program b) critical section
c) non - critical section d) synchronizing

5) A minimum of _____ variable(s) is/are required to be shared between processes to solve the critical section problem.
a) one b) two
c) three d) four

6) A system is in the safe state if _____
   a) the system can allocate resources to each process in some order and still avoid a deadlock
   b) there exist a safe sequence
   c) all of the mentioned
   d) none of the mentioned

7) Deadlocks can be prevented using ____
   a) Preemption and transaction rollbacks
   b) Wait and die scheme
   c) Wound-wait scheme
   d) All of the mentioned

8) What are characteristic of a DFS?
   a) Fault tolerance
   b) Scalability
   c) Heterogeneity of the system
   d) Upgradation

9) What is the advantage of caching in remote file access?
   a) Reduced network traffic by retaining recently accessed disk blocks
   b) Faster network access
   c) Copies of data creates backup automatically
   d) None of the mentioned

10) Logical extension of computation migration is _____.
   a) process migration
   b) system migration
   c) thread migration
   d) data migration

11) Processes on the remote systems are identified by _____
   a) host ID
   b) host name and identifier
   c) Identifier
   d) process ID

12) In distributed systems, link and site failure is detected by _____
   a) polling
   b) handshaking
   c) token passing
   d) none of the mentioned

13) What are the characteristics of processor in distributed system?
   a) They vary in size and function
   b) They are same in size and function
   c) They are manufactured with single purpose
   d) They are real-time devices

14) Message passing system allows processes to _____
   a) communicate with each other without sharing the same address space
   b) communicate with one another by resorting to shared data
   c) share data
   d) name the recipient or sender of the message

Seat No.		Set	S

Fourth. Y. (B. Tech) (Sem-I) (New) (CBCS) Examination: March/April-2025
COMPUTER SCIENCE AND ENGINEERING
Distributed Systems (BTN03708)

Day & Date: Wednesday 04-June-2025 Max. Marks: 56
Time: 03:00 PM To 06:00 PM

Instructions: 1) All questions are compulsory.
2) Figures to the right indicate full marks.

Section – I

Q.2 Attempt any three. (4*3) **12**

a) Explain workstation - server model along with their advantages and disadvantages.
b) Differentiate network operating system and Distributed operating system.
c) What are the desirable features of good process migration?
d) Explain the model of organizing thread.

Q.3 Attempt any two. (8*2) **16**

a) Explain the working of RPC mechanism. What are stubs? How stubs are Generated?
b) Discuss with an example, how to Keep Track of lost and Out-of-Sequence. Packets in Multidatagram messages.
c) Discuss the various issues in designing distributed system.

Section – II

Q.4 Attempt any three. (4*3) **12**

a) What is freezing time? Explain the handling of co-processes in process migration mechanism.
b) Explain Global averaging distributed algorithm for clock synchronization.
c) Describe the four data transfer models that may be used in a distributed file system that uses the data caching model for file accessing.
d) Explain the architecture of distributed shared memory (DSM).

Q.5 Attempt any two. (8*2) **16**

a) Explain different method of address space transfer mechanism in process migration.
b) With example illustrate Richart Agarwala's distributed algorithm for mutual exclusion and also list its disadvantages.
c) Explain the architecture and the services of Distributed File System. (DFS)

Management Information System (BTN03709)

Day & Date: Wednesday 04-June-2025 Max. Marks: 70
Time: 03:00 PM To 06:00 PM

Instructions: 1) Q. No. 1 is compulsory. It should be solved in the first 30 minutes in Answer Book Page no 03 (Starting page of the Answer Book). Each question carries one mark.
2) Don't forget to Mention question paper set (P/Q/R/S) on top of page.
3) Figures to the right indicates full marks.
4) Assume suitable data wherever necessary.

MCQ/Objective Type Questions

Duration: 30 Minutes Marks:14

Q.1 Choose the correct answer (1*14=14 Marks) **14**

1) A digital firm is one where organization's operations are _____
a) completely mobilised b) digitally enabled
c) digitally marketed d) highly outsourced

2) _____ refers to the manner in which work is organized, coordinated & focused to produce product.
a) Business Process b) Information System
c) Functional Process d) None of the above

3) IT infrastructure consists of only those physical computing devices & software required to operate the enterprise.
a) True b) False

4) EBay is an example of _____
a) click-and-mortar business
b) C2C electronic commerce
c) B2C electronic commerce
d) an online exchange

5) An enterprise is a group of people with _____
a) common goal
b) separate goal for each department
c) multiple goals
d) two or more goal

6) A Decision Support System (DSS) is an application for information systems that helps in _____
a) System Design b) System Analysis
c) Decision making d) All of the mentioned above

7) If a university sets up a web-based information system that faculty could access to record student grades and to advise students, that would be an example of a/an _____

a) CRM
b) Intranet
c) ERP
d) Extranet

8) DBMS have a data definition language to do all of the following except:

a) Define the characteristics of the fields in each table
b) Add, change, delete, and retrieve data in the database
c) Specify the structure of the content of the database
d) Specify the creation of the database tables

9) Permission given with the knowledge of all the facts needed to make a rational decision is called _____

a) Informed consent
b) Liability
c) Responsibility
d) Due process

10) The principles and standards that guide our behaviour toward other people are collectively called _____

a) Intellectual property
b) Copyright
c) Ethics
d) Fair Use Doctrine

11) Intellectual property is subject to protection under _____

a) Trade secret law
b) Patent law
c) Copyright law
d) All of the above

12) The statement “If an action is not right for everyone to take, it is not right for anyone to take” is an expression of _____

a) The rule of change
b) The Utilitarian Principle.
c) The Categorical Imperative
d) The Risk Aversion Principle

13) The traditional business system is called as _____

a) modern method
b) advanced method
c) effective method
d) legacy method

14) As transaction costs decrease _____

a) The number of employees should shrink
b) A firm’s size should grow
c) The number of employees in the firm should grow
d) The firm should not consider outsourcing

2) Figures to the right indicate full marks.
3) Assume suitable data wherever necessary.

Section – I

Q.2 Attempt any four. **16**

a) What is Management Information System? What is the role of Information System in business?
b) Explain Tools and technologies for collaboration and social business.
c) Which principles are used for ethical decisions?
d) Explain the structure of an organization.
e) What are the Ethical, Social, political issues raised by information systems?

Q.3 Attempt any two. **12**

a) Explain competitive strategy using information system.
b) Explain the challenges to protection of individual's privacy and intellectual property.
c) What are different features of an organization? And explain each feature in detail.

Section – II

Q.4 Attempt any four. **16**

a) What is Contemporary software Platform Trends?
b) Explain concept of e-commerce & state its features.
c) What are the issues related to building e-commerce?
d) Explain Management Issues related to Information system.
e) How to improve business performance & decision making?

Q.5 Attempt ant two. **12**

a) Explain Infrastructure Components.
b) Explain the Role of M-commerce in business & its applications.
c) What are the major capabilities of Database Management Systems? Explain in detail.

MCQ/Objective Type Questions

Duration: 30 Minutes Marks: 14

Q.1 Choose the correct answer. **14**

1) Data in _____ bytes size is called Big Data.
a) Tera b) Giga
c) Peta d) Meta

2) The feature of big data that refers to the quality of the stored data is _.
a) Variety b) Volume
c) Variability d) Veracity

3) Transaction data of the bank is?
a) structured data b) unstructured data
c) Both a and b d) None of the above

4) Which of the following are Benefits of Big Data Processing?
a) Businesses can utilize outside intelligence while taking decisions
b) Improved customer service
c) Better operational efficiency
d) All of the above

5) The overall percentage of the world's total data has been created just within the past two years is?
a) 80% b) 85%
c) 90% d) 95%

6) What are the main components of Big Data?
a) MapReduce b) HDFS
c) YARN d) All of the above

7) All of the following accurately describe Hadoop, EXCEPT____
a) Open-source
b) Real-time
c) Java-based
d) Distributed computing approach

8) The examination of large amounts of data to see what patterns or other useful information can be found is known as
a) Data examination
b) Information analysis
c) Big data analytics
d) Data analysis

9) ____ takes a set of data and converts it into another set of data, where individual elements are broken down into tuples (key/value pairs).
a) Map
b) Reduce
c) Both a and b
d) Node

10) Which of the following is used to schedules jobs and tracks the assign jobs to Task tracker?
a) SlaveNode
b) MasterNode
c) JobTracker
d) Task Tracker

11) YARN is the one who helps to manage the resources across the
a) Clusters
b) Negotiator
c) Jobs
d) Hadoop System

12) Which of the following is/are a feature of Pig?
a) Rich set of operators
b) Ease of programming
c) Extensibility
d) All of the above

13) Which of the following function is used to read data in PIG?
a) Write
b) Read
c) Perform
d) Load

14) Which of the following data type is supported by Hive?
a) Map
b) Record
c) String
d) Enum

Instructions: 1) Q. No. 1 is compulsory. It should be solved in the first 30 minutes in Answer Book Page No. 03 (Starting page of the Answer Book). Each question carries one mark.
2) Don't forget to Mention question paper Set (P/Q/R/S) on top of page.
3) Figures to the right indicates full marks.
4) Make suitable assumptions (if necessary and state them clearly).

MCQ/Objective Type Questions

Duration: 30 Minutes Marks: 14

Q.1 Choose the correct answer. **14**

1) The examination of large amounts of data to see what patterns or other useful information can be found is known as
a) Data examination b) Information analysis
c) Big data analytics d) Data analysis

2) ____ takes a set of data and converts it into another set of data, where individual elements are broken down into tuples (key/value pairs).
a) Map b) Reduce
c) Both a and b d) Node

3) Which of the following is used to schedules jobs and tracks the assign jobs to Task tracker?
a) SlaveNode b) MasterNode
c) JobTracker d) Task Tracker

4) YARN is the one who helps to manage the resources across the
a) Clusters b) Negotiator
c) Jobs d) Hadoop System

5) Which of the following is/are a feature of Pig?
a) Rich set of operators
b) Ease of programming
c) Extensibility
d) All of the above

6) Which of the following function is used to read data in PIG?
a) Write b) Read
c) Perform d) Load

7) Which of the following data type is supported by Hive?
a) Map b) Record
c) String d) Enum

8) Data in _____ bytes size is called Big Data.
a) Tera b) Giga
c) Peta d) Meta

9) The feature of big data that refers to the quality of the stored data is _.
a) Variety b) Volume
c) Variability d) Veracity

10) Transaction data of the bank is?
a) structured data b) unstructured data
c) Both a and b d) None of the above

11) Which of the following are Benefits of Big Data Processing?
a) Businesses can utilize outside intelligence while taking decisions
b) Improved customer service
c) Better operational efficiency
d) All of the above

12) The overall percentage of the world's total data has been created just within the past two years is?
a) 80% b) 85%
c) 90% d) 95%

13) What are the main components of Big Data?
a) MapReduce b) HDFS
c) YARN d) All of the above

14) All of the following accurately describe Hadoop, EXCEPT____
a) Open-source
b) Real-time
c) Java-based
d) Distributed computing approach

Set Q

Fourth. Y. (B. Tech) (Sem-I) (New) (CBCS) Examination: March/April-2025
COMPUTER SCIENCE AND ENGINEERING
Big Data Analytics (BTN03711)

Day & Date: Thursday, 05-June-2025 Max. Marks: 56
Time: 03:00 PM To 06:00 PM

Instructions: 1) Answer all questions from section I & II.
2) Figures to the right indicate full marks.
3) Assume suitable data wherever necessary.

SECTION – I

Q.2 Attempt any four. **16**

a) Compare BDA and RDBMS.
b) Explain different characteristic of big data.
c) Give different HDFS commands.
d) Give the difference between Hadoop 1.0 and Hadoop 2.0
e) Explain Semi structured data.

Q.3 Attempt any two. **12**

a) Explain different V's of big data.
b) Write difference between SQL, NOSQL and NewSQL.
c) Explain high level architecture of Hadoop with its components.

SECTION – II

Q.4 Attempt any four. **16**

a) Write difference between MongoDB and SQL.
b) Explain features of Cassandra in details.
c) Draw the architecture of hive and explain its components.
d) What is pig? Explain its features.
e) What is static and dynamic partitioning in HIVE? Illustrate with example.

Q.5 Attempt ant two. **12**

a) Write word count example using PIG.
b) With help of example explain set collection, list collection and map collection in Cassendra. When collection should not be used?
c) Explain different CRUD operations in MongoDB.

MCQ/Objective Type Questions

Duration: 30 Minutes Marks:14

Q.1 Choose the correct Answer **14**

1) The number of nodes in the input layer is 12 and the hidden layer is 5. The maximum number of connections from the input layer to the hidden layer are_____

a) 60 b) Less than 60
c) More than 60 d) It is an arbitrary value

2) Which of the following functions can be used as an activation function in the output layer if we wish to predict the probabilities of n classes (p1, p2,...pk) such that sum of p over all n equals to 1?

a) SoftMax b) ReLU
c) Sigmoid d) Tanh

3) _____ is a Neural Nets way of classifying inputs.

a) Forward Propagation b) Activation
c) Classification d) None of this

4) ____ works best for Image Data.

a) Autoencoders
b) Single Layer Perceptron
c) Convolution Networks
d) Random Forest

5) De-noising and Contractive are examples of _____

a) Auto encoders b) Convolution Neural Networks
c) Recurrent Neural Networks d) None

6) What is the best Neural Network Model for Temporal Data?

a) Recurrent Neural Network b) Convolution Neural Networks
c) Temporal Neural Networks d) Multi Layer Perceptron

7) _____ is a pooling operation that selects the maximum element from the region of the feature map covered by the filter.

a) Max Pooling b) Average Pooling
c) Global pooling d) None of these

8) The measure of difference between two probability distributions is know as _____

a) Probability Difference b) Cost
c) KL Divergence d) Error

9) _____ is a Neural Nets way of classifying inputs.

a) Forward Propagation b) Activation
c) Classification d) Backward Propagation

10) Which of the following statement is true regarding dropout?

1. Dropout gives a way to approximate by combining many different architectures
2. Dropout demands high learning rates
3. Dropout can help preventing over fitting

a) Both 1 and 2 b) Both 1 and 3
c) Both 2 and 3 d) All 1, 2 and 3

11) Autoencoders are trained using _____

a) Feed Forward b) Reconstruction
c) Back Propagation d) They do not require Training

12) _____ computes the output volume by computing dot product between all filters and image patch.

a) Input Layer b) Convolution Layer
c) Activation Function Layer d) Pool Layer

13) What will happen to our machine learning model if the number of features is more than the number of data elements in our dataset?

a) It will be in under-fitting b) It will not work
c) It will be in over fitting d) It will not be affected

14) The rate at which cost changes with respect to weight or bias is called

a) Derivative b) Gradient
c) Rate of Change d) Loss

Section – I

Q.2 Attempt Any Four: **16**
- **a)** Explain Gradient decent Algorithm.
- **b)** Explain the term early stopping and Dropout.
- **c)** Assume a simple deep learning model with 3 neurons and inputs = 1, 2, 3 The weights to the input neurons are 6, 7 and 8 respectively, calculate the output?
- **d)** Explain Adam and RMSP Optimizer.
- **e)** Explain advantages and limitation of TensorFlow.

Q.3 Attempt Any One: **06**
- **a)** Explain back propagation Algorithm.
- **b)** Define regularization. Why the regularization is required?

Q.4 Attempt the following: **06**
What are Kernal_initializers in Keras and what is their significance?

Section – II

Q.5 Attempt Any Four: **16**
- **a)** What is drawback of RNN? How t is overcome by LSTM? Explain it in details.
- **b)** Explain different convolutional Neural network operations.
- **c)** Explain denoising auto encoder.
- **d)** Write a short note on ImageNet.
- **e)** Explain the application of RNN.

Q.6 Attempt Any One: **06**
- **a)** Explain encoder and decoder model.
- **b)** Explain Gated Recurrent Units (GRUs).

Q.7 Attempt the following: **06**
Explain the use of auto encoder in dimensionality reduction & classification.

Duration: 30 Minutes Marks:14

Q.1 Choose the correct Answer **14**

1) What is the best Neural Network Model for Temporal Data?
a) Recurrent Neural Network b) Convolution Neural Networks
c) Temporal Neural Networks d) Multi Layer Perceptron

2) _____ is a pooling operation that selects the maximum element from the region of the feature map covered by the filter.
a) Max Pooling b) Average Pooling
c) Global pooling d) None of these

3) The measure of difference between two probability distributions is know as _____
a) Probability Difference b) Cost
c) KL Divergence d) Error

4) _____ is a Neural Nets way of classifying inputs.
a) Forward Propagation b) Activation
c) Classification d) Backward Propagation

5) Which of the following statement is true regarding dropout?
1. Dropout gives a way to approximate by combining many different architectures
2. Dropout demands high learning rates
3. Dropout can help preventing over fitting
a) Both 1 and 2 b) Both 1 and 3
c) Both 2 and 3 d) All 1, 2 and 3

6) Autoencoders are trained using _____
a) Feed Forward b) Reconstruction
c) Back Propagation d) They do not require Training

7) _____ computes the output volume by computing dot product between all filters and image patch.
a) Input Layer b) Convolution Layer
c) Activation Function Layer d) Pool Layer

8) What will happen to our machine learning model if the number of features is more than the number of data elements in our dataset?
a) It will be in under-fitting b) It will not work
c) It will be in over fitting d) It will not be affected

9) The rate at which cost changes with respect to weight or bias is called
a) Derivative b) Gradient
c) Rate of Change d) Loss

10) The number of nodes in the input layer is 12 and the hidden layer is 5. The maximum number of connections from the input layer to the hidden layer are_____
a) 60 b) Less than 60
c) More than 60 d) It is an arbitrary value

11) Which of the following functions can be used as an activation function in the output layer if we wish to predict the probabilities of n classes (p1, p2,...pk) such that sum of p over all n equals to 1?
a) SoftMax b) ReLU
c) Sigmoid d) Tanh

12) _____ is a Neural Nets way of classifying inputs.
a) Forward Propagation b) Activation
c) Classification d) None of this

13) ____ works best for Image Data.
a) Autoencoders
b) Single Layer Perceptron
c) Convolution Networks
d) Random Forest

14) De-noising and Contractive are examples of _____
a) Auto encoders b) Convolution Neural Networks
c) Recurrent Neural Networks d) None

Fourth. Y. (B. Tech) (Sem-I) (New) (CBCS) Examination: March/April-2025
COMPUTER SCIENCE AND ENGINEERING
Deep Learning (BTN03713)

Day & Date: Friday 06-June-2025 Max. Marks: 56
Time: 03:00 PM To 06:00 PM

Instructions: 1) All questions are compulsory.
2) Figures to the right indicate full marks.
3) Make suitable assumptions (if necessary and state them clearly).

Section – I

Q.2 Attempt Any Four: **16**
- **a)** Explain Gradient decent Algorithm.
- **b)** Explain the term early stopping and Dropout.
- **c)** Assume a simple deep learning model with 3 neurons and inputs = 1, 2, 3 The weights to the input neurons are 6, 7 and 8 respectively, calculate the output?
- **d)** Explain Adam and RMSP Optimizer.
- **e)** Explain advantages and limitation of TensorFlow.

Q.3 Attempt Any One: **06**
- **a)** Explain back propagation Algorithm.
- **b)** Define regularization. Why the regularization is required?

Q.4 Attempt the following: **06**
What are Kernal_initializers in Keras and what is their significance?

Section – II

Q.5 Attempt Any Four: **16**
- **a)** What is drawback of RNN? How t is overcome by LSTM? Explain it in details.
- **b)** Explain different convolutional Neural network operations.
- **c)** Explain denoising auto encoder.
- **d)** Write a short note on ImageNet.
- **e)** Explain the application of RNN.

Q.6 Attempt Any One: **06**
- **a)** Explain encoder and decoder model.
- **b)** Explain Gated Recurrent Units (GRUs).

Q.7 Attempt the following: **06**
Explain the use of auto encoder in dimensionality reduction & classification.

COMPUTER SCIENCE AND ENGINEERING
Predictive Analytics (BTN03715)

Day & Date: Friday 06-June-2025 Max. Marks: 70
Time: 03:00 PM To 06:00 PM

Instructions: 1) Q. No. 1 is compulsory. It should be solved in the first 30 minutes in Answer Book Page no 03 (Starting page of the Answer Book). Each question carries one mark.
2) Don't forget to Mention question paper set (P/Q/R/S) on top of page.
3) Figures to right indicates full marks.

MCQ/Objective Type Questions

Duration: 30 Minutes Marks:14

Q.1 Multiple Choice questions. **14**

1) What is the primary purpose of predictive analytics in a business context?
a) Data storage b) Forecasting future trends
c) Data retrieval d) Data cleaning

2) Which metric is crucial for evaluating the effectiveness of an online marketing campaign?
a) Page views b) Click-through rate (CTR)
c) Bounce rate d) Time on site

3) What is another name for categorical data?
a) Continuous data b) Discrete data
c) Nominal data d) Interval data

4) What is a common challenge when searching through large datasets?
a) Data redundancy b) Data accuracy
c) Data indexing d) Data consistency

5) An optimization model falls under which category of modeling?
a) Descriptive b) Predictive
c) Prescriptive d) Diagnostic

6) In clustering, what does the term "centroid" refer to?
a) A point that minimizes distances to all cluster points
b) The center of a cluster
c) The most frequent item in a cluster
d) A measure of cluster density

7) What is the first step in a predictive analytics project?
a) Model selection
b) Data preprocessing
c) Problem definition
d) Model evaluation

8) In online retail, what is the purpose of an A/B test?
a) To compare two different products
b) To measure the effect of different marketing strategies
c) To assess customer satisfaction
d) To analyze website traffic

9) Which clustering algorithm requires the number of clusters to be specified beforehand?
a) DBSCAN
b) K-means
c) Agglomerative hierarchical clustering
d) Mean-shift clustering

10) Which metric is commonly used to evaluate the accuracy of a predictive model?
a) Mean Absolute Error (MAE)
b) Page views
c) Click-through rate (CTR)
d) Bounce rate

11) Which tool is widely used for full-text search in big data environments?
a) SQL
b) Hadoop
c) Elastic search
d) R

12) What did Twitter-based predictors of the stock market primarily analyze?
a) Historical stock prices
b) News headlines
c) Social media sentiment
d) Financial reports

13) What is term selection in the context of creating matrices of terms in documents?
a) Choosing the most relevant terms for analysis
b) Removing duplicate terms from documents
c) Sorting terms alphabetically
d) Counting occurrences of terms in documents

14) Which stakeholders should be involved in the initial stages of a predictive analytics project?
a) Only data scientists
b) Only IT department
c) Cross-functional team including business leaders
d) External vendors

Section – I

Q.2 Solve: (Any Four) **16**

a) Write a short note on: Adding Business values in Predictive Analytics.
b) Explain Target marketing with example.
c) Explain generating predictive analytics.
d) Differentiating Business Intelligence from Big-Data Analytics.
e) What is Predictive Analytics? Explain advantages and strategies of Predictive Analytics.

Q.3 Solve: (Any Two) **12**

a) How to start predictive analytics project? Explain with example.
b) Explain recommender system.
c) Explain Big Data.

Section – II

Q.4 Solve: (Any Four) **16**

a) Explain Modeling data: Models and simulations.
b) Explaining data clustering.
c) Explain introducing data classification to Business.
d) Explain naive bayes classification algorithms with example.
e) Explain Processing the data.

Q.5 Solve: (Any Two) **12**

a) Explain structuring the data: extracting, transforming and loading the data.
b) Explain algorithm for generating decision trees.
c) Explain KNN Algorithm with example.

MCQ/Objective Type Questions

Duration: 30 Minutes Marks:14

Q.1 Choose the correct alternatives from the options and rewrite the sentence. **14**

1) What is the primary purpose of maintaining accountability in information security?
a) To ensure that individuals are held responsible for their actions
b) To improve system performance
c) To encrypt sensitive data
d) To monitor network traffic

2) How often should reporting timelines for audit activities be established?
a) Every month
b) According to the regulatory requirements and organizational needs
c) Once every year
d) Only when issues arise

3) What does trend analysis in cybersecurity primarily focus on?
a) Understanding user behavior patterns and predicting future security needs
b) Identifying hardware failures in network devices
c) Monitoring financial transactions across the network
d) Measuring the effectiveness of advertising campaigns

4) Trend analysis is often used in network security to: _____
a) Create more complex passwords for users
b) Set up firewalls and VPN configurations
c) Track physical assets in the organization
d) Predict future network performance and identify long-term vulnerabilities

5) Which of the following is NOT a function of monitoring tools in an organization's network?
   a) Detecting malware and security breaches
   b) Analyzing system logs for suspicious activities
   c) Managing employee passwords
   d) Ensuring compliance with security policies

6) In the context of infrastructure and networks, which component is most responsible for ensuring secure communication between different systems?
   a) Antivirus software
   b) Firewalls and encryption protocols
   c) Load balancers
   d) Network cables

7) Which of the following is typically included in the Rules of Engagement for a penetration test?
   a) A detailed list of all vulnerabilities found during testing
   b) Personal details of the penetration testing team
   c) The cost of the testing service
   d) The specific systems, networks, or applications to be tested

8) Which phase of penetration testing involves actively identifying security weaknesses and potential entry points?
   a) Post-testing analysis
   b) Information gathering
   c) Vulnerability analysis
   d) Reporting and documentation

9) Which of the following describes a VoIP (Voice over IP) security concern during penetration testing?
   a) Lack of encryption for voice communications
   b) Overloading the network with malicious traffic
   c) Insufficient physical protection of VoIP phones
   d) Monitoring internet bandwidth usage

10) What is the role of log management in a penetration test?
   a) To ensure the system operates efficiently by cleaning up unnecessary logs
   b) To monitor user activity logs for signs of unauthorized access or suspicious behavior
   c) To increase system uptime during the test
   d) To improve the speed of network communications

11) Which of the following is the most common method used to secure email communications?
a) Password-protecting email attachments
b) Using two-factor authentication (2FA) for email accounts
c) Encrypting email content using SSL/TLS protocols
d) Using complex subject lines for emails

12) Which of the following actions can lead to data leakage?
a) Encrypting sensitive data before transmission
b) Granting access to sensitive data based on need-to-know
c) Sending sensitive information through unencrypted email
d) Implementing multi-factor authentication for all employees

13) What is a critical item on a pre-penetration testing checklist?
a) Securing client approval and agreements
b) Installing new software
c) Informing all employees of the test
d) Deleting old logs

14) Which of the following standards is commonly used to guide organizations in managing information security?
a) ISO/IEC 27001
b) GDPR
c) HIPAA
d) PCI-DSS

Set P

Fourth. Y. (B. Tech) (Sem-I) (New) (CBCS) Examination: March/April-2025
COMPUTER SCIENCE AND ENGINEERING
Information Auditing and monitoring (BTN03717)

Day & Date: Friday 06-June-2025 Max. Marks: 56
Time: 03:00 PM To 06:00 PM

Instructions: 1) All questions are compulsory.
2) Figures to the right indicate full marks.
3) Assume suitable data whenever necessary and mention it clearly.

Section – I

Q.2 Attempt Any Three. **12**

a) What is Accountability? Explain in detail.
b) Give a detailed explanation of Trend analysis.
c) What are Servers and Storage devices? Explain with examples.
d) Explain the variances in performance metrics.

Q.3 Attempt Any Two. **16**

a) What is Record Retention? What are the key aspects of Record Retention?
b) Write a note on:
i) Reporting timeline
ii) Traffic analysis
iii) Trend analysis
iv) Record Retention
c) What are Compliance? Explain with its key aspects and its purpose.

Section – II

Q.4 Attempt Any Three. **12**

a) What are the Rules of Engagement (RoE) in a penetration test, and why are they necessary?
b) What should be included in a pre-penetration testing checklist?
c) What is Denial of Service (DoS) testing, and why is it important in penetration testing?
d) What are security patches, and why is it important for organizations to apply them regularly?

Q.5 Attempt Any Two. **16**

a) Describe the steps involved in vulnerability analysis during a penetration test. How do these steps help in identifying and mitigating risks?
b) Describe common types of social engineering attacks used in penetration testing and explain their impact on organizational security.
c) Describe the key components of a penetration testing report. How should it be structured to ensure that stakeholders can understand and act on the findings?

1) Which phase of penetration testing involves actively identifying security weaknesses and potential entry points?
a) Post-testing analysis
b) Information gathering
c) Vulnerability analysis
d) Reporting and documentation

2) Which of the following describes a VoIP (Voice over IP) security concern during penetration testing?
a) Lack of encryption for voice communications
b) Overloading the network with malicious traffic
c) Insufficient physical protection of VoIP phones
d) Monitoring internet bandwidth usage

3) What is the role of log management in a penetration test?
a) To ensure the system operates efficiently by cleaning up unnecessary logs
b) To monitor user activity logs for signs of unauthorized access or suspicious behavior
c) To increase system uptime during the test
d) To improve the speed of network communications

4) Which of the following is the most common method used to secure email communications?
a) Password-protecting email attachments
b) Using two-factor authentication (2FA) for email accounts
c) Encrypting email content using SSL/TLS protocols
d) Using complex subject lines for emails

5) Which of the following actions can lead to data leakage?
a) Encrypting sensitive data before transmission
b) Granting access to sensitive data based on need-to-know
c) Sending sensitive information through unencrypted email
d) Implementing multi-factor authentication for all employees

6) What is a critical item on a pre-penetration testing checklist?
a) Securing client approval and agreements
b) Installing new software
c) Informing all employees of the test
d) Deleting old logs

7) Which of the following standards is commonly used to guide organizations in managing information security?
a) ISO/IEC 27001
b) GDPR
c) HIPAA
d) PCI-DSS

8) What is the primary purpose of maintaining accountability in information security?
a) To ensure that individuals are held responsible for their actions
b) To improve system performance
c) To encrypt sensitive data
d) To monitor network traffic

9) How often should reporting timelines for audit activities be established?
a) Every month
b) According to the regulatory requirements and organizational needs
c) Once every year
d) Only when issues arise

10) What does trend analysis in cybersecurity primarily focus on?
a) Understanding user behavior patterns and predicting future security needs
b) Identifying hardware failures in network devices
c) Monitoring financial transactions across the network
d) Measuring the effectiveness of advertising campaigns

11) Trend analysis is often used in network security to: _____
a) Create more complex passwords for users
b) Set up firewalls and VPN configurations
c) Track physical assets in the organization
d) Predict future network performance and identify long-term vulnerabilities

12) Which of the following is NOT a function of monitoring tools in an organization's network?
a) Detecting malware and security breaches
b) Analyzing system logs for suspicious activities
c) Managing employee passwords
d) Ensuring compliance with security policies

13) In the context of infrastructure and networks, which component is most responsible for ensuring secure communication between different systems?
a) Antivirus software
b) Firewalls and encryption protocols
c) Load balancers
d) Network cables

14) Which of the following is typically included in the Rules of Engagement for a penetration test?
a) A detailed list of all vulnerabilities found during testing
b) Personal details of the penetration testing team
c) The cost of the testing service
d) The specific systems, networks, or applications to be tested

SLR-BD-483

Set Q

Fourth. Y. (B. Tech) (Sem-I) (New) (CBCS) Examination: March/April-2025
COMPUTER SCIENCE AND ENGINEERING
Information Auditing and monitoring (BTN03717)

Day & Date: Friday 06-June-2025 Max. Marks: 56
Time: 03:00 PM To 06:00 PM

Instructions: 1) All questions are compulsory.
2) Figures to the right indicate full marks.
3) Assume suitable data whenever necessary and mention it clearly.

Section – I

Q.2 Attempt Any Three. **12**

a) What is Accountability? Explain in detail.
b) Give a detailed explanation of Trend analysis.
c) What are Servers and Storage devices? Explain with examples.
d) Explain the variances in performance metrics.

Q.3 Attempt Any Two. **16**

a) What is Record Retention? What are the key aspects of Record Retention?
b) Write a note on:
i) Reporting timeline
ii) Traffic analysis
iii) Trend analysis
iv) Record Retention
c) What are Compliance? Explain with its key aspects and its purpose.

Section – II

Q.4 Attempt Any Three. **12**

a) What are the Rules of Engagement (RoE) in a penetration test, and why are they necessary?
b) What should be included in a pre-penetration testing checklist?
c) What is Denial of Service (DoS) testing, and why is it important in penetration testing?
d) What are security patches, and why is it important for organizations to apply them regularly?

Q.5 Attempt Any Two. **16**

a) Describe the steps involved in vulnerability analysis during a penetration test. How do these steps help in identifying and mitigating risks?
b) Describe common types of social engineering attacks used in penetration testing and explain their impact on organizational security.
c) Describe the key components of a penetration testing report. How should it be structured to ensure that stakeholders can understand and act on the findings?

Seat No.	

Set **R**

Fourth. Y. (B. Tech) (Sem-I) (New) (CBCS) Examination: March/April-2025
COMPUTER SCIENCE AND ENGINEERING
Information Auditing and monitoring (BTN03717)

Day & Date: Friday 06-June-2025 Max. Marks: 70
Time: 03:00 PM To 06:00 PM

Instructions: 1) Q. No. 1 is compulsory. It should be solved in the first 30 minutes in Answer Book Page no 03 (Starting page of the Answer Book). Each question carries one mark.
2) Don't forget to Mention question paper set (P/Q/R/S) on top of page.
3) Figures to right indicates full marks.
4) Assume suitable data if necessary.

MCQ/Objective Type Questions

Duration: 30 Minutes Marks:14

Q.1 Choose the correct alternatives from the options and rewrite the sentence. **14**

1) Which of the following is the most common method used to secure email communications?
a) Password-protecting email attachments
b) Using two-factor authentication (2FA) for email accounts
c) Encrypting email content using SSL/TLS protocols
d) Using complex subject lines for emails

2) Which of the following actions can lead to data leakage?
a) Encrypting sensitive data before transmission
b) Granting access to sensitive data based on need-to-know
c) Sending sensitive information through unencrypted email
d) Implementing multi-factor authentication for all employees

3) What is a critical item on a pre-penetration testing checklist?
a) Securing client approval and agreements
b) Installing new software
c) Informing all employees of the test
d) Deleting old logs

4) Which of the following standards is commonly used to guide organizations in managing information security?
a) ISO/IEC 27001 b) GDPR
c) HIPAA d) PCI-DSS

5) What is the primary purpose of maintaining accountability in information security?
   a) To ensure that individuals are held responsible for their actions
   b) To improve system performance
   c) To encrypt sensitive data
   d) To monitor network traffic

6) How often should reporting timelines for audit activities be established?
   a) Every month
   b) According to the regulatory requirements and organizational needs
   c) Once every year
   d) Only when issues arise

7) What does trend analysis in cybersecurity primarily focus on?
   a) Understanding user behavior patterns and predicting future security needs
   b) Identifying hardware failures in network devices
   c) Monitoring financial transactions across the network
   d) Measuring the effectiveness of advertising campaigns

8) Trend analysis is often used in network security to: _____
   a) Create more complex passwords for users
   b) Set up firewalls and VPN configurations
   c) Track physical assets in the organization
   d) Predict future network performance and identify long-term vulnerabilities

9) Which of the following is NOT a function of monitoring tools in an organization's network?
   a) Detecting malware and security breaches
   b) Analyzing system logs for suspicious activities
   c) Managing employee passwords
   d) Ensuring compliance with security policies

10) In the context of infrastructure and networks, which component is most responsible for ensuring secure communication between different systems?
   a) Antivirus software
   b) Firewalls and encryption protocols
   c) Load balancers
   d) Network cables

11) Which of the following is typically included in the Rules of Engagement for a penetration test?
   a) A detailed list of all vulnerabilities found during testing
   b) Personal details of the penetration testing team
   c) The cost of the testing service
   d) The specific systems, networks, or applications to be tested

12) Which phase of penetration testing involves actively identifying security weaknesses and potential entry points?
a) Post-testing analysis
b) Information gathering
c) Vulnerability analysis
d) Reporting and documentation

13) Which of the following describes a VoIP (Voice over IP) security concern during penetration testing?
a) Lack of encryption for voice communications
b) Overloading the network with malicious traffic
c) Insufficient physical protection of VoIP phones
d) Monitoring internet bandwidth usage

14) What is the role of log management in a penetration test?
a) To ensure the system operates efficiently by cleaning up unnecessary logs
b) To monitor user activity logs for signs of unauthorized access or suspicious behavior
c) To increase system uptime during the test

3) Figures to the right indicates full marks.

MCQ/Objective Type Questions

Duration: 20 Minutes Marks:10

Q.1 Choose the correct Answer **10**

1) Which of the following tags represents an independent piece of content of a document in HTML5?
a) section b) article
c) aside d) header

2) In JavaScript, what is a block of statement?
a) Conditional block
b) block that combines a number of statements into a single compound statement
c) both conditional block and a single statement
d) block that contains a single statement

3) Inline styles are written within the _____ attribute.
a) style b) css
c) stylesheet d) Both a and b

4) What is the declarative way to render a dynamic list of components based on values in an array?
a) Using the reduce array method b) Using the <Each />component
c) Using the Array.map()method d) With a for/while loop

5) Which of the following is the use of strlen() function in PHP?
a) The strlen() function returns the type of string
b) The strlen() function returns the length of string
c) The strlen() function returns the value of string
d) The strlen() function returns both value and type of string

6) In the JSON syntax, data is separated by _____
a) Semicolons b) Colons
c) Commas d) Hyper

7) Which of the following commands is used to install create-react-app?
a) npm install -g create-react-app
b) npm install create-react-app
c) npm install -f create-react-app
d) install -g create-react-app

8) What is a state in React?
a) A permanent storage
b) Internal storage of the component
c) External storage of the component
d) None of the above

9) Which of the following commands is used to start a REPL session?
a) $ node
b) $ node start
c) $ node repl
d) $ node console

10) Which of the following is used for concatenation in PHP?
a) + (plus)
b) * (Asterisk)
c) . (dot)

d) $ node console

8) Which of the following is used for concatenation in PHP?

a) + (plus)
b) * (Asterisk)
c) . (dot)
d) append()

9) Which of the following tags represents an independent piece of content of a document in HTML5?

a) section
b) article
c) aside
d) header

10) In JavaScript, what is a block of statement?

a) Conditional block
b) block that combines a number of statements into a single compound statement
c) both conditional block and a single statement
d) block that contains a single statement

Fourth. Y. (B. Tech.) (Sem-I) (New) (CBCS) Examination: March/April-2025
COMPUTER SCIENCE AND ENGINEERING
UI/UX Technology (BTN03719)

Day & Date: Monday 09-June-2025 Max. Marks: 40
Time: 10:00 AM To 12:00 PM

Instructions: 1) Attempt any four questions from Q. 2 to Q.8.
2) Figures to the right indicate full marks.

Q.2 Write short notes. **10**
a) Differences between GET and POST methods
b) What are the different types of PHP variables?

Q.3 What is React? What are the advantages of using React. **10**

Q.4 Explain RESTful Architectural Principles. **10**

Q.5 Explain Electron JS and How do you handle cross-platform compatibility issues when developing Electron applications. **10**

Q.6 List some features of JavaScript. How Do You Create an Array in JavaScript? **10**

Fourth. Y. (B. Tech.) (Sem-I) (New) (CBCS) Examination: March/April-2025
COMPUTER SCIENCE AND ENGINEERING
Software Licences and Practices (BTN03720)

Day & Date: Monday 09-June-2025 Max. Marks: 50
Time: 10:00 AM To 12:00 PM

Instructions: 1) All questions are compulsory.
2) Figures to the right indicates full marks.
3) Assume suitable data wherever necessary.

Q.1 Attempt the following question. (Any Five) **30**

a) Write a note on GNU General Public License.

b) Discuss Creative Commons Licenses.

c) State and explain basic principles of copyright law.

d) What is an open-source software license? Discuss its significance in software development.

e) Discuss the benefits and limitations of the Sun Community Source License.

f) What are the negative effects of Open Source and Free Software Licensing?

Q.2 Attempt the following question. (Any Two) **20**

a) Compare and contrast proprietary licenses with open-source licenses.

b) State the benefits of Open Source Software Licensing. Explain how Community Enforcement of Open Source and Free Software Licenses works with an example.

c) Write a detail note on Multiple and Cross Licensing.

Day & Date: Saturday, 17-May-2025 Max. Marks: 70
Time: 10:00 AM To 01:00 PM

Instructions: 1) Q. No. 1 is compulsory. It should be solved in the first 30 minutes in Answer Book Page no 03 (Starting page of the Answer Book). Each question carries one mark.
2) Don't forget to Mention question paper set (P/Q/R/S) on top of page.
3) Figures to the right indicates full marks.
4) Assume the data whenever necessary.

MCQ/Objective Type Questions

Duration: 30 Minutes Marks:14

Q.1 Choose the correct Answer. 14

1) Let $\bar{A} = 7\widehat{a_x} + 5\widehat{a_y} + 8\widehat{a_z}$ and $\bar{B} = 4\widehat{a_x} + 9\widehat{a_y} + 6\widehat{a_z}$ are two vectors then dot product $\bar{A} \cdot \bar{B}$ = _____.
a) 98 b) 121
c) 148 d) 48

2) Let $\bar{A} = 10\widehat{a_x} + 5\widehat{a_y} + 6\widehat{a_z}$ be a vector then the value of cylindrical component A_ρ at point $P(3, 90°, 4)$ is _____.
a) 10 b) 5
c) -5 d) 12.36

3) A particle of charge 3×10^{-9} C is acted upon a downward force 4.5×10^{-9} N in an electric field. The strength of electric field is _____.
a) 6N b) 1.5N/C
c) 1.5N d) $6\text{N} - \text{C}$

4) The electric field density of infinity line charge varies _____.
a) $\frac{1}{r}$ b) $\frac{1}{r^2}$
c) $\frac{1}{r^3}$ d) None

5) Field around a conductor carrying steady current is _____.
a) Static Magnetic field b) Static Electric field
c) Time varying field d) Time Harmonic field

6) Static magnetic field is _____.
a) Solenoidal b) flux lines are close loops
c) $\nabla \cdot \bar{B} = 0$ d) All the above

7) Given the magnetic field is 2.4 units. Then the flux density in air (in 10^{-6} order) is _____.

a) 2 b) 3
c) 4 d) 5

8) In the conversion of Line Integral to Surface Integral _____ theorem is preferred.

a) Divergence Theorem b) Stocks Theorem
c) Gauss Theorem d) It can not be converted

9) The charge builds up in the capacitor is due to _____ quantity.

a) Conduction current b) Displacement current
c) Convection current d) Direct current

10) At dc field, the displacement current density will be _____.

a) Zero
b) One
c) same as conduction current density
d) Infinite

11) For a dielectric, the condition to be satisfied is _____.

a) $\sigma/\omega\varepsilon > 1$ b) $\sigma/\omega\varepsilon < 1$
c) $\sigma = \omega\varepsilon$ d) $\omega\varepsilon = 1$

12) In perfect conductors, the phase shift between the electric field and magnetic field will be _____.

a) 0 b) 30
c) 45 d) 90

13) The condition for a distortion less is _____.

a) $\mathrm{R/L = G/C}$ b) $\mathrm{R/C = G/L}$
c) $\mathrm{R = G}$ d) $\mathrm{C = L}$

14) The value of transmission coefficient when a transmission line is matched to a load is _____.

a) 1 b) 0
c) infinite d) 0.5

2) Figures to the right indicate full marks.
3) Assume the data whenever necessary.

Section – I

Q.2 Answer any three. **12**

a) An infinitely long uniform line charge of 20nc/m is located at y=2m and z=4m. Find Electrical Field Intensity at the point (3,3,1).

b) Potential is given by $\mathrm{V} = 2(\mathrm{x}+1)^2(\mathrm{y}+2)^2(\mathrm{z}+3)^2$ in free space. Calculate 1) Potential 2) Electrical field intensity at a point (1,2,3).

c) Find the magnetic field intensity at a point P(2.5,2,3) caused by a current filament of 12A in $\widehat{a_z}$ directions on the z axis extending from 0 to 6.

d) Explain in detail about Electrostatic boundary conditions for Dielectric-to-Dielectric material.

Q.3 Answer any two: **16**

a) Transform given vector $\bar{A} = 10\widehat{a_x} - 8\,\widehat{a_y} + 6\widehat{a_z}$ to Spherical coordinate systems at point $P(10,-8,6)$

b) If $\bar{D} = xy^2z^2\widehat{a_x} + x^2\,yz^2\widehat{a_y} + x^2y^2z\widehat{a_2}\ \mathrm{c/m^2}$

1) Determine the expression for volume charge density (ρ_v)
2) Calculate the total charge within the cube defined by $0 \le X \le 2, 0 \le Y \le 2, 0 \le Z \le 2$

c) From Biot Savarts Law, derive the expression for magnetic field intensity due to infinitely long straight filament carrying current.

Section – II

Q.4 Answer any three. **12**

a) Show that for time varying field $\nabla \times \bar{E} = -\frac{\partial \bar{B}}{\partial t}$

b) Define Characteristic Impedance. Derive the expression for characteristic impedance in terms of primary constants of transmission line.

c) Wet marshy soil is characterized by $\sigma = 10^{-2}\ \mathrm{s/m}, \epsilon_r = 1.5$ and $\mu_r = 1$. Hence calculate skin depth at frequency 60Hz. Also calculate propagation constant of good conductor.

d) Write a note on Smith Chart.

Q.5 Answer any two. **16**

a) Derive the expression for Reflection Coefficient in terms of Load impedance (Z_L) and Characteristic impedance (Z_0). Also discuss about Reflection coefficient for Matched Load, Short circuit and open circuit.

b) Verify the field given as below.
$\bar{E} = 2 \sin x \sin t\widehat{a_y}$ and $\bar{H} = \frac{2}{\mu_0} \cos x \cos t\widehat{a_z}$satisfies maxwell's equations.

c) For propagation of wave in good conductors, find the expression for
1) Attenuation constant
2) Phase Constant
3) Phase velocity

d) Explain in detail about Electrostatic boundary conditions for Dielectric-to-Dielectric material.

Q.3 Answer any two: **16**

a) Transform given vector $\bar{A} = 10\widehat{a_x} - 8\,\widehat{a_y} + 6\widehat{a_z}$ to Spherical coordinate systems at point $P(10,-8,6)$

b) If $\bar{D} = xy^2z^2\widehat{a_x} + x^2\,yz^2\widehat{a_y} + x^2y^2z\widehat{a_2}\ \mathrm{c/m^2}$

1) Determine the expression for volume charge density (ρ_v)
2) Calculate the total charge within the cube defined by $0 \le X \le 2, 0 \le Y \le 2, 0 \le Z \le 2$

c) From Biot Savarts Law, derive the expression for magnetic field intensity due to infinitely long straight filament carrying current.

Section – II

Q.4 Answer any three. **12**

a) Show that for time varying field $\nabla \times \bar{E} = -\frac{\partial \bar{B}}{\partial t}$

b) Define Characteristic Impedance. Derive the expression for characteristic impedance in terms of primary constants of transmission line.

c) Wet marshy soil is characterized by $\sigma = 10^{-2}\ \mathrm{s/m}, \epsilon_r = 1.5$ and $\mu_r = 1$. Hence calculate skin depth at frequency 60Hz. Also calculate propagation constant of good conductor.

d) Write a note on Smith Chart.

Q.5 Answer any two. **16**

a) Derive the expression for Reflection Coefficient in terms of Load impedance (Z_L) and Characteristic impedance (Z_0). Also discuss about Reflection coefficient for Matched Load, Short circuit and open circuit.

b) Verify the field given as below.
$\bar{E} = 2 \sin x \sin t\widehat{a_y}$ and $\bar{H} = \frac{2}{\mu_0} \cos x \cos t\widehat{a_z}$satisfies maxwell's equations.

c) For propagation of wave in good conductors, find the expression for
1) Attenuation constant
2) Phase Constant
3) Phase velocity

Microcontrollers and Applications (BTN06502)

Day & Date: Monday 19-05-2025 Max. Marks: 70
Time: 10:00 AM To 01:00 PM

Instructions: 1) Q. No. 1 is compulsory. It should be solved in the first 30 minutes in Answer Book Page no 03 (Starting page of the Answer Book). Each question carries one mark.
2) Don't forget to Mention question paper set (P/Q/R/S) on top of page.
3) Figures to the right indicates full marks.

MCQ/Objective Type Questions

Duration: 30 Minutes Marks:14

Q.1 Choose the correct alternative from the options. **14**

1) If we say microcontroller is 8-bit then here 8-bit denotes size of:
a) Data Bus b) ALU
c) Control Bus d) Address Bus

2) In _____ architecture the instructions are executed by Hardware.
a) CISC b) RISC
c) AMBA d) None of these

3) Out of the following registers, which register is not bit addressable register in 8051?
a) PSW b) TCON
c) SBUF d) IE

4) MOVX instruction will fetch the data from _____ memory.
a) External program b) Internal program
c) Internal Data d) External Data

5) Which register in an 8051 microcontroller contains the SMOD bit?
a) SBUF b) TMOD
c) PCON d) TCON

6) In Timer counter register of 8051, Mode 1 uses
a) 8 - Bit Timer b) 16 - Bit Timer
c) 32 - Bit Timer d) 13 - Bit Timer

7) Which of the following interface is used for waveform generation using the 8051 Microcontrollers?
a) ADC b) DAC
c) ACD d) CAD

8) The memory specifications of PIC16f877a for Flash Program Memory, Data Memory (RAM) and EEPROM Data Memory respectively are _____
a) 256 x 8 bytes, 8K x 14 words, 368 x 8 bytes
b) 128Bytes, 4KBytes, 64K bytes
c) 8K x 14 words, 368 x 8 bytes, 256 x 8 bytes
d) 256 x 8 bytes, 368 x 8 bytes, 8K x 14 words

9) PIC16F877A has fixed length ____ wide op code.
a) 14 bits b) 13bits
c) 16bits d) 9bits

10) The stack memory for PIC16F877is the part of _____
a) Program memory
b) Data memory
c) Either program or data memory
d) Neither program nor data memory

11) The Reset vector is at _____ and the interrupt vector is at _____ for PIC16F877a.
a) 0000h,0008h b) 0004h,0007h
c) 0000h,0007h d) 0000h,0004h

12) The timer2 in PIC 16F877a can't be used as _____
a) Prescalar b) Counter
c) Postscalar d) None of these

13) The Pre scaler is mutually exclusively shared between the Watchdog Timer and _____ in PIC 16F877a.
a) Timer 0 b) Timer 1
c) Timer 2 d) Timer 3

14) Which operating mode of CCP Module can be used for speed control of DC Motor?
a) Capture b) ADC
c) PWM d) Compare

Day & Date: Monday 19-05-2025 Max. Marks: 56
Time: 10:00 AM To 01:00 PM

Instructions: 1) All questions are compulsory.
2) Figures to the right indicate full marks.
3) Assume suitable data wherever necessary.
4) Draw neat diagrams wherever necessary.

Section – I

Q.2 Attempt any Four questions. **16**

a) Compare between Harvard and von-Neumann architectures.
b) Draw and explain the bit format of Program Status Word register of 8051.
c) Explain the following instructions in detail.
a) DIV AB b) MOVX @DPTR, A
d) Describe with suitable examples the Addressing modes of 8051.
e) Describe the Special function registers associated with Serial Data Input/output in 8051.

Q.3 Attempt any Two questions. **12**

a) Analyze bit format of TMOD and TCON register in 8051. and show the significance of loading 20H in TMOD and 25H in TCON registers.
b) Write 8051 assembly or C language program to transfer message “SOLAPUR” serially at baud rate of 9600 Assume crystal frequency 11.059 MHz. Do this continuously?
c) Explain the Program & Data memory organization of 8051 with suitable diagram.

Section – II

Q.4 Attempt any Four questions. **16**

a) Explore Architectural core features & peripheral features of PIC 16F877.
b) Explain the operation of instructions MOVF, BTFSC, DECFSZ, RETLW of PIC 16F877.
c) Draw & Explore importance of OPTION register bit format of PIC16f877.
d) Explain with suitable diagram the Capture mode of operation of CCP1 module.
e) Draw & Explore bit significance of Status register of PIC16f877 & what is effect of loading 34H in status register.

Q.5 Attempt any Two questions. **12**

a) Draw & Describe internal Program memory & Data memory organization of PIC16F877 controller.

b) Write assembly or 'C' Program for Internal ADC of PIC & converted binary value displayed on LED's interfaced to port D of PIC 16F877. Draw the interfacing diagram.

c) Describe the operation of Transmitter section of USART module in PIC 16F877.

MCQ/Objective Type Questions

Duration: 30 Minutes Marks:14

Q.1 Choose the correct alternatives from the options. 14

1) A signal has _____.
a) Single value for single time instant
b) Single value for multiple time instant
c) can has any number of values for any number of time instants
d) None of above

2) Sampling theorem _____
a) $fm < fs$ b) $fs > fm$
c) $fs >= 2fm$ d) $fs = 2fm$

3) Goertzel algorithm evaluates the _____.
a) DTFT coefficients b) DFT coefficients
c) Z transforms d) None of these

4) DFT stands for _____
a) Descrite Fourier transform b) Digital function Transform
c) Digital frequency transform d) None

5) The size of input data blocks in overlap add method is _____
a) L b) $L + M$
c) $L + M - 1$ d) $L + M + 1$

6) Transform domain is used as it _____.
a) Enhance the signal b) Compress the signal
c) Reduces data points d) Increases data points

7) In overlap save method, convolution of various sections are performed by _____

a) Zero padding
b) Linear convolution
c) Circular convolution
d) Both b) and c)

8) The circular convolution of $x(n) = \{0,1,2\}$ and $h(n) = \{1,1,0\}$ is _____

a) $\{0,2,3\}$
b) $\{1,2,3\}$
c) $\{1,1,1\}$
d) $\{2,1,3\}$

9) When the system has poles inside the unit circle in Z domain _____

a) The system is stable and its impulse response is a decaying function
b) The time domain behavior will be exponentially raising signal
c) The system is unstable
d) The impulse response is marginally constant

10) The ideal Filter has impulse response of _____

a) Finite duration
b) Infinite duration between 0 and ∞
c) Infinite duration between ∞ and $+\infty$
d) None of above

11) When aliasing occurs?

a) low frequency becomes high frequency
b) high frequency becomes a mid-frequency
c) high frequency above signal bandwidth becomes low frequencies below bandwidth
d) None of above

12) Gibbs phenomenon occurred due to _____.

a) Linear phase
b) Truncation of infinite Fourier series
c) Window Method
d) Non linear phase

13) If the impulse response of the system is over a finite duration, then it is _____.

a) a moving average system
b) An auto regression system
c) An ARMA system
d) An IIR system

14) The binary signed number 0.111011001 when rounded to eight bits will result in number given by _____

a) 0.11101111
b) 0.10101010
c) 0.11101101
d) 0.11111111

T.Y. (B.Tech.) (Sem - I) (New) (CBCS) Examination: March/April-2025
ELECTRONICS & TELECOMMUNICATION ENGINEERING
Digital Signal Processing (BTN06503)

Day & Date: Tuesday, 20-05-2025 Max. Marks: 56
Time: 10:00 AM To 01:00 PM

Instructions: 1) All questions are compulsory.
2) Figures to the right indicate full marks.

Section – I

Q.2 Attempt any three of the following question. **12**

a) Obtain Autocorrelation of a sequence $h(n) = \{1,2,2,1\}$

b) Find circular convolution of $X_1(n) = \{1, 3, 5, 7\}$, $X_2(n) = \{2, 4, 6, 8\}$ using concentric circle method.

c) What is DFT? What are the properties of DFT?

d) Determine the 8 point DFT of the sequence $x(n) = \{1,1,1,1,1,1,0,0\}$

Q.3 Attempt any two of the following question. **16**

a) Write and explain the properties of autocorrelation and cross correlation.

b) Determine the output of linear FIR filter whose impulse response $h(n) = \{1, -3,5\}$
$x(n) = \{-1,4,7,3, -2,9,10,12, -5,8\}$ using overlap add method

c) Determine the DFT of sequence $x(n) = \{2, 1, 4, 6, 5, 8, 3, 9\}$ by decimation in frequency FFT.

Section – II

Q.4 Attempt any two of the following question. **12**

a) Explain the steps for designing IIR filter using impulse invariance method.

b) Explain the difference between FIR Filter and IIR filter.

c) For analog transfer function
$H(s) = 1/(s + 1)\ (s + 2)$
Determine $H(z)$ using impulse invariant technique (Assume T=1 Sec)

d) Obtain direct form realization of system function
$H(z) = 1 + 2Z^{-1} - 3Z^{-2} - 4Z^{-3} + 5Z^{-4}$

Q.5 Solve any two of the following. **16**

a) Obtain direct form I realization for the IIR system describes the difference equation

$y(n) = 0.5\, y(n-1) - 0.25\, y(n-2) + x\,(n) + 0.4x(n-1)$

b) Explain the Applications of DSP in video processing.

e) Design an ideal high pass filter whose desired frequency response

$H_d(e^{j\omega}) = 1\ \pi \geq |\omega| \geq \pi/3$

0 otherwise

Using Hamming window, Determine

i) The impulse response for $N = 9$

ii) $H(z)$

Day & Date: Tuesday, 20-05-2025 Max. Marks: 70
Time: 10:00 AM To 01:00 PM

Instructions: 1) Q. No. 1 is compulsory. It should be solved in the first 30 minutes in answer book Page no 03 (Starring page of the Answer Book Each question carries one mark.
2) Don't forget to Mention question paper set (P/Q/R/S) on top of Page.
3) Figures to the right indicates full marks.
4) Assume suitable data if necessary.

MCQ/Objective Type Questions

Duration: 30 Minutes Marks:14

Q.1 Choose the correct alternatives from the options. **14**

1) The circular convolution of $x(n) = \{0,1,2\}$ and $h(n) = \{1,1,0\}$ is _____
a) $\{0,2,3\}$ b) $\{1,2,3\}$
c) $\{1,1,1\}$ d) $\{2,1,3\}$

2) When the system has poles inside the unit circle in Z domain _____
a) The system is stable and its impulse response is a decaying function
b) The time domain behavior will be exponentially raising signal
c) The system is unstable
d) The impulse response is marginally constant

3) The ideal Filter has impulse response of _____
a) Finite duration
b) Infinite duration between 0 and ∞
c) Infinite duration between ∞ and $+\infty$
d) None of above

4) When aliasing occurs?
a) low frequency becomes high frequency
b) high frequency becomes a mid-frequency
c) high frequency above signal bandwidth becomes low frequencies below bandwidth
d) None of above

5) Gibbs phenomenon occurred due to _____.
a) Linear phase
b) Truncation of infinite Fourier series
c) Window Method
d) Non linear phase

6) If the impulse response of the system is over a finite duration, then it is _____.
a) a moving average system b) An auto regression system
c) An ARMA system d) An IIR system

7) The binary signed number 0.111011001 when rounded to eight bits will result in number given by _____
a) 0.11101111 b) 0.10101010
c) 0.11101101 d) 0.11111111

8) A signal has _____.
a) Single value for single time instant
b) Single value for multiple time instant
c) can has any number of values for any number of time instants
d) None of above

9) Sampling theorem _____
a) $\mathrm{fm} < \mathrm{fs}$ b) $\mathrm{fs} > \mathrm{fm}$
c) $\mathrm{fs} >= 2\mathrm{fm}$ d) $\mathrm{fs} = 2\mathrm{fm}$

10) Goertzel algorithm evaluates the _____.
a) DTFT coefficients b) DFT coefficients
c) Z transforms d) None of these

11) DFT stands for _____
a) Descrite Fourier transform b) Digital function Transform
c) Digital frequency transform d) None

12) The size of input data blocks in overlap add method is _____
a) L b) $\mathrm{L} + \mathrm{M}$
c) $\mathrm{L} + \mathrm{M} - 1$ d) $\mathrm{L} + \mathrm{M} + 1$

13) Transform domain is used as it _____.
a) Enhance the signal b) Compress the signal
c) Reduces data points d) Increases data points

14) In overlap save method, convolution of various sections are performed by _____
a) Zero padding b) Linear convolution
c) Circular convolution d) Both b) and c)

Seat No.

