   a) Maximizing or minimizing an objective function subject to constraints
   b) Solving differential equations
   c) Performing statistical analysis
   d) Evaluating integrals

11) In optimization, the objective function represents _____.
   a) Constraints on the system
   b) The variable to be optimized
   c) The method of solving the problem
   d) The search algorithm

12) Which of the following is a bracketing method in single-variable optimization?
   a) Newton-Raphson method
   b) Golden section search
   c) Variable metric method
   d) Powell's method

13) The bound phase method is used to _____.
   a) Determine the initial feasible interval containing the minimum
   b) Compute gradients of a function
   c) Solve discrete variable problems
   d) Reduce global optima to local optima

14) Multi-objective optimization involves _____.
   a) Optimizing a single objective only
   b) Simultaneously optimizing two or more conflicting objectives
   c) Solving only linear problems
   d) Ignoring constraints

Seat No.		Set	S

T. Y. (B.Tech.) (Computer Science & Engineering) (Semester - I) (New) (CBCS) Examination: March/April – 2026
Design Optimization (CIVMDM-03A)

Day & Date: Saturday, 30-05-2026 Max. Marks: 56
Time: 10:00 AM To 01:00 PM

Instructions: 1) All questions are compulsory.
2) Figures to the right indicate full marks.
3) Use of non-programmable calculators is allowed.

SECTION – I

Q.2 Answer the following questions. **10**

a) Define optimization and explain the general procedure for solving an optimization problem.

b) Use the Exhaustive Search Method to find the minimum of $f(x) = x^2 - 6x + 10$ over $[0, 6]$ with 4 equal intervals.

Q.3 Answer Any Three of the following questions. **18**

a) Using the Newton-Raphson Method, find the root of $f(x) = x^2 - 5x + 6$ starting with $X_0 = 2.5$ Perform two iterations.

b) Using the Bisection Method, find the root of $f(x) = x^3 - 4x + 1$ in the interval $[0, 2]$ up to three iterations.

c) Apply the Fibonacci Search Method to minimize $f(x) = (x - 2)^2 + 1$ in $[0, 5]$ for $n = 5$ function evaluations.

d) Explain with an example the importance of optimization in engineering design.

e) $f(x_1, x_2) = x_1 - x_2 + 2x_1^2 + 2x_1x_2 + x_2^2$ Using Newton Method Minimize by taking the starting point as $x(0) = (0,0)$.

SECTION – II

Q.4 Answer the following questions. **10**

a) Write a note on Operators of genetic algorithm.

b) Describe fast reanalysis techniques and their significance in structural optimization.

Q.5 Answer Any Three of the following questions. **18**

a) Explain the concept of reduction of size of an optimization problem and mention its importance in engineering design.

b) Solve the Integer Programming Problem:
Maximize $Z = 5x_1 + 4x_2$
subject to $x_1 + x_2 \leq 5, 3x_1 + 2x_2 \leq 12,\ x_1, x_2 \geq 0$ and integers.

c) What is meant by sensitivity of optimum solution to problem parameters? Why is it important?

d) Discuss the practical approaches to reduce computational effort in optimization problems.

e) Difference between Genetic Algorithm and Traditional Techniques.

MCQ/Objective Type Questions

Duration: 30 Minutes Marks:14

Q.1 Multiple Choice questions: **14**

1) Which of the following is the correct definition of an optimization problem?
a) Maximizing or minimizing an objective function subject to constraints
b) Solving differential equations
c) Performing statistical analysis
d) Evaluating integrals

2) In optimization, the objective function represents _____.
a) Constraints on the system
b) The variable to be optimized
c) The method of solving the problem
d) The search algorithm

3) Which of the following is a bracketing method in single-variable optimization?
a) Newton-Raphson method b) Golden section search
c) Variable metric method d) Powell's method

4) The bound phase method is used to _____.
a) Determine the initial feasible interval containing the minimum
b) Compute gradients of a function
c) Solve discrete variable problems
d) Reduce global optima to local optima

5) Multi-objective optimization involves _____.
   a) Optimizing a single objective only
   b) Simultaneously optimizing two or more conflicting objectives
   c) Solving only linear problems
   d) Ignoring constraints

6) Evolutionary optimization is suitable for _____.
   a) Smooth, convex problems only
   b) Problems with discontinuities and multimodal functions
   c) Single-variable functions only
   d) Linear programming only

7) Integer programming is used when _____.
   a) All decision variables are continuous
   b) Some or all decision variables must be integers
   c) Derivatives are unavailable
   d) Only one variable exists

8) Integer programming problems can be solved using _____.
   a) Simplex method with branch and bound
   b) Golden section search
   c) Newton-Raphson method
   d) Fibonacci search

9) Which is a primary difference between GAs and traditional optimization methods?
   a) GAs require gradient information
   b) GAs are population-based and stochastic
   c) Traditional methods are always faster
   d) GAs cannot handle constraints

10) Selection in GA is used to _____.
   a) Choose better solutions for reproduction
   b) Mutate the population
   c) Evaluate the objective function
   d) Reduce dimensionality

11) Which is a similarity between GAs and traditional methods?
   a) Both search for optimal solutions
   b) Both require derivatives
   c) Both are population-based
   d) Both are stochastic

12) Reducing the size of an optimization problem involves _____.
   a) Eliminating dependent or negligible variables
   b) Increasing the number of constraints
   c) Ignoring the objective function
   d) Using random search

13) Fast reanalysis techniques are used for _____.

a) Quickly evaluating changes in the objective function after modifications
b) Solving only linear problems
c) Gradient computation
d) Generating random solutions

14) Multilevel optimization is used when _____.

a) A system has hierarchical design variables and objectives
b) Single-variable optimization is sufficient
c) Gradient methods fail
d) Problem is unconstrained

MCQ/Objective Type Questions

Duration: 30 Minutes Marks:14

Q.1 Multiple Choice questions: **14**

1) Which of the following is the correct definition of an optimization problem?
a) Maximizing or minimizing an objective function subject to constraints
b) Solving differential equations
c) Performing statistical analysis
d) Evaluating integrals

2) In optimization, the objective function represents _____.
a) Constraints on the system
b) The variable to be optimized
c) The method of solving the problem
d) The search algorithm

3) Which of the following is a bracketing method in single-variable optimization?
a) Newton-Raphson method b) Golden section search
c) Variable metric method d) Powell's method

4) The bound phase method is used to _____.
a) Determine the initial feasible interval containing the minimum
b) Compute gradients of a function
c) Solve discrete variable problems
d) Reduce global optima to local optima

5) Multi-objective optimization involves _____.
   a) Optimizing a single objective only
   b) Simultaneously optimizing two or more conflicting objectives
   c) Solving only linear problems
   d) Ignoring constraints

6) Evolutionary optimization is suitable for _____.
   a) Smooth, convex problems only
   b) Problems with discontinuities and multimodal functions
   c) Single-variable functions only
   d) Linear programming only

7) Integer programming is used when _____.
   a) All decision variables are continuous
   b) Some or all decision variables must be integers
   c) Derivatives are unavailable
   d) Only one variable exists

8) Integer programming problems can be solved using _____.
   a) Simplex method with branch and bound
   b) Golden section search
   c) Newton-Raphson method
   d) Fibonacci search

9) Which is a primary difference between GAs and traditional optimization methods?
   a) GAs require gradient information
   b) GAs are population-based and stochastic
   c) Traditional methods are always faster
   d) GAs cannot handle constraints

10) Selection in GA is used to _____.
   a) Choose better solutions for reproduction
   b) Mutate the population
   c) Evaluate the objective function
   d) Reduce dimensionality

11) Which is a similarity between GAs and traditional methods?
   a) Both search for optimal solutions
   b) Both require derivatives
   c) Both are population-based
   d) Both are stochastic

12) Reducing the size of an optimization problem involves _____.
   a) Eliminating dependent or negligible variables
   b) Increasing the number of constraints
   c) Ignoring the objective function
   d) Using random search

13) Fast reanalysis techniques are used for _____.

a) Quickly evaluating changes in the objective function after modifications
b) Solving only linear problems
c) Gradient computation
d) Generating random solutions

14) Multilevel optimization is used when _____.

a) A system has hierarchical design variables and objectives
b) Single-variable optimization is sufficient
c) Gradient methods fail
d) Problem is unconstrained

Set **P**

T. Y. (B.Tech.) (Electronics & Telecommunication Engineering) (Semester - I) (New) (CBCS) Examination: March/April – 2026
Design Optimization (CIVMDM-03A)

Day & Date: Saturday, 30-05-2026 Max. Marks: 56
Time: 10:00 AM To 01:00 PM

Instructions: 1) All questions are compulsory.
2) Figures to the right indicate full marks.
3) Use of non-programmable calculators is allowed.

SECTION – I

Q.2 Answer the following questions. **10**

a) Define optimization and explain the general procedure for solving an optimization problem.

b) Use the Exhaustive Search Method to find the minimum of $f(x) = x^2 - 6x + 10$ over $[0, 6]$ with 4 equal intervals.

Q.3 Answer Any Three of the following questions. **18**

a) Using the Newton-Raphson Method, find the root of $f(x) = x^2 - 5x + 6$ starting with $X_0 = 2.5$ Perform two iterations.

b) Using the Bisection Method, find the root of $f(x) = x^3 - 4x + 1$ in the interval $[0, 2]$ up to three iterations.

c) Apply the Fibonacci Search Method to minimize $f(x) = (x - 2)^2 + 1$ in $[0, 5]$ for $n = 5$ function evaluations.

d) Explain with an example the importance of optimization in engineering design.

e) $f(x_1, x_2) = x_1 - x_2 + 2x_1^2 + 2x_1x_2 + x_2^2$ Using Newton Method Minimize by taking the starting point as $x(0) = (0,0)$.

SECTION – II

Q.4 Answer the following questions. **10**

a) Write a note on Operators of genetic algorithm.

b) Describe fast reanalysis techniques and their significance in structural optimization.

Q.5 Answer Any Three of the following questions. **18**

a) Explain the concept of reduction of size of an optimization problem and mention its importance in engineering design.

b) Solve the Integer Programming Problem:
Maximize $Z = 5x_1 + 4x_2$
subject to $x_1 + x_2 \leq 5, 3x_1 + 2x_2 \leq 12,\ x_1, x_2 \geq 0$ and integers.

c) What is meant by sensitivity of optimum solution to problem parameters? Why is it important?

d) Discuss the practical approaches to reduce computational effort in optimization problems.

e) Difference between Genetic Algorithm and Traditional Techniques.

T. Y. (B.Tech.) (Electronics & Telecommunication Engineering) (Semester - I) (New) (CBCS) Examination: March/April – 2026
Design Optimization (CIVMDM-03A)

Day & Date: Saturday, 30-05-2026 Max. Marks: 70
Time: 10:00 AM To 01:00 PM

Instructions: 1) Q. No. 1 is compulsory. It should be solved in the first 30 minutes in Answer Book Page no 03 (Starting page of the Answer Book). Each question carries one mark.
2) Don't forget to Mention question paper set (P/Q/R/S) on top of page.
3) Figures to the right indicates full marks.
4) Use of non-programmable calculators is allowed.

