Day & Date: Monday, 04-05-2026 Max. Marks: 70
Time: 10:00 AM To 01:00 PM

Instructions: 1) Q. No. 1 is compulsory. It should be solved in the first 30 minutes in Answer Book Page no 03 (Starting page of the Answer Book). Each question carries one mark.
2) Don't forget to Mention question paper set (P/Q/R/S) on top of page.
3) Figures to the right indicates full marks.
4) Make suitable assumptions if necessary and state them clearly.
5) Use of Non programable Calculator is allowed.

MCQ/Objective Type Questions

Duration: 30 Minutes Marks: 14

Q.1 Choose the correct alternative. **14**

1) If $y = x^{60}$, then $y_{60} =$ _____.

a) 60 b) $60!$
c) 0 d) $0!$

2) If $f(x)$ is continuous function and has derivative of any order then the Maclaurin's Theorem states that $f(x) =$ _____.

a) $f(a) + h.f'(a) + \frac{h^2}{2!}f''(a) +$ _____.

b) $f(0) + x.f'(0) + \frac{x^2}{2!}f''(0) +$ _____.

c) $1 + x + \frac{x^2}{2!} + \frac{x^3}{3!} +$ _____.

d) $x + \frac{x^3}{3} + \frac{2}{15}x^5 +$ _____.

3) The rank of unit matrix of order m is _____.

a) 1 b) 0
c) m d) $\neq m$

4) If $y = \cos 4x$, then $y_n =$ _____.

a) $4^n \cos(4nx)$ b) $\sin(4nx)$

c) $(-1)^n \cos 4nx$ d) $4^n \cos(4x + \frac{n\pi}{2})$

5) $\lim_{x\to 0}\left(\frac{x-\sin x}{x^3}\right) =$_____.

a) 6 b) $1/6$

c) 3 d) $1/3$

6) If A is square matrix of order n and $AX = 0$ where X is a $n \times 1$ matrix of unknowns and if $r = n$ then the system has _____.

a) Has only a trivial solution
b) Has one independent solution
c) Has n independent solution
d) Has $m - n$ independent solutions

7) If $X1, X2, X3$ are linearly independent and $k1X1 + k2X2 + k3X3 = 0$, then _____.

a) $k1, k2, k3$ all are equal to 1 b) $k1 = 0$ but $k2, k3 \neq 0$

c) $k1, k2 = 0$ but $k3 \neq 0$ d) All $k1, k2, k3$ are zero

8) If $z = x^y$ then $\frac{\partial z}{\partial y} =$ _____.

a) yx^{y-1} b) xy^{x-1}

c) $y^x \log x$ d) $x^y \log x$

9) If $x = r\cos\theta, y = r\sin\theta$ then $\left(\frac{\partial r}{\partial x}\right)_y =$ _____.

a) r/x b) x/r

c) r/y d) y/r

10) If $u = xy\tan^{-1}\left(\frac{y}{x}\right)$, then $x\frac{\partial u}{\partial x} + y\frac{\partial u}{\partial y} =$ _____.

a) 0 b) u

c) $2\mathrm{u}$ d) $-2\mathrm{u}$

11) If δx is an error in x, then $\frac{\delta x}{x}$ is called _____.

a) Absolute error in x b) Relative error in x

c) Approximate error in x d) Percentage error in x

12) A vector function $\bar{F}$ is called irrotational if _____.

a) $Curl\ \bar{F} = \bar{0}$ b) $div\ \bar{F} = 0$

c) $grad\ \bar{F} = 0$ d) $div\ \bar{F} \neq 0$

13) If $\vec{r} = x\hat{\imath} + y\hat{\jmath} + z\hat{k}$ and $\bar{a}$ is a constant vector then $\nabla(\bar{a}.\vec{r}) =$ _____.

a) $2\bar{a}$ b) $\bar{r}$

c) $2\bar{r}$ d) $\bar{a}$

14) If $\bar{F} = (y + z)i + (z + x)j + (x + y)k$, then $div\bar{F} =$ _____.

a) 3 b) 2

c) 1 d) 0

Day & Date: Monday, 04-05-2026 Max. Marks: 56
Time: 10:00 AM To 01:00 PM

Instructions: 1) All questions are compulsory.
2) Figures to the right indicate full marks.
3) Use of non-programmable calculator is allowed.

SECTION – I

Q.2 Attempt Any Three questions from the following. **09**

a) Change the given matrix into normal form and hence find its rank.
$A = \begin{bmatrix} 1 & -1 & 2 & -1 \\ 4 & 2 & -1 & 2 \\ 2 & 2 & -2 & 0 \end{bmatrix}$

b) If $y = \frac{x+1}{(x+2)(x-2)}$ then find y_n.

c) Evaluate $\lim_{x\to\infty} x^2 . e^{-x}$

d) Verify Cayley Hamilton theorem for the matrix $A = \begin{bmatrix} 1 & 2 & 3 \\ 3 & 1 & 1 \\ 0 & 1 & 2 \end{bmatrix}$

e) Expand $x^5 - x^4 + x^3 - x^2 + x - 1$ in powers of $(x-1)$ and hence find $f(0.99)$.

Q.3 Attempt Any Three questions from the following. **09**

a) Find n[th] derivative of $y = \sin 2x . \cos 6x$

b) Show that $\sin^{-1}\left(\frac{2x}{1+x^2}\right) = 2\left(x - \frac{x^3}{3} + \frac{x^5}{5} - \frac{x^7}{7} + \cdots\right)$

c) Investigate for what values of λ and μ the equations $x + 2y + 3z = 4, x + 3y + 4z = 5, x + 3y + \lambda z = \mu$ have
i) No solution
ii) Unique solution
iii) Infinite number of solutions

d) Show that $\sec x = 1 + \frac{x^2}{2} + \frac{5x^4}{24} + \cdots$

e) Examine whether the vectors $X1 = [3\ \ 1\ \ 1], X2 = [2\ \ 0\ \ -1], X3 = [4\ \ 2\ \ 1]$ are linearly dependent or independent

Q.4 Attempt Any Two questions from the following. **10**

a) If $\cos^{-1}\left(\frac{y}{b}\right) = \log\left(\frac{x}{n}\right)^n$ then show that $x^2y_{n+2} + (2n+1)xy_{n+1} + 2n^2y_n = 0$

b) Calculate the values of a, b, c such that $\lim_{x\to 0} \frac{ae^x - be^{-x} - cx}{x - \sin x} = 4$

c) Determine the eigen values and eigen vector corresponding to largest eigen value of the matrix $A = \begin{bmatrix} 2 & 1 & 1 \\ 2 & 3 & 2 \\ 3 & 3 & 4 \end{bmatrix}$

SECTION – II

Q.5 Attempt Any Three questions from the following. **09**

a) Determine the directional derivative of $\Phi = xy^2 + yz^2$ at the point $(2, -1, 1)$ in the direction of vector $i + 2j + 2k$.

b) Calculate approximately the maximum possible errors in the volume and lateral surface area, if the diameter and altitude of a right circular cylinder are measured as 24 cms. And 30 cms. respectively. The maximum possible error in each measurement is 0.1 cm.

c) Calculate $\frac{\partial^3 u}{\partial x \partial y \partial z'}$ if $u = e^{xyz}$.

d) Show that $\nabla(r^n) = nr^{n-2}\bar{r}$

e) Show that $\frac{dz}{dt} = \frac{3}{\sqrt{1-t^2}}$, if $z = \sin^{-1}(x - y)$ and $x = 3t, y = 4t^3$

Q.6 Attempt Any Three questions from the following. **09**

a) Show that:

i) $\left(\frac{\partial u}{\partial x}\right)_y . \left(\frac{\partial x}{\partial u}\right)_y = \frac{l^2}{l^2 + m^2}$

ii) $\left(\frac{\partial y}{\partial v}\right)_x . \left(\frac{\partial v}{\partial y}\right)_u = \frac{l^2+m^2}{l^2}$, if $u = lx + my, v = mx - ly$

b) Determine the maximum value of their product, if the sum of three positive numbers is 1.

c) Calculate the velocity & acceleration vectors and magnitude of velocity and acceleration at $t = 0$, if a particle moves along the curve $x = t^3 + 2t, y = -3e^{-2t}, z = 2\sin 5t$.

d) If $u = f(e^{x-y}, e^{y-z}, e^{z-x})$ then show that $\frac{\partial u}{\partial x} + \frac{\partial u}{\partial y} + \frac{\partial u}{\partial z} = 0$

e) If $x = uv, y = u/v$ then prove that $JJ' = 1$

Q.7 Attempt Any Two questions from the following. **10**

a) Show that the vector $\bar{f} = (6xy + z^3)i + (3x^2 - z)j + (3xz^2 - y)k$ is irrotational and hence find scalar potential Φ such that $\bar{f} = \nabla\Phi$.

b) If $u = \sin^{-1}\left(\frac{x^{1/4}+y^{1/4}}{x^{1/5}+y^{1/5}}\right)$ then show that

$$x^2\frac{\partial^2 u}{\partial x^2} + 2xy\frac{\partial^2 u}{\partial x \partial y} + y^2\frac{\partial^2 u}{\partial y^2} = \frac{1}{400}(\tan^2 u - 19)$$

c) Examine for maxima and minima $x^4 + y^4 - 4a^2xy$.

MCQ/Objective Type Questions

Duration: 30 Minutes Marks: 14

Q.1 Choose the correct alternative. **14**

1) If $z = x^y$ then $\frac{\partial z}{\partial y} =$ _____.

a) yx^{y-1} b) xy^{x-1}

c) $y^x \log x$ d) $x^y \log x$

2) If $x = r\cos\theta, y = r\sin\theta$ then $\left(\frac{\partial r}{\partial x}\right)_y =$ _____.

a) r/x b) x/r

c) r/y d) y/r

3) If $u = xy\tan^{-1}\left(\frac{y}{x}\right)$, then $x\frac{\partial u}{\partial x} + y\frac{\partial u}{\partial y} =$ _____.

a) 0 b) u

c) $2\mathrm{u}$ d) $-2\mathrm{u}$

4) If δx is an error in x, then $\frac{\delta x}{x}$ is called _____.

a) Absolute error in x b) Relative error in x

c) Approximate error in x d) Percentage error in x

5) A vector function $\bar{F}$ is called irrotational if _____.

a) $Curl\ \bar{F} = \bar{0}$ b) $div\ \bar{F} = 0$

c) $grad\ \bar{F} = 0$ d) $div\ \bar{F} \neq 0$

6) If $\vec{r} = x\hat{\imath} + y\hat{\jmath} + z\hat{k}$ and $\bar{a}$ is a constant vector then $\nabla(\bar{a}.\bar{r}) =$ _____.

a) $2\bar{a}$ b) $\bar{r}$

c) $2\bar{r}$ d) $\bar{a}$

7) If $\bar{F} = (y+z)i + (z+x)j + (x+y)k$, then $div\bar{F} =$ _____.

a) 3 b) 2

c) 1 d) 0

8) If $y = x^{60}$, then $y_{60} =$ _____.

a) 60 b) $60!$

c) 0 d) $0!$

9) If $f(x)$ is continuous function and has derivative of any order then the Maclaurin's Theorem states that $f(x) =$ _____.

a) $f(a) + h.f'(a) + \frac{h^2}{2!}f''(a) +$ _____.

b) $f(0) + x.f'(0) + \frac{x^2}{2!}f''(0) +$ _____.

c) $1 + x + \frac{x^2}{2!} + \frac{x^3}{3!} +$ _____.

d) $x + \frac{x^3}{3} + \frac{2}{15}x^5 +$ _____.

10) The rank of unit matrix of order m is _____.

a) 1 b) 0

c) m d) $\neq m$

11) If $y = \cos 4x$, then $y_n =$ _____.

a) $4^n \cos(4nx)$ b) $\sin(4nx)$

c) $(-1)^n \cos 4nx$ d) $4^n \cos(4x + \frac{n\pi}{2})$

12) $\lim_{x\to 0}\left(\frac{x-\sin x}{x^3}\right) =$_____.

a) 6 b) $1/6$

c) 3 d) $1/3$

13) If A is square matrix of order n and $AX = 0$ where X is a $n \times 1$ matrix of unknowns and if $r = n$ then the system has _____.

a) Has only a trivial solution

Q.3 Attempt Any Three questions from the following. **09**

a) Find nth derivative of $y = \sin 2x . \cos 6x$

b) Show that $\sin^{-1}\left(\frac{2x}{1+x^2}\right) = 2\left(x - \frac{x^3}{3} + \frac{x^5}{5} - \frac{x^7}{7} + \cdots\right)$

c) Investigate for what values of λ and μ the equations $x + 2y + 3z = 4, x + 3y + 4z = 5, x + 3y + \lambda z = \mu$ have
i) No solution
ii) Unique solution
iii) Infinite number of solutions

d) Show that $\sec x = 1 + \frac{x^2}{2} + \frac{5x^4}{24} + \cdots$

e) Examine whether the vectors $X1 = [3\ \ 1\ \ 1], X2 = [2\ \ 0\ \ -1], X3 = [4\ \ 2\ \ 1]$ are linearly dependent or independent

Q.4 Attempt Any Two questions from the following. **10**

a) If $\cos^{-1}\left(\frac{y}{b}\right) = \log\left(\frac{x}{n}\right)^n$ then show that $x^2y_{n+2} + (2n+1)xy_{n+1} + 2n^2y_n = 0$

b) Calculate the values of a, b, c such that $\lim_{x\to 0} \frac{ae^x - be^{-x} - cx}{x - \sin x} = 4$

c) Determine the eigen values and eigen vector corresponding to largest eigen value of the matrix $A = \begin{bmatrix} 2 & 1 & 1 \\ 2 & 3 & 2 \\ 3 & 3 & 4 \end{bmatrix}$

SECTION – II

Q.5 Attempt Any Three questions from the following. **09**

a) Determine the directional derivative of $\Phi = xy^2 + yz^2$ at the point $(2, -1, 1)$ in the direction of vector $i + 2j + 2k$.

b) Calculate approximately the maximum possible errors in the volume and lateral surface area, if the diameter and altitude of a right circular cylinder are measured as 24 cms. And 30 cms. respectively. The maximum possible error in each measurement is 0.1 cm.

c) Calculate $\frac{\partial^3 u}{\partial x \partial y \partial z'}$ if $u = e^{xyz}$.

d) Show that $\nabla(r^n) = nr^{n-2}\bar{r}$

e) Show that $\frac{dz}{dt} = \frac{3}{\sqrt{1-t^2}}$, if $z = \sin^{-1}(x - y)$ and $x = 3t, y = 4t^3$

Q.6 Attempt Any Three questions from the following. **09**

a) Show that:

i) $\left(\frac{\partial u}{\partial x}\right)_y . \left(\frac{\partial x}{\partial u}\right)_y = \frac{l^2}{l^2 + m^2}$

ii) $\left(\frac{\partial y}{\partial v}\right)_x . \left(\frac{\partial v}{\partial y}\right)_u = \frac{l^2+m^2}{l^2}$, if $u = lx + my, v = mx - ly$

b) Determine the maximum value of their product, if the sum of three positive numbers is 1.

c) Calculate the velocity & acceleration vectors and magnitude of velocity and acceleration at $t = 0$, if a particle moves along the curve $x = t^3 + 2t, y = -3e^{-2t}, z = 2\sin 5t$.

d) If $u = f(e^{x-y}, e^{y-z}, e^{z-x})$ then show that $\frac{\partial u}{\partial x} + \frac{\partial u}{\partial y} + \frac{\partial u}{\partial z} = 0$

e) If $x = uv, y = u/v$ then prove that $JJ' = 1$

Q.7 Attempt Any Two questions from the following. **10**

a) Show that the vector $\bar{f} = (6xy + z^3)i + (3x^2 - z)j + (3xz^2 - y)k$ is irrotational and hence find scalar potential Φ such that $\bar{f} = \nabla\Phi$.

b) If $u = \sin^{-1}\left(\frac{x^{1/4}+y^{1/4}}{x^{1/5}+y^{1/5}}\right)$ then show that

$$x^2\frac{\partial^2 u}{\partial x^2} + 2xy\frac{\partial^2 u}{\partial x \partial y} + y^2\frac{\partial^2 u}{\partial y^2} = \frac{1}{400}(\tan^2 u - 19)$$

c) Examine for maxima and minima $x^4 + y^4 - 4a^2xy$.

(BTCE0103) /(BTCSE0103)/(BTETE0103)/ (BTEE0103)/(BTME0103)/(BTECE0103)/(BTMRE103)/(BTAI0103)

Day & Date: Monday, 04-05-2026 Max. Marks: 70
Time: 10:00 AM To 01:00 PM

Instructions: 1) Q. No. 1 is compulsory. It should be solved in the first 30 minutes in Answer Book Page no 03 (Starting page of the Answer Book). Each question carries one mark.
2) Don't forget to Mention question paper set (P/Q/R/S) on top of page.
3) Figures to the right indicates full marks.
4) Make suitable assumptions if necessary and state them clearly.
5) Use of Non programable Calculator is allowed.

MCQ/Objective Type Questions

Duration: 30 Minutes Marks: 14

Q.1 Choose the correct alternative. **14**

1) If A is square matrix of order n and $AX = 0$ where X is a $n \times 1$ matrix of unknowns and if $r = n$ then the system has _____.

a) Has only a trivial solution
b) Has one independent solution
c) Has n independent solution
d) Has $m - n$ independent solutions

2) If $X1, X2, X3$ are linearly independent and $k1X1 + k2X2 + k3X3 = 0$, then _____.

a) $k1, k2, k3$ all are equal to 1
b) $k1 = 0$ but $k2, k3 \neq 0$
c) $k1, k2 = 0$ but $k3 \neq 0$
d) All $k1, k2, k3$ are zero

3) If $z = x^y$ then $\frac{\partial z}{\partial y} =$ _____.

a) yx^{y-1}
b) xy^{x-1}
c) $y^x \log x$
d) $x^y \log x$

4) If $x = r\cos\theta, y = r\sin\theta$ then $\left(\frac{\partial r}{\partial x}\right)_y =$ _____.

a) r/x
b) x/r
c) r/y
d) y/r

5) If $u = xy\tan^{-1}\left(\frac{y}{x}\right)$, then $x\frac{\partial u}{\partial x} + y\frac{\partial u}{\partial y} =$ _____.

a) 0 b) u

c) $2\mathrm{u}$ d) $-2\mathrm{u}$

6) If δx is an error in x, then $\frac{\delta x}{x}$ is called _____.

a) Absolute error in x b) Relative error in x

c) Approximate error in x d) Percentage error in x

7) A vector function $\bar{F}$ is called irrotational if _____.

a) $Curl\ \bar{F} = \bar{0}$ b) $div\ \bar{F} = 0$

c) $grad\ \bar{F} = 0$ d) $div\ \bar{F} \neq 0$

8) If $\vec{r} = x\hat{\imath} + y\hat{\jmath} + z\hat{k}$ and $\bar{a}$ is a constant vector then $\nabla(\bar{a}.\bar{r}) =$ _____.

a) $2\bar{a}$ b) $\bar{r}$

c) $2\bar{r}$ d) $\bar{a}$

9) If $\bar{F} = (y+z)i + (z+x)j + (x+y)k$, then $div\bar{F} =$ _____.

a) 3 b) 2

c) 1 d) 0

10) If $y = x^{60}$, then $y_{60} =$ _____.

a) 60 b) $60!$

c) 0 d) $0!$

11) If $f(x)$ is continuous function and has derivative of any order then the Maclaurin's Theorem states that $f(x) =$ _____.

a) $f(a) + h.f'(a) + \frac{h^2}{2!}f''(a) +$ _____.

b) $f(0) + x.f'(0) + \frac{x^2}{2!}f''(0) +$ _____.

c) $1 + x + \frac{x^2}{2!} + \frac{x^3}{3!} +$ _____.

d) $x + \frac{x^3}{3} + \frac{2}{15}x^5 +$ _____.

12) The rank of unit matrix of order m is _____.

a) 1 b) 0

c) m d) $\neq m$

13) If $y = \cos 4x$, then $y_n =$ _____.

a) $4^n \cos(4nx)$ b) $\sin(4nx)$

c) $(-1)^n \cos 4nx$ d) $4^n \cos(4x + \frac{n\pi}{2})$

14) $\lim_{x \to 0} \left(\frac{x - \sin x}{x^3}\right) =$_____.

a) 6 b) $1/6$

c) 3 d) $1/3$

3) Use of non-programmable calculator is allowed.

SECTION – I

Q.2 Attempt Any Three questions from the following. **09**

a) Change the given matrix into normal form and hence find its rank.
$A = \begin{bmatrix} 1 & -1 & 2 & -1 \\ 4 & 2 & -1 & 2 \\ 2 & 2 & -2 & 0 \end{bmatrix}$

b) If $y = \frac{x+1}{(x+2)(x-2)}$ then find y_n.

c) Evaluate $\lim_{x\to\infty} x^2 . e^{-x}$

d) Verify Cayley Hamilton theorem for the matrix $A = \begin{bmatrix} 1 & 2 & 3 \\ 3 & 1 & 1 \\ 0 & 1 & 2 \end{bmatrix}$

e) Expand $x^5 - x^4 + x^3 - x^2 + x - 1$ in powers of $(x-1)$ and hence find $f(0.99)$.

Q.3 Attempt Any Three questions from the following. **09**

a) Find nth derivative of $y = \sin 2x . \cos 6x$

b) Show that $\sin^{-1}\left(\frac{2x}{1+x^2}\right) = 2\left(x - \frac{x^3}{3} + \frac{x^5}{5} - \frac{x^7}{7} + \cdots\right)$

c) Investigate for what values of λ and μ the equations $x + 2y + 3z = 4, x + 3y + 4z = 5, x + 3y + \lambda z = \mu$ have
i) No solution
ii) Unique solution
iii) Infinite number of solutions

d) Show that $\sec x = 1 + \frac{x^2}{2} + \frac{5x^4}{24} + \cdots$

e) Examine whether the vectors $X1 = [3\ \ 1\ \ 1], X2 = [2\ \ 0\ \ -1], X3 = [4\ \ 2\ \ 1]$ are linearly dependent or independent

Q.4 Attempt Any Two questions from the following. **10**

a) If $\cos^{-1}\left(\frac{y}{b}\right) = \log\left(\frac{x}{n}\right)^n$ then show that $x^2y_{n+2} + (2n+1)xy_{n+1} + 2n^2y_n = 0$

b) Calculate the values of a, b, c such that $\lim_{x\to 0} \frac{ae^x - be^{-x} - cx}{x - \sin x} = 4$

c) Determine the eigen values and eigen vector corresponding to largest eigen value of the matrix $A = \begin{bmatrix} 2 & 1 & 1 \\ 2 & 3 & 2 \\ 3 & 3 & 4 \end{bmatrix}$

SECTION – II

Q.5 Attempt Any Three questions from the following. **09**

a) Determine the directional derivative of $\Phi = xy^2 + yz^2$ at the point $(2, -1, 1)$ in the direction of vector $i + 2j + 2k$.

b) Calculate approximately the maximum possible errors in the volume and lateral surface area, if the diameter and altitude of a right circular cylinder are measured as 24 cms. And 30 cms. respectively. The maximum possible error in each measurement is 0.1 cm.

c) Calculate $\frac{\partial^3 u}{\partial x \partial y \partial z'}$ if $u = e^{xyz}$.

d) Show that $\nabla(r^n) = nr^{n-2}\bar{r}$

e) Show that $\frac{dz}{dt} = \frac{3}{\sqrt{1-t^2}}$, if $z = \sin^{-1}(x - y)$ and $x = 3t, y = 4t^3$

Q.6 Attempt Any Three questions from the following. **09**

a) Show that:

i) $\left(\frac{\partial u}{\partial x}\right)_y \cdot \left(\frac{\partial x}{\partial u}\right)_y = \frac{l^2}{l^2 + m^2}$

ii) $\left(\frac{\partial y}{\partial v}\right)_x \cdot \left(\frac{\partial v}{\partial y}\right)_u = \frac{l^2+m^2}{l^2}$, if $u = lx + my, v = mx - ly$

b) Determine the maximum value of their product, if the sum of three positive numbers is 1.

c) Calculate the velocity & acceleration vectors and magnitude of velocity and acceleration at $t = 0$, if a particle moves along the curve $x = t^3 + 2t, y = -3e^{-2t}, z = 2\sin 5t$.

d) If $u = f(e^{x-y}, e^{y-z}, e^{z-x})$ then show that $\frac{\partial u}{\partial x} + \frac{\partial u}{\partial y} + \frac{\partial u}{\partial z} = 0$

e) If $x = uv, y = u/v$ then prove that $JJ' = 1$

Q.7 Attempt Any Two questions from the following. **10**

a) Show that the vector $\bar{f} = (6xy + z^3)i + (3x^2 - z)j + (3xz^2 - y)k$ is irrotational and hence find scalar potential Φ such that $\bar{f} = \nabla\Phi$.

b) If $u = \sin^{-1}\left(\frac{x^{1/4}+y^{1/4}}{x^{1/5}+y^{1/5}}\right)$ then show that

$$x^2\frac{\partial^2 u}{\partial x^2} + 2xy\frac{\partial^2 u}{\partial x \partial y} + y^2\frac{\partial^2 u}{\partial y^2} = \frac{1}{400}(\tan^2 u - 19)$$

c) Examine for maxima and minima $x^4 + y^4 - 4a^2xy$.

MCQ/Objective Type Questions

Duration: 30 Minutes Marks:14

Q.1 Multiple choice questions: **14**

1) Forces are called concurrent when their lines of action meet in _____.
a) one point b) two points
c) plane d) perpendicular planes

2) If the arm of a couple is doubled, it's moment will _____.
a) be halved b) remains the same
c) be doubled d) None of above

3) Redundant truss is a type of _____.
a) perfect truss b) imperfect truss
c) stable truss d) None of the above

4) The velocity of body reaching ground from height h is, _____.
a) $2\sqrt{gh}$ b) $\sqrt{gh}$
c) $\sqrt{2gh}$ d) $2g\sqrt{h}$

5) For fixed support number of unknown are _____.
a) one b) two
c) three d) None of these

6) A body is projected vertically upwards with velocity u from a surface. The velocity with which it strikes the surface back is _____.
a) u b) $2u$
c) u^2/g d) u/g

7) When acceleration is _____, velocity of a particle is constant.
a) constant but non zero
b) maximum
c) zero
d) None of the above

8) When a body of mass moment of inertia I (about a given axis) is rotated about that axis with an angular velocity, then the kinetic energy of rotation is _____.
a) $0.5\ \mathrm{I}.\omega$
b) $\mathrm{I}.\omega$
c) $0.5\ \mathrm{I}.\omega^2$
d) $\mathrm{I}.\omega^2$

9) The energy possessed by a body, for doing work by virtue of its position, is called _____.
a) Potential energy
b) Kinetic energy
c) Electrical energy
d) Chemical energy

10) 1 joule is equal to _____.
a) 1 N × 1 m
b) 1 N + 1 m
c) 1 N − 1 m
d) 1 G9 × 1m

11) Time of flight of a projectile on a horizontal, plane is _____.
a) $2u\sin\alpha/\ g$
b) $2u\cos\ \alpha/\ g$
c) $2u\tan\alpha/\ g$
d) $2u\cot\alpha/g$

12) The parallel axis theorem uses the _____ of the distance.
a) Square root
b) Square
c) Cube root
d) Cube

13) The torque acting on a body of moment of inertia (I) and angular acceleration (α) is _____.
a) $\mathrm{I}\ \alpha$
b) $\mathrm{I}\ \alpha^2$
c) $0.5\mathrm{I}\ \alpha$
d) $0.5\mathrm{I}\ \alpha^2$

14) The time rate of doing work is known as, _____.
a) Potential energy
b) Kinetic energy
c) Power
d) None of these

3) Assume suitable data wherever needed & mention it clearly.
4) Draw neat sketches wherever necessary.

SECTION – I

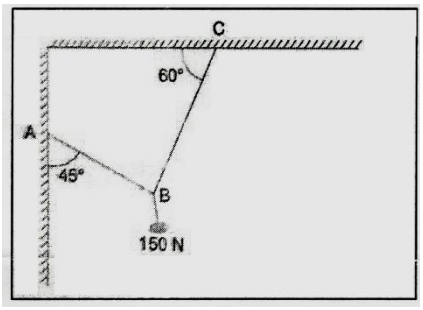
Q.2 Attempt Any Four of the following. **12**

a) State and explain principle of transmissibility.

b) Define couple and state its characteristics.

c) What are the assumptions made in the analysis of trusses?

d) Find the forces developed in the wires, supporting on elastic fixtures as shown in the figure.

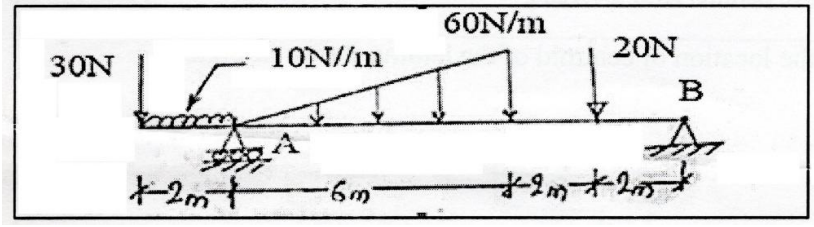


e) Define the terms.
i) Horizontal range
ii) Trajectory
iii) Time of flight

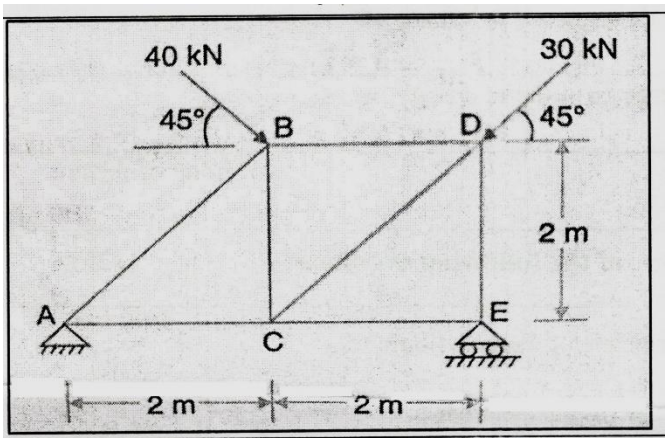
f) Distinguish between angular motion and linear motion.

Q.3 Attempt Any Two of the following: **16**

a) An overhanging beam is on rollers at A and is hinged at B and is loaded as shown in Figure. Determine the reactions at A and B.



b) Find the forces in all members by using method of joints.



c) Two cars are travelling towards each other on a single lane road at a velocity 12m/s & 9m/s respectively. When 100m apart both driver realize the situation of accident & apply the break simultaneously. They succeed in stopping simultaneously on just verge of collision. Assuming retardation for each case.
Determine:

i) Time required to stop car
ii) Retardation for each car
iii) Distance travelled by each car while slowing down.

SECTION – II

Q.4 Attempt Any Four of the following: **12**

a) Define

i) Work done
ii) Impulse
iii) Momentum

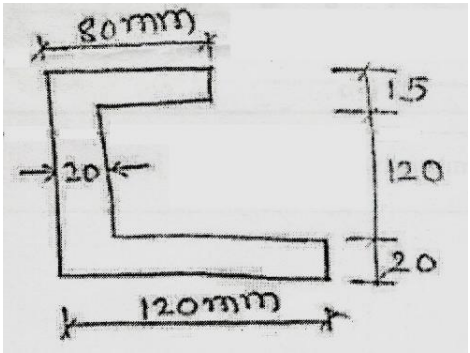
b) State and prove the work energy principle for linear motion.

c) State and explain the law of conservation of momentum.

d) State and explain D'Alembert's principle.

e) State and prove parallel axes theorem.

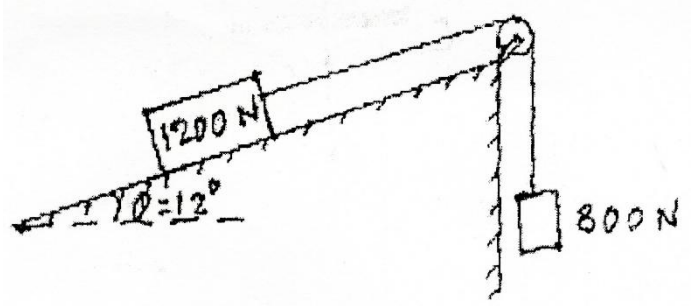
f) Determine the location of centroid of the lamina shown in Figure.



Q.5 Attempt Any Two of the following: **16**

a) A body weighing 1200 N rests on a rough plane inclined at 12° to the horizontal. It is pulled up the plane by means of a light rope running parallel to the plane and passing over a light frictionless pulley at the top of the plane as shown in the figure. The portion of the rope beyond the pulley hangs vertically down and carries a weight of 800 N at its end. The coefficient of friction for the plane and the body is 0.2.
Find

i) Tension in the rope
ii) Acceleration with which the body moves up the plane.
iii) The distance moved by the body in 3 seconds after starting from rest.



b) A block weighing 2500 N rests on level horizontal plane for which coefficient of friction is 0.20. This block is pulled by a force of 1000 N acting at an angle of 30° to the horizontal. Find the velocity of the block after it moves 30 m starting from rest. If the force of 1000 N is then removed how further will it move? Use work energy method.

c) Determine the polar moment of inertial of the I section as shown in figure. Also determine the radii of gyration with respect to x-x and y-y axis.

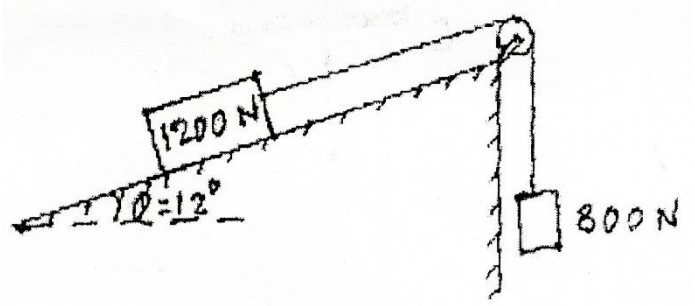
The portion of the rope beyond the pulley hangs vertically down and carries a weight of 800 N at its end. The coefficient of friction for the plane and the body is 0.2.
Find

i) Tension in the rope
ii) Acceleration with which the body moves up the plane.
iii) The distance moved by the body in 3 seconds after starting from rest.



b) A block weighing 2500 N rests on level horizontal plane for which coefficient of friction is 0.20. This block is pulled by a force of 1000 N acting at an angle of 30° to the horizontal. Find the velocity of the block after it moves 30 m starting from rest. If the force of 1000 N is then removed how further will it move? Use work energy method.

c) Determine the polar moment of inertial of the I section as shown in figure. Also determine the radii of gyration with respect to x-x and y-y axis.

Day & Date: Wednesday, 06-05-2026 Max. Marks: 70
Time: 10:00 AM To 01:00 PM

Instructions: 1) Q. No. 1 is compulsory. It should be solved in the first 30 minutes in Answer Book Page no 03 (Starting page of the Answer Book). Each question carries one mark.
2) Don't forget to Mention question paper set (P/Q/R/S) on top of page.
3) Figures to the right indicates full marks.
4) Assume suitable data whenever needed and mention it clearly.

MCQ/Objective Type Questions

Duration: 30 Minutes Marks:14

Q.1 Multiple choice questions: **14**

1) Time of flight of a projectile on a horizontal, plane is _____.
a) $2u \sin \alpha / g$ b) $2u \cos \alpha / g$
c) $2u \tan \alpha / g$ d) $2u \cot \alpha / g$

2) The parallel axis theorem uses the _____ of the distance.
a) Square root b) Square
c) Cube root d) Cube

3) The torque acting on a body of moment of inertia (I) and angular acceleration (α) is _____.
a) $\mathrm{I}\,\alpha$ b) $\mathrm{I}\,\alpha^2$
c) $0.5\mathrm{I}\,\alpha$ d) $0.5\mathrm{I}\,\alpha^2$

4) The time rate of doing work is known as, _____.
a) Potential energy b) Kinetic energy
c) Power d) None of these

5) Forces are called concurrent when their lines of action meet in _____.
a) one point b) two points
c) plane d) perpendicular planes

6) If the arm of a couple is doubled, it's moment will _____.
a) be halved b) remains the same
c) be doubled d) None of above

7) Redundant truss is a type of _____.
a) perfect truss b) imperfect truss
c) stable truss d) None of the above

8) The velocity of body reaching ground from height h is, _____.
a) $2\sqrt{gh}$ b) $\sqrt{gh}$
c) $\sqrt{2gh}$ d) $2g\sqrt{h}$

9) For fixed support number of unknown are _____.
a) one b) two
c) three d) None of these

10) A body is projected vertically upwards with velocity u from a surface. The velocity with which it strikes the surface back is _____.
a) u b) $2u$
c) u^2/g d) u/g

11) When acceleration is _____, velocity of a particle is constant.
a) constant but non zero b) maximum
c) zero d) None of the above

12) When a body of mass moment of inertia I (about a given axis) is rotated about that axis with an angular velocity, then the kinetic energy of rotation is _____.
a) $0.5\ \mathrm{I}.\omega$ b) $\mathrm{I}.\omega$
c) $0.5\ \mathrm{I}.\omega^2$ d) $\mathrm{I}.\omega^2$

13) The energy possessed by a body, for doing work by virtue of its position, is called _____.
a) Potential energy b) Kinetic energy
c) Electrical energy d) Chemical energy

14) 1 joule is equal to _____.
a) 1 N × 1 m b) 1 N + 1 m
c) 1 N − 1 m d) 1 G9 × 1m

Day & Date: Wednesday, 06-05-2026 Max. Marks: 56
Time: 10:00 AM To 01:00 PM

Instructions: 1) All questions are compulsory.
2) Figures to the right indicate full marks.
3) Assume suitable data wherever needed & mention it clearly.
4) Draw neat sketches wherever necessary.

SECTION – I

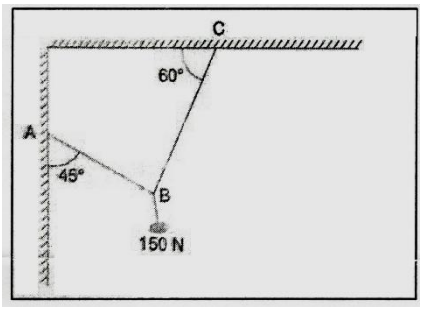
Q.2 Attempt Any Four of the following. **12**

a) State and explain principle of transmissibility.

b) Define couple and state its characteristics.

c) What are the assumptions made in the analysis of trusses?

d) Find the forces developed in the wires, supporting on elastic fixtures as shown in the figure.

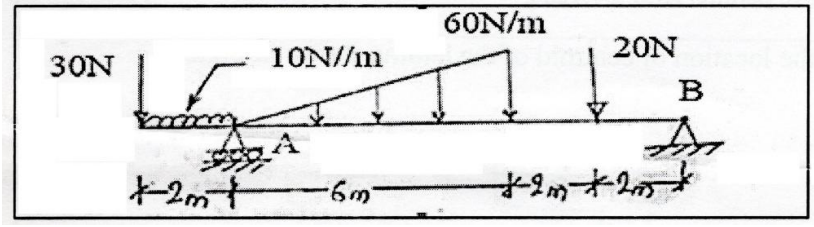


e) Define the terms.
i) Horizontal range
ii) Trajectory
iii) Time of flight

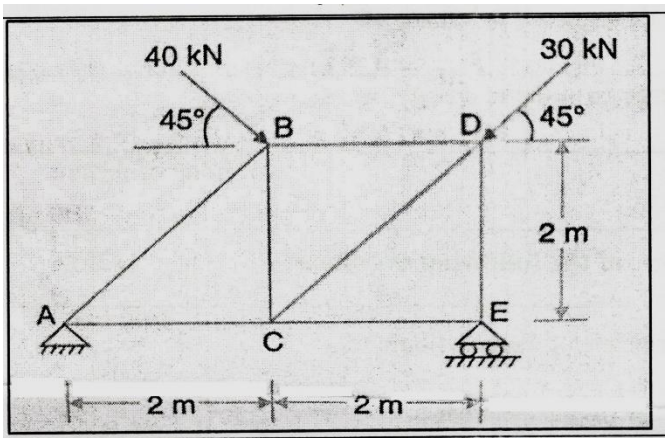
f) Distinguish between angular motion and linear motion.

Q.3 Attempt Any Two of the following: **16**

a) An overhanging beam is on rollers at A and is hinged at B and is loaded as shown in Figure. Determine the reactions at A and B.



b) Find the forces in all members by using method of joints.



c) Two cars are travelling towards each other on a single lane road at a velocity 12m/s & 9m/s respectively. When 100m apart both driver realize the situation of accident & apply the break simultaneously. They succeed in stopping simultaneously on just verge of collision. Assuming retardation for each case.
Determine:

i) Time required to stop car
ii) Retardation for each car
iii) Distance travelled by each car while slowing down.

SECTION – II

Q.4 Attempt Any Four of the following: **12**

a) Define

i) Work done
ii) Impulse
iii) Momentum

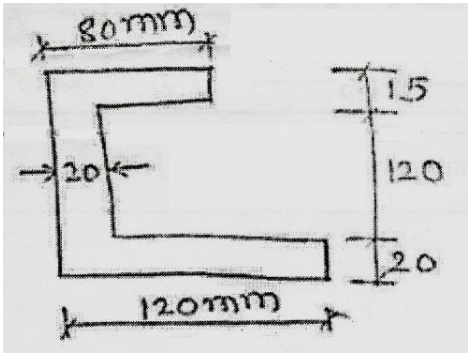
b) State and prove the work energy principle for linear motion.

c) State and explain the law of conservation of momentum.

d) State and explain D'Alembert's principle.

e) State and prove parallel axes theorem.

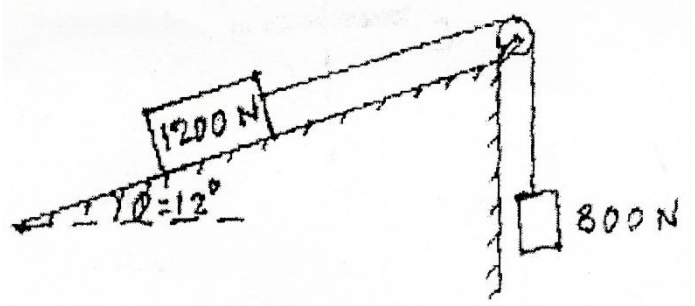
f) Determine the location of centroid of the lamina shown in Figure.



Q.5 Attempt Any Two of the following: **16**

a) A body weighing 1200 N rests on a rough plane inclined at 12° to the horizontal. It is pulled up the plane by means of a light rope running parallel to the plane and passing over a light frictionless pulley at the top of the plane as shown in the figure. The portion of the rope beyond the pulley hangs vertically down and carries a weight of 800 N at its end. The coefficient of friction for the plane and the body is 0.2.
Find

i) Tension in the rope
ii) Acceleration with which the body moves up the plane.
iii) The distance moved by the body in 3 seconds after starting from rest.



b) A block weighing 2500 N rests on level horizontal plane for which coefficient of friction is 0.20. This block is pulled by a force of 1000 N acting at an angle of 30° to the horizontal. Find the velocity of the block after it moves 30 m starting from rest. If the force of 1000 N is then removed how further will it move? Use work energy method.

Constants: 1) Avogadro's no., $N = 6.02 \times 10^{26}$ / k.mol.
2) Velocity of light, $c = 3 \times 10^{8}$ m/sec.
3) Charge of electron, $e = 1.6 \times 10^{-19}$ C.

MCQ/Objective Type Questions

Duration: 30 Minutes Marks:14

Q.1 Choose the correct alternatives from the options. 14

1) In conductor, current flows due to _____.
a) electrons b) both holes and electrons
c) protons d) holes

2) Semiconductors that contain acceptor atoms and holes belong to the _____.
a) N-type b) P-type
c) both N-type and P-type d) neither N nor P-type

3) Effective number of atoms belonging to the unit cell of BCC structure is _____.
a) 6 b) 4
c) 2 d) 8

4) Atomic packing factor of SC structure is _____.
a) 0.68 b) 0.48
c) 0.52 d) 0.74

5) Cubic crystal has _____ two-fold axes of symmetry.
a) 6 b) 12
c) 3 d) 4

6) SONAR stands for _____.
a) Sound Ranging and Navigation
b) Sonic Detection and Ranging
c) Solar Navigation and Ranging
d) Sound Navigation and Ranging

7) The persistence of audible sound after the source has stopped to emit sound is known as _____.
a) echo
b) reflection
c) reverberation
d) reverberation time

8) The grating constant is given by the equation _____
a) No. of lines per inch
b) $\frac{1.54}{\text{No. of lines/inch}}$
c) No. of lines per cm
d) $\frac{1}{\text{No. of lines/cm}}$

9) In Laurentz's half shade Polarimeter, the half part of Laurentz's plate is of _____.
a) calcite, tourmaline
b) quartz, calcite
c) glass, quartz
d) glass, calcite

10) Stimulated emission process is represented as _____.
a) $A + hv \rightarrow A^*$
b) $A^* + hv \rightarrow A + 2hv$
c) $A^* \rightarrow A + hv$
d) $A^* + hv \rightarrow A + hv$

11) LASER is a short form of _____.
a) Light Amplification by Stimulated Emission of Radiation
b) Light Absorption by Spontaneous Emission of Radiation
c) Light Amplification by Spontaneous Emission of Radiation
d) Light Absorption by Stimulated Emission of Radiation

12) For He-Ne laser, typical value of divergence is _____.
a) 10^5 radian
b) 10^3 radian
c) 10^{-5} radian
d) 10^{-3} radian

13) The numerical aperture is defined as the _____.
a) tangent of the acceptance angle
b) sine of the acceptance angle
c) cosine of the acceptance angle
d) cosec of the acceptance angle

14) Dimensions of nanomaterials ranging from _____.
a) 1 to 150 nm
b) 2 to 250 nm
c) 1 to 100 nm
d) 25 to 100 nm

3) Make suitable assumptions if necessary and state them clearly.

SECTION – I

Q.2 Attempt Any SIX of the following. **18**

a) Define: valence band, conduction band and energy gap. Show them with neat diagram.

b) Derive an expression for Fermi level lies at the middle of valence band and conduction band in intrinsic semiconductors.

c) Define: Atomic radius. Determine the relation between lattice constant (a) and atomic radius (r) for BCC, and FCC.

d) Explain: Plane of symmetry.

e) State: Basic requirements for acoustically good hall.

f) State: Properties of ultrasonic waves.

g) Calculate the Hall voltage across a copper strip which is 2.5 cm wide and 1 mm thick, carrying current of 250A and placed in a magnetic field with B = 1.65 wb/m^2. Given: number of charge carriers in the copper strip 8.4×10^{28} m^{-3}.

h) A hall has a volume of 2265.6 m^3. Its total absorption is equivalent to 92.90 m^2 of open window. What will be the effect on the reverberation time if curtains of total absorption equivalent to 92.90 m^2 are placed inside?

Q.3 Attempt Any TWO of the following. **10**

a) State Hall effect? Derive the relation for Hall voltage (V_H) and Hall coefficient (R_H).

b) Explain the factors affecting the architectural acoustics of a hall and their remedies.

c) Explain the term Miller indices. Derive the relation between lattice constant and interplanar spacing for cubic crystal.

$$d_{(hkl)} = \frac{a}{\sqrt{h^2 + k^2 + l^2}}$$

d) i) A substance with the FCC lattice has density 6200 kg/m^3 and molecular weight 60.2. Calculate the lattice constant 'a'.
Given: Avogadro number is 6.02×10^{26} /kg.mole.

ii) Calculate the radius of atoms in α-iron belonging to BCC structure. The density of α-iron is 7860 kg/m^3 and atomic weight of iron is 55.85.

SECTION – II

Q.4 Attempt Any SIX of the following. **18**

a) Explain: Rayleigh's criterion of resolution.

b) State and Explain: Malus Law.

c) Explain:
i) Stimulated Emission and
ii) Population Inversion

d) State: Properties of LASER source.

e) Explain: Principal of Optical Fiber.

f) Explain: Types of Carbon Nanotubes (CNT).

g) In a transmission diffraction grating with 5000 number of lines/cm, a light of the wavelength 6350 Å is incident normally on it. Determine how many orders will be visible with this grating?

h) Optical fiber is made of glass with a core of refractive index of 1.75 and is clad with a refractive index 1.61 and launching takes from air. Calculate numerical aperture and acceptance angle of the fiber.

Q.5 Attempt Any TWO of the following. **10**

a) What is diffraction grating? Derive an expression $\lambda/d\lambda = n.N$ for the resolving power of a diffraction grating.

b) Derive an expression for acceptance angle (θ_0), acceptance cone, numerical aperture and fractional refractive index change (Δ) of an optical fiber.

c) i) A glass tube with 200 mm long containing sugar solution rotates the plane of polarization by 10.11^0. If the specific rotation of sugar is 66°, calculate the strength of the solution.

ii) Sodium yellow light of wavelength 5893 Å is a doublet of 6 Å . What is the minimum number of lines a grating should have to resolve the doublet in the 3rd order spectrum.

d) Explain: He-Ne gas laser with neat energy level and transition diagram.

d) i) A substance with the FCC lattice has density 6200 kg/m^3 and molecular weight 60.2. Calculate the lattice constant 'a'.
Given: Avogadro number is 6.02×10^{26} /kg.mole.

ii) Calculate the radius of atoms in α-iron belonging to BCC structure. The density of α-iron is 7860 kg/m^3 and atomic weight of iron is 55.85.

SECTION – II

Q.4 Attempt Any SIX of the following. **18**

a) Explain: Rayleigh's criterion of resolution.

b) State and Explain: Malus Law.

c) Explain:
i) Stimulated Emission and
ii) Population Inversion

d) State: Properties of LASER source.

e) Explain: Principal of Optical Fiber.

f) Explain: Types of Carbon Nanotubes (CNT).

g) In a transmission diffraction grating with 5000 number of lines/cm, a light of the wavelength 6350 Å is incident normally on it. Determine how many orders will be visible with this grating?

h) Optical fiber is made of glass with a core of refractive index of 1.75 and is clad with a refractive index 1.61 and launching takes from air. Calculate numerical aperture and acceptance angle of the fiber.

Q.5 Attempt Any TWO of the following. **10**

a) What is diffraction grating? Derive an expression $\lambda/d\lambda = n.N$ for the resolving power of a diffraction grating.

b) Derive an expression for acceptance angle (θ_0), acceptance cone, numerical aperture and fractional refractive index change (Δ) of an optical fiber.

c) i) A glass tube with 200 mm long containing sugar solution rotates the plane of polarization by 10.11^0. If the specific rotation of sugar is 66°, calculate the strength of the solution.

ii) Sodium yellow light of wavelength 5893 Å is a doublet of 6 Å . What is the minimum number of lines a grating should have to resolve the doublet in the 3rd order spectrum.

d) Explain: He-Ne gas laser with neat energy level and transition diagram.

Set **R**

F.Y. (B.Tech.) (Semester - I) (New) (NEP CBCS) Examination: March/April – 2026
Engineering Physics
(BTCE0101)/ (BTCSE0101)/ (BTETE0101)/ (BTEE0101)/ (BTME0101)/ (BTECE0101)/ (BTMRE101)/ (BTAI0101)

Day & Date: Friday, 08-05-2026 Max. Marks: 70
Time: 10:00 AM To 01:00 PM

Instructions: 1) Q. No. 1 is compulsory. It should be solved in the first 30 minutes in Answer Book Page no. 03 (Starting page of the Answer Book). Each question carries one mark.
2) Don't forget to Mention question paper set (P/Q/R/S) on top of page.
3) Figures to the right indicates full marks.
4) Make suitable assumptions if necessary and state them clearly.

Constants: 1) Avogadro's no., $N = 6.02 \times 10^{26}$ / k.mol.
2) Velocity of light, $c = 3 \times 10^{8}$ m/sec.
3) Charge of electron, $e = 1.6 \times 10^{-19}$ C.

MCQ/Objective Type Questions

Duration: 30 Minutes Marks:14

Q.1 Choose the correct alternatives from the options. **14**

1) LASER is a short form of _____.
a) Light Amplification by Stimulated Emission of Radiation
b) Light Absorption by Spontaneous Emission of Radiation
c) Light Amplification by Spontaneous Emission of Radiation
d) Light Absorption by Stimulated Emission of Radiation

2) For He-Ne laser, typical value of divergence is _____.
a) 10^{5} radian b) 10^{3} radian
c) 10^{-5} radian d) 10^{-3} radian

3) The numerical aperture is defined as the _____.
a) tangent of the acceptance angle
b) sine of the acceptance angle
c) cosine of the acceptance angle
d) cosec of the acceptance angle

4) Dimensions of nanomaterials ranging from _____.
a) 1 to 150 nm b) 2 to 250 nm
c) 1 to 100 nm d) 25 to 100 nm

5) In conductor, current flows due to _____.
a) electrons b) both holes and electrons
c) protons d) holes

6) Semiconductors that contain acceptor atoms and holes belong to the _____.

a) N-type
b) P-type
c) both N-type and P-type
d) neither N nor P-type

7) Effective number of atoms belonging to the unit cell of BCC structure is _____.

a) 6
b) 4
c) 2
d) 8

8) Atomic packing factor of SC structure is _____.

a) 0.68
b) 0.48
c) 0.52
d) 0.74

9) Cubic crystal has _____ two-fold axes of symmetry.

a) 6
b) 12
c) 3
d) 4

10) SONAR stands for _____.

a) Sound Ranging and Navigation
b) Sonic Detection and Ranging
c) Solar Navigation and Ranging
d) Sound Navigation and Ranging

11) The persistence of audible sound after the source has stopped to emit sound is known as _____.

a) echo
b) reflection
c) reverberation
d) reverberation time

12) The grating constant is given by the equation _____

a) No. of lines per inch
b) $\frac{1.54}{\text{No. of lines/inch}}$
c) No. of lines per cm
d) $\frac{1}{\text{No. of lines/cm}}$

13) In Laurentz's half shade Polarimeter, the half part of Laurentz's plate is of _____.

a) calcite, tourmaline
b) quartz, calcite
c) glass, quartz
d) glass, calcite

14) Stimulated emission process is represented as _____.

a) $A + hv \rightarrow A^*$
b) $A^* + hv \rightarrow A + 2hv$
c) $A^* \rightarrow A + hv$
d) $A^* + hv \rightarrow A + hv$

(BTCE0101)/ (BTCSE0101)/ (BTETE0101)/ (BTEE0101)/ (BTME0101)/ (BTECE0101)/ (BTMRE101)/ (BTAI0101)

Day & Date: Friday, 08-05-2026 Max. Marks: 56
Time: 10:00 AM To 01:00 PM

Instructions: 1) All questions are compulsory.
2) Figures to the right indicate full marks.
3) Make suitable assumptions if necessary and state them clearly.

SECTION – I

Q.2 Attempt Any SIX of the following. **18**

a) Define: valence band, conduction band and energy gap. Show them with neat diagram.

b) Derive an expression for Fermi level lies at the middle of valence band and conduction band in intrinsic semiconductors.

c) Define: Atomic radius. Determine the relation between lattice constant (a) and atomic radius (r) for BCC, and FCC.

d) Explain: Plane of symmetry.

e) State: Basic requirements for acoustically good hall.

f) State: Properties of ultrasonic waves.

g) Calculate the Hall voltage across a copper strip which is 2.5 cm wide and 1 mm thick, carrying current of 250A and placed in a magnetic field with B = 1.65 wb/m^2. Given: number of charge carriers in the copper strip 8.4×10^{28} m^{-3}.

h) A hall has a volume of 2265.6 m^3. Its total absorption is equivalent to 92.90 m^2 of open window. What will be the effect on the reverberation time if curtains of total absorption equivalent to 92.90 m^2 are placed inside?

Q.3 Attempt Any TWO of the following. **10**

a) State Hall effect? Derive the relation for Hall voltage (V_H) and Hall coefficient (R_H).

b) Explain the factors affecting the architectural acoustics of a hall and their remedies.

c) Explain the term Miller indices. Derive the relation between lattice constant and interplanar spacing for cubic crystal.

$$d_{(hkl)} = \frac{a}{\sqrt{h^2 + k^2 + l^2}}$$

d) i) A substance with the FCC lattice has density 6200 kg/m^3 and molecular weight 60.2. Calculate the lattice constant 'a'.
Given: Avogadro number is 6.02×10^{26} /kg.mole.

ii) Calculate the radius of atoms in α-iron belonging to BCC structure. The density of α-iron is 7860 kg/m^3 and atomic weight of iron is 55.85.

SECTION – II

Q.4 Attempt Any SIX of the following. **18**

a) Explain: Rayleigh's criterion of resolution.

b) State and Explain: Malus Law.

c) Explain:
i) Stimulated Emission and
ii) Population Inversion

d) State: Properties of LASER source.

e) Explain: Principal of Optical Fiber.

f) Explain: Types of Carbon Nanotubes (CNT).

g) In a transmission diffraction grating with 5000 number of lines/cm, a light of the wavelength 6350 Å is incident normally on it. Determine how many orders will be visible with this grating?

h) Optical fiber is made of glass with a core of refractive index of 1.75 and is clad with a refractive index 1.61 and launching takes from air. Calculate numerical aperture and acceptance angle of the fiber.

Q.5 Attempt Any TWO of the following. **10**

a) What is diffraction grating? Derive an expression $\lambda/d\lambda = n.N$ for the resolving power of a diffraction grating.

b) Derive an expression for acceptance angle (θ_0), acceptance cone, numerical aperture and fractional refractive index change (Δ) of an optical fiber.

c) i) A glass tube with 200 mm long containing sugar solution rotates the plane of polarization by 10.11^0. If the specific rotation of sugar is 66°, calculate the strength of the solution.

ii) Sodium yellow light of wavelength 5893 Å is a doublet of 6 Å . What is the minimum number of lines a grating should have to resolve the doublet in the 3rd order spectrum.

MCQ/Objective Type Questions

Duration: 30 Minutes Marks:14

Q.1 Select correct option. **14**

1) Permanent hardness of water cannot be removed by _____.
a) adding soda b) distillation
c) boiling d) adding lime-soda

2) Alkalinity in water cannot be due to the presence of _____.
a) OH^- only b) OH^- and CO_3^{--}
c) OH^- and HCO_3^{--} d) CO_3^{--} and HCO_3^-

3) A semipermeable membrane allows the flow of _____.
a) solvent molecules
b) solute molecules
c) both solute and solvent molecules
d) neither solute nor solvent molecules

4) A suitable lubricant for watches is _____.
a) greases b) graphite
c) Vegetable oil d) Mineral Oil

5) A good lubricant should have _____.
a) low viscosity index b) high viscosity index
c) low fire point d) high volatility

6) Non volatile film-forming constituents of a paint is called _____.
a) drier b) pigments
c) thinner d) drying oil

7) The process of zinc coating over iron sheet by hot dipping is called _____.
a) Galvanizing b) Tinning
c) Sheradizing d) Anodizing

8) An example of primary fuel is _____.
a) natural gas b) petrol
c) wood charcoal d) coke

9) A good fuel should possess _____.
a) low calorific value b) high ignition temperature
c) high calorific value d) high ash content

10) GR-S rubber is an example of _____.
a) condensation polymerization
b) copolymerization
c) cross-linked polymerization
d) addition polymerization in which single monomer takes part

11) Natural rubber is basically a polymer of _____.
a) isoprene b) propylene
c) ethylene d) propane

12) Most commonly used vulcanizing agent is _____.
a) graphite b) carbon black
c) dry ice d) sulphur

13) Which of the following can be used for purification of substances?
a) IR spectroscopy b) UV spectroscopy
c) Gas chromatography d) Calorimetry

Time: 03:00 PM To 06:00 PM

Instructions: 1) All questions are compulsory.
2) Figures to the right indicate full marks.
3) Draw neat and labeled diagrams wherever necessary.

SECTION – I

Q.2 Attempt Any Four. **16**

a) A sample of water on analysis was found to contain the following impurities in mg/lit:

	Amount	Mo. Wt.
$Ca(HCO_3)_2$	40.15	162
$Mg(HCO_3)_2$	38.73	146
$MgSO_4$	24.10	120
$CaCl_2$	53.90	111
$MgCl_2$	16.5	95

Calculate the temporary, permanent and total hardness of water in mg/lit.

b) Define aeration. Explain different types of aerators.

c) Explain types of liquid lubricants.

d) Define following terms:
i) Cloud point
ii) Flash point
iii) Acid value
iv) Viscosity index

e) Define corrosion. Explain mechanism of oxidation corrosion.

f) Explain prevention of corrosion by galvanizing and tinning.

Q.3 Attempt Any Four. **12**

a) Define disinfection. Explain disinfection of water by chloramine.

b) Define is COD. Explain determination of COD. Explain is its significance.

c) Explain mechanism of extreme pressure lubrication.

d) 7 gm of an oil sample after saponification with 65 ml of N/2 alcoholic KOH solution and subsequent titration with N/2 HCl gave the titre value of 8 ml to phenopthalein end point. A blank experiment was conducted without taking oil sample. On repeating same procedure gave a titer value of 65 ml. Calculate saponification value of an oil sample.

e) Explain characteristics of good paints.

f) Explain composition, properties and applications of steel.

SECTION – II

Q.4 Attempt Any Four. **16**

a) Calculate gross and net calorific value of a coal sample of coal having C = 83%, H = 5%, O = 2%, S = 1.5%, N = 3.1% and ash = 3.4%. (Take latent heat of steam = 587 cal/g)

b) Explain construction and working of Boy's calorimeter.

c) Compare solid and liquid fuels.

d) Define plastic. Explain thermosoftening and thermosetting plastics.

e) Explain molding of plastics in to articles by following methods.

i) Compression molding
ii) Extrusion molding

f) Define TGA. Explain instrumentation of TGA. What are its applications?

Q.5 Attempt Any Four. **12**

a) Explain types of batteries.

b) Explain the characteristics of good fuels.

c) Explain synthesis, properties and applications of PET.

d) Describe biodegradable polymer. Discuss any two examples of biodegradable polymers with applications.

e) A polymer has following population

15 molecules have molecular weight each 8000
20 molecules have molecular weight each 12000
25 molecules have molecular weight each 16000
30 molecules have molecular weight each 20000
Calculate its number average molecular weight.

f) Calculate weight of Na_2CO_3 required to prepare 0.4 M 700 ml solution. (Mol. Wt. of Na_2CO_3 = 106)

b) Define is COD. Explain determination of COD. Explain is its significance.

c) Explain mechanism of extreme pressure lubrication.

d) 7 gm of an oil sample after saponification with 65 ml of N/2 alcoholic KOH solution and subsequent titration with N/2 HCl gave the titre value of 8 ml to phenopthalein end point. A blank experiment was conducted without taking oil sample. On repeating same procedure gave a titer value of 65 ml. Calculate saponification value of an oil sample.

e) Explain characteristics of good paints.

f) Explain composition, properties and applications of steel.

SECTION – II

Q.4 Attempt Any Four. **16**

a) Calculate gross and net calorific value of a coal sample of coal having C = 83%, H = 5%, O = 2%, S = 1.5%, N = 3.1% and ash = 3.4%. (Take latent heat of steam = 587 cal/g)

b) Explain construction and working of Boy's calorimeter.

c) Compare solid and liquid fuels.

d) Define plastic. Explain thermosoftening and thermosetting plastics.

e) Explain molding of plastics in to articles by following methods.

i) Compression molding
ii) Extrusion molding

f) Define TGA. Explain instrumentation of TGA. What are its applications?

Q.5 Attempt Any Four. **12**

a) Explain types of batteries.

b) Explain the characteristics of good fuels.

c) Explain synthesis, properties and applications of PET.

d) Describe biodegradable polymer. Discuss any two examples of biodegradable polymers with applications.

e) A polymer has following population

15 molecules have molecular weight each 8000
20 molecules have molecular weight each 12000
25 molecules have molecular weight each 16000
30 molecules have molecular weight each 20000
Calculate its number average molecular weight.

f) Calculate weight of Na_2CO_3 required to prepare 0.4 M 700 ml solution. (Mol. Wt. of Na_2CO_3 = 106)

F.Y. (B.Tech.) (Semester - I) (New) (NEP CBCS) Examination: March/April – 2026
Engineering Chemistry
(BTCE0102 / BTCSE0102 / BTETE0102 / BTEE0102 / BTME0102 / BTECE0102 / BTMRE102 / BTAI0102)

Day & Date: Tuesday, 12-05-2026 Max. Marks: 70
Time: 03:00 PM To 06:00 PM

Instructions: 1) Q. No. 1 is compulsory. It should be solved in the first 30 minutes in Answer Book Page no 03 (Starting page of the Answer Book). Each question carries one mark.
2) Don't forget to Mention question paper set (P/Q/R/S) on top on page.
3) Figures to the right indicates full marks.

MCQ/Objective Type Questions

Duration: 30 Minutes Marks:14

Q.1 Select correct option. **14**

1) Natural rubber is basically a polymer of _____.
a) isoprene b) propylene
c) ethylene d) propane

2) Most commonly used vulcanizing agent is _____.
a) graphite b) carbon black
c) dry ice d) sulphur

3) Which of the following can be used for purification of substances?
a) IR spectroscopy b) UV spectroscopy
c) Gas chromatography d) Calorimetry

4) Number of gram equivalents of solute present in a liter of solution is called _____.
a) Normality b) Molarity
c) Molality d) Mole fraction

5) Permanent hardness of water cannot be removed by _____.
a) adding soda b) distillation
c) boiling d) adding lime-soda

6) Alkalinity in water cannot be due to the presence of _____.
a) OH^- only b) OH^- and CO_3^{--}
c) OH^- and HCO_3^{--} d) CO_3^{--} and HCO_3^-

7) A semipermeable membrane allows the flow of _____.
a) solvent molecules
b) solute molecules
c) both solute and solvent molecules
d) neither solute nor solvent molecules

8) A suitable lubricant for watches is _____.
a) greases b) graphite
c) Vegetable oil d) Mineral Oil

9) A good lubricant should have _____.
a) low viscosity index b) high viscosity index
c) low fire point d) high volatility

10) Non volatile film-forming constituents of a paint is called _____.
a) drier b) pigments
c) thinner d) drying oil

11) The process of zinc coating over iron sheet by hot dipping is called _____.
a) Galvanizing b) Tinning
c) Sheradizing d) Anodizing

12) An example of primary fuel is _____.
a) natural gas b) petrol
c) wood charcoal d) coke

13) A good fuel should possess _____.
a) low calorific value b) high ignition temperature
c) high calorific value d) high ash content

14) GR-S rubber is an example of _____.
a) condensation polymerization
b) copolymerization
c) cross-linked polymerization
d) addition polymerization in which single monomer takes part

Day & Date: Tuesday, 12-05-2026 Max. Marks: 56
Time: 03:00 PM To 06:00 PM

Instructions: 1) All questions are compulsory.
2) Figures to the right indicate full marks.
3) Draw neat and labeled diagrams wherever necessary.

SECTION – I

Q.2 Attempt Any Four. **16**

a) A sample of water on analysis was found to contain the following impurities in mg/lit:

	Amount	Mo. Wt.
$Ca(HCO_3)_2$	40.15	162
$Mg(HCO_3)_2$	38.73	146
$MgSO_4$	24.10	120
$CaCl_2$	53.90	111
$MgCl_2$	16.5	95

Calculate the temporary, permanent and total hardness of water in mg/lit.

b) Define aeration. Explain different types of aerators.

c) Explain types of liquid lubricants.

d) Define following terms:
i) Cloud point
ii) Flash point
iii) Acid value
iv) Viscosity index

e) Define corrosion. Explain mechanism of oxidation corrosion.

f) Explain prevention of corrosion by galvanizing and tinning.

Q.3 Attempt Any Four. **12**

a) Define disinfection. Explain disinfection of water by chloramine.

b) Define is COD. Explain determination of COD. Explain is its significance.

c) Explain mechanism of extreme pressure lubrication.

d) 7 gm of an oil sample after saponification with 65 ml of N/2 alcoholic KOH solution and subsequent titration with N/2 HCl gave the titre value of 8 ml to phenopthalein end point. MCQ/Objective Type Questions

Duration: 15 Minutes Marks: 07

Q.1 Choose the correct alternative from the options and rewrite the sentence. **07**

1) Following sub branch of Civil Engineering is related with supply of water to crops?
a) Environmental Engineering b) Foundation Engineering
c) Irrigation d) Soil Mechanics

2) Soil and its behavior under the application of load is studied under the following sub branch of civil engineering _____.
a) Geotechnical Engineering b) Environmental Engineering
c) Surveying d) Town planning

3) The load is transferred to the foundation in framed structure in the following sequence.
a) Beam-Column-Foundation-Slab
b) Slab-Beam-Column-Foundation
c) Slab-Column-Beam-Foundation
d) Column-Slab-Beam-Foundation

4) The following element of a framed structure is designed to carry self-weight only _____.
a) Foundation b) Wall
c) Column d) Beam

5) The process of killing the infective bacteria from the water and making it safe to the user is called _____.

a) Softening
b) Coagulation
c) Flocculation
d) Disinfection

6) Green city concept encourages _____.

a) Mass transportation
b) Pollution free city
c) Use of non-conventional energy
d) All the above

7) Survey conducted to find depth of water at various points in bodies of water like sea is known as _____ survey.

a) Astronomical survey
b) Hydrographic survey
c) City survey
d) Land survey

Section – II

MCQ/Objective Type Questions

Duration: 15 Minutes Marks: 07

Q.1 Choose the correct alternative from the options and rewrite the sentence. **07**

1) Positive displacement pumps is from the following _____.
a) Reciprocating pumps b) Rotary pump
c) vane d) None of the above

2) During a cycle, the heat transfer are given by: 120kJ, -60kJ, -48kJ, and 12kJ then the network transfer the cycle is _____.
a) 60000 Nm b) 24000 Nm
c) 12000 Nm d) 4400 Nm

3) A system comprising of a single phase, is known as _____.
a) Open system b) Closed system
c) Homogeneous system d) Heterogeneous system

4) Drilling can be carried out on _____.
a) lathe b) drilling machine
c) milling machine d) both a and b

5) Most commonly used flame in gas welding is _____.
a) Neutral b) Oxidizing
c) Carburizing d) None of the above

6) The ratio of tensions in the tight and slack side of tb belt is given by the relation _____.
a) $\frac{T1}{T2} = e^{\mu\theta}$ b) $\frac{T1}{T2} = e^{\theta}$
c) $\frac{T1}{T2} = e^{\mu}$ d) None of the above

7) Length of Cross-belt drive between two pulleys depends upon _____.
a) sum of the diameter b) difference of the diameters
c) Both a & b above d) None of the above

Day & Date: Sunday, 10-05-2026 Max. Marks: 56
Time: 03:00 PM To 06:00 PM

Instructions: 1) Q.No.2 and Q.No.4 are short answer type questions.
2) Q.No.3 and Q.No.5 are long answer type questions.
3) Neat diagram must be drawn whenever necessary.
4) Use of log table and non-programmable single memory calculator is allowed.
5) Make suitable assumptions, if necessary and mention them clearly.

Section – I

Q.2 Answer Any Five of the following. **15**

a) What are the sub branches of civil engineering? Explain any one in short.

b) Explain Classification of Roads.

c) Draw a neat layout of water supply scheme and explain.

d) What is Geographic Information System? Give its applications in engineering.

e) Write short note - "Grillage foundation".

f) Differentiate between active remote sensing & passive remote sensing.

g) Explain the classification of Surveying.

Q.3 Attempt Any One out of (a) and (b) and solve Any Two out of (c) to (f) **13**

a) Draw a neat sketch of road structure in embankment. **05**

b) The following consecutive readings were taken with a dumpy level along a chain line at a common interval of 15 m. The first reading was at a chainage of 165 m where the RL is 98.085. The instrument was shifted after the fourth and ninth readings. 3.150, 2.245, 1.125, 0.860, 3.125, 2.760, 1.835, 1.470,1.965, 1.225, 2.390 and 3.035. Find RL of the all points by: **05**
i) HI method or
ii) Rise And Fall method

c) With neat sketch explain any two types of shallow foundation. **04**

d) Write note on Principle of surveying. **04**

e) Explain Hydrological Cycle. **04**

f) Define: **04**

i) D.P.C.
ii) Plinth
iii) Parapet
iv) Lintel

Section – II

Q.2 Answer Any Five of the following. **15**

a) What is a Pump? and state it's applications. **03**

b) Write a note on working of a Pelton wheel with its diagram. **03**

c) What is Soldering process? Explain with neat sketch. **03**

d) State and explain Kelvin-Plank and Clausius statements of the second law of thermodynamics. **03**

e) Write short notes on: **03**
i) Open belt drive ii) Cross belt drive

f) Explain types of system. **03**

g) Derive an expression for velocity of fluid at the exit of nozzle, by applying SFEE. **03**

Q.3 Solve Any One out of (a) and (b) and solve Any Two out of (c) to (f). **13**

a) Two parallel shafts, which have center distance between them 6 m. They are connected by crossed belt drive. The diameter of driver pulley is 0.8 m and diameter of driven pulley is 0.6 m. The direction of rotation of driven is need to be reversed by changing over an open belt drive. Calculate the length of both open and crossed belt drive and state can same belt be applied in changed arrangement? If not, then what will be the solution to fix the belt in open belt drive? **05**

b) Describe Drilling Machine with its block diagram. **05**

c) A cycle comprises three processes. The energy transfers in each are tabulated below. Complete the table. **04**

Process	Q (KJ)	W (KJ)	ΔU (KJ)
1−2	+70	+30	---
2−3	---	−60	+20
3−1	+60	---	---

d) Explain with neat sketch working of Francis turbine. **04**

e) Derive an expression for length of belt for open belt drive. **04**

f) Sketch and describe Lathe machine operations. **04**

iii) Parapet
iv) Lintel

Section – II

Q.2 Answer Any Five of the following. **15**

a) What is a Pump? and state it's applications. **03**

b) Write a note on working of a Pelton wheel with its diagram. **03**

c) What is Soldering process? Explain with neat sketch. **03**

d) State and explain Kelvin-Plank and Clausius statements of the second law of thermodynamics. **03**

e) Write short notes on: **03**
i) Open belt drive ii) Cross belt drive

f) Explain types of system. **03**

g) Derive an expression for velocity of fluid at the exit of nozzle, by applying SFEE. **03**

Q.3 Solve Any One out of (a) and (b) and solve Any Two out of (c) to (f). **13**

a) Two parallel shafts, which have center distance between them 6 m. They are connected by crossed belt drive. The diameter of driver pulley is 0.8 m and diameter of driven pulley is 0.6 m. The direction of rotation of driven is need to be reversed by changing over an open belt drive. Calculate the length of both open and crossed belt drive and state can same belt be applied in changed arrangement? If not, then what will be the solution to fix the belt in open belt drive? **05**

b) Describe Drilling Machine with its block diagram. **05**

c) A cycle comprises three processes. The energy transfers in each are tabulated below. Complete the table. **04**

Process	Q (KJ)	W (KJ)	ΔU (KJ)
1−2	+70	+30	---
2−3	---	−60	+20
3−1	+60	---	---

d) Explain with neat sketch working of Francis turbine. **04**

e) Derive an expression for length of belt for open belt drive. **04**

f) Sketch and describe Lathe machine operations. **04**

Time: 03:00 PM To 06:00 PM

Instructions: 1) Q. No. 1 is compulsory. It should be solved in the first 30 minutes in Answer Book Page no. 03 (Starting page of the Answer Book). Each question carries one mark.
2) Don't forget to Mention question paper set (P/Q/R/S) on top on page.
3) Figures to the right indicates full marks.
4) Assume suitable data wherever needed and mention it clearly.
5) Use of log table and non-programmable single memory calculator is allowed.

Section – I

MCQ/Objective Type Questions

Duration: 15 Minutes Marks: 07

Q.1 Choose the correct alternative from the options and rewrite the sentence. **07**

1) The load is transferred to the foundation in framed structure in the following sequence.
a) Beam-Column-Foundation-Slab
b) Slab-Beam-Column-Foundation
c) Slab-Column-Beam-Foundation
d) Column-Slab-Beam-Foundation

2) The following element of a framed structure is designed to carry self-weight only _____.
a) Foundation b) Wall
c) Column d) Beam

3) The process of killing the infective bacteria from the water and making it safe to the user is called _____.
a) Softening b) Coagulation
c) Flocculation d) Disinfection

4) Green city concept encourages _____.
a) Mass transportation
b) Pollution free city
c) Use of non-conventional energy
d) All the above

5) Survey conducted to find depth of water at various points in bodies of water like sea is known as _____ survey.

a) Astronomical survey
b) Hydrographic survey
c) City survey
d) Land survey

6) Following sub branch of Civil Engineering is related with supply of water to crops?

a) Environmental Engineering
b) Foundation Engineering
c) Irrigation
d) Soil Mechanics

7) Soil and its behavior under the application of load is studied under the following sub branch of civil engineering _____.

a) Geotechnical Engineering
b) Environmental Engineering
c) Surveying
d) Town planning

Section – II

MCQ/Objective Type Questions

Duration: 15 Minutes Marks: 07

Q.1 Choose the correct alternative from the options and rewrite the sentence. **07**

1) A system comprising of a single phase, is known as _____.
a) Open system b) Closed system
c) Homogeneous system d) Heterogeneous system

2) Drilling can be carried out on _____.
a) lathe b) drilling machine
c) milling machine d) both a and b

3) Most commonly used flame in gas welding is _____.
a) Neutral b) Oxidizing
c) Carburizing d) None of the above

4) The ratio of tensions in the tight and slack side of tb belt is given by the relation _____.
a) $\frac{T1}{T2} = e^{\mu\theta}$ b) $\frac{T1}{T2} = e^{\theta}$
c) $\frac{T1}{T2} = e^{\mu}$ d) None of the above

5) Length of Cross-belt drive between two pulleys depends upon _____.
a) sum of the diameter b) difference of the diameters
c) Both a & b above d) None of the above

6) Positive displacement pumps is from the following _____.
a) Reciprocating pumps b) Rotary pump
c) vane d) None of the above

7) During a cycle, the heat transfer are given by: 120kJ, -60kJ, -48kJ, and 12kJ then the network transfer the cycle is _____.
a) 60000 Nm b) 24000 Nm
c) 12000 Nm d) 4400 Nm

Instructions: 1) Q.No.2 and Q.No.4 are short answer type questions.
2) Q.No.3 and Q.No.5 are long answer type questions.
3) Neat diagram must be drawn whenever necessary.
4) Use of log table and non-programmable single memory calculator is allowed.
5) Make suitable assumptions, if necessary and mention them clearly.

Section – I

Q.2 Answer Any Five of the following. **15**

a) What are the sub branches of civil engineering? Explain any one in short.

b) Explain Classification of Roads.

c) Draw a neat layout of water supply scheme and explain.

d) What is Geographic Information System? Give its applications in engineering.

e) Write short note - "Grillage foundation".

f) Differentiate between active remote sensing & passive remote sensing.

g) Explain the classification of Surveying.

Q.3 Attempt Any One out of (a) and (b) and solve Any Two out of (c) to (f) **13**

a) Draw a neat sketch of road structure in embankment. **05**

b) The following consecutive readings were taken with a dumpy level along a chain line at a common interval of 15 m. The first reading was at a chainage of 165 m where the RL is 98.085. The instrument was shifted after the fourth and ninth readings. 3.150, 2.245, 1.125, 0.860, 3.125, 2.760, 1.835, 1.470,1.965, 1.225, 2.390 and 3.035. Find RL of the all points by: **05**
i) HI method or
ii) Rise And Fall method

c) With neat sketch explain any two types of shallow foundation. **04**

d) Write note on Principle of surveying. **04**

e) Explain Hydrological Cycle. **04**

f) Define: **04**

i) D.P.C.
ii) Plinth
iii) Parapet
iv) Lintel

MCQ/Objective Type Questions

Duration: 30 Minutes Marks:07

Q.1 Choose the correct alternatives from the given options. 07

1) According to KCL algebraic sum of currents meeting at junction is _____.
a) Infinity b) Minimum
c) Zero d) None of the above

2) A sinusoidal alternating current has a maximum value of I_m. Its average value will be _____.
a) I_m/π b) $I_m/2\pi$
c) $2I_m/\pi$ d) None of these

3) An absolute permeability of magnetic material is _____.
a) Φ/B b) B/H
c) HB d) $1/\mu_0\,\mu_r$

4) The SI unit of reluctance is _____.
a) AT/M b) AT/Wb
c) AT d) N/Wb

5) If alternating voltage is given by, $v = 230\sin(376.99t)$, then the frequency is _____.
a) 60Hz b) 50 Hz
c) 40 Hz d) 200Hz

6) The form factor of sinusoidal quantity is _____.

a) 1.11 b) 1.57

c) 1.414 d) 0.637

7) Frequency of an a.c. quantity is defined as _____.

a) number of cycles/sec

b) time/cycles

c) sec/revolution of magnetic energy

d) cycle/revolution

MCQ/Objective Type Questions

Duration: 30 Minutes Marks: 07

Q.1 Choose the correct alternatives from the given options. 07

8) Break down of PN junction occurs _____.
- a) with forward bias
- b) with reverse bias
- c) because of manufacturing defect
- d) None of these

9) A diode is used as _____.
- a) An amplifier
- b) A rectifier
- c) An oscillator
- d) Voltage regulator

10) Transistor is operated as a closed switch in _____ region.
- a) Saturation
- b) Cut-off
- c) Active region
- d) None of these

11) In BJT, largest current flow occurs in the _____.
- a) emitter
- b) collector
- c) base
- d) All of these

12) The decimal number 17 is equal to binary number _____.
- a) 10010
- b) 11000
- c) 10001
- d) 01001

13) The output of an AND gate is high when _____.
- a) Any input is high
- b) All inputs are high
- c) No inputs are high
- d) Both a) and b)

14) The term nibble means _____.
- a) 2 bits
- b) 1 bit
- c) 4 bits
- d) 8 bits

Time: 10:00 AM To 01:00 PM

Instructions: 1) All questions are compulsory.
2) Figures to the right indicate full marks.

SECTION – I

Q.2 Solve Any Four. **16**

a) State and Explain Kirchhoff's current and voltage law with suitable diagram.

b) Derive the expression for the division of current through three branches in parallel.

c) State and explain Faraday's laws of electromagnetic induction.

d) Derive the emf equation of single-phase transformer.

e) Derive expression for purely capacitive circuit. Draw phasor diagram.

f) For series R-L-C circuit the supply voltage $V_S = 100$ V, Voltage across resistance is 80 V, voltage across inductance is 150 V. What is the voltage across capacitor and power factor of a circuit? Assume $V_L > V_C$.

Q.3 Solve Any Two. **12**

a) Derive the equation for converting star resistances into equivalent delta resistances.

b) A single-phase transformer has 350 primaries and 1050 secondary turns. The net cross sectional area of the core is 50 cm^2. If the primary winding is connected to a 50 Hz supply at 400 V, calculate:
i) The maximum value of the flux density in the core, and
ii) The voltage induced in the secondary winding.

c) Explain series R-L-C circuit for the condition $X_L > X_C$, with voltage triangle, impedance triangle and phasor diagram.

SECTION – II

Q.4 Solve Any Four. **16**

a) Draw circuit diagram and explain VI characteristics of PN junction diode.

b) Explain Full wave center tap rectifier with necessary diagrams.

c) Explain working of BJT as amplifier.

d) Explain input and output characteristics of common base (CB) configuration of transistor.

e) State and prove De-Morgan theorem.

f) Covert
i) $(AB.CD)_H$ to binary
ii) $(132)_8$ to decimal

Q.5 Solve Any Two. **12**

a) Explain working of capacitor filter using full wave rectifier with neat circuit diagram.

b) Compare different transistor configurations on the basis of input resistance, output resistance, voltage gain, and current gain.

c) What is meant by universal gate? Derive basic gates using NAND and NOR gate.

d) Derive the emf equation of single-phase transformer.

e) Derive expression for purely capacitive circuit. Draw phasor diagram.

f) For series R-L-C circuit the supply voltage $V_S = 100$ V, Voltage across resistance is 80 V, voltage across inductance is 150 V. What is the voltage across capacitor and power factor of a circuit? Assume $V_L > V_C$.

Q.3 Solve Any Two. **12**

a) Derive the equation for converting star resistances into equivalent delta resistances.

b) A single-phase transformer has 350 primaries and 1050 secondary turns. The net cross sectional area of the core is 50 cm^2. If the primary winding is connected to a 50 Hz supply at 400 V, calculate:
i) The maximum value of the flux density in the core, and
ii) The voltage induced in the secondary winding.

c) Explain series R-L-C circuit for the condition $X_L > X_C$, with voltage triangle, impedance triangle and phasor diagram.

SECTION – II

Q.4 Solve Any Four. **16**

a) Draw circuit diagram and explain VI characteristics of PN junction diode.

b) Explain Full wave center tap rectifier with necessary diagrams.

c) Explain working of BJT as amplifier.

d) Explain input and output characteristics of common base (CB) configuration of transistor.

e) State and prove De-Morgan theorem.

f) Covert
i) $(AB.CD)_H$ to binary
ii) $(132)_8$ to decimal

Q.5 Solve Any Two. **12**

a) Explain working of capacitor filter using full wave rectifier with neat circuit diagram.

b) Compare different transistor configurations on the basis of input resistance, output resistance, voltage gain, and current gain.

c) What is meant by universal gate? Derive basic gates using NAND and NOR gate.

F.Y. (B.Tech.) (Semester - I) (New) (NEP CBCS) Examination: March/April – 2026
Basic Electrical & Electronics Engineering
(BTCE0105 / BTCSE0105 / BTETE0105 / BTEE0105 / BTME0105 / BTECE0105 / BTMRE105 / BTAI0105)

Day & Date: Saturday, 23-05-2026 Max. Marks: 70
Time: 10:00 AM To 01:00 PM

Instructions: 1) Q. No. 1 is compulsory. It should be solved in the first 30 minutes in Answer Book Page no 03 (Starting page of the Answer Book). Each question carries one mark.
2) Don't forget to Mention question paper set (P/Q/R/S) on top of page.
3) Figures to the right indicates full marks.

SECTION – I

MCQ/Objective Type Questions

Duration: 30 Minutes Marks:07

Q.1 Choose the correct alternatives from the given options. **07**

1) An absolute permeability of magnetic material is _____.
a) Φ/B b) B/H
c) HB d) $1/\mu_0\ \mu_r$

2) The SI unit of reluctance is _____.
a) AT/M b) AT/Wb
c) AT d) N/Wb

3) If alternating voltage is given by, $v = 230\sin(376.99t)$, then the frequency is _____.
a) 60Hz b) 50 Hz
c) 40 Hz d) 200Hz

4) The form factor of sinusoidal quantity is _____.
a) 1.11 b) 1.57
c) 1.414 d) 0.637

5) Frequency of an a.c. quantity is defined as _____.
a) number of cycles/sec
b) time/cycles
c) sec/revolution of magnetic energy
d) cycle/revolution

6) According to KCL algebraic sum of currents meeting at junction is _____.
a) Infinity b) Minimum
c) Zero d) None of the above

7) A sinusoidal alternating current has a maximum value of I_m. Its average value will be _____.

a) I_m/π b) $I_m/2\pi$

c) $2I_m/\pi$ d) None of these

SECTION – II

MCQ/Objective Type Questions

Duration: 30 Minutes Marks: 07

Q.1 Choose the correct alternatives from the given options. 07

8) Transistor is operated as a closed switch in _____ region.
a) Saturation b) Cut-off
c) Active region d) None of these

9) In BJT, largest current flow occurs in the _____.
a) emitter b) collector
c) base d) All of these

10) The decimal number 17 is equal to binary number _____.
a) 10010 b) 11000
c) 10001 d) 01001

11) The output of an AND gate is high when _____.
a) Any input is high b) All inputs are high
c) No inputs are high d) Both a) and b)

12) The term nibble means _____.
a) 2 bits b) 1 bit
c) 4 bits d) 8 bits

13) Break down of PN junction occurs _____.
a) with forward bias
b) with reverse bias
c) because of manufacturing defect
d) None of these

14) A diode is used as _____.
a) An amplifier b) A rectifier
c) An oscillator d) Voltage regulator

2) Velocity of light, $\mathrm{c} = 3 \times 10^{8}$ m/sec
3) Charge of electron, $\mathrm{e} = 1.6 \times 10^{-19}$ C

MCQ/Objective Type Questions

Duration: 30 Minutes Marks:14

Q.1 Choose the correct alternatives from the options. 14

1) The impurity atoms with which silicon should be doped to make P-type semiconductor is _____.
a) Boron b) Phosphorous
c) Antimony d) Germanium

2) The mobility μ is given by _____.
a) $\mu = \rho\, \mathrm{R_H}$ b) $\mu = \sigma\, \mathrm{R_H}$
c) $\mu = \sigma/\mathrm{R_H}$ d) $\mu = \rho/\mathrm{R_H}$

3) The number of atoms in unit cell of FCC structure is _____.
a) 1 b) 2
c) 3 d) 4

4) The sound waves having frequency more than 20 KHz are called as ____.
a) Audible waves b) Infrasonic waves
c) Ultrasonic waves d) Ultraviolet waves

5) According to Sabine reverberation time is directly proportional to _____.
a) volume b) surface area
c) absorption coefficient d) total absorption

6) The nearest neighbor distance in SC is _____.

a) a b) $a/2$

c) $\frac{a}{\sqrt{2}}$ d) $\frac{a}{3\sqrt{2}}$

7) According to Bravais there are only _____ ways of arranging points in space lattices.

a) 7 b) 14

c) 10 d) 23

8) Light waves are transverse in nature, can be demonstrated by observing the phenomenon of _____.

a) polarization b) diffraction

c) dispersion d) interference

9) The bending of light around the edges of an obstacle is known as _____.

a) Scattering b) Polarization

c) Diffraction d) Dispersion

10) Emission of a photon by an atom without an external stimulus is called _____.

a) stimulated emission b) induced emission

c) amplified emission d) spontaneous emission

11) In He-Ne lasers, the diameter of the discharge tube is _____.

a) wide b) thick

c) narrow d) large

12) For population inversion _____ (symbols have usual meaning)

a) $\mathrm{N}_2 \gg \mathrm{N}_1$ b) $\mathrm{N}_1 \gg \mathrm{N}_2$

c) $\mathrm{N}_2 = \mathrm{N}_1$ d) can't say

13) Basic principle of optical fiber is _____.

a) interference b) refraction

c) reflection d) total internal reflection

14) The chirality of Armchair CNT is _____.

a) (a, a) b) (a, b)

c) $(0, \mathrm{b})$ d) $(\mathrm{a}, 0)$

Q.2 Attempt Any Six of the following. **18**

a) On the basis of energy band gap, classify solids as conductor, semiconductor and insulator.

b) Represent positions of Fermi level in intrinsic, P type and N type semiconductors at $\mathrm{T} = 0\mathrm{K}$

c) Define the following terms:
i) Crystallography
ii) Unit cell
iii) Atomic radius

d) Calculate atomic packing factor for SC, BCC & FCC crystal structures.

e) State and explain Sabine's formula for the reverberation time.

f) State properties of ultrasonic waves.

g) Polonium belongs to SC lattice. If the lattice constant is 3.36Å, Calculate its density. The atomic weight of polonium is 209.

h) A cinema hall has a volume of 7500m^3. It is required to have reverberation time of 1.5 sec. What would be the total absorption of the hall? What will be the effect if you increase the total absorption of the hall?

Q.3 Attempt Any Two of the following. **10**

a) State Hall Effect. Hence derive the relation for Hall voltage.

b) Explain the factors affecting t acoustics of the auditorium and state the remedies over it.

c) Explain: Miller indices. Derive an expression for the spacing between consecutive parallel planes in cubic crystal of Miller indices $(h\ k\ l)$ is given by,

$$d_{hkl} = \frac{a}{\sqrt{h^2 + k^2 + l^2}}$$

d) i) Calculate the interplanar spacing for a $(3\ 2\ 1)$ in SC lattice whose lattice constant is 4.2×10^{-8} cm.

ii) Copper has FCC structure with lattice constant of $3.61\ \text{A}^0$. Calculate radius of copper atoms.

SECTION – II

Q.4 Attempt Any Six of the following. **18**

a) Define:
i) Diffraction
ii) Diffraction grating
iii) Resolving power of optical instruments

b) State and explain: Malus's law.

c) Explain:
i) Population Inversion
ii) Stimulated Emission

d) State properties of LASER.

e) Explain structure of optical fiber with neat diagram.

f) Write applications of nanotechnology in various fields.

g) What is the highest order spectrum which may be seen with monochromatic light of wavelength 6000 AU by means of diffraction grating with 5000 lines per cm?

h) The numerical aperture of an optical fiber is 0.5 and the core refractive index is 1.5. Find refractive index of the cladding.

Q.5 Attempt Any Two of the following. **10**

a) What is diffraction grating? Derive an expression for the resolving power of a diffraction grating $(\lambda/d\lambda = n.N)$.

b) Explain: He-Ne gas laser with neat energy diagram.

c) Obtain the expression for acceptance angle and acceptance cone. Hence define numerical aperture.

d) i) Calculate specific rotation if plane of polarization is turned through 26.4^0, traversing 20 cm length of 20% sugar solution.

ii) In a step index optical fiber, core index $n_1 = 1.55$ and cladding index $n_2 = 1\ .40$. Find
1) N A 2) Δ and, 3) Acceptance angle

F.Y. (B.Tech.) (Semester - II) (New) (NEP CBCS) Examination: March/April – 2026
Engineering Physics
(BTCE0201 / BTME0201 / BTETE0201 / BTCSE0201 / BTEE0201 / BTECE0201 / BTIT0201 / BTAI0201 / BTMRE0201)

Day & Date: Saturday, 16-05-2026 Max. Marks: 70
Time: 03:00 PM To 06:00 PM

Instructions: 1) Q. No. 1 is compulsory. It should be solved in the first 30 minutes in Answer Book Page no 03 (Starting page of the Answer Book). Each question carries one mark.
2) Don't forget to Mention question paper set (P/Q/R/S) on top of page.
3) Figures to the right indicates full marks.
4) Make suitable assumptions, if necessary.

Constants: 1) Avogadro's no, $\mathrm{N} = 6.02 \times 10^{26}$ / k. mol.
2) Velocity of light, $\mathrm{c} = 3 \times 10^{8}$ m/sec
3) Charge of electron, $\mathrm{e} = 1.6 \times 10^{-19}$ C

MCQ/Objective Type Questions

Duration: 30 Minutes Marks:14

Q.1 Choose the correct alternatives from the options. 14

1) In He-Ne lasers, the diameter of the discharge tube is _____.
a) wide b) thick
c) narrow d) large

2) For population inversion _____ (symbols have usual meaning)
a) $\mathrm{N}_2 \gg \mathrm{N}_1$ b) $\mathrm{N}_1 \gg \mathrm{N}_2$
c) $\mathrm{N}_2 = \mathrm{N}_1$ d) can't say

3) Basic principle of optical fiber is _____.
a) interference b) refraction
c) reflection d) total internal reflection

4) The chirality of Armchair CNT is _____.
a) (a, a) b) (a, b)
c) $(0, \mathrm{b})$ d) $(\mathrm{a}, 0)$

5) The impurity atoms with which silicon should be doped to make P-type semiconductor is _____.
a) Boron b) Phosphorous
c) Antimony d) Germanium

6) The mobility μ is given by _____.

a) $\mu = \rho\, R_H$ b) $\mu = \sigma\, R_H$

c) $\mu = \sigma / R_H$ d) $\mu = \rho / R_H$

7) The number of atoms in unit cell of FCC structure is _____.

a) 1 b) 2

c) 3 d) 4

8) The sound waves having frequency more than 20 KHz are called as ____.

a) Audible waves b) Infrasonic waves

c) Ultrasonic waves d) Ultraviolet waves

9) According to Sabine reverberation time is directly proportional to _____.

a) volume b) surface area

c) absorption coefficient d) total absorption

10) The nearest neighbor distance in SC is _____.

a) a b) $a/2$

c) $\frac{a}{\sqrt{2}}$ d) $\frac{a}{3\sqrt{2}}$

11) According to Bravais there are only _____ ways of arranging points in space lattices.

a) 7 b) 14

c) 10 d) 23

12) Light waves are transverse in nature, can be demonstrated by observing the phenomenon of _____.

a) polarization b) diffraction

c) dispersion d) interference

13) The bending of light around the edges of an obstacle is known as _____.

a) Scattering b) Polarization

c) Diffraction d) Dispersion

14) Emission of a photon by an atom without an external stimulus is called _____.

a) stimulated emission b) induced emission

c) amplified emission d) spontaneous emission

F.Y. (B.Tech.) (Semester - II) (New) (NEP CBCS) Examination: March/April – 2026
Engineering Physics
(BTCE0201 / BTME0201 / BTETE0201 / BTCSE0201 / BTEE0201 / BTECE0201 / BTIT0201 / BTAI0201 / BTMRE0201)

Day & Date: Saturday, 16-05-2026 Max. Marks: 56
Time: 03:00 PM To 06:00 PM

Instructions: 1) All questions are compulsory.
2) Figures to the right indicate full marks.
3) Make suitable assumptions, if necessary.

Constants: 1) Avogadro's no, $\mathrm{N} = 6.02 \times 10^{26} \ / \ \mathrm{k.mol.}$
2) Velocity of light, $\mathrm{c} = 3 \times 10^{8} \ \mathrm{m/sec}$
3) Charge of electron, $\mathrm{e} = 1.6 \times 10^{-19} \ \mathrm{C}$

SECTION – I

Q.2 Attempt Any Six of the following. **18**

a) On the basis of energy band gap, classify solids as conductor, semiconductor and insulator.

b) Represent positions of Fermi level in intrinsic, P type and N type semiconductors at $\mathrm{T} = 0\mathrm{K}$

c) Define the following terms:
i) Crystallography
ii) Unit cell
iii) Atomic radius

d) Calculate atomic packing factor for SC, BCC & FCC crystal structures.

e) State and explain Sabine's formula for the reverberation time.

f) State properties of ultrasonic waves.

g) Polonium belongs to SC lattice. If the lattice constant is 3.36Å, Calculate its density. The atomic weight of polonium is 209.

h) A cinema hall has a volume of 7500m^3. It is required to have reverberation time of 1.5 sec. What would be the total absorption of the hall? What will be the effect if you increase the total absorption of the hall?

Q.3 Attempt Any Two of the following. **10**

a) State Hall Effect. Hence derive the relation for Hall voltage.

b) Explain the factors affecting t acoustics of the auditorium and state the remedies over it.

c) Explain: Miller indices. Derive an expression for the spacing between consecutive parallel planes in cubic crystal of Miller indices $(h\ k\ l)$ is given by,

$$d_{hkl} = \frac{a}{\sqrt{h^2 + k^2 + l^2}}$$

d) i) Calculate the interplanar spacing for a $(3\ 2\ 1)$ in SC lattice whose lattice constant is 4.2×10^{-8} cm.

ii) Copper has FCC structure with lattice constant of $3.61\ \text{A}^0$. Calculate radius of copper atoms.

SECTION – II

Q.4 Attempt Any Six of the following. **18**

a) Define:
- i) Diffraction
- ii) Diffraction grating
- iii) Resolving power of optical instruments

b) State and explain: Malus's law.

c) Explain:
- i) Population Inversion
- ii) Stimulated Emission

d) State properties of LASER.

e) Explain structure of optical fiber with neat diagram.

f) Write applications of nanotechnology in various fields.

g) What is the highest order spectrum which may be seen with monochromatic light of wavelength 6000 AU by means of diffraction grating with 5000 lines per cm?

h) The numerical aperture of an optical fiber is 0.5 and the core refractive index is 1.5. Find refractive index of the cladding.

Q.5 Attempt Any Two of the following. **10**

a) What is diffraction grating? Derive an expression for the resolving power of a diffraction grating $(\lambda/d\lambda = n.N)$.

b) Explain: He-Ne gas laser with neat energy diagram.

c) Obtain the expression for acceptance angle and acceptance cone. Hence define numerical aperture.

d) i) Calculate specific rotation if plane of polarization is turned through 26.4^0, traversing 20 cm length of 20% sugar solution.

ii) In a step index optical fiber, core index $n_1 = 1.55$ and cladding index $n_2 = 1\ .40$. Find

1) N A 2) Δ and, 3) Acceptance angle

MCQ/Objective Type Questions

Duration: 30 Minutes Marks:14

Q.1 Select correct option. **14**

1) Water containing dissolved salts with a peculiar salty taste is called _____.
a) soft water b) brackish water
c) hard water d) desalinated water

2) Scale formation in boiler causes _____.
a) no loss of heat b) wastage of heat
c) increase in efficiency d) None of the above

3) Hard water may be softened by passing it through _____.
a) sodium silicate
b) limestone
c) Ion exchange resin
d) sodium hexametaphosphate (Calgon)

4) Oiliness is least in case of _____.
a) greases b) mineral oils
c) animal oils d) palm oils

5) Greases are not used to lubricate _____.
a) rail axle boxes
b) gears
c) delicate instruments
d) bearing working at high temperatures

6) Corrosion is an example of _____.
a) oxidation b) reduction
c) electrolysis d) extraction of metal

7) During electrochemical corrosion in acidic environment _____.
a) oxygen evolution occurs
b) oxygen absorption occurs
c) hydrogen evolution takes place
d) hydrogen absorption takes place

8) In bomb calorimeter the ignition of fuel is made with the help of _____.
a) Cu fuse wire b) Mg fuse wire
c) Al fuse wire d) Zn fuse wire

9) A fuel having high ignition temperature is _____.
a) Petrol b) Wood
c) Kerosene d) LPG

10) Most commonly used vulcanizing agent is _____.
a) graphite b) carbon black
c) dry ice d) sulphur

11) Molecular mass of a polymer is _____.
a) small b) very small
c) large d) negligible

12) Raw rubber on vulcanization becomes _____.
a) plastic b) tacky
c) soft d) less elastic

13) Number of moles of solute present in a liter of solution is called _____.
a) Normality b) Molarity
c) Molality d) Mole fraction

14) Which of the following technique is used to detect the steroid consumed by athletes in international sports competition?
a) IR spectroscopy b) Gas chromatography
c) UV spectroscopy d) pH measurement

Day & Date: Tuesday, 19-05-2026 Max. Marks: 56
Time: 03:00 PM To 06:00 PM

Instructions: 1) All questions are compulsory.
2) Figures to the right indicate full marks.
3) Draw neat and labeled diagrams wherever necessary.
4) Make suitable assumptions if necessary and state them clearly.

SECTION – I

Q.2 Attempt Any Four. **16**

a) A sample of water on analysis was found to contain the following impurities in mg/lit.

	Amount	Mo. Wt.
$Ca(HCO_3)_2$	10.15	162
$Mg(HCO_3)_2$	28.73	146
$MgSO_4$	34.10	120
$CaCl_2$	43.90	111
$CaSO_4$	17.00	136
$MgCl_2$	46.5	95

Calculate the temporary, permanent and total hardness of water in mg/lit.

b) Define desalination. Explain desalination of water by reverse osmosis process.

c) Explain sedimentation with coagulation of water.

d) Define following terms:
i) Viscosity ii) Fire point
iii) Cloud point iv) Oiliness

e) Define corrosion. List the types of corrosion? Explain mechanism of oxidation corrosion.

f) Explain prevention of corrosion by galvanizing and tinning.

Q.3 Attempt (Any Four) **12**

a) Define is COD. Explain determination of COD. Explain is its significance.

b) Define disinfection. Explain disinfection of water by Chloramine.

c) Define Lubricant. Explain its functions.

d) 6 gm of an oil sample after saponification with 60 ml of N/2 alcoholic KOH solution and subsequent titration with N/2 HCI gave the titre value of 6 ml to phenolphthalein end point. A blank experiment was conducted without taking oil sample. On repeating same procedure gave a titer value of 60 ml. Calculate saponification value of an oil sample.

e) Explain semisolid lubricants.

f) Explain composition, properties and applications of steel.

SECTION – II

Q.4 Attempt Any Four. **16**

a) Calculate gross and net calorific value of a coal sample of coal having C = 82%, H = 7%, O = 3%, S = 3.5%, N = 2.1% and ash = 4.4%. (Take latent heat of steam = 580 cal/g)

b) Explain construction and working of Boy's calorimeter.

c) Compare solid and liquid fuels.

d) Explain molding of plastics in to articles by following methods.
i) Injection molding
ii) Extrusion molding

e) Define plastics. Explain thermosoftening and thermosetting plastics.

f) Define TGA. Explain instrumentation of TGA. What are its applications?

Q.5 Attempt Any Four. **12**

a) Explain the characteristics of good fuels.

b) Summarize advantages and disadvantages of biodiesel.

c) Explain charging & discharging of Li-ion batteries.

d) Explain synthesis, properties and applications of PET.

e) Calculate Molecular weight of polyvinyl chloride having degree of polymerization 450.
(Mol. Wt. of VC = 62.5)

f) Calculate the weight of $MgCl_2$ required to prepare 500 ml of 0.6N solutions.
(Mol. Wt. of $MgCl_2$ = 95)

3) Figures to the right indicates full marks.
4) Make suitable assumptions if necessary and state them clearly.

MCQ/Objective Type Questions

Duration: 30 Minutes Marks:14

Q.1 Select correct option. **14**

1) Molecular mass of a polymer is _____.
a) small b) very small
c) large d) negligible

2) Raw rubber on vulcanization becomes _____.
a) plastic b) tacky
c) soft d) less elastic

3) Number of moles of solute present in a liter of solution is called _____.
a) Normality b) Molarity
c) Molality d) Mole fraction

4) Which of the following technique is used to detect the steroid consumed by athletes in international sports competition?
a) IR spectroscopy b) Gas chromatography
c) UV spectroscopy d) pH measurement

5) Water containing dissolved salts with a peculiar salty taste is called _____.
a) soft water b) brackish water
c) hard water d) desalinated water

6) Scale formation in boiler causes _____.
a) no loss of heat b) wastage of heat
c) increase in efficiency d) None of the above

7) Hard water may be softened by passing it through _____.
   a) sodium silicate
   b) limestone
   c) Ion exchange resin
   d) sodium hexametaphosphate (Calgon)

8) Oiliness is least in case of _____.
   a) greases b) mineral oils
   c) animal oils d) palm oils

9) Greases are not used to lubricate _____.
   a) rail axle boxes
   b) gears
   c) delicate instruments
   d) bearing working at high temperatures

10) Corrosion is an example of _____.
   a) oxidation b) reduction
   c) electrolysis d) extraction of metal

11) During electrochemical corrosion in acidic environment _____.
   a) oxygen evolution occurs
   b) oxygen absorption occurs
   c) hydrogen evolution takes place
   d) hydrogen absorption takes place

12) In bomb calorimeter the ignition of fuel is made with the help of _____.
   a) Cu fuse wire b) Mg fuse wire
   c) Al fuse wire d) Zn fuse wire

13) A fuel having high ignition temperature is _____.
   a) Petrol b) Wood
   c) Kerosene d) LPG

14) Most commonly used vulcanizing agent is _____.
   a) graphite b) carbon black
   c) dry ice d) sulphur

Set **R**

F.Y. (B.Tech.) (Semester - II) (New) (NEP CBCS) Examination: March/April – 2026
Engineering Chemistry
(BTCE0202 / BTME0202 / BTETE0202 / BTCSE0202 / BTEE0202 / BTECE0202 / BTIT0202 / BTAI0202 / BTMRE0202)

Day & Date: Tuesday, 19-05-2026 Max. Marks: 56
Time: 03:00 PM To 06:00 PM

Instructions: 1) All questions are compulsory.
2) Figures to the right indicate full marks.
3) Draw neat and labeled diagrams wherever necessary.
4) Make suitable assumptions if necessary and state them clearly.

SECTION – I

Q.2 Attempt Any Four. **16**

a) A sample of water on analysis was found to contain the following impurities in mg/lit.

	Amount	Mo. Wt.
$Ca(HCO_3)_2$	10.15	162
$Mg(HCO_3)_2$	28.73	146
$MgSO_4$	34.10	120
$CaCl_2$	43.90	111
$CaSO_4$	17.00	136
$MgCl_2$	46.5	95

Calculate the temporary, permanent and total hardness of water in mg/lit.

b) Define desalination. Explain desalination of water by reverse osmosis process.

c) Explain sedimentation with coagulation of water.

d) Define following terms:
i) Viscosity ii) Fire point
iii) Cloud point iv) Oiliness

e) Define corrosion. List the types of corrosion? Explain mechanism of oxidation corrosion.

f) Explain prevention of corrosion by galvanizing and tinning.

Q.3 Attempt (Any Four) **12**

a) Define is COD. Explain determination of COD. Explain is its significance.

b) Define disinfection. Explain disinfection of water by Chloramine.

c) Define Lubricant. Explain its functions.

d) 6 gm of an oil sample after saponification with 60 ml of N/2 alcoholic KOH solution and subsequent titration with N/2 HCI gave the titre value of 6 ml to phenolphthalein end point. A blank experiment was conducted without taking oil sample. On repeating same procedure gave a titer value of 60 ml. Calculate saponification value of an oil sample.

e) Explain semisolid lubricants.

f) Explain composition, properties and applications of steel.

SECTION – II

Q.4 Attempt Any Four. **16**

a) Calculate gross and net calorific value of a coal sample of coal having C = 82%, H = 7%, O = 3%, S = 3.5%, N = 2.1% and ash = 4.4%. (Take latent heat of steam = 580 cal/g)

b) Explain construction and working of Boy's calorimeter.

c) Compare solid and liquid fuels.

d) Explain molding of plastics in to articles by following methods.
i) Injection molding
ii) Extrusion molding

e) Define plastics. Explain thermosoftening and thermosetting plastics.

f) Define TGA. Explain instrumentation of TGA. What are its applications?

Q.5 Attempt Any Four. **12**

a) Explain the characteristics of good fuels.

b) Summarize advantages and disadvantages of biodiesel.

c) Explain charging & discharging of Li-ion batteries.

d) Explain synthesis, properties and applications of PET.

e) Calculate Molecular weight of polyvinyl chloride having degree of polymerization 450.
(Mol. Wt. of VC = 62.5)

f) Calculate the weight of $MgCl_2$ required to prepare 500 ml of 0.6N solutions.
(Mol. Wt. of $MgCl_2$ = 95)

MCQ/Objective Type Questions

Duration: 30 Minutes Marks: 07

Q.1 Choose the correct option from the following: **07**

1) Construction of transmission towers is the relevance of _____ Civil engineering.
a) Computer Engineering b) Mechanical Engineering
c) IT Engineering d) Electrical Engineering

2) _____ is the role of civil engineer.
a) Taking approval for plan b) Structural design
c) Preparing estimate d) All of the above

3) Portion of structure between ground level and floor level is called as _____.
a) Plinth b) Superstructure
c) Substructure d) None of the above

4) Rain water harvesting in required for _____.
a) Ground water table recharge b) Bore-well recharge solids
c) Storage for future use d) All of the above

5) Hardware, software, data and people, these are components of _____.
a) GPS b) RS
c) GIS d) Total Station

6) The process of killing the infective bacteria from the water and making it safe to the user is called ____.

a) Softening
b) Coagulation
c) Flocculation
d) Disinfection

7) Survey conducted to find depth of water at various points in bodies of water like sea is known as _____ survey.

a) Astronomical survey
b) Hydrographic survey
c) City survey
d) Land survey

SECTION – II

MCQ/Objective Type Questions

Duration: 30 Minutes Marks: 07

Q.1 Choose the correct option from the following: 07

1) The sequence of process that eventually returns the working substance to its original state is known as _____.

a) Event b) Thermodynamic cycle
c) Thermodynamic Property d) None of the above

2) To increase the pressure of the gas, machine driven by prime mover is used. This is known as _____.

a) Steam Turbine b) Gas Turbine
c) I. C. Engine d) Compressor

3) Which of the following is the simplest type of resistance welding used in making lap welds?

a) Resistance weld b) Resistance seam
c) Projection d) Upset

4) As per the sign convention, heat going out of system to surrounding is treated as _____.

a) Positive b) Negative
c) Neglected d) None of the above

5) Which joining process is carried out above 450° C?

a) Soldering b) Brazing
c) Both of these d) None of the above

6) A pressure cooker forms a _____.

a) Isolated system b) Closed system
c) Open system d) None of the above

7) An engine running at 150 rpm drives a shaft with belt arrangement. If the diameter of engine pulley is 55 cm and shaft pulley 33 cm, find the speed of shaft _____.

a) 150 rpm b) 100 rpm
c) 300 rpm d) 250 rpm

Day & Date: Thursday, 21-05-2026 Max. Marks: 56
Time: 03:00 PM To 06:00 PM

Instructions: 1) All questions are compulsory.
2) Figures to the right indicate full marks.
3) Use of log tables and non-programmable single memory calculator is allowed.
4) Make suitable assumptions, if necessary and mention them clearly.

SECTION – I

Q.2 Attempt Any Five. **15**

a) What are the sub branches of civil engineering? Explain any one in short.

b) Explain the role of civil engineering various construction activities.

c) State the function:
i) Wall
ii) Chajja
iii) Lintel

d) Explain the term rain water harvesting.

e) What is solid waste? Explain its classification.

f) What is GPS? Give its applications in various fields.

g) Explain the classification of Surveying.

Q.3 Attempt Any One out of (a) and (b) and solve Any Two out of (c) to (f) **13**

a) The following staff readings were observed successively with a level, the instrument have been moved after 3rd, 6th and 8th reading. 2.230, 1.605, 0.990, 2.090, 2.865, 1.260, 0.600, 1.980, 1.045, 2.685. Calculate the RL of points if RL of B.M. is 432.385 m from where 1st reading was taken. Use H.I. Method. Apply arithmetic check. **05**

b) The following readings were taken with a dumpy level and 4 m levelling staff. The instrument was shifted after 3rd and 6th readings. The readings are 2.665, 3.225, 2.905, 1.850, 0.980, 2.620, 1.585, 0.960, 0.425 m. Calculate the R.L. of points, if the first reading was taken with a staff held on B.M. of 240 m. Use rise and fall method. Apply arithmetic check. **05**

c)	Explain the IRC classification of roads.	**04**
d)	What is the difference between load bearing structure and framed structure?	**04**
e)	Explain with neat sketch any two types of foundation.	**04**
f)	Give the relevance of civil engineering with Electrical and Mechanical Engineering.	**04**

SECTION – II

Q.4 Answer Any Five of the following. **15**

a) Distinguish between Centrifugal Pump & Reciprocating Pump.

b) Write a note on construction of Pelton wheel with its diagram.

c) Explain open belt & cross belt drive.

d) State the types of system and explain any one with example.

e) What is priming? Why it essential for centrifugal pump.

f) State & explain Zeroth Law of Thermodynamics.

g) Explain resistance welding with neat sketch.

Q.5 Solve Any One out of (a) and (b) and solve Any Two out of (c) to (f). **13**

a) In open belt drive, two pulleys of 500 mm diameter are connected at distance of 2m apart. The initial tension in the belt is 500 N if, the coefficient of friction between the belt and pulley is 0.3. Find the power transmitted at 700 rpm. Also calculate the length of belt. **05**

b) Describe Center Lathe Machine with its block diagram. **05**

c) 150 kJ of work is supplied to a closed system. If the initial volume is 0.6 m^3 and pressure of the system changes as P= 8 - 4v, where p is in bar and v is in m^3. Determine the final volume and pressure of the system. **04**

d) Write a note on Centrifugal Pump **04**

e) Derive an expression for length of cross belt drive. **04**

f) Sketch and explain Oxy-acetylene welding. **04**

2) Rain water harvesting in required for _____.
a) Ground water table recharge b) Bore-well recharge solids
c) Storage for future use d) All of the above

3) Hardware, software, data and people, these are components of _____.
a) GPS b) RS
c) GIS d) Total Station

4) The process of killing the infective bacteria from the water and making it safe to the user is called ____.
a) Softening b) Coagulation
c) Flocculation d) Disinfection

5) Survey conducted to find depth of water at various points in bodies of water like sea is known as _____ survey.
a) Astronomical survey b) Hydrographic survey
c) City survey d) Land survey

6) Construction of transmission towers is the relevance of _____ Civil engineering.

a) Computer Engineering
b) Mechanical Engineering
c) IT Engineering
d) Electrical Engineering

7) _____ is the role of civil engineer.

a) Taking approval for plan
b) Structural design
c) Preparing estimate
d) All of the above

SECTION – II

MCQ/Objective Type Questions

Duration: 30 Minutes Marks: 07

Q.1 Choose the correct option from the following: 07

1) Which of the following is the simplest type of resistance welding used in making lap welds?

a) Resistance weld b) Resistance seam
c) Projection d) Upset

2) As per the sign convention, heat going out of system to surrounding is treated as _____.

a) Positive b) Negative
c) Neglected d) None of the above

3) Which joining process is carried out above 450° C?

a) Soldering b) Brazing
c) Both of these d) None of the above

4) A pressure cooker forms a _____.

a) Isolated system b) Closed system
c) Open system d) None of the above

5) An engine running at 150 rpm drives a shaft with belt arrangement. If the diameter of engine pulley is 55 cm and shaft pulley 33 cm, find the speed of shaft _____.

a) 150 rpm b) 100 rpm
c) 300 rpm d) 250 rpm

6) The sequence of process that eventually returns the working substance to its original state is known as _____.

a) Event b) Thermodynamic cycle
c) Thermodynamic Property d) None of the above

7) To increase the pressure of the gas, machine driven by prime mover is used. This is known as _____.

a) Steam Turbine b) Gas Turbine
c) I. C. Engine d) Compressor

F.Y. (B.Tech.) (Semester - II) (New) (NEP CBCS) Examination: March/April – 2026
Basics of Civil and Mechanical Engineering
(BTCE0204 / BTME0204 / BTETE0204 / BTCSE0204 / BTEE0204 / BTECE0204 / BTIT0204 / BTAI0204 / BTMRE0204)

Day & Date: Thursday, 21-05-2026 Max. Marks: 56
Time: 03:00 PM To 06:00 PM

Instructions: 1) All questions are compulsory.
2) Figures to the right indicate full marks.
3) Use of log tables and non-programmable single memory calculator is allowed.
4) Make suitable assumptions, if necessary and mention them clearly.

SECTION – I

Q.2 Attempt Any Five. **15**

a) What are the sub branches of civil engineering? Explain any one in short.

b) Explain the role of civil engineering various construction activities.

c) State the function:
i) Wall
ii) Chajja
iii) Lintel

d) Explain the term rain water harvesting.

e) What is solid waste? Explain its classification.

f) What is GPS? Give its applications in various fields.

g) Explain the classification of Surveying.

Q.3 Attempt Any One out of (a) and (b) and solve Any Two out of (c) to (f) **13**

a) The following staff readings were observed successively with a level, the instrument have been moved after 3rd, 6th and 8th reading. 2.230, 1.605, 0.990, 2.090, 2.865, 1.260, 0.600, 1.980, 1.045, 2.685. Calculate the RL of points if RL of B.M. is 432.385 m from where 1st reading was taken. Use H.I. Method. Apply arithmetic check. **05**

b) The following readings were taken with a dumpy level and 4 m levelling staff. The instrument was shifted after 3rd and 6th readings. The readings are 2.665, 3.225, 2.905, 1.850, 0.980, 2.620, 1.585, 0.960, 0.425 m. Calculate the R.L. of points, if the first reading was taken with a staff held on B.M. of 240 m. Use rise and fall method. Apply arithmetic check. **05**

c)	Explain the IRC classification of roads.	**04**
d)	What is the difference between load bearing structure and framed structure?	**04**
e)	Explain with neat sketch any two types of foundation.	**04**
f)	Give the relevance of civil engineering with Electrical and Mechanical Engineering.	**04**

SECTION – II

Q.4 Answer Any Five of the following. **15**

a) Distinguish between Centrifugal Pump & Reciprocating Pump.

b) Write a note on construction of Pelton wheel with its diagram.

c) Explain open belt & cross belt drive.

d) State the types of system and explain any one with example.

e) What is priming? Why it essential for centrifugal pump.

f) State & explain Zeroth Law of Thermodynamics.

g) Explain resistance welding with neat sketch.

Q.5 Solve Any One out of (a) and (b) and solve Any Two out of (c) to (f). **13**

a) In open belt drive, two pulleys of 500 mm diameter are connected at distance of 2m apart. The initial tension in the belt is 500 N if, the coefficient of friction between the belt and pulley is 0.3. Find the power transmitted at 700 rpm. Also calculate the length of belt. **05**

b) Describe Center Lathe Machine with its block diagram. **05**

c) 150 kJ of work is supplied to a closed system. If the initial volume is 0.6 m^3 and pressure of the system changes as P= 8 - 4v, where p is in bar and v is in m^3. Determine the final volume and pressure of the system. **04**

d) Write a note on Centrifugal Pump **04**

e) Derive an expression for length of cross belt drive. **04**

f) Sketch and explain Oxy-acetylene welding. **04**

MCQ/Objective Type Questions

Duration: 30 Minutes Marks: 07

Q.1 Choose the correct alternatives from the given options. 07

1) If voltage applied to a circuit is 50 V and current through it is observed as 10 A then the circuit resistance is _____ ohms.
a) 5 b) 0.2
c) 10 d) 50

2) The time taken by an alternating quantity to complete one cycle is called _____.
a) Frequency b) Speed
c) Waveform d) Time period

3) The reluctance of a magnetic circuit is _____.
a) directly proportional to length and area
b) directly proportional to length and inversely proportional to area
c) directly proportional to area and inversely proportional to length
d) None of these

4) The reluctance of the magnetic circuit is _____.
a) MMF/current b) MMF/flux
c) flux/current d) flux/MMF

5) In a transformer electrical power is transformed from one circuit to other without change in the _____.
a) Voltage b) Current
c) Frequency d) None of these

6) The power factor of pure resistive circuit is _____.

a) Zero b) Unity

c) Lagging d) Leading

7) A DC motor converts _____.

a) Electrical energy into mechanical energy
b) Mechanical energy into electrical energy
c) Electrical energy into magnetic energy
d) Magnetic energy into electrical energy

SECTION – II

MCQ/Objective Type Questions

Duration: 30 Minutes Marks: 07

Q.1 Choose the correct alternatives from the given options. 07

8) Break down of PN junction occurs _____.
a) with forward bias
b) with reverse bias
c) because of manufacturing defect
d) None of these

9) A diode is used as _____.
a) An amplifier b) A rectifier
c) An oscillator d) Voltage regulator

10) In transistor _____.
a) IC = IE + IB b) IB = IC + IE
c) IE = IC + IB d) IE = IC − IB

11) In BJT, largest current flow occurs in the _____.
a) emitter b) collector
c) base d) All of these

12) The decimal number 17 is equal to binary number _____.
a) 10010 b) 11000
c) 10001 d) 01001

13) The output of an AND gate is high when _____.
a) Any input is high b) All inputs are high
c) No inputs are high d) Both a) and b)

14) The term nibble means _____.
a) 2 bits b) 1 bit
c) 4 bits d) 8 bits

SECTION – I

Q.2 Solve Any Four. **16**

a) State and explain Kirchhoff's laws as applied to dc circuits.

b) As shown in figure below, find the current I flowing through the circuit.

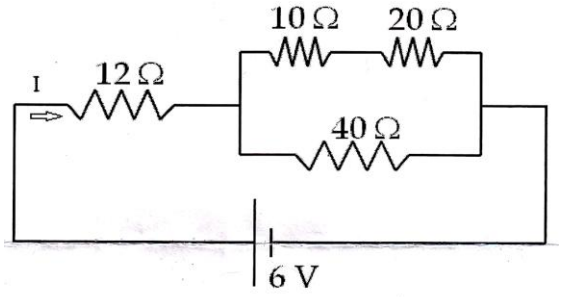

Fig.: Q.2 (2)

c) Explain Faraday's laws of electromagnetic induction.

d) Define and explain following terms:
i) Magnetic flux
ii) Magnetic flux density
iii) MMF
iv) Permeability

e) Define RMS value and derive expression of RMS value for sinusoidal quantity.

f) An alternating current is given as: $i = 5 \sin (314.15t)$ A. Find its amplitude, frequency and time period.

Q.3 Solve Any Two. **12**

a) Derive the equation for converting star resistances into equivalent delta resistances.

b) A 10 KVA, 3300/240 V, single phase, 50 Hz transformer has a core area of 300 cm^2. The flux density is 1.3 Tesla. Calculate:

i) Number of primary turns
ii) Number of secondary turns

c) Explain series R-C ac circuit with neat diagram. Also draw the waveform and phasor diagram.

SECTION – II

Q.4 Solve Any Four. **16**

a) Draw circuit diagram and explain VI characteristics of PN junction diode.

b) Explain Full wave center tap rectifier with necessary diagrams.

c) Explain working of BJT as amplifier.

d) Explain input and output characteristics of common base (CB) configuration of transistor.

e) State and prove De-Morgan theorem.

f) Covert

i) $(AB.CD)_H$ to octal

ii) $(132)_8$ to decimal

Q.5 Solve Any Two. **12**

a) Explain working of capacitor filter using full wave rectifier with neat circuit diagram.

b) Compare different transistor configurations on the basis of input resistance, output resistance, voltage gain and current gain.

c) What is meant by universal gate? Derive basic gates using NAND and NOR gate.

