a) Instrumental Errors b) Environmental Errors
c) Observational Errors d) Gross error

6) _____ instruments are those which measure the total quantity of electricity delivered in a particular time.
a) Absolute b) Indicating
c) Recording d) Integrating

7) A moving iron instrument can be used for _____.
a) D.C. only b) A.C. only
c) Both D.C. and A.C. d) None

8) _____ method is suitable for the measurement of a resistance of expected value less than one ohm.

a) Substitution
b) Loss of charge
c) Wheatstone bridge
d) Kelvin's double bridge

9) Instrument transformers are _____.

a) Potential transformers
b) Current transformers
c) Both (a) and (b)
d) Power transformers

10) In a DSO, the input signals are _____.

a) directly applied to oscilloscope
b) multiplexed, converted to digital form and stored and applied to oscilloscope
c) multiplexed, converted to digital form stored, converted to analog form and applied to oscilloscope
d) applied to amplifier, stored as analog signals, multiplexed, converted to digital form, stored in digital form, converted to analog form, and applied to CRO through an amplifier.

11) The power of n-phase unbalanced circuit can be measured by using a minimum of _____.

a) n wattmeters
b) (n + 1) wattmeters
c) (n - 2) wattmeters
d) (n - 1) wattmeters

12) Which transducer does not require any external power supply for working?

a) Strain gauge transducer
b) Piezoelectric Crystals
c) Hydraulic transducer
d) Pneumatic transducer

13) Piezoelectric accelerometer converts _____ energy to _____ energy.

a) mechanical, sound
b) mechanical, electrical
c) sound, electrical
d) None of these

14) Which factor affects the least while selection of sensor?

a) Size
b) Accuracy
c) Colour
d) Durability

Seat No.	

Set **R**

S.Y. (B.Tech.) (Electronics & Computer Engineering) (Semester - II) (New) (NEP CBCS) Examination: March/April - 2026
Measurement, Instrumentation and Sensors (OE-02D)

Day & Date: Friday, 22-05-2026 Max. Marks: 56
Time: 03:00 PM To 06:00 PM

Instructions: 1) All questions are compulsory.
2) Figures to the right indicate full marks.
3) Assume suitable data if necessary.
4) Draw neat diagrams whenever necessary.

SECTION – I

Q.2 Attempt the following. (Any Four) **16**

a) Explain the term:
i) Accuracy
ii) Linearity
iii) Reproducibility
iv) Precision

b) Describe different damping methods in details.

c) Difference between Current Transformer and Potential Transformer.

d) Explain with neat diagram, working of ramp type digital voltmeter.

e) Explain Anderson Bridge with phasor diagram. Also derive the equation of dissipation factor.

Q.3 Attempt the following. (Any Two) **12**

a) Draw the equivalent circuit and phasor diagram of a PT. Derive expression for actual transformation ratio.

b) Explain the method of measurement of power using two wattmeter for balanced load. Also derive the equation of power factor.

c) A bridge consists of the following:
Arm ab: - A choke coil having resistance R1 & amp: inductance L1
Arm bc: - A non-inductive resistance R3
Arm cd: - A mica condenser C4 in series with non-inductive resistance R4
Arm da: - A non-inductive resistance R2
When this bridge fed from a source of 500 Hz, balance is obtained under following Conditions. $R2 = 2410\ \Omega$, $R3 = 750\ \Omega$, $C4 = 0.35\ \mu F$, $R4 = 64.5\ \Omega$ The series resistance of capacitor is 0.4Ω. Calculate resistance and Inductance of choke coil. The supply is connected between a & c and detector is between b & d.

SECTION – II

Q.4 Attempt the following. (Any Four) **16**

a) Explain units of measurement.

b) Explain the principle of working of piezo-electric effect sensor.

c) Explain the basic concept of analog to digital converter.

d) Explain the sensor interfacing circuit's data transmission.

e) State the different types of temperature sensor and explain any one of them.

Q.5 Attempt the following. (Any Two) **12**

a) State and explain the different types of batteries for low power sensors.

b) Stale and explain the sensors used for Displacement, and Level application.

c) Explain the concept of humidity and state different types of sensor used to measure humidity.

Set **S**

S.Y. (B.Tech.) (Electronics & Computer Engineering) (Semester - II) (New) (NEP CBCS) Examination: March/April - 2026
Measurement, Instrumentation and Sensors (OE-02D)

Day & Date: Friday, 22-05-2026 Max. Marks: 70
Time: 03:00 PM To 06:00 PM

Instructions: 1) Q. No. 1 is compulsory. It should be solved in the first 30 minutes in Answer Book Page no 03 (Starting page of the Answer Book). Each question carries one mark
2) Don't forget to Mention question paper set (P/Q/R/S) on top on page.
3) Figures to the right indicates full marks.
4) Assume suitable data if necessary.

MCQ/Objective Type Questions

Duration: 30 Minutes Marks:14

Q.1 Choose the correct answer. **14**

1) In a DSO, the input signals are _____.
a) directly applied to oscilloscope
b) multiplexed, converted to digital form and stored and applied to oscilloscope
c) multiplexed, converted to digital form stored, converted to analog form and applied to oscilloscope
d) applied to amplifier, stored as analog signals, multiplexed, converted to digital form, stored in digital form, converted to analog form, and applied to CRO through an amplifier.

2) The power of n-phase unbalanced circuit can be measured by using a minimum of _____.
a) n wattmeters b) (n + 1) wattmeters
c) (n - 2) wattmeters d) (n - 1) wattmeters

3) Which transducer does not require any external power supply for working?
a) Strain gauge transducer b) Piezoelectric Crystals
c) Hydraulic transducer d) Pneumatic transducer

4) Piezoelectric accelerometer converts _____ energy to _____ energy.
a) mechanical, sound b) mechanical, electrical
c) sound, electrical d) None of these

5) Which factor affects the least while selection of sensor?
a) Size b) Accuracy
c) Colour d) Durability

6) Which sensor should be used for calculating pressure?
a) DHT11 b) LM335Z/NOPB
c) HC-SR04 d) MPX10DP

7) Which of the following represents range of frequency measured by ADC?
a) Bandwidth b) Threshold frequency
c) Peak frequency d) None of the mentioned

8) Thermistor is a _____.
a) sensor b) ADC
c) transducer d) micro controller

9) Which of the following type output is provided by ADC?
a) Serial type b) Parallel type
c) Both serial and parallel type d) None of the mentioned

10) Which of the following is not a type of systematic error?
a) Instrumental Errors b) Environmental Errors
c) Observational Errors d) Gross error

11) _____ instruments are those which measure the total quantity of electricity delivered in a particular time.
a) Absolute b) Indicating
c) Recording d) Integrating

12) A moving iron instrument can be used for _____.
a) D.C. only b) A.C. only
c) Both D.C. and A.C. d) None

13) _____ method is suitable for the measurement of a resistance of expected value less than one ohm.
a) Substitution b) Loss of charge
c) Wheatstone bridge d) Kelvin's double bridge

14) Instrument transformers are _____.
a) Potential transformers b) Current transformers
c) Both (a) and (b) d) Power transformers

Instructions: 1) Q. No. 1 is compulsory. It should be solved in the first 30 minutes in Answer Book Page no 03 (Starting page of the Answer Book). Each question carries one mark.
2) Don't forget to Mention question paper set (P/Q/R/S) on top on page.
3) Figures to the right indicates full marks.
4) Assume suitable data wherever necessary and mention it clearly.

MCQ/Objective Type Questions

Duration: 30 Minutes Marks:14

Q.1 Choose the correct answers from the given options. 14

1) When total supply = total demand, the transportation problem is called _____.
a) Balanced b) Equated
c) Simple d) Zero

2) Which technique is used to solve Assignment Model?
a) Hungarian Method b) Graphical Method
c) Simplex Method d) Integer Programming

3) Allocated cells in the IBFS are also called as _____.
a) Stone Cells b) Water Cells
c) Air Cells d) None of these

4) To convert Maximization Assignment Model into Minimization, _____.
a) Multiply Whole matrix by (-1)
b) Subtract Entire Matrix from Highest Cell
c) Both a & b
d) None of these

5) Advantage of VAM of transportation is _____.
a) Near to optimal Solution b) Least Cost
c) Faster Solution d) Slower Solution

6) Transportation Models are also called as _____.
a) Probabilistic Model b) Distribution Model
c) Game Theory d) Assignment Model

7) ABC analysis considers _____.
a) Total consumption of items b) Total amount of items
c) Both a) and b) d) None of these

8) At the Break-Even Point _____.
a) Profit > Loss
b) Profit < Loss
c) Profit = Loss
d) None of these

9) The PERT in project management means Program Evaluation and _____ Technique.
a) Resource
b) Reconciliation
c) Reconsideration
d) Review

10) _____ stock is the lower limit of stock below which the stock should not be allowed to fall.
a) Maximum
b) Average
c) Safety
d) Standard

11) Optimization Means _____.
a) Maximization
b) Minimization
c) Minimization or Maximization
d) Mean of Minimization & Maximization

12) A feasible solution to LPP _____.
a) Must satisfy all the constraints simultaneously
b) Need not satisfy all the constraints
c) Must be a corner point of feasible region
d) Must optimize the objective function

13) In a project network, the critical path _____.
a) may be the shortest path
b) is the longest path
c) may be the longest path
d) is the shortest path

14) The inventory carrying costs are also called as _____.
a) Procurement costs
b) Set-up costs
c) Storage costs
d) None of the above

Set **P**

S.Y. (B.Tech.) (Electronics & Computer Engineering) (Semester - II) (New) (NEP CBCS) Examination: March/April - 2026
Operation Research (OE-02E)

Day & Date: Friday, 22-05-2026 Max. Marks: 56
Time: 03:00 PM To 06:00 PM

Instructions: 1) Solve any two questions from each Section.
2) Figures to the right indicates full marks.
3) Assume suitable data wherever necessary and mention it clearly.
4) Use of non-programmable calculator is allowed.

SECTION – I

Q.2 Solve both. **14**

a) Using Graphical method, solve
Maximize $Z = 2X_1 + 3X_2$
Subject to, $X_1 + X_2 \leq 30$;
$X_1 - X_2 \geq 0$;
$X_2 \geq 3$;
$0 \leq X_1; \leq 20$;
$0 \leq X_2; \leq 12$;

b) Consider the assignment problem to as shown in table, in this problem 4 supply jobs are to be assigned to four different sub assembly. Solve assignment problem by using Hungarian method.

Sub Assembly	Supply			
	i	ii	iii	iv
1	15	13	14	17
2	11	12	15	13
3	13	12	10	11
4	15	17	14	16

Q.3 Solve both. **14**

a) Find the initial basic feasible solution by NWCM.

	Destination				
	D_1	D_2	D_3	D_4	↓ Supply
S_1	5	3	6	4	30
S_2	3	4	7	8	15
S_3	9	6	5	8	15
Demand →	10	25	18	7	

b) Write in brief on application & advantages of Operational Research.

Q.4 Solve both. **14**

a) What is LPP? What are different components of LPP?

b) How assignment model is useful in practical life? Explain with its steps to solve it.

SECTION – II

Q.5 Solve both. **14**

a) Calculate the value of Economic Order Quantity, Reordering Period, No. of orders per year with the following Data, Annual Usages = 50 Units, Procurement Cost = 15 Rs. Per Order, Unit Cost = 100 Rs. /Item, Inventory Caring Cost = 10% of the unit cost.

b) Define 'Inventory Control' and explain its necessity in the construction industry. Detailed the various types of Inventory Costs involved in maintaining inventory on a site.

Q.6 Solve both. **14**

a) Draw network, find out CP & PD. Calculate All floats of each non-critical Activity.

Activity	$1-2$	$2-3$	$2-4$	$3-4$	$3-5$	$4-6$	$5-6$
Time (Days)	14	13	16	15	18	23	15

b) A small project consists of seven activities. The time estimates in weeks of different activities are given below. Find out probability of completing the project in 18 weeks.

Activity	Estimated Time		
	to	tm	tp
$1-2$	1	1	7
$1-3$	1	4	7
$1-4$	2	2	8
$2-5$	1	1	1
$3-5$	2	5	14
$4-6$	2	5	8
$5-6$	3	6	15

Probability Factor	Probability
0	50%
1	84.13 %
2	97.72 %
3	99.87 %

Q.7 Solve both. **14**

a) Write short notes on:

i) Processing N jobs on one machine (SPT and WSPT rules)

ii) No passing rule in sequencing

b) Explain Sequencing Problem Technique. What are its Different Elements, also elaborate its assumptions?

Seat No.

Q.6 Solve both. **14**

a) Draw network, find out CP & PD. Calculate All floats of each non-critical Activity.

Activity	$1-2$	$2-3$	$2-4$	$3-4$	$3-5$	$4-6$	$5-6$
Time (Days)	14	13	16	15	18	23	15

b) A small project consists of seven activities. The time estimates in weeks of different activities are given below. Find out probability of completing the project in 18 weeks.

Activity	Estimated Time		
	to	tm	tp
$1-2$	1	1	7
$1-3$	1	4	7
$1-4$	2	2	8
$2-5$	1	1	1
$3-5$	2	5	14
$4-6$	2	5	8
$5-6$	3	6	15

Probability Factor	Probability
0	50%
1	84.13 %
2	97.72 %
3	99.87 %

Q.7 Solve both. **14**

a) Write short notes on:

i) Processing N jobs on one machine (SPT and WSPT rules)

ii) No passing rule in sequencing

b) Explain Sequencing Problem Technique. What are its Different Elements, also elaborate its assumptions?

Seat No.	

Set **S**

S.Y. (B.Tech.) (Electronics & Computer Engineering) (Semester - II) (New) (NEP CBCS) Examination: March/April - 2026
Operation Research (OE-02E)

Day & Date: Friday, 22-05-2026 Max. Marks: 70
Time: 03:00 PM To 06:00 PM

Instructions: 1) Q. No. 1 is compulsory. It should be solved in the first 30 minutes in Answer Book Page no 03 (Starting page of the Answer Book). Each question carries one mark.
2) Don't forget to Mention question paper set (P/Q/R/S) on top on page.
3) Figures to the right indicates full marks.
4) Assume suitable data wherever necessary and mention it clearly.

MCQ/Objective Type Questions

Duration: 30 Minutes Marks:14

Q.1 Choose the correct answers from the given options. 14

1) Transportation Models are also called as _____.
a) Probabilistic Model b) Distribution Model
c) Game Theory d) Assignment Model

2) ABC analysis considers _____.
a) Total consumption of items b) Total amount of items
c) Both a) and b) d) None of these

3) At the Break-Even Point _____.
a) Profit > Loss b) Profit < Loss
c) Profit = Loss d) None of these

4) The PERT in project management means Program Evaluation and _____ Technique.
a) Resource b) Reconciliation
c) Reconsideration d) Review

5) _____ stock is the lower limit of stock below which the stock should not be allowed to fall.
a) Maximum b) Average
c) Safety d) Standard

6) Optimization Means _____.
a) Maximization
b) Minimization
c) Minimization or Maximization
d) Mean of Minimization & Maximization

7) A feasible solution to LPP _____.
a) Must satisfy all the constraints simultaneously
b) Need not satisfy all the constraints
c) Must be a corner point of feasible region
d) Must optimize the objective function

8) In a project network, the critical path _____.
a) may be the shortest path
b) is the longest path
c) may be the longest path
d) is the shortest path

9) The inventory carrying costs are also called as _____.
a) Procurement costs
b) Set-up costs
c) Storage costs
d) None of the above

10) When total supply = total demand, the transportation problem is called _____.
a) Balanced
b) Equated
c) Simple
d) Zero

11) Which technique is used to solve Assignment Model?
a) Hungarian Method
b) Graphical Method
c) Simplex Method
d) Integer Programming

12) Allocated cells in the IBFS are also called as _____.
a) Stone Cells
b) Water Cells
c) Air Cells
d) None of these

13) To convert Maximization Assignment Model into Minimization, _____.
a) Multiply Whole matrix by (-1)
b) Subtract Entire Matrix from Highest Cell
c) Both a & b
d) None of these

14) Advantage of VAM of transportation is _____.
a) Near to optimal Solution
b) Least Cost
c) Faster Solution
d) Slower Solution

Seat No.	

Set **S**

S.Y. (B.Tech.) (Electronics & Computer Engineering) (Semester - II) (New) (NEP CBCS) Examination: March/April - 2026
Operation Research (OE-02E)

Day & Date: Friday, 22-05-2026 Max. Marks: 56
Time: 03:00 PM To 06:00 PM

Instructions: 1) Solve any two questions from each Section.
2) Figures to the right indicates full marks.
3) Assume suitable data wherever necessary and mention it clearly.
4) Use of non-programmable calculator is allowed.

SECTION – I

Q.2 Solve both. **14**

a) Using Graphical method, solve
Maximize $Z = 2X_1 + 3X_2$
Subject to, $X_1 + X_2 \leq 30$;
$X_1 - X_2 \geq 0$;
$X_2 \geq 3$;
$0 \leq X_1; \leq 20$;
$0 \leq X_2; \leq 12$;

b) Consider the assignment problem to as shown in table, in this problem 4 supply jobs are to be assigned to four different sub assembly. Solve assignment problem by using Hungarian method.

Sub Assembly	Supply			
	i	ii	iii	iv
1	15	13	14	17
2	11	12	15	13
3	13	12	10	11
4	15	17	14	16

Q.3 Solve both. **14**

a) Find the initial basic feasible solution by NWCM.

	Destination				
	D_1	D_2	D_3	D_4	↓ Supply
S_1	5	3	6	4	30
S_2	3	4	7	8	15
S_3	9	6	5	8	15
Demand →	10	25	18	7	

b) Write in brief on application & advantages of Operational Research.

Q.4 Solve both. **14**

a) What is LPP? What are different components of LPP?

b) How assignment model is useful in practical life? Explain with its steps to solve it.

SECTION – II

Q.5 Solve both. **14**

a) Calculate the value of Economic Order Quantity, Reordering Period, No. of orders per year with the following Data, Annual Usages = 50 Units, Procurement Cost = 15 Rs. Per Order, Unit Cost = 100 Rs. /Item, Inventory Caring Cost = 10% of the unit cost.

b) Define 'Inventory Control' and explain its necessity in the construction industry. Detailed the various types of Inventory Costs involved in maintaining inventory on a site.

Q.6 Solve both. **14**

a) Draw network, find out CP & PD. Calculate All floats of each non-critical Activity.

Activity	$1-2$	$2-3$	$2-4$	$3-4$	$3-5$	$4-6$	$5-6$
Time (Days)	14	13	16	15	18	23	15

b) A small project consists of seven activities. The time estimates in weeks of different activities are given below. Find out probability of completing the project in 18 weeks.

Activity	Estimated Time		
	to	tm	tp
$1-2$	1	1	7
$1-3$	1	4	7
$1-4$	2	2	8
$2-5$	1	1	1
$3-5$	2	5	14
$4-6$	2	5	8
$5-6$	3	6	15

Probability Factor	Probability
0	50%
1	84.13 %
2	97.72 %
3	99.87 %

Q.7 Solve both. **14**

a) Write short notes on:

i) Processing N jobs on one machine (SPT and WSPT rules)

ii) No passing rule in sequencing

b) Explain Sequencing Problem Technique. What are its Different Elements, also elaborate its assumptions?

Seat No.	

Set **P**

S.Y. (B.Tech.) (Electronics & Computer Engineering) (Semester - II) (New) (NEP CBCS) Examination: March/April - 2026
Computational Mathematics (OE-02F)

Day & Date: Friday, 22-05-2026 Max. Marks: 70
Time: 03:00 PM To 06:00 PM

Instructions: 1) Q. No. 1 is compulsory. It should be solved in the first 30 minutes in Answer Book Page no 03 (Starting page of the Answer Book). Each question carries one mark.
2) Don't forget to Mention question paper set (P/Q/R/S) on top of page.
3) Figures to the right indicates full marks.
4) Assume suitable data where necessary.

MCQ/Objective Type Questions

Duration: 30 Minutes Marks:14

Q.1 Choose the correct alternative from the options. **14**

1) A transcendental equation is an equation that involves _____.
a) Only algebraic terms
b) Only transcendental functions
c) Both algebraic and transcendental functions
d) Linear terms only

2) The interval in which a real root of the equation $x^3 - 2x - 5 = 0$ lies is _____.
a) $(1, 2)$ b) $(0, 1)$
c) $(2, 3)$ d) $(3, 4)$

3) The Gauss-Seidel method is used for solving _____.
a) Nonlinear equations b) Systems of linear equations
c) Ordinary differential equations d) Partial differential equations

4) Which of the following is a disadvantage of the Gauss-Jacobi method?
a) It converges faster than most direct methods
b) It requires a large number of iterations for a good approximation
c) It cannot be used for systems with more than two equations
d) It works only for symmetric systems

5) The use of Romberg's method is _____.
a) To solve simultaneous linear equation
b) To find root of linear equation
c) To evaluate definite integration
d) To find the Eigen values

6) The order of convergence of Newton-Raphson method is _____.
a) 1 b) 2
c) $\sqrt{2}$ d) 1.6

7) Power Method is used to find _____.
a) Negative Eigen Value b) Largest Eigen value
c) Positive Eigen Value d) None of these

8) To find the numerically largest Eigen value using iterative method we use the equation _____.
a) $A = \lambda X$ b) $AX = X$
c) $X = \lambda X$ d) $AX = \lambda X$

9) If $dy/dx = x - y$ and $y(0) = 1$, then by Picard's method the value of $y_1(1)$ is _____.
a) 0.905 b) 1.905
c) 2.905 d) None

10) Runge-Kutta method is self-starting method _____.
a) True b) False
c) We can't say d) None

11) The Newton's forward interpolation formula is generally preferred when data points are _____.
a) Unequally spaced
b) Equally spaced and near the beginning
c) Equally spaced and near the end
d) Randomly spaced

12) In the power method, the vector is normalized in each iteration mainly to _____.
a) increase the determinant
b) prevent values from becoming too large
c) eliminate eigen values
d) make the matrix symmetric

13) Simpson's $3/8$ rule requires the number of sub-intervals to be _____.
a) multiple of 2 b) multiple of 3
c) multiple of 4 d) odd only

14) Picard's method is mainly used to solve _____.
a) linear programming problems b) differential equations
c) eigen value problems d) interpolation problems

Seat No.	

Set **P**

S.Y. (B.Tech.) (Electronics & Computer Engineering) (Semester - II) (New) (NEP CBCS) Examination: March/April - 2026
Computational Mathematics (OE-02F)

Day & Date: Friday, 22-05-2026 Max. Marks: 56
Time: 03:00 PM To 06:00 PM

Instructions: 1) All questions are compulsory.
2) Figures to the right indicate full marks.
3) Assume suitable data where necessary.

SECTION – I

Q.2 Attempt Any Five: **25**

a) Find the double root of the equation $x^3 - 5.4x^2 + 9.24x - 5.096 = 0$ given that it is nearer to 1.5.

b) Solve the system of equations by Jacobi's iterative method (perform 3 iterations):
$27x + 6y - z = 85,$
$6x + 15y + 2z = 72,$
$x + y + 54z = 110$

c) Find positive real root of the equation $x\sin(x) + \cos(x) = 0$ using Newton-Raphson method correct to 3 decimal places.

d) Solve the system of equations by using Gauss-Elimination method:
$2x + y + z = 7,$
$x + 2y + 3z = 14,$
$3x + 4y + z = 14.$

e) Solve the following system of equations using LU Decomposition method:
$2x + 3y + z = 9$
$x + 2y + 3z = 6$
$3x + y + 2z = 8$

f) Solve $\frac{dy}{dx} = x + y$ with $x_0 = 0, y_0 = 1$ using fourth-order Runge-Kutta method and find approximate value of y when $x = 0.2$

g) Solve $\frac{dy}{dx} = 1 + xy$ with $y(0) = 1$ using Picard's method take first approximation and find y for $x = 0.1$

Q.3 Attempt Any One. **03**

a) Solve the system by Gauss-Seidel method (Perform 4 iterations):

$10x + y + z = 12$

$2x + 10y + z = 13$

$2x + 2y + 10z = 14$

b) Use Newton-Raphson method to find a root of the equation $x^4 - x - 10 = 0$ which is near to $x = 2$. Perform 3 iterations correct to three decimal places.

SECTION – II

Q.4 Attempt Any Five. **25**

a) Approximate $\int_1^3 \frac{1}{x} dx$ using the composite trapezoidal rule with $n = 4$ sub-intervals. List the function values at the nodes, show the application of the formula, and give the final answer correct to 4 decimal places

b) Using Jacobi's method, find all eigenvalues and eigenvectors of the symmetric matrix:

$$A = \begin{bmatrix} 6 & 2 & 1 \\ 2 & 5 & 2 \\ 1 & 2 & 4 \end{bmatrix}$$

c) Evaluate the integral $\int_{-1}^{1} \frac{dx}{1+x^2}$ using Gaussian 3-point Quadrature formula.

d) Find the dominant eigenvalue and the corresponding eigenvector of the matrix

$A = \begin{bmatrix} 4 & 1 & 1 \\ 1 & 3 & 1 \\ 1 & 1 & 2 \end{bmatrix}$ using the Power Method.

Perform 5 iterations taking initial vector as $[1,0,0]^T$

e) Given the Values:

x	2	4	6	8
$f(x)$	5	17	37	65

Evaluate $f(5)$, using Lagrange's Formula.

f) Using Newton's Backward formula, find the value of $f(2)$ if:

x	1.0	1.5	2.0	2.5
$f(x)$	2.71	3.38	4.00	4.58

g) Determine the polynomial $f(x)$ using Newton's Divided Difference formula for the data: Also find $f(3)$.

x	0	1	2	3	5
$f(x)$	1	14	15	5	6

Q.5 Attempt Any One. **03**

a) Find all Eigen values and Eigen vectors of the following matrix by using Gauss Jacobi's Method. $\begin{bmatrix} 1 & 2 \\ 3 & 4 \end{bmatrix}$

b) Construct Newton's Forward interpolation polynomial for the following data:

x	4	6	8	10
$f(x)$	1	3	8	16

Seat No.	

Set **Q**

Computational Mathematics (OE-02F)

Day & Date: Friday, 22-05-2026 Max. Marks: 70
Time: 03:00 PM To 06:00 PM

Instructions: 1) Q. No. 1 is compulsory. It should be solved in the first 30 minutes in Answer Book Page no 03 (Starting page of the Answer Book). Each question carries one mark.
2) Don't forget to Mention question paper set (P/Q/R/S) on top of page.
3) Figures to the right indicates full marks.
4) Assume suitable data where necessary.

MCQ/Objective Type Questions

Duration: 30 Minutes Marks:14

Q.1 Choose the correct alternative from the options. **14**

1) To find the numerically largest Eigen value using iterative method we use the equation _____.
a) $A = \lambda X$ b) $AX = X$
c) $X = \lambda X$ d) $AX = \lambda X$

2) If $dy/dx = x - y$ and $y(0) = 1$, then by Picard's method the value of $y_1(1)$ is _____.
a) 0.905 b) 1.905
c) 2.905 d) None

3) Runge-Kutta method is self-starting method _____.
a) True b) False
c) We can't say d) None

4) The Newton's forward interpolation formula is generally preferred when data points are _____.
a) Unequally spaced
b) Equally spaced and near the beginning
c) Equally spaced and near the end
d) Randomly spaced

5) In the power method, the vector is normalized in each iteration mainly to _____.
a) increase the determinant
b) prevent values from becoming too large
c) eliminate eigen values
d) make the matrix symmetric

6) Simpson's $3/8$ rule requires the number of sub-intervals to be _____.
a) multiple of 2 b) multiple of 3
c) multiple of 4 d) odd only

7) Picard's method is mainly used to solve _____.
a) linear programming problems b) differential equations
c) eigen value problems d) interpolation problems

8) A transcendental equation is an equation that involves _____.
a) Only algebraic terms
b) Only transcendental functions
c) Both algebraic and transcendental functions
d) Linear terms only

9) The interval in which a real root of the equation $x^3 - 2x - 5 = 0$ lies is _____.
a) $(1, 2)$ b) $(0, 1)$
c) $(2, 3)$ d) $(3, 4)$

10) The Gauss-Seidel method is used for solving _____.
a) Nonlinear equations b) Systems of linear equations
c) Ordinary differential equations d) Partial differential equations

11) Which of the following is a disadvantage of the Gauss-Jacobi method?
a) It converges faster than most direct methods
b) It requires a large number of iterations for a good approximation
c) It cannot be used for systems with more than two equations
d) It works only for symmetric systems

SECTION – I

Q.2 Attempt Any Five: **25**

a) Find the double root of the equation $x^3 - 5.4x^2 + 9.24x - 5.096 = 0$ given that it is nearer to 1.5.

b) Solve the system of equations by Jacobi's iterative method (perform 3 iterations):
$27x + 6y - z = 85,$
$6x + 15y + 2z = 72,$
$x + y + 54z = 110$

c) Find positive real root of the equation $x\sin(x) + \cos(x) = 0$ using Newton-Raphson method correct to 3 decimal places.

d) Solve the system of equations by using Gauss-Elimination method:
$2x + y + z = 7,$
$x + 2y + 3z = 14,$
$3x + 4y + z = 14.$

e) Solve the following system of equations using LU Decomposition method:
$2x + 3y + z = 9$
$x + 2y + 3z = 6$
$3x + y + 2z = 8$

f) Solve $\frac{dy}{dx} = x + y$ with $x_0 = 0, y_0 = 1$ using fourth-order Runge-Kutta method and find approximate value of y when $x = 0.2$

g) Solve $\frac{dy}{dx} = 1 + xy$ with $y(0) = 1$ using Picard's method take first approximation and find y for $x = 0.1$

Q.3 Attempt Any One. **03**

a) Solve the system by Gauss-Seidel method (Perform 4 iterations):

$10x + y + z = 12$

$2x + 10y + z = 13$

$2x + 2y + 10z = 14$

b) Use Newton-Raphson method to find a root of the equation $x^4 - x - 10 = 0$ which is near to $x = 2$. Perform 3 iterations correct to three decimal places.

SECTION – II

Q.4 Attempt Any Five. **25**

a) Approximate $\int_1^3 \frac{1}{x} dx$ using the composite trapezoidal rule with $n = 4$ sub-intervals. List the function values at the nodes, show the application of the formula, and give the final answer correct to 4 decimal places

b) Using Jacobi's method, find all eigenvalues and eigenvectors of the symmetric matrix:

$$A = \begin{bmatrix} 6 & 2 & 1 \\ 2 & 5 & 2 \\ 1 & 2 & 4 \end{bmatrix}$$

c) Evaluate the integral $\int_{-1}^{1} \frac{dx}{1+x^2}$ using Gaussian 3-point Quadrature formula.

d) Find the dominant eigenvalue and the corresponding eigenvector of the matrix

$A = \begin{bmatrix} 4 & 1 & 1 \\ 1 & 3 & 1 \\ 1 & 1 & 2 \end{bmatrix}$ using the Power Method.

Perform 5 iterations taking initial vector as $[1,0,0]^T$

e) Given the Values:

x	2	4	6	8
$f(x)$	5	17	37	65

Evaluate $f(5)$, using Lagrange's Formula.

f) Using Newton's Backward formula, find the value of $f(2)$ if:

x	1.0	1.5	2.0	2.5
$f(x)$	2.71	3.38	4.00	4.58

g) Determine the polynomial $f(x)$ using Newton's Divided Difference formula for the data: Also find $f(3)$.

x	0	1	2	3	5
$f(x)$	1	14	15	5	6

Q.5 Attempt Any One. **03**

a) Find all Eigen values and Eigen vectors of the following matrix by using Gauss Jacobi's Method. $\begin{bmatrix} 1 & 2 \\ 3 & 4 \end{bmatrix}$

b) Construct Newton's Forward interpolation polynomial for the following data:

x	4	6	8	10
$f(x)$	1	3	8	16

Seat No.

$x + 2y + 3z = 6$
$3x + y + 2z = 8$

f) Solve $\frac{dy}{dx} = x + y$ with $x_0 = 0, y_0 = 1$ using fourth-order Runge-Kutta method and find approximate value of y when $x = 0.2$

g) Solve $\frac{dy}{dx} = 1 + xy$ with $y(0) = 1$ using Picard's method take first approximation and find y for $x = 0.1$

Q.3 Attempt Any One. **03**

a) Solve the system by Gauss-Seidel method (Perform 4 iterations):

$10x + y + z = 12$

$2x + 10y + z = 13$

$2x + 2y + 10z = 14$

b) Use Newton-Raphson method to find a root of the equation $x^4 - x - 10 = 0$ which is near to $x = 2$. Perform 3 iterations correct to three decimal places.

SECTION – II

Q.4 Attempt Any Five. **25**

a) Approximate $\int_1^3 \frac{1}{x} dx$ using the composite trapezoidal rule with $n = 4$ sub-intervals. List the function values at the nodes, show the application of the formula, and give the final answer correct to 4 decimal places

b) Using Jacobi's method, find all eigenvalues and eigenvectors of the symmetric matrix:

$$A = \begin{bmatrix} 6 & 2 & 1 \\ 2 & 5 & 2 \\ 1 & 2 & 4 \end{bmatrix}$$

c) Evaluate the integral $\int_{-1}^{1} \frac{dx}{1+x^2}$ using Gaussian 3-point Quadrature formula.

d) Find the dominant eigenvalue and the corresponding eigenvector of the matrix

$A = \begin{bmatrix} 4 & 1 & 1 \\ 1 & 3 & 1 \\ 1 & 1 & 2 \end{bmatrix}$ using the Power Method.

Perform 5 iterations taking initial vector as $[1,0,0]^T$

e) Given the Values:

x	2	4	6	8
$f(x)$	5	17	37	65

Evaluate $f(5)$, using Lagrange's Formula.

f) Using Newton's Backward formula, find the value of $f(2)$ if:

x	1.0	1.5	2.0	2.5
$f(x)$	2.71	3.38	4.00	4.58

g) Determine the polynomial $f(x)$ using Newton's Divided Difference formula for the data: Also find $f(3)$.

x	0	1	2	3	5
$f(x)$	1	14	15	5	6

Q.5 Attempt Any One. **03**

a) Find all Eigen values and Eigen vectors of the following matrix by using Gauss Jacobi's Method. $\begin{bmatrix} 1 & 2 \\ 3 & 4 \end{bmatrix}$

b) Construct Newton's Forward interpolation polynomial for the following data:

x	4	6	8	10
$f(x)$	1	3	8	16

Seat No.	

Set **S**

S.Y. (B.Tech.) (Electronics & Computer Engineering) (Semester - II) (New) (NEP CBCS) Examination: March/April - 2026
Computational Mathematics (OE-02F)

Day & Date: Friday, 22-05-2026 Max. Marks: 70
Time: 03:00 PM To 06:00 PM

Instructions: 1) Q. No. 1 is compulsory. It should be solved in the first 30 minutes in Answer Book Page no 03 (Starting page of the Answer Book). Each question carries one mark.
2) Don't forget to Mention question paper set (P/Q/R/S) on top of page.
3) Figures to the right indicates full marks.
4) Assume suitable data where necessary.

MCQ/Objective Type Questions

Duration: 30 Minutes Marks:14

Q.1 Choose the correct alternative from the options. **14**

1) The order of convergence of Newton-Raphson method is _____.
a) 1 b) 2
c) $\sqrt{2}$ d) 1.6

2) Power Method is used to find _____.
a) Negative Eigen Value b) Largest Eigen value
c) Positive Eigen Value d) None of these

3) To find the numerically largest Eigen value using iterative method we use the equation _____.
a) $A = \lambda X$ b) $AX = X$
c) $X = \lambda X$ d) $AX = \lambda X$

4) If $dy/dx = x - y$ and $y(0) = 1$, then by Picard's method the value of $y_1(1)$ is _____.
a) 0.905 b) 1.905
c) 2.905 d) None

5) Runge-Kutta method is self-starting method _____.
a) True b) False
c) We can't say d) None

6) The Newton's forward interpolation formula is generally preferred when data points are _____.
a) Unequally spaced
b) Equally spaced and near the beginning
c) Equally spaced and near the end
d) Randomly spaced

7) In the power method, the vector is normalized in each iteration mainly to _____.
   a) increase the determinant
   b) prevent values from becoming too large
   c) eliminate eigen values
   d) make the matrix symmetric

8) Simpson's $3/8$ rule requires the number of sub-intervals to be _____.
   a) multiple of 2
   b) multiple of 3
   c) multiple of 4
   d) odd only

9) Picard's method is mainly used to solve _____.
   a) linear programming problems
   b) differential equations
   c) eigen value problems
   d) interpolation problems

10) A transcendental equation is an equation that involves _____.
   a) Only algebraic terms
   b) Only transcendental functions
   c) Both algebraic and transcendental functions
   d) Linear terms only

11) The interval in which a real root of the equation $x^3 - 2x - 5 = 0$ lies is _____.
   a) $(1, 2)$
   b) $(0, 1)$
   c) $(2, 3)$
   d) $(3, 4)$

12) The Gauss-Seidel method is used for solving _____.
   a) Nonlinear equations
   b) Systems of linear equations
   c) Ordinary differential equations
   d) Partial differential equations

13) Which of the following is a disadvantage of the Gauss-Jacobi method?
   a) It converges faster than most direct methods
   b) It requires a large number of iterations for a good approximation
   c) It cannot be used for systems with more than two equations
   d) It works only for symmetric systems

14) The use of Romberg's method is _____.
   a) To solve simultaneous linear equation
   b) To find root of linear equation
   c) To evaluate definite integration
   d) To find the Eigen values

Seat No.

S.Y. (B.Tech.) (Electronics & Computer Engineering) (Semester - II) (New) (NEP CBCS) Examination: March/April - 2026
Computational Mathematics (OE-02F)

Day & Date: Friday, 22-05-2026 Max. Marks: 56
Time: 03:00 PM To 06:00 PM

Instructions: 1) All questions are compulsory.
2) Figures to the right indicate full marks.
3) Assume suitable data where necessary.

SECTION – I

Q.2 Attempt Any Five: **25**

a) Find the double root of the equation $x^3 - 5.4x^2 + 9.24x - 5.096 = 0$ given that it is nearer to 1.5.

b) Solve the system of equations by Jacobi's iterative method (perform 3 iterations):
$27x + 6y - z = 85,$
$6x + 15y + 2z = 72,$
$x + y + 54z = 110$

c) Find positive real root of the equation $x\sin(x) + \cos(x) = 0$ using Newton-Raphson method correct to 3 decimal places.

d) Solve the system of equations by using Gauss-Elimination method:
$2x + y + z = 7,$
$x + 2y + 3z = 14,$
$3x + 4y + z = 14.$

e) Solve the following system of equations using LU Decomposition method:
$2x + 3y + z = 9$
$x + 2y + 3z = 6$
$3x + y + 2z = 8$

f) Solve $\frac{dy}{dx} = x + y$ with $x_0 = 0, y_0 = 1$ using fourth-order Runge-Kutta method and find approximate value of y when $x = 0.2$

g) Solve $\frac{dy}{dx} = 1 + xy$ with $y(0) = 1$ using Picard's method take first approximation and find y for $x = 0.1$

Q.3 Attempt Any One. **03**

a) Solve the system by Gauss-Seidel method (Perform 4 iterations):

$10x + y + z = 12$

$2x + 10y + z = 13$

$2x + 2y + 10z = 14$

b) Use Newton-Raphson method to find a root of the equation $x^4 - x - 10 = 0$ which is near to $x = 2$. Perform 3 iterations correct to three decimal places.

SECTION – II

Q.4 Attempt Any Five. **25**

a) Approximate $\int_1^3 \frac{1}{x} dx$ using the composite trapezoidal rule with $n = 4$ sub-intervals. List the function values at the nodes, show the application of the formula, and give the final answer correct to 4 decimal places

b) Using Jacobi's method, find all eigenvalues and eigenvectors of the symmetric matrix:

$$A = \begin{bmatrix} 6 & 2 & 1 \\ 2 & 5 & 2 \\ 1 & 2 & 4 \end{bmatrix}$$

c) Evaluate the integral $\int_{-1}^{1} \frac{dx}{1+x^2}$ using Gaussian 3-point Quadrature formula.

d) Find the dominant eigenvalue and the corresponding eigenvector of the matrix

$A = \begin{bmatrix} 4 & 1 & 1 \\ 1 & 3 & 1 \\ 1 & 1 & 2 \end{bmatrix}$ using the Power Method.

Perform 5 iterations taking initial vector as $[1,0,0]^T$

e) Given the Values:

x	2	4	6	8
$f(x)$	5	17	37	65

Evaluate $f(5)$, using Lagrange's Formula.

f) Using Newton's Backward formula, find the value of $f(2)$ if:

x	1.0	1.5	2.0	2.5
$f(x)$	2.71	3.38	4.00	4.58

g) Determine the polynomial $f(x)$ using Newton's Divided Difference formula for the data: Also find $f(3)$.

x	0	1	2	3	5
$f(x)$	1	14	15	5	6

Q.5 Attempt Any One. **03**

a) Find all Eigen values and Eigen vectors of the following matrix by using Gauss Jacobi's Method. $\begin{bmatrix} 1 & 2 \\ 3 & 4 \end{bmatrix}$

b) Construct Newton's Forward interpolation polynomial for the following data:

x	4	6	8	10
$f(x)$	1	3	8	16

Set P

S.Y. (B.Tech.) (Electronics & Computer Engineering) (Semester - II) (New) (NEP CBCS) Examination: March/April - 2026
Professional Business Communication (OE-02G)

Day & Date: Friday, 22-05-2026 Max. Marks: 70
Time: 03:00 PM To 06:00 PM

Instructions: 1) Q. No. 1 is compulsory. It should be solved in the first 30 minutes in Answer Book Page no 03 (Starting page of the Answer Book). Each question carries one mark.
2) Don't forget to Mention question paper set (P/Q/R/S) on top of page.
3) Figures to the right indicates full marks.
4) Assume suitable data wherever needed and mention it clearly.

MCQ/Objective Type Questions

Duration: 30 Minutes Marks:14

Q.1 Choose the correct alternative from the option. 14

1) In the basic process of communication, the sender converts ideas into symbols; this step is called_____.
a) Decoding b) Encoding
c) Feedback d) Channeling

2) A message sent without words using facial expressions or gestures is called _____.
a) Written communication b) Verbal communication
c) Non-verbal communication d) Grapevine communication

3) Which channel characteristic most reduces chances of immediate feedback?
a) Face-to-face conversation b) Telephone call
c) Email d) Video conference

4) A major barrier to effective communication that arises from personal beliefs or selective attention is called _____.
a) Noise b) Semantic barrier
c) Perceptual barrier d) Channel barrier

5) Body language, eye contact and posture are examples of ____.
a) Verbal codes b) Non-verbal codes
c) Written codes d) Graphic communication

6) Upward communication flows from _____.
a) Top management to workers
b) Peers to peers
c) Workers to management
d) External stakeholders to company

7) An advantage of face-to-face communication over written communication is _____.
a) Permanent record
b) Easier legal reference
c) Immediate feedback
d) More formal tone

8) Which element is essential for an effective welcome speech?
a) Detailed technical data
b) Acknowledgement of guests
c) Long biographical note
d) Complex statistics

9) The main purpose of a vote of thanks at an event is to _____.
a) Introduce the keynote speaker
b) Summarize research findings
c) Express gratitude to contributors and audience
d) Present the event budget

10) Which is a best practice when delivering a professional presentation?
a) Reading every slide verbatim
b) Using too many small fonts
c) Maintaining eye contact and varying tone
d) Using no structure or flow

11) When a buyer is dissatisfied with delivered goods and asks for correction or refund, they should send a _____.
a) Enquiry letter
b) Complaint letter
c) Order letter
d) Quotation letter

12) A purchase order is principally used to _____.
a) Complain about defects
b) Request a quotation
c) Place an order for goods or services
d) Acknowledge receipt of payment

13) Which part of a business letter contains the main message or details the writer wants to communicate?
a) Heading
b) Salutation
c) Body
d) Signature block

14) Which report type is typically written to describe a workplace accident and recommend corrective actions?
a) Progress report
b) Accident report
c) Sales report
d) Quotation report

Set **P**

S.Y. (B.Tech.) (Civil Engineering) (Semester - II) (New) (CBCS)
Examination: March/April – 2026
Microprocessors and Peripherals (ECEMDM-02A)

Day & Date: Thursday, 30-04-2026 Max. Marks: 70
Time: 03:00 PM To 06:00 PM

Instructions: 1) Q. No. 1 is compulsory. It should be solved in the first 30 minutes in Answer Book Page no 03 (Starting page of the Answer Book). Each question carries one mark.
2) Don't forget to Mention question paper set (P/Q/R/S) on top of page.
3) Figures to the right indicates full marks.
4) Assume suitable data whenever needed & mention it clearly.

MCQ/Objective Type Questions

Duration: 30 Minutes Marks:14

Q.1 Choose the correct answer. **14**

1) Which interrupt is maskable?
a) HOLD b) TRAP
c) RST 7.5 d) RESET

2) The ALU performs _____.
a) Output operations
b) Memory storage
c) Arithmetic and logical operations
d) Input operations

3) Which instruction loads immediate data into register?
a) LXI b) MOV
c) MVI d) STA

4) Serial communication transfers data _____.
a) All bits simultaneously b) 16 bits at a time
c) One bit at a time d) 8 bits at a time

5) Which register pair is used for memory addressing in 8085?
a) DE b) HL
c) SP d) BC

6) 8279 is mainly used for _____.
a) Memory b) Arithmetic
c) Timing d) Keyboard/display interface

7) Which flag indicates negative result?
a) Carry b) Parity
c) Sign d) Zero

8) 8086 supports how many address lines?
a) 32 b) 20
c) 16 d) 8

9) Which instruction is used to store accumulator content in memory?
a) ADD b) MOV
c) STA d) LDA

10) The stack pointer points to _____.
a) Address bus b) Data register
c) Next instruction d) Top of stack

11) Which device is used for address decoding?
a) Flip-flop b) Encoder
c) Decoder d) Multiplexer

12) In memory-mapped I/O, devices are treated as _____.
a) Flags b) Ports
c) Registers d) Memory locations

13) 8255 operates in how many modes?
a) 1 b) 4
c) 3 d) 2

14) Stepper motor control requires _____.
a) Continuous signal b) Random signal
c) Pulse sequence d) Analog signal

Seat No.	

Set **P**

S.Y. (B.Tech.) (Civil Engineering) (Semester - II) (New) (CBCS)
Examination: March/April – 2026
Microprocessors and Peripherals (ECEMDM-02A)

Day & Date: Thursday, 30-04-2026 Max. Marks: 56
Time: 03:00 PM To 06:00 PM

Instructions: 1) All questions are compulsory.
2) Figures to the right indicate full marks.
3) Assume suitable data whenever needed & mention it clearly.

Section – I

Q.2 Attempt the following. (Any Four) **16**

a) Differentiate between data transfer and arithmetic instructions.
b) List and explain any four addressing modes of 8085.
c) What is address decoding? Why is it required?
d) Differentiate between RAM and ROM.
e) Explain memory organization in 8085.

Q.3 Attempt the following. (Any Two) **12**

a) Write an ALP to multiply two 8-bit numbers and explain it.
b) Explain logical and arithmetic instructions in 8085.
c) Compare I/O mapped I/O and memory-mapped I/O.

Section – II

Q.4 Attempt the following. (Any Four) **16**

a) List and explain priority of interrupts in 8085.
b) Draw and explain the architecture of 8255 PPI.
c) Define DMA and its features.
d) State need of peripheral interfacing.
e) Differentiate between 8085 and 8086.

Q.5 Solve following. (Any Two) **12**

a) Draw and explain pin configuration of 8255 PPI.
b) Describe serial communication using SID and SOD.
c) Explain stepper motor interfacing using 8085.

Instructions: 1) All questions are compulsory.
2) Figures to the right indicate full marks.
3) Assume suitable data whenever needed & mention it clearly.

Section – I

Q.2 Attempt the following. (Any Four) **16**

a) Differentiate between data transfer and arithmetic instructions.
b) List and explain any four addressing modes of 8085.
c) What is address decoding? Why is it required?
d) Differentiate between RAM and ROM.
e) Explain memory organization in 8085.

Q.3 Attempt the following. (Any Two) **12**

a) Write an ALP to multiply two 8-bit numbers and explain it.
b) Explain logical and arithmetic instructions in 8085.
c) Compare I/O mapped I/O and memory-mapped I/O.

Section – II

Q.4 Attempt the following. (Any Four) **16**

a) List and explain priority of interrupts in 8085.
b) Draw and explain the architecture of 8255 PPI.
c) Define DMA and its features.
d) State need of peripheral interfacing.
e) Differentiate between 8085 and 8086.

Q.5 Solve following. (Any Two) **12**

a) Draw and explain pin configuration of 8255 PPI.
b) Describe serial communication using SID and SOD.
c) Explain stepper motor interfacing using 8085.

Set **S**

S.Y. (B.Tech.) (Computer Science and Engineering) (Semester - II) (New) (CBCS) Examination: March/April – 2026
Microprocessors and Peripherals (ECEMDM-02A)

Day & Date: Thursday, 30-04-2026 Max. Marks: 70
Time: 03:00 PM To 06:00 PM

Instructions: 1) Q. No. 1 is compulsory. It should be solved in the first 30 minutes in Answer Book Page no 03 (Starting page of the Answer Book). Each question carries one mark.
2) Don't forget to Mention question paper set (P/Q/R/S) on top of page.
3) Figures to the right indicates full marks.
4) Assume suitable data whenever needed & mention it clearly.

MCQ/Objective Type Questions

Duration: 30 Minutes Marks:14

Q.1 Choose the correct answer. **14**

1) 8279 is mainly used for _____.
a) Memory b) Arithmetic
c) Timing d) Keyboard/display interface

2) Which flag indicates negative result?
a) Carry b) Parity
c) Sign d) Zero

3) 8086 supports how many address lines?
a) 32 b) 20
c) 16 d) 8

4) Which instruction is used to store accumulator content in memory?
a) ADD b) MOV
c) STA d) LDA

5) The stack pointer points to _____.
a) Address bus b) Data register
c) Next instruction d) Top of stack

6) Which device is used for address decoding?
a) Flip-flop b) Encoder
c) Decoder d) Multiplexer

7) In memory-mapped I/O, devices are treated as _____.
a) Flags b) Ports
c) Registers d) Memory locations

8) 8255 operates in how many modes?
a) 1 b) 4
c) 3 d) 2

9) Stepper motor control requires _____.
a) Continuous signal b) Random signal
c) Pulse sequence d) Analog signal

10) Which interrupt is maskable?
a) HOLD b) TRAP
c) RST 7.5 d) RESET

11) The ALU performs _____.
a) Output operations
b) Memory storage
c) Arithmetic and logical operations
d) Input operations

12) Which instruction loads immediate data into register?
a) LXI b) MOV
c) MVI d) STA

13) Serial communication transfers data _____.
a) All bits simultaneously b) 16 bits at a time
c) One bit at a time d) 8 bits at a time

14) Which register pair is used for memory addressing in 8085?
a) DE b) HL
c) SP d) BC

a) Output operations
b) Memory storage
c) Arithmetic and logical operations
d) Input operations

10) Which instruction loads immediate data into register?
a) LXI b) MOV
c) MVI d) STA

11) Serial communication transfers data _____.
a) All bits simultaneously b) 16 bits at a time
c) One bit at a time d) 8 bits at a time

12) Which register pair is used for memory addressing in 8085?
a) DE b) HL
c) SP d) BC

13) 8279 is mainly used for _____.
a) Memory b) Arithmetic
c) Timing d) Keyboard/display interface

14) Which flag indicates negative result?
a) Carry b) Parity
c) Sign d) Zero

Seat No.	

Set **Q**

S.Y. (B.Tech.) (Electrical Engineering) (Semester - II) (New) (CBCS)
Examination: March/April – 2026
Microprocessors and Peripherals (ECEMDM-02A)

Day & Date: Thursday, 30-04-2026 Max. Marks: 56
Time: 03:00 PM To 06:00 PM

Instructions: 1) All questions are compulsory.
2) Figures to the right indicate full marks.
3) Assume suitable data whenever needed & mention it clearly.

Section – I

Q.2 Attempt the following. (Any Four) **16**

a) Differentiate between data transfer and arithmetic instructions.
b) List and explain any four addressing modes of 8085.
c) What is address decoding? Why is it required?
d) Differentiate between RAM and ROM.
e) Explain memory organization in 8085.

Q.3 Attempt the following. (Any Two) **12**

a) Write an ALP to multiply two 8-bit numbers and explain it.
b) Explain logical and arithmetic instructions in 8085.
c) Compare I/O mapped I/O and memory-mapped I/O.

Section – II

Q.4 Attempt the following. (Any Four) **16**

a) List and explain priority of interrupts in 8085.
b) Draw and explain the architecture of 8255 PPI.
c) Define DMA and its features.
d) State need of peripheral interfacing.
e) Differentiate between 8085 and 8086.

Q.5 Solve following. (Any Two) **12**

a) Draw and explain pin configuration of 8255 PPI.
b) Describe serial communication using SID and SOD.
c) Explain stepper motor interfacing using 8085.

Seat No.	

Set **R**

S.Y. (B.Tech.) (Electrical Engineering) (Semester - II) (New) (CBCS)
Examination: March/April – 2026
Microprocessors and Peripherals (ECEMDM-02A)

Day & Date: Thursday, 30-04-2026 Max. Marks: 70
Time: 03:00 PM To 06:00 PM

Instructions: 1) Q. No. 1 is compulsory. It should be solved in the first 30 minutes in Answer Book Page no 03 (Starting page of the Answer Book). Each question carries one mark.
2) Don't forget to Mention question paper set (P/Q/R/S) on top of page.
3) Figures to the right indicates full marks.
4) Assume suitable data whenever needed & mention it clearly.

MCQ/Objective Type Questions

Duration: 30 Minutes Marks:14

Q.1 Choose the correct answer. **14**

1) Which device is used for address decoding?
a) Flip-flop b) Encoder
c) Decoder d) Multiplexer

2) In memory-mapped I/O, devices are treated as _____.
a) Flags b) Ports
c) Registers d) Memory locations

3) 8255 operates in how many modes?
a) 1 b) 4
c) 3 d) 2

4) Stepper motor control requires _____.
a) Continuous signal b) Random signal
c) Pulse sequence d) Analog signal

5) Which interrupt is maskable?
a) HOLD b) TRAP
c) RST 7.5 d) RESET

6) The ALU performs _____.
a) Output operations
b) Memory storage
c) Arithmetic and logical operations
d) Input operations

7) Which instruction loads immediate data into register?
a) LXI b) MOV
c) MVI d) STA

8) Serial communication transfers data _____.
a) All bits simultaneously b) 16 bits at a time
c) One bit at a time d) 8 bits at a time

9) Which register pair is used for memory addressing in 8085?
a) DE b) HL
c) SP d) BC

10) 8279 is mainly used for _____.
a) Memory b) Arithmetic
c) Timing d) Keyboard/display interface

11) Which flag indicates negative result?
a) Carry b) Parity
c) Sign d) Zero

12) 8086 supports how many address lines?
a) 32 b) 20
c) 16 d) 8

13) Which instruction is used to store accumulator content in memory?
a) ADD b) MOV
c) STA d) LDA

14) The stack pointer points to _____.
a) Address bus b) Data register
c) Next instruction d) Top of stack

4) Assume suitable data whenever needed & mention it clearly.

MCQ/Objective Type Questions

Duration: 30 Minutes Marks:14

Q.1 Choose the correct answer. **14**

1) Which interrupt is maskable?
a) HOLD b) TRAP
c) RST 7.5 d) RESET

2) The ALU performs _____.
a) Output operations
b) Memory storage
c) Arithmetic and logical operations
d) Input operations

3) Which instruction loads immediate data into register?
a) LXI b) MOV
c) MVI d) STA

4) Serial communication transfers data _____.
a) All bits simultaneously b) 16 bits at a time
c) One bit at a time d) 8 bits at a time

5) Which register pair is used for memory addressing in 8085?
a) DE b) HL
c) SP d) BC

6) 8279 is mainly used for _____.
a) Memory b) Arithmetic
c) Timing d) Keyboard/display interface

7) Which flag indicates negative result?
a) Carry b) Parity
c) Sign d) Zero

8) 8086 supports how many address lines?
a) 32 b) 20
c) 16 d) 8

9) Which instruction is used to store accumulator content in memory?
a) ADD b) MOV
c) STA d) LDA

10) The stack pointer points to _____.
a) Address bus b) Data register
c) Next instruction d) Top of stack

11) Which device is used for address decoding?
a) Flip-flop b) Encoder
c) Decoder d) Multiplexer

12) In memory-mapped I/O, devices are treated as _____.
a) Flags b) Ports
c) Registers d) Memory locations

13) 8255 operates in how many modes?
a) 1 b) 4
c) 3 d) 2

14) Stepper motor control requires _____.
a) Continuous signal b) Random signal
c) Pulse sequence d) Analog signal

Seat No.	

Set **P**

S.Y. (B.Tech.) (Mechanical Engineering) (Semester - II) (New) (CBCS)
Examination: March/April – 2026
Microprocessors and Peripherals (ECEMDM-02A)

Day & Date: Thursday, 30-04-2026 Max. Marks: 56
Time: 03:00 PM To 06:00 PM

Instructions: 1) All questions are compulsory.
2) Figures to the right indicate full marks.
3) Assume suitable data whenever needed & mention it clearly.

Section – I

Q.2 Attempt the following. (Any Four) **16**

a) Differentiate between data transfer and arithmetic instructions.
b) List and explain any four addressing modes of 8085.
c) What is address decoding? Why is it required?
d) Differentiate between RAM and ROM.
e) Explain memory organization in 8085.

Q.3 Attempt the following. (Any Two) **12**

a) Write an ALP to multiply two 8-bit numbers and explain it.
b) Explain logical and arithmetic instructions in 8085.
c) Compare I/O mapped I/O and memory-mapped I/O.

Section – II

Q.4 Attempt the following. (Any Four) **16**

a) List and explain priority of interrupts in 8085.
b) Draw and explain the architecture of 8255 PPI.
c) Define DMA and its features.
d) State need of peripheral interfacing.
e) Differentiate between 8085 and 8086.

Q.5 Solve following. (Any Two) **12**

a) Draw and explain pin configuration of 8255 PPI.
b) Describe serial communication using SID and SOD.
c) Explain stepper motor interfacing using 8085.

Seat No.	

Set **Q**

S.Y. (B.Tech.) (Mechanical Engineering) (Semester - II) (New) (CBCS)
Examination: March/April – 2026
Microprocessors and Peripherals (ECEMDM-02A)

Day & Date: Thursday, 30-04-2026 Max. Marks: 70
Time: 03:00 PM To 06:00 PM

Instructions: 1) Q. No. 1 is compulsory. It should be solved in the first 30 minutes in Answer Book Page no 03 (Starting page of the Answer Book). Each question carries one mark.
2) Don't forget to Mention question paper set (P/Q/R/S) on top of page.
3) Figures to the right indicates full marks.
4) Assume suitable data whenever needed & mention it clearly.

MCQ/Objective Type Questions

Duration: 30 Minutes Marks:14

Q.1 Choose the correct answer. **14**

1) 8086 supports how many address lines?
a) 32 b) 20
c) 16 d) 8

2) Which instruction is used to store accumulator content in memory?
a) ADD b) MOV
c) STA d) LDA

3) The stack pointer points to _____.
a) Address bus b) Data register
c) Next instruction d) Top of stack

4) Which device is used for address decoding?
a) Flip-flop b) Encoder
c) Decoder d) Multiplexer

5) In memory-mapped I/O, devices are treated as _____.
a) Flags b) Ports
c) Registers d) Memory locations

6) 8255 operates in how many modes?
a) 1 b) 4
c) 3 d) 2

7) Stepper motor control requires _____.
a) Continuous signal b) Random signal
c) Pulse sequence d) Analog signal

8) Which interrupt is maskable?
a) HOLD b) TRAP
c) RST 7.5 d) RESET

9) The ALU performs _____.
a) Output operations

MCQ/Objective Type Questions

Duration: 30 Minutes Marks:14

Q.1 Choose the correct alternative from the option. 14

1) Which sensor is used to detect light intensity?
a) Thermistor b) LDR
c) Strain gauge d) Piezoelectric sensor

2) The accuracy of a sensor refers to _____.
a) Speed of response b) Closeness to true value
c) Output variation d) Range

3) Which device converts digital signal into analog signal?
a) ADC b) DAC
c) Filter d) Amplifier

4) A 8-bit ADC provides how many discrete levels?
a) 128 b) 256
c) 512 d) 1024

5) Drift error in sensors is mainly caused by _____.
a) Sudden noise
b) Environmental changes over time
c) Power failure
d) Signal delay

6) Which actuator is commonly used for linear motion?
a) Motor b) Relay
c) Solenoid d) LED

7) Which protocol uses two wires for communication?
a) SPI b) I2C
c) UART d) CAN

8) Interrupts are mainly used to _____.
a) Increase memory
b) Execute sequential tasks
c) Respond to events immediately
d) Store data

9) Which scheduling algorithm is commonly used in RTOS?
a) FIFO b) Round Robin
c) Priority-based d) Random

10) EEPROM is _____.
a) Volatile memory
b) Temporary memory
c) Non-volatile programmable memory
d) Cache memory

11) Which circuit is used to remove noise from signals?
a) Amplifier b) Filter
c) ADC d) Sensor

12) Smart home systems are an example of _____.
a) Manual systems
b) Embedded systems with IoT
c) Mechanical systems
d) Offline systems

13) Firmware is stored in _____.
a) RAM b) Hard disk
c) ROM/Flash d) Cache

14) A key challenge in IoT systems is _____.
a) Unlimited power b) Data security
c) Large size d) No connectivity

e) Write short notes on smart healthcare systems.

Q.5 Solve. (Any Two) **12**

a) Explain architecture of embedded system with diagram.

b) Explain memory types in embedded systems and optimization techniques.

c) Discuss applications of embedded systems in healthcare and industry.

Set S

S.Y. (B.Tech.) (Electronics & Computer Engineering) (Semester - II) (New) (NEP CBCS) Examination: March/April - 2026
Ai Technology- Sensors, actuators and embedded systems (ECEHON-02B)

Day & Date: Tuesday, 26-05-2026 Max. Marks: 70
Time: 03:00 PM To 06:00 PM

Instructions: 1) Q. No. 1 is compulsory. It should be solved in the first 30 minutes in Answer Book Page no 03 (Starting page of the Answer Book). Each question carries one mark.
2) Don't forget to Mention question paper set (P/Q/R/S) on top of page.
3) Figures to the right indicate full marks.

MCQ/Objective Type Questions

Duration: 30 Minutes Marks:14

Q.1 Choose the correct alternative from the option. 14

1) Which actuator is commonly used for linear motion?
a) Motor b) Relay
c) Solenoid d) LED

2) Which protocol uses two wires for communication?
a) SPI b) I2C
c) UART d) CAN

3) Interrupts are mainly used to _____.
a) Increase memory
b) Execute sequential tasks
c) Respond to events immediately
d) Store data

4) Which scheduling algorithm is commonly used in RTOS?
a) FIFO b) Round Robin
c) Priority-based d) Random

5) EEPROM is _____.
a) Volatile memory
b) Temporary memory
c) Non-volatile programmable memory
d) Cache memory

6) Which circuit is used to remove noise from signals?
a) Amplifier b) Filter
c) ADC d) Sensor

7) Smart home systems are an example of _____.
a) Manual systems
b) Embedded systems with IoT
c) Mechanical systems
d) Offline systems

8) Firmware is stored in _____.
a) RAM b) Hard disk
c) ROM/Flash d) Cache

9) A key challenge in IoT systems is _____.
a) Unlimited power b) Data security
c) Large size d) No connectivity

10) Which sensor is used to detect light intensity?
a) Thermistor b) LDR
c) Strain gauge d) Piezoelectric sensor

11) The accuracy of a sensor refers to _____.
a) Speed of response b) Closeness to true value
c) Output variation d) Range

12) Which device converts digital signal into analog signal?
a) ADC b) DAC
c) Filter d) Amplifier

13) A 8-bit ADC provides how many discrete levels?
a) 128 b) 256
c) 512 d) 1024

14) Drift error in sensors is mainly caused by _____.
a) Sudden noise
b) Environmental changes over time
c) Power failure
d) Signal delay

S.Y. (B.Tech.) (Electronics & Computer Engineering) (Semester - II) (New) (NEP CBCS) Examination: March/April - 2026
Ai Technology- Sensors, actuators and embedded systems (ECEHON-02B)

Day & Date: Tuesday, 26-05-2026 Max. Marks: 56
Time: 03:00 PM To 06:00 PM

Instructions: 1) All questions are compulsory.
2) Figures to the right indicate full marks.

SECTION – I

Q.2 Solve. (Any Four) **16**

a) Define sensors and list its types with examples.

b) Classify different types of Actuators and briefly explain any two.

c) Explain the following characteristics of sensors: sensitivity, accuracy and resolution.

d) Explain different types of filters used in signal processing.

e) Explain analog and digital signal processing with suitable examples.

Q.3 Solve. (Any Two) **12**

a) Describe different types of sensors (temperature, pressure, proximity, motion) with applications.

b) Explain calibration and why it is necessary for sensors and actuators.

c) Describe the working of ADC and DAC with diagrams.

SECTION – II

Q.4 Solve. (Any Four) **16**

a) What is an embedded system? Give two examples.

b) What is RTOS? Explain its advantages.

c) Define firmware and explain its importance.

d) Discuss criteria for selecting a microcontroller.

e) Write short notes on smart healthcare systems.

Q.5 Solve. (Any Two) **12**

a) Explain architecture of embedded system with diagram.

b) Explain memory types in embedded systems and optimization techniques.

c) Discuss applications of embedded systems in healthcare and industry.

Professional Ethics (VEC-02)

Day & Date: Friday, 29-05-2026 Max. Marks: 50
Time: 10:00 AM To 11:30 AM

Instructions: 1) All questions are compulsory.
2) Figures to the right indicate full marks.
3) Mention Question Paper Set (P/Q/R/S) on Top of Page.