MCQ/Objective Type Questions

Duration: 30 Minutes Marks:14

Q.1 Multiple Choice questions: **14**

1) Integer programming problems can be solved using _____.
a) Simplex method with branch and bound
b) Golden section search
c) Newton-Raphson method
d) Fibonacci search

2) Which is a primary difference between GAs and traditional optimization methods?
a) GAs require gradient information
b) GAs are population-based and stochastic
c) Traditional methods are always faster
d) GAs cannot handle constraints

3) Selection in GA is used to _____.
a) Choose better solutions for reproduction
b) Mutate the population
c) Evaluate the objective function
d) Reduce dimensionality

4) Which is a similarity between GAs and traditional methods?
a) Both search for optimal solutions
b) Both require derivatives
c) Both are population-based
d) Both are stochastic

5) Reducing the size of an optimization problem involves _____.
   a) Eliminating dependent or negligible variables
   b) Increasing the number of constraints
   c) Ignoring the objective function
   d) Using random search

6) Fast reanalysis techniques are used for _____.
   a) Quickly evaluating changes in the objective function after modifications
   b) Solving only linear problems
   c) Gradient computation
   d) Generating random solutions

7) Multilevel optimization is used when _____.
   a) A system has hierarchical design variables and objectives
   b) Single-variable optimization is sufficient
   c) Gradient methods fail
   d) Problem is unconstrained

8) Which of the following is the correct definition of an optimization problem?
   a) Maximizing or minimizing an objective function subject to constraints
   b) Solving differential equations
   c) Performing statistical analysis
   d) Evaluating integrals

9) In optimization, the objective function represents _____.
   a) Constraints on the system
   b) The variable to be optimized
   c) The method of solving the problem
   d) The search algorithm

10) Which of the following is a bracketing method in single-variable optimization?
   a) Newton-Raphson method
   b) Golden section search
   c) Variable metric method
   d) Powell's method

11) The bound phase method is used to _____.
   a) Determine the initial feasible interval containing the minimum
   b) Compute gradients of a function
   c) Solve discrete variable problems
   d) Reduce global optima to local optima

12) Multi-objective optimization involves _____.
   a) Optimizing a single objective only
   b) Simultaneously optimizing two or more conflicting objectives
   c) Solving only linear problems
   d) Ignoring constraints

MCQ/Objective Type Questions

Duration: 30 Minutes Marks:14

Q.1 Multiple Choice questions: **14**

1) Which of the following is the correct definition of an optimization problem?
a) Maximizing or minimizing an objective function subject to constraints
b) Solving differential equations
c) Performing statistical analysis
d) Evaluating integrals

2) In optimization, the objective function represents _____.
a) Constraints on the system
b) The variable to be optimized
c) The method of solving the problem
d) The search algorithm

3) Which of the following is a bracketing method in single-variable optimization?
a) Newton-Raphson method b) Golden section search
c) Variable metric method d) Powell's method

4) The bound phase method is used to _____.
a) Determine the initial feasible interval containing the minimum
b) Compute gradients of a function
c) Solve discrete variable problems
d) Reduce global optima to local optima

5) Multi-objective optimization involves _____.
   a) Optimizing a single objective only
   b) Simultaneously optimizing two or more conflicting objectives
   c) Solving only linear problems
   d) Ignoring constraints

6) Evolutionary optimization is suitable for _____.
   a) Smooth, convex problems only
   b) Problems with discontinuities and multimodal functions
   c) Single-variable functions only

Set Q

T. Y. (B.Tech.) (Mechanical Engineering) (Semester - I) (New) (CBCS) Examination: March/April – 2026
Design Optimization (CIVMDM-03A)

Day & Date: Saturday, 30-05-2026 Max. Marks: 70
Time: 10:00 AM To 01:00 PM

Instructions: 1) Q. No. 1 is compulsory. It should be solved in the first 30 minutes in Answer Book Page no 03 (Starting page of the Answer Book). Each question carries one mark.
2) Don't forget to Mention question paper set (P/Q/R/S) on top of page.
3) Figures to the right indicates full marks.
4) Use of non-programmable calculators is allowed.

MCQ/Objective Type Questions

Duration: 30 Minutes Marks:14

Q.1 Multiple Choice questions: **14**

1) Integer programming problems can be solved using _____.
a) Simplex method with branch and bound
b) Golden section search
c) Newton-Raphson method
d) Fibonacci search

2) Which is a primary difference between GAs and traditional optimization methods?
a) GAs require gradient information
b) GAs are population-based and stochastic
c) Traditional methods are always faster
d) GAs cannot handle constraints

3) Selection in GA is used to _____.
a) Choose better solutions for reproduction
b) Mutate the population
c) Evaluate the objective function
d) Reduce dimensionality

4) Which is a similarity between GAs and traditional methods?
a) Both search for optimal solutions
b) Both require derivatives
c) Both are population-based
d) Both are stochastic

5) Reducing the size of an optimization problem involves _____.
   a) Eliminating dependent or negligible variables
   b) Increasing the number of constraints
   c) Ignoring the objective function
   d) Using random search

6) Fast reanalysis techniques are used for _____.
   a) Quickly evaluating changes in the objective function after modifications
   b) Solving only linear problems
   c) Gradient computation
   d) Generating random solutions

7) Multilevel optimization is used when _____.
   a) A system has hierarchical design variables and objectives
   b) Single-variable optimization is sufficient
   c) Gradient methods fail
   d) Problem is unconstrained

8) Which of the following is the correct definition of an optimization problem?
   a) Maximizing or minimizing an objective function subject to constraints
   b) Solving differential equations
   c) Performing statistical analysis
   d) Evaluating integrals

9) In optimization, the objective function represents _____.
   a) Constraints on the system
   b) The variable to be optimized
   c) The method of solving the problem
   d) The search algorithm

10) Which of the following is a bracketing method in single-variable optimization?
   a) Newton-Raphson method
   b) Golden section search
   c) Variable metric method
   d) Powell's method

11) The bound phase method is used to _____.
   a) Determine the initial feasible interval containing the minimum
   b) Compute gradients of a function
   c) Solve discrete variable problems
   d) Reduce global optima to local optima

12) Multi-objective optimization involves _____.
   a) Optimizing a single objective only
   b) Simultaneously optimizing two or more conflicting objectives
   c) Solving only linear problems
   d) Ignoring constraints

13) Evolutionary optimization is suitable for _____.
   a) Smooth, convex problems only
   b) Problems with discontinuities and multimodal functions
   c) Single-variable functions only
   d) Linear programming only

14) Integer programming is used when _____.
   a) All decision variables are continuous
   b) Some or all decision variables must be integers
   c) Derivatives are unavailable
   d) Only one variable exists

Seat No.	

Set **Q**

T. Y. (B.Tech.) (Mechanical Engineering) (Semester - I) (New) (CBCS) Examination: March/April – 2026
Design Optimization (CIVMDM-03A)

Day & Date: Saturday, 30-05-2026 Max. Marks: 56
Time: 10:00 AM To 01:00 PM

Instructions: 1) All questions are compulsory.
2) Figures to the right indicate full marks.
3) Use of non-programmable calculators is allowed.

SECTION – I

Q.2 Answer the following questions. **10**

a) Define optimization and explain the general procedure for solving an optimization problem.

b) Use the Exhaustive Search Method to find the minimum of $f(x) = x^2 - 6x + 10$ over $[0, 6]$ with 4 equal intervals.

Q.3 Answer Any Three of the following questions. **18**

a) Using the Newton-Raphson Method, find the root of $f(x) = x^2 - 5x + 6$ starting with $X_0 = 2.5$ Perform two iterations.

b) Using the Bisection Method, find the root of $f(x) = x^3 - 4x + 1$ in the interval $[0, 2]$ up to three iterations.

c) Apply the Fibonacci Search Method to minimize $f(x) = (x - 2)^2 + 1$ in $[0, 5]$ for $n = 5$ function evaluations.

d) Explain with an example the importance of optimization in engineering design.

e) $f(x_1, x_2) = x_1 - x_2 + 2x_1^2 + 2x_1x_2 + x_2^2$ Using Newton Method Minimize by taking the starting point as $x(0) = (0,0)$.

SECTION – II

Q.4 Answer the following questions. **10**

a) Write a note on Operators of genetic algorithm.

b) Describe fast reanalysis techniques and their significance in structural optimization.

Q.5 Answer Any Three of the following questions. **18**

a) Explain the concept of reduction of size of an optimization problem and mention its importance in engineering design.

b) Solve the Integer Programming Problem:
Maximize $Z = 5x_1 + 4x_2$
subject to $x_1 + x_2 \leq 5, 3x_1 + 2x_2 \leq 12,\ x_1, x_2 \geq 0$ and integers.

c) What is meant by sensitivity of optimum solution to problem parameters? Why is it important?

d) Discuss the practical approaches to reduce computational effort in optimization problems.

e) Difference between Genetic Algorithm and Traditional Techniques.

3) Figures to the right indicates full marks.
4) Assume suitable data if necessary and mention it clearly.

MCQ/Objective Type Questions

Duration: 30 Minutes Marks:14

Q.1 Choose the correct alternative from the options. 14

1) MBO is developed by _____.
a) Peter Drucker b) Gilbert
c) F. W. Taylor d) Henry Fayol

2) Graphical Method is most suitable if number of decision variables are _____.
a) Two b) Three
c) Four d) Zero

3) Dual of the Dual is _____.
a) Dual b) Zero
c) Primal d) Infinity

4) What is the condition of Balance Assignment Problem?
a) ∑ Demand = ∑ Supply
b) No. of rows > No. of column
c) No. of rows < No. of column
d) No. of rows = No. of columns

5) Major elements of queuing system are _____.
a) Customer b) Queue
c) Service Channel d) All the above

6) Games without a saddle point require player to play _____.
a) Mixed strategies b) Pure strategies
c) Dominated strategies d) None of these

7) Optimization means _____.
   a) Maximization
   b) Minimization or Maximization
   c) Minimization
   d) Avg. Minimization & Maximization

8) EOQ model helps to find _____.
   a) Optimum size of order
   b) Time interval between order
   c) Both a) and b)
   d) None of these

9) If F = Fixed Cost, V = Variable Cost, S = Selling Price then, BEP (Quantity) = _____.
   a) $\mathrm{V}/(\mathrm{S}-\mathrm{F})$
   b) $\mathrm{F}/(\mathrm{S}-\mathrm{V})$
   c) $\mathrm{V}+\mathrm{S}+\mathrm{F}$
   d) $(\mathrm{S}-\mathrm{V})2$

10) Functional organization is invented by _____.
   a) F.W. Taylor
   b) Gilbert
   c) Peter Drucker
   d) Henry Fayol

11) Maximisation problem in LPP will involve _____.
   a) Slack variable
   b) Surplus variable
   c) Both a and b
   d) None of these

12) Allocation of units is not dependent on transport cost in _____.
   a) VAM method
   b) NW corner method
   c) Both of these
   d) None of these

13) The size of the payoff matrix of a game can be reduced by using the principle of _____.
   a) game inversion
   b) rotation reduction
   c) dominance
   d) game transpose

14) In ABC analysis least monitoring and control is required for _____.
   a) A class item
   b) B class items
   c) C class items
   d) All of these

Instructions: 1) All questions are compulsory.
2) Figures to the right indicate full marks.
3) Assume additional suitable data, if necessary and mention it clearly

SECTION – I

Q.2 Attempt Any Two.

a) Discuss 14 principles of modern management. **14**

b) What are qualities of 'Leader'? Elaborate Leadership in with practical orientation.

c) Graphical Using Graphical method, solve

Maximize $Z = 2X_1 + 3X_2$

Subject to, $X_1 + X_2 \leq 30;$

$X_1 - X_2 \geq 0;$

$X_2 \geq 3;$

$0 \leq X_1 \leq 20;$

$0 \leq X_2 \leq 12;$

Q.3 Attempt Any Two. **14**

a) Determine IBFS of the following transportation problem using LCM. And calculate Transportation Cost.

