$f(x)$	5	17	37	65

Evaluate $f(5)$, using Lagrange's Formula.

f) Using Newton's Backward formula, find the value of $f(2)$ if:

x	1.0	1.5	2.0	2.5
$f(x)$	2.71	3.38	4.00	4.58

g) Determine the polynomial $f(x)$ using Newton's Divided Difference formula for the data: Also find $f(3)$.

x	0	1	2	3	5
$f(x)$	1	14	15	5	6

Q.5 Attempt Any One. **03**

a) Find all Eigen values and Eigen vectors of the following matrix by using Gauss Jacobi's Method. $\begin{bmatrix} 1 & 2 \\ 3 & 4 \end{bmatrix}$

b) Construct Newton's Forward interpolation polynomial for the following data:

x	4	6	8	10
$f(x)$	1	3	8	16

Set P

S.Y. (B.Tech.) (Computer Science & Engineering) (Semester - II) (New) (CBCS) Examination: March/April – 2026
Professional Business Communication (OE-02G)

Day & Date: Friday, 22-05-2026 Max. Marks: 70
Time: 03:00 PM To 06:00 PM

Instructions: 1) Q. No. 1 is compulsory. It should be solved in the first 30 minutes in Answer Book Page no 03 (Starting page of the Answer Book). Each question carries one mark.
2) Don't forget to Mention question paper set (P/Q/R/S) on top of page.
3) Figures to the right indicates full marks.
4) Assume suitable data wherever needed and mention it clearly.

MCQ/Objective Type Questions

Duration: 30 Minutes Marks:14

Q.1 Choose the correct alternative from the option. 14

1) In the basic process of communication, the sender converts ideas into symbols; this step is called_____.
a) Decoding b) Encoding
c) Feedback d) Channeling

2) A message sent without words using facial expressions or gestures is called _____.
a) Written communication b) Verbal communication
c) Non-verbal communication d) Grapevine communication

3) Which channel characteristic most reduces chances of immediate feedback?
a) Face-to-face conversation b) Telephone call
c) Email d) Video conference

4) A major barrier to effective communication that arises from personal beliefs or selective attention is called _____.
a) Noise b) Semantic barrier
c) Perceptual barrier d) Channel barrier

5) Body language, eye contact and posture are examples of ____.
a) Verbal codes b) Non-verbal codes
c) Written codes d) Graphic communication

6) Upward communication flows from _____.
a) Top management to workers
b) Peers to peers
c) Workers to management
d) External stakeholders to company

7) An advantage of face-to-face communication over written communication is _____.
a) Permanent record
b) Easier legal reference
c) Immediate feedback
d) More formal tone

8) Which element is essential for an effective welcome speech?
a) Detailed technical data
b) Acknowledgement of guests
c) Long biographical note
d) Complex statistics

9) The main purpose of a vote of thanks at an event is to _____.
a) Introduce the keynote speaker
b) Summarize research findings
c) Express gratitude to contributors and audience
d) Present the event budget

10) Which is a best practice when delivering a professional presentation?
a) Reading every slide verbatim
b) Using too many small fonts
c) Maintaining eye contact and varying tone
d) Using no structure or flow

11) When a buyer is dissatisfied with delivered goods and asks for correction or refund, they should send a _____.
a) Enquiry letter
b) Complaint letter
c) Order letter
d) Quotation letter

12) A purchase order is principally used to _____.
a) Complain about defects
b) Request a quotation
c) Place an order for goods or services
d) Acknowledge receipt of payment

13) Which part of a business letter contains the main message or details the writer wants to communicate?
a) Heading
b) Salutation
c) Body
d) Signature block

14) Which report type is typically written to describe a workplace accident and recommend corrective actions?
a) Progress report
b) Accident report
c) Sales report
d) Quotation report

Time: 03:00 PM To 06:00 PM

Instructions: 1) All questions are compulsory.
2) Figures to the right indicate full marks.
3) Assume suitable data wherever needed and mention it clearly.

SECTION – I

Q.2 Solve following. (Any Two) **14**

a) Define communication and explain its meaning in professional life.

b) Explain the elements of communication with a neat diagram.

c) Describe the process of communication in detail.

Q.3 Solve following. (Any Two) **14**

a) Explain verbal and non-verbal communication with suitable examples.

b) Describe body language and its importance in communication.

c) Explain formal and informal communication in an organization.

SECTION – II

Q.4 Solve following. (Any Two) **14**

a) Explain the concept and importance of professional presentations.

b) Describe the steps involved in preparing and delivering a presentation.

c) Explain the Four P's of professional presentations.

Q.5 Solve following. (Any Two) **14**

a) Explain the style and structure of a business letter.

b) Write a detailed note on enquiry letters and quotation letters.

c) Explain purchase order, work order, and complaint letter.

MCQ/Objective Type Questions

Duration: 30 Minutes Marks:14

Q.1 Choose the correct alternatives from the given options. 14

1) A function that measures how good a state or action is, in terms of expected future rewards, is referred to as _____.
a) Policy b) Value Function
c) Agent d) Environment

2) The signal received from the environment to indicate the immediate outcome of an action is known as _____.
a) Reward b) Policy
c) State d) Exploration

3) In reinforcement learning, the component that interacts with the environment by taking actions is called _____.
a) Reward b) Policy
c) Agent d) Value Function

4) In a k-armed bandit problem, the number k represents _____.
a) Number of states b) Number of possible actions
c) Number of agents d) Number of rewards

5) The objective of the k-armed bandit problem is to: _____.
a) Minimize regret
b) Maximize total expected reward over time
c) Minimize variance of rewards
d) Always exploit the best-known action

6) The exploration-exploitation dilemma refers to _____.
   a) Choosing between immediate and delayed rewards
   b) Choosing between exploring new actions and exploiting known good ones
   c) Choosing between deterministic and stochastic rewards
   d) Choosing between different agents

7) The discount factor $\gamma (0 \leq \gamma \leq 1)$ determines _____.
   a) The probability of exploration
   b) The relative importance of future rewards
   c) The learning rate of updates
   d) The optimality of value functions

8) The optimal value function gives _____.
   a) The maximum expected return achievable from each state
   b) The reward of the first action
   c) The average of all possible actions
   d) The probability of ending an episode

9) Optimality in reinforcement learning implies _____.
   a) Following a deterministic policy only
   b) Achieving the highest possible expected return
   c) Choosing actions randomly until convergence
   d) Minimizing the number of episodes

10) Policy iteration consists of _____.
   a) Only repeating policy evaluation until convergence
   b) Randomized value updates
   c) Using Monte Carlo simulations
   d) Alternating between policy evaluation and policy improvement

11) SARSA is an example of _____.
   a) Off-policy control
   b) On-policy TD control
   c) Model-based method
   d) Value iteration

12) Q-learning updates are based on _____.
   a) Action taken under the current policy
   b) Maximum action-value of the next state
   c) Only observed rewards
   d) Averaging all past returns

13) In reinforcement learning, a model is used for _____.
   a) Storing policies only
   b) Computing learning rates
   c) Predicting next states and rewards
   d) Updating action-values directly

14) The Dyna architecture integrates _____.

a) Planning, acting, and learning
b) Exploration and exploitation only
c) Policy, iteration and value iteration
d) On-policy and off-policy control

Section – I

Q.2 Attempt Any Four. **16**

a) Define Reinforcement Learning and give one real-world example.

b) Explain the K-armed bandit problem with an example.

c) Define rewards in RL and their role in achieving goals.

d) Describe unified notation for RL tasks.

e) Distinguish Reinforcement Learning from supervised and unsupervised learning.

Q.3 Attempt Any One. **06**

a) Differentiate state-value and action-value functions.

b) Describe how the 10-armed test-bed simulates the exploration-exploitation problem.

Q.4 Illustrate the interaction between agent, environment, actions, and rewards in RL. **06**

Section – II

Q.5 Attempt Any Four. **16**

a) Explain the main idea behind Dynamic Programming.

b) How is value iteration different from policy iteration?

c) What happens when the model in RL is incorrect?

d) Explain the working mechanism of Go and AlphaGo.

e) Write short note on Dyna-Q framework.

Q.6 Answer Any One. **06**

a) Explain the main advantage of prioritized sweeping over standard planning.

b) Explain the difference between Monte Carlo and Dynamic Programming approaches.

Q.7 Explain the difference between SARSA and Q-learning. **06**

MCQ/Objective Type Questions

Duration: 30 Minutes Marks:14

Q.1 Choose the correct alternatives from the given options. 14

1) The optimal value function gives _____.
a) The maximum expected return achievable from each state
b) The reward of the first action
c) The average of all possible actions
d) The probability of ending an episode

2) Optimality in reinforcement learning implies _____.
a) Following a deterministic policy only
b) Achieving the highest possible expected return
c) Choosing actions randomly until convergence
d) Minimizing the number of episodes

3) Policy iteration consists of _____.
a) Only repeating policy evaluation until convergence
b) Randomized value updates
c) Using Monte Carlo simulations
d) Alternating between policy evaluation and policy improvement

4) SARSA is an example of _____.
a) Off-policy control b) On-policy TD control
c) Model-based method d) Value iteration

5) Q-learning updates are based on _____.
a) Action taken under the current policy
b) Maximum action-value of the next state
c) Only observed rewards
d) Averaging all past returns

6) In reinforcement learning, a model is used for _____.
   a) Storing policies only
   b) Computing learning rates
   c) Predicting next states and rewards
   d) Updating action-values directly

7) The Dyna architecture integrates _____.
   a) Planning, acting, and learning
   b) Exploration and exploitation only
   c) Policy, iteration and value iteration
   d) On-policy and off-policy control

8) A function that measures how good a state or action is, in terms of expected future rewards, is referred to as _____.

a) Differentiate state-value and action-value functions.

b) Describe how the 10-armed test-bed simulates the exploration-exploitation problem.

Q.4 Illustrate the interaction between agent, environment, actions, and rewards in RL. **06**

Section – II

Q.5 Attempt Any Four. **16**

a) Explain the main idea behind Dynamic Programming.

b) How is value iteration different from policy iteration?

c) What happens when the model in RL is incorrect?

d) Explain the working mechanism of Go and AlphaGo.

e) Write short note on Dyna-Q framework.

Q.6 Answer Any One. **06**

a) Explain the main advantage of prioritized sweeping over standard planning.

b) Explain the difference between Monte Carlo and Dynamic Programming approaches.

Q.7 Explain the difference between SARSA and Q-learning. **06**

Set R

S.Y. (B.Tech.) (Computer Science & Engineering) (Sem - II) (New) (CBCS) Examination: March/April - 2026
Reinforcement Learning (CSEHON-02A)

Day & Date: Tuesday, 26-05-2026 Max. Marks: 70
Time: 10:00 AM To 01:00 PM

Instructions: 1) Q. No. 1 is compulsory. It should be solved in the first 30 minutes in Answer Book Page no 03 (Starting page of the Answer Book). Each question carries one mark.
2) Don't forget to Mention question paper set (P/Q/R/S) on top of page.
3) Figures to the right indicate full marks.
4) Assume suitable data if necessary and mention it clearly.

MCQ/Objective Type Questions

Duration: 30 Minutes Marks:14

Q.1 Choose the correct alternatives from the given options. 14

1) SARSA is an example of _____.
a) Off-policy control b) On-policy TD control
c) Model-based method d) Value iteration

2) Q-learning updates are based on _____.
a) Action taken under the current policy
b) Maximum action-value of the next state
c) Only observed rewards
d) Averaging all past returns

3) In reinforcement learning, a model is used for _____.
a) Storing policies only
b) Computing learning rates
c) Predicting next states and rewards
d) Updating action-values directly

4) The Dyna architecture integrates _____.
a) Planning, acting, and learning
b) Exploration and exploitation only
c) Policy, iteration and value iteration
d) On-policy and off-policy control

5) A function that measures how good a state or action is, in terms of expected future rewards, is referred to as _____.
a) Policy b) Value Function
c) Agent d) Environment

6) The signal received from the environment to indicate the immediate outcome of an action is known as _____.
a) Reward
b) Policy
c) State
d) Exploration

7) In reinforcement learning, the component that interacts with the environment by taking actions is called _____.
a) Reward
b) Policy
c) Agent
d) Value Function

8) In a k-armed bandit problem, the number k represents _____.
a) Number of states
b) Number of possible actions
c) Number of agents
d) Number of rewards

9) The objective of the k-armed bandit problem is to: _____.
a) Minimize regret
b) Maximize total expected reward over time
c) Minimize variance of rewards
d) Always exploit the best-known action

10) The exploration-exploitation dilemma refers to _____.
a) Choosing between immediate and delayed rewards
b) Choosing between exploring new actions and exploiting known good ones
c) Choosing between deterministic and stochastic rewards
d) Choosing between different agents

11) The discount factor $\gamma (0 \leq \gamma \leq 1)$ determines _____.
a) The probability of exploration
b) The relative importance of future rewards
c) The learning rate of updates
d) The optimality of value functions

12) The optimal value function gives _____.
a) The maximum expected return achievable from each state
b) The reward of the first action
c) The average of all possible actions
d) The probability of ending an episode

13) Optimality in reinforcement learning implies _____.
a) Following a deterministic policy only
b) Achieving the highest possible expected return
c) Choosing actions randomly until convergence
d) Minimizing the number of episodes

14) Policy iteration consists of _____.
a) Only repeating policy evaluation until convergence
b) Randomized value updates
c) Using Monte Carlo simulations
d) Alternating between policy evaluation and policy improvement

MCQ/Objective Type Questions

Duration: 30 Minutes Marks:14

Q.1 Choose the correct answer. **14**

1) Which of the following is a key weakness of SNMPv1?
a) Lack of encryption
b) No support for network monitoring
c) Incompatibility with IPv4
d) High resource consumption

2) Which of the following tools is commonly used for symbolic execution?
a) Valgrind b) KLEE
c) Metasploit d) Nessus

3) What is a common defense against use-after-free vulnerabilities?
a) Address sanitization b) Data encryption
c) Secure key storage d) Taint analysis

4) Which of the following is an example of an attack that involves altering the data in transmission?
a) Session hijacking b) Buffer overflow
c) ARP spoofing d) Man-in-the-middle

5) Which of the following protocols does TCP use for session management and authentication?
a) IPsec b) ARP
c) TCP handshaking d) TLS/SSL

6) What is the goal of integrity in network security?
a) Ensuring data is only accessible to authorized users
b) Ensuring data has not been tampered with
c) Verifying the identity of the sender
d) Preventing denial of service attacks

7) Which of the following protocols is used for key exchange in IPsec?
a) Diffie-Hellman b) RSA
c) Kerberos d) AES

8) Which of the following is a default community string in SNMPv1?
a) Private b) Public
c) Secret d) Admin

9) Which type of threat involves a program that replicates itself to spread to other systems?
a) Worm b) Spyware
c) Trojan d) Virus

10) Which of the following is a conventional encryption algorithm?
a) RSA b) DES
c) Diffie-Hellman d) ECC

11) Which encryption device location ensures secure end-to-end communication?
a) Link encryption b) End-to-end encryption
c) Device-to-device encryption d) Hop-by-hop encryption

12) Which of the following is an example of a public key cryptography algorithm?
a) AES b) DES
c) RSA d) HMAC

13) What does IPsec primarily aim to secure?
a) Email communications
b) Network-layer communication
c) Application-layer communication
d) Physical-layer communication

14) Who is responsible for issuing digital certificates?
a) Certificate Authority b) Kerberos

c) Explain How S/MIME protocol works.

d) Explain the working of IDs with workflow.

Q.5 Answer Any Two. **16**

a) Write a Differentiate between SNMPv1 and SNMPv3.

b) Define Firewall, Explain the primary types of firewalls and Design principle of firewall.

c) Describe following terms with example.
i) Intruders
ii) Virus
iii) Threats
iv) IDS

S.Y. (B.Tech.) (Computer Science & Engineering) (Semester - II) (New) (CBCS) Examination: March/April – 2026
Data Pre-processing & Visualization (CSEHON-02C)

Day & Date: Tuesday, 26-05-2026 Max. Marks: 70
Time: 10:00 AM To 01:00 PM

Instructions: 1) Q. No. 1 is compulsory. It should be solved in the first 30 minutes in Answer Book Page no 03 (Starting page of the Answer Book). Each question carries one mark.
2) Don't forget to Mention question paper set (P/Q/R/S) on top of page.
3) Figures to the right indicates full marks.
4) Assume suitable data if required.

MCQ/Objective Type Questions

Duration: 30 Minutes Marks:14

Q.1 Choose the correct option from the following. **14**

1) Each row of the table describes an _____ and each column describes a _____.
a) Observation, variables b) Variable, attributes
c) Variable, features d) All of the above

2) What does NumPy stand for?
a) Numerical Python b) Natural Python
c) Numeric Program d) Nonlinear Python

3) Which of the following is an example of a nominal variable?
a) Blood pressure
b) Eye color
c) Height of individuals
d) Time taken to complete a task

4) Which of the following is NOT a step in preparing data tables for analysis?
a) Data cleaning
b) Data visualization
c) Removing irrelevant observations
d) Converting data into a suitable format for analysis

5) The process of cleaning the data primarily involves _____.
a) Creating visualizations
b) Removing missing or invalid data and correcting errors
c) Aggregating data into groups
d) Generating hypotheses from data

6) What are the benefits of Data Visualizations?
   a) Better Analysis
   b) Identifying patterns
   c) Exploring Business Insights
   d) All of the above

7) Which method can be used to convert text data to numerical values?
   a) One-hot encoding
   b) Normalization
   c) Binning
   d) Grouping

8) How to handle the missing values in the dataset?
   a) Dropping the missing rows & columns
   b) Replace with some values
   c) Compute with mean/mode/median value
   d) All of the above

9) Which of the following is true about outliers?
   a) Data points that deviate a lot from normal
   b) can reduce the accuracy of model
   c) a) & b)
   d) None of the these

10) After installing Pandas, which command is used to import it in a Python script?
   a) import pandas as pd
   b) import pandas
   c) from pandas import *
   d) import pandas as pd as np

11) Which Pandas method is used to remove rows with missing data from a DataFrame?
   a) df.dropna()
   b) df.fillna()
   c) df.isna()
   d) df.replace()

12) What is the default type of join used when using pd.merge()?
   a) Left join
   b) Inner join
   c) Right join
   d) Outer join

13) Which of the following correctly plots a histogram using Matplotlib?
   a) plt.hist(data, bins=10)
   b) plt.histogram(data, bins=10)
   c) sns.histplot(data=data, bins=10)
   d) plt.hist(data, 10)

14) Which is the correct command to install Matplotlib?
   a) pip install matplotlib
   b) pip install matplotlib.pz
   c) pip install matplotlib.*
   d) All of the above

Set **P**

S.Y. (B.Tech.) (Computer Science & Engineering) (Semester - II) (New) (CBCS) Examination: March/April – 2026
Data Pre-processing & Visualization (CSEHON-02C)

Day & Date: Tuesday, 26-05-2026 Max. Marks: 56
Time: 10:00 AM To 01:00 PM

Instructions: 1) All questions are compulsory.
2) Figures to the right indicate full marks.
3) Assume suitable data if required.

SECTION – I

Q.2 Attempt Any Three **12**

a) Describe the process for making sense of data.

b) What are the Different Types of Variables?

c) What are the Key aspects of data preprocessing for hypothesis testing?

d) Explain Data preprocessing steps and write Uses of Data Preprocessing.

Q.3 Attempt Any One. **08**

a) Define a Range? What are the Applications of Range? Explain the method of How to Find Range with example.

b) How to convert text to numbers and numbers to text with examples.

Q.4 Compulsory Question. **08**

Calculate the following statistics for the variable Age from following Table:

Name	Age
P. Lee	35
R. Jones	52
J. Smith	45
A. Patel	70
M. Owen	24
S. Green	43
N. Cook	68
W. Hands	77
P. Rice	45
F. Marsh	28

1) Mode
2) Median
3) Mean
4) Range
5) Variance
6) Standard deviation

SECTION – II

Q.5 Attempt Any Three **12**

a) What is Data Visualization, identify the design principles of data visualization.

b) What is a dynamic technique in data visualization? Explain with example.

c) Explain univariate data visualization & Multivariate Data Visualization with suitable examples.

d) How to handle missing values in Pandas, explain with example.

Q.6 Attempt Any One **08**

a) What are the features of Pandas? Explain in detail.

b) List types of tables. Explain it with Example. How is the Cross classification table better than the summary table?

Q.7 Compulsory Question. **08**

Write the Python code to visualize the Histogram, Bar Chart. Consider a suitable dataset.

Day & Date: Friday, 29-05-2026 Max. Marks: 50
Time: 10:00 AM To 11:30 AM

Instructions: 1) All questions are compulsory.
2) Figures to the right indicate full marks.
3) Mention Question Paper Set (P/Q/R/S) on Top of Page.

Answer

Q.1 Answer the following Objective Type Questions. 50

1) What are fundamental human values?
a) Core beliefs and principles that guide human behavior and interactions
b) Economic indicators for social development
c) Religious doctrines that govern human life
d) Scientific facts that influence decision-making

2) Which value emphasizes treating others as you wish to be treated?
a) Respect b) Empathy
c) Honesty d) Kindness

3) The value of honesty is closely related to _____.
a) Truthfulness and sincerity b) Wealth and possessions
c) Power and influence d) Indifference and insensitivity

4) Which value involves considering the perspectives and feelings of others?
a) Empathy b) Courage
c) Determination d) Patience

5) The value of respect entails _____.
a) Recognizing the worth of every individual and their rights
b) Achieving personal success at any cost
c) Promoting competition among individuals
d) Pursuing material gains over relationships

6) Which value involves being accountable for one's decisions and actions?
a) Responsibility b) Flexibility
c) Confidence d) Arrogance

7) The value of integrity entails _____.
a) Being honest and true to oneself and others
b) Pursuing personal interests at any cost
c) Manipulating and deceiving others for personal gain
d) Ignoring the feelings and rights of other

8) Which value involves being considerate and thoughtful towards others?
a) Kindness
b) Determination
c) Independence
d) Indifference

9) The value of wisdom involves _____.
a) Making sound and informed judgments based on knowledge and experience
b) Pursuing personal interests at the expense of others
c) Ignoring the perspectives and concerns of others
d) Suppressing one's emotions and thoughts

10) Which value involves being truthful and sincere in one's actions and words?
a) Honesty
b) Tolerance
c) Flexibility
d) Arrogance

11) What is the primary goal of engineering ethics?
a) To maximize profits for companies
b) To ensure engineers work efficiently
c) To protect public safety and welfare
d) To follow industry standards

12) Which of the following is considered an ethical responsibility of an engineer?
a) Ignoring environmental concerns to meet deadlines
b) Ensuring the safety of the public
c) Disregarding laws and regulations
d) Making decisions based on personal interests

13) Ethical engineering practices promote _____.
a) The continuous pursuit of profit
b) The advancement of technology at any cost
c) Public trust and confidence in engineering
d) The minimization of safety regulations

14) Ethical engineers should consider which of the following when making decisions?
a) Profit maximization
b) Only the interests of the employer
c) Public safety, environmental impact, and ethical codes
d) Personal comfort and convenience

15) Which of the following is NOT part of an engineer's ethical responsibility?
a) Designing for safety and sustainability
b) Falsifying data to ensure project success
c) Reporting safety concerns immediately
d) Following industry standards and regulations

16) Ethical engineering involves making decisions based on _____.
a) Personal opinions and values
b) Financial incentives and company pressure
c) Objective analysis, codes of ethics, and consideration for the public good
d) Trends in the field of engineering

17) What should an engineer do if they discover a colleague is involved in unethical practices?
a) Ignore the situation to avoid conflict
b) Report the unethical behavior to management or relevant authorities
c) Cover up the situation to protect the colleague
d) Allow the behavior to continue if it does not affect the project

18) Ethical engineering practices include _____.
a) Following industry standards and regulations
b) Ensuring profitability is the main priority
c) Cutting costs by any means necessary
d) Avoiding the reporting of safety hazards

19) What is the primary focus of Kohlberg's theory?
a) Cognitive development b) Social development
c) Moral development d) Emotional development

20) Which term refers to an agreement that is made through discussions and compromises among parties?
a) Conflict b) Consensus
c) Dispute d) Isolation

21) What is the primary goal of risk assessment?
a) To eliminate all risks
b) To identify and mitigate potential risks
c) To ignore potential risks
d) To transfer risks to others

22) What is the primary goal of safety protocols?
a) To increase productivity
b) To reduce costs
c) To prevent injuries and illnesses
d) To improve employee morale

23) What is the difference between a hazard and a risk?
- a) A hazard is a potential risk, while a risk is a real danger
- b) A hazard is a real danger, while a risk is a potential danger
- c) A hazard is a physical danger, while a risk is a financial danger
- d) A hazard is a financial danger, while a risk is a physical danger

24) What should you do if you identify a potential risk in the workplace?
- a) Ignore it and hope it goes away
- b) Report it to your supervisor or HR
- c) Try to mitigate it on your own
- d) Transfer the risk to someone else

25) According to the theory of ethical egoism, what should guide an individual's moral actions?
- a) The well-being of others
- b) The individual's own self-interest
- c) Social norms and conventions
- d) Universal moral principles

26) Collegiality in a professional setting refers to _____.
- a) Loyalty to your employer
- b) Cooperation and mutual respect among colleagues
- c) Competing for individual success
- d) Avoiding work conflicts

27) Professional loyalty involves _____.
- a) Reporting colleagues' mistakes publicly
- b) Protecting the interests of the team or organization
- c) Ignoring safety violations to avoid
- d) Disclosing confidential information for personal conflict gain

28) Employee rights include _____.
- a) The right to work without discrimination
- b) The right to disregard company policies
- c) The right to personal opinion but not affecting work
- d) The right to ignore workplace safety standards

29) Intellectual Property Rights (IPR) protect _____.
- a) The financial interests of corporations
- b) The ownership and use of creative ideas and inventions
- c) The physical assets of a company
- d) Workplace performance evaluations

30) *Risk assessment* is important because it helps in _____.
- a) Evaluating the potential impact of hazards on health and safety
- b) Minimizing workplace productivity
- c) Defining job roles
- d) Ignoring environmental issues

31) In risk management, mitigation strategies aim to _____.
a) Accept all risks in the workplace
b) Reduce or eliminate identified risks
c) Increase the likelihood of hazards
d) Focus only on maximizing profits

32) Which of the following is a potential consequence of *occupational crime?*
a) Increased workplace productivity
b) Legal consequences and loss of reputation
c) Improvement in company safety standards
d) Higher employee satisfaction

33) Risk reduction in engineering refers to _____.
a) Implementing measures to lower the work chances of accidents
b) Increasing the number of hazards in the work environment
c) Ignoring potential risks
d) Cutting costs by removing safety measures

34) Public safety regulations are primarily designed to _____.
a) Ensure the safety of the company's assets
b) Protect the general public from potential harm
c) Increase revenue for the government
d) Focus only on preventing natural disasters

35) Multinational corporations (MNCs) are characterized by _____.
a) Operations in multiple countries with a centralized headquarters
b) Operating only in their home country
c) Limited influence on global markets
d) No responsibility toward environmental concerns

36) Environmental ethics primarily deals with _____.
a) Human responsibility to manage the environment and natural resources
b) Minimizing corporate profits
c) Technological advancements in engineering
d) Treating employees equally

37) Which of the following is NOT an example of environmental ethics?
a) Reducing pollution and waste
b) Maximizing resource use regardless of environmental impact
c) Preserving biodiversity
d) Sustainable development

38) Computer ethics involves _____.
   a) Programming and coding without considering social consequences
   b) Understanding the moral implications of computing technologies
   c) Focusing only on technological innovation
   d) Ignoring privacy issues

39) Weapons development ethics deals with _____.
   a) The development of new technologies to enhance military capabilities
   b) Restricting the use of all technological advancements
   c) Focusing only on civilian safety
   d) Only addressing the legal aspects of weapon development

40) Engineers as managers are expected to _____.
   a) Focus solely on technical tasks
   b) Lead teams, make strategic decisions, and manage projects
   c) Ignore the business aspects of their work
   d) Avoid taking responsibility for team outcomes

41) Consulting engineers are hired to _____.
   a) Work on projects within the company they are employed
   b) Provide expert advice on technical and engineering problems
   c) Manage public relations for a company
   d) Conduct legal investigations

42) Engineers acting as expert witnesses typically _____.
   a) Present evidence and offer testimony in legal cases
   b) Focus on public relations during a case
   c) Manage engineering projects for legal firms
   d) Directly represent the interests of a company court

43) Sample Code of Ethics of professional organizations typically includes _____.
   a) Guidelines for acceptable behavior and decision-making
   b) Rules for maximizing profits at any cost
   c) Detailed technical specifications for projects
   d) Guidelines for political involvement in engineering

44) ASME stands for _____.
   a) American Society of Mechanical Engineers
   b) American Society of Management Engineers
   c) Association of Safety and Mechanical Engineers
   d) Association of Scientific and Mechanical Engineers

45) The ASCE Code of Ethics emphasizes _____.
a) Following only local regulations
b) Maintaining professional integrity and responsibility
c) Focusing on personal financial gain
d) Ignoring environmental impacts

46) The IEEE Code of Ethics is primarily concerned with _____.
a) Fostering professional competence and integrity
b) Protecting corporate secrets
c) Maximizing technological advancements at any cost
d) Developing weapons for defense purposes

47) Global issues in engineering ethics include _____.
a) Cultural differences in engineering practices
b) Lack of understanding between technical and ethical concerns
c) Addressing both local and international engineering challenges
d) All of the above

48) A key challenge faced by multinational corporations is _____.
a) Balancing profits with social and environmental
b) Competing only within their home country responsibilities
c) Focusing solely on domestic issues
d) Ignoring corporate social responsibility

49) Empathy is the ability to _____.
a) Solve problems logically
b) Understand and share the feelings of others
c) Be indifferent to others' emotions
d) Only care about your own well-being

50) The quality of "caring" includes _____.
a) Showing concern for others' well-being
b) Ignoring the needs of others
c) Only helping family and friends
d) Seeking praise for helping others

Marks Obtained		Signature of Examiner		Signature of Junior Supervisor	

S.Y. (B.Tech.) (Computer Science & Engineering) (Semester - II) (New) (CBCS) Examination: March/April – 2026
Professional Ethics (VEC-02)

Day & Date: Friday, 29-05-2026 Max. Marks: 50
Time: 10:00 AM To 11:30 AM

Instructions: 1) All questions are compulsory.
2) Figures to the right indicate full marks.
3) Mention Question Paper Set (P/Q/R/S) on Top of Page.

Q.1 Answer the following Objective Type Questions. **50** **Answer**

1) What is the primary goal of risk assessment?
a) To eliminate all risks
b) To identify and mitigate potential risks
c) To ignore potential risks
d) To transfer risks to others

2) What is the primary goal of safety protocols?
a) To increase productivity
b) To reduce costs
c) To prevent injuries and illnesses
d) To improve employee morale

3) What is the difference between a hazard and a risk?
a) A hazard is a potential risk, while a risk is a real danger
b) A hazard is a real danger, while a risk is a potential danger
c) A hazard is a physical danger, while a risk is a financial danger
d) A hazard is a financial danger, while a risk is a physical danger

4) What should you do if you identify a potential risk in the workplace?
a) Ignore it and hope it goes away
b) Report it to your supervisor or HR
c) Try to mitigate it on your own
d) Transfer the risk to someone else

5) According to the theory of ethical egoism, what should guide an individual's moral actions?
a) The well-being of others
b) The individual's own self-interest
c) Social norms and conventions
d) Universal moral principles

6) Collegiality in a professional setting refers to _____.
   a) Loyalty to your employer
   b) Cooperation and mutual respect among colleagues
   c) Competing for individual success
   d) Avoiding work conflicts

7) Professional loyalty involves _____.
   a) Reporting colleagues' mistakes publicly
   b) Protecting the interests of the team or organization
   c) Ignoring safety violations to avoid
   d) Disclosing confidential information for personal conflict gain

8) Employee rights include _____.
   a) The right to work without discrimination
   b) The right to disregard company policies
   c) The right to personal opinion but not affecting work
   d) The right to ignore workplace safety standards

9) Intellectual Property Rights (IPR) protect _____.
   a) The financial interests of corporations
   b) The ownership and use of creative ideas and inventions
   c) The physical assets of a company
   d) Workplace performance evaluations

10) *Risk assessment* is important because it helps in _____.
   a) Evaluating the potential impact of hazards on health and safety
   b) Minimizing workplace productivity
   c) Defining job roles
   d) Ignoring environmental issues

11) In risk management, mitigation strategies aim to _____.
   a) Accept all risks in the workplace
   b) Reduce or eliminate identified risks
   c) Increase the likelihood of hazards
   d) Focus only on maximizing profits

12) Which of the following is a potential consequence of *occupational crime?*
   a) Increased workplace productivity
   b) Legal consequences and loss of reputation
   c) Improvement in company safety standards
   d) Higher employee satisfaction

13) Risk reduction in engineering refers to _____.
   a) Implementing measures to lower the work chances of accidents
   b) Increasing the number of hazards in the work environment
   c) Ignoring potential risks
   d) Cutting costs by removing safety measures

14) Public safety regulations are primarily designed to _____.
- a) Ensure the safety of the company's assets
- b) Protect the general public from potential harm
- c) Increase revenue for the government
- d) Focus only on preventing natural disasters

15) Multinational corporations (MNCs) are characterized by _____.
- a) Operations in multiple countries with a centralized headquarters
- b) Operating only in their home country
- c) Limited influence on global markets
- d) No responsibility toward environmental concerns

16) Environmental ethics primarily deals with _____.
- a) Human responsibility to manage the environment and natural resources
- b) Minimizing corporate profits
- c) Technological advancements in engineering
- d) Treating employees equally

17) Which of the following is NOT an example of environmental ethics?
- a) Reducing pollution and waste
- b) Maximizing resource use regardless of environmental impact
- c) Preserving biodiversity
- d) Sustainable development

18) Computer ethics involves _____.
- a) Programming and coding without considering social consequences
- b) Understanding the moral implications of computing technologies
- c) Focusing only on technological innovation
- d) Ignoring privacy issues

19) Weapons development ethics deals with _____.
- a) The development of new technologies to enhance military capabilities
- b) Restricting the use of all technological advancements
- c) Focusing only on civilian safety
- d) Only addressing the legal aspects of weapon development

20) Engineers as managers are expected to _____.
- a) Focus solely on technical tasks
- b) Lead teams, make strategic decisions, and manage projects
- c) Ignore the business aspects of their work
- d) Avoid taking responsibility for team outcomes

21) Consulting engineers are hired to _____.
a) Work on projects within the company they are employed
b) Provide expert advice on technical and engineering problems
c) Manage public relations for a company
d) Conduct legal investigations

22) Engineers acting as expert witnesses typically _____.
a) Present evidence and offer testimony in legal cases
b) Focus on public relations during a case
c) Manage engineering projects for legal firms
d) Directly represent the interests of a company court

23) Sample Code of Ethics of professional organizations typically includes _____.
a) Guidelines for acceptable behavior and decision-making
b) Rules for maximizing profits at any cost
c) Detailed technical specifications for projects
d) Guidelines for political involvement in engineering

24) ASME stands for _____.
a) American Society of Mechanical Engineers
b) American Society of Management Engineers
c) Association of Safety and Mechanical Engineers
d) Association of Scientific and Mechanical Engineers

25) The ASCE Code of Ethics emphasizes _____.
a) Following only local regulations
b) Maintaining professional integrity and responsibility
c) Focusing on personal financial gain
d) Ignoring environmental impacts

26) The IEEE Code of Ethics is primarily concerned with _____.
a) Fostering professional competence and integrity
b) Protecting corporate secrets
c) Maximizing technological advancements at any cost
d) Developing weapons for defense purposes

27) Global issues in engineering ethics include _____.
a) Cultural differences in engineering practices
b) Lack of understanding between technical and ethical concerns
c) Addressing both local and international engineering challenges
d) All of the above

28) A key challenge faced by multinational corporations is _____.
a) Balancing profits with social and environmental
b) Competing only within their home country responsibilities
c) Focusing solely on domestic issues
d) Ignoring corporate social responsibility

29) Empathy is the ability to _____.
a) Solve problems logically
b) Understand and share the feelings of others
c) Be indifferent to others' emotions
d) Only care about your own well-being

30) The quality of "caring" includes _____.
a) Showing concern for others' well-being
b) Ignoring the needs of others
c) Only helping family and friends
d) Seeking praise for helping others

31) What are fundamental human values?
a) Core beliefs and principles that guide human behavior and interactions
b) Economic indicators for social development
c) Religious doctrines that govern human life
d) Scientific facts that influence decision-making

32) Which value emphasizes treating others as you wish to be treated?
a) Respect b) Empathy
c) Honesty d) Kindness

33) The value of honesty is closely related to _____.
a) Truthfulness and sincerity b) Wealth and possessions
c) Power and influence d) Indifference and insensitivity

34) Which value involves considering the perspectives and feelings of others?
a) Empathy b) Courage
c) Determination d) Patience

35) The value of respect entails _____.
a) Recognizing the worth of every individual and their rights
b) Achieving personal success at any cost
c) Promoting competition among individuals
d) Pursuing material gains over relationships

36) Which value involves being accountable for one's decisions and actions?
a) Responsibility b) Flexibility
c) Confidence d) Arrogance

37) The value of integrity entails _____.
a) Being honest and true to oneself and others
b) Pursuing personal interests at any cost
c) Manipulating and deceiving others for personal gain
d) Ignoring the feelings and rights of other

38) Which value involves being considerate and thoughtful towards others?

a) Kindness
b) Determination
c) Independence
d) Indifference

39) The value of wisdom involves _____.

a) Making sound and informed judgments based on knowledge and experience
b) Pursuing personal interests at the expense of others
c) Ignoring the perspectives and concerns of others
d) Suppressing one's emotions and thoughts

40) Which value involves being truthful and sincere in one's actions and words?

a) Honesty
b) Tolerance
c) Flexibility
d) Arrogance

41) What is the primary goal of engineering ethics?

a) To maximize profits for companies
b) To ensure engineers work efficiently
c) To protect public safety and welfare
d) To follow industry standards

42) Which of the following is considered an ethical responsibility of an engineer?

a) Ignoring environmental concerns to meet deadlines
b) Ensuring the safety of the public
c) Disregarding laws and regulations
d) Making decisions based on personal interests

43) Ethical engineering practices promote _____.

a) The continuous pursuit of profit
b) The advancement of technology at any cost
c) Public trust and confidence in engineering
d) The minimization of safety regulations

44) Ethical engineers should consider which of the following when making decisions?

a) Profit maximization
b) Only the interests of the employer
c) Public safety, environmental impact, and ethical codes
d) Personal comfort and convenience

45) Which of the following is NOT part of an engineer's ethical responsibility?

a) Designing for safety and sustainability
b) Falsifying data to ensure project success
c) Reporting safety concerns immediately
d) Following industry standards and regulations

46) Ethical engineering involves making decisions based on _____.

a) Personal opinions and values
b) Financial incentives and company pressure
c) Objective analysis, codes of ethics, and consideration for the public good
d) Trends in the field of engineering

47) What should an engineer do if they discover a colleague is involved in unethical practices?

a) Ignore the situation to avoid conflict
b) Report the unethical behavior to management or relevant authorities
c) Cover up the situation to protect the colleague
d) Allow the behavior to continue if it does not affect the project

48) Ethical engineering practices include _____.

a) Following industry standards and regulations
b) Ensuring profitability is the main priority
c) Cutting costs by any means necessary
d) Avoiding the reporting of safety hazards

49) What is the primary focus of Kohlberg's theory?

a) Cognitive development b) Social development
c) Moral development d) Emotional development

50) Which term refers to an agreement that is made through discussions and compromises among parties?

a) Conflict b) Consensus
c) Dispute d) Isolation

7) Global issues in engineering ethics include _____.
a) Cultural differences in engineering practices
b) Lack of understanding between technical and ethical concerns
c) Addressing both local and international engineering challenges
d) All of the above

8) A key challenge faced by multinational corporations is _____.
a) Balancing profits with social and environmental
b) Competing only within their home country responsibilities
c) Focusing solely on domestic issues
d) Ignoring corporate social responsibility

9) Empathy is the ability to _____.
a) Solve problems logically
b) Understand and share the feelings of others
c) Be indifferent to others' emotions
d) Only care about your own well-being

10) The quality of "caring" includes _____.
a) Showing concern for others' well-being
b) Ignoring the needs of others
c) Only helping family and friends
d) Seeking praise for helping others

11) What are fundamental human values?
a) Core beliefs and principles that guide human behavior and interactions
b) Economic indicators for social development
c) Religious doctrines that govern human life
d) Scientific facts that influence decision-making

12) Which value emphasizes treating others as you wish to be treated?
a) Respect b) Empathy
c) Honesty d) Kindness

13) The value of honesty is closely related to _____.
a) Truthfulness and sincerity b) Wealth and possessions
c) Power and influence d) Indifference and insensitivity

14) Which value involves considering the perspectives and feelings of others?
a) Empathy b) Courage
c) Determination d) Patience

15) The value of respect entails _____.
a) Recognizing the worth of every individual and their rights
b) Achieving personal success at any cost
c) Promoting competition among individuals
d) Pursuing material gains over relationships

16) Which value involves being accountable for one's decisions and actions?
a) Responsibility b) Flexibility
c) Confidence d) Arrogance

17) The value of integrity entails _____.
a) Being honest and true to oneself and others
b) Pursuing personal interests at any cost
c) Manipulating and deceiving others for personal gain
d) Ignoring the feelings and rights of other

18) Which value involves being considerate and thoughtful towards others?
a) Kindness b) Determination
c) Independence d) Indifference

19) The value of wisdom involves _____.
a) Making sound and informed judgments based on knowledge and experience
b) Pursuing personal interests at the expense of others
c) Ignoring the perspectives and concerns of others
d) Suppressing one's emotions and thoughts

20) Which value involves being truthful and sincere in one's actions and words?
a) Honesty b) Tolerance
c) Flexibility d) Arrogance

21) What is the primary goal of engineering ethics?
a) To maximize profits for companies
b) To ensure engineers work efficiently
c) To protect public safety and welfare
d) To follow industry standards

22) Which of the following is considered an ethical responsibility of an engineer?
a) Ignoring environmental concerns to meet deadlines
b) Ensuring the safety of the public
c) Disregarding laws and regulations
d) Making decisions based on personal interests

23) Ethical engineering practices promote _____.
a) The continuous pursuit of profit
b) The advancement of technology at any cost
c) Public trust and confidence in engineering
d) The minimization of safety regulations

24) Ethical engineers should consider which of the following when making decisions?
a) Profit maximization
b) Only the interests of the employer
c) Public safety, environmental impact, and ethical codes
d) Personal comfort and convenience

25) Which of the following is NOT part of an engineer's ethical responsibility?
a) Designing for safety and sustainability
b) Falsifying data to ensure project success
c) Reporting safety concerns immediately
d) Following industry standards and regulations

26) Ethical engineering involves making decisions based on _____.
a) Personal opinions and values
b) Financial incentives and company pressure
c) Objective analysis, codes of ethics, and consideration for the public good
d) Trends in the field of engineering

27) What should an engineer do if they discover a colleague is involved in unethical practices?
a) Ignore the situation to avoid conflict
b) Report the unethical behavior to management or relevant authorities
c) Cover up the situation to protect the colleague
d) Allow the behavior to continue if it does not affect the project

28) Ethical engineering practices include _____.
a) Following industry standards and regulations
b) Ensuring profitability is the main priority
c) Cutting costs by any means necessary
d) Avoiding the reporting of safety hazards

29) What is the primary focus of Kohlberg's theory?
a) Cognitive development b) Social development
c) Moral development d) Emotional development

30) Which term refers to an agreement that is made through discussions and compromises among parties?
a) Conflict b) Consensus
c) Dispute d) Isolation

31) What is the primary goal of risk assessment?
a) To eliminate all risks
b) To identify and mitigate potential risks
c) To ignore potential risks
d) To transfer risks to others

32) What is the primary goal of safety protocols?
a) To increase productivity
b) To reduce costs
c) To prevent injuries and illnesses
d) To improve employee morale

33) What is the difference between a hazard and a risk?
a) A hazard is a potential risk, while a risk is a real danger
b) A hazard is a real danger, while a risk is a potential danger
c) A hazard is a physical danger, while a risk is a financial danger
d) A hazard is a financial danger, while a risk is a physical danger

34) What should you do if you identify a potential risk in the workplace?
a) Ignore it and hope it goes away
b) Report it to your supervisor or HR
c) Try to mitigate it on your own
d) Transfer the risk to someone else

35) According to the theory of ethical egoism, what should guide an individual's moral actions?
a) The well-being of others
b) The individual's own self-interest
c) Social norms and conventions
d) Universal moral principles

36) Collegiality in a professional setting refers to _____.
a) Loyalty to your employer
b) Cooperation and mutual respect among colleagues
c) Competing for individual success
d) Avoiding work conflicts

37) Professional loyalty involves _____.
a) Reporting colleagues' mistakes publicly
b) Protecting the interests of the team or organization
c) Ignoring safety violations to avoid
d) Disclosing confidential information for personal conflict gain

38) Employee rights include _____.
a) The right to work without discrimination
b) The right to disregard company policies
c) The right to personal opinion but not affecting work
d) The right to ignore workplace safety standards

39) Intellectual Property Rights (IPR) protect _____.
a) The financial interests of corporations
b) The ownership and use of creative ideas and inventions
c) The physical assets of a company
d) Workplace performance evaluations

40) *Risk assessment* is important because it helps in _____.
a) Evaluating the potential impact of hazards on health and safety
b) Minimizing workplace productivity
c) Defining job roles
d) Ignoring environmental issues

41) In risk management, mitigation strategies aim to _____.
a) Accept all risks in the workplace
b) Reduce or eliminate identified risks
c) Increase the likelihood of hazards
d) Focus only on maximizing profits

42) Which of the following is a potential consequence of *occupational crime?*
a) Increased workplace productivity
b) Legal consequences and loss of reputation
c) Improvement in company safety standards
d) Higher employee satisfaction

43) Risk reduction in engineering refers to _____.
a) Implementing measures to lower the work chances of accidents
b) Increasing the number of hazards in the work environment
c) Ignoring potential risks
d) Cutting costs by removing safety measures

44) Public safety regulations are primarily designed to _____.
a) Ensure the safety of the company's assets
b) Protect the general public from potential harm
c) Increase revenue for the government
d) Focus only on preventing natural disasters

45) Multinational corporations (MNCs) are characterized by _____.
a) Operations in multiple countries with a centralized headquarters
b) Operating only in their home country
c) Limited influence on global markets
d) No responsibility toward environmental concerns

46) Environmental ethics primarily deals with _____.

a) Human responsibility to manage the environment and natural resources
b) Minimizing corporate profits
c) Technological advancements in engineering
d) Treating employees equally

47) Which of the following is NOT an example of environmental ethics?

a) Reducing pollution and waste
b) Maximizing resource use regardless of environmental impact
c) Preserving biodiversity
d) Sustainable development

48) Computer ethics involves _____.

a) Programming and coding without considering social consequences
b) Understanding the moral implications of computing technologies
c) Focusing only on technological innovation
d) Ignoring privacy issues

49) Weapons development ethics deals with _____.

a) The development of new technologies to enhance military capabilities
b) Restricting the use of all technological advancements
c) Focusing only on civilian safety
d) Only addressing the legal aspects of weapon development

50) Engineers as managers are expected to _____.

a) Focus solely on technical tasks
b) Lead teams, make strategic decisions, and manage projects
c) Ignore the business aspects of their work
d) Avoid taking responsibility for team outcomes

d) Disclosing confidential information for personal conflict gain

18) Employee rights include _____.
a) The right to work without discrimination
b) The right to disregard company policies
c) The right to personal opinion but not affecting work
d) The right to ignore workplace safety standards

19) Intellectual Property Rights (IPR) protect _____.
a) The financial interests of corporations
b) The ownership and use of creative ideas and inventions
c) The physical assets of a company
d) Workplace performance evaluations

20) *Risk assessment* is important because it helps in _____.
a) Evaluating the potential impact of hazards on health and safety
b) Minimizing workplace productivity
c) Defining job roles
d) Ignoring environmental issues

21) In risk management, mitigation strategies aim to _____.
a) Accept all risks in the workplace
b) Reduce or eliminate identified risks
c) Increase the likelihood of hazards
d) Focus only on maximizing profits

22) Which of the following is a potential consequence of *occupational crime?*

a) Increased workplace productivity
b) Legal consequences and loss of reputation
c) Improvement in company safety standards
d) Higher employee satisfaction

23) Risk reduction in engineering refers to _____.

a) Implementing measures to lower the work chances of accidents
b) Increasing the number of hazards in the work environment
c) Ignoring potential risks
d) Cutting costs by removing safety measures

24) Public safety regulations are primarily designed to _____.

a) Ensure the safety of the company's assets
b) Protect the general public from potential harm
c) Increase revenue for the government
d) Focus only on preventing natural disasters

25) Multinational corporations (MNCs) are characterized by _____.

a) Operations in multiple countries with a centralized headquarters
b) Operating only in their home country
c) Limited influence on global markets
d) No responsibility toward environmental concerns

26) Environmental ethics primarily deals with _____.

a) Human responsibility to manage the environment and natural resources
b) Minimizing corporate profits
c) Technological advancements in engineering
d) Treating employees equally

27) Which of the following is NOT an example of environmental ethics?

a) Reducing pollution and waste
b) Maximizing resource use regardless of environmental impact
c) Preserving biodiversity
d) Sustainable development

28) Computer ethics involves _____.

a) Programming and coding without considering social consequences
b) Understanding the moral implications of computing technologies
c) Focusing only on technological innovation
d) Ignoring privacy issues

29) Weapons development ethics deals with _____.
a) The development of new technologies to enhance military capabilities
b) Restricting the use of all technological advancements
c) Focusing only on civilian safety
d) Only addressing the legal aspects of weapon development

30) Engineers as managers are expected to _____.
a) Focus solely on technical tasks
b) Lead teams, make strategic decisions, and manage projects
c) Ignore the business aspects of their work
d) Avoid taking responsibility for team outcomes

31) Consulting engineers are hired to _____.
a) Work on projects within the company they are employed
b) Provide expert advice on technical and engineering problems
c) Manage public relations for a company
d) Conduct legal investigations

32) Engineers acting as expert witnesses typically _____.
a) Present evidence and offer testimony in legal cases
b) Focus on public relations during a case
c) Manage engineering projects for legal firms
d) Directly represent the interests of a company court

33) Sample Code of Ethics of professional organizations typically includes _____.
a) Guidelines for acceptable behavior and decision-making
b) Rules for maximizing profits at any cost
c) Detailed technical specifications for projects
d) Guidelines for political involvement in engineering

34) ASME stands for _____.
a) American Society of Mechanical Engineers
b) American Society of Management Engineers
c) Association of Safety and Mechanical Engineers
d) Association of Scientific and Mechanical Engineers

35) The ASCE Code of Ethics emphasizes _____.
a) Following only local regulations
b) Maintaining professional integrity and responsibility
c) Focusing on personal financial gain
d) Ignoring environmental impacts

36) The IEEE Code of Ethics is primarily concerned with _____.
a) Fostering professional competence and integrity
b) Protecting corporate secrets
c) Maximizing technological advancements at any cost
d) Developing weapons for defense purposes

37) Global issues in engineering ethics include _____.
a) Cultural differences in engineering practices
b) Lack of understanding between technical and ethical concerns
c) Addressing both local and international engineering challenges
d) All of the above

38) A key challenge faced by multinational corporations is _____.
a) Balancing profits with social and environmental
b) Competing only within their home country responsibilities
c) Focusing solely on domestic issues
d) Ignoring corporate social responsibility

39) Empathy is the ability to _____.
a) Solve problems logically
b) Understand and share the feelings of others
c) Be indifferent to others' emotions
d) Only care about your own well-being

40) The quality of "caring" includes _____.
a) Showing concern for others' well-being
b) Ignoring the needs of others
c) Only helping family and friends
d) Seeking praise for helping others

41) What are fundamental human values?
a) Core beliefs and principles that guide human behavior and interactions
b) Economic indicators for social development
c) Religious doctrines that govern human life
d) Scientific facts that influence decision-making

42) Which value emphasizes treating others as you wish to be treated?
a) Respect b) Empathy
c) Honesty d) Kindness

43) The value of honesty is closely related to _____.
a) Truthfulness and sincerity b) Wealth and possessions
c) Power and influence d) Indifference and insensitivity

44) Which value involves considering the perspectives and feelings of others?
a) Empathy b) Courage
c) Determination d) Patience

45) The value of respect entails _____.

a) Recognizing the worth of every individual and their rights
b) Achieving personal success at any cost
c) Promoting competition among individuals
d) Pursuing material gains over relationships

46) Which value involves being accountable for one's decisions and actions?

a) Responsibility b) Flexibility
c) Confidence d) Arrogance

47) The value of integrity entails _____.

a) Being honest and true to oneself and others
b) Pursuing personal interests at any cost
c) Manipulating and deceiving others for personal gain
d) Ignoring the feelings and rights of other

48) Which value involves being considerate and thoughtful towards others?

a) Kindness b) Determination
c) Independence d) Indifference

49) The value of wisdom involves _____.

a) Making sound and informed judgments based on knowledge and experience
b) Pursuing personal interests at the expense of others
c) Ignoring the perspectives and concerns of others
d) Suppressing one's emotions and thoughts

50) Which value involves being truthful and sincere in one's actions and words?

a) Honesty b) Tolerance
c) Flexibility d) Arrogance

Set **P**

S.Y. (B.Tech.) (Computer Science & Engineering) (Semester - II) (New) (CBCS) Examination: March/April – 2026
Applied Mathematics – II (BTN03401)

Day & Date: Friday, 29-05-2026 Max. Marks: 70
Time: 10:00 AM To 01:00 PM

Instructions: 1) Q. No. 1 is compulsory. It should be solved in the first 30 minutes in Answer Book Page no 03 (Starting page of the Answer Book). Each question carries one mark.
2) Don't forget to Mention question paper set (P/Q/R/S) on top of page.
3) Figure to the right indicate full marks.
4) Assume suitable data if necessary.

MCQ/Objective Type Questions

Duration: 30 Minutes Marks:14

Q.1 Choose the correct answer. **14**

1) A transcendental equation is an equation that involves _____.
a) Only algebraic terms
b) Only transcendental functions
c) Both algebraic and transcendental functions
d) Linear terms only

2) The interval in which a real root of the equation $x^3 - 2x - 5 = 0$ lies is _____.
a) $(1, 2)$ b) $(0, 1)$
c) $(2, 3)$ d) $(3, 4)$

3) The Gauss-Seidel method is used for solving _____.
a) Nonlinear equations
b) Systems of linear equations
c) Ordinary differential equations
d) Partial differential equations

4) Which of the following is a disadvantage of the Gauss-Jacobi method?
a) It converges faster than most direct methods
b) It requires a large number of iterations for a good approximation
c) It cannot be used for systems with more than two equations
d) It works only for symmetric systems

5) The use of Romberg's method is _____.
a) To solve simultaneous linear equation
b) To find root of linear equation
c) To evaluate definite integration
d) To find the Eigen values

6) The error in Simpson's 1/3rd rule is of order _____.
a) h^3 b) h^4
c) h^2 d) h

7) Power Method is used to find _____.
a) Smallest Eigen Value b) Largest Eigen Value
c) Positive Eigen Value d) Negative Eigen Value

8) To find the Numerically largest Eigen value using iterative method we use the equation _____.
a) $A = \lambda X$ b) $AX = X$
c) $X = \lambda X$ d) $AX = \lambda X$

9) A fuzzy set is a collection of objects with _____.
a) Clear boundary b) No boundary
c) Partial membership d) Both b) and c)

10) Fuzzy sets are generalizations of _____.
a) Crisp sets b) Classical sets
c) Both a) and b) d) None

11) The membership value of an element in a fuzzy set lies between _____.
a) 0 and 1 b) 0 and ∞
c) -1 and 1 d) Only 0 or 1

12) Which operation is used for the intersection of fuzzy sets?
a) Maximum b) Minimum
c) Addition d) Subtraction

13) A Linear Programming Problem (LPP) consists of _____.
a) An objective function b) Constraints
c) Non-negativity restrictions d) All of the above

14) The simplex method is used for solving _____.
a) Linear equations
b) Non-linear equations
c) Linear programming problems with more than two variables
d) None

Seat No.	

Set **P**

S.Y. (B.Tech.) (Computer Science & Engineering) (Semester - II) (New) (CBCS) Examination: March/April – 2026
Applied Mathematics – II (BTN03401)

Day & Date: Friday, 29-05-2026 Max. Marks: 56
Time: 10:00 AM To 01:00 PM

Instructions: 1) All questions are compulsory.
2) Figures to the right indicate full marks.
3) Assume suitable data if necessary.

SECTION – I

Q.2 Attempt Any Three. **09**

a) Find the double root of the equation $x^3 - 5.4x^2 + 9.24x - 5.096 = 0$ given that it is nearer to 1.5.

b) Solve the system of equations by Jacobi's iterative method (perform 3 iterations)
$27x + 6y - z = 85, \quad 6x + 15y + 2z = 72$
$x + y + 54z = 110$

c) Find positive real root of the equation $x \sin x + \cos x = 0$ using Newton-Raphson method correct to 3 decimal places.

d) Solve the system of equation by using Gauss-Elimination method.
$x + 4y - z = -5, \quad x + y - 6z = -12, \quad -3x - y - z = 4$

e) Evaluate the integral $\int_0^1 \frac{x^2}{1+x^3}\, dx$ using Simpson's $\frac{1}{3}rd$ rule Take $h = 0.25$

Q.3 Attempt Any Three. **09**

a) Use Trapezoidal Rule to compute $\int_0^1 \frac{1}{1+x^2} dx$ Take h as 0.5

b) Solve the integral $\int_0^{1/2} \frac{1}{\sqrt{1-x^2}} dx$ using Weddle's rule Taking $n = 6$

c) Solve by Gauss Seidel Method, the equations
$20x + y - 2z = 17, 3x + 20y - z = -18, 2x - 3y + 20z = 25$ Perform 3 iteration.

d) Find the value of $\sqrt{5}$ using newton's iterative formula. Perform 3 iteration.

e) Determine the largest Eigen value and corresponding Eigen vector of the matrix. $\begin{bmatrix} 5 & 4 \\ 1 & 2 \end{bmatrix}$ by using power method perform three iterations.

Q.4 Attempt Any Two. **10**

a) Perform 2-iteration by Newton's Raphson Method to Solve the non-linear equation.
$x = x^2 + y^2, y = x^2 - y^2$ Take initial approximation $x_0 = 0.8, y_0 = 0.4$

b) Solve the system of equation by LU decomposition Method
$3x + 2y + 7z = 4, \quad 2x + 3y + z = 5, \quad 3x + 4y + z = 7$

c) Use Romberg's method to compute $\int_0^1 \frac{1}{1+x^2} dx$ Take h as $0.5, 0.25, 0.125$

SECTION – II

Q.5 Attempt Any Three. **09**

a) Define membership function and fuzzy set.

b) Find I.B.F.S by using Hungarian method

Warehouse Factory	I	II	III	IV
A	15	14	12	16
B	23	22	25	24
C	31	34	32	33
D	21	32	44	53

c) If $A = \{(1, 0.2), (2, 0.4), (3, 0.8)\}$ and $B = \{(1, 0.5), (2, 0.6), (3, 0.7)\}$ find
- $A \cup B$
- $A \cap B$

d) Define the following terms:
i) Support of a fuzzy set
ii) Height of a fuzzy set
iii) Normalized fuzzy set

e) Evaluate the Following
i) $[1,3] + [5,8]$
ii) $[1,3] - [5,8]$
iii) $[1,3].[5,8]$
iv) $[1,3]/[5,8]$

Q.6 Attempt Any Three. **09**

a) Maximize $Z = 3x_1 + 2x_2$, subject to
$x_1 + x_2 \leq 4, \quad x_1 - x_2 \leq 2, \quad x_1, x_2 \geq 0$

b) Let $A = \{(x_1, 0.3), (x_2, 0.7)\}$ and $B = \{(x_1, 0.5), (x_2, 0.4)\}$
Find the fuzzy difference $A - B$

c) Solve the Assignment Problem

Tasks	E	F	G	H
A	18	26	17	11
B	13	28	14	26
C	38	19	18	15
D	19	26	24	10

d) Let A, B be the fuzzy sets defined on universal set $x = \{0, 1, 2, 3, 4, 5\}$ by the membership functions

$A(x) = \frac{5-x}{x+5}, \qquad B(x) = \frac{5-x}{5}, \forall x \in X$

verify $|A| + |B| = |A \cup B| + |A \cap B|$

e) Determine which of the following fuzzy sets qualify as a fuzzy number.

i) $A(x) = \begin{cases} \frac{1}{2}, & 0 \le x \le 1 \\ 0, & 0.\text{W.} \end{cases}$

ii) $B(x) = \begin{cases} \cos x, & 0 \le x \le \pi/2 \\ 0, & 0.\text{W.} \end{cases}$

Q.7 Attempt Any Two. **10**

a) Solve the Assignment Problem.

	Machine			
Job	A	B	C	D
1	18	24	28	32
2	8	13	17	19
3	10	15	19	22

b) State first decomposition theorem and find $f(A)$ where

$A(x) = \frac{0.7}{-5} + \frac{0.6}{-4} + \frac{1}{-3} + \frac{0.4}{-2} + \frac{0.45}{-1} + \frac{0.75}{0} + \frac{0.81}{1} + \frac{0.34}{2} + \frac{1}{3} + \frac{0.17}{4} + \frac{0.91}{5}$

$X = \{-5, -4, -3, -2, -1, 0, 1, 2, 3, 4, 5\}$

$F: x \to y$ defined by $f(x) = x^2$

c) Find $A + B$ for the following membership function:

$A(x) = \frac{x+1}{2} \qquad -1 < x \le 1$

$= \frac{3-x}{2} \qquad 1 < x < 3$

$= 0 \qquad$ otherwise

$B(x) = \frac{x-1}{2} \qquad 1 < x \le 3$

$= \frac{5-x}{2} \qquad 3 < x \le 5$

$= 0 \qquad$ otherwise

   a) It converges faster than most direct methods
   b) It requires a large number of iterations for a good approximation
   c) It cannot be used for systems with more than two equations
   d) It works only for symmetric systems

9) The use of Romberg's method is _____.
   a) To solve simultaneous linear equation
   b) To find root of linear equation
   c) To evaluate definite integration
   d) To find the Eigen values

10) The error in Simpson's 1/3rd rule is of order _____.
   a) h^3 b) h^4
   c) h^2 d) h

11) Power Method is used to find _____.
   a) Smallest Eigen Value b) Largest Eigen Value
   c) Positive Eigen Value d) Negative Eigen Value

12) To find the Numerically largest Eigen value using iterative method we use the equation _____.
   a) $A = \lambda X$ b) $AX = X$
   c) $X = \lambda X$ d) $AX = \lambda X$

13) A fuzzy set is a collection of objects with _____.
   a) Clear boundary b) No boundary
   c) Partial membership d) Both b) and c)

14) Fuzzy sets are generalizations of _____.
   a) Crisp sets b) Classical sets
   c) Both a) and b) d) None

Set **R**

S.Y. (B.Tech.) (Computer Science & Engineering) (Semester - II) (New) (CBCS) Examination: March/April – 2026
Applied Mathematics – II (BTN03401)

Day & Date: Friday, 29-05-2026 Max. Marks: 56
Time: 10:00 AM To 01:00 PM

Instructions: 1) All questions are compulsory.
2) Figures to the right indicate full marks.
3) Assume suitable data if necessary.

SECTION – I

Q.2 Attempt Any Three. **09**

a) Find the double root of the equation $x^3 - 5.4x^2 + 9.24x - 5.096 = 0$ given that it is nearer to 1.5.

b) Solve the system of equations by Jacobi's iterative method (perform 3 iterations)
$27x + 6y - z = 85, \quad 6x + 15y + 2z = 72$
$x + y + 54z = 110$

c) Find positive real root of the equation $x \sin x + \cos x = 0$ using Newton-Raphson method correct to 3 decimal places.

d) Solve the system of equation by using Gauss-Elimination method.
$x + 4y - z = -5, \quad x + y - 6z = -12, \quad -3x - y - z = 4$

e) Evaluate the integral $\int_0^1 \frac{x^2}{1+x^3}\, dx$ using Simpson's $\frac{1}{3}rd$ rule Take $h = 0.25$

Q.3 Attempt Any Three. **09**

a) Use Trapezoidal Rule to compute $\int_0^1 \frac{1}{1+x^2} dx$ Take h as 0.5

b) Solve the integral $\int_0^{1/2} \frac{1}{\sqrt{1-x^2}} dx$ using Weddle's rule Taking $n = 6$

c) Solve by Gauss Seidel Method, the equations
$20x + y - 2z = 17, 3x + 20y - z = -18, 2x - 3y + 20z = 25$ Perform 3 iteration.

d) Find the value of $\sqrt{5}$ using newton's iterative formula. Perform 3 iteration.

e) Determine the largest Eigen value and corresponding Eigen vector of the matrix. $\begin{bmatrix} 5 & 4 \\ 1 & 2 \end{bmatrix}$ by using power method perform three iterations.

Q.4 Attempt Any Two. **10**

a) Perform 2-iteration by Newton's Raphson Method to Solve the non-linear equation.
$x = x^2 + y^2, y = x^2 - y^2$ Take initial approximation $x_0 = 0.8, y_0 = 0.4$

b) Solve the system of equation by LU decomposition Method
$3x + 2y + 7z = 4, \quad 2x + 3y + z = 5, \quad 3x + 4y + z = 7$

c) Use Romberg's method to compute $\int_0^1 \frac{1}{1+x^2} dx$ Take h as $0.5, 0.25, 0.125$

SECTION – II

Q.5 Attempt Any Three. **09**

a) Define membership function and fuzzy set.

b) Find I.B.F.S by using Hungarian method

Warehouse Factory	I	II	III	IV
A	15	14	12	16
B	23	22	25	24
C	31	34	32	33
D	21	32	44	53

c) If $A = \{(1, 0.2), (2, 0.4), (3, 0.8)\}$ and $B = \{(1, 0.5), (2, 0.6), (3, 0.7)\}$ find
- $A \cup B$
- $A \cap B$

d) Define the following terms:
i) Support of a fuzzy set
ii) Height of a fuzzy set
iii) Normalized fuzzy set

e) Evaluate the Following
i) $[1,3] + [5,8]$
ii) $[1,3] - [5,8]$
iii) $[1,3].[5,8]$
iv) $[1,3]/[5,8]$

Q.6 Attempt Any Three. **09**

a) Maximize $Z = 3x_1 + 2x_2$, subject to
$x_1 + x_2 \leq 4, \quad x_1 - x_2 \leq 2, \quad x_1, x_2 \geq 0$

b) Let $A = \{(x_1, 0.3), (x_2, 0.7)\}$ and $B = \{(x_1, 0.5), (x_2, 0.4)\}$
Find the fuzzy difference $A - B$

c) Solve the Assignment Problem

Tasks	E	F	G	H
A	18	26	17	11
B	13	28	14	26
C	38	19	18	15
D	19	26	24	10

d) Let A, B be the fuzzy sets defined on universal set $x = \{0, 1, 2, 3, 4, 5\}$ by the membership functions

$A(x) = \frac{5-x}{x+5}, \qquad B(x) = \frac{5-x}{5}, \forall x \in X$

verify $|A| + |B| = |A \cup B| + |A \cap B|$

e) Determine which of the following fuzzy sets qualify as a fuzzy number.

i) $A(x) = \begin{cases} \frac{1}{2}, & 0 \le x \le 1 \\ 0, & 0.\text{W.} \end{cases}$

ii) $B(x) = \begin{cases} \cos x, & 0 \le x \le \pi/2 \\ 0, & 0.\text{W.} \end{cases}$

Q.7 Attempt Any Two. **10**

a) Solve the Assignment Problem.

	Machine			
Job	A	B	C	D
1	18	24	28	32
2	8	13	17	19
3	10	15	19	22

b) State first decomposition theorem and find $f(A)$ where

$A(x) = \frac{0.7}{-5} + \frac{0.6}{-4} + \frac{1}{-3} + \frac{0.4}{-2} + \frac{0.45}{-1} + \frac{0.75}{0} + \frac{0.81}{1} + \frac{0.34}{2} + \frac{1}{3} + \frac{0.17}{4} + \frac{0.91}{5}$

$X = \{-5, -4, -3, -2, -1, 0, 1, 2, 3, 4, 5\}$

$F: x \to y$ defined by $f(x) = x^2$

c) Find $A + B$ for the following membership function:

$A(x) = \frac{x+1}{2} \qquad -1 < x \le 1$

$= \frac{3-x}{2} \qquad 1 < x < 3$

$= 0 \qquad$ otherwise

$B(x) = \frac{x-1}{2} \qquad 1 < x \le 3$

$= \frac{5-x}{2} \qquad 3 < x \le 5$

$= 0 \qquad$ otherwise

Seat No.	

Set **S**

S.Y. (B.Tech.) (Computer Science & Engineering) (Semester - II) (New) (CBCS) Examination: March/April – 2026
Applied Mathematics – II (BTN03401)

Day & Date: Friday, 29-05-2026 Max. Marks: 70
Time: 10:00 AM To 01:00 PM

Instructions: 1) Q. No. 1 is compulsory. It should be solved in the first 30 minutes in Answer Book Page no 03 (Starting page of the Answer Book). Each question carries one mark.
2) Don't forget to Mention question paper set (P/Q/R/S) on top of page.
3) Figure to the right indicate full marks.
4) Assume suitable data if necessary.

MCQ/Objective Type Questions

Duration: 30 Minutes Marks:14

Q.1 Choose the correct answer. **14**

1) The error in Simpson's 1/3rd rule is of order _____.
a) h^3 b) h^4
c) h^2 d) h

2) Power Method is used to find _____.
a) Smallest Eigen Value b) Largest Eigen Value
c) Positive Eigen Value d) Negative Eigen Value

3) To find the Numerically largest Eigen value using iterative method we use the equation _____.
a) $A = \lambda X$ b) $AX = X$
c) $X = \lambda X$ d) $AX = \lambda X$

4) A fuzzy set is a collection of objects with _____.
a) Clear boundary b) No boundary
c) Partial membership d) Both b) and c)

5) Fuzzy sets are generalizations of _____.
a) Crisp sets b) Classical sets
c) Both a) and b) d) None

6) The membership value of an element in a fuzzy set lies between _____.
a) 0 and 1 b) 0 and ∞
c) -1 and 1 d) Only 0 or 1

7) Which operation is used for the intersection of fuzzy sets?
a) Maximum b) Minimum
c) Addition d) Subtraction

8) A Linear Programming Problem (LPP) consists of _____.
a) An objective function b) Constraints
c) Non-negativity restrictions d) All of the above

9) The simplex method is used for solving _____.
a) Linear equations
b) Non-linear equations
c) Linear programming problems with more than two variables
d) None

10) A transcendental equation is an equation that involves _____.
a) Only algebraic terms
b) Only transcendental functions
c) Both algebraic and transcendental functions
d) Linear terms only

11) The interval in which a real root of the equation $x^3 - 2x - 5 = 0$ lies is _____.
a) $(1, 2)$ b) $(0, 1)$
c) $(2, 3)$ d) $(3, 4)$

12) The Gauss-Seidel method is used for solving _____.
a) Nonlinear equations
b) Systems of linear equations
c) Ordinary differential equations
d) Partial differential equations

13) Which of the following is a disadvantage of the Gauss-Jacobi method?
a) It converges faster than most direct methods
b) It requires a large number of iterations for a good approximation
c) It cannot be used for systems with more than two equations
d) It works only for symmetric systems

14) The use of Romberg's method is _____.
a) To solve simultaneous linear equation
b) To find root of linear equation
c) To evaluate definite integration
d) To find the Eigen values

Time: 03:00 PM To 06:00 PM

Instructions: 1) Q. No. 1 is compulsory. It should be solved in the first 30 minutes in answer book Page no 03 (Starring page of the Answer Book Each question carries one mark.
2) Don't forget to Mention question paper set (P/Q/R/S) on top of Page.
3) Figures to the right indicates full marks.

MCQ/Objective Type Questions

Duration: 30 Minutes Marks:14

Q.1 Choose the correct option from the following. **14**

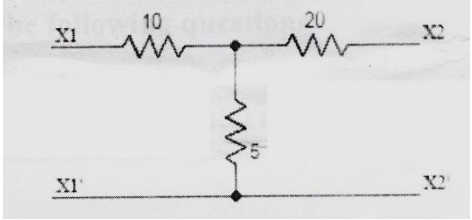
1) In Superposition theorem, while considering a source, all other current sources are?
a) short circuited b) change its position
c) open circuited d) removed from the circuit

2) The maximum power is delivered from a source to its load when the load resistance is _____ the source resistance.
a) greater than b) less than
c) equal to d) less than or equal to

3) As XL = XC in a series resonance circuit, the impedance is _____.
a) purely capacitive b) purely inductive
c) purely resistive d) capacitive and inductive

4) The magnification in resonance considering the voltage across inductor is?
a) V/VL b) VL/V
c) V x VL d) VL

5) In the circuit shown below, find the Z-parameter Z12.



a) 15 b) 10
c) 5 d) 1

6) In determining open circuit impedance parameters, among V1, V2, I1, I2, which of the following are independent variables?
a) I1 and V2 b) V1 and I2
c) I1 and I2 d) V1 and V2

7) The steady state part in the expression of current in the R-L circuit is?
a) (V/R)(exp(R/L)t)) b) (V/R)(-exp(R/L)t))
c) V/R d) R/V

8) The real part of the complex frequency is called?
a) radian frequency b) neper frequency
c) sampling frequency d) angular frequency

9) The transform impedance of the capacitor is?
a) C b) 1/C
c) sC d) 1/sC

10) The ratio of current transform at one port to current transform at other port is called?
a) Transfer admittance b) Transfer impedance
c) Current transfer ratio d) Voltage transfer ratio

11) If V_1 is the voltage at port 1 and V_2 is the voltage at port 2, then the attenuation in dB is?
a) 20 log10 (V_1/V_2) b) 10 log10 (V_1/V_2)
c) 20 log10 (V_2/V_1) d) 10 log10 (V_2/V_1)

12) A filter that passes frequencies between two designated cut-off frequencies and attenuates all other frequencies is called?
a) high pass filter b) band elimination filter
c) band pass filter d) low pass filter

13) In an R-C circuit, when the switch is closed, the response _____.
a) do not vary with time
b) decays with time
c) rises with time
d) first increases and then decreases

14) The nodal method of circuit analysis is based on _____.
a) KVL and Ohm's law b) KCL and Ohm's law
c) KCL, KVL d) KCL, KVL and Ohm's law

S.Y. (B.Tech.) (Electronics & Telecommunication Engineering) (Semester - I) (New) (NEP CBCS) Examination: March/April – 2026
Network Theory Analysis (ENTPCC-01)

Day & Date: Monday, 04-05-2026 Max. Marks: 56
Time: 03:00 PM To 06:00 PM

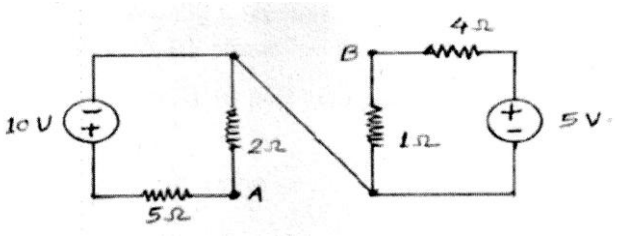
Instructions: 1) All questions are compulsory.
2) figure to right indicate full marks.

SECTION – I

Q.2 Answer Any Four of the following questions. **16**

a) State & prove Maximum power transfer theorem.

b) Determine Thevenin's equivalent circuit across terminals AB for given circuit as shown if Figure 1



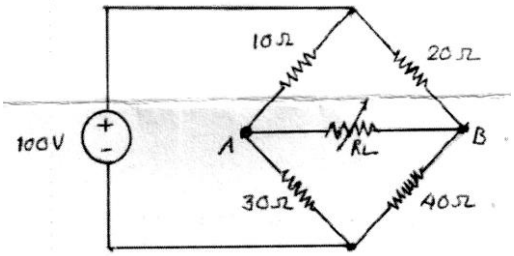
c) A series RLC circuit consists of $\mathrm{R} = 4\Omega, \mathrm{L} = 0.5\mathrm{H}$ & variable capacitance in series across a $100\mathrm{V}, 50\mathrm{Hz}$. Calculate
i) The capacitance to give resonance,
ii) The voltage across capacitor

d) For the T-network, derive:
i) Z parameters in terms of Circuit components.
ii) Circuit components in terms of Z parameters

e) Derive Y-parameter equations for the two-port network in terms of port voltage & currents.

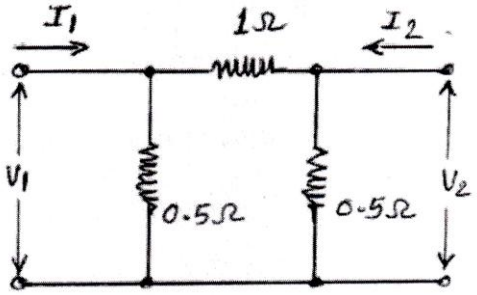
Q.3 Answer Any Two of the following questions. **12**

a) Determine the load resistance to receive maximum power from the source, also find the maximum power delivered to load in the network shown in Figure.



b) Derive the expression for frequency at which the voltage across Inductor will be maximum in series resonance circuit.

c) Determine the ABCD parameters for the π-network shown in Figure 4. Is this network bilateral or not?



SECTION – II

Q.4 Answer Any Four of the following questions. **16**

a) Explain DC response of series RL circuit?

b) For the give network function, draw pole zero plot and comment on stability.

$$F(s) = \frac{5(s+5)}{(s+2)(s+7)}$$

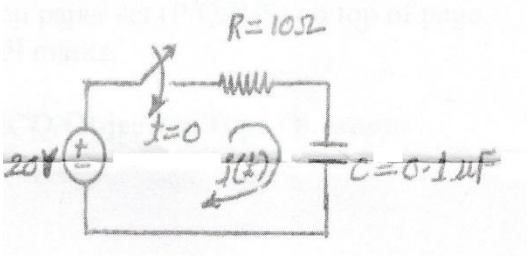
c) Design LPF with T section having cut-off frequency of 2 KHz to operate with a terminated load resistance of 500Ω.

d) What is the need for m-derived filter? Draw T section for m-derived LPF.

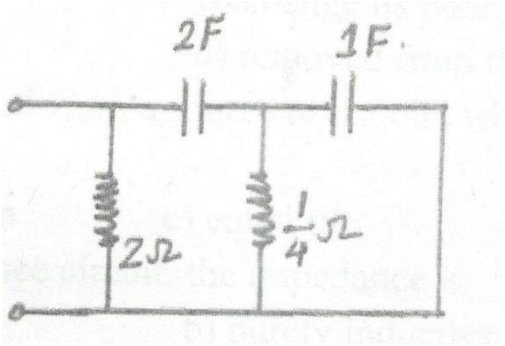
e) Design a T-pad attenuator to give an attenuation of 60dB and to work in line with 500Ω resistance.

Q.5 Answer Any Two of the following questions. **12**

a) A series RC circuit consists of $R = 10\Omega$ and $C = 0.1\mu F$ shown in figures. Initially the switch is kept open for very long time. At $t = 0$ switch is closed. Find the expressions for voltages across C and R expression for current through C.



b) Determine the driving point impedance and driving point admittance for the given network in Figure.



c) Design a m-derived LPF T and π section with a cut off frequency of 1.5 KHz, design impedance of 500Ω and resonant frequency is 1600 Hz.

Day & Date: Monday, 04-05-2026 Max. Marks: 56
Time: 03:00 PM To 06:00 PM

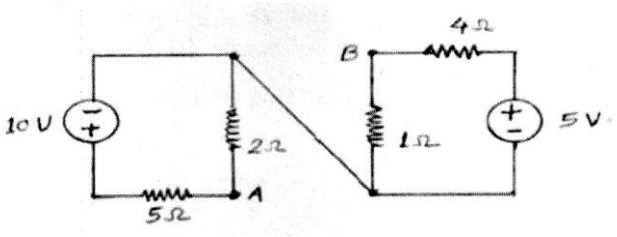
Instructions: 1) All questions are compulsory.
2) figure to right indicate full marks.

SECTION – I

Q.2 Answer Any Four of the following questions. **16**

a) State & prove Maximum power transfer theorem.

b) Determine Thevenin's equivalent circuit across terminals AB for given circuit as shown if Figure 1



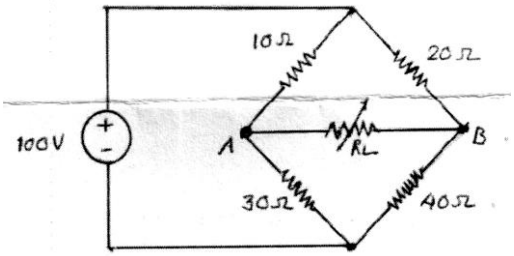
c) A series RLC circuit consists of $\mathrm{R} = 4\Omega, \mathrm{L} = 0.5\mathrm{H}$ & variable capacitance in series across a $100\mathrm{V}, 50\mathrm{Hz}$. Calculate
i) The capacitance to give resonance,
ii) The voltage across capacitor

d) For the T-network, derive:
i) Z parameters in terms of Circuit components.
ii) Circuit components in terms of Z parameters

e) Derive Y-parameter equations for the two-port network in terms of port voltage & currents.

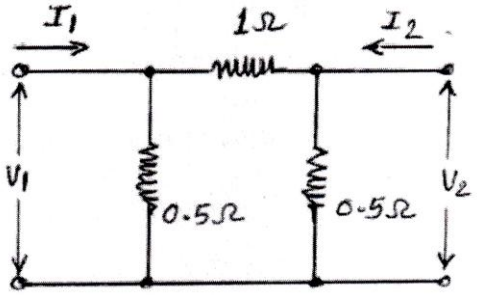
Q.3 Answer Any Two of the following questions. **12**

a) Determine the load resistance to receive maximum power from the source, also find the maximum power delivered to load in the network shown in Figure.



b) Derive the expression for frequency at which the voltage across Inductor will be maximum in series resonance circuit.

c) Determine the ABCD parameters for the π-network shown in Figure 4. Is this network bilateral or not?



SECTION – II

Q.4 Answer Any Four of the following questions. **16**

a) Explain DC response of series RL circuit?

b) For the give network function, draw pole zero plot and comment on stability.

$$F(s) = \frac{5(s+5)}{(s+2)(s+7)}$$

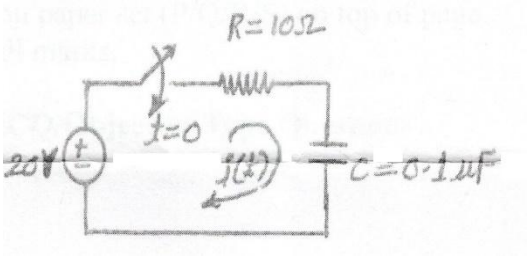
c) Design LPF with T section having cut-off frequency of 2 KHz to operate with a terminated load resistance of 500Ω.

d) What is the need for m-derived filter? Draw T section for m-derived LPF.

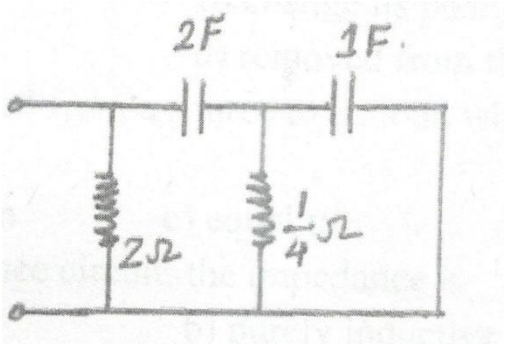
e) Design a T-pad attenuator to give an attenuation of 60dB and to work in line with 500Ω resistance.

Q.5 Answer Any Two of the following questions. **12**

a) A series RC circuit consists of $R = 10\Omega$ and $C = 0.1\mu F$ shown in figures. Initially the switch is kept open for very long time. At $t = 0$ switch is closed. Find the expressions for voltages across C and R expression for current through C.



b) Determine the driving point impedance and driving point admittance for the given network in Figure.



c) Design a m-derived LPF T and π section with a cut off frequency of 1.5 KHz, design impedance of 500Ω and resonant frequency is 1600 Hz.

S.Y. (B.Tech.) (Electronics & Telecommunication Engineering) (Semester - I) (New) (NEP CBCS) Examination: March/April - 2026
Network Theory Analysis (ENTPCC-01)

Day & Date: Monday, 04-05-2026 Max. Marks: 70
Time: 03:00 PM To 06:00 PM

Instructions: 1) Q. No. 1 is compulsory. It should be solved in the first 30 minutes in answer book Page no 03 (Starring page of the Answer Book Each question carries one mark.
2) Don't forget to Mention question paper set (P/Q/R/S) on top of Page.
3) Figures to the right indicates full marks.

MCQ/Objective Type Questions

Duration: 30 Minutes Marks:14

Q.1 Choose the correct option from the following. **14**

1) If V_1 is the voltage at port 1 and V_2 is the voltage at port 2, then the attenuation in dB is?
a) 20 log10 (V_1/V_2) b) 10 log10 (V_1/V_2)
c) 20 log10 (V_2/V_1) d) 10 log10 (V_2/V_1)

2) A filter that passes frequencies between two designated cut-off frequencies and attenuates all other frequencies is called?
a) high pass filter b) band elimination filter
c) band pass filter d) low pass filter

3) In an R-C circuit, when the switch is closed, the response _____.
a) do not vary with time
b) decays with time
c) rises with time
d) first increases and then decreases

4) The nodal method of circuit analysis is based on _____.
a) KVL and Ohm's law b) KCL and Ohm's law
c) KCL, KVL d) KCL, KVL and Ohm's law

5) In Superposition theorem, while considering a source, all other current sources are?
a) short circuited b) change its position
c) open circuited d) removed from the circuit

6) The maximum power is delivered from a source to its load when the load resistance is _____ the source resistance.
a) greater than b) less than
c) equal to d) less than or equal to

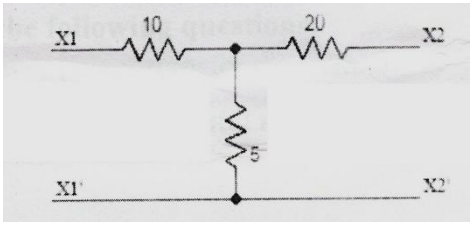
7) As XL = XC in a series resonance circuit, the impedance is _____.

a) purely capacitive
b) purely inductive
c) purely resistive
d) capacitive and inductive

8) The magnification in resonance considering the voltage across inductor is?

a) V/VL
b) VL/V
c) V x VL
d) VL

9) In the circuit shown below, find the Z-parameter Z12.



a) 15
b) 10
c) 5
d) 1

10) In determining open circuit impedance parameters, among V1, V2, I1, I2, which of the following are independent variables?

a) I1 and V2
b) V1 and I2
c) I1 and I2
d) V1 and V2

11) The steady state part in the expression of current in the R-L circuit is?

a) (V/R)(exp(R/L)t))
b) (V/R)(-exp(R/L)t))
c) V/R
d) R/V

12) The real part of the complex frequency is called?

a) radian frequency
b) neper frequency
c) sampling frequency
d) angular frequency

13) The transform impedance of the capacitor is?

a) C
b) 1/C
c) sC
d) 1/sC

14) The ratio of current transform at one port to current transform at other port is called?

a) Transfer admittance
b) Transfer impedance
c) Current transfer ratio
d) Voltage transfer ratio

MCQ/Objective Type Questions

Duration: 30 Minutes Marks:14

Q.1 Multiple choice question. **14**

1) The basic components used in voltage multiplier circuits are _____.
a) Resistors and inductors b) Diodes and capacitors
c) Transistors and transformers d) Op-amps and resistors

2) The ripple frequency of a full-wave voltage doubler output is _____.
a) Same as input frequency b) Twice the input frequency
c) Half the input frequency d) Independent of frequency

3) Which of the following is not a type of clipper?
a) Series clipper b) Parallel clipper
c) Biased clipper d) Regulated clipper

4) When the diode in a clipper is Silicon and forward-biased, its voltage drop is _____.
a) 0V b) 0.3V
c) 0.7V d) 1V

5) The Transformer Utilization Factor (TUF) of a Centre tapped full wave rectifier is approximately _____.
a) 0.287 b) 0.693
c) 0.812 d) 1.0

6) The main disadvantage of a half-wave rectifier is _____.
a) High efficiency
b) Low ripple factor
c) Low efficiency and high ripple
d) Requires transformer center tap

7) The main function of a Zener diode in a voltage regulator circuit is to _____.
   a) Act as a variable resistor
   b) Maintain a constant output voltage
   c) Convert AC to DC
   d) Amplify the signal

8) How do we calculate V_1 in a two - port network?
   a) $V_1 = h_{21}I_2 + h_{22}V_2$
   b) $V_1 = h_{11}I_1 + h_{12}V_2$
   c) $V_1 = h_{11}I_2 + h_{12}V_2$
   d) $V_1 = h_{21}I_1 + h_{22}V_2$

9) Which capacitor is used to block DC portion by allowing to pass only AC portion of the amplified signal to load?
   a) Input Coupling Capacitor
   b) Bypass Capacitor
   c) Output Coupling Capacitor
   d) Both coupling and bypass capacitor

10) If a BJT is to be used as an amplifier, then it must operate in _____.
   a) Cut-off mode
   b) Active mode
   c) Saturation mode
   d) All of the mentioned

11) A feedback circuit usually employs which type of circuit?
   a) Resistive
   b) Inductive
   c) Capacitive
   d) Shunt

12) Negative feedback in amplifier _____.
   a) Improves the signal-to-noise ratio at input
   b) Increases the voltage gain
   c) Does not improve the signal-to-noise ratio at I/O
   d) Reduce Distortion

13) The gate voltage in a JFET at which drain current becomes zero is called _____ Voltage.
   a) saturation
   b) pinch-off
   c) active
   d) cut-off

14) A MOSFET can be operated with _____.
   a) negative gate voltage only
   b) positive gate voltage only
   c) positive as well as negative gate voltage
   d) None of the above

3) Assume suitable data if required.
4) Use of calculator and electronic component datasheet is allowed.

SECTION – I

Q.2 Attempt Any Four of the following. **16**

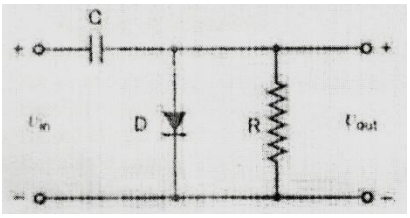
a) Explain voltage multiplier circuit with the help of circuit diagram.

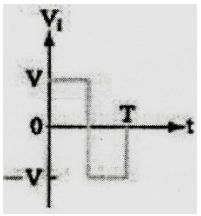
b) What is a voltage regulator? Explain the application of Zener diode as a voltage regulator.

c) Explain combinational clipper circuit with the help of circuit diagram, signal waveforms and transfer function.

d) Derive the expression for Ripple factor of LC filter.

e) Draw and explain the output waveform across load in following circuit. Input voltage waveform is a square wave as shown below. Assume V=10Volts. Assume diode to be an ideal diode.





Q.3 Attempt Any Two of the following. **12**

a) Design DC unregulated power supply using inductor filter to provide 100V DC output voltage across 500Ω with peak ripple not exceeding 10V. Use center tapped full wave rectifier.

b) For the given Zener regulator circuit (Refer fig. 1) Determine VL, VRS, IZ and PZ. Given Vs = 15.5V, Vz = 10V, Rs = 1.2K, RL = 3K, PZM = 30mW.

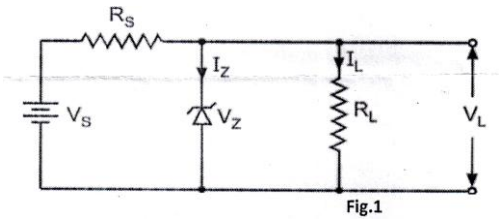


Fig.1

c) List out various performance parameters of Bridge full wave rectifier and center tapped full rectifier. Highlight and comment on the differences between them.

SECTION – II

Q.4 Attempt Any Four of the following. **16**

a) Obtain H-parameter model & define H parameters for transistor in CB circuit configuration.

b) Input resistance increases and output resistance decreases, prove this sentence for negative feedback amplifier.

c) Explain working and drain characteristics of N channel JFET.

d) Explain VI characteristics of CE configuration of BJT.

e) Write a short note on CMOS.

Q.5 Attempt Any Two of the following. **12**

a) Design a single stage CE amplifier to provide an output voltage of 6Vp-p across a $5K\Omega$ load. Assume source resistor of 600Ω, supply voltage = 12V, Lower 3dB frequency of 60Hz. Select transistor BC146 with P_d max = 50mW, V_{CE} max = 20V, hfe = 80.

b) Describe the effect of negative feedback on gain stability, bandwidth, noise, and distortion, input & output resistance of feedback amplifier.

c) Explain the effect of V_{GS} and V_{DS} on Channel conductivity and Drain current I_D.

a) Improves the signal-to-noise ratio at input
b) Increases the voltage gain
c) Does not improve the signal-to-noise ratio at I/O
d) Reduce Distortion

3) The gate voltage in a JFET at which drain current becomes zero is called _____ Voltage.
a) saturation b) pinch-off
c) active d) cut-off

4) A MOSFET can be operated with _____.
a) negative gate voltage only
b) positive gate voltage only
c) positive as well as negative gate voltage
d) None of the above

5) The basic components used in voltage multiplier circuits are _____.
a) Resistors and inductors b) Diodes and capacitors
c) Transistors and transformers d) Op-amps and resistors

6) The ripple frequency of a full-wave voltage doubler output is _____.
a) Same as input frequency b) Twice the input frequency
c) Half the input frequency d) Independent of frequency

7) Which of the following is not a type of clipper?
a) Series clipper
b) Parallel clipper
c) Biased clipper
d) Regulated clipper

8) When the diode in a clipper is Silicon and forward-biased, its voltage drop is _____.
a) 0V
b) 0.3V
c) 0.7V
d) 1V

9) The Transformer Utilization Factor (TUF) of a Centre tapped full wave rectifier is approximately _____.
a) 0.287
b) 0.693
c) 0.812
d) 1.0

10) The main disadvantage of a half-wave rectifier is _____.
a) High efficiency
b) Low ripple factor
c) Low efficiency and high ripple
d) Requires transformer center tap

11) The main function of a Zener diode in a voltage regulator circuit is to _____.
a) Act as a variable resistor
b) Maintain a constant output voltage
c) Convert AC to DC
d) Amplify the signal

12) How do we calculate V_1 in a two - port network?
a) $V_1 = h_{21}I_2 + h_{22}V_2$
b) $V_1 = h_{11}I_1 + h_{12}V_2$
c) $V_1 = h_{11}I_2 + h_{12}V_2$
d) $V_1 = h_{21}I_1 + h_{22}V_2$

13) Which capacitor is used to block DC portion by allowing to pass only AC portion of the amplified signal to load?
a) Input Coupling Capacitor
b) Bypass Capacitor
c) Output Coupling Capacitor
d) Both coupling and bypass capacitor

14) If a BJT is to be used as an amplifier, then it must operate in _____.
a) Cut-off mode
b) Active mode
c) Saturation mode
d) All of the mentioned

Set **R**

S.Y. (B.Tech.) (Electronics & Telecommunication Engineering) (Semester - I) (New) (NEP CBCS) Examination: March/April – 2026
Electronics Circuit Analysis & Design (ENTPCC-02)

Day & Date: Wednesday, 06-05-2026 Max. Marks: 56
Time: 03:00 PM To 06:00 PM

Instructions: 1) All questions are compulsory.
2) Figures to the right indicate full marks.
3) Assume suitable data if required.
4) Use of calculator and electronic component datasheet is allowed.

SECTION – I

Q.2 Attempt Any Four of the following. **16**

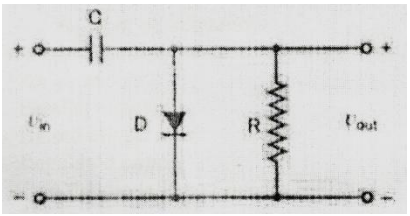
a) Explain voltage multiplier circuit with the help of circuit diagram.

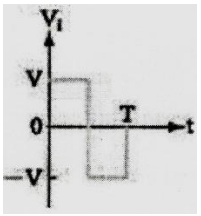
b) What is a voltage regulator? Explain the application of Zener diode as a voltage regulator.

c) Explain combinational clipper circuit with the help of circuit diagram, signal waveforms and transfer function.

d) Derive the expression for Ripple factor of LC filter.

e) Draw and explain the output waveform across load in following circuit. Input voltage waveform is a square wave as shown below. Assume V=10Volts. Assume diode to be an ideal diode.





Q.3 Attempt Any Two of the following. **12**

a) Design DC unregulated power supply using inductor filter to provide 100V DC output voltage across 500Ω with peak ripple not exceeding 10V. Use center tapped full wave rectifier.

b) For the given Zener regulator circuit (Refer fig. 1) Determine VL, VRS, IZ and PZ. Given Vs = 15.5V, Vz = 10V, Rs = 1.2K, RL = 3K, PZM = 30mW.

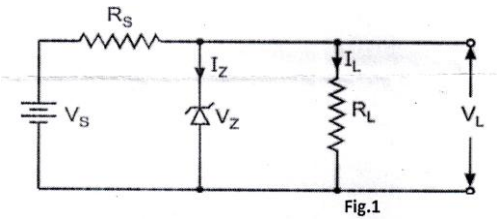


Fig.1

c) List out various performance parameters of Bridge full wave rectifier and center tapped full rectifier. Highlight and comment on the differences between them.

SECTION – II

Q.4 Attempt Any Four of the following. **16**

a) Obtain H-parameter model & define H parameters for transistor in CB circuit configuration.

b) Input resistance increases and output resistance decreases, prove this sentence for negative feedback amplifier.

c) Explain working and drain characteristics of N channel JFET.

d) Explain VI characteristics of CE configuration of BJT.

e) Write a short note on CMOS.

Q.5 Attempt Any Two of the following. **12**

a) Design a single stage CE amplifier to provide an output voltage of 6Vp-p across a $5K\Omega$ load. Assume source resistor of 600Ω, supply voltage = 12V, Lower 3dB frequency of 60Hz. Select transistor BC146 with P_d max = 50mW, V_{CE} max = 20V, hfe = 80.

b) Describe the effect of negative feedback on gain stability, bandwidth, noise, and distortion, input & output resistance of feedback amplifier.

c) Explain the effect of V_{GS} and V_{DS} on Channel conductivity and Drain current I_D.

Day & Date: Wednesday, 06-05-2026 Max. Marks: 70
Time: 03:00 PM To 06:00 PM

Instructions: 1) Q. No. 1 is compulsory. It should be solved in the first 30 minutes in Answer Book Page no 03 (Starting page of the Answer Book). Each question carries one mark.
2) Don't forget to Mention question paper set (P/Q/R/S) on top of page.
3) Figure to the right indicates full marks.
4) Assume suitable data if required.
5) Use of calculator and electronic component datasheet is allowed.

MCQ/Objective Type Questions

Duration: 30 Minutes Marks:14

Q.1 Multiple choice question. **14**

1) The main disadvantage of a half-wave rectifier is _____.
a) High efficiency
b) Low ripple factor
c) Low efficiency and high ripple
d) Requires transformer center tap

2) The main function of a Zener diode in a voltage regulator circuit is to _____.
a) Act as a variable resistor
b) Maintain a constant output voltage
c) Convert AC to DC
d) Amplify the signal

3) How do we calculate V_1 in a two - port network?
a) $V_1 = h_{21}I_2 + h_{22}V_2$ b) $V_1 = h_{11}I_1 + h_{12}V_2$
c) $V_1 = h_{11}I_2 + h_{12}V_2$ d) $V_1 = h_{21}I_1 + h_{22}V_2$

4) Which capacitor is used to block DC portion by allowing to pass only AC portion of the amplified signal to load?
a) Input Coupling Capacitor
b) Bypass Capacitor
c) Output Coupling Capacitor
d) Both coupling and bypass capacitor

5) If a BJT is to be used as an amplifier, then it must operate in _____.
a) Cut-off mode b) Active mode
c) Saturation mode d) All of the mentioned

6) A feedback circuit usually employs which type of circuit?
a) Resistive b) Inductive
c) Capacitive d) Shunt

7) Negative feedback in amplifier _____.
a) Improves the signal-to-noise ratio at input
b) Increases the voltage gain
c) Does not improve the signal-to-noise ratio at I/O
d) Reduce Distortion

8) The gate voltage in a JFET at which drain current becomes zero is called _____ Voltage.
a) saturation b) pinch-off
c) active d) cut-off

9) A MOSFET can be operated with _____.
a) negative gate voltage only
b) positive gate voltage only
c) positive as well as negative gate voltage
d) None of the above

10) The basic components used in voltage multiplier circuits are _____.
a) Resistors and inductors b) Diodes and capacitors
c) Transistors and transformers d) Op-amps and resistors

11) The ripple frequency of a full-wave voltage doubler output is _____.
a) Same as input frequency b) Twice the input frequency
c) Half the input frequency d) Independent of frequency

4) Use of non-programmable calculator is allowed.

MCQ/Objective Type Questions

Duration: 30 Minutes Marks:14

Q.1 Choose the correct Answer. **14**

1) TRF receiver does not have _____.
a) Mixer and Local oscillator b) IF block
c) Speaker d) None

2) Selectivity is measure of _____.
a) Tunning and Detunning b) Image Freq
c) Noise d) None

3) Image frequency is _____.
a) Spurious b) Useful and required
c) Noise d) None

4) In AM Automatic Gain Control is derived from _____.
a) Diode Detector b) Local Oscillator
c) IF amp d) None

5) Transmission of FM is _____.
a) Limited to line of sight b) Goes beyond line of sight
c) Limited to few meters d) None above

6) Modulation index in AM is given by _____.
a) Delta/FM b) Delta x FM
c) Vm/Vc d) None

7) Function of balanced modulator is _____.
a) To remove carrier b) Side band suppression
c) To reduce bandwidth d) None of these

8) The maximum value of H is reached for two messages when its probability is _____.

a) $P = {}^{1}/_{2}$ b) $P = 1$

c) $P = 0$ d) $P = 2$

9) Granular noise is associated with _____.

a) PCM b) DM

c) DPCM d) QAM

10) The main disadvantage of PCM is _____.

a) Large bandwidth b) Large power

c) Complex circuitry d) Quantization noise

11) The weight of the code word 1101010 is _____.

a) 2 b) 3

c) 4 d) 7

12) _____ most affected by noise.

a) PSK b) ASK

c) FSK d) MSK

13) Advantage of VSB is _____.

a) More Band width b) Band width saving

c) Power saving d) None

14) Quantization noise can be reduced by using _____.

a) Filters

b) Limiters

c) Increasing quantization levels

d) None

Set **P**

S.Y. (B.Tech.) (Electronics & Telecommunication Engineering) (Semester - I) (New) (NEP CBCS) Examination: March/April – 2026
Analog and Digital Communication (ENTPCC-03)

Day & Date: Friday, 08-05-2026 Max. Marks: 56
Time: 03:00 PM To 06:00 PM

Instructions: 1) All questions are compulsory.
2) Figures to the right indicate full marks.
3) Use of non-programmable calculator is allowed.

SECTION – I

Q.2 Attempt the following. (Any Four) **16**

a) What is Independent Side Band? What are its advantages? Comment on SSB. How much power will be saved with SSB for 100 percent modulation.

b) Calculate image frequency and its rejection for a broadcast superheterodyne receiver with loaded Q 50 and image frequency of 455 kHz at frequency of 1 MHz.

c) When the modulation percentage is 75 An AM transmitter produces 10 kw, how much of this is carrier power? Would be the percentage power saving if the carrier and one of the sidebands were suppressed before transmission took place?

d) What is noise explain different types of noises.

e) For the wave represented by $v = 10\ \sin(10^8 t + 3\ \sin 10^4 t)$ Calculate carrier, modulating frequencies, modulation index and power dissipated in 100 ohm.

Q.3 Attempt the following. (Any Two) **12**

a) Explain Ratio detector.

b) Explain principle of non linearity.

c) A 1000kHz carrier is simultaneously modulated with 500Hz, 800Hz and 1 kHz audio sine waves what will be the frequencies present in the output. Find bandwidth in each case.

SECTION – II

Q.4 Attempt the following. (Any Four) **16**

a) Compare different digital modulation techniques.

b) Define entropy. Prove that the entropy is maximum when all the messages are equiprobable.

c) With suitable block diagram explain PSK transmitter and receiver.

d) Explain concept of rate of information. What is its significance? Why it is useful?
Apply Shannon Fano coding procedure for below messages. Also find efficiency and redundancy.
[X] = [x1, x2, x3, x4, x5, x6, x7]
[P(X)] = [0.4, 0.2, 0.12, 0.08, 0.08, 0.08, 0.04]

e) Explain quantization error. How signal to noise ratio can be improved with the help of a non-uniform quantization?

Q.5 Attempt the following. (Any Two) **12**

a) Draw, explain and compare coherent and non coherent FSK detection.

b) For the (6,3) Block code the generator matrix is given below:

$$G = \begin{matrix} 1 & 0 & 0 & 1 & 1 & 0 \\ 0 & 1 & 0 & 0 & 1 & 1 \\ 0 & 0 & 1 & 1 & 1 & 1 \end{matrix}$$

Find all the code vectors, error correction and detection capability.

c) What are the limitations of delta modulation? How are they overcome in adaptive delta modulation.

Seat No.

4) Use of non-programmable calculator is allowed.

MCQ/Objective Type Questions

Duration: 30 Minutes Marks:14

Q.1 Choose the correct Answer. **14**

1) Modulation index in AM is given by _____.
a) Delta/FM b) Delta x FM
c) Vm/Vc d) None

2) Function of balanced modulator is _____.
a) To remove carrier b) Side band suppression
c) To reduce bandwidth d) None of these

3) The maximum value of H is reached for two messages when its probability is _____.
a) $P = {}^{1}/_{2}$ b) $P = 1$
c) $P = 0$ d) $P = 2$

4) Granular noise is associated with _____.
a) PCM b) DM
c) DPCM d) QAM

5) The main disadvantage of PCM is _____.
a) Large bandwidth b) Large power
c) Complex circuitry d) Quantization noise

6) The weight of the code word 1101010 is _____.
a) 2 b) 3
c) 4 d) 7

7) _____ most affected by noise.
a) PSK b) ASK
c) FSK d) MSK

8) Advantage of VSB is _____.
a) More Band width
b) Band width saving
c) Power saving
d) None

9) Quantization noise can be reduced by using _____.
a) Filters
b) Limiters
c) Increasing quantization levels
d) None

10) TRF receiver does not have _____.
a) Mixer and Local oscillator
b) IF block
c) Speaker
d) None

11) Selectivity is measure of _____.
a) Tunning and Detunning
b) Image Freq
c) Noise
d) None

12) Image frequency is _____.
a) Spurious
b) Useful and required
c) Noise
d) None

13) In AM Automatic Gain Control is derived from _____.
a) Diode Detector
b) Local Oscillator
c) IF amp
d) None

14) Transmission of FM is _____.
a) Limited to line of sight
b) Goes beyond line of sight
c) Limited to few meters
d) None above

Set **S**

S.Y. (B.Tech.) (Electronics & Telecommunication Engineering) (Semester - I) (New) (NEP CBCS) Examination: March/April – 2026
Analog and Digital Communication (ENTPCC-03)

Day & Date: Friday, 08-05-2026 Max. Marks: 56
Time: 03:00 PM To 06:00 PM

Instructions: 1) All questions are compulsory.
2) Figures to the right indicate full marks.
3) Use of non-programmable calculator is allowed.

SECTION – I

Q.2 Attempt the following. (Any Four) **16**

a) What is Independent Side Band? What are its advantages? Comment on SSB. How much power will be saved with SSB for 100 percent modulation.

b) Calculate image frequency and its rejection for a broadcast superheterodyne receiver with loaded Q 50 and image frequency of 455 kHz at frequency of 1 MHz.

c) When the modulation percentage is 75 An AM transmitter produces 10 kw, how much of this is carrier power? Would be the percentage power saving if the carrier and one of the sidebands were suppressed before transmission took place?

d) What is noise explain different types of noises.

e) For the wave represented by $v = 10\ \sin(10^8 t + 3\ \sin 10^4 t)$ Calculate carrier, modulating frequencies, modulation index and power dissipated in 100 ohm.

Q.3 Attempt the following. (Any Two) **12**

a) Explain Ratio detector.

b) Explain principle of non linearity.

c) A 1000kHz carrier is simultaneously modulated with 500Hz, 800Hz and 1 kHz audio sine waves what will be the frequencies present in the output. Find bandwidth in each case.

SECTION – II

Q.4 Attempt the following. (Any Four) **16**

a) Compare different digital modulation techniques.

b) Define entropy. Prove that the entropy is maximum when all the messages are equiprobable.

c) With suitable block diagram explain PSK transmitter and receiver.

d) Explain concept of rate of information. What is its significance? Why it is useful?
Apply Shannon Fano coding procedure for below messages. Also find efficiency and redundancy.
[X] = [x1, x2, x3, x4, x5, x6, x7]
[P(X)] = [0.4, 0.2, 0.12, 0.08, 0.08, 0.08, 0.04]

e) Explain quantization error. How signal to noise ratio can be improved with the help of a non-uniform quantization?

Q.5 Attempt the following. (Any Two) **12**

a) Draw, explain and compare coherent and non coherent FSK detection.

b) For the (6,3) Block code the generator matrix is given below:

$$G = \begin{matrix} 1 & 0 & 0 & 1 & 1 & 0 \\ 0 & 1 & 0 & 0 & 1 & 1 \\ 0 & 0 & 1 & 1 & 1 & 1 \end{matrix}$$

Find all the code vectors, error correction and detection capability.

c) What are the limitations of delta modulation? How are they overcome in adaptive delta modulation.

Set P

S.Y. (B.Tech.) (Electronics & Telecommunication Engineering) (Semester - I) (New) (NEP CBCS) Examination: March/April-2026
Advanced Mathematics and Statistics (OE-01A)

Day & Date: Monday, 11-05-2026 Max. Marks: 70
Time: 03:00 PM To 06:00 PM

Instructions: 1) Q. No. 1 is compulsory. It should be solved in the first 30 minutes in Answer Book Page no 03 (Starting page of the Answer Book). Each question carries one mark.
2) Don't forget to Mention question paper set (P/Q/R/S) on top of page.
3) Figures to the right indicates full marks.

MCQ/Objective Type Questions

Duration: 30 Minutes Marks: 14

Q.1 Choose the correct alternative from the given option. 14

1) If a linear differential equation with constant coefficients and r.h.s. equal to zero has a real root m_1 repeated two times, then the corresponding part of the integral is _____.

a) $(c_1 + c_2)e^{m_1 x}$ b) $(c_1 x + c_2 x)e^{m_1 x}$

c) $(c_1 x + c_2 x^2)e^{m_1 x}$ d) $(c_1 + c_2 x)e^{m_1 x}$

2) $\frac{1}{D-a} X$ is equal to _____.

a) $\int Xe^{ax}dx$ b) $e^{ax}\int X.e^{-ax}dx$

c) $\int Xe^{-ax}dx$ d) $e^{-ax}\int Xe^{-ax}dx$

3) $\frac{1}{D+1}(\log x + \frac{1}{x})$ is equal to _____.

a) e^x b) 1

c) x d) $\log x$

4) The solution of the equation $\sqrt{p} + \sqrt{q} = 1$ is _____.

a) $z = ax + ay + c$ b) $z = ax + a^2 y + c$

c) $z = ax + \left(1 - \sqrt{a}\right)^2 y + c$ d) None of these

5) The solution of $p + q = 1$ is _____.

a) $z = ax + (1 - a)y + c$ b) $z = ax + by + c$

c) $z = ax + b(1 - y) + c$ d) $z = a(1 - x) + b(1 - y) + c$

6) If μ_1', μ_2', μ_3' are the first three moments of the distribution about certain number then third moment μ_3 of the distribution about the arithmetic mean is given by _____.

a) $\mu_3' - 3\mu_2'\mu_1' + 2(\mu_1')^3$ b) $\mu_3' - 3\mu_1' + (\mu_2')^3$

c) $\mu_3' + 2\mu_2'\mu_1' + (\mu_3')^3$ d) $\mu_3' + 3\mu_2'\mu_1' + {\mu_1'}^2$

7) Coefficient of kurtosis β_1 is given by _____.

a) $\frac{\mu_4}{\mu_3}$ b) $\frac{\mu_4}{\mu_2^2}$

c) $\frac{\mu_3^2}{\mu_2^3}$ d) $\frac{\mu_4}{\mu_2^3}$

8) If value of x for normal distribution is 35, mean of normal distribution is 65 and standard deviation is 25 then standardized random variable is _____.

a) -1.5 b) -1.7

c) -1.2 d) -4

9) A continuous random variable has the following probability density function $f(x) = kx(1-x), 0 \leq x \leq 1$ then $k =$ _____.

a) 2 b) 6

c) 3 d) 5

10) The area under the standard normal curve from $z = -\infty$ to $z = 0$ is _____.

a) 1 b) $1/2$

c) $3/2$ d) 0

11) If X, Y denote the deviation from their means and if $\sum X^2 = 80, \sum Y^2 = 50$ & $\sum XY = 60$ and $r =$_____.

a) 0.65 b) 0.78

c) 0.81 d) 0.95

12) If two regression lines are co-incides then the coefficient of correlation is _____.

a) 0 b) -1

c) ± 1 d) 1

13) If $\bar{x}$ is the mean of the random sample of size n taken from a population of size N having mean μ and standard deviation σ then mean and variance of the distribution $\bar{x}$ are _____.

a) $\bar{x}, \sigma^2$

b) $\bar{x}, \frac{\sigma^2}{n}$

c) μ, σ^2

d) μ, and $\frac{\sigma^2}{n}$

14) χ^2 distribution is defined by _____.

a) $\sum \frac{(O-E)}{E}$

b) $\sum \frac{(O-E)}{E^2}$

c) $\sum \left(\frac{O-E}{E}\right)^2$

d) $\sum \frac{(O-E)^2}{E}$

Set P

S.Y. (B.Tech.) (Electronics & Telecommunication Engineering) (Semester - I) (New) (NEP CBCS) Examination: March/April-2026
Advanced Mathematics and Statistics (OE-01A)

Day & Date: Monday, 11-05-2026 Max. Marks: 56
Time: 03:00 PM To 06:00 PM

Instructions: 1) All question are compulsory.
2) Figures to the right indicate full marks.

SECTION – I

Q.2 Attempt Any Three. **09**

a) Find the Arithmetic mean, Median and standard deviation for the following frequency distribution.

x:	5	9	12	15	20	24	30	35	42	49
f:	3	6	8	8	9	10	8	7	6	2

b) Solve: $(D^2+1)y = x^2\cos 3x$

c) Solve: $(D^2-4D+4)y = 8.x^2e^{2x}\sin 2x$

d) Calculate the first four moments about the mean of the given distribution. Also find β_1, β_2

x	2.0	2.5	3.0	3.5	4.0	4.5	5.0
f	4	36	60	90	70	40	10

e) Solve $yzp + 2xq = xy$

Q.3 Attempt Any Three. **09**

a) Solve $\frac{d^2y}{dx^2} + 3\frac{dy}{dx} + 2y = 2e^{2x}$

b) Solve $p - q = x^2 + y^2$

c) Find the median of the following frequency distribution.

x	1	3	5	7	9	11	13	15	17
f	3	6	8	12	16	16	15	10	5

d) Solve $x(y-z)p + y(z-x)q = z(x-y)$

e) Solve $(D^3 - 3D + 2)y = x$

Q.4 Attempt Any Two. **10**

a) The first four moments of a distribution about the value 5 are $2, 20, 40$ and 50, from the given information obtain the first four central moments, Standard deviation and coefficient of skewness and kurtosis.

b) Solve the following differential equations by method of separation of variables.

$$3\frac{\partial u}{\partial x} + 2\frac{\partial u}{\partial y} = 0, \text{ given } u(x, 0) = 4e^{-x}$$

c) Solve $\frac{d^2y}{dx^2} + 3\frac{dy}{dx} + 2y = e^{e^x}$

SECTION – II

Q.5 Attempt Any Three. **09**

a) Find the value of k if each of the following functions is a probability density function.

$$f(x) = \begin{cases} kx^2(1 - x^3) & , \quad 0 \leq x \leq 1 \\ 0 & , \quad \text{otherwise} \end{cases}$$

b) The mean life time of 100 fluorescent light bulbs produced by a Company is computed to be 1570 Hrs. with S.D. of 120 Hrs. If μ is the mean lifetime of all the bulbs produced by the Company, Test the Hypothesis $\mu = 1600$ Hrs. against the alternative Hypothesis $\mu \neq 1600$ Hrs. using 5% level of Significance.
(Given Expected value at 5% LOS is 1.96)

c) Fit a Straight line $y = a + bx$ to the following data.

x	0	5	10	15	20	25
y	12	15	17	22	24	30

d) Two independent random sample have the following data.
$\overline{x_1} = 110, \sigma_1 = 25, n_1 = 16$
$\overline{x_2} = 120, \sigma_2 = 30, n_2 = 9$
If σ_1 and σ_2 are the S. D. of the populations. Test the hypothesis that $\mu_1 = \mu_2$ at 5% level of significance.
(The table value of t at $\alpha = 0.05$ for $v = 23$ degrees of freedom is 2.069)

e) If the probability of defective bulbs is 0.2, find the mean and variance of the distribution of defective bulbs in a lot of 1000 bulbs.

Q.6 Attempt Any Three. **09**

a) If two independent random samples of sizes 15 and 8 have respectively the following mean and population standard deviations, $\overline{x_1} = 980, \overline{x_2} = 1012; \sigma_1 = 75, \sigma_2 = 80$. Test the hypothesis that $\mu_1 = \mu_2$ at 5% level of significance.
(Given Expected value at 5% LOS with 21 DF is 2.080)

b) The number of telephone calls received by an operator in a ten-minute interval follows a Poisson distribution with mean 1. What is the probability of receiving (i) no call, (ii) less than four calls, in the interval? What is the most likely number of calls?

c) Calculate the Coefficient of correlations between x and y from the following data
$n = 25, \sum x = 100, \sum x^2 = 950, \sum y = 110, \sum y^2 = 850, \sum x\,y = 800$

d) Monthly salaries of 1000 workers have a normal distribution with mean of Rs. 575 and a standard deviation of Rs. 75. Find the number of workers having salaries between Rs. 500 and Rs. 625 p.m. Also find the minimum salary of the highest paid 200 workers.
(Given: For a standard normal variate
i) area between $t = 0$ and $t = 1$ is 0.3413,
ii) area between $t = 0$ and $t = 0.67$ is 0.2486,
iii) area between $t = 0$ and $t = 0.84$ is 0.3)

e) Obtain a second-degree curve to the following data and estimate the production in 1975.

Year	1921	1931	1941	1951	1961	1971	1981
Prod. (m. tons)	3	5	9	10	12	14	15

Q.7 Attempt Any Two. **10**

a) Fit a Binomial distribution to the following data,

Value of x	0	1	2	3	4	5	6
Frequency f	6	20	28	12	8	6	0

b) Calculate the lines of regression from the following table, gives the marks obtained by a class of students in two special papers.

Paper I	80	45	55	56	58	60	65	68	70	75	85
Paper II	82	56	50	48	60	62	64	65	70	74	90

c) Ten school boys were given a test in Statistics and their scores were recorded. They were given a month's special coaching and a second test was given to them in the same subject at the end of the coaching period. Test if the marks given below give evidence to the fact that the students are benefitted by coaching.

Marks in test I:	70	68	56	75	80	90	68	75	56	58
Marks in Test II:	68	70	52	73	75	78	80	92	54	55

(Given that value of t_α at 5% LOS for $v = 9$ degrees of freedom is 1.86 for one tailed test)

Seat No.	

Set Q

S.Y. (B.Tech.) (Electronics & Telecommunication Engineering) (Semester - I) (New) (NEP CBCS) Examination: March/April-2026
Advanced Mathematics and Statistics (OE-01A)

Day & Date: Monday, 11-05-2026 Max. Marks: 70
Time: 03:00 PM To 06:00 PM

Instructions: 1) Q. No. 1 is compulsory. It should be solved in the first 30 minutes in Answer Book Page no 03 (Starting page of the Answer Book). Each question carries one mark.
2) Don't forget to Mention question paper set (P/Q/R/S) on top of page.
3) Figures to the right indicates full marks.

MCQ/Objective Type Questions

Duration: 30 Minutes Marks: 14

Q.1 Choose the correct alternative from the given option. 14

1) If value of x for normal distribution is 35, mean of normal distribution is 65 and standard deviation is 25 then standardized random variable is _____.

a) -1.5 b) -1.7
c) -1.2 d) -4

2) A continuous random variable has the following probability density function $f(x) = kx(1-x), 0 \leq x \leq 1$ then $k =$ _____.

a) 2 b) 6
c) 3 d) 5

3) The area under the standard normal curve from $z = -\infty$ to $z = 0$ is _____.

a) 1 b) $1/2$
c) $3/2$ d) 0

4) If X, Y denote the deviation from their means and if $\sum X^2 = 80, \sum Y^2 = 50$ & $\sum XY = 60$ and $r =$_____.

a) 0.65 b) 0.78
c) 0.81 d) 0.95

5) If two regression lines are co-incides then the coefficient of correlation is _____.

a) 0 b) -1
c) ± 1 d) 1

6) If $\bar{x}$ is the mean of the random sample of size n taken from a population of size N having mean μ and standard deviation σ then mean and variance of the distribution $\bar{x}$ are _____.

a) $\bar{x}, \sigma^2$ b) $\bar{x}, \frac{\sigma^2}{n}$

c) μ, σ^2 d) μ, and $\frac{\sigma^2}{n}$

7) χ^2 distribution is defined by _____.

a) $\sum \frac{(O-E)}{E}$ b) $\sum \frac{(O-E)}{E^2}$

c) $\sum \left(\frac{O-E}{E}\right)^2$ d) $\sum \frac{(O-E)^2}{E}$

8) If a linear differential equation with constant coefficients and r.h.s. equal to zero has a real root m_1 repeated two times, then the corresponding part of the integral is _____.

a) $(c_1 + c_2)e^{m_1 x}$ b) $(c_1 x + c_2 x)e^{m_1 x}$

c) $(c_1 x + c_2 x^2)e^{m_1 x}$ d) $(c_1 + c_2 x)e^{m_1 x}$

9) $\frac{1}{D-a} X$ is equal to _____.

a) $\int X e^{ax} dx$ b) $e^{ax} \int X . e^{-ax} dx$

c) $\int X e^{-ax} dx$ d) $e^{-ax} \int X e^{-ax} dx$

10) $\frac{1}{D+1}(\log x + \frac{1}{x})$ is equal to _____.

a) e^x b) 1

c) x d) $\log x$

11) The solution of the equation $\sqrt{p} + \sqrt{q} = 1$ is _____.

a) $z = ax + ay + c$ b) $z = ax + a^2 y + c$

c) $z = ax + \left(1 - \sqrt{a}\right)^2 y + c$ d) None of these

12) The solution of $p + q = 1$ is _____.

a) $z = ax + (1-a)y + c$ b) $z = ax + by + c$

c) $z = ax + b(1-y) + c$ d) $z = a(1-x) + b(1-y) + c$

13) If μ_1', μ_2', μ_3' are the first three moments of the distribution about certain number then third moment μ_3 of the distribution about the arithmetic mean is given by _____.

a) $\mu_3' - 3\mu_2'\mu_1' + 2(\mu_1')^3$ b) $\mu_3' - 3\mu_1' + (\mu_2')^3$

c) $\mu_3' + 2\mu_2'\mu_1' + (\mu_3')^3$ d) $\mu_3' + 3\mu_2'\mu_1' + {\mu_1'}^2$

14) Coefficient of kurtosis β_1 is given by _____.

a) $\frac{\mu_4}{\mu_3}$

b) $\frac{\mu_4}{\mu_2^2}$

c) $\frac{\mu_3^2}{\mu_2^3}$

d) $\frac{\mu_4}{\mu_2^3}$

Seat No.	

Set **Q**

S.Y. (B.Tech.) (Electronics & Telecommunication Engineering) (Semester - I) (New) (NEP CBCS) Examination: March/April-2026
Advanced Mathematics and Statistics (OE-01A)

Day & Date: Monday, 11-05-2026 Max. Marks: 56
Time: 03:00 PM To 06:00 PM

Instructions: 1) All question are compulsory.
2) Figures to the right indicate full marks.

SECTION – I

Q.2 Attempt Any Three. **09**

a) Find the Arithmetic mean, Median and standard deviation for the following frequency distribution.

x:	5	9	12	15	20	24	30	35	42	49
f:	3	6	8	8	9	10	8	7	6	2

b) Solve: $(D^2+1)y = x^2\cos 3x$

c) Solve: $(D^2-4D+4)y = 8.x^2e^{2x}\sin 2x$

d) Calculate the first four moments about the mean of the given distribution. Also find β_1, β_2

x	2.0	2.5	3.0	3.5	4.0	4.5	5.0
f	4	36	60	90	70	40	10

e) Solve $yzp + 2xq = xy$

Q.3 Attempt Any Three. **09**

a) Solve $\frac{d^2y}{dx^2} + 3\frac{dy}{dx} + 2y = 2e^{2x}$

b) Solve $p - q = x^2 + y^2$

c) Find the median of the following frequency distribution.

x	1	3	5	7	9	11	13	15	17
f	3	6	8	12	16	16	15	10	5

d) Solve $x(y-z)p + y(z-x)q = z(x-y)$

e) Solve $(D^3 - 3D + 2)y = x$

Q.4 Attempt Any Two. **10**

a) The first four moments of a distribution about the value 5 are $2, 20, 40$ and 50, from the given information obtain the first four central moments, Standard deviation and coefficient of skewness and kurtosis.

b) Solve the following differential equations by method of separation of variables.

$$3\frac{\partial u}{\partial x} + 2\frac{\partial u}{\partial y} = 0, \text{ given } u(x, 0) = 4e^{-x}$$

c) Solve $\frac{d^2y}{dx^2} + 3\frac{dy}{dx} + 2y = e^{e^x}$

SECTION – II

Q.5 Attempt Any Three. **09**

a) Find the value of k if each of the following functions is a probability density function.

$$f(x) = \begin{cases} kx^2(1 - x^3) & , \quad 0 \leq x \leq 1 \\ 0 & , \quad \text{otherwise} \end{cases}$$

b) The mean life time of 100 fluorescent light bulbs produced by a Company is computed to be 1570 Hrs. with S.D. of 120 Hrs. If μ is the mean lifetime of all the bulbs produced by the Company, Test the Hypothesis $\mu = 1600$ Hrs. against the alternative Hypothesis $\mu \neq 1600$ Hrs. using 5% level of Significance.
(Given Expected value at 5% LOS is 1.96)

c) Fit a Straight line $y = a + bx$ to the following data.

x	0	5	10	15	20	25
y	12	15	17	22	24	30

d) Two independent random sample have the following data.
$\overline{x_1} = 110, \sigma_1 = 25, n_1 = 16$
$\overline{x_2} = 120, \sigma_2 = 30, n_2 = 9$
If σ_1 and σ_2 are the S. D. of the populations. Test the hypothesis that $\mu_1 = \mu_2$ at 5% level of significance.
(The table value of t at $\alpha = 0.05$ for $v = 23$ degrees of freedom is 2.069)

e) If the probability of defective bulbs is 0.2, find the mean and variance of the distribution of defective bulbs in a lot of 1000 bulbs.