F.Y. (B.Tech.) (Semester - II) (New) (NEP CBCS) Examination: March/April – 2026
Basic Electrical & Electronics Engineering
(BTCE0205 / BTME0205 / BTETE0205 / BTCSE0205 / BTEE0205 / BTECE0205/ BTIT0205/ BTAI0205/ BTMRE0205)

Day & Date: Saturday, 23-05-2026 Max. Marks: 56
Time: 03:00 PM To 06:00 PM

Instructions: 1) All questions are compulsory.
2) Figures to the right indicate full marks.

SECTION – I

Q.2 Solve Any Four. **16**

a) State and explain Kirchhoff's laws as applied to dc circuits.

b) As shown in figure below, find the current I flowing through the circuit.

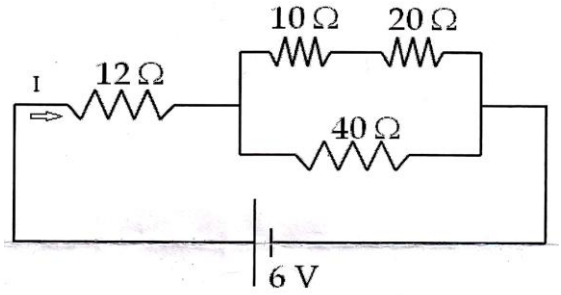

Fig.: Q.2 (2)

c) Explain Faraday's laws of electromagnetic induction.

d) Define and explain following terms:
i) Magnetic flux
ii) Magnetic flux density
iii) MMF
iv) Permeability

e) Define RMS value and derive expression of RMS value for sinusoidal quantity.

f) An alternating current is given as: $i = 5 \sin (314.15t)$ A. Find its amplitude, frequency and time period.

Q.3 Solve Any Two. **12**

a) Derive the equation for converting star resistances into equivalent delta resistances.

b) A 10 KVA, 3300/240 V, single phase, 50 Hz transformer has a core area of 300 cm^2. The flux density is 1.3 Tesla. Calculate:

i) Number of primary turns
ii) Number of secondary turns

c) Explain series R-C ac circuit with neat diagram. Also draw the waveform and phasor diagram.

SECTION – II

Q.4 Solve Any Four. **16**

a) Draw circuit diagram and explain VI characteristics of PN junction diode.

b) Explain Full wave center tap rectifier with necessary diagrams.

c) Explain working of BJT as amplifier.

d) Explain input and output characteristics of common base (CB) configuration of transistor.

e) State and prove De-Morgan theorem.

f) Covert

i) $(AB.CD)_H$ to octal

ii) $(132)_8$ to decimal

Q.5 Solve Any Two. **12**

a) Explain working of capacitor filter using full wave rectifier with neat circuit diagram.

b) Compare different transistor configurations on the basis of input resistance, output resistance, voltage gain and current gain.

c) What is meant by universal gate? Derive basic gates using NAND and NOR gate.

MCQ/Objective Type Questions

Duration: 30 Minutes Marks: 07

Q.1 Choose the correct alternatives from the given options. 07

1) A DC motor converts _____.
a) Electrical energy into mechanical energy
b) Mechanical energy into electrical energy
c) Electrical energy into magnetic energy
d) Magnetic energy into electrical energy

2) If voltage applied to a circuit is 50 V and current through it is observed as 10 A then the circuit resistance is _____ ohms.
a) 5 b) 0.2
c) 10 d) 50

3) The time taken by an alternating quantity to complete one cycle is called _____.
a) Frequency b) Speed
c) Waveform d) Time period

4) The reluctance of a magnetic circuit is _____.
a) directly proportional to length and area
b) directly proportional to length and inversely proportional to area
c) directly proportional to area and inversely proportional to length
d) None of these

5) The reluctance of the magnetic circuit is _____.
a) MMF/current b) MMF/flux
c) flux/current d) flux/MMF

6) In a transformer electrical power is transformed from one circuit to other without change in the _____.

a) Voltage b) Current
c) Frequency d) None of these

7) The power factor of pure resistive circuit is _____.

a) Zero b) Unity
c) Lagging d) Leading

SECTION – II

MCQ/Objective Type Questions

Duration: 30 Minutes Marks: 07

Q.1 Choose the correct alternatives from the given options. 07

8) The term nibble means _____.
a) 2 bits b) 1 bit
c) 4 bits d) 8 bits

9) Break down of PN junction occurs _____.
a) with forward bias
b) with reverse bias
c) because of manufacturing defect
d) None of these

10) A diode is used as _____.
a) An amplifier b) A rectifier
c) An oscillator d) Voltage regulator

11) In transistor _____.
a) IC = IE + IB b) IB = IC + IE
c) IE = IC + IB d) IE = IC − IB

12) In BJT, largest current flow occurs in the _____.
a) emitter b) collector
c) base d) All of these

13) The decimal number 17 is equal to binary number _____.
a) 10010 b) 11000
c) 10001 d) 01001

14) The output of an AND gate is high when _____.
a) Any input is high b) All inputs are high
c) No inputs are high d) Both a) and b)

5) Use of non-programable calculator is allowed.

MCQ/Objective Type Questions

Duration: 30 Minutes Marks:14

Q.1 Choose the correct alternative. **14**

1) The series $a + ar + ar^2 + \ldots\ldots$ is convergent, if $|r| < 1$ and converges to _____.

a) $\frac{a}{1-r}$ b) $\frac{a}{1+r}$
c) $\frac{1}{1-r}$ d) $\frac{1}{1+r}$

2) The series $\sum_{n=1}^{n=\infty} \frac{1}{n^p}, p > 1$ is _____.

a) convergent b) divergent
c) oscillatory d) conditionally convergent

3) In Leibnitz test, an alternating series $u_1 - u_2 + u_3 - u_4 + \ldots\ldots$ is convergent if
i) each term is numerically less than the preceding term and
ii) $\log_{n\to\infty} u_n =$ _____.

a) 1 b) -1
c) 0 d) 2

4) Integrating factor of the differential equation $\frac{dx}{dy} + P'x = Q'$ is _____.

a) $e^{\int P' dx}$ b) $e^{\int Q' dy}$
c) $e^{\int Q' dx}$ d) $e^{\int P' dy}$

5) $\cos\ (x+iy) =$ _____.

a) $\cos x \cos y + \sin x \sin y$ b) $\cos x \cosh y + i \sin x\ \ x \sinh y$

c) $\cos x \cosh y - i\ \sin x \sinh y$ d) $\cosh x \sinh y + \sinh x \cosh y$

6) C-R equations for $f(z)$ to be analytic use _____.

a) $u_x = v_y, u_y = -v_x$ b) $u_x = -v_x, u_y = -v_y$

c) $u_x = -v_x\ , u_y = -v_x$ d) $u_x = -v_y, u_y = v_x$

7) The orthogonal trajectories of the curves $r = a(1+\cos\theta)$ is _____.

a) $r = c(1+\cos\theta)$ b) $r = c(1-\cos\theta)$

c) $r = c(1+\sin\theta)$ d) $r = c(1-\sin\theta)$

8) $\lceil n.\lceil 1-n =$ _____.

a) $B(n,n)$ b) $B(n,1-n)$

c) $B(1-n,1-n)$ d) $B(n,1+n)$

9) If the density ρ at any point of the lamina $y = f(x)$ bounded by $x = a, x = b, y = c, y = d$ varies as the product of the square of the ordinate.

a) kx^2 b) ky^2

c) kxy d) kx^2y^2

10) $\int_0^a \int_0^b dxdy =$ _____.

a) ab b) $\frac{a}{2}$

c) $\frac{b}{2}$ d) $-ab$

11) The curve $r^2 = a^2\cos 2\theta$ is symmetrical about _____.

a) $\theta = 0$ b) $\theta = \frac{\pi}{3}$

c) $\theta = \frac{\pi}{6}$ d) None of these

12) The tangents to the curve $x = a(\cos t + \frac{1}{2}\log\tan^2\frac{t}{2})\ , y = a\sin t$ at $t = \frac{\pi}{2}$ is _____.

a) Parallel to the x-axis b) Parallel to the y-axis

c) The line $y = x$ d) The line $y = -x$

13) $B(2,3) =$ _____.

a) $1/2$

b) $\frac{1}{3}$

c) $\frac{1}{6}$

d) $\frac{1}{12}$

14) $\left\lceil \frac{1}{2} \right. =$ _____.

a) π

b) $\frac{\pi}{2}$

c) 2π

d) $\sqrt{\pi}$

SECTION – I

Q.2 Attempt Any Three of the following. **09**

a) Solve $\left[y\left(1+\frac{1}{x}\right)+\cos y\right]dx+[x+\log x-x\sin y]\,dy=0$

b) Solve $(2x-2y+5)\frac{dy}{dx}=(x-y+3)$

c) Solve $x^{\frac{4}{3}}=\left(\frac{1}{2}+i\frac{\sqrt{3}}{2}\right)$ and show that continued product of all values is 1.

d) Test the convergence of: $\frac{1}{1.2.3}+\frac{3}{2.3.4}+\frac{5}{3.4.5}+\cdots+\frac{2n-1}{n(n+1)(n+2)}+\ldots$

e) Determine k such that $f(z)=\frac{1}{2}\log(x^2+y^2)+i\tan^{-1}\left(\frac{kx}{y}\right)$ is an analytic function.

Q.3 Attempt Any Three of the following. **09**

a) Solve $(2y-x^2)dx+xdy=0$

b) Find the orthogonal trajectories of the curve $r=a(1+\cos\theta)$

c) Show that $u=e^x\cos y$ is a harmonic function. Find its corresponding analytic function $f(z)$.

d) Test the convergence of $\frac{1.2}{3^2.4^2}+\frac{3.4}{5^2.6^2}+\frac{5.6}{7^2.8^2}+\ldots$

e) Test the convergence of: $\sum_{n=1}^{n=\infty}\frac{4^n+5^n}{6^n}$

Q.4 Attempt Any Two of the following. **10**

a) Apply De-Movire's to simplify $\left(\frac{1+\sin\frac{\pi}{8}+i\cos\frac{\pi}{8}}{1+\sin\frac{\pi}{8}-i\cos\frac{\pi}{8}}\right)^8$

b) Define the Absolute and Conditional Convergence and examine for the absolute and conditional convergence, $\sum_{n=1}^{n=\infty}(-1)^n\ \frac{(n+1)^n}{(2n)^n}$

c) When a switch is closed, the current built up in an electric circuit is given by $L\frac{di}{dt}+Ri=E$ if $L=640, R=250, E=500$, and $i=0$ when $t=0$. Show the current will approach 2 amp. when $t\to\infty$.

SECTION – II

Q.5 Attempt Any Three of the following. **09**

a) Evaluate $\int_0^4 x^2\sqrt{4x-x^2}dx$

b) Evaluate $\int_0^{\frac{\pi}{2}}\int_0^{a\sin\theta}\int_0^{\frac{a^2-r^2}{a}} rd\,\theta dr dz$

c) Express the following integral in polar coordinates and evaluate.
$\int_0^a \int_{\sqrt{(ax-x^2)}}^{\sqrt{(a^2-x^2)}} \frac{dx\,dy}{\sqrt{(a^2-x^2-y^2)}}$

d) Show that $\int_0^\infty \frac{\tan^{-1}\left(\frac{x}{a}\right)-\tan^{-1}\left(\frac{x}{b}\right)}{x}dx=\frac{\pi}{2}\log\left(\frac{b}{a}\right)$

e) Trace the curve $x=a(t+\sin t), y=a(1-\cos t)$

Q.6 Attempt Any Three of the following. **09**

a) Find the area included between the curves $y=x^2$ & $y=x^3$

b) Evaluate $\int_0^{\frac{\pi}{4}}\sin^4 4x\cos^3 2x dx$

c) Evaluate $\iint \frac{xy}{\sqrt{1-y^2}}\,dxdy$ over the positive quadrant of the circle $x^2+y^2=1$

d) Trace the curve $r=a(1+\cos\theta)$

e) Change to polar and evaluate $\int_0^\infty\int_0^\infty e^{-(x^2+y^2)}\,dxdy$

Q.7 Attempt Any Two of the following. **10**

a) Trace the curve with full justification $ay^2 = x.(a^2 - x^2)$

b) State and Prove duplication formula.

c) Find the mass of the wire in the shape of the cardioid $r = a(1 - \cos\theta)$,
if the density at any point of the wire is K times its distance from the Pole.

MCQ/Objective Type Questions

Duration: 30 Minutes Marks:14

Q.1 Choose the correct alternative. **14**

1) The curve $r^2 = a^2 \cos 2\theta$ is symmetrical about _____.

a) $\theta = 0$ b) $\theta = \frac{\pi}{3}$

c) $\theta = \frac{\pi}{6}$ d) None of these

2) The tangents to the curve $x = a(\cos t + \frac{1}{2}\log \tan^2 \frac{t}{2}), y = a \sin t$ at $t = \frac{\pi}{2}$ is _____.

a) Parallel to the x-axis b) Parallel to the y-axis

c) The line $y = x$ d) The line $y = -x$

3) $B(2,3) =$ _____.

a) $1/2$ b) $\frac{1}{3}$

c) $\frac{1}{6}$ d) $\frac{1}{12}$

4) $\left[\frac{1}{2} =$ _____.

a) π b) $\frac{\pi}{2}$

c) 2π d) $\sqrt{\pi}$

5) The series $a + ar + ar^2 + \ldots\ldots$ is convergent, if $|r| < 1$ and converges to _____.

a) $\frac{a}{1-r}$ b) $\frac{a}{1+r}$

c) $\frac{1}{1-r}$ d) $\frac{1}{1+r}$

6) The series $\sum_{n=1}^{n=\infty} \frac{1}{n^p}, p > 1$ is _____.

a) convergent b) divergent

c) oscillatory d) conditionally convergent

7) In Leibnitz test, an alternating series $u_1 - u_2 + u_3 - u_4 + \ldots\ldots$ is convergent if

i) each term is numerically less than the preceding term and

ii) $\log_{n\to\infty} u_n =$ _____.

a) 1 b) -1

c) 0 d) 2

8) Integrating factor of the differential equation $\frac{dx}{dy} + P'x = Q'$ is _____.

a) $e^{\int P' dx}$ b) $e^{\int Q' dy}$

c) $e^{\int Q' dx}$ d) $e^{\int P' dy}$

9) $\cos\,(x + iy) =$ _____.

a) $\cos x \cos y + \sin x \sin y$ b) $\cos x \cosh y + i \sin x \;\; x \sinh y$

c) $\cos x \cosh y - i \sin x \sinh y$ d) $\cosh x \sinh y + \sinh x \cosh y$

10) C-R equations for $f(z)$ to be analytic use _____.

a) $u_x = v_y, u_y = -v_x$ b) $u_x = -v_x, u_y = -v_y$

c) $u_x = -v_x\,, u_y = -v_x$ d) $u_x = -v_y, u_y = v_x$

11) The orthogonal trajectories of the curves $r = a(1 + \cos\theta)$ is ____.

a) $r = c(1 + \cos\theta)$ b) $r = c(1 - \cos\theta)$

c) $r = c(1 + \sin\theta)$ d) $r = c(1 - \sin\theta)$

12) $\lceil n . \lceil 1 - n =$ _____.

a) $B(n, n)$ b) $B(n, 1 - n)$

c) $B(1 - n, 1 - n)$ d) $B(n, 1 + n)$

13) If the density ρ at any point of the lamina $y = f(x)$ bounded by $x = a, x = b, y = c, y = d$ varies as the product of the square of the ordinate.

a) kx^2 b) ky^2

c) kxy d) kx^2y^2

14) $\int_0^a \int_0^b dxdy = _____.$

a) ab

b) $\frac{a}{2}$

c) $\frac{b}{2}$

d) $-ab$

F.Y. (B.Tech.) (Semester - II) (New) (NEP CBCS) Examination: March/April – 2026
Engineering Mathematics – II
(BTCE0203 / BTME0203 / BTETE0203 / BTCSE0203 / BTEE0203 / BTECE0203 / BTIT0203 / BTAI0203 / BTMRE0203)

Day & Date: Tuesday, 26-05-2026 Max. Marks: 56
Time: 03:00 PM To 06:00 PM

Instructions: 1) All questions are compulsory.
2) Figures to the right indicate full marks.
3) Make suitable assumptions if necessary and state them clearly.
4) Use of non-programmable calculator is allowed.

SECTION – I

Q.2 Attempt Any Three of the following. **09**

a) Solve $\left[y\left(1+\frac{1}{x}\right)+\cos y\right]dx+[x+\log x-x\sin y]\,dy=0$

b) Solve $(2x-2y+5)\frac{dy}{dx}=(x-y+3)$

c) Solve $x^{\frac{4}{3}}=\left(\frac{1}{2}+i\frac{\sqrt{3}}{2}\right)$ and show that continued product of all values is 1.

d) Test the convergence of: $\frac{1}{1.2.3}+\frac{3}{2.3.4}+\frac{5}{3.4.5}+\cdots+\frac{2n-1}{n(n+1)(n+2)}+\ldots$

e) Determine k such that $f(z)=\frac{1}{2}\log(x^2+y^2)+i\tan^{-1}\left(\frac{kx}{y}\right)$ is an analytic function.

Q.3 Attempt Any Three of the following. **09**

a) Solve $(2y-x^2)dx+xdy=0$

b) Find the orthogonal trajectories of the curve $r=a(1+\cos\theta)$

c) Show that $u=e^x\cos y$ is a harmonic function. Find its corresponding analytic function $f(z)$.

d) Test the convergence of $\frac{1.2}{3^2.4^2}+\frac{3.4}{5^2.6^2}+\frac{5.6}{7^2.8^2}+\ldots$

e) Test the convergence of: $\sum_{n=1}^{n=\infty}\frac{4^n+5^n}{6^n}$

Q.4 Attempt Any Two of the following. **10**

a) Apply De-Movire's to simplify $\left(\frac{1+\sin\frac{\pi}{8}+i\cos\frac{\pi}{8}}{1+\sin\frac{\pi}{8}-i\cos\frac{\pi}{8}}\right)^8$

b) Define the Absolute and Conditional Convergence and examine for the absolute and conditional convergence, $\sum_{n=1}^{n=\infty}(-1)^n\ \frac{(n+1)^n}{(2n)^n}$

c) When a switch is closed, the current built up in an electric circuit is given by $L\frac{di}{dt}+Ri=E$ if $L=640, R=250, E=500$, and $i=0$ when $t=0$. Show the current will approach 2 amp. when $t\to\infty$.

SECTION – II

Q.5 Attempt Any Three of the following. **09**

a) Evaluate $\int_0^4 x^2\sqrt{4x-x^2}dx$

b) Evaluate $\int_0^{\frac{\pi}{2}}\int_0^{a\sin\theta}\int_0^{\frac{a^2-r^2}{a}} rd\,\theta dr dz$

c) Express the following integral in polar coordinates and evaluate.
$\int_0^a \int_{\sqrt{(ax-x^2)}}^{\sqrt{(a^2-x^2)}} \frac{dx\,dy}{\sqrt{(a^2-x^2-y^2)}}$

d) Show that $\int_0^\infty \frac{\tan^{-1}\left(\frac{x}{a}\right)-\tan^{-1}\left(\frac{x}{b}\right)}{x}dx=\frac{\pi}{2}\log\left(\frac{b}{a}\right)$

e) Trace the curve $x=a(t+\sin t), y=a(1-\cos t)$

Q.6 Attempt Any Three of the following. **09**

a) Find the area included between the curves $y=x^2$ & $y=x^3$

b) Evaluate $\int_0^{\frac{\pi}{4}}\sin^4 4x\cos^3 2x dx$

c) Evaluate $\iint \frac{xy}{\sqrt{1-y^2}}\,dxdy$ over the positive quadrant of the circle $x^2+y^2=1$

d) Trace the curve $r=a(1+\cos\theta)$

e) Change to polar and evaluate $\int_0^\infty\int_0^\infty e^{-(x^2+y^2)}\,dxdy$

Q.7 Attempt Any Two of the following. **10**

a) Trace the curve with full justification $ay^2 = x.(a^2 - x^2)$

b) State and Prove duplication formula.

c) Find the mass of the wire in the shape of the cardioid $r = a(1 - \cos\theta)$,
if the density at any point of the wire is K times its distance from the Pole.

5) Use of non-programable calculator is allowed.

MCQ/Objective Type Questions

Duration: 30 Minutes Marks:14

Q.1 Choose the correct alternative. **14**

1) C-R equations for $f(z)$ to be analytic use _____.

a) $u_x = v_y, u_y = -v_x$ b) $u_x = -v_x, u_y = -v_y$

c) $u_x = -v_x, u_y = -v_x$ d) $u_x = -v_y, u_y = v_x$

2) The orthogonal trajectories of the curves $r = a(1 + \cos\theta)$ is _____.

a) $r = c(1 + \cos\theta)$ b) $r = c(1 - \cos\theta)$

c) $r = c(1 + \sin\theta)$ d) $r = c(1 - \sin\theta)$

3) $\lceil n . \lceil 1 - n =$ _____.

a) $B(n, n)$ b) $B(n, 1 - n)$

c) $B(1 - n, 1 - n)$ d) $B(n, 1 + n)$

4) If the density ρ at any point of the lamina $y = f(x)$ bounded by $x = a, x = b, y = c, y = d$ varies as the product of the square of the ordinate.

a) kx^2 b) ky^2

c) kxy d) kx^2y^2

5) $\int_0^a \int_0^b dxdy =$ _____.

a) ab b) $\frac{a}{2}$

c) $\frac{b}{2}$ d) $-ab$

6) The curve $r^2 = a^2 \cos 2\theta$ is symmetrical about _____.

a) $\theta = 0$ b) $\theta = \frac{\pi}{3}$

c) $\theta = \frac{\pi}{6}$ d) None of these

7) The tangents to the curve $x = a(\cos t + \frac{1}{2}\log \tan^2 \frac{t}{2})$, $y = a \sin t$ at $t = \frac{\pi}{2}$ is _____.

a) Parallel to the x-axis b) Parallel to the y-axis

c) The line $y = x$ d) The line $y = -x$

8) $B(2,3) =$ _____.

a) $1/2$ b) $\frac{1}{3}$

c) $\frac{1}{6}$ d) $\frac{1}{12}$

9) $\left[\frac{1}{2} =$ _____.

a) π b) $\frac{\pi}{2}$

c) 2π d) $\sqrt{\pi}$

10) The series $a + ar + ar^2 + \ldots\ldots$ is convergent, if $|r| < 1$ and converges to _____.

a) $\frac{a}{1-r}$ b) $\frac{a}{1+r}$

c) $\frac{1}{1-r}$ d) $\frac{1}{1+r}$

11) The series $\sum_{n=1}^{n=\infty} \frac{1}{n^p}, p > 1$ is _____.

a) convergent b) divergent

c) oscillatory d) conditionally convergent

12) In Leibnitz test, an alternating series $u_1 - u_2 + u_3 - u_4 + \ldots\ldots$ is convergent if

i) each term is numerically less than the preceding term and

ii) $\log_{n\to\infty} u_n =$ _____.

a) 1 b) -1

c) 0 d) 2

13) Integrating factor of the differential equation $\frac{dx}{dy} + P'x = Q'$ is _____.

a) $e^{\int P' dx}$ b) $e^{\int Q' dy}$

c) $e^{\int Q' dx}$ d) $e^{\int P' dy}$

14) $\cos\ (x + iy) =$ _____.

a) $\cos x \cos y + \sin x \sin y$

b) $\cos x \cosh y + i \sin x\ \ x \sinh y$

c) $\cos x \cosh y - i \sin x \sinh y$

d) $\cosh x \sinh y + \sinh x \cosh y$

F.Y. (B.Tech.) (Semester - II) (CBCS) Examination: March/April – 2026
Engineering Graphics & CAD (BTN10206)

Day & Date: Sunday, 10-05-2026 Max. Marks: 70
Time: 03:00 PM To 07:00 PM

Instructions: 1) All questions are compulsory.
2) Figures to the right indicates full marks.
3) Retain all construction lines.
4) Assume suitable dimensions, wherever required and mention it clearly.
5) All dimensions are in 'mm'.

Note: Objective type question paper must be returned after first 40 minutes strictly.

Section – I

Duration:40 Minutes **Marks:14**

Q.1 Solve Any Four objective type question from the following. **14**

1. Attempt any two questions from a) to d)
2. Questions e) & f) are compulsory.

a) Refer Fig. (a): Find Distance between Point D, and line AB. **03**

b) Refer Fig. (b): Complete projections of Line CR parallel line AB. **03**

c) Refer Fig. (c): Complete projection of line AB and find its true length if **03**
i) Grade is +70% w.r.to 'A'
ii) Bearing is S 40 E w.r.to 'A'
iii) Top view of line measures 80 mm.

d) Refer Fig. (d): Find out grade and bearing of line AB, if **03**
i) Its inclination with horizontal Reference plane is 40^0
ii) Inclination of the line with Frontal reference Plane is 45^0
iii) True length is 75 mm.

e) Refer Fig. (e): Complete projections of plane PQR, if it strikes N60W w.r.to P and dips 50^0 North Easterly. **04**

f) Refer Fig. (f): Find the strike and Dip of given Plane ABC. **04**

Descriptive Type Questions

Q.2 Solve the following. **11**

a) A line AB has its Front view length of 60 mm with a true length of 100 mm. The inclination with Horizontal reference plane is 30^0. Draw the projections of AB & find its true inclination with horizontal reference plane. Consider point A 20 mm above horizontal reference plane and 15 mm in front of vertical plane. **04**

b) A line PQ has plan length of 50 mm and apparent inclination of 45^0 with FRP. The line carries a true inclination of 30^0 with HRP. Complete the projections of the line and determine the true inclination with vertical reference plane. Consider point A 15 mm above horizontal reference plane and 20 mm in front of vertical plane. **03**

c) A Square of sides 60 mm long has its one of the sides in the horizontal reference plane. The plane is inclined at 30^0 to HP. Complete the projections of the plane. **04**

Q.3 A Triangle of 75 mm side has its side AB in horizontal reference plane (HP). The surface of the plane makes an angle of 45^0 with the horizontal reference plane and the resting edge makes 45^0 to frontal reference plane (VP). Complete the projections of the plane. **07**

Q.4 A Hexagonal pyramid, side of base 30 mm & axis 80 mm long, has a corner of base in Horizontal reference plane (HP) and the axis is inclined at 50^0 to horizontal reference plane. The top view of the axis makes 35^0 to vertical reference plane (VP). Complete its projections considering apex nearer to observer. **10**

OR

A Hexagonal prism, base 30 mm side & axis 80 mm long, has its one of the sides of base in horizontal reference plane & inclined at 45^0 to vertical reference plane. The axis of the solid is inclined at 40^0 to horizontal reference plane. Complete its projections.

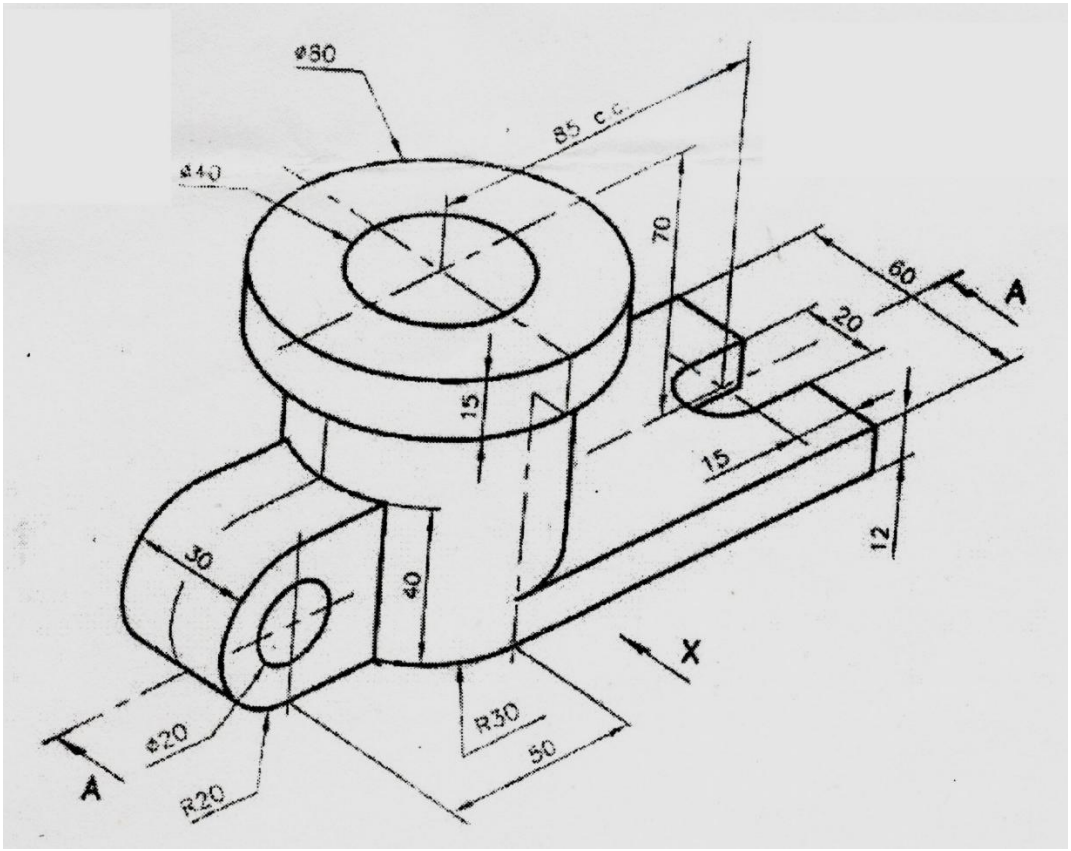
Section – II

Q.5 Figure shows isometric view of machine component, Draw the following views: **18**

a) Sectional F. V. along A-A looking in the direction X

b) Left hand side view

c) Top View



Q.6 A Square pyramid, base 50 mm side and axis 70 mm long, stands vertically on the ground (HP) with two parallel sides parallel to vertical plane. It is cut by a section plane perpendicular to vertical reference plane and inclined at 45^0 to horizontal reference plane which passing through a point on axis 20 mm from apex. Draw the front view, sectional top view and true shape of section. **10**

OR

A cylinder diameter of base 60 mm & height 60 mm has its base in horizontal reference plane. It is cut by an auxiliary inclined plane passing through extreme right hand side point of the base and inclined at 45^0 to HP. Draw front view, sectional top view and true shape of section.

2) Don't forget to Mention question paper set (P/Q/R/S) on top of page.
3) Figures to the right indicates full marks.
4) Assume suitable data if necessary and mention it clearly.
5) Use of non-programmable calculators is allowed.

MCQ/Objective Type Questions

Duration: 30 Minutes Marks:14

Q.1 Choose correct alternatives: **14**

1) The relation between modulus of elasticity (E), modulus of rigidity (G) and bulk modulus (K) is given as _____.
a) K+G / (3K+G) b) 3KG / (3K+G)
c) 3KG / (9K+G) d) 9KG / (3K+G)

2) The ratio of stress and strain is known as _____.
a) Modulus of elasticity b) Young's modulus
c) Both a) and b) d) None of the above

3) If the cantilever beam is subjected to a point load at its free end, then the shear force under the point load is _____.
a) zero b) less than a load
c) equal to load d) more than the load

4) A column under eccentric loading is subjected to _____.
a) direct stress only b) direct and bending stress
c) bending stress only d) shear stress only

5) Shear force diagram of a cantilever beam with point load at free end is represented by _____.
a) Triangular b) Semi-circular
c) Rectangular d) Parabolic curve

6) The point of contra flexure is the point where _____.
a) B.M. changes its sign b) B.M. is minimum
c) S.F. is zero d) B.M. is maximum

7) The degree of Static indeterminacy of three hinged arch is _____.
a) 1 b) 2
c) 0 d) 3

8) If principal stresses in a two-dimensional case are -10 MPa and 20 MPa respectively, then maximum shear stress at the point is _____.
a) 10 MPa b) 15 MPa
c) 20 MPa d) 30 MPa

9) Modulus of rigidity is equal to _____.
a) linear stress/linear strain
b) bending stress/bending strain
c) bending strain/bending stress
d) shear stress/shear strain

10) The value on shear stress on principal plane is _____.
a) Zero b) Maximum
c) Minimum but positive d) Average value

11) For drawing ILD, what value of test load is assumed?
a) 1 unit b) Arbitrary
c) Depends upon structure d) 0

12) Shape of three hinged arch is always _____.
a) Hyperbolic b) Circular
c) Parabolic d) Can be any arbitrary curve

13) When a beam is subjected to a bending moment the bending stress in a layer is _____ the distance from the neutral axis.
a) Independent of b) Directly proportional to
c) Inversely proportional to d) None of these

14) What will be the shape of the ILD curve for vertical reaction at left support for a simply supported beam?
a) Triangular b) Rectangular
c) Trapezoidal d) Cubic curve

Set **P**

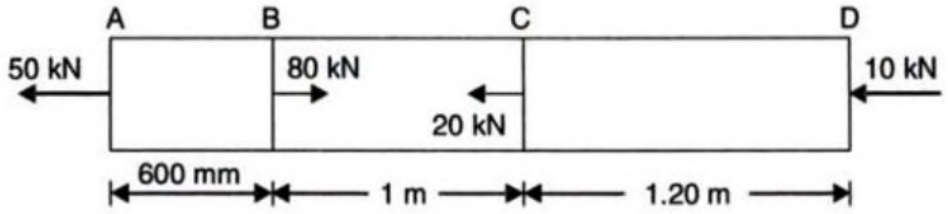
S.Y. (B.Tech.) (Civil Engineering) (Semester - I) (New) (NEP CBCS)
Examination: March/April – 2026
Structural Mechanics – I (CIVPCC-01)

Day & Date: Monday, 04-05-2026 Max. Marks: 56
Time: 03:00 PM To 06:00 PM

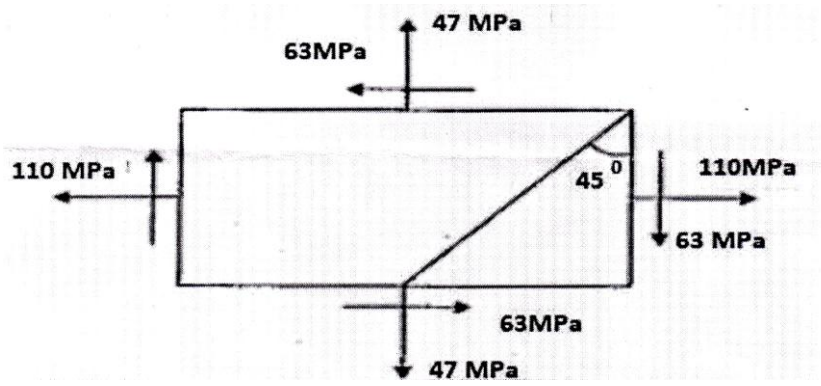
Instructions: 1) Question no. 2 is compulsory in section I, and solve any two questions from the remaining.
2) Question no. 6 is compulsory in section II, and solve any two questions from the remaining
3) Figures to the right indicates full marks.
4) Assume suitable data if necessary and mention it clearly.
5) Use of non-programmable calculators is allowed.

SECTION – I

Q.2 A brass bar having a cross-section area 1000 m^3 is subjected to axial forces as shown in fig. **10**
Find the elongation of the bar. Take E = 1.05×10^5

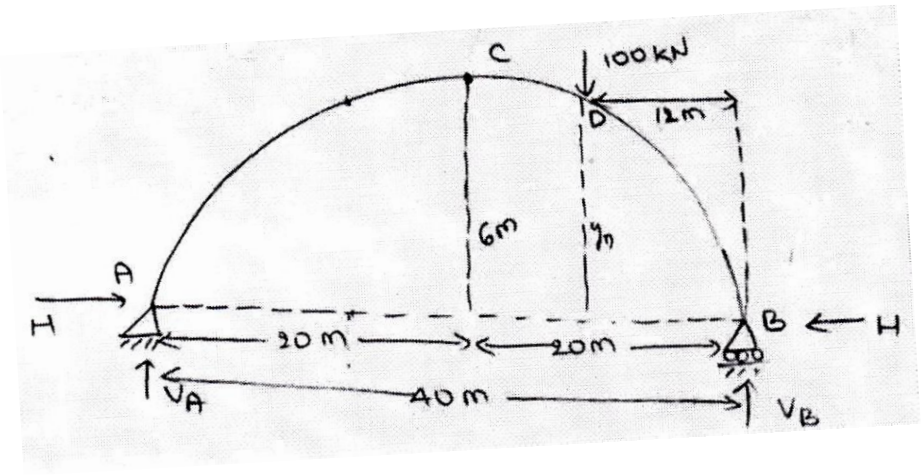


Q.3 A rectangular block of material is subjected to a tensile stress of 110 MPa on one plane and tensile stress of 47 MPa on the plane at right angles to the former. Each of the above stresses is accompanied by a shear stress of 63 MPa and that associated with the former tensile stress tends to rotate the block anticlockwise. **09**
determine the following
i) the direction and magnitude of each principal stress
ii) the magnitude of greatest shear stress.



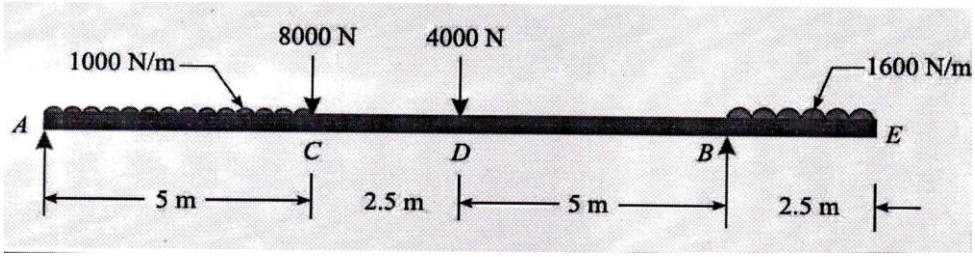
Q.4 A solid shaft of diameter 100 mm is subjected to a twisting moment of 90 MN mm and bending moment 10 MN mm at a point to determine Principal stresses and position of the plane on which they act. **09**

Q.5 A three hinged parabolic arch of span 40 meters and rise 6 meters carries a point load of 100 KN at a distance of 12m from right support. Find horizontal thrust, support reactions, Normal Thrust and Radial Shear. Normal Thrust and Radial Shear. **09**

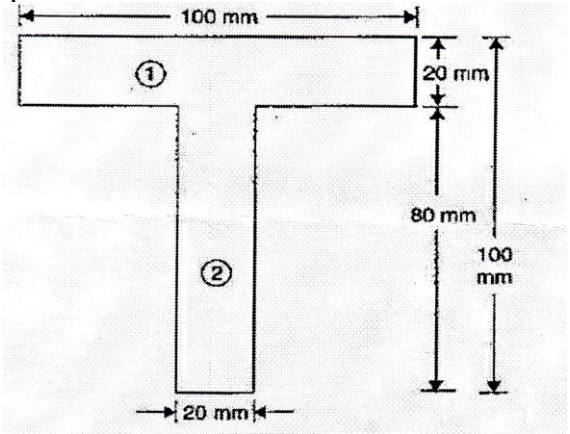


SECTION – II

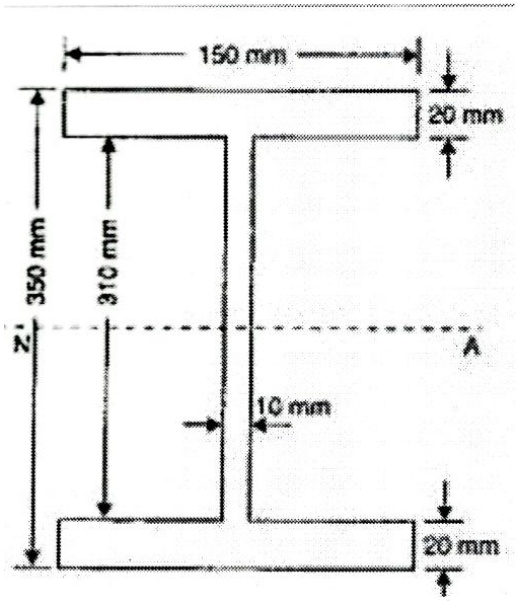
Q.6 Calculate shear force and bending moment and draw SFD and BMD. **10**



Q.7 A cast iron beam is of T-section as shown in Fig.7.21. The beam is simply supported on a span of 8 m. The beam carries a uniformly distributed load of 1.5 kN/m length on the entire span. Determine the maximum tensile and maximum compressive stresses. **09**



Q.8 An I-section beam 350 mm × 150 mm has a web thickness of 10 mm and a flange thickness of 20 mm. It carries a shearing force of 40 kN at a section. Sketch the shear stress distribution across the section. **09**



Q.9 A beam of AB of length 10 m is partly loaded with U.D.L. of 20 kN/m up to 3 m from A and a point load of 60 kN is acting at 6 m from A. Find the reaction at A and B by using an influence line diagram. **09**

Set Q

S.Y. (B.Tech.) (Civil Engineering) (Semester - I) (New) (NEP CBCS)
Examination: March/April – 2026
Structural Mechanics – I (CIVPCC-01)

Day & Date: Monday, 04-05-2026 Max. Marks: 70
Time: 03:00 PM To 06:00 PM

Instructions: 1) Q. No. 1 is compulsory. It should be solved in the first 30 minutes in Answer Book Page no 03 (Starting page of the Answer Book). Each question carries one mark.
2) Don't forget to Mention question paper set (P/Q/R/S) on top of page.
3) Figures to the right indicates full marks.
4) Assume suitable data if necessary and mention it clearly.
5) Use of non-programmable calculators is allowed.

MCQ/Objective Type Questions

Duration: 30 Minutes Marks:14

Q.1 Choose correct alternatives: **14**

1) If principal stresses in a two-dimensional case are -10 MPa and 20 MPa respectively, then maximum shear stress at the point is _____.
a) 10 MPa b) 15 MPa
c) 20 MPa d) 30 MPa

2) Modulus of rigidity is equal to _____.
a) linear stress/linear strain
b) bending stress/bending strain
c) bending strain/bending stress
d) shear stress/shear strain

3) The value on shear stress on principal plane is _____.
a) Zero b) Maximum
c) Minimum but positive d) Average value

4) For drawing ILD, what value of test load is assumed?
a) 1 unit b) Arbitrary
c) Depends upon structure d) 0

5) Shape of three hinged arch is always _____.
a) Hyperbolic b) Circular
c) Parabolic d) Can be any arbitrary curve

6) When a beam is subjected to a bending moment the bending stress in a layer is _____ the distance from the neutral axis.
a) Independent of b) Directly proportional to
c) Inversely proportional to d) None of these

7) What will be the shape of the ILD curve for vertical reaction at left support for a simply supported beam?

a) Triangular b) Rectangular
c) Trapezoidal d) Cubic curve

8) The relation between modulus of elasticity (E), modulus of rigidity (G) and bulk modulus (K) is given as _____.

a) K+G / (3K+G) b) 3KG / (3K+G)
c) 3KG / (9K+G) d) 9KG / (3K+G)

9) The ratio of stress and strain is known as _____.

a) Modulus of elasticity b) Young's modulus
c) Both a) and b) d) None of the above

10) If the cantilever beam is subjected to a point load at its free end, then the shear force under the point load is _____.

a) zero b) less than a load
c) equal to load d) more than the load

11) A column under eccentric loading is subjected to _____.

a) direct stress only b) direct and bending stress
c) bending stress only d) shear stress only

12) Shear force diagram of a cantilever beam with point load at free end is represented by _____.

a) Triangular b) Semi-circular
c) Rectangular d) Parabolic curve

13) The point of contra flexure is the point where _____.

a) B.M. changes its sign b) B.M. is minimum
c) S.F. is zero d) B.M. is maximum

14) The degree of Static indeterminacy of three hinged arch is _____.

a) 1 b) 2
c) 0 d) 3

Seat No.	

Set **Q**

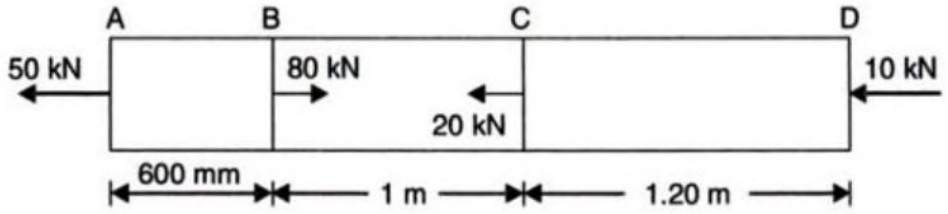
S.Y. (B.Tech.) (Civil Engineering) (Semester - I) (New) (NEP CBCS)
Examination: March/April – 2026
Structural Mechanics – I (CIVPCC-01)

Day & Date: Monday, 04-05-2026 Max. Marks: 56
Time: 03:00 PM To 06:00 PM

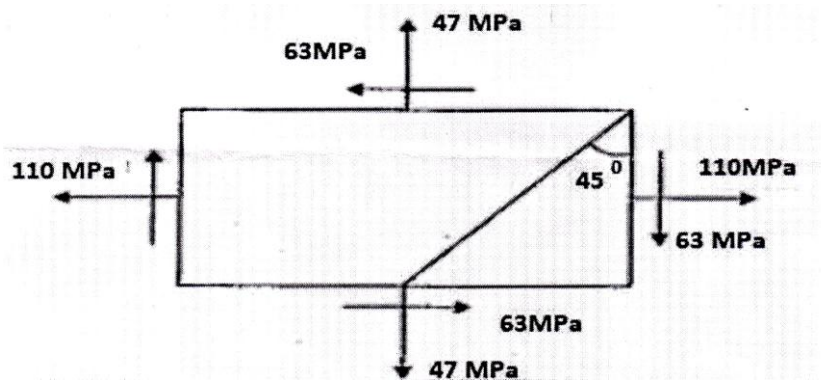
Instructions: 1) Question no. 2 is compulsory in section I, and solve any two questions from the remaining.
2) Question no. 6 is compulsory in section II, and solve any two questions from the remaining
3) Figures to the right indicates full marks.
4) Assume suitable data if necessary and mention it clearly.
5) Use of non-programmable calculators is allowed.

SECTION – I

Q.2 A brass bar having a cross-section area 1000 m^3 is subjected to axial forces as shown in fig. **10**
Find the elongation of the bar. Take E = 1.05×10^5

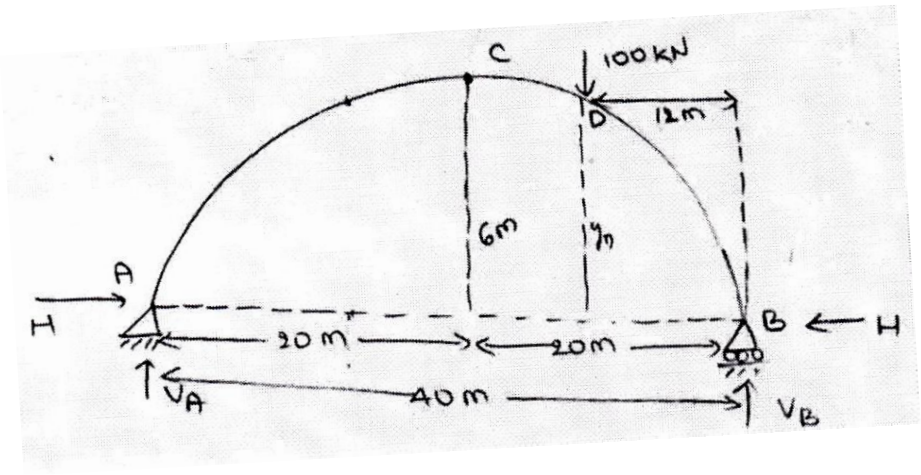


Q.3 A rectangular block of material is subjected to a tensile stress of 110 MPa on one plane and tensile stress of 47 MPa on the plane at right angles to the former. Each of the above stresses is accompanied by a shear stress of 63 MPa and that associated with the former tensile stress tends to rotate the block anticlockwise. **09**
determine the following
i) the direction and magnitude of each principal stress
ii) the magnitude of greatest shear stress.



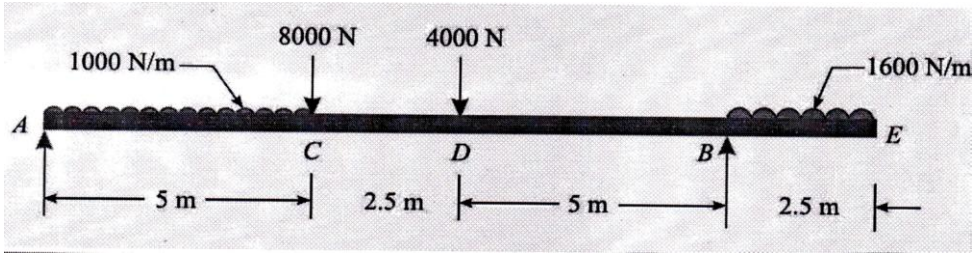
Q.4 A solid shaft of diameter 100 mm is subjected to a twisting moment of 90 MN mm and bending moment 10 MN mm at a point to determine Principal stresses and position of the plane on which they act. **09**

Q.5 A three hinged parabolic arch of span 40 meters and rise 6 meters carries a point load of 100 KN at a distance of 12m from right support. Find horizontal thrust, support reactions, Normal Thrust and Radial Shear. Normal Thrust and Radial Shear. **09**

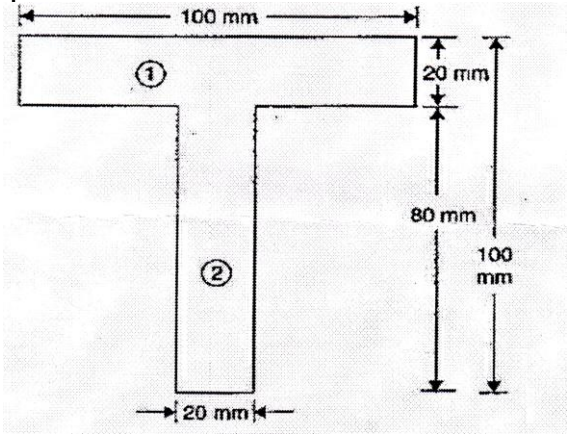


SECTION – II

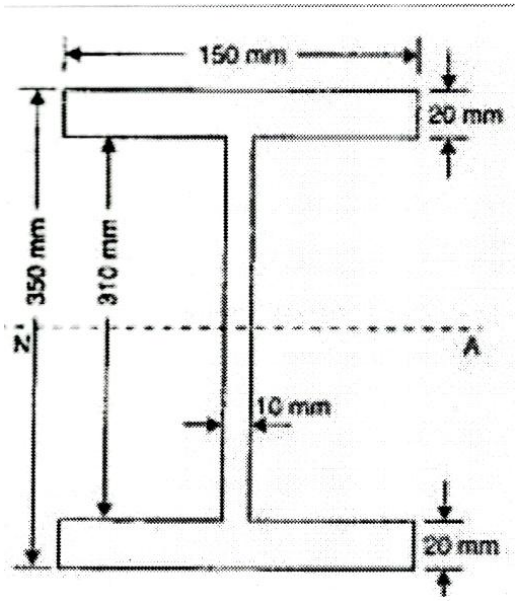
Q.6 Calculate shear force and bending moment and draw SFD and BMD. **10**



Q.7 A cast iron beam is of T-section as shown in Fig.7.21. The beam is simply supported on a span of 8 m. The beam carries a uniformly distributed load of 1.5 kN/m length on the entire span. Determine the maximum tensile and maximum compressive stresses. **09**



Q.8 An I-section beam 350 mm × 150 mm has a web thickness of 10 mm and a flange thickness of 20 mm. It carries a shearing force of 40 kN at a section. Sketch the shear stress distribution across the section. **09**



Q.9 A beam of AB of length 10 m is partly loaded with U.D.L. of 20 kN/m up to 3 m from A and a point load of 60 kN is acting at 6 m from A. Find the reaction at A and B by using an influence line diagram. **09**

1) For drawing ILD, what value of test load is assumed?
a) 1 unit b) Arbitrary
c) Depends upon structure d) 0

2) Shape of three hinged arch is always _____.
a) Hyperbolic b) Circular
c) Parabolic d) Can be any arbitrary curve

3) When a beam is subjected to a bending moment the bending stress in a layer is _____ the distance from the neutral axis.
a) Independent of b) Directly proportional to
c) Inversely proportional to d) None of these

4) What will be the shape of the ILD curve for vertical reaction at left support for a simply supported beam?
a) Triangular b) Rectangular
c) Trapezoidal d) Cubic curve

5) The relation between modulus of elasticity (E), modulus of rigidity (G) and bulk modulus (K) is given as _____.
a) K+G / (3K+G) b) 3KG / (3K+G)
c) 3KG / (9K+G) d) 9KG / (3K+G)

6) The ratio of stress and strain is known as _____.
a) Modulus of elasticity b) Young's modulus
c) Both a) and b) d) None of the above

7) If the cantilever beam is subjected to a point load at its free end, then the shear force under the point load is _____.

a) zero
b) less than a load
c) equal to load
d) more than the load

8) A column under eccentric loading is subjected to _____.

a) direct stress only
b) direct and bending stress
c) bending stress only
d) shear stress only

9) Shear force diagram of a cantilever beam with point load at free end is represented by _____.

a) Triangular
b) Semi-circular
c) Rectangular
d) Parabolic curve

10) The point of contra flexure is the point where _____.

a) B.M. changes its sign
b) B.M. is minimum
c) S.F. is zero
d) B.M. is maximum

11) The degree of Static indeterminacy of three hinged arch is _____.

a) 1
b) 2
c) 0
d) 3

12) If principal stresses in a two-dimensional case are -10 MPa and 20 MPa respectively, then maximum shear stress at the point is _____.

a) 10 MPa
b) 15 MPa
c) 20 MPa
d) 30 MPa

13) Modulus of rigidity is equal to _____.

a) linear stress/linear strain
b) bending stress/bending strain
c) bending strain/bending stress
d) shear stress/shear strain

14) The value on shear stress on principal plane is _____.

a) Zero
b) Maximum
c) Minimum but positive
d) Average value

MCQ/Objective Type Questions

Duration: 30 Minutes Marks:14

Q.1 Choose the correct alternatives from the given options. 14

1) Choose the correct statement ____.
a) All liquids are fluids but all fluids are not liquids.
b) All fluids are liquids but all liquids are not fluids.
c) All liquids are compressible.
d) All fluids are compressible.

2) If volume of fluid is increased by 2 times, then its density _____.
a) increases by 2 timers b) decreases by 2 timers
c) increase by 4 times d) decreases by 4 timers

3) A substance which can flow at its own is called _____.
a) Liquid b) Fluid
c) Gas d) All of these

4) The value of bulk modulus of elasticity _____ with increase of pressure.
a) increases b) decreases
c) either of the above d) None of the above

5) A floating body is in stable equilibrium when _____.
a) the metacentre is below its centre of gravity
b) the metacentre is above its centre of gravity
c) the metacentric height is zero.
d) its centre of gravity is below the centre of buoyancy

6) When a body is immersed in a fluid, partially or completely, the force of buoyancy is equal to _____.
a) the weight of the body
b) the weight of the volume of the fluid equal to the volume of body
c) the weight of the fluid displaced by the body
d) None of the above

7) For measurement of pressure between two points _____ is used.
a) U- tube differential manometer
b) U- tube inverted differential manometer
c) simple U- tube manometer
d) both a and b

8) The velocity with which the water approaches a notch is called _____.
a) velocity of flow
b) velocity of approach
c) velocity of whirl
d) velocity of jet

9) The growth of boundary layer is supported when _____.
a) $(\partial p/\partial x)$ is positive
b) $(\partial p/\partial x)$ is zero
c) $(\partial p/\partial x)$ is negative
d) $(\partial p/\partial x)$ is constant

10) Darcy-Weisbach equation is used to find loss of head due to _____.
a) sudden enlargement
b) sudden contraction
c) bend
d) friction

11) An error of 1% in measuring H will produce _____ error in discharge over a rectangular notch or weir.
a) 1%
b) 1.5%
c) 2%
d) 2.5%

12) Clinging nappe results due to _____.
a) Propper ventilation
b) Inadequate ventilation
c) High Flow
d) Low Flow

13) _____ of a turbine is defined as the ratio of power available at the turbine shaft to the power supplied by the water jet.
a) Mechanical efficiency
b) Hydraulic efficiency
c) Overall efficiency
d) Volumetric efficiency

14) A centrifugal pump is taking much of power, the probable reason may be _____.
a) liquid being pumped is heavy
b) speed of the pump is low
c) there is leakage of air
d) ineffective strainer and foot valve arrangement

Seat No.	

Set **P**

S.Y. (B.Tech.) (Civil Engineering) (Semester - I) (New) (NEP CBCS)
Examination: March/April – 2026
Fluid Mechanics and Machines (CIVPCC-02)

Day & Date: Wednesday, 06-05-2026 Max. Marks: 56
Time: 03:00 PM To 06:00 PM

Instructions: 1) Q.2 from section I is compulsory. Solve any Two questions from Q.3, 4, and 5.
2) Q.6 from section II is compulsory. Solve any Two questions from Q.7, 8, and 9.
3) Figures to the right indicates full marks.
4) Assume suitable data if necessary and state it clearly.

SECTION – I

Q.2 **a)** Enlist and explain different properties of fluid. **05**

b) A wooden block of rectangular section 1.25 m wide, 2 m deep, 4 m long floats horizontally in sea water. If the specific gravity of wood is 0.64 and water weighs 1 025 kg(f)/m^3, find the volume of liquid displaced and the position of the centre of buoyancy. **05**

Q.3 **a)** State and deriver Bernoulli's Theorem. Also, give its Limitations and Applications **04**

b) Calculate the capillary effect in mm in a glass tube 3 mm in diameter when immersed in (a) water (b) mercury. Both the liquids are at 20°C and the values of the surface tensions for water and mercury at 20°C in contact with air are respectively 0.0736 N/m and 0.51 N/m. Contact angle for water = 0° and for mercury = 130°. **05**

Q.4 **a)** Explain different types of pressures with neat sketch. **04**

b) Horizontal venturi meter with inlet diameter 200 mm and throat diameter 100 mm is used to measure the flow of water. The pressure at inlet is 0.18 N/mm^2 and the vacuum pressure at the throat is 280 mm of mercury. Find the rate of flow. Consider the value of Cd as 0.98. **05**

Q.5 **a)** Define and differentiate between Pascal's Law and Hydrostatic Law. **04**

b) For a two-dimensional flow $\varphi = 3xy$ and $\psi = \frac{3}{2}(y^2 - x^2)$. Determine the velocity components at the points (1, 3) and (3, 3). Also find the discharge passing between the streamlines passing through the points given above. **05**

SECTION – II

Q.6 **a)** Derive an equation for discharge through broad crested weir. Show that, for broad crested weir, maximum discharge can occur when flow depth over crest is critical. Also give advantages of triangular notch over rectangular notch **05**

b) A horizontal pipe 150 mm in diameter is joined by sudden enlargement to a 225 mm diameter pipe. Water is flowing through it at the rate of 0.05 m^3/s. determine: **05**

i) Loss of head due to abrupt expansion.
ii) Pressure difference in the two pipes, and
iii) Change in pressure if the change of section is gradual without any loss

Q.7 **a)** Explain concept of Mult staging of pump for high discharge with neat sketch. **03**

b) Find the discharge through a trapezoidal notch which is 1.2 m wide at the top and 0.50 m at the bottom and is 0.4 m in height. The head of water on the notch is 0.3 m. Assume Cd for rectangular portion = 0.62, while for triangular portion = 0.60. **06**

Q.8 **a)** Explain the concept of HGL and TEL with neat sketch. **03**

b) For the following data design, a Pelton wheel: **06**

Heat = 80 m; Speed of wheel = 280 rpm.; Shaft power of wheel = 130 kW; Speed ratio = 0.48; Co-efficient of velocity = 0.97; Overall efficiency = 82%. Design the Pelton wheel.

Q.9 **a)** Define the terms displacement thickness, momentum thickness and energy thickness. **03**

b) A 50 mm diameter jet having a velocity of 25 m/s, strikes a flat plate, the normal of which is inclined at 30° to the axis of the jet. Calculate the normal force exerted on the plate (a) when the plate is stationary, (b) when the plate is moving with a velocity of 10 m/s in the direction of the jet. **06**

MCQ/Objective Type Questions

Duration: 30 Minutes Marks:14

Q.1 Choose the correct alternatives from the given options. **14**

1) The velocity with which the water approaches a notch is called _____.
a) velocity of flow b) velocity of approach
c) velocity of whirl d) velocity of jet

2) The growth of boundary layer is supported when _____.
a) $(\partial p/\partial x)$ is positive b) $(\partial p/\partial x)$ is zero
c) $(\partial p/\partial x)$ is negative d) $(\partial p/\partial x)$ is constant

3) Darcy-Weisbach equation is used to find loss of head due to _____.
a) sudden enlargement b) sudden contraction
c) bend d) friction

4) An error of 1% in measuring H will produce _____ error in discharge over a rectangular notch or weir.
a) 1% b) 1.5%
c) 2% d) 2.5%

5) Clinging nappe results due to _____.
a) Propper ventilation b) Inadequate ventilation
c) High Flow d) Low Flow

6) _____ of a turbine is defined as the ratio of power available at the turbine shaft to the power supplied by the water jet.
a) Mechanical efficiency b) Hydraulic efficiency
c) Overall efficiency d) Volumetric efficiency

7) A centrifugal pump is taking much of power, the probable reason may be _____.
   a) liquid being pumped is heavy
   b) speed of the pump is low
   c) there is leakage of air
   d) ineffective strainer and foot valve arrangement

8) Choose the correct statement ____.
   a) All liquids are fluids but all fluids are not liquids.
   b) All fluids are liquids but all liquids are not fluids.
   c) All liquids are compressible.
   d) All fluids are compressible.

9) If volume of fluid is increased by 2 times, then its density _____.
   a) increases by 2 timers
   b) decreases by 2 timers
   c) increase by 4 times
   d) decreases by 4 timers

10) A substance which can flow at its own is called _____.
   a) Liquid
   b) Fluid
   c) Gas
   d) All of these

11) The value of bulk modulus of elasticity _____ with increase of pressure.
   a) increases
   b) decreases
   c) either of the above
   d) None of the above

12) A floating body is in stable equilibrium when _____.
   a) the metacentre is below its centre of gravity
   b) the metacentre is above its centre of gravity
   c) the metacentric height is zero.
   d) its centre of gravity is below the centre of buoyancy

13) When a body is immersed in a fluid, partially or completely, the force of buoyancy is equal to _____.
   a) the weight of the body
   b) the weight of the volume of the fluid equal to the volume of body
   c) the weight of the fluid displaced by the body
   d) None of the above

14) For measurement of pressure between two points _____ is used.
   a) U- tube differential manometer
   b) U- tube inverted differential manometer
   c) simple U- tube manometer
   d) both a and b

Set Q

S.Y. (B.Tech.) (Civil Engineering) (Semester - I) (New) (NEP CBCS)
Examination: March/April – 2026
Fluid Mechanics and Machines (CIVPCC-02)

Day & Date: Wednesday, 06-05-2026 Max. Marks: 56
Time: 03:00 PM To 06:00 PM

Instructions: 1) Q.2 from section I is compulsory. Solve any Two questions from Q.3, 4, and 5.
2) Q.6 from section II is compulsory. Solve any Two questions from Q.7, 8, and 9.
3) Figures to the right indicates full marks.
4) Assume suitable data if necessary and state it clearly.

SECTION – I

Q.2 **a)** Enlist and explain different properties of fluid. **05**

b) A wooden block of rectangular section 1.25 m wide, 2 m deep, 4 m long floats horizontally in sea water. If the specific gravity of wood is 0.64 and water weighs 1 025 kg(f)/m^3, find the volume of liquid displaced and the position of the centre of buoyancy. **05**

Q.3 **a)** State and deriver Bernoulli's Theorem. Also, give its Limitations and Applications **04**

b) Calculate the capillary effect in mm in a glass tube 3 mm in diameter when immersed in (a) water (b) mercury. Both the liquids are at 20°C and the values of the surface tensions for water and mercury at 20°C in contact with air are respectively 0.0736 N/m and 0.51 N/m. Contact angle for water = 0° and for mercury = 130°. **05**

Q.4 **a)** Explain different types of pressures with neat sketch. **04**

b) Horizontal venturi meter with inlet diameter 200 mm and throat diameter 100 mm is used to measure the flow of water. The pressure at inlet is 0.18 N/mm^2 and the vacuum pressure at the throat is 280 mm of mercury. Find the rate of flow. Consider the value of Cd as 0.98. **05**

Q.5 **a)** Define and differentiate between Pascal's Law and Hydrostatic Law. **04**

b) For a two-dimensional flow $\varphi = 3xy$ and $\psi = \frac{3}{2}(y^2 - x^2)$. Determine the velocity components at the points (1, 3) and (3, 3). Also find the discharge passing between the streamlines passing through the points given above. **05**

SECTION – II

Q.6 **a)** Derive an equation for discharge through broad crested weir. Show that, for broad crested weir, maximum discharge can occur when flow depth over crest is critical. Also give advantages of triangular notch over rectangular notch **05**

b) A horizontal pipe 150 mm in diameter is joined by sudden enlargement to a 225 mm diameter pipe. Water is flowing through it at the rate of 0.05 m^3/s. determine: **05**

i) Loss of head due to abrupt expansion.
ii) Pressure difference in the two pipes, and
iii) Change in pressure if the change of section is gradual without any loss

Q.7 **a)** Explain concept of Mult staging of pump for high discharge with neat sketch. **03**

b) Find the discharge through a trapezoidal notch which is 1.2 m wide at the top and 0.50 m at the bottom and is 0.4 m in height. The head of water on the notch is 0.3 m. Assume Cd for rectangular portion = 0.62, while for triangular portion = 0.60. **06**

Q.8 **a)** Explain the concept of HGL and TEL with neat sketch. **03**

b) For the following data design, a Pelton wheel: **06**

Heat = 80 m; Speed of wheel = 280 rpm.; Shaft power of wheel = 130 kW; Speed ratio = 0.48; Co-efficient of velocity = 0.97; Overall efficiency = 82%. Design the Pelton wheel.

Q.9 **a)** Define the terms displacement thickness, momentum thickness and energy thickness. **03**

b) A 50 mm diameter jet having a velocity of 25 m/s, strikes a flat plate, the normal of which is inclined at 30° to the axis of the jet. Calculate the normal force exerted on the plate (a) when the plate is stationary, (b) when the plate is moving with a velocity of 10 m/s in the direction of the jet. **06**

Set R

S.Y. (B.Tech.) (Civil Engineering) (Semester - I) (New) (NEP CBCS)
Examination: March/April – 2026
Fluid Mechanics and Machines (CIVPCC-02)

Day & Date: Wednesday, 06-05-2026 Max. Marks: 70
Time: 03:00 PM To 06:00 PM

Instructions: 1) Q. No. 1 is compulsory. It should be solved in the first 30 minutes in Answer Book Page no 03 (Starting page of the Answer Book). Each question carries one mark
2) Don't forget to Mention question paper set (P/Q/R/S) on top on page.
3) Figures to the right indicates full marks.
4) Assume suitable data if necessary and state it clearly.

MCQ/Objective Type Questions

Duration: 30 Minutes Marks:14

Q.1 Choose the correct alternatives from the given options. 14

1) An error of 1% in measuring H will produce _____ error in discharge over a rectangular notch or weir.
a) 1% b) 1.5%
c) 2% d) 2.5%

2) Clinging nappe results due to _____.
a) Propper ventilation b) Inadequate ventilation
c) High Flow d) Low Flow

3) _____ of a turbine is defined as the ratio of power available at the turbine shaft to the power supplied by the water jet.
a) Mechanical efficiency b) Hydraulic efficiency
c) Overall efficiency d) Volumetric efficiency

4) A centrifugal pump is taking much of power, the probable reason may be _____.
a) liquid being pumped is heavy
b) speed of the pump is low
c) there is leakage of air
d) ineffective strainer and foot valve arrangement

5) Choose the correct statement ____.
a) All liquids are fluids but all fluids are not liquids.
b) All fluids are liquids but all liquids are not fluids.
c) All liquids are compressible.
d) All fluids are compressible.

6) If volume of fluid is increased by 2 times, then its density _____.
a) increases by 2 timers
b) decreases by 2 timers
c) increase by 4 times
d) decreases by 4 timers

7) A substance which can flow at its own is called _____.
a) Liquid
b) Fluid
c) Gas
d) All of these

8) The value of bulk modulus of elasticity _____ with increase of pressure.
a) increases
b) decreases
c) either of the above
d) None of the above

9) A floating body is in stable equilibrium when _____.
a) the metacentre is below its centre of gravity
b) the metacentre is above its centre of gravity
c) the metacentric height is zero.
d) its centre of gravity is below the centre of buoyancy

10) When a body is immersed in a fluid, partially or completely, the force of buoyancy is equal to _____.
a) the weight of the body
b) the weight of the volume of the fluid equal to the volume of body
c) the weight of the fluid displaced by the body
d) None of the above

11) For measurement of pressure between two points _____ is used.
a) U- tube differential manometer
b) U- tube inverted differential manometer
c) simple U- tube manometer
d) both a and b

12) The velocity with which the water approaches a notch is called _____.
a) velocity of flow
b) velocity of approach
c) velocity of whirl
d) velocity of jet

13) The growth of boundary layer is supported when _____.
a) $(\partial p/\partial x)$ is positive
b) $(\partial p/\partial x)$ is zero
c) $(\partial p/\partial x)$ is negative
d) $(\partial p/\partial x)$ is constant

14) Darcy-Weisbach equation is used to find loss of head due to _____.
a) sudden enlargement
b) sudden contraction
c) bend
d) friction

MCQ/Objective Type Questions

Duration: 30 Minutes Marks:14

Q.1 Choose the correct alternatives from the options. **14**

1) At what angle does a ridge line intersect contours?
a) 90° b) 45°
c) 30° d) 0°

2) For mountainous region, a suitable contour interval may be _____.
a) 0.2 m b) 2 m
c) 20 m d) 200 m

3) In a closed traverse, the algebraic sum of departure and latitude must be equal to _____.
a) 90° b) 180°
c) 0° d) 270°

4) The characteristic of Gale's table is that the independent coordinates of all points are brought to the _____.
a) Fourth quadrant b) First quadrant
c) Third quadrant d) Second quadrant

5) Which of the following indicates the correct set of the combination of total station?
a) Theodolite, compass b) Theodolite, EDM
c) Electronic theodolite, EDM d) EDM, GPS

6) Which property of an electromagnetic wave, depends on the medium in which it is travelling?
a) Velocity b) Frequency
c) Time period d) Wave length

7) The speed of light is _____.
a) 3×10^8 m/s
b) 2×10^8 m/s
c) 3×10^9 m/s
d) 2×10^9 m/s

8) Satellite on-board _____.
a) quartz clock
b) atomic clock
c) stop watch
d) digital clock

9) Vertical photographs do not represent the true plan of the ground because of _____.
a) variation in speed of aircraft
b) ground relief
c) tilt displacement
d) image displacement

10) Which of the following factors does not contribute towards accurate photo-interpretation?
a) Knowledge of the area
b) Skill and ingenuity
c) Incorrect interpretation of size
d) None

11) Cell-like units are characteristic of _____.
a) raster data structures
b) cellular data structures
c) both a) and b)
d) vector data structures

12) The graphical elements of vector data structures are _____.
a) point
b) arc
c) area
d) All of these

13) Setting out is done ____.
a) prior to the preparation of plans
b) along with the preparation of plans
c) after the preparation of plans
d) if obstructions are there

d) Describe the Construction (components) of Total station.

e) Discuss the procedure for Area Measurement using a Total Station.

f) Describe the Construction (components) of Laser level.

SECTION – II

Q.4 Describe a detailed note on. **12**

a) GPS receivers and their comparison

b) Flight Planning

c) Difference between Digitizer and Scanner

Q.5 Answer any Four from the following. **16**

a) Differentiate between Static GPS and Differential GPS methods.

b) With the help diagram, explain the process of satellite remote sensing.

c) Describe in detail the Project Survey for Canal.

d) Write a short note on Unmanned Aerial Vehicle (Drone) used in Remote sensing.

e) Explain Project Survey for Building Lineout.

f) What are the different Application of GIS?

Surveying and Geomatics (CIVPCC-03)

Day & Date: Friday, 08-05-2026 Max. Marks: 70
Time: 03:00 PM To 06:00 PM

Instructions: 1) Q. No. 1 is compulsory. It should be solved in the first 30 minutes in Answer Book Page no 03 (Starting page of the Answer Book). Each question carries one mark
2) Don't forget to Mention question paper set (P/Q/R/S) on top on page.
3) Figures to the right indicates full marks.
4) Make suitable data wherever needed and state them clearly.

MCQ/Objective Type Questions

Duration: 30 Minutes Marks:14

Q.1 Choose the correct alternatives from the options. **14**

1) Cell-like units are characteristic of _____.
a) raster data structures b) cellular data structures
c) both a) and b) d) vector data structures

2) The graphical elements of vector data structures are _____.
a) point b) arc
c) area d) All of these

3) Setting out is done ____.
a) prior to the preparation of plans
b) along with the preparation of plans
c) after the preparation of plans
d) if obstructions are there

4) Microprocessor controls working of a total station through _____.
a) measurements b) data collector
c) control panel d) memory

5) At what angle does a ridge line intersect contours?
a) 90° b) 45°
c) 30° d) 0°

6) For mountainous region, a suitable contour interval may be _____.
a) 0.2 m b) 2 m
c) 20 m d) 200 m

7) In a closed traverse, the algebraic sum of departure and latitude must be equal to _____.
a) 90° b) 180°
c) 0° d) 270°

8) The characteristic of Gale's table is that the independent coordinates of all points are brought to the _____.

a) Fourth quadrant b) First quadrant
c) Third quadrant d) Second quadrant

9) Which of the following indicates the correct set of the combination of total station?

a) Theodolite, compass b) Theodolite, EDM
c) Electronic theodolite, EDM d) EDM, GPS

10) Which property of an electromagnetic wave, depends on the medium in which it is travelling?

a) Velocity b) Frequency
c) Time period d) Wave length

11) The speed of light is _____.

a) 3×10^8 m/s b) 2×10^8 m/s
c) 3×10^9 m/s d) 2×10^9 m/s

12) Satellite on-board _____.

a) quartz clock b) atomic clock
c) stop watch d) digital clock

13) Vertical photographs do not represent the true plan of the ground because of _____.

a) variation in speed of aircraft b) ground relief
c) tilt displacement d) image displacement

14) Which of the following factors does not contribute towards accurate photo-interpretation?

a) Knowledge of the area
b) Skill and ingenuity
c) Incorrect interpretation of size
d) None

3) Figures to the right indicates full marks.

MCQ/Objective Type Questions

Duration: 30 Minutes Marks: 14

Q.1 Choose the correct alternative from the given option. 14

1) If a linear differential equation with constant coefficients and r.h.s. equal to zero has a real root m_1 repeated two times, then the corresponding part of the integral is _____.

a) $(c_1 + c_2)e^{m_1 x}$ b) $(c_1 x + c_2 x)e^{m_1 x}$

c) $(c_1 x + c_2 x^2)e^{m_1 x}$ d) $(c_1 + c_2 x)e^{m_1 x}$

2) $\frac{1}{D-a} X$ is equal to _____.

a) $\int Xe^{ax}dx$ b) $e^{ax}\int X.e^{-ax}dx$

c) $\int Xe^{-ax}dx$ d) $e^{-ax}\int Xe^{-ax}dx$

3) $\frac{1}{D+1}(\log x + \frac{1}{x})$ is equal to _____.

a) e^x b) 1

c) x d) $\log x$

4) The solution of the equation $\sqrt{p} + \sqrt{q} = 1$ is _____.

a) $z = ax + ay + c$ b) $z = ax + a^2 y + c$

c) $z = ax + \left(1 - \sqrt{a}\right)^2 y + c$ d) None of these

5) The solution of $p + q = 1$ is _____.

a) $z = ax + (1 - a)y + c$ b) $z = ax + by + c$

c) $z = ax + b(1 - y) + c$ d) $z = a(1 - x) + b(1 - y) + c$

6) If μ_1', μ_2', μ_3' are the first three moments of the distribution about certain number then third moment μ_3 of the distribution about the arithmetic mean is given by _____.

a) $\mu_3' - 3\mu_2'\mu_1' + 2(\mu_1')^3$ b) $\mu_3' - 3\mu_1' + (\mu_2')^3$

c) $\mu_3' + 2\mu_2'\mu_1' + (\mu_3')^3$ d) $\mu_3' + 3\mu_2'\mu_1' + {\mu_1'}^2$

7) Coefficient of kurtosis β_1 is given by _____.

a) $\frac{\mu_4}{\mu_3}$ b) $\frac{\mu_4}{\mu_2^2}$

c) $\frac{\mu_3^2}{\mu_2^3}$ d) $\frac{\mu_4}{\mu_2^3}$

8) If value of x for normal distribution is 35, mean of normal distribution is 65 and standard deviation is 25 then standardized random variable is _____.

a) -1.5 b) -1.7

c) -1.2 d) -4

9) A continuous random variable has the following probability density function $f(x) = kx(1-x), 0 \leq x \leq 1$ then $k =$ _____.

a) 2 b) 6

c) 3 d) 5

10) The area under the standard normal curve from $z = -\infty$ to $z = 0$ is _____.

a) 1 b) $1/2$

c) $3/2$ d) 0

11) If X, Y denote the deviation from their means and if $\sum X^2 = 80, \sum Y^2 = 50$ & $\sum XY = 60$ and $r =$_____.

a) 0.65 b) 0.78

c) 0.81 d) 0.95

12) If two regression lines are co-incides then the coefficient of correlation is _____.

a) 0 b) -1

c) ± 1 d) 1

13) If $\bar{x}$ is the mean of the random sample of size n taken from a population of size N having mean μ and standard deviation σ then mean and variance of the distribution $\bar{x}$ are _____.

a) $\bar{x}, \sigma^2$

b) $\bar{x}, \frac{\sigma^2}{n}$

c) μ, σ^2

d) μ, and $\frac{\sigma^2}{n}$

14) χ^2 distribution is defined by _____.

a) $\sum \frac{(O-E)}{E}$

b) $\sum \frac{(O-E)}{E^2}$

c) $\sum \left(\frac{O-E}{E}\right)^2$

d) $\sum \frac{(O-E)^2}{E}$

Set P

S.Y. (B.Tech.) (Civil Engineering) (Semester - I) (New) (NEP CBCS)
Examination: March-April/2026
Advanced Mathematics and Statistics (OE-01A)

Day & Date: Monday, 11-05-2026 Max. Marks: 56
Time: 03:00 PM To 06:00 PM

Instructions: 1) All question are compulsory.
2) Figures to the right indicate full marks.

SECTION – I

Q.2 Attempt Any Three. **09**

a) Find the Arithmetic mean, Median and standard deviation for the following frequency distribution.

x:	5	9	12	15	20	24	30	35	42	49
f:	3	6	8	8	9	10	8	7	6	2

b) Solve: $(D^2+1)y = x^2\cos 3x$

c) Solve: $(D^2-4D+4)y = 8.x^2e^{2x}\sin 2x$

d) Calculate the first four moments about the mean of the given distribution. Also find β_1, β_2

x	2.0	2.5	3.0	3.5	4.0	4.5	5.0
f	4	36	60	90	70	40	10

e) Solve $yzp + 2xq = xy$

Q.3 Attempt Any Three. **09**

a) Solve $\frac{d^2y}{dx^2} + 3\frac{dy}{dx} + 2y = 2e^{2x}$

b) Solve $p - q = x^2 + y^2$

c) Find the median of the following frequency distribution.

x	1	3	5	7	9	11	13	15	17
f	3	6	8	12	16	16	15	10	5

d) Solve $x(y-z)p + y(z-x)q = z(x-y)$

e) Solve $(D^3 - 3D + 2)y = x$

Q.4 Attempt Any Two. **10**

a) The first four moments of a distribution about the value 5 are $2, 20, 40$ and 50, from the given information obtain the first four central moments, Standard deviation and coefficient of skewness and kurtosis.

b) Solve the following differential equations by method of separation of variables.

$$3\frac{\partial u}{\partial x} + 2\frac{\partial u}{\partial y} = 0, \text{ given } u(x, 0) = 4e^{-x}$$

c) Solve $\frac{d^2y}{dx^2} + 3\frac{dy}{dx} + 2y = e^{e^x}$

SECTION – II

Q.5 Attempt Any Three. **09**

a) Find the value of k if each of the following functions is a probability density function.

$$f(x) = \begin{cases} kx^2(1 - x^3) & , \quad 0 \leq x \leq 1 \\ 0 & , \quad \text{otherwise} \end{cases}$$

b) The mean life time of 100 fluorescent light bulbs produced by a Company is computed to be 1570 Hrs. with S.D. of 120 Hrs. If μ is the mean lifetime of all the bulbs produced by the Company, Test the Hypothesis $\mu = 1600$ Hrs. against the alternative Hypothesis $\mu \neq 1600$ Hrs. using 5% level of Significance.
(Given Expected value at 5% LOS is 1.96)

c) Fit a Straight line $y = a + bx$ to the following data.

x	0	5	10	15	20	25
y	12	15	17	22	24	30

d) Two independent random sample have the following data.
$\overline{x_1} = 110, \sigma_1 = 25, n_1 = 16$
$\overline{x_2} = 120, \sigma_2 = 30, n_2 = 9$
If σ_1 and σ_2 are the S. D. of the populations. Test the hypothesis that $\mu_1 = \mu_2$ at 5% level of significance.
(The table value of t at $\alpha = 0.05$ for $v = 23$ degrees of freedom is 2.069)

e) If the probability of defective bulbs is 0.2, find the mean and variance of the distribution of defective bulbs in a lot of 1000 bulbs.

Q.6 Attempt Any Three. **09**

a) If two independent random samples of sizes 15 and 8 have respectively the following mean and population standard deviations, $\overline{x_1} = 980, \overline{x_2} = 1012; \sigma_1 = 75, \sigma_2 = 80$. Test the hypothesis that $\mu_1 = \mu_2$ at 5% level of significance.
(Given Expected value at 5% LOS with 21 DF is 2.080)

b) The number of telephone calls received by an operator in a ten-minute interval follows a Poisson distribution with mean 1. What is the probability of receiving (i) no call, (ii) less than four calls, in the interval? What is the most likely number of calls?

c) Calculate the Coefficient of correlations between x and y from the following data
$n = 25, \sum x = 100, \sum x^2 = 950, \sum y = 110, \sum y^2 = 850, \sum x\,y = 800$

d) Monthly salaries of 1000 workers have a normal distribution with mean of Rs. 575 and a standard deviation of Rs. 75. Find the number of workers having salaries between Rs. 500 and Rs. 625 p.m. Also find the minimum salary of the highest paid 200 workers.
(Given: For a standard normal variate
i) area between $t = 0$ and $t = 1$ is 0.3413,
ii) area between $t = 0$ and $t = 0.67$ is 0.2486,
iii) area between $t = 0$ and $t = 0.84$ is 0.3)

e) Obtain a second-degree curve to the following data and estimate the production in 1975.

Year	1921	1931	1941	1951	1961	1971	1981
Prod. (m. tons)	3	5	9	10	12	14	15

Q.7 Attempt Any Two. **10**

a) Fit a Binomial distribution to the following data,

Value of x	0	1	2	3	4	5	6
Frequency f	6	20	28	12	8	6	0

b) Calculate the lines of regression from the following table, gives the marks obtained by a class of students in two special papers.

Paper I	80	45	55	56	58	60	65	68	70	75	85
Paper II	82	56	50	48	60	62	64	65	70	74	90

c) Ten school boys were given a test in Statistics and their scores were recorded. They were given a month's special coaching and a second test was given to them in the same subject at the end of the coaching period. Test if the marks given below give evidence to the fact that the students are benefitted by coaching.

Marks in test I:	70	68	56	75	80	90	68	75	56	58
Marks in Test II:	68	70	52	73	75	78	80	92	54	55

(Given that value of t_α at 5% LOS for $v = 9$ degrees of freedom is 1.86 for one tailed test)

S.Y. (B.Tech.) (Civil Engineering) (Semester - I) (New) (NEP CBCS)
Examination: March/April-2026
Advanced Mathematics and Statistics (OE-01A)

Day & Date: Monday, 11-05-2026 Max. Marks: 70
Time: 03:00 PM To 06:00 PM

Instructions: 1) Q. No. 1 is compulsory. It should be solved in the first 30 minutes in Answer Book Page no 03 (Starting page of the Answer Book). Each question carries one mark.
2) Don't forget to Mention question paper set (P/Q/R/S) on top of page.
3) Figures to the right indicates full marks.

MCQ/Objective Type Questions

Duration: 30 Minutes Marks: 14

Q.1 Choose the correct alternative from the given option. 14

1) If value of x for normal distribution is 35, mean of normal distribution is 65 and standard deviation is 25 then standardized random variable is _____.

a) -1.5 b) -1.7
c) -1.2 d) -4

2) A continuous random variable has the following probability density function $f(x) = kx(1-x), 0 \leq x \leq 1$ then $k =$ _____.

a) 2 b) 6
c) 3 d) 5

3) The area under the standard normal curve from $z = -\infty$ to $z = 0$ is _____.

a) 1 b) $1/2$
c) $3/2$ d) 0

4) If X, Y denote the deviation from their means and if $\sum X^2 = 80, \sum Y^2 = 50$ & $\sum XY = 60$ and $r =$_____.

a) 0.65 b) 0.78
c) 0.81 d) 0.95

5) If two regression lines are co-incides then the coefficient of correlation is _____.

a) 0 b) -1
c) ± 1 d) 1

6) If $\bar{x}$ is the mean of the random sample of size n taken from a population of size N having mean μ and standard deviation σ then mean and variance of the distribution $\bar{x}$ are _____.

a) $\bar{x}, \sigma^2$ b) $\bar{x}, \frac{\sigma^2}{n}$

c) μ, σ^2 d) μ, and $\frac{\sigma^2}{n}$

7) χ^2 distribution is defined by _____.

a) $\sum \frac{(O-E)}{E}$ b) $\sum \frac{(O-E)}{E^2}$

c) $\sum \left(\frac{O-E}{E}\right)^2$ d) $\sum \frac{(O-E)^2}{E}$

8) If a linear differential equation with constant coefficients and r.h.s. equal to zero has a real root m_1 repeated two times, then the corresponding part of the integral is _____.

a) $(c_1 + c_2)e^{m_1 x}$ b) $(c_1 x + c_2 x)e^{m_1 x}$

c) $(c_1 x + c_2 x^2)e^{m_1 x}$ d) $(c_1 + c_2 x)e^{m_1 x}$

9) $\frac{1}{D-a} X$ is equal to _____.

a) $\int X e^{ax} dx$ b) $e^{ax} \int X . e^{-ax} dx$

c) $\int X e^{-ax} dx$ d) $e^{-ax} \int X e^{-ax} dx$

10) $\frac{1}{D+1}(\log x + \frac{1}{x})$ is equal to _____.

a) e^x b) 1

c) x d) $\log x$

11) The solution of the equation $\sqrt{p} + \sqrt{q} = 1$ is _____.

a) $z = ax + ay + c$ b) $z = ax + a^2 y + c$

c) $z = ax + \left(1 - \sqrt{a}\right)^2 y + c$ d) None of these

12) The solution of $p + q = 1$ is _____.

a) $z = ax + (1-a)y + c$ b) $z = ax + by + c$

c) $z = ax + b(1-y) + c$ d) $z = a(1-x) + b(1-y) + c$

13) If μ_1', μ_2', μ_3' are the first three moments of the distribution about certain number then third moment μ_3 of the distribution about the arithmetic mean is given by _____.

a) $\mu_3' - 3\mu_2'\mu_1' + 2(\mu_1')^3$ b) $\mu_3' - 3\mu_1' + (\mu_2')^3$

c) $\mu_3' + 2\mu_2'\mu_1' + (\mu_3')^3$ d) $\mu_3' + 3\mu_2'\mu_1' + {\mu_1'}^2$

14) Coefficient of kurtosis β_1 is given by _____.

a) $\frac{\mu_4}{\mu_3}$

b) $\frac{\mu_4}{\mu_2^2}$

c) $\frac{\mu_3^2}{\mu_2^3}$

d) $\frac{\mu_4}{\mu_2^3}$

Q.2 Attempt Any Three. **09**

a) Find the Arithmetic mean, Median and standard deviation for the following frequency distribution.

x:	5	9	12	15	20	24	30	35	42	49
f:	3	6	8	8	9	10	8	7	6	2

b) Solve: $(D^2+1)y = x^2\cos 3x$

c) Solve: $(D^2-4D+4)y = 8.x^2e^{2x}\sin 2x$

d) Calculate the first four moments about the mean of the given distribution. Also find β_1, β_2

x	2.0	2.5	3.0	3.5	4.0	4.5	5.0
f	4	36	60	90	70	40	10

e) Solve $yzp + 2xq = xy$

Q.3 Attempt Any Three. **09**

a) Solve $\frac{d^2y}{dx^2} + 3\frac{dy}{dx} + 2y = 2e^{2x}$

b) Solve $p - q = x^2 + y^2$

c) Find the median of the following frequency distribution.

x	1	3	5	7	9	11	13	15	17
f	3	6	8	12	16	16	15	10	5

d) Solve $x(y-z)p + y(z-x)q = z(x-y)$

e) Solve $(D^3 - 3D + 2)y = x$

Q.4 Attempt Any Two. **10**

a) The first four moments of a distribution about the value 5 are $2, 20, 40$ and 50, from the given information obtain the first four central moments, Standard deviation and coefficient of skewness and kurtosis.

b) Solve the following differential equations by method of separation of variables.

$$3\frac{\partial u}{\partial x} + 2\frac{\partial u}{\partial y} = 0, \text{ given } u(x, 0) = 4e^{-x}$$

c) Solve $\frac{d^2y}{dx^2} + 3\frac{dy}{dx} + 2y = e^{e^x}$

SECTION – II

Q.5 Attempt Any Three. **09**

a) Find the value of k if each of the following functions is a probability density function.

$$f(x) = \begin{cases} kx^2(1 - x^3) & , \quad 0 \leq x \leq 1 \\ 0 & , \quad \text{otherwise} \end{cases}$$

b) The mean life time of 100 fluorescent light bulbs produced by a Company is computed to be 1570 Hrs. with S.D. of 120 Hrs. If μ is the mean lifetime of all the bulbs produced by the Company, Test the Hypothesis $\mu = 1600$ Hrs. against the alternative Hypothesis $\mu \neq 1600$ Hrs. using 5% level of Significance.
(Given Expected value at 5% LOS is 1.96)

c) Fit a Straight line $y = a + bx$ to the following data.

x	0	5	10	15	20	25
y	12	15	17	22	24	30

d) Two independent random sample have the following data.
$\overline{x_1} = 110, \sigma_1 = 25, n_1 = 16$
$\overline{x_2} = 120, \sigma_2 = 30, n_2 = 9$
If σ_1 and σ_2 are the S. D. of the populations. Test the hypothesis that $\mu_1 = \mu_2$ at 5% level of significance.
(The table value of t at $\alpha = 0.05$ for $v = 23$ degrees of freedom is 2.069)

e) If the probability of defective bulbs is 0.2, find the mean and variance of the distribution of defective bulbs in a lot of 1000 bulbs.

Q.6 Attempt Any Three. **09**

a) If two independent random samples of sizes 15 and 8 have respectively the following mean and population standard deviations, $\overline{x_1} = 980, \overline{x_2} = 1012; \sigma_1 = 75, \sigma_2 = 80$. Test the hypothesis that $\mu_1 = \mu_2$ at 5% level of significance.
(Given Expected value at 5% LOS with 21 DF is 2.080)

b) The number of telephone calls received by an operator in a ten-minute interval follows a Poisson distribution with mean 1. What is the probability of receiving (i) no call, (ii) less than four calls, in the interval? What is the most likely number of calls?

c) Calculate the Coefficient of correlations between x and y from the following data
$n = 25, \sum x = 100, \sum x^2 = 950, \sum y = 110, \sum y^2 = 850, \sum x\,y = 800$

d) Monthly salaries of 1000 workers have a normal distribution with mean of Rs. 575 and a standard deviation of Rs. 75. Find the number of workers having salaries between Rs. 500 and Rs. 625 p.m. Also find the minimum salary of the highest paid 200 workers.
(Given: For a standard normal variate
i) area between $t = 0$ and $t = 1$ is 0.3413,
ii) area between $t = 0$ and $t = 0.67$ is 0.2486,
iii) area between $t = 0$ and $t = 0.84$ is 0.3)

e) Obtain a second-degree curve to the following data and estimate the production in 1975.

Year	1921	1931	1941	1951	1961	1971	1981
Prod. (m. tons)	3	5	9	10	12	14	15

Q.7 Attempt Any Two. **10**

a) Fit a Binomial distribution to the following data,

Value of x	0	1	2	3	4	5	6
Frequency f	6	20	28	12	8	6	0

b) Calculate the lines of regression from the following table, gives the marks obtained by a class of students in two special papers.

Paper I	80	45	55	56	58	60	65	68	70	75	85
Paper II	82	56	50	48	60	62	64	65	70	74	90

c) Ten school boys were given a test in Statistics and their scores were recorded. They were given a month's special coaching and a second test was given to them in the same subject at the end of the coaching period. Test if the marks given below give evidence to the fact that the students are benefitted by coaching.

Marks in test I:	70	68	56	75	80	90	68	75	56	58
Marks in Test II:	68	70	52	73	75	78	80	92	54	55

(Given that value of t_α at 5% LOS for $v = 9$ degrees of freedom is 1.86 for one tailed test)

Seat No.	

Set **R**

S.Y. (B.Tech.) (Civil Engineering) (Semester - I) (New) (NEP CBCS)
Examination: March/April-2026
Advanced Mathematics and Statistics (OE-01A)

Day & Date: Monday, 11-05-2026 Max. Marks: 70
Time: 03:00 PM To 06:00 PM

Instructions: 1) Q. No. 1 is compulsory. It should be solved in the first 30 minutes in Answer Book Page no 03 (Starting page of the Answer Book). Each question carries one mark.
2) Don't forget to Mention question paper set (P/Q/R/S) on top of page.
3) Figures to the right indicates full marks.

MCQ/Objective Type Questions

Duration: 30 Minutes Marks: 14

Q.1 Choose the correct alternative from the given option. **14**

1) If X, Y denote the deviation from their means and if $\sum X^2 = 80, \sum Y^2 = 50$ & $\sum XY = 60$ and $r =$_____.

a) 0.65 b) 0.78
c) 0.81 d) 0.95

2) If two regression lines are co-incides then the coefficient of correlation is _____.

a) 0 b) -1
c) ± 1 d) 1

3) If $\bar{x}$ is the mean of the random sample of size n taken from a population of size N having mean μ and standard deviation σ then mean and variance of the distribution $\bar{x}$ are _____.

a) $\bar{x}, \sigma^2$ b) $\bar{x}, \frac{\sigma^2}{n}$

c) μ, σ^2 d) μ, and $\frac{\sigma^2}{n}$

4) χ^2 distribution is defined by _____.

a) $\sum \frac{(O-E)}{E}$ b) $\sum \frac{(O-E)}{E^2}$
c) $\sum \left(\frac{O-E}{E}\right)^2$ d) $\sum \frac{(O-E)^2}{E}$

5) If a linear differential equation with constant coefficients and r.h.s. equal to zero has a real root m_1 repeated two times, then the corresponding part of the integral is _____.

a) $(c_1 + c_2)e^{m_1 x}$ b) $(c_1 x + c_2 x)e^{m_1 x}$

c) $(c_1 x + c_2 x^2)e^{m_1 x}$ d) $(c_1 + c_2 x)e^{m_1 x}$

6) $\frac{1}{D-a} X$ is equal to _____.

a) $\int X e^{ax} dx$ b) $e^{ax} \int X . e^{-ax} dx$

c) $\int X e^{-ax} dx$ d) $e^{-ax} \int X e^{-ax} dx$

7) $\frac{1}{D+1}(\log x + \frac{1}{x})$ is equal to _____.

a) e^x b) 1

c) x d) $\log x$

8) The solution of the equation $\sqrt{p} + \sqrt{q} = 1$ is _____.

a) $z = ax + ay + c$ b) $z = ax + a^2 y + c$

c) $z = ax + \left(1 - \sqrt{a}\right)^2 y + c$ d) None of these

9) The solution of $p + q = 1$ is _____.

a) $z = ax + (1 - a)y + c$ b) $z = ax + by + c$

c) $z = ax + b(1 - y) + c$ d) $z = a(1 - x) + b(1 - y) + c$

10) If μ_1', μ_2', μ_3' are the first three moments of the distribution about certain number then third moment μ_3 of the distribution about the arithmetic mean is given by _____.

a) $\mu_3' - 3\mu_2'\mu_1' + 2(\mu_1')^3$ b) $\mu_3' - 3\mu_1' + (\mu_2')^3$

c) $\mu_3' + 2\mu_2'\mu_1' + (\mu_3')^3$ d) $\mu_3' + 3\mu_2'\mu_1' + {\mu_1'}^2$

11) Coefficient of kurtosis β_1 is given by _____.

a) $\frac{\mu_4}{\mu_3}$ b) $\frac{\mu_4}{\mu_2^2}$

c) $\frac{\mu_3^2}{\mu_2^3}$ d) $\frac{\mu_4}{\mu_2^3}$

12) If value of x for normal distribution is 35, mean of normal distribution is 65 and standard deviation is 25 then standardized random variable is _____.

a) -1.5 b) -1.7

c) -1.2 d) -4

13) A continuous random variable has the following probability density function $f(x) = kx(1-x), 0 \leq x \leq 1$ then $k =$ _____.

a) 2 b) 6

c) 3 d) 5

14) The area under the standard normal curve from $z = -\infty$ to $z = 0$ is _____.

a) 1 b) $1/2$

c) $3/2$ d) 0

SECTION – I

Q.2 Attempt Any Three. **09**

a) Find the Arithmetic mean, Median and standard deviation for the following frequency distribution.

x:	5	9	12	15	20	24	30	35	42	49
f:	3	6	8	8	9	10	8	7	6	2

b) Solve: $(D^2+1)y = x^2\cos 3x$

c) Solve: $(D^2-4D+4)y = 8.x^2e^{2x}\sin 2x$

d) Calculate the first four moments about the mean of the given distribution. Also find β_1, β_2

x	2.0	2.5	3.0	3.5	4.0	4.5	5.0
f	4	36	60	90	70	40	10

e) Solve $yzp + 2xq = xy$

Q.3 Attempt Any Three. **09**

a) Solve $\frac{d^2y}{dx^2} + 3\frac{dy}{dx} + 2y = 2e^{2x}$

b) Solve $p - q = x^2 + y^2$

c) Find the median of the following frequency distribution.

x	1	3	5	7	9	11	13	15	17
f	3	6	8	12	16	16	15	10	5

d) Solve $x(y-z)p + y(z-x)q = z(x-y)$

e) Solve $(D^3 - 3D + 2)y = x$

Q.4 Attempt Any Two. **10**

a) The first four moments of a distribution about the value 5 are $2, 20, 40$ and 50, from the given information obtain the first four central moments, Standard deviation and coefficient of skewness and kurtosis.

b) Solve the following differential equations by method of separation of variables.

$$3\frac{\partial u}{\partial x} + 2\frac{\partial u}{\partial y} = 0, \text{ given } u(x, 0) = 4e^{-x}$$

c) Solve $\frac{d^2y}{dx^2} + 3\frac{dy}{dx} + 2y = e^{e^x}$

SECTION – II

Q.5 Attempt Any Three. **09**

a) Find the value of k if each of the following functions is a probability density function.

$$f(x) = \begin{cases} kx^2(1 - x^3) & , \quad 0 \leq x \leq 1 \\ 0 & , \quad \text{otherwise} \end{cases}$$

b) The mean life time of 100 fluorescent light bulbs produced by a Company is computed to be 1570 Hrs. with S.D. of 120 Hrs. If μ is the mean lifetime of all the bulbs produced by the Company, Test the Hypothesis $\mu = 1600$ Hrs. against the alternative Hypothesis $\mu \neq 1600$ Hrs. using 5% level of Significance.
(Given Expected value at 5% LOS is 1.96)

c) Fit a Straight line $y = a + bx$ to the following data.

x	0	5	10	15	20	25
y	12	15	17	22	24	30

d) Two independent random sample have the following data.
$\overline{x_1} = 110, \sigma_1 = 25, n_1 = 16$
$\overline{x_2} = 120, \sigma_2 = 30, n_2 = 9$
If σ_1 and σ_2 are the S. D. of the populations. Test the hypothesis that $\mu_1 = \mu_2$ at 5% level of significance.
(The table value of t at $\alpha = 0.05$ for $v = 23$ degrees of freedom is 2.069)

e) If the probability of defective bulbs is 0.2, find the mean and variance of the distribution of defective bulbs in a lot of 1000 bulbs.

Q.6 Attempt Any Three. **09**

a) If two independent random samples of sizes 15 and 8 have respectively the following mean and population standard deviations, $\overline{x_1} = 980, \overline{x_2} = 1012; \sigma_1 = 75, \sigma_2 = 80$. Test the hypothesis that $\mu_1 = \mu_2$ at 5% level of significance.
(Given Expected value at 5% LOS with 21 DF is 2.080)

b) The number of telephone calls received by an operator in a ten-minute interval follows a Poisson distribution with mean 1. What is the probability of receiving (i) no call, (ii) less than four calls, in the interval? What is the most likely number of calls?

c) Calculate the Coefficient of correlations between x and y from the following data
$n = 25, \sum x = 100, \sum x^2 = 950, \sum y = 110, \sum y^2 = 850, \sum x\,y = 800$

d) Monthly salaries of 1000 workers have a normal distribution with mean of Rs. 575 and a standard deviation of Rs. 75. Find the number of workers having salaries between Rs. 500 and Rs. 625 p.m. Also find the minimum salary of the highest paid 200 workers.
(Given: For a standard normal variate
i) area between $t = 0$ and $t = 1$ is 0.3413,
ii) area between $t = 0$ and $t = 0.67$ is 0.2486,
iii) area between $t = 0$ and $t = 0.84$ is 0.3)

e) Obtain a second-degree curve to the following data and estimate the production in 1975.

Year	1921	1931	1941	1951	1961	1971	1981
Prod. (m. tons)	3	5	9	10	12	14	15

Q.7 Attempt Any Two. **10**

a) Fit a Binomial distribution to the following data,

Value of x	0	1	2	3	4	5	6
Frequency f	6	20	28	12	8	6	0

b) Calculate the lines of regression from the following table, gives the marks obtained by a class of students in two special papers.

Paper I	80	45	55	56	58	60	65	68	70	75	85
Paper II	82	56	50	48	60	62	64	65	70	74	90

c) Ten school boys were given a test in Statistics and their scores were recorded. They were given a month's special coaching and a second test was given to them in the same subject at the end of the coaching period. Test if the marks given below give evidence to the fact that the students are benefitted by coaching.

Marks in test I:	70	68	56	75	80	90	68	75	56	58
Marks in Test II:	68	70	52	73	75	78	80	92	54	55

(Given that value of t_α at 5% LOS for $\nu = 9$ degrees of freedom is 1.86 for one tailed test)

MCQ/Objective Type Questions

Duration: 30 Minutes Marks: 14

Q.1 Choose the correct alternative from the given option. **14**

1) If μ_1', μ_2', μ_3' are the first three moments of the distribution about certain number then third moment μ_3 of the distribution about the arithmetic mean is given by _____.

a) $\mu_3' - 3\mu_2'\mu_1' + 2(\mu_1')^3$ b) $\mu_3' - 3\mu_1' + (\mu_2')^3$

c) $\mu_3' + 2\mu_2'\mu_1' + (\mu_3')^3$ d) $\mu_3' + 3\mu_2'\mu_1' + {\mu_1'}^2$

2) Coefficient of kurtosis β_1 is given by _____.

a) $\frac{\mu_4}{\mu_3}$ b) $\frac{\mu_4}{\mu_2^2}$

c) $\frac{\mu_3^2}{\mu_2^3}$ d) $\frac{\mu_4}{\mu_2^3}$

3) If value of x for normal distribution is 35, mean of normal distribution is 65 and standard deviation is 25 then standardized random variable is _____.

a) -1.5 b) -1.7

c) -1.2 d) -4

4) A continuous random variable has the following probability density function $f(x) = kx(1-x), 0 \leq x \leq 1$ then $k =$ _____.

a) 2 b) 6

c) 3 d) 5

5) The area under the standard normal curve from $z = -\infty$ to $z = 0$ is _____.

a) 1 b) $1/2$

c) $3/2$ d) 0

6) If X, Y denote the deviation from their means and if $\sum X^2 = 80, \sum Y^2 = 50$ & $\sum XY = 60$ and $r =$_____.

a) 0.65 b) 0.78

c) 0.81 d) 0.95

7) If two regression lines are co-incides then the coefficient of correlation is _____.

a) 0 b) -1

c) ± 1 d) 1

8) If $\bar{x}$ is the mean of the random sample of size n taken from a population of size N having mean μ and standard deviation σ then mean and variance of the distribution $\bar{x}$ are _____.

a) $\bar{x}, \sigma^2$ b) $\bar{x}, \frac{\sigma^2}{n}$

c) μ, σ^2 d) μ, and $\frac{\sigma^2}{n}$

9) χ^2 distribution is defined by _____.

a) $\sum \frac{(O-E)}{E}$ b) $\sum \frac{(O-E)}{E^2}$

c) $\sum \left(\frac{O-E}{E}\right)^2$ d) $\sum \frac{(O-E)^2}{E}$

10) If a linear differential equation with constant coefficients and r.h.s. equal to zero has a real root m_1 repeated two times, then the corresponding part of the integral is _____.

a) $(c_1 + c_2)e^{m_1 x}$ b) $(c_1 x + c_2 x)e^{m_1 x}$

c) $(c_1 x + c_2 x^2)e^{m_1 x}$ d) $(c_1 + c_2 x)e^{m_1 x}$

11) $\frac{1}{D-a} X$ is equal to _____.

a) $\int X e^{ax} dx$ b) $e^{ax} \int X . e^{-ax} dx$

c) $\int X e^{-ax} dx$ d) $e^{-ax} \int X e^{-ax} dx$

12) $\frac{1}{D+1}(\log x + \frac{1}{x})$ is equal to _____.

a) e^x b) 1

c) x d) $\log x$

13) The solution of the equation $\sqrt{p} + \sqrt{q} = 1$ is _____.

a) $z = ax + ay + c$ b) $z = ax + a^2 y + c$

c) $z = ax + \left(1 - \sqrt{a}\right)^2 y + c$ d) None of these

14) The solution of $p + q = 1$ is _____.

a) $z = ax + (1 - a)y + c$ b) $z = ax + by + c$

c) $z = ax + b(1 - y) + c$ d) $z = a(1 - x) + b(1 - y) + c$

Q.2 Attempt Any Three. **09**

a) Find the Arithmetic mean, Median and standard deviation for the following frequency distribution.

x:	5	9	12	15	20	24	30	35	42	49
f:	3	6	8	8	9	10	8	7	6	2

b) Solve: $(D^2+1)y = x^2\cos 3x$

c) Solve: $(D^2-4D+4)y = 8.x^2e^{2x}\sin 2x$

d) Calculate the first four moments about the mean of the given distribution. Also find β_1, β_2

x	2.0	2.5	3.0	3.5	4.0	4.5	5.0
f	4	36	60	90	70	40	10

e) Solve $yzp + 2xq = xy$

Q.3 Attempt Any Three. **09**

a) Solve $\frac{d^2y}{dx^2} + 3\frac{dy}{dx} + 2y = 2e^{2x}$

b) Solve $p - q = x^2 + y^2$

c) Find the median of the following frequency distribution.

x	1	3	5	7	9	11	13	15	17
f	3	6	8	12	16	16	15	10	5

d) Solve $x(y-z)p + y(z-x)q = z(x-y)$

e) Solve $(D^3 - 3D + 2)y = x$

Q.4 Attempt Any Two. **10**

a) The first four moments of a distribution about the value 5 are $2, 20, 40$ and 50, from the given information obtain the first four central moments, Standard deviation and coefficient of skewness and kurtosis.

b) Solve the following differential equations by method of separation of variables.

$$3\frac{\partial u}{\partial x} + 2\frac{\partial u}{\partial y} = 0, \text{ given } u(x, 0) = 4e^{-x}$$

c) Solve $\frac{d^2y}{dx^2} + 3\frac{dy}{dx} + 2y = e^{e^x}$

SECTION – II

Q.5 Attempt Any Three. **09**

a) Find the value of k if each of the following functions is a probability density function.

$$f(x) = \begin{cases} kx^2(1 - x^3) & , \quad 0 \leq x \leq 1 \\ 0 & , \quad \text{otherwise} \end{cases}$$

b) The mean life time of 100 fluorescent light bulbs produced by a Company is computed to be 1570 Hrs. with S.D. of 120 Hrs. If μ is the mean lifetime of all the bulbs produced by the Company, Test the Hypothesis $\mu = 1600$ Hrs. against the alternative Hypothesis $\mu \neq 1600$ Hrs. using 5% level of Significance.
(Given Expected value at 5% LOS is 1.96)

c) Fit a Straight line $y = a + bx$ to the following data.

x	0	5	10	15	20	25
y	12	15	17	22	24	30

d) Two independent random sample have the following data.
$\overline{x_1} = 110, \sigma_1 = 25, n_1 = 16$
$\overline{x_2} = 120, \sigma_2 = 30, n_2 = 9$
If σ_1 and σ_2 are the S. D. of the populations. Test the hypothesis that $\mu_1 = \mu_2$ at 5% level of significance.
(The table value of t at $\alpha = 0.05$ for $v = 23$ degrees of freedom is 2.069)

e) If the probability of defective bulbs is 0.2, find the mean and variance of the distribution of defective bulbs in a lot of 1000 bulbs.

Q.6 Attempt Any Three. **09**

a) If two independent random samples of sizes 15 and 8 have respectively the following mean and population standard deviations, $\overline{x_1} = 980, \overline{x_2} = 1012; \sigma_1 = 75, \sigma_2 = 80$. Test the hypothesis that $\mu_1 = \mu_2$ at 5% level of significance.
(Given Expected value at 5% LOS with 21 DF is 2.080)

b) The number of telephone calls received by an operator in a ten-minute interval follows a Poisson distribution with mean 1. What is the probability of receiving (i) no call, (ii) less than four calls, in the interval? What is the most likely number of calls?

c) Calculate the Coefficient of correlations between x and y from the following data
$n = 25, \sum x = 100, \sum x^2 = 950, \sum y = 110, \sum y^2 = 850, \sum x\,y = 800$

d) Monthly salaries of 1000 workers have a normal distribution with mean of Rs. 575 and a standard deviation of Rs. 75. Find the number of workers having salaries between Rs. 500 and Rs. 625 p.m. Also find the minimum salary of the highest paid 200 workers.
(Given: For a standard normal variate
i) area between $t = 0$ and $t = 1$ is 0.3413,
ii) area between $t = 0$ and $t = 0.67$ is 0.2486,
iii) area between $t = 0$ and $t = 0.84$ is 0.3)

e) Obtain a second-degree curve to the following data and estimate the production in 1975.

Year	1921	1931	1941	1951	1961	1971	1981
Prod. (m. tons)	3	5	9	10	12	14	15

Q.7 Attempt Any Two. **10**

a) Fit a Binomial distribution to the following data,

Value of x	0	1	2	3	4	5	6
Frequency f	6	20	28	12	8	6	0

b) Calculate the lines of regression from the following table, gives the marks obtained by a class of students in two special papers.

Paper I	80	45	55	56	58	60	65	68	70	75	85
Paper II	82	56	50	48	60	62	64	65	70	74	90

c) Ten school boys were given a test in Statistics and their scores were recorded. They were given a month's special coaching and a second test was given to them in the same subject at the end of the coaching period. Test if the marks given below give evidence to the fact that the students are benefitted by coaching.

Marks in test I:	70	68	56	75	80	90	68	75	56	58
Marks in Test II:	68	70	52	73	75	78	80	92	54	55

(Given that value of t_α at 5% LOS for $v = 9$ degrees of freedom is 1.86 for one tailed test)

Day & Date: Monday, 11-05-2026 Max. Marks: 70
Time: 03:00 PM To 06:00 PM

Instructions: 1) Q. No. 1 is compulsory. It should be solved in the first 30 minutes in Answer Book Page no 03 (Starting page of the Answer Book). Each question carries one mark
2) Don't forget to Mention question paper set (P/Q/R/S) on top on page.
3) Figures to the right indicates full marks.
4) Assume suitable data if necessary.

MCQ/Objective Type Questions

Duration: 30 Minutes Marks:14

Q.1 Choose correct answer: 14

1) Which of the following is/are considered examples of the Consumer to Consumer (C2C) model?
a) Amazon.com b) e-bay
c) Rentalic.com d) All of the above

2) Which type of E - Commerce is Amazon?
a) B2B b) B2C
c) G2B d) G2C

3) Which of the following is the set of planned activities that are designed to result in a profit in the marketplace?
a) Profit model b) Business model
c) Business plan d) Revenue model

4) All of the following are major B2C business models except _____.
a) content provider b) industry consortium
c) transaction broker d) service provider

5) After completing an E-Commerce transaction, the buyer needs to _____.
a) Pick the product and go home
b) Take the product to home
c) Collect it directly from a store
d) Wait till the delivery of the product

6) SCM is a game of 4 C's = Collaboration; Co-operation; Co-ordination and _____.
a) Controlling b) Connectivity
c) Communication d) Customer

7) Which e-commerce transaction provides the benefits of eliminating the requirement of a middleman?
a) Business to Business
b) Business to Government
c) Consumer to Business
d) Business to Consumer

8) After completing an E-Commerce transaction, the seller and buyer should be provided an opportunity to _____ their transaction experience.
a) undo
b) regret
c) provide rating for
d) forget

9) Digital Cash has the following characteristics _____.
a) Anonymity
b) Security
c) Confidentiality
d) All of the Above

10) Benefit of E-Commerce platform is/are _____.
a) competitive pricing to benefit both seller and buyer
b) large number of products to choose from
c) ability to buy products not available in the local market
d) All of them

11) Which type of attack is a method of defeating a cryptographic scheme of trying a large number of possibilities?
a) Teardrop attack
b) Brute force attack
c) Phlashing
d) Smurf attack

12) Which is the model in E - E-Commerce, if the seller is an individual and the buyer is a business firm?
a) Consumer to Business
b) Business to Consumer
c) Business to Business
d) Consumer to Consumer

13) Which of the following authenticates and handles credit card payment for E-Commerce?
a) Payment gateway
b) E - E-Commerce gateway
c) Software gateway
d) E-Wallets

14) What is another name called PDoS?
a) Brute force attack
b) Non-technical attack
c) Phlashing
d) Smurf attack

Examination: March/April – 2026
Humanities and Social Sciences (OE-01C)

Day & Date: Monday, 11-05-2026 Max. Marks: 56
Time: 03:00 PM To 06:00 PM

Instructions: 1) All questions are compulsory.
2) Figures to the right indicate full marks.

SECTION – I

Q.2 Attempt Any Three. **12**

a) Explain various aspects of perception.

b) Explain major philosophical movements and their impact.

c) Explain the interdisciplinary nature of disciplines under humanities and social sciences.

d) Explain how perceptual processes shape human behaviour.

e) Write a short note on: Scope of humanities.

Q.3 Attempt Any Two. **16**

a) Explore main theories of psychology.

b) Write in details the effects of psychology on social communication.

c) Explore the merits and demerits of democratic system of rule.

SECTION -II

Q.4 Attempt Any Three. **12**

a) How did industrial revolution contribute to technical advancements?

b) Write a short note on: Ethics in Engineering.

c) Write a short note on: Social Institutions.

d) Which are the different aspects of culture and society?

e) Explain how the ancient civilizations have contributed to the modern society.

Q.5 Attempt Any Two. **16**

a) Explain the concept of industrialization with its social and economic consequences.

b) Explore various economic theories and their thinkers.

c) Which are the technological innovations in 18^{th} & 19^{th} century? Explain.

MCQ/Objective Type Questions

Duration: 30 Minutes Marks:14

Q.1 MCQ/Objective Type Questions: 14

1) Which of the following best defines the primary purpose of management?
a) To create rules for employees to follow
b) To maintain financial records
c) To achieve organizational goals efficiently and effectively
d) To monitor employee behavior

2) Which function of management involves setting objectives and determining a course of action to achieve them?
a) Organizing b) Controlling
c) Planning d) Leading

3) Which of the following best represents the concept of social responsibility in management?
a) Maximizing shareholder wealth at any cost
b) Avoiding all legal penalties
c) Balancing profit-making with obligations to stakeholders and society
d) Focusing only on employee welfare

4) What is the most important reason for managers to follow ethical principles in decision-making?
a) To avoid law suits
b) To improve public image
c) To build trust and long-term sustainability
d) To increase profits quickly

5) Which is the first step in the planning process?
a) Developing alternatives b) Evaluating alternatives
c) Setting objectives d) Selecting the best alternative

6) What is the primary purpose of organizing in management?
a) To control employee behavior
b) To define roles, responsibilities, and allocate resources
c) To create strict rules for employees
d) To plan financial statements

7) What is the main purpose of employee training and development?
a) To penalize poor performance
b) To reduce the number of staff
c) To delay promotions
d) To enhance employee skills and support career growth

8) According to Maslow's Hierarchy of Needs, which of the following is the highest level of need?
a) Safety needs
b) Social needs
c) Esteem needs
d) Self-actualization

9) The "Carrot and Stick" approach to motivation is based on _____.
a) Building self-esteem through empowerment
b) Providing both rewards and punishments to influence behavior
c) Offering training and development opportunities
d) Recognizing only financial incentives

10) Which of the following best defines "quality" in the context of management?
a) Producing the highest quantity of products
b) Conforming to standards and satisfying customer needs
c) Meeting only internal business goals
d) Offering products at the lowest possible price

11) Which of the following is not typically considered an element of quality?
a) Performance
b) Reliability
c) Advertising
d) Durability

12) Pareto Analysis is based on the principle that _____.
a) All causes contribute equally to problems
b) 20% of the causes account for 80% of the problems
c) Quality problems are random and unpredictable
d) Only external factors affect product quality

13) The main goal of Six Sigma is to _____.
a) Increase the speed of production
b) Eliminate all human involvement in processes
c) Reduce process variation and defects to near zero
d) Ensure all products are handmade

14) What is the primary purpose of Statistical Process Control (SPC)?
a) To eliminate all manual processes
b) To ensure marketing strategies are effective
c) To monitor and control a process through statistical methods
d) To increase financial profitability only

7) Pareto Analysis is based on the principle that _____.
a) All causes contribute equally to problems
b) 20% of the causes account for 80% of the problems
c) Quality problems are random and unpredictable
d) Only external factors affect product quality

8) The main goal of Six Sigma is to _____.
a) Increase the speed of production
b) Eliminate all human involvement in processes
c) Reduce process variation and defects to near zero
d) Ensure all products are handmade

9) What is the primary purpose of Statistical Process Control (SPC)?
a) To eliminate all manual processes
b) To ensure marketing strategies are effective
c) To monitor and control a process through statistical methods
d) To increase financial profitability only

10) Which of the following best defines the primary purpose of management?
a) To create rules for employees to follow
b) To maintain financial records
c) To achieve organizational goals efficiently and effectively
d) To monitor employee behavior

11) Which function of management involves setting objectives and determining a course of action to achieve them?
a) Organizing b) Controlling
c) Planning d) Leading

12) Which of the following best represents the concept of social responsibility in management?
a) Maximizing shareholder wealth at any cost
b) Avoiding all legal penalties
c) Balancing profit-making with obligations to stakeholders and society
d) Focusing only on employee welfare

13) What is the most important reason for managers to follow ethical principles in decision-making?
a) To avoid law suits
b) To improve public image
c) To build trust and long-term sustainability
d) To increase profits quickly

14) Which is the first step in the planning process?
a) Developing alternatives b) Evaluating alternatives
c) Setting objectives d) Selecting the best alternative

Set S

S.Y. (B.Tech.) (Civil Engineering) (Semester - I) (New) (NEP CBCS)
Examination: March/April – 2026
Industrial and Quality Management (OE-01D)

Day & Date: Monday, 11-05-2026 Max. Marks: 56
Time: 03:00 PM To 06:00 PM

Instructions: 1) Solve any two questions from both sections.
2) Figures to the right indicate full marks.
3) Assume suitable data if necessary and mention it clearly.

SECTION – I

Q.2	**a)**	Explain the Social responsibilities and ethics in management.	**07**
	b)	Explain decision making process with types of decision.	**07**
Q.3	**a)**	What is staffing? Explain its importance as a managerial function.	**07**
	b)	What are the types of organizations? Explain problems with organizational level.	**07**
Q.4	**a)**	What are the main techniques of managerial control.	**07**
	b)	What is motivation? Explain Maslow's theory of motivation.	**07**

SECTION – II

Q.5	**a)**	Define quality and state the steps in quality control.	**07**
	b)	Differentiate between quality of design and quality of conformance.	**07**
Q.6	**a)**	Explain Deming Wheel with suitable example.	**07**
	b)	List seven quality control tools. Explain with neat sketches Pareto analysis, Scatter diagram and cause and effect diagram.	**07**
Q.7	**a)**	What is Statistical Process Control (SPC)? Explain its objectives and importance in quality management.	**07**
	b)	Differentiate between single sampling plan & double sampling plan.	**07**

S.Y. (B.Tech.) (Civil Engineering) (Semester - I) (New) (NEP CBCS)
Examination: March/April – 2026
Mathematics for Software and Hardware (OE-01E)

Day & Date: Monday, 11-05-2026 Max. Marks: 70
Time: 03:00 PM To 06:00 PM

Instructions: 1) Q. No. 1 is compulsory. It should be solved in the first 30 minutes in Answer Book Page no 03 (Starting page of the Answer Book). Each question carries one mark.
2) Don't forget to Mention question paper set (P/Q/R/S) on top of page.
3) Figures to the right indicates full marks.
4) Make suitable assumptions if necessary and state them clearly.
5) Use of non-programmable calculator is allowed.