		Destination					
		A1	B1	C1	D1	E1	Supply
Origin	A	2	11	10	3	7	4
	B	1	4	7	2	1	8
	C	3	9	4	8	12	9
Demand		3	3	4	5	6	

b) Four different jobs can be done on 4 different machines. The set-up takedown time cost are assumed to be prohibitively high for changeovers. The matrix below gives the cost in rupees for producing job i on machine j.

		Machines			
		M1	M2	M3	M4
Jobs	J1	51	77	49	55
	J2	32	34	59	68
	J3	37	44	70	54
	J4	55	55	58	55

c) Explain the Waiting Line Theory with all its characteristics to single channel waiting line. Also Discuss with the graph showing Waiting Time Cost, Idle time Cost & Total Expected Cost.

SECTION – II

Q.4 Attempt Any Two. **14**

a) What is a Genetic Algorithm? Explain the basic biological concept behind GA and list its key operators (Selection, Crossover, and Mutation).

b) What are advantages of Simulation? Give its applications & limitations. Elaborate stepwise procedure of 'Monte Carlo Simulation.

c) A company is bringing out a new product in market with three strategies of production line like full, patrial, and minimal. The state of nature may be good demand, fair demand, and poor demand, with following payoff of profit as shown in table below:

State of Nature (Demand)	Production Line: Full	Production Line: Partial	Production Line: Minimal
Good	80	70	50
Fair	50	45	40
Poor	−25	−10	0

Take optimal decision under each of the following decision rules

i) Maximax
ii) Maximin
iii) Laplace

Q.5 Attempt Any Two. **14**

a) A construction company consumes 4000 bags of cement per month. Price per bag of cement is Rs. 320/-. Inventory carrying cost per bag per year is Rs. 30/- and procurement cost per order is Rs. 500/-. Find economic order quantity and number of orders to be placed per month.

b) Write a note various types inventory cost. Explain graphically how the Economic Order Quantity (EOQ) balances the trade-off between Inventory Carrying Cost and Ordering Cost.

c) Write a detailed note on ABC analysis. Explain with a graphical representation.

Seat No.	

Set **Q**

T.Y. (B.Tech.) (Civil Engineering) (Semester - I) (New) (CBCS)
Examination: March/April – 2026

MCQ/Objective Type Questions

Duration: 30 Minutes Marks:14

Q.1 Choose the correct alternative from the options. 14

1) EOQ model helps to find _____.
a) Optimum size of order
b) Time interval between order
c) Both a) and b)
d) None of these

2) If F = Fixed Cost, V = Variable Cost, S = Selling Price then, BEP (Quantity) = _____.
a) $V/(S-F)$ b) $F/(S-V)$
c) $V+S+F$ d) $(S-V)2$

3) Functional organization is invented by _____.
a) F.W. Taylor b) Gilbert
c) Peter Drucker d) Henry Fayol

4) Maximisation problem in LPP will involve _____.
a) Slack variable b) Surplus variable
c) Both a and b d) None of these

5) Allocation of units is not dependent on transport cost in _____.
a) VAM method b) NW corner method
c) Both of these d) None of these

6) The size of the payoff matrix of a game can be reduced by using the principle of _____.
a) game inversion b) rotation reduction
c) dominance d) game transpose

7) In ABC analysis least monitoring and control is required for _____.
a) A class item
b) B class items
c) C class items
d) All of these

8) MBO is developed by _____.
a) Peter Drucker
b) Gilbert
c) F. W. Taylor
d) Henry Fayol

9) Graphical Method is most suitable if number of decision variables are _____.
a) Two
b) Three
c) Four
d) Zero

10) Dual of the Dual is _____.
a) Dual
b) Zero
c) Primal
d) Infinity

11) What is the condition of Balance Assignment Problem?
a) ∑ Demand = ∑ Supply
b) No. of rows > No. of column
c) No. of rows < No. of column
d) No. of rows = No. of columns

12) Major elements of queuing system are _____.
a) Customer
b) Queue
c) Service Channel
d) All the above

13) Games without a saddle point require player to play _____.
a) Mixed strategies
b) Pure strategies
c) Dominated strategies

Subject to, $X_1 + X_2 \leq 30;$

$X_1 - X_2 \geq 0;$

$X_2 \geq 3;$

$0 \leq X_1 \leq 20;$

$0 \leq X_2 \leq 12;$

Q.3 Attempt Any Two. **14**

a) Determine IBFS of the following transportation problem using LCM. And calculate Transportation Cost.

		Destination					
		A1	B1	C1	D1	E1	Supply
Origin	A	2	11	10	3	7	4
	B	1	4	7	2	1	8
	C	3	9	4	8	12	9
Demand		3	3	4	5	6	

b) Four different jobs can be done on 4 different machines. The set-up takedown time cost are assumed to be prohibitively high for changeovers. The matrix below gives the cost in rupees for producing job i on machine j.

		Machines			
		M1	M2	M3	M4
Jobs	J1	51	77	49	55
	J2	32	34	59	68
	J3	37	44	70	54
	J4	55	55	58	55

c) Explain the Waiting Line Theory with all its characteristics to single channel waiting line. Also Discuss with the graph showing Waiting Time Cost, Idle time Cost & Total Expected Cost.

SECTION – II

Q.4 Attempt Any Two. **14**

a) What is a Genetic Algorithm? Explain the basic biological concept behind GA and list its key operators (Selection, Crossover, and Mutation).

b) What are advantages of Simulation? Give its applications & limitations. Elaborate stepwise procedure of 'Monte Carlo Simulation.

c) A company is bringing out a new product in market with three strategies of production line like full, patrial, and minimal. The state of nature may be good demand, fair demand, and poor demand, with following payoff of profit as shown in table below:

State of Nature (Demand)	Production Line: Full	Production Line: Partial	Production Line: Minimal
Good	80	70	50
Fair	50	45	40
Poor	−25	−10	0

Take optimal decision under each of the following decision rules

i) Maximax
ii) Maximin
iii) Laplace

Q.5 Attempt Any Two. **14**

a) A construction company consumes 4000 bags of cement per month. Price per bag of cement is Rs. 320/-. Inventory carrying cost per bag per year is Rs. 30/- and procurement cost per order is Rs. 500/-. Find economic order quantity and number of orders to be placed per month.

b) Write a note various types inventory cost. Explain graphically how the Economic Order Quantity (EOQ) balances the trade-off between Inventory Carrying Cost and Ordering Cost.

c) Write a detailed note on ABC analysis. Explain with a graphical representation.

Set R

T.Y. (B.Tech.) (Civil Engineering) (Semester - I) (New) (CBCS)
Examination: March/April – 2026
Operation Research and Management (CIVMDM-03B)

Day & Date: Saturday, 30-05-2026 Max. Marks: 70
Time: 10:00 AM To 01:00 PM

Instructions: 1) Q. No. 1 is compulsory. It should be solved in the first 30 minutes in Answer Book Page no 03 (Starting page of the Answer Book). Each question carries one mark.
2) Don't forget to Mention question paper set (P/Q/R/S) on top of page.
3) Figures to the right indicates full marks.
4) Assume suitable data if necessary and mention it clearly.

MCQ/Objective Type Questions

Duration: 30 Minutes Marks:14

Q.1 Choose the correct alternative from the options. 14

1) Maximisation problem in LPP will involve _____.
a) Slack variable b) Surplus variable
c) Both a and b d) None of these

2) Allocation of units is not dependent on transport cost in _____.
a) VAM method b) NW corner method
c) Both of these d) None of these

3) The size of the payoff matrix of a game can be reduced by using the principle of _____.
a) game inversion b) rotation reduction
c) dominance d) game transpose

4) In ABC analysis least monitoring and control is required for _____.
a) A class item b) B class items
c) C class items d) All of these

5) MBO is developed by _____.
a) Peter Drucker b) Gilbert
c) F. W. Taylor d) Henry Fayol

6) Graphical Method is most suitable if number of decision variables are _____.
a) Two b) Three
c) Four d) Zero

7) Dual of the Dual is _____.
a) Dual b) Zero
c) Primal d) Infinity

8) What is the condition of Balance Assignment Problem?
a) $\sum$ Demand = $\sum$ Supply
b) No. of rows > No. of column
c) No. of rows < No. of column
d) No. of rows = No. of columns

9) Major elements of queuing system are _____.
a) Customer
b) Queue
c) Service Channel
d) All the above

10) Games without a saddle point require player to play _____.
a) Mixed strategies
b) Pure strategies
c) Dominated strategies
d) None of these

11) Optimization means _____.
a) Maximization
b) Minimization or Maximization
c) Minimization
d) Avg. Minimization & Maximization

12) EOQ model helps to find _____.
a) Optimum size of order
b) Time interval between order
c) Both a) and b)
d) None of these

13) If F = Fixed Cost, V = Variable Cost, S = Selling Price then, BEP (Quantity) = _____.
a) $\mathrm{V}/(\mathrm{S}-\mathrm{F})$
b) $\mathrm{F}/(\mathrm{S}-\mathrm{V})$
c) $\mathrm{V}+\mathrm{S}+\mathrm{F}$
d) $(\mathrm{S}-\mathrm{V})2$

14) Functional organization is invented by _____.
a) F.W. Taylor
b) Gilbert
c) Peter Drucker
d) Henry Fayol

Q.5 Attempt Any Two. **14**

a) A construction company consumes 4000 bags of cement per month. Price per bag of cement is Rs. 320/-. Inventory carrying cost per bag per year is Rs. 30/- and procurement cost per order is Rs. 500/-. Find economic order quantity and number of orders to be placed per month.

b) Write a note various types inventory cost. Explain graphically how the Economic Order Quantity (EOQ) balances the trade-off between Inventory Carrying Cost and Ordering Cost.

c) Write a detailed note on ABC analysis. Explain with a graphical representation.

Set **R**

T.Y. (B.Tech.) (Computer Science & Engineering) (Semester - I) (New) (CBCS) Examination: March/April – 2026
Operation Research and Management (CIVMDM-03B)

Day & Date: Saturday, 30-05-2026 Max. Marks: 70
Time: 10:00 AM To 01:00 PM

Instructions: 1) Q. No. 1 is compulsory. It should be solved in the first 30 minutes in Answer Book Page no 03 (Starting page of the Answer Book). Each question carries one mark.
2) Don't forget to Mention question paper set (P/Q/R/S) on top of page.
3) Figures to the right indicates full marks.
4) Assume suitable data if necessary and mention it clearly.