Q.6 Attempt Any Three. **09**

a) If two independent random samples of sizes 15 and 8 have respectively the following mean and population standard deviations, $\overline{x_1} = 980, \overline{x_2} = 1012; \sigma_1 = 75, \sigma_2 = 80$. Test the hypothesis that $\mu_1 = \mu_2$ at 5% level of significance.
(Given Expected value at 5% LOS with 21 DF is 2.080)

b) The number of telephone calls received by an operator in a ten-minute interval follows a Poisson distribution with mean 1. What is the probability of receiving (i) no call, (ii) less than four calls, in the interval? What is the most likely number of calls?

c) Calculate the Coefficient of correlations between x and y from the following data
$n = 25, \sum x = 100, \sum x^2 = 950, \sum y = 110, \sum y^2 = 850, \sum x\,y = 800$

d) Monthly salaries of 1000 workers have a normal distribution with mean of Rs. 575 and a standard deviation of Rs. 75. Find the number of workers having salaries between Rs. 500 and Rs. 625 p.m. Also find the minimum salary of the highest paid 200 workers.
(Given: For a standard normal variate
i) area between $t = 0$ and $t = 1$ is 0.3413,
ii) area between $t = 0$ and $t = 0.67$ is 0.2486,
iii) area between $t = 0$ and $t = 0.84$ is 0.3)

e) Obtain a second-degree curve to the following data and estimate the production in 1975.

Year	1921	1931	1941	1951	1961	1971	1981
Prod. (m. tons)	3	5	9	10	12	14	15

Q.7 Attempt Any Two. **10**

a) Fit a Binomial distribution to the following data,

Value of x	0	1	2	3	4	5	6
Frequency f	6	20	28	12	8	6	0

b) Calculate the lines of regression from the following table, gives the marks obtained by a class of students in two special papers.

Paper I	80	45	55	56	58	60	65	68	70	75	85
Paper II	82	56	50	48	60	62	64	65	70	74	90

c) Ten school boys were given a test in Statistics and their scores were recorded. They were given a month's special coaching and a second test was given to them in the same subject at the end of the coaching period. Test if the marks given below give evidence to the fact that the students are benefitted by coaching.

Marks in test I:	70	68	56	75	80	90	68	75	56	58
Marks in Test II:	68	70	52	73	75	78	80	92	54	55

(Given that value of t_α at 5% LOS for $v = 9$ degrees of freedom is 1.86 for one tailed test)

S.Y. (B.Tech.) (Electronics & Telecommunication Engineering) (Semester - I) (New) (NEP CBCS) Examination: March/April-2026
Advanced Mathematics and Statistics (OE-01A)

Day & Date: Monday, 11-05-2026 Max. Marks: 70
Time: 03:00 PM To 06:00 PM

Instructions: 1) Q. No. 1 is compulsory. It should be solved in the first 30 minutes in Answer Book Page no 03 (Starting page of the Answer Book). Each question carries one mark.
2) Don't forget to Mention question paper set (P/Q/R/S) on top of page.
3) Figures to the right indicates full marks.

MCQ/Objective Type Questions

Duration: 30 Minutes Marks: 14

Q.1 Choose the correct alternative from the given option. **14**

1) If X, Y denote the deviation from their means and if $\sum X^2 = 80, \sum Y^2 = 50$ & $\sum XY = 60$ and $r =$_____.

a) 0.65 b) 0.78
c) 0.81 d) 0.95

2) If two regression lines are co-incides then the coefficient of correlation is _____.

a) 0 b) -1
c) ± 1 d) 1

3) If $\bar{x}$ is the mean of the random sample of size n taken from a population of size N having mean μ and standard deviation σ then mean and variance of the distribution $\bar{x}$ are _____.

a) $\bar{x}, \sigma^2$ b) $\bar{x}, \frac{\sigma^2}{n}$

c) μ, σ^2 d) μ, and $\frac{\sigma^2}{n}$

4) χ^2 distribution is defined by _____.

a) $\sum \frac{(O-E)}{E}$ b) $\sum \frac{(O-E)}{E^2}$
c) $\sum \left(\frac{O-E}{E}\right)^2$ d) $\sum \frac{(O-E)^2}{E}$

5) If a linear differential equation with constant coefficients and r.h.s. equal to zero has a real root m_1 repeated two times, then the corresponding part of the integral is _____.

a) $(c_1 + c_2)e^{m_1 x}$ b) $(c_1 x + c_2 x)e^{m_1 x}$

c) $(c_1 x + c_2 x^2)e^{m_1 x}$ d) $(c_1 + c_2 x)e^{m_1 x}$

6) $\frac{1}{D-a} X$ is equal to _____.

a) $\int X e^{ax} dx$ b) $e^{ax} \int X . e^{-ax} dx$

c) $\int X e^{-ax} dx$ d) $e^{-ax} \int X e^{-ax} dx$

7) $\frac{1}{D+1}(\log x + \frac{1}{x})$ is equal to _____.

a) e^x b) 1

c) x d) $\log x$

8) The solution of the equation $\sqrt{p} + \sqrt{q} = 1$ is _____.

a) $z = ax + ay + c$ b) $z = ax + a^2 y + c$

c) $z = ax + \left(1 - \sqrt{a}\right)^2 y + c$ d) None of these

9) The solution of $p + q = 1$ is _____.

a) $z = ax + (1 - a)y + c$ b) $z = ax + by + c$

c) $z = ax + b(1 - y) + c$ d) $z = a(1 - x) + b(1 - y) + c$

10) If μ_1', μ_2', μ_3' are the first three moments of the distribution about certain number then third moment μ_3 of the distribution about the arithmetic mean is given by _____.

a) $\mu_3' - 3\mu_2'\mu_1' + 2(\mu_1')^3$ b) $\mu_3' - 3\mu_1' + (\mu_2')^3$

c) $\mu_3' + 2\mu_2'\mu_1' + (\mu_3')^3$ d) $\mu_3' + 3\mu_2'\mu_1' + {\mu_1'}^2$

11) Coefficient of kurtosis β_1 is given by _____.

a) $\frac{\mu_4}{\mu_3}$ b) $\frac{\mu_4}{\mu_2^2}$

c) $\frac{\mu_3^2}{\mu_2^3}$ d) $\frac{\mu_4}{\mu_2^3}$

12) If value of x for normal distribution is 35, mean of normal distribution is 65 and standard deviation is 25 then standardized random variable is _____.

a) -1.5 b) -1.7

c) -1.2 d) -4

13) A continuous random variable has the following probability density function $f(x) = kx(1-x), 0 \leq x \leq 1$ then $k =$ _____.

a) 2 b) 6

c) 3 d) 5

14) The area under the standard normal curve from $z = -\infty$ to $z = 0$ is _____.

a) 1 b) $1/2$

c) $3/2$ d) 0

Seat No.	

Set R

S.Y. (B.Tech.) (Electronics & Telecommunication Engineering) (Semester - I) (New) (NEP CBCS) Examination: March/April-2026
Advanced Mathematics and Statistics (OE-01A)

Day & Date: Monday, 11-05-2026 Max. Marks: 56
Time: 03:00 PM To 06:00 PM

Instructions: 1) All question are compulsory.
2) Figures to the right indicate full marks.

SECTION – I

Q.2 Attempt Any Three. **09**

a) Find the Arithmetic mean, Median and standard deviation for the following frequency distribution.

x:	5	9	12	15	20	24	30	35	42	49
f:	3	6	8	8	9	10	8	7	6	2

b) Solve: $(D^2+1)y = x^2\cos 3x$

c) Solve: $(D^2-4D+4)y = 8.x^2e^{2x}\sin 2x$

d) Calculate the first four moments about the mean of the given distribution. Also find β_1, β_2

x	2.0	2.5	3.0	3.5	4.0	4.5	5.0
f	4	36	60	90	70	40	10

e) Solve $yzp + 2xq = xy$

Q.3 Attempt Any Three. **09**

a) Solve $\frac{d^2y}{dx^2} + 3\frac{dy}{dx} + 2y = 2e^{2x}$

b) Solve $p - q = x^2 + y^2$

c) Find the median of the following frequency distribution.

x	1	3	5	7	9	11	13	15	17
f	3	6	8	12	16	16	15	10	5

d) Solve $x(y-z)p + y(z-x)q = z(x-y)$

e) Solve $(D^3 - 3D + 2)y = x$

Q.4 Attempt Any Two. **10**

a) The first four moments of a distribution about the value 5 are $2, 20, 40$ and 50, from the given information obtain the first four central moments, Standard deviation and coefficient of skewness and kurtosis.

b) Solve the following differential equations by method of separation of variables.

$$3\frac{\partial u}{\partial x} + 2\frac{\partial u}{\partial y} = 0, \text{ given } u(x, 0) = 4e^{-x}$$

c) Solve $\frac{d^2y}{dx^2} + 3\frac{dy}{dx} + 2y = e^{e^x}$

SECTION – II

Q.5 Attempt Any Three. **09**

a) Find the value of k if each of the following functions is a probability density function.

$$f(x) = \begin{cases} kx^2(1 - x^3) & , \quad 0 \leq x \leq 1 \\ 0 & , \quad \text{otherwise} \end{cases}$$

b) The mean life time of 100 fluorescent light bulbs produced by a Company is computed to be 1570 Hrs. with S.D. of 120 Hrs. If μ is the mean lifetime of all the bulbs produced by the Company, Test the Hypothesis $\mu = 1600$ Hrs. against the alternative Hypothesis $\mu \neq 1600$ Hrs. using 5% level of Significance.
(Given Expected value at 5% LOS is 1.96)

c) Fit a Straight line $y = a + bx$ to the following data.

x	0	5	10	15	20	25
y	12	15	17	22	24	30

d) Two independent random sample have the following data.
$\overline{x_1} = 110, \sigma_1 = 25, n_1 = 16$
$\overline{x_2} = 120, \sigma_2 = 30, n_2 = 9$
If σ_1 and σ_2 are the S. D. of the populations. Test the hypothesis that $\mu_1 = \mu_2$ at 5% level of significance.
(The table value of t at $\alpha = 0.05$ for $v = 23$ degrees of freedom is 2.069)

e) If the probability of defective bulbs is 0.2, find the mean and variance of the distribution of defective bulbs in a lot of 1000 bulbs.

Q.6 Attempt Any Three. **09**

a) If two independent random samples of sizes 15 and 8 have respectively the following mean and population standard deviations, $\overline{x_1} = 980, \overline{x_2} = 1012; \sigma_1 = 75, \sigma_2 = 80$. Test the hypothesis that $\mu_1 = \mu_2$ at 5% level of significance.
(Given Expected value at 5% LOS with 21 DF is 2.080)

b) The number of telephone calls received by an operator in a ten-minute interval follows a Poisson distribution with mean 1. What is the probability of receiving (i) no call, (ii) less than four calls, in the interval? What is the most likely number of calls?

c) Calculate the Coefficient of correlations between x and y from the following data
$n = 25, \sum x = 100, \sum x^2 = 950, \sum y = 110, \sum y^2 = 850, \sum x\,y = 800$

d) Monthly salaries of 1000 workers have a normal distribution with mean of Rs. 575 and a standard deviation of Rs. 75. Find the number of workers having salaries between Rs. 500 and Rs. 625 p.m. Also find the minimum salary of the highest paid 200 workers.
(Given: For a standard normal variate
i) area between $t = 0$ and $t = 1$ is 0.3413,
ii) area between $t = 0$ and $t = 0.67$ is 0.2486,
iii) area between $t = 0$ and $t = 0.84$ is 0.3)

e) Obtain a second-degree curve to the following data and estimate the production in 1975.

Year	1921	1931	1941	1951	1961	1971	1981
Prod. (m. tons)	3	5	9	10	12	14	15

Q.7 Attempt Any Two. **10**

a) Fit a Binomial distribution to the following data,

Value of x	0	1	2	3	4	5	6
Frequency f	6	20	28	12	8	6	0

b) Calculate the lines of regression from the following table, gives the marks obtained by a class of students in two special papers.

Paper I	80	45	55	56	58	60	65	68	70	75	85
Paper II	82	56	50	48	60	62	64	65	70	74	90

c) Ten school boys were given a test in Statistics and their scores were recorded. They were given a month's special coaching and a second test was given to them in the same subject at the end of the coaching period. Test if the marks given below give evidence to the fact that the students are benefitted by coaching.

Marks in test I:	70	68	56	75	80	90	68	75	56	58
Marks in Test II:	68	70	52	73	75	78	80	92	54	55

(Given that value of t_α at 5% LOS for $v = 9$ degrees of freedom is 1.86 for one tailed test)

Seat No.	

Set **S**

S.Y. (B.Tech.) (Electronics & Telecommunication Engineering) (Semester - I) (New) (NEP CBCS) Examination: March/April-2026
Advanced Mathematics and Statistics (OE-01A)

Day & Date: Monday, 11-05-2026 Max. Marks: 70
Time: 03:00 PM To 06:00 PM

Instructions: 1) Q. No. 1 is compulsory. It should be solved in the first 30 minutes in Answer Book Page no 03 (Starting page of the Answer Book). Each question carries one mark.
2) Don't forget to Mention question paper set (P/Q/R/S) on top of page.
3) Figures to the right indicates full marks.

MCQ/Objective Type Questions

Duration: 30 Minutes Marks: 14

Q.1 Choose the correct alternative from the given option. **14**

1) If μ_1', μ_2', μ_3' are the first three moments of the distribution about certain number then third moment μ_3 of the distribution about the arithmetic mean is given by _____.

a) $\mu_3' - 3\mu_2'\mu_1' + 2(\mu_1')^3$ b) $\mu_3' - 3\mu_1' + (\mu_2')^3$

c) $\mu_3' + 2\mu_2'\mu_1' + (\mu_3')^3$ d) $\mu_3' + 3\mu_2'\mu_1' + {\mu_1'}^2$

2) Coefficient of kurtosis β_1 is given by _____.

a) $\frac{\mu_4}{\mu_3}$ b) $\frac{\mu_4}{\mu_2^2}$

c) $\frac{\mu_3^2}{\mu_2^3}$ d) $\frac{\mu_4}{\mu_2^3}$

3) If value of x for normal distribution is 35, mean of normal distribution is 65 and standard deviation is 25 then standardized random variable is _____.

a) -1.5 b) -1.7

c) -1.2 d) -4

4) A continuous random variable has the following probability density function $f(x) = kx(1-x), 0 \leq x \leq 1$ then $k =$ _____.

a) 2 b) 6

c) 3 d) 5

5) The area under the standard normal curve from $z = -\infty$ to $z = 0$ is _____.

a) 1 b) $1/2$

c) $3/2$ d) 0

6) If X, Y denote the deviation from their means and if $\sum X^2 = 80, \sum Y^2 = 50$ & $\sum XY = 60$ and $r =$_____.

a) 0.65 b) 0.78

c) 0.81 d) 0.95

7) If two regression lines are co-incides then the coefficient of correlation is _____.

a) 0 b) -1

c) ± 1 d) 1

8) If $\bar{x}$ is the mean of the random sample of size n taken from a population of size N having mean μ and standard deviation σ then mean and variance of the distribution $\bar{x}$ are _____.

a) $\bar{x}, \sigma^2$ b) $\bar{x}, \frac{\sigma^2}{n}$

c) μ, σ^2 d) μ, and $\frac{\sigma^2}{n}$

9) χ^2 distribution is defined by _____.

a) $\sum \frac{(O-E)}{E}$ b) $\sum \frac{(O-E)}{E^2}$

c) $\sum \left(\frac{O-E}{E}\right)^2$ d) $\sum \frac{(O-E)^2}{E}$

10) If a linear differential equation with constant coefficients and r.h.s. equal to zero has a real root m_1 repeated two times, then the corresponding part of the integral is _____.

a) $(c_1 + c_2)e^{m_1 x}$ b) $(c_1 x + c_2 x)e^{m_1 x}$

c) $(c_1 x + c_2 x^2)e^{m_1 x}$ d) $(c_1 + c_2 x)e^{m_1 x}$

11) $\frac{1}{D-a} X$ is equal to _____.

a) $\int X e^{ax} dx$ b) $e^{ax} \int X . e^{-ax} dx$

c) $\int X e^{-ax} dx$ d) $e^{-ax} \int X e^{-ax} dx$

12) $\frac{1}{D+1}(\log x + \frac{1}{x})$ is equal to _____.

a) e^x b) 1

c) x d) $\log x$

13) The solution of the equation $\sqrt{p} + \sqrt{q} = 1$ is _____.

a) $z = ax + ay + c$ b) $z = ax + a^2 y + c$

c) $z = ax + \left(1 - \sqrt{a}\right)^2 y + c$ d) None of these

14) The solution of $p + q = 1$ is _____.

a) $z = ax + (1 - a)y + c$ b) $z = ax + by + c$

c) $z = ax + b(1 - y) + c$ d) $z = a(1 - x) + b(1 - y) + c$

Q.2 Attempt Any Three. **09**

a) Find the Arithmetic mean, Median and standard deviation for the following frequency distribution.

x:	5	9	12	15	20	24	30	35	42	49
f:	3	6	8	8	9	10	8	7	6	2

b) Solve: $(D^2+1)y = x^2\cos 3x$

c) Solve: $(D^2-4D+4)y = 8.x^2e^{2x}\sin 2x$

d) Calculate the first four moments about the mean of the given distribution. Also find β_1, β_2

x	2.0	2.5	3.0	3.5	4.0	4.5	5.0
f	4	36	60	90	70	40	10

e) Solve $yzp + 2xq = xy$

Q.3 Attempt Any Three. **09**

a) Solve $\frac{d^2y}{dx^2} + 3\frac{dy}{dx} + 2y = 2e^{2x}$

b) Solve $p - q = x^2 + y^2$

c) Find the median of the following frequency distribution.

x	1	3	5	7	9	11	13	15	17
f	3	6	8	12	16	16	15	10	5

d) Solve $x(y-z)p + y(z-x)q = z(x-y)$

e) Solve $(D^3 - 3D + 2)y = x$

Q.4 Attempt Any Two. **10**

a) The first four moments of a distribution about the value 5 are $2, 20, 40$ and 50, from the given information obtain the first four central moments, Standard deviation and coefficient of skewness and kurtosis.

b) Solve the following differential equations by method of separation of variables.

$$3\frac{\partial u}{\partial x} + 2\frac{\partial u}{\partial y} = 0, \text{ given } u(x, 0) = 4e^{-x}$$

c) Solve $\frac{d^2y}{dx^2} + 3\frac{dy}{dx} + 2y = e^{e^x}$

SECTION – II

Q.5 Attempt Any Three. **09**

a) Find the value of k if each of the following functions is a probability density function.

$$f(x) = \begin{cases} kx^2(1 - x^3) & , \quad 0 \leq x \leq 1 \\ 0 & , \quad \text{otherwise} \end{cases}$$

b) The mean life time of 100 fluorescent light bulbs produced by a Company is computed to be 1570 Hrs. with S.D. of 120 Hrs. If μ is the mean lifetime of all the bulbs produced by the Company, Test the Hypothesis $\mu = 1600$ Hrs. against the alternative Hypothesis $\mu \neq 1600$ Hrs. using 5% level of Significance.
(Given Expected value at 5% LOS is 1.96)

c) Fit a Straight line $y = a + bx$ to the following data.

x	0	5	10	15	20	25
y	12	15	17	22	24	30

d) Two independent random sample have the following data.
$\overline{x_1} = 110, \sigma_1 = 25, n_1 = 16$
$\overline{x_2} = 120, \sigma_2 = 30, n_2 = 9$
If σ_1 and σ_2 are the S. D. of the populations. Test the hypothesis that $\mu_1 = \mu_2$ at 5% level of significance.
(The table value of t at $\alpha = 0.05$ for $v = 23$ degrees of freedom is 2.069)

e) If the probability of defective bulbs is 0.2, find the mean and variance of the distribution of defective bulbs in a lot of 1000 bulbs.

Q.6 Attempt Any Three. **09**

a) If two independent random samples of sizes 15 and 8 have respectively the following mean and population standard deviations, $\overline{x_1} = 980, \overline{x_2} = 1012; \sigma_1 = 75, \sigma_2 = 80$. Test the hypothesis that $\mu_1 = \mu_2$ at 5% level of significance.
(Given Expected value at 5% LOS with 21 DF is 2.080)

b) The number of telephone calls received by an operator in a ten-minute interval follows a Poisson distribution with mean 1. What is the probability of receiving (i) no call, (ii) less than four calls, in the interval? What is the most likely number of calls?

c) Calculate the Coefficient of correlations between x and y from the following data
$n = 25, \sum x = 100, \sum x^2 = 950, \sum y = 110, \sum y^2 = 850, \sum x\,y = 800$

d) Monthly salaries of 1000 workers have a normal distribution with mean of Rs. 575 and a standard deviation of Rs. 75. Find the number of workers having salaries between Rs. 500 and Rs. 625 p.m. Also find the minimum salary of the highest paid 200 workers.
(Given: For a standard normal variate
i) area between $t = 0$ and $t = 1$ is 0.3413,
ii) area between $t = 0$ and $t = 0.67$ is 0.2486,
iii) area between $t = 0$ and $t = 0.84$ is 0.3)

e) Obtain a second-degree curve to the following data and estimate the production in 1975.

Year	1921	1931	1941	1951	1961	1971	1981
Prod. (m. tons)	3	5	9	10	12	14	15

Q.7 Attempt Any Two. **10**

a) Fit a Binomial distribution to the following data,

Value of x	0	1	2	3	4	5	6
Frequency f	6	20	28	12	8	6	0

b) Calculate the lines of regression from the following table, gives the marks obtained by a class of students in two special papers.

Paper I	80	45	55	56	58	60	65	68	70	75	85
Paper II	82	56	50	48	60	62	64	65	70	74	90

c) Ten school boys were given a test in Statistics and their scores were recorded. They were given a month's special coaching and a second test was given to them in the same subject at the end of the coaching period. Test if the marks given below give evidence to the fact that the students are benefitted by coaching.

Marks in test I:	70	68	56	75	80	90	68	75	56	58
Marks in Test II:	68	70	52	73	75	78	80	92	54	55

(Given that value of t_α at 5% LOS for $v = 9$ degrees of freedom is 1.86 for one tailed test)

3) Figures to the right indicates full marks.
4) Assume suitable data if necessary.

MCQ/Objective Type Questions

Duration: 30 Minutes Marks:14

Q.1 Choose correct answer: 14

1) Which of the following is/are considered examples of the Consumer to Consumer (C2C) model?
a) Amazon.com b) e-bay
c) Rentalic.com d) All of the above

2) Which type of E - Commerce is Amazon?
a) B2B b) B2C
c) G2B d) G2C

3) Which of the following is the set of planned activities that are designed to result in a profit in the marketplace?
a) Profit model b) Business model
c) Business plan d) Revenue model

4) All of the following are major B2C business models except _____.
a) content provider b) industry consortium
c) transaction broker d) service provider

5) After completing an E-Commerce transaction, the buyer needs to _____.
a) Pick the product and go home
b) Take the product to home
c) Collect it directly from a store
d) Wait till the delivery of the product

6) SCM is a game of 4 C's = Collaboration; Co-operation; Co-ordination and _____.
a) Controlling b) Connectivity
c) Communication d) Customer

7) Which e-commerce transaction provides the benefits of eliminating the requirement of a middleman?
a) Business to Business
b) Business to Government
c) Consumer to Business
d) Business to Consumer

8) After completing an E-Commerce transaction, the seller and buyer should be provided an opportunity to _____ their transaction experience.
a) undo
b) regret
c) provide rating for
d) forget

9) Digital Cash has the following characteristics _____.
a) Anonymity
b) Security
c) Confidentiality
d) All of the Above

10) Benefit of E-Commerce platform is/are _____.
a) competitive pricing to benefit both seller and buyer
b) large number of products to choose from
c) ability to buy products not available in the local market
d) All of them

11) Which type of attack is a method of defeating a cryptographic scheme of trying a large number of possibilities?
a) Teardrop attack
b) Brute force attack
c) Phlashing
d) Smurf attack

12) Which is the model in E - E-Commerce, if the seller is an individual and the buyer is a business firm?
a) Consumer to Business
b) Business to Consumer
c) Business to Business
d) Consumer to Consumer

13) Which of the following authenticates and handles credit card payment for E-Commerce?
a) Payment gateway
b) E - E-Commerce gateway
c) Software gateway
d) E-Wallets

SECTION – I

Q.2 Attempt Any Three. **12**

a) Explain various aspects of perception.

b) Explain major philosophical movements and their impact.

c) Explain the interdisciplinary nature of disciplines under humanities and social sciences.

d) Explain how perceptual processes shape human behaviour.

e) Write a short note on: Scope of humanities.

Q.3 Attempt Any Two. **16**

a) Explore main theories of psychology.

b) Write in details the effects of psychology on social communication.

c) Explore the merits and demerits of democratic system of rule.

SECTION -II

Q.4 Attempt Any Three. **12**

a) How did industrial revolution contribute to technical advancements?

b) Write a short note on: Ethics in Engineering.

c) Write a short note on: Social Institutions.

d) Which are the different aspects of culture and society?

e) Explain how the ancient civilizations have contributed to the modern society.

Q.5 Attempt Any Two. **16**

a) Explain the concept of industrialization with its social and economic consequences.

b) Explore various economic theories and their thinkers.

c) Which are the technological innovations in 18^{th} & 19^{th} century? Explain.

S.Y. (B.Tech.) (Electronics & Telecommunication Engineering) (Semester - I) (New) (NEP CBCS) Examination: March/April – 2026 Humanities and Social Sciences (OE-01C)

Day & Date: Monday, 11-05-2026 Max. Marks: 70
Time: 03:00 PM To 06:00 PM

Instructions: 1) Q. No. 1 is compulsory. It should be solved in the first 30 minutes in Answer Book Page no 03 (Starting page of the Answer Book). Each question carries one mark
2) Don't forget to Mention question paper set (P/Q/R/S) on top on page.
3) Figures to the right indicates full marks.

MCQ/Objective Type Questions

Duration: 30 Minutes Marks:14

Q.1 Choose the correct alternatives from the following. **14**

1) Culture includes _____.
a) Only art and literature
b) Traditions, beliefs, and values
c) Economic systems
d) Political institutions only

2) In which ancient civilization did the term "democracy" originate?
a) Ancient Egypt b) Ancient Greece
c) Ancient Rome d) Mesopotamia

3) Inflation means _____.
a) Increase in employment
b) Decrease in prices
c) Increase in general price level
d) Increase in production

4) Socialization refers to _____.
a) Economic growth b) Learning social norms
c) Political participation d) Cultural diffusion

5) The study of language structure and its evolution is called _____.
a) Sociology b) Linguistics
c) Psychology d) Anthropology

6) Feminism primarily addresses issues related to _____.
a) Economic inequality
b) Gender equality and women's rights
c) Political ideologies
d) Technological advancements

7) Dr. Sigmund Freud is best known for his contributions to _____.
a) Political science
b) Psychoanalysis
c) Economic theory
d) Structural linguistics

8) Which discipline studies the production, distribution, and consumption of goods and services?
a) Sociology
b) Political Science
c) Economics
d) History

9) Identify the primary focus of ethics in philosophy.
a) Logic and reasoning
b) Moral principles and conduct
c) Aesthetics and beauty
d) Scientific discovery

10) History is best defined as the study of _____.
a) Future events
b) Past human activities
c) Natural phenomena
d) Scientific experiments

11) The archaeology focuses on _____.
a) Economic theories
b) The study of celestial bodies
c) Material remains of past societies
d) Genetic research

12) Which of the following disciplines deals with political systems and governance?
a) Economics
b) Political Science
c) Sociology
d) Cultural Studies

13) Urbanization is best described as _____.
a) Decline of rural population
b) Growth of cities and towns
c) Spread of agriculture
d) Industrial decline

14) Sociology is the study of _____.
a) Individual mind
b) Social behaviour and society
c) Political institutions
d) Historical events

MCQ/Objective Type Questions

Duration: 30 Minutes Marks:14

Q.1 MCQ/Objective Type Questions: 14

1) Which of the following best defines the primary purpose of management?
a) To create rules for employees to follow
b) To maintain financial records
c) To achieve organizational goals efficiently and effectively
d) To monitor employee behavior

2) Which function of management involves setting objectives and determining a course of action to achieve them?
a) Organizing b) Controlling
c) Planning d) Leading

3) Which of the following best represents the concept of social responsibility in management?
a) Maximizing shareholder wealth at any cost
b) Avoiding all legal penalties
c) Balancing profit-making with obligations to stakeholders and society
d) Focusing only on employee welfare

4) What is the most important reason for managers to follow ethical principles in decision-making?
a) To avoid law suits
b) To improve public image
c) To build trust and long-term sustainability
d) To increase profits quickly

5) Which is the first step in the planning process?
a) Developing alternatives b) Evaluating alternatives
c) Setting objectives d) Selecting the best alternative

6) What is the primary purpose of organizing in management?
a) To control employee behavior
b) To define roles, responsibilities, and allocate resources
c) To create strict rules for employees
d) To plan financial statements

7) What is the main purpose of employee training and development?
a) To penalize poor performance
b) To reduce the number of staff
c) To delay promotions
d) To enhance employee skills and support career growth

8) According to Maslow's Hierarchy of Needs, which of the following is the highest level of need?
a) Safety needs
b) Social needs
c) Esteem needs
d) Self-actualization

9) The "Carrot and Stick" approach to motivation is based on _____.
a) Building self-esteem through empowerment
b) Providing both rewards and punishments to influence behavior
c) Offering training and development opportunities
d) Recognizing only financial incentives

10) Which of the following best defines "quality" in the context of management?
a) Producing the highest quantity of products
b) Conforming to standards and satisfying customer needs
c) Meeting only internal business goals
d) Offering products at the lowest possible price

11) Which of the following is not typically considered an element of quality?
a) Performance
b) Reliability
c) Advertising
d) Durability

12) Pareto Analysis is based on the principle that _____.
a) All causes contribute equally to problems
b) 20% of the causes account for 80% of the problems
c) Quality problems are random and unpredictable
d) Only external factors affect product quality

13) The main goal of Six Sigma is to _____.
a) Increase the speed of production
b) Eliminate all human involvement in processes
c) Reduce process variation and defects to near zero
d) Ensure all products are handmade

14) What is the primary purpose of Statistical Process Control (SPC)?
a) To eliminate all manual processes
b) To ensure marketing strategies are effective
c) To monitor and control a process through statistical methods
d) To increase financial profitability only

MCQ/Objective Type Questions

Duration: 30 Minutes Marks: 14

Q.1 Choose the correct alternative from the given option. 14

1) The particular Integral of $(D^2 - 2D + 1)y = -4e^x$ is _____.

a) $-2x^2e^x$ b) $-4x^2e^x$
c) $(C_1 + C_2x)e^x$ d) x^2e^x

2) The general solution of $(D^2 - 4)^2y = 0$ is _____.

a) $y = C_1e^{2x} + C_2e^{-2x}$
b) $y = (C_1 + C_2x)e^{-2x} + (C_3 + C_4x)e^{2x}$
c) $y = C_1\cos 2x + C_2\sin 2x + (C_3 + C_4x)e^{2x}$
d) None of these

3) The value of $\frac{1}{D-a}X =$ _____.

a) $e^{-ax}\int e^{-ax}Xdx$ b) $e^{-ax}\int e^{ax}Xdx$
c) $e^{ax}\int e^{-ax}Xdx$ d) $e^{ax}\int e^{ax}Xdx$

4) $Lf(t)\delta(t-a) =$ _____.

a) $e^{-as}f(t)$ b) $e^{-as}f(a)$
c) $e^{as}f(a)$ d) $e^{-as}f(t-a)$

5) If $L\{f(t)\} = \frac{a}{s^2+a^2}$ then $L\left\{\int_0^1 f(t)dt\right\} =$ _____.

a) $\frac{1}{s(s^2+a^2)}$ b) $\frac{a}{s(s^2+a^2)}$

c) $\frac{as}{s^2+a^2}$ d) $\frac{as^2}{s^2+a^2}$

6) The inverse z-transform of $\frac{z}{z-3}, |z| > 3$ (with $k \geq 0$) is _____.

a) 3^{-k} b) 3^{k+1}

c) 3^k d) 3^{-k-1}

7) The rate of convergence of Newton-Raphson Method is _____.

a) 1 b) 2

c) $\sqrt{2}$ d) 3

8) A positive real root of the equation $xe^x - 2 = 0$ is lies between _____.

a) 2 and 3 b) 1 and 2

c) 3 and 4 d) 0 and 1

9) Since $z\{1\} = \frac{z}{z-1}, z\{a^k\}, k \geq 0 =$ _____.

a) $\frac{z}{z-a}$ b) $\frac{z}{a(z-1)}$

c) $\frac{a}{z-a}$ d) $\frac{z}{az-1}$

10) In the interval $(0,1)$ the constant term in the cosine series of $f(x) = x^2$ is _____.

a) 0 b) $\frac{1}{2}$

c) $\frac{1}{3}$ d) $\frac{\pi}{4}$

11) In the cosine series of $f(x) = \pi x - x^2$ for $0 < x < \pi$, the constant term is _____.

a) $\frac{\pi^2}{4}$ b) $\frac{\pi^2}{16}$

c) $\frac{\pi^2}{6}$ d) $\frac{\pi^2}{2}$

12) For the function $f(x) \begin{matrix} = & 0, & -\pi < x < 0 \\ = & x, & 0 < x < \pi \end{matrix}$

The value of Fourier constant a_0 is _____.

a) $\frac{\pi^2}{4}$ b) $\frac{\pi}{4}$

c) $\frac{\pi^2}{2}$ d) $\frac{-\pi}{4}$

13) The half range sine series of $f(x)$ defined in the interval $(0, 2)$ is _____.

a) $f(x) = \sum_{n=1}^{\infty} b_n \sin nx$ b) $f(x) = \sum_{n=1}^{\infty} b_n \sin(2n\pi x)$

c) $f(x) = \sum_{n=1}^{\infty} b_n \sin\left(\frac{n\pi x}{2}\right)$ d) $f(x) = \sum_{n=1}^{\infty} a_n \cos\left(\frac{n\pi x}{2}\right)$

14) If $F_s(\lambda) = e^{-\lambda}$ then the function $f(x) =$ _____.

a) $\frac{2}{\sqrt{1+x^2}}$ b) $\frac{\pi}{1+x^2}$

c) $\sqrt{\frac{2}{\pi}}\frac{1}{1+x^2}$ d) None

S.Y. (B.Tech.) (Electronics & Telecommunication Engineering) (Semester - I) (New) (NEP CBCS) Examination: March/April – 2026
Mathematics for Software and Hardware (OE-01E)

Day & Date: Monday, 11-05-2026 Max. Marks: 56
Time: 03:00 PM To 06:00 PM

Instructions: 1) All question are compulsory.
2) Figures to the right indicate full marks.
3) Make suitable assumptions if necessary and state them clearly.
4) Use of non-programmable calculator is allowed.

SECTION – I

Q.2 Attempt Any Three. **09**

a) Solve: $(D^2+1)y = x\sin 2x$

b) Solve: $(D^2+4D+4)y = e^{3x}$

c) Find $L\left\{\frac{1}{t}(1-\cos t)\right\}$

d) Find $z\{ka^k + k\beta^k\}, k \geq 0$

e) Find the Laplace transform of $\int_0^t te^{-3t}\sin(4t)dt$

Q.3 Attempt Any Three. **09**

a) Solve $(D^2-1)y = X\cos 2x$

b) Find $L\left[\int_0^t te^{-4t}\sin(3t)dt\right]$

c) Find the inverse Laplace transform of following by using the Convolution theorem of $\left[\frac{1}{s(s^2+9)}\right]$

d) Find $Z\left\{3^k\cos\left(\frac{k\pi}{2}+\frac{\pi}{4}\right)\right\}, k \geq 0$

e) Find the Laplace Transform of $\{1+2t-3t^2+4t^3\}U(t-2)\}$

Q.4 Attempt Any Two. **10**

a) Find $L\{t.\sqrt{1-\sin t}\}$

b) Solve $(D^3+1)y = 3+e^{-x}+5e^{2x}$

c) Find $Z^{-1}\left\{\frac{1}{(z-a)^2}\right\}, |z| > |a|., |z| < |a|$

SECTION – II

Q.5 Attempt Any Three. **09**

a) Evaluate $\int_0^6 \frac{e^x}{1+x}dx$ using Simpson's 1/3rd rule, (Take $h = 1$)

b) Find the half-range cosine series for $f(x) = e^{-x}$ in $(0, \pi)$

c) Evaluate $\sqrt{37}$ by Newton Raphson method correct to four decimal places by taking initial approximation as $x_0 = 6$

d) Find the Fourier Sine transforms of $2e^{-5x} + 5e^{-2x}$

e) Find the Fourier series of $f(x) \begin{matrix} = & \pi x, & 0 < x < 1 \\ = & 0, & 1 < x < 2 \end{matrix}$

Q.6 Attempt Any Three. **09**

a) Obtain half range sine series for $f(x) = x$ in $0 < x < 2$

b) Find the positive root of the following by using Newton Raphson method correct to four decimal places $3x - \cos x - 1 = 0$

c) Evaluate $\int_0^6 \frac{1}{1+x^2}dx\ n = 6$ using Trapezoidal rule.

d) Find the Fourier transform of $f(x)$ if $f(x) = \begin{cases} 1, & 0 \le x < 1 \\ 0, & x > 0 \end{cases}$

e) Find the Fourier series of $f(x) = x \sin x, \quad (0, 2\pi)$

Q.7 Attempt Any Two. **10**

a) Find the Fourier transform of

$f(x) \begin{matrix} = 1 & |x| & < & k \\ = 0 & |x| & > & k \end{matrix}$ and

hence evaluate

i) $\int_{-\infty}^{\infty} \frac{\sin sk \,.\, \cos sk}{s} ds$

ii) $\int_{-\infty}^{\infty} \frac{\sin ks}{s} ds$

b) Obtain the Fourier series of $f(x) = a^2 - x^2$ in $(-a, a)$

c) Find the Value of K_1 by Runge Kutta Method of fourth order if

$\frac{dy}{dx} = 2x + 3y^2$ and $y(0.1) = 1.1165$ and $h = 0.1$

S.Y. (B.Tech.) (Electronics & Telecommunication Engineering) (Semester - I) (New) (NEP CBCS) Examination: March/April – 2026
Mathematics for Software and Hardware (OE-01E)

Day & Date: Monday, 11-05-2026 Max. Marks: 70
Time: 03:00 PM To 06:00 PM

Instructions: 1) Q. No. 1 is compulsory. It should be solved in the first 30 minutes in Answer Book Page no 03 (Starting page of the Answer Book). Each question carries one mark.
2) Don't forget to Mention question paper set (P/Q/R/S) on top of page.
3) Figures to the right indicates full marks.
4) Make suitable assumptions if necessary and state them clearly.
5) Use of non-programmable calculator is allowed.

MCQ/Objective Type Questions

Duration: 30 Minutes Marks: 14

Q.1 Choose the correct alternative from the given option. 14

1) A positive real root of the equation $xe^x - 2 = 0$ is lies between _____.
a) 2 and 3 b) 1 and 2
c) 3 and 4 d) 0 and 1

2) Since $z\{1\} = \frac{z}{z-1}, z\{a^k\}, k \geq 0 =$ _____.
a) $\frac{z}{z-a}$ b) $\frac{z}{a(z-1)}$
c) $\frac{a}{z-a}$ d) $\frac{z}{az-1}$

3) In the interval $(0,1)$ the constant term in the cosine series of $f(x) = x^2$ is _____.
a) 0 b) $\frac{1}{2}$
c) $\frac{1}{3}$ d) $\frac{\pi}{4}$

4) In the cosine series of $f(x) = \pi x - x^2$ for $0 < x < \pi$, the constant term is _____.
a) $\frac{\pi^2}{4}$ b) $\frac{\pi^2}{16}$
c) $\frac{\pi^2}{6}$ d) $\frac{\pi^2}{2}$

5) For the function $f(x) \begin{matrix} = & 0, & -\pi < x < 0 \\ = & x, & 0 < x < \pi \end{matrix}$

The value of Fourier constant a_0 is _____.

a) $\frac{\pi^2}{4}$ b) $\frac{\pi}{4}$

c) $\frac{\pi^2}{2}$ d) $\frac{-\pi}{4}$

6) The half range sine series of $f(x)$ defined in the interval $(0, 2)$ is _____.

a) $f(x) = \sum_{n=1}^{\infty} b_n \sin nx$ b) $f(x) = \sum_{n=1}^{\infty} b_n \sin(2n\pi x)$

c) $f(x) = \sum_{n=1}^{\infty} b_n \sin\left(\frac{n\pi x}{2}\right)$ d) $f(x) = \sum_{n=1}^{\infty} a_n \cos\left(\frac{n\pi x}{2}\right)$

7) If $F_s(\lambda) = e^{-\lambda}$ then the function $f(x) =$ _____.

a) $\frac{2}{\sqrt{1+x^2}}$ b) $\frac{\pi}{1+x^2}$

c) $\sqrt{\frac{2}{\pi}}\frac{1}{1+x^2}$ d) None

8) The particular Integral of $(D^2 - 2D + 1)y = -4e^x$ is _____.

a) $-2x^2e^x$ b) $-4x^2e^x$

c) $(C_1 + C_2x)e^x$ d) x^2e^x

9) The general solution of $(D^2 - 4)^2 y = 0$ is _____.

a) $y = C_1e^{2x} + C_2e^{-2x}$

b) $y = (C_1 + C_2x)e^{-2x} + (C_3 + C_4x)e^{2x}$

c) $y = C_1 \cos 2x + C_2 \sin 2x + (C_3 + C_4x)e^{2x}$

d) None of these

10) The value of $\frac{1}{D-a}X =$ _____.

a) $e^{-ax}\int e^{-ax}Xdx$ b) $e^{-ax}\int e^{ax}Xdx$

c) $e^{ax}\int e^{-ax}Xdx$ d) $e^{ax}\int e^{ax}Xdx$

11) $Lf(t)\delta(t-a) =$ _____.

a) $e^{-as}f(t)$ b) $e^{-as}f(a)$

c) $e^{as}f(a)$ d) $e^{-as}f(t-a)$

12) If $L\{f(t)\} = \frac{a}{s^2+a^2}$ then $L\left\{\int_0^1 f(t)dt\right\} =$ _____.

a) $\frac{1}{s(s^2+a^2)}$ b) $\frac{a}{s(s^2+a^2)}$

c) $\frac{as}{s^2+a^2}$ d) $\frac{as^2}{s^2+a^2}$

13) The inverse z-transform of $\frac{z}{z-3}, |z| > 3$ (with $k \geq 0$) is _____.

a) 3^{-k} b) 3^{k+1}

c) 3^{k} d) 3^{-k-1}

14) The rate of convergence of Newton-Raphson Method is _____.

a) 1 b) 2

c) $\sqrt{2}$ d) 3

MCQ/Objective Type Questions

Duration: 30 Minutes Marks: 14

Q.1 Choose the correct alternative from the given option. 14

1) The inverse z-transform of $\frac{z}{z-3}, |z| > 3$ (with $k \geq 0$) is _____.

a) 3^{-k} b) 3^{k+1}
c) 3^{k} d) 3^{-k-1}

2) The rate of convergence of Newton-Raphson Method is _____.

a) 1 b) 2
c) $\sqrt{2}$ d) 3

3) A positive real root of the equation $xe^{x} - 2 = 0$ is lies between _____.

a) 2 and 3 b) 1 and 2
c) 3 and 4 d) 0 and 1

4) Since $z\{1\} = \frac{z}{z-1}, z\{a^{k}\}, k \geq 0 =$ _____.

a) $\frac{z}{z-a}$ b) $\frac{z}{a(z-1)}$
c) $\frac{a}{z-a}$ d) $\frac{z}{az-1}$

5) In the interval $(0,1)$ the constant term in the cosine series of $f(x) = x^{2}$ is _____.

a) 0 b) $\frac{1}{2}$
c) $\frac{1}{3}$ d) $\frac{\pi}{4}$

6) In the cosine series of $f(x) = \pi x - x^2$ for $0 < x < \pi$, the constant term is _____.

a) $\frac{\pi^2}{4}$ b) $\frac{\pi^2}{16}$

c) $\frac{\pi^2}{6}$ d) $\frac{\pi^2}{2}$

7) For the function $f(x) \begin{matrix} = \\ = \end{matrix} \begin{matrix} 0, & -\pi < x < 0 \\ x, & 0 < x < \pi \end{matrix}$

The value of Fourier constant a_0 is _____.

a) $\frac{\pi^2}{4}$ b) $\frac{\pi}{4}$

c) $\frac{\pi^2}{2}$ d) $\frac{-\pi}{4}$

8) The half range sine series of $f(x)$ defined in the interval $(0, 2)$ is _____.

a) $f(x) = \sum_{n=1}^{\infty} b_n \sin nx$ b) $f(x) = \sum_{n=1}^{\infty} b_n \sin(2n\pi x)$

c) $f(x) = \sum_{n=1}^{\infty} b_n \sin\left(\frac{n\pi x}{2}\right)$ d) $f(x) = \sum_{n=1}^{\infty} a_n \cos\left(\frac{n\pi x}{2}\right)$

9) If $F_s(\lambda) = e^{-\lambda}$ then the function $f(x) =$ _____.

a) $\frac{2}{\sqrt{1+x^2}}$ b) $\frac{\pi}{1+x^2}$

c) $\sqrt{\frac{2}{\pi}}\frac{1}{1+x^2}$ d) None

10) The particular Integral of $(D^2 - 2D + 1)y = -4e^x$ is _____.

a) $-2x^2e^x$ b) $-4x^2e^x$

c) $(C_1 + C_2x)e^x$ d) x^2e^x

11) The general solution of $(D^2 - 4)^2 y = 0$ is _____.

a) $y = C_1e^{2x} + C_2e^{-2x}$

b) $y = (C_1 + C_2x)e^{-2x} + (C_3 + C_4x)e^{2x}$

c) $y = C_1 \cos 2x + C_2 \sin 2x + (C_3 + C_4x)e^{2x}$

d) None of these

12) The value of $\frac{1}{D-a}X =$ _____.

a) $e^{-ax}\int e^{-ax}Xdx$ b) $e^{-ax}\int e^{ax}Xdx$

c) $e^{ax}\int e^{-ax}Xdx$ d) $e^{ax}\int e^{ax}Xdx$

13) $Lf(t)\delta(t-a) =$ _____.

a) $e^{-as}f(t)$ b) $e^{-as}f(a)$

c) $e^{as}f(a)$ d) $e^{-as}f(t-a)$

14) If $L\{f(t)\} = \frac{a}{s^2+a^2}$ then $L\left\{\int_0^1 f(t)dt\right\} =$ _____.

a) $\frac{1}{s(s^2+a^2)}$ b) $\frac{a}{s(s^2+a^2)}$

c) $\frac{as}{s^2+a^2}$ d) $\frac{as^2}{s^2+a^2}$

Set **S**

S.Y. (B.Tech.) (Electronics & Telecommunication Engineering) (Semester - I) (New) (NEP CBCS) Examination: March/April – 2026
Mathematics for Software and Hardware (OE-01E)

Day & Date: Monday, 11-05-2026 Max. Marks: 56
Time: 03:00 PM To 06:00 PM

Instructions: 1) All question are compulsory.
2) Figures to the right indicate full marks.
3) Make suitable assumptions if necessary and state them clearly.
4) Use of non-programmable calculator is allowed.

SECTION – I

Q.2 Attempt Any Three. **09**

a) Solve: $(D^2+1)y = x\sin 2x$

b) Solve: $(D^2+4D+4)y = e^{3x}$

c) Find $L\left\{\frac{1}{t}(1-\cos t)\right\}$

d) Find $z\{ka^k + k\beta^k\}, k \geq 0$

e) Find the Laplace transform of $\int_0^t te^{-3t}\sin(4t)dt$

Q.3 Attempt Any Three. **09**

a) Solve $(D^2-1)y = X\cos 2x$

b) Find $L\left[\int_0^t te^{-4t}\sin(3t)dt\right]$

c) Find the inverse Laplace transform of following by using the Convolution theorem of $\left[\frac{1}{s(s^2+9)}\right]$

d) Find $Z\left\{3^k\cos\left(\frac{k\pi}{2}+\frac{\pi}{4}\right)\right\}, k \geq 0$

e) Find the Laplace Transform of $\{1+2t-3t^2+4t^3\}U(t-2)\}$

Q.4 Attempt Any Two. **10**

a) Find $L\{t.\sqrt{1-\sin t}\}$

b) Solve $(D^3+1)y = 3+e^{-x}+5e^{2x}$

c) Find $Z^{-1}\left\{\frac{1}{(z-a)^2}\right\}, |z| > |a|., |z| < |a|$

SECTION – II

Q.5 Attempt Any Three. **09**

a) Evaluate $\int_0^6 \frac{e^x}{1+x}dx$ using Simpson's 1/3rd rule, (Take $h = 1$)

b) Find the half-range cosine series for $f(x) = e^{-x}$ in $(0, \pi)$

c) Evaluate $\sqrt{37}$ by Newton Raphson method correct to four decimal places by taking initial approximation as $x_0 = 6$

d) Find the Fourier Sine transforms of $2e^{-5x} + 5e^{-2x}$

e) Find the Fourier series of $f(x) \begin{matrix} = & \pi x, & 0 < x < 1 \\ = & 0, & 1 < x < 2 \end{matrix}$

Q.6 Attempt Any Three. **09**

a) Obtain half range sine series for $f(x) = x$ in $0 < x < 2$

b) Find the positive root of the following by using Newton Raphson method correct to four decimal places $3x - \cos x - 1 = 0$

c) Evaluate $\int_0^6 \frac{1}{1+x^2}dx\ n = 6$ using Trapezoidal rule.

d) Find the Fourier transform of $f(x)$ if $f(x) = \begin{cases} 1, & 0 \le x < 1 \\ 0, & x > 0 \end{cases}$

e) Find the Fourier series of $f(x) = x \sin x, \ \ (0, 2\pi)$

Q.7 Attempt Any Two. **10**

a) Find the Fourier transform of

$f(x) \begin{matrix} = 1 & |x| & < & k \\ = 0 & |x| & > & k \end{matrix}$ and

hence evaluate

i) $\int_{-\infty}^{\infty} \frac{\sin sk \,.\cos sk}{s} ds$

ii) $\int_{-\infty}^{\infty} \frac{\sin ks}{s} ds$

b) Obtain the Fourier series of $f(x) = a^2 - x^2$ in $(-a, a)$

c) Find the Value of K_1 by Runge Kutta Method of fourth order if $\frac{dy}{dx} = 2x + 3y^2$ and $y(0.1) = 1.1165$ and $h = 0.1$

S.Y. (B.Tech.) (Electronics & Telecommunication Engineering) (Semester - I) (New) (NEP CBCS) Examination: March/April – 2026
Soft Skills and Personality Development (OE-01F)

Day & Date: Monday, 11-05-2026 Max. Marks: 70
Time: 03:00 PM To 06:00 PM

Instructions: 1) Q. No. 1 is compulsory. It should be solved in the first 30 minutes in Answer Book Page no 03 (Starting page of the Answer Book). Each question carries one mark
2) Don't forget to Mention question paper set (P/Q/R/S) on top on page.
3) Figures to the right indicates full marks.

MCQ/Objective Type Questions

Duration: 30 Minutes Marks:14

Q.1 Choose the correct alternatives from the following. **14**

1) In the process of communication, _____ is the person who encodes the message.
a) Receiver b) Driver
c) Cleaner d) Sender

2) Which among the following barriers is related to fault in the channel?
a) Physical b) Mechanical
c) Psychological d) All of above

3) The ability to recognize, understand and regulate your own emotions is called _____.
a) Empathy b) Self-awareness
c) Emotional intelligence d) Relationship management

4) Stress is defined as _____.
a) A physical or emotional reaction to challenges or demands
b) A type of disease
c) Only physical pain
d) A mental disorder

5) Time management means _____.
a) Doing work very quickly
b) Planning and organizing how to spend time effectively
c) Wasting time
d) Avoiding responsibilities

6) Effective non-verbal communication in presentations helps to _____.
a) Confuse the audience
b) Improve understanding and engagement
c) Reduce communication
d) Replace verbal communication

7) Which of the following helps in effective presentation?
a) Organizing ideas clearly b) Using complex language
c) Ignoring the audience d) All of the above

8) The main purpose of an interview is to _____.
a) Test physical strength
b) Assess a candidate's suitability
c) Conduct training
d) Provide entertainment

9) Which of the following is part of presentation etiquette?
a) Clear speaking b) Good posture
c) Proper visual aids d) All of the above

10) Good posture during a presentation indicates _____.
a) Confidence b) Nervousness
c) Disinterest d) Laziness

11) Which non-verbal factors help engage the audience?
a) Eye contact b) Facial expressions
c) Hand gestures d) All of the above

12) Prioritization in time management means _____.
a) Doing easy tasks first
b) Arranging tasks according to importance
c) Avoiding work
d) Doing everything at once

13) Procrastination means _____.
a) Completing work early b) Delaying tasks unnecessarily
c) Planning work d) Finishing tasks on time

14) Taking short breaks during work helps to _____.
a) Reduce efficiency b) Improve focus
c) Waste time d) Increase stress

Computational Statistics (ENTHON-01A)

Day & Date: Wednesday, 13-05-2026 Max. Marks: 70
Time: 03:00 PM To 06:00 PM

Instructions: 1) Q. No. 1 is compulsory. It should be solved in the first 30 minutes in Answer Book Page no 03 (Starting page of the Answer Book). Each question carries one mark.
2) Don't forget to Mention question paper set (P/Q/R/S) on top of page.
3) Figures to the right indicates full marks.

MCQ/Objective Type Questions

Duration: 30 Minutes Marks:14

Q.1 Choose correct option. **14**

1) In the regression equation $Y = 21 - 3X$, the slope is _____.
a) 21 b) -21
c) 3 d) -3

2) The difference between the actual Y value and predicted Y value found using a regression equation is called the _____.
a) Slope b) residual
c) outlier d) Scatter plot

3) All symmetrical distributions are Gaussian distribution.
a) True b) False
c) Both d) None of these

4) In square matrix, Sum of diagonal elements is given as _____.
a) trace b) rank
c) Eigen Value d) None

5) Skewness for Gaussian distribution is _____.
a) Zero b) Infinite
c) One d) None of these

6) In the regression equation $Y = 75.65 + 0.50X$, the intercept is _____.
a) 0.50 b) 75.65
c) 1.00 d) indeterminable

7) A die is thrown once. What is the probability that the score is a factor of 6?
a) $1/6$ b) $1/2$
c) $2/3$ d) 1

8) Rank of a $(m \times n)$ matrix is determined by the number of linearly rows present in the matrix.

a) Dependent
b) Independent
c) Both
d) None

9) Correlation values ranges from to _____

a) $-1, 1$
b) $-2, 1$
c) $-1, 2$
d) None

10) For orthogonal variables, correlation value is _____.

a) 0
b) 1
c) -1
d) None

11) Linear regression is example of learning _____.

a) Supervised
b) Un Supervised
c) Reinforcement
d) None

12) _____ is a state where the model cannot model itself on the training data.

a) Underfitting
b) Overfitting
c) Both
d) None

13) Overfitting has high _____.

a) Bias
b) Variance
c) Both
d) None

14) Following is/are applications of Machine Learning _____.

a) Self driving car
b) Email Spam Filtering
c) Product Recommendation
d) All

Q.2 Attempt Any Four **16**

a) From a standard deck of playing cards, a single card is drawn. The probability that the card is king is $4/52$, then calculate posterior probability P(King|Face), which means the drawn face card is a king card.

b) A die is rolled twice and two numbers are obtained, let X be the outcome of first role and Y be the outcome of the second roll. Given that $X + Y = 5$, what is the probability of $X = 4$ or $Y = 4$?

c) Solve following using Substitute method $2x - 3y = -2\ 4x + y = 24$.

d) Explain Gaussian distribution with its features in brief.

e) Explain regression with proper example.

Q.3 Attempt Any Two **12**

a) Sunil Chhetri is best Indian Soccer Player. He loves being Goalkeeper. But that depends on coach,
i) With coach Ashley probability of being Goalkeeper is 0.5
ii) With coach Khalid probability of being Goalkeeper is 0.3. Ashley is coach more often about 6 out of every 10. So, what is probability that Sunil will be goalkeeper today?

b) Consider two bags, an orange bag and black bag. There are 4 candies in orange bag and 5 candies in black bag. There are also 2 chocolates in orange bag and 3 chocolates in black bag. A sweet is to be chosen randomly from any of the bags. What is probability that chosen sweet is chocolate from black bag?

c) Explain construction of probability space. Also discuss Discrete and Continuous Probabilities in brief.

SECTION – II

Q.4 Attempt Any Four **16**

a) Differentiate between Supervised, Unsupervised and Reinforcement Learning.

b) Differentiate between Training data and Testing Data.

c) Explain in short applications of machine learning.

d) Explain backward feature elimination technique for dimensionality reduction.

e) Explain steps in PCA.

Q.5 Attempt Any Two **12**

a) Explain various issues in machine learning.

b) Explain the significance of Dimensionality Reduction.

c) What is Bias, Variance and what do you mean by Bias-Variance Trade-off? Differentiate between overfitting & Underfitting.

S.Y. (B.Tech.) (Electronics & Telecommunication Engineering) (Semester - I) (New) (NEP CBCS) Examination: March/April - 2026
Computational Statistics (ENTHON-01A)

Day & Date: Wednesday, 13-05-2026 Max. Marks: 70
Time: 03:00 PM To 06:00 PM

Instructions: 1) Q. No. 1 is compulsory. It should be solved in the first 30 minutes in Answer Book Page no 03 (Starting page of the Answer Book). Each question carries one mark.
2) Don't forget to Mention question paper set (P/Q/R/S) on top of page.
3) Figures to the right indicates full marks.

MCQ/Objective Type Questions

Duration: 30 Minutes Marks:14

Q.1 Choose correct option. **14**

1) Rank of a $(m \times n)$ matrix is determined by the number of linearly rows present in the matrix.
a) Dependent b) Independent
c) Both d) None

2) Correlation values ranges from to _____
a) $-1, 1$ b) $-2, 1$
c) $-1, 2$ d) None

3) For orthogonal variables, correlation value is _____.
a) 0 b) 1
c) -1 d) None

4) Linear regression is example of learning _____.
a) Supervised b) Un Supervised
c) Reinforcement d) None

5) _____ is a state where the model cannot model itself on the training data.
a) Underfitting b) Overfitting
c) Both d) None

6) Overfitting has high _____.
a) Bias b) Variance
c) Both d) None

7) Following is/are applications of Machine Learning _____.
a) Self driving car b) Email Spam Filtering
c) Product Recommendation d) All

8) In the regression equation $Y = 21 - 3X$, the slope is _____.
a) 21 b) -21
c) 3 d) -3

9) The difference between the actual Y value and predicted Y value found using a regression equation is called the _____.
a) Slope b) residual
c) outlier d) Scatter plot

10) All symmetrical distributions are Gaussian distribution.
a) True b) False
c) Both d) None of these

11) In square matrix, Sum of diagonal elements is given as _____.
a) trace b) rank
c) Eigen Value d) None

12) Skewness for Gaussian distribution is _____.
a) Zero b) Infinite
c) One d) None of these

13) In the regression equation $Y = 75.65 + 0.50X$, the intercept is _____.
a) 0.50 b) 75.65
c) 1.00 d) indeterminable

14) A die is thrown once. What is the probability that the score is a factor of 6?
a) $1/6$ b) $1/2$
c) $2/3$ d) 1

Seat No.

3) Figures to the right indicates full marks.
4) Assume suitable data if required.

MCQ/Objective Type Questions

Duration: 30 Minutes Marks:14

Q.1 Choose the correct option from the following. 14

1) Which of the following is not included in DML (Data Manipulation Language)?
a) UPDATE b) CREATE
c) INSERT d) DELETE

2) Tables in second normal form (2NF) _____.
a) Eliminate all hidden dependencies
b) Eliminate the possibility of a insertion anomalies
c) Have a composite key
d) Have all non-key fields depend on the whole primary key

3) The basic data type char(n) is a _____ length character string and varchar(n) is _____ length character.
a) Fixed, equal b) Equal, variable
c) Fixed, variable d) Variable, equal

4) A transaction is delimited by statements (or function calls) of the form _____.
a) Begin transaction and end transaction
b) Start transaction and stop transaction
c) Get transaction and post transaction
d) Read transaction and write transaction

5) A _____ in a table represents a relationship among a set of values.
a) Column b) Key
c) Row d) Entry

6) Which one of the following is a procedural language?
a) Domain relational calculus b) Tuple relational calculus
c) Relational algebra d) Query language

7) Which of the following is used at the end of the view to reject the tuples which do not satisfy the condition in where clause?
a) With b) Check
c) With check d) All of the mentioned

8) For the view Create view instructor_jnfo as
SELECT ID, name, building
FROM instructor, department
WHERE instructor.dept name= department.dept name;
If we insert tuple into the view as insert into instructor info values (’69987’, ’White’, ’Taylor’);
What will be the values of the other attributes in instructor and department relations?
a) Default value b) Null
c) Error statement d) 0

9) In the _____ normal form, a composite attribute is converted to individual attributes.
a) First b) Second
c) Third d) Fourth

10) To include integrity constraint in an existing relation use _____.
a) Create table b) Modify table
c) Alter table d) Drop table

11) Which of the following is not an integrity constraint?
a) Not null b) Positive
c) Unique d) Check ‘predicate’

12) What are the ways of dealing with deadlock?
a) Deadlock prevention b) Deadlock recovery
c) Deadlock detection d) All of the mentioned

13) In a _____ clustering index, the index record contains the search-key value and a pointer to the first data record with that search-key value and the rest of the records will be in the sequential pointers.
a) Dense b) Sparse
c) Straight d) Continuous

14) The union operation automatically _____ unlike the select clause.
a) Adds tuples b) Eliminates unique tuples
c) Adds common tuples d) Eliminates duplicate

a) Dense b) Sparse
c) Straight d) Continuous

4) The union operation automatically _____ unlike the select clause.
a) Adds tuples b) Eliminates unique tuples
c) Adds common tuples d) Eliminates duplicate

5) Which of the following is not included in DML (Data Manipulation Language)?
a) UPDATE b) CREATE
c) INSERT d) DELETE

6) Tables in second normal form (2NF) _____.
a) Eliminate all hidden dependencies
b) Eliminate the possibility of a insertion anomalies
c) Have a composite key
d) Have all non-key fields depend on the whole primary key

7) The basic data type char(n) is a _____ length character string and varchar(n) is _____ length character.
a) Fixed, equal
b) Equal, variable
c) Fixed, variable
d) Variable, equal

8) A transaction is delimited by statements (or function calls) of the form _____.
a) Begin transaction and end transaction
b) Start transaction and stop transaction
c) Get transaction and post transaction
d) Read transaction and write transaction

9) A _____ in a table represents a relationship among a set of values.
a) Column
b) Key
c) Row
d) Entry

10) Which one of the following is a procedural language?
a) Domain relational calculus
b) Tuple relational calculus
c) Relational algebra
d) Query language

11) Which of the following is used at the end of the view to reject the tuples which do not satisfy the condition in where clause?
a) With
b) Check
c) With check
d) All of the mentioned

12) For the view Create view instructor_jnfo as
SELECT ID, name, building
FROM instructor, department
WHERE instructor.dept name= department.dept name;
If we insert tuple into the view as insert into instructor info values (’69987’, ’White’, ’Taylor’);
What will be the values of the other attributes in instructor and department relations?
a) Default value
b) Null
c) Error statement
d) 0

13) In the _____ normal form, a composite attribute is converted to individual attributes.
a) First
b) Second
c) Third
d) Fourth

14) To include integrity constraint in an existing relation use _____.
a) Create table
b) Modify table
c) Alter table
d) Drop table

Set **R**

S.Y. (B.Tech.) (Electronics & Telecommunication Engineering) (Semester - I) (New) (NEP CBCS) Examination: March/April - 2026
Database Management System (ENTHON-01B)

Day & Date: Wednesday, 13-05-2026 Max. Marks: 56
Time: 03:00 PM To 06:00 PM

Instructions: 1) All questions are compulsory.
2) Assume suitable data if required.
3) Figures to the right indicates full marks.

SECTION – I

Q.2 Solve Any Four questions. **16**

a) What are the functions of database administrator?

b) Write a short note on Database Languages.

c) Explain different Integrity constraints and Authorization SQL queries with examples.

d) Explain different Set operations in SQL.

e) Give the difference between Specialization and Generalization.

Q.3 Solve Any Two questions. **12**

a) Explain with proper example following Relational algebra Operations.
i) Select
ii) Project
iii) Union
iv) Set- Difference
v) Cartesian-Product
vi) Set - Intersection

b) Write in brief Nested subqueries with example.

c) Explain with example various attributes types in ER model. (draw company ER diagram)

SECTION – II

Q.4 Solve Any Four questions. **16**

a) Give and explain the good reasons for allowing concurrency in detail.

b) Write a short note on Two phase locking protocol.

c) Explain in detail the concept of Conflict serializability with example.

d) Write a short note on Multiple Key access.

e) Explain natural join operation with example.

Q.5 Solve Any Two questions. **12**

a) Explain the distinction between closed and open hashing. Discuss merits of both techniques in database applications.

b) Explain Time stamp ordering protocol with example.

c) What is transaction? Explain its state diagram.

Set | S

S.Y. (B.Tech.) (Electronics & Telecommunication Engineering) (Semester - I) (New) (NEP CBCS) Examination: March/April – 2026
Database Management System (ENTHON-01B)

Day & Date: Wednesday, 13-05-2026 Max. Marks: 70
Time: 03:00 PM To 06:00 PM

Instructions: 1) Q. No. 1 is compulsory. It should be solved in the first 30 minutes in Answer Book Page no 03 (Starting page of the Answer Book). Each question carries one mark.
2) Don't forget to Mention question paper set (P/Q/R/S) on top of page.
3) Figures to the right indicates full marks.
4) Assume suitable data if required.

MCQ/Objective Type Questions

Duration: 30 Minutes Marks:14

Q.1 Choose the correct option from the following. **14**

1) Which one of the following is a procedural language?
a) Domain relational calculus b) Tuple relational calculus
c) Relational algebra d) Query language

2) Which of the following is used at the end of the view to reject the tuples which do not satisfy the condition in where clause?
a) With b) Check
c) With check d) All of the mentioned

3) For the view Create view instructor_jnfo as
SELECT ID, name, building
FROM instructor, department
WHERE instructor.dept name= department.dept name;
If we insert tuple into the view as insert into instructor info values ('69987', 'White', 'Taylor');
What will be the values of the other attributes in instructor and department relations?
a) Default value b) Null
c) Error statement d) 0

4) In the _____ normal form, a composite attribute is converted to individual attributes.
a) First b) Second
c) Third d) Fourth

5) To include integrity constraint in an existing relation use _____.
a) Create table b) Modify table
c) Alter table d) Drop table

6) Which of the following is not an integrity constraint?
a) Not null
b) Positive
c) Unique
d) Check 'predicate'

7) What are the ways of dealing with deadlock?
a) Deadlock prevention
b) Deadlock recovery
c) Deadlock detection
d) All of the mentioned

8) In a _____ clustering index, the index record contains the search-key value and a pointer to the first data record with that search-key value and the rest of the records will be in the sequential pointers.
a) Dense
b) Sparse
c) Straight
d) Continuous

9) The union operation automatically _____ unlike the select clause.
a) Adds tuples
b) Eliminates unique tuples
c) Adds common tuples
d) Eliminates duplicate

10) Which of the following is not included in DML (Data Manipulation Language)?
a) UPDATE

4) Assume suitable data if necessary and mention it clearly.

MCQ/Objective Type Questions

Duration: 30 Minutes Marks:14

Q.1 Choose the correct alternatives from the options. 14

1) The first passenger train in India ran between _____.
a) Delhi and Agra b) Mumbai and Thane
c) Chennai and Arakkonam d) Kolkata and Howrah

2) The total route length of Indian Railways is approximately _____.
a) 25,000 km b) 45,000 km
c) 67,000 km d) 90,000 km

3) Which of the following is responsible for ensuring railway safety?
a) Railway Board
b) Railway Safety Commission
c) Commission of Railway Safety
d) Ministry of Transport

4) The Railway Recruitment Boards (RRBs) are responsible for ____.
a) Ticket booking b) Recruitment of staff
c) Safety inspection d) Accounting

5) The Indian Railways Information Systems (CRIS) mainly deals with ____.
a) Ticketing and freight management
b) Locomotive maintenance
c) Track construction
d) Bridge design

6) The term “locomotive"’ refers to _____.
   a) A passenger coach
   b) A self-propelled vehicle for pulling trains
   c) A goods wagon
   d) A type of rail

7) Which is not part of Railway track layer?
   a) Ballast
   b) Fishplate
   c) Switches
   d) Subgrade

8) The _____ is the centralized agency for railway electrification of Indian Railways.
   a) CORE
   b) CRIS
   c) PRS
   d) Central Railway Board

9) Which is not part of Rail?
   a) Head
   b) Web
   c) Foot
   d) Frog

10) Which of following is not the advantage of maglev trains?
   a) Higher top speeds
   b) Superior acceleration and deceleration
   c) Higher noise
   d) Lower maintenance costs

11) Which is not Problem with overhead equipment?
   a) Power storms can knock the power out
   b) Ice may coat overhead lines
   c) Dewirement due to rails
   d) Lines may sag during hot weather

12) Indian Railways propose to install large format display screens under _____ the project.
   a) Railway Board
   b) Railway Display Network (“RDN”)
   c) Railway Ministry
   d) Railway Department

13) The first Metro train in India _____
   a) Mumbai
   b) Kolkatta
   c) Delhi
   d) Chennai

14) Which technology does Maglev trains uses for transportation?
   a) Hydroelectric
   b) Electrification
   c) Magnetic levitation
   d) Using fossil fuels

Answer

Q.1 Solve following Multiple Choice Questions.

1) Value education enables us _____.
a) To understand our needs
b) Visualize our goals correctly
c) Indicate the direction for their fulfillment
d) All of the above

2) One of the basic desires of every human being is to be always _____.
a) Happy b) Sad
c) Laugh d) Earn Money

3) _____ is the basic unit of any human society.
a) Group b) Individual
c) Nature d) Society

4) Natural acceptance & _____ are the two processes of knowing.
a) Self -Actualization b) Self Exploration
c) Self Evaluation d) Self Control

5) Present Education system gives more focus to skills.
a) True b) False
c) May be d) None of the above

6) Value of an entity is _____.
a) Physical Facility
b) Prosperity
c) Its participation in larger order of which it is part
d) Both a and b

7) _____ are as Basic Human Aspirations.
a) Money
b) Relationship without money
c) Physical Facility
d) Continuous Happiness & Prosperity

8) Any course content on value education needs to be _____.
a) Universal b) Rational
c) Natural d) All of above

9) When we live with correct understanding of values, we feel _____.
a) Deprived b) Frustrated
c) Happy d) Unhappy

10) Following are the basic guidelines for value education except _____.
a) Universal b) Personal
c) Rational d) Natural

11) Please give the correct priority for Physical Facilities, Right Understanding and Relationship.
a) Physical Facilities, Right Understanding and Relationship
b) Relationship, Right Understanding and Physical Facilities
c) Right Understanding, Relationship and Physical Facilities
d) None of the above

12) Right Understanding and relationships lead to _____.
a) Mutual Happiness b) Mutual Prosperity
c) Both a and b d) All are wrong

13) Right Understanding and Physical Facilities leads to _____.
a) Mutual Happiness b) Mutual Prosperity
c) Both a and b d) All are wrong

14) ____ are the content of self-exploration.
a) Program b) Desire
c) Both a and b d) None of the above

15) To be in state of liking is _____.
a) Happy b) Unhappy
c) Both a and b d) None of the above

16) _____ helps the human being to transform from Animal consciousness to human consciousness.
a) Physical Facility b) Right understanding
c) Relationship d) All of above

17) _____ is only a means to achieve what is considered valuable for a human being in an effective and efficient manner.

a) Value b) Skill
c) Technology d) All of above

18) _____ means physical facilities more than to satisfy my needs.

a) Health b) Prosperity
c) Happiness d) None of above

19) If something is _____ to us, without any force or compulsion, then it is often correct and does not change with time and people.

a) naturally acceptable b) pushed
c) common d) None of above

20) Physical facilities are necessary and complete for _____.

a) Animal b) Human being
c) Nature d) All of the above

21) Beside physical facilities human being want _____.

a) Name b) Fame
c) Relationship d) None of the above

22) When you are living with pre-conditionings and accumulated desires without evaluating them, then it means that you are _____.

a) Swatantra b) Partantra
c) Prosperous d) None of the above

23) To be in state of _____ is unhappiness.

a) Disharmony b) Contradiction
c) Disharmony or contradiction d) None of the above

24) Which of following leads to variety of problems at different levels of our living?

a) Lack of right understanding of happiness
b) Lack of right understanding of prosperity
c) Lack of right understanding of happiness & prosperity
d) Lack of awareness towards health

25) Working only for physical facilities in living is called _____.

a) Animal Consciousness b) Human Consciousness
c) Rich Consciousness d) None of these

26) Self and _____ are different in nature, materiality, needs and activities.

a) Trust b) Body
c) Belief d) None of the above

27) Sukh and _____ both are needed and can't replace each other.

a) Self b) Body
c) Suvidha d) Belief

28) In value education Sanyama means _____.

a) Self-regulation b) Health
c) Happiness d) Prosperity

29) Sadupyog of the Body mean _____ of the Body.

a) Self-regulation b) Care
c) Happiness d) Right utilization

30) Knowing means having the _____.

a) Assumption b) Right understanding
c) Right feeling d) None of the above

31) Each human being is co-existence of the _____ and the _____.

a) self, self b) body, body
c) self, body d) None of the above

32) _____ is the feeling of responsibility for nurturing, protecting and right utilizing the body.

a) Swasthya b) Sanyam
c) Prosperity d) None of the above

33) The system of the body works in a _____ way.

a) Happy b) Self organized
c) Random d) Independent

34) The self is _____ in nature while body is _____ in nature.

a) Unconscious, Physico-chemical
b) Conscious, Physico-chemical
c) Physico-chemical, Conscious
d) Physico-chemical, Unconscious

35) The activity of desire, thought and expecting together is called as _____.

a) Body b) Health
c) Imagination d) Future

36) Harmony should be maintained in _____.

a) Between body and life
b) Between self and society
c) Between life and environment
d) All the above

37) Sah-astitva means _____.

a) Co-existence b) Co-operation
c) Co-ordination d) Corporate identity

38) The process of education and right living leads to _____ in the individual.

a) Right understanding b) Health
c) Prosperity d) None of the above

39) Ensuring justice in the relationship, on the basis of values leads to _____ in society.

a) Fearlessness b) Confusion
c) Confidence d) Fear

40) _____ is the foundational value in relationship.

a) Respect b) Love
c) Trust d) Glory

41) To be assured of others at all time is the feeling of _____.

a) Respect b) Love
c) Trust d) Glory

42) _____ is the feeling for someone who has made efforts for excellence.

a) Reverence b) Glory
c) Gratitude d) Guidance

43) _____ is the feeling of acceptance for those who have made efforts for my excellence.

a) Reverence b) Glory
c) Gratitude d) Guidance

44) The feeling of relatedness to all human beings is called _____.

a) Love b) Affection
c) Gratitude d) Respect

45) All the units of nature can be classified into _____ orders.

a) Two b) Three
c) Four d) Six

46) Which of the following does not form an order in nature?

a) Bio b) Animal
c) Consciousness d) Human

47) Which of the following statement is not true?

a) There is interconnectedness in nature
b) There is recyclability and self-regulation in nature
c) There is struggle for survival in nature
d) There is mutual fulfillment in nature

48) Harmony in the family is the building block for harmony in the _____.

a) society b) individual
c) friend d) relative

49) _____ in the family means that the family is able to identify its needs.

a) wealth
b) prosperity
c) harmony
d) happiness

50) _____ means right evaluation.

a) Respect
b) Love
c) Trust
d) Glory

Answer

Q.1 Solve following Multiple Choice Questions.

1) Beside physical facilities human being want _____.
a) Name b) Fame
c) Relationship d) None of the above

2) When you are living with pre-conditionings and accumulated desires without evaluating them, then it means that you are _____.
a) Swatantra b) Partantra
c) Prosperous d) None of the above

3) To be in state of _____ is unhappiness.
a) Disharmony b) Contradiction
c) Disharmony or contradiction d) None of the above

4) Which of following leads to variety of problems at different levels of our living?
a) Lack of right understanding of happiness
b) Lack of right understanding of prosperity
c) Lack of right understanding of happiness & prosperity
d) Lack of awareness towards health

5) Working only for physical facilities in living is called _____.
a) Animal Consciousness b) Human Consciousness
c) Rich Consciousness d) None of these

6) Self and _____ are different in nature, materiality, needs and activities.
a) Trust b) Body
c) Belief d) None of the above

7) Sukh and _____ both are needed and can't replace each other.
a) Self b) Body
c) Suvidha d) Belief

8) In value education Sanyama means _____.
a) Self-regulation b) Health
c) Happiness d) Prosperity

9) Sadupyog of the Body mean _____ of the Body.
a) Self-regulation b) Care
c) Happiness d) Right utilization

10) Knowing means having the _____.
a) Assumption b) Right understanding
c) Right feeling d) None of the above

11) Each human being is co-existence of the _____ and the _____.
a) self, self b) body, body
c) self, body d) None of the above

12) _____ is the feeling of responsibility for nurturing, protecting and right utilizing the body.
a) Swasthya b) Sanyam
c) Prosperity d) None of the above

13) The system of the body works in a _____ way.
a) Happy b) Self organized
c) Random d) Independent

14) The self is _____ in nature while body is _____ in nature.
a) Unconscious, Physico-chemical
b) Conscious, Physico-chemical
c) Physico-chemical, Conscious
d) Physico-chemical, Unconscious

15) The activity of desire, thought and expecting together is called as _____.
a) Body b) Health
c) Imagination d) Future

16) Harmony should be maintained in _____.
a) Between body and life
b) Between self and society
c) Between life and environment
d) All the above

17) Sah-astitva means _____.
a) Co-existence b) Co-operation
c) Co-ordination d) Corporate identity

18) The process of education and right living leads to _____ in the individual.

a) Right understanding b) Health
c) Prosperity d) None of the above

19) Ensuring justice in the relationship, on the basis of values leads to _____ in society.

a) Fearlessness b) Confusion
c) Confidence d) Fear

20) _____ is the foundational value in relationship.

a) Respect b) Love
c) Trust d) Glory

21) To be assured of others at all time is the feeling of _____.

a) Respect b) Love
c) Trust d) Glory

22) _____ is the feeling for someone who has made efforts for excellence.

a) Reverence b) Glory
c) Gratitude d) Guidance

23) _____ is the feeling of acceptance for those who have made efforts for my excellence.

a) Reverence b) Glory
c) Gratitude d) Guidance

24) The feeling of relatedness to all human beings is called _____.

a) Love b) Affection
c) Gratitude d) Respect

25) All the units of nature can be classified into _____ orders.

a) Two b) Three
c) Four d) Six

26) Which of the following does not form an order in nature?

a) Bio b) Animal
c) Consciousness d) Human

27) Which of the following statement is not true?

a) There is interconnectedness in nature
b) There is recyclability and self-regulation in nature
c) There is struggle for survival in nature
d) There is mutual fulfillment in nature

28) Harmony in the family is the building block for harmony in the _____.

a) society b) individual
c) friend d) relative

29) _____ in the family means that the family is able to identify its needs.

a) wealth b) prosperity
c) harmony d) happiness

30) _____ means right evaluation.

a) Respect b) Love
c) Trust d) Glory

31) Value education enables us _____.

a) To understand our needs
b) Visualize our goals correctly
c) Indicate the direction for their fulfillment
d) All of the above

32) One of the basic desires of every human being is to be always _____.

a) Happy b) Sad
c) Laugh d) Earn Money

33) _____ is the basic unit of any human society.

a) Group b) Individual
c) Nature d) Society

34) Natural acceptance & _____ are the two processes of knowing.

a) Self -Actualization b) Self Exploration
c) Self Evaluation d) Self Control

35) Present Education system gives more focus to skills.

a) True b) False
c) May be d) None of the above

36) Value of an entity is _____.

a) Physical Facility
b) Prosperity
c) Its participation in larger order of which it is part
d) Both a and b

37) _____ are as Basic Human Aspirations.

a) Money
b) Relationship without money
c) Physical Facility
d) Continuous Happiness & Prosperity

38) Any course content on value education needs to be _____.

a) Universal b) Rational
c) Natural d) All of above

39) When we live with correct understanding of values, we feel _____.
a) Deprived b) Frustrated
c) Happy d) Unhappy

40) Following are the basic guidelines for value education except _____.
a) Universal b) Personal
c) Rational d) Natural

41) Please give the correct priority for Physical Facilities, Right Understanding and Relationship.
a) Physical Facilities, Right Understanding and Relationship
b) Relationship, Right Understanding and Physical Facilities
c) Right Understanding, Relationship and Physical Facilities
d) None of the above

42) Right Understanding and relationships lead to _____.
a) Mutual Happiness b) Mutual Prosperity
c) Both a and b d) All are wrong

43) Right Understanding and Physical Facilities leads to _____.
a) Mutual Happiness b) Mutual Prosperity
c) Both a and b d) All are wrong

44) ____ are the content of self-exploration.
a) Program b) Desire
c) Both a and b d) None of the above

45) To be in state of liking is _____.
a) Happy b) Unhappy
c) Both a and b d) None of the above

46) _____ helps the human being to transform from Animal consciousness to human consciousness.
a) Physical Facility b) Right understanding
c) Relationship d) All of above

47) _____ is only a means to achieve what is considered valuable for a human being in an effective and efficient manner.
a) Value b) Skill
c) Technology d) All of above

48) _____ means physical facilities more than to satisfy my needs.
a) Health b) Prosperity
c) Happiness d) None of above

49) If something is _____ to us, without any force or compulsion, then it is often correct and does not change with time and people.

a) naturally acceptable b) pushed
c) common d) None of above

50) Physical facilities are necessary and complete for _____.

a) Animal b) Human being
c) Nature d) All of the above

a) Respect b) Love
c) Trust d) Glory

32) _____ is the feeling for someone who has made efforts for excellence.

a) Reverence b) Glory
c) Gratitude d) Guidance

33) _____ is the feeling of acceptance for those who have made efforts for my excellence.

a) Reverence b) Glory
c) Gratitude d) Guidance

34) The feeling of relatedness to all human beings is called _____.

a) Love b) Affection
c) Gratitude d) Respect

35) All the units of nature can be classified into _____ orders.

a) Two b) Three
c) Four d) Six

36) Which of the following does not form an order in nature?

a) Bio b) Animal
c) Consciousness d) Human

37) Which of the following statement is not true?

a) There is interconnectedness in nature
b) There is recyclability and self-regulation in nature
c) There is struggle for survival in nature
d) There is mutual fulfillment in nature

38) Harmony in the family is the building block for harmony in the _____.

a) society b) individual
c) friend d) relative

39) _____ in the family means that the family is able to identify its needs.

a) wealth b) prosperity
c) harmony d) happiness

40) _____ means right evaluation.

a) Respect b) Love
c) Trust d) Glory

41) Value education enables us _____.

a) To understand our needs
b) Visualize our goals correctly
c) Indicate the direction for their fulfillment
d) All of the above

42) One of the basic desires of every human being is to be always _____.

a) Happy b) Sad
c) Laugh d) Earn Money

43) _____ is the basic unit of any human society.

a) Group b) Individual
c) Nature d) Society

44) Natural acceptance & _____ are the two processes of knowing.

a) Self -Actualization b) Self Exploration
c) Self Evaluation d) Self Control

45) Present Education system gives more focus to skills.

a) True b) False
c) May be d) None of the above

46) Value of an entity is _____.

a) Physical Facility
b) Prosperity
c) Its participation in larger order of which it is part
d) Both a and b

47) _____ are as Basic Human Aspirations.

a) Money
b) Relationship without money
c) Physical Facility
d) Continuous Happiness & Prosperity

48) Any course content on value education needs to be _____.

a) Universal b) Rational
c) Natural d) All of above

49) When we live with correct understanding of values, we feel _____.

a) Deprived
b) Frustrated
c) Happy
d) Unhappy

50) Following are the basic guidelines for value education except _____.

a) Universal
b) Personal
c) Rational
d) Natural

Set **P**

S.Y. (B.Tech.) (Electronics & Telecommunication Engineering) (Semester - I) (CBCS) Examination: March/April – 2026
Engineering Mathematics – III (BTN06301)

Day & Date: Monday, 18-05-2026 Max. Marks: 70
Time: 03:00 PM To 06:00 PM

Instructions: 1) Q. No. 1 is compulsory. It should be solved in the first 30 minutes in Answer Book Page no 03 (Starting page of the Answer Book). Each question carries one mark.
2) Don't forget to Mention question paper set (P/Q/R/S) on top of page.
3) Figures to the right indicates full marks.
4) Assume suitable data if necessary and state it clearly.
5) Use of non-programmable scientific calculator allowed.

MCQ/Objective Type Questions

Duration: 30 Minutes Marks:14

Q.1 Choose the correct Answer. **14**

1) The complementary function of the equation $[(D+1)^2(D+4)]y = 2t$ is _____.

a) $c_1e^{-t} + c_2e^{-4t} + c_3e^{t}$ b) $c_1\cos t + c_2\sin t + c_3e^{-4t}$

c) $(c_1 + c_2t)e^{t} + c_3e^{-4t}$ d) $(c_1 + c_2t)e^{-t} + c_3e^{-4t}$

2) The general solution of $(D^4 + 2D^2 + 1)y = 0$ is _____.

a) $c_1\cos x + c_2\sin x + c_3\cos x + c_4\sin x$

b) $(c_1 + c_2x)e^{x}$

c) $(c_1 + c_2x)\cos x + (c_3 + c_4x)\sin x$

d) $(c_1 + c_2x + c_3x^2 + c_4x^3)e^{-x}$

3) The value of the integral $\int_0^{\infty} e^{-2t}\cos 3t dt$ is _____.

a) $1/13$ b) $2/13$

c) 13^2 d) 13

4) $L^{-1}\left\{\frac{1}{s^2-3^2}\right\} =$ _____.

a) $\frac{1}{3}\sin 3t$ b) $\frac{1}{3}\cos 3t$

c) $\frac{1}{3}\cosh 3t$ d) $\frac{1}{3}\sinh 3t$

5) The formula used for solving the equation using Regula Falsi method is _____.

I) $x = \frac{bf(a) - af(b)}{f(a) - f(b)}$ II) $x = \frac{af(b) - bf(a)}{f(a) - f(b)}$

a) Only I is correct b) Only II is correct

c) Both I, II are correct d) Both I, II are incorrect

6) The value of $\int_0^1 \frac{dx}{1+x}$ by Gaussian three point formula is _____.

a) 0.6931 b) 0.7931
c) 0.8931 d) None

7) Which of the following is not a Dirichlet's condition?

a) $f(x)$ is periodic b) $f(x)$ is single valued
c) $f(x)$ is even function d) $f(x)$ is infinite

8) If $f(x) = x^2$ is expanded as a cosine series in $(0, \pi)$ then the constant term is _____.

a) $\frac{\pi^2}{3}$ b) $\frac{\pi^3}{3}$
c) $\frac{2\pi^2}{3}$ d) $\frac{3\pi^2}{2}$

9) Correlation analysis help us to _____ our activities.

a) Control b) Plan
c) Predict d) All of above

10) A discrete probability distribution function of a discrete random variable is given by,

x:	0	1	2	3	4
$P(x)$:	k	$3k$	$5k$	$4k$	$2k$

then $k =$ _____.

a) $1/3$ b) $1/15$
c) $1/5$ d) 1

11) If $L\{f(t)\} = \frac{1}{s}e^{-1/s}$, then $L\{f(3t)\} =$ _____.

a) $\frac{1}{s}e^{-3/s}$ b) $\frac{1}{3s}e^{-3/s}$
c) $\frac{1}{3}e^{-3/s}$ d) $\frac{1}{3}e^{-s/3}$

12) If $b_{yx} = {}^{5}/_{18}$, $b_{xy} = {}^{8}/_{5}$, then $r =$ _____.

a) $2/5$ b) $2/3$
c) $1/2$ d) $3/2$

13) The Fourier cosine transform of $f(x) = \begin{cases} 1, & 0 \le x < 1 \\ 0, & x > 1 \end{cases}$ is _____.

a) $\sqrt{\frac{2}{\pi}}s$ b) $\sqrt{\frac{2}{\pi}}\sin s$
c) $\sqrt{\frac{2}{\pi}}\frac{\sin s}{s}$ d) $\sqrt{\frac{2}{\pi}}\frac{s}{\sin s}$

14) The Fourier sine integral of $f(x)$ is _____.

a) $\int_0^\infty f(s) \sin ws \, ds$

b) $\int_0^\infty \sin wx \times \left(\int_0^\infty f(w) \sin ws \, ds\right) dw$

c) $\frac{1}{\pi}\int_0^\infty \sin wx \times \left(\int_0^\infty f(w) \sin ws \, ds\right) dw$

d) $\frac{2}{\pi}\int_0^\infty \sin wx \times \left(\int_0^\infty f(w) \sin ws \, ds\right) dw$

Set P

S.Y. (B.Tech.) (Electronics & Telecommunication Engineering) (Semester - I) (CBCS) Examination: March/April – 2026
Engineering Mathematics – III (BTN06301)

Day & Date: Monday, 18-05-2026 Max. Marks: 56
Time: 03:00 PM To 06:00 PM

Instructions: 1) All questions are compulsory.
2) Figures to the right indicate full marks.
3) Assume suitable data if necessary and state it clearly.
4) Use of non-programmable scientific calculator allowed.

Section – I

Q.2 Attempt the following. (Any Three) **09**

a) Solve $(D^4 + 8D^2 + 16)y = \sin^2 x$

b) Obtain Fourier series expansion of $f(x) = \frac{x(\pi^2 - x^2)}{12}$ in $(-\pi, \pi)$.

c) In a sample of 1000 students, the mean and standard deviation of marks obtained by the students in a certain test are 14 and 2.5. Assuming the distribution to be normal find the number of students getting marks
i) between 12 and 15
ii) above 18
iii) below 8

(Given: - For a S. N. V. z area between $z = 0$ and $z = 0.4$ is 0.1554, that between $z = 0$ and $z = 0.8$ is 0.2881, that between $z = 0$ and $z = 1.6$ is 0.4452, that between $z = 0$ and $z = 2.4$ is 0.4918.)

d) Calculate
i) k
ii) $p(x > 5)$
iii) $p(0 \leq x \leq 5)$, if a random variable x has the following probability distribution

x	1	2	3	4	5	6	7
$p(x)$	k	$2k$	$3k$	k^2	$k^2 + k$	$2k^2$	$4k^2$

e) Solve $(D^2 - 2D + 1)y = x^2 e^{3x}$

Q.3 Attempt the following. (Any Three) **09**

a) Solve $(D^3 - D^2 - 6D)y = x^2 + 1$

b) Obtain half range cosine series of $f(x) = e^{-x}$ in $0 < x < \pi$

c) Calculate the correlation co-efficient between x and y, if Nine students obtained the following percentage of marks in the college examination (x) and in the University examination (y).

x	51	53	73	46	50	60	47	36	60
y	49	72	74	44	58	66	50	30	55

d) Assuming that half of the population in a city is vegetarian so that the chance of an individual being vegetarian is 1/2 and assuming that 100 investigators take a sample of 10 individuals to see whether they are vegetarian, how many investigators would you expect to report that three people or less were vegetarian.

e) Obtain the Fourier series expansion of, $f(x) = 2x - x^2$ in $(0,3)$.

Q.4 Attempt the following. (Any Two) **10**

a) An uncharged condenser of capacity C is charged by applying an electromotive force of value $\mathrm{E}\sin\mathrm{pt}$ through the leads of an inductance L and negligible resistance. The charge Q on the plate of the condenser satisfies the differential equation $\frac{d^2Q}{dt^2} + \frac{Q}{LC} = \frac{E}{L}\sin nt$. Prove that charge at any time t is given by, $Q = \frac{E}{2n^2L}[\sin nt - nt.\cos nt]$ where $n^2 = \frac{1}{LC}$

b) Obtain the Fourier series of, $f(x) = \left(\frac{\pi - x}{2}\right)^2$, in $(0,2\pi)$ and hence deduce that.

$$\frac{\pi^2}{6} = \frac{1}{1^2} + \frac{1}{2^2} + \frac{1}{3^2} + \frac{1}{4^2} + \cdots$$

c) Calculate the equations of two lines of regression and calculate expected height of son when the height of father is 154 cms. Heights of fathers and sons are given below.

Ht. of Father(x)	150	152	155	157	160	161	164	166
Ht. of Son(y)	154	156	158	159	160	162	161	164

Section – II

Q.5 Attempt the following. (Any Three) **09**

a) Find $L\{t.\sqrt{1-\sin t}\}$.

b) Find the Fourier Transform of $f(x) = e^{-x2}$

c) Find the root of the equation $4x - e^x = 0$ that lies between 2 and 3 by using Newton Raphson method correct up to four decimal places.

d) Apply Simpson's 1/3rd rule to evaluate $\int_0^1 \frac{x^2}{1+x^3}dx$ with $h = 0.25$

e) Find the inverse Laplace transform of $\frac{s+29}{(s+4)(s^2+9)}$.

Q.6 Attempt the following. (Any Three) **09**

a) Evaluate $\int_0^\infty e^{-t}\left(\frac{1-\cos t}{t}\right)dt$

b) Apply Simpson's 3/8th rule to evaluate $\int_0^6 \frac{1}{1+x}dx$. Also check answer with exact solution.

c) Find the Fourier sine transform of $f(x) = \frac{1}{x}$

d) Find $L^{-1}\left\{\log\left(1+\frac{a^2}{s^2}\right)\right\}$

e) Apply Gaussian Quadrature 2-point formula to evaluate $\int_{-2}^{2} e^{-x/2}\,dx$

Q.7 Attempt the following. (Any Two) **10**

a) Using Laplace transform method.
solve $y''(t)-2y'(t)+y(t)=e^{2t}$, with $y(0)=0, y'(0)=-1$.

b) Find the double root of the equation $x^3-5.4x^2+9.24x-5.096=0$.
Given that it is near to 1.5

c) Express $f(x)=\sin x, 0\le x<\pi$
$=0, x=\pi$
$=0, x>\pi$ as Fourier integral and hence deduce that
$\int_0^{\infty}\frac{\cos(\omega\pi/2)}{1-\omega^2}d\omega=\frac{\pi}{2}$

5) Use of non-programmable scientific calculator allowed.

MCQ/Objective Type Questions

Duration: 30 Minutes Marks:14

Q.1 Choose the correct Answer. **14**

1) If $f(x) = x^2$ is expanded as a cosine series in $(0, \pi)$ then the constant term is _____.

a) $\frac{\pi^2}{3}$ b) $\frac{\pi^3}{3}$
c) $\frac{2\pi^2}{3}$ d) $\frac{3\pi^2}{2}$

2) Correlation analysis help us to _____ our activities.

a) Control b) Plan
c) Predict d) All of above

3) A discrete probability distribution function of a discrete random variable is given by,

x:	0	1	2	3	4
$P(x)$:	k	$3k$	$5k$	$4k$	$2k$

then $k =$ _____.

a) $1/3$ b) $1/15$
c) $1/5$ d) 1

4) If $L\{f(t)\} = \frac{1}{s}e^{-1/s}$, then $L\{f(3t)\} =$ _____.

a) $\frac{1}{s}e^{-3/s}$ b) $\frac{1}{3s}e^{-3/s}$
c) $\frac{1}{3}e^{-3/s}$ d) $\frac{1}{3}e^{-s/3}$

5) If $b_{yx} = {}^{5}/_{18}, b_{xy} = {}^{8}/_{5}$, then $r =$ _____.

a) $2/5$ b) $2/3$
c) $1/2$ d) $3/2$

6) The Fourier cosine transform of $f(x) = \begin{cases} 1, & 0 \le x < 1 \\ 0, & x > 1 \end{cases}$ is _____.

a) $\sqrt{\frac{2}{\pi}}s$ b) $\sqrt{\frac{2}{\pi}}\sin s$

c) $\sqrt{\frac{2}{\pi}}\frac{\sin s}{s}$ d) $\sqrt{\frac{2}{\pi}}\frac{s}{\sin s}$

7) The Fourier sine integral of $f(x)$ is _____.

a) $\int_0^\infty f(s)\sin ws\, ds$

b) $\int_0^\infty \sin wx \times \left(\int_0^\infty f(w)\sin ws\, ds\right)dw$

c) $\frac{1}{\pi}\int_0^\infty \sin wx \times \left(\int_0^\infty f(w)\sin ws\, ds\right)dw$

d) $\frac{2}{\pi}\int_0^\infty \sin wx \times \left(\int_0^\infty f(w)\sin ws\, ds\right)dw$

8) The complementary function of the equation $[(D+1)^2(D+4)]y = 2t$ is _____.

a) $c_1e^{-t} + c_2e^{-4t} + c_3e^{t}$ b) $c_1\cos t + c_2\sin t + c_3e^{-4t}$

c) $(c_1 + c_2t)e^{t} + c_3e^{-4t}$ d) $(c_1 + c_2t)e^{-t} + c_3e^{-4t}$

9) The general solution of $(D^4 + 2D^2 + 1)y = 0$ is _____.

a) $c_1\cos x + c_2\sin x + c_3\cos x + c_4\sin x$

b) $(c_1 + c_2x)e^{x}$

c) $(c_1 + c_2x)\cos x + (c_3 + c_4x)\sin x$

d) $(c_1 + c_2x + c_3x^2 + c_4x^3)e^{-x}$

10) The value of the integral $\int_0^\infty e^{-2t}\cos 3t dt$ is _____.

a) $1/13$ b) $2/13$

c) 13^2 d) 13

11) $L^{-1}\left\{\frac{1}{s^2-3^2}\right\} =$ _____.

a) $\frac{1}{3}\sin 3t$ b) $\frac{1}{3}\cos 3t$

c) $\frac{1}{3}\cosh 3t$ d) $\frac{1}{3}\sinh 3t$

12) The formula used for solving the equation using Regula Falsi method is _____.

I) $x = \frac{bf(a) - af(b)}{f(a) - f(b)}$ II) $x = \frac{af(b) - bf(a)}{f(a) - f(b)}$

a) Only I is correct b) Only II is correct

c) Both I, II are correct d) Both I, II are incorrect

13) The value of $\int_0^1 \frac{dx}{1+x}$ by Gaussian three point formula is _____.

a) 0.6931 b) 0.7931

c) 0.8931 d) None

14) Which of the following is not a Dirichlet's condition?

a) $f(x)$ is periodic b) $f(x)$ is single valued

c) $f(x)$ is even function d) $f(x)$ is infinite

MCQ/Objective Type Questions

Duration: 30 Minutes Marks:14

Q.1 Choose the correct Answer. **14**

1) If $L\{f(t)\} = \frac{1}{s}e^{-1/s}$, then $L\{f(3t)\} =$ _____.

a) $\frac{1}{s}e^{-3/s}$ b) $\frac{1}{3s}e^{-3/s}$

c) $\frac{1}{3}e^{-3/s}$ d) $\frac{1}{3}e^{-s/3}$

2) If $b_{yx} = {}^{5}/_{18}$, $b_{xy} = {}^{8}/_{5}$, then $r =$ _____.

a) $2/5$ b) $2/3$

c) $1/2$ d) $3/2$

3) The Fourier cosine transform of $f(x) = \begin{cases} 1, & 0 \le x < 1 \\ 0, & x > 1 \end{cases}$ is _____.

a) $\sqrt{\frac{2}{\pi}}s$ b) $\sqrt{\frac{2}{\pi}}\sin s$

c) $\sqrt{\frac{2}{\pi}}\frac{\sin s}{s}$ d) $\sqrt{\frac{2}{\pi}}\frac{s}{\sin s}$

4) The Fourier sine integral of $f(x)$ is _____.

a) $\int_0^\infty f(s)\sin ws\, ds$

b) $\int_0^\infty \sin wx \times \left(\int_0^\infty f(w)\sin ws\, ds\right)dw$

c) $\frac{1}{\pi}\int_0^\infty \sin wx \times \left(\int_0^\infty f(w)\sin ws\, ds\right)dw$

d) $\frac{2}{\pi}\int_0^\infty \sin wx \times \left(\int_0^\infty f(w)\sin ws\, ds\right)dw$

5) The complementary function of the equation $[(D+1)^2(D+4)]y = 2t$ is _____.

a) $c_1e^{-t} + c_2e^{-4t} + c_3e^{t}$ b) $c_1\cos t + c_2\sin t + c_3e^{-4t}$

c) $(c_1 + c_2t)e^{t} + c_3e^{-4t}$ d) $(c_1 + c_2t)e^{-t} + c_3e^{-4t}$

6) The general solution of $(D^4 + 2D^2 + 1)y = 0$ is _____.

a) $c_1\cos x + c_2\sin x + c_3\cos x + c_4\sin x$

b) $(c_1 + c_2x)e^{x}$

c) $(c_1 + c_2x)\cos x + (c_3 + c_4x)\sin x$

d) $(c_1 + c_2x + c_3x^2 + c_4x^3)e^{-x}$

7) The value of the integral $\int_0^{\infty} e^{-2t}\cos 3t dt$ is _____.

a) $1/13$ b) $2/13$

c) 13^2 d) 13

8) $L^{-1}\left\{\frac{1}{s^2-3^2}\right\} =$ _____.

a) $\frac{1}{3}\sin 3t$ b) $\frac{1}{3}\cos 3t$

c) $\frac{1}{3}\cosh 3t$ d) $\frac{1}{3}\sinh 3t$

9) The formula used for solving the equation using Regula Falsi method is _____.

I) $x = \frac{bf(a) - af(b)}{f(a) - f(b)}$ II) $x = \frac{af(b) - bf(a)}{f(a) - f(b)}$

a) Only I is correct b) Only II is correct

c) Both I, II are correct d) Both I, II are incorrect

10) The value of $\int_0^1 \frac{dx}{1+x}$ by Gaussian three point formula is _____.

a) 0.6931 b) 0.7931

c) 0.8931 d) None

11) Which of the following is not a Dirichlet's condition?

a) $f(x)$ is periodic b) $f(x)$ is single valued

c) $f(x)$ is even function d) $f(x)$ is infinite

12) If $f(x) = x^2$ is expanded as a cosine series in $(0, \pi)$ then the constant term is _____.

a) $\frac{\pi^2}{3}$ b) $\frac{\pi^3}{3}$

c) $\frac{2\pi^2}{3}$ d) $\frac{3\pi^2}{2}$

13) Correlation analysis help us to _____ our activities.

a) Control
b) Plan
c) Predict
d) All of above

14) A discrete probability distribution function of a discrete random variable is given by,

x:	0	1	2	3	4
$P(x)$:	k	$3k$	$5k$	$4k$	$2k$

then $k =$ _____.

a) $1/3$
b) $1/15$
c) $1/5$
d) 1

Set R

S.Y. (B.Tech.) (Electronics & Telecommunication Engineering) (Semester - I) (CBCS) Examination: March/April – 2026
Engineering Mathematics – III (BTN06301)

Day & Date: Monday, 18-05-2026 Max. Marks: 56
Time: 03:00 PM To 06:00 PM

Instructions: 1) All questions are compulsory.
2) Figures to the right indicate full marks.
3) Assume suitable data if necessary and state it clearly.
4) Use of non-programmable scientific calculator allowed.

Section – I

Q.2 Attempt the following. (Any Three) **09**

a) Solve $(D^4 + 8D^2 + 16)y = \sin^2 x$

b) Obtain Fourier series expansion of $f(x) = \frac{x(\pi^2 - x^2)}{12}$ in $(-\pi, \pi)$.

c) In a sample of 1000 students, the mean and standard deviation of marks obtained by the students in a certain test are 14 and 2.5. Assuming the distribution to be normal find the number of students getting marks
i) between 12 and 15
ii) above 18
iii) below 8

(Given: - For a S. N. V. z area between $z = 0$ and $z = 0.4$ is 0.1554, that between $z = 0$ and $z = 0.8$ is 0.2881, that between $z = 0$ and $z = 1.6$ is 0.4452, that between $z = 0$ and $z = 2.4$ is 0.4918.)

d) Calculate
i) k
ii) $p(x > 5)$
iii) $p(0 \leq x \leq 5)$, if a random variable x has the following probability distribution

x	1	2	3	4	5	6	7
$p(x)$	k	$2k$	$3k$	k^2	$k^2 + k$	$2k^2$	$4k^2$

e) Solve $(D^2 - 2D + 1)y = x^2 e^{3x}$

Q.3 Attempt the following. (Any Three) **09**

a) Solve $(D^3 - D^2 - 6D)y = x^2 + 1$

b) Obtain half range cosine series of $f(x) = e^{-x}$ in $0 < x < \pi$

c) Calculate the correlation co-efficient between x and y, if Nine students obtained the following percentage of marks in the college examination (x) and in the University examination (y).

x	51	53	73	46	50	60	47	36	60
y	49	72	74	44	58	66	50	30	55

d) Assuming that half of the population in a city is vegetarian so that the chance of an individual being vegetarian is 1/2 and assuming that 100 investigators take a sample of 10 individuals to see whether they are vegetarian, how many investigators would you expect to report that three people or less were vegetarian.

e) Obtain the Fourier series expansion of, $f(x) = 2x - x^2$ in $(0,3)$.

Q.4 Attempt the following. (Any Two) **10**

a) An uncharged condenser of capacity C is charged by applying an electromotive force of value $\mathrm{E}\sin\mathrm{pt}$ through the leads of an inductance L and negligible resistance. The charge Q on the plate of the condenser satisfies the differential equation $\frac{d^2Q}{dt^2} + \frac{Q}{LC} = \frac{E}{L}\sin nt$. Prove that charge at any time t is given by, $Q = \frac{E}{2n^2L}[\sin nt - nt.\cos nt]$ where $n^2 = \frac{1}{LC}$

b) Obtain the Fourier series of, $f(x) = \left(\frac{\pi - x}{2}\right)^2$, in $(0,2\pi)$ and hence deduce that.

$$\frac{\pi^2}{6} = \frac{1}{1^2} + \frac{1}{2^2} + \frac{1}{3^2} + \frac{1}{4^2} + \cdots$$

c) Calculate the equations of two lines of regression and calculate expected height of son when the height of father is 154 cms. Heights of fathers and sons are given below.

Ht. of Father(x)	150	152	155	157	160	161	164	166
Ht. of Son(y)	154	156	158	159	160	162	161	164

Section – II

Q.5 Attempt the following. (Any Three) **09**

a) Find $L\{t.\sqrt{1-\sin t}\}$.

b) Find the Fourier Transform of $f(x) = e^{-x2}$

c) Find the root of the equation $4x - e^x = 0$ that lies between 2 and 3 by using Newton Raphson method correct up to four decimal places.

d) Apply Simpson's 1/3rd rule to evaluate $\int_0^1 \frac{x^2}{1+x^3}\,dx$ with $h = 0.25$

e) Find the inverse Laplace transform of $\frac{s+29}{(s+4)(s^2+9)}$.

Q.6 Attempt the following. (Any Three) **09**

a) Evaluate $\int_0^\infty e^{-t}\left(\frac{1-\cos t}{t}\right)dt$

b) Apply Simpson's 3/8th rule to evaluate $\int_0^6 \frac{1}{1+x}\,dx$. Also check answer with exact solution.

c) Find the Fourier sine transform of $f(x) = \frac{1}{x}$

d) Find $L^{-1}\left\{\log\left(1+\frac{a^2}{s^2}\right)\right\}$

e) Apply Gaussian Quadrature 2-point formula to evaluate $\int_{-2}^{2} e^{-x/2}\,dx$

Q.7 Attempt the following. (Any Two) **10**

a) Using Laplace transform method.
solve $y''(t)-2y'(t)+y(t)=e^{2t}$, with $y(0)=0, y'(0)=-1$.

b) Find the double root of the equation $x^3-5.4x^2+9.24x-5.096=0$.
Given that it is near to 1.5

c) Express $f(x)=\sin x, 0\le x<\pi$
$=0, x=\pi$
$=0, x>\pi$ as Fourier integral and hence deduce that
$\int_0^{\infty}\frac{\cos(\omega\pi/2)}{1-\omega^2}d\omega=\frac{\pi}{2}$

Engineering Mathematics – III (BTN06301)

Day & Date: Monday, 18-05-2026 Max. Marks: 70
Time: 03:00 PM To 06:00 PM

Instructions: 1) Q. No. 1 is compulsory. It should be solved in the first 30 minutes in Answer Book Page no 03 (Starting page of the Answer Book). Each question carries one mark.
2) Don't forget to Mention question paper set (P/Q/R/S) on top of page.
3) Figures to the right indicates full marks.
4) Assume suitable data if necessary and state it clearly.
5) Use of non-programmable scientific calculator allowed.

MCQ/Objective Type Questions

Duration: 30 Minutes Marks:14

Q.1 Choose the correct Answer. **14**

1) The value of $\int_0^1 \frac{dx}{1+x}$ by Gaussian three point formula is _____.

a) 0.6931 b) 0.7931
c) 0.8931 d) None

2) Which of the following is not a Dirichlet's condition?

a) $f(x)$ is periodic b) $f(x)$ is single valued
c) $f(x)$ is even function d) $f(x)$ is infinite

3) If $f(x) = x^2$ is expanded as a cosine series in $(0, \pi)$ then the constant term is _____.

a) $\frac{\pi^2}{3}$ b) $\frac{\pi^3}{3}$
c) $\frac{2\pi^2}{3}$ d) $\frac{3\pi^2}{2}$

4) Correlation analysis help us to _____ our activities.

a) Control b) Plan
c) Predict d) All of above

5) A discrete probability distribution function of a discrete random variable is given by,

x:	0	1	2	3	4
$P(x)$:	k	$3k$	$5k$	$4k$	$2k$

then $k =$ _____.

a) $1/3$ b) $1/15$
c) $1/5$ d) 1

6) If $L\{f(t)\} = \frac{1}{s}e^{-1/s}$, then $L\{f(3t)\} =$ _____.

a) $\frac{1}{s}e^{-3/s}$ b) $\frac{1}{3s}e^{-3/s}$

c) $\frac{1}{3}e^{-3/s}$ d) $\frac{1}{3}e^{-s/3}$

7) If $b_{yx} = {}^{5}/_{18}, b_{xy} = {}^{8}/_{5}$, then $r =$ _____.

a) $2/5$ b) $2/3$

c) $1/2$ d) $3/2$

8) The Fourier cosine transform of $f(x) = \begin{cases} 1, & 0 \le x < 1 \\ 0, & x > 1 \end{cases}$ is _____.

a) $\sqrt{\frac{2}{\pi}}s$ b) $\sqrt{\frac{2}{\pi}}\sin s$

c) $\sqrt{\frac{2}{\pi}}\frac{\sin s}{s}$ d) $\sqrt{\frac{2}{\pi}}\frac{s}{\sin s}$

9) The Fourier sine integral of $f(x)$ is _____.

a) $\int_0^\infty f(s)\sin ws\, ds$

b) $\int_0^\infty \sin wx \times \left(\int_0^\infty f(w)\sin ws\, ds\right)dw$

c) $\frac{1}{\pi}\int_0^\infty \sin wx \times \left(\int_0^\infty f(w)\sin ws\, ds\right)dw$

d) $\frac{2}{\pi}\int_0^\infty \sin wx \times \left(\int_0^\infty f(w)\sin ws\, ds\right)dw$

10) The complementary function of the equation $[(D+1)^2(D+4)]y = 2t$ is _____.

a) $c_1e^{-t} + c_2e^{-4t} + c_3e^{t}$ b) $c_1\cos t + c_2\sin t + c_3e^{-4t}$

c) $(c_1 + c_2t)e^{t} + c_3e^{-4t}$ d) $(c_1 + c_2t)e^{-t} + c_3e^{-4t}$

11) The general solution of $(D^4 + 2D^2 + 1)y = 0$ is _____.

a) $c_1\cos x + c_2\sin x + c_3\cos x + c_4\sin x$

b) $(c_1 + c_2x)e^{x}$

c) $(c_1 + c_2x)\cos x + (c_3 + c_4x)\sin x$

d) $(c_1 + c_2x + c_3x^2 + c_4x^3)e^{-x}$

12) The value of the integral $\int_0^\infty e^{-2t}\cos 3t dt$ is _____.

a) $1/13$ b) $2/13$

c) 13^2 d) 13

13) $L^{-1}\left\{\frac{1}{s^2-3^2}\right\} =$ _____.

a) $\frac{1}{3}\sin 3t$ b) $\frac{1}{3}\cos 3t$

c) $\frac{1}{3}\cosh 3t$ d) $\frac{1}{3}\sinh 3t$

14) The formula used for solving the equation using Regula Falsi method is _____.

I) $x = \frac{bf(a) - af(b)}{f(a) - f(b)}$ II) $x = \frac{af(b) - bf(a)}{f(a) - f(b)}$

a) Only I is correct b) Only II is correct

c) Both I, Il are correct d) Both I, II are incorrect

MCQ/Objective Type Questions

Duration: 30 Minutes Marks:14

Q.1 Multiple choice questions: **14**

1) Which of the following Boolean expressions represents a valid Sum of Products (SOP) form?
a) $((A+B)(B+C))$ b) $(\bar{A}'+\bar{B}'C)$
c) $((A+\bar{B}').\bar{C}')$ d) $(A(B+C))$

2) The individual product terms in a Sum of Products (SOP) expression are commonly known as _____.
a) Maxterms b) Minterms
c) Sum terms d) Literal terms

3) How many total cells are present in a 4-variable K-map?
a) 4 b) 8
c) 16 d) 32

4) How is the minterm represented when the input variables are $(A=0, B=0, C=1)$?
a) $(A+B+\bar{C}')$ b) $(\bar{A}'\bar{B}'C)$
c) $(A+\bar{B}'+C)$ d) $(\bar{A}'+\bar{B}'+\bar{C}')$

5) Which of the following grouping sizes is invalid when combining cells in a K-map?
a) 2 b) 4
c) 6 d) 8

6) What logic gates are required to construct a half adder?
a) One XOR gate and one OR gate
b) One XOR gate and one AND gate
c) One XNOR gate and one AND gate
d) One XOR gate and one NOR gate

7) If the inputs to a half adder are $(A = 1)$ and $(B = 1)$, what are the Sum $((S))$ and Carry $((C))$ outputs?

a) $(S = 0, C = 0)$ b) $(S = 1, C = 0)$
c) $(S = 0, C = 1)$ d) $(S = 1, C = 1)$

8) A multiplexer is classified as which type of digital circuit?

a) Sequential circuit b) Combinational circuit
c) Memory circuit d) Amplifier circuit

9) Which logic gates are primarily used to construct a basic RS flip-flop?

a) AND and OR b) EX-OR and EX-NOR
c) NOR and NAND d) NOT and AND

10) How many stable states does a D flip-flop have?

a) One b) Two
c) Three d) Four

11) What is the output state of a $J - K$ flip-flop when $(J = 0)$ and $(K = 1)$?

a) Set $((Q = 1))$ b) Reset $((Q = 0))$
c) No change d) Toggle

12) The race around condition typically occurs in which of the following?

a) S-R flip-flop b) Level-triggered J-K flip-flop
c) Edge-triggered D flip-flop d) Master-Slave J-K flip-flop

13) In a 4-bit SISO shift register, what is the total number of clock cycles required to shift in a 4-bit data stream completely?

a) 3 b) 4
c) 5 d) 8

14) What is the fundamental building block used to construct a SISO shift register?

a) Logic gates b) Multiplexers
c) Flip-flops d) Decoders

2) Figures to the right indicate full marks.

Section – I

Q.2 Attempt the following. (Any Four) **16**

a) Create Gray code from the following binary numbers:
i) (1111)
ii) (1011)

b) Using the logic diagram that goes with it, describe how a half adder works.

c) Use the truth table and logic diagram of a 4:1 multiplexer to demonstrate it.

d) Describe in detail how to use K-maps to solve and simplify Boolean equations.

e) Describe the logic function's standard representation.

Q.3 Attempt the following. (Any Two) **12**

a) Describe the Binary to Gray conversion in great detail.

b) Using a suitable diagram and truth table, describe the Full Adder.

c) Utilize the K Map to resolve
$F(A, B, C, D) = \sum(0, 2, 3, 4, 5, 10, 13, 14, 15)$

Section – II

Q.4 Attempt the following. (Any Four) **16**

a) Describe the SR Flip-Flop using logic gates.

b) Using a suitable diagram and truth table, explain T-Flip-Flop.

c) Describe the distinctions between sequential circuits that are synchronous and asynchronous.

d) Using a suitable graphic, explain the SIPO type shift register.

e) What is meant by the Race-Round condition? Explain the plan for resolving this situation.

Q.5 Attempt the following. (Any Two) **12**

a) Design the MOD-10 Counter.

b) Using a suitable truth table and diagram, describe the JK flip flop.

c) Using a suitable graphic, describe a 4-bit UP counter.

a) 4 b) 8

c) 16 d) 32

11) How is the minterm represented when the input variables are $(A = 0, B = 0, C = 1)$?

a) $(A + B + \bar{C}')$ b) $(\bar{A}'\bar{B}'C)$

c) $(A + \bar{B}' + C)$ d) $(\bar{A}' + \bar{B}' + \bar{C}')$

12) Which of the following grouping sizes is invalid when combining cells in a K-map?

a) 2 b) 4

c) 6 d) 8

13) What logic gates are required to construct a half adder?

a) One XOR gate and one OR gate

b) One XOR gate and one AND gate

c) One XNOR gate and one AND gate

d) One XOR gate and one NOR gate

14) If the inputs to a half adder are $(A = 1)$ and $(B = 1)$, what are the Sum $((S))$ and Carry $((C))$ outputs?

a) $(S = 0, C = 0)$ b) $(S = 1, C = 0)$

c) $(S = 0, C = 1)$ d) $(S = 1, C = 1)$

Set **Q**

S.Y. (B.Tech.) (Electronics & Telecommunication Engineering) (Semester - I) (CBCS) Examination: March/April – 2026
Digital Techniques (BTN06304)

Day & Date: Wednesday, 20-05-2026 Max. Marks: 56
Time: 03:00 PM To 06:00 PM

Instructions: 1) All questions are compulsory.
2) Figures to the right indicate full marks.

Section – I

Q.2 Attempt the following. (Any Four) **16**

a) Create Gray code from the following binary numbers:
i) (1111)
ii) (1011)

b) Using the logic diagram that goes with it, describe how a half adder works.

c) Use the truth table and logic diagram of a 4:1 multiplexer to demonstrate it.

d) Describe in detail how to use K-maps to solve and simplify Boolean equations.

e) Describe the logic function's standard representation.

Q.3 Attempt the following. (Any Two) **12**

a) Describe the Binary to Gray conversion in great detail.

b) Using a suitable diagram and truth table, describe the Full Adder.

c) Utilize the K Map to resolve
$F(A, B, C, D) = \sum(0, 2, 3, 4, 5, 10, 13, 14, 15)$

Section – II

Q.4 Attempt the following. (Any Four) **16**

a) Describe the SR Flip-Flop using logic gates.

b) Using a suitable diagram and truth table, explain T-Flip-Flop.

c) Describe the distinctions between sequential circuits that are synchronous and asynchronous.

d) Using a suitable graphic, explain the SIPO type shift register.

e) What is meant by the Race-Round condition? Explain the plan for resolving this situation.

Q.5 Attempt the following. (Any Two) **12**

a) Design the MOD-10 Counter.

b) Using a suitable truth table and diagram, describe the JK flip flop.

c) Using a suitable graphic, describe a 4-bit UP counter.

S.Y. (B.Tech.) (Electronics & Telecommunication Engineering) (Semester - I) (CBCS) Examination: March/April – 2026
Digital Techniques (BTN06304)

Day & Date: Wednesday, 20-05-2026 Max. Marks: 70
Time: 03:00 PM To 06:00 PM

Instructions: 1) Q. No. 1 is compulsory. It should be solved in the first 30 minutes in Answer Book Page no 03 (Starting page of the Answer Book). Each question carries one mark.
2) Don't forget to Mention question paper set (P/Q/R/S) on top of page.
3) Figures to the right indicates full marks.
4) Assume suitable data if required.

MCQ/Objective Type Questions

Duration: 30 Minutes Marks:14

Q.1 Multiple choice questions: **14**

1) What is the output state of a $J-K$ flip-flop when $(J=0)$ and $(K=1)$?
a) Set $((Q=1))$ b) Reset $((Q=0))$
c) No change d) Toggle

2) The race around condition typically occurs in which of the following?
a) S-R flip-flop b) Level-triggered J-K flip-flop
c) Edge-triggered D flip-flop d) Master-Slave J-K flip-flop

3) In a 4-bit SISO shift register, what is the total number of clock cycles required to shift in a 4-bit data stream completely?
a) 3 b) 4
c) 5 d) 8

4) What is the fundamental building block used to construct a SISO shift register?
a) Logic gates b) Multiplexers
c) Flip-flops d) Decoders

5) Which of the following Boolean expressions represents a valid Sum of Products (SOP) form?
a) $((A+B)(B+C))$ b) $(\bar{A}'+\bar{B}'C)$
c) $((A+\bar{B}').\bar{C}')$ d) $(A(B+C))$

6) The individual product terms in a Sum of Products (SOP) expression are commonly known as _____.
a) Maxterms b) Minterms
c) Sum terms d) Literal terms

7) How many total cells are present in a 4-variable K-map?
a) 4 b) 8
c) 16 d) 32

8) How is the minterm represented when the input variables are $(A = 0, B = 0, C = 1)$?
a) $(A + B + \bar{C}')$ b) $(\bar{A}'\bar{B}'C)$
c) $(A + \bar{B}' + C)$ d) $(\bar{A}' + \bar{B}' + \bar{C}')$

9) Which of the following grouping sizes is invalid when combining cells in a K-map?
a) 2 b) 4
c) 6 d) 8

10) What logic gates are required to construct a half adder?
a) One XOR gate and one OR gate
b) One XOR gate and one AND gate
c) One XNOR gate and one AND gate
d) One XOR gate and one NOR gate

11) If the inputs to a half adder are $(A = 1)$ and $(B = 1)$, what are the Sum $((S))$ and Carry $((C))$ outputs?
a) $(S = 0, C = 0)$ b) $(S = 1, C = 0)$
c) $(S = 0, C = 1)$ d) $(S = 1, C = 1)$

12) A multiplexer is classified as which type of digital circuit?
a) Sequential circuit b) Combinational circuit
c) Memory circuit d) Amplifier circuit

13) Which logic gates are primarily used to construct a basic RS flip-flop?
a) AND and OR b) EX-OR and EX-NOR
c) NOR and NAND d) NOT and AND

14) How many stable states does a D flip-flop have?
a) One b) Two
c) Three d) Four

MCQ/Objective Type Questions

Duration: 30 Minutes Marks:14

Q.1 Chose the correct alternatives from the options and rewrites the sentence. **14**

1) A system is defined as _____.
a) A mathematical model of input-output relationships
b) A collection of signals
c) A transformation of one signal to another
d) Both a and c

2) A periodic signal satisfies the condition _____.
a) $bx(t) = x(-t)x(t) = x(-t)x(t) = x(-t)$
b) $x(t+T) = x(t)x(t+T) = x(t)x(t+T) = x(t)$
c) $x(t) = -x(t)x(t) = -x(t)x(t) = -x(t)$
d) $x(t) = x(t+1\,)x(t) = x(t+1\,)x(t) = x(t+1)$

3) A system that depends only on the present and past inputs is known as _____.
a) Causal b) Non-causal
c) Time-invariant d) None of the above

4) The Laplace Transform is applicable for _____.
a) Continuous-time signals b) Discrete-time signals
c) Both a and b d) None of the above

5) A system is said to be dynamic if _____.
a) It has memory b) It is time-invariant
c) It is non-causal d) None of the above

6) A memory less system is one where _____.
   a) Output depends only on present input
   b) Output depends on past inputs
   c) Output depends on future inputs
   d) Output depends on past and future inputs

7) A difference equation represents _____.
   a) A recursive system
   b) A time-invariant system
   c) A causal system
   d) Both (a) and (c)

8) The Fourier series represents a periodic signal as a sum of _____.
   a) Exponential signals
   b) Sinusoids
   c) Polynomials
   d) Both (a) and (b)

9) If a signal $x(t)x(t)$ has half-wave symmetry, then its Fourier series contains _____.
   a) Only even harmonics
   b) Only odd harmonics
   c) Both even and odd harmonics
   d) No harmonics

10) An aperiodic (non-periodic) continuous-time signal possesses _____.
   a) A discrete frequency spectrum
   b) A continuous frequency spectrum
   c) Only DC component
   d) Only odd harmonics

11) The Fourier transform of a constant function is _____.
   a) A delta function
   b) A sine function
   c) A ramp function
   d) A cosine function

12) The Z-transform is used to analyze _____.
   a) Continuous-time systems
   b) Discrete-time systems
   c) Random systems
   d) Both continuous and discrete-time systems

13) If a system is stable, its ROC must _____.
   a) Include the unit circle
   b) Be inside the unit circle
   c) Be outside the unit circle
   d) Not exist

14) The Z-transform is most useful in solving _____.
   a) Ordinary differential equations
   b) Difference equations
   c) Partial differential equations
   d) Complex numbers

4) Use of non-programmable calculator is allowed.