MCQ/Objective Type Questions

Duration: 30 Minutes Marks: 14

Q.1 Choose the correct alternative from the given option. 14

1) The particular Integral of $(D^2 - 2D + 1)y = -4e^x$ is _____.

a) $-2x^2e^x$ b) $-4x^2e^x$
c) $(C_1 + C_2x)e^x$ d) x^2e^x

2) The general solution of $(D^2 - 4)^2y = 0$ is _____.

a) $y = C_1e^{2x} + C_2e^{-2x}$
b) $y = (C_1 + C_2x)e^{-2x} + (C_3 + C_4x)e^{2x}$
c) $y = C_1\cos 2x + C_2\sin 2x + (C_3 + C_4x)e^{2x}$
d) None of these

3) The value of $\frac{1}{D-a}X =$ _____.

a) $e^{-ax}\int e^{-ax}Xdx$ b) $e^{-ax}\int e^{ax}Xdx$
c) $e^{ax}\int e^{-ax}Xdx$ d) $e^{ax}\int e^{ax}Xdx$

4) $Lf(t)\delta(t-a) =$ _____.

a) $e^{-as}f(t)$ b) $e^{-as}f(a)$
c) $e^{as}f(a)$ d) $e^{-as}f(t-a)$

5) If $L\{f(t)\} = \frac{a}{s^2+a^2}$ then $L\left\{\int_0^1 f(t)dt\right\} =$ _____.

a) $\frac{1}{s(s^2+a^2)}$ b) $\frac{a}{s(s^2+a^2)}$

c) $\frac{as}{s^2+a^2}$ d) $\frac{as^2}{s^2+a^2}$

6) The inverse z-transform of $\frac{z}{z-3}, |z| > 3$ (with $k \geq 0$) is _____.

a) 3^{-k} b) 3^{k+1}

c) 3^k d) 3^{-k-1}

7) The rate of convergence of Newton-Raphson Method is _____.

a) 1 b) 2

c) $\sqrt{2}$ d) 3

8) A positive real root of the equation $xe^x - 2 = 0$ is lies between _____.

a) 2 and 3 b) 1 and 2

c) 3 and 4 d) 0 and 1

9) Since $z\{1\} = \frac{z}{z-1}, z\{a^k\}, k \geq 0 =$ _____.

a) $\frac{z}{z-a}$ b) $\frac{z}{a(z-1)}$

c) $\frac{a}{z-a}$ d) $\frac{z}{az-1}$

10) In the interval $(0,1)$ the constant term in the cosine series of $f(x) = x^2$ is _____.

a) 0 b) $\frac{1}{2}$

c) $\frac{1}{3}$ d) $\frac{\pi}{4}$

11) In the cosine series of $f(x) = \pi x - x^2$ for $0 < x < \pi$, the constant term is _____.

a) $\frac{\pi^2}{4}$ b) $\frac{\pi^2}{16}$

c) $\frac{\pi^2}{6}$ d) $\frac{\pi^2}{2}$

12) For the function $f(x) \begin{matrix} = & 0, & -\pi < x < 0 \\ = & x, & 0 < x < \pi \end{matrix}$

The value of Fourier constant a_0 is _____.

a) $\frac{\pi^2}{4}$ b) $\frac{\pi}{4}$

c) $\frac{\pi^2}{2}$ d) $\frac{-\pi}{4}$

13) The half range sine series of $f(x)$ defined in the interval $(0, 2)$ is _____.

a) $f(x) = \sum_{n=1}^{\infty} b_n \sin nx$ b) $f(x) = \sum_{n=1}^{\infty} b_n \sin(2n\pi x)$

c) $f(x) = \sum_{n=1}^{\infty} b_n \sin\left(\frac{n\pi x}{2}\right)$ d) $f(x) = \sum_{n=1}^{\infty} a_n \cos\left(\frac{n\pi x}{2}\right)$

14) If $F_s(\lambda) = e^{-\lambda}$ then the function $f(x) =$ _____.

a) $\frac{2}{\sqrt{1+x^2}}$ b) $\frac{\pi}{1+x^2}$

c) $\sqrt{\frac{2}{\pi}}\frac{1}{1+x^2}$ d) None

SECTION – I

Q.2 Attempt Any Three. **09**

a) Solve: $(D^2+1)y = x\sin 2x$

b) Solve: $(D^2+4D+4)y = e^{3x}$

c) Find $L\left\{\frac{1}{t}(1-\cos t)\right\}$

d) Find $z\{ka^k + k\beta^k\}, k \geq 0$

e) Find the Laplace transform of $\int_0^t te^{-3t}\sin(4t)dt$

Q.3 Attempt Any Three. **09**

a) Solve $(D^2-1)y = X\cos 2x$

b) Find $L\left[\int_0^t te^{-4t}\sin(3t)dt\right]$

c) Find the inverse Laplace transform of following by using the Convolution theorem of $\left[\frac{1}{s(s^2+9)}\right]$

d) Find $Z\left\{3^k\cos\left(\frac{k\pi}{2}+\frac{\pi}{4}\right)\right\}, k \geq 0$

e) Find the Laplace Transform of $\{1+2t-3t^2+4t^3\}U(t-2)\}$

Q.4 Attempt Any Two. **10**

a) Find $L\{t.\sqrt{1-\sin t}\}$

b) Solve $(D^3+1)y = 3+e^{-x}+5e^{2x}$

c) Find $Z^{-1}\left\{\frac{1}{(z-a)^2}\right\}, |z| > |a|., |z| < |a|$

SECTION – II

Q.5 Attempt Any Three. **09**

a) Evaluate $\int_0^6 \frac{e^x}{1+x}dx$ using Simpson's 1/3rd rule, (Take $h = 1$)

b) Find the half-range cosine series for $f(x) = e^{-x}$ in $(0, \pi)$

c) Evaluate $\sqrt{37}$ by Newton Raphson method correct to four decimal places by taking initial approximation as $x_0 = 6$

d) Find the Fourier Sine transforms of $2e^{-5x} + 5e^{-2x}$

e) Find the Fourier series of $f(x) \begin{matrix} = & \pi x, & 0 < x < 1 \\ = & 0, & 1 < x < 2 \end{matrix}$

Q.6 Attempt Any Three. **09**

a) Obtain half range sine series for $f(x) = x$ in $0 < x < 2$

b) Find the positive root of the following by using Newton Raphson method correct to four decimal places $3x - \cos x - 1 = 0$

c) Evaluate $\int_0^6 \frac{1}{1+x^2}dx\ n = 6$ using Trapezoidal rule.

d) Find the Fourier transform of $f(x)$ if $f(x) = \begin{cases} 1, & 0 \le x < 1 \\ 0, & x > 0 \end{cases}$

e) Find the Fourier series of $f(x) = x \sin x, \ \ (0, 2\pi)$

Q.7 Attempt Any Two. **10**

a) Find the Fourier transform of

$f(x) \begin{matrix} = 1 & |x| & < & k \\ = 0 & |x| & > & k \end{matrix}$ and

hence evaluate

i) $\int_{-\infty}^{\infty} \frac{\sin sk \,.\cos sk}{s} ds$

ii) $\int_{-\infty}^{\infty} \frac{\sin ks}{s} ds$

b) Obtain the Fourier series of $f(x) = a^2 - x^2$ in $(-a, a)$

c) Find the Value of K_1 by Runge Kutta Method of fourth order if

$\frac{dy}{dx} = 2x + 3y^2$ and $y(0.1) = 1.1165$ and $h = 0.1$

e) Find the Laplace transform of $\int_0^t te^{-3t}\sin(4t)dt$

Q.3 Attempt Any Three. **09**

a) Solve $(D^2-1)y = X\cos 2x$

b) Find $L\left[\int_0^t te^{-4t}\sin(3t)dt\right]$

c) Find the inverse Laplace transform of following by using the Convolution theorem of $\left[\frac{1}{s(s^2+9)}\right]$

d) Find $Z\left\{3^k\cos\left(\frac{k\pi}{2}+\frac{\pi}{4}\right)\right\}, k \geq 0$

e) Find the Laplace Transform of $\{1+2t-3t^2+4t^3\}U(t-2)\}$

Q.4 Attempt Any Two. **10**

a) Find $L\{t.\sqrt{1-\sin t}\}$

b) Solve $(D^3+1)y = 3+e^{-x}+5e^{2x}$

c) Find $Z^{-1}\left\{\frac{1}{(z-a)^2}\right\}, |z| > |a|., |z| < |a|$

SECTION – II

Q.5 Attempt Any Three. **09**

a) Evaluate $\int_0^6 \frac{e^x}{1+x}dx$ using Simpson's 1/3rd rule, (Take $h = 1$)

b) Find the half-range cosine series for $f(x) = e^{-x}$ in $(0, \pi)$

c) Evaluate $\sqrt{37}$ by Newton Raphson method correct to four decimal places by taking initial approximation as $x_0 = 6$

d) Find the Fourier Sine transforms of $2e^{-5x} + 5e^{-2x}$

e) Find the Fourier series of $f(x) \begin{matrix} = & \pi x, & 0 < x < 1 \\ = & 0, & 1 < x < 2 \end{matrix}$

Q.6 Attempt Any Three. **09**

a) Obtain half range sine series for $f(x) = x$ in $0 < x < 2$

b) Find the positive root of the following by using Newton Raphson method correct to four decimal places $3x - \cos x - 1 = 0$

c) Evaluate $\int_0^6 \frac{1}{1+x^2}dx\ n = 6$ using Trapezoidal rule.

d) Find the Fourier transform of $f(x)$ if $f(x) = \begin{cases} 1, & 0 \le x < 1 \\ 0, & x > 0 \end{cases}$

e) Find the Fourier series of $f(x) = x \sin x, \quad (0, 2\pi)$

Q.7 Attempt Any Two. **10**

a) Find the Fourier transform of

$f(x) \begin{matrix} = 1 & |x| & < & k \\ = 0 & |x| & > & k \end{matrix}$ and

hence evaluate

i) $\int_{-\infty}^{\infty} \frac{\sin sk \,.\, \cos sk}{s} ds$

ii) $\int_{-\infty}^{\infty} \frac{\sin ks}{s} ds$

b) Obtain the Fourier series of $f(x) = a^2 - x^2$ in $(-a, a)$

c) Find the Value of K_1 by Runge Kutta Method of fourth order if

$\frac{dy}{dx} = 2x + 3y^2$ and $y(0.1) = 1.1165$ and $h = 0.1$

S.Y. (B.Tech.) (Civil Engineering) (Semester - I) (New) (NEP CBCS)
Examination: March/April – 2026
Mathematics for Software and Hardware (OE-01E)

Day & Date: Monday, 11-05-2026 Max. Marks: 70
Time: 03:00 PM To 06:00 PM

Instructions: 1) Q. No. 1 is compulsory. It should be solved in the first 30 minutes in Answer Book Page no 03 (Starting page of the Answer Book). Each question carries one mark.
2) Don't forget to Mention question paper set (P/Q/R/S) on top of page.
3) Figures to the right indicates full marks.
4) Make suitable assumptions if necessary and state them clearly.
5) Use of non-programmable calculator is allowed.

MCQ/Objective Type Questions

Duration: 30 Minutes Marks: 14

Q.1 Choose the correct alternative from the given option. **14**

1) The inverse z-transform of $\frac{z}{z-3}, |z| > 3$ (with $k \geq 0$) is _____.

a) 3^{-k} b) 3^{k+1}
c) 3^{k} d) 3^{-k-1}

2) The rate of convergence of Newton-Raphson Method is _____.

a) 1 b) 2
c) $\sqrt{2}$ d) 3

3) A positive real root of the equation $xe^{x} - 2 = 0$ is lies between _____.

a) 2 and 3 b) 1 and 2
c) 3 and 4 d) 0 and 1

4) Since $z\{1\} = \frac{z}{z-1}, z\{a^{k}\}, k \geq 0 =$ _____.

a) $\frac{z}{z-a}$ b) $\frac{z}{a(z-1)}$
c) $\frac{a}{z-a}$ d) $\frac{z}{az-1}$

5) In the interval $(0,1)$ the constant term in the cosine series of $f(x) = x^{2}$ is _____.

a) 0 b) $\frac{1}{2}$
c) $\frac{1}{3}$ d) $\frac{\pi}{4}$

6) In the cosine series of $f(x) = \pi x - x^2$ for $0 < x < \pi$, the constant term is _____.

a) $\frac{\pi^2}{4}$ b) $\frac{\pi^2}{16}$

c) $\frac{\pi^2}{6}$ d) $\frac{\pi^2}{2}$

7) For the function $f(x) \begin{matrix} = \\ = \end{matrix} \begin{matrix} 0, & -\pi < x < 0 \\ x, & 0 < x < \pi \end{matrix}$

The value of Fourier constant a_0 is _____.

a) $\frac{\pi^2}{4}$ b) $\frac{\pi}{4}$

c) $\frac{\pi^2}{2}$ d) $\frac{-\pi}{4}$

8) The half range sine series of $f(x)$ defined in the interval $(0, 2)$ is _____.

a) $f(x) = \sum_{n=1}^{\infty} b_n \sin nx$ b) $f(x) = \sum_{n=1}^{\infty} b_n \sin(2n\pi x)$

c) $f(x) = \sum_{n=1}^{\infty} b_n \sin\left(\frac{n\pi x}{2}\right)$ d) $f(x) = \sum_{n=1}^{\infty} a_n \cos\left(\frac{n\pi x}{2}\right)$

9) If $F_s(\lambda) = e^{-\lambda}$ then the function $f(x) =$ _____.

a) $\frac{2}{\sqrt{1+x^2}}$ b) $\frac{\pi}{1+x^2}$

c) $\sqrt{\frac{2}{\pi}}\frac{1}{1+x^2}$ d) None

10) The particular Integral of $(D^2 - 2D + 1)y = -4e^x$ is _____.

a) $-2x^2e^x$ b) $-4x^2e^x$

c) $(C_1 + C_2x)e^x$ d) x^2e^x

11) The general solution of $(D^2 - 4)^2 y = 0$ is _____.

a) $y = C_1e^{2x} + C_2e^{-2x}$

b) $y = (C_1 + C_2x)e^{-2x} + (C_3 + C_4x)e^{2x}$

c) $y = C_1 \cos 2x + C_2 \sin 2x + (C_3 + C_4x)e^{2x}$

d) None of these

12) The value of $\frac{1}{D-a}X =$ _____.

a) $e^{-ax}\int e^{-ax}Xdx$ b) $e^{-ax}\int e^{ax}Xdx$

c) $e^{ax}\int e^{-ax}Xdx$ d) $e^{ax}\int e^{ax}Xdx$

13) $Lf(t)\delta(t-a) =$ _____.

a) $e^{-as}f(t)$ b) $e^{-as}f(a)$

c) $e^{as}f(a)$ d) $e^{-as}f(t-a)$

14) If $L\{f(t)\} = \frac{a}{s^2+a^2}$ then $L\left\{\int_0^1 f(t)dt\right\} =$ _____.

a) $\frac{1}{s(s^2+a^2)}$ b) $\frac{a}{s(s^2+a^2)}$

c) $\frac{as}{s^2+a^2}$ d) $\frac{as^2}{s^2+a^2}$

MCQ/Objective Type Questions

Duration: 30 Minutes Marks:14

Q.1 Choose the correct alternatives from the following. **14**

1) In the process of communication, _____ is the person who encodes the message.
a) Receiver b) Driver
c) Cleaner d) Sender

2) Which among the following barriers is related to fault in the channel?
a) Physical b) Mechanical
c) Psychological d) All of above

3) The ability to recognize, understand and regulate your own emotions is called _____.
a) Empathy b) Self-awareness
c) Emotional intelligence d) Relationship management

4) Stress is defined as _____.
a) A physical or emotional reaction to challenges or demands
b) A type of disease
c) Only physical pain
d) A mental disorder

5) Time management means _____.
a) Doing work very quickly
b) Planning and organizing how to spend time effectively
c) Wasting time
d) Avoiding responsibilities

6) Effective non-verbal communication in presentations helps to _____.
a) Confuse the audience
b) Improve understanding and engagement
c) Reduce communication
d) Replace verbal communication

7) Which of the following helps in effective presentation?
a) Organizing ideas clearly b) Using complex language
c) Ignoring the audience d) All of the above

8) The main purpose of an interview is to _____.
a) Test physical strength
b) Assess a candidate's suitability
c) Conduct training
d) Provide entertainment

9) Which of the following is part of presentation etiquette?
a) Clear speaking b) Good posture
c) Proper visual aids d) All of the above

10) Good posture during a presentation indicates _____.
a) Confidence b) Nervousness
c) Disinterest d) Laziness

11) Which non-verbal factors help engage the audience?
a) Eye contact b) Facial expressions
c) Hand gestures d) All of the above

12) Prioritization in time management means _____.
a) Doing easy tasks first
b) Arranging tasks according to importance
c) Avoiding work
d) Doing everything at once

13) Procrastination means _____.
a) Completing work early b) Delaying tasks unnecessarily
c) Planning work d) Finishing tasks on time

14) Taking short breaks during work helps to _____.
a) Reduce efficiency b) Improve focus
c) Waste time d) Increase stress

S.Y. (B.Tech.) (Civil Engineering) (Semester - I) (New) (NEP CBCS)
Examination: March/April – 2026
Soft Skills and Personality Development (OE-01F)

Day & Date: Monday, 11-05-2026 Max. Marks: 56
Time: 03:00 PM To 06:00 PM

Instructions: 1) All questions are compulsory.
2) Figures to the right indicate full marks.

SECTION – I

Q.2 Attempt Any Three. **12**

a) Write short note on: Functions of a Sender in Communication.

b) Explain physical barriers to communication with the ways to overcome them.

c) Write short note on: Time management.

d) Explain how language can become a barrier in communication.

e) Explain how feedback is necessary in communication.

Q.3 Attempt Any Two. **16**

a) Define psychological barriers and the ways to overcome them.

b) Elaborate various ways to develop emotional intelligence.

c) Which are the different steps in the process of communication?

SECTION -II

Q.4 Attempt Any Three. **12**

a) Explain how non-verbal communication helps for better presentation.

b) Explain different types of interviews.

c) Explain various ways of time management.

d) Elaborate different strategies to manage stress.

e) Explain different reasons of stress.

Q.5 Attempt Any Two. **16**

a) Explain the concept of interview with various steps in the process.

b) Elaborate various ways of effective time management.

c) Which are the different steps in the process of presentation?

SLR-QH-22

Seat No.		Set	P

S.Y. (B.Tech.) (Civil Engineering) (Semester - I) (New) (NEP CBCS)
Examination: March/April – 2026
Environmental Laws and Impact Assessment (CIVHON-01C)

Day & Date: Wednesday, 13-05-2026 Max. Marks: 70
Time: 03:00 PM To 06:00 PM

Instructions: 1) Q. No. 1 is compulsory. It should be solved in the first 30 minutes in Answer Book Page no 03 (Starting page of the Answer Book). Each question carries one mark.
2) Don't forget to Mention question paper set (P/Q/R/S) on top on page.
3) Figures to the right indicates full marks.
4) Assume suitable data wherever necessary and mention it clearly.

MCQ/Objective Type Questions

Duration: 30 Minutes Marks:14

Q.1 Choose the correct alternative from the given options. 14

1) The Forest (Conservation) Act, 1980 primarily aims to _____.
a) Promote commercial forestry.
b) Restrict the de-reservation of forests and use of forest land for non-forest purposes.
c) Give ownership of forests to local communities.
d) Regulate the trade of forest produce.

2) The Biological Diversity Act of 2002 was enacted to meet India's obligations under which international agreement?
a) Ramsar Convention
b) Kyoto Protocol
c) Convention on Biological Diversity (CBD)
d) Vienna Convention

3) The Environment (Protection) Act, 1986 was passed in the aftermath of _____.
a) The Chernobyl disaster b) The Bhopal Gas Tragedy
c) The Kerala floods d) The Stockholm Conference

4) Coastal Regulation Zone (CRZ) notifications are issued under the provisions of the _____.
a) Water Act, 1974
b) Air Act, 1981
c) Environment (Protection) Act, 1986
d) Indian Ports Act

5) The Leopold Matrix is a classic example of which EIA methodology?
a) Ad-hoc Method b) Checklist Method
c) Matrices Method d) Simulation Method

6) Which EIA methodology is best suited for identifying secondary and tertiary impacts?

a) Checklist
b) Network
c) Overlay
d) Cost-Benefit Analysis

7) The 'Public Hearing' in the EIA process is primarily intended to ____.

a) Advertise the project benefits.
b) Fulfill a legal formality.
c) Get quick approval from the government.
d) Incorporate the views of the local affected people

8) Remote Sensing (RS) data can be used in EIA for _____.

a) Monitoring changes in land use and land cover over time.
b) Conducting public surveys.
c) Measuring noise levels.
d) Analyzing soil chemistry in a lab.

9) When reviewing an EIA report, the 'Baseline Conditions' section should provide _____.

a) A detailed financial plan.
b) The environmental status of the project area before project implementation.
c) The names of all workers.
d) The marketing strategy for the project

10) A 'cradle-to-grave' LCA includes _____.

a) Only the manufacturing process.
b) From raw material extraction to final disposal.
c) From the factory gate to the consumer.
d) Only the recycling process.

11) The Life Cycle Inventory (LCI) phase involves _____.

a) Evaluating the significance of potential environmental impacts.
b) Communicating the results to the public.
c) Defining the purpose of the study.
d) Collecting data on energy and material inputs and environmental releases

12) The main outcome of a well-conducted LCA is to _____.

a) Guarantee a product will be environmentally perfect.
b) Provide information to make more informed, environmentally-preferable decisions.
c) Replace the need for all other environmental regulations.
d) Ensure the product is the cheapest on the market.

13) The 'Use/Reuse/Maintenance' stage of an LCA for a car would primarily account for _____.

a) Mining of iron ore.
b) Assembly of the engine.
c) Fuel consumption and emissions during its driving life.
d) Scrapping the car

14) In the 'Recycle/Waste Management' stage, a key issue is _____.

a) The product's initial design.
b) How to allocate environmental benefits between the product that provides the recycled material and the product that uses it.
c) The product's retail price.
d) The color of the recycling bin.

Examination: March/April – 2026
Environmental Laws and Impact Assessment (CIVHON-01C)

Day & Date: Wednesday, 13-05-2026 Max. Marks: 56
Time: 03:00 PM To 06:00 PM

Instructions: 1) Question No. 2 is compulsory in section I, and solve any two questions from the remaining.
2) Question No. 6 is compulsory in section II, and solve any two questions from the remaining
3) Figures to the right indicates full marks.
4) Assume suitable data wherever necessary and mention it clearly.
5) Use of non-programmable calculator is allowed.

Section – I

Q.2	**a)**	Critically analyze the key provisions and objectives of the Indian Forest Act.	**05**
	b)	What are the main features of the Wildlife (Protection) Act.	**05**
Q.3	**a)**	Discuss the Environment (Protection) Act, 1986 as an 'umbrella legislation'. What are its strengths and weaknesses?	**05**
	b)	What are Coastal Regulation Zone (CRZ) notifications? Explain their importance in protecting India's coastal ecology.	**04**
Q.4	**a)**	How are 'Network Methods' used in EIA to identify secondary and tertiary impacts?	**05**
	b)	Explain the 'Overlay Method' in EIA and its connection to modern GIS techniques.	**04**
Q.5	**a)**	What are the essential components that must be included in a comprehensive EIA report?	**05**
	b)	Discuss the role of various stakeholders (project proponent, regulatory authority, public) in the EIA process.	**04**

SECTION – II

Q.6	**a)**	Discuss the application of Remote Sensing (RS) in various stages of the EIA process.	**05**
	b)	Discuss the application of Geographic Information Systems (GIS) in impact prediction and visualization in EIA.	**05**
Q.7	**a)**	What are the key aspects to be reviewed in the 'Baseline Conditions' section of an EIA report?	**05**
	b)	Explain the critical first step of "Defining the Goal and Scope" in an LCA study.	**04**
Q.8	**a)**	Differentiate between attributional and consequential LCA modeling approaches.	**05**
	b)	How can LCA be used to support eco-labeling of products?	**04**
Q.9	**a)**	Discuss the role of LCA in guiding Design for Environment (DfE) strategies.	**05**
	b)	What is the procedural framework for conducting a Life-cycle Inventory analysis as per international standards?	**04**

Q.1 Choose the correct alternative from the given options. 14

1) _____ is a civil engineering drafting software with design and simulation tools.
a) Civil 3D b) Grammarly
c) MSP d) Primavera

2) Minimization problems are mainly used for _____.
a) Loss calculations b) Outgoings
c) Manufacturing cost d) All of the above

3) Every optimization problem consists of _____.
a) Objective function and constraints
b) Decision variables only
c) Guided path only
d) Distribution system

4) Major goals of automated highway systems include _____.
a) Improved safety b) Optimized investment
c) Improved mobility d) All of these

5) Graphical method of Linear Programming is useful up to _____.
a) 1 variable b) 2 variables
c) 4 variables d) 6 variables

6) The 'Objective Function' in optimization aims to _____.
a) Define constraints
b) Ensure feasibility
c) Maximize or minimize a quantity
d) Identify variables

7) Which of the following is NOT an IT application in construction management?
a) Scheduling
b) Communication
c) Concrete mix design
d) Document management

8) EOQ model helps in determining _____.
a) Project duration
b) Optimal order quantity
c) Concrete strength
d) Labour requirement

9) GIS is used to _____.
a) Analyse structures
b) Manage schedules
c) Capture and analyze spatial data
d) Create 3D models

10) Deterministic inventory model assumes _____.
a) Variable demand
b) Unknown demand
c) Known and constant demand
d) Seasonal demand

11) Benefits of computer applications in construction include _____.
a) Flexibility
b) Efficient communication
c) Consistent estimating
d) All of these

12) Which technology overlays digital data on the real world?
a) Virtual Reality
b) GIS
c) Augmented Reality
d) 3D Printing

13) Constraints in optimization represent _____.
a) Goals
b) Variables
c) Limitations
d) Final solution

14) Information technology mainly focuses on _____.
a) Hardware only
b) Software only
c) Data processing and management
d) Manual operations

S.Y. (B.Tech.) (Civil Engineering) (Semester - I) (New) (NEP CBCS)
Examination: March/April – 2026
Applications of Information Technology and Information Systems (CIVHON-01B)

Day & Date: Wednesday, 13-05-2026 Max. Marks: 56
Time: 03:00 PM To 06:00 PM

Instructions: 1) Question no. 2 is compulsory in section I, and solve any two questions from the remaining.
2) Question no. 6 is compulsory in section II, and solve any two questions from the remaining
3) Figures to the right indicates full marks.
4) Assume suitable data wherever necessary and mention it clearly.
5) Use of non-programmable calculator is allowed.

Section – I

Q.2 **a)** Discuss the impact of computerization on planning, execution, and control of construction projects. **05**

b) Explain the concept of 'Decision Variables' in optimization problems. **05**

Q.3 Solve the following Linear programming problem using Graphical method. **09**
Maximize $Z = 2X_1 + 3X_2$
Subject to, $X_1 + X_2 \leq 30;$
$X_1 - X_2 \geq 0;$
$X_2 \geq 3;$
$0 \leq X_1 \leq 20;$
$0 \leq X_2 \leq 2;$

Q.4 **a)** Explain in detail Dynamic Programming and enlist steps of Dynamic programming. **05**

b) Explain the role of information technology in improving efficiency of construction processes. **04**

Q.5 **a)** Define 'Inventory Control' and explain its necessity in the construction industry. Detailed the various types of Inventory Costs involved in maintaining inventory on a site. **09**

SECTION – II

Q.6	**a)**	Explain the importance of project scheduling in construction projects with reference to IT tools.	**05**
	b)	Discuss the role of sensors and loT in monitoring structural health of buildings.	**05**
Q.7	**a)**	What is project? Explain in detail Steps involved in managing the project.	**05**
	b)	What are the advantages and limitations of using 3D Printing in construction?	**04**
Q.8		Explain how automation helps in reducing human error and improving productivity in construction.	**09**
Q.9		Discuss how BIM improves coordination among architects, engineers, and contractors.	**09**

MCQ/Objective Type Questions

Duration: 30 Minutes Marks:14

Q.1 Choose the correct alternative from the given options. 14

1) What are the steps of the design thinking process?
a) Understand > Draw > Ideate > Create > Test> Implement
b) Empathize > Define > Ideate > Prototype > Test> Implement
c) Empathize > Design > Implement > Produce > Test
d) Understand > Define > Ideate > Produce > Try

2) Design Thinking is a Linear Process True or False?
a) True b) False

3) After you define the problem, the next step is to _____.
a) Test b) Prototype
c) Ideate d) Empathize

4) Design Thinking Skills _____.
a) Emotional Intelligence b) Consensus Building
c) Both a) and b) d) None of these

5) Establishing the relative importance of customer need can be done only after _____.
a) Organizing data into a hierarchy of customer needs
b) Collecting raw data from customers
c) Reflecting on the results and the process of identifying customer need
d) None of the above

6) Focus groups are one of the methods for _____.
   a) Interpreting raw data collected from customers
   b) Organizing data into a hierarchy of customer needs
   c) Gathering raw data from customers
   d) Reflecting on the results and the process of identifying customer need

7) Brainstorming is one of the problem-solving techniques True or False?
   a) TRUE b) FALSE

8) Types of Brainstorming _____.
   a) Electronic Brainstorming b) Verbal Brainstorming
   c) Nominal Group Techniques d) All of Above

9) What is an aspect of service design?
   a) Resources to connect people and/or machines
   b) Environmental
   c) Process and experience
   d) All of above

10) What is a service?
   a) A provided way for performing a task
   b) How the user interacts with a product
   c) When a person helps the user buys something
   d) A way to evaluate whether a task is achieved or not

11) Design Service Process dependencies should be kept to a _____.
   a) Minimum b) Maximum
   c) Equal d) None of above

12) Figure shows the conceptual drawing of a (n) _____ architecture.

   a) Slot-modular b) Bus-modular
   c) Sectional-modular d) Integral

13) Environmental impact that affects the product life cycle.
   a) Global warming b) Solid waste
   c) Water pollution d) All of These

14) Design for Environment (DFE) is a method to _____ environmental impact of product over its life cycle.

Q.3	**a)**	What are the different goals of customer needs identification?	**04**
	b)	What are the different methods to identify the customer need and explain in brief?	**05**
Q.4	**a)**	What do you meant by the prototype? Explain the different methods of prototype.	**04**
	b)	What do you meant by Concept Generation? Draw a five step generation method and explain in short.	**05**
Q.5	**a)**	Enlist and explain in short of various design thinking skills.	**04**
	b)	Explain the term of brainstorming.	**05**

SECTION – II

Q.6 Attempt Following Questions. (Any Two) **10**

a) What are the different tools used in the service design & explain the tools of the service design in brief?

b) Explain the term Service Design.

c) What is the service design & explain the term of service design in brief?

Q.7 Write a note on (Any Two) **10**

a) Financial analysis and needs of financial analysis.

b) Different aspect of the product architecture.

c) Product Architecture and its types.

Q.8 Write a note on (Any Two) **08**

a) Spiral Product Development Process.

b) Draw & explain in short, the design for environment process.

c) Design for Environment term.

S.Y. (B.Tech.) (Civil Engineering) (Semester - I) (New) (NEP CBCS)
Examination: March/April – 2026
Design Thinking (CIVHON-01A)

Day & Date: Wednesday, 13-05-2026 Max. Marks: 70
Time: 03:00 PM To 06:00 PM

Instructions: 1) Q. No. 1 is compulsory. It should be solved in the first 30 minutes in Answer Book Page no 03 (Starting page of the Answer Book). Each question carries one mark.
2) Don't forget to Mention question paper set (P/Q/R/S) on top of page.
3) Figures to the right indicates full marks.
4) Assume suitable data if necessary and mention it clearly.

MCQ/Objective Type Questions

Duration: 30 Minutes Marks:14

Q.1 Choose the correct alternative from the given options. 14

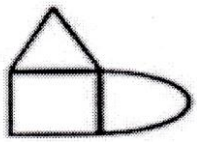
1) Design Service Process dependencies should be kept to a _____.
a) Minimum b) Maximum
c) Equal d) None of above

2) Figure shows the conceptual drawing of a (n) _____ architecture.



a) Slot-modular b) Bus-modular
c) Sectional-modular d) Integral

3) Environmental impact that affects the product life cycle.
a) Global warming b) Solid waste
c) Water pollution d) All of These

4) Design for Environment (DFE) is a method to _____ environmental impact of product over its life cycle.
a) Maximize b) Minimize
c) Equal d) None of above

5) What are the steps of the design thinking process?
a) Understand > Draw > Ideate > Create > Test> Implement
b) Empathize > Define > Ideate > Prototype > Test> Implement
c) Empathize > Design > Implement > Produce > Test
d) Understand > Define > Ideate > Produce > Try

6) Design Thinking is a Linear Process True or False?
a) True b) False

7) After you define the problem, the next step is to _____.
a) Test b) Prototype
c) Ideate d) Empathize

8) Design Thinking Skills _____.
a) Emotional Intelligence b) Consensus Building
c) Both a) and b) d) None of these

9) Establishing the relative importance of customer need can be done only after _____.
a) Organizing data into a hierarchy of customer needs
b) Collecting raw data from customers
c) Reflecting on the results and the process of identifying customer need
d) None of the above

10) Focus groups are one of the methods for _____.
a) Interpreting raw data collected from customers
b) Organizing data into a hierarchy of customer needs
c) Gathering raw data from customers
d) Reflecting on the results and the process of identifying customer need

11) Brainstorming is one of the problem-solving techniques True or False?
a) TRUE b) FALSE

12) Types of Brainstorming _____.
a) Electronic Brainstorming b) Verbal Brainstorming
c) Nominal Group Techniques d) All of Above

13) What is an aspect of service design?
a) Resources to connect people and/or machines
b) Environmental
c) Process and experience
d) All of above

14) What is a service?
a) A provided way for performing a task
b) How the user interacts with a product
c) When a person helps the user buys something
d) A way to evaluate whether a task is achieved or not

MCQ/Objective Type Questions

Duration: 30 Minutes Marks: 14

Q.1 Choose the correct alternatives from the options and rewrite the sentences. **14**

1) Which body is responsible for ensuring safety in Indian Railways?
a) Railway Board
b) Ministry of Transport
c) Commission of Railway Safety (CRS)
d) Indian Railway Finance Corporation

2) What is the primary source of revenue for Indian Railways?
a) Sale of land b) Advertising
c) Passenger and freight traffic d) Donations

3) Which of the following is not a function of the Indian Railway Finance Corporation (IRFC)?
a) Leasing rolling stock b) Safety inspection
c) Raising funds d) Financing railway projects

4) What is the purpose of a traffic survey in railway planning?
a) To locate underground utilities
b) To estimate soil bearing capacity
c) To assess current and future transportation demand
d) To identify forest land

5) What does a reconnaissance survey involve?
a) Detailed alignment marking
b) Collection of topographical and geological data through visual inspection
c) Final construction drawings
d) Construction of embankments

6) The necessity of providing curves in a railway track is mainly due to _____.
   a) To increase train speed
   b) To avoid obstructions and follow terrain
   c) To reduce construction cost only
   d) To decrease the gradient

7) A simple curve in railway alignment is defined as _____.
   a) A curve composed of two or more arcs of different radii
   b) A curve consisting of a single arc of a circle
   c) A curve used for changing gradient
   d) A curve used only in yards

8) The degree of curve is defined as _____.
   a) The angle subtended at the center by a chord of 30 m
   b) The angle subtended at the center by a chord of 20 m
   c) The angle subtended at the center by a chord of 25 m
   d) The angle subtended at the center by a chord of 50 m

9) The most used rail type for high-speed tracks is _____.
   a) Flat-bottomed rail b) Bullhead rail
   c) Double-headed rail d) Grooved rail

10) Bullhead rails are mainly used in _____.
   a) Modern high-speed lines b) Old Indian Railway tracks
   c) Tramways d) Metro rail systems

11) Blanket in railway track refers to _____.
   a) Layer above ballast b) Layer below ballast
   c) Layer in the middle of ballast d) Ballast itself

12) Which is NOT a function of blanket material in railway embankment?
   a) Improve drainage b) Distribute load
   c) Prevent capillary rise d) Provide aesthetics

13) Grade compensation on curves is provided to _____.
   a) Increase train speed
   b) Reduce resistance due to curvature
   c) Compensate for worn out rails
   d) Increase the track length

14) Superelevation or cant on curved tracks is provided to _____.
   a) Increase friction between rails and wheels
   b) Counteract centrifugal force on curves
   c) Flatten the curve for high speed
   d) Reduce gradient effects

Examination: March/April – 2026
Railway Track Structure (CIVHON-01D)

Day & Date: Wednesday, 13-05-2026 Max. Marks: 56
Time: 03:00 PM To 06:00 PM

Instructions: 1) Q.2 and Q.6 are compulsory questions, solve any two main questions from Section – I & any two main questions from Section – II
2) Figures to the right indicate full marks.
3) Assume additional data if required and mention it clearly.

SECTION – I

Q.2 Solve the following questions. **08**

a) What is the Long-Term Corporate Plan of Indian Railways, and how does it align with national transport policy and infrastructure development goals?

b) Classify the railway lines in India and discuss the various gauges used globally and in India. What are the technical and operational challenges caused by gauge variation, and how does the Uni-gauge policy address them?

Q.3 Solve of the following questions. **10**

a) Write the importance of surveying in construction of Railway line.

b) What are the Modern Surveying techniques for Difficult Terrain?

Q.4 Solve the following questions. **10**

a) What is Superelevation, Safe/Permissible Speed on Curves?

b) What are the Different Gauges on Indian Railways? Explain in detail.

Q.5 Solve of the following questions. **10**

a) Explain horizontal and Vertical curves.

b) Write a short not on ‘Preliminary Investigations for a New Railway Line.

SECTION – II

Q.6 Solve the following questions. **08**

a) What are the Laboratory Tests for Physical Properties of Ballast?

b) What are the Functions and Requirements of Sleepers?

Q.7 Solve the following questions. **10**

a) Explain the methods and challenges involved in the execution of earthwork in embankments and cuttings for railway tracks.

b) Describe the various types of rail fastenings and fittings used for wooden, steel trough, and cast- iron sleepers.

Q.8 Solve the following questions. **10**

a) Explain Necessity and objectives of geometric design of Railway Track.

b) What are the cautions considered in inspection and Maintenance of Points and Crossings?

Q.9 Solve the following questions. **10**

a) What is the Rail? Write Functions of Rails, and Types of Rails.

b) Write a note on Blanket and Blanketing Material.

Seat No.		Set	S

S.Y. (B.Tech.) (Civil Engineering) (Semester - I) (New) (NEP CBCS)
Examination: March/April – 2026
Railway Track Structure (CIVHON-01D)

Day & Date: Wednesday, 13-05-2026 Max. Marks: 70
Time: 03:00 PM To 06:00 PM

Instructions: 1) Q. No. 1 is compulsory. It should be solved in the first 30 minutes in Answer Book Page no 03 (Starting page of the Answer Book). Each question carries one mark.
2) Don't forget to Mention question paper set (P/Q/R/S) on top of page.
3) Figures to the right indicates full marks.
4) Assume suitable data if required and mention it clearly.

MCQ/Objective Type Questions

Duration: 30 Minutes Marks: 14

Q.1 Choose the correct alternatives from the options and rewrite the sentences. **14**

1) The necessity of providing curves in a railway track is mainly due to _____.
a) To increase train speed
b) To avoid obstructions and follow terrain
c) To reduce construction cost only
d) To decrease the gradient

2) A simple curve in railway alignment is defined as _____.
a) A curve composed of two or more arcs of different radii
b) A curve consisting of a single arc of a circle
c) A curve used for changing gradient
d) A curve used only in yards

3) The degree of curve is defined as _____.
a) The angle subtended at the center by a chord of 30 m
b) The angle subtended at the center by a chord of 20 m
c) The angle subtended at the center by a chord of 25 m
d) The angle subtended at the center by a chord of 50 m

4) The most used rail type for high-speed tracks is _____.
a) Flat-bottomed rail b) Bullhead rail
c) Double-headed rail d) Grooved rail

5) Bullhead rails are mainly used in _____.
a) Modern high-speed lines b) Old Indian Railway tracks
c) Tramways d) Metro rail systems

6) Blanket in railway track refers to _____.
a) Layer above ballast b) Layer below ballast
c) Layer in the middle of ballast d) Ballast itself

7) Which is NOT a function of blanket material in railway embankment?
a) Improve drainage b) Distribute load
c) Prevent capillary rise d) Provide aesthetics

8) Grade compensation on curves is provided to _____.
a) Increase train speed
b) Reduce resistance due to curvature
c) Compensate for worn out rails
d) Increase the track length

9) Superelevation or cant on curved tracks is provided to _____.
a) Increase friction between rails and wheels
b) Counteract centrifugal force on curves
c) Flatten the curve for high speed
d) Reduce gradient effects

10) Which body is responsible for ensuring safety in Indian Railways?
a) Railway Board
b) Ministry of Transport
c) Commission of Railway Safety (CRS)
d) Indian Railway Finance Corporation

11) What is the primary source of revenue for Indian Railways?
a) Sale of land b) Advertising
c) Passenger and freight traffic d) Donations

12) Which of the following is not a function of the Indian Railway Finance Corporation (IRFC)?
a) Leasing rolling stock b) Safety inspection
c) Raising funds d) Financing railway projects

13) What is the purpose of a traffic survey in railway planning?
a) To locate underground utilities
b) To estimate soil bearing capacity
c) To assess current and future transportation demand
d) To identify forest land

14) What does a reconnaissance survey involve?
a) Detailed alignment marking
b) Collection of topographical and geological data through visual inspection
c) Final construction drawings
d) Construction of embankments

Set S

S.Y. (B.Tech.) (Civil Engineering) (Semester - I) (New) (NEP CBCS)
Examination: March/April – 2026
Railway Track Structure (CIVHON-01D)

Day & Date: Wednesday, 13-05-2026 Max. Marks: 56
Time: 03:00 PM To 06:00 PM

Instructions: 1) Q.2 and Q.6 are compulsory questions, solve any two main questions from Section – I & any two main questions from Section – II
2) Figures to the right indicate full marks.
3) Assume additional data if required and mention it clearly.

SECTION – I

Q.2 Solve the following questions. **08**

a) What is the Long-Term Corporate Plan of Indian Railways, and how does it align with national transport policy and infrastructure development goals?

b) Classify the railway lines in India and discuss the various gauges used globally and in India. What are the technical and operational challenges caused by gauge variation, and how does the Uni-gauge policy address them?

Q.3 Solve of the following questions. **10**

a) Write the importance of surveying in construction of Railway line.

b) What are the Modern Surveying techniques for Difficult Terrain?

Q.4 Solve the following questions. **10**

a) What is Superelevation, Safe/Permissible Speed on Curves?

b) What are the Different Gauges on Indian Railways? Explain in detail.

Q.5 Solve of the following questions. **10**

a) Explain horizontal and Vertical curves.

b) Write a short not on ‘Preliminary Investigations for a New Railway Line.

SECTION – II

Q.6 Solve the following questions. **08**

a) What are the Laboratory Tests for Physical Properties of Ballast?

b) What are the Functions and Requirements of Sleepers?

Q.7 Solve the following questions. **10**

a) Explain the methods and challenges involved in the execution of earthwork in embankments and cuttings for railway tracks.

b) Describe the various types of rail fastenings and fittings used for wooden, steel trough, and cast- iron sleepers.

Q.8 Solve the following questions. **10**

a) Explain Necessity and objectives of geometric design of Railway Track.

b) What are the cautions considered in inspection and Maintenance of Points and Crossings?

Q.9 Solve the following questions. **10**

a) What is the Rail? Write Functions of Rails, and Types of Rails.

b) Write a note on Blanket and Blanketing Material.

Examination: March/April – 2026
Universal Human Values (VEC-01)

Day & Date: Friday, 15-05-2026 Max. Marks: 50
Time: 03:00 PM To 04:30 PM

Instructions: 1) All questions are compulsory.
2) Figures to the right indicate full marks.
3) Mention Question Paper Set (P/Q/R/S) on Top of Page.

Answer

Q.1 Solve following Multiple Choice Questions.

1) Value education enables us _____.
a) To understand our needs
b) Visualize our goals correctly
c) Indicate the direction for their fulfillment
d) All of the above

2) One of the basic desires of every human being is to be always _____.
a) Happy b) Sad
c) Laugh d) Earn Money

3) _____ is the basic unit of any human society.
a) Group b) Individual
c) Nature d) Society

4) Natural acceptance & _____ are the two processes of knowing.
a) Self -Actualization b) Self Exploration
c) Self Evaluation d) Self Control

5) Present Education system gives more focus to skills.
a) True b) False
c) May be d) None of the above

6) Value of an entity is _____.
a) Physical Facility
b) Prosperity
c) Its participation in larger order of which it is part
d) Both a and b

7) _____ are as Basic Human Aspirations.
a) Money
b) Relationship without money
c) Physical Facility
d) Continuous Happiness & Prosperity

8) Any course content on value education needs to be _____.
a) Universal b) Rational
c) Natural d) All of above

9) When we live with correct understanding of values, we feel _____.
a) Deprived b) Frustrated
c) Happy d) Unhappy

10) Following are the basic guidelines for value education except _____.
a) Universal b) Personal
c) Rational d) Natural

11) Please give the correct priority for Physical Facilities, Right Understanding and Relationship.
a) Physical Facilities, Right Understanding and Relationship
b) Relationship, Right Understanding and Physical Facilities
c) Right Understanding, Relationship and Physical Facilities
d) None of the above

12) Right Understanding and relationships lead to _____.
a) Mutual Happiness b) Mutual Prosperity
c) Both a and b d) All are wrong

13) Right Understanding and Physical Facilities leads to _____.
a) Mutual Happiness b) Mutual Prosperity
c) Both a and b d) All are wrong

14) ____ are the content of self-exploration.
a) Program b) Desire
c) Both a and b d) None of the above

15) To be in state of liking is _____.
a) Happy b) Unhappy
c) Both a and b d) None of the above

16) _____ helps the human being to transform from Animal consciousness to human consciousness.
a) Physical Facility b) Right understanding
c) Relationship d) All of above

17) _____ is only a means to achieve what is considered valuable for a human being in an effective and efficient manner.

a) Value b) Skill
c) Technology d) All of above

18) _____ means physical facilities more than to satisfy my needs.

a) Health b) Prosperity
c) Happiness d) None of above

19) If something is _____ to us, without any force or compulsion, then it is often correct and does not change with time and people.

a) naturally acceptable b) pushed
c) common d) None of above

20) Physical facilities are necessary and complete for _____.

a) Animal b) Human being
c) Nature d) All of the above

21) Beside physical facilities human being want _____.

a) Name b) Fame
c) Relationship d) None of the above

22) When you are living with pre-conditionings and accumulated desires without evaluating them, then it means that you are _____.

a) Swatantra b) Partantra
c) Prosperous d) None of the above

23) To be in state of _____ is unhappiness.

a) Disharmony b) Contradiction
c) Disharmony or contradiction d) None of the above

24) Which of following leads to variety of problems at different levels of our living?

a) Lack of right understanding of happiness
b) Lack of right understanding of prosperity
c) Lack of right understanding of happiness & prosperity
d) Lack of awareness towards health

25) Working only for physical facilities in living is called _____.

a) Animal Consciousness b) Human Consciousness
c) Rich Consciousness d) None of these

26) Self and _____ are different in nature, materiality, needs and activities.

a) Trust b) Body
c) Belief d) None of the above

27) Sukh and _____ both are needed and can't replace each other.

a) Self b) Body
c) Suvidha d) Belief

28) In value education Sanyama means _____.

a) Self-regulation b) Health
c) Happiness d) Prosperity

29) Sadupyog of the Body mean _____ of the Body.

a) Self-regulation b) Care
c) Happiness d) Right utilization

30) Knowing means having the _____.

a) Assumption b) Right understanding
c) Right feeling d) None of the above

31) Each human being is co-existence of the _____ and the _____.

a) self, self b) body, body
c) self, body d) None of the above

32) _____ is the feeling of responsibility for nurturing, protecting and right utilizing the body.

a) Swasthya b) Sanyam
c) Prosperity d) None of the above

33) The system of the body works in a _____ way.

a) Happy b) Self organized
c) Random d) Independent

34) The self is _____ in nature while body is _____ in nature.

a) Unconscious, Physico-chemical
b) Conscious, Physico-chemical
c) Physico-chemical, Conscious
d) Physico-chemical, Unconscious

35) The activity of desire, thought and expecting together is called as _____.

a) Body b) Health
c) Imagination d) Future

36) Harmony should be maintained in _____.

a) Between body and life
b) Between self and society
c) Between life and environment
d) All the above

37) Sah-astitva means _____.

a) Co-existence b) Co-operation
c) Co-ordination d) Corporate identity

38) The process of education and right living leads to _____ in the individual.

a) Right understanding b) Health
c) Prosperity d) None of the above

39) Ensuring justice in the relationship, on the basis of values leads to _____ in society.

a) Fearlessness b) Confusion
c) Confidence d) Fear

40) _____ is the foundational value in relationship.

a) Respect b) Love
c) Trust d) Glory

41) To be assured of others at all time is the feeling of _____.

a) Respect b) Love
c) Trust d) Glory

42) _____ is the feeling for someone who has made efforts for excellence.

a) Reverence b) Glory
c) Gratitude d) Guidance

43) _____ is the feeling of acceptance for those who have made efforts for my excellence.

a) Reverence b) Glory
c) Gratitude d) Guidance

44) The feeling of relatedness to all human beings is called _____.

a) Love b) Affection
c) Gratitude d) Respect

45) All the units of nature can be classified into _____ orders.

a) Two b) Three
c) Four d) Six

46) Which of the following does not form an order in nature?

a) Bio b) Animal
c) Consciousness d) Human

47) Which of the following statement is not true?

a) There is interconnectedness in nature
b) There is recyclability and self-regulation in nature
c) There is struggle for survival in nature
d) There is mutual fulfillment in nature

48) Harmony in the family is the building block for harmony in the _____.

a) society b) individual
c) friend d) relative

49) _____ in the family means that the family is able to identify its needs.

a) wealth
b) prosperity
c) harmony
d) happiness

50) _____ means right evaluation.

a) Respect
b) Love
c) Trust
d) Glory

a) There is interconnectedness in nature
b) There is recyclability and self-regulation in nature
c) There is struggle for survival in nature
d) There is mutual fulfillment in nature

28) Harmony in the family is the building block for harmony in the _____.

a) society b) individual
c) friend d) relative

29) _____ in the family means that the family is able to identify its needs.

a) wealth b) prosperity
c) harmony d) happiness

30) _____ means right evaluation.

a) Respect b) Love
c) Trust d) Glory

31) Value education enables us _____.

a) To understand our needs
b) Visualize our goals correctly
c) Indicate the direction for their fulfillment
d) All of the above

32) One of the basic desires of every human being is to be always _____.

a) Happy b) Sad
c) Laugh d) Earn Money

33) _____ is the basic unit of any human society.

a) Group b) Individual
c) Nature d) Society

34) Natural acceptance & _____ are the two processes of knowing.

a) Self -Actualization b) Self Exploration
c) Self Evaluation d) Self Control

35) Present Education system gives more focus to skills.

a) True b) False
c) May be d) None of the above

36) Value of an entity is _____.

a) Physical Facility
b) Prosperity
c) Its participation in larger order of which it is part
d) Both a and b

37) _____ are as Basic Human Aspirations.

a) Money
b) Relationship without money
c) Physical Facility
d) Continuous Happiness & Prosperity

38) Any course content on value education needs to be _____.

a) Universal b) Rational
c) Natural d) All of above

39) When we live with correct understanding of values, we feel _____.

a) Deprived b) Frustrated
c) Happy d) Unhappy

40) Following are the basic guidelines for value education except _____.

a) Universal b) Personal
c) Rational d) Natural

41) Please give the correct priority for Physical Facilities, Right Understanding and Relationship.

a) Physical Facilities, Right Understanding and Relationship
b) Relationship, Right Understanding and Physical Facilities
c) Right Understanding, Relationship and Physical Facilities
d) None of the above

42) Right Understanding and relationships lead to _____.

a) Mutual Happiness b) Mutual Prosperity
c) Both a and b d) All are wrong

43) Right Understanding and Physical Facilities leads to _____.

a) Mutual Happiness b) Mutual Prosperity
c) Both a and b d) All are wrong

44) ____ are the content of self-exploration.

a) Program b) Desire
c) Both a and b d) None of the above

45) To be in state of liking is _____.

a) Happy b) Unhappy
c) Both a and b d) None of the above

46) _____ helps the human being to transform from Animal consciousness to human consciousness.

a) Physical Facility b) Right understanding
c) Relationship d) All of above

31) Beside physical facilities human being want _____.
a) Name b) Fame
c) Relationship d) None of the above

32) When you are living with pre-conditionings and accumulated desires without evaluating them, then it means that you are _____.
a) Swatantra b) Partantra
c) Prosperous d) None of the above

33) To be in state of _____ is unhappiness.
a) Disharmony b) Contradiction
c) Disharmony or contradiction d) None of the above

34) Which of following leads to variety of problems at different levels of our living?
a) Lack of right understanding of happiness
b) Lack of right understanding of prosperity
c) Lack of right understanding of happiness & prosperity
d) Lack of awareness towards health

35) Working only for physical facilities in living is called _____.
a) Animal Consciousness b) Human Consciousness
c) Rich Consciousness d) None of these

36) Self and _____ are different in nature, materiality, needs and activities.
a) Trust b) Body
c) Belief d) None of the above

37) Sukh and _____ both are needed and can't replace each other.
a) Self b) Body
c) Suvidha d) Belief

38) In value education Sanyama means _____.
a) Self-regulation b) Health
c) Happiness d) Prosperity

39) Sadupyog of the Body mean _____ of the Body.
a) Self-regulation b) Care
c) Happiness d) Right utilization

40) Knowing means having the _____.
a) Assumption b) Right understanding
c) Right feeling d) None of the above

41) Each human being is co-existence of the _____ and the _____.
a) self, self b) body, body
c) self, body d) None of the above

42) _____ is the feeling of responsibility for nurturing, protecting and right utilizing the body.
a) Swasthya b) Sanyam
c) Prosperity d) None of the above

43) The system of the body works in a _____ way.
a) Happy b) Self organized
c) Random d) Independent

44) The self is _____ in nature while body is _____ in nature.
a) Unconscious, Physico-chemical
b) Conscious, Physico-chemical
c) Physico-chemical, Conscious
d) Physico-chemical, Unconscious

45) The activity of desire, thought and expecting together is called as _____.
a) Body b) Health
c) Imagination d) Future

46) Harmony should be maintained in _____.
a) Between body and life
b) Between self and society
c) Between life and environment
d) All the above

47) Sah-astitva means _____.
a) Co-existence b) Co-operation
c) Co-ordination d) Corporate identity

48) The process of education and right living leads to _____ in the individual.
a) Right understanding b) Health
c) Prosperity d) None of the above

49) Ensuring justice in the relationship, on the basis of values leads to _____ in society.

a) Fearlessness
b) Confusion
c) Confidence
d) Fear

50) _____ is the foundational value in relationship.

a) Respect
b) Love

Examination: March/April – 2026
Universal Human Values (VEC-01)

Day & Date: Friday, 15-05-2026 Max. Marks: 50
Time: 03:00 PM To 04:30 PM

Instructions: 1) All questions are compulsory.
2) Figures to the right indicate full marks.
3) Mention Question Paper Set (P/Q/R/S) on Top of Page.

Answer

Q.1 Solve following Multiple Choice Questions.

1) Please give the correct priority for Physical Facilities, Right Understanding and Relationship.
a) Physical Facilities, Right Understanding and Relationship
b) Relationship, Right Understanding and Physical Facilities
c) Right Understanding, Relationship and Physical Facilities
d) None of the above

2) Right Understanding and relationships lead to _____.
a) Mutual Happiness b) Mutual Prosperity
c) Both a and b d) All are wrong

3) Right Understanding and Physical Facilities leads to _____.
a) Mutual Happiness b) Mutual Prosperity
c) Both a and b d) All are wrong

4) ____ are the content of self-exploration.
a) Program b) Desire
c) Both a and b d) None of the above

5) To be in state of liking is _____.
a) Happy b) Unhappy
c) Both a and b d) None of the above

6) _____ helps the human being to transform from Animal consciousness to human consciousness.
a) Physical Facility b) Right understanding
c) Relationship d) All of above

7) _____ is only a means to achieve what is considered valuable for a human being in an effective and efficient manner.

a) Value b) Skill
c) Technology d) All of above

8) _____ means physical facilities more than to satisfy my needs.

a) Health b) Prosperity
c) Happiness d) None of above

9) If something is _____ to us, without any force or compulsion, then it is often correct and does not change with time and people.

a) naturally acceptable b) pushed
c) common d) None of above

10) Physical facilities are necessary and complete for _____.

a) Animal b) Human being
c) Nature d) All of the above

11) Beside physical facilities human being want _____.

a) Name b) Fame
c) Relationship d) None of the above

12) When you are living with pre-conditionings and accumulated desires without evaluating them, then it means that you are _____.

a) Swatantra b) Partantra
c) Prosperous d) None of the above

13) To be in state of _____ is unhappiness.

a) Disharmony b) Contradiction
c) Disharmony or contradiction d) None of the above

14) Which of following leads to variety of problems at different levels of our living?

a) Lack of right understanding of happiness
b) Lack of right understanding of prosperity
c) Lack of right understanding of happiness & prosperity
d) Lack of awareness towards health

15) Working only for physical facilities in living is called _____.

a) Animal Consciousness b) Human Consciousness
c) Rich Consciousness d) None of these

16) Self and _____ are different in nature, materiality, needs and activities.

a) Trust b) Body
c) Belief d) None of the above

17) Sukh and _____ both are needed and can't replace each other.

a) Self b) Body
c) Suvidha d) Belief

18) In value education Sanyama means _____.

a) Self-regulation b) Health
c) Happiness d) Prosperity

19) Sadupyog of the Body mean _____ of the Body.

a) Self-regulation b) Care
c) Happiness d) Right utilization

20) Knowing means having the _____.

a) Assumption b) Right understanding
c) Right feeling d) None of the above

21) Each human being is co-existence of the _____ and the _____.

a) self, self b) body, body
c) self, body d) None of the above

22) _____ is the feeling of responsibility for nurturing, protecting and right utilizing the body.

a) Swasthya b) Sanyam
c) Prosperity d) None of the above

23) The system of the body works in a _____ way.

a) Happy b) Self organized
c) Random d) Independent

24) The self is _____ in nature while body is _____ in nature.

a) Unconscious, Physico-chemical
b) Conscious, Physico-chemical
c) Physico-chemical, Conscious
d) Physico-chemical, Unconscious

25) The activity of desire, thought and expecting together is called as _____.

a) Body b) Health
c) Imagination d) Future

26) Harmony should be maintained in _____.

a) Between body and life
b) Between self and society
c) Between life and environment
d) All the above

27) Sah-astitva means _____.

a) Co-existence b) Co-operation
c) Co-ordination d) Corporate identity

28) The process of education and right living leads to _____ in the individual.

a) Right understanding b) Health
c) Prosperity d) None of the above

29) Ensuring justice in the relationship, on the basis of values leads to _____ in society.

a) Fearlessness b) Confusion
c) Confidence d) Fear

30) _____ is the foundational value in relationship.

a) Respect b) Love
c) Trust d) Glory

31) To be assured of others at all time is the feeling of _____.

a) Respect b) Love
c) Trust d) Glory

32) _____ is the feeling for someone who has made efforts for excellence.

a) Reverence b) Glory
c) Gratitude d) Guidance

33) _____ is the feeling of acceptance for those who have made efforts for my excellence.

a) Reverence b) Glory
c) Gratitude d) Guidance

34) The feeling of relatedness to all human beings is called _____.

a) Love b) Affection
c) Gratitude d) Respect

35) All the units of nature can be classified into _____ orders.

a) Two b) Three
c) Four d) Six

36) Which of the following does not form an order in nature?

a) Bio b) Animal
c) Consciousness d) Human

37) Which of the following statement is not true?

a) There is interconnectedness in nature
b) There is recyclability and self-regulation in nature
c) There is struggle for survival in nature
d) There is mutual fulfillment in nature

38) Harmony in the family is the building block for harmony in the _____.

a) society b) individual
c) friend d) relative

39) _____ in the family means that the family is able to identify its needs.

a) wealth b) prosperity
c) harmony d) happiness

40) _____ means right evaluation.

a) Respect b) Love
c) Trust d) Glory

41) Value education enables us _____.

a) To understand our needs
b) Visualize our goals correctly
c) Indicate the direction for their fulfillment
d) All of the above

42) One of the basic desires of every human being is to be always _____.

a) Happy b) Sad
c) Laugh d) Earn Money

43) _____ is the basic unit of any human society.

a) Group b) Individual
c) Nature d) Society

44) Natural acceptance & _____ are the two processes of knowing.

a) Self -Actualization b) Self Exploration
c) Self Evaluation d) Self Control

45) Present Education system gives more focus to skills.

a) True b) False
c) May be d) None of the above

46) Value of an entity is _____.

a) Physical Facility
b) Prosperity
c) Its participation in larger order of which it is part
d) Both a and b

47) _____ are as Basic Human Aspirations.

a) Money
b) Relationship without money
c) Physical Facility
d) Continuous Happiness & Prosperity

48) Any course content on value education needs to be _____.

a) Universal b) Rational
c) Natural d) All of above

49) When we live with correct understanding of values, we feel _____.

a) Deprived
b) Frustrated
c) Happy
d) Unhappy

50) Following are the basic guidelines for value education except _____.

a) Universal
b) Personal
c) Rational
d) Natural

Structural Mechanics - II (CIVPCC-04)

Day & Date: Saturday, 16-05-2026 Max. Marks: 70
Time: 10:00 AM To 01:00 PM

Instructions: 1) Q. No. 1 is compulsory. It should be solved in the first 30 minutes in Answer Book Page no 03 (Starting page of the Answer Book). Each question carries one mark
2) Don't forget to Mention question paper set (P/Q/R/S) on top on page.
3) Figures to the right indicates full marks.
4) Make suitable data wherever needed and state them clearly.

MCQ/Objective Type Questions

Duration: 30 Minutes Marks:14

Q.1 Multiple Choice Questions. **14**

1) Stress may be expressed in Newtons _____.
a) per millimetre square (N/mm^2)
b) per centimetre square (N/cm^2)
c) per metre square (N/m^2)
d) All of the above

2) Direct and bending stress occurs due to _____.
a) Axial loading b) Concentric loading
c) Eccentric loading d) Any of the above

3) The equivalent length is equal to half the actual length of a column with _____.
a) One end fixed and other end free
b) Both end fixed
c) Both end hinged
d) One end fixed and other end hinged

4) Euler's formula is applicable for _____.
a) Short columns b) Long columns
c) Intermediate columns d) All columns

5) Moment area method is primarily used for finding _____.
a) Shear force b) Slope & Deflection
c) Bending stress d) Axial stress

6) In conjugate beam method, shear force in conjugate beam represents _____.
a) Bending moment b) Slope
c) Deflection d) Shear force

7) Unit of deflection is _____.
a) kNm b) kN/m
c) Kn d) m

8) The number of independent equations to be satisfied for static equilibrium of a plane structure is _____.
a) 2 b) 6
c) 3 d) None of these

9) A structure is statically indeterminate when _____.
a) Equations of equilibrium are sufficient
b) Unknown reactions > equilibrium equations
c) No deformation occurs
d) Material is elastic

10) Flexibility matrix is always _____.
a) Rectangular b) Diagonal
c) Symmetric d) Singular

11) Sum of distribution factors at a joint is always _____.
a) 0 b) 1
c) 0.5 d) Depends on loading

12) Moment distribution method is _____.
a) A force method b) A displacement method
c) A graphical method d) An approximate method

13) The stiffness matrix is always _____.
a) Asymmetric b) Singular
c) Symmetric d) Rectangular

14) The Size of stiffness matrix is equals to _____.
a) DSI b) DKI
c) DSI + DKI d) DSI − DKI

Day & Date: Saturday, 16-05-2026 Max. Marks: 56
Time: 10:00 AM To 01:00 PM

Instructions: 1) In section- I Q. No. 2 is compulsory and solve any two questions from the remaining.
2) In section- II Q. No. 6 is compulsory and solve any two questions from the remaining.
3) Figures to the right indicates full marks.
4) Assume suitable data wherever needed & mention it clearly.
5) Use of non-programmable calculator is allowed.

SECTION – I

Q.2 Determine the maximum and minimum stresses at the base of a vertical brick hollow square chimney of inside dimensions of 500 mm × 500 mm and thickness of 500 mm. The height of the chimney is 12 m. Take wind pressure perpendicular to chimney face as 1300 N/m^2 and weight density of brick is 20 kN/m^3. **10**

Q.3 A 1.5 m long column has a circular cross-section of 6 cm diameter. One of the ends of the column is fixed in direction and position and the other end is free. Taking factor of safety as 3, calculate the safe load using: **09**
i) Rankine's formula with $f_c = 560$ N/mm^2 & Rankine's constant is 1/1600
ii) Eulers formula with $E = 1.2 \times 10^5$ N/mm^2.

Q.4 A simply supported beam of length 10 m carries a point load of 10kN at a distance of 3 m from the left end. If $E = 2 \times 10^5$ N/mm^2 and $I = 10^8$ mm^4, determine the slope at the left support and deflection under the point load using the conjugate beam method. **09**

Q.5 **a)** Find the kernel of the rectangular section of width b and depth d. **03**

b) Write assumptions and limitations made in Euler's theory of long columns. **03**

c) Explain moment area method. **03**

SECTION – II

Q.6 Analyze the continuous beam as shown in Fig- No. 1 by moment distribution method and draw a bending moment diagram. **10**

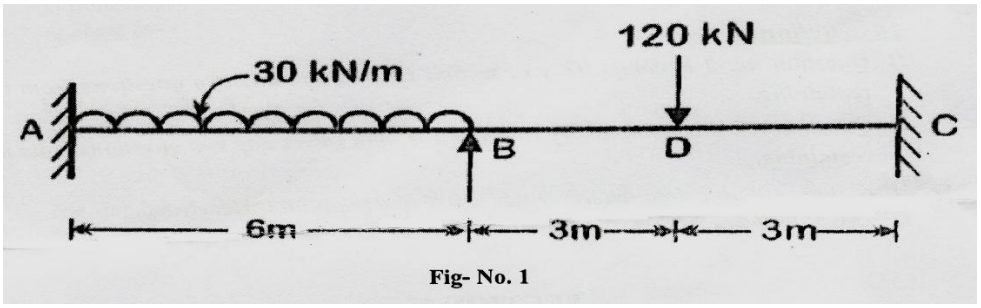

Fig- No. 1

Q.7 Analyze the continuous beam as shown in fig.No.-2 by flexibility matrix method and draw a bending moment diagram. **09**

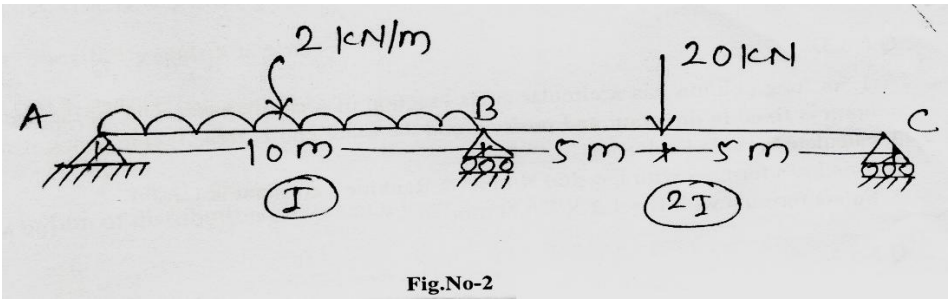

Fig.No-2

Q.8 Analyze the beam shown in Fig- No. 3 by stiffness matrix method and draw a bending moment diagram. **09**

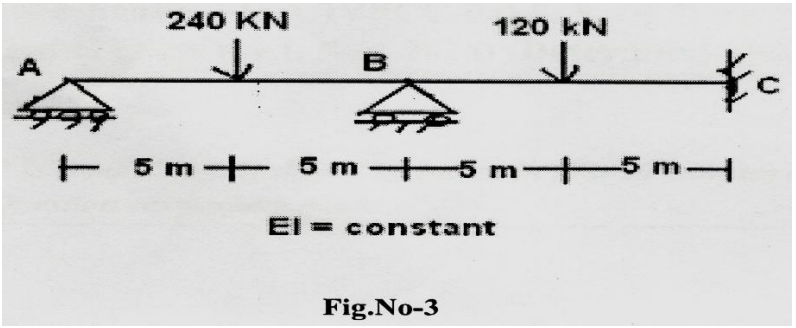

Fig.No-3

Q.9 **a)** Explain the difference between force method and displacement methods. **05**

b) Find the distribution factors of joint B & C refer Fig. No – 4 **04**

SECTION – I

Q.2 Determine the maximum and minimum stresses at the base of a vertical brick hollow square chimney of inside dimensions of 500 mm × 500 mm and thickness of 500 mm. The height of the chimney is 12 m. Take wind pressure perpendicular to chimney face as 1300 N/m^2 and weight density of brick is 20 kN/m^3. **10**

Q.3 A 1.5 m long column has a circular cross-section of 6 cm diameter. One of the ends of the column is fixed in direction and position and the other end is free. Taking factor of safety as 3, calculate the safe load using: **09**
i) Rankine's formula with $f_c = 560$ N/mm^2 & Rankine's constant is 1/1600
ii) Eulers formula with $E = 1.2 \times 10^5$ N/mm^2.

Q.4 A simply supported beam of length 10 m carries a point load of 10kN at a distance of 3 m from the left end. If $E = 2 \times 10^5$ N/mm^2 and $I = 10^8$ mm^4, determine the slope at the left support and deflection under the point load using the conjugate beam method. **09**

Q.5 **a)** Find the kernel of the rectangular section of width b and depth d. **03**

b) Write assumptions and limitations made in Euler's theory of long columns. **03**

c) Explain moment area method. **03**

SECTION – II

Q.6 Analyze the continuous beam as shown in Fig- No. 1 by moment distribution method and draw a bending moment diagram. **10**

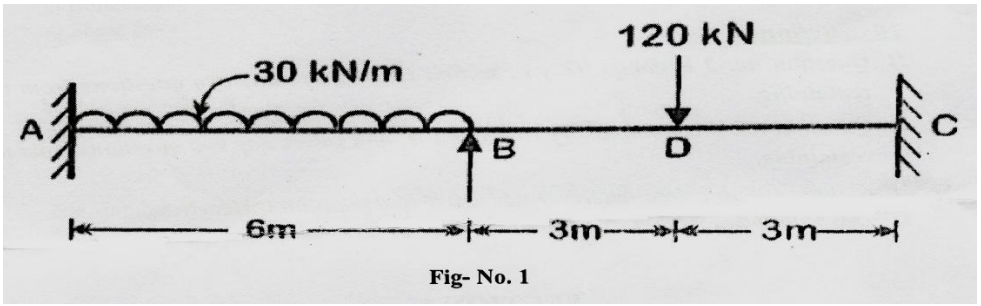

Fig- No. 1

Q.7 Analyze the continuous beam as shown in fig.No.-2 by flexibility matrix method and draw a bending moment diagram. **09**

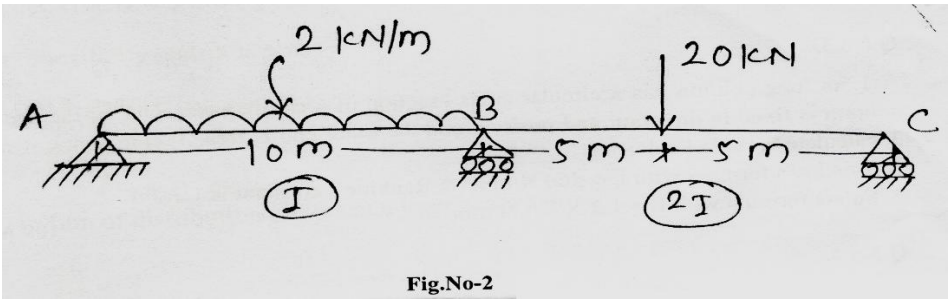

Fig.No-2

Q.8 Analyze the beam shown in Fig- No. 3 by stiffness matrix method and draw a bending moment diagram. **09**

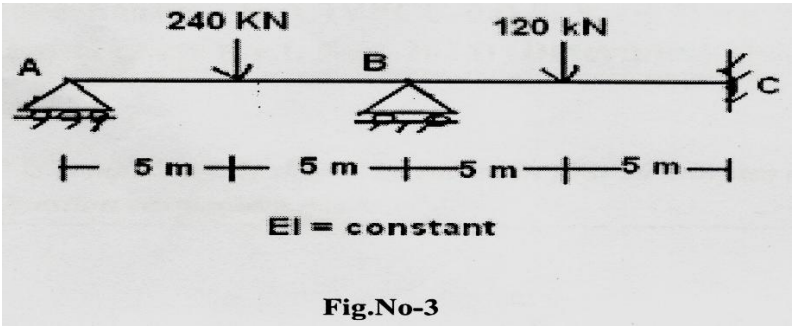

Fig.No-3

Q.9 **a)** Explain the difference between force method and displacement methods. **05**

b) Find the distribution factors of joint B & C refer Fig. No – 4 **04**

S.Y. (B.Tech.) (Civil Engineering) (Semester - II) (New) (CBCS)
Examination: March/April - 2026
Building and Infrastructure Planning (CIVPCC-05)

Day & Date: Tuesday, 19-05-2026 Max. Marks: 70
Time: 10:00 AM To 01:00 PM

Instructions: 1) Q. No. 1 is compulsory. It should be solved in the first 30 minutes in Answer Book Page no 03 (Starting page of the Answer Book). Each question carries one mark
2) Don't forget to Mention question paper set (P/Q/R/S) on top on page.
3) Figures to the right indicates full marks.
4) Assume additional data if required and mention it clearly.

MCQ/Objective Type Questions

Duration: 30 Minutes Marks:14

Q.1 Choose the correct alternative from the option and rewrite the sentence. **14**

1) In India, which climatic zone requires buildings to be oriented to maximize ventilation and minimize heat gain?
a) Hot and Dry Zone b) Cold Zone
c) Warm and Humid Zone d) Composite Zone

2) For a *Hot and Dry* climatic zone in India, what is the ideal orientation for a building?
a) North-South b) East-West
c) Northeast-Southwest d) Northwest-Southeast

3) What is Daylighting?
a) Artificial lighting during the day
b) Use of natural sunlight for indoor lighting
c) Nighttime artificial illumination
d) Decorative lighting only used outdoors

4) The primary objective of ventilation in buildings is to _____.
a) Reduce building height
b) Maintain air quality by removing stale air
c) Decrease the strength of building materials
d) Increase humidity unnecessarily

5) Which type of paint is most suitable for use in moist environments like kitchens and bathrooms?
a) Emulsion paint b) Distemper
c) Oil-based paint d) Enamel paint

6) What is the primary solvent used in traditional oil-based varnishes?
a) Water b) Spirit
c) Turpentine d) Alcohol

7) In tile cladding, what is the main function of the adhesive?
a) To improve colour appearance
b) To bond the tiles securely to the surface
c) To waterproof the tile surface
d) To make the tiles flexible

8) Which material is commonly used for sound absorption in auditoriums?
a) Glass b) Marble
c) Acoustic foam d) Steel

9) Sabine's formula is used to calculate which of the following?
a) Sound intensity b) Reverberation time
c) Frequency of sound d) Noise transmission

10) Which of the following is a sloped type of roof commonly used in rainy regions?
a) Flat roof b) Gable roof
c) Shell roof d) Domed roof

11) Which material is most used for domestic plumbing pipes due to its lightweight and corrosion resistance?
a) Stoneware b) Cast Iron (Cl)
c) Polyvinyl Chloride (PVC) d) Asbestos Cement (AC)

12) In plumbing systems, the trap that is typically installed below a water closet pan is called _____.
a) S-trap b) P-trap
c) Bottle trap d) Grease trap

13) Which material is generally considered most fire-resistant?
a) Wood b) Steel
c) Brick masonry d) Plastic

14) What is the term used when fire load exceeds normal limits due to unusual occupancy or storage?
a) Structural load b) Fire hazard
c) Abnormal fire load d) Passive fire protection

MCQ/Objective Type Questions

Duration: 30 Minutes Marks:14

Q.1 Choose the correct alternatives from the option and rewrite the sentence. **14**

1) Settling velocity of a spherical body in a viscous fluid is given by _____.
a) Reynolds law b) Newton's law
c) Stokes law d) Charles law

2) The purpose of aeration used in water treatment _____.
a) To increase the percentage of dissolved oxygen in water
b) To remove volatile elements
c) Remove hydrogen sulphide
d) All of above

3) Presence of fluoride in water greater than 1.5 mg/l causes _____.
a) Cardiovascular disease b) Methemoglobinemia
c) Dental Fluorosis d) None of the above

4) Color of water is determined with the help of which of the following instrument _____.
a) Tintometer b) Osmoscope
c) Potentiometer d) None of the above

5) The type of valve which allows water to flow in one direction but prevents its flow in the reverse direction is _____.
a) Reflux valve b) Sluice valve
c) Air release valve d) Air intake valve

6) The suitable layout of distribution system for a city with roads of rectangular pattern is _____.
a) Grid system b) Dead end system
c) Ring system d) Radial system

7) Standard BOD is measured at _____.
a) 20 degree - 1 day
b) 20 degree - 5 day
c) 30 degree - 3 day
d) 27 degree - 5 day

8) Sewer system is designed for _____.
a) Maximum flow only
b) Minimum flow only
c) Average flow
d) Both Maximum and minimum flow

9) Parshalli flume/ Sutro weir is installed in which of the following unit of sewage treatment?
a) Screening
b) Grit Chamber
c) ASP
d) Septic tank

10) Grit Chamber is used for the removal of _____.
a) Organic S.S.
b) Inorganic S.S.
c) Both
d) Volatile Organic S.S.

11) The minimum amount of D.O that must be present in a stream for the survival of fishes is _____.
a) 1mg/l
b) 6mg/l
c) 20mg/l
d) 4mg/l

12) Which of the following units works in anaerobic conditions?
a) Septic tank
b) Activated sludge treatment
c) Sedimentation tank
d) Trickling filters

13) As compared to geometrical increase method, arithmetic increase method of population forecasting gives _____.
a) Lesser value
b) Higher value
c) Same value
d) Accurate value

14) By which of the following methods, zero hardness can be achieved _____.
a) Lime-soda method
b) Boiling method
c) Zeolite/Ion Exchange method
d) None

Instructions: 1) In section- I Q. No. 2 is compulsory and solve any two questions from the remaining. (Q. No. 3, 4 & 5)
2) In section- II Q. No. 6 is compulsory and solve any two questions from the remaining (Q. No. 7, 8, & 9)
3) Figures to the right indicate full marks.
5) Draw neat sketch's where required and assume suitable data wherever needed & mention it clearly.

SECTION – I

Q.2 A town of present population of 50000, have average per capita water demand of 160lpcd. Water is pumped into an overhead tank at a uniform rate continuously for 24 hrs. The demand pattern is shown below. **08**

Determine the required balancing storage capacity of the overhead tank.

Hours	0-8	8-10	10-16	16-20	20-24
Demand (%)	5	40	20	25	10

Q.3 Estimate the population of the city in 2041 by geometric increase method and incremental increase method. **10**

Year	1981	1991	2001	2011	2021
Population	40,000	60,000	85,000	1,15000	2,00,000

Q.4 Write short notes on **10**
a) Turbidity of water
b) Alkalinity of water
c) Hardness of water

Q.5 Explain briefly MBBR, SBR and MBR. **10**

SECTION– II

Q.6 A waste water effluent of 560 L/s with a BOD of 50mg/l, D.O of 3.0 mg/l enters a river where the flow is 28m3/s with a BOD of 4mg/l and D.O of 8.2 mg/l. The velocity of water in stream is 0.18m/s. **08**

Determine the following:

a) Combined discharge
b) BOD mix
c) DO mix

Q.7 Design a completely mixed ASP for the following data: **10**

a) Wastewater flow = 20MLD
b) Influent BOD = 200mg/l
c) Effluent BOD = 25mg/l
d) MLSS = 2000mg/l
e) F/M = 0.2
f) SVI = 80ml/g
g) Sludge age = 10days.

Q.8 Data from an unseeded domestic waste water BOD test are: 5ml of waste in a 300ml bottle, Initial D.O of 7.8mg/l, Final D.O. after 5 days of incubation is 4.3 mg/l. **10**

Compute

a) The BOD5
b) The ultimate BOD, assuming k = 0.10 (base 10) per day

Q.9 Write short notes on: **10**

a) Sludge Volume index
b) Skimming tanks
c) F/M ratio
d) Oxidation pond
e) Operational troubles of trickling filter

a) Screening b) Grit Chamber
c) ASP d) Septic tank

3) Grit Chamber is used for the removal of _____.
a) Organic S.S. b) Inorganic S.S.
c) Both d) Volatile Organic S.S.

4) The minimum amount of D.O that must be present in a stream for the survival of fishes is _____.
a) 1mg/l b) 6mg/l
c) 20mg/l d) 4mg/l

5) Which of the following units works in anaerobic conditions?
a) Septic tank b) Activated sludge treatment
c) Sedimentation tank d) Trickling filters

6) As compared to geometrical increase method, arithmetic increase method of population forecasting gives _____.
a) Lesser value b) Higher value
c) Same value d) Accurate value

7) By which of the following methods, zero hardness can be achieved _____.
   a) Lime-soda method
   b) Boiling method
   c) Zeolite/Ion Exchange method
   d) None

8) Settling velocity of a spherical body in a viscous fluid is given by _____.
   a) Reynolds law
   b) Newton's law
   c) Stokes law
   d) Charles law

9) The purpose of aeration used in water treatment _____.
   a) To increase the percentage of dissolved oxygen in water
   b) To remove volatile elements
   c) Remove hydrogen sulphide
   d) All of above

10) Presence of fluoride in water greater than 1.5 mg/l causes _____.
   a) Cardiovascular disease
   b) Methemoglobinemia
   c) Dental Fluorosis
   d) None of the above

11) Color of water is determined with the help of which of the following instrument _____.
   a) Tintometer
   b) Osmoscope
   c) Potentiometer
   d) None of the above

12) The type of valve which allows water to flow in one direction but prevents its flow in the reverse direction is _____.
   a) Reflux valve
   b) Sluice valve
   c) Air release valve
   d) Air intake valve

13) The suitable layout of distribution system for a city with roads of rectangular pattern is _____.
   a) Grid system
   b) Dead end system
   c) Ring system
   d) Radial system

14) Standard BOD is measured at _____.
   a) 20 degree - 1 day
   b) 20 degree - 5 day
   c) 30 degree - 3 day
   d) 27 degree - 5 day

Set Q

S.Y. (B.Tech.) (Civil Engineering) (Semester - II) (New) (CBCS)
Examination: March/April – 2026
Environmental Engineering (CIVPCC-06)

Day & Date: Thursday, 21-05-2026 Max. Marks: 56
Time: 10:00 AM To 01:00 PM

Instructions: 1) In section- I Q. No. 2 is compulsory and solve any two questions from the remaining. (Q. No. 3, 4 & 5)
2) In section- II Q. No. 6 is compulsory and solve any two questions from the remaining (Q. No. 7, 8, & 9)
3) Figures to the right indicate full marks.
5) Draw neat sketch's where required and assume suitable data wherever needed & mention it clearly.

SECTION – I

Q.2 A town of present population of 50000, have average per capita water demand of 160lpcd. Water is pumped into an overhead tank at a uniform rate continuously for 24 hrs. The demand pattern is shown below. **08**

Determine the required balancing storage capacity of the overhead tank.

Hours	0-8	8-10	10-16	16-20	20-24
Demand (%)	5	40	20	25	10

Q.3 Estimate the population of the city in 2041 by geometric increase method and incremental increase method. **10**

Year	1981	1991	2001	2011	2021
Population	40,000	60,000	85,000	1,15000	2,00,000

Q.4 Write short notes on **10**
a) Turbidity of water
b) Alkalinity of water
c) Hardness of water

Q.5 Explain briefly MBBR, SBR and MBR. **10**

SECTION– II

Q.6 A waste water effluent of 560 L/s with a BOD of 50mg/l, D.O of 3.0 mg/l enters a river where the flow is 28m3/s with a BOD of 4mg/l and D.O of 8.2 mg/l. The velocity of water in stream is 0.18m/s. **08**

Determine the following:

a) Combined discharge
b) BOD mix
c) DO mix

Q.7 Design a completely mixed ASP for the following data: **10**

a) Wastewater flow = 20MLD
b) Influent BOD = 200mg/l
c) Effluent BOD = 25mg/l
d) MLSS = 2000mg/l
e) F/M = 0.2
f) SVI = 80ml/g
g) Sludge age = 10days.

Q.8 Data from an unseeded domestic waste water BOD test are: 5ml of waste in a 300ml bottle, Initial D.O of 7.8mg/l, Final D.O. after 5 days of incubation is 4.3 mg/l. **10**

Compute

a) The BOD5
b) The ultimate BOD, assuming k = 0.10 (base 10) per day

Q.9 Write short notes on: **10**

a) Sludge Volume index
b) Skimming tanks
c) F/M ratio
d) Oxidation pond
e) Operational troubles of trickling filter

Examination: March/April – 2026
Environmental Engineering (CIVPCC-06)

Day & Date: Thursday, 21-05-2026 Max. Marks: 70
Time: 10:00 AM To 01:00 PM

Instructions: 1) Q. No. 1 is compulsory. It should be solved in the first 30 minutes in Answer Book Page no 03 (Starting page of the Answer Book). Each question carries one mark
2) Don't forget to Mention question paper set (P/Q/R/S) on top on page.
3) Figures to the right indicates full marks.

MCQ/Objective Type Questions

Duration: 30 Minutes Marks:14

Q.1 Choose the correct alternatives from the option and rewrite the sentence. **14**

1) The minimum amount of D.O that must be present in a stream for the survival of fishes is _____.
a) 1mg/l b) 6mg/l
c) 20mg/l d) 4mg/l

2) Which of the following units works in anaerobic conditions?
a) Septic tank b) Activated sludge treatment
c) Sedimentation tank d) Trickling filters

3) As compared to geometrical increase method, arithmetic increase method of population forecasting gives _____.
a) Lesser value b) Higher value
c) Same value d) Accurate value

4) By which of the following methods, zero hardness can be achieved _____.
a) Lime-soda method
b) Boiling method
c) Zeolite/Ion Exchange method
d) None

5) Settling velocity of a spherical body in a viscous fluid is given by _____.
a) Reynolds law b) Newton's law

a) To increase the percentage of dissolved oxygen in water
b) To remove volatile elements
c) Remove hydrogen sulphide
d) All of above

7) Presence of fluoride in water greater than 1.5 mg/l causes _____.
a) Cardiovascular disease
b) Methemoglobinemia
c) Dental Fluorosis
d) None of the above

8) Color of water is determined with the help of which of the following instrument _____.
a) Tintometer
b) Osmoscope
c) Potentiometer
d) None of the above

9) The type of valve which allows water to flow in one direction but prevents its flow in the reverse direction is _____.
a) Reflux valve
b) Sluice valve
c) Air release valve
d) Air intake valve

10) The suitable layout of distribution system for a city with roads of rectangular pattern is _____.
a) Grid system
b) Dead end system
c) Ring system
d) Radial system

11) Standard BOD is measured at _____.
a) 20 degree - 1 day
b) 20 degree - 5 day
c) 30 degree - 3 day
d) 27 degree - 5 day

12) Sewer system is designed for _____.
a) Maximum flow only
b) Minimum flow only
c) Average flow
d) Both Maximum and minimum flow

13) Parshalli flume/ Sutro weir is installed in which of the following unit of sewage treatment?
a) Screening
b) Grit Chamber
c) ASP
d) Septic tank

14) Grit Chamber is used for the removal of _____.
a) Organic S.S.
b) Inorganic S.S.
c) Both
d) Volatile Organic S.S.

MCQ/Objective Type Questions

Duration: 30 Minutes Marks:14

Q.1 Choose Correct answer MCQ/ Objective Questions. 14

1) Innovation provides _____.
a) Stability b) Competitive advantage
c) Similarity d) Confusion

2) Managerial competency involves _____.
a) Fundraising only
b) Communication, planning, and leadership
c) Imitation
d) None

3) Entrepreneurship as a style of management focuses on _____.
a) Routine activities
b) Risk avoidance
c) Innovation and opportunity recognition
d) Only HR

4) A corporate entrepreneur is _____.
a) Owner of small business
b) Government employee
c) Innovator within an organization
d) None

5) Technology transfer occurs when _____.
a) Knowledge is shared from research to application
b) Patents expire
c) Innovation fails
d) Licenses are revoked

6) Six Thinking Hats tool was developed by _____.
a) Peter Drucker b) Steve Jobs
c) Edward de Bono d) Clayton Christensen

7) NUF test stands for _____.
a) Necessary, Useful, Feasible
b) Need, Use, Focus
c) None
d) Necessary, Unusual, Functional

8) Which is not a type of innovation strategy?
a) Pioneering b) Imitative
c) Disruptive d) Delaying

9) Red Ocean strategy is about _____.
a) Uncontested markets
b) Price competition in saturated markets
c) Patent generation
d) Blue economy

10) Continuous learning is essential for _____.
a) Innovation growth b) Routine operations
c) Cost reduction d) Project closure

11) Failure in innovation can occur due to _____.
a) Over-regulation b) Poor planning
c) Lack of feedback d) All of these

12) Crafting a business model involves _____.
a) Ignoring customers
b) Defining value, segments, and revenue streams
c) Random investments
d) Borrowing

13) Legal consideration in entrepreneurship includes _____.
a) Product packaging b) Compliance and regulations
c) Floor layout d) Office color

14) Entrepreneurial process starts with _____.
a) HR hiring b) Opportunity identification
c) Revenue calculation d) Market monopoly

b) Communication, planning, and leadership
c) Imitation
d) None

7) Entrepreneurship as a style of management focuses on _____.
a) Routine activities
b) Risk avoidance
c) Innovation and opportunity recognition
d) Only HR

8) A corporate entrepreneur is _____.
a) Owner of small business
b) Government employee
c) Innovator within an organization
d) None

9) Technology transfer occurs when _____.
a) Knowledge is shared from research to application
b) Patents expire
c) Innovation fails
d) Licenses are revoked

10) Six Thinking Hats tool was developed by _____.
a) Peter Drucker b) Steve Jobs
c) Edward de Bono d) Clayton Christensen

11) NUF test stands for _____.
a) Necessary, Useful, Feasible
b) Need, Use, Focus
c) None
d) Necessary, Unusual, Functional

12) Which is not a type of innovation strategy?
a) Pioneering b) Imitative
c) Disruptive d) Delaying

13) Red Ocean strategy is about _____.
a) Uncontested markets
b) Price competition in saturated markets
c) Patent generation
d) Blue economy

14) Continuous learning is essential for _____.
a) Innovation growth b) Routine operations
c) Cost reduction d) Project closure

Examination: March/April – 2026
Entrepreneurship and Innovation (OE-02A)

Day & Date: Friday, 22-05-2026 Max. Marks: 56
Time: 03:00 PM To 06:00 PM

Instructions: 1) All questions are compulsory.
3) Figures to the right indicates full marks.
4) Assume suitable data if necessary and mention it clearly.
5) Use of non-programmable calculator is allowed.

SECTION – I

Q.2 All questions are compulsory.

a) Explain types of innovation with suitable examples. **06**

b) Define Entrepreneur. Discuss key roles and responsibilities. **04**

Q.3 Solve Any Three questions.

a) Describe relationship between innovation and competitive advantage. **06**

b) Explain entrepreneurship as a career and style of management. **06**

c) Explain the concepts of Entrepreneur, Manager, and Intrapreneur. Differentiate between them with suitable examples. **06**

d) What are the seven sources of innovative opportunities? **06**

e) Explain creative methods for managing innovation. **06**

SECTION – II

Q.4 All questions are compulsory.

a) Explain the concept of innovation process. **06**

b) Discuss barriers to innovation in business. **04**

Q.5 Solve Any Three question.

a) Write note on Blue Ocean Strategy with example. **06**

b) Describe innovation failure causes. **06**

c) Explain the Lean Start-up concept. **06**

d) What are ethical and legal considerations for entrepreneurs? **06**

e) Explain opportunity recognition and decision-making in entrepreneurship. **06**

Day & Date: Friday, 22-05-2026 Max. Marks: 70
Time: 03:00 PM To 06:00 PM

Instructions: 1) Q. No. 1 is compulsory. It should be solved in the first 30 minutes in Answer Book Page no 03 (Starting page of the Answer Book). Each question carries one mark.
2) Don't forget to Mention question paper set (P/Q/R/S) on top of page.
3) Figures to the right indicates full marks.
4) Assume suitable data if necessary and mention it clearly.

MCQ/Objective Type Questions

Duration: 30 Minutes Marks:14

Q.1 Choose Correct answer MCQ/ Objective Questions. 14

1) Six Thinking Hats tool was developed by _____.
a) Peter Drucker b) Steve Jobs
c) Edward de Bono d) Clayton Christensen

2) NUF test stands for _____.
a) Necessary, Useful, Feasible
b) Need, Use, Focus
c) None
d) Necessary, Unusual, Functional

3) Which is not a type of innovation strategy?
a) Pioneering b) Imitative
c) Disruptive d) Delaying

4) Red Ocean strategy is about _____.
a) Uncontested markets
b) Price competition in saturated markets
c) Patent generation
d) Blue economy

5) Continuous learning is essential for _____.
a) Innovation growth b) Routine operations
c) Cost reduction d) Project closure

6) Failure in innovation can occur due to _____.
a) Over-regulation b) Poor planning
c) Lack of feedback d) All of these

7) Crafting a business model involves _____.
a) Ignoring customers
b) Defining value, segments, and revenue streams
c) Random investments
d) Borrowing

8) Legal consideration in entrepreneurship includes _____.
a) Product packaging
b) Compliance and regulations
c) Floor layout
d) Office color

9) Entrepreneurial process starts with _____.
a) HR hiring
b) Opportunity identification
c) Revenue calculation
d) Market monopoly

10) Innovation provides _____.
a) Stability
b) Competitive advantage
c) Similarity
d) Confusion

11) Managerial competency involves _____.
a) Fundraising only
b) Communication, planning, and leadership
c) Imitation
d) None

12) Entrepreneurship as a style of management focuses on _____.
a) Routine activities
b) Risk avoidance
c) Innovation and opportunity recognition
d) Only HR

13) A corporate entrepreneur is _____.
a) Owner of small business

4) Assume suitable data if necessary and mention it clearly.

MCQ/Objective Type Questions

Duration: 30 Minutes Marks:14

Q.1 Choose the correct alternative: **14**

1) Which of the following is a key goal of sustainable development?
a) Increase in fossil fuel consumption
b) Balanced use of resources
c) Maximum economic growth only
d) Eliminating renewable energy use

2) What is a key characteristic of solar energy?
a) Utilizes sunlight for power generation
b) Requires fossil fuels for operation
c) Has no environmental benefits
d) ls non-renewable

3) Which renewable energy is best suited for coastal areas?
a) Biomass energy b) Geothermal energy
c) Wave and tidal energy d) Oil shale energy

4) What is solar radiation?
a) Radiation from the Earth b) Radiation from the Moon
c) Radiation from the Sun d) None of the above

5) What is solar radiation measured in?
a) Kilograms
b) Liters
c) Watts per square meter (W/m^2)
d) Newtons

6) What is the primary difference between pyrolysis and gasification?
   a) Gasification uses a small amount of oxygen, while pyrolysis occurs in the absence of oxygen
   b) Pyrolysis produces syngas, while gasification produces bio-oil
   c) Gasification is a biochemical process, while pyrolysis is thermo chemical
   d) Pyrolysis requires higher temperatures than gasification

7) Which of the following is a disadvantage of biomass energy?
   a) Reduces waste
   b) Can lead to deforestation
   c) Low carbon footprint
   d) Independent of weather conditions

8) What happens when electricity demand is higher than generation?
   a) Energy storage can provide additional power
   b) Renewable energy sources produce more electricity
   c) Power plants automatically increase supply
   d) Transmission lines store energy

9) Which of the following sectors benefits the most from energy storage?
   a) Agriculture
   b) Construction
   c) Transport
   d) Power generation

10) What does the efficiency of an energy storage device indicate?
   a) The time taken to store energy
   b) The total cost of the device
   c) The percentage of stored energy that can be retrieved
   d) The size of the storage system

11) In hydro power stations what is an enlarged body of water just above the intake and used as a regulating reservoir called?
   a) Penstock
   b) Reservoir
   c) Fore bay
   d) Spillways

12) Tidal energy is caused primarily by the _____.
   a) Moon's gravity
   b) Sun's gravity
   c) Earth's rotation
   d) Ocean currents

13) Green hydrogen is produced by _____.
   a) Coal gasification
   b) Methane reforming
   c) Water electrolysis using renewable energy
   d) Nuclear fission

14) Which is the cleanest method of hydrogen production?
   a) Electrolysis using solar/wind energy
   b) Coal gasification
   c) Nuclear thermal splitting
   d) Steam methane reforming

4) Assume suitable data if necessary and mention it clearly.

SECTION – I

Q.2	**a)**	What is biomass energy, and how is it produced from the biomass?	**05**
	b)	Explain with neat sketch working of Pyrheliometer.	**05**
Q.3	**a)**	Give the detailed classification of wind energy conversion systems.	**04**
	b)	Explain how the Internet of Energy (IoE) can improve energy distribution in smart cities.	**05**
Q.4	**a)**	Explain with neat sketch working of a Flat Plate Collector.	**04**
	b)	Enlist and explain the major biomass resources available in India. How can these resources be utilized to address energy demands while ensuring sustainability?	**05**
Q.5	**a)**	Differentiate between solar thermal and solar photovoltaic systems those are used for power generation.	**04**
	b)	What are the criterions considered for selection of site for the wind mill?	**05**

SECTION – II

Q.6	**a)**	Enlist and explain the major problems that arise due to the absence of energy storage in power generation.	**05**
	b)	Draw the neat sketch of layout for hydroelectric power plat and explain the components.	**05**

Q.7	**a)**	Explain with neat sketch working of open cycle Ocen Thermal Energy Conversion (OTEC) system.	**04**
	b)	Give the general specifications of Energy Storage devices.	**05**
Q.8	**a)**	Give the detailed classification of hydroelectric power plants.	**04**
	b)	Enlist different types of tidal energy conversion systems and explain any one with neat sketch.	**05**
Q.9	**a)**	How will you estimate a hydropower? Explain the terms involved in it.	**04**
	b)	State and explain different hydrogen storage methods.	**05**

S.Y. (B.Tech.) (Civil Engineering) (Semester - II) (New) (CBCS)
Examination: March/April – 2026
Measurement, Instrumentation and Sensors (OE-02D)

Day & Date: Friday, 22-05-2026 Max. Marks: 70
Time: 03:00 PM To 06:00 PM

Instructions: 1) Q. No. 1 is compulsory. It should be solved in the first 30 minutes in Answer Book Page no 03 (Starting page of the Answer Book). Each question carries one mark
2) Don't forget to Mention question paper set (P/Q/R/S) on top on page.
3) Figures to the right indicates full marks.
4) Assume suitable data if necessary.

MCQ/Objective Type Questions

Duration: 30 Minutes Marks:14

Q.1 Choose the correct answer. **14**

1) Which of the following is not a type of systematic error?
a) Instrumental Errors b) Environmental Errors
c) Observational Errors d) Gross error

2) _____ instruments are those which measure the total quantity of electricity delivered in a particular time.
a) Absolute b) Indicating
c) Recording d) Integrating

3) A moving iron instrument can be used for _____.
a) D.C. only b) A.C. only
c) Both D.C. and A.C. d) None

4) _____ method is suitable for the measurement of a resistance of expected value less than one ohm.
a) Substitution b) Loss of charge
c) Wheatstone bridge d) Kelvin's double bridge

5) Instrument transformers are _____.
a) Potential transformers b) Current transformers
c) Both (a) and (b) d) Power transformers

6) In a DSO, the input signals are _____.
   a) directly applied to oscilloscope
   b) multiplexed, converted to digital form and stored and applied to oscilloscope
   c) multiplexed, converted to digital form stored, converted to analog form and applied to oscilloscope
   d) applied to amplifier, stored as analog signals, multiplexed, converted to digital form, stored in digital form, converted to analog form, and applied to CRO through an amplifier.

7) The power of n-phase unbalanced circuit can be measured by using a minimum of _____.
   a) n wattmeters
   b) (n + 1) wattmeters
   c) (n - 2) wattmeters
   d) (n - 1) wattmeters

8) Which transducer does not require any external power supply for working?
   a) Strain gauge transducer
   b) Piezoelectric Crystals
   c) Hydraulic transducer
   d) Pneumatic transducer

9) Piezoelectric accelerometer converts _____ energy to _____ energy.
   a) mechanical, sound
   b) mechanical, electrical
   c) sound, electrical
   d) None of these

10) Which factor affects the least while selection of sensor?
   a) Size
   b) Accuracy
   c) Colour
   d) Durability

11) Which sensor should be used for calculating pressure?
   a) DHT11
   b) LM335Z/NOPB
   c) HC-SR04
   d) MPX10DP

12) Which of the following represents range of frequency measured by ADC?
   a) Bandwidth
   b) Threshold frequency
   c) Peak frequency
   d) None of the mentioned

13) Thermistor is a _____.
   a) sensor
   b) ADC
   c) transducer
   d) micro controller

14) Which of the following type output is provided by ADC?
   a) Serial type
   b) Parallel type
   c) Both serial and parallel type
   d) None of the mentioned

Set P

S.Y. (B.Tech.) (Civil Engineering) (Semester - II) (New) (CBCS)
Examination: March/April – 2026
Measurement, Instrumentation and Sensors (OE-02D)

Day & Date: Friday, 22-05-2026 Max. Marks: 56
Time: 03:00 PM To 06:00 PM

Instructions: 1) All questions are compulsory.
2) Figures to the right indicate full marks.
3) Assume suitable data if necessary.
4) Draw neat diagrams whenever necessary.

SECTION – I

Q.2 Attempt the following. (Any Four) **16**

a) Explain the term:
i) Accuracy
ii) Linearity
iii) Reproducibility
iv) Precision

b) Describe different damping methods in details.

c) Difference between Current Transformer and Potential Transformer.

d) Explain with neat diagram, working of ramp type digital voltmeter.

e) Explain Anderson Bridge with phasor diagram. Also derive the equation of dissipation factor.

Q.3 Attempt the following. (Any Two) **12**

a) Draw the equivalent circuit and phasor diagram of a PT. Derive expression for actual transformation ratio.

b) Explain the method of measurement of power using two wattmeter for balanced load. Also derive the equation of power factor.

c) A bridge consists of the following:
Arm ab: - A choke coil having resistance R1 & amp: inductance L1
Arm bc: - A non-inductive resistance R3
Arm cd: - A mica condenser C4 in series with non-inductive resistance R4
Arm da: - A non-inductive resistance R2
When this bridge fed from a source of 500 Hz, balance is obtained under following Conditions. $R2 = 2410\ \Omega$, $R3 = 750\ \Omega$, $C4 = 0.35\ \mu F$, $R4 = 64.5\ \Omega$ The series resistance of capacitor is 0.4Ω. Calculate resistance and Inductance of choke coil. The supply is connected between a & c and detector is between b & d.

SECTION – II

Q.4 Attempt the following. (Any Four) **16**

a) Explain units of measurement.

b) Explain the principle of working of piezo-electric effect sensor.

c) Explain the basic concept of analog to digital converter.

d) Explain the sensor interfacing circuit's data transmission.

e) State the different types of temperature sensor and explain any one of them.

Q.5 Attempt the following. (Any Two) **12**

a) State and explain the different types of batteries for low power sensors.

b) Stale and explain the sensors used for Displacement, and Level application.

c) Explain the concept of humidity and state different types of sensor used to measure humidity.

MCQ/Objective Type Questions

Duration: 30 Minutes Marks:14

Q.1 Choose the correct answers from the given options. 14

1) When total supply = total demand, the transportation problem is called _____.
a) Balanced b) Equated
c) Simple d) Zero

2) Which technique is used to solve Assignment Model?
a) Hungarian Method b) Graphical Method
c) Simplex Method d) Integer Programming

3) Allocated cells in the IBFS are also called as _____.
a) Stone Cells b) Water Cells
c) Air Cells d) None of these

4) To convert Maximization Assignment Model into Minimization, _____.
a) Multiply Whole matrix by (-1)
b) Subtract Entire Matrix from Highest Cell
c) Both a & b
d) None of these

5) Advantage of VAM of transportation is _____.
a) Near to optimal Solution b) Least Cost
c) Faster Solution d) Slower Solution

6) Transportation Models are also called as _____.
a) Probabilistic Model b) Distribution Model
c) Game Theory d) Assignment Model

7) ABC analysis considers _____.
a) Total consumption of items b) Total amount of items
c) Both a) and b) d) None of these

8) At the Break-Even Point _____.
a) Profit > Loss
b) Profit < Loss
c) Profit = Loss
d) None of these

9) The PERT in project management means Program Evaluation and _____ Technique.
a) Resource
b) Reconciliation
c) Reconsideration
d) Review

10) _____ stock is the lower limit of stock below which the stock should not be allowed to fall.
a) Maximum
b) Average
c) Safety
d) Standard

11) Optimization Means _____.
a) Maximization
b) Minimization
c) Minimization or Maximization
d) Mean of Minimization & Maximization

12) A feasible solution to LPP _____.
a) Must satisfy all the constraints simultaneously
b) Need not satisfy all the constraints
c) Must be a corner point of feasible region
d) Must optimize the objective function

13) In a project network, the critical path _____.
a) may be the shortest path
b) is the longest path
c) may be the longest path
d) is the shortest path

14) The inventory carrying costs are also called as _____.
a) Procurement costs
b) Set-up costs
c) Storage costs
d) None of the above

Q.2 Solve both. **14**

a) Using Graphical method, solve
Maximize $Z = 2X_1 + 3X_2$
Subject to, $X_1 + X_2 \leq 30$;
$X_1 - X_2 \geq 0$;
$X_2 \geq 3$;
$0 \leq X_1; \leq 20$;
$0 \leq X_2; \leq 12$;

b) Consider the assignment problem to as shown in table, in this problem 4 supply jobs are to be assigned to four different sub assembly. Solve assignment problem by using Hungarian method.

Sub Assembly	Supply			
	i	ii	iii	iv
1	15	13	14	17
2	11	12	15	13
3	13	12	10	11
4	15	17	14	16

Q.3 Solve both. **14**

a) Find the initial basic feasible solution by NWCM.

	Destination				
	D_1	D_2	D_3	D_4	↓ Supply
S_1	5	3	6	4	30
S_2	3	4	7	8	15
S_3	9	6	5	8	15
Demand →	10	25	18	7	

b) Write in brief on application & advantages of Operational Research.

Q.4 Solve both. **14**

a) What is LPP? What are different components of LPP?

b) How assignment model is useful in practical life? Explain with its steps to solve it.

SECTION – II

Q.5 Solve both. **14**

a) Calculate the value of Economic Order Quantity, Reordering Period, No. of orders per year with the following Data, Annual Usages = 50 Units, Procurement Cost = 15 Rs. Per Order, Unit Cost = 100 Rs. /Item, Inventory Caring Cost = 10% of the unit cost.

b) Define 'Inventory Control' and explain its necessity in the construction industry. Detailed the various types of Inventory Costs involved in maintaining inventory on a site.

Q.6 Solve both. **14**

a) Draw network, find out CP & PD. Calculate All floats of each non-critical Activity.

Activity	$1-2$	$2-3$	$2-4$	$3-4$	$3-5$	$4-6$	$5-6$
Time (Days)	14	13	16	15	18	23	15

b) A small project consists of seven activities. The time estimates in weeks of different activities are given below. Find out probability of completing the project in 18 weeks.

Activity	Estimated Time		
	to	tm	tp
$1-2$	1	1	7
$1-3$	1	4	7
$1-4$	2	2	8
$2-5$	1	1	1
$3-5$	2	5	14
$4-6$	2	5	8
$5-6$	3	6	15

Probability Factor	Probability
0	50%
1	84.13 %
2	97.72 %
3	99.87 %

Q.7 Solve both. **14**

a) Write short notes on:

i) Processing N jobs on one machine (SPT and WSPT rules)

ii) No passing rule in sequencing

b) Explain Sequencing Problem Technique. What are its Different Elements, also elaborate its assumptions?

Set Q

S.Y. (B.Tech.) (Civil Engineering) (Semester - II) (New) (CBCS)
Examination: March/April – 2026
Operation Research (OE-02E)

Day & Date: Friday, 22-05-2026 Max. Marks: 70
Time: 03:00 PM To 06:00 PM

Instructions: 1) Q. No. 1 is compulsory. It should be solved in the first 30 minutes in Answer Book Page no 03 (Starting page of the Answer Book). Each question carries one mark.
2) Don't forget to Mention question paper set (P/Q/R/S) on top on page.
3) Figures to the right indicates full marks.
4) Assume suitable data wherever necessary and mention it clearly.

MCQ/Objective Type Questions

Duration: 30 Minutes Marks:14

Q.1 Choose the correct answers from the given options. 14

1) At the Break-Even Point _____.
a) Profit > Loss b) Profit < Loss
c) Profit = Loss d) None of these

2) The PERT in project management means Program Evaluation and _____ Technique.
a) Resource b) Reconciliation
c) Reconsideration d) Review

3) _____ stock is the lower limit of stock below which the stock should not be allowed to fall.
a) Maximum b) Average
c) Safety d) Standard

4) Optimization Means _____.
a) Maximization
b) Minimization
c) Minimization or Maximization
d) Mean of Minimization & Maximization

5) A feasible solution to LPP _____.
a) Must satisfy all the constraints simultaneously
b) Need not satisfy all the constraints
c) Must be a corner point of feasible region
d) Must optimize the objective function

6) In a project network, the critical path _____.
a) may be the shortest path b) is the longest path
c) may be the longest path d) is the shortest path

7) The inventory carrying costs are also called as _____.
a) Procurement costs b) Set-up costs
c) Storage costs d) None of the above

8) When total supply = total demand, the transportation problem is called _____.
a) Balanced b) Equated
c) Simple d) Zero

9) Which technique is used to solve Assignment Model?
a) Hungarian Method b) Graphical Method
c) Simplex Method d) Integer Programming

10) Allocated cells in the IBFS are also called as _____.
a) Stone Cells b) Water Cells
c) Air Cells d) None of these

11) To convert Maximization Assignment Model into Minimization, _____.
a) Multiply Whole matrix by (−1)
b) Subtract Entire Matrix from Highest Cell
c) Both a & b
d) None of these

12) Advantage of VAM of transportation is _____.
a) Near to optimal Solution b) Least Cost
c) Faster Solution d) Slower Solution

13) Transportation Models are also called as _____.
a) Probabilistic Model b) Distribution Model
c) Game Theory d) Assignment Model

14) ABC analysis considers _____.
a) Total consumption of items b) Total amount of items
c) Both a) and b) d) None of these

MCQ/Objective Type Questions

Duration: 30 Minutes Marks:14

Q.1 Choose the correct alternative from the options. **14**

1) A transcendental equation is an equation that involves _____.
a) Only algebraic terms
b) Only transcendental functions
c) Both algebraic and transcendental functions
d) Linear terms only

2) The interval in which a real root of the equation $x^3 - 2x - 5 = 0$ lies is _____.
a) $(1, 2)$ b) $(0, 1)$
c) $(2, 3)$ d) $(3, 4)$

3) The Gauss-Seidel method is used for solving _____.
a) Nonlinear equations b) Systems of linear equations
c) Ordinary differential equations d) Partial differential equations

4) Which of the following is a disadvantage of the Gauss-Jacobi method?
a) It converges faster than most direct methods
b) It requires a large number of iterations for a good approximation
c) It cannot be used for systems with more than two equations
d) It works only for symmetric systems

5) The use of Romberg's method is _____.
a) To solve simultaneous linear equation
b) To find root of linear equation
c) To evaluate definite integration
d) To find the Eigen values

6) The order of convergence of Newton-Raphson method is _____.
a) 1 b) 2
c) $\sqrt{2}$ d) 1.6

7) Power Method is used to find _____.
a) Negative Eigen Value b) Largest Eigen value
c) Positive Eigen Value d) None of these

8) To find the numerically largest Eigen value using iterative method we use the equation _____.
a) $A = \lambda X$ b) $AX = X$
c) $X = \lambda X$ d) $AX = \lambda X$

9) If $dy/dx = x - y$ and $y(0) = 1$, then by Picard's method the value of $y_1(1)$ is _____.
a) 0.905 b) 1.905
c) 2.905 d) None

10) Runge-Kutta method is self-starting method _____.
a) True b) False
c) We can't say d) None

11) The Newton's forward interpolation formula is generally preferred when data points are _____.
a) Unequally spaced
b) Equally spaced and near the beginning
c) Equally spaced and near the end
d) Randomly spaced

12) In the power method, the vector is normalized in each iteration mainly to _____.
a) increase the determinant
b) prevent values from becoming too large
c) eliminate eigen values
d) make the matrix symmetric

13) Simpson's $3/8$ rule requires the number of sub-intervals to be _____.
a) multiple of 2 b) multiple of 3
c) multiple of 4 d) odd only

14) Picard's method is mainly used to solve _____.
a) linear programming problems b) differential equations
c) eigen value problems d) interpolation problems

Seat No.	

Set **P**

S. Y. (B.Tech.) (Civil Engineering) (Semester - II) (New) (CBCS)
Examination: March/April – 2026
Computational Mathematics (OE-02F)

Day & Date: Friday, 22-05-2026 Max. Marks: 56
Time: 03:00 PM To 06:00 PM

Instructions: 1) All questions are compulsory.
2) Figures to the right indicate full marks.
3) Assume suitable data where necessary.

SECTION – I

Q.2 Attempt Any Five: **25**

a) Find the double root of the equation $x^3 - 5.4x^2 + 9.24x - 5.096 = 0$ given that it is nearer to 1.5.

b) Solve the system of equations by Jacobi's iterative method (perform 3 iterations):
$27x + 6y - z = 85,$
$6x + 15y + 2z = 72,$
$x + y + 54z = 110$

c) Find positive real root of the equation $x\sin(x) + \cos(x) = 0$ using Newton-Raphson method correct to 3 decimal places.

d) Solve the system of equations by using Gauss-Elimination method:
$2x + y + z = 7,$
$x + 2y + 3z = 14,$
$3x + 4y + z = 14.$

e) Solve the following system of equations using LU Decomposition method:
$2x + 3y + z = 9$
$x + 2y + 3z = 6$
$3x + y + 2z = 8$

f) Solve $\frac{dy}{dx} = x + y$ with $x_0 = 0, y_0 = 1$ using fourth-order Runge-Kutta method and find approximate value of y when $x = 0.2$

g) Solve $\frac{dy}{dx} = 1 + xy$ with $y(0) = 1$ using Picard's method take first approximation and find y for $x = 0.1$

Q.3 Attempt Any One. **03**

a) Solve the system by Gauss-Seidel method (Perform 4 iterations):

$10x + y + z = 12$

$2x + 10y + z = 13$

$2x + 2y + 10z = 14$

b) Use Newton-Raphson method to find a root of the equation $x^4 - x - 10 = 0$ which is near to $x = 2$. Perform 3 iterations correct to three decimal places.

SECTION – II

Q.4 Attempt Any Five. **25**

a) Approximate $\int_1^3 \frac{1}{x} dx$ using the composite trapezoidal rule with $n = 4$ sub-intervals. List the function values at the nodes, show the application of the formula, and give the final answer correct to 4 decimal places

b) Using Jacobi's method, find all eigenvalues and eigenvectors of the symmetric matrix:

$$A = \begin{bmatrix} 6 & 2 & 1 \\ 2 & 5 & 2 \\ 1 & 2 & 4 \end{bmatrix}$$

c) Evaluate the integral $\int_{-1}^{1} \frac{dx}{1+x^2}$ using Gaussian 3-point Quadrature formula.

d) Find the dominant eigenvalue and the corresponding eigenvector of the matrix

$A = \begin{bmatrix} 4 & 1 & 1 \\ 1 & 3 & 1 \\ 1 & 1 & 2 \end{bmatrix}$ using the Power Method.

Perform 5 iterations taking initial vector as $[1,0,0]^T$

e) Given the Values:

x	2	4	6	8
$f(x)$	5	17	37	65

Evaluate $f(5)$, using Lagrange's Formula.

f) Using Newton's Backward formula, find the value of $f(2)$ if:

x	1.0	1.5	2.0	2.5
$f(x)$	2.71	3.38	4.00	4.58

g) Determine the polynomial $f(x)$ using Newton's Divided Difference formula for the data: Also find $f(3)$.

x	0	1	2	3	5
$f(x)$	1	14	15	5	6

Q.5 Attempt Any One. **03**

a) Find all Eigen values and Eigen vectors of the following matrix by using Gauss Jacobi's Method. $\begin{bmatrix} 1 & 2 \\ 3 & 4 \end{bmatrix}$

b) Construct Newton's Forward interpolation polynomial for the following data:

x	4	6	8	10
$f(x)$	1	3	8	16

Set Q

S. Y. (B.Tech.) (Civil Engineering) (Semester - II) (New) (CBCS)
Examination: March/April – 2026
Computational Mathematics (OE-02F)

Day & Date: Friday, 22-05-2026 Max. Marks: 70
Time: 03:00 PM To 06:00 PM

Instructions: 1) Q. No. 1 is compulsory. It should be solved in the first 30 minutes in Answer Book Page no 03 (Starting page of the Answer Book). Each question carries one mark.
2) Don't forget to Mention question paper set (P/Q/R/S) on top of page.
3) Figures to the right indicates full marks.
4) Assume suitable data where necessary.

MCQ/Objective Type Questions

Duration: 30 Minutes Marks:14

Q.1 Choose the correct alternative from the options. **14**

1) To find the numerically largest Eigen value using iterative method we use the equation _____.
a) $A = \lambda X$ b) $AX = X$
c) $X = \lambda X$ d) $AX = \lambda X$

2) If $dy/dx = x - y$ and $y(0) = 1$, then by Picard's method the value of $y_1(1)$ is _____.
a) 0.905 b) 1.905
c) 2.905 d) None

3) Runge-Kutta method is self-starting method _____.
a) True b) False
c) We can't say d) None

4) The Newton's forward interpolation formula is generally preferred when data points are _____.
a) Unequally spaced
b) Equally spaced and near the beginning
c) Equally spaced and near the end
d) Randomly spaced

5) In the power method, the vector is normalized in each iteration mainly to _____.
a) increase the determinant
b) prevent values from becoming too large
c) eliminate eigen values
d) make the matrix symmetric

6) Simpson's $3/8$ rule requires the number of sub-intervals to be _____.
a) multiple of 2 b) multiple of 3
c) multiple of 4 d) odd only

7) Picard's method is mainly used to solve _____.
a) linear programming problems b) differential equations
c) eigen value problems d) interpolation problems

8) A transcendental equation is an equation that involves _____.
a) Only algebraic terms
b) Only transcendental functions
c) Both algebraic and transcendental functions
d) Linear terms only

9) The interval in which a real root of the equation $x^3 - 2x - 5 = 0$ lies is _____.
a) $(1, 2)$ b) $(0, 1)$
c) $(2, 3)$ d) $(3, 4)$

10) The Gauss-Seidel method is used for solving _____.
a) Nonlinear equations b) Systems of linear equations
c) Ordinary differential equations d) Partial differential equations

11) Which of the following is a disadvantage of the Gauss-Jacobi method?
a) It converges faster than most direct methods
b) It requires a large number of iterations for a good approximation
c) It cannot be used for systems with more than two equations
d) It works only for symmetric systems

12) The use of Romberg's method is _____.
a) To solve simultaneous linear equation
b) To find root of linear equation
c) To evaluate definite integration
d) To find the Eigen values

13) The order of convergence of Newton-Raphson method is _____.
a) 1 b) 2
c) $\sqrt{2}$ d) 1.6

14) Power Method is used to find _____.
a) Negative Eigen Value b) Largest Eigen value
c) Positive Eigen Value d) None of these

S. Y. (B.Tech.) (Civil Engineering) (Semester - II) (New) (CBCS)
Examination: March/April – 2026
Computational Mathematics (OE-02F)

Day & Date: Friday, 22-05-2026 Max. Marks: 56
Time: 03:00 PM To 06:00 PM

Instructions: 1) All questions are compulsory.
2) Figures to the right indicate full marks.
3) Assume suitable data where necessary.

SECTION – I

Q.2 Attempt Any Five: **25**

a) Find the double root of the equation $x^3 - 5.4x^2 + 9.24x - 5.096 = 0$ given that it is nearer to 1.5.

b) Solve the system of equations by Jacobi's iterative method (perform 3 iterations):
$27x + 6y - z = 85,$
$6x + 15y + 2z = 72,$
$x + y + 54z = 110$

c) Find positive real root of the equation $x\sin(x) + \cos(x) = 0$ using Newton-Raphson method correct to 3 decimal places.

d) Solve the system of equations by using Gauss-Elimination method:
$2x + y + z = 7,$
$x + 2y + 3z = 14,$
$3x + 4y + z = 14.$

e) Solve the following system of equations using LU Decomposition method:
$2x + 3y + z = 9$
$x + 2y + 3z = 6$
$3x + y + 2z = 8$

f) Solve $\frac{dy}{dx} = x + y$ with $x_0 = 0, y_0 = 1$ using fourth-order Runge-Kutta method and find approximate value of y when $x = 0.2$

g) Solve $\frac{dy}{dx} = 1 + xy$ with $y(0) = 1$ using Picard's method take first approximation and find y for $x = 0.1$

Q.3 Attempt Any One. **03**

a) Solve the system by Gauss-Seidel method (Perform 4 iterations):

$10x + y + z = 12$

$2x + 10y + z = 13$

$2x + 2y + 10z = 14$

b) Use Newton-Raphson method to find a root of the equation $x^4 - x - 10 = 0$ which is near to $x = 2$. Perform 3 iterations correct to three decimal places.

SECTION – II

Q.4 Attempt Any Five. **25**

a) Approximate $\int_1^3 \frac{1}{x} dx$ using the composite trapezoidal rule with $n = 4$ sub-intervals. List the function values at the nodes, show the application of the formula, and give the final answer correct to 4 decimal places

b) Using Jacobi's method, find all eigenvalues and eigenvectors of the symmetric matrix:

$$A = \begin{bmatrix} 6 & 2 & 1 \\ 2 & 5 & 2 \\ 1 & 2 & 4 \end{bmatrix}$$

c) Evaluate the integral $\int_{-1}^{1} \frac{dx}{1+x^2}$ using Gaussian 3-point Quadrature formula.

d) Find the dominant eigenvalue and the corresponding eigenvector of the matrix

$$A = \begin{bmatrix} 4 & 1 & 1 \\ 1 & 3 & 1 \\ 1 & 1 & 2 \end{bmatrix}$$ using the Power Method.

Perform 5 iterations taking initial vector as $[1,0,0]^T$

e) Given the Values:

x	2	4	6	8
$f(x)$	5	17	37	65

Evaluate $f(5)$, using Lagrange's Formula.

f) Using Newton's Backward formula, find the value of $f(2)$ if:

x	1.0	1.5	2.0	2.5
$f(x)$	2.71	3.38	4.00	4.58

g) Determine the polynomial $f(x)$ using Newton's Divided Difference formula for the data: Also find $f(3)$.

x	0	1	2	3	5
$f(x)$	1	14	15	5	6

Q.5 Attempt Any One. **03**

a) Find all Eigen values and Eigen vectors of the following matrix by using Gauss Jacobi's Method. $\begin{bmatrix} 1 & 2 \\ 3 & 4 \end{bmatrix}$

b) Construct Newton's Forward interpolation polynomial for the following data:

x	4	6	8	10
$f(x)$	1	3	8	16

a) Solve the system by Gauss-Seidel method (Perform 4 iterations):

$10x + y + z = 12$

$2x + 10y + z = 13$

$2x + 2y + 10z = 14$

b) Use Newton-Raphson method to find a root of the equation $x^4 - x - 10 = 0$ which is near to $x = 2$. Perform 3 iterations correct to three decimal places.

SECTION – II

Q.4 Attempt Any Five. **25**

a) Approximate $\int_1^3 \frac{1}{x} dx$ using the composite trapezoidal rule with $n = 4$ sub-intervals. List the function values at the nodes, show the application of the formula, and give the final answer correct to 4 decimal places

b) Using Jacobi's method, find all eigenvalues and eigenvectors of the symmetric matrix:

$$A = \begin{bmatrix} 6 & 2 & 1 \\ 2 & 5 & 2 \\ 1 & 2 & 4 \end{bmatrix}$$

c) Evaluate the integral $\int_{-1}^{1} \frac{dx}{1+x^2}$ using Gaussian 3-point Quadrature formula.

d) Find the dominant eigenvalue and the corresponding eigenvector of the matrix

$A = \begin{bmatrix} 4 & 1 & 1 \\ 1 & 3 & 1 \\ 1 & 1 & 2 \end{bmatrix}$ using the Power Method.

Perform 5 iterations taking initial vector as $[1,0,0]^T$

e) Given the Values:

x	2	4	6	8
$f(x)$	5	17	37	65

Evaluate $f(5)$, using Lagrange's Formula.

f) Using Newton's Backward formula, find the value of $f(2)$ if:

x	1.0	1.5	2.0	2.5
$f(x)$	2.71	3.38	4.00	4.58

g) Determine the polynomial $f(x)$ using Newton's Divided Difference formula for the data: Also find $f(3)$.

x	0	1	2	3	5
$f(x)$	1	14	15	5	6

Q.5 Attempt Any One. **03**

a) Find all Eigen values and Eigen vectors of the following matrix by using Gauss Jacobi's Method. $\begin{bmatrix} 1 & 2 \\ 3 & 4 \end{bmatrix}$

b) Construct Newton's Forward interpolation polynomial for the following data:

x	4	6	8	10
$f(x)$	1	3	8	16

Day & Date: Friday, 22-05-2026 Max. Marks: 70
Time: 03:00 PM To 06:00 PM

Instructions: 1) Q. No. 1 is compulsory. It should be solved in the first 30 minutes in Answer Book Page no 03 (Starting page of the Answer Book). Each question carries one mark.
2) Don't forget to Mention question paper set (P/Q/R/S) on top of page.
3) Figures to the right indicates full marks.
4) Assume suitable data wherever needed and mention it clearly.

MCQ/Objective Type Questions

Duration: 30 Minutes Marks:14

Q.1 Choose the correct alternative from the option. 14

1) In the basic process of communication, the sender converts ideas into symbols; this step is called_____.
a) Decoding b) Encoding
c) Feedback d) Channeling

2) A message sent without words using facial expressions or gestures is called _____.
a) Written communication b) Verbal communication
c) Non-verbal communication d) Grapevine communication

3) Which channel characteristic most reduces chances of immediate feedback?
a) Face-to-face conversation b) Telephone call
c) Email d) Video conference

4) A major barrier to effective communication that arises from personal beliefs or selective attention is called _____.
a) Noise b) Semantic barrier
c) Perceptual barrier d) Channel barrier

5) Body language, eye contact and posture are examples of ____.
a) Verbal codes b) Non-verbal codes
c) Written codes d) Graphic communication

6) Upward communication flows from _____.
a) Top management to workers
b) Peers to peers
c) Workers to management
d) External stakeholders to company

7) An advantage of face-to-face communication over written communication is _____.
a) Permanent record
b) Easier legal reference
c) Immediate feedback
d) More formal tone

8) Which element is essential for an effective welcome speech?
a) Detailed technical data
b) Acknowledgement of guests
c) Long biographical note
d) Complex statistics

9) The main purpose of a vote of thanks at an event is to _____.
a) Introduce the keynote speaker
b) Summarize research findings
c) Express gratitude to contributors and audience
d) Present the event budget

10) Which is a best practice when delivering a professional presentation?
a) Reading every slide verbatim
b) Using too many small fonts
c) Maintaining eye contact and varying tone
d) Using no structure or flow

11) When a buyer is dissatisfied with delivered goods and asks for correction or refund, they should send a _____.
a) Enquiry letter
b) Complaint letter
c) Order letter
d) Quotation letter

12) A purchase order is principally used to _____.
a) Complain about defects
b) Request a quotation
c) Place an order for goods or services
d) Acknowledge receipt of payment

13) Which part of a business letter contains the main message or details the writer wants to communicate?
a) Heading
b) Salutation
c) Body
d) Signature block

Day & Date: Tuesday, 26-05-2026 Max. Marks: 56
Time: 10:00 AM To 01:00 PM

Instructions: 1) All questions are compulsory.
2) Figures to the right indicate full marks.
4) Assume suitable data wherever necessary and mention it clearly.
3) Use of non-programmable calculators is allowed.