MCQ/Objective Type Questions

Duration: 30 Minutes Marks:14

Q.1 Choose the correct Answer. **14**

1) The first stage in the decision process is _____.
a) define the problem
b) select the best possible solution
c) determine the objective
d) identify possible solutions

2) The term Managerial economics also refers to _____.
a) Principles of Management b) Management Accounting
c) Applied economics d) Consumer Behavior

3) Macroeconomics deals with: _____.
a) The behavior of firms
b) Economic aggregates
c) The activities of individual units
d) The behavior of the electronics industry

4) What will happen in the rice market if buyers are expecting higher prices in the near future?
a) The demand for rice will increase.
b) The demand for rice will decrease.
c) The demand for rice will be unaffected.
d) The supply of rice will increase

5) A surplus occurs when the price is _____.
a) equal to the equilibrium price
b) greater than the equilibrium price
c) less than the equilibrium price
d) None of the above

6) If the price elasticity of demand for a good is 0.75 i.e. (less than one), the demand for the good can be described as: _____.

a) normal b) elastic
c) inferior d) inelastic

7) The elasticity of supply measures the responsiveness of _____.

a) quantity supplied to changes in price
b) quantity demanded to changes in supply
c) quantity supplied to changes in income
d) quantity supplied to changes in demand

8) Barometric methods are used to forecast _____.

a) seasonal variation b) secular trend
c) cyclical variation d) irregular variation

9) Mathematical model of Linear Programming is important because _____.

a) It helps in converting the verbal description and numerical data into mathematical expression.
b) decision makers prefer to work with formal models.
c) it captures the relevant relationship among decision factors.
d) it enables the use of algebraic techniques

10) Trend projection is an example of which kind of forecasting?

a) Qualitative b) Time-series
c) Barometric d) Econometric

11) The relation between physical output of a production process to physical inputs is known as _____.

a) Consumption function b) Utilization function
c) Production function d) Sales function

12) Variable costs are _____.

a) sunk costs
b) multiplied by fixed costs
c) costs that change with the level of production
d) defined as the change in total cost resulting from the production of an additional unit of output

13) Under which of the following forms of market structure does a firm has no control over the price of its product?

a) Monopoly b) Oligopoly
c) Monopolistic competition d) Perfect competition

14) Which of the following is the least competitive market structure?

a) Perfect competition b) Monopolistic competition
c) Oligopoly d) Monopoly

Section – I

Q.2 Solve any four. **16**

a) Describe importance of managerial economics for business decision.
b) State the difference between Microeconomics and Macroeconomics.
c) State and explain the determinants of demand.
d) Explain the following terms
1) Demand
2) Market demand
3) Supply
4) Market equilibrium
e) Explain price elasticity of demand.
f) Explain the concept income elasticity of demand.

Q.3 Solve any two. **12**

a) Explain the concept economics and managerial economics.
b) Explain the changes of demand and supply on market equilibrium.
c) Explain elasticity of supply. Also state the factors affecting the elasticity of supply.

Section – II

Q.4 Solve any four. **16**

a) Explain trend projection method for demand forecasting.
b) Explain Linear Programming (LP). Also state the advantages and limitations of LP Techniques
c) Describe production and explain the concept of production function.
d) What is breakeven analysis. Also state the limitations of breakeven analysis.
e) Compare four types of market structures in brief.
f) Explain any two survey methods for demand forecasting.

Q.5 Solve any two. **12**

a) Explain linear Regression method for demand forecasting.
b) Explain various costs of Production in detail.
c) What is pricing? Explain various factors affecting Pricing Decisions.

a) Qualitative b) Time-series
c) Barometric d) Econometric

4) The relation between physical output of a production process to physical inputs is known as _____.
a) Consumption function b) Utilization function
c) Production function d) Sales function

5) Variable costs are _____.
a) sunk costs
b) multiplied by fixed costs
c) costs that change with the level of production
d) defined as the change in total cost resulting from the production of an additional unit of output

6) Under which of the following forms of market structure does a firm has no control over the price of its product?
a) Monopoly b) Oligopoly
c) Monopolistic competition d) Perfect competition

7) Which of the following is the least competitive market structure?
a) Perfect competition b) Monopolistic competition
c) Oligopoly d) Monopoly

8) The first stage in the decision process is _____.
a) define the problem
b) select the best possible solution
c) determine the objective
d) identify possible solutions

9) The term Managerial economics also refers to _____.
a) Principles of Management b) Management Accounting
c) Applied economics d) Consumer Behavior

10) Macroeconomics deals with: _____.
a) The behavior of firms
b) Economic aggregates
c) The activities of individual units
d) The behavior of the electronics industry

11) What will happen in the rice market if buyers are expecting higher prices in the near future?
a) The demand for rice will increase.
b) The demand for rice will decrease.
c) The demand for rice will be unaffected.
d) The supply of rice will increase

12) A surplus occurs when the price is _____.
a) equal to the equilibrium price
b) greater than the equilibrium price
c) less than the equilibrium price
d) None of the above

13) If the price elasticity of demand for a good is 0.75 i.e. (less than one), the demand for the good can be described as: _____.
a) normal b) elastic
c) inferior d) inelastic

14) The elasticity of supply measures the responsiveness of _____.
a) quantity supplied to changes in price
b) quantity demanded to changes in supply
c) quantity supplied to changes in income
d) quantity supplied to changes in demand

Set Q

T. Y. (B. Tech) (Sem-I) (New) (CBCS) Examination: March/April-2025
ELECTRONICS & TELECOMMUNICATION ENGINEERING
Managerial Economics (BTN06511)

Day & Date: Wednesday 21-05-2025 Max. Marks: 56
Time: 10:00 AM To 01:00 PM

Instructions: 1) All questions are compulsory.
2) Figures to the right indicate full marks.

Section – I

Q.2 Solve any four. **16**

a) Describe importance of managerial economics for business decision.
b) State the difference between Microeconomics and Macroeconomics.
c) State and explain the determinants of demand.
d) Explain the following terms
1) Demand
2) Market demand
3) Supply
4) Market equilibrium
e) Explain price elasticity of demand.
f) Explain the concept income elasticity of demand.

Q.3 Solve any two. **12**

a) Explain the concept economics and managerial economics.
b) Explain the changes of demand and supply on market equilibrium.
c) Explain elasticity of supply. Also state the factors affecting the elasticity of supply.

Section – II

Q.4 Solve any four. **16**

a) Explain trend projection method for demand forecasting.
b) Explain Linear Programming (LP). Also state the advantages and limitations of LP Techniques
c) Describe production and explain the concept of production function.
d) What is breakeven analysis. Also state the limitations of breakeven analysis.
e) Compare four types of market structures in brief.
f) Explain any two survey methods for demand forecasting.

Q.5 Solve any two. **12**

a) Explain linear Regression method for demand forecasting.
b) Explain various costs of Production in detail.
c) What is pricing? Explain various factors affecting Pricing Decisions.

Seat No.	

Set **R**

ELECTRONICS & TELECOMMUNICATION ENGINEERING
Managerial Economics (BTN06511)

Day & Date: Wednesday 21-05-2025 Max. Marks: 70
Time: 10:00 AM To 01:00 PM

Instructions: 1) Q. No. 1 is compulsory. It should be solved in the first 30 minutes in Answer Book Page no 03 (Starting page of the Answer Book). Each question carries one mark.
2) Don't forget to Mention question paper set (P/Q/R/S) on top of page.
3) Figures to the right indicates full marks.

MCQ/Objective Type Questions

Duration: 30 Minutes Marks:14

Q.1 Choose the correct Answer. **14**

1) The relation between physical output of a production process to physical inputs is known as _____.
a) Consumption function b) Utilization function
c) Production function d) Sales function

2) Variable costs are _____.
a) sunk costs
b) multiplied by fixed costs
c) costs that change with the level of production
d) defined as the change in total cost resulting from the production of an additional unit of output

3) Under which of the following forms of market structure does a firm has no control over the price of its product?
a) Monopoly b) Oligopoly
c) Monopolistic competition d) Perfect competition

4) Which of the following is the least competitive market structure?
a) Perfect competition b) Monopolistic competition
c) Oligopoly d) Monopoly

5) The first stage in the decision process is _____.
a) define the problem
b) select the best possible solution
c) determine the objective
d) identify possible solutions

6) The term Managerial economics also refers to _____.
a) Principles of Management b) Management Accounting
c) Applied economics d) Consumer Behavior

7) Macroeconomics deals with: _____.
a) The behavior of firms
b) Economic aggregates
c) The activities of individual units
d) The behavior of the electronics industry

8) What will happen in the rice market if buyers are expecting higher prices in the near future?
a) The demand for rice will increase.
b) The demand for rice will decrease.
c) The demand for rice will be unaffected.
d) The supply of rice will increase

9) A surplus occurs when the price is _____.
a) equal to the equilibrium price
b) greater than the equilibrium price
c) less than the equilibrium price
d) None of the above

10) If the price elasticity of demand for a good is 0.75 i.e. (less than one), the demand for the good can be described as: _____.
a) normal b) elastic
c) inferior d) inelastic

11) The elasticity of supply measures the responsiveness of _____.
a) quantity supplied to changes in price
b) quantity demanded to changes in supply
c) quantity supplied to changes in income
d) quantity supplied to changes in demand

12) Barometric methods are used to forecast _____.
a) seasonal variation b) secular trend
c) cyclical variation d) irregular variation

13) Mathematical model of Linear Programming is important because _____.
a) It helps in converting the verbal description and numerical data into mathematical expression.
b) decision makers prefer to work with formal models.
c) it captures the relevant relationship among decision factors.
d) it enables the use of algebraic techniques

14) Trend projection is an example of which kind of forecasting?
a) Qualitative b) Time-series
c) Barometric d) Econometric

MCQ/Objective Type Questions

Duration: 30 Minutes Marks:14

Q.1 Choose the correct Answer. **14**

1) The PERT in project management means program evaluation and _____ technique.
a) Resource b) Reconciliation
c) Reconsideration d) Review

2) Dividing the work into small steps is known as _____.
a) Work breakdown structure b) Concurrent Engineering
c) Linear Responsibility chart d) None of above

3) Concurrent Engineering means _____.
a) Doing all activities simultaneously
b) Doing activities in coordination with each other
c) Doing teamwork
d) All of above

4) Which of below is risk identification approach?
a) Check list b) Brainstorming
c) Both a & b d) None of above

5) Which of below is true for risk?
a) Relates to future
b) Involve cause and effect
c) Not a self-contained topic within program manager
d) All of above

6) Project failure causes because of _____.
a) Improper planning b) Inadequate skills
c) Leadership problem d) All of above

7) Risk exposure for each risk can be estimated,
Risk exposure =_____* probability of occurrence.
a) Potential damage b) Cost of risk reduction
c) Risk reduction leverage d) Risk avoidance

8) Operations research practitioners do not _____.
a) take responsibility for solution implementation
b) collect essential data
c) predict future actions/operations
d) build more than one model

9) A physical model is example of _____.
a) an iconic model b) an analogue model
c) a verbal model d) a mathematical model

10) The mathematical model of an LP problem is important because _____.
a) it helps in converting the verbal description and numerical data into mathematical expression
b) decision-makers prefer to work with formal models
c) it captures the relevant relationship among decision factors
d) it enables the use of algebraic technique

11) The group replacement policy is suitable for identical low cost items which are likely to _____.
a) fail over a period of time b) fail suddenly
c) fail completely and suddenly d) none of the above

12) The method used for solving an assignment problem is called _____.
a) reduced matrix method b) MODI method
c) Hungarian method d) none of the above

13) The assignment problem _____.
a) requires that only one activity be assigned to each resource
b) is a special case of transportation problem(a)
c) can be used to maximize resources
d) all of the above

14) Which of the following explains the need for facility location selection?
a) When the existing business unit has outgrown its original facilities and expansion is not possible.
b) When a business is newly started.
c) When the lease expires and the landlord does not renew the lease.
d) All of these

2) Figures to the right indicate full marks.

Section – I

Q.2 Solve any four of the following. **16**

a) Illustrate with an example Concurrent Engineering in project management.
b) What are the steps involved in project planning for constructing a house?
c) Explain Qualitative and Quantitative Risk assessment.
d) Explain Project cost estimation & Budgeting with an example.
e) Explain the stages of the project life cycle.

Q.3 Solve any two of the following. **12**

a) Explain Concept & need of project management
b) What is Risk? What are its categories?
c) Explain Top down & Bottom up Budgeting with examples.

Section – II

Q.4 Solve any four of the following. **16**

a) Describe briefly the applications of OR in managerial decision making.
b) Discuss the advantages and limitations of operations research.
c) Explain how the theory of replacement is used in the following problems.
1) Replacement of items whose maintenance cost varies with time
2) Replacement of items that completely fail
d) A company sells two different products A and B, making a profit of Rs 40 and Rs 30 per unit, respectively. They are both produced with the help of a common production process and are sold in two different markets. The production process has a total capacity of 30,000 man-hours. It takes three hours to produce a unit of A and one hour to produce a unit of B. The market has been surveyed and company officials feel that the maximum number of units of A that can be sold is 8,000 units and that of B is 12,000 units. Subject to these limitations, products can be sold in any combination. Formulate this problem as an LP model to maximize profit.

e) Discuss the factors that affect the location decision for a production facility.

Q.5 Solve any two of the following. **12**

a) What is a model? Illustrate with examples various classification schemes of models in operation research.

b) Anita Electric Company produces two products P1 and P2. Products are produced and sold on a weekly basis. The weekly production cannot exceed 25 for product P1 and 35 for product P2 because of limited available facilities. The company employs total of 60 workers. Product P1 requires 2 man-weeks of labour, while P2 requires one man-week of labour. Profit margin on P1 is Rs. 60 and on P2 is Rs. 40. Formulate this problem as an LP problem and solve that using graphical method.

c) Five men are available to do five different jobs. From past records, the time (in hours) that each man takes to do each job is known and is given in the following table:

		Jobs				
		I	II	III	IV	V
Men	A	2	9	2	7	1
	B	6	8	7	6	1
	C	4	6	5	3	1
	D	4	2	7	3	1
	E	5	3	9	5	1

Find out how men should be assigned the jobs in a way that will minimize the total time taken.

Day & Date: Wednesday 21-05-2025 Max. Marks: 56
Time: 10:00 AM To 01:00 PM

Instructions: 1) All questions are compulsory.
2) Figures to the right indicate full marks.

Section – I

Q.2 Solve any four of the following. **16**

a) Illustrate with an example Concurrent Engineering in project management.
b) What are the steps involved in project planning for constructing a house?
c) Explain Qualitative and Quantitative Risk assessment.
d) Explain Project cost estimation & Budgeting with an example.
e) Explain the stages of the project life cycle.

Q.3 Solve any two of the following. **12**

a) Explain Concept & need of project management
b) What is Risk? What are its categories?
c) Explain Top down & Bottom up Budgeting with examples.

Section – II

Q.4 Solve any four of the following. **16**

a) Describe briefly the applications of OR in managerial decision making.
b) Discuss the advantages and limitations of operations research.
c) Explain how the theory of replacement is used in the following problems.
1) Replacement of items whose maintenance cost varies with time
2) Replacement of items that completely fail
d) A company sells two different products A and B, making a profit of Rs 40 and Rs 30 per unit, respectively. They are both produced with the help of a common production process and are sold in two different markets. The production process has a total capacity of 30,000 man-hours. It takes three hours to produce a unit of A and one hour to produce a unit of B. The market has been surveyed and company officials feel that the maximum number of units of A that can be sold is 8,000 units and that of B is 12,000 units. Subject to these limitations, products can be sold in any combination. Formulate this problem as an LP model to maximize profit.

e) Discuss the factors that affect the location decision for a production facility.

Q.5 Solve any two of the following. **12**

a) What is a model? Illustrate with examples various classification schemes of models in operation research.

b) Anita Electric Company produces two products P1 and P2. Products are produced and sold on a weekly basis. The weekly production cannot exceed 25 for product P1 and 35 for product P2 because of limited available facilities. The company employs total of 60 workers. Product P1 requires 2 man-weeks of labour, while P2 requires one man-week of labour. Profit margin on P1 is Rs. 60 and on P2 is Rs. 40. Formulate this problem as an LP problem and solve that using graphical method.

c) Five men are available to do five different jobs. From past records, the time (in hours) that each man takes to do each job is known and is given in the following table:

		Jobs				
		I	II	III	IV	V
Men	A	2	9	*2*	7	1
	B	6	8	7	6	1
	C	4	6	5	3	1
	D	4	2	7	3	1
	E	5	3	9	5	1

Find out how men should be assigned the jobs in a way that will minimize the total time taken.

T. Y. (B. Tech) (Sem-I) (New) (CBCS) Examination: March/April-2025
ELECTRONICS & TELECOMMUNICATION ENGINEERING
Project Management and Operation Research (BTN06512)

Day & Date: Wednesday 21-05-2025 Max. Marks: 70
Time: 10:00 AM To 01:00 PM

Instructions: 1) Q. No. 1 is compulsory. It should be solved in the first 30 minutes in Answer Book Page no 03 (Starting page of the Answer Book). Each question carries one mark.
2) Don't forget to Mention question paper set (P/Q/R/S) on top of page.
3) Figures to the right indicates full marks.

MCQ/Objective Type Questions

Duration: 30 Minutes Marks:14

Q.1 Choose the correct Answer. **14**

1) Project failure causes because of _____.
a) Improper planning b) Inadequate skills
c) Leadership problem d) All of above

2) Risk exposure for each risk can be estimated,
Risk exposure =_____* probability of occurrence.
a) Potential damage b) Cost of risk reduction
c) Risk reduction leverage d) Risk avoidance

3) Operations research practitioners do not _____.
a) take responsibility for solution implementation
b) collect essential data
c) predict future actions/operations
d) build more than one model

4) A physical model is example of _____.
a) an iconic model b) an analogue model
c) a verbal model d) a mathematical model

5) The mathematical model of an LP problem is important because _____.
a) it helps in converting the verbal description and numerical data into mathematical expression
b) decision-makers prefer to work with formal models
c) it captures the relevant relationship among decision factors
d) it enables the use of algebraic technique

6) The group replacement policy is suitable for identical low cost items which are likely to _____.
a) fail over a period of time b) fail suddenly
c) fail completely and suddenly d) none of the above

7) The method used for solving an assignment problem is called _____.
a) reduced matrix method b) MODI method
c) Hungarian method d) none of the above

8) The assignment problem _____.
a) requires that only one activity be assigned to each resource
b) is a special case of transportation problem(a)
c) can be used to maximize resources
d) all of the above

9) Which of the following explains the need for facility location selection?
a) When the existing business unit has outgrown its original facilities and expansion is not possible.
b) When a business is newly started.
c) When the lease expires and the landlord does not renew the lease.
d) All of these

10) The PERT in project management means program evaluation and _____ technique.
a) Resource b) Reconciliation
c) Reconsideration d) Review

11) Dividing the work into small steps is known as _____.
a) Work breakdown structure b) Concurrent Engineering
c) Linear Responsibility chart d) None of above

12) Concurrent Engineering means _____.
a) Doing all activities simultaneously
b) Doing activities in coordination with each other
c) Doing teamwork
d) All of above

13) Which of below is risk identification approach?
a) Check list b) Brainstorming
c) Both a & b d) None of above

14) Which of below is true for risk?
a) Relates to future
b) Involve cause and effect
c) Not a self-contained topic within program manager
d) All of above

Day & Date: Thursday 22-05-2025 Max. Marks: 70
Time: 10:00 AM To 01:00 PM

Instructions: 1) Q. No. 1 is compulsory. It should be solved in the first 30 minutes in Answer Book Page no 03 (Starting page of the Answer Book). Each question carries one mark.
2) Don't forget to Mention question paper set (P/Q/R/S) on top of page.
3) Figures to the right indicates full marks.
4) Assume suitable data where necessary.

MCQ/Objective Type Questions

Duration: 30 Minutes Marks:14

Q.1 Choose the correct Answer. **14**

1) The primitives in probabilistic reasoning are random variables.
a) True b) False

2) What are the types of entities covered in Ontology?
a) Physical and abstract objects
b) Time and locations
c) Actions and events
d) All

3) Propositional Logic has _____ output.
a) Either True or False b) Both True and False
c) Quantitative Value d) None

4) Which statement is valid for the Heuristic function?
a) The heuristic function is used to solve mathematical problems.
b) The heuristic function takes parameters of type string and returns an integer value.
c) The heuristic function does not have any return type.
d) The heuristic function calculates the cost of an optimal path between the pair of states

5) Which of the following cannot be handled by an intelligent agent?
a) Learning b) Decision Making
c) Uncertainties d) None of these

6) "All bird fly" which of the following is referred as predicate in given ____.
a) bird b) fly
c) All d) none of these

7) The Bayesian Network gives _____.
a) A complete description of the problem
b) Partial Description of the domain
c) A complete description of the domain
d) None of the above

8) Decision making involves utility theory?
a) Yes b) No
c) Not always d) None of above

9) Which of these is the best learning model suitable for an observable environment?
a) Supervised b) Unsupervised
c) Both a & b d) None

10) The search algorithm which is similar to the minimax search, but removes the branches that don't affect the final output is known as ____.
a) DFS b) BFS
c) Alpha-beta pruning d) None of these

11) Which of following has task fully observable environment?
a) Chess Game b) Taxi Driver
c) Medical Diagnosis d) Cricket

12) In regards with uninformed search which statement is TRUE?
a) It has domain knowledge
b) It will increase the time complexity
c) It uses heuristic function
d) Best First Search Algorithm is type of uninformed search

13) Which is an actuator in Al CAR agent application?
a) object detection sensor b) Temperature sensor
c) Wheel Drive motor d) Battery

14) An Al agent perceives and acts upon the environment using _____.
a) Sensors b) Actuators
c) Transducers d) All of these

Section – I

Q.2 Attempt any Four. **16**

a) Explain any two applications of Al in detail
b) Explain any two types Al agents with diagram.
c) Explain MIN-MAX search algorithm with an example.
d) Explain what is Ontology with reference to Al.
e) What is constraint Satisfaction Problems? Explain with map colouring example.

Q.3 Attempt any two. **12**

a) Explain the AO* algorithm with example.
b) Differentiate between BFS & DFS Algorithm?
c) Write short note on knowledge representation and reasoning.

Section – II

Q.4 Attempt any Four. **16**

a) Explain Bays rule in Probability.
b) Explain with two examples probabilistic inference.
c) Explain utility theory.
d) How decision making is done by a robot.
e) What are the scalability issues concerned with learning and knowledge acquisition?

Q.5 Attempt any two. **12**

a) Explain the concept of sequential decision problems.
b) Explain about description logics.

T.Y. (B.Tech.) (Sem - I) (New) (CBCS) Examination: March/April-2025
ELECTRONICS AND TELECOMMUNICATION ENGINEERING
Data Processing & Feature Engineering (BTN06516)

Day & Date: Thursday 22-05-2025 Max. Marks: 70
Time: 10:00 AM To 01:00 PM

Instructions: 1) Q. No. 1 is compulsory. It should be solved in the first 30 minutes in Answer Book Page no 03 (Starting page of the Answer Book). Each question carries one mark.
2) Don't forget to Mention question paper set (P/Q/R/S) on top of page.
3) Figures to the right indicates full marks.
4) Assume suitable data if necessary.

MCQ/Objective Type Questions

Duration: 30 Minutes Marks:14

Q.1 Choose the correct Answer. **14**

1) What does data quality refer to?
a) The quantity of data collected
b) The accuracy, completeness, and consistency of data
c) The speed at which data is processed
d) The type of data stored

2) Which of the following is not a common data scale type?
a) Nominal b) Ordinal
c) Quantitative d) Hierarchical

3) What is the process of transforming features to create new ones called?
a) Feature scaling b) Feature engineering
c) Feature selection d) Feature extraction

4) What is the purpose of feature selection in machine learning?
a) To create new features from existing ones
b) To handle missing data entries
c) To reduce the number of features in the dataset
d) To normalize data to a common scale

5) What is the main objective of PCA?
a) Dimensionality reduction b) Feature extraction
c) Clustering d) Classification

6) What is the purpose of data normalization?
a) To transform data into a different scale type
b) To handle missing data entries
c) To ensure all features have the same scale
d) To remove outliers from the dataset

7) In following type of feature selection method, we start with empty feature set _____.
a) Forward feature selection b) Backward feature selection
c) Both a and b d) None of these

8) Which technique transforms features to a specific range, typically between 0 and 1?
a) Binarization b) Standardization
c) Min-Max Scaling d) Log transformation

9) What is the generalization of the log transform called?
a) Power transforms b) Binning
c) Standardization d) Min-Max Scaling

10) What is the concept of model stacking in machine learning?
a) Combining multiple models to improve predictive performance
b) Creating new features from existing ones
c) Transforming data into a standard scale
d) Reducing the number of features in the dataset

11) In k-means clustering, what does "k" represent?
a) The number of features in the dataset
b) The number of clusters to be formed
c) The dimensionality of the data
d) The type of distance metric used

12) Which of the following is a technique for manual feature extraction in images?
a) Fully Connected Layers
b) Convolutional Layers
c) SIFT (Scale-Invariant Feature Transform)
d) Rectified Linear Unit (ReLU)

13) Which of the following is required by K-means clustering?
a) defined distance metric
b) number of clusters
c) initial guess as to cluster centroids
d) all of the mentioned

14) What do pooling layers do in convolutional neural networks (CNNs)?
a) Reduce feature map size
b) Increase feature complexity
c) Perform feature transformation
d) Calculate gradient orientations

T.Y. (B.Tech.) (Sem - I) (New) (CBCS) Examination: March/April-2025
ELECTRONICS AND TELECOMMUNICATION ENGINEERING
Data Processing & Feature Engineering (BTN06516)

Day & Date: Thursday 22-05-2025 Max. Marks: 56
Time: 10:00 AM To 01:00 PM

Instructions: 1) All questions are compulsory.
2) Figures to the right indicate full marks.
3) Assume suitable data if necessary.

Section – I

Q.2 Attempt any Four. **16**

a) What are the different types of data scale types, and how do they affect data analysis?
b) How can data be transformed from an ordinal scale to relative or absolute scale?
c) Describe the process of Singular Value Decomposition (SVD).
d) How does feature discretization contribute to feature engineering, and what are some common discretization methods?
e) What is subset selection in the context of machine learning, and why is it important? Elaborate with its types.

Q.3 Attempt any two. **12**

a) What are the sequential steps in conducting Principal Component Analysis (PCA), and how does this method contribute to reducing dimensionality in datasets?
b) What is feature normalization in the context of data preprocessing, and what are the commonly employed techniques for normalization?
c) Discuss the goals and principles of Linear Discriminant Analysis (LDA) in feature transformation and classification tasks.

Section – II

Q.4 Attempt any Four. **16**

a) Discuss the concepts of scalars, vectors, and spaces as they relate to feature engineering and machine learning algorithms.
b) How do min-max scaling and standardization (variance scaling) differ in their approaches to feature scaling?
c) What are the components of Scale-Invariant Feature Transform (SIFT) architecture? Elaborate it in detail.
d) What are Image Gradients? Elaborate Gradient Orientation Histograms.
e) Explain the concept of power transforms as a generalization of the log transform and their role in feature engineering.

Q.5 Attempt any two. **12**

a) Explain the concept of fully connected layers and convolutional layers in deep neural networks for image processing tasks.

b) What is meant by Binarization? Describe the different methods of quantization or binning methods.

c) Describe the process of k-means featurization for classification tasks.

Day & Date: Thursday 22-05-2025 Max. Marks: 70
Time: 10:00 AM To 01:00 PM

Instructions: 1) Q. No. 1 is compulsory. It should be solved in the first 30 minutes in Answer Book Page no 03 (Starting page of the Answer Book). Each question carries one mark.
2) Don't forget to Mention question paper set (P/Q/R/S) on top of page.
3) Figures to the right indicates full marks.
4) Assume suitable data if necessary.

MCQ/Objective Type Questions

Duration: 30 Minutes Marks:14

Q.1 Choose the correct Answer. **14**

1) Which technique transforms features to a specific range, typically between 0 and 1?
a) Binarization b) Standardization
c) Min-Max Scaling d) Log transformation

2) What is the generalization of the log transform called?
a) Power transforms b) Binning
c) Standardization d) Min-Max Scaling

3) What is the concept of model stacking in machine learning?
a) Combining multiple models to improve predictive performance
b) Creating new features from existing ones
c) Transforming data into a standard scale
d) Reducing the number of features in the dataset

4) In k-means clustering, what does "k" represent?
a) The number of features in the dataset
b) The number of clusters to be formed
c) The dimensionality of the data
d) The type of distance metric used

5) Which of the following is a technique for manual feature extraction in images?
a) Fully Connected Layers
b) Convolutional Layers
c) SIFT (Scale-Invariant Feature Transform)
d) Rectified Linear Unit (ReLU)

6) Which of the following is required by K-means clustering?
a) defined distance metric
b) number of clusters
c) initial guess as to cluster centroids
d) all of the mentioned

7) What do pooling layers do in convolutional neural networks (CNNs)?
a) Reduce feature map size
b) Increase feature complexity
c) Perform feature transformation
d) Calculate gradient orientations

8) What does data quality refer to?
a) The quantity of data collected
b) The accuracy, completeness, and consistency of data
c) The speed at which data is processed
d) The type of data stored

9) Which of the following is not a common data scale type?
a) Nominal b) Ordinal
c) Quantitative d) Hierarchical

10) What is the process of transforming features to create new ones called?
a) Feature scaling b) Feature engineering
c) Feature selection d) Feature extraction

11) What is the purpose of feature selection in machine learning?
a) To create new features from existing ones
b) To handle missing data entries
c) To reduce the number of features in the dataset
d) To normalize data to a common scale

12) What is the main objective of PCA?
a) Dimensionality reduction b) Feature extraction
c) Clustering d) Classification

13) What is the purpose of data normalization?
a) To transform data into a different scale type
b) To handle missing data entries
c) To ensure all features have the same scale
d) To remove outliers from the dataset

14) In following type of feature selection method, we start with empty feature set _____.
a) Forward feature selection b) Backward feature selection
c) Both a and b d) None of these

MCQ/Objective Type Questions

Duration: 30 Minutes Marks:14

Q.1 Choose the correct Answer. **14**

1) What is the main purpose of twisting the wires in a twisted pair cable?
a) To increase bandwidth
b) To reduce electromagnetic interference
c) To enhance speed
d) To improve durability

2) The core of a coaxial cable is made up of _____.
a) Plastic b) Glass
c) Copper or aluminum wire d) Optical fibre

3) What is the primary purpose of an IP address?
a) To identify the physical location of a device
b) To uniquely identify a device on a network
c) To encrypt internet communication
d) To determine the device's operating system

4) Which command is commonly used in FTP to upload a file to a server?
a) GET b) PUT
c) OPEN d) LIST

5) What is the unit of measurement for battery capacity?
a) Amperes b) Ampere-hours (Ah)
c) Volts d) Watts

6) The common IC regulator series is _____.
a) 78xx series b) 55xx series
c) 12xx series d) 74xx series

7) Which of the following is NOT a type of fuse?
a) Cartridge fuse b) Blade fuse
c) Semiconductor fuse d) Hydraulic fuse

8) Which of the following is an example of a classification of signals based on their function?
a) Stop signal b) Distant signal
c) Home signal d) All of the above

9) Points in railway systems refer to _____.
a) Signal posts along the tracks
b) Junctions where trains can be directed to different tracks
c) The start of a railway station platform
d) Speed markers on the tracks

10) The main function of a relay in railway signaling is to _____.
a) Act as a mechanical switch
b) Amplify the current in the circuit
c) Control signals based on electrical inputs
d) Generate power for the signaling system

11) A device used to connect multiple networks and direct data packets between them is called a _____.
a) Hub b) Switch
c) Router d) Modem

12) What is the primary role of a DHCP server?
a) Resolve domain names to IP addresses
b) Assign dynamic IP addresses to devices
c) Transfer files between systems
d) Provide secure remote access

13) Which of the following is a common threat to network security?
a) Malware b) Firewall
c) Encryption d) VPN

Set **R**

T.Y. (B.Tech.) (Sem - I) (New) (CBCS) Examination: March/April-2025
ELECTRONICS AND TELECOMMUNICATION ENGINEERING
Data Communication and Signaling in Railway (BTN06518)

Day & Date: Thursday 22-05-2025 Max. Marks: 70
Time: 10:00 AM To 01:00 PM

Instructions: 1) Q. No. 1 is compulsory. It should be solved in the first 30 minutes in Answer Book Page no 03 (Starting page of the Answer Book). Each question carries one mark.
2) Don't forget to Mention question paper set (P/Q/R/S) on top of page.
3) Figures to the right indicates full marks.

MCQ/Objective Type Questions

Duration: 30 Minutes Marks:14

Q.1 Choose the correct Answer. **14**

1) A device used to connect multiple networks and direct data packets between them is called a _____.
a) Hub b) Switch
c) Router d) Modem

2) What is the primary role of a DHCP server?
a) Resolve domain names to IP addresses
b) Assign dynamic IP addresses to devices
c) Transfer files between systems
d) Provide secure remote access

3) Which of the following is a common threat to network security?
a) Malware b) Firewall
c) Encryption d) VPN

4) Railnet servers are commonly used for _____.
a) Passenger entertainment
b) Hosting intranet-based applications
c) Running signaling operations
d) Managing station lighting systems

5) What is the main purpose of twisting the wires in a twisted pair cable?
a) To increase bandwidth
b) To reduce electromagnetic interference
c) To enhance speed
d) To improve durability

6) The core of a coaxial cable is made up of _____.
a) Plastic b) Glass
c) Copper or aluminum wire d) Optical fibre

7) What is the primary purpose of an IP address?
a) To identify the physical location of a device
b) To uniquely identify a device on a network
c) To encrypt internet communication
d) To determine the device's operating system

8) Which command is commonly used in FTP to upload a file to a server?
a) GET b) PUT
c) OPEN d) LIST

9) What is the unit of measurement for battery capacity?
a) Amperes b) Ampere-hours (Ah)
c) Volts d) Watts

10) The common IC regulator series is _____.
a) 78xx series b) 55xx series
c) 12xx series d) 74xx series

11) Which of the following is NOT a type of fuse?
a) Cartridge fuse b) Blade fuse
c) Semiconductor fuse d) Hydraulic fuse

12) Which of the following is an example of a classification of signals based on their function?
a) Stop signal b) Distant signal
c) Home signal d) All of the above

13) Points in railway systems refer to _____.
a) Signal posts along the tracks
b) Junctions where trains can be directed to different tracks
c) The start of a railway station platform
d) Speed markers on the tracks

14) The main function of a relay in railway signaling is to _____.
a) Act as a mechanical switch
b) Amplify the current in the circuit
c) Control signals based on electrical inputs
d) Generate power for the signaling system

Seat No.	

Set **R**

T.Y. (B.Tech.) (Sem - I) (New) (CBCS) Examination: March/April-2025
ELECTRONICS AND TELECOMMUNICATION ENGINEERING
Data Communication and Signaling in Railway (BTN06518)

Day & Date: Thursday 22-05-2025 Max. Marks: 56
Time: 10:00 AM To 01:00 PM

Instructions: 1) All questions are compulsory.
2) Figures to the right indicate full marks.

Section – I

Q.2 Attempt any Four. **16**

a) What are the types of networking cables? Explain.
b) Give the advantages & disadvantages of Optical Fiber Cables.
c) Write a note on WWW (World Wide Web).
d) What are the advantages and limitations of using email as a communication tool?
e) Describe the process of de-soldering and the tools used for it.

Q.3 Attempt any two. **12**

a) What is IP addressing? What do you mean by Physical & Logical address? Explain the components of the Internet.
b) Write a note on Real-Time Communication.
c) Explain necessity of Fuses & classification of Fuses.

Section – II

Q.4 Attempt any Four. **16**

a) What are the objects of signals in Railway?
b) What is meant by "points" in the context of railway signaling systems?
c) Explain the client-server model in computer networks. How does communication between a client and server occur?
d) Explain the difference between a LAN (Local Area Network) and a WAN (Wide Area Network). Provide examples of their applications.
e) How does the connectivity diagram help in identifying potential failures in the network?

Q.5 Attempt any Two. **12**

a) Give & explain classification of Railway signals according to location.
b) What is DNS (Domain Name System)? Explain its role in translating domain names to IP addresses.
c) Write note on Railnet.

Seat No.		Set	S

3) Figures to the right indicates full marks.

MCQ/Objective Type Questions

Duration: 30 Minutes Marks:14

Q.1 Choose the correct Answer. **14**

1) Which mechanism is primarily used to enforce access control?
a) Firewalls b) Authentication tokens
c) Encryption d) All of the above

2) Buffer overflow occurs when: _____.
a) A program writes more data to a buffer than it can hold.
b) A buffer is not initialized before use.
c) A program runs out of memory.
d) A buffer is accessed without permission.

3) What is the purpose of Dynamic ARP Inspection (DAI)?
a) Resolve IP conflicts b) Authenticate ARP replies
c) Encrypt ARP messages d) Log ARP packets for auditing

4) Which cipher block mode of operation provides both encryption and authentication?
a) ECB b) CBC
c) GCM d) OFB

5) Collision resistance in a hash function means: _____.
a) It is hard to find two inputs with the same hash output.
b) The hash function is easy to compute.
c) The hash value is encrypted with a key.
d) The hash is reversible.

6) Digital signatures are created using: _____.
a) Hash functions only
b) Public key encryption only
c) Hash functions and public key encryption
d) Symmetric key encryption

7) In the X.509 standard, the entity responsible for binding public keys to user identities is: _____.
a) Key Distribution Center (KDC)
b) Certificate Authority (CA)
c) Resource Server
d) Authentication Server (AS)

8) S/MIME ensures email security through: _____.
a) Symmetric encryption and hashing
b) Digital certificates and encryption
c) Asymmetric cryptography only
d) Hashing algorithms only

9) The two main components of IPsec are: _____.
a) Authentication and confidentiality
b) Authentication Header (AH) and Encapsulating Security Payload (ESP)
c) Key generation and certificate verification
d) Tunnelling and transport mechanisms

10) The key components of SNMP include: _____.
a) Manager, Agent, and MIB
b) Router, Switch, and Firewall
c) Host, Protocol, and Application
d) Key, Token, and Certificate

11) Which of the following best describes a script kiddie?
a) A skilled attacker developing new malware
b) An unskilled individual using pre-written scripts to launch attacks
c) A professional cybersecurity expert
d) A hacker focused on network traffic

12) Which type of IDS analyses known attack signatures?
a) Host-based IDS
b) Signature-based IDS
c) Anomaly-based IDS
d) Network-based IDS

13) What is a key limitation of symbolic execution?
a) It is effective only at runtime.
b) It cannot handle loops and complex program paths effectively.
c) It is only applicable to compiled code.
d) It requires user input during analysis.

14) Which of the following is a proactive approach to secure software development?
a) Penetration testing after deployment
b) Implementing security measures during the design phase
c) Relying on firewalls for network security
d) Avoiding code review

Set **P**

T.Y. (B.Tech.) (Sem - I) (New) (CBCS) Examination: March/April-2025
ELECTRONICS AND TELECOMMUNICATION ENGINEERING
Network Security and Secure Coding (BTN06519)

Day & Date: Thursday 22-05-2025 Max. Marks: 56
Time: 10:00 AM To 01:00 PM

Instructions: 1) All questions are compulsory.
2) Figures to the right indicate full marks.

Section – I

Q.2 Attempt any Four. **16**

a) Differentiate between authentication and access control with suitable examples.
b) Outline the techniques used to mitigate buffer overflow vulnerabilities in modern operating systems.
c) Discuss how a hash function is used for message authentication in combination with a secret key.
d) How does the choice of a hash function (e.g., MD5, SHA-256) affect the security of an HMAC?
e) Explain the structure of an X.509 certificate. What are its key fields, and what do they represent?

Q.3 Attempt any two. **12**

a) Describe the process of UDP hijacking and its limitations compared to TCP hijacking.
b) Discuss the pros and cons of performing encryption at the following locations:
1) End-hosts (e.g., application layer)
2) Gateways (e.g., transport/network layers)
3) Link layer (e.g., hardware-based encryption)
c) Describe the working of the RSA algorithm. How is it used for both encryption and digital signatures.

Section – II

Q.4 Attempt any Four. **16**

a) How does IPSec integrate with IPv4 and IPv6 networks?
b) Explain the process of adding an AH to an IP packet. What changes occur in the IP header?
c) Explain the lifecycle of a computer virus. How do viruses differ from worms and Trojans?
d) Explain the differences between signature-based detection and anomaly-based detection in IDS.
e) Explain the difference between black-box, gray-box, and white-box fuzzing.

Q.5 Attempt any two. **12**

a) Explain the architecture of IP Sec and the role of its key components.

b) Describe the components of SNMP architecture. How do they interact to manage a network?

c) What is static analysis, and how does it differ from dynamic analysis in vulnerability detection?

11) Buffer overflow occurs when: _____.
a) A program writes more data to a buffer than it can hold.
b) A buffer is not initialized before use.
c) A program runs out of memory.
d) A buffer is accessed without permission.

12) What is the purpose of Dynamic ARP Inspection (DAI)?
a) Resolve IP conflicts b) Authenticate ARP replies
c) Encrypt ARP messages d) Log ARP packets for auditing

13) Which cipher block mode of operation provides both encryption and authentication?
a) ECB b) CBC
c) GCM d) OFB

14) Collision resistance in a hash function means: _____.
a) It is hard to find two inputs with the same hash output.
b) The hash function is easy to compute.
c) The hash value is encrypted with a key.
d) The hash is reversible.

Seat No.		Set	S

T.Y. (B.Tech.) (Sem - I) (New) (CBCS) Examination: March/April-2025
ELECTRONICS AND TELECOMMUNICATION ENGINEERING
Network Security and Secure Coding (BTN06519)

Day & Date: Thursday 22-05-2025 Max. Marks: 56
Time: 10:00 AM To 01:00 PM

Instructions: 1) All questions are compulsory.
2) Figures to the right indicate full marks.

Section – I

Q.2 Attempt any Four. **16**

a) Differentiate between authentication and access control with suitable examples.
b) Outline the techniques used to mitigate buffer overflow vulnerabilities in modern operating systems.
c) Discuss how a hash function is used for message authentication in combination with a secret key.
d) How does the choice of a hash function (e.g., MD5, SHA-256) affect the security of an HMAC?
e) Explain the structure of an X.509 certificate. What are its key fields, and what do they represent?

Q.3 Attempt any two. **12**

a) Describe the process of UDP hijacking and its limitations compared to TCP hijacking.
b) Discuss the pros and cons of performing encryption at the following locations:
1) End-hosts (e.g., application layer)
2) Gateways (e.g., transport/network layers)
3) Link layer (e.g., hardware-based encryption)
c) Describe the working of the RSA algorithm. How is it used for both encryption and digital signatures.

Section – II

Q.4 Attempt any Four. **16**

a) How does IPSec integrate with IPv4 and IPv6 networks?
b) Explain the process of adding an AH to an IP packet. What changes occur in the IP header?
c) Explain the lifecycle of a computer virus. How do viruses differ from worms and Trojans?
d) Explain the differences between signature-based detection and anomaly-based detection in IDS.
e) Explain the difference between black-box, gray-box, and white-box fuzzing.

Q.5 Attempt any two. **12**

a) Explain the architecture of IP Sec and the role of its key components.

b) Describe the components of SNMP architecture. How do they interact to manage a network?

c) What is static analysis, and how does it differ from dynamic analysis in vulnerability detection?

Instructions: 1) Q. No. 1 is compulsory. It should be solved in the first 20 minutes in answer book Page no 03 (Starting page of the Answer Book). Each question carries one mark.
2) Don't forget to Mention question paper set (P/Q/R/S) on top of page.
3) Figures to the right indicates full marks.
4) Assume suitable data if required and state it clearly.

MCQ/Objective Type Questions

Duration: 20 Minutes Marks: 10

Q.1 Choose the correct alternatives from the options. 10

1) Which of the following market structures has a predominant feature of price leadership?
a) Perfectly competitive b) Monopoly
c) Oligopoly d) Monopolistic

2) Average revenue is _____
a) Total revenue divided by the number of units sold
b) Revenue earned by all the units of the output
c) Revenue earned by the average sized firm in the industry
d) Net addition made to the total revenue by selling one more unit of a commodity

3) Which of these is an economic activity?
a) Father teaching his son at home instead of spending on coaching
b) A housewife making food for the family on her own
c) A hair dresser doing hair cut designing on payment
d) A singer giving a show on his son's wedding anniversary

4) Which of the following is NOT an account in the Balance of Payments?
a) Current Account b) Capital Account
c) Financial Account d) Future Account

5) Which of the following is not a regulatory institution in Indian financial system?
a) RBI b) CIBIL
c) SEBI d) IRDA

6) In a mixed economy which sector (s) is 1 are found _____

a) Private only
b) Public only
c) None
d) Both (a) Private and (b)Public

7) Who is known as father of economics?

a) Adam Smith
b) Prof. A. Samulson
c) Alfred Marshall
d) J. R. Hicks

8) Micro and Macro are not two independent approaches to economic analysis but they are complementary to each other.

a) False
b) True
c) Partly true
d) Partly False

9) Which one of the following is not the function of money?

a) Medium of exchange
b) Measure of Happiness
c) Standard of deferred payment
d) Store of value

10) Which one of the following cost can never become zero?

a) Average cost
b) Fixed cost
c) Marginal cost
d) Variable cost

Stress and Coping (BTN06508)

Day & Date: Sunday, 25-05-2025 Max. Marks: 40
Time: 10:00 AM To 12:00 PM

Instructions: 1) Attempt any four questions out of Q.2 to Q.7.
2) Figures to the right indicate full marks.

Q.2 Define Stress & explain current and historical status of stress. **10**

Q.3 Describe various consequences due to stress. **10**

Q.4 Describe in detail the different causes of stress. **10**

Q.5 Discuss the nature of stress response. **10**

Q.6 What are some effective techniques for managing stress. **10**

Q.7 How does social support contribute to stress mitigation. **10**

Professional Ethics and Human Value (BTN06509)

Day & Date: Sunday, 25-05-2025 Max. Marks: 50
Time: 10:00 AM To 12:00 PM

Instructions:1) Q. No. 1 is compulsory. It should be solved in the first 20 minutes in answer bookPage no 03 (Starting page of the Answer Book). Each question carries one mark.
2) Don't forget to Mention question paper set (P/Q/R/S) on top of page.
3) Figures to the right indicates full marks.
4) Assume suitable data wherever needed & mention it clearly.

MCQ/Objective Type Questions

Duration: 20 Minutes Marks:10

Q.1 Choose amongst the alternatives. 10

1) Ethics is the word that refers to _____.
a) Human tendency b) Morals, values, and beliefs
c) Only Values d) Psychology

2) Word ethichs is definded as a _____
a) Motivation
b) Set of attitudes concerned with the value of work
c) Attitude
d) Values

3) _____ is defined as the duty, obligation or even authority.
a) Work b) Responsibility
c) Democracy d) Authority

4) The study on ethics helps to know the people's _____.
a) Learn good or bad things
b) Copyright
c) Morality
d) Beliefs, values, and morals

5) The objectives of professional ethics in engineering are _____.
a) To understand the moral values that ought to guide the Engineering profession
b) To resolve the moral issues in the profession, and
c) To justify the moral judgment concerning the profession
d) All the above

6) The main core human values are _____.

a) Right conduct b) Peace
c) Both a & b d) None of these

7) Preconditioning is ____.

a) Assuming without knowing b) Knowing without assuming
c) Only assuming d) Only knowing

8) Value education deals with ____.

a) What is universally valuable to all of us
b) What is conductive to our individual and collective of us
c) Enables to be in harmony with ourselves, other and rest of nature
d) All of the above

9) Courage is the tendency to accept and face ____.

a) Self-confidence
b) Risks and difficult tasks in rational ways
c) Physical courage
d) Social courage

10) Human life is lived at four levels individuals, family, society and ____.

a) Nature b) Nurture
c) World d) Universe

3) Figures to the right indicates full marks.
4) Make suitable assumptions if necessary and state them clearly.

MCQ/Objective Type Questions

Duration: 30 Minutes Marks:14

Q.1 Choose the correct option from the following. **14**

1) Which of the following is true about the difference between an antenna and a transmission line?
a) Antennas convert electromagnetic waves to electric currents; transmission lines convert electric signals to optical signals.
b) Antennas are used for radiation or reception of signals; transmission lines guide signals without radiation.
c) Antennas and transmission lines both radiate energies equally.
d) Transmission lines are omnidirectional, while antennas are bidirectional.

2) The radiation principle of an antenna is based on _____.
a) Faraday's Law b) Coulomb's Law
c) Maxwell's Equations s) Ohm's Law

3) If the distance between two isotropic point sources is increased, the radiation pattern _____.
a) Becomes narrower with more lobes
b) Remains the same
c) Becomes broader with fewer lobes
d) Changes to an omnidirectional pattern

4) The directivity of an array increases when _____.
a) The number of elements decreases
b) The spacing between elements increases
c) The beam width becomes broader
d) The radiation resistance decreases

5) Radiation resistance of a small dipole is typically _____.
a) Higher than a half-wave dipole
b) Lower than a half-wave dipole
c) Equal to the input impedance of the dipole
d) Infinite at resonance

6) Wideband characteristics of helical antennas are due to _____.
a) Their circular polarization
b) The flexibility in the number of turns and spacing
c) High gain and narrow beamwidth
d) Use of low-frequency operation

7) A slot antenna is typically fed at _____.
a) The centre of the slot
b) The edges of the slot
c) A point that maximizes impedance
d) A null point of the radiation pattern.

8) Horn antennas are commonly used for _____.
a) Low-frequency applications
b) Wideband applications and as feeds for reflectors
c) Ground wave communication
d) Underwater communication

9) A common feed method for a paraboloidal reflector is _____.
a) Dipole feed
b) Horn feed at the focal point
c) Slot antenna feed
d) Circular waveguide feed

10) A key principle behind frequency-independent antennas is _____.
a) Babinet's principle
b) Constant impedance
c) Self-similarity or scaling of geometry
d) Reflection and transmission theory

11) A key feature of smart antennas is _____.
a) Fixed radiation patterns
b) Directional beam steering based on signal processing
c) No dependence on operating frequency
d) Narrowband operation only

12) The ionosphere is divided into layers based on _____.
a) Altitude and temperature
b) Atmospheric density
c) Electron density and refractive properties
d) Magnetic field intensity

13) Duct propagation is most commonly observed in _____.
   a) High altitudes
   b) Marine environments and temperature inversion layers
   c) Dry desert regions
   d) Dense urban environments.

14) Fading in sky wave propagation occurs due to _____.
   a) Absorption in the troposphere
   b) Interference between multiple reflected signals
   c) Excessive diffraction
   d) Impedance mismatch at the antenna

Antenna & Wave Propagation (BTN06601)

Day & Date: Tuesday 27-05-2025 Max. Marks: 56
Time: 10:00 AM To 01:00 PM

Instructions: 1) All questions are compulsory.
2) Figures to the right indicate full marks.
3) Make suitable assumptions if necessary and state them clearly.

Section – I

Q.2 Attempt any FOUR questions. **16**

a) What is Antenna aperture. Explain different types of antenna aperture.
b) Discuss principle of pattern multiplication. What is the advantage of pattern multiplication?
c) What is necessity of array. State properties of broadside and end fire array.
d) Write difference between antenna and complementary slot(dipole) antenna.
e) Define pitch angle of helical antenna; explain the effect of pitch angle on helical antenna.

Q.3 Attempt any TWO questions. **12**

a) Explain different antenna field zones & their boundaries with neat sketches.
b) Find out Electric field of two isotropic point sources of same amplitude and same phase.
c) Explain different modes of operation of helical antenna.

Section – II

Q.4 Attempt any FOUR questions. **16**

a) Draw different shapes of microstrip antenna, state advantages disadvantages and applications of it.
b) What is reflector antenna? With necessary diagrams, explain parabolic reflector antenna.
c) Write a short note on the frequency-independent antenna.
d) Write a short note on ground wave propagation.
e) Describe the structure of the atmosphere and specify the factors affecting the radio wave propagation.

Q.5 Attempt any TWO questions. **12**

a) Obtain the design equation of horn antenna, discuss on different types of feed used with neat diagram.

b) With a suitable diagram explain the construction and working of log periodic antenna state advantages of it.

c) Define & explain- Virtual Height, Critical Frequency, Maximum Usable Frequency, Skip Distance.

   b) The flexibility in the number of turns and spacing
   c) High gain and narrow beamwidth
   d) Use of low-frequency operation

11) A slot antenna is typically fed at _____.
   a) The centre of the slot
   b) The edges of the slot
   c) A point that maximizes impedance
   d) A null point of the radiation pattern.

12) Horn antennas are commonly used for _____.
a) Low-frequency applications
b) Wideband applications and as feeds for reflectors
c) Ground wave communication
d) Underwater communication

13) A common feed method for a paraboloidal reflector is _____.
a) Dipole feed
b) Horn feed at the focal point
c) Slot antenna feed
d) Circular waveguide feed

14) A key principle behind frequency-independent antennas is _____.
a) Babinet's principle
b) Constant impedance
c) Self-similarity or scaling of geometry
d) Reflection and transmission theory

T.Y (B. Tech) (Sem-II) (New) (CBCS) Examination: March/April-2025
ELECTRONICS & TELECOMMUNICATION ENGINEERING
Antenna & Wave Propagation (BTN06601)

Day & Date: Tuesday 27-05-2025 Max. Marks: 56
Time: 10:00 AM To 01:00 PM

Instructions: 1) All questions are compulsory.
2) Figures to the right indicate full marks.
3) Make suitable assumptions if necessary and state them clearly.

Section – I

Q.2 Attempt any FOUR questions. **16**

a) What is Antenna aperture. Explain different types of antenna aperture.
b) Discuss principle of pattern multiplication. What is the advantage of pattern multiplication?
c) What is necessity of array. State properties of broadside and end fire array.
d) Write difference between antenna and complementary slot(dipole) antenna.
e) Define pitch angle of helical antenna; explain the effect of pitch angle on helical antenna.

Q.3 Attempt any TWO questions. **12**

a) Explain different antenna field zones & their boundaries with neat sketches.
b) Find out Electric field of two isotropic point sources of same amplitude and same phase.
c) Explain different modes of operation of helical antenna.

Section – II

Q.4 Attempt any FOUR questions. **16**

a) Draw different shapes of microstrip antenna, state advantages disadvantages and applications of it.
b) What is reflector antenna? With necessary diagrams, explain parabolic reflector antenna.
c) Write a short note on the frequency-independent antenna.
d) Write a short note on ground wave propagation.
e) Describe the structure of the atmosphere and specify the factors affecting the radio wave propagation.

Q.5 Attempt any TWO questions. **12**

a) Obtain the design equation of horn antenna, discuss on different types of feed used with neat diagram.

b) With a suitable diagram explain the construction and working of log periodic antenna state advantages of it.

c) Define & explain- Virtual Height, Critical Frequency, Maximum Usable Frequency, Skip Distance.

2) Don't forget to Mention question paper set (P/Q/R/S) on top of page.
3) Figures to the right indicates full marks.
4) Make suitable assumptions if necessary and state them clearly.

MCQ/Objective Type Questions

Duration: 30 Minutes Marks:14

Q.1 Choose the correct option from the following. 14

1) Wideband characteristics of helical antennas are due to _____.
a) Their circular polarization
b) The flexibility in the number of turns and spacing
c) High gain and narrow beamwidth
d) Use of low-frequency operation

2) A slot antenna is typically fed at _____.
a) The centre of the slot
b) The edges of the slot
c) A point that maximizes impedance
d) A null point of the radiation pattern.

3) Horn antennas are commonly used for _____.
a) Low-frequency applications
b) Wideband applications and as feeds for reflectors
c) Ground wave communication
d) Underwater communication

4) A common feed method for a paraboloidal reflector is _____.
a) Dipole feed
b) Horn feed at the focal point
c) Slot antenna feed
d) Circular waveguide feed

5) A key principle behind frequency-independent antennas is _____.
a) Babinet's principle
b) Constant impedance
c) Self-similarity or scaling of geometry
d) Reflection and transmission theory

6) A key feature of smart antennas is _____.
   a) Fixed radiation patterns
   b) Directional beam steering based on signal processing
   c) No dependence on operating frequency
   d) Narrowband operation only

7) The ionosphere is divided into layers based on _____.
   a) Altitude and temperature
   b) Atmospheric density
   c) Electron density and refractive properties
   d) Magnetic field intensity

8) Duct propagation is most commonly observed in _____.
   a) High altitudes
   b) Marine environments and temperature inversion layers
   c) Dry desert regions
   d) Dense urban environments.

9) Fading in sky wave propagation occurs due to _____.
   a) Absorption in the troposphere
   b) Interference between multiple reflected signals
   c) Excessive diffraction
   d) Impedance mismatch at the antenna

10) Which of the following is true about the difference between an antenna and a transmission line?
   a) Antennas convert electromagnetic waves to electric currents; transmission lines convert electric signals to optical signals.
   b) Antennas are used for radiation or reception of signals; transmission lines guide signals without radiation.
   c) Antennas and transmission lines both radiate energies equally.
   d) Transmission lines are omnidirectional, while antennas are bidirectional.

11) The radiation principle of an antenna is based on _____.
   a) Faraday's Law b) Coulomb's Law
   c) Maxwell's Equations s) Ohm's Law

12) If the distance between two isotropic point sources is increased, the radiation pattern _____.
   a) Becomes narrower with more lobes
   b) Remains the same
   c) Becomes broader with fewer lobes
   d) Changes to an omnidirectional pattern

13) The directivity of an array increases when _____.
   a) The number of elements decreases
   b) The spacing between elements increases
   c) The beam width becomes broader
   d) The radiation resistance decreases

14) Radiation resistance of a small dipole is typically _____.
   a) Higher than a half-wave dipole
   b) Lower than a half-wave dipole
   c) Equal to the input impedance of the dipole
   d) Infinite at resonance

4) Assume suitable data if necessary.

MCQ/Objective Type Questions

Duration: 30 Minutes Marks:14

Q.1 Choose the correct alternatives from the given options. 14

1) NRE cost can be defined by ____.
a) The one-time monetary cost of designing the system
b) Life time cost of system
c) Depends upon embedded system
d) None of above

2) Real-time operating systems (RTOS) in an embedded system?
a) used in large-scale systems
b) are not important for system performance
c) provide deterministic scheduling of tasks
d) provide non-deterministic scheduling of tasks

3) Pulse-width modulation (PWM) in an embedded system?
a) is used for digital-to-analog conversion
b) is used for analog-to-digital conversion
c) is used for controlling the duty cycle of a signal
d) is used for synchronizing signals

4) Semaphore in real-time operating systems?
a) Synchronize access to shared resources
b) Manage memory allocation and deallocation
c) Control task priority levels
d) Handle inter-process communication

5) In ARM assembly language, which register is often used as the program counter?
a) R0 b) R7
c) R15 d) R31

6) r0= 0x00000000, r1 =0x00000005
ADD r0, r1, r1, LSL #1
a) r0 = 0x00000014, r1= 0x00000005
b) r0 = 0x0000000F, r1= 0x00000005
c) r0 = 0x00000010, r1= 0x00000005
d) None of above

7) Which architecture is used by the LPC2148 microcontroller?
a) x86 b) ARM
c) AVR d) PIC

8) What is the size of the on-chip Flash memory in the LPC2148?
a) 32KB b) 64KB
c) 16KB d) 512KB

9) Abort mode generally enters when?
a) undefined instructions are to be handled
b) ARM processor is on rest
c) low priority interrupt is raised
d) an attempt access memory fails

10) Which of the following stores all the task information that the system requires?
a) task access block b) Register
c) accumulator d) task control block

11) The real-time clock (RTC) in an embedded system?
a) It is a type of hardware that controls the operation of the microcontroller
b) It is a type of software that is used for debugging and testing
c) It is a type of hardware that provides a mechanism for keeping track of the time and date
d) It is a type of software that provides a user interface

12) The purpose of the PLL (Phase-Locked Loop) in the LPC2148 is?
a) To provide additional memory
b) To synchronize multiple devices
c) To generate a stable clock frequency
d) To manage power consumption

13) If External frequency = 12 MHz, CCLK=60MHz and PCLK=15MHz then PLLCFG and VPBDIV values are ____.
a) 0x23 and 0x 01 b) 0x23 and 0x 00
c) 0x24 and 0x 02 d) 0x24 and 0x 00

14) Concurrent and independent threads of execution that can compete for CPU execution time is called ____.
a) Semaphore b) Task
c) Threading d) None of the above

ELECTRONICS & TELECOMMUNICATION ENGINEERING
Embedded System (BTN06602)

Day & Date: Thursday, 29-05-2025 Max. Marks: 56
Time: 10:00 AM To 01:00 PM

Instructions: 1) All questions are compulsory.
2) Figures to the right indicate full marks.
3) Assume suitable data if necessary.