MCQ/Objective Type Questions

Duration: 30 Minutes Marks:14

Q.1 Choose the correct alternative from the options. 14

1) Maximisation problem in LPP will involve _____.
a) Slack variable b) Surplus variable
c) Both a and b d) None of these

2) Allocation of units is not dependent on transport cost in _____.
a) VAM method b) NW corner method
c) Both of these d) None of these

3) The size of the payoff matrix of a game can be reduced by using the principle of _____.
a) game inversion b) rotation reduction
c) dominance d) game transpose

4) In ABC analysis least monitoring and control is required for _____.
a) A class item b) B class items
c) C class items d) All of these

5) MBO is developed by _____.
a) Peter Drucker b) Gilbert
c) F. W. Taylor d) Henry Fayol

6) Graphical Method is most suitable if number of decision variables are _____.
a) Two b) Three
c) Four d) Zero

7) Dual of the Dual is _____.
a) Dual b) Zero
c) Primal d) Infinity

8) What is the condition of Balance Assignment Problem?
a) $\sum$ Demand = $\sum$ Supply
b) No. of rows > No. of column
c) No. of rows < No. of column
d) No. of rows = No. of columns

9) Major elements of queuing system are _____.
a) Customer
b) Queue
c) Service Channel
d) All the above

10) Games without a saddle point require player to play _____.
a) Mixed strategies
b) Pure strategies
c) Dominated strategies
d) None of these

11) Optimization means _____.
a) Maximization
b) Minimization or Maximization
c) Minimization
d) Avg. Minimization & Maximization

12) EOQ model helps to find _____.
a) Optimum size of order
b) Time interval between order
c) Both a) and b)
d) None of these

13) If F = Fixed Cost, V = Variable Cost, S = Selling Price then, BEP (Quantity) = _____.
a) $\mathrm{V}/(\mathrm{S}-\mathrm{F})$
b) $\mathrm{F}/(\mathrm{S}-\mathrm{V})$
c) $\mathrm{V}+\mathrm{S}+\mathrm{F}$
d) $(\mathrm{S}-\mathrm{V})2$

14) Functional organization is invented by _____.
a) F.W. Taylor
b) Gilbert
c) Peter Drucker
d) Henry Fayol

Set **R**

T.Y. (B.Tech.) (Computer Science & Engineering) (Semester - I) (New) (CBCS) Examination: March/April – 2026
Operation Research and Management (CIVMDM-03B)

Day & Date: Saturday, 30-05-2026 Max. Marks: 56
Time: 10:00 AM To 01:00 PM

Instructions: 1) All questions are compulsory.
2) Figures to the right indicate full marks.
3) Assume additional suitable data, if necessary and mention it clearly

SECTION – I

Q.2 Attempt Any Two.

a) Discuss 14 principles of modern management. **14**

b) What are qualities of 'Leader'? Elaborate Leadership in with practical orientation.

c) Graphical Using Graphical method, solve

Maximize $Z = 2X_1 + 3X_2$

Subject to, $X_1 + X_2 \leq 30;$

$X_1 - X_2 \geq 0;$

$X_2 \geq 3;$

$0 \leq X_1 \leq 20;$

$0 \leq X_2 \leq 12;$

Q.3 Attempt Any Two. **14**

a) Determine IBFS of the following transportation problem using LCM. And calculate Transportation Cost.

		Destination					
		A1	B1	C1	D1	E1	Supply
Origin	A	2	11	10	3	7	4
	B	1	4	7	2	1	8
	C	3	9	4	8	12	9
Demand		3	3	4	5	6	

b) Four different jobs can be done on 4 different machines. The set-up takedown time cost are assumed to be prohibitively high for changeovers. The matrix below gives the cost in rupees for producing job i on machine j.

		Machines			
		M1	M2	M3	M4
Jobs	J1	51	77	49	55
	J2	32	34	59	68
	J3	37	44	70	54
	J4	55	55	58	55

c) Explain the Waiting Line Theory with all its characteristics to single channel waiting line. Also Discuss with the graph showing Waiting Time Cost, Idle time Cost & Total Expected Cost.

SECTION – II

Q.4 Attempt Any Two. **14**

a) What is a Genetic Algorithm? Explain the basic biological concept behind GA and list its key operators (Selection, Crossover, and Mutation).

b) What are advantages of Simulation? Give its applications & limitations. Elaborate stepwise procedure of 'Monte Carlo Simulation.

c) A company is bringing out a new product in market with three strategies of production line like full, patrial, and minimal. The state of nature may be good demand, fair demand, and poor demand, with following payoff of profit as shown in table below:

State of Nature (Demand)	Production Line: Full	Production Line: Partial	Production Line: Minimal
Good	80	70	50
Fair	50	45	40
Poor	−25	−10	0

Take optimal decision under each of the following decision rules

i) Maximax
ii) Maximin
iii) Laplace

Q.5 Attempt Any Two. **14**

a) A construction company consumes 4000 bags of cement per month. Price per bag of cement is Rs. 320/-. Inventory carrying cost per bag per year is Rs. 30/- and procurement cost per order is Rs. 500/-. Find economic order quantity and number of orders to be placed per month.

a) $\sum$ Demand = $\sum$ Supply
b) No. of rows > No. of column
c) No. of rows < No. of column
d) No. of rows = No. of columns

9) Major elements of queuing system are _____.
a) Customer
b) Queue
c) Service Channel
d) All the above

10) Games without a saddle point require player to play _____.
a) Mixed strategies
b) Pure strategies
c) Dominated strategies
d) None of these

11) Optimization means _____.
a) Maximization
b) Minimization or Maximization
c) Minimization
d) Avg. Minimization & Maximization

12) EOQ model helps to find _____.
a) Optimum size of order
b) Time interval between order
c) Both a) and b)
d) None of these

13) If F = Fixed Cost, V = Variable Cost, S = Selling Price then, BEP (Quantity) = _____.
a) $\mathrm{V}/(\mathrm{S}-\mathrm{F})$
b) $\mathrm{F}/(\mathrm{S}-\mathrm{V})$
c) $\mathrm{V}+\mathrm{S}+\mathrm{F}$
d) $(\mathrm{S}-\mathrm{V})2$

14) Functional organization is invented by _____.
a) F.W. Taylor
b) Gilbert
c) Peter Drucker
d) Henry Fayol

Seat No.	

Set **R**

T.Y. (B.Tech.) (Electrical Engineering) (Semester - I) (New) (CBCS) Examination: March/April – 2026
Operation Research and Management (CIVMDM-03B)

Day & Date: Saturday, 30-05-2026 Max. Marks: 56
Time: 10:00 AM To 01:00 PM

Instructions: 1) All questions are compulsory.
2) Figures to the right indicate full marks.
3) Assume additional suitable data, if necessary and mention it clearly

SECTION – I

Q.2 Attempt Any Two.

a) Discuss 14 principles of modern management. **14**

b) What are qualities of 'Leader'? Elaborate Leadership in with practical orientation.

c) Graphical Using Graphical method, solve

Maximize $Z = 2X_1 + 3X_2$

Subject to, $X_1 + X_2 \leq 30;$

$X_1 - X_2 \geq 0;$

$X_2 \geq 3;$

$0 \leq X_1 \leq 20;$

$0 \leq X_2 \leq 12;$

Q.3 Attempt Any Two. **14**

a) Determine IBFS of the following transportation problem using LCM. And calculate Transportation Cost.

		Destination					
		A1	B1	C1	D1	E1	Supply
Origin	A	2	11	10	3	7	4
	B	1	4	7	2	1	8
	C	3	9	4	8	12	9
Demand		3	3	4	5	6	

b) Four different jobs can be done on 4 different machines. The set-up takedown time cost are assumed to be prohibitively high for changeovers. The matrix below gives the cost in rupees for producing job i on machine j.

		Machines			
		M1	M2	M3	M4
Jobs	J1	51	77	49	55
	J2	32	34	59	68
	J3	37	44	70	54
	J4	55	55	58	55

c) Explain the Waiting Line Theory with all its characteristics to single channel waiting line. Also Discuss with the graph showing Waiting Time Cost, Idle time Cost & Total Expected Cost.

SECTION – II

Q.4 Attempt Any Two. **14**

a) What is a Genetic Algorithm? Explain the basic biological concept behind GA and list its key operators (Selection, Crossover, and Mutation).

b) What are advantages of Simulation? Give its applications & limitations. Elaborate stepwise procedure of 'Monte Carlo Simulation.

c) A company is bringing out a new product in market with three strategies of production line like full, patrial, and minimal. The state of nature may be good demand, fair demand, and poor demand, with following payoff of profit as shown in table below:

State of Nature (Demand)	Production Line: Full	Production Line: Partial	Production Line: Minimal
Good	80	70	50
Fair	50	45	40
Poor	−25	−10	0

Take optimal decision under each of the following decision rules

i) Maximax
ii) Maximin
iii) Laplace

Q.5 Attempt Any Two. **14**

a) A construction company consumes 4000 bags of cement per month. Price per bag of cement is Rs. 320/-. Inventory carrying cost per bag per year is Rs. 30/- and procurement cost per order is Rs. 500/-. Find economic order quantity and number of orders to be placed per month.

b) Write a note various types inventory cost. Explain graphically how the Economic Order Quantity (EOQ) balances the trade-off between Inventory Carrying Cost and Ordering Cost.

c) Write a detailed note on ABC analysis. Explain with a graphical representation.

T.Y. (B.Tech.) (Electrical Engineering) (Semester - I) (New) (CBCS) Examination: March/April – 2026
Operation Research and Management (CIVMDM-03B)

Day & Date: Saturday, 30-05-2026 Max. Marks: 70
Time: 10:00 AM To 01:00 PM

Instructions: 1) Q. No. 1 is compulsory. It should be solved in the first 30 minutes in Answer Book Page no 03 (Starting page of the Answer Book). Each question carries one mark.
2) Don't forget to Mention question paper set (P/Q/R/S) on top of page.
3) Figures to the right indicates full marks.
4) Assume suitable data if necessary and mention it clearly.

MCQ/Objective Type Questions

Duration: 30 Minutes Marks:14

Q.1 Choose the correct alternative from the options. 14

1) Games without a saddle point require player to play _____.
a) Mixed strategies b) Pure strategies
c) Dominated strategies d) None of these

2) Optimization means _____.
a) Maximization
b) Minimization or Maximization
c) Minimization
d) Avg. Minimization & Maximization

3) EOQ model helps to find _____.
a) Optimum size of order
b) Time interval between order
c) Both a) and b)
d) None of these

4) If F = Fixed Cost, V = Variable Cost, S = Selling Price then, BEP (Quantity) = _____.
a) $\mathrm{V}/(\mathrm{S}-\mathrm{F})$ b) $\mathrm{F}/(\mathrm{S}-\mathrm{V})$
c) $\mathrm{V}+\mathrm{S}+\mathrm{F}$ d) $(\mathrm{S}-\mathrm{V})2$

5) Functional organization is invented by _____.
a) F.W. Taylor b) Gilbert
c) Peter Drucker d) Henry Fayol

6) Maximisation problem in LPP will involve _____.
a) Slack variable b) Surplus variable
c) Both a and b d) None of these

7) Allocation of units is not dependent on transport cost in _____.
a) VAM method
b) NW corner method
c) Both of these
d) None of these

8) The size of the payoff matrix of a game can be reduced by using the principle of _____.
a) game inversion
b) rotation reduction
c) dominance
d) game transpose

9) In ABC analysis least monitoring and control is required for _____.
a) A class item
b) B class items
c) C class items
d) All of these

10) MBO is developed by _____.
a) Peter Drucker
b) Gilbert
c) F. W. Taylor
d) Henry Fayol

11) Graphical Method is most suitable if number of decision variables are _____.
a) Two
b) Three
c) Four
d) Zero

12) Dual of the Dual is _____.
a) Dual
b) Zero
c) Primal
d) Infinity

13) What is the condition of Balance Assignment Problem?
a) $\sum$ Demand = $\sum$ Supply
b) No. of rows > No. of column
c) No. of rows < No. of column
d) No. of rows = No. of columns

14) Major elements of queuing system are _____.
a) Customer
b) Queue
c) Service Channel
d) All the above

$0 \leq X_2 \leq 12;$

Q.3 Attempt Any Two. **14**

a) Determine IBFS of the following transportation problem using LCM. And calculate Transportation Cost.