Q.1 Answer the following Objective Type Questions. **50** **Answer**

1) What are fundamental human values?
a) Core beliefs and principles that guide human behavior and interactions
b) Economic indicators for social development
c) Religious doctrines that govern human life
d) Scientific facts that influence decision-making

2) Which value emphasizes treating others as you wish to be treated?
a) Respect b) Empathy
c) Honesty d) Kindness

3) The value of honesty is closely related to _____.
a) Truthfulness and sincerity b) Wealth and possessions
c) Power and influence d) Indifference and insensitivity

4) Which value involves considering the perspectives and feelings of others?
a) Empathy b) Courage
c) Determination d) Patience

5) The value of respect entails _____.
a) Recognizing the worth of every individual and their rights
b) Achieving personal success at any cost
c) Promoting competition among individuals
d) Pursuing material gains over relationships

6) Which value involves being accountable for one's decisions and actions?
a) Responsibility b) Flexibility
c) Confidence d) Arrogance

7) The value of integrity entails _____.
a) Being honest and true to oneself and others
b) Pursuing personal interests at any cost
c) Manipulating and deceiving others for personal gain
d) Ignoring the feelings and rights of other

8) Which value involves being considerate and thoughtful towards others?
a) Kindness
b) Determination
c) Independence
d) Indifference

9) The value of wisdom involves _____.
a) Making sound and informed judgments based on knowledge and experience
b) Pursuing personal interests at the expense of others
c) Ignoring the perspectives and concerns of others
d) Suppressing one's emotions and thoughts

10) Which value involves being truthful and sincere in one's actions and words?
a) Honesty
b) Tolerance
c) Flexibility
d) Arrogance

11) What is the primary goal of engineering ethics?
a) To maximize profits for companies
b) To ensure engineers work efficiently
c) To protect public safety and welfare
d) To follow industry standards

12) Which of the following is considered an ethical responsibility of an engineer?
a) Ignoring environmental concerns to meet deadlines
b) Ensuring the safety of the public
c) Disregarding laws and regulations
d) Making decisions based on personal interests

13) Ethical engineering practices promote _____.
a) The continuous pursuit of profit
b) The advancement of technology at any cost
c) Public trust and confidence in engineering
d) The minimization of safety regulations

14) Ethical engineers should consider which of the following when making decisions?
a) Profit maximization
b) Only the interests of the employer
c) Public safety, environmental impact, and ethical codes
d) Personal comfort and convenience

15) Which of the following is NOT part of an engineer's ethical responsibility?
a) Designing for safety and sustainability
b) Falsifying data to ensure project success
c) Reporting safety concerns immediately
d) Following industry standards and regulations

16) Ethical engineering involves making decisions based on _____.
a) Personal opinions and values
b) Financial incentives and company pressure
c) Objective analysis, codes of ethics, and consideration for the public good
d) Trends in the field of engineering

17) What should an engineer do if they discover a colleague is involved in unethical practices?
a) Ignore the situation to avoid conflict
b) Report the unethical behavior to management or relevant authorities
c) Cover up the situation to protect the colleague
d) Allow the behavior to continue if it does not affect the project

18) Ethical engineering practices include _____.
a) Following industry standards and regulations
b) Ensuring profitability is the main priority
c) Cutting costs by any means necessary
d) Avoiding the reporting of safety hazards

19) What is the primary focus of Kohlberg's theory?
a) Cognitive development b) Social development
c) Moral development d) Emotional development

20) Which term refers to an agreement that is made through discussions and compromises among parties?
a) Conflict b) Consensus
c) Dispute d) Isolation

21) What is the primary goal of risk assessment?
a) To eliminate all risks
b) To identify and mitigate potential risks
c) To ignore potential risks
d) To transfer risks to others

22) What is the primary goal of safety protocols?
a) To increase productivity
b) To reduce costs
c) To prevent injuries and illnesses
d) To improve employee morale

23) What is the difference between a hazard and a risk?
- a) A hazard is a potential risk, while a risk is a real danger
- b) A hazard is a real danger, while a risk is a potential danger
- c) A hazard is a physical danger, while a risk is a financial danger
- d) A hazard is a financial danger, while a risk is a physical danger

24) What should you do if you identify a potential risk in the workplace?
- a) Ignore it and hope it goes away
- b) Report it to your supervisor or HR
- c) Try to mitigate it on your own
- d) Transfer the risk to someone else

25) According to the theory of ethical egoism, what should guide an individual's moral actions?
- a) The well-being of others
- b) The individual's own self-interest
- c) Social norms and conventions
- d) Universal moral principles

26) Collegiality in a professional setting refers to _____.
- a) Loyalty to your employer
- b) Cooperation and mutual respect among colleagues
- c) Competing for individual success
- d) Avoiding work conflicts

27) Professional loyalty involves _____.
- a) Reporting colleagues' mistakes publicly
- b) Protecting the interests of the team or organization
- c) Ignoring safety violations to avoid
- d) Disclosing confidential information for personal conflict gain

28) Employee rights include _____.
- a) The right to work without discrimination
- b) The right to disregard company policies
- c) The right to personal opinion but not affecting work
- d) The right to ignore workplace safety standards

29) Intellectual Property Rights (IPR) protect _____.
- a) The financial interests of corporations
- b) The ownership and use of creative ideas and inventions
- c) The physical assets of a company
- d) Workplace performance evaluations

30) *Risk assessment* is important because it helps in _____.
- a) Evaluating the potential impact of hazards on health and safety
- b) Minimizing workplace productivity
- c) Defining job roles
- d) Ignoring environmental issues

31) In risk management, mitigation strategies aim to _____.
a) Accept all risks in the workplace
b) Reduce or eliminate identified risks
c) Increase the likelihood of hazards
d) Focus only on maximizing profits

32) Which of the following is a potential consequence of *occupational crime?*
a) Increased workplace productivity
b) Legal consequences and loss of reputation
c) Improvement in company safety standards
d) Higher employee satisfaction

33) Risk reduction in engineering refers to _____.
a) Implementing measures to lower the work chances of accidents
b) Increasing the number of hazards in the work environment
c) Ignoring potential risks
d) Cutting costs by removing safety measures

34) Public safety regulations are primarily designed to _____.
a) Ensure the safety of the company's assets
b) Protect the general public from potential harm
c) Increase revenue for the government
d) Focus only on preventing natural disasters

35) Multinational corporations (MNCs) are characterized by _____.
a) Operations in multiple countries with a centralized headquarters
b) Operating only in their home country
c) Limited influence on global markets
d) No responsibility toward environmental concerns

36) Environmental ethics primarily deals with _____.
a) Human responsibility to manage the environment and natural resources
b) Minimizing corporate profits
c) Technological advancements in engineering
d) Treating employees equally

37) Which of the following is NOT an example of environmental ethics?
a) Reducing pollution and waste
b) Maximizing resource use regardless of environmental impact
c) Preserving biodiversity
d) Sustainable development

38) Computer ethics involves _____.
   a) Programming and coding without considering social consequences
   b) Understanding the moral implications of computing technologies
   c) Focusing only on technological innovation
   d) Ignoring privacy issues

39) Weapons development ethics deals with _____.
   a) The development of new technologies to enhance military capabilities
   b) Restricting the use of all technological advancements
   c) Focusing only on civilian safety
   d) Only addressing the legal aspects of weapon development

40) Engineers as managers are expected to _____.
   a) Focus solely on technical tasks
   b) Lead teams, make strategic decisions, and manage projects
   c) Ignore the business aspects of their work
   d) Avoid taking responsibility for team outcomes

41) Consulting engineers are hired to _____.
   a) Work on projects within the company they are employed
   b) Provide expert advice on technical and engineering problems
   c) Manage public relations for a company
   d) Conduct legal investigations

42) Engineers acting as expert witnesses typically _____.
   a) Present evidence and offer testimony in legal cases
   b) Focus on public relations during a case
   c) Manage engineering projects for legal firms
   d) Directly represent the interests of a company court

43) Sample Code of Ethics of professional organizations typically includes _____.
   a) Guidelines for acceptable behavior and decision-making
   b) Rules for maximizing profits at any cost
   c) Detailed technical specifications for projects
   d) Guidelines for political involvement in engineering

44) ASME stands for _____.
   a) American Society of Mechanical Engineers
   b) American Society of Management Engineers
   c) Association of Safety and Mechanical Engineers
   d) Association of Scientific and Mechanical Engineers

45) The ASCE Code of Ethics emphasizes _____.
a) Following only local regulations
b) Maintaining professional integrity and responsibility
c) Focusing on personal financial gain
d) Ignoring environmental impacts

46) The IEEE Code of Ethics is primarily concerned with _____.
a) Fostering professional competence and integrity
b) Protecting corporate secrets
c) Maximizing technological advancements at any cost
d) Developing weapons for defense purposes

47) Global issues in engineering ethics include _____.
a) Cultural differences in engineering practices
b) Lack of understanding between technical and ethical concerns
c) Addressing both local and international engineering challenges
d) All of the above

48) A key challenge faced by multinational corporations is _____.
a) Balancing profits with social and environmental
b) Competing only within their home country responsibilities
c) Focusing solely on domestic issues
d) Ignoring corporate social responsibility

49) Empathy is the ability to _____.
a) Solve problems logically
b) Understand and share the feelings of others
c) Be indifferent to others' emotions
d) Only care about your own well-being

50) The quality of "caring" includes _____.
a) Showing concern for others' well-being
b) Ignoring the needs of others
c) Only helping family and friends
d) Seeking praise for helping others

12) Which of the following is a potential consequence of *occupational crime?*
   a) Increased workplace productivity
   b) Legal consequences and loss of reputation
   c) Improvement in company safety standards
   d) Higher employee satisfaction

13) Risk reduction in engineering refers to _____.
   a) Implementing measures to lower the work chances of accidents
   b) Increasing the number of hazards in the work environment
   c) Ignoring potential risks
   d) Cutting costs by removing safety measures

14) Public safety regulations are primarily designed to _____.
- a) Ensure the safety of the company's assets
- b) Protect the general public from potential harm
- c) Increase revenue for the government
- d) Focus only on preventing natural disasters

15) Multinational corporations (MNCs) are characterized by _____.
- a) Operations in multiple countries with a centralized headquarters
- b) Operating only in their home country
- c) Limited influence on global markets
- d) No responsibility toward environmental concerns

16) Environmental ethics primarily deals with _____.
- a) Human responsibility to manage the environment and natural resources
- b) Minimizing corporate profits
- c) Technological advancements in engineering
- d) Treating employees equally

17) Which of the following is NOT an example of environmental ethics?
- a) Reducing pollution and waste
- b) Maximizing resource use regardless of environmental impact
- c) Preserving biodiversity
- d) Sustainable development

18) Computer ethics involves _____.
- a) Programming and coding without considering social consequences
- b) Understanding the moral implications of computing technologies
- c) Focusing only on technological innovation
- d) Ignoring privacy issues

19) Weapons development ethics deals with _____.
- a) The development of new technologies to enhance military capabilities
- b) Restricting the use of all technological advancements
- c) Focusing only on civilian safety
- d) Only addressing the legal aspects of weapon development

20) Engineers as managers are expected to _____.
- a) Focus solely on technical tasks
- b) Lead teams, make strategic decisions, and manage projects
- c) Ignore the business aspects of their work
- d) Avoid taking responsibility for team outcomes

21) Consulting engineers are hired to _____.
a) Work on projects within the company they are employed
b) Provide expert advice on technical and engineering problems
c) Manage public relations for a company
d) Conduct legal investigations

22) Engineers acting as expert witnesses typically _____.
a) Present evidence and offer testimony in legal cases
b) Focus on public relations during a case
c) Manage engineering projects for legal firms
d) Directly represent the interests of a company court

23) Sample Code of Ethics of professional organizations typically includes _____.
a) Guidelines for acceptable behavior and decision-making
b) Rules for maximizing profits at any cost
c) Detailed technical specifications for projects
d) Guidelines for political involvement in engineering

24) ASME stands for _____.
a) American Society of Mechanical Engineers
b) American Society of Management Engineers
c) Association of Safety and Mechanical Engineers
d) Association of Scientific and Mechanical Engineers

25) The ASCE Code of Ethics emphasizes _____.
a) Following only local regulations
b) Maintaining professional integrity and responsibility
c) Focusing on personal financial gain
d) Ignoring environmental impacts

26) The IEEE Code of Ethics is primarily concerned with _____.
a) Fostering professional competence and integrity
b) Protecting corporate secrets
c) Maximizing technological advancements at any cost
d) Developing weapons for defense purposes

27) Global issues in engineering ethics include _____.
a) Cultural differences in engineering practices
b) Lack of understanding between technical and ethical concerns
c) Addressing both local and international engineering challenges
d) All of the above

28) A key challenge faced by multinational corporations is _____.
a) Balancing profits with social and environmental
b) Competing only within their home country responsibilities
c) Focusing solely on domestic issues
d) Ignoring corporate social responsibility

29) Empathy is the ability to _____.
a) Solve problems logically
b) Understand and share the feelings of others
c) Be indifferent to others' emotions
d) Only care about your own well-being

30) The quality of "caring" includes _____.
a) Showing concern for others' well-being
b) Ignoring the needs of others
c) Only helping family and friends
d) Seeking praise for helping others

31) What are fundamental human values?
a) Core beliefs and principles that guide human behavior and interactions
b) Economic indicators for social development
c) Religious doctrines that govern human life
d) Scientific facts that influence decision-making

32) Which value emphasizes treating others as you wish to be treated?
a) Respect b) Empathy
c) Honesty d) Kindness

33) The value of honesty is closely related to _____.
a) Truthfulness and sincerity b) Wealth and possessions
c) Power and influence d) Indifference and insensitivity

34) Which value involves considering the perspectives and feelings of others?
a) Empathy b) Courage
c) Determination d) Patience

35) The value of respect entails _____.
a) Recognizing the worth of every individual and their rights
b) Achieving personal success at any cost
c) Promoting competition among individuals
d) Pursuing material gains over relationships

36) Which value involves being accountable for one's decisions and actions?
a) Responsibility b) Flexibility
c) Confidence d) Arrogance

37) The value of integrity entails _____.
a) Being honest and true to oneself and others
b) Pursuing personal interests at any cost
c) Manipulating and deceiving others for personal gain
d) Ignoring the feelings and rights of other

38) Which value involves being considerate and thoughtful towards others?

a) Kindness
b) Determination
c) Independence
d) Indifference

39) The value of wisdom involves _____.

a) Making sound and informed judgments based on knowledge and experience
b) Pursuing personal interests at the expense of others
c) Ignoring the perspectives and concerns of others
d) Suppressing one's emotions and thoughts

40) Which value involves being truthful and sincere in one's actions and words?

a) Honesty
b) Tolerance
c) Flexibility
d) Arrogance

41) What is the primary goal of engineering ethics?

a) To maximize profits for companies
b) To ensure engineers work efficiently
c) To protect public safety and welfare
d) To follow industry standards

42) Which of the following is considered an ethical responsibility of an engineer?

a) Ignoring environmental concerns to meet deadlines
b) Ensuring the safety of the public
c) Disregarding laws and regulations
d) Making decisions based on personal interests

43) Ethical engineering practices promote _____.

a) The continuous pursuit of profit
b) The advancement of technology at any cost
c) Public trust and confidence in engineering
d) The minimization of safety regulations

44) Ethical engineers should consider which of the following when making decisions?

a) Profit maximization
b) Only the interests of the employer
c) Public safety, environmental impact, and ethical codes
d) Personal comfort and convenience

45) Which of the following is NOT part of an engineer's ethical responsibility?

a) Designing for safety and sustainability
b) Falsifying data to ensure project success
c) Reporting safety concerns immediately
d) Following industry standards and regulations

46) Ethical engineering involves making decisions based on _____.

a) Personal opinions and values
b) Financial incentives and company pressure
c) Objective analysis, codes of ethics, and consideration for the public good
d) Trends in the field of engineering

47) What should an engineer do if they discover a colleague is involved in unethical practices?

a) Ignore the situation to avoid conflict
b) Report the unethical behavior to management or relevant authorities
c) Cover up the situation to protect the colleague
d) Allow the behavior to continue if it does not affect the project

48) Ethical engineering practices include _____.

a) Following industry standards and regulations
b) Ensuring profitability is the main priority
c) Cutting costs by any means necessary
d) Avoiding the reporting of safety hazards

49) What is the primary focus of Kohlberg's theory?

a) Cognitive development
b) Social development
c) Moral development
d) Emotional development

50) Which term refers to an agreement that is made through discussions and compromises among parties?

a) Conflict
b) Consensus
c) Dispute
d) Isolation

   b) Understand and share the feelings of others
   c) Be indifferent to others' emotions
   d) Only care about your own well-being

10) The quality of "caring" includes _____.
   a) Showing concern for others' well-being
   b) Ignoring the needs of others
   c) Only helping family and friends
   d) Seeking praise for helping others

11) What are fundamental human values?
   a) Core beliefs and principles that guide human behavior and interactions
   b) Economic indicators for social development
   c) Religious doctrines that govern human life
   d) Scientific facts that influence decision-making

12) Which value emphasizes treating others as you wish to be treated?
   a) Respect b) Empathy
   c) Honesty d) Kindness

13) The value of honesty is closely related to _____.
   a) Truthfulness and sincerity b) Wealth and possessions
   c) Power and influence d) Indifference and insensitivity

14) Which value involves considering the perspectives and feelings of others?
   a) Empathy b) Courage
   c) Determination d) Patience

15) The value of respect entails _____.
a) Recognizing the worth of every individual and their rights
b) Achieving personal success at any cost
c) Promoting competition among individuals
d) Pursuing material gains over relationships

16) Which value involves being accountable for one's decisions and actions?
a) Responsibility b) Flexibility
c) Confidence d) Arrogance

17) The value of integrity entails _____.
a) Being honest and true to oneself and others
b) Pursuing personal interests at any cost
c) Manipulating and deceiving others for personal gain
d) Ignoring the feelings and rights of other

18) Which value involves being considerate and thoughtful towards others?
a) Kindness b) Determination
c) Independence d) Indifference

19) The value of wisdom involves _____.
a) Making sound and informed judgments based on knowledge and experience
b) Pursuing personal interests at the expense of others
c) Ignoring the perspectives and concerns of others
d) Suppressing one's emotions and thoughts

20) Which value involves being truthful and sincere in one's actions and words?
a) Honesty b) Tolerance
c) Flexibility d) Arrogance

21) What is the primary goal of engineering ethics?
a) To maximize profits for companies
b) To ensure engineers work efficiently
c) To protect public safety and welfare
d) To follow industry standards

22) Which of the following is considered an ethical responsibility of an engineer?
a) Ignoring environmental concerns to meet deadlines
b) Ensuring the safety of the public
c) Disregarding laws and regulations
d) Making decisions based on personal interests

23) Ethical engineering practices promote _____.
a) The continuous pursuit of profit
b) The advancement of technology at any cost
c) Public trust and confidence in engineering
d) The minimization of safety regulations

24) Ethical engineers should consider which of the following when making decisions?
a) Profit maximization
b) Only the interests of the employer
c) Public safety, environmental impact, and ethical codes
d) Personal comfort and convenience

25) Which of the following is NOT part of an engineer's ethical responsibility?
a) Designing for safety and sustainability
b) Falsifying data to ensure project success
c) Reporting safety concerns immediately
d) Following industry standards and regulations

26) Ethical engineering involves making decisions based on _____.
a) Personal opinions and values
b) Financial incentives and company pressure
c) Objective analysis, codes of ethics, and consideration for the public good
d) Trends in the field of engineering

27) What should an engineer do if they discover a colleague is involved in unethical practices?
a) Ignore the situation to avoid conflict
b) Report the unethical behavior to management or relevant authorities
c) Cover up the situation to protect the colleague
d) Allow the behavior to continue if it does not affect the project

28) Ethical engineering practices include _____.
a) Following industry standards and regulations
b) Ensuring profitability is the main priority
c) Cutting costs by any means necessary
d) Avoiding the reporting of safety hazards

29) What is the primary focus of Kohlberg's theory?
a) Cognitive development b) Social development
c) Moral development d) Emotional development

30) Which term refers to an agreement that is made through discussions and compromises among parties?
a) Conflict b) Consensus
c) Dispute d) Isolation

31) What is the primary goal of risk assessment?
a) To eliminate all risks
b) To identify and mitigate potential risks
c) To ignore potential risks
d) To transfer risks to others

32) What is the primary goal of safety protocols?
a) To increase productivity
b) To reduce costs
c) To prevent injuries and illnesses
d) To improve employee morale

33) What is the difference between a hazard and a risk?
a) A hazard is a potential risk, while a risk is a real danger
b) A hazard is a real danger, while a risk is a potential danger
c) A hazard is a physical danger, while a risk is a financial danger
d) A hazard is a financial danger, while a risk is a physical danger

34) What should you do if you identify a potential risk in the workplace?
a) Ignore it and hope it goes away
b) Report it to your supervisor or HR
c) Try to mitigate it on your own
d) Transfer the risk to someone else

35) According to the theory of ethical egoism, what should guide an individual's moral actions?
a) The well-being of others
b) The individual's own self-interest
c) Social norms and conventions
d) Universal moral principles

36) Collegiality in a professional setting refers to _____.
a) Loyalty to your employer
b) Cooperation and mutual respect among colleagues
c) Competing for individual success
d) Avoiding work conflicts

37) Professional loyalty involves _____.
a) Reporting colleagues' mistakes publicly
b) Protecting the interests of the team or organization
c) Ignoring safety violations to avoid
d) Disclosing confidential information for personal conflict gain

38) Employee rights include _____.
a) The right to work without discrimination
b) The right to disregard company policies
c) The right to personal opinion but not affecting work
d) The right to ignore workplace safety standards

39) Intellectual Property Rights (IPR) protect _____.
- a) The financial interests of corporations
- b) The ownership and use of creative ideas and inventions
- c) The physical assets of a company
- d) Workplace performance evaluations

40) *Risk assessment* is important because it helps in _____.
- a) Evaluating the potential impact of hazards on health and safety
- b) Minimizing workplace productivity
- c) Defining job roles
- d) Ignoring environmental issues

41) In risk management, mitigation strategies aim to _____.
- a) Accept all risks in the workplace
- b) Reduce or eliminate identified risks
- c) Increase the likelihood of hazards
- d) Focus only on maximizing profits

42) Which of the following is a potential consequence of *occupational crime?*
- a) Increased workplace productivity
- b) Legal consequences and loss of reputation
- c) Improvement in company safety standards
- d) Higher employee satisfaction

43) Risk reduction in engineering refers to _____.
- a) Implementing measures to lower the work chances of accidents
- b) Increasing the number of hazards in the work environment
- c) Ignoring potential risks
- d) Cutting costs by removing safety measures

44) Public safety regulations are primarily designed to _____.
- a) Ensure the safety of the company's assets
- b) Protect the general public from potential harm
- c) Increase revenue for the government
- d) Focus only on preventing natural disasters

45) Multinational corporations (MNCs) are characterized by _____.
- a) Operations in multiple countries with a centralized headquarters
- b) Operating only in their home country
- c) Limited influence on global markets
- d) No responsibility toward environmental concerns

46) Environmental ethics primarily deals with _____.

a) Human responsibility to manage the environment and natural resources
b) Minimizing corporate profits
c) Technological advancements in engineering
d) Treating employees equally

47) Which of the following is NOT an example of environmental ethics?

a) Reducing pollution and waste
b) Maximizing resource use regardless of environmental impact
c) Preserving biodiversity
d) Sustainable development

48) Computer ethics involves _____.

a) Programming and coding without considering social consequences
b) Understanding the moral implications of computing technologies
c) Focusing only on technological innovation
d) Ignoring privacy issues

49) Weapons development ethics deals with _____.

a) The development of new technologies to enhance military capabilities
b) Restricting the use of all technological advancements
c) Focusing only on civilian safety
d) Only addressing the legal aspects of weapon development

50) Engineers as managers are expected to _____.

a) Focus solely on technical tasks
b) Lead teams, make strategic decisions, and manage projects
c) Ignore the business aspects of their work
d) Avoid taking responsibility for team outcomes

S.Y. (B.Tech.) (Electronics & Computer Engineering) (Semester - II) (New) (NEP CBCS) Examination: March/April - 2026
Professional Ethics (VEC-02)

Day & Date: Friday, 29-05-2026 Max. Marks: 50
Time: 10:00 AM To 11:30 AM

Instructions: 1) All questions are compulsory.
2) Figures to the right indicate full marks.
3) Mention Question Paper Set (P/Q/R/S) on Top of Page.

Q.1 Answer the following Objective Type Questions. **50** **Answer**

1) What is the primary goal of engineering ethics?
a) To maximize profits for companies
b) To ensure engineers work efficiently
c) To protect public safety and welfare
d) To follow industry standards

2) Which of the following is considered an ethical responsibility of an engineer?
a) Ignoring environmental concerns to meet deadlines
b) Ensuring the safety of the public
c) Disregarding laws and regulations
d) Making decisions based on personal interests

3) Ethical engineering practices promote _____.
a) The continuous pursuit of profit
b) The advancement of technology at any cost
c) Public trust and confidence in engineering
d) The minimization of safety regulations

4) Ethical engineers should consider which of the following when making decisions?
a) Profit maximization
b) Only the interests of the employer
c) Public safety, environmental impact, and ethical codes
d) Personal comfort and convenience

5) Which of the following is NOT part of an engineer's ethical responsibility?
a) Designing for safety and sustainability
b) Falsifying data to ensure project success
c) Reporting safety concerns immediately
d) Following industry standards and regulations

6) Ethical engineering involves making decisions based on _____.

a) Personal opinions and values
b) Financial incentives and company pressure
c) Objective analysis, codes of ethics, and consideration for the public good
d) Trends in the field of engineering

7) What should an engineer do if they discover a colleague is involved in unethical practices?

a) Ignore the situation to avoid conflict
b) Report the unethical behavior to management or relevant authorities
c) Cover up the situation to protect the colleague
d) Allow the behavior to continue if it does not affect the project

8) Ethical engineering practices include _____.

a) Following industry standards and regulations
b) Ensuring profitability is the main priority
c) Cutting costs by any means necessary
d) Avoiding the reporting of safety hazards

9) What is the primary focus of Kohlberg's theory?

a) Cognitive development
b) Social development
c) Moral development
d) Emotional development

10) Which term refers to an agreement that is made through discussions and compromises among parties?

a) Conflict
b) Consensus
c) Dispute
d) Isolation

11) What is the primary goal of risk assessment?

a) To eliminate all risks
b) To identify and mitigate potential risks
c) To ignore potential risks
d) To transfer risks to others

12) What is the primary goal of safety protocols?

a) To increase productivity
b) To reduce costs
c) To prevent injuries and illnesses
d) To improve employee morale

13) What is the difference between a hazard and a risk?

a) A hazard is a potential risk, while a risk is a real danger
b) A hazard is a real danger, while a risk is a potential danger
c) A hazard is a physical danger, while a risk is a financial danger
d) A hazard is a financial danger, while a risk is a physical danger

14) What should you do if you identify a potential risk in the workplace?
a) Ignore it and hope it goes away
b) Report it to your supervisor or HR
c) Try to mitigate it on your own
d) Transfer the risk to someone else

15) According to the theory of ethical egoism, what should guide an individual's moral actions?
a) The well-being of others
b) The individual's own self-interest
c) Social norms and conventions
d) Universal moral principles

16) Collegiality in a professional setting refers to _____.
a) Loyalty to your employer
b) Cooperation and mutual respect among colleagues
c) Competing for individual success
d) Avoiding work conflicts

17) Professional loyalty involves _____.
a) Reporting colleagues' mistakes publicly
b) Protecting the interests of the team or organization
c) Ignoring safety violations to avoid
d) Disclosing confidential information for personal conflict gain

18) Employee rights include _____.
a) The right to work without discrimination
b) The right to disregard company policies
c) The right to personal opinion but not affecting work
d) The right to ignore workplace safety standards

19) Intellectual Property Rights (IPR) protect _____.
a) The financial interests of corporations
b) The ownership and use of creative ideas and inventions
c) The physical assets of a company
d) Workplace performance evaluations

20) *Risk assessment* is important because it helps in _____.
a) Evaluating the potential impact of hazards on health and safety
b) Minimizing workplace productivity
c) Defining job roles
d) Ignoring environmental issues

21) In risk management, mitigation strategies aim to _____.
a) Accept all risks in the workplace
b) Reduce or eliminate identified risks
c) Increase the likelihood of hazards
d) Focus only on maximizing profits

22) Which of the following is a potential consequence of *occupational crime?*
a) Increased workplace productivity
b) Legal consequences and loss of reputation
c) Improvement in company safety standards
d) Higher employee satisfaction

23) Risk reduction in engineering refers to _____.
a) Implementing measures to lower the work chances of accidents
b) Increasing the number of hazards in the work environment
c) Ignoring potential risks
d) Cutting costs by removing safety measures

24) Public safety regulations are primarily designed to _____.
a) Ensure the safety of the company's assets
b) Protect the general public from potential harm
c) Increase revenue for the government
d) Focus only on preventing natural disasters

25) Multinational corporations (MNCs) are characterized by _____.
a) Operations in multiple countries with a centralized headquarters
b) Operating only in their home country
c) Limited influence on global markets
d) No responsibility toward environmental concerns

26) Environmental ethics primarily deals with _____.
a) Human responsibility to manage the environment and natural resources
b) Minimizing corporate profits
c) Technological advancements in engineering
d) Treating employees equally

27) Which of the following is NOT an example of environmental ethics?
a) Reducing pollution and waste
b) Maximizing resource use regardless of environmental impact
c) Preserving biodiversity
d) Sustainable development

28) Computer ethics involves _____.
a) Programming and coding without considering social consequences
b) Understanding the moral implications of computing technologies
c) Focusing only on technological innovation
d) Ignoring privacy issues

29) Weapons development ethics deals with _____.
a) The development of new technologies to enhance military capabilities
b) Restricting the use of all technological advancements
c) Focusing only on civilian safety
d) Only addressing the legal aspects of weapon development

30) Engineers as managers are expected to _____.
a) Focus solely on technical tasks
b) Lead teams, make strategic decisions, and manage projects
c) Ignore the business aspects of their work
d) Avoid taking responsibility for team outcomes

31) Consulting engineers are hired to _____.
a) Work on projects within the company they are employed
b) Provide expert advice on technical and engineering problems
c) Manage public relations for a company
d) Conduct legal investigations

32) Engineers acting as expert witnesses typically _____.
a) Present evidence and offer testimony in legal cases
b) Focus on public relations during a case
c) Manage engineering projects for legal firms
d) Directly represent the interests of a company court

33) Sample Code of Ethics of professional organizations typically includes _____.
a) Guidelines for acceptable behavior and decision-making
b) Rules for maximizing profits at any cost
c) Detailed technical specifications for projects
d) Guidelines for political involvement in engineering

34) ASME stands for _____.
a) American Society of Mechanical Engineers
b) American Society of Management Engineers
c) Association of Safety and Mechanical Engineers
d) Association of Scientific and Mechanical Engineers

35) The ASCE Code of Ethics emphasizes _____.
a) Following only local regulations
b) Maintaining professional integrity and responsibility
c) Focusing on personal financial gain
d) Ignoring environmental impacts

36) The IEEE Code of Ethics is primarily concerned with _____.
a) Fostering professional competence and integrity
b) Protecting corporate secrets
c) Maximizing technological advancements at any cost
d) Developing weapons for defense purposes

37) Global issues in engineering ethics include _____.
a) Cultural differences in engineering practices
b) Lack of understanding between technical and ethical concerns
c) Addressing both local and international engineering challenges
d) All of the above

38) A key challenge faced by multinational corporations is _____.
a) Balancing profits with social and environmental
b) Competing only within their home country responsibilities
c) Focusing solely on domestic issues
d) Ignoring corporate social responsibility

39) Empathy is the ability to _____.
a) Solve problems logically
b) Understand and share the feelings of others
c) Be indifferent to others' emotions
d) Only care about your own well-being

40) The quality of "caring" includes _____.
a) Showing concern for others' well-being
b) Ignoring the needs of others
c) Only helping family and friends
d) Seeking praise for helping others

41) What are fundamental human values?
a) Core beliefs and principles that guide human behavior and interactions
b) Economic indicators for social development
c) Religious doctrines that govern human life
d) Scientific facts that influence decision-making

42) Which value emphasizes treating others as you wish to be treated?
a) Respect b) Empathy
c) Honesty d) Kindness

43) The value of honesty is closely related to _____.
a) Truthfulness and sincerity b) Wealth and possessions
c) Power and influence d) Indifference and insensitivity

44) Which value involves considering the perspectives and feelings of others?
a) Empathy b) Courage
c) Determination d) Patience

45) The value of respect entails _____.

a) Recognizing the worth of every individual and their rights
b) Achieving personal success at any cost
c) Promoting competition among individuals
d) Pursuing material gains over relationships

46) Which value involves being accountable for one's decisions and actions?

a) Responsibility b) Flexibility
c) Confidence d) Arrogance

47) The value of integrity entails _____.

a) Being honest and true to oneself and others
b) Pursuing personal interests at any cost
c) Manipulating and deceiving others for personal gain
d) Ignoring the feelings and rights of other

48) Which value involves being considerate and thoughtful towards others?

a) Kindness b) Determination
c) Independence d) Indifference

49) The value of wisdom involves _____.

a) Making sound and informed judgments based on knowledge and experience
b) Pursuing personal interests at the expense of others
c) Ignoring the perspectives and concerns of others
d) Suppressing one's emotions and thoughts

50) Which value involves being truthful and sincere in one's actions and words?

a) Honesty b) Tolerance
c) Flexibility d) Arrogance

Set P

S.Y. (B.Tech.) (Civil Engineering) (Semester - I) (New) (NEP CBCS) Examination: March/April – 2026
Design Thinking: Business Innovation Framework (CIVMDM-01A)

Day & Date: Thursday, 30-04-2026 Max. Marks: 70
Time: 10:00 AM To 01:00 PM

Instructions: 1) Q. No. 1 is compulsory. It should be solved in the first 30 minutes in Answer Book Page no 03 (Starting page of the Answer Book). Each question carries one mark.
2) Don't forget to Mention question paper set (P/Q/R/S) on top of page.
3) Figures to the right indicates full marks.
4) Use of non-programmable calculators is allowed.

MCQ/Objective Type Questions

Duration: 30 Minutes Marks:14

Q.1 Multiple choice questions. **14**

1) Design Thinking primarily focuses on _____.
a) Profit maximization b) User-centric solutions
c) Technical optimization d) Cost reduction

2) Which is NOT a phase of Design Thinking?
a) Empathize b) Define
c) Execute d) Prototype

3) Creativity is best defined as _____.
a) Copying ideas b) Generating novel ideas
c) Following standards d) Improving efficiency

4) Engineering design differs from design thinking because _____.
a) It ignores users
b) It is purely technical
c) It is not iterative
d) It focuses more on constraints than empathy

5) Which leadership style involves team participation?
a) Autocratic b) Democratic
c) Laissez-faire d) Transactional

6) Technology forecasting helps in _____.
a) Past analysis b) Predicting future trends
c) Cost cutting d) Marketing

7) Product Market Fit refers to _____.
a) Product price alignment
b) Matching product with market demand
c) Product manufacturing
d) Distribution channels

8) Predictive analytics is used for _____.
a) Data storage
b) Future predictions
c) Data deletion
d) Communication

9) Service blueprint mainly represents _____.
a) Product cost
b) Service process
c) Marketing plan
d) Financial report

10) Which is a principle of service design?
a) Complexity
b) User focus
c) Random design
d) High cost

11) Lean Canvas is used for _____.
a) Detailed engineering design
b) Business model planning
c) Product testing
d) Marketing only

12) Intellectual Property protects _____.
a) Physical assets
b) Ideas and innovations
c) Labor
d) Machinery

13) Brainstorming is used for _____.
a) Decision making
b) Idea generation
c) Testing
d) Implementation

14) Journey mapping focuses on _____.
a) Financial data
b) User experience
c) Manufacturing
d) Cost analysis

Instructions: 1) All questions are compulsory.
2) Figures to the right indicate full marks.
3) Use of non-programmable calculators is allowed.
4) Assume suitable data whenever needed & mention it clearly.

Section – I

Q.2 Answer the following questions. **10**

a) Define Design Thinking and explain its objectives.

b) Explain tools of Design Thinking (any two).

Q.3 Answer the following questions. (Any Three) **18**

a) Explain phases of the Design Thinking process.

b) Discuss the role of creativity and innovation in organizations.

c) Differentiate between engineering design and design thinking.

d) Explain types of leadership with examples.

e) Describe technology forecasting and its importance.

Section – II

Q.4 Answer the following questions. **10**

a) Explain Product Solution Fit.

b) Describe decision-making process in innovation.

Q.5 Answer the following questions. (Any Three) **18**

a) Explain principles of service design.

b) Describe Lean Canvas model.

c) Explain Agile industrial design concepts.

d) Discuss intellectual property in product development.

e) Explain design thinking for sustainability.

Set **S**

S.Y. (B.Tech.) (Civil Engineering) (Semester - I) (New)
(NEP CBCS) Examination: March/April – 2026
Design Thinking: Business Innovation Framework (CIVMDM-01A)

Day & Date: Thursday, 30-04-2026 Max. Marks: 70
Time: 10:00 AM To 01:00 PM

Instructions: 1) Q. No. 1 is compulsory. It should be solved in the first 30 minutes in Answer Book Page no 03 (Starting page of the Answer Book). Each question carries one mark.
2) Don't forget to Mention question paper set (P/Q/R/S) on top of page.
3) Figures to the right indicates full marks.
4) Use of non-programmable calculators is allowed.

MCQ/Objective Type Questions

Duration: 30 Minutes Marks:14

Q.1 Multiple choice questions. **14**

1) Technology forecasting helps in _____.
a) Past analysis b) Predicting future trends
c) Cost cutting d) Marketing

2) Product Market Fit refers to _____.
a) Product price alignment
b) Matching product with market demand
c) Product manufacturing
d) Distribution channels

3) Predictive analytics is used for _____.
a) Data storage b) Future predictions
c) Data deletion d) Communication

4) Service blueprint mainly represents _____.
a) Product cost b) Service process
c) Marketing plan d) Financial report

5) Which is a principle of service design?
a) Complexity b) User focus
c) Random design d) High cost

6) Lean Canvas is used for _____.
a) Detailed engineering design b) Business model planning
c) Product testing d) Marketing only

7) Intellectual Property protects _____.
a) Physical assets b) Ideas and innovations
c) Labor d) Machinery

8) Brainstorming is used for _____.
a) Decision making b) Idea generation
c) Testing d) Implementation

9) Journey mapping focuses on _____.
a) Financial data b) User experience
c) Manufacturing d) Cost analysis

10) Design Thinking primarily focuses on _____.
a) Profit maximization b) User-centric solutions
c) Technical optimization d) Cost reduction

11) Which is NOT a phase of Design Thinking?
a) Empathize b) Define
c) Execute d) Prototype

12) Creativity is best defined as _____.
a) Copying ideas b) Generating novel ideas
c) Following standards d) Improving efficiency

13) Engineering design differs from design thinking because _____.
a) It ignores users
b) It is purely technical
c) It is not iterative
d) It focuses more on constraints than empathy

14) Which leadership style involves team participation?
a) Autocratic b) Democratic
c) Laissez-faire d) Transactional

Instructions: 1) All questions are compulsory.
2) Figures to the right indicate full marks.
3) Use of non-programmable calculators is allowed.
4) Assume suitable data whenever needed & mention it clearly.

Section – I

Q.2 Answer the following questions. **10**

a) Define Design Thinking and explain its objectives.

b) Explain tools of Design Thinking (any two).

Q.3 Answer the following questions. (Any Three) **18**

a) Explain phases of the Design Thinking process.

b) Discuss the role of creativity and innovation in organizations.

c) Differentiate between engineering design and design thinking.

d) Explain types of leadership with examples.

e) Describe technology forecasting and its importance.

Section – II

Q.4 Answer the following questions. **10**

a) Explain Product Solution Fit.

b) Describe decision-making process in innovation.

Q.5 Answer the following questions. (Any Three) **18**

a) Explain principles of service design.

b) Describe Lean Canvas model.

c) Explain Agile industrial design concepts.

d) Discuss intellectual property in product development.

Set R

S.Y. (B.Tech.) (Electronics & Computer Engineering) (Semester - I) (New) (NEP CBCS) Examination: March/April – 2026
Design Thinking: Business Innovation Framework (CIVMDM-01A)

Day & Date: Thursday, 30-04-2026 Max. Marks: 70
Time: 10:00 AM To 01:00 PM

Instructions: 1) Q. No. 1 is compulsory. It should be solved in the first 30 minutes in Answer Book Page no 03 (Starting page of the Answer Book). Each question carries one mark.
2) Don't forget to Mention question paper set (P/Q/R/S) on top of page.
3) Figures to the right indicates full marks.
4) Use of non-programmable calculators is allowed.

MCQ/Objective Type Questions

Duration: 30 Minutes Marks:14

Q.1 Multiple choice questions. **14**

1) Lean Canvas is used for _____.
a) Detailed engineering design b) Business model planning
c) Product testing d) Marketing only

2) Intellectual Property protects _____.
a) Physical assets b) Ideas and innovations
c) Labor d) Machinery

3) Brainstorming is used for _____.
a) Decision making b) Idea generation
c) Testing d) Implementation

4) Journey mapping focuses on _____.
a) Financial data b) User experience
c) Manufacturing d) Cost analysis

5) Design Thinking primarily focuses on _____.
a) Profit maximization b) User-centric solutions
c) Technical optimization d) Cost reduction

6) Which is NOT a phase of Design Thinking?
a) Empathize b) Define
c) Execute d) Prototype

7) Creativity is best defined as _____.
a) Copying ideas b) Generating novel ideas
c) Following standards d) Improving efficiency

8) Engineering design differs from design thinking because _____.
   a) It ignores users
   b) It is purely technical
   c) It is not iterative
   d) It focuses more on constraints than empathy

9) Which leadership style involves team participation?
   a) Autocratic
   b) Democratic
   c) Laissez-faire
   d) Transactional

10) Technology forecasting helps in _____.
   a) Past analysis
   b) Predicting future trends
   c) Cost cutting
   d) Marketing

11) Product Market Fit refers to _____.
   a) Product price alignment
   b) Matching product with market demand
   c) Product manufacturing
   d) Distribution channels

12) Predictive analytics is used for _____.
   a) Data storage
   b) Future predictions
   c) Data deletion
   d) Communication

13) Service blueprint mainly represents _____.
   a) Product cost
   b) Service process
   c) Marketing plan
   d) Financial report

14) Which is a principle of service design?
   a) Complexity
   b) User focus
   c) Random design
   d) High cost

Design Thinking: Business Innovation Framework (CIVMDM-01A)

Day & Date: Thursday, 30-04-2026 Max. Marks: 56
Time: 10:00 AM To 01:00 PM

Instructions: 1) All questions are compulsory.
2) Figures to the right indicate full marks.
3) Use of non-programmable calculators is allowed.
4) Assume suitable data whenever needed & mention it clearly.

Section – I

Q.2 Answer the following questions. **10**

a) Define Design Thinking and explain its objectives.

b) Explain tools of Design Thinking (any two).

Q.3 Answer the following questions. (Any Three) **18**

a) Explain phases of the Design Thinking process.

b) Discuss the role of creativity and innovation in organizations.

c) Differentiate between engineering design and design thinking.

d) Explain types of leadership with examples.

e) Describe technology forecasting and its importance.

Section – II

Q.4 Answer the following questions. **10**

a) Explain Product Solution Fit.

b) Describe decision-making process in innovation.

Q.5 Answer the following questions. (Any Three) **18**

a) Explain principles of service design.

b) Describe Lean Canvas model.

c) Explain Agile industrial design concepts.

d) Discuss intellectual property in product development.

e) Explain design thinking for sustainability.

Set **Q**

S.Y. (B.Tech.) (Electronics and Telecommunication Engineering) (Semester - I) (New) (NEP CBCS) Examination: March/April – 2026
Design Thinking: Business Innovation Framework (CIVMDM-01A)

Day & Date: Thursday, 30-04-2026 Max. Marks: 70
Time: 10:00 AM To 01:00 PM

Instructions: 1) Q. No. 1 is compulsory. It should be solved in the first 30 minutes in Answer Book Page no 03 (Starting page of the Answer Book). Each question carries one mark.
2) Don't forget to Mention question paper set (P/Q/R/S) on top of page.
3) Figures to the right indicates full marks.
4) Use of non-programmable calculators is allowed.

MCQ/Objective Type Questions

Duration: 30 Minutes Marks:14

Q.1 Multiple choice questions. **14**

1) Predictive analytics is used for _____.
a) Data storage b) Future predictions
c) Data deletion d) Communication

2) Service blueprint mainly represents _____.
a) Product cost b) Service process
c) Marketing plan d) Financial report

3) Which is a principle of service design?
a) Complexity b) User focus
c) Random design d) High cost

4) Lean Canvas is used for _____.
a) Detailed engineering design b) Business model planning
c) Product testing d) Marketing only

5) Intellectual Property protects _____.
a) Physical assets b) Ideas and innovations
c) Labor d) Machinery

6) Brainstorming is used for _____.
a) Decision making b) Idea generation
c) Testing d) Implementation

7) Journey mapping focuses on _____.
a) Financial data b) User experience
c) Manufacturing d) Cost analysis

8) Design Thinking primarily focuses on _____.
a) Profit maximization
b) User-centric solutions
c) Technical optimization
d) Cost reduction

9) Which is NOT a phase of Design Thinking?
a) Empathize
b) Define
c) Execute
d) Prototype

10) Creativity is best defined as _____.
a) Copying ideas
b) Generating novel ideas
c) Following standards
d) Improving efficiency

11) Engineering design differs from design thinking because _____.
a) It ignores users
b) It is purely technical
c) It is not iterative
d) It focuses more on constraints than empathy

12) Which leadership style involves team participation?
a) Autocratic
b) Democratic
c) Laissez-faire
d) Transactional

13) Technology forecasting helps in _____.
a) Past analysis
b) Predicting future trends
c) Cost cutting
d) Marketing

14) Product Market Fit refers to _____.
a) Product price alignment
b) Matching product with market demand
c) Product manufacturing
d) Distribution channels

Set **Q**

S.Y. (B.Tech.) (Electronics and Telecommunication Engineering) (Semester - I) (New) (NEP CBCS) Examination: March/April – 2026
Design Thinking: Business Innovation Framework (CIVMDM-01A)

Day & Date: Thursday, 30-04-2026 Max. Marks: 56
Time: 10:00 AM To 01:00 PM

Instructions: 1) All questions are compulsory.
2) Figures to the right indicate full marks.
3) Use of non-programmable calculators is allowed.
4) Assume suitable data whenever needed & mention it clearly.

Section – I

Q.2 Answer the following questions. **10**

a) Define Design Thinking and explain its objectives.

b) Explain tools of Design Thinking (any two).

Q.3 Answer the following questions. (Any Three) **18**

a) Explain phases of the Design Thinking process.

b) Discuss the role of creativity and innovation in organizations.

c) Differentiate between engineering design and design thinking.

d) Explain types of leadership with examples.

e) Describe technology forecasting and its importance.

Section – II

Q.4 Answer the following questions. **10**

a) Explain Product Solution Fit.

b) Describe decision-making process in innovation.

Q.5 Answer the following questions. (Any Three) **18**

a) Explain principles of service design.

b) Describe Lean Canvas model.

c) Explain Agile industrial design concepts.

d) Discuss intellectual property in product development.

e) Explain design thinking for sustainability.

Examination: March/April – 2026
Introduction to Geographic Information System (CIVMDM-01B)

Day & Date: Thursday, 30-04-2026 Max. Marks: 70
Time: 10:00 AM To 01:00 PM

Instructions: 1) Q. No. 1 is compulsory. It should be solved in the first 30 minutes in Answer Book Page no 03 (Starting page of the Answer Book). Each question carries one mark.
2) Don't forget to Mention question paper set (P/Q/R/S) on top of page.
3) Figures to the right indicates full marks.
4) Assume suitable data whenever needed & mention it clearly.
5) Draw neat sketches wherever necessary.

MCQ/Objective Type Questions

Duration: 30 Minutes Marks:14

Q.1 Solve following Multiple Choice Questions. **14**

1) DBMS stands for _____.
a) Database Management System
b) Database Monitoring System
c) Database Manufacturing System
d) Database Mixing Station

2) The scientist Roger Tomlinson who coined it was given _____ title.
a) father of GIS b) father of Globe
c) Doctorate d) None of the above

3) DEM stands for _____.
a) Digital Elevation Meter b) Distance Elevation Model
c) Digital Elevation Model d) Distance Elevation Meter

4) Data that describe the characteristics of spatial features is _____.
a) Coverage b) Data Exploration
c) Geospatial Data d) Attribute Data

5) Which of the following is NOT a type of GIS data?
a) Field data b) Statistical data
c) Digital clock data d) Satellite data

6) Which format is used to store vector data in GIS?
a) .shp b) .jpg
c) .tif d) .bmp

7) Conversion of raster data to vector data called _____.
a) Vectorisation b) Rasterisation
c) Classification d) None of the above

8) Which data model in DBMS organizes data as tables with rows and columns?

a) Hierarchical model
b) Relational model
c) Network model
d) Object-oriented model

9) Run-length encoding is used for _____.

a) Audio compression
b) Spatial data format
c) Raster data compression
d) Command execution

10) Passive sensors detect _____.

a) Emitted energy only
b) Reflected sunlight
c) Radar pulses
d) Laser beams

11) A key characteristic of imaging systems that determines ground detail _____.

a) Temporal resolution
b) Spectral resolution
c) Spatial resolution
d) Atmospheric resolution

12) GIS helps update existing maps through _____.

a) Map matching
b) Map revision
c) Map printing
d) Data deletion

13) LULC stands for _____.

a) Land Use and Land Change
b) Land Utility and Land Control
c) Land Use and Land Cover
d) Land Underground Layer Control

14) The first step in a GIS project is _____.

a) Database creation
b) Understanding user requirements
c) Map digitization
d) Data conversion

Set P

S.Y. (B.Tech.) (Civil Engineering) (Semester - I) (New) (NEP CBCS)
Examination: March/April – 2026
Introduction to Geographic Information System (CIVMDM-01B)

Day & Date: Thursday, 30-04-2026 Max. Marks: 56
Time: 10:00 AM To 01:00 PM

Instructions: 1) All questions are compulsory.
2) Figures to the right indicate full marks.
3) Draw neat sketches wherever necessary.
4) Assume suitable data whenever needed & mention it clearly.

Section – I

Q.2 Solve following. (Any Four) **16**

a) Define GIS and explain its need and importance in Civil Engineering.

b) Define the following terms:
i) Map Scale ii) Topology

c) List and explain the various sources of data used in GIS.

d) Write a short note on:
i) Query in GIS ii) Buffer in GIS

e) What is Rasterization? Explain steps involved in Rasterization.

Q.3 Solve following. (Any Two) **12**

a) Discuss in detail applications of GIS.

b) Explain GIS plugins, their applications, advantages, and limitations.

c) Explain map overlay and write a short note on raster map overlay.

Section – II

Q.4 Solve following. (Any Four) **16**

a) Describe how metric and descriptive information is extracted from remotely sensed images.

b) Write a short note on satellite image interpretation for GIS applications.

c) Explain the use of GIS in archeological studies.

d) Discuss GIS applications in municipal and urban planning.

e) Explain the phases involved in GIS project planning.

Q.5 Solve following. (Any Two) **12**

a) Explain the process and stages of Remote sensing with neat sketch.

b) Explain integration of remote sensing and GIS with suitable examples.

c) Explain various specifications to be considered during GIS project planning.

Instructions: 1) Q. No. 1 is compulsory. It should be solved in the first 30 minutes in Answer Book Page no 03 (Starting page of the Answer Book). Each question carries one mark.
2) Don't forget to Mention question paper set (P/Q/R/S) on top of page.
3) Figures to the right indicates full marks.
4) Assume suitable data whenever needed & mention it clearly.
5) Draw neat sketches wherever necessary.

MCQ/Objective Type Questions

Duration: 30 Minutes Marks:14

Q.1 Solve following Multiple Choice Questions. **14**

1) A key characteristic of imaging systems that determines ground detail _____.
a) Temporal resolution b) Spectral resolution
c) Spatial resolution d) Atmospheric resolution

2) GIS helps update existing maps through _____.
a) Map matching b) Map revision
c) Map printing d) Data deletion

3) LULC stands for _____.
a) Land Use and Land Change
b) Land Utility and Land Control
c) Land Use and Land Cover
d) Land Underground Layer Control

4) The first step in a GIS project is _____.
a) Database creation
b) Understanding user requirements
c) Map digitization
d) Data conversion

5) DBMS stands for _____.
a) Database Management System
b) Database Monitoring System
c) Database Manufacturing System
d) Database Mixing Station

6) The scientist Roger Tomlinson who coined it was given _____ title.
a) father of GIS b) father of Globe
c) Doctorate d) None of the above

7) DEM stands for _____.
a) Digital Elevation Meter b) Distance Elevation Model
c) Digital Elevation Model d) Distance Elevation Meter

8) Data that describe the characteristics of spatial features is _____.
a) Coverage b) Data Exploration
c) Geospatial Data d) Attribute Data

9) Which of the following is NOT a type of GIS data?
a) Field data b) Statistical data
c) Digital clock data d) Satellite data

10) Which format is used to store vector data in GIS?
a) .shp b) .jpg
c) .tif d) .bmp

11) Conversion of raster data to vector data called _____.
a) Vectorisation b) Rasterisation
c) Classification d) None of the above

12) Which data model in DBMS organizes data as tables with rows and columns?
a) Hierarchical model b) Relational model
c) Network model d) Object-oriented model

13) Run-length encoding is used for _____.
a) Audio compression b) Spatial data format
c) Raster data compression d) Command execution

14) Passive sensors detect _____.
a) Emitted energy only b) Reflected sunlight
c) Radar pulses d) Laser beams

Set R

S.Y. (B.Tech.) (Computer Science and Engineering) (Semester - I) (New) (NEP CBCS) Examination: March/April – 2026
Introduction to Geographic Information System (CIVMDM-01B)

Day & Date: Thursday, 30-04-2026 Max. Marks: 56
Time: 10:00 AM To 01:00 PM

Instructions: 1) All questions are compulsory.
2) Figures to the right indicate full marks.
3) Draw neat sketches wherever necessary.
4) Assume suitable data whenever needed & mention it clearly.

Section – I

Q.2 Solve following. (Any Four) **16**

a) Define GIS and explain its need and importance in Civil Engineering.

b) Define the following terms:
i) Map Scale ii) Topology

c) List and explain the various sources of data used in GIS.

d) Write a short note on:
i) Query in GIS ii) Buffer in GIS

e) What is Rasterization? Explain steps involved in Rasterization.

Q.3 Solve following. (Any Two) **12**

a) Discuss in detail applications of GIS.

b) Explain GIS plugins, their applications, advantages, and limitations.

c) Explain map overlay and write a short note on raster map overlay.

Section – II

Q.4 Solve following. (Any Four) **16**

a) Describe how metric and descriptive information is extracted from remotely sensed images.

b) Write a short note on satellite image interpretation for GIS applications.

c) Explain the use of GIS in archeological studies.

d) Discuss GIS applications in municipal and urban planning.

e) Explain the phases involved in GIS project planning.

Q.5 Solve following. (Any Two) **12**

a) Explain the process and stages of Remote sensing with neat sketch.

b) Explain integration of remote sensing and GIS with suitable examples.

c) Explain various specifications to be considered during GIS project planning.

c) Database Manufacturing System
d) Database Mixing Station

2) The scientist Roger Tomlinson who coined it was given _____ title.
a) father of GIS b) father of Globe
c) Doctorate d) None of the above

3) DEM stands for _____.
a) Digital Elevation Meter b) Distance Elevation Model
c) Digital Elevation Model d) Distance Elevation Meter

4) Data that describe the characteristics of spatial features is _____.
a) Coverage b) Data Exploration
c) Geospatial Data d) Attribute Data

5) Which of the following is NOT a type of GIS data?
a) Field data b) Statistical data
c) Digital clock data d) Satellite data

6) Which format is used to store vector data in GIS?
a) .shp b) .jpg
c) .tif d) .bmp

7) Conversion of raster data to vector data called _____.
a) Vectorisation b) Rasterisation
c) Classification d) None of the above

8) Which data model in DBMS organizes data as tables with rows and columns?

a) Hierarchical model
b) Relational model
c) Network model
d) Object-oriented model

9) Run-length encoding is used for _____.

a) Audio compression
b) Spatial data format
c) Raster data compression
d) Command execution

10) Passive sensors detect _____.

a) Emitted energy only
b) Reflected sunlight
c) Radar pulses
d) Laser beams

11) A key characteristic of imaging systems that determines ground detail _____.

a) Temporal resolution
b) Spectral resolution
c) Spatial resolution
d) Atmospheric resolution

12) GIS helps update existing maps through _____.

a) Map matching
b) Map revision
c) Map printing
d) Data deletion

13) LULC stands for _____.

a) Land Use and Land Change
b) Land Utility and Land Control
c) Land Use and Land Cover
d) Land Underground Layer Control

14) The first step in a GIS project is _____.

a) Database creation
b) Understanding user requirements
c) Map digitization
d) Data conversion

SLR-QH-210

Seat No.		Set	P

S.Y. (B.Tech.) (Electrical Engineering) (Semester - I) (New) (NEP CBCS) Examination: March/April – 2026
Introduction to Geographic Information System (CIVMDM-01B)

Day & Date: Thursday, 30-04-2026 Max. Marks: 56
Time: 10:00 AM To 01:00 PM

Instructions: 1) All questions are compulsory.
2) Figures to the right indicate full marks.
3) Draw neat sketches wherever necessary.
4) Assume suitable data whenever needed & mention it clearly.

Section – I

Q.2 Solve following. (Any Four) **16**

a) Define GIS and explain its need and importance in Civil Engineering.

b) Define the following terms:
i) Map Scale ii) Topology

c) List and explain the various sources of data used in GIS.

d) Write a short note on:
i) Query in GIS ii) Buffer in GIS

e) What is Rasterization? Explain steps involved in Rasterization.

Q.3 Solve following. (Any Two) **12**

a) Discuss in detail applications of GIS.

b) Explain GIS plugins, their applications, advantages, and limitations.

c) Explain map overlay and write a short note on raster map overlay.

Section – II

Q.4 Solve following. (Any Four) **16**

a) Describe how metric and descriptive information is extracted from remotely sensed images.

b) Write a short note on satellite image interpretation for GIS applications.

c) Explain the use of GIS in archeological studies.

d) Discuss GIS applications in municipal and urban planning.

e) Explain the phases involved in GIS project planning.

Q.5 Solve following. (Any Two) **12**

a) Explain the process and stages of Remote sensing with neat sketch.

b) Explain integration of remote sensing and GIS with suitable examples.

c) Explain various specifications to be considered during GIS project planning.

Seat No.	

Set **Q**

S.Y. (B.Tech.) (Electrical Engineering) (Semester - I) (New) (NEP CBCS) Examination: March/April – 2026
Introduction to Geographic Information System (CIVMDM-01B)

Day & Date: Thursday, 30-04-2026 Max. Marks: 70
Time: 10:00 AM To 01:00 PM

Instructions: 1) Q. No. 1 is compulsory. It should be solved in the first 30 minutes in Answer Book Page no 03 (Starting page of the Answer Book). Each question carries one mark.
2) Don't forget to Mention question paper set (P/Q/R/S) on top of page.
3) Figures to the right indicates full marks.
4) Assume suitable data whenever needed & mention it clearly.
5) Draw neat sketches wherever necessary.

MCQ/Objective Type Questions

Duration: 30 Minutes Marks:14

Q.1 Solve following Multiple Choice Questions. **14**

1) Which data model in DBMS organizes data as tables with rows and columns?
a) Hierarchical model b) Relational model
c) Network model d) Object-oriented model

2) Run-length encoding is used for _____.
a) Audio compression b) Spatial data format
c) Raster data compression d) Command execution

3) Passive sensors detect _____.
a) Emitted energy only b) Reflected sunlight
c) Radar pulses d) Laser beams

4) A key characteristic of imaging systems that determines ground detail _____.
a) Temporal resolution b) Spectral resolution
c) Spatial resolution d) Atmospheric resolution

5) GIS helps update existing maps through _____.
a) Map matching b) Map revision
c) Map printing d) Data deletion

6) LULC stands for _____.
a) Land Use and Land Change
b) Land Utility and Land Control
c) Land Use and Land Cover
d) Land Underground Layer Control

7) The first step in a GIS project is _____.
   a) Database creation
   b) Understanding user requirements
   c) Map digitization
   d) Data conversion

8) DBMS stands for _____.
   a) Database Management System
   b) Database Monitoring System
   c) Database Manufacturing System
   d) Database Mixing Station

9) The scientist Roger Tomlinson who coined it was given _____ title.
   a) father of GIS
   b) father of Globe
   c) Doctorate
   d) None of the above

10) DEM stands for _____.
   a) Digital Elevation Meter
   b) Distance Elevation Model
   c) Digital Elevation Model
   d) Distance Elevation Meter

11) Data that describe the characteristics of spatial features is _____.
   a) Coverage
   b) Data Exploration
   c) Geospatial Data
   d) Attribute Data

12) Which of the following is NOT a type of GIS data?
   a) Field data
   b) Statistical data
   c) Digital clock data
   d) Satellite data

13) Which format is used to store vector data in GIS?
   a) .shp
   b) .jpg
   c) .tif
   d) .bmp

14) Conversion of raster data to vector data called _____.

b) Database Monitoring System
c) Database Manufacturing System
d) Database Mixing Station

6) The scientist Roger Tomlinson who coined it was given _____ title.
a) father of GIS b) father of Globe
c) Doctorate d) None of the above

7) DEM stands for _____.
a) Digital Elevation Meter b) Distance Elevation Model
c) Digital Elevation Model d) Distance Elevation Meter

8) Data that describe the characteristics of spatial features is _____.
a) Coverage b) Data Exploration
c) Geospatial Data d) Attribute Data

9) Which of the following is NOT a type of GIS data?
a) Field data b) Statistical data
c) Digital clock data d) Satellite data

10) Which format is used to store vector data in GIS?
a) .shp b) .jpg
c) .tif d) .bmp

11) Conversion of raster data to vector data called _____.
a) Vectorisation b) Rasterisation
c) Classification d) None of the above

12) Which data model in DBMS organizes data as tables with rows and columns?
a) Hierarchical model b) Relational model
c) Network model d) Object-oriented model

13) Run-length encoding is used for _____.
a) Audio compression b) Spatial data format
c) Raster data compression d) Command execution

14) Passive sensors detect _____.
a) Emitted energy only b) Reflected sunlight
c) Radar pulses d) Laser beams

Set **R**

S.Y. (B.Tech.) (Electronics and Telecommunication Engineering) (Semester - I) (New) (NEP CBCS) Examination: March/April – 2026
Introduction to Geographic Information System (CIVMDM-01B)

Day & Date: Thursday, 30-04-2026 Max. Marks: 56
Time: 10:00 AM To 01:00 PM

Instructions: 1) All questions are compulsory.
2) Figures to the right indicate full marks.
3) Draw neat sketches wherever necessary.
4) Assume suitable data whenever needed & mention it clearly.

Section – I

Q.2 Solve following. (Any Four) **16**

a) Define GIS and explain its need and importance in Civil Engineering.

b) Define the following terms:
i) Map Scale ii) Topology

c) List and explain the various sources of data used in GIS.

d) Write a short note on:
i) Query in GIS ii) Buffer in GIS

e) What is Rasterization? Explain steps involved in Rasterization.

Q.3 Solve following. (Any Two) **12**

a) Discuss in detail applications of GIS.

b) Explain GIS plugins, their applications, advantages, and limitations.

c) Explain map overlay and write a short note on raster map overlay.

Section – II

Q.4 Solve following. (Any Four) **16**

a) Describe how metric and descriptive information is extracted from remotely sensed images.

b) Write a short note on satellite image interpretation for GIS applications.

c) Explain the use of GIS in archeological studies.

d) Discuss GIS applications in municipal and urban planning.

e) Explain the phases involved in GIS project planning.

Q.5 Solve following. (Any Two) **12**

a) Explain the process and stages of Remote sensing with neat sketch.

b) Explain integration of remote sensing and GIS with suitable examples.

c) Explain various specifications to be considered during GIS project planning.

Seat No.		Set	S

S.Y. (B.Tech.) (Electronics and Telecommunication Engineering) (Semester - I) (New) (NEP CBCS) Examination: March/April – 2026
Introduction to Geographic Information System (CIVMDM-01B)

Day & Date: Thursday, 30-04-2026 Max. Marks: 70
Time: 10:00 AM To 01:00 PM

Instructions: 1) Q. No. 1 is compulsory. It should be solved in the first 30 minutes in Answer Book Page no 03 (Starting page of the Answer Book). Each question carries one mark.
2) Don't forget to Mention question paper set (P/Q/R/S) on top of page.
3) Figures to the right indicates full marks.
4) Assume suitable data whenever needed & mention it clearly.
5) Draw neat sketches wherever necessary.

MCQ/Objective Type Questions

Duration: 30 Minutes Marks:14

Q.1 Solve following Multiple Choice Questions. **14**

1) Which format is used to store vector data in GIS?
a) .shp b) .jpg
c) .tif d) .bmp

2) Conversion of raster data to vector data called _____.
a) Vectorisation b) Rasterisation
c) Classification d) None of the above

3) Which data model in DBMS organizes data as tables with rows and columns?
a) Hierarchical model b) Relational model
c) Network model d) Object-oriented model

4) Run-length encoding is used for _____.
a) Audio compression b) Spatial data format
c) Raster data compression d) Command execution

5) Passive sensors detect _____.
a) Emitted energy only b) Reflected sunlight
c) Radar pulses d) Laser beams

6) A key characteristic of imaging systems that determines ground detail _____.
a) Temporal resolution b) Spectral resolution
c) Spatial resolution d) Atmospheric resolution

7) GIS helps update existing maps through _____.
a) Map matching b) Map revision
c) Map printing d) Data deletion

8) LULC stands for _____.
   a) Land Use and Land Change
   b) Land Utility and Land Control
   c) Land Use and Land Cover
   d) Land Underground Layer Control

9) The first step in a GIS project is _____.
   a) Database creation
   b) Understanding user requirements
   c) Map digitization
   d) Data conversion

10) DBMS stands for _____.
   a) Database Management System
   b) Database Monitoring System
   c) Database Manufacturing System
   d) Database Mixing Station

11) The scientist Roger Tomlinson who coined it was given _____ title.
   a) father of GIS

2) Don't forget to Mention question paper set (P/Q/R/S) on top on page.
3) Figures to the right indicates full marks.
4) Make suitable assumptions if necessary and state them clearly.
5) Draw neat and proper diagram wherever necessary.