SECTION – I

Q.2 Attempt Any Four. **16**

a) Define and differentiate between the following types of signals: Continuous-time and discrete time signals, Periodic and aperiodic signals, Energy and power signals.

b) Describe the transformations of independent variables in signals with examples. Perform time shifting and time-scaling on $x(t) = e - tu(t) =$ $e^{-t}u(t)x(t) = e - tu(t)$.

c) Analyze and derive the block diagram representation of LTI systems governed by differential equations.

d) Prove the time-scaling properly of the Fourier Transform and provide an example of its application.

e) Derive the Fourier series coefficients for $x(t) = \sin(2\pi t)$ $x(t) = \backslash \sin(2\backslash pi\ t)x(t) = \sin(2\pi t)$ and explain its significance in signal analysis.

Q.3 Attempt Any Two. **12**

a) Derive and prove the time-shifting and convolution properties of Fourier Transform.

b) Compute the convolution sum for:
$x[n] = \{\ 1,2,1\}$ $x[n] =\backslash\{1, 2, 1\backslash\}$ $x[n] = \{1,2,1\}$ and
$h[n] = \{1, -1\}$ $h[n] =\backslash\{1, -1\backslash\}$ $h[n] = \{1, -1\}$

c) Explain the properties of LTI systems using convolution integral. Verify whether the system
$y(t) = tx(t-1)$ $y(t) = t\ x(t-1)$ $y(t) = tx(t-1)$ is linear and time-invariant.

SECTION - II

Q.4 Attempt Any Four. **16**

a) Explain the characteristics of Linear Time-Invariant (LTI) systems.

b) Solve for the output of an LTI system given the input and impulse response using convolution integral.

c) Derive the Fourier series representation of a periodic signal.

d) Derive and explain the time-shifting property of the Z-Transform with an example.

e) Prove Parseval's theorem for the Fourier Transform. Provide an example demonstrating its application.

Q.5 Attempt Any Two. **12**

a) Discuss the effect of poles and zeros on the ROC of a Z-Transform.

b) Derive the modulation property of the Fourier Transform and explain its significance in communication systems.

c) Derive the convolution integral for a continuous-time system.

d) Both a and c

6) A periodic signal satisfies the condition _____.
   a) $bx(t) = x(-t)x(t) = x(-t)x(t) = x(-t)$
   b) $x(t+T) = x(t)x(t+T) = x(t)x(t+T) = x(t)$
   c) $x(t) = -x(t)x(t) = -x(t)x(t) = -x(t)$
   d) $x(t) = x(t+1\,)x(t) = x(t+1\,)x(t) = x(t+1)$

7) A system that depends only on the present and past inputs is known as _____.
   a) Causal
   b) Non-causal
   c) Time-invariant
   d) None of the above

8) The Laplace Transform is applicable for _____.
   a) Continuous-time signals
   b) Discrete-time signals
   c) Both a and b
   d) None of the above

9) A system is said to be dynamic if _____.
   a) It has memory
   b) It is time-invariant
   c) It is non-causal
   d) None of the above

10) A memory less system is one where _____.
   a) Output depends only on present input
   b) Output depends on past inputs
   c) Output depends on future inputs
   d) Output depends on past and future inputs

11) A difference equation represents _____.
   a) A recursive system
   b) A time-invariant system
   c) A causal system
   d) Both (a) and (c)

12) The Fourier series represents a periodic signal as a sum of _____.
   a) Exponential signals
   b) Sinusoids
   c) Polynomials
   d) Both (a) and (b)

13) If a signal $x(t)x(t)$ has half-wave symmetry, then its Fourier series contains _____.
   a) Only even harmonics
   b) Only odd harmonics
   c) Both even and odd harmonics
   d) No harmonics

14) An aperiodic (non-periodic) continuous-time signal possesses _____.
   a) A discrete frequency spectrum
   b) A continuous frequency spectrum
   c) Only DC component
   d) Only odd harmonics

Set **R**

S.Y. (B.Tech.) (Electronics & Telecommunication Engineering) (Semester - II) (New) (NEP CBCS) Examination: March/April - 2026
Signals and Systems (ENTPCC-04)

Day & Date: Saturday, 16-05-2026 Max. Marks: 56
Time: 10:00 AM To 01:00 PM

Instructions: 1) All questions are compulsory.
2) Figures to the right indicate full marks.
3) Assume suitable data wherever needed & mention it clearly.
4) Use of non-programmable calculator is allowed.

SECTION – I

Q.2 Attempt Any Four. **16**

a) Define and differentiate between the following types of signals: Continuous-time and discrete time signals, Periodic and aperiodic signals, Energy and power signals.

b) Describe the transformations of independent variables in signals with examples. Perform time shifting and time-scaling on $x(t) = e - tu(t) =$ $e\text{^}\{-t\}u(t)x(t) = e - tu(t)$.

c) Analyze and derive the block diagram representation of LTI systems governed by differential equations.

d) Prove the time-scaling properly of the Fourier Transform and provide an example of its application.

e) Derive the Fourier series coefficients for $x(t) = \sin(2\pi t)$ $x(t) = \backslash\ \sin(2\backslash pi\ t)x(t) = \sin(2\pi t)$ and explain its significance in signal analysis.

Q.3 Attempt Any Two. **12**

a) Derive and prove the time-shifting and convolution properties of Fourier Transform.

b) Compute the convolution sum for:
$x[n] = \{\ 1,2,1\}$ $x[n] =\backslash\{1, 2, 1\backslash\}$ $x[n] = \{1,2,1\}$ and
$h[n] = \{1, -1\}$ $h[n] =\backslash\{1, -1\backslash\}$ $h[n] = \{1, -1\}$

c) Explain the properties of LTI systems using convolution integral. Verify whether the system
$y(t) = tx(t-1)$ $y(t) = t\ x(t-1)$ $y(t) = tx(t-1)$ is linear and time-invariant.

SECTION - II

Q.4 Attempt Any Four. **16**

a) Explain the characteristics of Linear Time-Invariant (LTI) systems.

b) Solve for the output of an LTI system given the input and impulse response using convolution integral.

c) Derive the Fourier series representation of a periodic signal.

d) Derive and explain the time-shifting property of the Z-Transform with an example.

e) Prove Parseval's theorem for the Fourier Transform. Provide an example demonstrating its application.

Q.5 Attempt Any Two. **12**

a) Discuss the effect of poles and zeros on the ROC of a Z-Transform.

b) Derive the modulation property of the Fourier Transform and explain its significance in communication systems.

c) Derive the convolution integral for a continuous-time system.

S.Y. (B.Tech.) (Electronics & Telecommunication Engineering) (Semester - II) (New) (NEP CBCS) Examination: March/April - 2026
Signals and Systems (ENTPCC-04)

Day & Date: Saturday, 16-05-2026 Max. Marks: 70
Time: 10:00 AM To 01:00 PM

Instructions: 1) Q. No. 1 is compulsory. It should be solved in the first 30 minutes in Answer Book Page no 03 (Starting page of the Answer Book). Each question carries one mark
2) Don't forget to Mention question paper set (P/Q/R/S) on top on page.
3) Figures to the right indicates full marks.
4) Use of non-programmable calculator is allowed.

MCQ/Objective Type Questions

Duration: 30 Minutes Marks:14

Q.1 Chose the correct alternatives from the options and rewrites the sentence. **14**

1) A memory less system is one where _____.
a) Output depends only on present input
b) Output depends on past inputs
c) Output depends on future inputs
d) Output depends on past and future inputs

2) A difference equation represents _____.
a) A recursive system b) A time-invariant system
c) A causal system d) Both (a) and (c)

3) The Fourier series represents a periodic signal as a sum of _____.
a) Exponential signals b) Sinusoids
c) Polynomials d) Both (a) and (b)

4) If a signal $x(t)x(t)$ has half-wave symmetry, then its Fourier series contains _____.
a) Only even harmonics
b) Only odd harmonics
c) Both even and odd harmonics
d) No harmonics

5) An aperiodic (non-periodic) continuous-time signal possesses _____.
a) A discrete frequency spectrum
b) A continuous frequency spectrum
c) Only DC component
d) Only odd harmonics

6) The Fourier transform of a constant function is _____.
   a) A delta function
   b) A sine function
   c) A ramp function
   d) A cosine function

7) The Z-transform is used to analyze _____.
   a) Continuous-time systems
   b) Discrete-time systems
   c) Random systems
   d) Both continuous and discrete-time systems

8) If a system is stable, its ROC must _____.
   a) Include the unit circle
   b) Be inside the unit circle
   c) Be outside the unit circle
   d) Not exist

9) The Z-transform is most useful in solving _____.
   a) Ordinary differential equations
   b) Difference equations
   c) Partial differential equations
   d) Complex numbers

10) A system is defined as _____.
   a) A mathematical model of input-output relationships
   b) A collection of signals
   c) A transformation of one signal to another
   d) Both a and c

11) A periodic signal satisfies the condition _____.
   a) $bx(t) = x(-t)x(t) = x(-t)x(t) = x(-t)$
   b) $x(t+T) = x(t)x(t+T) = x(t)x(t+T) = x(t)$
   c) $x(t) = -x(t)x(t) = -x(t)x(t) = -x(t)$
   d) $x(t) = x(t+1\,)x(t) = x(t+1\,)x(t) = x(t+1)$

12) A system that depends only on the present and past inputs is known as _____.
   a) Causal
   b) Non-causal
   c) Time-invariant
   d) None of the above

13) The Laplace Transform is applicable for _____.
   a) Continuous-time signals
   b) Discrete-time signals
   c) Both a and b
   d) None of the above

14) A system is said to be dynamic if _____.
   a) It has memory
   b) It is time-invariant
   c) It is non-causal
   d) None of the above

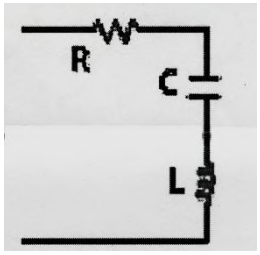
3) Figures to the right indicates full marks.
4) Use Semilog paper when necessary.

MCQ/Objective Type Questions

Duration: 30 Minutes Marks:14

Q.1 Multiple choice questions: **14**

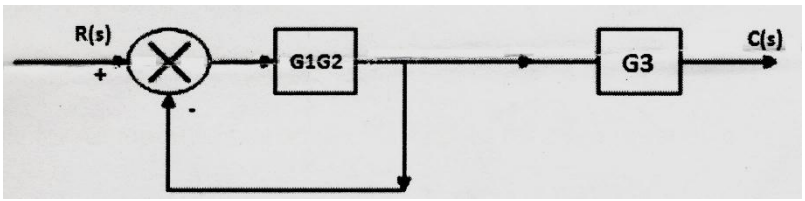
1) The output equation for given circuit is _____.



a) $Vo(S) = \frac{1}{cs} I(S) + LsI(S)$ b) $Vo(S) = \frac{1}{c} I(S) + LI(S)$

c) $Vo(S) = \frac{1}{s} I(S) + CSI(S)$ d) None

2) For Negative Feedback, the transfer function of closed loop control system as shown in figure below is _____.



a) $T(S) = \frac{G1G2G3}{1+G1G2}$ b) $T(S) = \frac{G1G2}{1-G1G2}$

c) $T(S) = \frac{G1G2G3}{1-G1G2}$ d) None

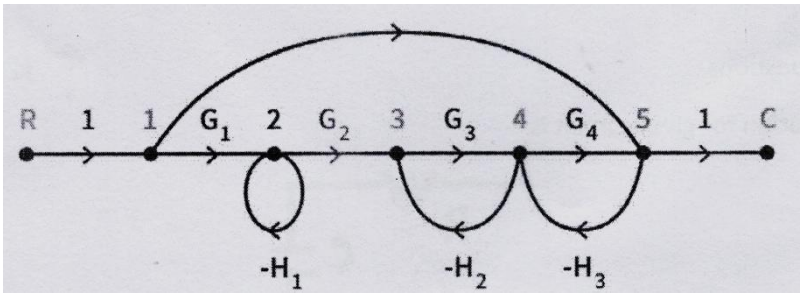
3) Transfer function is defined as _____.

a) ratio of Output to Input
b) ratio of Input to Output
c) ratio of Laplace Transform of Output to Laplace Transform of Input
d) ratio of Laplace Transform of Input to Laplace Transform of Output

4) Following is not the example of closed loop system _____.

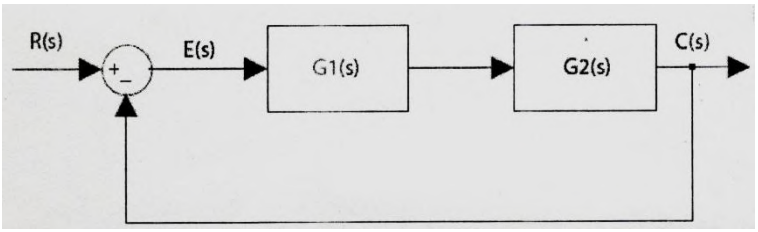
a) Liquid level control system
b) Missile Launching system
c) Electric Toaster
d) both a and b

5) The Signal Flow Graph shown below, has _____ Number of forward paths and _____ Number of Loops.



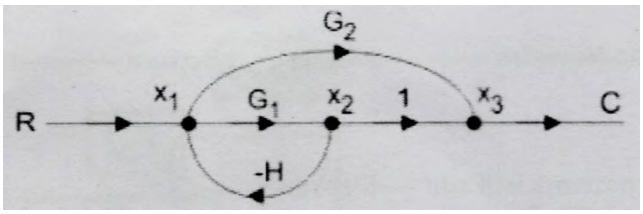
a) 2, 2
b) 2, 3
c) 3, 3
d) 3, 2

6) The Single block for given block diagram is _____.



a) $T(S) = \frac{G1(S)G2(S)}{1+G1(S).G2(S)}$
b) $T(S) = \frac{G1(S)G2(S)}{1-G1(S).G2(S)}$
c) $T(S) = \frac{G1(S)}{1+G1(S)}$
d) $T(S) = \frac{G2(S)}{1+G2(S)}$

7) Use Mason's Gain formula to calculate the transfer function of given figure.



a) $G_1/1 + G_2H$
b) $\frac{G1+G2}{1+G1H}$
c) $G_2/1 + G_1H$
d) None of the mentioned

8) If the open-loop transfer function of a system has a pole at S=0, what type of system is it?

a) Type 0 system
b) Type 1 system
c) Type 2 system
d) Type -1 system

9) For Type 2 System, the Error Constants are Position error = _____ Velocity error = _____ & Acceleration error = _____, where k is respective constant for system.

a) $0, 0, 1/\mathrm{k}$
b) $0, 1/\mathrm{k}, \infty$
c) $\infty, 0, 0$
d) $\infty, \infty, 0$

10) The given system is _____.

$$T(S) = \frac{(S+10)(S+3)}{S(S+20)(S+4)}$$

a) Type 0 System
b) Type 1 System
c) Type 2 System
d) None

11) Magnitude of Bode plot for constant (K) is a _____.

a) Line with a slope of -20dB/decade
b) Line with a slope of -6dB/decade
c) Line with a slope of -40dB/decade
d) Straight line parallel to frequency axis

12) The Phase Angle for Asymptotic Bode at $\omega = \infty$ rad/sec, for given equation is _____.

$$G(S)H(S) = \frac{(S+1)}{S(S+2)(S+5)}$$

a) $\theta = -180^0$
b) $\theta = 180^0$
c) $\theta = -270^0$
d) $\theta = 270^0$

13) If anybody wants to add pole in the system, we require to add _____ compensating network.

a) Lead Network
b) Lag Network
c) Lead-Lag Network
d) None of these

14) The Lead Compensation network will add _____ Pole and _____ Zero.

a) 1, 1 dominating
b) Dominating 1, 1
c) 1, 1
d) 0, 0

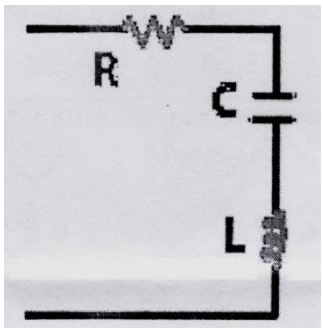
Time: 10:00 AM To 01:00 PM

Instructions: 1) All questions are compulsory.
2) Use Semilog paper when necessary.

Section – I

Q.2 Attempt Any Four of the following. **16**

a) Calculate the Transfer function for following RLC circuit.



b) What is Signal flow graph? Give its terminologies.

c) Differentiate between Closed Loop and Open Loop system with suitable example.

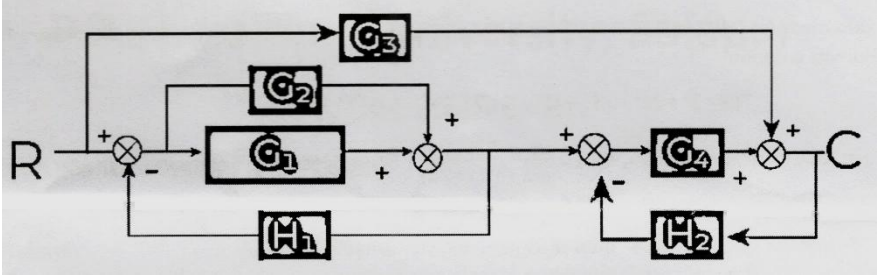
d) Explain Block Diagram reduction rules.

e) Define and explain the transfer function for closed loop control system.

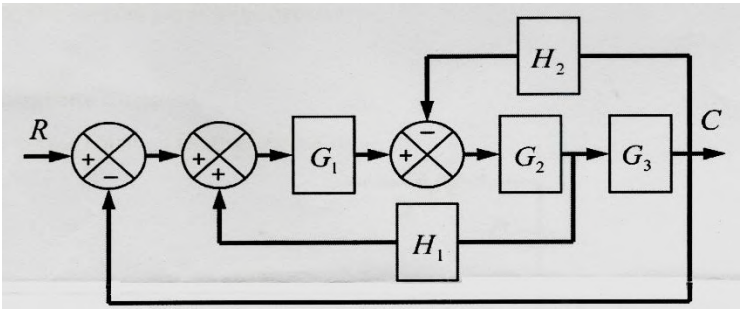
Q.3 Attempt Any Two of the following. **12**

a) Explain Liquid level control system with the suitable diagram.

b) Reduce following block diagram to single block using Block Diagram Reduction Rules.



c) Calculate the transfer function for following block diagram using Mason's Gain formula.



Section – II

Q.4 Attempt Any Four of the following. **16**

a) Explain Steady State Error with suitable diagram.

b) Explain Bode Plot with suitable diagram.

c) Explain Lead-Lag Compensation network.

d) Define the terms- conditional stability, marginally stability, relative stability of the system.

e) Test the stability of following characteristics equation using Routh - Hurwitz criterion.

$$S^4 + 5S^2 + 6S + 30 = 0$$

Q.5 Attempt Any Two of the following. **12**

a) How many roots lies in RHS, LHS plane and $j\omega$ axis for the following characteristics equation using Routh - Hurwitz criterion.

$$T(S) = S^5 + 2S^4 + 2S^3 + 4S^2 + S + 2$$

b) For unity feedback system, $G(S) = \frac{80}{S(S+4)(S+20)}$, Draw Bode Plot. Determine Gain Margin, Phase Margin, ω_{gc}, ω_{pc}. Also comment on stability.

c) Derive and explain Lead Compensation network with suitable diagram.

d) $T(S) = \frac{G2(S)}{1+G2(S)}$

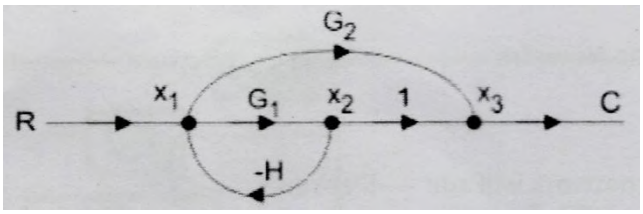
11) Use Mason's Gain formula to calculate the transfer function of given figure.



a) $G_1/1 + G_2H$

b) $\frac{G1+G2}{1+G1H}$

c) $G_2/1 + G_1H$

d) None of the mentioned

12) If the open-loop transfer function of a system has a pole at S=0, what type of system is it?

a) Type 0 system

b) Type 1 system

c) Type 2 system

d) Type -1 system

13) For Type 2 System, the Error Constants are Position error = _____ Velocity error = _____ & Acceleration error = _____, where k is respective constant for system.

a) $0, 0, 1/k$

b) $0, 1/k, \infty$

c) $\infty, 0, 0$

d) $\infty, \infty, 0$

14) The given system is _____.

$$T(S) = \frac{(S+10)(S+3)}{S(S+20)(S+4)}$$

a) Type 0 System

b) Type 1 System

c) Type 2 System

d) None

Set **R**

S.Y. (B.Tech.) (Electronics & Telecommunication Engineering) (Semester - II) (New) (NEP CBCS) Examination: March/April - 2026
Control System (ENTPCC-05)

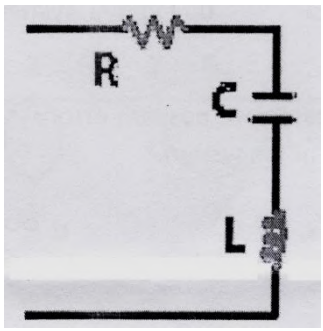
Day & Date: Tuesday, 19-05-2026 Max. Marks: 56
Time: 10:00 AM To 01:00 PM

Instructions: 1) All questions are compulsory.
2) Use Semilog paper when necessary.

Section – I

Q.2 Attempt Any Four of the following. **16**

a) Calculate the Transfer function for following RLC circuit.



b) What is Signal flow graph? Give its terminologies.

c) Differentiate between Closed Loop and Open Loop system with suitable example.

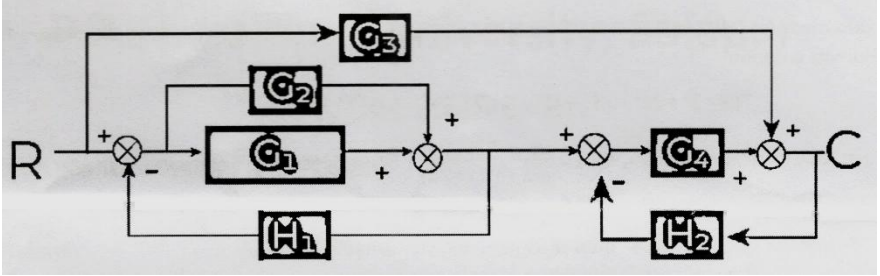
d) Explain Block Diagram reduction rules.

e) Define and explain the transfer function for closed loop control system.

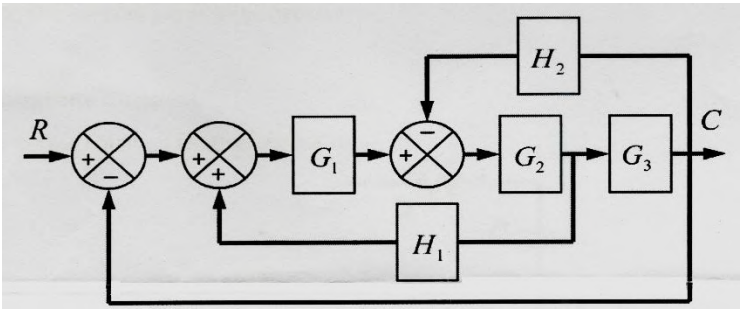
Q.3 Attempt Any Two of the following. **12**

a) Explain Liquid level control system with the suitable diagram.

b) Reduce following block diagram to single block using Block Diagram Reduction Rules.



c) Calculate the transfer function for following block diagram using Mason's Gain formula.



Section – II

Q.4 Attempt Any Four of the following. **16**

a) Explain Steady State Error with suitable diagram.

b) Explain Bode Plot with suitable diagram.

c) Explain Lead-Lag Compensation network.

d) Define the terms- conditional stability, marginally stability, relative stability of the system.

e) Test the stability of following characteristics equation using Routh - Hurwitz criterion.

$$S^4 + 5S^2 + 6S + 30 = 0$$

Q.5 Attempt Any Two of the following. **12**

a) How many roots lies in RHS, LHS plane and $j\omega$ axis for the following characteristics equation using Routh - Hurwitz criterion.

$$T(S) = S^5 + 2S^4 + 2S^3 + 4S^2 + S + 2$$

b) For unity feedback system, $G(S) = \frac{80}{S(S+4)(S+20)}$, Draw Bode Plot. Determine Gain Margin, Phase Margin, ω_{gc}, ω_{pc}. Also comment on stability.

c) Derive and explain Lead Compensation network with suitable diagram.

Seat No.		Set	S

S.Y. (B.Tech.) (Electronics & Telecommunication Engineering) (Semester - II) (New) (NEP CBCS) Examination: March/April - 2026
Control System (ENTPCC-05)

Day & Date: Tuesday, 19-05-2026 Max. Marks: 70
Time: 10:00 AM To 01:00 PM

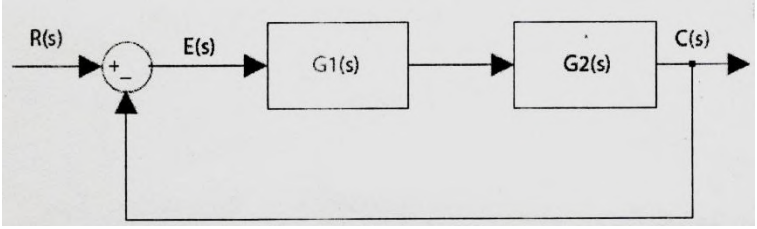
Instructions: 1) Q. No. 1 is compulsory. It should be solved in the first 30 minutes in Answer Book Page no 03 (Starting page of the Answer Book). Each question carries one mark.
2) Don't forget to Mention question paper set (P/Q/R/S) on top of page.
3) Figures to the right indicates full marks.
4) Use Semilog paper when necessary.

MCQ/Objective Type Questions

Duration: 30 Minutes Marks:14

Q.1 Multiple choice questions: **14**

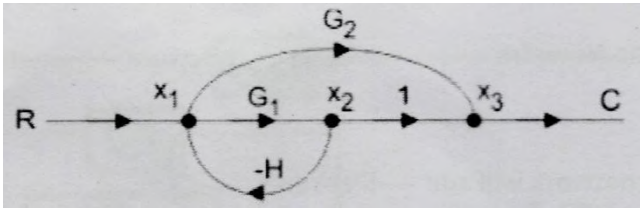
1) The Single block for given block diagram is _____.



a) $T(S) = \frac{G1(S)G2(S)}{1+G1(S).G2(S)}$ b) $T(S) = \frac{G1(S)G2(S)}{1-G1(S).G2(S)}$

c) $T(S) = \frac{G1(S)}{1+G1(S)}$ d) $T(S) = \frac{G2(S)}{1+G2(S)}$

2) Use Mason's Gain formula to calculate the transfer function of given figure.



a) $G_1/1 + G_2H$ b) $\frac{G1+G2}{1+G1H}$

c) $G_2/1 + G_1H$ d) None of the mentioned

3) If the open-loop transfer function of a system has a pole at S=0, what type of system is it?

a) Type 0 system b) Type 1 system
c) Type 2 system d) Type -1 system

4) For Type 2 System, the Error Constants are Position error = _____ Velocity error = _____ & Acceleration error = _____, where k is respective constant for system.

a) $0, 0, 1/\mathrm{k}$ b) $0, 1/\mathrm{k}, \infty$

c) $\infty, 0, 0$ d) $\infty, \infty, 0$

5) The given system is _____.

$$T(S) = \frac{(S+10)(S+3)}{S(S+20)(S+4)}$$

a) Type 0 System b) Type 1 System

c) Type 2 System d) None

6) Magnitude of Bode plot for constant (K) is a _____.

a) Line with a slope of -20dB/decade

b) Line with a slope of -6dB/decade

c) Line with a slope of -40dB/decade

d) Straight line parallel to frequency axis

7) The Phase Angle for Asymptotic Bode at $\omega = \infty$ rad/sec, for given equation is _____.

$$G(S)H(S) = \frac{(S+1)}{S(S+2)(S+5)}$$

a) $\theta = -180^0$ b) $\theta = 180^0$

c) $\theta = -270^0$ d) $\theta = 270^0$

8) If anybody wants to add pole in the system, we require to add _____ compensating network.

a) Lead Network b) Lag Network

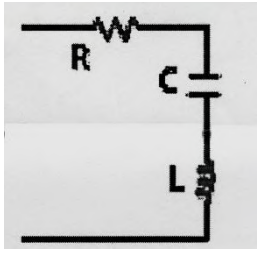
c) Lead-Lag Network d) None of these

9) The Lead Compensation network will add _____ Pole and _____ Zero.

a) 1, 1 dominating b) Dominating 1, 1

c) 1, 1 d) 0, 0

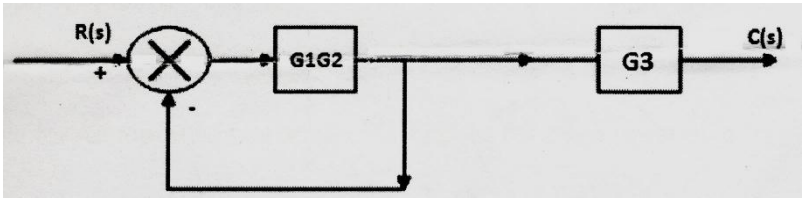
10) The output equation for given circuit is _____.



a) $Vo(S) = \frac{1}{cs} I(S) + LsI(S)$ b) $Vo(S) = \frac{1}{c} I(S) + LI(S)$

c) $Vo(S) = \frac{1}{s} I(S) + CSI(S)$ d) None

11) For Negative Feedback, the transfer function of closed loop control system as shown in figure below is _____.



a) $T(S) = \frac{G1G2G3}{1+G1G2}$

b) $T(S) = \frac{G1G2}{1-G1G2}$

c) $T(S) = \frac{G1G2G3}{1-G1G2}$

d) None

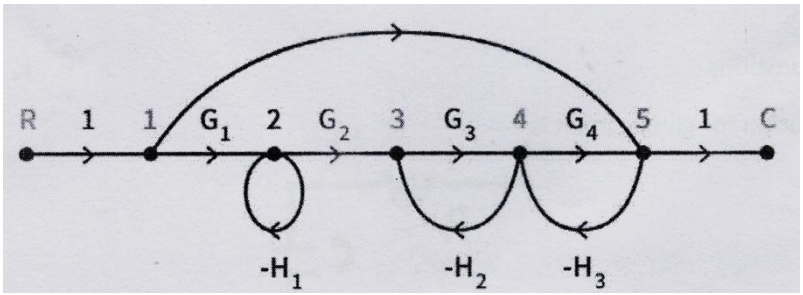
12) Transfer function is defined as _____.

a) ratio of Output to Input
b) ratio of Input to Output
c) ratio of Laplace Transform of Output to Laplace Transform of Input
d) ratio of Laplace Transform of Input to Laplace Transform of Output

13) Following is not the example of closed loop system _____.

a) Liquid level control system
b) Missile Launching system
c) Electric Toaster
d) both a and b

14) The Signal Flow Graph shown below, has _____ Number of forward paths and _____ Number of Loops.



a) 2, 2
b) 2, 3
c) 3, 3
d) 3, 2

Time: 10:00 AM To 01:00 PM

Instructions: 1) Q. No. 1 is compulsory. It should be solved in the first 30 minutes in Answer Book Page no 03 (Starting page of the Answer Book). Each question carries one mark.
2) Don't forget to Mention question paper set (P/Q/R/S) on top of page.
3) Figures to the right indicates full marks.
4) Assume suitable data if necessary and mention it clearly.

MCQ/Objective Type Questions

Duration: 30 Minutes Marks:14

Q.1 Choose the correct alternative from the option. 14

1) Which of these is incorrect for an operational amplifier?
a) It has a high voltage gain
b) It is a direct coupled amplifier
c) It is only useful for amplifying AC signals
d) It was originally designed to perform mathematical operations

2) In an ideal op-amp, which is not true?
a) Open loop voltage gain is infinite
b) Input resistance is infinite
c) Slew rate is infinite
d) CMRR is zero

3) Voltage series feedback circuit is also called as _____.
a) Inverting amplifier with feedback
b) Closed loop noninverting amplifier
c) Open loop noninverting amplifier
d) Both a) and b)

4) Output Offset voltage is caused by _____.
a) Input Bias Current b) Input Offset Voltage
c) Both a) and b) d) None of above

5) Roll off of Op-amp gain after certain frequency is due to _____.
a) Inductive effect b) Capacitive effect
c) Feedback d) Gain

6) A summing amplifier can be realized with _____.
a) Inverting amplifier b) Non-Inverting amplifier
c) Differential amplifier d) All of above

7) V to I convertor can be designed with _____.
a) Floating load b) Grounded load
c) Both of a) and b) d) None of above

8) Window detector _____.
a) Has only one unstable threshold
b) Uses hysteresis to speed up response
c) Clamps input positively
d) Detects input voltage between two limits

9) In the sample and hold circuit, the period during which the voltage across capacitor is equal to input voltage _____.
a) Sampling period b) Hold period
c) Delay period d) Charging period

10) The use of diode or BJT in feedback path of amplifier is called as _____.
a) Log amplifier b) Antilog amplifier
c) Rectifier d) Sample and hold circuit

11) In saw tooth wave generator _____.
a) T rise < T fall b) T rise > T fall
c) T rise = T fall d) None of above

12) To change the high cutoff frequency of a filter. It is multiplied by R or C by a ratio of original cutoff frequency known as _____.
a) Gain scaling b) Frequency scaling
c) Magnitude scaling d) Phase scaling

13) The output voltage of the device LM337 adjustable negative voltage regulator is _____.
a) -1.2 to -37V b) -8 to -25V
c) -10.5 to -25V d) 1.2 to 37V

14) The monostable multivibrator circuit is not an oscillator because _____.
a) its output switches between two states
b) it requires a sine wave input signal
c) it requires a trigger to obtain an output signal
d) the circuit does not require a dc power supply

S.Y. (B.Tech.) (Electronics & Telecommunication Engineering) (Semester - II) (New) (NEP CBCS) Examination: March/April - 2026
Analog Integrated Circuits (ENTPCC-06)

Day & Date: Thursday, 21-05-2026 Max. Marks: 56
Time: 10:00 AM To 01:00 PM

Instructions: 1) All questions are compulsory.
2) Figures to the right indicate full marks.
3) Assume suitable data if required.
4) Draw neat diagram whenever necessary.

SECTION – I

Q.2 Attempt Any Four. **16**

a) Derive the expression for gain of Non-inverting amplifier with negative feedback.

b) Explain four Basic Building blocks of op-amp.

c) What is slew rate? Explain its importance.

d) Explain basic integrator with Input Output waveforms.

e) Explain the difference between the integrator and differentiator and give one application of each.

Q.3 Attempt Any Two. **12**

a) Derive the ICEQ and VCEQ for DIBO differential amplifier.

b) Define Common Mode Rejection Ratio (CMRR) and explain the significance of relatively large value of CMRR.

c) Design an Integrator circuit if low frequency gain is 20 dB and fa = 1KHz. Use capacitance as $0.01\mu f$

SECTION – II

Q.4 Attempt Any Four. **16**

a) With neat diagram, explain sample and hold circuit.

b) Explain with neat diagram operation of window detector using op-amp.

c) Explain square wave generator.

d) Design the Wien Bridge Oscillator so that fo = 965Hz with circuit of Wien Bridge Oscillator.

e) Explain PLL.

Q.5 Attempt Any Two. **12**

a) Draw and explain full wave precision rectifier.

b) Design a second order low pass Butterworth filter with higher cutoff frequency of 1.6 KHz. Draw the designed circuit and sketch its frequency response.

c) Explain monostable multivibrator using IC 555 with equation for output.

Set **S**

S.Y. (B.Tech.) (Electronics & Telecommunication Engineering) (Semester - II) (New) (NEP CBCS) Examination: March/April - 2026
Analog Integrated Circuits (ENTPCC-06)

Day & Date: Thursday, 21-05-2026 Max. Marks: 56
Time: 10:00 AM To 01:00 PM

Instructions: 1) All questions are compulsory.
2) Figures to the right indicate full marks.
3) Assume suitable data if required.
4) Draw neat diagram whenever necessary.

SECTION – I

Q.2 Attempt Any Four. **16**

a) Derive the expression for gain of Non-inverting amplifier with negative feedback.

b) Explain four Basic Building blocks of op-amp.

c) What is slew rate? Explain its importance.

d) Explain basic integrator with Input Output waveforms.

e) Explain the difference between the integrator and differentiator and give one application of each.

Q.3 Attempt Any Two. **12**

a) Derive the ICEQ and VCEQ for DIBO differential amplifier.

b) Define Common Mode Rejection Ratio (CMRR) and explain the significance of relatively large value of CMRR.

c) Design an Integrator circuit if low frequency gain is 20 dB and fa = 1KHz. Use capacitance as $0.01\mu f$

SECTION – II

Q.4 Attempt Any Four. **16**

a) With neat diagram, explain sample and hold circuit.

b) Explain with neat diagram operation of window detector using op-amp.

c) Explain square wave generator.

d) Design the Wien Bridge Oscillator so that fo = 965Hz with circuit of Wien Bridge Oscillator.

e) Explain PLL.

Q.5 Attempt Any Two. **12**

a) Draw and explain full wave precision rectifier.

b) Design a second order low pass Butterworth filter with higher cutoff frequency of 1.6 KHz. Draw the designed circuit and sketch its frequency response.

c) Explain monostable multivibrator using IC 555 with equation for output.

Set P

S.Y. (B.Tech.) (Electronics & Telecommunication Engineering) (Semester - II) (New) (NEP CBCS) Examination: March/April - 2026
Entrepreneurship and Innovation (OE-02A)

Day & Date: Friday, 22-05-2026 Max. Marks: 70
Time: 03:00 PM To 06:00 PM

Instructions: 1) Q. No. 1 is compulsory. It should be solved in the first 30 minutes in Answer Book Page no 03 (Starting page of the Answer Book). Each question carries one mark.
2) Don't forget to Mention question paper set (P/Q/R/S) on top of page.
3) Figures to the right indicates full marks.
4) Assume suitable data if necessary and mention it clearly.

MCQ/Objective Type Questions

Duration: 30 Minutes Marks:14

Q.1 Choose Correct answer MCQ/ Objective Questions. 14

1) Innovation provides _____.
a) Stability b) Competitive advantage
c) Similarity d) Confusion

2) Managerial competency involves _____.
a) Fundraising only
b) Communication, planning, and leadership
c) Imitation
d) None

3) Entrepreneurship as a style of management focuses on _____.
a) Routine activities
b) Risk avoidance
c) Innovation and opportunity recognition
d) Only HR

4) A corporate entrepreneur is _____.
a) Owner of small business
b) Government employee
c) Innovator within an organization
d) None

5) Technology transfer occurs when _____.
a) Knowledge is shared from research to application
b) Patents expire
c) Innovation fails
d) Licenses are revoked

6) Six Thinking Hats tool was developed by _____.
a) Peter Drucker
b) Steve Jobs
c) Edward de Bono
d) Clayton Christensen

7) NUF test stands for _____.
a) Necessary, Useful, Feasible
b) Need, Use, Focus
c) None
d) Necessary, Unusual, Functional

8) Which is not a type of innovation strategy?
a) Pioneering
b) Imitative
c) Disruptive
d) Delaying

9) Red Ocean strategy is about _____.
a) Uncontested markets
b) Price competition in saturated markets
c) Patent generation
d) Blue economy

10) Continuous learning is essential for _____.
a) Innovation growth
b) Routine operations
c) Cost reduction
d) Project closure

11) Failure in innovation can occur due to _____.
a) Over-regulation
b) Poor planning
c) Lack of feedback
d) All of these

12) Crafting a business model involves _____.
a) Ignoring customers
b) Defining value, segments, and revenue streams
c) Random investments
d) Borrowing

13) Legal consideration in entrepreneurship includes _____.
a) Product packaging
b) Compliance and regulations
c) Floor layout
d) Office color

14) Entrepreneurial process starts with _____.
a) HR hiring
b) Opportunity identification
c) Revenue calculation
d) Market monopoly

Time: 03:00 PM To 06:00 PM

Instructions: 1) All questions are compulsory.
3) Figures to the right indicates full marks.
4) Assume suitable data if necessary and mention it clearly.
5) Use of non-programmable calculator is allowed.

SECTION – I

Q.2 All questions are compulsory.

a) Explain types of innovation with suitable examples. **06**

b) Define Entrepreneur. Discuss key roles and responsibilities. **04**

Q.3 Solve Any Three questions.

a) Describe relationship between innovation and competitive advantage. **06**

b) Explain entrepreneurship as a career and style of management. **06**

c) Explain the concepts of Entrepreneur, Manager, and Intrapreneur. Differentiate between them with suitable examples. **06**

d) What are the seven sources of innovative opportunities? **06**

e) Explain creative methods for managing innovation. **06**

SECTION – II

Q.4 All questions are compulsory.

a) Explain the concept of innovation process. **06**

b) Discuss barriers to innovation in business. **04**

Q.5 Solve Any Three question.

a) Write note on Blue Ocean Strategy with example. **06**

b) Describe innovation failure causes. **06**

c) Explain the Lean Start-up concept. **06**

d) What are ethical and legal considerations for entrepreneurs? **06**

MCQ/Objective Type Questions

Duration: 30 Minutes Marks:14

Q.1 Choose the correct alternative: **14**

1) Which of the following is a key goal of sustainable development?
a) Increase in fossil fuel consumption
b) Balanced use of resources
c) Maximum economic growth only
d) Eliminating renewable energy use

2) What is a key characteristic of solar energy?
a) Utilizes sunlight for power generation
b) Requires fossil fuels for operation
c) Has no environmental benefits
d) ls non-renewable

3) Which renewable energy is best suited for coastal areas?
a) Biomass energy b) Geothermal energy
c) Wave and tidal energy d) Oil shale energy

4) What is solar radiation?
a) Radiation from the Earth b) Radiation from the Moon
c) Radiation from the Sun d) None of the above

5) What is solar radiation measured in?
a) Kilograms
b) Liters
c) Watts per square meter (W/m^2)
d) Newtons

6) What is the primary difference between pyrolysis and gasification?
   a) Gasification uses a small amount of oxygen, while pyrolysis occurs in the absence of oxygen
   b) Pyrolysis produces syngas, while gasification produces bio-oil
   c) Gasification is a biochemical process, while pyrolysis is thermo chemical
   d) Pyrolysis requires higher temperatures than gasification

7) Which of the following is a disadvantage of biomass energy?
   a) Reduces waste
   b) Can lead to deforestation
   c) Low carbon footprint
   d) Independent of weather conditions

8) What happens when electricity demand is higher than generation?
   a) Energy storage can provide additional power
   b) Renewable energy sources produce more electricity
   c) Power plants automatically increase supply
   d) Transmission lines store energy

9) Which of the following sectors benefits the most from energy storage?
   a) Agriculture
   b) Construction
   c) Transport
   d) Power generation

10) What does the efficiency of an energy storage device indicate?
   a) The time taken to store energy
   b) The total cost of the device
   c) The percentage of stored energy that can be retrieved
   d) The size of the storage system

11) In hydro power stations what is an enlarged body of water just above the intake and used as a regulating reservoir called?
   a) Penstock
   b) Reservoir
   c) Fore bay
   d) Spillways

12) Tidal energy is caused primarily by the _____.
   a) Moon's gravity
   b) Sun's gravity
   c) Earth's rotation
   d) Ocean currents

13) Green hydrogen is produced by _____.
   a) Coal gasification
   b) Methane reforming
   c) Water electrolysis using renewable energy
   d) Nuclear fission

14) Which is the cleanest method of hydrogen production?
   a) Electrolysis using solar/wind energy
   b) Coal gasification
   c) Nuclear thermal splitting
   d) Steam methane reforming

Seat No.

S.Y. (B.Tech.) (Electronics & Telecommunication Engineering) (Semester - II) (New) (NEP CBCS) Examination: March/April - 2026
Renewable Energy (OE-02C)

Day & Date: Friday, 22-05-2026 Max. Marks: 56
Time: 03:00 PM To 06:00 PM

Instructions: 1) Q. 2 from section I is compulsory. Solve any two questions from Q.3, 4 and 5.
2) Q.6 from section two is compulsory. Solve any two questions from Q.7, 8 and 9.
3) Figures to the right indicates full marks.
4) Assume suitable data if necessary and mention it clearly.

SECTION – I

Q.2	**a)**	What is biomass energy, and how is it produced from the biomass?	**05**
	b)	Explain with neat sketch working of Pyrheliometer.	**05**
Q.3	**a)**	Give the detailed classification of wind energy conversion systems.	**04**
	b)	Explain how the Internet of Energy (IoE) can improve energy distribution in smart cities.	**05**
Q.4	**a)**	Explain with neat sketch working of a Flat Plate Collector.	**04**
	b)	Enlist and explain the major biomass resources available in India. How can these resources be utilized to address energy demands while ensuring sustainability?	**05**
Q.5	**a)**	Differentiate between solar thermal and solar photovoltaic systems those are used for power generation.	**04**
	b)	What are the criterions considered for selection of site for the wind mill?	**05**

SECTION – II

Q.6	**a)**	Enlist and explain the major problems that arise due to the absence of energy storage in power generation.	**05**
	b)	Draw the neat sketch of layout for hydroelectric power plat and explain the components.	**05**

Q.7	**a)**	Explain with neat sketch working of open cycle Ocen Thermal Energy Conversion (OTEC) system.	**04**
	b)	Give the general specifications of Energy Storage devices.	**05**
Q.8	**a)**	Give the detailed classification of hydroelectric power plants.	**04**
	b)	Enlist different types of tidal energy conversion systems and explain any one with neat sketch.	**05**
Q.9	**a)**	How will you estimate a hydropower? Explain the terms involved in it.	**04**
	b)	State and explain different hydrogen storage methods.	**05**

   a) Gasification uses a small amount of oxygen, while pyrolysis occurs in the absence of oxygen
   b) Pyrolysis produces syngas, while gasification produces bio-oil
   c) Gasification is a biochemical process, while pyrolysis is thermo chemical
   d) Pyrolysis requires higher temperatures than gasification

14) Which of the following is a disadvantage of biomass energy?
   a) Reduces waste
   b) Can lead to deforestation
   c) Low carbon footprint
   d) Independent of weather conditions

Set Q

S.Y. (B.Tech.) (Electronics & Telecommunication Engineering) (Semester - II) (New) (NEP CBCS) Examination: March/April - 2026
Renewable Energy (OE-02C)

Day & Date: Friday, 22-05-2026 Max. Marks: 56
Time: 03:00 PM To 06:00 PM

Instructions: 1) Q. 2 from section I is compulsory. Solve any two questions from Q.3, 4 and 5.
2) Q.6 from section two is compulsory. Solve any two questions from Q.7, 8 and 9.
3) Figures to the right indicates full marks.
4) Assume suitable data if necessary and mention it clearly.

SECTION – I

Q.2	**a)**	What is biomass energy, and how is it produced from the biomass?	**05**
	b)	Explain with neat sketch working of Pyrheliometer.	**05**
Q.3	**a)**	Give the detailed classification of wind energy conversion systems.	**04**
	b)	Explain how the Internet of Energy (IoE) can improve energy distribution in smart cities.	**05**
Q.4	**a)**	Explain with neat sketch working of a Flat Plate Collector.	**04**
	b)	Enlist and explain the major biomass resources available in India. How can these resources be utilized to address energy demands while ensuring sustainability?	**05**
Q.5	**a)**	Differentiate between solar thermal and solar photovoltaic systems those are used for power generation.	**04**
	b)	What are the criterions considered for selection of site for the wind mill?	**05**

SECTION – II

Q.6	**a)**	Enlist and explain the major problems that arise due to the absence of energy storage in power generation.	**05**
	b)	Draw the neat sketch of layout for hydroelectric power plat and explain the components.	**05**

Q.7	**a)**	Explain with neat sketch working of open cycle Ocen Thermal Energy Conversion (OTEC) system.	**04**
	b)	Give the general specifications of Energy Storage devices.	**05**
Q.8	**a)**	Give the detailed classification of hydroelectric power plants.	**04**
	b)	Enlist different types of tidal energy conversion systems and explain any one with neat sketch.	**05**
Q.9	**a)**	How will you estimate a hydropower? Explain the terms involved in it.	**04**
	b)	State and explain different hydrogen storage methods.	**05**

Seat No.	

Set **R**

S.Y. (B.Tech.) (Electronics & Telecommunication Engineering) (Semester - II) (New) (NEP CBCS) Examination: March/April - 2026
Renewable Energy (OE-02C)

Day & Date: Friday, 22-05-2026 Max. Marks: 70
Time: 03:00 PM To 06:00 PM

Instructions: 1) Q. No. 1 is compulsory. It should be solved in the first 30 minutes in Answer Book Page no 03 (Starting page of the Answer Book). Each question carries one mark.
2) Don't forget to Mention question paper set (P/Q/R/S) on top of page.
3) Figures to the right indicates full marks.
4) Assume suitable data if necessary and mention it clearly.

MCQ/Objective Type Questions

Duration: 30 Minutes Marks:14

Q.1 Choose the correct alternative: **14**

1) In hydro power stations what is an enlarged body of water just above the intake and used as a regulating reservoir called?
a) Penstock b) Reservoir
c) Fore bay d) Spillways

2) Tidal energy is caused primarily by the _____.
a) Moon's gravity b) Sun's gravity
c) Earth's rotation d) Ocean currents

3) Green hydrogen is produced by _____.
a) Coal gasification
b) Methane reforming
c) Water electrolysis using renewable energy
d) Nuclear fission

4) Which is the cleanest method of hydrogen production?
a) Electrolysis using solar/wind energy
b) Coal gasification
c) Nuclear thermal splitting
d) Steam methane reforming

5) Which of the following is a key goal of sustainable development?
a) Increase in fossil fuel consumption
b) Balanced use of resources
c) Maximum economic growth only
d) Eliminating renewable energy use

6) What is a key characteristic of solar energy?
   a) Utilizes sunlight for power generation
   b) Requires fossil fuels for operation
   c) Has no environmental benefits
   d) ls non-renewable

7) Which renewable energy is best suited for coastal areas?
   a) Biomass energy
   b) Geothermal energy
   c) Wave and tidal energy
   d) Oil shale energy

8) What is solar radiation?
   a) Radiation from the Earth
   b) Radiation from the Moon
   c) Radiation from the Sun
   d) None of the above

9) What is solar radiation measured in?
   a) Kilograms
   b) Liters
   c) Watts per square meter (W/m^2)
   d) Newtons

10) What is the primary difference between pyrolysis and gasification?
   a) Gasification uses a small amount of oxygen, while pyrolysis occurs in the absence of oxygen
   b) Pyrolysis produces syngas, while gasification produces bio-oil
   c) Gasification is a biochemical process, while pyrolysis is thermo chemical
   d) Pyrolysis requires higher temperatures than gasification

11) Which of the following is a disadvantage of biomass energy?
   a) Reduces waste
   b) Can lead to deforestation
   c) Low carbon footprint
   d) Independent of weather conditions

12) What happens when electricity demand is higher than generation?
   a) Energy storage can provide additional power
   b) Renewable energy sources produce more electricity
   c) Power plants automatically increase supply
   d) Transmission lines store energy

13) Which of the following sectors benefits the most from energy storage?
   a) Agriculture
   b) Construction
   c) Transport
   d) Power generation

14) What does the efficiency of an energy storage device indicate?
   a) The time taken to store energy
   b) The total cost of the device
   c) The percentage of stored energy that can be retrieved
   d) The size of the storage system

Seat No.

S.Y. (B.Tech.) (Electronics & Telecommunication Engineering) (Semester - II) (New) (NEP CBCS) Examination: March/April - 2026
Measurement, Instrumentation and Sensors (OE-02D)

Day & Date: Friday, 22-05-2026 Max. Marks: 70
Time: 03:00 PM To 06:00 PM

Instructions: 1) Q. No. 1 is compulsory. It should be solved in the first 30 minutes in Answer Book Page no 03 (Starting page of the Answer Book). Each question carries one mark
2) Don't forget to Mention question paper set (P/Q/R/S) on top on page.
3) Figures to the right indicates full marks.
4) Assume suitable data if necessary.

MCQ/Objective Type Questions

Duration: 30 Minutes Marks:14

Q.1 Choose the correct answer. **14**

1) Which of the following is not a type of systematic error?
a) Instrumental Errors b) Environmental Errors
c) Observational Errors d) Gross error

2) _____ instruments are those which measure the total quantity of electricity delivered in a particular time.
a) Absolute b) Indicating
c) Recording d) Integrating

3) A moving iron instrument can be used for _____.
a) D.C. only b) A.C. only
c) Both D.C. and A.C. d) None

4) _____ method is suitable for the measurement of a resistance of expected value less than one ohm.
a) Substitution b) Loss of charge
c) Wheatstone bridge d) Kelvin's double bridge

5) Instrument transformers are _____.
a) Potential transformers b) Current transformers
c) Both (a) and (b) d) Power transformers

6) In a DSO, the input signals are _____.
   a) directly applied to oscilloscope
   b) multiplexed, converted to digital form and stored and applied to oscilloscope
   c) multiplexed, converted to digital form stored, converted to analog form and applied to oscilloscope
   d) applied to amplifier, stored as analog signals, multiplexed, converted to digital form, stored in digital form, converted to analog form, and applied to CRO through an amplifier.

7) The power of n-phase unbalanced circuit can be measured by using a minimum of _____.
   a) n wattmeters
   b) (n + 1) wattmeters
   c) (n - 2) wattmeters
   d) (n - 1) wattmeters

8) Which transducer does not require any external power supply for working?
   a) Strain gauge transducer
   b) Piezoelectric Crystals
   c) Hydraulic transducer
   d) Pneumatic transducer

9) Piezoelectric accelerometer converts _____ energy to _____ energy.
   a) mechanical, sound
   b) mechanical, electrical
   c) sound, electrical
   d) None of these

10) Which factor affects the least while selection of sensor?
   a) Size
   b) Accuracy
   c) Colour
   d) Durability

11) Which sensor should be used for calculating pressure?
   a) DHT11
   b) LM335Z/NOPB
   c) HC-SR04
   d) MPX10DP

12) Which of the following represents range of frequency measured by ADC?
   a) Bandwidth
   b) Threshold frequency
   c) Peak frequency
   d) None of the mentioned

13) Thermistor is a _____.
   a) sensor
   b) ADC
   c) transducer
   d) micro controller

14) Which of the following type output is provided by ADC?
   a) Serial type
   b) Parallel type
   c) Both serial and parallel type
   d) None of the mentioned

Seat No.	

Set **P**

S.Y. (B.Tech.) (Electronics & Telecommunication Engineering) (Semester - II) (New) (NEP CBCS) Examination: March/April - 2026
Measurement, Instrumentation and Sensors (OE-02D)

Day & Date: Friday, 22-05-2026 Max. Marks: 56
Time: 03:00 PM To 06:00 PM

Instructions: 1) All questions are compulsory.
2) Figures to the right indicate full marks.
3) Assume suitable data if necessary.
4) Draw neat diagrams whenever necessary.

SECTION – I

Q.2 Attempt the following. (Any Four) **16**

a) Explain the term:
i) Accuracy
ii) Linearity
iii) Reproducibility
iv) Precision

b) Describe different damping methods in details.

c) Difference between Current Transformer and Potential Transformer.

d) Explain with neat diagram, working of ramp type digital voltmeter.

e) Explain Anderson Bridge with phasor diagram. Also derive the equation of dissipation factor.

Q.3 Attempt the following. (Any Two) **12**

a) Draw the equivalent circuit and phasor diagram of a PT. Derive expression for actual transformation ratio.

b) Explain the method of measurement of power using two wattmeter for balanced load. Also derive the equation of power factor.

c) A bridge consists of the following:
Arm ab: - A choke coil having resistance R1 & amp: inductance L1
Arm bc: - A non-inductive resistance R3
Arm cd: - A mica condenser C4 in series with non-inductive resistance R4
Arm da: - A non-inductive resistance R2
When this bridge fed from a source of 500 Hz, balance is obtained under following Conditions. $R2 = 2410\ \Omega$, $R3 = 750\ \Omega$, $C4 = 0.35\ \mu F$, $R4 = 64.5\ \Omega$ The series resistance of capacitor is 0.4Ω. Calculate resistance and Inductance of choke coil. The supply is connected between a & c and detector is between b & d.

SECTION – II

Q.4 Attempt the following. (Any Four) **16**

a) Explain units of measurement.

b) Explain the principle of working of piezo-electric effect sensor.

c) Explain the basic concept of analog to digital converter.

d) Explain the sensor interfacing circuit's data transmission.

e) State the different types of temperature sensor and explain any one of them.

Q.5 Attempt the following. (Any Two) **12**

a) State and explain the different types of batteries for low power sensors.

b) Stale and explain the sensors used for Displacement, and Level application.

c) Explain the concept of humidity and state different types of sensor used to measure humidity.

2) Don't forget to Mention question paper set (P/Q/R/S) on top on page.
3) Figures to the right indicates full marks.
4) Assume suitable data if necessary.

MCQ/Objective Type Questions

Duration: 30 Minutes Marks:14

Q.1 Choose the correct answer. 14

1) Which transducer does not require any external power supply for working?
a) Strain gauge transducer b) Piezoelectric Crystals
c) Hydraulic transducer d) Pneumatic transducer

2) Piezoelectric accelerometer converts _____ energy to _____ energy.
a) mechanical, sound b) mechanical, electrical
c) sound, electrical d) None of these

3) Which factor affects the least while selection of sensor?
a) Size b) Accuracy
c) Colour d) Durability

4) Which sensor should be used for calculating pressure?
a) DHT11 b) LM335Z/NOPB
c) HC-SR04 d) MPX10DP

5) Which of the following represents range of frequency measured by ADC?
a) Bandwidth b) Threshold frequency
c) Peak frequency d) None of the mentioned

6) Thermistor is a _____.
a) sensor b) ADC
c) transducer d) micro controller

7) Which of the following type output is provided by ADC?
a) Serial type b) Parallel type
c) Both serial and parallel type d) None of the mentioned

8) Which of the following is not a type of systematic error?
a) Instrumental Errors b) Environmental Errors
c) Observational Errors d) Gross error

9) _____ instruments are those which measure the total quantity of electricity delivered in a particular time.
a) Absolute b) Indicating
c) Recording d) Integrating

10) A moving iron instrument can be used for _____.
a) D.C. only b) A.C. only
c) Both D.C. and A.C. d) None

11) _____ method is suitable for the measurement of a resistance of expected value less than one ohm.
a) Substitution b) Loss of charge
c) Wheatstone bridge d) Kelvin's double bridge

12) Instrument transformers are _____.
a) Potential transformers b) Current transformers

MCQ/Objective Type Questions

Duration: 30 Minutes Marks:14

Q.1 Choose the correct answer. **14**

1) Which sensor should be used for calculating pressure?
a) DHT11 b) LM335Z/NOPB
c) HC-SR04 d) MPX10DP

2) Which of the following represents range of frequency measured by ADC?
a) Bandwidth b) Threshold frequency
c) Peak frequency d) None of the mentioned

3) Thermistor is a _____.
a) sensor b) ADC
c) transducer d) micro controller

4) Which of the following type output is provided by ADC?
a) Serial type b) Parallel type
c) Both serial and parallel type d) None of the mentioned

5) Which of the following is not a type of systematic error?
a) Instrumental Errors b) Environmental Errors
c) Observational Errors d) Gross error

6) _____ instruments are those which measure the total quantity of electricity delivered in a particular time.
a) Absolute b) Indicating
c) Recording d) Integrating

7) A moving iron instrument can be used for _____.
a) D.C. only b) A.C. only
c) Both D.C. and A.C. d) None

8) _____ method is suitable for the measurement of a resistance of expected value less than one ohm.

a) Substitution
b) Loss of charge
c) Wheatstone bridge
d) Kelvin's double bridge

9) Instrument transformers are _____.

a) Potential transformers
b) Current transformers
c) Both (a) and (b)
d) Power transformers

10) In a DSO, the input signals are _____.

a) directly applied to oscilloscope
b) multiplexed, converted to digital form and stored and applied to oscilloscope
c) multiplexed, converted to digital form stored, converted to analog form and applied to oscilloscope
d) applied to amplifier, stored as analog signals, multiplexed, converted to digital form, stored in digital form, converted to analog form, and applied to CRO through an amplifier.

11) The power of n-phase unbalanced circuit can be measured by using a minimum of _____.

a) n wattmeters
b) (n + 1) wattmeters
c) (n - 2) wattmeters
d) (n - 1) wattmeters

12) Which transducer does not require any external power supply for working?

a) Strain gauge transducer
b) Piezoelectric Crystals
c) Hydraulic transducer
d) Pneumatic transducer

13) Piezoelectric accelerometer converts _____ energy to _____ energy.

a) mechanical, sound
b) mechanical, electrical
c) sound, electrical
d) None of these

14) Which factor affects the least while selection of sensor?

a) Size
b) Accuracy
c) Colour
d) Durability

Seat No.	

Set **R**

S.Y. (B.Tech.) (Electronics & Telecommunication Engineering) (Semester - II) (New) (NEP CBCS) Examination: March/April - 2026
Measurement, Instrumentation and Sensors (OE-02D)

Day & Date: Friday, 22-05-2026 Max. Marks: 56
Time: 03:00 PM To 06:00 PM

Instructions: 1) All questions are compulsory.
2) Figures to the right indicate full marks.
3) Assume suitable data if necessary.
4) Draw neat diagrams whenever necessary.

SECTION – I

Q.2 Attempt the following. (Any Four) **16**

a) Explain the term:
i) Accuracy
ii) Linearity
iii) Reproducibility
iv) Precision

b) Describe different damping methods in details.

c) Difference between Current Transformer and Potential Transformer.

d) Explain with neat diagram, working of ramp type digital voltmeter.

e) Explain Anderson Bridge with phasor diagram. Also derive the equation of dissipation factor.

Q.3 Attempt the following. (Any Two) **12**

a) Draw the equivalent circuit and phasor diagram of a PT. Derive expression for actual transformation ratio.

b) Explain the method of measurement of power using two wattmeter for balanced load. Also derive the equation of power factor.

c) A bridge consists of the following:
Arm ab: - A choke coil having resistance R1 & amp: inductance L1
Arm bc: - A non-inductive resistance R3
Arm cd: - A mica condenser C4 in series with non-inductive resistance R4
Arm da: - A non-inductive resistance R2
When this bridge fed from a source of 500 Hz, balance is obtained under following Conditions. $R2 = 2410\ \Omega$, $R3 = 750\ \Omega$, $C4 = 0.35\ \mu F$, $R4 = 64.5\ \Omega$ The series resistance of capacitor is 0.4Ω. Calculate resistance and Inductance of choke coil. The supply is connected between a & c and detector is between b & d.

SECTION – II

Q.4 Attempt the following. (Any Four) **16**

a) Explain units of measurement.

b) Explain the principle of working of piezo-electric effect sensor.

c) Explain the basic concept of analog to digital converter.

d) Explain the sensor interfacing circuit's data transmission.

e) State the different types of temperature sensor and explain any one of them.

Q.5 Attempt the following. (Any Two) **12**

a) State and explain the different types of batteries for low power sensors.

b) Stale and explain the sensors used for Displacement, and Level application.

c) Explain the concept of humidity and state different types of sensor used to measure humidity.

Set **S**

S.Y. (B.Tech.) (Electronics & Telecommunication Engineering) (Semester - II) (New) (NEP CBCS) Examination: March/April - 2026
Measurement, Instrumentation and Sensors (OE-02D)

Day & Date: Friday, 22-05-2026 Max. Marks: 70
Time: 03:00 PM To 06:00 PM

Instructions: 1) Q. No. 1 is compulsory. It should be solved in the first 30 minutes in Answer Book Page no 03 (Starting page of the Answer Book). Each question carries one mark
2) Don't forget to Mention question paper set (P/Q/R/S) on top on page.
3) Figures to the right indicates full marks.
4) Assume suitable data if necessary.

MCQ/Objective Type Questions

Duration: 30 Minutes Marks:14

Q.1 Choose the correct answer. **14**

1) In a DSO, the input signals are _____.
a) directly applied to oscilloscope
b) multiplexed, converted to digital form and stored and applied to oscilloscope
c) multiplexed, converted to digital form stored, converted to analog form and applied to oscilloscope
d) applied to amplifier, stored as analog signals, multiplexed, converted to digital form, stored in digital form, converted to analog form, and applied to CRO through an amplifier.

2) The power of n-phase unbalanced circuit can be measured by using a minimum of _____.
a) n wattmeters b) (n + 1) wattmeters
c) (n - 2) wattmeters d) (n - 1) wattmeters

3) Which transducer does not require any external power supply for working?
a) Strain gauge transducer b) Piezoelectric Crystals
c) Hydraulic transducer d) Pneumatic transducer

4) Piezoelectric accelerometer converts _____ energy to _____ energy.
a) mechanical, sound b) mechanical, electrical
c) sound, electrical d) None of these

5) Which factor affects the least while selection of sensor?
a) Size b) Accuracy
c) Colour d) Durability

6) Which sensor should be used for calculating pressure?
a) DHT11 b) LM335Z/NOPB
c) HC-SR04 d) MPX10DP

7) Which of the following represents range of frequency measured by ADC?
a) Bandwidth b) Threshold frequency
c) Peak frequency d) None of the mentioned

8) Thermistor is a _____.
a) sensor b) ADC
c) transducer d) micro controller

9) Which of the following type output is provided by ADC?
a) Serial type b) Parallel type
c) Both serial and parallel type d) None of the mentioned

10) Which of the following is not a type of systematic error?
a) Instrumental Errors b) Environmental Errors
c) Observational Errors d) Gross error

11) _____ instruments are those which measure the total quantity of electricity delivered in a particular time.
a) Absolute b) Indicating
c) Recording d) Integrating

12) A moving iron instrument can be used for _____.
a) D.C. only b) A.C. only
c) Both D.C. and A.C. d) None

13) _____ method is suitable for the measurement of a resistance of expected value less than one ohm.
a) Substitution b) Loss of charge
c) Wheatstone bridge d) Kelvin's double bridge

14) Instrument transformers are _____.
a) Potential transformers b) Current transformers
c) Both (a) and (b) d) Power transformers

Instructions: 1) Q. No. 1 is compulsory. It should be solved in the first 30 minutes in Answer Book Page no 03 (Starting page of the Answer Book). Each question carries one mark.
2) Don't forget to Mention question paper set (P/Q/R/S) on top on page.
3) Figures to the right indicates full marks.
4) Assume suitable data wherever necessary and mention it clearly.

MCQ/Objective Type Questions

Duration: 30 Minutes Marks:14

Q.1 Choose the correct answers from the given options. 14

1) When total supply = total demand, the transportation problem is called _____.
a) Balanced b) Equated
c) Simple d) Zero

2) Which technique is used to solve Assignment Model?
a) Hungarian Method b) Graphical Method
c) Simplex Method d) Integer Programming

3) Allocated cells in the IBFS are also called as _____.
a) Stone Cells b) Water Cells
c) Air Cells d) None of these

4) To convert Maximization Assignment Model into Minimization, _____.
a) Multiply Whole matrix by (-1)
b) Subtract Entire Matrix from Highest Cell
c) Both a & b
d) None of these

5) Advantage of VAM of transportation is _____.
a) Near to optimal Solution b) Least Cost
c) Faster Solution d) Slower Solution

6) Transportation Models are also called as _____.
a) Probabilistic Model b) Distribution Model
c) Game Theory d) Assignment Model

7) ABC analysis considers _____.
a) Total consumption of items b) Total amount of items
c) Both a) and b) d) None of these

8) At the Break-Even Point _____.
a) Profit > Loss
b) Profit < Loss
c) Profit = Loss
d) None of these

9) The PERT in project management means Program Evaluation and _____ Technique.
a) Resource
b) Reconciliation
c) Reconsideration
d) Review

10) _____ stock is the lower limit of stock below which the stock should not be allowed to fall.
a) Maximum
b) Average
c) Safety
d) Standard

11) Optimization Means _____.
a) Maximization
b) Minimization
c) Minimization or Maximization
d) Mean of Minimization & Maximization

12) A feasible solution to LPP _____.
a) Must satisfy all the constraints simultaneously
b) Need not satisfy all the constraints
c) Must be a corner point of feasible region
d) Must optimize the objective function

13) In a project network, the critical path _____.
a) may be the shortest path
b) is the longest path
c) may be the longest path
d) is the shortest path

14) The inventory carrying costs are also called as _____.
a) Procurement costs
b) Set-up costs
c) Storage costs
d) None of the above

Seat No.	

Set **P**

S.Y. (B.Tech.) (Electronics & Telecommunication Engineering) (Semester - II) (New) (NEP CBCS) Examination: March/April - 2026 Operation Research (OE-02E)

Day & Date: Friday, 22-05-2026 Max. Marks: 56
Time: 03:00 PM To 06:00 PM

Instructions: 1) Solve any two questions from each Section.
2) Figures to the right indicates full marks.
3) Assume suitable data wherever necessary and mention it clearly.
4) Use of non-programmable calculator is allowed.

SECTION – I

Q.2 Solve both. **14**

a) Using Graphical method, solve
Maximize $Z = 2X_1 + 3X_2$
Subject to, $X_1 + X_2 \leq 30$;
$X_1 - X_2 \geq 0$;
$X_2 \geq 3$;
$0 \leq X_1; \leq 20$;
$0 \leq X_2; \leq 12$;

b) Consider the assignment problem to as shown in table, in this problem 4 supply jobs are to be assigned to four different sub assembly. Solve assignment problem by using Hungarian method.

Sub Assembly	Supply			
	i	ii	iii	iv
1	15	13	14	17
2	11	12	15	13
3	13	12	10	11
4	15	17	14	16

Q.3 Solve both. **14**

a) Find the initial basic feasible solution by NWCM.

	Destination				
	D_1	D_2	D_3	D_4	↓ Supply
S_1	5	3	6	4	30
S_2	3	4	7	8	15
S_3	9	6	5	8	15
Demand →	10	25	18	7	

b) Write in brief on application & advantages of Operational Research.

Q.4 Solve both. **14**

a) What is LPP? What are different components of LPP?

b) How assignment model is useful in practical life? Explain with its steps to solve it.

SECTION – II

Q.5 Solve both. **14**

a) Calculate the value of Economic Order Quantity, Reordering Period, No. of orders per year with the following Data, Annual Usages = 50 Units, Procurement Cost = 15 Rs. Per Order, Unit Cost = 100 Rs. /Item, Inventory Caring Cost = 10% of the unit cost.

b) Define 'Inventory Control' and explain its necessity in the construction industry. Detailed the various types of Inventory Costs involved in maintaining inventory on a site.

Q.6 Solve both. **14**

a) Draw network, find out CP & PD. Calculate All floats of each non-critical Activity.

Activity	$1-2$	$2-3$	$2-4$	$3-4$	$3-5$	$4-6$	$5-6$
Time (Days)	14	13	16	15	18	23	15

b) A small project consists of seven activities. The time estimates in weeks of different activities are given below. Find out probability of completing the project in 18 weeks.

Activity	Estimated Time		
	to	tm	tp
$1-2$	1	1	7
$1-3$	1	4	7
$1-4$	2	2	8
$2-5$	1	1	1
$3-5$	2	5	14
$4-6$	2	5	8
$5-6$	3	6	15

Probability Factor	Probability
0	50%
1	84.13 %
2	97.72 %
3	99.87 %

Q.7 Solve both. **14**

a) Write short notes on:

i) Processing N jobs on one machine (SPT and WSPT rules)

ii) No passing rule in sequencing

b) Explain Sequencing Problem Technique. What are its Different Elements, also elaborate its assumptions?

Seat No.

S.Y. (B.Tech.) (Electronics & Telecommunication Engineering) (Semester - II) (New) (NEP CBCS) Examination: March/April - 2026
Operation Research (OE-02E)

Day & Date: Friday, 22-05-2026 Max. Marks: 70
Time: 03:00 PM To 06:00 PM

Instructions: 1) Q. No. 1 is compulsory. It should be solved in the first 30 minutes in Answer Book Page no 03 (Starting page of the Answer Book). Each question carries one mark.
2) Don't forget to Mention question paper set (P/Q/R/S) on top on page.
3) Figures to the right indicates full marks.
4) Assume suitable data wherever necessary and mention it clearly.

MCQ/Objective Type Questions

Duration: 30 Minutes Marks:14

Q.1 Choose the correct answers from the given options. 14

1) Transportation Models are also called as _____.
a) Probabilistic Model b) Distribution Model
c) Game Theory d) Assignment Model

2) ABC analysis considers _____.
a) Total consumption of items b) Total amount of items
c) Both a) and b) d) None of these

3) At the Break-Even Point _____.
a) Profit > Loss b) Profit < Loss
c) Profit = Loss d) None of these

4) The PERT in project management means Program Evaluation and _____ Technique.
a) Resource b) Reconciliation
c) Reconsideration d) Review

5) _____ stock is the lower limit of stock below which the stock should not be allowed to fall.
a) Maximum b) Average
c) Safety d) Standard

6) Optimization Means _____.
a) Maximization
b) Minimization
c) Minimization or Maximization
d) Mean of Minimization & Maximization

7) A feasible solution to LPP _____.
a) Must satisfy all the constraints simultaneously
b) Need not satisfy all the constraints
c) Must be a corner point of feasible region
d) Must optimize the objective function

8) In a project network, the critical path _____.
a) may be the shortest path
b) is the longest path
c) may be the longest path
d) is the shortest path

9) The inventory carrying costs are also called as _____.
a) Procurement costs
b) Set-up costs
c) Storage costs
d) None of the above

10) When total supply = total demand, the transportation problem is called _____.
a) Balanced
b) Equated
c) Simple
d) Zero

11) Which technique is used to solve Assignment Model?
a) Hungarian Method
b) Graphical Method
c) Simplex Method
d) Integer Programming

12) Allocated cells in the IBFS are also called as _____.
a) Stone Cells
b) Water Cells
c) Air Cells
d) None of these

13) To convert Maximization Assignment Model into Minimization, _____.
a) Multiply Whole matrix by (-1)
b) Subtract Entire Matrix from Highest Cell
c) Both a & b
d) None of these

14) Advantage of VAM of transportation is _____.
a) Near to optimal Solution
b) Least Cost
c) Faster Solution
d) Slower Solution

Seat No.	

Set **S**

S.Y. (B.Tech.) (Electronics & Telecommunication Engineering) (Semester - II) (New) (NEP CBCS) Examination: March/April - 2026
Operation Research (OE-02E)

Day & Date: Friday, 22-05-2026 Max. Marks: 56
Time: 03:00 PM To 06:00 PM

Instructions: 1) Solve any two questions from each Section.
2) Figures to the right indicates full marks.
3) Assume suitable data wherever necessary and mention it clearly.
4) Use of non-programmable calculator is allowed.

SECTION – I

Q.2 Solve both. **14**

a) Using Graphical method, solve
Maximize $Z = 2X_1 + 3X_2$
Subject to, $X_1 + X_2 \leq 30$;
$X_1 - X_2 \geq 0$;
$X_2 \geq 3$;
$0 \leq X_1; \leq 20$;
$0 \leq X_2; \leq 12$;

b) Consider the assignment problem to as shown in table, in this problem 4 supply jobs are to be assigned to four different sub assembly. Solve assignment problem by using Hungarian method.

Sub Assembly	Supply			
	i	ii	iii	iv
1	15	13	14	17
2	11	12	15	13
3	13	12	10	11
4	15	17	14	16

Q.3 Solve both. **14**

a) Find the initial basic feasible solution by NWCM.

	Destination				
	D_1	D_2	D_3	D_4	↓ Supply
S_1	5	3	6	4	30
S_2	3	4	7	8	15
S_3	9	6	5	8	15
Demand →	10	25	18	7	

b) Write in brief on application & advantages of Operational Research.

Q.4 Solve both. **14**

a) What is LPP? What are different components of LPP?

b) How assignment model is useful in practical life? Explain with its steps to solve it.

SECTION – II

Q.5 Solve both. **14**

a) Calculate the value of Economic Order Quantity, Reordering Period, No. of orders per year with the following Data, Annual Usages = 50 Units, Procurement Cost = 15 Rs. Per Order, Unit Cost = 100 Rs. /Item, Inventory Caring Cost = 10% of the unit cost.

b) Define 'Inventory Control' and explain its necessity in the construction industry. Detailed the various types of Inventory Costs involved in maintaining inventory on a site.

Q.6 Solve both. **14**

a) Draw network, find out CP & PD. Calculate All floats of each non-critical Activity.

Activity	$1-2$	$2-3$	$2-4$	$3-4$	$3-5$	$4-6$	$5-6$
Time (Days)	14	13	16	15	18	23	15

b) A small project consists of seven activities. The time estimates in weeks of different activities are given below. Find out probability of completing the project in 18 weeks.

Activity	Estimated Time		
	to	tm	tp
$1-2$	1	1	7
$1-3$	1	4	7
$1-4$	2	2	8
$2-5$	1	1	1
$3-5$	2	5	14
$4-6$	2	5	8
$5-6$	3	6	15

Probability Factor	Probability
0	50%
1	84.13 %
2	97.72 %
3	99.87 %

Q.7 Solve both. **14**

a) Write short notes on:

i) Processing N jobs on one machine (SPT and WSPT rules)

ii) No passing rule in sequencing

b) Explain Sequencing Problem Technique. What are its Different Elements, also elaborate its assumptions?

SLR-QH-132

Seat No.

S.Y. (B.Tech.) (Electronics & Telecommunication Engineering) (Semester - II) (New) (NEP CBCS) Examination: March/April - 2026 Computational Mathematics (OE-02F)

Day & Date: Friday, 22-05-2026 Max. Marks: 70
Time: 03:00 PM To 06:00 PM

Instructions: 1) Q. No. 1 is compulsory. It should be solved in the first 30 minutes in Answer Book Page no 03 (Starting page of the Answer Book). Each question carries one mark.
2) Don't forget to Mention question paper set (P/Q/R/S) on top of page.
3) Figures to the right indicates full marks.
4) Assume suitable data where necessary.

MCQ/Objective Type Questions

Duration: 30 Minutes Marks:14

Q.1 Choose the correct alternative from the options. **14**

1) A transcendental equation is an equation that involves _____.
a) Only algebraic terms
b) Only transcendental functions
c) Both algebraic and transcendental functions
d) Linear terms only

2) The interval in which a real root of the equation $x^3 - 2x - 5 = 0$ lies is _____.
a) $(1, 2)$ b) $(0, 1)$
c) $(2, 3)$ d) $(3, 4)$

3) The Gauss-Seidel method is used for solving _____.
a) Nonlinear equations b) Systems of linear equations
c) Ordinary differential equations d) Partial differential equations

4) Which of the following is a disadvantage of the Gauss-Jacobi method?
a) It converges faster than most direct methods
b) It requires a large number of iterations for a good approximation
c) It cannot be used for systems with more than two equations
d) It works only for symmetric systems

5) The use of Romberg's method is _____.
a) To solve simultaneous linear equation
b) To find root of linear equation
c) To evaluate definite integration
d) To find the Eigen values

6) The order of convergence of Newton-Raphson method is _____.
a) 1 b) 2
c) $\sqrt{2}$ d) 1.6

7) Power Method is used to find _____.
a) Negative Eigen Value b) Largest Eigen value
c) Positive Eigen Value d) None of these

8) To find the numerically largest Eigen value using iterative method we use the equation _____.
a) $A = \lambda X$ b) $AX = X$
c) $X = \lambda X$ d) $AX = \lambda X$

9) If $dy/dx = x - y$ and $y(0) = 1$, then by Picard's method the value of $y_1(1)$ is _____.
a) 0.905 b) 1.905
c) 2.905 d) None

10) Runge-Kutta method is self-starting method _____.
a) True b) False
c) We can't say d) None

11) The Newton's forward interpolation formula is generally preferred when data points are _____.
a) Unequally spaced
b) Equally spaced and near the beginning
c) Equally spaced and near the end
d) Randomly spaced

12) In the power method, the vector is normalized in each iteration mainly to _____.
a) increase the determinant
b) prevent values from becoming too large
c) eliminate eigen values
d) make the matrix symmetric

13) Simpson's $3/8$ rule requires the number of sub-intervals to be _____.
a) multiple of 2 b) multiple of 3
c) multiple of 4 d) odd only

14) Picard's method is mainly used to solve _____.
a) linear programming problems b) differential equations
c) eigen value problems d) interpolation problems

Seat No.	

Set **P**

S.Y. (B.Tech.) (Electronics & Telecommunication Engineering) (Semester - II) (New) (NEP CBCS) Examination: March/April - 2026 Computational Mathematics (OE-02F)

Day & Date: Friday, 22-05-2026 Max. Marks: 56
Time: 03:00 PM To 06:00 PM

Instructions: 1) All questions are compulsory.
2) Figures to the right indicate full marks.
3) Assume suitable data where necessary.

SECTION – I

Q.2 Attempt Any Five: **25**

a) Find the double root of the equation $x^3 - 5.4x^2 + 9.24x - 5.096 = 0$ given that it is nearer to 1.5.

b) Solve the system of equations by Jacobi's iterative method (perform 3 iterations):
$27x + 6y - z = 85,$
$6x + 15y + 2z = 72,$
$x + y + 54z = 110$

c) Find positive real root of the equation $x\sin(x) + \cos(x) = 0$ using Newton-Raphson method correct to 3 decimal places.

d) Solve the system of equations by using Gauss-Elimination method:
$2x + y + z = 7,$
$x + 2y + 3z = 14,$
$3x + 4y + z = 14.$

e) Solve the following system of equations using LU Decomposition method:
$2x + 3y + z = 9$
$x + 2y + 3z = 6$
$3x + y + 2z = 8$

f) Solve $\frac{dy}{dx} = x + y$ with $x_0 = 0, y_0 = 1$ using fourth-order Runge-Kutta method and find approximate value of y when $x = 0.2$

g) Solve $\frac{dy}{dx} = 1 + xy$ with $y(0) = 1$ using Picard's method take first approximation and find y for $x = 0.1$

Q.3 Attempt Any One. **03**

a) Solve the system by Gauss-Seidel method (Perform 4 iterations):

$10x + y + z = 12$

$2x + 10y + z = 13$

$2x + 2y + 10z = 14$

b) Use Newton-Raphson method to find a root of the equation $x^4 - x - 10 = 0$ which is near to $x = 2$. Perform 3 iterations correct to three decimal places.

SECTION – II

Q.4 Attempt Any Five. **25**

a) Approximate $\int_1^3 \frac{1}{x} dx$ using the composite trapezoidal rule with $n = 4$ sub-intervals. List the function values at the nodes, show the application of the formula, and give the final answer correct to 4 decimal places

b) Using Jacobi's method, find all eigenvalues and eigenvectors of the symmetric matrix:

$$A = \begin{bmatrix} 6 & 2 & 1 \\ 2 & 5 & 2 \\ 1 & 2 & 4 \end{bmatrix}$$

c) Evaluate the integral $\int_{-1}^{1} \frac{dx}{1+x^2}$ using Gaussian 3-point Quadrature formula.

d) Find the dominant eigenvalue and the corresponding eigenvector of the matrix

$A = \begin{bmatrix} 4 & 1 & 1 \\ 1 & 3 & 1 \\ 1 & 1 & 2 \end{bmatrix}$ using the Power Method.

Perform 5 iterations taking initial vector as $[1,0,0]^T$

e) Given the Values:

x	2	4	6	8
$f(x)$	5	17	37	65

Evaluate $f(5)$, using Lagrange's Formula.

f) Using Newton's Backward formula, find the value of $f(2)$ if:

x	1.0	1.5	2.0	2.5
$f(x)$	2.71	3.38	4.00	4.58

g) Determine the polynomial $f(x)$ using Newton's Divided Difference formula for the data: Also find $f(3)$.

x	0	1	2	3	5
$f(x)$	1	14	15	5	6

Q.5 Attempt Any One. **03**

a) Find all Eigen values and Eigen vectors of the following matrix by using Gauss Jacobi's Method. $\begin{bmatrix} 1 & 2 \\ 3 & 4 \end{bmatrix}$

b) Construct Newton's Forward interpolation polynomial for the following data:

x	4	6	8	10
$f(x)$	1	3	8	16

Seat No.

SECTION – I

Q.2 Attempt Any Five: **25**

a) Find the double root of the equation $x^3 - 5.4x^2 + 9.24x - 5.096 = 0$ given that it is nearer to 1.5.

b) Solve the system of equations by Jacobi's iterative method (perform 3 iterations):
$27x + 6y - z = 85,$
$6x + 15y + 2z = 72,$
$x + y + 54z = 110$

c) Find positive real root of the equation $x\sin(x) + \cos(x) = 0$ using Newton-Raphson method correct to 3 decimal places.

d) Solve the system of equations by using Gauss-Elimination method:
$2x + y + z = 7,$
$x + 2y + 3z = 14,$
$3x + 4y + z = 14.$

e) Solve the following system of equations using LU Decomposition method:
$2x + 3y + z = 9$
$x + 2y + 3z = 6$
$3x + y + 2z = 8$

f) Solve $\frac{dy}{dx} = x + y$ with $x_0 = 0, y_0 = 1$ using fourth-order Runge-Kutta method and find approximate value of y when $x = 0.2$

g) Solve $\frac{dy}{dx} = 1 + xy$ with $y(0) = 1$ using Picard's method take first approximation and find y for $x = 0.1$

Q.3 Attempt Any One. **03**

a) Solve the system by Gauss-Seidel method (Perform 4 iterations):

$10x + y + z = 12$

$2x + 10y + z = 13$

$2x + 2y + 10z = 14$

b) Use Newton-Raphson method to find a root of the equation $x^4 - x - 10 = 0$ which is near to $x = 2$. Perform 3 iterations correct to three decimal places.

SECTION – II

Q.4 Attempt Any Five. **25**

a) Approximate $\int_1^3 \frac{1}{x} dx$ using the composite trapezoidal rule with $n = 4$ sub-intervals. List the function values at the nodes, show the application of the formula, and give the final answer correct to 4 decimal places

b) Using Jacobi's method, find all eigenvalues and eigenvectors of the symmetric matrix:

$$A = \begin{bmatrix} 6 & 2 & 1 \\ 2 & 5 & 2 \\ 1 & 2 & 4 \end{bmatrix}$$

c) Evaluate the integral $\int_{-1}^{1} \frac{dx}{1+x^2}$ using Gaussian 3-point Quadrature formula.

d) Find the dominant eigenvalue and the corresponding eigenvector of the matrix

$A = \begin{bmatrix} 4 & 1 & 1 \\ 1 & 3 & 1 \\ 1 & 1 & 2 \end{bmatrix}$ using the Power Method.

Perform 5 iterations taking initial vector as $[1,0,0]^T$

e) Given the Values:

x	2	4	6	8
$f(x)$	5	17	37	65

Evaluate $f(5)$, using Lagrange's Formula.

f) Using Newton's Backward formula, find the value of $f(2)$ if:

x	1.0	1.5	2.0	2.5
$f(x)$	2.71	3.38	4.00	4.58

g) Determine the polynomial $f(x)$ using Newton's Divided Difference formula for the data: Also find $f(3)$.

x	0	1	2	3	5
$f(x)$	1	14	15	5	6

Q.5 Attempt Any One. **03**

a) Find all Eigen values and Eigen vectors of the following matrix by using Gauss Jacobi's Method. $\begin{bmatrix} 1 & 2 \\ 3 & 4 \end{bmatrix}$

b) Construct Newton's Forward interpolation polynomial for the following data:

x	4	6	8	10
$f(x)$	1	3	8	16

a) Approximate $\int_1^3 \frac{1}{x} dx$ using the composite trapezoidal rule with $n = 4$ sub-intervals. List the function values at the nodes, show the application of the formula, and give the final answer correct to 4 decimal places

b) Using Jacobi's method, find all eigenvalues and eigenvectors of the symmetric matrix:

$$A = \begin{bmatrix} 6 & 2 & 1 \\ 2 & 5 & 2 \\ 1 & 2 & 4 \end{bmatrix}$$

c) Evaluate the integral $\int_{-1}^{1} \frac{dx}{1+x^2}$ using Gaussian 3-point Quadrature formula.

d) Find the dominant eigenvalue and the corresponding eigenvector of the matrix

$A = \begin{bmatrix} 4 & 1 & 1 \\ 1 & 3 & 1 \\ 1 & 1 & 2 \end{bmatrix}$ using the Power Method.

Perform 5 iterations taking initial vector as $[1,0,0]^T$

e) Given the Values:

x	2	4	6	8
$f(x)$	5	17	37	65

Evaluate $f(5)$, using Lagrange's Formula.

f) Using Newton's Backward formula, find the value of $f(2)$ if:

x	1.0	1.5	2.0	2.5
$f(x)$	2.71	3.38	4.00	4.58

g) Determine the polynomial $f(x)$ using Newton's Divided Difference formula for the data: Also find $f(3)$.

x	0	1	2	3	5
$f(x)$	1	14	15	5	6

Q.5 Attempt Any One. **03**

a) Find all Eigen values and Eigen vectors of the following matrix by using Gauss Jacobi's Method. $\begin{bmatrix} 1 & 2 \\ 3 & 4 \end{bmatrix}$

b) Construct Newton's Forward interpolation polynomial for the following data:

x	4	6	8	10
$f(x)$	1	3	8	16

Seat No.		Set	S

S.Y. (B.Tech.) (Electronics & Telecommunication Engineering) (Semester - II) (New) (NEP CBCS) Examination: March/April - 2026
Computational Mathematics (OE-02F)

Day & Date: Friday, 22-05-2026 Max. Marks: 70
Time: 03:00 PM To 06:00 PM

Instructions: 1) Q. No. 1 is compulsory. It should be solved in the first 30 minutes in Answer Book Page no 03 (Starting page of the Answer Book). Each question carries one mark.
2) Don't forget to Mention question paper set (P/Q/R/S) on top of page.
3) Figures to the right indicates full marks.
4) Assume suitable data where necessary.

MCQ/Objective Type Questions

Duration: 30 Minutes Marks:14

Q.1 Choose the correct alternative from the options. **14**

1) The order of convergence of Newton-Raphson method is _____.
a) 1 b) 2
c) $\sqrt{2}$ d) 1.6

2) Power Method is used to find _____.
a) Negative Eigen Value b) Largest Eigen value
c) Positive Eigen Value d) None of these

3) To find the numerically largest Eigen value using iterative method we use the equation _____.
a) $A = \lambda X$ b) $AX = X$
c) $X = \lambda X$ d) $AX = \lambda X$

4) If $dy/dx = x - y$ and $y(0) = 1$, then by Picard's method the value of $y_1(1)$ is _____.
a) 0.905 b) 1.905
c) 2.905 d) None

5) Runge-Kutta method is self-starting method _____.
a) True b) False
c) We can't say d) None

6) The Newton's forward interpolation formula is generally preferred when data points are _____.
a) Unequally spaced
b) Equally spaced and near the beginning
c) Equally spaced and near the end
d) Randomly spaced

7) In the power method, the vector is normalized in each iteration mainly to _____.
   a) increase the determinant
   b) prevent values from becoming too large
   c) eliminate eigen values
   d) make the matrix symmetric

8) Simpson's $3/8$ rule requires the number of sub-intervals to be _____.
   a) multiple of 2
   b) multiple of 3
   c) multiple of 4
   d) odd only

9) Picard's method is mainly used to solve _____.
   a) linear programming problems
   b) differential equations
   c) eigen value problems
   d) interpolation problems

10) A transcendental equation is an equation that involves _____.
   a) Only algebraic terms
   b) Only transcendental functions
   c) Both algebraic and transcendental functions
   d) Linear terms only

11) The interval in which a real root of the equation $x^3 - 2x - 5 = 0$ lies is _____.
   a) $(1, 2)$
   b) $(0, 1)$
   c) $(2, 3)$
   d) $(3, 4)$

12) The Gauss-Seidel method is used for solving _____.
   a) Nonlinear equations
   b) Systems of linear equations
   c) Ordinary differential equations
   d) Partial differential equations

13) Which of the following is a disadvantage of the Gauss-Jacobi method?
   a) It converges faster than most direct methods
   b) It requires a large number of iterations for a good approximation
   c) It cannot be used for systems with more than two equations
   d) It works only for symmetric systems

14) The use of Romberg's method is _____.
   a) To solve simultaneous linear equation
   b) To find root of linear equation
   c) To evaluate definite integration
   d) To find the Eigen values

Seat No.	

Set **S**

S.Y. (B.Tech.) (Electronics & Telecommunication Engineering) (Semester - II) (New) (NEP CBCS) Examination: March/April - 2026
Computational Mathematics (OE-02F)

Day & Date: Friday, 22-05-2026 Max. Marks: 56
Time: 03:00 PM To 06:00 PM

Instructions: 1) All questions are compulsory.
2) Figures to the right indicate full marks.
3) Assume suitable data where necessary.

SECTION – I

Q.2 Attempt Any Five: **25**

a) Find the double root of the equation $x^3 - 5.4x^2 + 9.24x - 5.096 = 0$ given that it is nearer to 1.5.

b) Solve the system of equations by Jacobi's iterative method (perform 3 iterations):
$27x + 6y - z = 85,$
$6x + 15y + 2z = 72,$
$x + y + 54z = 110$

c) Find positive real root of the equation $x\sin(x) + \cos(x) = 0$ using Newton-Raphson method correct to 3 decimal places.

d) Solve the system of equations by using Gauss-Elimination method:
$2x + y + z = 7,$
$x + 2y + 3z = 14,$
$3x + 4y + z = 14.$

e) Solve the following system of equations using LU Decomposition method:
$2x + 3y + z = 9$
$x + 2y + 3z = 6$
$3x + y + 2z = 8$

f) Solve $\frac{dy}{dx} = x + y$ with $x_0 = 0, y_0 = 1$ using fourth-order Runge-Kutta method and find approximate value of y when $x = 0.2$

g) Solve $\frac{dy}{dx} = 1 + xy$ with $y(0) = 1$ using Picard's method take first approximation and find y for $x = 0.1$

Q.3 Attempt Any One. **03**

a) Solve the system by Gauss-Seidel method (Perform 4 iterations):

$10x + y + z = 12$

$2x + 10y + z = 13$

$2x + 2y + 10z = 14$

b) Use Newton-Raphson method to find a root of the equation $x^4 - x - 10 = 0$ which is near to $x = 2$. Perform 3 iterations correct to three decimal places.

SECTION – II

Q.4 Attempt Any Five. **25**

a) Approximate $\int_1^3 \frac{1}{x} dx$ using the composite trapezoidal rule with $n = 4$ sub-intervals. List the function values at the nodes, show the application of the formula, and give the final answer correct to 4 decimal places

b) Using Jacobi's method, find all eigenvalues and eigenvectors of the symmetric matrix:

$$A = \begin{bmatrix} 6 & 2 & 1 \\ 2 & 5 & 2 \\ 1 & 2 & 4 \end{bmatrix}$$

c) Evaluate the integral $\int_{-1}^{1} \frac{dx}{1+x^2}$ using Gaussian 3-point Quadrature formula.

d) Find the dominant eigenvalue and the corresponding eigenvector of the matrix

$A = \begin{bmatrix} 4 & 1 & 1 \\ 1 & 3 & 1 \\ 1 & 1 & 2 \end{bmatrix}$ using the Power Method.

Perform 5 iterations taking initial vector as $[1,0,0]^T$

e) Given the Values:

x	2	4	6	8
$f(x)$	5	17	37	65

Evaluate $f(5)$, using Lagrange's Formula.

f) Using Newton's Backward formula, find the value of $f(2)$ if:

x	1.0	1.5	2.0	2.5
$f(x)$	2.71	3.38	4.00	4.58

g) Determine the polynomial $f(x)$ using Newton's Divided Difference formula for the data: Also find $f(3)$.

x	0	1	2	3	5
$f(x)$	1	14	15	5	6

Q.5 Attempt Any One. **03**

a) Find all Eigen values and Eigen vectors of the following matrix by using Gauss Jacobi's Method. $\begin{bmatrix} 1 & 2 \\ 3 & 4 \end{bmatrix}$

b) Construct Newton's Forward interpolation polynomial for the following data:

x	4	6	8	10
$f(x)$	1	3	8	16

3) Figures to the right indicates full marks.
4) Assume suitable data wherever needed and mention it clearly.

MCQ/Objective Type Questions

Duration: 30 Minutes Marks:14

Q.1 Choose the correct alternative from the option. 14

1) In the basic process of communication, the sender converts ideas into symbols; this step is called_____.
a) Decoding b) Encoding
c) Feedback d) Channeling

2) A message sent without words using facial expressions or gestures is called _____.
a) Written communication b) Verbal communication
c) Non-verbal communication d) Grapevine communication

3) Which channel characteristic most reduces chances of immediate feedback?
a) Face-to-face conversation b) Telephone call
c) Email d) Video conference

4) A major barrier to effective communication that arises from personal beliefs or selective attention is called _____.
a) Noise b) Semantic barrier
c) Perceptual barrier d) Channel barrier

5) Body language, eye contact and posture are examples of ____.
a) Verbal codes b) Non-verbal codes
c) Written codes d) Graphic communication

6) Upward communication flows from _____.
a) Top management to workers
b) Peers to peers
c) Workers to management
d) External stakeholders to company

7) An advantage of face-to-face communication over written communication is _____.
a) Permanent record
b) Easier legal reference
c) Immediate feedback
d) More formal tone

8) Which element is essential for an effective welcome speech?
a) Detailed technical data
b) Acknowledgement of guests
c) Long biographical note
d) Complex statistics

9) The main purpose of a vote of thanks at an event is to _____.
a) Introduce the keynote speaker
b) Summarize research findings
c) Express gratitude to contributors and audience
d) Present the event budget

10) Which is a best practice when delivering a professional presentation?
a) Reading every slide verbatim
b) Using too many small fonts
c) Maintaining eye contact and varying tone
d) Using no structure or flow

11) When a buyer is dissatisfied with delivered goods and asks for correction or refund, they should send a _____.
a) Enquiry letter
b) Complaint letter
c) Order letter
d) Quotation letter

12) A purchase order is principally used to _____.
a) Complain about defects
b) Request a quotation
c) Place an order for goods or services
d) Acknowledge receipt of payment

13) Which part of a business letter contains the main message or details the writer wants to communicate?
a) Heading
b) Salutation
c) Body
d) Signature block

14) Which report type is typically written to describe a workplace accident and recommend corrective actions?
a) Progress report
b) Accident report
c) Sales report
d) Quotation report

Duration: 30 Minutes Marks:14

Q.1 Choose the correct Answer. **14**

1) The correct ways to solve a problem of state-space search are?
a) Forward from the initial state b) Backward from the goal
c) Both a) and b) d) None of the above

2) Which of these is the best learning model suitable for an observable environment?
a) Supervised b) Unsupervised
c) Both a) and b) d) None of the above

3) A* algorithm is based on _____.
a) Breadth-First-Search b) Depth-First-Search
c) Best-First-Search d) Hill climbing

4) Which is not a property of representation of knowledge?
a) Representational Verification b) Representational Adequacy
c) Inferential Adequacy d) Inferential Efficiency

5) Which of the following search technique has AND/OR graph theory?
a) Greedy Best First Search b) A*
c) AO* d) None of these

6) Propositional Logic has _____ output.
a) Either True or False b) Both True and False
c) Quantitative Value d) None

7) How an Al agent does interact with its environment?
   a) Using sensors and perceivers
   b) Using only sensors
   c) Using only perceivers
   d) None of the above

8) If a machine can change its course of action based on the external environment on its own, the machine is called?
   a) Mobile
   b) Intelligent
   c) Both a) and b)
   d) None of the above

9) What is Artificial intelligence?
   a) Putting your intelligence into Computer
   b) Programming with your own intelligence
   c) Making a Machine intelligent
   d) Playing a Game

10) A production rule consists of _____.
   a) A set of Rule
   b) A sequence of steps
   c) Both a) and b)
   d) Arbitrary representation to problem

11) Probability always lies between?
   a) 0 and 1
   b) 0 and 100
   c) 0 and infinity
   d) −infinity to +infinity

12) Which if the following most advanced form of Al?
   a) Neural Network
   b) Machine Learning
   c) Data Science
   d) Deep Learning

13) Which search method takes less memory?
   a) Depth-First Search
   b) Breadth-First search
   c) Both a) and b)
   d) Linear Search

14) Decisions of Victory/Defeat are made in Game trees using which algorithm?
   a) DFS
   b) BFS
   c) Heuristic Search
   d) Min/Max Algorithm

Set **P**

S.Y. (B.Tech.) (Electronics & Telecommunication Engineering) (Semester - II) (New) (NEP CBCS) Examination: March/April - 2026
Artificial Intelligence (ENTHON-02A)

Day & Date: Tuesday, 26-05-2026 Max. Marks: 56
Time: 10:00 AM To 01:00 PM

Instructions: 1) All questions are compulsory.
2) Figures to the right indicate full marks.

SECTION – I

Q.2 Solve Any Four. **16**

a) Explain the minimax algorithm with example.

b) Explain any four applications of Al.

c) Explain any two types Al agents with diagram.

d) Explain AO* Algorithm with example.

e) What is constraint Satisfaction Problems? Explain with map colouring example.

Q.3 Solve Any Two **12**

a) Explain FOL (First Order Logic) in detail.

b) Write short note on knowledge representation and reasoning.

c) Write a note BFS and DFS with example.

SECTION – II

Q.4 Solve Any Four **16**

a) Explain Bayes Rule with suitable example.

b) Explain Bayesian networks.

c) What are the scalability issues concerned with learning and knowledge acquisition?

d) Explain utility theory.

e) Explain in brief the streaming scenario in learning and Knowledge acquisition.

Q.5 Solve Any Two **12**

a) Justify the application of machine learning in Artificial Intelligence.

b) Write a short note on:
i) Sequential Decision Problems
ii) Streaming Scenario

c) Explain about description logics.

Set Q

S.Y. (B.Tech.) (Electronics & Telecommunication Engineering) (Semester - II) (New) (NEP CBCS) Examination: March/April - 2026
Artificial Intelligence (ENTHON-02A)

Day & Date: Tuesday, 26-05-2026 Max. Marks: 70
Time: 10:00 AM To 01:00 PM

Instructions: 1) Q. No. 1 is compulsory. It should be solved in the first 30 minutes in Answer Book Page no 03 (Starting page of the Answer Book). Each question carries one mark.
2) Don't forget to Mention question paper set (P/Q/R/S) on top of page.
3) Figures to the right indicates full marks.
4) Assume suitable data if necessary and mention it clearly.

MCQ/Objective Type Questions

Duration: 30 Minutes Marks:14

Q.1 Choose the correct Answer. **14**

1) If a machine can change its course of action based on the external environment on its own, the machine is called?
a) Mobile
b) Intelligent
c) Both a) and b)
d) None of the above

2) What is Artificial intelligence?
a) Putting your intelligence into Computer
b) Programming with your own intelligence
c) Making a Machine intelligent
d) Playing a Game

3) A production rule consists of _____.
a) A set of Rule
b) A sequence of steps
c) Both a) and b)
d) Arbitrary representation to problem

4) Probability always lies between?
a) 0 and 1
b) 0 and 100
c) 0 and infinity
d) −infinity to +infinity

5) Which if the following most advanced form of Al?
a) Neural Network
b) Machine Learning
c) Data Science
d) Deep Learning

6) Which search method takes less memory?
a) Depth-First Search
b) Breadth-First search
c) Both a) and b)
d) Linear Search

7) Decisions of Victory/Defeat are made in Game trees using which algorithm?
a) DFS
b) BFS
c) Heuristic Search
d) Min/Max Algorithm

8) The correct ways to solve a problem of state-space search are?
a) Forward from the initial state
b) Backward from the goal
c) Both a) and b)
d) None of the above

9) Which of these is the best learning model suitable for an observable environment?
a) Supervised
b) Unsupervised
c) Both a) and b)
d) None of the above

10) A* algorithm is based on _____.
a) Breadth-First-Search
b) Depth-First-Search
c) Best-First-Search
d) Hill climbing

11) Which is not a property of representation of knowledge?
a) Representational Verification
b) Representational Adequacy
c) Inferential Adequacy
d) Inferential Efficiency

12) Which of the following search technique has AND/OR graph theory?
a) Greedy Best First Search
b) A*
c) AO*
d) None of these

13) Propositional Logic has _____ output.
a) Either True or False
b) Both True and False
c) Quantitative Value
d) None

14) How an Al agent does interact with its environment?
a) Using sensors and perceivers
b) Using only sensors
c) Using only perceivers
d) None of the above

MCQ/Objective Type Questions

Duration: 30 Minutes Marks:14

Q.1 Choose the correct alternatives from the option. **14**

1) The World Wide Web (WWW) was invented by _____.
a) Steve Jobs b) Tim Berners Lee
c) Ray Tom Liners d) All of these

2) The purpose of using flux in soldering is to _____.
a) Increase fluidity of solder metal
b) Feel up gaps left in a bad joint
c) Carbon steel
d) Prevent oxides forming

3) State the reason for thermal shutdown of IC regulator?
a) Spikes in temperature b) Decrease in temperature
c) Fluctuation in temperature d) Increase in temperature

4) On which of the following effects of electric current a fuse operates?
a) Photoelectric effect b) Electrostatic effect
c) Heating effect d) Magnetic effect

5) The bridge rectifier is an alternative for _____.
a) Full wave rectifier b) Peak rectifier
c) Half wave rectifier d) None of the mentioned

6) Which of these is not a guided medium?
a) Fiber optical cable b) Coaxial cable
c) Wireless LAN d) Copper wire

7) Which transmission media provides the highest transmission speed in a network?
a) Coaxial cable b) twisted pair cable
c) Optical fiber d) Electrical cable

8) Which of these are web browsers?
a) Google Chrome
b) Internet Explorer
c) Brave
d) All of these

9) In a shunting signal, if the red band is inclined at 45°, it indicates _____.
a) Proceed cautiously
b) Stop
c) Do not stop
d) None of these

10) The height of a semaphore signal above the ground is _____.
a) 6.5 m
b) 5.5 m
c) 8.5 m
d) 7.5 m

11) Which of the following does not change in an ordinary transformer?
a) Current
b) Frequency
c) Voltage
d) All of the above

12) A soldering iron 'bit' is made of _____.
a) Brass
b) Tin
c) Steel
d) Copper

13) What is the max data transfer rate for optical fiber cable?
a) 10 Mbps
b) 100 Mbps
c) 1000 Mbps
d) 10000 Mbps

14) Fiber optics possess the following properties _____.
a) Immune electromagnetic interference
b) Very less signal attenuation
c) Very hard to tap
d) All of the mentioned

b) Coaxial cable
c) Wireless LAN
d) Copper wire

11) Which transmission media provides the highest transmission speed in a network?
a) Coaxial cable
b) twisted pair cable
c) Optical fiber
d) Electrical cable

12) Which of these are web browsers?
a) Google Chrome
b) Internet Explorer
c) Brave
d) All of these

13) In a shunting signal, if the red band is inclined at 45°, it indicates ____.
a) Proceed cautiously
b) Stop
c) Do not stop
d) None of these

14) The height of a semaphore signal above the ground is _____.
a) 6.5 m
b) 5.5 m
c) 8.5 m
d) 7.5 m

Set **R**

S.Y. (B.Tech.) (Electronics & Telecommunication Engineering) (Semester - II) (New) (NEP CBCS) Examination: March/April – 2026
Data Communication and Signaling in Railway (ENTHON-02D)

Day & Date: Tuesday, 26-05-2026 Max. Marks: 56
Time: 10:00 AM To 01:00 PM

Instructions: 1) All questions are compulsory.
2) Figures to the right indicate full marks.

SECTION – I

Q.2 Attempt Any Four. **16**

a) What do you mean by Rectifiers? Give classification.

b) Draw and Explain Block diagram of DC Regulated Power supply.

c) Write a note on WWW (World Wide Web).

d) Explain Soldering & Desoldering techniques.

e) Explain & compare Internet & Intranet.

Q.3 Attempt Any Two. **12**

a) Give Classification of Transmission media. Compare wired transmission media and Wireless transmission media.

b) Explain the necessity of Fuses & classification of Fuses.

c) Write a short note on IC Regulators.

SECTION – II

Q.4 Attempt Any Four. **16**

a) Give & explain the classification of Railway signals according to functions.

b) Write a short note on FTP (File Transfer Protocol).

c) Explain different networking devices.

d) Explain Equipment used in Railnet.

e) What are the special signals used in Railway signaling.

Q.5 Attempt Any Two. **12**

a) Explain the client Server communication model.

b) Write a note on DHCP (Dynamic Host Configuration Protocol).

c) Explain in Detail Domain Name System (DNS).

Seat No.	

Set **S**

S.Y. (B.Tech.) (Electronics & Telecommunication Engineering) (Semester - II) (New) (NEP CBCS) Examination: March/April – 2026
Data Communication and Signaling in Railway (ENTHON-02D)

Day & Date: Tuesday, 26-05-2026 Max. Marks: 70
Time: 10:00 AM To 01:00 PM

Instructions: 1) Q. No. 1 is compulsory. It should be solved in the first 30 minutes in Answer Book Page no 03 (Starting page of the Answer Book). Each question carries one mark
2) Don't forget to Mention question paper set (P/Q/R/S) on top on page.
3) Figures to the right indicates full marks.

MCQ/Objective Type Questions

Duration: 30 Minutes Marks:14

Q.1 Choose the correct alternatives from the option. **14**

1) Which of these is not a guided medium?
a) Fiber optical cable b) Coaxial cable
c) Wireless LAN d) Copper wire

2) Which transmission media provides the highest transmission speed in a network?
a) Coaxial cable b) twisted pair cable
c) Optical fiber d) Electrical cable

3) Which of these are web browsers?
a) Google Chrome b) Internet Explorer
c) Brave d) All of these

4) In a shunting signal, if the red band is inclined at 45°, it indicates ____.
a) Proceed cautiously b) Stop
c) Do not stop d) None of these

5) The height of a semaphore signal above the ground is _____.
a) 6.5 m b) 5.5 m
c) 8.5 m d) 7.5 m

6) Which of the following does not change in an ordinary transformer?
a) Current b) Frequency
c) Voltage d) All of the above

7) A soldering iron 'bit' is made of _____.
a) Brass b) Tin
c) Steel d) Copper

8) What is the max data transfer rate for optical fiber cable?
a) 10 Mbps b) 100 Mbps
c) 1000 Mbps d) 10000 Mbps

9) Fiber optics possess the following properties _____.
   a) Immune electromagnetic interference
   b) Very less signal attenuation
   c) Very hard to tap
   d) All of the mentioned

10) The World Wide Web (WWW) was invented by _____.
   a) Steve Jobs
   b) Tim Berners Lee
   c) Ray Tom Liners
   d) All of these

11) The purpose of using flux in soldering is to _____.
   a) Increase fluidity of solder metal
   b) Feel up gaps left in a bad joint
   c) Carbon steel
   d) Prevent oxides forming

12) State the reason for thermal shutdown of IC regulator?
   a) Spikes in temperature
   b) Decrease in temperature
   c) Fluctuation in temperature
   d) Increase in temperature

13) On which of the following effects of electric current a fuse operates?
   a) Photoelectric effect
   b) Electrostatic effect
   c) Heating effect
   d) Magnetic effect

14) The bridge rectifier is an alternative for _____.
   a) Full wave rectifier
   b) Peak rectifier
   c) Half wave rectifier
   d) None of the mentioned

MCQ/Objective Type Questions

Duration: 30 Minutes Marks:14

Q.1 Choose the correct option from the following. **14**

1) Which OSI layer is responsible for secure key exchange mechanisms?
a) Data Link Layer b) Network Layer
c) Application Layer d) Transport Layer

2) An attempt to gain unauthorized access to a system is called _____.
a) Passive Attack b) Active Attack
c) Intrusion d) Masquerading

3) Which of the following algorithms is NOT an example of a symmetric cipher?
a) AES b) DES
c) RSA d) Blowfish

4) In a transposition cipher, encryption is performed by _____.
a) Replacing each character with another
b) Rearranging the order of characters in the plaintext
c) Swapping letters based on a predefined key
d) Adding extra characters to the text

5) Least Significant Bit (LSB) steganography hides data by _____.
a) Modifying the least significant bits of image/audio files
b) Encrypting data using XOR operations
c) Substituting letters in a text message
d) Creating fake network packets

6) The block size of DES is _____.
a) 32 bits b) 48 bits
c) 56 bits d) 64 bits

7) The final permutation (FP) in DES _____.
   a) Increases encryption strength
   b) Provides diffusion
   c) Is the inverse of the initial permutation
   d) Increases the key length

8) Which mathematical problem is the basis of RSA encryption?
   a) Discrete logarithm problem
   b) Factoring large prime numbers
   c) Symmetric key transformations
   d) Random number generation

9) Public-key cryptography is not commonly used for _____.
   a) Key exchange
   b) Digital signatures
   c) Encrypting large amounts of data directly
   d) Authenticating websites

10) Hash functions are commonly used in _____.
   a) Digital signatures
   b) Image processing
   c) Video compression
   d) Data redundancy checks

11) Collision resistance ensures that _____.
   a) No two inputs produce the same hash
   b) The hash function is always reversible
   c) The function is faster than symmetric encryption
   d) It requires a secret key to work

12) The most secure version of SHA currently recommended for cryptographic use is _____.
   a) SHA-1
   b) SHA-256
   c) SHA-3
   d) MD5

13) Which authentication protocol relies on symmetric encryption?
   a) RSA
   b) Kerberos
   c) Diffie-Hellman
   d) Digital signatures

14) Personal Identity Verification (PIV) is primarily used in _____.
   a) Banking transactions
   b) Government and enterprise security
   c) Password management systems
   d) Cryptanalysis

Instructions: 1) All questions are compulsory.
2) Figures to the right indicate full marks.

Section – I

Q.2 Attempt the following. (Any Four) **16**

a) Briefly describe confidentiality, integrity, and availability with example.

b) Briefly discuss denial-of-service (DoS) attacks.

c) Discuss the strengths and weaknesses of symmetric encryption systems.

d) What are the advantages and disadvantages of transposition techniques?

e) Define brute-force attack and how it applies to DES.

Q.3 Attempt the following. (Any Two) **12**

a) Describe the role of specific security mechanisms as defined in the OSI Security Architecture.

b) Discuss the strengths and weaknesses of symmetric encryption systems.

c) Describe the AES structure and the steps involved in one round of AES.

Section – II

Q.4 Attempt the following. (Any Four) **16**

a) Explain how public-key cryptosystems provide authentication and confidentiality.

b) Define impersonation and substitution attacks in the context of MACs.

c) What is the avalanche effect in cryptographic hash functions? Explain.

d) Mention drawbacks of using symmetric encryption for authentication.

e) What is the avalanche effect in cryptographic hash functions? Explain.

Q.5 Attempt the following. (Any Two) **12**

a) Describe the Diffie-Hellman key exchange algorithm in detail with an example.

b) Compare MACs with digital signatures in terms of functionality.

c) Explain the threats associated with remote user authentication and how they can be addressed.

4) Assume suitable data if necessary and mention it clearly.

MCQ/Objective Type Questions

Duration: 30 Minutes Marks:14

Q.1 Choose the correct alternatives from the given options. 14

1) Which of the following is an application of stack data structure?
a) Backtracking b) Expression evaluation
c) Expression Conversion d) All of these

2) Radix sort is also known as _____.
a) Counting sort b) Bucket sort
c) Card sort d) Shell sort

3) Which data structure for a priority queue be implemented?
a) Array b) Linked List
c) Tree d) All of these

4) In a queue, insertion and deletion takes place at _____.
a) only at rear end b) only at front end
c) rear and front end d) any position

5) Collision in hashing occurs when _____.
a) Two different keys produce same hash value
b) The table is full
c) The key is not found
d) None of these

6) What is worst case time complexity of binary search?
a) $O(\log n)$ b) $O(n \log n)$
c) $O(n)$ d) $O(1)$

7) When given array elements are in sorted order then which searching algorithm is used?
a) Binary
b) Linear
c) Non-sequential
d) Sequential

8) A circular linked list has _____.
a) No last node
b) NULL pointer at end
c) Last node pointing to first node
d) None

9) The time complexity of insertion in a singly linked list at beginning is _____.
a) $O(n)$
b) $O(\log n)$
c) $O(1)$
d) $O(n^2)$

10) Postfix expression for $A + B^*C$ is _____.
a) $ABC^* +$
b) $A + BC^*$
c) $+A^*BC$
d) $ABC+^*$

11) In a $B +$ tree, all actual data records are stored _____.
a) In root
b) In internal nodes
c) In leaf nodes
d) Randomly

12) Which rotation is applied in AVL tree when a node is inserted in right subtree of right child?
a) LL rotation
b) RR rotation
c) LR rotation
d) RL rotation

13) The degree of a node in a graph is _____.
a) Number of edges incident to it
b) Number of nodes connected
c) Level of the node
d) None

14) What does BFS use to keep track of visited nodes?
a) Stack
b) Queue
c) Array only
d) Linked list

Seat No.	

Set **P**

S.Y. (B.Tech.) (Electronics & Telecommunication Engineering) (Semester - II) (New) (NEP CBCS) Examination: March/April – 2026
Data Structures (BTN06405)

Day & Date: Tuesday, 26-05-2026 Max. Marks: 56
Time: 10:00 AM To 01:00 PM

Instructions: 1) All questions are compulsory.
2) Figures to the right indicate full marks.

SECTION – I

Q.2 Solve the following. (Any Two) **10**

a) Define Data Structure. Explain classification in detail.

b) Explain applications of stack. (Any 6)

c) What is priority queue? Explain enqueue and dequeue operations in detail.

Q.3 Attempt the following. (Any Three) **18**

a) What is Asymptotic notation? Explain in detail.

b) Write C program to implement following operations on Linear Queue:
i) Enqueue
ii) Dequeue
iii) Display

c) Explain algorithm for Binary search. Solve Given $10, 12, 24, 29, 39, 40, 51, 56, 69$ Search item $k = 56$ using Binary search.

d) What is stack? Explain with a neat diagram. Write different operations performed on stack.

SECTION – II

Q.4 Solve the following (Any Two). **10**

a) Explain adjacency matrix and adjacency list representation of graphs.

b) Define linked list. Explain types of linked list in detail.

c) Explain $\mathrm{B}-$ tree and $\mathrm{B}+$ tree with comparison. Give example of each.

d) Explain Quick Sort with example. Sort: $\{18, 16, 4, 15, 9, 7, 8, 3\}$

Q.5 Attempt the following. (Any Three) **18**

a) Construct BST for: $30, 100, 90, 15, 2, 25, 36, 72, 78, 10$ – show each step.

b) Define hashing. Explain quadratic probing with example.

c) Define graph terminologies:

i) Neighbours
ii) Degree of node
iii) Regular graph
iv) Path
v) Cycle
vi) Complete graph

d) Create a B – tree of order 5 by inserting: $3, 14, 7, 1, 8, 5, 11, 17, 13, 6$ – show each step.

Seat No.	

Set **Q**

S.Y. (B.Tech.) (Electronics & Telecommunication Engineering) (Semester - II) (New) (NEP CBCS) Examination: March/April – 2026
Data Structures (BTN06405)

Day & Date: Tuesday, 26-05-2026 Max. Marks: 70
Time: 10:00 AM To 01:00 PM

Instructions: 1) Q. No. 1 is compulsory. It should be solved in the first 30 minutes in Answer Book Page no 03 (Starting page of the Answer Book). Each question carries one mark.
2) Don't forget to Mention question paper set (P/Q/R/S) on top of page.
3) Figures to the right indicates full marks.
4) Assume suitable data if necessary and mention it clearly.

MCQ/Objective Type Questions

Duration: 30 Minutes Marks:14

Q.1 Choose the correct alternatives from the given options. 14

1) A circular linked list has _____.
a) No last node
b) NULL pointer at end
c) Last node pointing to first node
d) None

2) The time complexity of insertion in a singly linked list at beginning is _____.
a) $O(n)$ b) $O(\log n)$
c) $O(1)$ d) $O(n^2)$

3) Postfix expression for $A + B^*C$ is _____.
a) $ABC^* +$ b) $A + BC^*$
c) $+A^*BC$ d) $ABC+^*$

4) In a $B+$ tree, all actual data records are stored _____.
a) In root b) In internal nodes
c) In leaf nodes d) Randomly

5) Which rotation is applied in AVL tree when a node is inserted in right subtree of right child?
a) LL rotation b) RR rotation
c) LR rotation d) RL rotation

6) The degree of a node in a graph is _____.
a) Number of edges incident to it
b) Number of nodes connected
c) Level of the node
d) None

7) What does BFS use to keep track of visited nodes?
a) Stack b) Queue
c) Array only d) Linked list

8) Which of the following is an application of stack data structure?
a) Backtracking b) Expression evaluation
c) Expression Conversion d) All of these

9) Radix sort is also known as _____.
a) Counting sort b) Bucket sort
c) Card sort d) Shell sort

10) Which data structure for a priority queue be implemented?
a) Array b) Linked List
c) Tree d) All of these

11) In a queue, insertion and deletion takes place at _____.
a) only at rear end b) only at front end
c) rear and front end d) any position

12) Collision in hashing occurs when _____.
a) Two different keys produce same hash value
b) The table is full
c) The key is not found
d) None of these

13) What is worst case time complexity of binary search?
a) $O(\log n)$ b) $O(n \log n)$
c) $O(n)$ d) $O(1)$

14) When given array elements are in sorted order then which searching algorithm is used?
a) Binary b) Linear
c) Non-sequential d) Sequential

Professional Ethics (VEC-02)

Day & Date: Friday, 29-05-2026 Max. Marks: 50
Time: 10:00 AM To 11:30 AM

Instructions: 1) All questions are compulsory.
2) Figures to the right indicate full marks.
3) Mention Question Paper Set (P/Q/R/S) on Top of Page.

Q.1 Answer the following Objective Type Questions. **50** **Answer**

1) What are fundamental human values?
a) Core beliefs and principles that guide human behavior and interactions
b) Economic indicators for social development
c) Religious doctrines that govern human life
d) Scientific facts that influence decision-making

2) Which value emphasizes treating others as you wish to be treated?
a) Respect b) Empathy
c) Honesty d) Kindness

3) The value of honesty is closely related to _____.
a) Truthfulness and sincerity b) Wealth and possessions
c) Power and influence d) Indifference and insensitivity

4) Which value involves considering the perspectives and feelings of others?
a) Empathy b) Courage
c) Determination d) Patience

5) The value of respect entails _____.
a) Recognizing the worth of every individual and their rights
b) Achieving personal success at any cost
c) Promoting competition among individuals
d) Pursuing material gains over relationships

6) Which value involves being accountable for one's decisions and actions?
a) Responsibility b) Flexibility
c) Confidence d) Arrogance

7) The value of integrity entails _____.
a) Being honest and true to oneself and others
b) Pursuing personal interests at any cost
c) Manipulating and deceiving others for personal gain
d) Ignoring the feelings and rights of other

8) Which value involves being considerate and thoughtful towards others?
a) Kindness
b) Determination
c) Independence
d) Indifference

9) The value of wisdom involves _____.
a) Making sound and informed judgments based on knowledge and experience
b) Pursuing personal interests at the expense of others
c) Ignoring the perspectives and concerns of others
d) Suppressing one's emotions and thoughts

10) Which value involves being truthful and sincere in one's actions and words?
a) Honesty
b) Tolerance
c) Flexibility
d) Arrogance

11) What is the primary goal of engineering ethics?
a) To maximize profits for companies
b) To ensure engineers work efficiently
c) To protect public safety and welfare
d) To follow industry standards

12) Which of the following is considered an ethical responsibility of an engineer?
a) Ignoring environmental concerns to meet deadlines
b) Ensuring the safety of the public
c) Disregarding laws and regulations
d) Making decisions based on personal interests

13) Ethical engineering practices promote _____.
a) The continuous pursuit of profit
b) The advancement of technology at any cost
c) Public trust and confidence in engineering
d) The minimization of safety regulations

14) Ethical engineers should consider which of the following when making decisions?
a) Profit maximization
b) Only the interests of the employer
c) Public safety, environmental impact, and ethical codes
d) Personal comfort and convenience

15) Which of the following is NOT part of an engineer's ethical responsibility?
a) Designing for safety and sustainability
b) Falsifying data to ensure project success
c) Reporting safety concerns immediately
d) Following industry standards and regulations

16) Ethical engineering involves making decisions based on _____.
a) Personal opinions and values
b) Financial incentives and company pressure
c) Objective analysis, codes of ethics, and consideration for the public good
d) Trends in the field of engineering

17) What should an engineer do if they discover a colleague is involved in unethical practices?
a) Ignore the situation to avoid conflict
b) Report the unethical behavior to management or relevant authorities
c) Cover up the situation to protect the colleague
d) Allow the behavior to continue if it does not affect the project

18) Ethical engineering practices include _____.
a) Following industry standards and regulations
b) Ensuring profitability is the main priority
c) Cutting costs by any means necessary
d) Avoiding the reporting of safety hazards

19) What is the primary focus of Kohlberg's theory?
a) Cognitive development b) Social development
c) Moral development d) Emotional development

20) Which term refers to an agreement that is made through discussions and compromises among parties?
a) Conflict b) Consensus
c) Dispute d) Isolation

21) What is the primary goal of risk assessment?
a) To eliminate all risks
b) To identify and mitigate potential risks
c) To ignore potential risks
d) To transfer risks to others

22) What is the primary goal of safety protocols?
a) To increase productivity
b) To reduce costs
c) To prevent injuries and illnesses
d) To improve employee morale

23) What is the difference between a hazard and a risk?
a) A hazard is a potential risk, while a risk is a real danger
b) A hazard is a real danger, while a risk is a potential danger
c) A hazard is a physical danger, while a risk is a financial danger
d) A hazard is a financial danger, while a risk is a physical danger

24) What should you do if you identify a potential risk in the workplace?
a) Ignore it and hope it goes away
b) Report it to your supervisor or HR
c) Try to mitigate it on your own
d) Transfer the risk to someone else

25) According to the theory of ethical egoism, what should guide an individual's moral actions?
a) The well-being of others
b) The individual's own self-interest
c) Social norms and conventions
d) Universal moral principles

26) Collegiality in a professional setting refers to _____.
a) Loyalty to your employer
b) Cooperation and mutual respect among colleagues
c) Competing for individual success
d) Avoiding work conflicts

27) Professional loyalty involves _____.
a) Reporting colleagues' mistakes publicly
b) Protecting the interests of the team or organization
c) Ignoring safety violations to avoid
d) Disclosing confidential information for personal conflict gain

28) Employee rights include _____.
a) The right to work without discrimination
b) The right to disregard company policies
c) The right to personal opinion but not affecting work
d) The right to ignore workplace safety standards

29) Intellectual Property Rights (IPR) protect _____.
a) The financial interests of corporations
b) The ownership and use of creative ideas and inventions
c) The physical assets of a company
d) Workplace performance evaluations

30) *Risk assessment* is important because it helps in _____.
a) Evaluating the potential impact of hazards on health and safety
b) Minimizing workplace productivity
c) Defining job roles
d) Ignoring environmental issues

31) In risk management, mitigation strategies aim to _____.
a) Accept all risks in the workplace
b) Reduce or eliminate identified risks
c) Increase the likelihood of hazards
d) Focus only on maximizing profits

32) Which of the following is a potential consequence of *occupational crime?*
a) Increased workplace productivity
b) Legal consequences and loss of reputation
c) Improvement in company safety standards
d) Higher employee satisfaction

33) Risk reduction in engineering refers to _____.
a) Implementing measures to lower the work chances of accidents
b) Increasing the number of hazards in the work environment
c) Ignoring potential risks
d) Cutting costs by removing safety measures

34) Public safety regulations are primarily designed to _____.
a) Ensure the safety of the company's assets
b) Protect the general public from potential harm
c) Increase revenue for the government
d) Focus only on preventing natural disasters

35) Multinational corporations (MNCs) are characterized by _____.
a) Operations in multiple countries with a centralized headquarters
b) Operating only in their home country
c) Limited influence on global markets
d) No responsibility toward environmental concerns

36) Environmental ethics primarily deals with _____.
a) Human responsibility to manage the environment and natural resources
b) Minimizing corporate profits
c) Technological advancements in engineering
d) Treating employees equally

37) Which of the following is NOT an example of environmental ethics?
a) Reducing pollution and waste
b) Maximizing resource use regardless of environmental impact
c) Preserving biodiversity
d) Sustainable development

38) Computer ethics involves _____.
   a) Programming and coding without considering social consequences
   b) Understanding the moral implications of computing technologies
   c) Focusing only on technological innovation
   d) Ignoring privacy issues

39) Weapons development ethics deals with _____.
   a) The development of new technologies to enhance military capabilities
   b) Restricting the use of all technological advancements
   c) Focusing only on civilian safety
   d) Only addressing the legal aspects of weapon development

40) Engineers as managers are expected to _____.
   a) Focus solely on technical tasks
   b) Lead teams, make strategic decisions, and manage projects
   c) Ignore the business aspects of their work
   d) Avoid taking responsibility for team outcomes

41) Consulting engineers are hired to _____.
   a) Work on projects within the company they are employed
   b) Provide expert advice on technical and engineering problems
   c) Manage public relations for a company
   d) Conduct legal investigations

42) Engineers acting as expert witnesses typically _____.
   a) Present evidence and offer testimony in legal cases
   b) Focus on public relations during a case
   c) Manage engineering projects for legal firms
   d) Directly represent the interests of a company court

43) Sample Code of Ethics of professional organizations typically includes _____.
   a) Guidelines for acceptable behavior and decision-making
   b) Rules for maximizing profits at any cost
   c) Detailed technical specifications for projects
   d) Guidelines for political involvement in engineering

44) ASME stands for _____.
   a) American Society of Mechanical Engineers
   b) American Society of Management Engineers
   c) Association of Safety and Mechanical Engineers
   d) Association of Scientific and Mechanical Engineers

45) The ASCE Code of Ethics emphasizes _____.
- a) Following only local regulations
- b) Maintaining professional integrity and responsibility
- c) Focusing on personal financial gain
- d) Ignoring environmental impacts

46) The IEEE Code of Ethics is primarily concerned with _____.
- a) Fostering professional competence and integrity
- b) Protecting corporate secrets
- c) Maximizing technological advancements at any cost
- d) Developing weapons for defense purposes

47) Global issues in engineering ethics include _____.
- a) Cultural differences in engineering practices
- b) Lack of understanding between technical and ethical concerns
- c) Addressing both local and international engineering challenges
- d) All of the above

48) A key challenge faced by multinational corporations is _____.
- a) Balancing profits with social and environmental
- b) Competing only within their home country responsibilities
- c) Focusing solely on domestic issues
- d) Ignoring corporate social responsibility

49) Empathy is the ability to _____.
- a) Solve problems logically
- b) Understand and share the feelings of others
- c) Be indifferent to others' emotions
- d) Only care about your own well-being

50) The quality of "caring" includes _____.
- a) Showing concern for others' well-being
- b) Ignoring the needs of others
- c) Only helping family and friends
- d) Seeking praise for helping others

S.Y. (B.Tech.) (Electronics & Telecommunication Engineering) (Semester - II) (New) (NEP CBCS) Examination: March/April - 2026
Professional Ethics (VEC-02)

Day & Date: Friday, 29-05-2026 Max. Marks: 50
Time: 10:00 AM To 11:30 AM

Instructions: 1) All questions are compulsory.
2) Figures to the right indicate full marks.
3) Mention Question Paper Set (P/Q/R/S) on Top of Page.