Q.2 Attempt the following: (Any Four) **16**

a) Define embedded system. Explain the components of embedded system Hardware.
b) Explain Time-to-Market design metrics in detail.
c) Explain important the features of LPC 2148.
d) Explain the pipelining concept of ARM 7TDMI in detail
e) Explain BUS architecture of ARM with suitable diagram.

Q.3 Attempt the following: (Any Two) **12**

a) With the suitable diagram explain ARM 7TDMI core architecture in detail.
b) Describe operation with examples of following ARM instructions.
1) MOV
2) RSB
3) STR
4) BLX
5) MRS
6) CMP
c) Explain the following on chip peripherals of ARM 2148 in detail. Interrupts, on-chip ADC, RTC

Q.4 Attempt the following: (Any Four) **16**

a) Define RTOS. Explain classification of RTOS.
b) Explain task states associated with RTOS.
c) What are the RTOS services in contrast with traditional OS?
d) Explain embedded system used in digital camera.
e) Explain with code Interfacing of ADC to LPC 2148 in detail.

Q.5 Attempt the following: (Any Two) **12**

a) Explain the following kernel objects in RTOS.
   1) Message Queue
   2) ISR
   3) Timers

b) Define task scheduling. Explain various task scheduling algorithms.

c) Interface switch and LED to any port pins of LPC2148.

d) Write an embedded c program to turn ON LED when switch is pressed.

- a) It is a type of hardware that controls the operation of the microcontroller
- b) It is a type of software that is used for debugging and testing
- c) It is a type of hardware that provides a mechanism for keeping track of the time and date
- d) It is a type of software that provides a user interface

7) The purpose of the PLL (Phase-Locked Loop) in the LPC2148 is?
- a) To provide additional memory
- b) To synchronize multiple devices
- c) To generate a stable clock frequency
- d) To manage power consumption

8) If External frequency = 12 MHz, CCLK=60MHz and PCLK=15MHz then PLLCFG and VPBDIV values are ____.
- a) 0x23 and 0x 01
- b) 0x23 and 0x 00
- c) 0x24 and 0x 02
- d) 0x24 and 0x 00

9) Concurrent and independent threads of execution that can compete for CPU execution time is called ____.
- a) Semaphore
- b) Task
- c) Threading
- d) None of the above

10) NRE cost can be defined by ____.
- a) The one-time monetary cost of designing the system
- b) Life time cost of system
- c) Depends upon embedded system
- d) None of above

11) Real-time operating systems (RTOS) in an embedded system?
- a) used in large-scale systems
- b) are not important for system performance
- c) provide deterministic scheduling of tasks
- d) provide non-deterministic scheduling of tasks

12) Pulse-width modulation (PWM) in an embedded system?
- a) is used for digital-to-analog conversion
- b) is used for analog-to-digital conversion
- c) is used for controlling the duty cycle of a signal
- d) is used for synchronizing signals

13) Semaphore in real-time operating systems?
- a) Synchronize access to shared resources
- b) Manage memory allocation and deallocation
- c) Control task priority levels
- d) Handle inter-process communication

14) In ARM assembly language, which register is often used as the program counter?

a) R0 b) R7

c) R15 d) R31

Set **S**

T. Y. (B. Tech) (Sem - II) (New) (CBCS) Examination: March/April-2025
ELECTRONICS & TELECOMMUNICATION ENGINEERING
Embedded System (BTN06602)

Day & Date: Thursday, 29-05-2025 Max. Marks: 56
Time: 10:00 AM To 01:00 PM

Instructions: 1) All questions are compulsory.
2) Figures to the right indicate full marks.
3) Assume suitable data if necessary.

Q.2 Attempt the following: (Any Four) **16**

a) Define embedded system. Explain the components of embedded system Hardware.
b) Explain Time-to-Market design metrics in detail.
c) Explain important the features of LPC 2148.
d) Explain the pipelining concept of ARM 7TDMI in detail
e) Explain BUS architecture of ARM with suitable diagram.

Q.3 Attempt the following: (Any Two) **12**

a) With the suitable diagram explain ARM 7TDMI core architecture in detail.
b) Describe operation with examples of following ARM instructions.
1) MOV
2) RSB
3) STR
4) BLX
5) MRS
6) CMP
c) Explain the following on chip peripherals of ARM 2148 in detail. Interrupts, on-chip ADC, RTC

Q.4 Attempt the following: (Any Four) **16**

a) Define RTOS. Explain classification of RTOS.
b) Explain task states associated with RTOS.
c) What are the RTOS services in contrast with traditional OS?
d) Explain embedded system used in digital camera.
e) Explain with code Interfacing of ADC to LPC 2148 in detail.

Q.5 Attempt the following: (Any Two) **12**

a) Explain the following kernel objects in RTOS.
   1) Message Queue
   2) ISR
   3) Timers

b) Define task scheduling. Explain various task scheduling algorithms.

c) Interface switch and LED to any port pins of LPC2148.

d) Write an embedded c program to turn ON LED when switch is pressed.

T. Y (B. Tech) (Sem-II) (New) (CBCS) Examination: March/April-2025
ELECTRONICS & TELECOMMUNICATION ENGINEERING
Electronic System Design (BTN06603)

Day & Date: Monday 02-06-2025 Max. Marks: 70
Time: 10:00 AM To 01:00 PM

Instructions: 1) Q. No. 1 is compulsory. It should be solved in the first 30 minutes in Answer Book Page no 03 (Starting page of the Answer Book). Each question carries one mark.
2) Don't forget to Mention question paper set (P/Q/R/S) on top of page.
3) Figures to the right indicates full marks.
4) Assume suitable data if required.
5) Use of calculator is allowed.

MCQ/Objective Type Questions

Duration: 30 Minutes Marks:14

Q.1 Attempt the following. **14**

1) What is the total anode current of SCR in the equivalent circuit from the two- transistor (T1 & T2) analogy of SCR?
a) The sum of both the base currents
b) The sum of both the collector current
c) The sum of base current of T2 & collector current of T1
d) The sum of base current of T1 & collector current of T2

2) A diac is _____.
i) a two electrode, bidirectional avalanche diode.
ii) a device which conducts below the breakover voltage.
iii) a unidirectional resistive device.
iv) designed to supply large gate current.
Choose the correct answer from the options given below:
a) i, ii and iii only b) i, iii and iv only
c) i and iv only d) i, ii only

3) The device whose symbol is seen to be Two SCR's Inverse parallel connected is _____.
a) Triac switch b) Silicon unilateral switch
c) Mid-point gate thyristor d) Silicon unidirectional diac

4) SCRs are widely used in AC power control because they can _____.
a) Handle high currents and voltages
b) Turn on and off quickly
c) Be controlled by a small gate current
d) All of the above

5) IC 1596 can be used as _____.
a) Amplitude Modulator
b) As a Double balanced Modulator
c) High Frequency Mixer
d) All of these

6) For PLL 565, R1=10K. What should be the value in order to have center frequency of VCO to be 1000Hz?
a) $0.3\ \mu f$ b) $0.0.3\ \mu f$
c) $3\ \mu f$ d) $10\ \mu f$

7) In case of converter, maximum DC voltage is obtained for firing angle _____.
a) $\alpha < 0^{\circ}$ b) $\alpha > 0^{\circ}$
c) $\alpha = 0^{\circ}$ d) None of these

8) The DC voltage obtained at the output of Bridge controlled rectifier for $\alpha = 0°$ is _____.
a) $2Vm/\pi$ b) Vm/π
c) $Vm/2\pi$ d) None of these

9) IC 74926 can be used in measurement of _____.
a) frequency b) time
c) event d) all of these

10) What is the maximum display count in 3 and half digit display?
a) 1000 b) 2000
c) 1999 d) 999

11) The sensitivity of LM 35 is _____.
a) $10\ mV/°C$ b) $50\ mV/°C$
c) $1\ m\ V/°C$ d) $100\ mV/°C$

12) V to V converter implements the equation _____.
a) $Y = mX + C$ b) $Y = mX$
c) $X = mY$ d) $X = mY + C$

13) Which of following characteristics are required for selection of instrumentation amplifier?
a) High input impedance b) High CMRR
c) Both a and b d) None

14) PLC uses which of following language for programming?
a) C language b) English
c) Relay-ladder logic d) None of these

T. Y (B. Tech) (Sem-II) (New) (CBCS) Examination: March/April-2025
ELECTRONICS & TELECOMMUNICATION ENGINEERING
Electronic System Design (BTN06603)

Day & Date: Monday 02-06-2025 Max. Marks: 56
Time: 10:00 AM To 01:00 PM

Instructions: 1) All questions are compulsory.
2) Figures to the right indicate full marks.
3) Assume suitable data if required.
4) Use of calculator is allowed.

Section – I

Q.2 Attempt any FOUR. **16**

a) Explain complementary commutation method of turning OFF of SCR.
b) Explain construction and working of TRIAC.
c) Explain AC power control using DIAC and TRIAC.
d) Draw circuit diagram and waveforms of single half wave controlled rectifier.
e) Explain FSK demodulator using PLL565.

Q.3 Attempt any TWO. **12**

a) Explain with the help of circuit diagram and waveforms single phase full wave controlled rectifier (Mid-point converter) with resistive load. Derive the expression for:
i) Average DC output voltage
ii) Average DC load current
iii) RMS load voltage

b) Explain construction of TRIAC and draw VI characteristics of it. Define the following terms associated with SCR.
i) Latching Current
ii) Holding current
iii) Forward breakover voltage

c) Design a frequency synthesizer to generate a frequency of 1KHz to 999.9KHz using PLL 565. Use BCD thumbwheel switches to set the frequency output.

Section – II

Q.4 Attempt any FOUR. **16**

a) Design a timer to generate 175sec delay using XR2240.
b) Draw block diagram of Event counting and explain its working.
c) Design V to I converter to convert 0-5V into 4-20mA.
d) Explain J and K type thermocouple.
e) Compare PLC and Relay logic.

Q.5 Attempt any TWO. **12**

a) Design a DVM for measurement of 2V input voltage. Explain its working.
b) Differentiate between V to V, I to V and V to I converters.
c) Draw and Explain PLC architecture.

MCQ/Objective Type Questions

Duration: 30 Minutes Marks:14

Q.1 Attempt the following. **14**

1) The DC voltage obtained at the output of Bridge controlled rectifier for $\alpha = 0°$ is _____.
a) $2\mathrm{Vm}/\pi$ b) Vm/π
c) $\mathrm{Vm}/2\pi$ d) None of these

2) IC 74926 can be used in measurement of _____.
a) frequency b) time
c) event d) all of these

3) What is the maximum display count in 3 and half digit display?
a) 1000 b) 2000
c) 1999 d) 999

4) The sensitivity of LM 35 is _____.
a) $10\ \mathrm{mV}/°\mathrm{C}$ b) $50\ \mathrm{mV}/°\mathrm{C}$
c) $1\ \mathrm{m\ V}/°\mathrm{C}$ d) $100\ \mathrm{mV}/°\mathrm{C}$

5) V to V converter implements the equation _____.
a) $\mathrm{Y} = \mathrm{mX} + \mathrm{C}$ b) $\mathrm{Y} = \mathrm{mX}$
c) $\mathrm{X} = \mathrm{mY}$ d) $\mathrm{X} = \mathrm{mY} + \mathrm{C}$

6) Which of following characteristics are required for selection of instrumentation amplifier?
a) High input impedance b) High CMRR
c) Both a and b d) None

7) PLC uses which of following language for programming?
a) C language b) English
c) Relay-ladder logic d) None of these

8) What is the total anode current of SCR in the equivalent circuit from the two- transistor (T1 & T2) analogy of SCR?
a) The sum of both the base currents
b) The sum of both the collector current
c) The sum of base current of T2 & collector current of T1
d) The sum of base current of T1 & collector current of T2

9) A diac is _____.
i) a two electrode, bidirectional avalanche diode.
ii) a device which conducts below the breakover voltage.
iii) a unidirectional resistive device.
iv) designed to supply large gate current.
Choose the correct answer from the options given below:
a) i, ii and iii only
b) i, iii and iv only
c) i and iv only
d) i, ii only

10) The device whose symbol is seen to be Two SCR's Inverse parallel connected is _____.
a) Triac switch
b) Silicon unilateral switch
c) Mid-point gate thyristor
d) Silicon unidirectional diac

11) SCRs are widely used in AC power control because they can _____.
a) Handle high currents and voltages
b) Turn on and off quickly
c) Be controlled by a small gate current
d) All of the above

12) IC 1596 can be used as _____.
a) Amplitude Modulator
b) As a Double balanced Modulator
c) High Frequency Mixer
d) All of these

13) For PLL 565, R1=10K. What should be the value in order to have center frequency of VCO to be 1000Hz?
a) $0.3\ \mu f$
b) $0.0.3\ \mu f$
c) $3\ \mu f$
d) $10\ \mu f$

Duration: 30 Minutes Marks:14

Q.1 Choose the correct answer **14**

1) The maximum angle to the axis at which light may enter the fiber in order to be propagated is referred to as _____
a) Acceptance angle b) Incident angle
c) Critical Angle d) Numerical aperture

2) When the angle of incidence is _____ the critical angle, the light beam bends along the interface.
a) More than b) Less than
c) Equal to d) None of the above

3) Absorption losses due to atomic defects mainly include _____
a) Radiation
b) Missing molecules, oxygen defects in glass
c) Impurities in fiber material
d) Interaction with other components of core

4) The scattering resulting from fiber imperfections like core-cladding RI differences, diameter fluctuations, strains, and bubbles is?
a) Rayleigh scattering b) Mie scattering
c) Stimulated Brillouin scattering d) Stimulated Raman scattering

5) Attenuation in Number of decibels (dB) _____
a) 10 log10 Pi * Po b) 10 log10 Po / Pi
c) 10 log10 Pi / Po d) none

6) A common technique involved in the introduction of the stripe geometry to the structure to provide optical confinement in _____ plane.

a) Horizontal b) Vertical
c) Both a & b d) All Directions

7) Which among the following characteristics of Laser light specifies the precise movement of all individual light waves together through time and space?

a) Monochromatic b) Directional
c) Coherent d) Brightness

8) Determine incident optical power on a photo diode if it has photo current of 2.1 μA and Responsivity of 0.55 A/W

a) 4.15 b) 1.75
c) 3.81 d) 8.47

9) _____ Server has a source & destination of information being transmitted or received Optical network.

a) Station b) Trunk
c) Node d) Topology

10) The basic performance criteria or a WDM Technique are _____

a) Insertion loss b) Channel width
c) both a & b d) None of these

11) In OTDM a _____ data stream is constructed directly by time multiplexing.

a) low bit rate b) high bit rate
c) Medium d) None

12) FDDI Network consists of _____ ring topology.

a) Single b) Dual
c) Three d) Four

13) What are the applications of Optical Amplifiers?

a) Inline Amplifier b) Preamplifier
c) Power amplifier d) All of the above

14) SONET/SDH uses which technology _____

a) Ring b) Mesh
c) BUS d) Star

Seat No.		Set	P

T.Y. (B.Tech.) (Sem - II) (New) (CBCS) Examination: March/April-2025
ELECTRONICS & TELECOMMUNICATION ENGINEERING
Optical Fiber Communication (BTN06609)

Day & Date: Wednesday 04-June-2025 Max. Marks: 56
Time: 10:00 AM To 01:00 PM

Instructions: 1) All question are compulsory.
2) Figure to the right indicate full marks.

Section – I

Q.2 Solve any four **16**

a) Explain the block diagram of Optical fiber communication system. List its advantages & disadvantages.

b) Explain bend losses in OFC.

c) Explain fiber splices.

d) Explain the structure Surface emitting LED.

e) When the mean optical power launched into an 8 km length of fiber is 120 μW the mean optical power at the fiber output is 3 μW
Determine:
i) Overall signal attenuation or loss in decibel through the fiber assuming there are no connectors or splices
ii) The signal attenuation per kilometer for the fiber
iii) The overall signal attenuation for a 10 km optical link using the same fiber with splices at 1 km interval each giving an attenuation of 1 dB
iv) The numerical input/output power ratio in (c)

Q.3 Solve any two **12**

a) Derive relation between Numerical aperture & Refractive index difference

b) What is Dispersion? Compare the dispersion observed in different type of Optical fiber cables.

c) Explain the structure of the semiconductor injection LASER. Explain its characteristics.

Section – II

Q.4 Solve any four **16**

a) Explain following terms:
   i) Quantum efficiency
   ii) Responsivity

b) When 3×10^{11} photons each with a wavelength 0.85 μm. are incident on a photo diode, on average 1.2×10^{11} electrons are collected at the terminals of the device. Determine the quantum efficiency and the responsivity of the photo diode at 0.85 μm.

c) Explain SONET/ SDH Networks.

d) Explain Transmitter design in fiber optical communication system.

e) Explain Link design in fiber optical communication system.

Q.5 Solve any two **12**

a) Explain working of Avalanche photo diode with its benefits and drawbacks.

b) Write a note on FDDI.

c) Explain concept of optical time division multiplexing (OTDM).

MCQ/Objective Type Questions

Duration: 30 Minutes Marks:14

Q.1 Choose the correct answer **14**

1) Power law transformation is useful in _____
a) purification b) industry
c) radar d) MRI

2) Intensity levels in 8bit image are _____
a) 128 b) 255
c) 256 d) 512

3) The principal factor to determine the spatial resolution of an image is ___
a) Quantization b) Sampling
c) Contrast d) Dynamic range

4) What is Histogram Equalisation also called as?
a) Histogram Matching b) Image Enhancement
c) Histogram linearization d) None of the Mentioned

5) In uniform PDF, the expansion of PDF is _____
a) Portable Document Format b) Post Derivation Function
c) Previously Derived Function d) Probability Density Function

6) Subdivision of the image depends upon the _____
a) problem b) objects
c) image d) partition

7) Image processing involves how many steps?
a) 7 b) 8
c) 13 d) 10

8) The approach to restoration is _____

a) inverse filtering b) spike filtering
c) black filtering d) ranking

9) In Wiener filtering it is assumed that noise and image are _____

a) different b) homogenous
c) correlated d) uncorrelated

10) Which is the first basic equipment in a TV?

a) Camera b) Bandwidth
c) Pixel d) Resolution

11) What are the types of motion model?

a) Spatial motion model b) Temporal motion model
c) Observable motion model d) All of above

12) Contra harmonic mean filter produces ____

a) degraded image b) original image
c) restored image d) plane

13) Which gray-level transformation increases the dynamic range of gray-level in the image?

a) Negative transformations b) Contrast stretching
c) Power-law transformations d) None of the mentioned

14) How many lines of resolution can be achieved under practical conditions in Vidicon camera tube?

a) 150 b) 750
c) 250 d) 350

T.Y. (B.Tech.) (Sem - II) (New) (CBCS) Examination: March/April-2025
ELECTRONICS & TELECOMMUNICATION ENGINEERING
Image and Video Processing (BTN06610)

Day & Date: Wednesday, 04-June -2025 Max. Marks: 70
Time: 10:00 AM To 01:00 PM

Instructions: 1) Q. No. 1 is compulsory. It should be solved in the first 30 minutes in Answer Book Page no 03 (Starting page of the Answer Book). Each question carries one mark.
2) Don't forget to Mention question paper set (P/Q/R/S) on top of page.
3) Figures to the right indicates full marks.
4) Assume suitable data whenever needed and mention it clearly.

MCQ/Objective Type Questions

Duration: 30 Minutes Marks:14

Q.1 Choose the correct answer **14**

1) What are the types of motion model?
a) Spatial motion model b) Temporal motion model
c) Observable motion model d) All of above

2) Contra harmonic mean filter produces ____
a) degraded image b) original image
c) restored image d) plane

3) Which gray-level transformation increases the dynamic range of gray-level in the image?
a) Negative transformations b) Contrast stretching
c) Power-law transformations d) None of the mentioned

4) How many lines of resolution can be achieved under practical conditions in Vidicon camera tube?
a) 150 b) 750
c) 250 d) 350

5) Power law transformation is useful in _____
a) purification b) industry
c) radar d) MRI

6) Intensity levels in 8bit image are _____
a) 128 b) 255
c) 256 d) 512

7) The principal factor to determine the spatial resolution of an image is ___
a) Quantization b) Sampling
c) Contrast d) Dynamic range

8) What is Histogram Equalisation also called as?

a) Histogram Matching b) Image Enhancement
c) Histogram linearization d) None of the Mentioned

9) In uniform PDF, the expansion of PDF is _____

a) Portable Document Format b) Post Derivation Function
c) Previously Derived Function d) Probability Density Function

10) Subdivision of the image depends upon the _____

a) problem b) objects
c) image d) partition

11) Image processing involves how many steps?

a) 7 b) 8
c) 13 d) 10

12) The approach to restoration is _____

a) inverse filtering b) spike filtering
c) black filtering d) ranking

13) In Wiener filtering it is assumed that noise and image are _____

a) different b) homogenous
c) correlated d) uncorrelated

14) Which is the first basic equipment in a TV?

a) Camera b) Bandwidth
c) Pixel d) Resolution

Time: 10:00 AM To 01:00 PM

Instructions: 1) All questions are compulsory.
2) Figure to the right indicate full marks.
3) Assume suitable data whenever needed and mention it clearly.

SECTION – I

Q.2 Attempt any four (Each carries 4 marks) **16**

a) Explain gray level slicing.
b) Define Dilation, erosion, opening, closing.
c) Explain in detail edge linking using Hough transform and graph theoretic approach.
d) Explain RGB and HSI model with neat diagram.
e) Difference Between Bar Graph and Histogram.

Q.3 attempt any two (Each carries 6 marks) **12**

a) Draw and explain in detail Gaussian and Butterworth filters for smoothening and sharpening.
b) Equalize the given histogram of an image

Gravy Levels	0	1	2	3	4	5	6	7
No. of Pixels	80	100	90	60	30	20	10	0

c) List types of Image acquisition processes and explain with example.

SECTION – II

Q.4 Attempt any four (Each carries 4 marks) **16**

a) What are I, P & B frames in digital video?
b) Explain Hierarchical blocks matching Algorithms.
c) Explain Image degradation Model.
d) What are implementation issues in Phase Correlation method?
e) Explain in detail optical flow equation.

Q.5 Attempt any two (Each carries 6 marks) **12**

a) Explain difference between 2-D motion Vs optical flow.
b) Explain in Detail restoration using Weiner filters and Inverse filters?
c) Explain progressive versus interlaced scans in detail.

MCQ/Objective Type Questions

Duration: 30 Minutes Marks:14

Q.1 Choose the correct Answer. **14**

1) Which of the following TV uses CCFL as back lighting?
a) LCD b) OLED
c) LED d) CRT

2) The value of Kell factor is _____
a) 0.3 b) 0.7
c) 0.5 d) 0.9

3) _____ is defined as the width to height ratio of a picture frame.
a) Aspect ratio b) Scanning
c) Flicker d) Skimming

4) Field frequency in India is _____
a) 60 Hz b) 50 Hz
c) 15625 Hz d) 625 Hz

5) In India, which monochrome TV system is used _____
a) 525-line system b) 625-line system
c) 819-line system d) None of these

6) The signals sent by the TV transmitter to ensure correct scanning in the receiver are called _____
a) sync b) Chroma
c) luminance d) video

7) Compact disc surface doesn't wear out because the sensor is _____
a) Electric b) Magnetic
c) Mechanical d) Optical

8) Which broadcast centre broadcast televised programs through satellite to different subscribers in the country in direct to home television?

a) Audio encoder
b) Digital TV
c) DBS
d) DTT

9) What does MP3 stand for?

a) MPEG audio layer 3
b) MKV video layer 3
c) MPEG video layer 3
d) JPEG audio layer 3

10) Which surface of a CD is covered with microscopic bumps called 'pits' and 'lands' in optical recording of disc?

a) Lower
b) Upper
c) Front
d) Back

11) Quantization is a _____ process.

a) Few to few mapping
b) Few to many mapping
c) Many to few mapping
d) Many to many mapping

12) Which of the following cannot be detected and therefore it is difficult to separate the original signal from distorted signal in audio signal?

a) Bandwidth
b) Distortion
c) Amplitude
d) Wavelength

13) Quantization is a process of mapping a _____ range of amplitude of a signal into a finite set of _____ amplitudes.

a) Continuous, discrete
b) Discrete, continuous
c) Discrete, discrete
d) Continuous, continuous

14) Which of the following is termed as reducing image data?

a) Luminance
b) Compression
c) Hue
d) Saturation

MCQ/Objective Type Questions

Duration: 30 Minutes Marks:14

Q.1 Choose the correct Answer. **14**

1) Change in output of sensor with change in input is _____.
a) Slew rate b) Sensitivity
c) Power d) Error

2) Smallest change which a sensor can detect is _____.
a) Resolution b) Accuracy
c) Precision d) None of these

3) _____ is the generation of electric charge by a crystalline material upon subjecting it to stress.
a) Hall Effect b) Rectification
c) Heat Transfer Law d) Piezoelectric Effect

4) Microphone is a example of _____.
a) Rectifier b) Regulator
c) Sensor d) None of these

5) The change in any linear dimension (length, width, or height) is called as _____.
a) Liner Expansion b) Non-Linear Expansion
c) Angular Expansion d) None of the mentioned

6) _____ is unit of Magnetic Flux Density.
a) Volts b) Ampere
c) Ohm d) Tesla

7) _____ Converts the physical quantity to be measured into a continuously changing voltage or current _____.
a) Digital Sensor b) Analog Sensor
c) Actuator d) None of these

8) Arduino uses _____ as a basic programming language.
a) C/C++ b) Python
c) Java d) None of these

9) Arduino Uno consists of _____ of flash program memory?
a) 16 Kbyte b) 32 Kbyte
c) 64 Kbyte d) 512 Kbyte

10) Arduino UNO uses _____ microcontroller.
a) 8051 b) PIC16F877
c) Atmega 328 d) Atmega 2560

11) Adruino Uno consists of _____ Analog Inputs.
a) 04 b) 06
c) 08 d) 10

12) Raspberry Pi-3 supports inbuild _____.
a) HDMI connector b) USB Connectors
c) Micro SD Slot d) All of the mentioned

13) Raspberry Pi consists of _____ inbuilt component.
a) Hard Disk b) OLED
c) Wi-Fi d) None of these

14) How many USB ports are present in Raspberry Pi 3?
a) 01 b) 02
c) 04 d) 08

Set | P

T. Y. (B. Tech) (Sem-II) (New) (CBCS) Examination: March/April-2025
ELECTRONICS & TELECOMMUNICATION ENGINEERING
Sensors and Applications (BTN06605)

Day & Date: Friday, 06-June-2025 Max. Marks: 56
Time: 10:00 AM To 01:00 PM

Instructions: 1) All questions are compulsory.
2) Figures to the right indicate full marks.
3) Make suitable assumptions (if necessary and state them clearly).

Section – I

Q.2 Answer any four. **16**

a) Compare Sensors with Transducers.
b) Define following terms-i) Drift ii) Resolution iii) Error iv) Accuracy.
c) Explain temperature and thermal properties of a material with thermal expansion, temperature scales with conversion units and change in resistance.
d) Explain Hall effect with neat diagram. State applications of Hall effect.
e) Describe working of ADC with neat block diagram.

Q.3 Answer any two. **12**

a) Describe Current generators, Voltage references and Oscillators as excitation circuits.
b) State various characteristics of sensors. Explain Reputability and Resolution in detail.
c) Describe various dynamic models of Sensor Elements with differential equations.

Section – II

Q.4 Answer any four. **16**

a) Draw neat labeled pin diagram of Arduino Uno board. State and explain various features associated with Arduino UNO board.
b) Draw block diagram of Raspberry Pi board with peripherals. Explain each peripheral with specifications.
c) Write a code to interface Ultrasonic sensor with Arduino. Draw necessary connection diagram.
d) Write a code to control brightness of an LED using Raspberry Pi. Draw appropriate interfacing diagram with input output pins.
e) Design a circuit and write a program to detect a human being with buzzer indicator by using Arduino/Raspberry Pi.

Q.5 Answer any two. **12**

a) Write a program and draw connection diagram to interface Smoke & Gas detector sensor with Arduino/Raspberry Pi board. State various features of Raspberry Pi.

b) Design circuit and write a program to detect moisture in the soil. Interface soil moisture sensor with Arduino/Raspberry Pi. Compare Arduino w.r.t. Raspberry Pi.

c) Detect an obstacle present in front of a person using interfacing of ultrasonic sensor with Arduino Uno. Compare sensors w.r.t. actuators.

Set **Q**

T. Y. (B. Tech) (Sem-II) (New) (CBCS) Examination: March/April-2025
ELECTRONICS & TELECOMMUNICATION ENGINEERING
Sensors and Applications (BTN06605)

Day & Date: Friday, 06-June-2025 Max. Marks: 70
Time: 10:00 AM To 01:00 PM

Instructions: 1) Q. No. 1 is compulsory. It should be solved in the first 30 minutes in Answer Book Page no 03 (Starting page of the Answer Book). Each question carries one mark.
2) Don't forget to Mention question paper set (P/Q/R/S) on top of page.
3) Figures to the right indicates full marks.

MCQ/Objective Type Questions

Duration: 30 Minutes Marks:14

Q.1 Choose the correct Answer. **14**

1) Arduino uses _____ as a basic programming language.
a) C/C++ b) Python
c) Java d) None of these

2) Arduino Uno consists of _____ of flash program memory?
a) 16 Kbyte b) 32 Kbyte
c) 64 Kbyte d) 512 Kbyte

3) Arduino UNO uses _____ microcontroller.
a) 8051 b) PIC16F877
c) Atmega 328 d) Atmega 2560

4) Adruino Uno consists of _____ Analog Inputs.
a) 04 b) 06
c) 08 d) 10

5) Raspberry Pi-3 supports inbuild _____.
a) HDMI connector b) USB Connectors
c) Micro SD Slot d) All of the mentioned

6) Raspberry Pi consists of _____ inbuilt component.
a) Hard Disk b) OLED
c) Wi-Fi d) None of these

7) How many USB ports are present in Raspberry Pi 3?
a) 01 b) 02
c) 04 d) 08

8) Change in output of sensor with change in input is _____.
a) Slew rate b) Sensitivity
c) Power d) Error

9) Smallest change which a sensor can detect is _____.

a) Resolution b) Accuracy
c) Precision d) None of these

10) _____ is the generation of electric charge by a crystalline material upon subjecting it to stress.

a) Hall Effect b) Rectification
c) Heat Transfer Law d) Piezoelectric Effect

11) Microphone is a example of _____.

a) Rectifier b) Regulator
c) Sensor d) None of these

12) The change in any linear dimension (length, width, or height) is called as _____.

a) Liner Expansion b) Non-Linear Expansion
c) Angular Expansion d) None of the mentioned

13) _____ is unit of Magnetic Flux Density.

a) Volts b) Ampere
c) Ohm d) Tesla

14) _____ Converts the physical quantity to be measured into a continuously changing voltage or current _____.

a) Digital Sensor b) Analog Sensor
c) Actuator d) None of these

MCQ/Objective Type Questions

Duration: 30 Minutes Marks:14

Q.1 Choose the correct Answer. **14**

1) Which open source software license is known for its permissive nature and allows for more flexibility in using and distributing the software?
a) BSD License
b) GNU Lesser General Public License (LGPL)
c) Eclipse Public License
d) Mozilla Public License

2) Which task is primarily associated with system administrators in managing jobs in an open source operating system?
a) Installing new software
b) Managing user accounts
c) Monitoring system performance
d) Scheduling and controlling the execution of processes

3) Which movement advocates for the use and distribution of free software?
a) Open Source Movement
b) Commercial Software Movement
c) Free Software Movement
d) Closed Source Movement

4) Which command-line tool is used for stream editing and manipulation of text in Linux?
a) grep b) awk
c) sed d) cut

5) Which open source tool is commonly used for managing certificates in an open source operating system?
a) OpenSSL b) Apache HTTP Server
c) GNU Privacy Guard (GPG) d) DNS server

6) Which of the following is a common method for installing multiple operating systems on a single computer?

a) Multitasking
b) Multithreading
c) Multiboot
d) Multiprocessing

7) In the context of an open source operating system, what is the purpose of user, group, and permission management?

a) To install new software packages
b) To manage system resources efficiently
c) To allocate network bandwidth
d) To control access and privileges for users and groups

8) Which component of an open source operating system is responsible for the boot process?

a) Bootloader
b) Kernel
c) File system
d) Shell

9) What is the main function of a DHCP server in a network environment?

a) Assigning IP addresses to network devices
b) Transferring files between clients and servers
c) Hosting websites and serving web pages
d) Managing email communication

10) How can a web page be downloaded as a formatted text file using a shell script?

a) Using the wget command
b) Using the curl command
c) Using the scp command
d) Using the ftp command

11) What is the main difference between distributed and non-distributed VCS?

a) Distributed VCS allows offline access to repositories
b) Non-distributed VCS supports larger file sizes
c) Distributed VCS is faster in handling large codebases
d) Non-distributed VCS provides stronger data encryption

12) What is the purpose of the staging area in Git?

a) To store backup copies of files
b) To manage user permissions and access control
c) To prepare changes for commit
d) To synchronize local and remote repositories

13) What does the stash command do in Git?

a) Saves changes temporarily without committing them
b) Deletes untracked files from the repository
c) Reverts the repository to a previous commit
d) Merges changes from one branch to another

14) What command is used to add files to the staging area in Git?

a) git init
b) git clone
c) git status
d) git add

Time: 10:00 AM To 01:00 PM

Instructions: 1) All questions are compulsory.
2) Figures to the right indicate full marks.

Section – I

Q.2 Answer any four. **16**

a) Discuss the differences between open source, source available, and proprietary software.
b) Discuss the key features and usage of the Apache License, BSD license, GNU General Public License, GNU Lesser
c) What are some common commands for file manipulation in Linux, including piping and redirection, and how do they work?
d) What is software management in Linux? How can software packages be installed, updated, and removed in Linux?
e) What is Open SSL? How can Open SSL be used to manage certificates and cryptographic services in Linux?

Q.3 Answer any two: **12**

a) How can user, group, and permission settings be managed in Linux? Discuss key commands and tools for creating, modifying, and deleting user accounts, groups, and file permissions.
b) Explain the importance of community involvement and collaboration in the development and maintenance of open source software projects.
c) What is a DHCP server? How can DHCP servers be configured in Linux? Explain how DHCP can be used to automate IP address assignment and configuration for network devices.

Section – II

Q.4 Answer any four. **16**

a) What is sed? How can sed be used to manipulate text files in Bash shell scripts? Discuss key sed commands and their uses.

b) What are the steps involved in obtaining and installing Git on your system? Are there any specific requirements or considerations?

c) Explain the process of committing files in Git. What does the "git commit" command do, and why is it important in version control?

d) How can you list and view existing branches in a Git repository? What is the command used to accomplish this?

e) What are the different ways to remove files in Git? How does "git reset" remove staged files, and how does "git rm" remove committed files?

Q.5 Answer any two. **12**

a) How can variables be used in Bash shell scripts? Discuss different types of variables, including environment variables and command-line arguments.

b) How can functions be created and used in Bash shell scripts? Discuss different types of functions, including library functions and user-defined functions.

c) Can you explain what a branch is in Git and why it is important for version control? How does branching help in managing code development?

T. Y. (B. Tech.) (Sem-II) (New) (CBCS) Examination: March/April-2025
ELECTRONICS & TELECOMMUNICATION ENGINEERING
Open Source Technologies (BTN06606)

Day & Date: Friday, 06-June-2025 Max. Marks: 70
Time: 10:00 AM To 01:00 PM

Instructions: 1) Q. No. 1 is compulsory. It should be solved in the first 30 minutes in Answer Book Page no 03 (Starting page of the Answer Book). Each question carries one mark.
2) Don't forget to Mention question paper set (P/Q/R/S) on top of page.
3) Figures to the right indicate full marks.

MCQ/Objective Type Questions

Duration: 30 Minutes Marks:14

Q.1 Choose the correct Answer. **14**

1) What is the main difference between distributed and non-distributed VCS?
a) Distributed VCS allows offline access to repositories
b) Non-distributed VCS supports larger file sizes
c) Distributed VCS is faster in handling large codebases
d) Non-distributed VCS provides stronger data encryption

2) What is the purpose of the staging area in Git?
a) To store backup copies of files
b) To manage user permissions and access control
c) To prepare changes for commit
d) To synchronize local and remote repositories

3) What does the stash command do in Git?
a) Saves changes temporarily without committing them
b) Deletes untracked files from the repository
c) Reverts the repository to a previous commit
d) Merges changes from one branch to another

4) What command is used to add files to the staging area in Git?
a) git init b) git clone
c) git status d) git add

5) Which open source software license is known for its permissive nature and allows for more flexibility in using and distributing the software?
a) BSD License
b) GNU Lesser General Public License (LGPL)
c) Eclipse Public License
d) Mozilla Public License

6) Which task is primarily associated with system administrators in managing jobs in an open source operating system?
a) Installing new software
b) Managing user accounts
c) Monitoring system performance
d) Scheduling and controlling the execution of processes

7) Which movement advocates for the use and distribution of free software?
a) Open Source Movement
b) Commercial Software Movement
c) Free Software Movement
d) Closed Source Movement

8) Which command-line tool is used for stream editing and manipulation of text in Linux?
a) grep b) awk
c) sed d) cut

9) Which open source tool is commonly used for managing certificates in an open source operating system?
a) OpenSSL b) Apache HTTP Server
c) GNU Privacy Guard (GPG) d) DNS server

10) Which of the following is a common method for installing multiple operating systems on a single computer?
a) Multitasking b) Multithreading
c) Multiboot d) Multiprocessing

11) In the context of an open source operating system, what is the purpose of user, group, and permission management?
a) To install new software packages
b) To manage system resources efficiently
c) To allocate network bandwidth
d) To control access and privileges for users and groups

12) Which component of an open source operating system is responsible for the boot process?
a) Bootloader b) Kernel
c) File system d) Shell

13) What is the main function of a DHCP server in a network environment?
a) Assigning IP addresses to network devices
b) Transferring files between clients and servers
c) Hosting websites and serving web pages
d) Managing email communication

14) How can a web page be downloaded as a formatted text file using a shell script?

a) Using the wget command
b) Using the curl command
c) Using the scp command
d) Using the ftp command

Set **R**

T. Y. (B. Tech.) (Sem-II) (New) (CBCS) Examination: March/April-2025
ELECTRONICS & TELECOMMUNICATION ENGINEERING
Open Source Technologies (BTN06606)

Day & Date: Friday, 06-June-2025 Max. Marks: 56
Time: 10:00 AM To 01:00 PM

Instructions: 1) All questions are compulsory.
2) Figures to the right indicate full marks.

Section – I

Q.2 Answer any four. **16**

a) Discuss the differences between open source, source available, and proprietary software.
b) Discuss the key features and usage of the Apache License, BSD license, GNU General Public License, GNU Lesser
c) What are some common commands for file manipulation in Linux, including piping and redirection, and how do they work?
d) What is software management in Linux? How can software packages be installed, updated, and removed in Linux?
e) What is Open SSL? How can Open SSL be used to manage certificates and cryptographic services in Linux?

Q.3 Answer any two: **12**

a) How can user, group, and permission settings be managed in Linux? Discuss key commands and tools for creating, modifying, and deleting user accounts, groups, and file permissions.
b) Explain the importance of community involvement and collaboration in the development and maintenance of open source software projects.
c) What is a DHCP server? How can DHCP servers be configured in Linux? Explain how DHCP can be used to automate IP address assignment and configuration for network devices.

Section – II

Q.4 Answer any four. **16**

a) What is sed? How can sed be used to manipulate text files in Bash shell scripts? Discuss key sed commands and their uses.

b) What are the steps involved in obtaining and installing Git on your system? Are there any specific requirements or considerations?

c) Explain the process of committing files in Git. What does the "git commit" command do, and why is it important in version control?

d) How can you list and view existing branches in a Git repository? What is the command used to accomplish this?

e) What are the different ways to remove files in Git? How does "git reset" remove staged files, and how does "git rm" remove committed files?

Q.5 Answer any two. **12**

a) How can variables be used in Bash shell scripts? Discuss different types of variables, including environment variables and command-line arguments.

b) How can functions be created and used in Bash shell scripts? Discuss different types of functions, including library functions and user-defined functions.

c) Can you explain what a branch is in Git and why it is important for version control? How does branching help in managing code development?

Day & Date: Tuesday, 10-June-2025 Max. Marks: 70
Time: 10:00 AM To 01:00 PM

Instructions: 1) Q. No. 1 is compulsory. It should be solved in the first 30 minutes in Answer Book Page no 03 (Starting page of the Answer Book). Each question carries one mark.
2) Don't forget to Mention question paper set (P/Q/R/S) on top of Page.
3) Figures to the right indicate full marks.

MCQ/Objective Type Questions

Duration: 30 Minutes Marks:14

Q.1 Choose correct option. **14**

1) What is machine learning?
a) Selective acquisition of knowledge through the use of manual programs
b) Selective acquisition of knowledge through the use of computer programs
c) Autonomous acquisition of knowledge through the use of manual programs
d) Autonomous acquisition of knowledge through the use of computer programs

2) How can you handle missing or corrupted data in a dataset?
a) Drop missing rows or columns
b) Assign a unique category to missing values
c) Replace missing values with mean/median/mode
d) All of the above

3) Machine learning algorithms build a model based on sample data, known as _____.
a) Training Data b) Transfer Data
c) Data Training d) None of the above

4) _____ is the machine learning algorithms that can be used with labeled data.
a) Regression algorithms b) Clustering algorithms
c) Association algorithms d) All of the above

5) _____ is used as an input to the machine learning model for training and prediction purposes.
a) Feature b) Feature Vector
c) Both A and B d) None of the above

6) _____ is the scenario when the model fails to decipher the underlying trend in the input data

a) Overfitting b) underfitting
c) Both A and B d) None of the above

7) The term machine learning was coined by _____.

a) James Gosling b) Arthur Samuel
c) Guido van Rossum d) None of the above

8) Which of the following is not a supervised learning?

a) PCA b) Naive Bayesian
c) Linear Regression d) Decision Tree

9) Real-Time decisions, Game Al, Learning Tasks, Skill acquisition, and Robot Navigation are applications of _____.

a) Reinforcement Learning
b) Supervised Learning: Classification
c) Unsupervised Learning: Regression
d) None of the above

10) _____ is a disadvantage of decision trees?

a) Decision trees are robust to outliers
b) Decision trees are prone to be overfit
c) Both A and B
d) None of the above

11) _____ is a part of machine learning that works with neural networks.

a) Artificial intelligence b) Deep learning
c) Both A and B d) None of the above

12) Which machine learning models are trained to make a series of decisions based on the rewards and feedback they receive for their actions?

a) Supervised learning b) Unsupervised learning
c) Reinforcement learning d) All of the above

13) The most common issue when using ML is _____.

a) Lack of skilled resources b) Inadequate Infrastructure
c) Poor Data Quality d) None of these

14) _____ is a widely used and effective machine learning algorithm based on the idea of bagging.

a) Regression b) Classification
c) Decision Tree d) Random Forest

T. Y (B. Tech) (Sem-II) (New) (CBCS) Examination: March/April-2025
ELECTRONICS & TELECOMMUNICATION ENGINEERING
AI/MI -Machine Learning (BTN06612)

Day & Date: Tuesday, 10-June-2025 Max. Marks: 56
Time: 10:00 AM To 01:00 PM

Instructions: 1) All questions are compulsory.
2) Figures to the right indicate full marks.
3) Make suitable assumptions (if necessary and state them clearly).

Section – I

Q.2 Attempt any Four. **16**
- **a)** What is machine learning? Give examples of machine learning problems.
- **b)** Explain the Linear regression and Logistic regression in brief.
- **c)** Explain Reinforcement learning with examples.
- **d)** Explain Unsupervised learning with examples.
- **e)** Explain Predictive and Descriptive tasks.

Q.3 Attempt any Two. **12**
- **a)** Why Random Forest Model is an ensemble method? What is bagging in Random Forest Model?
- **b)** Distinguish between supervised learning and unsupervised earning.
- **c)** What are Support Vectors in SVMs? What is Margin? How is the classification made in SVM?

Section – II

Q.4 Attempt any Four. **16**
- **a)** Explain Feed-forward network function.
- **b)** Explain K-Nearest Neighbor classification with example.
- **c)** Explain deep neural networks and its applications in brief.
- **d)** Explain basic steps of Apriori algorithm for association rule learning.
- **e)** Explain Artificial Neural Networks in brief.

Q.5 Attempt any Two. **12**
- **a)** Explain Email Spam and Malware Filtering in brief.
- **b)** Distinguish between Machine learning and Deep learning.
- **c)** Explain image and Speech Recognition in brief.

ELECTRONICS & TELECOMMUNICATION ENGINEERING
IoT Cloud Platform (BTN06614)

Day & Date: Tuesday, 10-June-2025 Max. Marks: 70
Time: 10:00 AM To 01:00 PM

Instructions: 1) Q. No. 1 is compulsory. It should be solved in the first 30 minutes in Answer Book Page no 03 (Starting page of the Answer Book). Each question carries one mark.
2) Don't forget to Mention question paper set (P/Q/R/S) on top of Page.
3) Figures to the right indicate full marks.

MCQ/Objective Type Questions

Duration: 30 Minutes Marks:14

Q.1 Choose the correct options. **14**

1) Which AWS service provides disaster recovery capabilities?
a) Amazon EC2 b) Amazon S3
c) Amazon RDS d) Amazon Glacier

2) What is the main purpose of the AWS dashboard?
a) Managing user accounts
b) Monitoring AWS service usage
c) Configuring virtual machines
d) Developing applications

3) What is the first step to create a new AWS account?
a) Choose a billing plan
b) Provide payment information
c) Verify email address
d) Set up multi-factor authentication

4) In IAM, what is a group?
a) A collection of IAM policies
b) A group of users with similar access requirements
c) A role assigned to an IAM user
d) A policy that defines resource permissions

5) What is an IAM role in AWS?
a) A group of users with administrative privileges
b) A temporary session to assume different user identities
c) A policy that defines permissions for a specific resource
d) An identity with specific permissions that can be assumed by AWS services or users

6) Which of the following is NOT an IAM best practice in AWS?
a) Regularly reviewing and rotating access keys
b) Using AWS root user for everyday tasks
c) Granting least privilege to IAM users
d) Enforcing strong password policies

7) Which AWS service provides firewall security for your VPC?
a) Amazon EC2
b) Amazon S3
c) Amazon VPC Security Groups
d) Amazon Route 53

8) What is NAT in the context of AWS VPC?
a) Network Address Translation b) Network Access Token
c) Network Availability Test d) Network Attached Storage

9) What is the primary purpose of Elastic Block Store (EBS) in EC2?
a) Storing and retrieving data from S3
b) Managing containerized applications
c) Providing virtual network connectivity
d) Offering persistent block-level storage for EC2 instances

10) Which of the following, is NOT an EC2 instance type?
a) t3.micro b) m5.large
c) g2.2xlarge d) n2.nano

11) What are CloudWatch dashboards in AWS?
a) Customizable visualizations of CloudWatch metrics and alarms
b) Configurable firewall rules for inbound and outbound traffic
c) Instances with preconfigured monitoring settings
d) Predefined templates for launching EC2 instances

12) What are the two monitoring types available in Amazon CloudWatch?
a) Basic and advanced b) Real-time and historical
c) Manual and automated d) Basic and detailed

13) In Amazon S3, what are objects?
a) Containers for organizing multiple buckets
b) Virtual machines for running applications
c) Data entities stored in S3 buckets
d) Access control policies for S3 buckets

14) What is versioning in Amazon S3?
a) A feature for managing different versions of an object in a bucket
b) A way to categorize objects based on their content type
c) A process for automatically migrating data between S3 storage classes
d) A mechanism for distributing data across multiple S3 regions

Instructions: 1) All questions are compulsory.
2) Figures to the right indicate full marks.

Section – I

Q.2 Attempt any THREE. **12**

a) What is the AWS dashboard and how can it be used to manage AWS resources?
b) Discuss the core AWS services and their functionalities.
c) Explain the concept of AWS free tier and its benefits for users.
d) What is Identity and Access Management (IAM)?

Q.3 Attempt any TWO. **16**

a) What is AWS CLI? Describe the basic structure of AWS CLI commands and how they are used to interact with AWS resources.
b) What is VPC peering? How does it work and what are some use cases for VPC peering?
c) What is NAT in VPC? Explain how NAT gateways can be used to enable outbound internet traffic for resources within a private subnet.

Section – II

Q.4 Attempt any THREE. **12**

a) What is the Elastic Compute Cloud (EC2) and how does it work?
b) How is the pricing structure for EC2 instances determined?
c) Explain the lifecycle of an EC2 instance.
d) Explain the concept of auto-scaling and how it relates to EC2 instances.

Q.5 Attempt any TWO. **16**

a) What is Amazon Simple Storage Service (S3) and how does it function as an object storage service?
b) What are the different storage classes available in S3 and how do they differ in terms of durability, availability, and cost?
c) Explain the key components of AWS VPC, including subnets, IP addressing, and routing tables. Describe how these components create a custom network topology within VPC.

MCQ/Objective Type Questions

Duration: 30 Minutes Marks:14

Q.1 Choose correct option. 14

1) Clear perpendicular distance between inner faces of two rails is _____.
a) Gauge of track b) Inner gauge
c) Wheel base d) Wheel gauge

2) The highest speed of train in Indian Railway _____.
a) 140 kmph b) 120 kmph
c) 160 kmph d) 130 kmph

3) Rake carrying capacity of the BLC wagon is _____.
a) 40 wagons b) 45 wagons
c) 40 wagons d) 48 wagons

4) What do you mean by RDSO _____.
a) Research & Development Standard organization
b) Railway Development & Standard organization
c) Regional Development & Standard organization
d) None of above

5) Highest post in Railway _____.
a) General Manager b) Chief Engineer
c) Chairman Railway Board d) Divisional Railway Manager

6) What do you mean by LWR _____.
a) Long welded Rail b) Long weld able Rail
c) Linear welded rail d) None of above

7) What is the full form of PQRS used for Track renewal works?
a) Plasser quick Relaying system
b) Please quick return services
c) Poor Quality renewal system
d) None of above

8) with negative feedback in a closed loop control system, the system sensitivity to parameter variation _____.
a) Becomes infinite b) Becomes zero
c) Decreases d) Increases

9) In control system excessive bandwidth is not employed Because _____.
a) It leads to slower time response
b) Noise is proportional to bandwidth
c) Noise is proportional to the square of the bandwidth
d) It leads to low relative stability

10) Which of the following is the input of a controller?
a) Signal of fixed amplitude not dependent on desired variable value
b) Desired variable value
c) Sensed signal
d) Error signal

11) The reception signal is _____.
a) outer signal only
b) starter only
c) neither (outer signal) nor (starter)
d) both (outer signal) and (starter)

12) Shunting signals are known as _____.
a) Routing signals b) Starter signals
c) Ground signals d) Warner signals

13) In railways the signal that also acts as a routing signal is _____.
a) home signal b) advance starter signal
c) outer signal d) starter signal

14) The stations which do not have any signal are known as _____.
a) A-class stations b) B-class stations
c) Crossing stations d) Terminal stations

1) with negative feedback in a closed loop control system, the system sensitivity to parameter variation _____.
a) Becomes infinite b) Becomes zero
c) Decreases d) Increases

2) In control system excessive bandwidth is not employed Because _____.
a) It leads to slower time response
b) Noise is proportional to bandwidth
c) Noise is proportional to the square of the bandwidth
d) It leads to low relative stability

3) Which of the following is the input of a controller?
a) Signal of fixed amplitude not dependent on desired variable value
b) Desired variable value
c) Sensed signal
d) Error signal

4) The reception signal is _____.
a) outer signal only
b) starter only
c) neither (outer signal) nor (starter)
d) both (outer signal) and (starter)

5) Shunting signals are known as _____.
a) Routing signals b) Starter signals
c) Ground signals d) Warner signals

6) In railways the signal that also acts as a routing signal is _____.
a) home signal b) advance starter signal
c) outer signal d) starter signal

7) The stations which do not have any signal are known as _____.
a) A-class stations b) B-class stations
c) Crossing stations d) Terminal stations

8) Clear perpendicular distance between inner faces of two rails is _____.
a) Gauge of track b) Inner gauge
c) Wheel base d) Wheel gauge

9) The highest speed of train in Indian Railway _____.
a) 140 kmph b) 120 kmph
c) 160 kmph d) 130 kmph

10) Rake carrying capacity of the BLC wagon is _____.
a) 40 wagons b) 45 wagons
c) 40 wagons d) 48 wagons

11) What do you mean by RDSO _____.
a) Research & Development Standard organization
b) Railway Development & Standard organization
c) Regional Development & Standard organization
d) None of above

12) Highest post in Railway _____.
a) General Manager b) Chief Engineer
c) Chairman Railway Board d) Divisional Railway Manager

13) What do you mean by LWR _____.
a) Long welded Rail b) Long weld able Rail
c) Linear welded rail d) None of above

14) What is the full form of PQRS used for Track renewal works?
a) Plasser quick Relaying system
b) Please quick return services
c) Poor Quality renewal system
d) None of above

Set Q

T. Y (B. Tech) (Sem-II) (New) (CBCS) Examination: March/April-2025
ELECTRONICS & TELECOMMUNICATION ENGINEERING
Applications of IT and Control Engineering in Railway (BTN06615)

Day & Date: Tuesday, 10-June-2025 Max. Marks: 56
Time: 10:00 AM To 01:00 PM

Instructions: 1) All questions are compulsory.
2) Figures to the right indicate full marks.
3) Make suitable assumptions (if necessary and state them clearly).

Section – I

Q.2 Attempt any FOUR. **16**

a) What is mean by locomotive? Give its types.
b) Explain different layers of railway tracks.
c) Define following terminologies related to railway.
i) Pantograph
ii) Fishplate
iii) Fastening
iv) diamond crossing
d) Write short note on Display board System in Indian Railways.
e) Write a short note on Unreserved Ticketing System (UTS).

Q.3 Attempt any TWO. **12**

a) Give salient features of PRS system.
b) Explain Train Protection & Warning System.
c) Define control system with its types.

Section – II

Q.4 Attempt any FOUR. **16**

a) Give & explain the role of IT in Indian Railways.
b) Explain different networking devices.
c) Explain Railway tracking system.
d) Write a short note on Sensors used in Railways.
e) What are the basic requirements of UTS network?

Q.5 Attempt any TWO. **12**

a) What are the special signals used in Railway signaling?
b) Explain RMS and TMS.
c) What is mean by CRS? Give Safety measures in Railways.

Seat No.

T. Y (B. Tech) (Sem-II) (New) (CBCS) Examination: March/April-2025
ELECTRONICS & TELECOMMUNICATION ENGINEERING
Applications of IT and Control Engineering in Railway (BTN06615)

Day & Date: Tuesday, 10-June-2025 Max. Marks: 70
Time: 10:00 AM To 01:00 PM

Instructions: 1) Q. No. 1 is compulsory. It should be solved in the first 30 minutes in Answer Book Page no 03 (Starting page of the Answer Book). Each question carries one mark.
2) Don't forget to Mention question paper set (P/Q/R/S) on top of page.
3) Figures to the right indicates full marks.

MCQ/Objective Type Questions

Duration: 30 Minutes Marks:14

Q.1 Choose correct option. **14**

1) The reception signal is _____.
a) outer signal only
b) starter only
c) neither (outer signal) nor (starter)
d) both (outer signal) and (starter)

2) Shunting signals are known as _____.
a) Routing signals b) Starter signals
c) Ground signals d) Warner signals

3) In railways the signal that also acts as a routing signal is _____.
a) home signal b) advance starter signal
c) outer signal d) starter signal

4) The stations which do not have any signal are known as _____.
a) A-class stations b) B-class stations
c) Crossing stations d) Terminal stations

5) Clear perpendicular distance between inner faces of two rails is _____.
a) Gauge of track b) Inner gauge
c) Wheel base d) Wheel gauge

6) The highest speed of train in Indian Railway _____.
a) 140 kmph b) 120 kmph
c) 160 kmph d) 130 kmph

7) Rake carrying capacity of the BLC wagon is _____.
a) 40 wagons b) 45 wagons
c) 40 wagons d) 48 wagons

8) What do you mean by RDSO _____.
a) Research & Development Standard organization
b) Railway Development & Standard organization
c) Regional Development & Standard organization
d) None of above

9) Highest post in Railway _____.
a) General Manager b) Chief Engineer
c) Chairman Railway Board d) Divisional Railway Manager

10) What do you mean by LWR _____.
a) Long welded Rail b) Long weld able Rail
c) Linear welded rail d) None of above

11) What is the full form of PQRS used for Track renewal works?
a) Plasser quick Relaying system
b) Please quick return services

3) Make suitable assumptions (if necessary and state them clearly).

MCQ/Objective Type Questions

Duration: 30 Minutes Marks:14

Q.1 Choose the correct answer **14**

1) Which of the following is an example of cybercrime?
a) Writing a blog post
b) Unauthorized access to someone's email account
c) Purchasing an item from an online store
d) Programming a video game

2) Which of the following is a classification of cybercrime?
a) Organized crime and white-collar crime
b) Financial crime, hacking, and identity theft
c) Domestic theft and shoplifting
d) Political lobbying

3) What is the primary function of a proxy server?
a) Encrypting user data for secure transmission
b) Acting as an intermediary between a user and a server to provide anonymity
c) Cracking passwords for legitimate purposes
d) Detecting and removing viruses

4) Password cracking involves which of the following techniques?
a) Dictionary attacks and brute force attacks
b) SQL injection
c) Setting up firewalls
d) Encrypting passwords for security

5) Which of the following is NOT a component of cyber law?
a) Intellectual property rights b) Cyberstalking laws
c) International monetary policy d) Data protection regulations

6) What is a key reason for the need for cyber laws in India?
a) Growth in e-commerce and digital banking
b) Decline in internet usage
c) Shortage of cybersecurity professionals
d) Increasing demand for physical locks

7) Which section of the Indian IT Act covers digital signatures?
a) Section 43A b) Section 3
c) Section 72 d) Section 66F

8) Computer forensics is most commonly used in which field?
a) Medical diagnostics b) Criminal investigations
c) Agricultural technology d) Manufacturing industries

9) Which was one of the earliest computer networks that laid the foundation for the internet?
a) ARPANET b) TOR Network
c) Wi-Fi Alliance d) Ethernet

10) What does an IP address identify?
a) The physical location of a device
b) A unique address assigned to a device in a network
c) A user's browsing history
d) The model of the router used

11) What is the chain of custody critical for in network forensics?
a) Ensuring the evidence is admissible in court
b) Speeding up data recovery
c) Encrypting evidence for storage
d) Reconstructing lost network configurations

12) Which component in a mobile phone manages cellular communication?
a) Central Processing Unit (CPU) b) SIM card
c) Baseband processor d) Graphics card

13) What is the main function of forensic toolkits for handheld devices?
a) Designing mobile applications
b) Extracting and analyzing data from handheld devices
c) Enhancing mobile performance
d) Monitoring real-time network traffic

14) A major challenge in using handheld device evidence in court is _____.
a) Slow processing speed of devices
b) Ensuring evidence authenticity and integrity
c) The high cost of forensic tools
d) Limited storage capacity of devices

T. Y. (B. Tech) (Sem-II) (New) (CBCS) Examination: March/April-2025
ELECTRONICS & TELECOMMUNICATION ENGINEERING
Cyber Security -Cyber Forensic (BTN06616)

Day & Date: Tuesday, 10-June-2025 Max. Marks: 70
Time: 10:00 AM To 01:00 PM

Instructions: 1) Q. No. 1 is compulsory. It should be solved in the first 30 minutes in Answer Book Page no 03 (Starting page of the Answer Book). Each question carries one mark.
2) Don't forget to Mention question paper set (P/Q/R/S) on top of page.
3) Make suitable assumptions (if necessary and state them clearly).