SECTION – I

Q.2 Attempt Following Questions.

a) Explain economic theories in detail. **06**

b) What are the types of businesses? **04**

Q.3 Attempt Following Questions. (Any One) **08**

a) Explain the innovation process in detail.

b) Give difference between innovative strategies.

Q.4 Attempt Following Questions. (Any Two) **10**

a) Explain government grants and investors.

b) Explain the types of innovation.

c) Explain Demographics, Process need and crowd funding.

SECTION – II

Q.5 Attempt Following Questions.

a) Explain success stories of any 2 entrepreneurs. **06**

b) Explain scalability and legal laws study. **04**

Q.6 Attempt Following Questions. (Any One) **08**

a) Explain any 4 strategic issues in International Business.

b) Explain any 4 ethics in International Business.

Q.7 Attempt Following Questions. (Any Two) **10**

a) Explain the process for problem identification.

b) Explain the process for problem solving.

c) Explain diversification and changing international environment.

4) Use of non-programmable calculators is allowed.

MCQ/Objective Type Questions

Duration: 30 Minutes Marks:14

Q.1 Choose the correct alternatives from the given options. 14

1) What does acquiring technological innovations mean for a business?
a) Investing in any technologies to maintain consistency
b) Acquisition only for technological advancements
c) Being unable to produce a technology on own
d) Adopting or purchasing new technologies to improve processes

2) A company that purchases the right to use another company's technology is engaging in _____.
a) Technology licensing b) Internal R&D
c) Purchase Order d) New innovations

3) What is an example of acquiring technology through strategic partnerships?
a) Forming a joint venture with a tech company to co-develop a product
b) To maintain independence
c) Partnering for marketing
d) Making research collaborations only

4) A tender notice is typically issued by _____.
a) Private individuals only
b) Financial institutions
c) Organizations or government bodies seeking suppliers
d) Customers looking for discounts

5) The cargo needs documentation of which permissions?
a) Insurance documents b) Health certificate
c) Landing bill d) both a) & c)

6) In the Russia-Ukraine war, Ukraine has lost control over which of the regions
a) Crimea b) Kharkiv
c) Rivne d) All of these

7) When was the last time China conducted military exercises and attacks on Taiwan?
a) 2025 b) 2024
c) 2023 d) 2022

8) When did Palestine and Israel war begin?
a) 2025 b) 2024
c) 2023 d) 2022

9) A well-defined problem statement should NOT include _____.
a) The context of the problem b) Multiple unrelated problems
c) The impact of the problem d) Clear boundaries

10) Schumpeter's theory comes under which economic theory?
a) Classical theory
b) Neo-classical theory
c) Austrian market process theory
d) All of above

11) Resilience in entrepreneurial competency is _____.
a) Relying on others to solve business challenges
b) Quitting the business when it fails
c) Persisting despite challenges and setbacks
d) Going on taking financial risks

12) In the innovation process, feasibility analysis is conducted to ____.
a) Determine if the idea is financially and technically viable
b) Launch the product with testing
c) Identify competitors for imitation
d) Making changes to the idea

13) Who introduced the concept of the seven sources of innovative opportunities?
a) Joseph Schumpeter b) Peter Drucker
c) Clayton Christensen d) Michael Porter

14) What is a key characteristic of a reactive innovation strategy?
a) The company innovates before competitors enter the market
b) It completely ignores industry changes
c) It consistently introduces radical innovations ahead of the market
d) It responds to competitors' innovations and assesses the demand

MCQ/Objective Type Questions

Duration: 30 Minutes Marks:14

Q.1 Solve following Multiple Choice Questions. **14**

1) Intermediate sight distance is defined as _____ the stopping sight distance.
a) Three time b) One time
c) Twice d) Four time

2) Transition Curve is provided at both ends of _____ Curve.
a) Horizontal b) Vertical
c) Widening d) None of the above

3) What is the side slope (H: V) for rural roads when the condition is embankment in silty/sandy/gravelly soil?
a) 2.5:1 to 3:1 b) 2:1
c) 1:1 to 0.5:1 d) 1/12:1 to 1/16:1

4) The required value of camber is dependent on the type of _____ and rainfall.
a) Pavement b) Embankment
c) Rural d) None of these

5) The maximum super elevation on hill roads should not exceed ____.
a) 7% b) 8%
c) 9% d) 10%

6) The type of Transition Curve that is generally provided on hill road is _____.
a) Circular b) Cubic parabola
c) Lemniscate spiral d) Spiral

7) For concrete and bituminous pavement value of camber is given by _____.

a) 0.5% b) 2%
c) 3 % d) 4%

8) The sight distance is measured along the middle of the _____.

a) Inner lane b) Outer lane
c) Middle lane d) None of these

9) Minimum thickness of the base of a flexible pavement is _____.

a) 15 cm b) 20 cm
c) 10 cm d) 5 cm

10) Which of the following it NOT a critical parameter to control cracking and rutting in a flexible pavement?

a) Tensile strain near the surface close to the edge of the wheel
b) Vertical sub-base strain
c) Vertical subgrade strain
d) Tensile strain at the bottom of bituminous layer

11) What is normally the primary objective of a Self Help Group (SHG)?

a) To provide micro-finance to groups
b) To improve technology of farming
c) To provide high quality seeds
d) To provide education needs

12) The interface treatment provided to plug in the voids of porous surfaces and to bond loose particles in bituminous pavements is called _____.

a) Tack coat b) Prime coat
c) Seal coat d) Surface dressing

13) Causeways are the type of _____.

a) Cross drainage structure
b) Side drains
c) Sub- surface drainage structure
d) Jelly drains

14) The seepage flow is present in _____.

a) Surface drainage b) Sub surface drainage
c) Camber d) Cross slope

c) Enlist and explain various factors affecting geometric design of roads.

Q.3 Solve following. (Any Two) **14**

a) On two way traffic road, speed of overtaking vehicle is 65 kmph and overtaken vehicle is 45 kmph. If average acceleration is 0.92 m/sec^2 and reaction time is 2.5 seconds, calculate Overtaking Sight Distance (OSD).

b) What are the various *'Design parameters'* for Pavement design in Rural Roads?

c) CBR test is performed on flexible pavement and load verses penetration table is shown below, an initial traffic of 30 CVPD, with a growth rate of 6 per cent per annum for a location having annual rainfall of 1200mm. The design life is 10 years. Determine the pavement thickness.

Penetration	0	0.5	1	1.5	2	2.5	3	4	5	7.5	10	12.5
Load (Kg)	0	8	26	43	63	75	84	105	114	135	151	165

Section – II

Q.4 Solve following. (Any Two) **14**

a) Explain the requirements of surface drain; road side drains, shoulder drains, catch water drains.

b) Explain standard designs of culverts.

c) Explain Construction of *fly ash embankments.*

Q.5 Solve following. (Any Two) **14**

a) Explain *quality control in construction*.

b) Explain maintenance of paved roads.

c) Explain the concept of *'Rehabilitation'*.

Examination: March/April – 2026
Construction Materials: Sustainability and Usability (CIVHON-02C)

Day & Date: Tuesday, 26-05-2026 Max. Marks: 70
Time: 10:00 AM To 01:00 PM

Instructions: 1) Q. No. 1 is compulsory. It should be solved in the first 30 minutes in Answer Book Page no 03 (Starting page of the Answer Book). Each question carries one mark.
2) Don't forget to Mention question paper set (P/Q/R/S) on top of page.
3) Figures to the right indicate full marks.

MCQ/Objective Type Questions

Duration: 30 Minutes Marks:14

Q.1 Choose the correct alternatives from the given options. 14

1) Sustainable building materials are those which _____.
a) Increase construction cost only
b) Cause environmental pollution
c) Reduce environmental impact during their life cycle
d) Are always imported

2) Which of the following is an example of a natural building material?
a) Steel b) Cement
c) Bamboo d) Aluminum

3) Materials that are obtained from nearby sources to reduce transportation energy are called _____.
a) Synthetic materials b) Imported materials
c) Locally available materials d) Artificial materials

4) Which of the following materials is considered a bio-material?
a) Fly ash brick b) Bamboo
c) Plastic sheet d) Aluminum panel

5) Low VOC paints are preferred in sustainable construction because they _____.
a) Increase cost
b) Reduce indoor air pollution
c) Increase wall strength
d) Improve waterproofing

6) Salvaged building materials are _____.
a) Newly manufactured materials
b) Materials imported from other countries
c) Materials recovered from old buildings for reuse
d) Materials produced in factories only

7) Which of the following is an example of recycled material?
a) Natural stone
b) Timber log
c) Recycled steel
d) Clay soil

8) Embodied energy refers to _____.
a) Energy used during building operation
b) Total energy required to produce a material
c) Energy used for lighting only
d) Energy used in transportation only

9) Carbon footprint of a material means _____.
a) Weight of carbon in the material
b) Total greenhouse gas emissions caused by the material
c) Density of carbon compounds
d) Carbon content in soil

10) Which analysis method studies the environmental impact of a material from production to disposal?
a) Stress analysis
b) Life Cycle Assessment (LCA)
c) Structural analysis
d) Hydrological analysis

11) CSEB stands for _____.
a) Compressed Stabilized Earth Block
b) Cement Stabilized Energy Block
c) Concrete Structural Energy Block
d) Composite Stabilized Earth Beam

12) Filler slab technique is mainly used to _____.
a) Increase slab thickness
b) Reduce dead weight and concrete consumption
c) Increase reinforcement
d) Improve foundation strength

13) Fly ash used in construction is mainly a waste product from _____.
a) Textile industry
b) Thermal power plants
c) Plastic industry
d) Agriculture

14) Eco-audit mainly evaluates _____.
a) Only cost of materials
b) Only strength of materials
c) Environmental impact and energy use of materials
d) Colour and appearance of materials

Examination: March/April – 2026
Construction Materials: Sustainability and Usability (CIVHON-02C)

Day & Date: Tuesday, 26-05-2026 Max. Marks: 56
Time: 10:00 AM To 01:00 PM

Instructions: 1) All questions are compulsory.
2) Figures to the right indicate full marks.

SECTION – I

Q.2 Solve the following. (Any Two) **14**

a) Enlist and explain locally available and manufactured materials.

b) Explain the idea of “Embodied Energy”.

c) Explain Data sets available for calculation of embodied energy.

Q.3 Solve the following. (Any Two) **14**

a) Explain Concept of embodied carbon or carbon footprint of material.

b) Explain alternatives construction techniques such as SMB, CSEB, and steam cured blocks.

c) Explain Case studies of reinforced concrete masonry, vaulted roofs, ferro-cement walls etc.

SECTION – II

Q.4 Solve the following. (Any Two) **14**

a) Explain innovative use of waste materials.

b) Explain innovative use of salvaged materials.

c) Explain Eco auditing of Reusable and disposable cups, Grocery bags.

Q.5 Solve the following. (Any Two) **14**

a) Explain Principles of materials selection, Selection criteria and property charts.

b) Explain Eco-informed materials selection introduction, Selection per unit of function, Systematic eco-selection.

c) Explain materials for light weight structures, material substitution for eco-efficient design.

MCQ/Objective Type Questions

Duration: 30 Minutes Marks:14

Q.1 Choose the correct alternative. **14**

1) The ideal location for a railway bridge is _____.
a) Upstream of river bends
b) On a sharp meander
c) On a straight reach of the river
d) In a delta region

2) A reconnaissance survey for a bridge location is primarily used to _____.
a) Determine economic cost b) Fix the final alignment
c) Identify feasible alternatives d) Check soil bearing capacity

3) What does the term "setting out" in bridge construction refer to?
a) Pouring concrete
b) Fixing bearings
c) Establishing the position of piers and abutments
d) Painting steel girders

4) In pile foundations, what test ensures the adequacy of load- bearing?
a) Slump test b) Load test
c) Split tensile test d) Sieve analysis

5) Which component of a girder primarily resists bending moments?
a) Web b) Bottom flange
c) Top flange d) Both b) and c)

6) Gantry girder cross-section is generally chosen as _____.
a) Rectangular beam b) I-section
c) Box section d) Plate girder with channel cap

7) During bridge inspection, a crack width of more than 0.3 mm in concrete indicates _____.
a) Normal condition
b) Minor damage
c) Moderate damage
d) Severe distress

8) Bearings are usually placed between _____.
a) Superstructure and abutment
b) Foundation and pile cap
c) Deck and expansion joint
d) Girder and parapet wall

9) Which test is not directly related to compaction control in embankments?
a) Sand replacement test
b) Nuclear density test
c) Dynamic cone penetrometer test
d) Slump test

10) In foot over bridges, the deck is primarily supported by _____.
a) Suspension cables
b) Trusses or beams
c) Pillars
d) Frames

11) What is the typical material used for superstructure of road over bridges (ROBs)?
a) Timber
b) Aluminum
c) Steel or RCC
d) Plastic

12) During tender opening, which of the following is typically verified first?
a) Technical specifications
b) Financial bid amounts
c) Compliance with submission requirements
d) Contractor's past performance

13) Arbitration in construction contracts is preferred over litigation because _____.
a) It is more expensive
b) It is a public process
c) It offers a faster resolution
d) It always favours the contractor

14) Under FIDIC contracts, the Engineer's role includes _____.
a) Financing the project
b) Representing the contractor
c) Supervising and certifying works
d) Supplying construction materials

S.Y. (B.Tech.) (Civil Engineering) (Sem - II) (New) (CBCS)
Examination: March/April – 2026
Elevated Structures in Railway (CIVHON-02D)

Day & Date: Tuesday, 26-05-2026 Max. Marks: 56
Time: 10:00 AM To 01:00 PM

Instructions: 1) Question No. 2 is compulsory in section I, and solve any two questions from the remaining.
2) Question No. 6 is compulsory in section II, and solve any two questions from the remaining.
3) Figures to the right indicates full marks.

SECTION – I

Q.2	**a)**	Give the classification of rivers based on topography and explain any two types.	**05**
	b)	Explain Well foundation with sketch showing typical section.	**05**
Q.3	**a)**	Explain how excavation for pier foundation in dry condition is done.	**05**
	b)	Give classification of railway bridge based on position of carriageway.	**04**
Q.4	**a)**	Describe the various components of a girder used in steel railway bridges.	**05**
	b)	Enlist various factors governing selection of bridge site.	**04**
Q.5	**a)**	Discuss the behaviour of the rivers in detail.	**05**
	b)	Explain various types of Girder bridges with neat sketch.	**04**

SECTION – II

Q.6	**a)**	Write short note on Abutments and Piers inspection.	**05**
	b)	Enlist various drawings prepared by the Civil Engineering department in railway. Explain structural drawing.	**05**
Q.7	**a)**	Define approaches in Railway Bridge. Discuss their components with neat labelling.	**04**
	b)	Write note on Dispute Adjudication Board.	**05**

Q.8	**a)**	What are Special Conditions of Contract (SCC)? Mention its key Elements.	**04**
	b)	Explain the three main components of a bridge with suitable examples.	**05**
Q.9	**a)**	Define a railway embankment. Give its objectives.	**04**
	b)	What is “General Conditions of Contract” (GCC)? Write any two key clauses it includes.	**05**

S.Y. (B.Tech.) (Civil Engineering) (Sem - II) (New) (CBCS)
Examination: March/April – 2026
Elevated Structures in Railway (CIVHON-02D)

Day & Date: Tuesday, 26-05-2026 Max. Marks: 70
Time: 10:00 AM To 01:00 PM

Instructions: 1) Q. No. 1 is compulsory. It should be solved in the first 30 minutes in Answer Book Page no 03 (Starting page of the Answer Book). Each question carries one mark.
2) Don't forget to Mention question paper set (P/Q/R/S) on top on page.
3) Figures to the right indicate full marks.
4) Assume suitable data if necessary and state it clearly.

MCQ/Objective Type Questions

Duration: 30 Minutes Marks:14

Q.1 Choose the correct alternative. **14**

1) What is the typical material used for superstructure of road over bridges (ROBs)?
a) Timber b) Aluminum
c) Steel or RCC d) Plastic

2) During tender opening, which of the following is typically verified first?
a) Technical specifications
b) Financial bid amounts
c) Compliance with submission requirements
d) Contractor's past performance

3) Arbitration in construction contracts is preferred over litigation because _____.
a) It is more expensive
b) It is a public process
c) It offers a faster resolution
d) It always favours the contractor

4) Under FIDIC contracts, the Engineer's role includes _____.
a) Financing the project
b) Representing the contractor
c) Supervising and certifying works
d) Supplying construction materials

5) The ideal location for a railway bridge is _____.
a) Upstream of river bends
b) On a sharp meander
c) On a straight reach of the river
d) In a delta region

6) A reconnaissance survey for a bridge location is primarily used to _____.
a) Determine economic cost b) Fix the final alignment
c) Identify feasible alternatives d) Check soil bearing capacity

7) What does the term "setting out" in bridge construction refer to?
a) Pouring concrete
b) Fixing bearings
c) Establishing the position of piers and abutments
d) Painting steel girders

8) In pile foundations, what test ensures the adequacy of load- bearing?
a) Slump test b) Load test
c) Split tensile test d) Sieve analysis

9) Which component of a girder primarily resists bending moments?
a) Web b) Bottom flange
c) Top flange d) Both b) and c)

10) Gantry girder cross-section is generally chosen as _____.
a) Rectangular beam b) I-section
c) Box section d) Plate girder with channel cap

11) During bridge inspection, a crack width of more than 0.3 mm in concrete indicates _____.
a) Normal condition b) Minor damage
c) Moderate damage d) Severe distress

12) Bearings are usually placed between _____.
a) Superstructure and abutment b) Foundation and pile cap
c) Deck and expansion joint d) Girder and parapet wall

13) Which test is not directly related to compaction control in embankments?
a) Sand replacement test
b) Nuclear density test
c) Dynamic cone penetrometer test
d) Slump test

14) In foot over bridges, the deck is primarily supported by _____.
a) Suspension cables b) Trusses or beams
c) Pillars d) Frames

Day & Date: Friday, 29-05-2026 Max. Marks: 50
Time: 10:00 AM To 11:30 AM

Instructions: 1) All questions are compulsory.
2) Figures to the right indicate full marks.
3) Mention Question Paper Set (P/Q/R/S) on Top of Page.

Q.1 Answer the following Objective Type Questions. **50** **Answer**

1) What are fundamental human values?
a) Core beliefs and principles that guide human behavior and interactions
b) Economic indicators for social development
c) Religious doctrines that govern human life
d) Scientific facts that influence decision-making

2) Which value emphasizes treating others as you wish to be treated?
a) Respect b) Empathy
c) Honesty d) Kindness

3) The value of honesty is closely related to _____.
a) Truthfulness and sincerity b) Wealth and possessions
c) Power and influence d) Indifference and insensitivity

4) Which value involves considering the perspectives and feelings of others?
a) Empathy b) Courage
c) Determination d) Patience

5) The value of respect entails _____.
a) Recognizing the worth of every individual and their rights
b) Achieving personal success at any cost
c) Promoting competition among individuals
d) Pursuing material gains over relationships

6) Which value involves being accountable for one's decisions and actions?
a) Responsibility b) Flexibility
c) Confidence d) Arrogance

7) The value of integrity entails _____.
a) Being honest and true to oneself and others
b) Pursuing personal interests at any cost
c) Manipulating and deceiving others for personal gain
d) Ignoring the feelings and rights of other

8) Which value involves being considerate and thoughtful towards others?
a) Kindness
b) Determination
c) Independence
d) Indifference

9) The value of wisdom involves _____.
a) Making sound and informed judgments based on knowledge and experience
b) Pursuing personal interests at the expense of others
c) Ignoring the perspectives and concerns of others
d) Suppressing one's emotions and thoughts

10) Which value involves being truthful and sincere in one's actions and words?
a) Honesty
b) Tolerance
c) Flexibility
d) Arrogance

11) What is the primary goal of engineering ethics?
a) To maximize profits for companies
b) To ensure engineers work efficiently
c) To protect public safety and welfare
d) To follow industry standards

12) Which of the following is considered an ethical responsibility of an engineer?
a) Ignoring environmental concerns to meet deadlines
b) Ensuring the safety of the public
c) Disregarding laws and regulations
d) Making decisions based on personal interests

13) Ethical engineering practices promote _____.
a) The continuous pursuit of profit
b) The advancement of technology at any cost
c) Public trust and confidence in engineering
d) The minimization of safety regulations

14) Ethical engineers should consider which of the following when making decisions?
a) Profit maximization
b) Only the interests of the employer
c) Public safety, environmental impact, and ethical codes
d) Personal comfort and convenience

15) Which of the following is NOT part of an engineer's ethical responsibility?
a) Designing for safety and sustainability
b) Falsifying data to ensure project success
c) Reporting safety concerns immediately
d) Following industry standards and regulations

16) Ethical engineering involves making decisions based on _____.
a) Personal opinions and values
b) Financial incentives and company pressure
c) Objective analysis, codes of ethics, and consideration for the public good
d) Trends in the field of engineering

17) What should an engineer do if they discover a colleague is involved in unethical practices?
a) Ignore the situation to avoid conflict
b) Report the unethical behavior to management or relevant authorities
c) Cover up the situation to protect the colleague
d) Allow the behavior to continue if it does not affect the project

18) Ethical engineering practices include _____.
a) Following industry standards and regulations
b) Ensuring profitability is the main priority
c) Cutting costs by any means necessary
d) Avoiding the reporting of safety hazards

19) What is the primary focus of Kohlberg's theory?
a) Cognitive development b) Social development
c) Moral development d) Emotional development

20) Which term refers to an agreement that is made through discussions and compromises among parties?
a) Conflict b) Consensus
c) Dispute d) Isolation

21) What is the primary goal of risk assessment?
a) To eliminate all risks
b) To identify and mitigate potential risks
c) To ignore potential risks
d) To transfer risks to others

22) What is the primary goal of safety protocols?
a) To increase productivity
b) To reduce costs
c) To prevent injuries and illnesses
d) To improve employee morale

23) What is the difference between a hazard and a risk?
a) A hazard is a potential risk, while a risk is a real danger
b) A hazard is a real danger, while a risk is a potential danger
c) A hazard is a physical danger, while a risk is a financial danger
d) A hazard is a financial danger, while a risk is a physical danger

24) What should you do if you identify a potential risk in the workplace?
a) Ignore it and hope it goes away
b) Report it to your supervisor or HR
c) Try to mitigate it on your own
d) Transfer the risk to someone else

25) According to the theory of ethical egoism, what should guide an individual's moral actions?
a) The well-being of others
b) The individual's own self-interest
c) Social norms and conventions
d) Universal moral principles

26) Collegiality in a professional setting refers to _____.
a) Loyalty to your employer
b) Cooperation and mutual respect among colleagues
c) Competing for individual success
d) Avoiding work conflicts

27) Professional loyalty involves _____.
a) Reporting colleagues' mistakes publicly
b) Protecting the interests of the team or organization
c) Ignoring safety violations to avoid
d) Disclosing confidential information for personal conflict gain

28) Employee rights include _____.
a) The right to work without discrimination
b) The right to disregard company policies
c) The right to personal opinion but not affecting work
d) The right to ignore workplace safety standards

29) Intellectual Property Rights (IPR) protect _____.
a) The financial interests of corporations
b) The ownership and use of creative ideas and inventions
c) The physical assets of a company
d) Workplace performance evaluations

30) *Risk assessment* is important because it helps in _____.
a) Evaluating the potential impact of hazards on health and safety
b) Minimizing workplace productivity
c) Defining job roles
d) Ignoring environmental issues

31) In risk management, mitigation strategies aim to _____.
a) Accept all risks in the workplace
b) Reduce or eliminate identified risks
c) Increase the likelihood of hazards
d) Focus only on maximizing profits

32) Which of the following is a potential consequence of *occupational crime?*
a) Increased workplace productivity
b) Legal consequences and loss of reputation
c) Improvement in company safety standards
d) Higher employee satisfaction

33) Risk reduction in engineering refers to _____.
a) Implementing measures to lower the work chances of accidents
b) Increasing the number of hazards in the work environment
c) Ignoring potential risks
d) Cutting costs by removing safety measures

34) Public safety regulations are primarily designed to _____.
a) Ensure the safety of the company's assets
b) Protect the general public from potential harm
c) Increase revenue for the government
d) Focus only on preventing natural disasters

35) Multinational corporations (MNCs) are characterized by _____.
a) Operations in multiple countries with a centralized headquarters
b) Operating only in their home country
c) Limited influence on global markets
d) No responsibility toward environmental concerns

36) Environmental ethics primarily deals with _____.
a) Human responsibility to manage the environment and natural resources
b) Minimizing corporate profits
c) Technological advancements in engineering
d) Treating employees equally

37) Which of the following is NOT an example of environmental ethics?
a) Reducing pollution and waste
b) Maximizing resource use regardless of environmental impact
c) Preserving biodiversity
d) Sustainable development

38) Computer ethics involves _____.
   a) Programming and coding without considering social consequences
   b) Understanding the moral implications of computing technologies
   c) Focusing only on technological innovation
   d) Ignoring privacy issues

39) Weapons development ethics deals with _____.
   a) The development of new technologies to enhance military capabilities
   b) Restricting the use of all technological advancements
   c) Focusing only on civilian safety
   d) Only addressing the legal aspects of weapon development

40) Engineers as managers are expected to _____.
   a) Focus solely on technical tasks
   b) Lead teams, make strategic decisions, and manage projects
   c) Ignore the business aspects of their work
   d) Avoid taking responsibility for team outcomes

41) Consulting engineers are hired to _____.
   a) Work on projects within the company they are employed
   b) Provide expert advice on technical and engineering problems
   c) Manage public relations for a company
   d) Conduct legal investigations

42) Engineers acting as expert witnesses typically _____.
   a) Present evidence and offer testimony in legal cases
   b) Focus on public relations during a case
   c) Manage engineering projects for legal firms
   d) Directly represent the interests of a company court

43) Sample Code of Ethics of professional organizations typically includes _____.
   a) Guidelines for acceptable behavior and decision-making
   b) Rules for maximizing profits at any cost
   c) Detailed technical specifications for projects
   d) Guidelines for political involvement in engineering

44) ASME stands for _____.
   a) American Society of Mechanical Engineers
   b) American Society of Management Engineers
   c) Association of Safety and Mechanical Engineers
   d) Association of Scientific and Mechanical Engineers

45) The ASCE Code of Ethics emphasizes _____.
a) Following only local regulations
b) Maintaining professional integrity and responsibility
c) Focusing on personal financial gain
d) Ignoring environmental impacts

46) The IEEE Code of Ethics is primarily concerned with _____.
a) Fostering professional competence and integrity
b) Protecting corporate secrets
c) Maximizing technological advancements at any cost
d) Developing weapons for defense purposes

47) Global issues in engineering ethics include _____.
a) Cultural differences in engineering practices
b) Lack of understanding between technical and ethical concerns
c) Addressing both local and international engineering challenges
d) All of the above

48) A key challenge faced by multinational corporations is _____.
a) Balancing profits with social and environmental
b) Competing only within their home country responsibilities
c) Focusing solely on domestic issues
d) Ignoring corporate social responsibility

49) Empathy is the ability to _____.
a) Solve problems logically
b) Understand and share the feelings of others
c) Be indifferent to others' emotions
d) Only care about your own well-being

50) The quality of "caring" includes _____.
a) Showing concern for others' well-being
b) Ignoring the needs of others
c) Only helping family and friends
d) Seeking praise for helping others

d) Developing weapons for defense purposes

27) Global issues in engineering ethics include _____.
a) Cultural differences in engineering practices
b) Lack of understanding between technical and ethical concerns
c) Addressing both local and international engineering challenges
d) All of the above

28) A key challenge faced by multinational corporations is _____.
a) Balancing profits with social and environmental
b) Competing only within their home country responsibilities
c) Focusing solely on domestic issues
d) Ignoring corporate social responsibility

29) Empathy is the ability to _____.
a) Solve problems logically
b) Understand and share the feelings of others
c) Be indifferent to others' emotions
d) Only care about your own well-being

30) The quality of "caring" includes _____.
a) Showing concern for others' well-being
b) Ignoring the needs of others
c) Only helping family and friends
d) Seeking praise for helping others

31) What are fundamental human values?
a) Core beliefs and principles that guide human behavior and interactions
b) Economic indicators for social development
c) Religious doctrines that govern human life
d) Scientific facts that influence decision-making

32) Which value emphasizes treating others as you wish to be treated?
a) Respect b) Empathy
c) Honesty d) Kindness

33) The value of honesty is closely related to _____.
a) Truthfulness and sincerity b) Wealth and possessions
c) Power and influence d) Indifference and insensitivity

34) Which value involves considering the perspectives and feelings of others?
a) Empathy b) Courage
c) Determination d) Patience

35) The value of respect entails _____.
a) Recognizing the worth of every individual and their rights
b) Achieving personal success at any cost
c) Promoting competition among individuals
d) Pursuing material gains over relationships

36) Which value involves being accountable for one's decisions and actions?
a) Responsibility b) Flexibility
c) Confidence d) Arrogance

37) The value of integrity entails _____.
a) Being honest and true to oneself and others
b) Pursuing personal interests at any cost
c) Manipulating and deceiving others for personal gain
d) Ignoring the feelings and rights of other

38) Which value involves being considerate and thoughtful towards others?

a) Kindness
b) Determination
c) Independence
d) Indifference

39) The value of wisdom involves _____.

a) Making sound and informed judgments based on knowledge and experience
b) Pursuing personal interests at the expense of others
c) Ignoring the perspectives and concerns of others
d) Suppressing one's emotions and thoughts

40) Which value involves being truthful and sincere in one's actions and words?

a) Honesty
b) Tolerance
c) Flexibility
d) Arrogance

41) What is the primary goal of engineering ethics?

a) To maximize profits for companies
b) To ensure engineers work efficiently
c) To protect public safety and welfare
d) To follow industry standards

42) Which of the following is considered an ethical responsibility of an engineer?

a) Ignoring environmental concerns to meet deadlines
b) Ensuring the safety of the public
c) Disregarding laws and regulations
d) Making decisions based on personal interests

43) Ethical engineering practices promote _____.

a) The continuous pursuit of profit
b) The advancement of technology at any cost
c) Public trust and confidence in engineering
d) The minimization of safety regulations

44) Ethical engineers should consider which of the following when making decisions?

a) Profit maximization
b) Only the interests of the employer
c) Public safety, environmental impact, and ethical codes
d) Personal comfort and convenience

45) Which of the following is NOT part of an engineer's ethical responsibility?

a) Designing for safety and sustainability
b) Falsifying data to ensure project success
c) Reporting safety concerns immediately
d) Following industry standards and regulations

46) Ethical engineering involves making decisions based on _____.

a) Personal opinions and values
b) Financial incentives and company pressure
c) Objective analysis, codes of ethics, and consideration for the public good
d) Trends in the field of engineering

47) What should an engineer do if they discover a colleague is involved in unethical practices?

a) Ignore the situation to avoid conflict
b) Report the unethical behavior to management or relevant authorities
c) Cover up the situation to protect the colleague
d) Allow the behavior to continue if it does not affect the project

48) Ethical engineering practices include _____.

a) Following industry standards and regulations
b) Ensuring profitability is the main priority
c) Cutting costs by any means necessary
d) Avoiding the reporting of safety hazards

49) What is the primary focus of Kohlberg's theory?

a) Cognitive development b) Social development
c) Moral development d) Emotional development

50) Which term refers to an agreement that is made through discussions and compromises among parties?

a) Conflict b) Consensus
c) Dispute d) Isolation

Marks Obtained		Signature of Examiner		Signature of Junior Supervisor	

S. Y. (B.Tech.) (Civil Engineering) (Semester - II) (New) (CBCS)
Examination: March/April – 2026
Professional Ethics (VEC-02)

Day & Date: Friday, 29-05-2026 Max. Marks: 50
Time: 10:00 AM To 11:30 AM

Instructions: 1) All questions are compulsory.
2) Figures to the right indicate full marks.
3) Mention Question Paper Set (P/Q/R/S) on Top of Page.

Q.1 Answer the following Objective Type Questions. **50** **Answer**

1) Consulting engineers are hired to _____.
a) Work on projects within the company they are employed
b) Provide expert advice on technical and engineering problems
c) Manage public relations for a company
d) Conduct legal investigations

2) Engineers acting as expert witnesses typically _____.
a) Present evidence and offer testimony in legal cases
b) Focus on public relations during a case
c) Manage engineering projects for legal firms
d) Directly represent the interests of a company court

3) Sample Code of Ethics of professional organizations typically includes _____.
a) Guidelines for acceptable behavior and decision-making
b) Rules for maximizing profits at any cost
c) Detailed technical specifications for projects
d) Guidelines for political involvement in engineering

4) ASME stands for _____.
a) American Society of Mechanical Engineers
b) American Society of Management Engineers
c) Association of Safety and Mechanical Engineers
d) Association of Scientific and Mechanical Engineers

5) The ASCE Code of Ethics emphasizes _____.
a) Following only local regulations
b) Maintaining professional integrity and responsibility
c) Focusing on personal financial gain
d) Ignoring environmental impacts

6) The IEEE Code of Ethics is primarily concerned with _____.
   a) Fostering professional competence and integrity
   b) Protecting corporate secrets
   c) Maximizing technological advancements at any cost
   d) Developing weapons for defense purposes

7) Global issues in engineering ethics include _____.
   a) Cultural differences in engineering practices
   b) Lack of understanding between technical and ethical concerns
   c) Addressing both local and international engineering challenges
   d) All of the above

8) A key challenge faced by multinational corporations is _____.
   a) Balancing profits with social and environmental
   b) Competing only within their home country responsibilities
   c) Focusing solely on domestic issues
   d) Ignoring corporate social responsibility

9) Empathy is the ability to _____.
   a) Solve problems logically
   b) Understand and share the feelings of others
   c) Be indifferent to others' emotions
   d) Only care about your own well-being

10) The quality of "caring" includes _____.
   a) Showing concern for others' well-being
   b) Ignoring the needs of others
   c) Only helping family and friends
   d) Seeking praise for helping others

11) What are fundamental human values?
   a) Core beliefs and principles that guide human behavior and interactions
   b) Economic indicators for social development
   c) Religious doctrines that govern human life
   d) Scientific facts that influence decision-making

12) Which value emphasizes treating others as you wish to be treated?
   a) Respect b) Empathy
   c) Honesty d) Kindness

13) The value of honesty is closely related to _____.
   a) Truthfulness and sincerity b) Wealth and possessions
   c) Power and influence d) Indifference and insensitivity

14) Which value involves considering the perspectives and feelings of others?
   a) Empathy b) Courage
   c) Determination d) Patience

15) The value of respect entails _____.
a) Recognizing the worth of every individual and their rights
b) Achieving personal success at any cost
c) Promoting competition among individuals
d) Pursuing material gains over relationships

16) Which value involves being accountable for one's decisions and actions?
a) Responsibility b) Flexibility
c) Confidence d) Arrogance

17) The value of integrity entails _____.
a) Being honest and true to oneself and others
b) Pursuing personal interests at any cost
c) Manipulating and deceiving others for personal gain
d) Ignoring the feelings and rights of other

18) Which value involves being considerate and thoughtful towards others?
a) Kindness b) Determination
c) Independence d) Indifference

19) The value of wisdom involves _____.
a) Making sound and informed judgments based on knowledge and experience
b) Pursuing personal interests at the expense of others
c) Ignoring the perspectives and concerns of others
d) Suppressing one's emotions and thoughts

20) Which value involves being truthful and sincere in one's actions and words?
a) Honesty b) Tolerance
c) Flexibility d) Arrogance

21) What is the primary goal of engineering ethics?
a) To maximize profits for companies
b) To ensure engineers work efficiently
c) To protect public safety and welfare
d) To follow industry standards

22) Which of the following is considered an ethical responsibility of an engineer?
a) Ignoring environmental concerns to meet deadlines
b) Ensuring the safety of the public
c) Disregarding laws and regulations
d) Making decisions based on personal interests

23) Ethical engineering practices promote _____.
a) The continuous pursuit of profit
b) The advancement of technology at any cost
c) Public trust and confidence in engineering
d) The minimization of safety regulations

24) Ethical engineers should consider which of the following when making decisions?
a) Profit maximization
b) Only the interests of the employer
c) Public safety, environmental impact, and ethical codes
d) Personal comfort and convenience

25) Which of the following is NOT part of an engineer's ethical responsibility?
a) Designing for safety and sustainability
b) Falsifying data to ensure project success
c) Reporting safety concerns immediately
d) Following industry standards and regulations

26) Ethical engineering involves making decisions based on _____.
a) Personal opinions and values
b) Financial incentives and company pressure
c) Objective analysis, codes of ethics, and consideration for the public good
d) Trends in the field of engineering

27) What should an engineer do if they discover a colleague is involved in unethical practices?
a) Ignore the situation to avoid conflict
b) Report the unethical behavior to management or relevant authorities
c) Cover up the situation to protect the colleague
d) Allow the behavior to continue if it does not affect the project

28) Ethical engineering practices include _____.
a) Following industry standards and regulations
b) Ensuring profitability is the main priority
c) Cutting costs by any means necessary
d) Avoiding the reporting of safety hazards

29) What is the primary focus of Kohlberg's theory?
a) Cognitive development b) Social development
c) Moral development d) Emotional development

30) Which term refers to an agreement that is made through discussions and compromises among parties?
a) Conflict b) Consensus
c) Dispute d) Isolation

31) What is the primary goal of risk assessment?
a) To eliminate all risks
b) To identify and mitigate potential risks
c) To ignore potential risks
d) To transfer risks to others

32) What is the primary goal of safety protocols?
a) To increase productivity
b) To reduce costs
c) To prevent injuries and illnesses
d) To improve employee morale

33) What is the difference between a hazard and a risk?
a) A hazard is a potential risk, while a risk is a real danger
b) A hazard is a real danger, while a risk is a potential danger
c) A hazard is a physical danger, while a risk is a financial danger
d) A hazard is a financial danger, while a risk is a physical danger

34) What should you do if you identify a potential risk in the workplace?
a) Ignore it and hope it goes away
b) Report it to your supervisor or HR
c) Try to mitigate it on your own
d) Transfer the risk to someone else

35) According to the theory of ethical egoism, what should guide an individual's moral actions?
a) The well-being of others
b) The individual's own self-interest
c) Social norms and conventions
d) Universal moral principles

36) Collegiality in a professional setting refers to _____.
a) Loyalty to your employer
b) Cooperation and mutual respect among colleagues
c) Competing for individual success
d) Avoiding work conflicts

37) Professional loyalty involves _____.
a) Reporting colleagues' mistakes publicly
b) Protecting the interests of the team or organization
c) Ignoring safety violations to avoid
d) Disclosing confidential information for personal conflict gain

38) Employee rights include _____.
a) The right to work without discrimination
b) The right to disregard company policies
c) The right to personal opinion but not affecting work
d) The right to ignore workplace safety standards

39) Intellectual Property Rights (IPR) protect _____.
- a) The financial interests of corporations
- b) The ownership and use of creative ideas and inventions
- c) The physical assets of a company
- d) Workplace performance evaluations

40) *Risk assessment* is important because it helps in _____.
- a) Evaluating the potential impact of hazards on health and safety
- b) Minimizing workplace productivity
- c) Defining job roles
- d) Ignoring environmental issues

41) In risk management, mitigation strategies aim to _____.
- a) Accept all risks in the workplace
- b) Reduce or eliminate identified risks
- c) Increase the likelihood of hazards
- d) Focus only on maximizing profits

42) Which of the following is a potential consequence of *occupational crime?*
- a) Increased workplace productivity
- b) Legal consequences and loss of reputation
- c) Improvement in company safety standards
- d) Higher employee satisfaction

43) Risk reduction in engineering refers to _____.
- a) Implementing measures to lower the work chances of accidents
- b) Increasing the number of hazards in the work environment
- c) Ignoring potential risks
- d) Cutting costs by removing safety measures

44) Public safety regulations are primarily designed to _____.
- a) Ensure the safety of the company's assets
- b) Protect the general public from potential harm
- c) Increase revenue for the government
- d) Focus only on preventing natural disasters

45) Multinational corporations (MNCs) are characterized by _____.
- a) Operations in multiple countries with a centralized headquarters
- b) Operating only in their home country
- c) Limited influence on global markets
- d) No responsibility toward environmental concerns

46) Environmental ethics primarily deals with _____.

a) Human responsibility to manage the environment and natural resources
b) Minimizing corporate profits
c) Technological advancements in engineering
d) Treating employees equally

47) Which of the following is NOT an example of environmental ethics?

a) Reducing pollution and waste
b) Maximizing resource use regardless of environmental impact
c) Preserving biodiversity
d) Sustainable development

48) Computer ethics involves _____.

a) Programming and coding without considering social consequences
b) Understanding the moral implications of computing technologies
c) Focusing only on technological innovation
d) Ignoring privacy issues

49) Weapons development ethics deals with _____.

a) The development of new technologies to enhance military capabilities
b) Restricting the use of all technological advancements
c) Focusing only on civilian safety
d) Only addressing the legal aspects of weapon development

50) Engineers as managers are expected to _____.

a) Focus solely on technical tasks
b) Lead teams, make strategic decisions, and manage projects
c) Ignore the business aspects of their work
d) Avoid taking responsibility for team outcomes

Answer

Q.1 Answer the following Objective Type Questions. 50

1) What is the primary goal of engineering ethics?
a) To maximize profits for companies
b) To ensure engineers work efficiently
c) To protect public safety and welfare
d) To follow industry standards

2) Which of the following is considered an ethical responsibility of an engineer?
a) Ignoring environmental concerns to meet deadlines
b) Ensuring the safety of the public
c) Disregarding laws and regulations
d) Making decisions based on personal interests

3) Ethical engineering practices promote _____.
a) The continuous pursuit of profit
b) The advancement of technology at any cost
c) Public trust and confidence in engineering
d) The minimization of safety regulations

4) Ethical engineers should consider which of the following when making decisions?
a) Profit maximization
b) Only the interests of the employer
c) Public safety, environmental impact, and ethical codes
d) Personal comfort and convenience

5) Which of the following is NOT part of an engineer's ethical responsibility?
a) Designing for safety and sustainability
b) Falsifying data to ensure project success
c) Reporting safety concerns immediately
d) Following industry standards and regulations

6) Ethical engineering involves making decisions based on _____.
   a) Personal opinions and values
   b) Financial incentives and company pressure
   c) Objective analysis, codes of ethics, and consideration for the public good
   d) Trends in the field of engineering

7) What should an engineer do if they discover a colleague is involved in unethical practices?
   a) Ignore the situation to avoid conflict
   b) Report the unethical behavior to management or relevant authorities
   c) Cover up the situation to protect the colleague
   d) Allow the behavior to continue if it does not affect the project

8) Ethical engineering practices include _____.
   a) Following industry standards and regulations
   b) Ensuring profitability is the main priority
   c) Cutting costs by any means necessary
   d) Avoiding the reporting of safety hazards

9) What is the primary focus of Kohlberg's theory?
   a) Cognitive development b) Social development
   c) Moral development d) Emotional development

10) Which term refers to an agreement that is made through discussions and compromises among parties?
   a) Conflict b) Consensus
   c) Dispute d) Isolation

11) What is the primary goal of risk assessment?
   a) To eliminate all risks
   b) To identify and mitigate potential risks
   c) To ignore potential risks
   d) To transfer risks to others

12) What is the primary goal of safety protocols?
   a) To increase productivity
   b) To reduce costs
   c) To prevent injuries and illnesses
   d) To improve employee morale

13) What is the difference between a hazard and a risk?
   a) A hazard is a potential risk, while a risk is a real danger
   b) A hazard is a real danger, while a risk is a potential danger
   c) A hazard is a physical danger, while a risk is a financial danger
   d) A hazard is a financial danger, while a risk is a physical danger

14) What should you do if you identify a potential risk in the workplace?
a) Ignore it and hope it goes away
b) Report it to your supervisor or HR
c) Try to mitigate it on your own
d) Transfer the risk to someone else

15) According to the theory of ethical egoism, what should guide an individual's moral actions?
a) The well-being of others
b) The individual's own self-interest
c) Social norms and conventions
d) Universal moral principles

16) Collegiality in a professional setting refers to _____.
a) Loyalty to your employer
b) Cooperation and mutual respect among colleagues
c) Competing for individual success
d) Avoiding work conflicts

17) Professional loyalty involves _____.
a) Reporting colleagues' mistakes publicly
b) Protecting the interests of the team or organization
c) Ignoring safety violations to avoid
d) Disclosing confidential information for personal conflict gain

18) Employee rights include _____.
a) The right to work without discrimination
b) The right to disregard company policies
c) The right to personal opinion but not affecting work
d) The right to ignore workplace safety standards

19) Intellectual Property Rights (IPR) protect _____.
a) The financial interests of corporations
b) The ownership and use of creative ideas and inventions
c) The physical assets of a company
d) Workplace performance evaluations

20) *Risk assessment* is important because it helps in _____.
a) Evaluating the potential impact of hazards on health and safety
b) Minimizing workplace productivity
c) Defining job roles
d) Ignoring environmental issues

21) In risk management, mitigation strategies aim to _____.
a) Accept all risks in the workplace
b) Reduce or eliminate identified risks
c) Increase the likelihood of hazards
d) Focus only on maximizing profits

22) Which of the following is a potential consequence of *occupational crime?*
a) Increased workplace productivity
b) Legal consequences and loss of reputation
c) Improvement in company safety standards
d) Higher employee satisfaction

23) Risk reduction in engineering refers to _____.
a) Implementing measures to lower the work chances of accidents
b) Increasing the number of hazards in the work environment
c) Ignoring potential risks
d) Cutting costs by removing safety measures

24) Public safety regulations are primarily designed to _____.
a) Ensure the safety of the company's assets
b) Protect the general public from potential harm
c) Increase revenue for the government
d) Focus only on preventing natural disasters

25) Multinational corporations (MNCs) are characterized by _____.
a) Operations in multiple countries with a centralized headquarters
b) Operating only in their home country
c) Limited influence on global markets
d) No responsibility toward environmental concerns

26) Environmental ethics primarily deals with _____.
a) Human responsibility to manage the environment and natural resources
b) Minimizing corporate profits
c) Technological advancements in engineering
d) Treating employees equally

27) Which of the following is NOT an example of environmental ethics?
a) Reducing pollution and waste
b) Maximizing resource use regardless of environmental impact
c) Preserving biodiversity
d) Sustainable development

28) Computer ethics involves _____.
a) Programming and coding without considering social consequences
b) Understanding the moral implications of computing technologies
c) Focusing only on technological innovation
d) Ignoring privacy issues

29) Weapons development ethics deals with _____.
a) The development of new technologies to enhance military capabilities
b) Restricting the use of all technological advancements
c) Focusing only on civilian safety
d) Only addressing the legal aspects of weapon development

30) Engineers as managers are expected to _____.
a) Focus solely on technical tasks
b) Lead teams, make strategic decisions, and manage projects
c) Ignore the business aspects of their work
d) Avoid taking responsibility for team outcomes

31) Consulting engineers are hired to _____.
a) Work on projects within the company they are employed
b) Provide expert advice on technical and engineering problems
c) Manage public relations for a company
d) Conduct legal investigations

32) Engineers acting as expert witnesses typically _____.
a) Present evidence and offer testimony in legal cases
b) Focus on public relations during a case
c) Manage engineering projects for legal firms
d) Directly represent the interests of a company court

33) Sample Code of Ethics of professional organizations typically includes _____.
a) Guidelines for acceptable behavior and decision-making
b) Rules for maximizing profits at any cost
c) Detailed technical specifications for projects
d) Guidelines for political involvement in engineering

34) ASME stands for _____.
a) American Society of Mechanical Engineers
b) American Society of Management Engineers
c) Association of Safety and Mechanical Engineers
d) Association of Scientific and Mechanical Engineers

35) The ASCE Code of Ethics emphasizes _____.
a) Following only local regulations
b) Maintaining professional integrity and responsibility
c) Focusing on personal financial gain
d) Ignoring environmental impacts

36) The IEEE Code of Ethics is primarily concerned with _____.
a) Fostering professional competence and integrity
b) Protecting corporate secrets
c) Maximizing technological advancements at any cost
d) Developing weapons for defense purposes

37) Global issues in engineering ethics include _____.
a) Cultural differences in engineering practices
b) Lack of understanding between technical and ethical concerns
c) Addressing both local and international engineering challenges
d) All of the above

38) A key challenge faced by multinational corporations is _____.
a) Balancing profits with social and environmental
b) Competing only within their home country responsibilities
c) Focusing solely on domestic issues
d) Ignoring corporate social responsibility

39) Empathy is the ability to _____.
a) Solve problems logically
b) Understand and share the feelings of others
c) Be indifferent to others' emotions
d) Only care about your own well-being

40) The quality of "caring" includes _____.
a) Showing concern for others' well-being
b) Ignoring the needs of others
c) Only helping family and friends
d) Seeking praise for helping others

41) What are fundamental human values?
a) Core beliefs and principles that guide human behavior and interactions
b) Economic indicators for social development
c) Religious doctrines that govern human life
d) Scientific facts that influence decision-making

42) Which value emphasizes treating others as you wish to be treated?
a) Respect b) Empathy
c) Honesty d) Kindness

43) The value of honesty is closely related to _____.
a) Truthfulness and sincerity b) Wealth and possessions
c) Power and influence d) Indifference and insensitivity

44) Which value involves considering the perspectives and feelings of others?
a) Empathy b) Courage
c) Determination d) Patience

45) The value of respect entails _____.

a) Recognizing the worth of every individual and their rights
b) Achieving personal success at any cost
c) Promoting competition among individuals
d) Pursuing material gains over relationships

46) Which value involves being accountable for one's decisions and actions?

a) Responsibility b) Flexibility
c) Confidence d) Arrogance

47) The value of integrity entails _____.

a) Being honest and true to oneself and others
b) Pursuing personal interests at any cost
c) Manipulating and deceiving others for personal gain
d) Ignoring the feelings and rights of other

48) Which value involves being considerate and thoughtful towards others?

a) Kindness b) Determination
c) Independence d) Indifference

49) The value of wisdom involves _____.

a) Making sound and informed judgments based on knowledge and experience
b) Pursuing personal interests at the expense of others
c) Ignoring the perspectives and concerns of others
d) Suppressing one's emotions and thoughts

50) Which value involves being truthful and sincere in one's actions and words?

a) Honesty b) Tolerance
c) Flexibility d) Arrogance

S.Y. (B.Tech.) (Civil Engineering) (Semester - II) (New) (CBCS)
Examination: March/April – 2026
Engineering Mathematics - III (BTN01404)

Day & Date: Friday, 29-05-2026 Max. Marks: 70
Time: 10:00 AM To 01:00 PM

Instructions: 1) Q. No. 1 is compulsory. It should be solved in the first 30 minutes in Answer Book Page no 03 (Starting page of the Answer Book). Each question carries one mark.
2) Don't forget to Mention question paper set (P/Q/R/S) on top of page.
3) Figures to the right indicates full marks.
4) Use of non-programmable calculator is allowed.

MCQ/Objective Type Questions

Duration: 30 Minutes Marks:14

Q.1 Choose the correct Answer. **14**

1) If the differential equation $\frac{d^n y}{dx^n} + P_1 \frac{d^{n-1} y}{dx^{n-1}} + \ldots + P_n y = X$ is a linear differential equation with constant coefficients then the R.H.S. is a _____.

a) constant
b) function of x only
c) function of y only
d) function of x and y

2) $\frac{1}{D+1}\left(\log x + \frac{1}{x}\right)$ is equal to _____.

a) e^x
b) $\log x$
c) x
d) 1

3) $L^{-1}\left(\frac{s+2}{(s+2)^2-5^2}\right) =$ _____.

a) $e^{2t}\sinh 5t$
b) $e^{-2t}\cosh 25t$
c) $e^{-2t}\sinh 5t$
d) $e^{-2t}\cosh 5t$

4) A continuous random variable has the following probability density function $f(x) = kx(1-x), 0 \le x \le 1$ then $k =$ _____.

a) 2
b) 3
c) 5
d) 6

5) The general solution of $(3x+2)^2 \frac{d^2y}{dx^2} + 5(3x+2)\frac{dy}{dx} - 3y = 0$ is $y =$ _____.

a) $(c_1 + c_2 x)e^{2x}$
b) $c_1 e^{2x} + c_2 e^{4x}$
c) $c_1(3x+2)^{1/3} + c_2(3x+2)^{-1}$
d) $c_1(x+3)^2 + c_2(x+3)^3$

6) If $L[f(t)] = \emptyset(s)$, then $L(f(at))$ is _____.

a) $\emptyset\left(\frac{s}{a}\right)$ b) $\frac{1}{s}\emptyset\left(\frac{s}{a}\right)$

c) $\frac{1}{a}\emptyset\left(\frac{s}{a}\right)$ d) a. $\emptyset\left(\frac{s}{a}\right)$

7) The Laplace transform of $t\cosh t$ is _____.

a) $\frac{s^2-1}{(s^2+1)^2}$ b) $-\frac{s^2-1}{(s+1)^2}$

c) $\frac{s^2+1}{(s^2-1)^2}$ d) $-\frac{s^2+1}{(s^2-1)^2}$

8) The conditions for expansion of a function in a Fourier series are known as _____.

a) Harmonic b) Riemann conditions

c) Periodic d) Dirichlet's conditions

9) If $x\sin x = 1 - \frac{1}{2}\cos x - \frac{2}{3}\cos 2x + \frac{2}{8}\cos 3x - \ldots$ in the interval $(-\pi, \pi)$ then $\frac{1}{1.3} - \frac{1}{3.5} + \frac{1}{5.7} - \frac{1}{7.9} + \cdots =$ _____.

a) $\frac{\pi}{4}$ b) $\frac{\pi-1}{2}$

c) $\frac{\pi-2}{4}$ d) $\frac{\pi-3}{4}$

10) If $b_{yx} = \frac{5}{18}, b_{xy} = \frac{8}{5}$, then $r =$ _____.

a) $\frac{2}{5}$ b) $\frac{1}{2}$

c) $\frac{2}{3}$ d) $\frac{3}{2}$

11) If X, Y denotes the deviations from their means and if $\sum X^2 = 40, \sum Y^2 = 100, \sum XY = 50$, then $r =$ _____.

a) 0.63 b) 0.82

c) 0.91 d) 0.79

12) A discrete probability distribution function of a discrete random variable is given by,

x:	1	2	3	4	5	6
$p(x)$:	k	$2k$	$3k$	k^2	$K^2 + k$	$4k^2$

Then $k =$ _____.

a) $1/8$ b) $1/5$

c) $1/6$ d) $1/7$

13) The solution of the equation $pq = p + q$ is _____.

a) $z = ax + (a+1)y + c$

b) $z = (a+1)x + a(a-1)y + c$

c) $z(a-1) = a(a-1)x + ay + c$

d) $z = (a-1)x + a(a+1)y + c$

14) $Z = a(x + y) + c$ is the general solution of _____.

a) $pq = 1$ b) $p = 1 - q$

c) $p + q = 0$ d) $p = q$

SECTION – I

Q.2 Solve Any Three of the following. **09**

a) Solve $(D^3 + 3D^2 + 3D + 1)y = e^{-x}$

b) Solve $(D^2 - 2D + 1)y = x.e^x \sin x$

c) Solve $(D^2 + 4D + 4)y = x^2$

d) Solve $pq = x^m y^n z^{2l}$

e) Obtain half range sine series for $f(x) = \begin{cases} x, & 0 < x < 1 \\ 2 - x, & 1 < x < 2 \end{cases}$

Q.3 Solve Any Three of the following. **09**

a) Solve $p(1 + q) = qz$

b) Solve $x(y - z)p + y(z - x)q = z(x - y)$

c) Obtain Fourier series expansion of $f(x) = x$ in $(-1, 1)$

d) Find the Fourier series of the function $f(x) = \begin{cases} x, & 0 < x < \pi \\ 2\pi - x, & \pi < x < 2\pi \end{cases}$

e) Solve $(5 + 2x)^2 \frac{d^2y}{dx^2} - 6(5 + 2x)\frac{dy}{dx} + 8y = 6x$

Q.4 Solve Any Two of the following. **10**

a) Solve the following equation by the method of separation of variables $\frac{\partial u}{\partial x} = 4\frac{\partial u}{\partial y}$ where $u(0, y) = 8e^{-3y}$

b) Obtain half range cosine series for $f(x) = \begin{cases} x, & 0 < x < \frac{\pi}{2} \\ \pi - x, & \frac{\pi}{2} < x < \pi \end{cases}$

c) Solve $(D^2 - D - 2)y = 2\log x + \frac{1}{x} + \frac{1}{x^2}$

SECTION – II

Q.5 Solve Any Three of the following. **09**

a) The incomes of a group of 10,000 persons were found to be normally distributed with mean 520 and S.D. 60 Find
- i) The number of persons having incomes between 400 and 550
- ii) The lowest income of the richest 500

b) Calculate $L\{te^{-4t}\sin 3t\}$

c) Calculate $L\left\{\cosh t \int_0^t e^u.\cosh u\, du\right\}$

d) Fit a Straight line to the following data

x:	1	2	3	4	5	6
y:	49	54	60	73	80	86

e) Calculate Spearman's coefficient of rank of correlation from the data on height and weight of 8 students

Height (in inches)	60	62	64	66	68	70	72	74
Weight (in lbs.)	92	83	101	110	128	119	137	146

Q.6 Solve Any Three of the following. **09**

a) Calculate $L^{-1}\left\{\frac{s^2}{(s^2+4)(s^2+9)}\right\}$ by using Convolution Method.

b) Calculate Inverse Laplace transform of $\frac{1}{s}\log\left(1+\frac{1}{s^2}\right)$

c) Fit a Parabola to the following data.

x:	0	1	2	3	4
y:	1.0	1.8	1.3	2.5	6.3

d) A hospital switch board receives an average of 4 emergency calls in a 10 minutes interval. What is the Probability that
- i) there are at least 2 emergency calls
- ii) there are exactly 3 emergency call in an interval of 10 minutes.

e) Find the probability that at most 4 defective bulbs will be found in a box of 200 bulbs if it is known that 2 percent of the bulbs are defective.

Q.7 Solve Any Two of the following. **10**

a) Use Laplace Transform to solve
$(D^2+4D+8)y=1$ where $y(0)=0$ and $y'(0)=1$

b) The mark obtained by 1000 students in an examination are found to be normally distributed with mean 70 and standard deviation 5. Estimate the number of students whose marks will be
- i) between 60 and 75
- ii) more than 75

c) From the following table showing age of cars of a certain make and annual maintenance costs, obtain the regression equation for costs related to age.

Age of cars (years)	2	4	6	7	8	10	12
Annual maintenance cost (Rs.)	1600	1500	1800	1900	1700	2100	2000

Find the approximate cost of maintaining 3 years old cars of the same make.

2) Don't forget to Mention question paper set (P/Q/R/S) on top of page.
3) Figures to the right indicates full marks.
4) Use of non-programmable calculator is allowed.

MCQ/Objective Type Questions

Duration: 30 Minutes Marks:14

Q.1 Choose the correct Answer. 14

1) The conditions for expansion of a function in a Fourier series are known as _____.

a) Harmonic b) Riemann conditions
c) Periodic d) Dirichlet's conditions

2) If $x \sin x = 1 - \frac{1}{2}\cos x - \frac{2}{3}\cos 2x + \frac{2}{8}\cos 3x - \ldots$ in the interval $(-\pi, \pi)$ then $\frac{1}{1.3} - \frac{1}{3.5} + \frac{1}{5.7} - \frac{1}{7.9} + \cdots =$ _____.

a) $\frac{\pi}{4}$ b) $\frac{\pi-1}{2}$
c) $\frac{\pi-2}{4}$ d) $\frac{\pi-3}{4}$

3) If $b_{yx} = \frac{5}{18}, b_{xy} = \frac{8}{5}$, then $r =$ _____.

a) $\frac{2}{5}$ b) $\frac{1}{2}$
c) $\frac{2}{3}$ d) $\frac{3}{2}$

4) If X, Y denotes the deviations from their means and if $\sum X^2 = 40, \sum Y^2 = 100, \sum XY = 50$, then $r =$ _____.

a) 0.63 b) 0.82
c) 0.91 d) 0.79

5) A discrete probability distribution function of a discrete random variable is given by,

x:	1	2	3	4	5	6
$p(x)$:	k	$2k$	$3k$	k^2	K^2+k	$4k^2$

Then $k =$ _____.

a) $1/8$ b) $1/5$
c) $1/6$ d) $1/7$

6) The solution of the equation $pq = p + q$ is _____.

a) $z = ax + (a+1)y + c$
b) $z = (a+1)x + a(a-1)y + c$
c) $z(a-1) = a(a-1)x + ay + c$
d) $z = (a-1)x + a(a+1)y + c$

7) $Z = a(x+y) + c$ is the general solution of _____.

a) $pq = 1$ b) $p = 1 - q$
c) $p + q = 0$ d) $p = q$

8) If the differential equation $\frac{d^n y}{dx^n} + P_1 \frac{d^{n-1} y}{dx^{n-1}} + \ldots + P_n y = X$ is a linear differential equation with constant coefficients then the R.H.S. is a _____.

a) constant b) function of x only
c) function of y only d) function of x and y

9) $\frac{1}{D+1}\left(\log x + \frac{1}{x}\right)$ is equal to _____.

a) e^x b) $\log x$
c) x d) 1

10) $L^{-1}\left(\frac{s+2}{(s+2)^2 - 5^2}\right) =$ _____.

a) $e^{2t}\sinh 5t$ b) $e^{-2t}\cosh 25t$
c) $e^{-2t}\sinh 5t$ d) $e^{-2t}\cosh 5t$

11) A continuous random variable has the following probability density function $f(x) = kx(1-x), 0 \le x \le 1$ then $k =$ _____.

a) 2 b) 3
c) 5 d) 6

12) The general solution of $(3x+2)^2 \frac{d^2 y}{dx^2} + 5(3x+2)\frac{dy}{dx} - 3y = 0$ is $y =$ _____.

a) $(c_1 + c_2 x)e^{2x}$ b) $c_1 e^{2x} + c_2 e^{4x}$
c) $c_1(3x+2)^{1/3} + c_2(3x+2)^{-1}$ d) $c_1(x+3)^2 + c_2(x+3)^3$

13) If $L[f(t)] = \emptyset(s)$, then $L(f(at)]$ is _____.

a) $\emptyset\left(\frac{s}{a}\right)$ b) $\frac{1}{s}\emptyset\left(\frac{s}{a}\right)$

c) $\frac{1}{a}\emptyset\left(\frac{s}{a}\right)$ d) a. $\emptyset\left(\frac{s}{a}\right)$

14) The Laplace transform of $t\cosh t$ is _____.

a) $\frac{s^2-1}{(s^2+1)^2}$ b) $-\frac{s^2-1}{(s+1)^2}$

c) $\frac{s^2+1}{(s^2-1)^2}$ d) $-\frac{s^2+1}{(s^2-1)^2}$

a) e^x
b) $\log x$
c) x
d) 1

7) $L^{-1}\left(\frac{s+2}{(s+2)^2-5^2}\right) =$ _____.

a) $e^{2t} \sinh 5t$
b) $e^{-2t} \cosh 25t$
c) $e^{-2t} \sinh 5t$
d) $e^{-2t} \cosh 5t$

8) A continuous random variable has the following probability density function $f(x) = kx(1-x), 0 \leq x \leq 1$ then $k =$ _____.

a) 2
b) 3
c) 5
d) 6

9) The general solution of $(3x+2)^2 \frac{d^2 y}{dx^2} + 5(3x+2)\frac{dy}{dx} - 3y = 0$ is $y =$ _____.

a) $(c_1 + c_2 x)e^{2x}$
b) $c_1 e^{2x} + c_2 e^{4x}$
c) $c_1(3x+2)^{1/3} + c_2(3x+2)^{-1}$
d) $c_1(x+3)^2 + c_2(x+3)^3$

10) If $L[f(t)] = \emptyset(s)$, then $L(f(at)]$ is _____.

a) $\emptyset\left(\frac{s}{a}\right)$
b) $\frac{1}{s}\emptyset\left(\frac{s}{a}\right)$
c) $\frac{1}{a}\emptyset\left(\frac{s}{a}\right)$
d) a. $\emptyset\left(\frac{s}{a}\right)$

11) The Laplace transform of $t \cosh t$ is _____.

a) $\frac{s^2-1}{(s^2+1)^2}$
b) $-\frac{s^2-1}{(s+1)^2}$
c) $\frac{s^2+1}{(s^2-1)^2}$
d) $-\frac{s^2+1}{(s^2-1)^2}$

12) The conditions for expansion of a function in a Fourier series are known as _____.

a) Harmonic
b) Riemann conditions
c) Periodic
d) Dirichlet's conditions

4) Use of non-programmable calculator is allowed.

MCQ/Objective Type Questions

Duration: 30 Minutes Marks:14

Q.1 Choose the correct Answer. **14**

1) If $L[f(t)] = \emptyset(s)$, then $L(f(at)]$ is _____.

a) $\emptyset\left(\frac{s}{a}\right)$ b) $\frac{1}{s}\emptyset\left(\frac{s}{a}\right)$

c) $\frac{1}{a}\emptyset\left(\frac{s}{a}\right)$ d) a. $\emptyset\left(\frac{s}{a}\right)$

2) The Laplace transform of $t\cosh t$ is _____.

a) $\frac{s^2-1}{(s^2+1)^2}$ b) $-\frac{s^2-1}{(s+1)^2}$

c) $\frac{s^2+1}{(s^2-1)^2}$ d) $-\frac{s^2+1}{(s^2-1)^2}$

3) The conditions for expansion of a function in a Fourier series are known as _____.

a) Harmonic b) Riemann conditions

c) Periodic d) Dirichlet's conditions

4) If $x\sin x = 1 - \frac{1}{2}\cos x - \frac{2}{3}\cos 2x + \frac{2}{8}\cos 3x - \ldots$ in the interval $(-\pi, \pi)$ then $\frac{1}{1.3} - \frac{1}{3.5} + \frac{1}{5.7} - \frac{1}{7.9} + \cdots =$ _____.

a) $\frac{\pi}{4}$ b) $\frac{\pi-1}{2}$

c) $\frac{\pi-2}{4}$ d) $\frac{\pi-3}{4}$

5) If $b_{yx} = \frac{5}{18}, b_{xy} = \frac{8}{5}$, then $r =$ _____.

a) $\frac{2}{5}$ b) $\frac{1}{2}$

c) $\frac{2}{3}$ d) $\frac{3}{2}$

6) If X, Y denotes the deviations from their means and if $\sum X^2 = 40, \sum Y^2 = 100, \sum XY = 50$, then $r =$ _____.

a) 0.63 b) 0.82

c) 0.91 d) 0.79

7) A discrete probability distribution function of a discrete random variable is given by,

x:	1	2	3	4	5	6
$p(x)$:	k	$2k$	$3k$	k^2	$K^2 + k$	$4k^2$

Then $k =$ _____.

a) $1/8$ b) $1/5$

c) $1/6$ d) $1/7$

8) The solution of the equation $pq = p + q$ is _____.

a) $z = ax + (a+1)y + c$

b) $z = (a+1)x + a(a-1)y + c$

c) $z(a-1) = a(a-1)x + ay + c$

d) $z = (a-1)x + a(a+1)y + c$

9) $Z = a(x+y) + c$ is the general solution of _____.

a) $pq = 1$ b) $p = 1 - q$

c) $p + q = 0$ d) $p = q$

10) If the differential equation $\frac{d^n y}{dx^n} + P_1 \frac{d^{n-1} y}{dx^{n-1}} + \ldots + P_n y = X$ is a linear differential equation with constant coefficients then the R.H.S. is a _____.

a) constant b) function of x only

c) function of y only d) function of x and y

11) $\frac{1}{D+1}\left(\log x + \frac{1}{x}\right)$ is equal to _____.

a) e^x b) $\log x$

c) x d) 1

12) $L^{-1}\left(\frac{s+2}{(s+2)^2 - 5^2}\right) =$ _____.

a) $e^{2t} \sinh 5t$ b) $e^{-2t} \cosh 25t$

c) $e^{-2t} \sinh 5t$ d) $e^{-2t} \cosh 5t$

13) A continuous random variable has the following probability density function $f(x) = kx(1-x), 0 \le x \le 1$ then $k =$ _____.

a) 2 b) 3

c) 5 d) 6

14) The general solution of $(3x+2)^2\frac{d^2y}{dx^2}+5(3x+2)\frac{dy}{dx}-3y=0$ is $y=$ _____.

a) $(c_1+c_2x)e^{2x}$ b) $c_1e^{2x}+c_2e^{4x}$

c) $c_1(3x+2)^{1/3}+c_2(3x+2)^{-1}$ d) $c_1(x+3)^2+c_2(x+3)^3$

Set **S**

S.Y. (B.Tech.) (Civil Engineering) (Semester - II) (New) (CBCS)
Examination: March/April – 2026
Engineering Mathematics - III (BTN01404)

Day & Date: Friday, 29-05-2026 Max. Marks: 56
Time: 10:00 AM To 01:00 PM

Instructions: 1) All questions are compulsory.
2) Figures to the right indicate full marks.
3) Use of non-programmable calculator is allowed.

SECTION – I

Q.2 Solve Any Three of the following. **09**

a) Solve $(D^3 + 3D^2 + 3D + 1)y = e^{-x}$

b) Solve $(D^2 - 2D + 1)y = x.e^x \sin x$

c) Solve $(D^2 + 4D + 4)y = x^2$

d) Solve $pq = x^m y^n z^{2l}$

e) Obtain half range sine series for $f(x) = \begin{cases} x, & 0 < x < 1 \\ 2 - x, & 1 < x < 2 \end{cases}$

Q.3 Solve Any Three of the following. **09**

a) Solve $p(1 + q) = qz$

b) Solve $x(y - z)p + y(z - x)q = z(x - y)$

c) Obtain Fourier series expansion of $f(x) = x$ in $(-1, 1)$

d) Find the Fourier series of the function $f(x) = \begin{cases} x, & 0 < x < \pi \\ 2\pi - x, & \pi < x < 2\pi \end{cases}$

e) Solve $(5 + 2x)^2 \frac{d^2y}{dx^2} - 6(5 + 2x)\frac{dy}{dx} + 8y = 6x$

Q.4 Solve Any Two of the following. **10**

a) Solve the following equation by the method of separation of variables $\frac{\partial u}{\partial x} = 4\frac{\partial u}{\partial y}$ where $u(0, y) = 8e^{-3y}$

b) Obtain half range cosine series for $f(x) = \begin{cases} x, & 0 < x < \frac{\pi}{2} \\ \pi - x, & \frac{\pi}{2} < x < \pi \end{cases}$

c) Solve $(D^2 - D - 2)y = 2\log x + \frac{1}{x} + \frac{1}{x^2}$

SECTION – II

Q.5 Solve Any Three of the following. **09**

a) The incomes of a group of 10,000 persons were found to be normally distributed with mean 520 and S.D. 60 Find
- i) The number of persons having incomes between 400 and 550
- ii) The lowest income of the richest 500

b) Calculate $L\{te^{-4t}\sin 3t\}$

c) Calculate $L\left\{\cosh t \int_0^t e^u . \cosh u \, du\right\}$

d) Fit a Straight line to the following data

x:	1	2	3	4	5	6
y:	49	54	60	73	80	86

e) Calculate Spearman's coefficient of rank of correlation from the data on height and weight of 8 students

Height (in inches)	60	62	64	66	68	70	72	74
Weight (in lbs.)	92	83	101	110	128	119	137	146

Q.6 Solve Any Three of the following. **09**

a) Calculate $L^{-1}\left\{\frac{s^2}{(s^2+4)(s^2+9)}\right\}$ by using Convolution Method.

b) Calculate Inverse Laplace transform of $\frac{1}{s}\log\left(1+\frac{1}{s^2}\right)$

c) Fit a Parabola to the following data.

x:	0	1	2	3	4
y:	1.0	1.8	1.3	2.5	6.3

d) A hospital switch board receives an average of 4 emergency calls in a 10 minutes interval. What is the Probability that
- i) there are at least 2 emergency calls
- ii) there are exactly 3 emergency call in an interval of 10 minutes.

e) Find the probability that at most 4 defective bulbs will be found in a box of 200 bulbs if it is known that 2 percent of the bulbs are defective.

Q.7 Solve Any Two of the following. **10**

a) Use Laplace Transform to solve
$(D^2+4D+8)y = 1$ where $y(0) = 0$ and $y'(0) = 1$

b) The mark obtained by 1000 students in an examination are found to be normally distributed with mean 70 and standard deviation 5. Estimate the number of students whose marks will be
- i) between 60 and 75
- ii) more than 75

c) From the following table showing age of cars of a certain make and annual maintenance costs, obtain the regression equation for costs related to age.

Age of cars (years)	2	4	6	7	8	10	12
Annual maintenance cost (Rs.)	1600	1500	1800	1900	1700	2100	2000

Find the approximate cost of maintaining 3 years old cars of the same make.

Applied Thermodynamics (MECHPCC-01)

Day & Date: Monday, 04-05-2026 Max. Marks: 70
Time: 03:00 PM To 06:00 PM

Instructions: 1) Q. No. 1 is compulsory. It should be solved in the first 30 minutes in Answer Book Page no 03 (Starting page of the Answer Book). Each question carries one mark.
2) Don't forget to mention question paper set (P/Q/R/S) on top of page.
3) Figures to the right indicates full marks.
4) Assume suitable data if required and state it clearly.
5) Use of Steam tables is allowed.
6) Use of scientific calculator is allowed.

MCQ/Objective Type Questions

Duration: 30 Minutes Marks:14

Q.1 Choose the correct answer. **14**

1) What is the dryness fraction (x) on the dry and saturated steam?
a) x=0 b) x=1
c) x=0.9 d) x=0.5

2) The term coefficient of performance is related with _____.
a) Heat pump b) Heat Engine
c) Steam Engine d) Gas Turbine

3) Available energy is known as _____.
a) Entropy b) Enthalpy
c) Gibbs energy d) Exergy

4) When the boiler pressure in the Rankine cycle increases, the efficiency of plant _____.
a) increases b) decreases
c) remains the same d) cannot say

5) The ratio of heat used in producing the steam to the heat liberated in the furnace is called _____.
a) Equivalent evaporation b) Evaporative capacity
c) Boiler efficiency d) Factor of evaporation

6) The major heat loss in the boiler is due to _____.
a) Moisture in fuel b) Dry fuel gases
c) steam formation d) Unburnt fuel

7) The smallest section of Convergent - divergent nozzle is called _____.
a) Opening
b) Inlet
c) Diverging section
d) Throat

8) The law of compression for Isentropic compression is approximated by the equation _____.
a) $pv = C$
b) $Pv^{1.3} = C$
c) $pv^{1.4} = C$
d) $Pv^{1.135} = C$

9) The ratio of the actual vacuum to the ideal vacuum in a condenser is called _____.
a) condenser efficiency
b) vacuum efficiency
c) nozzle efficiency
d) evaporator efficiency

10) In case of reaction steam turbine _____.
a) there is an enthalpy drop both in fixed and moving blades
b) there is an enthalpy drop only in fixed blades
c) there is an enthalpy drop only in moving blades
d) none of the above

11) A condenser in a steam power plant _____.
a) increases expansion ratio of steam
b) reduces back pressure of steam
c) reduces temp of steam
d) All of the above

12) Delaval turbine is _____.
a) impulse reaction turbine
b) reaction turbine
c) multi-rotor impulse turbine
d) single-rotor impulse turbine

13) In single stage single acting reciprocating-compressor without clearance volume, the work done is minimal during _____.
a) isothermal compression
b) isentropic compression
c) polytropic compression
d) None of the above

14) Due to intercooling the required work done for compression, _____.
a) Remains constant
b) Increases
c) Decreases
d) None of the above

Time: 03:00 PM To 06:00 PM

Instructions: 1) Answer any two questions from each section.
2) Figures to the right indicate full marks.
3) Use of Steam tables and Mollier diagrams is allowed.
4) Use of Scientific calculator is allowed.
5) Assume suitable data if required and state it clearly.

SECTION – I

Q.2 **a)** Calculate the standard enthalpy at 298.15 K for the reaction **05**

$4NH_3(g)+5O_2(g) \rightarrow 4NO(g) + 6H_2O(g)$

standard enthalpies of formation for

$NH_3(g)$ = 45.72 KJ/mol

$NO(g)$ = 90.43 KJ/mol

$H_2o(g)$ = -242 KJ/mol

b) Derive an expression for entropy change of an ideal gas undergoing change of state in terms of initial and final temperatures and volumes. **05**

c) State 2nd law of thermodynamics and prove that **04**
$COP_{HP} = COP_{Refrigerator} + 1$.

Q.3 **a)** Write a short note on the classification of Boilers. **05**

b) With the help of formulae, enlist the different losses in a boiler and draw a model heat balance sheet for a boiler. **05**

c) A boiler produces wet steam having a dryness fraction of 0.90. The working pressure of the boiler is 12 bar absolute It generates steam at the rate of 640 kg/hr and consumes coal at the rate of 80 kg/hr, if the calorific value of coal is 31,400 kJ/kg and water is fed at temp. of 200C, calculate: **04**

i) equivalent evaporation/kg of coal
ii) factor of evaporation
iii) boiler efficiency

Q.4 **a)** Explain the effect of various operating conditions on Rankine cycle efficiency. **05**

b) In the Rankine cycle, dry and saturated steam enters the turbine at 20 bar pressure. The exhaust pressure of the turbine is 0.1 bar, and all processes are reversible, find: **05**

i) Cycle thermal efficiency
ii) Work ratio
iii) Specific steam Consumption

c) Draw the T-S diagram for the Rankine cycle when steam enters the turbine is. **04**

i) Dry and saturated
ii) Superheated

SECTION – II

Q.5 **a)** In the De-laval turbine steam issues from a nozzle with a velocity of 1200 m/s. the nozzle angle is 20°. The mean blade speed is 400 m/s. inlet and outlet angles of the blade are equal. The mass of steam flowing through the turbine per hour is 1000 kg calculate: **05**

i) Blade angles
ii) Relative velocity of steam entering the blade
iii) Tangential force on the blade
iv) Power developed
v) Blade efficiency. Take K = 0.8

b) Define the Condenser, & explain with a sketch the elements of the steam-condensing plant. **05**

c) What is a nozzle? What are its different types? Explain with the help of sketches. **04**

Q.6 **a)** Derive an expression for the volumetric efficiency of a reciprocating compressor with usual notations. **05**

b) What is the compounding of a steam turbine? Explain any one method of compounding. **05**

c) Differentiate between Surface Condenser & Jet Condenser. **04**

Q.7 **a)** Air is to be compressed in a single-stage reciprocating compressor from 1.013 bar and 15°C to 7 bar. Calculate the indicated power required for a free air delivery of 0.3 m^3/min, when the compression process is **05**

i) Isentropic
ii) Polytronic, and n = 1.25.
iii) Isothermal

b) Derive the expression for a polytropic work done in a single-stage reciprocating air compressor with a suitable P-V diagram. **05**

c) What is the necessity of multistage compression? Discuss the advantages of multistage compression with intercooling. **04**

$H_2o(g)$ = -242 KJ/mol

b) Derive an expression for entropy change of an ideal gas undergoing change of state in terms of initial and final temperatures and volumes. **05**

c) State 2nd law of thermodynamics and prove that **04**
$COP_{HP} = COP_{Refrigerator} + 1$.

Q.3 **a)** Write a short note on the classification of Boilers. **05**

b) With the help of formulae, enlist the different losses in a boiler and draw a model heat balance sheet for a boiler. **05**

c) A boiler produces wet steam having a dryness fraction of 0.90. The working pressure of the boiler is 12 bar absolute It generates steam at the rate of 640 kg/hr and consumes coal at the rate of 80 kg/hr, if the calorific value of coal is 31,400 kJ/kg and water is fed at temp. of 200C, calculate: **04**

i) equivalent evaporation/kg of coal
ii) factor of evaporation
iii) boiler efficiency

Q.4 **a)** Explain the effect of various operating conditions on Rankine cycle efficiency. **05**

b) In the Rankine cycle, dry and saturated steam enters the turbine at 20 bar pressure. The exhaust pressure of the turbine is 0.1 bar, and all processes are reversible, find: **05**

i) Cycle thermal efficiency
ii) Work ratio
iii) Specific steam Consumption

c) Draw the T-S diagram for the Rankine cycle when steam enters the turbine is. **04**

i) Dry and saturated
ii) Superheated

SECTION – II

Q.5 **a)** In the De-laval turbine steam issues from a nozzle with a velocity of 1200 m/s. the nozzle angle is 20°. The mean blade speed is 400 m/s. inlet and outlet angles of the blade are equal. The mass of steam flowing through the turbine per hour is 1000 kg calculate: **05**

i) Blade angles
ii) Relative velocity of steam entering the blade
iii) Tangential force on the blade
iv) Power developed
v) Blade efficiency. Take K = 0.8

b) Define the Condenser, & explain with a sketch the elements of the steam-condensing plant. **05**

c) What is a nozzle? What are its different types? Explain with the help of sketches. **04**

Q.6 **a)** Derive an expression for the volumetric efficiency of a reciprocating compressor with usual notations. **05**

b) What is the compounding of a steam turbine? Explain any one method of compounding. **05**

c) Differentiate between Surface Condenser & Jet Condenser. **04**

Q.7 **a)** Air is to be compressed in a single-stage reciprocating compressor from 1.013 bar and 15°C to 7 bar. Calculate the indicated power required for a free air delivery of 0.3 m^3/min, when the compression process is **05**

i) Isentropic
ii) Polytronic, and n = 1.25.
iii) Isothermal

b) Derive the expression for a polytropic work done in a single-stage reciprocating air compressor with a suitable P-V diagram. **05**

c) What is the necessity of multistage compression? Discuss the advantages of multistage compression with intercooling. **04**

S.Y. (B.Tech.) (Mechanical Engineering) (Semester - I) (New) (NEP CBCS) Examination: March/April-2026
Applied Thermodynamics (MECHPCC-01)

Day & Date: Monday, 04-05-2026 Max. Marks: 70
Time: 03:00 PM To 06:00 PM

Instructions: 1) Q. No. 1 is compulsory. It should be solved in the first 30 minutes in Answer Book Page no 03 (Starting page of the Answer Book). Each question carries one mark.
2) Don't forget to mention question paper set (P/Q/R/S) on top of page.
3) Figures to the right indicates full marks.
4) Assume suitable data if required and state it clearly.
5) Use of Steam tables is allowed.
6) Use of scientific calculator is allowed.

MCQ/Objective Type Questions

Duration: 30 Minutes Marks:14

Q.1 Choose the correct answer. **14**

1) The major heat loss in the boiler is due to _____.
a) Moisture in fuel b) Dry fuel gases
c) steam formation d) Unburnt fuel

2) The smallest section of Convergent - divergent nozzle is called _____.
a) Opening b) Inlet
c) Diverging section d) Throat

3) The law of compression for Isentropic compression is approximated by the equation _____.
a) $pv = C$ b) $Pv^{1.3} = C$
c) $pv^{1.4} = C$ d) $Pv^{1.135} = C$

4) The ratio of the actual vacuum to the ideal vacuum in a condenser is called _____.
a) condenser efficiency b) vacuum efficiency
c) nozzle efficiency d) evaporator efficiency

5) In case of reaction steam turbine _____.
a) there is an enthalpy drop both in fixed and moving blades
b) there is an enthalpy drop only in fixed blades
c) there is an enthalpy drop only in moving blades
d) none of the above

6) A condenser in a steam power plant _____.
a) increases expansion ratio of steam
b) reduces back pressure of steam
c) reduces temp of steam
d) All of the above

7) Delaval turbine is _____.
a) impulse reaction turbine
b) reaction turbine
c) multi-rotor impulse turbine
d) single-rotor impulse turbine

8) In single stage single acting reciprocating-compressor without clearance volume, the work done is minimal during _____.
a) isothermal compression
b) isentropic compression
c) polytropic compression
d) None of the above

9) Due to intercooling the required work done for compression, _____.
a) Remains constant
b) Increases
c) Decreases
d) None of the above

10) What is the dryness fraction (x) on the dry and saturated steam?
a) x=0
b) x=1
c) x=0.9
d) x=0.5

11) The term coefficient of performance is related with _____.
a) Heat pump
b) Heat Engine
c) Steam Engine
d) Gas Turbine

12) Available energy is known as _____.
a) Entropy
b) Enthalpy
c) Gibbs energy
d) Exergy

13) When the boiler pressure in the Rankine cycle increases, the efficiency of plant _____.
a) increases
b) decreases
c) remains the same
d) cannot say

14) The ratio of heat used in producing the steam to the heat liberated in the furnace is called _____.
a) Equivalent evaporation
b) Evaporative capacity
c) Boiler efficiency
d) Factor of evaporation

3) Figures to the right indicates full marks.
4) Assume suitable data if necessary and mention it clearly.

MCQ/Objective Type Questions

Duration: 30 Minutes Marks:14

Q.1 Choose the correct answer. **14**

1) For joining of two parts without use of extra filler metal, following processes are used ____.
a) Brazing b) TIG welding
c) MIG welding d) Resistance welding

2) Investment Casting _____.
a) uses Metal Pattern
b) suitable for Mass Production
c) does not use Core
d) used for manufacturing of Lathe Bed

3) Which of the following flux is used in cupola _____.
a) Limestone b) Sodium Chloride
c) Sodium Hydroxide d) Sulphur

4) Cold working operations are carried out ____.
a) Above recrystallization temperature
b) Below recrystallization temperature
c) Above Melting temperature
d) Below melting temperature

5) Inert gas used in TIG/MIG welding are ____.
a) Oxygen b) Nitrogen
c) Argon/ Helium d) None of above

6) What is the function of cores in the casting process?
a) To support the pattern
b) To provide differential cooling rates at specific portions
c) To make holes and cavities
d) For ease of flow of the molten material

7) Which of the following is 'not' an allowance given to the pattern for casting?
a) Shrinkage
b) Draft
c) Hole
d) Machining

8) The metal extrusion process is generally used for producing _____.
a) uniform solid sections
b) uniform hollow sections
c) uniform solid and hollow sections
d) varying solid and hollow sections

9) The operation of producing cup shaped parts from flat sheet metal blanks by bending and plastic flow of metal, is known as _____.
a) drawing
b) squeezing
c) coining
d) planishing

10) Which of the process, the input material is in powder form?
a) LOM
b) SLS
c) FDM
d) MJM

11) The oxygen cylinder is usually painted with _____.
a) black colour
b) white colour
c) maroon colour
d) yellow colour

12) In which of the following welding techniques, the weld pool is surrounded by an inert gas _____.
a) Arc welding
b) Carbon arc
c) MIG
d) Electroslag welding

13) The purpose of a riser is to _____.
a) deliver molten metal into the mould cavity
b) act as a reservoir for the molten metal
c) feed the molten metal to the casting in order to compensate for the shrinkage
d) deliver the molten metal from pouring basin to gate

14) From the following, in which process, the input material is in solid form?
a) SLA
b) SLS
c) FDM
d) MJM

Set S

S.Y. (B.Tech.) (Mechanical Engineering) (Semester - I) (New) (NEP CBCS) Examination: March/April – 2026
Manufacturing Processes (MECHPCC-02)

Day & Date: Wednesday, 06-05-2026 Max. Marks: 56
Time: 03:00 PM To 06:00 PM

Instructions: 1) Solve any two questions from each section.
2) Figures to the right indicate full marks.
3) Assume suitable data if necessary and mention it clearly.

SECTION – I

Q.2	**a)**	Explain types of pattern allowances with neat sketch.	**05**
	b)	Explain types of Core with neat sketch.	**05**
	c)	Write name of different types of patterns and explain any two patterns.	**04**
Q.3	**a)**	Explain working of cupola Furnace with various zones.	**05**
	b)	Explain in detail working of centrifugal casting and their types.	**05**
	c)	Explain any four defects in casting with their causes.	**04**
Q.4	**a)**	Sketch the three types of flames used in the oxy-acetylene welding process. Give the uses of each.	**05**
	b)	Discuss the TIG welding process setup with the help of a neat sketch also enlist advantages & disadvantages.	**05**
	c)	What is the difference between Brazing and Soldering?	**04**

SECTION – II

Q.5	**a)**	Explain with neat sketch principle and operation of rolling process.	**05**
	b)	Discuss classification of Rolling Mills and their application.	**05**
	c)	Explain the classification of forming processes.	**04**
Q.6	**a)**	Explain with neat sketches hydro forming process.	**05**
	b)	Explain with neat sketches magnetic pulse forming.	**05**
	c)	Explain with neat sketch Explosive forming with advantages, disadvantages, application.	**04**

Q.7	**a)**	Explain Fused Deposition Modelling (FDP) with advantages, disadvantages and applications.	**05**
	b)	Explain Direct Metal Laser Sintering (DMLS) with advantages, disadvantages and applications.	**05**
	c)	Explain advantages, disadvantages and application of rapid Protyping.	**04**

Mechanics of Materials (MECHPCC-03)

Day & Date: Friday, 08-05-2026 Max. Marks: 70
Time: 03:00 PM To 06:00 PM

Instructions: 1) Q. No. 1 is compulsory. It should be solved in the first 30 minutes in Answer Book Page no 03 (Starting page of the Answer Book). Each question carries one mark.
2) Don't forget to Mention question paper set (P/Q/R/S) on top of page.
3) Figures to the right indicates full marks

MCQ/Objective Type Questions

Duration: 30 Minutes Marks:14

Q.1 Choose the correct answer. **14**

1) In terms of Poisson's ratio (μ), ratio of young's modulus (E) to shear Modulus (G) of elastic materials is _____.
a) $2(1+\mu)$ b) $2(1-\mu)$
c) $(1+\mu)/2$ d) $2/(1+\mu)$

2) The Poisson's ratio is ratio of lateral strain to _____.
a) Shear strain b) Linear strain
c) Elastic strain d) Transverse strain

3) For a shaft subjected to torsion, the shear stress developed is _____.
a) maximum at axis b) uniform over section
c) maximum at outer surface d) maximum at inner surface

4) In case of a cantilever beam, maximum B.M. and maximum S.F. always occur at _____.
a) Couple end b) Fixed end
c) Free end d) Mid span

5) For transmitting same power, all properties remaining same, between a solid and hollow shaft _____.
a) hollow shaft is economical b) solid shaft is economical
c) both are costly d) None of the above

6) Maximum energy that a given component can absorb without undergoing permanent deformations up to elastic limit is known as _____.
a) Proof resilience b) Resilience
c) Hardness d) Toughness

7) The Bending moment suddenly rises or fall at a section where there is _____.
a) UDL
b) Couple
c) Point load
d) UVL

8) A point along the length of beam subjected to loads, where bending moment changes its sign known as _____.
a) Zero shear force
b) Maximum shear stress
c) Contra flexure
d) Inflexion

9) When simply supported beam is loaded, maximum tensile stress shall develop at _____.
a) at the neutral layer
b) top layer
c) bottom layer
d) at any layer

10) The ratio of maximum shear stress to average shear stress is 4/3 in _____.
a) circular cross-section
b) rectangular cross-section
c) square cross-section
d) All of the above

11) Maximum shear stress in Mohr's circle is _____.
a) equal to radius of Mohr's circle
b) greater than radius of Mohr's circle
c) less than radius of Mohr's circle
d) could be any of above

12) What is nature of distribution of shear stress in a rectangular beam?
a) Linear
b) Parabolic
c) Hyperbolic
d) Elliptic

13) For a simply supported beam carrying a U.D.L. on its entire span, the deflection is _____.
a) same as slope
b) maximum at center
c) zero at center
d) zero at support

14) Neutral axis of the beam is the axis at which _____.
a) Shear force is zero
b) Moment of inertia is zero
c) Bending stress is zero
d) Bending stress is maximum

S.Y. (B.Tech.) (Mechanical Engineering) (Semester - I) (New) (NEP CBCS) Examination: March/April – 2026
Mechanics of Materials (MECHPCC-03)

Day & Date: Friday, 08-05-2026 Max. Marks: 56
Time: 03:00 PM To 06:00 PM

Instructions: 1) Solve any two questions from each Section.
2) Use of Scientific calculator is allowed.
3) Figures to the right indicate full marks
4) Assume additional suitable data if necessary and state it clearly.

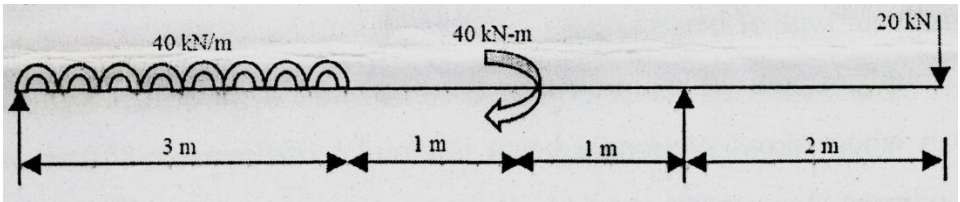
SECTION – I

Q.2 **a)** A steel rod 50 mm diameter, 1200 mm long is co-axially enclosed in a brass tube of 60 mm external diameter, 4 mm thickness and 1200 mm length. Determine stress induced in each material and the change in length, if the assembly is subjected to an axial compressive load of 80 kN. Take, E for steel 200 Gpa; E for Brass 100Gpa. **08**

b) A weight of 2kN is dropped on a collar attached at lower end of vertical bar 3 meter-long, and 24mm diameter. Calculate height of drop if maximum instantaneous stress is not to exceed 140mpa. Also calculate the instantaneous elongation. Take E = 200Gpa. **06**

Q.3 **a)** Design the diameter of solid circular shaft to transmit 50 kW power rotating at 100 rpm. Maximum torque is likely to exceed mean torque by 25%. Maximum permissible stress is 60 Mpa. Also calculate angle of twist for a shaft length of 2 meter. Take G = 80Gpa. **08**

b) A beam carries loaded as shown in figure. Draw SFD, BMD and locate point of contra-shear and contra-flexure on SFD and BMD **06**



Q.4 **a)** A steel bar 10 mm in diameter 2 m long is at a temperature of 25°C. Find the free expansion of the bar when it is heated to 70°C. Calculate temperature stress exerted if **05**

i) expansion of bar is fully prevented
ii) bar is permitted to expand by 0.5 mm.
Take: $\alpha = 12 \times 10^{-6}$ per °c and $E = 200$ Gpa

b) A metal bar 40 × 40 mm section is subjected to axial Tensile load pf 500 kN. The extension of 200 mm gauge length is found to be 0.6mm and decrease in each side of bar is 0.04 mm. Calculate E, G and Poisson's Ratio. **05**

c) Define following terms: **04**

i) Point of Contra flexure
ii) Thermal stress
iii) Proof Resilience
iv) Torsional Rigidity

SECTION – II

Q.5 **a)** At a point in a strained material for given stresses are 54Mpa (Tensile) and 8Mpa (Compressive). Determine **06**

i) Normal, Tangential and Resultant stress on a plane inclined at 30 degrees to Axis of tensile stress.
ii) Maximum shear stress

b) A cast iron beam of T-section of flange 120 x 18 mm and web size 18 x 90 mm is used as simply supported beam of span 8 m. The beam carries point load of 6 kN at midspan of the beam. Determine maximum Tensile and compressive bending stress induced in the beam. **08**

Q.6 **a)** An I section of beam having two equal flanges 180 × 60 mm and web of 60 × 240 mm subjected to maximum shear force of 50kN. Determine shear stress across depth of cross section and draw shear stress distribution diagram across flange. **08**

b) A cantilever beam 3 m span caries two concentrated loads of 10kN and 5kN at a distance of 1.5 m and 3 meter from fixed end. Determine maximum slope and Deflection at free end of beam. Take E = 200 Gpa and Moment of inertia is I = 20 x 10^6 mm^4 **06**

Q.7 **a)** Explain in brief concept of slope and deflection in simply supported beam and cantilever type of beam. **04**

b) A simply supported beam 6-meter span carries U.D.L of 12 kN/m over entire span whose cross section of beam is circular of diameter 80 mm. Calculate Maximum slope at support and maximum deflections. Take E = 110Gpa **05**

c) At a point within a body subjected to two mutually perpendicular directions, stresses are 100 mpa and 75 mpa both are tensile. Each of above stresses is accompanied by shear stress of 75 mpa. Determine Magnitude of major and minor principal stress and greatest shear stress. **05**

4) Assume additional suitable data if necessary and state it clearly.

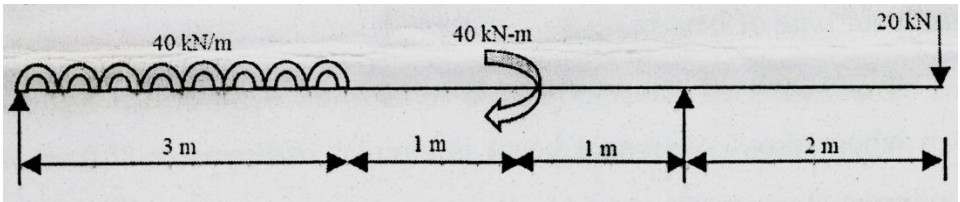
SECTION – I

Q.2 **a)** A steel rod 50 mm diameter, 1200 mm long is co-axially enclosed in a brass tube of 60 mm external diameter, 4 mm thickness and 1200 mm length. Determine stress induced in each material and the change in length, if the assembly is subjected to an axial compressive load of 80 kN. Take, E for steel 200 Gpa; E for Brass 100Gpa. **08**

b) A weight of 2kN is dropped on a collar attached at lower end of vertical bar 3 meter-long, and 24mm diameter. Calculate height of drop if maximum instantaneous stress is not to exceed 140mpa. Also calculate the instantaneous elongation. Take E = 200Gpa. **06**

Q.3 **a)** Design the diameter of solid circular shaft to transmit 50 kW power rotating at 100 rpm. Maximum torque is likely to exceed mean torque by 25%. Maximum permissible stress is 60 Mpa. Also calculate angle of twist for a shaft length of 2 meter. Take G = 80Gpa. **08**

b) A beam carries loaded as shown in figure. Draw SFD, BMD and locate point of contra-shear and contra-flexure on SFD and BMD **06**



Q.4 **a)** A steel bar 10 mm in diameter 2 m long is at a temperature of 25°C. Find the free expansion of the bar when it is heated to 70°C. Calculate temperature stress exerted if **05**

i) expansion of bar is fully prevented
ii) bar is permitted to expand by 0.5 mm.
Take: $\alpha = 12 \times 10^{-6}$ per °c and $E = 200$ Gpa

b) A metal bar 40 × 40 mm section is subjected to axial Tensile load pf 500 kN. The extension of 200 mm gauge length is found to be 0.6mm and decrease in each side of bar is 0.04 mm. Calculate E, G and Poisson's Ratio. **05**

c) Define following terms: **04**

i) Point of Contra flexure
ii) Thermal stress
iii) Proof Resilience
iv) Torsional Rigidity

SECTION – II

Q.5 **a)** At a point in a strained material for given stresses are 54Mpa (Tensile) and 8Mpa (Compressive). Determine **06**

i) Normal, Tangential and Resultant stress on a plane inclined at 30 degrees to Axis of tensile stress.
ii) Maximum shear stress

b) A cast iron beam of T-section of flange 120 x 18 mm and web size 18 x 90 mm is used as simply supported beam of span 8 m. The beam carries point load of 6 kN at midspan of the beam. Determine maximum Tensile and compressive bending stress induced in the beam. **08**

Q.6 **a)** An I section of beam having two equal flanges 180 × 60 mm and web of 60 × 240 mm subjected to maximum shear force of 50kN. Determine shear stress across depth of cross section and draw shear stress distribution diagram across flange. **08**

b) A cantilever beam 3 m span caries two concentrated loads of 10kN and 5kN at a distance of 1.5 m and 3 meter from fixed end. Determine maximum slope and Deflection at free end of beam. Take E = 200 Gpa and Moment of inertia is I = 20 x 10^6 mm^4 **06**

Q.7	**a)**	Explain in brief concept of slope and deflection in simply supported beam and cantilever type of beam.	**04**
	b)	A simply supported beam 6-meter span carries U.D.L of 12 kN/m over entire span whose cross section of beam is circular of diameter 80 mm. Calculate Maximum slope at support and maximum deflections. Take E = 110Gpa	**05**
	c)	At a point within a body subjected to two mutually perpendicular directions, stresses are 100 mpa and 75 mpa both are tensile. Each of above stresses is accompanied by shear stress of 75 mpa. Determine Magnitude of major and minor principal stress and greatest shear stress.	**05**

Set P

S.Y. (B.Tech.) (Mechanical Engineering) (Semester - I) (New) (NEP CBCS) Examination: March/April-2026
Advanced Mathematics and Statistics (OE-01A)

Day & Date: Monday, 11-05-2026 Max. Marks: 70
Time: 03:00 PM To 06:00 PM

Instructions: 1) Q. No. 1 is compulsory. It should be solved in the first 30 minutes in Answer Book Page no 03 (Starting page of the Answer Book). Each question carries one mark.
2) Don't forget to Mention question paper set (P/Q/R/S) on top of page.
3) Figures to the right indicates full marks.

MCQ/Objective Type Questions

Duration: 30 Minutes Marks: 14

Q.1 Choose the correct alternative from the given option. **14**

1) If a linear differential equation with constant coefficients and r.h.s. equal to zero has a real root m_1 repeated two times, then the corresponding part of the integral is _____.

a) $(c_1 + c_2)e^{m_1 x}$ b) $(c_1 x + c_2 x)e^{m_1 x}$

c) $(c_1 x + c_2 x^2)e^{m_1 x}$ d) $(c_1 + c_2 x)e^{m_1 x}$

2) $\frac{1}{D-a} X$ is equal to _____.

a) $\int X e^{ax} dx$ b) $e^{ax} \int X . e^{-ax} dx$

c) $\int X e^{-ax} dx$ d) $e^{-ax} \int X e^{-ax} dx$

3) $\frac{1}{D+1}(\log x + \frac{1}{x})$ is equal to _____.

a) e^x b) 1

c) x d) $\log x$

4) The solution of the equation $\sqrt{p} + \sqrt{q} = 1$ is _____.

a) $z = ax + ay + c$ b) $z = ax + a^2 y + c$

c) $z = ax + \left(1 - \sqrt{a}\right)^2 y + c$ d) None of these

5) The solution of $p + q = 1$ is _____.

a) $z = ax + (1 - a)y + c$ b) $z = ax + by + c$

c) $z = ax + b(1 - y) + c$ d) $z = a(1 - x) + b(1 - y) + c$

6) If μ_1', μ_2', μ_3' are the first three moments of the distribution about certain number then third moment μ_3 of the distribution about the arithmetic mean is given by _____.

a) $\mu_3' - 3\mu_2'\mu_1' + 2(\mu_1')^3$ b) $\mu_3' - 3\mu_1' + (\mu_2')^3$

c) $\mu_3' + 2\mu_2'\mu_1' + (\mu_3')^3$ d) $\mu_3' + 3\mu_2'\mu_1' + {\mu_1'}^2$

7) Coefficient of kurtosis β_1 is given by _____.

a) $\frac{\mu_4}{\mu_3}$ b) $\frac{\mu_4}{\mu_2^2}$

c) $\frac{\mu_3^2}{\mu_2^3}$ d) $\frac{\mu_4}{\mu_2^3}$

8) If value of x for normal distribution is 35, mean of normal distribution is 65 and standard deviation is 25 then standardized random variable is _____.

a) -1.5 b) -1.7

c) -1.2 d) -4

9) A continuous random variable has the following probability density function $f(x) = kx(1-x), 0 \leq x \leq 1$ then $k =$ _____.

a) 2 b) 6

c) 3 d) 5

10) The area under the standard normal curve from $z = -\infty$ to $z = 0$ is _____.

a) 1 b) $1/2$

c) $3/2$ d) 0

11) If X, Y denote the deviation from their means and if $\sum X^2 = 80, \sum Y^2 = 50$ & $\sum XY = 60$ and $r =$_____.

a) 0.65 b) 0.78

c) 0.81 d) 0.95

12) If two regression lines are co-incides then the coefficient of correlation is _____.

a) 0 b) -1

c) ± 1 d) 1

13) If $\bar{x}$ is the mean of the random sample of size n taken from a population of size N having mean μ and standard deviation σ then mean and variance of the distribution $\bar{x}$ are _____.

a) $\bar{x}, \sigma^2$

b) $\bar{x}, \frac{\sigma^2}{n}$

c) μ, σ^2

d) μ, and $\frac{\sigma^2}{n}$

14) χ^2 distribution is defined by _____.

a) $\sum \frac{(O-E)}{E}$

b) $\sum \frac{(O-E)}{E^2}$

c) $\sum \left(\frac{O-E}{E}\right)^2$

d) $\sum \frac{(O-E)^2}{E}$

Set P

S.Y. (B.Tech.) (Mechanical Engineering) (Semester - I) (New) (NEP CBCS) Examination: March/April-2026
Advanced Mathematics and Statistics (OE-01A)

Day & Date: Monday, 11-05-2026 Max. Marks: 56
Time: 03:00 PM To 06:00 PM

Instructions: 1) All question are compulsory.
2) Figures to the right indicate full marks.

SECTION – I

Q.2 Attempt Any Three. **09**

a) Find the Arithmetic mean, Median and standard deviation for the following frequency distribution.

x:	5	9	12	15	20	24	30	35	42	49
f:	3	6	8	8	9	10	8	7	6	2

b) Solve: $(D^2+1)y = x^2\cos 3x$

c) Solve: $(D^2-4D+4)y = 8.x^2e^{2x}\sin 2x$

d) Calculate the first four moments about the mean of the given distribution. Also find β_1, β_2

x	2.0	2.5	3.0	3.5	4.0	4.5	5.0
f	4	36	60	90	70	40	10

e) Solve $yzp + 2xq = xy$

Q.3 Attempt Any Three. **09**

a) Solve $\frac{d^2y}{dx^2} + 3\frac{dy}{dx} + 2y = 2e^{2x}$

b) Solve $p - q = x^2 + y^2$

c) Find the median of the following frequency distribution.

x	1	3	5	7	9	11	13	15	17
f	3	6	8	12	16	16	15	10	5

d) Solve $x(y-z)p + y(z-x)q = z(x-y)$

e) Solve $(D^3 - 3D + 2)y = x$

Q.4 Attempt Any Two. **10**

a) The first four moments of a distribution about the value 5 are $2, 20, 40$ and 50, from the given information obtain the first four central moments, Standard deviation and coefficient of skewness and kurtosis.

b) Solve the following differential equations by method of separation of variables.

$$3\frac{\partial u}{\partial x} + 2\frac{\partial u}{\partial y} = 0, \text{ given } u(x, 0) = 4e^{-x}$$

c) Solve $\frac{d^2y}{dx^2} + 3\frac{dy}{dx} + 2y = e^{e^x}$

SECTION – II

Q.5 Attempt Any Three. **09**

a) Find the value of k if each of the following functions is a probability density function.

$$f(x) = \begin{cases} kx^2(1 - x^3) & , \quad 0 \leq x \leq 1 \\ 0 & , \quad \text{otherwise} \end{cases}$$

b) The mean life time of 100 fluorescent light bulbs produced by a Company is computed to be 1570 Hrs. with S.D. of 120 Hrs. If μ is the mean lifetime of all the bulbs produced by the Company, Test the Hypothesis $\mu = 1600$ Hrs. against the alternative Hypothesis $\mu \neq 1600$ Hrs. using 5% level of Significance.
(Given Expected value at 5% LOS is 1.96)

c) Fit a Straight line $y = a + bx$ to the following data.

x	0	5	10	15	20	25
y	12	15	17	22	24	30

d) Two independent random sample have the following data.
$\overline{x_1} = 110, \sigma_1 = 25, n_1 = 16$
$\overline{x_2} = 120, \sigma_2 = 30, n_2 = 9$
If σ_1 and σ_2 are the S. D. of the populations. Test the hypothesis that $\mu_1 = \mu_2$ at 5% level of significance.
(The table value of t at $\alpha = 0.05$ for $v = 23$ degrees of freedom is 2.069)

e) If the probability of defective bulbs is 0.2, find the mean and variance of the distribution of defective bulbs in a lot of 1000 bulbs.

Q.6 Attempt Any Three. **09**

a) If two independent random samples of sizes 15 and 8 have respectively the following mean and population standard deviations, $\overline{x_1} = 980, \overline{x_2} = 1012; \sigma_1 = 75, \sigma_2 = 80$. Test the hypothesis that $\mu_1 = \mu_2$ at 5% level of significance.
(Given Expected value at 5% LOS with 21 DF is 2.080)

b) The number of telephone calls received by an operator in a ten-minute interval follows a Poisson distribution with mean 1. What is the probability of receiving (i) no call, (ii) less than four calls, in the interval? What is the most likely number of calls?

c) Calculate the Coefficient of correlations between x and y from the following data
$n = 25, \sum x = 100, \sum x^2 = 950, \sum y = 110, \sum y^2 = 850, \sum x\,y = 800$

d) Monthly salaries of 1000 workers have a normal distribution with mean of Rs. 575 and a standard deviation of Rs. 75. Find the number of workers having salaries between Rs. 500 and Rs. 625 p.m. Also find the minimum salary of the highest paid 200 workers.
(Given: For a standard normal variate
i) area between $t = 0$ and $t = 1$ is 0.3413,
ii) area between $t = 0$ and $t = 0.67$ is 0.2486,
iii) area between $t = 0$ and $t = 0.84$ is 0.3)

e) Obtain a second-degree curve to the following data and estimate the production in 1975.

Year	1921	1931	1941	1951	1961	1971	1981
Prod. (m. tons)	3	5	9	10	12	14	15

Q.7 Attempt Any Two. **10**

a) Fit a Binomial distribution to the following data,

Value of x	0	1	2	3	4	5	6
Frequency f	6	20	28	12	8	6	0

b) Calculate the lines of regression from the following table, gives the marks obtained by a class of students in two special papers.

Paper I	80	45	55	56	58	60	65	68	70	75	85
Paper II	82	56	50	48	60	62	64	65	70	74	90

c) Ten school boys were given a test in Statistics and their scores were recorded. They were given a month's special coaching and a second test was given to them in the same subject at the end of the coaching period. Test if the marks given below give evidence to the fact that the students are benefitted by coaching.

Marks in test I:	70	68	56	75	80	90	68	75	56	58
Marks in Test II:	68	70	52	73	75	78	80	92	54	55

(Given that value of t_α at 5% LOS for $\nu = 9$ degrees of freedom is 1.86 for one tailed test)

Seat No.	

Set **Q**

S.Y. (B.Tech.) (Mechanical Engineering) (Semester - I) (New) (NEP CBCS) Examination: March/April-2026
Advanced Mathematics and Statistics (OE-01A)

MCQ/Objective Type Questions

Duration: 30 Minutes Marks: 14

Q.1 Choose the correct alternative from the given option. **14**

1) If value of x for normal distribution is 35, mean of normal distribution is 65 and standard deviation is 25 then standardized random variable is _____.

a) -1.5 b) -1.7
c) -1.2 d) -4

2) A continuous random variable has the following probability density function $f(x) = kx(1-x), 0 \leq x \leq 1$ then $k =$ _____.

a) 2 b) 6
c) 3 d) 5

3) The area under the standard normal curve from $z = -\infty$ to $z = 0$ is _____.

a) 1 b) $1/2$
c) $3/2$ d) 0

4) If X, Y denote the deviation from their means and if $\sum X^2 = 80, \sum Y^2 = 50$ & $\sum XY = 60$ and $r =$_____.

a) 0.65 b) 0.78
c) 0.81 d) 0.95

5) If two regression lines are co-incides then the coefficient of correlation is _____.

a) 0 b) -1
c) ± 1 d) 1

6) If $\bar{x}$ is the mean of the random sample of size n taken from a population of size N having mean μ and standard deviation σ then mean and variance of the distribution $\bar{x}$ are _____.

a) $\bar{x}, \sigma^2$ b) $\bar{x}, \frac{\sigma^2}{n}$

c) μ, σ^2 d) μ, and $\frac{\sigma^2}{n}$

7) χ^2 distribution is defined by _____.

a) $\sum \frac{(O-E)}{E}$ b) $\sum \frac{(O-E)}{E^2}$

c) $\sum \left(\frac{O-E}{E}\right)^2$ d) $\sum \frac{(O-E)^2}{E}$

8) If a linear differential equation with constant coefficients and r.h.s. equal to zero has a real root m_1 repeated two times, then the corresponding part of the integral is _____.

a) $(c_1 + c_2)e^{m_1 x}$ b) $(c_1 x + c_2 x)e^{m_1 x}$

c) $(c_1 x + c_2 x^2)e^{m_1 x}$ d) $(c_1 + c_2 x)e^{m_1 x}$

9) $\frac{1}{D-a} X$ is equal to _____.

a) $\int X e^{ax} dx$ b) $e^{ax} \int X . e^{-ax} dx$

c) $\int X e^{-ax} dx$ d) $e^{-ax} \int X e^{-ax} dx$

10) $\frac{1}{D+1}(\log x + \frac{1}{x})$ is equal to _____.

a) e^x b) 1

c) x d) $\log x$

11) The solution of the equation $\sqrt{p} + \sqrt{q} = 1$ is _____.

a) $z = ax + ay + c$ b) $z = ax + a^2 y + c$

c) $z = ax + \left(1 - \sqrt{a}\right)^2 y + c$ d) None of these

12) The solution of $p + q = 1$ is _____.

a) $z = ax + (1-a)y + c$ b) $z = ax + by + c$

c) $z = ax + b(1-y) + c$ d) $z = a(1-x) + b(1-y) + c$

13) If μ_1', μ_2', μ_3' are the first three moments of the distribution about certain number then third moment μ_3 of the distribution about the arithmetic mean is given by _____.

a) $\mu_3' - 3\mu_2'\mu_1' + 2(\mu_1')^3$ b) $\mu_3' - 3\mu_1' + (\mu_2')^3$

c) $\mu_3' + 2\mu_2'\mu_1' + (\mu_3')^3$ d) $\mu_3' + 3\mu_2'\mu_1' + {\mu_1'}^2$

14) Coefficient of kurtosis β_1 is given by _____.

a) $\frac{\mu_4}{\mu_3}$

b) $\frac{\mu_4}{\mu_2^2}$

c) $\frac{\mu_3^2}{\mu_2^3}$

d) $\frac{\mu_4}{\mu_2^3}$

Seat No.

SECTION – I

Q.2 Attempt Any Three. **09**

a) Find the Arithmetic mean, Median and standard deviation for the following frequency distribution.

x:	5	9	12	15	20	24	30	35	42	49
f:	3	6	8	8	9	10	8	7	6	2

b) Solve: $(D^2+1)y = x^2\cos 3x$

c) Solve: $(D^2-4D+4)y = 8.x^2e^{2x}\sin 2x$

d) Calculate the first four moments about the mean of the given distribution. Also find β_1, β_2

x	2.0	2.5	3.0	3.5	4.0	4.5	5.0
f	4	36	60	90	70	40	10

e) Solve $yzp + 2xq = xy$

Q.3 Attempt Any Three. **09**

a) Solve $\frac{d^2y}{dx^2} + 3\frac{dy}{dx} + 2y = 2e^{2x}$

b) Solve $p - q = x^2 + y^2$

c) Find the median of the following frequency distribution.

x	1	3	5	7	9	11	13	15	17
f	3	6	8	12	16	16	15	10	5

d) Solve $x(y-z)p + y(z-x)q = z(x-y)$

e) Solve $(D^3 - 3D + 2)y = x$

Q.4 Attempt Any Two. **10**

a) The first four moments of a distribution about the value 5 are $2, 20, 40$ and 50, from the given information obtain the first four central moments, Standard deviation and coefficient of skewness and kurtosis.

b) Solve the following differential equations by method of separation of variables.

$$3\frac{\partial u}{\partial x} + 2\frac{\partial u}{\partial y} = 0, \text{ given } u(x, 0) = 4e^{-x}$$

c) Solve $\frac{d^2y}{dx^2} + 3\frac{dy}{dx} + 2y = e^{e^x}$

SECTION – II

Q.5 Attempt Any Three. **09**

a) Find the value of k if each of the following functions is a probability density function.

$$f(x) = \begin{cases} kx^2(1 - x^3) & , \quad 0 \leq x \leq 1 \\ 0 & , \quad \text{otherwise} \end{cases}$$

b) The mean life time of 100 fluorescent light bulbs produced by a Company is computed to be 1570 Hrs. with S.D. of 120 Hrs. If μ is the mean lifetime of all the bulbs produced by the Company, Test the Hypothesis $\mu = 1600$ Hrs. against the alternative Hypothesis $\mu \neq 1600$ Hrs. using 5% level of Significance.
(Given Expected value at 5% LOS is 1.96)

c) Fit a Straight line $y = a + bx$ to the following data.

x	0	5	10	15	20	25
y	12	15	17	22	24	30

d) Two independent random sample have the following data.
$\overline{x_1} = 110, \sigma_1 = 25, n_1 = 16$
$\overline{x_2} = 120, \sigma_2 = 30, n_2 = 9$
If σ_1 and σ_2 are the S. D. of the populations. Test the hypothesis that $\mu_1 = \mu_2$ at 5% level of significance.
(The table value of t at $\alpha = 0.05$ for $v = 23$ degrees of freedom is 2.069)

e) If the probability of defective bulbs is 0.2, find the mean and variance of the distribution of defective bulbs in a lot of 1000 bulbs.

Q.6 Attempt Any Three. **09**

a) If two independent random samples of sizes 15 and 8 have respectively the following mean and population standard deviations, $\overline{x_1} = 980, \overline{x_2} = 1012; \sigma_1 = 75, \sigma_2 = 80$. Test the hypothesis that $\mu_1 = \mu_2$ at 5% level of significance.
(Given Expected value at 5% LOS with 21 DF is 2.080)

b) The number of telephone calls received by an operator in a ten-minute interval follows a Poisson distribution with mean 1. What is the probability of receiving (i) no call, (ii) less than four calls, in the interval? What is the most likely number of calls?

c) Calculate the Coefficient of correlations between x and y from the following data
$n = 25, \sum x = 100, \sum x^2 = 950, \sum y = 110, \sum y^2 = 850, \sum x\,y = 800$

d) Monthly salaries of 1000 workers have a normal distribution with mean of Rs. 575 and a standard deviation of Rs. 75. Find the number of workers having salaries between Rs. 500 and Rs. 625 p.m. Also find the minimum salary of the highest paid 200 workers.
(Given: For a standard normal variate
i) area between $t = 0$ and $t = 1$ is 0.3413,
ii) area between $t = 0$ and $t = 0.67$ is 0.2486,
iii) area between $t = 0$ and $t = 0.84$ is 0.3)

e) Obtain a second-degree curve to the following data and estimate the production in 1975.

Year	1921	1931	1941	1951	1961	1971	1981
Prod. (m. tons)	3	5	9	10	12	14	15

Q.7 Attempt Any Two. **10**

a) Fit a Binomial distribution to the following data,

Value of x	0	1	2	3	4	5	6
Frequency f	6	20	28	12	8	6	0

b) Calculate the lines of regression from the following table, gives the marks obtained by a class of students in two special papers.

Paper I	80	45	55	56	58	60	65	68	70	75	85
Paper II	82	56	50	48	60	62	64	65	70	74	90

c) Ten school boys were given a test in Statistics and their scores were recorded. They were given a month's special coaching and a second test was given to them in the same subject at the end of the coaching period. Test if the marks given below give evidence to the fact that the students are benefitted by coaching.

Marks in test I:	70	68	56	75	80	90	68	75	56	58
Marks in Test II:	68	70	52	73	75	78	80	92	54	55

(Given that value of t_α at 5% LOS for $v = 9$ degrees of freedom is 1.86 for one tailed test)

Day & Date: Monday, 11-05-2026 Max. Marks: 70
Time: 03:00 PM To 06:00 PM

Instructions: 1) Q. No. 1 is compulsory. It should be solved in the first 30 minutes in Answer Book Page no 03 (Starting page of the Answer Book). Each question carries one mark.
2) Don't forget to Mention question paper set (P/Q/R/S) on top of page.
3) Figures to the right indicates full marks.

MCQ/Objective Type Questions

Duration: 30 Minutes Marks: 14

Q.1 Choose the correct alternative from the given option. **14**

1) If X, Y denote the deviation from their means and if $\sum X^2 = 80, \sum Y^2 = 50$ & $\sum XY = 60$ and $r =$_____.

a) 0.65 b) 0.78
c) 0.81 d) 0.95

2) If two regression lines are co-incides then the coefficient of correlation is _____.

a) 0 b) -1
c) ± 1 d) 1

3) If $\bar{x}$ is the mean of the random sample of size n taken from a population of size N having mean μ and standard deviation σ then mean and variance of the distribution $\bar{x}$ are _____.

a) $\bar{x}, \sigma^2$ b) $\bar{x}, \frac{\sigma^2}{n}$

c) μ, σ^2 d) μ, and $\frac{\sigma^2}{n}$

4) χ^2 distribution is defined by _____.

a) $\sum \frac{(O-E)}{E}$ b) $\sum \frac{(O-E)}{E^2}$
c) $\sum \left(\frac{O-E}{E}\right)^2$ d) $\sum \frac{(O-E)^2}{E}$

5) If a linear differential equation with constant coefficients and r.h.s. equal to zero has a real root m_1 repeated two times, then the corresponding part of the integral is _____.

a) $(c_1 + c_2)e^{m_1 x}$ b) $(c_1 x + c_2 x)e^{m_1 x}$

c) $(c_1 x + c_2 x^2)e^{m_1 x}$ d) $(c_1 + c_2 x)e^{m_1 x}$

6) $\frac{1}{D-a} X$ is equal to _____.

a) $\int X e^{ax} dx$ b) $e^{ax} \int X . e^{-ax} dx$

c) $\int X e^{-ax} dx$ d) $e^{-ax} \int X e^{-ax} dx$

7) $\frac{1}{D+1}(\log x + \frac{1}{x})$ is equal to _____.

a) e^x b) 1

c) x d) $\log x$

8) The solution of the equation $\sqrt{p} + \sqrt{q} = 1$ is _____.

a) $z = ax + ay + c$ b) $z = ax + a^2 y + c$

c) $z = ax + \left(1 - \sqrt{a}\right)^2 y + c$ d) None of these

9) The solution of $p + q = 1$ is _____.

a) $z = ax + (1 - a)y + c$ b) $z = ax + by + c$

c) $z = ax + b(1 - y) + c$ d) $z = a(1 - x) + b(1 - y) + c$

10) If μ_1', μ_2', μ_3' are the first three moments of the distribution about certain number then third moment μ_3 of the distribution about the arithmetic mean is given by _____.

a) $\mu_3' - 3\mu_2'\mu_1' + 2(\mu_1')^3$ b) $\mu_3' - 3\mu_1' + (\mu_2')^3$

c) $\mu_3' + 2\mu_2'\mu_1' + (\mu_3')^3$ d) $\mu_3' + 3\mu_2'\mu_1' + {\mu_1'}^2$

11) Coefficient of kurtosis β_1 is given by _____.

a) $\frac{\mu_4}{\mu_3}$ b) $\frac{\mu_4}{\mu_2^2}$

c) $\frac{\mu_3^2}{\mu_2^3}$ d) $\frac{\mu_4}{\mu_2^3}$

12) If value of x for normal distribution is 35, mean of normal distribution is 65 and standard deviation is 25 then standardized random variable is _____.

a) -1.5 b) -1.7

c) -1.2 d) -4

13) A continuous random variable has the following probability density function $f(x) = kx(1-x), 0 \leq x \leq 1$ then $k =$ _____.

a) 2 b) 6

c) 3 d) 5

14) The area under the standard normal curve from $z = -\infty$ to $z = 0$ is _____.

a) 1 b) $1/2$

c) $3/2$ d) 0

Seat No.	

Set | **R**

S.Y. (B.Tech.) (Mechanical Engineering) (Semester - I) (New) (NEP CBCS) Examination: March/April-2026
Advanced Mathematics and Statistics (OE-01A)

Day & Date: Monday, 11-05-2026 Max. Marks: 56
Time: 03:00 PM To 06:00 PM

Instructions: 1) All question are compulsory.
2) Figures to the right indicate full marks.