		Destination					
		A1	B1	C1	D1	E1	Supply
Origin	A	2	11	10	3	7	4
	B	1	4	7	2	1	8
	C	3	9	4	8	12	9
Demand		3	3	4	5	6	

b) Four different jobs can be done on 4 different machines. The set-up takedown time cost are assumed to be prohibitively high for changeovers. The matrix below gives the cost in rupees for producing job i on machine j.

		Machines			
		M1	M2	M3	M4
Jobs	J1	51	77	49	55
	J2	32	34	59	68
	J3	37	44	70	54
	J4	55	55	58	55

c) Explain the Waiting Line Theory with all its characteristics to single channel waiting line. Also Discuss with the graph showing Waiting Time Cost, Idle time Cost & Total Expected Cost.

SECTION – II

Q.4 Attempt Any Two. **14**

a) What is a Genetic Algorithm? Explain the basic biological concept behind GA and list its key operators (Selection, Crossover, and Mutation).

b) What are advantages of Simulation? Give its applications & limitations. Elaborate stepwise procedure of 'Monte Carlo Simulation.

c) A company is bringing out a new product in market with three strategies of production line like full, patrial, and minimal. The state of nature may be good demand, fair demand, and poor demand, with following payoff of profit as shown in table below:

State of Nature (Demand)	Production Line: Full	Production Line: Partial	Production Line: Minimal
Good	80	70	50
Fair	50	45	40
Poor	−25	−10	0

Take optimal decision under each of the following decision rules

i) Maximax
ii) Maximin
iii) Laplace

Q.5 Attempt Any Two. **14**

a) A construction company consumes 4000 bags of cement per month. Price per bag of cement is Rs. 320/-. Inventory carrying cost per bag per year is Rs. 30/- and procurement cost per order is Rs. 500/-. Find economic order quantity and number of orders to be placed per month.

b) Write a note various types inventory cost. Explain graphically how the Economic Order Quantity (EOQ) balances the trade-off between Inventory Carrying Cost and Ordering Cost.

c) Write a detailed note on ABC analysis. Explain with a graphical representation.

T.Y. (B.Tech.) (Electronics & Telecommunication Engineering) (Semester - I) (New) (CBCS) Examination: March/April – 2026
Operation Research and Management (CIVMDM-03B)

Day & Date: Saturday, 30-05-2026 Max. Marks: 70
Time: 10:00 AM To 01:00 PM

Instructions: 1) Q. No. 1 is compulsory. It should be solved in the first 30 minutes in Answer Book Page no 03 (Starting page of the Answer Book). Each question carries one mark.
2) Don't forget to Mention question paper set (P/Q/R/S) on top of page.
3) Figures to the right indicates full marks.
4) Assume suitable data if necessary and mention it clearly.

MCQ/Objective Type Questions

Duration: 30 Minutes Marks:14

Q.1 Choose the correct alternative from the options. 14

1) Games without a saddle point require player to play _____.
a) Mixed strategies b) Pure strategies
c) Dominated strategies d) None of these

2) Optimization means _____.
a) Maximization
b) Minimization or Maximization
c) Minimization
d) Avg. Minimization & Maximization

3) EOQ model helps to find _____.
a) Optimum size of order
b) Time interval between order
c) Both a) and b)
d) None of these

4) If F = Fixed Cost, V = Variable Cost, S = Selling Price then, BEP (Quantity) = _____.
a) $V/(S-F)$ b) $F/(S-V)$
c) $V+S+F$ d) $(S-V)2$

5) Functional organization is invented by _____.
a) F.W. Taylor b) Gilbert
c) Peter Drucker d) Henry Fayol

6) Maximisation problem in LPP will involve _____.
a) Slack variable b) Surplus variable
c) Both a and b d) None of these

7) Allocation of units is not dependent on transport cost in _____.
a) VAM method
b) NW corner method
c) Both of these
d) None of these

8) The size of the payoff matrix of a game can be reduced by using the principle of _____.
a) game inversion
b) rotation reduction
c) dominance
d) game transpose

9) In ABC analysis least monitoring and control is required for _____.
a) A class item
b) B class items
c) C class items
d) All of these

10) MBO is developed by _____.
a) Peter Drucker
b) Gilbert
c) F. W. Taylor
d) Henry Fayol

11) Graphical Method is most suitable if number of decision variables are _____.
a) Two
b) Three
c) Four
d) Zero

12) Dual of the Dual is _____.
a) Dual
b) Zero
c) Primal
d) Infinity

13) What is the condition of Balance Assignment Problem?
a) $\sum$ Demand = $\sum$ Supply
b) No. of rows > No. of column
c) No. of rows < No. of column
d) No. of rows = No. of columns

14) Major elements of queuing system are _____.
a) Customer
b) Queue
c) Service Channel
d) All the above

T.Y. (B.Tech.) (Mechanical Engineering) (Semester - I) (New) (CBCS) Examination: March/April – 2026
Operation Research and Management (CIVMDM-03B)

Day & Date: Saturday, 30-05-2026 Max. Marks: 70
Time: 10:00 AM To 01:00 PM

Instructions: 1) Q. No. 1 is compulsory. It should be solved in the first 30 minutes in Answer Book Page no 03 (Starting page of the Answer Book). Each question carries one mark.
2) Don't forget to Mention question paper set (P/Q/R/S) on top of page.
3) Figures to the right indicates full marks.
4) Assume suitable data if necessary and mention it clearly.

MCQ/Objective Type Questions

Duration: 30 Minutes Marks:14

Q.1 Choose the correct alternative from the options. 14

1) Games without a saddle point require player to play _____.
a) Mixed strategies b) Pure strategies
c) Dominated strategies d) None of these

2) Optimization means _____.
a) Maximization
b) Minimization or Maximization
c) Minimization
d) Avg. Minimization & Maximization

3) EOQ model helps to find _____.
a) Optimum size of order
b) Time interval between order
c) Both a) and b)
d) None of these

4) If F = Fixed Cost, V = Variable Cost, S = Selling Price then, BEP (Quantity) = _____.
a) $\mathrm{V}/(\mathrm{S}-\mathrm{F})$ b) $\mathrm{F}/(\mathrm{S}-\mathrm{V})$
c) $\mathrm{V}+\mathrm{S}+\mathrm{F}$ d) $(\mathrm{S}-\mathrm{V})2$

5) Functional organization is invented by _____.
a) F.W. Taylor b) Gilbert
c) Peter Drucker d) Henry Fayol

6) Maximisation problem in LPP will involve _____.
a) Slack variable b) Surplus variable
c) Both a and b d) None of these

7) Allocation of units is not dependent on transport cost in _____.
a) VAM method
b) NW corner method
c) Both of these
d) None of these

8) The size of the payoff matrix of a game can be reduced by using the principle of _____.
a) game inversion
b) rotation reduction
c) dominance
d) game transpose

9) In ABC analysis least monitoring and control is required for _____.
a) A class item
b) B class items
c) C class items
d) All of these

10) MBO is developed by _____.
a) Peter Drucker
b) Gilbert
c) F. W. Taylor
d) Henry Fayol

11) Graphical Method is most suitable if number of decision variables are _____.
a) Two
b) Three
c) Four
d) Zero

12) Dual of the Dual is _____.
a) Dual
b) Zero
c) Primal
d) Infinity

13) What is the condition of Balance Assignment Problem?
a) $\sum$ Demand = $\sum$ Supply
b) No. of rows > No. of column
c) No. of rows < No. of column
d) No. of rows = No. of columns

14) Major elements of queuing system are _____.
a) Customer
b) Queue
c) Service Channel
d) All the above

Set **S**

T.Y. (B.Tech.) (Mechanical Engineering) (Semester - I) (New) (CBCS)
Examination: March/April – 2026
Operation Research and Management (CIVMDM-03B)

Day & Date: Saturday, 30-05-2026 Max. Marks: 56
Time: 10:00 AM To 01:00 PM

Instructions: 1) All questions are compulsory.
2) Figures to the right indicate full marks.
3) Assume additional suitable data, if necessary and mention it clearly

SECTION – I

Q.2 Attempt Any Two.

a) Discuss 14 principles of modern management. **14**

b) What are qualities of 'Leader'? Elaborate Leadership in with practical orientation.

c) Graphical Using Graphical method, solve

Maximize $Z = 2X_1 + 3X_2$

Subject to, $X_1 + X_2 \leq 30;$

$X_1 - X_2 \geq 0;$

$X_2 \geq 3;$

$0 \leq X_1 \leq 20;$

$0 \leq X_2 \leq 12;$

Q.3 Attempt Any Two. **14**

a) Determine IBFS of the following transportation problem using LCM. And calculate Transportation Cost.

		Destination					
		A1	B1	C1	D1	E1	Supply
Origin	A	2	11	10	3	7	4
	B	1	4	7	2	1	8
	C	3	9	4	8	12	9
Demand		3	3	4	5	6	

b) Four different jobs can be done on 4 different machines. The set-up takedown time cost are assumed to be prohibitively high for changeovers. The matrix below gives the cost in rupees for producing job i on machine j.

		Machines			
		M1	M2	M3	M4
Jobs	J1	51	77	49	55
	J2	32	34	59	68
	J3	37	44	70	54
	J4	55	55	58	55

c) Explain the Waiting Line Theory with all its characteristics to single channel waiting line. Also Discuss with the graph showing Waiting Time Cost, Idle time Cost & Total Expected Cost.

SECTION – II

Q.4 Attempt Any Two. **14**

a) What is a Genetic Algorithm? Explain the basic biological concept behind GA and list its key operators (Selection, Crossover, and Mutation).

b) What are advantages of Simulation? Give its applications & limitations. Elaborate stepwise procedure of 'Monte Carlo Simulation.

c) A company is bringing out a new product in market with three strategies of production line like full, patrial, and minimal. The state of nature may be good demand, fair demand, and poor demand, with following payoff of profit as shown in table below:

State of Nature (Demand)	Production Line: Full	Production Line: Partial	Production Line: Minimal
Good	80	70	50
Fair	50	45	40
Poor	−25	−10	0

Take optimal decision under each of the following decision rules

i) Maximax
ii) Maximin
iii) Laplace

Q.5 Attempt Any Two. **14**

a) A construction company consumes 4000 bags of cement per month. Price per bag of cement is Rs. 320/-. Inventory carrying cost per bag per year is Rs. 30/- and procurement cost per order is Rs. 500/-. Find economic order quantity and number of orders to be placed per month.

b) Write a note various types inventory cost. Explain graphically how the Economic Order Quantity (EOQ) balances the trade-off between Inventory Carrying Cost and Ordering Cost.

c) Write a detailed note on ABC analysis. Explain with a graphical representation.