MCQ/Objective Type Questions

Duration: 30 Minutes Marks:14

Q.1 Choose the correct answer **14**

1) What is a key reason for the need for cyber laws in India?
a) Growth in e-commerce and digital banking
b) Decline in internet usage
c) Shortage of cybersecurity professionals
d) Increasing demand for physical locks

2) Which section of the Indian IT Act covers digital signatures?
a) Section 43A b) Section 3
c) Section 72 d) Section 66F

3) Computer forensics is most commonly used in which field?
a) Medical diagnostics b) Criminal investigations
c) Agricultural technology d) Manufacturing industries

4) Which was one of the earliest computer networks that laid the foundation for the internet?
a) ARPANET b) TOR Network
c) Wi-Fi Alliance d) Ethernet

5) What does an IP address identify?
a) The physical location of a device
b) A unique address assigned to a device in a network
c) A user's browsing history
d) The model of the router used

6) What is the chain of custody critical for in network forensics?
a) Ensuring the evidence is admissible in court
b) Speeding up data recovery
c) Encrypting evidence for storage
d) Reconstructing lost network configurations

7) Which component in a mobile phone manages cellular communication?
a) Central Processing Unit (CPU) b) SIM card
c) Baseband processor d) Graphics card

8) What is the main function of forensic toolkits for handheld devices?
a) Designing mobile applications
b) Extracting and analyzing data from handheld devices
c) Enhancing mobile performance
d) Monitoring real-time network traffic

9) A major challenge in using handheld device evidence in court is _____.
a) Slow processing speed of devices
b) Ensuring evidence authenticity and integrity
c) The high cost of forensic tools
d) Limited storage capacity of devices

10) Which of the following is an example of cybercrime?
a) Writing a blog post
b) Unauthorized access to someone's email account
c) Purchasing an item from an online store
d) Programming a video game

11) Which of the following is a classification of cybercrime?
a) Organized crime and white-collar crime
b) Financial crime, hacking, and identity theft
c) Domestic theft and shoplifting
d) Political lobbying

12) What is the primary function of a proxy server?
a) Encrypting user data for secure transmission
b) Acting as an intermediary between a user and a server to provide anonymity
c) Cracking passwords for legitimate purposes
d) Detecting and removing viruses

13) Password cracking involves which of the following techniques?
a) Dictionary attacks and brute force attacks
b) SQL injection
c) Setting up firewalls
d) Encrypting passwords for security

14) Which of the following is NOT a component of cyber law?
a) Intellectual property rights b) Cyberstalking laws
c) International monetary policy d) Data protection regulations

Seat No.	

Set **S**

T. Y. (B. Tech) (Sem-II) (New) (CBCS) Examination: March/April-2025
ELECTRONICS & TELECOMMUNICATION ENGINEERING
Cyber Security -Cyber Forensic (BTN06616)

Day & Date: Tuesday, 10-June-2025 Max. Marks: 56
Time: 10:00 AM To 01:00 PM

Instructions: 1) All questions are compulsory.
2) Figures to the right indicate full marks.
3) Assume suitable data if necessary.

Section – I

Q.2 Attempt Any Four. **16**

a) Explain the classification of cybercrimes with suitable examples.
b) What are proxy servers and anonymizers? How are they misused in cybercrimes?
c) What are the key provisions of the Indian IT Act concerning cybercrime?
d) Explain the technique of SQL injection and its consequences in cyberattacks.
e) What is the relationship between cybercrime and information security? Provide examples.

Q.3 Attempt Any Two. **12**

a) Explain the concept of cyberstalking. Discuss its forms, consequences, and measures to combat it.
b) What are phishing attacks? Discuss their techniques, impact on victims, and preventive measures.
c) What is the role of digital signatures in the Indian IT Act? Discuss their legal significance and application.

Section – II

Q.4 Attempt Any Four. **16**

a) Explain the digital forensics life cycle. What are its key stages?
b) What are the major challenges faced in computer forensics? Provide examples.
c) Discuss the role of Internet Protocols (IP) in network forensics.
d) Explain the working characteristics of cell phones relevant to forensic investigations.
e) What types of digital evidence can be extracted from handheld devices, and how is it used in investigations?

Q.5 Attempt Any Two. **12**

a) Explain the process of filtering and data reduction in network forensics. Why is it crucial in digital investigations?

b) What are the key steps involved in analyzing digital evidence from hand-held devices?

c) Analyze the role of cyber forensics in securing and authenticating digital evidence for legal proceedings.

Day & Date: Tuesday, 10-June-2025 Max. Marks: 70
Time: 10:00 AM To 01:00 PM

Instructions: 1) Q. No. 1 is compulsory. It should be solved in the first 30 minutes in Answer Book Page no 03 (Starting page of the Answer Book). Each question carries one mark.
2) Don't forget to Mention question paper set (P/Q/R/S) on top of page.

MCQ/Objective Type Questions

Duration: 30 Minutes Marks:14

Q.1 Choose correct option. **14**

1) The most common issue when using Machine Learning is _____.
a) Lack of skilled resources b) Inadequate Infrastructure
c) Poor Data Quality d) None of these

2) Sentiment analysis is an example of _____.
i) Regression
ii) Classification
iii) Clustering
iv) Reinforcement Learning
a) (i) only b) (i) & (ii)
c) (i)&(iii) d) (i), (ii) & (iii)

3) Reinforcement learning is _____.
a) Supervised Learning b) Unsupervised Learning
c) Award-Based Learning d) None of above

4) Which ONE of the following are regression tasks?
a) Predict the age of a person
b) Predict the country from where the person comes from
c) Predict whether the price of petroleum will increase tomorrow
d) Predict whether a document is related to science

5) Which of the following is NOT supervised learning?
a) PCA b) Decision Tree
c) Linear Regression d) Naive Bayesian

6) Logistic regression is _____ regression technique that is used to model data having _____ outcome.
a) Linear, Numeric b) Linear, Binary
c) Non Linear, Numeric d) Non Linear, Binary

7) Which of the following is the centroid-based clustering method?
a) K-means clustering b) DBSCAN clustering
c) Hierarchical clustering d) KNN Algorithm

8) Which of the following statement is TRUE about the Association rule method?
a) It determines how strongly or how weakly two objects are connected
b) It determines the relation between two objects
c) Relation between particular objects
d) Relation between frequent item set

9) Which technique associates a conditional probability value with each data instances _____.
a) Linear Regression b) Logistic Regression
c) Simple Regression d) Multiple Linear Regressions

10) What is back propagation?
a) It is another name given to the curvy function in the Perceptron
b) It is the transmission of error back through the network to allow weights to be adjusted so that the network can learn
c) It is another name given to the curvy function in the Perceptron
d) None of the above.

11) Artificial neural network used for _____.
a) Pattern Recognition b) Classification
c) Clustering d) All the above

12) Applications of NN (Neural Network) _____.
a) Risk management b) Data validation
c) Sales forecasting d) All of the above

13) Which of the following is the consequence between a node and its predecessors while creating Bayesian network?
a) Conditionally independent
b) Functionally dependent
c) Both Conditionally dependent & Dependent
d) Dependent

14) Bayes rule can be used for _____.
a) Solving queries
b) Increasing complexity
c) Answering probabilistic query
d) Decreasing Complexity

MCQ/Objective Type Questions

Duration: 30 Minutes Marks:14

Q.1 Choose the correct alternatives from the options. 14

1) The modes of wave propagation that a parallel plate waveguide can support are _____.
a) TEM, TE, TM modes b) TM, TE modes
c) TEM, TM modes d) TEM, TE modes

2) In TM mode, if the direction of wave propagation is in 'z' direction, then _____.
a) HZ=0 b) EZ=0
c) EY=0 d) HY=0

3) The modes of propagation supported by a rectangular wave guide is _____.
a) TM, TEM, TE modes b) TM, TE
c) TM, TEM d) TE, TEM

4) A waveguide acts as a _____.
a) Low pass filter b) Band pass filter
c) High pass filter d) All of the above

5) The relation between incident voltage matrix, reflected voltage matrix and S matrix for a microwave network _____.
a) $[v-] = [s][v+]$ b) $[v+] = [s][v-]$
c) $[v-][v] = [s]$ d) $[s] = [v][v-]$

6) Scattering matrix for a lossless matrix is _____.
a) Unitary b) Symmetric
c) Identity matrix d) Null matrix

7) The voltage equation for a 2 port network that can be represented as a matrix is _____.

a) V1 = AV2 + BI2
b) V1 = CV2 + DI2
c) V1 = BV2 + AI2
d) V1 = DV2 + CI2

8) ABCD matrix of the cascade connection of 2 networks is equal to _____.

a) Product of ABCD matrices representing the individual two ports
b) Sum of the ABCD matrices representing the individual two ports
c) Difference of the ABCD matrices representing the individual two ports
d) Sum of transpose of ABCD matrices representing the individual two ports

9) Microwave tubes are grouped into two categories depending on the type of _____.

a) Electron beam field interaction
b) Amplification method
c) Power gain achieved
d) Construction methods

10) The following vacuum tube can be used as an oscillator and an amplifier?

a) klystron
b) BWO
c) TWT
d) Magnetron

11) A PIN diode can be used in either a series or a shunt configuration to form _____.

a) Single pole single throw switch
b) Single pole double throw switch
c) Amplifier
d) Oscillator

12) Any semiconductor diode has a junction capacitance varying with reverse bias. If such a diode has microwave characteristics, it is called _____.

a) IMPATT diode
b) TRAPITT diode
c) SKOTTKY diode
d) None of the mentioned

13) GaAs is used in the fabrication of GUNN diodes because _____.

a) GaAs is cost effective
b) It less temperature sensitive
c) it has low conduction band electrons
d) less forbidden energy gap

14) The microwave bench in the lab is designed to work in the band _____.

a) X band
b) L band
c) S band
d) C band

Section – I

Q.2 Solve any Four of the Followings. 16

a) Starting from the electric and magnetic field expressions in a rectangular waveguide, determine wave impedance at TM and TE mode.
b) Explain the construction and operation of magic tee.
c) Give the structural details and applications of strip lines.
d) Explain the significance of the scattering matrix.
e) Define coupling factor, directivity and isolation parameters of directional coupler.

Q.3 Solve any two of the followings. 12

a) Derive the field expressions for a rectangular waveguide for TE modes of propagation.
b) Explain the construction and operation of E-plane Tee and derive its S-matrix.
c) Explain the construction and operation of the circulator.

Section – II

Q.4 Solve any Four of the Followings. 16

a) Explain with a neat diagram electron bunching process in reflex klystron.
b) Explain Varactor diode. Discuss its constructional details.
c) Explain construction and working of IMPATT diode.
d) Explain operation, construction and applications of Gunn diode.
e) How impedance can be measured using a slotted line?

Q.5 Solve any two of the followings. 12

a) Explain construction and working of two cavity klystron amplifier with Applegate diagram.
b) Explain working of Tunnel diode with the help of an energy band diagram.
c) Explain different power measurement techniques.

Set Q

Fourth. Y (B. Tech) (Sem-I) (New) (CBCS) Examination: March/April-2025
ELECTRONICS & TELECOMMUNICATION ENGINEERING
Microwave Engineering (BTN06701)

Day & Date: Monday 02-06-2025 Max. Marks: 70
Time: 03:00 PM To 06:00 PM

Instructions: 1) Q. No. 1 is compulsory. It should be solved in the first 30 minutes in Answer Book Page no 03 (Starting page of the Answer Book). Each question carries one mark.
2) Don't forget to Mention question paper set (P/Q/R/S) on top of page.
3) Figures to the right indicates full marks.
4) Assume suitable data if necessary.
5) Use of non - programmable calculators is allowed.

MCQ/Objective Type Questions

Duration: 30 Minutes Marks:14

Q.1 Choose the correct alternatives from the options. 14

1) ABCD matrix of the cascade connection of 2 networks is equal to _____.
a) Product of ABCD matrices representing the individual two ports
b) Sum of the ABCD matrices representing the individual two ports
c) Difference of the ABCD matrices representing the individual two ports
d) Sum of transpose of ABCD matrices representing the individual two ports

2) Microwave tubes are grouped into two categories depending on the type of _____.
a) Electron beam field interaction
b) Amplification method
c) Power gain achieved
d) Construction methods

3) The following vacuum tube can be used as an oscillator and an amplifier?
a) klystron b) BWO
c) TWT d) Magnetron

4) A PIN diode can be used in either a series or a shunt configuration to form _____.
a) Single pole single throw switch
b) Single pole double throw switch
c) Amplifier
d) Oscillator

5) Any semiconductor diode has a junction capacitance varying with reverse bias. If such a diode has microwave characteristics, it is called _____.

a) IMPATT diode
b) TRAPITT diode
c) SKOTTKY diode
d) None of the mentioned

6) GaAs is used in the fabrication of GUNN diodes because _____.

a) GaAs is cost effective
b) It less temperature sensitive
c) it has low conduction band electrons
d) less forbidden energy gap

7) The microwave bench in the lab is designed to work in the band _____.

a) X band
b) L band
c) S band
d) C band

8) The modes of wave propagation that a parallel plate waveguide can support are _____.

a) TEM, TE, TM modes
b) TM, TE modes
c) TEM, TM modes
d) TEM, TE modes

9) In TM mode, if the direction of wave propagation is in 'z' direction, then _____.

a) HZ=0
b) EZ=0
c) EY=0
d) HY=0

10) The modes of propagation supported by a rectangular wave guide is _____.

a) TM, TEM, TE modes
b) TM, TE
c) TM, TEM
d) TE, TEM

11) A waveguide acts as a _____.

a) Low pass filter
b) Band pass filter
c) High pass filter
d) All of the above

12) The relation between incident voltage matrix, reflected voltage matrix and S matrix for a microwave network _____.

a) $[v-] = [s][v+]$
b) $[v+] = [s][v-]$
c) $[v-][v] = [s]$
d) $[s] = [v][v-]$

13) Scattering matrix for a lossless matrix is _____.

a) Unitary
b) Symmetric
c) Identity matrix
d) Null matrix

14) The voltage equation for a 2 port network that can be represented as a matrix is _____.

a) V1 = AV2 + BI2
b) V1 = CV2 + DI2
c) V1 = BV2 + AI2
d) V1 = DV2 + CI2

Q.1 Choose the correct alternatives from the options and rewrite the sentence. **14**

1) The bridge is suitable at _____ layer of OSI reference model.
a) Application b) Transport
c) Data-link d) Network

2) _____ is a Network device, used for repackage and convert data going from one environment to another.
a) Router b) Gateway
c) Repeater d) Switch

3) The formal protocol that defines the MTA client and server in the Internet is called _____.
a) Systematic mail transfer protocol
b) Simple mail transfer protocol
c) DHCP
d) None of the above

4) _____ provide both static and dynamic address allocation which can be manual / automated.
a) SMTP b) DHCP
c) TELNET d) ICMP

5) The length of IPv6 is _____ bits.
a) 32 b) 64
c) 128 d) 16

6) Number of links to connect 'n' nodes in a mesh topology is _____.
a) N(N-1)/2 b) N(N-2)
c) N d) N2

7) _____ is the central device in star topology.
a) STP server b) Hub
c) PDC d) Router

8) The process-to-process delivery of the entire message is the responsibility of the _____ layer.
a) Transport b) Application
c) Physical d) Network

9) HDLC is an acronym for _____.
a) Half-duplex digital link combination
b) Host double-level circuit
c) High-duplex line communication
d) High-level data link control

10) The hamming distance between dataword, 110101 and 100010 is _____.
a) 3 b) 4
c) 2 d) 1

11) Urgent data requires the urgent pointer field as well as the URG bit in the _____ field.
a) Control b) Offset
c) Sequence number d) None

12) To accomplish flow control, TCP uses a _____ window protocol.
a) limited-size b) sliding
c) fixed-size d) None

13) An ACK segment, if carrying no data, consumes _____sequence number(s).
a) One b) Two
c) No d) Sixteen bit

14) The Ethernet address of system is of _____ bytes.
a) 6 b) 4
c) 32 d) 8

Section – I

Q.2 Attempt any Four of the following **16**

a) Differentiate between OSI-ISO & TCP-IP models.
b) Describe framing. State its types and explain any one type in detail.
c) With a neat sketch explain mode transition in HDLC.
d) Give details of IEEE 802.4.
e) Explain Go-back-N and selective repeat techniques.

Q.3 Attempt any two of the following **12**

a) Explain the working of stop and wait flow control and Sliding window flow control.
b) Draw TCP header format and explain each field.
c) A bit stream 1101011011 is transmitted using standard CRC method. The generator polynomial is x^4+x+1. Give the actual bit stream transmitted.

Section – II

Q.4 Attempt any Four of the following **16**

a) What is MAC? Compare ALOHA with Slotted ALOHA.
b) Draw IPv4 header format & compare IPv4 with IPv6.
c) Discuss Shortest Path Routing.
d) Explain how connection is established in FTP for file transfer.
e) Explain ICMP along with its any 4 different message types.

Q.5 Attempt any two of the following **12**

a) Give in details use of subnet mask and explain Classful IP address representation.
b) Describe Internet Domain Name System? Explain domain name space and sections.
c) With a neat sketch explain three way handshake.

11) _____ is the central device in star topology.
   a) STP server
   b) Hub
   c) PDC
   d) Router

12) The process-to-process delivery of the entire message is the responsibility of the _____ layer.
   a) Transport
   b) Application
   c) Physical
   d) Network

13) HDLC is an acronym for _____.
   a) Half-duplex digital link combination
   b) Host double-level circuit
   c) High-duplex line communication
   d) High-level data link control

14) The hamming distance between dataword, 110101 and 100010 is _____.
   a) 3
   b) 4
   c) 2
   d) 1

Fourth.Y.(B.Tech.) (Sem - I) (New) (CBCS) Examination: March/April-2025
ELECTRONICS & TELECOMMUNICATION ENGINEERING
Data Communication (BTN06702)

Day & Date: Tuesday 03-06-2025 Max. Marks: 56
Time: 03:00 PM To 06:00 PM

Instructions: 1) All questions are compulsory.
2) Figures to the right indicate full marks.
3) Assume suitable data if required.

Section – I

Q.2 Attempt any Four of the following **16**

a) Differentiate between OSI-ISO & TCP-IP models.
b) Describe framing. State its types and explain any one type in detail.
c) With a neat sketch explain mode transition in HDLC.
d) Give details of IEEE 802.4.
e) Explain Go-back-N and selective repeat techniques.

Q.3 Attempt any two of the following **12**

a) Explain the working of stop and wait flow control and Sliding window flow control.
b) Draw TCP header format and explain each field.
c) A bit stream 1101011011 is transmitted using standard CRC method. The generator polynomial is x^4+x+1. Give the actual bit stream transmitted.

Section – II

Q.4 Attempt any Four of the following **16**

a) What is MAC? Compare ALOHA with Slotted ALOHA.
b) Draw IPv4 header format & compare IPv4 with IPv6.
c) Discuss Shortest Path Routing.
d) Explain how connection is established in FTP for file transfer.
e) Explain ICMP along with its any 4 different message types.

Q.5 Attempt any two of the following **12**

a) Give in details use of subnet mask and explain Classful IP address representation.
b) Describe Internet Domain Name System? Explain domain name space and sections.
c) With a neat sketch explain three way handshake.

ELECTRONICS & TELECOMMUNICATION ENGINEERING
Data Communication (BTN06702)

Day & Date: Tuesday 03-06-2025 Max. Marks: 70
Time: 03:00 PM To 06:00 PM

Instructions: 1) Q. No. 1 is compulsory. It should be solved in the first 30 minutes in Answer Book Page no 03 (Starting page of the Answer Book). Each question carries one mark.
2) Don't forget to Mention question paper set (P/Q/R/S) on top of page.
3) Assume suitable data if required.
4) Figures to the right indicates full marks.

MCQ/Objective Type Questions

Duration: 30 Minutes Marks:14

Q.1 Choose the correct alternatives from the options and rewrite the sentence. **14**

1) Number of links to connect 'n' nodes in a mesh topology is _____.
a) N(N-1)/2 b) N(N-2)
c) N d) N2

2) _____ is the central device in star topology.
a) STP server b) Hub
c) PDC d) Router

3) The process-to-process delivery of the entire message is the responsibility of the _____ layer.
a) Transport b) Application
c) Physical d) Network

4) HDLC is an acronym for _____.
a) Half-duplex digital link combination
b) Host double-level circuit
c) High-duplex line communication
d) High-level data link control

5) The hamming distance between dataword, 110101 and 100010 is _____.
a) 3 b) 4
c) 2 d) 1

6) Urgent data requires the urgent pointer field as well as the URG bit in the _____ field.
a) Control b) Offset
c) Sequence number d) None

7) To accomplish flow control, TCP uses a _____ window protocol.
a) limited-size b) sliding
c) fixed-size d) None

8) An ACK segment, if carrying no data, consumes _____sequence number(s).
a) One b) Two
c) No d) Sixteen bit

9) The Ethernet address of system is of _____ bytes.
a) 6 b) 4
c) 32 d) 8

10) The bridge is suitable at _____ layer of OSI reference model.
a) Application b) Transport
c) Data-link d) Network

11) _____ is a Network device, used for repackage and convert data going from one environment to another.
a) Router b) Gateway
c) Repeater d) Switch

12) The formal protocol that defines the MTA client and server in the Internet is called _____.
a) Systematic mail transfer protocol
b) Simple mail transfer protocol
c) DHCP
d) None of the above

13) _____ provide both static and dynamic address allocation which can be manual / automated.
a) SMTP b) DHCP
c) TELNET d) ICMP

14) The length of IPv6 is _____ bits.
a) 32 b) 64
c) 128 d) 16

MCQ/Objective Type Questions

Duration: 30 Minutes Marks:14

Q.1 Multiple Choice Questions. **14**

1) Which of the following is a characteristic of Verilog HDL?
a) Strongly typed language b) Better library
c) Case sensitive d) Not portable

2) Which of the following loops are supported by Verilog?
a) if-else loop b) for loop
c) while loop d) All the above

3) @posedge means _____.
a) Transition from x to 1 b) Transition from z to 1, x
c) Transition from 0 to 1, x or z d) Transition from 1 to 0

4) To introduce delays in a circuit, we can use a _____.
a) buffer b) Inverter
c) EXOR Gate d) Flip-Flop

5) The power dissipation in Pseudo-nMOS is reduced to about _____ compared to nMOS device.
a) 50% b) 30%
c) 60% d) 70%

6) MOS transistors consist of which of the following?
a) semiconductor layer b) metal layer
c) layer of silicon-di-oxide d) all of the mentioned

7) Why we needed HDLs while having many traditional Programming languages?

a) Traditional programming languages are complex
b) Some characteristics of digital hardware couldn't be captured by traditional languages
c) HDLs are complementary to traditional programming languages to complete the design process
d) HDLs offer more complexity than traditional programming languages.

8) A Verilog code contains Keyword always, which style of modelling is used in this code?

a) behavioral
b) structural
c) dataflow
d) none of these

9) Let x = 4'b1010 then &x and |x will result in _____ and _____ respectively.

a) 1'b1, 1'b1
b) 1'b0 and 1'b1
c) 1'b0,'b1
d) Can not be determined

10) Default value of a reg data type is _____.

a) 0
b) x
c) 1
d) z

11) VLSI technology uses _____ to form integrated circuit.

a) transistors
b) diodes
c) switches
d) buffers

12) Electrical charge flows from _____.

a) source to drain
b) source to ground
c) drain to source
d) source to gate

13) In Pseudo-nMOS logic, n transistor operates in _____.

a) cut off region
b) resistive region
c) saturation region
d) non saturation region

14) Most Lookup tables in FPGAs use _____ inputs, resulting in _____ possible outputs.

a) 4,16
b) 8,16
c) 4,12
d) 6,12

2) Don't forget to Mention question paper set (P/Q/R/S) on top of page.
3) Figures to the right indicates full marks.
4) Make suitable assumptions if necessary and state them clearly.

MCQ/Objective Type Questions

Duration: 30 Minutes Marks: 14

Q.1 Choose correct answer. 14

1) What is the main function of the CPU in a PLC?
a) To provide power to the PLC
b) To store the program
c) To execute the program and control the input and output devices
d) To communicate with other PLCs

2) What is a PLC?
a) A type of controller used for industrial automation
b) A type of robot used for industrial automation
c) A type of sensor used for industrial automation
d) A type of software used for industrial automation

3) AC output field devices can interface to _____.
a) AC output modules b) Relay output modules
c) Both a and b d) Neither a or b

4) In a current sinking DC input module _____.
a) The current flows out of the input field device
b) Requires that a AC sources be used with mechanical switches
c) The current flows out of the input module
d) Currents can flow in either direction at the input module

5) What is the function of a sensor?
a) To convert physical quantities into electrical signals
b) To convert electrical signals into physical quantities
c) To measure the speed of a moving object
d) To control the temperature of a system

6) Which one of the following is a basic component of pneumatic power system?

a) Air tank
b) Compressor
c) Valves
d) All of the above

7) What type of power supply is typically used for a PLC?

a) AC
b) DC
c) Both AC and DC
d) Solar

8) Normally Open contacts are open _____.

a) When input is not energized
b) When input is energized
c) When input is higher than 20 volts
d) None of the above

9) A solenoid is an example of an _____ device.

a) Input
b) Output
c) IN OUT
d) None of the above

10) Which mini application of PLC is used for monitoring and controlling the temperature and pressure in a manufacturing process?

a) Traffic signal control
b) Home automation
c) Industrial robot control
d) Process control

11) Parallel connections of a ladder logic program are typically called _____.

a) Branches
b) Input
c) Output
d) Loop

12) An AND function implemented in ladder logic uses:

a) Normally-closed contacts in series
b) Normally-open contacts in series
c) A single normally-closed contact
d) Normally-open contacts in parallel

13) What is the purpose of a Human-Machine Interface (HMI) in industrial automation?

a) To control industrial robots
b) To program PLCs
c) To monitor and interact with the industrial process
d) To process raw materials

14) SCADA stands for _____.

a) Superior control and data acquisition system
b) Supervisory control and data acquisition system
c) Supervisory control and data appear system
d) None of the above

Set | P

Fourth.Y. (B. Tech) (Sem-I) (New) (CBCS) Examination: March/April-2025
ELECTRONICS & TELECOMMUNICATION ENGINEERING
PLC and Industrial Controllers (BTN06707)

Day & Date: Thursday, 05-June-2025 Max. Marks: 56
Time: 03:00 PM To 06:00 PM

Instructions: 1) All question are compulsory.
2) Assume suitable data if required.
3) Figures to the right indicates full marks

SECTION – I

Q.2 Attempt any Four of the following. **16**

a) Explain different Selection parameters of PLCs.
b) List different applications of PLC. Compare PLC with relay circuit.
c) Describe sinking and sourcing concept in PLC.
d) State working principle of IR Sensor. List applications of IR sensor.
e) Draw and describe the block diagram of DC discrete output module of PLC.

Q.3 Attempt any Two of following. **12**

a) With respect to PLC discuss.
i) Why a Separate PLC Power Supply?
ii) Power Supply Selection for PLC
b) What is gauge factor? What are the different types of strain gauge? Describe the construction and working of strain gauge.
c) What are the suitable materials for piezo electric sensor? What is piezo electric effect? Explain working of piezoelectric Sensor.

SECTION – II

Q.4 Attempt any Four of the following. **16**

a) How does a Push Button Switch Operate? Explain roll of Push Button in PLC.
b) List & explain the selection criteria for a limit switch in a PLC.
c) Explain use of Down Counter instruction in PLC with example.
d) Define industrial controller. Discuss the application areas of industrial controller.
e) What is use of comparison instruction in PLC programming? Explain any two comparison instruction in detail.

Q.5 Attempt any Two of the following. **12**

a) Explain working of AC servo motor with block diagram. List specification of it.

b) List different Methods of Programming a PLC. Draw Ladder diagram for basic gates.

c) Draw a ladder diagram for two lamps RED & YELLOW having following conditions.

i) When start button pressed RED & Yellow lamp will be ON.

ii) When stop button pressed RED lamps will be OFF.

iii) After 10 second YELLOW lamp will be OFF.

Day & Date: Thursday, 05-June-2025 Max. Marks: 70
Time: 03:00 PM To 06:00 PM

Instructions: 1) Q. No. 1 is compulsory. It should be solved in the first 30 minutes in Answer Book Page no 03 (Starting page of the Answer Book). Each question carries one mark.
2) Don't forget to Mention question paper set (P/Q/R/S) on top of page.
3) Figures to the right indicates full marks.
4) Make suitable assumptions if necessary and state them clearly.

MCQ/Objective Type Questions

Duration: 30 Minutes Marks: 14

Q.1 Choose correct answer. **14**

1) Normally Open contacts are open _____.
a) When input is not energized
b) When input is energized
c) When input is higher than 20 volts
d) None of the above

2) A solenoid is an example of an _____ device.
a) Input b) Output
c) IN OUT d) None of the above

3) Which mini application of PLC is used for monitoring and controlling the temperature and pressure in a manufacturing process?
a) Traffic signal control b) Home automation
c) Industrial robot control d) Process control

4) Parallel connections of a ladder logic program are typically called _____.
a) Branches b) Input
c) Output d) Loop

5) An AND function implemented in ladder logic uses:
a) Normally-closed contacts in series
b) Normally-open contacts in series
c) A single normally-closed contact
d) Normally-open contacts in parallel

6) What is the purpose of a Human-Machine Interface (HMI) in industrial automation?
a) To control industrial robots
b) To program PLCs
c) To monitor and interact with the industrial process
d) To process raw materials

7) SCADA stands for _____.
a) Superior control and data acquisition system
b) Supervisory control and data acquisition system
c) Supervisory control and data appear system
d) None of the above

8) What is the main function of the CPU in a PLC?
a) To provide power to the PLC
b) To store the program
c) To execute the program and control the input and output devices
d) To communicate with other PLCs

9) What is a PLC?
a) A type of controller used for industrial automation
b) A type of robot used for industrial automation
c) A type of sensor used for industrial automation
d) A type of software used for industrial automation

10) AC output field devices can interface to _____.
a) AC output modules
b) Relay output modules
c) Both a and b
d) Neither a or b

11) In a current sinking DC input module _____.
a) The current flows out of the input field device
b) Requires that a AC sources be used with mechanical switches
c) The current flows out of the input module
d) Currents can flow in either direction at the input module

12) What is the function of a sensor?
a) To convert physical quantities into electrical signals
b) To convert electrical signals into physical quantities
c) To measure the speed of a moving object
d) To control the temperature of a system

13) Which one of the following is a basic component of pneumatic power system?
a) Air tank
b) Compressor
c) Valves
d) All of the above

14) What type of power supply is typically used for a PLC?
a) AC
b) DC
c) Both AC and DC

MCQ/Objective Type Questions

Duration: 30 Minutes Marks:14

Q.1 Choose the correct answer. **14**

1) Who sets the standards of GSM?
a) ITU b) AT&T
c) ETSI d) USDC

2) Standard GSM systems support a data rate of _____.
a) 164 kbps b) 64 kbps
c) 128 kbps d) 9.6 kbps

3) Cellular concept replaces many low power transmitters to a single high power transmitter.
a) True b) False

4) Actual radio coverage of a cell is called _____.
a) Fingerprint b) Footprint
c) Imprint d) Matrix

5) How many users or voice channels are supported for each 200 KHz channel in GSM?
a) Eight b) Three
c) Sixty four d) Twelve

6) What is the name of a Base Transceiver Station in 2G system equivalent in a 4G LTE _____.
a) nodeB b) eNodeB
c) aNodeB d) nodeBPro

7) Which system is called as buffer and burst method?
a) FDMA b) TDMA
c) CDMA d) None of the above

8) Free space propagation model is to predict _____.
a) Received signal strength b) Transmitted power
c) Gain of transmitter d) Gain of receiver

9) Diffraction occurs when radio path between Tx. And Rx. is obstructed by _____.
a) Surface having sharp irregularities
b) Smooth irregularities
c) Rough surface
d) All types of surfaces

10) Which organization is responsible for developing LTE standards?
a) UMTS b) 3GPP
c) 3GPP2 d) ISO

11) OFDMA stands for _____.
a) omnidirectional frequency division multiple access
b) orthogonal frequency duplex multiple access
c) orthogonal frequency divider multiple access
d) orthogonal frequency division multiple access

12) Modulation techniques used in CDMA 2000 is _____.
a) Uplink-QPSK downlink-BPSK
b) Uplink-BPSK downlink-QPSK
c) Uplink-BPSK downlink-BPSK
d) None of the above

13) What is the minimum spectrum allocation required by W-CDMA?
a) 5 MHz b) 20 MHz
c) 1.25 MHz d) 200 KHz

14) What does LTE stands for?
a) Level Telecom Advanced b) Long Terminal Advanced
c) Long Term Evolution d) Long Time Evolution

Time: 03:00 PM To 06:00 PM

Instructions: 1) All question are compulsory.
2) Figures to the right indicates full marks.

Section – I

Q.2 Solve ANY FOUR: **16**

a) Explain different channel assignment strategies in cellular system.
b) What is small scale fading? What are its types? Explain in detail.
c) What is the need of cellular system? Explain the frequency reuse concept in cellular system.
d) What is diffraction? Explain knife edge diffraction.
e) Explain FDMA with its non-linear effects.

Q.3 Solve ANY TWO. **12**

a) Consider that a geographical service area of a cellular system is 5000 km^2. A total of 1000 radio channels are available for handling traffic, suppose area of a cell is 10 km^2.
  i) How many times would the cluster of size seven have to be replicated to cover entire service area?
  ii) Calculate number of channels per cell and system capacity for N=4 and N=7. Does decreasing N increases system capacity? Explain.
b) What are the different methods to improve the coverage and capacity of a cellular system? Explain in detail.
c) Explain two ray model in detail.

Section – II

Q.4 Solve ANY FOUR. **16**

a) What is handoff? Explain different types of handoff in GSM.
b) What are the different identifiers used in GSM? Explain in detail.
c) Draw and explain packet and frame formats of CDMA IS - 95.
d) What is E-UTRAN? Explain.
e) Explain the features, advantages, disadvantages and applications of 5G.

Q.5 Solve ANY TWO. **12**

a) Give the detail comparison of IMT 2000, IMT Advanced and IMT 2020.
b) Draw and explain the network architecture of GSM in detail.
c) Explain in detail radio interface, modulation, channels & features of 4G.

a) Consider that a geographical service area of a cellular system is 5000 km^2. A total of 1000 radio channels are available for handling traffic, suppose area of a cell is 10 km^2.
  i) How many times would the cluster of size seven have to be replicated to cover entire service area?
  ii) Calculate number of channels per cell and system capacity for N=4 and N=7. Does decreasing N increases system capacity? Explain.
b) What are the different methods to improve the coverage and capacity of a cellular system? Explain in detail.
c) Explain two ray model in detail.

Section – II

Q.4 Solve ANY FOUR. **16**

a) What is handoff? Explain different types of handoff in GSM.
b) What are the different identifiers used in GSM? Explain in detail.
c) Draw and explain packet and frame formats of CDMA IS - 95.
d) What is E-UTRAN? Explain.
e) Explain the features, advantages, disadvantages and applications of 5G.

Q.5 Solve ANY TWO. **12**

a) Give the detail comparison of IMT 2000, IMT Advanced and IMT 2020.
b) Draw and explain the network architecture of GSM in detail.
c) Explain in detail radio interface, modulation, channels & features of 4G.

Set R

Fourth. Y (B. Tech) (Sem-I) (New) (CBCS) Examination: March/April-2025
ELECTRONICS & TELECOMMUNICATION ENGIGEERING
Mobile Communication (BTN06708)

Day & Date: Thursday, 05-June-2025 Max. Marks: 70
Time: 03:00 PM To 06:00 PM

Instructions: 1) Q. No. 1 is compulsory. It should be solved in the first 30 minutes in Answer Book Page no 03 (Starting page of the Answer Book). Each question carries one mark.
2) Don't forget to Mention question paper set (P/Q/R/S) on top of page.
3) Figures to the right indicates full marks.

MCQ/Objective Type Questions

Duration: 30 Minutes Marks:14

Q.1 Choose the correct answer. **14**

1) OFDMA stands for _____.
a) omnidirectional frequency division multiple access
b) orthogonal frequency duplex multiple access
c) orthogonal frequency divider multiple access
d) orthogonal frequency division multiple access

2) Modulation techniques used in CDMA 2000 is _____.
a) Uplink-QPSK downlink-BPSK
b) Uplink-BPSK downlink-QPSK
c) Uplink-BPSK downlink-BPSK
d) None of the above

3) What is the minimum spectrum allocation required by W-CDMA?
a) 5 MHz b) 20 MHz
c) 1.25 MHz d) 200 KHz

4) What does LTE stands for?
a) Level Telecom Advanced b) Long Terminal Advanced
c) Long Term Evolution d) Long Time Evolution

5) Who sets the standards of GSM?
a) ITU b) AT&T
c) ETSI d) USDC

6) Standard GSM systems support a data rate of _____.
a) 164 kbps b) 64 kbps
c) 128 kbps d) 9.6 kbps

7) Cellular concept replaces many low power transmitters to a single high power transmitter.
a) True b) False

8) Actual radio coverage of a cell is called _____.
a) Fingerprint b) Footprint
c) Imprint d) Matrix

9) How many users or voice channels are supported for each 200 KHz channel in GSM?
a) Eight b) Three
c) Sixty four d) Twelve

10) What is the name of a Base Transceiver Station in 2G system equivalent in a 4G LTE _____.
a) nodeB b) eNodeB
c) aNodeB d) nodeBPro

11) Which system is called as buffer and burst method?
a) FDMA b) TDMA
c) CDMA d) None of the above

12) Free space propagation model is to predict _____.
a) Received signal strength b) Transmitted power
c) Gain of transmitter d) Gain of receiver

13) Diffraction occurs when radio path between Tx. And Rx. is obstructed by _____.
a) Surface having sharp irregularities
b) Smooth irregularities
c) Rough surface
d) All types of surfaces

14) Which organization is responsible for developing LTE standards?
a) UMTS b) 3GPP
c) 3GPP2 d) ISO

MCQ/Objective Type Questions

Duration: 30 Minutes Marks:14

Q.1 Choose the correct Answer. **14**

1) Which of the following can improve the performance of an AI agent.
a) Perceiving b) Learning
c) Observing d) None

2) What is a common application of graph searching in artificial intelligence?
a) Maze Solving b) Network Routing
c) Topological Sorting d) All of these

3) What is the purpose of image segmentation in computer vision?
a) To enhance image resolution
b) To identify and label objects within an image
c) To convert color images to grayscale
d) To create depth map

4) What does the term chatbot refers to in AI?
a) A software that simulate human conversation
b) An advanced search engine
c) A tool for coding
d) A virtual reality headset

5) Knowledge representation format commonly used in expert system for expressing facts & rule.
a) Decision Trees b) Semantic Networks
c) First-order Logic d) Regression Model

6) What is the process of breaking text into smaller units, such as words or phrases, called in NLP?
a) Lemmatization b) Tokenization
c) Sentiment analysis d) Semantic parsing

7) What is the policy in the context of reinforcement learning?
   a) Set of all possible actions
   b) Sequence of state visited by the agent
   c) Probability distribution over actions given a state
   d) Environments rule and regulation

8) Which algorithm is commonly used for training agents in reinforcement learning?
   a) Q learning
   b) Random Forest
   c) K means clustering
   d) Support Vector Machine

9) Which component of expert system is responsible for acquiring knowledge from human experts.
   a) Inference engine
   b) Knowledge base
   c) User Interface
   d) Knowledge acquisition system

10) What is the role of bounding box in object detection in computer vision?
   a) To resize the image for better processing
   b) To specify position and size of detected object
   c) To add visual effects to image
   d) To convert images into a specific color

11) If a robot is able to change its own trajectory as per the external conditions, then the robot is considered as the _____
   a) Mobile
   b) Non-Servo
   c) Open Loop
   d) Intelligent

12) The probabilistic reasoning depends upon _____.
   a) Estimation
   b) Observations
   c) Likelihood
   d) All of these

13) Which term describes the common-sense of the judgmental part of problem solving?
   a) Values-based
   b) Critical
   c) Analytical
   d) Heuristic

14) An AI agent perceives and acts upon the environment using _____.
   a) Sensors
   b) Perceiver
   c) Actuators
   d) Both a and c

Day & Date: Friday, 06-June-2025 Max. Marks: 56
Time: 03:00 PM To 06:00 PM

Instructions: 1) All questions are compulsory.
2) Figures to the right indicate full marks.
3) Assume suitable data where necessary.
4) Use of calculator is allowed.

Section – I

Q.2 Answer any four. **16**

a) Explain the tasks of pattern recognition.
b) Explain any two types of expert system tools and existing system.
c) Describe knowledge acquisition process.
d) Explain model based object recognition with applications.
e) Importance of AI in perspective of man vs computer.

Q.3 Answer any two: **12**

a) Explain Relaxation labelling method in detail.
b) Explain in detail architecture of expert system.
c) Describe intelligent agents and major components of intelligent system.

Section – II

Q.4 Answer any four. **16**

a) Explain the importance of Language model with N-gram character model.
b) Explain information retrieval system and its characteristics.
c) Describe application of reinforcement learning.
d) Explain any two application domains of robotic technology.
e) Explain the machine translation system.

Q.5 Answer any two. **12**

a) Explain the syntactic analysis in NLP.
b) Explain the process of generalization in reinforcement learning.
c) Explain in detail robot hardware i) sensors ii) effectors.

Fourth. Y. (B. Tech) (Sem-I) (New) (CBCS) Examination: March/April-2025
ELECTRONICS & TELECOMMUNICATION ENGINEERING
Data Science- Business Intelligence - BTN06713

Day & Date: Friday, 06-June-2025 Max. Marks: 70
Time: 03:00 PM To 06:00 PM

Instructions: 1) Q. No. 1 is compulsory. It should be solved in the first 30 minutes in Answer Book Page no 03 (Starting page of the Answer Book). Each question carries one mark.
2) Don't forget to Mention question paper set (P/Q/R/S) on top of page.
3) Figures to the right indicates full marks.
4) Assume suitable data if necessary.

MCQ/Objective Type Questions

Duration: 30 Minutes Marks:14

Q.1 Choose the correct Answer. **14**

1) Information is transformed into _____ when it is used to make decisions and develop the corresponding actions.
a) Data b) Outcome
c) Knowledge d) Experience

2) i) Data mart is a subset of data warehouse.
ii) Data marts contain repositories of summarized data collected for analysis on a specific section or unit within an organization.
a) Only i is correct b) Only ii is correct
c) Both i and ii are correct d) Both are wrong

3) The objective of BI is_____.
a) To support decision-making and complex problem solving.
b) To support information gathering.
c) To support data collection.
d) To support data analysis

4) DSS stands for:____.
a) Decision Support System
b) Definition support System
c) Data sub system
d) Data storage system

5) Decisions can be classified into their _____.
a) Concept and thoughts b) Supply and Demand
c) Nature and scope d) Techniques

6) Data mining activities can be subdivided into two major investigation streams, which are _____.
   a) Interpretation and Sampling
   b) Interpretation and Prediction
   c) Forecast and Prediction
   d) Forecast and Interpretation

7) _____describes the data contained in the data warehouse.
   a) Relational data
   b) Operational data
   c) Metadata
   d) Informational data

8) What is the focus of relational marketing?
   a) Maximizing individual transactions
   b) Building long-term customer relationships
   c) Ignoring customer feedback
   d) Minimizing customer engagement

9) What does DMAIC stand for in Six Sigma methodology?
   a) Define, Measure, Analyze, Improve, Control
   b) Determine, Manage, Assess, Implement, Correct
   c) Data, Metrics, Analysis, Improvement, Control
   d) Develop, Maintain, Audit, Innovate, Collaborate

10) Which of the following is not a stage in “Lifetime of a Customer”?
   a) Acquisition
   b) Cross/Up Selling
   c) Bargaining
   d) Retention

11) Which term refers to the process of presenting data in a visual format to facilitate understanding and decision-making?
   a) Business Intelligence
   b) Data Visualization
   c) Data Analysis
   d) Report Generation

12) What is the purpose of introducing backlogging in logistic systems?
   a) Reduce demand variability
   b) Minimize inventory costs
   c) Address unfulfilled demand situations
   d) Avoid capacity constraints

13) Which of the following is not an optimization model?
   a) Extra Capacity
   b) Maximum Fixed Cost
   c) Backlogging
   d) Multiple Plants

14) What is a primary benefit of using performance dashboards?
   a) They slow down decision-making
   b) They complicate data understanding
   c) They reduce transparency
   d) They centralize information for quick insights

Day & Date: Friday, 06-June-2025 Max. Marks: 56
Time: 03:00 PM To 06:00 PM

Instructions: 1) All questions are compulsory.
2) Figures to the right indicate full marks.
3) Assume suitable data if necessary.

Section – I

Q.2 Answer any four. **16**

a) How does the implementation of business intelligence (BI) contribute to making effective and timely decisions within an organization?
b) Elaborate the structured, unstructured and semi- structured types of decision according to their nature in a decision making process.
c) What is the purpose of ETL (Extract, Transform, Load) tools in the context of data warehousing, and how do they facilitate the movement and transformation of data?
d) Differentiate between OLAP (Online Analytical Processing) and OLTP (Online Transaction Processing) systems.
e) What are the key differences between data, information, and knowledge within the context of business intelligence.

Q.3 Answer any two: **12**

a) What are the fundamental components of a typical business intelligence (BI) architecture, and how do they work together to support data analysis and decision-making?
b) Elaborate with diagram the different phases in the development of a decision support system.
c) Elaborate the process of data mining with suitable diagram.

Section – II

Q.4 Answer any four. **16**

a) List and describe the three major categories of business reports.
b) What are the four perspectives that balanced scorecard (BSC) suggests to use to view organizational performance?
c) Describe the term market basket analysis in context to relational marketing.
d) Explain the concept of supply chain optimization and its significance in logistics.
e) Describe any 4 types of charts used for visualization in BI.

Q.5 Answer any two. **12**

a) What is meant by Business Performance Management (BPM)? List and briefly describe the four phases of the business performance management cycle.

b) How does Salesforce management contribute to organizational success, and what are the key decision-making processes involved in it?

c) Describe tactical planning and backlogging in context to optimization models for logistic planning.

MCQ/Objective Type Questions

Duration: 30 Minutes Marks:14

Q.1 Choose the correct Answer. **14**

1) Which is the first engine less Train in India?
a) Train 16 b) Train 18
c) Train 20 d) Train 22

2) IT tools and business systems in IR are _____.
a) Mobile Ticketing b) Web Ticketing
c) Kiosk-based Ticketing d) All above

3) _____ for monitoring of stations, tracks, and passengers.
a) Train Tracking b) Train signaling
c) Train surveillance d) Train Monitoring

4) The hard-wired analogue cabling approach which has generally been replaced by _____ that operate over TCP/IP networks.
a) LAN b) CCTV
c) VSS d) WAN

5) IoT technologies in Railways is _____.
a) Non-real time b) Real-time
c) Backend d) Safety alert

6) The reception signal is _____.
a) outer signal only
b) starter only
c) neither (outer signal) nor (starter)
d) both (outer signal) and (starter)

7) UTS (Unreserved Ticketing System) is a mobile app developed by _____.
a) IRCTC b) CRIS
c) C-DAC d) None of these

8) Intermediate Block Signaling using MSDAC system consists of the following component: _____.

a) Axle Detectors
b) Electronics Field Units
c) Central Evaluator
d) All the above

9) In a railway network system, the primary “STOP” signal is known as _____.

a) Home Signal
b) Distant Signal
c) Clear Signal
d) Wait Signal

10) _____ Communication system is the backbone of Railways.

a) LTE
b) OFC
c) Single Line
d) Multiline

11) Which of following is not Preventive maintenance?

a) Periodical
b) non-periodical
c) Predictive
d) Condition based

12) How many zones are there in Indian Railways?

a) 16
b) 22
c) 20
d) 18

13) _____ is a railway signaling system that uses telecommunications between the train and track equipment.

a) Communications-based train control (CBTC)
b) Long distance communication
c) IOT Based system
d) Telephonic System

14) The stations which do not have any signal are known as _____.

a) A-class stations
b) B-class
c) Crossing stations
d) Terminal stations

Time: 03:00 PM To 06:00 PM

Instructions: 1) All questions are compulsory.
2) Figures to the right indicate full marks.

Section – I

Q.2 Attempt any FOUR. **16**

a) Explain European Train Control System (ETCS).
b) Explain LTE for Railways (LTE-R).
c) What is the importance of railway signaling?
d) What is NextGen ATP for Automatic Train Operations?
e) Write note on trains through two-way satellite communication.

Q.3 Attempt any TWO. **12**

a) Explain the IP based Video Surveillance System (VSS).
b) Give importance of IoT (Internet of Things) in Railways.
c) What is Networked PA System in Railways.

Section – II

Q.4 Attempt any FOUR. **16**

a) What is VoIP based Train Control communication System (TCCS)? Give details.
b) Give Safety Slogans for Signal Department.
c) Give description of Warner signals and their indications.
d) What is UHF Digital (License free band radio) Handheld Trans-receivers? Explain.
e) Give Interlocking - Importance and Types.

Q.5 Attempt any TWO. **12**

a) Explain Technologies and processes to meet the challenges of signaling system maintenance.
b) Write note on ISDN Exchange in Railway.
c) What is Future Railway Mobile Communications System? Give details.

a) A-class stations b) B-class
c) Crossing stations d) Terminal stations

8) Which is the first engine less Train in India?
a) Train 16 b) Train 18
c) Train 20 d) Train 22

9) IT tools and business systems in IR are _____.
a) Mobile Ticketing b) Web Ticketing
c) Kiosk-based Ticketing d) All above

10) _____ for monitoring of stations, tracks, and passengers.
a) Train Tracking b) Train signaling
c) Train surveillance d) Train Monitoring

11) The hard-wired analogue cabling approach which has generally been replaced by _____ that operate over TCP/IP networks.
a) LAN b) CCTV
c) VSS d) WAN

12) IoT technologies in Railways is _____.
a) Non-real time b) Real-time
c) Backend d) Safety alert

13) The reception signal is _____.
a) outer signal only
b) starter only
c) neither (outer signal) nor (starter)
d) both (outer signal) and (starter)

14) UTS (Unreserved Ticketing System) is a mobile app developed by _____.
a) IRCTC b) CRIS
c) C-DAC d) None of these

Fourth. Y. (B. Tech) (Sem-I) (New) (CBCS) Examination: March/April-2025
ELECTRONICS & TELECOMMUNICATION ENGINEERING
Railway Engineering - Advanced Communication and Modern Signaling in Railway (BTN06717)

Day & Date: Friday, 06-June-2025 Max. Marks: 56
Time: 03:00 PM To 06:00 PM

Instructions: 1) All questions are compulsory.
2) Figures to the right indicate full marks.

Section – I

Q.2 Attempt any FOUR. **16**

a) Explain European Train Control System (ETCS).
b) Explain LTE for Railways (LTE-R).
c) What is the importance of railway signaling?
d) What is NextGen ATP for Automatic Train Operations?
e) Write note on trains through two-way satellite communication.

Q.3 Attempt any TWO. **12**

a) Explain the IP based Video Surveillance System (VSS).
b) Give importance of IoT (Internet of Things) in Railways.
c) What is Networked PA System in Railways.

Section – II

Q.4 Attempt any FOUR. **16**

a) What is VoIP based Train Control communication System (TCCS)? Give details.
b) Give Safety Slogans for Signal Department.
c) Give description of Warner signals and their indications.
d) What is UHF Digital (License free band radio) Handheld Trans-receivers? Explain.
e) Give Interlocking - Importance and Types.

Q.5 Attempt any TWO. **12**

a) Explain Technologies and processes to meet the challenges of signaling system maintenance.
b) Write note on ISDN Exchange in Railway.
c) What is Future Railway Mobile Communications System? Give details.

Seat No.		Set	R

Fourth. Y. (B. Tech) (Sem-I) (New) (CBCS) Examination: March/April-2025
ELECTRONICS & TELECOMMUNICATION ENGINEERING
Railway Engineering - Advanced Communication and Modern Signaling in Railway (BTN06717)

Day & Date: Friday, 06-June-2025 Max. Marks: 70
Time: 03:00 PM To 06:00 PM

Instructions: 1) Q. No. 1 is compulsory. It should be solved in the first 30 minutes in Answer Book Page no 03 (Starting page of the Answer Book). Each question carries one mark.
2) Don't forget to Mention question paper set (P/Q/R/S) on top of page.
3) Figures to the right indicates full marks.

MCQ/Objective Type Questions

Duration: 30 Minutes Marks:14

Q.1 Choose the correct Answer. **14**

1) Which of following is not Preventive maintenance?
a) Periodical b) non-periodical
c) Predictive d) Condition based

2) How many zones are there in Indian Railways?
a) 16 b) 22
c) 20 d) 18

3) _____ is a railway signaling system that uses telecommunications between the train and track equipment.
a) Communications-based train control (CBTC)
b) Long distance communication
c) IOT Based system
d) Telephonic System

4) The stations which do not have any signal are known as _____.
a) A-class stations b) B-class
c) Crossing stations d) Terminal stations

5) Which is the first engine less Train in India?
a) Train 16 b) Train 18
c) Train 20 d) Train 22

6) IT tools and business systems in IR are _____.
a) Mobile Ticketing b) Web Ticketing
c) Kiosk-based Ticketing d) All above

7) _____ for monitoring of stations, tracks, and passengers.
a) Train Tracking b) Train signaling
c) Train surveillance d) Train Monitoring

8) The hard-wired analogue cabling approach which has generally been replaced by _____ that operate over TCP/IP networks.

a) LAN b) CCTV
c) VSS d) WAN

9) IoT technologies in Railways is _____.

a) Non-real time b) Real-time
c) Backend d) Safety alert

10) The reception signal is _____.

a) outer signal only
b) starter only
c) neither (outer signal) nor (starter)
d) both (outer signal) and (starter)

11) UTS (Unreserved Ticketing System) is a mobile app developed by _____.

a) IRCTC b) CRIS
c) C-DAC d) None of these

12) Intermediate Block Signaling using MSDAC system consists of the following component: _____.

a) Axle Detectors b) Electronics Field Units
c) Central Evaluator d) All the above

13) In a railway network system, the primary “STOP” signal is known as _____.

a) Home Signal b) Distant Signal
c) Clear Signal d) Wait Signal

14) _____ Communication system is the backbone of Railways.

a) LTE b) OFC
c) Single Line d) Multiline

MCQ/Objective Type Questions

Duration: 30 Minutes Marks:14

Q.1 Choose the correct Answer. **14**

1) A Hypothesis must be ____.
a) Diffuse b) Specific
c) Slow d) Speedy

2) Which of the following options most appropriately explains ethics____.
a) It states how to write a research report flawlessly
b) It gives the methodology of researching within social norms
c) It governs the prevention of plagiarism
d) It provides a common set of do's and don'ts of conducting ethical research

3) Fundamental Research is otherwise called ____.
a) Action Research b) Survey
c) Pilot study d) Pure Research

4) Ethics in research lays the bounds of discipline for a researcher ____.
a) True b) Can not be determined
c) False d) None of the above

5) In the capacity of a researcher, how can you solve the problems that exist in the society?
a) Eradicate unethical people front the society
b) Request the research institute to form a body of members for solving the problems
c) Participate in the activities of a suitable NGO to help in fighting the problems
d) None of the above

6) The first step in formulating a problem is ____.
a) Statement of the problem b) Gathering of Data
c) Measurement d) Survey

7) A method of collecting primary data in which a number of individuals with a common interest interact is called ____.

a) Telephone Interview b) Clinical Interview
c) Focused Interview d) Group Interview

8) Selecting sample units in just a hit and miss fashion is called ____.

a) Convenience or Accidental sampling
b) Purposive sampling
c) Stratified sampling
d) Proportionate sampling

9) Good Research is always____.

a) Slow b) Fast
c) Narrow d) Systematic

10) ANOVA is ____.

a) A government body which social societal
b) The name of societal packages
c) A one-way analysis of Variance
d) A two-way analysis of Variance

11) The two important components of research responsibility are: sincerity in work and avoiding ____.

a) Plagiarism b) Writing the thesis
c) Research techniques d) Confidentiality

12) Converting a question into a Researchable problem is called ____.

a) Solution b) Examination
c) Problem formulation d) Problem Solving

13) Sampling which provides for a known non zero chance of selection is ____.

a) Probability sampling b) Non probability sampling
c) multiple Choice d) analysis

14) A Blue print of Research work is called ____.

a) Research Problem b) Research design
c) Research tools d) Research methods

Section - I

Q.2 Solve the following: (Any Four) **16**

a) Describe the basic principles of experimental design. Mention basic types of errors.
b) Describe the important points to be considered for selecting a research problem.
c) Explain Importance of Literature Review in defining a Problem.
d) Differentiate Research methods & methodology.
e) Define and explain the term “Research”. Explain its importance and objectives.

Q.3 Solve the following: (Any Two) **12**

a) What is research problem? Define the main issues which should receive the attention of the researcher in formulating the research problem.
b) Explain the meaning of the following:
1) Extraneous variables
2) Confounded relationship
3) Treatments
c) Write short note on:
1) Defining and formulating the research problem.
2) Identifying gap areas from literature review.

Section - II

Q.4 Solve the following: (Any Four) **16**

a) Explain issues that should be addressed while writing a research report.
b) Describe different methods of data collection.
c) Write short Note on:
1) Ethical issues and ethical committees.
2) Environmental impacts on research ethics.
d) Explain Sampling Methods with example.
e) What do you understand by research report or thesis? Indicate its need and importance in the research work.

Q.5 Attempt the following: (Any Two) **12**

a) Write short note on:
1) Plagiarism
2) Citation
3) Bibliography

b) Describe, in brief, the layout of a research report, covering all relevant points.

c) Explain Data Processing and Analysis strategies using Chi-Square, ANOVA with suitable example.

b) It gives the methodology of researching within social norms
c) It governs the prevention of plagiarism
d) It provides a common set of do's and don'ts of conducting ethical research

12) Fundamental Research is otherwise called ____.

a) Action Research
b) Survey
c) Pilot study
d) Pure Research

13) Ethics in research lays the bounds of discipline for a researcher ____.

a) True
b) Can not be determined
c) False
d) None of the above

14) In the capacity of a researcher, how can you solve the problems that exist in the society?

a) Eradicate unethical people front the society
b) Request the research institute to form a body of members for solving the problems
c) Participate in the activities of a suitable NGO to help in fighting the problems
d) None of the above

Fourth. Y. (B. Tech) (Sem-I) (New) (CBCS) Examination: March/April-2025
ELECTRONIC & TELECOMMUNICATION ENGINEERING
Research Methodology (BTN06704)

Day & Date: Monday, 09-June-2025 Max. Marks: 56
Time: 03:00 PM To 06:00 PM

Instructions: 1) All questions are compulsory.
2) Figures to the right indicate full marks.

Section - I

Q.2 Solve the following: (Any Four) **16**

a) Describe the basic principles of experimental design. Mention basic types of errors.
b) Describe the important points to be considered for selecting a research problem.
c) Explain Importance of Literature Review in defining a Problem.
d) Differentiate Research methods & methodology.
e) Define and explain the term “Research”. Explain its importance and objectives.

Q.3 Solve the following: (Any Two) **12**

a) What is research problem? Define the main issues which should receive the attention of the researcher in formulating the research problem.
b) Explain the meaning of the following:
1) Extraneous variables
2) Confounded relationship
3) Treatments
c) Write short note on:
1) Defining and formulating the research problem.
2) Identifying gap areas from literature review.

Section - II

Q.4 Solve the following: (Any Four) **16**

a) Explain issues that should be addressed while writing a research report.
b) Describe different methods of data collection.
c) Write short Note on:
1) Ethical issues and ethical committees.
2) Environmental impacts on research ethics.
d) Explain Sampling Methods with example.
e) What do you understand by research report or thesis? Indicate its need and importance in the research work.