MCQ/Objective Type Questions

Duration: 30 Minutes Marks:14

Q.1 Multiple Choice Questions. **14**

1) The number of nearest neighboring atoms surrounding a given atom is called _____.
a) Atomic Radius b) Atomic Packing Fraction
c) Coordination Number d) Lattice Parameter

2) For a BCC structure, the Atomic Packing Factor (APF) is approximately _____.
a) 0.52 b) 0.68
c) 0.74 d) 0.3

3) The line that separates liquid and solid phases on a phase diagram is called _____.
a) Eutectic line b) Liquidus Line
c) Tie Line d) Solidus Line

4) The eutectoid reaction in the Fe-Fe_3C diagram occurs at _____.
a) 1147 C b) 912 C
c) 723 C d) 600 C

5) Pearlite is a combination of _____.
a) Austenite + Cementite b) Ferrite + Cementite
c) Austenite + Ferrite d) Martensite + Bainite

6) HSLA steels are mainly developed to improve _____.
a) Electrical conductivity
b) High strength and low alloying
c) Corrosion without coatings
d) Magnetic properties

7) Brass is an alloy of _____.
a) Copper and Tin
b) Copper and Zinc
c) Copper and Aluminum
d) Copper and Nickel

8) The main strengthening mechanism in precipitation hardening is _____.
a) Grain growth
b) Diffusion of carbon
c) Formation of fine precipitates
d) Work hardening

9) Babbitt metal is commonly used for _____.
a) Cutting tools
b) Bearings
c) Pressure vessels
d) Gear wheels

10) Thermosetting polymers become _____.
a) Soft on heating
b) Brittle on cooling
c) Permanently hard after curing
d) Recyclable easily

11) The process of adding sulfur to rubber to improve elasticity is called _____.
a) Polymerization
b) Crystallization
c) Annealing
d) Vulcanization

12) Ceramics generally exhibit which type of bonding?
a) Metallic
b) Covalent and ionic
c) Hydrogen
d) Van der Waals

13) Glass is considered a _____.
a) Fully crystalline solid
b) Metallic material
c) Amorphous ceramic
d) Polycrystalline alloy

14) Carbon fiber reinforced polymer (CFRP) is an example of _____.
a) Ceramic composite
b) Polymer composite
c) Metal matrix composite
d) Nano material

Set **P**

S.Y. (B.Tech.) (Civil Engineering) (Semester - I) (New) (NEP CBCS)
Examination: March/April – 2026
Fundamentals of Material Science and Engineering (MECHMDM-01A)

Day & Date: Thursday, 30-04-2026 Max. Marks: 56
Time: 10:00 AM To 01:00 PM

Instructions: 1) All questions are compulsory.
2) Figures to the right indicates full marks.
3) Draw neat and proper diagrams wherever necessary.
4) Make suitable assumptions if necessary and state them clearly.

Section – I

Q.2 Attempt Any Two Questions.

a) Explain the difference between unit cell and space lattice with neat sketches. **05**

b) What is the lever rule? Explain its significance in phase diagrams. **05**

c) Draw the Fe-Fe_3C equilibrium diagram and label the eutectic and eutectoid points. **05**

Q.3 Attempt Any Two Questions.

a) List and briefly explain the three steps in precipitation hardening. **05**

b) Explain the composition and applications of any two: Brass, Bronze, or Babbitt metal. **05**

c) Explain the Gibbs phase rule and calculate no. of degrees of freedom for pure metal and binary solid solution. **05**

Q.4 Write Short Notes on. (Any Two)

a) Write short notes on any two: **04**
i) HSLA steels,
ii) Invar steel,
iii) Spring steel

b) What is the difference between brass and bronze? Write two applications of each. **04**

c) What are the effects of adding alloying elements like Mn, Cr, and Ni to steel? **04**

Section – II

Q.5 Attempt Any Two Questions.

a) Differentiate between thermoplastic and thermosetting polymers with examples. **05**

b) Explain classification of ceramics. What are the different applications of ceramics in advanced technologies. **05**

c) Define electronic materials and give two examples and their uses. **05**

Q.6 Attempt Any Two Questions.

a) What are advanced ceramics? Explain their bonding and two important properties. **05**

b) Explain addition polymerization with one example. **05**

c) Explain the steps involved in preparation and characterization of ceramic powders. **05**

Q.7 Write Short Notes on. (Any Two)

a) What is crystallinity in polymers? How does it affect polymer properties? **04**

b) What are the main mechanical properties of ceramics? **04**

c) What are nanomaterials? Mention any four applications. **04**

S.Y. (B.Tech.) (Civil Engineering) (Semester - I) (New) (NEP CBCS)
Examination: March/April – 2026
Fundamentals of Material Science and Engineering (MECHMDM-01A)

Day & Date: Thursday, 30-04-2026 Max. Marks: 70
Time: 10:00 AM To 01:00 PM

Instructions: 1) Q. No. 1 is compulsory. It should be solved in the first 30 minutes in Answer Book Page no 03 (Starting page of the Answer Book). Each question carries one mark.
2) Don't forget to Mention question paper set (P/Q/R/S) on top on page.
3) Figures to the right indicates full marks.
4) Make suitable assumptions if necessary and state them clearly.
5) Draw neat and proper diagram wherever necessary.

MCQ/Objective Type Questions

Duration: 30 Minutes Marks:14

Q.1 Multiple Choice Questions. **14**

1) The main strengthening mechanism in precipitation hardening is _____.
a) Grain growth
b) Diffusion of carbon
c) Formation of fine precipitates
d) Work hardening

2) Babbitt metal is commonly used for _____.
a) Cutting tools b) Bearings
c) Pressure vessels d) Gear wheels

3) Thermosetting polymers become _____.
a) Soft on heating
b) Brittle on cooling
c) Permanently hard after curing
d) Recyclable easily

4) The process of adding sulfur to rubber to improve elasticity is called _____.
a) Polymerization b) Crystallization
c) Annealing d) Vulcanization

5) Ceramics generally exhibit which type of bonding?
a) Metallic b) Covalent and ionic
c) Hydrogen d) Van der Waals

6) Glass is considered a _____.
a) Fully crystalline solid b) Metallic material
c) Amorphous ceramic d) Polycrystalline alloy

7) Carbon fiber reinforced polymer (CFRP) is an example of _____.
a) Ceramic composite
b) Polymer composite
c) Metal matrix composite
d) Nano material

8) The number of nearest neighboring atoms surrounding a given atom is called _____.
a) Atomic Radius
b) Atomic Packing Fraction
c) Coordination Number
d) Lattice Parameter

9) For a BCC structure, the Atomic Packing Factor (APF) is approximately _____.
a) 0.52
b) 0.68
c) 0.74
d) 0.3

10) The line that separates liquid and solid phases on a phase diagram is called _____.
a) Eutectic line
b) Liquidus Line
c) Tie Line
d) Solidus Line

11) The eutectoid reaction in the Fe-Fe_3C diagram occurs at _____.
a) 1147 C
b) 912 C
c) 723 C
d) 600 C

12) Pearlite is a combination of _____.
a) Austenite + Cementite
b) Ferrite + Cementite
c) Austenite + Ferrite
d) Martensite + Bainite

13) HSLA steels are mainly developed to improve _____.
a) Electrical conductivity
b) High strength and low alloying
c) Corrosion without coatings
d) Magnetic properties

14) Brass is an alloy of _____.
a) Copper and Tin
b) Copper and Zinc
c) Copper and Aluminum
d) Copper and Nickel

Q.2 Attempt Any Two Questions.

a) Explain the difference between unit cell and space lattice with neat sketches. **05**

b) What is the lever rule? Explain its significance in phase diagrams. **05**

c) Draw the Fe-Fe_3C equilibrium diagram and label the eutectic and eutectoid points. **05**

Q.3 Attempt Any Two Questions.

a) List and briefly explain the three steps in precipitation hardening. **05**

b) Explain the composition and applications of any two: Brass, Bronze, or Babbitt metal. **05**

c) Explain the Gibbs phase rule and calculate no. of degrees of freedom for pure metal and binary solid solution. **05**

Q.4 Write Short Notes on. (Any Two)

a) Write short notes on any two: **04**
i) HSLA steels,
ii) Invar steel,
iii) Spring steel

b) What is the difference between brass and bronze? Write two applications of each. **04**

c) What are the effects of adding alloying elements like Mn, Cr, and Ni to steel? **04**

Section – II

Q.5 Attempt Any Two Questions.

a) Differentiate between thermoplastic and thermosetting polymers with examples. **05**

b) Explain classification of ceramics. What are the different applications of ceramics in advanced technologies. **05**

c) Define electronic materials and give two examples and their uses. **05**

Q.6 Attempt Any Two Questions.

a) What are advanced ceramics? Explain their bonding and two important properties. **05**

b) Explain addition polymerization with one example. **05**

c) Explain the steps involved in preparation and characterization of ceramic powders. **05**

Q.7 Write Short Notes on. (Any Two)

a) What is crystallinity in polymers? How does it affect polymer properties? **04**

b) What are the main mechanical properties of ceramics? **04**

c) What are nanomaterials? Mention any four applications. **04**

S.Y. (B.Tech.) (Computer Science and Engineering) (Semester - I) (New) (NEP CBCS) Examination: March/April – 2026
Fundamentals of Material Science and Engineering (MECHMDM-01A)

Day & Date: Thursday, 30-04-2026 Max. Marks: 70
Time: 10:00 AM To 01:00 PM

Instructions: 1) Q. No. 1 is compulsory. It should be solved in the first 30 minutes in Answer Book Page no 03 (Starting page of the Answer Book). Each question carries one mark.
2) Don't forget to Mention question paper set (P/Q/R/S) on top on page.
3) Figures to the right indicates full marks.
4) Make suitable assumptions if necessary and state them clearly.
5) Draw neat and proper diagram wherever necessary.

MCQ/Objective Type Questions

Duration: 30 Minutes Marks:14

Q.1 Multiple Choice Questions. **14**

1) The process of adding sulfur to rubber to improve elasticity is called _____.
a) Polymerization b) Crystallization
c) Annealing d) Vulcanization

2) Ceramics generally exhibit which type of bonding?
a) Metallic b) Covalent and ionic
c) Hydrogen d) Van der Waals

3) Glass is considered a _____.
a) Fully crystalline solid b) Metallic material
c) Amorphous ceramic d) Polycrystalline alloy

4) Carbon fiber reinforced polymer (CFRP) is an example of _____.
a) Ceramic composite b) Polymer composite
c) Metal matrix composite d) Nano material

5) The number of nearest neighboring atoms surrounding a given atom is called _____.
a) Atomic Radius b) Atomic Packing Fraction
c) Coordination Number d) Lattice Parameter

6) For a BCC structure, the Atomic Packing Factor (APF) is approximately _____.
a) 0.52 b) 0.68
c) 0.74 d) 0.3

7) The line that separates liquid and solid phases on a phase diagram is called _____.
a) Eutectic line
b) Liquidus Line
c) Tie Line
d) Solidus Line

8) The eutectoid reaction in the Fe-Fe_3C diagram occurs at _____.
a) 1147 C
b) 912 C
c) 723 C
d) 600 C

9) Pearlite is a combination of _____.
a) Austenite + Cementite
b) Ferrite + Cementite
c) Austenite + Ferrite
d) Martensite + Bainite

10) HSLA steels are mainly developed to improve _____.
a) Electrical conductivity
b) High strength and low alloying
c) Corrosion without coatings
d) Magnetic properties

11) Brass is an alloy of _____.
a) Copper and Tin
b) Copper and Zinc
c) Copper and Aluminum
d) Copper and Nickel

12) The main strengthening mechanism in precipitation hardening is _____.
a) Grain growth
b) Diffusion of carbon
c) Formation of fine precipitates
d) Work hardening

13) Babbitt metal is commonly used for _____.
a) Cutting tools
b) Bearings
c) Pressure vessels
d) Gear wheels

14) Thermosetting polymers become _____.
a) Soft on heating
b) Brittle on cooling
c) Permanently hard after curing
d) Recyclable easily

S.Y. (B.Tech.) (Electronics & Computer Engineering) (Semester - I) (New) (NEP CBCS) Examination: March/April – 2026
Fundamentals of Material Science and Engineering (MECHMDM-01A)

Day & Date: Thursday, 30-04-2026 Max. Marks: 70
Time: 10:00 AM To 01:00 PM

Instructions: 1) Q. No. 1 is compulsory. It should be solved in the first 30 minutes in Answer Book Page no 03 (Starting page of the Answer Book). Each question carries one mark.
2) Don't forget to Mention question paper set (P/Q/R/S) on top on page.
3) Figures to the right indicates full marks.
4) Make suitable assumptions if necessary and state them clearly.
5) Draw neat and proper diagram wherever necessary.

MCQ/Objective Type Questions

Duration: 30 Minutes Marks:14

Q.1 Multiple Choice Questions. **14**

1) HSLA steels are mainly developed to improve _____.
a) Electrical conductivity
b) High strength and low alloying
c) Corrosion without coatings
d) Magnetic properties

2) Brass is an alloy of _____.
a) Copper and Tin b) Copper and Zinc
c) Copper and Aluminum d) Copper and Nickel

3) The main strengthening mechanism in precipitation hardening is _____.
a) Grain growth
b) Diffusion of carbon
c) Formation of fine precipitates
d) Work hardening

4) Babbitt metal is commonly used for _____.
a) Cutting tools b) Bearings
c) Pressure vessels d) Gear wheels

5) Thermosetting polymers become _____.
a) Soft on heating
b) Brittle on cooling
c) Permanently hard after curing
d) Recyclable easily

6) The process of adding sulfur to rubber to improve elasticity is called _____.

a) Polymerization
b) Crystallization
c) Annealing
d) Vulcanization

7) Ceramics generally exhibit which type of bonding?

a) Metallic
b) Covalent and ionic
c) Hydrogen
d) Van der Waals

8) Glass is considered a _____.

a) Fully crystalline solid
b) Metallic material
c) Amorphous ceramic
d) Polycrystalline alloy

9) Carbon fiber reinforced polymer (CFRP) is an example of _____.

a) Ceramic composite
b) Polymer composite
c) Metal matrix composite
d) Nano material

10) The number of nearest neighboring atoms surrounding a given atom is called _____.

a) Atomic Radius
b) Atomic Packing Fraction
c) Coordination Number
d) Lattice Parameter

11) For a BCC structure, the Atomic Packing Factor (APF) is approximately _____.

a) 0.52
b) 0.68
c) 0.74
d) 0.3

12) The line that separates liquid and solid phases on a phase diagram is called _____.

a) Eutectic line
b) Liquidus Line
c) Tie Line
d) Solidus Line

13) The eutectoid reaction in the Fe-Fe_3C diagram occurs at _____.

a) 1147 C
b) 912 C
c) 723 C
d) 600 C

14) Pearlite is a combination of _____.

a) Austenite + Cementite
b) Ferrite + Cementite
c) Austenite + Ferrite
d) Martensite + Bainite

Seat No.		Set	S

S.Y. (B.Tech.) (Electronics & Computer Engineering) (Semester - I) (New) (NEP CBCS) Examination: March/April – 2026
Fundamentals of Material Science and Engineering (MECHMDM-01A)

Day & Date: Thursday, 30-04-2026 Max. Marks: 56
Time: 10:00 AM To 01:00 PM

Instructions: 1) All questions are compulsory.
2) Figures to the right indicates full marks.
3) Draw neat and proper diagrams wherever necessary.
4) Make suitable assumptions if necessary and state them clearly.

Section – I

Q.2 Attempt Any Two Questions.

a) Explain the difference between unit cell and space lattice with neat sketches. **05**

b) What is the lever rule? Explain its significance in phase diagrams. **05**

c) Draw the Fe-Fe_3C equilibrium diagram and label the eutectic and eutectoid points. **05**

Q.3 Attempt Any Two Questions.

a) List and briefly explain the three steps in precipitation hardening. **05**

b) Explain the composition and applications of any two: Brass, Bronze, or Babbitt metal. **05**

c) Explain the Gibbs phase rule and calculate no. of degrees of freedom for pure metal and binary solid solution. **05**

Q.4 Write Short Notes on. (Any Two)

a) Write short notes on any two: **04**
i) HSLA steels,
ii) Invar steel,
iii) Spring steel

b) What is the difference between brass and bronze? Write two applications of each. **04**

c) What are the effects of adding alloying elements like Mn, Cr, and Ni to steel? **04**

Section – II

Q.5 Attempt Any Two Questions.

a) Differentiate between thermoplastic and thermosetting polymers with examples. **05**

b) Explain classification of ceramics. What are the different applications of ceramics in advanced technologies. **05**

c) Define electronic materials and give two examples and their uses. **05**

Q.6 Attempt Any Two Questions.

a) What are advanced ceramics? Explain their bonding and two important properties. **05**

b) Explain addition polymerization with one example. **05**

c) Explain the steps involved in preparation and characterization of ceramic powders. **05**

Q.7 Write Short Notes on. (Any Two)

a) What is crystallinity in polymers? How does it affect polymer properties? **04**

b) What are the main mechanical properties of ceramics? **04**

c) What are nanomaterials? Mention any four applications. **04**

4) The eutectoid reaction in the Fe-Fe_3C diagram occurs at _____.
a) 1147 C b) 912 C
c) 723 C d) 600 C

5) Pearlite is a combination of _____.
a) Austenite + Cementite b) Ferrite + Cementite
c) Austenite + Ferrite d) Martensite + Bainite

6) HSLA steels are mainly developed to improve _____.
a) Electrical conductivity
b) High strength and low alloying
c) Corrosion without coatings
d) Magnetic properties

7) Brass is an alloy of _____.
a) Copper and Tin
b) Copper and Zinc
c) Copper and Aluminum
d) Copper and Nickel

8) The main strengthening mechanism in precipitation hardening is _____.
a) Grain growth
b) Diffusion of carbon
c) Formation of fine precipitates
d) Work hardening

9) Babbitt metal is commonly used for _____.
a) Cutting tools
b) Bearings
c) Pressure vessels
d) Gear wheels

10) Thermosetting polymers become _____.
a) Soft on heating
b) Brittle on cooling
c) Permanently hard after curing
d) Recyclable easily

11) The process of adding sulfur to rubber to improve elasticity is called _____.
a) Polymerization
b) Crystallization
c) Annealing
d) Vulcanization

12) Ceramics generally exhibit which type of bonding?
a) Metallic
b) Covalent and ionic
c) Hydrogen
d) Van der Waals

13) Glass is considered a _____.
a) Fully crystalline solid
b) Metallic material
c) Amorphous ceramic
d) Polycrystalline alloy

14) Carbon fiber reinforced polymer (CFRP) is an example of _____.
a) Ceramic composite
b) Polymer composite
c) Metal matrix composite
d) Nano material

Set | P

S.Y. (B.Tech.) (Electronics and Telecommunication Engineering) (Semester - I) (New) (NEP CBCS) Examination: March/April – 2026
Fundamentals of Material Science and Engineering (MECHMDM-01A)

Day & Date: Thursday, 30-04-2026 Max. Marks: 56
Time: 10:00 AM To 01:00 PM

Instructions: 1) All questions are compulsory.
2) Figures to the right indicates full marks.
3) Draw neat and proper diagrams wherever necessary.
4) Make suitable assumptions if necessary and state them clearly.

Section – I

Q.2 Attempt Any Two Questions.

a) Explain the difference between unit cell and space lattice with neat sketches. **05**

b) What is the lever rule? Explain its significance in phase diagrams. **05**

c) Draw the Fe-Fe_3C equilibrium diagram and label the eutectic and eutectoid points. **05**

Q.3 Attempt Any Two Questions.

a) List and briefly explain the three steps in precipitation hardening. **05**

b) Explain the composition and applications of any two: Brass, Bronze, or Babbitt metal. **05**

c) Explain the Gibbs phase rule and calculate no. of degrees of freedom for pure metal and binary solid solution. **05**

Q.4 Write Short Notes on. (Any Two)

a) Write short notes on any two: **04**
i) HSLA steels,
ii) Invar steel,
iii) Spring steel

b) What is the difference between brass and bronze? Write two applications of each. **04**

c) What are the effects of adding alloying elements like Mn, Cr, and Ni to steel? **04**

Section – II

Q.5 Attempt Any Two Questions.

a) Differentiate between thermoplastic and thermosetting polymers with examples. **05**

b) Explain classification of ceramics. What are the different applications of ceramics in advanced technologies. **05**

c) Define electronic materials and give two examples and their uses. **05**

Q.6 Attempt Any Two Questions.

a) What are advanced ceramics? Explain their bonding and two important properties. **05**

b) Explain addition polymerization with one example. **05**

c) Explain the steps involved in preparation and characterization of ceramic powders. **05**

Q.7 Write Short Notes on. (Any Two)

a) What is crystallinity in polymers? How does it affect polymer properties? **04**

b) What are the main mechanical properties of ceramics? **04**

c) What are nanomaterials? Mention any four applications. **04**

Seat No.	

Set **Q**

S.Y. (B.Tech.) (Electronics and Telecommunication Engineering) (Semester - I) (New) (NEP CBCS) Examination: March/April – 2026
Fundamentals of Material Science and Engineering (MECHMDM-01A)

Day & Date: Thursday, 30-04-2026 Max. Marks: 70
Time: 10:00 AM To 01:00 PM

Instructions: 1) Q. No. 1 is compulsory. It should be solved in the first 30 minutes in Answer Book Page no 03 (Starting page of the Answer Book). Each question carries one mark.
2) Don't forget to Mention question paper set (P/Q/R/S) on top on page.
3) Figures to the right indicates full marks.
4) Make suitable assumptions if necessary and state them clearly.
5) Draw neat and proper diagram wherever necessary.

MCQ/Objective Type Questions

Duration: 30 Minutes Marks:14

Q.1 Multiple Choice Questions. **14**

1) The main strengthening mechanism in precipitation hardening is _____.
a) Grain growth
b) Diffusion of carbon
c) Formation of fine precipitates
d) Work hardening

2) Babbitt metal is commonly used for _____.
a) Cutting tools b) Bearings
c) Pressure vessels d) Gear wheels

3) Thermosetting polymers become _____.
a) Soft on heating
b) Brittle on cooling
c) Permanently hard after curing
d) Recyclable easily

4) The process of adding sulfur to rubber to improve elasticity is called _____.
a) Polymerization b) Crystallization
c) Annealing d) Vulcanization

5) Ceramics generally exhibit which type of bonding?
a) Metallic b) Covalent and ionic
c) Hydrogen d) Van der Waals

6) Glass is considered a _____.
a) Fully crystalline solid b) Metallic material
c) Amorphous ceramic d) Polycrystalline alloy

7) Carbon fiber reinforced polymer (CFRP) is an example of _____.
a) Ceramic composite
b) Polymer composite
c) Metal matrix composite
d) Nano material

8) The number of nearest neighboring atoms surrounding a given atom is called _____.
a) Atomic Radius
b) Atomic Packing Fraction
c) Coordination Number
d) Lattice Parameter

9) For a BCC structure, the Atomic Packing Factor (APF) is approximately _____.
a) 0.52
b) 0.68
c) 0.74
d) 0.3

10) The line that separates liquid and solid phases on a phase diagram is called _____.
a) Eutectic line
b) Liquidus Line
c) Tie Line
d) Solidus Line

11) The eutectoid reaction in the Fe-Fe_3C diagram occurs at _____.
a) 1147 C
b) 912 C
c) 723 C
d) 600 C

12) Pearlite is a combination of _____.
a) Austenite + Cementite
b) Ferrite + Cementite
c) Austenite + Ferrite
d) Martensite + Bainite

13) HSLA steels are mainly developed to improve _____.
a) Electrical conductivity
b) High strength and low alloying
c) Corrosion without coatings
d) Magnetic properties

14) Brass is an alloy of _____.
a) Copper and Tin
b) Copper and Zinc
c) Copper and Aluminum
d) Copper and Nickel

Set **Q**

S.Y. (B.Tech.) (Mechanical Engineering) (Semester - I) (New) (NEP CBCS) Examination: March/April – 2026

Fundamentals of Material Science and Engineering (MECHMDM-01A)

Day & Date: Thursday, 30-04-2026 Max. Marks: 56
Time: 10:00 AM To 01:00 PM

Instructions: 1) All questions are compulsory.
2) Figures to the right indicates full marks.
3) Draw neat and proper diagrams wherever necessary.
4) Make suitable assumptions if necessary and state them clearly.

Section – I

Q.2 Attempt Any Two Questions.

a) Explain the difference between unit cell and space lattice with neat sketches. **05**

b) What is the lever rule? Explain its significance in phase diagrams. **05**

c) Draw the Fe-Fe_3C equilibrium diagram and label the eutectic and eutectoid points. **05**

Q.3 Attempt Any Two Questions.

a) List and briefly explain the three steps in precipitation hardening. **05**

b) Explain the composition and applications of any two: Brass, Bronze, or Babbitt metal. **05**

c) Explain the Gibbs phase rule and calculate no. of degrees of freedom for pure metal and binary solid solution. **05**

Q.4 Write Short Notes on. (Any Two)

a) Write short notes on any two: **04**
i) HSLA steels,
ii) Invar steel,
iii) Spring steel

b) What is the difference between brass and bronze? Write two applications of each. **04**

c) What are the effects of adding alloying elements like Mn, Cr, and Ni to steel? **04**

Section – II

Q.5 Attempt Any Two Questions.

a) Differentiate between thermoplastic and thermosetting polymers with examples. **05**

b) Explain classification of ceramics. What are the different applications of ceramics in advanced technologies. **05**

c) Define electronic materials and give two examples and their uses. **05**

Q.6 Attempt Any Two Questions.

a) What are advanced ceramics? Explain their bonding and two important properties. **05**

b) Explain addition polymerization with one example. **05**

c) Explain the steps involved in preparation and characterization of ceramic powders. **05**

Q.7 Write Short Notes on. (Any Two)

a) What is crystallinity in polymers? How does it affect polymer properties? **04**

b) What are the main mechanical properties of ceramics? **04**

c) What are nanomaterials? Mention any four applications. **04**

Seat No.	

Set **R**

S.Y. (B.Tech.) (Mechanical Engineering) (Semester - I) (New) (NEP CBCS) Examination: March/April – 2026

Fundamentals of Material Science and Engineering (MECHMDM-01A)

Day & Date: Thursday, 30-04-2026 Max. Marks: 70
Time: 10:00 AM To 01:00 PM

Instructions: 1) Q. No. 1 is compulsory. It should be solved in the first 30 minutes in Answer Book Page no 03 (Starting page of the Answer Book). Each question carries one mark.
2) Don't forget to Mention question paper set (P/Q/R/S) on top on page.
3) Figures to the right indicates full marks.
4) Make suitable assumptions if necessary and state them clearly.
5) Draw neat and proper diagram wherever necessary.

MCQ/Objective Type Questions

Duration: 30 Minutes Marks:14

Q.1 Multiple Choice Questions. **14**

1) The process of adding sulfur to rubber to improve elasticity is called _____.
a) Polymerization b) Crystallization
c) Annealing d) Vulcanization

2) Ceramics generally exhibit which type of bonding?
a) Metallic b) Covalent and ionic
c) Hydrogen d) Van der Waals

3) Glass is considered a _____.
a) Fully crystalline solid b) Metallic material
c) Amorphous ceramic d) Polycrystalline alloy

4) Carbon fiber reinforced polymer (CFRP) is an example of _____.
a) Ceramic composite b) Polymer composite
c) Metal matrix composite d) Nano material

5) The number of nearest neighboring atoms surrounding a given atom is called _____.
a) Atomic Radius b) Atomic Packing Fraction
c) Coordination Number d) Lattice Parameter

6) For a BCC structure, the Atomic Packing Factor (APF) is approximately _____.
a) 0.52 b) 0.68
c) 0.74 d) 0.3

7) The line that separates liquid and solid phases on a phase diagram is called _____.
a) Eutectic line
b) Liquidus Line
c) Tie Line
d) Solidus Line

8) The eutectoid reaction in the Fe-Fe_3C diagram occurs at _____.
a) 1147 C
b) 912 C
c) 723 C
d) 600 C

9) Pearlite is a combination of _____.
a) Austenite + Cementite
b) Ferrite + Cementite
c) Austenite + Ferrite
d) Martensite + Bainite

10) HSLA steels are mainly developed to improve _____.
a) Electrical conductivity
b) High strength and low alloying
c) Corrosion without coatings
d) Magnetic properties

11) Brass is an alloy of _____.
a) Copper and Tin
b) Copper and Zinc
c) Copper and Aluminum
d) Copper and Nickel

12) The main strengthening mechanism in precipitation hardening is _____.
a) Grain growth
b) Diffusion of carbon
c) Formation of fine precipitates
d) Work hardening

13) Babbitt metal is commonly used for _____.
a) Cutting tools
b) Bearings
c) Pressure vessels
d) Gear wheels

14) Thermosetting polymers become _____.
a) Soft on heating
b) Brittle on cooling
c) Permanently hard after curing
d) Recyclable easily

Instructions: 1) Q. No. 1 is compulsory. It should be solved in the first 30 minutes in Answer Book Page no 03 (Starting page of the Answer Book). Each question carries one mark.
2) Don't forget to Mention question paper set (P/Q/R/S) on top on page.
3) Figures to the right indicates full marks.
4) Draw neat-labelled diagrams wherever necessary.
5) Use of log table and non-programmable calculator is allowed.

MCQ/Objective Type Questions

Duration: 30 Minutes Marks:14

Q.1 Choose the correct answers from the given options. 14

1) _____ involves selecting missions and objectives and the actions to achieve them.
a) Planning b) Mission
c) Strategy d) Goals

2) At the _____, the conceptual and design abilities and human skills are especially valuable.
a) Middle management level
b) Top management level
c) Lower management level
d) All levels for an inelastic product

3) _____ is defined as "the discipline dealing with what is good and bad and with moral duty and obligation".
a) Rule b) Organization culture
c) Protocol d) Ethics

4) _____ is the ability of individual or groups to induce or influence the beliefs or action of other persons or groups.
a) Power b) Authority
c) Post d) Leadership

5) _____ is the process of designing & maintaining an environment in which individuals, working together in groups, efficiently accomplish selected aims.
a) Marketing b) Selling
c) Management d) Operations

6) _____ skills are the greatest importance at the supervisory level.
a) Intellectual b) Technical
c) Analytical d) Problem Solving

7) Which motivational theory considers mainly the 'Hierarchy of needs'?
a) 'X' theory b) 'Y' theory
c) Maslow theory d) Carrot & Stick theory

8) Which of the following is not an element of management process?
a) Pricing b) Staffing
c) Planning d) Controlling

9) Human resource management emphasis _____.
a) Development of people b) Punishment of people
c) Adoption of people d) None of these

10) Quality is defined as the _____ for use.
a) Fitness b) Standard
c) Requirement d) Availability

11) _____ leaders uses his or her power very little, if at all, giving subordinates a high degree of independence in their operations.
a) Autocratic b) Democratic
c) The free rein d) Ideal

12) Which of the following is a key objective of Production Planning and Control (PPC)?
a) Maximizing Employee Overtime
b) Optimizing Production Scheduling
c) Minimizing Equipment Utilization
d) Increasing Production Downtime

13) The process of dealing with production orders to initiate operations under the Production Planning and Control starts with _____.
a) Dispatching b) Routing
c) Expediting d) Estimating

14) Which of the following process typically assumes a one-of-kind production output?
a) Job process b) Project
c) Batch process d) Flow process

Day & Date: Thursday, 30-04-2026 Max. Marks: 70
Time: 10:00 AM To 01:00 PM

Instructions: 1) Q. No. 1 is compulsory. It should be solved in the first 30 minutes in Answer Book Page no 03 (Starting page of the Answer Book). Each question carries one mark.
2) Don't forget to Mention question paper set (P/Q/R/S) on top on page.
3) Figures to the right indicates full marks.
4) Draw neat-labelled diagrams wherever necessary.
5) Use of log table and non-programmable calculator is allowed.

MCQ/Objective Type Questions

Duration: 30 Minutes Marks:14

Q.1 Choose the correct answers from the given options. 14

1) _____ skills are the greatest importance at the supervisory level.
a) Intellectual b) Technical
c) Analytical d) Problem Solving

2) Which motivational theory considers mainly the 'Hierarchy of needs'?
a) 'X' theory b) 'Y' theory
c) Maslow theory d) Carrot & Stick theory

3) Which of the following is not an element of management process?
a) Pricing b) Staffing
c) Planning d) Controlling

4) Human resource management emphasis _____.
a) Development of people b) Punishment of people
c) Adoption of people d) None of these

5) Quality is defined as the _____ for use.
a) Fitness b) Standard
c) Requirement d) Availability

6) _____ leaders uses his or her power very little, if at all, giving subordinates a high degree of independence in their operations.
a) Autocratic b) Democratic
c) The free rein d) Ideal

7) Which of the following is a key objective of Production Planning and Control (PPC)?
a) Maximizing Employee Overtime
b) Optimizing Production Scheduling
c) Minimizing Equipment Utilization
d) Increasing Production Downtime

8) The process of dealing with production orders to initiate operations under the Production Planning and Control starts with _____.
a) Dispatching b) Routing
c) Expediting d) Estimating

9) Which of the following process typically assumes a one-of-kind production output?
a) Job process b) Project
c) Batch process d) Flow process

10) _____ involves selecting missions and objectives and the actions to achieve them.
a) Planning b) Mission
c) Strategy d) Goals

11) At the _____, the conceptual and design abilities and human skills are especially valuable.
a) Middle management level
b) Top management level
c) Lower management level
d) All levels for an inelastic product

12) _____ is defined as “the discipline dealing with what is good and bad and with moral duty and obligation”.
a) Rule b) Organization culture
c) Protocol d) Ethics

13) _____ is the ability of individual or groups to induce or influence the beliefs or action of other persons or groups.
a) Power b) Authority
c) Post d) Leadership

14) _____ is the process of designing & maintaining an environment in which individuals, working together in groups, efficiently accomplish selected aims.
a) Marketing b) Selling
c) Management d) Operations

Set **S**

S.Y. (B.Tech.) (Civil Engineering) (Semester - I) (New) (NEP CBCS) Examination: March/April – 2026
Industrial Management (MECHMDM-01B)

Day & Date: Thursday, 30-04-2026 Max. Marks: 56
Time: 10:00 AM To 01:00 PM

Instructions: 1) Question no. 2 is compulsory in section I, and solve any two questions from the remaining.
2) Question no. 6 is compulsory in section II, and solve any two questions from the remaining
3) Figures to the right indicates full marks.
4) Draw neat-labelled diagrams wherever necessary.
5) Use of log table and non-programmable calculator is allowed.

Section – I

Q.2 **a)** Explain the system approach to management process. **05**

b) Explain the functions of management. **05**

Q.3 **a)** What is planning? Explain steps in planning. **05**

b) What are the types of organization structures? Explain any one with all details. **04**

Q.4 **a)** Define Leadership. Explain four extreme styles. **05**

b) What is motivation? Explain Maslow's theory of motivation. **04**

Q.5 Write Short Notes. (Any Three) **09**

a) Ethics and social responsibility in Managing

b) Carrot & Stick theory

c) Methods of Departmentation

d) Types of communications

e) Decision making

Section – II

Q.6 **a)** Define quality and state elements of quality. **05**

b) Explain factors affecting quality of design & quality of conformance. **05**

Q.7 **a)** Explain types of production with their advantages & disadvantages. **05**

b) What are the factors to improve productivity? Explain. **04**

Q.8 **a)** Explain process of performance appraisal. **05**

b) What the challenges to HR professionals? **04**

Q.9 **Write Short Notes. (Any Three)** **09**

a) Training & Development in HRD

b) Dispatching

c) Benchmarking

d) Routing

e) Quality cost

S.Y. (B.Tech.) (Electronics & Computer Engineering (Semester - I) (New) (NEP CBCS) Examination: March/April – 2026
Industrial Management (MECHMDM-01B)

Day & Date: Thursday, 30-04-2026 Max. Marks: 70
Time: 10:00 AM To 01:00 PM

Instructions: 1) Q. No. 1 is compulsory. It should be solved in the first 30 minutes in Answer Book Page no 03 (Starting page of the Answer Book). Each question carries one mark.
2) Don't forget to Mention question paper set (P/Q/R/S) on top on page.
3) Figures to the right indicates full marks.
4) Draw neat-labelled diagrams wherever necessary.
5) Use of log table and non-programmable calculator is allowed.

MCQ/Objective Type Questions

Duration: 30 Minutes Marks:14

Q.1 Choose the correct answers from the given options. **14**

1) Which of the following is not an element of management process?
a) Pricing b) Staffing
c) Planning d) Controlling

2) Human resource management emphasis _____.
a) Development of people b) Punishment of people
c) Adoption of people d) None of these

3) Quality is defined as the _____ for use.
a) Fitness b) Standard
c) Requirement d) Availability

4) _____ leaders uses his or her power very little, if at all, giving subordinates a high degree of independence in their operations.
a) Autocratic b) Democratic
c) The free rein d) Ideal

5) Which of the following is a key objective of Production Planning and Control (PPC)?
a) Maximizing Employee Overtime
b) Optimizing Production Scheduling
c) Minimizing Equipment Utilization
d) Increasing Production Downtime

6) The process of dealing with production orders to initiate operations under the Production Planning and Control starts with _____.
a) Dispatching b) Routing
c) Expediting d) Estimating

7) Which of the following process typically assumes a one-of-kind production output?

a) Job process
b) Project
c) Batch process
d) Flow process

8) _____ involves selecting missions and objectives and the actions to achieve them.

a) Planning
b) Mission
c) Strategy
d) Goals

9) At the _____, the conceptual and design abilities and human skills are especially valuable.

a) Middle management level
b) Top management level
c) Lower management level
d) All levels for an inelastic product

10) _____ is defined as “the discipline dealing with what is good and bad and with moral duty and obligation”.

a) Rule
b) Organization culture
c) Protocol
d) Ethics

11) _____ is the ability of individual or groups to induce or influence the beliefs or action of other persons or groups.

a) Power
b) Authority
c) Post
d) Leadership

12) _____ is the process of designing & maintaining an environment in which individuals, working together in groups, efficiently accomplish selected aims.

a) Marketing
b) Selling
c) Management
d) Operations

13) _____ skills are the greatest importance at the supervisory level.

a) Intellectual
b) Technical
c) Analytical
d) Problem Solving

14) Which motivational theory considers mainly the ‘Hierarchy of needs’?

a) ‘X’ theory
b) ‘Y’ theory
c) Maslow theory
d) Carrot & Stick theory

S.Y. (B.Tech.) (Electrical Engineering) (Semester - I) (New) (NEP CBCS) Examination: March/April – 2026
Industrial Management (MECHMDM-01B)

Day & Date: Thursday, 30-04-2026 Max. Marks: 56
Time: 10:00 AM To 01:00 PM

Instructions: 1) Question no. 2 is compulsory in section I, and solve any two questions from the remaining.
2) Question no. 6 is compulsory in section II, and solve any two questions from the remaining
3) Figures to the right indicates full marks.
4) Draw neat-labelled diagrams wherever necessary.
5) Use of log table and non-programmable calculator is allowed.

Section – I

Q.2 **a)** Explain the system approach to management process. **05**

b) Explain the functions of management. **05**

Q.3 **a)** What is planning? Explain steps in planning. **05**

b) What are the types of organization structures? Explain any one with all details. **04**

Q.4 **a)** Define Leadership. Explain four extreme styles. **05**

b) What is motivation? Explain Maslow's theory of motivation. **04**

Q.5 Write Short Notes. (Any Three) **09**

a) Ethics and social responsibility in Managing

b) Carrot & Stick theory

c) Methods of Departmentation

d) Types of communications

e) Decision making

Section – II

Q.6 **a)** Define quality and state elements of quality. **05**

b) Explain factors affecting quality of design & quality of conformance. **05**

Q.7 **a)** Explain types of production with their advantages & disadvantages. **05**

b) What are the factors to improve productivity? Explain. **04**

Q.8 **a)** Explain process of performance appraisal. **05**

b) What the challenges to HR professionals? **04**

Q.9 **Write Short Notes. (Any Three)** **09**

a) Training & Development in HRD

b) Dispatching

c) Benchmarking

d) Routing

e) Quality cost

Day & Date: Thursday, 30-04-2026 Max. Marks: 70
Time: 10:00 AM To 01:00 PM

Instructions: 1) Q. No. 1 is compulsory. It should be solved in the first 30 minutes in Answer Book Page no 03 (Starting page of the Answer Book). Each question carries one mark.
2) Don't forget to Mention question paper set (P/Q/R/S) on top on page.
3) Figures to the right indicates full marks.
4) Draw neat-labelled diagrams wherever necessary.
5) Use of log table and non-programmable calculator is allowed.

MCQ/Objective Type Questions

Duration: 30 Minutes Marks:14

Q.1 Choose the correct answers from the given options. 14

1) _____ skills are the greatest importance at the supervisory level.
a) Intellectual b) Technical
c) Analytical d) Problem Solving

2) Which motivational theory considers mainly the 'Hierarchy of needs'?
a) 'X' theory b) 'Y' theory
c) Maslow theory d) Carrot & Stick theory

3) Which of the following is not an element of management process?
a) Pricing b) Staffing
c) Planning d) Controlling

4) Human resource management emphasis _____.
a) Development of people b) Punishment of people
c) Adoption of people d) None of these

5) Quality is defined as the _____ for use.
a) Fitness b) Standard
c) Requirement d) Availability

6) _____ leaders uses his or her power very little, if at all, giving subordinates a high degree of independence in their operations.
a) Autocratic b) Democratic
c) The free rein d) Ideal

7) Which of the following is a key objective of Production Planning and Control (PPC)?
a) Maximizing Employee Overtime
b) Optimizing Production Scheduling
c) Minimizing Equipment Utilization
d) Increasing Production Downtime

8) The process of dealing with production orders to initiate operations under the Production Planning and Control starts with _____.
a) Dispatching b) Routing
c) Expediting d) Estimating

9) Which of the following process typically assumes a one-of-kind production output?
a) Job process b) Project
c) Batch process d) Flow process

10) _____ involves selecting missions and objectives and the actions to achieve them.
a) Planning b) Mission
c) Strategy d) Goals

11) At the _____, the conceptual and design abilities and human skills are especially valuable.
a) Middle management level
b) Top management level
c) Lower management level
d) All levels for an inelastic product

12) _____ is defined as “the discipline dealing with what is good and bad and with moral duty and obligation”.
a) Rule b) Organization culture
c) Protocol d) Ethics

13) _____ is the ability of individual or groups to induce or influence the beliefs or action of other persons or groups.
a) Power b) Authority
c) Post d) Leadership

14) _____ is the process of designing & maintaining an environment in which individuals, working together in groups, efficiently accomplish selected aims.
a) Marketing b) Selling
c) Management d) Operations

a) Rule b) Organization culture
c) Protocol d) Ethics

4) _____ is the ability of individual or groups to induce or influence the beliefs or action of other persons or groups.
a) Power b) Authority
c) Post d) Leadership

5) _____ is the process of designing & maintaining an environment in which individuals, working together in groups, efficiently accomplish selected aims.
a) Marketing b) Selling
c) Management d) Operations

6) _____ skills are the greatest importance at the supervisory level.
a) Intellectual b) Technical
c) Analytical d) Problem Solving

7) Which motivational theory considers mainly the 'Hierarchy of needs'?
a) 'X' theory b) 'Y' theory
c) Maslow theory d) Carrot & Stick theory

8) Which of the following is not an element of management process?
a) Pricing b) Staffing
c) Planning d) Controlling

9) Human resource management emphasis _____.
a) Development of people b) Punishment of people
c) Adoption of people d) None of these

10) Quality is defined as the _____ for use.
a) Fitness b) Standard
c) Requirement d) Availability

11) _____ leaders uses his or her power very little, if at all, giving subordinates a high degree of independence in their operations.
a) Autocratic b) Democratic
c) The free rein d) Ideal

12) Which of the following is a key objective of Production Planning and Control (PPC)?
a) Maximizing Employee Overtime
b) Optimizing Production Scheduling
c) Minimizing Equipment Utilization
d) Increasing Production Downtime

13) The process of dealing with production orders to initiate operations under the Production Planning and Control starts with _____.
a) Dispatching b) Routing
c) Expediting d) Estimating

14) Which of the following process typically assumes a one-of-kind production output?
a) Job process b) Project
c) Batch process d) Flow process

Seat No.	

Set **P**

S.Y. (B.Tech.) (Mechanical Engineering) (Semester - I) (New) (NEP CBCS) Examination: March/April – 2026
Industrial Management (MECHMDM-01B)

Day & Date: Thursday, 30-04-2026 Max. Marks: 56
Time: 10:00 AM To 01:00 PM

Instructions: 1) Question no. 2 is compulsory in section I, and solve any two questions from the remaining.
2) Question no. 6 is compulsory in section II, and solve any two questions from the remaining
3) Figures to the right indicates full marks.
4) Draw neat-labelled diagrams wherever necessary.
5) Use of log table and non-programmable calculator is allowed.

Section – I

Q.2 **a)** Explain the system approach to management process. **05**

b) Explain the functions of management. **05**

Q.3 **a)** What is planning? Explain steps in planning. **05**

b) What are the types of organization structures? Explain any one with all details. **04**

Q.4 **a)** Define Leadership. Explain four extreme styles. **05**

b) What is motivation? Explain Maslow's theory of motivation. **04**

Q.5 Write Short Notes. (Any Three) **09**

a) Ethics and social responsibility in Managing

b) Carrot & Stick theory

c) Methods of Departmentation

d) Types of communications

e) Decision making

Section – II

Q.6 **a)** Define quality and state elements of quality. **05**

b) Explain factors affecting quality of design & quality of conformance. **05**

Q.7 **a)** Explain types of production with their advantages & disadvantages. **05**

b) What are the factors to improve productivity? Explain. **04**

Q.8 **a)** Explain process of performance appraisal. **05**

b) What the challenges to HR professionals? **04**

Q.9 **Write Short Notes. (Any Three)** **09**

a) Training & Development in HRD

b) Dispatching

c) Benchmarking

d) Routing

e) Quality cost

S.Y. (B.Tech.) (Mechanical Engineering) (Semester - I) (New) (NEP CBCS) Examination: March/April – 2026
Industrial Management (MECHMDM-01B)

Day & Date: Thursday, 30-04-2026 Max. Marks: 70
Time: 10:00 AM To 01:00 PM

Instructions: 1) Q. No. 1 is compulsory. It should be solved in the first 30 minutes in Answer Book Page no 03 (Starting page of the Answer Book). Each question carries one mark.
2) Don't forget to Mention question paper set (P/Q/R/S) on top on page.
3) Figures to the right indicates full marks.
4) Draw neat-labelled diagrams wherever necessary.
5) Use of log table and non-programmable calculator is allowed.

MCQ/Objective Type Questions

Duration: 30 Minutes Marks:14

Q.1 Choose the correct answers from the given options. 14

1) Which of the following is not an element of management process?
a) Pricing b) Staffing
c) Planning d) Controlling

2) Human resource management emphasis _____.
a) Development of people b) Punishment of people
c) Adoption of people d) None of these

3) Quality is defined as the _____ for use.
a) Fitness b) Standard
c) Requirement d) Availability

4) _____ leaders uses his or her power very little, if at all, giving subordinates a high degree of independence in their operations.
a) Autocratic b) Democratic
c) The free rein d) Ideal

5) Which of the following is a key objective of Production Planning and Control (PPC)?
a) Maximizing Employee Overtime
b) Optimizing Production Scheduling
c) Minimizing Equipment Utilization
d) Increasing Production Downtime

6) The process of dealing with production orders to initiate operations under the Production Planning and Control starts with _____.
a) Dispatching b) Routing
c) Expediting d) Estimating

7) Which of the following process typically assumes a one-of-kind production output?

a) Job process
b) Project
c) Batch process
d) Flow process

8) _____ involves selecting missions and objectives and the actions to achieve them.

a) Planning
b) Mission
c) Strategy
d) Goals

9) At the _____, the conceptual and design abilities and human skills are especially valuable.

a) Middle management level
b) Top management level
c) Lower management level
d) All levels for an inelastic product

10) _____ is defined as “the discipline dealing with what is good and bad and with moral duty and obligation”.

a) Rule
b) Organization culture
c) Protocol
d) Ethics

11) _____ is the ability of individual or groups to induce or influence the beliefs or action of other persons or groups.

a) Power
b) Authority
c) Post
d) Leadership

12) _____ is the process of designing & maintaining an environment in which individuals, working together in groups, efficiently accomplish selected aims.

a) Marketing
b) Selling
c) Management
d) Operations

13) _____ skills are the greatest importance at the supervisory level.

a) Intellectual

MCQ/Objective Type Questions

Duration: 30 Minutes Marks:14

Q.1 Multiple choice questions: **14**

1) In K-Map, Don't care condition is represented by _____ symbol.
a) X b) 0
c) Y d) None of these

2) The terms in POS are called _____.
a) max terms b) min terms
c) mid-terms d) sum terms

3) The number of _____ cells in a K-map with 4-variables.
a) 4 b) 8
c) 16 d) 32

4) The logical sum of two or more logical product terms is called _____.
a) SOP b) POS
c) OR operation d) NAND operation

5) Half adder is used to perform subtraction of _____.
a) 2 bits b) 3 bits
c) 4 bits d) 5 bits

6) Let the inputof a subtractor is A and B then what the output will be if $A = B$?
a) 0 b) 1
c) A d) B

7) For Half Adder, if inputs are 1, 0, the sum and carry outputs are _____ and _____

a) 1, 0 b) 0, 1
c) 1, 1 d) 0, 0

8) A basic S-R flip-flop can be constructed by cross-coupling of which basic logic gates?

a) AND or OR gates b) XOR or XNOR gates
c) NOR or NAND gates d) AND or NOR gates

9) In S-R flip-flop, if Q = 1 the output is said to be _____.

a) Set b) Reset
c) Previous state d) Current state

10) One flip-flop unit can store _____ of data.

a) One nibble b) One bit
c) One byte d) One kilo-bit

11) Race around condition can be rectified by _____.

a) SR flip flop b) JK flip flop
c) JK master slave flip flop d) D flip flop

12) The full form of PISO is _____.

a) Serial-in Parallel-out b) Parallel-in Serial-out
c) Serial-in Serial-out d) Serial-In Peripheral-Out

13) Which of the following is not the type of shift register?

a) SISO b) PISO
c) PIPO d) BIBO

14) How many flip-flops are required to construct a decade counter?

a) 4 b) 8
c) 5 d) 10

MCQ/Objective Type Questions

Duration: 30 Minutes Marks:14

Q.1 Multiple choice questions: **14**

1) Race around condition can be rectified by _____.
a) SR flip flop b) JK flip flop
c) JK master slave flip flop d) D flip flop

2) The full form of PISO is _____.
a) Serial-in Parallel-out b) Parallel-in Serial-out
c) Serial-in Serial-out d) Serial-In Peripheral-Out

3) Which of the following is not the type of shift register?
a) SISO b) PISO
c) PIPO d) BIBO

4) How many flip-flops are required to construct a decade counter?
a) 4 b) 8
c) 5 d) 10

5) In K-Map, Don't care condition is represented by _____ symbol.
a) X b) 0
c) Y d) None of these

6) The terms in POS are called _____.
a) max terms b) min terms
c) mid-terms d) sum terms

7) The number of _____ cells in a K-map with 4-variables.
a) 4 b) 8
c) 16 d) 32

8) The logical sum of two or more logical product terms is called _____.
a) SOP b) POS
c) OR operation d) NAND operation

9) Half adder is used to perform subtraction of _____.

a) 2 bits
b) 3 bits
c) 4 bits
d) 5 bits

10) Let the inputof a subtractor is A and B then what the output will be if $A = B$?

a) 0
b) 1
c) A
d) B

11) For Half Adder, if inputs are 1, 0, the sum and carry outputs are _____ and _____

a) 1, 0
b) 0, 1
c) 1, 1
d) 0, 0

12) A basic S-R flip-flop can be constructed by cross-coupling of which basic logic gates?

a) AND or OR gates
b) XOR or XNOR gates
c) NOR or NAND gates
d) AND or NOR gates

13) In S-R flip-flop, if Q = 1 the output is said to be _____.

a) Set
b) Reset
c) Previous state
d) Current state

14) One flip-flop unit can store _____ of data.

a) One nibble
b) One bit
c) One byte
d) One kilo-bit

Set R

S.Y. (B.Tech.) (Civil Engineering) (Semester - I) (New) (NEP CBCS)
Examination: March/April – 2026
Digital Techniques (ENTMDM-01A)

Day & Date: Thursday, 30-04-2026 Max. Marks: 56
Time: 10:00 AM To 01:00 PM

Instructions: 1) All questions are compulsory.
2) Figures to the right indicate full marks.

Section – I

Q.2 Attempt Any Four. **16**

a) Explain POS and SOP form of logic function.
b) Solve using K-Map for $\mathrm{F(A,B,C)} = \sum(0,2,4,6)$
c) Explain Half Subtractor with logic diagram and truth table.
d) Explain 4:1 Multiplexer with truth Table and logic diagram.
e) Compare between De-Multiplexer and Multiplexer.

Q.3 Attempt Any Two. **12**

a) Explain Gray to Binary conversion in details.
b) Explain Full Adder with suitable diagram.
c) Solve using K Map-
$\mathrm{F\ (A,B,C,D)} = \sum\ (0,2,4,5,6,7,8,10,13,15)$

Section – II

Q.4 Attempt Any Four. **16**

a) Explain SR Flip-flop using logic gates.
b) Explain D-Flip-Flop with suitable diagram.
c) Differentiate between Synchronous and Asynchronous sequential circuit.
d) Explain with suitable diagram, PISO shift register.
e) What is Race-Round condition? How this condition will overcome?

Q.5 Attempt Any Two. **12**

a) Design MOD-10 Counter.
b) Explain 4-bit DOWN counter with suitable diagram.
c) Explain JK Flip flop with suitable diagram, and truth table.

Set **S**

S.Y. (B.Tech.) (Civil Engineering) (Semester - I) (New) (NEP CBCS)
Examination: March/April - 2026
Digital Techniques (ENTMDM-01A)

Day & Date: Thursday, 30-04-2026 Max. Marks: 70
Time: 10:00 AM To 01:00 PM

Instructions: 1) Q. No. 1 is compulsory. It should be solved in the first 30 minutes in Answer Book Page no 03 (Starting page of the Answer Book). Each question carries one mark.
2) Don't forget to Mention question paper set (P/Q/R/S) on top on page.
3) Figures to the right indicates full marks.

MCQ/Objective Type Questions

Duration: 30 Minutes Marks:14

Q.1 Multiple choice questions: **14**

1) Let the inputof a subtractor is A and B then what the output will be if $A = B$?
a) 0 b) 1
c) A d) B

2) For Half Adder, if inputs are 1, 0, the sum and carry outputs are _____ and _____
a) 1, 0 b) 0, 1
c) 1, 1 d) 0, 0

3) A basic S-R flip-flop can be constructed by cross-coupling of which basic logic gates?
a) AND or OR gates b) XOR or XNOR gates
c) NOR or NAND gates d) AND or NOR gates

4) In S-R flip-flop, if Q = 1 the output is said to be _____.
a) Set b) Reset
c) Previous state d) Current state

5) One flip-flop unit can store _____ of data.
a) One nibble b) One bit
c) One byte d) One kilo-bit

6) Race around condition can be rectified by _____.
a) SR flip flop b) JK flip flop
c) JK master slave flip flop d) D flip flop

7) The full form of PISO is _____.
a) Serial-in Parallel-out b) Parallel-in Serial-out
c) Serial-in Serial-out d) Serial-In Peripheral-Out

8) Which of the following is not the type of shift register?
a) SISO b) PISO
c) PIPO d) BIBO

9) How many flip-flops are required to construct a decade counter?
a) 4 b) 8
c) 5 d) 10

10) In K-Map, Don't care condition is represented by _____ symbol.
a) X b) 0
c) Y d) None of these

11) The terms in POS are called _____.
a) max terms b) min terms
c) mid-terms d) sum terms

12) The number of _____ cells in a K-map with 4-variables.
a) 4 b) 8
c) 16 d) 32

13) The logical sum of two or more logical product terms is called _____.
a) SOP b) POS

a) max terms b) min terms
c) mid-terms d) sum terms

3) The number of _____ cells in a K-map with 4-variables.
a) 4 b) 8
c) 16 d) 32

4) The logical sum of two or more logical product terms is called _____.
a) SOP b) POS
c) OR operation d) NAND operation

5) Half adder is used to perform subtraction of _____.
a) 2 bits b) 3 bits
c) 4 bits d) 5 bits

6) Let the inputof a subtractor is A and B then what the output will be if $A = B$?
a) 0 b) 1
c) A d) B

7) For Half Adder, if inputs are 1, 0, the sum and carry outputs are _____ and _____

a) 1, 0 b) 0, 1
c) 1, 1 d) 0, 0

8) A basic S-R flip-flop can be constructed by cross-coupling of which basic logic gates?

a) AND or OR gates b) XOR or XNOR gates
c) NOR or NAND gates d) AND or NOR gates

9) In S-R flip-flop, if Q = 1 the output is said to be _____.

a) Set b) Reset
c) Previous state d) Current state

10) One flip-flop unit can store _____ of data.

a) One nibble b) One bit
c) One byte d) One kilo-bit

11) Race around condition can be rectified by _____.

a) SR flip flop b) JK flip flop
c) JK master slave flip flop d) D flip flop

12) The full form of PISO is _____.

a) Serial-in Parallel-out b) Parallel-in Serial-out
c) Serial-in Serial-out d) Serial-In Peripheral-Out

13) Which of the following is not the type of shift register?

a) SISO b) PISO
c) PIPO d) BIBO

14) How many flip-flops are required to construct a decade counter?

a) 4 b) 8
c) 5 d) 10

Seat No.	

Set **P**

S.Y. (B.Tech.) (Electronics & Computer Engineering) (Semester - I) (New) (NEP CBCS) Examination: March/April – 2026
Digital Techniques (ENTMDM-01A)

Day & Date: Thursday, 30-04-2026 Max. Marks: 56
Time: 10:00 AM To 01:00 PM

Instructions: 1) All questions are compulsory.
2) Figures to the right indicate full marks.

Section – I

Q.2 Attempt Any Four. **16**

a) Explain POS and SOP form of logic function.
b) Solve using K-Map for $\mathrm{F}(\mathrm{A},\mathrm{B},\mathrm{C}) = \sum(0,2,4,6)$
c) Explain Half Subtractor with logic diagram and truth table.
d) Explain 4:1 Multiplexer with truth Table and logic diagram.
e) Compare between De-Multiplexer and Multiplexer.

Q.3 Attempt Any Two. **12**

a) Explain Gray to Binary conversion in details.
b) Explain Full Adder with suitable diagram.
c) Solve using K Map-
$\mathrm{F}\ (\mathrm{A},\mathrm{B},\mathrm{C},\mathrm{D}) = \sum\ (0,2,4,5,6,7,8,10,13,15)$

Section – II

Q.4 Attempt Any Four. **16**

a) Explain SR Flip-flop using logic gates.
b) Explain D-Flip-Flop with suitable diagram.
c) Differentiate between Synchronous and Asynchronous sequential circuit.
d) Explain with suitable diagram, PISO shift register.
e) What is Race-Round condition? How this condition will overcome?

Q.5 Attempt Any Two. **12**

a) Design MOD-10 Counter.
b) Explain 4-bit DOWN counter with suitable diagram.
c) Explain JK Flip flop with suitable diagram, and truth table.

Seat No.	

Set **Q**

S.Y. (B.Tech.) (Electronics & Computer Engineering) (Semester - I) (New) (NEP CBCS) Examination: March/April - 2026
Digital Techniques (ENTMDM-01A)

Day & Date: Thursday, 30-04-2026 Max. Marks: 70
Time: 10:00 AM To 01:00 PM

Instructions: 1) Q. No. 1 is compulsory. It should be solved in the first 30 minutes in Answer Book Page no 03 (Starting page of the Answer Book). Each question carries one mark.
2) Don't forget to Mention question paper set (P/Q/R/S) on top on page.
3) Figures to the right indicates full marks.

MCQ/Objective Type Questions

Duration: 30 Minutes Marks:14

Q.1 Multiple choice questions: **14**

1) A basic S-R flip-flop can be constructed by cross-coupling of which basic logic gates?
a) AND or OR gates b) XOR or XNOR gates
c) NOR or NAND gates d) AND or NOR gates

2) In S-R flip-flop, if Q = 1 the output is said to be _____.
a) Set b) Reset
c) Previous state d) Current state

3) One flip-flop unit can store _____ of data.
a) One nibble b) One bit
c) One byte d) One kilo-bit

4) Race around condition can be rectified by _____.
a) SR flip flop b) JK flip flop
c) JK master slave flip flop d) D flip flop

5) The full form of PISO is _____.
a) Serial-in Parallel-out b) Parallel-in Serial-out
c) Serial-in Serial-out d) Serial-In Peripheral-Out

6) Which of the following is not the type of shift register?
a) SISO b) PISO
c) PIPO d) BIBO

7) How many flip-flops are required to construct a decade counter?
a) 4 b) 8
c) 5 d) 10

8) In K-Map, Don't care condition is represented by _____ symbol.
a) X b) 0
c) Y d) None of these

9) The terms in POS are called _____.
a) max terms b) min terms
c) mid-terms d) sum terms

10) The number of _____ cells in a K-map with 4-variables.
a) 4 b) 8
c) 16 d) 32

11) The logical sum of two or more logical product terms is called _____.
a) SOP b) POS
c) OR operation d) NAND operation

12) Half adder is used to perform subtraction of _____.
a) 2 bits b) 3 bits
c) 4 bits d) 5 bits

13) Let the inputof a subtractor is A and B then what the output will be if $A = B$?
a) 0 b) 1
c) A d) B

14) For Half Adder, if inputs are 1, 0, the sum and carry outputs are _____ and _____
a) 1, 0 b) 0, 1
c) 1, 1 d) 0, 0

c) Y d) None of these

6) The terms in POS are called _____.
a) max terms b) min terms
c) mid-terms d) sum terms

7) The number of _____ cells in a K-map with 4-variables.
a) 4 b) 8
c) 16 d) 32

8) The logical sum of two or more logical product terms is called _____.
a) SOP b) POS
c) OR operation d) NAND operation

9) Half adder is used to perform subtraction of _____.

a) 2 bits
b) 3 bits
c) 4 bits
d) 5 bits

10) Let the inputof a subtractor is A and B then what the output will be if $A = B$?

a) 0
b) 1
c) A
d) B

11) For Half Adder, if inputs are 1, 0, the sum and carry outputs are _____ and _____

a) 1, 0
b) 0, 1
c) 1, 1
d) 0, 0

12) A basic S-R flip-flop can be constructed by cross-coupling of which basic logic gates?

a) AND or OR gates
b) XOR or XNOR gates
c) NOR or NAND gates
d) AND or NOR gates

13) In S-R flip-flop, if Q = 1 the output is said to be _____.

a) Set
b) Reset
c) Previous state
d) Current state

14) One flip-flop unit can store _____ of data.

a) One nibble
b) One bit
c) One byte
d) One kilo-bit

S.Y. (B.Tech.) (Electrical Engineering) (Semester - I) (New) (NEP CBCS) Examination: March/April – 2026
Digital Techniques (ENTMDM-01A)

Day & Date: Thursday, 30-04-2026 Max. Marks: 56
Time: 10:00 AM To 01:00 PM

Instructions: 1) All questions are compulsory.
2) Figures to the right indicate full marks.

Section – I

Q.2 Attempt Any Four. **16**

a) Explain POS and SOP form of logic function.
b) Solve using K-Map for $\mathrm{F}(\mathrm{A},\mathrm{B},\mathrm{C}) = \sum(0,2,4,6)$
c) Explain Half Subtractor with logic diagram and truth table.
d) Explain 4:1 Multiplexer with truth Table and logic diagram.
e) Compare between De-Multiplexer and Multiplexer.

Q.3 Attempt Any Two. **12**

a) Explain Gray to Binary conversion in details.
b) Explain Full Adder with suitable diagram.
c) Solve using K Map-
$\mathrm{F}\ (\mathrm{A},\mathrm{B},\mathrm{C},\mathrm{D}) = \sum\ (0,2,4,5,6,7,8,10,13,15)$

Section – II

Q.4 Attempt Any Four. **16**

a) Explain SR Flip-flop using logic gates.
b) Explain D-Flip-Flop with suitable diagram.
c) Differentiate between Synchronous and Asynchronous sequential circuit.
d) Explain with suitable diagram, PISO shift register.
e) What is Race-Round condition? How this condition will overcome?

Q.5 Attempt Any Two. **12**

a) Design MOD-10 Counter.
b) Explain 4-bit DOWN counter with suitable diagram.
c) Explain JK Flip flop with suitable diagram, and truth table.

Seat No.	

Set **S**

S.Y. (B.Tech.) (Electrical Engineering) (Semester - I) (New) (NEP CBCS) Examination: March/April - 2026
Digital Techniques (ENTMDM-01A)

Day & Date: Thursday, 30-04-2026 Max. Marks: 70
Time: 10:00 AM To 01:00 PM

Instructions: 1) Q. No. 1 is compulsory. It should be solved in the first 30 minutes in Answer Book Page no 03 (Starting page of the Answer Book). Each question carries one mark.
2) Don't forget to Mention question paper set (P/Q/R/S) on top on page.
3) Figures to the right indicates full marks.

MCQ/Objective Type Questions

Duration: 30 Minutes Marks:14

Q.1 Multiple choice questions: **14**

1) Let the inputof a subtractor is A and B then what the output will be if $A = B$?
a) 0 b) 1
c) A d) B

2) For Half Adder, if inputs are 1, 0, the sum and carry outputs are _____ and _____
a) 1, 0 b) 0, 1
c) 1, 1 d) 0, 0

3) A basic S-R flip-flop can be constructed by cross-coupling of which basic logic gates?
a) AND or OR gates b) XOR or XNOR gates
c) NOR or NAND gates d) AND or NOR gates

4) In S-R flip-flop, if Q = 1 the output is said to be _____.
a) Set b) Reset
c) Previous state d) Current state

5) One flip-flop unit can store _____ of data.
a) One nibble b) One bit
c) One byte d) One kilo-bit

6) Race around condition can be rectified by _____.
a) SR flip flop b) JK flip flop
c) JK master slave flip flop d) D flip flop

7) The full form of PISO is _____.
a) Serial-in Parallel-out b) Parallel-in Serial-out
c) Serial-in Serial-out d) Serial-In Peripheral-Out

8) Which of the following is not the type of shift register?
a) SISO b) PISO
c) PIPO d) BIBO

9) How many flip-flops are required to construct a decade counter?
a) 4 b) 8
c) 5 d) 10

10) In K-Map, Don't care condition is represented by _____ symbol.
a) X b) 0
c) Y d) None of these

11) The terms in POS are called _____.
a) max terms b) min terms
c) mid-terms d) sum terms

12) The number of _____ cells in a K-map with 4-variables.
a) 4 b) 8
c) 16 d) 32

13) The logical sum of two or more logical product terms is called _____.
a) SOP b) POS
c) OR operation d) NAND operation

a) 1, 0 b) 0, 1
c) 1, 1 d) 0, 0

8) A basic S-R flip-flop can be constructed by cross-coupling of which basic logic gates?

a) AND or OR gates b) XOR or XNOR gates
c) NOR or NAND gates d) AND or NOR gates

9) In S-R flip-flop, if Q = 1 the output is said to be _____.

a) Set b) Reset
c) Previous state d) Current state

10) One flip-flop unit can store _____ of data.

a) One nibble b) One bit
c) One byte d) One kilo-bit

11) Race around condition can be rectified by _____.

a) SR flip flop b) JK flip flop
c) JK master slave flip flop d) D flip flop

12) The full form of PISO is _____.

a) Serial-in Parallel-out b) Parallel-in Serial-out
c) Serial-in Serial-out d) Serial-In Peripheral-Out

13) Which of the following is not the type of shift register?

a) SISO b) PISO
c) PIPO d) BIBO

14) How many flip-flops are required to construct a decade counter?

a) 4 b) 8
c) 5 d) 10

Set **P**

S.Y. (B.Tech.) (Mechanical Engineering) (Semester - I) (New) (NEP CBCS) Examination: March/April – 2026
Digital Techniques (ENTMDM-01A)

Day & Date: Thursday, 30-04-2026 Max. Marks: 56
Time: 10:00 AM To 01:00 PM

Instructions: 1) All questions are compulsory.
2) Figures to the right indicate full marks.