Examination: March/April – 2026
Advanced Materials and Manufacturing Process (MECHMDM-03A)

Day & Date: Saturday, 30-05-2026 Max. Marks: 70
Time: 10:00 AM To 01:00 PM

Instructions: 1) Q. No. 1 is compulsory. It should be solved in the first 30 minutes in Answer Book Page no 03 (Starting page of the Answer Book). Each question carries one mark.
2) Don't forget to Mention question paper set (P/Q/R/S) on top on page.
3) Figures to the right indicate full marks.

MCQ/Objective Type Questions

Duration: 30 Minutes Marks:14

Q.1 Choose the correct answers from the given options. 14

1) Composite materials with copper as a matrix are typically used for _____.
a) Fuel tanks
b) Electrical and thermal applications
c) Optical fibers
d) Bulletproof vests

2) The ability of a material to withstand high-stress concentration for a long time without failure refers to _____.
a) Ductility b) Wear resistance
c) Fatigue strength d) Hardness

3) Selection of materials for marine applications mainly depends on _____.
a) Thermal conductivity b) Corrosion resistance
c) Electrical resistivity d) Machinability

4) Composite materials are made by combining two or more materials to _____.
a) Increase cost
b) Improve overall performance
c) Reduce quality
d) Increase weight

5) Shape Memory Alloys (SMAs) are mainly used in biomedical applications because they can _____.
a) Conduct electricity like copper
b) Remember and return to their original shape when heated
c) Resist corrosion like stainless steel
d) Glow under ultraviolet light

6) Carbon nanotubes are a type of _____.
a) Polymer fiber
b) Ceramic powder
c) Cylindrical nanostructure made of carbon atoms
d) Composite alloy

7) Which of the following is a major factor affecting the machining rate in Water Jet Machining?
a) Type of abrasive used
b) Pressure of the water jet
c) Type of material
d) Frequency of vibration

8) Varistors are primarily used for _____.
a) Filtering light
b) Enhancing thermal conductivity
c) Protecting circuits from voltage surges
d) Insulation

9) The In the powder preparation process for ceramics, which of the following is essential for ensuring uniformity in the powder?
a) Crushing
b) Pulverization
c) Mixing
d) Heating

10) In the preparation of composite materials, which of the following is used as reinforcement?
a) Metal alloys
b) Ceramics
c) Fibers or particulates
d) Alloys

11) In Electrical Discharge Machining (EDM), the material removal occurs due to _____.
a) Electrical discharges
b) Abrasive action
c) Laser heat generation
d) Ionization of air

12) Laser-based automation in manufacturing allows for _____.
a) Reduced precision
b) Slower production rates
c) Improved repeatability
d) Increased tool wear

13) The main advantage of hard machining using single point tools is _____.
a) Faster machining time
b) Better surface finish
c) Ability to machine hard materials
d) Lower tooling costs

14) In-process sensing with lasers is most commonly used for _____.
a) Tool wear detection
b) Material composition analysis
c) Dimensional Measurement
d) Cutting speed control

Instructions: 1) All questions are compulsory.
2) Figures to the right indicate full marks.
3) Draw neat-labelled diagrams wherever necessary.

SECTION – I

Q.2 Attempt Any Two Questions.

a) Describe the role of epoxy resins and unsaturated polyesters in composites. What makes them popular as matrix materials? **05**

b) Explain with examples the structure and applications of polymer matrix composites and metallic matrix composites. **05**

c) Discuss the characteristics and properties of fiber-reinforced composites and their applications in aerospace. **05**

Q.3 Attempt Any Two Questions.

a) Explain the criteria for selecting materials based on strength, toughness, fatigue, and creep. Give one example for each. **05**

b) Discuss the interrelationship between material selection and manufacturing processes. Illustrate with one case study from the automotive industry. **05**

c) Describe the factors influencing the cost-based material selection process and its industrial significance. **05**

Q.4 Write Short Note. (Any Two)

a) High-speed and high-performance grinding in industry. **04**

b) Shape Memory Alloys - composition and working principle. **04**

c) Smart materials used in biomedical systems. **04**

SECTION – II

Q.5 Attempt Any Two Questions.

a) Explain the steps in processing of particulate ceramics - powder preparation, drying, and sintering. **05**

b) Describe the structure and applications of MMC, CMC, and PMC. **05**

c) Explain finishing operations in ceramics and their significance. **05**

Q.6 Attempt Any Two Questions.

a) Explain the working principle of Water Jet Machining and its industrial uses. **05**

b) Compare AJM, USM, and WJM in terms of mechanism and suitability. **05**

c) Discuss the need for non-traditional machining and name at least three such processes. **05**

Q.7 Write Short Note. (Any Two)

a) Laser applications in automation and process control. **04**

b) Automation and in-process sensing in modern machining. **04**

c) Hard machining and its applications in manufacturing hardened steels. **04**

MCQ/Objective Type Questions

Duration: 30 Minutes Marks:14

Q.1 Choose the correct answers from the given options. 14

1) Composite materials with copper as a matrix are typically used for _____.
a) Fuel tanks
b) Electrical and thermal applications
c) Optical fibers
d) Bulletproof vests

2) The ability of a material to withstand high-stress concentration for a long time without failure refers to _____.
a) Ductility b) Wear resistance
c) Fatigue strength d) Hardness

3) Selection of materials for marine applications mainly depends on _____.
a) Thermal conductivity b) Corrosion resistance
c) Electrical resistivity d) Machinability

4) Composite materials are made by combining two or more materials to _____.
a) Increase cost
b) Improve overall performance
c) Reduce quality
d) Increase weight

5) Shape Memory Alloys (SMAs) are mainly used in biomedical applications because they can _____.
a) Conduct electricity like copper
b) Remember and return to their original shape when heated
c) Resist corrosion like stainless steel
d) Glow under ultraviolet light

6) Carbon nanotubes are a type of _____.
a) Polymer fiber
b) Ceramic powder
c) Cylindrical nanostructure made of carbon atoms
d) Composite alloy

7) Which of the following is a major factor affecting the machining rate in Water Jet Machining?
a) Type of abrasive used
b) Pressure of the water jet
c) Type of material
d) Frequency of vibration

8) Varistors are primarily used for _____.
a) Filtering light
b) Enhancing thermal conductivity
c) Protecting circuits from voltage surges
d) Insulation

9) The In the powder preparation process for ceramics, which of the following is essential for ensuring uniformity in the powder?
a) Crushing
b) Pulverization
c) Mixing
d) Heating

10) In the preparation of composite materials, which of the following is used as reinforcement?
a) Metal alloys
b) Ceramics
c) Fibers or particulates
d) Alloys

11) In Electrical Discharge Machining (EDM), the material removal occurs due to _____.
a) Electrical discharges
b) Abrasive action
c) Laser heat generation
d) Ionization of air

12) Laser-based automation in manufacturing allows for _____.
a) Reduced precision
b) Slower production rates
c) Improved repeatability
d) Increased tool wear

13) The main advantage of hard machining using single point tools is _____.
a) Faster machining time
b) Better surface finish
c) Ability to machine hard materials
d) Lower tooling costs

14) In-process sensing with lasers is most commonly used for _____.
a) Tool wear detection
b) Material composition analysis
c) Dimensional Measurement
d) Cutting speed control

Set P

T.Y. (B.Tech.) (Computer Science & Engineering) (Semester - I) (New) (CBCS) Examination: March/April – 2026
Advanced Materials and Manufacturing Process (MECHMDM-03A)

Day & Date: Saturday, 30-05-2026 Max. Marks: 56
Time: 10:00 AM To 01:00 PM

Instructions: 1) All questions are compulsory.
2) Figures to the right indicate full marks.
3) Draw neat-labelled diagrams wherever necessary.

SECTION – I

Q.2 Attempt Any Two Questions.

a) Describe the role of epoxy resins and unsaturated polyesters in composites. What makes them popular as matrix materials? **05**

b) Explain with examples the structure and applications of polymer matrix composites and metallic matrix composites. **05**

c) Discuss the characteristics and properties of fiber-reinforced composites and their applications in aerospace. **05**

Q.3 Attempt Any Two Questions.

a) Explain the criteria for selecting materials based on strength, toughness, fatigue, and creep. Give one example for each. **05**

b) Discuss the interrelationship between material selection and manufacturing processes. Illustrate with one case study from the automotive industry. **05**

c) Describe the factors influencing the cost-based material selection process and its industrial significance. **05**

Q.4 Write Short Note. (Any Two)

a) High-speed and high-performance grinding in industry. **04**

b) Shape Memory Alloys - composition and working principle. **04**

c) Smart materials used in biomedical systems. **04**

SECTION – II

Q.5 Attempt Any Two Questions.

a) Explain the steps in processing of particulate ceramics - powder preparation, drying, and sintering. **05**

b) Describe the structure and applications of MMC, CMC, and PMC. **05**

c) Explain finishing operations in ceramics and their significance. **05**

Q.6 Attempt Any Two Questions.

a) Explain the working principle of Water Jet Machining and its industrial uses. **05**

b) Compare AJM, USM, and WJM in terms of mechanism and suitability. **05**

c) Discuss the need for non-traditional machining and name at least three such processes. **05**

Q.7 Write Short Note. (Any Two)

a) Laser applications in automation and process control. **04**

b) Automation and in-process sensing in modern machining. **04**

c) Hard machining and its applications in manufacturing hardened steels. **04**

Set Q

T.Y. (B.Tech.) (Electrical Engineering) (Semester - I) (New) (CBCS) Examination: March/April – 2026
Advanced Materials and Manufacturing Process (MECHMDM-03A)

Day & Date: Saturday, 30-05-2026 Max. Marks: 56
Time: 10:00 AM To 01:00 PM

Instructions: 1) All questions are compulsory.
2) Figures to the right indicate full marks.
3) Draw neat-labelled diagrams wherever necessary.

SECTION – I

Q.2 Attempt Any Two Questions.

a) Describe the role of epoxy resins and unsaturated polyesters in composites. What makes them popular as matrix materials? **05**

b) Explain with examples the structure and applications of polymer matrix composites and metallic matrix composites. **05**

c) Discuss the characteristics and properties of fiber-reinforced composites and their applications in aerospace. **05**

Q.3 Attempt Any Two Questions.

a) Explain the criteria for selecting materials based on strength, toughness, fatigue, and creep. Give one example for each. **05**

b) Discuss the interrelationship between material selection and manufacturing processes. Illustrate with one case study from the automotive industry. **05**

c) Describe the factors influencing the cost-based material selection process and its industrial significance. **05**

Q.4 Write Short Note. (Any Two)

a) High-speed and high-performance grinding in industry. **04**

b) Shape Memory Alloys - composition and working principle. **04**

c) Smart materials used in biomedical systems. **04**

SECTION – II

Q.5 Attempt Any Two Questions.

a) Explain the steps in processing of particulate ceramics - powder preparation, drying, and sintering. **05**

b) Describe the structure and applications of MMC, CMC, and PMC. **05**

c) Explain finishing operations in ceramics and their significance. **05**

Q.6 Attempt Any Two Questions.

a) Explain the working principle of Water Jet Machining and its industrial uses. **05**

b) Compare AJM, USM, and WJM in terms of mechanism and suitability. **05**

c) Discuss the need for non-traditional machining and name at least three such processes. **05**

Q.7 Write Short Note. (Any Two)

a) Laser applications in automation and process control. **04**

b) Automation and in-process sensing in modern machining. **04**

c) Hard machining and its applications in manufacturing hardened steels. **04**

Seat No.	