Q.5 Attempt the following: (Any Two) **12**

a) Write short note on:
1) Plagiarism
2) Citation
3) Bibliography

b) Describe, in brief, the layout of a research report, covering all relevant points.

c) Explain Data Processing and Analysis strategies using Chi-Square, ANOVA with suitable example.

Fourth. Y. (B. Tech) (Sem-I) (CBCS) Examination: March/April-2025
Electronics & Telecommunication Engineering
Database Management System (197044704)

Day & Date: Monday, 02-June-2025 Max. Marks: 70
Time: 03:00 PM To 06:00 PM

Instructions: 1) Q. No. 1 is compulsory. It should be solved in the first 30 minutes in Answer Book Page no 03 (Starting page of the Answer Book). Each question carries one mark.
2) Don't forget to Mention question paper set (P/Q/R/S) on top of page.
3) Figures to the right indicates full marks.

MCQ/Objective Type Questions

Duration: 30 Minutes Marks:14

Q.1 Choose the correct Answer. **14**

1) Which of the following is not a purpose of a database system?
a) Redundancy reduction b) Data isolation
c) Data inconsistency d) Data sharing

2) Which language is used to define the structure of a database schema?
a) DML b) DDL
c) DCL d) TCL

3) In an E-R model, a weak entity set: _____
a) Has a primary key
b) Does not have a discriminator
c) Requires a strong entity for identification
d) Can exist independently

4) A super key is: _____
a) A subset of candidate key
b) A primary key with foreign keys
c) Any set of attributes that uniquely identifies a tuple
d) Always a composite key

5) Which of the following is a unary operation in relational algebra?
a) Join b) Selection
c) Cartesian Product d) Set Difference

6) Which SQL clause is used to sort the results of a query?
a) GROUP BY b) WHERE
c) ORDER BY d) HAVING

7) The SELECT clause is used to _____

a) Delete rows b) Insert rows
c) Retrieve data d) Modify schema

8) A view is: _____

a) A physical table b) A temporary table
c) A virtual table d) A type of constraint

9) Which normal form removes partial dependencies?

a) 1NF b) 2NF
c) 3NF d) BCNF

10) BCNF is a stronger version of _____

a) 1NF b) 2NF
c) 3NF d) None

11) Which of the following uses ordered structure for indexing?

a) Hashing b) B+ Tree
c) Heap d) Static table

12) Two-Phase Locking Protocol helps in: _____

a) Deadlock detection b) Ensuring atomicity
c) Serializability d) Durability

13) A transaction that completes its execution successfully is in the: _____

a) Active state b) Partially committed state
c) Failed state d) Committed state

14) Functional dependencies express the relationship between _____

a) Tables b) Tuples
c) Attributes d) Rows

Time: 03:00 PM To 06:00 PM

Instructions: 1) All questions are compulsory.
2) Figures to the right indicate full marks.

Section – I

Q.2 Attempt any THREE **12**

a) Explain ER diagram with an example.
b) Draw 1:1, 1:N and M:N mapping cardinality and explain.
c) Discuss the structure and components of two-tier and three-tier DBMS architectures.
d) Describe the concepts of specialization and generalization in database design.

Q.3 Attempt any TWO **16**

a) Describe the advantages of database management systems over conventional file processing systems.
b) In SQL, explain the terms with example:
i) select
ii) distinct
iii) where
iv) order by
c) With the help of an example explain aggregate functions in SQL.

Section – II

Q.4 Attempt any THREE **12**

a) List and explain ACID properties in transactions.
b) Differentiate indexing and hashing.
c) What is Big data? Write and explain characteristics of Big data.
d) Describe the concept of deadlock in a system.

Q.5 Attempt any TWO **16**

a) Discuss the importance of normalization in database design. What are the requirements for achieving First Normal Form (1NF) and Second Normal Form (2NF)?
b) Draw the transaction state diagram and explain each state.
c) What is NoSQL? Explain the CAP theorem in the context of NoSQL databases.

Fourth. Y. (B. Tech) (Sem-II) (New) (CBCS) Examination: March/April-2025
ELECTRONICS &TELE COMMUNICATION ENGINEERING
Wireless Sensor Networks (BTN06802)

Day & Date: Monday, 26-05-2025 Max. Marks: 40
Time: 03:00 PM To 05:00 PM

Instructions: 1) All Questions are compulsory.
2) Figures to the right indicate full marks.

SECTION - I

Q.2 Attempt any Two. **08**

a) Explain Hardware components of Single Node architecture with suitable diagram.
b) Explain the Operating System for WSN.
c) What are the types of Sources and Sinks in Network Architecture.

Q.3 Attempt any Two. **12**

a) Explain the Gateway used in WSN with its types.
b) For Sensor Network Scenario, explain Single Hop and Multiple Hop networks.
c) Explain Wireless Sensor Network with suitable diagram.

SECTION - II

Q.4 Attempt any Two. **08**

a) What is malicious Node? Explain it.
b) Explain MAC layer in WSN.
c) Why energy management is required in WSN?

Q.5 Attempt any Two. **12**

a) Explain Application of RFID in healthcare application with suitable example.
b) Explain the Aspects of EMC.
c) Explain RFID with suitable diagram.

Fourth. Y. (B. Tech) (Sem-II) (New) (CBCS) Examination: March/April-2025
ELECTRONICS &TELE COMMUNICATION ENGINEERING
Wireless Sensor Networks (BTN06802)

Day & Date: Monday, 26-05-2025 Max. Marks: 50
Time: 03:00 PM To 05:00 PM

Instructions: 1) Q. No. 1 is compulsory. It should be solved in the first 20 minutes in Answer Book Page no 03 (Starting page of the Answer Book). Each question carries one mark.
2) Don't forget to Mention question paper set (P/Q/R/S) on top of page.
3) Figures to the right indicates full marks.

MCQ/Objective Type Questions

Duration: 20 Minutes Marks: 10

Q.1 Multiple Choice Questions. (1 x 10) 10

1) AD-hoc Mode of WSN is Known as _____ mode
a) router b) roaming
c) infrastructure d) digital

2) Each Sensor Node is equipped with ____
a) Only one sensing device
b) One or more sensing devices
c) Only more than one sensing device
d) No sensing devices attached

3) A WSN is designed to collect information from _____ environment.
a) Logical b) Physical
c) both a and b d) None

4) Malware means _____
a) Small software b) Instruction
c) block diagram d) None

5) RFID Consists of _____
a) RFID Reader b) RFID Tag
c) Both a and b d) None

6) EMC stands for -
a) Electric Measurements and Components
b) Electromagnetic Compatibility
c) Electric and Mechanical Components
d) None

7) The principle behind backscatter communication is _____of radio waves.

a) refraction b) reflection
c) ionization d) back propagation

8) The directivity of an isotropic antenna is equal to _____

a) zero b) infinity
c) one d) none

9) A Sensor Network must contain _____

a) Battery b) Communication Network
c) Memory d) All of above

10) This mode of WSN will communication directly with each other

a) Digital b) Physical
c) ad-hoc d) Infrastructure

MCQ/Objective Type Questions

Duration: 20 Minutes Marks:10

Q.1 MCQ/Objective type questions **10**

1) The angle between the line from the earth station's antenna to the satellite and the line between the earth station's antenna and the earth's horizon is called as _____
a) Angle of inclination b) Angle of elevation
c) Apogee angle d) LOS angle

2) What is the eccentricity of a GEO?
a) 1.01 b) 0.87
c) 1.0 d) 0.0

3) The transmitter-receiver combination in the satellite is known as _____
a) Relay b) Repeater
c) Transponder d) Duplexer

4) Write the equation of the system noise factor.
a) TS=Tant +Tel + (L-1)T0/G1+L(F-1)T0/G1
b) TS=Tant +Tel + (L-1)T0/G1
c) TS=Tant +L(F-1)T0/G1
d) None of the above

5) A satellite signal transmitted from a satellite transponder to earth's stations is _____
a) Uplink b) Downlink
c) Terrestrial d) Earthbound

6) Shannon's law relates _____
a) Antenna gain to bandwidth
b) Frequency to antenna gain
c) Antenna gain to transmission losses
d) Information carring capacity to S/N ratio

7) Satellite used for intercontinental communications are known as __.

a) COMAT b) DOMSAT
c) INTELSAT d) EARSAT

8) Which of the following is the first active satellite?

a) Echo I b) Telstar I
c) Early Bird d) Sputnik I

9) The velocity of a geostationary satellite is nearly _____.

a) 1255 km/hr b) 6757 km/hr
c) 9422 km/hr d) 12644 km/hr

10) Video signals in TV are _____

a) Amplitude modulated b) de-modulated
c) Frequency modulated d) None of these

ELECTRONICS &TELE COMMUNICATION ENGINEERING
Satellite Communication (BTN06803)

Day & Date: Monday, 26-05-2025 Max. Marks: 40
Time: 03:00 PM To 05:00 PM

Instructions: 1) All questions are compulsory.
2) Figures to the right indicate full marks.

SECTION – I

Q.2 Solve any two of the following. **08**

a) A satellite is orbiting in the equatorial plane with a period from perigee to perigee of 12h. Given that the eccentricity is 0.002, calculate the semi major axis. The earth's equatorial radius is 6378.1414 km.
b) Write a note on Rain Attenuation.
c) Explain the Three Kepler Law of motion.

Q.3 Solve any two of the following. **12**

a) Explain the Antenna look angles for satellite with a neat diagram.
b) Explain the Polar Mount Antenna.
c) Explain the different Launching orbits of ISRO.

SECTION – II

Q.4 Solve any two of the following. **08**

a) Explain the Altitude control with diagram.
b) Write a note on different Transmission Losses.
c) Explain the Spin satellite Stabilization Process.

Q.5 Solve any two of the following. **12**

a) Write a brief note on Wide-band receiver.
b) Explain Master antenna TV system.
c) Explain how to calculate the Link Power Budget for both uplink and downlink.

MCQ/Objective Type Questions

Duration: 20 Minutes Marks:10

Q.1 Choose the correct alternatives from the options. 10

1) In BLDC motor field winding is kept on _____.
a) Stator b) Rotor
c) Can be placed anywhere d) Absent

2) Reluctance motor can produce torque at _____.
a) any speed less than synchronous speed
b) synchronous speed only
c) any speed greater than synchronous speed
d) all of the mentioned

3) Which of the following is the electrolyte used in a lead-acid battery?
a) Nitric acid b) Sulphuric acid
c) Lead-acid d) Hydrochloric acid

4) Electric vehicles are less expensive to own and operate that conventional internal combustion engines.
a) True b) False

5) An EV only needs one of the following maintenance jobs done. Which is it?
a) Oil change b) Belt replacement
c) New spark plugs d) Brake pad inspections

6) The main sources of electricity for hybrid are _____.
a) Batteries b) Capacitors
c) Both a and b d) None of the above

7) Electric vehicle and hybrid vehicle have following components common except _____.

a) Battery
b) ECU
c) Generator
d) Internal combustion engine

8) To increase the output voltage, battery cells are connected in _____.

a) Inclined
b) Series
c) Parallel
d) Series-parallel

9) The voltage generated by an alternator in an automobile is controlled by the _____.

a) brushes
b) rotor
c) starter
d) rotor winding

10) Allow the current to flow from the alternator to the battery but not in the opposite direction by the use of _____.

Time: 03:00 PM To 05:00 PM

Instructions:1) Q. No. 1 is compulsory. It should be solved in the first 20 minutes in answer bookPage no 03 (Starting page of the Answer Book). Each question carries one mark.
2) Don't forget to Mention question paper set (P/Q/R/S) on top of page.
3) Figures to the right indicates full marks.
4) Assume suitable data wherever needed & mention it clearly.

MCQ/Objective Type Questions

Duration: 20 Minutes Marks:10

Q.1 Choose the correct alternatives from the options. 10

1) The voltage generated by an alternator in an automobile is controlled by the _____.
a) brushes b) rotor
c) starter d) rotor winding

2) Allow the current to flow from the alternator to the battery but not in the opposite direction by the use of _____.
a) diode b) triode
c) capacitor d) insulator

3) In BLDC motor field winding is kept on _____.
a) Stator b) Rotor
c) Can be placed anywhere d) Absent

4) Reluctance motor can produce torque at _____.
a) any speed less than synchronous speed
b) synchronous speed only
c) any speed greater than synchronous speed
d) all of the mentioned

5) Which of the following is the electrolyte used in a lead-acid battery?
a) Nitric acid b) Sulphuric acid
c) Lead-acid d) Hydrochloric acid

6) Electric vehicles are less expensive to own and operate that conventional internal combustion engines.
a) True b) False

7) An EV only needs one of the following maintenance jobs done. Which is it?

a) Oil change
b) Belt replacement
c) New spark plugs
d) Brake pad inspections

8) The main sources of electricity for hybrid are _____.

a) Batteries
b) Capacitors
c) Both a and b
d) None of the above

9) Electric vehicle and hybrid vehicle have following components common except _____.

a) Battery
b) ECU
c) Generator
d) Internal combustion engine

10) To increase the output voltage, battery cells are connected in _____.

a) Inclined
b) Series
c) Parallel
d) Series-parallel

Time: 03:00 PM To 05:00 PM

Instructions: 1) All questions are compulsory.
2) Figures to the right indicate full marks.

Section - I

Q.2 Attempt any TWO. **08**

a) State and explain the need of Electric Vehicles.
b) State the basic parts of electric vehicles, and explain anyone.
c) Explain construction and working of Synchronous Reluctance Motors.

Q.3 Attempt any TWO. **12**

a) Explain construction and working of Permanent magnet synchronous Motors.
b) Explain selection criteria of motors for EV's.
c) Write a short note on BLDC.

Section - II

Q.4 Attempt any TWO. **08**

a) What are selection criteria of batteries for EV's.
b) State technical Specification of,
i) Aluminum Air Battery
ii) Lithium ion
c) Explain in detail charger technology used for these batteries.

Q.5 Attempt any TWO. **12**

a) Write short note on Electric Vehicle.
b) State Electric Vehicles Rules Regulations and explain anyone.
c) Which charger technology used for Lead Acid Battery?

MCQ/Objective Type Questions

Duration: 20 Minutes Marks:10

Q.1 Multiple Choice Questions. **10**

1) PLC programs written in _____.
a) Ladder diagram b) PLC diagram
c) Multiplexer diagram d) None of above

2) Sensors who requires external power supply is called as _____.
a) Active sensor b) Passive sensor
c) Primary sensors d) Secondary sensors

3) PLC Operates on following signals _____.
a) Digital b) Impulse
c) Analog d) Frequency

4) What are transducers?
a) They convert power from one form to another
b) They convert work from one form to another
c) They convert work to power
d) They convert energy from one form to another

5) Micro-Electro-Mechanical Systems (MEMS) consists of _____.
a) microelectronic elements b) actuators, sensors
c) mechanical structures d) all of the above

6) What is the full form of CNC?
a) Computer numerical control
b) Computer number control
c) Computer network control
d) Computer numbers count

7) Smallest change which a sensor can detect is _____.
a) Resolution b) Accuracy
c) Precision d) Scale

8) A thermocouple is a transducer.
a) Ture b) False

9) The analog to digital conversion in a measurement system takes place inside _____.
a) Transducer b) signal processor
c) display d) led

10) What type of energy conversion does a piezoelectric transducer perform?
a) It converts mechanical energy to sound energy
b) It converts sound energy to mechanical energy
c) It converts mechanical energy to electrical energy
d) It converts electrical energy to mechanical energy

MCQ/Objective Type Questions

Duration: 20 Minutes Marks:10

Q.1 Choose the correct answer. **10**

1) What is the primary purpose of medical instruments?
a) To diagnose diseases
b) To treat diseases
c) To measure physiological parameters
d) All of the above

2) Which component of a medical instrument converts physical input into an electrical signal?
a) Sensor b) Transducer
c) Display unit d) Power source

3) What is the primary function of the auditory system?
a) Balance b) Vision
c) Hearing d) Smell

4) What is the term used to describe unwanted interference in biomedical signals or images?
a) Noise b) Artifacts
c) Distortion d) Aberration

5) In electroencephalography (EEG), what are the events commonly detected?
a) Heartbeats b) Eye blinks
c) Muscle contractions d) Respiratory cycles

6) What is the primary purpose of data acquisition in biomedical engineering?
a) To analyze data b) To store data
c) To process data d) To collect data

7) Which imaging modality uses ionizing radiation to produce 2D images of internal structures?

a) X-Ray b) MRI
c) Ultrasound d) PET

8) Which imaging modality is commonly used to detect abnormalities in brain activity by measuring changes in blood flow and oxygenation?

a) X-Ray b) MRI
c) fMRI d) PET

9) In PET imaging, what does "PET" stand for?

a) Positron Emission Tomography
b) Proton Excitation Technique
c) Photon Emission Test

c) Explain the principles of patient monitoring systems used in healthcare settings.

Q.5 Attempt any TWO. **12**

a) Describe common types of electrodes used in biomedical signal recording, including surface electrodes, invasive electrodes, and implantable electrodes.
b) Discuss the significance of clinical laboratory instruments in capturing and analyzing ID biomedical signals.
c) Explain the role of rehabilitation in the recovery process of patients.

Fourth. Y. (B.Tech.) (Sem-II) (New) (CBCS) Examination: March/April - 2025
ELECTRONICS & TELECOMMUNICATION ENGINEERING
Biomedical Instrumentation (BTN06807)

Day & Date: Wednesday, 28-05-2025 Max. Marks: 50
Time: 03:00 PM To 05:00 PM

Instructions:1) Q. No. 1 is compulsory. It should be solved in the first 20 minutes in answer bookPage no 03 (Starting page of the Answer Book). Each question carries one mark.
2) Don't forget to Mention question paper set (P/Q/R/S) on top of page.
3) Figures to the right indicate full marks.

MCQ/Objective Type Questions

Duration: 20 Minutes Marks:10

Q.1 Choose the correct answer. **10**

1) In PET imaging, what does "PET" stand for?
a) Positron Emission Tomography
b) Proton Excitation Technique
c) Photon Emission Test
d) Positron Electromagnetic Tomography

2) Which of the following is a type of prosthetic device?
a) Insulin pump b) Pacemaker
c) Artificial limb d) X-ray machine

3) What is the primary purpose of medical instruments?
a) To diagnose diseases
b) To treat diseases
c) To measure physiological parameters
d) All of the above

4) Which component of a medical instrument converts physical input into an electrical signal?
a) Sensor b) Transducer
c) Display unit d) Power source

5) What is the primary function of the auditory system?
a) Balance b) Vision
c) Hearing d) Smell

6) What is the term used to describe unwanted interference in biomedical signals or images?
a) Noise b) Artifacts
c) Distortion d) Aberration

7) In electroencephalography (EEG), what are the events commonly detected?

a) Heartbeats b) Eye blinks
c) Muscle contractions d) Respiratory cycles

8) What is the primary purpose of data acquisition in biomedical engineering?

a) To analyze data b) To store data
c) To process data d) To collect data

9) Which imaging modality uses ionizing radiation to produce 2D images of internal structures?

a) X-Ray b) MRI
c) Ultrasound d) PET

10) Which imaging modality is commonly used to detect abnormalities in brain activity by measuring changes in blood flow and oxygenation?

a) X-Ray b) MRI
c) fMRI d) PET

Day & Date: Wednesday, 28-05-2025 Max. Marks: 40
Time: 03:00 PM To 05:00 PM

Instructions: 1) All questions are compulsory.
2) Figures to the right indicate full marks.

Section - I

Q.2 Attempt any TWO. **08**

a) Discuss the classifications of medical instruments based on their functions and provide examples of each category.
b) Write short note on Biological neurons and different biological systems.
c) Define biomedical signal processing and explain its significance in healthcare and medical research.

Q.3 Attempt any TWO. **12**

a) Explain the challenges encountered in measuring a living system and discuss the crucial role engineers play in addressing these challenges within healthcare facilities.
b) Describe common artifacts found in biomedical images, such as noise, motion artifacts, and imaging artifacts.
c) Discuss the regulation of blood pressure and blood flow by the autonomic nervous system and hormonal factors.

Section - II

Q.4 Attempt any TWO. **08**

a) Define a transducer and explain its role in biomedical signal recording.
b) Describe the fundamental concepts of Computed Tomography (CT) scans and Positron Emission Tomography (PET) in the context of biomedical imaging.
c) Explain the principles of patient monitoring systems used in healthcare settings.

Q.5 Attempt any TWO. **12**

a) Describe common types of electrodes used in biomedical signal recording, including surface electrodes, invasive electrodes, and implantable electrodes.
b) Discuss the significance of clinical laboratory instruments in capturing and analyzing ID biomedical signals.

MCQ/Objective Type Questions

Duration: 30 Minutes Marks:14

Q.1 Choose the Correct Alternatives from the Options and Rewrite the Sentence. **14**

1) Reactance diagram contains which of the following?
a) Resistance of Alternator
b) Resistance of transformer winding
c) Induction motor's equivalent circuit
d) Inductive reactance of transmission lines

2) Impedance diagram is used for analysis of _____.
a) Load flow b) Alternator
c) Fault d) Transmission Line

3) Fault level means _____.
a) Voltage at the point of fault b) fault current
c) Fault power factor d) fault MVA

4) The magnitude of p.u impedance of a transformer determined from the HT side and LT side of transformer are _____.
a) Unequal b) Equal
c) Depends on the turns ratio d) None of above

5) The most common buses in power system are _____.
a) slack bus b) generator bus
c) load bus d) a and b

6) A transformer rated at 11KV/0.4 KV, 500 KVA, 5% Reactance. What is the Shirt Circuit MVA of transformer when it is connected to infinite bus?
a) 15 MVA b) 5MVA
c) 10MVA d) 20 MVA

7) _____ is a series type unbalanced faults occurs in power system.
a) L-L
b) L-L-G
c) L-L-L
d) Open Conductor Fault

8) Which among the following quantities are specified at the generator Bus?
a) P & Q
b) P & |V|
c) Q & |V|
d) P & δ

9) The three phase SC MVA to be interrupted by a circuit breaker in a power system is given by _____.
a) $\sqrt{3}$ x post fault line voltage in kV x SC current in kA
b) 3 x pre fault line voltage in kV x SC current in kA
c) $\sqrt{3}$ x pre fault line voltage in kV x SC current in kA
d) $(1/\sqrt{3})$ x pre fault line voltage in kV x SC current in kA

10) Under line to line fault zero sequence component of fault current will be _____.
a) Very Large
b) Zero
c) Negligible
d) Both b & c

11) In load flow studies of a power system, a voltage control bus is specified by _____.
a) Real power and reactive power
b) Reactive power and voltage magnitude
c) Voltage and voltage phase angle
d) Real power and voltage magnitude

12) What is the value of $(1 + a + a2)$?
a) ∞
b) 1
c) -1
d) 0

13) What are the common assumptions made for the equal area criterion?
a) The transmission line and machine resistances are neglected.
b) Rotor speed of the machine is constant
c) Mechanical input remains constant.
d) All of these
e) None of these

14) Equal area criterion is used to study _____.
a) Load flow analysis
b) fault analysis
c) stability analysis
d) none of these

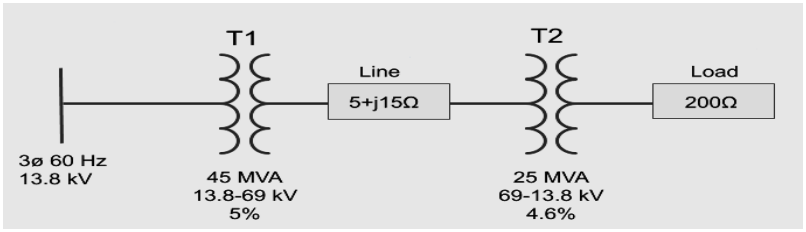
Section – I

Q.2 Attempt any four. **16**

a) Explain Per Unit System with Merits and Demerits.

b) G: 300MVA, 20kV, X"=1.2 Ω
T1: 350MVA, 230V Y/20kV Δ, X=15.2 Ω/ph
T2: 300MVA, 230V Y/13.2kV Δ, X=16 Ω/ph
TL: l=64km, XTL= 0.5 Ω /km
M1: 200MVA, 13.2kV, X"=1.6 Ω
M2: 100MVA, 13.2kV, X"= 1.6 Ω
Draw the Single line diagram for above data

c) Calculate Per Unit Impedance line and per unit impedance of load. If base impedance for line is 115.8 Ω and base impedance for load is 5.232 Ω.



d) With the help of sample power system, describe step by step method for formation of Y bus using inspection method.

e) Write short note on selection of circuit breaker.

Q.3 Attempt any two. **12**

a) Describe any two methods of short circuit current control with neat circuit diagram also state merits and demerits of each.

b) The primary and secondary sides of a single phase 1 MVA, 4kV / 2kV transformer have a leakage reactance of 2 Ω each. Find the p.u reactance of the transformer referred to the primary and secondary side.

c) Explain how an unbalanced set of three phase voltages (Va, Vb, Vc,) can be represented by three sets of symmetrical components (Va1, Va2, Va0).

Section – II

Q.4 Attempt any four. **16**

a) Derive power flow equation in rectangular form for the load flow analysis.

b) Explain rotor dynamics and derive expression for swing equation.

c) Describe various types of buses in power system and their significance in brief.

d) Explain with sequence network various open conductor fault on power system.

e) Derive an expression for single line to ground fault on an unloaded synchronous generator.

Q.5 Attempt any two. **12**

a) Derive the necessary equation to determine the fault current for single line to ground fault. Draw a diagram showing the interconnections of sequence networks.

b) Derive an expression for load flow analysis by Gauss-Siedel method.

c) State Equal Area Criterion (EAC). What are the assumptions made in applying EAC? Discuss its applications.

c) Mechanical input remains constant.
d) All of these
e) None of these

9) Equal area criterion is used to study _____.
a) Load flow analysis b) fault analysis
c) stability analysis d) none of these

10) Reactance diagram contains which of the following?
a) Resistance of Alternator
b) Resistance of transformer winding
c) Induction motor's equivalent circuit
d) Inductive reactance of transmission lines

11) Impedance diagram is used for analysis of _____.
a) Load flow b) Alternator
c) Fault d) Transmission Line

12) Fault level means _____.
a) Voltage at the point of fault b) fault current
c) Fault power factor d) fault MVA

13) The magnitude of p.u impedance of a transformer determined from the HT side and LT side of transformer are _____.
a) Unequal b) Equal
c) Depends on the turns ratio d) None of above

14) The most common buses in power system are _____.
a) slack bus b) generator bus
c) load bus d) a and b

Set **S**

T.Y. (B.Tech.) (Electrical Engineering) (Semester - I) (New) (CBCS)
Examination: March/April - 2025
Power System - III (BTN07501)

Day & Date: Saturday, 17-May-2025 Max. Marks: 56
Time: 10:00 AM To 01:00 PM

Instructions: 1) All questions are compulsory.
2) Figures to the right indicate full marks.

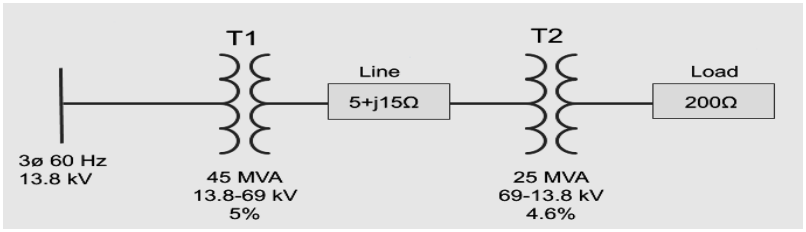
Section – I

Q.2 Attempt any four. **16**

a) Explain Per Unit System with Merits and Demerits.

b) G: 300MVA, 20kV, X"=1.2 Ω
T1: 350MVA, 230V Y/20kV Δ, X=15.2 Ω/ph
T2: 300MVA, 230V Y/13.2kV Δ, X=16 Ω/ph
TL: l=64km, XTL= 0.5 Ω /km
M1: 200MVA, 13.2kV, X"=1.6 Ω
M2: 100MVA, 13.2kV, X"= 1.6 Ω
Draw the Single line diagram for above data

c) Calculate Per Unit Impedance line and per unit impedance of load. If base impedance for line is 115.8 Ω and base impedance for load is 5.232 Ω.



d) With the help of sample power system, describe step by step method for formation of Y bus using inspection method.

e) Write short note on selection of circuit breaker.

Q.3 Attempt any two. **12**

a) Describe any two methods of short circuit current control with neat circuit diagram also state merits and demerits of each.

b) The primary and secondary sides of a single phase 1 MVA, 4kV / 2kV transformer have a leakage reactance of 2 Ω each. Find the p.u reactance of the transformer referred to the primary and secondary side.

c) Explain how an unbalanced set of three phase voltages (Va, Vb, Vc,) can be represented by three sets of symmetrical components (Va1, Va2, Va0).

Section – II

Q.4 Attempt any four. **16**

a) Derive power flow equation in rectangular form for the load flow analysis.

b) Explain rotor dynamics and derive expression for swing equation.

c) Describe various types of buses in power system and their significance in brief.

d) Explain with sequence network various open conductor fault on power system.

e) Derive an expression for single line to ground fault on an unloaded synchronous generator.

Q.5 Attempt any two. **12**

a) Derive the necessary equation to determine the fault current for single line to ground fault. Draw a diagram showing the interconnections of sequence networks.

b) Derive an expression for load flow analysis by Gauss-Siedel method.

c) State Equal Area Criterion (EAC). What are the assumptions made in applying EAC? Discuss its applications.

T. Y. (B.Tech.) (Sem - I) (New) (CBCS) Examination: March/April-2025
ELECTRICAL ENGINEERING
Linear Control Systems (BTN07502)

Day & Date: Monday, 19-05-2025 Max. Marks: 70
Time: 10:00 AM To 01:00 PM

Instructions: 1) Q. No. 1 is compulsory. It should be solved in the first 30 minutes in Answer Book Page no 03 (Starting page of the Answer Book). Each question carries one mark.
2) Don't forget to Mention question paper set (P/Q/R/S) on top of page.
3) Assume suitable data if necessary.
4) Use of non-programmable calculator is allowed.

MCQ/Objective Type Questions

Duration: 30 Minutes Marks:14

Q.1 Choose the correct alternative from the options. **14**

1) ____ has tendency to oscillate.
a) Open loop system b) Closed loop system
c) Both (a) and (b) d) Neither (a) nor (b)

2) By which of the following the control action is determined when a man walks along a path?
a) Brain b) Hands
c) Legs d) Eyes

3) Zero initial condition for a system means ____.
a) input reference signal is zero
b) zero stored energy
c) ne initial movement of moving parts
d) system is at rest and no energy is stored in any of its components

4) The capacitance, in force-current analogy, is analogous to ____
a) Momentum b) Velocity
c) Displacement d) Mass

5) The viscous friction co-efficient, in force-voltage analogy, is analogous to ____.
a) charge b) resistance
c) reciprocal of inductance d) reciprocal of conductance

6) In a signal flow graph method, how is an overall transfer function of a system obtained?
a) Poisson's equation
b) Block diagram reduction rules
c) Mason's equation
d) Lagrange's equation

7) Associative law for summing point is applicable only to those summing points which are ____ connected to each other.
a) Directly b) Indirectly
c) Orthogonally d) Diagonally

8) The transient response of a system is mainly due to ____.
a) inertia forces b) internal focus
c) stored energy d) friction

9) In case of type-1 system state acceleration is ____.
a) Unity b) Infinity
c) Zero d) 10

10) According to the property of impulse test signal, what is the value of an impulse at t=0?
a) Zero b) Unity
c) Infinite d) Unpredictable

11) Root locus specifies the movement of closed loop poles especially when the gain of system ____.
a) Remains constant b) Exhibit variations
c) Gives zero feedback d) Gives infinite poles

12) Which unit is adopted for magnitude measurement in Bode plots?
a) Degree b) Decimal
c) Decibel d) Deviation

13) What should be the nature of root locus about the real axis?
a) Asymmetric b) Symmetric
c) Exponential d) Decaying

14) If a pole is located at origin, how does it get represented on the magnitude plot?
a) -10 log (ω) dB b) -20 log (ω) dB
c) -40 log (ω) dB d) -60 log (ω) dB

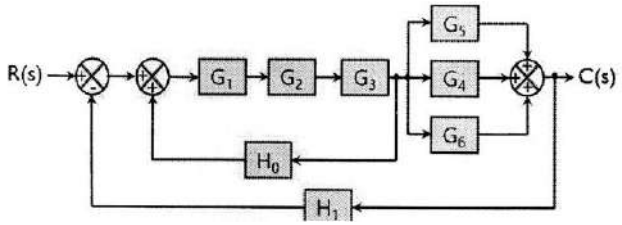
Section – I

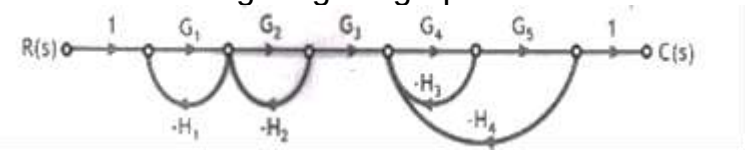
Q.2 Attempt the following questions: (Any Four) **16**

a) What is control system? Explain open loop and closed loop control system with their advantages and disadvantages.

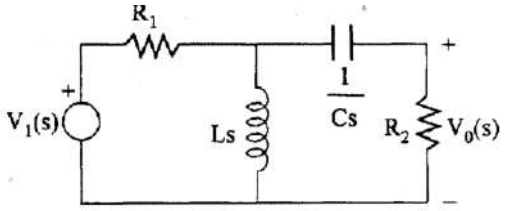
b) Reduce the block diagram using reduction rules and obtain C(s)/R(s)



c) Find C/R for the signal glow graph shown below



d) Find the transfer function $V_0(s)\ /V_i(s)$ of the following electrical system.

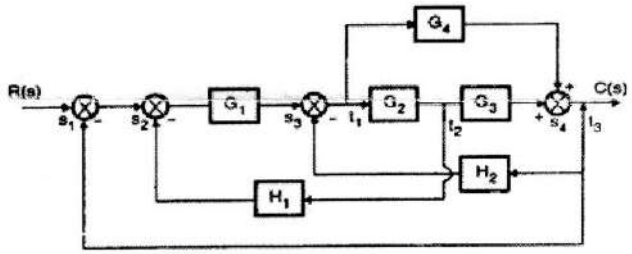


e) The TF of a system is given by T(s)= $\frac{K\,(s+6)}{s(s+2)\,(s^2+7s+16)}$ Determine:

a) Poles
b) Zeros
c) Characteristic equation
d) Pole Zero Plot in s-plane

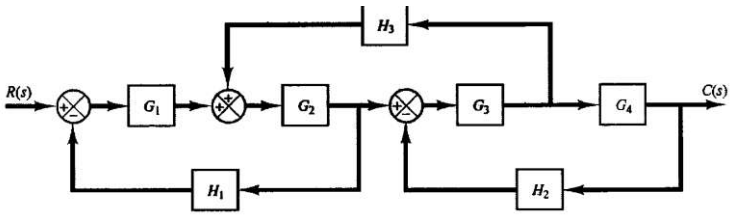
Q.3 **a)** Derive the transfer function of armature-controlled DC servomotor. **06**

b) Determine the TF C(s)/R(s), for the block diagram shown by first drawing its Signal Flow Graph and then using Mason's Gain Formula. **06**



OR

c) Determine the overall transfer function C(s)/R(s) from the Block Diagram. **06**



Section – II

Q.4 **Answer the following: (Any Four)** **16**

a) For a unity feedback system with open loop transfer function $G(s)\frac{20}{s(s+1)}$. Determine the damping ratio, maximum overshoot, rise time and peak time.

b) How to find the centroid and the angle of asymptotes for root locus technique.

c) Determine the range of K to analyze stability of a unity-feedback control system whose open-loop transfer function is $G(s) = \frac{K}{s(s+)(s+2)}$.

d) Derive the rise time and peak overshoot for a second order underdamped system with unit step input.

e) Explain the correlation between time domain and frequency domain.

Q.5 **Answer the following: (Any Two)** **12**

a) Sketch the root locus and evaluate stability of the system given by $G\ (s)\ = \frac{K}{s(s+0.5)(s^2+0.6s+10)}$

b) Sketch the Bode Plot for the system with TF given by $G(s) = \frac{4}{s(s+1)(s+2)}$ and hence determine the gain margin and the phase margin of the system.

c) The open loop transfer function of the systems is given as $G(s) = \frac{2}{s(s+4)(s+6)}$. Determine respectively the positional, velocity and acceleration error constants for these systems. Also, determine the steady state errors with step input r(t) = u(t), ramp input r(t) = t and acceleration input r(t) = (1/2)t^2

Duration: 30 Minutes Marks:14

Q.1 Choose the correct Answer. **14**

1) For selection of banks the bits used are _____.
a) PSW. 1 AND PSW. 0 b) PSW. 7 AND PSW. 6
c) PSW. 3 AND PSW. 4 d) SCON. 4 AND SCON. 3

2) Internal pull up resisters are not available for _____.
a) port 0 b) port 1
c) port 2 d) port 3

3) An alternate function of port pin P3.3 in 8051 microcontroller is _____.
a) Timer 0 b) Timer 1
c) Interrupt 0 d) Interrupt 1

4) Which pin of the LCD is used for adjusting its contrast?
a) pin no 1 b) pin no 2
c) pin no 3 d) pin no

5) Address lines are required for accessing the data if memory capacity is 4KB bytes.
a) 10 b) 11
c) 12 d) 13

6) MOVC A, @ A + PC is an example of _____ addressing mode.
a) Immediate b) Direct
c) Indexed d) None of these

7) ISR ends with _____.
a) END b) RET
c) RI,TI d) None

8) Number of steps to rotate stepper motor for 180 degree at a step angle of 1.8 degree is _____.

a) 200 b) 400
c) 100 d) 300

9) JC, JNC instructions checked content of _____register.

a) DPTR b) B
c) A d) PSW

10) In PIC 16F877 Port C and D are _____ & _____ bits wide respectively.

a) 6, 3 b) 3, 8
c) 8, 8 d) 6, 8

11) LM35 has how many pins?

a) 2 b) 1
c) 3 d) 4

12) What is the standard form of ARM?

a) Advanced RISC Machine
b) Automatic RISC Machine
c) Automatic RISC Motor
d) None of the above

13) PIC 16F877 A consists of _____ KB flash program memory.

a) 2 b) 4
c) 8 d) None of these

14) For writing commands on an LCD, RS bit is _____.

a) set b) reset
c) set & reset d) none of the mentioned

T. Y. (B.Tech.) (Sem-I) (New) (CBCS) Examination: March/April-2025
ELECTRICAL ENGINEERING
Advanced Microcontroller System (BTN07503)

Day & Date: Tuesday 20-05-2025 Max. Marks: 56
Time: 10:00 AM To 01:00 PM

Instructions: 1) All questions are compulsory.
2) Figures to the right indicate full marks.

Section – I

Q.2 Attempt the following. (Any Four) **16**

a) Compare between microprocessor and microcontroller.
b) Draw and explain TMOD SFR of 8051 microcontroller.
c) Explain with example the various addressing modes of 8051 microcontroller.
d) Explain any four Arithmetic instruction of 8051 microcontroller.
e) Write an ALP to perform multiplication of two 8-bit numbers stored at 20H and 21H memory location. Store result at 50H and 51H memory location.

Q.3 Attempt the following. (Any Two) **12**

a) Explain IE and IP SFR's related with interrupt in 8051 microcontroller.
b) Draw and explain internal memory Structure of RAM in 8051 microcontroller.
c) Explain following pins of 8051 microcontroller.
1) EA
2) PSEN
3) ALE
4) RESET

Section – II

Q.4 Attempt the following (Any Four). **16**

a) Explain the features of PIC 16F877.
b) Explain the architecture of ARM Processor.
c) Draw the interfacing diagram of LM35 with 8051 Microcontroller.
d) Draw and explain Status Register of PIC 16F877A.
e) Explain following pins of LCD.
1) RS
2) R/W
3) Enable
4) VEE

Q.5 Attempt the following (Any Two). **12**

a) Draw the interfacing diagram of 4KB data RAM with 8051 microcontroller also mention starting and ending addresses of interfaces memory.

b) Draw and explain interfacing diagram of 8051 microcontroller with ADC 0809.

c) Draw the interfacing diagram of stepper motor with 8051. Write an ALP to rotate the stepper motor one revolution in anticlockwise direction and then stop.

Day & Date: Tuesday 20-05-2025 Max. Marks: 70
Time: 10:00 AM To 01:00 PM

Instructions: 1) Q. No. 1 is compulsory. It should be solved in the first 30 minutes in Answer Book Page no 03 (Starting page of the Answer Book). Each question carries one mark.
2) Don't forget to Mention question paper set (P/Q/R/S) on top of page.
3) Figures to the right indicates full marks.

MCQ/Objective Type Questions

Duration: 30 Minutes Marks:14

Q.1 Choose the correct Answer. 14

1) Number of steps to rotate stepper motor for 180 degree at a step angle of 1.8 degree is _____.
a) 200 b) 400
c) 100 d) 300

2) JC, JNC instructions checked content of _____register.
a) DPTR b) B
c) A d) PSW

3) In PIC 16F877 Port C and D are _____ & _____ bits wide respectively.
a) 6, 3 b) 3, 8
c) 8, 8 d) 6, 8

4) LM35 has how many pins?
a) 2 b) 1
c) 3 d) 4

5) What is the standard form of ARM?
a) Advanced RISC Machine
b) Automatic RISC Machine
c) Automatic RISC Motor
d) None of the above

6) PIC 16F877 A consists of _____ KB flash program memory.
a) 2 b) 4
c) 8 d) None of these

7) For writing commands on an LCD, RS bit is _____.
a) set b) reset
c) set & reset d) none of the mentioned

8) For selection of banks the bits used are _____.
a) PSW. 1 AND PSW. 0 b) PSW. 7 AND PSW. 6
c) PSW. 3 AND PSW. 4 d) SCON. 4 AND SCON. 3

9) Internal pull up resisters are not available for _____.
a) port 0 b) port 1
c) port 2 d) port 3

10) An alternate function of port pin P3.3 in 8051 microcontroller is _____.
a) Timer 0 b) Timer 1
c) Interrupt 0 d) Interrupt 1

11) Which pin of the LCD is used for adjusting its contrast?
a) pin no 1 b) pin no 2
c) pin no 3 d) pin no

12) Address lines are required for accessing the data if memory capacity is 4KB bytes.
a) 10 b) 11
c) 12 d) 13

13) MOVC A, @ A + PC is an example of _____ addressing mode.
a) Immediate b) Direct
c) Indexed d) None of these

14) ISR ends with _____.
a) END b) RET
c) RI,TI d) None

MCQ/Objective Type Questions

Duration: 30 Minutes Marks:14

Q.1 Choose the correct Answer. **14**

1) Unit vector is having _____.
a) Direction with one magnitude
b) Magnitude is one but not direction
c) Not both magnitude and direction
d) None of above

2) The differential volume (dv) in cylindrical coordinate system is given by _____.
a) drdΦdz b) rdrdΦdz
c) rdrdΦ d) rdΦdz

3) The potential difference in an open circuit is _____.
a) Zero b) Unity
c) Infinity d) Circuit does not exist

4) To convert spherical coordinate into Cartesian 'x' coordinate, we have relation
a) $x = r \sin\theta \cos\varphi$ b) $x = r \sin\theta \sin\varphi$
c) $x = r \cos\theta \cos\varphi$ d) $x = \sin\theta \cos\varphi$

5) The relation between field intensity and potential is _____.
a) $E = \nabla V$ b) $E = -\nabla V$
c) $V = \nabla \times E$ d) $V = -(\nabla \times E)$

6) $A \times B$ is given as _____.
a) $A \cos\theta$ b) $AB \sin\theta \, an$
c) AB d) $AB \cos\theta \, an$

7) The electric field intensity is defined a _____.
a) Force per unit charge
b) Force on a test charge
c) Force per unit charge on a test charge
d) Product of force and charge

8) Coulomb law is employed in _____.
a) Electrostatics b) Magnetostatics
c) Electromagnetic d) Maxwell theory

9) The units of capacitance are _____.
a) volts/coulomb b) coulombs/volt
c) ohms d) henry/Wb

10) Capacitance increases with _____.
a) increase in plate area and decrease in distance between the plates
b) increase in plate area and-distance-between the plates
c) decrease in plate area and value of applied voltage
d) reduction in plate area and distance between the plates

11) Magnetic vector potential for volume current is expressed as ____.
a) $B = \nabla \times A$ b) $A = \nabla \times B$
c) $B = \nabla . A$ d) $A = \nabla . B$

12) $\nabla \times H = J$ is known as _____.
a) Maxwell's equation b) Ampere's law
c) Ohm's law d) Gauss's law

13) Lorentz force equation is _____.
a) $F = Q \times [E + V \times B]$ b) $F = Q[E + V \times B]$
c) $F = Q\,V + E \times B$ d) $F = Q[B + V \times E]$

14) The magnetic energy of a magnetic material is given by _____.
a) $BH/2$ b) $B/2H$
c) $H/2B$ d) B/H

Instructions: 1) All questions are compulsory.
2) Figures to the right indicate full marks.

Section – I

Q.2 Attempt Any Four **16**

a) If $\emptyset = 3x^2y - y^3z^2$ find the gradient of $\emptyset$ at point $(1, -2, 1)$

b) Derive the relation between E and V.

c) Derive continuity equation of a current.

d) Parallel plate capacitor has conducting plates of area 0.04m^2. The plates are separated by a dielectric material whose relative permittivity is 2 with plate separation of 1 cm.
Find:
i) Its capacitance
ii) Charge on plates if $V = 10V$.

e) Transform $A = 3a_x + 4a_y + 5a_z$ to spherical coordinate system at point. $(3,4,5)$

Q.3 Attempt Any Two. **12**

a) If $D = 4x^3a_x - 2ya_y + 2za_2$. Find total charge enclosed within the region $-1 \leq x, y, z \leq 1$.

b) State Gauss law with mathematical expression and it's any two applications in detail.

c) Three-point charges $Q_1 = 10^{-6}C, Q_2 = 10^{-6}C, Q_3 = 0.5 \times 10^{-6}C$, are located at corners of equilateral triangle of 50 cm side. Determine magnitude and direction of force on Q_3

Section – II

Q.4 Attempt Any Four **16**

a) A current filament of $3a_x$ lies along x axis. Find H component at $P\ (-1, 3, 2)$.

b) State and prove Ampere's circuital law in point form.

c) Explain vector magnetic potential.

d) Derive Maxwell's equation in point and integral form from Gauss law for static electric field.

e) Derive expression for force on a wire carrying a current.

Q.5 Attempt Any Two. **12**

a) Derive expression for boundary conditions in magnetic field.

b) Evaluate both sides of Stroke's theorem for the field $H = (y^2z/x)a_x + (0.5y^2z^2/x^2)az$ and find current in a_y direction crossing the square surface in the plane $y = 2$, bounded by $x = z = 1$ and $x = z = 2$.

c) Derive Magnetic field intensity due to finite length element.

a) drdΦdz b) rdrdΦdz
c) rdrdΦ d) rdΦdz

10) The potential difference in an open circuit is _____.
a) Zero b) Unity
c) Infinity d) Circuit does not exist

11) To convert spherical coordinate into Cartesian 'x' coordinate, we have relation
a) $x = r\sin\theta\cos\varphi$ b) $x = r\sin\theta\sin\varphi$
c) $x = r\cos\theta\cos\varphi$ d) $x = \sin\theta\cos\varphi$

12) The relation between field intensity and potential is _____.
a) $E = \nabla V$ b) $E = -\nabla V$
c) $V = \nabla \times E$ d) $V = -(\nabla \times E)$

13) $A \times B$ is given as _____.
a) $A\cos\theta$ b) $AB\sin\theta\, an$
c) AB d) $AB\cos\theta\, an$

14) The electric field intensity is defined a _____.
a) Force per unit charge
b) Force on a test charge
c) Force per unit charge on a test charge
d) Product of force and charge

Set Q

T. Y (B. Tech) (Sem-I) (New) (CBCS) Examination: March/April-2025
Electrical Engineering
Electromagnetic Engineering (BTN07504)

Day & Date: Wednesday 21-05-2025 Max. Marks: 56
Time: 10:00 AM To 01:00 PM

Instructions: 1) All questions are compulsory.
2) Figures to the right indicate full marks.

Section – I

Q.2 Attempt Any Four **16**

a) If $\emptyset = 3x^2y - y^3z^2$ find the gradient of $\emptyset$ at point $(1, -2, 1)$

b) Derive the relation between E and V.

c) Derive continuity equation of a current.

d) Parallel plate capacitor has conducting plates of area 0.04m^2. The plates are separated by a dielectric material whose relative permittivity is 2 with plate separation of 1 cm.
Find:
i) Its capacitance
ii) Charge on plates if $V = 10V$.

e) Transform $A = 3a_x + 4a_y + 5a_z$ to spherical coordinate system at point. $(3,4,5)$

Q.3 Attempt Any Two. **12**

a) If $D = 4x^3a_x - 2ya_y + 2za_2$. Find total charge enclosed within the region $-1 \leq x, y, z \leq 1$.

b) State Gauss law with mathematical expression and it's any two applications in detail.

c) Three-point charges $Q_1 = 10^{-6}C, Q_2 = 10^{-6}C, Q_3 = 0.5 \times 10^{-6}C$, are located at corners of equilateral triangle of 50 cm side. Determine magnitude and direction of force on Q_3

Section – II

Q.4 Attempt Any Four **16**

a) A current filament of $3a_x$ lies along x axis. Find H component at $P\ (-1, 3, 2)$.

b) State and prove Ampere's circuital law in point form.

c) Explain vector magnetic potential.

d) Derive Maxwell's equation in point and integral form from Gauss law for static electric field.

e) Derive expression for force on a wire carrying a current.

Q.5 Attempt Any Two. **12**

a) Derive expression for boundary conditions in magnetic field.

b) Evaluate both sides of Stroke's theorem for the field $H = (y^2z/x)a_x + (0.5y^2z^2/x^2)az$ and find current in a_y direction crossing the square surface in the plane $y = 2$, bounded by $x = z = 1$ and $x = z = 2$.

c) Derive Magnetic field intensity due to finite length element.

T. Y (B. Tech) (Sem-I) (New) (CBCS) Examination: March/April-2025
Electrical Engineering
Electromagnetic Engineering (BTN07504)

Day & Date: Wednesday 21-05-2025 Max. Marks: 70
Time: 10:00 AM To 01:00 PM

Instructions: 1) Q. No. 1 is compulsory. It should be solved in the first 30 minutes in Answer Book Page no 03 (Starting page of the Answer Book). Each question carries one mark.
2) Don't forget to Mention question paper set (P/Q/R/S) on top of page.
3) Figures to the right indicates full marks.

MCQ/Objective Type Questions

Duration: 30 Minutes Marks:14

Q.1 Choose the correct Answer. **14**

1) Magnetic vector potential for volume current is expressed as _____.
a) $B = \nabla \times A$ b) $A = \nabla \times B$
c) $B = \nabla . A$ d) $A = \nabla . B$

2) $\nabla \times H = J$ is known as _____.
a) Maxwell's equation b) Ampere's law
c) Ohm's law d) Gauss's law

3) Lorentz force equation is _____.
a) $F = Q \times [E + V \times B]$ b) $F = Q[E + V \times B]$
c) $F = Q\,V + E \times B$ d) $F = Q[B + V \times E]$

4) The magnetic energy of a magnetic material is given by _____.
a) $BH/2$ b) $B/2H$
c) $H/2B$ d) B/H

5) Unit vector is having _____.
a) Direction with one magnitude
b) Magnitude is one but not direction
c) Not both magnitude and direction
d) None of above

6) The differential volume (dv) in cylindrical coordinate system is given by _____.
a) drdΦdz b) rdrdΦdz
c) rdrdΦ d) rdΦdz

7) The potential difference in an open circuit is _____.
a) Zero b) Unity
c) Infinity d) Circuit does not exist

8) To convert spherical coordinate into Cartesian 'x' coordinate, we have relation

a) $x = r \sin\theta \cos\varphi$ b) $x = r \sin\theta \sin\varphi$

c) $x = r \cos\theta \cos\varphi$ d) $x = \sin\theta \cos\varphi$

9) The relation between field intensity and potential is _____.

a) $E = \nabla V$ b) $E = -\nabla V$

c) $V = \nabla \times E$ d) $V = -(\nabla \times E)$

10) $A \times B$ is given as _____.

a) $A \cos\theta$ b) $AB \sin\theta \, an$

c) AB d) $AB \cos\theta \, an$

11) The electric field intensity is defined a _____.

a) Force per unit charge
b) Force on a test charge
c) Force per unit charge on a test charge
d) Product of force and charge

12) Coulomb law is employed in _____.

a) Electrostatics b) Magnetostatics

c) Electromagnetic d) Maxwell theory

13) The units of capacitance are _____.

a) volts/coulomb b) coulombs/volt

c) ohms d) henry/Wb

14) Capacitance increases with _____.

a) increase in plate area and decrease in distance between the plates
b) increase in plate area and-distance-between the plates
c) decrease in plate area and value of applied voltage
d) reduction in plate area and distance between the plates

MCQ/Objective Type Questions

Duration: 30 Minutes Marks:14

Q.1 Choose the correct Answer. **14**

1) The dimension of the e-commerce that enables commerce across national boundaries called _____.
a) Interactivity b) global reach
c) Richness d) Ubiquity

2) The primary source of financing during the early years of e-commerce was _____.
a) bank loans b) large retail firms
c) venture capital funds d) initial public offerings

3) The largest component of a web site budget is _____.
a) system maintenance
b) system development
c) content design and development
d) telecommunications

4) A security plan begins with a(n) is _____.
a) security policy b) risk assessment
c) implementation plan d) security organization

5) Creating multiple versions of information goods & selling essentially the same product to different market segment at different prices is called _____.
a) Versioning b) Bundling
c) Transactive content d) price discrimination

6) What is an alternative name for a weak entity?
a) Dominant b) Owner
c) Child d) All of the above

7) Identify which of the following life cycle contains the phases: test case design, test execution, defect tracking, maintenance?

a) SDLC b) STLC
c) SQLC d) BCL

8) Identify the incorrect phase of STLC (Software Testing Life cycle).

a) Test closure b) Coding
c) Requirement analysis d) Test planning

9) Identify the simplest model of SDLC?

a) Agile b) RAD
c) Waterfall d) Spiral

10) One approach to developing a personal set of ethics is to _____.

a) rely solely on one's personal character to determine what action to take
b) stress the importance of rules
c) ignore problems associated with the magnitude of consequences
d) Avoid examining the consequences of particular

11) Which of the following statements describes ethics?

a) Ethics are standard of behavior by which conduct is judged
b) Morals are a foundation for ethical behavior
c) Ethical values are situation specific and time oriented.
d) All of the statements describe ethics

12) _____ is a program that serves as an interface between application program and a Set of coordinated and integrated files called a database.

a) DDS b) DBMS
c) MIS d) Control

13) In _____ system the interaction between various subsystems cannot be defined with certainty.

a) Open System b) Closed System
c) Deterministic System d) Probabilistic System

Information Technology & Management (BTN07512)

Day & Date: Thursday 22-05-2025 Max. Marks: 70
Time: 10:00 AM To 01:00 PM

Instructions: 1) Q. No. 1 is compulsory. It should be solved in the first 30 minutes in Answer Book Page no 03 (Starting page of the Answer Book). Each question carries one mark.
2) Don't forget to Mention question paper set (P/Q/R/S) on top of page.
3) Figures to the right indicates full marks.

MCQ/Objective Type Questions

Duration: 30 Minutes Marks:14

Q.1 Choose the correct Answer. **14**

1) What is an alternative name for a weak entity?
a) Dominant b) Owner
c) Child d) All of the above

2) Identify which of the following life cycle contains the phases: test case design, test execution, defect tracking, maintenance?
a) SDLC b) STLC
c) SQLC d) BCL

3) Identify the incorrect phase of STLC (Software Testing Life cycle).
a) Test closure b) Coding
c) Requirement analysis d) Test planning

4) Identify the simplest model of SDLC?
a) Agile b) RAD
c) Waterfall d) Spiral

5) One approach to developing a personal set of ethics is to _____.
a) rely solely on one's personal character to determine what action to take
b) stress the importance of rules
c) ignore problems associated with the magnitude of consequences
d) Avoid examining the consequences of particular

6) Which of the following statements describes ethics?
a) Ethics are standard of behavior by which conduct is judged
b) Morals are a foundation for ethical behavior
c) Ethical values are situation specific and time oriented.
d) All of the statements describe ethics

7) _____ is a program that serves as an interface between application program and a Set of coordinated and integrated files called a database.

a) DDS b) DBMS
c) MIS d) Control

8) In _____ system the interaction between various subsystems cannot be defined with certainty.

a) Open System b) Closed System
c) Deterministic System d) Probabilistic System

9) SDLC stands for _____.

a) System Development Life Cycle
b) Structure Design Life Cycle
c) System Design Life Cycle
d) Structure Development Life Cycle

10) The dimension of the e-commerce that enables commerce across national boundaries called _____.

a) Interactivity b) global reach
c) Richness d) Ubiquity

11) The primary source of financing during the early years of e-commerce was _____.

a) bank loans b) large retail firms
c) venture capital funds d) initial public offerings

12) The largest component of a web site budget is _____.

a) system maintenance
b) system development
c) content design and development
d) telecommunications

13) A security plan begins with a(n) is _____.

a) security policy b) risk assessment
c) implementation plan d) security organization

14) Creating multiple versions of information goods & selling essentially the same product to different market segment at different prices is called _____.

a) Versioning b) Bundling
c) Transactive content d) price discrimination

Q.1 Choose the correct alternatives from the options. 14

1) "Capitalism" refers to: ____
a) the use of markets
b) government ownership of capital goods
c) private ownership of capital goods
d) private ownership of homes & cars

2) Macroeconomics deals with: ____
a) The behavior of firms
b) Economic aggregates
c) The activities of individual units
d) The behavior of the electronics industry

3) The study of inflation is part of: ____
a) Normative economics b) Macroeconomics
c) Microeconomics d) Descriptive economics

4) Which of the following is a determinant of demand?
a) the price of a substitute good
b) the price of a complement good
c) the price of the good next month
d) all of the above

5) The demand curve for a normal good shifts leftward if income ____or the expected future price ____.
a) decreases; falls b) increases; rises
c) increases; falls d) decreases; rises

6) A surplus occurs when the price is ____.
a) equal to the equilibrium price
b) greater than the equilibrium price
c) less than the equilibrium price
d) None of the above

7) If two goods are complements, then ____
a) the cross-price elasticity of demand will be negative
b) the cross-price elasticity of demand will be zero
c) the cross-price elasticity of demand will be positive
d) an increase in the price of one good will increase demand for the other

8) The price elasticity of demand equals ____.
a) the percentage change in the quantity demanded divided by the percentage change in the price
b) the change in the quantity demanded divided by the change in price
c) the percentage change in the price divided by the percentage change in the quantity demanded
d) the change in the price divided by the change in quantity demanded

9) Constraints in an LP model represents ____.
a) Limitations
b) Requirements
c) balancing, limitations and requirements
d) all of the above

10) The linear function of the variables which is to be maximize or minimize is called ____.
a) Constraints b) Objective function
c) Decision variable d) None of the above

11) Using equation method, Break-even point is calculated as ____
a) Sales = Variable expenses + Fixed expenses + Profit
b) Sales = Variable expenses + Fixed expenses – Profit
c) Sales = Variable expenses - Fixed expenses + Profit
d) None of the above

12) Profit-Volume ratio is also known as ____
a) Contribution ratio b) Contribution/Sales ratio
c) Marginal Income percentage d) All of the above

13) Which of the following best describes an oligopoly?
a) many monopolistically competitive firms
b) a few firms sharing monopoly power
c) a former monopoly that has been broken up by the government
d) a government-granted franchise or monopoly

14) Marginal revenue is equal to price for which one of the following types of market structure?

a) Monopoly
b) Perfect competition

a) Explain economics contribution to managerial decision.
b) Explain cardinal and ordinal approach of consumer behavior.
c) Explain elasticities for nonlinear demand functions.