Q.1 Answer the following Objective Type Questions. **50** **Answer**

1) What is the primary goal of risk assessment?
a) To eliminate all risks
b) To identify and mitigate potential risks
c) To ignore potential risks
d) To transfer risks to others

2) What is the primary goal of safety protocols?
a) To increase productivity
b) To reduce costs
c) To prevent injuries and illnesses
d) To improve employee morale

3) What is the difference between a hazard and a risk?
a) A hazard is a potential risk, while a risk is a real danger
b) A hazard is a real danger, while a risk is a potential danger
c) A hazard is a physical danger, while a risk is a financial danger
d) A hazard is a financial danger, while a risk is a physical danger

4) What should you do if you identify a potential risk in the workplace?
a) Ignore it and hope it goes away
b) Report it to your supervisor or HR
c) Try to mitigate it on your own
d) Transfer the risk to someone else

5) According to the theory of ethical egoism, what should guide an individual's moral actions?
a) The well-being of others
b) The individual's own self-interest
c) Social norms and conventions
d) Universal moral principles

6) Collegiality in a professional setting refers to _____.
   a) Loyalty to your employer
   b) Cooperation and mutual respect among colleagues
   c) Competing for individual success
   d) Avoiding work conflicts

7) Professional loyalty involves _____.
   a) Reporting colleagues' mistakes publicly
   b) Protecting the interests of the team or organization
   c) Ignoring safety violations to avoid
   d) Disclosing confidential information for personal conflict gain

8) Employee rights include _____.
   a) The right to work without discrimination
   b) The right to disregard company policies
   c) The right to personal opinion but not affecting work
   d) The right to ignore workplace safety standards

9) Intellectual Property Rights (IPR) protect _____.
   a) The financial interests of corporations
   b) The ownership and use of creative ideas and inventions
   c) The physical assets of a company
   d) Workplace performance evaluations

10) *Risk assessment* is important because it helps in _____.
   a) Evaluating the potential impact of hazards on health and safety
   b) Minimizing workplace productivity
   c) Defining job roles
   d) Ignoring environmental issues

11) In risk management, mitigation strategies aim to _____.
   a) Accept all risks in the workplace
   b) Reduce or eliminate identified risks
   c) Increase the likelihood of hazards
   d) Focus only on maximizing profits

12) Which of the following is a potential consequence of *occupational crime?*
   a) Increased workplace productivity
   b) Legal consequences and loss of reputation
   c) Improvement in company safety standards
   d) Higher employee satisfaction

13) Risk reduction in engineering refers to _____.
   a) Implementing measures to lower the work chances of accidents
   b) Increasing the number of hazards in the work environment
   c) Ignoring potential risks
   d) Cutting costs by removing safety measures

14) Public safety regulations are primarily designed to _____.
- a) Ensure the safety of the company's assets
- b) Protect the general public from potential harm
- c) Increase revenue for the government
- d) Focus only on preventing natural disasters

15) Multinational corporations (MNCs) are characterized by _____.
- a) Operations in multiple countries with a centralized headquarters
- b) Operating only in their home country
- c) Limited influence on global markets
- d) No responsibility toward environmental concerns

16) Environmental ethics primarily deals with _____.
- a) Human responsibility to manage the environment and natural resources
- b) Minimizing corporate profits
- c) Technological advancements in engineering
- d) Treating employees equally

17) Which of the following is NOT an example of environmental ethics?
- a) Reducing pollution and waste
- b) Maximizing resource use regardless of environmental impact
- c) Preserving biodiversity
- d) Sustainable development

18) Computer ethics involves _____.
- a) Programming and coding without considering social consequences
- b) Understanding the moral implications of computing technologies
- c) Focusing only on technological innovation
- d) Ignoring privacy issues

19) Weapons development ethics deals with _____.
- a) The development of new technologies to enhance military capabilities
- b) Restricting the use of all technological advancements
- c) Focusing only on civilian safety
- d) Only addressing the legal aspects of weapon development

20) Engineers as managers are expected to _____.
- a) Focus solely on technical tasks
- b) Lead teams, make strategic decisions, and manage projects
- c) Ignore the business aspects of their work
- d) Avoid taking responsibility for team outcomes

21) Consulting engineers are hired to _____.
a) Work on projects within the company they are employed
b) Provide expert advice on technical and engineering problems
c) Manage public relations for a company
d) Conduct legal investigations

22) Engineers acting as expert witnesses typically _____.
a) Present evidence and offer testimony in legal cases
b) Focus on public relations during a case
c) Manage engineering projects for legal firms
d) Directly represent the interests of a company court

23) Sample Code of Ethics of professional organizations typically includes _____.
a) Guidelines for acceptable behavior and decision-making
b) Rules for maximizing profits at any cost
c) Detailed technical specifications for projects
d) Guidelines for political involvement in engineering

24) ASME stands for _____.
a) American Society of Mechanical Engineers
b) American Society of Management Engineers
c) Association of Safety and Mechanical Engineers
d) Association of Scientific and Mechanical Engineers

25) The ASCE Code of Ethics emphasizes _____.
a) Following only local regulations
b) Maintaining professional integrity and responsibility
c) Focusing on personal financial gain
d) Ignoring environmental impacts

26) The IEEE Code of Ethics is primarily concerned with _____.
a) Fostering professional competence and integrity
b) Protecting corporate secrets
c) Maximizing technological advancements at any cost
d) Developing weapons for defense purposes

27) Global issues in engineering ethics include _____.
a) Cultural differences in engineering practices
b) Lack of understanding between technical and ethical concerns
c) Addressing both local and international engineering challenges
d) All of the above

28) A key challenge faced by multinational corporations is _____.
a) Balancing profits with social and environmental
b) Competing only within their home country responsibilities
c) Focusing solely on domestic issues
d) Ignoring corporate social responsibility

29) Empathy is the ability to _____.
a) Solve problems logically
b) Understand and share the feelings of others
c) Be indifferent to others' emotions
d) Only care about your own well-being

30) The quality of "caring" includes _____.
a) Showing concern for others' well-being
b) Ignoring the needs of others
c) Only helping family and friends
d) Seeking praise for helping others

31) What are fundamental human values?
a) Core beliefs and principles that guide human behavior and interactions
b) Economic indicators for social development
c) Religious doctrines that govern human life
d) Scientific facts that influence decision-making

32) Which value emphasizes treating others as you wish to be treated?
a) Respect b) Empathy
c) Honesty d) Kindness

33) The value of honesty is closely related to _____.
a) Truthfulness and sincerity b) Wealth and possessions
c) Power and influence d) Indifference and insensitivity

34) Which value involves considering the perspectives and feelings of others?
a) Empathy b) Courage
c) Determination d) Patience

35) The value of respect entails _____.
a) Recognizing the worth of every individual and their rights
b) Achieving personal success at any cost
c) Promoting competition among individuals
d) Pursuing material gains over relationships

36) Which value involves being accountable for one's decisions and actions?
a) Responsibility b) Flexibility
c) Confidence d) Arrogance

37) The value of integrity entails _____.
a) Being honest and true to oneself and others
b) Pursuing personal interests at any cost
c) Manipulating and deceiving others for personal gain
d) Ignoring the feelings and rights of other

38) Which value involves being considerate and thoughtful towards others?

a) Kindness
b) Determination
c) Independence
d) Indifference

39) The value of wisdom involves _____.

a) Making sound and informed judgments based on knowledge and experience
b) Pursuing personal interests at the expense of others
c) Ignoring the perspectives and concerns of others
d) Suppressing one's emotions and thoughts

40) Which value involves being truthful and sincere in one's actions and words?

a) Honesty
b) Tolerance
c) Flexibility
d) Arrogance

41) What is the primary goal of engineering ethics?

a) To maximize profits for companies
b) To ensure engineers work efficiently
c) To protect public safety and welfare
d) To follow industry standards

42) Which of the following is considered an ethical responsibility of an engineer?

a) Ignoring environmental concerns to meet deadlines
b) Ensuring the safety of the public
c) Disregarding laws and regulations
d) Making decisions based on personal interests

43) Ethical engineering practices promote _____.

a) The continuous pursuit of profit
b) The advancement of technology at any cost
c) Public trust and confidence in engineering
d) The minimization of safety regulations

44) Ethical engineers should consider which of the following when making decisions?

a) Profit maximization
b) Only the interests of the employer
c) Public safety, environmental impact, and ethical codes
d) Personal comfort and convenience

45) Which of the following is NOT part of an engineer's ethical responsibility?

a) Designing for safety and sustainability
b) Falsifying data to ensure project success
c) Reporting safety concerns immediately
d) Following industry standards and regulations

46) Ethical engineering involves making decisions based on _____.

a) Personal opinions and values
b) Financial incentives and company pressure
c) Objective analysis, codes of ethics, and consideration for the public good
d) Trends in the field of engineering

47) What should an engineer do if they discover a colleague is involved in unethical practices?

a) Ignore the situation to avoid conflict
b) Report the unethical behavior to management or relevant authorities
c) Cover up the situation to protect the colleague
d) Allow the behavior to continue if it does not affect the project

48) Ethical engineering practices include _____.

a) Following industry standards and regulations
b) Ensuring profitability is the main priority
c) Cutting costs by any means necessary
d) Avoiding the reporting of safety hazards

49) What is the primary focus of Kohlberg's theory?

a) Cognitive development
b) Social development
c) Moral development
d) Emotional development

50) Which term refers to an agreement that is made through discussions and compromises among parties?

a) Conflict
b) Consensus
c) Dispute
d) Isolation

c) Focusing on personal financial gain
d) Ignoring environmental impacts

6) The IEEE Code of Ethics is primarily concerned with _____.
a) Fostering professional competence and integrity
b) Protecting corporate secrets
c) Maximizing technological advancements at any cost
d) Developing weapons for defense purposes

7) Global issues in engineering ethics include _____.
a) Cultural differences in engineering practices
b) Lack of understanding between technical and ethical concerns
c) Addressing both local and international engineering challenges
d) All of the above

8) A key challenge faced by multinational corporations is _____.
a) Balancing profits with social and environmental
b) Competing only within their home country responsibilities
c) Focusing solely on domestic issues
d) Ignoring corporate social responsibility

9) Empathy is the ability to _____.
a) Solve problems logically
b) Understand and share the feelings of others
c) Be indifferent to others' emotions
d) Only care about your own well-being

10) The quality of "caring" includes _____.
a) Showing concern for others' well-being
b) Ignoring the needs of others
c) Only helping family and friends
d) Seeking praise for helping others

11) What are fundamental human values?
a) Core beliefs and principles that guide human behavior and interactions
b) Economic indicators for social development
c) Religious doctrines that govern human life
d) Scientific facts that influence decision-making

12) Which value emphasizes treating others as you wish to be treated?
a) Respect b) Empathy
c) Honesty d) Kindness

13) The value of honesty is closely related to _____.
a) Truthfulness and sincerity b) Wealth and possessions
c) Power and influence d) Indifference and insensitivity

14) Which value involves considering the perspectives and feelings of others?
a) Empathy b) Courage
c) Determination d) Patience

15) The value of respect entails _____.
a) Recognizing the worth of every individual and their rights
b) Achieving personal success at any cost
c) Promoting competition among individuals
d) Pursuing material gains over relationships

16) Which value involves being accountable for one's decisions and actions?
a) Responsibility b) Flexibility
c) Confidence d) Arrogance

17) The value of integrity entails _____.
a) Being honest and true to oneself and others
b) Pursuing personal interests at any cost
c) Manipulating and deceiving others for personal gain
d) Ignoring the feelings and rights of other

18) Which value involves being considerate and thoughtful towards others?
a) Kindness b) Determination
c) Independence d) Indifference

19) The value of wisdom involves _____.
a) Making sound and informed judgments based on knowledge and experience
b) Pursuing personal interests at the expense of others
c) Ignoring the perspectives and concerns of others
d) Suppressing one's emotions and thoughts

20) Which value involves being truthful and sincere in one's actions and words?
a) Honesty b) Tolerance
c) Flexibility d) Arrogance

21) What is the primary goal of engineering ethics?
a) To maximize profits for companies
b) To ensure engineers work efficiently
c) To protect public safety and welfare
d) To follow industry standards

22) Which of the following is considered an ethical responsibility of an engineer?
a) Ignoring environmental concerns to meet deadlines
b) Ensuring the safety of the public
c) Disregarding laws and regulations
d) Making decisions based on personal interests

23) Ethical engineering practices promote _____.
a) The continuous pursuit of profit
b) The advancement of technology at any cost
c) Public trust and confidence in engineering
d) The minimization of safety regulations

24) Ethical engineers should consider which of the following when making decisions?
a) Profit maximization
b) Only the interests of the employer
c) Public safety, environmental impact, and ethical codes
d) Personal comfort and convenience

25) Which of the following is NOT part of an engineer's ethical responsibility?
a) Designing for safety and sustainability
b) Falsifying data to ensure project success
c) Reporting safety concerns immediately
d) Following industry standards and regulations

26) Ethical engineering involves making decisions based on _____.
a) Personal opinions and values
b) Financial incentives and company pressure
c) Objective analysis, codes of ethics, and consideration for the public good
d) Trends in the field of engineering

27) What should an engineer do if they discover a colleague is involved in unethical practices?
a) Ignore the situation to avoid conflict
b) Report the unethical behavior to management or relevant authorities
c) Cover up the situation to protect the colleague
d) Allow the behavior to continue if it does not affect the project

28) Ethical engineering practices include _____.
a) Following industry standards and regulations
b) Ensuring profitability is the main priority
c) Cutting costs by any means necessary
d) Avoiding the reporting of safety hazards

29) What is the primary focus of Kohlberg's theory?
a) Cognitive development b) Social development
c) Moral development d) Emotional development

30) Which term refers to an agreement that is made through discussions and compromises among parties?
a) Conflict b) Consensus
c) Dispute d) Isolation

31) What is the primary goal of risk assessment?
a) To eliminate all risks
b) To identify and mitigate potential risks
c) To ignore potential risks
d) To transfer risks to others

32) What is the primary goal of safety protocols?
a) To increase productivity
b) To reduce costs
c) To prevent injuries and illnesses
d) To improve employee morale

33) What is the difference between a hazard and a risk?
a) A hazard is a potential risk, while a risk is a real danger
b) A hazard is a real danger, while a risk is a potential danger
c) A hazard is a physical danger, while a risk is a financial danger
d) A hazard is a financial danger, while a risk is a physical danger

34) What should you do if you identify a potential risk in the workplace?
a) Ignore it and hope it goes away
b) Report it to your supervisor or HR
c) Try to mitigate it on your own
d) Transfer the risk to someone else

35) According to the theory of ethical egoism, what should guide an individual's moral actions?
a) The well-being of others
b) The individual's own self-interest
c) Social norms and conventions
d) Universal moral principles

36) Collegiality in a professional setting refers to _____.
a) Loyalty to your employer
b) Cooperation and mutual respect among colleagues
c) Competing for individual success
d) Avoiding work conflicts

37) Professional loyalty involves _____.
a) Reporting colleagues' mistakes publicly
b) Protecting the interests of the team or organization
c) Ignoring safety violations to avoid
d) Disclosing confidential information for personal conflict gain

38) Employee rights include _____.
a) The right to work without discrimination
b) The right to disregard company policies
c) The right to personal opinion but not affecting work
d) The right to ignore workplace safety standards

39) Intellectual Property Rights (IPR) protect _____.
- a) The financial interests of corporations
- b) The ownership and use of creative ideas and inventions
- c) The physical assets of a company
- d) Workplace performance evaluations

40) *Risk assessment* is important because it helps in _____.
- a) Evaluating the potential impact of hazards on health and safety
- b) Minimizing workplace productivity
- c) Defining job roles
- d) Ignoring environmental issues

41) In risk management, mitigation strategies aim to _____.
- a) Accept all risks in the workplace
- b) Reduce or eliminate identified risks
- c) Increase the likelihood of hazards
- d) Focus only on maximizing profits

42) Which of the following is a potential consequence of *occupational crime?*
- a) Increased workplace productivity
- b) Legal consequences and loss of reputation
- c) Improvement in company safety standards
- d) Higher employee satisfaction

43) Risk reduction in engineering refers to _____.
- a) Implementing measures to lower the work chances of accidents
- b) Increasing the number of hazards in the work environment
- c) Ignoring potential risks
- d) Cutting costs by removing safety measures

44) Public safety regulations are primarily designed to _____.
- a) Ensure the safety of the company's assets
- b) Protect the general public from potential harm
- c) Increase revenue for the government
- d) Focus only on preventing natural disasters

45) Multinational corporations (MNCs) are characterized by _____.
- a) Operations in multiple countries with a centralized headquarters
- b) Operating only in their home country
- c) Limited influence on global markets
- d) No responsibility toward environmental concerns

46) Environmental ethics primarily deals with _____.
a) Human responsibility to manage the environment and natural resources
b) Minimizing corporate profits
c) Technological advancements in engineering
d) Treating employees equally

47) Which of the following is NOT an example of environmental ethics?
a) Reducing pollution and waste
b) Maximizing resource use regardless of environmental impact
c) Preserving biodiversity
d) Sustainable development

48) Computer ethics involves _____.
a) Programming and coding without considering social consequences
b) Understanding the moral implications of computing technologies
c) Focusing only on technological innovation
d) Ignoring privacy issues

49) Weapons development ethics deals with _____.
a) The development of new technologies to enhance military capabilities
b) Restricting the use of all technological advancements
c) Focusing only on civilian safety
d) Only addressing the legal aspects of weapon development

50) Engineers as managers are expected to _____.
a) Focus solely on technical tasks
b) Lead teams, make strategic decisions, and manage projects
c) Ignore the business aspects of their work
d) Avoid taking responsibility for team outcomes

Q.1 Answer the following Objective Type Questions. **50** **Answer**

1) What is the primary goal of engineering ethics?
a) To maximize profits for companies
b) To ensure engineers work efficiently
c) To protect public safety and welfare
d) To follow industry standards

2) Which of the following is considered an ethical responsibility of an engineer?
a) Ignoring environmental concerns to meet deadlines
b) Ensuring the safety of the public
c) Disregarding laws and regulations
d) Making decisions based on personal interests

3) Ethical engineering practices promote _____.
a) The continuous pursuit of profit
b) The advancement of technology at any cost
c) Public trust and confidence in engineering
d) The minimization of safety regulations

4) Ethical engineers should consider which of the following when making decisions?
a) Profit maximization
b) Only the interests of the employer
c) Public safety, environmental impact, and ethical codes
d) Personal comfort and convenience

5) Which of the following is NOT part of an engineer's ethical responsibility?
a) Designing for safety and sustainability
b) Falsifying data to ensure project success
c) Reporting safety concerns immediately
d) Following industry standards and regulations

6) Ethical engineering involves making decisions based on _____.
   a) Personal opinions and values
   b) Financial incentives and company pressure
   c) Objective analysis, codes of ethics, and consideration for the public good
   d) Trends in the field of engineering

7) What should an engineer do if they discover a colleague is involved in unethical practices?
   a) Ignore the situation to avoid conflict
   b) Report the unethical behavior to management or relevant authorities
   c) Cover up the situation to protect the colleague
   d) Allow the behavior to continue if it does not affect the project

8) Ethical engineering practices include _____.
   a) Following industry standards and regulations
   b) Ensuring profitability is the main priority
   c) Cutting costs by any means necessary
   d) Avoiding the reporting of safety hazards

9) What is the primary focus of Kohlberg's theory?
   a) Cognitive development b) Social development
   c) Moral development d) Emotional development

10) Which term refers to an agreement that is made through discussions and compromises among parties?
   a) Conflict b) Consensus
   c) Dispute d) Isolation

11) What is the primary goal of risk assessment?
   a) To eliminate all risks
   b) To identify and mitigate potential risks
   c) To ignore potential risks
   d) To transfer risks to others

12) What is the primary goal of safety protocols?
   a) To increase productivity
   b) To reduce costs
   c) To prevent injuries and illnesses
   d) To improve employee morale

13) What is the difference between a hazard and a risk?
   a) A hazard is a potential risk, while a risk is a real danger
   b) A hazard is a real danger, while a risk is a potential danger
   c) A hazard is a physical danger, while a risk is a financial danger
   d) A hazard is a financial danger, while a risk is a physical danger

14) What should you do if you identify a potential risk in the workplace?
a) Ignore it and hope it goes away
b) Report it to your supervisor or HR
c) Try to mitigate it on your own
d) Transfer the risk to someone else

15) According to the theory of ethical egoism, what should guide an individual's moral actions?
a) The well-being of others
b) The individual's own self-interest
c) Social norms and conventions
d) Universal moral principles

16) Collegiality in a professional setting refers to _____.
a) Loyalty to your employer
b) Cooperation and mutual respect among colleagues
c) Competing for individual success
d) Avoiding work conflicts

17) Professional loyalty involves _____.
a) Reporting colleagues' mistakes publicly
b) Protecting the interests of the team or organization
c) Ignoring safety violations to avoid
d) Disclosing confidential information for personal conflict gain

18) Employee rights include _____.
a) The right to work without discrimination
b) The right to disregard company policies
c) The right to personal opinion but not affecting work
d) The right to ignore workplace safety standards

19) Intellectual Property Rights (IPR) protect _____.
a) The financial interests of corporations
b) The ownership and use of creative ideas and inventions
c) The physical assets of a company
d) Workplace performance evaluations

20) *Risk assessment* is important because it helps in _____.
a) Evaluating the potential impact of hazards on health and safety
b) Minimizing workplace productivity
c) Defining job roles
d) Ignoring environmental issues

21) In risk management, mitigation strategies aim to _____.
a) Accept all risks in the workplace
b) Reduce or eliminate identified risks
c) Increase the likelihood of hazards
d) Focus only on maximizing profits

22) Which of the following is a potential consequence of *occupational crime?*

a) Increased workplace productivity
b) Legal consequences and loss of reputation
c) Improvement in company safety standards
d) Higher employee satisfaction

23) Risk reduction in engineering refers to _____.

a) Implementing measures to lower the work chances of accidents
b) Increasing the number of hazards in the work environment
c) Ignoring potential risks
d) Cutting costs by removing safety measures

24) Public safety regulations are primarily designed to _____.

a) Ensure the safety of the company's assets
b) Protect the general public from potential harm
c) Increase revenue for the government
d) Focus only on preventing natural disasters

25) Multinational corporations (MNCs) are characterized by _____.

a) Operations in multiple countries with a centralized headquarters
b) Operating only in their home country
c) Limited influence on global markets
d) No responsibility toward environmental concerns

26) Environmental ethics primarily deals with _____.

a) Human responsibility to manage the environment and natural resources
b) Minimizing corporate profits
c) Technological advancements in engineering
d) Treating employees equally

27) Which of the following is NOT an example of environmental ethics?

a) Reducing pollution and waste
b) Maximizing resource use regardless of environmental impact
c) Preserving biodiversity
d) Sustainable development

28) Computer ethics involves _____.

a) Programming and coding without considering social consequences
b) Understanding the moral implications of computing technologies
c) Focusing only on technological innovation
d) Ignoring privacy issues

29) Weapons development ethics deals with _____.
a) The development of new technologies to enhance military capabilities
b) Restricting the use of all technological advancements
c) Focusing only on civilian safety
d) Only addressing the legal aspects of weapon development

30) Engineers as managers are expected to _____.
a) Focus solely on technical tasks
b) Lead teams, make strategic decisions, and manage projects
c) Ignore the business aspects of their work
d) Avoid taking responsibility for team outcomes

31) Consulting engineers are hired to _____.
a) Work on projects within the company they are employed
b) Provide expert advice on technical and engineering problems
c) Manage public relations for a company
d) Conduct legal investigations

32) Engineers acting as expert witnesses typically _____.
a) Present evidence and offer testimony in legal cases
b) Focus on public relations during a case
c) Manage engineering projects for legal firms
d) Directly represent the interests of a company court

33) Sample Code of Ethics of professional organizations typically includes _____.
a) Guidelines for acceptable behavior and decision-making
b) Rules for maximizing profits at any cost
c) Detailed technical specifications for projects
d) Guidelines for political involvement in engineering

34) ASME stands for _____.
a) American Society of Mechanical Engineers
b) American Society of Management Engineers
c) Association of Safety and Mechanical Engineers
d) Association of Scientific and Mechanical Engineers

35) The ASCE Code of Ethics emphasizes _____.
a) Following only local regulations
b) Maintaining professional integrity and responsibility
c) Focusing on personal financial gain
d) Ignoring environmental impacts

36) The IEEE Code of Ethics is primarily concerned with _____.
a) Fostering professional competence and integrity
b) Protecting corporate secrets
c) Maximizing technological advancements at any cost
d) Developing weapons for defense purposes

37) Global issues in engineering ethics include _____.
a) Cultural differences in engineering practices
b) Lack of understanding between technical and ethical concerns
c) Addressing both local and international engineering challenges
d) All of the above

38) A key challenge faced by multinational corporations is _____.
a) Balancing profits with social and environmental
b) Competing only within their home country responsibilities
c) Focusing solely on domestic issues
d) Ignoring corporate social responsibility

39) Empathy is the ability to _____.
a) Solve problems logically
b) Understand and share the feelings of others
c) Be indifferent to others' emotions
d) Only care about your own well-being

40) The quality of "caring" includes _____.
a) Showing concern for others' well-being
b) Ignoring the needs of others
c) Only helping family and friends
d) Seeking praise for helping others

41) What are fundamental human values?
a) Core beliefs and principles that guide human behavior and interactions
b) Economic indicators for social development
c) Religious doctrines that govern human life
d) Scientific facts that influence decision-making

42) Which value emphasizes treating others as you wish to be treated?
a) Respect b) Empathy
c) Honesty d) Kindness

43) The value of honesty is closely related to _____.
a) Truthfulness and sincerity b) Wealth and possessions
c) Power and influence d) Indifference and insensitivity

44) Which value involves considering the perspectives and feelings of others?
a) Empathy b) Courage
c) Determination d) Patience

45) The value of respect entails _____.

a) Recognizing the worth of every individual and their rights
b) Achieving personal success at any cost
c) Promoting competition among individuals
d) Pursuing material gains over relationships

46) Which value involves being accountable for one's decisions and actions?

a) Responsibility b) Flexibility
c) Confidence d) Arrogance

47) The value of integrity entails _____.

a) Being honest and true to oneself and others
b) Pursuing personal interests at any cost
c) Manipulating and deceiving others for personal gain
d) Ignoring the feelings and rights of other

48) Which value involves being considerate and thoughtful towards others?

a) Kindness b) Determination
c) Independence d) Indifference

49) The value of wisdom involves _____.

a) Making sound and informed judgments based on knowledge and experience
b) Pursuing personal interests at the expense of others
c) Ignoring the perspectives and concerns of others
d) Suppressing one's emotions and thoughts

50) Which value involves being truthful and sincere in one's actions and words?

a) Honesty b) Tolerance
c) Flexibility d) Arrogance

S.Y. (B.Tech.) (Electronics & Telecommunication Engineering) (Semester - II) (New) (NEP CBCS) Examination: March/April – 2026
Principles of Digital Communication (BTN06403)

Day & Date: Friday, 29-05-2026 Max. Marks: 70
Time: 10:00 AM To 01:00 PM

Instructions: 1) Q. No. 1 is compulsory. It should be solved in the first 30 minutes in Answer Book Page no 03 (Starting page of the Answer Book). Each question carries one mark.
2) Don't forget to Mention question paper set (P/Q/R/S) on top of page.
3) Figures to the right indicates full marks.
4) Assume suitable data if necessary and mention it clearly.

MCQ/Objective Type Questions

Duration: 30 Minutes Marks:14

Q.1 Choose the correct alternatives from the options and rewrite the sentence. **14**

1) Coherent detection at the receiver side requires _____.
a) Phase Synchronization b) Timing Synchronization
c) Both a) & b) d) Amplitude Synchronization

2) In QAM, both identities are varied _____.
a) Amplitude and phase b) Frequency and phase
c) Bit rate and phase d) Baud rate and phase

3) The error probability of QPSK is _____.
a) Better than BPSK b) Inferior to BPSK
c) Same as BPSK d) None of the above

4) Minimum shift keying is similar to _____.
a) Continuous phase frequency shift keying
b) BPSK
c) BFSK
d) QPSK

5) A correlation receiver consists of _____.
a) Multiplier and integrator b) An integrator only
c) Multiplier only d) Adder and integrator

6) Equalizer is used for _____.
a) Frame synchronization b) Symbol synchronization
c) Carrier synchronization d) Minimizing ISI

7) The order of _____ matrix is $(n-k) \times n$.
a) Generator matrix
b) Parity check matrix
c) Transpose of H
d) None of above

8) Code rate is the ratio of _____.
a) k/n
b) n/k
c) q/k
d) None of above

9) The weight of the code 1010100 is _____.
a) 2
b) 3
c) 4
d) 5

10) Average information per message is called _____.
a) Mutual information
b) Joint information
c) Uncertainty
d) Entropy

11) Information content in the universally true event is _____.
a) Infinite Constant
b) Zero
c) Positive
d) Negative Constant

12) In _____ encoding, we use three levels: positive, zero and negative.
a) Unipolar
b) Bipolar
c) Polar
d) None of the above

13) In PCM quantization noise depends on _____.
a) Sampling rate
b) Number of quantization levels
c) Signal power
d) None of the above

14) The minimum distance in two symbols in case of BPSK is _____.
a) $\sqrt{}$Eb
b) 2 $\sqrt{}$Eb
c) EB
d) None of these

Set **P**

S.Y. (B.Tech.) (Electronics & Telecommunication Engineering) (Semester - II) (New) (NEP CBCS) Examination: March/April – 2026
Principles of Digital Communication (BTN06403)

Day & Date: Friday, 29-05-2026 Max. Marks: 56
Time: 10:00 AM To 01:00 PM

Instructions: 1) All questions are compulsory.
2) Figures to the right indicate full marks.
3) Use of non-programable calculator is allowed.
4) Assume suitable data if necessary and mention it clearly.

SECTION – I

Q.2 Solve any four. **16**

a) Define entropy. Derive the expression for entropy of a discrete memoryless source.

b) Explain mutual information and its significance in information theory.

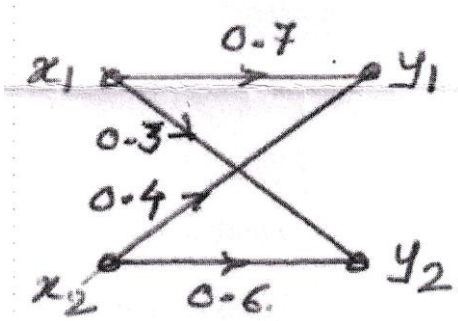
c) Explain Inter Symbol Interference (ISI). What causes ISI in digital systems?

d) List different line coding techniques and mention their characteristics.

e) What is Binary Frequency Shift Keying (BFSK)? Give its signal representation and waveform.

Q.3 Solve any two. **12**

a) Find the mutual information or trans information for channel shown below.



b) Describe the working of a PCM system with a neat block diagram. Discuss its advantages and limitations.

c) Compare BASK, BFSK, BPSK, and DPSK based on: Bandwidth requirement, Power efficiency, Probability of error & Equipment complexity.

SECTION – II

Q.4 Solve any four. **16**

a) Write a short note on integrate and dump receiver.

b) Write a note on QAM modulation.

c) Write any one method of frame synchronization.

d) For the (6,3) block code the parity check matrix is given as

$$H = \begin{bmatrix} 1 & 0 & 1 & 1 & 0 & 0 \\ 0 & 1 & 1 & 0 & 1 & 0 \\ 1 & 1 & 0 & 0 & 0 & 1 \end{bmatrix}$$

If received vector is 100101, find whether it is erroneous.

e) Explain any one carrier recovery technique.

Q.5 Solve any two. **12**

a) For (7,3) block code the generator matrix is given by.

$$G = \begin{bmatrix} 1 & 0 & 0 & 0 & 1 & 0 & 1 \\ 0 & 1 & 0 & 0 & 1 & 1 & 1 \\ 0 & 0 & 1 & 0 & 1 & 1 & 0 \\ 0 & 0 & 0 & 1 & 0 & 1 & 1 \end{bmatrix}$$

i) Find parity check matrix

ii) Find all the code vectors of this code.

iii) Comment on error detection and correction capability of this code.

b) Explain the working of M_{ary} FSK transmitter.

c) Explain in detail QPSK transmitter and receiver.

3) Figures to the right indicates full marks.

MCQ/Objective Type Questions

Duration: 30 Minutes Marks:14

Q.1 Choose the correct alternatives from the options. **14**

1) The main purpose of a Zener diode is _____.
a) Rectification b) Voltage regulation
c) Amplification d) Switching

2) Clampers are used to _____.
a) Shift waveform without changing shape
b) Rectify AC signal
c) Clip waveform
d) Increase amplitude

3) In CE configuration, output is _____.
a) In phase with input
b) 180° out of phase with input
c) Zero
d) Same as CB

4) Enhancement-type MOSFET _____.
a) Has channel at zero VGS
b) Requires VGS to form channel
c) Works in depletion mode
d) Has low input impedance

5) DC load line is used to _____.
a) Determine Q-point b) Determine AC gain
c) Measure temperature d) Find input impedance

6) MOSFET is _____.
a) Current-controlled b) Voltage-controlled
c) Both d) None

7) Open-loop inverting amplifier output _____.
   a) In phase
   b) 180^0 out of phase
   c) Same as input
   d) Zero

8) For inverting amplifier, if $\mathrm{Rf} = 100\mathrm{k}\Omega$ and $\mathrm{Ri} = 1\mathrm{k}\Omega$ then closed loop gain is _____.
   a) 1,00,000
   b) 1,000
   c) 101
   d) -100

9) Closed-loop feedback reduces _____.
   a) Input resistance
   b) Output resistance
   c) Gain instability
   d) Both b) & c)

10) Virtual ground occurs at _____.
   a) Non-inverting terminal
   b) Inverting terminal in closed-loop
   c) Output terminal
   d) Ground only

11) Slew rate of op-amp _____.
   a) Rate of change of input voltage
   b) Rate of change of output voltage
   c) Maximum current
   d) Maximum gain

12) Instrumentation amplifier is used for _____.
   a) High input impedance, high CMRR
   b) Low input impedance
   c) Unity gain only
   d) Voltage follower

13) Summing amplifier can be _____.
   a) Inverting only
   b) Non-inverting only
   c) Both inverting and non-inverting
   d) None

14) Integrator and differentiator are examples of _____.
   a) Linear circuits
   b) Non-linear circuits
   c) Digital circuits
   d) None

Q.2 Attempt Any Four questions. **16**

a) Explain the construction and working of a Zener diode with its V-I characteristics.

b) Explain the concept thermal runaway in detail.

c) Draw and explain the frequency response curve of an RC coupled CE amplifier.

d) Describe the effect of coupling and bypass capacitors on frequency response of CE amplifier.

e) Draw and explain the construction and working of an n-channel JFET.

f) Explain the operation of depletion type MOSFET.

Q.3 Attempt Any Two questions. **12**

a) Explain in detail the working of diode circuits as
i) Clipper and
ii) Clamper with necessary diagrams.

b) Explain small signal JFET Parameters.
i) Input Resistance
ii) DC Drain Resistance
iii) Transconductance
iv) Amplification Factors

c) Explain construction and operation of enhancement-type MOSFET. Draw and explain its transfer characteristics.

SECTION – II

Q.4 Attempt Any Four questions. **16**

a) Draw and explain the block diagram of an operational amplifier and describe each stage.

b) Discuss ideal and practical characteristics of an op-amp. Explain each term briefly.

c) Describe the four basic feedback configurations of op-amp.

d) Draw and explain the block diagram of a voltage series feedback amplifier.

e) Explain the working of a voltage follower with neat circuit diagram.

f) With neat circuit diagram explain working of a differentiator.

Q.5 Attempt Any Two questions. **12**

a) Draw and explain the equivalent circuit and ideal voltage transfer curve of an op-amp.

b) Derive expressions for input resistance, output resistance, bandwidth, and total output offset voltage for a voltage series feedback op-amp.

c) Describe voltage-to-current converter with floating and grounded load.

S.Y. (B.Tech.) (Electrical Engineering) (Semester - I) (New) (NEP CBCS) Examination: March/April – 2026
Analog Electronics (EEPCC-01)

Day & Date: Monday, 04-05-2026 Max. Marks: 70
Time: 03:00 PM To 06:00 PM

Instructions: 1) Q. No. 1 is compulsory. It should be solved in the first 30 minutes in Answer Book Page no 03 (Starting page of the Answer Book). Each question carries one mark.
2) Don't forget to Mention question paper set (P/Q/R/S) on top of page.
3) Figures to the right indicates full marks.

MCQ/Objective Type Questions

Duration: 30 Minutes Marks:14

Q.1 Choose the correct alternatives from the options. **14**

1) For inverting amplifier, if $\mathrm{Rf} = 100\mathrm{k}\Omega$ and $\mathrm{Ri} = 1\mathrm{k}\Omega$ then closed loop gain is _____.
a) 1,00,000 b) 1,000
c) 101 d) -100

2) Closed-loop feedback reduces _____.
a) Input resistance b) Output resistance
c) Gain instability d) Both b) & c)

3) Virtual ground occurs at _____.
a) Non-inverting terminal
b) Inverting terminal in closed-loop
c) Output terminal
d) Ground only

4) Slew rate of op-amp _____.
a) Rate of change of input voltage
b) Rate of change of output voltage
c) Maximum current
d) Maximum gain

5) Instrumentation amplifier is used for _____.
a) High input impedance, high CMRR
b) Low input impedance
c) Unity gain only
d) Voltage follower

6) Summing amplifier can be _____.
   a) Inverting only
   b) Non-inverting only
   c) Both inverting and non-inverting
   d) None

7) Integrator and differentiator are examples of _____.
   a) Linear circuits
   b) Non-linear circuits
   c) Digital circuits
   d) None

8) The main purpose of a Zener diode is _____.
   a) Rectification
   b) Voltage regulation
   c) Amplification
   d) Switching

9) Clampers are used to _____.
   a) Shift waveform without changing shape
   b) Rectify AC signal
   c) Clip waveform
   d) Increase amplitude

10) In CE configuration, output is _____.
   a) In phase with input
   b) 180° out of phase with input
   c) Zero
   d) Same as CB

11) Enhancement-type MOSFET _____.
   a) Has channel at zero VGS
   b) Requires VGS to form channel
   c) Works in depletion mode
   d) Has low input impedance

12) DC load line is used to _____.
   a) Determine Q-point
   b) Determine AC gain
   c) Measure temperature
   d) Find input impedance

13) MOSFET is _____.
   a) Current-controlled
   b) Voltage-controlled
   c) Both
   d) None

14) Open-loop inverting amplifier output _____.
   a) In phase
   b) 180^0 out of phase
   c) Same as input
   d) Zero

Power Plant Engineering and Elements of Power System (EEPCC-02)

Day & Date: Wednesday, 06-05-2026 Max. Marks: 70
Time: 03:00 PM To 06:00 PM

Instructions: 1) Q. No. 1 is compulsory. It should be solved in the first 30 minutes in Answer Book Page no 03 (Starting page of the Answer Book). Each question carries one mark.
2) Don't forget to Mention question paper set (P/Q/R/S) on top of page.
3) Figures to the right indicates full marks.

MCQ/Objective Type Questions

Duration: 30 Minutes Marks:14

Q.1 Multiple choice questions. **14**

1) Electric power supply system means _____.
a) Generation b) Transmission
c) Distribution d) All of above

2) In interconnected grid systems plants are connected in _____.
a) series b) parallel
c) both type d) None of the above

3) A load curve is a plot of _____.
a) Load versus generation capacity
b) Load versus time
c) Load versus current
d) Load versus cost of power

4) Which tariff is most ideal tariff for the consumer?
a) Three-part tariff b) Two-part tariff
c) Both (a) and (b) d) None of the above

5) The load of a consumer is generally measured in terms of _____.
a) Volts b) KW
c) Amperes d) Ampere hour

6) What is the major problem in nuclear plants?
a) Drawing out energy b) Disposal of nuclear waste
c) Fusion of particles d) Handling of fuel

7) Which of the following Power Plant is Medium head hydro plant?
a) Head 0m to 15m b) Head 15m to 30m
c) Head 30m to 100m d) Head 30m to 300m

8) In a hydro-electric plant which of the following part helps to reduce water hammering Effect.

a) Dam
b) Reservoir
c) Penstock
d) Surge tank

9) Most of the high voltage transmission lines in India are _____.

a) underground
b) overhead
c) either of the above
d) None of the above

10) Which type of insulator is used on 132 KV line _____.

a) Pin type
b) Disc type
c) Shackle type
d) Pin and shackle type

11) Which following tower is known as the Tangent Tower?

a) A type
b) B type
c) C type
d) D type

12) Feeder is designed mainly from the point view of _____.

a) Its current carrying capacity
b) Voltage drops in it
c) Operating Voltage
d) Operating Frequency

13) Which of the following is the desirable Property of insulator?

a) Less Permittivity
b) High Permittivity
c) Porcelain
d) Epoxy resin

14) Higher string Efficiency _____.

a) More Uniform Voltage Distribution across string
b) More Non Uniform Voltage Distribution across string
c) Both a & b
d) None of the above

Instructions: 1) All questions are compulsory.
2) Figures to the right indicate full marks.

SECTION – I

Q.2 Attempt Any Four. **16**

a) Define the load curve, what information obtained from load curve?

b) Describe the Interconnected Grid System. Discuss the advantages of interconnected grid system.

c) Define the Electrical tariff, enlist various types of it, Describe Three Part Tariff.

d) The annual load duration curve of a certain power station can be considered as a straight line from 20 MW to 4 MW. To meet this load, three turbine-generator units, two rated at 10 MW each and one rated at 5 MW are installed. Determine:
i) installed capacity
ii) plant factor
iii) units generated per annum
iv) load factor

e) Describe the Boiling Water Reactor (BWR) with neat schematic diagram.

f) Write the advantages and disadvantages of Hydro power plant.

Q.3 Attempt Any Two. **12**

a) Draw the schematic diagram of a steam power station and explain its operation.

b) Draw the flow diagram of a Nuclear power station and discuss its operation.

c) Define Depreciation cost. Explain the different method to determine the Depreciation cost.

SECTION – II

Q.4 Attempt Any Four. **16**

a) Explain the typical layout of Electrical Supply System.

b) Define the string efficiency, Explain the different factors affecting the string efficiency.

c) In a 33 kV overhead line, there are three units in the string of insulators. If the capacitance between each insulator pin and earth(C1) is 11% of self-capacitance of each insulator(C), find

i) The distribution of voltage over 3 insulators and

ii) String efficiency.

d) Write the advantages and disadvantages suspension type insulators.

e) Enlist methods of string Efficiency improvement and explain Guard Ring.

f) Derive an Expression for volume of conductor material required in case Single Phase two wire AC System with one conductor earthed.

Q.5 Attempt Any Two. **12**

a) State and explain Kelvins Law with neat cure.

b) Draw a schematic layout of substation. Give the names of that equipment and also explain the use with the symbols.

c) A 50 km long transmission line supplies a load of 5 MVA at 0.8 p.f. lagging at 33 kV. The efficiency of transmission is 90%. Calculate the volume of aluminium conductor required for the line when

i) single phase, 2-wire system is used

ii) 3-phase, 3-wire system is used. The specific resistance of aluminium is $2.85 \times 10^{-8}\ \Omega\,\mathrm{m}$.

Time: 03:00 PM To 06:00 PM

Instructions: 1) Q. No. 1 is compulsory. It should be solved in the first 30 minutes in Answer Book Page no 03 (Starting page of the Answer Book). Each question carries one mark.
2) Don't forget to Mention question paper set (P/Q/R/S) on top of page.
3) Figures to the right indicates full marks.

MCQ/Objective Type Questions

Duration: 30 Minutes Marks:14

Q.1 Multiple choice questions. **14**

1) Which following tower is known as the Tangent Tower?
a) A type b) B type
c) C type d) D type

2) Feeder is designed mainly from the point view of _____.
a) Its current carrying capacity b) Voltage drops in it
c) Operating Voltage d) Operating Frequency

3) Which of the following is the desirable Property of insulator?
a) Less Permittivity b) High Permittivity
c) Porcelain d) Epoxy resin

4) Higher string Efficiency _____.
a) More Uniform Voltage Distribution across string
b) More Non Uniform Voltage Distribution across string
c) Both a & b
d) None of the above

5) Electric power supply system means _____.
a) Generation b) Transmission
c) Distribution d) All of above

6) In interconnected grid systems plants are connected in _____.
a) series b) parallel
c) both type d) None of the above

7) A load curve is a plot of _____.
   a) Load versus generation capacity
   b) Load versus time
   c) Load versus current
   d) Load versus cost of power

8) Which tariff is most ideal tariff for the consumer?
   a) Three-part tariff
   b) Two-part tariff
   c) Both (a) and (b)
   d) None of the above

9) The load of a consumer is generally measured in terms of _____.
   a) Volts
   b) KW
   c) Amperes
   d) Ampere hour

10) What is the major problem in nuclear plants?
   a) Drawing out energy
   b) Disposal of nuclear waste
   c) Fusion of particles
   d) Handling of fuel

11) Which of the following Power Plant is Medium head hydro plant?
   a) Head 0m to 15m
   b) Head 15m to 30m
   c) Head 30m to 100m
   d) Head 30m to 300m

12) In a hydro-electric plant which of the following part helps to reduce water hammering Effect.
   a) Dam
   b) Reservoir
   c) Penstock
   d) Surge tank

13) Most of the high voltage transmission lines in India are _____.
   a) underground
   b) overhead
   c) either of the above
   d) None of the above

14) Which type of insulator is used on 132 KV line _____.
   a) Pin type
   b) Disc type
   c) Shackle type
   d) Pin and shackle type

Seat No.	

Set **R**

S.Y. (B.Tech.) (Electrical Engineering) (Semester - I) (New) (NEP CBCS) Examination: March/April – 2026
Power Plant Engineering and Elements of Power System (EEPCC-02)

Day & Date: Wednesday, 06-05-2026 Max. Marks: 56
Time: 03:00 PM To 06:00 PM

Instructions: 1) All questions are compulsory.
2) Figures to the right indicate full marks.

SECTION – I

Q.2 Attempt Any Four. **16**

a) Define the load curve, what information obtained from load curve?

b) Describe the Interconnected Grid System. Discuss the advantages of interconnected grid system.

c) Define the Electrical tariff, enlist various types of it, Describe Three Part Tariff.

d) The annual load duration curve of a certain power station can be considered as a straight line from 20 MW to 4 MW. To meet this load, three turbine-generator units, two rated at 10 MW each and one rated at 5 MW are installed. Determine:
i) installed capacity
ii) plant factor
iii) units generated per annum
iv) load factor

e) Describe the Boiling Water Reactor (BWR) with neat schematic diagram.

f) Write the advantages and disadvantages of Hydro power plant.

Q.3 Attempt Any Two. **12**

a) Draw the schematic diagram of a steam power station and explain its operation.

b) Draw the flow diagram of a Nuclear power station and discuss its operation.

c) Define Depreciation cost. Explain the different method to determine the Depreciation cost.

SECTION – II

Q.4 Attempt Any Four. **16**

a) Explain the typical layout of Electrical Supply System.

b) Define the string efficiency, Explain the different factors affecting the string efficiency.

c) In a 33 kV overhead line, there are three units in the string of insulators. If the capacitance between each insulator pin and earth(C1) is 11% of self-capacitance of each insulator(C), find

i) The distribution of voltage over 3 insulators and

ii) String efficiency.

d) Write the advantages and disadvantages suspension type insulators.

e) Enlist methods of string Efficiency improvement and explain Guard Ring.

f) Derive an Expression for volume of conductor material required in case Single Phase two wire AC System with one conductor earthed.

Q.5 Attempt Any Two. **12**

a) State and explain Kelvins Law with neat cure.

b) Draw a schematic layout of substation. Give the names of that equipment and also explain the use with the symbols.

c) A 50 km long transmission line supplies a load of 5 MVA at 0.8 p.f. lagging at 33 kV. The efficiency of transmission is 90%. Calculate the volume of aluminium conductor required for the line when

i) single phase, 2-wire system is used

ii) 3-phase, 3-wire system is used. The specific resistance of aluminium is $2.85 \times 10^{-8}\ \Omega\,\mathrm{m}$.

DC Machines and Transformer (EEPCC-03)

Day & Date: Friday, 08-05-2026 Max. Marks: 70
Time: 03:00 PM To 06:00 PM

Instructions: 1) Q. No. 1 is compulsory. It should be solved in the first 30 minutes in Answer Book Page no 03 (Starting page of the Answer Book). Each question carries one mark.
2) Don't forget to Mention question paper set (P/Q/R/S) on top of page.
3) Figures to the right indicates full marks.
4) Assume suitable data if necessary.

MCQ/Objective Type Questions

Duration: 30 Minutes Marks:14

Q.1 Choose the correct Answer. **14**

1) In a DC machine, the rectification process is carried out in order to get a unidirectional output (DC). This rectification process is carried out by _____.
a) Half wave rectifier b) Full wave rectifier
c) Mechanical rectification d) Centre tapped rectifier

2) Separately excited DC generators are still used in _____.
a) Thermal power plants
b) Ward Leonard speed control system
c) Hydro power plant
d) In all fields

3) What is the number of brushes in the lap winding?
a) Double the number of poles b) Same as the number of poles
c) Half the number of poles d) Two

4) In the case of DC machine winding, the number of commutator segments is equal to _____.
a) Number of armature coils
b) Number of armature coil sides
c) Number of armature conductors
d) Number of armature turns

5) The speed of a DC shunt motor can be made more than full load speed by _____.
a) Increasing the excitation current
b) Decreasing the armature current
c) Increasing the armature current
d) Reducing the field current

6) No-load speed of which of the following DC motors will be highest?
a) Shunt motor b) Series motor
c) Cumulative compound motor d) Differential compound motor

7) Which losses can be identified from Swinburne's test?
a) No-load core loss
b) Windage and friction loss
c) No-load and windage and friction loss
d) Stray load loss

8) What are the following advantages of the BLDC motor?
I. Low cost II. Simplicity III. Reliability IV. Good performance
a) I, II, III, IV b) I, II
c) I, II, IV d) II, III, IV

9) The primary winding of a transformer _____.
a) Is always a low voltage winding
b) Is always a high voltage winding
c) Cannot be determined
d) Could either be a low voltage or high voltage winding

10) In a real transformer, the primary winding has _____.
a) Infinite resistance b) Zero resistance
c) Some finite resistance d) Cannot say

11) During open circuit test (OC) of a transformer _____.
a) primary is supplied rated kVA
b) primary is supplied full-load current
c) primary is supplied current at reduced voltage
d) primary is supplied rated voltage

12) The value of flux involved in the emf equation of a transformer is _____.
a) average value b) maximum value
c) rms value d) instantaneous value

13) A good voltage regulation of a transformer indicates _____.
a) output voltage fluctuation from no load to full load is least
b) output voltage fluctuation with power factor is least
c) difference between primary and secondary voltage is least
d) difference between primary and secondary voltage is maximum

14) Which of the following is the main advantage of an auto-transformer over a two-winding transformer?
a) Eddy losses are totally eliminated
b) Copper losses are negligible
c) Saving in winding material
d) Hysteresis losses are reduced

Seat No.	

Set | P

S.Y. (B.Tech.) (Electrical Engineering) (Semester - I) (New) (NEP CBCS) Examination: March/April – 2026
DC Machines and Transformer (EEPCC-03)

Day & Date: Friday, 08-05-2026 Max. Marks: 56
Time: 03:00 PM To 06:00 PM

Instructions: 1) All questions are compulsory.
2) Figures to the right indicate full marks.
3) Draw neat diagrams whenever necessary.
4) Assume suitable data if necessary.

Section – I

Q.2 Attempt the following. (Any Four) **16**

a) With a neat sketch, explain the Hopkinson's test for DC motor.

b) What is the necessity of a starter? Explain the 3-point starter with a neat diagram.

c) A 230 V DC shunt motor has an armature resistance of 0.5 Ω and a field resistance of Ω. The motor draws a line current of 13 A while running light at 1000 r.p.m. At a certain load, the field circuit resistance is increased by Ω. What is the new speed of the motor if the line current at this load is 42 A?

d) A 4-pole, long-shunt lap-wound generator supplies 25 KW at a terminal voltage of 500 V. The armature resistance is 0.03 Ω, the series field resistance is 0.04 Ω, and the shunt field resistance is 200Ω. The brush drop may be taken as 1.0 V. Determine the e.m.f. Generated. Calculate also the no. of conductors if speed is 1200 rpm, and flux per pole is 0.02 weber. Neglect the armature reaction.

e) The brake test on a DC shunt motor gave the following results: tensions on two sides of the brake were 10 kg and 35 kg, radius of the pulley 20 cm, speed 950 rpm, Input current was 30 A at 200V.
Find:
i) Output torque
ii) Output power
iii) Input power
iv) Efficiency

Q.3 Attempt the following. **12**

a) With a neat circuit diagram, explain Swinburne's test and how the efficiency of the generator and motor is computed with this test. Write the advantages of this test.

b) A 440 V, 4-pole, lap-connected shunt motor has a no-load input current of 15 A and a shunt field current of 10 A. At full load, it takes a current of 150 A. If armature resistance = 0.1 ohms, flux per pole on no-load = 0.05 weber, number of armature conductors = 750, and contact drop per brush = 1 V,
calculate:

i) No-load speed,
ii) Full-load speed,
iii) Speed regulation. Armature reaction weakens the field by 1.5% on full load.

OR

c) The open circuit characteristic (O.C.C.) of a separately excited generator, at 600 r.p.m., is as under:

Field Current, A:	1.6	3.2	4.8	6.4	8.0	9.6	11.2
E.m.f.:	148	285	390	460	520	560	590

Find:

i) The voltage to which the machine will excite as a shunt generator with a field circuit resistance of 60Ω.
ii) The critical resistance at this speed.

Section – II

Q.4 Attempt the following. (Any Four) **16**

a) With a neat sketch, explain the construction and working of a Variable Reluctance stepper motor.

b) A 100 kVA, 3300/200 volt, 50 Hz single-phase transformer has 40 turns on the secondary.
Calculate:

i) the values of primary and secondary currents
ii) the number of primary turns
iii) the maximum value of the flux.

c) With a neat sketch, explain $\Delta - \Delta$ connection of a $3 - \emptyset$ transformer.

d) Explain the necessity & Conditions for Parallel operation of a transformer.

e) Explain the constructional features of an auto-transformer. State the applications of autotransformers.

Q.5 Attempt the following. (Any Two) **12**

a) A 15 kVA, 440/230 V, 50 Hz, single phase transformer gave the following test results:
Open Circuit (LV side) 250 V, 1.8A, 95 W.
Short Circuit Test (HV side) 80 V, 12.0 A, 380 W.
Compute the parameters of the equivalent circuit referred to LV side.

b) Explain open delta and Scott connections for three-phase transformers.

c) Explain the behavior of a transformer on no load. Also explain that "The main flux in a transformer remains practically invariable under all conditions of load".

Seat No.

3) Draw neat diagrams whenever necessary.
4) Assume suitable data if necessary.

Section – I

Q.2 Attempt the following. (Any Four) **16**

a) With a neat sketch, explain the Hopkinson's test for DC motor.

b) What is the necessity of a starter? Explain the 3-point starter with a neat diagram.

c) A 230 V DC shunt motor has an armature resistance of 0.5 Ω and a field resistance of Ω. The motor draws a line current of 13 A while running light at 1000 r.p.m. At a certain load, the field circuit resistance is increased by Ω. What is the new speed of the motor if the line current at this load is 42 A?

d) A 4-pole, long-shunt lap-wound generator supplies 25 KW at a terminal voltage of 500 V. The armature resistance is 0.03 Ω, the series field resistance is 0.04 Ω, and the shunt field resistance is 200Ω. The brush drop may be taken as 1.0 V. Determine the e.m.f. Generated. Calculate also the no. of conductors if speed is 1200 rpm, and flux per pole is 0.02 weber. Neglect the armature reaction.

e) The brake test on a DC shunt motor gave the following results: tensions on two sides of the brake were 10 kg and 35 kg, radius of the pulley 20 cm, speed 950 rpm, Input current was 30 A at 200V.
Find:
i) Output torque
ii) Output power
iii) Input power
iv) Efficiency

Q.3 Attempt the following. **12**

a) With a neat circuit diagram, explain Swinburne's test and how the efficiency of the generator and motor is computed with this test. Write the advantages of this test.

b) A 440 V, 4-pole, lap-connected shunt motor has a no-load input current of 15 A and a shunt field current of 10 A. At full load, it takes a current of 150 A. If armature resistance = 0.1 ohms, flux per pole on no-load = 0.05 weber, number of armature conductors = 750, and contact drop per brush = 1 V,
calculate:

i) No-load speed,
ii) Full-load speed,
iii) Speed regulation. Armature reaction weakens the field by 1.5% on full load.

OR

c) The open circuit characteristic (O.C.C.) of a separately excited generator, at 600 r.p.m., is as under:

Field Current, A:	1.6	3.2	4.8	6.4	8.0	9.6	11.2
E.m.f.:	148	285	390	460	520	560	590

Find:

i) The voltage to which the machine will excite as a shunt generator with a field circuit resistance of 60Ω.
ii) The critical resistance at this speed.

Section – II

Q.4 Attempt the following. (Any Four) **16**

a) With a neat sketch, explain the construction and working of a Variable Reluctance stepper motor.

b) A 100 kVA, 3300/200 volt, 50 Hz single-phase transformer has 40 turns on the secondary.
Calculate:

i) the values of primary and secondary currents
ii) the number of primary turns
iii) the maximum value of the flux.

c) With a neat sketch, explain $\Delta - \Delta$ connection of a $3 - \emptyset$ transformer.

d) Explain the necessity & Conditions for Parallel operation of a transformer.

e) Explain the constructional features of an auto-transformer. State the applications of autotransformers.

Q.5 Attempt the following. (Any Two) **12**

a) A 15 kVA, 440/230 V, 50 Hz, single phase transformer gave the following test results:
Open Circuit (LV side) 250 V, 1.8A, 95 W.
Short Circuit Test (HV side) 80 V, 12.0 A, 380 W.
Compute the parameters of the equivalent circuit referred to LV side.

b) Explain open delta and Scott connections for three-phase transformers.

c) Explain the behavior of a transformer on no load. Also explain that "The main flux in a transformer remains practically invariable under all conditions of load".

a) Thermal power plants
b) Ward Leonard speed control system
c) Hydro power plant
d) In all fields

7) What is the number of brushes in the lap winding?
a) Double the number of poles b) Same as the number of poles
c) Half the number of poles d) Two

8) In the case of DC machine winding, the number of commutator segments is equal to _____.
a) Number of armature coils
b) Number of armature coil sides
c) Number of armature conductors
d) Number of armature turns

9) The speed of a DC shunt motor can be made more than full load speed by _____.
a) Increasing the excitation current
b) Decreasing the armature current
c) Increasing the armature current
d) Reducing the field current

10) No-load speed of which of the following DC motors will be highest?
a) Shunt motor b) Series motor
c) Cumulative compound motor d) Differential compound motor

11) Which losses can be identified from Swinburne's test?
a) No-load core loss
b) Windage and friction loss
c) No-load and windage and friction loss
d) Stray load loss

12) What are the following advantages of the BLDC motor?
I. Low cost II. Simplicity III. Reliability IV. Good performance
a) I, II, III, IV b) I, II
c) I, II, IV d) II, III, IV

13) The primary winding of a transformer _____.
a) Is always a low voltage winding
b) Is always a high voltage winding
c) Cannot be determined
d) Could either be a low voltage or high voltage winding

14) In a real transformer, the primary winding has _____.
a) Infinite resistance b) Zero resistance
c) Some finite resistance d) Cannot say

Set **R**

S.Y. (B.Tech.) (Electrical Engineering) (Semester - I) (New) (NEP CBCS) Examination: March/April – 2026
DC Machines and Transformer (EEPCC-03)

Day & Date: Friday, 08-05-2026 Max. Marks: 56
Time: 03:00 PM To 06:00 PM

Instructions: 1) All questions are compulsory.
2) Figures to the right indicate full marks.
3) Draw neat diagrams whenever necessary.
4) Assume suitable data if necessary.

Section – I

Q.2 Attempt the following. (Any Four) **16**

a) With a neat sketch, explain the Hopkinson's test for DC motor.

b) What is the necessity of a starter? Explain the 3-point starter with a neat diagram.

c) A 230 V DC shunt motor has an armature resistance of 0.5 Ω and a field resistance of Ω. The motor draws a line current of 13 A while running light at 1000 r.p.m. At a certain load, the field circuit resistance is increased by Ω. What is the new speed of the motor if the line current at this load is 42 A?

d) A 4-pole, long-shunt lap-wound generator supplies 25 KW at a terminal voltage of 500 V. The armature resistance is 0.03 Ω, the series field resistance is 0.04 Ω, and the shunt field resistance is 200Ω. The brush drop may be taken as 1.0 V. Determine the e.m.f. Generated. Calculate also the no. of conductors if speed is 1200 rpm, and flux per pole is 0.02 weber. Neglect the armature reaction.

e) The brake test on a DC shunt motor gave the following results: tensions on two sides of the brake were 10 kg and 35 kg, radius of the pulley 20 cm, speed 950 rpm, Input current was 30 A at 200V.
Find:
i) Output torque
ii) Output power
iii) Input power
iv) Efficiency

Q.3 Attempt the following. **12**

a) With a neat circuit diagram, explain Swinburne's test and how the efficiency of the generator and motor is computed with this test. Write the advantages of this test.

b) A 440 V, 4-pole, lap-connected shunt motor has a no-load input current of 15 A and a shunt field current of 10 A. At full load, it takes a current of 150 A. If armature resistance = 0.1 ohms, flux per pole on no-load = 0.05 weber, number of armature conductors = 750, and contact drop per brush = 1 V,
calculate:

i) No-load speed,
ii) Full-load speed,
iii) Speed regulation. Armature reaction weakens the field by 1.5% on full load.

OR

c) The open circuit characteristic (O.C.C.) of a separately excited generator, at 600 r.p.m., is as under:

Field Current, A:	1.6	3.2	4.8	6.4	8.0	9.6	11.2
E.m.f.:	148	285	390	460	520	560	590

Find:

i) The voltage to which the machine will excite as a shunt generator with a field circuit resistance of 60Ω.
ii) The critical resistance at this speed.

Section – II

Q.4 Attempt the following. (Any Four) **16**

a) With a neat sketch, explain the construction and working of a Variable Reluctance stepper motor.

b) A 100 kVA, 3300/200 volt, 50 Hz single-phase transformer has 40 turns on the secondary.
Calculate:

i) the values of primary and secondary currents
ii) the number of primary turns
iii) the maximum value of the flux.

c) With a neat sketch, explain $\Delta - \Delta$ connection of a $3 - \emptyset$ transformer.

d) Explain the necessity & Conditions for Parallel operation of a transformer.

e) Explain the constructional features of an auto-transformer. State the applications of autotransformers.

Q.5 Attempt the following. (Any Two) **12**

a) A 15 kVA, 440/230 V, 50 Hz, single phase transformer gave the following test results:
Open Circuit (LV side) 250 V, 1.8A, 95 W.
Short Circuit Test (HV side) 80 V, 12.0 A, 380 W.
Compute the parameters of the equivalent circuit referred to LV side.

b) Explain open delta and Scott connections for three-phase transformers.

c) Explain the behavior of a transformer on no load. Also explain that "The main flux in a transformer remains practically invariable under all conditions of load".

S.Y. (B.Tech.) (Electrical Engineering) (Semester - I) (New) (NEP CBCS) Examination: March/April – 2026
DC Machines and Transformer (EEPCC-03)

Day & Date: Friday, 08-05-2026 Max. Marks: 70
Time: 03:00 PM To 06:00 PM

Instructions: 1) Q. No. 1 is compulsory. It should be solved in the first 30 minutes in Answer Book Page no 03 (Starting page of the Answer Book). Each question carries one mark.
2) Don't forget to Mention question paper set (P/Q/R/S) on top of page.
3) Figures to the right indicates full marks.
4) Assume suitable data if necessary.

MCQ/Objective Type Questions

Duration: 30 Minutes Marks:14

Q.1 Choose the correct Answer. **14**

1) No-load speed of which of the following DC motors will be highest?
a) Shunt motor b) Series motor
c) Cumulative compound motor d) Differential compound motor

2) Which losses can be identified from Swinburne's test?
a) No-load core loss
b) Windage and friction loss
c) No-load and windage and friction loss
d) Stray load loss

3) What are the following advantages of the BLDC motor?
I. Low cost II. Simplicity III. Reliability IV. Good performance
a) I, II, III, IV b) I, II
c) I, II, IV d) II, III, IV

4) The primary winding of a transformer _____.
a) Is always a low voltage winding
b) Is always a high voltage winding
c) Cannot be determined
d) Could either be a low voltage or high voltage winding

5) In a real transformer, the primary winding has _____.
a) Infinite resistance b) Zero resistance
c) Some finite resistance d) Cannot say

6) During open circuit test (OC) of a transformer _____.
a) primary is supplied rated kVA
b) primary is supplied full-load current
c) primary is supplied current at reduced voltage
d) primary is supplied rated voltage

7) The value of flux involved in the emf equation of a transformer is _____.
a) average value
b) maximum value
c) rms value
d) instantaneous value

8) A good voltage regulation of a transformer indicates _____.
a) output voltage fluctuation from no load to full load is least
b) output voltage fluctuation with power factor is least
c) difference between primary and secondary voltage is least
d) difference between primary and secondary voltage is maximum

9) Which of the following is the main advantage of an auto-transformer over a two-winding transformer?
a) Eddy losses are totally eliminated
b) Copper losses are negligible
c) Saving in winding material
d) Hysteresis losses are reduced

10) In a DC machine, the rectification process is carried out in order to get a unidirectional output (DC). This rectification process is carried out by _____.
a) Half wave rectifier
b) Full wave rectifier
c) Mechanical rectification
d) Centre tapped rectifier

11) Separately excited DC generators are still used in _____.
a) Thermal power plants
b) Ward Leonard speed control system
c) Hydro power plant
d) In all fields

12) What is the number of brushes in the lap winding?
a) Double the number of poles
b) Same as the number of poles
c) Half the number of poles
d) Two

13) In the case of DC machine winding, the number of commutator segments is equal to _____.
a) Number of armature coils
b) Number of armature coil sides
c) Number of armature conductors
d) Number of armature turns

14) The speed of a DC shunt motor can be made more than full load speed by _____.
a) Increasing the excitation current
b) Decreasing the armature current
c) Increasing the armature current
d) Reducing the field current

3) Figures to the right indicates full marks.

MCQ/Objective Type Questions

Duration: 30 Minutes Marks: 14

Q.1 Choose the correct alternative from the given option. 14

1) If a linear differential equation with constant coefficients and r.h.s. equal to zero has a real root m_1 repeated two times, then the corresponding part of the integral is _____.

a) $(c_1 + c_2)e^{m_1 x}$ b) $(c_1 x + c_2 x)e^{m_1 x}$

c) $(c_1 x + c_2 x^2)e^{m_1 x}$ d) $(c_1 + c_2 x)e^{m_1 x}$

2) $\frac{1}{D-a} X$ is equal to _____.

a) $\int Xe^{ax}dx$ b) $e^{ax}\int X.e^{-ax}dx$

c) $\int Xe^{-ax}dx$ d) $e^{-ax}\int Xe^{-ax}dx$

3) $\frac{1}{D+1}(\log x + \frac{1}{x})$ is equal to _____.

a) e^x b) 1

c) x d) $\log x$

4) The solution of the equation $\sqrt{p} + \sqrt{q} = 1$ is _____.

a) $z = ax + ay + c$ b) $z = ax + a^2 y + c$

c) $z = ax + \left(1 - \sqrt{a}\right)^2 y + c$ d) None of these

5) The solution of $p + q = 1$ is _____.

a) $z = ax + (1 - a)y + c$ b) $z = ax + by + c$

c) $z = ax + b(1 - y) + c$ d) $z = a(1 - x) + b(1 - y) + c$

6) If μ_1', μ_2', μ_3' are the first three moments of the distribution about certain number then third moment μ_3 of the distribution about the arithmetic mean is given by _____.

a) $\mu_3' - 3\mu_2'\mu_1' + 2(\mu_1')^3$ b) $\mu_3' - 3\mu_1' + (\mu_2')^3$

c) $\mu_3' + 2\mu_2'\mu_1' + (\mu_3')^3$ d) $\mu_3' + 3\mu_2'\mu_1' + {\mu_1'}^2$

7) Coefficient of kurtosis β_1 is given by _____.

a) $\frac{\mu_4}{\mu_3}$ b) $\frac{\mu_4}{\mu_2^2}$

c) $\frac{\mu_3^2}{\mu_2^3}$ d) $\frac{\mu_4}{\mu_2^3}$

8) If value of x for normal distribution is 35, mean of normal distribution is 65 and standard deviation is 25 then standardized random variable is _____.

a) -1.5 b) -1.7

c) -1.2 d) -4

9) A continuous random variable has the following probability density function $f(x) = kx(1-x), 0 \leq x \leq 1$ then $k =$ _____.

a) 2 b) 6

c) 3 d) 5

10) The area under the standard normal curve from $z = -\infty$ to $z = 0$ is _____.

a) 1 b) $1/2$

c) $3/2$ d) 0

11) If X, Y denote the deviation from their means and if $\sum X^2 = 80, \sum Y^2 = 50$ & $\sum XY = 60$ and $r =$_____.

a) 0.65 b) 0.78

c) 0.81 d) 0.95

12) If two regression lines are co-incides then the coefficient of correlation is _____.

a) 0 b) -1

c) ± 1 d) 1

13) If $\bar{x}$ is the mean of the random sample of size n taken from a population of size N having mean μ and standard deviation σ then mean and variance of the distribution $\bar{x}$ are _____.

a) $\bar{x}, \sigma^2$

b) $\bar{x}, \frac{\sigma^2}{n}$

c) μ, σ^2

d) μ, and $\frac{\sigma^2}{n}$

14) χ^2 distribution is defined by _____.

a) $\sum \frac{(O-E)}{E}$

b) $\sum \frac{(O-E)}{E^2}$

c) $\sum \left(\frac{O-E}{E}\right)^2$

d) $\sum \frac{(O-E)^2}{E}$

Set | **P**

S.Y. (B.Tech.) (Electrical Engineering) (Semester - I) (New) (NEP CBCS) Examination: March/April-2026
Advanced Mathematics and Statistics (OE-01A)

Day & Date: Monday, 11-05-2026 Max. Marks: 56
Time: 03:00 PM To 06:00 PM

Instructions: 1) All question are compulsory.
2) Figures to the right indicate full marks.

SECTION – I

Q.2 Attempt Any Three. **09**

a) Find the Arithmetic mean, Median and standard deviation for the following frequency distribution.

x:	5	9	12	15	20	24	30	35	42	49
f:	3	6	8	8	9	10	8	7	6	2

b) Solve: $(D^2+1)y = x^2\cos 3x$

c) Solve: $(D^2-4D+4)y = 8.x^2e^{2x}\sin 2x$

d) Calculate the first four moments about the mean of the given distribution. Also find β_1, β_2

x	2.0	2.5	3.0	3.5	4.0	4.5	5.0
f	4	36	60	90	70	40	10

e) Solve $yzp + 2xq = xy$

Q.3 Attempt Any Three. **09**

a) Solve $\frac{d^2y}{dx^2} + 3\frac{dy}{dx} + 2y = 2e^{2x}$

b) Solve $p - q = x^2 + y^2$

c) Find the median of the following frequency distribution.

x	1	3	5	7	9	11	13	15	17
f	3	6	8	12	16	16	15	10	5

d) Solve $x(y-z)p + y(z-x)q = z(x-y)$

e) Solve $(D^3 - 3D + 2)y = x$

Q.4 Attempt Any Two. **10**

a) The first four moments of a distribution about the value 5 are $2, 20, 40$ and 50, from the given information obtain the first four central moments, Standard deviation and coefficient of skewness and kurtosis.

b) Solve the following differential equations by method of separation of variables.

$$3\frac{\partial u}{\partial x} + 2\frac{\partial u}{\partial y} = 0, \text{ given } u(x, 0) = 4e^{-x}$$

c) Solve $\frac{d^2y}{dx^2} + 3\frac{dy}{dx} + 2y = e^{e^x}$

SECTION – II

Q.5 Attempt Any Three. **09**

a) Find the value of k if each of the following functions is a probability density function.

$$f(x) = \begin{cases} kx^2(1 - x^3) & , \quad 0 \leq x \leq 1 \\ 0 & , \quad \text{otherwise} \end{cases}$$

b) The mean life time of 100 fluorescent light bulbs produced by a Company is computed to be 1570 Hrs. with S.D. of 120 Hrs. If μ is the mean lifetime of all the bulbs produced by the Company, Test the Hypothesis $\mu = 1600$ Hrs. against the alternative Hypothesis $\mu \neq 1600$ Hrs. using 5% level of Significance.
(Given Expected value at 5% LOS is 1.96)

c) Fit a Straight line $y = a + bx$ to the following data.

x	0	5	10	15	20	25
y	12	15	17	22	24	30

d) Two independent random sample have the following data.
$\overline{x_1} = 110, \sigma_1 = 25, n_1 = 16$
$\overline{x_2} = 120, \sigma_2 = 30, n_2 = 9$
If σ_1 and σ_2 are the S. D. of the populations. Test the hypothesis that $\mu_1 = \mu_2$ at 5% level of significance.
(The table value of t at $\alpha = 0.05$ for $v = 23$ degrees of freedom is 2.069)

e) If the probability of defective bulbs is 0.2, find the mean and variance of the distribution of defective bulbs in a lot of 1000 bulbs.

Q.6 Attempt Any Three. **09**

a) If two independent random samples of sizes 15 and 8 have respectively the following mean and population standard deviations, $\overline{x_1} = 980, \overline{x_2} = 1012; \sigma_1 = 75, \sigma_2 = 80$. Test the hypothesis that $\mu_1 = \mu_2$ at 5% level of significance.
(Given Expected value at 5% LOS with 21 DF is 2.080)

b) The number of telephone calls received by an operator in a ten-minute interval follows a Poisson distribution with mean 1. What is the probability of receiving (i) no call, (ii) less than four calls, in the interval? What is the most likely number of calls?

c) Calculate the Coefficient of correlations between x and y from the following data
$n = 25, \sum x = 100, \sum x^2 = 950, \sum y = 110, \sum y^2 = 850, \sum x\,y = 800$

d) Monthly salaries of 1000 workers have a normal distribution with mean of Rs. 575 and a standard deviation of Rs. 75. Find the number of workers having salaries between Rs. 500 and Rs. 625 p.m. Also find the minimum salary of the highest paid 200 workers.
(Given: For a standard normal variate
i) area between $t = 0$ and $t = 1$ is 0.3413,
ii) area between $t = 0$ and $t = 0.67$ is 0.2486,
iii) area between $t = 0$ and $t = 0.84$ is 0.3)

e) Obtain a second-degree curve to the following data and estimate the production in 1975.

Year	1921	1931	1941	1951	1961	1971	1981
Prod. (m. tons)	3	5	9	10	12	14	15

Q.7 Attempt Any Two. **10**

a) Fit a Binomial distribution to the following data,

Value of x	0	1	2	3	4	5	6
Frequency f	6	20	28	12	8	6	0

b) Calculate the lines of regression from the following table, gives the marks obtained by a class of students in two special papers.

Paper I	80	45	55	56	58	60	65	68	70	75	85
Paper II	82	56	50	48	60	62	64	65	70	74	90

c) Ten school boys were given a test in Statistics and their scores were recorded. They were given a month's special coaching and a second test was given to them in the same subject at the end of the coaching period. Test if the marks given below give evidence to the fact that the students are benefitted by coaching.

Marks in test I:	70	68	56	75	80	90	68	75	56	58
Marks in Test II:	68	70	52	73	75	78	80	92	54	55

(Given that value of t_α at 5% LOS for $v = 9$ degrees of freedom is 1.86 for one tailed test)

Seat No.	

Set **Q**

S.Y. (B.Tech.) (Electrical Engineering) (Semester - I) (New) (NEP CBCS) Examination: March/April-2026
Advanced Mathematics and Statistics (OE-01A)

Day & Date: Monday, 11-05-2026 Max. Marks: 70
Time: 03:00 PM To 06:00 PM

Instructions: 1) Q. No. 1 is compulsory. It should be solved in the first 30 minutes in Answer Book Page no 03 (Starting page of the Answer Book). Each question carries one mark.
2) Don't forget to Mention question paper set (P/Q/R/S) on top of page.
3) Figures to the right indicates full marks.

MCQ/Objective Type Questions

Duration: 30 Minutes Marks: 14

Q.1 Choose the correct alternative from the given option. **14**

1) If value of x for normal distribution is 35, mean of normal distribution is 65 and standard deviation is 25 then standardized random variable is _____.

a) -1.5 b) -1.7
c) -1.2 d) -4

2) A continuous random variable has the following probability density function $f(x) = kx(1-x), 0 \leq x \leq 1$ then $k =$ _____.

a) 2 b) 6
c) 3 d) 5

3) The area under the standard normal curve from $z = -\infty$ to $z = 0$ is _____.

a) 1 b) $1/2$
c) $3/2$ d) 0

4) If X, Y denote the deviation from their means and if $\sum X^2 = 80, \sum Y^2 = 50$ & $\sum XY = 60$ and $r =$_____.

a) 0.65 b) 0.78
c) 0.81 d) 0.95

5) If two regression lines are co-incides then the coefficient of correlation is _____.

a) 0 b) -1
c) ± 1 d) 1

6) If $\bar{x}$ is the mean of the random sample of size n taken from a population of size N having mean μ and standard deviation σ then mean and variance of the distribution $\bar{x}$ are _____.

a) $\bar{x}, \sigma^2$ b) $\bar{x}, \frac{\sigma^2}{n}$

c) μ, σ^2 d) μ, and $\frac{\sigma^2}{n}$

7) χ^2 distribution is defined by _____.

a) $\sum \frac{(O-E)}{E}$ b) $\sum \frac{(O-E)}{E^2}$

c) $\sum \left(\frac{O-E}{E}\right)^2$ d) $\sum \frac{(O-E)^2}{E}$

8) If a linear differential equation with constant coefficients and r.h.s. equal to zero has a real root m_1 repeated two times, then the corresponding part of the integral is _____.

a) $(c_1 + c_2)e^{m_1 x}$ b) $(c_1 x + c_2 x)e^{m_1 x}$

c) $(c_1 x + c_2 x^2)e^{m_1 x}$ d) $(c_1 + c_2 x)e^{m_1 x}$

9) $\frac{1}{D-a} X$ is equal to _____.

a) $\int X e^{ax} dx$ b) $e^{ax} \int X . e^{-ax} dx$

c) $\int X e^{-ax} dx$ d) $e^{-ax} \int X e^{-ax} dx$

10) $\frac{1}{D+1}(\log x + \frac{1}{x})$ is equal to _____.

a) e^x b) 1

c) x d) $\log x$

11) The solution of the equation $\sqrt{p} + \sqrt{q} = 1$ is _____.

a) $z = ax + ay + c$ b) $z = ax + a^2 y + c$

c) $z = ax + \left(1 - \sqrt{a}\right)^2 y + c$ d) None of these

12) The solution of $p + q = 1$ is _____.

a) $z = ax + (1-a)y + c$ b) $z = ax + by + c$

c) $z = ax + b(1-y) + c$ d) $z = a(1-x) + b(1-y) + c$

13) If μ_1', μ_2', μ_3' are the first three moments of the distribution about certain number then third moment μ_3 of the distribution about the arithmetic mean is given by _____.

a) $\mu_3' - 3\mu_2'\mu_1' + 2(\mu_1')^3$ b) $\mu_3' - 3\mu_1' + (\mu_2')^3$

c) $\mu_3' + 2\mu_2'\mu_1' + (\mu_3')^3$ d) $\mu_3' + 3\mu_2'\mu_1' + {\mu_1'}^2$

14) Coefficient of kurtosis β_1 is given by _____.

a) $\frac{\mu_4}{\mu_3}$

b) $\frac{\mu_4}{\mu_2^2}$

c) $\frac{\mu_3^2}{\mu_2^3}$

d) $\frac{\mu_4}{\mu_2^3}$

Seat No.	

Set **Q**

S.Y. (B.Tech.) (Electrical Engineering) (Semester - I) (New) (NEP CBCS) Examination: March/April-2026
Advanced Mathematics and Statistics (OE-01A)

Day & Date: Monday, 11-05-2026 Max. Marks: 56
Time: 03:00 PM To 06:00 PM

Instructions: 1) All question are compulsory.
2) Figures to the right indicate full marks.

SECTION – I

Q.2 Attempt Any Three. **09**

a) Find the Arithmetic mean, Median and standard deviation for the following frequency distribution.

x:	5	9	12	15	20	24	30	35	42	49
f:	3	6	8	8	9	10	8	7	6	2

b) Solve: $(D^2+1)y = x^2\cos 3x$

c) Solve: $(D^2-4D+4)y = 8.x^2e^{2x}\sin 2x$

d) Calculate the first four moments about the mean of the given distribution. Also find β_1, β_2

x	2.0	2.5	3.0	3.5	4.0	4.5	5.0
f	4	36	60	90	70	40	10

e) Solve $yzp + 2xq = xy$

Q.3 Attempt Any Three. **09**

a) Solve $\frac{d^2y}{dx^2} + 3\frac{dy}{dx} + 2y = 2e^{2x}$

b) Solve $p - q = x^2 + y^2$

c) Find the median of the following frequency distribution.

x	1	3	5	7	9	11	13	15	17
f	3	6	8	12	16	16	15	10	5

d) Solve $x(y-z)p + y(z-x)q = z(x-y)$

e) Solve $(D^3 - 3D + 2)y = x$

Q.4 Attempt Any Two. **10**

a) The first four moments of a distribution about the value 5 are $2, 20, 40$ and 50, from the given information obtain the first four central moments, Standard deviation and coefficient of skewness and kurtosis.

b) Solve the following differential equations by method of separation of variables.

$$3\frac{\partial u}{\partial x} + 2\frac{\partial u}{\partial y} = 0, \text{ given } u(x, 0) = 4e^{-x}$$

c) Solve $\frac{d^2y}{dx^2} + 3\frac{dy}{dx} + 2y = e^{e^x}$

SECTION – II

Q.5 Attempt Any Three. **09**

a) Find the value of k if each of the following functions is a probability density function.

$$f(x) = \begin{cases} kx^2(1 - x^3) & , \quad 0 \leq x \leq 1 \\ 0 & , \quad \text{otherwise} \end{cases}$$

b) The mean life time of 100 fluorescent light bulbs produced by a Company is computed to be 1570 Hrs. with S.D. of 120 Hrs. If μ is the mean lifetime of all the bulbs produced by the Company, Test the Hypothesis $\mu = 1600$ Hrs. against the alternative Hypothesis $\mu \neq 1600$ Hrs. using 5% level of Significance.
(Given Expected value at 5% LOS is 1.96)

c) Fit a Straight line $y = a + bx$ to the following data.

x	0	5	10	15	20	25
y	12	15	17	22	24	30

d) Two independent random sample have the following data.
$\overline{x_1} = 110, \sigma_1 = 25, n_1 = 16$
$\overline{x_2} = 120, \sigma_2 = 30, n_2 = 9$
If σ_1 and σ_2 are the S. D. of the populations. Test the hypothesis that $\mu_1 = \mu_2$ at 5% level of significance.
(The table value of t at $\alpha = 0.05$ for $v = 23$ degrees of freedom is 2.069)

e) If the probability of defective bulbs is 0.2, find the mean and variance of the distribution of defective bulbs in a lot of 1000 bulbs.

Q.6 Attempt Any Three. **09**

a) If two independent random samples of sizes 15 and 8 have respectively the following mean and population standard deviations, $\overline{x_1} = 980, \overline{x_2} = 1012; \sigma_1 = 75, \sigma_2 = 80$. Test the hypothesis that $\mu_1 = \mu_2$ at 5% level of significance.
(Given Expected value at 5% LOS with 21 DF is 2.080)

b) The number of telephone calls received by an operator in a ten-minute interval follows a Poisson distribution with mean 1. What is the probability of receiving (i) no call, (ii) less than four calls, in the interval? What is the most likely number of calls?

c) Calculate the Coefficient of correlations between x and y from the following data
$n = 25, \sum x = 100, \sum x^2 = 950, \sum y = 110, \sum y^2 = 850, \sum x\,y = 800$

d) Monthly salaries of 1000 workers have a normal distribution with mean of Rs. 575 and a standard deviation of Rs. 75. Find the number of workers having salaries between Rs. 500 and Rs. 625 p.m. Also find the minimum salary of the highest paid 200 workers.
(Given: For a standard normal variate
i) area between $t = 0$ and $t = 1$ is 0.3413,
ii) area between $t = 0$ and $t = 0.67$ is 0.2486,
iii) area between $t = 0$ and $t = 0.84$ is 0.3)

e) Obtain a second-degree curve to the following data and estimate the production in 1975.

Year	1921	1931	1941	1951	1961	1971	1981
Prod. (m. tons)	3	5	9	10	12	14	15

Q.7 Attempt Any Two. **10**

a) Fit a Binomial distribution to the following data,

Value of x	0	1	2	3	4	5	6
Frequency f	6	20	28	12	8	6	0

b) Calculate the lines of regression from the following table, gives the marks obtained by a class of students in two special papers.

Paper I	80	45	55	56	58	60	65	68	70	75	85
Paper II	82	56	50	48	60	62	64	65	70	74	90

c) Ten school boys were given a test in Statistics and their scores were recorded. They were given a month's special coaching and a second test was given to them in the same subject at the end of the coaching period. Test if the marks given below give evidence to the fact that the students are benefitted by coaching.

Marks in test I:	70	68	56	75	80	90	68	75	56	58
Marks in Test II:	68	70	52	73	75	78	80	92	54	55

(Given that value of t_α at 5% LOS for $v = 9$ degrees of freedom is 1.86 for one tailed test)

Seat No.	

Set **R**

S.Y. (B.Tech.) (Electrical Engineering) (Semester - I) (New) (NEP CBCS) Examination: March/April-2026
Advanced Mathematics and Statistics (OE-01A)

Day & Date: Monday, 11-05-2026 Max. Marks: 70
Time: 03:00 PM To 06:00 PM

Instructions: 1) Q. No. 1 is compulsory. It should be solved in the first 30 minutes in Answer Book Page no 03 (Starting page of the Answer Book). Each question carries one mark.
2) Don't forget to Mention question paper set (P/Q/R/S) on top of page.
3) Figures to the right indicates full marks.

MCQ/Objective Type Questions

Duration: 30 Minutes Marks: 14

Q.1 Choose the correct alternative from the given option. **14**

1) If X, Y denote the deviation from their means and if $\sum X^2 = 80, \sum Y^2 = 50$ & $\sum XY = 60$ and $r =$_____.

a) 0.65 b) 0.78
c) 0.81 d) 0.95

2) If two regression lines are co-incides then the coefficient of correlation is _____.

a) 0 b) -1
c) ± 1 d) 1

3) If $\bar{x}$ is the mean of the random sample of size n taken from a population of size N having mean μ and standard deviation σ then mean and variance of the distribution $\bar{x}$ are _____.

a) $\bar{x}, \sigma^2$ b) $\bar{x}, \frac{\sigma^2}{n}$

c) μ, σ^2 d) μ, and $\frac{\sigma^2}{n}$

4) χ^2 distribution is defined by _____.

a) $\sum \frac{(O-E)}{E}$ b) $\sum \frac{(O-E)}{E^2}$
c) $\sum \left(\frac{O-E}{E}\right)^2$ d) $\sum \frac{(O-E)^2}{E}$

5) If a linear differential equation with constant coefficients and r.h.s. equal to zero has a real root m_1 repeated two times, then the corresponding part of the integral is _____.

a) $(c_1 + c_2)e^{m_1 x}$ b) $(c_1 x + c_2 x)e^{m_1 x}$

c) $(c_1 x + c_2 x^2)e^{m_1 x}$ d) $(c_1 + c_2 x)e^{m_1 x}$

6) $\frac{1}{D-a} X$ is equal to _____.

a) $\int Xe^{ax}dx$ b) $e^{ax}\int X.e^{-ax}dx$

c) $\int Xe^{-ax}dx$ d) $e^{-ax}\int Xe^{-ax}dx$

7) $\frac{1}{D+1}(\log x + \frac{1}{x})$ is equal to _____.

a) e^x b) 1

c) x d) $\log x$

8) The solution of the equation $\sqrt{p} + \sqrt{q} = 1$ is _____.

a) $z = ax + ay + c$ b) $z = ax + a^2 y + c$

c) $z = ax + \left(1 - \sqrt{a}\right)^2 y + c$ d) None of these

9) The solution of $p + q = 1$ is _____.

a) $z = ax + (1 - a)y + c$ b) $z = ax + by + c$

c) $z = ax + b(1 - y) + c$ d) $z = a(1 - x) + b(1 - y) + c$

10) If μ_1', μ_2', μ_3' are the first three moments of the distribution about certain number then third moment μ_3 of the distribution about the arithmetic mean is given by _____.

a) $\mu_3' - 3\mu_2'\mu_1' + 2(\mu_1')^3$ b) $\mu_3' - 3\mu_1' + (\mu_2')^3$

c) $\mu_3' + 2\mu_2'\mu_1' + (\mu_3')^3$ d) $\mu_3' + 3\mu_2'\mu_1' + {\mu_1'}^2$

11) Coefficient of kurtosis β_1 is given by _____.

a) $\frac{\mu_4}{\mu_3}$ b) $\frac{\mu_4}{\mu_2^2}$

c) $\frac{\mu_3^2}{\mu_2^3}$ d) $\frac{\mu_4}{\mu_2^3}$

12) If value of x for normal distribution is 35, mean of normal distribution is 65 and standard deviation is 25 then standardized random variable is _____.

a) -1.5 b) -1.7

c) -1.2 d) -4

13) A continuous random variable has the following probability density function $f(x) = kx(1-x), 0 \leq x \leq 1$ then $k =$ _____.

a) 2 b) 6

c) 3 d) 5

14) The area under the standard normal curve from $z = -\infty$ to $z = 0$ is _____.

a) 1 b) $1/2$

c) $3/2$ d) 0

Seat No.

S.Y. (B.Tech.) (Electrical Engineering) (Semester - I) (New) (NEP CBCS) Examination: March/April-2026
Advanced Mathematics and Statistics (OE-01A)

Day & Date: Monday, 11-05-2026 Max. Marks: 56
Time: 03:00 PM To 06:00 PM

Instructions: 1) All question are compulsory.
2) Figures to the right indicate full marks.

SECTION – I

Q.2 Attempt Any Three. **09**

a) Find the Arithmetic mean, Median and standard deviation for the following frequency distribution.

x:	5	9	12	15	20	24	30	35	42	49
f:	3	6	8	8	9	10	8	7	6	2

b) Solve: $(D^2+1)y = x^2\cos 3x$

c) Solve: $(D^2-4D+4)y = 8.x^2e^{2x}\sin 2x$

d) Calculate the first four moments about the mean of the given distribution. Also find β_1, β_2

x	2.0	2.5	3.0	3.5	4.0	4.5	5.0
f	4	36	60	90	70	40	10

e) Solve $yzp + 2xq = xy$

Q.3 Attempt Any Three. **09**

a) Solve $\frac{d^2y}{dx^2} + 3\frac{dy}{dx} + 2y = 2e^{2x}$

b) Solve $p - q = x^2 + y^2$

c) Find the median of the following frequency distribution.

x	1	3	5	7	9	11	13	15	17
f	3	6	8	12	16	16	15	10	5

d) Solve $x(y-z)p + y(z-x)q = z(x-y)$

e) Solve $(D^3 - 3D + 2)y = x$

Q.4 Attempt Any Two. **10**

a) The first four moments of a distribution about the value 5 are $2, 20, 40$ and 50, from the given information obtain the first four central moments, Standard deviation and coefficient of skewness and kurtosis.

b) Solve the following differential equations by method of separation of variables.

$$3\frac{\partial u}{\partial x} + 2\frac{\partial u}{\partial y} = 0, \text{ given } u(x, 0) = 4e^{-x}$$

c) Solve $\frac{d^2y}{dx^2} + 3\frac{dy}{dx} + 2y = e^{e^x}$

SECTION – II

Q.5 Attempt Any Three. **09**

a) Find the value of k if each of the following functions is a probability density function.

$$f(x) = \begin{cases} kx^2(1 - x^3) & , \quad 0 \leq x \leq 1 \\ 0 & , \quad \text{otherwise} \end{cases}$$

b) The mean life time of 100 fluorescent light bulbs produced by a Company is computed to be 1570 Hrs. with S.D. of 120 Hrs. If μ is the mean lifetime of all the bulbs produced by the Company, Test the Hypothesis $\mu = 1600$ Hrs. against the alternative Hypothesis $\mu \neq 1600$ Hrs. using 5% level of Significance.
(Given Expected value at 5% LOS is 1.96)

c) Fit a Straight line $y = a + bx$ to the following data.

x	0	5	10	15	20	25
y	12	15	17	22	24	30

d) Two independent random sample have the following data.
$\overline{x_1} = 110, \sigma_1 = 25, n_1 = 16$
$\overline{x_2} = 120, \sigma_2 = 30, n_2 = 9$
If σ_1 and σ_2 are the S. D. of the populations. Test the hypothesis that $\mu_1 = \mu_2$ at 5% level of significance.
(The table value of t at $\alpha = 0.05$ for $v = 23$ degrees of freedom is 2.069)

e) If the probability of defective bulbs is 0.2, find the mean and variance of the distribution of defective bulbs in a lot of 1000 bulbs.

Q.6 Attempt Any Three. **09**

a) If two independent random samples of sizes 15 and 8 have respectively the following mean and population standard deviations, $\overline{x_1} = 980, \overline{x_2} = 1012; \sigma_1 = 75, \sigma_2 = 80$. Test the hypothesis that $\mu_1 = \mu_2$ at 5% level of significance.
(Given Expected value at 5% LOS with 21 DF is 2.080)

b) The number of telephone calls received by an operator in a ten-minute interval follows a Poisson distribution with mean 1. What is the probability of receiving (i) no call, (ii) less than four calls, in the interval? What is the most likely number of calls?

c) Calculate the Coefficient of correlations between x and y from the following data
$n = 25, \sum x = 100, \sum x^2 = 950, \sum y = 110, \sum y^2 = 850, \sum x\,y = 800$

d) Monthly salaries of 1000 workers have a normal distribution with mean of Rs. 575 and a standard deviation of Rs. 75. Find the number of workers having salaries between Rs. 500 and Rs. 625 p.m. Also find the minimum salary of the highest paid 200 workers.
(Given: For a standard normal variate
i) area between $t = 0$ and $t = 1$ is 0.3413,
ii) area between $t = 0$ and $t = 0.67$ is 0.2486,
iii) area between $t = 0$ and $t = 0.84$ is 0.3)

e) Obtain a second-degree curve to the following data and estimate the production in 1975.

Year	1921	1931	1941	1951	1961	1971	1981
Prod. (m. tons)	3	5	9	10	12	14	15

Q.7 Attempt Any Two. **10**

a) Fit a Binomial distribution to the following data,

Value of x	0	1	2	3	4	5	6
Frequency f	6	20	28	12	8	6	0

b) Calculate the lines of regression from the following table, gives the marks obtained by a class of students in two special papers.

Paper I	80	45	55	56	58	60	65	68	70	75	85
Paper II	82	56	50	48	60	62	64	65	70	74	90

c) Ten school boys were given a test in Statistics and their scores were recorded. They were given a month's special coaching and a second test was given to them in the same subject at the end of the coaching period. Test if the marks given below give evidence to the fact that the students are benefitted by coaching.

Marks in test I:	70	68	56	75	80	90	68	75	56	58
Marks in Test II:	68	70	52	73	75	78	80	92	54	55

(Given that value of t_α at 5% LOS for $\nu = 9$ degrees of freedom is 1.86 for one tailed test)

Seat No.	

Set **S**

S.Y. (B.Tech.) (Electrical Engineering) (Semester - I) (New) (NEP CBCS) Examination: March/April-2026
Advanced Mathematics and Statistics (OE-01A)

Day & Date: Monday, 11-05-2026 Max. Marks: 70
Time: 03:00 PM To 06:00 PM

Instructions: 1) Q. No. 1 is compulsory. It should be solved in the first 30 minutes in Answer Book Page no 03 (Starting page of the Answer Book). Each question carries one mark.
2) Don't forget to Mention question paper set (P/Q/R/S) on top of page.
3) Figures to the right indicates full marks.

MCQ/Objective Type Questions

Duration: 30 Minutes Marks: 14

Q.1 Choose the correct alternative from the given option. **14**

1) If μ_1', μ_2', μ_3' are the first three moments of the distribution about certain number then third moment μ_3 of the distribution about the arithmetic mean is given by _____.

a) $\mu_3' - 3\mu_2'\mu_1' + 2(\mu_1')^3$ b) $\mu_3' - 3\mu_1' + (\mu_2')^3$

c) $\mu_3' + 2\mu_2'\mu_1' + (\mu_3')^3$ d) $\mu_3' + 3\mu_2'\mu_1' + {\mu_1'}^2$

2) Coefficient of kurtosis β_1 is given by _____.

a) $\frac{\mu_4}{\mu_3}$ b) $\frac{\mu_4}{\mu_2^2}$

c) $\frac{\mu_3^2}{\mu_2^3}$ d) $\frac{\mu_4}{\mu_2^3}$

3) If value of x for normal distribution is 35, mean of normal distribution is 65 and standard deviation is 25 then standardized random variable is _____.

a) -1.5 b) -1.7

c) -1.2 d) -4

4) A continuous random variable has the following probability density function $f(x) = kx(1-x), 0 \le x \le 1$ then $k =$ _____.

a) 2 b) 6

c) 3 d) 5

5) The area under the standard normal curve from $z = -\infty$ to $z = 0$ is _____.

a) 1 b) $1/2$

c) $3/2$ d) 0

6) If X, Y denote the deviation from their means and if $\sum X^2 = 80, \sum Y^2 = 50$ & $\sum XY = 60$ and $r =$_____.

a) 0.65 b) 0.78

c) 0.81 d) 0.95

7) If two regression lines are co-incides then the coefficient of correlation is _____.

a) 0 b) -1

c) ± 1 d) 1

8) If $\bar{x}$ is the mean of the random sample of size n taken from a population of size N having mean μ and standard deviation σ then mean and variance of the distribution $\bar{x}$ are _____.

a) $\bar{x}, \sigma^2$ b) $\bar{x}, \frac{\sigma^2}{n}$

c) μ, σ^2 d) μ, and $\frac{\sigma^2}{n}$

9) χ^2 distribution is defined by _____.

a) $\sum \frac{(O-E)}{E}$ b) $\sum \frac{(O-E)}{E^2}$

c) $\sum \left(\frac{O-E}{E}\right)^2$ d) $\sum \frac{(O-E)^2}{E}$

10) If a linear differential equation with constant coefficients and r.h.s. equal to zero has a real root m_1 repeated two times, then the corresponding part of the integral is _____.

a) $(c_1 + c_2)e^{m_1 x}$ b) $(c_1 x + c_2 x)e^{m_1 x}$

c) $(c_1 x + c_2 x^2)e^{m_1 x}$ d) $(c_1 + c_2 x)e^{m_1 x}$

11) $\frac{1}{D-a} X$ is equal to _____.

a) $\int X e^{ax} dx$ b) $e^{ax} \int X . e^{-ax} dx$

c) $\int X e^{-ax} dx$ d) $e^{-ax} \int X e^{-ax} dx$

12) $\frac{1}{D+1}(\log x + \frac{1}{x})$ is equal to _____.

a) e^x b) 1

c) x d) $\log x$

13) The solution of the equation $\sqrt{p} + \sqrt{q} = 1$ is _____.

a) $z = ax + ay + c$ b) $z = ax + a^2 y + c$

c) $z = ax + \left(1 - \sqrt{a}\right)^2 y + c$ d) None of these

14) The solution of $p + q = 1$ is _____.

a) $z = ax + (1 - a)y + c$ b) $z = ax + by + c$

c) $z = ax + b(1 - y) + c$ d) $z = a(1 - x) + b(1 - y) + c$

SECTION – I

Q.2 Attempt Any Three. **09**

a) Find the Arithmetic mean, Median and standard deviation for the following frequency distribution.

x:	5	9	12	15	20	24	30	35	42	49
f:	3	6	8	8	9	10	8	7	6	2

b) Solve: $(D^2+1)y = x^2\cos 3x$

c) Solve: $(D^2-4D+4)y = 8.x^2e^{2x}\sin 2x$

d) Calculate the first four moments about the mean of the given distribution. Also find β_1, β_2

x	2.0	2.5	3.0	3.5	4.0	4.5	5.0
f	4	36	60	90	70	40	10

e) Solve $yzp + 2xq = xy$

Q.3 Attempt Any Three. **09**

a) Solve $\frac{d^2y}{dx^2} + 3\frac{dy}{dx} + 2y = 2e^{2x}$

b) Solve $p - q = x^2 + y^2$

c) Find the median of the following frequency distribution.

x	1	3	5	7	9	11	13	15	17
f	3	6	8	12	16	16	15	10	5

d) Solve $x(y-z)p + y(z-x)q = z(x-y)$

e) Solve $(D^3 - 3D + 2)y = x$

Q.4 Attempt Any Two. **10**

a) The first four moments of a distribution about the value 5 are $2, 20, 40$ and 50, from the given information obtain the first four central moments, Standard deviation and coefficient of skewness and kurtosis.

b) Solve the following differential equations by method of separation of variables.

$$3\frac{\partial u}{\partial x} + 2\frac{\partial u}{\partial y} = 0, \text{ given } u(x, 0) = 4e^{-x}$$

c) Solve $\frac{d^2y}{dx^2} + 3\frac{dy}{dx} + 2y = e^{e^x}$

SECTION – II

Q.5 Attempt Any Three. **09**

a) Find the value of k if each of the following functions is a probability density function.

$$f(x) = \begin{cases} kx^2(1 - x^3) & , \quad 0 \leq x \leq 1 \\ 0 & , \quad \text{otherwise} \end{cases}$$

b) The mean life time of 100 fluorescent light bulbs produced by a Company is computed to be 1570 Hrs. with S.D. of 120 Hrs. If μ is the mean lifetime of all the bulbs produced by the Company, Test the Hypothesis $\mu = 1600$ Hrs. against the alternative Hypothesis $\mu \neq 1600$ Hrs. using 5% level of Significance.
(Given Expected value at 5% LOS is 1.96)

c) Fit a Straight line $y = a + bx$ to the following data.

x	0	5	10	15	20	25
y	12	15	17	22	24	30

d) Two independent random sample have the following data.
$\overline{x_1} = 110, \sigma_1 = 25, n_1 = 16$
$\overline{x_2} = 120, \sigma_2 = 30, n_2 = 9$
If σ_1 and σ_2 are the S. D. of the populations. Test the hypothesis that $\mu_1 = \mu_2$ at 5% level of significance.
(The table value of t at $\alpha = 0.05$ for $v = 23$ degrees of freedom is 2.069)

e) If the probability of defective bulbs is 0.2, find the mean and variance of the distribution of defective bulbs in a lot of 1000 bulbs.

Q.6 Attempt Any Three. **09**

a) If two independent random samples of sizes 15 and 8 have respectively the following mean and population standard deviations, $\overline{x_1} = 980, \overline{x_2} = 1012; \sigma_1 = 75, \sigma_2 = 80$. Test the hypothesis that $\mu_1 = \mu_2$ at 5% level of significance.
(Given Expected value at 5% LOS with 21 DF is 2.080)

b) The number of telephone calls received by an operator in a ten-minute interval follows a Poisson distribution with mean 1. What is the probability of receiving (i) no call, (ii) less than four calls, in the interval? What is the most likely number of calls?

c) Calculate the Coefficient of correlations between x and y from the following data
$n = 25, \sum x = 100, \sum x^2 = 950, \sum y = 110, \sum y^2 = 850, \sum x\,y = 800$

d) Monthly salaries of 1000 workers have a normal distribution with mean of Rs. 575 and a standard deviation of Rs. 75. Find the number of workers having salaries between Rs. 500 and Rs. 625 p.m. Also find the minimum salary of the highest paid 200 workers.
(Given: For a standard normal variate
i) area between $t = 0$ and $t = 1$ is 0.3413,
ii) area between $t = 0$ and $t = 0.67$ is 0.2486,
iii) area between $t = 0$ and $t = 0.84$ is 0.3)

e) Obtain a second-degree curve to the following data and estimate the production in 1975.

Year	1921	1931	1941	1951	1961	1971	1981
Prod. (m. tons)	3	5	9	10	12	14	15

Q.7 Attempt Any Two. **10**

a) Fit a Binomial distribution to the following data,

Value of x	0	1	2	3	4	5	6
Frequency f	6	20	28	12	8	6	0

b) Calculate the lines of regression from the following table, gives the marks obtained by a class of students in two special papers.

Paper I	80	45	55	56	58	60	65	68	70	75	85
Paper II	82	56	50	48	60	62	64	65	70	74	90

c) Ten school boys were given a test in Statistics and their scores were recorded. They were given a month's special coaching and a second test was given to them in the same subject at the end of the coaching period. Test if the marks given below give evidence to the fact that the students are benefitted by coaching.

Marks in test I:	70	68	56	75	80	90	68	75	56	58
Marks in Test II:	68	70	52	73	75	78	80	92	54	55

(Given that value of t_α at 5% LOS for $v = 9$ degrees of freedom is 1.86 for one tailed test)

S.Y. (B.Tech.) (Electrical Engineering) (Semester - I) (New) (NEP CBCS) Examination: March/April – 2026
Digital Marketing and E-Commerce (OE-01B)

Day & Date: Monday, 11-05-2026 Max. Marks: 70
Time: 03:00 PM To 06:00 PM

Instructions: 1) Q. No. 1 is compulsory. It should be solved in the first 30 minutes in Answer Book Page no 03 (Starting page of the Answer Book). Each question carries one mark
2) Don't forget to Mention question paper set (P/Q/R/S) on top on page.
3) Figures to the right indicates full marks.
4) Assume suitable data if necessary.

MCQ/Objective Type Questions

Duration: 30 Minutes Marks:14

Q.1 Choose correct answer: 14

1) Which of the following is/are considered examples of the Consumer to Consumer (C2C) model?
a) Amazon.com b) e-bay
c) Rentalic.com d) All of the above

2) Which type of E - Commerce is Amazon?
a) B2B b) B2C
c) G2B d) G2C

3) Which of the following is the set of planned activities that are designed to result in a profit in the marketplace?
a) Profit model b) Business model
c) Business plan d) Revenue model

4) All of the following are major B2C business models except _____.
a) content provider b) industry consortium
c) transaction broker d) service provider

5) After completing an E-Commerce transaction, the buyer needs to _____.
a) Pick the product and go home
b) Take the product to home
c) Collect it directly from a store
d) Wait till the delivery of the product

6) SCM is a game of 4 C's = Collaboration; Co-operation; Co-ordination and _____.
a) Controlling b) Connectivity
c) Communication d) Customer

7) Which e-commerce transaction provides the benefits of eliminating the requirement of a middleman?
a) Business to Business
b) Business to Government
c) Consumer to Business
d) Business to Consumer

8) After completing an E-Commerce transaction, the seller and buyer should be provided an opportunity to _____ their transaction experience.
a) undo
b) regret
c) provide rating for
d) forget

9) Digital Cash has the following characteristics _____.
a) Anonymity
b) Security
c) Confidentiality
d) All of the Above

10) Benefit of E-Commerce platform is/are _____.
a) competitive pricing to benefit both seller and buyer
b) large number of products to choose from
c) ability to buy products not available in the local market
d) All of them

11) Which type of attack is a method of defeating a cryptographic scheme of trying a large number of possibilities?
a) Teardrop attack
b) Brute force attack
c) Phlashing
d) Smurf attack

12) Which is the model in E - E-Commerce, if the seller is an individual and the buyer is a business firm?
a) Consumer to Business
b) Business to Consumer
c) Business to Business
d) Consumer to Consumer

13) Which of the following authenticates and handles credit card payment for E-Commerce?
a) Payment gateway
b) E - E-Commerce gateway
c) Software gateway
d) E-Wallets

14) What is another name called PDoS?
a) Brute force attack
b) Non-technical attack
c) Phlashing
d) Smurf attack

Duration: 30 Minutes Marks:14

Q.1 Choose the correct alternatives from the following. **14**

1) History is best defined as the study of _____.
a) Future events b) Past human activities
c) Natural phenomena d) Scientific experiments

2) The archaeology focuses on _____.
a) Economic theories
b) The study of celestial bodies
c) Material remains of past societies
d) Genetic research

3) Which of the following disciplines deals with political systems and governance?
a) Economics b) Political Science
c) Sociology d) Cultural Studies

4) Urbanization is best described as _____.
a) Decline of rural population b) Growth of cities and towns
c) Spread of agriculture d) Industrial decline

5) Sociology is the study of _____.
a) Individual mind
b) Social behaviour and society
c) Political institutions
d) Historical events

6) Culture includes _____.
a) Only art and literature
b) Traditions, beliefs, and values
c) Economic systems
d) Political institutions only

7) In which ancient civilization did the term “democracy” originate?
a) Ancient Egypt
b) Ancient Greece
c) Ancient Rome
d) Mesopotamia

8) Inflation means _____.
a) Increase in employment
b) Decrease in prices
c) Increase in general price level
d) Increase in production

9) Socialization refers to _____.
a) Economic growth
b) Learning social norms
c) Political participation
d) Cultural diffusion

10) The study of language structure and its evolution is called _____.
a) Sociology
b) Linguistics
c) Psychology
d) Anthropology

11) Feminism primarily addresses issues related to _____.
a) Economic inequality
b) Gender equality and women’s rights
c) Political ideologies
d) Technological advancements

12) Dr. Sigmund Freud is best known for his contributions to _____.
a) Political science
b) Psychoanalysis
c) Economic theory
d) Structural linguistics

13) Which discipline studies the production, distribution, and consumption of goods and services?
a) Sociology
b) Political Science
c) Economics
d) History

S.Y. (B.Tech.) (Electrical Engineering) (Semester - I) (New) (NEP CBCS) Examination: March/April – 2026
Humanities and Social Sciences (OE-01C)

Day & Date: Monday, 11-05-2026 Max. Marks: 56
Time: 03:00 PM To 06:00 PM

Instructions: 1) All questions are compulsory.
2) Figures to the right indicate full marks.

SECTION – I

Q.2 Attempt Any Three. **12**

a) Explain various aspects of perception.

b) Explain major philosophical movements and their impact.

c) Explain the interdisciplinary nature of disciplines under humanities and social sciences.

d) Explain how perceptual processes shape human behaviour.

e) Write a short note on: Scope of humanities.

Q.3 Attempt Any Two. **16**

a) Explore main theories of psychology.

b) Write in details the effects of psychology on social communication.

c) Explore the merits and demerits of democratic system of rule.

SECTION -II

Q.4 Attempt Any Three. **12**

a) How did industrial revolution contribute to technical advancements?

b) Write a short note on: Ethics in Engineering.

c) Write a short note on: Social Institutions.

d) Which are the different aspects of culture and society?

e) Explain how the ancient civilizations have contributed to the modern society.

Q.5 Attempt Any Two. **16**

a) Explain the concept of industrialization with its social and economic consequences.

b) Explore various economic theories and their thinkers.

c) Which are the technological innovations in 18^{th} & 19^{th} century? Explain.

Seat No.	

Set **Q**

S.Y. (B.Tech.) (Electrical Engineering) (Semester - I) (New) (NEP CBCS) Examination: March/April – 2026
Humanities and Social Sciences (OE-01C)

Day & Date: Monday, 11-05-2026 Max. Marks: 70
Time: 03:00 PM To 06:00 PM

Instructions: 1) Q. No. 1 is compulsory. It should be solved in the first 30 minutes in Answer Book Page no 03 (Starting page of the Answer Book). Each question carries one mark
2) Don't forget to Mention question paper set (P/Q/R/S) on top on page.
3) Figures to the right indicates full marks.

MCQ/Objective Type Questions

Duration: 30 Minutes Marks:14

Q.1 Choose the correct alternatives from the following. **14**

1) Inflation means _____.
a) Increase in employment
b) Decrease in prices
c) Increase in general price level
d) Increase in production

2) Socialization refers to _____.
a) Economic growth b) Learning social norms
c) Political participation d) Cultural diffusion

3) The study of language structure and its evolution is called _____.
a) Sociology b) Linguistics
c) Psychology d) Anthropology

4) Feminism primarily addresses issues related to _____.
a) Economic inequality
b) Gender equality and women's rights
c) Political ideologies
d) Technological advancements

5) Dr. Sigmund Freud is best known for his contributions to _____.
a) Political science b) Psychoanalysis
c) Economic theory d) Structural linguistics

6) Which discipline studies the production, distribution, and consumption of goods and services?
a) Sociology b) Political Science
c) Economics d) History

7) Identify the primary focus of ethics in philosophy.
a) Logic and reasoning
b) Moral principles and conduct
c) Aesthetics and beauty
d) Scientific discovery

8) History is best defined as the study of _____.
a) Future events
b) Past human activities
c) Natural phenomena
d) Scientific experiments

9) The archaeology focuses on _____.
a) Economic theories
b) The study of celestial bodies
c) Material remains of past societies
d) Genetic research

10) Which of the following disciplines deals with political systems and governance?
a) Economics
b) Political Science
c) Sociology
d) Cultural Studies

11) Urbanization is best described as _____.
a) Decline of rural population
b) Growth of cities and towns
c) Spread of agriculture
d) Industrial decline

12) Sociology is the study of _____.
a) Individual mind
b) Social behaviour and society
c) Political institutions
d) Historical events

13) Culture includes _____.
a) Only art and literature
b) Traditions, beliefs, and values
c) Economic systems
d) Political institutions only

14) In which ancient civilization did the term “democracy” originate?
a) Ancient Egypt
b) Ancient Greece
c) Ancient Rome
d) Mesopotamia

MCQ/Objective Type Questions

Duration: 30 Minutes Marks:14

Q.1 MCQ/Objective Type Questions: 14

1) Which of the following best defines the primary purpose of management?
a) To create rules for employees to follow
b) To maintain financial records
c) To achieve organizational goals efficiently and effectively
d) To monitor employee behavior

2) Which function of management involves setting objectives and determining a course of action to achieve them?
a) Organizing b) Controlling
c) Planning d) Leading

3) Which of the following best represents the concept of social responsibility in management?
a) Maximizing shareholder wealth at any cost
b) Avoiding all legal penalties
c) Balancing profit-making with obligations to stakeholders and society
d) Focusing only on employee welfare

4) What is the most important reason for managers to follow ethical principles in decision-making?
a) To avoid law suits
b) To improve public image
c) To build trust and long-term sustainability
d) To increase profits quickly

5) Which is the first step in the planning process?
a) Developing alternatives b) Evaluating alternatives
c) Setting objectives d) Selecting the best alternative

6) What is the primary purpose of organizing in management?
a) To control employee behavior
b) To define roles, responsibilities, and allocate resources
c) To create strict rules for employees
d) To plan financial statements

7) What is the main purpose of employee training and development?
a) To penalize poor performance
b) To reduce the number of staff
c) To delay promotions
d) To enhance employee skills and support career growth

8) According to Maslow's Hierarchy of Needs, which of the following is the highest level of need?
a) Safety needs
b) Social needs
c) Esteem needs
d) Self-actualization

9) The "Carrot and Stick" approach to motivation is based on _____.
a) Building self-esteem through empowerment
b) Providing both rewards and punishments to influence behavior
c) Offering training and development opportunities
d) Recognizing only financial incentives

10) Which of the following best defines "quality" in the context of management?
a) Producing the highest quantity of products
b) Conforming to standards and satisfying customer needs
c) Meeting only internal business goals
d) Offering products at the lowest possible price

11) Which of the following is not typically considered an element of quality?
a) Performance
b) Reliability
c) Advertising
d) Durability

12) Pareto Analysis is based on the principle that _____.
a) All causes contribute equally to problems
b) 20% of the causes account for 80% of the problems
c) Quality problems are random and unpredictable
d) Only external factors affect product quality

13) The main goal of Six Sigma is to _____.
a) Increase the speed of production
b) Eliminate all human involvement in processes
c) Reduce process variation and defects to near zero
d) Ensure all products are handmade

14) What is the primary purpose of Statistical Process Control (SPC)?
a) To eliminate all manual processes
b) To ensure marketing strategies are effective
c) To monitor and control a process through statistical methods
d) To increase financial profitability only

2) Figures to the right indicate full marks.
3) Assume suitable data if necessary and mention it clearly.

SECTION – I

Q.2	**a)**	Explain the Social responsibilities and ethics in management.	**07**
	b)	Explain decision making process with types of decision.	**07**
Q.3	**a)**	What is staffing? Explain its importance as a managerial function.	**07**
	b)	What are the types of organizations? Explain problems with organizational level.	**07**
Q.4	**a)**	What are the main techniques of managerial control.	**07**
	b)	What is motivation? Explain Maslow's theory of motivation.	**07**

SECTION – II

Q.5	**a)**	Define quality and state the steps in quality control.	**07**
	b)	Differentiate between quality of design and quality of conformance.	**07**
Q.6	**a)**	Explain Deming Wheel with suitable example.	**07**
	b)	List seven quality control tools. Explain with neat sketches Pareto analysis, Scatter diagram and cause and effect diagram.	**07**
Q.7	**a)**	What is Statistical Process Control (SPC)? Explain its objectives and importance in quality management.	**07**
	b)	Differentiate between single sampling plan & double sampling plan.	**07**

S.Y. (B.Tech.) (Electrical Engineering) (Semester - I) (New) (NEP CBCS) Examination: March/April – 2026
Industrial and Quality Management (OE-01D)

Day & Date: Monday, 11-05-2026 Max. Marks: 70
Time: 03:00 PM To 06:00 PM

Instructions: 1) Q. No. 1 is compulsory. It should be solved in the first 30 minutes in Answer Book Page no 03 (Starting page of the Answer Book). Each question carries one mark.
2) Don't forget to Mention question paper set (P/Q/R/S) on top on page.
3) Figures to the right indicates full marks.
4) Assume suitable data if necessary and mention it clearly.

MCQ/Objective Type Questions

Duration: 30 Minutes Marks:14

Q.1 MCQ/Objective Type Questions: 14

1) What is the primary purpose of organizing in management?
a) To control employee behavior
b) To define roles, responsibilities, and allocate resources
c) To create strict rules for employees
d) To plan financial statements

2) What is the main purpose of employee training and development?
a) To penalize poor performance
b) To reduce the number of staff
c) To delay promotions
d) To enhance employee skills and support career growth

3) According to Maslow's Hierarchy of Needs, which of the following is the highest level of need?
a) Safety needs b) Social needs
c) Esteem needs d) Self-actualization

4) The "Carrot and Stick" approach to motivation is based on _____.
a) Building self-esteem through empowerment
b) Providing both rewards and punishments to influence behavior
c) Offering training and development opportunities
d) Recognizing only financial incentives

5) Which of the following best defines "quality" in the context of management?
a) Producing the highest quantity of products
b) Conforming to standards and satisfying customer needs
c) Meeting only internal business goals
d) Offering products at the lowest possible price

6) Which of the following is not typically considered an element of quality?
a) Performance
b) Reliability
c) Advertising
d) Durability

7) Pareto Analysis is based on the principle that _____.
a) All causes contribute equally to problems
b) 20% of the causes account for 80% of the problems
c) Quality problems are random and unpredictable
d) Only external factors affect product quality

8) The main goal of Six Sigma is to _____.
a) Increase the speed of production
b) Eliminate all human involvement in processes
c) Reduce process variation and defects to near zero
d) Ensure all products are handmade

9) What is the primary purpose of Statistical Process Control (SPC)?
a) To eliminate all manual processes
b) To ensure marketing strategies are effective
c) To monitor and control a process through statistical methods
d) To increase financial profitability only

10) Which of the following best defines the primary purpose of management?
a) To create rules for employees to follow
b) To maintain financial records
c) To achieve organizational goals efficiently and effectively
d) To monitor employee behavior

11) Which function of management involves setting objectives and determining a course of action to achieve them?
a) Organizing
b) Controlling
c) Planning
d) Leading

12) Which of the following best represents the concept of social responsibility in management?
a) Maximizing shareholder wealth at any cost
b) Avoiding all legal penalties
c) Balancing profit-making with obligations to stakeholders and society
d) Focusing only on employee welfare

13) What is the most important reason for managers to follow ethical principles in decision-making?
a) To avoid law suits
b) To improve public image
c) To build trust and long-term sustainability
d) To increase profits quickly

14) Which is the first step in the planning process?
a) Developing alternatives
b) Evaluating alternatives
c) Setting objectives
d) Selecting the best alternative

S.Y. (B.Tech.) (Electrical Engineering) (Semester - I) (New) (NEP CBCS) Examination: March/April – 2026
Mathematics for Software and Hardware (OE-01E)

Day & Date: Monday, 11-05-2026 Max. Marks: 70
Time: 03:00 PM To 06:00 PM

Instructions: 1) Q. No. 1 is compulsory. It should be solved in the first 30 minutes in Answer Book Page no 03 (Starting page of the Answer Book). Each question carries one mark.
2) Don't forget to Mention question paper set (P/Q/R/S) on top of page.
3) Figures to the right indicates full marks.