Section – I

Q.2 Attempt Any Four. **16**

a) Explain POS and SOP form of logic function.
b) Solve using K-Map for $\mathrm{F}(\mathrm{A},\mathrm{B},\mathrm{C}) = \sum(0,2,4,6)$
c) Explain Half Subtractor with logic diagram and truth table.
d) Explain 4:1 Multiplexer with truth Table and logic diagram.
e) Compare between De-Multiplexer and Multiplexer.

Q.3 Attempt Any Two. **12**

a) Explain Gray to Binary conversion in details.
b) Explain Full Adder with suitable diagram.
c) Solve using K Map-
$\mathrm{F}\ (\mathrm{A},\mathrm{B},\mathrm{C},\mathrm{D}) = \sum\ (0,2,4,5,6,7,8,10,13,15)$

Section – II

Q.4 Attempt Any Four. **16**

a) Explain SR Flip-flop using logic gates.
b) Explain D-Flip-Flop with suitable diagram.
c) Differentiate between Synchronous and Asynchronous sequential circuit.
d) Explain with suitable diagram, PISO shift register.
e) What is Race-Round condition? How this condition will overcome?

Q.5 Attempt Any Two. **12**

a) Design MOD-10 Counter.
b) Explain 4-bit DOWN counter with suitable diagram.
c) Explain JK Flip flop with suitable diagram, and truth table.

Seat No.	

Set **Q**

S.Y. (B.Tech.) (Mechanical Engineering) (Semester - I) (New) (NEP CBCS) Examination: March/April - 2026
Digital Techniques (ENTMDM-01A)

Day & Date: Thursday, 30-04-2026 Max. Marks: 70
Time: 10:00 AM To 01:00 PM

Instructions: 1) Q. No. 1 is compulsory. It should be solved in the first 30 minutes in Answer Book Page no 03 (Starting page of the Answer Book). Each question carries one mark.
2) Don't forget to Mention question paper set (P/Q/R/S) on top on page.
3) Figures to the right indicates full marks.

MCQ/Objective Type Questions

Duration: 30 Minutes Marks:14

Q.1 Multiple choice questions: **14**

1) A basic S-R flip-flop can be constructed by cross-coupling of which basic logic gates?
a) AND or OR gates b) XOR or XNOR gates
c) NOR or NAND gates d) AND or NOR gates

2) In S-R flip-flop, if Q = 1 the output is said to be _____.
a) Set b) Reset
c) Previous state d) Current state

3) One flip-flop unit can store _____ of data.
a) One nibble b) One bit
c) One byte d) One kilo-bit

4) Race around condition can be rectified by _____.
a) SR flip flop b) JK flip flop
c) JK master slave flip flop d) D flip flop

5) The full form of PISO is _____.
a) Serial-in Parallel-out b) Parallel-in Serial-out
c) Serial-in Serial-out d) Serial-In Peripheral-Out

6) Which of the following is not the type of shift register?
a) SISO b) PISO
c) PIPO d) BIBO

7) How many flip-flops are required to construct a decade counter?
a) 4 b) 8
c) 5 d) 10

8) In K-Map, Don't care condition is represented by _____ symbol.
a) X b) 0
c) Y d) None of these

9) The terms in POS are called _____.
a) max terms b) min terms
c) mid-terms d) sum terms

10) The number of _____ cells in a K-map with 4-variables.
a) 4 b) 8
c) 16 d) 32

11) The logical sum of two or more logical product terms is called _____.
a) SOP b) POS
c) OR operation d) NAND operation

12) Half adder is used to perform subtraction of _____.
a) 2 bits b) 3 bits
c) 4 bits d) 5 bits

13) Let the inputof a subtractor is A and B then what the output will be if $A = B$?
a) 0 b) 1
c) A d) B

14) For Half Adder, if inputs are 1, 0, the sum and carry outputs are _____ and _____
a) 1, 0 b) 0, 1
c) 1, 1 d) 0, 0

MCQ/Objective Type Questions

Duration: 30 Minutes Marks:14

Q.1 Choose the correct answer: 14

1) Which of the following is an example of an active device?
a) Thermistor b) LDR
c) Strain Gauge d) Passive resistor

2) Measurand refers to _____.
a) Output of sensor b) Quantity being measured
c) Calibration signal d) AC supply

3) Which of the following is a digital sensor?
a) RTD b) Ultrasonic sensor
c) Thermocouple d) Thermistor

4) A device that converts non-electrical quantity into electrical form is called _____.
a) Sensor b) Transducer
c) Modulator d) Actuator

5) Which factor is least important while selecting a sensor?
a) Sensitivity b) Cost
c) Colour d) Accuracy

6) Light intensity can be detected using _____.
a) LDR b) Thermistor
c) RTD d) Tachometer

7) Strain gauges are primarily used to measure _____.
a) Humidity b) Deformation
c) Voltage d) Light

8) Which magnetic field sensor works on Hall Effect?
a) RTD b) Eddy Current Sensor
c) Hall Sensor d) DC Tachometer

9) Motion Transducer Selection mainly depends on _____.
a) Sensor Colour b) Range & Resolution
c) Packing Material d) Ambient Light

10) Mutual Induction Proximity Sensor works on principle of _____.
a) Seebeck Effect b) Electromagnetic Induction
c) Laser Reflection d) pH Variation

11) Which of the following is a Medical Sensor?
a) RVDT b) Thermocouple
c) DC Tachometer d) Capacitive Level Sensor

12) Pulse Oximetry (SpO_2) sensor measures _____.
a) Blood Pressure b) Oxygen Saturation
c) Heart Rate only d) Humidity

13) Which sensor is commonly used to detect vibration?

Q.2 Attempt Any Four. **16**

a) Define Sensor & Transducer. Distinguish between them.
b) Explain Analog & Digital Sensors with examples.
c) Write short note on Sensor Classification Based on Measurand.
d) What is Sensor Signal Conditioning? Explain briefly.
e) Explain Strain Gauge with application.
f) Describe Magnetic Field Sensors.

Q.3 Attempt Any Two. **12**

a) Explain Pure, Passive & Active Devices with suitable examples.
b) Write a detailed note on Motion Transducer & its selection.
c) What is Sensor Selection? Discuss the factors affecting sensor selection in detail.

Section – II

Q.4 Attempt Any Four. **16**

a) With a neat sketch explain LVDT.
b) Explain the working of AC Tachometer.
c) Describe Capacitive Liquid Level Sensor.
d) Explain the construction & working of RVDT.
e) Explain Eddy Current Transducer.
f) Write short note on Resolver.

Q.5 Attempt Any Two. **12**

a) With a neat block diagram explain Pulse Oximetry (SpO_2) Sensor.
b) Explain Thermocouple and Thermistor in detail.
c) Describe Humidity Sensor, Vibration Sensor & Chemical/Gas Sensor.

Set **S**

S.Y. (B.Tech.) (Civil Engineering) (Semester - I) (New) (NEP CBCS)
Examination: March/April - 2026
Sensor Technology (ENTMDM-01B)

Day & Date: Thursday, 30-04-2026 Max. Marks: 70
Time: 10:00 AM To 01:00 PM

Instructions: 1) Q. No. 1 is compulsory. It should be solved in the first 30 minutes in Answer Book Page no 03 (Starting page of the Answer Book). Each question carries one mark.
2) Don't forget to Mention question paper set (P/Q/R/S) on top of page.
3) Figures to the right indicates full marks.
4) Make suitable assumptions if necessary and state them clearly.

MCQ/Objective Type Questions

Duration: 30 Minutes Marks:14

Q.1 Choose the correct answer: 14

1) Light intensity can be detected using _____.
a) LDR b) Thermistor
c) RTD d) Tachometer

2) Strain gauges are primarily used to measure _____.
a) Humidity b) Deformation
c) Voltage d) Light

3) Which magnetic field sensor works on Hall Effect?
a) RTD b) Eddy Current Sensor
c) Hall Sensor d) DC Tachometer

4) Motion Transducer Selection mainly depends on _____.
a) Sensor Colour b) Range & Resolution
c) Packing Material d) Ambient Light

5) Mutual Induction Proximity Sensor works on principle of _____.
a) Seebeck Effect b) Electromagnetic Induction
c) Laser Reflection d) pH Variation

6) Which of the following is a Medical Sensor?
a) RVDT b) Thermocouple
c) DC Tachometer d) Capacitive Level Sensor

7) Pulse Oximetry (SpO_2) sensor measures _____.
a) Blood Pressure b) Oxygen Saturation
c) Heart Rate only d) Humidity

8) Which sensor is commonly used to detect vibration?
a) LVDT b) RTD
c) Accelerometer d) pH sensor

9) The output of a typical pH sensor is _____.
a) Frequency b) Voltage
c) Torque d) Light

10) Which of the following is an example of an active device?
a) Thermistor b) LDR
c) Strain Gauge d) Passive resistor

11) Measurand refers to _____.
a) Output of sensor b) Quantity being measured
c) Calibration signal d) AC supply

12) Which of the following is a digital sensor?
a) RTD b) Ultrasonic sensor
c) Thermocouple d) Thermistor

13) A device that converts non-electrical quantity into electrical form is called _____.
a) Sensor b) Transducer
c) Modulator d) Actuator

14) Which factor is least important while selecting a sensor?
a) Sensitivity b) Cost
c) Colour d) Accuracy

a) Sensor b) Transducer
c) Modulator d) Actuator

12) Which factor is least important while selecting a sensor?
a) Sensitivity b) Cost
c) Colour d) Accuracy

13) Light intensity can be detected using _____.
a) LDR b) Thermistor
c) RTD d) Tachometer

14) Strain gauges are primarily used to measure _____.
a) Humidity b) Deformation
c) Voltage d) Light

Seat No.	

Set **Q**

S.Y. (B.Tech.) (Electronics & Computer Engineering) (Semester - I) (New) (NEP CBCS) Examination: March/April – 2026
Sensor Technology (ENTMDM-01B)

Day & Date: Thursday, 30-04-2026 Max. Marks: 56
Time: 10:00 AM To 01:00 PM

Instructions: 1) All questions are compulsory.
2) Figures to the right indicate full marks.
3) Assume suitable data if necessary.

Section – I

Q.2 Attempt Any Four. **16**

a) Define Sensor & Transducer. Distinguish between them.
b) Explain Analog & Digital Sensors with examples.
c) Write short note on Sensor Classification Based on Measurand.
d) What is Sensor Signal Conditioning? Explain briefly.
e) Explain Strain Gauge with application.
f) Describe Magnetic Field Sensors.

Q.3 Attempt Any Two. **12**

a) Explain Pure, Passive & Active Devices with suitable examples.
b) Write a detailed note on Motion Transducer & its selection.
c) What is Sensor Selection? Discuss the factors affecting sensor selection in detail.

Section – II

Q.4 Attempt Any Four. **16**

a) With a neat sketch explain LVDT.
b) Explain the working of AC Tachometer.
c) Describe Capacitive Liquid Level Sensor.
d) Explain the construction & working of RVDT.
e) Explain Eddy Current Transducer.
f) Write short note on Resolver.

Q.5 Attempt Any Two. **12**

a) With a neat block diagram explain Pulse Oximetry (SpO_2) Sensor.
b) Explain Thermocouple and Thermistor in detail.
c) Describe Humidity Sensor, Vibration Sensor & Chemical/Gas Sensor.

Seat No.	

Set **R**

S.Y. (B.Tech.) (Electronics & Computer Engineering) (Semester - I) (New) (NEP CBCS) Examination: March/April - 2026
Sensor Technology (ENTMDM-01B)

Day & Date: Thursday, 30-04-2026 Max. Marks: 70
Time: 10:00 AM To 01:00 PM

Instructions: 1) Q. No. 1 is compulsory. It should be solved in the first 30 minutes in Answer Book Page no 03 (Starting page of the Answer Book). Each question carries one mark.
2) Don't forget to Mention question paper set (P/Q/R/S) on top of page.
3) Figures to the right indicates full marks.
4) Make suitable assumptions if necessary and state them clearly.

MCQ/Objective Type Questions

Duration: 30 Minutes Marks:14

Q.1 Choose the correct answer: 14

1) Which of the following is a Medical Sensor?
a) RVDT b) Thermocouple
c) DC Tachometer d) Capacitive Level Sensor

2) Pulse Oximetry (SpO_2) sensor measures _____.
a) Blood Pressure b) Oxygen Saturation
c) Heart Rate only d) Humidity

3) Which sensor is commonly used to detect vibration?
a) LVDT b) RTD
c) Accelerometer d) pH sensor

4) The output of a typical pH sensor is _____.
a) Frequency b) Voltage
c) Torque d) Light

5) Which of the following is an example of an active device?
a) Thermistor b) LDR
c) Strain Gauge d) Passive resistor

6) Measurand refers to _____.
a) Output of sensor b) Quantity being measured
c) Calibration signal d) AC supply

7) Which of the following is a digital sensor?
a) RTD b) Ultrasonic sensor
c) Thermocouple d) Thermistor

8) A device that converts non-electrical quantity into electrical form is called _____.

a) Sensor b) Transducer
c) Modulator d) Actuator

9) Which factor is least important while selecting a sensor?

a) Sensitivity b) Cost
c) Colour d) Accuracy

10) Light intensity can be detected using _____.

a) LDR b) Thermistor
c) RTD d) Tachometer

11) Strain gauges are primarily used to measure _____.

a) Humidity b) Deformation
c) Voltage d) Light

12) Which magnetic field sensor works on Hall Effect?

a) RTD b) Eddy Current Sensor
c) Hall Sensor d) DC Tachometer

13) Motion Transducer Selection mainly depends on _____.

a) Sensor Colour b) Range & Resolution
c) Packing Material d) Ambient Light

14) Mutual Induction Proximity Sensor works on principle of _____.

a) Seebeck Effect b) Electromagnetic Induction
c) Laser Reflection d) pH Variation

a) Sensor b) Transducer
c) Modulator d) Actuator

5) Which factor is least important while selecting a sensor?
a) Sensitivity b) Cost
c) Colour d) Accuracy

6) Light intensity can be detected using _____.
a) LDR b) Thermistor
c) RTD d) Tachometer

7) Strain gauges are primarily used to measure _____.
a) Humidity b) Deformation
c) Voltage d) Light

8) Which magnetic field sensor works on Hall Effect?
a) RTD b) Eddy Current Sensor
c) Hall Sensor d) DC Tachometer

9) Motion Transducer Selection mainly depends on _____.
a) Sensor Colour b) Range & Resolution
c) Packing Material d) Ambient Light

10) Mutual Induction Proximity Sensor works on principle of _____.
a) Seebeck Effect b) Electromagnetic Induction
c) Laser Reflection d) pH Variation

11) Which of the following is a Medical Sensor?
a) RVDT b) Thermocouple
c) DC Tachometer d) Capacitive Level Sensor

12) Pulse Oximetry (SpO_2) sensor measures _____.
a) Blood Pressure b) Oxygen Saturation
c) Heart Rate only d) Humidity

13) Which sensor is commonly used to detect vibration?
a) LVDT b) RTD
c) Accelerometer d) pH sensor

14) The output of a typical pH sensor is _____.
a) Frequency b) Voltage
c) Torque d) Light

Seat No.	

Set **P**

S.Y. (B.Tech.) (Electronics and Telecommunication Engineering) (Semester - I) (New) (NEP CBCS) Examination: March/April – 2026
Sensor Technology (ENTMDM-01B)

Day & Date: Thursday, 30-04-2026 Max. Marks: 56
Time: 10:00 AM To 01:00 PM

Instructions: 1) All questions are compulsory.
2) Figures to the right indicate full marks.
3) Assume suitable data if necessary.

Section – I

Q.2 Attempt Any Four. **16**

a) Define Sensor & Transducer. Distinguish between them.
b) Explain Analog & Digital Sensors with examples.
c) Write short note on Sensor Classification Based on Measurand.
d) What is Sensor Signal Conditioning? Explain briefly.
e) Explain Strain Gauge with application.
f) Describe Magnetic Field Sensors.

Q.3 Attempt Any Two. **12**

a) Explain Pure, Passive & Active Devices with suitable examples.
b) Write a detailed note on Motion Transducer & its selection.
c) What is Sensor Selection? Discuss the factors affecting sensor selection in detail.

Section – II

Q.4 Attempt Any Four. **16**

a) With a neat sketch explain LVDT.
b) Explain the working of AC Tachometer.
c) Describe Capacitive Liquid Level Sensor.
d) Explain the construction & working of RVDT.
e) Explain Eddy Current Transducer.
f) Write short note on Resolver.

Q.5 Attempt Any Two. **12**

a) With a neat block diagram explain Pulse Oximetry (SpO_2) Sensor.
b) Explain Thermocouple and Thermistor in detail.
c) Describe Humidity Sensor, Vibration Sensor & Chemical/Gas Sensor.

Seat No.	

Set **Q**

S.Y. (B.Tech.) (Electronics and Telecommunication Engineering) (Semester - I) (New) (NEP CBCS) Examination: March/April - 2026
Sensor Technology (ENTMDM-01B)

Day & Date: Thursday, 30-04-2026 Max. Marks: 70
Time: 10:00 AM To 01:00 PM

Instructions: 1) Q. No. 1 is compulsory. It should be solved in the first 30 minutes in Answer Book Page no 03 (Starting page of the Answer Book). Each question carries one mark.
2) Don't forget to Mention question paper set (P/Q/R/S) on top of page.
3) Figures to the right indicates full marks.
4) Make suitable assumptions if necessary and state them clearly.

MCQ/Objective Type Questions

Duration: 30 Minutes Marks:14

Q.1 Choose the correct answer: 14

1) Which magnetic field sensor works on Hall Effect?
a) RTD b) Eddy Current Sensor
c) Hall Sensor d) DC Tachometer

2) Motion Transducer Selection mainly depends on _____.
a) Sensor Colour b) Range & Resolution
c) Packing Material d) Ambient Light

3) Mutual Induction Proximity Sensor works on principle of _____.
a) Seebeck Effect b) Electromagnetic Induction
c) Laser Reflection d) pH Variation

4) Which of the following is a Medical Sensor?
a) RVDT b) Thermocouple
c) DC Tachometer d) Capacitive Level Sensor

5) Pulse Oximetry (SpO_2) sensor measures _____.
a) Blood Pressure b) Oxygen Saturation
c) Heart Rate only d) Humidity

6) Which sensor is commonly used to detect vibration?
a) LVDT b) RTD
c) Accelerometer d) pH sensor

7) The output of a typical pH sensor is _____.
a) Frequency b) Voltage
c) Torque d) Light

8) Which of the following is an example of an active device?
a) Thermistor b) LDR
c) Strain Gauge d) Passive resistor

9) Measurand refers to _____.
a) Output of sensor b) Quantity being measured
c) Calibration signal d) AC supply

10) Which of the following is a digital sensor?
a) RTD b) Ultrasonic sensor
c) Thermocouple d) Thermistor

11) A device that converts non-electrical quantity into electrical form is called _____.
a) Sensor b) Transducer
c) Modulator d) Actuator

12) Which factor is least important while selecting a sensor?
a) Sensitivity b) Cost
c) Colour d) Accuracy

13) Light intensity can be detected using _____.
a) LDR b) Thermistor
c) RTD d) Tachometer

Day & Date: Thursday, 30-04-2026 Max. Marks: 70
Time: 10:00 AM To 01:00 PM

Instructions: 1) Q. No. 1 is compulsory. It should be solved in the first 30 minutes in Answer Book Page no 03 (Starting page of the Answer Book). Each question carries one mark.
2) Don't forget to Mention question paper set (P/Q/R/S) on top of page.
3) Figures to the right indicates full marks.
4) Make suitable assumptions if necessary and state them clearly.

MCQ/Objective Type Questions

Duration: 30 Minutes Marks:14

Q.1 Choose the correct answer: 14

1) Light intensity can be detected using _____.
a) LDR b) Thermistor
c) RTD d) Tachometer

2) Strain gauges are primarily used to measure _____.
a) Humidity b) Deformation
c) Voltage d) Light

3) Which magnetic field sensor works on Hall Effect?
a) RTD b) Eddy Current Sensor
c) Hall Sensor d) DC Tachometer

4) Motion Transducer Selection mainly depends on _____.
a) Sensor Colour b) Range & Resolution
c) Packing Material d) Ambient Light

5) Mutual Induction Proximity Sensor works on principle of _____.
a) Seebeck Effect b) Electromagnetic Induction
c) Laser Reflection d) pH Variation

6) Which of the following is a Medical Sensor?
a) RVDT b) Thermocouple
c) DC Tachometer d) Capacitive Level Sensor

7) Pulse Oximetry (SpO_2) sensor measures _____.
a) Blood Pressure b) Oxygen Saturation
c) Heart Rate only d) Humidity

8) Which sensor is commonly used to detect vibration?
a) LVDT b) RTD
c) Accelerometer d) pH sensor

9) The output of a typical pH sensor is _____.
a) Frequency b) Voltage
c) Torque d) Light

10) Which of the following is an example of an active device?
a) Thermistor b) LDR
c) Strain Gauge d) Passive resistor

11) Measurand refers to _____.
a) Output of sensor b) Quantity being measured
c) Calibration signal d) AC supply

12) Which of the following is a digital sensor?
a) RTD b) Ultrasonic sensor
c) Thermocouple d) Thermistor

13) A device that converts non-electrical quantity into electrical form is called _____.
a) Sensor b) Transducer
c) Modulator d) Actuator

14) Which factor is least important while selecting a sensor?
a) Sensitivity b) Cost
c) Colour d) Accuracy

SLR-QH-214

Seat No.		Set	S

S.Y. (B.Tech.) (Mechanical Engineering) (Semester - I) (New) (NEP CBCS) Examination: March/April – 2026
Sensor Technology (ENTMDM-01B)

Day & Date: Thursday, 30-04-2026 Max. Marks: 56
Time: 10:00 AM To 01:00 PM

Instructions: 1) All questions are compulsory.
2) Figures to the right indicate full marks.
3) Assume suitable data if necessary.

Section – I

Q.2 Attempt Any Four. **16**

a) Define Sensor & Transducer. Distinguish between them.
b) Explain Analog & Digital Sensors with examples.
c) Write short note on Sensor Classification Based on Measurand.
d) What is Sensor Signal Conditioning? Explain briefly.
e) Explain Strain Gauge with application.
f) Describe Magnetic Field Sensors.

Q.3 Attempt Any Two. **12**

a) Explain Pure, Passive & Active Devices with suitable examples.
b) Write a detailed note on Motion Transducer & its selection.
c) What is Sensor Selection? Discuss the factors affecting sensor selection in detail.

Section – II

Q.4 Attempt Any Four. **16**

a) With a neat sketch explain LVDT.
b) Explain the working of AC Tachometer.
c) Describe Capacitive Liquid Level Sensor.
d) Explain the construction & working of RVDT.
e) Explain Eddy Current Transducer.
f) Write short note on Resolver.

Q.5 Attempt Any Two. **12**

a) With a neat block diagram explain Pulse Oximetry (SpO_2) Sensor.
b) Explain Thermocouple and Thermistor in detail.
c) Describe Humidity Sensor, Vibration Sensor & Chemical/Gas Sensor.

Seat No.	

Set **P**

S.Y. (B.Tech.) (Civil Engineering) (Semester - I) (New) (NEP CBCS)
Examination: March/April - 2026
Programming Basics Using Python (CSEMDM-01A)

Day & Date: Thursday, 30-04-2026 Max. Marks: 70
Time: 10:00 AM To 01:00 PM

Instructions: 1) Q. No. 1 is compulsory. It should be solved in the first 30 minutes in Answer Book Page no 03 (Starting page of the Answer Book). Each question carries one mark.
2) Don't forget to Mention question paper set (P/Q/R/S) on top of page.
3) Figures to the right indicate full marks for that question.
4) Assume suitable data if required.

MCQ/Objective Type Questions

Duration: 30 Minutes Marks:14

Q.1 Choose the correct Answer. **14**

1) What is a Python interpreter?
a) A tool that converts Python code into machine code directly
b) A program that executes Python code line by line
c) A compiler that creates an executable file
d) A debugger for Python programs

2) Which command is used to run a Python program from the command line?
a) run python program.py b) python program.py
c) exec program.py d) start program

3) Which of the following is not a variation of the Python execution model?
a) CPython b) Jython
c) PyRuby d) PyPy

4) Which of the following is a mutable data type in Python?
a) tuple b) string
c) int d) list

5) Which of the following is used to define a function in Python?
a) def b) define
c) func d) function

6) Which keyword is used to handle exceptions in Python?
a) throw b) try
c) catch d) error

7) What is called when a function is defined inside a class?
a) class b) function
c) method d) module

8) What is inheritance in Python?
   a) Defining multiple methods with the same name
   b) The ability to acquire properties and behaviors from another class
   c) Creating multiple instances of a class
   d) Converting functions into classes

9) Which of the following returns the current date and time?
   a) datetime.date.today()
   b) datetime.datetime.now()
   c) datetime.time.now()
   d) datetime.now.time()

10) Which of these mathematical constants is available in the math module?
   a) math.pi
   b) math.root
   c) math.epsilon
   d) math.cube

11) Which method is used to read data from a CSV file?
   a) csv.read()
   b) csv.reader()
   c) csv.input()
   d) csv.open()

12) Which Python module is commonly used for GUI programming?
   a) tkinter
   b) gui
   c) pywindow
   d) graphics

13) Which built-in Python module can be used to measure the execution time of small code snippets?
   a) timeit
   b) datetime
   c) logging
   d) os

14) Which module is used for writing unit tests in Python?
   a) doctest
   b) testcase
   c) pytest
   d) unittest

2) Assume suitable data if necessary.
3) Figures to the right indicate full marks for that question.

Section – I

Q.2 Write answer to any three questions. **12**

a) Write a program of palindrome using string.

b) List & Explain Execution Model Variations in Python in detail.

c) Differentiate between list and tuples in python.

d) Explain Class and Instance Objects in Python.

e) Explain in detail functions in Python.

Q.3 Write answer to any two questions. **16**

a) Explain python operators and expression with syntax and example.

b) What is a variable? What are the rules for Python variables? Explain Global and Local Python Variables.

c) Explain inheritance in python with their types.

Section – II

Q.4 Write answer to any three questions. **12**

a) Describe Calendar related functions with example.

b) Explain basic date and time types with syntax and example.

c) Explain Data Persistence in python.

d) Compare shallow copy vs deep copy.

e) Write a python program to create a 2D Numpy array and perform basic operations like addition, subtraction, division and multiplication.

Q.5 Write answer to any two questions. **16**

a) Explain mathematical functions and pseudo random functions with syntax and example.

b) What is CSV file? Explain the Read and Write operations perform on CSV file.

c) What is debugging in python? Explain Logging facility in python.

a) Defining multiple methods with the same name
b) The ability to acquire properties and behaviors from another class
c) Creating multiple instances of a class
d) Converting functions into classes

2) Which of the following returns the current date and time?
a) datetime.date.today() b) datetime.datetime.now()
c) datetime.time.now() d) datetime.now.time()

3) Which of these mathematical constants is available in the math module?
a) math.pi b) math.root
c) math.epsilon d) math.cube

4) Which method is used to read data from a CSV file?
a) csv.read() b) csv.reader()
c) csv.input() d) csv.open()

5) Which Python module is commonly used for GUI programming?
a) tkinter b) gui
c) pywindow d) graphics

6) Which built-in Python module can be used to measure the execution time of small code snippets?
a) timeit b) datetime
c) logging d) os

7) Which module is used for writing unit tests in Python?
a) doctest b) testcase
c) pytest d) unittest

8) What is a Python interpreter?
   a) A tool that converts Python code into machine code directly
   b) A program that executes Python code line by line
   c) A compiler that creates an executable file
   d) A debugger for Python programs

9) Which command is used to run a Python program from the command line?
   a) run python program.py
   b) python program.py
   c) exec program.py
   d) start program

10) Which of the following is not a variation of the Python execution model?
   a) CPython
   b) Jython
   c) PyRuby
   d) PyPy

11) Which of the following is a mutable data type in Python?
   a) tuple
   b) string
   c) int
   d) list

12) Which of the following is used to define a function in Python?
   a) def
   b) define
   c) func
   d) function

13) Which keyword is used to handle exceptions in Python?
   a) throw
   b) try
   c) catch
   d) error

14) What is called when a function is defined inside a class?
   a) class
   b) function
   c) method
   d) module

Set **Q**

S.Y. (B.Tech.) (Computer Science and Engineering) (Semester - I) (New) (NEP CBCS) Examination: March/April - 2026
Programming Basics Using Python (CSEMDM-01A)

Day & Date: Thursday, 30-04-2026 Max. Marks: 56
Time: 10:00 AM To 01:00 PM

Instructions: 1) All questions are compulsory.
2) Assume suitable data if necessary.
3) Figures to the right indicate full marks for that question.

Section – I

Q.2 Write answer to any three questions. **12**

a) Write a program of palindrome using string.

b) List & Explain Execution Model Variations in Python in detail.

c) Differentiate between list and tuples in python.

d) Explain Class and Instance Objects in Python.

e) Explain in detail functions in Python.

Q.3 Write answer to any two questions. **16**

a) Explain python operators and expression with syntax and example.

b) What is a variable? What are the rules for Python variables? Explain Global and Local Python Variables.

c) Explain inheritance in python with their types.

Section – II

Q.4 Write answer to any three questions. **12**

a) Describe Calendar related functions with example.

b) Explain basic date and time types with syntax and example.

c) Explain Data Persistence in python.

d) Compare shallow copy vs deep copy.

e) Write a python program to create a 2D Numpy array and perform basic operations like addition, subtraction, division and multiplication.

Q.5 Write answer to any two questions. **16**

a) Explain mathematical functions and pseudo random functions with syntax and example.

b) What is CSV file? Explain the Read and Write operations perform on CSV file.

c) What is debugging in python? Explain Logging facility in python.

Seat No.	

Set **R**

S.Y. (B.Tech.) (Computer Science and Engineering) (Semester - I) (New) (NEP CBCS) Examination: March/April - 2026
Programming Basics Using Python (CSEMDM-01A)

Day & Date: Thursday, 30-04-2026 Max. Marks: 70
Time: 10:00 AM To 01:00 PM

Instructions: 1) Q. No. 1 is compulsory. It should be solved in the first 30 minutes in Answer Book Page no 03 (Starting page of the Answer Book). Each question carries one mark.
2) Don't forget to Mention question paper set (P/Q/R/S) on top of page.
3) Figures to the right indicate full marks for that question.
4) Assume suitable data if required.

MCQ/Objective Type Questions

Duration: 30 Minutes Marks:14

Q.1 Choose the correct Answer. **14**

1) Which method is used to read data from a CSV file?
a) csv.read() b) csv.reader()
c) csv.input() d) csv.open()

2) Which Python module is commonly used for GUI programming?
a) tkinter b) gui
c) pywindow d) graphics

3) Which built-in Python module can be used to measure the execution time of small code snippets?
a) timeit b) datetime
c) logging d) os

4) Which module is used for writing unit tests in Python?
a) doctest b) testcase
c) pytest d) unittest

5) What is a Python interpreter?
a) A tool that converts Python code into machine code directly
b) A program that executes Python code line by line
c) A compiler that creates an executable file
d) A debugger for Python programs

4) Which of the following returns the current date and time?
a) datetime.date.today() b) datetime.datetime.now()
c) datetime.time.now() d) datetime.now.time()

5) Which of these mathematical constants is available in the math module?
a) math.pi b) math.root
c) math.epsilon d) math.cube

6) Which method is used to read data from a CSV file?
a) csv.read() b) csv.reader()
c) csv.input() d) csv.open()

7) Which Python module is commonly used for GUI programming?
a) tkinter b) gui
c) pywindow d) graphics

8) Which built-in Python module can be used to measure the execution time of small code snippets?

a) timeit
b) datetime
c) logging
d) os

9) Which module is used for writing unit tests in Python?

a) doctest
b) testcase
c) pytest
d) unittest

10) What is a Python interpreter?

a) A tool that converts Python code into machine code directly
b) A program that executes Python code line by line
c) A compiler that creates an executable file
d) A debugger for Python programs

11) Which command is used to run a Python program from the command line?

a) run python program.py
b) python program.py
c) exec program.py
d) start program

12) Which of the following is not a variation of the Python execution model?

a) CPython
b) Jython
c) PyRuby
d) PyPy

13) Which of the following is a mutable data type in Python?

a) tuple
b) string
c) int
d) list

14) Which of the following is used to define a function in Python?

a) def
b) define
c) func
d) function

Seat No.		Set	S

S.Y. (B.Tech.) (Electronics & Computer Engineering) (Semester - I) (New) (NEP CBCS) Examination: March/April - 2026
Programming Basics Using Python (CSEMDM-01A)

Day & Date: Thursday, 30-04-2026 Max. Marks: 56
Time: 10:00 AM To 01:00 PM

Instructions: 1) All questions are compulsory.
2) Assume suitable data if necessary.
3) Figures to the right indicate full marks for that question.

Section – I

Q.2 Write answer to any three questions. **12**

a) Write a program of palindrome using string.

b) List & Explain Execution Model Variations in Python in detail.

c) Differentiate between list and tuples in python.

d) Explain Class and Instance Objects in Python.

e) Explain in detail functions in Python.

Q.3 Write answer to any two questions. **16**

a) Explain python operators and expression with syntax and example.

b) What is a variable? What are the rules for Python variables? Explain Global and Local Python Variables.

c) Explain inheritance in python with their types.

Section – II

Q.4 Write answer to any three questions. **12**

a) Describe Calendar related functions with example.

b) Explain basic date and time types with syntax and example.

c) Explain Data Persistence in python.

d) Compare shallow copy vs deep copy.

e) Write a python program to create a 2D Numpy array and perform basic operations like addition, subtraction, division and multiplication.

Q.5 Write answer to any two questions. **16**

a) Explain mathematical functions and pseudo random functions with syntax and example.

b) What is CSV file? Explain the Read and Write operations perform on CSV file.

c) What is debugging in python? Explain Logging facility in python.

Seat No.	

Set **P**

S.Y. (B.Tech.) (Electrical Engineering) (Semester - I) (New) (NEP CBCS) Examination: March/April - 2026
Programming Basics Using Python (CSEMDM-01A)

Day & Date: Thursday, 30-04-2026 Max. Marks: 70
Time: 10:00 AM To 01:00 PM

Instructions: 1) Q. No. 1 is compulsory. It should be solved in the first 30 minutes in Answer Book Page no 03 (Starting page of the Answer Book). Each question carries one mark.
2) Don't forget to Mention question paper set (P/Q/R/S) on top of page.
3) Figures to the right indicate full marks for that question.
4) Assume suitable data if required.

MCQ/Objective Type Questions

Duration: 30 Minutes Marks:14

Q.1 Choose the correct Answer. **14**

1) What is a Python interpreter?
a) A tool that converts Python code into machine code directly
b) A program that executes Python code line by line
c) A compiler that creates an executable file
d) A debugger for Python programs

2) Which command is used to run a Python program from the command line?
a) run python program.py b) python program.py
c) exec program.py d) start program

3) Which of the following is not a variation of the Python execution model?
a) CPython b) Jython
c) PyRuby d) PyPy

4) Which of the following is a mutable data type in Python?
a) tuple b) string
c) int d) list

5) Which of the following is used to define a function in Python?
a) def b) define
c) func d) function

6) Which keyword is used to handle exceptions in Python?
a) throw b) try
c) catch d) error

7) What is called when a function is defined inside a class?
a) class b) function
c) method d) module

8) What is inheritance in Python?
   a) Defining multiple methods with the same name
   b) The ability to acquire properties and behaviors from another class
   c) Creating multiple instances of a class
   d) Converting functions into classes

9) Which of the following returns the current date and time?
   a) datetime.date.today()
   b) datetime.datetime.now()
   c) datetime.time.now()
   d) datetime.now.time()

10) Which of these mathematical constants is available in the math module?
   a) math.pi
   b) math.root
   c) math.epsilon
   d) math.cube

6) Which built-in Python module can be used to measure the execution time of small code snippets?
a) timeit b) datetime
c) logging d) os

7) Which module is used for writing unit tests in Python?
a) doctest b) testcase
c) pytest d) unittest

8) What is a Python interpreter?
   a) A tool that converts Python code into machine code directly
   b) A program that executes Python code line by line
   c) A compiler that creates an executable file
   d) A debugger for Python programs

9) Which command is used to run a Python program from the command line?
   a) run python program.py
   b) python program.py
   c) exec program.py
   d) start program

10) Which of the following is not a variation of the Python execution model?
   a) CPython
   b) Jython
   c) PyRuby
   d) PyPy

11) Which of the following is a mutable data type in Python?
   a) tuple
   b) string
   c) int
   d) list

12) Which of the following is used to define a function in Python?
   a) def
   b) define
   c) func
   d) function

13) Which keyword is used to handle exceptions in Python?
   a) throw
   b) try
   c) catch
   d) error

14) What is called when a function is defined inside a class?
   a) class
   b) function
   c) method
   d) module

Set **Q**

S.Y. (B.Tech.) (Electronics and Telecommunication Engineering) (Semester - I) (New) (NEP CBCS) Examination: March/April - 2026
Programming Basics Using Python (CSEMDM-01A)

Day & Date: Thursday, 30-04-2026 Max. Marks: 56
Time: 10:00 AM To 01:00 PM

Instructions: 1) All questions are compulsory.
2) Assume suitable data if necessary.
3) Figures to the right indicate full marks for that question.

Section – I

Q.2 Write answer to any three questions. **12**

a) Write a program of palindrome using string.

b) List & Explain Execution Model Variations in Python in detail.

c) Differentiate between list and tuples in python.

d) Explain Class and Instance Objects in Python.

e) Explain in detail functions in Python.

Q.3 Write answer to any two questions. **16**

a) Explain python operators and expression with syntax and example.

b) What is a variable? What are the rules for Python variables? Explain Global and Local Python Variables.

c) Explain inheritance in python with their types.

Section – II

Q.4 Write answer to any three questions. **12**

a) Describe Calendar related functions with example.

b) Explain basic date and time types with syntax and example.

c) Explain Data Persistence in python.

d) Compare shallow copy vs deep copy.

e) Write a python program to create a 2D Numpy array and perform basic operations like addition, subtraction, division and multiplication.

Q.5 Write answer to any two questions. **16**

a) Explain mathematical functions and pseudo random functions with syntax and example.

b) What is CSV file? Explain the Read and Write operations perform on CSV file.

c) What is debugging in python? Explain Logging facility in python.

Seat No.	

Set **R**

S.Y. (B.Tech.) (Electronics and Telecommunication Engineering) (Semester - I) (New) (NEP CBCS) Examination: March/April - 2026
Programming Basics Using Python (CSEMDM-01A)

Day & Date: Thursday, 30-04-2026 Max. Marks: 70
Time: 10:00 AM To 01:00 PM

Instructions: 1) Q. No. 1 is compulsory. It should be solved in the first 30 minutes in Answer Book Page no 03 (Starting page of the Answer Book). Each question carries one mark.
2) Don't forget to Mention question paper set (P/Q/R/S) on top of page.
3) Figures to the right indicate full marks for that question.
4) Assume suitable data if required.

MCQ/Objective Type Questions

Duration: 30 Minutes Marks:14

Q.1 Choose the correct Answer. **14**

1) Which method is used to read data from a CSV file?
a) csv.read() b) csv.reader()
c) csv.input() d) csv.open()

2) Which Python module is commonly used for GUI programming?
a) tkinter b) gui
c) pywindow d) graphics

3) Which built-in Python module can be used to measure the execution time of small code snippets?
a) timeit b) datetime
c) logging d) os

4) Which module is used for writing unit tests in Python?
a) doctest b) testcase
c) pytest d) unittest

5) What is a Python interpreter?
a) A tool that converts Python code into machine code directly
b) A program that executes Python code line by line
c) A compiler that creates an executable file
d) A debugger for Python programs

6) Which command is used to run a Python program from the command line?
a) run python program.py b) python program.py
c) exec program.py d) start program

7) Which of the following is not a variation of the Python execution model?
a) CPython b) Jython
c) PyRuby d) PyPy

8) Which of the following is a mutable data type in Python?
a) tuple b) string
c) int d) list

9) Which of the following is used to define a function in Python?
a) def b) define
c) func d) function

10) Which keyword is used to handle exceptions in Python?
a) throw b) try
c) catch d) error

11) What is called when a function is defined inside a class?
a) class b) function
c) method d) module

12) What is inheritance in Python?
a) Defining multiple methods with the same name
b) The ability to acquire properties and behaviors from another class
c) Creating multiple instances of a class
d) Converting functions into classes

13) Which of the following returns the current date and time?
a) datetime.date.today() b) datetime.datetime.now()
c) datetime.time.now() d) datetime.now.time()

14) Which of these mathematical constants is available in the math module?
a) math.pi b) math.root
c) math.epsilon d) math.cube

d) unittest

10) What is a Python interpreter?

a) A tool that converts Python code into machine code directly
b) A program that executes Python code line by line
c) A compiler that creates an executable file
d) A debugger for Python programs

11) Which command is used to run a Python program from the command line?

a) run python program.py
b) python program.py
c) exec program.py
d) start program

12) Which of the following is not a variation of the Python execution model?

a) CPython
b) Jython
c) PyRuby
d) PyPy

13) Which of the following is a mutable data type in Python?

a) tuple
b) string
c) int
d) list

14) Which of the following is used to define a function in Python?

a) def
b) define
c) func
d) function

SLR-QH-215

Seat No.		Set	S

S.Y. (B.Tech.) (Mechanical Engineering) (Semester - I) (New) (NEP CBCS) Examination: March/April - 2026
Programming Basics Using Python (CSEMDM-01A)

Day & Date: Thursday, 30-04-2026 Max. Marks: 56
Time: 10:00 AM To 01:00 PM

Instructions: 1) All questions are compulsory.
2) Assume suitable data if necessary.
3) Figures to the right indicate full marks for that question.

Section – I

Q.2 Write answer to any three questions. **12**

a) Write a program of palindrome using string.

b) List & Explain Execution Model Variations in Python in detail.

c) Differentiate between list and tuples in python.

d) Explain Class and Instance Objects in Python.

e) Explain in detail functions in Python.

Q.3 Write answer to any two questions. **16**

a) Explain python operators and expression with syntax and example.

b) What is a variable? What are the rules for Python variables? Explain Global and Local Python Variables.

c) Explain inheritance in python with their types.

Section – II

Q.4 Write answer to any three questions. **12**

a) Describe Calendar related functions with example.

b) Explain basic date and time types with syntax and example.

c) Explain Data Persistence in python.

d) Compare shallow copy vs deep copy.

e) Write a python program to create a 2D Numpy array and perform basic operations like addition, subtraction, division and multiplication.

Q.5 Write answer to any two questions. **16**

a) Explain mathematical functions and pseudo random functions with syntax and example.

b) What is CSV file? Explain the Read and Write operations perform on CSV file.

c) What is debugging in python? Explain Logging facility in python.

Set P

S.Y. (B.Tech.) (Civil Engineering) (Semester - I) (New) (NEP CBCS)
Examination: March/April - 2026
Software Engineering (CSEMDM-01B)

Day & Date: Thursday, 30-04-2026 Max. Marks: 70
Time: 10:00 AM To 01:00 PM

Instructions: 1) Q. No. 1 is compulsory. It should be solved in the first 30 minutes in Answer Book Page no 03 (Starting page of the Answer Book). Each question carries one mark.
2) Don't forget to Mention question paper set (P/Q/R/S) on top of page.
3) Figures to the right indicates full marks.
4) Assume suitable data wherever necessary and state it clearly.

MCQ/Objective Type Questions

Duration: 30 Minutes Marks:14

Q.1 Choose the correct answer. **14**

1) Software Engineering mainly deals with _____.
a) Hardware design
b) Software development and maintenance
c) Network installation
d) Circuit fabrication

2) The major challenge in software engineering is _____.
a) Increasing hardware cost
b) Managing changing requirements
c) Increasing electricity usage
d) Writing long code

3) An Entity Relationship Diagram (ERD) shows _____.
a) The flow of control
b) The relationship between data entities
c) Software modules
d) Program logic

4) Which model delivers working software in small increments?
a) Waterfall model b) Agile model
c) Big bang model d) V-model

5) The Software Project Management Process includes _____.
a) Planning, Monitoring, and Control
b) Coding and Testing
c) Installation only
d) Debugging only

6) A good SRS should be _____.
a) Ambiguous and incomplete
b) Clear, complete, and verifiable
c) Written only by users
d) Focused only on design

7) A _____ is logically separable part of program. It is a program unit that is discrete and identifiable with respect to compiling and loading.
a) Component b) Connector
c) Module d) None of above

8) Risk Management aims to _____ and then take action to minimize their effect on project.
a) Identify cost and estimation b) Identify risks
c) Identify plan d) All of above

9) The output of requirement process is _____.
a) Validated SRS b) Validation
c) Problem analysis d) Verification

10) White Box Testing is also called as _____.
a) Functional testing b) Structural testing
c) Stress testing d) Interface testing

11) Agile Software Development depends on _____.
a) Incremental Development
b) Iterative Development
c) Linear Development
d) Both Incremental and Iterative Development

12) _____ is a first level of testing.
a) Unit testing b) Integration Testing
c) System Testing d) None of above

13) The CMM has how many levels of maturity?
a) 3 b) 4
c) 5 d) 6

14) In a DFD, external entities are shown as _____.
a) Circles b) Rectangles
c) Arrows d) Ovals

Set R

S.Y. (B.Tech.) (Computer Science and Engineering) (Semester - I) (New) (NEP CBCS) Examination: March/April - 2026
Software Engineering (CSEMDM-01B)

Day & Date: Thursday, 30-04-2026 Max. Marks: 70
Time: 10:00 AM To 01:00 PM

Instructions: 1) Q. No. 1 is compulsory. It should be solved in the first 30 minutes in Answer Book Page no 03 (Starting page of the Answer Book). Each question carries one mark.
2) Don't forget to Mention question paper set (P/Q/R/S) on top of page.
3) Figures to the right indicates full marks.
4) Assume suitable data wherever necessary and state it clearly.

MCQ/Objective Type Questions

Duration: 30 Minutes Marks:14

Q.1 Choose the correct answer. **14**

1) Agile Software Development depends on _____.
a) Incremental Development
b) Iterative Development
c) Linear Development
d) Both Incremental and Iterative Development

2) _____ is a first level of testing.
a) Unit testing b) Integration Testing
c) System Testing d) None of above

3) The CMM has how many levels of maturity?
a) 3 b) 4
c) 5 d) 6

4) In a DFD, external entities are shown as _____.
a) Circles b) Rectangles
c) Arrows d) Ovals

5) Software Engineering mainly deals with _____.
a) Hardware design
b) Software development and maintenance
c) Network installation
d) Circuit fabrication

6) The major challenge in software engineering is _____.
a) Increasing hardware cost
b) Managing changing requirements
c) Increasing electricity usage
d) Writing long code

7) An Entity Relationship Diagram (ERD) shows _____.
   a) The flow of control
   b) The relationship between data entities
   c) Software modules
   d) Program logic

8) Which model delivers working software in small increments?
   a) Waterfall model
   b) Agile model
   c) Big bang model
   d) V-model

9) The Software Project Management Process includes _____.
   a) Planning, Monitoring, and Control
   b) Coding and Testing
   c) Installation only
   d) Debugging only

10) A good SRS should be _____.
   a) Ambiguous and incomplete
   b) Clear, complete, and verifiable
   c) Written only by users
   d) Focused only on design

11) A _____ is logically separable part of program. It is a program unit that is discrete and identifiable with respect to compiling and loading.
   a) Component
   b) Connector
   c) Module
   d) None of above

12) Risk Management aims to _____ and then take action to minimize their effect on project.
   a) Identify cost and estimation
   b) Identify risks
   c) Identify plan
   d) All of above

13) The output of requirement process is _____.
   a) Validated SRS
   b) Validation
   c) Problem analysis
   d) Verification

14) White Box Testing is also called as _____.
   a) Functional testing
   b) Structural testing
   c) Stress testing
   d) Interface testing

Seat No.	

Set **R**

S.Y. (B.Tech.) (Computer Science and Engineering) (Semester - I) (New) (NEP CBCS) Examination: March/April - 2026
Software Engineering (CSEMDM-01B)

Day & Date: Thursday, 30-04-2026 Max. Marks: 56
Time: 10:00 AM To 01:00 PM

Instructions: 1) All questions are compulsory.
2) Figures to the right indicate full marks.
3) Assume suitable data wherever necessary and state it clearly.

Section – I

Q.2 Attempt any Four. **16**

a) Explain Agile model.
b) What is SRS? Explain need of SRS.
c) Explain ER diagram in detail.
d) Write a short note on Function Oriented Design.
e) Explain role of architecture design.

Q.3 Attempt any Two. **12**

a) Define DFD with all notations and levels. Draw Zero level DFD for Hospital Management System.
b) Define software process. Explain characteristics of software process.
c) Explain in detail architecture style for component & connector view.

Section – II

Q.4 Attempt any Four. **16**

a) Compare White and Black box testing.
b) Explain Effort Estimation.
c) Explain CMM with diagram.
d) What are levels of testing? Explain Unit Testing in detail.
e) Explain new management responsibilities.

Q.5 Attempt any Two. **12**

a) What is risk management? Explain in detail risk management activities.
b) Explain Software Configuration Management Process.
c) What is Scrum? Explain in detail Scrum methodology.

Seat No.	

Set **S**

S.Y. (B.Tech.) (Computer Science and Engineering) (Semester - I) (New) (NEP CBCS) Examination: March/April - 2026
Software Engineering (CSEMDM-01B)

Day & Date: Thursday, 30-04-2026 Max. Marks: 70

11) Agile Software Development depends on _____.
a) Incremental Development
b) Iterative Development
c) Linear Development
d) Both Incremental and Iterative Development

12) _____ is a first level of testing.
a) Unit testing b) Integration Testing
c) System Testing d) None of above

13) The CMM has how many levels of maturity?
a) 3 b) 4
c) 5 d) 6

14) In a DFD, external entities are shown as _____.
a) Circles b) Rectangles
c) Arrows d) Ovals

Seat No.	

Set **P**

S.Y. (B.Tech.) (Electrical Engineering) (Semester - I) (New) (NEP CBCS) Examination: March/April - 2026
Software Engineering (CSEMDM-01B)

Day & Date: Thursday, 30-04-2026 Max. Marks: 56
Time: 10:00 AM To 01:00 PM

Instructions: 1) All questions are compulsory.
2) Figures to the right indicate full marks.
3) Assume suitable data wherever necessary and state it clearly.

Section – I

Q.2 Attempt any Four. **16**

a) Explain Agile model.
b) What is SRS? Explain need of SRS.
c) Explain ER diagram in detail.
d) Write a short note on Function Oriented Design.
e) Explain role of architecture design.

Q.3 Attempt any Two. **12**

a) Define DFD with all notations and levels. Draw Zero level DFD for Hospital Management System.
b) Define software process. Explain characteristics of software process.
c) Explain in detail architecture style for component & connector view.

Section – II

Q.4 Attempt any Four. **16**

a) Compare White and Black box testing.
b) Explain Effort Estimation.
c) Explain CMM with diagram.
d) What are levels of testing? Explain Unit Testing in detail.
e) Explain new management responsibilities.

Q.5 Attempt any Two. **12**

a) What is risk management? Explain in detail risk management activities.
b) Explain Software Configuration Management Process.
c) What is Scrum? Explain in detail Scrum methodology.

Seat No.	

Set **Q**

S.Y. (B.Tech.) (Electrical Engineering) (Semester - I) (New) (NEP CBCS) Examination: March/April - 2026
Software Engineering (CSEMDM-01B)

Day & Date: Thursday, 30-04-2026 Max. Marks: 70
Time: 10:00 AM To 01:00 PM

Instructions: 1) Q. No. 1 is compulsory. It should be solved in the first 30 minutes in Answer Book Page no 03 (Starting page of the Answer Book). Each question carries one mark.
2) Don't forget to Mention question paper set (P/Q/R/S) on top of page.
3) Figures to the right indicates full marks.
4) Assume suitable data wherever necessary and state it clearly.

MCQ/Objective Type Questions

Duration: 30 Minutes Marks:14

Q.1 Choose the correct answer. **14**

1) Risk Management aims to _____ and then take action to minimize their effect on project.
a) Identify cost and estimation b) Identify risks
c) Identify plan d) All of above

2) The output of requirement process is _____.
a) Validated SRS b) Validation
c) Problem analysis d) Verification

3) White Box Testing is also called as _____.
a) Functional testing b) Structural testing
c) Stress testing d) Interface testing

4) Agile Software Development depends on _____.
a) Incremental Development
b) Iterative Development
c) Linear Development
d) Both Incremental and Iterative Development

5) _____ is a first level of testing.
a) Unit testing b) Integration Testing
c) System Testing d) None of above

6) The CMM has how many levels of maturity?
a) 3 b) 4
c) 5 d) 6

7) In a DFD, external entities are shown as _____.
a) Circles b) Rectangles
c) Arrows d) Ovals

8) Software Engineering mainly deals with _____.
a) Hardware design
b) Software development and maintenance
c) Network installation
d) Circuit fabrication

9) The major challenge in software engineering is _____.
a) Increasing hardware cost
b) Managing changing requirements
c) Increasing electricity usage
d) Writing long code

10) An Entity Relationship Diagram (ERD) shows _____.
a) The flow of control
b) The relationship between data entities
c) Software modules
d) Program logic

11) Which model delivers working software in small increments?
a) Waterfall model b) Agile model
c) Big bang model d) V-model

12) The Software Project Management Process includes _____.
a) Planning, Monitoring, and Control
b) Coding and Testing
c) Installation only
d) Debugging only

13) A good SRS should be _____.
a) Ambiguous and incomplete
b) Clear, complete, and verifiable
c) Written only by users
d) Focused only on design

14) A _____ is logically separable part of program. It is a program unit that is discrete and identifiable with respect to compiling and loading.
a) Component b) Connector
c) Module d) None of above

Day & Date: Thursday, 30-04-2026 Max. Marks: 70
Time: 10:00 AM To 01:00 PM

Instructions: 1) Q. No. 1 is compulsory. It should be solved in the first 30 minutes in Answer Book Page no 03 (Starting page of the Answer Book). Each question carries one mark.
2) Don't forget to Mention question paper set (P/Q/R/S) on top of page.
3) Figures to the right indicates full marks.
4) Assume suitable data wherever necessary and state it clearly.

MCQ/Objective Type Questions

Duration: 30 Minutes Marks:14

Q.1 Choose the correct answer. **14**

1) A good SRS should be _____.
a) Ambiguous and incomplete
b) Clear, complete, and verifiable
c) Written only by users
d) Focused only on design

2) A _____ is logically separable part of program. It is a program unit that is discrete and identifiable with respect to compiling and loading.
a) Component b) Connector
c) Module d) None of above

3) Risk Management aims to _____ and then take action to minimize their effect on project.
a) Identify cost and estimation b) Identify risks
c) Identify plan d) All of above

4) The output of requirement process is _____.
a) Validated SRS b) Validation
c) Problem analysis d) Verification

5) White Box Testing is also called as _____.
a) Functional testing b) Structural testing
c) Stress testing d) Interface testing

6) Agile Software Development depends on _____.
a) Incremental Development
b) Iterative Development
c) Linear Development
d) Both Incremental and Iterative Development

7) _____ is a first level of testing.
a) Unit testing
b) Integration Testing
c) System Testing
d) None of above

8) The CMM has how many levels of maturity?
a) 3
b) 4
c) 5
d) 6

9) In a DFD, external entities are shown as _____.
a) Circles
b) Rectangles
c) Arrows
d) Ovals

10) Software Engineering mainly deals with _____.
a) Hardware design
b) Software development and maintenance
c) Network installation
d) Circuit fabrication

11) The major challenge in software engineering is _____.
a) Increasing hardware cost
b) Managing changing requirements
c) Increasing electricity usage
d) Writing long code

12) An Entity Relationship Diagram (ERD) shows _____.
a) The flow of control
b) The relationship between data entities
c) Software modules
d) Program logic

13) Which model delivers working software in small increments?
a) Waterfall model
b) Agile model
c) Big bang model
d) V-model

14) The Software Project Management Process includes _____.
a) Planning, Monitoring, and Control
b) Coding and Testing
c) Installation only
d) Debugging only

Seat No.	

Set **S**

S.Y. (B.Tech.) (Electronics and Telecommunication Engineering) (Semester - I) (New) (NEP CBCS) Examination: March/April - 2026
Software Engineering (CSEMDM-01B)

Day & Date: Thursday, 30-04-2026 Max. Marks: 56
Time: 10:00 AM To 01:00 PM

Instructions: 1) All questions are compulsory.
2) Figures to the right indicate full marks.
3) Assume suitable data wherever necessary and state it clearly.

Section – I

Q.2 Attempt any Four. **16**

a) Explain Agile model.
b) What is SRS? Explain need of SRS.
c) Explain ER diagram in detail.
d) Write a short note on Function Oriented Design.
e) Explain role of architecture design.

Q.3 Attempt any Two. **12**

a) Define DFD with all notations and levels. Draw Zero level DFD for Hospital Management System.
b) Define software process. Explain characteristics of software process.
c) Explain in detail architecture style for component & connector view.

Section – II

Q.4 Attempt any Four. **16**

a) Compare White and Black box testing.
b) Explain Effort Estimation.
c) Explain CMM with diagram.
d) What are levels of testing? Explain Unit Testing in detail.
e) Explain new management responsibilities.

Q.5 Attempt any Two. **12**

a) What is risk management? Explain in detail risk management activities.
b) Explain Software Configuration Management Process.
c) What is Scrum? Explain in detail Scrum methodology.

MCQ/Objective Type Questions

Duration: 30 Minutes Marks:14

Q.1 Choose the correct Answer. **14**

1) Which instrument is used for measuring electrical energy?
a) Ammeter b) Voltmeter
c) Energy meter d) Wattmeter

2) The operating principle of moving iron instruments is based on _____.
a) Electrostatic effect b) Heating effect
c) Magnetic effect of current d) Chemical effect

3) Which instrument can measure both AC and DC quantities?
a) PMMC instrument b) Moving iron instrument
c) Electrostatic instrument d) Rectifier type instrument

4) In the two-wattmeter method, total power is equal to _____.
a) Difference of wattmeter readings
b) Product of wattmeter readings
c) Sum of wattmeter readings
d) Average of wattmeter readings

5) The speed of a separately excited DC motor can be controlled by _____.
a) Armature voltage control b) Field control
c) Armature resistance control d) All of the above

6) The synchronous speed of a synchronous generator is dependent on _____.
a) Rotor size
b) Number of poles and frequency
c) Magnetic field strength
d) Load current

7) Rotating magnetic field is produced in a three-phase induction motor due to _____.
   a) Single phase supply
   b) DC excitation
   c) Three phase supply
   d) Commutator action

8) What is the main advantage of a permanent magnet DC motor over a conventional DC motor?
   a) No need for a field winding
   b) Higher efficiency at low speeds
   c) Reduced cost of construction
   d) All of the above

9) Which motor works on the principle of variable reluctance?
   a) Stepper motor
   b) Switched reluctance motor
   c) DC shunt motor
   d) Universal motor

10) Brushless DC motor does not have _____.
   a) Rotor
   b) Stator winding
   c) Mechanical commutator
   d) Permanent magnet

11) The main purpose of energy efficient machines is to _____.
   a) Increase losses
   b) Reduce efficiency
   c) Minimize losses
   d) Increase temperature rise

12) Which of the following does not change in a transformer?
   a) Current
   b) Voltage
   c) Frequency
   d) All of the above

13) Auto-transformer has _____.
   a) Two separate windings
   b) No winding
   c) Single continuous winding
   d) Rotor winding

14) Open circuit test on transformers is conducted to determine _____.
   a) hysteresis losses
   b) copper losses
   c) core losses
   d) eddy current losses

Seat No.	

Set **P**

S.Y. (B.Tech.) (Civil Engineering) (Semester - I) (New) (NEP CBCS) Examination: March/April – 2026
Electrical Technology (EEMDM-01A)

Day & Date: Thursday, 30-04-2026 Max. Marks: 56
Time: 10:00 AM To 01:00 PM

Instructions: 1) All questions are compulsory.
2) Figures to the right indicate full marks.

Section – I

Q.2 Attempt the following. (Any Four) **16**

a) State advantages and disadvantages of moving iron instruments.

b) A 3-phase 500V motor load has a power factor of 0.4 two wattmeter connected to measure input. They show input to be 30 KW. Find the reading of each instrument.

c) Describe the construction of three phase induction motor.

d) Write short note on digital multi-meter.

e) Explain torque-slip characteristics of induction motor.

Q.3 Attempt the following. (Any Two) **12**

a) Explain the principle and working of a dynamometer-type wattmeter.

b) Explain construction and working principle of single-phase induction motor.

c) Explain the principle of operation of 3∅ induction motor. With the help of phasor diagram explain how rotating magnetic field is produced?

Section – II

Q.4 Attempt the following. (Any Four) **16**

a) Write short note on brushless DC motor.

b) Explain the principle of operation of linear induction motor.

c) Explain energy efficient AC machines.

d) A 230/2300V transformer takes a no-load current of 6.5 A and absorbs 187W. If the resistance of the primary is 0.6 Ω. Find.
i) the core loss
ii) no load power factor
iii) active component of current
iv) magnetizing current

e) Derive an EMF equation of transformer.

Q.5 Attempt the following. (Any Two) **12**

a) Explain construction and operation of Permanent Magnet Synchronous Motor (PMSM).

b) An energy-efficient AC motor has the following loss components:
Copper losses: 2 kW
Iron losses: 1.5 kW
Friction and windage losses: 0.5 kW
The input power is 25 kW. Calculate the efficiency of the motor.

c) Explain no-load and on-load operation of transformer with phasor diagram.

Electrical Technology (EEMDM-01A)

Day & Date: Thursday, 30-04-2026 Max. Marks: 70
Time: 10:00 AM To 01:00 PM

Instructions: 1) Q. No. 1 is compulsory. It should be solved in the first 30 minutes in Answer Book Page no 03 (Starting page of the Answer Book). Each question carries one mark.
2) Don't forget to Mention question paper set (P/Q/R/S) on top of page.
3) Figures to the right indicates full marks.

MCQ/Objective Type Questions

Duration: 30 Minutes Marks:14

Q.1 Choose the correct Answer. **14**

1) What is the main advantage of a permanent magnet DC motor over a conventional DC motor?
a) No need for a field winding
b) Higher efficiency at low speeds
c) Reduced cost of construction
d) All of the above

2) Which motor works on the principle of variable reluctance?
a) Stepper motor b) Switched reluctance motor
c) DC shunt motor d) Universal motor

3) Brushless DC motor does not have _____.
a) Rotor b) Stator winding
c) Mechanical commutator d) Permanent magnet

4) The main purpose of energy efficient machines is to _____.
a) Increase losses b) Reduce efficiency
c) Minimize losses d) Increase temperature rise

5) Which of the following does not change in a transformer?
a) Current b) Voltage
c) Frequency d) All of the above

6) Auto-transformer has _____.
a) Two separate windings b) No winding
c) Single continuous winding d) Rotor winding

7) Open circuit test on transformers is conducted to determine _____.
a) hysteresis losses b) copper losses
c) core losses d) eddy current losses

8) Which instrument is used for measuring electrical energy?
a) Ammeter b) Voltmeter
c) Energy meter d) Wattmeter

9) The operating principle of moving iron instruments is based on _____.
a) Electrostatic effect b) Heating effect
c) Magnetic effect of current d) Chemical effect

10) Which instrument can measure both AC and DC quantities?
a) PMMC instrument b) Moving iron instrument
c) Electrostatic instrument d) Rectifier type instrument

11) In the two-wattmeter method, total power is equal to _____.
a) Difference of wattmeter readings
b) Product of wattmeter readings
c) Sum of wattmeter readings
d) Average of wattmeter readings

12) The speed of a separately excited DC motor can be controlled by _____.
a) Armature voltage control b) Field control
c) Armature resistance control d) All of the above

13) The synchronous speed of a synchronous generator is dependent on _____.
a) Rotor size
b) Number of poles and frequency
c) Magnetic field strength
d) Load current

14) Rotating magnetic field is produced in a three-phase induction motor due to _____.
a) Single phase supply b) DC excitation
c) Three phase supply d) Commutator action

Seat No.	

Set **Q**

S.Y. (B.Tech.) (Civil Engineering) (Semester - I) (New) (NEP CBCS) Examination: March/April – 2026
Electrical Technology (EEMDM-01A)

Day & Date: Thursday, 30-04-2026 Max. Marks: 56
Time: 10:00 AM To 01:00 PM

Instructions: 1) All questions are compulsory.
2) Figures to the right indicate full marks.

Section – I

Q.2 Attempt the following. (Any Four) **16**

a) State advantages and disadvantages of moving iron instruments.

b) A 3-phase 500V motor load has a power factor of 0.4 two wattmeter connected to measure input. They show input to be 30 KW. Find the reading of each instrument.

c) Describe the construction of three phase induction motor.

d) Write short note on digital multi-meter.

e) Explain torque-slip characteristics of induction motor.

Q.3 Attempt the following. (Any Two) **12**

a) Explain the principle and working of a dynamometer-type wattmeter.

b) Explain construction and working principle of single-phase induction motor.

c) Explain the principle of operation of 3∅ induction motor. With the help of phasor diagram explain how rotating magnetic field is produced?

Section – II

Q.4 Attempt the following. (Any Four) **16**

a) Write short note on brushless DC motor.

b) Explain the principle of operation of linear induction motor.

c) Explain energy efficient AC machines.

d) A 230/2300V transformer takes a no-load current of 6.5 A and absorbs 187W. If the resistance of the primary is 0.6 Ω. Find.
i) the core loss
ii) no load power factor
iii) active component of current
iv) magnetizing current

e) Derive an EMF equation of transformer.