SECTION – I

Q.2 Attempt Any Three. **09**

a) Find the Arithmetic mean, Median and standard deviation for the following frequency distribution.

x:	5	9	12	15	20	24	30	35	42	49
f:	3	6	8	8	9	10	8	7	6	2

b) Solve: $(D^2 + 1)y = x^2 \cos 3x$

c) Solve: $(D^2 - 4D + 4)y = 8.x^2 e^{2x} \sin 2x$

d) Calculate the first four moments about the mean of the given distribution. Also find β_1, β_2

x	2.0	2.5	3.0	3.5	4.0	4.5	5.0
f	4	36	60	90	70	40	10

e) Solve $yzp + 2xq = xy$

Q.3 Attempt Any Three. **09**

a) Solve $\frac{d^2y}{dx^2} + 3\frac{dy}{dx} + 2y = 2e^{2x}$

b) Solve $p - q = x^2 + y^2$

c) Find the median of the following frequency distribution.

x	1	3	5	7	9	11	13	15	17
f	3	6	8	12	16	16	15	10	5

d) Solve $x(y - z)p + y(z - x)q = z(x - y)$

e) Solve $(D^3 - 3D + 2)y = x$

Q.4 Attempt Any Two. **10**

a) The first four moments of a distribution about the value 5 are $2, 20, 40$ and 50, from the given information obtain the first four central moments, Standard deviation and coefficient of skewness and kurtosis.

b) Solve the following differential equations by method of separation of variables.

$$3\frac{\partial u}{\partial x} + 2\frac{\partial u}{\partial y} = 0, \text{ given } u(x, 0) = 4e^{-x}$$

c) Solve $\frac{d^2y}{dx^2} + 3\frac{dy}{dx} + 2y = e^{e^x}$

SECTION – II

Q.5 Attempt Any Three. **09**

a) Find the value of k if each of the following functions is a probability density function.

$$f(x) = \begin{cases} kx^2(1 - x^3) & , \quad 0 \leq x \leq 1 \\ 0 & , \quad \text{otherwise} \end{cases}$$

b) The mean life time of 100 fluorescent light bulbs produced by a Company is computed to be 1570 Hrs. with S.D. of 120 Hrs. If μ is the mean lifetime of all the bulbs produced by the Company, Test the Hypothesis $\mu = 1600$ Hrs. against the alternative Hypothesis $\mu \neq 1600$ Hrs. using 5% level of Significance.
(Given Expected value at 5% LOS is 1.96)

c) Fit a Straight line $y = a + bx$ to the following data.

x	0	5	10	15	20	25
y	12	15	17	22	24	30

d) Two independent random sample have the following data.
$\overline{x_1} = 110, \sigma_1 = 25, n_1 = 16$
$\overline{x_2} = 120, \sigma_2 = 30, n_2 = 9$
If σ_1 and σ_2 are the S. D. of the populations. Test the hypothesis that $\mu_1 = \mu_2$ at 5% level of significance.
(The table value of t at $\alpha = 0.05$ for $v = 23$ degrees of freedom is 2.069)

e) If the probability of defective bulbs is 0.2, find the mean and variance of the distribution of defective bulbs in a lot of 1000 bulbs.

Q.6 Attempt Any Three. **09**

a) If two independent random samples of sizes 15 and 8 have respectively the following mean and population standard deviations, $\overline{x_1} = 980, \overline{x_2} = 1012; \sigma_1 = 75, \sigma_2 = 80$. Test the hypothesis that $\mu_1 = \mu_2$ at 5% level of significance.
(Given Expected value at 5% LOS with 21 DF is 2.080)

b) The number of telephone calls received by an operator in a ten-minute interval follows a Poisson distribution with mean 1. What is the probability of receiving (i) no call, (ii) less than four calls, in the interval? What is the most likely number of calls?

c) Calculate the Coefficient of correlations between x and y from the following data
$n = 25, \sum x = 100, \sum x^2 = 950, \sum y = 110, \sum y^2 = 850, \sum x\,y = 800$

d) Monthly salaries of 1000 workers have a normal distribution with mean of Rs. 575 and a standard deviation of Rs. 75. Find the number of workers having salaries between Rs. 500 and Rs. 625 p.m. Also find the minimum salary of the highest paid 200 workers.
(Given: For a standard normal variate
i) area between $t = 0$ and $t = 1$ is 0.3413,
ii) area between $t = 0$ and $t = 0.67$ is 0.2486,
iii) area between $t = 0$ and $t = 0.84$ is 0.3)

e) Obtain a second-degree curve to the following data and estimate the production in 1975.

Year	1921	1931	1941	1951	1961	1971	1981
Prod. (m. tons)	3	5	9	10	12	14	15

Q.7 Attempt Any Two. **10**

a) Fit a Binomial distribution to the following data,

Value of x	0	1	2	3	4	5	6
Frequency f	6	20	28	12	8	6	0

b) Calculate the lines of regression from the following table, gives the marks obtained by a class of students in two special papers.

Paper I	80	45	55	56	58	60	65	68	70	75	85
Paper II	82	56	50	48	60	62	64	65	70	74	90

c) Ten school boys were given a test in Statistics and their scores were recorded. They were given a month's special coaching and a second test was given to them in the same subject at the end of the coaching period. Test if the marks given below give evidence to the fact that the students are benefitted by coaching.

Marks in test I:	70	68	56	75	80	90	68	75	56	58
Marks in Test II:	68	70	52	73	75	78	80	92	54	55

(Given that value of t_α at 5% LOS for $\nu = 9$ degrees of freedom is 1.86 for one tailed test)

3) Figures to the right indicates full marks.

MCQ/Objective Type Questions

Duration: 30 Minutes Marks: 14

Q.1 Choose the correct alternative from the given option. **14**

1) If μ_1', μ_2', μ_3' are the first three moments of the distribution about certain number then third moment μ_3 of the distribution about the arithmetic mean is given by _____.

a) $\mu_3' - 3\mu_2'\mu_1' + 2(\mu_1')^3$ b) $\mu_3' - 3\mu_1' + (\mu_2')^3$

c) $\mu_3' + 2\mu_2'\mu_1' + (\mu_3')^3$ d) $\mu_3' + 3\mu_2'\mu_1' + {\mu_1'}^2$

2) Coefficient of kurtosis β_1 is given by _____.

a) $\frac{\mu_4}{\mu_3}$ b) $\frac{\mu_4}{\mu_2^2}$

c) $\frac{\mu_3^2}{\mu_2^3}$ d) $\frac{\mu_4}{\mu_2^3}$

3) If value of x for normal distribution is 35, mean of normal distribution is 65 and standard deviation is 25 then standardized random variable is _____.

a) -1.5 b) -1.7

c) -1.2 d) -4

4) A continuous random variable has the following probability density function $f(x) = kx(1-x), 0 \leq x \leq 1$ then $k =$ _____.

a) 2 b) 6

c) 3 d) 5

5) The area under the standard normal curve from $z = -\infty$ to $z = 0$ is _____.

a) 1 b) $1/2$

c) $3/2$ d) 0

6) If X, Y denote the deviation from their means and if $\sum X^2 = 80, \sum Y^2 = 50$ & $\sum XY = 60$ and $r =$_____.

a) 0.65 b) 0.78

c) 0.81 d) 0.95

7) If two regression lines are co-incides then the coefficient of correlation is _____.

a) 0 b) -1

c) ± 1 d) 1

8) If $\bar{x}$ is the mean of the random sample of size n taken from a population of size N having mean μ and standard deviation σ then mean and variance of the distribution $\bar{x}$ are _____.

a) $\bar{x}, \sigma^2$ b) $\bar{x}, \frac{\sigma^2}{n}$

c) μ, σ^2 d) μ, and $\frac{\sigma^2}{n}$

9) χ^2 distribution is defined by _____.

a) $\sum \frac{(O-E)}{E}$ b) $\sum \frac{(O-E)}{E^2}$

c) $\sum \left(\frac{O-E}{E}\right)^2$ d) $\sum \frac{(O-E)^2}{E}$

10) If a linear differential equation with constant coefficients and r.h.s. equal to zero has a real root m_1 repeated two times, then the corresponding part of the integral is _____.

a) $(c_1 + c_2)e^{m_1 x}$ b) $(c_1 x + c_2 x)e^{m_1 x}$

c) $(c_1 x + c_2 x^2)e^{m_1 x}$ d) $(c_1 + c_2 x)e^{m_1 x}$

11) $\frac{1}{D-a} X$ is equal to _____.

a) $\int X e^{ax} dx$ b) $e^{ax} \int X . e^{-ax} dx$

c) $\int X e^{-ax} dx$ d) $e^{-ax} \int X e^{-ax} dx$

12) $\frac{1}{D+1}(\log x + \frac{1}{x})$ is equal to _____.

a) e^x b) 1

c) x d) $\log x$

13) The solution of the equation $\sqrt{p} + \sqrt{q} = 1$ is _____.

a) $z = ax + ay + c$ b) $z = ax + a^2 y + c$

c) $z = ax + \left(1 - \sqrt{a}\right)^2 y + c$ d) None of these

14) The solution of $p + q = 1$ is _____.

a) $z = ax + (1 - a)y + c$ b) $z = ax + by + c$

c) $z = ax + b(1 - y) + c$ d) $z = a(1 - x) + b(1 - y) + c$

Q.2 Attempt Any Three. **09**

a) Find the Arithmetic mean, Median and standard deviation for the following frequency distribution.

x:	5	9	12	15	20	24	30	35	42	49
f:	3	6	8	8	9	10	8	7	6	2

b) Solve: $(D^2+1)y = x^2\cos 3x$

c) Solve: $(D^2-4D+4)y = 8.x^2e^{2x}\sin 2x$

d) Calculate the first four moments about the mean of the given distribution. Also find β_1, β_2

x	2.0	2.5	3.0	3.5	4.0	4.5	5.0
f	4	36	60	90	70	40	10

e) Solve $yzp + 2xq = xy$

Q.3 Attempt Any Three. **09**

a) Solve $\frac{d^2y}{dx^2} + 3\frac{dy}{dx} + 2y = 2e^{2x}$

b) Solve $p - q = x^2 + y^2$

c) Find the median of the following frequency distribution.

x	1	3	5	7	9	11	13	15	17
f	3	6	8	12	16	16	15	10	5

d) Solve $x(y-z)p + y(z-x)q = z(x-y)$

e) Solve $(D^3 - 3D + 2)y = x$

Q.4 Attempt Any Two. **10**

a) The first four moments of a distribution about the value 5 are $2, 20, 40$ and 50, from the given information obtain the first four central moments, Standard deviation and coefficient of skewness and kurtosis.

b) Solve the following differential equations by method of separation of variables.

$$3\frac{\partial u}{\partial x} + 2\frac{\partial u}{\partial y} = 0, \text{ given } u(x, 0) = 4e^{-x}$$

c) Solve $\frac{d^2y}{dx^2} + 3\frac{dy}{dx} + 2y = e^{e^x}$

SECTION – II

Q.5 Attempt Any Three. **09**

a) Find the value of k if each of the following functions is a probability density function.

$$f(x) = \begin{cases} kx^2(1 - x^3) & , \quad 0 \leq x \leq 1 \\ 0 & , \quad \text{otherwise} \end{cases}$$

b) The mean life time of 100 fluorescent light bulbs produced by a Company is computed to be 1570 Hrs. with S.D. of 120 Hrs. If μ is the mean lifetime of all the bulbs produced by the Company, Test the Hypothesis $\mu = 1600$ Hrs. against the alternative Hypothesis $\mu \neq 1600$ Hrs. using 5% level of Significance.
(Given Expected value at 5% LOS is 1.96)

c) Fit a Straight line $y = a + bx$ to the following data.

x	0	5	10	15	20	25
y	12	15	17	22	24	30

d) Two independent random sample have the following data.
$\overline{x_1} = 110, \sigma_1 = 25, n_1 = 16$
$\overline{x_2} = 120, \sigma_2 = 30, n_2 = 9$
If σ_1 and σ_2 are the S. D. of the populations. Test the hypothesis that $\mu_1 = \mu_2$ at 5% level of significance.
(The table value of t at $\alpha = 0.05$ for $v = 23$ degrees of freedom is 2.069)

e) If the probability of defective bulbs is 0.2, find the mean and variance of the distribution of defective bulbs in a lot of 1000 bulbs.

Q.6 Attempt Any Three. **09**

a) If two independent random samples of sizes 15 and 8 have respectively the following mean and population standard deviations, $\overline{x_1} = 980, \overline{x_2} = 1012; \sigma_1 = 75, \sigma_2 = 80$. Test the hypothesis that $\mu_1 = \mu_2$ at 5% level of significance.
(Given Expected value at 5% LOS with 21 DF is 2.080)

b) The number of telephone calls received by an operator in a ten-minute interval follows a Poisson distribution with mean 1. What is the probability of receiving (i) no call, (ii) less than four calls, in the interval? What is the most likely number of calls?

c) Calculate the Coefficient of correlations between x and y from the following data
$n = 25, \sum x = 100, \sum x^2 = 950, \sum y = 110, \sum y^2 = 850, \sum x\,y = 800$

d) Monthly salaries of 1000 workers have a normal distribution with mean of Rs. 575 and a standard deviation of Rs. 75. Find the number of workers having salaries between Rs. 500 and Rs. 625 p.m. Also find the minimum salary of the highest paid 200 workers.
(Given: For a standard normal variate
i) area between $t = 0$ and $t = 1$ is 0.3413,
ii) area between $t = 0$ and $t = 0.67$ is 0.2486,
iii) area between $t = 0$ and $t = 0.84$ is 0.3)

e) Obtain a second-degree curve to the following data and estimate the production in 1975.

Year	1921	1931	1941	1951	1961	1971	1981
Prod. (m. tons)	3	5	9	10	12	14	15

Q.7 Attempt Any Two. **10**

a) Fit a Binomial distribution to the following data,

Value of x	0	1	2	3	4	5	6
Frequency f	6	20	28	12	8	6	0

b) Calculate the lines of regression from the following table, gives the marks obtained by a class of students in two special papers.

Paper I	80	45	55	56	58	60	65	68	70	75	85
Paper II	82	56	50	48	60	62	64	65	70	74	90

c) Ten school boys were given a test in Statistics and their scores were recorded. They were given a month's special coaching and a second test was given to them in the same subject at the end of the coaching period. Test if the marks given below give evidence to the fact that the students are benefitted by coaching.

Marks in test I:	70	68	56	75	80	90	68	75	56	58
Marks in Test II:	68	70	52	73	75	78	80	92	54	55

(Given that value of t_α at 5% LOS for $\nu = 9$ degrees of freedom is 1.86 for one tailed test)

MCQ/Objective Type Questions

Duration: 30 Minutes Marks:14

Q.1 Choose correct answer: **14**

1) Which of the following is/are considered examples of the Consumer to Consumer (C2C) model?
a) Amazon.com b) e-bay
c) Rentalic.com d) All of the above

2) Which type of E - Commerce is Amazon?
a) B2B b) B2C
c) G2B d) G2C

3) Which of the following is the set of planned activities that are designed to result in a profit in the marketplace?
a) Profit model b) Business model
c) Business plan d) Revenue model

4) All of the following are major B2C business models except _____.
a) content provider b) industry consortium
c) transaction broker d) service provider

5) After completing an E-Commerce transaction, the buyer needs to _____.
a) Pick the product and go home
b) Take the product to home
c) Collect it directly from a store
d) Wait till the delivery of the product

6) SCM is a game of 4 C's = Collaboration; Co-operation; Co-ordination and _____.
a) Controlling b) Connectivity
c) Communication d) Customer

7) Which e-commerce transaction provides the benefits of eliminating the requirement of a middleman?
a) Business to Business
b) Business to Government
c) Consumer to Business
d) Business to Consumer

8) After completing an E-Commerce transaction, the seller and buyer should be provided an opportunity to _____ their transaction experience.
a) undo
b) regret
c) provide rating for
d) forget

9) Digital Cash has the following characteristics _____.
a) Anonymity
b) Security
c) Confidentiality
d) All of the Above

10) Benefit of E-Commerce platform is/are _____.
a) competitive pricing to benefit both seller and buyer
b) large number of products to choose from
c) ability to buy products not available in the local market
d) All of them

11) Which type of attack is a method of defeating a cryptographic scheme of trying a large number of possibilities?
a) Teardrop attack
b) Brute force attack
c) Phlashing
d) Smurf attack

12) Which is the model in E - E-Commerce, if the seller is an individual and the buyer is a business firm?
a) Consumer to Business
b) Business to Consumer
c) Business to Business
d) Consumer to Consumer

13) Which of the following authenticates and handles credit card payment for E-Commerce?
a) Payment gateway
b) E - E-Commerce gateway
c) Software gateway
d) E-Wallets

14) What is another name called PDoS?
a) Brute force attack
b) Non-technical attack
c) Phlashing
d) Smurf attack

Set Q

S.Y. (B.Tech.) (Mechanical Engineering) (Semester - I) (New) (NEP CBCS) Examination: March/April – 2026
Digital Marketing and E-Commerce (OE-01B)

Day & Date: Monday, 11-05-2026 Max. Marks: 70
Time: 03:00 PM To 06:00 PM

Instructions: 1) Q. No. 1 is compulsory. It should be solved in the first 30 minutes in Answer Book Page no 03 (Starting page of the Answer Book). Each question carries one mark
2) Don't forget to Mention question paper set (P/Q/R/S) on top on page.
3) Figures to the right indicates full marks.
4) Assume suitable data if necessary.

MCQ/Objective Type Questions

Duration: 30 Minutes Marks:14

Q.1 Choose correct answer: 14

1) After completing an E-Commerce transaction, the seller and buyer should be provided an opportunity to _____ their transaction experience.
a) undo b) regret
c) provide rating for d) forget

2) Digital Cash has the following characteristics _____.
a) Anonymity b) Security
c) Confidentiality d) All of the Above

3) Benefit of E-Commerce platform is/are _____.
a) competitive pricing to benefit both seller and buyer
b) large number of products to choose from
c) ability to buy products not available in the local market
d) All of them

4) Which type of attack is a method of defeating a cryptographic scheme of trying a large number of possibilities?
a) Teardrop attack b) Brute force attack
c) Phlashing d) Smurf attack

5) Which is the model in E - E-Commerce, if the seller is an individual and the buyer is a business firm?
a) Consumer to Business b) Business to Consumer
c) Business to Business d) Consumer to Consumer

6) Which of the following authenticates and handles credit card payment for E-Commerce?
a) Payment gateway b) E - E-Commerce gateway
c) Software gateway d) E-Wallets

7) What is another name called PDoS?
a) Brute force attack
b) Non-technical attack
c) Phlashing
d) Smurf attack

8) Which of the following is/are considered examples of the Consumer to Consumer (C2C) model?
a) Amazon.com
b) e-bay
c) Rentalic.com
d) All of the above

9) Which type of E - Commerce is Amazon?
a) B2B
b) B2C
c) G2B
d) G2C

10) Which of the following is the set of planned activities that are designed to result in a profit in the marketplace?
a) Profit model
b) Business model
c) Business plan
d) Revenue model

11) All of the following are major B2C business models except _____.
a) content provider
b) industry consortium
c) transaction broker
d) service provider

12) After completing an E-Commerce transaction, the buyer needs to _____.
a) Pick the product and go home
b) Take the product to home
c) Collect it directly from a store
d) Wait till the delivery of the product

13) SCM is a game of 4 C's = Collaboration; Co-operation; Co-ordination and _____.
a) Controlling
b) Connectivity
c) Communication
d) Customer

14) Which e-commerce transaction provides the benefits of eliminating the requirement of a middleman?
a) Business to Business
b) Business to Government
c) Consumer to Business
d) Business to Consumer

S.Y. (B.Tech.) (Mechanical Engineering) (Semester - I) (New) (NEP CBCS) Examination: March/April – 2026
Humanities and Social Sciences (OE-01C)

Day & Date: Monday, 11-05-2026 Max. Marks: 70
Time: 03:00 PM To 06:00 PM

Instructions: 1) Q. No. 1 is compulsory. It should be solved in the first 30 minutes in Answer Book Page no 03 (Starting page of the Answer Book). Each question carries one mark
2) Don't forget to Mention question paper set (P/Q/R/S) on top on page.
3) Figures to the right indicates full marks.

MCQ/Objective Type Questions

Duration: 30 Minutes Marks:14

Q.1 Choose the correct alternatives from the following. **14**

1) Culture includes _____.
a) Only art and literature
b) Traditions, beliefs, and values
c) Economic systems
d) Political institutions only

2) In which ancient civilization did the term "democracy" originate?
a) Ancient Egypt b) Ancient Greece
c) Ancient Rome d) Mesopotamia

3) Inflation means _____.
a) Increase in employment
b) Decrease in prices
c) Increase in general price level
d) Increase in production

4) Socialization refers to _____.
a) Economic growth b) Learning social norms
c) Political participation d) Cultural diffusion

5) The study of language structure and its evolution is called _____.
a) Sociology b) Linguistics
c) Psychology d) Anthropology

6) Feminism primarily addresses issues related to _____.
a) Economic inequality
b) Gender equality and women's rights
c) Political ideologies
d) Technological advancements

7) Dr. Sigmund Freud is best known for his contributions to _____.
a) Political science
b) Psychoanalysis
c) Economic theory
d) Structural linguistics

8) Which discipline studies the production, distribution, and consumption of goods and services?
a) Sociology
b) Political Science
c) Economics
d) History

9) Identify the primary focus of ethics in philosophy.
a) Logic and reasoning
b) Moral principles and conduct
c) Aesthetics and beauty
d) Scientific discovery

10) History is best defined as the study of _____.
a) Future events
b) Past human activities
c) Natural phenomena
d) Scientific experiments

11) The archaeology focuses on _____.
a) Economic theories
b) The study of celestial bodies
c) Material remains of past societies
d) Genetic research

12) Which of the following disciplines deals with political systems and governance?
a) Economics
b) Political Science
c) Sociology
d) Cultural Studies

13) Urbanization is best described as _____.
a) Decline of rural population
b) Growth of cities and towns
c) Spread of agriculture
d) Industrial decline

14) Sociology is the study of _____.
a) Individual mind
b) Social behaviour and society
c) Political institutions
d) Historical events

2) Figures to the right indicate full marks.

SECTION – I

Q.2 Attempt Any Three. **12**

a) Explain various aspects of perception.

b) Explain major philosophical movements and their impact.

c) Explain the interdisciplinary nature of disciplines under humanities and social sciences.

d) Explain how perceptual processes shape human behaviour.

e) Write a short note on: Scope of humanities.

Q.3 Attempt Any Two. **16**

a) Explore main theories of psychology.

b) Write in details the effects of psychology on social communication.

c) Explore the merits and demerits of democratic system of rule.

SECTION -II

Q.4 Attempt Any Three. **12**

a) How did industrial revolution contribute to technical advancements?

b) Write a short note on: Ethics in Engineering.

c) Write a short note on: Social Institutions.

d) Which are the different aspects of culture and society?

e) Explain how the ancient civilizations have contributed to the modern society.

Q.5 Attempt Any Two. **16**

a) Explain the concept of industrialization with its social and economic consequences.

b) Explore various economic theories and their thinkers.

c) Which are the technological innovations in 18^{th} & 19^{th} century? Explain.

MCQ/Objective Type Questions

Duration: 30 Minutes Marks:14

Q.1 MCQ/Objective Type Questions: 14

1) Which of the following best defines the primary purpose of management?
a) To create rules for employees to follow
b) To maintain financial records
c) To achieve organizational goals efficiently and effectively
d) To monitor employee behavior

2) Which function of management involves setting objectives and determining a course of action to achieve them?
a) Organizing b) Controlling
c) Planning d) Leading

3) Which of the following best represents the concept of social responsibility in management?
a) Maximizing shareholder wealth at any cost
b) Avoiding all legal penalties
c) Balancing profit-making with obligations to stakeholders and society
d) Focusing only on employee welfare

4) What is the most important reason for managers to follow ethical principles in decision-making?
a) To avoid law suits
b) To improve public image
c) To build trust and long-term sustainability
d) To increase profits quickly

5) Which is the first step in the planning process?
a) Developing alternatives b) Evaluating alternatives
c) Setting objectives d) Selecting the best alternative

6) What is the primary purpose of organizing in management?
a) To control employee behavior
b) To define roles, responsibilities, and allocate resources
c) To create strict rules for employees
d) To plan financial statements

7) What is the main purpose of employee training and development?
a) To penalize poor performance
b) To reduce the number of staff
c) To delay promotions
d) To enhance employee skills and support career growth

8) According to Maslow's Hierarchy of Needs, which of the following is the highest level of need?
a) Safety needs
b) Social needs
c) Esteem needs
d) Self-actualization

9) The "Carrot and Stick" approach to motivation is based on _____.
a) Building self-esteem through empowerment
b) Providing both rewards and punishments to influence behavior
c) Offering training and development opportunities
d) Recognizing only financial incentives

10) Which of the following best defines "quality" in the context of management?
a) Producing the highest quantity of products
b) Conforming to standards and satisfying customer needs
c) Meeting only internal business goals
d) Offering products at the lowest possible price

11) Which of the following is not typically considered an element of quality?
a) Performance
b) Reliability
c) Advertising
d) Durability

12) Pareto Analysis is based on the principle that _____.
a) All causes contribute equally to problems
b) 20% of the causes account for 80% of the problems
c) Quality problems are random and unpredictable
d) Only external factors affect product quality

13) The main goal of Six Sigma is to _____.
a) Increase the speed of production
b) Eliminate all human involvement in processes
c) Reduce process variation and defects to near zero
d) Ensure all products are handmade

14) What is the primary purpose of Statistical Process Control (SPC)?
a) To eliminate all manual processes
b) To ensure marketing strategies are effective
c) To monitor and control a process through statistical methods
d) To increase financial profitability only

MCQ/Objective Type Questions

Duration: 30 Minutes Marks: 14

Q.1 Choose the correct alternative from the given option. 14

1) The particular Integral of $(D^2 - 2D + 1)y = -4e^x$ is _____.

a) $-2x^2e^x$ b) $-4x^2e^x$
c) $(C_1 + C_2x)e^x$ d) x^2e^x

2) The general solution of $(D^2 - 4)^2y = 0$ is _____.

a) $y = C_1e^{2x} + C_2e^{-2x}$
b) $y = (C_1 + C_2x)e^{-2x} + (C_3 + C_4x)e^{2x}$
c) $y = C_1\cos 2x + C_2\sin 2x + (C_3 + C_4x)e^{2x}$
d) None of these

3) The value of $\frac{1}{D-a}X =$ _____.

a) $e^{-ax}\int e^{-ax}Xdx$ b) $e^{-ax}\int e^{ax}Xdx$
c) $e^{ax}\int e^{-ax}Xdx$ d) $e^{ax}\int e^{ax}Xdx$

4) $Lf(t)\delta(t-a) =$ _____.

a) $e^{-as}f(t)$ b) $e^{-as}f(a)$
c) $e^{as}f(a)$ d) $e^{-as}f(t-a)$

5) If $L\{f(t)\} = \frac{a}{s^2+a^2}$ then $L\left\{\int_0^1 f(t)dt\right\} =$ _____.

a) $\frac{1}{s(s^2+a^2)}$ b) $\frac{a}{s(s^2+a^2)}$

c) $\frac{as}{s^2+a^2}$ d) $\frac{as^2}{s^2+a^2}$

6) The inverse z-transform of $\frac{z}{z-3}, |z| > 3$ (with $k \geq 0$) is _____.

a) 3^{-k} b) 3^{k+1}

c) 3^k d) 3^{-k-1}

7) The rate of convergence of Newton-Raphson Method is _____.

a) 1 b) 2

c) $\sqrt{2}$ d) 3

8) A positive real root of the equation $xe^x - 2 = 0$ is lies between _____.

a) 2 and 3 b) 1 and 2

c) 3 and 4 d) 0 and 1

9) Since $z\{1\} = \frac{z}{z-1}, z\{a^k\}, k \geq 0 =$ _____.

a) $\frac{z}{z-a}$ b) $\frac{z}{a(z-1)}$

c) $\frac{a}{z-a}$ d) $\frac{z}{az-1}$

10) In the interval $(0,1)$ the constant term in the cosine series of $f(x) = x^2$ is _____.

a) 0 b) $\frac{1}{2}$

c) $\frac{1}{3}$ d) $\frac{\pi}{4}$

11) In the cosine series of $f(x) = \pi x - x^2$ for $0 < x < \pi$, the constant term is _____.

a) $\frac{\pi^2}{4}$ b) $\frac{\pi^2}{16}$

c) $\frac{\pi^2}{6}$ d) $\frac{\pi^2}{2}$

12) For the function $f(x) \begin{matrix} = & 0, & -\pi < x < 0 \\ = & x, & 0 < x < \pi \end{matrix}$

The value of Fourier constant a_0 is _____.

a) $\frac{\pi^2}{4}$ b) $\frac{\pi}{4}$

c) $\frac{\pi^2}{2}$ d) $\frac{-\pi}{4}$

13) The half range sine series of $f(x)$ defined in the interval $(0, 2)$ is _____.

a) $f(x) = \sum_{n=1}^{\infty} b_n \sin nx$ b) $f(x) = \sum_{n=1}^{\infty} b_n \sin(2n\pi x)$

c) $f(x) = \sum_{n=1}^{\infty} b_n \sin\left(\frac{n\pi x}{2}\right)$ d) $f(x) = \sum_{n=1}^{\infty} a_n \cos\left(\frac{n\pi x}{2}\right)$

14) If $F_s(\lambda) = e^{-\lambda}$ then the function $f(x) =$ _____.

a) $\frac{2}{\sqrt{1+x^2}}$ b) $\frac{\pi}{1+x^2}$

c) $\sqrt{\frac{2}{\pi}}\frac{1}{1+x^2}$ d) None

S.Y. (B.Tech.) (Mechanical Engineering) (Semester - I) (New) (NEP CBCS) Examination: March/April – 2026
Mathematics for Software and Hardware (OE-01E)

Day & Date: Monday, 11-05-2026 Max. Marks: 56
Time: 03:00 PM To 06:00 PM

Instructions: 1) All question are compulsory.
2) Figures to the right indicate full marks.
3) Make suitable assumptions if necessary and state them clearly.
4) Use of non-programmable calculator is allowed.

SECTION – I

Q.2 Attempt Any Three. **09**

a) Solve: $(D^2+1)y = x\sin 2x$

b) Solve: $(D^2+4D+4)y = e^{3x}$

c) Find $L\left\{\frac{1}{t}(1-\cos t)\right\}$

d) Find $z\{ka^k + k\beta^k\}, k \geq 0$

e) Find the Laplace transform of $\int_0^t te^{-3t}\sin(4t)dt$

Q.3 Attempt Any Three. **09**

a) Solve $(D^2-1)y = X\cos 2x$

b) Find $L\left[\int_0^t te^{-4t}\sin(3t)dt\right]$

c) Find the inverse Laplace transform of following by using the Convolution theorem of $\left[\frac{1}{s(s^2+9)}\right]$

d) Find $Z\left\{3^k\cos\left(\frac{k\pi}{2}+\frac{\pi}{4}\right)\right\}, k \geq 0$

e) Find the Laplace Transform of $\{1+2t-3t^2+4t^3\}U(t-2)\}$

Q.4 Attempt Any Two. **10**

a) Find $L\{t.\sqrt{1-\sin t}\}$

b) Solve $(D^3+1)y = 3+e^{-x}+5e^{2x}$

c) Find $Z^{-1}\left\{\frac{1}{(z-a)^2}\right\}, |z| > |a|., |z| < |a|$

SECTION – II

Q.5 Attempt Any Three. **09**

a) Evaluate $\int_0^6 \frac{e^x}{1+x}dx$ using Simpson's 1/3rd rule, (Take $h = 1$)

b) Find the half-range cosine series for $f(x) = e^{-x}$ in $(0, \pi)$

c) Evaluate $\sqrt{37}$ by Newton Raphson method correct to four decimal places by taking initial approximation as $x_0 = 6$

d) Find the Fourier Sine transforms of $2e^{-5x} + 5e^{-2x}$

e) Find the Fourier series of $f(x) \begin{matrix} = & \pi x, & 0 < x < 1 \\ = & 0, & 1 < x < 2 \end{matrix}$

Q.6 Attempt Any Three. **09**

a) Obtain half range sine series for $f(x) = x$ in $0 < x < 2$

b) Find the positive root of the following by using Newton Raphson method correct to four decimal places $3x - \cos x - 1 = 0$

c) Evaluate $\int_0^6 \frac{1}{1+x^2}dx\ n = 6$ using Trapezoidal rule.

d) Find the Fourier transform of $f(x)$ if $f(x) = \begin{cases} 1, & 0 \le x < 1 \\ 0, & x > 0 \end{cases}$

e) Find the Fourier series of $f(x) = x \sin x, \quad (0, 2\pi)$

Q.7 Attempt Any Two. **10**

a) Find the Fourier transform of

$f(x) \begin{matrix} = 1 & |x| & < & k \\ = 0 & |x| & > & k \end{matrix}$ and

hence evaluate

i) $\int_{-\infty}^{\infty} \frac{\sin sk \,.\, \cos sk}{s} ds$

ii) $\int_{-\infty}^{\infty} \frac{\sin ks}{s} ds$

b) Obtain the Fourier series of $f(x) = a^2 - x^2$ in $(-a, a)$

c) Find the Value of K_1 by Runge Kutta Method of fourth order if

$\frac{dy}{dx} = 2x + 3y^2$ and $y(0.1) = 1.1165$ and $h = 0.1$

S.Y. (B.Tech.) (Mechanical Engineering) (Semester - I) (New) (NEP CBCS) Examination: March/April – 2026
Mathematics for Software and Hardware (OE-01E)

Day & Date: Monday, 11-05-2026 Max. Marks: 70
Time: 03:00 PM To 06:00 PM

Instructions: 1) Q. No. 1 is compulsory. It should be solved in the first 30 minutes in Answer Book Page no 03 (Starting page of the Answer Book). Each question carries one mark.
2) Don't forget to Mention question paper set (P/Q/R/S) on top of page.
3) Figures to the right indicates full marks.
4) Make suitable assumptions if necessary and state them clearly.
5) Use of non-programmable calculator is allowed.

MCQ/Objective Type Questions

Duration: 30 Minutes Marks: 14

Q.1 Choose the correct alternative from the given option. 14

1) A positive real root of the equation $xe^x - 2 = 0$ is lies between _____.
a) 2 and 3 b) 1 and 2
c) 3 and 4 d) 0 and 1

2) Since $z\{1\} = \frac{z}{z-1}, z\{a^k\}, k \geq 0 =$ _____.
a) $\frac{z}{z-a}$ b) $\frac{z}{a(z-1)}$
c) $\frac{a}{z-a}$ d) $\frac{z}{az-1}$

3) In the interval $(0,1)$ the constant term in the cosine series of $f(x) = x^2$ is _____.
a) 0 b) $\frac{1}{2}$
c) $\frac{1}{3}$ d) $\frac{\pi}{4}$

4) In the cosine series of $f(x) = \pi x - x^2$ for $0 < x < \pi$, the constant term is _____.
a) $\frac{\pi^2}{4}$ b) $\frac{\pi^2}{16}$
c) $\frac{\pi^2}{6}$ d) $\frac{\pi^2}{2}$

5) For the function $f(x) \begin{matrix} = & 0, & -\pi < x < 0 \\ = & x, & 0 < x < \pi \end{matrix}$

The value of Fourier constant a_0 is _____.

a) $\frac{\pi^2}{4}$ b) $\frac{\pi}{4}$

c) $\frac{\pi^2}{2}$ d) $\frac{-\pi}{4}$

6) The half range sine series of $f(x)$ defined in the interval $(0, 2)$ is _____.

a) $f(x) = \sum_{n=1}^{\infty} b_n \sin nx$ b) $f(x) = \sum_{n=1}^{\infty} b_n \sin(2n\pi x)$

c) $f(x) = \sum_{n=1}^{\infty} b_n \sin\left(\frac{n\pi x}{2}\right)$ d) $f(x) = \sum_{n=1}^{\infty} a_n \cos\left(\frac{n\pi x}{2}\right)$

7) If $F_s(\lambda) = e^{-\lambda}$ then the function $f(x) =$ _____.

a) $\frac{2}{\sqrt{1+x^2}}$ b) $\frac{\pi}{1+x^2}$

c) $\sqrt{\frac{2}{\pi}}\frac{1}{1+x^2}$ d) None

8) The particular Integral of $(D^2 - 2D + 1)y = -4e^x$ is _____.

a) $-2x^2e^x$ b) $-4x^2e^x$

c) $(C_1 + C_2x)e^x$ d) x^2e^x

9) The general solution of $(D^2 - 4)^2 y = 0$ is _____.

a) $y = C_1e^{2x} + C_2e^{-2x}$

b) $y = (C_1 + C_2x)e^{-2x} + (C_3 + C_4x)e^{2x}$

c) $y = C_1 \cos 2x + C_2 \sin 2x + (C_3 + C_4x)e^{2x}$

d) None of these

10) The value of $\frac{1}{D-a}X =$ _____.

a) $e^{-ax}\int e^{-ax}Xdx$ b) $e^{-ax}\int e^{ax}Xdx$

c) $e^{ax}\int e^{-ax}Xdx$ d) $e^{ax}\int e^{ax}Xdx$

11) $Lf(t)\delta(t-a) =$ _____.

a) $e^{-as}f(t)$ b) $e^{-as}f(a)$

c) $e^{as}f(a)$ d) $e^{-as}f(t-a)$

12) If $L\{f(t)\} = \frac{a}{s^2+a^2}$ then $L\left\{\int_0^1 f(t)dt\right\} =$ _____.

a) $\frac{1}{s(s^2+a^2)}$ b) $\frac{a}{s(s^2+a^2)}$

c) $\frac{as}{s^2+a^2}$ d) $\frac{as^2}{s^2+a^2}$

13) The inverse z-transform of $\frac{z}{z-3}, |z| > 3$ (with $k \geq 0$) is _____.

a) 3^{-k} b) 3^{k+1}

c) 3^{k} d) 3^{-k-1}

14) The rate of convergence of Newton-Raphson Method is _____.

a) 1 b) 2

c) $\sqrt{2}$ d) 3

MCQ/Objective Type Questions

Duration: 30 Minutes Marks: 14

Q.1 Choose the correct alternative from the given option. 14

1) The inverse z-transform of $\frac{z}{z-3}, |z| > 3$ (with $k \geq 0$) is _____.

a) 3^{-k} b) 3^{k+1}
c) 3^{k} d) 3^{-k-1}

2) The rate of convergence of Newton-Raphson Method is _____.

a) 1 b) 2
c) $\sqrt{2}$ d) 3

3) A positive real root of the equation $xe^{x} - 2 = 0$ is lies between _____.

a) 2 and 3 b) 1 and 2
c) 3 and 4 d) 0 and 1

4) Since $z\{1\} = \frac{z}{z-1}, z\{a^{k}\}, k \geq 0 =$ _____.

a) $\frac{z}{z-a}$ b) $\frac{z}{a(z-1)}$
c) $\frac{a}{z-a}$ d) $\frac{z}{az-1}$

5) In the interval $(0,1)$ the constant term in the cosine series of $f(x) = x^{2}$ is _____.

a) 0 b) $\frac{1}{2}$
c) $\frac{1}{3}$ d) $\frac{\pi}{4}$

6) In the cosine series of $f(x) = \pi x - x^2$ for $0 < x < \pi$, the constant term is _____.

a) $\frac{\pi^2}{4}$ b) $\frac{\pi^2}{16}$

c) $\frac{\pi^2}{6}$ d) $\frac{\pi^2}{2}$

7) For the function $f(x) \begin{matrix} = \\ = \end{matrix} \begin{matrix} 0, & -\pi < x < 0 \\ x, & 0 < x < \pi \end{matrix}$

The value of Fourier constant a_0 is _____.

a) $\frac{\pi^2}{4}$ b) $\frac{\pi}{4}$

c) $\frac{\pi^2}{2}$ d) $\frac{-\pi}{4}$

8) The half range sine series of $f(x)$ defined in the interval $(0, 2)$ is _____.

a) $f(x) = \sum_{n=1}^{\infty} b_n \sin nx$ b) $f(x) = \sum_{n=1}^{\infty} b_n \sin(2n\pi x)$

c) $f(x) = \sum_{n=1}^{\infty} b_n \sin\left(\frac{n\pi x}{2}\right)$ d) $f(x) = \sum_{n=1}^{\infty} a_n \cos\left(\frac{n\pi x}{2}\right)$

9) If $F_s(\lambda) = e^{-\lambda}$ then the function $f(x) =$ _____.

a) $\frac{2}{\sqrt{1+x^2}}$ b) $\frac{\pi}{1+x^2}$

c) $\sqrt{\frac{2}{\pi}}\frac{1}{1+x^2}$ d) None

10) The particular Integral of $(D^2 - 2D + 1)y = -4e^x$ is _____.

a) $-2x^2e^x$ b) $-4x^2e^x$

c) $(C_1 + C_2x)e^x$ d) x^2e^x

11) The general solution of $(D^2 - 4)^2 y = 0$ is _____.

a) $y = C_1e^{2x} + C_2e^{-2x}$

b) $y = (C_1 + C_2x)e^{-2x} + (C_3 + C_4x)e^{2x}$

c) $y = C_1 \cos 2x + C_2 \sin 2x + (C_3 + C_4x)e^{2x}$

d) None of these

12) The value of $\frac{1}{D-a}X =$ _____.

a) $e^{-ax}\int e^{-ax}Xdx$ b) $e^{-ax}\int e^{ax}Xdx$

c) $e^{ax}\int e^{-ax}Xdx$ d) $e^{ax}\int e^{ax}Xdx$

13) $Lf(t)\delta(t-a) =$ _____.

a) $e^{-as}f(t)$ b) $e^{-as}f(a)$

c) $e^{as}f(a)$ d) $e^{-as}f(t-a)$

14) If $L\{f(t)\} = \frac{a}{s^2+a^2}$ then $L\left\{\int_0^1 f(t)dt\right\} =$ _____.

a) $\frac{1}{s(s^2+a^2)}$ b) $\frac{a}{s(s^2+a^2)}$

c) $\frac{as}{s^2+a^2}$ d) $\frac{as^2}{s^2+a^2}$

S.Y. (B.Tech.) (Mechanical Engineering) (Semester - I) (New) (NEP CBCS) Examination: March/April – 2026
Mathematics for Software and Hardware (OE-01E)

Day & Date: Monday, 11-05-2026 Max. Marks: 56
Time: 03:00 PM To 06:00 PM

Instructions: 1) All question are compulsory.
2) Figures to the right indicate full marks.
3) Make suitable assumptions if necessary and state them clearly.
4) Use of non-programmable calculator is allowed.

SECTION – I

Q.2 Attempt Any Three. **09**

a) Solve: $(D^2+1)y = x\sin 2x$

b) Solve: $(D^2+4D+4)y = e^{3x}$

c) Find $L\left\{\frac{1}{t}(1-\cos t)\right\}$

d) Find $z\{ka^k + k\beta^k\}, k \geq 0$

e) Find the Laplace transform of $\int_0^t te^{-3t}\sin(4t)dt$

Q.3 Attempt Any Three. **09**

a) Solve $(D^2-1)y = X\cos 2x$

b) Find $L\left[\int_0^t te^{-4t}\sin(3t)dt\right]$

c) Find the inverse Laplace transform of following by using the Convolution theorem of $\left[\frac{1}{s(s^2+9)}\right]$

d) Find $Z\left\{3^k\cos\left(\frac{k\pi}{2}+\frac{\pi}{4}\right)\right\}, k \geq 0$

e) Find the Laplace Transform of $\{1+2t-3t^2+4t^3\}U(t-2)\}$

Q.4 Attempt Any Two. **10**

a) Find $L\{t.\sqrt{1-\sin t}\}$

b) Solve $(D^3+1)y = 3+e^{-x}+5e^{2x}$

c) Find $Z^{-1}\left\{\frac{1}{(z-a)^2}\right\}, |z| > |a|., |z| < |a|$

SECTION – II

Q.5 Attempt Any Three. **09**

a) Evaluate $\int_0^6 \frac{e^x}{1+x}dx$ using Simpson's 1/3rd rule, (Take $h = 1$)

b) Find the half-range cosine series for $f(x) = e^{-x}$ in $(0, \pi)$

c) Evaluate $\sqrt{37}$ by Newton Raphson method correct to four decimal places by taking initial approximation as $x_0 = 6$

d) Find the Fourier Sine transforms of $2e^{-5x} + 5e^{-2x}$

e) Find the Fourier series of $f(x) \begin{matrix} = & \pi x, & 0 < x < 1 \\ = & 0, & 1 < x < 2 \end{matrix}$

Q.6 Attempt Any Three. **09**

a) Obtain half range sine series for $f(x) = x$ in $0 < x < 2$

b) Find the positive root of the following by using Newton Raphson method correct to four decimal places $3x - \cos x - 1 = 0$

c) Evaluate $\int_0^6 \frac{1}{1+x^2}dx\ n = 6$ using Trapezoidal rule.

d) Find the Fourier transform of $f(x)$ if $f(x) = \begin{cases} 1, & 0 \le x < 1 \\ 0, & x > 0 \end{cases}$

e) Find the Fourier series of $f(x) = x \sin x, \quad (0, 2\pi)$

Q.7 Attempt Any Two. **10**

a) Find the Fourier transform of

$f(x) \begin{matrix} = 1 & |x| & < & k \\ = 0 & |x| & > & k \end{matrix}$ and

hence evaluate

i) $\int_{-\infty}^{\infty} \frac{\sin sk \,.\, \cos sk}{s} ds$

ii) $\int_{-\infty}^{\infty} \frac{\sin ks}{s} ds$

b) Obtain the Fourier series of $f(x) = a^2 - x^2$ in $(-a, a)$

c) Find the Value of K_1 by Runge Kutta Method of fourth order if

$\frac{dy}{dx} = 2x + 3y^2$ and $y(0.1) = 1.1165$ and $h = 0.1$

Soft Skills and Personality Development (OE-01F)

Day & Date: Monday, 11-05-2026 Max. Marks: 70
Time: 03:00 PM To 06:00 PM

Instructions: 1) Q. No. 1 is compulsory. It should be solved in the first 30 minutes in Answer Book Page no 03 (Starting page of the Answer Book). Each question carries one mark
2) Don't forget to Mention question paper set (P/Q/R/S) on top on page.
3) Figures to the right indicates full marks.

MCQ/Objective Type Questions

Duration: 30 Minutes Marks:14

Q.1 Choose the correct alternatives from the following. **14**

1) In the process of communication, _____ is the person who encodes the message.
a) Receiver b) Driver
c) Cleaner d) Sender

2) Which among the following barriers is related to fault in the channel?
a) Physical b) Mechanical
c) Psychological d) All of above

3) The ability to recognize, understand and regulate your own emotions is called _____.
a) Empathy b) Self-awareness
c) Emotional intelligence d) Relationship management

4) Stress is defined as _____.
a) A physical or emotional reaction to challenges or demands
b) A type of disease
c) Only physical pain
d) A mental disorder

5) Time management means _____.
a) Doing work very quickly
b) Planning and organizing how to spend time effectively
c) Wasting time
d) Avoiding responsibilities

6) Effective non-verbal communication in presentations helps to _____.
a) Confuse the audience
b) Improve understanding and engagement
c) Reduce communication
d) Replace verbal communication

7) Which of the following helps in effective presentation?
a) Organizing ideas clearly b) Using complex language
c) Ignoring the audience d) All of the above

8) The main purpose of an interview is to _____.
a) Test physical strength
b) Assess a candidate's suitability
c) Conduct training
d) Provide entertainment

9) Which of the following is part of presentation etiquette?
a) Clear speaking b) Good posture
c) Proper visual aids d) All of the above

10) Good posture during a presentation indicates _____.
a) Confidence b) Nervousness
c) Disinterest d) Laziness

11) Which non-verbal factors help engage the audience?
a) Eye contact b) Facial expressions
c) Hand gestures d) All of the above

12) Prioritization in time management means _____.
a) Doing easy tasks first
b) Arranging tasks according to importance
c) Avoiding work
d) Doing everything at once

13) Procrastination means _____.
a) Completing work early b) Delaying tasks unnecessarily
c) Planning work d) Finishing tasks on time

14) Taking short breaks during work helps to _____.
a) Reduce efficiency b) Improve focus
c) Waste time d) Increase stress

MCQ/Objective Type Questions

Duration: 30 Minutes Marks:14

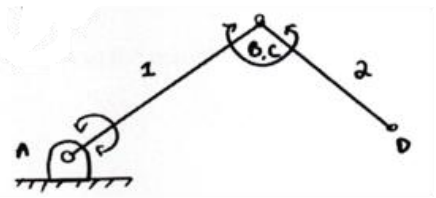
Q.1 Solve All MCQ Questions. **14**

1) The word Robot is derived from the Czech word "Robota" meaning _____.
a) Forced laborer b) Toy
c) Teacher d) Intelligent worker

2) In which scenario would a legged robot be more suitable than a wheeled robot?
a) Racing on a paved track
b) Navigating uneven terrain with obstacles
c) Transporting heavy payloads over long distances
d) Delivering packages in a warehouse with smooth floors

3) How many Degrees of freedom (DOF) does a prismatic and revolute joint have respectively?
a) 1,1 b) 2,1
c) 1,2 d) 2,2

4) How many degrees of freedom does the following figure have?



a) 5 b) 3
c) 6 d) 2

5) The surface of the workspace describes a _____.
   a) Work surface b) Work envelope
   c) Work load d) Workplace

6) Drives also known as _____.
   a) Controller b) Sensors
   c) Manipulator d) Actuators

7) The process of finding the position of the end effectors when the joint variables are know is called _____.
   a) Forward Kinematics b) Inverse Kinematics
   c) Forward Dynamics d) Inverse Dynamics

8) Which one of the following joints comes under rotary motion?
   a) Orthogonal Joint b) Linear Joint
   c) Both a) and b) d) Revolving Joint

9) Which one of the following robots commonly used for picks and place work?
   a) Cylindrical b) Cartesian
   c) Both a) and b) d) None of the above

10) What is the primary function of a LiDAR sensor in robotics?
   a) Object manipulation b) Navigation and mapping
   c) Tactile feedback d) Speech recognition

11) Radial movement (in & out) to the manipulator arm is provided by _____.
   a) Wrist bend b) Wrist swivel
   c) Wrist yaw d) Elbow extension

12) Which one of the following is safer?
   a) Cobot b) Robot
   c) Both a) and b) d) None of the above

13) The _____ of a manipulator is a measure of how close the manipulator can come to a given point within its workspace.
   a) Accuracy b) Repeatability
   c) Efficiency d) Resolution

14) Which type of robot is commonly used for tasks in hazardous environments?
   a) Industrial Robot b) Aerial Robot
   c) Search and Rescue Robot d) Humanoid Robot

Set **P**

S.Y. (B.Tech.) (Mechanical Engineering) (Semester - I) (New) (NEP CBCS) Examination: March/April – 2026
Industrial Robotics (MechHon-01A)

Day & Date: Wednesday, 13-05-2026 Max. Marks: 56
Time: 03:00 PM To 06:00 PM

Instructions: 1) Attempt two questions from each section.
2) Figures to the right indicate full marks.
3) Use of nonprogrammable calculator is allowed.
4) Assume suitable data if necessary.

SECTION – I

Q.2 Attempt the following. **14**

a) Write a note on the current market scenario of Robotics.

b) What is a Mobile Robots? Differentiate wheeled and track robots.

Q.3 Attempt the following. **14**

a) Explain working of A C Motor and Its control techniques.

b) Discus classification of Sensors and write a note on GPS.

Q.4 Attempt the following. **14**

a) Explain in detail classification of End effectors.

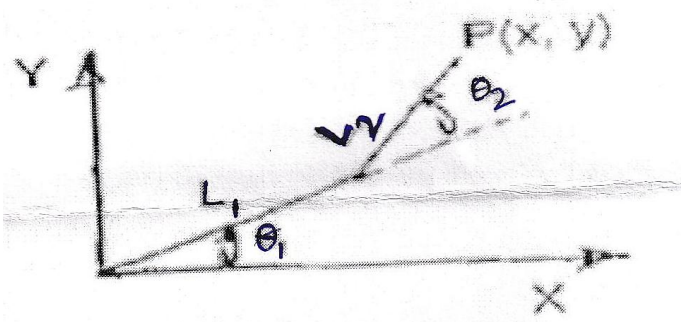
b) Write a note on Mechanical end effectors.

SECTION – II

Q.5 Attempt the following. **14**

a) Write short note on a velocity jacobian and Singularities.

b) What do you understand by forward for 2 dof's?
Explain in detail it is desired to determine the values of which the angels $\ominus 1$ & $\ominus 2$ must be set into order to achieve certain point the length of joint $L1 = 12$ in the length of $L2 = 10$ in. The coordinates $x = 15.7$ and $y = 12.6$ using the reverse transformation method determine the angles $\ominus 1$ & $\ominus 2$.



Q.6 Attempt the following. **14**

a) Explain Trajectory planning and enlist issue with Trajectory Planning.

b) Explain control architecture of robot with block diagram.

Q.7 Attempt the following. **14**

a) What are the general considerations for selecting robots for Machine tending application?

b) What are the general considerations for selecting robots for sealant application?

S.Y. (B.Tech.) (Mechanical Engineering) (Semester - I) (New) (NEP CBCS) Examination: March/April – 2026
Industrial Robotics (MechHon-01A)

Day & Date: Wednesday, 13-05-2026 Max. Marks: 70
Time: 03:00 PM To 06:00 PM

Instructions: 1) Q. No. 1 is compulsory. It should be solved in the first 30 minutes in Answer Book Page no 03 (Starting page of the Answer Book). Each question carries one mark.
2) Don't forget to Mention question paper set (P/Q/R/S) on top of page.
3) Figures to the right indicates full marks.
4) Use of nonprogrammable calculator is allowed.
5) Assume suitable data if necessary.

MCQ/Objective Type Questions

Duration: 30 Minutes Marks:14

Q.1 Solve All MCQ Questions. **14**

1) Which one of the following joints comes under rotary motion?
a) Orthogonal Joint b) Linear Joint
c) Both a) and b) d) Revolving Joint

2) Which one of the following robots commonly used for picks and place work?
a) Cylindrical b) Cartesian
c) Both a) and b) d) None of the above

3) What is the primary function of a LiDAR sensor in robotics?
a) Object manipulation b) Navigation and mapping
c) Tactile feedback d) Speech recognition

4) Radial movement (in & out) to the manipulator arm is provided by _____.
a) Wrist bend b) Wrist swivel
c) Wrist yaw d) Elbow extension

5) Which one of the following is safer?
a) Cobot b) Robot
c) Both a) and b) d) None of the above

6) The _____ of a manipulator is a measure of how close the manipulator can come to a given point within its workspace.
a) Accuracy b) Repeatability
c) Efficiency d) Resolution

7) Which type of robot is commonly used for tasks in hazardous environments?

a) Industrial Robot
b) Aerial Robot
c) Search and Rescue Robot
d) Humanoid Robot

8) The word Robot is derived from the Czech word "Robota" meaning _____.

a) Forced laborer
b) Toy
c) Teacher
d) Intelligent worker

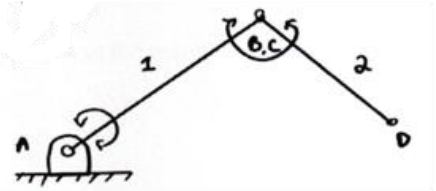
9) In which scenario would a legged robot be more suitable than a wheeled robot?

a) Racing on a paved track
b) Navigating uneven terrain with obstacles
c) Transporting heavy payloads over long distances
d) Delivering packages in a warehouse with smooth floors

10) How many Degrees of freedom (DOF) does a prismatic and revolute joint have respectively?

a) 1,1
b) 2,1
c) 1,2
d) 2,2

11) How many degrees of freedom does the following figure have?



a) 5
b) 3
c) 6
d) 2

12) The surface of the workspace describes a _____.

a) Work surface
b) Work envelope
c) Work load
d) Workplace

13) Drives also known as _____.

a) Controller
b) Sensors
c) Manipulator
d) Actuators

14) The process of finding the position of the end effectors when the joint variables are know is called _____.

a) Forward Kinematics
b) Inverse Kinematics
c) Forward Dynamics
d) Inverse Dynamics

Seat No.	

Set **Q**

S.Y. (B.Tech.) (Mechanical Engineering) (Semester - I) (New) (NEP CBCS) Examination: March/April – 2026
Industrial Robotics (MechHon-01A)

Day & Date: Wednesday, 13-05-2026 Max. Marks: 56
Time: 03:00 PM To 06:00 PM

Instructions: 1) Attempt two questions from each section.
2) Figures to the right indicate full marks.
3) Use of nonprogrammable calculator is allowed.
4) Assume suitable data if necessary.

SECTION – I

Q.2 Attempt the following. **14**

a) Write a note on the current market scenario of Robotics.

b) What is a Mobile Robots? Differentiate wheeled and track robots.

Q.3 Attempt the following. **14**

a) Explain working of A C Motor and Its control techniques.

b) Discus classification of Sensors and write a note on GPS.

Q.4 Attempt the following. **14**

a) Explain in detail classification of End effectors.

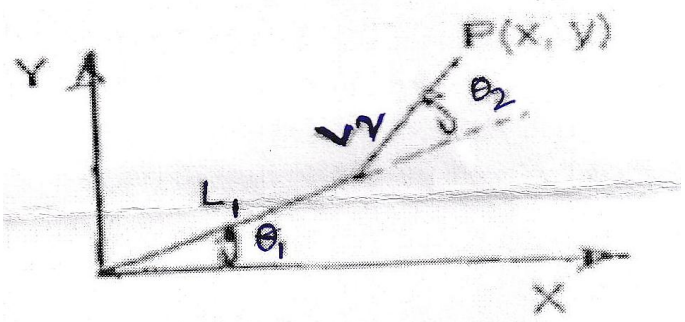
b) Write a note on Mechanical end effectors.

SECTION – II

Q.5 Attempt the following. **14**

a) Write short note on a velocity jacobian and Singularities.

b) What do you understand by forward for 2 dof's?
Explain in detail it is desired to determine the values of which the angels $\ominus 1$ & $\ominus 2$ must be set into order to achieve certain point the length of joint $L1 = 12$ in the length of $L2 = 10$ in. The coordinates $x = 15.7$ and $y = 12.6$ using the reverse transformation method determine the angles $\ominus 1$ & $\ominus 2$.



Q.6 Attempt the following. **14**

a) Explain Trajectory planning and enlist issue with Trajectory Planning.

b) Explain control architecture of robot with block diagram.

Q.7 Attempt the following. **14**

a) What are the general considerations for selecting robots for Machine tending application?

b) What are the general considerations for selecting robots for sealant application?

MCQ/Objective Type Questions

Duration: 30 Minutes Marks:14

Q.1 Give the correct option for the following questions. 14

1) What is the key advantage of using a turbocharged engine in automotive powertrains?
a) Reduced emissions
b) Improved thermal efficiency
c) Increased power output for a given engine size
d) Better cold-start performance

2) Which factor primarily affects the selection of an engine for a hybrid electric vehicle (HEV)? _____.
a) Engine capacity
b) Engine weight
c) Fuel type compatibility
d) Torque-speed characteristics

3) What is the main function of the synchronizer in a manual transmission?
a) Match the rotational speeds of gears
b) Enhance fuel efficiency
c) Reduce clutch slippage
d) Increase gear ratios

4) What is the key parameter for determining the efficiency of a clutch system?
a) Gear ratio
b) Friction coefficient
c) Clutch plate thickness
d) Input shaft speed

5) What is the primary function of the Anti-lock Braking System (ABS)?
a) Reduce braking distance
b) Increase braking force
c) Prevent wheel lockup during braking
d) Improve tire durability

6) Which parameter will primarily determines the stopping distance of a vehicle?
a) Brake type
b) Tire composition
c) Road condition
d) Vehicle speed

7) Which steering system component translates rotary motion into linear motion?
a) Rack-and-pinion
b) Tie rods
c) Kingpin
d) Steering column

8) What is the steering ratio in a steering system?
a) Speed of turning versus road speed
b) Angle of steering wheel to tire angle
c) Force input to force output ratio
d) Torque output to input ratio

9) What does wheel toe-in adjustment affect?
a) Braking force
b) Vehicle weight
c) Steering response
d) Suspension travel

10) Which component converts AC power generated by the alternator to DC for battery charging?
a) Voltage regulator
b) Spark plug
c) Starter motor
d) Rectifier

11) You are tasked with selecting an engine for a sports car. Which characteristic would be most critical for this application?
a) High power-to-weight ratio
b) High torque at low RPM
c) Large displacement volume
d) Low thermal efficiency

12) During a powertrain analysis, how would you calculate the torque at the wheels?
a) Engine torque ÷ gear ratio
b) Engine torque × gear ratio × differential ratio
c) Engine power × speed ratio
d) Gear ratio ÷ engine torque

13) What is the main reason for balancing wheels?

a) Increase fuel economy
b) Improve braking efficiency
c) Prevent vibration at high speeds
d) Reduce tire weight

14) In a hybrid electric vehicle, the powertrain uses both ICE and electric motor. What is the primary advantage?

a) Elimination of the transmission system
b) Simplified vehicle architecture
c) Improved acceleration only
d) Enhanced fuel economy and reduced emissions

   d) Steering column

12) What is the steering ratio in a steering system?
   a) Speed of turning versus road speed
   b) Angle of steering wheel to tire angle
   c) Force input to force output ratio
   d) Torque output to input ratio

13) What does wheel toe-in adjustment affect?

a) Braking force
b) Vehicle weight
c) Steering response
d) Suspension travel

14) Which component converts AC power generated by the alternator to DC for battery charging?

a) Voltage regulator
b) Spark plug
c) Starter motor
d) Rectifier

S.Y. (B.Tech.) (Mechanical Engineering) (Semester - I) (New) (NEP CBCS) Examination: March/April - 2026
Introduction to Automobile Engineering (MechHon-01B)

Day & Date: Wednesday, 13-05-2026 Max. Marks: 56
Time: 03:00 PM To 06:00 PM

Instructions: 1) Answer any two questions from each Section.
2) Figures to the right indicates full marks.
3) Assume suitable data wherever needed mention it clearly.
4) Use of non-programmable calculator is allowed.

Section – I

Q.2 **a)** Explain constant mesh gear box and state its limitation. **07**

b) Explain with neat sketch difference between 2 stroke and 4 stroke engine operation. **07**

Q.3 **a)** Explain need, construction and working of final drive. **07**

b) Explain with sketch working of single plate clutch. **07**

Q.4 **a)** Explain construction and working of Wheel cylinder in hydraulic braking. **07**

b) A Car has Vehicle weight 1200 kg, Frontal area 2.0 m^2, air resistance coefficient 0.3, Rolling resistance coefficient 0.02, Transmission efficiency 90%. Gear ratios 1^{st} gear 4.0, 2^{nd} gear 2.5, Wheel radius 0.32 m, Air density 1.2 kg/m^3, Vehicle speed in 1^{st} gear: 40 km/h, Road grade: 8%, Find: Engine brake power required at 40 km/h, Vehicle speed in 2^{nd} gear at the same engine speed, Tractive effort for gradeability. **07**

Section – II

Q.5 **a)** Explain necessity of front wheel steering geometry. Explain with figure different steering geometries for front wheel steering system. **07**

b) Explain telescopic shock absorber with neat sketch. **07**

Q.6 **a)** Explain recalculating ball type steering gearbox. **07**

b) Compare independent suspension system with conventional suspension system. **07**

Q.7 **a)** Explain with application in automobile for the different sensors and actuators. **07**

b) Explain starting system of automobile. **07**

Set **S**

S.Y. (B.Tech.) (Mechanical Engineering) (Semester - I) (New) (NEP CBCS) Examination: March/April – 2026
Introduction to Automobile Engineering (MechHon-01B)

Day & Date: Wednesday, 13-05-2026 Max. Marks: 70
Time: 03:00 PM To 06:00 PM

Instructions: 1) Q. No. 1 is compulsory. It should be solved in the first 30 minutes in Answer Book Page no 03 (Starting page of the Answer Book). Each question carries one mark.
2) Don't forget to Mention question paper set (P/Q/R/S) on top of page.
3) Figures to the right indicates full marks.
4) Assume suitable data if necessary and mention it clearly.

MCQ/Objective Type Questions

Duration: 30 Minutes Marks:14

Q.1 Give the correct option for the following questions. 14

1) Which parameter will primarily determines the stopping distance of a vehicle?
a) Brake type b) Tire composition
c) Road condition d) Vehicle speed

2) Which steering system component translates rotary motion into linear motion?
a) Rack-and-pinion b) Tie rods
c) Kingpin d) Steering column

3) What is the steering ratio in a steering system?
a) Speed of turning versus road speed
b) Angle of steering wheel to tire angle
c) Force input to force output ratio
d) Torque output to input ratio

4) What does wheel toe-in adjustment affect?
a) Braking force b) Vehicle weight
c) Steering response d) Suspension travel

5) Which component converts AC power generated by the alternator to DC for battery charging?
a) Voltage regulator b) Spark plug
c) Starter motor d) Rectifier

6) You are tasked with selecting an engine for a sports car. Which characteristic would be most critical for this application?
   a) High power-to-weight ratio
   b) High torque at low RPM
   c) Large displacement volume
   d) Low thermal efficiency

7) During a powertrain analysis, how would you calculate the torque at the wheels?
   a) Engine torque ÷ gear ratio
   b) Engine torque × gear ratio × differential ratio
   c) Engine power × speed ratio
   d) Gear ratio ÷ engine torque

8) What is the main reason for balancing wheels?
   a) Increase fuel economy
   b) Improve braking efficiency
   c) Prevent vibration at high speeds
   d) Reduce tire weight

9) In a hybrid electric vehicle, the powertrain uses both ICE and electric motor. What is the primary advantage?
   a) Elimination of the transmission system
   b) Simplified vehicle architecture
   c) Improved acceleration only
   d) Enhanced fuel economy and reduced emissions

10) What is the key advantage of using a turbocharged engine in automotive powertrains?
   a) Reduced emissions
   b) Improved thermal efficiency
   c) Increased power output for a given engine size
   d) Better cold-start performance

11) Which factor primarily affects the selection of an engine for a hybrid electric vehicle (HEV)? _____.
   a) Engine capacity
   b) Engine weight
   c) Fuel type compatibility
   d) Torque-speed characteristics

12) What is the main function of the synchronizer in a manual transmission?
   a) Match the rotational speeds of gears
   b) Enhance fuel efficiency
   c) Reduce clutch slippage
   d) Increase gear ratios

13) What is the key parameter for determining the efficiency of a clutch system?

a) Gear ratio
b) Friction coefficient
c) Clutch plate thickness
d) Input shaft speed

14) What is the primary function of the Anti-lock Braking System (ABS)?

a) Reduce braking distance
b) Increase braking force
c) Prevent wheel lockup during braking
d) Improve tire durability

Answer

Q.1 Solve following Multiple Choice Questions.

1) Value education enables us _____.
a) To understand our needs
b) Visualize our goals correctly
c) Indicate the direction for their fulfillment
d) All of the above

2) One of the basic desires of every human being is to be always _____.
a) Happy b) Sad
c) Laugh d) Earn Money

3) _____ is the basic unit of any human society.
a) Group b) Individual
c) Nature d) Society

4) Natural acceptance & _____ are the two processes of knowing.
a) Self -Actualization b) Self Exploration
c) Self Evaluation d) Self Control

5) Present Education system gives more focus to skills.
a) True b) False
c) May be d) None of the above

6) Value of an entity is _____.
a) Physical Facility
b) Prosperity
c) Its participation in larger order of which it is part
d) Both a and b

7) _____ are as Basic Human Aspirations.
a) Money
b) Relationship without money
c) Physical Facility
d) Continuous Happiness & Prosperity

8) Any course content on value education needs to be _____.
a) Universal b) Rational
c) Natural d) All of above

9) When we live with correct understanding of values, we feel _____.
a) Deprived b) Frustrated
c) Happy d) Unhappy

10) Following are the basic guidelines for value education except _____.
a) Universal b) Personal
c) Rational d) Natural

11) Please give the correct priority for Physical Facilities, Right Understanding and Relationship.
a) Physical Facilities, Right Understanding and Relationship
b) Relationship, Right Understanding and Physical Facilities
c) Right Understanding, Relationship and Physical Facilities
d) None of the above

12) Right Understanding and relationships lead to _____.
a) Mutual Happiness b) Mutual Prosperity
c) Both a and b d) All are wrong

13) Right Understanding and Physical Facilities leads to _____.
a) Mutual Happiness b) Mutual Prosperity
c) Both a and b d) All are wrong

14) ____ are the content of self-exploration.
a) Program b) Desire
c) Both a and b d) None of the above

15) To be in state of liking is _____.
a) Happy b) Unhappy
c) Both a and b d) None of the above

16) _____ helps the human being to transform from Animal consciousness to human consciousness.
a) Physical Facility b) Right understanding
c) Relationship d) All of above

17) _____ is only a means to achieve what is considered valuable for a human being in an effective and efficient manner.

a) Value b) Skill
c) Technology d) All of above

18) _____ means physical facilities more than to satisfy my needs.

a) Health b) Prosperity
c) Happiness d) None of above

19) If something is _____ to us, without any force or compulsion, then it is often correct and does not change with time and people.

a) naturally acceptable b) pushed
c) common d) None of above

20) Physical facilities are necessary and complete for _____.

a) Animal b) Human being
c) Nature d) All of the above

21) Beside physical facilities human being want _____.

a) Name b) Fame
c) Relationship d) None of the above

22) When you are living with pre-conditionings and accumulated desires without evaluating them, then it means that you are _____.

a) Swatantra b) Partantra
c) Prosperous d) None of the above

23) To be in state of _____ is unhappiness.

a) Disharmony b) Contradiction
c) Disharmony or contradiction d) None of the above

24) Which of following leads to variety of problems at different levels of our living?

a) Lack of right understanding of happiness
b) Lack of right understanding of prosperity
c) Lack of right understanding of happiness & prosperity
d) Lack of awareness towards health

25) Working only for physical facilities in living is called _____.

a) Animal Consciousness b) Human Consciousness
c) Rich Consciousness d) None of these

26) Self and _____ are different in nature, materiality, needs and activities.

a) Trust b) Body
c) Belief d) None of the above

27) Sukh and _____ both are needed and can't replace each other.

a) Self b) Body
c) Suvidha d) Belief

28) In value education Sanyama means _____.
a) Self-regulation b) Health
c) Happiness d) Prosperity

29) Sadupyog of the Body mean _____ of the Body.
a) Self-regulation b) Care
c) Happiness d) Right utilization

30) Knowing means having the _____.
a) Assumption b) Right understanding
c) Right feeling d) None of the above

31) Each human being is co-existence of the _____ and the _____.
a) self, self b) body, body
c) self, body d) None of the above

32) _____ is the feeling of responsibility for nurturing, protecting and right utilizing the body.
a) Swasthya b) Sanyam
c) Prosperity d) None of the above

33) The system of the body works in a _____ way.
a) Happy b) Self organized
c) Random d) Independent

34) The self is _____ in nature while body is _____ in nature.
a) Unconscious, Physico-chemical
b) Conscious, Physico-chemical
c) Physico-chemical, Conscious
d) Physico-chemical, Unconscious

35) The activity of desire, thought and expecting together is called as _____.
a) Body b) Health
c) Imagination d) Future

36) Harmony should be maintained in _____.
a) Between body and life
b) Between self and society
c) Between life and environment
d) All the above

37) Sah-astitva means _____.
a) Co-existence b) Co-operation
c) Co-ordination d) Corporate identity

38) The process of education and right living leads to _____ in the individual.

a) Right understanding b) Health
c) Prosperity d) None of the above

39) Ensuring justice in the relationship, on the basis of values leads to _____ in society.

a) Fearlessness b) Confusion
c) Confidence d) Fear

40) _____ is the foundational value in relationship.

a) Respect b) Love
c) Trust d) Glory

41) To be assured of others at all time is the feeling of _____.

a) Respect b) Love
c) Trust d) Glory

42) _____ is the feeling for someone who has made efforts for excellence.

a) Reverence b) Glory
c) Gratitude d) Guidance

43) _____ is the feeling of acceptance for those who have made efforts for my excellence.

a) Reverence b) Glory
c) Gratitude d) Guidance

44) The feeling of relatedness to all human beings is called _____.

a) Love b) Affection
c) Gratitude d) Respect

45) All the units of nature can be classified into _____ orders.

a) Two b) Three
c) Four d) Six

46) Which of the following does not form an order in nature?

a) Bio b) Animal
c) Consciousness d) Human

47) Which of the following statement is not true?

a) There is interconnectedness in nature
b) There is recyclability and self-regulation in nature
c) There is struggle for survival in nature
d) There is mutual fulfillment in nature

48) Harmony in the family is the building block for harmony in the _____.

a) society b) individual
c) friend d) relative

49) _____ in the family means that the family is able to identify its needs.

a) wealth
b) prosperity
c) harmony
d) happiness

50) _____ means right evaluation.

a) Respect
b) Love
c) Trust
d) Glory

8) In value education Sanyama means _____.
a) Self-regulation b) Health
c) Happiness d) Prosperity

9) Sadupyog of the Body mean _____ of the Body.
a) Self-regulation b) Care
c) Happiness d) Right utilization

10) Knowing means having the _____.
a) Assumption b) Right understanding
c) Right feeling d) None of the above

11) Each human being is co-existence of the _____ and the _____.
a) self, self b) body, body
c) self, body d) None of the above

12) _____ is the feeling of responsibility for nurturing, protecting and right utilizing the body.
a) Swasthya b) Sanyam
c) Prosperity d) None of the above

13) The system of the body works in a _____ way.
a) Happy b) Self organized
c) Random d) Independent

14) The self is _____ in nature while body is _____ in nature.
a) Unconscious, Physico-chemical
b) Conscious, Physico-chemical
c) Physico-chemical, Conscious
d) Physico-chemical, Unconscious

15) The activity of desire, thought and expecting together is called as _____.
a) Body b) Health
c) Imagination d) Future

16) Harmony should be maintained in _____.
a) Between body and life
b) Between self and society
c) Between life and environment
d) All the above

17) Sah-astitva means _____.
a) Co-existence b) Co-operation
c) Co-ordination d) Corporate identity

18) The process of education and right living leads to _____ in the individual.

a) Right understanding b) Health
c) Prosperity d) None of the above

19) Ensuring justice in the relationship, on the basis of values leads to _____ in society.

a) Fearlessness b) Confusion
c) Confidence d) Fear

20) _____ is the foundational value in relationship.

a) Respect b) Love
c) Trust d) Glory

21) To be assured of others at all time is the feeling of _____.

a) Respect b) Love
c) Trust d) Glory

22) _____ is the feeling for someone who has made efforts for excellence.

a) Reverence b) Glory
c) Gratitude d) Guidance

23) _____ is the feeling of acceptance for those who have made efforts for my excellence.

a) Reverence b) Glory
c) Gratitude d) Guidance

24) The feeling of relatedness to all human beings is called _____.

a) Love b) Affection
c) Gratitude d) Respect

25) All the units of nature can be classified into _____ orders.

a) Two b) Three
c) Four d) Six

26) Which of the following does not form an order in nature?

a) Bio b) Animal
c) Consciousness d) Human

27) Which of the following statement is not true?

a) There is interconnectedness in nature
b) There is recyclability and self-regulation in nature
c) There is struggle for survival in nature
d) There is mutual fulfillment in nature

28) Harmony in the family is the building block for harmony in the _____.

a) society b) individual
c) friend d) relative

29) _____ in the family means that the family is able to identify its needs.

a) wealth b) prosperity
c) harmony d) happiness

30) _____ means right evaluation.

a) Respect b) Love
c) Trust d) Glory

31) Value education enables us _____.

a) To understand our needs
b) Visualize our goals correctly
c) Indicate the direction for their fulfillment
d) All of the above

32) One of the basic desires of every human being is to be always _____.

a) Happy b) Sad
c) Laugh d) Earn Money

33) _____ is the basic unit of any human society.

a) Group b) Individual
c) Nature d) Society

34) Natural acceptance & _____ are the two processes of knowing.

a) Self -Actualization b) Self Exploration
c) Self Evaluation d) Self Control

35) Present Education system gives more focus to skills.

a) True b) False
c) May be d) None of the above

36) Value of an entity is _____.

a) Physical Facility
b) Prosperity
c) Its participation in larger order of which it is part
d) Both a and b

37) _____ are as Basic Human Aspirations.

a) Money
b) Relationship without money
c) Physical Facility
d) Continuous Happiness & Prosperity

38) Any course content on value education needs to be _____.

a) Universal b) Rational
c) Natural d) All of above

39) When we live with correct understanding of values, we feel _____.
a) Deprived b) Frustrated
c) Happy d) Unhappy

40) Following are the basic guidelines for value education except _____.
a) Universal b) Personal
c) Rational d) Natural

41) Please give the correct priority for Physical Facilities, Right Understanding and Relationship.
a) Physical Facilities, Right Understanding and Relationship
b) Relationship, Right Understanding and Physical Facilities
c) Right Understanding, Relationship and Physical Facilities
d) None of the above

42) Right Understanding and relationships lead to _____.
a) Mutual Happiness b) Mutual Prosperity
c) Both a and b d) All are wrong

43) Right Understanding and Physical Facilities leads to _____.
a) Mutual Happiness b) Mutual Prosperity
c) Both a and b d) All are wrong

44) ____ are the content of self-exploration.
a) Program b) Desire
c) Both a and b d) None of the above

45) To be in state of liking is _____.
a) Happy b) Unhappy
c) Both a and b d) None of the above

46) _____ helps the human being to transform from Animal consciousness to human consciousness.
a) Physical Facility b) Right understanding
c) Relationship d) All of above

47) _____ is only a means to achieve what is considered valuable for a human being in an effective and efficient manner.
a) Value b) Skill
c) Technology d) All of above

48) _____ means physical facilities more than to satisfy my needs.
a) Health b) Prosperity
c) Happiness d) None of above

49) If something is _____ to us, without any force or compulsion, then it is often correct and does not change with time and people.

a) naturally acceptable
b) pushed
c) common
d) None of above

50) Physical facilities are necessary and complete for _____.

a) Animal
b) Human being
c) Nature
d) All of the above

a) Disharmony b) Contradiction
c) Disharmony or contradiction d) None of the above

34) Which of following leads to variety of problems at different levels of our living?
a) Lack of right understanding of happiness
b) Lack of right understanding of prosperity
c) Lack of right understanding of happiness & prosperity
d) Lack of awareness towards health

35) Working only for physical facilities in living is called _____.
a) Animal Consciousness b) Human Consciousness
c) Rich Consciousness d) None of these

36) Self and _____ are different in nature, materiality, needs and activities.
a) Trust b) Body
c) Belief d) None of the above

37) Sukh and _____ both are needed and can't replace each other.
a) Self b) Body
c) Suvidha d) Belief

38) In value education Sanyama means _____.
a) Self-regulation b) Health
c) Happiness d) Prosperity

39) Sadupyog of the Body mean _____ of the Body.
a) Self-regulation b) Care
c) Happiness d) Right utilization

40) Knowing means having the _____.
a) Assumption b) Right understanding
c) Right feeling d) None of the above

41) Each human being is co-existence of the _____ and the _____.
a) self, self b) body, body
c) self, body d) None of the above

42) _____ is the feeling of responsibility for nurturing, protecting and right utilizing the body.
a) Swasthya b) Sanyam
c) Prosperity d) None of the above

43) The system of the body works in a _____ way.
a) Happy b) Self organized
c) Random d) Independent

44) The self is _____ in nature while body is _____ in nature.
a) Unconscious, Physico-chemical
b) Conscious, Physico-chemical
c) Physico-chemical, Conscious
d) Physico-chemical, Unconscious

45) The activity of desire, thought and expecting together is called as _____.
a) Body b) Health
c) Imagination d) Future

46) Harmony should be maintained in _____.
a) Between body and life
b) Between self and society
c) Between life and environment
d) All the above

47) Sah-astitva means _____.
a) Co-existence b) Co-operation
c) Co-ordination d) Corporate identity

48) The process of education and right living leads to _____ in the individual.
a) Right understanding b) Health
c) Prosperity d) None of the above

49) Ensuring justice in the relationship, on the basis of values leads to _____ in society.

a) Fearlessness
b) Confusion
c) Confidence
d) Fear

50) _____ is the foundational value in relationship.

a) Respect
b) Love
c) Trust
d) Glory

S.Y. (B.Tech.) (Mechanical Engineering) (Semester - I) (New) (NEP CBCS) Examination: March/April – 2026
Universal Human Values (VEC-01)

Day & Date: Friday, 15-05-2026 Max. Marks: 50
Time: 03:00 PM To 04:30 PM

Instructions: 1) All questions are compulsory.
2) Figures to the right indicate full marks.
3) Mention Question Paper Set (P/Q/R/S) on Top of Page.

Answer

Q.1 Solve following Multiple Choice Questions.

1) Please give the correct priority for Physical Facilities, Right Understanding and Relationship.
a) Physical Facilities, Right Understanding and Relationship
b) Relationship, Right Understanding and Physical Facilities
c) Right Understanding, Relationship and Physical Facilities
d) None of the above

2) Right Understanding and relationships lead to _____.
a) Mutual Happiness b) Mutual Prosperity
c) Both a and b d) All are wrong

3) Right Understanding and Physical Facilities leads to _____.
a) Mutual Happiness b) Mutual Prosperity
c) Both a and b d) All are wrong

4) ____ are the content of self-exploration.
a) Program b) Desire
c) Both a and b d) None of the above

5) To be in state of liking is _____.
a) Happy b) Unhappy
c) Both a and b d) None of the above

6) _____ helps the human being to transform from Animal consciousness to human consciousness.
a) Physical Facility b) Right understanding
c) Relationship d) All of above

7) _____ is only a means to achieve what is considered valuable for a human being in an effective and efficient manner.
a) Value b) Skill
c) Technology d) All of above

8) _____ means physical facilities more than to satisfy my needs.
a) Health b) Prosperity
c) Happiness d) None of above

9) If something is _____ to us, without any force or compulsion, then it is often correct and does not change with time and people.
a) naturally acceptable b) pushed
c) common d) None of above

10) Physical facilities are necessary and complete for _____.
a) Animal b) Human being
c) Nature d) All of the above

11) Beside physical facilities human being want _____.
a) Name b) Fame
c) Relationship d) None of the above

12) When you are living with pre-conditionings and accumulated desires without evaluating them, then it means that you are _____.
a) Swatantra b) Partantra
c) Prosperous d) None of the above

13) To be in state of _____ is unhappiness.
a) Disharmony b) Contradiction
c) Disharmony or contradiction d) None of the above

14) Which of following leads to variety of problems at different levels of our living?
a) Lack of right understanding of happiness
b) Lack of right understanding of prosperity
c) Lack of right understanding of happiness & prosperity
d) Lack of awareness towards health

15) Working only for physical facilities in living is called _____.
a) Animal Consciousness b) Human Consciousness
c) Rich Consciousness d) None of these

16) Self and _____ are different in nature, materiality, needs and activities.
a) Trust b) Body
c) Belief d) None of the above

17) Sukh and _____ both are needed and can't replace each other.
a) Self b) Body
c) Suvidha d) Belief

18) In value education Sanyama means _____.

a) Self-regulation b) Health
c) Happiness d) Prosperity

19) Sadupyog of the Body mean _____ of the Body.

a) Self-regulation b) Care
c) Happiness d) Right utilization

20) Knowing means having the _____.

a) Assumption b) Right understanding
c) Right feeling d) None of the above

21) Each human being is co-existence of the _____ and the _____.

a) self, self b) body, body
c) self, body d) None of the above

22) _____ is the feeling of responsibility for nurturing, protecting and right utilizing the body.

a) Swasthya b) Sanyam
c) Prosperity d) None of the above

23) The system of the body works in a _____ way.

a) Happy b) Self organized
c) Random d) Independent

24) The self is _____ in nature while body is _____ in nature.

a) Unconscious, Physico-chemical
b) Conscious, Physico-chemical
c) Physico-chemical, Conscious
d) Physico-chemical, Unconscious

25) The activity of desire, thought and expecting together is called as _____.

a) Body b) Health
c) Imagination d) Future

26) Harmony should be maintained in _____.

a) Between body and life
b) Between self and society
c) Between life and environment
d) All the above

27) Sah-astitva means _____.

a) Co-existence b) Co-operation
c) Co-ordination d) Corporate identity

28) The process of education and right living leads to _____ in the individual.

a) Right understanding b) Health
c) Prosperity d) None of the above

29) Ensuring justice in the relationship, on the basis of values leads to _____ in society.

a) Fearlessness b) Confusion
c) Confidence d) Fear

30) _____ is the foundational value in relationship.

a) Respect b) Love
c) Trust d) Glory

31) To be assured of others at all time is the feeling of _____.

a) Respect b) Love
c) Trust d) Glory

32) _____ is the feeling for someone who has made efforts for excellence.

a) Reverence b) Glory
c) Gratitude d) Guidance

33) _____ is the feeling of acceptance for those who have made efforts for my excellence.

a) Reverence b) Glory
c) Gratitude d) Guidance

34) The feeling of relatedness to all human beings is called _____.

a) Love b) Affection
c) Gratitude d) Respect

35) All the units of nature can be classified into _____ orders.

a) Two b) Three
c) Four d) Six

36) Which of the following does not form an order in nature?

a) Bio b) Animal
c) Consciousness d) Human

37) Which of the following statement is not true?

a) There is interconnectedness in nature
b) There is recyclability and self-regulation in nature
c) There is struggle for survival in nature
d) There is mutual fulfillment in nature

38) Harmony in the family is the building block for harmony in the _____.

a) society b) individual
c) friend d) relative

39) _____ in the family means that the family is able to identify its needs.

a) wealth b) prosperity
c) harmony d) happiness

40) _____ means right evaluation.

a) Respect b) Love
c) Trust d) Glory

41) Value education enables us _____.

a) To understand our needs
b) Visualize our goals correctly
c) Indicate the direction for their fulfillment
d) All of the above

42) One of the basic desires of every human being is to be always _____.

a) Happy b) Sad
c) Laugh d) Earn Money

43) _____ is the basic unit of any human society.

a) Group b) Individual
c) Nature d) Society

44) Natural acceptance & _____ are the two processes of knowing.

a) Self -Actualization b) Self Exploration
c) Self Evaluation d) Self Control

45) Present Education system gives more focus to skills.

a) True b) False
c) May be d) None of the above

46) Value of an entity is _____.

a) Physical Facility
b) Prosperity
c) Its participation in larger order of which it is part
d) Both a and b

47) _____ are as Basic Human Aspirations.

a) Money
b) Relationship without money
c) Physical Facility
d) Continuous Happiness & Prosperity

48) Any course content on value education needs to be _____.

a) Universal b) Rational
c) Natural d) All of above

49) When we live with correct understanding of values, we feel _____.

a) Deprived b) Frustrated

c) Happy d) Unhappy

50) Following are the basic guidelines for value education except _____.

a) Universal b) Personal

c) Rational d) Natural

Examination: March/April – 2026
Internal Combustion Engines (BTN02306)

Day & Date: Monday, 04-05-2026 Max. Marks: 70
Time: 03:00 PM To 06:00 PM

Instructions: 1) Q. No. 1 is compulsory. It should be solved in the first 30 minutes in Answer Book Page no 03 (Starting page of the Answer Book). Each question carries one mark.
2) Don't forget to Mention question paper set (P/Q/R/S) on top on page.
3) Figures to the right indicates full marks.
4) Assume suitable data if necessary and state it clearly.
5) Use of scientific calculator is allowed.

MCQ/Objective Type Questions

Duration: 30 Minutes Marks:14

Q.1 Choose the correct answer. **14**

1) In which of the following engine CRDI is used _____.
a) S.I. Engine b) C.I. Engine
c) Steam engine d) None of above

2) Fuel injector is used in _____.
a) S.I. Engine b) C.I. Engine
c) Gas engine d) None of above

3) Brake specific fuel consumption is defined as _____.
a) fuel consumption per hour
b) fuel consumption per km
c) fuel consumption per hour per brake power
d) fuel consumption per BHP

4) One of the major exhaust emissions from CI Engine compared to SI Engine _____.
a) Oxides of nitrogen b) Particulates
c) Unburnt hydrocarbons d) CO and CO_2

5) In which of the following engine supercharging is essential _____.
a) S.I. Engine b) C.I. Engine
c) Aircraft engine d) Marine engine

6) Turbocharging air compressor is driven by _____.
a) Exhaust gas turbine b) Engine itself
c) Separate electric motor d) None of the above

7) Venturi in the carburetor results in _____.
a) increase in air velocity
b) decrease in air velocity
c) decrease of fuel flow
d) increase of manifold pressure

8) For maximum thermal efficiency, the fuel-air mixture in SI engines should be _____.
a) rich
b) lean
c) Stoichiometric
d) may be rich or lean

9) Octane number of n-heptane is _____.
a) 30
b) 60
c) 100
d) 0

10) 4-S4-cylinder engine consist of _____.
a) 1 revolution of crankshaft
b) 2 revolution of crankshaft
c) 3 revolution of crankshaft
d) 4 revolution of crankshaft

11) Material used for cylinder is _____.
a) Steel
b) cast iron
c) white metal
d) leaded bronze

12) Increasing the compression ratio in SI engines the knocking tendency _____.
a) Increases
b) Not affected
c) Decreases
d) None of the above

13) Brake power is measured by _____.
a) Morse test
b) Burette test
c) Dynamometers
d) Motoring test

14) Spark advance is usually specified in terms of _____.
a) engine speed in rev/min
b) degrees of crank rotation
c) time in seconds
d) None of the above

S.Y. (B. Tech.) (Mechanical Engineering) (Semester - I) (CBCS)
Examination: March/April – 2026
Internal Combustion Engines (BTN02306)

Day & Date: Monday, 04-05-2026 Max. Marks: 56
Time: 03:00 PM To 06:00 PM

Instructions: 1) Solve any two questions from each section.
2) Figures to the right indicates full marks.
3) Assume additional suitable data if necessary and state it clearly.
4) Use of scientific calculator is allowed.
5) Use university graph paper & semi-log paper if required.

Section – I

Q.2	**a)**	Compare four stroke and two stroke engines based on construction, performance and advantages.	**04**
	b)	Explain assumption made in air standard cycle and draw air standard Otto cycle on P-V and T-s plane.	**05**
	c)	Discuss the differences between ideal and actual valve timing diagram of a petrol engine.	**05**
Q.3	**a)**	Enlist the types of injector nozzles used in engines and explain any one with neat sketch.	**05**
	b)	Classify fuel injection system used in CI engines. Draw and explain any one type of fuel injection systems used in CI engines.	**04**
	c)	Explain the working of single jet carburettor with a neat sketch.	**05**
Q.4	**a)**	Compare supercharger with turbocharger.	**05**
	b)	Explain difference in thermodynamic cycle between naturally aspirated engine and supercharged engine.	**04**
	c)	Explain limitations of supercharging for S.I. and C.I. Engines.	**05**

Section – II

Q.5	**a)**	Explain briefly combustion phenomenon in SI engines.	**05**
	b)	Explain statement “Good CI engine fuel is bad SI engine fuel”.	**04**
	c)	Explain knocking in CI engines. Explain various factors influencing knocking in C.I engine.	**05**

Q.6	**a)**	Explain the pollution norms requirements and enlist historical achievements by Government of India.	**05**
	b)	Explain need of alternative fuels in engine. Name some of the alternative fuels.	**05**
	c)	Explain need of additives in fuels also enlist the names of additives used in SI and Cl engine fuels with their benefits.	**04**
Q.7	**a)**	A 6 cylinder gasoline engine operates on 4 stroke cycle. Bore of cylinder is 80mm and stroke 100mm. Clearance volume per cylinder is 70CC. At 4000 RPM, Fuel consumption is 20kg/hr and the torque developed is 150Nm. Calculate: i) BP ii) Brake mean effective pressure iii) Brake thermal efficiency If CV of the fuel is 43000kJ/kg, find relative efficiency on brake power basis, assuming engine works on Constant volume cycle and gamma for air = 1.4.	**05**
	b)	Explain with neat sketch three-way catalytic converter.	**04**
	c)	Explain Morse test for measurement of friction power.	**05**

Duration: 30 Minutes Marks:14

Q.1 Choose the correct answer. **14**

1) Turbocharging air compressor is driven by _____.
a) Exhaust gas turbine b) Engine itself
c) Separate electric motor d) None of the above

2) Venturi in the carburetor results in _____.
a) increase in air velocity
b) decrease in air velocity
c) decrease of fuel flow
d) increase of manifold pressure

3) For maximum thermal efficiency, the fuel-air mixture in SI engines should be _____.
a) rich b) lean
c) Stoichiometric d) may be rich or lean

4) Octane number of n-heptane is _____.
a) 30 b) 60
c) 100 d) 0

5) 4-S4-cylinder engine consist of _____.
a) 1 revolution of crankshaft b) 2 revolution of crankshaft
c) 3 revolution of crankshaft d) 4 revolution of crankshaft

6) Material used for cylinder is _____.
a) Steel b) cast iron
c) white metal d) leaded bronze

7) Increasing the compression ratio in SI engines the knocking tendency _____.

a) Increases b) Not affected
c) Decreases d) None of the above

8) Brake power is measured by _____.

a) Morse test b) Burette test
c) Dynamometers d) Motoring test

9) Spark advance is usually specified in terms of _____.

a) engine speed in rev/min b) degrees of crank rotation
c) time in seconds d) None of the above

10) In which of the following engine CRDI is used _____.

a) S.I. Engine b) C.I. Engine
c) Steam engine d) None of above

11) Fuel injector is used in _____.

a) S.I. Engine b) C.I. Engine
c) Gas engine d) None of above

12) Brake specific fuel consumption is defined as _____.

a) fuel consumption per hour
b) fuel consumption per km
c) fuel consumption per hour per brake power
d) fuel consumption per BHP

13) One of the major exhaust emissions from CI Engine compared to SI Engine _____.

a) Oxides of nitrogen b) Particulates
c) Unburnt hydrocarbons d) CO and CO_2

14) In which of the following engine supercharging is essential _____.

a) S.I. Engine b) C.I. Engine
c) Aircraft engine d) Marine engine

Set S

S.Y. (B. Tech.) (Mechanical Engineering) (Semester - I) (CBCS)
Examination: March/April – 2026
Internal Combustion Engines (BTN02306)

Day & Date: Monday, 04-05-2026 Max. Marks: 56
Time: 03:00 PM To 06:00 PM

Instructions: 1) Solve any two questions from each section.
2) Figures to the right indicates full marks.
3) Assume additional suitable data if necessary and state it clearly.
4) Use of scientific calculator is allowed.
5) Use university graph paper & semi-log paper if required.

Section – I

Q.2	**a)**	Compare four stroke and two stroke engines based on construction, performance and advantages.	**04**
	b)	Explain assumption made in air standard cycle and draw air standard Otto cycle on P-V and T-s plane.	**05**
	c)	Discuss the differences between ideal and actual valve timing diagram of a petrol engine.	**05**
Q.3	**a)**	Enlist the types of injector nozzles used in engines and explain any one with neat sketch.	**05**
	b)	Classify fuel injection system used in CI engines. Draw and explain any one type of fuel injection systems used in CI engines.	**04**
	c)	Explain the working of single jet carburettor with a neat sketch.	**05**
Q.4	**a)**	Compare supercharger with turbocharger.	**05**
	b)	Explain difference in thermodynamic cycle between naturally aspirated engine and supercharged engine.	**04**
	c)	Explain limitations of supercharging for S.I. and C.I. Engines.	**05**

Section – II

Q.5	**a)**	Explain briefly combustion phenomenon in SI engines.	**05**
	b)	Explain statement “Good CI engine fuel is bad SI engine fuel”.	**04**
	c)	Explain knocking in CI engines. Explain various factors influencing knocking in C.I engine.	**05**

Q.6	**a)**	Explain the pollution norms requirements and enlist historical achievements by Government of India.	**05**
	b)	Explain need of alternative fuels in engine. Name some of the alternative fuels.	**05**
	c)	Explain need of additives in fuels also enlist the names of additives used in SI and Cl engine fuels with their benefits.	**04**
Q.7	**a)**	A 6 cylinder gasoline engine operates on 4 stroke cycle. Bore of cylinder is 80mm and stroke 100mm. Clearance volume per cylinder is 70CC. At 4000 RPM, Fuel consumption is 20kg/hr and the torque developed is 150Nm. Calculate: i) BP ii) Brake mean effective pressure iii) Brake thermal efficiency If CV of the fuel is 43000kJ/kg, find relative efficiency on brake power basis, assuming engine works on Constant volume cycle and gamma for air = 1.4.	**05**
	b)	Explain with neat sketch three-way catalytic converter.	**04**
	c)	Explain Morse test for measurement of friction power.	**05**

Day & Date: Saturday, 16-05-2026 Max. Marks: 70
Time: 10:00 AM To 01:00 PM

Instructions: 1) Q. No. 1 is compulsory. It should be solved in the first 30 minutes in Answer Book Page no 03 (Starting page of the Answer Book). Each question carries one mark.
2) Don't forget to Mention question paper set (P/Q/R/S) on top of page.
3) Figures to the right indicates full marks.
4) Assume suitable data if required.

MCQ/Objective Type Questions

Duration: 30 Minutes Marks:14

Q.1 Choose the correct answer. **14**

1) The mechanism forms a structure, when Degree of Freedom $=$ _____.
a) 0 b) -1
c) 1 d) 2

2) Which of the following is an inversion of single slider crank chain?
a) Beam Engine
b) Elliptical Trammel
c) Whitworth Quick Return Mechanism
d) Watt's indicator mechanism

3) The total number of instantaneous centres for a mechanism consisting of n links are _____.
a) $n/2$ b) n
c) $(n-1)/2$ d) $n(n-1)/2$

4) The component of acceleration along the link is called as _____.
a) Radial component b) Tangential component
c) Coriolis component d) None

5) Which of the following is an inversion of double slider crank chain?
a) Coupling rod of a locomotive
b) Pendulum pump
c) Elliptical trammels
d) Oscillating cylinder engine

6) A circle drawn with centre as the cam centre and radius equal to the distance between the cam centre and the point on the pitch curve at which the pressure angle is maximum, is called _____.
a) Base circle b) Pitch circle
c) Prime circle d) Pitch curve

7) Offset is provided to a cam follower mechanism to _____.
a) minimise the side thrust b) Accelerate
c) avoid jerk d) none of these

8) An imaginary circle which by pure rolling action, gives the same motion as the actual gear, is called _____.
a) addendum circle b) dedendum circle
c) pitch circle d) clearance circle

9) The module is the reciprocal of _____.
a) diametral pitch b) circular pitch
c) pitch diameter d) none of these

10) In a clock mechanism, the gear train used to connect minute hand to hour hand, is _____.
a) epicyclic gear train b) reverted gear train
c) compound gear train d) simple gear train

11) A Hartnell governor is a_____.
a) pendulum type governor b) spring loaded governor
c) dead weight governor d) inertia governor

12) The height of a Watt's governor (in metres) in equal to _____.
a) $8.95/N^2$ b) $89.5/N^2$
c) $895/N^2$ d) $8950/N^2$

13) For dynamic balancing of a shaft, _____.
a) the net dynamic force acting on the shaft is equal to zero
b) the net couple due to dynamic forces acting on the shaft is equal to zero
c) both a) and b)
d) none of the above

14) A disturbing mass $m1$ attached to a rotating shaft may be balanced by a single mass $m2$ attached in the same plane of rotation as that of $m1$ such that _____.
a) $m_1.r_2 = m_2.r_1$ b) $m_1.r_1 = m_2.r_2$
c) $m_1.m_2 = r_1.r_2$ d) $m_1.r_1^2 = m_2.r_2^2$

2) Figures to the right indicate full marks.
3) Assume additional suitable data if necessary and state it clearly.
4) Use university graph paper & semi-log paper if required.
5) Use of scientific calculator is allowed.

Section – I

Q.2 **a)** Explain different kinds of kinematic pairs giving example for each of them. **06**

b) In a slider-crank mechanism, the crank is 480 mm long and rotates at 20 rad/s in the counter-clockwise direction. The length of the connecting rod is 1.6 m. When the crank turns 60° from the inner dead centre, determine the following using relative velocity methos **08**

i) velocity of the slider
ii) velocity of a point E located at a distance 450 mm on the connecting rod extended
iii) position and velocity of a point F on the connecting rod having the least absolute velocity

Q.3 **a)** Explain with neat sketch any two inversions of double slider crank mechanism. **06**

b) In a pin jointed four bar mechanism ABCD, AB = 300 mm, BC = CD = 360 mm, and AD = 600 mm. The angle BAD = 60°. The crank AB rotates uniformly at 100 r.p.m. Locate all the instantaneous centres and find the angular velocity of the link BC. **08**

Q.4 **a)** Define the following terms related to cam: **06**

i) Base circle
ii) Lift or Stroke
iii) Prime circle
iv) Pitch curve
v) Pitch circle
vi) Pressure angle

b) A cam with a minimum radius of 25 mm is to be designed for a knife-edge follower with the following data: **08**

i) To raise the follower through 35 mm during 60° rotation of the cam
ii) Dwell for next 40° of the cam rotation
iii) Descending of the follower during the next 90° of the cam rotation
iv) Dwell during the rest of the cam rotation

Draw the profile of the cam if the ascending and descending of the cam is with simple harmonic motion and the line of stroke of the follower is offset 10 mm from the axis of the cam shaft.

Section – II

Q.5 **a)** Define the following terms related to gears. **04**

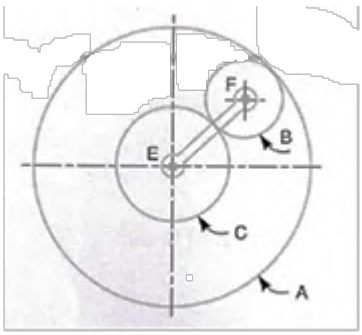
i) Diametral pitch
ii) Module
iii) Dedendum
iv) Path of contact

b) Explain tabular method for epicyclic gear train. **04**

c) A Porter governor has equal arms each 250 mm long and pivoted on the axis of rotation. Each ball has a mass of 5 kg and the mass of the central load on the sleeve is 25 kg. The radius of rotation of the ball is 150 mm when the governor begins to lift and 200 mm when the governor is at maximum speed. Find the minimum and maximum speeds and range of speed of the governor. **06**

Q.6 **a)** What is the function of governor? State the different types of the governors. **06**

b) An epicyclic gear consists of three gears A, B and C as shown in figure. The gear A has 72 internal teeth and gear C has 32 external teeth. The gear B meshes with both A and C and is carried on an arm EF which rotates about the centre of A at 18 r.p.m.. If the gear A is fixed, determine the speed of gears B and C. **08**



Q.7 **a)** Write a short note on static balancing and dynamic balancing. **04**

b) Four masses A, B, C and D as shown below are to be completely balanced. **10**

	A	B	C	D
Mass (Kg)	---	30	50	40
Radius (mm)	180	240	120	150

The planes containing masses B and C are 300 mm apart. The angle between planes containing B and C is 90°. B and C make angles of 210° and 120° respectively with D in the same sense. Find

i) The magnitude and the angular position of mass A;

ii) The position of planes A and D.

Duration: 30 Minutes Marks:14

Q.1 Choose the correct answer. **14**

1) A circle drawn with centre as the cam centre and radius equal to the distance between the cam centre and the point on the pitch curve at which the pressure angle is maximum, is called _____.
a) Base circle b) Pitch circle
c) Prime circle d) Pitch curve

2) Offset is provided to a cam follower mechanism to _____.
a) minimise the side thrust b) Accelerate
c) avoid jerk d) none of these

3) An imaginary circle which by pure rolling action, gives the same motion as the actual gear, is called _____.
a) addendum circle b) dedendum circle
c) pitch circle d) clearance circle

4) The module is the reciprocal of _____.
a) diametral pitch b) circular pitch
c) pitch diameter d) none of these

5) In a clock mechanism, the gear train used to connect minute hand to hour hand, is _____.
a) epicyclic gear train b) reverted gear train
c) compound gear train d) simple gear train

6) A Hartnell governor is a_____.
a) pendulum type governor b) spring loaded governor
c) dead weight governor d) inertia governor

7) The height of a Watt's governor (in metres) in equal to _____.
a) $8.95/N^2$ b) $89.5/N^2$
c) $895/N^2$ d) $8950/N^2$

8) For dynamic balancing of a shaft, _____.
a) the net dynamic force acting on the shaft is equal to zero
b) the net couple due to dynamic forces acting on the shaft is equal to zero
c) both a) and b)
d) none of the above

9) A disturbing mass $m1$ attached to a rotating shaft may be balanced by a single mass $m2$ attached in the same plane of rotation as that of $m1$ such that _____.
a) $m_1.r_2 = m_2.r_1$ b) $m_1.r_1 = m_2.r_2$
c) $m_1.m_2 = r_1.r_2$ d) $m_1.r_1^2 = m_2.r_2^2$

10) The mechanism forms a structure, when Degree of Freedom $=$ _____.
a) 0 b) -1
c) 1 d) 2

11) Which of the following is an inversion of single slider crank chain?
a) Beam Engine
b) Elliptical Trammel
c) Whitworth Quick Return Mechanism
d) Watt's indicator mechanism

12) The total number of instantaneous centres for a mechanism consisting of n links are _____.
a) $n/2$ b) n
c) $(n-1)/2$ d) $n(n-1)/2$

13) The component of acceleration along the link is called as _____.
a) Radial component b) Tangential component
c) Coriolis component d) None

14) Which of the following is an inversion of double slider crank chain?
a) Coupling rod of a locomotive
b) Pendulum pump
c) Elliptical trammels
d) Oscillating cylinder engine

Set **S**

S.Y. (B.Tech.) (Mechanical Engineering) (Semester - II) (New) (CBCS)
Examination: March/April – 2026
Kinematics and Theory of Machine (MECHPCC-04)

Day & Date: Saturday, 16-05-2026 Max. Marks: 56
Time: 10:00 AM To 01:00 PM

Instructions: 1) Attempt any two questions from each section.
2) Figures to the right indicate full marks.
3) Assume additional suitable data if necessary and state it clearly.
4) Use university graph paper & semi-log paper if required.
5) Use of scientific calculator is allowed.

Section – I

Q.2 **a)** Explain different kinds of kinematic pairs giving example for each of them. **06**

b) In a slider-crank mechanism, the crank is 480 mm long and rotates at 20 rad/s in the counter-clockwise direction. The length of the connecting rod is 1.6 m. When the crank turns 60° from the inner dead centre, determine the following using relative velocity methos **08**

i) velocity of the slider
ii) velocity of a point E located at a distance 450 mm on the connecting rod extended
iii) position and velocity of a point F on the connecting rod having the least absolute velocity

Q.3 **a)** Explain with neat sketch any two inversions of double slider crank mechanism. **06**

b) In a pin jointed four bar mechanism ABCD, AB = 300 mm, BC = CD = 360 mm, and AD = 600 mm. The angle BAD = 60°. The crank AB rotates uniformly at 100 r.p.m. Locate all the instantaneous centres and find the angular velocity of the link BC. **08**

Q.4 **a)** Define the following terms related to cam: **06**

i) Base circle
ii) Lift or Stroke
iii) Prime circle
iv) Pitch curve
v) Pitch circle
vi) Pressure angle

b) A cam with a minimum radius of 25 mm is to be designed for a knife-edge follower with the following data: **08**

i) To raise the follower through 35 mm during 60° rotation of the cam
ii) Dwell for next 40° of the cam rotation
iii) Descending of the follower during the next 90° of the cam rotation
iv) Dwell during the rest of the cam rotation

Draw the profile of the cam if the ascending and descending of the cam is with simple harmonic motion and the line of stroke of the follower is offset 10 mm from the axis of the cam shaft.

Section – II

Q.5 **a)** Define the following terms related to gears. **04**

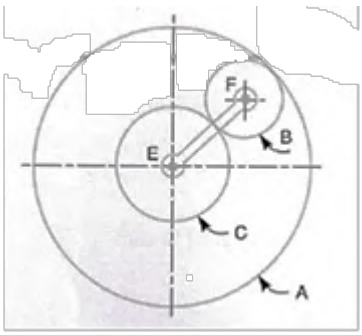
i) Diametral pitch
ii) Module
iii) Dedendum
iv) Path of contact

b) Explain tabular method for epicyclic gear train. **04**

c) A Porter governor has equal arms each 250 mm long and pivoted on the axis of rotation. Each ball has a mass of 5 kg and the mass of the central load on the sleeve is 25 kg. The radius of rotation of the ball is 150 mm when the governor begins to lift and 200 mm when the governor is at maximum speed. Find the minimum and maximum speeds and range of speed of the governor. **06**

Q.6 **a)** What is the function of governor? State the different types of the governors. **06**

b) An epicyclic gear consists of three gears A, B and C as shown in figure. The gear A has 72 internal teeth and gear C has 32 external teeth. The gear B meshes with both A and C and is carried on an arm EF which rotates about the centre of A at 18 r.p.m.. If the gear A is fixed, determine the speed of gears B and C. **08**



Q.7 **a)** Write a short note on static balancing and dynamic balancing. **04**

b) Four masses A, B, C and D as shown below are to be completely balanced. **10**

	A	B	C	D
Mass (Kg)	---	30	50	40
Radius (mm)	180	240	120	150

The planes containing masses B and C are 300 mm apart. The angle between planes containing B and C is 90°. B and C make angles of 210° and 120° respectively with D in the same sense. Find

i) The magnitude and the angular position of mass A;

ii) The position of planes A and D.

S. Y. (B. Tech) (Mechanical Engineering) (Semester - II) (New) (CBCS) Examination: March/April - 2026
Machine Drawing (MECHPCC-05)

Day & Date: Tuesday, 19-05-2026 Max. Marks: 70
Time: 10:00 AM To 01:00 PM

Instructions: 1) Q. No. 1 is compulsory. It should be solved in the first 30 minutes in Answer Book Page no 03 (Starting page of the Answer Book). Each question carries one mark.
2) Don't forget to Mention question paper set (P/Q/R/S) on top of page
3) Figures to the right indicates full marks

MCQ/Objective Type Questions

Duration: 30 Minutes Marks:14

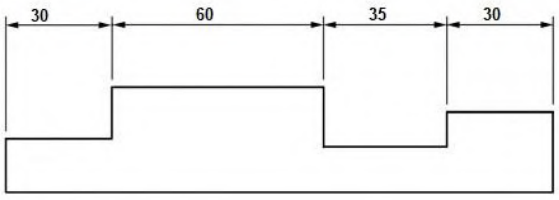
Q.1 Choose the correct answer. **14**

1) In shaft basis system the upper deviation of shaft is _____.
a) Zero b) Varying
c) More than zero d) None of the above

2) Standard size for A1 drawing sheet as per BIS in mm is _____.
a) 594×841 b) 297×420
c) 210×297 d) 420×594

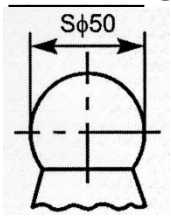
3) Which type of dimensioning places the dimensions aligned with the entity being measured?
a) Chain dimensioning b) Parallel dimensioning
c) Aligned dimensioning d) Unidirectional dimensioning

4) Which type of dimensioning is used in the given figure?



a) Parallel dimensioning b) Chain dimensioning
c) Angular dimensioning d) Aligned dimensioning

5) In the fig symbol Sϕ represents _____ Shape identification symbol.



a) Diameter b) Radius
c) Square d) Spherical Diameter

6) BIS convention of in the given figure is of _____

a) internal thread
b) external thread
c) bearing
d) Knurling

7) What is the included angle of the Sharp V-thread?
a) 30°
b) 45°
c) 60°
d) 90°

8) Which bolt is commonly used in foundations and masonry work?
a) T-headed bolt
b) Rag foundation bolt
c) Cup headed bolt
d) Stud bolt

9) Which key is semi circular in shape?
a) Flat saddle key
b) Gib head key
c) Feather key
d) Woodruff key

10) In a lap joint, the plates are joined by _____.
a) Welding
b) Overlapping each other
c) Threading
d) Brazing

11) It is used to lift the heavy load _____.
a) Screw jack
b) Plummer block
c) Tail stock
d) None

12) Which type of fit always provides a space between the hole and shaft?
a) Interference fit
b) Transition fit
c) Clearance fit
d) Tight fit

13) Which roughness grade has the finest surface finish?
a) N12
b) N8
c) N4
d) N1

14) The algebraic difference between the minimum limit of size and the corresponding basic size is known as _____.
a) Deviation
b) Upper deviation
c) Allowance
d) Lower deviation

S. Y. (B. Tech) (Mechanical Engineering) (Semester - II) (New) (CBCS) Examination: March/April - 2026
Machine Drawing (MECHPCC-05)

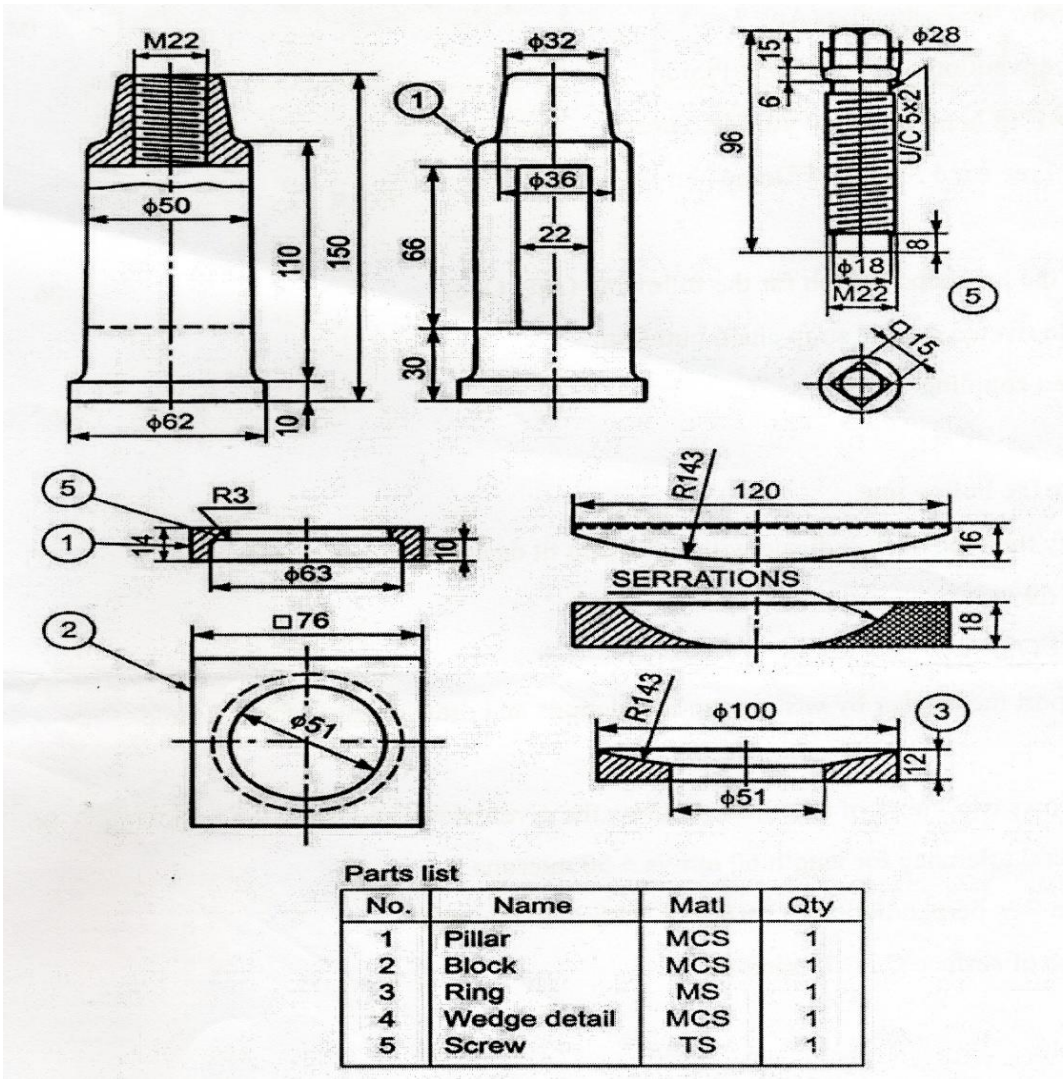
Day & Date: Tuesday, 19-05-2026 Max. Marks: 56
Time: 10:00 AM To 01:00 PM

Instructions: 1) All questions are compulsory.
2) Figures to the right indicate full marks.
3) Assume suitable dimensions if not given.
4) Use first angle Method of projections.

Q.2 Figure below shows the details of Single tool post. Assemble the given parts and draw: **22**

i) Front view
ii) Side view

Prepare the List of Material and give the entire dimension.



Parts list

No.	Name	Matl	Qty
1	Pillar	MCS	1
2	Block	MCS	1
3	Ring	MS	1
4	Wedge detail	MCS	1
5	Screw	TS	1

Q.3 **a)** Draw the BIS Convention. Solve any Four out of five. (Eveny bit has 2 marks) **08**

i) Square on Shaft
ii) Concrete
iii) Rack and Pinion
iv) Square butt weld
v) Draw chain and combined dimensioning

b) Draw freehand sketch for the following (Any One) **05**

i) Knuckle Joint
ii) Rag foundation bolt

Q.4 **a)** **Draw the following (Any Two).** **04**

i) BIS convention of Ratchet and Pinion
ii) Draw Free hand sketch of ACME Thread
iii) Draw Free hand sketch of Dome Nut

b) **Draw the Freehand Sketch for the following (Any One).** **06**

i) Double riveted double strap chain butt joint
ii) Flanged coupling

Q.5 **Solve the Following.**

a) Identify the type of fit indicate with following fit designation. (Any One) **05**

i) 30 H8 d9
ii) 150 H7 f7

Also support the answer by writing the calculations and draw diagram for the same.

b) Fig. shows two views of an object. Redraw the given views and show the following **06**

i) Unilateral tolerance for length 60 mm is $\pm$ 50 microns
ii) Surface B is perpendicular to surface A within 40 microns
iii) Flatness of surface C is 20 microns.

c) Cup headed bolt
d) Stud bolt

13) Which key is semi circular in shape?

a) Flat saddle key
b) Gib head key
c) Feather key
d) Woodruff key

14) In a lap joint, the plates are joined by _____.

a) Welding
b) Overlapping each other
c) Threading
d) Brazing

S. Y. (B. Tech) (Mechanical Engineering) (Semester - II) (New) (CBCS) Examination: March/April - 2026
Machine Drawing (MECHPCC-05)

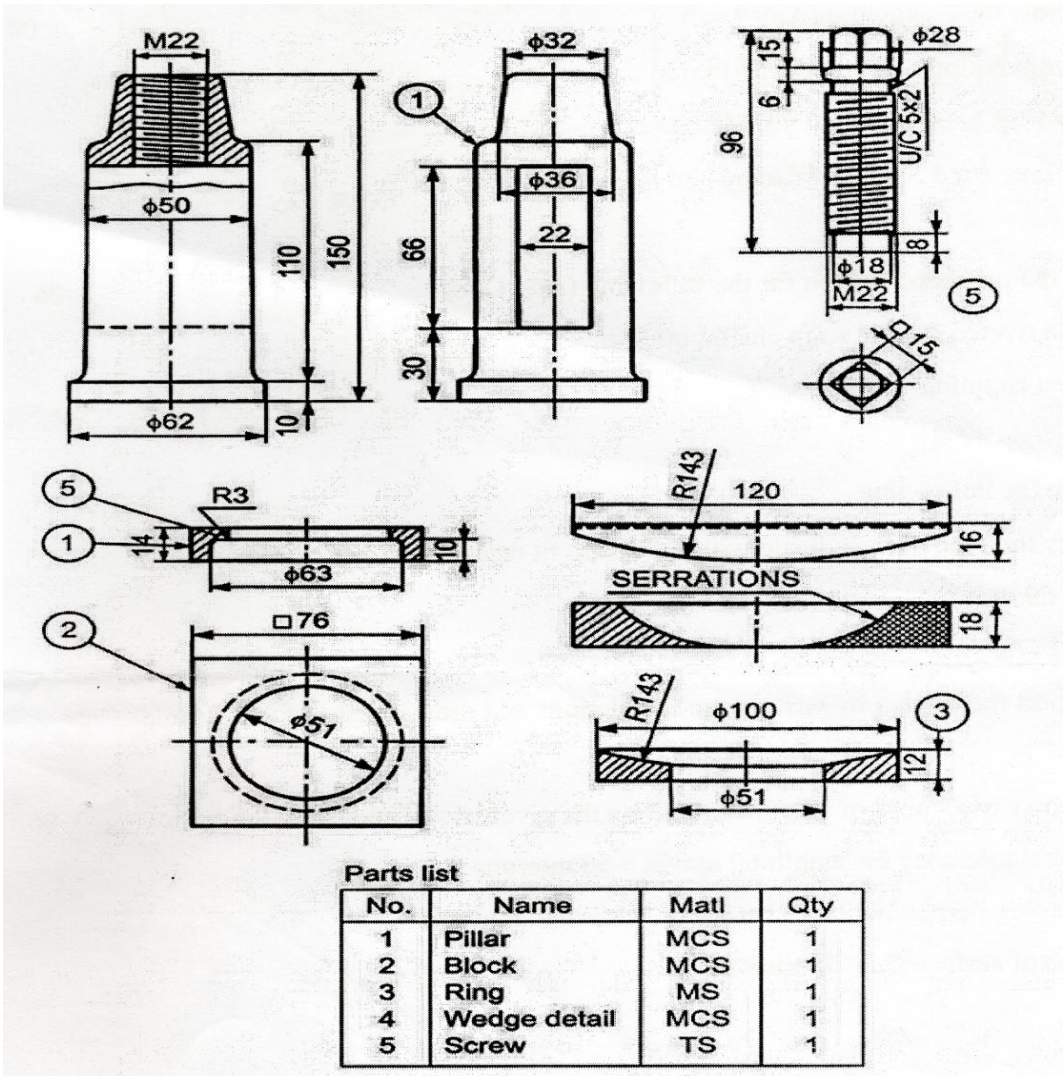
Day & Date: Tuesday, 19-05-2026 Max. Marks: 56
Time: 10:00 AM To 01:00 PM

Instructions: 1) All questions are compulsory.
2) Figures to the right indicate full marks.
3) Assume suitable dimensions if not given.
4) Use first angle Method of projections.

Q.2 Figure below shows the details of Single tool post. Assemble the given parts and draw: **22**

i) Front view
ii) Side view

Prepare the List of Material and give the entire dimension.



Parts list

No.	Name	Matl	Qty
1	Pillar	MCS	1
2	Block	MCS	1
3	Ring	MS	1
4	Wedge detail	MCS	1
5	Screw	TS	1

Q.3 **a)** Draw the BIS Convention. Solve any Four out of five. (Eveny bit has 2 marks) **08**

i) Square on Shaft
ii) Concrete
iii) Rack and Pinion
iv) Square butt weld
v) Draw chain and combined dimensioning

b) Draw freehand sketch for the following (Any One) **05**

i) Knuckle Joint
ii) Rag foundation bolt

Q.4 **a)** **Draw the following (Any Two).** **04**

i) BIS convention of Ratchet and Pinion
ii) Draw Free hand sketch of ACME Thread
iii) Draw Free hand sketch of Dome Nut

b) **Draw the Freehand Sketch for the following (Any One).** **06**

i) Double riveted double strap chain butt joint
ii) Flanged coupling

Q.5 **Solve the Following.**

a) Identify the type of fit indicate with following fit designation. (Any One) **05**

i) 30 H8 d9
ii) 150 H7 f7

Also support the answer by writing the calculations and draw diagram for the same.

b) Fig. shows two views of an object. Redraw the given views and show the following **06**

i) Unilateral tolerance for length 60 mm is $\pm$ 50 microns
ii) Surface B is perpendicular to surface A within 40 microns
iii) Flatness of surface C is 20 microns.