SECTION-II

Q.4 Answer the following questions. (Any Four) **16**

a) Explain Trend projection method for demand forecasting.
b) Explain Barometric Method for demand forecasting.
c) Explain the impact of linear cost and revenue functions on breakeven analysis.
d) Explain the concept profit margin of safety.
e) Explain the concept demand side of market.
f) Explain the degree of competition in market.

Q.5 Answer the following questions. (Any Two) **12**

a) State and explain the applications of Linear Programming Techniques.
b) Explain Market Structure. Also state the objectives of market structure.
c) Explain following costs of production:
1) Fixed and Variable Costs
2) Total, Average, and Marginal Costs
3) Short-Run and Long-Run Costs

Seat No.

Set Q

T. Y. (B. Tech) (Sem-I) (New) (CBCS) Examination: March/April-2025
ELECTRICAL ENGINEERING
Managerial Economics (BTN07515)

Day & Date: Thursday 22-05-2025 Max. Marks: 70
Time: 10:00 AM To 01:00 PM

Instructions: 1) Q. No. 1 is compulsory. It should be solved in the first 30 minutes in Answer Book Page no 03 (Starting page of the Answer Book). Each question carries one mark.
2) Don't forget to Mention question paper set (P/Q/R/S) on top of page.
3) Figures to the right indicates full marks.
4) Make suitable assumptions (if necessary and state them clearly).

MCQ/Objective Type Questions

Duration: 30 Minutes Marks:14

Q.1 Choose the correct alternatives from the options. 14

1) The price elasticity of demand equals ____.
a) the percentage change in the quantity demanded divided by the percentage change in the price
b) the change in the quantity demanded divided by the change in price
c) the percentage change in the price divided by the percentage change in the quantity demanded
d) the change in the price divided by the change in quantity demanded

2) Constraints in an LP model represents ____.
a) Limitations
b) Requirements
c) balancing, limitations and requirements
d) all of the above

3) The linear function of the variables which is to be maximize or minimize is called ____.
a) Constraints b) Objective function
c) Decision variable d) None of the above

4) Using equation method, Break-even point is calculated as ____
a) Sales = Variable expenses + Fixed expenses + Profit
b) Sales = Variable expenses + Fixed expenses – Profit
c) Sales = Variable expenses - Fixed expenses + Profit
d) None of the above

5) Profit-Volume ratio is also known as ____
a) Contribution ratio b) Contribution/Sales ratio
c) Marginal Income percentage d) All of the above

6) Which of the following best describes an oligopoly?
a) many monopolistically competitive firms
b) a few firms sharing monopoly power
c) a former monopoly that has been broken up by the government
d) a government-granted franchise or monopoly

7) Marginal revenue is equal to price for which one of the following types of market structure?
a) Monopoly b) Perfect competition
c) Monopolistic competition d) Oligopoly

8) "Capitalism" refers to: ____
a) the use of markets
b) government ownership of capital goods
c) private ownership of capital goods
d) private ownership of homes & cars

9) Macroeconomics deals with: ____
a) The behavior of firms
b) Economic aggregates
c) The activities of individual units
d) The behavior of the electronics industry

10) The study of inflation is part of: ____
a) Normative economics b) Macroeconomics
c) Microeconomics d) Descriptive economics

11) Which of the following is a determinant of demand?
a) the price of a substitute good
b) the price of a complement good
c) the price of the good next month
d) all of the above

12) The demand curve for a normal good shifts leftward if income ____or the expected future price ____.
a) decreases; falls b) increases; rises
c) increases; falls d) decreases; rises

13) A surplus occurs when the price is ____.
a) equal to the equilibrium price
b) greater than the equilibrium price
c) less than the equilibrium price
d) None of the above

14) If two goods are complements, then ____

a) the cross-price elasticity of demand will be negative
b) the cross-price elasticity of demand will be zero
c) the cross-price elasticity of demand will be positive
d) an increase in the price of one good will increase demand for the other

Seat No.	

Set **Q**

T. Y. (B. Tech) (Sem-I) (New) (CBCS) Examination: March/April-2025
ELECTRICAL ENGINEERING
Managerial Economics (BTN07515)

Day & Date: Thursday 22-05-2025 Max. Marks: 56
Time: 10:00 AM To 01:00 PM

Instructions: 1) All questions are compulsory.
2) Figures to the right indicate full marks.
3) Make suitable assumptions (if necessary and state them clearly).

SECTION-I

Q.2 Answer the following questions. (Any Four) **16**

a) Explain scope of managerial economics for business decision.
b) State the difference between Microeconomics and Macroeconomics.
c) Explain measuring values of market exchange.
d) State and explain the determinants of demand.
e) Explain price elasticity of demand.
f) Explain the concept cross price elasticity.

Q.3 Answer the following questions. (Any Two) **12**

a) Explain economics contribution to managerial decision.
b) Explain cardinal and ordinal approach of consumer behavior.
c) Explain elasticities for nonlinear demand functions.

SECTION-II

Q.4 Answer the following questions. (Any Four) **16**

a) Explain Trend projection method for demand forecasting.
b) Explain Barometric Method for demand forecasting.
c) Explain the impact of linear cost and revenue functions on breakeven analysis.
d) Explain the concept profit margin of safety.
e) Explain the concept demand side of market.
f) Explain the degree of competition in market.

Q.5 Answer the following questions. (Any Two) **12**

a) State and explain the applications of Linear Programming Techniques.
b) Explain Market Structure. Also state the objectives of market structure.
c) Explain following costs of production:
1) Fixed and Variable Costs
2) Total, Average, and Marginal Costs
3) Short-Run and Long-Run Costs

Seat No.

2) Don't forget to Mention question paper set (P/Q/R/S) on top of page.
3) Assume suitable data if necessary.

MCQ/Objective Type Questions

Duration: 30 Minutes Marks:14

Q.1 Choose the correct alternative from the options. 14

1) Which of the following smart grid components is responsible for monitoring things such as electric current and voltage, among other things?
a) IT operations b) Control systems & sensors
c) Analytic software d) Communications

2) Which of the following best describes the smart grid's analytic software's responsibilities?
a) It monitors a smart grid's current voltage.
b) It is tasked with preventing malware from infecting the smart grid.
c) It analyzes the electricity to ensure it is coming from renewable resources.
d) It analyzes the power grid's processes and can automate.

3) Alternate Mark Inversion (AMI) is also known as _____
a) Pseudo ternary coding b) Manchester coding
c) Polar NRZ format d) None of the above

4) In Alternate Mark Inversion (AMI) _____
a) 0 is encoded as positive pulse and 1 is encoded as negative pulse
b) 0 is encoded as no pulse and 1 is encoded as negative pulse
c) 0 is encoded as negative pulse and 1 is encoded as positive pulse
d) 0 is encoded as no pulse and 1 is encoded as positive or negative pulse

5) Advantages of using AMI _____
a) Needs least power as due to opposite polarity
b) prevents build-up of DC
c) may be used for longer distance
d) all of the above

6) Which of the following AMI components is the collection of networks in which the entire infrastructure is built on?

a) The collector b) Smart meters
c) The communication channel d) Head-end system

7) In Alternate Mark Inversion (AMI) _____

a) 0 is encoded as positive pulse and 1 is encoded as negative pulse
b) 0 is encoded as no pulse and 1 is encoded as negative pulse
c) 0 is encoded as negative pulse and 1 is encoded as positive pulse
d) 0 is encoded as no pulse and 1 is encoded as positive or negative pulse

8) Advantages of using AMI _____

a) Needs least power as due to opposite polarity
b) prevents build-up of DC
c) may be used for longer distance
d) all of the above

9) The interference caused by the adjacent pulses in digital transmission is called _____

a) Inter symbol interference b) White noise
c) Image frequency interference d) Transit time noise

10) Eye pattern _____

a) is used to study ISI
b) may be seen on CRO
c) resembles the shape of human eye
d) All of the above

11) The time interval over which the received signal may be sampled without error may be explained by _____

a) Width of eye opening of eye pattern
b) Rate of closure of eye of eye pattern
c) Height of the eye opening of eye pattern
d) All of the above

12) For a noise to be white Gaussian noise, the optimum filter is known as:

a) Low pass filter b) Base band filter
c) Matched filter d) Bessel filter

13) Matched filters are used _____

a) For maximizing signal to noise ratio
b) For signal detection
c) In radar
d) All of the above

14) The number of bits of data transmitted per second is called _____

a) Data signaling rate b) Modulation rate
c) Coding d) None of the above

a) 0 is encoded as positive pulse and 1 is encoded as negative pulse
b) 0 is encoded as no pulse and 1 is encoded as negative pulse
c) 0 is encoded as negative pulse and 1 is encoded as positive pulse
d) 0 is encoded as no pulse and 1 is encoded as positive or negative pulse

12) Advantages of using AMI _____
a) Needs least power as due to opposite polarity
b) prevents build-up of DC
c) may be used for longer distance
d) all of the above

13) The interference caused by the adjacent pulses in digital transmission is called _____
a) Inter symbol interference b) White noise
c) Image frequency interference d) Transit time noise

14) Eye pattern _____
a) is used to study ISI
b) may be seen on CRO
c) resembles the shape of human eye
d) All of the above

T. Y (B.Tech.) (Sem-I) (New) (CBCS) Examination: March/April-2025
ELECTRICAL ENGINEERING
Smart Energy Management System (BTN07516)

Day & Date: Friday 23-05-2025 Max. Marks: 56
Time: 10:00 AM To 01:00 PM

Instructions: 1) All questions are compulsory.
2) Figures to right indicates full marks.
3) Assume the suitable data whenever necessary.

Section – I

Q.2 Solve any four: **16**

a) Explain how the automatic meter reading can make the system smarter.
b) List the smart appliances and describe an integration of smart appliances into grid for home and building automation.
c) Explain outage management system
d) Explain IED application for monitoring and protection.
e) Explain phase measuring unit.

Q.3 Solve any two **12**

a) Explain wide area measurement system.
b) Compare micro grid and smart grid.
c) Describe the power quality issues of grid connected renewable energy sources.

Section – II

Q.4 Solve any four **16**

a) Explain about power quality Audit and its applications.
b) Draw the flow chart of procedure for monitoring power quality and issues of power quality monitoring.
c) Explain the importance of power quality in smart grid.
d) What is the impact of smart grid component integration on distribution network operation?
e) Write a short note on need of Smart grid Management system.

Q.5 Solve any two **12**

a) Explain the IP based protocols.
b) Explain about power quality control technologies.
c) Write the application of DSO.

Smart Energy Management System (BTN07516)

Day & Date: Friday 23-05-2025 Max. Marks: 70
Time: 10:00 AM To 01:00 PM

Instructions: 1) Q. No. 1 is compulsory. It should be solved in the first 30 minutes in Answer Book Page no 03 (Starting page of the Answer Book). Each question carries one mark.
2) Don't forget to Mention question paper set (P/Q/R/S) on top of page.
3) Assume suitable data if necessary.

MCQ/Objective Type Questions

Duration: 30 Minutes Marks:14

Q.1 Choose the correct alternative from the options. 14

1) Which of the following AMI components is the collection of networks in which the entire infrastructure is built on?
a) The collector b) Smart meters
c) The communication channel d) Head-end system

2) In Alternate Mark Inversion (AMI) _____
a) 0 is encoded as positive pulse and 1 is encoded as negative pulse
b) 0 is encoded as no pulse and 1 is encoded as negative pulse
c) 0 is encoded as negative pulse and 1 is encoded as positive pulse
d) 0 is encoded as no pulse and 1 is encoded as positive or negative pulse

3) Advantages of using AMI _____
a) Needs least power as due to opposite polarity
b) prevents build-up of DC
c) may be used for longer distance
d) all of the above

4) The interference caused by the adjacent pulses in digital transmission is called _____
a) Inter symbol interference b) White noise
c) Image frequency interference d) Transit time noise

5) Eye pattern _____
a) is used to study ISI
b) may be seen on CRO
c) resembles the shape of human eye
d) All of the above

6) The time interval over which the received signal may be sampled without error may be explained by _____
   a) Width of eye opening of eye pattern
   b) Rate of closure of eye of eye pattern
   c) Height of the eye opening of eye pattern
   d) All of the above

7) For a noise to be white Gaussian noise, the optimum filter is known as:
   a) Low pass filter b) Base band filter
   c) Matched filter d) Bessel filter

8) Matched filters are used _____
   a) For maximizing signal to noise ratio
   b) For signal detection
   c) In radar
   d) All of the above

9) The number of bits of data transmitted per second is called _____
   a) Data signaling rate b) Modulation rate
   c) Coding d) None of the above

10) Which of the following smart grid components is responsible for monitoring things such as electric current and voltage, among other things?
   a) IT operations b) Control systems & sensors
   c) Analytic software d) Communications

11) Which of the following best describes the smart grid's analytic software's responsibilities?
   a) It monitors a smart grid's current voltage.
   b) It is tasked with preventing malware from infecting the smart grid.
   c) It analyzes the electricity to ensure it is coming from renewable resources.
   d) It analyzes the power grid's processes and can automate.

12) Alternate Mark Inversion (AMI) is also known as _____
   a) Pseudo ternary coding b) Manchester coding
   c) Polar NRZ format d) None of the above

13) In Alternate Mark Inversion (AMI) _____
   a) 0 is encoded as positive pulse and 1 is encoded as negative pulse
   b) 0 is encoded as no pulse and 1 is encoded as negative pulse
   c) 0 is encoded as negative pulse and 1 is encoded as positive pulse
   d) 0 is encoded as no pulse and 1 is encoded as positive or negative pulse

14) Advantages of using AMI _____
   a) Needs least power as due to opposite polarity
   b) prevents build-up of DC
   c) may be used for longer distance

MCQ/Objective Type Questions

Duration: 30 Minutes Marks:14

Q.1 Choose the correct Answer. **14**

1) In an AC voltage controller-fed induction motor drive, what type of load is suitable for smooth operation?
a) Constant torque load b) Variable torque load
c) Constant power load d) Constant current load

2) What is the primary principle of operation of a Switched Reluctance Motor (SRM)?
a) Electromagnetic indication b) Permanent magnet interaction
c) Reluctance variation d) Voltage regulation

3) What is the role of Hall effect sensors in a Brushless DC motor?
a) Generate magnetic field
b) Commutate the motor
c) Provide mechanical output
d) Convert electrical energy to mechanical energy

4) In a parallel hybrid electric drivetrain, how are the internal combustion engine and the electric connected to the wheels?
a) Directly
b) Through a mechanical transmission
c) Via a generator charging the battery
d) Through a power-split device

5) In a chopper-fed DC drive, what is the function of the chopper?
a) Convert DC to AC b) Regulate DC voltage
c) Control DC current d) Generate PWM signals

6) Which type of slip recovery scheme adjusts the rotor resistance to control slip?
a) V/f control b) Slip power recovery control
c) Rotor resistance control d) Flux control

7) Which of the following statement is true about the speed control of a three-phase rectifier-fed DC drive?
a) Speed control is achieved by varying the armature resistance
b) Speed control is achieved by varying the field resistance
c) Speed control is achieved by adjusting the rectifier firing angle
d) Speed control is fixed and cannot be adjusted

8) Which of the following control loops used by Direct torque control _____.
a) Speed control loop b) torque control loop
c) both a & b d) none of the above

9) The Field Oriented Control (FOC) enables the induction machine being controlled alike the _____
a) separately excited DC Machine
b) Permanent magnet DC Machine
c) Switched reluctance machine
d) Stepper motor

10) The principle of vector control of electrical drives is based on _____.
a) only the control of the magnitude of each phase current and voltage.
b) the control of both the magnitude and the phase of each phase current and voltage.
c) only the control of the phase of each phase current and voltage
d) none of the above

11) _____ control gives a motor the capability to act as a generator while in operation.
a) Parallel mode b) Power Split mode
c) Engine brake mode d) Regenerative mode

12) Power split mode of hybrid electric vehicle control uses _____
a) Series & Parallel control topology
b) Only Series control topology
c) Only Parallel control topology
d) None of the above

13) _____ is a technique that allows you to instantaneously control the motor magnetic flux and its electromagnetic torque in a decoupled way.
a) Scalar Control b) Vector Control
c) Direct Torque Control d) none of the above

14) _____ method relies on keeping V/f ratio constant so as to maintain air gap flux at constant value.
a) Scalar Control b) Vector Control above
c) Torque Control d) None of these

Instructions: 1) All questions are Compulsory.
2) Figures to the right indicate full marks.
3) Assume suitable data if necessary.

Section – I

Q.2 Attempt any four of the following. **16**

a) Explain with block diagram components of hybrid electric vehicle.
b) State and explain different characteristics of dc series motor applicable for traction purpose.
c) Explain in closed loop control with cyclo converter based Induction Motor drives.
d) Explain the need of slip recovery in slip ring induction drive. Explain Static Scherbius scheme of control.
e) Explain with neat sketch the operation of three phase CSI fed induction motor drive.
f) With neat diagram explain half wave-controlled rectifier fed dc series motor.

Q.3 Attempt any two of the following. **12**

a) Explain power flow in Hybrid electric drive train system with different modes.
b) What is meant by time ratio control and frequency modulation control in case of dc-dc converter?
c) Define ac voltage controller and explain the method of single & three phase stator voltage control of Induction motor drive.

Section – II

Q.4 Attempt any four of the following. **16**

a) Explain in detail indirect vector control of induction machine.
b) Explain in detail dc drive analogy of field-oriented control of Induction Machine.
c) Explain power split mode of control of electric vehicle.
d) Explain the operation of V/f method of controlling the speed of three phase induction motor.
e) Explain the method of reduction in torque ripple in torque control of induction motor.
f) Describe space vector modulation control in case of induction machine.

Q.5 Attempt any two of the following. **12**

a) Why vehicle supervisory control is required for hybrid electric vehicle (HEV)? Explain different control strategy mode of HEV.

b) Explain with block diagram, theory and principle of Direct vector control of induction motor.

c) Explain with block diagram Direct Torque Control strategy of induction machine.

d) Explain different mode selection strategy for control of electric vehicles.

f) With neat diagram explain half wave-controlled rectifier fed dc series motor.

Q.3 Attempt any two of the following. **12**

a) Explain power flow in Hybrid electric drive train system with different modes.
b) What is meant by time ratio control and frequency modulation control in case of dc-dc converter?
c) Define ac voltage controller and explain the method of single & three phase stator voltage control of Induction motor drive.

Section – II

Q.4 Attempt any four of the following. **16**

a) Explain in detail indirect vector control of induction machine.
b) Explain in detail dc drive analogy of field-oriented control of Induction Machine.
c) Explain power split mode of control of electric vehicle.
d) Explain the operation of V/f method of controlling the speed of three phase induction motor.
e) Explain the method of reduction in torque ripple in torque control of induction motor.
f) Describe space vector modulation control in case of induction machine.

Q.5 Attempt any two of the following. **12**

a) Why vehicle supervisory control is required for hybrid electric vehicle (HEV)? Explain different control strategy mode of HEV.

b) Explain with block diagram, theory and principle of Direct vector control of induction motor.

c) Explain with block diagram Direct Torque Control strategy of induction machine.

d) Explain different mode selection strategy for control of electric vehicles.

T. Y. (B.Tech.) (Sem - I) (New) (CBCS) Examination: March/April – 2025
ELECTRICAL ENGINEERING
Economics (BTN07506)

Day & Date: Sunday, 25-05-2025 Max. Marks: 50
Time: 10:00 AM To 12:00 PM

Instructions: 1) Q. No. 1 is compulsory. It should be solved in the first 20 minutes in answer book Page no 03 (Starting page of the Answer Book). Each question carries one mark.
2) Don't forget to Mention question paper set (P/Q/R/S) on top of page.
3) Figures to the right indicates full marks.
4) Assume suitable data if required and state it clearly.

MCQ/Objective Type Questions

Duration: 20 Minutes Marks: 10

Q.1 Choose the correct alternatives from the options. 10

1) Which of the following market structures has a predominant feature of price leadership?
a) Perfectly competitive b) Monopoly
c) Oligopoly d) Monopolistic

2) Average revenue is _____
a) Total revenue divided by the number of units sold
b) Revenue earned by all the units of the output
c) Revenue earned by the average sized firm in the industry
d) Net addition made to the total revenue by selling one more unit of a commodity

3) Which of these is an economic activity?
a) Father teaching his son at home instead of spending on coaching
b) A housewife making food for the family on her own
c) A hair dresser doing hair cut designing on payment
d) A singer giving a show on his son's wedding anniversary

4) Which of the following is NOT an account in the Balance of Payments?
a) Current Account b) Capital Account
c) Financial Account d) Future Account

5) Which of the following is not a regulatory institution in Indian financial system?
a) RBI b) CIBIL
c) SEBI d) IRDA

6) In a mixed economy which sector (s) is 1 are found _____

a) Private only
b) Public only
c) None
d) Both (a) Private and (b)Public

7) Who is known as father of economics?

a) Adam Smith
b) Prof. A. Samulson
c) Alfred Marshall
d) J. R. Hicks

8) Micro and Macro are not two independent approaches to economic analysis but they are complementary to each other.

a) False
b) True
c) Partly true
d) Partly False

9) Which one of the following is not the function of money?

a) Medium of exchange
b) Measure of Happiness
c) Standard of deferred payment
d) Store of value

10) Which one of the following cost can never become zero?

a) Average cost
b) Fixed cost
c) Marginal cost
d) Variable cost

c) Morality
d) Beliefs, values, and morals

5) The objectives of professional ethics in engineering are _____.
a) To understand the moral values that ought to guide the Engineering profession
b) To resolve the moral issues in the profession, and
c) To justify the moral judgment concerning the profession
d) All the above

6) The main core human values are _____.

a) Right conduct b) Peace
c) Both a & b d) None of these

7) Preconditioning is ____.

a) Assuming without knowing b) Knowing without assuming
c) Only assuming d) Only knowing

8) Value education deals with ____.

a) What is universally valuable to all of us
b) What is conductive to our individual and collective of us
c) Enables to be in harmony with ourselves, other and rest of nature
d) All of the above

9) Courage is the tendency to accept and face ____.

a) Self-confidence
b) Risks and difficult tasks in rational ways
c) Physical courage
d) Social courage

10) Human life is lived at four levels individuals, family, society and ____.

a) Nature b) Nurture
c) World d) Universe

ELECTRICAL ENGINEERING
Professional Ethics and Human Value (BTN07510)

Day & Date: Sunday, 25-05-2025 Max. Marks: 50
Time: 10:00 AM To 12:00 PM

Instructions:1) Q. No. 1 is compulsory. It should be solved in the first 20 minutes in answer bookPage no 03 (Starting page of the Answer Book). Each question carries one mark.
2) Don't forget to Mention question paper set (P/Q/R/S) on top of page.
3) Figures to the right indicates full marks.
4) Assume suitable data wherever needed & mention it clearly.

MCQ/Objective Type Questions

Duration: 20 Minutes Marks:10

Q.1 Choose amongst the alternatives. 10

1) The main core human values are _____.
a) Right conduct b) Peace
c) Both a & b d) None of these

2) Preconditioning is ____.
a) Assuming without knowing b) Knowing without assuming
c) Only assuming d) Only knowing

3) Value education deals with ____.
a) What is universally valuable to all of us
b) What is conductive to our individual and collective of us
c) Enables to be in harmony with ourselves, other and rest of nature
d) All of the above

4) Courage is the tendency to accept and face ____.
a) Self-confidence
b) Risks and difficult tasks in rational ways
c) Physical courage
d) Social courage

5) Human life is lived at four levels individuals, family, society and ____.
a) Nature b) Nurture
c) World d) Universe

6) Ethics is the word that refers to _____.
a) Human tendency b) Morals, values, and beliefs
c) Only Values d) Psychology

7) Word ethichs is definded as a _____
   a) Motivation
   b) Set of attitudes concerned with the value of work
   c) Attitude
   d) Values

8) _____ is defined as the duty, obligation or even authority.
   a) Work
   b) Responsibility
   c) Democracy
   d) Authority

9) The study on ethics helps to know the people's _____.
   a) Learn good or bad things
   b) Copyright
   c) Morality
   d) Beliefs, values, and morals

10) The objectives of professional ethics in engineering are _____.
   a) To understand the moral values that ought to guide the Engineering profession
   b) To resolve the moral issues in the profession, and

MCQ/Objective Type Questions

Duration: 30 Minutes Marks:14

Q.1 Choose the correct alternatives from the options. 14

1) Laminations of core are generally made of _____.
a) case iron b) carbon
c) silicon steel d) stainless steel

2) The major consideration to develop a good design is _____.
a) Durability
b) Cost
c) Compliance with performance criteria as laid down in specifications
d) All of the above

3) The main areas of design are _____.
a) Magnetic circuit b) Electrical circuit
c) Installation d) All of the above

4) Hot rolled sheets have _____ permeability.
a) Zero b) Low
c) Unity d) Hight

5) What does the window space factor depend on?
a) it depends on the core
b) it depends on the armature
c) it depends on the insulation
d) it depends on the insulation and copper

6) Power transformers are designed to have maximum efficiency at _____.
a) Full load b) 50% load
c) 80% load d) no load

7) The value of flux involved in the emf equation of a transformer is _____.
a) rms value b) Average Value
c) Maximum value d) Instantaneous value

8) In a dc machine the peripheral speed should not exceed _____.
a) 15m/s b) 30m/s
c) 50m/s d) 60m/s

9) In a dc machine the diameter of an armature is governed by _____.
a) Pole pitch b) peripheral speed
c) core length d) Both (a) and (b)

10) The speed of synchronous Machine _____.
a) Increase with increase in load
b) Decrease with increase in load
c) Always remains constant
d) Varies with power factor

11) Synchronous motors are generally not self-starting because _____.
a) the direction of rotation is not fixed
b) the direction of instantaneous torque reverses after half cycle
c) starters cannot be used on these machines
d) starting winding is not provided on the machines

12) Slip rings are usually made of _____.
a) Copper b) Carbon
c) Phosphor bronze d) Aluminium

13) Iron losses in a D.C. machine are independent of variations in _____.
a) speed b) load
c) voltage d) speed and voltage

14) What does the insulation and copper of the transformer depend on?
a) current rating
b) voltage rating
c) output power
d) voltage rating and output power

Seat No.	

Set **P**

T.Y (B. Tech) (Sem-II) (New) (CBCS) Examination: March/April-2025
ELECTRICALS ENGINEERING
Electrical Machine Design (BTN07601)

Day & Date: Tuesday 27-05-2025 Max. Marks: 56
Time: 10:00 AM To 01:00 PM

Instructions: 1) All questions are compulsory.
2) Figures to the right indicate full marks.
3) Make suitable assumptions if necessary and state them clearly.

Section – I

Q.2 Attempt any four. **16**

a) Derive the expression for output equation for single phase core type transformer.

b) Define:
i) Window Space Factor
ii) Stacking Factor

c) Explain the factors those affect size of rotating electrical machines.

d) Calculate the number of turns and the cross section of a conductor for a 100kva, 11000/400volts, 50hz, single phase core type transformer use 1.6A/mm^2 as current density, 0.070 wb as flux.

e) The ratio of the flux in weber to full load mmf in a 400KVA, 50hz, 1 phase core type transformer is $2.4x10^{-6}$ calculate the net iron area and window area of transformer, maximum flux density in the core is 1.3 wb/m^2, current density 2.7A/mm^2 window space factor is 0.26 also calculate the full load mmf.

Q.3 Attempt any Two. **12**

a) Explain in details how number of poles are selected in DC machine.

b) What are the different method of cooling in transformer. Explain with diagram.

c) Find the suitable number of poles and diameter of core of 400kw, 550V, 180 rpm dc generator having 92% efficiency. Assume an average flux density in the air gap of about 0.6wb/m^2 and ampere per metres to be 35000.

Section – II

Q.4 Attempt any four. **16**

a) Derive the output equation of three phase induction motor.

b) Explain the choice of specific magnetic loading for synchronous machine.

c) Discuss the effect of air gap length of 3 phase induction motor on following factor.

i) Power Factor
ii) Overload Capacity
iii) Pulsation loss and noise

d) A 15HP, 400V, 1430rpm, 3 phase induction motor with an efficiency of 80% and PF 81% has inner diameter of stator 30cm and length 12cm. Estimate the diameter and length for a 50HP, 406V, 4pole, 50Hz induction motor to be designed for 84% efficiency and 85% power factor assuming same specific loadings as the previous motor.

e) Find the main dimension of a 100MVA, 11KV, 50HZ, 40 pole salient pole generator, assuming air gap flux density as 0.65wb/m^2 and ampere conductor as 40,000 per metre the peripheral speed should not exceed 60 m/sec assume kw = 0.955.

Q.5 Attempt any Two. **12**

a) Derive an expression for output equation of turbo alternator.

b) In the design of a 30HP, 3 phase, 440V, 960RPM, 50HZ delta connected induction motor, assume the specific electric loading of 25000ac/m, specific magnetic loading of 0.46wb/m^2 full load efficiency 86%, pf 0.87 and estimate the following:

i) Stator Core Dimensions
ii) Number of stator slots and winding turns

c) Calculate the length of air gap of a 15kw, 400V, 50HZ, delta connected 1440 rpm induction motor having both full efficiency and pf as 0.88 each Assume Bav = 0.45 Tesla, ac = 23000 amp cond/m, ratio of core length to pole pitch = 0.85, Assume kw = 0.966.

T.Y (B. Tech) (Sem-II) (New) (CBCS) Examination: March/April-2025
ELECTRICALS ENGINEERING
Electrical Machine Design (BTN07601)

Day & Date: Tuesday 27-05-2025 Max. Marks: 56
Time: 10:00 AM To 01:00 PM

Instructions: 1) All questions are compulsory.
2) Figures to the right indicate full marks.
3) Make suitable assumptions if necessary and state them clearly.

Section – I

Q.2 Attempt any four. **16**

a) Derive the expression for output equation for single phase core type transformer.

b) Define:
i) Window Space Factor
ii) Stacking Factor

c) Explain the factors those affect size of rotating electrical machines.

d) Calculate the number of turns and the cross section of a conductor for a 100kva, 11000/400volts, 50hz, single phase core type transformer use 1.6A/mm^2 as current density, 0.070 wb as flux.

e) The ratio of the flux in weber to full load mmf in a 400KVA, 50hz, 1 phase core type transformer is $2.4x10^{-6}$ calculate the net iron area and window area of transformer, maximum flux density in the core is 1.3 wb/m^2, current density 2.7A/mm^2 window space factor is 0.26 also calculate the full load mmf.

Q.3 Attempt any Two. **12**

a) Explain in details how number of poles are selected in DC machine.

b) What are the different method of cooling in transformer. Explain with diagram.

c) Find the suitable number of poles and diameter of core of 400kw, 550V, 180 rpm dc generator having 92% efficiency. Assume an average flux density in the air gap of about 0.6wb/m^2 and ampere per metres to be 35000.

Section – II

Q.4 Attempt any four. **16**

a) Derive the output equation of three phase induction motor.

b) Explain the choice of specific magnetic loading for synchronous machine.

c) Discuss the effect of air gap length of 3 phase induction motor on following factor.

i) Power Factor
ii) Overload Capacity
iii) Pulsation loss and noise

d) A 15HP, 400V, 1430rpm, 3 phase induction motor with an efficiency of 80% and PF 81% has inner diameter of stator 30cm and length 12cm. Estimate the diameter and length for a 50HP, 406V, 4pole, 50Hz induction motor to be designed for 84% efficiency and 85% power factor assuming same specific loadings as the previous motor.

e) Find the main dimension of a 100MVA, 11KV, 50HZ, 40 pole salient pole generator, assuming air gap flux density as 0.65wb/m^2 and ampere conductor as 40,000 per metre the peripheral speed should not exceed 60 m/sec assume kw = 0.955.

Q.5 Attempt any Two. **12**

a) Derive an expression for output equation of turbo alternator.

b) In the design of a 30HP, 3 phase, 440V, 960RPM, 50HZ delta connected induction motor, assume the specific electric loading of 25000ac/m, specific magnetic loading of 0.46wb/m^2 full load efficiency 86%, pf 0.87 and estimate the following:

i) Stator Core Dimensions
ii) Number of stator slots and winding turns

c) Calculate the length of air gap of a 15kw, 400V, 50HZ, delta connected 1440 rpm induction motor having both full efficiency and pf as 0.88 each Assume Bav = 0.45 Tesla, ac = 23000 amp cond/m, ratio of core length to pole pitch = 0.85, Assume kw = 0.966.

ELECTRICALS ENGINEERING
Electrical Machine Design (BTN07601)

Day & Date: Tuesday 27-05-2025 Max. Marks: 70
Time: 10:00 AM To 01:00 PM

Instructions: 1) Q. No. 1 is compulsory. It should be solved in the first 30 minutes in Answer Book Page no 03 (Starting page of the Answer Book). Each question carries one mark.
2) Don't forget to Mention question paper set (P/Q/R/S) on top of page.
3) Figures to the right indicates full marks.
4) Make suitable assumptions if necessary and state them clearly.

MCQ/Objective Type Questions

Duration: 30 Minutes Marks:14

Q.1 Choose the correct alternatives from the options. 14

1) Power transformers are designed to have maximum efficiency at _____.
a) Full load b) 50% load
c) 80% load d) no load

2) The value of flux involved in the emf equation of a transformer is _____.
a) rms value b) Average Value
c) Maximum value d) Instantaneous value

3) In a dc machine the peripheral speed should not exceed _____.
a) 15m/s b) 30m/s
c) 50m/s d) 60m/s

4) In a dc machine the diameter of an armature is governed by _____.
a) Pole pitch b) peripheral speed
c) core length d) Both (a) and (b)

5) The speed of synchronous Machine _____.
a) Increase with increase in load
b) Decrease with increase in load
c) Always remains constant
d) Varies with power factor

6) Synchronous motors are generally not self-starting because _____.
a) the direction of rotation is not fixed
b) the direction of instantaneous torque reverses after half cycle
c) starters cannot be used on these machines
d) starting winding is not provided on the machines

7) Slip rings are usually made of _____.
a) Copper b) Carbon
c) Phosphor bronze d) Aluminium

8) Iron losses in a D.C. machine are independent of variations in _____.
a) speed b) load
c) voltage d) speed and voltage

9) What does the insulation and copper of the transformer depend on?
a) current rating
b) voltage rating
c) output power
d) voltage rating and output power

10) Laminations of core are generally made of _____.
a) case iron b) carbon
c) silicon steel d) stainless steel

11) The major consideration to develop a good design is _____.
a) Durability
b) Cost
c) Compliance with performance criteria as laid down in specifications
d) All of the above

12) The main areas of design are _____.
a) Magnetic circuit b) Electrical circuit
c) Installation d) All of the above

13) Hot rolled sheets have _____ permeability.
a) Zero b) Low
c) Unity d) Hight

14) What does the window space factor depend on?
a) it depends on the core
b) it depends on the armature
c) it depends on the insulation
d) it depends on the insulation and copper

Q.1 Choose the correct alternatives from the options. 14

1) Power supply frequency for 25 kV single phase system is _____.
a) 161 b) 25
c) 50 d) 60

2) The coefficient of adhesion is highest when _____.
a) The rails are dry b) The rails are oiled
c) The rails ark wet with dew d) The rails are dusty

3) When the speed of the train is estimated taking into account the time of stop at a station in addition to the actual running time between stops, is known as _____.
a) Average speed b) Schedule speed
c) Notching speed d) Free running speed

4) Quadrilateral speed-time curve is the closer approximation for _____.
a) Main line service b) Suburban service
c) Urban service d) Urban and suburban

5) Which motor has relatively wider range of speed control?
a) D.C. shunt motor b) Synchronous motor
c) Slip ring I.M. d) Squirrel cage I.M.

6) Change of frequency in the supply does not affect _____.
a) Dielectric heating b) Resistance heating
c) Induction heating d) microwave heating

7) Which method of heating is likely to give leading power factor?
a) Electric are heating b) Induction heating
c) Dielectric heating d) Resistance heating

8) In case of induction heating, which of the following parameter is of high value?
a) Frequency b) Current
c) Voltage d) Capacitance

9) For arc heating, the electrodes are made of _____.
a) Copper b) Aluminum
c) Graphite d) ACSR conductor

10) Radiant efficiency of the luminous source depends on _____.
a) Shape of the source b) temperature of the source
c) Wavelength of light rays d) all of the above

11) Carbon arc lamps are commonly used in _____.
a) Domestic lighting b) Street lighting
c) Cinema projectors d) Photography

12) The unit of luminous flux is _____.
a) Steradian b) Candela
c) Lumen d) Lux

13) The Act which has been enacted to provide for efficient use of energy and its conservation and for matters connected therewith is?
a) Indian Electricity Act 2003
b) Energy Conservation Act 2001
c) Indian Electricity Act 2010
d) Energy Conservation Act 2007

14) Which of the following is more energy efficient?
a) Incandescent Bulb b) Fluorescent Tube light
c) CFL d) None of these

d) Write short note on motor selection in textile industries.
e) A train is required to run between two stations 1.6 km apart at an average speed of 40 kmph. The run is to be made to a simplified quadrilateral speed-time curve. If the maximum speed is limited to 64 kmph, acceleration to 2.0 kmphps, coasting and braking retardation to 0.16 kmphps and 3.2 kmphps, determine the duration of acceleration, coasting and braking periods.

Q.3 Solve any two. **12**

a) Derive an expression for Trapezoidal Speed-Time Curve.
b) Explain series-parallel control of traction motors.
c) Write note on motor selection in sugar mills.

Section – II

Q.4 Solve any four. **16**

a) Comparison between tungsten filament lamps and fluorescent tubes.
b) State advantages and disadvantages electrical welding.
c) Describe with the help of a neat diagram the construction and working of a high pressure mercury vapour lamp.
d) Explain the laws of illumination.
e) Write a note on Energy Conservation in Transport.

Q.5 Solve any two. **12**

a) Explain flood lighting.
b) Explain Energy Conservation Planning.
c) Explain direct resistance and indirect resistance heating.

T. Y (B. Tech.) (Sem-II) (New) (CBCS) Examination: March/April-2025
ELECTRICAL ENGINEERING
Power Electronics & Industrial Drives (BTN07603)

Day & Date: Monday 02-06-2025 Max. Marks: 70
Time: 10:00 AM To 01:00 PM

Instructions: 1) Q. No. 1 is compulsory. It should be solved in the first 30 minutes in Answer Book Page no 03 (Starting page of the Answer Book). Each question carries one mark.
2) Don't forget to Mention question paper set (P/Q/R/S) on top on page.
3) Figures to the right indicates full marks.

MCQ/Objective Type Questions

Duration: 30 Minutes Marks:14

Q.1 Choose the correct option. **14**

1) The thyristor turn-off requires that the anode current _____.
a) Falls below the holding current
b) Falls below the latching current
c) Rises above the holding current
d) Rises above the latching current

2) A type D chopper is a _____.
a) Two quadrant type-B chopper
b) Two quadrant type-A chopper
c) Two quadrant type-C chopper
d) None of the mentioned

3) The AC voltage controllers are used in _____ applications.
a) Power generation b) Electric heating
c) Conveyor belt motion d) Power transmission

4) The GTO can be turned off _____.
a) By a positive gate pulse
b) By a negative gate pulse
c) By a negative anode-cathode voltage
d) By removing the gate pulse

5) The angle at which SCR turns on is called _____.
a) On angle b) Conduction angle
c) Firing angle d) Extinction angle

6) The output of a single-phase half bridge inverter on R load is Ideally _____.
a) a sine wave b) a square wave
c) a triangular wave d) constant dc

7) TRIAC and DIAC are _____.
a) Bi-directional devices
b) Unidirectional devices
c) Can't decide
d) None of these

8) Reluctance motor is a _____.
a) Variable torque motor
b) Low torque variable speed motor
c) Self-starting type synchronous motor
d) Low noise, slow speed motor

9) The speed of a D.C. shunt motor more than its foil-load speed can be obtained by _____.
a) decreasing the field current
b) increasing the field current
c) decreasing the armature current
d) increasing the armature current

10) Stepper motor is popular for _____.
a) Speed control
b) Position control
c) Torque control
d) Both a and b

11) The field of an induction motor rotor rotates relative to the stator at _____.
a) Rotor speed
b) Synchronous speed
c) Slip speed
d) Very low speed

12) Speed control by variation of field flux results in _____.
a) Constant power drive
b) Constant torque drive
c) Variable power drive
d) None of the above

13) The equilibrium speed of a motor load system is obtained _____.
a) When motor torque equals the load torque
b) When motor torque is less than the load torque
c) When motor torque is more than the load torque
d) None of these

14) Which duty cycle is preferred if the load requires a constant power for short period of time and rest for sufficient longer duration?
a) Short Time duty
b) Intermittent duty
c) Intermittent duty with starting
d) Intermittent duty with starting and braking

2) Figures to the right indicate full marks.

Section – I

Q.2 Solve Any Four. **16**

a) What is the necessity of firing circuit? Explain RC firing circuit.
b) Draw and explain single phase full wave controlled rectifier with 'RL' load with proper wave form.
c) Draw and explain step up chopper with proper wave form.
d) Draw and explain single phase full bridge inverter with 'RL' load with proper wave.
e) Explain the on off type AC voltage controller.

Q.3 Solve any two. **12**

a) Draw and explain static V-I characteristics of SCR. Define latching and holding current.
b) Describe the classification of DC to dc converter? Draw and explain buck/boost regulator with waveform.
c) Draw a neat diagram & explain the 180 degree conduction mode of 3- phase inverter with proper wave.

Section – II

Q.4 Solve any four. **16**

a) Draw the block diagram of electrical drive system and explain.
b) Draw and explain single phase half controlled rectifier fed separately excited D.C. motor.
c) Explain the chopper fed DC separately excited motor in motoring mode.
d) Explain stator voltage control of an induction motor with speed torque characteristics.
e) With neat sketch explain VSI feed induction motor drive.

Q.5 Solve any two. **12**

a) Explain the closed loop speed control of Multimotor drives.
b) What is breaking? Give its types and explain any one type of electrical breaking in details.
c) Draw and explain switched reluctance motor drive. List advantages and disadvantages of it.

5) Draw neat diagrams whenever necessary.

MCQ/Objective Type Questions

Duration: 30 Minutes Marks:14

Q.1 Choose the correct Alternatives. 14

1) Differentiators are avoided in the system design as they _____.
a) Are costlier
b) Reduces the response of the system
c) Cannot be formed with capacitors and inductors
d) Develop noise and saturate the amplifier

2) For an nth-order system, the state equations will be of the order of ____.
a) n b) 1
c) $n/2$ d) $(n+1)/2$

3) In bode plot the gain cross-over frequency is the frequency at which ___.
a) $|G(jw)H(jw)| = 1$ b) $|G(jw)H(jw)| = 0$
c) $|G(jw)H(jw)| = \infty$ d) $\frac{1}{|G(jw)H(jw)|} = K$

4) The maximum phase shift can be provided by a lead compensator with transfer function $TF = G(s) = \frac{1+6s}{1+2s}$
a) 15^0 b) 30^0
c) 45^0 d) 60^0

5) A cascaded lag compensator used in linear control systems work as a _____.
a) low pass filter b) high pass filter
c) band stop filter d) band pass filter

6) The transfer function of a SISO system with the following state space representation is $\dot{X} = Ax + B\,u$ and $y = Cx + Du$

a) $B(sI - A)^{-1}C + D$ b) $C(sI - A)^{-1}B + D$

c) $D(sI - A)^{-1}B + D$ d) $A(sI - B)^{-1}C + D$

7) An existing control system with the satisfactory transient response but unsatisfactory steady-state response is to be compensated using a cascade compensator with the following open-loop $TF = \frac{s+z}{s+p}$, where $\frac{z}{p}$ ratio should be _____.

a) > 1 b) $= 1$

c) $= 0.707$ d) < 1

8) The points at which derivatives of all the state variables are zero are _____.

a) Singular points b) Nonsingular points

c) Poles d) Zeroes

9) The describing function N of a nonlinear control system is a function of _____.

a) amplitude of the input

b) frequency of the input

c) initial conditions of the output

d) both a and b

10) The necessary and sufficient condition to be satisfied for arbitrary pole placement is that the system should be completely _____.

a) State controllable

b) State observable

c) State controllable and state observable

d) Any of the above

11) The method of investigating the stability using Liapunov function as the _____.

a) Direct method b) Indirect method

c) Not determined d) Always unstable

12) The transfer function of zero order hold is _____.

a) $1 - e^{TS}$ b) $1 - e^{-TS}$

c) $\frac{1-e^{TS}}{s}$ d) $\frac{1-e^{-TS}}{s}$

13) The eigen values of the matrix (A-BK) are called _____.

a) open loop poles b) open loop zeros

c) regulator poles d) none of these

14) For a unity feedback system, the origin of the s-plane is mapped in the z-plane by transformation $z = e^{sT}$ to which one of the following?

a) Origin b) $1 + j0$

c) $-1 + j0$ d) $0 + j1$

Set | P

T. Y (B. Tech) (Sem-II) (New) (CBCS) Examination: March/April - 2025
ELECTRICAL ENGINEERING
Advanced Control Systems (BTN07604)

Day & Date: Wednesday, 04-06-2025 Max. Marks: 56
Time: 10:00 AM To 01:00 PM

Instructions: 1) All questions are compulsory.
2) Figures to the right indicate full marks.
3) Assume suitable data if necessary.
4) Draw neat diagrams whenever necessary.

Section – I

Q.2 Attempt any four of the following. **16**

a) Explain the design steps for Lag compensator by the Root Locus Technique.

b) Test the controllability of the system whose state equations are given as
$\dot{x}_1 = -2x_1 + 4x_2$
$\dot{x}_2 = 2x_1 - x_2 + u$ and output equation as $Y = [0 \quad 1]\begin{bmatrix} x_1 \\ x_2 \end{bmatrix}$

c) Determine the Transfer matrix from the data given as below.
$A = \begin{bmatrix} -2 & -1 \\ -3 & -2 \end{bmatrix}$; $B = \begin{bmatrix} 3 \\ 4 \end{bmatrix}$; $C = [2 \quad 1]$ and $D = 0$

d) Write the properties of the state transition matrix.

e) Explain the realization of lead compensator.

f) Obtain state model for the system described in phase variable form.
$$\frac{d^3y}{dt^3} + 6\frac{d^2y}{dt^2} + 11\frac{dy}{dx} + 6y = u(t)$$

Q.3 Attempt any two of the following. **12**

a) Obtain state Transition matrix whose system matrix is given by
$A = \begin{bmatrix} -1 & 1 \\ 0 & 2 \end{bmatrix}$

b) The forward path TF of a unity feedback control system is given by
$G(s) = \frac{k}{s(s+2)(s+8)}$
Design a suitable lag compensator so that the system meets the following specifications.
i) Percentage overshoot $< 16\%$ for unit step input,
ii) steady state error ≤ 0.125 for unit ramp input.

c) A unity feedback type 1 system has OLTF $G(S) = k/s(1 + 2s)$. Design the suitable lag network for the system to meet following specifications.
i) $\boldsymbol{e_{ss}}$ for ramp input is less than or equal to 0.2 and
ii) $\mathrm{PM} = 40^{\circ}$

Section – II

Q.4 Attempt any four of the following. **16**

a) Explain different types of nonlinearities.

b) What are methods for determination of state feedback gain matrix K? Explain any one method.

c) Consider the system $\dot{x} = Ax + Bu, y = Cx$ with $A = \begin{bmatrix} 0 & 10 \\ 1 & 0 \end{bmatrix}, B = \begin{bmatrix} 0 \\ 1 \end{bmatrix}$ and $C = [0 \quad 1]$. Design a full-order observer to implement the state feedback $u = -kx$ with eigenvalues of the observer to be at -10, 10.

d) Determine the kind of singularity for the following differential equation

$$\ddot{Y} - 8\dot{Y} + 17Y = 34$$

e) Explain in short mapping between s-plane and z-plane.

f) Explain the bilinear transformation for stability analysis of discrete-time control systems.

Q.5 Attempt any two of the following. **12**

a) A system is described by $\begin{bmatrix} \dot{x_1} \\ \dot{x_2} \\ \dot{x_3} \end{bmatrix} = \begin{bmatrix} 0 & 1 & 0 \\ 0 & 0 & 1 \\ -1 & -5 & -6 \end{bmatrix} \begin{bmatrix} x_1 \\ x_2 \\ x_3 \end{bmatrix} + \begin{bmatrix} 0 \\ 0 \\ 1 \end{bmatrix} u(t)$

Using state feedback control $u = -Kx$, it is desired to have closed poles at $(-1 + j2), (-1 - j2)$, and (-10)

Find the state feedback matrix using Ackermann's formula.

b) Derive the describing function of the relay with hysteresis nonlinearity.

c) Check the stability of the sampled data control system represented by the equation using Juri's stability test

$$F(z) = z^4 - 1.7z^3 + 1.04z^2 - 0.268z + 0.024 = 0$$

Set **Q**

T. Y (B. Tech) (Sem-II) (New) (CBCS) Examination: March/April - 2025
ELECTRICAL ENGINEERING
Advanced Control Systems (BTN07604)

Day & Date: Wednesday, 04-06-2025 Max. Marks: 70
Time: 10:00 AM To 01:00 PM

Instructions: 1) Q. No. 1 is compulsory. It should be solved in the first 30 minutes in Answer Book Page no 03 (Starting page of the Answer Book). Each question carries one mark.
2) Don't forget to Mention question paper set (P/Q/R/S) on top of page.
3) Figures to the right indicates full marks.
4) Assume suitable data if necessary.
5) Draw neat diagrams whenever necessary.

MCQ/Objective Type Questions

Duration: 30 Minutes Marks:14

Q.1 Choose the correct Alternatives. **14**

1) The points at which derivatives of all the state variables are zero are _____.
a) Singular points b) Nonsingular points
c) Poles d) Zeroes

2) The describing function N of a nonlinear control system is a function of _____.
a) amplitude of the input
b) frequency of the input
c) initial conditions of the output
d) both a and b

3) The necessary and sufficient condition to be satisfied for arbitrary pole placement is that the system should be completely _____.
a) State controllable
b) State observable
c) State controllable and state observable
d) Any of the above

4) The method of investigating the stability using Liapunov function as the _____.
a) Direct method b) Indirect method
c) Not determined d) Always unstable

5) The transfer function of zero order hold is _____.
a) $1 - e^{TS}$ b) $1 - e^{-TS}$
c) $\frac{1-e^{TS}}{s}$ d) $\frac{1-e^{-TS}}{s}$

6) The eigen values of the matrix (A-BK) are called _____.

a) open loop poles
b) open loop zeros
c) regulator poles
d) none of these

7) For a unity feedback system, the origin of the s-plane is mapped in the z-plane by transformation $z = e^{sT}$ to which one of the following?

a) Origin
b) $1 + j0$
c) $-1 + j0$
d) $0 + j1$

8) Differentiators are avoided in the system design as they _____.

a) Are costlier
b) Reduces the response of the system
c) Cannot be formed with capacitors and inductors
d) Develop noise and saturate the amplifier

9) For an nth-order system, the state equations will be of the order of ____.

a) n
b) 1
c) $n/2$
d) $(n+1)/2$

10) In bode plot the gain cross-over frequency is the frequency at which ___.

a) $|G(jw)H(jw)| = 1$
b) $|G(jw)H(jw)| = 0$
c) $|G(jw)H(jw)| = \infty$
d) $\frac{1}{|G(jw)H(jw)|} = K$

11) The maximum phase shift can be provided by a lead compensator with transfer function $TF = G(s) = \frac{1+6s}{1+2s}$

a) 15^0
b) 30^0
c) 45^0
d) 60^0

12) A cascaded lag compensator used in linear control systems work as a _____.

a) low pass filter
b) high pass filter
c) band stop filter
d) band pass filter

13) The transfer function of a SISO system with the following state space representation is $\dot{X} = Ax + B\,u$ and $y = Cx + Du$

a) $B(sI - A)^{-1}C + D$
b) $C(sI - A)^{-1}B + D$
c) $D(sI - A)^{-1}B + D$
d) $A(sI - B)^{-1}C + D$

14) An existing control system with the satisfactory transient response but unsatisfactory steady-state response is to be compensated using a cascade compensator with the following open-loop $TF = \frac{s+z}{s+p}$, where $\frac{z}{p}$ ratio should be _____.

a) > 1
b) $= 1$
c) $= 0.707$
d) < 1

Seat No.	

Set **Q**

T. Y (B. Tech) (Sem-II) (New) (CBCS) Examination: March/April - 2025
ELECTRICAL ENGINEERING
Advanced Control Systems (BTN07604)

Day & Date: Wednesday, 04-06-2025 Max. Marks: 56
Time: 10:00 AM To 01:00 PM

Instructions: 1) All questions are compulsory.
2) Figures to the right indicate full marks.
3) Assume suitable data if necessary.
4) Draw neat diagrams whenever necessary.

Section – I

Q.2 Attempt any four of the following. **16**

a) Explain the design steps for Lag compensator by the Root Locus Technique.

b) Test the controllability of the system whose state equations are given as
$\dot{x}_1 = -2x_1 + 4x_2$
$\dot{x}_2 = 2x_1 - x_2 + u$ and output equation as $Y = [0 \quad 1]\begin{bmatrix} x_1 \\ x_2 \end{bmatrix}$

c) Determine the Transfer matrix from the data given as below.
$A = \begin{bmatrix} -2 & -1 \\ -3 & -2 \end{bmatrix}$; $B = \begin{bmatrix} 3 \\ 4 \end{bmatrix}$; $C = [2 \quad 1]$ and $D = 0$

d) Write the properties of the state transition matrix.

e) Explain the realization of lead compensator.

f) Obtain state model for the system described in phase variable form.
$$\frac{d^3y}{dt^3} + 6\frac{d^2y}{dt^2} + 11\frac{dy}{dx} + 6y = u(t)$$

Q.3 Attempt any two of the following. **12**

a) Obtain state Transition matrix whose system matrix is given by
$A = \begin{bmatrix} -1 & 1 \\ 0 & 2 \end{bmatrix}$

b) The forward path TF of a unity feedback control system is given by
$G(s) = \frac{k}{s(s+2)(s+8)}$
Design a suitable lag compensator so that the system meets the following specifications.
i) Percentage overshoot $< 16\%$ for unit step input,
ii) steady state error ≤ 0.125 for unit ramp input.

c) A unity feedback type 1 system has OLTF $G(S) = k/s(1 + 2s)$. Design the suitable lag network for the system to meet following specifications.
i) $\boldsymbol{e_{ss}}$ for ramp input is less than or equal to 0.2 and
ii) $\mathrm{PM} = 40^{\circ}$

Section – II

Q.4 Attempt any four of the following. **16**

a) Explain different types of nonlinearities.

b) What are methods for determination of state feedback gain matrix K? Explain any one method.

c) Consider the system $\dot{x} = Ax + Bu, y = Cx$ with $A = \begin{bmatrix} 0 & 10 \\ 1 & 0 \end{bmatrix}, B = \begin{bmatrix} 0 \\ 1 \end{bmatrix}$ and $C = [0 \quad 1]$. Design a full-order observer to implement the state feedback $u = -kx$ with eigenvalues of the observer to be at -10, 10.

d) Determine the kind of singularity for the following differential equation

$$\ddot{Y} - 8\dot{Y} + 17Y = 34$$

e) Explain in short mapping between s-plane and z-plane.

f) Explain the bilinear transformation for stability analysis of discrete-time control systems.

Q.5 Attempt any two of the following. **12**

a) A system is described by $\begin{bmatrix} \dot{x_1} \\ \dot{x_2} \\ \dot{x_3} \end{bmatrix} = \begin{bmatrix} 0 & 1 & 0 \\ 0 & 0 & 1 \\ -1 & -5 & -6 \end{bmatrix} \begin{bmatrix} x_1 \\ x_2 \\ x_3 \end{bmatrix} + \begin{bmatrix} 0 \\ 0 \\ 1 \end{bmatrix} u(t)$

Using state feedback control $u = -Kx$, it is desired to have closed poles at $(-1 + j2), (-1 - j2)$, and (-10)

Find the state feedback matrix using Ackermann's formula.

b) Derive the describing function of the relay with hysteresis nonlinearity.

c) Check the stability of the sampled data control system represented by the equation using Juri's stability test

$$F(z) = z^4 - 1.7z^3 + 1.04z^2 - 0.268z + 0.024 = 0$$

Section – I

Q.2 Attempt any four of the following. **16**

a) Explain the design steps for Lag compensator by the Root Locus Technique.

b) Test the controllability of the system whose state equations are given as
$\dot{x}_1 = -2x_1 + 4x_2$
$\dot{x}_2 = 2x_1 - x_2 + u$ and output equation as $Y = [0 \quad 1]\begin{bmatrix} x_1 \\ x_2 \end{bmatrix}$

c) Determine the Transfer matrix from the data given as below.
$A = \begin{bmatrix} -2 & -1 \\ -3 & -2 \end{bmatrix}$; $B = \begin{bmatrix} 3 \\ 4 \end{bmatrix}$; $C = [2 \quad 1]$ and $D = 0$

d) Write the properties of the state transition matrix.

e) Explain the realization of lead compensator.

f) Obtain state model for the system described in phase variable form.
$$\frac{d^3y}{dt^3} + 6\frac{d^2y}{dt^2} + 11\frac{dy}{dx} + 6y = u(t)$$

Q.3 Attempt any two of the following. **12**

a) Obtain state Transition matrix whose system matrix is given by
$A = \begin{bmatrix} -1 & 1 \\ 0 & 2 \end{bmatrix}$

b) The forward path TF of a unity feedback control system is given by
$G(s) = \frac{k}{s(s+2)(s+8)}$
Design a suitable lag compensator so that the system meets the following specifications.
i) Percentage overshoot $< 16\%$ for unit step input,
ii) steady state error ≤ 0.125 for unit ramp input.

c) A unity feedback type 1 system has OLTF $G(S) = k/s(1 + 2s)$. Design the suitable lag network for the system to meet following specifications.
i) $\boldsymbol{e_{ss}}$ for ramp input is less than or equal to 0.2 and
ii) $\mathrm{PM} = 40^{\circ}$

Section – II

Q.4 Attempt any four of the following. **16**

a) Explain different types of nonlinearities.

b) What are methods for determination of state feedback gain matrix K? Explain any one method.

c) Consider the system $\dot{x} = Ax + Bu, y = Cx$ with $A = \begin{bmatrix} 0 & 10 \\ 1 & 0 \end{bmatrix}, B = \begin{bmatrix} 0 \\ 1 \end{bmatrix}$ and $C = [0 \quad 1]$. Design a full-order observer to implement the state feedback $u = -kx$ with eigenvalues of the observer to be at -10, 10.

d) Determine the kind of singularity for the following differential equation

$$\ddot{Y} - 8\dot{Y} + 17Y = 34$$

e) Explain in short mapping between s-plane and z-plane.

f) Explain the bilinear transformation for stability analysis of discrete-time control systems.