Q.5 Attempt the following. (Any Two) **12**

a) Explain construction and operation of Permanent Magnet Synchronous Motor (PMSM).

b) An energy-efficient AC motor has the following loss components:
Copper losses: 2 kW
Iron losses: 1.5 kW
Friction and windage losses: 0.5 kW
The input power is 25 kW. Calculate the efficiency of the motor.

c) Explain no-load and on-load operation of transformer with phasor diagram.

Seat No.	

Set **R**

S.Y. (B.Tech.) (Civil Engineering) (Semester - I) (New) (NEP CBCS) Examination: March/April – 2026
Electrical Technology (EEMDM-01A)

Day & Date: Thursday, 30-04-2026 Max. Marks: 70
Time: 10:00 AM To 01:00 PM

Instructions: 1) Q. No. 1 is compulsory. It should be solved in the first 30 minutes in Answer Book Page no 03 (Starting page of the Answer Book). Each question carries one mark.
2) Don't forget to Mention question paper set (P/Q/R/S) on top of page.
3) Figures to the right indicates full marks.

MCQ/Objective Type Questions

Duration: 30 Minutes Marks:14

Q.1 Choose the correct Answer. **14**

1) The main purpose of energy efficient machines is to _____.
a) Increase losses b) Reduce efficiency
c) Minimize losses d) Increase temperature rise

2) Which of the following does not change in a transformer?
a) Current b) Voltage
c) Frequency d) All of the above

3) Auto-transformer has _____.
a) Two separate windings b) No winding
c) Single continuous winding d) Rotor winding

4) Open circuit test on transformers is conducted to determine _____.
a) hysteresis losses b) copper losses
c) core losses d) eddy current losses

5) Which instrument is used for measuring electrical energy?
a) Ammeter b) Voltmeter
c) Energy meter d) Wattmeter

6) The operating principle of moving iron instruments is based on _____.
a) Electrostatic effect b) Heating effect
c) Magnetic effect of current d) Chemical effect

7) Which instrument can measure both AC and DC quantities?
a) PMMC instrument b) Moving iron instrument
c) Electrostatic instrument d) Rectifier type instrument

8) In the two-wattmeter method, total power is equal to _____.
   a) Difference of wattmeter readings
   b) Product of wattmeter readings
   c) Sum of wattmeter readings
   d) Average of wattmeter readings

9) The speed of a separately excited DC motor can be controlled by _____.
   a) Armature voltage control b) Field control
   c) Armature resistance control d) All of the above

10) The synchronous speed of a synchronous generator is dependent on _____.
   a) Rotor size
   b) Number of poles and frequency
   c) Magnetic field strength
   d) Load current

11) Rotating magnetic field is produced in a three-phase induction motor due to _____.
   a) Single phase supply b) DC excitation
   c) Three phase supply d) Commutator action

12) What is the main advantage of a permanent magnet DC motor over a conventional DC motor?
   a) No need for a field winding
   b) Higher efficiency at low speeds
   c) Reduced cost of construction
   d) All of the above

13) Which motor works on the principle of variable reluctance?
   a) Stepper motor b) Switched reluctance motor
   c) DC shunt motor d) Universal motor

14) Brushless DC motor does not have _____.
   a) Rotor b) Stator winding
   c) Mechanical commutator d) Permanent magnet

Seat No.

Set **S**

S.Y. (B.Tech.) (Computer Science and Engineering) (Semester - I) (New) (NEP CBCS) Examination: March/April – 2026
Electrical Technology (EEMDM-01A)

Day & Date: Thursday, 30-04-2026 Max. Marks: 70
Time: 10:00 AM To 01:00 PM

Instructions: 1) Q. No. 1 is compulsory. It should be solved in the first 30 minutes in Answer Book Page no 03 (Starting page of the Answer Book). Each question carries one mark.
2) Don't forget to Mention question paper set (P/Q/R/S) on top of page.
3) Figures to the right indicates full marks.

MCQ/Objective Type Questions

Duration: 30 Minutes Marks:14

Q.1 Choose the correct Answer. **14**

1) The synchronous speed of a synchronous generator is dependent on _____.
a) Rotor size
b) Number of poles and frequency
c) Magnetic field strength
d) Load current

2) Rotating magnetic field is produced in a three-phase induction motor due to _____.
a) Single phase supply b) DC excitation
c) Three phase supply d) Commutator action

3) What is the main advantage of a permanent magnet DC motor over a conventional DC motor?
a) No need for a field winding
b) Higher efficiency at low speeds
c) Reduced cost of construction
d) All of the above

4) Which motor works on the principle of variable reluctance?
a) Stepper motor b) Switched reluctance motor
c) DC shunt motor d) Universal motor

5) Brushless DC motor does not have _____.
a) Rotor b) Stator winding
c) Mechanical commutator d) Permanent magnet

6) The main purpose of energy efficient machines is to _____.
a) Increase losses b) Reduce efficiency
c) Minimize losses d) Increase temperature rise

7) Which of the following does not change in a transformer?
a) Current b) Voltage
c) Frequency d) All of the above

8) Auto-transformer has _____.
a) Two separate windings b) No winding
c) Single continuous winding d) Rotor winding

9) Open circuit test on transformers is conducted to determine _____.
a) hysteresis losses b) copper losses
c) core losses d) eddy current losses

10) Which instrument is used for measuring electrical energy?
a) Ammeter b) Voltmeter
c) Energy meter d) Wattmeter

11) The operating principle of moving iron instruments is based on _____.
a) Electrostatic effect b) Heating effect
c) Magnetic effect of current d) Chemical effect

12) Which instrument can measure both AC and DC quantities?
a) PMMC instrument b) Moving iron instrument
c) Electrostatic instrument d) Rectifier type instrument

13) In the two-wattmeter method, total power is equal to _____.
a) Difference of wattmeter readings
b) Product of wattmeter readings
c) Sum of wattmeter readings
d) Average of wattmeter readings

14) The speed of a separately excited DC motor can be controlled by _____.
a) Armature voltage control b) Field control
c) Armature resistance control d) All of the above

S.Y. (B.Tech.) (Computer Science and Engineering) (Semester - I) (New) (NEP CBCS) Examination: March/April – 2026
Electrical Technology (EEMDM-01A)

Day & Date: Thursday, 30-04-2026 Max. Marks: 56
Time: 10:00 AM To 01:00 PM

Instructions: 1) All questions are compulsory.
2) Figures to the right indicate full marks.

Section – I

Q.2 Attempt the following. (Any Four) **16**

a) State advantages and disadvantages of moving iron instruments.

b) A 3-phase 500V motor load has a power factor of 0.4 two wattmeter connected to measure input. They show input to be 30 KW. Find the reading of each instrument.

c) Describe the construction of three phase induction motor.

d) Write short note on digital multi-meter.

e) Explain torque-slip characteristics of induction motor.

Q.3 Attempt the following. (Any Two) **12**

a) Explain the principle and working of a dynamometer-type wattmeter.

b) Explain construction and working principle of single-phase induction motor.

c) Explain the principle of operation of 3∅ induction motor. With the help of phasor diagram explain how rotating magnetic field is produced?

Section – II

Q.4 Attempt the following. (Any Four) **16**

a) Write short note on brushless DC motor.

b) Explain the principle of operation of linear induction motor.

c) Explain energy efficient AC machines.

d) A 230/2300V transformer takes a no-load current of 6.5 A and absorbs 187W. If the resistance of the primary is 0.6 Ω. Find.
i) the core loss
ii) no load power factor
iii) active component of current
iv) magnetizing current

e) Derive an EMF equation of transformer.

Q.5 Attempt the following. (Any Two) **12**

a) Explain construction and operation of Permanent Magnet Synchronous Motor (PMSM).

b) An energy-efficient AC motor has the following loss components:
Copper losses: 2 kW
Iron losses: 1.5 kW
Friction and windage losses: 0.5 kW
The input power is 25 kW. Calculate the efficiency of the motor.

c) Explain no-load and on-load operation of transformer with phasor diagram.

   c) Frequency
   d) All of the above

13) Auto-transformer has _____.
   a) Two separate windings
   b) No winding
   c) Single continuous winding
   d) Rotor winding

14) Open circuit test on transformers is conducted to determine _____.
   a) hysteresis losses
   b) copper losses
   c) core losses
   d) eddy current losses

Seat No.	

Set **P**

S.Y. (B.Tech.) (Electrical Engineering) (Semester - I) (New) (NEP CBCS) Examination: March/April – 2026
Electrical Technology (EEMDM-01A)

Day & Date: Thursday, 30-04-2026 Max. Marks: 56
Time: 10:00 AM To 01:00 PM

Instructions: 1) All questions are compulsory.
2) Figures to the right indicate full marks.

Section – I

Q.2 Attempt the following. (Any Four) **16**

a) State advantages and disadvantages of moving iron instruments.

b) A 3-phase 500V motor load has a power factor of 0.4 two wattmeter connected to measure input. They show input to be 30 KW. Find the reading of each instrument.

c) Describe the construction of three phase induction motor.

d) Write short note on digital multi-meter.

e) Explain torque-slip characteristics of induction motor.

Q.3 Attempt the following. (Any Two) **12**

a) Explain the principle and working of a dynamometer-type wattmeter.

b) Explain construction and working principle of single-phase induction motor.

c) Explain the principle of operation of 3∅ induction motor. With the help of phasor diagram explain how rotating magnetic field is produced?

Section – II

Q.4 Attempt the following. (Any Four) **16**

a) Write short note on brushless DC motor.

b) Explain the principle of operation of linear induction motor.

c) Explain energy efficient AC machines.

d) A 230/2300V transformer takes a no-load current of 6.5 A and absorbs 187W. If the resistance of the primary is 0.6 Ω. Find.
i) the core loss
ii) no load power factor
iii) active component of current
iv) magnetizing current

e) Derive an EMF equation of transformer.

Q.5 Attempt the following. (Any Two) **12**

a) Explain construction and operation of Permanent Magnet Synchronous Motor (PMSM).

b) An energy-efficient AC motor has the following loss components:
Copper losses: 2 kW
Iron losses: 1.5 kW
Friction and windage losses: 0.5 kW
The input power is 25 kW. Calculate the efficiency of the motor.

c) Explain no-load and on-load operation of transformer with phasor diagram.

Seat No.

S.Y. (B.Tech.) (Electrical Engineering) (Semester - I) (New) (NEP CBCS) Examination: March/April – 2026
Electrical Technology (EEMDM-01A)

Day & Date: Thursday, 30-04-2026 Max. Marks: 70
Time: 10:00 AM To 01:00 PM

Instructions: 1) Q. No. 1 is compulsory. It should be solved in the first 30 minutes in Answer Book Page no 03 (Starting page of the Answer Book). Each question carries one mark.
2) Don't forget to Mention question paper set (P/Q/R/S) on top of page.
3) Figures to the right indicates full marks.

MCQ/Objective Type Questions

Duration: 30 Minutes Marks:14

Q.1 Choose the correct Answer. **14**

1) What is the main advantage of a permanent magnet DC motor over a conventional DC motor?
a) No need for a field winding
b) Higher efficiency at low speeds
c) Reduced cost of construction
d) All of the above

2) Which motor works on the principle of variable reluctance?
a) Stepper motor b) Switched reluctance motor
c) DC shunt motor d) Universal motor

3) Brushless DC motor does not have _____.
a) Rotor b) Stator winding
c) Mechanical commutator d) Permanent magnet

4) The main purpose of energy efficient machines is to _____.
a) Increase losses b) Reduce efficiency
c) Minimize losses d) Increase temperature rise

5) Which of the following does not change in a transformer?
a) Current b) Voltage
c) Frequency d) All of the above

6) Auto-transformer has _____.
a) Two separate windings b) No winding
c) Single continuous winding d) Rotor winding

7) Open circuit test on transformers is conducted to determine _____.
a) hysteresis losses b) copper losses
c) core losses d) eddy current losses

8) Which instrument is used for measuring electrical energy?
a) Ammeter b) Voltmeter
c) Energy meter d) Wattmeter

9) The operating principle of moving iron instruments is based on _____.
a) Electrostatic effect b) Heating effect
c) Magnetic effect of current d) Chemical effect

10) Which instrument can measure both AC and DC quantities?
a) PMMC instrument b) Moving iron instrument
c) Electrostatic instrument d) Rectifier type instrument

11) In the two-wattmeter method, total power is equal to _____.
a) Difference of wattmeter readings
b) Product of wattmeter readings
c) Sum of wattmeter readings
d) Average of wattmeter readings

12) The speed of a separately excited DC motor can be controlled by _____.
a) Armature voltage control b) Field control
c) Armature resistance control d) All of the above

13) The synchronous speed of a synchronous generator is dependent on _____.
a) Rotor size
b) Number of poles and frequency
c) Magnetic field strength
d) Load current

14) Rotating magnetic field is produced in a three-phase induction motor due to _____.
a) Single phase supply b) DC excitation
c) Three phase supply d) Commutator action

Seat No.

Time: 10:00 AM To 01:00 PM

Instructions: 1) Q. No. 1 is compulsory. It should be solved in the first 30 minutes in Answer Book Page no 03 (Starting page of the Answer Book). Each question carries one mark.
2) Don't forget to Mention question paper set (P/Q/R/S) on top of page.
3) Figures to the right indicates full marks.

MCQ/Objective Type Questions

Duration: 30 Minutes Marks:14

Q.1 Choose the correct Answer. **14**

1) The main purpose of energy efficient machines is to _____.
a) Increase losses b) Reduce efficiency
c) Minimize losses d) Increase temperature rise

2) Which of the following does not change in a transformer?
a) Current b) Voltage
c) Frequency d) All of the above

3) Auto-transformer has _____.
a) Two separate windings b) No winding
c) Single continuous winding d) Rotor winding

4) Open circuit test on transformers is conducted to determine _____.
a) hysteresis losses b) copper losses
c) core losses d) eddy current losses

5) Which instrument is used for measuring electrical energy?
a) Ammeter b) Voltmeter
c) Energy meter d) Wattmeter

6) The operating principle of moving iron instruments is based on _____.
a) Electrostatic effect b) Heating effect
c) Magnetic effect of current d) Chemical effect

7) Which instrument can measure both AC and DC quantities?
a) PMMC instrument b) Moving iron instrument
c) Electrostatic instrument d) Rectifier type instrument

8) In the two-wattmeter method, total power is equal to _____.
   a) Difference of wattmeter readings
   b) Product of wattmeter readings
   c) Sum of wattmeter readings
   d) Average of wattmeter readings

9) The speed of a separately excited DC motor can be controlled by _____.
   a) Armature voltage control b) Field control
   c) Armature resistance control d) All of the above

10) The synchronous speed of a synchronous generator is dependent on _____.
   a) Rotor size
   b) Number of poles and frequency
   c) Magnetic field strength
   d) Load current

11) Rotating magnetic field is produced in a three-phase induction motor due to _____.
   a) Single phase supply b) DC excitation
   c) Three phase supply d) Commutator action

12) What is the main advantage of a permanent magnet DC motor over a conventional DC motor?
   a) No need for a field winding
   b) Higher efficiency at low speeds
   c) Reduced cost of construction
   d) All of the above

13) Which motor works on the principle of variable reluctance?
   a) Stepper motor b) Switched reluctance motor
   c) DC shunt motor d) Universal motor

14) Brushless DC motor does not have _____.
   a) Rotor b) Stator winding
   c) Mechanical commutator d) Permanent magnet

Set **R**

S.Y. (B.Tech.) (Electronics and Telecommunication Engineering) (Semester - I) (New) (NEP CBCS) Examination: March/April – 2026
Electrical Technology (EEMDM-01A)

Day & Date: Thursday, 30-04-2026 Max. Marks: 56
Time: 10:00 AM To 01:00 PM

Instructions: 1) All questions are compulsory.
2) Figures to the right indicate full marks.

Section – I

Q.2 Attempt the following. (Any Four) **16**

a) State advantages and disadvantages of moving iron instruments.

b) A 3-phase 500V motor load has a power factor of 0.4 two wattmeter connected to measure input. They show input to be 30 KW. Find the reading of each instrument.

c) Describe the construction of three phase induction motor.

d) Write short note on digital multi-meter.

e) Explain torque-slip characteristics of induction motor.

Q.3 Attempt the following. (Any Two) **12**

a) Explain the principle and working of a dynamometer-type wattmeter.

b) Explain construction and working principle of single-phase induction motor.

c) Explain the principle of operation of 3∅ induction motor. With the help of phasor diagram explain how rotating magnetic field is produced?

Section – II

Q.4 Attempt the following. (Any Four) **16**

a) Write short note on brushless DC motor.

b) Explain the principle of operation of linear induction motor.

c) Explain energy efficient AC machines.

d) A 230/2300V transformer takes a no-load current of 6.5 A and absorbs 187W. If the resistance of the primary is 0.6 Ω. Find.
i) the core loss
ii) no load power factor
iii) active component of current
iv) magnetizing current

e) Derive an EMF equation of transformer.

Q.5 Attempt the following. (Any Two) **12**

a) Explain construction and operation of Permanent Magnet Synchronous Motor (PMSM).

b) An energy-efficient AC motor has the following loss components:
Copper losses: 2 kW
Iron losses: 1.5 kW
Friction and windage losses: 0.5 kW
The input power is 25 kW. Calculate the efficiency of the motor.

c) Explain no-load and on-load operation of transformer with phasor diagram.

2) Figures to the right indicate full marks.

Section – I

Q.2 Attempt the following. (Any Four) **16**

a) State advantages and disadvantages of moving iron instruments.

b) A 3-phase 500V motor load has a power factor of 0.4 two wattmeter connected to measure input. They show input to be 30 KW. Find the reading of each instrument.

c) Describe the construction of three phase induction motor.

d) Write short note on digital multi-meter.

e) Explain torque-slip characteristics of induction motor.

Q.3 Attempt the following. (Any Two) **12**

a) Explain the principle and working of a dynamometer-type wattmeter.

b) Explain construction and working principle of single-phase induction motor.

c) Explain the principle of operation of 3Ø induction motor. With the help of phasor diagram explain how rotating magnetic field is produced?

Section – II

Q.4 Attempt the following. (Any Four) **16**

a) Write short note on brushless DC motor.

b) Explain the principle of operation of linear induction motor.

c) Explain energy efficient AC machines.

d) A 230/2300V transformer takes a no-load current of 6.5 A and absorbs 187W. If the resistance of the primary is 0.6 Ω. Find.
i) the core loss
ii) no load power factor
iii) active component of current
iv) magnetizing current

e) Derive an EMF equation of transformer.

Q.5 Attempt the following. (Any Two) **12**

a) Explain construction and operation of Permanent Magnet Synchronous Motor (PMSM).

b) An energy-efficient AC motor has the following loss components:
Copper losses: 2 kW
Iron losses: 1.5 kW
Friction and windage losses: 0.5 kW
The input power is 25 kW. Calculate the efficiency of the motor.

c) Explain no-load and on-load operation of transformer with phasor diagram.

S.Y. (B.Tech.) (Civil Engineering) (Semester - I) (New) (NEP CBCS) Examination: March/April – 2026
Basics of Electrical Vehicle (EEMDM-01B)

Day & Date: Thursday, 30-04-2026 Max. Marks: 70
Time: 10:00 AM To 01:00 PM

Instructions: 1) Q. No. 1 is compulsory. It should be solved in the first 30 minutes in Answer Book Page no 03 (Starting page of the Answer Book). Each question carries one mark.
2) Don't forget to Mention question paper set (P/Q/R/S) on top of page.
3) Figures to the right indicates full marks.
4) Assume suitable data if required.

MCQ/Objective Type Questions

Duration: 30 Minutes Marks:14

Q.1 Multi choice Question. **14**

1) The selection of an electric vehicle motor depends on _____.
a) Required speed and torque
b) Vehicle color
c) Number of seats
d) Tire size

2) Hybrid electric vehicles are characterized by _____.
a) Use of both electric and conventional engines
b) Energy recovery during braking
c) Assistance from an electric motor for acceleration
d) All of the above

3) How the batteries of plug-in hybrid vehicles are charged?
a) By regenerative breaking b) By charging stations
c) Both d) No need to charge

4) When the vehicle is solely powered by a conventional gasoline engine in Parallel HEV, Hybridness is _____.
a) 0 b) 0.25
c) 0.5 d) 0.75

5) The ampere-hour capacity of battery depends on _____.
a) thickness of plates b) area of the plate
c) strength of electrolyte d) distance between plates

6) Following will happen if battery charging rate is too high _____.
a) excessive gassing will occur
b) temperature rise will occur
c) bulging and buckling of plates we occur
d) All of the above

7) Which term describes the process of charging an electric vehicle (EV) battery to only a partial state of charge?

a) top-off charging
b) trickle charging
c) fast charging
d) opportunity charging

8) What is the primary advantage of ac charging over dc charging for electric vehicles (EVS)?

a) higher charging speed
b) lower cost of equipment
c) greater efficiency
d) compatibility with all EVS

9) Which of the following is NOT a type of electric vehicle (EV)?

a) Battery Electric Vehicle (BEV)
b) Plug-in Hybrid Electric Vehicle (PHEV)
c) Hydrogen Fuel Cell Electric Vehicle (FCEV)
d) Hybrid Internal Combustion Engine Vehicle (HICEV)

10) What is the typical range of a Battery Electric Vehicle (BEV) on a single charge?

a) 50-100 miles
b) 200-300 miles
c) 500-600 miles
d) 1000-1200 miles

11) Which device is used to convert alternating current (AC) from the grid to direct current (DC) for charging electric vehicles (EVs)?

a) Turbocharger
b) Inverter
c) Converter
d) Rectifier

12) What is the approximate efficiency of electric vehicles (EVs) compared to internal combustion engine vehicles (ICEVs)?

a) 50-60%
b) 70-80%
c) 90-95%
d) 100%

13) The main factor affecting the efficiency and cost-effectiveness of an EV charging station is _____.

a) Vehicle color
b) Location of the charging station
c) Tire type
d) Vehicle seating capacity

14) Selection of an EV charging station site is influenced primarily by _____.

a) Proximity to power grid
b) Vehicle brand
c) Driver age
d) Tire pressure

Seat No.	

Set **P**

S.Y. (B.Tech.) (Civil Engineering) (Semester - I) (New) (NEP CBCS) Examination: March/April – 2026
Basics of Electrical Vehicle (EEMDM-01B)

Day & Date: Thursday, 30-04-2026 Max. Marks: 56
Time: 10:00 AM To 01:00 PM

Instructions: 1) All questions are compulsory.
2) Figures to the right indicate full marks.
3) Assume suitable data wherever necessary.

Section – I

Q.2 Attempt any four of the following. **16**

a) Discuss the structure and working of a BEV Battery Management System with a neat diagram.

b) Explain why a Battery Management System is essential for maintaining battery safety and efficiency in BEVs.

c) List and describe the main functions performed by a Battery Management System.

d) Describe economic and environmental impacts of using Electrical vehicles.

e) Explain the key advantages of electric vehicles over traditional gasoline-powered vehicles.

f) Explain the different types of Battery Electric Vehicle layouts and their characteristics.

Q.3 Attempt any two of the following. **12**

a) List types of electric vehicles & Explain Battery Electric vehicle.

b) Describe the drivetrain system used in Battery Electric Vehicles (BEVs) and its components.

c) Explain motor drive Technology for EV.

Section – II

Q.4 Attempt any four of the following. **16**

a) Discuss the similarities and differences between ICE vehicle drivetrains.

b) Explain the terms Battery Parameters, Battery Charging.

c) Compare the energy storage devices: fuel cells, supercapacitors, and flywheels.

d) Explain regenerative braking in hybrid electric vehicles as an environmental benefit does this provide.

e) Explain how battery-based energy storage works and its applications in electric vehicles.

f) Explain the impact of battery technologies on the performance and range of electric vehicles.

Q.5 Attempt any two of the following. **12**

a) Describe the construction, working, and advantages of a Hybrid Electric Vehicle (HEV) in detail.

b) Give differences between battery electric vehicles, plug-in hybrid electric vehicles, and hybrid electric vehicles.

c) Describe the key safety considerations that must be addressed in electric vehicles.

Set **Q**

S.Y. (B.Tech.) (Computer Science and Engineering) (Semester - I) (New) (NEP CBCS) Examination: March/April – 2026
Basics of Electrical Vehicle (EEMDM-01B)

Day & Date: Thursday, 30-04-2026 Max. Marks: 70
Time: 10:00 AM To 01:00 PM

Instructions: 1) Q. No. 1 is compulsory. It should be solved in the first 30 minutes in Answer Book Page no 03 (Starting page of the Answer Book). Each question carries one mark.
2) Don't forget to Mention question paper set (P/Q/R/S) on top of page.
3) Figures to the right indicates full marks.
4) Assume suitable data if required.

MCQ/Objective Type Questions

Duration: 30 Minutes Marks:14

Q.1 Multi choice Question. **14**

1) What is the primary advantage of ac charging over dc charging for electric vehicles (EVS)?
a) higher charging speed b) lower cost of equipment
c) greater efficiency d) compatibility with all EVS

2) Which of the following is NOT a type of electric vehicle (EV)?
a) Battery Electric Vehicle (BEV)
b) Plug-in Hybrid Electric Vehicle (PHEV)
c) Hydrogen Fuel Cell Electric Vehicle (FCEV)
d) Hybrid Internal Combustion Engine Vehicle (HICEV)

3) What is the typical range of a Battery Electric Vehicle (BEV) on a single charge?
a) 50-100 miles b) 200-300 miles
c) 500-600 miles d) 1000-1200 miles

4) Which device is used to convert alternating current (AC) from the grid to direct current (DC) for charging electric vehicles (EVs)?
a) Turbocharger b) Inverter
c) Converter d) Rectifier

5) What is the approximate efficiency of electric vehicles (EVs) compared to internal combustion engine vehicles (ICEVs)?
a) 50-60% b) 70-80%
c) 90-95% d) 100%

6) The main factor affecting the efficiency and cost-effectiveness of an EV charging station is _____.
a) Vehicle color b) Location of the charging station
c) Tire type d) Vehicle seating capacity

7) Selection of an EV charging station site is influenced primarily by _____.
a) Proximity to power grid
b) Vehicle brand
c) Driver age
d) Tire pressure

8) The selection of an electric vehicle motor depends on _____.
a) Required speed and torque
b) Vehicle color
c) Number of seats
d) Tire size

9) Hybrid electric vehicles are characterized by _____.
a) Use of both electric and conventional engines
b) Energy recovery during braking
c) Assistance from an electric motor for acceleration
d) All of the above

10) How the batteries of plug-in hybrid vehicles are charged?
a) By regenerative breaking
b) By charging stations
c) Both
d) No need to charge

11) When the vehicle is solely powered by a conventional gasoline engine in Parallel HEV, Hybridness is _____.
a) 0
b) 0.25
c) 0.5
d) 0.75

12) The ampere-hour capacity of battery depends on _____.
a) thickness of plates
b) area of the plate
c) strength of electrolyte
d) distance between plates

13) Following will happen if battery charging rate is too high _____.
a) excessive gassing will occur
b) temperature rise will occur
c) bulging and buckling of plates we occur
d) All of the above

14) Which term describes the process of charging an electric vehicle (EV) battery to only a partial state of charge?
a) top-off charging
b) trickle charging
c) fast charging
d) opportunity charging

Seat No.	

Set **Q**

S.Y. (B.Tech.) (Computer Science and Engineering) (Semester - I) (New) (NEP CBCS) Examination: March/April – 2026
Basics of Electrical Vehicle (EEMDM-01B)

Day & Date: Thursday, 30-04-2026 Max. Marks: 56
Time: 10:00 AM To 01:00 PM

Instructions: 1) All questions are compulsory.
2) Figures to the right indicate full marks.
3) Assume suitable data wherever necessary.

Section – I

Q.2 Attempt any four of the following. **16**

a) Discuss the structure and working of a BEV Battery Management System with a neat diagram.

b) Explain why a Battery Management System is essential for maintaining battery safety and efficiency in BEVs.

c) List and describe the main functions performed by a Battery Management System.

d) Describe economic and environmental impacts of using Electrical vehicles.

e) Explain the key advantages of electric vehicles over traditional gasoline-powered vehicles.

f) Explain the different types of Battery Electric Vehicle layouts and their characteristics.

Q.3 Attempt any two of the following. **12**

a) List types of electric vehicles & Explain Battery Electric vehicle.

b) Describe the drivetrain system used in Battery Electric Vehicles (BEVs) and its components.

c) Explain motor drive Technology for EV.

Section – II

Q.4 Attempt any four of the following. **16**

a) Discuss the similarities and differences between ICE vehicle drivetrains.

b) Explain the terms Battery Parameters, Battery Charging.

c) Compare the energy storage devices: fuel cells, supercapacitors, and flywheels.

d) Explain regenerative braking in hybrid electric vehicles as an environmental benefit does this provide.

e) Explain how battery-based energy storage works and its applications in electric vehicles.

f) Explain the impact of battery technologies on the performance and range of electric vehicles.

Q.5 Attempt any two of the following. **12**

a) Describe the construction, working, and advantages of a Hybrid Electric Vehicle (HEV) in detail.

b) Give differences between battery electric vehicles, plug-in hybrid electric vehicles, and hybrid electric vehicles.

c) Describe the key safety considerations that must be addressed in electric vehicles.

a) Vehicle color b) Location of the charging station
c) Tire type d) Vehicle seating capacity

4) Selection of an EV charging station site is influenced primarily by _____.
a) Proximity to power grid b) Vehicle brand
c) Driver age d) Tire pressure

5) The selection of an electric vehicle motor depends on _____.
a) Required speed and torque
b) Vehicle color
c) Number of seats
d) Tire size

6) Hybrid electric vehicles are characterized by _____.
a) Use of both electric and conventional engines
b) Energy recovery during braking
c) Assistance from an electric motor for acceleration
d) All of the above

7) How the batteries of plug-in hybrid vehicles are charged?
a) By regenerative breaking b) By charging stations
c) Both d) No need to charge

8) When the vehicle is solely powered by a conventional gasoline engine in Parallel HEV, Hybridness is _____.
a) 0 b) 0.25
c) 0.5 d) 0.75

9) The ampere-hour capacity of battery depends on _____.
a) thickness of plates b) area of the plate
c) strength of electrolyte d) distance between plates

10) Following will happen if battery charging rate is too high _____.
a) excessive gassing will occur
b) temperature rise will occur
c) bulging and buckling of plates we occur
d) All of the above

11) Which term describes the process of charging an electric vehicle (EV) battery to only a partial state of charge?
a) top-off charging b) trickle charging
c) fast charging d) opportunity charging

12) What is the primary advantage of ac charging over dc charging for electric vehicles (EVS)?
a) higher charging speed b) lower cost of equipment
c) greater efficiency d) compatibility with all EVS

13) Which of the following is NOT a type of electric vehicle (EV)?
a) Battery Electric Vehicle (BEV)
b) Plug-in Hybrid Electric Vehicle (PHEV)
c) Hydrogen Fuel Cell Electric Vehicle (FCEV)
d) Hybrid Internal Combustion Engine Vehicle (HICEV)

14) What is the typical range of a Battery Electric Vehicle (BEV) on a single charge?
a) 50-100 miles b) 200-300 miles
c) 500-600 miles d) 1000-1200 miles

Seat No.	

Set **R**

S.Y. (B.Tech.) (Electronics & Computer Engineering) (Semester - I) (New) (NEP CBCS) Examination: March/April – 2026
Basics of Electrical Vehicle (EEMDM-01B)

Day & Date: Thursday, 30-04-2026 Max. Marks: 56
Time: 10:00 AM To 01:00 PM

Instructions: 1) All questions are compulsory.
2) Figures to the right indicate full marks.
3) Assume suitable data wherever necessary.

Section – I

Q.2 Attempt any four of the following. **16**

a) Discuss the structure and working of a BEV Battery Management System with a neat diagram.

b) Explain why a Battery Management System is essential for maintaining battery safety and efficiency in BEVs.

c) List and describe the main functions performed by a Battery Management System.

d) Describe economic and environmental impacts of using Electrical vehicles.

e) Explain the key advantages of electric vehicles over traditional gasoline-powered vehicles.

f) Explain the different types of Battery Electric Vehicle layouts and their characteristics.

Q.3 Attempt any two of the following. **12**

a) List types of electric vehicles & Explain Battery Electric vehicle.

b) Describe the drivetrain system used in Battery Electric Vehicles (BEVs) and its components.

c) Explain motor drive Technology for EV.

Section – II

Q.4 Attempt any four of the following. **16**

a) Discuss the similarities and differences between ICE vehicle drivetrains.

b) Explain the terms Battery Parameters, Battery Charging.

c) Compare the energy storage devices: fuel cells, supercapacitors, and flywheels.

d) Explain regenerative braking in hybrid electric vehicles as an environmental benefit does this provide.

e) Explain how battery-based energy storage works and its applications in electric vehicles.

f) Explain the impact of battery technologies on the performance and range of electric vehicles.

Q.5 Attempt any two of the following. **12**

a) Describe the construction, working, and advantages of a Hybrid Electric Vehicle (HEV) in detail.

b) Give differences between battery electric vehicles, plug-in hybrid electric vehicles, and hybrid electric vehicles.

c) Describe the key safety considerations that must be addressed in electric vehicles.

Seat No.	

Set **S**

S.Y. (B.Tech.) (Electronics & Computer Engineering) (Semester - I) (New) (NEP CBCS) Examination: March/April – 2026
Basics of Electrical Vehicle (EEMDM-01B)

Day & Date: Thursday, 30-04-2026 Max. Marks: 70
Time: 10:00 AM To 01:00 PM

Instructions: 1) Q. No. 1 is compulsory. It should be solved in the first 30 minutes in Answer Book Page no 03 (Starting page of the Answer Book). Each question carries one mark.
2) Don't forget to Mention question paper set (P/Q/R/S) on top of page.
3) Figures to the right indicates full marks.
4) Assume suitable data if required.

MCQ/Objective Type Questions

Duration: 30 Minutes Marks:14

Q.1 Multi choice Question. **14**

1) Following will happen if battery charging rate is too high _____.
a) excessive gassing will occur
b) temperature rise will occur
c) bulging and buckling of plates we occur
d) All of the above

2) Which term describes the process of charging an electric vehicle (EV) battery to only a partial state of charge?
a) top-off charging b) trickle charging
c) fast charging d) opportunity charging

3) What is the primary advantage of ac charging over dc charging for electric vehicles (EVS)?
a) higher charging speed b) lower cost of equipment
c) greater efficiency d) compatibility with all EVS

4) Which of the following is NOT a type of electric vehicle (EV)?
a) Battery Electric Vehicle (BEV)
b) Plug-in Hybrid Electric Vehicle (PHEV)
c) Hydrogen Fuel Cell Electric Vehicle (FCEV)
d) Hybrid Internal Combustion Engine Vehicle (HICEV)

5) What is the typical range of a Battery Electric Vehicle (BEV) on a single charge?
a) 50-100 miles b) 200-300 miles
c) 500-600 miles d) 1000-1200 miles

6) Which device is used to convert alternating current (AC) from the grid to direct current (DC) for charging electric vehicles (EVs)?
a) Turbocharger b) Inverter
c) Converter d) Rectifier

7) What is the approximate efficiency of electric vehicles (EVs) compared to internal combustion engine vehicles (ICEVs)?
a) 50-60% b) 70-80%
c) 90-95% d) 100%

8) The main factor affecting the efficiency and cost-effectiveness of an EV charging station is _____.
a) Vehicle color b) Location of the charging station
c) Tire type d) Vehicle seating capacity

9) Selection of an EV charging station site is influenced primarily by _____.
a) Proximity to power grid b) Vehicle brand
c) Driver age d) Tire pressure

10) The selection of an electric vehicle motor depends on _____.
a) Required speed and torque
b) Vehicle color
c) Number of seats
d) Tire size

11) Hybrid electric vehicles are characterized by _____.
a) Use of both electric and conventional engines
b) Energy recovery during braking
c) Assistance from an electric motor for acceleration
d) All of the above

12) How the batteries of plug-in hybrid vehicles are charged?
a) By regenerative breaking b) By charging stations
c) Both d) No need to charge

13) When the vehicle is solely powered by a conventional gasoline engine in Parallel HEV, Hybridness is _____.
a) 0 b) 0.25
c) 0.5 d) 0.75

14) The ampere-hour capacity of battery depends on _____.
a) thickness of plates b) area of the plate
c) strength of electrolyte d) distance between plates

Set **S**

S.Y. (B.Tech.) (Electrical Engineering) (Semester - I) (New) (NEP CBCS) Examination: March/April – 2026
Basics of Electrical Vehicle (EEMDM-01B)

Day & Date: Thursday, 30-04-2026 Max. Marks: 56
Time: 10:00 AM To 01:00 PM

Instructions: 1) All questions are compulsory.
2) Figures to the right indicate full marks.
3) Assume suitable data wherever necessary.

Section – I

Q.2 Attempt any four of the following. **16**

a) Discuss the structure and working of a BEV Battery Management System with a neat diagram.

b) Explain why a Battery Management System is essential for maintaining battery safety and efficiency in BEVs.

c) List and describe the main functions performed by a Battery Management System.

d) Describe economic and environmental impacts of using Electrical vehicles.

e) Explain the key advantages of electric vehicles over traditional gasoline-powered vehicles.

f) Explain the different types of Battery Electric Vehicle layouts and their characteristics.

Q.3 Attempt any two of the following. **12**

a) List types of electric vehicles & Explain Battery Electric vehicle.

b) Describe the drivetrain system used in Battery Electric Vehicles (BEVs) and its components.

c) Explain motor drive Technology for EV.

Section – II

Q.4 Attempt any four of the following. **16**

a) Discuss the similarities and differences between ICE vehicle drivetrains.

b) Explain the terms Battery Parameters, Battery Charging.

c) Compare the energy storage devices: fuel cells, supercapacitors, and flywheels.

d) Explain regenerative braking in hybrid electric vehicles as an environmental benefit does this provide.

e) Explain how battery-based energy storage works and its applications in electric vehicles.

f) Explain the impact of battery technologies on the performance and range of electric vehicles.

Q.5 Attempt any two of the following. **12**

a) Describe the construction, working, and advantages of a Hybrid Electric Vehicle (HEV) in detail.

b) Give differences between battery electric vehicles, plug-in hybrid electric vehicles, and hybrid electric vehicles.

c) Describe the key safety considerations that must be addressed in electric vehicles.

Seat No.	

Set **P**

S.Y. (B.Tech.) (Electronics and Telecommunication Engineering) (Semester - I) (New) (NEP CBCS) Examination: March/April – 2026
Basics of Electrical Vehicle (EEMDM-01B)

Day & Date: Thursday, 30-04-2026 Max. Marks: 70
Time: 10:00 AM To 01:00 PM

Instructions: 1) Q. No. 1 is compulsory. It should be solved in the first 30 minutes in Answer Book Page no 03 (Starting page of the Answer Book). Each question carries one mark.
2) Don't forget to Mention question paper set (P/Q/R/S) on top of page.
3) Figures to the right indicates full marks.
4) Assume suitable data if required.

MCQ/Objective Type Questions

Duration: 30 Minutes Marks:14

Q.1 Multi choice Question. **14**

1) The selection of an electric vehicle motor depends on _____.
a) Required speed and torque
b) Vehicle color
c) Number of seats
d) Tire size

2) Hybrid electric vehicles are characterized by _____.
a) Use of both electric and conventional engines
b) Energy recovery during braking
c) Assistance from an electric motor for acceleration
d) All of the above

3) How the batteries of plug-in hybrid vehicles are charged?
a) By regenerative breaking b) By charging stations
c) Both d) No need to charge

4) When the vehicle is solely powered by a conventional gasoline engine in Parallel HEV, Hybridness is _____.
a) 0 b) 0.25
c) 0.5 d) 0.75

5) The ampere-hour capacity of battery depends on _____.
a) thickness of plates b) area of the plate
c) strength of electrolyte d) distance between plates

6) Following will happen if battery charging rate is too high _____.
a) excessive gassing will occur
b) temperature rise will occur
c) bulging and buckling of plates we occur
d) All of the above

7) Which term describes the process of charging an electric vehicle (EV) battery to only a partial state of charge?

a) top-off charging
b) trickle charging
c) fast charging
d) opportunity charging

8) What is the primary advantage of ac charging over dc charging for electric vehicles (EVS)?

a) higher charging speed
b) lower cost of equipment
c) greater efficiency
d) compatibility with all EVS

9) Which of the following is NOT a type of electric vehicle (EV)?

a) Battery Electric Vehicle (BEV)
b) Plug-in Hybrid Electric Vehicle (PHEV)
c) Hydrogen Fuel Cell Electric Vehicle (FCEV)
d) Hybrid Internal Combustion Engine Vehicle (HICEV)

10) What is the typical range of a Battery Electric Vehicle (BEV) on a single charge?

a) 50-100 miles
b) 200-300 miles
c) 500-600 miles
d) 1000-1200 miles

11) Which device is used to convert alternating current (AC) from the grid to direct current (DC) for charging electric vehicles (EVs)?

a) Turbocharger
b) Inverter
c) Converter
d) Rectifier

12) What is the approximate efficiency of electric vehicles (EVs) compared to internal combustion engine vehicles (ICEVs)?

a) 50-60%
b) 70-80%
c) 90-95%
d) 100%

13) The main factor affecting the efficiency and cost-effectiveness of an EV charging station is _____.

a) Vehicle color
b) Location of the charging station
c) Tire type
d) Vehicle seating capacity

14) Selection of an EV charging station site is influenced primarily by _____.

a) Proximity to power grid
b) Vehicle brand
c) Driver age
d) Tire pressure

a) List types of electric vehicles & Explain Battery Electric vehicle.

b) Describe the drivetrain system used in Battery Electric Vehicles (BEVs) and its components.

c) Explain motor drive Technology for EV.

Section – II

Q.4 Attempt any four of the following. **16**

a) Discuss the similarities and differences between ICE vehicle drivetrains.

b) Explain the terms Battery Parameters, Battery Charging.

c) Compare the energy storage devices: fuel cells, supercapacitors, and flywheels.

d) Explain regenerative braking in hybrid electric vehicles as an environmental benefit does this provide.

e) Explain how battery-based energy storage works and its applications in electric vehicles.

f) Explain the impact of battery technologies on the performance and range of electric vehicles.

Q.5 Attempt any two of the following. **12**

a) Describe the construction, working, and advantages of a Hybrid Electric Vehicle (HEV) in detail.

b) Give differences between battery electric vehicles, plug-in hybrid electric vehicles, and hybrid electric vehicles.

c) Describe the key safety considerations that must be addressed in electric vehicles.

Set **Q**

S.Y. (B.Tech.) (Mechanical Engineering) (Semester - I) (New) (NEP CBCS) Examination: March/April – 2026
Basics of Electrical Vehicle (EEMDM-01B)

Day & Date: Thursday, 30-04-2026 Max. Marks: 70
Time: 10:00 AM To 01:00 PM

Instructions: 1) Q. No. 1 is compulsory. It should be solved in the first 30 minutes in Answer Book Page no 03 (Starting page of the Answer Book). Each question carries one mark.
2) Don't forget to Mention question paper set (P/Q/R/S) on top of page.
3) Figures to the right indicates full marks.
4) Assume suitable data if required.

MCQ/Objective Type Questions

Duration: 30 Minutes Marks:14

Q.1 Multi choice Question. **14**

1) What is the primary advantage of ac charging over dc charging for electric vehicles (EVS)?
a) higher charging speed b) lower cost of equipment
c) greater efficiency d) compatibility with all EVS

2) Which of the following is NOT a type of electric vehicle (EV)?
a) Battery Electric Vehicle (BEV)
b) Plug-in Hybrid Electric Vehicle (PHEV)
c) Hydrogen Fuel Cell Electric Vehicle (FCEV)
d) Hybrid Internal Combustion Engine Vehicle (HICEV)

3) What is the typical range of a Battery Electric Vehicle (BEV) on a single charge?
a) 50-100 miles b) 200-300 miles
c) 500-600 miles d) 1000-1200 miles

4) Which device is used to convert alternating current (AC) from the grid to direct current (DC) for charging electric vehicles (EVs)?
a) Turbocharger b) Inverter
c) Converter d) Rectifier

5) What is the approximate efficiency of electric vehicles (EVs) compared to internal combustion engine vehicles (ICEVs)?
a) 50-60% b) 70-80%
c) 90-95% d) 100%

6) The main factor affecting the efficiency and cost-effectiveness of an EV charging station is _____.
a) Vehicle color b) Location of the charging station
c) Tire type d) Vehicle seating capacity

7) Selection of an EV charging station site is influenced primarily by _____.
a) Proximity to power grid
b) Vehicle brand
c) Driver age
d) Tire pressure

8) The selection of an electric vehicle motor depends on _____.
a) Required speed and torque
b) Vehicle color
c) Number of seats
d) Tire size

9) Hybrid electric vehicles are characterized by _____.
a) Use of both electric and conventional engines
b) Energy recovery during braking
c) Assistance from an electric motor for acceleration
d) All of the above

10) How the batteries of plug-in hybrid vehicles are charged?
a) By regenerative breaking
b) By charging stations
c) Both
d) No need to charge

11) When the vehicle is solely powered by a conventional gasoline engine in Parallel HEV, Hybridness is _____.
a) 0
b) 0.25
c) 0.5
d) 0.75

12) The ampere-hour capacity of battery depends on _____.
a) thickness of plates
b) area of the plate
c) strength of electrolyte
d) distance between plates

13) Following will happen if battery charging rate is too high _____.
a) excessive gassing will occur
b) temperature rise will occur
c) bulging and buckling of plates we occur
d) All of the above

14) Which term describes the process of charging an electric vehicle (EV) battery to only a partial state of charge?
a) top-off charging
b) trickle charging
c) fast charging
d) opportunity charging

Seat No.	

Set **Q**

S.Y. (B.Tech.) (Mechanical Engineering) (Semester - I) (New) (NEP CBCS) Examination: March/April – 2026
Basics of Electrical Vehicle (EEMDM-01B)

Day & Date: Thursday, 30-04-2026 Max. Marks: 56
Time: 10:00 AM To 01:00 PM

Instructions: 1) All questions are compulsory.
2) Figures to the right indicate full marks.
3) Assume suitable data wherever necessary.

Section – I

Q.2 Attempt any four of the following. **16**

a) Discuss the structure and working of a BEV Battery Management System with a neat diagram.

b) Explain why a Battery Management System is essential for maintaining battery safety and efficiency in BEVs.

c) List and describe the main functions performed by a Battery Management System.

d) Describe economic and environmental impacts of using Electrical vehicles.

e) Explain the key advantages of electric vehicles over traditional gasoline-powered vehicles.

f) Explain the different types of Battery Electric Vehicle layouts and their characteristics.

Q.3 Attempt any two of the following. **12**

a) List types of electric vehicles & Explain Battery Electric vehicle.

b) Describe the drivetrain system used in Battery Electric Vehicles (BEVs) and its components.

c) Explain motor drive Technology for EV.

Section – II

Q.4 Attempt any four of the following. **16**

a) Discuss the similarities and differences between ICE vehicle drivetrains.

b) Explain the terms Battery Parameters, Battery Charging.

c) Compare the energy storage devices: fuel cells, supercapacitors, and flywheels.

d) Explain regenerative braking in hybrid electric vehicles as an environmental benefit does this provide.

e) Explain how battery-based energy storage works and its applications in electric vehicles.

f) Explain the impact of battery technologies on the performance and range of electric vehicles.

Q.5 Attempt any two of the following. **12**

a) Describe the construction, working, and advantages of a Hybrid Electric Vehicle (HEV) in detail.

b) Give differences between battery electric vehicles, plug-in hybrid electric vehicles, and hybrid electric vehicles.

c) Describe the key safety considerations that must be addressed in electric vehicles.

Q.1 Multiple Choice Questions. **14**

1) An entrepreneur is best defined as a person who _____.
a) Only manages employees
b) Creates and manages new ventures
c) Works under supervision
d) Avoids risks

2) Innovation is mainly associated with _____.
a) Copying products
b) Introducing new or improved solutions
c) Reducing creativity
d) Avoiding competition

3) The first step in the innovation process is _____.
a) Prototyping b) Identifying opportunities
c) Branding d) Sales strategy

4) A major challenge in entrepreneurship is _____.
a) Zero competition b) Unlimited funding
c) Uncertainty and risk d) Constant success

5) Trait theory of leadership is based on _____.
a) Readiness level of employees
b) Personality characteristics
c) Organizational size
d) Market trends

6) Functional organization structure is based on _____.
a) Geographic divisions b) Product lines
c) Specialization of functions d) Customer groups

7) Agile project management emphasizes _____.
a) Rigid long-term planning
b) Iterative and flexible development
c) No customer involvement
d) High documentation

8) Sources of funding for start-ups include _____.
a) Only government grants
b) Angel investors, VCs, bootstrapping
c) Only loans
d) Only donations

9) Guerrilla marketing is known for _____.
a) High budget campaigns
b) Low-cost creative promotions
c) Only digital ads
d) Recruiting employees

10) Customer retention refers to _____.
a) Gaining new customers
b) Keeping existing customers
c) Reducing customer base
d) Avoiding customer feedback

11) Burn-rate means _____.
a) Money saved every month
b) Monthly cash outflow of a startup
c) Profits earned per month
d) Interest generated

12) Sustainable entrepreneurship focuses on _____.
a) Short-term gains
b) Only profit maximization
c) Long-term economic, social & environmental value
d) Avoiding innovation

13) Cash flow refers to _____.
a) Number of staff
b) Movement of money in and out of business
c) Customer data
d) Production units

14) Organizational structure impacts _____.
a) Only marketing
b) Only technology
c) Overall company performance
d) Only employees' punctuality

S.Y. (B.Tech.) (Mechanical Engineering) (Semester - II) (New) (CBCS) Examination: March/April - 2026
Entrepreneurship, Leadership and Management (CIVMDM-02A)

Day & Date: Thursday, 30-04-2026 Max. Marks: 56
Time: 03:00 PM To 06:00 PM

Instructions: 1) All questions are compulsory.
2) Figures to the right indicates full marks.
3) Make suitable assumptions if necessary and state them clearly.
4) Use of non-programmable calculators is allowed.

SECTION – I

Q.2 Answer the following questions. **10**

a) Explain the importance of innovation and entrepreneurship in the economy.

b) Describe leadership styles and explain Trait, Behavioral, and Contingency theories.

Q.3 Answer any three of the following questions. **18**

a) Write the definitions of Enterprise, Entrepreneur, and Innovation with examples.

b) Explain the entrepreneurial journey and its steps.

c) Describe the challenges faced during innovation.

d) Explain types of businesses and types of entrepreneurships.

e) Discuss types of organizational structures and their impact on performance.

SECTION – II

Q.4 Answer the following questions. **10**

a) Explain budgeting and resource allocation in innovation projects.

b) Discuss customer acquisition, retention, and repetition with examples.

Q.5 Answer any three of the following questions. **18**

a) Explain major project management methodologies used in startups.

b) Describe sales techniques for start-ups with real-life examples.

c) Explain managing cash flow and burn-rate.

d) Discuss sustainable entrepreneurship practices with examples.

e) Explain scaling-up strategies for growing ventures.

Examination: March/April – 2026
Entrepreneurship, Leadership and Management (CIVMDM-02A)

Day & Date: Thursday, 30-04-2026 Max. Marks: 70
Time: 03:00 PM To 06:00 PM

Instructions: 1) Q. No. 1 is compulsory. It should be solved in the first 30 minutes in Answer Book Page no 03 (Starting page of the Answer Book). Each question carries one mark.
2) Don't forget to Mention question paper set (P/Q/R/S) on top on page.
3) Figures to the right indicates full marks.
4) Make suitable assumptions if necessary and state them clearly.
5) Use of non-programmable calculators is allowed.

MCQ/Objective Type Questions

Duration: 30 Minutes Marks:14

Q.1 Multiple Choice Questions. **14**

1) Burn-rate means _____.
a) Money saved every month
b) Monthly cash outflow of a startup
c) Profits earned per month
d) Interest generated

2) Sustainable entrepreneurship focuses on _____.
a) Short-term gains
b) Only profit maximization
c) Long-term economic, social & environmental value
d) Avoiding innovation

3) Cash flow refers to _____.
a) Number of staff
b) Movement of money in and out of business
c) Customer data
d) Production units

4) Organizational structure impacts _____.
a) Only marketing
b) Only technology
c) Overall company performance
d) Only employees' punctuality

5) An entrepreneur is best defined as a person who _____.
a) Only manages employees
b) Creates and manages new ventures
c) Works under supervision
d) Avoids risks

6) Innovation is mainly associated with _____.
a) Copying products
b) Introducing new or improved solutions
c) Reducing creativity
d) Avoiding competition

7) The first step in the innovation process is _____.
a) Prototyping
b) Identifying opportunities
c) Branding
d) Sales strategy

8) A major challenge in entrepreneurship is _____.
a) Zero competition
b) Unlimited funding
c) Uncertainty and risk
d) Constant success

9) Trait theory of leadership is based on _____.
a) Readiness level of employees
b) Personality characteristics
c) Organizational size
d) Market trends

10) Functional organization structure is based on _____.
a) Geographic divisions
b) Product lines
c) Specialization of functions
d) Customer groups

11) Agile project management emphasizes _____.
a) Rigid long-term planning
b) Iterative and flexible development
c) No customer involvement
d) High documentation

12) Sources of funding for start-ups include _____.
a) Only government grants
b) Angel investors, VCs, bootstrapping
c) Only loans
d) Only donations

13) Guerrilla marketing is known for _____.
a) High budget campaigns
b) Low-cost creative promotions
c) Only digital ads
d) Recruiting employees

14) Customer retention refers to _____.
a) Gaining new customers
b) Keeping existing customers
c) Reducing customer base
d) Avoiding customer feedback

MCQ/Objective Type Questions

Duration: 30 Minutes Marks:14

Q.1 Choose the correct alternative from the given options. 14

1) What is one of the challenges faced in urban planning?
a) Rapid population growth b) Decreasing urban population
c) Increased agricultural land d) Less need for infrastructure

2) What is one of the concrete technical aspects defining 'urban'?
a) Population size b) Cultural heritage
c) Historical significance d) Natural resources

3) What is a characteristic of towns compared to villages?
a) Towns are smaller than villages
b) Towns are generally larger than villages
c) Towns have no local self-government
d) Towns are only found in urban areas

4) What is the population density and settlement size in rural settlements?
a) High and large b) Low and small
c) Medium and average d) Variable and diverse

5) What type of activities are rural settlements chiefly concerned with?
a) Secondary activities b) Tertiary activities
c) Primary activities d) Quaternary activities

6) What is a consequence of overcrowding in cities?
a) Improved living conditions
b) Added pressure on physical infrastructure
c) Increased green spaces
d) Lower crime rates

7) What is one of the social infrastructures affected by urbanization?
a) Transportation
b) Healthcare
c) Agriculture
d) Mining

8) What is a blighted area?
a) An area in good condition
b) Any area in deterioration regardless of its degree
c) A newly developed area
d) An area with high economic activity

9) What is one of the administrative measures for urban renewal?
a) To demolish all buildings
b) To restore the area to its original functions
c) To build new skyscrapers
d) To increase traffic congestion

10) What is a landform?
a) a type of urban structure
b) a natural feature of the solid surface of the Earth
c) a man-made construction
d) a type of vegetation in a city

11) What is the role of edges in city districts?
a) To connect different districts
b) To augment the tendency of districts to fragment the city
c) To enhance the beauty of the city
d) To provide transportation routes

12) What is the purpose of tree grates?
a) To provide shade for pedestrians
b) To enable water to reach the roots of a tree
c) To decorate the planting hole
d) To support the tree collar

13) What does the National Survey help to collect information about?
a) Natural resources and potentialities
b) Urban aesthetics
c) Traffic congestion
d) Housing conditions

14) What is the purpose of conducting a Physical Survey in town planning?
a) To collect information for updating base maps
b) To assess social conditions
c) To evaluate economic activities
d) To analyze traffic problems

Seat No.		Set	S

S.Y. (B.Tech.) (Mechanical Engineering) (Semester - II) (New) (CBCS) Examination: March/April – 2026
Urban Planning and Design (CIVMDM-02B)

Day & Date: Thursday, 30-04-2026 Max. Marks: 56
Time: 03:00 PM To 06:00 PM

Instructions: 1) All questions are compulsory.
2) Figures to the right indicate full marks.
3) Assume suitable data if necessary.
4) Draw neat sketch wherever necessary.

Section – I

Q.2 Attempt any four from the following. **16**

a) Describe the purpose of urban or town planning.
b) Illustrate the methods used in urban or town planning.
c) Describe the geological factors affecting urban development.
d) Explain the rural settlements.
e) Describe growth of cities & scale of cities.
f) Compare between more developed countries (MDC) & less developed countries (LDC).

Q.3 Attempt any two from the following. **12**

a) Explain the parts of the town and their relationship.
b) Describe the socio-economic consequences.
c) Illustrate the negative impacts of city growth.

Section – II

Q.4 Attempt any four from the following. **16**

a) Describe in detail urban design.
b) Write down key aspects of an urban design.
c) Define an Urban form & state types of determinants.
d) Describe the natural determinants of an urban form.
e) Illustrate survey techniques for urban aesthetics.
f) Explain townscape analysis.

Q.5 Attempt any two from the following. **12**

a) Explain various principles of an urban design.
b) Describe all the types of public spaces & explain any one in detail.
c) Describe steps to carry out visual survey and its recordings.

Day & Date: Thursday, 30-04-2026 Max. Marks: 70
Time: 03:00 PM To 06:00 PM

Instructions: 1) Q. No. 1 is compulsory. It should be solved in the first 30 minutes in Answer Book Page no 03 (Starting page of the Answer Book). Each question carries one mark.
2) Don't forget to Mention question paper set (P/Q/R/S) on top of page.
3) Figures to the right indicates full marks.
4) Make suitable assumptions if necessary and state them clearly.

MCQ/Objective Type Questions

Duration: 30 Minutes Marks:14

Q.1 Choose the correct alternative from the given options. 14

1) What is one of the challenges faced in urban planning?
a) Rapid population growth b) Decreasing urban population
c) Increased agricultural land d) Less need for infrastructure

2) What is one of the concrete technical aspects defining 'urban'?
a) Population size b) Cultural heritage
c) Historical significance d) Natural resources

3) What is a characteristic of towns compared to villages?
a) Towns are smaller than villages
b) Towns are generally larger than villages
c) Towns have no local self-government
d) Towns are only found in urban areas

4) What is the population density and settlement size in rural settlements?
a) High and large b) Low and small
c) Medium and average d) Variable and diverse

5) What type of activities are rural settlements chiefly concerned with?
a) Secondary activities b) Tertiary activities
c) Primary activities d) Quaternary activities

6) What is a consequence of overcrowding in cities?
a) Improved living conditions
b) Added pressure on physical infrastructure
c) Increased green spaces
d) Lower crime rates

7) What is one of the social infrastructures affected by urbanization?
a) Transportation
b) Healthcare
c) Agriculture
d) Mining

8) What is a blighted area?
a) An area in good condition
b) Any area in deterioration regardless of its degree
c) A newly developed area
d) An area with high economic activity

9) What is one of the administrative measures for urban renewal?
a) To demolish all buildings
b) To restore the area to its original functions
c) To build new skyscrapers
d) To increase traffic congestion

10) What is a landform?
a) a type of urban structure
b) a natural feature of the solid surface of the Earth
c) a man-made construction
d) a type of vegetation in a city

11) What is the role of edges in city districts?
a) To connect different districts
b) To augment the tendency of districts to fragment the city
c) To enhance the beauty of the city
d) To provide transportation routes

12) What is the purpose of tree grates?
a) To provide shade for pedestrians
b) To enable water to reach the roots of a tree
c) To decorate the planting hole
d) To support the tree collar

13) What does the National Survey help to collect information about?
a) Natural resources and potentialities
b) Urban aesthetics
c) Traffic congestion
d) Housing conditions

14) What is the purpose of conducting a Physical Survey in town planning?
a) To collect information for updating base maps
b) To assess social conditions
c) To evaluate economic activities
d) To analyze traffic problems

10) What is a characteristic of towns compared to villages?
a) Towns are smaller than villages
b) Towns are generally larger than villages
c) Towns have no local self-government
d) Towns are only found in urban areas

11) What is the population density and settlement size in rural settlements?
a) High and large
b) Low and small
c) Medium and average
d) Variable and diverse

12) What type of activities are rural settlements chiefly concerned with?
a) Secondary activities
b) Tertiary activities
c) Primary activities
d) Quaternary activities

13) What is a consequence of overcrowding in cities?
a) Improved living conditions
b) Added pressure on physical infrastructure
c) Increased green spaces
d) Lower crime rates

14) What is one of the social infrastructures affected by urbanization?
a) Transportation
b) Healthcare
c) Agriculture
d) Mining

S.Y. (B.Tech.) (Computer Science and Engineering) (Semester - II) (New) (CBCS) Examination: March/April – 2026
Urban Planning and Design (CIVMDM-02B)

Day & Date: Thursday, 30-04-2026 Max. Marks: 56
Time: 03:00 PM To 06:00 PM

Instructions: 1) All questions are compulsory.
2) Figures to the right indicate full marks.
3) Assume suitable data if necessary.
4) Draw neat sketch wherever necessary.

Section – I

Q.2 Attempt any four from the following. **16**

a) Describe the purpose of urban or town planning.
b) Illustrate the methods used in urban or town planning.
c) Describe the geological factors affecting urban development.
d) Explain the rural settlements.
e) Describe growth of cities & scale of cities.
f) Compare between more developed countries (MDC) & less developed countries (LDC).

Q.3 Attempt any two from the following. **12**

a) Explain the parts of the town and their relationship.
b) Describe the socio-economic consequences.
c) Illustrate the negative impacts of city growth.

Section – II

Q.4 Attempt any four from the following. **16**

a) Describe in detail urban design.
b) Write down key aspects of an urban design.
c) Define an Urban form & state types of determinants.
d) Describe the natural determinants of an urban form.
e) Illustrate survey techniques for urban aesthetics.
f) Explain townscape analysis.

Q.5 Attempt any two from the following. **12**

a) Explain various principles of an urban design.
b) Describe all the types of public spaces & explain any one in detail.
c) Describe steps to carry out visual survey and its recordings.

Urban Planning and Design (CIVMDM-02B)

Day & Date: Thursday, 30-04-2026 Max. Marks: 70
Time: 03:00 PM To 06:00 PM

Instructions: 1) Q. No. 1 is compulsory. It should be solved in the first 30 minutes in Answer Book Page no 03 (Starting page of the Answer Book). Each question carries one mark.
2) Don't forget to Mention question paper set (P/Q/R/S) on top of page.
3) Figures to the right indicates full marks.
4) Make suitable assumptions if necessary and state them clearly.

MCQ/Objective Type Questions

Duration: 30 Minutes Marks:14

Q.1 Choose the correct alternative from the given options. 14

1) What is the role of edges in city districts?
a) To connect different districts
b) To augment the tendency of districts to fragment the city
c) To enhance the beauty of the city
d) To provide transportation routes

2) What is the purpose of tree grates?
a) To provide shade for pedestrians
b) To enable water to reach the roots of a tree
c) To decorate the planting hole
d) To support the tree collar

3) What does the National Survey help to collect information about?
a) Natural resources and potentialities
b) Urban aesthetics
c) Traffic congestion
d) Housing conditions

4) What is the purpose of conducting a Physical Survey in town planning?
a) To collect information for updating base maps
b) To assess social conditions
c) To evaluate economic activities
d) To analyze traffic problems

5) What is one of the challenges faced in urban planning?
a) Rapid population growth b) Decreasing urban population
c) Increased agricultural land d) Less need for infrastructure

6) What is one of the concrete technical aspects defining 'urban'?
a) Population size
b) Cultural heritage
c) Historical significance
d) Natural resources

7) What is a characteristic of towns compared to villages?
a) Towns are smaller than villages
b) Towns are generally larger than villages
c) Towns have no local self-government
d) Towns are only found in urban areas

11) What is one of the social infrastructures affected by urbanization?
a) Transportation
b) Healthcare
c) Agriculture
d) Mining

12) What is a blighted area?
a) An area in good condition
b) Any area in deterioration regardless of its degree
c) A newly developed area
d) An area with high economic activity

13) What is one of the administrative measures for urban renewal?
a) To demolish all buildings
b) To restore the area to its original functions
c) To build new skyscrapers
d) To increase traffic congestion

14) What is a landform?
a) a type of urban structure
b) a natural feature of the solid surface of the Earth
c) a man-made construction
d) a type of vegetation in a city

d) To increase traffic congestion

5) What is a landform?
a) a type of urban structure
b) a natural feature of the solid surface of the Earth
c) a man-made construction
d) a type of vegetation in a city

6) What is the role of edges in city districts?
   a) To connect different districts
   b) To augment the tendency of districts to fragment the city
   c) To enhance the beauty of the city
   d) To provide transportation routes

7) What is the purpose of tree grates?
   a) To provide shade for pedestrians
   b) To enable water to reach the roots of a tree
   c) To decorate the planting hole
   d) To support the tree collar

8) What does the National Survey help to collect information about?
   a) Natural resources and potentialities
   b) Urban aesthetics
   c) Traffic congestion
   d) Housing conditions

9) What is the purpose of conducting a Physical Survey in town planning?
   a) To collect information for updating base maps
   b) To assess social conditions
   c) To evaluate economic activities
   d) To analyze traffic problems

10) What is one of the challenges faced in urban planning?
   a) Rapid population growth
   b) Decreasing urban population
   c) Increased agricultural land
   d) Less need for infrastructure

11) What is one of the concrete technical aspects defining 'urban'?
   a) Population size
   b) Cultural heritage
   c) Historical significance
   d) Natural resources

12) What is a characteristic of towns compared to villages?
   a) Towns are smaller than villages
   b) Towns are generally larger than villages
   c) Towns have no local self-government
   d) Towns are only found in urban areas

13) What is the population density and settlement size in rural settlements?
   a) High and large
   b) Low and small
   c) Medium and average
   d) Variable and diverse

14) What type of activities are rural settlements chiefly concerned with?
   a) Secondary activities
   b) Tertiary activities
   c) Primary activities
   d) Quaternary activities

S.Y. (B.Tech.) (Electronics & Computer Engineering) (Semester - II) (New) (CBCS) Examination: March/April – 2026
Urban Planning and Design (CIVMDM-02B)

Day & Date: Thursday, 30-04-2026 Max. Marks: 56
Time: 03:00 PM To 06:00 PM

Instructions: 1) All questions are compulsory.
2) Figures to the right indicate full marks.
3) Assume suitable data if necessary.
4) Draw neat sketch wherever necessary.

Section – I

Q.2 Attempt any four from the following. **16**

a) Describe the purpose of urban or town planning.

b) Illustrate the methods used in urban or town planning.

c) Describe the geological factors affecting urban development.

d) Explain the rural settlements.

e) Describe growth of cities & scale of cities.

f) Compare between more developed countries (MDC) & less developed countries (LDC).