MCQ/Objective Type Questions

Duration: 30 Minutes Marks: 14

Q.1 Choose the correct alternative from the given option. **14**

1) The value of $\frac{1}{D-a}X =$ _____.

a) $e^{-ax}\int e^{-ax}Xdx$ b) $e^{-ax}\int e^{ax}Xdx$

c) $e^{ax}\int e^{-ax}Xdx$ d) $e^{ax}\int e^{ax}Xdx$

2) If $L\{f(t)\} = \emptyset(s)$, then $L\{f(at)\} =$ _____.

a) $\emptyset\left(\frac{s}{a}\right)$ b) $\frac{1}{s}\emptyset\left(\frac{s}{a}\right)$

c) $\emptyset'\left(\frac{s}{a}\right)$ d) $\frac{1}{a}\emptyset\left(\frac{s}{a}\right)$

3) If $L\{f(t)\} = \frac{a}{s^2+a^2}$ then $L\left\{\int_0^t f(t)dt\right\} =$ _____.

a) $\frac{1}{s(s^2+a^2)}$ b) $\frac{a}{s(s^2+a^2)}$

c) $\frac{as}{s^2+a^2}$ d) $\frac{as^2}{s^2+a^2}$

4) The particular Integral of $(D^2-2D+1)y = -4e^x$ is _____.

a) $-2x^2e^x$ b) $-4x^2e^x$

c) $(c_1+c_2x)e^x$ d) x^2e^x

5) The general solution of the equation $(D^3 - 7D - 6)y = 0$ is _____.

a) $y = c_1e^{-x} + c_2e^{2x} + c_3e^{-3x}$ b) $y = c_1e^{x} + c_2e^{2x} + c_3e^{3x}$

c) $y = c_1e^{-x} + c_2e^{-2x} + c_3e^{-3x}$ d) None of these

6) $z\{k\} =$_____ for $|z| > 1$

a) $\frac{z}{z-1}$ b) $\frac{1}{(z-1)^2}$

c) $\frac{z}{(z-1)^2}$ d) $\frac{z}{(z+1)^2}$

7) If $z\{f(k)\} = F(z)$, then $z\{a^k f(k)\} =$ _____.

a) $f\left(\frac{a}{z}\right)$ b) $f\left(\frac{z}{a}\right)$

c) $\frac{1}{a}f\left(\frac{z}{a}\right)$ d) None

8) $Z\left\{\frac{1}{k!}\right\} =$? for $k \geq 0$

a) e^z b) $e^{\frac{1}{z}}$

c) $\frac{1}{z}$ d) $\frac{1}{1-z}$

9) The Fourier sine transform of $f(x)$ is given by _____.

a) $\sqrt{\frac{2}{\pi}}\int_{-\infty}^{\infty} f(x)\sin sx\, dx$ b) $\int_0^{\infty} f(x)\cos sx\, dx$

c) $\sqrt{\frac{2}{\pi}}\int_0^{\infty} f(x)\sin sx\, dx$ d) $\sqrt{\frac{\pi}{2}}\int_0^{\infty} f(x)\sin sx\, dx$

10) From the result $\int_{-\infty}^{\infty} \frac{\cos sx\,.\sin sk}{s} ds = \begin{cases}\pi, & |x| < k \\ 0, & |x| > k\end{cases}$ we can deduce that $\int_0^{\infty} \frac{\sin sk}{s} ds =$ _____.

a) 0 b) 1

c) π d) $\frac{\pi}{2}$

11) The first real positive root of $x^3 = 6x - 4$ by Newton Raphson method near $x_0 = 1$ is _____.

a) 0.6667 b) 0.6

c) 0.4 d) 0.3

12) In solving algebraic and Transcendental equations, which of the fallowing method is called method of tangent?

a) Trapezoidal rule
b) Newton's Raphson method
c) Regula Falsie method
d) Weddle's rule

13) In the interval $(0, a)$ the constant term in the Fourier series of $f(x) = \frac{a}{2} - x$ is _____.

a) 0
b) 1
c) $\frac{a^2}{2\pi}$
d) $\frac{a^2}{4\pi}$

14) The half range sine series of $f(x)$ defined in the interval $(0, 2)$ is _____.

a) $f(x) = \sum_{n=1}^{\infty} b_n \sin nx$
b) $f(x) = \sum_{n=1}^{\infty} b_n \sin(2n\pi x)$
c) $f(x) = \sum_{n=1}^{\infty} b_n \sin\left(\frac{n\pi x}{2}\right)$
d) $f(x) = \sum_{n=1}^{\infty} a_n \cos\left(\frac{n\pi x}{2}\right)$

S.Y. (B.Tech.) (Electrical Engineering) (Semester - I) (New) (NEP CBCS) Examination: March/April – 2026
Mathematics for Software and Hardware (OE-01E)

Day & Date: Monday, 11-05-2026 Max. Marks: 56
Time: 03:00 PM To 06:00 PM

Instructions: 1) All questions are compulsory.
2) Figures to the right indicate full marks.
3) Make suitable assumptions if necessary and state them clearly.
4) Use of non-programmable calculator is allowed.

SECTION – I

Q.2 Attempt Any Three. **09**

a) Solve: $(D^2 + 4D + 5)y = -2\cos hx + 2^x$

b) Solve: $(D^2 + 1)y = x \sin 2x$

c) Find Z-transform of $x_k = 2^k \cos(3k + 2)\,, k \geq 0$

d) Find $z\{k\alpha^k + k\beta^k\}, k \geq 0$

e) Find the inverse Laplace transform of following by using the Convolution theorem of $\left[\frac{1}{s(s^2+4)}\right]$

Q.3 Attempt Any Three. **09**

a) Solve $(D^3 + 3D^2 + 3D + 1)y = e^{-x}$

b) Find Laplace transform of $f(t) = \frac{2t}{3}$ $0 < t < 3$ where $f(t)$ is a periodic function with period 3

c) Find Laplace transform of $te^{-\bar{t}} \cos 2t$

d) Find Z-transform of $f(k) = \begin{cases} 4^k, & k < 0 \\ 3^k, & k \geq 0 \end{cases}$

e) Evaluate $\int_0^\infty \frac{e^{-t} - e^{-3t}}{t}$ by using Laplace transform.

Q.4 Attempt Any Two. **10**

a) Find $Z^{-1}\left\{\frac{1}{(z-a)^2}\right\}, |z| > |a|., |z| < |a|$

b) Find $L\{t.\sqrt{1 - \sin t}\}$

c) Solve $(D^2 - 6D + 13)y = 2^x + 8e^{3x} \sin 4x$

SECTION – II

Q.5 Attempt Any Three. **09**

a) Evaluate $\int_0^6 \frac{e^x}{1+x}dx$ using Simpson's 1/3rd rule. (Take $h = 1$)

b) Evaluate $I = \int_0^2 e^{-x}dx$ by using Simpson's 1/3rd rule given $h = 0.5$

c) Obtain half range cosine series $f(x) = x$ in $0 < x < 2$

d) Find the Fourier series expansion of $f(x) = x^2$ in $(-\pi, \pi)$

e) Find the Fourier Sine transforms of $2e^{-5x} + 5e^{-2x}$

Q.6 Attempt Any Three. **09**

a) Find $f(x)$ if its fourier sine transform is e^{-as}

b) Find the Fourier cosine transform of $f(x)$, if $f(x) = \begin{cases} 1, & 0 \le x < 1 \\ 0, & x \ge 1 \end{cases}$

c) Find the Fourier series expansion of $f(x) = x$ in $(-\pi, \pi)$

d) Find the positive root of the following by using Newton Raphson method to four decimal places $3x - \cos x - 1 = 0$

e) Evaluate $\int_0^6 \frac{1}{1+x^2}dx\ n = 6$ using Trapezoidal rule.

Q.7 Attempt Any Two. **10**

a) Find $\int_1^8 \frac{1}{1+x}dx\ h = 1$ by using Trapezoidal rule and Simpson's 1/3 rule

b) Find Fourier transform of

$$f(x) \begin{matrix} = 1 & |x| & < K \\ = 0 & |x| & > K \end{matrix}$$ and

hence evaluate

i) $\int_{-\infty}^{\infty} \frac{\sin sk.\cos sk}{s}ds$ ii) $\int_{-\infty}^{\infty} \frac{\sin ks}{s}ds$

c) Obtain the Fourier series of $f(x) = a^2 - x^2$ in $(-a, a)$

2) Don't forget to Mention question paper set (P/Q/R/S) on top of page.
3) Figures to the right indicates full marks.

MCQ/Objective Type Questions

Duration: 30 Minutes Marks: 14

Q.1 Choose the correct alternative from the given option. **14**

1) $Z\left\{\frac{1}{k!}\right\} =?$ for $k \geq 0$

a) e^z b) $e^{\frac{1}{z}}$

c) $\frac{1}{z}$ d) $\frac{1}{1-z}$

2) The Fourier sine transform of $f(x)$ is given by _____.

a) $\sqrt{\frac{2}{\pi}}\int_{-\infty}^{\infty} f(x)\sin sx\, dx$ b) $\int_0^{\infty} f(x)\cos sx\, dx$

c) $\sqrt{\frac{2}{\pi}}\int_0^{\infty} f(x)\sin sx\, dx$ d) $\sqrt{\frac{\pi}{2}}\int_0^{\infty} f(x)\sin sx\, dx$

3) From the result $\int_{-\infty}^{\infty}\frac{\cos sx\,.\sin sk}{s}ds = \begin{cases}\pi, & |x| < k \\ 0, & |x| > k\end{cases}$ we can deduce that $\int_0^{\infty}\frac{\sin sk}{s}ds =$ _____.

a) 0 b) 1

c) π d) $\frac{\pi}{2}$

4) The first real positive root of $x^3 = 6x - 4$ by Newton Raphson method near $x_0 = 1$ is _____.

a) 0.6667 b) 0.6

c) 0.4 d) 0.3

5) In solving algebraic and Transcendental equations, which of the fallowing method is called method of tangent?

a) Trapezoidal rule
b) Newton's Raphson method
c) Regula Falsie method
d) Weddle's rule

6) In the interval $(0, a)$ the constant term in the Fourier series of $f(x) = \frac{a}{2} - x$ is _____.

a) 0
b) 1
c) $\frac{a^2}{2\pi}$
d) $\frac{a^2}{4\pi}$

7) The half range sine series of $f(x)$ defined in the interval $(0, 2)$ is _____.

a) $f(x) = \sum_{n=1}^{\infty} b_n \sin nx$
b) $f(x) = \sum_{n=1}^{\infty} b_n \sin(2n\pi x)$
c) $f(x) = \sum_{n=1}^{\infty} b_n \sin\left(\frac{n\pi x}{2}\right)$
d) $f(x) = \sum_{n=1}^{\infty} a_n \cos\left(\frac{n\pi x}{2}\right)$

8) The value of $\frac{1}{D-a}X =$ _____.

a) $e^{-ax}\int e^{-ax}Xdx$
b) $e^{-ax}\int e^{ax}Xdx$
c) $e^{ax}\int e^{-ax}Xdx$
d) $e^{ax}\int e^{ax}Xdx$

9) If $L\{f(t)\} = \emptyset(s)$, then $L\{f(at)\} =$ _____.

a) $\emptyset\left(\frac{s}{a}\right)$
b) $\frac{1}{s}\emptyset\left(\frac{s}{a}\right)$
c) $\emptyset'\left(\frac{s}{a}\right)$
d) $\frac{1}{a}\emptyset\left(\frac{s}{a}\right)$

10) If $L\{f(t)\} = \frac{a}{s^2+a^2}$ then $L\left\{\int_0^t f(t)dt\right\} =$ _____.

a) $\frac{1}{s(s^2+a^2)}$
b) $\frac{a}{s(s^2+a^2)}$
c) $\frac{as}{s^2+a^2}$
d) $\frac{as^2}{s^2+a^2}$

11) The particular Integral of $(D^2 - 2D + 1)y = -4e^x$ is _____.

a) $-2x^2e^x$
b) $-4x^2e^x$
c) $(c_1 + c_2x)e^x$
d) x^2e^x

12) The general solution of the equation $(D^3 - 7D - 6)y = 0$ is _____.

a) $y = c_1e^{-x} + c_2e^{2x} + c_3e^{-3x}$ b) $y = c_1e^{x} + c_2e^{2x} + c_3e^{3x}$

c) $y = c_1e^{-x} + c_2e^{-2x} + c_3e^{-3x}$ d) None of these

13) $z\{k\} =$_____ for $|z| > 1$

a) $\frac{z}{z-1}$ b) $\frac{1}{(z-1)^2}$

c) $\frac{z}{(z-1)^2}$ d) $\frac{z}{(z+1)^2}$

14) If $z\{f(k)\} = F(z)$, then $z\{a^k f(k)\} =$ _____.

a) $f\left(\frac{a}{z}\right)$ b) $f\left(\frac{z}{a}\right)$

c) $\frac{1}{a}f\left(\frac{z}{a}\right)$ d) None

MCQ/Objective Type Questions

Duration: 30 Minutes Marks: 14

Q.1 Choose the correct alternative from the given option. **14**

1) The first real positive root of $x^3 = 6x - 4$ by Newton Raphson method near $x_0 = 1$ is _____.

a) 0.6667 b) 0.6
c) 0.4 d) 0.3

2) In solving algebraic and Transcendental equations, which of the fallowing method is called method of tangent?

a) Trapezoidal rule b) Newton's Raphson method
c) Regula Falsie method d) Weddle's rule

3) In the interval $(0, a)$ the constant term in the Fourier series of $f(x) = \frac{a}{2} - x$ is _____.

a) 0 b) 1
c) $\frac{a^2}{2\pi}$ d) $\frac{a^2}{4\pi}$

4) The half range sine series of $f(x)$ defined in the interval $(0, 2)$ is _____.

a) $f(x) = \sum_{n=1}^{\infty} b_n \sin nx$ b) $f(x) = \sum_{n=1}^{\infty} b_n \sin(2n\pi x)$
c) $f(x) = \sum_{n=1}^{\infty} b_n \sin\left(\frac{n\pi x}{2}\right)$ d) $f(x) = \sum_{n=1}^{\infty} a_n \cos\left(\frac{n\pi x}{2}\right)$

5) The value of $\frac{1}{D-a}X =$ _____.

a) $e^{-ax}\int e^{-ax}Xdx$ b) $e^{-ax}\int e^{ax}Xdx$

c) $e^{ax}\int e^{-ax}Xdx$ d) $e^{ax}\int e^{ax}Xdx$

6) If $L\{f(t)\} = \emptyset(s)$, then $L\{f(at)\} =$ _____.

a) $\emptyset\left(\frac{s}{a}\right)$ b) $\frac{1}{s}\emptyset\left(\frac{s}{a}\right)$

c) $\emptyset'\left(\frac{s}{a}\right)$ d) $\frac{1}{a}\emptyset\left(\frac{s}{a}\right)$

7) If $L\{f(t)\} = \frac{a}{s^2+a^2}$ then $L\left\{\int_0^t f(t)dt\right\} =$ _____.

a) $\frac{1}{s(s^2+a^2)}$ b) $\frac{a}{s(s^2+a^2)}$

c) $\frac{as}{s^2+a^2}$ d) $\frac{as^2}{s^2+a^2}$

8) The particular Integral of $(D^2-2D+1)y = -4e^x$ is _____.

a) $-2x^2e^x$ b) $-4x^2e^x$

c) $(c_1+c_2x)e^x$ d) x^2e^x

9) The general solution of the equation $(D^3-7D-6)y = 0$ is _____.

a) $y = c_1e^{-x}+c_2e^{2x}+c_3e^{-3x}$ b) $y = c_1e^{x}+c_2e^{2x}+c_3e^{3x}$

c) $y = c_1e^{-x}+c_2e^{-2x}+c_3e^{-3x}$ d) None of these

10) $z\{k\} =$_____ for $|z| > 1$

a) $\frac{z}{z-1}$ b) $\frac{1}{(z-1)^2}$

c) $\frac{z}{(z-1)^2}$ d) $\frac{z}{(z+1)^2}$

11) If $z\{f(k)\} = F(z)$, then $z\{a^kf(k)\} =$ _____.

a) $f\left(\frac{a}{z}\right)$ b) $f\left(\frac{z}{a}\right)$

c) $\frac{1}{a}f\left(\frac{z}{a}\right)$ d) None

12) $Z\left\{\frac{1}{k!}\right\} =$? for $k \geq 0$

a) e^z b) $e^{\frac{1}{z}}$

c) $\frac{1}{z}$ d) $\frac{1}{1-z}$

13) The Fourier sine transform of $f(x)$ is given by _____.

a) $\sqrt{\frac{2}{\pi}}\int_{-\infty}^{\infty} f(x)\sin sx\ dx$

b) $\int_{0}^{\infty} f(x)\cos sx\ dx$

c) $\sqrt{\frac{2}{\pi}}\int_{0}^{\infty} f(x)\sin sx\ dx$

d) $\sqrt{\frac{\pi}{2}}\int_{0}^{\infty} f(x)\sin sx\ dx$

14) From the result $\int_{-\infty}^{\infty}\frac{\cos sx\ .\sin sk}{s}ds = \begin{cases}\pi, & |x| < k\\ 0, & |x| > k\end{cases}$ we can deduce that $\int_{0}^{\infty}\frac{\sin sk}{s}ds =$ _____.

a) 0

b) 1

c) π

d) $\frac{\pi}{2}$

Set **R**

S.Y. (B.Tech.) (Electrical Engineering) (Semester - I) (New) (NEP CBCS) Examination: March/April – 2026
Mathematics for Software and Hardware (OE-01E)

Day & Date: Monday, 11-05-2026 Max. Marks: 56
Time: 03:00 PM To 06:00 PM

Instructions: 1) All questions are compulsory.
2) Figures to the right indicate full marks.
3) Make suitable assumptions if necessary and state them clearly.
4) Use of non-programmable calculator is allowed.

SECTION – I

Q.2 Attempt Any Three. **09**

a) Solve: $(D^2 + 4D + 5)y = -2\cos hx + 2^x$

b) Solve: $(D^2 + 1)y = x \sin 2x$

c) Find Z-transform of $x_k = 2^k \cos(3k + 2)\,, k \geq 0$

d) Find $z\{k\alpha^k + k\beta^k\}, k \geq 0$

e) Find the inverse Laplace transform of following by using the Convolution theorem of $\left[\frac{1}{s(s^2+4)}\right]$

Q.3 Attempt Any Three. **09**

a) Solve $(D^3 + 3D^2 + 3D + 1)y = e^{-x}$

b) Find Laplace transform of $f(t) = \frac{2t}{3}$ $0 < t < 3$ where $f(t)$ is a periodic function with period 3

c) Find Laplace transform of $te^{-\bar{t}} \cos 2t$

d) Find Z-transform of $f(k) = \begin{cases} 4^k, & k < 0 \\ 3^k, & k \geq 0 \end{cases}$

e) Evaluate $\int_0^\infty \frac{e^{-t} - e^{-3t}}{t}$ by using Laplace transform.

Q.4 Attempt Any Two. **10**

a) Find $Z^{-1}\left\{\frac{1}{(z-a)^2}\right\}, |z| > |a|., |z| < |a|$

b) Find $L\{t.\sqrt{1 - \sin t}\}$

c) Solve $(D^2 - 6D + 13)y = 2^x + 8e^{3x} \sin 4x$

SECTION – II

Q.5 Attempt Any Three. **09**

a) Evaluate $\int_0^6 \frac{e^x}{1+x}dx$ using Simpson's 1/3rd rule. (Take $h = 1$)

b) Evaluate $I = \int_0^2 e^{-x}dx$ by using Simpson's 1/3rd rule given $h = 0.5$

c) Obtain half range cosine series $f(x) = x$ in $0 < x < 2$

d) Find the Fourier series expansion of $f(x) = x^2$ in $(-\pi, \pi)$

e) Find the Fourier Sine transforms of $2e^{-5x} + 5e^{-2x}$

Q.6 Attempt Any Three. **09**

a) Find $f(x)$ if its fourier sine transform is e^{-as}

b) Find the Fourier cosine transform of $f(x)$, if $f(x) = \begin{cases} 1, & 0 \le x < 1 \\ 0, & x \ge 1 \end{cases}$

c) Find the Fourier series expansion of $f(x) = x$ in $(-\pi, \pi)$

d) Find the positive root of the following by using Newton Raphson method to four decimal places $3x - \cos x - 1 = 0$

e) Evaluate $\int_0^6 \frac{1}{1+x^2}dx\ n = 6$ using Trapezoidal rule.

Q.7 Attempt Any Two. **10**

a) Find $\int_1^8 \frac{1}{1+x}dx\ h = 1$ by using Trapezoidal rule and Simpson's 1/3 rule

b) Find Fourier transform of

$$f(x) \begin{matrix} = 1 & |x| & < K \\ = 0 & |x| & > K \end{matrix}$$ and

hence evaluate

i) $\int_{-\infty}^{\infty} \frac{\sin sk.\cos sk}{s}ds$ ii) $\int_{-\infty}^{\infty} \frac{\sin ks}{s}ds$

c) Obtain the Fourier series of $f(x) = a^2 - x^2$ in $(-a, a)$

S.Y. (B.Tech.) (Electrical Engineering) (Semester - I) (New) (NEP CBCS) Examination: March/April – 2026
Mathematics for Software and Hardware (OE-01E)

Day & Date: Monday, 11-05-2026 Max. Marks: 70
Time: 03:00 PM To 06:00 PM

Instructions: 1) Q. No. 1 is compulsory. It should be solved in the first 30 minutes in Answer Book Page no 03 (Starting page of the Answer Book). Each question carries one mark.
2) Don't forget to Mention question paper set (P/Q/R/S) on top of page.
3) Figures to the right indicates full marks.

MCQ/Objective Type Questions

Duration: 30 Minutes Marks: 14

Q.1 Choose the correct alternative from the given option. **14**

1) $z\{k\} =$_____ for $|z| > 1$

a) $\frac{z}{z-1}$ b) $\frac{1}{(z-1)^2}$

c) $\frac{z}{(z-1)^2}$ d) $\frac{z}{(z+1)^2}$

2) If $z\{f(k)\} = F(z)$, then $z\{a^k f(k)\} =$ _____.

a) $f\left(\frac{a}{z}\right)$ b) $f\left(\frac{z}{a}\right)$

c) $\frac{1}{a} f\left(\frac{z}{a}\right)$ d) None

3) $Z\left\{\frac{1}{k!}\right\} =$? for $k \geq 0$

a) e^z b) $e^{\frac{1}{z}}$

c) $\frac{1}{z}$ d) $\frac{1}{1-z}$

4) The Fourier sine transform of $f(x)$ is given by _____.

a) $\sqrt{\frac{2}{\pi}} \int_{-\infty}^{\infty} f(x) \sin sx \, dx$ b) $\int_0^{\infty} f(x) \cos sx \, dx$

c) $\sqrt{\frac{2}{\pi}} \int_0^{\infty} f(x) \sin sx \, dx$ d) $\sqrt{\frac{\pi}{2}} \int_0^{\infty} f(x) \sin sx \, dx$

5) From the result $\int_{-\infty}^{\infty} \frac{\cos sx \,.\sin sk}{s} ds = \begin{cases} \pi, & |x| < k \\ 0, & |x| > k \end{cases}$ we can deduce that $\int_0^{\infty} \frac{\sin sk}{s} ds =$ _____.

a) 0 b) 1

c) π d) $\frac{\pi}{2}$

6) The first real positive root of $x^3 = 6x - 4$ by Newton Raphson method near $x_0 = 1$ is _____.

a) 0.6667 b) 0.6

c) 0.4 d) 0.3

7) In solving algebraic and Transcendental equations, which of the fallowing method is called method of tangent?

a) Trapezoidal rule b) Newton's Raphson method

c) Regula Falsie method d) Weddle's rule

8) In the interval $(0, a)$ the constant term in the Fourier series of $f(x) = \frac{a}{2} - x$ is _____.

a) 0 b) 1

c) $\frac{a^2}{2\pi}$ d) $\frac{a^2}{4\pi}$

9) The half range sine series of $f(x)$ defined in the interval $(0, 2)$ is _____.

a) $f(x) = \sum_{n=1}^{\infty} b_n \sin nx$ b) $f(x) = \sum_{n=1}^{\infty} b_n \sin(2n\pi x)$

c) $f(x) = \sum_{n=1}^{\infty} b_n \sin\left(\frac{n\pi x}{2}\right)$ d) $f(x) = \sum_{n=1}^{\infty} a_n \cos\left(\frac{n\pi x}{2}\right)$

10) The value of $\frac{1}{D-a} X =$ _____.

a) $e^{-ax} \int e^{-ax} X dx$ b) $e^{-ax} \int e^{ax} X dx$

c) $e^{ax} \int e^{-ax} X dx$ d) $e^{ax} \int e^{ax} X dx$

11) If $L\{f(t)\} = \emptyset(s)$, then $L\{f(at)\} =$ _____.

a) $\emptyset\left(\frac{s}{a}\right)$ b) $\frac{1}{s}\emptyset\left(\frac{s}{a}\right)$

c) $\emptyset'\left(\frac{s}{a}\right)$ d) $\frac{1}{a}\emptyset\left(\frac{s}{a}\right)$

12) If $L\{f(t)\} = \frac{a}{s^2+a^2}$ then $L\left\{\int_0^t f(t)dt\right\} =$ _____.

a) $\frac{1}{s(s^2+a^2)}$ b) $\frac{a}{s(s^2+a^2)}$

c) $\frac{as}{s^2+a^2}$ d) $\frac{as^2}{s^2+a^2}$

13) The particular Integral of $(D^2 - 2D + 1)y = -4e^x$ is _____.

a) $-2x^2e^x$ b) $-4x^2e^x$

c) $(c_1 + c_2x)e^x$ d) x^2e^x

14) The general solution of the equation $(D^3 - 7D - 6)y = 0$ is _____.

a) $y = c_1e^{-x} + c_2e^{2x} + c_3e^{-3x}$ b) $y = c_1e^{x} + c_2e^{2x} + c_3e^{3x}$

c) $y = c_1e^{-x} + c_2e^{-2x} + c_3e^{-3x}$ d) None of these

MCQ/Objective Type Questions

Duration: 30 Minutes Marks:14

Q.1 Choose the correct alternatives from the following. **14**

1) In the process of communication, _____ is the person who encodes the message.
a) Receiver b) Driver
c) Cleaner d) Sender

2) Which among the following barriers is related to fault in the channel?
a) Physical b) Mechanical
c) Psychological d) All of above

3) The ability to recognize, understand and regulate your own emotions is called _____.
a) Empathy b) Self-awareness
c) Emotional intelligence d) Relationship management

4) Stress is defined as _____.
a) A physical or emotional reaction to challenges or demands
b) A type of disease
c) Only physical pain
d) A mental disorder

5) Time management means _____.
a) Doing work very quickly
b) Planning and organizing how to spend time effectively
c) Wasting time
d) Avoiding responsibilities

6) Effective non-verbal communication in presentations helps to _____.
a) Confuse the audience
b) Improve understanding and engagement
c) Reduce communication
d) Replace verbal communication

7) Which of the following helps in effective presentation?
a) Organizing ideas clearly b) Using complex language
c) Ignoring the audience d) All of the above

8) The main purpose of an interview is to _____.
a) Test physical strength
b) Assess a candidate's suitability
c) Conduct training
d) Provide entertainment

9) Which of the following is part of presentation etiquette?
a) Clear speaking b) Good posture
c) Proper visual aids d) All of the above

10) Good posture during a presentation indicates _____.
a) Confidence b) Nervousness
c) Disinterest d) Laziness

11) Which non-verbal factors help engage the audience?
a) Eye contact b) Facial expressions
c) Hand gestures d) All of the above

12) Prioritization in time management means _____.
a) Doing easy tasks first
b) Arranging tasks according to importance
c) Avoiding work
d) Doing everything at once

13) Procrastination means _____.
a) Completing work early b) Delaying tasks unnecessarily
c) Planning work d) Finishing tasks on time

Time: 03:00 PM To 06:00 PM

Instructions: 1) All questions are compulsory.
2) Figures to the right indicate full marks.

SECTION – I

Q.2 Attempt Any Three. **12**

a) Write short note on: Functions of a Sender in Communication.

b) Explain physical barriers to communication with the ways to overcome them.

c) Write short note on: Time management.

d) Explain how language can become a barrier in communication.

e) Explain how feedback is necessary in communication.

Q.3 Attempt Any Two. **16**

a) Define psychological barriers and the ways to overcome them.

b) Elaborate various ways to develop emotional intelligence.

c) Which are the different steps in the process of communication?

SECTION -II

Q.4 Attempt Any Three. **12**

a) Explain how non-verbal communication helps for better presentation.

b) Explain different types of interviews.

c) Explain various ways of time management.

d) Elaborate different strategies to manage stress.

e) Explain different reasons of stress.

Q.5 Attempt Any Two. **16**

a) Explain the concept of interview with various steps in the process.

b) Elaborate various ways of effective time management.

c) Which are the different steps in the process of presentation?

SLR-QH-150

Seat No.		Set	S

S.Y. (B.Tech.) (Electrical Engineering) (Semester - I) (New) (NEP CBCS) Examination: March/April – 2026
Soft Skills and Personality Development (OE-01F)

Day & Date: Monday, 11-05-2026 Max. Marks: 70
Time: 03:00 PM To 06:00 PM

Instructions: 1) Q. No. 1 is compulsory. It should be solved in the first 30 minutes in Answer Book Page no 03 (Starting page of the Answer Book). Each question carries one mark
2) Don't forget to Mention question paper set (P/Q/R/S) on top on page.
3) Figures to the right indicates full marks.

MCQ/Objective Type Questions

Duration: 30 Minutes Marks:14

Q.1 Choose the correct alternatives from the following. **14**

1) Effective non-verbal communication in presentations helps to _____.
a) Confuse the audience
b) Improve understanding and engagement
c) Reduce communication
d) Replace verbal communication

2) Which of the following helps in effective presentation?
a) Organizing ideas clearly b) Using complex language
c) Ignoring the audience d) All of the above

3) The main purpose of an interview is to _____.
a) Test physical strength
b) Assess a candidate's suitability
c) Conduct training
d) Provide entertainment

4) Which of the following is part of presentation etiquette?
a) Clear speaking b) Good posture
c) Proper visual aids d) All of the above

5) Good posture during a presentation indicates _____.
a) Confidence b) Nervousness
c) Disinterest d) Laziness

6) Which non-verbal factors help engage the audience?
a) Eye contact b) Facial expressions
c) Hand gestures d) All of the above

7) Prioritization in time management means _____.
a) Doing easy tasks first
b) Arranging tasks according to importance
c) Avoiding work
d) Doing everything at once

8) Procrastination means _____.
a) Completing work early
b) Delaying tasks unnecessarily
c) Planning work
d) Finishing tasks on time

9) Taking short breaks during work helps to _____.
a) Reduce efficiency
b) Improve focus
c) Waste time
d) Increase stress

10) In the process of communication, _____ is the person who encodes the message.
a) Receiver
b) Driver
c) Cleaner
d) Sender

11) Which among the following barriers is related to fault in the channel?
a) Physical
b) Mechanical
c) Psychological
d) All of above

12) The ability to recognize, understand and regulate your own emotions is called _____.
a) Empathy
b) Self-awareness
c) Emotional intelligence
d) Relationship management

13) Stress is defined as _____.
a) A physical or emotional reaction to challenges or demands
b) A type of disease
c) Only physical pain
d) A mental disorder

14) Time management means _____.
a) Doing work very quickly
b) Planning and organizing how to spend time effectively
c) Wasting time
d) Avoiding responsibilities

Electric Vehicle Technology (EEHn-01A)

Day & Date: Wednesday, 13-05-2026 Max. Marks: 70
Time: 03:00 PM To 06:00 PM

Instructions: 1) Q. No. 1 is compulsory. It should be solved in the first 30 minutes in Answer Book Page no 03 (Starting page of the Answer Book). Each question carries one mark.
2) Don't forget to Mention question paper set (P/Q/R/S) on top of page.
3) Figures to the right indicates full marks.
4) Assume suitable data if necessary and mention it clearly.

MCQ/Objective Type Questions

Duration: 30 Minutes Marks:14

Q.1 Choose the correct alternative from the option: 14

1) Which component stores electrical energy in an electric vehicle?
a) Differential b) Inverter
c) Battery pack d) Gearbox

2) The main function of an inverter in an EV is to _____.
a) Store energy b) Convert DC to AC
c) Increase tire pressure d) Cool the battery

3) According to Newton's Second Law, force is equal to ____.
a) Mass × Velocity b) Mass × Acceleration
c) Power × Time d) Velocity ÷Time

4) Propulsion power in an electric vehicle is primarily produced by _____.
a) Fuel injector b) Electric motor
c) Clutch plate d) Carburetor

5) A hybrid electric vehicle uses _____.
a) Only solar energy
b) Only battery power
c) Internal combustion engine and electric motor
d) Steam engine and battery

6) SPCS stands for _____.
a) Solar Powered Charging System
b) Smart Power Control System
c) Series Power Charging Station
d) Solar Panel Current Source

7) E-Mobility refers to _____.
   a) Manual transportation
   b) Transportation using electric-powered systems
   c) Bicycle repair systems
   d) Petrol engine mobility

8) Vehicle kinetics mainly deals with _____.
   a) Vehicle color design
   b) Motion without considering forces
   c) Battery chemistry
   d) Charging connectors

9) Tractive effort is the _____.
   a) Cooling force of battery
   b) Force available at the wheels for motion
   c) Air resistance force
   d) Weight of the vehicle

10) The SI unit of power is _____.
   a) Newton
   b) Joule
   c) Watt
   d) Pascal

11) Connected mobility mainly uses _____.
   a) Internet and communication technologies
   b) Steam engines
   c) Mechanical brakes only
   d) Coal-powered systems

12) Which charging system combines AC and DC charging capability in one connector?
   a) CHAdeMO
   b) CCS
   c) Type-l only
   d) Tesla Roadster

13) Fuel economy in electric vehicles is generally measured in _____.
   a) Km/litre
   b) Watt only
   c) km per kWh
   d) Newton-meter

14) Powertrain component sizing in hybrid vehicles is important for _____.
   a) Decoration purposes
   b) Balancing performance and efficiency
   c) Increasing paint quality
   d) Reducing wheel size only

Instructions: 1) All questions are compulsory.
2) Figures to the right indicate full marks.

SECTION – I

Q.2 Attempt the following. (Any Four) **16**

a) Describe the major components of an electric vehicle.

b) Describe the present and future electric vehicle market.

c) State and explain Newton's laws of motion related to vehicles.

d) Explain propulsion power in electric vehicles.

e) Explain transmission requirements in electric vehicles.

f) Explain tractive effort during normal driving conditions.

Q.3 Attempt the following. (Any Two) **12**

a) Explain the history of electric vehicles.

b) Explain vehicle kinetics and its importance.

c) Explain different electric vehicle configurations.

SECTION – II

Q.4 Attempt the following. (Any Four) **16**

a) Explain parallel hybrid electric drive trains.

b) Explain mass analysis and packaging in hybrid vehicles.

c) Explain the social benefits of SPCSs.क्र

d) Explain energy storage systems used in EV charging

e) Explain the types of EV charging connectors.

f) Explain the concept of E-Mobility.

Q.5 Attempt the following. (Any Two) **12**

a) Explain the architecture of hybrid electric drive trains.

b) Explain the environmental and economic benefits of solar-powered charging systems.

c) Explain CCS and CHAdeMO charging systems.

MCQ/Objective Type Questions

Duration: 30 Minutes Marks:14

Q.1 Choose the correct Answer. **14**

1) Heating value of coal is approximately _____.
a) 1000-2000 kcal / kg b) 2000-4000 kcal / kg
c) 5000-6500 kcal / kg d) 9000-10,500 kcal / kg

2) Water gas is a mixture of _____.
a) CO_2 and O_2 b) O_2 and H_2
c) H_2, N_2 and O_2 d) CO, N_2 and H_2

3) Which of the following contributes to the improvement of efficiency of Rankine cycle in a thermal power plant?
a) Reheating of steam at intermediate stage
b) Regeneration use of steam for heating boiler feed water
c) Use of high pressures
d) All of the above

4) Steam pressures usually used in thermal power plants are _____.
a) 5 kg/cm^2 to 10 kg/cm^2 b) 50 kg/cm^2 to 100 kg/cm^2
c) 110 kg/cm^2 to 170 kg/cm^2 d) 200 kg/cm^2 to 215 kg/cm^2

5) Permissible pH value of water for boilers is _____.
a) 1 b) 7
c) slightly more than 7 d) 10

6) A condenser in a thermal power plant condenses steam combing out of _____.
a) Boiler b) Super-heater
c) Economizer d) Turbine

7) In a hydro-electric plant a conduct system for taking water from the intake works to the turbine is known as _____.

a) Dam
b) Reservoir
c) Penstock
d) Surge tank

8) A Pelton wheel is _____.

a) Inward flow impulse turbine
b) outward flow impulse turbine
c) inward flow rection turbine
d) axial flow impulse turbine

9) In a thermal power plant cooling towers are used to _____.

a) condense low pressure steam
b) cool condensed steam
c) cool water used in condenser for condensing steam
d) cool feed water of boiler

10) Major constituent of methane gas is?

a) CO
b) Methane
c) Oxygen
d) Hydrogen

11) The firing order of a four cylinder engine is _____.

a) 1-2-4-3
b) 1-4-2-3
c) 1-2-3-4
d) 1-3-2-4

12) The performance of engines of different HP, RPM and sizes can be compared based on _____.

a) specific fuel consumption
b) compression ratio
c) clearance volume
d) cylinder volume

13) In hydrothermal systems when steam, water and dissolved solids are available as source of energy, the entrained solids are removed by _____.

a) filters
b) centrifugal separators
c) strainers
d) None of the above

14) Tidal energy mainly makes use of _____.

a) kinetic energy of water
b) potential energy of water
c) both kinetic as well as potential energy of water
d) None of the above

Instructions: 1) All questions are compulsory.
2) Figures to the right indicate full marks.
3) Assume the suitable data wherever necessary.
4) Draw neat diagram whenever necessary.

SECTION – I

Q.2 Attempt Any Four of the following. **16**

a) Explain the Construction of Nuclear Power Station.

b) Explain the basic characteristics of Sunlight.

c) Discuss the rotor design and types wind generation.

d) Write short note on Environmental Impacts and Sustainability of conventional sources of power.

e) Explain control and monitoring system of wind generation.

Q.3 Attempt Any Two of the following. **12**

a) Explain solar power plant also draw the equivalent circuit diagram.

b) Explain the Components of Gas Turbine Power plants.

c) Explain with a neat sketch the working of a thermal electric power plant station and discuss the function of major components in it.

SECTION – II

Q.4 Attempt Any Four of the following. **16**

a) Explain the design of biomass power generation.

b) With neat sketches explain briefly the Tidal power plant.

c) Explain with a neat diagram of wind-disel generating power plant.

d) Write short note on Co-generation.

e) Explain performance analysis of Recycling Radio Waves.

Q.5 Attempt Any Two of the following. **12**

a) Write short note turbo Electric Nano generators.

b) Explain the Micro-hydel Power Plant with advantages and disadvantages.

c) State the merits and demerits OTEC and explain environmental aspects of OTEC System.

Set **Q**

S.Y. (B.Tech.) (Electrical Engineering) (Semester - I) (New) (NEP CBCS) Examination: March/April – 2026
Advanced and Sustainable Energy Sources (EEHn-01B)

Day & Date: Wednesday, 13-05-2026 Max. Marks: 70
Time: 03:00 PM To 06:00 PM

Instructions: 1) Q. No. 1 is compulsory. It should be solved in the first 30 minutes in Answer Book Page no 03 (Starting page of the Answer Book). Each question carries one mark.
2) Don't forget to Mention question paper set (P/Q/R/S) on top of page.
3) Figures to the right indicates full marks.
4) Assume suitable data whenever necessary and mention it clearly.

MCQ/Objective Type Questions

Duration: 30 Minutes Marks:14

Q.1 Choose the correct Answer. **14**

1) A Pelton wheel is _____.
a) Inward flow impulse turbine
b) outward flow impulse turbine
c) inward flow rection turbine
d) axial flow impulse turbine

2) In a thermal power plant cooling towers are used to _____.
a) condense low pressure steam
b) cool condensed steam
c) cool water used in condenser for condensing steam
d) cool feed water of boiler

3) Major constituent of methane gas is?
a) CO b) Methane
c) Oxygen d) Hydrogen

4) The firing order of a four cylinder engine is _____.
a) 1-2-4-3 b) 1-4-2-3
c) 1-2-3-4 d) 1-3-2-4

5) The performance of engines of different HP, RPM and sizes can be compared based on _____.
a) specific fuel consumption b) compression ratio
c) clearance volume d) cylinder volume

6) In hydrothermal systems when steam, water and dissolved solids are available as source of energy, the entrained solids are removed by _____.

a) filters
b) centrifugal separators
c) strainers
d) None of the above

7) Tidal energy mainly makes use of _____.

a) kinetic energy of water
b) potential energy of water
c) both kinetic as well as potential energy of water
d) None of the above

8) Heating value of coal is approximately _____.

a) 1000-2000 kcal / kg
b) 2000-4000 kcal / kg
c) 5000-6500 kcal / kg
d) 9000-10,500 kcal / kg

9) Water gas is a mixture of _____.

a) CO_2 and O_2
b) O_2 and H_2
c) H_2, N_2 and O_2
d) CO, N_2 and H_2

10) Which of the following contributes to the improvement of efficiency of Rankine cycle in a thermal power plant?

a) Reheating of steam at intermediate stage
b) Regeneration use of steam for heating boiler feed water
c) Use of high pressures
d) All of the above

11) Steam pressures usually used in thermal power plants are _____.

a) 5 kg/cm^2 to 10 kg/cm^2
b) 50 kg/cm^2 to 100 kg/cm^2
c) 110 kg/cm^2 to 170 kg/cm^2
d) 200 kg/cm^2 to 215 kg/cm^2

12) Permissible pH value of water for boilers is _____.

a) 1
b) 7
c) slightly more than 7
d) 10

13) A condenser in a thermal power plant condenses steam combing out of _____.

a) Boiler
b) Super-heater
c) Economizer
d) Turbine

14) In a hydro-electric plant a conduct system for taking water from the intake works to the turbine is known as _____.

a) Dam
b) Reservoir
c) Penstock
d) Surge tank

Instructions: 1) All questions are compulsory.
2) Figures to the right indicate full marks.
3) Assume the suitable data wherever necessary.
4) Draw neat diagram whenever necessary.

SECTION – I

Q.2 Attempt Any Four of the following. **16**

a) Explain the Construction of Nuclear Power Station.

b) Explain the basic characteristics of Sunlight.

c) Discuss the rotor design and types wind generation.

d) Write short note on Environmental Impacts and Sustainability of conventional sources of power.

e) Explain control and monitoring system of wind generation.

Q.3 Attempt Any Two of the following. **12**

a) Explain solar power plant also draw the equivalent circuit diagram.

b) Explain the Components of Gas Turbine Power plants.

c) Explain with a neat sketch the working of a thermal electric power plant station and discuss the function of major components in it.

SECTION – II

Q.4 Attempt Any Four of the following. **16**

a) Explain the design of biomass power generation.

b) With neat sketches explain briefly the Tidal power plant.

c) Explain with a neat diagram of wind-disel generating power plant.

d) Write short note on Co-generation.

e) Explain performance analysis of Recycling Radio Waves.

Q.5 Attempt Any Two of the following. **12**

a) Write short note turbo Electric Nano generators.

b) Explain the Micro-hydel Power Plant with advantages and disadvantages.

c) State the merits and demerits OTEC and explain environmental aspects of OTEC System.

Answer

Q.1 Solve following Multiple Choice Questions.

1) Value education enables us _____.
a) To understand our needs
b) Visualize our goals correctly
c) Indicate the direction for their fulfillment
d) All of the above

2) One of the basic desires of every human being is to be always _____.
a) Happy b) Sad
c) Laugh d) Earn Money

3) _____ is the basic unit of any human society.
a) Group b) Individual
c) Nature d) Society

4) Natural acceptance & _____ are the two processes of knowing.
a) Self -Actualization b) Self Exploration
c) Self Evaluation d) Self Control

5) Present Education system gives more focus to skills.
a) True b) False
c) May be d) None of the above

6) Value of an entity is _____.
a) Physical Facility
b) Prosperity
c) Its participation in larger order of which it is part
d) Both a and b

7) _____ are as Basic Human Aspirations.
a) Money
b) Relationship without money
c) Physical Facility
d) Continuous Happiness & Prosperity

8) Any course content on value education needs to be _____.
a) Universal b) Rational
c) Natural d) All of above

9) When we live with correct understanding of values, we feel _____.
a) Deprived b) Frustrated
c) Happy d) Unhappy

10) Following are the basic guidelines for value education except _____.
a) Universal b) Personal
c) Rational d) Natural

11) Please give the correct priority for Physical Facilities, Right Understanding and Relationship.
a) Physical Facilities, Right Understanding and Relationship
b) Relationship, Right Understanding and Physical Facilities
c) Right Understanding, Relationship and Physical Facilities
d) None of the above

12) Right Understanding and relationships lead to _____.
a) Mutual Happiness b) Mutual Prosperity
c) Both a and b d) All are wrong

13) Right Understanding and Physical Facilities leads to _____.
a) Mutual Happiness b) Mutual Prosperity
c) Both a and b d) All are wrong

14) ____ are the content of self-exploration.
a) Program b) Desire
c) Both a and b d) None of the above

15) To be in state of liking is _____.
a) Happy b) Unhappy
c) Both a and b d) None of the above

16) _____ helps the human being to transform from Animal consciousness to human consciousness.
a) Physical Facility b) Right understanding
c) Relationship d) All of above

17) _____ is only a means to achieve what is considered valuable for a human being in an effective and efficient manner.

a) Value b) Skill
c) Technology d) All of above

18) _____ means physical facilities more than to satisfy my needs.

a) Health b) Prosperity
c) Happiness d) None of above

19) If something is _____ to us, without any force or compulsion, then it is often correct and does not change with time and people.

a) naturally acceptable b) pushed
c) common d) None of above

20) Physical facilities are necessary and complete for _____.

a) Animal b) Human being
c) Nature d) All of the above

21) Beside physical facilities human being want _____.

a) Name b) Fame
c) Relationship d) None of the above

22) When you are living with pre-conditionings and accumulated desires without evaluating them, then it means that you are _____.

a) Swatantra b) Partantra
c) Prosperous d) None of the above

23) To be in state of _____ is unhappiness.

a) Disharmony b) Contradiction
c) Disharmony or contradiction d) None of the above

24) Which of following leads to variety of problems at different levels of our living?

a) Lack of right understanding of happiness
b) Lack of right understanding of prosperity
c) Lack of right understanding of happiness & prosperity
d) Lack of awareness towards health

25) Working only for physical facilities in living is called _____.

a) Animal Consciousness b) Human Consciousness
c) Rich Consciousness d) None of these

26) Self and _____ are different in nature, materiality, needs and activities.

a) Trust b) Body
c) Belief d) None of the above

27) Sukh and _____ both are needed and can't replace each other.

a) Self b) Body
c) Suvidha d) Belief

28) In value education Sanyama means _____.
a) Self-regulation b) Health
c) Happiness d) Prosperity

29) Sadupyog of the Body mean _____ of the Body.
a) Self-regulation b) Care
c) Happiness d) Right utilization

30) Knowing means having the _____.
a) Assumption b) Right understanding
c) Right feeling d) None of the above

31) Each human being is co-existence of the _____ and the _____.
a) self, self b) body, body
c) self, body d) None of the above

32) _____ is the feeling of responsibility for nurturing, protecting and right utilizing the body.
a) Swasthya b) Sanyam
c) Prosperity d) None of the above

33) The system of the body works in a _____ way.
a) Happy b) Self organized
c) Random d) Independent

34) The self is _____ in nature while body is _____ in nature.
a) Unconscious, Physico-chemical
b) Conscious, Physico-chemical
c) Physico-chemical, Conscious
d) Physico-chemical, Unconscious

35) The activity of desire, thought and expecting together is called as _____.
a) Body b) Health
c) Imagination d) Future

36) Harmony should be maintained in _____.
a) Between body and life
b) Between self and society
c) Between life and environment
d) All the above

37) Sah-astitva means _____.
a) Co-existence b) Co-operation
c) Co-ordination d) Corporate identity

38) The process of education and right living leads to _____ in the individual.

a) Right understanding b) Health
c) Prosperity d) None of the above

39) Ensuring justice in the relationship, on the basis of values leads to _____ in society.

a) Fearlessness b) Confusion
c) Confidence d) Fear

40) _____ is the foundational value in relationship.

a) Respect b) Love
c) Trust d) Glory

41) To be assured of others at all time is the feeling of _____.

a) Respect b) Love
c) Trust d) Glory

42) _____ is the feeling for someone who has made efforts for excellence.

a) Reverence b) Glory
c) Gratitude d) Guidance

43) _____ is the feeling of acceptance for those who have made efforts for my excellence.

a) Reverence b) Glory
c) Gratitude d) Guidance

44) The feeling of relatedness to all human beings is called _____.

a) Love b) Affection
c) Gratitude d) Respect

45) All the units of nature can be classified into _____ orders.

a) Two b) Three
c) Four d) Six

46) Which of the following does not form an order in nature?

a) Bio b) Animal
c) Consciousness d) Human

47) Which of the following statement is not true?

a) There is interconnectedness in nature
b) There is recyclability and self-regulation in nature
c) There is struggle for survival in nature
d) There is mutual fulfillment in nature

48) Harmony in the family is the building block for harmony in the _____.

a) society b) individual
c) friend d) relative

49) _____ in the family means that the family is able to identify its needs.

a) wealth
b) prosperity
c) harmony
d) happiness

50) _____ means right evaluation.

a) Respect
b) Love
c) Trust
d) Glory

a) Body b) Health
c) Imagination d) Future

16) Harmony should be maintained in _____.
a) Between body and life
b) Between self and society
c) Between life and environment
d) All the above

17) Sah-astitva means _____.
a) Co-existence b) Co-operation
c) Co-ordination d) Corporate identity

18) The process of education and right living leads to _____ in the individual.

a) Right understanding b) Health
c) Prosperity d) None of the above

19) Ensuring justice in the relationship, on the basis of values leads to _____ in society.

a) Fearlessness b) Confusion
c) Confidence d) Fear

20) _____ is the foundational value in relationship.

a) Respect b) Love
c) Trust d) Glory

21) To be assured of others at all time is the feeling of _____.

a) Respect b) Love
c) Trust d) Glory

22) _____ is the feeling for someone who has made efforts for excellence.

a) Reverence b) Glory
c) Gratitude d) Guidance

23) _____ is the feeling of acceptance for those who have made efforts for my excellence.

a) Reverence b) Glory
c) Gratitude d) Guidance

24) The feeling of relatedness to all human beings is called _____.

a) Love b) Affection
c) Gratitude d) Respect

25) All the units of nature can be classified into _____ orders.

a) Two b) Three
c) Four d) Six

26) Which of the following does not form an order in nature?

a) Bio b) Animal
c) Consciousness d) Human

27) Which of the following statement is not true?

a) There is interconnectedness in nature
b) There is recyclability and self-regulation in nature
c) There is struggle for survival in nature
d) There is mutual fulfillment in nature

28) Harmony in the family is the building block for harmony in the _____.

a) society b) individual
c) friend d) relative

29) _____ in the family means that the family is able to identify its needs.

a) wealth b) prosperity
c) harmony d) happiness

30) _____ means right evaluation.

a) Respect b) Love
c) Trust d) Glory

31) Value education enables us _____.

a) To understand our needs
b) Visualize our goals correctly
c) Indicate the direction for their fulfillment
d) All of the above

32) One of the basic desires of every human being is to be always _____.

a) Happy b) Sad
c) Laugh d) Earn Money

33) _____ is the basic unit of any human society.

a) Group b) Individual
c) Nature d) Society

34) Natural acceptance & _____ are the two processes of knowing.

a) Self -Actualization b) Self Exploration
c) Self Evaluation d) Self Control

35) Present Education system gives more focus to skills.

a) True b) False
c) May be d) None of the above

36) Value of an entity is _____.

a) Physical Facility
b) Prosperity
c) Its participation in larger order of which it is part
d) Both a and b

37) _____ are as Basic Human Aspirations.

a) Money
b) Relationship without money
c) Physical Facility
d) Continuous Happiness & Prosperity

38) Any course content on value education needs to be _____.

a) Universal b) Rational
c) Natural d) All of above

39) When we live with correct understanding of values, we feel _____.
a) Deprived b) Frustrated
c) Happy d) Unhappy

40) Following are the basic guidelines for value education except _____.
a) Universal b) Personal
c) Rational d) Natural

41) Please give the correct priority for Physical Facilities, Right Understanding and Relationship.
a) Physical Facilities, Right Understanding and Relationship
b) Relationship, Right Understanding and Physical Facilities
c) Right Understanding, Relationship and Physical Facilities
d) None of the above

42) Right Understanding and relationships lead to _____.
a) Mutual Happiness b) Mutual Prosperity
c) Both a and b d) All are wrong

43) Right Understanding and Physical Facilities leads to _____.
a) Mutual Happiness b) Mutual Prosperity
c) Both a and b d) All are wrong

44) ____ are the content of self-exploration.
a) Program b) Desire
c) Both a and b d) None of the above

45) To be in state of liking is _____.
a) Happy b) Unhappy
c) Both a and b d) None of the above

46) _____ helps the human being to transform from Animal consciousness to human consciousness.
a) Physical Facility b) Right understanding
c) Relationship d) All of above

47) _____ is only a means to achieve what is considered valuable for a human being in an effective and efficient manner.
a) Value b) Skill
c) Technology d) All of above

48) _____ means physical facilities more than to satisfy my needs.
a) Health b) Prosperity
c) Happiness d) None of above

49) If something is _____ to us, without any force or compulsion, then it is often correct and does not change with time and people.

a) naturally acceptable b) pushed
c) common d) None of above

50) Physical facilities are necessary and complete for _____.

a) Animal b) Human being
c) Nature d) All of the above

S.Y. (B.Tech.) (Electrical Engineering) (Semester - I) (New) (NEP CBCS) Examination: March/April – 2026
Universal Human Values (VEC-01)

Day & Date: Friday, 15-05-2026 Max. Marks: 50
Time: 03:00 PM To 04:30 PM

Instructions: 1) All questions are compulsory.
2) Figures to the right indicate full marks.
3) Mention Question Paper Set (P/Q/R/S) on Top of Page.

Answer

Q.1 Solve following Multiple Choice Questions.

1) To be assured of others at all time is the feeling of _____.
a) Respect b) Love
c) Trust d) Glory

2) _____ is the feeling for someone who has made efforts for excellence.
a) Reverence b) Glory
c) Gratitude d) Guidance

3) _____ is the feeling of acceptance for those who have made efforts for my excellence.
a) Reverence b) Glory
c) Gratitude d) Guidance

4) The feeling of relatedness to all human beings is called _____.
a) Love b) Affection
c) Gratitude d) Respect

5) All the units of nature can be classified into _____ orders.
a) Two b) Three
c) Four d) Six

6) Which of the following does not form an order in nature?
a) Bio b) Animal
c) Consciousness d) Human

7) Which of the following statement is not true?
a) There is interconnectedness in nature
b) There is recyclability and self-regulation in nature
c) There is struggle for survival in nature
d) There is mutual fulfillment in nature

8) Harmony in the family is the building block for harmony in the _____.
a) society b) individual
c) friend d) relative

9) _____ in the family means that the family is able to identify its needs.
a) wealth b) prosperity
c) harmony d) happiness

10) _____ means right evaluation.
a) Respect b) Love
c) Trust d) Glory

11) Value education enables us _____.
a) To understand our needs
b) Visualize our goals correctly
c) Indicate the direction for their fulfillment
d) All of the above

12) One of the basic desires of every human being is to be always _____.
a) Happy b) Sad
c) Laugh d) Earn Money

13) _____ is the basic unit of any human society.
a) Group b) Individual
c) Nature d) Society

14) Natural acceptance & _____ are the two processes of knowing.
a) Self -Actualization b) Self Exploration
c) Self Evaluation d) Self Control

15) Present Education system gives more focus to skills.
a) True b) False
c) May be d) None of the above

16) Value of an entity is _____.
a) Physical Facility
b) Prosperity
c) Its participation in larger order of which it is part
d) Both a and b

17) _____ are as Basic Human Aspirations.
a) Money
b) Relationship without money
c) Physical Facility
d) Continuous Happiness & Prosperity

18) Any course content on value education needs to be _____.
a) Universal b) Rational
c) Natural d) All of above

19) When we live with correct understanding of values, we feel _____.
a) Deprived b) Frustrated
c) Happy d) Unhappy

20) Following are the basic guidelines for value education except _____.
a) Universal b) Personal
c) Rational d) Natural

21) Please give the correct priority for Physical Facilities, Right Understanding and Relationship.
a) Physical Facilities, Right Understanding and Relationship
b) Relationship, Right Understanding and Physical Facilities
c) Right Understanding, Relationship and Physical Facilities
d) None of the above

22) Right Understanding and relationships lead to _____.
a) Mutual Happiness b) Mutual Prosperity
c) Both a and b d) All are wrong

23) Right Understanding and Physical Facilities leads to _____.
a) Mutual Happiness b) Mutual Prosperity
c) Both a and b d) All are wrong

24) ____ are the content of self-exploration.
a) Program b) Desire
c) Both a and b d) None of the above

25) To be in state of liking is _____.
a) Happy b) Unhappy
c) Both a and b d) None of the above

26) _____ helps the human being to transform from Animal consciousness to human consciousness.
a) Physical Facility b) Right understanding
c) Relationship d) All of above

27) _____ is only a means to achieve what is considered valuable for a human being in an effective and efficient manner.
a) Value b) Skill
c) Technology d) All of above

28) _____ means physical facilities more than to satisfy my needs.
a) Health b) Prosperity
c) Happiness d) None of above

29) If something is _____ to us, without any force or compulsion, then it is often correct and does not change with time and people.
a) naturally acceptable b) pushed
c) common d) None of above

30) Physical facilities are necessary and complete for _____.
a) Animal b) Human being
c) Nature d) All of the above

31) Beside physical facilities human being want _____.
a) Name b) Fame
c) Relationship d) None of the above

32) When you are living with pre-conditionings and accumulated desires without evaluating them, then it means that you are _____.
a) Swatantra b) Partantra
c) Prosperous d) None of the above

33) To be in state of _____ is unhappiness.
a) Disharmony b) Contradiction
c) Disharmony or contradiction d) None of the above

34) Which of following leads to variety of problems at different levels of our living?
a) Lack of right understanding of happiness
b) Lack of right understanding of prosperity
c) Lack of right understanding of happiness & prosperity
d) Lack of awareness towards health

35) Working only for physical facilities in living is called _____.
a) Animal Consciousness b) Human Consciousness
c) Rich Consciousness d) None of these

36) Self and _____ are different in nature, materiality, needs and activities.
a) Trust b) Body
c) Belief d) None of the above

37) Sukh and _____ both are needed and can't replace each other.
a) Self b) Body
c) Suvidha d) Belief

38) In value education Sanyama means _____.
a) Self-regulation b) Health
c) Happiness d) Prosperity

39) Sadupyog of the Body mean _____ of the Body.
a) Self-regulation b) Care
c) Happiness d) Right utilization

40) Knowing means having the _____.
a) Assumption b) Right understanding
c) Right feeling d) None of the above

41) Each human being is co-existence of the _____ and the _____.
a) self, self b) body, body
c) self, body d) None of the above

42) _____ is the feeling of responsibility for nurturing, protecting and right utilizing the body.
a) Swasthya b) Sanyam
c) Prosperity d) None of the above

43) The system of the body works in a _____ way.
a) Happy b) Self organized
c) Random d) Independent

44) The self is _____ in nature while body is _____ in nature.
a) Unconscious, Physico-chemical
b) Conscious, Physico-chemical
c) Physico-chemical, Conscious
d) Physico-chemical, Unconscious

45) The activity of desire, thought and expecting together is called as _____.
a) Body b) Health
c) Imagination d) Future

46) Harmony should be maintained in _____.
a) Between body and life
b) Between self and society
c) Between life and environment
d) All the above

47) Sah-astitva means _____.
a) Co-existence b) Co-operation
c) Co-ordination d) Corporate identity

48) The process of education and right living leads to _____ in the individual.
a) Right understanding b) Health
c) Prosperity d) None of the above

49) Ensuring justice in the relationship, on the basis of values leads to _____ in society.

a) Fearlessness b) Confusion

c) Confidence d) Fear

50) _____ is the foundational value in relationship.

a) Respect b) Love

c) Trust d) Glory

8) _____ means physical facilities more than to satisfy my needs.
a) Health b) Prosperity
c) Happiness d) None of above

9) If something is _____ to us, without any force or compulsion, then it is often correct and does not change with time and people.
a) naturally acceptable b) pushed
c) common d) None of above

10) Physical facilities are necessary and complete for _____.
a) Animal b) Human being
c) Nature d) All of the above

11) Beside physical facilities human being want _____.
a) Name b) Fame
c) Relationship d) None of the above

12) When you are living with pre-conditionings and accumulated desires without evaluating them, then it means that you are _____.
a) Swatantra b) Partantra
c) Prosperous d) None of the above

13) To be in state of _____ is unhappiness.
a) Disharmony b) Contradiction
c) Disharmony or contradiction d) None of the above

14) Which of following leads to variety of problems at different levels of our living?
a) Lack of right understanding of happiness
b) Lack of right understanding of prosperity
c) Lack of right understanding of happiness & prosperity
d) Lack of awareness towards health

15) Working only for physical facilities in living is called _____.
a) Animal Consciousness b) Human Consciousness
c) Rich Consciousness d) None of these

16) Self and _____ are different in nature, materiality, needs and activities.
a) Trust b) Body
c) Belief d) None of the above

17) Sukh and _____ both are needed and can't replace each other.
a) Self b) Body
c) Suvidha d) Belief

18) In value education Sanyama means _____.

a) Self-regulation b) Health
c) Happiness d) Prosperity

19) Sadupyog of the Body mean _____ of the Body.

a) Self-regulation b) Care
c) Happiness d) Right utilization

20) Knowing means having the _____.

a) Assumption b) Right understanding
c) Right feeling d) None of the above

21) Each human being is co-existence of the _____ and the _____.

a) self, self b) body, body
c) self, body d) None of the above

22) _____ is the feeling of responsibility for nurturing, protecting and right utilizing the body.

a) Swasthya b) Sanyam
c) Prosperity d) None of the above

23) The system of the body works in a _____ way.

a) Happy b) Self organized
c) Random d) Independent

24) The self is _____ in nature while body is _____ in nature.

a) Unconscious, Physico-chemical
b) Conscious, Physico-chemical
c) Physico-chemical, Conscious
d) Physico-chemical, Unconscious

25) The activity of desire, thought and expecting together is called as _____.

a) Body b) Health
c) Imagination d) Future

26) Harmony should be maintained in _____.

a) Between body and life
b) Between self and society
c) Between life and environment
d) All the above

27) Sah-astitva means _____.

a) Co-existence b) Co-operation
c) Co-ordination d) Corporate identity

28) The process of education and right living leads to _____ in the individual.

a) Right understanding b) Health
c) Prosperity d) None of the above

29) Ensuring justice in the relationship, on the basis of values leads to _____ in society.

a) Fearlessness b) Confusion
c) Confidence d) Fear

30) _____ is the foundational value in relationship.

a) Respect b) Love
c) Trust d) Glory

31) To be assured of others at all time is the feeling of _____.

a) Respect b) Love
c) Trust d) Glory

32) _____ is the feeling for someone who has made efforts for excellence.

a) Reverence b) Glory
c) Gratitude d) Guidance

33) _____ is the feeling of acceptance for those who have made efforts for my excellence.

a) Reverence b) Glory
c) Gratitude d) Guidance

34) The feeling of relatedness to all human beings is called _____.

a) Love b) Affection
c) Gratitude d) Respect

35) All the units of nature can be classified into _____ orders.

a) Two b) Three
c) Four d) Six

36) Which of the following does not form an order in nature?

a) Bio b) Animal
c) Consciousness d) Human

37) Which of the following statement is not true?

a) There is interconnectedness in nature
b) There is recyclability and self-regulation in nature
c) There is struggle for survival in nature
d) There is mutual fulfillment in nature

38) Harmony in the family is the building block for harmony in the _____.

a) society b) individual
c) friend d) relative

39) _____ in the family means that the family is able to identify its needs.

a) wealth b) prosperity
c) harmony d) happiness

40) _____ means right evaluation.

a) Respect b) Love
c) Trust d) Glory

41) Value education enables us _____.

a) To understand our needs
b) Visualize our goals correctly
c) Indicate the direction for their fulfillment
d) All of the above

42) One of the basic desires of every human being is to be always _____.

a) Happy b) Sad
c) Laugh d) Earn Money

43) _____ is the basic unit of any human society.

a) Group b) Individual
c) Nature d) Society

44) Natural acceptance & _____ are the two processes of knowing.

a) Self -Actualization b) Self Exploration
c) Self Evaluation d) Self Control

45) Present Education system gives more focus to skills.

a) True b) False
c) May be d) None of the above

46) Value of an entity is _____.

a) Physical Facility
b) Prosperity
c) Its participation in larger order of which it is part
d) Both a and b

47) _____ are as Basic Human Aspirations.

a) Money
b) Relationship without money
c) Physical Facility
d) Continuous Happiness & Prosperity

48) Any course content on value education needs to be _____.

a) Universal b) Rational
c) Natural d) All of above

49) When we live with correct understanding of values, we feel _____.

a) Deprived b) Frustrated

c) Happy d) Unhappy

50) Following are the basic guidelines for value education except _____.

a) Universal b) Personal

c) Rational d) Natural

Day & Date: Monday, 04-05-2026 Max. Marks: 70
Time: 03:00 PM To 06:00 PM

Instructions: 1) Q. No. 1 is compulsory. It should be solved in the first 30 minutes in Answer Book Page no 03 (Starting page of the Answer Book). Each question carries one mark.
2) Don't forget to Mention question paper set (P/Q/R/S) on top of page.
3) Figures to the right indicates full marks.

MCQ/Objective Type Questions

Duration: 30 Minutes Marks:14

Q.1 Choose the correct alternative from the options. 14

1) $\frac{1}{D-a}X$ is equal to _____.

a) $\int Xe^{ax}dx$ b) $\int Xe^{-ax}dx$

c) $e^{ax}\int Xe^{-ax}\,dx$ d) $e^{-ax}\int Xe^{ax}\,dx$

2) $\frac{1}{D^2}\,X^3$ equal to _____.

a) $e^x.x^2$ b) $e^{-x}.x^3$

c) $e^x\left[x^2+\frac{x^3}{3}\right]$ d) $\frac{x^5}{20}$

3) The solution of $x^2\frac{d^2y}{dx^2}+x\frac{dy}{dx}=0$ is _____.

a) $y=c_1+c_2x$ b) $y=c_1+c_2e^x$

c) $y=c_1+c_2e^{-x}$ d) $y=c_1+c_2\log x$

4) The Laplace Transform of $t\sin t$ is _____.

a) $\frac{-2s}{s^2+1}$ b) $\frac{-2s}{(s^2+1)^2}$

c) $\frac{2s}{s^2+1}$ d) $\frac{2s}{(s^2+1)^2}$

5) The value if integral $\int_0^\infty e^{-st}\sin t\,dt\ is$ _____.

a) $\frac{1}{s^2-1^2}$ b) $\frac{1}{s^2+1^2}$

c) $\frac{1}{s^2+2^2}$ d) $\frac{1}{s^2-2^2}$

6) $L^{-1}\left(\frac{1}{s}\right)$ _____

a) $\frac{1}{t}$ b) 1

c) 0 d) $\frac{-1}{t}$

7) $L^{-1}\left[\frac{1}{(s+2)^2}\right]$_____

a) $e^{-2t}.t$ b) $\frac{e^{-2t}}{t}$

c) $e^{2t}.t$ d) None of these

8) The solution of $pq = 1$ is _____.

a) $z = ax + \frac{1}{a}y + c$ b) $z = ax + ay + c$

c) $z = ax + by + c$ d) $z = ax + \frac{1}{b}y + c$

9) The solution of $q = 3p^2$ is _____.

a) $z = ax + 3a^2y + c$ b) $z = 3ax + a^2y + c$

c) $z = 3ax^2 + by$ d) None of these

10) If $z\{f(k)\} = F(z)$ then $z\{a^k f(k)\} =$ _____.

a) $F\left(\frac{a}{z}\right)$ b) $F\left(\frac{z}{a}\right)$

c) $\frac{1}{a}F\left(\frac{z}{a}\right)$ d) None of these

11) $Z\{1\} =$ _____.

a) $\frac{1}{z-1}$ b) $\frac{z}{z-1}$

c) $\frac{1}{z+1}$ d) $\frac{Z}{z+1}$

12) If the function is an analytic in connected region C, $\int_C f(z)dz =$ _____

a) 0 b) $2\pi i$

c) $-2\pi i$ d) $4\pi i$

13) The Cauchy integral formula $\int \frac{f(z)}{(z-z_0)^n} dz$ is _____.

a) $\frac{2\pi i}{(n+1)!} f^{n+1}(z_0)$ b) $\frac{2\pi i}{n!} f^{n}(z_0)$

c) $\frac{2\pi i}{(n-1)!} f^{n-1}(z_0)$ d) None of these

14) The inverse Z transform of $\frac{z}{z-a}$, $|z| > a$ _____.

a) a^{-k} b) a^{k+1}

c) a^{k} d) a^{-k-1}

Set **P**

S.Y. (B.Tech.) (Electrical Engineering) (Semester - I) (CBCS)
Examination: March/April – 2026
Engineering Mathematics – III (BTN07301)

Day & Date: Monday, 04-05-2026 Max. Marks: 56
Time: 03:00 PM To 06:00 PM

Instructions: 1) All questions are compulsory.
2) Figures to the right indicate full marks.

Section – I

Q.2 Attempt any three questions. **09**

a) $(D^2 - 7D + 12)y = e^{2x}$

b) $(D^2 - 5D + 6)y = \sin 3x$

c) $(D^2 + 4)y = x \sin x$

d) $x^2 \dfrac{d^2y}{dx^2} - 2x \dfrac{dy}{dx} - 4y = x^4$

e) $(1 + x)^2 \dfrac{d^2y}{dx^2} + (1 + x) \dfrac{dy}{dx} + y = 2 \sin \log(1 + x)$

Q.3 Attempt Any Three questions. **09**

a) $L[4t^2 + \sin 3t + e^{2t}]$

b) $L[e^{2t} + \sin^3 t]$

c) Find Laplace Transform of $\int_0^\infty \dfrac{\sin t}{t} dt = \dfrac{\pi}{2}$

d) Find inverse Laplace Transform of $L^{-1}\left[\frac{s+29}{(s+4)(s^2+9)}\right]$

e) Find inverse Laplace Transform of $L^{-1}\left[\frac{4s+12}{(s^2-8s+16}\right]$

Q.4 Attempt Any Two questions. **10**

a) $(D^2 + 6D + 9)y = \dfrac{e^{-3x}}{1 + x^2}$

b) In LC Circuit, the charge q on a plate of condenser is given by $\frac{d^2q}{dt^2} + \frac{q}{CL} = \frac{E}{L} \sin nt$, prove that the charge at any time t is given by $q = \frac{E}{2Ln^2} (\sin nt - nt \cos nt)\ n^2 = \frac{1}{LC}$

c) Find inverse Laplace Transform by convolution theorem $\frac{1}{(s+3)(s-1)}$

Section – II

Q.5 Attempt Any Three questions. **09**

a) Solve $p^2 + q^2 = z$

b) Sove $p^2 + q^2 = x + y$

c) Evaluate $\int_c \frac{z+6}{z^2-4} dz$ where c is circle given by $|z-2| = 1$.

d) Show that $\int_c \log z dz = 2\pi i$ where c is unit the z-plane

e) Find $z\{a^{|k|}\}$

Q.6 Attempt Any Three questions. **09**

a) Solve $Pe^y = qe^x$

b) Solve $pq = x^4 y^3 z^4$

c) Evaluate $\int_0^{1+i} (x - y + ix^2)\, dz$ along the line from $z = 0$ to $z = 1 + i$

d) Evaluate $\int_c \frac{z+2}{(z-3)(z-4)} dz$ where C is circle $|Z| = 1$

e) Find $z\{(k+1)a^k\}, k \geq 0$

Q.7 Attempt Any Two questions. **10**

a) Solve the partial differential equation
$3x\frac{\partial z}{\partial x} - 5y\frac{\partial z}{\partial y} = 0$ by method of separation of variable.

b) Find the inverse Z transform of $F(z) = \frac{z}{(z-1)(z-2)}, |z| > 2$

c) Evaluate $\int_c \frac{e^{2z}}{(z+1)^4} dz, |z| = 2$

MCQ/Objective Type Questions

Duration: 30 Minutes Marks:14

Q.1 Choose the correct alternative from the options. **14**

1) The solution of $pq = 1$ is _____.

a) $z = ax + \frac{1}{a}y + c$ b) $z = ax + ay + c$

c) $z = ax + by + c$ d) $z = ax + \frac{1}{b}y + c$

2) The solution of $q = 3p^2$ is _____.

a) $z = ax + 3a^2y + c$ b) $z = 3ax + a^2y + c$

c) $z = 3ax^2 + by$ d) None of these

3) If $z\{f(k)\} = F(z)$ then $z\{a^k f(k)\} =$ _____.

a) $F\left(\frac{a}{z}\right)$ b) $F\left(\frac{z}{a}\right)$

c) $\frac{1}{a}F\left(\frac{z}{a}\right)$ d) None of these

4) $Z\{1\} =$ _____.

a) $\frac{1}{z-1}$ b) $\frac{z}{z-1}$

c) $\frac{1}{z+1}$ d) $\frac{Z}{z+1}$

5) If the function is an analytic in connected region C, $\int_C f(z)dz =$ _____

a) 0 b) $2\pi i$

c) $-2\pi i$ d) $4\pi i$

6) The Cauchy integral formula $\int \frac{f(z)}{(z-z_0)^n} dz$ is _____.

a) $\frac{2\pi i}{(n+1)!} f^{n+1}(z_0)$ b) $\frac{2\pi i}{n!} f^{n}(z_0)$

c) $\frac{2\pi i}{(n-1)!} f^{n-1}(z_0)$ d) None of these

7) The inverse Z transform of $\frac{z}{z-a}$, $|z| > a$ _____.

a) a^{-k} b) a^{k+1}

c) a^{k} d) a^{-k-1}

8) $\frac{1}{D-a} X$ is equal to _____.

a) $\int X e^{ax} dx$ b) $\int X e^{-ax} dx$

c) $e^{ax} \int X e^{-ax}\, dx$ d) $e^{-ax} \int X e^{ax}\, dx$

9) $\frac{1}{D^2}\, X^3$ equal to _____.

a) $e^{x}.x^{2}$ b) $e^{-x}.x^{3}$

c) $e^{x}\left[x^{2} + \frac{x^{3}}{3}\right]$ d) $\frac{x^{5}}{20}$

10) The solution of $x^2 \frac{d^2y}{dx^2} + x\frac{dy}{dx} = 0$ is _____.

a) $y = c_1 + c_2 x$ b) $y = c_1 + c_2 e^{x}$

c) $y = c_1 + c_2 e^{-x}$ d) $y = c_1 + c_2 \log x$

11) The Laplace Transform of $t \sin t$ is _____.

a) $\frac{-2s}{s^2+1}$ b) $\frac{-2s}{(s^2+1)^2}$

c) $\frac{2s}{s^2+1}$ d) $\frac{2s}{(s^2+1)^2}$

12) The value if integral $\int_0^{\infty} e^{-st} \sin t\, dt\, is$ _____.

a) $\frac{1}{s^2-1^2}$ b) $\frac{1}{s^2+1^2}$

c) $\frac{1}{s^2+2^2}$ d) $\frac{1}{s^2-2^2}$

13) $L^{-1}\left(\frac{1}{s}\right)$ _____

a) $\frac{1}{t}$ b) 1

c) 0 d) $\frac{-1}{t}$

14) $L^{-1}\left[\frac{1}{(s+2)^2}\right]$ ———

a) $e^{-2t}.t$

b) $\frac{e^{-2t}}{t}$

c) $e^{2t}.t$

d) None of these

Set **Q**

S.Y. (B.Tech.) (Electrical Engineering) (Semester - I) (CBCS)
Examination: March/April – 2026
Engineering Mathematics – III (BTN07301)

Day & Date: Monday, 04-05-2026 Max. Marks: 56
Time: 03:00 PM To 06:00 PM

Instructions: 1) All questions are compulsory.
2) Figures to the right indicate full marks.

Section – I

Q.2 Attempt any three questions. **09**

a) $(D^2 - 7D + 12)y = e^{2x}$

b) $(D^2 - 5D + 6)y = \sin 3x$

c) $(D^2 + 4)y = x \sin x$

d) $x^2 \dfrac{d^2y}{dx^2} - 2x \dfrac{dy}{dx} - 4y = x^4$

e) $(1 + x)^2 \dfrac{d^2y}{dx^2} + (1 + x) \dfrac{dy}{dx} + y = 2 \sin \log(1 + x)$

Q.3 Attempt Any Three questions. **09**

a) $L[4t^2 + \sin 3t + e^{2t}]$

b) $L[e^{2t} + \sin^3 t]$

c) Find Laplace Transform of $\int_0^\infty \dfrac{\sin t}{t} dt = \dfrac{\pi}{2}$

d) Find inverse Laplace Transform of $L^{-1}\left[\frac{s+29}{(s+4)(s^2+9)}\right]$

e) Find inverse Laplace Transform of $L^{-1}\left[\frac{4s+12}{(s^2-8s+16}\right]$

Q.4 Attempt Any Two questions. **10**

a) $(D^2 + 6D + 9)y = \dfrac{e^{-3x}}{1 + x^2}$

b) In LC Circuit, the charge q on a plate of condenser is given by $\frac{d^2q}{dt^2} + \frac{q}{CL} = \frac{E}{L} \sin nt$, prove that the charge at any time t is given by $q = \frac{E}{2Ln^2} (\sin nt - nt \cos nt)\ n^2 = \frac{1}{LC}$

c) Find inverse Laplace Transform by convolution theorem $\frac{1}{(s+3)(s-1)}$

Section – II

Q.5 Attempt Any Three questions. **09**

a) Solve $p^2 + q^2 = z$

b) Sove $p^2 + q^2 = x + y$

c) Evaluate $\int_c \frac{z+6}{z^2-4} dz$ where c is circle given by $|z-2| = 1$.

d) Show that $\int_c \log z dz = 2\pi i$ where c is unit the z-plane

e) Find $z\{a^{|k|}\}$

Q.6 Attempt Any Three questions. **09**

a) Solve $Pe^y = qe^x$

b) Solve $pq = x^4 y^3 z^4$

c) Evaluate $\int_0^{1+i} (x - y + ix^2)\, dz$ along the line from $z = 0$ to $z = 1 + i$

d) Evaluate $\int_c \frac{z+2}{(z-3)(z-4)} dz$ where C is circle $|Z| = 1$

e) Find $z\{(k+1)a^k\}, k \geq 0$

Q.7 Attempt Any Two questions. **10**

a) Solve the partial differential equation
$3x\frac{\partial z}{\partial x} - 5y\frac{\partial z}{\partial y} = 0$ by method of separation of variable.

b) Find the inverse Z transform of $F(z) = \frac{z}{(z-1)(z-2)}, |z| > 2$

c) Evaluate $\int_c \frac{e^{2z}}{(z+1)^4} dz, |z| = 2$

2) Don't forget to Mention question paper set (P/Q/R/S) on top of page.
3) Figures to the right indicates full marks.

MCQ/Objective Type Questions

Duration: 30 Minutes Marks:14

Q.1 Choose the correct alternative from the options. **14**

1) $Z\{1\} =$ _____.

a) $\frac{1}{z-1}$ b) $\frac{z}{z-1}$

c) $\frac{1}{z+1}$ d) $\frac{Z}{z+1}$

2) If the function is an analytic in connected region C, $\int_C f(z)dz =$ _____

a) 0 b) $2\pi i$

c) $-2\pi i$ d) $4\pi i$

3) The Cauchy integral formula $\int \frac{f(z)}{(z-z_0)^n} dz$ is _____.

a) $\frac{2\pi i}{(n+1)!} f^{n+1}(z_0)$ b) $\frac{2\pi i}{n!} f^{n}(z_0)$

c) $\frac{2\pi i}{(n-1)!} f^{n-1}(z_0)$ d) None of these

4) The inverse Z transform of $\frac{z}{z-a}$, $|z| > a$ _____.

a) a^{-k} b) a^{k+1}

c) a^{k} d) a^{-k-1}

5) $\frac{1}{D-a} X$ is equal to _____.

a) $\int Xe^{ax}dx$ b) $\int Xe^{-ax}dx$

c) $e^{ax}\int Xe^{-ax}\,dx$ d) $e^{-ax}\int Xe^{ax}\,dx$

6) $\frac{1}{D^2}\ X^3$ equal to _____.

a) $e^x.x^2$ b) $e^{-x}.x^3$

c) $e^x\left[x^2+\frac{x^3}{3}\right]$ d) $\frac{x^5}{20}$

7) The solution of $x^2\frac{d^2y}{dx^2}+x\frac{dy}{dx}=0$ is _____.

a) $y=c_1+c_2x$ b) $y=c_1+c_2e^x$

c) $y=c_1+c_2e^{-x}$ d) $y=c_1+c_2\log x$

8) The Laplace Transform of $t\sin t$ is _____.

a) $\frac{-2s}{s^2+1}$ b) $\frac{-2s}{(s^2+1)^2}$

c) $\frac{2s}{s^2+1}$ d) $\frac{2s}{(s^2+1)^2}$

9) The value if integral $\int_0^\infty e^{-st}\sin t\ dt\ is$ _____.

a) $\frac{1}{s^2-1^2}$ b) $\frac{1}{s^2+1^2}$

c) $\frac{1}{s^2+2^2}$ d) $\frac{1}{s^2-2^2}$

10) $L^{-1}\left(\frac{1}{s}\right)$ _____

a) $\frac{1}{t}$ b) 1

c) 0 d) $\frac{-1}{t}$

11) $L^{-1}\left[\frac{1}{(s+2)^2}\right]$ _____

a) $e^{-2t}.t$ b) $\frac{e^{-2t}}{t}$

c) $e^{2t}.t$ d) None of these

12) The solution of $pq=1$ is _____.

a) $z=ax+\frac{1}{a}y+c$ b) $z=ax+ay+c$

c) $z=ax+by+c$ d) $z=ax+\frac{1}{b}y+c$

13) The solution of $q = 3p^2$ is _____.

a) $z = ax + 3a^2y + c$ b) $z = 3ax + a^2y + c$

c) $z = 3ax^2 + by$ d) None of these

14) If $z\{f(k)\} = F(z)$ then $z\{a^k f(k)\} =$ _____.

a) $F\left(\frac{a}{z}\right)$ b) $F\left(\frac{z}{a}\right)$

c) $\frac{1}{a}F\left(\frac{z}{a}\right)$ d) None of these

MCQ/Objective Type Questions

Duration: 30 Minutes Marks:14

Q.1 Choose the correct alternative from the options. 14

1) $L^{-1}\left(\frac{1}{s}\right)$ _____

a) $\frac{1}{t}$ b) 1

c) 0 d) $\frac{-1}{t}$

2) $L^{-1}\left[\frac{1}{(s+2)^2}\right]$ _____

a) $e^{-2t}.t$ b) $\frac{e^{-2t}}{t}$

c) $e^{2t}.t$ d) None of these

3) The solution of $pq = 1$ is _____.

a) $z = ax + \frac{1}{a}y + c$ b) $z = ax + ay + c$

c) $z = ax + by + c$ d) $z = ax + \frac{1}{b}y + c$

4) The solution of $q = 3p^2$ is _____.

a) $z = ax + 3a^2y + c$ b) $z = 3ax + a^2y + c$

c) $z = 3ax^2 + by$ d) None of these

5) If $z\{f(k)\} = F(z)$ then $z\{a^k f(k)\} =$ _____.

a) $F\left(\frac{a}{z}\right)$ b) $F\left(\frac{z}{a}\right)$

c) $\frac{1}{a}F\left(\frac{z}{a}\right)$ d) None of these

MCQ/Objective Type Questions

Duration: 30 Minutes Marks:14

Q.1 Choose the correct answer. **14**

1) The process of building up voltage in a DC shunt generator depends on: _____.
a) Residual magnetism b) Armature resistance
c) Load current d) Supply voltage

2) Armature reaction in a DC generator causes: _____.
a) Increase in terminal voltage b) Reduction in main flux
c) Increase in flux per pole d) Speed increase

3) A 6-pole lap-wound generator has 720 conductors and generates 240 V at 1000 rpm. Find the flux per pole?
a) 0.02 Wb b) 0.04 Wb
c) 0.05 Wb d) 0.01 Wb

4) The back e.m.f. in a DC motor is directly proportional to: _____.
a) Armature current b) Speed and flux
c) Supply voltage d) Field resistance

5) A 220 V DC shunt motor takes 25 A at full load. Armature resistance $= 0.5\ \Omega$, field current = 2 A. Calculate back e.m.f. _____.
a) 210 V b) 208 V
c) 195 V d) 215 V

6) In a brake test on a DC motor, which parameters are determined?
a) Efficiency and torque b) Speed only
c) Voltage regulation d) Power factor

7) The Swinburne's test is a: _____.
a) Direct test
b) Indirect test
c) Short-circuit test
d) Open-circuit test

8) The e.m.f. per turn in primary and secondary windings of an ideal transformer are: _____.
a) Unequal
b) Equal
c) Inversely proportional to current
d) Depends on load

9) A 1-phase transformer has 400 turns on the primary and 100 on the secondary. If the primary voltage is 200 V, find the secondary voltage?
a) 25 V
b) 50 V
c) 100 V
d) 500 V

10) The condition for maximum efficiency of a transformer is: _____.
a) Copper loss = Iron loss
b) Copper loss < Iron loss
c) Copper loss > Iron loss
d) No copper loss

11) An auto-transformer is preferred over a two-winding transformer because: _____.
a) It has higher leakage reactance
b) It is cheaper, lighter, and more efficient
c) It provides isolation
d) It reduces efficiency

12) In a delta-star ($\Delta - Y$) connected transformer, the line voltage ratio is related to the turns ratio by: _____.
a) Equal to turns ratio
b) $\sqrt{3}$ times turns ratio
c) Turns ratio divided by $\sqrt{3}$
d) Independent of turns ratio

13) The zig-zag connection in a three-phase transformer is primarily used to: _____.
a) Improve voltage regulation
b) Reduce harmonic voltages and provide a neutral point
c) Increase the efficiency
d) Provide isolation between windings

14) When a $\mathrm{V} - \mathrm{V}$ system is converted into a $\Delta - \Delta$ system, an increase in capacity of the system is _____ percent.
a) 86.6
b) 66.7
c) 73.2
d) 50

2) Figures to the right indicate full marks.
3) Draw neat diagrams whenever necessary.
4) Assume suitable data if necessary.

SECTION – I

Q.2 Attempt Any Four of the following. **16**

a) Derive an expression for cross-magnetizing and demagnetizing Ampere Turns due to armature reaction in DC machine.

b) Derive an emf equation of DC generator.

c) A series generator delivers a current of 100 A at 250 V. Its armature and series field resistances are $0.1\ \Omega$ and $0.055\ \Omega$ respectively. Find:
i) Armature current
ii) Generated e.m.f.

d) With help of neat diagram explain speed control methods of dc shunt motor.

e) With a neat sketch explain the Hopkinson's test for dc motor.

f) A DC Shunt motor designed to operate on 500 V supply takes full load current of 42 A and runs at 800 rpm. The flux per pole is reduced to 75% of its normal value. Calculate the speed of the motor if the total torque exerted on the armature is
i) unchanged
ii) reduced by 20%. The armature resistance is $0.6\ \Omega$ and the total voltage loss at the brushes is 2V.

Q.3 Attempt the following questions. **12**

a) What is the necessity of a starter? Explain the 3-point starter with a neat diagram.

b) The open circuit characteristic (O.C.C.) of a separately excited generator, at 600 r.p.m., is as under:

Field Current, A:	1.6	3.2	4.8	6.4	8.0	9.6	11.2
E.m.f.:	148	285	390	460	520	560	590

Find:
i) The voltage to which the machine will excite as a shunt generator with a field circuit resistance of 60 ohms,
ii) The critical resistance at this speed.

OR

b) The brake test on a DC shunt motor gave the following results: tensions on two sides of the brake were 10 kg and 35 kg, radius of pulley 20 cm, speed 950 rpm, Input current was 30 A at 200V. Find:

i) Output torque
ii) Output power
iii) Input power
iv) Efficiency

SECTION – II

Q.4 Attempt Any Four of the following. **16**

a) What are the losses that occur in the transformer, how they vary with load, and how can be minimized?

b) A 40KVA transformer has an iron loss of 450W and a full load copper loss of 850W. If the power factor of the load is 0.8 lagging, calculate:

i) Full load efficiency
ii) kVA load at which maximum efficiency occurs
iii) the maximum efficiency.

c) Write a short note on the autotransformer.

d) A Single-phase 200 kVA, 3300/230-volt, 50 Hz. The transformer carries 100 turns on its secondary. What will be its

i) primary and secondary current on full load;
ii) the maximum value of flux;
iii) the number of primary turns.

e) With a neat sketch, explain the $\Delta - Y$ connection of a $3 - \phi$ transformer.

f) With a neat sketch, explain the construction and working of a single-phase transformer.

Q.5 Attempt Any Two of the following. **12**

a) With the help of a neat diagram explain Scott's connection of three phase transformer.

b) The following data for 10 KVA, 450/120 V, 50 Hz transformer were obtained from OC and SC test. OC Test: V1 = 130 V, I1 = 5 A, W1 = 100 W SC Test: V1 = 10 V, I1 = 25 A, W1 = 140 W, Calculate:

i) Equivalent circuit constants
ii) Efficiency at full load 0.8 lagging power factor
iii) Efficiency at half load 0.8 lagging power factor

c) Two single-phase transformers with equal voltage ratio have an impedance of (0.4+3i) and (0.5+2i) with respect to secondary, if they operate in parallel, determine how they share a total load of 200KW, at 0.8 lag pf.

Set Q

S.Y. (B.Tech.) (Electrical Engineering) (Sem - I) (CBCS)
Examination: March/April – 2026
Electrical Machines – I (BTN07302)

Day & Date: Wednesday, 06-05-2026 Max. Marks: 70
Time: 03:00 PM To 06:00 PM

Instructions: 1) Q. No. 1 is compulsory. It should be solved in the first 30 minutes in Answer Book Page no 03 (Starting page of the Answer Book). Each question carries one mark
2) Don't forget to Mention question paper set (P/Q/R/S) on top on page.
3) Figures to the right indicates full marks.
4) Assume suitable data if necessary.

MCQ/Objective Type Questions

Duration: 30 Minutes Marks:14

Q.1 Choose the correct answer. **14**

1) The e.m.f. per turn in primary and secondary windings of an ideal transformer are: _____.
a) Unequal
b) Equal
c) Inversely proportional to current
d) Depends on load

2) A 1-phase transformer has 400 turns on the primary and 100 on the secondary. If the primary voltage is 200 V, find the secondary voltage?
a) 25 V b) 50 V
c) 100 V d) 500 V

3) The condition for maximum efficiency of a transformer is: _____.
a) Copper loss = Iron loss b) Copper loss < Iron loss
c) Copper loss > Iron loss d) No copper loss

4) An auto-transformer is preferred over a two-winding transformer because: _____.
a) It has higher leakage reactance
b) It is cheaper, lighter, and more efficient
c) It provides isolation
d) It reduces efficiency

5) In a delta-star ($\Delta - Y$) connected transformer, the line voltage ratio is related to the turns ratio by: _____.
a) Equal to turns ratio b) $\sqrt{3}$ times turns ratio
c) Turns ratio divided by $\sqrt{3}$ d) Independent of turns ratio

6) The zig-zag connection in a three-phase transformer is primarily used to: _____.
   a) Improve voltage regulation
   b) Reduce harmonic voltages and provide a neutral point
   c) Increase the efficiency
   d) Provide isolation between windings

7) When a $\mathrm{V}-\mathrm{V}$ system is converted into a $\Delta-\Delta$ system, an increase in capacity of the system is _____ percent.
   a) 86.6 b) 66.7
   c) 73.2 d) 50

8) The process of building up voltage in a DC shunt generator depends on: _____.
   a) Residual magnetism b) Armature resistance
   c) Load current d) Supply voltage

9) Armature reaction in a DC generator causes: _____.
   a) Increase in terminal voltage b) Reduction in main flux
   c) Increase in flux per pole d) Speed increase

10) A 6-pole lap-wound generator has 720 conductors and generates 240 V at 1000 rpm. Find the flux per pole?
   a) 0.02 Wb b) 0.04 Wb
   c) 0.05 Wb d) 0.01 Wb

11) The back e.m.f. in a DC motor is directly proportional to: _____.
   a) Armature current b) Speed and flux
   c) Supply voltage d) Field resistance

12) A 220 V DC shunt motor takes 25 A at full load. Armature resistance $= 0.5\ \Omega$, field current = 2 A. Calculate back e.m.f. _____.
   a) 210 V b) 208 V
   c) 195 V d) 215 V

13) In a brake test on a DC motor, which parameters are determined?
   a) Efficiency and torque b) Speed only
   c) Voltage regulation d) Power factor

14) The Swinburne's test is a: _____.
   a) Direct test b) Indirect test
   c) Short-circuit test d) Open-circuit test

Q.1 Multiple choice questions. **14**

1) What is the shape of the load duration curve?
a) Rectangular shape b) Triangular shape
c) Parabolic shape d) Free hand sketch

2) Burning of low grade fuel can be improved by _____.
a) Blending with better quality
b) Oil assisted ignition
c) Pulverizing
d) Any of the above

3) The surge tank controls the water when the load on the turbine is ____.
a) Equal b) Decreased
c) Increased d) Not present

4) What is introduced between the dam and power house?
a) Penstock b) Draft tube
c) Prime mover d) Surge tank

5) Which following is not part of Solar Thermal Power Plant?
a) Surge Tank b) Solar Collector
c) Boiler d) Generator

6) Silencer is usually incorporated in _____.
a) Cooling system b) Air intake
c) Fuel supply system d) Exhaust system

7) Gas Turbine plant is best suited for _____.
a) Base Load b) Emergency
c) Peak Load d) All of above

8) Which of the following is a part of typical AC power supply scheme?
a) Primary Transmission b) Primary Distribution
c) Secondary Distribution d) All of these

9) The Kelvin's law is limited because which of the following assumption made in it is only partly true?
a) load factor is uniform
b) annual charges are of the form P1 + aP2
c) Both (a) and (b) above
d) None of the above

10) The annual charge is given by _____.
a) P1 + P2 / a b) (P1 + P2) * a
c) P1 + P2 * a d) P1 * a + P2

11) Suspension insulator are made up of _____.
a) Glass b) Porcelain
c) Steatite d) epoxy resin

12) A string insulator has 4 units. The voltage across bottom most unit is 10 kV and its efficiency is 90%. Find the total operating phase voltage?
a) 40 kV b) 36 kV
c) 32 kV d) 45 kV

13) Which of the following materials in not used for transmission and distribution of electrical power?
a) Copper b) Aluminum
c) Steel d) Tungsten

14) In which of the following process are Neutrons emitted?
a) Inverse Beta Decay b) Nuclear Fission
c) Spontaneous Fission d) Nuclear Fusion

Seat No.	

Set **P**

S.Y. (B.Tech.) (Electrical Engineering) (Semester - I) (CBCS)
Examination: March/April – 2026
Power System – I (BTN07304)

Day & Date: Friday, 08-05-2026 Max. Marks: 56
Time: 03:00 PM To 06:00 PM

Instructions: 1) All questions are compulsory.
2) Figures to the right indicate full marks.
3) Assume suitable data if necessary.

SECTION – I

Q.2 Attempt Any Four. **16**

a) Define the following terms:
i) Peak load
ii) Base load
iii) Load factor
iv) Average load

b) Write a short note on interconnected grid system.

c) Write the site selection factors of hydro power plant.

d) Draw the layout of wind power plant with neat diagram & explain the operation of main components.

e) Write the advantages & disadvantages of thermal power plant.

Q.3 Attempt Any Two. **12**

a) Describe with neat diagram thermal power station.

b) Explain the 3 types of tariffs.

c) Draw the layout of diesel power plant with neat diagram & explain the operation of main components.

SECTION – II

Q.4 Attempt Any Four. **16**

a) Explain Typical AC Power Supply Scheme in detail.

b) Derive equation for conductor material required in single phase 3-wire system.

c) What are the properties of conductor used in transmission and distribution line? Describe about ACSR conductor.

d) Compare AC and DC power transmission system.

e) Explain methods of improving string efficiency.

Q.5 Attempt Any Two. **12**

a) Explain:
- i) Pin Type Insulator
- ii) String type Insulator
- iii) Suspension Type Insulator

b) State and explain Kelvin's law to determine the economic size of transmission conductor.

c) Compare AC and DC transmission system.

Seat No.	

Set **Q**

S.Y. (B.Tech.) (Electrical Engineering) (Semester - I) (CBCS)
Examination: March/April – 2026
Power System – I (BTN07304)

Day & Date: Friday, 08-05-2026 Max. Marks: 70
Time: 03:00 PM To 06:00 PM

Instructions: 1) Q. No. 1 is compulsory. It should be solved in the first 30 minutes in answer book. Page no 03 (Starting page of the Answer Book). Each question carries one mark.
2) Don't forget to Mention question paper set (P/Q/R/S) on top of page.
3) Figures to the right indicates full marks.
4) Assume data wherever necessary.

MCQ/Objective Type Questions

Duration: 30 Minutes Marks:14

Q.1 Multiple choice questions. **14**

1) Which of the following is a part of typical AC power supply scheme?
a) Primary Transmission b) Primary Distribution
c) Secondary Distribution d) All of these

2) The Kelvin's law is limited because which of the following assumption made in it is only partly true?
a) load factor is uniform
b) annual charges are of the form P1 + aP2
c) Both (a) and (b) above
d) None of the above

3) The annual charge is given by _____.
a) P1 + P2 / a b) (P1 + P2) * a
c) P1 + P2 * a d) P1 * a + P2

4) Suspension insulator are made up of _____.
a) Glass b) Porcelain
c) Steatite d) epoxy resin

5) A string insulator has 4 units. The voltage across bottom most unit is 10 kV and its efficiency is 90%. Find the total operating phase voltage?
a) 40 kV b) 36 kV
c) 32 kV d) 45 kV

6) Which of the following materials in not used for transmission and distribution of electrical power?
   a) Copper
   b) Aluminum
   c) Steel
   d) Tungsten

7) In which of the following process are Neutrons emitted?
   a) Inverse Beta Decay
   b) Nuclear Fission
   c) Spontaneous Fission
   d) Nuclear Fusion

8) What is the shape of the load duration curve?
   a) Rectangular shape
   b) Triangular shape
   c) Parabolic shape
   d) Free hand sketch

9) Burning of low grade fuel can be improved by _____.
   a) Blending with better quality
   b) Oil assisted ignition
   c) Pulverizing
   d) Any of the above

10) The surge tank controls the water when the load on the turbine is ____.
   a) Equal
   b) Decreased
   c) Increased
   d) Not present

11) What is introduced between the dam and power house?
   a) Penstock
   b) Draft tube
   c) Prime mover
   d) Surge tank

12) Which following is not part of Solar Thermal Power Plant?
   a) Surge Tank
   b) Solar Collector
   c) Boiler
   d) Generator

13) Silencer is usually incorporated in _____.
   a) Cooling system
   b) Air intake
   c) Fuel supply system
   d) Exhaust system

14) Gas Turbine plant is best suited for _____.
   a) Base Load
   b) Emergency
   c) Peak Load
   d) All of above

MCQ/Objective Type Questions

Duration: 30 Minutes Marks:14

Q.1 Choose the correct alternative. **14**

1) Which of the following biasing techniques uses a resistor between collector and base?
a) Fixed bias b) Collector-to-base bias
c) Self-bias d) Voltage-divider bias

2) Thermal runaway in a BJT is prevented by _____.
a) Increasing collector current
b) Reducing base resistance
c) Adding emitter resistance or compensation techniques
d) Using a Darlington pair

3) The AC equivalent circuit of a CE amplifier does NOT include _____
a) Coupling capacitor b) Bypass capacitor
c) DC voltage source d) Load resistor

4) A Darlington pair is used to _____.
a) Increase input impedance
b) Increase voltage gain
c) Increase current gain
d) Reduce thermal stability

5) The effect of a bypass capacitor (C_e) in a CE amplifier is to _____.
a) Increase DC gain b) Reduce AC gain
c) Increase AC gain d) Decrease input resistance

6) The low-frequency response of an RC-coupled amplifier is primarily affected by _____.
   a) Coupling and bypass capacitors
   b) Transistor gain
   c) Supply voltage
   d) Load resistance only

7) h-parameters of a transistor are used to _____.
   a) Determine thermal stability
   b) Analyze transistor using hybrid model
   c) Design power amplifiers
   d) Measure ripple factor

8) The ripple factor of a C-type filter is _____.
   a) Less than L-type filter
   b) More than L-type filter
   c) Independent of capacitance
   d) Zero

9) Which of the following ICs is used for fixed voltage regulation?
   a) 555 b) 78XX
   c) LM324 d) 7400

10) Negative feedback in an amplifier generally _____.
   a) Increases gain
   b) Reduces bandwidth
   c) Improves stability and linearity
   d) Reduces input resistance

11) A voltage series feedback amplifier _____.
   a) Increases input resistance and reduces output resistance
   b) Reduces input resistance and increases output resistance
   c) Reduces both input and output resistance
   d) Increases both input and output resistance

12) Class B power amplifier operates with _____.
   a) 180° conduction angle
   b) 360° conduction angle
   c) Less than 180° conduction angle
   d) 90° conduction angle

13) Crossover distortion occurs in _____.
   a) Class A amplifier b) Class B amplifier
   c) Class AB amplifier d) Class C amplifier

14) The efficiency of a Class A power amplifier is approximately _____.
   a) 25-30% b) 50-60%
   c) 75-80% d) 90%

3) Assume suitable data if necessary.

SECTION – I

Q.2 Attempt the following. (Any Four) **16**

a) Explain concept of DC load line with derivation? Write significance of load line.

b) Explain drain & transfer characteristics of N-channel enhancement type of MOSFET with neat diagram.

c) Derive the relation between α & β.

d) "For amplifier application Q point is selected into center of load line" justify & explain this statement.

e) Define the following small signal parameter of JFET.
i) DC drain to source resistance
ii) Amplification factor
iii) AC drain resistance
iv) Transconductance

Q.3 Attempt the following. (Any Two) **12**

a) Draw & Explain V-I characteristics of JFET, also draw & explain V-I characteristics for different value of VGS.

b) Design single stage CE amplifier to give Av = 100, S = 10 and output voltage 2V r.m.s., hfe = 125, hie = 2.7k.

c) What is MOSFET? Explain with diagram construction of depletion type MOSFET.

SECTION – II

Q.4 Attempt the following. (Any Four) **16**

a) Draw the Circuit diagram of Full wave center tap rectifier with π filter. Explain.

b) Explain crossover distortion in power amplifier with suitable diagram.

c) Explain transformer coupled class A amplifier.

d) Derive the equation for voltage series feedback amplifier for effect of Input resistance (Rif).

e) Differentiate between negative and positive feedback amplifiers.

Q.5 Attempt the following. (Any Two) **12**

a) Draw the block diagram of regulated power supply? Explain.

b) Explain the concept of critical inductance in LC filter with their derivation.

c) Derive the equation for voltage series feedback amplifier for effect of output resistance (Rof).

S.Y. (B.Tech.) (Electrical Engineering) (Semester - I) (CBCS)
Examination: March/April – 2026
Electronic Devices and Circuits (BTN07305)

Day & Date: Monday, 11-05-2026 Max. Marks: 70
Time: 03:00 PM To 06:00 PM

Instructions: 1) Q. No. 1 is compulsory. It should be solved in the first 30 minutes in answer book. Page no 03 (Starting page of the Answer Book). Each question carries one mark.
2) Don't forget to Mention question paper set (P/Q/R/S) on top of page.
3) Figures to the right indicates full marks.
4) Assume data wherever necessary.

MCQ/Objective Type Questions

Duration: 30 Minutes Marks:14

Q.1 Choose the correct alternative. **14**

1) A voltage series feedback amplifier _____.
a) Increases input resistance and reduces output resistance
b) Reduces input resistance and increases output resistance
c) Reduces both input and output resistance
d) Increases both input and output resistance

2) Class B power amplifier operates with _____.
a) 180° conduction angle
b) 360° conduction angle
c) Less than 180° conduction angle
d) 90° conduction angle

3) Crossover distortion occurs in _____.
a) Class A amplifier b) Class B amplifier
c) Class AB amplifier d) Class C amplifier

4) The efficiency of a Class A power amplifier is approximately _____.
a) 25-30% b) 50-60%
c) 75-80% d) 90%

5) Which of the following biasing techniques uses a resistor between collector and base?
a) Fixed bias b) Collector-to-base bias
c) Self-bias d) Voltage-divider bias

6) Thermal runaway in a BJT is prevented by _____.
   a) Increasing collector current
   b) Reducing base resistance
   c) Adding emitter resistance or compensation techniques
   d) Using a Darlington pair

7) The AC equivalent circuit of a CE amplifier does NOT include _____
   a) Coupling capacitor b) Bypass capacitor
   c) DC voltage source d) Load resistor

8) A Darlington pair is used to _____.
   a) Increase input impedance
   b) Increase voltage gain
   c) Increase current gain
   d) Reduce thermal stability

9) The effect of a bypass capacitor (C_e) in a CE amplifier is to _____.
   a) Increase DC gain b) Reduce AC gain
   c) Increase AC gain d) Decrease input resistance

10) The low-frequency response of an RC-coupled amplifier is primarily affected by _____.
   a) Coupling and bypass capacitors
   b) Transistor gain
   c) Supply voltage
   d) Load resistance only

11) h-parameters of a transistor are used to _____.
   a) Determine thermal stability
   b) Analyze transistor using hybrid model
   c) Design power amplifiers
   d) Measure ripple factor

12) The ripple factor of a C-type filter is _____.
   a) Less than L-type filter
   b) More than L-type filter
   c) Independent of capacitance
   d) Zero

13) Which of the following ICs is used for fixed voltage regulation?
   a) 555 b) 78XX
   c) LM324 d) 7400

14) Negative feedback in an amplifier generally _____.
   a) Increases gain
   b) Reduces bandwidth
   c) Improves stability and linearity
   d) Reduces input resistance

Set **R**

S.Y. (B.Tech.) (Electrical Engineering) (Semester - I) (CBCS)
Examination: March/April – 2026
Electronic Devices and Circuits (BTN07305)

Day & Date: Monday, 11-05-2026 Max. Marks: 56
Time: 03:00 PM To 06:00 PM

Instructions: 1) All questions are compulsory.
2) Figures to the right indicate full marks.
3) Assume suitable data if necessary.

SECTION – I

Q.2 Attempt the following. (Any Four) **16**

a) Explain concept of DC load line with derivation? Write significance of load line.

b) Explain drain & transfer characteristics of N-channel enhancement type of MOSFET with neat diagram.

c) Derive the relation between α & β.

d) "For amplifier application Q point is selected into center of load line" justify & explain this statement.

e) Define the following small signal parameter of JFET.
i) DC drain to source resistance
ii) Amplification factor
iii) AC drain resistance
iv) Transconductance

Q.3 Attempt the following. (Any Two) **12**

a) Draw & Explain V-I characteristics of JFET, also draw & explain V-I characteristics for different value of VGS.

b) Design single stage CE amplifier to give Av = 100, S = 10 and output voltage 2V r.m.s., hfe = 125, hie = 2.7k.

c) What is MOSFET? Explain with diagram construction of depletion type MOSFET.

SECTION – II

Q.4 Attempt the following. (Any Four) **16**

a) Draw the Circuit diagram of Full wave center tap rectifier with π filter. Explain.

b) Explain crossover distortion in power amplifier with suitable diagram.

c) Explain transformer coupled class A amplifier.

d) Derive the equation for voltage series feedback amplifier for effect of Input resistance (Rif).

e) Differentiate between negative and positive feedback amplifiers.

Q.5 Attempt the following. (Any Two) **12**

a) Draw the block diagram of regulated power supply? Explain.

b) Explain the concept of critical inductance in LC filter with their derivation.

c) Derive the equation for voltage series feedback amplifier for effect of output resistance (Rof).

MCQ/Objective Type Questions

Duration: 30 Minutes Marks:14

Q.1 Choose the correct alternatives from the options. **14**

1) A working standard is mainly used for _____.
a) Realization of SI units
b) Calibration of instruments in laboratories
c) Maintaining highest accuracy in national labs
d) Defining fundamental quantities

2) Which error can be minimized by taking repeated readings?
a) Systematic error b) Random error
c) Instrumental error d) Environmental error

3) The dead zone of an instrument refers to _____.
a) Range of input where no output is obtained
b) Time delay before the pointer moves
c) Smallest increment of quantity measured
d) Drift in readings with temperature

4) A recording instrument provides _____.
a) Instantaneous reading only
b) Storage of time-varying data
c) Both analog and digital display
d) Automatic error correction

5) The control torque in electrodynamometer type instrument is provided by _____.
a) Eddy current damping b) Spring control
c) Gravity control d) Induced emf

6) In two wattmeter method of power measurement of a balanced $3-\Phi$ load at unity power factor, readings of the two wattmeters will be _____.
   a) Equal and opposite
   b) Equal and positive
   c) Zero
   d) Unequal and positive

7) A Megger is primarily used to measure _____.
   a) Low resistance
   b) High resistance
   c) Earth resistance
   d) Capacitance

8) The Crompton's DC potentiometer works on the principle of _____.
   a) Deflection method
   b) Null balance method
   c) Induction principle
   d) Moving coil principle

9) The Schering bridge is used for _____.
   a) Inductance measurement
   b) Resistance measurement
   c) Capacitance and dielectric loss measurement
   d) Frequency measurement

10) A transducer that generates its own electrical signal without external power is called _____.
   a) Active transducer
   b) Passive transducer
   c) Digital transducer
   d) Analog transducer

11) The ratio error of a CT is given by _____.
   a) (Nominal ratio - Actual ratio) / Actual ratio
   b) (Actual ratio - Nominal ratio) / Nominal ratio
   c) Nominal ratio / Actual ratio
   d) Actual ratio / Nominal ratio

12) In a digital voltmeter, the measured quantity is _____.
   a) Converted into frequency or time for measurement
   b) Directly read on analog scale
   c) Measured using Wheatstone bridge principle
   d) Dependent on resonance

13) A Q-meter is used for measuring _____.
   a) Quality factor of coils
   b) Capacitance only
   c) Resistance only
   d) Efficiency of transformers

14) In a CRO, deflection sensitivity is given by _____.
   a) Deflection per unit input frequency
   b) Deflection per unit input voltage
   c) Deflection per unit input current
   d) Deflection per unit input resistance

SECTION– I

Q.2 Solve Any Four **16**

a) What is the dead zone and resolution of an instrument? Explain with sketch.

b) Write a short note on the working of PMMC instrument.

c) Write a short note on the Megger and its application.

d) Explain Anderson's bridge with phasor diagram. Also derive the equation for Q-factor.

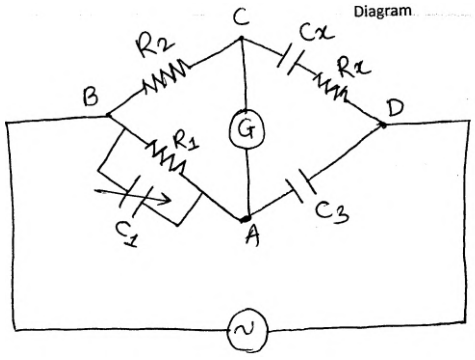
e) Explain with neat figure Crompton's type potentiometer.

Q.3 Solve Any Two **12**

a) Discuss all required forces or torques for satisfactory operation of indicating instruments in detail.

b) Derive torque equation of Electrodynamometer type instrument.

c) The Schering bridge is shown in figure. Arm AB consist of capacitor 0.4 μf in parallel with 1.5 KΩ resistance; Arm BC consist resistance of 3 KΩ, Arm CD consist unknown capacitor Cx and Rx in series, Arm DA consist capacitance of 0.4 μf; frequency 1 KHz. Determine
i) Rx and Cx
ii) Dissipation factor



SECTION – II

Q.4 Solve Any Four **16**

a) Write a short note on the construction and working of LVDT.

b) Differentiate between CT and PT (any 4 points).

c) Draw block diagram and write a short note on digital storage oscilloscope.

d) Define ratio error and phase angle error in instrument transformers.

e) Explain with neat diagram electronic counter.

Q.5 Solve Any Two **12**

a) Explain the working principle of Q-meter with neat figure also derive its equation.

b) With neat block diagram, explain the working of a CRO.

c) Explain with neat diagram:

i) Ramp type DVM

ii) Dual slope integrating type DVM

   d) Dependent on resonance

8) A Q-meter is used for measuring _____.
   a) Quality factor of coils b) Capacitance only
   c) Resistance only d) Efficiency of transformers

9) In a CRO, deflection sensitivity is given by _____.
   a) Deflection per unit input frequency
   b) Deflection per unit input voltage
   c) Deflection per unit input current
   d) Deflection per unit input resistance

10) A working standard is mainly used for _____.
   a) Realization of SI units
   b) Calibration of instruments in laboratories
   c) Maintaining highest accuracy in national labs
   d) Defining fundamental quantities

11) Which error can be minimized by taking repeated readings?
   a) Systematic error b) Random error
   c) Instrumental error d) Environmental error

12) The dead zone of an instrument refers to _____.
   a) Range of input where no output is obtained
   b) Time delay before the pointer moves
   c) Smallest increment of quantity measured
   d) Drift in readings with temperature

13) A recording instrument provides _____.
   a) Instantaneous reading only
   b) Storage of time-varying data
   c) Both analog and digital display
   d) Automatic error correction

14) The control torque in electrodynamometer type instrument is provided by _____.
   a) Eddy current damping b) Spring control
   c) Gravity control d) Induced emf

Seat No.	

Set **S**

S.Y. (B.Tech.) (Electrical Engineering) (Semester - I) (CBCS)
Examination: March/April – 2026
Electrical Measurement and Instrumentation (BTN07303)

Day & Date: Wednesday, 13-05-2026 Max. Marks: 56
Time: 03:00 PM To 06:00 PM

Instructions: 1) All questions are compulsory.
2) Figures to the right indicate full marks.
3) Assume suitable data if necessary.

SECTION– I

Q.2 Solve Any Four **16**

a) What is the dead zone and resolution of an instrument? Explain with sketch.

b) Write a short note on the working of PMMC instrument.

c) Write a short note on the Megger and its application.

d) Explain Anderson's bridge with phasor diagram. Also derive the equation for Q-factor.

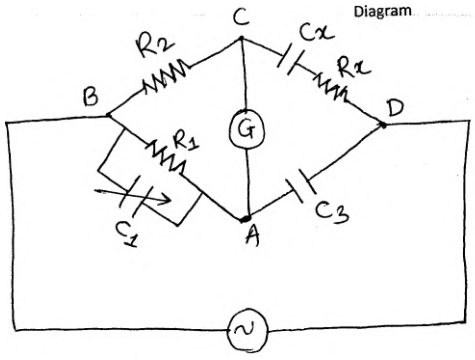
e) Explain with neat figure Crompton's type potentiometer.

Q.3 Solve Any Two **12**

a) Discuss all required forces or torques for satisfactory operation of indicating instruments in detail.

b) Derive torque equation of Electrodynamometer type instrument.

c) The Schering bridge is shown in figure. Arm AB consist of capacitor 0.4 μf in parallel with 1.5 KΩ resistance; Arm BC consist resistance of 3 KΩ, Arm CD consist unknown capacitor Cx and Rx in series, Arm DA consist capacitance of 0.4 μf; frequency 1 KHz. Determine
i) Rx and Cx
ii) Dissipation factor



SECTION – II

Q.4 Solve Any Four **16**

a) Write a short note on the construction and working of LVDT.

b) Differentiate between CT and PT (any 4 points).

c) Draw block diagram and write a short note on digital storage oscilloscope.

d) Define ratio error and phase angle error in instrument transformers.

e) Explain with neat diagram electronic counter.

Q.5 Solve Any Two **12**

a) Explain the working principle of Q-meter with neat figure also derive its equation.

b) With neat block diagram, explain the working of a CRO.

c) Explain with neat diagram:

i) Ramp type DVM

ii) Dual slope integrating type DVM

SLR-QH-159

Set P

S.Y. (B.Tech.) (Electrical Engineering) (Semester - II) (New) (NEP CBCS) Examination: March/April – 2026
Electrical Transmission and Distribution (EEPCC-04)

Day & Date: Saturday, 16-05-2026 Max. Marks: 70
Time: 10:00 AM To 01:00 PM

Instructions: 1) Q. No. 1 is compulsory. It should be solved in the first 30 minutes in Answer Book Page no 03 (Starting page of the Answer Book). Each question carries one mark.
2) Don't forget to Mention question paper set (P/Q/R/S) on top of page.
3) Figures to the right indicates full marks.
4) Assume suitable data if required.

MCQ/Objective Type Questions

Duration: 30 Minutes Marks:14

Q.1 Choose the Correct Alternatives from the Options and Rewrite the Sentence. **14**

1) The sag of a transmission line depends upon _____.
a) Weight of conductor and directly proportional to span length
b) Weight of conductor and inversely proportional to span length
c) Weight of conductor and directly proportional to the square of span length
d) Weight of conductor and inversely proportional to the square of span length

2) The maximum tension in a section of overhead line conductor between two supports of unequal height occurs at _____.
a) The higher support b) The lower point
c) The midpoint of the conductor d) None of the above

3) Corona is accompanied by _____.
a) Violet visible light b) Hissing sound
c) Power loss and interference d) All of the above

4) Transmission line constants are _____.
a) Capacitance b) Inductance
c) Resistance d) All of these

5) The inductance of line is minimum when _____.
a) G M D is high
b) G M R is high
c) Both G M D and G M R are high
d) G M D is low but G M R is high

6) When two conductors between each of radius 'r' are at a distance D, the capacitance between the two is Proportional to _____.
   a) Loge (D/r)
   b) loge (r/ D)
   c) 1/loge (D/r)
   d) 1/loge(r/D)

7) Find the inductance per km of a 3- phase transmission line using 1.24 cm diameter conductors when these are placed at the corners of an equilateral triangle of each side 2 m.
   a) 3.2 mH/Km
   b) 2.1 mH/Km
   c) 1.205 mH/Km
   d) 2.3 mH/Km

8) In triangular configuration, inductance and capacitance values are _____ and _____ respectively.
   a) Less, Less
   b) Higher, Higher
   c) Less, Higher
   d) Higher, Less

9) What is the purpose of bedding on the underground cables?
   a) To avoid leakage of current.
   b) To protect the sheath against corrosion.
   c) To protect the sheath from mechanical injury due to armoring.
   d) Both b) and c)

10) The cable best suited for the transmission of voltages from 33 kV to 66 kV is _____.
   a) Belted cables
   b) Screened cables
   c) Pressure cables
   d) None of these

11) What does capacitance grade of cables mean?
   a) Use of dielectrics in different concentrations.
   b) Introduction of capacitance at various lengths of cable to counter the effect of inductance.
   c) Use of dielectrics of different permittivity's
   d) Grading according to capacitance per km length of the cable.

12) In long transmission lines Resistance and Capacitance parameters of lines are connected in _____.
   a) Series, shunt
   b) Series, series
   c) Shunt, shunt
   d) Shunt, parallel

13) In nominal-π method of solution of medium transmission line, capacitance is assumed to be _____.
   a) Distributed uniformly from sending end to receiving end
   b) Divided into two halves
   c) Lumped at the generation end
   d) Lumped at middle of generation and load end

14) Which of the following distribution system is more reliable?

a) Radial system
b) Tree system
c) Ring main system
d) All are equally reliable

Seat No.	

Set **P**

S.Y. (B.Tech.) (Electrical Engineering) (Semester - II) (New) (NEP CBCS) Examination: March/April – 2026
Electrical Transmission and Distribution (EEPCC-04)

Day & Date: Saturday, 16-05-2026 Max. Marks: 56
Time: 10:00 AM To 01:00 PM

Instructions: 1) All questions are compulsory.
2) Figures to the right indicate full marks.
3) Assume suitable data if required.

Section – I

Q.2 Attempt Any Four. **16**

a) Define corona discharge; enlist and describe in brief various methods of reducing the corona effect.

b) Calculate the loop inductance per km of a single-phase overhead line consisting of two conductors each 1 cm diameter and 1.2 m apart.

c) What is meant by sag? Derive an expression for sag in a transmission line having equal level of supports.

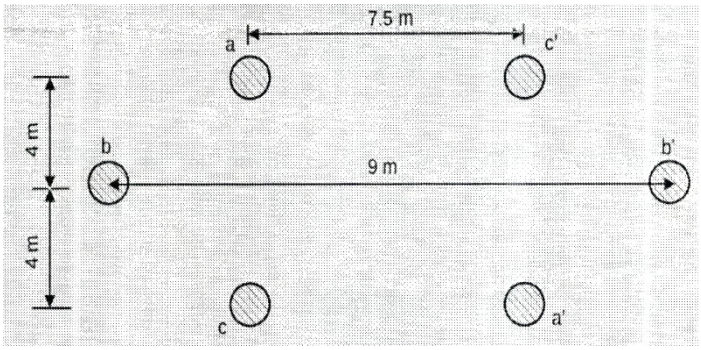
d) Derive the expression for capacitance of a single core underground cable with neat schematic diagram.

e) Find the line-to-line capacitance (Cab) per km of a three phase transmission line using 1.24 cm diameter conductor when these are placed at the corners of an equilateral triangle of each side 2m.

Q.3 Attempt Any Two. **12**

a) Derive the expression for Capacitance of 3-ph single circuit overhead triangular configuration of transmission line for symmetrical spacing.

b) The double circuit three-phase line has the configuration shown in figure the distance between conductor a and c' is 7.5 between b and b' is 9 m and between a and c is 8 m. Find inductance per kilometer per phase. The radius of each conductor is 1.25 cm.



c) Explain the following methods of cable grading with neat sketch:
i) Capacitance grading
ii) Inter-sheath grading

Section – II

Q.4 Attempt Any Four. **16**

a) Describe with neat diagram following AC Distribution System.
   i) Radial system
   ii) Ring main system

b) Draw and describe the uniformly loaded distributor fed at one end in DC system with a point of minimum potential, maximum and minimum voltage drops?

c) Explain in detail effect of Power Factor on Voltage regulation, Losses, efficiency in case of transmission line.

d) Define and explain brief following terms: feeders, distributor and service mains with neat schematic diagram in case of AC Distribution System.

e) Enlist and explain brief different advantages and limitations of EHVAC Transmission System.

Q.5 Attempt Any Two. **12**

a) Explain in details with neat circuit and phasor/Vector diagram performance analysis of short transmission line.

b) Enlist various types of HV DC Transmission System and Describe in brief with neat circuit diagram,
   i) Mono Polar and
   ii) Bipolar
   HVDC Transmission System with advantages and disadvantages.

c) A 3-ph, 50 Hz OH lines 100km long has the following constant:
   Resistance/ Km/phase $= 0.1\Omega$ Inductive reactance /km/phase $= 0.2\Omega$
   Capacitive Susceptance/km/phase $= 0.04 \times 10^4$ Siemens
   Determine:
   i) The sending end current
   ii) Sending end voltage
   iii) Sending end power factor and
   iv) Transmission efficiency when supporting a balanced load of 10000KW a 66 KV. P.F. 0.8 lagging. Use nominal T method.

Day & Date: Saturday, 16-05-2026 Max. Marks: 56
Time: 10:00 AM To 01:00 PM

Instructions: 1) All questions are compulsory.
2) Figures to the right indicate full marks.
3) Assume suitable data if required.

Section – I

Q.2 Attempt Any Four. **16**

a) Define corona discharge; enlist and describe in brief various methods of reducing the corona effect.

b) Calculate the loop inductance per km of a single-phase overhead line consisting of two conductors each 1 cm diameter and 1.2 m apart.

c) What is meant by sag? Derive an expression for sag in a transmission line having equal level of supports.

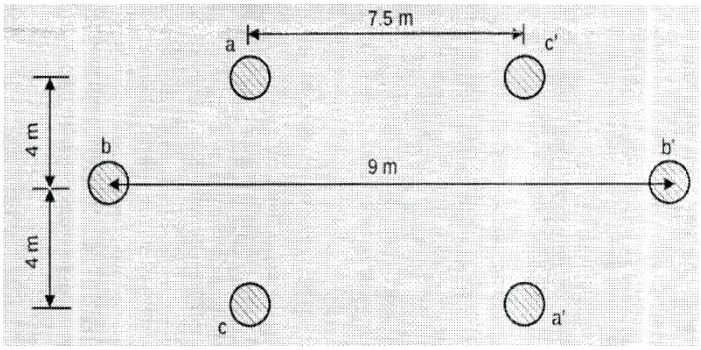
d) Derive the expression for capacitance of a single core underground cable with neat schematic diagram.

e) Find the line-to-line capacitance (Cab) per km of a three phase transmission line using 1.24 cm diameter conductor when these are placed at the corners of an equilateral triangle of each side 2m.

Q.3 Attempt Any Two. **12**

a) Derive the expression for Capacitance of 3-ph single circuit overhead triangular configuration of transmission line for symmetrical spacing.

b) The double circuit three-phase line has the configuration shown in figure the distance between conductor a and c' is 7.5 between b and b' is 9 m and between a and c is 8 m. Find inductance per kilometer per phase. The radius of each conductor is 1.25 cm.



c) Explain the following methods of cable grading with neat sketch:
i) Capacitance grading
ii) Inter-sheath grading

Section – II

Q.4 Attempt Any Four. **16**

a) Describe with neat diagram following AC Distribution System.
   i) Radial system
   ii) Ring main system

b) Draw and describe the uniformly loaded distributor fed at one end in DC system with a point of minimum potential, maximum and minimum voltage drops?

c) Explain in detail effect of Power Factor on Voltage regulation, Losses, efficiency in case of transmission line.

d) Define and explain brief following terms: feeders, distributor and service mains with neat schematic diagram in case of AC Distribution System.

e) Enlist and explain brief different advantages and limitations of EHVAC Transmission System.

Q.5 Attempt Any Two. **12**

a) Explain in details with neat circuit and phasor/Vector diagram performance analysis of short transmission line.

b) Enlist various types of HV DC Transmission System and Describe in brief with neat circuit diagram,
   i) Mono Polar and
   ii) Bipolar
   HVDC Transmission System with advantages and disadvantages.

c) A 3-ph, 50 Hz OH lines 100km long has the following constant:
   Resistance/ Km/phase $= 0.1\Omega$ Inductive reactance /km/phase $= 0.2\Omega$
   Capacitive Susceptance/km/phase $= 0.04 \times 10^4$ Siemens
   Determine:
   i) The sending end current
   ii) Sending end voltage
   iii) Sending end power factor and
   iv) Transmission efficiency when supporting a balanced load of 10000KW a 66 KV. P.F. 0.8 lagging. Use nominal T method.