Set **R**

T.Y. (B.Tech.) (Electrical Engineering) (Semester - I) (New) (CBCS) Examination: March/April – 2026
Advanced Materials and Manufacturing Process (MECHMDM-03A)

Day & Date: Saturday, 30-05-2026 Max. Marks: 70
Time: 10:00 AM To 01:00 PM

Instructions: 1) Q. No. 1 is compulsory. It should be solved in the first 30 minutes in Answer Book Page no 03 (Starting page of the Answer Book). Each question carries one mark.
2) Don't forget to Mention question paper set (P/Q/R/S) on top on page.
3) Figures to the right indicate full marks.

MCQ/Objective Type Questions

Duration: 30 Minutes Marks:14

Q.1 Choose the correct answers from the given options. **14**

1) In Electrical Discharge Machining (EDM), the material removal occurs due to _____.
a) Electrical discharges b) Abrasive action
c) Laser heat generation d) Ionization of air

2) Laser-based automation in manufacturing allows for _____.
a) Reduced precision b) Slower production rates
c) Improved repeatability d) Increased tool wear

3) The main advantage of hard machining using single point tools is _____.
a) Faster machining time
b) Better surface finish
c) Ability to machine hard materials
d) Lower tooling costs

4) In-process sensing with lasers is most commonly used for _____.
a) Tool wear detection
b) Material composition analysis
c) Dimensional Measurement
d) Cutting speed control

5) Composite materials with copper as a matrix are typically used for _____.
a) Fuel tanks
b) Electrical and thermal applications
c) Optical fibers
d) Bulletproof vests

6) The ability of a material to withstand high-stress concentration for a long time without failure refers to _____.
a) Ductility b) Wear resistance
c) Fatigue strength d) Hardness

7) Selection of materials for marine applications mainly depends on _____.
a) Thermal conductivity b) Corrosion resistance
c) Electrical resistivity d) Machinability

8) Composite materials are made by combining two or more materials to _____.
a) Increase cost
b) Improve overall performance
c) Reduce quality
d) Increase weight

9) Shape Memory Alloys (SMAs) are mainly used in biomedical applications because they can _____.
a) Conduct electricity like copper
b) Remember and return to their original shape when heated
c) Resist corrosion like stainless steel
d) Glow under ultraviolet light

10) Carbon nanotubes are a type of _____.
a) Polymer fiber
b) Ceramic powder
c) Cylindrical nanostructure made of carbon atoms
d) Composite alloy

11) Which of the following is a major factor affecting the machining rate in Water Jet Machining?
a) Type of abrasive used b) Pressure of the water jet
c) Type of material d) Frequency of vibration

12) Varistors are primarily used for _____.
a) Filtering light
b) Enhancing thermal conductivity
c) Protecting circuits from voltage surges
d) Insulation

13) The In the powder preparation process for ceramics, which of the following is essential for ensuring uniformity in the powder?
a) Crushing b) Pulverization
c) Mixing d) Heating

14) In the preparation of composite materials, which of the following is used as reinforcement?
a) Metal alloys b) Ceramics
c) Fibers or particulates d) Alloys

T.Y. (B.Tech.) (Electronics & Telecommunication Engineering) (Semester - I) (New) (CBCS) Examination: March/April – 2026
Advanced Materials and Manufacturing Process (MECHMDM-03A)

Day & Date: Saturday, 30-05-2026 Max. Marks: 70
Time: 10:00 AM To 01:00 PM

Instructions: 1) Q. No. 1 is compulsory. It should be solved in the first 30 minutes in Answer Book Page no 03 (Starting page of the Answer Book). Each question carries one mark.
2) Don't forget to Mention question paper set (P/Q/R/S) on top on page.
3) Figures to the right indicate full marks.

MCQ/Objective Type Questions

Duration: 30 Minutes Marks:14

Q.1 Choose the correct answers from the given options. 14

1) Carbon nanotubes are a type of _____.
a) Polymer fiber
b) Ceramic powder
c) Cylindrical nanostructure made of carbon atoms
d) Composite alloy

2) Which of the following is a major factor affecting the machining rate in Water Jet Machining?
a) Type of abrasive used b) Pressure of the water jet
c) Type of material d) Frequency of vibration

3) Varistors are primarily used for _____.
a) Filtering light
b) Enhancing thermal conductivity
c) Protecting circuits from voltage surges
d) Insulation

4) The In the powder preparation process for ceramics, which of the following is essential for ensuring uniformity in the powder?
a) Crushing b) Pulverization
c) Mixing d) Heating

5) In the preparation of composite materials, which of the following is used as reinforcement?
a) Metal alloys b) Ceramics
c) Fibers or particulates d) Alloys

6) In Electrical Discharge Machining (EDM), the material removal occurs due to _____.
a) Electrical discharges b) Abrasive action
c) Laser heat generation d) Ionization of air

7) Laser-based automation in manufacturing allows for _____.
a) Reduced precision
b) Slower production rates
c) Improved repeatability
d) Increased tool wear

8) The main advantage of hard machining using single point tools is _____.
a) Faster machining time
b) Better surface finish
c) Ability to machine hard materials
d) Lower tooling costs

9) In-process sensing with lasers is most commonly used for _____.
a) Tool wear detection
b) Material composition analysis
c) Dimensional Measurement
d) Cutting speed control

10) Composite materials with copper as a matrix are typically used for _____.
a) Fuel tanks
b) Electrical and thermal applications
c) Optical fibers
d) Bulletproof vests

11) The ability of a material to withstand high-stress concentration for a long time without failure refers to _____.
a) Ductility
b) Wear resistance
c) Fatigue strength
d) Hardness

12) Selection of materials for marine applications mainly depends on _____.
a) Thermal conductivity
b) Corrosion resistance
c) Electrical resistivity
d) Machinability

13) Composite materials are made by combining two or more materials to _____.
a) Increase cost
b) Improve overall performance
c) Reduce quality
d) Increase weight

14) Shape Memory Alloys (SMAs) are mainly used in biomedical applications because they can _____.
a) Conduct electricity like copper
b) Remember and return to their original shape when heated
c) Resist corrosion like stainless steel
d) Glow under ultraviolet light

T.Y. (B.Tech.) (Electronics & Telecommunication Engineering) (Semester - I) (New) (CBCS) Examination: March/April – 2026
Advanced Materials and Manufacturing Process (MECHMDM-03A)

Day & Date: Saturday, 30-05-2026 Max. Marks: 56
Time: 10:00 AM To 01:00 PM

Instructions: 1) All questions are compulsory.
2) Figures to the right indicate full marks.
3) Draw neat-labelled diagrams wherever necessary.

SECTION – I

Q.2 Attempt Any Two Questions.

a) Describe the role of epoxy resins and unsaturated polyesters in composites. What makes them popular as matrix materials? **05**

b) Explain with examples the structure and applications of polymer matrix composites and metallic matrix composites. **05**

c) Discuss the characteristics and properties of fiber-reinforced composites and their applications in aerospace. **05**

Q.3 Attempt Any Two Questions.

a) Explain the criteria for selecting materials based on strength, toughness, fatigue, and creep. Give one example for each. **05**

b) Discuss the interrelationship between material selection and manufacturing processes. Illustrate with one case study from the automotive industry. **05**

c) Describe the factors influencing the cost-based material selection process and its industrial significance. **05**

Q.4 Write Short Note. (Any Two)

a) High-speed and high-performance grinding in industry. **04**

b) Shape Memory Alloys - composition and working principle. **04**

c) Smart materials used in biomedical systems. **04**

SECTION – II

Q.5 Attempt Any Two Questions.

a) Explain the steps in processing of particulate ceramics - powder preparation, drying, and sintering. **05**

b) Describe the structure and applications of MMC, CMC, and PMC. **05**

c) Explain finishing operations in ceramics and their significance. **05**

Q.6 Attempt Any Two Questions.

a) Explain the working principle of Water Jet Machining and its industrial uses. **05**

b) Compare AJM, USM, and WJM in terms of mechanism and suitability. **05**

c) Discuss the need for non-traditional machining and name at least three such processes. **05**

Q.7 Write Short Note. (Any Two)

a) Laser applications in automation and process control. **04**

MCQ/Objective Type Questions

Duration: 30 Minutes Marks:14

Q.1 Multiple Choice Questions. **14**

1) Operations research approach is _____.
a) Qualitative managerial skill
b) Operational management skill
c) Scientific approach to decision making
d) Quantitative management skills

2) OR is said to be _____.
a) Only art b) Only science
c) Art as well as science d) None of these

3) Linear programming model which involves funds allocation of limited investment is classified as _____.
a) ordination budgeting model b) capital budgeting models
c) funds investment models d) funds origin models

4) As for maximization in assignment problem, the objective is to maximize the _____.
a) profit b) optimization
c) cost d) None of the above

5) _____ is one of the fundamental combinatorial optimization problems.
a) Assignment Problem b) Transportation Problem
c) Optimization Problem d) None of the above

6) A feasible solution is called a basic feasible solution if the number of non-negative allocations is equal to _____.
a) $m - n + 1$ b) $m - n - 1$
c) $m + n - 1$ d) None of the above

7) Which method usually gives a very good solution to the assignment problem?
   a) Northwest corner rule
   b) Vogel's approximation method
   c) MODI method
   d) Stepping-stone method

8) In applying Vogel's approximation method to a profit maximization problem, row and column penalties are determined by _____.
   a) finding the smallest unit cost in each row or column
   b) finding the sum of the unit costs in each row or column
   c) finding the difference between the two lowest unit costs in each row and column
   d) finding the difference between the two highest unit costs in each row and column

9) Which of the following is NOT a characteristic of a queuing system?
   a) Customer population
   b) Arrival process
   c) Service mechanism
   d) None of the above

10) In a M/M/1 queuing system, what does the first "M" represent?
   a) The number of servers
   b) The arrival process distribution
   c) The service time distribution
   d) The maximum queue length

11) The objective of sequencing problem is _____.
   a) To find the order in which jobs are to be made
   b) To find the time required for completing all the jobs on hand
   c) To find the sequence in which jobs on hand are to be processed to minimize the total time required for processing the jobs
   d) To maximize the effectiveness

12) The time required for printing of four books *A, B, C* and *D* is 5, 8, 10 and 7 hours. While its data entry requires 7, 4, 3 and 6 hours respectively. The sequence time that minimizes total elapsed time is _____.
   a) ACBD
   b) ABCD
   c) ADCB
   d) CBDA

13) In a project network, the critical path _____.
   a) may be the shortest path
   b) is the longest path
   c) may be longest path
   d) is the shortest path

14) Network models help in project management for _____.
   a) Planning
   b) Scheduling
   c) Controlling
   d) All of the above

Seat No.	

Set P

T. Y. (B.Tech.) (Civil Engineering) (Semester - I) (New) (CBCS)
Examination: March/April – 2026
Operation Research (MECHMDM-03B)

Day & Date: Saturday, 30-05-2026 Max. Marks: 56
Time: 10:00 AM To 01:00 PM

Instructions: 1) Solve any two questions from Section – I and Section – II
2) Figures to the right indicates full marks.
3) Assume additional suitable data if necessary and state it clearly.
4) Use of scientific calculator is allowed.