Q.3 Attempt any two from the following. **12**

a) Explain the parts of the town and their relationship.

b) Describe the socio-economic consequences.

c) Illustrate the negative impacts of city growth.

Section – II

Q.4 Attempt any four from the following. **16**

a) Describe in detail urban design.

b) Write down key aspects of an urban design.

c) Define an Urban form & state types of determinants.

d) Describe the natural determinants of an urban form.

e) Illustrate survey techniques for urban aesthetics.

f) Explain townscape analysis.

Q.5 Attempt any two from the following. **12**

a) Explain various principles of an urban design.

b) Describe all the types of public spaces & explain any one in detail.

c) Describe steps to carry out visual survey and its recordings.

Instructions: 1) Q. No. 1 is compulsory. It should be solved in the first 30 minutes in Answer Book Page no 03 (Starting page of the Answer Book). Each question carries one mark.
2) Don't forget to Mention question paper set (P/Q/R/S) on top of page.
3) Figures to the right indicates full marks.
4) Make suitable assumptions if necessary and state them clearly.

MCQ/Objective Type Questions

Duration: 30 Minutes Marks:14

Q.1 Choose the correct alternative from the given options. 14

1) What is one of the challenges faced in urban planning?
a) Rapid population growth b) Decreasing urban population
c) Increased agricultural land d) Less need for infrastructure

2) What is one of the concrete technical aspects defining 'urban'?
a) Population size b) Cultural heritage
c) Historical significance d) Natural resources

3) What is a characteristic of towns compared to villages?
a) Towns are smaller than villages
b) Towns are generally larger than villages
c) Towns have no local self-government
d) Towns are only found in urban areas

4) What is the population density and settlement size in rural settlements?
a) High and large b) Low and small
c) Medium and average d) Variable and diverse

5) What type of activities are rural settlements chiefly concerned with?
a) Secondary activities b) Tertiary activities
c) Primary activities d) Quaternary activities

6) What is a consequence of overcrowding in cities?
a) Improved living conditions
b) Added pressure on physical infrastructure
c) Increased green spaces
d) Lower crime rates

7) What is one of the social infrastructures affected by urbanization?
a) Transportation
b) Healthcare
c) Agriculture
d) Mining

8) What is a blighted area?
a) An area in good condition
b) Any area in deterioration regardless of its degree
c) A newly developed area
d) An area with high economic activity

9) What is one of the administrative measures for urban renewal?
a) To demolish all buildings
b) To restore the area to its original functions
c) To build new skyscrapers
d) To increase traffic congestion

10) What is a landform?

S.Y. (B.Tech.) (Electronics and Telecommunication Engineering) (Semester - II) (New) (CBCS) Examination: March/April – 2026
Urban Planning and Design (CIVMDM-02B)

Day & Date: Thursday, 30-04-2026 Max. Marks: 70
Time: 03:00 PM To 06:00 PM

Instructions: 1) Q. No. 1 is compulsory. It should be solved in the first 30 minutes in Answer Book Page no 03 (Starting page of the Answer Book). Each question carries one mark.
2) Don't forget to Mention question paper set (P/Q/R/S) on top of page.
3) Figures to the right indicates full marks.
4) Make suitable assumptions if necessary and state them clearly.

MCQ/Objective Type Questions

Duration: 30 Minutes Marks:14

Q.1 Choose the correct alternative from the given options. 14

1) What is a blighted area?
a) An area in good condition
b) Any area in deterioration regardless of its degree
c) A newly developed area
d) An area with high economic activity

2) What is one of the administrative measures for urban renewal?
a) To demolish all buildings
b) To restore the area to its original functions
c) To build new skyscrapers
d) To increase traffic congestion

3) What is a landform?
a) a type of urban structure
b) a natural feature of the solid surface of the Earth
c) a man-made construction
d) a type of vegetation in a city

4) What is the role of edges in city districts?
a) To connect different districts
b) To augment the tendency of districts to fragment the city
c) To enhance the beauty of the city
d) To provide transportation routes

5) What is the purpose of tree grates?
a) To provide shade for pedestrians
b) To enable water to reach the roots of a tree
c) To decorate the planting hole
d) To support the tree collar

6) What does the National Survey help to collect information about?
a) Natural resources and potentialities
b) Urban aesthetics
c) Traffic congestion
d) Housing conditions

7) What is the purpose of conducting a Physical Survey in town planning?
a) To collect information for updating base maps
b) To assess social conditions
c) To evaluate economic activities
d) To analyze traffic problems

8) What is one of the challenges faced in urban planning?
a) Rapid population growth
b) Decreasing urban population
c) Increased agricultural land
d) Less need for infrastructure

9) What is one of the concrete technical aspects defining 'urban'?
a) Population size
b) Cultural heritage
c) Historical significance
d) Natural resources

10) What is a characteristic of towns compared to villages?
a) Towns are smaller than villages
b) Towns are generally larger than villages
c) Towns have no local self-government
d) Towns are only found in urban areas

11) What is the population density and settlement size in rural settlements?
a) High and large
b) Low and small
c) Medium and average
d) Variable and diverse

12) What type of activities are rural settlements chiefly concerned with?
a) Secondary activities
b) Tertiary activities
c) Primary activities
d) Quaternary activities

13) What is a consequence of overcrowding in cities?
a) Improved living conditions
b) Added pressure on physical infrastructure
c) Increased green spaces
d) Lower crime rates

14) What is one of the social infrastructures affected by urbanization?
a) Transportation
b) Healthcare
c) Agriculture
d) Mining

Seat No.	

Set **Q**

S.Y. (B.Tech.) (Electronics and Telecommunication Engineering) (Semester - II) (New) (CBCS) Examination: March/April – 2026
Urban Planning and Design (CIVMDM-02B)

Day & Date: Thursday, 30-04-2026 Max. Marks: 56
Time: 03:00 PM To 06:00 PM

Instructions: 1) All questions are compulsory.
2) Figures to the right indicate full marks.
3) Assume suitable data if necessary.
4) Draw neat sketch wherever necessary.

Section – I

Q.2 Attempt any four from the following. **16**

a) Describe the purpose of urban or town planning.
b) Illustrate the methods used in urban or town planning.
c) Describe the geological factors affecting urban development.
d) Explain the rural settlements.
e) Describe growth of cities & scale of cities.
f) Compare between more developed countries (MDC) & less developed countries (LDC).

Q.3 Attempt any two from the following. **12**

a) Explain the parts of the town and their relationship.
b) Describe the socio-economic consequences.
c) Illustrate the negative impacts of city growth.

Section – II

Q.4 Attempt any four from the following. **16**

a) Describe in detail urban design.
b) Write down key aspects of an urban design.
c) Define an Urban form & state types of determinants.
d) Describe the natural determinants of an urban form.
e) Illustrate survey techniques for urban aesthetics.
f) Explain townscape analysis.

Q.5 Attempt any two from the following. **12**

a) Explain various principles of an urban design.
b) Describe all the types of public spaces & explain any one in detail.
c) Describe steps to carry out visual survey and its recordings.

Seat No.

MCQ/Objective Type Questions

Duration: 30 Minutes Marks:14

Q.1 Choose the correct Alternatives. **14**

1) In fibre reinforced composite the primary function of the matrix is to _____.
a) Carries a load entirely
b) Protect fibres and transfer stress
c) Increase density
d) Act as lubricant

2) Carbon fibre is most commonly in _____.
a) Polymer Matri0078 b) Material Matric
c) Rubber Matric d) Wooden Matrix

3) The main disadvantage of composite is _____.
a) Difficult in repair b) Higher strength weight ratio
c) Higher heat resistance d) Lower thermal properties

4) The size range of Nano material is typically _____.
a) 1nm - 100nm b) 100nm - 1000nm
c) 1μm - 100μm d) 0.1nm - 10nm

5) The high surface to volume ratio in nano material result in _____.
a) Lower chemical reactivity b) High chemical reactivity
c) No effect on reactivity d) Decreased strength

6) Carbon nano tubes (CNT) complete are mainly composed of _____.
a) Graphite sheets rolled into cylinder
b) Diamond clusters
c) Fullerene spheres
d) Graphene Nano ribbons

7) Which material is commonly used as dielectric in capacitor?
a) Copper b) Mica
c) Silicon d) Iron

8) The Curie temperature is related to _____.
a) Ferroelectric material b) Ferromagnetic materials
c) Semiconductor d) Dielectric materials

9) The fuel commonly used in nuclear reactor is _____.
a) Thorium 232 b) Uranium 235
c) Platinum 239 d) Uranium 236

10) Superconductor exhibit which magnetic property below critical temperature _____.
a) Ferromagnetism b) Perfect diamagnetism
c) Paramagnetic d) None of these

11) Which of the following is a soft magnetic material?
a) Steel b) Silicon iron
c) Cobalt d) Alnico

12) CMOS technology is widely used in _____.
a) Power generation b) Microcontroller
c) Chemical reactions d) Increase conductivity

13) Saturation magnetization refers to _____.
a) Maximum magnetic field b) Minimum magnetic field
c) Zero magnetization d) High resistance

14) What is a nanofluid?
a) Solid fluid b) Fluid with nanoparticles
c) Gas like fluid d) Pure liquid

SECTION – I

Q.2 Attempt Any Two Questions.

a) What is the need for composite materials in engineering application? discuss their advantages and limitation. **05**

b) Explain in brief MMC, CMC, and PMC. **05**

c) Explain in brief anyone method of manufacturing composite materials. **05**

Q.3 Attempt Any Two Questions.

a) Explain in brief history and development of Nanotechnology and unique properties of Nanomaterial. **05**

b) Explained in brief synthesis of Non material top down and bottom of approaches. **05**

c) What are non-materials? Give their different types based on particle size, Nano wires, Nano tubes and thin film. **05**

Q.4 Write short notes on. (Any Two)

a) Application of Nanomaterial in various field **04**

b) Testing of composite materials **04**

c) Lithography and chemical vapour depositions **04**

SECTION – II

Q.5 Attempt Any Two Questions.

a) Explain PIEZO electric material. Where are they used in electronic devices? **05**

b) Discuss the dielectric polarization mechanism in the insulating material. **05**

c) What are compound semiconductor? Explain GaAs and its application. **05**

Q.6 Attempt Any Two Questions.

a) Define the magnetic material. Classified them based on their magnetic properties. **05**

b) Explain the difference between diamagnetic, paramagnetic, ferromagnetic, anti-ferromagnetic, ferromagnetic materials with example. **05**

c) What is magnetism ability how does it very from different types of magnetic material? **05**

Q.7 Attempt Any Two Questions.

a) Explain the essential property that a material must possesses to be used in a nuclear reactor. **04**

b) Discuss the classification of material into fuel materials moderate materials control material with example. **04**

c) Describe the concept of neutron economy and explain how nuclear material influence it. **04**

Materials for Technology Development (MECHMDM-02A)

Day & Date: Thursday, 30-04-2026 Max. Marks: 56
Time: 03:00 PM To 06:00 PM

Instructions: 1) All questions are compulsory.
2) Figures to the right indicate full marks.
3) Draw neat and proper diagram wherever necessary.

SECTION – I

Q.2 Attempt Any Two Questions.

a) What is the need for composite materials in engineering application? discuss their advantages and limitation. **05**

b) Explain in brief MMC, CMC, and PMC. **05**

c) Explain in brief anyone method of manufacturing composite materials. **05**

Q.3 Attempt Any Two Questions.

a) Explain in brief history and development of Nanotechnology and unique properties of Nanomaterial. **05**

b) Explained in brief synthesis of Non material top down and bottom of approaches **05**

c) What are non-materials? Give their different types based on particle size, Nano wires, Nano tubes and thin film. **05**

Q.4 Write short notes on. (Any Two)

a) Application of Nanomaterial in various field **04**

b) Testing of composite materials **04**

c) Lithography and chemical vapour depositions **04**

SECTION – II

Q.5 Attempt Any Two Questions.

a) Explain PIEZO electric material. Where are they used in electronic devices? **05**

b) Discuss the dielectric polarization mechanism in the insulating material. **05**

c) What are compound semiconductor? Explain GaAs and its application. **05**

Q.6 Attempt Any Two Questions.

a) Define the magnetic material. Classified them based on their magnetic properties. **05**

b) Explain the difference between diamagnetic, paramagnetic, ferromagnetic, anti-ferromagnetic, ferromagnetic materials with example. **05**

c) What is magnetism ability how does it very from different types of magnetic material? **05**

Q.7 Attempt Any Two Questions.

a) Explain the essential property that a material must possesses to be used in a nuclear reactor. **04**

b) Discuss the classification of material into fuel materials moderate materials control material with example. **04**

c) Describe the concept of neutron economy and explain how nuclear material influence it. **04**

Seat No.		Set	S

S.Y. (B.Tech.) (Civil Engineering) (Semester - II) (New) (CBCS)
Examination: March/April – 2026
Materials for Technology Development (MECHMDM-02A)

Day & Date: Thursday, 30-04-2026 Max. Marks: 70
Time: 03:00 PM To 06:00 PM

Instructions: 1) Q. No. 1 is compulsory. It should be solved in the first 30 minutes in Answer Book Page no 03 (Starting page of the Answer Book). Each question carries one mark.
2) Don't forget to Mention question paper set (P/Q/R/S) on top of page.
3) Figures to the right indicates full marks.
4) Draw neat and proper diagram wherever necessary.

MCQ/Objective Type Questions

Duration: 30 Minutes Marks:14

Q.1 Choose the correct Alternatives. **14**

1) Carbon nano tubes (CNT) complete are mainly composed of _____.
a) Graphite sheets rolled into cylinder
b) Diamond clusters
c) Fullerene spheres
d) Graphene Nano ribbons

2) Which material is commonly used as dielectric in capacitor?
a) Copper b) Mica
c) Silicon d) Iron

3) The Curie temperature is related to _____.
a) Ferroelectric material b) Ferromagnetic materials
c) Semiconductor d) Dielectric materials

4) The fuel commonly used in nuclear reactor is _____.
a) Thorium 232 b) Uranium 235
c) Platinum 239 d) Uranium 236

5) Superconductor exhibit which magnetic property below critical temperature _____.
a) Ferromagnetism b) Perfect diamagnetism
c) Paramagnetic d) None of these

6) Which of the following is a soft magnetic material?
a) Steel b) Silicon iron
c) Cobalt d) Alnico

7) CMOS technology is widely used in _____.
a) Power generation
b) Microcontroller
c) Chemical reactions
d) Increase conductivity

8) Saturation magnetization refers to _____.
a) Maximum magnetic field
b) Minimum magnetic field
c) Zero magnetization
d) High resistance

9) What is a nanofluid?
a) Solid fluid
b) Fluid with nanoparticles
c) Gas like fluid
d) Pure liquid

10) In fibre reinforced composite the primary function of the matrix is to _____.
a) Carries a load entirely
b) Protect fibres and transfer stress
c) Increase density
d) Act as lubricant

11) Carbon fibre is most commonly in _____.
a) Polymer Matri0078
b) Material Matric
c) Rubber Matric
d) Wooden Matrix

12) The main disadvantage of composite is _____.
a) Difficult in repair
b) Higher strength weight ratio
c) Higher heat resistance
d) Lower thermal properties

13) The size range of Nano material is typically _____.
a) 1nm - 100nm
b) 100nm - 1000nm
c) 1μm - 100μm
d) 0.1nm - 10nm

14) The high surface to volume ratio in nano material result in _____.
a) Lower chemical reactivity
b) High chemical reactivity
c) No effect on reactivity
d) Decreased strength

Duration: 30 Minutes Marks:14

Q.1 Choose the correct Alternatives. **14**

1) In fibre reinforced composite the primary function of the matrix is to _____.
a) Carries a load entirely
b) Protect fibres and transfer stress
c) Increase density
d) Act as lubricant

2) Carbon fibre is most commonly in _____.
a) Polymer Matri0078 b) Material Matric
c) Rubber Matric d) Wooden Matrix

3) The main disadvantage of composite is _____.
a) Difficult in repair b) Higher strength weight ratio
c) Higher heat resistance d) Lower thermal properties

4) The size range of Nano material is typically _____.
a) 1nm - 100nm b) 100nm - 1000nm
c) 1μm - 100μm d) 0.1nm - 10nm

5) The high surface to volume ratio in nano material result in _____.
a) Lower chemical reactivity b) High chemical reactivity
c) No effect on reactivity d) Decreased strength

6) Carbon nano tubes (CNT) complete are mainly composed of _____.
a) Graphite sheets rolled into cylinder
b) Diamond clusters
c) Fullerene spheres
d) Graphene Nano ribbons

7) Which material is commonly used as dielectric in capacitor?
a) Copper b) Mica
c) Silicon d) Iron

8) The Curie temperature is related to _____.
a) Ferroelectric material b) Ferromagnetic materials
c) Semiconductor d) Dielectric materials

9) The fuel commonly used in nuclear reactor is _____.
a) Thorium 232 b) Uranium 235
c) Platinum 239 d) Uranium 236

10) Superconductor exhibit which magnetic property below critical temperature _____.
a) Ferromagnetism b) Perfect diamagnetism
c) Paramagnetic d) None of these

11) Which of the following is a soft magnetic material?
a) Steel b) Silicon iron
c) Cobalt d) Alnico

12) CMOS technology is widely used in _____.
a) Power generation b) Microcontroller
c) Chemical reactions d) Increase conductivity

13) Saturation magnetization refers to _____.
a) Maximum magnetic field b) Minimum magnetic field
c) Zero magnetization d) High resistance

14) What is a nanofluid?
a) Solid fluid b) Fluid with nanoparticles
c) Gas like fluid d) Pure liquid

S.Y. (B.Tech.) (Electronics & Computer Engineering) (Semester - II) (New) (CBCS) Examination: March/April – 2026
Materials for Technology Development (MECHMDM-02A)

Day & Date: Thursday, 30-04-2026 Max. Marks: 56
Time: 03:00 PM To 06:00 PM

Instructions: 1) All questions are compulsory.
2) Figures to the right indicate full marks.
3) Draw neat and proper diagram wherever necessary.

SECTION – I

Q.2 Attempt Any Two Questions.

a) What is the need for composite materials in engineering application? discuss their advantages and limitation. **05**

b) Explain in brief MMC, CMC, and PMC. **05**

c) Explain in brief anyone method of manufacturing composite materials. **05**

Q.3 Attempt Any Two Questions.

a) Explain in brief history and development of Nanotechnology and unique properties of Nanomaterial. **05**

b) Explained in brief synthesis of Non material top down and bottom of approaches. **05**

c) What are non-materials? Give their different types based on particle size, Nano wires, Nano tubes and thin film. **05**

Q.4 Write short notes on. (Any Two)

a) Application of Nanomaterial in various field **04**

b) Testing of composite materials **04**

c) Lithography and chemical vapour depositions **04**

SECTION – II

Q.5 Attempt Any Two Questions.

a) Explain PIEZO electric material. Where are they used in electronic devices? **05**

b) Discuss the dielectric polarization mechanism in the insulating material. **05**

c) What are compound semiconductor? Explain GaAs and its application. **05**

Q.6 Attempt Any Two Questions.

a) Define the magnetic material. Classified them based on their magnetic properties. **05**

b) Explain the difference between diamagnetic, paramagnetic, ferromagnetic, anti-ferromagnetic, ferromagnetic materials with example. **05**

c) What is magnetism ability how does it very from different types of magnetic material? **05**

Q.7 Attempt Any Two Questions.

a) Explain the essential property that a material must possesses to be used in a nuclear reactor. **04**

b) Discuss the classification of material into fuel materials moderate materials control material with example. **04**

c) Describe the concept of neutron economy and explain how nuclear material influence it. **04**

SECTION – I

Q.2 Attempt Any Two Questions.

a) What is the need for composite materials in engineering application? discuss their advantages and limitation. **05**

b) Explain in brief MMC, CMC, and PMC. **05**

c) Explain in brief anyone method of manufacturing composite materials. **05**

Q.3 Attempt Any Two Questions.

a) Explain in brief history and development of Nanotechnology and unique properties of Nanomaterial. **05**

b) Explained in brief synthesis of Non material top down and bottom of approaches. **05**

c) What are non-materials? Give their different types based on particle size, Nano wires, Nano tubes and thin film. **05**

Q.4 Write short notes on. (Any Two)

a) Application of Nanomaterial in various field **04**

b) Testing of composite materials **04**

c) Lithography and chemical vapour depositions **04**

SECTION – II

Q.5 Attempt Any Two Questions.

a) Explain PIEZO electric material. Where are they used in electronic devices? **05**

b) Discuss the dielectric polarization mechanism in the insulating material. **05**

c) What are compound semiconductor? Explain GaAs and its application. **05**

Q.6 Attempt Any Two Questions.

a) Define the magnetic material. Classified them based on their magnetic properties. **05**

b) Explain the difference between diamagnetic, paramagnetic, ferromagnetic, anti-ferromagnetic, ferromagnetic materials with example. **05**

c) What is magnetism ability how does it very from different types of magnetic material? **05**

Q.7 Attempt Any Two Questions.

a) Explain the essential property that a material must possesses to be used in a nuclear reactor. **04**

b) Discuss the classification of material into fuel materials moderate materials control material with example. **04**

c) Describe the concept of neutron economy and explain how nuclear material influence it. **04**

Set **R**

S.Y. (B.Tech.) (Electrical Engineering) (Semester - II) (New) (CBCS)
Examination: March/April – 2026
Materials for Technology Development (MECHMDM-02A)

Day & Date: Thursday, 30-04-2026 Max. Marks: 70
Time: 03:00 PM To 06:00 PM

Instructions: 1) Q. No. 1 is compulsory. It should be solved in the first 30 minutes in Answer Book Page no 03 (Starting page of the Answer Book). Each question carries one mark.
2) Don't forget to Mention question paper set (P/Q/R/S) on top of page.
3) Figures to the right indicates full marks.
4) Draw neat and proper diagram wherever necessary.

MCQ/Objective Type Questions

Duration: 30 Minutes Marks:14

Q.1 Choose the correct Alternatives. **14**

1) Which of the following is a soft magnetic material?
a) Steel b) Silicon iron
c) Cobalt d) Alnico

2) CMOS technology is widely used in _____.
a) Power generation b) Microcontroller
c) Chemical reactions d) Increase conductivity

3) Saturation magnetization refers to _____.
a) Maximum magnetic field b) Minimum magnetic field
c) Zero magnetization d) High resistance

4) What is a nanofluid?
a) Solid fluid b) Fluid with nanoparticles
c) Gas like fluid d) Pure liquid

5) In fibre reinforced composite the primary function of the matrix is to _____.
a) Carries a load entirely
b) Protect fibres and transfer stress
c) Increase density
d) Act as lubricant

6) Carbon fibre is most commonly in _____.
a) Polymer Matri0078 b) Material Matric
c) Rubber Matric d) Wooden Matrix

7) The main disadvantage of composite is _____.
a) Difficult in repair
b) Higher strength weight ratio
c) Higher heat resistance
d) Lower thermal properties

8) The size range of Nano material is typically _____.
a) 1nm - 100nm
b) 100nm - 1000nm
c) 1μm - 100μm
d) 0.1nm - 10nm

9) The high surface to volume ratio in nano material result in _____.
a) Lower chemical reactivity
b) High chemical reactivity
c) No effect on reactivity
d) Decreased strength

10) Carbon nano tubes (CNT) complete are mainly composed of _____.
a) Graphite sheets rolled into cylinder
b) Diamond clusters
c) Fullerene spheres
d) Graphene Nano ribbons

11) Which material is commonly used as dielectric in capacitor?
a) Copper
b) Mica
c) Silicon
d) Iron

12) The Curie temperature is related to _____.
a) Ferroelectric material
b) Ferromagnetic materials
c) Semiconductor
d) Dielectric materials

13) The fuel commonly used in nuclear reactor is _____.
a) Thorium 232
b) Uranium 235
c) Platinum 239
d) Uranium 236

14) Superconductor exhibit which magnetic property below critical temperature _____.
a) Ferromagnetism
b) Perfect diamagnetism
c) Paramagnetic
d) None of these

c) Semiconductor d) Dielectric materials

4) The fuel commonly used in nuclear reactor is _____.
a) Thorium 232 b) Uranium 235
c) Platinum 239 d) Uranium 236

5) Superconductor exhibit which magnetic property below critical temperature _____.
a) Ferromagnetism b) Perfect diamagnetism
c) Paramagnetic d) None of these

6) Which of the following is a soft magnetic material?
a) Steel b) Silicon iron
c) Cobalt d) Alnico

7) CMOS technology is widely used in _____.
a) Power generation
b) Microcontroller
c) Chemical reactions
d) Increase conductivity

8) Saturation magnetization refers to _____.
a) Maximum magnetic field
b) Minimum magnetic field
c) Zero magnetization
d) High resistance

9) What is a nanofluid?
a) Solid fluid
b) Fluid with nanoparticles
c) Gas like fluid
d) Pure liquid

10) In fibre reinforced composite the primary function of the matrix is to _____.
a) Carries a load entirely
b) Protect fibres and transfer stress
c) Increase density
d) Act as lubricant

11) Carbon fibre is most commonly in _____.
a) Polymer Matri0078
b) Material Matric
c) Rubber Matric
d) Wooden Matrix

12) The main disadvantage of composite is _____.
a) Difficult in repair
b) Higher strength weight ratio
c) Higher heat resistance
d) Lower thermal properties

13) The size range of Nano material is typically _____.
a) 1nm - 100nm
b) 100nm - 1000nm
c) 1μm - 100μm
d) 0.1nm - 10nm

14) The high surface to volume ratio in nano material result in _____.
a) Lower chemical reactivity
b) High chemical reactivity
c) No effect on reactivity
d) Decreased strength

Set **S**

S.Y. (B.Tech.) (Electronics and Telecommunication Engineering) (Semester - II) (New) (CBCS) Examination: March/April – 2026
Materials for Technology Development (MECHMDM-02A)

Day & Date: Thursday, 30-04-2026 Max. Marks: 56
Time: 03:00 PM To 06:00 PM

Instructions: 1) All questions are compulsory.
2) Figures to the right indicate full marks.
3) Draw neat and proper diagram wherever necessary.

SECTION – I

Q.2 Attempt Any Two Questions.

a) What is the need for composite materials in engineering application? discuss their advantages and limitation. **05**

b) Explain in brief MMC, CMC, and PMC. **05**

c) Explain in brief anyone method of manufacturing composite materials. **05**

Q.3 Attempt Any Two Questions.

a) Explain in brief history and development of Nanotechnology and unique properties of Nanomaterial. **05**

b) Explained in brief synthesis of Non material top down and bottom of approaches. **05**

c) What are non-materials? Give their different types based on particle size, Nano wires, Nano tubes and thin film. **05**

Q.4 Write short notes on. (Any Two)

a) Application of Nanomaterial in various field **04**

b) Testing of composite materials **04**

c) Lithography and chemical vapour depositions **04**

SECTION – II

Q.5 Attempt Any Two Questions.

a) Explain PIEZO electric material. Where are they used in electronic devices? **05**

b) Discuss the dielectric polarization mechanism in the insulating material. **05**

c) What are compound semiconductor? Explain GaAs and its application. **05**

Q.6 Attempt Any Two Questions.

a) Define the magnetic material. Classified them based on their magnetic properties. **05**

b) Explain the difference between diamagnetic, paramagnetic, ferromagnetic, anti-ferromagnetic, ferromagnetic materials with example. **05**

c) What is magnetism ability how does it very from different types of magnetic material? **05**

Q.7 Attempt Any Two Questions.

a) Explain the essential property that a material must possesses to be used in a nuclear reactor. **04**

b) Discuss the classification of material into fuel materials moderate materials control material with example. **04**

c) Describe the concept of neutron economy and explain how nuclear material influence it. **04**

Day & Date: Thursday, 30-04-2026 Max. Marks: 70
Time: 03:00 PM To 06:00 PM

Instructions: 1) Q. No. 1 is compulsory. It should be solved in the first 30 minutes in Answer Book Page no 03 (Starting page of the Answer Book). Each question carries one mark.
2) Don't forget to Mention question paper set (P/Q/R/S) on top of page.
3) Figures to the right indicates full marks.
4) Draw neat and proper diagram wherever necessary.

MCQ/Objective Type Questions

Duration: 30 Minutes Marks:14

Q.1 Choose the correct Alternatives. **14**

1) In fibre reinforced composite the primary function of the matrix is to _____.
a) Carries a load entirely
b) Protect fibres and transfer stress
c) Increase density
d) Act as lubricant

2) Carbon fibre is most commonly in _____.
a) Polymer Matri0078 b) Material Matric
c) Rubber Matric d) Wooden Matrix

3) The main disadvantage of composite is _____.
a) Difficult in repair b) Higher strength weight ratio
c) Higher heat resistance d) Lower thermal properties

4) The size range of Nano material is typically _____.
a) 1nm - 100nm b) 100nm - 1000nm
c) 1μm - 100μm d) 0.1nm - 10nm

5) The high surface to volume ratio in nano material result in _____.
a) Lower chemical reactivity b) High chemical reactivity
c) No effect on reactivity d) Decreased strength

6) Carbon nano tubes (CNT) complete are mainly composed of _____.
a) Graphite sheets rolled into cylinder
b) Diamond clusters
c) Fullerene spheres
d) Graphene Nano ribbons

7) Which material is commonly used as dielectric in capacitor?
a) Copper b) Mica
c) Silicon d) Iron

8) The Curie temperature is related to _____.
a) Ferroelectric material b) Ferromagnetic materials
c) Semiconductor d) Dielectric materials

9) The fuel commonly used in nuclear reactor is _____.
a) Thorium 232 b) Uranium 235
c) Platinum 239 d) Uranium 236

10) Superconductor exhibit which magnetic property below critical temperature _____.

Production and Operation Management (MECHMDM-02B)

Day & Date: Thursday, 30-04-2026 Max. Marks: 70
Time: 03:00 PM To 06:00 PM

Instructions: 1) Q. No. 1 is compulsory. It should be solved in the first 30 minutes in Answer Book Page no 03 (Starting page of the Answer Book). Each question carries one mark.
2) Don't forget to Mention question paper set (P/Q/R/S) on top of page.
3) Figures to the right indicates full marks.
4) Assume suitable data if necessary and mention it clearly.

MCQ/Objective Type Questions

Duration: 30 Minutes Marks:14

Q.1 Choose the correct Answer. **14**

1) Production Management is primarily concerned with _____.
a) Marketing activities
b) Financial planning
c) Conversion of inputs into outputs
d) Human resource training

2) Which of the following is NOT an objective of Production Management?
a) Cost reduction b) Quality improvement
c) Profit maximization directly d) Efficient resource utilization

3) Forecasting is mainly used to _____.
a) Reduce labor cost b) Predict future demand
c) Improve product design d) Control inventory manually

4) Moving average method is classified under _____.
a) Qualitative forecasting b) Judgmental method
c) Quantitative forecasting d) Simulation method

5) The main objective of PPC is _____.
a) Increase marketing share b) Ensure smooth production flow
c) Reduce employee turnover d) Increase sales revenue

6) Routing in PPC refers to _____.
a) Scheduling work b) Path followed by materials
c) Assigning jobs to machines d) Dispatching orders

7) Line balancing is used to _____.
a) Reduce cost of materials
b) Balance workload among workstations
c) Improve forecasting accuracy
d) Control inventory

8) Inventory refers to _____.
a) Finished goods only
b) Raw materials only
c) Stock of items used in production and sales
d) Machines in factory

9) The primary objective of inventory management is to _____.
a) Maximize stock levels
b) Minimize cost and ensure availability
c) Eliminate storage
d) Increase labor efficiency

10) Maintenance is defined as _____.
a) Production of goods
b) Repair and upkeep of equipment
c) Marketing activity
d) Financial control

11) Preventive maintenance is carried out _____.
a) After breakdown b) Before breakdown
c) During breakdown d) Never planned

12) Value Engineering aims to _____.
a) Increase cost b) Improve value by reducing cost
c) Reduce quality d) Increase labor

13) JIT (Just-In-Time) system focuses on _____.
a) Large inventory b) Zero inventory
c) Producing only when needed d) Increasing waste

14) Six Sigma is a technique used for _____.
a) Increasing defects
b) Quality improvement and defect reduction
c) Inventory control
d) Marketing strategy

Set **Q**

S.Y. (B.Tech.) (Civil Engineering) (Semester - II) (New) (CBCS)
Examination: March/April – 2026
Production and Operation Management (MECHMDM-02B)

Day & Date: Thursday, 30-04-2026 Max. Marks: 70
Time: 03:00 PM To 06:00 PM

Instructions: 1) Q. No. 1 is compulsory. It should be solved in the first 30 minutes in Answer Book Page no 03 (Starting page of the Answer Book). Each question carries one mark.
2) Don't forget to Mention question paper set (P/Q/R/S) on top of page.
3) Figures to the right indicates full marks.
4) Assume suitable data if necessary and mention it clearly.

MCQ/Objective Type Questions

Duration: 30 Minutes Marks:14

Q.1 Choose the correct Answer. **14**

1) Inventory refers to _____.
a) Finished goods only
b) Raw materials only
c) Stock of items used in production and sales
d) Machines in factory

2) The primary objective of inventory management is to _____.
a) Maximize stock levels
b) Minimize cost and ensure availability
c) Eliminate storage
d) Increase labor efficiency

3) Maintenance is defined as _____.
a) Production of goods
b) Repair and upkeep of equipment
c) Marketing activity
d) Financial control

4) Preventive maintenance is carried out _____.
a) After breakdown b) Before breakdown
c) During breakdown d) Never planned

5) Value Engineering aims to _____.
a) Increase cost b) Improve value by reducing cost
c) Reduce quality d) Increase labor

6) JIT (Just-In-Time) system focuses on _____.
a) Large inventory b) Zero inventory
c) Producing only when needed d) Increasing waste

7) Six Sigma is a technique used for _____.
a) Increasing defects
b) Quality improvement and defect reduction
c) Inventory control
d) Marketing strategy

8) Production Management is primarily concerned with _____.
a) Marketing activities
b) Financial planning
c) Conversion of inputs into outputs
d) Human resource training

9) Which of the following is NOT an objective of Production Management?
a) Cost reduction
b) Quality improvement
c) Profit maximization directly
d) Efficient resource utilization

10) Forecasting is mainly used to _____.
a) Reduce labor cost
b) Predict future demand
c) Improve product design
d) Control inventory manually

11) Moving average method is classified under _____.
a) Qualitative forecasting
b) Judgmental method
c) Quantitative forecasting
d) Simulation method

12) The main objective of PPC is _____.
a) Increase marketing share
b) Ensure smooth production flow
c) Reduce employee turnover
d) Increase sales revenue

13) Routing in PPC refers to _____.
a) Scheduling work
b) Path followed by materials
c) Assigning jobs to machines
d) Dispatching orders

14) Line balancing is used to _____.
a) Reduce cost of materials
b) Balance workload among workstations
c) Improve forecasting accuracy
d) Control inventory

S.Y. (B.Tech.) (Civil Engineering) (Semester - II) (New) (CBCS)
Examination: March/April – 2026
Production and Operation Management (MECHMDM-02B)

Day & Date: Thursday, 30-04-2026 Max. Marks: 56
Time: 03:00 PM To 06:00 PM

Instructions: 1) Attempt any two questions from each section.
2) Figures to the right indicate full marks.
3) Assume suitable data if necessary and mention it clearly.

Section – I

Q.2	**a)**	Define Production Management and explain its objectives in detail.	**07**
	b)	Compare job production and mass production with suitable examples.	**07**
Q.3	**a)**	Define forecasting and explain its need in production planning.	**07**
	b)	Describe exponential smoothing method and its applications.	**07**
Q.4	**a)**	Define Production Planning and Control (PPC) and state its objectives.	**07**
	b)	Discuss loading and sequencing with examples.	**07**

Section – II

Q.5	**a)**	Define inventory and explain its objectives in production systems.	**07**
	b)	Derive the Economic Order Quantity (EOQ) model.	**07**
Q.6	**a)**	Define plant maintenance and explain its need and importance.	**07**
	b)	Differentiate between preventive and breakdown maintenance.	**07**
Q.7	**a)**	Define Value Engineering and Value Analysis.	**07**
	b)	Describe Just-In-Time (JIT) and Kanban system.	**07**

a) Large inventory
b) Zero inventory
c) Producing only when needed
d) Increasing waste

9) Six Sigma is a technique used for _____.
a) Increasing defects
b) Quality improvement and defect reduction
c) Inventory control
d) Marketing strategy

10) Production Management is primarily concerned with _____.
a) Marketing activities
b) Financial planning
c) Conversion of inputs into outputs
d) Human resource training

11) Which of the following is NOT an objective of Production Management?
a) Cost reduction
b) Quality improvement
c) Profit maximization directly
d) Efficient resource utilization

12) Forecasting is mainly used to _____.
a) Reduce labor cost
b) Predict future demand
c) Improve product design
d) Control inventory manually

13) Moving average method is classified under _____.
a) Qualitative forecasting
b) Judgmental method
c) Quantitative forecasting
d) Simulation method

14) The main objective of PPC is _____.
a) Increase marketing share
b) Ensure smooth production flow
c) Reduce employee turnover
d) Increase sales revenue

Set **S**

S.Y. (B.Tech.) (Computer Science and Engineering) (Semester - II) (New) (CBCS) Examination: March/April – 2026
Production and Operation Management (MECHMDM-02B)

Day & Date: Thursday, 30-04-2026 Max. Marks: 56
Time: 03:00 PM To 06:00 PM

Instructions: 1) Attempt any two questions from each section.
2) Figures to the right indicate full marks.
3) Assume suitable data if necessary and mention it clearly.

Section – I

Q.2	**a)**	Define Production Management and explain its objectives in detail.	**07**
	b)	Compare job production and mass production with suitable examples.	**07**
Q.3	**a)**	Define forecasting and explain its need in production planning.	**07**
	b)	Describe exponential smoothing method and its applications.	**07**
Q.4	**a)**	Define Production Planning and Control (PPC) and state its objectives.	**07**
	b)	Discuss loading and sequencing with examples.	**07**

Section – II

Q.5	**a)**	Define inventory and explain its objectives in production systems.	**07**
	b)	Derive the Economic Order Quantity (EOQ) model.	**07**
Q.6	**a)**	Define plant maintenance and explain its need and importance.	**07**
	b)	Differentiate between preventive and breakdown maintenance.	**07**
Q.7	**a)**	Define Value Engineering and Value Analysis.	**07**
	b)	Describe Just-In-Time (JIT) and Kanban system.	**07**

S.Y. (B.Tech.) (Electronics & Computer Engineering) (Semester - II) (New) (CBCS) Examination: March/April – 2026
Production and Operation Management (MECHMDM-02B)

Day & Date: Thursday, 30-04-2026 Max. Marks: 70
Time: 03:00 PM To 06:00 PM

Instructions: 1) Q. No. 1 is compulsory. It should be solved in the first 30 minutes in Answer Book Page no 03 (Starting page of the Answer Book). Each question carries one mark.
2) Don't forget to Mention question paper set (P/Q/R/S) on top of page.
3) Figures to the right indicates full marks.
4) Assume suitable data if necessary and mention it clearly.

MCQ/Objective Type Questions

Duration: 30 Minutes Marks:14

Q.1 Choose the correct Answer. **14**

1) Production Management is primarily concerned with _____.
a) Marketing activities
b) Financial planning
c) Conversion of inputs into outputs
d) Human resource training

2) Which of the following is NOT an objective of Production Management?
a) Cost reduction b) Quality improvement
c) Profit maximization directly d) Efficient resource utilization

3) Forecasting is mainly used to _____.
a) Reduce labor cost b) Predict future demand
c) Improve product design d) Control inventory manually

4) Moving average method is classified under _____.
a) Qualitative forecasting b) Judgmental method
c) Quantitative forecasting d) Simulation method

5) The main objective of PPC is _____.
a) Increase marketing share b) Ensure smooth production flow
c) Reduce employee turnover d) Increase sales revenue

6) Routing in PPC refers to _____.
a) Scheduling work b) Path followed by materials
c) Assigning jobs to machines d) Dispatching orders

7) Line balancing is used to _____.
a) Reduce cost of materials
b) Balance workload among workstations
c) Improve forecasting accuracy
d) Control inventory

8) Inventory refers to _____.
a) Finished goods only
b) Raw materials only
c) Stock of items used in production and sales
d) Machines in factory

9) The primary objective of inventory management is to _____.
a) Maximize stock levels
b) Minimize cost and ensure availability
c) Eliminate storage
d) Increase labor efficiency

10) Maintenance is defined as _____.
a) Production of goods
b) Repair and upkeep of equipment
c) Marketing activity
d) Financial control

11) Preventive maintenance is carried out _____.
a) After breakdown b) Before breakdown
c) During breakdown d) Never planned

12) Value Engineering aims to _____.
a) Increase cost b) Improve value by reducing cost
c) Reduce quality d) Increase labor

13) JIT (Just-In-Time) system focuses on _____.
a) Large inventory b) Zero inventory
c) Producing only when needed d) Increasing waste

14) Six Sigma is a technique used for _____.
a) Increasing defects
b) Quality improvement and defect reduction
c) Inventory control
d) Marketing strategy

Set **R**

S.Y. (B.Tech.) (Electrical Engineering) (Semester - II) (New) (CBCS)
Examination: March/April – 2026
Production and Operation Management (MECHMDM-02B)

Day & Date: Thursday, 30-04-2026 Max. Marks: 70
Time: 03:00 PM To 06:00 PM

Instructions: 1) Q. No. 1 is compulsory. It should be solved in the first 30 minutes in Answer Book Page no 03 (Starting page of the Answer Book). Each question carries one mark.
2) Don't forget to Mention question paper set (P/Q/R/S) on top of page.
3) Figures to the right indicates full marks.
4) Assume suitable data if necessary and mention it clearly.

MCQ/Objective Type Questions

Duration: 30 Minutes Marks:14

Q.1 Choose the correct Answer. **14**

1) Preventive maintenance is carried out _____.
a) After breakdown b) Before breakdown
c) During breakdown d) Never planned

2) Value Engineering aims to _____.
a) Increase cost b) Improve value by reducing cost
c) Reduce quality d) Increase labor

3) JIT (Just-In-Time) system focuses on _____.
a) Large inventory b) Zero inventory
c) Producing only when needed d) Increasing waste

4) Six Sigma is a technique used for _____.
a) Increasing defects
b) Quality improvement and defect reduction
c) Inventory control
d) Marketing strategy

5) Production Management is primarily concerned with _____.
a) Marketing activities
b) Financial planning
c) Conversion of inputs into outputs
d) Human resource training

6) Which of the following is NOT an objective of Production Management?
a) Cost reduction b) Quality improvement
c) Profit maximization directly d) Efficient resource utilization

7) Forecasting is mainly used to _____.
a) Reduce labor cost b) Predict future demand
c) Improve product design d) Control inventory manually

8) Moving average method is classified under _____.
a) Qualitative forecasting b) Judgmental method
c) Quantitative forecasting d) Simulation method

9) The main objective of PPC is _____.
a) Increase marketing share b) Ensure smooth production flow
c) Reduce employee turnover d) Increase sales revenue

10) Routing in PPC refers to _____.
a) Scheduling work b) Path followed by materials
c) Assigning jobs to machines d) Dispatching orders

11) Line balancing is used to _____.
a) Reduce cost of materials
b) Balance workload among workstations
c) Improve forecasting accuracy
d) Control inventory

12) Inventory refers to _____.
a) Finished goods only
b) Raw materials only
c) Stock of items used in production and sales
d) Machines in factory

13) The primary objective of inventory management is to _____.
a) Maximize stock levels
b) Minimize cost and ensure availability
c) Eliminate storage
d) Increase labor efficiency

14) Maintenance is defined as _____.
a) Production of goods
b) Repair and upkeep of equipment
c) Marketing activity
d) Financial control

S.Y. (B.Tech.) (Electrical Engineering) (Semester - II) (New) (CBCS)
Examination: March/April – 2026
Production and Operation Management (MECHMDM-02B)

Day & Date: Thursday, 30-04-2026 Max. Marks: 56
Time: 03:00 PM To 06:00 PM

Instructions: 1) Attempt any two questions from each section.
2) Figures to the right indicate full marks.
3) Assume suitable data if necessary and mention it clearly.

Section – I

Q.2	**a)**	Define Production Management and explain its objectives in detail.	**07**
	b)	Compare job production and mass production with suitable examples.	**07**
Q.3	**a)**	Define forecasting and explain its need in production planning.	**07**
	b)	Describe exponential smoothing method and its applications.	**07**
Q.4	**a)**	Define Production Planning and Control (PPC) and state its objectives.	**07**
	b)	Discuss loading and sequencing with examples.	**07**

Section – II

Q.5	**a)**	Define inventory and explain its objectives in production systems.	**07**
	b)	Derive the Economic Order Quantity (EOQ) model.	**07**
Q.6	**a)**	Define plant maintenance and explain its need and importance.	**07**
	b)	Differentiate between preventive and breakdown maintenance.	**07**
Q.7	**a)**	Define Value Engineering and Value Analysis.	**07**
	b)	Describe Just-In-Time (JIT) and Kanban system.	**07**

a) Reduce cost of materials
b) Balance workload among workstations
c) Improve forecasting accuracy
d) Control inventory

8) Inventory refers to _____.
a) Finished goods only
b) Raw materials only
c) Stock of items used in production and sales
d) Machines in factory

9) The primary objective of inventory management is to _____.
a) Maximize stock levels
b) Minimize cost and ensure availability
c) Eliminate storage
d) Increase labor efficiency

10) Maintenance is defined as _____.
a) Production of goods
b) Repair and upkeep of equipment
c) Marketing activity
d) Financial control

11) Preventive maintenance is carried out _____.
a) After breakdown b) Before breakdown
c) During breakdown d) Never planned

12) Value Engineering aims to _____.
a) Increase cost b) Improve value by reducing cost
c) Reduce quality d) Increase labor

13) JIT (Just-In-Time) system focuses on _____.
a) Large inventory b) Zero inventory
c) Producing only when needed d) Increasing waste

14) Six Sigma is a technique used for _____.
a) Increasing defects
b) Quality improvement and defect reduction
c) Inventory control
d) Marketing strategy

Set P

S.Y. (B.Tech.) (Mechanical Engineering) (Semester - II) (New) (CBCS)
Examination: March/April – 2026
Production and Operation Management (MECHMDM-02B)

Day & Date: Thursday, 30-04-2026 Max. Marks: 56
Time: 03:00 PM To 06:00 PM

Instructions: 1) Attempt any two questions from each section.
2) Figures to the right indicate full marks.
3) Assume suitable data if necessary and mention it clearly.

Section – I

Q.2	**a)**	Define Production Management and explain its objectives in detail.	**07**
	b)	Compare job production and mass production with suitable examples.	**07**
Q.3	**a)**	Define forecasting and explain its need in production planning.	**07**
	b)	Describe exponential smoothing method and its applications.	**07**
Q.4	**a)**	Define Production Planning and Control (PPC) and state its objectives.	**07**
	b)	Discuss loading and sequencing with examples.	**07**

Section – II

Q.5	**a)**	Define inventory and explain its objectives in production systems.	**07**
	b)	Derive the Economic Order Quantity (EOQ) model.	**07**
Q.6	**a)**	Define plant maintenance and explain its need and importance.	**07**
	b)	Differentiate between preventive and breakdown maintenance.	**07**
Q.7	**a)**	Define Value Engineering and Value Analysis.	**07**
	b)	Describe Just-In-Time (JIT) and Kanban system.	**07**

Set **Q**

S.Y. (B.Tech.) (Mechanical Engineering) (Semester - II) (New) (CBCS)
Examination: March/April – 2026
Production and Operation Management (MECHMDM-02B)

Day & Date: Thursday, 30-04-2026 Max. Marks: 70
Time: 03:00 PM To 06:00 PM

Instructions: 1) Q. No. 1 is compulsory. It should be solved in the first 30 minutes in Answer Book Page no 03 (Starting page of the Answer Book). Each question carries one mark.
2) Don't forget to Mention question paper set (P/Q/R/S) on top of page.
3) Figures to the right indicates full marks.
4) Assume suitable data if necessary and mention it clearly.

MCQ/Objective Type Questions

Duration: 30 Minutes Marks:14

Q.1 Choose the correct Answer. **14**

1) Inventory refers to _____.
a) Finished goods only
b) Raw materials only
c) Stock of items used in production and sales
d) Machines in factory

2) The primary objective of inventory management is to _____.
a) Maximize stock levels
b) Minimize cost and ensure availability
c) Eliminate storage
d) Increase labor efficiency

3) Maintenance is defined as _____.
a) Production of goods
b) Repair and upkeep of equipment
c) Marketing activity
d) Financial control

4) Preventive maintenance is carried out _____.
a) After breakdown b) Before breakdown
c) During breakdown d) Never planned

5) Value Engineering aims to _____.
a) Increase cost b) Improve value by reducing cost
c) Reduce quality d) Increase labor

6) JIT (Just-In-Time) system focuses on _____.
a) Large inventory b) Zero inventory
c) Producing only when needed d) Increasing waste

7) Six Sigma is a technique used for _____.
a) Increasing defects
b) Quality improvement and defect reduction
c) Inventory control
d) Marketing strategy

8) Production Management is primarily concerned with _____.
a) Marketing activities
b) Financial planning
c) Conversion of inputs into outputs
d) Human resource training

9) Which of the following is NOT an objective of Production Management?
a) Cost reduction
b) Quality improvement
c) Profit maximization directly
d) Efficient resource utilization

10) Forecasting is mainly used to _____.
a) Reduce labor cost
b) Predict future demand
c) Improve product design
d) Control inventory manually

11) Moving average method is classified under _____.
a) Qualitative forecasting
b) Judgmental method
c) Quantitative forecasting
d) Simulation method

12) The main objective of PPC is _____.
a) Increase marketing share
b) Ensure smooth production flow
c) Reduce employee turnover
d) Increase sales revenue

13) Routing in PPC refers to _____.
a) Scheduling work
b) Path followed by materials
c) Assigning jobs to machines
d) Dispatching orders

14) Line balancing is used to _____.
a) Reduce cost of materials
b) Balance workload among workstations
c) Improve forecasting accuracy
d) Control inventory

MCQ/Objective Type Questions

Duration: 30 Minutes Marks:14

Q.1 Answer the following Objective Type Questions. 14

1) 8051 has RAM of _____.
a) 128 bytes b) 256 bytes
c) 64 bytes d) 512 bytes

2) 8051 Microcontroller has how many 16 bit registers?
a) 2 b) 3
c) 1 d) 0

3) How are the status of the carry, auxiliary carry and parity flag affected if the write instruction
MOV A, #9C
ADD A, #64H
a) CY=0, AC=0, P=0 b) CY=1, AC=1, P=0
c) CY=0, AC=1, P=0 d) CY=1, AC=1, P=1

4) Which architecture provides separate buses for program and data memory?
a) Harvard architecture b) Von Neumann architecture
c) None of the mentioned d) All of the mentioned

5) What is the function of the TMOD register?
a) TMOD register is used to set various operation modes of timer/counter
b) TMOD register is used to load the count of the tinier
c) Is the destination or the final register where the result is obtained after the operation of the timer
d) Is used to interrupt the timer

6) The 8051 has _____ 16-bit counter/timers.
a) 1 b) 2
c) 3 d) 4

7) The 8051 can handle _____ interrupt sources.
a) 3 b) 4
c) 5 d) 6

8) An alternate function of port pin P3.1 in the 8051 is _____.
a) serial port input b) serial port output
c) memories write strobe d) memory read strobe

9) The I/O ports that are used as address and data for external memory are _____.
a) Ports 1 and 2 b) Ports 1 and 3
c) Ports 0 and 2 d) Ports 0 and 3

10) Which register is used to make the interrupt level or an edge triggered pulse?
a) TCON b) IE
c) IPR d) SCON

11) In 8051 which interrupt has highest priority?
a) IE1 b) TF0
c) IE0 d) TF1

12) The total external data memory that can be interfaced to the 8051 is _____.
a) 32K b) 64K
c) 128K d) 256K

13) What is the address range of SFR Register bank?
a) 00H-77H b) 40H-80H
c) 80H-7FH d) 80H-FFH

14) Which pin of the LCD is used for adjusting its contrast?
a) Pin no 1 b) Pin no 2
c) Pin no 3 d) Pin no 4

Time: 03:00 PM To 06:00 PM

Instructions: 1) All questions are compulsory.
2) Figures to the right indicate full marks.

SECTION – I

Q.2 Solve Any Four. **16**

a) Explain difference between Microprocessor and Microcontroller in detail.

b) Compare CISC & RISC Microcontroller in detail.

c) Write a short note on different development platforms and tools for programming for Microcontroller.

d) Write difference between Harvard and von Neumann architecture.

e) Explain the following Instructions
MOVX @ DPTR, A
MUL AB
RETI
ADDC A, @R0

Q.3 Solve Any Two. **12**

a) Explain in detail Rotate and Swap operations of MCS-51.

b) Explain with suitable example any three addressing modes of 8051.

c) Draw 8051 Architecture and explain following blocks in
i) ALU & Accumulator
ii) Stack pointer and program counter
iii) registers in 8051

SECTION – II

Q.4 Solve Any Four. **16**

a) Explain port structure of 8051 in detail with neat diagram.

b) Define interrupt. Explain the types of interrupts. Explain IE and IP related to interrupts.

c) Draw & explain interfacing of Buzzer to MCS 51.

d) Explain program memory organization and data memory organization of 8051 microcontroller.

e) Indicate which mode and which Timer are selected for each of the following
   i) MOV TMOD, #10H
   ii) MOV TMOD, #12H
   iii) MOV TMOD, #20H
   iv) MOV TMOD, #01H

Q.5 Solve Any Two. **12**

a) Draw the functional pin Diagram of 8051 and explain the functions of following pins.
i.e. ALE, RST, XTAL1 and XTAL2, EA, TXD, RXD.

b) Draw & Explain Interfacing of LCD display with MCS 51.

c) Explain Timers/Counters of 8051 in detail. Also explain different modes of Timers. Explain TCON, TMOD SFRS in detail.

a) Pin no 1 b) Pin no 2
c) Pin no 3 d) Pin no 4

5) 8051 has RAM of _____.
a) 128 bytes b) 256 bytes
c) 64 bytes d) 512 bytes

6) 8051 Microcontroller has how many 16 bit registers?
a) 2 b) 3
c) 1 d) 0

7) How are the status of the carry, auxiliary carry and parity flag affected if the write instruction
MOV A, #9C
ADD A, #64H
a) CY=0, AC=0, P=0 b) CY=1, AC=1, P=0
c) CY=0, AC=1, P=0 d) CY=1, AC=1, P=1

8) Which architecture provides separate buses for program and data memory?

a) Harvard architecture
b) Von Neumann architecture
c) None of the mentioned
d) All of the mentioned

9) What is the function of the TMOD register?

a) TMOD register is used to set various operation modes of timer/counter
b) TMOD register is used to load the count of the tinier
c) Is the destination or the final register where the result is obtained after the operation of the timer
d) Is used to interrupt the timer

10) The 8051 has _____ 16-bit counter/timers.

a) 1
b) 2
c) 3
d) 4

11) The 8051 can handle _____ interrupt sources.

a) 3
b) 4
c) 5
d) 6

12) An alternate function of port pin P3.1 in the 8051 is _____.

a) serial port input
b) serial port output
c) memories write strobe
d) memory read strobe

13) The I/O ports that are used as address and data for external memory are _____.

a) Ports 1 and 2
b) Ports 1 and 3
c) Ports 0 and 2
d) Ports 0 and 3

14) Which register is used to make the interrupt level or an edge triggered pulse?

a) TCON
b) IE
c) IPR
d) SCON

S.Y. (B.Tech.) (Civil Engineering) (Semester - II) (New) (CBCS)
Examination: March/April - 2026
Microcontroller (ENTMDM-02A)

Day & Date: Thursday, 30-04-2026 Max. Marks: 56
Time: 03:00 PM To 06:00 PM

Instructions: 1) All questions are compulsory.
2) Figures to the right indicate full marks.

SECTION – I

Q.2 Solve Any Four. **16**

a) Explain difference between Microprocessor and Microcontroller in detail.

b) Compare CISC & RISC Microcontroller in detail.

c) Write a short note on different development platforms and tools for programming for Microcontroller.

d) Write difference between Harvard and von Neumann architecture.

e) Explain the following Instructions
MOVX @ DPTR, A
MUL AB
RETI
ADDC A, @R0

Q.3 Solve Any Two. **12**

a) Explain in detail Rotate and Swap operations of MCS-51.

b) Explain with suitable example any three addressing modes of 8051.

c) Draw 8051 Architecture and explain following blocks in
i) ALU & Accumulator
ii) Stack pointer and program counter
iii) registers in 8051

SECTION – II

Q.4 Solve Any Four. **16**

a) Explain port structure of 8051 in detail with neat diagram.

b) Define interrupt. Explain the types of interrupts. Explain IE and IP related to interrupts.

c) Draw & explain interfacing of Buzzer to MCS 51.

d) Explain program memory organization and data memory organization of 8051 microcontroller.

e) Indicate which mode and which Timer are selected for each of the following
   i) MOV TMOD, #10H
   ii) MOV TMOD, #12H
   iii) MOV TMOD, #20H
   iv) MOV TMOD, #01H

Q.5 Solve Any Two. **12**

a) Draw the functional pin Diagram of 8051 and explain the functions of following pins.
i.e. ALE, RST, XTAL1 and XTAL2, EA, TXD, RXD.

b) Draw & Explain Interfacing of LCD display with MCS 51.

c) Explain Timers/Counters of 8051 in detail. Also explain different modes of Timers. Explain TCON, TMOD SFRS in detail.

Time: 03:00 PM To 06:00 PM

Instructions: 1) Q. No. 1 is compulsory. It should be solved in the first 30 minutes in Answer Book Page no 03 (Starting page of the Answer Book). Each question carries one mark.
2) Don't forget to Mention question paper set (P/Q/R/S) on top of page.
3) Figures to the right indicates full marks.

MCQ/Objective Type Questions

Duration: 30 Minutes Marks:14

Q.1 Answer the following Objective Type Questions. 14

1) The 8051 has _____ 16-bit counter/timers.
a) 1 b) 2
c) 3 d) 4

2) The 8051 can handle _____ interrupt sources.
a) 3 b) 4
c) 5 d) 6

3) An alternate function of port pin P3.1 in the 8051 is _____.
a) serial port input b) serial port output
c) memories write strobe d) memory read strobe

4) The I/O ports that are used as address and data for external memory are _____.
a) Ports 1 and 2 b) Ports 1 and 3
c) Ports 0 and 2 d) Ports 0 and 3

5) Which register is used to make the interrupt level or an edge triggered pulse?
a) TCON b) IE
c) IPR d) SCON

6) In 8051 which interrupt has highest priority?
a) IE1 b) TF0
c) IE0 d) TF1

7) The total external data memory that can be interfaced to the 8051 is _____.
a) 32K b) 64K
c) 128K d) 256K

8) What is the address range of SFR Register bank?
a) 00H-77H b) 40H-80H
c) 80H-7FH d) 80H-FFH

9) Which pin of the LCD is used for adjusting its contrast?
a) Pin no 1 b) Pin no 2
c) Pin no 3 d) Pin no 4

10) 8051 has RAM of _____.
a) 128 bytes b) 256 bytes
c) 64 bytes d) 512 bytes

11) 8051 Microcontroller has how many 16 bit registers?
a) 2 b) 3
c) 1 d) 0

12) How are the status of the carry, auxiliary carry and parity flag affected if the write instruction
MOV A, #9C
ADD A, #64H
a) CY=0, AC=0, P=0 b) CY=1, AC=1, P=0
c) CY=0, AC=1, P=0 d) CY=1, AC=1, P=1

13) Which architecture provides separate buses for program and data memory?
a) Harvard architecture b) Von Neumann architecture
c) None of the mentioned d) All of the mentioned

14) What is the function of the TMOD register?
a) TMOD register is used to set various operation modes of timer/counter
b) TMOD register is used to load the count of the tinier
c) Is the destination or the final register where the result is obtained after the operation of the timer

MCQ/Objective Type Questions

Duration: 30 Minutes Marks:14

Q.1 Answer the following Objective Type Questions. 14

1) The 8051 has _____ 16-bit counter/timers.
a) 1 b) 2
c) 3 d) 4

2) The 8051 can handle _____ interrupt sources.
a) 3 b) 4
c) 5 d) 6

3) An alternate function of port pin P3.1 in the 8051 is _____.
a) serial port input b) serial port output
c) memories write strobe d) memory read strobe

4) The I/O ports that are used as address and data for external memory are _____.
a) Ports 1 and 2 b) Ports 1 and 3
c) Ports 0 and 2 d) Ports 0 and 3

5) Which register is used to make the interrupt level or an edge triggered pulse?
a) TCON b) IE
c) IPR d) SCON

6) In 8051 which interrupt has highest priority?
a) IE1 b) TF0
c) IE0 d) TF1

7) The total external data memory that can be interfaced to the 8051 is _____.
a) 32K b) 64K
c) 128K d) 256K

8) What is the address range of SFR Register bank?
a) 00H-77H b) 40H-80H
c) 80H-7FH d) 80H-FFH

9) Which pin of the LCD is used for adjusting its contrast?
a) Pin no 1 b) Pin no 2
c) Pin no 3 d) Pin no 4

10) 8051 has RAM of _____.
a) 128 bytes b) 256 bytes
c) 64 bytes d) 512 bytes

11) 8051 Microcontroller has how many 16 bit registers?
a) 2 b) 3
c) 1 d) 0

12) How are the status of the carry, auxiliary carry and parity flag affected if the write instruction
MOV A, #9C
ADD A, #64H
a) CY=0, AC=0, P=0 b) CY=1, AC=1, P=0
c) CY=0, AC=1, P=0 d) CY=1, AC=1, P=1

13) Which architecture provides separate buses for program and data memory?
a) Harvard architecture b) Von Neumann architecture
c) None of the mentioned d) All of the mentioned

14) What is the function of the TMOD register?
a) TMOD register is used to set various operation modes of timer/counter
b) TMOD register is used to load the count of the tinier
c) Is the destination or the final register where the result is obtained after the operation of the timer
d) Is used to interrupt the timer

Set S

S.Y. (B.Tech.) (Computer Science and Engineering) (Semester - II) (New) (CBCS) Examination: March/April - 2026
Microcontroller (ENTMDM-02A)

Day & Date: Thursday, 30-04-2026 Max. Marks: 56
Time: 03:00 PM To 06:00 PM

Instructions: 1) All questions are compulsory.
2) Figures to the right indicate full marks.

SECTION – I

Q.2 Solve Any Four. **16**

a) Explain difference between Microprocessor and Microcontroller in detail.

b) Compare CISC & RISC Microcontroller in detail.

c) Write a short note on different development platforms and tools for programming for Microcontroller.

d) Write difference between Harvard and von Neumann architecture.

e) Explain the following Instructions
MOVX @ DPTR, A
MUL AB
RETI
ADDC A, @R0

Q.3 Solve Any Two. **12**

a) Explain in detail Rotate and Swap operations of MCS-51.

b) Explain with suitable example any three addressing modes of 8051.

c) Draw 8051 Architecture and explain following blocks in
i) ALU & Accumulator
ii) Stack pointer and program counter
iii) registers in 8051

SECTION – II

Q.4 Solve Any Four. **16**

a) Explain port structure of 8051 in detail with neat diagram.

b) Define interrupt. Explain the types of interrupts. Explain IE and IP related to interrupts.

c) Draw & explain interfacing of Buzzer to MCS 51.

d) Explain program memory organization and data memory organization of 8051 microcontroller.

e) Indicate which mode and which Timer are selected for each of the following
   i) MOV TMOD, #10H
   ii) MOV TMOD, #12H
   iii) MOV TMOD, #20H
   iv) MOV TMOD, #01H

Q.5 Solve Any Two. **12**

a) Draw the functional pin Diagram of 8051 and explain the functions of following pins.
i.e. ALE, RST, XTAL1 and XTAL2, EA, TXD, RXD.

b) Draw & Explain Interfacing of LCD display with MCS 51.

c) Explain Timers/Counters of 8051 in detail. Also explain different modes of Timers. Explain TCON, TMOD SFRS in detail.

Time: 03:00 PM To 06:00 PM

Instructions: 1) Q. No. 1 is compulsory. It should be solved in the first 30 minutes in Answer Book Page no 03 (Starting page of the Answer Book). Each question carries one mark.
2) Don't forget to Mention question paper set (P/Q/R/S) on top of page.
3) Figures to the right indicates full marks.

MCQ/Objective Type Questions

Duration: 30 Minutes Marks:14

Q.1 Answer the following Objective Type Questions. 14

1) 8051 has RAM of _____.
a) 128 bytes b) 256 bytes
c) 64 bytes d) 512 bytes

2) 8051 Microcontroller has how many 16 bit registers?
a) 2 b) 3
c) 1 d) 0

3) How are the status of the carry, auxiliary carry and parity flag affected if the write instruction
MOV A, #9C
ADD A, #64H
a) CY=0, AC=0, P=0 b) CY=1, AC=1, P=0
c) CY=0, AC=1, P=0 d) CY=1, AC=1, P=1

4) Which architecture provides separate buses for program and data memory?
a) Harvard architecture b) Von Neumann architecture
c) None of the mentioned d) All of the mentioned

5) What is the function of the TMOD register?
a) TMOD register is used to set various operation modes of timer/counter
b) TMOD register is used to load the count of the tinier
c) Is the destination or the final register where the result is obtained after the operation of the timer
d) Is used to interrupt the timer

6) The 8051 has _____ 16-bit counter/timers.
a) 1 b) 2
c) 3 d) 4

7) The 8051 can handle _____ interrupt sources.
a) 3 b) 4
c) 5 d) 6

8) An alternate function of port pin P3.1 in the 8051 is _____.
a) serial port input b) serial port output
c) memories write strobe d) memory read strobe

9) The I/O ports that are used as address and data for external memory are _____.
a) Ports 1 and 2 b) Ports 1 and 3
c) Ports 0 and 2 d) Ports 0 and 3

10) Which register is used to make the interrupt level or an edge triggered pulse?
a) TCON b) IE
c) IPR d) SCON

11) In 8051 which interrupt has highest priority?
a) IE1 b) TF0
c) IE0 d) TF1

12) The total external data memory that can be interfaced to the 8051 is _____.
a) 32K b) 64K
c) 128K d) 256K

13) What is the address range of SFR Register bank?
a) 00H-77H b) 40H-80H
c) 80H-7FH d) 80H-FFH

14) Which pin of the LCD is used for adjusting its contrast?
a) Pin no 1 b) Pin no 2
c) Pin no 3 d) Pin no 4

8) An alternate function of port pin P3.1 in the 8051 is _____.
a) serial port input b) serial port output
c) memories write strobe d) memory read strobe

9) The I/O ports that are used as address and data for external memory are _____.
a) Ports 1 and 2 b) Ports 1 and 3
c) Ports 0 and 2 d) Ports 0 and 3

10) Which register is used to make the interrupt level or an edge triggered pulse?
a) TCON b) IE
c) IPR d) SCON

11) In 8051 which interrupt has highest priority?
a) IE1 b) TF0
c) IE0 d) TF1

12) The total external data memory that can be interfaced to the 8051 is _____.
a) 32K b) 64K
c) 128K d) 256K

13) What is the address range of SFR Register bank?
a) 00H-77H b) 40H-80H
c) 80H-7FH d) 80H-FFH

14) Which pin of the LCD is used for adjusting its contrast?
a) Pin no 1 b) Pin no 2
c) Pin no 3 d) Pin no 4

S.Y. (B.Tech.) (Electrical Engineering) (Semester - II) (New) (CBCS)
Examination: March/April - 2026
Microcontroller (ENTMDM-02A)

Day & Date: Thursday, 30-04-2026 Max. Marks: 56
Time: 03:00 PM To 06:00 PM

Instructions: 1) All questions are compulsory.
2) Figures to the right indicate full marks.