S.Y. (B.Tech.) (Electrical Engineering) (Semester - II) (New) (NEP CBCS) Examination: March/April – 2026
Numerical Methods and Linear Algebra (BTN07401)

Day & Date: Saturday, 16-05-2026 Max. Marks: 70
Time: 10:00 AM To 01:00 PM

Instructions: 1) Q. No. 1 is compulsory. It should be solved in the first 30 minutes in Answer Book Page no 03 (Starting page of the Answer Book). Each question carries one mark.
2) Don't forget to Mention question paper set (P/Q/R/S) on top of page.
3) Figures to the right indicates full marks.

MCQ/Objective Type Questions

Duration: 30 Minutes Marks:14

Q.1 Choose the correct Answer. **14**

1) Newton-Raphson Method Fails when _____.
a) $f'(x)$ is Negative b) $f'(x)$ is positive
c) $f'(x)$ is zero d) None of these

2) As Soon as new value of variable is found by iteration, it is used immediately in the following equation. This Method is called _____.
a) Gauss Seidel b) Gauss elimination
c) Gauss Jacobi d) None of these

3) An equation represented by as $x^2 + \sin x - 5 = 0$ is _____.
a) Algebraic b) Transcendental
c) Both a & b d) None of these

4) If $\frac{dy}{dx} = 2x - y$ & $y(1) = 3$ then by Picard's method first approximation y is _____.
a) 0 b) $x^3 - 3x + 5$
c) x^2 d) None of these

5) The quantity k, obtained by Runge-Kutta Method of Fourth order for differential equation
$\frac{dy}{dx} = x + y, \quad y(0) = 1, h = 0.2$
a) 0.2 b) 0.4
c) 2 d) None of these

6) Error in Simpson's $3/8^{\text{th}}$ rule is of order _____.

a) h^7 b) h^5

c) h^4 d) h^2

7) Romberg's Method is used to solve _____.

a) Ordinary differential equation b) Integration

c) Partial differential equation d) All of these

8) If system of equation has no free variable, then it has _____.

a) Unique Solution b) No Solution

c) Infinite Solution d) None of these

9) If A is given matrix. The columns of A are linearly independent if and only if the equation $AX = 0$ _____.

a) Non trivial Solution b) No Solution

c) Only trivial Solution d) None of these

10) Eigen values of matrix are $\begin{bmatrix} 1 & 0 & 0 \\ 0 & 3 & 0 \\ 0 & 0 & 5 \end{bmatrix}$

a) $1, 2, 3$ b) $4, 5, 6$

c) $1, 3$ d) $1, 3, 5$

11) Inner Product of two vector u & u are orthogonal if and only if _____.

a) $u.v = 1$ b) $u.v = 2$

c) $u.v = 0$ d) None of these

12) Least square error in Least square solution $Ax = b$ is _____.

a) $\|b - A\hat{x}\|^2$ b) $\|b + A\hat{x}\|$

c) $\|b - A\hat{x}\|$ d) $b - A\hat{x}$

13) If all Eigen values are positive, then quadratic farm is _____.

a) Positive definite b) Negative definite

c) Positive & Negative definite d) Indefinite

14) $v.v = \|v\|^2$

a) True b) False

Seat No.

S.Y. (B.Tech.) (Electrical Engineering) (Semester - II) (New) (NEP CBCS) Examination: March/April – 2026
Numerical Methods and Linear Algebra (BTN07401)

Day & Date: Saturday, 16-05-2026 Max. Marks: 56
Time: 10:00 AM To 01:00 PM

Instructions: 1) All questions are compulsory.
2) Figures to the right indicate full marks.

SECTION – I

Q.2 Attempt the following. (Any Three) **09**

a) Find the Positive root of $x^4 - x - 10 = 0$ correct to three decimal places using Newton-Raphson Method.
Take $x_0 = 2$ as initial approximation.

b) Evaluate $I = \int_0^1 \frac{1}{1+x^2} dx$ by Trapezoidal rule taking $h = 0.25$

c) Solve the following System of equation by Gauss-Seidel Method.

$$10x + y + z = 12$$
$$2x + 10y + z = 13$$
$$2x + 2y + 10z = 14$$

d) Apply method Runge Kutta of fourth order to find an approximate value of y when $x = 0.1$ given that

$$\frac{dx}{dy} = x + y \ \& \ y(0) = 1$$

e) Derive Newton iterative formula for $f(x) = \sqrt{N}$

Q.3 Attempt the following. (Any Three) **09**

a) Solve the equation $x^3 - 2x - 5 = 0$ Regula - Falsi Method starting with $a = 2, b = 3$ correct to three decimal places.

b) Solve $\frac{dy}{dx} = 1 + xy, y(2) = 0$ by Picard's method upto second approximate.

c) Solve the system by Gauss-Elimination method

$$x + 2y + z = 3;\ 2x + 3y + 3z = 10;\ 3x - y + 2z = 13$$

d) Using three point Gaussian Quadrature, evaluate $\int_0^1 \frac{1}{1+x} dx$

e) Find the double root of $x^3 - x^2 - x + 1 = 0$ choosing $x_0 = 0.8$

Q.4 Attempt the following. (Any Two) **10**

a) Solve by factorization method the system of equation.

$$x + 5y + z = 14$$
$$2x + y + 3z = 13$$
$$3x + y + 4z = 17$$

b) Solve the non linear equation by Newton method upto two iteration $x^2 + y = 11,\ x + y^2 = 7$, with initial approximation $x_0 = 3.5,\ y_0 = -1.8$

c) Solve the differential equation $\frac{dy}{dx} = 1 + xz, \frac{dz}{dx} = -xy$ for $x = 0.3$ Using fourth order Runge-Kutta method. Take initial values $x_0 = 0, y_0 = 0, z_0 = 1$

SECTION – II

Q.5 Attempt the following. (Any Three) **09**

a) Determine the following system of equation having non trivial solution, then describe the solution set
$3x_1 + 5x_2 - 4x_3 = 0, -3x_1 - 2x_2 + 4x_3 = 0, 6x_1 + x_2 - 8x_3 = 0$

b) Let $v_1 = \begin{bmatrix}1\\2\\3\end{bmatrix}, v_2 = \begin{bmatrix}4\\5\\6\end{bmatrix}, v_3 = \begin{bmatrix}2\\1\\0\end{bmatrix}$ check whether the vector are linearly independent or dependent.

c) Let $A = \begin{bmatrix}2 & 1\\-4 & -2\end{bmatrix}$ and $u = \begin{bmatrix}-1\\2\end{bmatrix}$ determine u belongs to NULL of A.

d) Compute Quadratic form $X'AX$ for $A = \begin{bmatrix}3 & 2 & 0\\2 & 2 & 2\\0 & 2 & 1\end{bmatrix}$ and $x = \begin{bmatrix}x\\y\\z\end{bmatrix}$

e) Assume that T is linear transformation find standard matrix of $T: R^3 \to R^2$ defined by $T(e_1) = (1, 3)$
$T(e_2) = (4, -7)$
$T(e_3) = (-5, 4)$

Q.6 Attempt the following. (Any Three) **09**

a) Determine whether the vector are dependent or independent
Let $v_1 = \begin{bmatrix}0\\0\\2\end{bmatrix}, v_2 = \begin{bmatrix}0\\5\\-8\end{bmatrix}, v_3 = \begin{bmatrix}-3\\4\\1\end{bmatrix}$

b) Show that $\{v_1, v_2, v_3\}$ is orthonormal basis for IR^3 where

$$v_1 = \begin{bmatrix}3/\sqrt{11}\\1/\sqrt{11}\\1/\sqrt{11}\end{bmatrix}, v_2 = \begin{bmatrix}-1/\sqrt{6}\\2/\sqrt{6}\\1/\sqrt{6}\end{bmatrix}, v_3 = \begin{bmatrix}1/\sqrt{66}\\-4/\sqrt{66}\\7/\sqrt{66}\end{bmatrix}$$

c) Describe all solution of $Ax = b$ where

$$A = \begin{bmatrix} 3 & 5 & -4 \\ -3 & -2 & 4 \\ 6 & 1 & 8 \end{bmatrix} b = \begin{bmatrix} 7 \\ -1 \\ 4 \end{bmatrix}$$

d) Find the Eigen values of $A = \begin{bmatrix} 2 & 3 \\ 3 & -6 \end{bmatrix}$

e) Let $b_1 = \begin{bmatrix} 2 \\ 1 \end{bmatrix}, b_2 = \begin{bmatrix} -1 \\ 1 \end{bmatrix}, X = \begin{bmatrix} 4 \\ 5 \end{bmatrix}, B = \{b_1, b_2\}$ find the co-ordinate vector$[X]_B$ of X relative to B.

Q.7 Attempt the following. (Any Two) **10**

a) Find the numerically largest Eigen value of matrix A by power method

$$A = \begin{bmatrix} 1 & 6 & 1 \\ 1 & 2 & 0 \\ 0 & 0 & 3 \end{bmatrix}, \qquad x_0 = \begin{bmatrix} 1 \\ 0 \\ 0 \end{bmatrix}$$

b) Diagonalizable the matrix A $\quad A = \begin{bmatrix} 4 & 2 & 2 \\ 2 & 4 & 2 \\ 2 & 2 & 4 \end{bmatrix}$

c) Find the least square solution of inconsistent system $AX = b$ for

$$A = \begin{bmatrix} 4 & 0 \\ 0 & 2 \\ 1 & 1 \end{bmatrix} \quad b = \begin{bmatrix} 2 \\ 0 \\ 11 \end{bmatrix}$$

d) Using three point Gaussian Quadrature, evaluate $\int_0^1 \frac{1}{1+x} dx$

e) Find the double root of $x^3 - x^2 - x + 1 = 0$ choosing $x_0 = 0.8$

Q.4 Attempt the following. (Any Two) **10**

a) Solve by factorization method the system of equation.

$$x + 5y + z = 14$$
$$2x + y + 3z = 13$$
$$3x + y + 4z = 17$$

b) Solve the non linear equation by Newton method upto two iteration $x^2 + y = 11,\ x + y^2 = 7$, with initial approximation $x_0 = 3.5,\ y_0 = -1.8$

c) Solve the differential equation $\frac{dy}{dx} = 1 + xz, \frac{dz}{dx} = -xy$ for $x = 0.3$ Using fourth order Runge-Kutta method. Take initial values $x_0 = 0, y_0 = 0, z_0 = 1$

SECTION – II

Q.5 Attempt the following. (Any Three) **09**

a) Determine the following system of equation having non trivial solution, then describe the solution set
$3x_1 + 5x_2 - 4x_3 = 0, -3x_1 - 2x_2 + 4x_3 = 0, 6x_1 + x_2 - 8x_3 = 0$

b) Let $v_1 = \begin{bmatrix}1\\2\\3\end{bmatrix}, v_2 = \begin{bmatrix}4\\5\\6\end{bmatrix}, v_3 = \begin{bmatrix}2\\1\\0\end{bmatrix}$ check whether the vector are linearly independent or dependent.

c) Let $A = \begin{bmatrix}2 & 1\\-4 & -2\end{bmatrix}$ and $u = \begin{bmatrix}-1\\2\end{bmatrix}$ determine u belongs to NULL of A.

d) Compute Quadratic form $X'AX$ for $A = \begin{bmatrix}3 & 2 & 0\\2 & 2 & 2\\0 & 2 & 1\end{bmatrix}$ and $x = \begin{bmatrix}x\\y\\z\end{bmatrix}$

e) Assume that T is linear transformation find standard matrix of $T: R^3 \to R^2$ defined by $T(e_1) = (1, 3)$
$T(e_2) = (4, -7)$
$T(e_3) = (-5, 4)$

Q.6 Attempt the following. (Any Three) **09**

a) Determine whether the vector are dependent or independent
Let $v_1 = \begin{bmatrix}0\\0\\2\end{bmatrix}, v_2 = \begin{bmatrix}0\\5\\-8\end{bmatrix}, v_3 = \begin{bmatrix}-3\\4\\1\end{bmatrix}$

b) Show that $\{v_1, v_2, v_3\}$ is orthonormal basis for IR^3 where

$$v_1 = \begin{bmatrix}3/\sqrt{11}\\1/\sqrt{11}\\1/\sqrt{11}\end{bmatrix}, v_2 = \begin{bmatrix}-1/\sqrt{6}\\2/\sqrt{6}\\1/\sqrt{6}\end{bmatrix}, v_3 = \begin{bmatrix}1/\sqrt{66}\\-4/\sqrt{66}\\7/\sqrt{66}\end{bmatrix}$$

c) Describe all solution of $Ax = b$ where

$$A = \begin{bmatrix} 3 & 5 & -4 \\ -3 & -2 & 4 \\ 6 & 1 & 8 \end{bmatrix} b = \begin{bmatrix} 7 \\ -1 \\ 4 \end{bmatrix}$$

d) Find the Eigen values of $A = \begin{bmatrix} 2 & 3 \\ 3 & -6 \end{bmatrix}$

e) Let $b_1 = \begin{bmatrix} 2 \\ 1 \end{bmatrix}, b_2 = \begin{bmatrix} -1 \\ 1 \end{bmatrix}, X = \begin{bmatrix} 4 \\ 5 \end{bmatrix}, B = \{b_1, b_2\}$ find the co-ordinate vector$[X]_B$ of X relative to B.

Q.7 Attempt the following. (Any Two) **10**

a) Find the numerically largest Eigen value of matrix A by power method

$$A = \begin{bmatrix} 1 & 6 & 1 \\ 1 & 2 & 0 \\ 0 & 0 & 3 \end{bmatrix}, \qquad x_0 = \begin{bmatrix} 1 \\ 0 \\ 0 \end{bmatrix}$$

b) Diagonalizable the matrix A $\quad A = \begin{bmatrix} 4 & 2 & 2 \\ 2 & 4 & 2 \\ 2 & 2 & 4 \end{bmatrix}$

c) Find the least square solution of inconsistent system $AX = b$ for

$$A = \begin{bmatrix} 4 & 0 \\ 0 & 2 \\ 1 & 1 \end{bmatrix} \quad b = \begin{bmatrix} 2 \\ 0 \\ 11 \end{bmatrix}$$

Set **S**

S.Y. (B.Tech.) (Electrical Engineering) (Semester - II) (New) (NEP CBCS) Examination: March/April – 2026
Numerical Methods and Linear Algebra (BTN07401)

Day & Date: Saturday, 16-05-2026 Max. Marks: 70
Time: 10:00 AM To 01:00 PM

Instructions: 1) Q. No. 1 is compulsory. It should be solved in the first 30 minutes in Answer Book Page no 03 (Starting page of the Answer Book). Each question carries one mark.
2) Don't forget to Mention question paper set (P/Q/R/S) on top of page.
3) Figures to the right indicates full marks.

MCQ/Objective Type Questions

Duration: 30 Minutes Marks:14

Q.1 Choose the correct Answer. **14**

1) Error in Simpson's $^{3}/_{8}^{\text{th}}$ rule is of order _____.
a) h^7 b) h^5
c) h^4 d) h^2

2) Romberg's Method is used to solve _____.
a) Ordinary differential equation b) Integration
c) Partial differential equation d) All of these

3) If system of equation has no free variable, then it has _____.
a) Unique Solution b) No Solution
c) Infinite Solution d) None of these

4) If A is given matrix. The columns of A are linearly independent if and only if the equation $AX = 0$ _____.
a) Non trivial Solution b) No Solution
c) Only trivial Solution d) None of these

5) Eigen values of matrix are $\begin{bmatrix} 1 & 0 & 0 \\ 0 & 3 & 0 \\ 0 & 0 & 5 \end{bmatrix}$
a) $1, 2, 3$ b) $4, 5, 6$
c) $1, 3$ d) $1, 3, 5$

6) Inner Product of two vector u & u are orthogonal if and only if _____.
a) $u.v = 1$ b) $u.v = 2$
c) $u.v = 0$ d) None of these

7) Least square error in Least square solution $Ax = b$ is _____.

a) $\|b - A\hat{x}\|^2$ b) $\|b + A\hat{x}\|$

c) $\|b - A\hat{x}\|$ d) $b - A\hat{x}$

8) If all Eigen values are positive, then quadratic farm is _____.

a) Positive definite b) Negative definite

c) Positive & Negative definite d) Indefinite

9) $v.v = \|v\|^2$

a) True b) False

10) Newton-Raphson Method Fails when _____.

a) $f'(x)$ is Negative b) $f'(x)$ is positive

c) $f'(x)$ is zero d) None of these

11) As Soon as new value of variable is found by iteration, it is used immediately in the following equation. This Method is called _____.

a) Gauss Seidel b) Gauss elimination

c) Gauss Jacobi d) None of these

12) An equation represented by as $x^2 + \sin x - 5 = 0$ is _____.

a) Algebraic b) Transcendental

c) Both a & b d) None of these

13) If $\frac{dy}{dx} = 2x - y$ & $y(1) = 3$ then by Picard's method first approximation y is _____.

a) 0 b) $x^3 - 3x + 5$

c) x^2 d) None of these

14) The quantity k, obtained by Runge-Kutta Method of Fourth order for differential equation

$$\frac{dy}{dx} = x + y, \qquad y(0) = 1, h = 0.2$$

a) 0.2 b) 0.4

c) 2 d) None of these

Seat No.	

Set **S**

S.Y. (B.Tech.) (Electrical Engineering) (Semester - II) (New) (NEP CBCS) Examination: March/April – 2026
Numerical Methods and Linear Algebra (BTN07401)

Day & Date: Saturday, 16-05-2026 Max. Marks: 56
Time: 10:00 AM To 01:00 PM

Instructions: 1) All questions are compulsory.
2) Figures to the right indicate full marks.

SECTION – I

Q.2 Attempt the following. (Any Three) **09**

a) Find the Positive root of $x^4 - x - 10 = 0$ correct to three decimal places using Newton-Raphson Method.
Take $x_0 = 2$ as initial approximation.

b) Evaluate $I = \int_0^1 \frac{1}{1+x^2} dx$ by Trapezoidal rule taking $h = 0.25$

c) Solve the following System of equation by Gauss-Seidel Method.

$$10x + y + z = 12$$
$$2x + 10y + z = 13$$
$$2x + 2y + 10z = 14$$

d) Apply method Runge Kutta of fourth order to find an approximate value of y when $x = 0.1$ given that

$$\frac{dx}{dy} = x + y \ \& \ y(0) = 1$$

e) Derive Newton iterative formula for $f(x) = \sqrt{N}$

Q.3 Attempt the following. (Any Three) **09**

a) Solve the equation $x^3 - 2x - 5 = 0$ Regula - Falsi Method starting with $a = 2, b = 3$ correct to three decimal places.

b) Solve $\frac{dy}{dx} = 1 + xy, y(2) = 0$ by Picard's method upto second approximate.

c) Solve the system by Gauss-Elimination method

$$x + 2y + z = 3;\ 2x + 3y + 3z = 10;\ 3x - y + 2z = 13$$

d) Using three point Gaussian Quadrature, evaluate $\int_0^1 \frac{1}{1+x} dx$

e) Find the double root of $x^3 - x^2 - x + 1 = 0$ choosing $x_0 = 0.8$

Q.4 Attempt the following. (Any Two) **10**

a) Solve by factorization method the system of equation.

$$x + 5y + z = 14$$
$$2x + y + 3z = 13$$
$$3x + y + 4z = 17$$

b) Solve the non linear equation by Newton method upto two iteration $x^2 + y = 11,\ x + y^2 = 7$, with initial approximation $x_0 = 3.5,\ y_0 = -1.8$

c) Solve the differential equation $\frac{dy}{dx} = 1 + xz, \frac{dz}{dx} = -xy$ for $x = 0.3$ Using fourth order Runge-Kutta method. Take initial values $x_0 = 0, y_0 = 0, z_0 = 1$

SECTION – II

Q.5 Attempt the following. (Any Three) **09**

a) Determine the following system of equation having non trivial solution, then describe the solution set
$3x_1 + 5x_2 - 4x_3 = 0, -3x_1 - 2x_2 + 4x_3 = 0, 6x_1 + x_2 - 8x_3 = 0$

b) Let $v_1 = \begin{bmatrix}1\\2\\3\end{bmatrix}, v_2 = \begin{bmatrix}4\\5\\6\end{bmatrix}, v_3 = \begin{bmatrix}2\\1\\0\end{bmatrix}$ check whether the vector are linearly independent or dependent.

c) Let $A = \begin{bmatrix}2 & 1\\-4 & -2\end{bmatrix}$ and $u = \begin{bmatrix}-1\\2\end{bmatrix}$ determine u belongs to NULL of A.

d) Compute Quadratic form $X'AX$ for $A = \begin{bmatrix}3 & 2 & 0\\2 & 2 & 2\\0 & 2 & 1\end{bmatrix}$ and $x = \begin{bmatrix}x\\y\\z\end{bmatrix}$

e) Assume that T is linear transformation find standard matrix of $T: R^3 \to R^2$ defined by $T(e_1) = (1, 3)$
$T(e_2) = (4, -7)$
$T(e_3) = (-5, 4)$

Q.6 Attempt the following. (Any Three) **09**

a) Determine whether the vector are dependent or independent
Let $v_1 = \begin{bmatrix}0\\0\\2\end{bmatrix}, v_2 = \begin{bmatrix}0\\5\\-8\end{bmatrix}, v_3 = \begin{bmatrix}-3\\4\\1\end{bmatrix}$

b) Show that $\{v_1, v_2, v_3\}$ is orthonormal basis for IR^3 where

$$v_1 = \begin{bmatrix}3/\sqrt{11}\\1/\sqrt{11}\\1/\sqrt{11}\end{bmatrix}, v_2 = \begin{bmatrix}-1/\sqrt{6}\\2/\sqrt{6}\\1/\sqrt{6}\end{bmatrix}, v_3 = \begin{bmatrix}1/\sqrt{66}\\-4/\sqrt{66}\\7/\sqrt{66}\end{bmatrix}$$

c) Describe all solution of $Ax = b$ where

$$A = \begin{bmatrix} 3 & 5 & -4 \\ -3 & -2 & 4 \\ 6 & 1 & 8 \end{bmatrix} b = \begin{bmatrix} 7 \\ -1 \\ 4 \end{bmatrix}$$

d) Find the Eigen values of $A = \begin{bmatrix} 2 & 3 \\ 3 & -6 \end{bmatrix}$

e) Let $b_1 = \begin{bmatrix} 2 \\ 1 \end{bmatrix}, b_2 = \begin{bmatrix} -1 \\ 1 \end{bmatrix}, X = \begin{bmatrix} 4 \\ 5 \end{bmatrix}, B = \{b_1, b_2\}$ find the co-ordinate vector$[X]_B$ of X relative to B.

Q.7 Attempt the following. (Any Two) **10**

a) Find the numerically largest Eigen value of matrix A by power method

$$A = \begin{bmatrix} 1 & 6 & 1 \\ 1 & 2 & 0 \\ 0 & 0 & 3 \end{bmatrix}, \qquad x_0 = \begin{bmatrix} 1 \\ 0 \\ 0 \end{bmatrix}$$

b) Diagonalizable the matrix A $\quad A = \begin{bmatrix} 4 & 2 & 2 \\ 2 & 4 & 2 \\ 2 & 2 & 4 \end{bmatrix}$

c) Find the least square solution of inconsistent system $AX = b$ for

$$A = \begin{bmatrix} 4 & 0 \\ 0 & 2 \\ 1 & 1 \end{bmatrix} \quad b = \begin{bmatrix} 2 \\ 0 \\ 11 \end{bmatrix}$$

5) Use of no-programmable calculator is allowed.

MCQ/Objective Type Questions

Duration: 30 Minutes Marks:14

Q.1 Write the correct answer. **14**

1) A super node is formed when _____.
a) Two voltage sources are in parallel
b) A voltage source is connected between two non-reference nodes
c) A current source is connected between two nodes
d) A resistor is shorted

2) Linearly dependent sources are _____.
a) Independent of other sources
b) Controlled by other circuit variables
c) Always voltage sources
d) Always current sources

3) For AC circuit analysis using mesh or nodal methods, we use _____.
a) Differential equations
b) Integral equations
c) Phasor representations
d) Time-domain values directly

4) The Reciprocity theorem is valid only for circuits that _____.
a) contain at least one dependent source
b) have a single voltage or current source
c) are bilateral and contain a single independent source
d) have multiple independent sources

5) Norton's Theorem is the dual of _____.
a) Superposition Theorem b) Reciprocity Theorem
c) Thevenin's Theorem d) Compensation Theorem

6) Maximum power transfer in AC occurs when _____.
a) Load impedance equals source impedance
b) Load resistance equals source resistance
c) Load reactance equals source reactance
d) Load impedance is zero

7) The branches not included in the tree are called _____.
a) Twigs
b) Links
c) Nodes
d) Co-tree elements

8) What does the initial condition in a network refer to?
a) The value of the source voltage
b) The steady-state response
c) The final value of current
d) The state of energy storage elements at $t = 0^{-}$

9) The transient response of an R-C circuit is governed by _____.
a) Inductor voltage
b) Resistor current
c) Capacitor voltage
d) Source resistance

10) The Laplace transform converts a time-domain differential equation into _____.
a) A polynomial equation
b) An algebraic equation
c) A trigonometric equation
d) A matrix equation

11) In an R-C circuit, the Laplace domain equation for voltage across capacitor is _____.
a) $V(s) = I(s) \cdot 1/sC$
b) $V(s) = I(s) \cdot sC$
c) $V(s) = I(s) \cdot R$
d) $V(s) = I(s) \cdot C$

12) In solving R-L-C circuits using Laplace transform, the solution is obtained by _____.
a) Applying KVL in time domain
b) Using Fourier series
c) Using phasor analysis
d) Solving algebraic equations in s-domain

13) Transmission parameters are also called _____.
a) ABCD parameters
b) Z parameters
c) H parameters
d) Y parameters

14) Which parameter set is most suitable for transistor modeling?
a) Z-parameters
b) Y-parameters
c) H-parameters
d) ABCD parameters

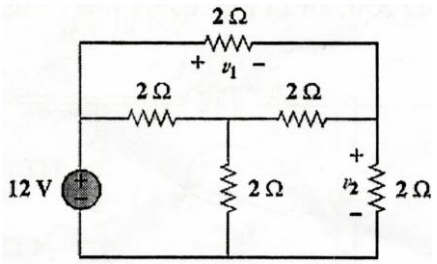
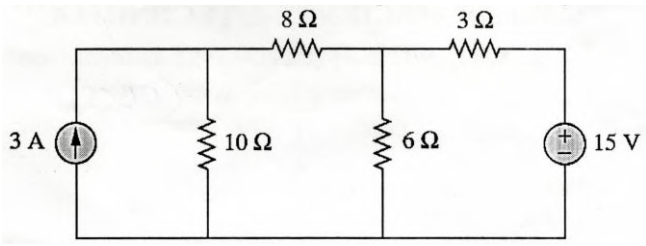
Q.2 Solve Any Four. **16**

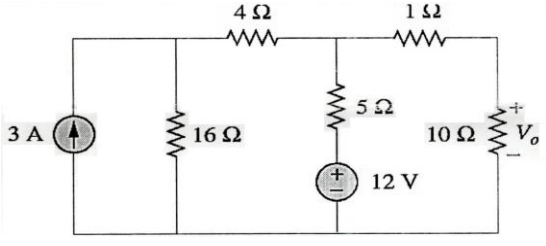
a) Determine v_1 and v_2 using mesh analysis in the circuit of Fig.



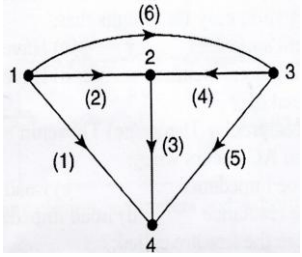
b) Use source transformation to determine the current and power absorbed by the 8Ω resistor.



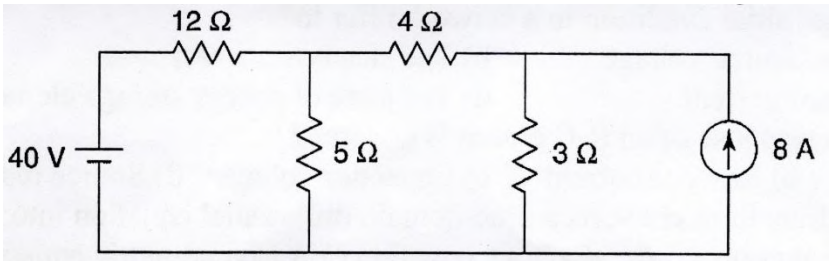
c) Apply Thevenin's theorem to find in the circuit of Fig.



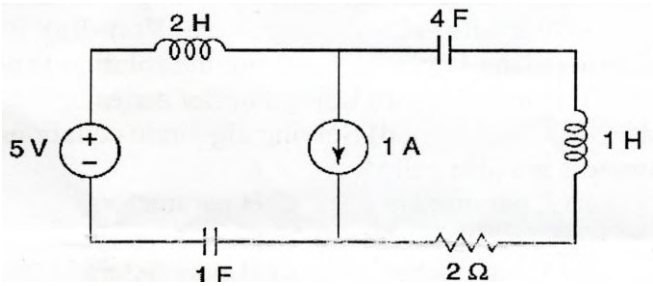
d) Write the complete incidence matrix for the graph shown in Fig



e) Use superposition theorem to find the current through the 4Ω resistor in Fig.



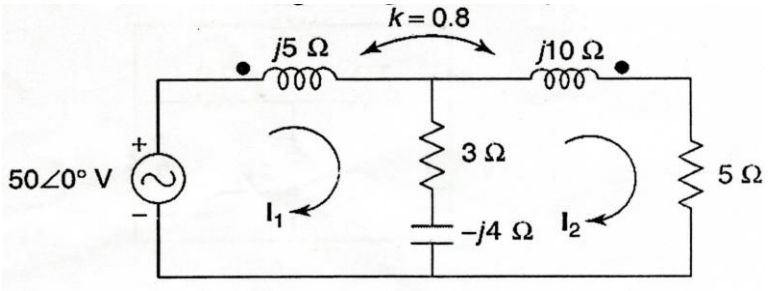
f) Draw the dual of the network shown in Fig.



Q.3 Solve Any Two. **12**

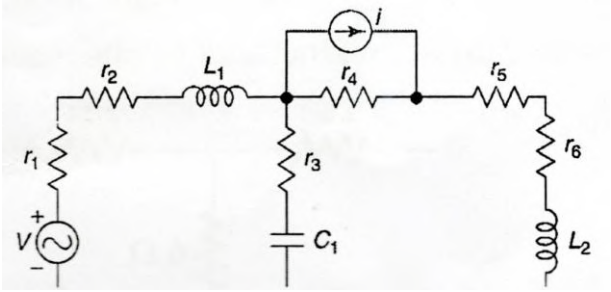
a) State maximum power transfer theorem. Derive the condition for the maximum power transfer theorem for ac circuits.

b) Find the voltage across the 5Ω resistor in Fig. using mesh analysis.



c) For the circuit shown in Fig., draw the oriented and graph and write

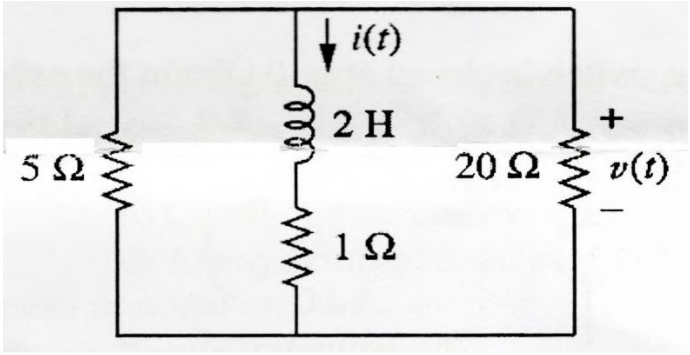
i) incidence matrix
ii) tieset matrix and
iii) cutset matrix



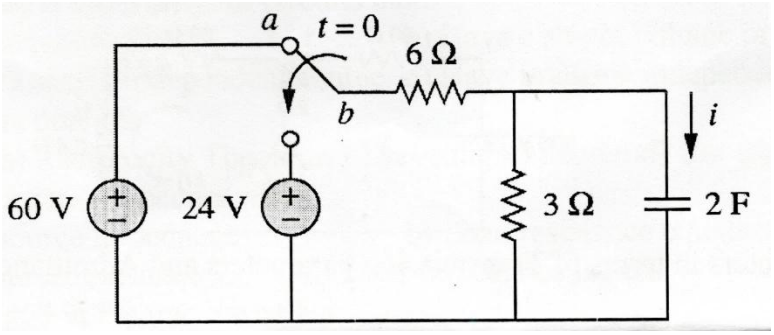
Section – II

Q.4 Solve Any Four. **16**

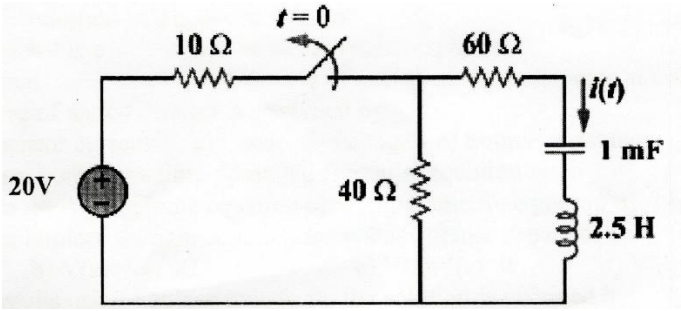
a) Find $i(t)$ and $v(t)$ for $t > 0$ in the circuit of Fig. if $i(0) = 10\ A$



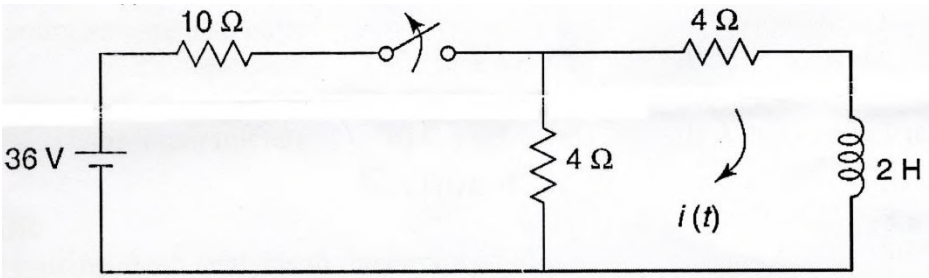
b) The switch in Fig. has been in position 'a' for a long time. At $t = 0$, it moves to position 'b'. Calculate $i(t)$ for all $t > 0$



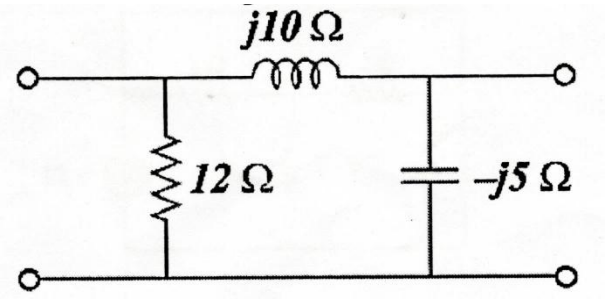
c) Find $i(t)$ for $t > 0$ in the circuit of Fig. using Laplace transform.



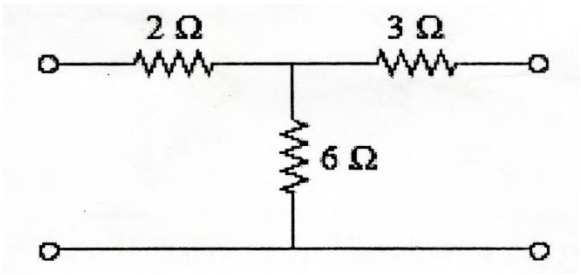
d) The network shown in Fig. has acquired steady-state with the switch closed for $t < 0$. At $t = 0$, the switch is opened. Obtain $i(t)$ for $t > 0$.



e) Calculate the Z parameters for the circuit in Fig.

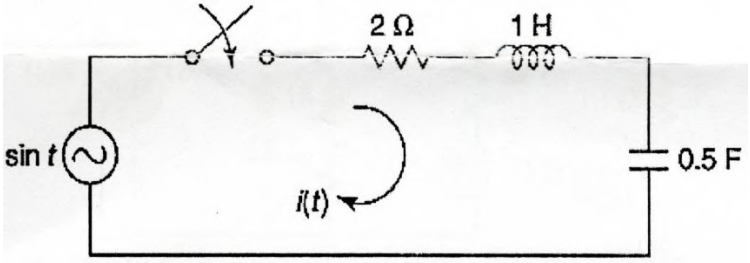


f) Find the hybrid parameters for the two-port network of Fig.

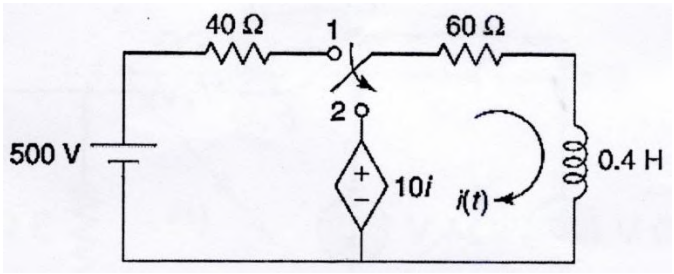


Q.5 Solve Any Two. **12**

a) In the network of Fig., the switch is closed at $t = 0$ Obtain the expression for current $i(t)$ for $t > 0$.



b) For the network shown in Fig., find the current $i(t)$ when the switch is changed from the position 1 to 2 at $t = 0$.



c) Derive Z parameters in terms of Transmission parameters and Admittance parameters.

   b) Controlled by other circuit variables
   c) Always voltage sources
   d) Always current sources

7) For AC circuit analysis using mesh or nodal methods, we use _____.
   a) Differential equations
   b) Integral equations
   c) Phasor representations
   d) Time-domain values directly

8) The Reciprocity theorem is valid only for circuits that _____.
   a) contain at least one dependent source
   b) have a single voltage or current source
   c) are bilateral and contain a single independent source
   d) have multiple independent sources

9) Norton's Theorem is the dual of _____.
   a) Superposition Theorem b) Reciprocity Theorem
   c) Thevenin's Theorem d) Compensation Theorem

10) Maximum power transfer in AC occurs when _____.
   a) Load impedance equals source impedance
   b) Load resistance equals source resistance
   c) Load reactance equals source reactance
   d) Load impedance is zero

11) The branches not included in the tree are called _____.
   a) Twigs b) Links
   c) Nodes d) Co-tree elements

12) What does the initial condition in a network refer to?
   a) The value of the source voltage
   b) The steady-state response
   c) The final value of current
   d) The state of energy storage elements at $t = 0^{-}$

13) The transient response of an R-C circuit is governed by _____.
   a) Inductor voltage b) Resistor current
   c) Capacitor voltage d) Source resistance

14) The Laplace transform converts a time-domain differential equation into _____.
   a) A polynomial equation b) An algebraic equation
   c) A trigonometric equation d) A matrix equation

Seat No.	

Set **R**

S.Y. (B.Tech.) (Electrical Engineering) (Semester - II) (New) (NEP CBCS) Examination: March/April – 2026
Network Analysis (EEPCC-05)

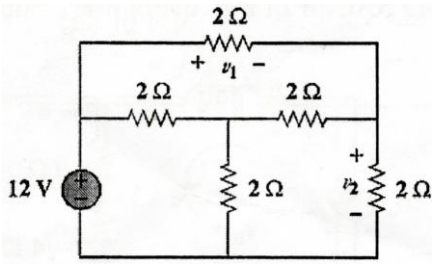
Day & Date: Tuesday, 19-05-2026 Max. Marks: 56
Time: 10:00 AM To 01:00 PM

Instructions: 1) All questions are compulsory.
2) Figures to the right indicate full marks.
3) Use of non-programmable calculator is allowed.
4) Assume suitable data, if necessary.

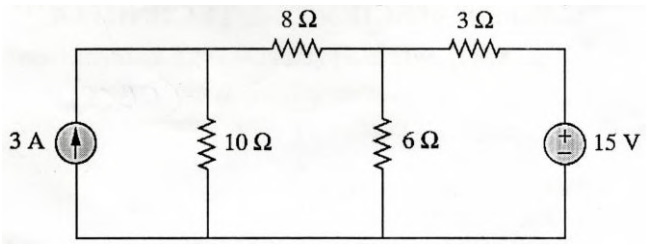
Section – I

Q.2 Solve Any Four. **16**

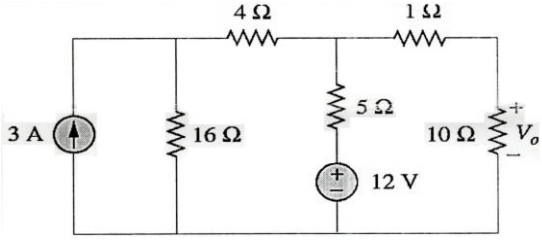
a) Determine v_1 and v_2 using mesh analysis in the circuit of Fig.



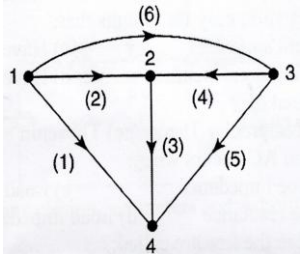
b) Use source transformation to determine the current and power absorbed by the 8Ω resistor.



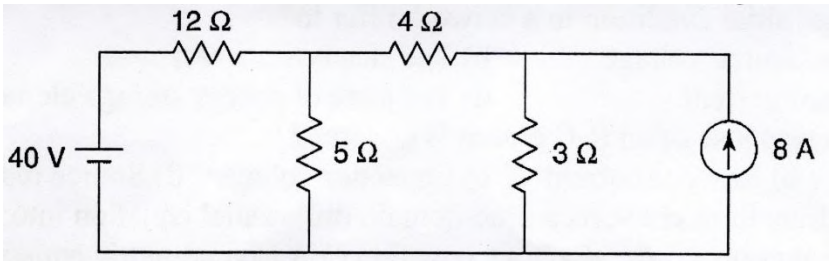
c) Apply Thevenin's theorem to find in the circuit of Fig.



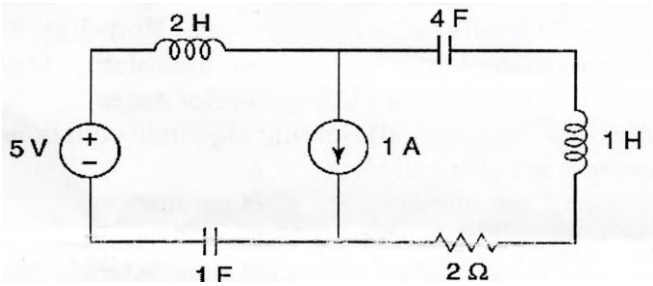
d) Write the complete incidence matrix for the graph shown in Fig



e) Use superposition theorem to find the current through the 4Ω resistor in Fig.



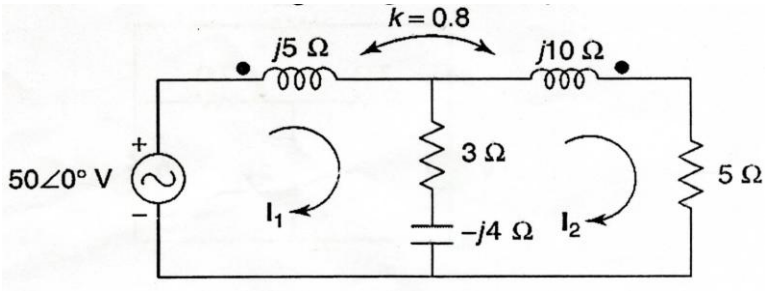
f) Draw the dual of the network shown in Fig.



Q.3 Solve Any Two. **12**

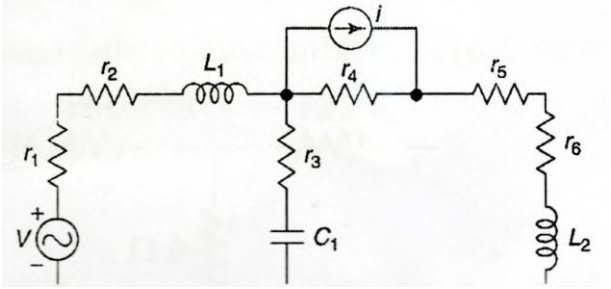
a) State maximum power transfer theorem. Derive the condition for the maximum power transfer theorem for ac circuits.

b) Find the voltage across the 5Ω resistor in Fig. using mesh analysis.



c) For the circuit shown in Fig., draw the oriented and graph and write

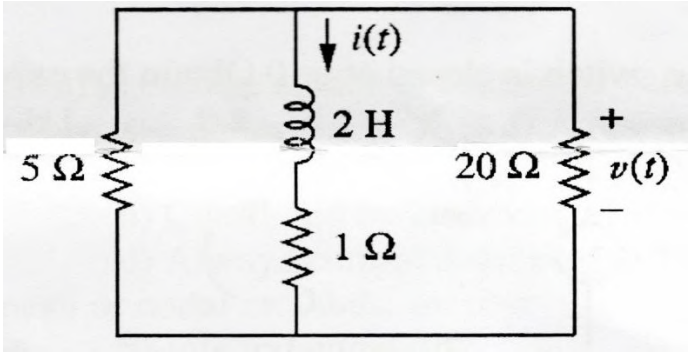
i) incidence matrix
ii) tieset matrix and
iii) cutset matrix



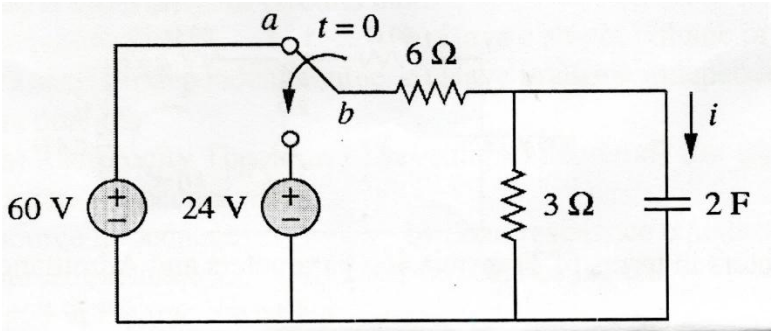
Section – II

Q.4 Solve Any Four. **16**

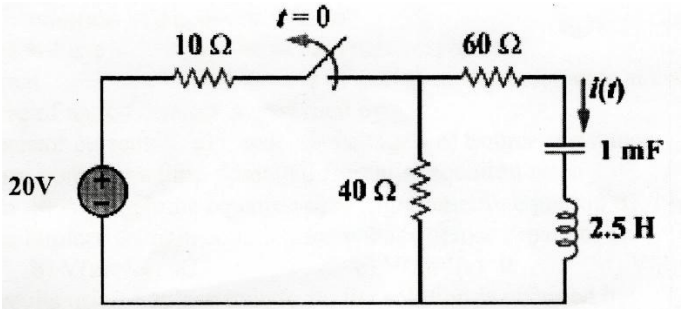
a) Find $i(t)$ and $v(t)$ for $t > 0$ in the circuit of Fig. if $i(0) = 10\ A$



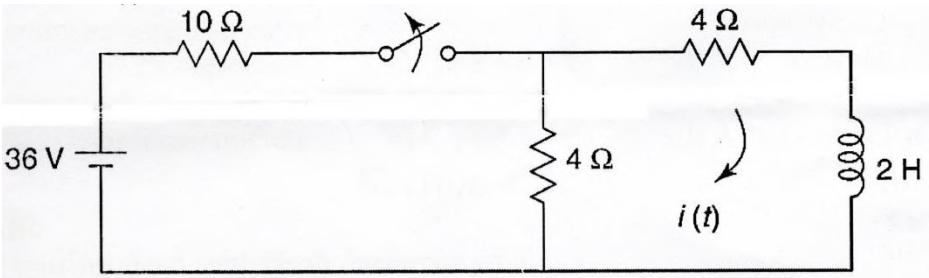
b) The switch in Fig. has been in position 'a' for a long time. At $t = 0$, it moves to position 'b'. Calculate $i(t)$ for all $t > 0$



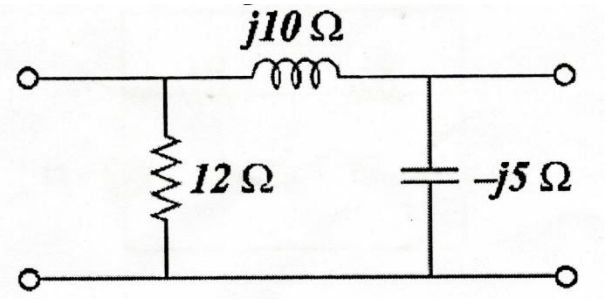
c) Find $i(t)$ for $t > 0$ in the circuit of Fig. using Laplace transform.



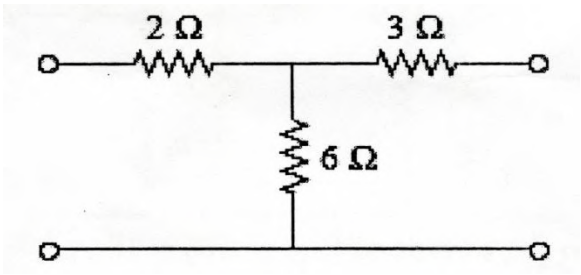
d) The network shown in Fig. has acquired steady-state with the switch closed for $t < 0$. At $t = 0$, the switch is opened. Obtain $i(t)$ for $t > 0$.



e) Calculate the Z parameters for the circuit in Fig.

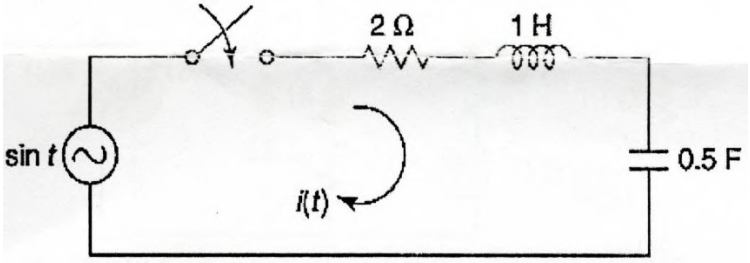


f) Find the hybrid parameters for the two-port network of Fig.

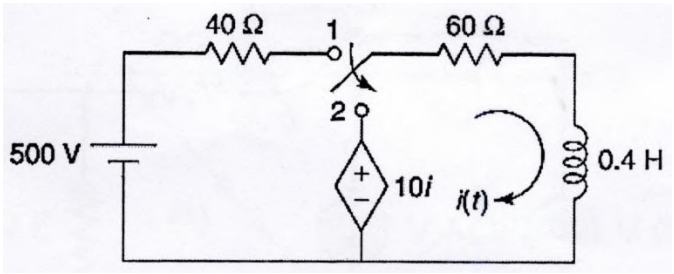


Q.5 Solve Any Two. **12**

a) In the network of Fig., the switch is closed at $t = 0$ Obtain the expression for current $i(t)$ for $t > 0$.



b) For the network shown in Fig., find the current $i(t)$ when the switch is changed from the position 1 to 2 at $t = 0$.



c) Derive Z parameters in terms of Transmission parameters and Admittance parameters.

S.Y. (B.Tech.) (Electrical Engineering) (Semester - II) (New) (NEP CBCS) Examination: March/April – 2026
Network Analysis (EEPCC-05)

Day & Date: Tuesday, 19-05-2026 Max. Marks: 70
Time: 10:00 AM To 01:00 PM

Instructions: 1) Q. No. 1 is compulsory. It should be solved in the first 30 minutes in Answer Book Page no 03 (Starting page of the Answer Book). Each question carries one mark.
2) Don't forget to Mention question paper set (P/Q/R/S) on top of page.
3) Figures to the right indicates full marks.
4) Assume suitable data if necessary and mention it clearly.
5) Use of no-programmable calculator is allowed.

MCQ/Objective Type Questions

Duration: 30 Minutes Marks:14

Q.1 Write the correct answer. **14**

1) Maximum power transfer in AC occurs when _____.
a) Load impedance equals source impedance
b) Load resistance equals source resistance
c) Load reactance equals source reactance
d) Load impedance is zero

2) The branches not included in the tree are called _____.
a) Twigs b) Links
c) Nodes d) Co-tree elements

3) What does the initial condition in a network refer to?
a) The value of the source voltage
b) The steady-state response
c) The final value of current
d) The state of energy storage elements at $t = 0^-$

4) The transient response of an R-C circuit is governed by _____.
a) Inductor voltage b) Resistor current
c) Capacitor voltage d) Source resistance

5) The Laplace transform converts a time-domain differential equation into _____.
a) A polynomial equation b) An algebraic equation
c) A trigonometric equation d) A matrix equation

6) In an R-C circuit, the Laplace domain equation for voltage across capacitor is _____.

a) $V(s) = I(s) \cdot 1/sC$ b) $V(s) = I(s) \cdot sC$

c) $V(s) = I(s) \cdot R$ d) $V(s) = I(s) \cdot C$

7) In solving R-L-C circuits using Laplace transform, the solution is obtained by _____.

a) Applying KVL in time domain
b) Using Fourier series
c) Using phasor analysis
d) Solving algebraic equations in s-domain

8) Transmission parameters are also called _____.

a) ABCD parameters b) Z parameters

c) H parameters d) Y parameters

9) Which parameter set is most suitable for transistor modeling?

a) Z-parameters b) Y-parameters

c) H-parameters d) ABCD parameters

10) A super node is formed when _____.

a) Two voltage sources are in parallel
b) A voltage source is connected between two non-reference nodes
c) A current source is connected between two nodes
d) A resistor is shorted

11) Linearly dependent sources are _____.

a) Independent of other sources
b) Controlled by other circuit variables
c) Always voltage sources
d) Always current sources

12) For AC circuit analysis using mesh or nodal methods, we use _____.

a) Differential equations
b) Integral equations
c) Phasor representations
d) Time-domain values directly

13) The Reciprocity theorem is valid only for circuits that _____.

a) contain at least one dependent source
b) have a single voltage or current source
c) are bilateral and contain a single independent source
d) have multiple independent sources

14) Norton's Theorem is the dual of _____.

a) Superposition Theorem b) Reciprocity Theorem

c) Thevenin's Theorem d) Compensation Theorem

MCQ/Objective Type Questions

Duration: 30 Minutes Marks:14

Q.1 Choose correct Answer. **14**

1) In squirrel-cage induction motors the rotor slots are slightly skewed to _____.
a) increase the mechanical strength of rotor bars
b) reduce the cost of construction
c) reduce the magnetic hum and locking tendency of rotor
d) provide balancing

2) The torque developed by an induction motor is _____.
a) directly proportional to the square of the rotor resistance
b) directly proportional to the square of the rotor reactance
c) directly proportional to the square of the supply voltage
d) directly proportional to the square of the slip

3) If the rotor resistance is increased in a slip-ring induction motor, then _____.
a) both starting torque and pf will increase
b) both starting torque and pf will decrease
c) starting torque decreases but pf increases
d) starting torque increases but pf decreases

4) In V/f speed control technique _____.
a) power developed is kept constant
b) air gap flux is kept constant
c) torque developed is kept constant
d) rotor speed is kept constant

5) The power input in blocked-rotor test performed on a 3-phase induction motor is approximately equal to _____.
a) iron loss in the core
b) hysteresis loss in the core
c) eddy current loss in the core
d) copper loss in the windings

6) The magnitude of rotating flux _____ at all instants of time.
a) changes
b) remains constant
c) pulsates
d) Any of the mentioned

7) Under locked rotor condition, the rotor circuit frequency of a 3-phase induction motor connected to a 50 Hz supply will be _____.
a) 3 Hz
b) 30 Hz
c) 50 Hz
d) 60 Hz

8) The direction of rotation of a split-phase induction motor can be reversed by _____.
a) reversing the connections of the supply terminals
b) reversing the connections of the main winding only
c) reversing the connections of the starting winding only
d) either (b) or (c)

9) For a three-phase, 4-pole alternator the winding is placed in 96 slots. The No. of slots/pole/phase will be _____.
a) 2
b) 4
c) 8
d) 16

10) Short circuit test on an I.M. cannot be used to determine _____.
a) Windage losses
b) Cu losses
c) Transformation ratio
d) Power scale of circle diagram

11) Alternators are usually designed to generate _____.
a) Definite currents
b) Definite power factor
c) Variable frequencies
d) Definite frequencies

12) In an alternator, the armature reaction will be completely magnetizing in case the load power factor is _____.
a) Zero lagging
b) Zero leading
c) 0.866
d) Unity

13) The field winding of a three phase synchronous machine is excited by _____.
a) Single-phase ac supply
b) Three- phase ac supply
c) DC supply
d) Supply obtained from an inverter

14) Maximum power developed in a synchronous motor occurs at a coupling angle of _____.

a) 0°
b) 60°
c) 90°
d) 120°

S.Y. (B.Tech.) (Electrical Engineering) (Semester - II) (New) (NEP CBCS) Examination: March/April – 2026
Electrical Machines - II (BTN07402)

Day & Date: Tuesday, 19-05-2026 Max. Marks: 56
Time: 10:00 AM To 01:00 PM

Instructions: 1) All questions are compulsory.
2) Figures to the right indicate full marks.
3) Assume suitable data if necessary and mention it clearly.
4) Draw neat diagrams whenever necessary.

SECTION – I

Q.2 Attempt Any Four of the following. **16**

a) Explain working operation 3-Phase induction motor.

b) Explain, with the help of sketches, the construction of a 3-phase phase-wound induction motor.

c) Explain with the help of suitable diagram, how rotating magnetic field is developed in a 3-phase winding when 3-phase AC supply is given to it.

d) Derive the condition for maximum torque of 3-phase Induction Motor.

e) Explain the working operation of Direct-On-Line starter with diagram.

f) Explain slip power recovery scheme of speed control of three-phase slip-ring induction motors.

Q.3 Attempt of the following. **12**

a) A 50 H.P., 3-f, 6-pole induction motor delivers full load output at 960 rpm at 0.8 p.f. when supplied with 400V, 50Hz supply. Losses due to windage and friction come out to be 2 H.P. and stator losses are 2 kW. Find out:
i) total rotor Cu loss;
ii) Efficiency and
iii) line current.

b) The following readings were obtained when no-load and blocked rotor tests were performed on a 3-phase, 400 V, 14.9 kW induction motor:
No-load test: 400 V, 1250 W, 9 A
Blocked rotor test: 150 V, 4000 W, 38 A
Find full-load current and power factor of the motor using circle diagram.

OR

b) Explain torque-slip characteristics of 3 phase Induction Motor. Also explain the effect of change in rotor resistance on torque-slip characteristics of 3 phase Induction Motor.

SECTION – II

Q.4 Attempt Any Four of the following. **16**

a) With a neat circuit diagram and vector diagram explain capacitor start Capacitor run single phase IM.

b) Derive the EMF equation of the alternator with short pitch coil and distributed windings.

c) Explain why the 1-ph induction motor is not self-starting. How to make it self-start?

d) Explain the MMF method of calculating the voltage regulation of an alternator when the power factor is lagging.

e) Explain the Hunting phenomenon of a synchronous motor. State its causes and remedies.

f) Explain the constructional features of an alternator.

Q.5 Attempt Any Two of the following. **12**

a) What is armature reaction? Explain the effect of armature reaction on the terminal voltage of an alternator at various power factors

b) Explain in detail the double-field revolving and cross-field revolving theory related to single-phase induction motors.

c) Explain the V and inverted V curves of a synchronous motor.

iii) line current.

b) The following readings were obtained when no-load and blocked rotor tests were performed on a 3-phase, 400 V, 14.9 kW induction motor:
No-load test: 400 V, 1250 W, 9 A
Blocked rotor test: 150 V, 4000 W, 38 A
Find full-load current and power factor of the motor using circle diagram.

OR

b) Explain torque-slip characteristics of 3 phase Induction Motor. Also explain the effect of change in rotor resistance on torque-slip characteristics of 3 phase Induction Motor.

SECTION – II

Q.4 Attempt Any Four of the following. **16**

a) With a neat circuit diagram and vector diagram explain capacitor start Capacitor run single phase IM.

b) Derive the EMF equation of the alternator with short pitch coil and distributed windings.

c) Explain why the 1-ph induction motor is not self-starting. How to make it self-start?

d) Explain the MMF method of calculating the voltage regulation of an alternator when the power factor is lagging.

e) Explain the Hunting phenomenon of a synchronous motor. State its causes and remedies.

f) Explain the constructional features of an alternator.

Q.5 Attempt Any Two of the following. **12**

a) What is armature reaction? Explain the effect of armature reaction on the terminal voltage of an alternator at various power factors

b) Explain in detail the double-field revolving and cross-field revolving theory related to single-phase induction motors.

c) Explain the V and inverted V curves of a synchronous motor.

S.Y. (B.Tech.) (Electrical Engineering) (Semester - II) (New) (NEP CBCS) Examination: March/April – 2026
Electrical Machines - II (BTN07402)

Day & Date: Tuesday, 19-05-2026 Max. Marks: 70
Time: 10:00 AM To 01:00 PM

Instructions: 1) Q. No. 1 is compulsory. It should be solved in the first 30 minutes in Answer Book Page no 03 (Starting page of the Answer Book). Each question carries one mark.
2) Don't forget to Mention question paper set (P/Q/R/S) on top of page.
3) Figures to the right indicates full marks.
4) Assume suitable data if necessary and mention it clearly.

MCQ/Objective Type Questions

Duration: 30 Minutes Marks:14

Q.1 Choose correct Answer. **14**

1) The magnitude of rotating flux _____ at all instants of time.
a) changes b) remains constant
c) pulsates d) Any of the mentioned

2) Under locked rotor condition, the rotor circuit frequency of a 3-phase induction motor connected to a 50 Hz supply will be _____.
a) 3 Hz b) 30 Hz
c) 50 Hz d) 60 Hz

3) The direction of rotation of a split-phase induction motor can be reversed by _____.
a) reversing the connections of the supply terminals
b) reversing the connections of the main winding only
c) reversing the connections of the starting winding only
d) either (b) or (c)

4) For a three-phase, 4-pole alternator the winding is placed in 96 slots. The No. of slots/pole/phase will be _____.
a) 2 b) 4
c) 8 d) 16

5) Short circuit test on an I.M. cannot be used to determine _____.
a) Windage losses
b) Cu losses
c) Transformation ratio
d) Power scale of circle diagram

6) Alternators are usually designed to generate _____.
   a) Definite currents
   b) Definite power factor
   c) Variable frequencies
   d) Definite frequencies

7) In an alternator, the armature reaction will be completely magnetizing in case the load power factor is _____.
   a) Zero lagging
   b) Zero leading
   c) 0.866
   d) Unity

8) The field winding of a three phase synchronous machine is excited by _____.
   a) Single-phase ac supply
   b) Three- phase ac supply
   c) DC supply
   d) Supply obtained from an inverter

9) Maximum power developed in a synchronous motor occurs at a coupling angle of _____.
   a) 0°
   b) 60°
   c) 90°
   d) 120°

10) In squirrel-cage induction motors the rotor slots are slightly skewed to _____.
   a) increase the mechanical strength of rotor bars
   b) reduce the cost of construction
   c) reduce the magnetic hum and locking tendency of rotor
   d) provide balancing

11) The torque developed by an induction motor is _____.
   a) directly proportional to the square of the rotor resistance
   b) directly proportional to the square of the rotor reactance
   c) directly proportional to the square of the supply voltage
   d) directly proportional to the square of the slip

12) If the rotor resistance is increased in a slip-ring induction motor, then _____.
   a) both starting torque and pf will increase
   b) both starting torque and pf will decrease
   c) starting torque decreases but pf increases
   d) starting torque increases but pf decreases

13) In V/f speed control technique _____.
   a) power developed is kept constant
   b) air gap flux is kept constant
   c) torque developed is kept constant
   d) rotor speed is kept constant

14) The power input in blocked-rotor test performed on a 3-phase induction motor is approximately equal to _____.

a) iron loss in the core
b) hysteresis loss in the core
c) eddy current loss in the core
d) copper loss in the windings

Seat No.		Set	S

S.Y. (B.Tech.) (Electrical Engineering) (Semester - II) (New) (NEP CBCS) Examination: March/April – 2026
Electrical Machines - II (BTN07402)

Day & Date: Tuesday, 19-05-2026 Max. Marks: 56
Time: 10:00 AM To 01:00 PM

Instructions: 1) All questions are compulsory.
2) Figures to the right indicate full marks.
3) Assume suitable data if necessary and mention it clearly.
4) Draw neat diagrams whenever necessary.

SECTION – I

Q.2 Attempt Any Four of the following. **16**

a) Explain working operation 3-Phase induction motor.

b) Explain, with the help of sketches, the construction of a 3-phase phase-wound induction motor.

c) Explain with the help of suitable diagram, how rotating magnetic field is developed in a 3-phase winding when 3-phase AC supply is given to it.

d) Derive the condition for maximum torque of 3-phase Induction Motor.

e) Explain the working operation of Direct-On-Line starter with diagram.

f) Explain slip power recovery scheme of speed control of three-phase slip-ring induction motors.

Q.3 Attempt of the following. **12**

a) A 50 H.P., 3-f, 6-pole induction motor delivers full load output at 960 rpm at 0.8 p.f. when supplied with 400V, 50Hz supply. Losses due to windage and friction come out to be 2 H.P. and stator losses are 2 kW. Find out:
i) total rotor Cu loss;
ii) Efficiency and
iii) line current.

b) The following readings were obtained when no-load and blocked rotor tests were performed on a 3-phase, 400 V, 14.9 kW induction motor:
No-load test: 400 V, 1250 W, 9 A
Blocked rotor test: 150 V, 4000 W, 38 A
Find full-load current and power factor of the motor using circle diagram.

OR

b) Explain torque-slip characteristics of 3 phase Induction Motor. Also explain the effect of change in rotor resistance on torque-slip characteristics of 3 phase Induction Motor.

SECTION – II

Q.4 Attempt Any Four of the following. **16**

4) Assume suitable data if required.

MCQ/Objective Type Questions

Duration: 30 Minutes Marks:14

Q.1 Choose the correct Answer. **14**

1) The slip of an induction motor normally does not depend on _____.
a) rotor speed
b) synchronous speed
c) shaft torque
d) core-loss component

2) Maximum torque in an induction motor is proportional to _____.
a) The square of the rotor-induced EMF at standstill
b) The rotor reactance
c) The rotor resistance
d) All of the above

3) For a three-phase slip-ring induction motor, the starting torque is maximum when _____.
a) Rotor reactance = Rotor resistance
b) Rotor reactance = 0
c) Rotor resistance = 0
d) Rotor reactance > Rotor resistance

4) How does increasing the rotor resistance affect the torque-speed characteristics of an induction motor?
a) Shifts the maximum torque point to a lower slip region
b) Increases the maximum torque
c) Decreases the ratio of full load torque to maximum torque
d) Shifts the maximum torque point to a higher slip region

5) What is the primary reason for reduced rotor iron losses in an induction motor?
a) Very low frequency of induced emf in the rotor
b) Very low emf induced in the rotor
c) Very low flux density in rotor parts
d) Use of laminated core

6) The maximum torque of an induction motor can be determined from the circle diagram by _____.
   a) Drawing a vertical line from the origin
   b) Finding the point where the tangent from the origin is perpendicular to the torque line
   c) Using the highest point on the circle
   d) Finding the point where the curve reaches its highest power output

7) Changing the number of poles of a motor directly affects its _____.
   a) Slip
   b) Rotor resistance
   c) Synchronous speed
   d) Power factor

8) Single phase ac motors are classified on the basis of _____.
   a) Size
   b) Construction
   c) starting methods
   d) both construction and starting methods

9) When a single-phase induction motor is excited with single phase ac voltage, the magnetic field set up is equivalent to _____.
   a) two fields, rotating in opposite directions with different speeds
   b) two fields, rotating at synchronous speed in opposite directions
   c) two fields, rotating at synchronous speed
   d) two fields, rotating in the same direction but at different speeds

10) For a short-pitched synchronous machine, the winding factor (Kw) is _____.
   a) Greater than 1
   b) Equal to 1
   c) Less than 1
   d) Zero

11) If the flux per pole (Φ) in a synchronous generator is doubled, what happens to the induced EMF?
   a) It is halved
   b) It remains the same
   c) It doubles
   d) It quadruples

12) In the equivalent circuit of a synchronous motor, what does the back EMF (Eb) represent?
   a) The applied terminal voltage
   b) The voltage drops across the armature resistance
   c) The voltage drops across the synchronous reactance
   d) The generated EMF due to the rotor field

13) Synchronous motor delivers lagging power at _____.
   a) leading pf
   b) lagging pf
   c) zero pf
   d) unity pf

14) When the load on an alternator is varied, its terminal voltage also changes due to _____.

a) armature resistance
b) leakage reactance
c) armature reaction
d) all of the mentioned

Q.2 Attempt the following. (Any Four) **16**

a) Explain with the help of suitable diagram, how rotating magnetic field is developed in a 3-phase winding when 3-phase AC supply is given to it.

b) A 746 KW, 3-phase, 50Hz, 16-pole induction motor has a rotor impedance of (0.02 + j 0.15) Ohm at standstill. Full load torque is obtained at 360 rpm. Calculate,
i) the ratio of maximum to full-load torque
ii) the speed of maximum torque

c) A 3 phase, 6 pole, 50 Hz induction motor has a slip of 1 % at no load and 3% at full load. Determine:
i) Synchronous speed and No load speed
ii) Full load speed
iii) Frequency of rotor current at stand still
iv) Frequency of rotor current at full load

d) Draw and explain power flow diagram in case of 3 phase induction motor.

e) Explain speed control of three-phase slip-ring induction motor by changing rotor resistance.

Q.3 Attempt the following. (Any Two) **12**

a) Draw and explain torque-slip characteristics of three phase induction motor. Derive the condition for maximum torque of three phase induction motor.

b) Explain the procedure to construct the circle diagram of induction motor. Also discuss hoe slip and rotor current can be calculated at full load condition using circle diagram.

c) The following readings were obtained when no-load and blocked rotor tests were performed on a 3-phase, 400 V, 14.9 kW induction motor:
No-load test: 400 V, 1250 W, 9 A
Blocked rotor test: 150 V, 4000 W, 38 A
Find full-load current and power factor of the motor using circle diagram.

Section – II

Q.4 Attempt the following. (Any Four) **16**

a) Explain double revolving field theory of single phase shaded pole motor.

b) Name different methods of starting a synchronous motor, explain any one in detailed.

c) Explain the methods of synchronization of an alternator.

d) A 3-phase, 50Hz, star connected alternator runs at 600 rpm has 60 stator slots with 4 conductors per slot. Flux per pole is 0.06 Wb. Determine the phase and line e.m.f.

e) Explain the operation of synchronous motor with constant load and over excitation with phasor diagram.

Q.5 Attempt the following. (Any Two) **12**

a) Draw and explain how equivalent circuit of single-phase induction motor can be obtained.

b) Explain how voltage regulation can be computed by MMF method in alternator.

c) Explain the operation of synchronous motor with constant load and following type of excitation with phasor diagram.

i) Under excitation

ii) Over excitation

S.Y. (B.Tech.) (Electrical Engineering) (Semester - II) (New) (NEP CBCS) Examination: March/April – 2026
AC Machines (EEPCC-06)

Day & Date: Thursday, 21-05-2026 Max. Marks: 70
Time: 10:00 AM To 01:00 PM

Instructions: 1) Q. No. 1 is compulsory. It should be solved in the first 30 minutes in Answer Book Page no 03 (Starting page of the Answer Book). Each question carries one mark.
2) Don't forget to Mention question paper set (P/Q/R/S) on top of page.
3) Figures to the right indicate full marks.
4) Assume suitable data if required.

MCQ/Objective Type Questions

Duration: 30 Minutes Marks:14

Q.1 Choose the correct Answer. **14**

1) The maximum torque of an induction motor can be determined from the circle diagram by _____.
a) Drawing a vertical line from the origin
b) Finding the point where the tangent from the origin is perpendicular to the torque line
c) Using the highest point on the circle
d) Finding the point where the curve reaches its highest power output

2) Changing the number of poles of a motor directly affects its _____.
a) Slip b) Rotor resistance
c) Synchronous speed d) Power factor

3) Single phase ac motors are classified on the basis of _____.
a) Size
b) Construction
c) starting methods
d) both construction and starting methods

4) When a single-phase induction motor is excited with single phase ac voltage, the magnetic field set up is equivalent to _____.
a) two fields, rotating in opposite directions with different speeds
b) two fields, rotating at synchronous speed in opposite directions
c) two fields, rotating at synchronous speed
d) two fields, rotating in the same direction but at different speeds

5) For a short-pitched synchronous machine, the winding factor (Kw) is _____.
a) Greater than 1 b) Equal to 1
c) Less than 1 d) Zero

6) If the flux per pole (Φ) in a synchronous generator is doubled, what happens to the induced EMF?
a) It is halved
b) It remains the same
c) It doubles
d) It quadruples

7) In the equivalent circuit of a synchronous motor, what does the back EMF (Eb) represent?
a) The applied terminal voltage
b) The voltage drops across the armature resistance
c) The voltage drops across the synchronous reactance
d) The generated EMF due to the rotor field

8) Synchronous motor delivers lagging power at _____.
a) leading pf
b) lagging pf
c) zero pf
d) unity pf

9) When the load on an alternator is varied, its terminal voltage also changes due to _____.
a) armature resistance
b) leakage reactance
c) armature reaction
d) all of the mentioned

10) The slip of an induction motor normally does not depend on _____.
a) rotor speed
b) synchronous speed
c) shaft torque
d) core-loss component

11) Maximum torque in an induction motor is proportional to _____.
a) The square of the rotor-induced EMF at standstill
b) The rotor reactance
c) The rotor resistance
d) All of the above

12) For a three-phase slip-ring induction motor, the starting torque is maximum when _____.
a) Rotor reactance $=$ Rotor resistance
b) Rotor reactance $= 0$
c) Rotor resistance $= 0$
d) Rotor reactance $>$ Rotor resistance

13) How does increasing the rotor resistance affect the torque-speed characteristics of an induction motor?
a) Shifts the maximum torque point to a lower slip region
b) Increases the maximum torque
c) Decreases the ratio of full load torque to maximum torque
d) Shifts the maximum torque point to a higher slip region

14) What is the primary reason for reduced rotor iron losses in an induction motor?

a) Very low frequency of induced emf in the rotor
b) Very low emf induced in the rotor
c) Very low flux density in rotor parts
d) Use of laminated core

Set S

S.Y. (B.Tech.) (Electrical Engineering) (Semester - II) (New) (NEP CBCS) Examination: March/April – 2026
AC Machines (EEPCC-06)

Day & Date: Thursday, 21-05-2026 Max. Marks: 56
Time: 10:00 AM To 01:00 PM

Instructions: 1) All questions are compulsory.
2) Figures to the right indicate full marks.
3) Assume suitable data if necessary.
4) Draw neat diagrams whenever necessary.

Section – I

Q.2 Attempt the following. (Any Four) **16**

a) Explain with the help of suitable diagram, how rotating magnetic field is developed in a 3-phase winding when 3-phase AC supply is given to it.

b) A 746 KW, 3-phase, 50Hz, 16-pole induction motor has a rotor impedance of (0.02 + j 0.15) Ohm at standstill. Full load torque is obtained at 360 rpm. Calculate,
i) the ratio of maximum to full-load torque
ii) the speed of maximum torque

c) A 3 phase, 6 pole, 50 Hz induction motor has a slip of 1 % at no load and 3% at full load. Determine:
i) Synchronous speed and No load speed
ii) Full load speed
iii) Frequency of rotor current at stand still
iv) Frequency of rotor current at full load

d) Draw and explain power flow diagram in case of 3 phase induction motor.

e) Explain speed control of three-phase slip-ring induction motor by changing rotor resistance.

Q.3 Attempt the following. (Any Two) **12**

a) Draw and explain torque-slip characteristics of three phase induction motor. Derive the condition for maximum torque of three phase induction motor.

b) Explain the procedure to construct the circle diagram of induction motor. Also discuss hoe slip and rotor current can be calculated at full load condition using circle diagram.

c) The following readings were obtained when no-load and blocked rotor tests were performed on a 3-phase, 400 V, 14.9 kW induction motor:
No-load test: 400 V, 1250 W, 9 A
Blocked rotor test: 150 V, 4000 W, 38 A
Find full-load current and power factor of the motor using circle diagram.

Section – II

Q.4 Attempt the following. (Any Four) **16**

a) Explain double revolving field theory of single phase shaded pole motor.

b) Name different methods of starting a synchronous motor, explain any one in detailed.

c) Explain the methods of synchronization of an alternator.

d) A 3-phase, 50Hz, star connected alternator runs at 600 rpm has 60 stator slots with 4 conductors per slot. Flux per pole is 0.06 Wb. Determine the phase and line e.m.f.

e) Explain the operation of synchronous motor with constant load and over excitation with phasor diagram.

Q.5 Attempt the following. (Any Two) **12**

a) Draw and explain how equivalent circuit of single-phase induction motor can be obtained.

b) Explain how voltage regulation can be computed by MMF method in alternator.

c) Explain the operation of synchronous motor with constant load and following type of excitation with phasor diagram.

i) Under excitation

ii) Over excitation

Set P

S.Y. (B.Tech.) (Electrical Engineering) (Semester - II) (New) (NEP CBCS) Examination: March/April – 2026
Power System – II (BTN07403)

Day & Date: Thursday, 21-05-2026 Max. Marks: 70
Time: 10:00 AM To 01:00 PM

Instructions: 1) Q. No. 1 is compulsory. It should be solved in the first 30 minutes in Answer Book Page no 03 (Starting page of the Answer Book). Each question carries one mark.
2) Don't forget to Mention question paper set (P/Q/R/S) on top of page.
3) Figures to the right indicates full marks.
4) Assume suitable data if necessary and mention it clearly.

MCQ/Objective Type Questions

Duration: 30 Minutes Marks:14

Q.1 Choose the correct alternatives from the given options and rewrite the sentence. **14**

1) In triangular configuration, inductance and capacitance values are _____ and _____ respectively.
a) less, less
b) higher, higher
c) less, higher
d) higher, less

2) What is the purpose of bedding on the underground cables?
a) To avoid leakage of current
b) To protect the sheath against corrosion
c) To protect the sheath from mechanical injury due to armoring
d) Both b) and c)

3) The cable best suited for the transmission of voltages from 33 kV to 66 kV is _____.
a) Belted cables
b) Screened cables
c) Pressure cables
d) None of these

4) What does capacitance grade of cables mean?
a) Use of dielectrics in different concentrations
b) Introduction of capacitance at various lengths of cable to the effect of inductance
c) Use of dielectrics of different permittivity's
d) Grading according to capacitance per km length of the cable

5) In long transmission lines Resistance and Capacitance parameters of lines are connected in _____.
a) Series, shunt
b) Series, series
c) Shunt, shunt
d) Shunt, parallel

6) In nominal$-\pi$ method of solution of medium transmission line, capacitance is assumed to be _____.
   a) Distributed uniformly from sending end to receiving end
   b) Divided into two halves
   c) Lumped at the generation end
   d) Lumped at middle of generation and load end

7) Which of the following distribution system is more reliable?
   a) Radial system
   b) Tree system
   c) Ring main system
   d) All are equally reliable

8) The sag of a transmission line depends upon _____.
   a) Weight of conductor and directly proportional to span length
   b) Weight of conductor and inversely proportional to span length
   c) Weight of conductor and directly proportional to the square of span length
   d) Weight of conductor and inversely proportional to the square of span length

9) The maximum tension in a section of overhead line conductor between two supports of unequal height occurs at _____.
   a) The higher support
   b) The lower point
   c) The midpoint of the conductor
   d) None of the above

10) Corona is accompanied by _____.
   a) violet visible light
   b) hissing sound
   c) power loss and interference
   d) all of the above

11) Transmission line constants are _____.
   a) Capacitance
   b) Inductance
   c) Resistance
   d) All of these

12) The inductance of line is minimum when _____.
   a) G M D is high
   b) G M R is high
   c) Both G M D and G M R are high
   d) G M D is low but G M R is high

13) When two conductors between each of radius ‘r’ are at a distance D, the capacitance between the two is Proportional to _____.
   a) Loge (D/r)
   b) loge (r/ D)
   c) 1/loge (D/r)
   d) 1/ loge(r/D)

14) Find the inductance per km of a 3- phase transmission line using 1.24 cm diameter conductors when these are placed at the corners of an equilateral triangle of each side 2 m _____.
   a) 3.2 mH/Km
   b) 2.1 mH/Km
   c) 1.205 mH/Km
   d) 2.3 mH/Km

Seat No.	

Set **P**

Day & Date: Thursday, 21-05-2026 Max. Marks: 56
Time: 10:00 AM To 01:00 PM

Instructions: 1) All questions are compulsory.
2) Figures to the right indicate full marks.

SECTION – I

Q.2 Attempt the following. (Any Four) **16**

a) Define corona discharge; enlist the methods of reducing the corona effect.

b) Calculate the loop inductance per km of a single-phase overhead line consisting of two conductors each 1 cm diameter and 1.2 m apart.

c) What is meant by sag? Derive an expression for sag in a transmission line having equal level of supports.

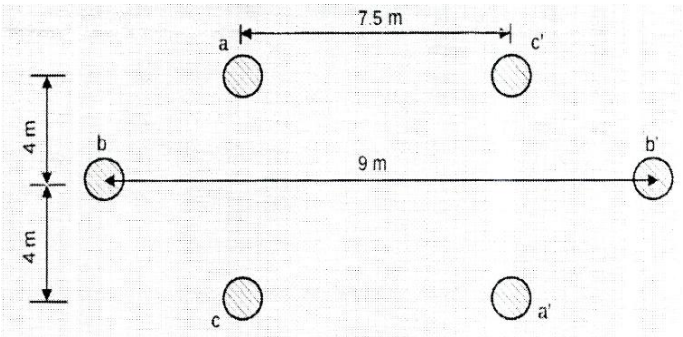
d) Explain the following methods of cable grading:
i) Capacitance grading
ii) Inters heath grading

e) Find the line to line capacitance per km of a three phase transmission line using 1.24 cm diameter conductor when these are placed at the corners of an equilateral triangle of each side 2m.

Q.3 Attempt the following. (Any Two) **12**

a) Derive the expression for inductance of 3-ph single circuit overhead triangular configuration of transmission line for symmetrical spacing.

b) The double circuit three-phase line has the configuration shown in figure the distance between conductor a and c' is 7.5 between b and b' is 9 m and between a and c is 8 m. Find inductance per kilometer per phase. The radius of each conductor is 1.25 cm



c) Derive the expression for Insulation resistance of a cable.

SECTION – II

Q.4 Attempt the following. (Any Four) **16**

a) Describe with diagram
   i) Radial system
   ii) Ring main system

b) Derive an expression for voltage regulation and efficiency of short transmission line.

c) Explain in detail effect of Power Factor on Voltage regulation, Losses, efficiency in case of transmission line.

d) Define and explain terms: feeders, distributor and service mains with neat schematic diagram.

e) Explain various types equipment in substation with neat symbol.

Q.5 Attempt the following. (Any Two) **12**

a) What is mean by Neutral grounding and explain with neat circuit diagram various methods of Neutral grounding.
   i) Resistance grounding
   ii) Reactance grounding
   iii) Solid grounding

b) With neat diagram derive the expression for A, B, C, D constants of medium transmission line using nominal T method.

c) A single-phase overhead transmission line delivers 1100 kW at 33KV at 0.8p. f lagging. The total resistance and inductive reactance of the line are 10 Ω and 15 Ω respectively.
Determine:
   i) Sending end voltage
   ii) Sending end power factor
   iii) Transmission Efficiency

   b) loge (r/ D)
   c) 1/loge (D/r)
   d) 1/ loge(r/D)

9) Find the inductance per km of a 3- phase transmission line using 1.24 cm diameter conductors when these are placed at the corners of an equilateral triangle of each side 2 m _____.
   a) 3.2 mH/Km
   b) 2.1 mH/Km
   c) 1.205 mH/Km
   d) 2.3 mH/Km

10) In triangular configuration, inductance and capacitance values are _____ and _____ respectively.
   a) less, less
   b) higher, higher
   c) less, higher
   d) higher, less

11) What is the purpose of bedding on the underground cables?
   a) To avoid leakage of current
   b) To protect the sheath against corrosion
   c) To protect the sheath from mechanical injury due to armoring
   d) Both b) and c)

12) The cable best suited for the transmission of voltages from 33 kV to 66 kV is _____.
   a) Belted cables
   b) Screened cables
   c) Pressure cables
   d) None of these

13) What does capacitance grade of cables mean?
   a) Use of dielectrics in different concentrations
   b) Introduction of capacitance at various lengths of cable to the effect of inductance
   c) Use of dielectrics of different permittivity's
   d) Grading according to capacitance per km length of the cable

14) In long transmission lines Resistance and Capacitance parameters of lines are connected in _____.
   a) Series, shunt
   b) Series, series
   c) Shunt, shunt
   d) Shunt, parallel

Set **S**

S.Y. (B.Tech.) (Electrical Engineering) (Semester - II) (New) (NEP CBCS) Examination: March/April – 2026
Power System – II (BTN07403)

Day & Date: Thursday, 21-05-2026 Max. Marks: 56
Time: 10:00 AM To 01:00 PM

Instructions: 1) All questions are compulsory.
2) Figures to the right indicate full marks.

SECTION – I

Q.2 Attempt the following. (Any Four) **16**

a) Define corona discharge; enlist the methods of reducing the corona effect.

b) Calculate the loop inductance per km of a single-phase overhead line consisting of two conductors each 1 cm diameter and 1.2 m apart.

c) What is meant by sag? Derive an expression for sag in a transmission line having equal level of supports.

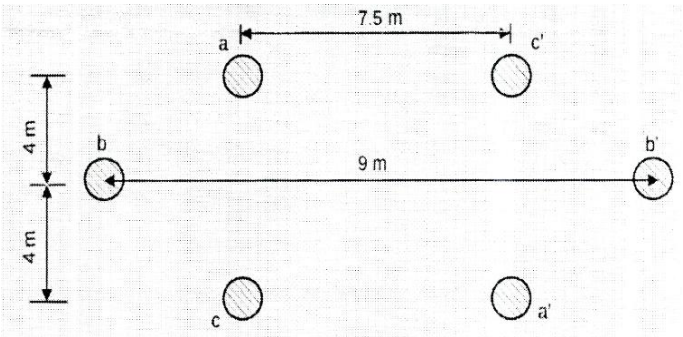
d) Explain the following methods of cable grading:
i) Capacitance grading
ii) Inters heath grading

e) Find the line to line capacitance per km of a three phase transmission line using 1.24 cm diameter conductor when these are placed at the corners of an equilateral triangle of each side 2m.

Q.3 Attempt the following. (Any Two) **12**

a) Derive the expression for inductance of 3-ph single circuit overhead triangular configuration of transmission line for symmetrical spacing.

b) The double circuit three-phase line has the configuration shown in figure the distance between conductor a and c' is 7.5 between b and b' is 9 m and between a and c is 8 m. Find inductance per kilometer per phase. The radius of each conductor is 1.25 cm



c) Derive the expression for Insulation resistance of a cable.

SECTION – II

Q.4 Attempt the following. (Any Four) **16**

a) Describe with diagram
   i) Radial system
   ii) Ring main system

b) Derive an expression for voltage regulation and efficiency of short transmission line.

c) Explain in detail effect of Power Factor on Voltage regulation, Losses, efficiency in case of transmission line.

d) Define and explain terms: feeders, distributor and service mains with neat schematic diagram.

e) Explain various types equipment in substation with neat symbol.

Q.5 Attempt the following. (Any Two) **12**

a) What is mean by Neutral grounding and explain with neat circuit diagram various methods of Neutral grounding.
   i) Resistance grounding
   ii) Reactance grounding
   iii) Solid grounding

b) With neat diagram derive the expression for A, B, C, D constants of medium transmission line using nominal T method.

c) A single-phase overhead transmission line delivers 1100 kW at 33KV at 0.8p. f lagging. The total resistance and inductive reactance of the line are 10 Ω and 15 Ω respectively.
Determine:
   i) Sending end voltage
   ii) Sending end power factor
   iii) Transmission Efficiency

S.Y. (B.Tech.) (Electrical Engineering) (Semester - II) (New) (NEP CBCS) Examination: March/April – 2026
Entrepreneurship and Innovation (OE-02A)

Day & Date: Friday, 22-05-2026 Max. Marks: 70
Time: 03:00 PM To 06:00 PM

Instructions: 1) Q. No. 1 is compulsory. It should be solved in the first 30 minutes in Answer Book Page no 03 (Starting page of the Answer Book). Each question carries one mark.
2) Don't forget to Mention question paper set (P/Q/R/S) on top of page.
3) Figures to the right indicates full marks.
4) Assume suitable data if necessary and mention it clearly.

MCQ/Objective Type Questions

Duration: 30 Minutes Marks:14

Q.1 Choose Correct answer MCQ/ Objective Questions. 14

1) Innovation provides _____.
a) Stability b) Competitive advantage
c) Similarity d) Confusion

2) Managerial competency involves _____.
a) Fundraising only
b) Communication, planning, and leadership
c) Imitation
d) None

3) Entrepreneurship as a style of management focuses on _____.
a) Routine activities
b) Risk avoidance
c) Innovation and opportunity recognition
d) Only HR

4) A corporate entrepreneur is _____.
a) Owner of small business
b) Government employee
c) Innovator within an organization
d) None

5) Technology transfer occurs when _____.
a) Knowledge is shared from research to application
b) Patents expire
c) Innovation fails
d) Licenses are revoked

6) Six Thinking Hats tool was developed by _____.
a) Peter Drucker
b) Steve Jobs
c) Edward de Bono
d) Clayton Christensen

7) NUF test stands for _____.
a) Necessary, Useful, Feasible
b) Need, Use, Focus
c) None
d) Necessary, Unusual, Functional

8) Which is not a type of innovation strategy?
a) Pioneering
b) Imitative
c) Disruptive
d) Delaying

9) Red Ocean strategy is about _____.
a) Uncontested markets
b) Price competition in saturated markets
c) Patent generation
d) Blue economy

10) Continuous learning is essential for _____.
a) Innovation growth
b) Routine operations
c) Cost reduction
d) Project closure

11) Failure in innovation can occur due to _____.
a) Over-regulation
b) Poor planning
c) Lack of feedback
d) All of these

12) Crafting a business model involves _____.
a) Ignoring customers
b) Defining value, segments, and revenue streams
c) Random investments
d) Borrowing

13) Legal consideration in entrepreneurship includes _____.
a) Product packaging
b) Compliance and regulations
c) Floor layout
d) Office color

14) Entrepreneurial process starts with _____.
a) HR hiring
b) Opportunity identification
c) Revenue calculation
d) Market monopoly

MCQ/Objective Type Questions

Duration: 30 Minutes Marks:14

Q.1 Choose the correct alternative: 14

1) Which of the following is a key goal of sustainable development?
a) Increase in fossil fuel consumption
b) Balanced use of resources
c) Maximum economic growth only
d) Eliminating renewable energy use

2) What is a key characteristic of solar energy?
a) Utilizes sunlight for power generation
b) Requires fossil fuels for operation
c) Has no environmental benefits
d) ls non-renewable

3) Which renewable energy is best suited for coastal areas?
a) Biomass energy b) Geothermal energy
c) Wave and tidal energy d) Oil shale energy

4) What is solar radiation?
a) Radiation from the Earth b) Radiation from the Moon
c) Radiation from the Sun d) None of the above

5) What is solar radiation measured in?
a) Kilograms
b) Liters
c) Watts per square meter (W/m^2)
d) Newtons

6) What is the primary difference between pyrolysis and gasification?
   a) Gasification uses a small amount of oxygen, while pyrolysis occurs in the absence of oxygen
   b) Pyrolysis produces syngas, while gasification produces bio-oil
   c) Gasification is a biochemical process, while pyrolysis is thermo chemical
   d) Pyrolysis requires higher temperatures than gasification

7) Which of the following is a disadvantage of biomass energy?
   a) Reduces waste
   b) Can lead to deforestation
   c) Low carbon footprint
   d) Independent of weather conditions

8) What happens when electricity demand is higher than generation?
   a) Energy storage can provide additional power
   b) Renewable energy sources produce more electricity
   c) Power plants automatically increase supply
   d) Transmission lines store energy

9) Which of the following sectors benefits the most from energy storage?
   a) Agriculture
   b) Construction
   c) Transport
   d) Power generation

10) What does the efficiency of an energy storage device indicate?
   a) The time taken to store energy
   b) The total cost of the device
   c) The percentage of stored energy that can be retrieved
   d) The size of the storage system

11) In hydro power stations what is an enlarged body of water just above the intake and used as a regulating reservoir called?
   a) Penstock
   b) Reservoir
   c) Fore bay
   d) Spillways

12) Tidal energy is caused primarily by the _____.
   a) Moon's gravity
   b) Sun's gravity
   c) Earth's rotation
   d) Ocean currents

13) Green hydrogen is produced by _____.
   a) Coal gasification
   b) Methane reforming
   c) Water electrolysis using renewable energy
   d) Nuclear fission

14) Which is the cleanest method of hydrogen production?
   a) Electrolysis using solar/wind energy
   b) Coal gasification
   c) Nuclear thermal splitting
   d) Steam methane reforming

Renewable Energy (OE-02C)

Day & Date: Friday, 22-05-2026 Max. Marks: 56
Time: 03:00 PM To 06:00 PM

Instructions: 1) Q. 2 from section I is compulsory. Solve any two questions from Q.3, 4 and 5.
2) Q.6 from section two is compulsory. Solve any two questions from Q.7, 8 and 9.
3) Figures to the right indicates full marks.
4) Assume suitable data if necessary and mention it clearly.

SECTION – I

Q.2	**a)**	What is biomass energy, and how is it produced from the biomass?	**05**
	b)	Explain with neat sketch working of Pyrheliometer.	**05**
Q.3	**a)**	Give the detailed classification of wind energy conversion systems.	**04**
	b)	Explain how the Internet of Energy (IoE) can improve energy distribution in smart cities.	**05**
Q.4	**a)**	Explain with neat sketch working of a Flat Plate Collector.	**04**
	b)	Enlist and explain the major biomass resources available in India. How can these resources be utilized to address energy demands while ensuring sustainability?	**05**
Q.5	**a)**	Differentiate between solar thermal and solar photovoltaic systems those are used for power generation.	**04**
	b)	What are the criterions considered for selection of site for the wind mill?	**05**

SECTION – II

Q.6	**a)**	Enlist and explain the major problems that arise due to the absence of energy storage in power generation.	**05**
	b)	Draw the neat sketch of layout for hydroelectric power plat and explain the components.	**05**

Q.7	**a)**	Explain with neat sketch working of open cycle Ocen Thermal Energy Conversion (OTEC) system.	**04**
	b)	Give the general specifications of Energy Storage devices.	**05**
Q.8	**a)**	Give the detailed classification of hydroelectric power plants.	**04**
	b)	Enlist different types of tidal energy conversion systems and explain any one with neat sketch.	**05**
Q.9	**a)**	How will you estimate a hydropower? Explain the terms involved in it.	**04**
	b)	State and explain different hydrogen storage methods.	**05**

2) Don't forget to Mention question paper set (P/Q/R/S) on top of page.
3) Figures to the right indicates full marks.
4) Assume suitable data if necessary and mention it clearly.

MCQ/Objective Type Questions

Duration: 30 Minutes Marks:14

Q.1 Choose the correct alternative: **14**

1) What happens when electricity demand is higher than generation?
a) Energy storage can provide additional power
b) Renewable energy sources produce more electricity
c) Power plants automatically increase supply
d) Transmission lines store energy

2) Which of the following sectors benefits the most from energy storage?
a) Agriculture b) Construction
c) Transport d) Power generation

3) What does the efficiency of an energy storage device indicate?
a) The time taken to store energy
b) The total cost of the device
c) The percentage of stored energy that can be retrieved
d) The size of the storage system

4) In hydro power stations what is an enlarged body of water just above the intake and used as a regulating reservoir called?
a) Penstock b) Reservoir
c) Fore bay d) Spillways

5) Tidal energy is caused primarily by the _____.
a) Moon's gravity b) Sun's gravity
c) Earth's rotation d) Ocean currents

6) Green hydrogen is produced by _____.
a) Coal gasification
b) Methane reforming
c) Water electrolysis using renewable energy
d) Nuclear fission

7) Which is the cleanest method of hydrogen production?
   a) Electrolysis using solar/wind energy
   b) Coal gasification
   c) Nuclear thermal splitting
   d) Steam methane reforming

8) Which of the following is a key goal of sustainable development?
   a) Increase in fossil fuel consumption
   b) Balanced use of resources
   c) Maximum economic growth only
   d) Eliminating renewable energy use

9) What is a key characteristic of solar energy?
   a) Utilizes sunlight for power generation
   b) Requires fossil fuels for operation
   c) Has no environmental benefits
   d) ls non-renewable

10) Which renewable energy is best suited for coastal areas?
   a) Biomass energy
   b) Geothermal energy
   c) Wave and tidal energy
   d) Oil shale energy

11) What is solar radiation?
   a) Radiation from the Earth
   b) Radiation from the Moon
   c) Radiation from the Sun
   d) None of the above

12) What is solar radiation measured in?
   a) Kilograms
   b) Liters
   c) Watts per square meter (W/m^2)
   d) Newtons

13) What is the primary difference between pyrolysis and gasification?
   a) Gasification uses a small amount of oxygen, while pyrolysis occurs in the absence of oxygen
   b) Pyrolysis produces syngas, while gasification produces bio-oil
   c) Gasification is a biochemical process, while pyrolysis is thermo chemical
   d) Pyrolysis requires higher temperatures than gasification

14) Which of the following is a disadvantage of biomass energy?
   a) Reduces waste
   b) Can lead to deforestation
   c) Low carbon footprint
   d) Independent of weather conditions

Seat No.	

Set **Q**

S.Y. (B.Tech.) (Electrical Engineering) (Semester - II) (New) (NEP CBCS) Examination: March/April – 2026
Renewable Energy (OE-02C)

Day & Date: Friday, 22-05-2026 Max. Marks: 56
Time: 03:00 PM To 06:00 PM

Instructions: 1) Q. 2 from section I is compulsory. Solve any two questions from Q.3, 4 and 5.
2) Q.6 from section two is compulsory. Solve any two questions from Q.7, 8 and 9.
3) Figures to the right indicates full marks.
4) Assume suitable data if necessary and mention it clearly.

SECTION – I

Q.2	**a)**	What is biomass energy, and how is it produced from the biomass?	**05**
	b)	Explain with neat sketch working of Pyrheliometer.	**05**
Q.3	**a)**	Give the detailed classification of wind energy conversion systems.	**04**
	b)	Explain how the Internet of Energy (IoE) can improve energy distribution in smart cities.	**05**
Q.4	**a)**	Explain with neat sketch working of a Flat Plate Collector.	**04**
	b)	Enlist and explain the major biomass resources available in India. How can these resources be utilized to address energy demands while ensuring sustainability?	**05**
Q.5	**a)**	Differentiate between solar thermal and solar photovoltaic systems those are used for power generation.	**04**
	b)	What are the criterions considered for selection of site for the wind mill?	**05**

SECTION – II

Q.6	**a)**	Enlist and explain the major problems that arise due to the absence of energy storage in power generation.	**05**
	b)	Draw the neat sketch of layout for hydroelectric power plat and explain the components.	**05**

Q.7	**a)**	Explain with neat sketch working of open cycle Ocen Thermal Energy Conversion (OTEC) system.	**04**
	b)	Give the general specifications of Energy Storage devices.	**05**
Q.8	**a)**	Give the detailed classification of hydroelectric power plants.	**04**
	b)	Enlist different types of tidal energy conversion systems and explain any one with neat sketch.	**05**
Q.9	**a)**	How will you estimate a hydropower? Explain the terms involved in it.	**04**
	b)	State and explain different hydrogen storage methods.	**05**

Seat No.	

Set **R**

S.Y. (B.Tech.) (Electrical Engineering) (Semester - II) (New) (NEP CBCS) Examination: March/April – 2026
Renewable Energy (OE-02C)

Day & Date: Friday, 22-05-2026 Max. Marks: 70
Time: 03:00 PM To 06:00 PM

Instructions: 1) Q. No. 1 is compulsory. It should be solved in the first 30 minutes in Answer Book Page no 03 (Starting page of the Answer Book). Each question carries one mark.
2) Don't forget to Mention question paper set (P/Q/R/S) on top of page.
3) Figures to the right indicates full marks.
4) Assume suitable data if necessary and mention it clearly.

MCQ/Objective Type Questions

Duration: 30 Minutes Marks:14

Q.1 Choose the correct alternative: **14**

1) In hydro power stations what is an enlarged body of water just above the intake and used as a regulating reservoir called?
a) Penstock b) Reservoir
c) Fore bay d) Spillways

2) Tidal energy is caused primarily by the _____.
a) Moon's gravity b) Sun's gravity
c) Earth's rotation d) Ocean currents

3) Green hydrogen is produced by _____.
a) Coal gasification
b) Methane reforming
c) Water electrolysis using renewable energy
d) Nuclear fission

4) Which is the cleanest method of hydrogen production?
a) Electrolysis using solar/wind energy
b) Coal gasification
c) Nuclear thermal splitting
d) Steam methane reforming

5) Which of the following is a key goal of sustainable development?
a) Increase in fossil fuel consumption
b) Balanced use of resources
c) Maximum economic growth only
d) Eliminating renewable energy use

6) What is a key characteristic of solar energy?
   a) Utilizes sunlight for power generation
   b) Requires fossil fuels for operation
   c) Has no environmental benefits
   d) ls non-renewable

7) Which renewable energy is best suited for coastal areas?
   a) Biomass energy
   b) Geothermal energy
   c) Wave and tidal energy
   d) Oil shale energy

8) What is solar radiation?
   a) Radiation from the Earth
   b) Radiation from the Moon
   c) Radiation from the Sun
   d) None of the above

9) What is solar radiation measured in?
   a) Kilograms
   b) Liters
   c) Watts per square meter (W/m^2)
   d) Newtons

10) What is the primary difference between pyrolysis and gasification?
   a) Gasification uses a small amount of oxygen, while pyrolysis occurs in the absence of oxygen
   b) Pyrolysis produces syngas, while gasification produces bio-oil
   c) Gasification is a biochemical process, while pyrolysis is thermo chemical
   d) Pyrolysis requires higher temperatures than gasification

11) Which of the following is a disadvantage of biomass energy?
   a) Reduces waste
   b) Can lead to deforestation
   c) Low carbon footprint
   d) Independent of weather conditions

12) What happens when electricity demand is higher than generation?
   a) Energy storage can provide additional power
   b) Renewable energy sources produce more electricity
   c) Power plants automatically increase supply
   d) Transmission lines store energy

13) Which of the following sectors benefits the most from energy storage?
   a) Agriculture
   b) Construction
   c) Transport
   d) Power generation

14) What does the efficiency of an energy storage device indicate?
   a) The time taken to store energy
   b) The total cost of the device
   c) The percentage of stored energy that can be retrieved
   d) The size of the storage system

4) Assume suitable data if necessary and mention it clearly.

MCQ/Objective Type Questions

Duration: 30 Minutes Marks:14

Q.1 Choose the correct alternative: **14**

1) What is the primary difference between pyrolysis and gasification?
a) Gasification uses a small amount of oxygen, while pyrolysis occurs in the absence of oxygen
b) Pyrolysis produces syngas, while gasification produces bio-oil
c) Gasification is a biochemical process, while pyrolysis is thermo chemical
d) Pyrolysis requires higher temperatures than gasification

2) Which of the following is a disadvantage of biomass energy?
a) Reduces waste
b) Can lead to deforestation
c) Low carbon footprint
d) Independent of weather conditions

3) What happens when electricity demand is higher than generation?
a) Energy storage can provide additional power
b) Renewable energy sources produce more electricity
c) Power plants automatically increase supply
d) Transmission lines store energy

4) Which of the following sectors benefits the most from energy storage?
a) Agriculture b) Construction
c) Transport d) Power generation

5) What does the efficiency of an energy storage device indicate?
a) The time taken to store energy
b) The total cost of the device
c) The percentage of stored energy that can be retrieved
d) The size of the storage system

6) In hydro power stations what is an enlarged body of water just above the intake and used as a regulating reservoir called?
a) Penstock
b) Reservoir
c) Fore bay
d) Spillways

7) Tidal energy is caused primarily by the _____.
a) Moon's gravity
b) Sun's gravity
c) Earth's rotation
d) Ocean currents

8) Green hydrogen is produced by _____.
a) Coal gasification
b) Methane reforming
c) Water electrolysis using renewable energy
d) Nuclear fission

9) Which is the cleanest method of hydrogen production?
a) Electrolysis using solar/wind energy
b) Coal gasification
c) Nuclear thermal splitting
d) Steam methane reforming

10) Which of the following is a key goal of sustainable development?
a) Increase in fossil fuel consumption
b) Balanced use of resources
c) Maximum economic growth only
d) Eliminating renewable energy use

11) What is a key characteristic of solar energy?
a) Utilizes sunlight for power generation
b) Requires fossil fuels for operation
c) Has no environmental benefits
d) ls non-renewable

12) Which renewable energy is best suited for coastal areas?
a) Biomass energy

Measurement, Instrumentation and Sensors (OE-02D)

Day & Date: Friday, 22-05-2026 Max. Marks: 70
Time: 03:00 PM To 06:00 PM

Instructions: 1) Q. No. 1 is compulsory. It should be solved in the first 30 minutes in Answer Book Page no 03 (Starting page of the Answer Book). Each question carries one mark
2) Don't forget to Mention question paper set (P/Q/R/S) on top on page.
3) Figures to the right indicates full marks.
4) Assume suitable data if necessary.

MCQ/Objective Type Questions

Duration: 30 Minutes Marks:14

Q.1 Choose the correct answer. **14**

1) Which of the following is not a type of systematic error?
a) Instrumental Errors b) Environmental Errors
c) Observational Errors d) Gross error

2) _____ instruments are those which measure the total quantity of electricity delivered in a particular time.
a) Absolute b) Indicating
c) Recording d) Integrating

3) A moving iron instrument can be used for _____.
a) D.C. only b) A.C. only
c) Both D.C. and A.C. d) None

4) _____ method is suitable for the measurement of a resistance of expected value less than one ohm.
a) Substitution b) Loss of charge
c) Wheatstone bridge d) Kelvin's double bridge

5) Instrument transformers are _____.
a) Potential transformers b) Current transformers
c) Both (a) and (b) d) Power transformers

6) In a DSO, the input signals are _____.
   a) directly applied to oscilloscope
   b) multiplexed, converted to digital form and stored and applied to oscilloscope
   c) multiplexed, converted to digital form stored, converted to analog form and applied to oscilloscope
   d) applied to amplifier, stored as analog signals, multiplexed, converted to digital form, stored in digital form, converted to analog form, and applied to CRO through an amplifier.

7) The power of n-phase unbalanced circuit can be measured by using a minimum of _____.
   a) n wattmeters
   b) (n + 1) wattmeters
   c) (n - 2) wattmeters
   d) (n - 1) wattmeters

8) Which transducer does not require any external power supply for working?
   a) Strain gauge transducer
   b) Piezoelectric Crystals
   c) Hydraulic transducer
   d) Pneumatic transducer

9) Piezoelectric accelerometer converts _____ energy to _____ energy.
   a) mechanical, sound
   b) mechanical, electrical
   c) sound, electrical
   d) None of these

10) Which factor affects the least while selection of sensor?
   a) Size
   b) Accuracy
   c) Colour
   d) Durability

11) Which sensor should be used for calculating pressure?
   a) DHT11
   b) LM335Z/NOPB
   c) HC-SR04
   d) MPX10DP

12) Which of the following represents range of frequency measured by ADC?
   a) Bandwidth
   b) Threshold frequency
   c) Peak frequency
   d) None of the mentioned

13) Thermistor is a _____.
   a) sensor
   b) ADC
   c) transducer
   d) micro controller

14) Which of the following type output is provided by ADC?
   a) Serial type
   b) Parallel type
   c) Both serial and parallel type
   d) None of the mentioned

Seat No.	

Set **P**

S.Y. (B.Tech.) (Electrical Engineering) (Semester - II) (New) (NEP CBCS) Examination: March/April – 2026
Measurement, Instrumentation and Sensors (OE-02D)

Day & Date: Friday, 22-05-2026 Max. Marks: 56
Time: 03:00 PM To 06:00 PM

Instructions: 1) All questions are compulsory.
2) Figures to the right indicate full marks.
3) Assume suitable data if necessary.
4) Draw neat diagrams whenever necessary.

SECTION – I

Q.2 Attempt the following. (Any Four) **16**

a) Explain the term:
i) Accuracy
ii) Linearity
iii) Reproducibility
iv) Precision

b) Describe different damping methods in details.

c) Difference between Current Transformer and Potential Transformer.

d) Explain with neat diagram, working of ramp type digital voltmeter.

e) Explain Anderson Bridge with phasor diagram. Also derive the equation of dissipation factor.

Q.3 Attempt the following. (Any Two) **12**

a) Draw the equivalent circuit and phasor diagram of a PT. Derive expression for actual transformation ratio.

b) Explain the method of measurement of power using two wattmeter for balanced load. Also derive the equation of power factor.

c) A bridge consists of the following:
Arm ab: - A choke coil having resistance R1 & amp: inductance L1
Arm bc: - A non-inductive resistance R3
Arm cd: - A mica condenser C4 in series with non-inductive resistance R4
Arm da: - A non-inductive resistance R2
When this bridge fed from a source of 500 Hz, balance is obtained under following Conditions. $R2 = 2410\ \Omega$, $R3 = 750\ \Omega$, $C4 = 0.35\ \mu F$, $R4 = 64.5\ \Omega$ The series resistance of capacitor is 0.4Ω. Calculate resistance and Inductance of choke coil. The supply is connected between a & c and detector is between b & d.

SECTION – II

Q.4 Attempt the following. (Any Four) **16**

a) Explain units of measurement.

b) Explain the principle of working of piezo-electric effect sensor.

c) Explain the basic concept of analog to digital converter.

d) Explain the sensor interfacing circuit's data transmission.

e) State the different types of temperature sensor and explain any one of them.

Q.5 Attempt the following. (Any Two) **12**

a) State and explain the different types of batteries for low power sensors.

b) Stale and explain the sensors used for Displacement, and Level application.

c) Explain the concept of humidity and state different types of sensor used to measure humidity.

MCQ/Objective Type Questions

Duration: 30 Minutes Marks:14

Q.1 Choose the correct answer. 14

1) Which transducer does not require any external power supply for working?
a) Strain gauge transducer b) Piezoelectric Crystals
c) Hydraulic transducer d) Pneumatic transducer

2) Piezoelectric accelerometer converts _____ energy to _____ energy.
a) mechanical, sound b) mechanical, electrical
c) sound, electrical d) None of these

3) Which factor affects the least while selection of sensor?
a) Size b) Accuracy
c) Colour d) Durability

4) Which sensor should be used for calculating pressure?
a) DHT11 b) LM335Z/NOPB
c) HC-SR04 d) MPX10DP

5) Which of the following represents range of frequency measured by ADC?
a) Bandwidth b) Threshold frequency
c) Peak frequency d) None of the mentioned

6) Thermistor is a _____.
a) sensor b) ADC
c) transducer d) micro controller

7) Which of the following type output is provided by ADC?
a) Serial type b) Parallel type
c) Both serial and parallel type d) None of the mentioned

8) Which of the following is not a type of systematic error?
a) Instrumental Errors b) Environmental Errors
c) Observational Errors d) Gross error

9) _____ instruments are those which measure the total quantity of electricity delivered in a particular time.
a) Absolute b) Indicating
c) Recording d) Integrating

10) A moving iron instrument can be used for _____.
a) D.C. only b) A.C. only
c) Both D.C. and A.C. d) None

11) _____ method is suitable for the measurement of a resistance of expected value less than one ohm.
a) Substitution b) Loss of charge
c) Wheatstone bridge d) Kelvin's double bridge

12) Instrument transformers are _____.
a) Potential transformers b) Current transformers
c) Both (a) and (b) d) Power transformers

13) In a DSO, the input signals are _____.
a) directly applied to oscilloscope
b) multiplexed, converted to digital form and stored and applied to oscilloscope
c) multiplexed, converted to digital form stored, converted to analog form and applied to oscilloscope
d) applied to amplifier, stored as analog signals, multiplexed, converted to digital form, stored in digital form, converted to analog form, and applied to CRO through an amplifier.

14) The power of n-phase unbalanced circuit can be measured by using a minimum of _____.
a) n wattmeters b) (n + 1) wattmeters
c) (n - 2) wattmeters d) (n - 1) wattmeters

4) Assume suitable data if necessary.

MCQ/Objective Type Questions

Duration: 30 Minutes Marks:14

Q.1 Choose the correct answer. **14**

1) Which sensor should be used for calculating pressure?
a) DHT11 b) LM335Z/NOPB
c) HC-SR04 d) MPX10DP

2) Which of the following represents range of frequency measured by ADC?
a) Bandwidth b) Threshold frequency
c) Peak frequency d) None of the mentioned

3) Thermistor is a _____.
a) sensor b) ADC
c) transducer d) micro controller

4) Which of the following type output is provided by ADC?
a) Serial type b) Parallel type
c) Both serial and parallel type d) None of the mentioned

5) Which of the following is not a type of systematic error?
a) Instrumental Errors b) Environmental Errors
c) Observational Errors d) Gross error

6) _____ instruments are those which measure the total quantity of electricity delivered in a particular time.
a) Absolute b) Indicating
c) Recording d) Integrating

7) A moving iron instrument can be used for _____.
a) D.C. only b) A.C. only
c) Both D.C. and A.C. d) None

8) _____ method is suitable for the measurement of a resistance of expected value less than one ohm.

a) Substitution
b) Loss of charge
c) Wheatstone bridge
d) Kelvin's double bridge

9) Instrument transformers are _____.

a) Potential transformers
b) Current transformers
c) Both (a) and (b)
d) Power transformers

10) In a DSO, the input signals are _____.

a) directly applied to oscilloscope
b) multiplexed, converted to digital form and stored and applied to oscilloscope
c) multiplexed, converted to digital form stored, converted to analog form and applied to oscilloscope
d) applied to amplifier, stored as analog signals, multiplexed, converted to digital form, stored in digital form, converted to analog form, and applied to CRO through an amplifier.

11) The power of n-phase unbalanced circuit can be measured by using a minimum of _____.

a) n wattmeters
b) (n + 1) wattmeters
c) (n - 2) wattmeters
d) (n - 1) wattmeters

12) Which transducer does not require any external power supply for working?

a) Strain gauge transducer
b) Piezoelectric Crystals
c) Hydraulic transducer
d) Pneumatic transducer

13) Piezoelectric accelerometer converts _____ energy to _____ energy.

a) mechanical, sound
b) mechanical, electrical
c) sound, electrical
d) None of these

14) Which factor affects the least while selection of sensor?

a) Size
b) Accuracy
c) Colour
d) Durability

Seat No.	

Set **R**

S.Y. (B.Tech.) (Electrical Engineering) (Semester - II) (New) (NEP CBCS) Examination: March/April – 2026
Measurement, Instrumentation and Sensors (OE-02D)

Day & Date: Friday, 22-05-2026 Max. Marks: 56
Time: 03:00 PM To 06:00 PM

Instructions: 1) All questions are compulsory.
2) Figures to the right indicate full marks.
3) Assume suitable data if necessary.
4) Draw neat diagrams whenever necessary.

SECTION – I

Q.2 Attempt the following. (Any Four) **16**

a) Explain the term:
i) Accuracy
ii) Linearity
iii) Reproducibility
iv) Precision

b) Describe different damping methods in details.

c) Difference between Current Transformer and Potential Transformer.

d) Explain with neat diagram, working of ramp type digital voltmeter.

e) Explain Anderson Bridge with phasor diagram. Also derive the equation of dissipation factor.

Q.3 Attempt the following. (Any Two) **12**

a) Draw the equivalent circuit and phasor diagram of a PT. Derive expression for actual transformation ratio.

b) Explain the method of measurement of power using two wattmeter for balanced load. Also derive the equation of power factor.

c) A bridge consists of the following:
Arm ab: - A choke coil having resistance R1 & amp: inductance L1
Arm bc: - A non-inductive resistance R3
Arm cd: - A mica condenser C4 in series with non-inductive resistance R4
Arm da: - A non-inductive resistance R2
When this bridge fed from a source of 500 Hz, balance is obtained under following Conditions. $R2 = 2410\ \Omega$, $R3 = 750\ \Omega$, $C4 = 0.35\ \mu F$, $R4 = 64.5\ \Omega$ The series resistance of capacitor is 0.4Ω. Calculate resistance and Inductance of choke coil. The supply is connected between a & c and detector is between b & d.

SECTION – II

Q.4 Attempt the following. (Any Four) **16**

a) Explain units of measurement.

b) Explain the principle of working of piezo-electric effect sensor.

c) Explain the basic concept of analog to digital converter.

d) Explain the sensor interfacing circuit's data transmission.

e) State the different types of temperature sensor and explain any one of them.

Q.5 Attempt the following. (Any Two) **12**

a) State and explain the different types of batteries for low power sensors.

b) Stale and explain the sensors used for Displacement, and Level application.

c) Explain the concept of humidity and state different types of sensor used to measure humidity.

S.Y. (B.Tech.) (Electrical Engineering) (Semester - II) (New) (NEP CBCS) Examination: March/April – 2026
Measurement, Instrumentation and Sensors (OE-02D)

Day & Date: Friday, 22-05-2026 Max. Marks: 70
Time: 03:00 PM To 06:00 PM

Instructions: 1) Q. No. 1 is compulsory. It should be solved in the first 30 minutes in Answer Book Page no 03 (Starting page of the Answer Book). Each question carries one mark
2) Don't forget to Mention question paper set (P/Q/R/S) on top on page.
3) Figures to the right indicates full marks.
4) Assume suitable data if necessary.

MCQ/Objective Type Questions

Duration: 30 Minutes Marks:14

Q.1 Choose the correct answer. **14**

1) In a DSO, the input signals are _____.
a) directly applied to oscilloscope
b) multiplexed, converted to digital form and stored and applied to oscilloscope
c) multiplexed, converted to digital form stored, converted to analog form and applied to oscilloscope
d) applied to amplifier, stored as analog signals, multiplexed, converted to digital form, stored in digital form, converted to analog form, and applied to CRO through an amplifier.

2) The power of n-phase unbalanced circuit can be measured by using a minimum of _____.
a) n wattmeters b) (n + 1) wattmeters
c) (n - 2) wattmeters d) (n - 1) wattmeters

3) Which transducer does not require any external power supply for working?
a) Strain gauge transducer b) Piezoelectric Crystals
c) Hydraulic transducer d) Pneumatic transducer

4) Piezoelectric accelerometer converts _____ energy to _____ energy.
a) mechanical, sound b) mechanical, electrical
c) sound, electrical d) None of these

5) Which factor affects the least while selection of sensor?
a) Size b) Accuracy
c) Colour d) Durability

6) Which sensor should be used for calculating pressure?
a) DHT11 b) LM335Z/NOPB
c) HC-SR04 d) MPX10DP

7) Which of the following represents range of frequency measured by ADC?
a) Bandwidth b) Threshold frequency
c) Peak frequency d) None of the mentioned

8) Thermistor is a _____.
a) sensor b) ADC
c) transducer d) micro controller

9) Which of the following type output is provided by ADC?
a) Serial type b) Parallel type
c) Both serial and parallel type d) None of the mentioned

10) Which of the following is not a type of systematic error?
a) Instrumental Errors b) Environmental Errors
c) Observational Errors d) Gross error

11) _____ instruments are those which measure the total quantity of electricity delivered in a particular time.
a) Absolute b) Indicating
c) Recording d) Integrating

12) A moving iron instrument can be used for _____.
a) D.C. only b) A.C. only
c) Both D.C. and A.C. d) None

13) _____ method is suitable for the measurement of a resistance of expected value less than one ohm.
a) Substitution b) Loss of charge

3) Figures to the right indicates full marks.
4) Assume suitable data wherever necessary and mention it clearly.

MCQ/Objective Type Questions

Duration: 30 Minutes Marks:14

Q.1 Choose the correct answers from the given options. 14

1) When total supply = total demand, the transportation problem is called _____.
a) Balanced b) Equated
c) Simple d) Zero

2) Which technique is used to solve Assignment Model?
a) Hungarian Method b) Graphical Method
c) Simplex Method d) Integer Programming

3) Allocated cells in the IBFS are also called as _____.
a) Stone Cells b) Water Cells
c) Air Cells d) None of these

4) To convert Maximization Assignment Model into Minimization, _____.
a) Multiply Whole matrix by (-1)
b) Subtract Entire Matrix from Highest Cell
c) Both a & b
d) None of these

5) Advantage of VAM of transportation is _____.
a) Near to optimal Solution b) Least Cost
c) Faster Solution d) Slower Solution

6) Transportation Models are also called as _____.
a) Probabilistic Model b) Distribution Model
c) Game Theory d) Assignment Model

7) ABC analysis considers _____.
a) Total consumption of items b) Total amount of items
c) Both a) and b) d) None of these

8) At the Break-Even Point _____.
a) Profit > Loss
b) Profit < Loss
c) Profit = Loss
d) None of these

9) The PERT in project management means Program Evaluation and _____ Technique.
a) Resource
b) Reconciliation
c) Reconsideration
d) Review

10) _____ stock is the lower limit of stock below which the stock should not be allowed to fall.
a) Maximum
b) Average
c) Safety
d) Standard

11) Optimization Means _____.
a) Maximization
b) Minimization
c) Minimization or Maximization
d) Mean of Minimization & Maximization

12) A feasible solution to LPP _____.
a) Must satisfy all the constraints simultaneously
b) Need not satisfy all the constraints
c) Must be a corner point of feasible region
d) Must optimize the objective function

13) In a project network, the critical path _____.
a) may be the shortest path
b) is the longest path
c) may be the longest path
d) is the shortest path

14) The inventory carrying costs are also called as _____.
a) Procurement costs
b) Set-up costs
c) Storage costs
d) None of the above

Seat No.	

Set **P**

S.Y. (B.Tech.) (Electrical Engineering) (Semester - II) (New) (NEP CBCS) Examination: March/April – 2026
Operation Research (OE-02E)

Day & Date: Friday, 22-05-2026 Max. Marks: 56
Time: 03:00 PM To 06:00 PM

Instructions: 1) Solve any two questions from each Section.
2) Figures to the right indicates full marks.
3) Assume suitable data wherever necessary and mention it clearly.
4) Use of non-programmable calculator is allowed.

SECTION – I

Q.2 Solve both. **14**

a) Using Graphical method, solve
Maximize $Z = 2X_1 + 3X_2$
Subject to, $X_1 + X_2 \leq 30$;
$X_1 - X_2 \geq 0$;
$X_2 \geq 3$;
$0 \leq X_1; \leq 20$;
$0 \leq X_2; \leq 12$;

b) Consider the assignment problem to as shown in table, in this problem 4 supply jobs are to be assigned to four different sub assembly. Solve assignment problem by using Hungarian method.

Sub Assembly	Supply			
	i	ii	iii	iv
1	15	13	14	17
2	11	12	15	13
3	13	12	10	11
4	15	17	14	16

Q.3 Solve both. **14**

a) Find the initial basic feasible solution by NWCM.

	Destination				
	D_1	D_2	D_3	D_4	↓ Supply
S_1	5	3	6	4	30
S_2	3	4	7	8	15
S_3	9	6	5	8	15
Demand →	10	25	18	7	

b) Write in brief on application & advantages of Operational Research.

Q.4 Solve both. **14**

a) What is LPP? What are different components of LPP?

b) How assignment model is useful in practical life? Explain with its steps to solve it.

SECTION – II

Q.5 Solve both. **14**

a) Calculate the value of Economic Order Quantity, Reordering Period, No. of orders per year with the following Data, Annual Usages = 50 Units, Procurement Cost = 15 Rs. Per Order, Unit Cost = 100 Rs. /Item, Inventory Caring Cost = 10% of the unit cost.

b) Define 'Inventory Control' and explain its necessity in the construction industry. Detailed the various types of Inventory Costs involved in maintaining inventory on a site.

Q.6 Solve both. **14**

a) Draw network, find out CP & PD. Calculate All floats of each non-critical Activity.

Activity	$1-2$	$2-3$	$2-4$	$3-4$	$3-5$	$4-6$	$5-6$
Time (Days)	14	13	16	15	18	23	15

b) A small project consists of seven activities. The time estimates in weeks of different activities are given below. Find out probability of completing the project in 18 weeks.

Activity	Estimated Time		
	to	tm	tp
$1-2$	1	1	7
$1-3$	1	4	7
$1-4$	2	2	8
$2-5$	1	1	1
$3-5$	2	5	14
$4-6$	2	5	8
$5-6$	3	6	15

Probability Factor	Probability
0	50%
1	84.13 %
2	97.72 %
3	99.87 %

Q.7 Solve both. **14**

a) Write short notes on:

i) Processing N jobs on one machine (SPT and WSPT rules)

ii) No passing rule in sequencing

b) Explain Sequencing Problem Technique. What are its Different Elements, also elaborate its assumptions?

Seat No.

b) Write in brief on application & advantages of Operational Research.

Q.4 Solve both. **14**

a) What is LPP? What are different components of LPP?

b) How assignment model is useful in practical life? Explain with its steps to solve it.

SECTION – II

Q.5 Solve both. **14**

a) Calculate the value of Economic Order Quantity, Reordering Period, No. of orders per year with the following Data, Annual Usages = 50 Units, Procurement Cost = 15 Rs. Per Order, Unit Cost = 100 Rs. /Item, Inventory Caring Cost = 10% of the unit cost.

b) Define 'Inventory Control' and explain its necessity in the construction industry. Detailed the various types of Inventory Costs involved in maintaining inventory on a site.

Q.6 Solve both. **14**

a) Draw network, find out CP & PD. Calculate All floats of each non-critical Activity.

Activity	$1-2$	$2-3$	$2-4$	$3-4$	$3-5$	$4-6$	$5-6$
Time (Days)	14	13	16	15	18	23	15

b) A small project consists of seven activities. The time estimates in weeks of different activities are given below. Find out probability of completing the project in 18 weeks.

Activity	Estimated Time		
	to	tm	tp
$1-2$	1	1	7
$1-3$	1	4	7
$1-4$	2	2	8
$2-5$	1	1	1
$3-5$	2	5	14
$4-6$	2	5	8
$5-6$	3	6	15

Probability Factor	Probability
0	50%
1	84.13 %
2	97.72 %
3	99.87 %

Q.7 Solve both. **14**

a) Write short notes on:

i) Processing N jobs on one machine (SPT and WSPT rules)

ii) No passing rule in sequencing

b) Explain Sequencing Problem Technique. What are its Different Elements, also elaborate its assumptions?

Seat No.	