Q.5 Attempt any two of the following. **12**

a) A system is described by $\begin{bmatrix} \dot{x_1} \\ \dot{x_2} \\ \dot{x_3} \end{bmatrix} = \begin{bmatrix} 0 & 1 & 0 \\ 0 & 0 & 1 \\ -1 & -5 & -6 \end{bmatrix} \begin{bmatrix} x_1 \\ x_2 \\ x_3 \end{bmatrix} + \begin{bmatrix} 0 \\ 0 \\ 1 \end{bmatrix} u(t)$

Using state feedback control $u = -Kx$, it is desired to have closed poles at $(-1 + j2), (-1 - j2)$, and (-10)

Find the state feedback matrix using Ackermann's formula.

b) Derive the describing function of the relay with hysteresis nonlinearity.

c) Check the stability of the sampled data control system represented by the equation using Juri's stability test

$$F(z) = z^4 - 1.7z^3 + 1.04z^2 - 0.268z + 0.024 = 0$$

MCQ/Objective Type Questions

Duration: 30 Minutes Marks:14

Q.1 Multiple choice questions **14**

1) A ____ operating system has well-defined, fixed time constraints.
a) Real-time b) Half real-time
c) Full real-time d) Null real-time

2) A _____ system guarantees that critical tasks complete on time.
a) hard real-time b) soft real-time
c) firm real-time d) all real-time

3) A program that is loaded into memory and is executing is commonly referred to as a _____.
a) process b) program
c) Primary Program d) Secondary Program

4) _____: The process is being created
a) New b) Running
c) Waiting d) Ready

5) _____: Instructions are being executed.
a) New b) Running
c) Waiting d) Ready

6) A CPU-bound program might have a few very ____ CPU bursts.
a) Long b) Short
c) Medium d) Perfect

7) When several processes access the same data concurrently and the outcome of the execution depends on the particular order in which the access takes place, is called.
a) dynamic condition b) race condition
c) essential condition d) critical condition

8) The circular wait condition can be prevented by _____.
a) defining a linear ordering of resource types
b) using thread
c) using pipes
d) all of the mentioned

9) All unsafe states are:
a) deadlocks b) not deadlocks
c) fatal d) None of these

10) A system is in a safe state only if there exists a:
a) safe allocation b) safe resource
c) safe sequence d) All of these

11) The _____ must design and program the overlay structure.
a) programmer b) system architect
c) system designer d) None of these

12) The base register is also known as the:
a) basic register b) regular register
c) Relocation register d) delocation register

13) Swapping requires a _____.
a) motherboard b) keyboard
c) monitor d) backing store

14) The pager concerns with the _____.
a) individual page of a process b) entire process
c) entire thread d) First page of the process

ELECTRICAL ENGINEERING
Operating Systems (BTN07606)

Day & Date: Friday 06-June-2025 Max. Marks: 56
Time: 10:00 AM To 01:00 PM

Instructions: 1) All questions are compulsory.
2) Figures to the right indicate full marks.

Section – I

Q.2 Attempt any Three. **12**

a) Explain time sharing system.
b) Explain PCB with neat diagram.
c) Explain Petersons algorithm.
d) Explain critical section problem.

Q.3 Attempt any Two. **16**

a) Explain multilevel queue scheduling algorithm & Multilevel feedback queue scheduling.
b) Explain Inter process Communication in detail.
c) Explain personal computer system, parallel system.

Section – II

Q.4 Attempt any Three. **12**

a) Explain Resource allocation graph algorithm with example.
b) Explain Swapping with neat diagram.
c) Explain Contiguous Allocation.
d) Explain concept of thrashing.

Q.5 Attempt any Two. **16**

a) Explain deadlock detection algorithm for the multiple instances of resources.
b) Explain Banker's algorithm with example.
c) Explain page fault handling with neat diagram.

Seat No.		Set	Q

T. Y. (B. Tech) (Sem-II) (New) (CBCS) Examination: March/April-2025
ELECTRICAL ENGINEERING
Operating Systems (BTN07606)

Day & Date: Friday 06-June-2025 Max. Marks: 70
Time: 10:00 AM To 01:00 PM

Instructions: 1) Q. No. 1 is compulsory. It should be solved in the first 30 minutes in Answer Book Page no 03 (Starting page of the Answer Book). Each question carries one mark.
2) Don't forget to Mention question paper set (P/Q/R/S) on top of page.
3) Figures to the right indicate full marks.

MCQ/Objective Type Questions

Duration: 30 Minutes Marks:14

Q.1 Multiple choice questions **14**

1) The circular wait condition can be prevented by _____.
a) defining a linear ordering of resource types
b) using thread
c) using pipes
d) all of the mentioned

2) All unsafe states are:
a) deadlocks b) not deadlocks
c) fatal d) None of these

3) A system is in a safe state only if there exists a:
a) safe allocation b) safe resource
c) safe sequence d) All of these

4) The _____ must design and program the overlay structure.
a) programmer b) system architect
c) system designer d) None of these

5) The base register is also known as the:
a) basic register b) regular register
c) Relocation register d) delocation register

6) Swapping requires a _____.
a) motherboard b) keyboard
c) monitor d) backing store

7) The pager concerns with the _____.
a) individual page of a process b) entire process
c) entire thread d) First page of the process

8) A ____ operating system has well-defined, fixed time constraints.
a) Real-time b) Half real-time
c) Full real-time d) Null real-time

9) A _____ system guarantees that critical tasks complete on time.
a) hard real-time b) soft real-time
c) firm real-time d) all real-time

10) A program that is loaded into memory and is executing is commonly referred to as a _____.
a) process b) program
c) Primary Program d) Secondary Program

11) _____: The process is being created
a) New b) Running
c) Waiting d) Ready

12) _____: Instructions are being executed.
a) New b) Running
c) Waiting d) Ready

13) A CPU-bound program might have a few very ____ CPU bursts.
a) Long b) Short
c) Medium d) Perfect

14) When several processes access the same data concurrently and the outcome of the execution depends on the particular order in which the access takes place, is called.
a) dynamic condition b) race condition
c) essential condition d) critical condition

4) Assume suitable data if necessary.

MCQ/Objective Type Questions

Duration: 30 Minutes Marks:14

Q.1 Choose the correct Answer. **14**

1) The percentage of the incoming radiation reflected back to space by the earth is _____.
a) 10 % b) 20 %
c) 30 % d) 40 %

2) Terrestrial radiation has a wavelength in the range of _____.
a) 0.2 micro-meter to 4 micro-meter
b) 0.2 micro-meter to 0.5 micro-meter
c) 0.380 micro-meter to 0.760 micro-meter
d) 0.29 micro-meter to 2.3 micro-meter

3) A solar thermal collector _____.
a) Collects the solar energy and reflects it back
b) Absorbs the solar radiation and dissipates it to the ambient
c) Collects and converts the solar energy in to electrical energy
d) Collects and converts the solar energy in to thermal energy and delivers it to the next stage of the system

4) The value of concentration ratio of a flat-plate collector is _____.
a) 1 b) 10
c) 100 d) 1000

5) In solar ponds surface convective zone (SCZ) has a thickness of about _____.
a) half of the dept b) more than half of the dept
c) 10-20cm d) a or b

6) Ammonia-water absorption system is used for cooling duties upto _____.
a) 00 ^{c} b) -2300 ^{c}
c) -500 ^{c} d) -100 ^{c}

7) The range of wind speed suitable for wind power generator is _____.
a) 0 to 5 m/s
b) 5 to 25 m/s
c) 25 to 50 m/s
d) 50 to 75 m/s

8) A two-blade wind turbine produces maximum power when the tip speed ratio is equal to _____.
a) π
b) 2π
c) 3π
d) 0.593

9) The water content in anhydrous ethanol is _____.
a) 20%
b) 10%
c) 5%
d) 0.7%

10) The percentage of ethanol in blended petrol (gasohol) is _____.
a) 20%
b) 30%
c) 4%
d) 50%

11) The temperature at the inner core of the earth is about: _____.
a) 1000^{C}
b) 4000^{C}
c) 400000^{C}
d) 5000^{C}

12) The zone of likely geothermal sites corresponds roughly to: _____.
a) cold, hilly regions
b) hot, flat regions
c) Tropical regions
d) the regions of seismic and volcanic activities

13) OTEC stands for _____.
a) Ocean Thermal Energy Conversion
b) Ocean Thermal Energy Component
c) Ocean Thermodynamic Energy Conversion
d) Ocean Thermodynamic Energy Component

14) Two-basin tidal schemes _____.
a) Are more economical than single basin schemes
b) Operate on ebb cycles in both basins
c) Produce less uniform power
d) Produce more uniform power

Set **P**

T. Y. (B. Tech.) (Sem-II) (New) (CBCS) Examination: March/April-2025
ELECTRICAL ENGINEERING
Renewable Energy Sources (BTN07607)

Day & Date: Friday 06-June-2025 Max. Marks: 56
Time: 10:00 AM To 01:00 PM

Instructions: 1) All questions are compulsory.
2) Figures to the right indicate full marks.
3) Assume suitable data if necessary.
4) Draw neat diagrams whenever necessary.

Section – I

Q.2 Attempt any four of the following. **16**

a) Explain solar water heating system.
b) With the help of neat diagram explain terrestrial and an extra-terrestrial solar radiation.
c) With neat diagram explain classification of concentrating type collectors.
d) Different methods of solar energy storage.
e) Draw and describe horizontal axis windmills.
f) Define the terms:
i) Tip speed ratio
ii) Swept area
iii) Solidity
iv) cut-in, cut-out, and rated speed

Q.3 Attempt any two of the following. **12**

a) Explain savonious and durnes wind mill operation with diagram.
b) Draw and explain different zones of solar ponds. What are the applications of solar ponds?
c) Draw and explain the performance characteristics of wind mills.

Section – II

Q.4 Attempt any four of the following. **16**

a) Distinguish between fixed dome type and Floating drum type biogas plant.
b) With the help of bacterial reaction explain the principle of biogas generation.
c) Draw and describe the dry steam geothermal power plant.
d) Explain different types of geothermal resources.
e) Draw and describe the working of open cycle OTEC system.
f) Explain the need for DEC.

Q.5 Attempt any two of the following. **12**

a) Explain fixed drum type biogas plant.

b) Describe the working of closed cycle OTEC system and also explain the advantages and disadvantages of Tidal power.

c) Explain tidal energy conversion system with proper diagram.

Section – II

Q.4 Attempt any four of the following. **16**

a) Distinguish between fixed dome type and Floating drum type biogas plant.
b) With the help of bacterial reaction explain the principle of biogas generation.
c) Draw and describe the dry steam geothermal power plant.
d) Explain different types of geothermal resources.
e) Draw and describe the working of open cycle OTEC system.
f) Explain the need for DEC.

Q.5 Attempt any two of the following. **12**

a) Explain fixed drum type biogas plant.

b) Describe the working of closed cycle OTEC system and also explain the advantages and disadvantages of Tidal power.

c) Explain tidal energy conversion system with proper diagram.

T. Y. (B. Tech.) (Sem-II) (New) (CBCS) Examination: March/April-2025
ELECTRICAL ENGINEERING
Renewable Energy Sources (BTN07607)

Day & Date: Friday 06-June-2025 Max. Marks: 70
Time: 10:00 AM To 01:00 PM

Instructions: 1) Q. No. 1 is compulsory. It should be solved in the first 30 minutes in Answer Book Page no 03 (Starting page of the Answer Book). Each question carries one mark.
2) Don't forget to Mention question paper set (P/Q/R/S) on top of page.
3) Figures to the right indicates full marks.
4) Assume suitable data if necessary.

MCQ/Objective Type Questions

Duration: 30 Minutes Marks:14

Q.1 Choose the correct Answer. 14

1) Ammonia-water absorption system is used for cooling duties upto _____.
a) 00 ^{c} b) -2300 ^{c}
c) -500 ^{c} d) -100 ^{c}

2) The range of wind speed suitable for wind power generator is _____.
a) 0 to 5 m/s b) 5 to 25 m/s
c) 25 to 50 m/s d) 50 to 75 m/s

3) A two-blade wind turbine produces maximum power when the tip speed ratio is equal to _____.
a) π b) 2π
c) 3π d) 0.593

4) The water content in anhydrous ethanol is _____.
a) 20% b) 10%
c) 5% d) 0.7%

5) The percentage of ethanol in blended petrol (gasohol) is _____.
a) 20% b) 30%
c) 4% d) 50%

6) The temperature at the inner core of the earth is about: _____.
a) 1000^{C} b) 4000^{C}
c) 400000^{C} d) 5000^{C}

7) The zone of likely geothermal sites corresponds roughly to: _____.
a) cold, hilly regions
b) hot, flat regions
c) Tropical regions
d) the regions of seismic and volcanic activities

8) OTEC stands for _____.
a) Ocean Thermal Energy Conversion
b) Ocean Thermal Energy Component
c) Ocean Thermodynamic Energy Conversion
d) Ocean Thermodynamic Energy Component

9) Two-basin tidal schemes _____.
a) Are more economical than single basin schemes
b) Operate on ebb cycles in both basins
c) Produce less uniform power
d) Produce more uniform power

10) The percentage of the incoming radiation reflected back to space by the earth is _____.
a) 10 % b) 20 %
c) 30 % d) 40 %

11) Terrestrial radiation has a wavelength in the range of _____.
a) 0.2 micro-meter to 4 micro-meter
b) 0.2 micro-meter to 0.5 micro-meter
c) 0.380 micro-meter to 0.760 micro-meter
d) 0.29 micro-meter to 2.3 micro-meter

12) A solar thermal collector _____.
a) Collects the solar energy and reflects it back
b) Absorbs the solar radiation and dissipates it to the ambient
c) Collects and converts the solar energy in to electrical energy
d) Collects and converts the solar energy in to thermal energy and delivers it to the next stage of the system

13) The value of concentration ratio of a flat-plate collector is _____.
a) 1 b) 10
c) 100 d) 1000

14) In solar ponds surface convective zone (SCZ) has a thickness of about _____.
a) half of the dept b) more than half of the dept
c) 10-20cm d) a or b

Seat No.		Set	S

T. Y. (B. Tech.) (Sem-II) (New) (CBCS) Examination: March/April-2025
ELECTRICAL ENGINEERING
Renewable Energy Sources (BTN07607)

Day & Date: Friday 06-June-2025 Max. Marks: 56
Time: 10:00 AM To 01:00 PM

Instructions: 1) All questions are compulsory.
2) Figures to the right indicate full marks.
3) Assume suitable data if necessary.
4) Draw neat diagrams whenever necessary.

Section – I

Q.2 Attempt any four of the following. **16**

a) Explain solar water heating system.
b) With the help of neat diagram explain terrestrial and an extra-terrestrial solar radiation.
c) With neat diagram explain classification of concentrating type collectors.
d) Different methods of solar energy storage.
e) Draw and describe horizontal axis windmills.
f) Define the terms:
i) Tip speed ratio
ii) Swept area
iii) Solidity
iv) cut-in, cut-out, and rated speed

Q.3 Attempt any two of the following. **12**

a) Explain savonious and durnes wind mill operation with diagram.
b) Draw and explain different zones of solar ponds. What are the applications of solar ponds?
c) Draw and explain the performance characteristics of wind mills.

Section – II

Q.4 Attempt any four of the following. **16**

a) Distinguish between fixed dome type and Floating drum type biogas plant.
b) With the help of bacterial reaction explain the principle of biogas generation.
c) Draw and describe the dry steam geothermal power plant.
d) Explain different types of geothermal resources.
e) Draw and describe the working of open cycle OTEC system.
f) Explain the need for DEC.

Q.5 Attempt any two of the following. **12**

a) Explain fixed drum type biogas plant.

b) Describe the working of closed cycle OTEC system and also explain the advantages and disadvantages of Tidal power.

c) Explain tidal energy conversion system with proper diagram.

Time: 10:00 AM To 01:00 PM

Instructions: 1) Q. No. 1 is compulsory. It should be solved in the first 30 minutes in Answer Book Page no 03 (Starting page of the Answer Book). Each question carries one mark.
2) Don't forget to Mention question paper set (P/Q/R/S) on top of page.
3) Figures to right indicates full marks.

MCQ/Objective Type Questions

Duration: 30 Minutes Marks:14

Q.1 Choose the correct Answer. **14**

1) A LASER means _____.
a) Light amplification some emit radiation
b) Light amplification by stimulated emission of radiation
c) Both a & b
d) Light activated stimulated emission of radiation

2) Optical fiber is the technology associated with data transmission using _____.
a) air b) light pulses
c) waves d) Both a & c

3) Optical fiber is used by telecommunications companies to transmit ____.
a) Telephone signals,
b) Telephone signals, Internet communication and cable television signals
c) Internet communication and cable television signals
d) None of the above

4) How do you measure bending losses in optical fiber?
a) By taking the logarithmic ratio of input power (P_i) to the output power (P_o).
b) By taking the logarithmic of Output power (P_o)
c) By taking the logarithmic of input power (P_i)
d) Only Power

5) DWDM Means _____.
a) Data wavelength-division multiplexing
b) Dense wavelength-division multiplexing
c) Dense wavelength-diverted multiplexing
d) Dense wavelength-division manager

6) A light-emitting diode (LED) is a semiconductor device that emit light when _____.
a) Output reaches saturation level
b) Current flows through it
c) Output will be a sine waveform
d) Output will be a non-sinusoidal waveform

7) Fiber optic Ethernet transmits data signals over _____.
a) Fiber cables rather than the copper cables of traditional Ethernet wiring
b) Copper cables
c) Wired Cable
d) All of the mentioned

8) In an optical network, which topologies are used?
a) Ring
b) Star
c) Bus
d) All of the above

9) Dense wavelength division multiplexing is a _____.
a) Wired communication technique
b) fiber-optic transmission technique
c) Mixing techniques
d) Protocol

10) A major consideration with all types of fiber, fiber connection is the ____.
a) optical loss encountered at the interface
b) air loss
c) hest loss
d) None of the above

11) Fiber splicing is the process of _____.
a) Temporary joining of two fibers
b) permanently joining two fibers together
c) permanent and temporary joint
d) None of the above

12) An optical amplifier is a device that amplifies _____.
a) Electrical signal
b) an optical signal
c) Both a and b
d) None of the above

13) Wavelength division multiplexing (WDM) is a _____.
a) Technique of multiplexing multiple optical carrier signals
b) Technique of multiplexing multiple ray
c) Both a & b
d) None of the above

14) Optical modulators are widely used with superior performance _____.

a) Only Laboratory
b) including optical communications, signal processing, and optical measurements
c) time Measurement
d) None of the above

Instructions: 1) All questions are compulsory.
2) Figures to the right indicate full marks.

Section – I

Q.2 Attempt any four of the following. **16**

a) Draw the block diagram of generalized optical fiber communication system. Explain.
b) Write any 4 advantages & disadvantages of optical Fiber communication.
c) What is scattering losses? Enlist its types. Explain any one in details.
d) Explain optical emission in semiconductor.
e) What is light modulation? Explain Shortly.

Q.3 Attempt any two of the following. **12**

a) Explain the process of light amplification in a LASER.
b) Explain optical fiber waveguides.
c) Explain LED structure.

Section – II

Q.4 Attempt any four of the following. **16**

a) What is the requirement of optical detectors? Explain.
b) What is optical networking technology? Explain shortly.
c) Explain PIN photodiode with diagram.
d) Explain optical Ethernet.
e) What is optical network mode? Explain.

Q.5 Attempt any two of the following. **12**

a) Explain optical Transmitter Design in details.
b) Explain Fiber distributed data Interface in details.
c) What is optical detection principle? Explain in details.

MCQ/Objective Type Questions

Duration: 30 Minutes Marks:14

Q.1 Choose the correct Answer. **14**

1) Sound to electrical energy transducer _____.
a) Microphone b) AFR
c) Tactile sensor d) Pellistor

2) The sensors are classified on the basis of _____.
a) Functions b) Performance
c) Output d) All of the above

3) Which of the following represents the output of Hall Effect transducer?
a) Hall potential b) Emf
c) Applied voltage d) Lorentz Voltage

4) Piezoelectric effect is when materials produce electric charges when _____.
a) Voltage is applied b) Mechanical Stress is applied
c) Electric field is applied d) Magnetic field is applied

5) The smallest change which a sensor can detect is termed _____.
a) Accuracy b) Precision
c) Resolution d) Scale

6) A bridge circuit uses which method of measurement?
a) Absolute b) Relative
c) Differential d) Comparison

7) Which of the following method is employed for ADC?
a) Ladder network b) Successive approximation type
c) PWM type d) None of the mentioned

8) Potentiometer as a displacement sensor works on the principle of _____.

a) Mutual Inductance
b) Self Inductance
c) Variable Resistance Transduction
d) Hall Effect

9) Proximity sensor is a _____ type of position sensor.

a) contact b) non-contact
c) eddy current d) resistive

10) In wet etching material is removed by _____.

a) Absorption
b) Sublimation
c) Chemical reaction
d) The force exerted due to flow of solvent

11) What is the main principle of electroplating?

a) Hydrolysis b) Neutralization
c) Esterification d) Saturation

12) The force developed in hydraulic systems is high due to _____.

a) High pressure b) More oil
c) Less pressure d) Less oil

13) Which type of coil is a solenoid?

a) Electromagnetic b) Electrical
c) Mechanical d) Chemical

14) What is the function of the flow control valve?

a) Controls the direction of flow of air
b) The moisture is separated and removed
c) It converts the mechanical energy to hydraulic energy
d) It controls the rate of flow of compressed air

Q.2 Attempt any four of the following: **16**

a) Define and explain the sensor with one example.
b) Explain the principle of working of Hall effect sensor.
c) Explain the sensor interfacing bridge circuits.
d) Explain the light scattering Phenomenon in detail.
e) State and Explain the Modes of Heat transfer.

Q.3 Attempt any two of the following: **12**

a) Define and explain the any three Characteristics of sensor.
b) Explain the light measurement by using photometry and radiometry.
c) State different types of excitation circuits and explain any one of them in details.

Section – II

Q.4 Attempt any four of the following: **16**

a) State the different types of pressure sensor and explain any one of them.
b) State the sensors used for Velocity and Acceleration application and explain any one of them.
c) With neat sketch explain spin casting method of surface processing.
d) Explain the wet etching MEMS Technology.
e) Define the Actuator and give their classifications.

Q.5 Attempt any two of the following: **12**

a) State the different types of light detector and explain any one of them.
b) State and explain the different types of metal used for fabrication of sensor.
c) State and explain the principle of operation of Electromechanical Actuators with advantages and disadvantages.

T. Y. (B. Tech) (Sem-II) (New) (CBCS) Examination: March/April-2025
ELECTRICAL ENGINEERING
Sensors & Applications (BTN07609)

Day & Date: Friday 06-June-2025 Max. Marks: 70
Time: 10:00 AM To 01:00 PM

Instructions: 1) Q. No. 1 is compulsory. It should be solved in the first 30 minutes in Answer Book Page no 03 (Starting page of the Answer Book). Each question carries one mark.
2) Don't forget to Mention question paper set (P/Q/R/S) on top of page.
3) Figures to the right indicate full marks.

MCQ/Objective Type Questions

Duration: 30 Minutes Marks:14

Q.1 Choose the correct Answer. **14**

1) Potentiometer as a displacement sensor works on the principle of _____.
a) Mutual Inductance
b) Self Inductance
c) Variable Resistance Transduction
d) Hall Effect

2) Proximity sensor is a _____ type of position sensor.
a) contact b) non-contact
c) eddy current d) resistive

3) In wet etching material is removed by _____.
a) Absorption
b) Sublimation
c) Chemical reaction
d) The force exerted due to flow of solvent

4) What is the main principle of electroplating?
a) Hydrolysis b) Neutralization
c) Esterification d) Saturation

5) The force developed in hydraulic systems is high due to _____.
a) High pressure b) More oil
c) Less pressure d) Less oil

6) Which type of coil is a solenoid?
a) Electromagnetic b) Electrical
c) Mechanical d) Chemical

7) What is the function of the flow control valve?
a) Controls the direction of flow of air
b) The moisture is separated and removed
c) It converts the mechanical energy to hydraulic energy
d) It controls the rate of flow of compressed air

8) Sound to electrical energy transducer _____.
a) Microphone b) AFR
c) Tactile sensor d) Pellistor

9) The sensors are classified on the basis of _____.
a) Functions b) Performance
c) Output d) All of the above

10) Which of the following represents the output of Hall Effect transducer?
a) Hall potential b) Emf
c) Applied voltage d) Lorentz Voltage

11) Piezoelectric effect is when materials produce electric charges when _____.
a) Voltage is applied b) Mechanical Stress is applied
c) Electric field is applied d) Magnetic field is applied

12) The smallest change which a sensor can detect is termed _____.
a) Accuracy b) Precision
c) Resolution d) Scale

13) A bridge circuit uses which method of measurement?
a) Absolute b) Relative
c) Differential d) Comparison

14) Which of the following method is employed for ADC?
a) Ladder network b) Successive approximation type
c) PWM type d) None of the mentioned

MCQ/Objective Type Questions

Duration: 20 Minutes Marks:10

Q.1 Choose the correct alternatives from the options and rewrite the Sentence. **10**

1) _____ use caution when working near electricity.
a) Always b) Never
c) Rarely d) Sometimes

2) _____ is the flow of electrons around a circuit.
a) Current b) Electricity
c) Power d) Voltage

3) _____ workers have little or no training working on or near electricity.
a) Pipeline b) Qualified
c) Rescue d) Unqualified

4) Electrical hazards include shock, electrical arcs and blasts, and _____ or faulty equipment.
a) Broken b) Double-insulated
c) Polished d) Secure

5) _____ is a measurement of how much energy you are using each second.
a) Distance b) Power
c) Volume d) Weight

6) Avoid working in _____ conditions.
a) Cold b) Dry
c) Sunny d) Wet

7) _____ all electrical equipment before use.

a) Clean b) Inspect
c) Label d) Organize

8) _____ gives a stray current somewhere to go and keeps workers from becoming part of the circuit.

a) De-energizing b) Energizing
c) Grounding d) Guarding

9) _____ tools are encased in plastic and prevent the user from getting electrocuted if the tool develops a short circuit.

a) Corded b) Double-insulated
c) Green colored d) Grounded

10) Specially designed PPE for electrical work includes _____ insulating gloves, matting, blankets, and covers.

MCQ/Objective Type Questions

Duration: 30 Minutes Marks:14

Q.1 Choose the correct Answer **14**

1) What is the advantage of Li-ion batteries over other similar types of storage systems?
a) High power b) High energy density
c) Temperature sensitivity d) Life time > 10 years

2) Flywheel Energy Storage Systems store energy in the form of:
a) Chemical energy b) Kinetic energy
c) Potential energy d) Electrical energy

3) Which of the following is NOT the characteristics of Ultra capacitor?
a) maintenance free
b) operate over a wide temperature range
c) slower charge rate
d) charged and discharged at the same rate

4) Which parameter describes the amount of power a battery can deliver at a given time?
a) Voltage b) Current
c) Capacity d) Resistance

5) Performance-criteria for electric vehicle batteries may include:
a) Longevity b) Rapid charging capability
c) High energy density d) All of the above

6) What is a common approach to modeling batteries?
a) Using only theoretical equations
b) Utilizing experimental data exclusively
c) Combining theoretical equations and experimental data
d) Ignoring both theory and experimentation

7) In battery modelling, what does SOC stand for?
a) State of Capacity
b) State of Control
c) State of Charge
d) State of Consumption

8) Why is battery monitoring essential in EVs and HEVs?
a) To increase battery lifespan
b) To reduce vehicle speed
c) To decrease energy efficiency
d) To eliminate battery overheating

9) Which component of a Battery Management System (BMS) is responsible for interfacing with external devices or systems?
a) Power Module
b) Battery
c) DC/DC Converter
d) Communication channel

10) Which standard is commonly used for ensuring battery safety in electric vehicles?
a) ISO 9001
b) ASTM D6319
c) UN ECE R100
d) ANSI/IEEE C62.41

11) What is a common leakage path for batteries?
a) Through the positive terminal only
b) Through the negative terminal only
c) Through both terminals
d) Through the center of the battery

12) Which materials can be recovered during battery recycling?
a) cobalt
b) Plastics
c) Electrolytes
d) All of the above

13) What can trigger a thermal runaway in batteries?
a) Low discharge rates
b) Stable environmental conditions
c) High charging and discharging currents
d) Absence of safety vents

14) What contributes to gas generation in batteries, leading to potential leakages?
a) Overcharging
b) Undercharging
c) Storing in a vacuum
d) Immersion in water

Seat No.		Set	P

T.Y. (B.Tech.) (Sem-II) (New) (CBCS) Examination: March/April-2025
ELECTRICAL ENGINEERING
Energy Management System for Electric Vehicle (BTN07614)

Day & Date: Thursday, 12-June-2025 Max. Marks: 56
Time: 10:00 AM To 01:00 PM

Instructions: 1) All questions are compulsory.
2) Figures to the right indicate full marks.

Section – I

Q.2 Solve any four **16**

a) Explain with chemical reactions charging process of a lead acid battery.
b) Explain in detail the flywheel energy storage element.
c) List and explain key electrical parameters used to describe battery performance.
d) Explain charging and discharging current with characteristics of a battery.
e) Explain in short nominal parameters of a battery.
f) Explain the concept of sensitivity analysis in the context of battery modelling.

Q.3 Solve any two **12**

a) Explain in details lithium-ion (Li-ion) and lithium-polymer (Li-poly) batteries and state the advancements and future trends in lithium-based battery technology.
b) Explain following regarding performance criteria for Electric Vehicles batteries:
i) Vehicle propulsion factors.
ii) Power and energy requirements of batteries
c) Develop a step-by-step explanation of the simulation model for a rechargeable NiCd battery.

Section -II

Q.4 Solve any four **16**

a) Explain in detail requirement of battery monitoring.
b) Explain the fundamentals of the battery pack design.
c) Describe the types of battery cell equalization methods.
d) Describes the EV Battery testing methods.
e) Write a short note on Battery Thermal Runway.
f) Describe the causes and consequences of gas generation in batteries.

Q.5 Solve any two **12**

a) Describe the voltage sensing in the battery management system.

b) Explain Environment and Human Health impact assessments of batteries.

c) Explain the Lithium-ion battery recycling process with a neat diagram.

T.Y. (B.Tech.) (Sem-II) (New) (CBCS) Examination: March/April-2025
ELECTRICAL ENGINEERING
Energy Management System for Electric Vehicle (BTN07614)

Day & Date: Thursday, 12-June-2025 Max. Marks: 70
Time: 10:00 AM To 01:00 PM

Instructions: 1) Q. No. 1 is compulsory. It should be solved in the first 30 minutes in Answer Book Page no 03 (Starting page of the Answer Book). Each question carries one mark.
2) Don't forget to Mention question paper set (P/Q/R/S) on top of page.
3) Figures to the right indicates full marks.

MCQ/Objective Type Questions

Duration: 30 Minutes Marks:14

Q.1 Choose the correct Answer **14**

1) Why is battery monitoring essential in EVs and HEVs?
a) To increase battery lifespan
b) To reduce vehicle speed
c) To decrease energy efficiency
d) To eliminate battery overheating

2) Which component of a Battery Management System (BMS) is responsible for interfacing with external devices or systems?
a) Power Module b) Battery
c) DC/DC Converter d) Communication channel

3) Which standard is commonly used for ensuring battery safety in electric vehicles?
a) ISO 9001 b) ASTM D6319
c) UN ECE R100 d) ANSI/IEEE C62.41

4) What is a common leakage path for batteries?
a) Through the positive terminal only
b) Through the negative terminal only
c) Through both terminals
d) Through the center of the battery

5) Which materials can be recovered during battery recycling?
a) cobalt b) Plastics
c) Electrolytes d) All of the above

6) What can trigger a thermal runaway in batteries?
a) Low discharge rates
b) Stable environmental conditions
c) High charging and discharging currents
d) Absence of safety vents

7) What contributes to gas generation in batteries, leading to potential leakages?

a) Overcharging b) Undercharging
c) Storing in a vacuum d) Immersion in water

8) What is the advantage of Li-ion batteries over other similar types of storage systems?

a) High power b) High energy density
c) Temperature sensitivity d) Life time > 10 years

9) Flywheel Energy Storage Systems store energy in the form of:

a) Chemical energy b) Kinetic energy
c) Potential energy d) Electrical energy

10) Which of the following is NOT the characteristics of Ultra capacitor?

a) maintenance free
b) operate over a wide temperature range
c) slower charge rate
d) charged and discharged at the same rate

11) Which parameter describes the amount of power a battery can deliver at a given time?

a) Voltage b) Current
c) Capacity d) Resistance

12) Performance-criteria for electric vehicle batteries may include:

a) Longevity b) Rapid charging capability
c) High energy density d) All of the above

13) What is a common approach to modeling batteries?

a) Using only theoretical equations
b) Utilizing experimental data exclusively
c) Combining theoretical equations and experimental data
d) Ignoring both theory and experimentation

14) In battery modelling, what does SOC stand for?

a) State of Capacity b) State of Control
c) State of Charge d) State of Consumption

4) Assume sutiable fata if necessary.

MCQ/Objective Type Questions

Duration: 30 Minutes Marks:14

Q.1 Choose the correct alternatives from the options. 14

1) Power supply frequency for 25 kV single phase system is _____
a) 161 b) 25
c) 50 d) 60

2) The coefficient of adhesion is highest when _____
a) The rails are dry b) The rails are oiled
c) The rails ark wet with dew d) The rails are dusty

3) When the speed of the train is estimated taking into account the time of stop at a station in addition to the actual running lime between stops, is known as _____
a) Average speed b) Schedule speed
c) Notching speed d) Free running speed.

4) Quadrilateral speed-time curve is the closer approximation for _____
a) Main line service b) Suburban service
c) Urban service d) Urban and suburban

5) Which motor has relatively wider range of speed control?
a) D.C. shunt motor b) Synchronous motor
c) Slip ring I.M. d) Squirrel cage I.M.

6) Change of frequency in the supply does not affect _____
a) Dielectric heating b) Resistance heating
c) Induction heating d) microwave heating

7) Which method of heating is likely to give leading power factor?
a) Electric are heating b) Induction heating
c) Dielectric heating d) Resistance heating

8) A single-phase induction motor is _____

a) Frequency b) Current
c) Voltage d) Capacitance

9) For are healing, the electrodes are made of _____

a) Copper b) Aluminum
c) Graphite d) ACSR conductor

10) Radiant efficiency of the luminous source depends on _____

a) Shape of the source b) temperature of the source
c) Wavelength of light rays d) all of the above.

11) Carbon arc lamps are commonly used in _____

a) Domestic lighting b) street lighting
c) Cinema projectors d) Photography.

12) The unit of luminous flux is _____

a) Steradian b) Candela
c) Lumen d) lux.

13) The Act which has been enacted to provide for efficient use of energy and its conservation and for matters connected therewith is?

a) Indian Electricity Act 2003
b) Energy Conservation Act 2001
c) Indian Electricity Act 2010
d) Energy Conservation Act 2007

T.Y. (B.Tech.) (Sem - II) (CBCS) Examination: March/April-2025
MECHANICAL ENGINEERING
Electrical Utilization (197045602)

Day & Date: Tuesday 27-05-2025 Max. Marks: 56
Time: 10:00 AM To 01:00 PM

Instructions: 1) All questions are compulsory.
2) Figures to the right indicate full marks.
3) Make suitable assumptions if necessary and state them clearly.
4) Draw neat diagrams whenever necessary.

Section – I

Q.2 Solve any four. **16**

a) Draw and explain speed time curve for main line services.
b) Desirable characteristic of traction motors.
c) Explain plugging breaking system in traction system.
d) Write short note on motor selection in textile industries.
e) A train is required to run between two stations 1.6 km apart at an average speed of 40 kmph. I he run is to be made to a simplified quadrilateral speed-time curve. If the maximum speed is limited to 64 kmph. Acceleration to 2.0 kmphps. Coasting and braking retardation to 0.16 kmphps and 3.2 kmphps. determine the duration of acceleration, coasting and braking periods.

Q.3 Solve any two. **12**

a) Derive an expression for Trapezoidal Speed-Time Curve.
b) Explain series-parallel control of traction motors.
c) Write note on motor selection in sugar mills.

Section – II

Q.4 Solve any four. **16**

a) Comparison between tungsten filament lamps and fluorescent tubes
b) Stale advantages and disadvantages electrical welding.
c) Describe with the help of a neat diagram the construction and working of a high pressure mercury vapour lamp.
d) Explain the laws of illumination.
e) Write a note on Energy Conservation in Transport.

Q.5 Solve any two **12**

a) Explain flood lighting.
b) Explain Energy Conservation Planning.
c) Explain direct resistance and indirect resistance heating.

T.Y. (B.Tech.) (Sem - II) (CBCS) Examination: March/April-2025
MECHANICAL ENGINEERING
Electrical Utilization (197045602)

Day & Date: Tuesday 27-05-2025 Max. Marks: 70
Time: 10:00 AM To 01:00 PM

Instructions: 1) Q. No. 1 is compulsory. It should be solved in the first 30 minutes in Answer Book Page no 03 (Starting page of the Answer Book). Each question carries one mark.
2) Don't forget to Mention question paper set (P/Q/R/S) on top of page.
3) Figures to the right indicates full marks.
4) Assume sutiable fata if necessary.

MCQ/Objective Type Questions

Duration: 30 Minutes Marks:14

Q.1 Choose the correct alternatives from the options. **14**

1) Change of frequency in the supply does not affect _____
a) Dielectric heating b) Resistance heating
c) Induction heating d) microwave heating

2) Which method of heating is likely to give leading power factor?
a) Electric are heating b) Induction heating
c) Dielectric heating d) Resistance heating

3) A single-phase induction motor is _____
a) Frequency b) Current
c) Voltage d) Capacitance

4) For are healing, the electrodes are made of _____
a) Copper b) Aluminum
c) Graphite d) ACSR conductor

5) Radiant efficiency of the luminous source depends on _____
a) Shape of the source b) temperature of the source
c) Wavelength of light rays d) all of the above.

6) Carbon arc lamps are commonly used in _____
a) Domestic lighting b) street lighting
c) Cinema projectors d) Photography.

7) The unit of luminous flux is _____
a) Steradian b) Candela
c) Lumen d) lux.

8) The Act which has been enacted to provide for efficient use of energy and its conservation and for matters connected therewith is?
a) Indian Electricity Act 2003
b) Energy Conservation Act 2001
c) Indian Electricity Act 2010
d) Energy Conservation Act 2007

9) Which of the following is more energy efficient?
a) Incandescent Bulb b) Fluorescent Tube light
c) CFL d) None of these

10) Power supply frequency for 25 kV single phase system is _____
a) 161 b) 25
c) 50 d) 60

11) The coefficient of adhesion is highest when _____
a) The rails are dry b) The rails are oiled
c) The rails ark wet with dew d) The rails are dusty

12) When the speed of the train is estimated taking into account the time of stop at a station in addition to the actual running lime between stops, is known as _____
a) Average speed b) Schedule speed
c) Notching speed d) Free running speed.

13) Quadrilateral speed-time curve is the closer approximation for _____
a) Main line service b) Suburban service
c) Urban service d) Urban and suburban

14) Which motor has relatively wider range of speed control?
a) D.C. shunt motor b) Synchronous motor
c) Slip ring I.M. d) Squirrel cage I.M.

3) Figures to the right indicates full marks.
4) Make suitable assumptions if necessary.

MCQ/Objective Type Questions

Duration: 30 Minutes Marks:14

Q.1 Select appropriate options. **14**

1) Voltage fluctuation is an _____ phenomenon.
a) Electric b) Electromagnetic
c) Magnetic d) None

2) Voltage imbalance is a condition in which the three -phase voltage differ in _____.
a) Amplitude b) Angle
c) Both d) None

3) Oscillatory transient is _____ in polarity.
a) Bidirectional b) Unidirectional
c) Both d) None

4) In which IEEE standards recommended practices and requirements for harmonic control in electrical power system is given _____.
a) IEEE 519 b) IEEE 1159
c) IEEE 518 d) IEEE 241

5) Harmonics can be eliminated by introducing which of the following _____.
a) Resonant circuit b) High Impedance
c) Filters d) Low Impedance path

6) Transient disturbance is produced in a circuit whenever _____.
a) it is suddenly connected or disconnected from the supply
b) it is shorted
c) it's applied voltage is changed suddenly
d) all of the above

7) There are no transients in pure resistive circuit because they are _____.
a) offer high resistance
b) Obey Ohm's Law
c) have no stored energy
d) are linear circuits

8) Shunt compensation does _____.
a) not provide end of line voltage support to prevent voltage instability
b) provide only mid of line voltage support to prevent voltage instability
c) provide end of line voltage support to prevent voltage instability
d) may or may not provide end of line voltage support to prevent voltage instability

9) Shunt connected, fixed or switched reactors are applied to _____.
a) Minimize line overvoltage under light load conditions
b) Minimize line overvoltage under heavy load conditions
c) Maximize line overvoltage under light load conditions
d) Maximize line overvoltage under heavy load conditions

10) The voltage Stability limit _____.
a) Increases with inductive loads and decreases with capacitive loads
b) Decreases with inductive loads and increases with capacitive loads
c) Decreases with inductive loads and capacitive loads
d) Increases with inductive loads and capacitive loads

11) FACTS devices used in _____.
a) Generation
b) AC Transmission
c) DC Transmission
d) None

12) Which are the shunt compensation devices?
a) TCSC
b) SSSC
c) UPFC
d) SVC

13) UPFC can control _____.
a) Voltage
b) Impedance
c) Phase angle
d) All above

14) Transmission Interconnections is done for _____.
a) Economic reasons
b) To reduce the cost of electricity
c) To improve reliability of power supply
d) All of the above

3) Make suitable assumptions if necessary.

Section – I

Q.2 Solve Any Four. **16**

a) Explain various effects of harmonics in the power system.
b) Explain International standards of power quality.
c) Explain Long duration voltage variations with its causes.
d) Compare the terms Sag and Swell.
e) Which are the different types of power quality measurement equipment?

Q.3 Solve Any Two. **12**

a) Define and write equations of following harmonic indices.
i) Individual Harmonic Distortion,
ii) Total Harmonic Distortion
iii) Total Demand Distortion
b) Explain Spectrum Analyzers and harmonic Analyzers.
c) Explain Transients:
i) Impulsive and
ii) Oscillatory

Section – II

Q.4 Solve Any Four. **16**

a) Explain construction and working of FC-TCR.
b) Explain the objective of midpoint compensation for shunt compensation.
c) Explain working of SSSC.
d) What are the objectives of Voltage and phase angle Regulator?
e) Explain V-I characteristics of STATCOM and SVC.

Q.5 Solve Any Two. **12**

a) Explain working principal of GCSC and TSSC.
b) Explain the control structure and applications of IPFC System.
c) What are the different types of FACTS devices and also its importance in Transmission network?

3) Figures to the right indicates full marks.
4) Make suitable assumptions if necessary and state them clearly.

MCQ/Objective Type Questions

Duration: 30 Minutes Marks:14

Q.1 Multiple choice question. **14**

1) Convolution is use to find _____.
a) The impulse response of an LTI System
b) Frequency response of a System
c) The time response of a LTI system
d) The phase response of a LTI system

2) The trigonometric Fourier series of an even function of time does not have _____.
a) The dc term
b) Cosine terms
c) Sine terms
d) Odd harmonic terms

3) Find the value of $h[n]^{*}\delta[n-1], \delta[n]$ being the Delta function _____.
a) $h[n-2]$
b) $h[n]$
c) $h[n-1]$
d) $h[n+1]$

4) Does the system $h(t) = \exp(-7t)$ correspond to a stable system?
a) Yes
b) No
c) Marginally Stable
d) No one of the above

5) All energy signals will have an average power _____.
a) Infinite
b) Zero
c) Positive
d) Cannot be calculated

6) The even part to fa signal $x(t)$ is _____.
a) $x(t) + x(-t)$
b) $x(t) - x(-t)$
c) $(1/2)^{*}\,(x(t) + x(-t))$
d) $(1/2)^{*}\,(x(t) - x(-t))$

7) If sequence $y(n) = x(-n)$ then it is _____.
a) Causal
b) Non-causal
c) Depends on $x(-n)$
d) None

8) Two discrete time systems with impulse responses $h_1[n] = \delta[n-1]$and $h_2[n] = \delta[n-2]$ are connected in cascade. The overall impulse response of the cascaded system is _____.
a) $\delta[n-1] + \delta[n-2]$
b) $\delta[n-4]$
c) $\delta[n-3]$
d) $\delta[n-1]^{*}\delta[n-2]$

9) If $x(z) = \{1, 2, 1, 2, 3\}$ ROC is _____.
a) Entire z- plane
b) Entire z-plane except $z = \infty$
c) Entire z-plane except $z = 0, z = \infty$
d) Entire z-plane except $z = 0$

10) The ROC must be _____.
a) Divided region
b) Connected region
c) Partly connected & partly divided
d) None

11) In DIF FFT algorithm input sequence is _____.
a) In natural order
b) bit reversed order
c) in ascending order
d) descending order

12) In DIT FFT algorithm, the number of complex multiplications is given by _____.
a) $N\log_2 (N/2)$
b) $N\log_2 (N/3)$
c) $(N/2)\log_2 N$
d) $N\log_2(N)$

13) In DIF FFT algorithm, Exponent repeat factor (ERF) is given by _____.
a) 2^{M-m}
b) 2^{M-1}
c) 2^{m-M}
d) 2^{m-1}

14) For an N-point FFT algorithm with $N = 2m$, which one of the following statements is TRUE?
a) It is not possible to construct is signal flow graph with both input and output in normal order.
b) The number of butterflies in the mth state is N/m
c) In-place computation requires storage of only $2N$ node data
d) Computation of a butterfly requires only one complex multiplication.

Set **P**

Fourth. Y (B.Tech.) (Sem-I) (New) (CBCS) Examination: March/April-2025
ELECTRICAL ENGINEERING
Signals and System (BTN07702)

Day & Date: Tuesday, 03-06-2025 Max. Marks: 56
Time: 03:00 PM To 06:00 PM

Instructions: 1) All questions are compulsory.
2) Figures to the right indicate full marks.
3) Make suitable assumptions (if necessary and state them clearly).

Section – I

Q.2 Attempt any four of the following. **16**

a) Define the terms w.r.t. signals.
i) Causal and Non-causal signal
ii) Energy signal, Power signal
iii) Even signal, Odd signal

b) Determine the energy and power of the signal.
$x(n) = (1/5)^n \, .u(n)$

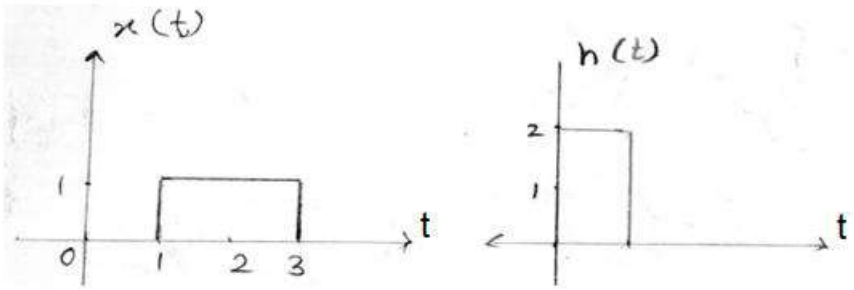
c) Find the impulse response of DT-LTI system with input $x[n]$ and impulse response $h[n]$ as given below
$x[n] = 2n, \quad -1 \leq n \geq 2$
$h[n] = n^2, \quad 0 \leq n \geq 3$

d) Derive the expression for even & odd components of a CT signal.

e) Check the following property of signal
i) Stable, unstable
ii) Invertible, Non Invertible
If, $Y(t) = x(t) + x(t+3)$

Q.3 Attempt any two of the following. **12**

a) Find the convolution of two signal as shown in below.



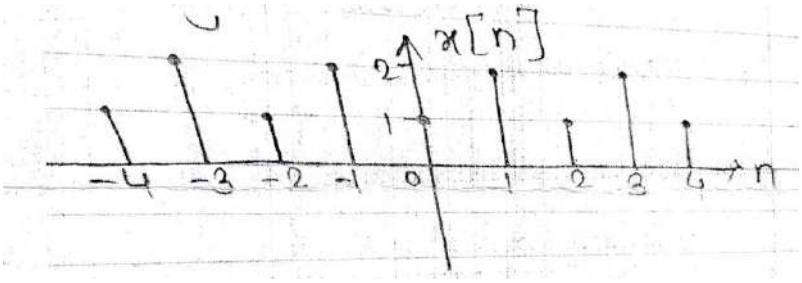
b) Explain properties of DT-LTI system.

c) A DT sequence $X[n]$ is shown below; sketch and label the following signals.

i) $X[n+2]$

ii) $X[n-4]$

iii) $X[2n]$



Section – II

Q.4 Attempt any four of the following. **16**

a) Find the Z-Transform and ROC of given signal
$x(n) = a^n.u(n)$

b) Determine the discrete time signal $x(n)$ whose Fourier transform is,
$X(e^{j\omega}) = 1 \quad -\omega_c < \omega < \omega_c$
$= 0 \quad -\omega_c < |\omega| < \pi$

c) Explain the time scaling property of Fourier transform and hence find the Fourier transform of
$f(t) = e^{-0.5t}u(t)$

d) Explain the Continuous time Fourier series for a periodic signal.

e) Explain Complex exponential Fourier series.

Q.5 Attempt any two of the following. **12**

a) State the properties of *Z* Transform and explain any two.

b) Compute 8 point DFT of sequence using DIF FFT algorithm.
$x(n) = 1 \quad \text{for } 0 \le n \le 7$
$= 0 \quad \text{otherwise}$

c) List properties of DFT and explain any two.

Fourth. Y (B.Tech.) (Sem-I) (New) (CBCS) Examination: March/April-2025
ELECTRICAL ENGINEERING
Signals and System (BTN07702)

Day & Date: Tuesday, 03-06-2025 Max. Marks: 70
Time: 03:00 PM To 06:00 PM

Instructions: 1) Q. No. 1 is compulsory. It should be solved in the first 30 minutes in Answer Book Page no 03 (Starting page of the Answer Book). Each question carries one mark.
2) Don't forget to Mention question paper set (P/Q/R/S) on top of page.
3) Figures to the right indicates full marks.
4) Make suitable assumptions if necessary and state them clearly.

MCQ/Objective Type Questions

Duration: 30 Minutes Marks:14

Q.1 Multiple choice question. **14**

1) Two discrete time systems with impulse responses $h_1[n] = \delta[n-1]$and $h_2[n] = \delta[n-2]$ are connected in cascade. The overall impulse response of the cascaded system is _____.
a) $\delta[n-1] + \delta[n-2]$ b) $\delta[n-4]$
c) $\delta[n-3]$ d) $\delta[n-1]^{*}\delta[n-2]$

2) If $x(z) = \{1, 2, 1, 2, 3\}$ ROC is _____.
a) Entire z- plane
b) Entire z-plane except $z = \infty$
c) Entire z-plane except $z = 0, z = \infty$
d) Entire z-plane except $z = 0$

3) The ROC must be _____.
a) Divided region
b) Connected region
c) Partly connected & partly divided
d) None

4) In DIF FFT algorithm input sequence is _____.
a) In natural order b) bit reversed order
c) in ascending order d) descending order

5) In DIT FFT algorithm, the number of complex multiplications is given by _____.
a) $N\log_2 (N/2)$ b) $N\log_2 (N/3)$
c) $(N/2)\log_2 N$ d) $N\log_2(N)$

6) In DIF FFT algorithm, Exponent repeat factor (ERF) is given by _____.

a) 2^{M-m} b) 2^{M-1}

c) 2^{m-M} d) 2^{m-1}

7) For an N-point FFT algorithm with $N = 2m$, which one of the following statements is TRUE?

a) It is not possible to construct is signal flow graph with both input and output in normal order.

b) The number of butterflies in the mth state is N/m

c) In-place computation requires storage of only $2N$ node data

d) Computation of a butterfly requires only one complex multiplication.

8) Convolution is use to find _____.

a) The impulse response of an LTI System

b) Frequency response of a System

c) The time response of a LTI system

d) The phase response of a LTI system

9) The trigonometric Fourier series of an even function of time does not have _____.

a) The dc term b) Cosine terms

c) Sine terms d) Odd harmonic terms

10) Find the value of $h[n]^{*}\delta[n-1], \delta[n]$ being the Delta function _____.

a) $h[n-2]$ b) $h[n]$

c) $h[n-1]$ d) $h[n+1]$

11) Does the system $h(t) = \exp(-7t)$ correspond to a stable system?

a) Yes b) No

c) Marginally Stable d) No one of the above

12) All energy signals will have an average power _____.

a) Infinite b) Zero

c) Positive d) Cannot be calculated

13) The even part to fa signal $x(t)$ is _____.

a) $x(t) + x(-t)$ b) $x(t) - x(-t)$

c) $(1/2)^{*}\,(x(t) + x(-t))$ d) $(1/2)^{*}\,(x(t) - x(-t))$

14) If sequence $y(n) = x(-n)$ then it is _____.

a) Causal b) Non-causal

c) Depends on $x(-n)$ d) None

MCQ/Objective Type Questions

Duration: 30 Minutes Marks:14

Q.1 Choose the correct Alternatives. 14

1) A relay is used to _____.
a) Break the fault current
b) Sense the current
c) Sense the fault and direct to trip the circuit breaker
d) All of these

2) Discrimination between main and back up protection is provided by which of the following relays _____.
a) Fact b) Sensitive
c) Slow d) None of the above

3) Differential relays are used for protection of equipment's against _____.
a) Internal faults b) Over current
c) Reverse current d) Reverse power

4) By which of the following methods major portion of the heat generated in a H.R.C. fuse is dissipated?
a) Radiation b) Convection
c) Conduction d) All of the above

5) The Circuit Breaker Rating in terms of _____.
a) Current b) Voltage
c) VAR d) KVA

6) Which of the following relay has inherent directional characteristic?
a) Mho b) Reactance
c) Impedance d) None of the above

7) For ground fault, which of the relay is preferred?
a) Plain impedance relay b) Directional relay
c) Reactance relay d) Overcurrent relay

8) For which of the following protection from negative sequence currents is provided?
a) Generators b) Motors
c) Transmission line d) Transformers

9) To limit short-circuit current in a power system are used _____.
a) Earth wires b) Isolators
c) H.R.C. fuses d) Reactors

10) Why is it difficult to interrupt a capacitive circuit?
a) The current has a leading power factor
b) The restriking voltage can be high
c) Current magnitude is very small
d) Stored energy in the capacitor is very high

11) Which circuit breaker is preferred to be installed in extra high voltage ac system?
a) Bulk oil type circuit breaker b) Air blast circuit breaker
c) Vacuum circuit breaker d) SF6 circuit breaker

12) Protection by fuses is generally not used beyond _____.
a) 20 A b) 200 A
c) 100 A d) 50 A

13) What is the main purpose of oil in oil circuit breakers?
a) Provide insulation b) Quenching arc
c) Provide cooling of contacts d) None of the above

14) Surge absorber _____ the energy of travelling waves.
a) Absorbs
b) Reflects
c) Diverts
d) Partly absorbs and partly diverts

Q.2 Solve any four. **16**

a) What are the desirable qualities of a protective scheme?
b) Define the following.
i) Plug setting Multiplier ii) Time setting Multiplier
c) Explain out of step blocking scheme.
d) Write the application of fuse and selection of fuse.
e) What is primary and back up protection of relay?
f) Define the following.
i) Pick up current ii) Current setting relay
iii) fuse iv) Rewirable fuse

Q.3 Solve any two. **12**

a) Derive torque equation for induction relay in detail.
b) Explain Percentage differential relay with neat sketch.
c) What are the types of distance relay? Explain Admittance relay in detail.

Section – II

Q.4 Solve any four. **16**

a) With a neat sketch explain Buchholz Relay.
b) Explain the phenomenon of current chopping.
c) Briefly describe MCB and MCCB.
d) With neat sketch explain metal oxide ZnO arrestors.
e) Explain current zero interruption methods.
f) Explain air blast circuit breakers.

Q.5 Solve any two. **12**

a) With suitable diagram explain construction & operation of SF6 circuit breaker. Also state its advantages and disadvantages.
b) Derive an expression for Rate of Rise of Restriking Voltage (RRRV).
c) What is the phenomenon of arcing in circuit breaker? Explain the methods of arc extinction in detail.

Fourth. Y. (B.Tech.) (Sem - I) (New) (CBCS) Examination: March/April - 2025
ELECTRICAL ENGINEERING
Switchgear and Protection (BTN07703)

Day & Date: Wednesday, 04-06-2025 Max. Marks: 70
Time: 03:00 PM To 06:00 PM

Instructions: 1) Q. No. 1 is compulsory. It should be solved in the first 30 minutes in Answer Book Page no 03 (Starting page of the Answer Book). Each question carries one mark.
2) Don't forget to Mention question paper set (P/Q/R/S) on top of page.
3) Figures to the right indicates full marks.

MCQ/Objective Type Questions

Duration: 30 Minutes Marks:14

Q.1 Choose the correct Alternatives. **14**

1) For which of the following protection from negative sequence currents is provided?
a) Generators b) Motors
c) Transmission line d) Transformers

2) To limit short-circuit current in a power system are used _____.
a) Earth wires b) Isolators
c) H.R.C. fuses d) Reactors

3) Why is it difficult to interrupt a capacitive circuit?
a) The current has a leading power factor
b) The restriking voltage can be high
c) Current magnitude is very small
d) Stored energy in the capacitor is very high

4) Which circuit breaker is preferred to be installed in extra high voltage ac system?
a) Bulk oil type circuit breaker b) Air blast circuit breaker
c) Vacuum circuit breaker d) SF6 circuit breaker

5) Protection by fuses is generally not used beyond _____.
a) 20 A b) 200 A
c) 100 A d) 50 A

6) What is the main purpose of oil in oil circuit breakers?
a) Provide insulation b) Quenching arc
c) Provide cooling of contacts d) None of the above

7) Surge absorber _____ the energy of travelling waves.
a) Absorbs
b) Reflects
c) Diverts
d) Partly absorbs and partly diverts

8) A relay is used to _____.
a) Break the fault current
b) Sense the current
c) Sense the fault and direct to trip the circuit breaker
d) All of these

9) Discrimination between main and back up protection is provided by which of the following relays _____.
a) Fact
b) Sensitive
c) Slow
d) None of the above

10) Differential relays are used for protection of equipment's against _____.
a) Internal faults
b) Over current
c) Reverse current
d) Reverse power

11) By which of the following methods major portion of the heat generated in a H.R.C. fuse is dissipated?
a) Radiation
b) Convection
c) Conduction
d) All of the above

12) The Circuit Breaker Rating in terms of _____.
a) Current
b) Voltage
c) VAR
d) KVA

13) Which of the following relay has inherent directional characteristic?
a) Mho
b) Reactance
c) Impedance
d) None of the above

14) For ground fault, which of the relay is preferred?
a) Plain impedance relay
b) Directional relay
c) Reactance relay
d) Overcurrent relay

ELECTRICAL ENGINEERING
Switchgear and Protection (BTN07703)

Day & Date: Wednesday, 04-06-2025 Max. Marks: 56
Time: 03:00 PM To 06:00 PM

Instructions: 1) All questions are compulsory.
2) Figures to the right indicate full marks.

Section – I

Q.2 Solve any four. **16**

a) What are the desirable qualities of a protective scheme?
b) Define the following.
i) Plug setting Multiplier ii) Time setting Multiplier
c) Explain out of step blocking scheme.
d) Write the application of fuse and selection of fuse.
e) What is primary and back up protection of relay?
f) Define the following.
i) Pick up current ii) Current setting relay
iii) fuse iv) Rewirable fuse

Q.3 Solve any two. **12**

a) Derive torque equation for induction relay in detail.
b) Explain Percentage differential relay with neat sketch.
c) What are the types of distance relay? Explain Admittance relay in detail.

Section – II

Q.4 Solve any four. **16**

a) With a neat sketch explain Buchholz Relay.
b) Explain the phenomenon of current chopping.
c) Briefly describe MCB and MCCB.
d) With neat sketch explain metal oxide ZnO arrestors.
e) Explain current zero interruption methods.
f) Explain air blast circuit breakers.

Q.5 Solve any two. **12**

a) With suitable diagram explain construction & operation of SF6 circuit breaker. Also state its advantages and disadvantages.