SECTION – I

Q.2 Solve Any Four. **16**

a) Explain difference between Microprocessor and Microcontroller in detail.

b) Compare CISC & RISC Microcontroller in detail.

c) Write a short note on different development platforms and tools for programming for Microcontroller.

d) Write difference between Harvard and von Neumann architecture.

e) Explain the following Instructions
MOVX @ DPTR, A
MUL AB
RETI
ADDC A, @R0

Q.3 Solve Any Two. **12**

a) Explain in detail Rotate and Swap operations of MCS-51.

b) Explain with suitable example any three addressing modes of 8051.

c) Draw 8051 Architecture and explain following blocks in
i) ALU & Accumulator
ii) Stack pointer and program counter
iii) registers in 8051

SECTION – II

Q.4 Solve Any Four. **16**

a) Explain port structure of 8051 in detail with neat diagram.

b) Define interrupt. Explain the types of interrupts. Explain IE and IP related to interrupts.

c) Draw & explain interfacing of Buzzer to MCS 51.

d) Explain program memory organization and data memory organization of 8051 microcontroller.

e) Indicate which mode and which Timer are selected for each of the following
   i) MOV TMOD, #10H
   ii) MOV TMOD, #12H
   iii) MOV TMOD, #20H
   iv) MOV TMOD, #01H

Q.5 Solve Any Two. **12**

a) Draw the functional pin Diagram of 8051 and explain the functions of following pins.
i.e. ALE, RST, XTAL1 and XTAL2, EA, TXD, RXD.

b) Draw & Explain Interfacing of LCD display with MCS 51.

c) Explain Timers/Counters of 8051 in detail. Also explain different modes of Timers. Explain TCON, TMOD SFRS in detail.

Microcontroller (ENTMDM-02A)

Day & Date: Thursday, 30-04-2026 Max. Marks: 70
Time: 03:00 PM To 06:00 PM

Instructions: 1) Q. No. 1 is compulsory. It should be solved in the first 30 minutes in Answer Book Page no 03 (Starting page of the Answer Book). Each question carries one mark.
2) Don't forget to Mention question paper set (P/Q/R/S) on top of page.
3) Figures to the right indicates full marks.

MCQ/Objective Type Questions

Duration: 30 Minutes Marks:14

Q.1 Answer the following Objective Type Questions. 14

1) An alternate function of port pin P3.1 in the 8051 is _____.
a) serial port input b) serial port output
c) memories write strobe d) memory read strobe

2) The I/O ports that are used as address and data for external memory are _____.
a) Ports 1 and 2 b) Ports 1 and 3
c) Ports 0 and 2 d) Ports 0 and 3

3) Which register is used to make the interrupt level or an edge triggered pulse?
a) TCON b) IE
c) IPR d) SCON

4) In 8051 which interrupt has highest priority?
a) IE1 b) TF0
c) IE0 d) TF1

5) The total external data memory that can be interfaced to the 8051 is _____.
a) 32K b) 64K
c) 128K d) 256K

6) What is the address range of SFR Register bank?
a) 00H-77H b) 40H-80H
c) 80H-7FH d) 80H-FFH

7) Which pin of the LCD is used for adjusting its contrast?
a) Pin no 1 b) Pin no 2
c) Pin no 3 d) Pin no 4

8) 8051 has RAM of _____.
a) 128 bytes b) 256 bytes
c) 64 bytes d) 512 bytes

9) 8051 Microcontroller has how many 16 bit registers?
a) 2 b) 3
c) 1 d) 0

10) How are the status of the carry, auxiliary carry and parity flag affected if the write instruction
MOV A, #9C
ADD A, #64H
a) CY=0, AC=0, P=0 b) CY=1, AC=1, P=0
c) CY=0, AC=1, P=0 d) CY=1, AC=1, P=1

11) Which architecture provides separate buses for program and data memory?
a) Harvard architecture b) Von Neumann architecture
c) None of the mentioned d) All of the mentioned

12) What is the function of the TMOD register?
a) TMOD register is used to set various operation modes of timer/counter
b) TMOD register is used to load the count of the tinier
c) Is the destination or the final register where the result is obtained after the operation of the timer
d) Is used to interrupt the timer

13) The 8051 has _____ 16-bit counter/timers.
a) 1 b) 2
c) 3 d) 4

14) The 8051 can handle _____ interrupt sources.
a) 3 b) 4
c) 5 d) 6

MCQ/Objective Type Questions

Duration: 30 Minutes Marks:14

Q.1 Answer the following Objective Type Questions. 14

1) An alternate function of port pin P3.1 in the 8051 is _____.
a) serial port input b) serial port output
c) memories write strobe d) memory read strobe

2) The I/O ports that are used as address and data for external memory are _____.
a) Ports 1 and 2 b) Ports 1 and 3
c) Ports 0 and 2 d) Ports 0 and 3

3) Which register is used to make the interrupt level or an edge triggered pulse?
a) TCON b) IE
c) IPR d) SCON

4) In 8051 which interrupt has highest priority?
a) IE1 b) TF0
c) IE0 d) TF1

5) The total external data memory that can be interfaced to the 8051 is _____.
a) 32K b) 64K
c) 128K d) 256K

6) What is the address range of SFR Register bank?
a) 00H-77H b) 40H-80H
c) 80H-7FH d) 80H-FFH

7) Which pin of the LCD is used for adjusting its contrast?
a) Pin no 1 b) Pin no 2
c) Pin no 3 d) Pin no 4

8) 8051 has RAM of _____.
a) 128 bytes b) 256 bytes
c) 64 bytes d) 512 bytes

9) 8051 Microcontroller has how many 16 bit registers?
a) 2 b) 3
c) 1 d) 0

10) How are the status of the carry, auxiliary carry and parity flag affected if the write instruction
MOV A, #9C
ADD A, #64H
a) CY=0, AC=0, P=0 b) CY=1, AC=1, P=0
c) CY=0, AC=1, P=0 d) CY=1, AC=1, P=1

11) Which architecture provides separate buses for program and data memory?
a) Harvard architecture b) Von Neumann architecture
c) None of the mentioned d) All of the mentioned

12) What is the function of the TMOD register?
a) TMOD register is used to set various operation modes of timer/counter
b) TMOD register is used to load the count of the tinier
c) Is the destination or the final register where the result is obtained after the operation of the timer
d) Is used to interrupt the timer

13) The 8051 has _____ 16-bit counter/timers.
a) 1 b) 2
c) 3 d) 4

14) The 8051 can handle _____ interrupt sources.
a) 3 b) 4
c) 5 d) 6

Set Q

S.Y. (B.Tech.) (Electronics and Telecommunication Engineering) (Semester - II) (New) (CBCS) Examination: March/April – 2026
Microcontroller (ENTMDM-02A)

Day & Date: Thursday, 30-04-2026 Max. Marks: 56
Time: 03:00 PM To 06:00 PM

Instructions: 1) All questions are compulsory.
2) Figures to the right indicate full marks.

SECTION – I

Q.2 Solve Any Four. **16**

a) Explain difference between Microprocessor and Microcontroller in detail.

b) Compare CISC & RISC Microcontroller in detail.

c) Write a short note on different development platforms and tools for programming for Microcontroller.

d) Write difference between Harvard and von Neumann architecture.

e) Explain the following Instructions
MOVX @ DPTR, A
MUL AB
RETI
ADDC A, @R0

Q.3 Solve Any Two. **12**

a) Explain in detail Rotate and Swap operations of MCS-51.

b) Explain with suitable example any three addressing modes of 8051.

c) Draw 8051 Architecture and explain following blocks in
i) ALU & Accumulator
ii) Stack pointer and program counter
iii) registers in 8051

SECTION – II

Q.4 Solve Any Four. **16**

a) Explain port structure of 8051 in detail with neat diagram.

b) Define interrupt. Explain the types of interrupts. Explain IE and IP related to interrupts.

c) Draw & explain interfacing of Buzzer to MCS 51.

d) Explain program memory organization and data memory organization of 8051 microcontroller.

e) Indicate which mode and which Timer are selected for each of the following
   i) MOV TMOD, #10H
   ii) MOV TMOD, #12H
   iii) MOV TMOD, #20H
   iv) MOV TMOD, #01H

Q.5 Solve Any Two. **12**

a) Draw the functional pin Diagram of 8051 and explain the functions of following pins.
i.e. ALE, RST, XTAL1 and XTAL2, EA, TXD, RXD.

b) Draw & Explain Interfacing of LCD display with MCS 51.

c) Explain Timers/Counters of 8051 in detail. Also explain different modes of Timers. Explain TCON, TMOD SFRS in detail.

Set **R**

S.Y. (B.Tech.) (Electronics and Telecommunication Engineering) (Semester - II) (New) (CBCS) Examination: March/April - 2026 Microcontroller (ENTMDM-02A)

Day & Date: Thursday, 30-04-2026 Max. Marks: 70
Time: 03:00 PM To 06:00 PM

Instructions: 1) Q. No. 1 is compulsory. It should be solved in the first 30 minutes in Answer Book Page no 03 (Starting page of the Answer Book). Each question carries one mark.
2) Don't forget to Mention question paper set (P/Q/R/S) on top of page.
3) Figures to the right indicates full marks.

MCQ/Objective Type Questions

Duration: 30 Minutes Marks:14

Q.1 Answer the following Objective Type Questions. 14

1) In 8051 which interrupt has highest priority?
a) IE1 b) TF0
c) IE0 d) TF1

2) The total external data memory that can be interfaced to the 8051 is _____.
a) 32K b) 64K
c) 128K d) 256K

3) What is the address range of SFR Register bank?
a) 00H-77H b) 40H-80H
c) 80H-7FH d) 80H-FFH

4) Which pin of the LCD is used for adjusting its contrast?
a) Pin no 1 b) Pin no 2
c) Pin no 3 d) Pin no 4

5) 8051 has RAM of _____.
a) 128 bytes b) 256 bytes
c) 64 bytes d) 512 bytes

6) 8051 Microcontroller has how many 16 bit registers?
a) 2 b) 3
c) 1 d) 0

7) How are the status of the carry, auxiliary carry and parity flag affected if the write instruction
MOV A, #9C
ADD A, #64H
a) CY=0, AC=0, P=0 b) CY=1, AC=1, P=0
c) CY=0, AC=1, P=0 d) CY=1, AC=1, P=1

8) Which architecture provides separate buses for program and data memory?

a) Harvard architecture
b) Von Neumann architecture
c) None of the mentioned
d) All of the mentioned

9) What is the function of the TMOD register?

a) TMOD register is used to set various operation modes of timer/counter
b) TMOD register is used to load the count of the tinier
c) Is the destination or the final register where the result is obtained after the operation of the timer
d) Is used to interrupt the timer

10) The 8051 has _____ 16-bit counter/timers.

a) 1
b) 2
c) 3
d) 4

11) The 8051 can handle _____ interrupt sources.

a) 3
b) 4
c) 5
d) 6

12) An alternate function of port pin P3.1 in the 8051 is _____.

a) serial port input
b) serial port output
c) memories write strobe
d) memory read strobe

13) The I/O ports that are used as address and data for external memory are _____.

a) Ports 1 and 2
b) Ports 1 and 3
c) Ports 0 and 2
d) Ports 0 and 3

14) Which register is used to make the interrupt level or an edge triggered pulse?

a) TCON
b) IE
c) IPR
d) SCON

MCQ/Objective Type Questions

Duration: 30 Minutes Marks:14

Q.1 Answer the following Objective Type Questions. 14

1) The 8051 has _____ 16-bit counter/timers.
a) 1 b) 2
c) 3 d) 4

2) The 8051 can handle _____ interrupt sources.
a) 3 b) 4
c) 5 d) 6

3) An alternate function of port pin P3.1 in the 8051 is _____.
a) serial port input b) serial port output
c) memories write strobe d) memory read strobe

4) The I/O ports that are used as address and data for external memory are _____.
a) Ports 1 and 2 b) Ports 1 and 3
c) Ports 0 and 2 d) Ports 0 and 3

5) Which register is used to make the interrupt level or an edge triggered pulse?
a) TCON b) IE
c) IPR d) SCON

6) In 8051 which interrupt has highest priority?
a) IE1 b) TF0
c) IE0 d) TF1

7) The total external data memory that can be interfaced to the 8051 is _____.
a) 32K b) 64K
c) 128K d) 256K

8) What is the address range of SFR Register bank?
a) 00H-77H b) 40H-80H

8) Which architecture provides separate buses for program and data memory?

a) Harvard architecture
b) Von Neumann architecture
c) None of the mentioned
d) All of the mentioned

9) What is the function of the TMOD register?

a) TMOD register is used to set various operation modes of timer/counter
b) TMOD register is used to load the count of the tinier
c) Is the destination or the final register where the result is obtained after the operation of the timer
d) Is used to interrupt the timer

10) The 8051 has _____ 16-bit counter/timers.

a) 1
b) 2
c) 3
d) 4

11) The 8051 can handle _____ interrupt sources.

a) 3
b) 4
c) 5
d) 6

12) An alternate function of port pin P3.1 in the 8051 is _____.

a) serial port input
b) serial port output
c) memories write strobe
d) memory read strobe

13) The I/O ports that are used as address and data for external memory are _____.

a) Ports 1 and 2
b) Ports 1 and 3
c) Ports 0 and 2
d) Ports 0 and 3

14) Which register is used to make the interrupt level or an edge triggered pulse?

a) TCON
b) IE
c) IPR
d) SCON

S.Y. (B.Tech.) (Mechanical Engineering) (Semester - II) (New) (CBCS)
Examination: March/April - 2026
Microcontroller (ENTMDM-02A)

Day & Date: Thursday, 30-04-2026 Max. Marks: 56
Time: 03:00 PM To 06:00 PM

Instructions: 1) All questions are compulsory.
2) Figures to the right indicate full marks.

SECTION – I

Q.2 Solve Any Four. **16**

a) Explain difference between Microprocessor and Microcontroller in detail.

b) Compare CISC & RISC Microcontroller in detail.

c) Write a short note on different development platforms and tools for programming for Microcontroller.

d) Write difference between Harvard and von Neumann architecture.

e) Explain the following Instructions
MOVX @ DPTR, A
MUL AB
RETI
ADDC A, @R0

Q.3 Solve Any Two. **12**

a) Explain in detail Rotate and Swap operations of MCS-51.

b) Explain with suitable example any three addressing modes of 8051.

c) Draw 8051 Architecture and explain following blocks in
i) ALU & Accumulator
ii) Stack pointer and program counter
iii) registers in 8051

SECTION – II

Q.4 Solve Any Four. **16**

a) Explain port structure of 8051 in detail with neat diagram.

b) Define interrupt. Explain the types of interrupts. Explain IE and IP related to interrupts.

c) Draw & explain interfacing of Buzzer to MCS 51.

d) Explain program memory organization and data memory organization of 8051 microcontroller.

e) Indicate which mode and which Timer are selected for each of the following
   i) MOV TMOD, #10H
   ii) MOV TMOD, #12H
   iii) MOV TMOD, #20H
   iv) MOV TMOD, #01H

Q.5 Solve Any Two. **12**

a) Draw the functional pin Diagram of 8051 and explain the functions of following pins.
i.e. ALE, RST, XTAL1 and XTAL2, EA, TXD, RXD.

b) Draw & Explain Interfacing of LCD display with MCS 51.

c) Explain Timers/Counters of 8051 in detail. Also explain different modes of Timers. Explain TCON, TMOD SFRS in detail.

Set **S**

S.Y. (B.Tech.) (Mechanical Engineering) (Semester - II) (New) (CBCS)
Examination: March/April - 2026
Microcontroller (ENTMDM-02A)

Day & Date: Thursday, 30-04-2026 Max. Marks: 70
Time: 03:00 PM To 06:00 PM

Instructions: 1) Q. No. 1 is compulsory. It should be solved in the first 30 minutes in Answer Book Page no 03 (Starting page of the Answer Book). Each question carries one mark.
2) Don't forget to Mention question paper set (P/Q/R/S) on top of page.
3) Figures to the right indicates full marks.

MCQ/Objective Type Questions

Duration: 30 Minutes Marks:14

Q.1 Answer the following Objective Type Questions. 14

1) The 8051 has _____ 16-bit counter/timers.
a) 1 b) 2
c) 3 d) 4

2) The 8051 can handle _____ interrupt sources.
a) 3 b) 4
c) 5 d) 6

3) An alternate function of port pin P3.1 in the 8051 is _____.
a) serial port input b) serial port output
c) memories write strobe d) memory read strobe

4) The I/O ports that are used as address and data for external memory are _____.
a) Ports 1 and 2 b) Ports 1 and 3
c) Ports 0 and 2 d) Ports 0 and 3

5) Which register is used to make the interrupt level or an edge triggered pulse?
a) TCON b) IE
c) IPR d) SCON

6) In 8051 which interrupt has highest priority?
a) IE1 b) TF0
c) IE0 d) TF1

7) The total external data memory that can be interfaced to the 8051 is _____.
a) 32K b) 64K
c) 128K d) 256K

8) What is the address range of SFR Register bank?
a) 00H-77H b) 40H-80H
c) 80H-7FH d) 80H-FFH

9) Which pin of the LCD is used for adjusting its contrast?
a) Pin no 1 b) Pin no 2
c) Pin no 3 d) Pin no 4

10) 8051 has RAM of _____.
a) 128 bytes b) 256 bytes
c) 64 bytes d) 512 bytes

11) 8051 Microcontroller has how many 16 bit registers?
a) 2 b) 3
c) 1 d) 0

12) How are the status of the carry, auxiliary carry and parity flag affected if the write instruction
MOV A, #9C
ADD A, #64H
a) CY=0, AC=0, P=0 b) CY=1, AC=1, P=0
c) CY=0, AC=1, P=0 d) CY=1, AC=1, P=1

13) Which architecture provides separate buses for program and data memory?
a) Harvard architecture b) Von Neumann architecture
c) None of the mentioned d) All of the mentioned

14) What is the function of the TMOD register?
a) TMOD register is used to set various operation modes of timer/counter
b) TMOD register is used to load the count of the tinier
c) Is the destination or the final register where the result is obtained after the operation of the timer
d) Is used to interrupt the timer

S.Y. (B.Tech.) (Civil Engineering) (Semester - II) (New) (CBCS)
Examination: March/April - 2026
Fundamentals of IOT (ENTMDM-02B)

Day & Date: Thursday, 30-04-2026 Max. Marks: 70
Time: 03:00 PM To 06:00 PM

Instructions: 1) Q. No. 1 is compulsory. It should be solved in the first 30 minutes in Answer Book Page no 03 (Starting page of the Answer Book). Each question carries one mark.
2) Don't forget to Mention question paper set (P/Q/R/S) on top of page.
3) Figures to the right indicates full marks.
4) Assume suitable data if necessary and mention it clearly.

MCQ/Objective Type Questions

Duration: 30 Minutes Marks:14

Q.1 choose the correct alternatives from the options. 14

1) What is the correct sequence of layers in the IoT architecture?
a) Perception → Network → Application
b) Network → Perception → Application
c) Application → Network → Perception
d) Perception → Application → Network

2) How many layers does the basic IoT architecture typically have?
a) Below HF b) In HF
c) Above HF d) None

3) Why is an ADC (Analog-to-Digital Converter) required for analog sensors?
a) To store data in memory
b) To convert analog signals to digital format
c) To amplify signals
d) To filter noise

4) Primary modes of radiation of helical antenna are _____.
a) Normal mode only b) Axial mode only
c) Both normal and axial mode d) None

5) If the HPBW is 60° then FNBW is _____.
a) 2 b) 3
c) 5 d) 7

6) The DHT sensor is used to measure _____.
a) Distance and speed b) Temperature and humidity
c) Light intensity and pressure d) Vibration and motion

7) Which of the following is NOT a key feature of IoT?
a) Interconnectivity
b) Autonomy
c) High human intervention
d) Data exchange

8) How many layers does the basic IoT architecture typically have?
a) 7
b) 2
c) 5
d) 3

9) In IoT architecture, which component is responsible for data processing and analytics?
a) Sensor
b) Gateway
c) Cloud/Server
d) Actuator

10) In which unit is angular velocity measured?
a) Meters per second (m/s)
b) Degrees per second (°/s)
c) Newtons (N)
d) Joules (J)

11) What does a gyro sensor measure?
a) Acceleration
b) Angular velocity
c) Temperature
d) Humidity

12) What is the main working principle of an ultrasonic distance sensor?
a) Light reflection
b) Sound wave reflection
c) Magnetic field variation
d) Capacitive sensing

13) Solenoid is commonly used for _____.
a) Rotational movement
b) Linear actuation
c) Generating electricity
d) Measuring temperature

14) What is the main advantage of a stepper motor over a DC motor?
a) Higher speed
b) Precise position control
c) Lower power consumption
d) No need for a power supply

Time: 03:00 PM To 06:00 PM

Instructions: 1) All questions are compulsory.
2) Figures to the right indicate full marks.

SECTION – I

Q.2 Attempt Any Four. **16**

a) Explain the major components of IoT in detail.

b) Define the Internet of Things (IoT) and explain its significance in modern technology.

c) Describe the working principle of a PIR (Passive Infrared) Motion Sensor. What are its applications, and what voltage range does it typically operate within?

d) Explain LDR (Light Dependent Resistor) Sensor. How does it respond to different light intensities, and why is voltage division necessary in LDR circuits?

e) Distinguish between different types of actuators: Servo Motor, Solenoid, and Stepper Motor.

Q.3 Attempt Any Two. **12**

a) Explain different layers of IoT architecture in detail.

b) Discuss the DHT (Digital Humidity and Temperature) Sensor. How does it measure temperature and humidity, and what are its voltage and power requirements?

c) Describe why relay is needed when using an actuator in a control circuit.

SECTION – II

Q.4 Attempt Any Four. **16**

a) Explain the working of MQTT (Message Queuing Telemetry Transport) protocol in IoT communication. What are its advantages and limitations?

b) Discuss the differences between MQTT, CoAP, and XMPP in terms of reliability, scalability, and energy efficiency.

c) Explain the concept of Li-Fi (Light Fidelity) and compare it with traditional Wi-Fi in terms of speed, security, and applications.

d) Explain the advantages and disadvantages of Mesh topology in sensor networks. Why is it commonly used in IoT?

e) Compare Ring topology and Star topology.

Q.5 Attempt Any Two. **12**

a) Describe the working of an IoT-based home automation system. Discuss the key components, communication protocols, and security challenges associated with smart homes.

b) Describe the architecture and working of a smart parking system using IoT. How do sensors, cloud computing, and mobile applications contribute to efficient parking management?

c) Discuss the role of IoT sensors, automation, and data analytics in precision farming, irrigation control, and crop monitoring.

Q.5 Attempt Any Two. **12**

a) Describe the working of an IoT-based home automation system. Discuss the key components, communication protocols, and security challenges associated with smart homes.

b) Describe the architecture and working of a smart parking system using IoT. How do sensors, cloud computing, and mobile applications contribute to efficient parking management?

c) Discuss the role of IoT sensors, automation, and data analytics in precision farming, irrigation control, and crop monitoring.

S.Y. (B.Tech.) (Computer Science and Engineering) (Semester - II) (New) (CBCS) Examination: March/April - 2026
Fundamentals of IOT (ENTMDM-02B)

Day & Date: Thursday, 30-04-2026 Max. Marks: 70
Time: 03:00 PM To 06:00 PM

Instructions: 1) Q. No. 1 is compulsory. It should be solved in the first 30 minutes in Answer Book Page no 03 (Starting page of the Answer Book). Each question carries one mark.
2) Don't forget to Mention question paper set (P/Q/R/S) on top of page.
3) Figures to the right indicates full marks.
4) Assume suitable data if necessary and mention it clearly.

MCQ/Objective Type Questions

Duration: 30 Minutes Marks:14

Q.1 choose the correct alternatives from the options. 14

1) What is the correct sequence of layers in the IoT architecture?
a) Perception → Network → Application
b) Network → Perception → Application
c) Application → Network → Perception
d) Perception → Application → Network

2) How many layers does the basic IoT architecture typically have?
a) Below HF b) In HF
c) Above HF d) None

3) Why is an ADC (Analog-to-Digital Converter) required for analog sensors?
a) To store data in memory
b) To convert analog signals to digital format
c) To amplify signals
d) To filter noise

4) Primary modes of radiation of helical antenna are _____.
a) Normal mode only b) Axial mode only
c) Both normal and axial mode d) None

5) If the HPBW is 60° then FNBW is _____.
a) 2 b) 3
c) 5 d) 7

6) The DHT sensor is used to measure _____.
a) Distance and speed b) Temperature and humidity
c) Light intensity and pressure d) Vibration and motion

7) Which of the following is NOT a key feature of IoT?
a) Interconnectivity
b) Autonomy
c) High human intervention
d) Data exchange

8) How many layers does the basic IoT architecture typically have?
a) 7
b) 2
c) 5
d) 3

9) In IoT architecture, which component is responsible for data processing and analytics?
a) Sensor
b) Gateway
c) Cloud/Server
d) Actuator

10) In which unit is angular velocity measured?
a) Meters per second (m/s)
b) Degrees per second (°/s)
c) Newtons (N)
d) Joules (J)

11) What does a gyro sensor measure?
a) Acceleration
b) Angular velocity
c) Temperature
d) Humidity

12) What is the main working principle of an ultrasonic distance sensor?
a) Light reflection
b) Sound wave reflection
c) Magnetic field variation
d) Capacitive sensing

13) Solenoid is commonly used for _____.
a) Rotational movement
b) Linear actuation
c) Generating electricity
d) Measuring temperature

14) What is the main advantage of a stepper motor over a DC motor?
a) Higher speed
b) Precise position control
c) Lower power consumption
d) No need for a power supply

S.Y. (B.Tech.) (Computer Science and Engineering) (Semester - II) (New) (CBCS) Examination: March/April - 2026
Fundamentals of IOT (ENTMDM-02B)

Day & Date: Thursday, 30-04-2026 Max. Marks: 56
Time: 03:00 PM To 06:00 PM

Instructions: 1) All questions are compulsory.
2) Figures to the right indicate full marks.

SECTION – I

Q.2 Attempt Any Four. **16**

a) Explain the major components of IoT in detail.

b) Define the Internet of Things (IoT) and explain its significance in modern technology.

c) Describe the working principle of a PIR (Passive Infrared) Motion Sensor. What are its applications, and what voltage range does it typically operate within?

d) Explain LDR (Light Dependent Resistor) Sensor. How does it respond to different light intensities, and why is voltage division necessary in LDR circuits?

e) Distinguish between different types of actuators: Servo Motor, Solenoid, and Stepper Motor.

Q.3 Attempt Any Two. **12**

a) Explain different layers of IoT architecture in detail.

b) Discuss the DHT (Digital Humidity and Temperature) Sensor. How does it measure temperature and humidity, and what are its voltage and power requirements?

c) Describe why relay is needed when using an actuator in a control circuit.

SECTION – II

Q.4 Attempt Any Four. **16**

a) Explain the working of MQTT (Message Queuing Telemetry Transport) protocol in IoT communication. What are its advantages and limitations?

b) Discuss the differences between MQTT, CoAP, and XMPP in terms of reliability, scalability, and energy efficiency.

c) Explain the concept of Li-Fi (Light Fidelity) and compare it with traditional Wi-Fi in terms of speed, security, and applications.

d) Explain the advantages and disadvantages of Mesh topology in sensor networks. Why is it commonly used in IoT?

e) Compare Ring topology and Star topology.

Q.5 Attempt Any Two. **12**

a) Describe the working of an IoT-based home automation system. Discuss the key components, communication protocols, and security challenges associated with smart homes.

b) Describe the architecture and working of a smart parking system using IoT. How do sensors, cloud computing, and mobile applications contribute to efficient parking management?

c) Discuss the role of IoT sensors, automation, and data analytics in precision farming, irrigation control, and crop monitoring.

   d) To filter noise

11) Primary modes of radiation of helical antenna are _____.
   a) Normal mode only
   b) Axial mode only
   c) Both normal and axial mode
   d) None

12) If the HPBW is 60° then FNBW is _____.
   a) 2
   b) 3
   c) 5
   d) 7

13) The DHT sensor is used to measure _____.
   a) Distance and speed
   b) Temperature and humidity
   c) Light intensity and pressure
   d) Vibration and motion

14) Which of the following is NOT a key feature of IoT?
   a) Interconnectivity
   b) Autonomy
   c) High human intervention
   d) Data exchange

Seat No.	

Set **Q**

S.Y. (B.Tech.) (Electronics & Computer Engineering) (Semester - II) (New) (CBCS) Examination: March/April - 2026
Fundamentals of IOT (ENTMDM-02B)

Day & Date: Thursday, 30-04-2026 Max. Marks: 56
Time: 03:00 PM To 06:00 PM

Instructions: 1) All questions are compulsory.
2) Figures to the right indicate full marks.

SECTION – I

Q.2 Attempt Any Four. **16**

a) Explain the major components of IoT in detail.

b) Define the Internet of Things (IoT) and explain its significance in modern technology.

c) Describe the working principle of a PIR (Passive Infrared) Motion Sensor. What are its applications, and what voltage range does it typically operate within?

d) Explain LDR (Light Dependent Resistor) Sensor. How does it respond to different light intensities, and why is voltage division necessary in LDR circuits?

e) Distinguish between different types of actuators: Servo Motor, Solenoid, and Stepper Motor.

Q.3 Attempt Any Two. **12**

a) Explain different layers of IoT architecture in detail.

b) Discuss the DHT (Digital Humidity and Temperature) Sensor. How does it measure temperature and humidity, and what are its voltage and power requirements?

c) Describe why relay is needed when using an actuator in a control circuit.

SECTION – II

Q.4 Attempt Any Four. **16**

a) Explain the working of MQTT (Message Queuing Telemetry Transport) protocol in IoT communication. What are its advantages and limitations?

b) Discuss the differences between MQTT, CoAP, and XMPP in terms of reliability, scalability, and energy efficiency.

c) Explain the concept of Li-Fi (Light Fidelity) and compare it with traditional Wi-Fi in terms of speed, security, and applications.

d) Explain the advantages and disadvantages of Mesh topology in sensor networks. Why is it commonly used in IoT?

e) Compare Ring topology and Star topology.

Q.5 Attempt Any Two. **12**

a) Describe the working of an IoT-based home automation system. Discuss the key components, communication protocols, and security challenges associated with smart homes.

b) Describe the architecture and working of a smart parking system using IoT. How do sensors, cloud computing, and mobile applications contribute to efficient parking management?

c) Discuss the role of IoT sensors, automation, and data analytics in precision farming, irrigation control, and crop monitoring.

Seat No.	

Set **R**

S.Y. (B.Tech.) (Electronics & Computer Engineering) (Semester - II) (New) (CBCS) Examination: March/April - 2026
Fundamentals of IOT (ENTMDM-02B)

Day & Date: Thursday, 30-04-2026 Max. Marks: 70
Time: 03:00 PM To 06:00 PM

Instructions: 1) Q. No. 1 is compulsory. It should be solved in the first 30 minutes in Answer Book Page no 03 (Starting page of the Answer Book). Each question carries one mark.
2) Don't forget to Mention question paper set (P/Q/R/S) on top of page.
3) Figures to the right indicates full marks.
4) Assume suitable data if necessary and mention it clearly.

MCQ/Objective Type Questions

Duration: 30 Minutes Marks:14

Q.1 choose the correct alternatives from the options. 14

1) What does a gyro sensor measure?
a) Acceleration b) Angular velocity
c) Temperature d) Humidity

2) What is the main working principle of an ultrasonic distance sensor?
a) Light reflection b) Sound wave reflection
c) Magnetic field variation d) Capacitive sensing

3) Solenoid is commonly used for _____.
a) Rotational movement b) Linear actuation
c) Generating electricity d) Measuring temperature

4) What is the main advantage of a stepper motor over a DC motor?
a) Higher speed
b) Precise position control
c) Lower power consumption
d) No need for a power supply

5) What is the correct sequence of layers in the IoT architecture?
a) Perception → Network → Application
b) Network → Perception → Application
c) Application → Network → Perception
d) Perception → Application → Network

6) How many layers does the basic IoT architecture typically have?
a) Below HF b) In HF
c) Above HF d) None

7) Why is an ADC (Analog-to-Digital Converter) required for analog sensors?
a) To store data in memory
b) To convert analog signals to digital format
c) To amplify signals
d) To filter noise

8) Primary modes of radiation of helical antenna are _____.
a) Normal mode only
b) Axial mode only
c) Both normal and axial mode
d) None

9) If the HPBW is 60° then FNBW is _____.
a) 2
b) 3
c) 5
d) 7

10) The DHT sensor is used to measure _____.
a) Distance and speed
b) Temperature and humidity
c) Light intensity and pressure
d) Vibration and motion

11) Which of the following is NOT a key feature of IoT?
a) Interconnectivity
b) Autonomy
c) High human intervention
d) Data exchange

12) How many layers does the basic IoT architecture typically have?
a) 7
b) 2
c) 5
d) 3

13) In IoT architecture, which component is responsible for data processing and analytics?
a) Sensor
b) Gateway
c) Cloud/Server
d) Actuator

14) In which unit is angular velocity measured?
a) Meters per second (m/s)
b) Degrees per second (°/s)
c) Newtons (N)
d) Joules (J)

S.Y. (B.Tech.) (Electrical Engineering) (Semester - II) (New) (CBCS)
Examination: March/April - 2026
Fundamentals of IOT (ENTMDM-02B)

Day & Date: Thursday, 30-04-2026 Max. Marks: 70
Time: 03:00 PM To 06:00 PM

Instructions: 1) Q. No. 1 is compulsory. It should be solved in the first 30 minutes in Answer Book Page no 03 (Starting page of the Answer Book). Each question carries one mark.
2) Don't forget to Mention question paper set (P/Q/R/S) on top of page.
3) Figures to the right indicates full marks.
4) Assume suitable data if necessary and mention it clearly.

MCQ/Objective Type Questions

Duration: 30 Minutes Marks:14

Q.1 choose the correct alternatives from the options. 14

1) The DHT sensor is used to measure _____.
a) Distance and speed b) Temperature and humidity
c) Light intensity and pressure d) Vibration and motion

2) Which of the following is NOT a key feature of IoT?
a) Interconnectivity b) Autonomy
c) High human intervention d) Data exchange

3) How many layers does the basic IoT architecture typically have?
a) 7 b) 2
c) 5 d) 3

4) In IoT architecture, which component is responsible for data processing and analytics?
a) Sensor b) Gateway
c) Cloud/Server d) Actuator

5) In which unit is angular velocity measured?
a) Meters per second (m/s) b) Degrees per second (°/s)
c) Newtons (N) d) Joules (J)

6) What does a gyro sensor measure?
a) Acceleration b) Angular velocity
c) Temperature d) Humidity

7) What is the main working principle of an ultrasonic distance sensor?
a) Light reflection b) Sound wave reflection
c) Magnetic field variation d) Capacitive sensing

8) Solenoid is commonly used for _____.
a) Rotational movement b) Linear actuation
c) Generating electricity d) Measuring temperature

9) What is the main advantage of a stepper motor over a DC motor?
a) Higher speed
b) Precise position control
c) Lower power consumption
d) No need for a power supply

10) What is the correct sequence of layers in the IoT architecture?
a) Perception → Network → Application
b) Network → Perception → Application
c) Application → Network → Perception
d) Perception → Application → Network

11) How many layers does the basic IoT architecture typically have?
a) Below HF b) In HF
c) Above HF d) None

12) Why is an ADC (Analog-to-Digital Converter) required for analog sensors?
a) To store data in memory
b) To convert analog signals to digital format
c) To amplify signals
d) To filter noise

13) Primary modes of radiation of helical antenna are _____.
a) Normal mode only b) Axial mode only
c) Both normal and axial mode d) None

14) If the HPBW is 60° then FNBW is _____.
a) 2 b) 3
c) 5 d) 7

S.Y. (B.Tech.) (Electrical Engineering) (Semester - II) (New) (CBCS)
Examination: March/April - 2026
Fundamentals of IOT (ENTMDM-02B)

Day & Date: Thursday, 30-04-2026 Max. Marks: 56
Time: 03:00 PM To 06:00 PM

Instructions: 1) All questions are compulsory.
2) Figures to the right indicate full marks.

SECTION – I

Q.2 Attempt Any Four. **16**

a) Explain the major components of IoT in detail.

b) Define the Internet of Things (IoT) and explain its significance in modern technology.

c) Describe the working principle of a PIR (Passive Infrared) Motion Sensor. What are its applications, and what voltage range does it typically operate within?

d) Explain LDR (Light Dependent Resistor) Sensor. How does it respond to different light intensities, and why is voltage division necessary in LDR circuits?

e) Distinguish between different types of actuators: Servo Motor, Solenoid, and Stepper Motor.

Q.3 Attempt Any Two. **12**

a) Explain different layers of IoT architecture in detail.

b) Discuss the DHT (Digital Humidity and Temperature) Sensor. How does it measure temperature and humidity, and what are its voltage and power requirements?

c) Describe why relay is needed when using an actuator in a control circuit.

SECTION – II

Q.4 Attempt Any Four. **16**

a) Explain the working of MQTT (Message Queuing Telemetry Transport) protocol in IoT communication. What are its advantages and limitations?

b) Discuss the differences between MQTT, CoAP, and XMPP in terms of reliability, scalability, and energy efficiency.

c) Explain the concept of Li-Fi (Light Fidelity) and compare it with traditional Wi-Fi in terms of speed, security, and applications.

d) Explain the advantages and disadvantages of Mesh topology in sensor networks. Why is it commonly used in IoT?

e) Compare Ring topology and Star topology.

Q.5 Attempt Any Two. **12**

a) Describe the working of an IoT-based home automation system. Discuss the key components, communication protocols, and security challenges associated with smart homes.

b) Describe the architecture and working of a smart parking system using IoT. How do sensors, cloud computing, and mobile applications contribute to efficient parking management?

c) Discuss the role of IoT sensors, automation, and data analytics in precision farming, irrigation control, and crop monitoring.

Set **P**

S.Y. (B.Tech.) (Mechanical Engineering) (Semester - II) (New) (CBCS)
Examination: March/April - 2026
Fundamentals of IOT (ENTMDM-02B)

Day & Date: Thursday, 30-04-2026 Max. Marks: 56
Time: 03:00 PM To 06:00 PM

Instructions: 1) All questions are compulsory.
2) Figures to the right indicate full marks.

SECTION – I

Q.2 Attempt Any Four. **16**

a) Explain the major components of IoT in detail.

b) Define the Internet of Things (IoT) and explain its significance in modern technology.

c) Describe the working principle of a PIR (Passive Infrared) Motion Sensor. What are its applications, and what voltage range does it typically operate within?

d) Explain LDR (Light Dependent Resistor) Sensor. How does it respond to different light intensities, and why is voltage division necessary in LDR circuits?

e) Distinguish between different types of actuators: Servo Motor, Solenoid, and Stepper Motor.

Q.3 Attempt Any Two. **12**

a) Explain different layers of IoT architecture in detail.

b) Discuss the DHT (Digital Humidity and Temperature) Sensor. How does it measure temperature and humidity, and what are its voltage and power requirements?

c) Describe why relay is needed when using an actuator in a control circuit.

SECTION – II

Q.4 Attempt Any Four. **16**

a) Explain the working of MQTT (Message Queuing Telemetry Transport) protocol in IoT communication. What are its advantages and limitations?

b) Discuss the differences between MQTT, CoAP, and XMPP in terms of reliability, scalability, and energy efficiency.

c) Explain the concept of Li-Fi (Light Fidelity) and compare it with traditional Wi-Fi in terms of speed, security, and applications.

d) Explain the advantages and disadvantages of Mesh topology in sensor networks. Why is it commonly used in IoT?

e) Compare Ring topology and Star topology.

Q.5 Attempt Any Two. **12**

a) Describe the working of an IoT-based home automation system. Discuss the key components, communication protocols, and security challenges associated with smart homes.

b) Describe the architecture and working of a smart parking system using IoT. How do sensors, cloud computing, and mobile applications contribute to efficient parking management?

c) Discuss the role of IoT sensors, automation, and data analytics in precision farming, irrigation control, and crop monitoring.

Set **Q**

S.Y. (B.Tech.) (Mechanical Engineering) (Semester - II) (New) (CBCS)
Examination: March/April - 2026
Fundamentals of IOT (ENTMDM-02B)

Day & Date: Thursday, 30-04-2026 Max. Marks: 70
Time: 03:00 PM To 06:00 PM

Instructions: 1) Q. No. 1 is compulsory. It should be solved in the first 30 minutes in Answer Book Page no 03 (Starting page of the Answer Book). Each question carries one mark.
2) Don't forget to Mention question paper set (P/Q/R/S) on top of page.
3) Figures to the right indicates full marks.
4) Assume suitable data if necessary and mention it clearly.

MCQ/Objective Type Questions

Duration: 30 Minutes Marks:14

Q.1 choose the correct alternatives from the options. 14

1) How many layers does the basic IoT architecture typically have?
a) 7 b) 2
c) 5 d) 3

2) In IoT architecture, which component is responsible for data processing and analytics?
a) Sensor b) Gateway
c) Cloud/Server d) Actuator

3) In which unit is angular velocity measured?
a) Meters per second (m/s) b) Degrees per second (°/s)
c) Newtons (N) d) Joules (J)

4) What does a gyro sensor measure?
a) Acceleration b) Angular velocity
c) Temperature d) Humidity

5) What is the main working principle of an ultrasonic distance sensor?
a) Light reflection b) Sound wave reflection
c) Magnetic field variation d) Capacitive sensing

6) Solenoid is commonly used for _____.
a) Rotational movement b) Linear actuation
c) Generating electricity d) Measuring temperature

7) What is the main advantage of a stepper motor over a DC motor?
a) Higher speed
b) Precise position control
c) Lower power consumption
d) No need for a power supply

8) What is the correct sequence of layers in the IoT architecture?
   a) Perception → Network → Application
   b) Network → Perception → Application
   c) Application → Network → Perception
   d) Perception → Application → Network

9) How many layers does the basic IoT architecture typically have?
   a) Below HF
   b) In HF
   c) Above HF
   d) None

10) Why is an ADC (Analog-to-Digital Converter) required for analog sensors?
   a) To store data in memory
   b) To convert analog signals to digital format
   c) To amplify signals
   d) To filter noise

11) Primary modes of radiation of helical antenna are _____.
   a) Normal mode only
   b) Axial mode only
   c) Both normal and axial mode
   d) None

12) If the HPBW is 60° then FNBW is _____.
   a) 2
   b) 3
   c) 5
   d) 7

13) The DHT sensor is used to measure _____.
   a) Distance and speed
   b) Temperature and humidity
   c) Light intensity and pressure
   d) Vibration and motion

14) Which of the following is NOT a key feature of IoT?
   a) Interconnectivity
   b) Autonomy
   c) High human intervention
   d) Data exchange

MCQ/Objective Type Questions

Duration: 30 Minutes Marks:14

Q.1 Choose the correct alternative from the options. **14**

1) Each row of the table describes an _____ and each column describes a _____.
a) observation, variables b) variable, attributes
c) variable, features d) All of the above

2) _____ is not a measure of central tendency.
a) Mode b) Mean
c) Range d) Median

3) Which of the following is an example of a nominal variable?
a) Blood pressure
b) Eye color
c) Height of individuals
d) Time taken to complete a task

4) Which of the following is NOT a step in preparing data tables for analysis?
a) Data cleaning
b) Data visualization
c) Removing irrelevant observations
d) Converting data into a suitable format for analysis

5) The process of cleaning the data primarily involves _____.
a) Creating visualizations
b) Removing missing or invalid data and correcting errors
c) Aggregating data into groups
d) Generating hypotheses from data

6) To calculate the median, all the items of a series have to be arranged in a/an _____.
   a) Descending order
   b) Ascending order
   c) Ascending or descending order
   d) None of the above

7) Which method can be used to convert text data to numerical values?
   a) One-hot encoding
   b) Normalization
   c) Binning
   d) Grouping

8) What is the output of data frame, head() method _____.
   a) return only the first row
   b) return only headers or column name of the Data Frame
   c) return the first five rows of the Data Frame
   d) throw an exception as it expects

9) Which of the following is true about outliers?
   a) Data points that deviate a lot from normal
   b) can reduce the accuracy of model
   c) a & b
   d) None of these

10) After installing Pandas, which command is used to import it in a Python script?
   a) import pandas as pd
   b) import pandas
   c) from pandas import *
   d) import pandas as pd as np

11) Which Pandas method is used to remove rows with missing data from a DataFrame?
   a) df.dropna()
   b) df.fillna()
   c) df.isna()
   d) df.replace()

12) What is the default type of join used when using pd.merge()?
   a) Left join
   b) Inner join
   c) Right join
   d) Outer join

13) Which of the following correctly plots a histogram using Matplotlib?
   a) plt.hist(data, bins=10)
   b) plt.histogram(data, bins=10)
   c) sns.histplot(data=data, bins=10)
   d) pit.hist(data, 10)

14) Which of the following data types in Python is used to represent real numbers?
   a) int
   b) string
   c) float
   d) Boolean

2) Figures to the right indicate full marks.
3) Assume suitable data whenever needed & mention it clearly.

Section – I

Q.2 Attempt the following. (Any Three) **12**

a) Describe the process for making sense of data.

b) Explain the different types of variables.

c) What are the Key aspects of data preprocessing for hypothesis testing?

d) Write a short note on different sources of data.

Q.3 Attempt the following. (Any One) **08**

a) Define a Range? What are the Applications of Range? Explain the method of How to Find Range with example?

b) Why there is a need to generate consistent scale across variables? Describe with example.

Q.4 Compulsory Question. **08**

Calculate the following statistics for the variable Age from following Table:

Name	Age
P. Lee	35
R. Jones	52
J. Smith	45
A. Patel	70
M. Owen	24
S. Green	43
N. Cook	68
W. Hands	77
P. Rice	45
F. Marsh	28

i) Mode ii) Median
iii) Mean iv) Range
v) Variance vi) Standard deviation

Section – II

Q.5 Attempt the following. (Any Three) **12**

a) What is Data Visualization, identify the design principles of data visualization.

b) What is a dynamic technique in data visualization? Explain with example.

c) Explain univariate data visualization & Multivariate Data Visualization with suitable example.

d) Write a program to perform concat and merging operation of two datasets using Pandas library.

Q.6 Attempt the following. (Any One) **08**

a) Define a scatter plot? Write syntax of scatter plot and explain its parameter in the syntax.

b) What is frequency distribution table? Draw a frequency distribution table for suitable example.

Q.7 Compulsory Question. **08**

Write the Python code to draw the Bar Chart, Histogram using Matplotlib.

a) What is Data Visualization, identify the design principles of data visualization.

b) What is a dynamic technique in data visualization? Explain with example.

c) Explain univariate data visualization & Multivariate Data Visualization with suitable example.

d) Write a program to perform concat and merging operation of two datasets using Pandas library.

Q.6 Attempt the following. (Any One) **08**

a) Define a scatter plot? Write syntax of scatter plot and explain its parameter in the syntax.

b) What is frequency distribution table? Draw a frequency distribution table for suitable example.

Q.7 Compulsory Question. **08**

Write the Python code to draw the Bar Chart, Histogram using Matplotlib.

Seat No.	

Set **R**

S.Y. (B.Tech.) (Civil Engineering) (Semester - II) (New) (CBCS)
Examination: March/April – 2026
Data Pre-processing & Visualization (CSEMDM-02A)

Day & Date: Thursday, 30-04-2026 Max. Marks: 70
Time: 03:00 PM To 06:00 PM

Instructions: 1) Q. No. 1 is compulsory. It should be solved in the first 30 minutes in Answer Book Page no 03 (Starting page of the Answer Book). Each question carries one mark.
2) Don't forget to Mention question paper set (P/Q/R/S) on top of page.
3) Figures to the right indicates full marks.
4) Assume suitable data whenever needed & mention it clearly.

MCQ/Objective Type Questions

Duration: 30 Minutes Marks:14

Q.1 Choose the correct alternative from the options. 14

1) Which Pandas method is used to remove rows with missing data from a DataFrame?
a) df.dropna() b) df.fillna()
c) df.isna() d) df.replace()

2) What is the default type of join used when using pd.merge()?
a) Left join b) Inner join
c) Right join d) Outer join

3) Which of the following correctly plots a histogram using Matplotlib?
a) plt.hist(data, bins=10)
b) plt.histogram(data, bins=10)
c) sns.histplot(data=data, bins=10)
d) pit.hist(data, 10)

4) Which of the following data types in Python is used to represent real numbers?
a) int b) string
c) float d) Boolean

5) Each row of the table describes an _____ and each column describes a _____.
a) observation, variables b) variable, attributes
c) variable, features d) All of the above

6) _____ is not a measure of central tendency.
a) Mode b) Mean
c) Range d) Median

7) Which of the following is an example of a nominal variable?
   a) Blood pressure
   b) Eye color
   c) Height of individuals
   d) Time taken to complete a task

8) Which of the following is NOT a step in preparing data tables for analysis?
   a) Data cleaning
   b) Data visualization
   c) Removing irrelevant observations
   d) Converting data into a suitable format for analysis

9) The process of cleaning the data primarily involves _____.
   a) Creating visualizations
   b) Removing missing or invalid data and correcting errors
   c) Aggregating data into groups
   d) Generating hypotheses from data

10) To calculate the median, all the items of a series have to be arranged in a/an _____.
   a) Descending order
   b) Ascending order
   c) Ascending or descending order
   d) None of the above

11) Which method can be used to convert text data to numerical values?
   a) One-hot encoding
   b) Normalization
   c) Binning
   d) Grouping

12) What is the output of data frame, head() method _____.
   a) return only the first row
   b) return only headers or column name of the Data Frame
   c) return the first five rows of the Data Frame
   d) throw an exception as it expects

13) Which of the following is true about outliers?
   a) Data points that deviate a lot from normal
   b) can reduce the accuracy of model
   c) a & b
   d) None of these

14) After installing Pandas, which command is used to import it in a Python script?
   a) import pandas as pd
   b) import pandas
   c) from pandas import *
   d) import pandas as pd as np

Seat No.	

Set **R**

S.Y. (B.Tech.) (Civil Engineering) (Semester - II) (New) (CBCS)
Examination: March/April – 2026
Data Pre-processing & Visualization (CSEMDM-02A)

Day & Date: Thursday, 30-04-2026 Max. Marks: 56
Time: 03:00 PM To 06:00 PM

Instructions: 1) All questions are compulsory.
2) Figures to the right indicate full marks.
3) Assume suitable data whenever needed & mention it clearly.

Section – I

Q.2 Attempt the following. (Any Three) **12**

a) Describe the process for making sense of data.

b) Explain the different types of variables.

c) What are the Key aspects of data preprocessing for hypothesis testing?

d) Write a short note on different sources of data.

Q.3 Attempt the following. (Any One) **08**

a) Define a Range? What are the Applications of Range? Explain the method of How to Find Range with example?

b) Why there is a need to generate consistent scale across variables? Describe with example.

Q.4 Compulsory Question. **08**

Calculate the following statistics for the variable Age from following Table:

Name	Age
P. Lee	35
R. Jones	52
J. Smith	45
A. Patel	70
M. Owen	24
S. Green	43
N. Cook	68
W. Hands	77
P. Rice	45
F. Marsh	28

i) Mode ii) Median
iii) Mean iv) Range
v) Variance vi) Standard deviation

Section – II

Q.5 Attempt the following. (Any Three) **12**

a) What is Data Visualization, identify the design principles of data visualization.

b) What is a dynamic technique in data visualization? Explain with example.

c) Explain univariate data visualization & Multivariate Data Visualization with suitable example.

d) Write a program to perform concat and merging operation of two datasets using Pandas library.

Q.6 Attempt the following. (Any One) **08**

a) Define a scatter plot? Write syntax of scatter plot and explain its parameter in the syntax.

b) What is frequency distribution table? Draw a frequency distribution table for suitable example.

Q.7 Compulsory Question. **08**

Write the Python code to draw the Bar Chart, Histogram using Matplotlib.

Set **S**

S.Y. (B.Tech.) (Computer Science and Engineering) (Semester - II) (New) (CBCS) Examination: March/April – 2026
Data Pre-processing & Visualization (CSEMDM-02A)

Day & Date: Thursday, 30-04-2026 Max. Marks: 70
Time: 03:00 PM To 06:00 PM

Instructions: 1) Q. No. 1 is compulsory. It should be solved in the first 30 minutes in Answer Book Page no 03 (Starting page of the Answer Book). Each question carries one mark.
2) Don't forget to Mention question paper set (P/Q/R/S) on top of page.
3) Figures to the right indicates full marks.
4) Assume suitable data whenever needed & mention it clearly.

MCQ/Objective Type Questions

Duration: 30 Minutes Marks:14

Q.1 Choose the correct alternative from the options. 14

1) To calculate the median, all the items of a series have to be arranged in a/an _____.
a) Descending order
b) Ascending order
c) Ascending or descending order
d) None of the above

2) Which method can be used to convert text data to numerical values?
a) One-hot encoding b) Normalization
c) Binning d) Grouping

3) What is the output of data frame, head() method _____.
a) return only the first row
b) return only headers or column name of the Data Frame
c) return the first five rows of the Data Frame
d) throw an exception as it expects

4) Which of the following is true about outliers?
a) Data points that deviate a lot from normal
b) can reduce the accuracy of model
c) a & b
d) None of these

5) After installing Pandas, which command is used to import it in a Python script?
a) import pandas as pd b) import pandas
c) from pandas import * d) import pandas as pd as np

6) Which Pandas method is used to remove rows with missing data from a DataFrame?
a) df.dropna()
b) df.fillna()
c) df.isna()
d) df.replace()

7) What is the default type of join used when using pd.merge()?
a) Left join
b) Inner join
c) Right join
d) Outer join

8) Which of the following correctly plots a histogram using Matplotlib?
a) plt.hist(data, bins=10)
b) plt.histogram(data, bins=10)
c) sns.histplot(data=data, bins=10)
d) pit.hist(data, 10)

9) Which of the following data types in Python is used to represent real numbers?
a) int
b) string
c) float
d) Boolean

10) Each row of the table describes an _____ and each column describes a _____.
a) observation, variables
b) variable, attributes
c) variable, features
d) All of the above

11) _____ is not a measure of central tendency.
a) Mode
b) Mean
c) Range
d) Median

12) Which of the following is an example of a nominal variable?
a) Blood pressure
b) Eye color
c) Height of individuals
d) Time taken to complete a task

13) Which of the following is NOT a step in preparing data tables for analysis?
a) Data cleaning
b) Data visualization
c) Removing irrelevant observations
d) Converting data into a suitable format for analysis

14) The process of cleaning the data primarily involves _____.
a) Creating visualizations
b) Removing missing or invalid data and correcting errors
c) Aggregating data into groups
d) Generating hypotheses from data

Set **S**

S.Y. (B.Tech.) (Computer Science and Engineering) (Semester - II) (New) (CBCS) Examination: March/April – 2026
Data Pre-processing & Visualization (CSEMDM-02A)

Day & Date: Thursday, 30-04-2026 Max. Marks: 56
Time: 03:00 PM To 06:00 PM

Instructions: 1) All questions are compulsory.
2) Figures to the right indicate full marks.
3) Assume suitable data whenever needed & mention it clearly.

Section – I

Q.2 Attempt the following. (Any Three) **12**

a) Describe the process for making sense of data.

b) Explain the different types of variables.

c) What are the Key aspects of data preprocessing for hypothesis testing?

d) Write a short note on different sources of data.

Q.3 Attempt the following. (Any One) **08**

a) Define a Range? What are the Applications of Range? Explain the method of How to Find Range with example?

b) Why there is a need to generate consistent scale across variables? Describe with example.

Q.4 Compulsory Question. **08**

Calculate the following statistics for the variable Age from following Table:

Name	Age
P. Lee	35
R. Jones	52
J. Smith	45
A. Patel	70
M. Owen	24
S. Green	43
N. Cook	68
W. Hands	77
P. Rice	45
F. Marsh	28

i) Mode ii) Median
iii) Mean iv) Range
v) Variance vi) Standard deviation

Section – II

Q.5 Attempt the following. (Any Three) **12**

a) What is Data Visualization, identify the design principles of data visualization.

b) What is a dynamic technique in data visualization? Explain with example.

c) Explain univariate data visualization & Multivariate Data Visualization with suitable example.

d) Write a program to perform concat and merging operation of two datasets using Pandas library.

Q.6 Attempt the following. (Any One) **08**

a) Define a scatter plot? Write syntax of scatter plot and explain its parameter in the syntax.

b) What is frequency distribution table? Draw a frequency distribution table for suitable example.

Q.7 Compulsory Question. **08**

Write the Python code to draw the Bar Chart, Histogram using Matplotlib.

Day & Date: Thursday, 30-04-2026 Max. Marks: 70
Time: 03:00 PM To 06:00 PM

Instructions: 1) Q. No. 1 is compulsory. It should be solved in the first 30 minutes in Answer Book Page no 03 (Starting page of the Answer Book). Each question carries one mark.
2) Don't forget to Mention question paper set (P/Q/R/S) on top of page.
3) Figures to the right indicates full marks.
4) Assume suitable data whenever needed & mention it clearly.

MCQ/Objective Type Questions

Duration: 30 Minutes Marks:14

Q.1 Choose the correct alternative from the options. 14

1) Each row of the table describes an _____ and each column describes a _____.
a) observation, variables b) variable, attributes
c) variable, features d) All of the above

2) _____ is not a measure of central tendency.
a) Mode b) Mean
c) Range d) Median

3) Which of the following is an example of a nominal variable?
a) Blood pressure
b) Eye color
c) Height of individuals
d) Time taken to complete a task

4) Which of the following is NOT a step in preparing data tables for analysis?
a) Data cleaning
b) Data visualization
c) Removing irrelevant observations
d) Converting data into a suitable format for analysis

5) The process of cleaning the data primarily involves _____.
a) Creating visualizations
b) Removing missing or invalid data and correcting errors
c) Aggregating data into groups
d) Generating hypotheses from data

6) To calculate the median, all the items of a series have to be arranged in a/an _____.
   a) Descending order
   b) Ascending order
   c) Ascending or descending order
   d) None of the above

7) Which method can be used to convert text data to numerical values?
   a) One-hot encoding
   b) Normalization
   c) Binning
   d) Grouping

8) What is the output of data frame, head() method _____.
   a) return only the first row
   b) return only headers or column name of the Data Frame
   c) return the first five rows of the Data Frame
   d) throw an exception as it expects

9) Which of the following is true about outliers?
   a) Data points that deviate a lot from normal
   b) can reduce the accuracy of model
   c) a & b
   d) None of these

10) After installing Pandas, which command is used to import it in a Python script?
   a) import pandas as pd
   b) import pandas
   c) from pandas import *
   d) import pandas as pd as np

11) Which Pandas method is used to remove rows with missing data from a DataFrame?
   a) df.dropna()
   b) df.fillna()
   c) df.isna()
   d) df.replace()

12) What is the default type of join used when using pd.merge()?
   a) Left join
   b) Inner join
   c) Right join
   d) Outer join

13) Which of the following correctly plots a histogram using Matplotlib?
   a) plt.hist(data, bins=10)
   b) plt.histogram(data, bins=10)
   c) sns.histplot(data=data, bins=10)
   d) pit.hist(data, 10)

14) Which of the following data types in Python is used to represent real numbers?
   a) int
   b) string
   c) float
   d) Boolean

Seat No.	

Set **P**

S.Y. (B.Tech.) (Electrical Engineering) (Semester - II) (New) (CBCS)
Examination: March/April – 2026
Data Pre-processing & Visualization (CSEMDM-02A)

Day & Date: Thursday, 30-04-2026 Max. Marks: 56
Time: 03:00 PM To 06:00 PM

Instructions: 1) All questions are compulsory.
2) Figures to the right indicate full marks.
3) Assume suitable data whenever needed & mention it clearly.

Section – I

Q.2 Attempt the following. (Any Three) **12**

a) Describe the process for making sense of data.

b) Explain the different types of variables.

c) What are the Key aspects of data preprocessing for hypothesis testing?

d) Write a short note on different sources of data.

Q.3 Attempt the following. (Any One) **08**

a) Define a Range? What are the Applications of Range? Explain the method of How to Find Range with example?

b) Why there is a need to generate consistent scale across variables? Describe with example.

Q.4 Compulsory Question. **08**

Calculate the following statistics for the variable Age from following Table:

Name	Age
P. Lee	35
R. Jones	52
J. Smith	45
A. Patel	70
M. Owen	24
S. Green	43
N. Cook	68
W. Hands	77
P. Rice	45
F. Marsh	28

i) Mode ii) Median
iii) Mean iv) Range
v) Variance vi) Standard deviation

Section – II

Q.5 Attempt the following. (Any Three) **12**

a) What is Data Visualization, identify the design principles of data visualization.

b) What is a dynamic technique in data visualization? Explain with example.

c) Explain univariate data visualization & Multivariate Data Visualization with suitable example.

d) Write a program to perform concat and merging operation of two datasets using Pandas library.

Q.6 Attempt the following. (Any One) **08**

a) Define a scatter plot? Write syntax of scatter plot and explain its parameter in the syntax.

b) What is frequency distribution table? Draw a frequency distribution table for suitable example.

Q.7 Compulsory Question. **08**

Write the Python code to draw the Bar Chart, Histogram using Matplotlib.

Seat No.	

Set **Q**

S.Y. (B.Tech.) (Electrical Engineering) (Semester - II) (New) (CBCS)

Time: 03:00 PM To 06:00 PM

Instructions: 1) Q. No. 1 is compulsory. It should be solved in the first 30 minutes in Answer Book Page no 03 (Starting page of the Answer Book). Each question carries one mark.
2) Don't forget to Mention question paper set (P/Q/R/S) on top of page.
3) Figures to the right indicates full marks.
4) Assume suitable data whenever needed & mention it clearly.

MCQ/Objective Type Questions

Duration: 30 Minutes Marks:14

Q.1 Choose the correct alternative from the options. **14**

1) What is the output of data frame, head() method _____.
a) return only the first row
b) return only headers or column name of the Data Frame
c) return the first five rows of the Data Frame
d) throw an exception as it expects

2) Which of the following is true about outliers?
a) Data points that deviate a lot from normal
b) can reduce the accuracy of model
c) a & b
d) None of these

3) After installing Pandas, which command is used to import it in a Python script?
a) import pandas as pd
b) import pandas
c) from pandas import *
d) import pandas as pd as np

4) Which Pandas method is used to remove rows with missing data from a DataFrame?
a) df.dropna()
b) df.fillna()
c) df.isna()
d) df.replace()

5) What is the default type of join used when using pd.merge()?
a) Left join
b) Inner join
c) Right join
d) Outer join

6) Which of the following correctly plots a histogram using Matplotlib?
a) plt.hist(data, bins=10)
b) plt.histogram(data, bins=10)
c) sns.histplot(data=data, bins=10)
d) pit.hist(data, 10)

7) Which of the following data types in Python is used to represent real numbers?
a) int
b) string
c) float
d) Boolean

8) Each row of the table describes an _____ and each column describes a _____.
a) observation, variables
b) variable, attributes
c) variable, features
d) All of the above

9) _____ is not a measure of central tendency.
a) Mode
b) Mean
c) Range
d) Median

10) Which of the following is an example of a nominal variable?
a) Blood pressure
b) Eye color
c) Height of individuals
d) Time taken to complete a task

11) Which of the following is NOT a step in preparing data tables for analysis?
a) Data cleaning
b) Data visualization
c) Removing irrelevant observations
d) Converting data into a suitable format for analysis

12) The process of cleaning the data primarily involves _____.
a) Creating visualizations
b) Removing missing or invalid data and correcting errors
c) Aggregating data into groups
d) Generating hypotheses from data

13) To calculate the median, all the items of a series have to be arranged in a/an _____.
a) Descending order
b) Ascending order
c) Ascending or descending order
d) None of the above

14) Which method can be used to convert text data to numerical values?
a) One-hot encoding
b) Normalization
c) Binning
d) Grouping

Seat No.	

Set **Q**

S.Y. (B.Tech.) (Electronics and Telecommunication Engineering) (Semester - II) (New) (CBCS) Examination: March/April – 2026
Data Pre-processing & Visualization (CSEMDM-02A)

Day & Date: Thursday, 30-04-2026 Max. Marks: 56
Time: 03:00 PM To 06:00 PM

Instructions: 1) All questions are compulsory.
2) Figures to the right indicate full marks.
3) Assume suitable data whenever needed & mention it clearly.

Section – I

Q.2 Attempt the following. (Any Three) **12**

a) Describe the process for making sense of data.

b) Explain the different types of variables.

c) What are the Key aspects of data preprocessing for hypothesis testing?

d) Write a short note on different sources of data.

Q.3 Attempt the following. (Any One) **08**

a) Define a Range? What are the Applications of Range? Explain the method of How to Find Range with example?

b) Why there is a need to generate consistent scale across variables? Describe with example.

Q.4 Compulsory Question. **08**

Calculate the following statistics for the variable Age from following Table:

Name	Age
P. Lee	35
R. Jones	52
J. Smith	45
A. Patel	70
M. Owen	24
S. Green	43
N. Cook	68
W. Hands	77
P. Rice	45
F. Marsh	28

i) Mode ii) Median
iii) Mean iv) Range
v) Variance vi) Standard deviation

Section – II

Q.5 Attempt the following. (Any Three) **12**

a) What is Data Visualization, identify the design principles of data visualization.

b) What is a dynamic technique in data visualization? Explain with example.

c) Explain univariate data visualization & Multivariate Data Visualization with suitable example.

d) Write a program to perform concat and merging operation of two datasets using Pandas library.

Q.6 Attempt the following. (Any One) **08**

a) Define a scatter plot? Write syntax of scatter plot and explain its parameter in the syntax.

b) What is frequency distribution table? Draw a frequency distribution table for suitable example.