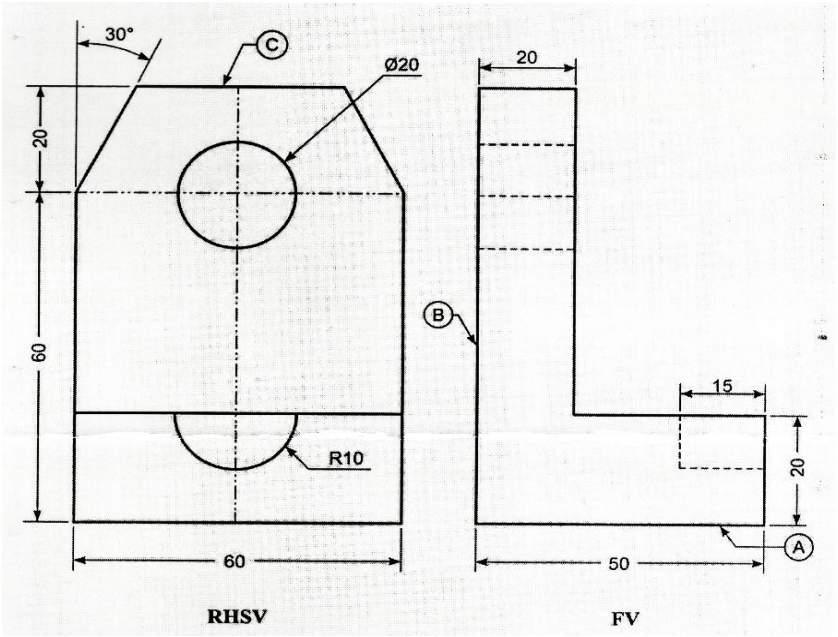


TABLE 18-14(i)
(Values in microns)

Nominal sizes	Tolerances of holes					Tolerances of shafts				
	H7	H8	H9	H10	H11	d9	e8	f7	g6	h6

S. Y. (B. Tech) (Mechanical Engineering) (Semester - II) (New) (CBCS) Examination: March/April - 2026
Machine Drawing (MECHPCC-05)

Day & Date: Tuesday, 19-05-2026 Max. Marks: 70
Time: 10:00 AM To 01:00 PM

Instructions: 1) Q. No. 1 is compulsory. It should be solved in the first 30 minutes in Answer Book Page no 03 (Starting page of the Answer Book). Each question carries one mark.
2) Don't forget to Mention question paper set (P/Q/R/S) on top of page
3) Figures to the right indicates full marks

MCQ/Objective Type Questions

Duration: 30 Minutes Marks:14

Q.1 Choose the correct answer. **14**

1) BIS convention of in the given figure is of _____

a) internal thread b) external thread
c) bearing d) Knurling

2) What is the included angle of the Sharp V-thread?
a) 30° b) 45°
c) 60° d) 90°

3) Which bolt is commonly used in foundations and masonry work?
a) T-headed bolt b) Rag foundation bolt
c) Cup headed bolt d) Stud bolt

4) Which key is semi circular in shape?
a) Flat saddle key b) Gib head key
c) Feather key d) Woodruff key

5) In a lap joint, the plates are joined by _____.
a) Welding b) Overlapping each other
c) Threading d) Brazing

6) It is used to lift the heavy load _____.
a) Screw jack b) Plummer block
c) Tail stock d) None

7) Which type of fit always provides a space between the hole and shaft?
a) Interference fit b) Transition fit
c) Clearance fit d) Tight fit

8) Which roughness grade has the finest surface finish?
a) N12 b) N8
c) N4 d) N1

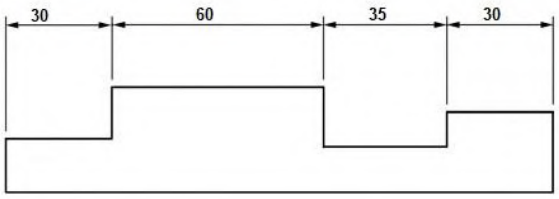
9) The algebraic difference between the minimum limit of size and the corresponding basic size is known as _____.
a) Deviation b) Upper deviation
c) Allowance d) Lower deviation

10) In shaft basis system the upper deviation of shaft is _____.
a) Zero b) Varying
c) More than zero d) None of the above

11) Standard size for A1 drawing sheet as per BIS in mm is _____.
a) 594×841 b) 297×420
c) 210×297 d) 420×594

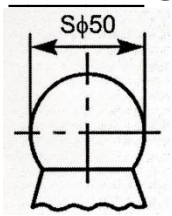
12) Which type of dimensioning places the dimensions aligned with the entity being measured?
a) Chain dimensioning b) Parallel dimensioning
c) Aligned dimensioning d) Unidirectional dimensioning

13) Which type of dimensioning is used in the given figure?



a) Parallel dimensioning b) Chain dimensioning
c) Angular dimensioning d) Aligned dimensioning

14) In the fig symbol Sϕ represents _____ Shape identification symbol.



a) Diameter b) Radius
c) Square d) Spherical Diameter

3) Figures to the right indicates full marks.
4) Assume additional suitable data if necessary and state it clearly.

MCQ/Objective Type Questions

Duration: 30 Minutes Marks:14

Q.1 Choose the correct answer: **14**

1) Kaplan turbine is _____.
a) Tangential flow b) Radial flow
c) Axial flow d) Mixed flow

2) The S.I. unit of total pressure on a plane immersed surface is _____.
a) Newton per meter square b) Newton
c) Newton square per meter d) Newton per meter cube

3) Buoyancy acts on a floating body _____.
a) vertically upward
b) horizontally
c) vertically downward
d) both vertically upward and horizontally

4) If $\emptyset$ is a potential in two-dimensional flow the velocity components u and v are defined as _____.
a) $u = \partial\emptyset/\partial y, v = \partial\emptyset/\partial x$ b) $u = \partial\emptyset/\partial x, v = \partial\emptyset/\partial y$
c) $u = -\partial\emptyset/\partial x, v = -\partial\emptyset/\partial y$ d) None of the above

5) The Venturi meter is advantageous because _____.
a) it has a much smaller head loss
b) its accuracy is quite good
c) its coefficient of discharge is more than for an orifice meter
d) All the above

6) Total Energy Line is always _____ Hydraulic Gradient Line.
a) above b) below
c) parallel to d) None of the above

7) Darcy - Weisbach equation is used to find loss of head due to _____.
a) Friction
b) Sudden enlargement
c) Sudden contraction
d) All of the above

8) The velocity of water in an open channel can be measured by _____.
a) Venturimeter
b) Rotameter
c) Pitot tube
d) Orifice plate

9) The Buckingham-Pi theorem is widely used in the dimensional analysis and expresses the resulting equation in terms of _____.
a) the dependent and independent variables
b) n dimensionless parameters
c) (n - m) dimensionless parameters
d) geometric, kinematic and dynamic variables

10) The process of filling the liquid into the suction pipe and the pump casing up to the level of the delivery valve is called _____.
a) filling
b) pumping
c) priming
d) leveling

11) The turbine preferred for 50 m to 250 m head of water is _____.
a) Pelton wheel
b) Kaplan turbine
c) Tube turbine
d) Francis turbine

12) Design of Pelton wheel means the following data is to be determined _____.
a) Width of buckets
b) Number of buckets
c) Depth of buckets
d) All of the mentioned

13) In a centrifugal pump, the liquid enters the pump _____.
a) at the top
b) at the bottom
c) at the centre
d) from sides

14) The fundamental dimension of kinematic viscosity is _____.
a) $M^1L^1T^{-1}$
b) $M^2L^2T^{-1}$
c) $M^3L^1T^1$
d) $M^0L^2T^{-1}$

Set **P**

S.Y. (B.Tech.) (Mechanical Engineering) (Semester - II) (New) (CBCS)
Examination: March/April – 2026
Fluid Mechanics and Fluid Machines (MECHPCC-06)

Day & Date: Thursday, 21-05-2026 Max. Marks: 56
Time: 10:00 AM To 01:00 PM

Instructions: 1) Solve any two questions from each section.
2) Use of scientific calculator is allowed.
3) Figures to the right indicate full marks.
4) Assume additional suitable data if necessary and state it clearly.
5) Use university graph paper & semi-log paper if required.

Section – I

Q.2 Solve the following.

a) With neat sketch explain the conditions of the equilibrium for floating body. **04**

b) Derive an expression for total pressure and center of pressure on a vertical plane surface immersed in a static liquid. **05**

c) A rectangular plane surface 2 m wide and 3 m deep lies in water in such a way that its plane makes an angle of 30° with the free surface of water. Determine the total pressure and position of center of pressure when the upper edge of the plate is 1.5 m below the free water surface. **05**

Q.3 Solve the following.

a) What are the different types of fluid flow? Explain with an example. **05**

b) What is a venturi meter? Explain with neat sketch. **04**

c) The velocity vector in fluid flow is given by: **05**
$V = 4x^3 i - 10x^2 yj + 2tk$
Find velocity and acceleration of fluid particle at (2,1,3) at time t = 1

Q.4 a) Explain the different losses that occur in the pipeline connection, with the help of formulae. **05**

b) Derive the Darcy-Weisbach equation for finding loss of head due to friction in pipes. **04**

c) The difference in water surface levels in two tanks, which are connected by three pipes in series of lengths 300 m, 170 m and 210 m and of diameters 300 mm, 200 mm and 400 mm respectively, is 12 m. Determine the rate of flow of water if the coefficient of friction are 0.005, 0.0052 and 0.0048 respectively, by neglecting minor losses. **05**

Section – II

Q.5 Solve the following.

a) The resisting force (R) of a supersonic flight can be considered as dependent upon length of aircraft (l), velocity (V), air viscosity (μ), air density (ρ), and bulk modulus of air (K). Obtain the functional relationship between these variables and the resisting force. **05**

b) Explain the terms **04**

i) Drag

ii) Lift

c) How do you classify water turbines? **05**

Q.6 a) A Pelton wheel is to be designed for the following specifications: Shaft power = 11,772 kW; Head = 380 meters; Speed = 750 r.p.m.; Overall efficiency = 86%; Jet diameter is not to exceed one - sixth of the wheel diameter. **05**

Determine:

i) The wheel diameter

ii) The number of jets required, and

iii) Diameter of Jet

Take Cv = 0.985 and Ku = 0.45

b) State the difference between Impulse Turbine and Reaction Turbine. **05**

c) By means of neat sketch explain the governing mechanism of Pelton turbine. **04**

Q.7 a) A Francis turbine works at 450 rpm under a head of 120 m. The diameter of runner at inlet is 1.2 m and flow area of 0.4 m^2. At the inlet the absolute and relative velocities make an angle of 20° and 60° respectively with tangential velocity. **05**

Determine:

i) The volume flow rate

ii) runner power and

iii) hydraulic efficiency

Assume the velocity of whirl at the outlet to be zero.

b) Derive the minimum starting speed of centrifugal pump. **04**

c) Explain multistage pumps. **05**

$V = 4x^3 i - 10x^2 yj + 2tk$
Find velocity and acceleration of fluid particle at (2,1,3) at time t = 1

Q.4 a) Explain the different losses that occur in the pipeline connection, with the help of formulae. **05**

b) Derive the Darcy-Weisbach equation for finding loss of head due to friction in pipes. **04**

c) The difference in water surface levels in two tanks, which are connected by three pipes in series of lengths 300 m, 170 m and 210 m and of diameters 300 mm, 200 mm and 400 mm respectively, is 12 m. Determine the rate of flow of water if the coefficient of friction are 0.005, 0.0052 and 0.0048 respectively, by neglecting minor losses. **05**

Section – II

Q.5 Solve the following.

a) The resisting force (R) of a supersonic flight can be considered as dependent upon length of aircraft (l), velocity (V), air viscosity (μ), air density (ρ), and bulk modulus of air (K). Obtain the functional relationship between these variables and the resisting force. **05**

b) Explain the terms **04**

i) Drag

ii) Lift

c) How do you classify water turbines? **05**

Q.6 a) A Pelton wheel is to be designed for the following specifications: Shaft power = 11,772 kW; Head = 380 meters; Speed = 750 r.p.m.; Overall efficiency = 86%; Jet diameter is not to exceed one - sixth of the wheel diameter. **05**

Determine:

i) The wheel diameter

ii) The number of jets required, and

iii) Diameter of Jet

Take Cv = 0.985 and Ku = 0.45

b) State the difference between Impulse Turbine and Reaction Turbine. **05**

c) By means of neat sketch explain the governing mechanism of Pelton turbine. **04**

Q.7 a) A Francis turbine works at 450 rpm under a head of 120 m. The diameter of runner at inlet is 1.2 m and flow area of 0.4 m^2. At the inlet the absolute and relative velocities make an angle of 20° and 60° respectively with tangential velocity. **05**

Determine:

i) The volume flow rate

ii) runner power and

iii) hydraulic efficiency

Assume the velocity of whirl at the outlet to be zero.

b) Derive the minimum starting speed of centrifugal pump. **04**

c) Explain multistage pumps. **05**

S.Y. (B.Tech.) (Mechanical Engineering) (Semester - II) (New) (CBCS)
Examination: March/April – 2026
Fluid Mechanics and Fluid Machines (MECHPCC-06)

Day & Date: Thursday, 21-05-2026 Max. Marks: 70
Time: 10:00 AM To 01:00 PM

Instructions: 1) Q. No. 1 is compulsory. It should be solved in the first 30 minutes in Answer Book Page no 03 (Starting page of the Answer Book). Each question carries one mark.
2) Don't forget to Mention question paper set (P/Q/R/S) on top of page.
3) Figures to the right indicates full marks.
4) Assume additional suitable data if necessary and state it clearly.

MCQ/Objective Type Questions

Duration: 30 Minutes Marks:14

Q.1 Choose the correct answer: **14**

1) The turbine preferred for 50 m to 250 m head of water is _____.
a) Pelton wheel b) Kaplan turbine
c) Tube turbine d) Francis turbine

2) Design of Pelton wheel means the following data is to be determined _____.
a) Width of buckets b) Number of buckets
c) Depth of buckets d) All of the mentioned

3) In a centrifugal pump, the liquid enters the pump _____.
a) at the top b) at the bottom
c) at the centre d) from sides

4) The fundamental dimension of kinematic viscosity is _____.
a) $M^1L^1T^{-1}$ b) $M^2L^2T^{-1}$
c) $M^3L^1T^1$ d) $M^0L^2T^{-1}$

5) Kaplan turbine is _____.
a) Tangential flow b) Radial flow
c) Axial flow d) Mixed flow

6) The S.I. unit of total pressure on a plane immersed surface is _____.
a) Newton per meter square b) Newton
c) Newton square per meter d) Newton per meter cube

7) Buoyancy acts on a floating body _____.
a) vertically upward
b) horizontally
c) vertically downward
d) both vertically upward and horizontally

8) If $\emptyset$ is a potential in two-dimensional flow the velocity components u and v are defined as _____.

a) $u = \partial\emptyset/\partial y, v = \partial\emptyset/\partial x$ b) $u = \partial\emptyset/\partial x, v = \partial\emptyset/\partial y$

c) $u = -\partial\emptyset/\partial x, v = -\partial\emptyset/\partial y$ d) None of the above

9) The Venturi meter is advantageous because _____.

a) it has a much smaller head loss
b) its accuracy is quite good
c) its coefficient of discharge is more than for an orifice meter
d) All the above

10) Total Energy Line is always _____ Hydraulic Gradient Line.

a) above b) below
c) parallel to d) None of the above

11) Darcy - Weisbach equation is used to find loss of head due to _____.

a) Friction b) Sudden enlargement
c) Sudden contraction d) All of the above

12) The velocity of water in an open channel can be measured by _____.

a) Venturimeter b) Rotameter
c) Pitot tube d) Orifice plate

13) The Buckingham-Pi theorem is widely used in the dimensional analysis and expresses the resulting equation in terms of _____.

a) the dependent and independent variables
b) n dimensionless parameters
c) (n - m) dimensionless parameters
d) geometric, kinematic and dynamic variables

14) The process of filling the liquid into the suction pipe and the pump casing up to the level of the delivery valve is called _____.

a) filling b) pumping
c) priming d) leveling

MCQ/Objective Type Questions

Duration: 30 Minutes Marks:14

Q.1 Choose Correct answer MCQ/ Objective Questions. 14

1) Innovation provides _____.
a) Stability b) Competitive advantage
c) Similarity d) Confusion

2) Managerial competency involves _____.
a) Fundraising only
b) Communication, planning, and leadership
c) Imitation
d) None

3) Entrepreneurship as a style of management focuses on _____.
a) Routine activities
b) Risk avoidance
c) Innovation and opportunity recognition
d) Only HR

4) A corporate entrepreneur is _____.
a) Owner of small business
b) Government employee
c) Innovator within an organization
d) None

5) Technology transfer occurs when _____.
a) Knowledge is shared from research to application
b) Patents expire
c) Innovation fails
d) Licenses are revoked

6) Six Thinking Hats tool was developed by _____.
a) Peter Drucker
b) Steve Jobs
c) Edward de Bono
d) Clayton Christensen

7) NUF test stands for _____.
a) Necessary, Useful, Feasible
b) Need, Use, Focus
c) None
d) Necessary, Unusual, Functional

8) Which is not a type of innovation strategy?
a) Pioneering
b) Imitative
c) Disruptive
d) Delaying

9) Red Ocean strategy is about _____.
a) Uncontested markets
b) Price competition in saturated markets
c) Patent generation
d) Blue economy

10) Continuous learning is essential for _____.
a) Innovation growth
b) Routine operations
c) Cost reduction
d) Project closure

11) Failure in innovation can occur due to _____.
a) Over-regulation
b) Poor planning
c) Lack of feedback
d) All of these

12) Crafting a business model involves _____.
a) Ignoring customers
b) Defining value, segments, and revenue streams
c) Random investments
d) Borrowing

13) Legal consideration in entrepreneurship includes _____.
a) Product packaging
b) Compliance and regulations
c) Floor layout

5) Use of non-programmable calculator is allowed.

SECTION – I

Q.2 All questions are compulsory.

a) Explain types of innovation with suitable examples. **06**

b) Define Entrepreneur. Discuss key roles and responsibilities. **04**

Q.3 Solve Any Three questions.

a) Describe relationship between innovation and competitive advantage. **06**

b) Explain entrepreneurship as a career and style of management. **06**

c) Explain the concepts of Entrepreneur, Manager, and Intrapreneur. Differentiate between them with suitable examples. **06**

d) What are the seven sources of innovative opportunities? **06**

e) Explain creative methods for managing innovation. **06**

SECTION – II

Q.4 All questions are compulsory.

a) Explain the concept of innovation process. **06**

b) Discuss barriers to innovation in business. **04**

Q.5 Solve Any Three question.

a) Write note on Blue Ocean Strategy with example. **06**

b) Describe innovation failure causes. **06**

c) Explain the Lean Start-up concept. **06**

d) What are ethical and legal considerations for entrepreneurs? **06**

e) Explain opportunity recognition and decision-making in entrepreneurship. **06**

S.Y. (B. Tech) (Mechanical Engineering) (Semester - II) (New) (CBCS) Examination: March/April - 2026
Entrepreneurship and Innovation (OE-02A)

Day & Date: Friday, 22-05-2026 Max. Marks: 70
Time: 03:00 PM To 06:00 PM

Instructions: 1) Q. No. 1 is compulsory. It should be solved in the first 30 minutes in Answer Book Page no 03 (Starting page of the Answer Book). Each question carries one mark.
2) Don't forget to Mention question paper set (P/Q/R/S) on top of page.
3) Figures to the right indicates full marks.
4) Assume suitable data if necessary and mention it clearly.

MCQ/Objective Type Questions

Duration: 30 Minutes Marks:14

Q.1 Choose Correct answer MCQ/ Objective Questions. 14

1) Six Thinking Hats tool was developed by _____.
a) Peter Drucker b) Steve Jobs
c) Edward de Bono d) Clayton Christensen

2) NUF test stands for _____.
a) Necessary, Useful, Feasible
b) Need, Use, Focus
c) None
d) Necessary, Unusual, Functional

3) Which is not a type of innovation strategy?
a) Pioneering b) Imitative
c) Disruptive d) Delaying

4) Red Ocean strategy is about _____.
a) Uncontested markets
b) Price competition in saturated markets
c) Patent generation
d) Blue economy

5) Continuous learning is essential for _____.
a) Innovation growth b) Routine operations
c) Cost reduction d) Project closure

6) Failure in innovation can occur due to _____.
a) Over-regulation b) Poor planning
c) Lack of feedback d) All of these

7) Crafting a business model involves _____.
   a) Ignoring customers
   b) Defining value, segments, and revenue streams
   c) Random investments
   d) Borrowing

8) Legal consideration in entrepreneurship includes _____.
   a) Product packaging
   b) Compliance and regulations
   c) Floor layout
   d) Office color

9) Entrepreneurial process starts with _____.
   a) HR hiring
   b) Opportunity identification
   c) Revenue calculation
   d) Market monopoly

10) Innovation provides _____.
   a) Stability
   b) Competitive advantage
   c) Similarity
   d) Confusion

11) Managerial competency involves _____.
   a) Fundraising only
   b) Communication, planning, and leadership
   c) Imitation
   d) None

12) Entrepreneurship as a style of management focuses on _____.
   a) Routine activities
   b) Risk avoidance
   c) Innovation and opportunity recognition
   d) Only HR

13) A corporate entrepreneur is _____.
   a) Owner of small business
   b) Government employee
   c) Innovator within an organization
   d) None

14) Technology transfer occurs when _____.
   a) Knowledge is shared from research to application
   b) Patents expire
   c) Innovation fails
   d) Licenses are revoked

MCQ/Objective Type Questions

Duration: 30 Minutes Marks:14

Q.1 Choose the correct alternative: **14**

1) Which of the following is a key goal of sustainable development?
a) Increase in fossil fuel consumption
b) Balanced use of resources
c) Maximum economic growth only
d) Eliminating renewable energy use

2) What is a key characteristic of solar energy?
a) Utilizes sunlight for power generation
b) Requires fossil fuels for operation
c) Has no environmental benefits
d) ls non-renewable

3) Which renewable energy is best suited for coastal areas?
a) Biomass energy b) Geothermal energy
c) Wave and tidal energy d) Oil shale energy

4) What is solar radiation?
a) Radiation from the Earth b) Radiation from the Moon
c) Radiation from the Sun d) None of the above

5) What is solar radiation measured in?
a) Kilograms
b) Liters
c) Watts per square meter (W/m^2)
d) Newtons

6) What is the primary difference between pyrolysis and gasification?
   a) Gasification uses a small amount of oxygen, while pyrolysis occurs in the absence of oxygen
   b) Pyrolysis produces syngas, while gasification produces bio-oil
   c) Gasification is a biochemical process, while pyrolysis is thermo chemical
   d) Pyrolysis requires higher temperatures than gasification

7) Which of the following is a disadvantage of biomass energy?
   a) Reduces waste
   b) Can lead to deforestation
   c) Low carbon footprint
   d) Independent of weather conditions

8) What happens when electricity demand is higher than generation?
   a) Energy storage can provide additional power
   b) Renewable energy sources produce more electricity
   c) Power plants automatically increase supply
   d) Transmission lines store energy

9) Which of the following sectors benefits the most from energy storage?
   a) Agriculture
   b) Construction
   c) Transport
   d) Power generation

10) What does the efficiency of an energy storage device indicate?
   a) The time taken to store energy
   b) The total cost of the device
   c) The percentage of stored energy that can be retrieved
   d) The size of the storage system

11) In hydro power stations what is an enlarged body of water just above the intake and used as a regulating reservoir called?
   a) Penstock
   b) Reservoir
   c) Fore bay
   d) Spillways

12) Tidal energy is caused primarily by the _____.
   a) Moon's gravity
   b) Sun's gravity
   c) Earth's rotation
   d) Ocean currents

13) Green hydrogen is produced by _____.
   a) Coal gasification
   b) Methane reforming
   c) Water electrolysis using renewable energy
   d) Nuclear fission

14) Which is the cleanest method of hydrogen production?
   a) Electrolysis using solar/wind energy
   b) Coal gasification
   c) Nuclear thermal splitting
   d) Steam methane reforming

Set P

S.Y. (B. Tech) (Mechanical Engineering) (Semester - II) (New) (CBCS) Examination: March/April - 2026
Measurement, Instrumentation and Sensors (OE-02D)

Day & Date: Friday, 22-05-2026 Max. Marks: 70
Time: 03:00 PM To 06:00 PM

Instructions: 1) Q. No. 1 is compulsory. It should be solved in the first 30 minutes in Answer Book Page no 03 (Starting page of the Answer Book). Each question carries one mark
2) Don't forget to Mention question paper set (P/Q/R/S) on top on page.
3) Figures to the right indicates full marks.
4) Assume suitable data if necessary.

MCQ/Objective Type Questions

Duration: 30 Minutes Marks:14

Q.1 Choose the correct answer. **14**

1) Which of the following is not a type of systematic error?
a) Instrumental Errors b) Environmental Errors
c) Observational Errors d) Gross error

2) _____ instruments are those which measure the total quantity of electricity delivered in a particular time.
a) Absolute b) Indicating
c) Recording d) Integrating

3) A moving iron instrument can be used for _____.
a) D.C. only b) A.C. only
c) Both D.C. and A.C. d) None

4) _____ method is suitable for the measurement of a resistance of expected value less than one ohm.
a) Substitution b) Loss of charge
c) Wheatstone bridge d) Kelvin's double bridge

5) Instrument transformers are _____.
a) Potential transformers b) Current transformers
c) Both (a) and (b) d) Power transformers

6) In a DSO, the input signals are _____.
   a) directly applied to oscilloscope
   b) multiplexed, converted to digital form and stored and applied to oscilloscope
   c) multiplexed, converted to digital form stored, converted to analog form and applied to oscilloscope
   d) applied to amplifier, stored as analog signals, multiplexed, converted to digital form, stored in digital form, converted to analog form, and applied to CRO through an amplifier.

7) The power of n-phase unbalanced circuit can be measured by using a minimum of _____.
   a) n wattmeters
   b) (n + 1) wattmeters
   c) (n - 2) wattmeters
   d) (n - 1) wattmeters

8) Which transducer does not require any external power supply for working?
   a) Strain gauge transducer
   b) Piezoelectric Crystals
   c) Hydraulic transducer
   d) Pneumatic transducer

9) Piezoelectric accelerometer converts _____ energy to _____ energy.
   a) mechanical, sound
   b) mechanical, electrical
   c) sound, electrical
   d) None of these

10) Which factor affects the least while selection of sensor?
   a) Size
   b) Accuracy
   c) Colour
   d) Durability

11) Which sensor should be used for calculating pressure?
   a) DHT11
   b) LM335Z/NOPB
   c) HC-SR04
   d) MPX10DP

12) Which of the following represents range of frequency measured by ADC?
   a) Bandwidth
   b) Threshold frequency
   c) Peak frequency
   d) None of the mentioned

13) Thermistor is a _____.
   a) sensor
   b) ADC
   c) transducer
   d) micro controller

14) Which of the following type output is provided by ADC?
   a) Serial type
   b) Parallel type
   c) Both serial and parallel type
   d) None of the mentioned

Seat No.	

Set **P**

S.Y. (B. Tech) (Mechanical Engineering) (Semester - II) (New) (CBCS) Examination: March/April - 2026
Measurement, Instrumentation and Sensors (OE-02D)

Day & Date: Friday, 22-05-2026 Max. Marks: 56
Time: 03:00 PM To 06:00 PM

Instructions: 1) All questions are compulsory.
2) Figures to the right indicate full marks.
3) Assume suitable data if necessary.
4) Draw neat diagrams whenever necessary.

SECTION – I

Q.2 Attempt the following. (Any Four) **16**

a) Explain the term:
i) Accuracy
ii) Linearity
iii) Reproducibility
iv) Precision

b) Describe different damping methods in details.

c) Difference between Current Transformer and Potential Transformer.

d) Explain with neat diagram, working of ramp type digital voltmeter.

e) Explain Anderson Bridge with phasor diagram. Also derive the equation of dissipation factor.

Q.3 Attempt the following. (Any Two) **12**

a) Draw the equivalent circuit and phasor diagram of a PT. Derive expression for actual transformation ratio.

b) Explain the method of measurement of power using two wattmeter for balanced load. Also derive the equation of power factor.

c) A bridge consists of the following:
Arm ab: - A choke coil having resistance R1 & amp: inductance L1
Arm bc: - A non-inductive resistance R3
Arm cd: - A mica condenser C4 in series with non-inductive resistance R4
Arm da: - A non-inductive resistance R2
When this bridge fed from a source of 500 Hz, balance is obtained under following Conditions. $R2 = 2410\ \Omega$, $R3 = 750\ \Omega$, $C4 = 0.35\ \mu F$, $R4 = 64.5\ \Omega$ The series resistance of capacitor is 0.4Ω. Calculate resistance and Inductance of choke coil. The supply is connected between a & c and detector is between b & d.

SECTION – II

Q.4 Attempt the following. (Any Four) **16**

a) Explain units of measurement.

b) Explain the principle of working of piezo-electric effect sensor.

c) Explain the basic concept of analog to digital converter.

d) Explain the sensor interfacing circuit's data transmission.

e) State the different types of temperature sensor and explain any one of them.

Q.5 Attempt the following. (Any Two) **12**

a) State and explain the different types of batteries for low power sensors.

b) Stale and explain the sensors used for Displacement, and Level application.

c) Explain the concept of humidity and state different types of sensor used to measure humidity.

MCQ/Objective Type Questions

Duration: 30 Minutes Marks:14

Q.1 Choose the correct answers from the given options. 14

1) When total supply = total demand, the transportation problem is called _____.
a) Balanced b) Equated
c) Simple d) Zero

2) Which technique is used to solve Assignment Model?
a) Hungarian Method b) Graphical Method
c) Simplex Method d) Integer Programming

3) Allocated cells in the IBFS are also called as _____.
a) Stone Cells b) Water Cells
c) Air Cells d) None of these

4) To convert Maximization Assignment Model into Minimization, _____.
a) Multiply Whole matrix by (-1)
b) Subtract Entire Matrix from Highest Cell
c) Both a & b
d) None of these

5) Advantage of VAM of transportation is _____.
a) Near to optimal Solution b) Least Cost
c) Faster Solution d) Slower Solution

6) Transportation Models are also called as _____.
a) Probabilistic Model b) Distribution Model
c) Game Theory d) Assignment Model

7) ABC analysis considers _____.
a) Total consumption of items b) Total amount of items
c) Both a) and b) d) None of these

8) At the Break-Even Point _____.
a) Profit > Loss
b) Profit < Loss
c) Profit = Loss
d) None of these

9) The PERT in project management means Program Evaluation and _____ Technique.
a) Resource
b) Reconciliation
c) Reconsideration
d) Review

10) _____ stock is the lower limit of stock below which the stock should not be allowed to fall.
a) Maximum
b) Average
c) Safety
d) Standard

11) Optimization Means _____.
a) Maximization
b) Minimization
c) Minimization or Maximization
d) Mean of Minimization & Maximization

12) A feasible solution to LPP _____.
a) Must satisfy all the constraints simultaneously
b) Need not satisfy all the constraints
c) Must be a corner point of feasible region
d) Must optimize the objective function

13) In a project network, the critical path _____.
a) may be the shortest path
b) is the longest path
c) may be the longest path
d) is the shortest path

14) The inventory carrying costs are also called as _____.
a) Procurement costs
b) Set-up costs
c) Storage costs
d) None of the above

Seat No.	

Set **P**

S.Y. (B. Tech) (Mechanical Engineering) (Semester - II) (New) (CBCS) Examination: March/April - 2026
Operation Research (OE-02E)

Day & Date: Friday, 22-05-2026 Max. Marks: 56
Time: 03:00 PM To 06:00 PM

Instructions: 1) Solve any two questions from each Section.
2) Figures to the right indicates full marks.
3) Assume suitable data wherever necessary and mention it clearly.
4) Use of non-programmable calculator is allowed.

SECTION – I

Q.2 Solve both. **14**

a) Using Graphical method, solve
Maximize $Z = 2X_1 + 3X_2$
Subject to, $X_1 + X_2 \leq 30$;
$X_1 - X_2 \geq 0$;
$X_2 \geq 3$;
$0 \leq X_1; \leq 20$;
$0 \leq X_2; \leq 12$;

b) Consider the assignment problem to as shown in table, in this problem 4 supply jobs are to be assigned to four different sub assembly. Solve assignment problem by using Hungarian method.

Sub Assembly	Supply			
	i	ii	iii	iv
1	15	13	14	17
2	11	12	15	13
3	13	12	10	11
4	15	17	14	16

Q.3 Solve both. **14**

a) Find the initial basic feasible solution by NWCM.

	Destination				
	D_1	D_2	D_3	D_4	↓ Supply
S_1	5	3	6	4	30
S_2	3	4	7	8	15
S_3	9	6	5	8	15
Demand →	10	25	18	7	

b) Write in brief on application & advantages of Operational Research.

Q.4 Solve both. **14**

a) What is LPP? What are different components of LPP?

b) How assignment model is useful in practical life? Explain with its steps to solve it.

SECTION – II

Q.5 Solve both. **14**

a) Calculate the value of Economic Order Quantity, Reordering Period, No. of orders per year with the following Data, Annual Usages = 50 Units, Procurement Cost = 15 Rs. Per Order, Unit Cost = 100 Rs. /Item, Inventory Caring Cost = 10% of the unit cost.

b) Define 'Inventory Control' and explain its necessity in the construction industry. Detailed the various types of Inventory Costs involved in maintaining inventory on a site.

Q.6 Solve both. **14**

a) Draw network, find out CP & PD. Calculate All floats of each non-critical Activity.

Activity	$1-2$	$2-3$	$2-4$	$3-4$	$3-5$	$4-6$	$5-6$
Time (Days)	14	13	16	15	18	23	15

b) A small project consists of seven activities. The time estimates in weeks of different activities are given below. Find out probability of completing the project in 18 weeks.

Activity	Estimated Time		
	to	tm	tp
$1-2$	1	1	7
$1-3$	1	4	7
$1-4$	2	2	8
$2-5$	1	1	1
$3-5$	2	5	14
$4-6$	2	5	8
$5-6$	3	6	15

Probability Factor	Probability
0	50%
1	84.13 %
2	97.72 %
3	99.87 %

Q.7 Solve both. **14**

a) Write short notes on:

i) Processing N jobs on one machine (SPT and WSPT rules)

ii) No passing rule in sequencing

b) Explain Sequencing Problem Technique. What are its Different Elements, also elaborate its assumptions?

SLR-QH-63

Seat No.		Set	Q

S.Y. (B. Tech) (Mechanical Engineering) (Semester - II) (New) (CBCS) Examination: March/April - 2026
Operation Research (OE-02E)

Day & Date: Friday, 22-05-2026 Max. Marks: 70
Time: 03:00 PM To 06:00 PM

Instructions: 1) Q. No. 1 is compulsory. It should be solved in the first 30 minutes in Answer Book Page no 03 (Starting page of the Answer Book). Each question carries one mark.
2) Don't forget to Mention question paper set (P/Q/R/S) on top on page.
3) Figures to the right indicates full marks.
4) Assume suitable data wherever necessary and mention it clearly.

MCQ/Objective Type Questions

Duration: 30 Minutes Marks:14

Q.1 Choose the correct answers from the given options. 14

1) At the Break-Even Point _____.
a) Profit > Loss b) Profit < Loss
c) Profit = Loss d) None of these

2) The PERT in project management means Program Evaluation and _____ Technique.
a) Resource b) Reconciliation
c) Reconsideration d) Review

3) _____ stock is the lower limit of stock below which the stock should not be allowed to fall.
a) Maximum b) Average
c) Safety d) Standard

4) Optimization Means _____.
a) Maximization
b) Minimization
c) Minimization or Maximization
d) Mean of Minimization & Maximization

5) A feasible solution to LPP _____.
a) Must satisfy all the constraints simultaneously
b) Need not satisfy all the constraints
c) Must be a corner point of feasible region
d) Must optimize the objective function

6) In a project network, the critical path _____.
a) may be the shortest path b) is the longest path
c) may be the longest path d) is the shortest path

7) The inventory carrying costs are also called as _____.
a) Procurement costs b) Set-up costs
c) Storage costs d) None of the above

8) When total supply = total demand, the transportation problem is called _____.
a) Balanced b) Equated
c) Simple d) Zero

9) Which technique is used to solve Assignment Model?
a) Hungarian Method b) Graphical Method
c) Simplex Method d) Integer Programming

10) Allocated cells in the IBFS are also called as _____.
a) Stone Cells b) Water Cells
c) Air Cells d) None of these

11) To convert Maximization Assignment Model into Minimization, _____.
a) Multiply Whole matrix by (−1)
b) Subtract Entire Matrix from Highest Cell
c) Both a & b
d) None of these

12) Advantage of VAM of transportation is _____.
a) Near to optimal Solution b) Least Cost
c) Faster Solution d) Slower Solution

13) Transportation Models are also called as _____.
a) Probabilistic Model b) Distribution Model
c) Game Theory d) Assignment Model

14) ABC analysis considers _____.
a) Total consumption of items b) Total amount of items
c) Both a) and b) d) None of these

Set **Q**

S.Y. (B. Tech) (Mechanical Engineering) (Semester - II) (New) (CBCS) Examination: March/April - 2026
Operation Research (OE-02E)

Day & Date: Friday, 22-05-2026 Max. Marks: 56
Time: 03:00 PM To 06:00 PM

Instructions: 1) Solve any two questions from each Section.
2) Figures to the right indicates full marks.
3) Assume suitable data wherever necessary and mention it clearly.
4) Use of non-programmable calculator is allowed.

SECTION – I

Q.2 Solve both. **14**

a) Using Graphical method, solve
Maximize $Z = 2X_1 + 3X_2$
Subject to, $X_1 + X_2 \leq 30$;
$X_1 - X_2 \geq 0$;
$X_2 \geq 3$;
$0 \leq X_1; \leq 20$;
$0 \leq X_2; \leq 12$;

b) Consider the assignment problem to as shown in table, in this problem 4 supply jobs are to be assigned to four different sub assembly. Solve assignment problem by using Hungarian method.

Sub Assembly	Supply			
	i	ii	iii	iv
1	15	13	14	17
2	11	12	15	13
3	13	12	10	11
4	15	17	14	16

Q.3 Solve both. **14**

a) Find the initial basic feasible solution by NWCM.

	Destination				
	D_1	D_2	D_3	D_4	↓ Supply
S_1	5	3	6	4	30
S_2	3	4	7	8	15
S_3	9	6	5	8	15
Demand →	10	25	18	7	

b) Write in brief on application & advantages of Operational Research.

Q.4 Solve both. **14**

a) What is LPP? What are different components of LPP?

b) How assignment model is useful in practical life? Explain with its steps to solve it.

SECTION – II

Q.5 Solve both. **14**

a) Calculate the value of Economic Order Quantity, Reordering Period, No. of orders per year with the following Data, Annual Usages = 50 Units, Procurement Cost = 15 Rs. Per Order, Unit Cost = 100 Rs. /Item, Inventory Caring Cost = 10% of the unit cost.

b) Define 'Inventory Control' and explain its necessity in the construction industry. Detailed the various types of Inventory Costs involved in maintaining inventory on a site.

Q.6 Solve both. **14**

a) Draw network, find out CP & PD. Calculate All floats of each non-critical Activity.

Activity	$1-2$	$2-3$	$2-4$	$3-4$	$3-5$	$4-6$	$5-6$
Time (Days)	14	13	16	15	18	23	15

b) A small project consists of seven activities. The time estimates in weeks of different activities are given below. Find out probability of completing the project in 18 weeks.

Activity	Estimated Time		
	to	tm	tp
$1-2$	1	1	7
$1-3$	1	4	7
$1-4$	2	2	8
$2-5$	1	1	1
$3-5$	2	5	14
$4-6$	2	5	8
$5-6$	3	6	15

Probability Factor	Probability
0	50%
1	84.13 %
2	97.72 %
3	99.87 %

Q.7 Solve both. **14**

a) Write short notes on:

i) Processing N jobs on one machine (SPT and WSPT rules)

MCQ/Objective Type Questions

Duration: 30 Minutes Marks:14

Q.1 Choose the correct alternative from the options. **14**

1) A transcendental equation is an equation that involves _____.
a) Only algebraic terms
b) Only transcendental functions
c) Both algebraic and transcendental functions
d) Linear terms only

2) The interval in which a real root of the equation $x^3 - 2x - 5 = 0$ lies is _____.
a) $(1, 2)$ b) $(0, 1)$
c) $(2, 3)$ d) $(3, 4)$

3) The Gauss-Seidel method is used for solving _____.
a) Nonlinear equations b) Systems of linear equations
c) Ordinary differential equations d) Partial differential equations

4) Which of the following is a disadvantage of the Gauss-Jacobi method?
a) It converges faster than most direct methods
b) It requires a large number of iterations for a good approximation
c) It cannot be used for systems with more than two equations
d) It works only for symmetric systems

5) The use of Romberg's method is _____.
a) To solve simultaneous linear equation
b) To find root of linear equation
c) To evaluate definite integration
d) To find the Eigen values

6) The order of convergence of Newton-Raphson method is _____.
a) 1 b) 2
c) $\sqrt{2}$ d) 1.6

7) Power Method is used to find _____.
a) Negative Eigen Value b) Largest Eigen value
c) Positive Eigen Value d) None of these

8) To find the numerically largest Eigen value using iterative method we use the equation _____.
a) $A = \lambda X$ b) $AX = X$
c) $X = \lambda X$ d) $AX = \lambda X$

9) If $dy/dx = x - y$ and $y(0) = 1$, then by Picard's method the value of $y_1(1)$ is _____.
a) 0.905 b) 1.905
c) 2.905 d) None

10) Runge-Kutta method is self-starting method _____.
a) True b) False
c) We can't say d) None

11) The Newton's forward interpolation formula is generally preferred when data points are _____.
a) Unequally spaced
b) Equally spaced and near the beginning
c) Equally spaced and near the end
d) Randomly spaced

12) In the power method, the vector is normalized in each iteration mainly to _____.
a) increase the determinant
b) prevent values from becoming too large
c) eliminate eigen values
d) make the matrix symmetric

13) Simpson's $3/8$ rule requires the number of sub-intervals to be _____.
a) multiple of 2 b) multiple of 3
c) multiple of 4 d) odd only

14) Picard's method is mainly used to solve _____.
a) linear programming problems b) differential equations
c) eigen value problems d) interpolation problems

Seat No.	

Set **P**

S.Y. (B. Tech) (Mechanical Engineering) (Semester - II) (New) (CBCS) Examination: March/April - 2026
Computational Mathematics (OE-02F)

Day & Date: Friday, 22-05-2026 Max. Marks: 56
Time: 03:00 PM To 06:00 PM

Instructions: 1) All questions are compulsory.
2) Figures to the right indicate full marks.
3) Assume suitable data where necessary.

SECTION – I

Q.2 Attempt Any Five: **25**

a) Find the double root of the equation $x^3 - 5.4x^2 + 9.24x - 5.096 = 0$ given that it is nearer to 1.5.

b) Solve the system of equations by Jacobi's iterative method (perform 3 iterations):
$27x + 6y - z = 85,$
$6x + 15y + 2z = 72,$
$x + y + 54z = 110$

c) Find positive real root of the equation $x\sin(x) + \cos(x) = 0$ using Newton-Raphson method correct to 3 decimal places.

d) Solve the system of equations by using Gauss-Elimination method:
$2x + y + z = 7,$
$x + 2y + 3z = 14,$
$3x + 4y + z = 14.$

e) Solve the following system of equations using LU Decomposition method:
$2x + 3y + z = 9$
$x + 2y + 3z = 6$
$3x + y + 2z = 8$

f) Solve $\frac{dy}{dx} = x + y$ with $x_0 = 0, y_0 = 1$ using fourth-order Runge-Kutta method and find approximate value of y when $x = 0.2$

g) Solve $\frac{dy}{dx} = 1 + xy$ with $y(0) = 1$ using Picard's method take first approximation and find y for $x = 0.1$

Q.3 Attempt Any One. **03**

a) Solve the system by Gauss-Seidel method (Perform 4 iterations):

$10x + y + z = 12$

$2x + 10y + z = 13$

$2x + 2y + 10z = 14$

b) Use Newton-Raphson method to find a root of the equation $x^4 - x - 10 = 0$ which is near to $x = 2$. Perform 3 iterations correct to three decimal places.

SECTION – II

Q.4 Attempt Any Five. **25**

a) Approximate $\int_1^3 \frac{1}{x} dx$ using the composite trapezoidal rule with $n = 4$ sub-intervals. List the function values at the nodes, show the application of the formula, and give the final answer correct to 4 decimal places

b) Using Jacobi's method, find all eigenvalues and eigenvectors of the symmetric matrix:

$$A = \begin{bmatrix} 6 & 2 & 1 \\ 2 & 5 & 2 \\ 1 & 2 & 4 \end{bmatrix}$$

c) Evaluate the integral $\int_{-1}^{1} \frac{dx}{1+x^2}$ using Gaussian 3-point Quadrature formula.

d) Find the dominant eigenvalue and the corresponding eigenvector of the matrix

$$A = \begin{bmatrix} 4 & 1 & 1 \\ 1 & 3 & 1 \\ 1 & 1 & 2 \end{bmatrix}$$ using the Power Method.

Perform 5 iterations taking initial vector as $[1,0,0]^T$

e) Given the Values:

x	2	4	6	8
$f(x)$	5	17	37	65

Evaluate $f(5)$, using Lagrange's Formula.

f) Using Newton's Backward formula, find the value of $f(2)$ if:

x	1.0	1.5	2.0	2.5
$f(x)$	2.71	3.38	4.00	4.58

g) Determine the polynomial $f(x)$ using Newton's Divided Difference formula for the data: Also find $f(3)$.

x	0	1	2	3	5
$f(x)$	1	14	15	5	6

Q.5 Attempt Any One. **03**

a) Find all Eigen values and Eigen vectors of the following matrix by using Gauss Jacobi's Method. $\begin{bmatrix} 1 & 2 \\ 3 & 4 \end{bmatrix}$

b) Construct Newton's Forward interpolation polynomial for the following data:

x	4	6	8	10
$f(x)$	1	3	8	16

Set **Q**

S.Y. (B. Tech) (Mechanical Engineering) (Semester - II) (New) (CBCS) Examination: March/April - 2026
Computational Mathematics (OE-02F)

Day & Date: Friday, 22-05-2026 Max. Marks: 70
Time: 03:00 PM To 06:00 PM

Instructions: 1) Q. No. 1 is compulsory. It should be solved in the first 30 minutes in Answer Book Page no 03 (Starting page of the Answer Book). Each question carries one mark.
2) Don't forget to Mention question paper set (P/Q/R/S) on top of page.
3) Figures to the right indicates full marks.
4) Assume suitable data where necessary.

MCQ/Objective Type Questions

Duration: 30 Minutes Marks:14

Q.1 Choose the correct alternative from the options. **14**

1) To find the numerically largest Eigen value using iterative method we use the equation _____.
a) $A = \lambda X$ b) $AX = X$
c) $X = \lambda X$ d) $AX = \lambda X$

2) If $dy/dx = x - y$ and $y(0) = 1$, then by Picard's method the value of $y_1(1)$ is _____.
a) 0.905 b) 1.905
c) 2.905 d) None

3) Runge-Kutta method is self-starting method _____.
a) True b) False
c) We can't say d) None

4) The Newton's forward interpolation formula is generally preferred when data points are _____.
a) Unequally spaced
b) Equally spaced and near the beginning
c) Equally spaced and near the end
d) Randomly spaced

5) In the power method, the vector is normalized in each iteration mainly to _____.
a) increase the determinant
b) prevent values from becoming too large
c) eliminate eigen values
d) make the matrix symmetric

6) Simpson's $3/8$ rule requires the number of sub-intervals to be _____.
a) multiple of 2 b) multiple of 3
c) multiple of 4 d) odd only

7) Picard's method is mainly used to solve _____.
a) linear programming problems b) differential equations
c) eigen value problems d) interpolation problems

8) A transcendental equation is an equation that involves _____.
a) Only algebraic terms
b) Only transcendental functions
c) Both algebraic and transcendental functions
d) Linear terms only

9) The interval in which a real root of the equation $x^3 - 2x - 5 = 0$ lies is _____.
a) $(1, 2)$ b) $(0, 1)$
c) $(2, 3)$ d) $(3, 4)$

10) The Gauss-Seidel method is used for solving _____.
a) Nonlinear equations b) Systems of linear equations
c) Ordinary differential equations d) Partial differential equations

11) Which of the following is a disadvantage of the Gauss-Jacobi method?
a) It converges faster than most direct methods
b) It requires a large number of iterations for a good approximation
c) It cannot be used for systems with more than two equations
d) It works only for symmetric systems

12) The use of Romberg's method is _____.
a) To solve simultaneous linear equation
b) To find root of linear equation
c) To evaluate definite integration
d) To find the Eigen values

13) The order of convergence of Newton-Raphson method is _____.
a) 1 b) 2
c) $\sqrt{2}$ d) 1.6

14) Power Method is used to find _____.
a) Negative Eigen Value b) Largest Eigen value
c) Positive Eigen Value d) None of these

Seat No.	

Set **Q**

S.Y. (B. Tech) (Mechanical Engineering) (Semester - II) (New) (CBCS) Examination: March/April - 2026
Computational Mathematics (OE-02F)

Day & Date: Friday, 22-05-2026 Max. Marks: 56
Time: 03:00 PM To 06:00 PM

Instructions: 1) All questions are compulsory.
2) Figures to the right indicate full marks.
3) Assume suitable data where necessary.

SECTION – I

Q.2 Attempt Any Five: **25**

a) Find the double root of the equation $x^3 - 5.4x^2 + 9.24x - 5.096 = 0$ given that it is nearer to 1.5.

b) Solve the system of equations by Jacobi's iterative method (perform 3 iterations):
$27x + 6y - z = 85,$
$6x + 15y + 2z = 72,$
$x + y + 54z = 110$

c) Find positive real root of the equation $x\sin(x) + \cos(x) = 0$ using Newton-Raphson method correct to 3 decimal places.

d) Solve the system of equations by using Gauss-Elimination method:
$2x + y + z = 7,$
$x + 2y + 3z = 14,$
$3x + 4y + z = 14.$

e) Solve the following system of equations using LU Decomposition method:
$2x + 3y + z = 9$
$x + 2y + 3z = 6$
$3x + y + 2z = 8$

f) Solve $\frac{dy}{dx} = x + y$ with $x_0 = 0, y_0 = 1$ using fourth-order Runge-Kutta method and find approximate value of y when $x = 0.2$

g) Solve $\frac{dy}{dx} = 1 + xy$ with $y(0) = 1$ using Picard's method take first approximation and find y for $x = 0.1$

Q.3 Attempt Any One. **03**

a) Solve the system by Gauss-Seidel method (Perform 4 iterations):

$10x + y + z = 12$

$2x + 10y + z = 13$

$2x + 2y + 10z = 14$

b) Use Newton-Raphson method to find a root of the equation $x^4 - x - 10 = 0$ which is near to $x = 2$. Perform 3 iterations correct to three decimal places.

SECTION – II

Q.4 Attempt Any Five. **25**

a) Approximate $\int_1^3 \frac{1}{x} dx$ using the composite trapezoidal rule with $n = 4$ sub-intervals. List the function values at the nodes, show the application of the formula, and give the final answer correct to 4 decimal places

b) Using Jacobi's method, find all eigenvalues and eigenvectors of the symmetric matrix:

$$A = \begin{bmatrix} 6 & 2 & 1 \\ 2 & 5 & 2 \\ 1 & 2 & 4 \end{bmatrix}$$

c) Evaluate the integral $\int_{-1}^{1} \frac{dx}{1+x^2}$ using Gaussian 3-point Quadrature formula.

d) Find the dominant eigenvalue and the corresponding eigenvector of the matrix

$A = \begin{bmatrix} 4 & 1 & 1 \\ 1 & 3 & 1 \\ 1 & 1 & 2 \end{bmatrix}$ using the Power Method.

Perform 5 iterations taking initial vector as $[1,0,0]^T$

e) Given the Values:

x	2	4	6	8
$f(x)$	5	17	37	65

Evaluate $f(5)$, using Lagrange's Formula.

f) Using Newton's Backward formula, find the value of $f(2)$ if:

x	1.0	1.5	2.0	2.5
$f(x)$	2.71	3.38	4.00	4.58

g) Determine the polynomial $f(x)$ using Newton's Divided Difference formula for the data: Also find $f(3)$.

x	0	1	2	3	5
$f(x)$	1	14	15	5	6

Q.5 Attempt Any One. **03**

a) Find all Eigen values and Eigen vectors of the following matrix by using Gauss Jacobi's Method. $\begin{bmatrix} 1 & 2 \\ 3 & 4 \end{bmatrix}$

b) Construct Newton's Forward interpolation polynomial for the following data:

x	4	6	8	10
$f(x)$	1	3	8	16

MCQ/Objective Type Questions

Duration: 30 Minutes Marks:14

Q.1 Choose the correct alternative from the option. 14

1) In the basic process of communication, the sender converts ideas into symbols; this step is called_____.
a) Decoding b) Encoding
c) Feedback d) Channeling

2) A message sent without words using facial expressions or gestures is called _____.
a) Written communication b) Verbal communication
c) Non-verbal communication d) Grapevine communication

3) Which channel characteristic most reduces chances of immediate feedback?
a) Face-to-face conversation b) Telephone call
c) Email d) Video conference

4) A major barrier to effective communication that arises from personal beliefs or selective attention is called _____.
a) Noise b) Semantic barrier
c) Perceptual barrier d) Channel barrier

5) Body language, eye contact and posture are examples of ____.
a) Verbal codes b) Non-verbal codes
c) Written codes d) Graphic communication

6) Upward communication flows from _____.
a) Top management to workers
b) Peers to peers
c) Workers to management
d) External stakeholders to company

7) An advantage of face-to-face communication over written communication is _____.
a) Permanent record
b) Easier legal reference
c) Immediate feedback
d) More formal tone

8) Which element is essential for an effective welcome speech?
a) Detailed technical data
b) Acknowledgement of guests
c) Long biographical note
d) Complex statistics

9) The main purpose of a vote of thanks at an event is to _____.
a) Introduce the keynote speaker
b) Summarize research findings
c) Express gratitude to contributors and audience
d) Present the event budget

10) Which is a best practice when delivering a professional presentation?
a) Reading every slide verbatim
b) Using too many small fonts
c) Maintaining eye contact and varying tone
d) Using no structure or flow

11) When a buyer is dissatisfied with delivered goods and asks for correction or refund, they should send a _____.
a) Enquiry letter
b) Complaint letter
c) Order letter
d) Quotation letter

12) A purchase order is principally used to _____.
a) Complain about defects
b) Request a quotation
c) Place an order for goods or services
d) Acknowledge receipt of payment

13) Which part of a business letter contains the main message or details the writer wants to communicate?
a) Heading
b) Salutation
c) Body
d) Signature block

14) Which report type is typically written to describe a workplace accident and recommend corrective actions?
a) Progress report
b) Accident report
c) Sales report
d) Quotation report

S.Y. (B. Tech) (Mechanical Engineering) (Semester - II) (New) (CBCS) Examination: March/April - 2026
Professional Business Communication (OE-02G)

Day & Date: Friday, 22-05-2026 Max. Marks: 70
Time: 03:00 PM To 06:00 PM

Instructions: 1) Q. No. 1 is compulsory. It should be solved in the first 30 minutes in Answer Book Page no 03 (Starting page of the Answer Book). Each question carries one mark.
2) Don't forget to Mention question paper set (P/Q/R/S) on top of page.
3) Figures to the right indicates full marks.
4) Assume suitable data wherever needed and mention it clearly.

MCQ/Objective Type Questions

Duration: 30 Minutes Marks:14

Q.1 Choose the correct alternative from the option. 14

1) Which element is essential for an effective welcome speech?
a) Detailed technical data b) Acknowledgement of guests
c) Long biographical note d) Complex statistics

2) The main purpose of a vote of thanks at an event is to _____.
a) Introduce the keynote speaker
b) Summarize research findings
c) Express gratitude to contributors and audience
d) Present the event budget

3) Which is a best practice when delivering a professional presentation?
a) Reading every slide verbatim
b) Using too many small fonts
c) Maintaining eye contact and varying tone
d) Using no structure or flow

4) When a buyer is dissatisfied with delivered goods and asks for correction or refund, they should send a _____.
a) Enquiry letter b) Complaint letter
c) Order letter d) Quotation letter

5) A purchase order is principally used to _____.
a) Complain about defects
b) Request a quotation
c) Place an order for goods or services
d) Acknowledge receipt of payment

6) Which part of a business letter contains the main message or details the writer wants to communicate?

a) Heading
b) Salutation
c) Body
d) Signature block

7) Which report type is typically written to describe a workplace accident and recommend corrective actions?

a) Progress report
b) Accident report
c) Sales report
d) Quotation report

8) In the basic process of communication, the sender converts ideas into symbols; this step is called_____.

a) Decoding
b) Encoding
c) Feedback
d) Channeling

9) A message sent without words using facial expressions or gestures is called _____.

a) Written communication
b) Verbal communication
c) Non-verbal communication
d) Grapevine communication

10) Which channel characteristic most reduces chances of immediate feedback?

a) Face-to-face conversation
b) Telephone call
c) Email
d) Video conference

11) A major barrier to effective communication that arises from personal beliefs or selective attention is called _____.

a) Noise
b) Semantic barrier
c) Perceptual barrier
d) Channel barrier

12) Body language, eye contact and posture are examples of ____.

a) Verbal codes
b) Non-verbal codes
c) Written codes
d) Graphic communication

13) Upward communication flows from _____.

a) Top management to workers
b) Peers to peers
c) Workers to management
d) External stakeholders to company

14) An advantage of face-to-face communication over written communication is _____.

a) Permanent record
b) Easier legal reference
c) Immediate feedback
d) More formal tone

Set Q

S.Y. (B. Tech) (Mechanical Engineering) (Semester - II) (New) (CBCS) Examination: March/April - 2026
Professional Business Communication (OE-02G)

Day & Date: Friday, 22-05-2026 Max. Marks: 56
Time: 03:00 PM To 06:00 PM

Instructions: 1) All questions are compulsory.
2) Figures to the right indicate full marks.
3) Assume suitable data wherever needed and mention it clearly.

SECTION – I

Q.2 Solve following. (Any Two) **14**

a) Define communication and explain its meaning in professional life.

b) Explain the elements of communication with a neat diagram.

c) Describe the process of communication in detail.

Q.3 Solve following. (Any Two) **14**

a) Explain verbal and non-verbal communication with suitable examples.

b) Describe body language and its importance in communication.

c) Explain formal and informal communication in an organization.

SECTION – II

Q.4 Solve following. (Any Two) **14**

a) Explain the concept and importance of professional presentations.

b) Describe the steps involved in preparing and delivering a presentation.

c) Explain the Four P's of professional presentations.

Q.5 Solve following. (Any Two) **14**

a) Explain the style and structure of a business letter.

b) Write a detailed note on enquiry letters and quotation letters.

c) Explain purchase order, work order, and complaint letter.

S.Y. (B.Tech.) (Mechanical Engineering) (Sem - II) (New) (CBCS)
Examination: March/April - 2026
Introduction to Electric and Hybrid Vehicles (MechHon-02B)

Day & Date: Tuesday, 26-05-2026 Max. Marks: 70
Time: 10:00 AM To 01:00 PM

Instructions: 1) Q. No. 1 is compulsory. It should be solved in the first 30 minutes in Answer Book Page no 03 (Starting page of the Answer Book). Each question carries one mark.
2) Don't forget to Mention question paper set (P/Q/R/S) on top of page.
3) Figures to the right indicate full marks.

MCQ/Objective Type Questions

Duration: 30 Minutes Marks:14

Q.1 Choose the correct answer from the given options. 14

1) The performance of an electric vehicle is significantly affected by _____.
a) Ambient light b) Vehicle mass
c) Tire pressure only d) Vehicle color

2) Slow charging is generally preferred for _____.
a) Increasing charging station turnover
b) Emergency situations
c) Quick trips
d) Daily overnight home charging

3) For AV induction motors, torque control is typically achieved by_____.
a) Voltage modulation
b) Changing both voltage and frequency
c) Frequency modulation
d) Adjusting capacitance

4) The drivetrain in electric vehicles is simpler than in ICE vehicles because _____.
a) Requires constant gear shifting
b) No need for fuel injection
c) Fewer moving parts and no multi-speed transmission
d) EVs don't require acceleration

5) Which of the following reduces operational costs in EVs?
a) Using air conditioning b) Regenerative braking
c) Frequent charging d) High electricity cost

6) A plug-in hybrid is advantageous because it _____.
   a) Can be driven longer distances on electric power alone
   b) Requires no battery
   c) Needs daily engine tuning
   d) Increases fuel usage

7) What does HEV stand for _____.
   a) Hydrogen Electric Vehicle
   b) High Energy Vehicle
   c) Hybrid Electric Vehicle
   d) Heavy Electric Van

8) The operational cost of EVs is primarily dependent on _____.
   a) Paint quality
   b) Insurance
   c) Number of passengers
   d) Electricity rates and maintenance

9) What is the main advantage of BLDC motors over conventional DC motors?
   a) Lower efficiency
   b) No brushes, hence less maintenance
   c) High torque at low speed only
   d) No need for electronic control

10) Tractive effort is defined as _____.
   a) Force available at the wheels to move the vehicle
   b) Energy to move the vehicle uphill
   c) Force required to stop the vehicle
   d) Inertia of the motor

11) Inverters are mainly used to _____.
   a) Convert AC to DC
   b) Convert DC to AC
   c) Control torque of DC motors
   d) Regulate battery voltage

12) Which device is primarily used to control the voltage applied to a DC motor for speed control?
   a) Inverter
   b) Chopper
   c) VFD
   d) Rectifier

13) The India Drive Cycle (IDC) is specifically designed to _____.
   a) Simulate European driving conditions
   b) Evaluate fuel efficiency under Indian traffic conditions
   c) Test battery performance at high speeds
   d) Analyze highway-only driving

14) Which of the following is not a key parameter typically considered in a drive cycle?
   a) Speed
   b) Acceleration
   c) Battery chemistry
   d) Idling

	b)	What is tractive effort? Discuss its significance in the performance of a vehicle.	**05**
	c)	Discuss the role of regenerative braking in conserving energy during vehicle operation.	**04**
Q.4	**a)**	Define a Hybrid Electric Drive Train and explain its basic concept.	**08**
	b)	What are the key considerations in the mass analysis and packaging of HEV components?	**06**

SECTION – II

Q.5	**a)**	Discuss the basic components and working mechanism of a DC motor.	**05**
	b)	Discuss how permanent magnets function in BLDC and synchronous motor operation.	**05**
	c)	Describe how a Switched Reluctance Motor (SRM) is constructed and how it functions.	**04**
Q.6	**a)**	Describe the role of a chopper circuit in the control of a DC motor.	**05**
	b)	Explain the function of a Variable Frequency Drive (VFD) and its method of controlling the speed of an AC motor.	**05**
	c)	Describe how Pulse Width Modulation (PWM) techniques contribute to higher efficiency in motor control systems.	**04**

Q.7	**a)**	Explain the methods used to measure energy efficiency in electric vehicle drive cycles.	**08**
	b)	Describe the main features of the Indian Drive Cycle (IDC).	**06**

Set S

S.Y. (B.Tech.) (Mechanical Engineering) (Sem - II) (New) (CBCS)
Examination: March/April-2026
Introduction to Electric and Hybrid Vehicles (MechHon-02B)

Day & Date: Tuesday, 26-05-2026 Max. Marks: 70
Time: 10:00 AM To 01:00 PM

Instructions: 1) Q. No. 1 is compulsory. It should be solved in the first 30 minutes in Answer Book Page no 03 (Starting page of the Answer Book). Each question carries one mark.
2) Don't forget to Mention question paper set (P/Q/R/S) on top of page.
3) Figures to the right indicate full marks.

MCQ/Objective Type Questions

Duration: 30 Minutes Marks:14

Q.1 Choose the correct answer from the given options. **14**

1) A plug-in hybrid is advantageous because it _____.
a) Can be driven longer distances on electric power alone
b) Requires no battery
c) Needs daily engine tuning
d) Increases fuel usage

2) What does HEV stand for _____.
a) Hydrogen Electric Vehicle
b) High Energy Vehicle
c) Hybrid Electric Vehicle
d) Heavy Electric Van

3) The operational cost of EVs is primarily dependent on _____.
a) Paint quality
b) Insurance
c) Number of passengers
d) Electricity rates and maintenance

4) What is the main advantage of BLDC motors over conventional DC motors?
a) Lower efficiency
b) No brushes, hence less maintenance
c) High torque at low speed only
d) No need for electronic control

5) Tractive effort is defined as _____.
a) Force available at the wheels to move the vehicle
b) Energy to move the vehicle uphill
c) Force required to stop the vehicle
d) Inertia of the motor

6) Inverters are mainly used to _____.
a) Convert AC to DC
b) Convert DC to AC
c) Control torque of DC motors
d) Regulate battery voltage

7) Which device is primarily used to control the voltage applied to a DC motor for speed control?
a) Inverter
b) Chopper
c) VFD
d) Rectifier

8) The India Drive Cycle (IDC) is specifically designed to _____.
a) Simulate European driving conditions
b) Evaluate fuel efficiency under Indian traffic conditions
c) Test battery performance at high speeds
d) Analyze highway-only driving

9) Which of the following is not a key parameter typically considered in a drive cycle?
a) Speed
b) Acceleration
c) Battery chemistry
d) Idling

10) The performance of an electric vehicle is significantly affected by _____.
a) Ambient light
b) Vehicle mass
c) Tire pressure only
d) Vehicle color

11) Slow charging is generally preferred for _____.
a) Increasing charging station turnover
b) Emergency situations
c) Quick trips
d) Daily overnight home charging

12) For AV induction motors, torque control is typically achieved by_____.
a) Voltage modulation
b) Changing both voltage and frequency
c) Frequency modulation
d) Adjusting capacitance

13) The drivetrain in electric vehicles is simpler than in ICE vehicles because _____.
a) Requires constant gear shifting
b) No need for fuel injection
c) Fewer moving parts and no multi-speed transmission
d) EVs don't require acceleration

14) Which of the following reduces operational costs in EVs?
a) Using air conditioning
b) Regenerative braking
c) Frequent charging
d) High electricity cost

Examination: March/April-2026
Introduction to Electric and Hybrid Vehicles (MechHon-02B)

Day & Date: Tuesday, 26-05-2026 Max. Marks: 56
Time: 10:00 AM To 01:00 PM

Instructions: 1) Solve any two questions from each section.
2) Figures to the right indicate full marks.

SECTION - I

Q.2	**a)**	Discuss the roles of the key components in an electric vehicle.	**05**
	b)	Provide an overview of the latest market developments for electric vehicles globally and in India.	**05**
	c)	Discuss the role of energy efficiency in enhancing the effectiveness of electric vehicles.	**04**
Q.3	**a)**	Describe the different types of electric vehicle configurations and their characteristics.	**05**
	b)	What is tractive effort? Discuss its significance in the performance of a vehicle.	**05**
	c)	Discuss the role of regenerative braking in conserving energy during vehicle operation.	**04**
Q.4	**a)**	Define a Hybrid Electric Drive Train and explain its basic concept.	**08**
	b)	What are the key considerations in the mass analysis and packaging of HEV components?	**06**

SECTION – II

Q.5	**a)**	Discuss the basic components and working mechanism of a DC motor.	**05**
	b)	Discuss how permanent magnets function in BLDC and synchronous motor operation.	**05**
	c)	Describe how a Switched Reluctance Motor (SRM) is constructed and how it functions.	**04**
Q.6	**a)**	Describe the role of a chopper circuit in the control of a DC motor.	**05**
	b)	Explain the function of a Variable Frequency Drive (VFD) and its method of controlling the speed of an AC motor.	**05**
	c)	Describe how Pulse Width Modulation (PWM) techniques contribute to higher efficiency in motor control systems.	**04**

Q.7	**a)**	Explain the methods used to measure energy efficiency in electric vehicle drive cycles.	**08**
	b)	Describe the main features of the Indian Drive Cycle (IDC).	**06**

S.Y. (B. Tech) (Mechanical Engineering) (Semester - II) (New) (CBCS) Examination: March/April - 2026
Professional Ethics (VEC-02)

Day & Date: Friday, 29-05-2026 Max. Marks: 50
Time: 10:00 AM To 11:30 AM

Instructions: 1) All questions are compulsory.
2) Figures to the right indicate full marks.
3) Mention Question Paper Set (P/Q/R/S) on Top of Page.

Q.1 Answer the following Objective Type Questions. **50** **Answer**

1) What are fundamental human values?
a) Core beliefs and principles that guide human behavior and interactions
b) Economic indicators for social development
c) Religious doctrines that govern human life
d) Scientific facts that influence decision-making

2) Which value emphasizes treating others as you wish to be treated?
a) Respect b) Empathy
c) Honesty d) Kindness

3) The value of honesty is closely related to _____.
a) Truthfulness and sincerity b) Wealth and possessions
c) Power and influence d) Indifference and insensitivity

4) Which value involves considering the perspectives and feelings of others?
a) Empathy b) Courage
c) Determination d) Patience

5) The value of respect entails _____.
a) Recognizing the worth of every individual and their rights
b) Achieving personal success at any cost
c) Promoting competition among individuals
d) Pursuing material gains over relationships

6) Which value involves being accountable for one's decisions and actions?
a) Responsibility b) Flexibility
c) Confidence d) Arrogance

7) The value of integrity entails _____.
a) Being honest and true to oneself and others
b) Pursuing personal interests at any cost
c) Manipulating and deceiving others for personal gain
d) Ignoring the feelings and rights of other

8) Which value involves being considerate and thoughtful towards others?
a) Kindness
b) Determination
c) Independence
d) Indifference

9) The value of wisdom involves _____.
a) Making sound and informed judgments based on knowledge and experience
b) Pursuing personal interests at the expense of others
c) Ignoring the perspectives and concerns of others
d) Suppressing one's emotions and thoughts

10) Which value involves being truthful and sincere in one's actions and words?
a) Honesty
b) Tolerance
c) Flexibility
d) Arrogance

11) What is the primary goal of engineering ethics?
a) To maximize profits for companies
b) To ensure engineers work efficiently
c) To protect public safety and welfare
d) To follow industry standards

12) Which of the following is considered an ethical responsibility of an engineer?
a) Ignoring environmental concerns to meet deadlines
b) Ensuring the safety of the public
c) Disregarding laws and regulations
d) Making decisions based on personal interests

13) Ethical engineering practices promote _____.
a) The continuous pursuit of profit
b) The advancement of technology at any cost
c) Public trust and confidence in engineering
d) The minimization of safety regulations

14) Ethical engineers should consider which of the following when making decisions?
a) Profit maximization
b) Only the interests of the employer
c) Public safety, environmental impact, and ethical codes
d) Personal comfort and convenience

15) Which of the following is NOT part of an engineer's ethical responsibility?
a) Designing for safety and sustainability
b) Falsifying data to ensure project success
c) Reporting safety concerns immediately
d) Following industry standards and regulations

16) Ethical engineering involves making decisions based on _____.
a) Personal opinions and values
b) Financial incentives and company pressure
c) Objective analysis, codes of ethics, and consideration for the public good
d) Trends in the field of engineering

17) What should an engineer do if they discover a colleague is involved in unethical practices?
a) Ignore the situation to avoid conflict
b) Report the unethical behavior to management or relevant authorities
c) Cover up the situation to protect the colleague
d) Allow the behavior to continue if it does not affect the project

18) Ethical engineering practices include _____.
a) Following industry standards and regulations
b) Ensuring profitability is the main priority
c) Cutting costs by any means necessary
d) Avoiding the reporting of safety hazards

19) What is the primary focus of Kohlberg's theory?
a) Cognitive development b) Social development
c) Moral development d) Emotional development

20) Which term refers to an agreement that is made through discussions and compromises among parties?
a) Conflict b) Consensus
c) Dispute d) Isolation

21) What is the primary goal of risk assessment?
a) To eliminate all risks
b) To identify and mitigate potential risks
c) To ignore potential risks
d) To transfer risks to others

22) What is the primary goal of safety protocols?
a) To increase productivity
b) To reduce costs
c) To prevent injuries and illnesses
d) To improve employee morale

23) What is the difference between a hazard and a risk?
a) A hazard is a potential risk, while a risk is a real danger
b) A hazard is a real danger, while a risk is a potential danger
c) A hazard is a physical danger, while a risk is a financial danger
d) A hazard is a financial danger, while a risk is a physical danger

24) What should you do if you identify a potential risk in the workplace?
a) Ignore it and hope it goes away
b) Report it to your supervisor or HR
c) Try to mitigate it on your own
d) Transfer the risk to someone else

25) According to the theory of ethical egoism, what should guide an individual's moral actions?
a) The well-being of others
b) The individual's own self-interest
c) Social norms and conventions
d) Universal moral principles

26) Collegiality in a professional setting refers to _____.
a) Loyalty to your employer
b) Cooperation and mutual respect among colleagues
c) Competing for individual success
d) Avoiding work conflicts

27) Professional loyalty involves _____.
a) Reporting colleagues' mistakes publicly
b) Protecting the interests of the team or organization
c) Ignoring safety violations to avoid
d) Disclosing confidential information for personal conflict gain

28) Employee rights include _____.
a) The right to work without discrimination
b) The right to disregard company policies
c) The right to personal opinion but not affecting work
d) The right to ignore workplace safety standards

29) Intellectual Property Rights (IPR) protect _____.
a) The financial interests of corporations
b) The ownership and use of creative ideas and inventions
c) The physical assets of a company
d) Workplace performance evaluations

30) *Risk assessment* is important because it helps in _____.
a) Evaluating the potential impact of hazards on health and safety
b) Minimizing workplace productivity
c) Defining job roles
d) Ignoring environmental issues

31) In risk management, mitigation strategies aim to _____.
a) Accept all risks in the workplace
b) Reduce or eliminate identified risks
c) Increase the likelihood of hazards
d) Focus only on maximizing profits

32) Which of the following is a potential consequence of *occupational crime?*
a) Increased workplace productivity
b) Legal consequences and loss of reputation
c) Improvement in company safety standards
d) Higher employee satisfaction

33) Risk reduction in engineering refers to _____.
a) Implementing measures to lower the work chances of accidents
b) Increasing the number of hazards in the work environment
c) Ignoring potential risks
d) Cutting costs by removing safety measures

34) Public safety regulations are primarily designed to _____.
a) Ensure the safety of the company's assets
b) Protect the general public from potential harm
c) Increase revenue for the government
d) Focus only on preventing natural disasters

35) Multinational corporations (MNCs) are characterized by _____.
a) Operations in multiple countries with a centralized headquarters
b) Operating only in their home country
c) Limited influence on global markets
d) No responsibility toward environmental concerns

36) Environmental ethics primarily deals with _____.
a) Human responsibility to manage the environment and natural resources
b) Minimizing corporate profits
c) Technological advancements in engineering
d) Treating employees equally

37) Which of the following is NOT an example of environmental ethics?
a) Reducing pollution and waste
b) Maximizing resource use regardless of environmental impact
c) Preserving biodiversity
d) Sustainable development

38) Computer ethics involves _____.
   a) Programming and coding without considering social consequences
   b) Understanding the moral implications of computing technologies
   c) Focusing only on technological innovation
   d) Ignoring privacy issues

39) Weapons development ethics deals with _____.
   a) The development of new technologies to enhance military capabilities
   b) Restricting the use of all technological advancements
   c) Focusing only on civilian safety
   d) Only addressing the legal aspects of weapon development

40) Engineers as managers are expected to _____.
   a) Focus solely on technical tasks
   b) Lead teams, make strategic decisions, and manage projects
   c) Ignore the business aspects of their work
   d) Avoid taking responsibility for team outcomes

41) Consulting engineers are hired to _____.
   a) Work on projects within the company they are employed
   b) Provide expert advice on technical and engineering problems
   c) Manage public relations for a company
   d) Conduct legal investigations

42) Engineers acting as expert witnesses typically _____.
   a) Present evidence and offer testimony in legal cases
   b) Focus on public relations during a case
   c) Manage engineering projects for legal firms
   d) Directly represent the interests of a company court

43) Sample Code of Ethics of professional organizations typically includes _____.
   a) Guidelines for acceptable behavior and decision-making
   b) Rules for maximizing profits at any cost
   c) Detailed technical specifications for projects
   d) Guidelines for political involvement in engineering

44) ASME stands for _____.
   a) American Society of Mechanical Engineers
   b) American Society of Management Engineers
   c) Association of Safety and Mechanical Engineers
   d) Association of Scientific and Mechanical Engineers

45) The ASCE Code of Ethics emphasizes _____.
a) Following only local regulations
b) Maintaining professional integrity and responsibility
c) Focusing on personal financial gain
d) Ignoring environmental impacts

46) The IEEE Code of Ethics is primarily concerned with _____.
a) Fostering professional competence and integrity
b) Protecting corporate secrets
c) Maximizing technological advancements at any cost
d) Developing weapons for defense purposes

47) Global issues in engineering ethics include _____.
a) Cultural differences in engineering practices
b) Lack of understanding between technical and ethical concerns
c) Addressing both local and international engineering challenges
d) All of the above

48) A key challenge faced by multinational corporations is _____.
a) Balancing profits with social and environmental
b) Competing only within their home country responsibilities
c) Focusing solely on domestic issues
d) Ignoring corporate social responsibility

49) Empathy is the ability to _____.
a) Solve problems logically
b) Understand and share the feelings of others
c) Be indifferent to others' emotions
d) Only care about your own well-being

50) The quality of "caring" includes _____.
a) Showing concern for others' well-being
b) Ignoring the needs of others
c) Only helping family and friends
d) Seeking praise for helping others

   a) Evaluating the potential impact of hazards on health and safety
   b) Minimizing workplace productivity
   c) Defining job roles
   d) Ignoring environmental issues

11) In risk management, mitigation strategies aim to _____.
   a) Accept all risks in the workplace
   b) Reduce or eliminate identified risks
   c) Increase the likelihood of hazards
   d) Focus only on maximizing profits

12) Which of the following is a potential consequence of *occupational crime?*
   a) Increased workplace productivity
   b) Legal consequences and loss of reputation
   c) Improvement in company safety standards
   d) Higher employee satisfaction

13) Risk reduction in engineering refers to _____.
   a) Implementing measures to lower the work chances of accidents
   b) Increasing the number of hazards in the work environment
   c) Ignoring potential risks
   d) Cutting costs by removing safety measures

14) Public safety regulations are primarily designed to _____.
a) Ensure the safety of the company's assets
b) Protect the general public from potential harm
c) Increase revenue for the government
d) Focus only on preventing natural disasters

15) Multinational corporations (MNCs) are characterized by _____.
a) Operations in multiple countries with a centralized headquarters
b) Operating only in their home country
c) Limited influence on global markets
d) No responsibility toward environmental concerns

16) Environmental ethics primarily deals with _____.
a) Human responsibility to manage the environment and natural resources
b) Minimizing corporate profits
c) Technological advancements in engineering
d) Treating employees equally

17) Which of the following is NOT an example of environmental ethics?
a) Reducing pollution and waste
b) Maximizing resource use regardless of environmental impact
c) Preserving biodiversity
d) Sustainable development

18) Computer ethics involves _____.
a) Programming and coding without considering social consequences
b) Understanding the moral implications of computing technologies
c) Focusing only on technological innovation
d) Ignoring privacy issues

19) Weapons development ethics deals with _____.
a) The development of new technologies to enhance military capabilities
b) Restricting the use of all technological advancements
c) Focusing only on civilian safety
d) Only addressing the legal aspects of weapon development

20) Engineers as managers are expected to _____.
a) Focus solely on technical tasks
b) Lead teams, make strategic decisions, and manage projects
c) Ignore the business aspects of their work
d) Avoid taking responsibility for team outcomes

21) Consulting engineers are hired to _____.
a) Work on projects within the company they are employed
b) Provide expert advice on technical and engineering problems
c) Manage public relations for a company
d) Conduct legal investigations

22) Engineers acting as expert witnesses typically _____.
a) Present evidence and offer testimony in legal cases
b) Focus on public relations during a case
c) Manage engineering projects for legal firms
d) Directly represent the interests of a company court

23) Sample Code of Ethics of professional organizations typically includes _____.
a) Guidelines for acceptable behavior and decision-making
b) Rules for maximizing profits at any cost
c) Detailed technical specifications for projects
d) Guidelines for political involvement in engineering

24) ASME stands for _____.
a) American Society of Mechanical Engineers
b) American Society of Management Engineers
c) Association of Safety and Mechanical Engineers
d) Association of Scientific and Mechanical Engineers

25) The ASCE Code of Ethics emphasizes _____.
a) Following only local regulations
b) Maintaining professional integrity and responsibility
c) Focusing on personal financial gain
d) Ignoring environmental impacts

26) The IEEE Code of Ethics is primarily concerned with _____.
a) Fostering professional competence and integrity
b) Protecting corporate secrets
c) Maximizing technological advancements at any cost
d) Developing weapons for defense purposes

27) Global issues in engineering ethics include _____.
a) Cultural differences in engineering practices
b) Lack of understanding between technical and ethical concerns
c) Addressing both local and international engineering challenges
d) All of the above

28) A key challenge faced by multinational corporations is _____.
a) Balancing profits with social and environmental
b) Competing only within their home country responsibilities
c) Focusing solely on domestic issues
d) Ignoring corporate social responsibility

29) Empathy is the ability to _____.
a) Solve problems logically
b) Understand and share the feelings of others
c) Be indifferent to others' emotions
d) Only care about your own well-being

30) The quality of "caring" includes _____.
a) Showing concern for others' well-being
b) Ignoring the needs of others
c) Only helping family and friends
d) Seeking praise for helping others

31) What are fundamental human values?
a) Core beliefs and principles that guide human behavior and interactions
b) Economic indicators for social development
c) Religious doctrines that govern human life
d) Scientific facts that influence decision-making

32) Which value emphasizes treating others as you wish to be treated?
a) Respect b) Empathy
c) Honesty d) Kindness

33) The value of honesty is closely related to _____.
a) Truthfulness and sincerity b) Wealth and possessions
c) Power and influence d) Indifference and insensitivity

34) Which value involves considering the perspectives and feelings of others?
a) Empathy b) Courage
c) Determination d) Patience

35) The value of respect entails _____.
a) Recognizing the worth of every individual and their rights
b) Achieving personal success at any cost
c) Promoting competition among individuals
d) Pursuing material gains over relationships

36) Which value involves being accountable for one's decisions and actions?
a) Responsibility b) Flexibility
c) Confidence d) Arrogance

37) The value of integrity entails _____.
a) Being honest and true to oneself and others
b) Pursuing personal interests at any cost
c) Manipulating and deceiving others for personal gain
d) Ignoring the feelings and rights of other

38) Which value involves being considerate and thoughtful towards others?

a) Kindness
b) Determination
c) Independence
d) Indifference

39) The value of wisdom involves _____.

a) Making sound and informed judgments based on knowledge and experience
b) Pursuing personal interests at the expense of others
c) Ignoring the perspectives and concerns of others
d) Suppressing one's emotions and thoughts

40) Which value involves being truthful and sincere in one's actions and words?

a) Honesty
b) Tolerance
c) Flexibility
d) Arrogance

41) What is the primary goal of engineering ethics?

a) To maximize profits for companies
b) To ensure engineers work efficiently
c) To protect public safety and welfare
d) To follow industry standards

42) Which of the following is considered an ethical responsibility of an engineer?

a) Ignoring environmental concerns to meet deadlines
b) Ensuring the safety of the public
c) Disregarding laws and regulations
d) Making decisions based on personal interests

43) Ethical engineering practices promote _____.

a) The continuous pursuit of profit
b) The advancement of technology at any cost
c) Public trust and confidence in engineering
d) The minimization of safety regulations

44) Ethical engineers should consider which of the following when making decisions?

a) Profit maximization
b) Only the interests of the employer
c) Public safety, environmental impact, and ethical codes
d) Personal comfort and convenience

45) Which of the following is NOT part of an engineer's ethical responsibility?

a) Designing for safety and sustainability
b) Falsifying data to ensure project success
c) Reporting safety concerns immediately
d) Following industry standards and regulations

46) Ethical engineering involves making decisions based on _____.

a) Personal opinions and values
b) Financial incentives and company pressure
c) Objective analysis, codes of ethics, and consideration for the public good
d) Trends in the field of engineering

47) What should an engineer do if they discover a colleague is involved in unethical practices?

a) Ignore the situation to avoid conflict
b) Report the unethical behavior to management or relevant authorities
c) Cover up the situation to protect the colleague
d) Allow the behavior to continue if it does not affect the project

48) Ethical engineering practices include _____.

a) Following industry standards and regulations
b) Ensuring profitability is the main priority
c) Cutting costs by any means necessary
d) Avoiding the reporting of safety hazards

49) What is the primary focus of Kohlberg's theory?

a) Cognitive development b) Social development
c) Moral development d) Emotional development

50) Which term refers to an agreement that is made through discussions and compromises among parties?

a) Conflict b) Consensus
c) Dispute d) Isolation

   c) Maximizing technological advancements at any cost
   d) Developing weapons for defense purposes

7) Global issues in engineering ethics include _____.
   a) Cultural differences in engineering practices
   b) Lack of understanding between technical and ethical concerns
   c) Addressing both local and international engineering challenges
   d) All of the above

8) A key challenge faced by multinational corporations is _____.
   a) Balancing profits with social and environmental
   b) Competing only within their home country responsibilities
   c) Focusing solely on domestic issues
   d) Ignoring corporate social responsibility

9) Empathy is the ability to _____.
   a) Solve problems logically
   b) Understand and share the feelings of others
   c) Be indifferent to others' emotions
   d) Only care about your own well-being

10) The quality of "caring" includes _____.
   a) Showing concern for others' well-being
   b) Ignoring the needs of others
   c) Only helping family and friends
   d) Seeking praise for helping others

11) What are fundamental human values?
   a) Core beliefs and principles that guide human behavior and interactions
   b) Economic indicators for social development
   c) Religious doctrines that govern human life
   d) Scientific facts that influence decision-making

12) Which value emphasizes treating others as you wish to be treated?
   a) Respect b) Empathy
   c) Honesty d) Kindness

13) The value of honesty is closely related to _____.
   a) Truthfulness and sincerity b) Wealth and possessions
   c) Power and influence d) Indifference and insensitivity

14) Which value involves considering the perspectives and feelings of others?
   a) Empathy b) Courage
   c) Determination d) Patience

15) The value of respect entails _____.
a) Recognizing the worth of every individual and their rights
b) Achieving personal success at any cost
c) Promoting competition among individuals
d) Pursuing material gains over relationships

16) Which value involves being accountable for one's decisions and actions?
a) Responsibility b) Flexibility
c) Confidence d) Arrogance

17) The value of integrity entails _____.
a) Being honest and true to oneself and others
b) Pursuing personal interests at any cost
c) Manipulating and deceiving others for personal gain
d) Ignoring the feelings and rights of other

18) Which value involves being considerate and thoughtful towards others?
a) Kindness b) Determination
c) Independence d) Indifference

19) The value of wisdom involves _____.
a) Making sound and informed judgments based on knowledge and experience
b) Pursuing personal interests at the expense of others
c) Ignoring the perspectives and concerns of others
d) Suppressing one's emotions and thoughts

20) Which value involves being truthful and sincere in one's actions and words?
a) Honesty b) Tolerance
c) Flexibility d) Arrogance

21) What is the primary goal of engineering ethics?
a) To maximize profits for companies
b) To ensure engineers work efficiently
c) To protect public safety and welfare
d) To follow industry standards

22) Which of the following is considered an ethical responsibility of an engineer?
a) Ignoring environmental concerns to meet deadlines
b) Ensuring the safety of the public
c) Disregarding laws and regulations
d) Making decisions based on personal interests

23) Ethical engineering practices promote _____.
a) The continuous pursuit of profit
b) The advancement of technology at any cost
c) Public trust and confidence in engineering
d) The minimization of safety regulations

24) Ethical engineers should consider which of the following when making decisions?
a) Profit maximization
b) Only the interests of the employer
c) Public safety, environmental impact, and ethical codes
d) Personal comfort and convenience

25) Which of the following is NOT part of an engineer's ethical responsibility?
a) Designing for safety and sustainability
b) Falsifying data to ensure project success
c) Reporting safety concerns immediately
d) Following industry standards and regulations

26) Ethical engineering involves making decisions based on _____.
a) Personal opinions and values
b) Financial incentives and company pressure
c) Objective analysis, codes of ethics, and consideration for the public good
d) Trends in the field of engineering

27) What should an engineer do if they discover a colleague is involved in unethical practices?
a) Ignore the situation to avoid conflict
b) Report the unethical behavior to management or relevant authorities
c) Cover up the situation to protect the colleague
d) Allow the behavior to continue if it does not affect the project

28) Ethical engineering practices include _____.
a) Following industry standards and regulations
b) Ensuring profitability is the main priority
c) Cutting costs by any means necessary
d) Avoiding the reporting of safety hazards

29) What is the primary focus of Kohlberg's theory?
a) Cognitive development b) Social development
c) Moral development d) Emotional development

30) Which term refers to an agreement that is made through discussions and compromises among parties?
a) Conflict b) Consensus
c) Dispute d) Isolation

31) What is the primary goal of risk assessment?
a) To eliminate all risks
b) To identify and mitigate potential risks
c) To ignore potential risks
d) To transfer risks to others

32) What is the primary goal of safety protocols?
a) To increase productivity
b) To reduce costs
c) To prevent injuries and illnesses
d) To improve employee morale

33) What is the difference between a hazard and a risk?
a) A hazard is a potential risk, while a risk is a real danger
b) A hazard is a real danger, while a risk is a potential danger
c) A hazard is a physical danger, while a risk is a financial danger
d) A hazard is a financial danger, while a risk is a physical danger

34) What should you do if you identify a potential risk in the workplace?
a) Ignore it and hope it goes away
b) Report it to your supervisor or HR
c) Try to mitigate it on your own
d) Transfer the risk to someone else

35) According to the theory of ethical egoism, what should guide an individual's moral actions?
a) The well-being of others
b) The individual's own self-interest
c) Social norms and conventions
d) Universal moral principles

36) Collegiality in a professional setting refers to _____.
a) Loyalty to your employer
b) Cooperation and mutual respect among colleagues
c) Competing for individual success
d) Avoiding work conflicts

37) Professional loyalty involves _____.
a) Reporting colleagues' mistakes publicly
b) Protecting the interests of the team or organization
c) Ignoring safety violations to avoid
d) Disclosing confidential information for personal conflict gain

38) Employee rights include _____.
a) The right to work without discrimination
b) The right to disregard company policies
c) The right to personal opinion but not affecting work
d) The right to ignore workplace safety standards

39) Intellectual Property Rights (IPR) protect _____.
- a) The financial interests of corporations
- b) The ownership and use of creative ideas and inventions
- c) The physical assets of a company
- d) Workplace performance evaluations

40) *Risk assessment* is important because it helps in _____.
- a) Evaluating the potential impact of hazards on health and safety
- b) Minimizing workplace productivity
- c) Defining job roles
- d) Ignoring environmental issues

41) In risk management, mitigation strategies aim to _____.
- a) Accept all risks in the workplace
- b) Reduce or eliminate identified risks
- c) Increase the likelihood of hazards
- d) Focus only on maximizing profits

42) Which of the following is a potential consequence of *occupational crime?*
- a) Increased workplace productivity
- b) Legal consequences and loss of reputation
- c) Improvement in company safety standards
- d) Higher employee satisfaction

43) Risk reduction in engineering refers to _____.
- a) Implementing measures to lower the work chances of accidents
- b) Increasing the number of hazards in the work environment
- c) Ignoring potential risks
- d) Cutting costs by removing safety measures

44) Public safety regulations are primarily designed to _____.
- a) Ensure the safety of the company's assets
- b) Protect the general public from potential harm
- c) Increase revenue for the government
- d) Focus only on preventing natural disasters

45) Multinational corporations (MNCs) are characterized by _____.
- a) Operations in multiple countries with a centralized headquarters
- b) Operating only in their home country
- c) Limited influence on global markets
- d) No responsibility toward environmental concerns

46) Environmental ethics primarily deals with _____.

a) Human responsibility to manage the environment and natural resources
b) Minimizing corporate profits
c) Technological advancements in engineering
d) Treating employees equally

47) Which of the following is NOT an example of environmental ethics?

a) Reducing pollution and waste
b) Maximizing resource use regardless of environmental impact
c) Preserving biodiversity
d) Sustainable development

48) Computer ethics involves _____.

a) Programming and coding without considering social consequences
b) Understanding the moral implications of computing technologies
c) Focusing only on technological innovation
d) Ignoring privacy issues

49) Weapons development ethics deals with _____.

a) The development of new technologies to enhance military capabilities
b) Restricting the use of all technological advancements
c) Focusing only on civilian safety
d) Only addressing the legal aspects of weapon development

50) Engineers as managers are expected to _____.

a) Focus solely on technical tasks
b) Lead teams, make strategic decisions, and manage projects
c) Ignore the business aspects of their work
d) Avoid taking responsibility for team outcomes

S.Y. (B. Tech) (Mechanical Engineering) (Semester - II) (New) (CBCS) Examination: March/April - 2026
Professional Ethics (VEC-02)

Day & Date: Friday, 29-05-2026 Max. Marks: 50
Time: 10:00 AM To 11:30 AM

Instructions: 1) All questions are compulsory.
2) Figures to the right indicate full marks.
3) Mention Question Paper Set (P/Q/R/S) on Top of Page.

Answer

Q.1 Answer the following Objective Type Questions. **50**

1) What is the primary goal of engineering ethics?
a) To maximize profits for companies
b) To ensure engineers work efficiently
c) To protect public safety and welfare
d) To follow industry standards

2) Which of the following is considered an ethical responsibility of an engineer?
a) Ignoring environmental concerns to meet deadlines
b) Ensuring the safety of the public
c) Disregarding laws and regulations
d) Making decisions based on personal interests

3) Ethical engineering practices promote _____.
a) The continuous pursuit of profit
b) The advancement of technology at any cost
c) Public trust and confidence in engineering
d) The minimization of safety regulations

4) Ethical engineers should consider which of the following when making decisions?
a) Profit maximization
b) Only the interests of the employer
c) Public safety, environmental impact, and ethical codes
d) Personal comfort and convenience

5) Which of the following is NOT part of an engineer's ethical responsibility?
a) Designing for safety and sustainability
b) Falsifying data to ensure project success
c) Reporting safety concerns immediately
d) Following industry standards and regulations

6) Ethical engineering involves making decisions based on _____.
   a) Personal opinions and values
   b) Financial incentives and company pressure
   c) Objective analysis, codes of ethics, and consideration for the public good
   d) Trends in the field of engineering

7) What should an engineer do if they discover a colleague is involved in unethical practices?
   a) Ignore the situation to avoid conflict
   b) Report the unethical behavior to management or relevant authorities
   c) Cover up the situation to protect the colleague
   d) Allow the behavior to continue if it does not affect the project

8) Ethical engineering practices include _____.
   a) Following industry standards and regulations
   b) Ensuring profitability is the main priority
   c) Cutting costs by any means necessary
   d) Avoiding the reporting of safety hazards

9) What is the primary focus of Kohlberg's theory?
   a) Cognitive development b) Social development
   c) Moral development d) Emotional development

10) Which term refers to an agreement that is made through discussions and compromises among parties?
   a) Conflict b) Consensus
   c) Dispute d) Isolation

11) What is the primary goal of risk assessment?
   a) To eliminate all risks
   b) To identify and mitigate potential risks
   c) To ignore potential risks
   d) To transfer risks to others

12) What is the primary goal of safety protocols?
   a) To increase productivity
   b) To reduce costs
   c) To prevent injuries and illnesses
   d) To improve employee morale

13) What is the difference between a hazard and a risk?
   a) A hazard is a potential risk, while a risk is a real danger
   b) A hazard is a real danger, while a risk is a potential danger
   c) A hazard is a physical danger, while a risk is a financial danger
   d) A hazard is a financial danger, while a risk is a physical danger

14) What should you do if you identify a potential risk in the workplace?
a) Ignore it and hope it goes away
b) Report it to your supervisor or HR
c) Try to mitigate it on your own
d) Transfer the risk to someone else

15) According to the theory of ethical egoism, what should guide an individual's moral actions?
a) The well-being of others
b) The individual's own self-interest
c) Social norms and conventions
d) Universal moral principles

16) Collegiality in a professional setting refers to _____.
a) Loyalty to your employer
b) Cooperation and mutual respect among colleagues
c) Competing for individual success
d) Avoiding work conflicts

17) Professional loyalty involves _____.
a) Reporting colleagues' mistakes publicly
b) Protecting the interests of the team or organization
c) Ignoring safety violations to avoid
d) Disclosing confidential information for personal conflict gain

18) Employee rights include _____.
a) The right to work without discrimination
b) The right to disregard company policies
c) The right to personal opinion but not affecting work
d) The right to ignore workplace safety standards

19) Intellectual Property Rights (IPR) protect _____.
a) The financial interests of corporations
b) The ownership and use of creative ideas and inventions
c) The physical assets of a company
d) Workplace performance evaluations

20) *Risk assessment* is important because it helps in _____.
a) Evaluating the potential impact of hazards on health and safety
b) Minimizing workplace productivity
c) Defining job roles
d) Ignoring environmental issues

21) In risk management, mitigation strategies aim to _____.
a) Accept all risks in the workplace
b) Reduce or eliminate identified risks
c) Increase the likelihood of hazards
d) Focus only on maximizing profits

22) Which of the following is a potential consequence of *occupational crime?*
a) Increased workplace productivity
b) Legal consequences and loss of reputation
c) Improvement in company safety standards
d) Higher employee satisfaction

23) Risk reduction in engineering refers to _____.
a) Implementing measures to lower the work chances of accidents
b) Increasing the number of hazards in the work environment
c) Ignoring potential risks
d) Cutting costs by removing safety measures

24) Public safety regulations are primarily designed to _____.
a) Ensure the safety of the company's assets
b) Protect the general public from potential harm
c) Increase revenue for the government
d) Focus only on preventing natural disasters

25) Multinational corporations (MNCs) are characterized by _____.
a) Operations in multiple countries with a centralized headquarters
b) Operating only in their home country
c) Limited influence on global markets
d) No responsibility toward environmental concerns

26) Environmental ethics primarily deals with _____.
a) Human responsibility to manage the environment and natural resources
b) Minimizing corporate profits
c) Technological advancements in engineering
d) Treating employees equally

27) Which of the following is NOT an example of environmental ethics?
a) Reducing pollution and waste
b) Maximizing resource use regardless of environmental impact
c) Preserving biodiversity
d) Sustainable development

28) Computer ethics involves _____.
a) Programming and coding without considering social consequences
b) Understanding the moral implications of computing technologies
c) Focusing only on technological innovation
d) Ignoring privacy issues

29) Weapons development ethics deals with _____.
a) The development of new technologies to enhance military capabilities
b) Restricting the use of all technological advancements
c) Focusing only on civilian safety
d) Only addressing the legal aspects of weapon development

30) Engineers as managers are expected to _____.
a) Focus solely on technical tasks
b) Lead teams, make strategic decisions, and manage projects
c) Ignore the business aspects of their work
d) Avoid taking responsibility for team outcomes

31) Consulting engineers are hired to _____.
a) Work on projects within the company they are employed
b) Provide expert advice on technical and engineering problems
c) Manage public relations for a company
d) Conduct legal investigations

32) Engineers acting as expert witnesses typically _____.
a) Present evidence and offer testimony in legal cases
b) Focus on public relations during a case
c) Manage engineering projects for legal firms
d) Directly represent the interests of a company court

33) Sample Code of Ethics of professional organizations typically includes _____.
a) Guidelines for acceptable behavior and decision-making
b) Rules for maximizing profits at any cost
c) Detailed technical specifications for projects
d) Guidelines for political involvement in engineering

34) ASME stands for _____.
a) American Society of Mechanical Engineers
b) American Society of Management Engineers
c) Association of Safety and Mechanical Engineers
d) Association of Scientific and Mechanical Engineers

35) The ASCE Code of Ethics emphasizes _____.
a) Following only local regulations
b) Maintaining professional integrity and responsibility
c) Focusing on personal financial gain
d) Ignoring environmental impacts

36) The IEEE Code of Ethics is primarily concerned with _____.
a) Fostering professional competence and integrity
b) Protecting corporate secrets
c) Maximizing technological advancements at any cost
d) Developing weapons for defense purposes

37) Global issues in engineering ethics include _____.
a) Cultural differences in engineering practices
b) Lack of understanding between technical and ethical concerns
c) Addressing both local and international engineering challenges
d) All of the above

38) A key challenge faced by multinational corporations is _____.
a) Balancing profits with social and environmental
b) Competing only within their home country responsibilities
c) Focusing solely on domestic issues
d) Ignoring corporate social responsibility

39) Empathy is the ability to _____.
a) Solve problems logically
b) Understand and share the feelings of others
c) Be indifferent to others' emotions
d) Only care about your own well-being

40) The quality of "caring" includes _____.
a) Showing concern for others' well-being
b) Ignoring the needs of others
c) Only helping family and friends
d) Seeking praise for helping others

41) What are fundamental human values?
a) Core beliefs and principles that guide human behavior and interactions
b) Economic indicators for social development
c) Religious doctrines that govern human life
d) Scientific facts that influence decision-making

42) Which value emphasizes treating others as you wish to be treated?
a) Respect b) Empathy
c) Honesty d) Kindness

43) The value of honesty is closely related to _____.
a) Truthfulness and sincerity b) Wealth and possessions
c) Power and influence d) Indifference and insensitivity

44) Which value involves considering the perspectives and feelings of others?
a) Empathy b) Courage
c) Determination d) Patience

45) The value of respect entails _____.

a) Recognizing the worth of every individual and their rights
b) Achieving personal success at any cost
c) Promoting competition among individuals
d) Pursuing material gains over relationships

46) Which value involves being accountable for one's decisions and actions?

a) Responsibility b) Flexibility
c) Confidence d) Arrogance

47) The value of integrity entails _____.

a) Being honest and true to oneself and others
b) Pursuing personal interests at any cost
c) Manipulating and deceiving others for personal gain
d) Ignoring the feelings and rights of other

48) Which value involves being considerate and thoughtful towards others?

a) Kindness b) Determination
c) Independence d) Indifference

49) The value of wisdom involves _____.

a) Making sound and informed judgments based on knowledge and experience
b) Pursuing personal interests at the expense of others
c) Ignoring the perspectives and concerns of others
d) Suppressing one's emotions and thoughts

50) Which value involves being truthful and sincere in one's actions and words?

a) Honesty b) Tolerance
c) Flexibility d) Arrogance

S.Y. (B.Tech.) (Mechanical Engineering) (Semester - II) (New) (CBCS) Examination: March/April – 2026
Engineering Mathematics - III (BTN02401)

Day & Date: Friday, 29-05-2026 Max. Marks: 70
Time: 10:00 AM To 01:00 PM

Instructions: 1) Q. No. 1 is compulsory. It should be solved in the first 30 minutes in Answer Book Page no 03 (Starting page of the Answer Book). Each question carries one mark.
2) Don't forget to Mention question paper set (P/Q/R/S) on top of page.
3) Figures to the right indicates full marks.

MCQ/Objective Type Questions

Duration: 30 Minutes Marks:14

Q.1 Choose the correct alternatives from the given options. 14

1) If the differential equation $\frac{d^n y}{dx^n} + P_1 \frac{d^{n-1}y}{dx^{n-1}} + \cdots + P_n\, y = X$ is a linear differential equation with constant coefficients, then the R.H.S. is a _____.

a) constant b) function of x only
c) function of y only d) function of x and y

2) $\frac{1}{D+1}(\log x + \frac{1}{x})$ is equal to _____.

a) e^x b) $\log x$
c) x d) 1

3) $L^{-1}\left(\frac{s+2}{(s+2)^2-5^2}\right) =$ _____.

a) $e^{2t}\sinh 5t$ b) $e^{-2t}\cosh 5t$
c) $e^{-2t}\sinh 5t$ d) $e^{-2t}\cosh 4t$

4) A continuous random variable has the following probability density function $f(x) = kx(1-x), 0 \le x \le 1$ then $k =$ _____.

a) 2 b) 6
c) 5 d) 3

5) $\frac{1}{D^2-4D+3}e^{2x}$ is equal to _____.

a) e^x b) $-e^{2x}$
c) e^{2x} d) e^{-x}

6) Error in the Trapezoidal rule is of order _____.

a) h^4 b) h^2

c) h^5 d) h^6

7) The Laplace transform of $t\cosh t$ is _____.

a) $-\frac{s^2-1}{(s+1)^2}$ b) $\frac{s^2-1}{(s^2+1)^2}$

c) $\frac{s^2+1}{(s^2-1)^2}$ d) $-\frac{s^2+1}{(s^2-1)^2}$

8) The conditions for expansion of a function in a Fourier series are known as _____.

a) Harmonic b) Riemann conditions

c) Periodic d) Dirichlet's conditions

9) If $x\sin x = 1 - \frac{1}{2}\cos x - \frac{2}{3}\cos 2x + \frac{2}{8}\cos 3x - \cdots$ in the interval $(-\pi, \pi)$ then $\frac{1}{1.3} - \frac{1}{3.5} + \frac{1}{5.7} - \frac{1}{7.9} + \cdots =$_____.

a) $\frac{\pi}{4}$ b) $\frac{\pi-1}{2}$

c) $\frac{\pi-3}{4}$ d) $\frac{\pi-2}{4}$

10) If $b_{yx} = \frac{5}{18}, b_{xy} = \frac{8}{5}$, then $r =$ _____.

a) $\frac{2}{5}$ b) $\frac{1}{2}$

c) $\frac{3}{2}$ d) $\frac{2}{3}$

11) If x_n is the nth iterate, then the Newton Raphson is _____.

a) $x_n = x_{n-1} + \frac{f(x_n)}{f'(x_n)}$ b) $x_n = x_{n-1} - \frac{f(x_n)}{f'(x_n)}$

c) $x_n = x_{n-1} - \frac{f(x_{n+1})}{f'(x_{n+1})}$ d) $x_n = x_{n-1} - \frac{f(x_{n-1})}{f'(x_{n-1})}$

12) For a S. N. V. z the probability that z is less than or equal to 1.68 is _____.

(Given: For a S. N. V z area between $z = 0$ to $z = 1.68$ is 0.4535)

a) 0.5465 b) 0.4535

c) 0.5453 d) 0.9535

13) The solution of the equation $pq = p + q$ is _____.

a) $z = ax + (a+1)y + c$

b) $z = (a+1)x + a(a-1)y + c$

c) $z = (a-1)x + a(a+1)y + c$

d) $z(a-1) = a(a-1)x + ay + c$

14) $z = a(x + y) + c$ is the general solution of _____.

a) $p.q = 1$ b) $p = 1 - q$

c) $p + q = 0$ d) $p = q$

Set **P**

S.Y. (B.Tech.) (Mechanical Engineering) (Semester - II) (New) (CBCS) Examination: March/April – 2026
Engineering Mathematics - III (BTN02401)

Day & Date: Friday, 29-05-2026 Max. Marks: 56
Time: 10:00 AM To 01:00 PM

Instructions: 1) All questions are compulsory.
2) Figures to the right indicate full marks.
3) Use of non-programmable calculator is allowed.

Section – I

Q.2 Attempt the following. (Any Three) **09**

a) Solve $(D^3 + 3D^2 + 3D + 1)y = e^{-x}$

b) Solve $(D^2 - 2D + 1)y = x.e^x \sin x$

c) Solve $x(y-z)p + y(z-x)q = z(x-y)$

d) Solve $pq = x^m y^n z^{2l}$

e) Obtain half range sine series for

$$f(x) = \begin{cases} x, & 0 < x < 1 \\ 2 - x, & 1 < x < 2 \end{cases}$$

Q.3 Attempt the following. (Any Three) **09**

a) Solve $p(1+q) = qz$

b) Solve $(D^2 + 3D + 2)y = \sin e^x$

c) Solve $(D^2 + 5D + 6)y = e^{-2x} \sec^2 x(1 + 2\tan x)$

d) Obtain Fourier series expansion of $f(x) = x$ in $(-1, 1)$

e) Find the Fourier series of the function

$$f(x) = \begin{cases} x, & 0 < x < \pi \\ 2\pi - x, & \pi < x < 2\pi \end{cases}$$

Q.4 Attempt the following. (Any Two) **10**

a) Solve the following differential equation $4\frac{\partial u}{\partial x} + \frac{\partial u}{\partial y} = 3u$ given that $u(0, y) = 3e^{-y}$ by the method of separation of variables.

b) Obtain half range cosine series for

$$f(x) = \begin{cases} x, & 0 < x < \frac{\pi}{2} \\ \pi - x, & \frac{\pi}{2} < x < \pi \end{cases}$$

c) Solve $(D^2 - D - 2)y = 2\log x + \frac{1}{x} + \frac{1}{x^2}$

Section – II

Q.5 Attempt the following. (Any Three) **09**

a) Find the probability that at most 4 defective bulbs will be found in a box of 200 bulbs if it is known that 2 percent of the bulbs are defective.

b) Calculate Spearman's coefficient of rank of correlation from the data on height and weight of 8 students.

Height (in inches)	60	62	64	66	68	70	72	74
Weight (in lbs.)	92	83	101	110	128	119	137	146

c) Calculate $L\left\{\int_0^t u.e^{-3u}\sin 4u\ du\right\}$

d) Calculate $L\left\{\cosh t\int_0^t e^u.\cosh u\ du\right\}$

e) Find an iterative formula for $\sqrt{N}$ and hence find the values of $\sqrt{35}$

Q.6 Attempt the following. (any Three) **09**

a) Evaluate $\int_0^\infty e^{-t}\left(\frac{\sin 3t+\sin 2t}{t}\right)dt$

b) Solve for a positive root by false position method.
$xe^x=\cos x$

c) Using Newton's-Raphson method, solve for a positive root of
$x^4-x=10$

d) A hospital switch board receives an average of 4 emergency calls in a 10 minutes interval. What is the Probability that:
i) there are at least 2 emergency calls
ii) there are exactly 3 emergency call in an interval of 10 minutes

e) Calculate $L\{t.e^{-2t}\sinh 4t\}$

Q.7 Attempt the following. (Any Two) **10**

a) If the mean life time and S.D. of battery cells are 12 hrs. and 3 hrs. What % of batteries will have life
i) between 10 and 14 hrs.
ii) More than 15 hrs.
iii) Less than 6 hrs.
(Given For S.N.V. z area from $z=0$ to $z=0.67$ is 0.2486, that from $z=0$ to $z=1$ is 0.3413 that from $z=0$ to $z=2$ is 0.4772)

b) Calculate $L^{-1}\left\{\frac{s^2}{(s^2+4)(s^2+9)}\right\}$ by using Convolution Method.

c) Compute the value of $\int_{0.2}^{1.4}(\sin x-\log x+e^x)dx$ taking $h=0.2$ and using Trapezoidal rule, Simpson's rule and Weddle's rule. Compare your results by integration.

Set Q

S.Y. (B.Tech.) (Mechanical Engineering) (Semester - II) (New) (CBCS) Examination: March/April – 2026
Engineering Mathematics - III (BTN02401)

Day & Date: Friday, 29-05-2026 Max. Marks: 70
Time: 10:00 AM To 01:00 PM

Instructions: 1) Q. No. 1 is compulsory. It should be solved in the first 30 minutes in Answer Book Page no 03 (Starting page of the Answer Book). Each question carries one mark.
2) Don't forget to Mention question paper set (P/Q/R/S) on top of page.
3) Figures to the right indicates full marks.

MCQ/Objective Type Questions

Duration: 30 Minutes Marks:14

Q.1 Choose the correct alternatives from the given options. 14

1) The conditions for expansion of a function in a Fourier series are known as _____.

a) Harmonic b) Riemann conditions
c) Periodic d) Dirichlet's conditions

2) If $x \sin x = 1 - \frac{1}{2}\cos x - \frac{2}{3}\cos 2x + \frac{2}{8}\cos 3x - \cdots$ in the interval $(-\pi, \pi)$ then $\frac{1}{1.3} - \frac{1}{3.5} + \frac{1}{5.7} - \frac{1}{7.9} + \cdots =$_____.

a) $\frac{\pi}{4}$ b) $\frac{\pi-1}{2}$
c) $\frac{\pi-3}{4}$ d) $\frac{\pi-2}{4}$

3) If $b_{yx} = \frac{5}{18}, b_{xy} = \frac{8}{5}$, then $r =$ _____.

a) $\frac{2}{5}$ b) $\frac{1}{2}$
c) $\frac{3}{2}$ d) $\frac{2}{3}$

4) If x_n is the nth iterate, then the Newton Raphson is _____.

a) $x_n = x_{n-1} + \frac{f(x_n)}{f'(x_n)}$ b) $x_n = x_{n-1} - \frac{f(x_n)}{f'(x_n)}$
c) $x_n = x_{n-1} - \frac{f(x_{n+1})}{f'(x_{n+1})}$ d) $x_n = x_{n-1} - \frac{f(x_{n-1})}{f'(x_{n-1})}$

5) For a S. N. V. z the probability that z is less than or equal to 1.68 is ____.
(Given: For a S. N. V z area between $z = 0$ to $z = 1.68$ is 0.4535)

a) 0.5465 b) 0.4535

c) 0.5453 d) 0.9535

6) The solution of the equation $pq = p + q$ is _____.

a) $z = ax + (a + 1)y + c$

b) $z = (a + 1)x + a(a - 1)y + c$

c) $z = (a - 1)x + a(a + 1)y + c$

d) $z(a - 1) = a(a - 1)x + ay + c$

7) $z = a(x + y) + c$ is the general solution of _____.

a) $p.q = 1$ b) $p = 1 - q$

c) $p + q = 0$ d) $p = q$

8) If the differential equation $\frac{d^n y}{dx^n} + P_1 \frac{d^{n-1} y}{dx^{n-1}} + \cdots + P_n\, y = X$ is a linear differential equation with constant coefficients, then the R.H.S. is a _____.

a) constant b) function of x only

c) function of y only d) function of x and y

9) $\frac{1}{D+1}(\log x + \frac{1}{x})$ is equal to _____.

a) e^x b) $\log x$

c) x d) 1

10) $L^{-1}\left(\frac{s+2}{(s+2)^2 - 5^2}\right) =$ _____.

a) $e^{2t} \sinh 5t$ b) $e^{-2t} \cosh 5t$

c) $e^{-2t} \sinh 5t$ d) $e^{-2t} \cosh 4t$

11) A continuous random variable has the following probability density function $f(x) = kx(1 - x), 0 \le x \le 1$ then $k =$ _____.

a) 2 b) 6

c) 5 d) 3

12) $\frac{1}{D^2 - 4D + 3} e^{2x}$ is equal to _____.

a) e^x b) $-e^{2x}$

c) e^{2x} d) e^{-x}

13) Error in the Trapezoidal rule is of order _____.

a) h^4 b) h^2

c) h^5 d) h^6

14) The Laplace transform of $t\cosh t$ is _____.

a) $-\frac{s^2-1}{(s+1)^2}$ b) $\frac{s^2-1}{(s^2+1)^2}$

c) $\frac{s^2+1}{(s^2-1)^2}$ d) $-\frac{s^2+1}{(s^2-1)^2}$

Seat No.	

Set **Q**

S.Y. (B.Tech.) (Mechanical Engineering) (Semester - II) (New) (CBCS) Examination: March/April – 2026
Engineering Mathematics - III (BTN02401)

Day & Date: Friday, 29-05-2026 Max. Marks: 56
Time: 10:00 AM To 01:00 PM

Instructions: 1) All questions are compulsory.
2) Figures to the right indicate full marks.
3) Use of non-programmable calculator is allowed.

Section – I

Q.2 Attempt the following. (Any Three) **09**

a) Solve $(D^3 + 3D^2 + 3D + 1)y = e^{-x}$

b) Solve $(D^2 - 2D + 1)y = x.e^x \sin x$

c) Solve $x(y-z)p + y(z-x)q = z(x-y)$

d) Solve $pq = x^m y^n z^{2l}$

e) Obtain half range sine series for

$$f(x) = \begin{cases} x, & 0 < x < 1 \\ 2 - x, & 1 < x < 2 \end{cases}$$

Q.3 Attempt the following. (Any Three) **09**

a) Solve $p(1+q) = qz$

b) Solve $(D^2 + 3D + 2)y = \sin e^x$

c) Solve $(D^2 + 5D + 6)y = e^{-2x} \sec^2 x(1 + 2\tan x)$

d) Obtain Fourier series expansion of $f(x) = x$ in $(-1, 1)$

e) Find the Fourier series of the function

$$f(x) = \begin{cases} x, & 0 < x < \pi \\ 2\pi - x, & \pi < x < 2\pi \end{cases}$$

Q.4 Attempt the following. (Any Two) **10**

a) Solve the following differential equation $4\frac{\partial u}{\partial x} + \frac{\partial u}{\partial y} = 3u$ given that $u(0, y) = 3e^{-y}$ by the method of separation of variables.

b) Obtain half range cosine series for

$$f(x) = \begin{cases} x, & 0 < x < \frac{\pi}{2} \\ \pi - x, & \frac{\pi}{2} < x < \pi \end{cases}$$

c) Solve $(D^2 - D - 2)y = 2\log x + \frac{1}{x} + \frac{1}{x^2}$

Section – II

Q.5 Attempt the following. (Any Three) **09**

a) Find the probability that at most 4 defective bulbs will be found in a box of 200 bulbs if it is known that 2 percent of the bulbs are defective.

b) Calculate Spearman's coefficient of rank of correlation from the data on height and weight of 8 students.

Height (in inches)	60	62	64	66	68	70	72	74
Weight (in lbs.)	92	83	101	110	128	119	137	146

c) Calculate $L\left\{\int_0^t u.e^{-3u}\sin 4u\ du\right\}$

d) Calculate $L\left\{\cosh t\int_0^t e^u.\cosh u\ du\right\}$

e) Find an iterative formula for $\sqrt{N}$ and hence find the values of $\sqrt{35}$

Q.6 Attempt the following. (any Three) **09**

a) Evaluate $\int_0^\infty e^{-t}\left(\frac{\sin 3t+\sin 2t}{t}\right)dt$

b) Solve for a positive root by false position method.
$xe^x=\cos x$

c) Using Newton's-Raphson method, solve for a positive root of
$x^4-x=10$

d) A hospital switch board receives an average of 4 emergency calls in a 10 minutes interval. What is the Probability that:
i) there are at least 2 emergency calls
ii) there are exactly 3 emergency call in an interval of 10 minutes

e) Calculate $L\{t.e^{-2t}\sinh 4t\}$

Q.7 Attempt the following. (Any Two) **10**

a) If the mean life time and S.D. of battery cells are 12 hrs. and 3 hrs. What % of batteries will have life
i) between 10 and 14 hrs.
ii) More than 15 hrs.
iii) Less than 6 hrs.
(Given For S.N.V. z area from $z=0$ to $z=0.67$ is 0.2486, that from $z=0$ to $z=1$ is 0.3413 that from $z=0$ to $z=2$ is 0.4772)

b) Calculate $L^{-1}\left\{\frac{s^2}{(s^2+4)(s^2+9)}\right\}$ by using Convolution Method.

c) Compute the value of $\int_{0.2}^{1.4}(\sin x-\log x+e^x)dx$ taking $h=0.2$ and using Trapezoidal rule, Simpson's rule and Weddle's rule. Compare your results by integration.

MCQ/Objective Type Questions

Duration: 30 Minutes Marks:14

Q.1 Choose the correct alternatives from the given options. **14**

1) If x_n is the nth iterate, then the Newton Raphson is _____.

a) $x_n = x_{n-1} + \frac{f(x_n)}{f'(x_n)}$ b) $x_n = x_{n-1} - \frac{f(x_n)}{f'(x_n)}$

c) $x_n = x_{n-1} - \frac{f(x_{n+1})}{f'(x_{n+1})}$ d) $x_n = x_{n-1} - \frac{f(x_{n-1})}{f'(x_{n-1})}$

2) For a S. N. V. z the probability that z is less than or equal to 1.68 is ____.
(Given: For a S. N. V z area between $z = 0$ to $z = 1.68$ is 0.4535)

a) 0.5465 b) 0.4535

c) 0.5453 d) 0.9535

3) The solution of the equation $pq = p + q$ is _____.

a) $z = ax + (a+1)y + c$
b) $z = (a+1)x + a(a-1)y + c$
c) $z = (a-1)x + a(a+1)y + c$
d) $z(a-1) = a(a-1)x + ay + c$

4) $z = a(x+y) + c$ is the general solution of _____.

a) $p.q = 1$ b) $p = 1 - q$

c) $p + q = 0$ d) $p = q$

5) If the differential equation $\frac{d^n y}{dx^n} + P_1 \frac{d^{n-1} y}{dx^{n-1}} + \cdots + P_n\, y = X$ is a linear differential equation with constant coefficients, then the R.H.S. is a _____.

a) constant
b) function of x only
c) function of y only
d) function of x and y

6) $\frac{1}{D+1}(\log x + \frac{1}{x})$ is equal to _____.

a) e^x
b) $\log x$
c) x
d) 1

7) $L^{-1}\left(\frac{s+2}{(s+2)^2-5^2}\right) =$ _____.

a) $e^{2t} \sinh 5t$
b) $e^{-2t} \cosh 5t$
c) $e^{-2t} \sinh 5t$
d) $e^{-2t} \cosh 4t$

8) A continuous random variable has the following probability density function $f(x) = kx(1-x), 0 \le x \le 1$ then $k =$ _____.

a) 2
b) 6
c) 5
d) 3

9) $\frac{1}{D^2-4D+3} e^{2x}$ is equal to _____.

a) e^x
b) $-e^{2x}$
c) e^{2x}
d) e^{-x}

10) Error in the Trapezoidal rule is of order _____.

a) h^4
b) h^2
c) h^5
d) h^6

11) The Laplace transform of $t \cosh t$ is _____.

a) $-\frac{s^2-1}{(s+1)^2}$
b) $\frac{s^2-1}{(s^2+1)^2}$
c) $\frac{s^2+1}{(s^2-1)^2}$
d) $-\frac{s^2+1}{(s^2-1)^2}$

12) The conditions for expansion of a function in a Fourier series are known as _____.

a) Harmonic
b) Riemann conditions
c) Periodic
d) Dirichlet's conditions

13) If $x \sin x = 1 - \frac{1}{2}\cos x - \frac{2}{3}\cos 2x + \frac{2}{8}\cos 3x - \cdots$ in the interval $(-\pi, \pi)$ then $\frac{1}{1.3} - \frac{1}{3.5} + \frac{1}{5.7} - \frac{1}{7.9} + \cdots =$_____.

a) $\frac{\pi}{4}$
b) $\frac{\pi-1}{2}$
c) $\frac{\pi-3}{4}$
d) $\frac{\pi-2}{4}$

14) If $b_{yx} = \frac{5}{18}, b_{xy} = \frac{8}{5}$, then $r =$ _____.

a) $\frac{2}{5}$ b) $\frac{1}{2}$

c) $\frac{3}{2}$ d) $\frac{2}{3}$

b) Solve for a positive root by false position method.
$xe^x=\cos x$

c) Using Newton's-Raphson method, solve for a positive root of
$x^4-x=10$

d) A hospital switch board receives an average of 4 emergency calls in a 10 minutes interval. What is the Probability that:
i) there are at least 2 emergency calls
ii) there are exactly 3 emergency call in an interval of 10 minutes

e) Calculate $L\{t.e^{-2t}\sinh 4t\}$

Q.7 Attempt the following. (Any Two) **10**

a) If the mean life time and S.D. of battery cells are 12 hrs. and 3 hrs. What % of batteries will have life
i) between 10 and 14 hrs.
ii) More than 15 hrs.
iii) Less than 6 hrs.
(Given For S.N.V. z area from $z=0$ to $z=0.67$ is 0.2486, that from $z=0$ to $z=1$ is 0.3413 that from $z=0$ to $z=2$ is 0.4772)

b) Calculate $L^{-1}\left\{\frac{s^2}{(s^2+4)(s^2+9)}\right\}$ by using Convolution Method.

c) Compute the value of $\int_{0.2}^{1.4}(\sin x-\log x+e^x)dx$ taking $h=0.2$ and using Trapezoidal rule, Simpson's rule and Weddle's rule. Compare your results by integration.

Set **P**

S.Y. (B.Tech.) (Electronics Engineering) (Semester - II) (New) (CBCS)
Examination: March/April - 2026
Database Management Systems (BTN04408)

Day & Date: Friday, 29-05-2026 Max. Marks: 70
Time: 10:00 AM To 01:00 PM

Instructions: 1) Q. No. 1 is compulsory. It should be solved in the first 30 minutes in Answer Book Page no 03 (Starting page of the Answer Book). Each question carries one mark.
2) Don't forget to Mention question paper set (P/Q/R/S) on top of page.
3) Figures to the right indicate full marks.

MCQ/Objective Type Questions

Duration: 30 Minutes Marks:14

Q.1 Choose the correct option from the following. **14**

1) An E-R diagram can graphically represent the _____.
a) Physical structure b) Logical structure
c) View structure d) Virtual structure

2) An entity set that does not have sufficient attributes to form a primary key is a _____.
a) strong entity set b) weak entity set
c) simple entity set d) primary entity set

3) Non leaf nodes of B+- tree structure form a _____.
a) Multilevel clustered indices b) Sparse indices
c) Multilevel dense indices d) multilevel sparse indices

4) A collection of interrelated records is called a _____.
a) Database
b) Spreadsheet
c) Management information system
d) Text file

5) Data Manipulation Language (DML) is not to _____.
a) Create information table in the Database
b) Insertion of new information into the Database
c) Deletion of information in the Database
d) Modification of information in the Database

6) The minimal set of super key is called _____.
a) Primary key b) Secondary key
c) Candidate key d) foreign key

7) A type of query that is placed within a WHERE or HAVING clause of another query is called _____.

a) Super query
b) Sub query
c) Master query
d) Multi-query

8) In SQL, which command is used to select only one copy of each set of duplicable rows _____.

a) SELECT DISTINCT
b) SELECT UNIQUE
c) SELECT DIFFERENT
d) All of the above

9) A _____ means that one record in a particular record type is related to only one record of another record type.

a) One-to-one relationship
b) One-to-many relationship
c) Many-to-one relationship
d) Many-to-many relationship

10) In SQL, which command(s) is (are) used to enable/disable all triggers on a table?

a) ALTER TRIGGERS
b) ALTER TABLE
c) MODIFY TRIGGERS IN TABLE
d) All of the above

11) In SQL, which command is used to changes data in a table?

a) UPDATE
b) INSERT
c) BROWSE
d) APPEND

12) An indexing operation _____.

a) Sorts a file using a single key
b) Sorts file using two keys
c) Establishes an index for a file
d) Both b) and c)

13) What are ACID properties of Transactions?

a) Atomicity, Consistency, Isolation, Database
b) Atomicity, Consistency, Isolation, Durability
c) Atomicity, Consistency, Inconsistent, Durability
d) Automatically, Concurrency, Isolation, Durability

14) A relation that has no partial dependencies is in which normal form _____.

a) 1NF
b) 2NF
c) 3NF
d) BCNF

Seat No.	