Set **S**

S.Y. (B.Tech.) (Electrical Engineering) (Semester - II) (New) (NEP CBCS) Examination: March/April – 2026
Operation Research (OE-02E)

Day & Date: Friday, 22-05-2026 Max. Marks: 70
Time: 03:00 PM To 06:00 PM

Instructions: 1) Q. No. 1 is compulsory. It should be solved in the first 30 minutes in Answer Book Page no 03 (Starting page of the Answer Book). Each question carries one mark.
2) Don't forget to Mention question paper set (P/Q/R/S) on top on page.
3) Figures to the right indicates full marks.
4) Assume suitable data wherever necessary and mention it clearly.

MCQ/Objective Type Questions

Duration: 30 Minutes Marks:14

Q.1 Choose the correct answers from the given options. 14

1) Transportation Models are also called as _____.
a) Probabilistic Model b) Distribution Model
c) Game Theory d) Assignment Model

2) ABC analysis considers _____.
a) Total consumption of items b) Total amount of items
c) Both a) and b) d) None of these

3) At the Break-Even Point _____.
a) Profit > Loss b) Profit < Loss
c) Profit = Loss d) None of these

4) The PERT in project management means Program Evaluation and _____ Technique.
a) Resource b) Reconciliation
c) Reconsideration d) Review

5) _____ stock is the lower limit of stock below which the stock should not be allowed to fall.
a) Maximum b) Average
c) Safety d) Standard

6) Optimization Means _____.
a) Maximization
b) Minimization
c) Minimization or Maximization
d) Mean of Minimization & Maximization

7) A feasible solution to LPP _____.
a) Must satisfy all the constraints simultaneously
b) Need not satisfy all the constraints
c) Must be a corner point of feasible region
d) Must optimize the objective function

8) In a project network, the critical path _____.
a) may be the shortest path
b) is the longest path
c) may be the longest path
d) is the shortest path

9) The inventory carrying costs are also called as _____.
a) Procurement costs
b) Set-up costs
c) Storage costs
d) None of the above

10) When total supply = total demand, the transportation problem is called _____.
a) Balanced
b) Equated
c) Simple
d) Zero

11) Which technique is used to solve Assignment Model?
a) Hungarian Method
b) Graphical Method
c) Simplex Method
d) Integer Programming

12) Allocated cells in the IBFS are also called as _____.
a) Stone Cells
b) Water Cells
c) Air Cells
d) None of these

13) To convert Maximization Assignment Model into Minimization, _____.
a) Multiply Whole matrix by (-1)
b) Subtract Entire Matrix from Highest Cell
c) Both a & b
d) None of these

14) Advantage of VAM of transportation is _____.
a) Near to optimal Solution
b) Least Cost
c) Faster Solution
d) Slower Solution

Seat No.	

Set **S**

S.Y. (B.Tech.) (Electrical Engineering) (Semester - II) (New) (NEP CBCS) Examination: March/April – 2026
Operation Research (OE-02E)

Day & Date: Friday, 22-05-2026 Max. Marks: 56
Time: 03:00 PM To 06:00 PM

Instructions: 1) Solve any two questions from each Section.
2) Figures to the right indicates full marks.
3) Assume suitable data wherever necessary and mention it clearly.
4) Use of non-programmable calculator is allowed.

SECTION – I

Q.2 Solve both. **14**

a) Using Graphical method, solve
Maximize $Z = 2X_1 + 3X_2$
Subject to, $X_1 + X_2 \leq 30$;
$X_1 - X_2 \geq 0$;
$X_2 \geq 3$;
$0 \leq X_1; \leq 20$;
$0 \leq X_2; \leq 12$;

b) Consider the assignment problem to as shown in table, in this problem 4 supply jobs are to be assigned to four different sub assembly. Solve assignment problem by using Hungarian method.

Sub Assembly	Supply			
	i	ii	iii	iv
1	15	13	14	17
2	11	12	15	13
3	13	12	10	11
4	15	17	14	16

Q.3 Solve both. **14**

a) Find the initial basic feasible solution by NWCM.

	Destination				
	D_1	D_2	D_3	D_4	↓ Supply
S_1	5	3	6	4	30
S_2	3	4	7	8	15
S_3	9	6	5	8	15
Demand →	10	25	18	7	

b) Write in brief on application & advantages of Operational Research.

Q.4 Solve both. **14**

a) What is LPP? What are different components of LPP?

b) How assignment model is useful in practical life? Explain with its steps to solve it.

SECTION – II

Q.5 Solve both. **14**

a) Calculate the value of Economic Order Quantity, Reordering Period, No. of orders per year with the following Data, Annual Usages = 50 Units, Procurement Cost = 15 Rs. Per Order, Unit Cost = 100 Rs. /Item, Inventory Caring Cost = 10% of the unit cost.

b) Define 'Inventory Control' and explain its necessity in the construction industry. Detailed the various types of Inventory Costs involved in maintaining inventory on a site.

Q.6 Solve both. **14**

a) Draw network, find out CP & PD. Calculate All floats of each non-critical Activity.

Activity	$1-2$	$2-3$	$2-4$	$3-4$	$3-5$	$4-6$	$5-6$
Time (Days)	14	13	16	15	18	23	15

b) A small project consists of seven activities. The time estimates in weeks of different activities are given below. Find out probability of completing the project in 18 weeks.

Activity	Estimated Time		
	to	tm	tp
$1-2$	1	1	7
$1-3$	1	4	7
$1-4$	2	2	8
$2-5$	1	1	1
$3-5$	2	5	14
$4-6$	2	5	8
$5-6$	3	6	15

Probability Factor	Probability
0	50%
1	84.13 %
2	97.72 %
3	99.87 %

Q.7 Solve both. **14**

a) Write short notes on:

i) Processing N jobs on one machine (SPT and WSPT rules)

ii) No passing rule in sequencing

b) Explain Sequencing Problem Technique. What are its Different Elements, also elaborate its assumptions?

S.Y. (B.Tech.) (Electrical Engineering) (Semester - II) (New) (NEP CBCS) Examination: March/April – 2026
Computational Mathematics (OE-02F)

Day & Date: Friday, 22-05-2026 Max. Marks: 70
Time: 03:00 PM To 06:00 PM

Instructions: 1) Q. No. 1 is compulsory. It should be solved in the first 30 minutes in Answer Book Page no 03 (Starting page of the Answer Book). Each question carries one mark.
2) Don't forget to Mention question paper set (P/Q/R/S) on top of page.
3) Figures to the right indicates full marks.
4) Assume suitable data where necessary.

MCQ/Objective Type Questions

Duration: 30 Minutes Marks:14

Q.1 Choose the correct alternative from the options. **14**

1) A transcendental equation is an equation that involves _____.
a) Only algebraic terms
b) Only transcendental functions
c) Both algebraic and transcendental functions
d) Linear terms only

2) The interval in which a real root of the equation $x^3 - 2x - 5 = 0$ lies is _____.
a) $(1, 2)$ b) $(0, 1)$
c) $(2, 3)$ d) $(3, 4)$

3) The Gauss-Seidel method is used for solving _____.
a) Nonlinear equations b) Systems of linear equations
c) Ordinary differential equations d) Partial differential equations

4) Which of the following is a disadvantage of the Gauss-Jacobi method?
a) It converges faster than most direct methods
b) It requires a large number of iterations for a good approximation
c) It cannot be used for systems with more than two equations
d) It works only for symmetric systems

5) The use of Romberg's method is _____.
a) To solve simultaneous linear equation
b) To find root of linear equation
c) To evaluate definite integration
d) To find the Eigen values

6) The order of convergence of Newton-Raphson method is _____.
a) 1 b) 2
c) $\sqrt{2}$ d) 1.6

7) Power Method is used to find _____.
a) Negative Eigen Value b) Largest Eigen value
c) Positive Eigen Value d) None of these

8) To find the numerically largest Eigen value using iterative method we use the equation _____.
a) $A = \lambda X$ b) $AX = X$
c) $X = \lambda X$ d) $AX = \lambda X$

9) If $dy/dx = x - y$ and $y(0) = 1$, then by Picard's method the value of $y_1(1)$ is _____.
a) 0.905 b) 1.905
c) 2.905 d) None

10) Runge-Kutta method is self-starting method _____.
a) True b) False
c) We can't say d) None

11) The Newton's forward interpolation formula is generally preferred when data points are _____.
a) Unequally spaced
b) Equally spaced and near the beginning
c) Equally spaced and near the end
d) Randomly spaced

12) In the power method, the vector is normalized in each iteration mainly to _____.
a) increase the determinant
b) prevent values from becoming too large
c) eliminate eigen values
d) make the matrix symmetric

13) Simpson's $3/8$ rule requires the number of sub-intervals to be _____.
a) multiple of 2 b) multiple of 3
c) multiple of 4 d) odd only

14) Picard's method is mainly used to solve _____.
a) linear programming problems b) differential equations
c) eigen value problems d) interpolation problems

Seat No.	

Set **P**

S.Y. (B.Tech.) (Electrical Engineering) (Semester - II) (New) (NEP CBCS) Examination: March/April – 2026
Computational Mathematics (OE-02F)

Day & Date: Friday, 22-05-2026 Max. Marks: 56
Time: 03:00 PM To 06:00 PM

Instructions: 1) All questions are compulsory.
2) Figures to the right indicate full marks.
3) Assume suitable data where necessary.

SECTION – I

Q.2 Attempt Any Five: **25**

a) Find the double root of the equation $x^3 - 5.4x^2 + 9.24x - 5.096 = 0$ given that it is nearer to 1.5.

b) Solve the system of equations by Jacobi's iterative method (perform 3 iterations):
$27x + 6y - z = 85,$
$6x + 15y + 2z = 72,$
$x + y + 54z = 110$

c) Find positive real root of the equation $x\sin(x) + \cos(x) = 0$ using Newton-Raphson method correct to 3 decimal places.

d) Solve the system of equations by using Gauss-Elimination method:
$2x + y + z = 7,$
$x + 2y + 3z = 14,$
$3x + 4y + z = 14.$

e) Solve the following system of equations using LU Decomposition method:
$2x + 3y + z = 9$
$x + 2y + 3z = 6$
$3x + y + 2z = 8$

f) Solve $\frac{dy}{dx} = x + y$ with $x_0 = 0, y_0 = 1$ using fourth-order Runge-Kutta method and find approximate value of y when $x = 0.2$

g) Solve $\frac{dy}{dx} = 1 + xy$ with $y(0) = 1$ using Picard's method take first approximation and find y for $x = 0.1$

Q.3 Attempt Any One. **03**

a) Solve the system by Gauss-Seidel method (Perform 4 iterations):

$10x + y + z = 12$

$2x + 10y + z = 13$

$2x + 2y + 10z = 14$

b) Use Newton-Raphson method to find a root of the equation $x^4 - x - 10 = 0$ which is near to $x = 2$. Perform 3 iterations correct to three decimal places.

SECTION – II

Q.4 Attempt Any Five. **25**

a) Approximate $\int_1^3 \frac{1}{x} dx$ using the composite trapezoidal rule with $n = 4$ sub-intervals. List the function values at the nodes, show the application of the formula, and give the final answer correct to 4 decimal places

b) Using Jacobi's method, find all eigenvalues and eigenvectors of the symmetric matrix:

$$A = \begin{bmatrix} 6 & 2 & 1 \\ 2 & 5 & 2 \\ 1 & 2 & 4 \end{bmatrix}$$

c) Evaluate the integral $\int_{-1}^{1} \frac{dx}{1+x^2}$ using Gaussian 3-point Quadrature formula.

d) Find the dominant eigenvalue and the corresponding eigenvector of the matrix

$A = \begin{bmatrix} 4 & 1 & 1 \\ 1 & 3 & 1 \\ 1 & 1 & 2 \end{bmatrix}$ using the Power Method.

Perform 5 iterations taking initial vector as $[1,0,0]^T$

e) Given the Values:

x	2	4	6	8
$f(x)$	5	17	37	65

Evaluate $f(5)$, using Lagrange's Formula.

f) Using Newton's Backward formula, find the value of $f(2)$ if:

x	1.0	1.5	2.0	2.5
$f(x)$	2.71	3.38	4.00	4.58

g) Determine the polynomial $f(x)$ using Newton's Divided Difference formula for the data: Also find $f(3)$.

x	0	1	2	3	5
$f(x)$	1	14	15	5	6

Q.5 Attempt Any One. **03**

a) Find all Eigen values and Eigen vectors of the following matrix by using Gauss Jacobi's Method. $\begin{bmatrix} 1 & 2 \\ 3 & 4 \end{bmatrix}$

b) Construct Newton's Forward interpolation polynomial for the following data:

x	4	6	8	10
$f(x)$	1	3	8	16

Seat No.

Q.2 Attempt Any Five: **25**

a) Find the double root of the equation $x^3 - 5.4x^2 + 9.24x - 5.096 = 0$ given that it is nearer to 1.5.

b) Solve the system of equations by Jacobi's iterative method (perform 3 iterations):
$27x + 6y - z = 85,$
$6x + 15y + 2z = 72,$
$x + y + 54z = 110$

c) Find positive real root of the equation $x\sin(x) + \cos(x) = 0$ using Newton-Raphson method correct to 3 decimal places.

d) Solve the system of equations by using Gauss-Elimination method:
$2x + y + z = 7,$
$x + 2y + 3z = 14,$
$3x + 4y + z = 14.$

e) Solve the following system of equations using LU Decomposition method:
$2x + 3y + z = 9$
$x + 2y + 3z = 6$
$3x + y + 2z = 8$

f) Solve $\frac{dy}{dx} = x + y$ with $x_0 = 0, y_0 = 1$ using fourth-order Runge-Kutta method and find approximate value of y when $x = 0.2$

g) Solve $\frac{dy}{dx} = 1 + xy$ with $y(0) = 1$ using Picard's method take first approximation and find y for $x = 0.1$

Q.3 Attempt Any One. **03**

a) Solve the system by Gauss-Seidel method (Perform 4 iterations):

$10x + y + z = 12$

$2x + 10y + z = 13$

$2x + 2y + 10z = 14$

b) Use Newton-Raphson method to find a root of the equation $x^4 - x - 10 = 0$ which is near to $x = 2$. Perform 3 iterations correct to three decimal places.

SECTION – II

Q.4 Attempt Any Five. **25**

a) Approximate $\int_1^3 \frac{1}{x} dx$ using the composite trapezoidal rule with $n = 4$ sub-intervals. List the function values at the nodes, show the application of the formula, and give the final answer correct to 4 decimal places

b) Using Jacobi's method, find all eigenvalues and eigenvectors of the symmetric matrix:

$$A = \begin{bmatrix} 6 & 2 & 1 \\ 2 & 5 & 2 \\ 1 & 2 & 4 \end{bmatrix}$$

c) Evaluate the integral $\int_{-1}^{1} \frac{dx}{1+x^2}$ using Gaussian 3-point Quadrature formula.

d) Find the dominant eigenvalue and the corresponding eigenvector of the matrix

$$A = \begin{bmatrix} 4 & 1 & 1 \\ 1 & 3 & 1 \\ 1 & 1 & 2 \end{bmatrix}$$ using the Power Method.

Perform 5 iterations taking initial vector as $[1,0,0]^T$

e) Given the Values:

x	2	4	6	8
$f(x)$	5	17	37	65

Evaluate $f(5)$, using Lagrange's Formula.

f) Using Newton's Backward formula, find the value of $f(2)$ if:

x	1.0	1.5	2.0	2.5
$f(x)$	2.71	3.38	4.00	4.58

g) Determine the polynomial $f(x)$ using Newton's Divided Difference formula for the data: Also find $f(3)$.

x	0	1	2	3	5
$f(x)$	1	14	15	5	6

Q.5 Attempt Any One. **03**

a) Find all Eigen values and Eigen vectors of the following matrix by using Gauss Jacobi's Method. $\begin{bmatrix} 1 & 2 \\ 3 & 4 \end{bmatrix}$

b) Construct Newton's Forward interpolation polynomial for the following data:

x	4	6	8	10
$f(x)$	1	3	8	16

$6x + 15y + 2z = 72,$
$x + y + 54z = 110$

c) Find positive real root of the equation $x\sin(x) + \cos(x) = 0$ using Newton-Raphson method correct to 3 decimal places.

d) Solve the system of equations by using Gauss-Elimination method:
$2x + y + z = 7,$
$x + 2y + 3z = 14,$
$3x + 4y + z = 14.$

e) Solve the following system of equations using LU Decomposition method:
$2x + 3y + z = 9$
$x + 2y + 3z = 6$
$3x + y + 2z = 8$

f) Solve $\frac{dy}{dx} = x + y$ with $x_0 = 0, y_0 = 1$ using fourth-order Runge-Kutta method and find approximate value of y when $x = 0.2$

g) Solve $\frac{dy}{dx} = 1 + xy$ with $y(0) = 1$ using Picard's method take first approximation and find y for $x = 0.1$

Q.3 Attempt Any One. **03**

a) Solve the system by Gauss-Seidel method (Perform 4 iterations):

$10x + y + z = 12$

$2x + 10y + z = 13$

$2x + 2y + 10z = 14$

b) Use Newton-Raphson method to find a root of the equation $x^4 - x - 10 = 0$ which is near to $x = 2$. Perform 3 iterations correct to three decimal places.

SECTION – II

Q.4 Attempt Any Five. **25**

a) Approximate $\int_1^3 \frac{1}{x} dx$ using the composite trapezoidal rule with $n = 4$ sub-intervals. List the function values at the nodes, show the application of the formula, and give the final answer correct to 4 decimal places

b) Using Jacobi's method, find all eigenvalues and eigenvectors of the symmetric matrix:

$$A = \begin{bmatrix} 6 & 2 & 1 \\ 2 & 5 & 2 \\ 1 & 2 & 4 \end{bmatrix}$$

c) Evaluate the integral $\int_{-1}^{1} \frac{dx}{1+x^2}$ using Gaussian 3-point Quadrature formula.

d) Find the dominant eigenvalue and the corresponding eigenvector of the matrix

$A = \begin{bmatrix} 4 & 1 & 1 \\ 1 & 3 & 1 \\ 1 & 1 & 2 \end{bmatrix}$ using the Power Method.

Perform 5 iterations taking initial vector as $[1,0,0]^T$

e) Given the Values:

x	2	4	6	8
$f(x)$	5	17	37	65

Evaluate $f(5)$, using Lagrange's Formula.

f) Using Newton's Backward formula, find the value of $f(2)$ if:

x	1.0	1.5	2.0	2.5
$f(x)$	2.71	3.38	4.00	4.58

g) Determine the polynomial $f(x)$ using Newton's Divided Difference formula for the data: Also find $f(3)$.

x	0	1	2	3	5
$f(x)$	1	14	15	5	6

Q.5 Attempt Any One. **03**

a) Find all Eigen values and Eigen vectors of the following matrix by using Gauss Jacobi's Method. $\begin{bmatrix} 1 & 2 \\ 3 & 4 \end{bmatrix}$

b) Construct Newton's Forward interpolation polynomial for the following data:

x	4	6	8	10
$f(x)$	1	3	8	16

Seat No.		Set	S

S.Y. (B.Tech.) (Electrical Engineering) (Semester - II) (New) (NEP CBCS) Examination: March/April – 2026
Computational Mathematics (OE-02F)

Day & Date: Friday, 22-05-2026 Max. Marks: 70
Time: 03:00 PM To 06:00 PM

Instructions: 1) Q. No. 1 is compulsory. It should be solved in the first 30 minutes in Answer Book Page no 03 (Starting page of the Answer Book). Each question carries one mark.
2) Don't forget to Mention question paper set (P/Q/R/S) on top of page.
3) Figures to the right indicates full marks.
4) Assume suitable data where necessary.

MCQ/Objective Type Questions

Duration: 30 Minutes Marks:14

Q.1 Choose the correct alternative from the options. **14**

1) The order of convergence of Newton-Raphson method is _____.
a) 1 b) 2
c) $\sqrt{2}$ d) 1.6

2) Power Method is used to find _____.
a) Negative Eigen Value b) Largest Eigen value
c) Positive Eigen Value d) None of these

3) To find the numerically largest Eigen value using iterative method we use the equation _____.
a) $A = \lambda X$ b) $AX = X$
c) $X = \lambda X$ d) $AX = \lambda X$

4) If $dy/dx = x - y$ and $y(0) = 1$, then by Picard's method the value of $y_1(1)$ is _____.
a) 0.905 b) 1.905
c) 2.905 d) None

5) Runge-Kutta method is self-starting method _____.
a) True b) False
c) We can't say d) None

6) The Newton's forward interpolation formula is generally preferred when data points are _____.
a) Unequally spaced
b) Equally spaced and near the beginning
c) Equally spaced and near the end
d) Randomly spaced

7) In the power method, the vector is normalized in each iteration mainly to _____.
   a) increase the determinant
   b) prevent values from becoming too large
   c) eliminate eigen values
   d) make the matrix symmetric

8) Simpson's $3/8$ rule requires the number of sub-intervals to be _____.
   a) multiple of 2
   b) multiple of 3
   c) multiple of 4
   d) odd only

9) Picard's method is mainly used to solve _____.
   a) linear programming problems
   b) differential equations
   c) eigen value problems
   d) interpolation problems

10) A transcendental equation is an equation that involves _____.
   a) Only algebraic terms
   b) Only transcendental functions
   c) Both algebraic and transcendental functions
   d) Linear terms only

11) The interval in which a real root of the equation $x^3 - 2x - 5 = 0$ lies is _____.
   a) $(1, 2)$
   b) $(0, 1)$
   c) $(2, 3)$
   d) $(3, 4)$

12) The Gauss-Seidel method is used for solving _____.
   a) Nonlinear equations
   b) Systems of linear equations
   c) Ordinary differential equations
   d) Partial differential equations

13) Which of the following is a disadvantage of the Gauss-Jacobi method?
   a) It converges faster than most direct methods
   b) It requires a large number of iterations for a good approximation
   c) It cannot be used for systems with more than two equations
   d) It works only for symmetric systems

14) The use of Romberg's method is _____.
   a) To solve simultaneous linear equation
   b) To find root of linear equation
   c) To evaluate definite integration
   d) To find the Eigen values

Time: 03:00 PM To 06:00 PM

Instructions: 1) All questions are compulsory.
2) Figures to the right indicate full marks.
3) Assume suitable data where necessary.

SECTION – I

Q.2 Attempt Any Five: **25**

a) Find the double root of the equation $x^3 - 5.4x^2 + 9.24x - 5.096 = 0$ given that it is nearer to 1.5.

b) Solve the system of equations by Jacobi's iterative method (perform 3 iterations):
$27x + 6y - z = 85,$
$6x + 15y + 2z = 72,$
$x + y + 54z = 110$

c) Find positive real root of the equation $x\sin(x) + \cos(x) = 0$ using Newton-Raphson method correct to 3 decimal places.

d) Solve the system of equations by using Gauss-Elimination method:
$2x + y + z = 7,$
$x + 2y + 3z = 14,$
$3x + 4y + z = 14.$

e) Solve the following system of equations using LU Decomposition method:
$2x + 3y + z = 9$
$x + 2y + 3z = 6$
$3x + y + 2z = 8$

f) Solve $\frac{dy}{dx} = x + y$ with $x_0 = 0, y_0 = 1$ using fourth-order Runge-Kutta method and find approximate value of y when $x = 0.2$

g) Solve $\frac{dy}{dx} = 1 + xy$ with $y(0) = 1$ using Picard's method take first approximation and find y for $x = 0.1$

Q.3 Attempt Any One. **03**

a) Solve the system by Gauss-Seidel method (Perform 4 iterations):

$10x + y + z = 12$

$2x + 10y + z = 13$

$2x + 2y + 10z = 14$

b) Use Newton-Raphson method to find a root of the equation $x^4 - x - 10 = 0$ which is near to $x = 2$. Perform 3 iterations correct to three decimal places.

SECTION – II

Q.4 Attempt Any Five. **25**

a) Approximate $\int_1^3 \frac{1}{x} dx$ using the composite trapezoidal rule with $n = 4$ sub-intervals. List the function values at the nodes, show the application of the formula, and give the final answer correct to 4 decimal places

b) Using Jacobi's method, find all eigenvalues and eigenvectors of the symmetric matrix:

$$A = \begin{bmatrix} 6 & 2 & 1 \\ 2 & 5 & 2 \\ 1 & 2 & 4 \end{bmatrix}$$

c) Evaluate the integral $\int_{-1}^{1} \frac{dx}{1+x^2}$ using Gaussian 3-point Quadrature formula.

d) Find the dominant eigenvalue and the corresponding eigenvector of the matrix

$A = \begin{bmatrix} 4 & 1 & 1 \\ 1 & 3 & 1 \\ 1 & 1 & 2 \end{bmatrix}$ using the Power Method.

Perform 5 iterations taking initial vector as $[1,0,0]^T$

e) Given the Values:

x	2	4	6	8
$f(x)$	5	17	37	65

Evaluate $f(5)$, using Lagrange's Formula.

f) Using Newton's Backward formula, find the value of $f(2)$ if:

x	1.0	1.5	2.0	2.5
$f(x)$	2.71	3.38	4.00	4.58

g) Determine the polynomial $f(x)$ using Newton's Divided Difference formula for the data: Also find $f(3)$.

x	0	1	2	3	5
$f(x)$	1	14	15	5	6

Q.5 Attempt Any One. **03**

a) Find all Eigen values and Eigen vectors of the following matrix by using Gauss Jacobi's Method. $\begin{bmatrix} 1 & 2 \\ 3 & 4 \end{bmatrix}$

b) Construct Newton's Forward interpolation polynomial for the following data:

x	4	6	8	10
$f(x)$	1	3	8	16

S.Y. (B.Tech.) (Electrical Engineering) (Semester - II) (New) (NEP CBCS) Examination: March/April – 2026
Professional Business Communication (OE-02G)

Day & Date: Friday, 22-05-2026 Max. Marks: 70
Time: 03:00 PM To 06:00 PM

Instructions: 1) Q. No. 1 is compulsory. It should be solved in the first 30 minutes in Answer Book Page no 03 (Starting page of the Answer Book). Each question carries one mark.
2) Don't forget to Mention question paper set (P/Q/R/S) on top of page.
3) Figures to the right indicates full marks.
4) Assume suitable data wherever needed and mention it clearly.

MCQ/Objective Type Questions

Duration: 30 Minutes Marks:14

Q.1 Choose the correct alternative from the option. 14

1) In the basic process of communication, the sender converts ideas into symbols; this step is called_____.
a) Decoding b) Encoding
c) Feedback d) Channeling

2) A message sent without words using facial expressions or gestures is called _____.
a) Written communication b) Verbal communication
c) Non-verbal communication d) Grapevine communication

3) Which channel characteristic most reduces chances of immediate feedback?
a) Face-to-face conversation b) Telephone call
c) Email d) Video conference

4) A major barrier to effective communication that arises from personal beliefs or selective attention is called _____.
a) Noise b) Semantic barrier
c) Perceptual barrier d) Channel barrier

5) Body language, eye contact and posture are examples of ____.
a) Verbal codes b) Non-verbal codes
c) Written codes d) Graphic communication

6) Upward communication flows from _____.
a) Top management to workers
b) Peers to peers
c) Workers to management
d) External stakeholders to company

7) An advantage of face-to-face communication over written communication is _____.
a) Permanent record
b) Easier legal reference
c) Immediate feedback
d) More formal tone

8) Which element is essential for an effective welcome speech?
a) Detailed technical data
b) Acknowledgement of guests
c) Long biographical note
d) Complex statistics

9) The main purpose of a vote of thanks at an event is to _____.
a) Introduce the keynote speaker
b) Summarize research findings
c) Express gratitude to contributors and audience
d) Present the event budget

10) Which is a best practice when delivering a professional presentation?
a) Reading every slide verbatim
b) Using too many small fonts
c) Maintaining eye contact and varying tone
d) Using no structure or flow

11) When a buyer is dissatisfied with delivered goods and asks for correction or refund, they should send a _____.
a) Enquiry letter
b) Complaint letter
c) Order letter
d) Quotation letter

12) A purchase order is principally used to _____.
a) Complain about defects
b) Request a quotation
c) Place an order for goods or services
d) Acknowledge receipt of payment

13) Which part of a business letter contains the main message or details the writer wants to communicate?
a) Heading
b) Salutation
c) Body
d) Signature block

14) Which report type is typically written to describe a workplace accident and recommend corrective actions?
a) Progress report
b) Accident report
c) Sales report
d) Quotation report

b) Explain the elements of communication with a neat diagram.

c) Describe the process of communication in detail.

Q.3 Solve following. (Any Two) **14**

a) Explain verbal and non-verbal communication with suitable examples.

b) Describe body language and its importance in communication.

c) Explain formal and informal communication in an organization.

SECTION – II

Q.4 Solve following. (Any Two) **14**

a) Explain the concept and importance of professional presentations.

b) Describe the steps involved in preparing and delivering a presentation.

c) Explain the Four P's of professional presentations.

Q.5 Solve following. (Any Two) **14**

a) Explain the style and structure of a business letter.

b) Write a detailed note on enquiry letters and quotation letters.

c) Explain purchase order, work order, and complaint letter.

S.Y. (B.Tech.) (Electrical Engineering) (Semester - II) (New) (NEP CBCS) Examination: March/April – 2026
Electric Motors and Controls for Electric Vehicle (EEHn-02A)

Day & Date: Tuesday, 26-05-2026 Max. Marks: 70
Time: 10:00 AM To 01:00 PM

Instructions: 1) Q. No. 1 is compulsory. It should be solved in the first 30 minutes in Answer Book Page no 03 (Starting page of the Answer Book). Each question carries one mark.
2) Don't forget to Mention question paper set (P/Q/R/S) on top of page.
3) Figures to the right indicate full marks.

MCQ/Objective Type Questions

Duration: 30 Minutes Marks: 14

Q.1 Choose the correct option. **14**

1) Electrical motors are ideal for vehicle applications because of _____.
a) Torque speed characteristics b) VI Characteristics
c) Pd Characteristics d) alpha delta characteristics

2) Which type of Coupling happens in a series hybrid EV?
a) Hydraulic Coupling b) Mechanical Coupling
c) Electrical Coupling d) All of the above

3) In series hybrid vehicle _____ is coupled with the internal combustion engine to produce electricity for propulsion.
a) diesel engine b) generator
c) gas engine d) hydrogen engine

4) In Four Quadrant Operation of an electrical machine the second Operation is _____.
a) Forward Motoring b) Reverse Braking
c) Forward Braking d) Reverse Motoring

5) Which of the following is used to build a electric drive?
a) Source b) Motor
c) Control unit d) All of the above

6) How many thyristor are required for full converter?
a) 1 b) 2
c) 3 d) 4

7) In voltage source inverters (VSIs), the amplitude of the output voltage is _____.
a) independent of the load
b) dependent on the load
c) dependent only on Loads
d) none of the mentioned

8) Which of the following pair is not correctly matched?
a) MOSFET - unipolar device
b) BJT - switching power loss
c) MOSFET - high ON state conduction power loss
d) IGBT - voltage-controlled device

9) The Field Oriented Control (FOC) enables the induction machine being controlled alike the _____.
a) Separately excited DC machine
b) Permanent magnet DC machine
c) Switched reluctance machine option
d) Stepper motor

10) Which of the following is the correct abbreviation of IFOC?
a) Insight field oriented control
b) Indirect field oriented control
c) Inverter field oriented control
d) Isolated field oriented control

11) Which of following control loop used by Direct Torque Control?
a) Speed Control loop
b) torque control loop
c) both
d) none

12) _____ analysis of an IM allows decoupled analysis where the flux and torque component can be independently controlled.
a) Scalar Control
b) Vector Control
c) V/f Control
d) none

13) Following is not type of hybrid electric vehicle.
a) Series
b) Parallel
c) Vertical
d) Complex

14) Objective of hybrid car is _____.
a) reduce fuel consumption
b) reduction in emission
c) increased power and torque
d) all

Electric Motors and Controls for Electric Vehicle (EEHn-02A)

Day & Date: Tuesday, 26-05-2026 Max. Marks: 56
Time: 10:00 AM To 01:00 PM

Instructions: 1) All questions are compulsory.
2) Figures to the right indicate full marks.

SECTION – I

Q.2 Solve Any Four. **16**

a) Discuss following various electric drive train topologies.
i) Series HEDT
ii) Parallel HEDT

b) With neat diagram explain Brushless DC Motor.

c) Explain the four-quadrant chopper control of dc motor using Dual converter.

d) Compare VSIs with CSIs.

e) Explain Control of Induction Motor by Voltage Source Inverter.

Q.3 Solve Any Two. **12**

a) With neat diagram discuss in detail about the power and torque characteristics of various motors suitable for EV application.

b) Describe the time control ratio and frequency modulation system.

c) Explain in closed loop control with cyclo converter-based Induction Motor drives.

SECTION – II

Q.4 Solve Any Four. **16**

a) Explain in detail Indirect/feed forward vector control of Induction machine**.**

b) Describe Space vector modulation control in case of Induction machine.

c) Explain Different DTC control strategy.

d) Explain various method of Torque ripple reduction.

e) Explain Vehicle Supervisory Control in details.

Q.5 Solve Any Two. **12**

a) Explain Direct & Quadrature axis transformation method.

b) Explain Direct Torque control method of Induction Machine.

c) Explain different Mode Selection Strategy of control of electrical vehicle.

Professional Ethics (VEC-02)

Day & Date: Friday, 29-05-2026 Max. Marks: 50
Time: 10:00 AM To 11:30 AM

Instructions: 1) All questions are compulsory.
2) Figures to the right indicate full marks.
3) Mention Question Paper Set (P/Q/R/S) on Top of Page.

Q.1 Answer the following Objective Type Questions. **50** **Answer**

1) What are fundamental human values?
a) Core beliefs and principles that guide human behavior and interactions
b) Economic indicators for social development
c) Religious doctrines that govern human life
d) Scientific facts that influence decision-making

2) Which value emphasizes treating others as you wish to be treated?
a) Respect b) Empathy
c) Honesty d) Kindness

3) The value of honesty is closely related to _____.
a) Truthfulness and sincerity b) Wealth and possessions
c) Power and influence d) Indifference and insensitivity

4) Which value involves considering the perspectives and feelings of others?
a) Empathy b) Courage
c) Determination d) Patience

5) The value of respect entails _____.
a) Recognizing the worth of every individual and their rights
b) Achieving personal success at any cost
c) Promoting competition among individuals
d) Pursuing material gains over relationships

6) Which value involves being accountable for one's decisions and actions?
a) Responsibility b) Flexibility
c) Confidence d) Arrogance

7) The value of integrity entails _____.
a) Being honest and true to oneself and others
b) Pursuing personal interests at any cost
c) Manipulating and deceiving others for personal gain
d) Ignoring the feelings and rights of other

8) Which value involves being considerate and thoughtful towards others?
a) Kindness
b) Determination
c) Independence
d) Indifference

9) The value of wisdom involves _____.
a) Making sound and informed judgments based on knowledge and experience
b) Pursuing personal interests at the expense of others
c) Ignoring the perspectives and concerns of others
d) Suppressing one's emotions and thoughts

10) Which value involves being truthful and sincere in one's actions and words?
a) Honesty
b) Tolerance
c) Flexibility
d) Arrogance

11) What is the primary goal of engineering ethics?
a) To maximize profits for companies
b) To ensure engineers work efficiently
c) To protect public safety and welfare
d) To follow industry standards

12) Which of the following is considered an ethical responsibility of an engineer?
a) Ignoring environmental concerns to meet deadlines
b) Ensuring the safety of the public
c) Disregarding laws and regulations
d) Making decisions based on personal interests

13) Ethical engineering practices promote _____.
a) The continuous pursuit of profit
b) The advancement of technology at any cost
c) Public trust and confidence in engineering
d) The minimization of safety regulations

14) Ethical engineers should consider which of the following when making decisions?
a) Profit maximization
b) Only the interests of the employer
c) Public safety, environmental impact, and ethical codes
d) Personal comfort and convenience

15) Which of the following is NOT part of an engineer's ethical responsibility?
a) Designing for safety and sustainability
b) Falsifying data to ensure project success
c) Reporting safety concerns immediately
d) Following industry standards and regulations

16) Ethical engineering involves making decisions based on _____.
a) Personal opinions and values
b) Financial incentives and company pressure
c) Objective analysis, codes of ethics, and consideration for the public good
d) Trends in the field of engineering

17) What should an engineer do if they discover a colleague is involved in unethical practices?
a) Ignore the situation to avoid conflict
b) Report the unethical behavior to management or relevant authorities
c) Cover up the situation to protect the colleague
d) Allow the behavior to continue if it does not affect the project

18) Ethical engineering practices include _____.
a) Following industry standards and regulations
b) Ensuring profitability is the main priority
c) Cutting costs by any means necessary
d) Avoiding the reporting of safety hazards

19) What is the primary focus of Kohlberg's theory?
a) Cognitive development b) Social development
c) Moral development d) Emotional development

20) Which term refers to an agreement that is made through discussions and compromises among parties?
a) Conflict b) Consensus
c) Dispute d) Isolation

21) What is the primary goal of risk assessment?
a) To eliminate all risks
b) To identify and mitigate potential risks
c) To ignore potential risks
d) To transfer risks to others

22) What is the primary goal of safety protocols?
a) To increase productivity
b) To reduce costs
c) To prevent injuries and illnesses
d) To improve employee morale

23) What is the difference between a hazard and a risk?
a) A hazard is a potential risk, while a risk is a real danger
b) A hazard is a real danger, while a risk is a potential danger
c) A hazard is a physical danger, while a risk is a financial danger
d) A hazard is a financial danger, while a risk is a physical danger

24) What should you do if you identify a potential risk in the workplace?
a) Ignore it and hope it goes away
b) Report it to your supervisor or HR
c) Try to mitigate it on your own
d) Transfer the risk to someone else

25) According to the theory of ethical egoism, what should guide an individual's moral actions?
a) The well-being of others
b) The individual's own self-interest
c) Social norms and conventions
d) Universal moral principles

26) Collegiality in a professional setting refers to _____.
a) Loyalty to your employer
b) Cooperation and mutual respect among colleagues
c) Competing for individual success
d) Avoiding work conflicts

27) Professional loyalty involves _____.
a) Reporting colleagues' mistakes publicly
b) Protecting the interests of the team or organization
c) Ignoring safety violations to avoid
d) Disclosing confidential information for personal conflict gain

28) Employee rights include _____.
a) The right to work without discrimination
b) The right to disregard company policies
c) The right to personal opinion but not affecting work
d) The right to ignore workplace safety standards

29) Intellectual Property Rights (IPR) protect _____.
a) The financial interests of corporations
b) The ownership and use of creative ideas and inventions
c) The physical assets of a company
d) Workplace performance evaluations

30) *Risk assessment* is important because it helps in _____.
a) Evaluating the potential impact of hazards on health and safety
b) Minimizing workplace productivity
c) Defining job roles
d) Ignoring environmental issues

31) In risk management, mitigation strategies aim to _____.
a) Accept all risks in the workplace
b) Reduce or eliminate identified risks
c) Increase the likelihood of hazards
d) Focus only on maximizing profits

32) Which of the following is a potential consequence of *occupational crime?*
a) Increased workplace productivity
b) Legal consequences and loss of reputation
c) Improvement in company safety standards
d) Higher employee satisfaction

33) Risk reduction in engineering refers to _____.
a) Implementing measures to lower the work chances of accidents
b) Increasing the number of hazards in the work environment
c) Ignoring potential risks
d) Cutting costs by removing safety measures

34) Public safety regulations are primarily designed to _____.
a) Ensure the safety of the company's assets
b) Protect the general public from potential harm
c) Increase revenue for the government
d) Focus only on preventing natural disasters

35) Multinational corporations (MNCs) are characterized by _____.
a) Operations in multiple countries with a centralized headquarters
b) Operating only in their home country
c) Limited influence on global markets
d) No responsibility toward environmental concerns

36) Environmental ethics primarily deals with _____.
a) Human responsibility to manage the environment and natural resources
b) Minimizing corporate profits
c) Technological advancements in engineering
d) Treating employees equally

37) Which of the following is NOT an example of environmental ethics?
a) Reducing pollution and waste
b) Maximizing resource use regardless of environmental impact
c) Preserving biodiversity
d) Sustainable development

38) Computer ethics involves _____.
   a) Programming and coding without considering social consequences
   b) Understanding the moral implications of computing technologies
   c) Focusing only on technological innovation
   d) Ignoring privacy issues

39) Weapons development ethics deals with _____.
   a) The development of new technologies to enhance military capabilities
   b) Restricting the use of all technological advancements
   c) Focusing only on civilian safety
   d) Only addressing the legal aspects of weapon development

40) Engineers as managers are expected to _____.
   a) Focus solely on technical tasks
   b) Lead teams, make strategic decisions, and manage projects
   c) Ignore the business aspects of their work
   d) Avoid taking responsibility for team outcomes

41) Consulting engineers are hired to _____.
   a) Work on projects within the company they are employed
   b) Provide expert advice on technical and engineering problems
   c) Manage public relations for a company
   d) Conduct legal investigations

42) Engineers acting as expert witnesses typically _____.
   a) Present evidence and offer testimony in legal cases
   b) Focus on public relations during a case
   c) Manage engineering projects for legal firms
   d) Directly represent the interests of a company court

43) Sample Code of Ethics of professional organizations typically includes _____.
   a) Guidelines for acceptable behavior and decision-making
   b) Rules for maximizing profits at any cost
   c) Detailed technical specifications for projects
   d) Guidelines for political involvement in engineering

44) ASME stands for _____.
   a) American Society of Mechanical Engineers
   b) American Society of Management Engineers
   c) Association of Safety and Mechanical Engineers
   d) Association of Scientific and Mechanical Engineers

45) The ASCE Code of Ethics emphasizes _____.
a) Following only local regulations
b) Maintaining professional integrity and responsibility
c) Focusing on personal financial gain
d) Ignoring environmental impacts

46) The IEEE Code of Ethics is primarily concerned with _____.
a) Fostering professional competence and integrity
b) Protecting corporate secrets
c) Maximizing technological advancements at any cost
d) Developing weapons for defense purposes

47) Global issues in engineering ethics include _____.
a) Cultural differences in engineering practices
b) Lack of understanding between technical and ethical concerns
c) Addressing both local and international engineering challenges
d) All of the above

48) A key challenge faced by multinational corporations is _____.
a) Balancing profits with social and environmental
b) Competing only within their home country responsibilities
c) Focusing solely on domestic issues
d) Ignoring corporate social responsibility

49) Empathy is the ability to _____.
a) Solve problems logically
b) Understand and share the feelings of others
c) Be indifferent to others' emotions
d) Only care about your own well-being

50) The quality of "caring" includes _____.
a) Showing concern for others' well-being
b) Ignoring the needs of others
c) Only helping family and friends
d) Seeking praise for helping others

S.Y. (B.Tech.) (Electrical Engineering) (Semester - II) (New) (NEP CBCS) Examination: March/April – 2026
Professional Ethics (VEC-02)

Day & Date: Friday, 29-05-2026 Max. Marks: 50
Time: 10:00 AM To 11:30 AM

Instructions: 1) All questions are compulsory.
2) Figures to the right indicate full marks.
3) Mention Question Paper Set (P/Q/R/S) on Top of Page.

Q.1 Answer the following Objective Type Questions. **50** **Answer**

1) What is the primary goal of risk assessment?
a) To eliminate all risks
b) To identify and mitigate potential risks
c) To ignore potential risks
d) To transfer risks to others

2) What is the primary goal of safety protocols?
a) To increase productivity
b) To reduce costs
c) To prevent injuries and illnesses
d) To improve employee morale

3) What is the difference between a hazard and a risk?
a) A hazard is a potential risk, while a risk is a real danger
b) A hazard is a real danger, while a risk is a potential danger
c) A hazard is a physical danger, while a risk is a financial danger
d) A hazard is a financial danger, while a risk is a physical danger

4) What should you do if you identify a potential risk in the workplace?
a) Ignore it and hope it goes away
b) Report it to your supervisor or HR
c) Try to mitigate it on your own
d) Transfer the risk to someone else

5) According to the theory of ethical egoism, what should guide an individual's moral actions?
a) The well-being of others
b) The individual's own self-interest
c) Social norms and conventions
d) Universal moral principles

6) Collegiality in a professional setting refers to _____.
   a) Loyalty to your employer
   b) Cooperation and mutual respect among colleagues
   c) Competing for individual success
   d) Avoiding work conflicts

7) Professional loyalty involves _____.
   a) Reporting colleagues' mistakes publicly
   b) Protecting the interests of the team or organization
   c) Ignoring safety violations to avoid
   d) Disclosing confidential information for personal conflict gain

8) Employee rights include _____.
   a) The right to work without discrimination
   b) The right to disregard company policies
   c) The right to personal opinion but not affecting work
   d) The right to ignore workplace safety standards

9) Intellectual Property Rights (IPR) protect _____.
   a) The financial interests of corporations
   b) The ownership and use of creative ideas and inventions
   c) The physical assets of a company
   d) Workplace performance evaluations

10) *Risk assessment* is important because it helps in _____.
   a) Evaluating the potential impact of hazards on health and safety
   b) Minimizing workplace productivity
   c) Defining job roles
   d) Ignoring environmental issues

11) In risk management, mitigation strategies aim to _____.
   a) Accept all risks in the workplace
   b) Reduce or eliminate identified risks
   c) Increase the likelihood of hazards
   d) Focus only on maximizing profits

12) Which of the following is a potential consequence of *occupational crime?*
   a) Increased workplace productivity
   b) Legal consequences and loss of reputation
   c) Improvement in company safety standards
   d) Higher employee satisfaction

13) Risk reduction in engineering refers to _____.
   a) Implementing measures to lower the work chances of accidents
   b) Increasing the number of hazards in the work environment
   c) Ignoring potential risks
   d) Cutting costs by removing safety measures

14) Public safety regulations are primarily designed to _____.
- a) Ensure the safety of the company's assets
- b) Protect the general public from potential harm
- c) Increase revenue for the government
- d) Focus only on preventing natural disasters

15) Multinational corporations (MNCs) are characterized by _____.
- a) Operations in multiple countries with a centralized headquarters
- b) Operating only in their home country
- c) Limited influence on global markets
- d) No responsibility toward environmental concerns

16) Environmental ethics primarily deals with _____.
- a) Human responsibility to manage the environment and natural resources
- b) Minimizing corporate profits
- c) Technological advancements in engineering
- d) Treating employees equally

17) Which of the following is NOT an example of environmental ethics?
- a) Reducing pollution and waste
- b) Maximizing resource use regardless of environmental impact
- c) Preserving biodiversity
- d) Sustainable development

18) Computer ethics involves _____.
- a) Programming and coding without considering social consequences
- b) Understanding the moral implications of computing technologies
- c) Focusing only on technological innovation
- d) Ignoring privacy issues

19) Weapons development ethics deals with _____.
- a) The development of new technologies to enhance military capabilities
- b) Restricting the use of all technological advancements
- c) Focusing only on civilian safety
- d) Only addressing the legal aspects of weapon development

20) Engineers as managers are expected to _____.
- a) Focus solely on technical tasks
- b) Lead teams, make strategic decisions, and manage projects
- c) Ignore the business aspects of their work
- d) Avoid taking responsibility for team outcomes

21) Consulting engineers are hired to _____.
a) Work on projects within the company they are employed
b) Provide expert advice on technical and engineering problems
c) Manage public relations for a company
d) Conduct legal investigations

22) Engineers acting as expert witnesses typically _____.
a) Present evidence and offer testimony in legal cases
b) Focus on public relations during a case
c) Manage engineering projects for legal firms
d) Directly represent the interests of a company court

23) Sample Code of Ethics of professional organizations typically includes _____.
a) Guidelines for acceptable behavior and decision-making
b) Rules for maximizing profits at any cost
c) Detailed technical specifications for projects
d) Guidelines for political involvement in engineering

24) ASME stands for _____.
a) American Society of Mechanical Engineers
b) American Society of Management Engineers
c) Association of Safety and Mechanical Engineers
d) Association of Scientific and Mechanical Engineers

25) The ASCE Code of Ethics emphasizes _____.
a) Following only local regulations
b) Maintaining professional integrity and responsibility
c) Focusing on personal financial gain
d) Ignoring environmental impacts

26) The IEEE Code of Ethics is primarily concerned with _____.
a) Fostering professional competence and integrity
b) Protecting corporate secrets
c) Maximizing technological advancements at any cost
d) Developing weapons for defense purposes

27) Global issues in engineering ethics include _____.
a) Cultural differences in engineering practices
b) Lack of understanding between technical and ethical concerns
c) Addressing both local and international engineering challenges
d) All of the above

28) A key challenge faced by multinational corporations is _____.
a) Balancing profits with social and environmental
b) Competing only within their home country responsibilities
c) Focusing solely on domestic issues
d) Ignoring corporate social responsibility

29) Empathy is the ability to _____.
a) Solve problems logically
b) Understand and share the feelings of others
c) Be indifferent to others' emotions
d) Only care about your own well-being

30) The quality of "caring" includes _____.
a) Showing concern for others' well-being
b) Ignoring the needs of others
c) Only helping family and friends
d) Seeking praise for helping others

31) What are fundamental human values?
a) Core beliefs and principles that guide human behavior and interactions
b) Economic indicators for social development
c) Religious doctrines that govern human life
d) Scientific facts that influence decision-making

32) Which value emphasizes treating others as you wish to be treated?
a) Respect b) Empathy
c) Honesty d) Kindness

33) The value of honesty is closely related to _____.
a) Truthfulness and sincerity b) Wealth and possessions
c) Power and influence d) Indifference and insensitivity

34) Which value involves considering the perspectives and feelings of others?
a) Empathy b) Courage
c) Determination d) Patience

35) The value of respect entails _____.
a) Recognizing the worth of every individual and their rights
b) Achieving personal success at any cost
c) Promoting competition among individuals
d) Pursuing material gains over relationships

36) Which value involves being accountable for one's decisions and actions?
a) Responsibility b) Flexibility
c) Confidence d) Arrogance

37) The value of integrity entails _____.
a) Being honest and true to oneself and others
b) Pursuing personal interests at any cost
c) Manipulating and deceiving others for personal gain
d) Ignoring the feelings and rights of other

38) Which value involves being considerate and thoughtful towards others?

a) Kindness
b) Determination
c) Independence
d) Indifference

39) The value of wisdom involves _____.

a) Making sound and informed judgments based on knowledge and experience
b) Pursuing personal interests at the expense of others
c) Ignoring the perspectives and concerns of others
d) Suppressing one's emotions and thoughts

40) Which value involves being truthful and sincere in one's actions and words?

a) Honesty
b) Tolerance
c) Flexibility
d) Arrogance

41) What is the primary goal of engineering ethics?

a) To maximize profits for companies
b) To ensure engineers work efficiently
c) To protect public safety and welfare
d) To follow industry standards

42) Which of the following is considered an ethical responsibility of an engineer?

a) Ignoring environmental concerns to meet deadlines
b) Ensuring the safety of the public
c) Disregarding laws and regulations
d) Making decisions based on personal interests

43) Ethical engineering practices promote _____.

a) The continuous pursuit of profit
b) The advancement of technology at any cost
c) Public trust and confidence in engineering
d) The minimization of safety regulations

44) Ethical engineers should consider which of the following when making decisions?

a) Profit maximization
b) Only the interests of the employer
c) Public safety, environmental impact, and ethical codes
d) Personal comfort and convenience

45) Which of the following is NOT part of an engineer's ethical responsibility?

a) Designing for safety and sustainability
b) Falsifying data to ensure project success
c) Reporting safety concerns immediately
d) Following industry standards and regulations

46) Ethical engineering involves making decisions based on _____.

a) Personal opinions and values
b) Financial incentives and company pressure
c) Objective analysis, codes of ethics, and consideration for the public good
d) Trends in the field of engineering

47) What should an engineer do if they discover a colleague is involved in unethical practices?

a) Ignore the situation to avoid conflict
b) Report the unethical behavior to management or relevant authorities
c) Cover up the situation to protect the colleague
d) Allow the behavior to continue if it does not affect the project

48) Ethical engineering practices include _____.

a) Following industry standards and regulations
b) Ensuring profitability is the main priority
c) Cutting costs by any means necessary
d) Avoiding the reporting of safety hazards

49) What is the primary focus of Kohlberg's theory?

a) Cognitive development b) Social development
c) Moral development d) Emotional development

50) Which term refers to an agreement that is made through discussions and compromises among parties?

a) Conflict b) Consensus
c) Dispute d) Isolation

d) Directly represent the interests of a company court

3) Sample Code of Ethics of professional organizations typically includes _____.
a) Guidelines for acceptable behavior and decision-making
b) Rules for maximizing profits at any cost
c) Detailed technical specifications for projects
d) Guidelines for political involvement in engineering

4) ASME stands for _____.
a) American Society of Mechanical Engineers
b) American Society of Management Engineers
c) Association of Safety and Mechanical Engineers
d) Association of Scientific and Mechanical Engineers

5) The ASCE Code of Ethics emphasizes _____.
a) Following only local regulations
b) Maintaining professional integrity and responsibility
c) Focusing on personal financial gain
d) Ignoring environmental impacts

6) The IEEE Code of Ethics is primarily concerned with _____.
a) Fostering professional competence and integrity
b) Protecting corporate secrets
c) Maximizing technological advancements at any cost
d) Developing weapons for defense purposes

7) Global issues in engineering ethics include _____.
a) Cultural differences in engineering practices
b) Lack of understanding between technical and ethical concerns
c) Addressing both local and international engineering challenges
d) All of the above

8) A key challenge faced by multinational corporations is _____.
a) Balancing profits with social and environmental
b) Competing only within their home country responsibilities
c) Focusing solely on domestic issues
d) Ignoring corporate social responsibility

9) Empathy is the ability to _____.
a) Solve problems logically
b) Understand and share the feelings of others
c) Be indifferent to others' emotions
d) Only care about your own well-being

10) The quality of "caring" includes _____.
a) Showing concern for others' well-being
b) Ignoring the needs of others
c) Only helping family and friends
d) Seeking praise for helping others

11) What are fundamental human values?
a) Core beliefs and principles that guide human behavior and interactions
b) Economic indicators for social development
c) Religious doctrines that govern human life
d) Scientific facts that influence decision-making

12) Which value emphasizes treating others as you wish to be treated?
a) Respect b) Empathy
c) Honesty d) Kindness

13) The value of honesty is closely related to _____.
a) Truthfulness and sincerity b) Wealth and possessions
c) Power and influence d) Indifference and insensitivity

14) Which value involves considering the perspectives and feelings of others?
a) Empathy b) Courage
c) Determination d) Patience

15) The value of respect entails _____.
a) Recognizing the worth of every individual and their rights
b) Achieving personal success at any cost
c) Promoting competition among individuals
d) Pursuing material gains over relationships

16) Which value involves being accountable for one's decisions and actions?
a) Responsibility b) Flexibility
c) Confidence d) Arrogance

17) The value of integrity entails _____.
a) Being honest and true to oneself and others
b) Pursuing personal interests at any cost
c) Manipulating and deceiving others for personal gain
d) Ignoring the feelings and rights of other

18) Which value involves being considerate and thoughtful towards others?
a) Kindness b) Determination
c) Independence d) Indifference

19) The value of wisdom involves _____.
a) Making sound and informed judgments based on knowledge and experience
b) Pursuing personal interests at the expense of others
c) Ignoring the perspectives and concerns of others
d) Suppressing one's emotions and thoughts

20) Which value involves being truthful and sincere in one's actions and words?
a) Honesty b) Tolerance
c) Flexibility d) Arrogance

21) What is the primary goal of engineering ethics?
a) To maximize profits for companies
b) To ensure engineers work efficiently
c) To protect public safety and welfare
d) To follow industry standards

22) Which of the following is considered an ethical responsibility of an engineer?
a) Ignoring environmental concerns to meet deadlines
b) Ensuring the safety of the public
c) Disregarding laws and regulations
d) Making decisions based on personal interests

23) Ethical engineering practices promote _____.
a) The continuous pursuit of profit
b) The advancement of technology at any cost
c) Public trust and confidence in engineering
d) The minimization of safety regulations

24) Ethical engineers should consider which of the following when making decisions?
a) Profit maximization
b) Only the interests of the employer
c) Public safety, environmental impact, and ethical codes
d) Personal comfort and convenience

25) Which of the following is NOT part of an engineer's ethical responsibility?
a) Designing for safety and sustainability
b) Falsifying data to ensure project success
c) Reporting safety concerns immediately
d) Following industry standards and regulations

26) Ethical engineering involves making decisions based on _____.
a) Personal opinions and values
b) Financial incentives and company pressure
c) Objective analysis, codes of ethics, and consideration for the public good
d) Trends in the field of engineering

27) What should an engineer do if they discover a colleague is involved in unethical practices?
a) Ignore the situation to avoid conflict
b) Report the unethical behavior to management or relevant authorities
c) Cover up the situation to protect the colleague
d) Allow the behavior to continue if it does not affect the project

28) Ethical engineering practices include _____.
a) Following industry standards and regulations
b) Ensuring profitability is the main priority
c) Cutting costs by any means necessary
d) Avoiding the reporting of safety hazards

29) What is the primary focus of Kohlberg's theory?
a) Cognitive development b) Social development
c) Moral development d) Emotional development

30) Which term refers to an agreement that is made through discussions and compromises among parties?
a) Conflict b) Consensus
c) Dispute d) Isolation

31) What is the primary goal of risk assessment?
a) To eliminate all risks
b) To identify and mitigate potential risks
c) To ignore potential risks
d) To transfer risks to others

32) What is the primary goal of safety protocols?
a) To increase productivity
b) To reduce costs
c) To prevent injuries and illnesses
d) To improve employee morale

33) What is the difference between a hazard and a risk?
a) A hazard is a potential risk, while a risk is a real danger
b) A hazard is a real danger, while a risk is a potential danger
c) A hazard is a physical danger, while a risk is a financial danger
d) A hazard is a financial danger, while a risk is a physical danger

34) What should you do if you identify a potential risk in the workplace?
a) Ignore it and hope it goes away
b) Report it to your supervisor or HR
c) Try to mitigate it on your own
d) Transfer the risk to someone else

35) According to the theory of ethical egoism, what should guide an individual's moral actions?
a) The well-being of others
b) The individual's own self-interest
c) Social norms and conventions
d) Universal moral principles

36) Collegiality in a professional setting refers to _____.
a) Loyalty to your employer
b) Cooperation and mutual respect among colleagues
c) Competing for individual success
d) Avoiding work conflicts

37) Professional loyalty involves _____.
a) Reporting colleagues' mistakes publicly
b) Protecting the interests of the team or organization
c) Ignoring safety violations to avoid
d) Disclosing confidential information for personal conflict gain

38) Employee rights include _____.
a) The right to work without discrimination
b) The right to disregard company policies
c) The right to personal opinion but not affecting work
d) The right to ignore workplace safety standards

39) Intellectual Property Rights (IPR) protect _____.
- a) The financial interests of corporations
- b) The ownership and use of creative ideas and inventions
- c) The physical assets of a company
- d) Workplace performance evaluations

40) *Risk assessment* is important because it helps in _____.
- a) Evaluating the potential impact of hazards on health and safety
- b) Minimizing workplace productivity
- c) Defining job roles
- d) Ignoring environmental issues

41) In risk management, mitigation strategies aim to _____.
- a) Accept all risks in the workplace
- b) Reduce or eliminate identified risks
- c) Increase the likelihood of hazards
- d) Focus only on maximizing profits

42) Which of the following is a potential consequence of *occupational crime?*
- a) Increased workplace productivity
- b) Legal consequences and loss of reputation
- c) Improvement in company safety standards
- d) Higher employee satisfaction

43) Risk reduction in engineering refers to _____.
- a) Implementing measures to lower the work chances of accidents
- b) Increasing the number of hazards in the work environment
- c) Ignoring potential risks
- d) Cutting costs by removing safety measures

44) Public safety regulations are primarily designed to _____.
- a) Ensure the safety of the company's assets
- b) Protect the general public from potential harm
- c) Increase revenue for the government
- d) Focus only on preventing natural disasters

45) Multinational corporations (MNCs) are characterized by _____.
- a) Operations in multiple countries with a centralized headquarters
- b) Operating only in their home country
- c) Limited influence on global markets
- d) No responsibility toward environmental concerns

46) Environmental ethics primarily deals with _____.

a) Human responsibility to manage the environment and natural resources
b) Minimizing corporate profits
c) Technological advancements in engineering
d) Treating employees equally

47) Which of the following is NOT an example of environmental ethics?

a) Reducing pollution and waste
b) Maximizing resource use regardless of environmental impact
c) Preserving biodiversity
d) Sustainable development

48) Computer ethics involves _____.

a) Programming and coding without considering social consequences
b) Understanding the moral implications of computing technologies
c) Focusing only on technological innovation
d) Ignoring privacy issues

49) Weapons development ethics deals with _____.

a) The development of new technologies to enhance military capabilities
b) Restricting the use of all technological advancements
c) Focusing only on civilian safety
d) Only addressing the legal aspects of weapon development

50) Engineers as managers are expected to _____.

a) Focus solely on technical tasks
b) Lead teams, make strategic decisions, and manage projects
c) Ignore the business aspects of their work
d) Avoid taking responsibility for team outcomes

Q.1 Answer the following Objective Type Questions. **50** **Answer**

1) What is the primary goal of engineering ethics?
a) To maximize profits for companies
b) To ensure engineers work efficiently
c) To protect public safety and welfare
d) To follow industry standards

2) Which of the following is considered an ethical responsibility of an engineer?
a) Ignoring environmental concerns to meet deadlines
b) Ensuring the safety of the public
c) Disregarding laws and regulations
d) Making decisions based on personal interests

3) Ethical engineering practices promote _____.
a) The continuous pursuit of profit
b) The advancement of technology at any cost
c) Public trust and confidence in engineering
d) The minimization of safety regulations

4) Ethical engineers should consider which of the following when making decisions?
a) Profit maximization
b) Only the interests of the employer
c) Public safety, environmental impact, and ethical codes
d) Personal comfort and convenience

5) Which of the following is NOT part of an engineer's ethical responsibility?
a) Designing for safety and sustainability
b) Falsifying data to ensure project success
c) Reporting safety concerns immediately
d) Following industry standards and regulations

6) Ethical engineering involves making decisions based on _____.

a) Personal opinions and values
b) Financial incentives and company pressure
c) Objective analysis, codes of ethics, and consideration for the public good
d) Trends in the field of engineering

7) What should an engineer do if they discover a colleague is involved in unethical practices?

a) Ignore the situation to avoid conflict
b) Report the unethical behavior to management or relevant authorities
c) Cover up the situation to protect the colleague
d) Allow the behavior to continue if it does not affect the project

8) Ethical engineering practices include _____.

a) Following industry standards and regulations
b) Ensuring profitability is the main priority
c) Cutting costs by any means necessary
d) Avoiding the reporting of safety hazards

9) What is the primary focus of Kohlberg's theory?

a) Cognitive development
b) Social development
c) Moral development
d) Emotional development

10) Which term refers to an agreement that is made through discussions and compromises among parties?

a) Conflict
b) Consensus
c) Dispute
d) Isolation

11) What is the primary goal of risk assessment?

a) To eliminate all risks
b) To identify and mitigate potential risks
c) To ignore potential risks
d) To transfer risks to others

12) What is the primary goal of safety protocols?

a) To increase productivity
b) To reduce costs
c) To prevent injuries and illnesses
d) To improve employee morale

13) What is the difference between a hazard and a risk?

a) A hazard is a potential risk, while a risk is a real danger
b) A hazard is a real danger, while a risk is a potential danger
c) A hazard is a physical danger, while a risk is a financial danger
d) A hazard is a financial danger, while a risk is a physical danger

14) What should you do if you identify a potential risk in the workplace?
a) Ignore it and hope it goes away
b) Report it to your supervisor or HR
c) Try to mitigate it on your own
d) Transfer the risk to someone else

15) According to the theory of ethical egoism, what should guide an individual's moral actions?
a) The well-being of others
b) The individual's own self-interest
c) Social norms and conventions
d) Universal moral principles

16) Collegiality in a professional setting refers to _____.
a) Loyalty to your employer
b) Cooperation and mutual respect among colleagues
c) Competing for individual success
d) Avoiding work conflicts

17) Professional loyalty involves _____.
a) Reporting colleagues' mistakes publicly
b) Protecting the interests of the team or organization
c) Ignoring safety violations to avoid
d) Disclosing confidential information for personal conflict gain

18) Employee rights include _____.
a) The right to work without discrimination
b) The right to disregard company policies
c) The right to personal opinion but not affecting work
d) The right to ignore workplace safety standards

19) Intellectual Property Rights (IPR) protect _____.
a) The financial interests of corporations
b) The ownership and use of creative ideas and inventions
c) The physical assets of a company
d) Workplace performance evaluations

20) *Risk assessment* is important because it helps in _____.
a) Evaluating the potential impact of hazards on health and safety
b) Minimizing workplace productivity
c) Defining job roles
d) Ignoring environmental issues

21) In risk management, mitigation strategies aim to _____.
a) Accept all risks in the workplace
b) Reduce or eliminate identified risks
c) Increase the likelihood of hazards
d) Focus only on maximizing profits

22) Which of the following is a potential consequence of *occupational crime?*
a) Increased workplace productivity
b) Legal consequences and loss of reputation
c) Improvement in company safety standards
d) Higher employee satisfaction

23) Risk reduction in engineering refers to _____.
a) Implementing measures to lower the work chances of accidents
b) Increasing the number of hazards in the work environment
c) Ignoring potential risks
d) Cutting costs by removing safety measures

24) Public safety regulations are primarily designed to _____.
a) Ensure the safety of the company's assets
b) Protect the general public from potential harm
c) Increase revenue for the government
d) Focus only on preventing natural disasters

25) Multinational corporations (MNCs) are characterized by _____.
a) Operations in multiple countries with a centralized headquarters
b) Operating only in their home country
c) Limited influence on global markets
d) No responsibility toward environmental concerns

26) Environmental ethics primarily deals with _____.
a) Human responsibility to manage the environment and natural resources
b) Minimizing corporate profits
c) Technological advancements in engineering
d) Treating employees equally

27) Which of the following is NOT an example of environmental ethics?
a) Reducing pollution and waste
b) Maximizing resource use regardless of environmental impact
c) Preserving biodiversity
d) Sustainable development

28) Computer ethics involves _____.
a) Programming and coding without considering social consequences
b) Understanding the moral implications of computing technologies
c) Focusing only on technological innovation
d) Ignoring privacy issues

29) Weapons development ethics deals with _____.
a) The development of new technologies to enhance military capabilities
b) Restricting the use of all technological advancements
c) Focusing only on civilian safety
d) Only addressing the legal aspects of weapon development

30) Engineers as managers are expected to _____.
a) Focus solely on technical tasks
b) Lead teams, make strategic decisions, and manage projects
c) Ignore the business aspects of their work
d) Avoid taking responsibility for team outcomes

31) Consulting engineers are hired to _____.
a) Work on projects within the company they are employed
b) Provide expert advice on technical and engineering problems
c) Manage public relations for a company
d) Conduct legal investigations

32) Engineers acting as expert witnesses typically _____.
a) Present evidence and offer testimony in legal cases
b) Focus on public relations during a case
c) Manage engineering projects for legal firms
d) Directly represent the interests of a company court

33) Sample Code of Ethics of professional organizations typically includes _____.
a) Guidelines for acceptable behavior and decision-making
b) Rules for maximizing profits at any cost
c) Detailed technical specifications for projects
d) Guidelines for political involvement in engineering

34) ASME stands for _____.
a) American Society of Mechanical Engineers
b) American Society of Management Engineers
c) Association of Safety and Mechanical Engineers
d) Association of Scientific and Mechanical Engineers

35) The ASCE Code of Ethics emphasizes _____.
a) Following only local regulations
b) Maintaining professional integrity and responsibility
c) Focusing on personal financial gain
d) Ignoring environmental impacts

36) The IEEE Code of Ethics is primarily concerned with _____.
a) Fostering professional competence and integrity
b) Protecting corporate secrets
c) Maximizing technological advancements at any cost
d) Developing weapons for defense purposes

37) Global issues in engineering ethics include _____.
a) Cultural differences in engineering practices
b) Lack of understanding between technical and ethical concerns
c) Addressing both local and international engineering challenges
d) All of the above

38) A key challenge faced by multinational corporations is _____.
a) Balancing profits with social and environmental
b) Competing only within their home country responsibilities
c) Focusing solely on domestic issues
d) Ignoring corporate social responsibility

39) Empathy is the ability to _____.
a) Solve problems logically
b) Understand and share the feelings of others
c) Be indifferent to others' emotions
d) Only care about your own well-being

40) The quality of "caring" includes _____.
a) Showing concern for others' well-being
b) Ignoring the needs of others
c) Only helping family and friends
d) Seeking praise for helping others

41) What are fundamental human values?
a) Core beliefs and principles that guide human behavior and interactions
b) Economic indicators for social development
c) Religious doctrines that govern human life
d) Scientific facts that influence decision-making

42) Which value emphasizes treating others as you wish to be treated?
a) Respect b) Empathy
c) Honesty d) Kindness

43) The value of honesty is closely related to _____.
a) Truthfulness and sincerity b) Wealth and possessions
c) Power and influence d) Indifference and insensitivity

44) Which value involves considering the perspectives and feelings of others?
a) Empathy b) Courage
c) Determination d) Patience

45) The value of respect entails _____.

a) Recognizing the worth of every individual and their rights
b) Achieving personal success at any cost
c) Promoting competition among individuals
d) Pursuing material gains over relationships

46) Which value involves being accountable for one's decisions and actions?

a) Responsibility b) Flexibility
c) Confidence d) Arrogance

47) The value of integrity entails _____.

a) Being honest and true to oneself and others
b) Pursuing personal interests at any cost
c) Manipulating and deceiving others for personal gain
d) Ignoring the feelings and rights of other

48) Which value involves being considerate and thoughtful towards others?

a) Kindness b) Determination
c) Independence d) Indifference

49) The value of wisdom involves _____.

a) Making sound and informed judgments based on knowledge and experience
b) Pursuing personal interests at the expense of others
c) Ignoring the perspectives and concerns of others
d) Suppressing one's emotions and thoughts

50) Which value involves being truthful and sincere in one's actions and words?

a) Honesty b) Tolerance
c) Flexibility d) Arrogance

S.Y. (B.Tech.) (Electrical Engineering) (Semester - II) (New) (NEP CBCS) Examination: March/April – 2026
Analog and Digital Integrated Circuits (BTN07404)

Day & Date: Friday, 29-05-2026 Max. Marks: 70
Time: 10:00 AM To 01:00 PM

Instructions: 1) Q. No. 1 is compulsory. It should be solved in the first 30 minutes in Answer Book Page no 03 (Starting page of the Answer Book). Each question carries one mark.
2) Don't forget to Mention question paper set (P/Q/R/S) on top of page.
3) Figures to the right indicate full marks.

MCQ/Objective Type Questions

Duration: 30 Minutes Marks:14

Q.1 Choose the correct alternative from the options. **14**

1) Unity gain amplifier is also known as _____.
a) Difference amplifier b) Comparator
c) Single ended d) Voltage follower

2) For non-inverting amplifier, if $\mathrm{Rf} = 100\mathrm{k}\Omega$ and $\mathrm{Ri} = 1\mathrm{k}\Omega$ then closed loop gain is _____.
a) 1,00,000 b) $-1{,}000$
c) 101 d) -100

3) The large signal bandwidth of an op-amp is limited by its _____.
a) loop gain b) slew rate
c) output impedance d) input frequency

4) CMRR of a differential amplifier can be improved by increasing _____.
a) Differential voltage gain b) Common mode voltage gain
c) Both a) and b) d) None of the above.

5) A differential amplifier is capable of amplifying _____.
a) DC input signal only b) AC input signal only
c) AC & DC input signal d) None of the Mentioned

6) A feedback amplifier is also called as _____.
a) Open loop amplifier b) Closed loop amplifier
c) Feedback network amplifier d) Looped network amplifier

7) Integration amplifier produces _____.
   a) Output waveform as integration of input waveform
   b) Input waveform as integration of output waveform
   c) Output waveform as derivative of input waveform
   d) Input waveform as derivative of output waveform

8) Which of the following is NOT considered for forming groups in K-map?
   a) Rolling
   b) Diagonal
   c) Vertical
   d) Horizontal

9) The Boolean expression $Y = XY + ZX$ is in the _____ form.
   a) Product-of-Sum
   b) Sum-of-Products
   c) Linear
   d) None of the above

10) The flip flop is a _____ device.
   a) Unstable
   b) Bi-stable
   c) Both a) and b)
   d) None of the above

11) Which circuit doesn't have a memory unit?
   a) Combinational
   b) Sequential
   c) Both a) and b)
   d) None of the above

12) A register is defined as _____.
   a) The group of latches for storing one bit of information
   b) The group of latches for storing n-bit of information
   c) The group of flip-flops suitable for storing one bit of information
   d) The group of flip-flops suitable for storing binary information

13) The full form of SIPO is _____.
   a) Serial-in Parallel-out
   b) Serial in perpendicular out
   c) Serial-in past out
   d) Serial-In Peripheral-Out

14) Registers capable of shifting in one direction is _____.
   a) Universal shift register
   b) Unidirectional shift register
   c) Unipolar shift register
   d) Unique shift register

Set **P**

S.Y. (B.Tech.) (Electrical Engineering) (Semester - II) (New) (NEP CBCS) Examination: March/April – 2026
Analog and Digital Integrated Circuits (BTN07404)

Day & Date: Friday, 29-05-2026 Max. Marks: 56
Time: 10:00 AM To 01:00 PM

Instructions: 1) All questions are compulsory.
2) Figures to the right indicate full marks.

SECTION – I

Q.2 Attempt Any Four questions. **16**

a) Explain DC Analysis of differential amplifier (BIBO).

b) Explain the ideal characteristics of op-amp.

c) Explain the concept of virtual ground condition.

d) Explain voltage to current converter with floating load.

e) With neat circuit diagram explain working of integrator.

Q.3 Attempt Any Two questions. **12**

a) Explain three op amp instrumentation amplifiers.

b) Draw and explain equivalent circuit and ideal voltage transfer curve of op-amp.

c) Derive an expression for input resistance and output resistance for voltage series feedback amplifier.

SECTION – II

Q.4 Attempt Any Four questions. **16**

a) Explain S-R flip-flop with logical diagram and truth table.

b) Differentiate between synchronous and asynchronous counters.

c) Define the following terms in brief.
i) Maxterm
ii) Min term
iii) SOP
iv) POS

d) Explain full adder in details & realize it using basic logic gates.

e) Explain different modes of shift registers with suitable diagrams.

Q.5 Attempt Any Two questions. **12**

a) Reduce the following expression using K-map and implement reduced expression by using logic gates $(\mathrm{A},\mathrm{B},\mathrm{C},\mathrm{D}) = \sum m\,(1,2,5,8,11,13)$

b) Design a D flip-flop using JK flip flop.

c) Design a mod-10 asynchronous down counter using J-K flip flop.

Time: 03:00 PM To 06:00 PM

Instructions: 1) Q. No. 1 is compulsory. It should be solved in the first 30 minutes in Answer Book Page no 03 (Starting page of the Answer Book). Each question carries one mark.
2) Don't forget to Mention question paper set (P/Q/R/S) on top of page.
3) Figures to the right indicates full marks.

MCQ/Objective Type Questions

Duration: 30 Minutes Marks:14

Q.1 Choose the correct alternative. **14**

1) Which of the following is the binary equivalent of the decimal number 25?
a) 11000 b) 11001
c) 11100 d) 10101

2) The Boolean expression $A + A'BA + A'BA + A'B$ simplifies to _____.
a) $ABABAB$ b) $A + BA + BA + B$
c) $A' + BA' + BA' + B$ d) $A + B'A + B'A + B'$

3) Which logic gate produces a HIGH output only when all inputs are LOW?
a) AND b) NOR
c) XOR d) NAND

4) The minimum number of variables required to form a 4×1 multiplexer is _____.
a) 2 select lines and 4 input lines
b) 3 select lines and 8 input lines
c) 4 select lines and 16 input lines
d) 2 input lines and 4 select lines

5) Which of the following expressions represents a Half Adder output for SUM?
a) $A + BA + BA + B$ b) $ABABAB$
c) $A \oplus BA \backslash \text{oplus}\ BA \oplus B$ d) $A'B + AB'A'B + AB'A'B + AB'$

6) In a JK flip-flop, if both J and K inputs are HIGH, the output will ____.
a) Remain the same b) Reset to 0
c) Set to 1 d) Toggle

7) A register that shifts data either left or right is called a _____.
a) Parallel register b) Counter
c) Shift register d) Latch

8) In a Moore machine, the output depends on _____.
a) Present state only b) Input only
c) Both present state and input d) Next state only

9) The diagram that shows transitions between states in a finite state machine is called a _____.
a) Truth table b) Timing diagram
c) State diagram d) Flowchart

10) A Mealy machine produces output based on _____.
a) Present state only
b) Input only
c) Present state and current input
d) Next state

11) Which of the following PLDs has fixed AND array and programmable OR array?
a) PROM b) PAL
c) PLA d) FPGA

12) The main difference between PLA and PAL is that _____.
a) PLA has programmable AND & OR arrays, PAL has only programmable OR array
b) PLA has fixed AND array, PAL has fixed OR array
c) PLA has both programmable arrays, PAL has only programmable AND array
d) PLA is slower than PAL

13) Which type of memory is non-volatile and can be electrically erased and reprogrammed?
a) ROM b) PROM
c) EPROM d) EEPROM

14) The device that converts digital signals into analog signals is called _____.
a) ADC b) DAC
c) RAM d) ROM

Day & Date: Monday, 04-05-2026 Max. Marks: 56
Time: 03:00 PM To 06:00 PM

Instructions: 1) All questions are compulsory.
2) Figures to the right indicate full marks.

Section – I

Q.2 Attempt the following. (Any Four) **16**

a) Convert the following decimal numbers to binary and octal:
i) 25
ii) 213

b) What is a demultiplexer? Draw and explain a 1:4 demultiplexer.

c) Explain the working of an SR flip-flop with its truth table.

d) Simplify $F(A, B, C) = \Sigma(1, 2, 5, 6)$ using Karnaugh Map.

e) Explain Half Adder and Half Subtractor with logic diagram.

Q.3 Attempt the following. (Any Two) **12**

a) Explain the working and truth tables of the basic and universal logic gates.

b) Simplify the Boolean expression using Boolean laws:
i) $\mathrm{A} + \mathrm{AB} + \mathrm{A}'\mathrm{B}$
ii) $\mathrm{ABC}' + \mathrm{BC} + \mathrm{A}'\mathrm{C}$

c) Explain the operation and characteristic table of SR, JK, D, and T flip-flops.

Section – II

Q.4 Attempt the following. (Any Four) **16**

a) Draw a state diagram and state table for a sequence detector that detects "101" in a serial bit stream.

b) Describe the programming technique of EEPROM and how it differs from PROM.

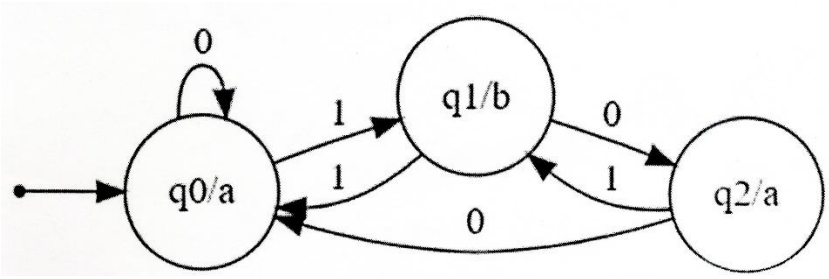
c) Explain how a logic function can be implemented using a PAL.

d) Explain the role of memory in digital systems and how it interfaces with a microprocessor.

e) What are Programmable Logic Devices (PLDs)? List their types.

Q.5 Attempt the following. (Any Two) **12**

a) Convert the following Moore machine to the Mealy machine with transition table.



b) Explain in brief FPGA architecture and its applications.

c) Compare RAM, ROM, PROM, EPROM, and EEPROM based on volatility, programmability, and use.

S.Y. (B.Tech.) (Electronics & Computer Engineering) (Semester - I) (New) (NEP CBCS) Examination: March/April – 2026
Fundamentals of Digital Techniques (ECEPCC-01)

Day & Date: Monday, 04-05-2026 Max. Marks: 70
Time: 03:00 PM To 06:00 PM

Instructions: 1) Q. No. 1 is compulsory. It should be solved in the first 30 minutes in Answer Book Page no 03 (Starting page of the Answer Book). Each question carries one mark.
2) Don't forget to Mention question paper set (P/Q/R/S) on top of page.
3) Figures to the right indicates full marks.

MCQ/Objective Type Questions

Duration: 30 Minutes Marks:14

Q.1 Choose the correct alternative. **14**

1) In a Moore machine, the output depends on _____.
a) Present state only
b) Input only
c) Both present state and input
d) Next state only

2) The diagram that shows transitions between states in a finite state machine is called a _____.
a) Truth table
b) Timing diagram
c) State diagram
d) Flowchart

3) A Mealy machine produces output based on _____.
a) Present state only
b) Input only
c) Present state and current input
d) Next state

4) Which of the following PLDs has fixed AND array and programmable OR array?
a) PROM
b) PAL
c) PLA
d) FPGA

5) The main difference between PLA and PAL is that _____.
a) PLA has programmable AND & OR arrays, PAL has only programmable OR array
b) PLA has fixed AND array, PAL has fixed OR array
c) PLA has both programmable arrays, PAL has only programmable AND array
d) PLA is slower than PAL

6) Which type of memory is non-volatile and can be electrically erased and reprogrammed?

a) ROM
b) PROM
c) EPROM
d) EEPROM

7) The device that converts digital signals into analog signals is called _____.

a) ADC
b) DAC
c) RAM
d) ROM

8) Which of the following is the binary equivalent of the decimal number 25?

a) 11000
b) 11001
c) 11100
d) 10101

9) The Boolean expression $A + A'BA + A'BA + A'B$ simplifies to _____.

a) $ABABAB$
b) $A + BA + BA + B$
c) $A' + BA' + BA' + B$
d) $A + B'A + B'A + B'$

10) Which logic gate produces a HIGH output only when all inputs are LOW?

a) AND
b) NOR
c) XOR
d) NAND

11) The minimum number of variables required to form a 4×1 multiplexer is _____.

a) 2 select lines and 4 input lines
b) 3 select lines and 8 input lines
c) 4 select lines and 16 input lines
d) 2 input lines and 4 select lines

12) Which of the following expressions represents a Half Adder output for SUM?

a) $A + BA + BA + B$
b) $ABABAB$
c) $A \oplus BA \backslash \text{oplus } BA \oplus B$
d) $A'B + AB'A'B + AB'A'B + AB'$

13) In a JK flip-flop, if both J and K inputs are HIGH, the output will ____.

a) Remain the same
b) Reset to 0
c) Set to 1
d) Toggle

14) A register that shifts data either left or right is called a _____.

a) Parallel register
b) Counter
c) Shift register
d) Latch

Set **Q**

S.Y. (B.Tech.) (Electronics & Computer Engineering) (Semester - I) (New) (NEP CBCS) Examination: March/April – 2026
Fundamentals of Digital Techniques (ECEPCC-01)

Day & Date: Monday, 04-05-2026 Max. Marks: 56
Time: 03:00 PM To 06:00 PM

Instructions: 1) All questions are compulsory.
2) Figures to the right indicate full marks.

Section – I

Q.2 Attempt the following. (Any Four) **16**

a) Convert the following decimal numbers to binary and octal:
i) 25
ii) 213

b) What is a demultiplexer? Draw and explain a 1:4 demultiplexer.

c) Explain the working of an SR flip-flop with its truth table.

d) Simplify $F(A, B, C) = \Sigma(1, 2, 5, 6)$ using Karnaugh Map.

e) Explain Half Adder and Half Subtractor with logic diagram.

Q.3 Attempt the following. (Any Two) **12**

a) Explain the working and truth tables of the basic and universal logic gates.

b) Simplify the Boolean expression using Boolean laws:
i) $\mathrm{A} + \mathrm{AB} + \mathrm{A'B}$
ii) $\mathrm{ABC'} + \mathrm{BC} + \mathrm{A'C}$

c) Explain the operation and characteristic table of SR, JK, D, and T flip-flops.

Section – II

Q.4 Attempt the following. (Any Four) **16**

a) Draw a state diagram and state table for a sequence detector that detects "101" in a serial bit stream.

b) Describe the programming technique of EEPROM and how it differs from PROM.

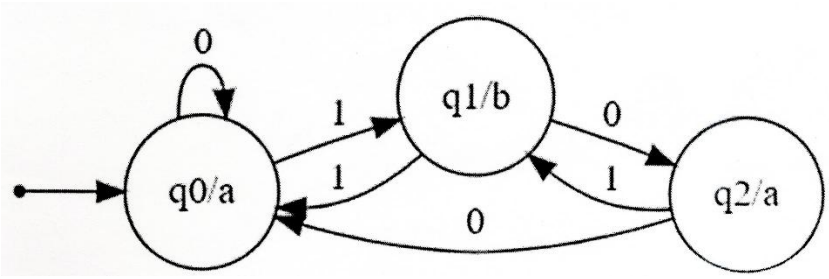
c) Explain how a logic function can be implemented using a PAL.

d) Explain the role of memory in digital systems and how it interfaces with a microprocessor.

e) What are Programmable Logic Devices (PLDs)? List their types.

Q.5 Attempt the following. (Any Two) **12**

a) Convert the following Moore machine to the Mealy machine with transition table.



b) Explain in brief FPGA architecture and its applications.

c) Compare RAM, ROM, PROM, EPROM, and EEPROM based on volatility, programmability, and use.

2) Don't forget to Mention question paper set (P/Q/R/S) on top of page.
3) Figures to the right indicates full marks.
4) Assume suitable data whenever necessary.

MCQ/Objective Type Questions

Duration: 30 Minutes Marks: 14

Q.1 Choose the correct alternatives from the options and rewrite the sentence. **14**

1) Which queue allows insertion and deletion at both ends?
a) Circular Queue b) Priority Queue
c) Deque d) Simple Queue

2) In array implementation of a stack, which variable is used to indicate the current top element?
a) head b) front
c) rear d) top

3) A node in a doubly linked list contains: _____.
a) One pointer and data b) Two pointers and data
c) Data only d) Three pointers and data

4) In an array, traversal means: _____.
a) Inserting an element
b) Accessing each element exactly once
c) Removing elements
d) Sorting elements

5) A node in a singly linked list typically contains: _____.
a) Only data
b) Data and address of next node
c) Data and two pointers
d) Only pointer

6) Which is not an operation of a stack ADT?
a) push b) pop
c) peek d) search all D

7) An Abstract Data Type (ADT) is: _____.
   a) A data structure with fixed storage size
   b) A theoretical concept that defines operations but not implementation
   c) A function in C language
   d) An array with hidden elements B

8) Which of the following sorting algorithms is NOT comparison-based?
   a) Merge Sort
   b) Bubble Sort
   c) Counting Sort
   d) Quick Sort

9) Which of the following searching algorithms is NOT efficient for large datasets?
   a) Binary Search
   b) Linear Search
   c) Interpolation Search
   d) Fibonacci Search

10) An AVL tree is a BST that maintains: _____.
   a) Height balance
   b) Node balance
   c) Leaf balance
   d) Weight balance

11) The maximum number of nodes at level k in a binary tree is: ____.
   a) k
   b) 2^k
   c) $2^{(k-1)}$
   d) k^2

12) A graph is said to be connected if: ____.
   a) All vertices are reachable from one another
   b) Each vertex has at least one edge
   c) There are no cycles
   d) It is a tree

13) Which graph representation is most efficient for a fully connected graph with hundreds of nodes?
   a) Adjacency Matrix
   b) Adjacency List
   c) Linked List
   d) Heap

14) Which sorting algorithm repeatedly swaps adjacent elements if they are in the wrong order?
   a) Selection Sort
   b) Bubble Sort
   c) Quick Sort
   d) Merge Sort

Data Structures and Algorithms (ECEPCC-02)

Day & Date: Wednesday, 06-05-2026 Max. Marks: 56
Time: 03:00 PM To 06:00 PM

Instructions: 1) All questions are compulsory.
2) Figures to the right indicate full marks.
3) Assume suitable data whenever necessary.

SECTION – I

Q.2 Solve Any Four of the followings. **16**

a) Define data structure. Explain its types along with example.

b) Define Algorithm. Explain its features.

c) What is stack data structure? Describe all its operations.

d) Explain with the help of diagram Singly Linked Lists
i) Node Structure
ii) Inserting a node

e) Explain in short the different types of linked lists.

Q.3 Solve Any Two of the followings. **12**

a) Write a C program to implement Enqueue, Dequeue and Display Operations on Queue.

b) Write a C program to perform the traversing, insertion and deletion operation on Array.

c) With the help of diagram describe the insertion and deletion operation on circular queue.

SECTION – II

Q.4 Solve Any Four of the followings. **16**

a) Write a program to implement Quick Sort Algorithm. Given below is an array of 10 numbers apply the Quick Sort Algorithm and show various stages with a suitable diagram. Array:
12, 55, 9, 21, 87, 39, 61, 10, 76, 50

b) Explain different Binary tree terminology.

c) Write a short note on:
i) Binary Search Tree
ii) AVL Tree

d) Explain the Breadth First Search (BFS) traversal technique of Graph.

e) Explain in detail the Dijkstra's algorithm for finding shortest path in Graph.

Q.5 Solve Any Two of the followings. **12**

a) Write a program to enter n numbers in an array. Redisplay the array with elements being sorted in ascending order using Bubble Sort.

b) Explain the Adjacency Matrix and Adjacency List representation of Graph.

c) Write the algorithms/functions for Tree Traversals and for the given tree illustrate the traversals with proper diagram

i) in-order traversal
ii) pre-order traversal
iii) post-order traversal

3) Which graph representation is most efficient for a fully connected graph with hundreds of nodes?
a) Adjacency Matrix b) Adjacency List
c) Linked List d) Heap

4) Which sorting algorithm repeatedly swaps adjacent elements if they are in the wrong order?
a) Selection Sort b) Bubble Sort
c) Quick Sort d) Merge Sort

5) Which queue allows insertion and deletion at both ends?
a) Circular Queue b) Priority Queue
c) Deque d) Simple Queue

6) In array implementation of a stack, which variable is used to indicate the current top element?
a) head b) front
c) rear d) top

7) A node in a doubly linked list contains: _____.
   a) One pointer and data
   b) Two pointers and data
   c) Data only
   d) Three pointers and data

8) In an array, traversal means: _____.
   a) Inserting an element
   b) Accessing each element exactly once
   c) Removing elements
   d) Sorting elements

9) A node in a singly linked list typically contains: _____.
   a) Only data
   b) Data and address of next node
   c) Data and two pointers
   d) Only pointer

10) Which is not an operation of a stack ADT?
   a) push
   b) pop
   c) peek
   d) search all D

11) An Abstract Data Type (ADT) is: _____.
   a) A data structure with fixed storage size
   b) A theoretical concept that defines operations but not implementation
   c) A function in C language
   d) An array with hidden elements B

12) Which of the following sorting algorithms is NOT comparison-based?
   a) Merge Sort
   b) Bubble Sort
   c) Counting Sort
   d) Quick Sort

13) Which of the following searching algorithms is NOT efficient for large datasets?
   a) Binary Search
   b) Linear Search
   c) Interpolation Search
   d) Fibonacci Search

14) An AVL tree is a BST that maintains: _____.
   a) Height balance
   b) Node balance
   c) Leaf balance
   d) Weight balance

Set **R**

S.Y. (B.Tech.) (Electronics & Computer Engineering) (Semester - I) (New) (NEP CBCS) Examination: March/April – 2026
Data Structures and Algorithms (ECEPCC-02)

Day & Date: Wednesday, 06-05-2026 Max. Marks: 56
Time: 03:00 PM To 06:00 PM

Instructions: 1) All questions are compulsory.
2) Figures to the right indicate full marks.
3) Assume suitable data whenever necessary.

SECTION – I

Q.2 Solve Any Four of the followings. **16**

a) Define data structure. Explain its types along with example.

b) Define Algorithm. Explain its features.

c) What is stack data structure? Describe all its operations.

d) Explain with the help of diagram Singly Linked Lists
i) Node Structure
ii) Inserting a node

e) Explain in short the different types of linked lists.

Q.3 Solve Any Two of the followings. **12**

a) Write a C program to implement Enqueue, Dequeue and Display Operations on Queue.

b) Write a C program to perform the traversing, insertion and deletion operation on Array.

c) With the help of diagram describe the insertion and deletion operation on circular queue.

SECTION – II

Q.4 Solve Any Four of the followings. **16**

a) Write a program to implement Quick Sort Algorithm. Given below is an array of 10 numbers apply the Quick Sort Algorithm and show various stages with a suitable diagram. Array:
12, 55, 9, 21, 87, 39, 61, 10, 76, 50

b) Explain different Binary tree terminology.

c) Write a short note on:
i) Binary Search Tree
ii) AVL Tree

d) Explain the Breadth First Search (BFS) traversal technique of Graph.

e) Explain in detail the Dijkstra's algorithm for finding shortest path in Graph.

Q.5 Solve Any Two of the followings. **12**

a) Write a program to enter n numbers in an array. Redisplay the array with elements being sorted in ascending order using Bubble Sort.

b) Explain the Adjacency Matrix and Adjacency List representation of Graph.

c) Write the algorithms/functions for Tree Traversals and for the given tree illustrate the traversals with proper diagram

i) in-order traversal
ii) pre-order traversal
iii) post-order traversal

Data Structures and Algorithms (ECEPCC-02)

Day & Date: Wednesday, 06-05-2026 Max. Marks: 70
Time: 03:00 PM To 06:00 PM

Instructions: 1) Q. No. 1 is compulsory. It should be solved in the first 30 minutes in Answer Book Page no 03 (Starting page of the Answer Book). Each question carries one mark.
2) Don't forget to Mention question paper set (P/Q/R/S) on top of page.
3) Figures to the right indicates full marks.
4) Assume suitable data whenever necessary.

MCQ/Objective Type Questions

Duration: 30 Minutes Marks: 14

Q.1 Choose the correct alternatives from the options and rewrite the sentence. **14**

1) Which is not an operation of a stack ADT?
a) push b) pop
c) peek d) search all D

2) An Abstract Data Type (ADT) is: _____.
a) A data structure with fixed storage size
b) A theoretical concept that defines operations but not implementation
c) A function in C language
d) An array with hidden elements B

3) Which of the following sorting algorithms is NOT comparison-based?
a) Merge Sort b) Bubble Sort
c) Counting Sort d) Quick Sort

4) Which of the following searching algorithms is NOT efficient for large datasets?
a) Binary Search b) Linear Search
c) Interpolation Search d) Fibonacci Search

5) An AVL tree is a BST that maintains: _____.
a) Height balance b) Node balance
c) Leaf balance d) Weight balance

6) The maximum number of nodes at level k in a binary tree is: ____.
a) k b) 2^k
c) $2^{(k-1)}$ d) k^2

7) A graph is said to be connected if: ____.
a) All vertices are reachable from one another
b) Each vertex has at least one edge
c) There are no cycles
d) It is a tree

8) Which graph representation is most efficient for a fully connected graph with hundreds of nodes?
a) Adjacency Matrix
b) Adjacency List
c) Linked List
d) Heap

9) Which sorting algorithm repeatedly swaps adjacent elements if they are in the wrong order?
a) Selection Sort
b) Bubble Sort
c) Quick Sort
d) Merge Sort

10) Which queue allows insertion and deletion at both ends?
a) Circular Queue
b) Priority Queue
c) Deque
d) Simple Queue

11) In array implementation of a stack, which variable is used to indicate the current top element?
a) head
b) front
c) rear
d) top

12) A node in a doubly linked list contains: _____.
a) One pointer and data
b) Two pointers and data
c) Data only
d) Three pointers and data

13) In an array, traversal means: _____.
a) Inserting an element
b) Accessing each element exactly once
c) Removing elements
d) Sorting elements

4) Assume suitable data if necessary.

MCQ/Objective Type Questions

Duration: 30 Minutes Marks:14

Q.1 Choose the correct answer. **14**

1) A PN junction diode conducts when it is: _____.
a) Reverse biased b) Forward biased
c) Not connected d) Grounded

2) Bridge rectifier uses: _____.
a) 1 diode b) 2 diodes
c) 3 diodes d) 4 diodes

3) In a transistor, base current is: _____.
a) Maximum b) Minimum
c) Zero d) Equal to collector current

4) The region used for amplification in BJT is: _____.
a) Cutoff b) Saturation
c) Active d) Breakdown

5) JFET has: _____.
a) High input impedance b) Low input impedance
c) Zero impedance d) Infinite current

6) MOSFET is controlled by: _____.
a) Current b) Voltage
c) Power d) Frequency

7) In common drain configuration, output is taken from: _____.
a) Gate b) Source
c) Drain d) Substrate

8) Positive feedback is used in: _____.
a) Amplifiers b) Oscillators
c) Rectifiers d) Filters

9) An oscillator converts: _____.
a) AC to DC b) DC to AC
c) AC to AC d) DC to DC

10) SCR turns ON when: _____.
a) Gate is triggered b) Voltage is zero
c) Current is zero d) Temperature decreases

11) DIAC is used with: _____.
a) SCR b) TRIAC
c) BJT d) MOSFET

12) Class AB amplifier is a combination of: _____.
a) Class A and B b) Class B and C
c) Class A and C d) None

13) IC 555 in monostable mode produces: _____.
a) Continuous waveform b) Single pulse
c) Square wave d) No output

14) The control terminal of IC 555 is: _____.
a) Pin 2 b) Pin 3
c) Pin 5 d) Pin 7

Instructions: 1) All questions are compulsory.
2) Figures to the right indicate full marks.
3) Assume suitable data if necessary.

SECTION – I

Q.2 Attempt Any Four. **16**

a) Why are filter circuits used? Compare C, L, LC and π filters.

b) Explain effect of variation in temperature on PN junction diode characteristics.

c) Explain DC load line concept in BJT CE amplifier.

d) Describe V-I characteristics of n-channel JFET.

e) Explain the single-stage CE amplifier.

Q.3 Attempt Any Two. **12**

a) Explain operation of full wave rectifier. Give detailed analysis of performance parameters.

b) Explain operation of half wave rectifier. Give a detailed analysis of: Vorms, Iorms, Voavg, Ioavg, ripple factor, efficiency, TUF, PIV.

c) Explain n-channel enhancement MOSFET characteristics (drain and transfer).

SECTION – II

Q.4 Attempt Any Four. **16**

a) Explain effect of negative feedback on stability and bandwidth.

b) Define positive and negative feedback. What are advantages of negative feedback?

c) Define class A amplifier and write its characteristics.

d) Explain IC 555 in astable mode with internal diagram.

e) Draw and explain RC phase shift oscillator.

Q.5 Attempt Any Two. **12**

a) Explain construction and working of SCR with neat diagram.

b) Explain IC 555 in monostable mode and pin configuration.

c) Compare Class A, Class AB and Class C amplifiers.

MCQ/Objective Type Questions

Duration: 30 Minutes Marks: 14

Q.1 Choose the correct alternative from the given option. 14

1) If a linear differential equation with constant coefficients and r.h.s. equal to zero has a real root m_1 repeated two times, then the corresponding part of the integral is _____.

a) $(c_1 + c_2)e^{m_1 x}$ b) $(c_1 x + c_2 x)e^{m_1 x}$

c) $(c_1 x + c_2 x^2)e^{m_1 x}$ d) $(c_1 + c_2 x)e^{m_1 x}$

2) $\frac{1}{D-a} X$ is equal to _____.

a) $\int Xe^{ax}dx$ b) $e^{ax}\int X.e^{-ax}dx$

c) $\int Xe^{-ax}dx$ d) $e^{-ax}\int Xe^{-ax}dx$

3) $\frac{1}{D+1}(\log x + \frac{1}{x})$ is equal to _____.

a) e^x b) 1

c) x d) $\log x$

4) The solution of the equation $\sqrt{p} + \sqrt{q} = 1$ is _____.

a) $z = ax + ay + c$ b) $z = ax + a^2 y + c$

c) $z = ax + \left(1 - \sqrt{a}\right)^2 y + c$ d) None of these

5) The solution of $p + q = 1$ is _____.

a) $z = ax + (1 - a)y + c$ b) $z = ax + by + c$

c) $z = ax + b(1 - y) + c$ d) $z = a(1 - x) + b(1 - y) + c$

6) If μ_1', μ_2', μ_3' are the first three moments of the distribution about certain number then third moment μ_3 of the distribution about the arithmetic mean is given by _____.

a) $\mu_3' - 3\mu_2'\mu_1' + 2(\mu_1')^3$ b) $\mu_3' - 3\mu_1' + (\mu_2')^3$

c) $\mu_3' + 2\mu_2'\mu_1' + (\mu_3')^3$ d) $\mu_3' + 3\mu_2'\mu_1' + {\mu_1'}^2$

7) Coefficient of kurtosis β_1 is given by _____.

a) $\frac{\mu_4}{\mu_3}$ b) $\frac{\mu_4}{\mu_2^2}$

c) $\frac{\mu_3^2}{\mu_2^3}$ d) $\frac{\mu_4}{\mu_2^3}$

8) If value of x for normal distribution is 35, mean of normal distribution is 65 and standard deviation is 25 then standardized random variable is _____.

a) -1.5 b) -1.7

c) -1.2 d) -4

9) A continuous random variable has the following probability density function $f(x) = kx(1-x), 0 \leq x \leq 1$ then $k =$ _____.

a) 2 b) 6

c) 3 d) 5

10) The area under the standard normal curve from $z = -\infty$ to $z = 0$ is _____.

a) 1 b) $1/2$

c) $3/2$ d) 0

11) If X, Y denote the deviation from their means and if $\sum X^2 = 80, \sum Y^2 = 50$ & $\sum XY = 60$ and $r =$_____.

a) 0.65 b) 0.78

c) 0.81 d) 0.95

12) If two regression lines are co-incides then the coefficient of correlation is _____.

a) 0 b) -1

c) ± 1 d) 1

13) If $\bar{x}$ is the mean of the random sample of size n taken from a population of size N having mean μ and standard deviation σ then mean and variance of the distribution $\bar{x}$ are _____.

a) $\bar{x}, \sigma^2$

b) $\bar{x}, \frac{\sigma^2}{n}$

c) μ, σ^2

d) μ, and $\frac{\sigma^2}{n}$

14) χ^2 distribution is defined by _____.

a) $\sum \frac{(O-E)}{E}$

b) $\sum \frac{(O-E)}{E^2}$

c) $\sum \left(\frac{O-E}{E}\right)^2$

d) $\sum \frac{(O-E)^2}{E}$

Set | **P**

S.Y. (B.Tech.) (Electronics & Computer Engineering) (Semester - I) (New) (NEP CBCS) Examination: March/April-2026
Advanced Mathematics and Statistics (OE-01A)

Day & Date: Monday, 11-05-2026 Max. Marks: 56
Time: 03:00 PM To 06:00 PM

Instructions: 1) All question are compulsory.
2) Figures to the right indicate full marks.

SECTION – I

Q.2 Attempt Any Three. **09**

a) Find the Arithmetic mean, Median and standard deviation for the following frequency distribution.

x:	5	9	12	15	20	24	30	35	42	49
f:	3	6	8	8	9	10	8	7	6	2

b) Solve: $(D^2+1)y = x^2\cos 3x$

c) Solve: $(D^2-4D+4)y = 8.x^2e^{2x}\sin 2x$

d) Calculate the first four moments about the mean of the given distribution. Also find β_1, β_2

x	2.0	2.5	3.0	3.5	4.0	4.5	5.0
f	4	36	60	90	70	40	10

e) Solve $yzp + 2xq = xy$

Q.3 Attempt Any Three. **09**

a) Solve $\frac{d^2y}{dx^2} + 3\frac{dy}{dx} + 2y = 2e^{2x}$

b) Solve $p - q = x^2 + y^2$

c) Find the median of the following frequency distribution.

x	1	3	5	7	9	11	13	15	17
f	3	6	8	12	16	16	15	10	5

d) Solve $x(y-z)p + y(z-x)q = z(x-y)$

e) Solve $(D^3 - 3D + 2)y = x$

Q.4 Attempt Any Two. **10**

a) The first four moments of a distribution about the value 5 are $2, 20, 40$ and 50, from the given information obtain the first four central moments, Standard deviation and coefficient of skewness and kurtosis.

b) Solve the following differential equations by method of separation of variables.

$$3\frac{\partial u}{\partial x} + 2\frac{\partial u}{\partial y} = 0, \text{ given } u(x, 0) = 4e^{-x}$$

c) Solve $\frac{d^2y}{dx^2} + 3\frac{dy}{dx} + 2y = e^{e^x}$

SECTION – II

Q.5 Attempt Any Three. **09**

a) Find the value of k if each of the following functions is a probability density function.

$$f(x) = \begin{cases} kx^2(1 - x^3) & , \quad 0 \leq x \leq 1 \\ 0 & , \quad \text{otherwise} \end{cases}$$

b) The mean life time of 100 fluorescent light bulbs produced by a Company is computed to be 1570 Hrs. with S.D. of 120 Hrs. If μ is the mean lifetime of all the bulbs produced by the Company, Test the Hypothesis $\mu = 1600$ Hrs. against the alternative Hypothesis $\mu \neq 1600$ Hrs. using 5% level of Significance.
(Given Expected value at 5% LOS is 1.96)

c) Fit a Straight line $y = a + bx$ to the following data.

x	0	5	10	15	20	25
y	12	15	17	22	24	30

d) Two independent random sample have the following data.
$\overline{x_1} = 110, \sigma_1 = 25, n_1 = 16$
$\overline{x_2} = 120, \sigma_2 = 30, n_2 = 9$
If σ_1 and σ_2 are the S. D. of the populations. Test the hypothesis that $\mu_1 = \mu_2$ at 5% level of significance.
(The table value of t at $\alpha = 0.05$ for $v = 23$ degrees of freedom is 2.069)

e) If the probability of defective bulbs is 0.2, find the mean and variance of the distribution of defective bulbs in a lot of 1000 bulbs.

Q.6 Attempt Any Three. **09**

a) If two independent random samples of sizes 15 and 8 have respectively the following mean and population standard deviations, $\overline{x_1} = 980, \overline{x_2} = 1012; \sigma_1 = 75, \sigma_2 = 80$. Test the hypothesis that $\mu_1 = \mu_2$ at 5% level of significance.
(Given Expected value at 5% LOS with 21 DF is 2.080)

b) The number of telephone calls received by an operator in a ten-minute interval follows a Poisson distribution with mean 1. What is the probability of receiving (i) no call, (ii) less than four calls, in the interval? What is the most likely number of calls?

c) Calculate the Coefficient of correlations between x and y from the following data
$n = 25, \sum x = 100, \sum x^2 = 950, \sum y = 110, \sum y^2 = 850, \sum x\,y = 800$

d) Monthly salaries of 1000 workers have a normal distribution with mean of Rs. 575 and a standard deviation of Rs. 75. Find the number of workers having salaries between Rs. 500 and Rs. 625 p.m. Also find the minimum salary of the highest paid 200 workers.
(Given: For a standard normal variate
i) area between $t = 0$ and $t = 1$ is 0.3413,
ii) area between $t = 0$ and $t = 0.67$ is 0.2486,
iii) area between $t = 0$ and $t = 0.84$ is 0.3)

e) Obtain a second-degree curve to the following data and estimate the production in 1975.

Year	1921	1931	1941	1951	1961	1971	1981
Prod. (m. tons)	3	5	9	10	12	14	15

Q.7 Attempt Any Two. **10**

a) Fit a Binomial distribution to the following data,

Value of x	0	1	2	3	4	5	6
Frequency f	6	20	28	12	8	6	0

b) Calculate the lines of regression from the following table, gives the marks obtained by a class of students in two special papers.

Paper I	80	45	55	56	58	60	65	68	70	75	85
Paper II	82	56	50	48	60	62	64	65	70	74	90

c) Ten school boys were given a test in Statistics and their scores were recorded. They were given a month's special coaching and a second test was given to them in the same subject at the end of the coaching period. Test if the marks given below give evidence to the fact that the students are benefitted by coaching.

Marks in test I:	70	68	56	75	80	90	68	75	56	58
Marks in Test II:	68	70	52	73	75	78	80	92	54	55

(Given that value of t_α at 5% LOS for $v = 9$ degrees of freedom is 1.86 for one tailed test)

Seat No.	

Set **Q**

S.Y. (B.Tech.) (Electronics & Computer Engineering) (Semester - I) (New) (NEP CBCS) Examination: March/April-2026
Advanced Mathematics and Statistics (OE-01A)

Day & Date: Monday, 11-05-2026 Max. Marks: 70
Time: 03:00 PM To 06:00 PM

Instructions: 1) Q. No. 1 is compulsory. It should be solved in the first 30 minutes in Answer Book Page no 03 (Starting page of the Answer Book). Each question carries one mark.
2) Don't forget to Mention question paper set (P/Q/R/S) on top of page.
3) Figures to the right indicates full marks.

MCQ/Objective Type Questions

Duration: 30 Minutes Marks: 14

Q.1 Choose the correct alternative from the given option. **14**

1) If value of x for normal distribution is 35, mean of normal distribution is 65 and standard deviation is 25 then standardized random variable is _____.

a) -1.5 b) -1.7
c) -1.2 d) -4

2) A continuous random variable has the following probability density function $f(x) = kx(1-x), 0 \leq x \leq 1$ then $k =$ _____.

a) 2 b) 6
c) 3 d) 5

3) The area under the standard normal curve from $z = -\infty$ to $z = 0$ is _____.

a) 1 b) $1/2$
c) $3/2$ d) 0

4) If X, Y denote the deviation from their means and if $\sum X^2 = 80, \sum Y^2 = 50$ & $\sum XY = 60$ and $r =$_____.

a) 0.65 b) 0.78
c) 0.81 d) 0.95

5) If two regression lines are co-incides then the coefficient of correlation is _____.

a) 0 b) -1
c) ± 1 d) 1

6) If $\bar{x}$ is the mean of the random sample of size n taken from a population of size N having mean μ and standard deviation σ then mean and variance of the distribution $\bar{x}$ are _____.

a) $\bar{x}, \sigma^2$ b) $\bar{x}, \frac{\sigma^2}{n}$

c) μ, σ^2 d) μ, and $\frac{\sigma^2}{n}$

7) χ^2 distribution is defined by _____.

a) $\sum \frac{(O-E)}{E}$ b) $\sum \frac{(O-E)}{E^2}$

c) $\sum \left(\frac{O-E}{E}\right)^2$ d) $\sum \frac{(O-E)^2}{E}$

8) If a linear differential equation with constant coefficients and r.h.s. equal to zero has a real root m_1 repeated two times, then the corresponding part of the integral is _____.

a) $(c_1 + c_2)e^{m_1 x}$ b) $(c_1 x + c_2 x)e^{m_1 x}$

c) $(c_1 x + c_2 x^2)e^{m_1 x}$ d) $(c_1 + c_2 x)e^{m_1 x}$

9) $\frac{1}{D-a} X$ is equal to _____.

a) $\int X e^{ax} dx$ b) $e^{ax} \int X . e^{-ax} dx$

c) $\int X e^{-ax} dx$ d) $e^{-ax} \int X e^{-ax} dx$

10) $\frac{1}{D+1}(\log x + \frac{1}{x})$ is equal to _____.

a) e^x b) 1

c) x d) $\log x$

11) The solution of the equation $\sqrt{p} + \sqrt{q} = 1$ is _____.

a) $z = ax + ay + c$ b) $z = ax + a^2 y + c$

c) $z = ax + \left(1 - \sqrt{a}\right)^2 y + c$ d) None of these

12) The solution of $p + q = 1$ is _____.

a) $z = ax + (1-a)y + c$ b) $z = ax + by + c$

c) $z = ax + b(1-y) + c$ d) $z = a(1-x) + b(1-y) + c$

13) If μ_1', μ_2', μ_3' are the first three moments of the distribution about certain number then third moment μ_3 of the distribution about the arithmetic mean is given by _____.

a) $\mu_3' - 3\mu_2'\mu_1' + 2(\mu_1')^3$ b) $\mu_3' - 3\mu_1' + (\mu_2')^3$

c) $\mu_3' + 2\mu_2'\mu_1' + (\mu_3')^3$ d) $\mu_3' + 3\mu_2'\mu_1' + {\mu_1'}^2$

14) Coefficient of kurtosis β_1 is given by _____.

a) $\frac{\mu_4}{\mu_3}$

b) $\frac{\mu_4}{\mu_2^2}$

c) $\frac{\mu_3^2}{\mu_2^3}$

d) $\frac{\mu_4}{\mu_2^3}$

Seat No.	

Set Q

S.Y. (B.Tech.) (Electronics & Computer Engineering) (Semester - I) (New) (NEP CBCS) Examination: March/April-2026
Advanced Mathematics and Statistics (OE-01A)

Day & Date: Monday, 11-05-2026 Max. Marks: 56
Time: 03:00 PM To 06:00 PM

Instructions: 1) All question are compulsory.
2) Figures to the right indicate full marks.

SECTION – I

Q.2 Attempt Any Three. **09**

a) Find the Arithmetic mean, Median and standard deviation for the following frequency distribution.

x:	5	9	12	15	20	24	30	35	42	49
f:	3	6	8	8	9	10	8	7	6	2

b) Solve: $(D^2+1)y = x^2\cos 3x$

c) Solve: $(D^2-4D+4)y = 8.x^2e^{2x}\sin 2x$

d) Calculate the first four moments about the mean of the given distribution. Also find β_1, β_2

x	2.0	2.5	3.0	3.5	4.0	4.5	5.0
f	4	36	60	90	70	40	10

e) Solve $yzp + 2xq = xy$

Q.3 Attempt Any Three. **09**

a) Solve $\frac{d^2y}{dx^2} + 3\frac{dy}{dx} + 2y = 2e^{2x}$

b) Solve $p - q = x^2 + y^2$

c) Find the median of the following frequency distribution.

x	1	3	5	7	9	11	13	15	17
f	3	6	8	12	16	16	15	10	5

d) Solve $x(y-z)p + y(z-x)q = z(x-y)$

e) Solve $(D^3 - 3D + 2)y = x$

Q.4 Attempt Any Two. **10**

a) The first four moments of a distribution about the value 5 are $2, 20, 40$ and 50, from the given information obtain the first four central moments, Standard deviation and coefficient of skewness and kurtosis.

b) Solve the following differential equations by method of separation of variables.

$$3\frac{\partial u}{\partial x} + 2\frac{\partial u}{\partial y} = 0, \text{ given } u(x, 0) = 4e^{-x}$$

c) Solve $\frac{d^2y}{dx^2} + 3\frac{dy}{dx} + 2y = e^{e^x}$

SECTION – II

Q.5 Attempt Any Three. **09**

a) Find the value of k if each of the following functions is a probability density function.

$$f(x) = \begin{cases} kx^2(1 - x^3) & , \quad 0 \leq x \leq 1 \\ 0 & , \quad \text{otherwise} \end{cases}$$

b) The mean life time of 100 fluorescent light bulbs produced by a Company is computed to be 1570 Hrs. with S.D. of 120 Hrs. If μ is the mean lifetime of all the bulbs produced by the Company, Test the Hypothesis $\mu = 1600$ Hrs. against the alternative Hypothesis $\mu \neq 1600$ Hrs. using 5% level of Significance.
(Given Expected value at 5% LOS is 1.96)

c) Fit a Straight line $y = a + bx$ to the following data.

x	0	5	10	15	20	25
y	12	15	17	22	24	30

d) Two independent random sample have the following data.
$\overline{x_1} = 110, \sigma_1 = 25, n_1 = 16$
$\overline{x_2} = 120, \sigma_2 = 30, n_2 = 9$
If σ_1 and σ_2 are the S. D. of the populations. Test the hypothesis that $\mu_1 = \mu_2$ at 5% level of significance.
(The table value of t at $\alpha = 0.05$ for $v = 23$ degrees of freedom is 2.069)

e) If the probability of defective bulbs is 0.2, find the mean and variance of the distribution of defective bulbs in a lot of 1000 bulbs.

Q.6 Attempt Any Three. **09**

a) If two independent random samples of sizes 15 and 8 have respectively the following mean and population standard deviations, $\overline{x_1} = 980, \overline{x_2} = 1012; \sigma_1 = 75, \sigma_2 = 80$. Test the hypothesis that $\mu_1 = \mu_2$ at 5% level of significance.
(Given Expected value at 5% LOS with 21 DF is 2.080)

b) The number of telephone calls received by an operator in a ten-minute interval follows a Poisson distribution with mean 1. What is the probability of receiving (i) no call, (ii) less than four calls, in the interval? What is the most likely number of calls?

c) Calculate the Coefficient of correlations between x and y from the following data
$n = 25, \sum x = 100, \sum x^2 = 950, \sum y = 110, \sum y^2 = 850, \sum x\,y = 800$

d) Monthly salaries of 1000 workers have a normal distribution with mean of Rs. 575 and a standard deviation of Rs. 75. Find the number of workers having salaries between Rs. 500 and Rs. 625 p.m. Also find the minimum salary of the highest paid 200 workers.
(Given: For a standard normal variate
i) area between $t = 0$ and $t = 1$ is 0.3413,
ii) area between $t = 0$ and $t = 0.67$ is 0.2486,
iii) area between $t = 0$ and $t = 0.84$ is 0.3)

e) Obtain a second-degree curve to the following data and estimate the production in 1975.

Year	1921	1931	1941	1951	1961	1971	1981
Prod. (m. tons)	3	5	9	10	12	14	15

Q.7 Attempt Any Two. **10**

a) Fit a Binomial distribution to the following data,

Value of x	0	1	2	3	4	5	6
Frequency f	6	20	28	12	8	6	0

b) Calculate the lines of regression from the following table, gives the marks obtained by a class of students in two special papers.

Paper I	80	45	55	56	58	60	65	68	70	75	85
Paper II	82	56	50	48	60	62	64	65	70	74	90

c) Ten school boys were given a test in Statistics and their scores were recorded. They were given a month's special coaching and a second test was given to them in the same subject at the end of the coaching period. Test if the marks given below give evidence to the fact that the students are benefitted by coaching.

Marks in test I:	70	68	56	75	80	90	68	75	56	58
Marks in Test II:	68	70	52	73	75	78	80	92	54	55

(Given that value of t_α at 5% LOS for $v = 9$ degrees of freedom is 1.86 for one tailed test)

MCQ/Objective Type Questions

Duration: 30 Minutes Marks: 14

Q.1 Choose the correct alternative from the given option. **14**

1) If X, Y denote the deviation from their means and if $\sum X^2 = 80, \sum Y^2 = 50$ & $\sum XY = 60$ and $r =$_____.

a) 0.65 b) 0.78
c) 0.81 d) 0.95

2) If two regression lines are co-incides then the coefficient of correlation is _____.

a) 0 b) -1
c) ± 1 d) 1

3) If $\bar{x}$ is the mean of the random sample of size n taken from a population of size N having mean μ and standard deviation σ then mean and variance of the distribution $\bar{x}$ are _____.

a) $\bar{x}, \sigma^2$ b) $\bar{x}, \frac{\sigma^2}{n}$

c) μ, σ^2 d) μ, and $\frac{\sigma^2}{n}$

4) χ^2 distribution is defined by _____.

a) $\sum \frac{(O-E)}{E}$ b) $\sum \frac{(O-E)}{E^2}$
c) $\sum \left(\frac{O-E}{E}\right)^2$ d) $\sum \frac{(O-E)^2}{E}$

5) If a linear differential equation with constant coefficients and r.h.s. equal to zero has a real root m_1 repeated two times, then the corresponding part of the integral is _____.

a) $(c_1 + c_2)e^{m_1 x}$ b) $(c_1 x + c_2 x)e^{m_1 x}$

c) $(c_1 x + c_2 x^2)e^{m_1 x}$ d) $(c_1 + c_2 x)e^{m_1 x}$

6) $\frac{1}{D-a} X$ is equal to _____.

a) $\int Xe^{ax}dx$ b) $e^{ax}\int X.e^{-ax}dx$

c) $\int Xe^{-ax}dx$ d) $e^{-ax}\int Xe^{-ax}dx$

7) $\frac{1}{D+1}(\log x + \frac{1}{x})$ is equal to _____.

a) e^x b) 1

c) x d) $\log x$

8) The solution of the equation $\sqrt{p} + \sqrt{q} = 1$ is _____.

a) $z = ax + ay + c$ b) $z = ax + a^2 y + c$

c) $z = ax + \left(1 - \sqrt{a}\right)^2 y + c$ d) None of these

9) The solution of $p + q = 1$ is _____.

a) $z = ax + (1 - a)y + c$ b) $z = ax + by + c$

c) $z = ax + b(1 - y) + c$ d) $z = a(1 - x) + b(1 - y) + c$

10) If μ_1', μ_2', μ_3' are the first three moments of the distribution about certain number then third moment μ_3 of the distribution about the arithmetic mean is given by _____.

a) $\mu_3' - 3\mu_2'\mu_1' + 2(\mu_1')^3$ b) $\mu_3' - 3\mu_1' + (\mu_2')^3$

c) $\mu_3' + 2\mu_2'\mu_1' + (\mu_3')^3$ d) $\mu_3' + 3\mu_2'\mu_1' + {\mu_1'}^2$

11) Coefficient of kurtosis β_1 is given by _____.

a) $\frac{\mu_4}{\mu_3}$ b) $\frac{\mu_4}{\mu_2^2}$

c) $\frac{\mu_3^2}{\mu_2^3}$ d) $\frac{\mu_4}{\mu_2^3}$

12) If value of x for normal distribution is 35, mean of normal distribution is 65 and standard deviation is 25 then standardized random variable is _____.

a) -1.5 b) -1.7

c) -1.2 d) -4

13) A continuous random variable has the following probability density function $f(x) = kx(1-x), 0 \leq x \leq 1$ then $k =$ _____.

a) 2 b) 6

c) 3 d) 5

14) The area under the standard normal curve from $z = -\infty$ to $z = 0$ is _____.

a) 1 b) $1/2$

c) $3/2$ d) 0

Q.2 Attempt Any Three. **09**

a) Find the Arithmetic mean, Median and standard deviation for the following frequency distribution.

x:	5	9	12	15	20	24	30	35	42	49
f:	3	6	8	8	9	10	8	7	6	2

b) Solve: $(D^2+1)y = x^2\cos 3x$

c) Solve: $(D^2-4D+4)y = 8.x^2e^{2x}\sin 2x$

d) Calculate the first four moments about the mean of the given distribution. Also find β_1, β_2

x	2.0	2.5	3.0	3.5	4.0	4.5	5.0
f	4	36	60	90	70	40	10

e) Solve $yzp + 2xq = xy$

Q.3 Attempt Any Three. **09**

a) Solve $\frac{d^2y}{dx^2} + 3\frac{dy}{dx} + 2y = 2e^{2x}$

b) Solve $p - q = x^2 + y^2$

c) Find the median of the following frequency distribution.

x	1	3	5	7	9	11	13	15	17
f	3	6	8	12	16	16	15	10	5

d) Solve $x(y-z)p + y(z-x)q = z(x-y)$

e) Solve $(D^3 - 3D + 2)y = x$

Q.4 Attempt Any Two. **10**

a) The first four moments of a distribution about the value 5 are $2, 20, 40$ and 50, from the given information obtain the first four central moments, Standard deviation and coefficient of skewness and kurtosis.

b) Solve the following differential equations by method of separation of variables.

$$3\frac{\partial u}{\partial x} + 2\frac{\partial u}{\partial y} = 0, \text{ given } u(x, 0) = 4e^{-x}$$

c) Solve $\frac{d^2y}{dx^2} + 3\frac{dy}{dx} + 2y = e^{e^x}$

SECTION – II

Q.5 Attempt Any Three. **09**

a) Find the value of k if each of the following functions is a probability density function.

$$f(x) = \begin{cases} kx^2(1 - x^3) & , \quad 0 \leq x \leq 1 \\ 0 & , \quad \text{otherwise} \end{cases}$$

b) The mean life time of 100 fluorescent light bulbs produced by a Company is computed to be 1570 Hrs. with S.D. of 120 Hrs. If μ is the mean lifetime of all the bulbs produced by the Company, Test the Hypothesis $\mu = 1600$ Hrs. against the alternative Hypothesis $\mu \neq 1600$ Hrs. using 5% level of Significance.
(Given Expected value at 5% LOS is 1.96)

c) Fit a Straight line $y = a + bx$ to the following data.

x	0	5	10	15	20	25
y	12	15	17	22	24	30

d) Two independent random sample have the following data.
$\overline{x_1} = 110, \sigma_1 = 25, n_1 = 16$
$\overline{x_2} = 120, \sigma_2 = 30, n_2 = 9$
If σ_1 and σ_2 are the S. D. of the populations. Test the hypothesis that $\mu_1 = \mu_2$ at 5% level of significance.
(The table value of t at $\alpha = 0.05$ for $v = 23$ degrees of freedom is 2.069)

e) If the probability of defective bulbs is 0.2, find the mean and variance of the distribution of defective bulbs in a lot of 1000 bulbs.

Q.6 Attempt Any Three. **09**

a) If two independent random samples of sizes 15 and 8 have respectively the following mean and population standard deviations, $\overline{x_1} = 980, \overline{x_2} = 1012; \sigma_1 = 75, \sigma_2 = 80$. Test the hypothesis that $\mu_1 = \mu_2$ at 5% level of significance.
(Given Expected value at 5% LOS with 21 DF is 2.080)

b) The number of telephone calls received by an operator in a ten-minute interval follows a Poisson distribution with mean 1. What is the probability of receiving (i) no call, (ii) less than four calls, in the interval? What is the most likely number of calls?

c) Calculate the Coefficient of correlations between x and y from the following data
$n = 25, \sum x = 100, \sum x^2 = 950, \sum y = 110, \sum y^2 = 850, \sum x\,y = 800$

d) Monthly salaries of 1000 workers have a normal distribution with mean of Rs. 575 and a standard deviation of Rs. 75. Find the number of workers having salaries between Rs. 500 and Rs. 625 p.m. Also find the minimum salary of the highest paid 200 workers.
(Given: For a standard normal variate
i) area between $t = 0$ and $t = 1$ is 0.3413,
ii) area between $t = 0$ and $t = 0.67$ is 0.2486,
iii) area between $t = 0$ and $t = 0.84$ is 0.3)

e) Obtain a second-degree curve to the following data and estimate the production in 1975.

Year	1921	1931	1941	1951	1961	1971	1981
Prod. (m. tons)	3	5	9	10	12	14	15

Q.7 Attempt Any Two. **10**

a) Fit a Binomial distribution to the following data,

Value of x	0	1	2	3	4	5	6
Frequency f	6	20	28	12	8	6	0

b) Calculate the lines of regression from the following table, gives the marks obtained by a class of students in two special papers.