Q.7 Compulsory Question. **08**

Write the Python code to draw the Bar Chart, Histogram using Matplotlib.

Seat No.	

Set **R**

S.Y. (B.Tech.) (Electronics and Telecommunication Engineering) (Semester - II) (New) (CBCS) Examination: March/April – 2026
Data Pre-processing & Visualization (CSEMDM-02A)

Day & Date: Thursday, 30-04-2026 Max. Marks: 70
Time: 03:00 PM To 06:00 PM

Instructions: 1) Q. No. 1 is compulsory. It should be solved in the first 30 minutes in Answer Book Page no 03 (Starting page of the Answer Book). Each question carries one mark.
2) Don't forget to Mention question paper set (P/Q/R/S) on top of page.
3) Figures to the right indicates full marks.
4) Assume suitable data whenever needed & mention it clearly.

MCQ/Objective Type Questions

Duration: 30 Minutes Marks:14

Q.1 Choose the correct alternative from the options. 14

1) Which Pandas method is used to remove rows with missing data from a DataFrame?
a) df.dropna() b) df.fillna()
c) df.isna() d) df.replace()

2) What is the default type of join used when using pd.merge()?

Duration: 30 Minutes Marks:14

Q.1 Choose the correct alternative from the options. 14

1) Which Pandas method is used to remove rows with missing data from a DataFrame?
a) df.dropna() b) df.fillna()
c) df.isna() d) df.replace()

2) What is the default type of join used when using pd.merge()?
a) Left join b) Inner join
c) Right join d) Outer join

3) Which of the following correctly plots a histogram using Matplotlib?
a) plt.hist(data, bins=10)
b) plt.histogram(data, bins=10)
c) sns.histplot(data=data, bins=10)
d) pit.hist(data, 10)

4) Which of the following data types in Python is used to represent real numbers?
a) int b) string
c) float d) Boolean

5) Each row of the table describes an _____ and each column describes a _____.
a) observation, variables b) variable, attributes
c) variable, features d) All of the above

6) _____ is not a measure of central tendency.
a) Mode b) Mean
c) Range d) Median

7) Which of the following is an example of a nominal variable?
   a) Blood pressure
   b) Eye color
   c) Height of individuals
   d) Time taken to complete a task

8) Which of the following is NOT a step in preparing data tables for analysis?
   a) Data cleaning
   b) Data visualization
   c) Removing irrelevant observations
   d) Converting data into a suitable format for analysis

9) The process of cleaning the data primarily involves _____.
   a) Creating visualizations
   b) Removing missing or invalid data and correcting errors
   c) Aggregating data into groups
   d) Generating hypotheses from data

10) To calculate the median, all the items of a series have to be arranged in a/an _____.
   a) Descending order
   b) Ascending order
   c) Ascending or descending order
   d) None of the above

11) Which method can be used to convert text data to numerical values?
   a) One-hot encoding
   b) Normalization
   c) Binning
   d) Grouping

12) What is the output of data frame, head() method _____.
   a) return only the first row
   b) return only headers or column name of the Data Frame
   c) return the first five rows of the Data Frame
   d) throw an exception as it expects

13) Which of the following is true about outliers?
   a) Data points that deviate a lot from normal
   b) can reduce the accuracy of model
   c) a & b
   d) None of these

14) After installing Pandas, which command is used to import it in a Python script?
   a) import pandas as pd
   b) import pandas
   c) from pandas import *
   d) import pandas as pd as np

Seat No.	

Set **R**

S.Y. (B.Tech.) (Mechanical Engineering) (Semester - II) (New) (CBCS)
Examination: March/April – 2026
Data Pre-processing & Visualization (CSEMDM-02A)

Day & Date: Thursday, 30-04-2026 Max. Marks: 56
Time: 03:00 PM To 06:00 PM

Instructions: 1) All questions are compulsory.
2) Figures to the right indicate full marks.
3) Assume suitable data whenever needed & mention it clearly.

Section – I

Q.2 Attempt the following. (Any Three) **12**

a) Describe the process for making sense of data.

b) Explain the different types of variables.

c) What are the Key aspects of data preprocessing for hypothesis testing?

d) Write a short note on different sources of data.

Q.3 Attempt the following. (Any One) **08**

a) Define a Range? What are the Applications of Range? Explain the method of How to Find Range with example?

b) Why there is a need to generate consistent scale across variables? Describe with example.

Q.4 Compulsory Question. **08**

Calculate the following statistics for the variable Age from following Table:

Name	Age
P. Lee	35
R. Jones	52
J. Smith	45
A. Patel	70
M. Owen	24
S. Green	43
N. Cook	68
W. Hands	77
P. Rice	45
F. Marsh	28

i) Mode ii) Median
iii) Mean iv) Range
v) Variance vi) Standard deviation

Section – II

Q.5 Attempt the following. (Any Three) **12**

a) What is Data Visualization, identify the design principles of data visualization.

b) What is a dynamic technique in data visualization? Explain with example.

c) Explain univariate data visualization & Multivariate Data Visualization with suitable example.

d) Write a program to perform concat and merging operation of two datasets using Pandas library.

Q.6 Attempt the following. (Any One) **08**

a) Define a scatter plot? Write syntax of scatter plot and explain its parameter in the syntax.

b) What is frequency distribution table? Draw a frequency distribution table for suitable example.

Q.7 Compulsory Question. **08**

Write the Python code to draw the Bar Chart, Histogram using Matplotlib.

Seat No.	

Set **S**

S.Y. (B.Tech.) (Mechanical Engineering) (Semester - II) (New) (CBCS)
Examination: March/April – 2026
Data Pre-processing & Visualization (CSEMDM-02A)

Day & Date: Thursday, 30-04-2026 Max. Marks: 70
Time: 03:00 PM To 06:00 PM

Instructions: 1) Q. No. 1 is compulsory. It should be solved in the first 30 minutes in Answer Book Page no 03 (Starting page of the Answer Book). Each question carries one mark.
2) Don't forget to Mention question paper set (P/Q/R/S) on top of page.
3) Figures to the right indicates full marks.
4) Assume suitable data whenever needed & mention it clearly.

MCQ/Objective Type Questions

Duration: 30 Minutes Marks:14

Q.1 Choose the correct alternative from the options. 14

1) To calculate the median, all the items of a series have to be arranged in a/an _____.
a) Descending order
b) Ascending order
c) Ascending or descending order
d) None of the above

2) Which method can be used to convert text data to numerical values?
a) One-hot encoding b) Normalization
c) Binning d) Grouping

3) What is the output of data frame, head() method _____.
a) return only the first row
b) return only headers or column name of the Data Frame
c) return the first five rows of the Data Frame
d) throw an exception as it expects

4) Which of the following is true about outliers?
a) Data points that deviate a lot from normal
b) can reduce the accuracy of model
c) a & b
d) None of these

5) After installing Pandas, which command is used to import it in a Python script?
a) import pandas as pd b) import pandas
c) from pandas import * d) import pandas as pd as np

6) Which Pandas method is used to remove rows with missing data from a DataFrame?
a) df.dropna()
b) df.fillna()
c) df.isna()
d) df.replace()

7) What is the default type of join used when using pd.merge()?
a) Left join
b) Inner join
c) Right join
d) Outer join

8) Which of the following correctly plots a histogram using Matplotlib?
a) plt.hist(data, bins=10)
b) plt.histogram(data, bins=10)
c) sns.histplot(data=data, bins=10)
d) pit.hist(data, 10)

9) Which of the following data types in Python is used to represent real numbers?
a) int
b) string
c) float
d) Boolean

10) Each row of the table describes an _____ and each column describes a _____.
a) observation, variables
b) variable, attributes
c) variable, features
d) All of the above

11) _____ is not a measure of central tendency.
a) Mode
b) Mean
c) Range
d) Median

12) Which of the following is an example of a nominal variable?
a) Blood pressure
b) Eye color
c) Height of individuals
d) Time taken to complete a task

13) Which of the following is NOT a step in preparing data tables for analysis?
a) Data cleaning
b) Data visualization
c) Removing irrelevant observations
d) Converting data into a suitable format for analysis

14) The process of cleaning the data primarily involves _____.
a) Creating visualizations
b) Removing missing or invalid data and correcting errors
c) Aggregating data into groups
d) Generating hypotheses from data

2) Don't forget to Mention question paper set (P/Q/R/S) on top of page.
3) Figures to the right indicates full marks.
4) Assume suitable data wherever necessary.

MCQ/Objective Type Questions

Duration: 30 Minutes Marks:14

Q.1 Choose the correct Answer. **14**

1) This money is considered as an investment by the organisation in doing quality work.
a) Blue Money b) White Money
c) Green Money d) Red Money

2) It is an activity where we check the work products with reference to standards, guidelines and procedures.
a) Validation b) Quality Assurance
c) Verification d) None

3) This testing involves testing of high-level design as well as low-level design.
a) Big Bang b) Design Testing
c) Requirement Testing d) Code Testing

4) _____ coverage involves tracking a piece of data completely through the software.
a) Data flow b) Process flow
c) Information flow d) None

5) _____ is the process of methodically reducing the huge set of possible test cases into a much smaller, but still equally effective set.
a) Test Planning b) Test Strategy
c) Test Design d) Equivalence Partitioning

6) _____ is intended to determine whether the changed components have introduced any error in unchanged components of the system.
a) Regression Testing b) Stress Testing
c) Usability Testing d) Installation Testing

7) What are the types of Integration Testing?
a) Big Bang Testing
b) Bottom-Up Testing
c) Top-Down Testing
d) All the above

8) Reasons for not fixing all the bugs _____.
a) Too risky to fix
b) Not enough time
c) Inefficient bug reporting
d) All

9) This defines the step-by-step details of exactly how to perform the test cases.
a) Test Design
b) Test Procedures
c) Test Phases
d) Test Planning

10) We can Achieve Software quality by using _____.
a) Project Management Techniques
b) Quality Control
c) Quality Assurance
d) All

11) An effective software process applied in a manner that creates a useful product that provides measurable value for those who produce it and those who use it. This can be defined as _____.
a) Software Quality
b) Quality Control
c) Software Availability
d) All

12) Goals of test case planning are _____.
a) Organization
b) Repeatability
c) Tracking
d) All

13) For random testing a _____ automated testing tool with its continuous repetition and use, can expose bugs such as memory leaks that might not occur until many hours or days of normal use of a newly developed software.
a) 'Visual Test' named
b) 'Macro Magic' named
c) 'Selenium' named
d) 'Dumb Monkey' Technique Based

14) _____ test tool allows you to see details of the software's operation that you wouldn't normally be able to see.
a) Viewers and Monitors
b) Drivers
c) Stubs
d) Stress and Load Tools

a) Explain Defect Management Process.
b) Explain the verification and validation model.
c) Explain the Integration Testing with Bottom up & Top Down testing approach.

SECTION – II

Q.4 Answer the following questions. (Any Four) **16**

a) What are the four reasons for Test Case Planning?
b) Why it is not possible to fix all the bugs?
c) Explain the elements of Software Quality Assurance.
d) Explain five views of quality.
e) Explain Random Testing in automation.

Q.5 Answer any two questions. **12**

a) Explain Test case planning in detail with diagram.
b) Describe SQA Processes and Product characteristics in SQA.
c) What is automation test? Explain the benefits of automation test.

Seat No.		Set	P

S.Y. (B.Tech.) (Computer Science and Engineering) (Semester - II) (New) (CBCS) Examination: March/April – 2026
Software Testing & Quality Assurance (CSEMDM-02B)

Day & Date: Thursday, 30-04-2026 Max. Marks: 70
Time: 03:00 PM To 06:00 PM

Instructions: 1) Q. No. 1 is compulsory. It should be solved in the first 30 minutes in Answer Book Page no 03 (Starting page of the Answer Book). Each question carries one mark.
2) Don't forget to Mention question paper set (P/Q/R/S) on top of page.
3) Figures to the right indicates full marks.
4) Assume suitable data wherever necessary.

MCQ/Objective Type Questions

Duration: 30 Minutes Marks:14

Q.1 Choose the correct Answer. **14**

1) This money is considered as an investment by the organisation in doing quality work.
a) Blue Money b) White Money
c) Green Money d) Red Money

2) It is an activity where we check the work products with reference to standards, guidelines and procedures.
a) Validation b) Quality Assurance
c) Verification d) None

3) This testing involves testing of high-level design as well as low-level design.
a) Big Bang b) Design Testing
c) Requirement Testing d) Code Testing

4) _____ coverage involves tracking a piece of data completely through the software.
a) Data flow b) Process flow
c) Information flow d) None

5) _____ is the process of methodically reducing the huge set of possible test cases into a much smaller, but still equally effective set.
a) Test Planning b) Test Strategy
c) Test Design d) Equivalence Partitioning

6) _____ is intended to determine whether the changed components have introduced any error in unchanged components of the system.
a) Regression Testing b) Stress Testing
c) Usability Testing d) Installation Testing

7) What are the types of Integration Testing?
a) Big Bang Testing
b) Bottom-Up Testing
c) Top-Down Testing
d) All the above

8) Reasons for not fixing all the bugs _____.
a) Too risky to fix
b) Not enough time
c) Inefficient bug reporting
d) All

9) This defines the step-by-step details of exactly how to perform the test cases.
a) Test Design
b) Test Procedures
c) Test Phases
d) Test Planning

10) We can Achieve Software quality by using _____.
a) Project Management Techniques
b) Quality Control
c) Quality Assurance
d) All

11) An effective software process applied in a manner that creates a useful product that provides measurable value for those who produce it and those who use it. This can be defined as _____.
a) Software Quality
b) Quality Control
c) Software Availability
d) All

12) Goals of test case planning are _____.
a) Organization
b) Repeatability
c) Tracking
d) All

13) For random testing a _____ automated testing tool with its continuous repetition and use, can expose bugs such as memory leaks that might not occur until many hours or days of normal use of a newly developed software.
a) 'Visual Test' named
b) 'Macro Magic' named
c) 'Selenium' named
d) 'Dumb Monkey' Technique Based

14) _____ test tool allows you to see details of the software's operation that you wouldn't normally be able to see.
a) Viewers and Monitors
b) Drivers
c) Stubs
d) Stress and Load Tools

S.Y. (B.Tech.) (Electronics & Computer Engineering) (Semester - II) (New) (CBCS) Examination: March/April – 2026
Software Testing & Quality Assurance (CSEMDM-02B)

Day & Date: Thursday, 30-04-2026 Max. Marks: 70
Time: 03:00 PM To 06:00 PM

Instructions: 1) Q. No. 1 is compulsory. It should be solved in the first 30 minutes in Answer Book Page no 03 (Starting page of the Answer Book). Each question carries one mark.
2) Don't forget to Mention question paper set (P/Q/R/S) on top of page.
3) Figures to the right indicates full marks.
4) Assume suitable data wherever necessary.

MCQ/Objective Type Questions

Duration: 30 Minutes Marks:14

Q.1 Choose the correct Answer. **14**

1) An effective software process applied in a manner that creates a useful product that provides measurable value for those who produce it and those who use it. This can be defined as _____.
a) Software Quality b) Quality Control
c) Software Availability d) All

2) Goals of test case planning are _____.
a) Organization b) Repeatability
c) Tracking d) All

3) For random testing a _____ automated testing tool with its continuous repetition and use, can expose bugs such as memory leaks that might not occur until many hours or days of normal use of a newly developed software.
a) 'Visual Test' named
b) 'Macro Magic' named
c) 'Selenium' named
d) 'Dumb Monkey' Technique Based

4) _____ test tool allows you to see details of the software's operation that you wouldn't normally be able to see.
a) Viewers and Monitors b) Drivers
c) Stubs d) Stress and Load Tools

5) This money is considered as an investment by the organisation in doing quality work.
a) Blue Money b) White Money
c) Green Money d) Red Money

6) It is an activity where we check the work products with reference to standards, guidelines and procedures.

a) Validation
b) Quality Assurance
c) Verification
d) None

7) This testing involves testing of high-level design as well as low-level design.

a) Big Bang
b) Design Testing
c) Requirement Testing
d) Code Testing

8) _____ coverage involves tracking a piece of data completely through the software.

a) Data flow
b) Process flow
c) Information flow
d) None

9) _____ is the process of methodically reducing the huge set of possible test cases into a much smaller, but still equally effective set.

a) Test Planning
b) Test Strategy
c) Test Design
d) Equivalence Partitioning

10) _____ is intended to determine whether the changed components have introduced any error in unchanged components of the system.

a) Regression Testing
b) Stress Testing
c) Usability Testing
d) Installation Testing

11) What are the types of Integration Testing?

a) Big Bang Testing
b) Bottom-Up Testing
c) Top-Down Testing
d) All the above

12) Reasons for not fixing all the bugs _____.

a) Too risky to fix
b) Not enough time
c) Inefficient bug reporting
d) All

13) This defines the step-by-step details of exactly how to perform the test cases.

a) Test Design
b) Test Procedures
c) Test Phases
d) Test Planning

14) We can Achieve Software quality by using _____.

a) Project Management Techniques
b) Quality Control
c) Quality Assurance
d) All

Software Testing & Quality Assurance (CSEMDM-02B)

Day & Date: Thursday, 30-04-2026 Max. Marks: 56
Time: 03:00 PM To 06:00 PM

Instructions: 1) Answer all the questions from Section - I & Section - II.
2) Figures to the right indicate full marks.
3) Assume suitable data wherever necessary.

SECTION – I

Q.2 Answer the following questions. (Any Four) **16**

a) What are the misconceptions about testing?
b) Difference between Black Box Testing v/s White Box Testing.
c) Explain GUI testing with different advantages and disadvantages.
d) Write short note on Equivalence Partitioning.
e) Explain Defect Life cycle.

Q.3 Answer any two questions. **12**

a) Explain Defect Management Process.
b) Explain the verification and validation model.
c) Explain the Integration Testing with Bottom up & Top Down testing approach.

SECTION – II

Q.4 Answer the following questions. (Any Four) **16**

a) What are the four reasons for Test Case Planning?
b) Why it is not possible to fix all the bugs?
c) Explain the elements of Software Quality Assurance.
d) Explain five views of quality.
e) Explain Random Testing in automation.

Q.5 Answer any two questions. **12**

a) Explain Test case planning in detail with diagram.
b) Describe SQA Processes and Product characteristics in SQA.

S.Y. (B.Tech.) (Electronics and Telecommunication Engineering) (Semester - II) (New) (CBCS) Examination: March/April – 2026
Software Testing & Quality Assurance (CSEMDM-02B)

Day & Date: Thursday, 30-04-2026 Max. Marks: 70
Time: 03:00 PM To 06:00 PM

Instructions: 1) Q. No. 1 is compulsory. It should be solved in the first 30 minutes in Answer Book Page no 03 (Starting page of the Answer Book). Each question carries one mark.
2) Don't forget to Mention question paper set (P/Q/R/S) on top of page.
3) Figures to the right indicates full marks.
4) Assume suitable data wherever necessary.

MCQ/Objective Type Questions

Duration: 30 Minutes Marks:14

Q.1 Choose the correct Answer. **14**

1) This money is considered as an investment by the organisation in doing quality work.
a) Blue Money b) White Money
c) Green Money d) Red Money

2) It is an activity where we check the work products with reference to standards, guidelines and procedures.
a) Validation b) Quality Assurance
c) Verification d) None

3) This testing involves testing of high-level design as well as low-level design.
a) Big Bang b) Design Testing
c) Requirement Testing d) Code Testing

4) _____ coverage involves tracking a piece of data completely through the software.
a) Data flow b) Process flow
c) Information flow d) None

5) _____ is the process of methodically reducing the huge set of possible test cases into a much smaller, but still equally effective set.
a) Test Planning b) Test Strategy
c) Test Design d) Equivalence Partitioning

6) _____ is intended to determine whether the changed components have introduced any error in unchanged components of the system.
a) Regression Testing b) Stress Testing
c) Usability Testing d) Installation Testing

7) What are the types of Integration Testing?
a) Big Bang Testing
b) Bottom-Up Testing
c) Top-Down Testing
d) All the above

8) Reasons for not fixing all the bugs _____.
a) Too risky to fix
b) Not enough time
c) Inefficient bug reporting
d) All

9) This defines the step-by-step details of exactly how to perform the test cases.
a) Test Design
b) Test Procedures
c) Test Phases
d) Test Planning

10) We can Achieve Software quality by using _____.
a) Project Management Techniques
b) Quality Control
c) Quality Assurance
d) All

11) An effective software process applied in a manner that creates a useful product that provides measurable value for those who produce it and those who use it. This can be defined as _____.
a) Software Quality
b) Quality Control
c) Software Availability
d) All

12) Goals of test case planning are _____.
a) Organization
b) Repeatability
c) Tracking
d) All

13) For random testing a _____ automated testing tool with its continuous repetition and use, can expose bugs such as memory leaks that might not occur until many hours or days of normal use of a newly developed software.
a) 'Visual Test' named
b) 'Macro Magic' named
c) 'Selenium' named
d) 'Dumb Monkey' Technique Based

14) _____ test tool allows you to see details of the software's operation that you wouldn't normally be able to see.
a) Viewers and Monitors
b) Drivers
c) Stubs
d) Stress and Load Tools

Set **P**

S.Y. (B.Tech.) (Electronics and Telecommunication Engineering) (Semester - II) (New) (CBCS) Examination: March/April – 2026
Software Testing & Quality Assurance (CSEMDM-02B)

Day & Date: Thursday, 30-04-2026 Max. Marks: 56
Time: 03:00 PM To 06:00 PM

Instructions: 1) Answer all the questions from Section - I & Section - II.
2) Figures to the right indicate full marks.
3) Assume suitable data wherever necessary.

SECTION – I

Q.2 Answer the following questions. (Any Four) **16**

a) What are the misconceptions about testing?
b) Difference between Black Box Testing v/s White Box Testing.
c) Explain GUI testing with different advantages and disadvantages.
d) Write short note on Equivalence Partitioning.
e) Explain Defect Life cycle.

Q.3 Answer any two questions. **12**

a) Explain Defect Management Process.
b) Explain the verification and validation model.
c) Explain the Integration Testing with Bottom up & Top Down testing approach.

SECTION – II

Q.4 Answer the following questions. (Any Four) **16**

a) What are the four reasons for Test Case Planning?
b) Why it is not possible to fix all the bugs?
c) Explain the elements of Software Quality Assurance.
d) Explain five views of quality.
e) Explain Random Testing in automation.

Q.5 Answer any two questions. **12**

a) Explain Test case planning in detail with diagram.
b) Describe SQA Processes and Product characteristics in SQA.
c) What is automation test? Explain the benefits of automation test.

Examination: March/April – 2026
Software Testing & Quality Assurance (CSEMDM-02B)

Day & Date: Thursday, 30-04-2026 Max. Marks: 70
Time: 03:00 PM To 06:00 PM

Instructions: 1) Q. No. 1 is compulsory. It should be solved in the first 30 minutes in Answer Book Page no 03 (Starting page of the Answer Book). Each question carries one mark.
2) Don't forget to Mention question paper set (P/Q/R/S) on top of page.
3) Figures to the right indicates full marks.
4) Assume suitable data wherever necessary.

MCQ/Objective Type Questions

Duration: 30 Minutes Marks:14

Q.1 Choose the correct Answer. **14**

1) An effective software process applied in a manner that creates a useful product that provides measurable value for those who produce it and those who use it. This can be defined as _____.
a) Software Quality b) Quality Control
c) Software Availability d) All

2) Goals of test case planning are _____.
a) Organization b) Repeatability
c) Tracking d) All

3) For random testing a _____ automated testing tool with its continuous repetition and use, can expose bugs such as memory leaks that might not occur until many hours or days of normal use of a newly developed software.
a) 'Visual Test' named
b) 'Macro Magic' named
c) 'Selenium' named
d) 'Dumb Monkey' Technique Based

4) _____ test tool allows you to see details of the software's operation that you wouldn't normally be able to see.
a) Viewers and Monitors b) Drivers
c) Stubs d) Stress and Load Tools

5) This money is considered as an investment by the organisation in doing quality work.
a) Blue Money b) White Money
c) Green Money d) Red Money

6) It is an activity where we check the work products with reference to standards, guidelines and procedures.
a) Validation b) Quality Assurance
c) Verification d) None

7) This testing involves testing of high-level design as well as low-level design.
a) Big Bang b) Design Testing
c) Requirement Testing d) Code Testing

8) _____ coverage involves tracking a piece of data completely through the software.
a) Data flow b) Process flow
c) Information flow d) None

9) _____ is the process of methodically reducing the huge set of possible test cases into a much smaller, but still equally effective set.
a) Test Planning b) Test Strategy
c) Test Design d) Equivalence Partitioning

10) _____ is intended to determine whether the changed components have introduced any error in unchanged components of the system.
a) Regression Testing b) Stress Testing
c) Usability Testing d) Installation Testing

11) What are the types of Integration Testing?
a) Big Bang Testing b) Bottom-Up Testing
c) Top-Down Testing d) All the above

12) Reasons for not fixing all the bugs _____.
a) Too risky to fix b) Not enough time
c) Inefficient bug reporting d) All

13) This defines the step-by-step details of exactly how to perform the test cases.
a) Test Design b) Test Procedures
c) Test Phases d) Test Planning

14) We can Achieve Software quality by using _____.
a) Project Management Techniques
b) Quality Control
c) Quality Assurance
d) All

Set **R**

S.Y. (B.Tech.) (Mechanical Engineering) (Semester - II) (New) (CBCS)
Examination: March/April – 2026
Software Testing & Quality Assurance (CSEMDM-02B)

Day & Date: Thursday, 30-04-2026 Max. Marks: 56
Time: 03:00 PM To 06:00 PM

Instructions: 1) Answer all the questions from Section - I & Section - II.
2) Figures to the right indicate full marks.
3) Assume suitable data wherever necessary.

SECTION – I

Q.2 Answer the following questions. (Any Four) **16**

a) What are the misconceptions about testing?
b) Difference between Black Box Testing v/s White Box Testing.
c) Explain GUI testing with different advantages and disadvantages.
d) Write short note on Equivalence Partitioning.
e) Explain Defect Life cycle.

Q.3 Answer any two questions. **12**

a) Explain Defect Management Process.
b) Explain the verification and validation model.
c) Explain the Integration Testing with Bottom up & Top Down testing approach.

SECTION – II

Q.4 Answer the following questions. (Any Four) **16**

a) What are the four reasons for Test Case Planning?
b) Why it is not possible to fix all the bugs?
c) Explain the elements of Software Quality Assurance.
d) Explain five views of quality.
e) Explain Random Testing in automation.

Q.5 Answer any two questions. **12**

a) Explain Test case planning in detail with diagram.
b) Describe SQA Processes and Product characteristics in SQA.
c) What is automation test? Explain the benefits of automation test.

MCQ/Objective Type Questions

Duration: 30 Minutes Marks:14

Q.1 Choose the correct Answer. **14**

1) Renewable energy sources are _____.
a) Exhaustible b) Non-exhaustible
c) Fossil d) Nuclear

2) Which is non-renewable?
a) Solar b) Wind
c) Coal d) Biomass

3) Hydrogen is _____.
a) Primary fuel b) Energy carrier
c) Fossil fuel d) Solid

4) Hydrogen production method _____.
a) Electrolysis b) Combustion
c) Cooling d) Filtration

5) Passive heating uses _____.
a) External power b) Natural energy
c) Fuel d) Electricity

6) Direct gain system uses _____.
a) Windows b) Pipes
c) Pumps d) Fans

7) Solar drying removes _____.
a) Heat b) Moisture
c) Air d) Dust

8) Solar still produces _____.
a) Heat b) Fresh water
c) Electricity d) Steam

9) PV effect converts _____.

a) Heat to electricity
b) Light to electricity
c) Mechanical
d) Chemical

10) Solar cell material _____.

a) Copper
b) Silicon
c) Iron
d) Aluminum

11) Petroleum is _____.

a) Renewable
b) Non-renewable
c) Biomass
d) Solar

12) Ground cooling uses _____.

a) Air temp
b) Earth temp
c) Sunlight
d) Pressure

13) Parallel connection increases _____.

a) Voltage
b) Current
c) Resistance
d) Frequency

14) MPPT improves _____.

a) Loss
b) Output
c) Cost
d) Weight

2) Figures to the right indicate full marks.

Section – I

Q.2 Attempt the following. (Any Four) **16**

a) Differentiate renewable and non-renewable energy sources.
b) Explain global energy scenario.
c) Explain hydrogen energy system in detail.
d) Explain passive heating and cooling techniques.
e) Describe solar active heating system components.

Q.3 Attempt the following. (Any Two) **12**

a) Compare all renewable sources with advantages and limitations.
b) Explain solar air heater working.
c) Explain future scope of hydrogen fuel.

Section – II

Q.4 Attempt the following. (Any Four) **16**

a) Explain solar drying basics.
b) Types of solar dryers.
c) Explain photovoltaic effect.
d) Define solar cell efficiency.
e) Analyze PV system efficiency factors.

Q.5 Attempt the following. (Any Two) **12**

a) Explain industrial solar drying.
b) Discuss solar pumping system
c) Evaluate economic aspects of PV systems.

8) Renewable energy sources are _____.
a) Exhaustible b) Non-exhaustible
c) Fossil d) Nuclear

9) Which is non-renewable?
a) Solar
b) Wind
c) Coal
d) Biomass

10) Hydrogen is _____.
a) Primary fuel
b) Energy carrier
c) Fossil fuel
d) Solid

11) Hydrogen production method _____.
a) Electrolysis
b) Combustion
c) Cooling
d) Filtration

12) Passive heating uses _____.
a) External power
b) Natural energy
c) Fuel
d) Electricity

13) Direct gain system uses _____.
a) Windows
b) Pipes
c) Pumps
d) Fans

14) Solar drying removes _____.
a) Heat
b) Moisture
c) Air
d) Dust

Set **Q**

S.Y. (B.Tech.) (Computer Science and Engineering) (Semester - II) (New) (CBCS) Examination: March/April – 2026
Advanced Application in Renewable Energy (EEMDM-02A)

Day & Date: Thursday, 30-04-2026 Max. Marks: 56
Time: 03:00 PM To 06:00 PM

Instructions: 1) All questions are compulsory.
2) Figures to the right indicate full marks.

Section – I

Q.2 Attempt the following. (Any Four) **16**

a) Differentiate renewable and non-renewable energy sources.
b) Explain global energy scenario.
c) Explain hydrogen energy system in detail.
d) Explain passive heating and cooling techniques.
e) Describe solar active heating system components.

Q.3 Attempt the following. (Any Two) **12**

a) Compare all renewable sources with advantages and limitations.
b) Explain solar air heater working.
c) Explain future scope of hydrogen fuel.

Section – II

Q.4 Attempt the following. (Any Four) **16**

a) Explain solar drying basics.
b) Types of solar dryers.
c) Explain photovoltaic effect.
d) Define solar cell efficiency.
e) Analyze PV system efficiency factors.

Q.5 Attempt the following. (Any Two) **12**

a) Explain industrial solar drying.
b) Discuss solar pumping system
c) Evaluate economic aspects of PV systems.

Seat No.	

Set **R**

S.Y. (B.Tech.) (Computer Science and Engineering) (Semester - II) (New) (CBCS) Examination: March/April – 2026
Advanced Application in Renewable Energy (EEMDM-02A)

Day & Date: Thursday, 30-04-2026 Max. Marks: 70
Time: 03:00 PM To 06:00 PM

Instructions: 1) Q. No. 1 is compulsory. It should be solved in the first 30 minutes in Answer Book Page no 03 (Starting page of the Answer Book). Each question carries one mark.
2) Don't forget to Mention question paper set (P/Q/R/S) on top of page.
3) Figures to the right indicates full marks.

MCQ/Objective Type Questions

Duration: 30 Minutes Marks:14

Q.1 Choose the correct Answer. **14**

1) Petroleum is _____.
a) Renewable b) Non-renewable
c) Biomass d) Solar

2) Ground cooling uses _____.
a) Air temp b) Earth temp
c) Sunlight d) Pressure

3) Parallel connection increases _____.
a) Voltage b) Current
c) Resistance d) Frequency

4) MPPT improves _____.
a) Loss b) Output
c) Cost d) Weight

5) Renewable energy sources are _____.
a) Exhaustible b) Non-exhaustible
c) Fossil d) Nuclear

6) Which is non-renewable?
a) Solar b) Wind
c) Coal d) Biomass

7) Hydrogen is _____.
a) Primary fuel b) Energy carrier
c) Fossil fuel d) Solid

8) Hydrogen production method _____.
a) Electrolysis b) Combustion
c) Cooling d) Filtration

9) Passive heating uses _____.
a) External power
b) Natural energy
c) Fuel
d) Electricity

10) Direct gain system uses _____.
a) Windows
b) Pipes
c) Pumps
d) Fans

11) Solar drying removes _____.
a) Heat
b) Moisture
c) Air
d) Dust

12) Solar still produces _____.
a) Heat
b) Fresh water
c) Electricity
d) Steam

13) PV effect converts _____.
a) Heat to electricity
b) Light to electricity
c) Mechanical
d) Chemical

14) Solar cell material _____.
a) Copper
b) Silicon
c) Iron
d) Aluminum

7) MPPT improves _____.
a) Loss b) Output
c) Cost d) Weight

8) Renewable energy sources are _____.
a) Exhaustible b) Non-exhaustible
c) Fossil d) Nuclear

9) Which is non-renewable?
a) Solar
b) Wind
c) Coal
d) Biomass

10) Hydrogen is _____.
a) Primary fuel
b) Energy carrier
c) Fossil fuel
d) Solid

11) Hydrogen production method _____.
a) Electrolysis
b) Combustion
c) Cooling
d) Filtration

12) Passive heating uses _____.
a) External power
b) Natural energy
c) Fuel
d) Electricity

13) Direct gain system uses _____.
a) Windows
b) Pipes
c) Pumps
d) Fans

14) Solar drying removes _____.
a) Heat
b) Moisture
c) Air
d) Dust

Seat No.	

Set **Q**

S.Y. (B.Tech.) (Electrical Engineering) (Semester - II) (New) (CBCS)
Examination: March/April – 2026
Advanced Application in Renewable Energy (EEMDM-02A)

Day & Date: Thursday, 30-04-2026 Max. Marks: 56
Time: 03:00 PM To 06:00 PM

Instructions: 1) All questions are compulsory.
2) Figures to the right indicate full marks.

Section – I

Q.2 Attempt the following. (Any Four) **16**

a) Differentiate renewable and non-renewable energy sources.
b) Explain global energy scenario.
c) Explain hydrogen energy system in detail.
d) Explain passive heating and cooling techniques.
e) Describe solar active heating system components.

Q.3 Attempt the following. (Any Two) **12**

a) Compare all renewable sources with advantages and limitations.
b) Explain solar air heater working.
c) Explain future scope of hydrogen fuel.

Section – II

Q.4 Attempt the following. (Any Four) **16**

a) Explain solar drying basics.
b) Types of solar dryers.
c) Explain photovoltaic effect.
d) Define solar cell efficiency.
e) Analyze PV system efficiency factors.

Q.5 Attempt the following. (Any Two) **12**

a) Explain industrial solar drying.
b) Discuss solar pumping system
c) Evaluate economic aspects of PV systems.

Seat No.	

Set **R**

Examination: March/April – 2026
Advanced Application in Renewable Energy (EEMDM-02A)

Day & Date: Thursday, 30-04-2026 Max. Marks: 70
Time: 03:00 PM To 06:00 PM

Instructions: 1) Q. No. 1 is compulsory. It should be solved in the first 30 minutes in Answer Book Page no 03 (Starting page of the Answer Book). Each question carries one mark.
2) Don't forget to Mention question paper set (P/Q/R/S) on top of page.
3) Figures to the right indicates full marks.

MCQ/Objective Type Questions

Duration: 30 Minutes Marks:14

Q.1 Choose the correct Answer. **14**

1) Petroleum is _____.
a) Renewable b) Non-renewable
c) Biomass d) Solar

2) Ground cooling uses _____.
a) Air temp b) Earth temp
c) Sunlight d) Pressure

3) Parallel connection increases _____.
a) Voltage b) Current
c) Resistance d) Frequency

4) MPPT improves _____.
a) Loss b) Output
c) Cost d) Weight

5) Renewable energy sources are _____.
a) Exhaustible b) Non-exhaustible
c) Fossil d) Nuclear

6) Which is non-renewable?
a) Solar b) Wind
c) Coal d) Biomass

7) Hydrogen is _____.
a) Primary fuel b) Energy carrier
c) Fossil fuel d) Solid

8) Hydrogen production method _____.
a) Electrolysis b) Combustion
c) Cooling d) Filtration

9) Passive heating uses _____.
a) External power
b) Natural energy
c) Fuel
d) Electricity

10) Direct gain system uses _____.
a) Windows
b) Pipes
c) Pumps
d) Fans

11) Solar drying removes _____.
a) Heat
b) Moisture
c) Air
d) Dust

12) Solar still produces _____.
a) Heat
b) Fresh water
c) Electricity
d) Steam

13) PV effect converts _____.
a) Heat to electricity
b) Light to electricity
c) Mechanical
d) Chemical

14) Solar cell material _____.
a) Copper
b) Silicon
c) Iron
d) Aluminum

6) Parallel connection increases _____.
a) Voltage b) Current
c) Resistance d) Frequency

7) MPPT improves _____.
a) Loss b) Output
c) Cost d) Weight

8) Renewable energy sources are _____.
a) Exhaustible b) Non-exhaustible
c) Fossil d) Nuclear

9) Which is non-renewable?
a) Solar
b) Wind
c) Coal
d) Biomass

10) Hydrogen is _____.
a) Primary fuel
b) Energy carrier
c) Fossil fuel
d) Solid

11) Hydrogen production method _____.
a) Electrolysis
b) Combustion
c) Cooling
d) Filtration

12) Passive heating uses _____.
a) External power
b) Natural energy
c) Fuel
d) Electricity

13) Direct gain system uses _____.
a) Windows
b) Pipes
c) Pumps
d) Fans

14) Solar drying removes _____.
a) Heat
b) Moisture
c) Air
d) Dust

Set **Q**

S.Y. (B.Tech.) (Mechanical Engineering) (Semester - II) (New) (CBCS)
Examination: March/April – 2026
Advanced Application in Renewable Energy (EEMDM-02A)

Day & Date: Thursday, 30-04-2026 Max. Marks: 56
Time: 03:00 PM To 06:00 PM

Instructions: 1) All questions are compulsory.
2) Figures to the right indicate full marks.

Section – I

Q.2 Attempt the following. (Any Four) **16**

a) Differentiate renewable and non-renewable energy sources.
b) Explain global energy scenario.
c) Explain hydrogen energy system in detail.
d) Explain passive heating and cooling techniques.
e) Describe solar active heating system components.

Q.3 Attempt the following. (Any Two) **12**

a) Compare all renewable sources with advantages and limitations.
b) Explain solar air heater working.
c) Explain future scope of hydrogen fuel.

Section – II

Q.4 Attempt the following. (Any Four) **16**

a) Explain solar drying basics.
b) Types of solar dryers.
c) Explain photovoltaic effect.
d) Define solar cell efficiency.
e) Analyze PV system efficiency factors.

Q.5 Attempt the following. (Any Two) **12**

a) Explain industrial solar drying.
b) Discuss solar pumping system
c) Evaluate economic aspects of PV systems.

Examination: March/April – 2026
Advanced Application in Renewable Energy (EEMDM-02A)

Day & Date: Thursday, 30-04-2026 Max. Marks: 70
Time: 03:00 PM To 06:00 PM

Instructions: 1) Q. No. 1 is compulsory. It should be solved in the first 30 minutes in Answer Book Page no 03 (Starting page of the Answer Book). Each question carries one mark.
2) Don't forget to Mention question paper set (P/Q/R/S) on top of page.
3) Figures to the right indicates full marks.

MCQ/Objective Type Questions

Duration: 30 Minutes Marks:14

Q.1 Choose the correct Answer. **14**

1) Petroleum is _____.
a) Renewable b) Non-renewable
c) Biomass d) Solar

2) Ground cooling uses _____.
a) Air temp b) Earth temp
c) Sunlight d) Pressure

3) Parallel connection increases _____.
a) Voltage b) Current
c) Resistance d) Frequency

4) MPPT improves _____.
a) Loss b) Output
c) Cost d) Weight

5) Renewable energy sources are _____.
a) Exhaustible b) Non-exhaustible
c) Fossil d) Nuclear

6) Which is non-renewable?
a) Solar b) Wind
c) Coal d) Biomass

7) Hydrogen is _____.
a) Primary fuel b) Energy carrier
c) Fossil fuel d) Solid

8) Hydrogen production method _____.
a) Electrolysis b) Combustion
c) Cooling d) Filtration

9) Passive heating uses _____.
a) External power
b) Natural energy
c) Fuel
d) Electricity

10) Direct gain system uses _____.
a) Windows
b) Pipes
c) Pumps
d) Fans

11) Solar drying removes _____.
a) Heat
b) Moisture
c) Air
d) Dust

12) Solar still produces _____.
a) Heat
b) Fresh water
c) Electricity
d) Steam

13) PV effect converts _____.
a) Heat to electricity
b) Light to electricity
c) Mechanical
d) Chemical

14) Solar cell material _____.
a) Copper
b) Silicon
c) Iron
d) Aluminum

MCQ/Objective Type Questions

Duration: 30 Minutes Marks:14

Q.1 Choose the correct Answer. **14**

1) _____ component is essential for converting electrical energy into mechanical energy in EVs.
a) Battery b) Electric motor
c) Inverter d) Controller

2) Identify the primary role of electric motors in EVs.
a) To store electrical energy
b) To generate electricity
c) To provide mechanical power for propulsion
d) To regulate battery voltage

3) _____ type of motor is most suitable for high-performance EVs due to its high power density.
a) DC motor b) Induction motor
c) Synchronous motor d) Permanent magnet motor

4) Identify the type of DC motor is commonly used for applications requiring high starting torque.
a) Series DC motor
b) Shunt DC motor
c) Compound DC motor
d) Permanent magnet DC motor

5) _____ is the role of brushes in a brushed DC motor.
a) To generate a magnetic field
b) To transfer current to the rotating armature
c) To regulate voltage
d) To reduce heat generation

6) Identify the primary advantage of three-phase induction motors.
a) High efficiency and reliability
b) Low starting torque
c) Complex construction
d) High maintenance requirements

7) _____ is the role of the stator in a three-phase induction motor.
a) To rotate and produce torque
b) To generate a rotating magnetic field
c) To store electrical energy
d) To regulate voltage

8) _____ control strategy is commonly used in VFDs for induction motors.
a) Scalar control
b) Vector control
c) Direct torque control
d) All of the above

9) Identify the following starter is NOT a motor starter.
a) Stator resistance starter
b) Permanent magnet starter
c) Auto transformer starter
d) Star-delta starter

10) _____ is the main advantage of a star-delta starter.
a) High starting torque
b) Reduced starting current
c) Simple construction
d) Increased motor speed

11) _____ parameter is controlled by a soft starter to ensure smooth motor startup.
a) Current
b) Frequency
c) Voltage
d) Torque

12) _____ is the key characteristic of a Switched Reluctance Motor (SRM).
a) It uses permanent magnets in the rotor.
b) It operates based on variable reluctance.
c) It requires brushes for operation.
d) It has a squirrel cage rotor.

13) Identify the following application, BLDC motors are commonly used ____.
a) Small household appliances
b) Drones and robotics
c) Electric vehicles
d) All of the above

14) _____ type of starter provides the smoothest acceleration during motor startup.
a) Stator resistance starter
b) Auto transformer starter
c) Star-delta starter
d) Soft starter

SECTION – I

Q.2 Solve any four. **16**

a) Discuss the operating principles of electric motors with emphasis on torque production.

b) Describe the role of electric motors in electric propulsion systems of EVs.

c) Illustrate the role of electric propulsion systems in EVs.

d) Describe the construction of a series-wound DC motor with a neat diagram.

e) Explain the major components of a brushed DC motor with a neat diagram.

f) Draw and explain any one method for Speed Control of DC Series Motor.

Q.3 Solve any two. **12**

a) Compare and contrast DC, induction, synchronous, and permanent magnet motors.

b) Draw a neat diagram and explain any two types of DC motors with advantages, disadvantages and applications.

c) Discuss the key parameters that influence the choice between a DC motor and an AC induction motor for EV applications.

SECTION – II

Q.4 Solve any four. **16**

a) Compare different types of motor starters used in EVs.

b) Explain rotor resistance Starter with a neat diagram.

c) Compare the advantages and disadvantages of induction motors in EVs.

d) Explain star delta Starter with a neat diagram.

e) Explain the working principle of three-phase induction motors.

f) Discuss the design considerations for induction motors in electric vehicles.

Q.5 Solve any two. **12**

a) Draw and explain the operation of Variable frequency drives (VFDs) with a neat diagram.

b) Explain the construction and working of Permanent Magnet Synchronous Motor (PMSM).

c) Explain construction and operation of BLDC motor with a neat diagram.

a) Compare and contrast DC, induction, synchronous, and permanent magnet motors.

b) Draw a neat diagram and explain any two types of DC motors with advantages, disadvantages and applications.

c) Discuss the key parameters that influence the choice between a DC motor and an AC induction motor for EV applications.

SECTION – II

Q.4 Solve any four. **16**

a) Compare different types of motor starters used in EVs.

b) Explain rotor resistance Starter with a neat diagram.

c) Compare the advantages and disadvantages of induction motors in EVs.

d) Explain star delta Starter with a neat diagram.

e) Explain the working principle of three-phase induction motors.

f) Discuss the design considerations for induction motors in electric vehicles.

Q.5 Solve any two. **12**

a) Draw and explain the operation of Variable frequency drives (VFDs) with a neat diagram.

b) Explain the construction and working of Permanent Magnet Synchronous Motor (PMSM).

c) Explain construction and operation of BLDC motor with a neat diagram.

Set P

S.Y. (B.Tech.) (Computer Science and Engineering) (Semester - II) (New) (CBCS) Examination: March/April – 2026
Electrical Vehicle Motors (EEMDM-02B)

Day & Date: Thursday, 30-04-2026 Max. Marks: 70
Time: 03:00 PM To 06:00 PM

Instructions: 1) Q. No. 1 is compulsory. It should be solved in the first 30 minutes in Answer Book Page no 03 (Starting page of the Answer Book). Each question carries one mark.
2) Don't forget to Mention question paper set (P/Q/R/S) on top of page.
3) Figures to the right indicates full marks.
4) Assume suitable data if necessary and mention it clearly.

MCQ/Objective Type Questions

Duration: 30 Minutes Marks:14

Q.1 Choose the correct Answer. **14**

1) _____ component is essential for converting electrical energy into mechanical energy in EVs.
a) Battery b) Electric motor
c) Inverter d) Controller

2) Identify the primary role of electric motors in EVs.
a) To store electrical energy
b) To generate electricity
c) To provide mechanical power for propulsion
d) To regulate battery voltage

3) _____ type of motor is most suitable for high-performance EVs due to its high power density.
a) DC motor b) Induction motor
c) Synchronous motor d) Permanent magnet motor

4) Identify the type of DC motor is commonly used for applications requiring high starting torque.
a) Series DC motor
b) Shunt DC motor
c) Compound DC motor
d) Permanent magnet DC motor

5) _____ is the role of brushes in a brushed DC motor.
a) To generate a magnetic field
b) To transfer current to the rotating armature
c) To regulate voltage
d) To reduce heat generation

6) Identify the primary advantage of three-phase induction motors.
a) High efficiency and reliability
b) Low starting torque
c) Complex construction
d) High maintenance requirements

7) _____ is the role of the stator in a three-phase induction motor.
a) To rotate and produce torque
b) To generate a rotating magnetic field
c) To store electrical energy
d) To regulate voltage

8) _____ control strategy is commonly used in VFDs for induction motors.
a) Scalar control
b) Vector control
c) Direct torque control
d) All of the above

9) Identify the following starter is NOT a motor starter.
a) Stator resistance starter
b) Permanent magnet starter
c) Auto transformer starter
d) Star-delta starter

10) _____ is the main advantage of a star-delta starter.
a) High starting torque
b) Reduced starting current
c) Simple construction
d) Increased motor speed

11) _____ parameter is controlled by a soft starter to ensure smooth motor startup.
a) Current
b) Frequency
c) Voltage
d) Torque

12) _____ is the key characteristic of a Switched Reluctance Motor (SRM).
a) It uses permanent magnets in the rotor.
b) It operates based on variable reluctance.
c) It requires brushes for operation.
d) It has a squirrel cage rotor.

13) Identify the following application, BLDC motors are commonly used ____.
a) Small household appliances
b) Drones and robotics
c) Electric vehicles
d) All of the above

14) _____ type of starter provides the smoothest acceleration during motor startup.
a) Stator resistance starter
b) Auto transformer starter
c) Star-delta starter
d) Soft starter

Set **Q**

S.Y. (B.Tech.) (Electronics & Computer Engineering) (Semester - II) (New) (CBCS) Examination: March/April – 2026
Electrical Vehicle Motors (EEMDM-02B)

Day & Date: Thursday, 30-04-2026 Max. Marks: 56
Time: 03:00 PM To 06:00 PM

Instructions: 1) All questions are compulsory.
2) Figures to the right indicate full marks.

SECTION – I

Q.2 Solve any four. **16**

a) Discuss the operating principles of electric motors with emphasis on torque production.

b) Describe the role of electric motors in electric propulsion systems of EVs.

c) Illustrate the role of electric propulsion systems in EVs.

d) Describe the construction of a series-wound DC motor with a neat diagram.

e) Explain the major components of a brushed DC motor with a neat diagram.

f) Draw and explain any one method for Speed Control of DC Series Motor.

Q.3 Solve any two. **12**

a) Compare and contrast DC, induction, synchronous, and permanent magnet motors.

b) Draw a neat diagram and explain any two types of DC motors with advantages, disadvantages and applications.

c) Discuss the key parameters that influence the choice between a DC motor and an AC induction motor for EV applications.

SECTION – II

Q.4 Solve any four. **16**

a) Compare different types of motor starters used in EVs.

b) Explain rotor resistance Starter with a neat diagram.

c) Compare the advantages and disadvantages of induction motors in EVs.

d) Explain star delta Starter with a neat diagram.

e) Explain the working principle of three-phase induction motors.

f) Discuss the design considerations for induction motors in electric vehicles.

Q.5 Solve any two. **12**

a) Draw and explain the operation of Variable frequency drives (VFDs) with a neat diagram.

b) Explain the construction and working of Permanent Magnet Synchronous Motor (PMSM).

c) Explain construction and operation of BLDC motor with a neat diagram.

Seat No.	

Set **R**

S.Y. (B.Tech.) (Electronics & Computer Engineering) (Semester - II) (New) (CBCS) Examination: March/April – 2026
Electrical Vehicle Motors (EEMDM-02B)

Day & Date: Thursday, 30-04-2026 Max. Marks: 70
Time: 03:00 PM To 06:00 PM

Instructions: 1) Q. No. 1 is compulsory. It should be solved in the first 30 minutes in Answer Book Page no 03 (Starting page of the Answer Book). Each question carries one mark.
2) Don't forget to Mention question paper set (P/Q/R/S) on top of page.
3) Figures to the right indicates full marks.
4) Assume suitable data if necessary and mention it clearly.

MCQ/Objective Type Questions

Duration: 30 Minutes Marks:14

Q.1 Choose the correct Answer. **14**

1) _____ parameter is controlled by a soft starter to ensure smooth motor startup.
a) Current b) Frequency
c) Voltage d) Torque

2) _____ is the key characteristic of a Switched Reluctance Motor (SRM).
a) It uses permanent magnets in the rotor.
b) It operates based on variable reluctance.
c) It requires brushes for operation.
d) It has a squirrel cage rotor.

3) Identify the following application, BLDC motors are commonly used ____.
a) Small household appliances b) Drones and robotics
c) Electric vehicles d) All of the above

4) _____ type of starter provides the smoothest acceleration during motor startup.
a) Stator resistance starter b) Auto transformer starter
c) Star-delta starter d) Soft starter

5) _____ component is essential for converting electrical energy into mechanical energy in EVs.
a) Battery b) Electric motor
c) Inverter d) Controller

6) Identify the primary role of electric motors in EVs.
a) To store electrical energy
b) To generate electricity
c) To provide mechanical power for propulsion
d) To regulate battery voltage

7) _____ type of motor is most suitable for high-performance EVs due to its high power density.
a) DC motor
b) Induction motor
c) Synchronous motor
d) Permanent magnet motor

8) Identify the type of DC motor is commonly used for applications requiring high starting torque.
a) Series DC motor
b) Shunt DC motor
c) Compound DC motor
d) Permanent magnet DC motor

9) _____ is the role of brushes in a brushed DC motor.
a) To generate a magnetic field
b) To transfer current to the rotating armature
c) To regulate voltage
d) To reduce heat generation

10) Identify the primary advantage of three-phase induction motors.
a) High efficiency and reliability
b) Low starting torque
c) Complex construction
d) High maintenance requirements

11) _____ is the role of the stator in a three-phase induction motor.
a) To rotate and produce torque
b) To generate a rotating magnetic field
c) To store electrical energy
d) To regulate voltage

12) _____ control strategy is commonly used in VFDs for induction motors.
a) Scalar control
b) Vector control
c) Direct torque control
d) All of the above

13) Identify the following starter is NOT a motor starter.
a) Stator resistance starter
b) Permanent magnet starter
c) Auto transformer starter
d) Star-delta starter

14) _____ is the main advantage of a star-delta starter.
a) High starting torque
b) Reduced starting current
c) Simple construction
d) Increased motor speed

a) Current b) Frequency
c) Voltage d) Torque

7) _____ is the key characteristic of a Switched Reluctance Motor (SRM).
a) It uses permanent magnets in the rotor.
b) It operates based on variable reluctance.
c) It requires brushes for operation.
d) It has a squirrel cage rotor.

8) Identify the following application, BLDC motors are commonly used ____.
a) Small household appliances b) Drones and robotics
c) Electric vehicles d) All of the above

9) _____ type of starter provides the smoothest acceleration during motor startup.
a) Stator resistance starter b) Auto transformer starter
c) Star-delta starter d) Soft starter

10) _____ component is essential for converting electrical energy into mechanical energy in EVs.
a) Battery b) Electric motor
c) Inverter d) Controller

11) Identify the primary role of electric motors in EVs.
a) To store electrical energy
b) To generate electricity
c) To provide mechanical power for propulsion
d) To regulate battery voltage

12) _____ type of motor is most suitable for high-performance EVs due to its high power density.
a) DC motor b) Induction motor
c) Synchronous motor d) Permanent magnet motor

13) Identify the type of DC motor is commonly used for applications requiring high starting torque.
a) Series DC motor
b) Shunt DC motor
c) Compound DC motor
d) Permanent magnet DC motor

14) _____ is the role of brushes in a brushed DC motor.
a) To generate a magnetic field
b) To transfer current to the rotating armature
c) To regulate voltage
d) To reduce heat generation

S.Y. (B.Tech.) (Electrical Engineering) (Semester - II) (New) (CBCS)
Examination: March/April - 2026
Electrical Vehicle Motors (EEMDM-02B)

Day & Date: Thursday, 30-04-2026 Max. Marks: 56
Time: 03:00 PM To 06:00 PM

Instructions: 1) All questions are compulsory.
2) Figures to the right indicate full marks.

SECTION – I

Q.2 Solve any four. **16**

a) Discuss the operating principles of electric motors with emphasis on torque production.

b) Describe the role of electric motors in electric propulsion systems of EVs.

c) Illustrate the role of electric propulsion systems in EVs.

d) Describe the construction of a series-wound DC motor with a neat diagram.

e) Explain the major components of a brushed DC motor with a neat diagram.

f) Draw and explain any one method for Speed Control of DC Series Motor.

Q.3 Solve any two. **12**

a) Compare and contrast DC, induction, synchronous, and permanent magnet motors.

b) Draw a neat diagram and explain any two types of DC motors with advantages, disadvantages and applications.

c) Discuss the key parameters that influence the choice between a DC motor and an AC induction motor for EV applications.

SECTION – II

Q.4 Solve any four. **16**

a) Compare different types of motor starters used in EVs.

b) Explain rotor resistance Starter with a neat diagram.

c) Compare the advantages and disadvantages of induction motors in EVs.

d) Explain star delta Starter with a neat diagram.

e) Explain the working principle of three-phase induction motors.

f) Discuss the design considerations for induction motors in electric vehicles.

Q.5 Solve any two. **12**

a) Draw and explain the operation of Variable frequency drives (VFDs) with a neat diagram.

b) Explain the construction and working of Permanent Magnet Synchronous Motor (PMSM).

c) Explain construction and operation of BLDC motor with a neat diagram.

S.Y. (B.Tech.) (Electronics and Telecommunication Engineering) (Semester - II) (New) (CBCS) Examination: March/April – 2026
Electrical Vehicle Motors (EEMDM-02B)

Day & Date: Thursday, 30-04-2026 Max. Marks: 70
Time: 03:00 PM To 06:00 PM

Instructions: 1) Q. No. 1 is compulsory. It should be solved in the first 30 minutes in Answer Book Page no 03 (Starting page of the Answer Book). Each question carries one mark.
2) Don't forget to Mention question paper set (P/Q/R/S) on top of page.
3) Figures to the right indicates full marks.
4) Assume suitable data if necessary and mention it clearly.

MCQ/Objective Type Questions

Duration: 30 Minutes Marks:14

Q.1 Choose the correct Answer. **14**

1) _____ component is essential for converting electrical energy into mechanical energy in EVs.
a) Battery b) Electric motor
c) Inverter d) Controller

2) Identify the primary role of electric motors in EVs.
a) To store electrical energy
b) To generate electricity
c) To provide mechanical power for propulsion
d) To regulate battery voltage

3) _____ type of motor is most suitable for high-performance EVs due to its high power density.
a) DC motor b) Induction motor
c) Synchronous motor d) Permanent magnet motor

4) Identify the type of DC motor is commonly used for applications requiring high starting torque.
a) Series DC motor
b) Shunt DC motor
c) Compound DC motor
d) Permanent magnet DC motor

5) _____ is the role of brushes in a brushed DC motor.
a) To generate a magnetic field
b) To transfer current to the rotating armature
c) To regulate voltage
d) To reduce heat generation

6) Identify the primary advantage of three-phase induction motors.
a) High efficiency and reliability
b) Low starting torque
c) Complex construction
d) High maintenance requirements

7) _____ is the role of the stator in a three-phase induction motor.
a) To rotate and produce torque
b) To generate a rotating magnetic field
c) To store electrical energy
d) To regulate voltage

8) _____ control strategy is commonly used in VFDs for induction motors.
a) Scalar control
b) Vector control
c) Direct torque control
d) All of the above

9) Identify the following starter is NOT a motor starter.
a) Stator resistance starter
b) Permanent magnet starter
c) Auto transformer starter
d) Star-delta starter

10) _____ is the main advantage of a star-delta starter.
a) High starting torque
b) Reduced starting current
c) Simple construction
d) Increased motor speed

11) _____ parameter is controlled by a soft starter to ensure smooth motor startup.
a) Current
b) Frequency
c) Voltage
d) Torque

12) _____ is the key characteristic of a Switched Reluctance Motor (SRM).
a) It uses permanent magnets in the rotor.
b) It operates based on variable reluctance.
c) It requires brushes for operation.
d) It has a squirrel cage rotor.

13) Identify the following application, BLDC motors are commonly used ____.
a) Small household appliances
b) Drones and robotics
c) Electric vehicles
d) All of the above

14) _____ type of starter provides the smoothest acceleration during motor startup.
a) Stator resistance starter
b) Auto transformer starter
c) Star-delta starter
d) Soft starter

Day & Date: Thursday, 30-04-2026 Max. Marks: 70
Time: 03:00 PM To 06:00 PM

Instructions: 1) Q. No. 1 is compulsory. It should be solved in the first 30 minutes in Answer Book Page no 03 (Starting page of the Answer Book). Each question carries one mark.
2) Don't forget to Mention question paper set (P/Q/R/S) on top of page.
3) Figures to the right indicates full marks.
4) Assume suitable data if necessary and mention it clearly.

MCQ/Objective Type Questions

Duration: 30 Minutes Marks:14

Q.1 Choose the correct Answer. 14

1) _____ control strategy is commonly used in VFDs for induction motors.
a) Scalar control b) Vector control
c) Direct torque control d) All of the above

2) Identify the following starter is NOT a motor starter.
a) Stator resistance starter b) Permanent magnet starter
c) Auto transformer starter d) Star-delta starter

3) _____ is the main advantage of a star-delta starter.
a) High starting torque b) Reduced starting current
c) Simple construction d) Increased motor speed

4) _____ parameter is controlled by a soft starter to ensure smooth motor startup.
a) Current b) Frequency
c) Voltage d) Torque

5) _____ is the key characteristic of a Switched Reluctance Motor (SRM).
a) It uses permanent magnets in the rotor.
b) It operates based on variable reluctance.
c) It requires brushes for operation.
d) It has a squirrel cage rotor.

6) Identify the following application, BLDC motors are commonly used ____.
a) Small household appliances b) Drones and robotics
c) Electric vehicles d) All of the above

7) _____ type of starter provides the smoothest acceleration during motor startup.
a) Stator resistance starter
b) Auto transformer starter
c) Star-delta starter
d) Soft starter

8) _____ component is essential for converting electrical energy into mechanical energy in EVs.
a) Battery
b) Electric motor
c) Inverter
d) Controller

9) Identify the primary role of electric motors in EVs.
a) To store electrical energy
b) To generate electricity
c) To provide mechanical power for propulsion
d) To regulate battery voltage

10) _____ type of motor is most suitable for high-performance EVs due to its high power density.
a) DC motor
b) Induction motor
c) Synchronous motor
d) Permanent magnet motor

11) Identify the type of DC motor is commonly used for applications requiring high starting torque.
a) Series DC motor
b) Shunt DC motor
c) Compound DC motor
d) Permanent magnet DC motor

12) _____ is the role of brushes in a brushed DC motor.
a) To generate a magnetic field
b) To transfer current to the rotating armature
c) To regulate voltage
d) To reduce heat generation

13) Identify the primary advantage of three-phase induction motors.
a) High efficiency and reliability
b) Low starting torque
c) Complex construction
d) High maintenance requirements

14) _____ is the role of the stator in a three-phase induction motor.
a) To rotate and produce torque
b) To generate a rotating magnetic field
c) To store electrical energy
d) To regulate voltage

Seat No.	

Set **Q**

S.Y. (B.Tech.) (Mechanical Engineering) (Semester - II) (New) (CBCS)
Examination: March/April - 2026
Electrical Vehicle Motors (EEMDM-02B)

Day & Date: Thursday, 30-04-2026 Max. Marks: 56
Time: 03:00 PM To 06:00 PM

Instructions: 1) All questions are compulsory.
2) Figures to the right indicate full marks.

SECTION – I

Q.2 Solve any four. **16**

a) Discuss the operating principles of electric motors with emphasis on torque production.

b) Describe the role of electric motors in electric propulsion systems of EVs.

c) Illustrate the role of electric propulsion systems in EVs.

d) Describe the construction of a series-wound DC motor with a neat diagram.

e) Explain the major components of a brushed DC motor with a neat diagram.

f) Draw and explain any one method for Speed Control of DC Series Motor.

Q.3 Solve any two. **12**

a) Compare and contrast DC, induction, synchronous, and permanent magnet motors.

b) Draw a neat diagram and explain any two types of DC motors with advantages, disadvantages and applications.

c) Discuss the key parameters that influence the choice between a DC motor and an AC induction motor for EV applications.

SECTION – II

Q.4 Solve any four. **16**

a) Compare different types of motor starters used in EVs.

b) Explain rotor resistance Starter with a neat diagram.

c) Compare the advantages and disadvantages of induction motors in EVs.

d) Explain star delta Starter with a neat diagram.

e) Explain the working principle of three-phase induction motors.

f) Discuss the design considerations for induction motors in electric vehicles.

Q.5 Solve any two. **12**

a) Draw and explain the operation of Variable frequency drives (VFDs) with a neat diagram.

b) Explain the construction and working of Permanent Magnet Synchronous Motor (PMSM).

c) Explain construction and operation of BLDC motor with a neat diagram.

Seat No.	

Set R

S.Y. (B.Tech.) (Mechanical Engineering) (Semester - II) (New) (CBCS)
Examination: March/April - 2026
Electrical Vehicle Motors (EEMDM-02B)

Day & Date: Thursday, 30-04-2026 Max. Marks: 70
Time: 03:00 PM To 06:00 PM

MCQ/Objective Type Questions

Duration: 30 Minutes Marks:14

Q.1 Choose the correct Answer. **14**

1) _____ parameter is controlled by a soft starter to ensure smooth motor startup.
a) Current b) Frequency
c) Voltage d) Torque

2) _____ is the key characteristic of a Switched Reluctance Motor (SRM).
a) It uses permanent magnets in the rotor.
b) It operates based on variable reluctance.
c) It requires brushes for operation.
d) It has a squirrel cage rotor.

3) Identify the following application, BLDC motors are commonly used ____.
a) Small household appliances b) Drones and robotics
c) Electric vehicles d) All of the above

4) _____ type of starter provides the smoothest acceleration during motor startup.
a) Stator resistance starter b) Auto transformer starter
c) Star-delta starter d) Soft starter

5) _____ component is essential for converting electrical energy into mechanical energy in EVs.
a) Battery b) Electric motor
c) Inverter d) Controller

6) Identify the primary role of electric motors in EVs.
a) To store electrical energy
b) To generate electricity
c) To provide mechanical power for propulsion
d) To regulate battery voltage

7) _____ type of motor is most suitable for high-performance EVs due to its high power density.
a) DC motor
b) Induction motor
c) Synchronous motor
d) Permanent magnet motor

8) Identify the type of DC motor is commonly used for applications requiring high starting torque.
a) Series DC motor
b) Shunt DC motor
c) Compound DC motor
d) Permanent magnet DC motor

9) _____ is the role of brushes in a brushed DC motor.
a) To generate a magnetic field
b) To transfer current to the rotating armature
c) To regulate voltage
d) To reduce heat generation

10) Identify the primary advantage of three-phase induction motors.
a) High efficiency and reliability
b) Low starting torque
c) Complex construction
d) High maintenance requirements

11) _____ is the role of the stator in a three-phase induction motor.
a) To rotate and produce torque
b) To generate a rotating magnetic field
c) To store electrical energy
d) To regulate voltage

12) _____ control strategy is commonly used in VFDs for induction motors.
a) Scalar control
b) Vector control
c) Direct torque control
d) All of the above

13) Identify the following starter is NOT a motor starter.
a) Stator resistance starter
b) Permanent magnet starter
c) Auto transformer starter
d) Star-delta starter

14) _____ is the main advantage of a star-delta starter.
a) High starting torque
b) Reduced starting current
c) Simple construction
d) Increased motor speed