MCQ/Objective Type Questions

Duration: 30 Minutes Marks:14

Q.1 Solve All MCQ Questions **14**

1) Economic dispatch problem _____
a) To minimize the operating cost
b) To minimize fuel cost only
c) To minimize the load demand
d) To minimize the cost of transportation

2) What is the unit of transmission loss coefficient?
a) MW b) $(MW)^{-1}$
c) Unit less d) $(MW)^{2}$

3) The main economic factor in power system operation is _____
a) The cost of reactive power consumption
b) The cost of power generation
c) The cost of operation and maintenance
d) The cost of power transmission

4) The most efficient unit is loaded first then the less efficient unit follow, is called _____
a) Priority ordering b) Dynamic Programming
c) Patton's Security d) None of these

5) A unit when scheduled when scheduled for connection tod to be the system is said _____
a) Loaded b) Committed
c) Disconnected d) All of these

6) Which of the VAR compensators can be used for both heavy and light load conditions _____

a) SVC b) Shunt Reactor
c) Series Capacitor d) None of the above

7) A security analysis program uses _____

a) AC load flow b) DC load flow
c) Both AC and DC load flow d) None

8) Power system static security level are _____

a) 4 b) 5
c) 6 d) 2

9) Voltage stability problem normally occurs _____

a) Heavily stressed system b) Medium stressed system
c) Low stressed system d) None of these

10) Voltage stability is basically _____

a) Generator stability b) Load stability
c) Transformer stability d) None

11) Security assessment involves _____

a) System monitoring b) Contingency analysis
c) Both of above d) Not divided

12) Thermal unit constraint considered in unit commitment problem is ____

a) Minimum up-down time b) Crew constraint
c) Start up cost d) All of these

13) Power balance equation is _____ constraint

a) Equality b) Inequality
c) Security d) Branch transfer capacity

14) The penalty factor ____

a) Is always less than 1 b) Is always more than 1
c) May be more or less than 1 d) Is equal to or less than 1

Fourth.Y. (B.Tech.) (Sem - I) (New) (CBCS) Examination: March/April-2025
ELECTRICAL ENGINEERING
Power System and Operation Control (BTN07707)

Day & Date: Thursday, 05-June-2025 Max. Marks: 56
Time: 03:00 PM To 06:00 PM

Instructions: 1) All question are compulsory.
2) Figures to the right indicate full marks.

Section – I

Q.2 Solve any four **16**

a) Explain with a mathematical formulation, optimum generation allocation without transmission losses
b) Explain the different thermal unit constrains.
c) What do you understand by production cost of power generated?
d) What is mean by spinning reserve?
e) Explain speed governing system with neat sketch.

Q.3 Solve any two. **12**

a) What are methods of unit commitment? With a suitable example explain Dynamic Programming method of unit commitment.
b) The fuel input per hour of plant 1 & plant 2 are given as follows
$F_1 = 0.2P_1^2 + 40P_1 + 120$ Rs/hr
$F_2 = 0.25P_2^2 + 30P_2 + 150$ Rs/hr
Determine the economic operating schedule and corresponding cost of generation if the maximum & minimum loading on each unit is 100MW & 25MW. The shared by both units demand is 180MW and transmission losses neglected. If load is equally shared by both units, determine saving obtained by loading the units as per equal incremental production cost.
c) Explain with illustrative transfer function of the load frequency control of two area system. Draw the block diagram for two area system.

Section – II

Q.4 Solve any four. **16**

a) Explain system state classification with neat diagram.
b) Explain the different methods of improving voltage stability.
c) Explain specifications of load compensator.
d) Explain the difference between voltage angle and voltage stability.
e) Explain the necessity of reactive power compensation.

Q.5 Solve any two **12**

a) Write the advantages and dis-advantages of different types of compensating equipment for transmission system.

b) Explain the necessity of power system security.

c) Explain effective counter measures to prevent voltage instability & methods of improving voltage stability.

Determine the economic operating schedule and corresponding cost of generation if the maximum & minimum loading on each unit is 100MW & 25MW. The shared by both units demand is 180MW and transmission losses neglected. If load is equally shared by both units, determine saving obtained by loading the units as per equal incremental production cost.
c) Explain with illustrative transfer function of the load frequency control of two area system. Draw the block diagram for two area system.

Section – II

Q.4 Solve any four. **16**

a) Explain system state classification with neat diagram.
b) Explain the different methods of improving voltage stability.
c) Explain specifications of load compensator.
d) Explain the difference between voltage angle and voltage stability.
e) Explain the necessity of reactive power compensation.

Q.5 Solve any two **12**

a) Write the advantages and dis-advantages of different types of compensating equipment for transmission system.

b) Explain the necessity of power system security.

c) Explain effective counter measures to prevent voltage instability & methods of improving voltage stability.

Fourth.Y. (B.Tech.) (Sem - I) (New) (CBCS) Examination: March/April-2025
ELECTRICAL ENGINEERING
Power System and Operation Control (BTN07707)

Day & Date: Thursday, 05-June-2025 Max. Marks: 70
Time: 03:00 PM To 06:00 PM

Instructions: 1) Q. No. 1 is compulsory. It should be solved in the first 30 minutes in Answer Book Page no 03 (Starting page of the Answer Book). Each question carries one mark.
2) Don't forget to Mention question paper set (P/Q/R/S) on top of page.
3) Figures to the right indicates full marks.
4) Assume suitable data if necessary.

MCQ/Objective Type Questions

Duration: 30 Minutes Marks:14

Q.1 Solve All MCQ Questions **14**

1) Which of the VAR compensators can be used for both heavy and light load conditions _____
a) SVC b) Shunt Reactor
c) Series Capacitor d) None of the above

2) A security analysis program uses _____
a) AC load flow b) DC load flow
c) Both AC and DC load flow d) None

3) Power system static security level are _____
a) 4 b) 5
c) 6 d) 2

4) Voltage stability problem normally occurs _____
a) Heavily stressed system b) Medium stressed system
c) Low stressed system d) None of these

5) Voltage stability is basically _____
a) Generator stability b) Load stability
c) Transformer stability d) None

6) Security assessment involves _____
a) System monitoring b) Contingency analysis
c) Both of above d) Not divided

7) Thermal unit constraint considered in unit commitment problem is ____
a) Minimum up-down time b) Crew constraint
c) Start up cost d) All of these

8) Power balance equation is _____ constraint

a) Equality b) Inequality
c) Security d) Branch transfer capacity

9) The penalty factor ____

a) Is always less than 1 b) Is always more than 1
c) May be more or less than 1 d) Is equal to or less than 1

10) Economic dispatch problem _____

a) To minimize the operating cost
b) To minimize fuel cost only
c) To minimize the load demand
d) To minimize the cost of transportation

11) What is the unit of transmission loss coefficient?

a) MW b) $(MW)^{-1}$
c) Unit less d) $(MW)^{2}$

12) The main economic factor in power system operation is _____

a) The cost of reactive power consumption
b) The cost of power generation
c) The cost of operation and maintenance
d) The cost of power transmission

13) The most efficient unit is loaded first then the less efficient unit follow, is called _____

a) Priority ordering b) Dynamic Programming
c) Patton's Security d) None of these

14) A unit when scheduled when scheduled for connection tod to be the system is said _____

a) Loaded b) Committed
c) Disconnected d) All of these

ELECTRICAL ENGINEERING
Power System and Operation Control (BTN07707)

Day & Date: Thursday, 05-June-2025 Max. Marks: 56
Time: 03:00 PM To 06:00 PM

Instructions: 1) All question are compulsory.
2) Figures to the right indicate full marks.

Section – I

Q.2 Solve any four **16**

a) Explain with a mathematical formulation, optimum generation allocation without transmission losses
b) Explain the different thermal unit constrains.
c) What do you understand by production cost of power generated?
d) What is mean by spinning reserve?
e) Explain speed governing system with neat sketch.

Q.3 Solve any two. **12**

a) What are methods of unit commitment? With a suitable example explain Dynamic Programming method of unit commitment.
b) The fuel input per hour of plant 1 & plant 2 are given as follows
$F_1 = 0.2P_1^2 + 40P_1 + 120$ Rs/hr
$F_2 = 0.25P_2^2 + 30P_2 + 150$ Rs/hr
Determine the economic operating schedule and corresponding cost of generation if the maximum & minimum loading on each unit is 100MW & 25MW. The shared by both units demand is 180MW and transmission losses neglected. If load is equally shared by both units, determine saving obtained by loading the units as per equal incremental production cost.
c) Explain with illustrative transfer function of the load frequency control of two area system. Draw the block diagram for two area system.

3) Figures to the right indicates full marks.
4) Make suitable assumptions (if necessary and state them clearly).

MCQ/Objective Type Questions

Duration: 30 Minutes Marks:14

Q.1 Choose the correct Answer. **14**

1) Which of the following is not the characteristic of the existing grid?
a) Manual Monitoring b) Failures and Blackout
c) Self-healing d) One way communication

2) Which of the following is not the characteristic of the existing grid?
a) Automated Metering Instrument
b) Alternate Metering Instrument
c) Advance Metering Infrastructure
d) Advance Metering Instrument

3) Which of the following types of loading pattern are prone to cause voltage Instability in the micro grid?
a) Constant power loads
b) Voltage dependent loads
c) Frequency dependent loads
d) All of the above

4) The control of Micro grid is performed by the ____.
a) SCADA System b) PLC System
c) Smart grid System d) None of the above

5) The data retrieval from smart meters and decision making should be as quick as possible by using which software?
a) ETAP b) EMS
c) SCADA d) PWA

6) The following types of inverters may not be suitable for grid connected mode ____.
a) Grid feeding converters b) Grid forming converters
c) Grid supporting converters d) None of the above

7) Smart Grid goals include all but the following:
a) Potentially Reducing Our Carbon Foot-print
b) Introducing advancements and efficiencies yet to be envisioned
c) Assimilate all cultures to become American
d) Maintaining Grid Affordability

8) The transmission network is typically operated by ____.
a) Load Dispatch Centers
b) Distribution Company
c) Regional Load Dispatch Center
d) Generation Company

9) The Main difference between Conventional Grid & Smart Grid is ____.
a) Unidirectional Flow of Power
b) Unidirectional and bidirectional flow of power and information respectively
c) Bidirectional flow of information
d) Bidirectional & Unidirectional flow of power

10) Energy Services Interface (ESI) communicates with other domain via: ____.
a) AMI infrastructure or Internet
b) Home Area Network
c) Local Area Network
d) None of the above

11) How much power is lost in the grid due to resistance?
a) 2-5% b) 7-10%
c) 11-14% d) 15-18%

12) The simplest form of conventional grid is ____.
a) Smart grid b) Radial grid
c) Linear grid d) Interconnected grid

13) PQM stands for ____.
a) Power Quantity Management b) Power Quality Management
c) Power Quantity Measurement d) Power Quality Measurement

14) Smart meter is an important element in building the smart grid. These advanced meters ____.
a) Measure electricity usage in real time
b) Can send data to and from electric companies and their customers
c) Allows companies to give customers more information about their electricity usage and communicate current electricity prices
d) All of the above

2) Don't forget to Mention question paper set (P/Q/R/S) on top of page.
3) Figures to the right indicates full marks.

MCQ/Objective Type Questions

Duration: 30 Minutes Marks:14

Q.1 Choose the correct Answer. **14**

1) Distribution automation (DA) is a family of technologies, including _____.
a) sensors,
b) processors,
c) information and communication networks
d) all of above

2) Short term regular variations related to the calendar or time of day is known as _____.
a) Trend b) Seasonality
c) Cycles d) Random Variations

3) The extrapolation method is based on the _____.
a) Curve fitting to present data
b) Extrapolation of pastdata
c) Extrapolation of present data
d) Curve fitting to previous data available

4) Factors affecting load forecasting are _____.
a) Weather condition b) Time factors
c) Special events d) All of these

5) In order to have a lower cost of electrical energy generation _____.
a) The load factor and diversity factor should be low
b) The load factor should be low but diversity factor should be high
c) The load factor should be high but diversity factor should be low
d) The load factor and diversity factor should be high

6) Distribution SCADA means _____.
   a) data acquisition
   b) man - machine interface
   c) data archiving
   d) all of the above

7) For Long term planning time period is _____.
   a) 0-2 years
   b) 2-5 years
   c) 5-10 years
   d) All above

8) The main objective of energy management is to _____.
   a) Minimize energy cost
   b) Minimum environmental effects
   c) Maintain optimum energy procurement and utilization
   d) All of these

9) The reduction of utility load primarily during peak demand is known as _____.
   a) Peak clipping
   b) Load shifting
   c) Valley filling
   d) MTP analysis

10) The demand side management can be achieved by the technique of _____.
   a) Time of day pricing and metering
   b) Multi - utility power exchange model
   c) Load management
   d) All of these

11) The transmission planning effort includes _____.
   a) technical aspects of transmission studies
   b) clarifying study assumptions
   c) undertaking technical analysis, documenting study results
   d) All above

12) Transmission efficiency of line increases with the _____.
   a) Decrease in power factor and voltage
   b) Increase in power factor and voltage
   c) Increase in power factor but Decrease in voltage
   d) Increase in Voltage but Decrease in power factor

13) Energy conservation Usually requires _____.
   a) New investment in more efficient equipments
   b) Replace old instruments
   c) Small decrease in convenience or comfort also tolerated
   d) All above

14) Demand side management is required to _____.
   a) Reduce overall cost of installed capacity
   b) Reduce needs of peaking stations
   c) Ensure quality and equity of supply

Fourth. Y. (B. Tech) (Sem-I) (New) (CBCS) Examination: March/April-2025
ELECTRICAL ENGINEERING
Power System Planning (BTN07711)

Day & Date: Friday 06-June-2025 Max. Marks: 56
Time: 03:00 PM To 06:00 PM

Instructions: 1) All questions are compulsory.
2) Figures to the right indicate full marks.

Section – I

Q.2 Attempt any four of the following: **16**

a) Give the classification of load and Explain load growth characteristics for various loads.
b) Describe different methodologies used for load forecasting.
c) Elaborate weather load model and explain how to get peak demand forecasting?
d) Write a short note on generation sources.
e) Explain Long term Planning.

Q.3 Attempt any two of the following: **12**

a) Explain the objectives of generation planning.
b) Write note on Cost Analysis.
c) What do you mean by Distribution Automation? Explain tools of distribution automation.

Section – II

Q.4 Attempt any four of the following: **16**

a) Explain the Objectives of Transmission Planning.
b) What do you mean by Energy audit?
c) Write short note on listing of energy conservation opportunities (ECOs).
d) Explain the network reconfiguration.
e) Discuss energy conservation measures for industries.

Q.5 Attempt any TWO. **12**

a) Explain the concept of Demand Side Management. Discuss the steps involved in DSM Management.
b) Explain New algorithms and methods relating to power system planning.
c) Describe the following terms of load control
1) Peak clipping
2) Valley filling
3) Load shedding
4) Strategic energy conservation

Fourth. Y. (B. Tech) (Sem-I) (New) (CBCS) Examination: March/April-2025
ELECTRICAL ENGINEERING
Power System Planning (BTN07711)

Day & Date: Friday 06-June-2025 Max. Marks: 70
Time: 03:00 PM To 06:00 PM

Instructions: 1) Q. No. 1 is compulsory. It should be solved in the first 30 minutes in Answer Book Page no 03 (Starting page of the Answer Book). Each question carries one mark.
2) Don't forget to Mention question paper set (P/Q/R/S) on top of page.
3) Figures to the right indicates full marks.

MCQ/Objective Type Questions

Duration: 30 Minutes Marks:14

Q.1 Choose the correct Answer. **14**

1) The main objective of energy management is to _____.
a) Minimize energy cost
b) Minimum environmental effects
c) Maintain optimum energy procurement and utilization
d) All of these

2) The reduction of utility load primarily during peak demand is known as _____.
a) Peak clipping b) Load shifting
c) Valley filling d) MTP analysis

3) The demand side management can be achieved by the technique of _____.
a) Time of day pricing and metering
b) Multi - utility power exchange model
c) Load management
d) All of these

4) The transmission planning effort includes _____.
a) technical aspects of transmission studies
b) clarifying study assumptions
c) undertaking technical analysis, documenting study results
d) All above

5) Transmission efficiency of line increases with the _____.
a) Decrease in power factor and voltage
b) Increase in power factor and voltage
c) Increase in power factor but Decrease in voltage
d) Increase in Voltage but Decrease in power factor

6) Energy conservation Usually requires _____.
   a) New investment in more efficient equipments
   b) Replace old instruments
   c) Small decrease in convenience or comfort also tolerated
   d) All above

7) Demand side management is required to _____.
   a) Reduce overall cost of installed capacity
   b) Reduce needs of peaking stations
   c) Ensure quality and equity of supply
   d) All above

8) Distribution automation (DA) is a family of technologies, including _____.
   a) sensors,
   b) processors,
   c) information and communication networks
   d) all of above

9) Short term regular variations related to the calendar or time of day is known as _____.
   a) Trend b) Seasonality
   c) Cycles d) Random Variations

10) The extrapolation method is based on the _____.
   a) Curve fitting to present data
   b) Extrapolation of pastdata
   c) Extrapolation of present data
   d) Curve fitting to previous data available

11) Factors affecting load forecasting are _____.
   a) Weather condition b) Time factors
   c) Special events d) All of these

12) In order to have a lower cost of electrical energy generation _____.
   a) The load factor and diversity factor should be low
   b) The load factor should be low but diversity factor should be high
   c) The load factor should be high but diversity factor should be low
   d) The load factor and diversity factor should be high

13) Distribution SCADA means _____.
   a) data acquisition b) man - machine interface
   c) data archiving d) all of the above

14) For Long term planning time period is _____.
   a) 0-2 years b) 2-5 years
   c) 5-10 years d) All above

MCQ/Objective Type Questions

Duration: 30 Minutes Marks:14

Q.1 Choose the correct Answer. **14**

1) Third mode of propagation is called as _____.
a) Line to ground b) Phase to phase
c) Homopolar d) Inter-phase

2) For Aeolian vibration the frequency of vibration is usually limited to _____ Hz and the amplitudes less than _____cm.
a) 20 Hz, 2.5 cm b) 25 Hz, 2.5 cm
c) 50 Hz, 2.5 cm d) 50 Hz, 3.5 cm

3) The positive sequence reactance per phase in ohms/km in 750 kV transmission line is _____.
a) 0.272 b) 0.227
c) 0.722 d) None of these

4) Operating 750 KV line gives AN at a level of _____.
a) 50 dB b) 55.4 dB
c) 52 dB d) 58.5 dB

5) The allowable noise level at one MHz is _____.
a) 22 dB b) 26 dB
c) 30 dB d) 32 dB

6) Voltage gradient on a transmission line conductor is highest _____.
a) at the surface of the conductor
b) at the centre of the conductor
c) at the distance of one radius from the surface
d) none of these

7) Refraction coefficient of current (J_T) is given by _____.

a) $\frac{2z_0}{z_0 + z_t}$ b) $\frac{z_0 - z_t}{z_0 + z_t}$

c) $\frac{2z_t}{z_0 + z_t}$ d) $\frac{z_t - z_0}{z_0 + z_t}$

8) Refraction coefficient of voltage (K_T) for open ended line _____.

a) +2 b) 1

c) -1 d) 0

9) Voltage control in a power transmission line is achieved by _____.

a) Booster transformer b) Tap-changing transformer

c) Injection of reactive power d) All of these

10) The over-voltage surges in power systems may be caused by _____.

a) lightning b) switching

c) resonance d) any of the above

11) The entire line performance can be determined by _____.

a) Sending end power circle diagram

b) Receiving end power circle diagram

c) Universal power circle diagram

d) a or c

12) The dimensions of constants B and C are respectively _____ and _____.

a) Ohm, Siemens b) Mho, Siemens

c) Both are dimensionless d) Siemens, Ohm

13) Why are the conductors used for higher voltage transmission stranded?

a) Ease of handling b) Cheaper cost

c) Reduced resistivity d) Increase in tensile strength

14) Insulation of the modern EHV lines is designed based on _____.

a) Lighting voltage b) Switching voltage

c) Corona d) RI

2) Figures to the right indicate full marks.

Section – I

Q.2 Attempt any four of the following: 16

a) Explain in detail advantages and disadvantages of high voltage.
b) Explain the relation between temperature rise and current carrying capacity of EHVAC line.
c) Explain the limits for radio interference.
d) Derive expression for distribution of voltage gradient on sub-conductors of bundle.
e) Explain reflection and refraction of travelling waves.
f) Derive equation for line energization with trapped charge voltage.

Q.3 Attempt any two of the following: 12

a) Explain the different mechanical considerations in EHV line performance?
b) What is standing wave? Derive equation for open ended line double exponential response.
c) Derive the charge potential relations of multi-conductor lines.

Section – II

Q.4 Attempt any four of the following: 16

a) Explain the ferro-resonance over voltages.
b) State and explain sources of over voltages.
c) Describe static reactive compensating system.
d) Explain the term power circle diagram and its use.
e) Explain conductor-tower, conductor-ground and conductor-conductor clearances.
f) Explain the factors under steady state in design of EHV lines.

Q.5 Attempt any Two. 12

a) Explain the term sinusoidal excitation lumped parameter circuit.
b) A 100 MVA 230kV 50 Hz transformer has x_t = 12% and is connected to a line 200 km long which has an inductance of 1 mH/km. The filter, connected to the LV 33 kV side of the transformer, is required to suppress the 5^{th} harmonic generated by the TCR to 1% of I_n. Calculate the value of filter capacitor if the filter inductance used is 2mH.
c) Explain line insulation design based upon transient over voltages in detail.

c) Reduced resistivity d) Increase in tensile strength

4) Insulation of the modern EHV lines is designed based on _____.
a) Lighting voltage b) Switching voltage
c) Corona d) RI

5) Third mode of propagation is called as _____.
a) Line to ground b) Phase to phase
c) Homopolar d) Inter-phase

6) For Aeolian vibration the frequency of vibration is usually limited to _____ Hz and the amplitudes less than _____cm.
a) 20 Hz, 2.5 cm b) 25 Hz, 2.5 cm
c) 50 Hz, 2.5 cm d) 50 Hz, 3.5 cm

7) The positive sequence reactance per phase in ohms/km in 750 kV transmission line is _____.
a) 0.272 b) 0.227
c) 0.722 d) None of these

8) Operating 750 KV line gives AN at a level of _____.
a) 50 dB b) 55.4 dB
c) 52 dB d) 58.5 dB

9) The allowable noise level at one MHz is _____.
a) 22 dB b) 26 dB
c) 30 dB d) 32 dB

10) Voltage gradient on a transmission line conductor is highest _____.
a) at the surface of the conductor
b) at the centre of the conductor
c) at the distance of one radius from the surface
d) none of these

11) Refraction coefficient of current (J_T) is given by _____.
a) $\frac{2z_0}{z_0 + z_t}$ b) $\frac{z_0 - z_t}{z_0 + z_t}$
c) $\frac{2z_t}{z_0 + z_t}$ d) $\frac{z_t - z_0}{z_0 + z_t}$

12) Refraction coefficient of voltage (K_T) for open ended line _____.
a) +2 b) 1
c) -1 d) 0

13) Voltage control in a power transmission line is achieved by _____.
a) Booster transformer b) Tap-changing transformer
c) Injection of reactive power d) All of these

14) The over-voltage surges in power systems may be caused by _____.
a) lightning b) switching
c) resonance d) any of the above

Fourth. Y. (B. Tech) (Sem-I) (New) (CBCS) Examination: March/April-2025
ELECTRICAL ENGINEERING
Extra High Voltage AC Transmission (BTN07712)

Day & Date: Friday 06-June-2025 Max. Marks: 56
Time: 03:00 PM To 06:00 PM

Instructions: 1) All questions are compulsory.
2) Figures to the right indicate full marks.

Section – I

Q.2 Attempt any four of the following: 16

a) Explain in detail advantages and disadvantages of high voltage.
b) Explain the relation between temperature rise and current carrying capacity of EHVAC line.
c) Explain the limits for radio interference.
d) Derive expression for distribution of voltage gradient on sub-conductors of bundle.
e) Explain reflection and refraction of travelling waves.
f) Derive equation for line energization with trapped charge voltage.

Q.3 Attempt any two of the following: 12

a) Explain the different mechanical considerations in EHV line performance?
b) What is standing wave? Derive equation for open ended line double exponential response.
c) Derive the charge potential relations of multi-conductor lines.

Section – II

Q.4 Attempt any four of the following: 16

a) Explain the ferro-resonance over voltages.
b) State and explain sources of over voltages.
c) Describe static reactive compensating system.
d) Explain the term power circle diagram and its use.
e) Explain conductor-tower, conductor-ground and conductor-conductor clearances.
f) Explain the factors under steady state in design of EHV lines.

Q.5 Attempt any Two. 12

a) Explain the term sinusoidal excitation lumped parameter circuit.
b) A 100 MVA 230kV 50 Hz transformer has x_t = 12% and is connected to a line 200 km long which has an inductance of 1 mH/km. The filter, connected to the LV 33 kV side of the transformer, is required to suppress the 5^{th} harmonic generated by the TCR to 1% of I_n. Calculate the value of filter capacitor if the filter inductance used is 2mH.
c) Explain line insulation design based upon transient over voltages in detail.

ELECTRICAL ENGINEERING
Extra High Voltage AC Transmission (BTN07712)

Day & Date: Friday 06-June-2025 Max. Marks: 70
Time: 03:00 PM To 06:00 PM

Instructions: 1) Q. No. 1 is compulsory. It should be solved in the first 30 minutes in Answer Book Page no 03 (Starting page of the Answer Book). Each question carries one mark.
2) Don't forget to Mention question paper set (P/Q/R/S) on top of page.
3) Figures to the right indicates full marks.

MCQ/Objective Type Questions

Duration: 30 Minutes Marks:14

Q.1 Choose the correct Answer. **14**

1) Voltage gradient on a transmission line conductor is highest _____.
a) at the surface of the conductor
b) at the centre of the conductor
c) at the distance of one radius from the surface
d) none of these

2) Refraction coefficient of current (J_T) is given by _____.
a) $\frac{2z_0}{z_0 + z_t}$ b) $\frac{z_0 - z_t}{z_0 + z_t}$
c) $\frac{2z_t}{z_0 + z_t}$ d) $\frac{z_t - z_0}{z_0 + z_t}$

3) Refraction coefficient of voltage (K_T) for open ended line _____.
a) +2 b) 1
c) -1 d) 0

4) Voltage control in a power transmission line is achieved by _____.
a) Booster transformer b) Tap-changing transformer
c) Injection of reactive power d) All of these

5) The over-voltage surges in power systems may be caused by _____.
a) lightning b) switching
c) resonance d) any of the above

6) The entire line performance can be determined by _____.
a) Sending end power circle diagram
b) Receiving end power circle diagram
c) Universal power circle diagram
d) a or c

7) The dimensions of constants B and C are respectively _____ and _____.

a) Ohm, Siemens
b) Mho, Siemens
c) Both are dimensionless
d) Siemens, Ohm

8) Why are the conductors used for higher voltage transmission stranded?

a) Ease of handling
b) Cheaper cost
c) Reduced resistivity
d) Increase in tensile strength

9) Insulation of the modern EHV lines is designed based on _____.

a) Lighting voltage
b) Switching voltage
c) Corona
d) RI

10) Third mode of propagation is called as _____.

a) Line to ground
b) Phase to phase
c) Homopolar
d) Inter-phase

11) For Aeolian vibration the frequency of vibration is usually limited to _____ Hz and the amplitudes less than _____cm.

a) 20 Hz, 2.5 cm
b) 25 Hz, 2.5 cm
c) 50 Hz, 2.5 cm
d) 50 Hz, 3.5 cm

12) The positive sequence reactance per phase in ohms/km in 750 kV transmission line is _____.

a) 0.272
b) 0.227
c) 0.722
d) None of these

13) Operating 750 KV line gives AN at a level of _____.

a) 50 dB
b) 55.4 dB
c) 52 dB
d) 58.5 dB

14) The allowable noise level at one MHz is _____.

a) 22 dB
b) 26 dB
c) 30 dB
d) 32 dB

Instructions: 1) Q. No. 1 is compulsory. It should be solved in the first 30 minutes in Answer Book Page no 03 (Starting page of the Answer Book). Each question carries one mark.
2) Don't forget to Mention question paper set (P/Q/R/S) on top of page.
3) Figures to the right indicates full marks.

MCQ/Objective Type Questions

Duration: 30 Minutes Marks:14

Q.1 Choose the correct Answer. **14**

1) For high frequency choppers the device that is preferred is _____.
a) Thyristor b) TRIAC
c) Transistor d) GTO

2) A four quadrant operation requires _____.
a) Two full converters in series
b) Two full converters connected in parallel
c) Two full converter connected in back to back
d) Two semi converters connected in back to back

3) The operating speed of a synchronous motor can be changed to new fixed value by _____.
a) Changing the load b) Changing the supply voltage
c) Changing frequency d) Using brakes

4) Which duty cycle is preferred if the load requires a constant power for short period of time and rest for sufficient longer duration?
a) Short Time duty
b) Intermittent duty
c) Intermittent duty with starting
d) Intermittent duty with starting and braking

5) During the starting of a slip ring induction motor using rotor resistance starter, the insertion of resistance in the rotor circuit causes: _____.
a) Stator current to increase and torque to decrease
b) Stator current to decrease and torque to increase
c) Stators current to increase and power factor to decrease
d) Power factor to decrease and torque to increase

6) The slip of an induction motor normally does not depends on _____.
a) rotor speed b) synchronous speed
c) shaft torque d) core loss component

7) Speed control by variation of field flux results in _____.
a) Constant power drive b) Constant torque drive
c) Variable power drive d) None of the above

8) Efficiency by using rotor resistance control in IM is _____.
a) High b) Low
c) Very high d) Very low

9) Full-converter can be used in DC motor for regenerative braking in _____.
a) Constant Operation b) Variable Operation
c) Inversion Operation d) Opposite Operation

10) Reluctance motor is a _____.
a) Variable torque motor
b) Low torque variable speed motor
c) Self starting type synchronous motor
d) Low noise, slow speed motor

11) Cycloconverter drive has applications in _____.
a) Low power and low speed operations
b) High power and high speed operations
c) Low power and high speed operations
d) High power and low speed operations

12) Which of the following method is employed when regenerative braking is necessary?
a) DC Chopper b) Variable Resistor
c) Inverter Rectifier d) Motor-generator

13) Applications of dc motor is restricted to a few load speed applications because of _____.
a) cost of motor is high
b) mechanical commutation problems
c) maintenance problem
d) all of above

14) Stepper motor is popular for _____.
a) Speed control b) Position control
c) Torque control d) Both a and b

Q.2 Attempt any four of the following: **16**

a) Describe in details Characteristics of DC motors.
b) Describe in details dynamics of Electric Drives.
c) Explain the working of phase controlled converter fed DC drives.
d) Explain the chopper fed DC separately excited motor in motoring mode.
e) Explain stator voltage control of an induction motor with speed torque characteristics.

Q.3 Attempt any two of the following: **12**

a) Explain the static Kramer method and static schrebius method of speed control of three phase induction motor.
b) Derive fundamental torque equations and components of load torque.
c) Describe in details dual-converter control of DC drive.

Section – II

Q.4 Attempt any four of the following: **16**

a) Draw and explain variable frequency control for synchronous motors.
b) Explain Losses in electrical drive system.
c) Explain with circuit diagram converter circuit for switched reluctance motor.
d) Describe in details Energy efficient operation of drives.
e) Explain drive circuit for stepper motor with neat sketch.

Q.5 Attempt any Two. **12**

a) With neat sketch explain VSI feed induction motor drive also draw block diagram for closed loop control.
b) Draw a neat diagram & explain the Cycloconverter control for synchronous motors.
c) Describe in details improvement of power factor and quality of supply.

a) Draw and explain variable frequency control for synchronous motors.
b) Explain Losses in electrical drive system.
c) Explain with circuit diagram converter circuit for switched reluctance motor.
d) Describe in details Energy efficient operation of drives.
e) Explain drive circuit for stepper motor with neat sketch.

Q.5 Attempt any Two. **12**

a) With neat sketch explain VSI feed induction motor drive also draw block diagram for closed loop control.
b) Draw a neat diagram & explain the Cycloconverter control for synchronous motors.
c) Describe in details improvement of power factor and quality of supply.

Fourth. Y. (B. Tech) (Sem-I) (New) (CBCS) Examination: March/April-2025
ELECTRICAL ENGINEERING
Advanced Applications in Solar Energy Technology (BTN07715)

Day & Date: Friday 06-June-2025 Max. Marks: 70
Time: 03:00 PM To 06:00 PM

Instructions: 1) Q. No. 1 is compulsory. It should be solved in the first 30 minutes in Answer Book Page no 03 (Starting page of the Answer Book). Each question carries one mark.
2) Don't forget to Mention question paper set (P/Q/R/S) on top of page.
3) Figures to the right indicates full marks.

MCQ/Objective Type Questions

Duration: 30 Minutes Marks:14

Q.1 Choose the correct Answer. **14**

1) What is the primary advantage of passive solar heating systems over active solar systems?
a) Lower installation cost b) Higher efficiency
c) Greater reliability d) No reliance on sunlight

2) What is the purpose of thermal mass in passive solar design?
a) To block sunlight b) To store and release heat
c) To reflect solar radiation d) To enhance air circulation

3) What is the primary driving force behind natural circulation in a water heating system?
a) Centrifugal force b) Gravitational force
c) Electromagnetic force d) Frictional force

4) Which of the following is NOT a typical component of a standalone solar PV system?
a) Inverter b) Charge controller
c) Grid connection d) Battery bank

5) What is the purpose of an inverter in a solar power system?
a) To store excess energy
b) To convert DC to AC
c) To regulate panel temperature
d) To track the sun's movement

6) How does scaling affect the efficiency of a water heating system?
a) Increases efficiency b) No impact on efficiency
c) Decreases efficiency d) Improves heat transfer

7) What impact does shading have on the performance of a rooftop solar system?

a) No impact
b) Improved efficiency
c) Reduced efficiency
d) Increased battery life

8) What is Triethylene Glycol primarily used for?

a) As a refrigerant to cool the air.
b) As a fuel to generate heat.
c) As an absorbent to capture heat from the solar collectors.
d) As a coolant for the solar panels.

9) What is the role of the desiccant material?

a) To heat the incoming air
b) To absorb and remove moisture from the incoming air
c) To cool the indoor air
d) To filter the air

10) How does a wick-type solar still function?

a) By using mirrors to concentrate sunlight
b) By absorbing sunlight with photovoltaic cells
c) By using a wick to transport water for evaporation
d) By converting sunlight into heat directly

11) What is the primary benefit of using solar desalination in arid regions?

a) Increased soil fertility
b) Reduction in water salinity
c) Generation of electricity
d) Freshwater production in remote areas

12) What is the primary factor that influences the efficiency of a solar drying system?

a) Wind speed
b) Ambient temperature
c) Moon phase
d) Soil composition

13) What role do vents play in a greenhouse drying system?

a) Trap heat inside the greenhouse
b) Increase humidity levels
c) Enhance air circulation
d) Block sunlight

14) What is the primary purpose of a solar swimming pool heating system?

a) Water purification
b) Increasing water circulation
c) Heating the pool water
d) Enhancing pool lighting

Time: 03:00 PM To 06:00 PM

Instructions: 1) All questions are compulsory.
2) Figures to the right indicate full marks.

Section – I

Q.2 Attempt any three: **12**

a) Explain
1) Freezing
2) Boiling

b) Describe the "Direct Gain" in passive solar design.

c) Explain the concept of "Solar Vapour Compression Refrigeration."

d) Discuss with neat diagram working of Trombe wall.

Q.3 Attempt any two of the following: **16**

a) Explain swimming pool heating with its advantages.

b) Explain any two methods of passive heating of building.

c) What is Intermittent absorption refrigeration system?

Section – II

Q.4 Attempt any three. **12**

a) Explain simple solar still.

b) Describe Box type solar dryer.

c) What is net metering in rooftop system?

d) What hybrid dryer?

Q.5 Attempt any Two. **16**

a) Explain concept of wick type solar still & active solar still.

b) Explain Bin type grain dryer & solar timber drying.

c) Describe the concept of solar PV street lighting system with its advantages.

Testing & Certification of Electric & Hybrid vehicles (BTN07719)

Day & Date: Monday, 09-June-2025 Max. Marks: 70
Time: 03:00 PM To 06:00 PM

Instructions: 1) Q. No. 1 is compulsory. It should be solved in the first 30 minutes in Answer Book Page no 03 (Starting page of the Answer Book). Each question carries one mark.
2) Don't forget to Mention question paper set (P/Q/R/S) on top of page.
3) Figures to the right indicates full marks.
4) Make suitable assumptions (if necessary and state them clearly).

MCQ/Objective Type Questions

Duration: 30 Minutes Marks:14

Q.1 Choose the correct alternatives from the options. **14**

1) The function of anti-lock brake system (ABS) is ____.
a) Reduces the stopping distance
b) Minimizes the brake fade
c) Maintains directional control during braking by preventing the wheels from locking
d) Prevents nose dives during braking and thereby postpones locking of the wheels

2) What is an Automobile?
a) self-propelled vehicle
b) used for carrying passengers and goods on the ground
c) contains the power source for its propulsion
d) All of the mentioned

3) The force that opposes the motion of a vehicle is ____.
a) Rolling resistance b) Gradient resistance
c) Wind or air resistance d) All of the mentioned

4) The central portion of the wheel is called ____.
a) Rim b) Scale
c) Hub d) Axle

5) What is the function of the electronic control unit in Anti-lock braking system?
a) Monitoring the speed of the wheel
b) Decreases the stopping distance
c) Provides electronic stability control
d) Maintaining the tractive force

6) Vehicles having at least four wheels and used for the carriage of passengers, this category of vehicle is ____.

a) L b) M
c) N d) O

7) The torque available at the contact between driving wheels and road is known as ____.

a) Brake effort b) Tractive effort
c) Clutch effort d) None of these

8) The main task of battery in an automobile is to ____.

a) Supply electricity to the alternator
b) Act as a reservoir or stabilizer of electricity
c) Supply electricity to the vehicle's electrical system at all times while the engine is running
d) Supply a large amount of power to turn the starter motor when the engine is being started

9) The parking brake generally acts on ____.

a) Front wheels b) Rear wheels
c) Front and rear wheels d) Propeller shaft

10) The clutch is located between the transmission and the ____.

a) Engine b) Rear axle
c) Propeller shaft d) Differential

11) What is the primary objective of ECE regulations?

a) Promoting economic integration in North America
b) Standardizing vehicle regulations globally
c) Regulating vehicle safety in Europe
d) Encouraging the use of electric vehicles

12) What type of test track is designed to assess a vehicle's performance at high speeds and aerodynamics?

a) Off-road test track b) Handling test track
c) High-speed test track d) Noise test track

13) What is the primary purpose of Hardware-in-the-Loop (HiL) testing in the context of EVs and HEVs?

a) Testing physical hardware components of vehicles
b) Simulating vehicle behavior in a virtual environment
c) Charging the vehicle's battery
d) Conducting emissions testing

14) What is the primary purpose of a Type. Approval Scheme?

a) To provide insurance coverage for products
b) To regulate product pricing
c) To certify that products meet specified standards and regulations
d) To promote product advertising

Time: 03:00 PM To 06:00 PM

Instructions: 1) All questions are compulsory.
2) Figures to the right indicate full marks.

Section - I

Q.2 Attempt the following questions: (Any Four) **16**

a) Explain the types of homologations. Also state the benefits and challenges of homologation.
b) State and explain classification of vehicles in detail.
c) Explain the arrangement of foot controls for M1 type vehicle.
d) Explain Energy consumption calculation of electric vehicle.
e) Explain grade ability test of vehicle in detail.
f) What is dynamic testing of vehicle? Explain the factors affecting dynamic testing.

Q.3 Attempt the following questions: (Any Two) **12**

a) State the required instruments for testing of vehicles. Also explain any four types of test tracks.
b) Explain the requirement of temporary cabin for Drive-Away-Chassis.
c) What do you understand by interior noise in a vehicle? Discuss some interior noise reduction strategies.

Section – II

Q.4 Attempt the following questions: (Any Four) **16**

a) Explain horn testing of vehicle.
b) Describe hinges and latches test of vehicle.
c) Describe windscreen laminated and toughened safety glass test of vehicle.
d) Describe air bag testing process in detail.
e) Explain the tests for electric propulsion kit intended for conversion.
f) Describe the requirements of Electric Vehicle Conductive AC Charging System.

Q.5 Attempt the following questions: (Any Two) **12**

a) Explain fuel tank test of vehicle.
b) Describe the requirements of Electric Vehicle Conductive DC Charging System.
c) Explain tests for Hybrid Electric System Intended for Retro-fitment on Vehicles of M and N Category (GVW < 3500 kg).

c) Explain the arrangement of foot controls for M1 type vehicle.
d) Explain Energy consumption calculation of electric vehicle.
e) Explain grade ability test of vehicle in detail.
f) What is dynamic testing of vehicle? Explain the factors affecting dynamic testing.

Q.3 Attempt the following questions: (Any Two) **12**

a) State the required instruments for testing of vehicles. Also explain any four types of test tracks.
b) Explain the requirement of temporary cabin for Drive-Away-Chassis.
c) What do you understand by interior noise in a vehicle? Discuss some interior noise reduction strategies.

Section – II

Q.4 Attempt the following questions: (Any Four) **16**

a) Explain horn testing of vehicle.
b) Describe hinges and latches test of vehicle.
c) Describe windscreen laminated and toughened safety glass test of vehicle.
d) Describe air bag testing process in detail.
e) Explain the tests for electric propulsion kit intended for conversion.
f) Describe the requirements of Electric Vehicle Conductive AC Charging System.

Q.5 Attempt the following questions: (Any Two) **12**

a) Explain fuel tank test of vehicle.
b) Describe the requirements of Electric Vehicle Conductive DC Charging System.
c) Explain tests for Hybrid Electric System Intended for Retro-fitment on Vehicles of M and N Category (GVW < 3500 kg).

Fourth. Y. (B. Tech.) (Sem-I) (New) (CBCS) Examination: March/April-2025
ELECTRICAL ENGINEERING
Testing & Certification of Electric & Hybrid vehicles (BTN07719)

Day & Date: Monday, 09-June-2025 Max. Marks: 70
Time: 03:00 PM To 06:00 PM

Instructions: 1) Q. No. 1 is compulsory. It should be solved in the first 30 minutes in Answer Book Page no 03 (Starting page of the Answer Book). Each question carries one mark.
2) Don't forget to Mention question paper set (P/Q/R/S) on top of page.
3) Figures to the right indicates full marks.
4) Make suitable assumptions (if necessary and state them clearly).

MCQ/Objective Type Questions

Duration: 30 Minutes Marks:14

Q.1 Choose the correct alternatives from the options. **14**

1) What is the primary objective of ECE regulations?
a) Promoting economic integration in North America
b) Standardizing vehicle regulations globally
c) Regulating vehicle safety in Europe
d) Encouraging the use of electric vehicles

2) What type of test track is designed to assess a vehicle's performance at high speeds and aerodynamics?
a) Off-road test track b) Handling test track
c) High-speed test track d) Noise test track

3) What is the primary purpose of Hardware-in-the-Loop (HiL) testing in the context of EVs and HEVs?
a) Testing physical hardware components of vehicles
b) Simulating vehicle behavior in a virtual environment
c) Charging the vehicle's battery
d) Conducting emissions testing

4) What is the primary purpose of a Type. Approval Scheme?
a) To provide insurance coverage for products
b) To regulate product pricing
c) To certify that products meet specified standards and regulations
d) To promote product advertising

5) The function of anti-lock brake system (ABS) is ____.
a) Reduces the stopping distance
b) Minimizes the brake fade
c) Maintains directional control during braking by preventing the wheels from locking
d) Prevents nose dives during braking and thereby postpones locking of the wheels

6) What is an Automobile?
a) self-propelled vehicle
b) used for carrying passengers and goods on the ground
c) contains the power source for its propulsion
d) All of the mentioned

7) The force that opposes the motion of a vehicle is ____.
a) Rolling resistance
b) Gradient resistance
c) Wind or air resistance
d) All of the mentioned

8) The central portion of the wheel is called ____.
a) Rim
b) Scale
c) Hub
d) Axle

9) What is the function of the electronic control unit in Anti-lock braking system?
a) Monitoring the speed of the wheel
b) Decreases the stopping distance
c) Provides electronic stability control
d) Maintaining the tractive force

10) Vehicles having at least four wheels and used for the carriage of passengers, this category of vehicle is ____.
a) L
b) M
c) N
d) O

11) The torque available at the contact between driving wheels and road is known as ____.
a) Brake effort
b) Tractive effort
c) Clutch effort
d) None of these

12) The main task of battery in an automobile is to ____.
a) Supply electricity to the alternator
b) Act as a reservoir or stabilizer of electricity
c) Supply electricity to the vehicle's electrical system at all times while the engine is running
d) Supply a large amount of power to turn the starter motor when the engine is being started

13) The parking brake generally acts on ____.
a) Front wheels
b) Rear wheels
c) Front and rear wheels
d) Propeller shaft

14) The clutch is located between the transmission and the ____.
a) Engine
b) Rear axle
c) Propeller shaft
d) Differential

MCQ/Objective Type Questions

Duration: 20 Minutes Marks: 10

Q.1 Choose the correct alternatives from the options. 10

1) Which of the following methods providing artificial respiration?
a) Schafer's prone pressure method
b) Silvester's method
c) Both a & b
d) Narcol Method

2) Do's and Don'ts are observed carefully in safety precautions as per _____.
a) IS 5216-1962 b) IS 5216-1964
c) IS 5216-1966 d) IS 5216-1969

3) What should be the insulation resistance in case of PVC wires?
a) 12.5 MΩ / number of outlet
b) 82.5 MΩ / number of outlet
c) 2.5 MΩ / number of outlet
d) 10.5 MΩ / number of outlet

4) If the measured insulation value is more than unity what value should be taken as the maximum working value?
a) 0.75 MΩ b) One MΩ
c) 0.5 MΩ d) One ohm

5) Brake test is _____ method of testing machine.
a) Regenerative b) Direct
c) Indirect d) All of these

6) Swinburn test is conducted on machine at

a) No load b) Full load
c) Fractional load d) All of these

7) When motor arranged in the same line as that of driven machine this coupling is also called as

a) Direct coupling b) Indirect coupling
c) Both a and b d) None of these

8) Depth of foundation is dependent on

a) Cost of equipment b) Frequency
c) H.P. rating d) None of these

9) Which of the following factors affects on life of insulating material?

a) Temperature b) Deposition of dust
c) Impurities d) All of these

10) In insulation resistance test of 132 kv transformer, minimum insulation resistance is

a) 250MΩ b) 500MΩ
c) 750MΩ d) 1000MΩ

1) Which parameter is commonly used to characterize the availability of solar radiation on a tilted surface?
a) Solar constant b) Solar declination
c) Solar insolation d) Solar irradiance

2) Which technology in concentrating solar power (CSP) plants utilizes flat mirrors to reflect sunlight onto a receiver located at a high point?
a) Parabolic troughs b) Linear Fresnel reflector
c) Parabolic Dish d) Solar towers

3) What are the primary components of a PV system?
a) Solar panels and inverters
b) Batteries and charge controllers
c) Solar panels, inverters, and mounting structures
d) Solar panels, inverters, batteries, and charge controllers

4) In which application is tracking commonly employed in solar PV systems?
a) Residential b) Commercial
c) Industrial d) All of the above

5) Which characteristic defines the relationship between torque and rotational speed for a wind turbine?
a) Power-speed characteristics
b) Torque-speed characteristics
c) Wind turbine efficiency curve
d) Wind speed distribution curve

6) Which parameter is used to select a suitable site for wind turbine installation?
a) Wind capacity factor
b) Wind energy density
c) Turbine efficiency
d) Power-speed characteristics

7) What is the primary advantage of using biomass as a renewable energy source?
a) Reduced greenhouse gas emissions
b) Unlimited availability
c) Low cost of production
d) Ease of storage and transportation

8) Which technology is used for power generation from municipal solid waste?
a) Biomass gasification
b) Anaerobic digestion
c) Incineration
d) Ethanol fermentation

9) What term refers to the process of connecting renewable energy sources (RES) to the existing electricity grid while maintaining stability and reliability?
a) Grid integration
b) Renewable energy conversion
c) Transmission optimization
d) Load shedding

10) What does the term "levelized cost of energy" (LCOE) refer to?
a) The total cost of installing a renewable energy system.
b) The average annual cost of energy production over the lifetime of a renewable energy project.
c) The upfront cost of purchasing renewable energy equipment.
d) The total cost of energy production over the lifetime of a renewable energy project, normalized to the total energy produced.

Set **P**

Fourth.Y. (B. Tech) (Sem-II) (New) (CBCS) Examination: March/April-2025
ELECTRICAL ENGINEERING
Alternate Energy Systems (BTN07804)

Day & Date: Monday, 26-05-2025 Max. Marks: 40
Time: 03:00 PM To 06:00 PM

Instructions: 1) All questions are compulsory.
2) Figures to the right indicate full marks.
3) Make suitable assumptions (if necessary and state them clearly).

SECTION – I

Q.2 Solve any Two: **08**

a) Write Short note on concentrating solar power (CSP) plants.
b) What are the advantages and limitations of using parabolic dish technology in CSP systems?
c) Describe the role of maximum power point tracking (MPPT) in optimizing the performance of solar energy systems.

Q.3 Solve any Two: **12**

a) Discuss the key concepts related to solar radiation at the Earth's surface.
b) Discuss the key differences in the design considerations for photovoltaic (PV) systems in residential, commercial, and industrial applications.
c) Explain the concept of power contained in wind and how it is converted into usable energy in wind turbine systems.

SECTION – II

Q.4 Solve any Two: **08**

a) Discuss the power-speed characteristics and torque-speed characteristics of wind turbines.
b) Discuss the factors affecting biogas production in biogas technologies.
c) What is co-generation? How co-generation leads to energy conservation.

Q.5 Solve any Two: **12**

a) Discuss the classification of biomass and the different types of biomass resources available for energy production. What are the factors influencing their energy potential?
b) Describe the different types of biomass gasifiers, what are their advantages, disadvantages, and applications.
c) Discuss the challenges and benefits of integrating renewable energy sources (RES) with the existing electrical grid.

Fourth.Y. (B. Tech) (Sem-II) (New) (CBCS) Examination: March/April-2025
ELECTRICAL ENGINEERING
Alternate Energy Systems (BTN07804)

Day & Date: Monday, 26-05-2025 Max. Marks: 50
Time: 03:00 PM To 06:00 PM

Instructions: 1) Q. No. 1 is compulsory. It should be solved in the first 20 minutes in Answer Book Page no 03 (Starting page of the Answer Book). Each question carries one mark.
2) Don't forget to Mention question paper set (P/Q/R/S) on top of page.
3) Figures to the right indicates full marks.
4) Make suitable assumptions (if necessary and state them clearly).

MCQ/Objective Type Questions

Duration: 20 Minutes Marks: 10

Q.1 Choose the correct alternatives from the options. **10**

1) Which parameter is used to select a suitable site for wind turbine installation?
a) Wind capacity factor
b) Wind energy density
c) Turbine efficiency
d) Power-speed characteristics

2) What is the primary advantage of using biomass as a renewable energy source?
a) Reduced greenhouse gas emissions
b) Unlimited availability
c) Low cost of production
d) Ease of storage and transportation

3) Which technology is used for power generation from municipal solid waste?
a) Biomass gasification b) Anaerobic digestion
c) Incineration d) Ethanol fermentation

4) What term refers to the process of connecting renewable energy sources (RES) to the existing electricity grid while maintaining stability and reliability?

Duration: 20 Minutes Marks: 10

Q.1 Choose the correct alternatives from the options. 10

1) Which of the following is commercial energy source?
a) Electricity b) Coal
c) Oil d) All the above

2) The various types of the instruments, which requires during audit need to be ____.
a) Easy to carry b) Easy to operate
c) Inexpensive d) All of above

3) Energy manger should be well versed with ____.
a) Manufacturing and processing skills
b) Managerial and technical skills
c) Technical and marketing skills
d) Managerial and commercial skills

4) Lux meter is used to measure ____.
a) Illumination level
b) Sound intensity and illumination level
c) Harmonics
d) Speed

5) The objective of energy management includes ____.
a) Minimizing energy costs
b) Minimizing waste
c) Minimizing environmental degradation
d) All the above

6) Inexhaustible energy sources are known as ____.

a) commercial Energy b) renewable Energy
c) primary energy d) secondary energy

7) Non-contact speed measurements can be carried out by ____.

a) Tachometer b) Stroboscope
c) Oscilloscope d) Speedometer

8) The tool used for performance assessment and logical evaluation of avenues for improvement in Energy management and audit is ____.

a) Fuel substitution
b) Monitoring and verification
c) Energy pricing
d) Bench marking

9) An energy audit team is formed during ____.

a) post audit phase b) audit phase
c) pre-audit phase d) the time of study

d) Managerial and commercial skills

2) Lux meter is used to measure ____.
a) Illumination level
b) Sound intensity and illumination level
c) Harmonics
d) Speed

3) The objective of energy management includes ____.
a) Minimizing energy costs
b) Minimizing waste
c) Minimizing environmental degradation
d) All the above

4) Inexhaustible energy sources are known as ____.
a) commercial Energy b) renewable Energy
c) primary energy d) secondary energy

5) Non-contact speed measurements can be carried out by ____.
a) Tachometer b) Stroboscope
c) Oscilloscope d) Speedometer

6) The tool used for performance assessment and logical evaluation of avenues for improvement in Energy management and audit is ____.

a) Fuel substitution
b) Monitoring and verification
c) Energy pricing
d) Bench marking

7) An energy audit team is formed during ____.

a) post audit phase
b) audit phase
c) pre-audit phase
d) the time of study

8) The energy sources that are either found or stored in nature are ____.

a) Secondary Energy Sources
b) Primary Energy Sources
c) both (a) and (b)
d) none of the above

9) Which of the following is commercial energy source?

a) Electricity
b) Coal
c) Oil
d) All the above

10) The various types of the instruments, which requires during audit need to be ____.

a) Easy to carry
b) Easy to operate
c) Inexpensive
d) All of above

Fourth. Y. (B.Tech.) (Sem-II) (New) (CBCS) Examination: March/April – 2025
ELECTRICAL ENGINEERING
Electrical Energy Audit and Management (BTN07805)

Day & Date: Wednesday, 28-05-2025 Max. Marks: 40
Time: 03:00 PM To 06:00 PM

Instructions: 1) All questions are compulsory.
2) Figures to the right indicate full marks.

SECTION-I

Q.2 Solve the following: (Any Four) **20**

1) Explain the Indian Electricity Act, 2003.
2) Explain salient features of Energy Conservation Act 2001.
3) Write short note on key elements in energy management
4) Write a note on supply side management.
5) Explain Role of renewable energy sources in energy management.
6) Discuss the Concept of Green Building.

Q.3 Solve the following: (Any Four) **20**

1) Write a short note on CUSUM techniques with diagram
2) Explain the types of Energy audit.
3) Explain the opportunities for energy conservation in illumination.
4) Explain the opportunities for energy conservation in Cogeneration and waste heat recovery systems.
5) Explain various instruments with function of each used to carryout energy audit.
6) Discuss the concept of least square method in Energy Audit.

Fourth. Y. (B.Tech.) (Semester - II) (New) (CBCS) Examination: March/April - 2025
ELECTRICAL ENGINEERING
High Voltage DC Transmission (BTN07806)

Day & Date: Wednesday, 28-05-2025 Max. Marks: 50
Time: 03:00 PM To 06:00 PM

Instructions:1) Q. No. 1 is compulsory. It should be solved in the first 20 minutes in answer bookPage no 03 (Starting page of the Answer Book). Each question carries one mark.
2) Don't forget to Mention question paper set (P/Q/R/S) on top of page.
3) Figures to the right indicates full marks.
4) Assume suitable data wherever needed & mention it clearly.

MCQ/Objective Type Questions

Duration: 20 Minutes Marks:10

Q.1 Choose the correct alternatives from the options. 10

1) The rating of monopolar HVDC system is _____ to that of bipolar HVDC system.
a) $1/2$ b) $\sqrt{2}$
c) 2 d) $\sqrt{3}$

2) The two conductor in the Homo polar HVDC system is _____.
a) Positive polarity b) Negative polarity
c) Same polarity d) Any of the above

3) The main advantage of HVDC-VSC schemes is _____.
a) both active and reactive powers can be controlled
b) does not require DC filters
c) can be used for very high power more than 1500 MW
d) all of the above

4) A thyristor valve conducts when _____.
a) anode is positive
b) anode is negative
c) anode is positive with positive gate pulse
d) anode is positive with negative gate pulse

5) In HVDC link with CC control _____.
a) power loss is more b) short circuit current is limited
c) both (a) and (b) d) none of the above

6) Fault current level is highest in the following types of faults _____.
a) converter internal fault b) DC line fault
c) commutation failure d) lightning stroke on lines

7) Multiterminal systems are _____.
a) series connected b) parallel connected
c) ring connected d) all of the above

8) Most of the MTDC systems that are in operation and feasible are _____.
a) series connected b) parallel connected
c) ring connected d) all of the above

9) A back to back HVDC link can be advantageous compared to AC primarily because _____.
a) It is cheaper b) Of stability considerations
c) Of controlled power glow d) None of these

10) High Voltage de transmission requires filters for _____.
a) Line commuted converters
b) Voltage sourced converters
c) Both of these
d) None of these

Time: 03:00 PM To 06:00 PM

Instructions: 1) All questions are compulsory.
2) Figures to the right indicate full marks.
3) Make suitable assumptions (if necessary and state them clearly).

Section - I

Q.2 Solve any four of the following. **20**

a) Justify the need for control in a DC link. Hence, analyze the problems in a DC link associated with power reversal.
b) Write a short note on Importance of evaluating the economics associated with different ride-through techniques in view of smooth converter operation of HVDC systems.
c) Discuss series-parallel multi-terminal HVDC system and its control.
d) Explain the disturbances due to over voltages on DC side.
e) Explain the basic conversion principles with neat circuit diagrams.

Section - II

Q.3 Solve any two of the following. **20**

a) Illustrate the circuit model for a simple six pulse voltage source converter (VSC) module and explain its working with the help of correct gate firing sequence.
b) Explain the interaction between HVAC & DC systems.
c) Explain the rectifier and inverter operation of a power converter and also write the equivalent circuit of converter?

MCQ/Objective Type Questions

Duration: 30 Minutes Marks: 14

Q.1 Choose the correct Answer. **14**

1) What was the policy of British rulers in India for industrialization?
a) The British rulers wanted to make India an importer of both primary and finished goods.
b) The British rulers wanted to make India an exporter of both primary and finished goods.
c) The British rulers wanted to make India an importer of primary goods from Britain and an exporter of finished goods to Britain.
d) The British rulers wanted to make India an exporter of primary goods to Britain and an importer of finished goods from Britain.

2) What was one of the major contributions of the Britishers to the Indian economy?
a) The British rule in India saw the construction of several all-weather roads.
b) The British rule in India saw the introduction of the railway network.
c) The British rule in India saw the development of the inland trade and sea lanes.
d) All of these.

3) Which of the following is a method to measure the National Income?
a) Expenditure method b) Income method
c) Product method d) All of the above

4) Which of the following scenarios explain economic development?
a) Improvement in the distribution system
b) Improvement in the technology
c) Improvement in the production
d) All of the above

5) The purchasing power of money varies _____.
a) Directly with the volume of employment
b) Inversely with the price level
c) Directly with the interest rate
d) Directly with the price level

6) Which of the following activities is not included in the calculation of the national income of a country?
a) A maid working for a family on a full-time basis
b) A lawyer conducting their law practice
c) A housewife performing housework
d) A dispensary rendering medical services

7) Which of the following is not a characteristic of the Indian economy on the eve of India's independence?
a) Small and fragmented land holdings
b) Use of outdated and old technology
c) Commercial farming
d) Low level of productivity

8) The industrial license was abolished for most industries except_____ during the 1991 reforms.
a) Steel
b) Food processing
c) Liquor
d) All of the above

9) Elasticity of demand is a tendency of demand to____.
a) Increase or decrease on the change of price
b) Increase on the rising of price
c) Decrease on the falling on price
d) Consistency of demand on rising and falling prices

10) Shares with a fixed rate of dividend that entitle their holders to priority payment over those who hold ordinary shares of a company are called
a) Preference shares
b) Bull
c) Bear
d) Shareholder

11) The poverty line has been defined in the____.
a) Seventh Five-Year Plan
b) Sixth Five-Year Plan
c) Eighth Five-Year Plan
d) Fifth Five-Year Plan

12) Value Added Tax (VAT) is_____.

a) Indirect tax levied at each stage of production and distribution, from the primary produce to the retailer.
b) Tax calculated on the selling price, but in declaring the liability to the government, the seller is allowed to deduct any tax paid by him when he bought the goods.
c) Both (a) and (b)
d) None of these

13) Planning Commission was constituted in_____.

a) June 1949
b) October 1951
c) March 1950
d) None of these

14) Which of the following sectors of the economy is state-owned and its service sector is a public enterprise?

a) Mining
b) Education
c) Transportation
d) None of these