Set **P**

S.Y. (B.Tech.) (Electronics Engineering) (Semester - II) (New) (CBCS)
Examination: March/April - 2026
Database Management Systems (BTN04408)

Day & Date: Friday, 29-05-2026 Max. Marks: 56
Time: 10:00 AM To 01:00 PM

Instructions: 1) All questions are compulsory.
2) Figures to the right indicate full marks.

SECTION – I

Q.2 Attempt the following. (Any Four) **16**

a) Explain Database Architecture.

b) Explain Integrity constraints with example.

c) Explain group by and having clause with example.

d) Explain the different levels of abstraction.

e) Explain view Data.

Q.3 Attempt the following. (Any Two) **12**

a) Draw an ER Diagram for following schema? State the assumption about cardinality and other constraints in the answer.
A university registrar's office maintains data about the following entities:

i) courses, including number, title, credits, syllabus, and prerequisites;
ii) course offerings, including course number, year, semester, section number, instructor(s), timings, and classroom;
iii) students, including student-id, name, and program;
iv) Instructors, including identification number, name, department, and title.
v) Further, the enrollment of students in courses and grades awarded to students in each course they are enrolled for must be appropriately modeled.

Construct an E-R diagram for the registrar's office. Document all assumptions that you make about the mapping constraints.

b) Explain Types of SQL commands with example.

c) Explain Relational Algebra operations with example.

SECTION – II

Q.4 Attempt the following. (Any Four) **16**

a) Explain types of join operations with example.

b) What is BCNF? Explain a decomposition example.

c) Explain B+ tree with an example and how insertion works.

d) Explain ACID properties in DBMS.

e) Explain difference between dense and sparse index.

Q.5 Attempt the following. (Any Two) **12**

a) Explain Two phase locking protocol.

b) Define the following terms with an example.

i) Functional Dependency
ii) 3NF
iii) Static Hashing
iv) Types of Lock

c) Explain deadlock detection and prevention.

2) Don't forget to Mention question paper set (P/Q/R/S) on top of page.
3) Figures to the right indicates full marks.
4) Assume suitable data wherever necessary and mention it clearly.

MCQ/Objective Type Questions

Duration: 30 Minutes Marks:14

Q.1 Multiple Choice Questions. **14**

1) $\mathrm{A} \rightarrow (\mathrm{A} \vee \mathrm{q})$ is a _____.
a) Tautology b) Contradiction
c) Contingency d) None of the mentioned

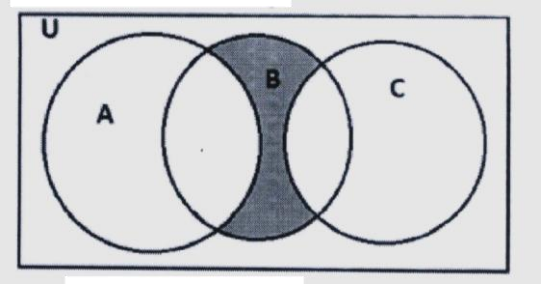
2) $\sim A \vee \sim B$ is logically equivalent to?
a) $\sim A \rightarrow \sim B$ b) $\sim A \wedge \sim B$
c) $A \rightarrow \sim B$ d) $B \vee A$

3) The contrapositive of $p \rightarrow q$ is the proposition of _____.
a) $\neg p \rightarrow \neg p$ b) $\neg q \rightarrow \neg p$
c) $q \rightarrow p$ d) $\neg q \rightarrow p$

4) PCNF is also called _____.
a) sum of product canonical form
b) product of sum canonical form
c) sum canonical form
d) product canonical form

5) What is the Cartesian product of $A = \{1,2\}$ and $B = \{a, b\}$?
a) $\{<1, a>, <1, b>, <2, a>, <b, b>\}$
b) $\{<1, 1>, <2, 2>, <a, a>, <b, b>\}$
c) $\{<1, a>, <2, a>, <1, b>, <2, b>\}$
d) $\{<1, 1>, <a, a>, <2, a>, <1, b>\}$

6) The shaded area of figure is best described by?



a) A' (Complement of A)
b) $B - (A \cap B) - (C \cap B)$
c) $A \cap C \cap B$
d) B' (Complement of B)

7) If set C is $\{1, 2, 3, 4\}$ and $C - D = \Phi$ then set D can be _____.
a) $\{1, 2, 4, 5\}$
b) $\{1, 2, 3\}$
c) $\{1, 2, 3, 4, 5\}$
d) None of the mentioned

8) The binary relation $\{(1,1), (2,1), (2,2), (2,3), (2,4), (3,1), (3,2)\}$ on the set $\{1, 2, 3\}$ is _____.
a) reflective, symmetric and transitive
b) irreflexive, symmetric and transitive
c) neither reflective, nor irreflexive but transitive
d) irreflexive and antisymmetric

9) Determine the partitions of the set $\{3, 4, 5, 6, 7\}$ from the following subsets.
a) $\{3,5\}, \{3,6,7\}, \{4,5,6\}$
b) $\{3\}, \{4,6\}, \{5\}, \{7\}$
c) $\{3,4,6\}, \{7\}$
d) $\{5,6\}, \{5,7\}$

10) For an inverse to exist it is necessary that a function should be _____.
a) injection
b) bijection
c) surjection
d) None of the mentioned

11) Hasse diagrams are drawn for _____.
a) Boolean Algebra
b) POSET
c) Lattices
d) For all

12) A group $(M, ^*)$ is said to be abelian if _____.
a) $(x + y) = (y + x)$
b) $(x^* y) = (y^* x)$
c) $(x + y) = x$
d) $(y^* x) = (x + y)$

13) A monoid is called a group if _____.
a) $(a^* a) = a = (a + c)$
b) $(a^* c) = (a + c)$
c) $(a + c) = a$
d) $(a^* c) = (c^* a) = e$

14) A cyclic group is always _____.
a) abelian group
b) monoid
c) semigroup
d) subgroup

S.Y. (B.Tech.) (Computer Science & Engineering) (Semester - I) (New) (NEP CBCS) Examination: March/April – 2026
Discrete Mathematical Structure (CSEPCC-01)

Day & Date: Monday, 04-05-2026 Max. Marks: 56
Time: 03:00 PM To 06:00 PM

Instructions: 1) All questions are compulsory.
2) Figures to the right indicate full marks.

Section – I

Q.2 Solve the following. (Any Three) **12**

a) Explain in detail composition of binary relation with example.

b) Given the relation R on set $X = \{1, 2, \ldots\ldots, 7\}$
$R = \{< x, y > | (x - y)$ is divisible by $3\}$, show that R is equivalence relation.

c) Define following terms
i) Contradiction
ii) Well Formed Formula

d) What is Tautological implication? Show the following implication.
$\neg P \wedge (P \vee Q) \Rightarrow Q$

Q.3 Solve the following. (Any Two) **16**

a) What is binary relation? List and define the properties of binary relation with example.

b) What is partial ordering? Explain in detail partial ordered set representation with Hasse diagram.
Let $X = \{2, 3, 6, 12, 24, 36\}$ and relation $\leq$ be such that $x \leq y$ if x divides y. Draw Hasse diagram of $< X, \leq >$.

c) Obtain the PDNF of I and PCNF of II following statement formulas
i) $(P \wedge Q) \vee (\neg P \wedge R) \vee (Q \wedge R)$
ii) $(\neg P \rightarrow R) \wedge (Q \leftrightarrow P)$

Section – II

Q.4 Solve the following. (Any Three) **12**

a) Define semigroup and explain the homomorphism of semigroup with example.

b) Write note on the following
i) subalgebra ii) sub-lattice

c) Define and explain in detail Inverse function.

d) Define group with an example.

Q.5 Solve the following. (Any Two) **16**

a) Define Algebraic System & State its properties.

b) Define and explain in detail Composition of functions
Let $X = \{1, 2, 3\}$ and $f, g, h,$ and s be functions from X to X given by
$f = \{< 1,2 >, < 2,3 >, < 3,1 >\}, g = \{< 1,2 >, < 2,1 >, < 3,3 >\}$
$h = \{< 1,1 >, < 2,2 >, < 3,1 >\}, s = \{< 1,1 >, < 2,2 >, < 3,3 >\}$
find fog, gof, fohog, sog, gos, sos and fos

c) Explain with example function and their types.

Set Q

S.Y. (B.Tech.) (Computer Science & Engineering) (Semester - I) (New) (NEP CBCS) Examination: March/April – 2026
Discrete Mathematical Structure (CSEPCC-01)

Day & Date: Monday, 04-05-2026 Max. Marks: 70
Time: 03:00 PM To 06:00 PM

Instructions: 1) Q. No. 1 is compulsory. It should be solved in the first 30 minutes in Answer Book Page no 03 (Starting page of the Answer Book). Each question carries one mark.
2) Don't forget to Mention question paper set (P/Q/R/S) on top of page.
3) Figures to the right indicates full marks.
4) Assume suitable data wherever necessary and mention it clearly.

MCQ/Objective Type Questions

Duration: 30 Minutes Marks:14

Q.1 Multiple Choice Questions. **14**

1) The binary relation $\{(1,1),(2,1),(2,2),(2,3),(2,4),(3,1),(3,2)\}$ on the set $\{1,2,3\}$ is _____.
a) reflective, symmetric and transitive
b) irreflexive, symmetric and transitive
c) neither reflective, nor irreflexive but transitive
d) irreflexive and antisymmetric

2) Determine the partitions of the set $\{3,4,5,6,7\}$ from the following subsets.
a) $\{3,5\},\{3,6,7\},\{4,5,6\}$ b) $\{3\},\{4,6\},\{5\},\{7\}$
c) $\{3,4,6\},\{7\}$ d) $\{5,6\},\{5,7\}$

3) For an inverse to exist it is necessary that a function should be _____.
a) injection b) bijection
c) surjection d) None of the mentioned

4) Hasse diagrams are drawn for _____.
a) Boolean Algebra b) POSET
c) Lattices d) For all

5) A group $(M,^*)$ is said to be abelian if _____.
a) $(x+y)=(y+x)$ b) $(x^*y)=(y^*x)$
c) $(x+y)=x$ d) $(y^*x)=(x+y)$

6) A monoid is called a group if _____.
a) $(a^*a)=a=(a+c)$ b) $(a^*c)=(a+c)$
c) $(a+c)=a$ d) $(a^*c)=(c^*a)=e$

7) A cyclic group is always _____.

a) abelian group
b) monoid
c) semigroup
d) subgroup

8) $\mathrm{A} \rightarrow (\mathrm{A} \vee \mathrm{q})$ is a _____.

a) Tautology
b) Contradiction
c) Contingency
d) None of the mentioned

9) $\sim A \vee \sim B$ is logically equivalent to?

a) $\sim A \rightarrow \sim B$
b) $\sim A \wedge \sim B$
c) $A \rightarrow \sim B$
d) $B \vee A$

10) The contrapositive of $p \rightarrow q$ is the proposition of _____.

a) $\neg p \rightarrow \neg p$
b) $\neg q \rightarrow \neg p$
c) $q \rightarrow p$
d) $\neg q \rightarrow p$

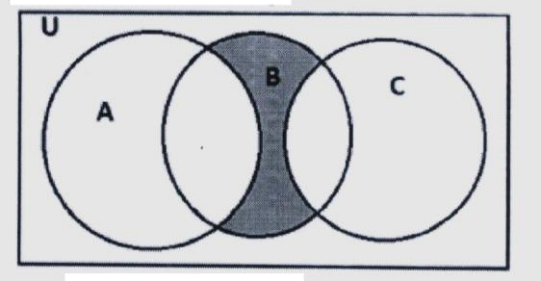
11) PCNF is also called _____.

a) sum of product canonical form
b) product of sum canonical form
c) sum canonical form
d) product canonical form

12) What is the Cartesian product of $A = \{1,2\}$ and $B = \{a, b\}$?

a) $\{< 1, a >, < 1, b >, < 2, a >, < b, b >\}$
b) $\{< 1, 1 >, < 2, 2 >, < a, a >, < b, b >\}$
c) $\{< 1, a >, < 2, a >, < 1, b >, < 2, b >\}$
d) $\{< 1, 1 >, < a, a >, < 2, a >, < 1, b >\}$

13) The shaded area of figure is best described by?



a) A' (Complement of A)
b) $B - (A \cap B) - (C \cap B)$
c) $A \cap C \cap B$
d) B' (Complement of B)

14) If set C is $\{1, 2, 3, 4\}$ and $C - D = \Phi$ then set D can be _____.

a) $\{1, 2, 4, 5\}$
b) $\{1, 2, 3\}$
c) $\{1, 2, 3, 4, 5\}$
d) None of the mentioned

S.Y. (B.Tech.) (Computer Science & Engineering) (Semester - I) (New) (NEP CBCS) Examination: March/April – 2026
Discrete Mathematical Structure (CSEPCC-01)

Day & Date: Monday, 04-05-2026 Max. Marks: 56
Time: 03:00 PM To 06:00 PM

Instructions: 1) All questions are compulsory.
2) Figures to the right indicate full marks.

Section – I

Q.2 Solve the following. (Any Three) **12**

a) Explain in detail composition of binary relation with example.

b) Given the relation R on set $X = \{1, 2, \ldots\ldots, 7\}$
$R = \{< x, y > | (x - y)$ is divisible by $3\}$, show that R is equivalence relation.

c) Define following terms
i) Contradiction
ii) Well Formed Formula

d) What is Tautological implication? Show the following implication.
$\neg P \wedge (P \vee Q) \Rightarrow Q$

Q.3 Solve the following. (Any Two) **16**

a) What is binary relation? List and define the properties of binary relation with example.

b) What is partial ordering? Explain in detail partial ordered set representation with Hasse diagram.
Let $X = \{2, 3, 6, 12, 24, 36\}$ and relation $\leq$ be such that $x \leq y$ if x divides y. Draw Hasse diagram of $< X, \leq >$.

c) Obtain the PDNF of I and PCNF of II following statement formulas
i) $(P \wedge Q) \vee (\neg P \wedge R) \vee (Q \wedge R)$
ii) $(\neg P \rightarrow R) \wedge (Q \leftrightarrow P)$

Section – II

Q.4 Solve the following. (Any Three) **12**

a) Define semigroup and explain the homomorphism of semigroup with example.

b) Write note on the following
i) subalgebra ii) sub-lattice

c) Define and explain in detail Inverse function.

d) Define group with an example.

Q.5 Solve the following. (Any Two) **16**

a) Define Algebraic System & State its properties.

b) Define and explain in detail Composition of functions
Let $X = \{1, 2, 3\}$ and $f, g, h,$ and s be functions from X to X given by
$f = \{< 1,2 >, < 2,3 >, < 3,1 >\}, g = \{< 1,2 >, < 2,1 >, < 3,3 >\}$

MCQ/Objective Type Questions

Duration: 30 Minutes Marks:14

Q.1 Choose the correct Answer. **14**

1) The memory used to store pixel intensity values for the display is called, _____.
a) Frame buffer b) Display file
c) Refresh buffer d) Both a & c

2) The aspect ratio of a display device is defined as, _____.
a) Height/Width b) Width/Height
c) Number of pixels d) None of the above

3) The process of determining the suitable or appropriate pixels for representing image or graphic object is called _____.
a) Animation b) Rasterization
c) Scan-Conversion d) Quantization

4) In the generation of circle by Bresenhan's algorithm, it is simple to generate _____.
a) All octants
b) One octant first and others by successive reflection
c) One octant first and others by successive rotation
d) One octant first and others by successive translation

5) The Bezier curve is defined by a set of, _____.
a) Midpoints b) Line segments
c) Control points d) Intersection points

6) The transformation that changes the coordinate positions of an object along a circular path is called _____.
a) Translation b) Scaling
c) Rotation d) Reflection

7) Which of the following techniques is used in Midpoint Subdivision algorithm?

a) Binary search
b) Bubble sort
c) Linear search
d) Sequential search

8) In Cohen-Sutherland line clipping algorithm, each region code has, ____.

a) 2 bits
b) 6 bits
c) 4 bits
d) 8 bits

9) _____ number of bits are used for representing each subregion of the Cohen- Sutherland line clipping algorithm.

a) 1
b) 2
c) 3
d) 4

10) If scaling factors Sx = Sy, then the scaling is, _____.

a) Uniform scaling
b) Differential scaling
c) Non-uniform scaling
d) Reflection

11) In Warnock algorithm, the polygon is called as surrounding, if it completely ____ the window.

a) outside
b) contains
c) intersects
d) None of above

12) The technique of using a minimum number of intensity levels to obtain increased visual resolution is called as _____.

a) Dithering
b) Halftoning
c) Depth cueing
d) Rendering

13) _____ control points are the points which decides the local shape of a curve.

a) local
b) global
c) interpolation
d) None

14) An area on a display device to which a window is mapped is called ___.

a) Window
b) View-port
c) Monitor
d) Workstation

S.Y. (B.Tech.) (Computer Science & Engineering) (Semester - I) (New) (NEP CBCS) Examination: March/April - 2026
Computer Graphics (CSEPCC-02)

Day & Date: Wednesday, 06-05-2026 Max. Marks: 56
Time: 03:00 PM To 06:00 PM

Instructions: 1) All questions are compulsory.
2) Figures to the right indicate full marks.
3) Make suitable assumptions if necessary and state them clearly.

SECTION – I

Q.2 Answer the following questions. (Any Four) **16**

a) Explain Random Scan display.

b) Explain 2D Rotation.

c) Define Rasterization and Resolution.

d) Scale the polygon with coordinates P(2,5), Q(7,10), C(10,2) by 2 units in both x and 3 units in y direction.

e) Write Homogeneous matrices for Translation, Scaling, Rotation.

Q.3 Answer the following questions. (Any One) **06**

a) Consider a line from (0,0) to (-5,-5). Use DDA line drawing algorithm to rasterize this line. (Assume suitable data wherever necessary)

b) Write a Bresenham's Circle generation algorithm.

Q.4 Explain the following: **06**

i) Multiple Transformation
ii) Rotation about an arbitrary point

SECTION – II

Q.5 Solve Any Four. **16**

a) Explain Display file compilation.

b) Explain Viewing transformation in detail.

c) Explain properties of Bezier curve.

d) Explain the concept of Fractal lines & surfaces.

e) Explain Halftoning.

Q.6 Solve Any One. **06**

a) Explain Warnock algorithm.

b) Define antialiasing? Explain different techniques of antialiasing.

Q.7 Attempt the following **06**

Explain Parametric and non-parametric curves.

Seat No.	

Set **Q**

MCQ/Objective Type Questions

Duration: 30 Minutes Marks:14

Q.1 Choose the correct Answer. **14**

1) In Cohen-Sutherland line clipping algorithm, each region code has, ____.
a) 2 bits b) 6 bits
c) 4 bits d) 8 bits

2) _____ number of bits are used for representing each subregion of the Cohen- Sutherland line clipping algorithm.
a) 1 b) 2
c) 3 d) 4

3) If scaling factors Sx = Sy, then the scaling is, _____.
a) Uniform scaling b) Differential scaling
c) Non-uniform scaling d) Reflection

4) In Warnock algorithm, the polygon is called as surrounding, if it completely ____ the window.
a) outside b) contains
c) intersects d) None of above

5) The technique of using a minimum number of intensity levels to obtain increased visual resolution is called as _____.
a) Dithering b) Halftoning
c) Depth cueing d) Rendering

6) _____ control points are the points which decides the local shape of a curve.
a) local b) global
c) interpolation d) None

7) An area on a display device to which a window is mapped is called ___.
a) Window b) View-port
c) Monitor d) Workstation

8) The memory used to store pixel intensity values for the display is called, _____.
a) Frame buffer b) Display file
c) Refresh buffer d) Both a & c

9) The aspect ratio of a display device is defined as, _____.
a) Height/Width b) Width/Height
c) Number of pixels d) None of the above

10) The process of determining the suitable or appropriate pixels for representing image or graphic object is called _____.
a) Animation b) Rasterization
c) Scan-Conversion d) Quantization

11) In the generation of circle by Bresenhan's algorithm, it is simple to generate _____.
a) All octants
b) One octant first and others by successive reflection
c) One octant first and others by successive rotation
d) One octant first and others by successive translation

12) The Bezier curve is defined by a set of, _____.
a) Midpoints b) Line segments
c) Control points d) Intersection points

13) The transformation that changes the coordinate positions of an object along a circular path is called _____.
a) Translation b) Scaling
c) Rotation d) Reflection

14) Which of the following techniques is used in Midpoint Subdivision algorithm?
a) Binary search b) Bubble sort
c) Linear search d) Sequential search

Seat No.	

Set **Q**

S.Y. (B.Tech.) (Computer Science & Engineering) (Semester - I) (New) (NEP CBCS) Examination: March/April - 2026
Computer Graphics (CSEPCC-02)

Day & Date: Wednesday, 06-05-2026 Max. Marks: 56
Time: 03:00 PM To 06:00 PM

Instructions: 1) All questions are compulsory.
2) Figures to the right indicate full marks.
3) Make suitable assumptions if necessary and state them clearly.

SECTION – I

Q.2 Answer the following questions. (Any Four) **16**

a) Explain Random Scan display.

b) Explain 2D Rotation.

c) Define Rasterization and Resolution.

d) Scale the polygon with coordinates P(2,5), Q(7,10), C(10,2) by 2 units in both x and 3 units in y direction.

e) Write Homogeneous matrices for Translation, Scaling, Rotation.

Q.3 Answer the following questions. (Any One) **06**

a) Consider a line from (0,0) to (-5,-5). Use DDA line drawing algorithm to rasterize this line. (Assume suitable data wherever necessary)

b) Write a Bresenham's Circle generation algorithm.

Q.4 Explain the following: **06**

i) Multiple Transformation
ii) Rotation about an arbitrary point

SECTION – II

Q.5 Solve Any Four. **16**

a) Explain Display file compilation.

b) Explain Viewing transformation in detail.

c) Explain properties of Bezier curve.

d) Explain the concept of Fractal lines & surfaces.

e) Explain Halftoning.

Q.6 Solve Any One. **06**

a) Explain Warnock algorithm.

b) Define antialiasing? Explain different techniques of antialiasing.

Q.7 Attempt the following **06**

Explain Parametric and non-parametric curves.

Seat No.	

Set **R**

S.Y. (B.Tech.) (Computer Science & Engineering) (Semester - I) (New) (NEP CBCS) Examination: March/April - 2026
Computer Graphics (CSEPCC-02)

Day & Date: Wednesday, 06-05-2026 Max. Marks: 70
Time: 03:00 PM To 06:00 PM

Instructions: 1) Q. No. 1 is compulsory. It should be solved in the first 30 minutes in Answer Book Page no 03 (Starting page of the Answer Book). Each question carries one mark.
2) Don't forget to Mention question paper set (P/Q/R/S) on top of page.
3) Figures to the right indicates full marks.
4) Make suitable assumptions if necessary and state them clearly.

MCQ/Objective Type Questions

Duration: 30 Minutes Marks:14

Q.1 Choose the correct Answer. **14**

1) In Warnock algorithm, the polygon is called as surrounding, if it completely ____ the window.
a) outside b) contains
c) intersects d) None of above

2) The technique of using a minimum number of intensity levels to obtain increased visual resolution is called as _____.
a) Dithering b) Halftoning
c) Depth cueing d) Rendering

3) _____ control points are the points which decides the local shape of a curve.
a) local b) global
c) interpolation d) None

4) An area on a display device to which a window is mapped is called ___.
a) Window b) View-port
c) Monitor d) Workstation

5) The memory used to store pixel intensity values for the display is called, _____.
a) Frame buffer b) Display file
c) Refresh buffer d) Both a & c

6) The aspect ratio of a display device is defined as, _____.
a) Height/Width b) Width/Height
c) Number of pixels d) None of the above

7) The process of determining the suitable or appropriate pixels for representing image or graphic object is called _____.

a) Animation b) Rasterization
c) Scan-Conversion d) Quantization

8) In the generation of circle by Bresenhan's algorithm, it is simple to generate _____.

a) All octants
b) One octant first and others by successive reflection
c) One octant first and others by successive rotation
d) One octant first and others by successive translation

9) The Bezier curve is defined by a set of, _____.

a) Midpoints b) Line segments
c) Control points d) Intersection points

10) The transformation that changes the coordinate positions of an object along a circular path is called _____.

a) Translation b) Scaling
c) Rotation d) Reflection

11) Which of the following techniques is used in Midpoint Subdivision algorithm?

a) Binary search b) Bubble sort
c) Linear search d) Sequential search

12) In Cohen-Sutherland line clipping algorithm, each region code has, ____.

a) 2 bits b) 6 bits
c) 4 bits d) 8 bits

13) _____ number of bits are used for representing each subregion of the Cohen- Sutherland line clipping algorithm.

a) 1 b) 2
c) 3 d) 4

14) If scaling factors Sx = Sy, then the scaling is, _____.

a) Uniform scaling b) Differential scaling
c) Non-uniform scaling d) Reflection

Seat No.

3) Figures to the right indicates full marks.
4) Assume suitable data if necessary.
5) Figures must be drawn wherever necessary.

MCQ/Objective Type Questions

Duration: 30 Minutes Marks:14

Q.1 Choose the correct Answer. **14**

1) Complexity of linear search algorithm is _____.
a) O(n) b) O(logn)
c) O(n2) d) O(n logn)

2) Which of the following sorting algorithm is of divide and conquer type?
a) Quick b) Radix
c) Selection d) Merge

3) If several elements are competing for the same bucket in the hash table, what's called?
a) Diffusion b) Replication
c) Collision d) Duplication

4) The data structure required to check whether an expression contains balanced parenthesis is?
a) Stack b) Queue
c) Linked List d) Tree

5) Process of removing an element from stack is called _____.
a) Create b) Push
c) Pop d) Evaluation

6) In a Queue, if a user tries to remove an element from empty Queue it is called _____.
a) Underflow b) Empty collection
c) Overflow d) Garbage Collection

7) In circular linked list, insertion of node requires modification of?
   a) One pointer
   b) Two pointer
   c) Three pointer
   d) Four pointer

8) The number of edges from the node to the deepest leaf is called _____ of the tree.
   a) Height
   b) Depth
   c) Length
   d) Width

9) What is degree of a node in a tree is _____.
   a) The number of children node has
   b) The height of node
   c) The number of edges connecting to node
   d) The level of node

10) In an AVL tree, which rotation is used to restore balance when the tree become right-heavy?
   a) Left rotation
   b) Right rotation
   c) Double left rotation
   d) Double right rotation

11) Which method of traversal of a binary tree involves visiting the left subtree, then the root, and then the right subtree?
   a) Preorder
   b) Inorder
   c) Postorder
   d) To simplify storing

12) Which of the following is the most widely used external memory data structure?
   a) AVL tree
   b) B-tree
   c) Red-black tree
   d) Both AVL tree and Red-black tree

13) The number of edges incident to a vertex is called its _____.
   a) Degree
   b) Diameter
   c) Eccentricity
   d) Centrality

14) Which of the following is not a type of graph?
   a) Bipartite graph
   b) Complete graph
   c) Isomorphic graph
   d) Scalar graph

S.Y. (B.Tech.) (Computer Science & Engineering) (Semester - I) (New) (NEP CBCS) Examination: March/April - 2026
Data Structure (CSEPCC-03)

Day & Date: Friday, 08-05-2026 Max. Marks: 70
Time: 03:00 PM To 06:00 PM

Instructions: 1) Q. No. 1 is compulsory. It should be solved in the first 30 minutes in Answer Book Page no 03 (Starting page of the Answer Book). Each question carries one mark.
2) Don't forget to Mention question paper set (P/Q/R/S) on top of page.
3) Figures to the right indicates full marks.
4) Assume suitable data if necessary.
5) Figures must be drawn wherever necessary.

MCQ/Objective Type Questions

Duration: 30 Minutes Marks:14

Q.1 Choose the correct Answer. **14**

1) In a Queue, if a user tries to remove an element from empty Queue it is called _____.
a) Underflow b) Empty collection
c) Overflow d) Garbage Collection

2) In circular linked list, insertion of node requires modification of?
a) One pointer b) Two pointer
c) Three pointer d) Four pointer

3) The number of edges from the node to the deepest leaf is called _____ of the tree.
a) Height b) Depth
c) Length d) Width

4) What is degree of a node in a tree is _____.
a) The number of children node has
b) The height of node
c) The number of edges connecting to node
d) The level of node

5) In an AVL tree, which rotation is used to restore balance when the tree become right-heavy?
a) Left rotation b) Right rotation
c) Double left rotation d) Double right rotation

6) Which method of traversal of a binary tree involves visiting the left subtree, then the root, and then the right subtree?
a) Preorder b) Inorder
c) Postorder d) To simplify storing

7) Which of the following is the most widely used external memory data structure?
   a) AVL tree
   b) B-tree
   c) Red-black tree
   d) Both AVL tree and Red-black tree

8) The number of edges incident to a vertex is called its _____.
   a) Degree
   b) Diameter
   c) Eccentricity
   d) Centrality

9) Which of the following is not a type of graph?
   a) Bipartite graph
   b) Complete graph
   c) Isomorphic graph
   d) Scalar graph

10) Complexity of linear search algorithm is _____.
   a) O(n)
   b) O(logn)
   c) O(n2)
   d) O(n logn)

11) Which of the following sorting algorithm is of divide and conquer type?
   a) Quick
   b) Radix
   c) Selection
   d) Merge

12) If several elements are competing for the same bucket in the hash table, what's called?
   a) Diffusion
   b) Replication
   c) Collision
   d) Duplication

13) The data structure required to check whether an expression contains balanced parenthesis is?
   a) Stack
   b) Queue
   c) Linked List
   d) Tree

14) Process of removing an element from stack is called _____.
   a) Create
   b) Push
   c) Pop
   d) Evaluation

Set S

S.Y. (B.Tech.) (Computer Science & Engineering) (Semester - I) (New) (NEP CBCS) Examination: March/April – 2026
Data Structure (CSEPCC-03)

Day & Date: Friday, 08-05-2026 Max. Marks: 56
Time: 03:00 PM To 06:00 PM

Instructions: 1) All questions are compulsory.
2) Figures to the right indicate full marks.
3) Assume suitable data if necessary.
4) Figures must be drawn wherever necessary.

SECTION – I

Q.2 Attempt Any Two. **10**

a) What is Searching? Differentiate between Linear Search and Binary Search.

b) Define Stack. Explain its operations using array.

c) Discuss in details collision resolution by chaining method.

Q.3 Attempt Any Three questions. **18**

a) Write a menu-driven program to implement a Queue showing operations.
i) Insertion
ii) Deletion
iii) Display

b) Write an algorithm to insert node at the beginning, End & Specified location in Singly Linked List.

c) Elaborate the steps for performing Insertion sort for given elements of array.
$A = \{14, 33, 27, 10, 35, 19, 44, 42\}$

d) Define Hashing. Explain different hashing function with example.

SECTION – II

Q.4 Attempt Any Two. **10**

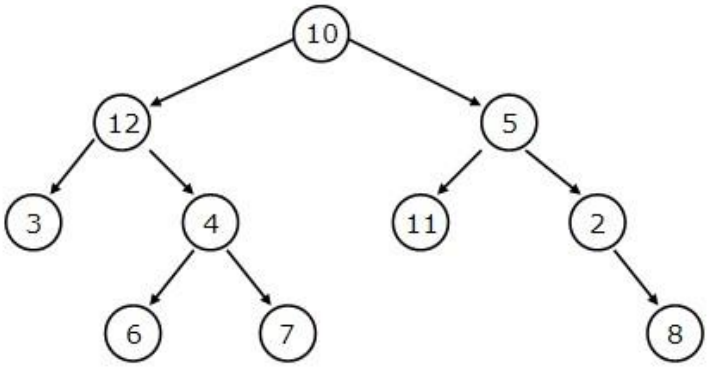
a) Explain Threaded Binary trees in details.

b) Write a note on Rotation types in AVL trees.

c) Explain how graph is represented with Adjacency Matrix and Adjacency List.

Q5 Attempt Any Three. **18**

a) Traverse the following tree by the in-order, pre-order and postorder methods.



b) Explain Dijkstra's Shortest path Algorithm with example.

c) Construct AVL tree for the following elements.
$\{9, 15, 20, 8, 7, 13, 10\}$

d) Explain B+ tree. Show the growth of the B+ tree of order 4 by inserting the following keys.
(show each step). $01, 05, 06, 02, 08, 12, 14, 15, 20, 07, 10$

Advanced Mathematics and Statistics (OE-01A)

Day & Date: Monday, 11-05-2026 Max. Marks: 70
Time: 03:00 PM To 06:00 PM

Instructions: 1) Q. No. 1 is compulsory. It should be solved in the first 30 minutes in Answer Book Page no 03 (Starting page of the Answer Book). Each question carries one mark.
2) Don't forget to Mention question paper set (P/Q/R/S) on top of page.
3) Figures to the right indicates full marks.

MCQ/Objective Type Questions

Duration: 30 Minutes Marks: 14

Q.1 Choose the correct alternative from the given option. 14

1) If a linear differential equation with constant coefficients and r.h.s. equal to zero has a real root m_1 repeated two times, then the corresponding part of the integral is _____.

a) $(c_1 + c_2)e^{m_1 x}$ b) $(c_1 x + c_2 x)e^{m_1 x}$

c) $(c_1 x + c_2 x^2)e^{m_1 x}$ d) $(c_1 + c_2 x)e^{m_1 x}$

2) $\frac{1}{D-a} X$ is equal to _____.

a) $\int Xe^{ax}dx$ b) $e^{ax}\int X.e^{-ax}dx$

c) $\int Xe^{-ax}dx$ d) $e^{-ax}\int Xe^{-ax}dx$

3) $\frac{1}{D+1}(\log x + \frac{1}{x})$ is equal to _____.

a) e^x b) 1

c) x d) $\log x$

4) The solution of the equation $\sqrt{p} + \sqrt{q} = 1$ is _____.

a) $z = ax + ay + c$ b) $z = ax + a^2 y + c$

c) $z = ax + \left(1 - \sqrt{a}\right)^2 y + c$ d) None of these

5) The solution of $p + q = 1$ is _____.

a) $z = ax + (1 - a)y + c$ b) $z = ax + by + c$

c) $z = ax + b(1 - y) + c$ d) $z = a(1 - x) + b(1 - y) + c$

6) If μ_1', μ_2', μ_3' are the first three moments of the distribution about certain number then third moment μ_3 of the distribution about the arithmetic mean is given by _____.

a) $\mu_3' - 3\mu_2'\mu_1' + 2(\mu_1')^3$ b) $\mu_3' - 3\mu_1' + (\mu_2')^3$

c) $\mu_3' + 2\mu_2'\mu_1' + (\mu_3')^3$ d) $\mu_3' + 3\mu_2'\mu_1' + {\mu_1'}^2$

7) Coefficient of kurtosis β_1 is given by _____.

a) $\frac{\mu_4}{\mu_3}$ b) $\frac{\mu_4}{\mu_2^2}$

c) $\frac{\mu_3^2}{\mu_2^3}$ d) $\frac{\mu_4}{\mu_2^3}$

8) If value of x for normal distribution is 35, mean of normal distribution is 65 and standard deviation is 25 then standardized random variable is _____.

a) -1.5 b) -1.7

c) -1.2 d) -4

9) A continuous random variable has the following probability density function $f(x) = kx(1-x), 0 \leq x \leq 1$ then $k =$ _____.

a) 2 b) 6

c) 3 d) 5

10) The area under the standard normal curve from $z = -\infty$ to $z = 0$ is _____.

a) 1 b) $1/2$

c) $3/2$ d) 0

11) If X, Y denote the deviation from their means and if $\sum X^2 = 80, \sum Y^2 = 50$ & $\sum XY = 60$ and $r =$_____.

a) 0.65 b) 0.78

c) 0.81 d) 0.95

12) If two regression lines are co-incides then the coefficient of correlation is _____.

a) 0 b) -1

c) ± 1 d) 1

13) If $\bar{x}$ is the mean of the random sample of size n taken from a population of size N having mean μ and standard deviation σ then mean and variance of the distribution $\bar{x}$ are _____.

a) $\bar{x}, \sigma^2$

b) $\bar{x}, \frac{\sigma^2}{n}$

c) μ, σ^2

d) μ, and $\frac{\sigma^2}{n}$

14) χ^2 distribution is defined by _____.

a) $\sum \frac{(O-E)}{E}$

b) $\sum \frac{(O-E)}{E^2}$

c) $\sum \left(\frac{O-E}{E}\right)^2$

d) $\sum \frac{(O-E)^2}{E}$

Set P

S.Y. (B.Tech.) (Computer Science & Engineering) (Semester - I) (New) (NEP CBCS) Examination: March/April-2026
Advanced Mathematics and Statistics (OE-01A)

Day & Date: Monday, 11-05-2026 Max. Marks: 56
Time: 03:00 PM To 06:00 PM

Instructions: 1) All question are compulsory.
2) Figures to the right indicate full marks.

SECTION – I

Q.2 Attempt Any Three. **09**

a) Find the Arithmetic mean, Median and standard deviation for the following frequency distribution.

x:	5	9	12	15	20	24	30	35	42	49
f:	3	6	8	8	9	10	8	7	6	2

b) Solve: $(D^2+1)y = x^2\cos 3x$

c) Solve: $(D^2-4D+4)y = 8.x^2e^{2x}\sin 2x$

d) Calculate the first four moments about the mean of the given distribution. Also find β_1, β_2

x	2.0	2.5	3.0	3.5	4.0	4.5	5.0
f	4	36	60	90	70	40	10

e) Solve $yzp + 2xq = xy$

Q.3 Attempt Any Three. **09**

a) Solve $\frac{d^2y}{dx^2} + 3\frac{dy}{dx} + 2y = 2e^{2x}$

b) Solve $p - q = x^2 + y^2$

c) Find the median of the following frequency distribution.

x	1	3	5	7	9	11	13	15	17
f	3	6	8	12	16	16	15	10	5

d) Solve $x(y-z)p + y(z-x)q = z(x-y)$

e) Solve $(D^3 - 3D + 2)y = x$

Q.4 Attempt Any Two. **10**

a) The first four moments of a distribution about the value 5 are $2, 20, 40$ and 50, from the given information obtain the first four central moments, Standard deviation and coefficient of skewness and kurtosis.

b) Solve the following differential equations by method of separation of variables.

$$3\frac{\partial u}{\partial x} + 2\frac{\partial u}{\partial y} = 0, \text{ given } u(x, 0) = 4e^{-x}$$

c) Solve $\frac{d^2y}{dx^2} + 3\frac{dy}{dx} + 2y = e^{e^x}$

SECTION – II

Q.5 Attempt Any Three. **09**

a) Find the value of k if each of the following functions is a probability density function.

$$f(x) = \begin{cases} kx^2(1 - x^3) & , \quad 0 \leq x \leq 1 \\ 0 & , \quad \text{otherwise} \end{cases}$$

b) The mean life time of 100 fluorescent light bulbs produced by a Company is computed to be 1570 Hrs. with S.D. of 120 Hrs. If μ is the mean lifetime of all the bulbs produced by the Company, Test the Hypothesis $\mu = 1600$ Hrs. against the alternative Hypothesis $\mu \neq 1600$ Hrs. using 5% level of Significance.
(Given Expected value at 5% LOS is 1.96)

c) Fit a Straight line $y = a + bx$ to the following data.

x	0	5	10	15	20	25
y	12	15	17	22	24	30

d) Two independent random sample have the following data.
$\overline{x_1} = 110, \sigma_1 = 25, n_1 = 16$
$\overline{x_2} = 120, \sigma_2 = 30, n_2 = 9$
If σ_1 and σ_2 are the S. D. of the populations. Test the hypothesis that $\mu_1 = \mu_2$ at 5% level of significance.
(The table value of t at $\alpha = 0.05$ for $v = 23$ degrees of freedom is 2.069)

e) If the probability of defective bulbs is 0.2, find the mean and variance of the distribution of defective bulbs in a lot of 1000 bulbs.

Q.6 Attempt Any Three. **09**

a) If two independent random samples of sizes 15 and 8 have respectively the following mean and population standard deviations, $\overline{x_1} = 980, \overline{x_2} = 1012; \sigma_1 = 75, \sigma_2 = 80$. Test the hypothesis that $\mu_1 = \mu_2$ at 5% level of significance.
(Given Expected value at 5% LOS with 21 DF is 2.080)

b) The number of telephone calls received by an operator in a ten-minute interval follows a Poisson distribution with mean 1. What is the probability of receiving (i) no call, (ii) less than four calls, in the interval? What is the most likely number of calls?

c) Calculate the Coefficient of correlations between x and y from the following data
$n = 25, \sum x = 100, \sum x^2 = 950, \sum y = 110, \sum y^2 = 850, \sum x\,y = 800$

d) Monthly salaries of 1000 workers have a normal distribution with mean of Rs. 575 and a standard deviation of Rs. 75. Find the number of workers having salaries between Rs. 500 and Rs. 625 p.m. Also find the minimum salary of the highest paid 200 workers.
(Given: For a standard normal variate
i) area between $t = 0$ and $t = 1$ is 0.3413,
ii) area between $t = 0$ and $t = 0.67$ is 0.2486,
iii) area between $t = 0$ and $t = 0.84$ is 0.3)

e) Obtain a second-degree curve to the following data and estimate the production in 1975.

Year	1921	1931	1941	1951	1961	1971	1981
Prod. (m. tons)	3	5	9	10	12	14	15

Q.7 Attempt Any Two. **10**

a) Fit a Binomial distribution to the following data,

Value of x	0	1	2	3	4	5	6
Frequency f	6	20	28	12	8	6	0

b) Calculate the lines of regression from the following table, gives the marks obtained by a class of students in two special papers.

Paper I	80	45	55	56	58	60	65	68	70	75	85
Paper II	82	56	50	48	60	62	64	65	70	74	90

c) Ten school boys were given a test in Statistics and their scores were recorded. They were given a month's special coaching and a second test was given to them in the same subject at the end of the coaching period. Test if the marks given below give evidence to the fact that the students are benefitted by coaching.

Marks in test I:	70	68	56	75	80	90	68	75	56	58
Marks in Test II:	68	70	52	73	75	78	80	92	54	55

(Given that value of t_α at 5% LOS for $v = 9$ degrees of freedom is 1.86 for one tailed test)

S.Y. (B.Tech.) (Computer Science & Engineering) (Semester - I) (New) (NEP CBCS) Examination: March/April-2026
Advanced Mathematics and Statistics (OE-01A)

Day & Date: Monday, 11-05-2026 Max. Marks: 70
Time: 03:00 PM To 06:00 PM

Instructions: 1) Q. No. 1 is compulsory. It should be solved in the first 30 minutes in Answer Book Page no 03 (Starting page of the Answer Book). Each question carries one mark.
2) Don't forget to Mention question paper set (P/Q/R/S) on top of page.
3) Figures to the right indicates full marks.

MCQ/Objective Type Questions

Duration: 30 Minutes Marks: 14

Q.1 Choose the correct alternative from the given option. 14

1) If value of x for normal distribution is 35, mean of normal distribution is 65 and standard deviation is 25 then standardized random variable is _____.

a) -1.5 b) -1.7
c) -1.2 d) -4

2) A continuous random variable has the following probability density function $f(x) = kx(1-x), 0 \leq x \leq 1$ then $k =$ _____.

a) 2 b) 6
c) 3 d) 5

3) The area under the standard normal curve from $z = -\infty$ to $z = 0$ is _____.

a) 1 b) $1/2$
c) $3/2$ d) 0

4) If X, Y denote the deviation from their means and if $\sum X^2 = 80, \sum Y^2 = 50$ & $\sum XY = 60$ and $r =$_____.

a) 0.65 b) 0.78
c) 0.81 d) 0.95

5) If two regression lines are co-incides then the coefficient of correlation is _____.

a) 0 b) -1
c) ± 1 d) 1

6) If $\bar{x}$ is the mean of the random sample of size n taken from a population of size N having mean μ and standard deviation σ then mean and variance of the distribution $\bar{x}$ are _____.

a) $\bar{x}, \sigma^2$ b) $\bar{x}, \frac{\sigma^2}{n}$

c) μ, σ^2 d) μ, and $\frac{\sigma^2}{n}$

7) χ^2 distribution is defined by _____.

a) $\sum \frac{(O-E)}{E}$ b) $\sum \frac{(O-E)}{E^2}$

c) $\sum \left(\frac{O-E}{E}\right)^2$ d) $\sum \frac{(O-E)^2}{E}$

8) If a linear differential equation with constant coefficients and r.h.s. equal to zero has a real root m_1 repeated two times, then the corresponding part of the integral is _____.

a) $(c_1 + c_2)e^{m_1 x}$ b) $(c_1 x + c_2 x)e^{m_1 x}$

c) $(c_1 x + c_2 x^2)e^{m_1 x}$ d) $(c_1 + c_2 x)e^{m_1 x}$

9) $\frac{1}{D-a} X$ is equal to _____.

a) $\int X e^{ax} dx$ b) $e^{ax} \int X . e^{-ax} dx$

c) $\int X e^{-ax} dx$ d) $e^{-ax} \int X e^{-ax} dx$

10) $\frac{1}{D+1}(\log x + \frac{1}{x})$ is equal to _____.

a) e^x b) 1

c) x d) $\log x$

11) The solution of the equation $\sqrt{p} + \sqrt{q} = 1$ is _____.

a) $z = ax + ay + c$ b) $z = ax + a^2 y + c$

c) $z = ax + \left(1 - \sqrt{a}\right)^2 y + c$ d) None of these

12) The solution of $p + q = 1$ is _____.

a) $z = ax + (1-a)y + c$ b) $z = ax + by + c$

c) $z = ax + b(1-y) + c$ d) $z = a(1-x) + b(1-y) + c$

13) If μ_1', μ_2', μ_3' are the first three moments of the distribution about certain number then third moment μ_3 of the distribution about the arithmetic mean is given by _____.

a) $\mu_3' - 3\mu_2'\mu_1' + 2(\mu_1')^3$ b) $\mu_3' - 3\mu_1' + (\mu_2')^3$

c) $\mu_3' + 2\mu_2'\mu_1' + (\mu_3')^3$ d) $\mu_3' + 3\mu_2'\mu_1' + {\mu_1'}^2$

14) Coefficient of kurtosis β_1 is given by _____.

a) $\frac{\mu_4}{\mu_3}$

b) $\frac{\mu_4}{\mu_2^2}$

c) $\frac{\mu_3^2}{\mu_2^3}$

d) $\frac{\mu_4}{\mu_2^3}$

Set **Q**

S.Y. (B.Tech.) (Computer Science & Engineering) (Semester - I) (New) (NEP CBCS) Examination: March/April-2026
Advanced Mathematics and Statistics (OE-01A)

Day & Date: Monday, 11-05-2026 Max. Marks: 56
Time: 03:00 PM To 06:00 PM

Instructions: 1) All question are compulsory.
2) Figures to the right indicate full marks.

SECTION – I

Q.2 Attempt Any Three. **09**

a) Find the Arithmetic mean, Median and standard deviation for the following frequency distribution.

x:	5	9	12	15	20	24	30	35	42	49
f:	3	6	8	8	9	10	8	7	6	2

b) Solve: $(D^2+1)y = x^2\cos 3x$

c) Solve: $(D^2-4D+4)y = 8.x^2e^{2x}\sin 2x$

d) Calculate the first four moments about the mean of the given distribution. Also find β_1, β_2

x	2.0	2.5	3.0	3.5	4.0	4.5	5.0
f	4	36	60	90	70	40	10

e) Solve $yzp + 2xq = xy$

Q.3 Attempt Any Three. **09**

a) Solve $\frac{d^2y}{dx^2} + 3\frac{dy}{dx} + 2y = 2e^{2x}$

b) Solve $p - q = x^2 + y^2$

c) Find the median of the following frequency distribution.

x	1	3	5	7	9	11	13	15	17
f	3	6	8	12	16	16	15	10	5

d) Solve $x(y-z)p + y(z-x)q = z(x-y)$

e) Solve $(D^3 - 3D + 2)y = x$

Q.4 Attempt Any Two. **10**

a) The first four moments of a distribution about the value 5 are $2, 20, 40$ and 50, from the given information obtain the first four central moments, Standard deviation and coefficient of skewness and kurtosis.

b) Solve the following differential equations by method of separation of variables.

$$3\frac{\partial u}{\partial x} + 2\frac{\partial u}{\partial y} = 0, \text{ given } u(x, 0) = 4e^{-x}$$

c) Solve $\frac{d^2y}{dx^2} + 3\frac{dy}{dx} + 2y = e^{e^x}$

SECTION – II

Q.5 Attempt Any Three. **09**

a) Find the value of k if each of the following functions is a probability density function.

$$f(x) = \begin{cases} kx^2(1 - x^3) & , \quad 0 \leq x \leq 1 \\ 0 & , \quad \text{otherwise} \end{cases}$$

b) The mean life time of 100 fluorescent light bulbs produced by a Company is computed to be 1570 Hrs. with S.D. of 120 Hrs. If μ is the mean lifetime of all the bulbs produced by the Company, Test the Hypothesis $\mu = 1600$ Hrs. against the alternative Hypothesis $\mu \neq 1600$ Hrs. using 5% level of Significance.
(Given Expected value at 5% LOS is 1.96)

c) Fit a Straight line $y = a + bx$ to the following data.

x	0	5	10	15	20	25
y	12	15	17	22	24	30

d) Two independent random sample have the following data.
$\overline{x_1} = 110, \sigma_1 = 25, n_1 = 16$
$\overline{x_2} = 120, \sigma_2 = 30, n_2 = 9$
If σ_1 and σ_2 are the S. D. of the populations. Test the hypothesis that $\mu_1 = \mu_2$ at 5% level of significance.
(The table value of t at $\alpha = 0.05$ for $v = 23$ degrees of freedom is 2.069)

e) If the probability of defective bulbs is 0.2, find the mean and variance of the distribution of defective bulbs in a lot of 1000 bulbs.

Q.6 Attempt Any Three. **09**

a) If two independent random samples of sizes 15 and 8 have respectively the following mean and population standard deviations, $\overline{x_1} = 980, \overline{x_2} = 1012; \sigma_1 = 75, \sigma_2 = 80$. Test the hypothesis that $\mu_1 = \mu_2$ at 5% level of significance.
(Given Expected value at 5% LOS with 21 DF is 2.080)

b) The number of telephone calls received by an operator in a ten-minute interval follows a Poisson distribution with mean 1. What is the probability of receiving (i) no call, (ii) less than four calls, in the interval? What is the most likely number of calls?

c) Calculate the Coefficient of correlations between x and y from the following data
$n = 25, \sum x = 100, \sum x^2 = 950, \sum y = 110, \sum y^2 = 850, \sum x\,y = 800$

d) Monthly salaries of 1000 workers have a normal distribution with mean of Rs. 575 and a standard deviation of Rs. 75. Find the number of workers having salaries between Rs. 500 and Rs. 625 p.m. Also find the minimum salary of the highest paid 200 workers.
(Given: For a standard normal variate
i) area between $t = 0$ and $t = 1$ is 0.3413,
ii) area between $t = 0$ and $t = 0.67$ is 0.2486,
iii) area between $t = 0$ and $t = 0.84$ is 0.3)

e) Obtain a second-degree curve to the following data and estimate the production in 1975.

Year	1921	1931	1941	1951	1961	1971	1981
Prod. (m. tons)	3	5	9	10	12	14	15

Q.7 Attempt Any Two. **10**

a) Fit a Binomial distribution to the following data,

Value of x	0	1	2	3	4	5	6
Frequency f	6	20	28	12	8	6	0

b) Calculate the lines of regression from the following table, gives the marks obtained by a class of students in two special papers.

Paper I	80	45	55	56	58	60	65	68	70	75	85
Paper II	82	56	50	48	60	62	64	65	70	74	90

c) Ten school boys were given a test in Statistics and their scores were recorded. They were given a month's special coaching and a second test was given to them in the same subject at the end of the coaching period. Test if the marks given below give evidence to the fact that the students are benefitted by coaching.

Marks in test I:	70	68	56	75	80	90	68	75	56	58
Marks in Test II:	68	70	52	73	75	78	80	92	54	55

(Given that value of t_α at 5% LOS for $v = 9$ degrees of freedom is 1.86 for one tailed test)

S.Y. (B.Tech.) (Computer Science & Engineering) (Semester - I) (New) (NEP CBCS) Examination: March/April-2026
Advanced Mathematics and Statistics (OE-01A)

Day & Date: Monday, 11-05-2026 Max. Marks: 70
Time: 03:00 PM To 06:00 PM

Instructions: 1) Q. No. 1 is compulsory. It should be solved in the first 30 minutes in Answer Book Page no 03 (Starting page of the Answer Book). Each question carries one mark.
2) Don't forget to Mention question paper set (P/Q/R/S) on top of page.
3) Figures to the right indicates full marks.

MCQ/Objective Type Questions

Duration: 30 Minutes Marks: 14

Q.1 Choose the correct alternative from the given option. **14**

1) If X, Y denote the deviation from their means and if $\sum X^2 = 80, \sum Y^2 = 50$ & $\sum XY = 60$ and $r =$_____.

a) 0.65 b) 0.78
c) 0.81 d) 0.95

2) If two regression lines are co-incides then the coefficient of correlation is _____.

a) 0 b) -1
c) ± 1 d) 1

3) If $\bar{x}$ is the mean of the random sample of size n taken from a population of size N having mean μ and standard deviation σ then mean and variance of the distribution $\bar{x}$ are _____.

a) $\bar{x}, \sigma^2$ b) $\bar{x}, \frac{\sigma^2}{n}$

c) μ, σ^2 d) μ, and $\frac{\sigma^2}{n}$

4) χ^2 distribution is defined by _____.

a) $\sum \frac{(O-E)}{E}$ b) $\sum \frac{(O-E)}{E^2}$
c) $\sum \left(\frac{O-E}{E}\right)^2$ d) $\sum \frac{(O-E)^2}{E}$

5) If a linear differential equation with constant coefficients and r.h.s. equal to zero has a real root m_1 repeated two times, then the corresponding part of the integral is _____.

a) $(c_1 + c_2)e^{m_1 x}$ b) $(c_1 x + c_2 x)e^{m_1 x}$

c) $(c_1 x + c_2 x^2)e^{m_1 x}$ d) $(c_1 + c_2 x)e^{m_1 x}$

6) $\frac{1}{D-a} X$ is equal to _____.

a) $\int X e^{ax} dx$ b) $e^{ax} \int X . e^{-ax} dx$

c) $\int X e^{-ax} dx$ d) $e^{-ax} \int X e^{-ax} dx$

7) $\frac{1}{D+1}(\log x + \frac{1}{x})$ is equal to _____.

a) e^x b) 1

c) x d) $\log x$

8) The solution of the equation $\sqrt{p} + \sqrt{q} = 1$ is _____.

a) $z = ax + ay + c$ b) $z = ax + a^2 y + c$

c) $z = ax + \left(1 - \sqrt{a}\right)^2 y + c$ d) None of these

9) The solution of $p + q = 1$ is _____.

a) $z = ax + (1 - a)y + c$ b) $z = ax + by + c$

c) $z = ax + b(1 - y) + c$ d) $z = a(1 - x) + b(1 - y) + c$

10) If μ_1', μ_2', μ_3' are the first three moments of the distribution about certain number then third moment μ_3 of the distribution about the arithmetic mean is given by _____.

a) $\mu_3' - 3\mu_2'\mu_1' + 2(\mu_1')^3$ b) $\mu_3' - 3\mu_1' + (\mu_2')^3$

c) $\mu_3' + 2\mu_2'\mu_1' + (\mu_3')^3$ d) $\mu_3' + 3\mu_2'\mu_1' + {\mu_1'}^2$

11) Coefficient of kurtosis β_1 is given by _____.

a) $\frac{\mu_4}{\mu_3}$ b) $\frac{\mu_4}{\mu_2^2}$

c) $\frac{\mu_3^2}{\mu_2^3}$ d) $\frac{\mu_4}{\mu_2^3}$

12) If value of x for normal distribution is 35, mean of normal distribution is 65 and standard deviation is 25 then standardized random variable is _____.

a) -1.5 b) -1.7

c) -1.2 d) -4

13) A continuous random variable has the following probability density function $f(x) = kx(1-x), 0 \leq x \leq 1$ then $k =$ _____.

a) 2 b) 6

c) 3 d) 5

14) The area under the standard normal curve from $z = -\infty$ to $z = 0$ is _____.

a) 1 b) $1/2$

c) $3/2$ d) 0

Seat No.	

Set R

S.Y. (B.Tech.) (Computer Science & Engineering) (Semester - I) (New) (NEP CBCS) Examination: March/April-2026
Advanced Mathematics and Statistics (OE-01A)

Day & Date: Monday, 11-05-2026 Max. Marks: 56
Time: 03:00 PM To 06:00 PM

Instructions: 1) All question are compulsory.
2) Figures to the right indicate full marks.

SECTION – I

Q.2 Attempt Any Three. **09**

a) Find the Arithmetic mean, Median and standard deviation for the following frequency distribution.

x:	5	9	12	15	20	24	30	35	42	49
f:	3	6	8	8	9	10	8	7	6	2

b) Solve: $(D^2+1)y = x^2\cos 3x$

c) Solve: $(D^2-4D+4)y = 8.x^2e^{2x}\sin 2x$

d) Calculate the first four moments about the mean of the given distribution. Also find β_1, β_2

x	2.0	2.5	3.0	3.5	4.0	4.5	5.0
f	4	36	60	90	70	40	10

e) Solve $yzp + 2xq = xy$

Q.3 Attempt Any Three. **09**

a) Solve $\frac{d^2y}{dx^2} + 3\frac{dy}{dx} + 2y = 2e^{2x}$

b) Solve $p - q = x^2 + y^2$

c) Find the median of the following frequency distribution.

x	1	3	5	7	9	11	13	15	17
f	3	6	8	12	16	16	15	10	5

d) Solve $x(y-z)p + y(z-x)q = z(x-y)$

e) Solve $(D^3 - 3D + 2)y = x$

Q.4 Attempt Any Two. **10**

a) The first four moments of a distribution about the value 5 are $2, 20, 40$ and 50, from the given information obtain the first four central moments, Standard deviation and coefficient of skewness and kurtosis.

b) Solve the following differential equations by method of separation of variables.

$$3\frac{\partial u}{\partial x} + 2\frac{\partial u}{\partial y} = 0, \text{ given } u(x, 0) = 4e^{-x}$$

c) Solve $\frac{d^2y}{dx^2} + 3\frac{dy}{dx} + 2y = e^{e^x}$

SECTION – II

Q.5 Attempt Any Three. **09**

a) Find the value of k if each of the following functions is a probability density function.

$$f(x) = \begin{cases} kx^2(1 - x^3) & , \quad 0 \leq x \leq 1 \\ 0 & , \quad \text{otherwise} \end{cases}$$

b) The mean life time of 100 fluorescent light bulbs produced by a Company is computed to be 1570 Hrs. with S.D. of 120 Hrs. If μ is the mean lifetime of all the bulbs produced by the Company, Test the Hypothesis $\mu = 1600$ Hrs. against the alternative Hypothesis $\mu \neq 1600$ Hrs. using 5% level of Significance.
(Given Expected value at 5% LOS is 1.96)

c) Fit a Straight line $y = a + bx$ to the following data.

x	0	5	10	15	20	25
y	12	15	17	22	24	30

d) Two independent random sample have the following data.
$\overline{x_1} = 110, \sigma_1 = 25, n_1 = 16$
$\overline{x_2} = 120, \sigma_2 = 30, n_2 = 9$
If σ_1 and σ_2 are the S. D. of the populations. Test the hypothesis that $\mu_1 = \mu_2$ at 5% level of significance.
(The table value of t at $\alpha = 0.05$ for $v = 23$ degrees of freedom is 2.069)

e) If the probability of defective bulbs is 0.2, find the mean and variance of the distribution of defective bulbs in a lot of 1000 bulbs.

Q.6 Attempt Any Three. **09**

a) If two independent random samples of sizes 15 and 8 have respectively the following mean and population standard deviations, $\overline{x_1} = 980, \overline{x_2} = 1012; \sigma_1 = 75, \sigma_2 = 80$. Test the hypothesis that $\mu_1 = \mu_2$ at 5% level of significance.
(Given Expected value at 5% LOS with 21 DF is 2.080)

b) The number of telephone calls received by an operator in a ten-minute interval follows a Poisson distribution with mean 1. What is the probability of receiving (i) no call, (ii) less than four calls, in the interval? What is the most likely number of calls?

c) Calculate the Coefficient of correlations between x and y from the following data
$n = 25, \sum x = 100, \sum x^2 = 950, \sum y = 110, \sum y^2 = 850, \sum x\,y = 800$

d) Monthly salaries of 1000 workers have a normal distribution with mean of Rs. 575 and a standard deviation of Rs. 75. Find the number of workers having salaries between Rs. 500 and Rs. 625 p.m. Also find the minimum salary of the highest paid 200 workers.
(Given: For a standard normal variate
i) area between $t = 0$ and $t = 1$ is 0.3413,
ii) area between $t = 0$ and $t = 0.67$ is 0.2486,
iii) area between $t = 0$ and $t = 0.84$ is 0.3)

e) Obtain a second-degree curve to the following data and estimate the production in 1975.

Year	1921	1931	1941	1951	1961	1971	1981
Prod. (m. tons)	3	5	9	10	12	14	15

Q.7 Attempt Any Two. **10**

a) Fit a Binomial distribution to the following data,

Value of x	0	1	2	3	4	5	6
Frequency f	6	20	28	12	8	6	0

b) Calculate the lines of regression from the following table, gives the marks obtained by a class of students in two special papers.

Paper I	80	45	55	56	58	60	65	68	70	75	85
Paper II	82	56	50	48	60	62	64	65	70	74	90

c) Ten school boys were given a test in Statistics and their scores were recorded. They were given a month's special coaching and a second test was given to them in the same subject at the end of the coaching period. Test if the marks given below give evidence to the fact that the students are benefitted by coaching.

Marks in test I:	70	68	56	75	80	90	68	75	56	58
Marks in Test II:	68	70	52	73	75	78	80	92	54	55

(Given that value of t_α at 5% LOS for $\nu = 9$ degrees of freedom is 1.86 for one tailed test)

Seat No.	

Set **S**

S.Y. (B.Tech.) (Computer Science & Engineering) (Semester - I) (New) (NEP CBCS) Examination: March/April-2026
Advanced Mathematics and Statistics (OE-01A)

Day & Date: Monday, 11-05-2026 Max. Marks: 70
Time: 03:00 PM To 06:00 PM

Instructions: 1) Q. No. 1 is compulsory. It should be solved in the first 30 minutes in Answer Book Page no 03 (Starting page of the Answer Book). Each question carries one mark.

MCQ/Objective Type Questions

Duration: 30 Minutes Marks: 14

Q.1 Choose the correct alternative from the given option. **14**

1) If μ_1', μ_2', μ_3' are the first three moments of the distribution about certain number then third moment μ_3 of the distribution about the arithmetic mean is given by _____.

a) $\mu_3' - 3\mu_2'\mu_1' + 2(\mu_1')^3$ b) $\mu_3' - 3\mu_1' + (\mu_2')^3$

c) $\mu_3' + 2\mu_2'\mu_1' + (\mu_3')^3$ d) $\mu_3' + 3\mu_2'\mu_1' + {\mu_1'}^2$

2) Coefficient of kurtosis β_1 is given by _____.

a) $\frac{\mu_4}{\mu_3}$ b) $\frac{\mu_4}{\mu_2^2}$

c) $\frac{\mu_3^2}{\mu_2^3}$ d) $\frac{\mu_4}{\mu_2^3}$

3) If value of x for normal distribution is 35, mean of normal distribution is 65 and standard deviation is 25 then standardized random variable is _____.

a) -1.5 b) -1.7

c) -1.2 d) -4

4) A continuous random variable has the following probability density function $f(x) = kx(1-x), 0 \le x \le 1$ then $k =$ _____.

a) 2 b) 6

c) 3 d) 5

5) The area under the standard normal curve from $z = -\infty$ to $z = 0$ is _____.

a) 1 b) $1/2$

c) $3/2$ d) 0

6) If X, Y denote the deviation from their means and if $\sum X^2 = 80, \sum Y^2 = 50$ & $\sum XY = 60$ and $r =$_____.

a) 0.65 b) 0.78

c) 0.81 d) 0.95

7) If two regression lines are co-incides then the coefficient of correlation is _____.

a) 0 b) -1

c) ± 1 d) 1

8) If $\bar{x}$ is the mean of the random sample of size n taken from a population of size N having mean μ and standard deviation σ then mean and variance of the distribution $\bar{x}$ are _____.

a) $\bar{x}, \sigma^2$ b) $\bar{x}, \frac{\sigma^2}{n}$

c) μ, σ^2 d) μ, and $\frac{\sigma^2}{n}$

9) χ^2 distribution is defined by _____.

a) $\sum \frac{(O-E)}{E}$ b) $\sum \frac{(O-E)}{E^2}$

c) $\sum \left(\frac{O-E}{E}\right)^2$ d) $\sum \frac{(O-E)^2}{E}$

10) If a linear differential equation with constant coefficients and r.h.s. equal to zero has a real root m_1 repeated two times, then the corresponding part of the integral is _____.

a) $(c_1 + c_2)e^{m_1 x}$ b) $(c_1 x + c_2 x)e^{m_1 x}$

c) $(c_1 x + c_2 x^2)e^{m_1 x}$ d) $(c_1 + c_2 x)e^{m_1 x}$

11) $\frac{1}{D-a} X$ is equal to _____.

a) $\int X e^{ax} dx$ b) $e^{ax} \int X . e^{-ax} dx$

c) $\int X e^{-ax} dx$ d) $e^{-ax} \int X e^{-ax} dx$

12) $\frac{1}{D+1}(\log x + \frac{1}{x})$ is equal to _____.

a) e^x b) 1

c) x d) $\log x$

13) The solution of the equation $\sqrt{p} + \sqrt{q} = 1$ is _____.

a) $z = ax + ay + c$ b) $z = ax + a^2 y + c$

c) $z = ax + \left(1 - \sqrt{a}\right)^2 y + c$ d) None of these

14) The solution of $p + q = 1$ is _____.

a) $z = ax + (1 - a)y + c$ b) $z = ax + by + c$

c) $z = ax + b(1 - y) + c$ d) $z = a(1 - x) + b(1 - y) + c$

Q.2 Attempt Any Three. **09**

a) Find the Arithmetic mean, Median and standard deviation for the following frequency distribution.

x:	5	9	12	15	20	24	30	35	42	49
f:	3	6	8	8	9	10	8	7	6	2

b) Solve: $(D^2+1)y = x^2\cos 3x$

c) Solve: $(D^2-4D+4)y = 8.x^2e^{2x}\sin 2x$

d) Calculate the first four moments about the mean of the given distribution. Also find β_1, β_2

x	2.0	2.5	3.0	3.5	4.0	4.5	5.0
f	4	36	60	90	70	40	10

e) Solve $yzp + 2xq = xy$

Q.3 Attempt Any Three. **09**

a) Solve $\frac{d^2y}{dx^2} + 3\frac{dy}{dx} + 2y = 2e^{2x}$

b) Solve $p - q = x^2 + y^2$

c) Find the median of the following frequency distribution.

x	1	3	5	7	9	11	13	15	17
f	3	6	8	12	16	16	15	10	5

d) Solve $x(y-z)p + y(z-x)q = z(x-y)$

e) Solve $(D^3 - 3D + 2)y = x$

Q.4 Attempt Any Two. **10**

a) The first four moments of a distribution about the value 5 are $2, 20, 40$ and 50, from the given information obtain the first four central moments, Standard deviation and coefficient of skewness and kurtosis.

b) Solve the following differential equations by method of separation of variables.

$$3\frac{\partial u}{\partial x} + 2\frac{\partial u}{\partial y} = 0, \text{ given } u(x, 0) = 4e^{-x}$$

c) Solve $\frac{d^2y}{dx^2} + 3\frac{dy}{dx} + 2y = e^{e^x}$

SECTION – II

Q.5 Attempt Any Three. **09**

a) Find the value of k if each of the following functions is a probability density function.

$$f(x) = \begin{cases} kx^2(1 - x^3) & , \quad 0 \leq x \leq 1 \\ 0 & , \quad \text{otherwise} \end{cases}$$

b) The mean life time of 100 fluorescent light bulbs produced by a Company is computed to be 1570 Hrs. with S.D. of 120 Hrs. If μ is the mean lifetime of all the bulbs produced by the Company, Test the Hypothesis $\mu = 1600$ Hrs. against the alternative Hypothesis $\mu \neq 1600$ Hrs. using 5% level of Significance.
(Given Expected value at 5% LOS is 1.96)

c) Fit a Straight line $y = a + bx$ to the following data.

x	0	5	10	15	20	25
y	12	15	17	22	24	30

d) Two independent random sample have the following data.
$\overline{x_1} = 110, \sigma_1 = 25, n_1 = 16$
$\overline{x_2} = 120, \sigma_2 = 30, n_2 = 9$
If σ_1 and σ_2 are the S. D. of the populations. Test the hypothesis that $\mu_1 = \mu_2$ at 5% level of significance.
(The table value of t at $\alpha = 0.05$ for $v = 23$ degrees of freedom is 2.069)

e) If the probability of defective bulbs is 0.2, find the mean and variance of the distribution of defective bulbs in a lot of 1000 bulbs.

Q.6 Attempt Any Three. **09**

a) If two independent random samples of sizes 15 and 8 have respectively the following mean and population standard deviations, $\overline{x_1} = 980, \overline{x_2} = 1012; \sigma_1 = 75, \sigma_2 = 80$. Test the hypothesis that $\mu_1 = \mu_2$ at 5% level of significance.
(Given Expected value at 5% LOS with 21 DF is 2.080)

b) The number of telephone calls received by an operator in a ten-minute interval follows a Poisson distribution with mean 1. What is the probability of receiving (i) no call, (ii) less than four calls, in the interval? What is the most likely number of calls?

c) Calculate the Coefficient of correlations between x and y from the following data
$n = 25, \sum x = 100, \sum x^2 = 950, \sum y = 110, \sum y^2 = 850, \sum x\,y = 800$

d) Monthly salaries of 1000 workers have a normal distribution with mean of Rs. 575 and a standard deviation of Rs. 75. Find the number of workers having salaries between Rs. 500 and Rs. 625 p.m. Also find the minimum salary of the highest paid 200 workers.
(Given: For a standard normal variate
i) area between $t = 0$ and $t = 1$ is 0.3413,
ii) area between $t = 0$ and $t = 0.67$ is 0.2486,
iii) area between $t = 0$ and $t = 0.84$ is 0.3)

e) Obtain a second-degree curve to the following data and estimate the production in 1975.

Year	1921	1931	1941	1951	1961	1971	1981
Prod. (m. tons)	3	5	9	10	12	14	15

3) Figures to the right indicates full marks.
4) Assume suitable data if necessary.

MCQ/Objective Type Questions

Duration: 30 Minutes Marks:14

Q.1 Choose correct answer: 14

1) Which of the following is/are considered examples of the Consumer to Consumer (C2C) model?
a) Amazon.com b) e-bay
c) Rentalic.com d) All of the above

2) Which type of E - Commerce is Amazon?
a) B2B b) B2C
c) G2B d) G2C

3) Which of the following is the set of planned activities that are designed to result in a profit in the marketplace?
a) Profit model b) Business model
c) Business plan d) Revenue model

4) All of the following are major B2C business models except _____.
a) content provider b) industry consortium
c) transaction broker d) service provider

5) After completing an E-Commerce transaction, the buyer needs to _____.
a) Pick the product and go home
b) Take the product to home
c) Collect it directly from a store
d) Wait till the delivery of the product

6) SCM is a game of 4 C's = Collaboration; Co-operation; Co-ordination and _____.
a) Controlling b) Connectivity
c) Communication d) Customer

7) Which e-commerce transaction provides the benefits of eliminating the requirement of a middleman?
a) Business to Business
b) Business to Government
c) Consumer to Business
d) Business to Consumer

8) After completing an E-Commerce transaction, the seller and buyer should be provided an opportunity to _____ their transaction experience.
a) undo
b) regret
c) provide rating for
d) forget

9) Digital Cash has the following characteristics _____.
a) Anonymity
b) Security
c) Confidentiality
d) All of the Above

10) Benefit of E-Commerce platform is/are _____.
a) competitive pricing to benefit both seller and buyer
b) large number of products to choose from
c) ability to buy products not available in the local market
d) All of them

11) Which type of attack is a method of defeating a cryptographic scheme of trying a large number of possibilities?
a) Teardrop attack
b) Brute force attack
c) Phlashing
d) Smurf attack

12) Which is the model in E - E-Commerce, if the seller is an individual and the buyer is a business firm?
a) Consumer to Business
b) Business to Consumer
c) Business to Business
d) Consumer to Consumer

13) Which of the following authenticates and handles credit card payment for E-Commerce?
a) Payment gateway
b) E - E-Commerce gateway
c) Software gateway
d) E-Wallets

14) What is another name called PDoS?
a) Brute force attack
b) Non-technical attack
c) Phlashing
d) Smurf attack

Time: 03:00 PM To 06:00 PM

Instructions: 1) All questions are compulsory.
2) Figures to the right indicate full marks.

SECTION – I

Q.2 Attempt Any Three. **12**

a) Explain various aspects of perception.

b) Explain major philosophical movements and their impact.

c) Explain the interdisciplinary nature of disciplines under humanities and social sciences.

d) Explain how perceptual processes shape human behaviour.

e) Write a short note on: Scope of humanities.

Q.3 Attempt Any Two. **16**

a) Explore main theories of psychology.

b) Write in details the effects of psychology on social communication.

c) Explore the merits and demerits of democratic system of rule.

SECTION -II

Q.4 Attempt Any Three. **12**

a) How did industrial revolution contribute to technical advancements?

b) Write a short note on: Ethics in Engineering.

c) Write a short note on: Social Institutions.

d) Which are the different aspects of culture and society?

e) Explain how the ancient civilizations have contributed to the modern society.

Q.5 Attempt Any Two. **16**

a) Explain the concept of industrialization with its social and economic consequences.

b) Explore various economic theories and their thinkers.

c) Which are the technological innovations in 18^{th} & 19^{th} century? Explain.

MCQ/Objective Type Questions

Duration: 30 Minutes Marks:14

Q.1 Choose the correct alternatives from the following. **14**

1) Culture includes _____.
a) Only art and literature
b) Traditions, beliefs, and values
c) Economic systems
d) Political institutions only

2) In which ancient civilization did the term "democracy" originate?
a) Ancient Egypt b) Ancient Greece
c) Ancient Rome d) Mesopotamia

3) Inflation means _____.
a) Increase in employment
b) Decrease in prices
c) Increase in general price level
d) Increase in production

4) Socialization refers to _____.
a) Economic growth b) Learning social norms
c) Political participation d) Cultural diffusion

5) The study of language structure and its evolution is called _____.
a) Sociology b) Linguistics
c) Psychology d) Anthropology

6) Feminism primarily addresses issues related to _____.
a) Economic inequality
b) Gender equality and women's rights
c) Political ideologies
d) Technological advancements

7) Dr. Sigmund Freud is best known for his contributions to _____.
a) Political science
b) Psychoanalysis
c) Economic theory
d) Structural linguistics

8) Which discipline studies the production, distribution, and consumption of goods and services?
a) Sociology
b) Political Science
c) Economics
d) History

9) Identify the primary focus of ethics in philosophy.
a) Logic and reasoning
b) Moral principles and conduct
c) Aesthetics and beauty
d) Scientific discovery

10) History is best defined as the study of _____.
a) Future events
b) Past human activities
c) Natural phenomena
d) Scientific experiments

11) The archaeology focuses on _____.
a) Economic theories
b) The study of celestial bodies
c) Material remains of past societies
d) Genetic research

12) Which of the following disciplines deals with political systems and governance?
a) Economics
b) Political Science
c) Sociology
d) Cultural Studies

13) Urbanization is best described as _____.
a) Decline of rural population
b) Growth of cities and towns
c) Spread of agriculture
d) Industrial decline

14) Sociology is the study of _____.
a) Individual mind
b) Social behaviour and society
c) Political institutions
d) Historical events

MCQ/Objective Type Questions

Duration: 30 Minutes Marks:14

Q.1 MCQ/Objective Type Questions: 14

1) Which of the following best defines the primary purpose of management?
a) To create rules for employees to follow
b) To maintain financial records
c) To achieve organizational goals efficiently and effectively
d) To monitor employee behavior

2) Which function of management involves setting objectives and determining a course of action to achieve them?
a) Organizing b) Controlling
c) Planning d) Leading

3) Which of the following best represents the concept of social responsibility in management?
a) Maximizing shareholder wealth at any cost
b) Avoiding all legal penalties
c) Balancing profit-making with obligations to stakeholders and society
d) Focusing only on employee welfare

4) What is the most important reason for managers to follow ethical principles in decision-making?
a) To avoid law suits
b) To improve public image
c) To build trust and long-term sustainability
d) To increase profits quickly

5) Which is the first step in the planning process?
a) Developing alternatives b) Evaluating alternatives
c) Setting objectives d) Selecting the best alternative

6) What is the primary purpose of organizing in management?
a) To control employee behavior
b) To define roles, responsibilities, and allocate resources
c) To create strict rules for employees
d) To plan financial statements

7) What is the main purpose of employee training and development?
a) To penalize poor performance
b) To reduce the number of staff
c) To delay promotions
d) To enhance employee skills and support career growth

8) According to Maslow's Hierarchy of Needs, which of the following is the highest level of need?
a) Safety needs
b) Social needs
c) Esteem needs
d) Self-actualization

9) The "Carrot and Stick" approach to motivation is based on _____.
a) Building self-esteem through empowerment
b) Providing both rewards and punishments to influence behavior
c) Offering training and development opportunities
d) Recognizing only financial incentives

10) Which of the following best defines "quality" in the context of management?
a) Producing the highest quantity of products
b) Conforming to standards and satisfying customer needs
c) Meeting only internal business goals
d) Offering products at the lowest possible price

11) Which of the following is not typically considered an element of quality?
a) Performance
b) Reliability
c) Advertising
d) Durability

12) Pareto Analysis is based on the principle that _____.
a) All causes contribute equally to problems
b) 20% of the causes account for 80% of the problems
c) Quality problems are random and unpredictable
d) Only external factors affect product quality

13) The main goal of Six Sigma is to _____.
a) Increase the speed of production
b) Eliminate all human involvement in processes
c) Reduce process variation and defects to near zero
d) Ensure all products are handmade

14) What is the primary purpose of Statistical Process Control (SPC)?
a) To eliminate all manual processes
b) To ensure marketing strategies are effective
c) To monitor and control a process through statistical methods
d) To increase financial profitability only

MCQ/Objective Type Questions

Duration: 30 Minutes Marks: 14

Q.1 Choose the correct alternative from the given option. **14**

1) The particular Integral of $(D^2 - 2D + 1)y = -4e^x$ is _____.

a) $-2x^2e^x$ b) $-4x^2e^x$
c) $(C_1 + C_2x)e^x$ d) x^2e^x

2) The general solution of $(D^2 - 4)^2y = 0$ is _____.

a) $y = C_1e^{2x} + C_2e^{-2x}$
b) $y = (C_1 + C_2x)e^{-2x} + (C_3 + C_4x)e^{2x}$
c) $y = C_1\cos 2x + C_2\sin 2x + (C_3 + C_4x)e^{2x}$
d) None of these

3) The value of $\frac{1}{D-a}X =$ _____.

a) $e^{-ax}\int e^{-ax}Xdx$ b) $e^{-ax}\int e^{ax}Xdx$
c) $e^{ax}\int e^{-ax}Xdx$ d) $e^{ax}\int e^{ax}Xdx$

4) $Lf(t)\delta(t-a) =$ _____.

a) $e^{-as}f(t)$ b) $e^{-as}f(a)$
c) $e^{as}f(a)$ d) $e^{-as}f(t-a)$

5) If $L\{f(t)\} = \frac{a}{s^2+a^2}$ then $L\left\{\int_0^1 f(t)dt\right\} =$ _____.

a) $\frac{1}{s(s^2+a^2)}$ b) $\frac{a}{s(s^2+a^2)}$

c) $\frac{as}{s^2+a^2}$ d) $\frac{as^2}{s^2+a^2}$

6) The inverse z-transform of $\frac{z}{z-3}, |z| > 3$ (with $k \geq 0$) is _____.

a) 3^{-k} b) 3^{k+1}

c) 3^k d) 3^{-k-1}

7) The rate of convergence of Newton-Raphson Method is _____.

a) 1 b) 2

c) $\sqrt{2}$ d) 3

8) A positive real root of the equation $xe^x - 2 = 0$ is lies between _____.

a) 2 and 3 b) 1 and 2

c) 3 and 4 d) 0 and 1

9) Since $z\{1\} = \frac{z}{z-1}, z\{a^k\}, k \geq 0 =$ _____.

a) $\frac{z}{z-a}$ b) $\frac{z}{a(z-1)}$

c) $\frac{a}{z-a}$ d) $\frac{z}{az-1}$

10) In the interval $(0,1)$ the constant term in the cosine series of $f(x) = x^2$ is _____.

a) 0 b) $\frac{1}{2}$

c) $\frac{1}{3}$ d) $\frac{\pi}{4}$

11) In the cosine series of $f(x) = \pi x - x^2$ for $0 < x < \pi$, the constant term is _____.

a) $\frac{\pi^2}{4}$ b) $\frac{\pi^2}{16}$

c) $\frac{\pi^2}{6}$ d) $\frac{\pi^2}{2}$

12) For the function $f(x) \begin{matrix} = & 0, & -\pi < x < 0 \\ = & x, & 0 < x < \pi \end{matrix}$

The value of Fourier constant a_0 is _____.

a) $\frac{\pi^2}{4}$ b) $\frac{\pi}{4}$

c) $\frac{\pi^2}{2}$ d) $\frac{-\pi}{4}$

13) The half range sine series of $f(x)$ defined in the interval $(0, 2)$ is _____.

a) $f(x) = \sum_{n=1}^{\infty} b_n \sin nx$ b) $f(x) = \sum_{n=1}^{\infty} b_n \sin(2n\pi x)$

c) $f(x) = \sum_{n=1}^{\infty} b_n \sin\left(\frac{n\pi x}{2}\right)$ d) $f(x) = \sum_{n=1}^{\infty} a_n \cos\left(\frac{n\pi x}{2}\right)$

14) If $F_s(\lambda) = e^{-\lambda}$ then the function $f(x) =$ _____.

a) $\frac{2}{\sqrt{1+x^2}}$ b) $\frac{\pi}{1+x^2}$

c) $\sqrt{\frac{2}{\pi}}\frac{1}{1+x^2}$ d) None

S.Y. (B.Tech.) (Computer Science & Engineering) (Semester - I) (New) (NEP CBCS) Examination: March/April – 2026
Mathematics for Software and Hardware (OE-01E)

Day & Date: Monday, 11-05-2026 Max. Marks: 56
Time: 03:00 PM To 06:00 PM

Instructions: 1) All question are compulsory.
2) Figures to the right indicate full marks.
3) Make suitable assumptions if necessary and state them clearly.
4) Use of non-programmable calculator is allowed.

SECTION – I

Q.2 Attempt Any Three. **09**

a) Solve: $(D^2+1)y = x\sin 2x$

b) Solve: $(D^2+4D+4)y = e^{3x}$

c) Find $L\left\{\frac{1}{t}(1-\cos t)\right\}$

d) Find $z\{ka^k + k\beta^k\}, k \geq 0$

e) Find the Laplace transform of $\int_0^t te^{-3t}\sin(4t)dt$

Q.3 Attempt Any Three. **09**

a) Solve $(D^2-1)y = X\cos 2x$

b) Find $L\left[\int_0^t te^{-4t}\sin(3t)dt\right]$

c) Find the inverse Laplace transform of following by using the Convolution theorem of $\left[\frac{1}{s(s^2+9)}\right]$

d) Find $Z\left\{3^k\cos\left(\frac{k\pi}{2}+\frac{\pi}{4}\right)\right\}, k \geq 0$

e) Find the Laplace Transform of $\{1+2t-3t^2+4t^3\}U(t-2)\}$

Q.4 Attempt Any Two. **10**

a) Find $L\{t.\sqrt{1-\sin t}\}$

b) Solve $(D^3+1)y = 3+e^{-x}+5e^{2x}$

c) Find $Z^{-1}\left\{\frac{1}{(z-a)^2}\right\}, |z| > |a|., |z| < |a|$

SECTION – II

Q.5 Attempt Any Three. **09**

a) Evaluate $\int_0^6 \frac{e^x}{1+x}dx$ using Simpson's 1/3rd rule, (Take $h = 1$)

b) Find the half-range cosine series for $f(x) = e^{-x}$ in $(0, \pi)$

c) Evaluate $\sqrt{37}$ by Newton Raphson method correct to four decimal places by taking initial approximation as $x_0 = 6$

d) Find the Fourier Sine transforms of $2e^{-5x} + 5e^{-2x}$

e) Find the Fourier series of $f(x) \begin{matrix} = & \pi x, & 0 < x < 1 \\ = & 0, & 1 < x < 2 \end{matrix}$

Q.6 Attempt Any Three. **09**

a) Obtain half range sine series for $f(x) = x$ in $0 < x < 2$

b) Find the positive root of the following by using Newton Raphson method correct to four decimal places $3x - \cos x - 1 = 0$

c) Evaluate $\int_0^6 \frac{1}{1+x^2}dx\ n = 6$ using Trapezoidal rule.

d) Find the Fourier transform of $f(x)$ if $f(x) = \begin{cases} 1, & 0 \le x < 1 \\ 0, & x > 0 \end{cases}$

e) Find the Fourier series of $f(x) = x \sin x, \quad (0, 2\pi)$

Q.7 Attempt Any Two. **10**

a) Find the Fourier transform of

$f(x) \begin{matrix} = 1 & |x| & < & k \\ = 0 & |x| & > & k \end{matrix}$ and

hence evaluate

i) $\int_{-\infty}^{\infty} \frac{\sin sk \,.\, \cos sk}{s} ds$

ii) $\int_{-\infty}^{\infty} \frac{\sin ks}{s} ds$

b) Obtain the Fourier series of $f(x) = a^2 - x^2$ in $(-a, a)$

c) Find the Value of K_1 by Runge Kutta Method of fourth order if

$\frac{dy}{dx} = 2x + 3y^2$ and $y(0.1) = 1.1165$ and $h = 0.1$

S.Y. (B.Tech.) (Computer Science & Engineering) (Semester - I) (New) (NEP CBCS) Examination: March/April – 2026
Mathematics for Software and Hardware (OE-01E)

Day & Date: Monday, 11-05-2026 Max. Marks: 70
Time: 03:00 PM To 06:00 PM

Instructions: 1) Q. No. 1 is compulsory. It should be solved in the first 30 minutes in Answer Book Page no 03 (Starting page of the Answer Book). Each question carries one mark.
2) Don't forget to Mention question paper set (P/Q/R/S) on top of page.
3) Figures to the right indicates full marks.
4) Make suitable assumptions if necessary and state them clearly.
5) Use of non-programmable calculator is allowed.

MCQ/Objective Type Questions

Duration: 30 Minutes Marks: 14

Q.1 Choose the correct alternative from the given option. 14

1) A positive real root of the equation $xe^x - 2 = 0$ is lies between _____.
a) 2 and 3 b) 1 and 2
c) 3 and 4 d) 0 and 1

2) Since $z\{1\} = \frac{z}{z-1}, z\{a^k\}, k \geq 0 =$ _____.
a) $\frac{z}{z-a}$ b) $\frac{z}{a(z-1)}$
c) $\frac{a}{z-a}$ d) $\frac{z}{az-1}$

3) In the interval $(0,1)$ the constant term in the cosine series of $f(x) = x^2$ is _____.
a) 0 b) $\frac{1}{2}$
c) $\frac{1}{3}$ d) $\frac{\pi}{4}$

4) In the cosine series of $f(x) = \pi x - x^2$ for $0 < x < \pi$, the constant term is _____.
a) $\frac{\pi^2}{4}$ b) $\frac{\pi^2}{16}$
c) $\frac{\pi^2}{6}$ d) $\frac{\pi^2}{2}$

5) For the function $f(x) \begin{matrix} = & 0, & -\pi < x < 0 \\ = & x, & 0 < x < \pi \end{matrix}$

The value of Fourier constant a_0 is _____.

a) $\frac{\pi^2}{4}$ b) $\frac{\pi}{4}$

c) $\frac{\pi^2}{2}$ d) $\frac{-\pi}{4}$

6) The half range sine series of $f(x)$ defined in the interval $(0, 2)$ is _____.

a) $f(x) = \sum_{n=1}^{\infty} b_n \sin nx$ b) $f(x) = \sum_{n=1}^{\infty} b_n \sin(2n\pi x)$

c) $f(x) = \sum_{n=1}^{\infty} b_n \sin\left(\frac{n\pi x}{2}\right)$ d) $f(x) = \sum_{n=1}^{\infty} a_n \cos\left(\frac{n\pi x}{2}\right)$

7) If $F_s(\lambda) = e^{-\lambda}$ then the function $f(x) =$ _____.

a) $\frac{2}{\sqrt{1+x^2}}$ b) $\frac{\pi}{1+x^2}$

c) $\sqrt{\frac{2}{\pi}}\frac{1}{1+x^2}$ d) None

8) The particular Integral of $(D^2 - 2D + 1)y = -4e^x$ is _____.

a) $-2x^2e^x$ b) $-4x^2e^x$

c) $(C_1 + C_2x)e^x$ d) x^2e^x

9) The general solution of $(D^2 - 4)^2 y = 0$ is _____.

a) $y = C_1e^{2x} + C_2e^{-2x}$

b) $y = (C_1 + C_2x)e^{-2x} + (C_3 + C_4x)e^{2x}$

c) $y = C_1 \cos 2x + C_2 \sin 2x + (C_3 + C_4x)e^{2x}$

d) None of these

10) The value of $\frac{1}{D-a}X =$ _____.

a) $e^{-ax}\int e^{-ax}Xdx$ b) $e^{-ax}\int e^{ax}Xdx$

c) $e^{ax}\int e^{-ax}Xdx$ d) $e^{ax}\int e^{ax}Xdx$

11) $Lf(t)\delta(t-a) =$ _____.

a) $e^{-as}f(t)$ b) $e^{-as}f(a)$

c) $e^{as}f(a)$ d) $e^{-as}f(t-a)$

12) If $L\{f(t)\} = \frac{a}{s^2+a^2}$ then $L\left\{\int_0^1 f(t)dt\right\} =$ _____.

a) $\frac{1}{s(s^2+a^2)}$ b) $\frac{a}{s(s^2+a^2)}$

c) $\frac{as}{s^2+a^2}$ d) $\frac{as^2}{s^2+a^2}$

13) The inverse z-transform of $\frac{z}{z-3}, |z| > 3$ (with $k \geq 0$) is _____.

a) 3^{-k} b) 3^{k+1}

c) 3^{k} d) 3^{-k-1}

14) The rate of convergence of Newton-Raphson Method is _____.

a) 1 b) 2

c) $\sqrt{2}$ d) 3

MCQ/Objective Type Questions

Duration: 30 Minutes Marks: 14

Q.1 Choose the correct alternative from the given option. 14

1) The inverse z-transform of $\frac{z}{z-3}, |z| > 3$ (with $k \geq 0$) is _____.

a) 3^{-k} b) 3^{k+1}
c) 3^{k} d) 3^{-k-1}

2) The rate of convergence of Newton-Raphson Method is _____.

a) 1 b) 2
c) $\sqrt{2}$ d) 3

3) A positive real root of the equation $xe^{x} - 2 = 0$ is lies between _____.

a) 2 and 3 b) 1 and 2
c) 3 and 4 d) 0 and 1

4) Since $z\{1\} = \frac{z}{z-1}, z\{a^{k}\}, k \geq 0 =$ _____.

a) $\frac{z}{z-a}$ b) $\frac{z}{a(z-1)}$
c) $\frac{a}{z-a}$ d) $\frac{z}{az-1}$

5) In the interval $(0,1)$ the constant term in the cosine series of $f(x) = x^{2}$ is _____.

a) 0 b) $\frac{1}{2}$
c) $\frac{1}{3}$ d) $\frac{\pi}{4}$

6) In the cosine series of $f(x) = \pi x - x^2$ for $0 < x < \pi$, the constant term is _____.

a) $\frac{\pi^2}{4}$ b) $\frac{\pi^2}{16}$

c) $\frac{\pi^2}{6}$ d) $\frac{\pi^2}{2}$

7) For the function $f(x) \begin{matrix} = \\ = \end{matrix} \begin{matrix} 0, & -\pi < x < 0 \\ x, & 0 < x < \pi \end{matrix}$

The value of Fourier constant a_0 is _____.

a) $\frac{\pi^2}{4}$ b) $\frac{\pi}{4}$

c) $\frac{\pi^2}{2}$ d) $\frac{-\pi}{4}$

8) The half range sine series of $f(x)$ defined in the interval $(0, 2)$ is _____.

a) $f(x) = \sum_{n=1}^{\infty} b_n \sin nx$ b) $f(x) = \sum_{n=1}^{\infty} b_n \sin(2n\pi x)$

c) $f(x) = \sum_{n=1}^{\infty} b_n \sin\left(\frac{n\pi x}{2}\right)$ d) $f(x) = \sum_{n=1}^{\infty} a_n \cos\left(\frac{n\pi x}{2}\right)$

9) If $F_s(\lambda) = e^{-\lambda}$ then the function $f(x) =$ _____.

a) $\frac{2}{\sqrt{1+x^2}}$ b) $\frac{\pi}{1+x^2}$

c) $\sqrt{\frac{2}{\pi}}\frac{1}{1+x^2}$ d) None

10) The particular Integral of $(D^2 - 2D + 1)y = -4e^x$ is _____.

a) $-2x^2e^x$ b) $-4x^2e^x$

c) $(C_1 + C_2x)e^x$ d) x^2e^x

11) The general solution of $(D^2 - 4)^2 y = 0$ is _____.

a) $y = C_1e^{2x} + C_2e^{-2x}$

b) $y = (C_1 + C_2x)e^{-2x} + (C_3 + C_4x)e^{2x}$

c) $y = C_1 \cos 2x + C_2 \sin 2x + (C_3 + C_4x)e^{2x}$

d) None of these

12) The value of $\frac{1}{D-a}X =$ _____.

a) $e^{-ax}\int e^{-ax}Xdx$ b) $e^{-ax}\int e^{ax}Xdx$

c) $e^{ax}\int e^{-ax}Xdx$ d) $e^{ax}\int e^{ax}Xdx$

13) $Lf(t)\delta(t-a) =$ _____.

a) $e^{-as}f(t)$ b) $e^{-as}f(a)$

c) $e^{as}f(a)$ d) $e^{-as}f(t-a)$

14) If $L\{f(t)\} = \frac{a}{s^2+a^2}$ then $L\left\{\int_0^1 f(t)dt\right\} =$ _____.

a) $\frac{1}{s(s^2+a^2)}$ b) $\frac{a}{s(s^2+a^2)}$

c) $\frac{as}{s^2+a^2}$ d) $\frac{as^2}{s^2+a^2}$

Set **S**

S.Y. (B.Tech.) (Computer Science & Engineering) (Semester - I) (New) (NEP CBCS) Examination: March/April – 2026
Mathematics for Software and Hardware (OE-01E)

Day & Date: Monday, 11-05-2026 Max. Marks: 56
Time: 03:00 PM To 06:00 PM

Instructions: 1) All question are compulsory.
2) Figures to the right indicate full marks.
3) Make suitable assumptions if necessary and state them clearly.
4) Use of non-programmable calculator is allowed.

SECTION – I

Q.2 Attempt Any Three. **09**

a) Solve: $(D^2+1)y = x\sin 2x$

b) Solve: $(D^2+4D+4)y = e^{3x}$

c) Find $L\left\{\frac{1}{t}(1-\cos t)\right\}$

d) Find $z\{ka^k + k\beta^k\}, k \geq 0$

e) Find the Laplace transform of $\int_0^t te^{-3t}\sin(4t)dt$

Q.3 Attempt Any Three. **09**

a) Solve $(D^2-1)y = X\cos 2x$

b) Find $L\left[\int_0^t te^{-4t}\sin(3t)dt\right]$

c) Find the inverse Laplace transform of following by using the Convolution theorem of $\left[\frac{1}{s(s^2+9)}\right]$

d) Find $Z\left\{3^k\cos\left(\frac{k\pi}{2}+\frac{\pi}{4}\right)\right\}, k \geq 0$

e) Find the Laplace Transform of $\{1+2t-3t^2+4t^3\}U(t-2)\}$

Q.4 Attempt Any Two. **10**

a) Find $L\{t.\sqrt{1-\sin t}\}$

b) Solve $(D^3+1)y = 3+e^{-x}+5e^{2x}$

c) Find $Z^{-1}\left\{\frac{1}{(z-a)^2}\right\}, |z| > |a|., |z| < |a|$

SECTION – II

Q.5 Attempt Any Three. **09**

a) Evaluate $\int_0^6 \frac{e^x}{1+x}dx$ using Simpson's 1/3rd rule, (Take $h = 1$)

b) Find the half-range cosine series for $f(x) = e^{-x}$ in $(0, \pi)$

c) Evaluate $\sqrt{37}$ by Newton Raphson method correct to four decimal places by taking initial approximation as $x_0 = 6$

d) Find the Fourier Sine transforms of $2e^{-5x} + 5e^{-2x}$

e) Find the Fourier series of $f(x) \begin{matrix} = & \pi x, & 0 < x < 1 \\ = & 0, & 1 < x < 2 \end{matrix}$

Q.6 Attempt Any Three. **09**

a) Obtain half range sine series for $f(x) = x$ in $0 < x < 2$

b) Find the positive root of the following by using Newton Raphson method correct to four decimal places $3x - \cos x - 1 = 0$

c) Evaluate $\int_0^6 \frac{1}{1+x^2}dx\ n = 6$ using Trapezoidal rule.

d) Find the Fourier transform of $f(x)$ if $f(x) = \begin{cases} 1, & 0 \le x < 1 \\ 0, & x > 0 \end{cases}$

e) Find the Fourier series of $f(x) = x \sin x, \quad (0, 2\pi)$

Q.7 Attempt Any Two. **10**

a) Find the Fourier transform of

$f(x) \begin{matrix} = 1 & |x| & < & k \\ = 0 & |x| & > & k \end{matrix}$ and

hence evaluate

i) $\int_{-\infty}^{\infty} \frac{\sin sk \,.\, \cos sk}{s} ds$

ii) $\int_{-\infty}^{\infty} \frac{\sin ks}{s} ds$

b) Obtain the Fourier series of $f(x) = a^2 - x^2$ in $(-a, a)$

c) Find the Value of K_1 by Runge Kutta Method of fourth order if

$\frac{dy}{dx} = 2x + 3y^2$ and $y(0.1) = 1.1165$ and $h = 0.1$

S.Y. (B.Tech.) (Computer Science & Engineering) (Semester - I) (New) (NEP CBCS) Examination: March/April – 2026
Soft Skills and Personality Development (OE-01F)

Day & Date: Monday, 11-05-2026 Max. Marks: 70
Time: 03:00 PM To 06:00 PM

Instructions: 1) Q. No. 1 is compulsory. It should be solved in the first 30 minutes in Answer Book Page no 03 (Starting page of the Answer Book). Each question carries one mark
2) Don't forget to Mention question paper set (P/Q/R/S) on top on page.
3) Figures to the right indicates full marks.

MCQ/Objective Type Questions

Duration: 30 Minutes Marks:14

Q.1 Choose the correct alternatives from the following. **14**

1) In the process of communication, _____ is the person who encodes the message.
a) Receiver b) Driver
c) Cleaner d) Sender

2) Which among the following barriers is related to fault in the channel?
a) Physical b) Mechanical
c) Psychological d) All of above

3) The ability to recognize, understand and regulate your own emotions is called _____.
a) Empathy b) Self-awareness
c) Emotional intelligence d) Relationship management

4) Stress is defined as _____.
a) A physical or emotional reaction to challenges or demands
b) A type of disease
c) Only physical pain
d) A mental disorder

5) Time management means _____.
a) Doing work very quickly
b) Planning and organizing how to spend time effectively
c) Wasting time
d) Avoiding responsibilities

6) Effective non-verbal communication in presentations helps to _____.
a) Confuse the audience
b) Improve understanding and engagement
c) Reduce communication
d) Replace verbal communication

7) Which of the following helps in effective presentation?
a) Organizing ideas clearly b) Using complex language
c) Ignoring the audience d) All of the above

8) The main purpose of an interview is to _____.
a) Test physical strength
b) Assess a candidate's suitability
c) Conduct training
d) Provide entertainment

9) Which of the following is part of presentation etiquette?
a) Clear speaking b) Good posture
c) Proper visual aids d) All of the above

10) Good posture during a presentation indicates _____.
a) Confidence b) Nervousness
c) Disinterest d) Laziness

11) Which non-verbal factors help engage the audience?
a) Eye contact b) Facial expressions
c) Hand gestures d) All of the above

12) Prioritization in time management means _____.
a) Doing easy tasks first
b) Arranging tasks according to importance
c) Avoiding work
d) Doing everything at once

13) Procrastination means _____.
a) Completing work early b) Delaying tasks unnecessarily
c) Planning work d) Finishing tasks on time

14) Taking short breaks during work helps to _____.
a) Reduce efficiency b) Improve focus
c) Waste time d) Increase stress

MCQ/Objective Type Questions

Duration: 30 Minutes Marks:14

Q.1 Choose the correct Answer. 14

1) Which of the following is true about bagging?
I) Bagging can be parallel
II) The aim of bagging is to reduce bias not variance
III) Bagging helps in reducing overfitting
a) I and II b) II and III
c) I and III d) All of these

2) One of the more important uses of _____ in machine learning is to classify images for all sorts of reasons.
a) under-fitting b) computer vision
c) cost function d) none

3) Predicting stock market price is an example of _____.
a) Unsupervised learning b) supervised learning
c) reinforcement d) none

4) _____ function performs the rendering and uses a grayscale color map.
a) plt.show() b) show()
c) imshow() d) imread()

5) _____ is the ability to train computer to understand both human speech and written text.
a) Data mining
b) Natural Language Processing
c) Statistics
d) None of these

6) Which of following steps are required to apply machine learning technique to support business strategy _____.
   a) What is the business problem you are trying to solve
   b) When are the hidden data resources that you can take advantage
   c) How can you prepare to get your data
   d) All

7) _____ can lead to poor performance of machine learning model.
   a) under fitting
   b) overfitting
   c) Both a) & b)
   d) None of these

8) _____ occurs when your algorithm has learned too much from your data, up to the point of mapping curve shapes and rules that do not exist.
   a) under fitting
   b) overfitting
   c) cost function
   d) None of these

9) Cross validation is based on _____ method.
   a) under fitting
   b) overfitting
   c) k-fold
   d) validation

10) The process goes on repetitively until there are no more chunks. Chunks can be small (depending on core memory), and the process is called _____.
   a) mini-batch learning
   b) learning model
   c) linear regression
   d) none

11) In _____ model you build your machine learning models in two (or sometimes even more) stages.
   a) stacking
   b) averaging
   c) testing multiple
   d) hyper parameter

12) _____ is the approach to machine learning that is based on neuroscience.
   a) Connectionism
   b) neuron
   c) deep learning
   d) All of above

13) _____ Model looks into the future analysis of data.
   a) Descriptive
   b) Predictive
   c) Business
   d) None of above

14) _____ is used to overcome the problem of snooping.
   a) training
   b) testing
   c) validation
   d) None of these

S.Y. (B.Tech.) (Computer Science & Engineering) (Semester - I) (New) (NEP CBCS) Examination: March/April – 2026
Machine Learning (CSEHON-01A)

Day & Date: Wednesday, 13-05-2026 Max. Marks: 56
Time: 03:00 PM To 06:00 PM

Instructions: 1) All questions are compulsory.
2) Make suitable assumptions (if necessary and state them clearly).
3) Figures to the right indicates full marks.

SECTION – I

Q.2 Attempt Any Four. **16**

a) Define Machine Learning Explain Lear verging the power of machine learning.

b) Explain supervised learning with example.

c) Explain application of machine learning.

d) Write differences between machine learning and data mining.

e) Explain data preparation.

Q.3 Attempt Any One. **06**

a) Write a short note on Machine Learning Cycle.

b) Explain the term choosing right error or Score Metric.

Q.4 Attempt the following. **06**

Explain Exploring cost function.

SECTION – II

Q.5 Attempt Any Four. **16**

a) Write short note on Searching for the best hyper parameters.

b) Write a short note on applying feature engineering.

c) Explain the term bias and variance.

d) What is overfitting, how to overcome the problem of overfitting.

e) Explain Averaging model

Q.6 Attempt Any One **06**

a) Write differences between LOOC and K-fold cross validation.

b) Explain the discovering the Incredible perceptron.

Q.7 Attempt the following. **06**

Explain the following term:

a) Training

b) Testing

c) Validating

Seat No.	

Set **Q**

S.Y. (B.Tech.) (Computer Science & Engineering) (Semester - I) (New) (NEP CBCS) Examination: March/April - 2026
Machine Learning (CSEHON-01A)

Day & Date: Wednesday, 13-05-2026 Max. Marks: 70
Time: 03:00 PM To 06:00 PM

Instructions: 1) Q. No. 1 is compulsory. It should be solved in the first 30 minutes in Answer Book Page no 03 (Starting page of the Answer Book). Each question carries one mark.
2) Don't forget to Mention question paper set (P/Q/R/S) on top of page.
3) Figures to the right indicates full marks.
4) Make suitable assumptions (if necessary and state them clearly).

MCQ/Objective Type Questions

Duration: 30 Minutes Marks:14

Q.1 Choose the correct Answer. **14**

1) _____ occurs when your algorithm has learned too much from your data, up to the point of mapping curve shapes and rules that do not exist.
a) under fitting b) overfitting
c) cost function d) None of these

2) Cross validation is based on _____ method.
a) under fitting b) overfitting
c) k-fold d) validation

3) The process goes on repetitively until there are no more chunks. Chunks can be small (depending on core memory), and the process is called _____.
a) mini-batch learning b) learning model
c) linear regression d) none

4) In _____ model you build your machine learning models in two (or sometimes even more) stages.
a) stacking b) averaging
c) testing multiple d) hyper parameter

5) _____ is the approach to machine learning that is based on neuroscience.
a) Connectionism b) neuron
c) deep learning d) All of above

6) _____ Model looks into the future analysis of data.
a) Descriptive b) Predictive
c) Business d) None of above

7) _____ is used to overcome the problem of snooping.
a) training b) testing
c) validation d) None of these

8) Which of the following is true about bagging?
I) Bagging can be parallel
II) The aim of bagging is to reduce bias not variance
III) Bagging helps in reducing overfitting
a) I and II b) II and III
c) I and III d) All of these

9) One of the more important uses of _____ in machine learning is to classify images for all sorts of reasons.
a) under-fitting b) computer vision
c) cost function d) none

10) Predicting stock market price is an example of _____.
a) Unsupervised learning b) supervised learning
c) reinforcement d) none

11) _____ function performs the rendering and uses a grayscale color map.
a) plt.show() b) show()
c) imshow() d) imread()

12) _____ is the ability to train computer to understand both human speech and written text.
a) Data mining
b) Natural Language Processing
c) Statistics
d) None of these

13) Which of following steps are required to apply machine learning technique to support business strategy _____.
a) What is the business problem you are trying to solve
b) When are the hidden data resources that you can take advantage
c) How can you prepare to get your data
d) All

14) _____ can lead to poor performance of machine learning model.
a) under fitting b) overfitting
c) Both a) & b) d) None of these

MCQ/Objective Type Questions

Duration: 30 Minutes Marks:14

Q.1 Choose the correct Answer. **14**

1) Which of the following is considered a passive attack?
a) Denial-of-Service b) Message modification
c) Eavesdropping d) Masquerading

2) In the Network Security Model, what is the role of the "trusted third party"?
a) To forward messages
b) To eavesdrop on communication
c) To distribute and manage keys
d) To generate random numbers

3) Given the monoalphabetic key A→D, B→E, C→F..., what is the cipher for "SOLAPUR"?
a) VRODSXU b) VRORDSX
c) VRORDXU d) VRQRESU

4) What kind of cipher is Playfair Cipher?
a) Monoalphabetic
b) Transposition
c) Polyalphabetic
d) Digraph substitution cipher

5) What is the encrypted form of "MEET" using Vigenère cipher with key "KEY"?
a) WIXR b) QIQW
c) WIEX d) WIEV

6) What is the input to the AddRoundKey function?
a) Only the key b) Only the state
c) State and Round Key d) Plaintext

7) Which principle helps in achieving diffusion in block ciphers?
a) S-boxes b) P-boxes
c) Key schedule d) XOR operation

8) Which feature of public-key systems supports non-repudiation?
a) Encryption using the recipient's public key
b) Signing using the sender's private key
c) Hashing the message
d) Encrypting with a shared secret

9) Why is it difficult to break RSA encryption?
a) Because it uses substitution
b) Because factorizing large primes is computationally hard
c) Because it uses symmetric encryption
d) Because it uses hashing

10) Why is public-key cryptography not typically used to encrypt large files directly?
a) It doesn't support encryption
b) It's too fast
c) It's computationally expensive
d) It doesn't provide authentication

11) Why is a hash function useful in digital signatures?
a) It hides the private key
b) It compresses the message
c) It ensures integrity of the message being signed
d) It encrypts the message

12) 'Which of the following is a common application of hash functions?
a) Compressing multimedia files
b) Message encryption
c) Password verification
d) Data fragmentation

13) What is the primary function of Kerberos?
a) Data compression
b) Time synchronization
c) Secure user authentication using symmetric key
d) Digital signatures

14) Which component is essential in verifying identity using asymmetric encryption?
a) Trusted third party b) Certificate Authority (CA)
c) Secure socket layer d) Firewall

Instructions: 1) All questions are compulsory.
2) Figures to the right indicate full marks.

SECTION – I

Q.2 Attempt Any Three of the following. **12**

a) List and explain challenges of computer security.

b) Differentiate between monoalphabetic cipher and a polyalphabetic cipher.

c) Explain with example transposition techniques.

d) Briefly define the term permutation and substitution.

e) Explain Key Expansion algorithm of AES.

Q.3 Attempt Any Two of the following. **16**

a) Explain in detail active attack and passive attack.

b) Explain Matrix construction and rules of encryption text in playfair cipher. Construct the playfair matrix with key "cryptography". Encrypt the following message
"I only regret that I have but one life to give for my country"

c) Illustrate the working of single round of DES with diagram.

SECTION – II

Q.4 Attempt Any Three of the following. **12**

a) What are three broad categories of applications of public-key cryptosystems?

b) List the design objective of HMAC.

c) Explain user authentication model.

d) List and explain five properties of digital signature.

e) Explain identity management architecture.

Q.5 Solve Any Two of the following. **16**

a) Explain working of Kerberos version 4 and summarise Message exchange.

b) Using mathematical notations and equations summarize RSA Algorithm.

c) Alice and Bob use the Diffie-Hellman key exchange technique with a common prime

i) q = 157 and a primitive root a = 5

ii) If Alice has a private key XA = 15, find her public key YA

iii) If Bob has a private key XB = 27, find his public key YB

iv) What is the shared secret key between Alice and Bob?

- c) WIEX
- d) WIEV

10) What is the input to the AddRoundKey function?
- a) Only the key
- b) Only the state
- c) State and Round Key
- d) Plaintext

11) Which principle helps in achieving diffusion in block ciphers?
- a) S-boxes
- b) P-boxes
- c) Key schedule
- d) XOR operation

12) Which feature of public-key systems supports non-repudiation?
- a) Encryption using the recipient's public key
- b) Signing using the sender's private key
- c) Hashing the message
- d) Encrypting with a shared secret

13) Why is it difficult to break RSA encryption?
- a) Because it uses substitution
- b) Because factorizing large primes is computationally hard
- c) Because it uses symmetric encryption
- d) Because it uses hashing

14) Why is public-key cryptography not typically used to encrypt large files directly?

a) It doesn't support encryption
b) It's too fast
c) It's computationally expensive
d) It doesn't provide authentication

S.Y. (B.Tech.) (Computer Science & Engineering) (Semester - I) (New) (NEP CBCS) Examination: March/April – 2026
Cryptography (CSEHON-01B)

Day & Date: Wednesday, 13-05-2026 Max. Marks: 56
Time: 03:00 PM To 06:00 PM

Instructions: 1) All questions are compulsory.
2) Figures to the right indicate full marks.

SECTION – I

Q.2 Attempt Any Three of the following. **12**

a) List and explain challenges of computer security.

b) Differentiate between monoalphabetic cipher and a polyalphabetic cipher.

c) Explain with example transposition techniques.

d) Briefly define the term permutation and substitution.

e) Explain Key Expansion algorithm of AES.

Q.3 Attempt Any Two of the following. **16**

a) Explain in detail active attack and passive attack.

b) Explain Matrix construction and rules of encryption text in playfair cipher. Construct the playfair matrix with key "cryptography". Encrypt the following message
"I only regret that I have but one life to give for my country"

c) Illustrate the working of single round of DES with diagram.

SECTION – II

Q.4 Attempt Any Three of the following. **12**

a) What are three broad categories of applications of public-key cryptosystems?

b) List the design objective of HMAC.

c) Explain user authentication model.

d) List and explain five properties of digital signature.

e) Explain identity management architecture.

Q.5 Solve Any Two of the following. **16**

a) Explain working of Kerberos version 4 and summarise Message exchange.

b) Using mathematical notations and equations summarize RSA Algorithm.

c) Alice and Bob use the Diffie-Hellman key exchange technique with a common prime

i) q = 157 and a primitive root a = 5

ii) If Alice has a private key XA = 15, find her public key YA

iii) If Bob has a private key XB = 27, find his public key YB

iv) What is the shared secret key between Alice and Bob?

Set | S

S.Y. (B.Tech.) (Computer Science & Engineering) (Semester - I) (New) (NEP CBCS) Examination: March/April - 2026
Cryptography (CSEHON-01B)

Day & Date: Wednesday, 13-05-2026 Max. Marks: 70
Time: 03:00 PM To 06:00 PM

Instructions: 1) Q. No. 1 is compulsory. It should be solved in the first 30 minutes in Answer Book Page no 03 (Starting page of the Answer Book). Each question carries one mark.
2) Don't forget to Mention question paper set (P/Q/R/S) on top of page.
3) Figures to the right indicates full marks.

MCQ/Objective Type Questions

Duration: 30 Minutes Marks:14

Q.1 Choose the correct Answer. **14**

1) What is the input to the AddRoundKey function?
a) Only the key b) Only the state
c) State and Round Key d) Plaintext

2) Which principle helps in achieving diffusion in block ciphers?
a) S-boxes b) P-boxes
c) Key schedule d) XOR operation

3) Which feature of public-key systems supports non-repudiation?
a) Encryption using the recipient's public key
b) Signing using the sender's private key
c) Hashing the message
d) Encrypting with a shared secret

4) Why is it difficult to break RSA encryption?
a) Because it uses substitution
b) Because factorizing large primes is computationally hard
c) Because it uses symmetric encryption
d) Because it uses hashing

5) Why is public-key cryptography not typically used to encrypt large files directly?
a) It doesn't support encryption
b) It's too fast
c) It's computationally expensive
d) It doesn't provide authentication

6) Why is a hash function useful in digital signatures?
a) It hides the private key
b) It compresses the message
c) It ensures integrity of the message being signed
d) It encrypts the message

7) 'Which of the following is a common application of hash functions?
   a) Compressing multimedia files
   b) Message encryption
   c) Password verification
   d) Data fragmentation

8) What is the primary function of Kerberos?
   a) Data compression
   b) Time synchronization
   c) Secure user authentication using symmetric key
   d) Digital signatures

9) Which component is essential in verifying identity using asymmetric encryption?
   a) Trusted third party
   b) Certificate Authority (CA)
   c) Secure socket layer
   d) Firewall

10) Which of the following is considered a passive attack?
   a) Denial-of-Service
   b) Message modification
   c) Eavesdropping
   d) Masquerading

11) In the Network Security Model, what is the role of the "trusted third party"?
   a) To forward messages
   b) To eavesdrop on communication
   c) To distribute and manage keys
   d) To generate random numbers

12) Given the monoalphabetic key A→D, B→E, C→F..., what is the cipher for "SOLAPUR"?
   a) VRODSXU
   b) VRORDSX
   c) VRORDXU
   d) VRQRESU

13) What kind of cipher is Playfair Cipher?
   a) Monoalphabetic
   b) Transposition
   c) Polyalphabetic
   d) Digraph substitution cipher

14) What is the encrypted form of "MEET" using Vigenère cipher with key "KEY"?
   a) WIXR
   b) QIQW
   c) WIEX
   d) WIEV

Universal Human Values (VEC-01)

Day & Date: Friday, 15-05-2026 Max. Marks: 50
Time: 03:00 PM To 04:30 PM

Instructions: 1) All questions are compulsory.
2) Figures to the right indicate full marks.
3) Mention Question Paper Set (P/Q/R/S) on Top of Page.

Answer

Q.1 Solve following Multiple Choice Questions.

1) Value education enables us _____.
a) To understand our needs
b) Visualize our goals correctly
c) Indicate the direction for their fulfillment
d) All of the above

2) One of the basic desires of every human being is to be always _____.
a) Happy b) Sad
c) Laugh d) Earn Money

3) _____ is the basic unit of any human society.
a) Group b) Individual
c) Nature d) Society

4) Natural acceptance & _____ are the two processes of knowing.
a) Self -Actualization b) Self Exploration
c) Self Evaluation d) Self Control

5) Present Education system gives more focus to skills.
a) True b) False
c) May be d) None of the above

6) Value of an entity is _____.
a) Physical Facility
b) Prosperity
c) Its participation in larger order of which it is part
d) Both a and b

7) _____ are as Basic Human Aspirations.
a) Money
b) Relationship without money
c) Physical Facility
d) Continuous Happiness & Prosperity

8) Any course content on value education needs to be _____.
a) Universal b) Rational
c) Natural d) All of above

9) When we live with correct understanding of values, we feel _____.
a) Deprived b) Frustrated
c) Happy d) Unhappy

10) Following are the basic guidelines for value education except _____.
a) Universal b) Personal
c) Rational d) Natural

11) Please give the correct priority for Physical Facilities, Right Understanding and Relationship.
a) Physical Facilities, Right Understanding and Relationship
b) Relationship, Right Understanding and Physical Facilities
c) Right Understanding, Relationship and Physical Facilities
d) None of the above

12) Right Understanding and relationships lead to _____.
a) Mutual Happiness b) Mutual Prosperity
c) Both a and b d) All are wrong

13) Right Understanding and Physical Facilities leads to _____.
a) Mutual Happiness b) Mutual Prosperity
c) Both a and b d) All are wrong

14) ____ are the content of self-exploration.
a) Program b) Desire
c) Both a and b d) None of the above

15) To be in state of liking is _____.
a) Happy b) Unhappy
c) Both a and b d) None of the above

16) _____ helps the human being to transform from Animal consciousness to human consciousness.
a) Physical Facility b) Right understanding
c) Relationship d) All of above

17) _____ is only a means to achieve what is considered valuable for a human being in an effective and efficient manner.

a) Value b) Skill
c) Technology d) All of above

18) _____ means physical facilities more than to satisfy my needs.

a) Health b) Prosperity
c) Happiness d) None of above

19) If something is _____ to us, without any force or compulsion, then it is often correct and does not change with time and people.

a) naturally acceptable b) pushed
c) common d) None of above

20) Physical facilities are necessary and complete for _____.

a) Animal b) Human being
c) Nature d) All of the above

21) Beside physical facilities human being want _____.

a) Name b) Fame
c) Relationship d) None of the above

22) When you are living with pre-conditionings and accumulated desires without evaluating them, then it means that you are _____.

a) Swatantra b) Partantra
c) Prosperous d) None of the above

23) To be in state of _____ is unhappiness.

a) Disharmony b) Contradiction
c) Disharmony or contradiction d) None of the above

24) Which of following leads to variety of problems at different levels of our living?

a) Lack of right understanding of happiness
b) Lack of right understanding of prosperity
c) Lack of right understanding of happiness & prosperity
d) Lack of awareness towards health

25) Working only for physical facilities in living is called _____.

a) Animal Consciousness b) Human Consciousness
c) Rich Consciousness d) None of these

26) Self and _____ are different in nature, materiality, needs and activities.

a) Trust b) Body
c) Belief d) None of the above

27) Sukh and _____ both are needed and can't replace each other.

a) Self b) Body
c) Suvidha d) Belief

28) In value education Sanyama means _____.
a) Self-regulation b) Health
c) Happiness d) Prosperity

29) Sadupyog of the Body mean _____ of the Body.
a) Self-regulation b) Care
c) Happiness d) Right utilization

30) Knowing means having the _____.
a) Assumption b) Right understanding
c) Right feeling d) None of the above

31) Each human being is co-existence of the _____ and the _____.
a) self, self b) body, body
c) self, body d) None of the above

32) _____ is the feeling of responsibility for nurturing, protecting and right utilizing the body.
a) Swasthya b) Sanyam
c) Prosperity d) None of the above

33) The system of the body works in a _____ way.
a) Happy b) Self organized
c) Random d) Independent

34) The self is _____ in nature while body is _____ in nature.
a) Unconscious, Physico-chemical
b) Conscious, Physico-chemical
c) Physico-chemical, Conscious
d) Physico-chemical, Unconscious

35) The activity of desire, thought and expecting together is called as _____.
a) Body b) Health
c) Imagination d) Future

36) Harmony should be maintained in _____.
a) Between body and life
b) Between self and society
c) Between life and environment
d) All the above

37) Sah-astitva means _____.
a) Co-existence b) Co-operation
c) Co-ordination d) Corporate identity

38) The process of education and right living leads to _____ in the individual.

a) Right understanding b) Health
c) Prosperity d) None of the above

39) Ensuring justice in the relationship, on the basis of values leads to _____ in society.

a) Fearlessness b) Confusion
c) Confidence d) Fear

40) _____ is the foundational value in relationship.

a) Respect b) Love
c) Trust d) Glory

41) To be assured of others at all time is the feeling of _____.

a) Respect b) Love
c) Trust d) Glory

42) _____ is the feeling for someone who has made efforts for excellence.

a) Reverence b) Glory
c) Gratitude d) Guidance

43) _____ is the feeling of acceptance for those who have made efforts for my excellence.

a) Reverence b) Glory
c) Gratitude d) Guidance

44) The feeling of relatedness to all human beings is called _____.

a) Love b) Affection
c) Gratitude d) Respect

45) All the units of nature can be classified into _____ orders.

a) Two b) Three
c) Four d) Six

46) Which of the following does not form an order in nature?

a) Bio b) Animal
c) Consciousness d) Human

47) Which of the following statement is not true?

a) There is interconnectedness in nature
b) There is recyclability and self-regulation in nature
c) There is struggle for survival in nature
d) There is mutual fulfillment in nature

48) Harmony in the family is the building block for harmony in the _____.

a) society b) individual
c) friend d) relative

49) _____ in the family means that the family is able to identify its needs.

a) wealth
b) prosperity
c) harmony
d) happiness

50) _____ means right evaluation.

a) Respect
b) Love
c) Trust
d) Glory

14) The self is _____ in nature while body is _____ in nature.
a) Unconscious, Physico-chemical
b) Conscious, Physico-chemical
c) Physico-chemical, Conscious
d) Physico-chemical, Unconscious

15) The activity of desire, thought and expecting together is called as _____.
a) Body b) Health
c) Imagination d) Future

16) Harmony should be maintained in _____.
a) Between body and life
b) Between self and society
c) Between life and environment
d) All the above

17) Sah-astitva means _____.
a) Co-existence b) Co-operation
c) Co-ordination d) Corporate identity

18) The process of education and right living leads to _____ in the individual.

a) Right understanding b) Health
c) Prosperity d) None of the above

19) Ensuring justice in the relationship, on the basis of values leads to _____ in society.

a) Fearlessness b) Confusion
c) Confidence d) Fear

20) _____ is the foundational value in relationship.

a) Respect b) Love
c) Trust d) Glory

21) To be assured of others at all time is the feeling of _____.

a) Respect b) Love
c) Trust d) Glory

22) _____ is the feeling for someone who has made efforts for excellence.

a) Reverence b) Glory
c) Gratitude d) Guidance

23) _____ is the feeling of acceptance for those who have made efforts for my excellence.

a) Reverence b) Glory
c) Gratitude d) Guidance

24) The feeling of relatedness to all human beings is called _____.

a) Love b) Affection
c) Gratitude d) Respect

25) All the units of nature can be classified into _____ orders.

a) Two b) Three
c) Four d) Six

26) Which of the following does not form an order in nature?

a) Bio b) Animal
c) Consciousness d) Human

27) Which of the following statement is not true?

a) There is interconnectedness in nature
b) There is recyclability and self-regulation in nature
c) There is struggle for survival in nature
d) There is mutual fulfillment in nature

28) Harmony in the family is the building block for harmony in the _____.

a) society b) individual
c) friend d) relative

29) _____ in the family means that the family is able to identify its needs.

a) wealth b) prosperity
c) harmony d) happiness

30) _____ means right evaluation.

a) Respect b) Love
c) Trust d) Glory

31) Value education enables us _____.

a) To understand our needs
b) Visualize our goals correctly
c) Indicate the direction for their fulfillment
d) All of the above

32) One of the basic desires of every human being is to be always _____.

a) Happy b) Sad
c) Laugh d) Earn Money

33) _____ is the basic unit of any human society.

a) Group b) Individual
c) Nature d) Society

34) Natural acceptance & _____ are the two processes of knowing.

a) Self -Actualization b) Self Exploration
c) Self Evaluation d) Self Control

35) Present Education system gives more focus to skills.

a) True b) False
c) May be d) None of the above

36) Value of an entity is _____.

a) Physical Facility
b) Prosperity
c) Its participation in larger order of which it is part
d) Both a and b

37) _____ are as Basic Human Aspirations.

a) Money
b) Relationship without money
c) Physical Facility
d) Continuous Happiness & Prosperity

38) Any course content on value education needs to be _____.

a) Universal b) Rational
c) Natural d) All of above

39) When we live with correct understanding of values, we feel _____.
a) Deprived b) Frustrated
c) Happy d) Unhappy

40) Following are the basic guidelines for value education except _____.
a) Universal b) Personal
c) Rational d) Natural

41) Please give the correct priority for Physical Facilities, Right Understanding and Relationship.
a) Physical Facilities, Right Understanding and Relationship
b) Relationship, Right Understanding and Physical Facilities
c) Right Understanding, Relationship and Physical Facilities
d) None of the above

42) Right Understanding and relationships lead to _____.
a) Mutual Happiness b) Mutual Prosperity
c) Both a and b d) All are wrong

43) Right Understanding and Physical Facilities leads to _____.
a) Mutual Happiness b) Mutual Prosperity
c) Both a and b d) All are wrong

44) ____ are the content of self-exploration.
a) Program b) Desire
c) Both a and b d) None of the above

45) To be in state of liking is _____.
a) Happy b) Unhappy
c) Both a and b d) None of the above

46) _____ helps the human being to transform from Animal consciousness to human consciousness.
a) Physical Facility b) Right understanding
c) Relationship d) All of above

47) _____ is only a means to achieve what is considered valuable for a human being in an effective and efficient manner.
a) Value b) Skill
c) Technology d) All of above

48) _____ means physical facilities more than to satisfy my needs.
a) Health b) Prosperity
c) Happiness d) None of above

49) If something is _____ to us, without any force or compulsion, then it is often correct and does not change with time and people.

a) naturally acceptable
b) pushed
c) common
d) None of above

50) Physical facilities are necessary and complete for _____.

a) Animal
b) Human being
c) Nature
d) All of the above

a) Swatantra b) Partantra
c) Prosperous d) None of the above

33) To be in state of _____ is unhappiness.
a) Disharmony b) Contradiction
c) Disharmony or contradiction d) None of the above

34) Which of following leads to variety of problems at different levels of our living?
a) Lack of right understanding of happiness
b) Lack of right understanding of prosperity
c) Lack of right understanding of happiness & prosperity
d) Lack of awareness towards health

35) Working only for physical facilities in living is called _____.
a) Animal Consciousness b) Human Consciousness
c) Rich Consciousness d) None of these

36) Self and _____ are different in nature, materiality, needs and activities.
a) Trust b) Body
c) Belief d) None of the above

37) Sukh and _____ both are needed and can't replace each other.
a) Self b) Body
c) Suvidha d) Belief

38) In value education Sanyama means _____.
a) Self-regulation b) Health
c) Happiness d) Prosperity

39) Sadupyog of the Body mean _____ of the Body.
a) Self-regulation b) Care
c) Happiness d) Right utilization

40) Knowing means having the _____.
a) Assumption b) Right understanding
c) Right feeling d) None of the above

41) Each human being is co-existence of the _____ and the _____.
a) self, self b) body, body
c) self, body d) None of the above

42) _____ is the feeling of responsibility for nurturing, protecting and right utilizing the body.
a) Swasthya b) Sanyam
c) Prosperity d) None of the above

43) The system of the body works in a _____ way.
a) Happy b) Self organized
c) Random d) Independent

44) The self is _____ in nature while body is _____ in nature.
a) Unconscious, Physico-chemical
b) Conscious, Physico-chemical
c) Physico-chemical, Conscious
d) Physico-chemical, Unconscious

45) The activity of desire, thought and expecting together is called as _____.
a) Body b) Health
c) Imagination d) Future

46) Harmony should be maintained in _____.
a) Between body and life
b) Between self and society
c) Between life and environment
d) All the above

47) Sah-astitva means _____.
a) Co-existence b) Co-operation
c) Co-ordination d) Corporate identity

48) The process of education and right living leads to _____ in the individual.
a) Right understanding b) Health
c) Prosperity d) None of the above

49) Ensuring justice in the relationship, on the basis of values leads to _____ in society.

a) Fearlessness
b) Confusion
c) Confidence
d) Fear

50) _____ is the foundational value in relationship.

a) Respect
b) Love
c) Trust
d) Glory

S.Y. (B.Tech.) (Computer Science & Engineering) (Semester - I) (New) (NEP CBCS) Examination: March/April – 2026
Universal Human Values (VEC-01)

Day & Date: Friday, 15-05-2026 Max. Marks: 50
Time: 03:00 PM To 04:30 PM

Instructions: 1) All questions are compulsory.
2) Figures to the right indicate full marks.
3) Mention Question Paper Set (P/Q/R/S) on Top of Page.