Paper I	80	45	55	56	58	60	65	68	70	75	85
Paper II	82	56	50	48	60	62	64	65	70	74	90

c) Ten school boys were given a test in Statistics and their scores were recorded. They were given a month's special coaching and a second test was given to them in the same subject at the end of the coaching period. Test if the marks given below give evidence to the fact that the students are benefitted by coaching.

Marks in test I:	70	68	56	75	80	90	68	75	56	58
Marks in Test II:	68	70	52	73	75	78	80	92	54	55

(Given that value of t_α at 5% LOS for $v = 9$ degrees of freedom is 1.86 for one tailed test)

Seat No.	

Set **S**

S.Y. (B.Tech.) (Electronics & Computer Engineering) (Semester - I) (New) (NEP CBCS) Examination: March/April-2026
Advanced Mathematics and Statistics (OE-01A)

Day & Date: Monday, 11-05-2026 Max. Marks: 70
Time: 03:00 PM To 06:00 PM

Instructions: 1) Q. No. 1 is compulsory. It should be solved in the first 30 minutes in Answer Book Page no 03 (Starting page of the Answer Book). Each question carries one mark.
2) Don't forget to Mention question paper set (P/Q/R/S) on top of page.
3) Figures to the right indicates full marks.

MCQ/Objective Type Questions

Duration: 30 Minutes Marks: 14

Q.1 Choose the correct alternative from the given option. **14**

1) If μ_1', μ_2', μ_3' are the first three moments of the distribution about certain number then third moment μ_3 of the distribution about the arithmetic mean is given by _____.

a) $\mu_3' - 3\mu_2'\mu_1' + 2(\mu_1')^3$ b) $\mu_3' - 3\mu_1' + (\mu_2')^3$

c) $\mu_3' + 2\mu_2'\mu_1' + (\mu_3')^3$ d) $\mu_3' + 3\mu_2'\mu_1' + {\mu_1'}^2$

2) Coefficient of kurtosis β_1 is given by _____.

a) $\frac{\mu_4}{\mu_3}$ b) $\frac{\mu_4}{\mu_2^2}$

c) $\frac{\mu_3^2}{\mu_2^3}$ d) $\frac{\mu_4}{\mu_2^3}$

3) If value of x for normal distribution is 35, mean of normal distribution is 65 and standard deviation is 25 then standardized random variable is _____.

a) -1.5 b) -1.7

c) -1.2 d) -4

4) A continuous random variable has the following probability density function $f(x) = kx(1-x), 0 \le x \le 1$ then $k =$ _____.

a) 2 b) 6

c) 3 d) 5

5) The area under the standard normal curve from $z = -\infty$ to $z = 0$ is _____.

a) 1 b) $1/2$

c) $3/2$ d) 0

6) If X, Y denote the deviation from their means and if $\sum X^2 = 80, \sum Y^2 = 50$ & $\sum XY = 60$ and $r =$_____.

a) 0.65 b) 0.78

c) 0.81 d) 0.95

7) If two regression lines are co-incides then the coefficient of correlation is _____.

a) 0 b) -1

c) ± 1 d) 1

8) If $\bar{x}$ is the mean of the random sample of size n taken from a population of size N having mean μ and standard deviation σ then mean and variance of the distribution $\bar{x}$ are _____.

a) $\bar{x}, \sigma^2$ b) $\bar{x}, \frac{\sigma^2}{n}$

c) μ, σ^2 d) μ, and $\frac{\sigma^2}{n}$

9) χ^2 distribution is defined by _____.

a) $\sum \frac{(O-E)}{E}$ b) $\sum \frac{(O-E)}{E^2}$

c) $\sum \left(\frac{O-E}{E}\right)^2$ d) $\sum \frac{(O-E)^2}{E}$

10) If a linear differential equation with constant coefficients and r.h.s. equal to zero has a real root m_1 repeated two times, then the corresponding part of the integral is _____.

a) $(c_1 + c_2)e^{m_1 x}$ b) $(c_1 x + c_2 x)e^{m_1 x}$

c) $(c_1 x + c_2 x^2)e^{m_1 x}$ d) $(c_1 + c_2 x)e^{m_1 x}$

11) $\frac{1}{D-a} X$ is equal to _____.

a) $\int X e^{ax} dx$ b) $e^{ax} \int X . e^{-ax} dx$

c) $\int X e^{-ax} dx$ d) $e^{-ax} \int X e^{-ax} dx$

12) $\frac{1}{D+1}(\log x + \frac{1}{x})$ is equal to _____.

a) e^x b) 1

c) x d) $\log x$

13) The solution of the equation $\sqrt{p} + \sqrt{q} = 1$ is _____.

a) $z = ax + ay + c$ b) $z = ax + a^2 y + c$

c) $z = ax + \left(1 - \sqrt{a}\right)^2 y + c$ d) None of these

14) The solution of $p + q = 1$ is _____.

a) $z = ax + (1 - a)y + c$ b) $z = ax + by + c$

c) $z = ax + b(1 - y) + c$ d) $z = a(1 - x) + b(1 - y) + c$

SECTION – I

Q.2 Attempt Any Three. **09**

a) Find the Arithmetic mean, Median and standard deviation for the following frequency distribution.

x:	5	9	12	15	20	24	30	35	42	49
f:	3	6	8	8	9	10	8	7	6	2

b) Solve: $(D^2+1)y = x^2\cos 3x$

c) Solve: $(D^2-4D+4)y = 8.x^2e^{2x}\sin 2x$

d) Calculate the first four moments about the mean of the given distribution. Also find β_1, β_2

x	2.0	2.5	3.0	3.5	4.0	4.5	5.0
f	4	36	60	90	70	40	10

e) Solve $yzp + 2xq = xy$

Q.3 Attempt Any Three. **09**

a) Solve $\frac{d^2y}{dx^2} + 3\frac{dy}{dx} + 2y = 2e^{2x}$

b) Solve $p - q = x^2 + y^2$

c) Find the median of the following frequency distribution.

x	1	3	5	7	9	11	13	15	17
f	3	6	8	12	16	16	15	10	5

d) Solve $x(y-z)p + y(z-x)q = z(x-y)$

e) Solve $(D^3 - 3D + 2)y = x$

Q.4 Attempt Any Two. **10**

a) The first four moments of a distribution about the value 5 are $2, 20, 40$ and 50, from the given information obtain the first four central moments, Standard deviation and coefficient of skewness and kurtosis.

b) Solve the following differential equations by method of separation of variables.

$$3\frac{\partial u}{\partial x} + 2\frac{\partial u}{\partial y} = 0, \text{ given } u(x, 0) = 4e^{-x}$$

c) Solve $\frac{d^2y}{dx^2} + 3\frac{dy}{dx} + 2y = e^{e^x}$

SECTION – II

Q.5 Attempt Any Three. **09**

a) Find the value of k if each of the following functions is a probability density function.

$$f(x) = \begin{cases} kx^2(1 - x^3) & , \quad 0 \leq x \leq 1 \\ 0 & , \quad \text{otherwise} \end{cases}$$

b) The mean life time of 100 fluorescent light bulbs produced by a Company is computed to be 1570 Hrs. with S.D. of 120 Hrs. If μ is the mean lifetime of all the bulbs produced by the Company, Test the Hypothesis $\mu = 1600$ Hrs. against the alternative Hypothesis $\mu \neq 1600$ Hrs. using 5% level of Significance.
(Given Expected value at 5% LOS is 1.96)

c) Fit a Straight line $y = a + bx$ to the following data.

x	0	5	10	15	20	25
y	12	15	17	22	24	30

d) Two independent random sample have the following data.
$\overline{x_1} = 110, \sigma_1 = 25, n_1 = 16$
$\overline{x_2} = 120, \sigma_2 = 30, n_2 = 9$
If σ_1 and σ_2 are the S. D. of the populations. Test the hypothesis that $\mu_1 = \mu_2$ at 5% level of significance.
(The table value of t at $\alpha = 0.05$ for $v = 23$ degrees of freedom is 2.069)

e) If the probability of defective bulbs is 0.2, find the mean and variance of the distribution of defective bulbs in a lot of 1000 bulbs.

Q.6 Attempt Any Three. **09**

a) If two independent random samples of sizes 15 and 8 have respectively the following mean and population standard deviations, $\overline{x_1} = 980, \overline{x_2} = 1012; \sigma_1 = 75, \sigma_2 = 80$. Test the hypothesis that $\mu_1 = \mu_2$ at 5% level of significance.
(Given Expected value at 5% LOS with 21 DF is 2.080)

b) The number of telephone calls received by an operator in a ten-minute interval follows a Poisson distribution with mean 1. What is the probability of receiving (i) no call, (ii) less than four calls, in the interval? What is the most likely number of calls?

c) Calculate the Coefficient of correlations between x and y from the following data
$n = 25, \sum x = 100, \sum x^2 = 950, \sum y = 110, \sum y^2 = 850, \sum x\,y = 800$

d) Monthly salaries of 1000 workers have a normal distribution with mean of Rs. 575 and a standard deviation of Rs. 75. Find the number of workers having salaries between Rs. 500 and Rs. 625 p.m. Also find the minimum salary of the highest paid 200 workers.
(Given: For a standard normal variate
i) area between $t = 0$ and $t = 1$ is 0.3413,
ii) area between $t = 0$ and $t = 0.67$ is 0.2486,
iii) area between $t = 0$ and $t = 0.84$ is 0.3)

e) Obtain a second-degree curve to the following data and estimate the production in 1975.

Year	1921	1931	1941	1951	1961	1971	1981
Prod. (m. tons)	3	5	9	10	12	14	15

Q.7 Attempt Any Two. **10**

a) Fit a Binomial distribution to the following data,

Value of x	0	1	2	3	4	5	6
Frequency f	6	20	28	12	8	6	0

b) Calculate the lines of regression from the following table, gives the marks obtained by a class of students in two special papers.

Paper I	80	45	55	56	58	60	65	68	70	75	85
Paper II	82	56	50	48	60	62	64	65	70	74	90

c) Ten school boys were given a test in Statistics and their scores were recorded. They were given a month's special coaching and a second test was given to them in the same subject at the end of the coaching period. Test if the marks given below give evidence to the fact that the students are benefitted by coaching.

Marks in test I:	70	68	56	75	80	90	68	75	56	58
Marks in Test II:	68	70	52	73	75	78	80	92	54	55

(Given that value of t_α at 5% LOS for $v = 9$ degrees of freedom is 1.86 for one tailed test)

MCQ/Objective Type Questions

Duration: 30 Minutes Marks:14

Q.1 Choose correct answer: **14**

1) Which of the following is/are considered examples of the Consumer to Consumer (C2C) model?
a) Amazon.com b) e-bay
c) Rentalic.com d) All of the above

2) Which type of E - Commerce is Amazon?
a) B2B b) B2C
c) G2B d) G2C

3) Which of the following is the set of planned activities that are designed to result in a profit in the marketplace?
a) Profit model b) Business model
c) Business plan d) Revenue model

4) All of the following are major B2C business models except _____.
a) content provider b) industry consortium
c) transaction broker d) service provider

5) After completing an E-Commerce transaction, the buyer needs to _____.
a) Pick the product and go home
b) Take the product to home
c) Collect it directly from a store
d) Wait till the delivery of the product

6) SCM is a game of 4 C's = Collaboration; Co-operation; Co-ordination and _____.
a) Controlling b) Connectivity
c) Communication d) Customer

7) Which e-commerce transaction provides the benefits of eliminating the requirement of a middleman?
a) Business to Business
b) Business to Government
c) Consumer to Business
d) Business to Consumer

8) After completing an E-Commerce transaction, the seller and buyer should be provided an opportunity to _____ their transaction experience.
a) undo
b) regret
c) provide rating for
d) forget

9) Digital Cash has the following characteristics _____.
a) Anonymity
b) Security
c) Confidentiality
d) All of the Above

10) Benefit of E-Commerce platform is/are _____.
a) competitive pricing to benefit both seller and buyer
b) large number of products to choose from
c) ability to buy products not available in the local market
d) All of them

11) Which type of attack is a method of defeating a cryptographic scheme of trying a large number of possibilities?
a) Teardrop attack
b) Brute force attack
c) Phlashing
d) Smurf attack

12) Which is the model in E - E-Commerce, if the seller is an individual and the buyer is a business firm?
a) Consumer to Business
b) Business to Consumer
c) Business to Business
d) Consumer to Consumer

13) Which of the following authenticates and handles credit card payment for E-Commerce?
a) Payment gateway
b) E - E-Commerce gateway
c) Software gateway
d) E-Wallets

14) What is another name called PDoS?
a) Brute force attack
b) Non-technical attack
c) Phlashing
d) Smurf attack

4) What is the most important reason for managers to follow ethical principles in decision-making?
a) To avoid law suits
b) To improve public image
c) To build trust and long-term sustainability
d) To increase profits quickly

5) Which is the first step in the planning process?
a) Developing alternatives b) Evaluating alternatives
c) Setting objectives d) Selecting the best alternative

6) What is the primary purpose of organizing in management?
a) To control employee behavior
b) To define roles, responsibilities, and allocate resources
c) To create strict rules for employees
d) To plan financial statements

7) What is the main purpose of employee training and development?
a) To penalize poor performance
b) To reduce the number of staff
c) To delay promotions
d) To enhance employee skills and support career growth

8) According to Maslow's Hierarchy of Needs, which of the following is the highest level of need?
a) Safety needs
b) Social needs
c) Esteem needs
d) Self-actualization

9) The "Carrot and Stick" approach to motivation is based on _____.
a) Building self-esteem through empowerment
b) Providing both rewards and punishments to influence behavior
c) Offering training and development opportunities
d) Recognizing only financial incentives

10) Which of the following best defines "quality" in the context of management?
a) Producing the highest quantity of products
b) Conforming to standards and satisfying customer needs
c) Meeting only internal business goals
d) Offering products at the lowest possible price

11) Which of the following is not typically considered an element of quality?
a) Performance
b) Reliability
c) Advertising
d) Durability

12) Pareto Analysis is based on the principle that _____.
a) All causes contribute equally to problems
b) 20% of the causes account for 80% of the problems
c) Quality problems are random and unpredictable
d) Only external factors affect product quality

13) The main goal of Six Sigma is to _____.
a) Increase the speed of production
b) Eliminate all human involvement in processes
c) Reduce process variation and defects to near zero
d) Ensure all products are handmade

14) What is the primary purpose of Statistical Process Control (SPC)?
a) To eliminate all manual processes
b) To ensure marketing strategies are effective
c) To monitor and control a process through statistical methods
d) To increase financial profitability only

Set P

S.Y. (B.Tech.) (Electronics & Computer Engineering) (Semester - I) (New) (NEP CBCS) Examination: March/April – 2026
Industrial and Quality Management (OE-01D)

Day & Date: Monday, 11-05-2026 Max. Marks: 56
Time: 03:00 PM To 06:00 PM

Instructions: 1) Solve any two questions from both sections.
2) Figures to the right indicate full marks.
3) Assume suitable data if necessary and mention it clearly.

SECTION – I

Q.2	**a)**	Explain the Social responsibilities and ethics in management.	**07**
	b)	Explain decision making process with types of decision.	**07**
Q.3	**a)**	What is staffing? Explain its importance as a managerial function.	**07**
	b)	What are the types of organizations? Explain problems with organizational level.	**07**
Q.4	**a)**	What are the main techniques of managerial control.	**07**
	b)	What is motivation? Explain Maslow's theory of motivation.	**07**

SECTION – II

Q.5	**a)**	Define quality and state the steps in quality control.	**07**
	b)	Differentiate between quality of design and quality of conformance.	**07**
Q.6	**a)**	Explain Deming Wheel with suitable example.	**07**
	b)	List seven quality control tools. Explain with neat sketches Pareto analysis, Scatter diagram and cause and effect diagram.	**07**
Q.7	**a)**	What is Statistical Process Control (SPC)? Explain its objectives and importance in quality management.	**07**
	b)	Differentiate between single sampling plan & double sampling plan.	**07**

S.Y. (B.Tech.) (Electronics & Computer Engineering) (Semester - I) (New) (NEP CBCS) Examination: March/April – 2026
Industrial and Quality Management (OE-01D)

Day & Date: Monday, 11-05-2026 Max. Marks: 70
Time: 03:00 PM To 06:00 PM

Instructions: 1) Q. No. 1 is compulsory. It should be solved in the first 30 minutes in Answer Book Page no 03 (Starting page of the Answer Book). Each question carries one mark.
2) Don't forget to Mention question paper set (P/Q/R/S) on top on page.
3) Figures to the right indicates full marks.
4) Assume suitable data if necessary and mention it clearly.

MCQ/Objective Type Questions

Duration: 30 Minutes Marks:14

Q.1 MCQ/Objective Type Questions: 14

1) According to Maslow's Hierarchy of Needs, which of the following is the highest level of need?
a) Safety needs b) Social needs
c) Esteem needs d) Self-actualization

2) The "Carrot and Stick" approach to motivation is based on _____.
a) Building self-esteem through empowerment
b) Providing both rewards and punishments to influence behavior
c) Offering training and development opportunities
d) Recognizing only financial incentives

3) Which of the following best defines "quality" in the context of management?
a) Producing the highest quantity of products
b) Conforming to standards and satisfying customer needs
c) Meeting only internal business goals
d) Offering products at the lowest possible price

4) Which of the following is not typically considered an element of quality?
a) Performance b) Reliability
c) Advertising d) Durability

5) Pareto Analysis is based on the principle that _____.
a) All causes contribute equally to problems
b) 20% of the causes account for 80% of the problems
c) Quality problems are random and unpredictable
d) Only external factors affect product quality

6) The main goal of Six Sigma is to _____.
a) Increase the speed of production
b) Eliminate all human involvement in processes
c) Reduce process variation and defects to near zero
d) Ensure all products are handmade

7) What is the primary purpose of Statistical Process Control (SPC)?
a) To eliminate all manual processes
b) To ensure marketing strategies are effective
c) To monitor and control a process through statistical methods
d) To increase financial profitability only

8) Which of the following best defines the primary purpose of management?
a) To create rules for employees to follow
b) To maintain financial records
c) To achieve organizational goals efficiently and effectively
d) To monitor employee behavior

9) Which function of management involves setting objectives and determining a course of action to achieve them?
a) Organizing
b) Controlling
c) Planning
d) Leading

10) Which of the following best represents the concept of social responsibility in management?
a) Maximizing shareholder wealth at any cost
b) Avoiding all legal penalties
c) Balancing profit-making with obligations to stakeholders and society
d) Focusing only on employee welfare

11) What is the most important reason for managers to follow ethical principles in decision-making?
a) To avoid law suits
b) To improve public image

MCQ/Objective Type Questions

Duration: 30 Minutes Marks: 14

Q.1 Choose the correct alternative from the given option. 14

1) The particular Integral of $(D^2 - 2D + 1)y = -4e^x$ is _____.

a) $-2x^2e^x$ b) $-4x^2e^x$
c) $(C_1 + C_2x)e^x$ d) x^2e^x

2) The general solution of $(D^2 - 4)^2y = 0$ is _____.

a) $y = C_1e^{2x} + C_2e^{-2x}$
b) $y = (C_1 + C_2x)e^{-2x} + (C_3 + C_4x)e^{2x}$
c) $y = C_1\cos 2x + C_2\sin 2x + (C_3 + C_4x)e^{2x}$
d) None of these

3) The value of $\frac{1}{D-a}X =$ _____.

a) $e^{-ax}\int e^{-ax}Xdx$ b) $e^{-ax}\int e^{ax}Xdx$
c) $e^{ax}\int e^{-ax}Xdx$ d) $e^{ax}\int e^{ax}Xdx$

4) $Lf(t)\delta(t-a) =$ _____.

a) $e^{-as}f(t)$ b) $e^{-as}f(a)$
c) $e^{as}f(a)$ d) $e^{-as}f(t-a)$

5) If $L\{f(t)\} = \frac{a}{s^2+a^2}$ then $L\left\{\int_0^1 f(t)dt\right\} =$ _____.

a) $\frac{1}{s(s^2+a^2)}$ b) $\frac{a}{s(s^2+a^2)}$

c) $\frac{as}{s^2+a^2}$ d) $\frac{as^2}{s^2+a^2}$

6) The inverse z-transform of $\frac{z}{z-3}, |z| > 3$ (with $k \geq 0$) is _____.

a) 3^{-k} b) 3^{k+1}

c) 3^k d) 3^{-k-1}

7) The rate of convergence of Newton-Raphson Method is _____.

a) 1 b) 2

c) $\sqrt{2}$ d) 3

8) A positive real root of the equation $xe^x - 2 = 0$ is lies between _____.

a) 2 and 3 b) 1 and 2

c) 3 and 4 d) 0 and 1

9) Since $z\{1\} = \frac{z}{z-1}, z\{a^k\}, k \geq 0 =$ _____.

a) $\frac{z}{z-a}$ b) $\frac{z}{a(z-1)}$

c) $\frac{a}{z-a}$ d) $\frac{z}{az-1}$

10) In the interval $(0,1)$ the constant term in the cosine series of $f(x) = x^2$ is _____.

a) 0 b) $\frac{1}{2}$

c) $\frac{1}{3}$ d) $\frac{\pi}{4}$

11) In the cosine series of $f(x) = \pi x - x^2$ for $0 < x < \pi$, the constant term is _____.

a) $\frac{\pi^2}{4}$ b) $\frac{\pi^2}{16}$

c) $\frac{\pi^2}{6}$ d) $\frac{\pi^2}{2}$

12) For the function $f(x) \begin{matrix} = & 0, & -\pi < x < 0 \\ = & x, & 0 < x < \pi \end{matrix}$

The value of Fourier constant a_0 is _____.

a) $\frac{\pi^2}{4}$ b) $\frac{\pi}{4}$

c) $\frac{\pi^2}{2}$ d) $\frac{-\pi}{4}$

13) The half range sine series of $f(x)$ defined in the interval $(0, 2)$ is _____.

a) $f(x) = \sum_{n=1}^{\infty} b_n \sin nx$ b) $f(x) = \sum_{n=1}^{\infty} b_n \sin(2n\pi x)$

c) $f(x) = \sum_{n=1}^{\infty} b_n \sin\left(\frac{n\pi x}{2}\right)$ d) $f(x) = \sum_{n=1}^{\infty} a_n \cos\left(\frac{n\pi x}{2}\right)$

14) If $F_s(\lambda) = e^{-\lambda}$ then the function $f(x) =$ _____.

a) $\frac{2}{\sqrt{1+x^2}}$ b) $\frac{\pi}{1+x^2}$

c) $\sqrt{\frac{2}{\pi}}\frac{1}{1+x^2}$ d) None

Set **P**

S.Y. (B.Tech.) (Electronics & Computer Engineering) (Semester - I) (New) (NEP CBCS) Examination: March/April – 2026
Mathematics for Software and Hardware (OE-01E)

Day & Date: Monday, 11-05-2026 Max. Marks: 56
Time: 03:00 PM To 06:00 PM

Instructions: 1) All question are compulsory.
2) Figures to the right indicate full marks.
3) Make suitable assumptions if necessary and state them clearly.
4) Use of non-programmable calculator is allowed.

SECTION – I

Q.2 Attempt Any Three. **09**

a) Solve: $(D^2+1)y = x\sin 2x$

b) Solve: $(D^2+4D+4)y = e^{3x}$

c) Find $L\left\{\frac{1}{t}(1-\cos t)\right\}$

d) Find $z\{ka^k + k\beta^k\}, k \geq 0$

e) Find the Laplace transform of $\int_0^t te^{-3t}\sin(4t)dt$

Q.3 Attempt Any Three. **09**

a) Solve $(D^2-1)y = X\cos 2x$

b) Find $L\left[\int_0^t te^{-4t}\sin(3t)dt\right]$

c) Find the inverse Laplace transform of following by using the Convolution theorem of $\left[\frac{1}{s(s^2+9)}\right]$

d) Find $Z\left\{3^k\cos\left(\frac{k\pi}{2}+\frac{\pi}{4}\right)\right\}, k \geq 0$

e) Find the Laplace Transform of $\{1+2t-3t^2+4t^3\}U(t-2)\}$

Q.4 Attempt Any Two. **10**

a) Find $L\{t.\sqrt{1-\sin t}\}$

b) Solve $(D^3+1)y = 3+e^{-x}+5e^{2x}$

c) Find $Z^{-1}\left\{\frac{1}{(z-a)^2}\right\}, |z| > |a|., |z| < |a|$

SECTION – II

Q.5 Attempt Any Three. **09**

a) Evaluate $\int_0^6 \frac{e^x}{1+x}dx$ using Simpson's 1/3rd rule, (Take $h = 1$)

b) Find the half-range cosine series for $f(x) = e^{-x}$ in $(0, \pi)$

c) Evaluate $\sqrt{37}$ by Newton Raphson method correct to four decimal places by taking initial approximation as $x_0 = 6$

d) Find the Fourier Sine transforms of $2e^{-5x} + 5e^{-2x}$

e) Find the Fourier series of $f(x) \begin{matrix} = & \pi x, & 0 < x < 1 \\ = & 0, & 1 < x < 2 \end{matrix}$

Q.6 Attempt Any Three. **09**

a) Obtain half range sine series for $f(x) = x$ in $0 < x < 2$

b) Find the positive root of the following by using Newton Raphson method correct to four decimal places $3x - \cos x - 1 = 0$

c) Evaluate $\int_0^6 \frac{1}{1+x^2}dx\ n = 6$ using Trapezoidal rule.

d) Find the Fourier transform of $f(x)$ if $f(x) = \begin{cases} 1, & 0 \le x < 1 \\ 0, & x > 0 \end{cases}$

e) Find the Fourier series of $f(x) = x \sin x, \quad (0, 2\pi)$

Q.7 Attempt Any Two. **10**

a) Find the Fourier transform of

$f(x) \begin{matrix} = 1 & |x| & < & k \\ = 0 & |x| & > & k \end{matrix}$ and

hence evaluate

i) $\int_{-\infty}^{\infty} \frac{\sin sk \,.\, \cos sk}{s} ds$

ii) $\int_{-\infty}^{\infty} \frac{\sin ks}{s} ds$

b) Obtain the Fourier series of $f(x) = a^2 - x^2$ in $(-a, a)$

c) Find the Value of K_1 by Runge Kutta Method of fourth order if

$\frac{dy}{dx} = 2x + 3y^2$ and $y(0.1) = 1.1165$ and $h = 0.1$

Set Q

S.Y. (B.Tech.) (Electronics & Computer Engineering) (Semester - I) (New) (NEP CBCS) Examination: March/April – 2026
Mathematics for Software and Hardware (OE-01E)

Day & Date: Monday, 11-05-2026 Max. Marks: 70
Time: 03:00 PM To 06:00 PM

Instructions: 1) Q. No. 1 is compulsory. It should be solved in the first 30 minutes in Answer Book Page no 03 (Starting page of the Answer Book). Each question carries one mark.
2) Don't forget to Mention question paper set (P/Q/R/S) on top of page.
3) Figures to the right indicates full marks.
4) Make suitable assumptions if necessary and state them clearly.
5) Use of non-programmable calculator is allowed.

MCQ/Objective Type Questions

Duration: 30 Minutes Marks: 14

Q.1 Choose the correct alternative from the given option. 14

1) A positive real root of the equation $xe^x - 2 = 0$ is lies between _____.

a) 2 and 3 b) 1 and 2
c) 3 and 4 d) 0 and 1

2) Since $z\{1\} = \frac{z}{z-1}, z\{a^k\}, k \geq 0 =$ _____.

a) $\frac{z}{z-a}$ b) $\frac{z}{a(z-1)}$
c) $\frac{a}{z-a}$ d) $\frac{z}{az-1}$

3) In the interval $(0,1)$ the constant term in the cosine series of $f(x) = x^2$ is _____.

a) 0 b) $\frac{1}{2}$
c) $\frac{1}{3}$ d) $\frac{\pi}{4}$

4) In the cosine series of $f(x) = \pi x - x^2$ for $0 < x < \pi$, the constant term is _____.

a) $\frac{\pi^2}{4}$ b) $\frac{\pi^2}{16}$
c) $\frac{\pi^2}{6}$ d) $\frac{\pi^2}{2}$

5) For the function $f(x) \begin{matrix} = & 0, & -\pi < x < 0 \\ = & x, & 0 < x < \pi \end{matrix}$

The value of Fourier constant a_0 is _____.

a) $\frac{\pi^2}{4}$ b) $\frac{\pi}{4}$

c) $\frac{\pi^2}{2}$ d) $\frac{-\pi}{4}$

6) The half range sine series of $f(x)$ defined in the interval $(0, 2)$ is _____.

a) $f(x) = \sum_{n=1}^{\infty} b_n \sin nx$ b) $f(x) = \sum_{n=1}^{\infty} b_n \sin(2n\pi x)$

c) $f(x) = \sum_{n=1}^{\infty} b_n \sin\left(\frac{n\pi x}{2}\right)$ d) $f(x) = \sum_{n=1}^{\infty} a_n \cos\left(\frac{n\pi x}{2}\right)$

7) If $F_s(\lambda) = e^{-\lambda}$ then the function $f(x) =$ _____.

a) $\frac{2}{\sqrt{1+x^2}}$ b) $\frac{\pi}{1+x^2}$

c) $\sqrt{\frac{2}{\pi}}\frac{1}{1+x^2}$ d) None

8) The particular Integral of $(D^2 - 2D + 1)y = -4e^x$ is _____.

a) $-2x^2e^x$ b) $-4x^2e^x$

c) $(C_1 + C_2x)e^x$ d) x^2e^x

9) The general solution of $(D^2 - 4)^2 y = 0$ is _____.

a) $y = C_1e^{2x} + C_2e^{-2x}$

b) $y = (C_1 + C_2x)e^{-2x} + (C_3 + C_4x)e^{2x}$

c) $y = C_1 \cos 2x + C_2 \sin 2x + (C_3 + C_4x)e^{2x}$

d) None of these

10) The value of $\frac{1}{D-a}X =$ _____.

a) $e^{-ax}\int e^{-ax}Xdx$ b) $e^{-ax}\int e^{ax}Xdx$

c) $e^{ax}\int e^{-ax}Xdx$ d) $e^{ax}\int e^{ax}Xdx$

11) $Lf(t)\delta(t-a) =$ _____.

a) $e^{-as}f(t)$ b) $e^{-as}f(a)$

c) $e^{as}f(a)$ d) $e^{-as}f(t-a)$

12) If $L\{f(t)\} = \frac{a}{s^2+a^2}$ then $L\left\{\int_0^1 f(t)dt\right\} =$ _____.

a) $\frac{1}{s(s^2+a^2)}$ b) $\frac{a}{s(s^2+a^2)}$

c) $\frac{as}{s^2+a^2}$ d) $\frac{as^2}{s^2+a^2}$

13) The inverse z-transform of $\frac{z}{z-3}, |z| > 3$ (with $k \geq 0$) is _____.

a) 3^{-k} b) 3^{k+1}

c) 3^{k} d) 3^{-k-1}

14) The rate of convergence of Newton-Raphson Method is _____.

a) 1 b) 2

c) $\sqrt{2}$ d) 3

S.Y. (B.Tech.) (Electronics & Computer Engineering) (Semester - I) (New) (NEP CBCS) Examination: March/April – 2026
Mathematics for Software and Hardware (OE-01E)

Day & Date: Monday, 11-05-2026 Max. Marks: 56
Time: 03:00 PM To 06:00 PM

Instructions: 1) All question are compulsory.
2) Figures to the right indicate full marks.
3) Make suitable assumptions if necessary and state them clearly.
4) Use of non-programmable calculator is allowed.

SECTION – I

Q.2 Attempt Any Three. **09**

a) Solve: $(D^2+1)y = x\sin 2x$

b) Solve: $(D^2+4D+4)y = e^{3x}$

c) Find $L\left\{\frac{1}{t}(1-\cos t)\right\}$

d) Find $z\{ka^k + k\beta^k\}, k \geq 0$

e) Find the Laplace transform of $\int_0^t te^{-3t}\sin(4t)dt$

Q.3 Attempt Any Three. **09**

a) Solve $(D^2-1)y = X\cos 2x$

b) Find $L\left[\int_0^t te^{-4t}\sin(3t)dt\right]$

c) Find the inverse Laplace transform of following by using the Convolution theorem of $\left[\frac{1}{s(s^2+9)}\right]$

d) Find $Z\left\{3^k\cos\left(\frac{k\pi}{2}+\frac{\pi}{4}\right)\right\}, k \geq 0$

e) Find the Laplace Transform of $\{1+2t-3t^2+4t^3\}U(t-2)\}$

Q.4 Attempt Any Two. **10**

a) Find $L\{t.\sqrt{1-\sin t}\}$

b) Solve $(D^3+1)y = 3+e^{-x}+5e^{2x}$

c) Find $Z^{-1}\left\{\frac{1}{(z-a)^2}\right\}, |z| > |a|., |z| < |a|$

SECTION – II

Q.5 Attempt Any Three. **09**

a) Evaluate $\int_0^6 \frac{e^x}{1+x}dx$ using Simpson's 1/3rd rule, (Take $h = 1$)

b) Find the half-range cosine series for $f(x) = e^{-x}$ in $(0, \pi)$

c) Evaluate $\sqrt{37}$ by Newton Raphson method correct to four decimal places by taking initial approximation as $x_0 = 6$

d) Find the Fourier Sine transforms of $2e^{-5x} + 5e^{-2x}$

e) Find the Fourier series of $f(x) \begin{matrix} = & \pi x, & 0 < x < 1 \\ = & 0, & 1 < x < 2 \end{matrix}$

Q.6 Attempt Any Three. **09**

a) Obtain half range sine series for $f(x) = x$ in $0 < x < 2$

b) Find the positive root of the following by using Newton Raphson method correct to four decimal places $3x - \cos x - 1 = 0$

c) Evaluate $\int_0^6 \frac{1}{1+x^2}dx\ n = 6$ using Trapezoidal rule.

d) Find the Fourier transform of $f(x)$ if $f(x) = \begin{cases} 1, & 0 \le x < 1 \\ 0, & x > 0 \end{cases}$

e) Find the Fourier series of $f(x) = x \sin x, \ \ (0, 2\pi)$

Q.7 Attempt Any Two. **10**

a) Find the Fourier transform of

$f(x) \begin{matrix} = 1 & |x| & < & k \\ = 0 & |x| & > & k \end{matrix}$ and

hence evaluate

i) $\int_{-\infty}^{\infty} \frac{\sin sk \,.\cos sk}{s} ds$

ii) $\int_{-\infty}^{\infty} \frac{\sin ks}{s} ds$

b) Obtain the Fourier series of $f(x) = a^2 - x^2$ in $(-a, a)$

c) Find the Value of K_1 by Runge Kutta Method of fourth order if $\frac{dy}{dx} = 2x + 3y^2$ and $y(0.1) = 1.1165$ and $h = 0.1$

S.Y. (B.Tech.) (Electronics & Computer Engineering) (Semester - I) (New) (NEP CBCS) Examination: March/April – 2026
Soft Skills and Personality Development (OE-01F)

Day & Date: Monday, 11-05-2026 Max. Marks: 70
Time: 03:00 PM To 06:00 PM

Instructions: 1) Q. No. 1 is compulsory. It should be solved in the first 30 minutes in Answer Book Page no 03 (Starting page of the Answer Book). Each question carries one mark
2) Don't forget to Mention question paper set (P/Q/R/S) on top on page.
3) Figures to the right indicates full marks.

MCQ/Objective Type Questions

Duration: 30 Minutes Marks:14

Q.1 Choose the correct alternatives from the following. **14**

1) In the process of communication, _____ is the person who encodes the message.
a) Receiver b) Driver
c) Cleaner d) Sender

2) Which among the following barriers is related to fault in the channel?
a) Physical b) Mechanical
c) Psychological d) All of above

3) The ability to recognize, understand and regulate your own emotions is called _____.
a) Empathy b) Self-awareness
c) Emotional intelligence d) Relationship management

4) Stress is defined as _____.
a) A physical or emotional reaction to challenges or demands
b) A type of disease
c) Only physical pain
d) A mental disorder

5) Time management means _____.
a) Doing work very quickly
b) Planning and organizing how to spend time effectively
c) Wasting time
d) Avoiding responsibilities

6) Effective non-verbal communication in presentations helps to _____.
a) Confuse the audience
b) Improve understanding and engagement
c) Reduce communication
d) Replace verbal communication

7) Which of the following helps in effective presentation?
a) Organizing ideas clearly b) Using complex language
c) Ignoring the audience d) All of the above

8) The main purpose of an interview is to _____.
a) Test physical strength
b) Assess a candidate's suitability
c) Conduct training
d) Provide entertainment

9) Which of the following is part of presentation etiquette?
a) Clear speaking b) Good posture
c) Proper visual aids d) All of the above

10) Good posture during a presentation indicates _____.
a) Confidence b) Nervousness
c) Disinterest d) Laziness

11) Which non-verbal factors help engage the audience?
a) Eye contact b) Facial expressions
c) Hand gestures d) All of the above

12) Prioritization in time management means _____.
a) Doing easy tasks first
b) Arranging tasks according to importance
c) Avoiding work
d) Doing everything at once

13) Procrastination means _____.
a) Completing work early b) Delaying tasks unnecessarily
c) Planning work d) Finishing tasks on time

14) Taking short breaks during work helps to _____.
a) Reduce efficiency b) Improve focus
c) Waste time d) Increase stress

Time: 03:00 PM To 06:00 PM

Instructions: 1) All questions are compulsory.
2) Figures to the right indicate full marks.

SECTION – I

Q.2 Attempt Any Three. **12**

a) Write short note on: Functions of a Sender in Communication.

b) Explain physical barriers to communication with the ways to overcome them.

c) Write short note on: Time management.

d) Explain how language can become a barrier in communication.

e) Explain how feedback is necessary in communication.

Q.3 Attempt Any Two. **16**

a) Define psychological barriers and the ways to overcome them.

b) Elaborate various ways to develop emotional intelligence.

c) Which are the different steps in the process of communication?

SECTION -II

Q.4 Attempt Any Three. **12**

a) Explain how non-verbal communication helps for better presentation.

b) Explain different types of interviews.

c) Explain various ways of time management.

d) Elaborate different strategies to manage stress.

e) Explain different reasons of stress.

Q.5 Attempt Any Two. **16**

a) Explain the concept of interview with various steps in the process.

b) Elaborate various ways of effective time management.

MCQ/Objective Type Questions

Duration: 30 Minutes Marks:14

Q.1 Choose the correct Answer. **14**

1) Convert $(2F)_{16}$ to decimal _____.
a) 46 b) 47
c) 45 d) 44

2) ASCII code is primarily used for _____.
a) Numbers only b) Characters and symbols
c) Images d) Memory addressing

3) Binary division : $(10010)_2 \div (10)_2 =$ _____
a) 1001 b) 1010
c) 1100 d) 1111

4) Which of the following is a universal gate?
a) AND b) OR
c) NAND d) XOR

5) A NOR gate is equivalent to _____.
a) NOT + OR b) NOT + AND
c) NOT + NAND d) NOT + XO

6) According to Boolean algebra, $A + A = ?$
a) A b) 0
c) 1 d) A'

7) A 4-variable K-map has _____.
a) 8 cells b) 12 cells
c) 16 cells d) 32 cells

8) The number of selection lines in a 16-to-1 MUX is _____.
a) 2 b) 4
c) 8 d) 16

9) A 1 -bit comparator has how many outputs?

a) 1 b) 2
c) 3 d) 4

10) Sequential circuits differ from combinational circuits because they _____.

a) Have no memory
b) Depend on past inputs (memory)
c) Use only logic gates
d) Do not require clock

11) A flip-flop is a _____.

a) 1-bit memory cell b) 2-bit memory cell
c) 4-bit memory cell d) 8-bit memory cel

12) Ripple counter is also called _____.

a) Asynchronous counter b) Synchronous counter
c) Ring counter d) Johnson counter

13) Which memory is temporary and volatile?

a) ROM b) PROM
c) RAM d) EPROM

14) PROM stands for _____.

a) Programmable ROM b) Permanent ROM
c) Parallel ROM d) None

Fundamentals of Digital Circuits (ECEMDM-01A)

Day & Date: Thursday, 30-04-2026 Max. Marks: 56
Time: 10:00 AM To 01:00 PM

Instructions: 1) All questions are compulsory.
2) Figures to the right indicate full marks.

Section – I

Q.2 Attempt the following. (Any Four) **16**

a) Convert the following number system:
i) 1011101 to Gray code
ii) ASCII code for "TEST"

b) Perform following operations:
i) $110101 + 101110$
ii) $111001 - 100101$
iii) $110101 * 101$
iv) $11011/110$

c) Draw the truth tables for AND, OR, XOR and NOT gates

d) Simplify the Boolean expression: $\mathrm{F} = \mathrm{A}(\mathrm{B} + \mathrm{C}) + \mathrm{A}'\mathrm{B}$ using Boolean algebra.

e) Use a Karnaugh map to simplify the function
$F(A, B, C) = \sum(0, 1, 3, 5, 7) + d(2, 4)$

f) Prove De Morgan's theorems.

Q.3 Attempt the following. (Any Two) **12**

a) Define the decimal, binary, octal, and hexadecimal number systems with examples.

b) Describe the operation of XOR and XNOR gates with truth tables.

c) What are SOP and POS forms? Give examples.

Section – II

Q.4 Attempt the following. (Any Four) **16**

a) Design a full subtractor circuit using basic logic gates.

b) What is a comparator? Explain the working of a 4-bit magnitude comparator.

c) Describe the operation of a D flip-flop with timing diagram.

d) What is the difference between a latch and a flip-flop? Give examples.

e) Differentiate between RAM and ROM with examples.

Q.5 Attempt the following. (Any Two) **12**

a) Explain the working of a multiplexer and de-multiplexer with a truth table.

b) Explain the working of SR flip-flop and JK flip-flop and write its excitation table.

c) List and explain types of ROM: PROM, EPROM, and EEPROM.

Q.1 Choose the correct Answer. **14**

1) A flip-flop is a _____.
a) 1-bit memory cell b) 2-bit memory cell
c) 4-bit memory cell d) 8-bit memory cel

2) Ripple counter is also called _____.
a) Asynchronous counter b) Synchronous counter
c) Ring counter d) Johnson counter

3) Which memory is temporary and volatile?
a) ROM b) PROM
c) RAM d) EPROM

4) PROM stands for _____.
a) Programmable ROM b) Permanent ROM
c) Parallel ROM d) None

5) Convert $(2F)_{16}$ to decimal _____.
a) 46 b) 47
c) 45 d) 44

6) ASCII code is primarily used for _____.
a) Numbers only b) Characters and symbols
c) Images d) Memory addressing

7) Binary division : $(10010)_2 \div (10)_2 =$ _____
a) 1001 b) 1010
c) 1100 d) 1111

8) Which of the following is a universal gate?
a) AND b) OR
c) NAND d) XOR

9) A NOR gate is equivalent to _____.
a) NOT + OR
b) NOT + AND
c) NOT + NAND
d) NOT + XO

10) According to Boolean algebra, A + A = ?
a) A
b) 0
c) 1
d) A'

11) A 4-variable K-map has _____.
a) 8 cells
b) 12 cells
c) 16 cells
d) 32 cells

12) The number of selection lines in a 16-to-1 MUX is _____.
a) 2
b) 4
c) 8
d) 16

13) A 1 -bit comparator has how many outputs?
a) 1
b) 2
c) 3
d) 4

14) Sequential circuits differ from combinational circuits because they _____.
a) Have no memory
b) Depend on past inputs (memory)
c) Use only logic gates
d) Do not require clock

Set R

S.Y. (B.Tech.) (Civil Engineering) (Semester - I) (New) (NEP CBCS)
Examination: March/April – 2026
Fundamentals of Digital Circuits (ECEMDM-01A)

Day & Date: Thursday, 30-04-2026 Max. Marks: 56
Time: 10:00 AM To 01:00 PM

Instructions: 1) All questions are compulsory.
2) Figures to the right indicate full marks.

Section – I

Q.2 Attempt the following. (Any Four) **16**

a) Convert the following number system:
i) 1011101 to Gray code
ii) ASCII code for "TEST"

b) Perform following operations:
i) $110101 + 101110$
ii) $111001 - 100101$
iii) $110101 * 101$
iv) $11011/110$

c) Draw the truth tables for AND, OR, XOR and NOT gates

d) Simplify the Boolean expression: $\mathrm{F} = \mathrm{A}(\mathrm{B} + \mathrm{C}) + \mathrm{A}'\mathrm{B}$ using Boolean algebra.

e) Use a Karnaugh map to simplify the function
$F(A, B, C) = \sum(0, 1, 3, 5, 7) + d(2, 4)$

f) Prove De Morgan's theorems.

Q.3 Attempt the following. (Any Two) **12**

a) Define the decimal, binary, octal, and hexadecimal number systems with examples.

b) Describe the operation of XOR and XNOR gates with truth tables.

c) What are SOP and POS forms? Give examples.

Section – II

Q.4 Attempt the following. (Any Four) **16**

a) Design a full subtractor circuit using basic logic gates.

b) What is a comparator? Explain the working of a 4-bit magnitude comparator.

c) Describe the operation of a D flip-flop with timing diagram.

d) What is the difference between a latch and a flip-flop? Give examples.

e) Differentiate between RAM and ROM with examples.

Q.5 Attempt the following. (Any Two) **12**

a) Explain the working of a multiplexer and de-multiplexer with a truth table.

b) Explain the working of SR flip-flop and JK flip-flop and write its excitation table.

c) List and explain types of ROM: PROM, EPROM, and EEPROM.

Seat No.	

Set **S**

S.Y. (B.Tech.) (Civil Engineering) (Semester - I) (New) (NEP CBCS)
Examination: March/April – 2026
Fundamentals of Digital Circuits (ECEMDM-01A)

Day & Date: Thursday, 30-04-2026 Max. Marks: 70
Time: 10:00 AM To 01:00 PM

Instructions: 1) Q. No. 1 is compulsory. It should be solved in the first 30 minutes in Answer Book Page no 03 (Starting page of the Answer Book). Each question carries one mark.
2) Don't forget to Mention question paper set (P/Q/R/S) on top of page.
3) Figures to the right indicates full marks.

MCQ/Objective Type Questions

Duration: 30 Minutes Marks:14

Q.1 Choose the correct Answer. **14**

1) According to Boolean algebra, A + A = ?
a) A b) 0
c) 1 d) A'

2) A 4-variable K-map has _____.
a) 8 cells b) 12 cells
c) 16 cells d) 32 cells

3) The number of selection lines in a 16-to-1 MUX is _____.
a) 2 b) 4
c) 8 d) 16

4) A 1 -bit comparator has how many outputs?
a) 1 b) 2
c) 3 d) 4

5) Sequential circuits differ from combinational circuits because they _____.
a) Have no memory
b) Depend on past inputs (memory)
c) Use only logic gates
d) Do not require clock

6) A flip-flop is a _____.
a) 1-bit memory cell b) 2-bit memory cell
c) 4-bit memory cell d) 8-bit memory cel

7) Ripple counter is also called _____.
a) Asynchronous counter b) Synchronous counter
c) Ring counter d) Johnson counter

8) Which memory is temporary and volatile?
a) ROM b) PROM
c) RAM d) EPROM

9) PROM stands for _____.
a) Programmable ROM b) Permanent ROM
c) Parallel ROM d) None

d) Simplify the Boolean expression: $\mathrm{F} = \mathrm{A}(\mathrm{B} + \mathrm{C}) + \mathrm{A}'\mathrm{B}$ using Boolean algebra.

e) Use a Karnaugh map to simplify the function
$F(A, B, C) = \sum(0, 1, 3, 5, 7) + d(2, 4)$

f) Prove De Morgan's theorems.

Q.3 Attempt the following. (Any Two) **12**

a) Define the decimal, binary, octal, and hexadecimal number systems with examples.

b) Describe the operation of XOR and XNOR gates with truth tables.

c) What are SOP and POS forms? Give examples.

Section – II

Q.4 Attempt the following. (Any Four) **16**

a) Design a full subtractor circuit using basic logic gates.

b) What is a comparator? Explain the working of a 4-bit magnitude comparator.

c) Describe the operation of a D flip-flop with timing diagram.

d) What is the difference between a latch and a flip-flop? Give examples.

e) Differentiate between RAM and ROM with examples.

Q.5 Attempt the following. (Any Two) **12**

a) Explain the working of a multiplexer and de-multiplexer with a truth table.

b) Explain the working of SR flip-flop and JK flip-flop and write its excitation table.

c) List and explain types of ROM: PROM, EPROM, and EEPROM.

Set P

S.Y. (B.Tech.) (Electronics & Computer Engineering) (Semester - I) (New) (NEP CBCS) Examination: March/April – 2026
Fundamentals of Digital Circuits (ECEMDM-01A)

Day & Date: Thursday, 30-04-2026 Max. Marks: 70
Time: 10:00 AM To 01:00 PM

Instructions: 1) Q. No. 1 is compulsory. It should be solved in the first 30 minutes in Answer Book Page no 03 (Starting page of the Answer Book). Each question carries one mark.
2) Don't forget to Mention question paper set (P/Q/R/S) on top of page.
3) Figures to the right indicates full marks.

MCQ/Objective Type Questions

Duration: 30 Minutes Marks:14

Q.1 Choose the correct Answer. **14**

1) Convert $(2F)_{16}$ to decimal _____.
a) 46 b) 47
c) 45 d) 44

2) ASCII code is primarily used for _____.
a) Numbers only b) Characters and symbols
c) Images d) Memory addressing

3) Binary division : $(10010)_2 \div (10)_2 =$ _____
a) 1001 b) 1010
c) 1100 d) 1111

4) Which of the following is a universal gate?
a) AND b) OR
c) NAND d) XOR

5) A NOR gate is equivalent to _____.
a) NOT + OR b) NOT + AND
c) NOT + NAND d) NOT + XO

6) According to Boolean algebra, $A + A = ?$
a) A b) 0
c) 1 d) A'

7) A 4-variable K-map has _____.
a) 8 cells b) 12 cells
c) 16 cells d) 32 cells

8) The number of selection lines in a 16-to-1 MUX is _____.
a) 2 b) 4
c) 8 d) 16

9) A 1 -bit comparator has how many outputs?

a) 1 b) 2
c) 3 d) 4

10) Sequential circuits differ from combinational circuits because they _____.

a) Have no memory
b) Depend on past inputs (memory)
c) Use only logic gates
d) Do not require clock

11) A flip-flop is a _____.

a) 1-bit memory cell b) 2-bit memory cell
c) 4-bit memory cell d) 8-bit memory cel

12) Ripple counter is also called _____.

a) Asynchronous counter b) Synchronous counter
c) Ring counter d) Johnson counter

13) Which memory is temporary and volatile?

a) ROM b) PROM
c) RAM d) EPROM

14) PROM stands for _____.

a) Programmable ROM b) Permanent ROM
c) Parallel ROM d) None

9) ASCII code is primarily used for _____.
a) Numbers only b) Characters and symbols
c) Images d) Memory addressing

10) Binary division : $(10010)_2 \div (10)_2 =$ _____
a) 1001 b) 1010
c) 1100 d) 1111

11) Which of the following is a universal gate?
a) AND b) OR
c) NAND d) XOR

12) A NOR gate is equivalent to _____.
a) NOT + OR b) NOT + AND
c) NOT + NAND d) NOT + XO

13) According to Boolean algebra, $A + A = ?$
a) A b) 0
c) 1 d) A'

14) A 4-variable K-map has _____.
a) 8 cells b) 12 cells
c) 16 cells d) 32 cells

Seat No.	

Set **Q**

S.Y. (B.Tech.) (Electrical Engineering) (Semester - I) (New) (NEP CBCS) Examination: March/April – 2026
Fundamentals of Digital Circuits (ECEMDM-01A)

Day & Date: Thursday, 30-04-2026 Max. Marks: 56
Time: 10:00 AM To 01:00 PM

Instructions: 1) All questions are compulsory.
2) Figures to the right indicate full marks.

Section – I

Q.2 Attempt the following. (Any Four) **16**

a) Convert the following number system:
i) 1011101 to Gray code
ii) ASCII code for "TEST"

b) Perform following operations:
i) $110101 + 101110$
ii) $111001 - 100101$
iii) $110101 * 101$
iv) $11011/110$

c) Draw the truth tables for AND, OR, XOR and NOT gates

d) Simplify the Boolean expression: $\mathrm{F} = \mathrm{A}(\mathrm{B} + \mathrm{C}) + \mathrm{A}'\mathrm{B}$ using Boolean algebra.

e) Use a Karnaugh map to simplify the function
$F(A, B, C) = \sum(0, 1, 3, 5, 7) + d(2, 4)$

f) Prove De Morgan's theorems.

Q.3 Attempt the following. (Any Two) **12**

a) Define the decimal, binary, octal, and hexadecimal number systems with examples.

b) Describe the operation of XOR and XNOR gates with truth tables.

c) What are SOP and POS forms? Give examples.

Section – II

Q.4 Attempt the following. (Any Four) **16**

a) Design a full subtractor circuit using basic logic gates.

b) What is a comparator? Explain the working of a 4-bit magnitude comparator.

c) Describe the operation of a D flip-flop with timing diagram.

d) What is the difference between a latch and a flip-flop? Give examples.

e) Differentiate between RAM and ROM with examples.

Q.5 Attempt the following. (Any Two) **12**

a) Explain the working of a multiplexer and de-multiplexer with a truth table.

b) Explain the working of SR flip-flop and JK flip-flop and write its excitation table.

c) List and explain types of ROM: PROM, EPROM, and EEPROM.

Seat No.	

Set **R**

S.Y. (B.Tech.) (Electrical Engineering) (Semester - I) (New) (NEP CBCS) Examination: March/April – 2026
Fundamentals of Digital Circuits (ECEMDM-01A)

Day & Date: Thursday, 30-04-2026 Max. Marks: 70
Time: 10:00 AM To 01:00 PM

Instructions: 1) Q. No. 1 is compulsory. It should be solved in the first 30 minutes in Answer Book Page no 03 (Starting page of the Answer Book). Each question carries one mark.
2) Don't forget to Mention question paper set (P/Q/R/S) on top of page.
3) Figures to the right indicates full marks.

MCQ/Objective Type Questions

Duration: 30 Minutes Marks:14

Q.1 Choose the correct Answer. **14**

1) A flip-flop is a _____.
a) 1-bit memory cell b) 2-bit memory cell
c) 4-bit memory cell d) 8-bit memory cel

2) Ripple counter is also called _____.
a) Asynchronous counter b) Synchronous counter
c) Ring counter d) Johnson counter

3) Which memory is temporary and volatile?
a) ROM b) PROM
c) RAM d) EPROM

4) PROM stands for _____.
a) Programmable ROM b) Permanent ROM
c) Parallel ROM d) None

5) Convert $(2F)_{16}$ to decimal _____.
a) 46 b) 47
c) 45 d) 44

6) ASCII code is primarily used for _____.
a) Numbers only b) Characters and symbols
c) Images d) Memory addressing

7) Binary division : $(10010)_2 \div (10)_2 =$ _____
a) 1001 b) 1010
c) 1100 d) 1111

8) Which of the following is a universal gate?
a) AND b) OR
c) NAND d) XOR

9) A NOR gate is equivalent to _____.
a) NOT + OR
b) NOT + AND
c) NOT + NAND
d) NOT + XO

10) According to Boolean algebra, A + A = ?
a) A
b) 0
c) 1
d) A'

11) A 4-variable K-map has _____.
a) 8 cells
b) 12 cells
c) 16 cells
d) 32 cells

12) The number of selection lines in a 16-to-1 MUX is _____.
a) 2
b) 4
c) 8
d) 16

13) A 1 -bit comparator has how many outputs?
a) 1
b) 2
c) 3
d) 4

14) Sequential circuits differ from combinational circuits because they _____.
a) Have no memory
b) Depend on past inputs (memory)
c) Use only logic gates
d) Do not require clock

S.Y. (B.Tech.) (Electronics and Telecommunication Engineering) (Semester - I) (New) (NEP CBCS) Examination: March/April – 2026
Fundamentals of Digital Circuits (ECEMDM-01A)

Day & Date: Thursday, 30-04-2026 Max. Marks: 70
Time: 10:00 AM To 01:00 PM

Instructions: 1) Q. No. 1 is compulsory. It should be solved in the first 30 minutes in Answer Book Page no 03 (Starting page of the Answer Book). Each question carries one mark.
2) Don't forget to Mention question paper set (P/Q/R/S) on top of page.
3) Figures to the right indicates full marks.

MCQ/Objective Type Questions

Duration: 30 Minutes Marks:14

Q.1 Choose the correct Answer. **14**

1) According to Boolean algebra, A + A = ?
a) A b) 0
c) 1 d) A'

2) A 4-variable K-map has _____.
a) 8 cells b) 12 cells
c) 16 cells d) 32 cells

3) The number of selection lines in a 16-to-1 MUX is _____.
a) 2 b) 4
c) 8 d) 16

4) A 1 -bit comparator has how many outputs?
a) 1 b) 2
c) 3 d) 4

5) Sequential circuits differ from combinational circuits because they _____.
a) Have no memory
b) Depend on past inputs (memory)
c) Use only logic gates
d) Do not require clock

6) A flip-flop is a _____.
a) 1-bit memory cell b) 2-bit memory cell
c) 4-bit memory cell d) 8-bit memory cel

7) Ripple counter is also called _____.
a) Asynchronous counter b) Synchronous counter
c) Ring counter d) Johnson counter

8) Which memory is temporary and volatile?
a) ROM b) PROM
c) RAM d) EPROM

9) PROM stands for _____.
a) Programmable ROM b) Permanent ROM
c) Parallel ROM d) None

10) Convert $(2F)_{16}$ to decimal _____.
a) 46 b) 47
c) 45 d) 44

11) ASCII code is primarily used for _____.
a) Numbers only b) Characters and symbols
c) Images d) Memory addressing

12) Binary division : $(10010)_2 \div (10)_2 =$ _____
a) 1001 b) 1010
c) 1100 d) 1111

13) Which of the following is a universal gate?
a) AND b) OR
c) NAND d) XOR

14) A NOR gate is equivalent to _____.
a) NOT + OR b) NOT + AND
c) NOT + NAND d) NOT + XO

Seat No.	

Set **S**

S.Y. (B.Tech.) (Electronics and Telecommunication Engineering) (Semester - I) (New) (NEP CBCS) Examination: March/April – 2026
Fundamentals of Digital Circuits (ECEMDM-01A)

Day & Date: Thursday, 30-04-2026 Max. Marks: 56
Time: 10:00 AM To 01:00 PM

Instructions: 1) All questions are compulsory.
2) Figures to the right indicate full marks.

Section – I

Q.2 Attempt the following. (Any Four) **16**

a) Convert the following number system:
i) 1011101 to Gray code
ii) ASCII code for "TEST"

b) Perform following operations:
i) $110101 + 101110$
ii) $111001 - 100101$
iii) $110101 * 101$
iv) $11011/110$

c) Draw the truth tables for AND, OR, XOR and NOT gates

d) Simplify the Boolean expression: $\mathrm{F} = \mathrm{A}(\mathrm{B} + \mathrm{C}) + \mathrm{A}'\mathrm{B}$ using Boolean algebra.

e) Use a Karnaugh map to simplify the function
$F(A, B, C) = \sum(0, 1, 3, 5, 7) + d(2, 4)$

f) Prove De Morgan's theorems.

Q.3 Attempt the following. (Any Two) **12**

a) Define the decimal, binary, octal, and hexadecimal number systems with examples.

b) Describe the operation of XOR and XNOR gates with truth tables.

c) What are SOP and POS forms? Give examples.

Section – II

Q.4 Attempt the following. (Any Four) **16**

a) Design a full subtractor circuit using basic logic gates.

b) What is a comparator? Explain the working of a 4-bit magnitude comparator.

c) Describe the operation of a D flip-flop with timing diagram.

d) What is the difference between a latch and a flip-flop? Give examples.

e) Differentiate between RAM and ROM with examples.

Q.5 Attempt the following. (Any Two) **12**

a) Explain the working of a multiplexer and de-multiplexer with a truth table.

b) Explain the working of SR flip-flop and JK flip-flop and write its excitation table.

c) List and explain types of ROM: PROM, EPROM, and EEPROM.

Seat No.	

Set **P**

S.Y. (B.Tech.) (Mechanical Engineering) (Semester - I) (New) (NEP CBCS) Examination: March/April – 2026
Fundamentals of Digital Circuits (ECEMDM-01A)

Day & Date: Thursday, 30-04-2026 Max. Marks: 70

4) Assume suitable data if required.

MCQ/Objective Type Questions

Duration: 30 Minutes Marks:14

Q.1 Choose the correct answer for the following. **14**

1) IoT devices work _____.
a) Automatically b) Manually
c) Offline d) Individually

2) Sensors belong to _____.
a) Perception layer b) Application
c) Network d) Middleware

3) Edge computing helps to reduce _____.
a) Delay b) Speed
c) Security d) Power

4) Which of the following is *not* an IoT enabling technology?
a) Al b) RFID
c) Cloud d) Compiler

5) IoT gateway is primarily used for _____.
a) Protocol translation b) Display
c) Encryption d) Storage

6) A smart object refers to _____.
a) Connected device b) Manual tool
c) Passive unit d) Switch

7) The most suitable communication model for alert notifications is _____.
a) Publish-Subscribe b) Request-Response
c) Push-Pull d) Peer-to-Peer

8) Which addressing scheme supports a large number of IoT devices?
a) IPv6 b) IPv4
c) MAC d) Static

9) RPL is a routing protocol used for _____.
a) Low power networks b) LAN
c) Cloud d) None

10) CoAP operates over _____.
a) UDP b) TCP
c) HTTP d) FTP

11) Which of the following is a topic-based protocol?
a) MQTT b) AMQP
c) HTTP d) CoAP

12) AMQP ensures reliable delivery using _____.
a) Queue b) Topic
c) Packet d) Ping

13) TLS provides security primarily over _____.
a) TCP b) UDP
c) ICMP d) SMS

14) Which of the following is a major IoT security risk?
a) Weak passwords b) Strong firewalls
c) High bandwidth d) Long range

Time: 03:00 PM To 06:00 PM

Instructions: 1) All questions are compulsory.
2) Figures to the right indicate full marks.

Section – I

Q.2 Answer the following. (Any Four) **16**

a) What is Middleware in IoT? Give one example.

b) Define sensors and actuators with two examples each.

c) Differentiate between Push-Pull and Publish-Subscribe models.

d) Explain the Perception Layer in IoT architecture.

e) What is an embedded system? Discuss its role in IoT applications.

Q.3 Answer the following. (Any Two) **12**

a) Explain all four IoT communication models with a suitable diagram.

b) Compare Request-Response, Publish-Subscribe, and Push-Pull models.

c) Explain the architecture of an embedded IoT device with a block diagram.

Section – II

Q.4 Answer the following. (Any Four) **16**

a) Define MQTT and list any two features.

b) What is the role of RPL in IoT communication?

c) Define DTLS and explain its significance.

d) Explain the concept of “topics” in MQTT.

e) Describe any two security challenges in IoT protocols and suggest mitigation methods.

Q.5 Answer the following. (Any Two) **12**

a) Compare MQTT, AMQP, and HTTP.

b) Explain RPL routing protocol with a neat diagram of DODAG.

c) Describe DTLS architecture and its workflow.

Set **Q**

S.Y. (B.Tech.) (Electronics & Computer Engineering) (Sem - I) (New) (NEP CBCS) Examination: March/April - 2026
AI Technology - (Iot) And Smart Systems (ECEHON-01B)

Day & Date: Wednesday, 13-05-2026 Max. Marks: 70
Time: 03:00 PM To 06:00 PM

Instructions: 1) Q. No. 1 is compulsory. It should be solved in the first 30 minutes in Answer Book Page no 03 (Starting page of the Answer Book). Each question carries one mark.
2) Don't forget to Mention question paper set (P/Q/R/S) on top of page.
3) Figures to the right indicates full marks.
4) Assume suitable data if required.

MCQ/Objective Type Questions

Duration: 30 Minutes Marks:14

Q.1 Choose the correct answer for the following. **14**

1) Which addressing scheme supports a large number of IoT devices?
a) IPv6 b) IPv4
c) MAC d) Static

2) RPL is a routing protocol used for _____.
a) Low power networks b) LAN
c) Cloud d) None

3) CoAP operates over _____.
a) UDP b) TCP
c) HTTP d) FTP

4) Which of the following is a topic-based protocol?
a) MQTT b) AMQP
c) HTTP d) CoAP

5) AMQP ensures reliable delivery using _____.
a) Queue b) Topic
c) Packet d) Ping

6) TLS provides security primarily over _____.
a) TCP b) UDP
c) ICMP d) SMS

7) Which of the following is a major IoT security risk?
a) Weak passwords b) Strong firewalls
c) High bandwidth d) Long range

8) IoT devices work _____.
a) Automatically b) Manually
c) Offline d) Individually

9) Sensors belong to _____.
a) Perception layer b) Application
c) Network d) Middleware

10) Edge computing helps to reduce _____.
a) Delay b) Speed
c) Security d) Power

11) Which of the following is *not* an IoT enabling technology?
a) Al b) RFID
c) Cloud d) Compiler

12) IoT gateway is primarily used for _____.
a) Protocol translation b) Display
c) Encryption d) Storage

13) A smart object refers to _____.
a) Connected device b) Manual tool
c) Passive unit d) Switch

14) The most suitable communication model for alert notifications is _____.
a) Publish-Subscribe b) Request-Response
c) Push-Pull d) Peer-to-Peer

Seat No.

Day & Date: Wednesday, 13-05-2026 Max. Marks: 56
Time: 03:00 PM To 06:00 PM

Instructions: 1) All questions are compulsory.
2) Figures to the right indicate full marks.

Section – I

Q.2 Answer the following. (Any Four) **16**

a) What is Middleware in IoT? Give one example.

b) Define sensors and actuators with two examples each.

c) Differentiate between Push-Pull and Publish-Subscribe models.

d) Explain the Perception Layer in IoT architecture.

e) What is an embedded system? Discuss its role in IoT applications.

Q.3 Answer the following. (Any Two) **12**

a) Explain all four IoT communication models with a suitable diagram.

b) Compare Request-Response, Publish-Subscribe, and Push-Pull models.

c) Explain the architecture of an embedded IoT device with a block diagram.

Section – II

Q.4 Answer the following. (Any Four) **16**

a) Define MQTT and list any two features.

b) What is the role of RPL in IoT communication?

c) Define DTLS and explain its significance.

d) Explain the concept of “topics” in MQTT.

e) Describe any two security challenges in IoT protocols and suggest mitigation methods.

Q.5 Answer the following. (Any Two) **12**

a) Compare MQTT, AMQP, and HTTP.

Answer

Q.1 Solve following Multiple Choice Questions.

1) Value education enables us _____.
a) To understand our needs
b) Visualize our goals correctly
c) Indicate the direction for their fulfillment
d) All of the above

2) One of the basic desires of every human being is to be always _____.
a) Happy b) Sad
c) Laugh d) Earn Money

3) _____ is the basic unit of any human society.
a) Group b) Individual
c) Nature d) Society

4) Natural acceptance & _____ are the two processes of knowing.
a) Self -Actualization b) Self Exploration
c) Self Evaluation d) Self Control

5) Present Education system gives more focus to skills.
a) True b) False
c) May be d) None of the above

6) Value of an entity is _____.
a) Physical Facility
b) Prosperity
c) Its participation in larger order of which it is part
d) Both a and b

7) _____ are as Basic Human Aspirations.
a) Money
b) Relationship without money
c) Physical Facility
d) Continuous Happiness & Prosperity

8) Any course content on value education needs to be _____.
a) Universal b) Rational
c) Natural d) All of above

9) When we live with correct understanding of values, we feel _____.
a) Deprived b) Frustrated
c) Happy d) Unhappy

10) Following are the basic guidelines for value education except _____.
a) Universal b) Personal
c) Rational d) Natural

11) Please give the correct priority for Physical Facilities, Right Understanding and Relationship.
a) Physical Facilities, Right Understanding and Relationship
b) Relationship, Right Understanding and Physical Facilities
c) Right Understanding, Relationship and Physical Facilities
d) None of the above

12) Right Understanding and relationships lead to _____.
a) Mutual Happiness b) Mutual Prosperity
c) Both a and b d) All are wrong

13) Right Understanding and Physical Facilities leads to _____.
a) Mutual Happiness b) Mutual Prosperity
c) Both a and b d) All are wrong

14) ____ are the content of self-exploration.
a) Program b) Desire
c) Both a and b d) None of the above

15) To be in state of liking is _____.
a) Happy b) Unhappy
c) Both a and b d) None of the above

16) _____ helps the human being to transform from Animal consciousness to human consciousness.
a) Physical Facility b) Right understanding
c) Relationship d) All of above

17) _____ is only a means to achieve what is considered valuable for a human being in an effective and efficient manner.

a) Value b) Skill
c) Technology d) All of above

18) _____ means physical facilities more than to satisfy my needs.

a) Health b) Prosperity
c) Happiness d) None of above

19) If something is _____ to us, without any force or compulsion, then it is often correct and does not change with time and people.

a) naturally acceptable b) pushed
c) common d) None of above

20) Physical facilities are necessary and complete for _____.

a) Animal b) Human being
c) Nature d) All of the above

21) Beside physical facilities human being want _____.

a) Name b) Fame
c) Relationship d) None of the above

22) When you are living with pre-conditionings and accumulated desires without evaluating them, then it means that you are _____.

a) Swatantra b) Partantra
c) Prosperous d) None of the above

23) To be in state of _____ is unhappiness.

a) Disharmony b) Contradiction
c) Disharmony or contradiction d) None of the above

24) Which of following leads to variety of problems at different levels of our living?

a) Lack of right understanding of happiness
b) Lack of right understanding of prosperity
c) Lack of right understanding of happiness & prosperity
d) Lack of awareness towards health

25) Working only for physical facilities in living is called _____.

a) Animal Consciousness b) Human Consciousness
c) Rich Consciousness d) None of these

26) Self and _____ are different in nature, materiality, needs and activities.

a) Trust b) Body
c) Belief d) None of the above

27) Sukh and _____ both are needed and can't replace each other.

a) Self b) Body
c) Suvidha d) Belief

28) In value education Sanyama means _____.
a) Self-regulation b) Health
c) Happiness d) Prosperity

29) Sadupyog of the Body mean _____ of the Body.
a) Self-regulation b) Care
c) Happiness d) Right utilization

30) Knowing means having the _____.
a) Assumption b) Right understanding
c) Right feeling d) None of the above

31) Each human being is co-existence of the _____ and the _____.
a) self, self b) body, body
c) self, body d) None of the above

32) _____ is the feeling of responsibility for nurturing, protecting and right utilizing the body.
a) Swasthya b) Sanyam
c) Prosperity d) None of the above

33) The system of the body works in a _____ way.
a) Happy b) Self organized
c) Random d) Independent

34) The self is _____ in nature while body is _____ in nature.
a) Unconscious, Physico-chemical
b) Conscious, Physico-chemical
c) Physico-chemical, Conscious
d) Physico-chemical, Unconscious

35) The activity of desire, thought and expecting together is called as _____.
a) Body b) Health
c) Imagination d) Future

36) Harmony should be maintained in _____.
a) Between body and life
b) Between self and society
c) Between life and environment
d) All the above

37) Sah-astitva means _____.
a) Co-existence b) Co-operation
c) Co-ordination d) Corporate identity

38) The process of education and right living leads to _____ in the individual.

a) Right understanding b) Health
c) Prosperity d) None of the above

39) Ensuring justice in the relationship, on the basis of values leads to _____ in society.

a) Fearlessness b) Confusion
c) Confidence d) Fear

40) _____ is the foundational value in relationship.

a) Respect b) Love
c) Trust d) Glory

41) To be assured of others at all time is the feeling of _____.

a) Respect b) Love
c) Trust d) Glory

42) _____ is the feeling for someone who has made efforts for excellence.

a) Reverence b) Glory
c) Gratitude d) Guidance

43) _____ is the feeling of acceptance for those who have made efforts for my excellence.

a) Reverence b) Glory
c) Gratitude d) Guidance

44) The feeling of relatedness to all human beings is called _____.

a) Love b) Affection
c) Gratitude d) Respect

45) All the units of nature can be classified into _____ orders.

a) Two b) Three
c) Four d) Six

46) Which of the following does not form an order in nature?

a) Bio b) Animal
c) Consciousness d) Human

47) Which of the following statement is not true?

a) There is interconnectedness in nature
b) There is recyclability and self-regulation in nature
c) There is struggle for survival in nature
d) There is mutual fulfillment in nature

48) Harmony in the family is the building block for harmony in the _____.

a) society b) individual
c) friend d) relative

49) _____ in the family means that the family is able to identify its needs.

a) wealth
b) prosperity
c) harmony
d) happiness

50) _____ means right evaluation.

a) Respect
b) Love
c) Trust
d) Glory

S.Y. (B.Tech.) (Electronics & Computer Engineering) (Semester - I) (New) (NEP CBCS) Examination: March/April – 2026
Universal Human Values (VEC-01)

Day & Date: Friday, 15-05-2026 Max. Marks: 50
Time: 03:00 PM To 04:30 PM

Instructions: 1) All questions are compulsory.
2) Figures to the right indicate full marks.
3) Mention Question Paper Set (P/Q/R/S) on Top of Page.

Answer

Q.1 Solve following Multiple Choice Questions.

1) To be assured of others at all time is the feeling of _____.
a) Respect b) Love
c) Trust d) Glory

2) _____ is the feeling for someone who has made efforts for excellence.
a) Reverence b) Glory
c) Gratitude d) Guidance

3) _____ is the feeling of acceptance for those who have made efforts for my excellence.
a) Reverence b) Glory
c) Gratitude d) Guidance

4) The feeling of relatedness to all human beings is called _____.
a) Love b) Affection
c) Gratitude d) Respect

5) All the units of nature can be classified into _____ orders.
a) Two b) Three
c) Four d) Six

6) Which of the following does not form an order in nature?
a) Bio b) Animal
c) Consciousness d) Human

7) Which of the following statement is not true?
a) There is interconnectedness in nature
b) There is recyclability and self-regulation in nature
c) There is struggle for survival in nature
d) There is mutual fulfillment in nature

8) Harmony in the family is the building block for harmony in the _____.
a) society b) individual
c) friend d) relative

9) _____ in the family means that the family is able to identify its needs.
a) wealth b) prosperity
c) harmony d) happiness

10) _____ means right evaluation.
a) Respect b) Love
c) Trust d) Glory

11) Value education enables us _____.
a) To understand our needs
b) Visualize our goals correctly
c) Indicate the direction for their fulfillment
d) All of the above

12) One of the basic desires of every human being is to be always _____.
a) Happy b) Sad
c) Laugh d) Earn Money

13) _____ is the basic unit of any human society.
a) Group b) Individual
c) Nature d) Society

14) Natural acceptance & _____ are the two processes of knowing.
a) Self -Actualization b) Self Exploration
c) Self Evaluation d) Self Control

15) Present Education system gives more focus to skills.
a) True b) False
c) May be d) None of the above

16) Value of an entity is _____.
a) Physical Facility
b) Prosperity
c) Its participation in larger order of which it is part
d) Both a and b

17) _____ are as Basic Human Aspirations.
a) Money
b) Relationship without money
c) Physical Facility
d) Continuous Happiness & Prosperity

18) Any course content on value education needs to be _____.
a) Universal b) Rational
c) Natural d) All of above

19) When we live with correct understanding of values, we feel _____.
a) Deprived b) Frustrated
c) Happy d) Unhappy

20) Following are the basic guidelines for value education except _____.
a) Universal b) Personal
c) Rational d) Natural

21) Please give the correct priority for Physical Facilities, Right Understanding and Relationship.
a) Physical Facilities, Right Understanding and Relationship
b) Relationship, Right Understanding and Physical Facilities
c) Right Understanding, Relationship and Physical Facilities
d) None of the above

22) Right Understanding and relationships lead to _____.
a) Mutual Happiness b) Mutual Prosperity
c) Both a and b d) All are wrong

23) Right Understanding and Physical Facilities leads to _____.
a) Mutual Happiness b) Mutual Prosperity
c) Both a and b d) All are wrong

24) ____ are the content of self-exploration.
a) Program b) Desire
c) Both a and b d) None of the above

25) To be in state of liking is _____.
a) Happy b) Unhappy
c) Both a and b d) None of the above

26) _____ helps the human being to transform from Animal consciousness to human consciousness.
a) Physical Facility b) Right understanding
c) Relationship d) All of above

27) _____ is only a means to achieve what is considered valuable for a human being in an effective and efficient manner.
a) Value b) Skill
c) Technology d) All of above

28) _____ means physical facilities more than to satisfy my needs.
a) Health b) Prosperity
c) Happiness d) None of above

29) If something is _____ to us, without any force or compulsion, then it is often correct and does not change with time and people.
a) naturally acceptable b) pushed
c) common d) None of above

30) Physical facilities are necessary and complete for _____.
a) Animal b) Human being
c) Nature d) All of the above

31) Beside physical facilities human being want _____.
a) Name b) Fame
c) Relationship d) None of the above

32) When you are living with pre-conditionings and accumulated desires without evaluating them, then it means that you are _____.
a) Swatantra b) Partantra
c) Prosperous d) None of the above

33) To be in state of _____ is unhappiness.
a) Disharmony b) Contradiction
c) Disharmony or contradiction d) None of the above

34) Which of following leads to variety of problems at different levels of our living?
a) Lack of right understanding of happiness
b) Lack of right understanding of prosperity
c) Lack of right understanding of happiness & prosperity
d) Lack of awareness towards health

35) Working only for physical facilities in living is called _____.
a) Animal Consciousness b) Human Consciousness
c) Rich Consciousness d) None of these

36) Self and _____ are different in nature, materiality, needs and activities.
a) Trust b) Body
c) Belief d) None of the above

37) Sukh and _____ both are needed and can't replace each other.
a) Self b) Body
c) Suvidha d) Belief

38) In value education Sanyama means _____.
a) Self-regulation b) Health
c) Happiness d) Prosperity

39) Sadupyog of the Body mean _____ of the Body.
a) Self-regulation b) Care
c) Happiness d) Right utilization

40) Knowing means having the _____.
a) Assumption b) Right understanding
c) Right feeling d) None of the above

41) Each human being is co-existence of the _____ and the _____.
a) self, self b) body, body
c) self, body d) None of the above

42) _____ is the feeling of responsibility for nurturing, protecting and right utilizing the body.
a) Swasthya b) Sanyam
c) Prosperity d) None of the above

43) The system of the body works in a _____ way.
a) Happy b) Self organized
c) Random d) Independent

44) The self is _____ in nature while body is _____ in nature.
a) Unconscious, Physico-chemical
b) Conscious, Physico-chemical
c) Physico-chemical, Conscious
d) Physico-chemical, Unconscious

45) The activity of desire, thought and expecting together is called as _____.
a) Body b) Health
c) Imagination d) Future

46) Harmony should be maintained in _____.
a) Between body and life
b) Between self and society
c) Between life and environment
d) All the above

47) Sah-astitva means _____.
a) Co-existence b) Co-operation
c) Co-ordination d) Corporate identity

48) The process of education and right living leads to _____ in the individual.
a) Right understanding b) Health
c) Prosperity d) None of the above

49) Ensuring justice in the relationship, on the basis of values leads to _____ in society.

a) Fearlessness
b) Confusion
c) Confidence
d) Fear

50) _____ is the foundational value in relationship.

a) Respect
b) Love
c) Trust
d) Glory

Answer

Q.1 Solve following Multiple Choice Questions.

1) Please give the correct priority for Physical Facilities, Right Understanding and Relationship.
a) Physical Facilities, Right Understanding and Relationship
b) Relationship, Right Understanding and Physical Facilities
c) Right Understanding, Relationship and Physical Facilities
d) None of the above

2) Right Understanding and relationships lead to _____.
a) Mutual Happiness b) Mutual Prosperity
c) Both a and b d) All are wrong

3) Right Understanding and Physical Facilities leads to _____.
a) Mutual Happiness b) Mutual Prosperity
c) Both a and b d) All are wrong

4) ____ are the content of self-exploration.
a) Program b) Desire
c) Both a and b d) None of the above

5) To be in state of liking is _____.
a) Happy b) Unhappy
c) Both a and b d) None of the above

6) _____ helps the human being to transform from Animal consciousness to human consciousness.
a) Physical Facility b) Right understanding
c) Relationship d) All of above

7) _____ is only a means to achieve what is considered valuable for a human being in an effective and efficient manner.
a) Value b) Skill
c) Technology d) All of above

8) _____ means physical facilities more than to satisfy my needs.
a) Health b) Prosperity
c) Happiness d) None of above

9) If something is _____ to us, without any force or compulsion, then it is often correct and does not change with time and people.
a) naturally acceptable b) pushed
c) common d) None of above

10) Physical facilities are necessary and complete for _____.
a) Animal b) Human being
c) Nature d) All of the above

11) Beside physical facilities human being want _____.
a) Name b) Fame
c) Relationship d) None of the above

12) When you are living with pre-conditionings and accumulated desires without evaluating them, then it means that you are _____.
a) Swatantra b) Partantra
c) Prosperous d) None of the above

13) To be in state of _____ is unhappiness.
a) Disharmony b) Contradiction
c) Disharmony or contradiction d) None of the above

14) Which of following leads to variety of problems at different levels of our living?
a) Lack of right understanding of happiness
b) Lack of right understanding of prosperity
c) Lack of right understanding of happiness & prosperity
d) Lack of awareness towards health

15) Working only for physical facilities in living is called _____.
a) Animal Consciousness b) Human Consciousness
c) Rich Consciousness d) None of these

16) Self and _____ are different in nature, materiality, needs and activities.
a) Trust b) Body
c) Belief d) None of the above

17) Sukh and _____ both are needed and can't replace each other.
a) Self b) Body
c) Suvidha d) Belief

18) In value education Sanyama means _____.

a) Self-regulation b) Health
c) Happiness d) Prosperity

19) Sadupyog of the Body mean _____ of the Body.

a) Self-regulation b) Care
c) Happiness d) Right utilization

20) Knowing means having the _____.

a) Assumption b) Right understanding
c) Right feeling d) None of the above

21) Each human being is co-existence of the _____ and the _____.

a) self, self b) body, body
c) self, body d) None of the above

22) _____ is the feeling of responsibility for nurturing, protecting and right utilizing the body.

a) Swasthya b) Sanyam
c) Prosperity d) None of the above

23) The system of the body works in a _____ way.

a) Happy b) Self organized
c) Random d) Independent

24) The self is _____ in nature while body is _____ in nature.

a) Unconscious, Physico-chemical
b) Conscious, Physico-chemical
c) Physico-chemical, Conscious
d) Physico-chemical, Unconscious

25) The activity of desire, thought and expecting together is called as _____.

a) Body b) Health
c) Imagination d) Future

26) Harmony should be maintained in _____.

a) Between body and life
b) Between self and society
c) Between life and environment
d) All the above

27) Sah-astitva means _____.

a) Co-existence b) Co-operation
c) Co-ordination d) Corporate identity

28) The process of education and right living leads to _____ in the individual.
a) Right understanding b) Health
c) Prosperity d) None of the above

29) Ensuring justice in the relationship, on the basis of values leads to _____ in society.
a) Fearlessness b) Confusion
c) Confidence d) Fear

30) _____ is the foundational value in relationship.
a) Respect b) Love
c) Trust d) Glory

31) To be assured of others at all time is the feeling of _____.
a) Respect b) Love
c) Trust d) Glory

32) _____ is the feeling for someone who has made efforts for excellence.
a) Reverence b) Glory
c) Gratitude d) Guidance

33) _____ is the feeling of acceptance for those who have made efforts for my excellence.
a) Reverence b) Glory
c) Gratitude d) Guidance

34) The feeling of relatedness to all human beings is called _____.
a) Love b) Affection
c) Gratitude d) Respect

35) All the units of nature can be classified into _____ orders.
a) Two b) Three
c) Four d) Six

36) Which of the following does not form an order in nature?
a) Bio b) Animal
c) Consciousness d) Human

37) Which of the following statement is not true?
a) There is interconnectedness in nature
b) There is recyclability and self-regulation in nature
c) There is struggle for survival in nature
d) There is mutual fulfillment in nature

38) Harmony in the family is the building block for harmony in the _____.
a) society b) individual
c) friend d) relative

39) _____ in the family means that the family is able to identify its needs.

a) wealth b) prosperity
c) harmony d) happiness

40) _____ means right evaluation.

a) Respect b) Love
c) Trust d) Glory

41) Value education enables us _____.

a) To understand our needs
b) Visualize our goals correctly
c) Indicate the direction for their fulfillment
d) All of the above

42) One of the basic desires of every human being is to be always _____.

a) Happy b) Sad
c) Laugh d) Earn Money

43) _____ is the basic unit of any human society.

a) Group b) Individual
c) Nature d) Society

44) Natural acceptance & _____ are the two processes of knowing.

a) Self -Actualization b) Self Exploration
c) Self Evaluation d) Self Control

45) Present Education system gives more focus to skills.

a) True b) False
c) May be d) None of the above

46) Value of an entity is _____.

a) Physical Facility
b) Prosperity
c) Its participation in larger order of which it is part
d) Both a and b

47) _____ are as Basic Human Aspirations.

a) Money
b) Relationship without money
c) Physical Facility
d) Continuous Happiness & Prosperity

48) Any course content on value education needs to be _____.

a) Universal b) Rational
c) Natural d) All of above

49) When we live with correct understanding of values, we feel _____.

a) Deprived b) Frustrated

c) Happy d) Unhappy

50) Following are the basic guidelines for value education except _____.

a) Universal b) Personal

c) Rational d) Natural

S.Y. (B.Tech.) (Electronics & Computer Engineering) (Semester - II) (New) (NEP CBCS) Examination: March/April – 2026
Computer Architecture and Organization (ECEPCC-04)

Day & Date: Saturday, 16-05-2026 Max. Marks: 70
Time: 03:00 PM To 06:00 PM

Instructions: 1) Q. No. 1 is compulsory. It should be solved in the first 30 minutes in Answer Book Page no 03 (Starting page of the Answer Book). Each question carries one mark.
2) Don't forget to Mention question paper set (P/Q/R/S) on top of page.
3) Figures to the right indicates full marks.
4) Assume suitable data if necessary and mention it clearly.

MCQ/Objective Type Questions

Duration: 30 Minutes Marks:14

Q.1 Multiple choice questions. **14**

1) The basic model of a computer system is based on _____.
a) Harvard architecture b) Von Neumann architecture
c) Parallel architecture d) Distributed system

2) CPI stands for _____.
a) Clock per instruction
b) Cycles per instruction
c) Central processing index
d) Control processing instruction

3) RISC architecture typically has _____.
a) Complex instructions b) Variable instruction length
c) Large number of registers d) Microprogrammed control

4) Which operation is NOT performed by ALU?
a) Arithmetic operations b) Logic operations
c) Control operations d) Shift operations

5) Floating-point numbers are represented using _____.
a) Only mantissa b) Only exponent
c) Mantissa and exponent d) Binary integers

6) Hardwired control unit is _____.
a) Slower than microprogrammed
b) Faster but less flexible
c) More flexible
d) Software-based

7) The first stage of instruction cycle is _____.
a) Decode
b) Execute
c) Fetch
d) Store

8) Cache memory is used to _____.
a) Increase storage capacity
b) Reduce access time
c) Replace RAM
d) Store permanent data

9) Direct mapping technique uses _____.
a) One-to-many mapping
b) Many-to-one mapping
c) One-to-one mapping
d) Fully associative mapping

10) TLB is used in _____.
a) Cache memory
b) Virtual memory
c) ALU
d) Control unit

11) Paging eliminates _____.
a) External fragmentation
b) Internal fragmentation
c) Both
d) None

12) Pipeline hazard due to data dependency is called _____.
a) Structural hazard
b) Data hazard
c) Control hazard
d) Memory hazard

13) DMA stands for _____.
a) Direct Memory Access
b) Data Memory Allocation
c) Dynamic Memory Access
d) Direct Module Access

14) Interrupt driven I/O is better than programmed I/O because _____.
a) CPU continuously checks device
b) CPU is free during I/O operation
c) No hardware required
d) Slower execution

Time: 03:00 PM To 06:00 PM

Instructions: 1) All questions are compulsory.
2) Figures to the right indicate full marks.

SECTION – I

Q.2 Answer Any Four questions. **16**

a) Explain Von Neumann architecture with diagram.

b) Compare CISC and RISC architectures.

c) Define and derive expression for execution time

d) Explain design of ALU for addition and subtraction.

e) Explain floating-point number representation

Q.3 Answer Any Two questions. **12**

a) Explain performance metrics: Clock rate, CPI, MIPS with examples.

b) Explain instruction cycle with neat diagram.

c) Compare hardwired and microprogrammed control units.

SECTION – II

Q.4 Answer Any Four questions. **16**

a) Explain memory hierarchy with diagram.

b) Explain cache mapping techniques.

c) Define paging and segmentation.

d) Explain different pipeline hazards.

e) Explain programmed I/O and interrupt-driven I/O.

Q.5 Answer Any Two questions. **12**

a) Explain cache replacement and write policies.

b) Explain virtual memory and working of TLB.

c) Explain instruction pipelining with diagram and hazards.

c) More flexible
d) Software-based

2) The first stage of instruction cycle is _____.
a) Decode b) Execute
c) Fetch d) Store

3) Cache memory is used to _____.
a) Increase storage capacity b) Reduce access time
c) Replace RAM d) Store permanent data

4) Direct mapping technique uses _____.
a) One-to-many mapping b) Many-to-one mapping
c) One-to-one mapping d) Fully associative mapping

5) TLB is used in _____.
a) Cache memory b) Virtual memory
c) ALU d) Control unit

6) Paging eliminates _____.
a) External fragmentation b) Internal fragmentation
c) Both d) None

7) Pipeline hazard due to data dependency is called _____.
a) Structural hazard b) Data hazard
c) Control hazard d) Memory hazard

8) DMA stands for _____.
a) Direct Memory Access
b) Data Memory Allocation
c) Dynamic Memory Access
d) Direct Module Access

9) Interrupt driven I/O is better than programmed I/O because _____.
a) CPU continuously checks device
b) CPU is free during I/O operation
c) No hardware required
d) Slower execution

10) The basic model of a computer system is based on _____.
a) Harvard architecture
b) Von Neumann architecture
c) Parallel architecture
d) Distributed system

11) CPI stands for _____.
a) Clock per instruction
b) Cycles per instruction
c) Central processing index
d) Control processing instruction

12) RISC architecture typically has _____.
a) Complex instructions
b) Variable instruction length
c) Large number of registers
d) Microprogrammed control

13) Which operation is NOT performed by ALU?
a) Arithmetic operations
b) Logic operations
c) Control operations
d) Shift operations

14) Floating-point numbers are represented using _____.
a) Only mantissa
b) Only exponent
c) Mantissa and exponent
d) Binary integers

Seat No.		Set	S

S.Y. (B.Tech.) (Electronics & Computer Engineering) (Semester - II) (New) (NEP CBCS) Examination: March/April – 2026
Computer Architecture and Organization (ECEPCC-04)

Day & Date: Saturday, 16-05-2026 Max. Marks: 56
Time: 03:00 PM To 06:00 PM

Instructions: 1) All questions are compulsory.
2) Figures to the right indicate full marks.

SECTION – I

Q.2 Answer Any Four questions. **16**

a) Explain Von Neumann architecture with diagram.

b) Compare CISC and RISC architectures.

c) Define and derive expression for execution time

d) Explain design of ALU for addition and subtraction.

e) Explain floating-point number representation

Q.3 Answer Any Two questions. **12**

a) Explain performance metrics: Clock rate, CPI, MIPS with examples.

b) Explain instruction cycle with neat diagram.

c) Compare hardwired and microprogrammed control units.

SECTION – II

Q.4 Answer Any Four questions. **16**

a) Explain memory hierarchy with diagram.

b) Explain cache mapping techniques.

c) Define paging and segmentation.

d) Explain different pipeline hazards.

e) Explain programmed I/O and interrupt-driven I/O.

Q.5 Answer Any Two questions. **12**

a) Explain cache replacement and write policies.

b) Explain virtual memory and working of TLB.

c) Explain instruction pipelining with diagram and hazards.

Set P

S.Y. (B.Tech.) (Electronics & Computer Engineering) (Semester - II) (New) (NEP CBCS) Examination: March/April - 2026
Network Theory and Linear Integrated Circuits (ECEPCC-05)

Day & Date: Tuesday, 19-05-2026 Max. Marks: 70
Time: 03:00 PM To 06:00 PM

Instructions: 1) Q. No. 1 is compulsory. It should be solved in the first 30 minutes in Answer Book Page no 03 (Starting page of the Answer Book). Each question carries one mark
2) Don't forget to Mention question paper set (P/Q/R/S) on top on page.
3) Figures to the right indicates full marks.
4) Assume suitable data if necessary.

MCQ/Objective Type Questions

Duration: 30 Minutes Marks:14

Q.1 Choose the correct answer. **14**

1) In mesh analysis, KVL is applied to _____.
a) Nodes b) Meshes
c) Branches d) Junctions

2) Superposition theorem cannot be applied to _____.
a) Voltage b) Current
c) Power d) Resistance

3) The internal resistance in Thevenin's theorem is _____.
a) Load resistance
b) Source resistance
c) Equivalent resistance seen from terminals
d) Zero

4) The unit of admittance is _____.
a) Ohm b) Siemens
c) Henry d) Farad

5) Inductive reactance increases with _____.
a) Resistance b) Frequency
c) Capacitance d) Voltage

6) At resonance in series RLC circuit, current is _____.
a) Minimum b) Maximum
c) Zero d) Constant

7) In Bode plot, phase is measured in _____.
a) Radians only b) Degrees
c) Volts d) Hertz

8) Y-parameters relate _____.
a) Voltage to voltage b) Current to current
c) Voltage to current d) Power to voltage

9) For a symmetrical network _____.
a) $Z_{11} = Z_{22}$ b) $Z_{12} = Z_{21}$
c) $Y_{12} = Y_{21}$ d) $h_{11} = h_{22}$

10) Ideal Op-Amp has offset voltage _____.
a) Infinite b) Zero
c) High d) Variable

11) Slew rate affects _____.
a) DC gain b) High-frequency response
c) Resistance d) Current

12) Differentiator output is proportional to _____.
a) Integral of input b) Derivative of input
c) Square of input d) Constant

13) Comparator output is _____.
a) Analog b) Digital (high/low)
c) Sinusoidal d) Triangular

14) Low-pass filter attenuates _____.
a) Low frequency b) High frequency
c) All frequencies d) No frequency

Network Theory and Linear Integrated Circuits (ECEPCC-05)

Day & Date: Tuesday, 19-05-2026 Max. Marks: 56
Time: 03:00 PM To 06:00 PM

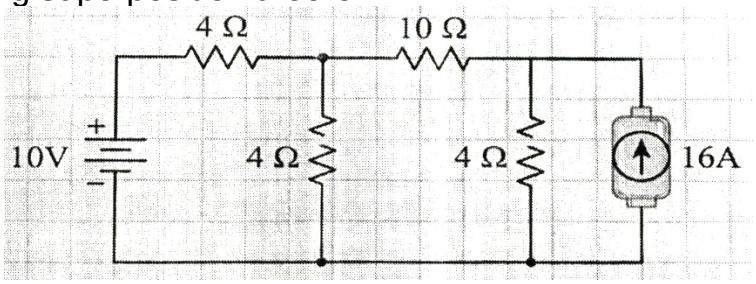
Instructions: 1) All questions are compulsory.
2) Figures to the right indicate full marks.
3) Assume suitable data if necessary.

SECTION – I

Q.2 Attempt Any Four. **16**

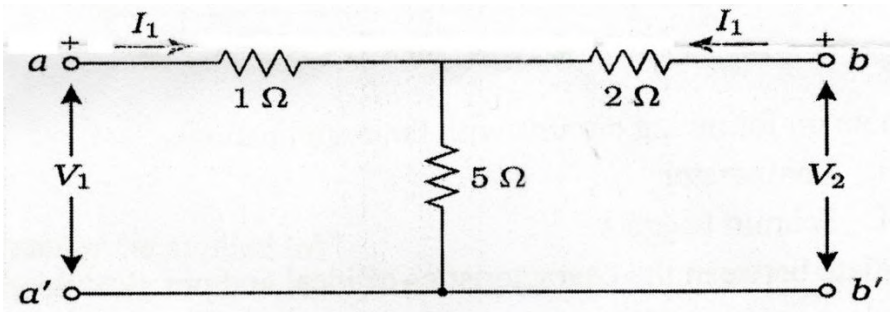
a) State and explain Kirchhoff's Current Law (KCL) and Kirchhoff's Voltage Law (KVL).

b) Determine current flowing through 10 Ω resistor of the following circuit using superposition theorem.

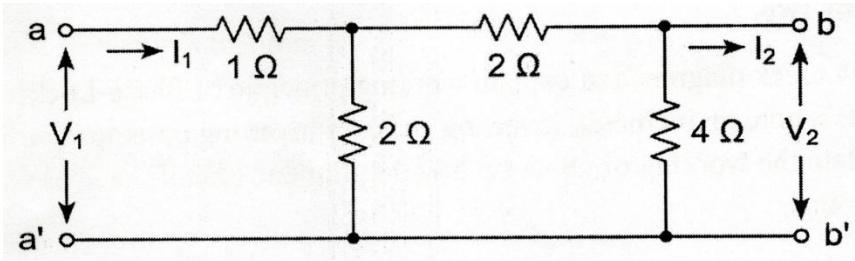


c) Derive an expression of resonant frequency for a RLC parallel resonance circuit.

d) Derive ABCD-parameter equations for two-port network in terms of voltages & currents. Find the ABCD parameter of the network shown below-



e) Derive Y-parameter equations for two-port network in terms of voltages & currents. Find the Y parameter of the network shown below-



Q.3 Attempt Any Two. **12**

a) Write Steps of Mesh Analysis and determine the mesh current I1 in the circuit shown in fig. 2.29

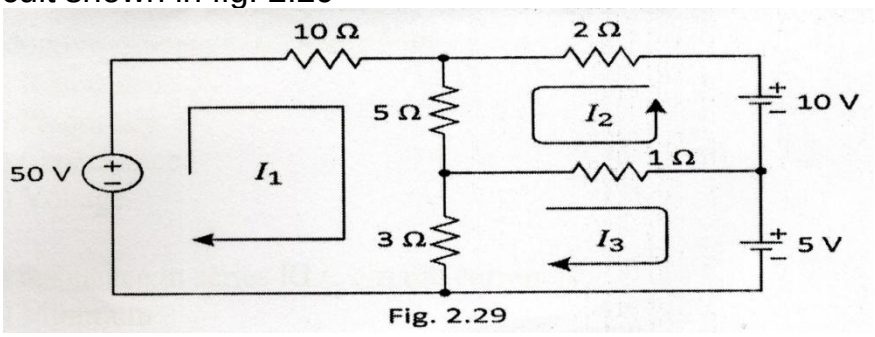


Fig. 2.29

b) Derive an expression of resonant frequency, upper & lower half power frequencies, Bandwidth and Quality factor for a series circuit.

c) Explain interconnection of two port networks. Write application of two port networks.

SECTION – II

Q.4 Attempt Any Four. **16**

a) Referring to Fig. 8.14, design an adjustable positive voltage regulator using LM317 for an output voltage V, varying from 4 to 12 V and an output current I of 1 A

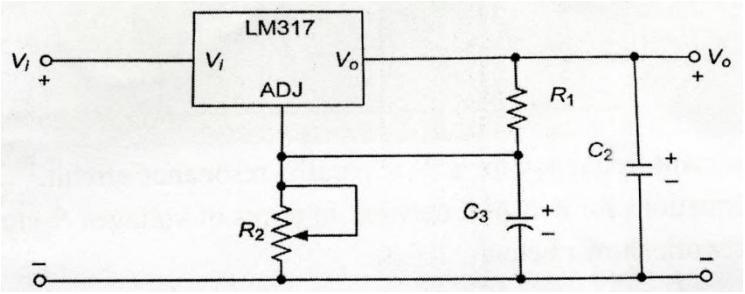

Fig. 8.14, LM317 adjustable positive voltage regulator

b) Write a note on following circuits with their applications -

i) Comparator

ii) Schmitt triggers

c) Differentiate between the characteristics of ideal and practical operational amplifiers (Op-Amps).

d) Explain the working of Wien bridge oscillator and derive the condition for oscillation.

e) Explain the working of band-pass and band-stop filters with suitable diagrams.

Q.5 Attempt Any Two. **12**

a) Draw block diagram and explain working principle of Phase-Locked Loops (PLL).

b) Write a note on including inverting and non-inverting op-amps configurations.

c) Explain the working of Op-Amp based arithmetic circuits such as adder and subtractor with neat diagrams.

4) Assume suitable data if necessary.

MCQ/Objective Type Questions

Duration: 30 Minutes Marks:14

Q.1 Choose the correct answer. **14**

1) Which of the following is the correct way to declare a multi-dimensional array in Java?

a) int[] arr = new int[3][3]
b) int arr[][] = new int[3][3]
c) int[][] arr = new int[3][3]
d) Both b and c

2) What is the output?

```
class Test {
  public static void main(String[] args) {
    String s = "Hello World";
 System.out.println(s.toLowerCase());
  }
 }
```

a) Hello World
b) hello world
c) HELLO WORLD
d) Error

3) Which concept allows one class to acquire the properties of another class?

a) Encapsulation
b) Polymorphism
c) Inheritance
d) Abstraction

4) What is the size of int data type in Java?

a) 2 bytes
b) 4 bytes
c) 8 bytes
d) 1 byte

5) Which exception is thrown when dividing by zero in Java?

a) NullPointerException
b) ArithmeticException
c) ArrayIndexOutOfBoundsException
d) ClassCastException

6) Which of the following is used to define a constant in Java?

a) static
b) final
c) const
d) fixed

7) What does the 'super' keyword refer to in Java?

a) Current class object
b) Parent class object
c) Interface
d) Static method

8) What is the output?

```
class Demo {
  public static void main(String[] args) {
for(int i = 1; i <= 5; i++) {
System.out.print(i + " ");
    }
   }
 }
```

a) 1 2 3 4 5
b) 0 1 2 3 4
c) 2 4 6 8 10
d) Error

9) Which collection allows duplicate elements and maintains insertion order?

a) HashSet
b) TreeSet
c) ArrayList
d) HashMap

10) Which method is used to start a thread in Java?

a) run()
b) begin()
c) start()
d) init()

11) What is the default value of an int variable in Java?

a) Null
b) 1
c) 0
d) -1

12) Which Swing component is used to display a single line of text input?

a) JTextArea
b) JLable
c) JTextField
d) JButton

13) Which port does HTTP use by default?

a) 21
b) 80
c) 443
d) 8080

14) What is the output?

```
class Program {
  public static void main(String[] args) {
    String a = "Java";
    String b = "Java";
System.out.println(a.equals(b));
   }
 }
```

a) True
b) False
c) Error
d) 0

2) Figures to the right indicate full marks.
3) Assume suitable data if necessary.

SECTION – I

Q.2 Attempt Any Three. **12**

a) Explain Character Streams and Buffered Streams in Java.

b) Write a Java program to check whether a given number is Armstrong number or not.

c) Explain the concept of Encapsulation in Java with example.

d) Explain Chained Exceptions in Java with example.

Q.3 Attempt Any Two. **16**

a) Explain Abstract Classes and Interfaces in Java with suitable examples and differences.

b) Explain Access Modifiers in Java. Describe public, private, protected, and default with examples.

c) Write a Java program to demonstrate method overriding and method overloading.

SECTION – II

Q.4 Attempt Any Three. **12**

a) Explain Searching and Sorting of Arrays of primitive data types with example.

b) Explain the following with example:
i) InetAddress
ii) Socket (TCP communication)

c) Explain Thread Scheduling and Thread Priority in Java.

d) Explain Swing Events and Event Listeners. Write a program for button click event.

Q.5 Attempt Any Two. **16**

a) Explain the Java Collections Framework. Describe List, Set, Map and the role of Iterator in traversing collections.

b) Explain Multithreading in Java. Describe Thread creation using Thread class and Runnable interface with examples.

c) Explain Swing Layout Managers: FlowLayout, BorderLayout, GridLayout with suitable examples.

Time: 03:00 PM To 06:00 PM

Instructions: 1) Q. No. 1 is compulsory. It should be solved in the first 30 minutes in Answer Book Page no 03 (Starting page of the Answer Book). Each question carries one mark
2) Don't forget to Mention question paper set (P/Q/R/S) on top on page.
3) Figures to the right indicates full marks.
4) Assume suitable data if necessary.

MCQ/Objective Type Questions

Duration: 30 Minutes Marks:14

Q.1 Choose the correct answer. **14**

1) What is the output?

```
class Demo {
  public static void main(String[] args) {
for(int i = 1; i <= 5; i++) {
System.out.print(i + " ");
    }
   }
 }
```

a) 1 2 3 4 5 b) 0 1 2 3 4
c) 2 4 6 8 10 d) Error

2) Which collection allows duplicate elements and maintains insertion order?
a) HashSet b) TreeSet
c) ArrayList d) HashMap

3) Which method is used to start a thread in Java?
a) run() b) begin()
c) start() d) init()

4) What is the default value of an int variable in Java?
a) Null b) 1
c) 0 d) -1

5) Which Swing component is used to display a single line of text input?
a) JTextArea b) JLable
c) JTextField d) JButton

6) Which port does HTTP use by default?
a) 21 b) 80
c) 443 d) 8080

7) What is the output?

```
class Program {
  public static void main(String[] args) {
    String a = "Java";
    String b = "Java";
System.out.println(a.equals(b));
  }
 }
```

a) True
b) False
c) Error
d) 0

8) Which of the following is the correct way to declare a multi-dimensional array in Java?

a) int[] arr = new int[3][3]
b) int arr[][] = new int[3][3]
c) int[][] arr = new int[3][3]
d) Both b and c

9) What is the output?

```
class Test {
  public static void main(String[] args) {
    String s = "Hello World";
 System.out.println(s.toLowerCase());
  }
 }
```

a) Hello World
b) hello world
c) HELLO WORLD
d) Error

10) Which concept allows one class to acquire the properties of another class?

a) Encapsulation
b) Polymorphism
c) Inheritance
d) Abstraction

11) What is the size of int data type in Java?

a) 2 bytes
b) 4 bytes
c) 8 bytes
d) 1 byte

12) Which exception is thrown when dividing by zero in Java?

a) NullPointerException
b) ArithmeticException
c) ArrayIndexOutOfBoundsException
d) ClassCastException

13) Which of the following is used to define a constant in Java?

a) static
b) final
c) const
d) fixed

14) What does the 'super' keyword refer to in Java?

a) Current class object
b) Parent class object
c) Interface
d) Static method

Seat No.	

Set **Q**

S.Y. (B.Tech.) (Electronics & Computer Engineering) (Semester - II) (New) (NEP CBCS) Examination: March/April - 2026
Object Oriented Programming (ECEPCC-06)

Day & Date: Thursday, 21-05-2026 Max. Marks: 56
Time: 03:00 PM To 06:00 PM

Instructions: 1) All questions are compulsory.
2) Figures to the right indicate full marks.
3) Assume suitable data if necessary.

SECTION – I

Q.2 Attempt Any Three. **12**

a) Explain Character Streams and Buffered Streams in Java.

b) Write a Java program to check whether a given number is Armstrong number or not.

c) Explain the concept of Encapsulation in Java with example.

d) Explain Chained Exceptions in Java with example.

Q.3 Attempt Any Two. **16**

a) Explain Abstract Classes and Interfaces in Java with suitable examples and differences.

b) Explain Access Modifiers in Java. Describe public, private, protected, and default with examples.

c) Write a Java program to demonstrate method overriding and method overloading.

SECTION – II

Q.4 Attempt Any Three. **12**

a) Explain Searching and Sorting of Arrays of primitive data types with example.

b) Explain the following with example:
i) InetAddress
ii) Socket (TCP communication)

c) Explain Thread Scheduling and Thread Priority in Java.

d) Explain Swing Events and Event Listeners. Write a program for button click event.

Q.5 Attempt Any Two. **16**

a) Explain the Java Collections Framework. Describe List, Set, Map and the role of Iterator in traversing collections.

b) Explain Multithreading in Java. Describe Thread creation using Thread class and Runnable interface with examples.

c) Explain Swing Layout Managers: FlowLayout, BorderLayout, GridLayout with suitable examples.

Seat No.	

Set **R**

Q.1 Choose Correct answer MCQ/ Objective Questions. 14

1) Innovation provides _____.
a) Stability b) Competitive advantage
c) Similarity d) Confusion

2) Managerial competency involves _____.
a) Fundraising only
b) Communication, planning, and leadership
c) Imitation
d) None

3) Entrepreneurship as a style of management focuses on _____.
a) Routine activities
b) Risk avoidance
c) Innovation and opportunity recognition
d) Only HR

4) A corporate entrepreneur is _____.
a) Owner of small business
b) Government employee
c) Innovator within an organization
d) None

5) Technology transfer occurs when _____.
a) Knowledge is shared from research to application
b) Patents expire
c) Innovation fails
d) Licenses are revoked

6) Six Thinking Hats tool was developed by _____.
a) Peter Drucker b) Steve Jobs
c) Edward de Bono d) Clayton Christensen

7) NUF test stands for _____.
a) Necessary, Useful, Feasible
b) Need, Use, Focus
c) None
d) Necessary, Unusual, Functional

8) Which is not a type of innovation strategy?
a) Pioneering b) Imitative
c) Disruptive d) Delaying

9) Red Ocean strategy is about _____.
a) Uncontested markets
b) Price competition in saturated markets
c) Patent generation
d) Blue economy

10) Continuous learning is essential for _____.
a) Innovation growth b) Routine operations
c) Cost reduction d) Project closure

S.Y. (B.Tech.) (Electronics & Computer Engineering) (Semester - II) (New) (NEP CBCS) Examination: March/April - 2026
Entrepreneurship and Innovation (OE-02A)

Day & Date: Friday, 22-05-2026 Max. Marks: 70
Time: 03:00 PM To 06:00 PM

Instructions: 1) Q. No. 1 is compulsory. It should be solved in the first 30 minutes in Answer Book Page no 03 (Starting page of the Answer Book). Each question carries one mark.
2) Don't forget to Mention question paper set (P/Q/R/S) on top of page.
3) Figures to the right indicates full marks.
4) Assume suitable data if necessary and mention it clearly.

MCQ/Objective Type Questions

Duration: 30 Minutes Marks:14

Q.1 Choose Correct answer MCQ/ Objective Questions. 14

1) Six Thinking Hats tool was developed by _____.
a) Peter Drucker b) Steve Jobs
c) Edward de Bono d) Clayton Christensen

2) NUF test stands for _____.
a) Necessary, Useful, Feasible
b) Need, Use, Focus
c) None
d) Necessary, Unusual, Functional

3) Which is not a type of innovation strategy?
a) Pioneering b) Imitative
c) Disruptive d) Delaying

4) Red Ocean strategy is about _____.
a) Uncontested markets
b) Price competition in saturated markets
c) Patent generation
d) Blue economy

5) Continuous learning is essential for _____.
a) Innovation growth b) Routine operations
c) Cost reduction d) Project closure

6) Failure in innovation can occur due to _____.
a) Over-regulation b) Poor planning
c) Lack of feedback d) All of these

7) Crafting a business model involves _____.
   a) Ignoring customers
   b) Defining value, segments, and revenue streams
   c) Random investments
   d) Borrowing

8) Legal consideration in entrepreneurship includes _____.
   a) Product packaging
   b) Compliance and regulations
   c) Floor layout
   d) Office color

9) Entrepreneurial process starts with _____.
   a) HR hiring
   b) Opportunity identification
   c) Revenue calculation
   d) Market monopoly

10) Innovation provides _____.
   a) Stability
   b) Competitive advantage
   c) Similarity
   d) Confusion

11) Managerial competency involves _____.
   a) Fundraising only
   b) Communication, planning, and leadership
   c) Imitation
   d) None

12) Entrepreneurship as a style of management focuses on _____.
   a) Routine activities
   b) Risk avoidance
   c) Innovation and opportunity recognition
   d) Only HR

13) A corporate entrepreneur is _____.
   a) Owner of small business
   b) Government employee
   c) Innovator within an organization
   d) None

14) Technology transfer occurs when _____.
   a) Knowledge is shared from research to application
   b) Patents expire
   c) Innovation fails
   d) Licenses are revoked

Set S

S.Y. (B.Tech.) (Electronics & Computer Engineering) (Semester - II) (New) (NEP CBCS) Examination: March/April - 2026
Entrepreneurship and Innovation (OE-02A)

Day & Date: Friday, 22-05-2026 Max. Marks: 56
Time: 03:00 PM To 06:00 PM

Instructions: 1) All questions are compulsory.
3) Figures to the right indicates full marks.
4) Assume suitable data if necessary and mention it clearly.
5) Use of non-programmable calculator is allowed.

SECTION – I

Q.2 All questions are compulsory.

a) Explain types of innovation with suitable examples. **06**

b) Define Entrepreneur. Discuss key roles and responsibilities. **04**

Q.3 Solve Any Three questions.

a) Describe relationship between innovation and competitive advantage. **06**

b) Explain entrepreneurship as a career and style of management. **06**

c) Explain the concepts of Entrepreneur, Manager, and Intrapreneur. Differentiate between them with suitable examples. **06**

d) What are the seven sources of innovative opportunities? **06**

e) Explain creative methods for managing innovation. **06**

SECTION – II

Q.4 All questions are compulsory.

a) Explain the concept of innovation process. **06**

b) Discuss barriers to innovation in business. **04**

Q.5 Solve Any Three question.

a) Write note on Blue Ocean Strategy with example. **06**

b) Describe innovation failure causes. **06**

c) Explain the Lean Start-up concept. **06**

d) What are ethical and legal considerations for entrepreneurs? **06**

e) Explain opportunity recognition and decision-making in entrepreneurship. **06**

S.Y. (B.Tech.) (Electronics & Computer Engineering) (Semester - II) (New) (NEP CBCS) Examination: March/April - 2026
Renewable Energy (OE-02C)

Day & Date: Friday, 22-05-2026 Max. Marks: 70
Time: 03:00 PM To 06:00 PM

Instructions: 1) Q. No. 1 is compulsory. It should be solved in the first 30 minutes in Answer Book Page no 03 (Starting page of the Answer Book). Each question carries one mark.
2) Don't forget to Mention question paper set (P/Q/R/S) on top of page.
3) Figures to the right indicates full marks.
4) Assume suitable data if necessary and mention it clearly.

MCQ/Objective Type Questions

Duration: 30 Minutes Marks:14

Q.1 Choose the correct alternative: **14**

1) Which of the following is a key goal of sustainable development?
a) Increase in fossil fuel consumption
b) Balanced use of resources
c) Maximum economic growth only
d) Eliminating renewable energy use

2) What is a key characteristic of solar energy?
a) Utilizes sunlight for power generation
b) Requires fossil fuels for operation
c) Has no environmental benefits
d) ls non-renewable

3) Which renewable energy is best suited for coastal areas?
a) Biomass energy b) Geothermal energy
c) Wave and tidal energy d) Oil shale energy

4) What is solar radiation?
a) Radiation from the Earth b) Radiation from the Moon
c) Radiation from the Sun d) None of the above

5) What is solar radiation measured in?
a) Kilograms
b) Liters
c) Watts per square meter (W/m^2)
d) Newtons

6) What is the primary difference between pyrolysis and gasification?
   a) Gasification uses a small amount of oxygen, while pyrolysis occurs in the absence of oxygen
   b) Pyrolysis produces syngas, while gasification produces bio-oil
   c) Gasification is a biochemical process, while pyrolysis is thermo chemical
   d) Pyrolysis requires higher temperatures than gasification

7) Which of the following is a disadvantage of biomass energy?
   a) Reduces waste
   b) Can lead to deforestation
   c) Low carbon footprint
   d) Independent of weather conditions

8) What happens when electricity demand is higher than generation?
   a) Energy storage can provide additional power
   b) Renewable energy sources produce more electricity
   c) Power plants automatically increase supply
   d) Transmission lines store energy

9) Which of the following sectors benefits the most from energy storage?
   a) Agriculture
   b) Construction
   c) Transport
   d) Power generation

10) What does the efficiency of an energy storage device indicate?
   a) The time taken to store energy
   b) The total cost of the device
   c) The percentage of stored energy that can be retrieved
   d) The size of the storage system

11) In hydro power stations what is an enlarged body of water just above the intake and used as a regulating reservoir called?
   a) Penstock
   b) Reservoir
   c) Fore bay
   d) Spillways

12) Tidal energy is caused primarily by the _____.
   a) Moon's gravity
   b) Sun's gravity
   c) Earth's rotation
   d) Ocean currents

13) Green hydrogen is produced by _____.
   a) Coal gasification
   b) Methane reforming
   c) Water electrolysis using renewable energy
   d) Nuclear fission

14) Which is the cleanest method of hydrogen production?
   a) Electrolysis using solar/wind energy
   b) Coal gasification
   c) Nuclear thermal splitting
   d) Steam methane reforming

S.Y. (B.Tech.) (Electronics & Computer Engineering) (Semester - II) (New) (NEP CBCS) Examination: March/April - 2026
Renewable Energy (OE-02C)

Day & Date: Friday, 22-05-2026 Max. Marks: 56
Time: 03:00 PM To 06:00 PM

Instructions: 1) Q. 2 from section I is compulsory. Solve any two questions from Q.3, 4 and 5.
2) Q.6 from section two is compulsory. Solve any two questions from Q.7, 8 and 9.
3) Figures to the right indicates full marks.
4) Assume suitable data if necessary and mention it clearly.

SECTION – I

Q.2 **a)** What is biomass energy, and how is it produced from the biomass? **05**

b) Explain with neat sketch working of Pyrheliometer. **05**

Q.3 **a)** Give the detailed classification of wind energy conversion systems. **04**

b) Explain how the Internet of Energy (IoE) can improve energy distribution in smart cities. **05**

Q.4 **a)** Explain with neat sketch working of a Flat Plate Collector. **04**

b) Enlist and explain the major biomass resources available in India. How can these resources be utilized to address energy demands while ensuring sustainability? **05**

Q.5 **a)** Differentiate between solar thermal and solar photovoltaic systems those are used for power generation. **04**

b) What are the criterions considered for selection of site for the wind mill? **05**

SECTION – II

Q.6 **a)** Enlist and explain the major problems that arise due to the absence of energy storage in power generation. **05**

b) Draw the neat sketch of layout for hydroelectric power plat and explain the components. **05**

Q.7	**a)**	Explain with neat sketch working of open cycle Ocen Thermal Energy Conversion (OTEC) system.	**04**
	b)	Give the general specifications of Energy Storage devices.	**05**
Q.8	**a)**	Give the detailed classification of hydroelectric power plants.	**04**
	b)	Enlist different types of tidal energy conversion systems and explain any one with neat sketch.	**05**
Q.9	**a)**	How will you estimate a hydropower? Explain the terms involved in it.	**04**
	b)	State and explain different hydrogen storage methods.	**05**

MCQ/Objective Type Questions

Duration: 30 Minutes Marks:14

Q.1 Choose the correct answer. **14**

1) Which of the following is not a type of systematic error?
a) Instrumental Errors b) Environmental Errors
c) Observational Errors d) Gross error

2) _____ instruments are those which measure the total quantity of electricity delivered in a particular time.
a) Absolute b) Indicating
c) Recording d) Integrating

3) A moving iron instrument can be used for _____.
a) D.C. only b) A.C. only
c) Both D.C. and A.C. d) None

4) _____ method is suitable for the measurement of a resistance of expected value less than one ohm.
a) Substitution b) Loss of charge
c) Wheatstone bridge d) Kelvin's double bridge

5) Instrument transformers are _____.
a) Potential transformers b) Current transformers
c) Both (a) and (b) d) Power transformers

6) In a DSO, the input signals are _____.
   a) directly applied to oscilloscope
   b) multiplexed, converted to digital form and stored and applied to oscilloscope
   c) multiplexed, converted to digital form stored, converted to analog form and applied to oscilloscope
   d) applied to amplifier, stored as analog signals, multiplexed, converted to digital form, stored in digital form, converted to analog form, and applied to CRO through an amplifier.

7) The power of n-phase unbalanced circuit can be measured by using a minimum of _____.
   a) n wattmeters
   b) (n + 1) wattmeters
   c) (n - 2) wattmeters
   d) (n - 1) wattmeters

8) Which transducer does not require any external power supply for working?
   a) Strain gauge transducer
   b) Piezoelectric Crystals
   c) Hydraulic transducer
   d) Pneumatic transducer

9) Piezoelectric accelerometer converts _____ energy to _____ energy.
   a) mechanical, sound
   b) mechanical, electrical
   c) sound, electrical
   d) None of these

10) Which factor affects the least while selection of sensor?
   a) Size
   b) Accuracy
   c) Colour
   d) Durability

11) Which sensor should be used for calculating pressure?
   a) DHT11
   b) LM335Z/NOPB
   c) HC-SR04
   d) MPX10DP

12) Which of the following represents range of frequency measured by ADC?
   a) Bandwidth
   b) Threshold frequency
   c) Peak frequency
   d) None of the mentioned

13) Thermistor is a _____.
   a) sensor
   b) ADC
   c) transducer
   d) micro controller

14) Which of the following type output is provided by ADC?
   a) Serial type
   b) Parallel type
   c) Both serial and parallel type
   d) None of the mentioned

Seat No.	

Set **P**

S.Y. (B.Tech.) (Electronics & Computer Engineering) (Semester - II) (New) (NEP CBCS) Examination: March/April - 2026
Measurement, Instrumentation and Sensors (OE-02D)

Day & Date: Friday, 22-05-2026 Max. Marks: 56
Time: 03:00 PM To 06:00 PM

Instructions: 1) All questions are compulsory.
2) Figures to the right indicate full marks.
3) Assume suitable data if necessary.
4) Draw neat diagrams whenever necessary.

SECTION – I

Q.2 Attempt the following. (Any Four) **16**

a) Explain the term:
i) Accuracy
ii) Linearity
iii) Reproducibility
iv) Precision

b) Describe different damping methods in details.

c) Difference between Current Transformer and Potential Transformer.

d) Explain with neat diagram, working of ramp type digital voltmeter.

e) Explain Anderson Bridge with phasor diagram. Also derive the equation of dissipation factor.

Q.3 Attempt the following. (Any Two) **12**

a) Draw the equivalent circuit and phasor diagram of a PT. Derive expression for actual transformation ratio.

b) Explain the method of measurement of power using two wattmeter for balanced load. Also derive the equation of power factor.

c) A bridge consists of the following:
Arm ab: - A choke coil having resistance R1 & amp: inductance L1
Arm bc: - A non-inductive resistance R3
Arm cd: - A mica condenser C4 in series with non-inductive resistance R4
Arm da: - A non-inductive resistance R2
When this bridge fed from a source of 500 Hz, balance is obtained under following Conditions. $R2 = 2410\ \Omega$, $R3 = 750\ \Omega$, $C4 = 0.35\ \mu F$, $R4 = 64.5\ \Omega$ The series resistance of capacitor is 0.4Ω. Calculate resistance and Inductance of choke coil. The supply is connected between a & c and detector is between b & d.

SECTION – II

Q.4 Attempt the following. (Any Four) **16**

a) Explain units of measurement.

b) Explain the principle of working of piezo-electric effect sensor.

c) Explain the basic concept of analog to digital converter.

d) Explain the sensor interfacing circuit's data transmission.

e) State the different types of temperature sensor and explain any one of them.

Q.5 Attempt the following. (Any Two) **12**

a) State and explain the different types of batteries for low power sensors.

b) Stale and explain the sensors used for Displacement, and Level application.

c) Explain the concept of humidity and state different types of sensor used to measure humidity.

Seat No.	

Set **Q**

S.Y. (B.Tech.) (Electronics & Computer Engineering) (Semester - II) (New) (NEP CBCS) Examination: March/April - 2026
Measurement, Instrumentation and Sensors (OE-02D)

Day & Date: Friday, 22-05-2026 Max. Marks: 70
Time: 03:00 PM To 06:00 PM

Instructions: 1) Q. No. 1 is compulsory. It should be solved in the first 30 minutes in Answer Book Page no 03 (Starting page of the Answer Book). Each question carries one mark
2) Don't forget to Mention question paper set (P/Q/R/S) on top on page.
3) Figures to the right indicates full marks.
4) Assume suitable data if necessary.

MCQ/Objective Type Questions

Duration: 30 Minutes Marks:14

Q.1 Choose the correct answer. 14

1) Which transducer does not require any external power supply for working?
a) Strain gauge transducer b) Piezoelectric Crystals
c) Hydraulic transducer d) Pneumatic transducer

2) Piezoelectric accelerometer converts _____ energy to _____ energy.
a) mechanical, sound b) mechanical, electrical
c) sound, electrical d) None of these

3) Which factor affects the least while selection of sensor?
a) Size b) Accuracy
c) Colour d) Durability

4) Which sensor should be used for calculating pressure?
a) DHT11 b) LM335Z/NOPB
c) HC-SR04 d) MPX10DP

5) Which of the following represents range of frequency measured by ADC?
a) Bandwidth b) Threshold frequency
c) Peak frequency d) None of the mentioned

6) Thermistor is a _____.
a) sensor b) ADC
c) transducer d) micro controller

7) Which of the following type output is provided by ADC?
a) Serial type b) Parallel type
c) Both serial and parallel type d) None of the mentioned

8) Which of the following is not a type of systematic error?
a) Instrumental Errors b) Environmental Errors
c) Observational Errors d) Gross error

9) _____ instruments are those which measure the total quantity of electricity delivered in a particular time.
a) Absolute b) Indicating
c) Recording d) Integrating

10) A moving iron instrument can be used for _____.
a) D.C. only b) A.C. only
c) Both D.C. and A.C. d) None

11) _____ method is suitable for the measurement of a resistance of expected value less than one ohm.
a) Substitution b) Loss of charge
c) Wheatstone bridge d) Kelvin's double bridge

12) Instrument transformers are _____.
a) Potential transformers b) Current transformers
c) Both (a) and (b) d) Power transformers

13) In a DSO, the input signals are _____.
a) directly applied to oscilloscope
b) multiplexed, converted to digital form and stored and applied to oscilloscope
c) multiplexed, converted to digital form stored, converted to analog form and applied to oscilloscope
d) applied to amplifier, stored as analog signals, multiplexed, converted to digital form, stored in digital form, converted to analog form, and applied to CRO through an amplifier.

14) The power of n-phase unbalanced circuit can be measured by using a minimum of _____.
a) n wattmeters b) (n + 1) wattmeters
c) (n - 2) wattmeters d) (n - 1) wattmeters