Answer

Q.1 Solve following Multiple Choice Questions.

1) Please give the correct priority for Physical Facilities, Right Understanding and Relationship.
a) Physical Facilities, Right Understanding and Relationship
b) Relationship, Right Understanding and Physical Facilities
c) Right Understanding, Relationship and Physical Facilities
d) None of the above

2) Right Understanding and relationships lead to _____.
a) Mutual Happiness b) Mutual Prosperity
c) Both a and b d) All are wrong

3) Right Understanding and Physical Facilities leads to _____.
a) Mutual Happiness b) Mutual Prosperity
c) Both a and b d) All are wrong

4) ____ are the content of self-exploration.
a) Program b) Desire
c) Both a and b d) None of the above

5) To be in state of liking is _____.
a) Happy b) Unhappy
c) Both a and b d) None of the above

6) _____ helps the human being to transform from Animal consciousness to human consciousness.
a) Physical Facility b) Right understanding
c) Relationship d) All of above

7) _____ is only a means to achieve what is considered valuable for a human being in an effective and efficient manner.

a) Value b) Skill
c) Technology d) All of above

8) _____ means physical facilities more than to satisfy my needs.

a) Health b) Prosperity
c) Happiness d) None of above

9) If something is _____ to us, without any force or compulsion, then it is often correct and does not change with time and people.

a) naturally acceptable b) pushed
c) common d) None of above

10) Physical facilities are necessary and complete for _____.

a) Animal b) Human being
c) Nature d) All of the above

11) Beside physical facilities human being want _____.

a) Name b) Fame
c) Relationship d) None of the above

12) When you are living with pre-conditionings and accumulated desires without evaluating them, then it means that you are _____.

a) Swatantra b) Partantra
c) Prosperous d) None of the above

13) To be in state of _____ is unhappiness.

a) Disharmony b) Contradiction
c) Disharmony or contradiction d) None of the above

14) Which of following leads to variety of problems at different levels of our living?

a) Lack of right understanding of happiness
b) Lack of right understanding of prosperity
c) Lack of right understanding of happiness & prosperity
d) Lack of awareness towards health

15) Working only for physical facilities in living is called _____.

a) Animal Consciousness b) Human Consciousness
c) Rich Consciousness d) None of these

16) Self and _____ are different in nature, materiality, needs and activities.

a) Trust b) Body
c) Belief d) None of the above

17) Sukh and _____ both are needed and can't replace each other.

a) Self b) Body
c) Suvidha d) Belief

18) In value education Sanyama means _____.

a) Self-regulation b) Health
c) Happiness d) Prosperity

19) Sadupyog of the Body mean _____ of the Body.

a) Self-regulation b) Care
c) Happiness d) Right utilization

20) Knowing means having the _____.

a) Assumption b) Right understanding
c) Right feeling d) None of the above

21) Each human being is co-existence of the _____ and the _____.

a) self, self b) body, body
c) self, body d) None of the above

22) _____ is the feeling of responsibility for nurturing, protecting and right utilizing the body.

a) Swasthya b) Sanyam
c) Prosperity d) None of the above

23) The system of the body works in a _____ way.

a) Happy b) Self organized
c) Random d) Independent

24) The self is _____ in nature while body is _____ in nature.

a) Unconscious, Physico-chemical
b) Conscious, Physico-chemical
c) Physico-chemical, Conscious
d) Physico-chemical, Unconscious

25) The activity of desire, thought and expecting together is called as _____.

a) Body b) Health
c) Imagination d) Future

26) Harmony should be maintained in _____.

a) Between body and life
b) Between self and society
c) Between life and environment
d) All the above

27) Sah-astitva means _____.

a) Co-existence b) Co-operation
c) Co-ordination d) Corporate identity

28) The process of education and right living leads to _____ in the individual.

a) Right understanding b) Health
c) Prosperity d) None of the above

29) Ensuring justice in the relationship, on the basis of values leads to _____ in society.

a) Fearlessness b) Confusion
c) Confidence d) Fear

30) _____ is the foundational value in relationship.

a) Respect b) Love
c) Trust d) Glory

31) To be assured of others at all time is the feeling of _____.

a) Respect b) Love
c) Trust d) Glory

32) _____ is the feeling for someone who has made efforts for excellence.

a) Reverence b) Glory
c) Gratitude d) Guidance

33) _____ is the feeling of acceptance for those who have made efforts for my excellence.

a) Reverence b) Glory
c) Gratitude d) Guidance

34) The feeling of relatedness to all human beings is called _____.

a) Love b) Affection
c) Gratitude d) Respect

35) All the units of nature can be classified into _____ orders.

a) Two b) Three
c) Four d) Six

36) Which of the following does not form an order in nature?

a) Bio b) Animal
c) Consciousness d) Human

37) Which of the following statement is not true?

a) There is interconnectedness in nature
b) There is recyclability and self-regulation in nature
c) There is struggle for survival in nature
d) There is mutual fulfillment in nature

38) Harmony in the family is the building block for harmony in the _____.

a) society b) individual
c) friend d) relative

39) _____ in the family means that the family is able to identify its needs.

a) wealth b) prosperity
c) harmony d) happiness

40) _____ means right evaluation.

a) Respect b) Love
c) Trust d) Glory

41) Value education enables us _____.

a) To understand our needs
b) Visualize our goals correctly
c) Indicate the direction for their fulfillment
d) All of the above

42) One of the basic desires of every human being is to be always _____.

a) Happy b) Sad
c) Laugh d) Earn Money

43) _____ is the basic unit of any human society.

a) Group b) Individual
c) Nature d) Society

44) Natural acceptance & _____ are the two processes of knowing.

a) Self -Actualization b) Self Exploration
c) Self Evaluation d) Self Control

45) Present Education system gives more focus to skills.

a) True b) False
c) May be d) None of the above

46) Value of an entity is _____.

a) Physical Facility
b) Prosperity
c) Its participation in larger order of which it is part
d) Both a and b

47) _____ are as Basic Human Aspirations.

a) Money
b) Relationship without money
c) Physical Facility
d) Continuous Happiness & Prosperity

48) Any course content on value education needs to be _____.

a) Universal b) Rational
c) Natural d) All of above

49) When we live with correct understanding of values, we feel _____.

a) Deprived b) Frustrated

c) Happy d) Unhappy

50) Following are the basic guidelines for value education except _____.

a) Universal b) Personal

c) Rational d) Natural

S.Y. (B.Tech.) (Computer Science & Engineering) (Semester - I)
(CBCS) Examination: March/April – 2026
Applied Mathematics – I (BTN03301)

Day & Date: Monday, 04-05-2026 Max. Marks: 70
Time: 03:00 PM To 06:00 PM

Instructions: 1) Q. No. 1 is compulsory. It should be solved in the first 30 minutes in Answer Book Page no 03 (Starting page of the Answer Book). Each question carries one mark.
2) Don't forget to Mention question paper set (P/Q/R/S) on top on page.
3) Figures to the right indicates full marks.
4) Use of non-programable calculator is allowed.

MCQ/Objective Type Questions

Duration: 30 Minutes Marks:14

Q.1 Choose the correct answers from the given options. 14

1) The complementary function of the equation $[(D+1)^2(D+4)]y = 2t$ is _____.

a) $c_1e^{-t} + c_2e^{-4t} + c_3e^{t}$ b) $c_1\cos t + c_2\sin t + c_3e^{-4t}$

c) $(c_1 + c_2t)e^{t} + c_3e^{-4t}$ d) $(c_1 + c_2t)e^{-t} + c_3e^{-4t}$

2) The general solution of $(D^4 + 2D^2 + 1)y = 0$ is _____.

a) $c_1\cos x + c_2\sin x + c_3\cos x + c_4\sin x$

b) $(c_1 + c_2x)e^{x}$

c) $(c_1 + c_2x)\cos x + (c_3 + c_4x)\sin x$

d) $(c_1 + c_2x + c_3x^2 + c_4x^3)e^{-x}$

3) The value of the integral $\int_0^{\infty} e^{-2t}\cos 3t\, dt$ is _____.

a) $1/13$ b) $2/13$

c) 13^2 d) 13

4) $L^{-1}\left\{\frac{1}{s^2-3^2}\right\} =$ _____.

a) $\frac{1}{3}\sin 3t$ b) $\frac{1}{3}\cos 3t$

c) $\frac{1}{3}\cosh 3t$ d) $\frac{1}{3}\sinh 3t$

5) If $Z\{f(k)\} = F(z)$, then $Z\{a^k f(k)\} =$ _____.

a) $F\left(\frac{z}{a}\right)$ b) $F\left(\frac{a}{z}\right)$

c) $\frac{1}{a}F\left(\frac{z}{a}\right)$ d) $\frac{1}{a}F\left(\frac{a}{z}\right)$

6) $Z^{-1}\left\{\frac{z}{z+a}\right\}, |Z| > a$ (with $k \geq 0$) is _____.

a) a^k b) $(-a)^k$

c) a^{k+1} d) a^{-k-1}

7) If $L\{f(t)\} = \phi(s)$, then $L\{f(at)\} =$ _____.

a) $\phi\left(\frac{s}{a}\right)$ b) $\frac{1}{s}\phi\left(\frac{s}{a}\right)$

c) $\frac{1}{a}\phi\left(\frac{s}{a}\right)$ d) $\phi'\left(\frac{s}{a}\right)$

8) Which of the following is not a Dirichlet's condition?

a) $f(x)$ is periodic b) $f(x)$ is single valued

c) $f(x)$ is even function d) $f(x)$ is infinite

9) If $f(x) = x^2$ is expanded as a cosine series in $(0, \pi)$ then the constant term is _____.

a) $\frac{\pi^2}{3}$ b) $\frac{\pi^3}{3}$

c) $\frac{2\pi^2}{3}$ d) $\frac{3\pi^2}{2}$

10) Correlation analysis help us to _____ our activities.

a) Control b) Plan

c) Predict d) All of above

11) A discrete probability distribution function of a discrete random variable is given by,

x:	0	1	2	3	4
$P(x)$:	k	$3k$	$5k$	$4k$	$2k$

then $k =$ _____.

a) $1/3$ b) $1/15$

c) $1/5$ d) 1

12) If $b_{yx} = {}^{5}/_{18}, b_{xy} = {}^{8}/_{5}$, then $r =$ _____.

a) $2/5$ b) $2/3$

c) $1/2$ d) $3/2$

13) Idle time of queuing system is _____.

a) $1 - \frac{\lambda}{\mu}$ b) $\frac{\lambda}{\mu}$

c) $\frac{\mu}{\lambda}$ d) $1 - \frac{\mu}{\lambda}$

14) In a $M/M/1/\infty$ system the probability that there will be no customer in the system is _____.

a) ρ b) ρ^2

c) $1 - \rho$ d) $1 - \rho^2$

Instructions: 1) All questions are compulsory.
2) Figures to the right indicates full marks.
3) Use of non-programmable calculator is allowed.

Section – I

Q.2 Solve Any Three of the following. **09**

a) Solve $(D^3 - D^2 = -6D)y = x^2 + 1$

b) Evaluate $\int_0^\infty e^{-t}\left(\frac{1-\cos t}{t}\right)dt$

c) Find $Z\left\{\left(\frac{1}{3}\right)^{|k|}\right\}$

d) Find the inverse Laplace transform of $\frac{s+29}{(s+4)(s^2+9)}$

e) Find Inverse Z-transform of $\frac{1}{(z-5)^3}, |z| > 5$

Q.3 Solve Any Three of the following. **09**

a) Solve $(D^2 - 2D + 1)y = x^2e^{3x}$

b) Find $Z\{k^2a^{k-1}\}, k \geq 0$

c) Solve $(D^4 + 8D^2 + 16)y = \sin^2 x$

d) Find $L\{t.\sqrt{1-\sin t}\}$

e) Find $L^{-1}\left\{\log\left(1+\frac{a^2}{s^2}\right)\right\}$

Q.4 Solve Any Two of the following. **10**

a) Solve $(D^2 + 3D + 2)y = \sin(e^x)$

b) Using Laplace transform method solve
$y''(t) - y'(t) - 2y(t) = 20\sin 2t$, with $y(0) = 1$ and $y'(0) = 2$

c) Calculate inverse Z-Transform of $F(z) = \frac{z^2}{\left(z-\frac{1}{4}\right)\left(z-\frac{1}{5}\right)}$, if ROC is $|z| < \frac{1}{5}$

Section – II

Q.5 Solve Any Three of the following. **09**

a) Obtain Fourier series expansion of $f(x) = \frac{x(\pi^2 - x^2)}{12}$ in $(-\pi, \pi)$

b) Obtain half range cosine series of $f(x) = e^{-x}$ in $0 < x < \pi$

c) Assuming that half of the population in a city is vegetarian so that the chance of an individual being vegetarian is 1/2 and assuming that 100 investigators take a sample of 10 individuals to see whether they are vegetarian, how many investigators would you expect to report that three people or less were vegetarian.

d) Calculate: (i) k (ii) $p(x > 5)$ (iii) $p(0 \leq x \leq 5)$
if a random variable x has the following probability distribution.

x	1	2	3	4	5	6	7
$p(x)$	k	$2k$	$3k$	k^2	$k^2 + k$	$2k^2$	$4k^2$

e) With usual notation find the average waiting time per customer in the queue and in the system for $M/M/1/\infty$ model,
if $\lambda = 9$ and $\mu = 15$ per hour.

Q.6 Solve Any Three of the following. **09**

a) In a sample of 1000 students, the mean and standard deviation of marks obtained by the students in a certain test are 14 and 2.5. Assuming the distribution to be normal find the number of students getting marks

i) between 12 and 15
ii) above 18
iii) below 8

(Given: - For a S. N. V. z area between $z = 0$ and $z = 0.4$ is 0.1554, that between $z = 0$ and $z = 0.8$ is 0.2881, that between $z = 0$ and $z = 1.6$ is 0.4452, that between $z = 0$ and $z = 2.4$ is 0.4918.)

b) A supermarket has two girls serving at the two counters. The customers arrive in Poisson fashion at the rate of 12 per hour. The service time for each customer is exponential with mean 6 minutes. Find:

i) the probability that an arriving customer has to wait
ii) the average number of customers in the system

c) Obtain the Fourier expansion of, $f(x) = 2x - x^2$ in $(0,3)$.

d) Calculate the correlation co-efficient between x and y, if Nine students obtained the following percentage of marks in the college examination (x) and in the University examination (y).

x	51	53	73	46	50	60	47	36	60
y	49	72	74	44	58	66	50	30	55

e) The following mistakes per page were observed in a book.

No. of mistakes	0	1	2	3	4	Total
No. of pages	211	90	19	5	0	325

Fit a Poisson distribution.

Q.7 Solve Any Two of the following. **10**

a) A super market has two girls at the sales counter. If the service time for each customer is exponentially distributed with mean of 4 minutes and if the arrival time is Poisson with mean rate 10 per hour, find

i) the probability that a customer has to wait

ii) expected idle time for each gill

b) Obtain Fourier series of, $f(x) = \left(\frac{\pi - x}{2}\right)^2$, in $(0, 2\pi)$ and hence deduce that

$$\frac{\pi^2}{6} = \frac{1}{1^2} + \frac{1}{2^2} + \frac{1}{3^2} + \frac{1}{4^2} + \cdots$$

c) Calculate the equations of two lines of regression and calculate expected height of son when the height of father is 154 cms. Heights of fathers and sons are given below.

Ht. of Father (x)	150	152	155	157	160	161	164	166
Ht. of Son (y)	154	156	158	159	160	162	161	164

MCQ/Objective Type Questions

Duration: 30 Minutes Marks:14

Q.1 Choose the correct answers from the given options. 14

1) Which of the following is not a Dirichlet's condition?
a) $f(x)$ is periodic b) $f(x)$ is single valued
c) $f(x)$ is even function d) $f(x)$ is infinite

2) If $f(x) = x^2$ is expanded as a cosine series in $(0, \pi)$ then the constant term is _____.
a) $\frac{\pi^2}{3}$ b) $\frac{\pi^3}{3}$
c) $\frac{2\pi^2}{3}$ d) $\frac{3\pi^2}{2}$

3) Correlation analysis help us to _____ our activities.
a) Control b) Plan
c) Predict d) All of above

4) A discrete probability distribution function of a discrete random variable is given by,

x:	0	1	2	3	4
$P(x)$:	k	$3k$	$5k$	$4k$	$2k$

then $k =$ _____.
a) $1/3$ b) $1/15$
c) $1/5$ d) 1

5) If $b_{yx} = {}^{5}/_{18}, b_{xy} = {}^{8}/_{5}$, then $r =$ _____.
a) $2/5$ b) $2/3$
c) $1/2$ d) $3/2$

6) Idle time of queuing system is _____.

a) $1-\frac{\lambda}{\mu}$ b) $\frac{\lambda}{\mu}$

c) $\frac{\mu}{\lambda}$ d) $1-\frac{\mu}{\lambda}$

7) In a $M/M/1/\infty$ system the probability that there will be no customer in the system is _____.

a) ρ b) ρ^2

c) $1-\rho$ d) $1-\rho^2$

8) The complementary function of the equation $[(D+1)^2(D+4)]y = 2t$ is _____.

a) $c_1e^{-t}+c_2e^{-4t}+c_3e^{t}$ b) $c_1\cos t + c_2\sin t + c_3e^{-4t}$

c) $(c_1+c_2t)e^{t}+c_3e^{-4t}$ d) $(c_1+c_2t)e^{-t}+c_3e^{-4t}$

9) The general solution of $(D^4+2D^2+1)y=0$ is _____.

a) $c_1\cos x + c_2\sin x + c_3\cos x + c_4\sin x$

b) $(c_1+c_2x)e^{x}$

c) $(c_1+c_2x)\cos x + (c_3+c_4x)\sin x$

d) $(c_1+c_2x+c_3x^2+c_4x^3)e^{-x}$

10) The value of the integral $\int_0^\infty e^{-2t}\cos 3t\,dt$ is _____.

a) $1/13$ b) $2/13$

c) 13^2 d) 13

11) $L^{-1}\left\{\frac{1}{s^2-3^2}\right\} =$ _____.

a) $\frac{1}{3}\sin 3t$ b) $\frac{1}{3}\cos 3t$

c) $\frac{1}{3}\cosh 3t$ d) $\frac{1}{3}\sinh 3t$

12) If $Z\{f(k)\} = F(z)$, then $Z\{a^kf(k)\} =$ _____.

a) $F\left(\frac{z}{a}\right)$ b) $F\left(\frac{a}{z}\right)$

c) $\frac{1}{a}F\left(\frac{z}{a}\right)$ d) $\frac{1}{a}F\left(\frac{a}{z}\right)$

13) $Z^{-1}\left\{\frac{z}{z+a}\right\}, |Z| > a$ (with $k \geq 0$) is _____.

a) a^k b) $(-a)^k$

Q.5 Solve Any Three of the following. **09**

a) Obtain Fourier series expansion of $f(x) = \frac{x(\pi^2 - x^2)}{12}$ in $(-\pi, \pi)$

b) Obtain half range cosine series of $f(x) = e^{-x}$ in $0 < x < \pi$

c) Assuming that half of the population in a city is vegetarian so that the chance of an individual being vegetarian is 1/2 and assuming that 100 investigators take a sample of 10 individuals to see whether they are vegetarian, how many investigators would you expect to report that three people or less were vegetarian.

d) Calculate: (i) k (ii) $p(x > 5)$ (iii) $p(0 \leq x \leq 5)$
if a random variable x has the following probability distribution.

x	1	2	3	4	5	6	7
$p(x)$	k	$2k$	$3k$	k^2	$k^2 + k$	$2k^2$	$4k^2$

e) With usual notation find the average waiting time per customer in the queue and in the system for $M/M/1/\infty$ model,
if $\lambda = 9$ and $\mu = 15$ per hour.

Q.6 Solve Any Three of the following. **09**

a) In a sample of 1000 students, the mean and standard deviation of marks obtained by the students in a certain test are 14 and 2.5. Assuming the distribution to be normal find the number of students getting marks

i) between 12 and 15
ii) above 18
iii) below 8

(Given: - For a S. N. V. z area between $z = 0$ and $z = 0.4$ is 0.1554, that between $z = 0$ and $z = 0.8$ is 0.2881, that between $z = 0$ and $z = 1.6$ is 0.4452, that between $z = 0$ and $z = 2.4$ is 0.4918.)

b) A supermarket has two girls serving at the two counters. The customers arrive in Poisson fashion at the rate of 12 per hour. The service time for each customer is exponential with mean 6 minutes. Find:

i) the probability that an arriving customer has to wait
ii) the average number of customers in the system

c) Obtain the Fourier expansion of, $f(x) = 2x - x^2$ in $(0,3)$.

d) Calculate the correlation co-efficient between x and y, if Nine students obtained the following percentage of marks in the college examination (x) and in the University examination (y).

x	51	53	73	46	50	60	47	36	60
y	49	72	74	44	58	66	50	30	55

e) The following mistakes per page were observed in a book.

No. of mistakes	0	1	2	3	4	Total
No. of pages	211	90	19	5	0	325

Fit a Poisson distribution.

Q.7 Solve Any Two of the following. **10**

a) A super market has two girls at the sales counter. If the service time for each customer is exponentially distributed with mean of 4 minutes and if the arrival time is Poisson with mean rate 10 per hour, find

i) the probability that a customer has to wait

ii) expected idle time for each gill

b) Obtain Fourier series of, $f(x) = \left(\frac{\pi - x}{2}\right)^2$, in $(0, 2\pi)$ and hence deduce that

$$\frac{\pi^2}{6} = \frac{1}{1^2} + \frac{1}{2^2} + \frac{1}{3^2} + \frac{1}{4^2} + \cdots$$

c) Calculate the equations of two lines of regression and calculate expected height of son when the height of father is 154 cms. Heights of fathers and sons are given below.

Ht. of Father (x)	150	152	155	157	160	161	164	166
Ht. of Son (y)	154	156	158	159	160	162	161	164

2) Don't forget to Mention question paper set (P/Q/R/S) on top on page.
3) Figures to the right indicates full marks.
4) Use of non-programable calculator is allowed.

MCQ/Objective Type Questions

Duration: 30 Minutes Marks:14

Q.1 Choose the correct answers from the given options. 14

1) A discrete probability distribution function of a discrete random variable is given by,

x:	0	1	2	3	4
$P(x)$:	k	$3k$	$5k$	$4k$	$2k$

then $k =$ _____.

a) $1/3$ b) $1/15$
c) $1/5$ d) 1

2) If $b_{yx} = {}^{5}/_{18}, b_{xy} = {}^{8}/_{5}$, then $r =$ _____.

a) $2/5$ b) $2/3$
c) $1/2$ d) $3/2$

3) Idle time of queuing system is _____.

a) $1 - \frac{\lambda}{\mu}$ b) $\frac{\lambda}{\mu}$
c) $\frac{\mu}{\lambda}$ d) $1 - \frac{\mu}{\lambda}$

4) In a $M/M/1/\infty$ system the probability that there will be no customer in the system is _____.

a) ρ b) ρ^2
c) $1 - \rho$ d) $1 - \rho^2$

5) The complementary function of the equation $[(D+1)^2(D+4)]y = 2t$ is _____.

a) $c_1e^{-t} + c_2e^{-4t} + c_3e^{t}$ b) $c_1 \cos t + c_2 \sin t + c_3e^{-4t}$
c) $(c_1 + c_2t)e^{t} + c_3e^{-4t}$ d) $(c_1 + c_2t)e^{-t} + c_3e^{-4t}$

6) The general solution of $(D^4 + 2D^2 + 1)y = 0$ is _____.

a) $c_1 \cos x + c_2 \sin x + c_3 \cos x + c_4 \sin x$

b) $(c_1 + c_2 x)e^x$

c) $(c_1 + c_2 x)\cos x + (c_3 + c_4 x)\sin x$

d) $(c_1 + c_2 x + c_3 x^2 + c_4 x^3)e^{-x}$

7) The value of the integral $\int_0^\infty e^{-2t} \cos 3t \, dt$ is _____.

a) $1/13$ b) $2/13$

c) 13^2 d) 13

8) $L^{-1}\left\{\frac{1}{s^2-3^2}\right\} =$ _____.

a) $\frac{1}{3}\sin 3t$ b) $\frac{1}{3}\cos 3t$

c) $\frac{1}{3}\cosh 3t$ d) $\frac{1}{3}\sinh 3t$

9) If $Z\{f(k)\} = F(z)$, then $Z\{a^k f(k)\} =$ _____.

a) $F\left(\frac{z}{a}\right)$ b) $F\left(\frac{a}{z}\right)$

c) $\frac{1}{a}F\left(\frac{z}{a}\right)$ d) $\frac{1}{a}F\left(\frac{a}{z}\right)$

10) $Z^{-1}\left\{\frac{z}{z+a}\right\}, |Z| > a$ (with $k \geq 0$) is _____.

a) a^k b) $(-a)^k$

c) a^{k+1} d) a^{-k-1}

11) If $L\{f(t)\} = \phi(s)$, then $L\{f(at)\} =$ _____.

a) $\phi\left(\frac{s}{a}\right)$ b) $\frac{1}{s}\phi\left(\frac{s}{a}\right)$

c) $\frac{1}{a}\phi\left(\frac{s}{a}\right)$ d) $\phi'\left(\frac{s}{a}\right)$

12) Which of the following is not a Dirichlet's condition?

a) $f(x)$ is periodic b) $f(x)$ is single valued

c) $f(x)$ is even function d) $f(x)$ is infinite

13) If $f(x) = x^2$ is expanded as a cosine series in $(0, \pi)$ then the constant term is _____.

a) $\frac{\pi^2}{3}$ b) $\frac{\pi^3}{3}$

c) $\frac{2\pi^2}{3}$ d) $\frac{3\pi^2}{2}$

14) Correlation analysis help us to _____ our activities.

a) Control b) Plan

c) Predict d) All of above

Q.2 Solve Any Three of the following. **09**

a) Solve $(D^3 - D^2 = -6D)y = x^2 + 1$

b) Evaluate $\int_0^\infty e^{-t}\left(\frac{1-\cos t}{t}\right)dt$

c) Find $Z\left\{\left(\frac{1}{3}\right)^{|k|}\right\}$

d) Find the inverse Laplace transform of $\frac{s+29}{(s+4)(s^2+9)}$

e) Find Inverse Z-transform of $\frac{1}{(z-5)^3}, |z| > 5$

Q.3 Solve Any Three of the following. **09**

a) Solve $(D^2 - 2D + 1)y = x^2e^{3x}$

b) Find $Z\{k^2a^{k-1}\}, k \geq 0$

c) Solve $(D^4 + 8D^2 + 16)y = \sin^2 x$

d) Find $L\{t.\sqrt{1-\sin t}\}$

e) Find $L^{-1}\left\{\log\left(1+\frac{a^2}{s^2}\right)\right\}$

Q.4 Solve Any Two of the following. **10**

a) Solve $(D^2 + 3D + 2)y = \sin(e^x)$

b) Using Laplace transform method solve
$y''(t) - y'(t) - 2y(t) = 20\sin 2t$, with $y(0) = 1$ and $y'(0) = 2$

c) Calculate inverse Z-Transform of $F(z) = \frac{z^2}{\left(z-\frac{1}{4}\right)\left(z-\frac{1}{5}\right)}$, if ROC is $|z| < \frac{1}{5}$

Section – II

Q.5 Solve Any Three of the following. **09**

a) Obtain Fourier series expansion of $f(x) = \frac{x(\pi^2 - x^2)}{12}$ in $(-\pi, \pi)$

b) Obtain half range cosine series of $f(x) = e^{-x}$ in $0 < x < \pi$

c) Assuming that half of the population in a city is vegetarian so that the chance of an individual being vegetarian is 1/2 and assuming that 100 investigators take a sample of 10 individuals to see whether they are vegetarian, how many investigators would you expect to report that three people or less were vegetarian.

d) Calculate: (i) k (ii) $p(x > 5)$ (iii) $p(0 \leq x \leq 5)$
if a random variable x has the following probability distribution.

x	1	2	3	4	5	6	7
$p(x)$	k	$2k$	$3k$	k^2	$k^2 + k$	$2k^2$	$4k^2$

e) With usual notation find the average waiting time per customer in the queue and in the system for $M/M/1/\infty$ model,
if $\lambda = 9$ and $\mu = 15$ per hour.

Q.6 Solve Any Three of the following. **09**

a) In a sample of 1000 students, the mean and standard deviation of marks obtained by the students in a certain test are 14 and 2.5. Assuming the distribution to be normal find the number of students getting marks

i) between 12 and 15
ii) above 18
iii) below 8

(Given: - For a S. N. V. z area between $z = 0$ and $z = 0.4$ is 0.1554, that between $z = 0$ and $z = 0.8$ is 0.2881, that between $z = 0$ and $z = 1.6$ is 0.4452, that between $z = 0$ and $z = 2.4$ is 0.4918.)

Q.1 Choose the correct answers from the given options. **14**

1) $Z^{-1}\left\{\frac{z}{z+a}\right\}, |Z| > a$ (with $k \geq 0$) is _____.

a) a^k b) $(-a)^k$
c) a^{k+1} d) a^{-k-1}

2) If $L\{f(t)\} = \phi(s)$, then $L\{f(at)\} =$ _____.

a) $\phi\left(\frac{s}{a}\right)$ b) $\frac{1}{s}\phi\left(\frac{s}{a}\right)$
c) $\frac{1}{a}\phi\left(\frac{s}{a}\right)$ d) $\phi'\left(\frac{s}{a}\right)$

3) Which of the following is not a Dirichlet's condition?

a) $f(x)$ is periodic b) $f(x)$ is single valued
c) $f(x)$ is even function d) $f(x)$ is infinite

4) If $f(x) = x^2$ is expanded as a cosine series in $(0, \pi)$ then the constant term is _____.

a) $\frac{\pi^2}{3}$ b) $\frac{\pi^3}{3}$
c) $\frac{2\pi^2}{3}$ d) $\frac{3\pi^2}{2}$

5) Correlation analysis help us to _____ our activities.

a) Control b) Plan
c) Predict d) All of above

6) A discrete probability distribution function of a discrete random variable is given by,

x:	0	1	2	3	4
$P(x)$:	k	$3k$	$5k$	$4k$	$2k$

then $k =$ _____.

a) $1/3$ b) $1/15$

c) $1/5$ d) 1

7) If $b_{yx} = {}^{5}/_{18}, b_{xy} = {}^{8}/_{5}$, then $r =$ _____.

a) $2/5$ b) $2/3$

c) $1/2$ d) $3/2$

8) Idle time of queuing system is _____.

a) $1 - \frac{\lambda}{\mu}$ b) $\frac{\lambda}{\mu}$

c) $\frac{\mu}{\lambda}$ d) $1 - \frac{\mu}{\lambda}$

9) In a $M/M/1/\infty$ system the probability that there will be no customer in the system is _____.

a) ρ b) ρ^2

c) $1 - \rho$ d) $1 - \rho^2$

10) The complementary function of the equation $[(D+1)^2(D+4)]y = 2t$ is _____.

a) $c_1e^{-t} + c_2e^{-4t} + c_3e^{t}$ b) $c_1 \cos t + c_2 \sin t + c_3e^{-4t}$

c) $(c_1 + c_2t)e^{t} + c_3e^{-4t}$ d) $(c_1 + c_2t)e^{-t} + c_3e^{-4t}$

11) The general solution of $(D^4 + 2D^2 + 1)y = 0$ is _____.

4) Assume suitable data if necessary.

MCQ/Objective Type Questions

Duration: 30 Minutes Marks:14

Q.1 Choose the correct alternatives from the options and rewrite the sentence. **14**

1) What is the time period of the first generation of computers?
a) 1940-1956 b) 1956-1963
c) 1964-1971 d) 1971-Present

2) What does "upward compatibility" mean in computer systems?
a) New software works on old hardware
b) Old software works on new hardware
c) New hardware works on any software
d) Hardware upgrades are not needed

3) A load/store architecture is a characteristic of which type of ISA?
a) CISC b) VLIW
c) RISC d) Micro programmed ISA

4) Which addressing mode involves two memory accesses to obtain the operand?
a) Immediate b) Direct
c) Indirect d) Register

5) Fully associative mapping allows a block from main memory to be stored _____.
a) Only in a specific cache line b) In any cache line
c) In only even-numbered lines d) Only in set 0

6) A traditional uniprocessor system falls under which Flynn category?
a) SIMD b) MIMD
c) SISD d) MISD

7) The number of stages in a pipeline determines _____.
a) Clock speed
b) Memory access time
c) Instruction latency
d) Degree of parallelism

8) Which technique is commonly used to resolve data hazards?
a) Prefetching
b) Forwarding (bypassing)
c) Hazard detection unit
d) Pipeline flushing

9) What is the primary purpose of a DMA controller?
a) Speed up CPU clock
b) Handle memory paging
c) Transfer data between I/O device and memory directly
d) Manage cache operations

10) Temporal and spatial locality are exploited in which level of the memory hierarchy?
a) Main memory
b) Secondary storage
c) Cache memory
d) Virtual memory

11) Which of the following parallel programming languages is designed to simplify data parallelism in high-performance computing?
a) C++
b) Java
c) Fortran
d) CUDA

12) I/O module is often responsible for _____ and for subsequently reporting errors to the processor.
a) Control and timing
b) Processor communication
c) Device communication
d) Error Detection

13) Which type of data hazard occurs when an instruction tries to read a register that is being written by a previous instruction in the pipeline?
a) Write After Write (WAW)
b) Read After Write (RAW)
c) Write After Read (WAR)
d) No hazard

14) A key characteristic of Logical Programming is that it is _____.
a) State-driven
b) Based on solving problems by specifying a set of facts and rules
c) Focused on functions and operations
d) Dependent on mutable state

S.Y. (B.Tech.) (Computer Science & Engineering) (Semester - II) (New) (CBCS) Examination: March/April – 2026
Computer Organization and Architecture (CSEPCC-04)

Day & Date: Saturday, 16-05-2026 Max. Marks: 56
Time: 10:00 AM To 01:00 PM

Instructions: 1) All questions are compulsory
2) Figures to the right indicate full marks.
3) Assume suitable data if necessary.

SECTION – I

Q.2 Attempt Any Four. **16**

a) Explain Generation of Computer.

b) Define Bus and explain system Bus.

c) Explain Optimizing Compilers for Parallelism.

d) Write a short note on pseudo-Operations.

e) Explain in detail message passing model.

Q.3 Attempt Any Two. **12**

a) Write a short note on.
i) Shared Variable model
ii) Data parallel model

b) $x = a \times b + c \times d$ solve this equation by zero, one, one two, three address Instruction processor.

c) Explain memory Hierarchy with different levels of memory.

SECTION – II

Q.4 Attempt Any Four. **16**

a) Difference between Linear and Non-linear pipeline.

b) Explain basic compiler techniques for exposing ILP.

c) Differentiate between Memory Mapped I/O and I/O Mapped I/O.

d) Explain the Symmetric shared memory architecture with suitable diagram.

e) Short note on ILP Dynamic scheduling issues.

Q.5 Attempt Any Two. **12**

a) Explain in detail exploiting ILP using multiple issues & static scheduling.

b) What is pipelining? Explain different types of hazards that occur in pipeline.

c) Write a note on-

i) Direct memory access

ii) Interrupt Driven IO

S.Y. (B.Tech.) (Computer Science & Engineering) (Semester - II) (New) (CBCS) Examination: March/April – 2026
Computer Organization and Architecture (CSEPCC-04)

Day & Date: Saturday, 16-05-2026 Max. Marks: 70
Time: 10:00 AM To 01:00 PM

Instructions: 1) Q. No. 1 is compulsory. It should be solved in the first 30 minutes in Answer Book Page no 03 (Starting page of the Answer Book). Each question carries one mark.
2) Don't forget to Mention question paper set (P/Q/R/S) on top of page.
3) Figures to the right indicates full marks.
4) Assume suitable data if necessary.

MCQ/Objective Type Questions

Duration: 30 Minutes Marks:14

Q.1 Choose the correct alternatives from the options and rewrite the sentence. **14**

1) Which technique is commonly used to resolve data hazards?
a) Prefetching b) Forwarding (bypassing)
c) Hazard detection unit d) Pipeline flushing

2) What is the primary purpose of a DMA controller?
a) Speed up CPU clock
b) Handle memory paging
c) Transfer data between I/O device and memory directly
d) Manage cache operations

3) Temporal and spatial locality are exploited in which level of the memory hierarchy?
a) Main memory b) Secondary storage
c) Cache memory d) Virtual memory

4) Which of the following parallel programming languages is designed to simplify data parallelism in high-performance computing?
a) C++ b) Java
c) Fortran d) CUDA

5) I/O module is often responsible for _____ and for subsequently reporting errors to the processor.
a) Control and timing b) Processor communication
c) Device communication d) Error Detection

6) Which type of data hazard occurs when an instruction tries to read a register that is being written by a previous instruction in the pipeline?
a) Write After Write (WAW) b) Read After Write (RAW)
c) Write After Read (WAR) d) No hazard

7) A key characteristic of Logical Programming is that it is _____.
a) State-driven
b) Based on solving problems by specifying a set of facts and rules
c) Focused on functions and operations
d) Dependent on mutable state

8) What is the time period of the first generation of computers?
a) 1940-1956
b) 1956-1963
c) 1964-1971
d) 1971-Present

9) What does "upward compatibility" mean in computer systems?
a) New software works on old hardware
b) Old software works on new hardware
c) New hardware works on any software
d) Hardware upgrades are not needed

10) A load/store architecture is a characteristic of which type of ISA?
a) CISC
b) VLIW
c) RISC
d) Micro programmed ISA

11) Which addressing mode involves two memory accesses to obtain the operand?
a) Immediate
b) Direct
c) Indirect
d) Register

12) Fully associative mapping allows a block from main memory to be stored _____.
a) Only in a specific cache line
b) In any cache line
c) In only even-numbered lines
d) Only in set 0

13) A traditional uniprocessor system falls under which Flynn category?
a) SIMD
b) MIMD
c) SISD
d) MISD

14) The number of stages in a pipeline determines _____.
a) Clock speed
b) Memory access time
c) Instruction latency
d) Degree of parallelism

MCQ/Objective Type Questions

Duration: 30 Minutes Marks: 14

Q.1 Choose the correct Answer. 14

1) Which of the following regular expressions over $\{0,1\}$ denotes set of all strings not containing '100' as a substring?
a) $0^*(1+0)^*$ b) 0^*1010^*
c) 0^*101 d) $0^*(10+0)^*$

2) String containing at most two a's _____.
a) b^*ab^*a b) $b^*(a+\wedge)+b^*(a+\wedge)$
c) $b^*+b^*ab^*+b^*ab^*ab^*$ d) All of these

3) Explain regular expression $-\ a^*b^*$ in English.
a) All String in which do not here ba as Substring
b) All String in which any number of a's are followed by number of b's
c) Both a & b
d) None

4) What is the regular expression for the language set of string with at least one 1, one 2, and one 3?
a) $1+2+3$ b) $11^*22^*33^*$
c) $1^*2^*3^*$ d) Both a and b

5) Two finite state machines are said to be equivalent if they _____.
a) Have the same number of edges
b) Have the same number of states
c) Recognize the same set of tokens
d) Have the same number of states and edges

6) The CFG G and its production $S \rightarrow aS \mid bS \mid a \mid b$ generate _____.
a) $(a+b)^*+a+b$ b) $(a+b)(a+b)^*$
c) $(a+b)^*(aa+b)$ d) All of the above

7) The Language $L = \{0^n 1^n 2^k 3^k$ where $n, k > 0\}$ is a _____.
   a) context sensitive language
   b) context free language
   c) regular language
   d) recursive enumerable language

8) Which of the following statement is/are true or false?
   a) PDA = FA + 0 stack
   b) PDA = FA + 1 stack
   c) DPDA is a subset of NPDA
   d) NPDA and DPDA is equivalent in Power

9) PDA is more powerful than _____.
   a) Turing machine
   b) Linear bounded automata
   c) Finite automata
   d) All of the above

10) Pumping lemma is generally used for proving _____.
   a) Given grammar is regular
   b) Given grammar is not regular
   c) Given RE are equivalent
   d) None of these

11) In CFL pumping lemma, the length of vxy is _____.
   a) $\leq$ p
   b) $\geq$ p
   c) = p
   d) $>$ p

12) The instantaneous description (ID) of a TM represents _____.
   a) Current state, tape content, and head position
   b) Only current state and head position
   c) Only tape content and current state
   d) None of these

13) A TM that halts on all inputs is _____.
   a) Decider
   b) Recognizer
   c) Acceptor
   d) Generator

14) Turing machine has _____.
   a) Finite and read only tape
   b) Finite and read write tape
   c) Infinite and read only tape
   d) Infinite and read write tape

Set **P**

S.Y. (B.Tech.) (Computer Science & Engineering) (Semester - II) (New) (CBCS) Examination: March/April – 2026
Theory of Computation (CSEPCC-05)

Day & Date: Tuesday, 19-05-2026 Max. Marks: 56
Time: 10:00 AM To 01:00 PM

Instructions: 1) All questions are Compulsory.
2) Figures to the right indicate full marks.

SECTION – I

Q.2 Attempt Any Four of the following. **16**

a) Write the regular expression for following regular languages over $\sum = \{a, b\}$
- i) Set of all string does not end with 'a'
- ii) Set of all strings start and end with ab.
- iii) Set of all strings does not contain substring aaa
- iv) Set of all strings consist of at least two a

b) List and explain, application of regular expressions.

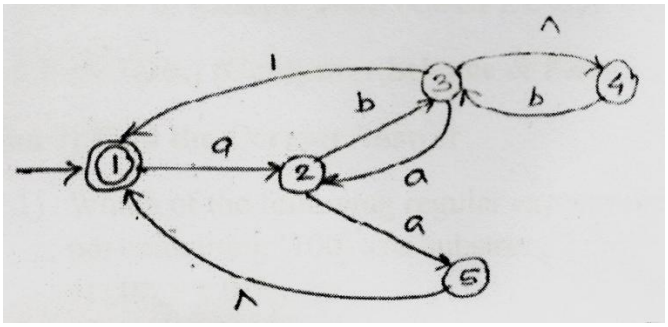
c) Define δ^* for NFA and NFA $-\wedge$

d) Differentiate between Malay and Moor Machine

e) Write a CFG for language $L = \{a^i b^j c^k | i = j \text{ or } j = k\}$

Q.3 Attempt Any Two of the following. **12**

a) Convert following NFA $-\wedge$ to NFA and DFA



b) Convert following grammar into CNF Notation

$S \rightarrow XXYZ$

$X \rightarrow aXb \mid \wedge$

$Y \rightarrow aY \mid a$

$Z \rightarrow aZa \mid bZb \mid \wedge$

c) Attempt the following:

i) Define the DFA and Design the DFA for $(0+1)^*010(0+1)^*$

ii) Define the CFG. Find the CFG for Regular expression $(\text{abb}+\text{b})^*\text{ab}^*\text{baa}$

SECTION – II

Q.4 Attempt Any Four of the following. **16**

a) Explain the types of acceptance of PDA.

b) Explain Instantaneous Description of PDA.

c) State and explain pumping lemma for CFL.

d) Show that $\text{L} = \{\text{WW} \mid \text{W}\ (0+1)^*\}$ is not a CFL.

e) Explain the following TM:

i) Mutitape TM

ii) Offline TM

Q.5 Attempt Any Two of the following. **12**

a) Design the TM that Compute the function $f(x,y)$, which is defined as follows:

$$f(x,y) = \begin{cases} x-y & \text{if } x \geq y \\ 0 & \text{if } x \leq 0 \end{cases}$$

OR

Design the TM for language of palindrome and show the simulation of string aba.

b) Construct a PDA for the language $L = \{a^{n+m}b^m c^n \mid n,m \geq 0\}$ and represent it using a transition table and state diagram. Further, trace the moves of the PDA for the string $aaabbc$ with initial stack symbol z_0, i.e., show the step-by-step execution starting from $\delta(q_0, aaabbc, z_0)$

c) Solve the following

i) Design the TM for set of all String ends with aba over $\sum = (\text{a},\text{b})$ i. e. $(\text{a}+\text{b})^*\text{aba}$

ii) Design the PDA for $L = \{a^i b^j \mid i = j \text{ for } i,j \geq 1\}$

S.Y. (B.Tech.) (Computer Science & Engineering) (Semester - II) (New) (CBCS) Examination: March/April – 2026
Theory of Computation (CSEPCC-05)

Day & Date: Tuesday, 19-05-2026 Max. Marks: 56
Time: 10:00 AM To 01:00 PM

Instructions: 1) All questions are Compulsory.
2) Figures to the right indicate full marks.

SECTION – I

Q.2 Attempt Any Four of the following. **16**

a) Write the regular expression for following regular languages over $\sum = \{a, b\}$
- i) Set of all string does not end with 'a'
- ii) Set of all strings start and end with ab.
- iii) Set of all strings does not contain substring aaa
- iv) Set of all strings consist of at least two a

b) List and explain, application of regular expressions.

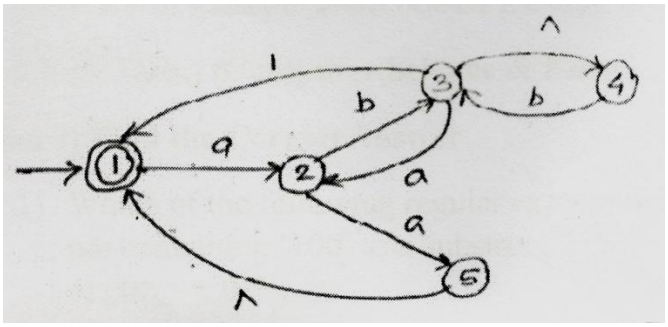
c) Define δ^* for NFA and NFA $-\wedge$

d) Differentiate between Malay and Moor Machine

e) Write a CFG for language $L = \{a^i b^j c^k | i = j \text{ or } j = k\}$

Q.3 Attempt Any Two of the following. **12**

a) Convert following NFA $-\wedge$ to NFA and DFA



b) Convert following grammar into CNF Notation

$S \rightarrow XXYZ$

$X \rightarrow aXb \mid \wedge$

$Y \rightarrow aY \mid a$

$Z \rightarrow aZa \mid bZb \mid \wedge$

c) Attempt the following:

i) Define the DFA and Design the DFA for $(0+1)^*010(0+1)^*$

ii) Define the CFG. Find the CFG for Regular expression $(\text{abb}+\text{b})^*\text{ab}^*\text{baa}$

SECTION – II

Q.4 Attempt Any Four of the following. **16**

a) Explain the types of acceptance of PDA.

b) Explain Instantaneous Description of PDA.

c) State and explain pumping lemma for CFL.

d) Show that $\text{L} = \{\text{WW} \mid \text{W}\ (0+1)^*\}$ is not a CFL.

e) Explain the following TM:

i) Mutitape TM

ii) Offline TM

Q.5 Attempt Any Two of the following. **12**

a) Design the TM that Compute the function $f(x,y)$, which is defined as follows:

$$f(x,y) = \begin{cases} x-y & \text{if } x \geq y \\ 0 & \text{if } x \leq 0 \end{cases}$$

OR

Design the TM for language of palindrome and show the simulation of string aba.

b) Construct a PDA for the language $L = \{a^{n+m}b^m c^n \mid n,m \geq 0\}$ and represent it using a transition table and state diagram. Further, trace the moves of the PDA for the string $aaabbc$ with initial stack symbol z_0, i.e., show the step-by-step execution starting from $\delta(q_0, aaabbc, z_0)$

c) Solve the following

i) Design the TM for set of all String ends with aba over $\sum = (\text{a},\text{b})$ i. e. $(\text{a}+\text{b})^*\text{aba}$

ii) Design the PDA for $L = \{a^i b^j \mid i = j \text{ for } i,j \geq 1\}$

Set R

S.Y. (B.Tech.) (Computer Science & Engineering) (Semester - II) (New) (CBCS) Examination: March/April – 2026
Theory of Computation (CSEPCC-05)

Day & Date: Tuesday, 19-05-2026 Max. Marks: 70
Time: 10:00 AM To 01:00 PM

Instructions: 1) Q. No. 1 is compulsory. It should be solved in the first 30 minutes in Answer Book Page no 03 (Starting page of the Answer Book). Each question carries one mark.
2) Don't forget to Mention question paper set (P/Q/R/S) on top of page.
3) Figures to the right indicates full marks.

MCQ/Objective Type Questions

Duration: 30 Minutes Marks: 14

Q.1 Choose the correct Answer. **14**

1) In CFL pumping lemma, the length of vxy is _____.
a) $\leq p$ b) $\geq p$
c) $= p$ d) $> p$

2) The instantaneous description (ID) of a TM represents _____.
a) Current state, tape content, and head position
b) Only current state and head position
c) Only tape content and current state
d) None of these

3) A TM that halts on all inputs is _____.
a) Decider b) Recognizer
c) Acceptor d) Generator

4) Turing machine has _____.
a) Finite and read only tape b) Finite and read write tape
c) Infinite and read only tape d) Infinite and read write tape

5) Which of the following regular expressions over $\{0,1\}$ denotes set of all strings not containing '100' as a substring?
a) $0^*(1+0)^*$ b) 0^*1010^*
c) 0^*101 d) $0^*(10+0)^*$

6) String containing at most two a's _____.
a) b^*ab^*a b) $b^*(a+\wedge)+b^*(a+\wedge)$
c) $b^*+b^*ab^*+b^*ab^*ab^*$ d) All of these

7) Explain regular expression $- a^*b^*$ in English.
   a) All String in which do not here ba as Substring
   b) All String in which any number of a's are followed by number of b's
   c) Both a & b
   d) None

8) What is the regular expression for the language set of string with at least one 1, one 2, and one 3?
   a) $1 + 2 + 3$
   b) $11^*22^*33^*$
   c) $1^*2^*3^*$
   d) Both a and b

9) Two finite state machines are said to be equivalent if they _____.
   a) Have the same number of edges
   b) Have the same number of states
   c) Recognize the same set of tokens
   d) Have the same number of states and edges

10) The CFG G and its production $S \rightarrow aS \mid bS \mid a \mid b$ generate _____.
   a) $(a + b)^* + a + b$
   b) $(a + b)(a + b)^*$
   c) $(a + b)^*(aa + b)$
   d) All of the above

11) The Language $L = \{0^n1^n2^k3^k$ where $n, k > 0\}$ is a _____.
   a) context sensitive language
   b) context free language
   c) regular language
   d) recursive enumerable language

12) Which of the following statement is/are true or false?
   a) PDA = FA + 0 stack
   b) PDA = FA + 1 stack
   c) DPDA is a subset of NPDA
   d) NPDA and DPDA is equivalent in Power

13) PDA is more powerful than _____.
   a) Turing machine
   b) Linear bounded automata
   c) Finite automata
   d) All of the above

14) Pumping lemma is generally used for proving _____.
   a) Given grammar is regular
   b) Given grammar is not regular
   c) Given RE are equivalent
   d) None of these

MCQ/Objective Type Questions

Duration: 30 Minutes Marks:14

Q.1 Choose the correct Answer. **14**

1) For outgoing traffic NAT box converts private IP address to company's public IP address.
a) TRUE b) Can't say
c) FALSE d) None of the above

2) In TCP, one end can stop sending data while still receiving data. This is called a _____.
a) Half-close b) One way termination
c) Half-open d) None of the above

3) Port addresses are _____ bits in length.
a) 32 Bits b) 64 Bits
c) 48 Bits d) 16 Bits

4) _____ converts a 16 bit integer from host byte order to network byte order.
a) htonl b) ntohl
c) htons d) ntohs

5) Which layers are absent in TCP/IP protocol suite?
a) Transport b) Session
c) Presentation d) Both b) and c)

6) Which of the following is an Application layer service?
a) NVT
b) File transfer, access and management
c) Mail service
d) All of these

7) First address in classless addressing can found as _____.
First address = (any address) _____ (network mask).
a) OR b) AND
c) NOT d) NOR

8) In TCP _____ timer is used during termination.
a) Keep alive b) TIME-WAIT
c) RTT d) Persistence

9) DHCP server issues a passive open command on it's UDP port number _____ and waits for a client.
a) 65 b) 66
c) 67 d) 68

10) FTP uses two well-known TCP ports: port 20 is used for the _____ connection.
a) Control b) Data
c) Error d) All above

11) Which of the following statement is incorrect?
Statement 1 : UDP is connectionless, unreliable transport protocol
Statement 2: UDP provide flow control.
Statement 3: UDP provide encapsulation and decapsulation service
a) Statement 1 and 2 b) Statement 1 and 3
c) Statement 2 and 3 d) Statement 2

12) After sending DHCPDISCOVER message to server, the client goes to the _____.
a) Requesting State b) Bound State
c) Renewal State d) Selecting State

13) In _____ sequence of character is without structure.
a) Flat Name Space b) Zone Name Space
c) Hierarchical Name Space d) None of the above

14) The _____ is used to map an address to a name.
a) Domain b) Reverse client
c) Inverse domain d) All of these

a) htonl b) ntohl
c) htons d) ntohs

9) Which layers are absent in TCP/IP protocol suite?
a) Transport b) Session
c) Presentation d) Both b) and c)

10) Which of the following is an Application layer service?
a) NVT
b) File transfer, access and management
c) Mail service
d) All of these

11) First address in classless addressing can found as _____.
First address = (any address) _____ (network mask).
a) OR b) AND
c) NOT d) NOR

12) In TCP _____ timer is used during termination.
a) Keep alive b) TIME-WAIT
c) RTT d) Persistence

13) DHCP server issues a passive open command on it's UDP port number _____ and waits for a client.
a) 65 b) 66
c) 67 d) 68

14) FTP uses two well-known TCP ports: port 20 is used for the _____ connection.
a) Control b) Data
c) Error d) All above

S.Y. (B.Tech.) (Computer Science & Engineering) (Semester - II) (New) (CBCS) Examination: March/April – 2026
Computer Networks (CSEPCC-06)

Day & Date: Thursday, 21-05-2026 Max. Marks: 56
Time: 10:00 AM To 01:00 PM

Instructions: 1) All questions are compulsory.
2) Figures to the right indicate full marks.

SECTION – I

Q.2 Attempt the following. (Any Three) **12**

a) Write a short note on the TCP timers.

b) Explain in detail NAT.

c) Explain different services of SCTP.

d) An address in a block is given as 180.8.17.9/16. Find the number of addresses in the block, the firstaddress, and the last address

Q.3 Attempt the following. (Any Two) **16**

a) Elaborate the connection oriented concurrent server in detail.

b) Explain TCP connection establishment Three way handshaking in detail.

c) Draw diagram for OSI reference model and explain functions of each layer.

SECTION – II

Q.4 Attempt the following. (Any Three) **12**

a) What is SSH? Explain format of SSH Packet.

b) Explain Generic and Country Domains of DNS.

c) Explain FTP with neat diagram.

d) Explain SMTP with diagram.

Q.5 Attempt the following. (Any Two) **16**

a) Explain address allocation in DHCP. Draw & Explain DHCP client state transition diagram.

b) What is Remote Login? Explain the concept of NVT.

c) Explain the E-mail architecture with its four scenarios.

S.Y. (B.Tech.) (Computer Science & Engineering) (Semester - II) (New) (CBCS) Examination: March/April – 2026
Computer Networks (CSEPCC-06)

Day & Date: Thursday, 21-05-2026 Max. Marks: 70
Time: 10:00 AM To 01:00 PM

Instructions: 1) Q. No. 1 is compulsory. It should be solved in the first 30 minutes in Answer Book Page no 03 (Starting page of the Answer Book). Each question carries one mark.
2) Don't forget to Mention question paper set (P/Q/R/S) on top of page.
3) Figures to the right indicates full marks.

MCQ/Objective Type Questions

Duration: 30 Minutes Marks:14

Q.1 Choose the correct Answer. **14**

1) Which of the following is an Application layer service?
a) NVT
b) File transfer, access and management
c) Mail service
d) All of these

2) First address in classless addressing can found as _____.
First address = (any address) _____ (network mask).
a) OR b) AND
c) NOT d) NOR

3) In TCP _____ timer is used during termination.
a) Keep alive b) TIME-WAIT
c) RTT d) Persistence

4) DHCP server issues a passive open command on it's UDP port number _____ and waits for a client.
a) 65 b) 66
c) 67 d) 68

5) FTP uses two well-known TCP ports: port 20 is used for the _____ connection.
a) Control b) Data
c) Error d) All above

6) Which of the following statement is incorrect?
Statement 1 : UDP is connectionless, unreliable transport protocol
Statement 2: UDP provide flow control.
Statement 3: UDP provide encapsulation and decapsulation service
a) Statement 1 and 2 b) Statement 1 and 3
c) Statement 2 and 3 d) Statement 2

7) After sending DHCPDISCOVER message to server, the client goes to the _____.
a) Requesting State b) Bound State
c) Renewal State d) Selecting State

8) In _____ sequence of character is without structure.
a) Flat Name Space b) Zone Name Space
c) Hierarchical Name Space d) None of the above

9) The _____ is used to map an address to a name.
a) Domain b) Reverse client
c) Inverse domain d) All of these

10) For outgoing traffic NAT box converts private IP address to company's public IP address.
a) TRUE b) Can't say
c) FALSE d) None of the above

11) In TCP, one end can stop sending data while still receiving data. This is called a _____.
a) Half-close b) One way termination
c) Half-open d) None of the above

12) Port addresses are _____ bits in length.
a) 32 Bits b) 64 Bits
c) 48 Bits d) 16 Bits

13) _____ converts a 16 bit integer from host byte order to network byte order.
a) htonl b) ntohl
c) htons d) ntohs

14) Which layers are absent in TCP/IP protocol suite?
a) Transport b) Session
c) Presentation d) Both b) and c)

MCQ/Objective Type Questions

Duration: 30 Minutes Marks:14

Q.1 Choose Correct answer MCQ/ Objective Questions. 14

1) Innovation provides _____.
a) Stability b) Competitive advantage
c) Similarity d) Confusion

2) Managerial competency involves _____.
a) Fundraising only
b) Communication, planning, and leadership
c) Imitation
d) None

3) Entrepreneurship as a style of management focuses on _____.
a) Routine activities
b) Risk avoidance
c) Innovation and opportunity recognition
d) Only HR

4) A corporate entrepreneur is _____.
a) Owner of small business
b) Government employee
c) Innovator within an organization
d) None

5) Technology transfer occurs when _____.
a) Knowledge is shared from research to application
b) Patents expire
c) Innovation fails
d) Licenses are revoked

6) Six Thinking Hats tool was developed by _____.
a) Peter Drucker b) Steve Jobs
c) Edward de Bono d) Clayton Christensen

7) NUF test stands for _____.
a) Necessary, Useful, Feasible
b) Need, Use, Focus
c) None
d) Necessary, Unusual, Functional

8) Which is not a type of innovation strategy?
a) Pioneering b) Imitative
c) Disruptive d) Delaying

9) Red Ocean strategy is about _____.
a) Uncontested markets
b) Price competition in saturated markets
c) Patent generation
d) Blue economy

10) Continuous learning is essential for _____.
a) Innovation growth b) Routine operations
c) Cost reduction d) Project closure

11) Failure in innovation can occur due to _____.
a) Over-regulation b) Poor planning
c) Lack of feedback d) All of these

12) Crafting a business model involves _____.
a) Ignoring customers
b) Defining value, segments, and revenue streams
c) Random investments
d) Borrowing

13) Legal consideration in entrepreneurship includes _____.
a) Product packaging b) Compliance and regulations
c) Floor layout d) Office color

MCQ/Objective Type Questions

Duration: 30 Minutes Marks:14

Q.1 Choose the correct alternative: **14**

1) Which of the following is a key goal of sustainable development?
a) Increase in fossil fuel consumption
b) Balanced use of resources
c) Maximum economic growth only
d) Eliminating renewable energy use

2) What is a key characteristic of solar energy?
a) Utilizes sunlight for power generation
b) Requires fossil fuels for operation
c) Has no environmental benefits
d) ls non-renewable

3) Which renewable energy is best suited for coastal areas?
a) Biomass energy b) Geothermal energy
c) Wave and tidal energy d) Oil shale energy

4) What is solar radiation?
a) Radiation from the Earth b) Radiation from the Moon
c) Radiation from the Sun d) None of the above

5) What is solar radiation measured in?
a) Kilograms
b) Liters
c) Watts per square meter (W/m^2)
d) Newtons

6) What is the primary difference between pyrolysis and gasification?
   a) Gasification uses a small amount of oxygen, while pyrolysis occurs in the absence of oxygen
   b) Pyrolysis produces syngas, while gasification produces bio-oil
   c) Gasification is a biochemical process, while pyrolysis is thermo chemical
   d) Pyrolysis requires higher temperatures than gasification

7) Which of the following is a disadvantage of biomass energy?
   a) Reduces waste
   b) Can lead to deforestation
   c) Low carbon footprint
   d) Independent of weather conditions

8) What happens when electricity demand is higher than generation?
   a) Energy storage can provide additional power
   b) Renewable energy sources produce more electricity
   c) Power plants automatically increase supply
   d) Transmission lines store energy

9) Which of the following sectors benefits the most from energy storage?
   a) Agriculture
   b) Construction
   c) Transport
   d) Power generation

10) What does the efficiency of an energy storage device indicate?
   a) The time taken to store energy
   b) The total cost of the device
   c) The percentage of stored energy that can be retrieved
   d) The size of the storage system

11) In hydro power stations what is an enlarged body of water just above the intake and used as a regulating reservoir called?
   a) Penstock
   b) Reservoir
   c) Fore bay
   d) Spillways

12) Tidal energy is caused primarily by the _____.
   a) Moon's gravity
   b) Sun's gravity
   c) Earth's rotation
   d) Ocean currents

13) Green hydrogen is produced by _____.
   a) Coal gasification
   b) Methane reforming
   c) Water electrolysis using renewable energy
   d) Nuclear fission

14) Which is the cleanest method of hydrogen production?
   a) Electrolysis using solar/wind energy
   b) Coal gasification
   c) Nuclear thermal splitting
   d) Steam methane reforming

Renewable Energy (OE-02C)

Day & Date: Friday, 22-05-2026 Max. Marks: 56
Time: 03:00 PM To 06:00 PM

Instructions: 1) Q. 2 from section I is compulsory. Solve any two questions from Q.3, 4 and 5.
2) Q.6 from section two is compulsory. Solve any two questions from Q.7, 8 and 9.
3) Figures to the right indicates full marks.
4) Assume suitable data if necessary and mention it clearly.

SECTION – I

Q.2	**a)**	What is biomass energy, and how is it produced from the biomass?	**05**
	b)	Explain with neat sketch working of Pyrheliometer.	**05**
Q.3	**a)**	Give the detailed classification of wind energy conversion systems.	**04**
	b)	Explain how the Internet of Energy (IoE) can improve energy distribution in smart cities.	**05**
Q.4	**a)**	Explain with neat sketch working of a Flat Plate Collector.	**04**
	b)	Enlist and explain the major biomass resources available in India. How can these resources be utilized to address energy demands while ensuring sustainability?	**05**
Q.5	**a)**	Differentiate between solar thermal and solar photovoltaic systems those are used for power generation.	**04**
	b)	What are the criterions considered for selection of site for the wind mill?	**05**

SECTION – II

Q.6	**a)**	Enlist and explain the major problems that arise due to the absence of energy storage in power generation.	**05**
	b)	Draw the neat sketch of layout for hydroelectric power plat and explain the components.	**05**

Q.7	**a)**	Explain with neat sketch working of open cycle Ocen Thermal Energy Conversion (OTEC) system.	**04**
	b)	Give the general specifications of Energy Storage devices.	**05**
Q.8	**a)**	Give the detailed classification of hydroelectric power plants.	**04**
	b)	Enlist different types of tidal energy conversion systems and explain any one with neat sketch.	**05**
Q.9	**a)**	How will you estimate a hydropower? Explain the terms involved in it.	**04**
	b)	State and explain different hydrogen storage methods.	**05**

Seat No.	

Set **Q**

S.Y. (B.Tech.) (Computer Science & Engineering) (Semester - II) (New) (CBCS) Examination: March/April – 2026
Renewable Energy (OE-02C)

Day & Date: Friday, 22-05-2026 Max. Marks: 70
Time: 03:00 PM To 06:00 PM

Instructions: 1) Q. No. 1 is compulsory. It should be solved in the first 30 minutes in Answer Book Page no 03 (Starting page of the Answer Book). Each question carries one mark.
2) Don't forget to Mention question paper set (P/Q/R/S) on top of page.
3) Figures to the right indicates full marks.
4) Assume suitable data if necessary and mention it clearly.

MCQ/Objective Type Questions

Duration: 30 Minutes Marks:14

Q.1 Choose the correct alternative: **14**

1) What happens when electricity demand is higher than generation?
a) Energy storage can provide additional power
b) Renewable energy sources produce more electricity
c) Power plants automatically increase supply
d) Transmission lines store energy

2) Which of the following sectors benefits the most from energy storage?
a) Agriculture b) Construction
c) Transport d) Power generation

3) What does the efficiency of an energy storage device indicate?
a) The time taken to store energy
b) The total cost of the device
c) The percentage of stored energy that can be retrieved
d) The size of the storage system

4) In hydro power stations what is an enlarged body of water just above the intake and used as a regulating reservoir called?
a) Penstock b) Reservoir
c) Fore bay d) Spillways

5) Tidal energy is caused primarily by the _____.
a) Moon's gravity b) Sun's gravity
c) Earth's rotation d) Ocean currents

6) Green hydrogen is produced by _____.
a) Coal gasification
b) Methane reforming
c) Water electrolysis using renewable energy
d) Nuclear fission

7) Which is the cleanest method of hydrogen production?
   a) Electrolysis using solar/wind energy
   b) Coal gasification
   c) Nuclear thermal splitting
   d) Steam methane reforming

8) Which of the following is a key goal of sustainable development?
   a) Increase in fossil fuel consumption
   b) Balanced use of resources
   c) Maximum economic growth only
   d) Eliminating renewable energy use

9) What is a key characteristic of solar energy?
   a) Utilizes sunlight for power generation
   b) Requires fossil fuels for operation
   c) Has no environmental benefits
   d) ls non-renewable

10) Which renewable energy is best suited for coastal areas?
   a) Biomass energy
   b) Geothermal energy
   c) Wave and tidal energy
   d) Oil shale energy

11) What is solar radiation?
   a) Radiation from the Earth
   b) Radiation from the Moon
   c) Radiation from the Sun
   d) None of the above

12) What is solar radiation measured in?
   a) Kilograms
   b) Liters
   c) Watts per square meter (W/m^2)
   d) Newtons

13) What is the primary difference between pyrolysis and gasification?
   a) Gasification uses a small amount of oxygen, while pyrolysis occurs in the absence of oxygen
   b) Pyrolysis produces syngas, while gasification produces bio-oil
   c) Gasification is a biochemical process, while pyrolysis is thermo chemical
   d) Pyrolysis requires higher temperatures than gasification

14) Which of the following is a disadvantage of biomass energy?
   a) Reduces waste
   b) Can lead to deforestation
   c) Low carbon footprint
   d) Independent of weather conditions

Set Q

S.Y. (B.Tech.) (Computer Science & Engineering) (Semester - II) (New) (CBCS) Examination: March/April – 2026
Renewable Energy (OE-02C)

Day & Date: Friday, 22-05-2026 Max. Marks: 56
Time: 03:00 PM To 06:00 PM

Instructions: 1) Q. 2 from section I is compulsory. Solve any two questions from Q.3, 4 and 5.
2) Q.6 from section two is compulsory. Solve any two questions from Q.7, 8 and 9.
3) Figures to the right indicates full marks.
4) Assume suitable data if necessary and mention it clearly.

SECTION – I

Q.2	**a)**	What is biomass energy, and how is it produced from the biomass?	**05**
	b)	Explain with neat sketch working of Pyrheliometer.	**05**
Q.3	**a)**	Give the detailed classification of wind energy conversion systems.	**04**
	b)	Explain how the Internet of Energy (IoE) can improve energy distribution in smart cities.	**05**
Q.4	**a)**	Explain with neat sketch working of a Flat Plate Collector.	**04**
	b)	Enlist and explain the major biomass resources available in India. How can these resources be utilized to address energy demands while ensuring sustainability?	**05**
Q.5	**a)**	Differentiate between solar thermal and solar photovoltaic systems those are used for power generation.	**04**
	b)	What are the criterions considered for selection of site for the wind mill?	**05**

SECTION – II

Q.6	**a)**	Enlist and explain the major problems that arise due to the absence of energy storage in power generation.	**05**
	b)	Draw the neat sketch of layout for hydroelectric power plat and explain the components.	**05**

Q.7	**a)**	Explain with neat sketch working of open cycle Ocen Thermal Energy Conversion (OTEC) system.	**04**
	b)	Give the general specifications of Energy Storage devices.	**05**
Q.8	**a)**	Give the detailed classification of hydroelectric power plants.	**04**
	b)	Enlist different types of tidal energy conversion systems and explain any one with neat sketch.	**05**
Q.9	**a)**	How will you estimate a hydropower? Explain the terms involved in it.	**04**

S.Y. (B.Tech.) (Computer Science & Engineering) (Semester - II) (New) (CBCS) Examination: March/April – 2026
Measurement, Instrumentation and Sensors (OE-02D)

Day & Date: Friday, 22-05-2026 Max. Marks: 70
Time: 03:00 PM To 06:00 PM

Instructions: 1) Q. No. 1 is compulsory. It should be solved in the first 30 minutes in Answer Book Page no 03 (Starting page of the Answer Book). Each question carries one mark
2) Don't forget to Mention question paper set (P/Q/R/S) on top on page.
3) Figures to the right indicates full marks.
4) Assume suitable data if necessary.

MCQ/Objective Type Questions

Duration: 30 Minutes Marks:14

Q.1 Choose the correct answer. **14**

1) Which of the following is not a type of systematic error?
a) Instrumental Errors b) Environmental Errors
c) Observational Errors d) Gross error

2) _____ instruments are those which measure the total quantity of electricity delivered in a particular time.
a) Absolute b) Indicating
c) Recording d) Integrating

3) A moving iron instrument can be used for _____.
a) D.C. only b) A.C. only
c) Both D.C. and A.C. d) None

4) _____ method is suitable for the measurement of a resistance of expected value less than one ohm.
a) Substitution b) Loss of charge
c) Wheatstone bridge d) Kelvin's double bridge

5) Instrument transformers are _____.
a) Potential transformers b) Current transformers
c) Both (a) and (b) d) Power transformers

6) In a DSO, the input signals are _____.
   a) directly applied to oscilloscope
   b) multiplexed, converted to digital form and stored and applied to oscilloscope
   c) multiplexed, converted to digital form stored, converted to analog form and applied to oscilloscope
   d) applied to amplifier, stored as analog signals, multiplexed, converted to digital form, stored in digital form, converted to analog form, and applied to CRO through an amplifier.

7) The power of n-phase unbalanced circuit can be measured by using a minimum of _____.
   a) n wattmeters
   b) (n + 1) wattmeters
   c) (n - 2) wattmeters
   d) (n - 1) wattmeters

8) Which transducer does not require any external power supply for working?
   a) Strain gauge transducer
   b) Piezoelectric Crystals
   c) Hydraulic transducer
   d) Pneumatic transducer

9) Piezoelectric accelerometer converts _____ energy to _____ energy.
   a) mechanical, sound
   b) mechanical, electrical
   c) sound, electrical
   d) None of these

10) Which factor affects the least while selection of sensor?
   a) Size
   b) Accuracy
   c) Colour
   d) Durability

11) Which sensor should be used for calculating pressure?
   a) DHT11
   b) LM335Z/NOPB
   c) HC-SR04
   d) MPX10DP

12) Which of the following represents range of frequency measured by ADC?
   a) Bandwidth
   b) Threshold frequency
   c) Peak frequency
   d) None of the mentioned

13) Thermistor is a _____.
   a) sensor
   b) ADC
   c) transducer
   d) micro controller

14) Which of the following type output is provided by ADC?
   a) Serial type
   b) Parallel type
   c) Both serial and parallel type
   d) None of the mentioned

Seat No.	

Set **P**

S.Y. (B.Tech.) (Computer Science & Engineering) (Semester - II) (New) (CBCS) Examination: March/April – 2026
Measurement, Instrumentation and Sensors (OE-02D)

Day & Date: Friday, 22-05-2026 Max. Marks: 56
Time: 03:00 PM To 06:00 PM

Instructions: 1) All questions are compulsory.
2) Figures to the right indicate full marks.
3) Assume suitable data if necessary.
4) Draw neat diagrams whenever necessary.

SECTION – I

Q.2 Attempt the following. (Any Four) **16**

a) Explain the term:
i) Accuracy
ii) Linearity
iii) Reproducibility
iv) Precision

b) Describe different damping methods in details.

c) Difference between Current Transformer and Potential Transformer.

d) Explain with neat diagram, working of ramp type digital voltmeter.

e) Explain Anderson Bridge with phasor diagram. Also derive the equation of dissipation factor.

Q.3 Attempt the following. (Any Two) **12**

a) Draw the equivalent circuit and phasor diagram of a PT. Derive expression for actual transformation ratio.

b) Explain the method of measurement of power using two wattmeter for balanced load. Also derive the equation of power factor.

c) A bridge consists of the following:
Arm ab: - A choke coil having resistance R1 & amp: inductance L1
Arm bc: - A non-inductive resistance R3
Arm cd: - A mica condenser C4 in series with non-inductive resistance R4
Arm da: - A non-inductive resistance R2
When this bridge fed from a source of 500 Hz, balance is obtained under following Conditions. $R2 = 2410\ \Omega$, $R3 = 750\ \Omega$, $C4 = 0.35\ \mu F$, $R4 = 64.5\ \Omega$ The series resistance of capacitor is 0.4Ω. Calculate resistance and Inductance of choke coil. The supply is connected between a & c and detector is between b & d.

SECTION – II

Q.4 Attempt the following. (Any Four) **16**

a) Explain units of measurement.

b) Explain the principle of working of piezo-electric effect sensor.

c) Explain the basic concept of analog to digital converter.

d) Explain the sensor interfacing circuit's data transmission.

e) State the different types of temperature sensor and explain any one of them.

Q.5 Attempt the following. (Any Two) **12**

a) State and explain the different types of batteries for low power sensors.

b) Stale and explain the sensors used for Displacement, and Level application.

c) Explain the concept of humidity and state different types of sensor used to measure humidity.

S.Y. (B.Tech.) (Computer Science & Engineering) (Semester - II) (New) (CBCS) Examination: March/April – 2026
Measurement, Instrumentation and Sensors (OE-02D)

Day & Date: Friday, 22-05-2026 Max. Marks: 70
Time: 03:00 PM To 06:00 PM

Instructions: 1) Q. No. 1 is compulsory. It should be solved in the first 30 minutes in Answer Book Page no 03 (Starting page of the Answer Book). Each question carries one mark
2) Don't forget to Mention question paper set (P/Q/R/S) on top on page.
3) Figures to the right indicates full marks.
4) Assume suitable data if necessary.

MCQ/Objective Type Questions

Duration: 30 Minutes Marks:14

Q.1 Choose the correct answer. 14

1) Which transducer does not require any external power supply for working?
a) Strain gauge transducer b) Piezoelectric Crystals
c) Hydraulic transducer d) Pneumatic transducer

2) Piezoelectric accelerometer converts _____ energy to _____ energy.
a) mechanical, sound b) mechanical, electrical
c) sound, electrical d) None of these

3) Which factor affects the least while selection of sensor?
a) Size b) Accuracy
c) Colour d) Durability

4) Which sensor should be used for calculating pressure?
a) DHT11 b) LM335Z/NOPB
c) HC-SR04 d) MPX10DP

5) Which of the following represents range of frequency measured by ADC?
a) Bandwidth b) Threshold frequency
c) Peak frequency d) None of the mentioned

6) Thermistor is a _____.
a) sensor b) ADC
c) transducer d) micro controller

7) Which of the following type output is provided by ADC?
a) Serial type b) Parallel type
c) Both serial and parallel type d) None of the mentioned

8) Which of the following is not a type of systematic error?
a) Instrumental Errors b) Environmental Errors
c) Observational Errors d) Gross error

9) _____ instruments are those which measure the total quantity of electricity delivered in a particular time.
a) Absolute b) Indicating
c) Recording d) Integrating

10) A moving iron instrument can be used for _____.
a) D.C. only b) A.C. only
c) Both D.C. and A.C. d) None

11) _____ method is suitable for the measurement of a resistance of expected value less than one ohm.
a) Substitution b) Loss of charge
c) Wheatstone bridge d) Kelvin's double bridge

12) Instrument transformers are _____.
a) Potential transformers b) Current transformers
c) Both (a) and (b) d) Power transformers

13) In a DSO, the input signals are _____.
a) directly applied to oscilloscope
b) multiplexed, converted to digital form and stored and applied to oscilloscope
c) multiplexed, converted to digital form stored, converted to analog form and applied to oscilloscope
d) applied to amplifier, stored as analog signals, multiplexed, converted to digital form, stored in digital form, converted to analog form, and applied to CRO through an amplifier.

14) The power of n-phase unbalanced circuit can be measured by using a minimum of _____.
a) n wattmeters b) (n + 1) wattmeters
c) (n - 2) wattmeters d) (n - 1) wattmeters

S.Y. (B.Tech.) (Computer Science & Engineering) (Semester - II) (New) (CBCS) Examination: March/April – 2026
Measurement, Instrumentation and Sensors (OE-02D)

Day & Date: Friday, 22-05-2026 Max. Marks: 56
Time: 03:00 PM To 06:00 PM

Instructions: 1) All questions are compulsory.
2) Figures to the right indicate full marks.
3) Assume suitable data if necessary.
4) Draw neat diagrams whenever necessary.

SECTION – I

Q.2 Attempt the following. (Any Four) **16**

a) Explain the term:
i) Accuracy
ii) Linearity
iii) Reproducibility
iv) Precision

b) Describe different damping methods in details.

c) Difference between Current Transformer and Potential Transformer.

d) Explain with neat diagram, working of ramp type digital voltmeter.

e) Explain Anderson Bridge with phasor diagram. Also derive the equation of dissipation factor.

Q.3 Attempt the following. (Any Two) **12**

a) Draw the equivalent circuit and phasor diagram of a PT. Derive expression for actual transformation ratio.

b) Explain the method of measurement of power using two wattmeter for balanced load. Also derive the equation of power factor.

c) A bridge consists of the following:
Arm ab: - A choke coil having resistance R1 & amp: inductance L1
Arm bc: - A non-inductive resistance R3
Arm cd: - A mica condenser C4 in series with non-inductive resistance R4
Arm da: - A non-inductive resistance R2
When this bridge fed from a source of 500 Hz, balance is obtained under following Conditions. $R2 = 2410\ \Omega$, $R3 = 750\ \Omega$, $C4 = 0.35\ \mu F$, $R4 = 64.5\ \Omega$ The series resistance of capacitor is 0.4Ω. Calculate resistance and Inductance of choke coil. The supply is connected between a & c and detector is between b & d.

SECTION – II

Q.4 Attempt the following. (Any Four) **16**

a) Explain units of measurement.

b) Explain the principle of working of piezo-electric effect sensor.

c) Explain the basic concept of analog to digital converter.

d) Explain the sensor interfacing circuit's data transmission.

e) State the different types of temperature sensor and explain any one of them.

Q.5 Attempt the following. (Any Two) **12**

a) State and explain the different types of batteries for low power sensors.

b) Stale and explain the sensors used for Displacement, and Level application.

c) Explain the concept of humidity and state different types of sensor used to measure humidity.

Seat No.	

Set **R**

S.Y. (B.Tech.) (Computer Science & Engineering) (Semester - II) (New) (CBCS) Examination: March/April – 2026
Measurement, Instrumentation and Sensors (OE-02D)

Day & Date: Friday, 22-05-2026 Max. Marks: 70
Time: 03:00 PM To 06:00 PM

Instructions: 1) Q. No. 1 is compulsory. It should be solved in the first 30 minutes in Answer Book Page no 03 (Starting page of the Answer Book). Each question carries one mark
2) Don't forget to Mention question paper set (P/Q/R/S) on top on page.
3) Figures to the right indicates full marks.
4) Assume suitable data if necessary.

MCQ/Objective Type Questions

Duration: 30 Minutes Marks:14

Q.1 Choose the correct answer. **14**

1) Which sensor should be used for calculating pressure?
a) DHT11 b) LM335Z/NOPB
c) HC-SR04 d) MPX10DP

2) Which of the following represents range of frequency measured by ADC?
a) Bandwidth b) Threshold frequency
c) Peak frequency d) None of the mentioned

3) Thermistor is a _____.
a) sensor b) ADC
c) transducer d) micro controller

4) Which of the following type output is provided by ADC?
a) Serial type b) Parallel type
c) Both serial and parallel type d) None of the mentioned

5) Which of the following is not a type of systematic error?
a) Instrumental Errors b) Environmental Errors
c) Observational Errors d) Gross error

6) _____ instruments are those which measure the total quantity of electricity delivered in a particular time.
a) Absolute b) Indicating
c) Recording d) Integrating

7) A moving iron instrument can be used for _____.
a) D.C. only b) A.C. only
c) Both D.C. and A.C. d) None

8) _____ method is suitable for the measurement of a resistance of expected value less than one ohm.

a) Substitution
b) Loss of charge
c) Wheatstone bridge
d) Kelvin's double bridge

9) Instrument transformers are _____.

a) Potential transformers
b) Current transformers
c) Both (a) and (b)
d) Power transformers

10) In a DSO, the input signals are _____.

a) directly applied to oscilloscope
b) multiplexed, converted to digital form and stored and applied to oscilloscope
c) multiplexed, converted to digital form stored, converted to analog form and applied to oscilloscope
d) applied to amplifier, stored as analog signals, multiplexed, converted to digital form, stored in digital form, converted to analog form, and applied to CRO through an amplifier.

11) The power of n-phase unbalanced circuit can be measured by using a minimum of _____.

a) n wattmeters
b) (n + 1) wattmeters
c) (n - 2) wattmeters
d) (n - 1) wattmeters

12) Which transducer does not require any external power supply for working?

a) Strain gauge transducer
b) Piezoelectric Crystals
c) Hydraulic transducer
d) Pneumatic transducer

13) Piezoelectric accelerometer converts _____ energy to _____ energy.

a) mechanical, sound
b) mechanical, electrical
c) sound, electrical
d) None of these

14) Which factor affects the least while selection of sensor?

a) Size
b) Accuracy
c) Colour
d) Durability

Seat No.	

Set **R**

S.Y. (B.Tech.) (Computer Science & Engineering) (Semester - II) (New) (CBCS) Examination: March/April – 2026
Measurement, Instrumentation and Sensors (OE-02D)

Day & Date: Friday, 22-05-2026 Max. Marks: 56
Time: 03:00 PM To 06:00 PM

Instructions: 1) All questions are compulsory.
2) Figures to the right indicate full marks.
3) Assume suitable data if necessary.
4) Draw neat diagrams whenever necessary.

SECTION – I

Q.2 Attempt the following. (Any Four) **16**

a) Explain the term:
i) Accuracy
ii) Linearity
iii) Reproducibility
iv) Precision

b) Describe different damping methods in details.

c) Difference between Current Transformer and Potential Transformer.

d) Explain with neat diagram, working of ramp type digital voltmeter.

e) Explain Anderson Bridge with phasor diagram. Also derive the equation of dissipation factor.

Q.3 Attempt the following. (Any Two) **12**

a) Draw the equivalent circuit and phasor diagram of a PT. Derive expression for actual transformation ratio.

b) Explain the method of measurement of power using two wattmeter for balanced load. Also derive the equation of power factor.

c) A bridge consists of the following:
Arm ab: - A choke coil having resistance R1 & amp: inductance L1
Arm bc: - A non-inductive resistance R3
Arm cd: - A mica condenser C4 in series with non-inductive resistance R4
Arm da: - A non-inductive resistance R2
When this bridge fed from a source of 500 Hz, balance is obtained under following Conditions. $R2 = 2410\ \Omega$, $R3 = 750\ \Omega$, $C4 = 0.35\ \mu F$, $R4 = 64.5\ \Omega$ The series resistance of capacitor is 0.4Ω. Calculate resistance and Inductance of choke coil. The supply is connected between a & c and detector is between b & d.

SECTION – II

Q.4 Attempt the following. (Any Four) **16**

a) Explain units of measurement.

b) Explain the principle of working of piezo-electric effect sensor.

c) Explain the basic concept of analog to digital converter.

d) Explain the sensor interfacing circuit's data transmission.

e) State the different types of temperature sensor and explain any one of them.

Q.5 Attempt the following. (Any Two) **12**

a) State and explain the different types of batteries for low power sensors.

b) Stale and explain the sensors used for Displacement, and Level application.

c) Explain the concept of humidity and state different types of sensor used to measure humidity.

S.Y. (B.Tech.) (Computer Science & Engineering) (Semester - II) (New) (CBCS) Examination: March/April – 2026
Operation Research (OE-02E)

Day & Date: Friday, 22-05-2026 Max. Marks: 70
Time: 03:00 PM To 06:00 PM

Instructions: 1) Q. No. 1 is compulsory. It should be solved in the first 30 minutes in Answer Book Page no 03 (Starting page of the Answer Book). Each question carries one mark.
2) Don't forget to Mention question paper set (P/Q/R/S) on top on page.
3) Figures to the right indicates full marks.
4) Assume suitable data wherever necessary and mention it clearly.

MCQ/Objective Type Questions

Duration: 30 Minutes Marks:14

Q.1 Choose the correct answers from the given options. 14

1) When total supply = total demand, the transportation problem is called _____.
a) Balanced b) Equated
c) Simple d) Zero

2) Which technique is used to solve Assignment Model?
a) Hungarian Method b) Graphical Method
c) Simplex Method d) Integer Programming

3) Allocated cells in the IBFS are also called as _____.
a) Stone Cells b) Water Cells
c) Air Cells d) None of these

4) To convert Maximization Assignment Model into Minimization, _____.
a) Multiply Whole matrix by (-1)
b) Subtract Entire Matrix from Highest Cell
c) Both a & b
d) None of these

5) Advantage of VAM of transportation is _____.
a) Near to optimal Solution b) Least Cost
c) Faster Solution d) Slower Solution

6) Transportation Models are also called as _____.
a) Probabilistic Model b) Distribution Model
c) Game Theory d) Assignment Model

7) ABC analysis considers _____.
a) Total consumption of items b) Total amount of items
c) Both a) and b) d) None of these

8) At the Break-Even Point _____.
a) Profit > Loss
b) Profit < Loss
c) Profit = Loss
d) None of these

9) The PERT in project management means Program Evaluation and _____ Technique.
a) Resource
b) Reconciliation
c) Reconsideration
d) Review

10) _____ stock is the lower limit of stock below which the stock should not be allowed to fall.
a) Maximum
b) Average
c) Safety
d) Standard

11) Optimization Means _____.
a) Maximization
b) Minimization
c) Minimization or Maximization
d) Mean of Minimization & Maximization

12) A feasible solution to LPP _____.
a) Must satisfy all the constraints simultaneously
b) Need not satisfy all the constraints
c) Must be a corner point of feasible region
d) Must optimize the objective function

13) In a project network, the critical path _____.
a) may be the shortest path
b) is the longest path
c) may be the longest path
d) is the shortest path

14) The inventory carrying costs are also called as _____.
a) Procurement costs
b) Set-up costs
c) Storage costs
d) None of the above

Seat No.	

Set **P**

S.Y. (B.Tech.) (Computer Science & Engineering) (Semester - II) (New) (CBCS) Examination: March/April – 2026
Operation Research (OE-02E)

Day & Date: Friday, 22-05-2026 Max. Marks: 56
Time: 03:00 PM To 06:00 PM

Instructions: 1) Solve any two questions from each Section.
2) Figures to the right indicates full marks.
3) Assume suitable data wherever necessary and mention it clearly.
4) Use of non-programmable calculator is allowed.

SECTION – I

Q.2 Solve both. **14**

a) Using Graphical method, solve
Maximize $Z = 2X_1 + 3X_2$
Subject to, $X_1 + X_2 \leq 30$;
$X_1 - X_2 \geq 0$;
$X_2 \geq 3$;
$0 \leq X_1; \leq 20$;
$0 \leq X_2; \leq 12$;

b) Consider the assignment problem to as shown in table, in this problem 4 supply jobs are to be assigned to four different sub assembly. Solve assignment problem by using Hungarian method.

Sub Assembly	Supply			
	i	ii	iii	iv
1	15	13	14	17
2	11	12	15	13
3	13	12	10	11
4	15	17	14	16

Q.3 Solve both. **14**

a) Find the initial basic feasible solution by NWCM.

	Destination				
	D_1	D_2	D_3	D_4	↓ Supply
S_1	5	3	6	4	30
S_2	3	4	7	8	15
S_3	9	6	5	8	15
Demand →	10	25	18	7	

b) Write in brief on application & advantages of Operational Research.

Q.4 Solve both. **14**

a) What is LPP? What are different components of LPP?

b) How assignment model is useful in practical life? Explain with its steps to solve it.

SECTION – II

Q.5 Solve both. **14**

a) Calculate the value of Economic Order Quantity, Reordering Period, No. of orders per year with the following Data, Annual Usages = 50 Units, Procurement Cost = 15 Rs. Per Order, Unit Cost = 100 Rs. /Item, Inventory Caring Cost = 10% of the unit cost.

b) Define 'Inventory Control' and explain its necessity in the construction industry. Detailed the various types of Inventory Costs involved in maintaining inventory on a site.

Q.6 Solve both. **14**

a) Draw network, find out CP & PD. Calculate All floats of each non-critical Activity.

Activity	$1-2$	$2-3$	$2-4$	$3-4$	$3-5$	$4-6$	$5-6$
Time (Days)	14	13	16	15	18	23	15

b) A small project consists of seven activities. The time estimates in weeks of different activities are given below. Find out probability of completing the project in 18 weeks.

Activity	Estimated Time		
	to	tm	tp
$1-2$	1	1	7
$1-3$	1	4	7
$1-4$	2	2	8
$2-5$	1	1	1
$3-5$	2	5	14
$4-6$	2	5	8
$5-6$	3	6	15

Probability Factor	Probability
0	50%
1	84.13 %
2	97.72 %
3	99.87 %

Q.7 Solve both. **14**

a) Write short notes on:

i) Processing N jobs on one machine (SPT and WSPT rules)

ii) No passing rule in sequencing

b) Explain Sequencing Problem Technique. What are its Different Elements, also elaborate its assumptions?

Seat No.	

Set **Q**

a) Balanced b) Equated
c) Simple d) Zero

6) Which technique is used to solve Assignment Model?
a) Hungarian Method b) Graphical Method
c) Simplex Method d) Integer Programming

7) Allocated cells in the IBFS are also called as _____.
a) Stone Cells b) Water Cells
c) Air Cells d) None of these

8) To convert Maximization Assignment Model into Minimization, _____.
a) Multiply Whole matrix by (-1)
b) Subtract Entire Matrix from Highest Cell
c) Both a & b
d) None of these

9) Advantage of VAM of transportation is _____.
a) Near to optimal Solution b) Least Cost
c) Faster Solution d) Slower Solution

10) Transportation Models are also called as _____.
a) Probabilistic Model b) Distribution Model
c) Game Theory d) Assignment Model

11) ABC analysis considers _____.
a) Total consumption of items b) Total amount of items
c) Both a) and b) d) None of these

12) At the Break-Even Point _____.
a) Profit $>$ Loss b) Profit $<$ Loss
c) Profit $=$ Loss d) None of these

13) The PERT in project management means Program Evaluation and _____ Technique.
a) Resource b) Reconciliation
c) Reconsideration d) Review

14) _____ stock is the lower limit of stock below which the stock should not be allowed to fall.
a) Maximum b) Average
c) Safety d) Standard

Seat No.	

Set **R**

S.Y. (B.Tech.) (Computer Science & Engineering) (Semester - II) (New) (CBCS) Examination: March/April – 2026
Operation Research (OE-02E)

Day & Date: Friday, 22-05-2026 Max. Marks: 56
Time: 03:00 PM To 06:00 PM

Instructions: 1) Solve any two questions from each Section.
2) Figures to the right indicates full marks.
3) Assume suitable data wherever necessary and mention it clearly.
4) Use of non-programmable calculator is allowed.

SECTION – I

Q.2 Solve both. **14**

a) Using Graphical method, solve
Maximize $Z = 2X_1 + 3X_2$
Subject to, $X_1 + X_2 \leq 30$;
$X_1 - X_2 \geq 0$;
$X_2 \geq 3$;
$0 \leq X_1; \leq 20$;
$0 \leq X_2; \leq 12$;

b) Consider the assignment problem to as shown in table, in this problem 4 supply jobs are to be assigned to four different sub assembly. Solve assignment problem by using Hungarian method.

Sub Assembly	Supply			
	i	ii	iii	iv
1	15	13	14	17
2	11	12	15	13
3	13	12	10	11
4	15	17	14	16

Q.3 Solve both. **14**

a) Find the initial basic feasible solution by NWCM.

	Destination				
	D_1	D_2	D_3	D_4	↓ Supply
S_1	5	3	6	4	30
S_2	3	4	7	8	15
S_3	9	6	5	8	15
Demand →	10	25	18	7	

b) Write in brief on application & advantages of Operational Research.

Q.4 Solve both. **14**

a) What is LPP? What are different components of LPP?

b) How assignment model is useful in practical life? Explain with its steps to solve it.

SECTION – II

Q.5 Solve both. **14**

a) Calculate the value of Economic Order Quantity, Reordering Period, No. of orders per year with the following Data, Annual Usages = 50 Units, Procurement Cost = 15 Rs. Per Order, Unit Cost = 100 Rs. /Item, Inventory Caring Cost = 10% of the unit cost.

b) Define 'Inventory Control' and explain its necessity in the construction industry. Detailed the various types of Inventory Costs involved in maintaining inventory on a site.

Q.6 Solve both. **14**

a) Draw network, find out CP & PD. Calculate All floats of each non-critical Activity.

Activity	$1-2$	$2-3$	$2-4$	$3-4$	$3-5$	$4-6$	$5-6$
Time (Days)	14	13	16	15	18	23	15

b) A small project consists of seven activities. The time estimates in weeks of different activities are given below. Find out probability of completing the project in 18 weeks.

Activity	Estimated Time		
	to	tm	tp
$1-2$	1	1	7
$1-3$	1	4	7
$1-4$	2	2	8
$2-5$	1	1	1
$3-5$	2	5	14
$4-6$	2	5	8
$5-6$	3	6	15

Probability Factor	Probability
0	50%
1	84.13 %
2	97.72 %
3	99.87 %

Q.7 Solve both. **14**

a) Write short notes on:

i) Processing N jobs on one machine (SPT and WSPT rules)

ii) No passing rule in sequencing

b) Explain Sequencing Problem Technique. What are its Different Elements, also elaborate its assumptions?

Seat No.	

Set **S**

S.Y. (B.Tech.) (Computer Science & Engineering) (Semester - II) (New) (CBCS) Examination: March/April – 2026
Operation Research (OE-02E)

Day & Date: Friday, 22-05-2026 Max. Marks: 70
Time: 03:00 PM To 06:00 PM

Instructions: 1) Q. No. 1 is compulsory. It should be solved in the first 30 minutes in Answer Book Page no 03 (Starting page of the Answer Book). Each question carries one mark.
2) Don't forget to Mention question paper set (P/Q/R/S) on top on page.
3) Figures to the right indicates full marks.
4) Assume suitable data wherever necessary and mention it clearly.

MCQ/Objective Type Questions

Duration: 30 Minutes Marks:14

Q.1 Choose the correct answers from the given options. 14

1) Transportation Models are also called as _____.
a) Probabilistic Model b) Distribution Model
c) Game Theory d) Assignment Model

2) ABC analysis considers _____.
a) Total consumption of items b) Total amount of items
c) Both a) and b) d) None of these

3) At the Break-Even Point _____.
a) Profit > Loss b) Profit < Loss
c) Profit = Loss d) None of these

4) The PERT in project management means Program Evaluation and _____ Technique.
a) Resource b) Reconciliation
c) Reconsideration d) Review

5) _____ stock is the lower limit of stock below which the stock should not be allowed to fall.
a) Maximum b) Average
c) Safety d) Standard

6) Optimization Means _____.
a) Maximization
b) Minimization
c) Minimization or Maximization
d) Mean of Minimization & Maximization

7) A feasible solution to LPP _____.
a) Must satisfy all the constraints simultaneously
b) Need not satisfy all the constraints
c) Must be a corner point of feasible region
d) Must optimize the objective function

8) In a project network, the critical path _____.
a) may be the shortest path
b) is the longest path
c) may be the longest path
d) is the shortest path

9) The inventory carrying costs are also called as _____.
a) Procurement costs
b) Set-up costs
c) Storage costs
d) None of the above

10) When total supply = total demand, the transportation problem is called _____.
a) Balanced
b) Equated
c) Simple
d) Zero

11) Which technique is used to solve Assignment Model?
a) Hungarian Method
b) Graphical Method
c) Simplex Method
d) Integer Programming

12) Allocated cells in the IBFS are also called as _____.
a) Stone Cells
b) Water Cells
c) Air Cells
d) None of these

13) To convert Maximization Assignment Model into Minimization, _____.
a) Multiply Whole matrix by (-1)
b) Subtract Entire Matrix from Highest Cell
c) Both a & b
d) None of these

14) Advantage of VAM of transportation is _____.
a) Near to optimal Solution
b) Least Cost
c) Faster Solution
d) Slower Solution

S.Y. (B.Tech.) (Computer Science & Engineering) (Semester - II) (New) (CBCS) Examination: March/April – 2026
Computational Mathematics (OE-02F)

Day & Date: Friday, 22-05-2026 Max. Marks: 70
Time: 03:00 PM To 06:00 PM

Instructions: 1) Q. No. 1 is compulsory. It should be solved in the first 30 minutes in Answer Book Page no 03 (Starting page of the Answer Book). Each question carries one mark.
2) Don't forget to Mention question paper set (P/Q/R/S) on top of page.
3) Figures to the right indicates full marks.
4) Assume suitable data where necessary.

MCQ/Objective Type Questions

Duration: 30 Minutes Marks:14

Q.1 Choose the correct alternative from the options. **14**

1) A transcendental equation is an equation that involves _____.
a) Only algebraic terms
b) Only transcendental functions
c) Both algebraic and transcendental functions
d) Linear terms only

2) The interval in which a real root of the equation $x^3 - 2x - 5 = 0$ lies is _____.
a) $(1, 2)$ b) $(0, 1)$
c) $(2, 3)$ d) $(3, 4)$

3) The Gauss-Seidel method is used for solving _____.
a) Nonlinear equations b) Systems of linear equations
c) Ordinary differential equations d) Partial differential equations

4) Which of the following is a disadvantage of the Gauss-Jacobi method?
a) It converges faster than most direct methods
b) It requires a large number of iterations for a good approximation
c) It cannot be used for systems with more than two equations
d) It works only for symmetric systems

5) The use of Romberg's method is _____.
a) To solve simultaneous linear equation
b) To find root of linear equation
c) To evaluate definite integration
d) To find the Eigen values

6) The order of convergence of Newton-Raphson method is _____.
a) 1 b) 2
c) $\sqrt{2}$ d) 1.6

7) Power Method is used to find _____.
a) Negative Eigen Value b) Largest Eigen value
c) Positive Eigen Value d) None of these

8) To find the numerically largest Eigen value using iterative method we use the equation _____.
a) $A = \lambda X$ b) $AX = X$
c) $X = \lambda X$ d) $AX = \lambda X$

9) If $dy/dx = x - y$ and $y(0) = 1$, then by Picard's method the value of $y_1(1)$ is _____.
a) 0.905 b) 1.905
c) 2.905 d) None

10) Runge-Kutta method is self-starting method _____.
a) True b) False
c) We can't say d) None

11) The Newton's forward interpolation formula is generally preferred when data points are _____.
a) Unequally spaced
b) Equally spaced and near the beginning
c) Equally spaced and near the end
d) Randomly spaced

12) In the power method, the vector is normalized in each iteration mainly to _____.
a) increase the determinant
b) prevent values from becoming too large
c) eliminate eigen values
d) make the matrix symmetric

13) Simpson's $3/8$ rule requires the number of sub-intervals to be _____.
a) multiple of 2 b) multiple of 3
c) multiple of 4 d) odd only

14) Picard's method is mainly used to solve _____.
a) linear programming problems b) differential equations
c) eigen value problems d) interpolation problems

Seat No.	

Set **P**

S.Y. (B.Tech.) (Computer Science & Engineering) (Semester - II) (New) (CBCS) Examination: March/April – 2026
Computational Mathematics (OE-02F)

Day & Date: Friday, 22-05-2026 Max. Marks: 56
Time: 03:00 PM To 06:00 PM

Instructions: 1) All questions are compulsory.
2) Figures to the right indicate full marks.
3) Assume suitable data where necessary.

SECTION – I

Q.2 Attempt Any Five: **25**

a) Find the double root of the equation $x^3 - 5.4x^2 + 9.24x - 5.096 = 0$ given that it is nearer to 1.5.

b) Solve the system of equations by Jacobi's iterative method (perform 3 iterations):
$27x + 6y - z = 85,$
$6x + 15y + 2z = 72,$
$x + y + 54z = 110$

c) Find positive real root of the equation $x\sin(x) + \cos(x) = 0$ using Newton-Raphson method correct to 3 decimal places.

d) Solve the system of equations by using Gauss-Elimination method:
$2x + y + z = 7,$
$x + 2y + 3z = 14,$
$3x + 4y + z = 14.$

e) Solve the following system of equations using LU Decomposition method:
$2x + 3y + z = 9$
$x + 2y + 3z = 6$
$3x + y + 2z = 8$

f) Solve $\frac{dy}{dx} = x + y$ with $x_0 = 0, y_0 = 1$ using fourth-order Runge-Kutta method and find approximate value of y when $x = 0.2$

g) Solve $\frac{dy}{dx} = 1 + xy$ with $y(0) = 1$ using Picard's method take first approximation and find y for $x = 0.1$

Q.3 Attempt Any One. **03**

a) Solve the system by Gauss-Seidel method (Perform 4 iterations):

$10x + y + z = 12$

$2x + 10y + z = 13$

$2x + 2y + 10z = 14$

b) Use Newton-Raphson method to find a root of the equation $x^4 - x - 10 = 0$ which is near to $x = 2$. Perform 3 iterations correct to three decimal places.

SECTION – II

Q.4 Attempt Any Five. **25**

a) Approximate $\int_1^3 \frac{1}{x} dx$ using the composite trapezoidal rule with $n = 4$ sub-intervals. List the function values at the nodes, show the application of the formula, and give the final answer correct to 4 decimal places

b) Using Jacobi's method, find all eigenvalues and eigenvectors of the symmetric matrix:

$$A = \begin{bmatrix} 6 & 2 & 1 \\ 2 & 5 & 2 \\ 1 & 2 & 4 \end{bmatrix}$$

c) Evaluate the integral $\int_{-1}^{1} \frac{dx}{1+x^2}$ using Gaussian 3-point Quadrature formula.

d) Find the dominant eigenvalue and the corresponding eigenvector of the matrix

$A = \begin{bmatrix} 4 & 1 & 1 \\ 1 & 3 & 1 \\ 1 & 1 & 2 \end{bmatrix}$ using the Power Method.

Perform 5 iterations taking initial vector as $[1,0,0]^T$

e) Given the Values:

x	2	4	6	8
$f(x)$	5	17	37	65

Evaluate $f(5)$, using Lagrange's Formula.

f) Using Newton's Backward formula, find the value of $f(2)$ if:

x	1.0	1.5	2.0	2.5
$f(x)$	2.71	3.38	4.00	4.58

g) Determine the polynomial $f(x)$ using Newton's Divided Difference formula for the data: Also find $f(3)$.

x	0	1	2	3	5
$f(x)$	1	14	15	5	6

Q.5 Attempt Any One. **03**

a) Find all Eigen values and Eigen vectors of the following matrix by using Gauss Jacobi's Method. $\begin{bmatrix} 1 & 2 \\ 3 & 4 \end{bmatrix}$

b) Construct Newton's Forward interpolation polynomial for the following data:

x	4	6	8	10
$f(x)$	1	3	8	16

Seat No.	

Set **Q**

S.Y. (B.Tech.) (Computer Science & Engineering) (Semester - II) (New) (CBCS) Examination: March/April – 2026
Computational Mathematics (OE-02F)

Day & Date: Friday, 22-05-2026 Max. Marks: 70
Time: 03:00 PM To 06:00 PM

Instructions: 1) Q. No. 1 is compulsory. It should be solved in the first 30 minutes in Answer Book Page no 03 (Starting page of the Answer Book). Each question carries one mark.
2) Don't forget to Mention question paper set (P/Q/R/S) on top of page.
3) Figures to the right indicates full marks.
4) Assume suitable data where necessary.

MCQ/Objective Type Questions

Duration: 30 Minutes Marks:14

Q.1 Choose the correct alternative from the options. **14**

1) To find the numerically largest Eigen value using iterative method we use the equation _____.
a) $A = \lambda X$ b) $AX = X$
c) $X = \lambda X$ d) $AX = \lambda X$

2) If $dy/dx = x - y$ and $y(0) = 1$, then by Picard's method the value of $y_1(1)$ is _____.
a) 0.905 b) 1.905
c) 2.905 d) None

3) Runge-Kutta method is self-starting method _____.
a) True b) False
c) We can't say d) None

4) The Newton's forward interpolation formula is generally preferred when data points are _____.
a) Unequally spaced
b) Equally spaced and near the beginning
c) Equally spaced and near the end
d) Randomly spaced

5) In the power method, the vector is normalized in each iteration mainly to _____.
a) increase the determinant
b) prevent values from becoming too large
c) eliminate eigen values
d) make the matrix symmetric

6) Simpson's $3/8$ rule requires the number of sub-intervals to be _____.
a) multiple of 2 b) multiple of 3
c) multiple of 4 d) odd only

7) Picard's method is mainly used to solve _____.
a) linear programming problems b) differential equations
c) eigen value problems d) interpolation problems

8) A transcendental equation is an equation that involves _____.
a) Only algebraic terms
b) Only transcendental functions
c) Both algebraic and transcendental functions
d) Linear terms only

9) The interval in which a real root of the equation $x^3 - 2x - 5 = 0$ lies is _____.
a) $(1, 2)$ b) $(0, 1)$
c) $(2, 3)$ d) $(3, 4)$

10) The Gauss-Seidel method is used for solving _____.
a) Nonlinear equations b) Systems of linear equations
c) Ordinary differential equations d) Partial differential equations

11) Which of the following is a disadvantage of the Gauss-Jacobi method?
a) It converges faster than most direct methods
b) It requires a large number of iterations for a good approximation
c) It cannot be used for systems with more than two equations
d) It works only for symmetric systems

12) The use of Romberg's method is _____.
a) To solve simultaneous linear equation
b) To find root of linear equation
c) To evaluate definite integration
d) To find the Eigen values

13) The order of convergence of Newton-Raphson method is _____.
a) 1 b) 2
c) $\sqrt{2}$ d) 1.6

14) Power Method is used to find _____.
a) Negative Eigen Value b) Largest Eigen value
c) Positive Eigen Value d) None of these

Q.2 Attempt Any Five: **25**

a) Find the double root of the equation $x^3 - 5.4x^2 + 9.24x - 5.096 = 0$ given that it is nearer to 1.5.

b) Solve the system of equations by Jacobi's iterative method (perform 3 iterations):
$27x + 6y - z = 85,$
$6x + 15y + 2z = 72,$
$x + y + 54z = 110$

c) Find positive real root of the equation $x\sin(x) + \cos(x) = 0$ using Newton-Raphson method correct to 3 decimal places.

d) Solve the system of equations by using Gauss-Elimination method:
$2x + y + z = 7,$
$x + 2y + 3z = 14,$
$3x + 4y + z = 14.$

e) Solve the following system of equations using LU Decomposition method:
$2x + 3y + z = 9$
$x + 2y + 3z = 6$
$3x + y + 2z = 8$

f) Solve $\frac{dy}{dx} = x + y$ with $x_0 = 0, y_0 = 1$ using fourth-order Runge-Kutta method and find approximate value of y when $x = 0.2$

g) Solve $\frac{dy}{dx} = 1 + xy$ with $y(0) = 1$ using Picard's method take first approximation and find y for $x = 0.1$

Q.3 Attempt Any One. **03**

a) Solve the system by Gauss-Seidel method (Perform 4 iterations):

$10x + y + z = 12$

$2x + 10y + z = 13$

$2x + 2y + 10z = 14$

b) Use Newton-Raphson method to find a root of the equation $x^4 - x - 10 = 0$ which is near to $x = 2$. Perform 3 iterations correct to three decimal places.

SECTION – II

Q.4 Attempt Any Five. **25**

a) Approximate $\int_1^3 \frac{1}{x} dx$ using the composite trapezoidal rule with $n = 4$ sub-intervals. List the function values at the nodes, show the application of the formula, and give the final answer correct to 4 decimal places

b) Using Jacobi's method, find all eigenvalues and eigenvectors of the symmetric matrix:

$$A = \begin{bmatrix} 6 & 2 & 1 \\ 2 & 5 & 2 \\ 1 & 2 & 4 \end{bmatrix}$$

c) Evaluate the integral $\int_{-1}^{1} \frac{dx}{1+x^2}$ using Gaussian 3-point Quadrature formula.

d) Find the dominant eigenvalue and the corresponding eigenvector of the matrix

$A = \begin{bmatrix} 4 & 1 & 1 \\ 1 & 3 & 1 \\ 1 & 1 & 2 \end{bmatrix}$ using the Power Method.

Perform 5 iterations taking initial vector as $[1,0,0]^T$

e) Given the Values:

x	2	4	6	8
$f(x)$	5	17	37	65

Evaluate $f(5)$, using Lagrange's Formula.

f) Using Newton's Backward formula, find the value of $f(2)$ if:

x	1.0	1.5	2.0	2.5
$f(x)$	2.71	3.38	4.00	4.58

g) Determine the polynomial $f(x)$ using Newton's Divided Difference formula for the data: Also find $f(3)$.

x	0	1	2	3	5
$f(x)$	1	14	15	5	6

Q.5 Attempt Any One. **03**

a) Find all Eigen values and Eigen vectors of the following matrix by using Gauss Jacobi's Method. $\begin{bmatrix} 1 & 2 \\ 3 & 4 \end{bmatrix}$

b) Construct Newton's Forward interpolation polynomial for the following data:

x	4	6	8	10
$f(x)$	1	3	8	16

Seat No.

c) eliminate eigen values
d) make the matrix symmetric

3) Simpson's $3/8$ rule requires the number of sub-intervals to be _____.
a) multiple of 2 b) multiple of 3
c) multiple of 4 d) odd only

4) Picard's method is mainly used to solve _____.
a) linear programming problems b) differential equations
c) eigen value problems d) interpolation problems

5) A transcendental equation is an equation that involves _____.
a) Only algebraic terms
b) Only transcendental functions
c) Both algebraic and transcendental functions
d) Linear terms only

6) The interval in which a real root of the equation $x^3 - 2x - 5 = 0$ lies is _____.

a) $(1, 2)$ b) $(0, 1)$
c) $(2, 3)$ d) $(3, 4)$

7) The Gauss-Seidel method is used for solving _____.

a) Nonlinear equations b) Systems of linear equations
c) Ordinary differential equations d) Partial differential equations

8) Which of the following is a disadvantage of the Gauss-Jacobi method?

a) It converges faster than most direct methods
b) It requires a large number of iterations for a good approximation
c) It cannot be used for systems with more than two equations
d) It works only for symmetric systems

9) The use of Romberg's method is _____.

a) To solve simultaneous linear equation
b) To find root of linear equation
c) To evaluate definite integration
d) To find the Eigen values

10) The order of convergence of Newton-Raphson method is _____.

a) 1 b) 2
c) $\sqrt{2}$ d) 1.6

11) Power Method is used to find _____.

a) Negative Eigen Value b) Largest Eigen value
c) Positive Eigen Value d) None of these

12) To find the numerically largest Eigen value using iterative method we use the equation _____.

a) $A = \lambda X$ b) $AX = X$
c) $X = \lambda X$ d) $AX = \lambda X$

13) If $dy/dx = x - y$ and $y(0) = 1$, then by Picard's method the value of $y_1(1)$ is _____.

a) 0.905 b) 1.905
c) 2.905 d) None

14) Runge-Kutta method is self-starting method _____.

a) True b) False
c) We can't say d) None

Seat No.	

Set **R**

S.Y. (B.Tech.) (Computer Science & Engineering) (Semester - II) (New) (CBCS) Examination: March/April – 2026
Computational Mathematics (OE-02F)

Day & Date: Friday, 22-05-2026 Max. Marks: 56
Time: 03:00 PM To 06:00 PM

Instructions: 1) All questions are compulsory.
2) Figures to the right indicate full marks.
3) Assume suitable data where necessary.

SECTION – I

Q.2 Attempt Any Five: **25**

a) Find the double root of the equation $x^3 - 5.4x^2 + 9.24x - 5.096 = 0$ given that it is nearer to 1.5.

b) Solve the system of equations by Jacobi's iterative method (perform 3 iterations):
$27x + 6y - z = 85,$
$6x + 15y + 2z = 72,$
$x + y + 54z = 110$

c) Find positive real root of the equation $x\sin(x) + \cos(x) = 0$ using Newton-Raphson method correct to 3 decimal places.

d) Solve the system of equations by using Gauss-Elimination method:
$2x + y + z = 7,$
$x + 2y + 3z = 14,$
$3x + 4y + z = 14.$

e) Solve the following system of equations using LU Decomposition method:
$2x + 3y + z = 9$
$x + 2y + 3z = 6$
$3x + y + 2z = 8$

f) Solve $\frac{dy}{dx} = x + y$ with $x_0 = 0, y_0 = 1$ using fourth-order Runge-Kutta method and find approximate value of y when $x = 0.2$

g) Solve $\frac{dy}{dx} = 1 + xy$ with $y(0) = 1$ using Picard's method take first approximation and find y for $x = 0.1$

Q.3 Attempt Any One. **03**

a) Solve the system by Gauss-Seidel method (Perform 4 iterations):

$10x + y + z = 12$

$2x + 10y + z = 13$

$2x + 2y + 10z = 14$

b) Use Newton-Raphson method to find a root of the equation $x^4 - x - 10 = 0$ which is near to $x = 2$. Perform 3 iterations correct to three decimal places.

SECTION – II

Q.4 Attempt Any Five. **25**

a) Approximate $\int_1^3 \frac{1}{x} dx$ using the composite trapezoidal rule with $n = 4$ sub-intervals. List the function values at the nodes, show the application of the formula, and give the final answer correct to 4 decimal places

b) Using Jacobi's method, find all eigenvalues and eigenvectors of the symmetric matrix:

$$A = \begin{bmatrix} 6 & 2 & 1 \\ 2 & 5 & 2 \\ 1 & 2 & 4 \end{bmatrix}$$

c) Evaluate the integral $\int_{-1}^{1} \frac{dx}{1+x^2}$ using Gaussian 3-point Quadrature formula.

d) Find the dominant eigenvalue and the corresponding eigenvector of the matrix

$A = \begin{bmatrix} 4 & 1 & 1 \\ 1 & 3 & 1 \\ 1 & 1 & 2 \end{bmatrix}$ using the Power Method.

Perform 5 iterations taking initial vector as $[1,0,0]^T$

e) Given the Values:

x	2	4	6	8
$f(x)$	5	17	37	65

Evaluate $f(5)$, using Lagrange's Formula.

f) Using Newton's Backward formula, find the value of $f(2)$ if:

x	1.0	1.5	2.0	2.5
$f(x)$	2.71	3.38	4.00	4.58

g) Determine the polynomial $f(x)$ using Newton's Divided Difference formula for the data: Also find $f(3)$.

x	0	1	2	3	5
$f(x)$	1	14	15	5	6

Q.5 Attempt Any One. **03**

a) Find all Eigen values and Eigen vectors of the following matrix by using Gauss Jacobi's Method. $\begin{bmatrix} 1 & 2 \\ 3 & 4 \end{bmatrix}$

b) Construct Newton's Forward interpolation polynomial for the following data:

x	4	6	8	10
$f(x)$	1	3	8	16

S.Y. (B.Tech.) (Computer Science & Engineering) (Semester - II) (New) (CBCS) Examination: March/April – 2026
Computational Mathematics (OE-02F)

Day & Date: Friday, 22-05-2026 Max. Marks: 70
Time: 03:00 PM To 06:00 PM

Instructions: 1) Q. No. 1 is compulsory. It should be solved in the first 30 minutes in Answer Book Page no 03 (Starting page of the Answer Book). Each question carries one mark.
2) Don't forget to Mention question paper set (P/Q/R/S) on top of page.
3) Figures to the right indicates full marks.
4) Assume suitable data where necessary.

MCQ/Objective Type Questions

Duration: 30 Minutes Marks:14

Q.1 Choose the correct alternative from the options. **14**

1) The order of convergence of Newton-Raphson method is _____.
a) 1 b) 2
c) $\sqrt{2}$ d) 1.6

2) Power Method is used to find _____.
a) Negative Eigen Value b) Largest Eigen value
c) Positive Eigen Value d) None of these

3) To find the numerically largest Eigen value using iterative method we use the equation _____.
a) $A = \lambda X$ b) $AX = X$
c) $X = \lambda X$ d) $AX = \lambda X$

4) If $dy/dx = x - y$ and $y(0) = 1$, then by Picard's method the value of $y_1(1)$ is _____.
a) 0.905 b) 1.905
c) 2.905 d) None

5) Runge-Kutta method is self-starting method _____.
a) True b) False
c) We can't say d) None

6) The Newton's forward interpolation formula is generally preferred when data points are _____.
a) Unequally spaced
b) Equally spaced and near the beginning
c) Equally spaced and near the end
d) Randomly spaced

7) In the power method, the vector is normalized in each iteration mainly to _____.
   a) increase the determinant
   b) prevent values from becoming too large
   c) eliminate eigen values
   d) make the matrix symmetric

8) Simpson's $3/8$ rule requires the number of sub-intervals to be _____.
   a) multiple of 2
   b) multiple of 3
   c) multiple of 4
   d) odd only

9) Picard's method is mainly used to solve _____.
   a) linear programming problems
   b) differential equations
   c) eigen value problems
   d) interpolation problems

10) A transcendental equation is an equation that involves _____.
   a) Only algebraic terms
   b) Only transcendental functions
   c) Both algebraic and transcendental functions
   d) Linear terms only

11) The interval in which a real root of the equation $x^3 - 2x - 5 = 0$ lies is _____.
   a) $(1, 2)$
   b) $(0, 1)$
   c) $(2, 3)$
   d) $(3, 4)$

12) The Gauss-Seidel method is used for solving _____.
   a) Nonlinear equations
   b) Systems of linear equations
   c) Ordinary differential equations
   d) Partial differential equations

13) Which of the following is a disadvantage of the Gauss-Jacobi method?
   a) It converges faster than most direct methods
   b) It requires a large number of iterations for a good approximation
   c) It cannot be used for systems with more than two equations
   d) It works only for symmetric systems

14) The use of Romberg's method is _____.
   a) To solve simultaneous linear equation
   b) To find root of linear equation
   c) To evaluate definite integration
   d) To find the Eigen values