SECTION – I

Q.2 a) Explain O.R. Models and their applications. **06**

b) Solve the following linear programming problem using graphical method. **08**

Maximize $Z = 6X_1 + 8X_2$
Subject to $5X_1 + 10X_2 \leq 60$
$4X_1 + 4X_2 \leq 40$
$X_1 \ \& \ X_2 \geq 0$

Q.3 a) A company has a team of four salesmen and there are four districts where the company wants to start its business. After taking into account the capabilities of salesman & the nature of districts the company estimates that the profit per day in rupees for each salesman in each district is as below. **07**

	I	II	III	IV
A	16	10	14	11
B	14	11	15	15
C	15	15	13	12
D	13	12	14	15

Find the assignment of salesmen to various districts which will yield maximum profit.

b) Solve the following problem by using NWCM and VAM Method. **07**

		DISTRIBUTER				
Company		P	Q	R	S	Supply
	A	2	3	11	7	6
	B	1	0	6	1	1
	C	5	8	15	9	10
Requirement		7	5	3	2	

Q.4 a) Solve the following transportation problem by using NWCM and VAM method. **07**

		Warehouses				
		W1	W2	W3	W4	Supply
Factories	A	19	30	50	10	7
	B	70	30	40	60	9
	C	40	8	70	20	18
Requirement		5	8	7	14	

b) Solve the following Assignment problem (Assign the jobs to the operators) so as to minimize the cost. **07**

		Jobs			
		I	II	III	IV
Operators	A	5	7	11	6
	B	8	5	9	6
	C	4	7	10	7
	D	10	4	8	3

SECTION – II

Q.5 Attempt the following questions.

a) There are five jobs, each of which has to go through Machine A and Machine B & Machine C in the order ABC. Processing time in hours are as given below: **07**

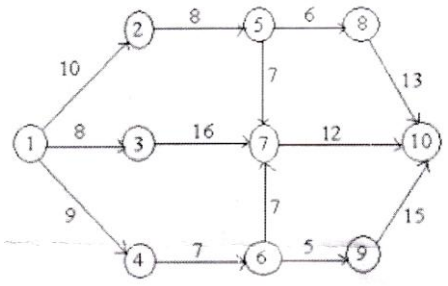
Job	1	2	3	4	5
M/C A	8	10	6	7	11
M/C B	5	6	2	3	4
M/C C	4	9	8	6	5

Determine sequence of jobs that will minimize total elapsed time, Ideal time for job.

b) Explain uniform series factors in detail. **07**

Q.6 Attempt the following questions.

a) Determine the earliest and latest timings in respect of all node points and identify critical path for the following network **07**



b) Explain in detail with example about steps for sequencing of n jobs which are being processed on three machines? **07**

Q.7 Attempt the following questions. **07**

a) Explain in details about:

i) Types of interests

ii) Types of costs

b) Differentiate between CPM & PERT. **07**

Seat No.

Instructions: 1) Q. No. 1 is compulsory. It should be solved in the first 30 minutes in Answer Book Page no 03 (Starting page of the Answer Book). Each question carries one mark.
2) Don't forget to Mention question paper set (P/Q/R/S) on top on page.
3) Figures to the right indicates full marks.
4) Assume additional suitable data if necessary and state it clearly.

MCQ/Objective Type Questions

Duration: 30 Minutes Marks:14

Q.1 Multiple Choice Questions. **14**

1) In applying Vogel's approximation method to a profit maximization problem, row and column penalties are determined by _____.
a) finding the smallest unit cost in each row or column
b) finding the sum of the unit costs in each row or column
c) finding the difference between the two lowest unit costs in each row and column
d) finding the difference between the two highest unit costs in each row and column

2) Which of the following is NOT a characteristic of a queuing system?
a) Customer population b) Arrival process
c) Service mechanism d) None of the above

3) In a M/M/1 queuing system, what does the first "M" represent?
a) The number of servers
b) The arrival process distribution
c) The service time distribution
d) The maximum queue length

4) The objective of sequencing problem is _____.
a) To find the order in which jobs are to be made
b) To find the time required for completing all the jobs on hand
c) To find the sequence in which jobs on hand are to be processed to minimize the total time required for processing the jobs
d) To maximize the effectiveness

5) The time required for printing of four books *A, B, C* and *D* is 5, 8, 10 and 7 hours. While its data entry requires 7, 4, 3 and 6 hours respectively. The sequence time that minimizes total elapsed time is _____.

a) ACBD b) ABCD
c) ADCB d) CBDA

6) In a project network, the critical path _____.

a) may be the shortest path b) is the longest path
c) may be longest path d) is the shortest path

7) Network models help in project management for _____.

a) Planning b) Scheduling
c) Controlling d) All of the above

8) Operations research approach is _____.

a) Qualitative managerial skill
b) Operational management skill
c) Scientific approach to decision making
d) Quantitative management skills

9) OR is said to be _____.

a) Only art b) Only science
c) Art as well as science d) None of these

10) Linear programming model which involves funds allocation of limited investment is classified as _____.

a) ordination budgeting model b) capital budgeting models
c) funds investment models d) funds origin models

11) As for maximization in assignment problem, the objective is to maximize the _____.

a) profit b) optimization
c) cost d) None of the above

12) _____ is one of the fundamental combinatorial optimization problems.

a) Assignment Problem b) Transportation Problem
c) Optimization Problem d) None of the above

13) A feasible solution is called a basic feasible solution if the number of non-negative allocations is equal to _____.

a) $m - n + 1$ b) $m - n - 1$
c) $m + n - 1$ d) None of the above

14) Which method usually gives a very good solution to the assignment problem?

a) Northwest corner rule

1) Operations research approach is _____.
a) Qualitative managerial skill
b) Operational management skill
c) Scientific approach to decision making
d) Quantitative management skills

2) OR is said to be _____.
a) Only art b) Only science
c) Art as well as science d) None of these

3) Linear programming model which involves funds allocation of limited investment is classified as _____.
a) ordination budgeting model b) capital budgeting models
c) funds investment models d) funds origin models

4) As for maximization in assignment problem, the objective is to maximize the _____.
a) profit b) optimization
c) cost d) None of the above

5) _____ is one of the fundamental combinatorial optimization problems.
a) Assignment Problem b) Transportation Problem
c) Optimization Problem d) None of the above

6) A feasible solution is called a basic feasible solution if the number of non-negative allocations is equal to _____.
a) $m - n + 1$ b) $m - n - 1$
c) $m + n - 1$ d) None of the above

7) Which method usually gives a very good solution to the assignment problem?
   a) Northwest corner rule
   b) Vogel's approximation method
   c) MODI method
   d) Stepping-stone method

8) In applying Vogel's approximation method to a profit maximization problem, row and column penalties are determined by _____.
   a) finding the smallest unit cost in each row or column
   b) finding the sum of the unit costs in each row or column
   c) finding the difference between the two lowest unit costs in each row and column
   d) finding the difference between the two highest unit costs in each row and column

9) Which of the following is NOT a characteristic of a queuing system?
   a) Customer population
   b) Arrival process
   c) Service mechanism
   d) None of the above

10) In a M/M/1 queuing system, what does the first "M" represent?
   a) The number of servers
   b) The arrival process distribution
   c) The service time distribution
   d) The maximum queue length

11) The objective of sequencing problem is _____.
   a) To find the order in which jobs are to be made
   b) To find the time required for completing all the jobs on hand
   c) To find the sequence in which jobs on hand are to be processed to minimize the total time required for processing the jobs
   d) To maximize the effectiveness

12) The time required for printing of four books *A, B, C* and *D* is 5, 8, 10 and 7 hours. While its data entry requires 7, 4, 3 and 6 hours respectively. The sequence time that minimizes total elapsed time is _____.
   a) ACBD
   b) ABCD
   c) ADCB
   d) CBDA

13) In a project network, the critical path _____.
   a) may be the shortest path
   b) is the longest path
   c) may be longest path
   d) is the shortest path

14) Network models help in project management for _____.
   a) Planning
   b) Scheduling
   c) Controlling
   d) All of the above

Set P

T. Y. (B.Tech.) (Computer Science & Engineering) (Semester - I) (New) (CBCS) Examination: March/April – 2026
Operation Research (MECHMDM-03B)

Day & Date: Saturday, 30-05-2026 Max. Marks: 56
Time: 10:00 AM To 01:00 PM

Instructions: 1) Solve any two questions from Section – I and Section – II
2) Figures to the right indicates full marks.
3) Assume additional suitable data if necessary and state it clearly.
4) Use of scientific calculator is allowed.

SECTION – I

Q.2 a) Explain O.R. Models and their applications. **06**

b) Solve the following linear programming problem using graphical method. **08**

Maximize $Z = 6X_1 + 8X_2$
Subject to $5X_1 + 10X_2 \leq 60$
$4X_1 + 4X_2 \leq 40$
$X_1 \ \& \ X_2 \geq 0$

Q.3 a) A company has a team of four salesmen and there are four districts where the company wants to start its business. After taking into account the capabilities of salesman & the nature of districts the company estimates that the profit per day in rupees for each salesman in each district is as below. **07**

	I	II	III	IV
A	16	10	14	11
B	14	11	15	15
C	15	15	13	12
D	13	12	14	15

Find the assignment of salesmen to various districts which will yield maximum profit.

b) Solve the following problem by using NWCM and VAM Method. **07**

		DISTRIBUTER				
Company		P	Q	R	S	Supply
	A	2	3	11	7	6
	B	1	0	6	1	1
	C	5	8	15	9	10
Requirement		7	5	3	2	

Q.4 a) Solve the following transportation problem by using NWCM and VAM method. **07**

		Warehouses				
		W1	W2	W3	W4	Supply
Factories	A	19	30	50	10	7
	B	70	30	40	60	9
	C	40	8	70	20	18
Requirement		5	8	7	14	

b) Solve the following Assignment problem (Assign the jobs to the operators) so as to minimize the cost. **07**

		Jobs			
		I	II	III	IV
Operators	A	5	7	11	6
	B	8	5	9	6
	C	4	7	10	7
	D	10	4	8	3

SECTION – II

Q.5 Attempt the following questions.

a) There are five jobs, each of which has to go through Machine A and Machine B & Machine C in the order ABC. Processing time in hours are as given below: **07**

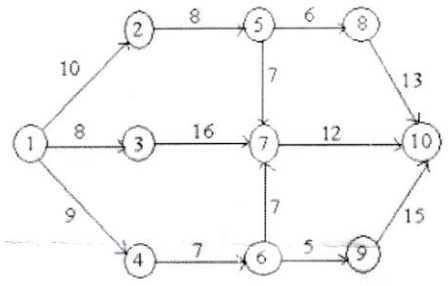
Job	1	2	3	4	5
M/C A	8	10	6	7	11
M/C B	5	6	2	3	4
M/C C	4	9	8	6	5

Determine sequence of jobs that will minimize total elapsed time, Ideal time for job.

b) Explain uniform series factors in detail. **07**

Q.6 Attempt the following questions.

a) Determine the earliest and latest timings in respect of all node points and identify critical path for the following network **07**



b) Explain in detail with example about steps for sequencing of n jobs which are being processed on three machines? **07**

Q.7 Attempt the following questions. **07**

a) Explain in details about:

i) Types of interests

ii) Types of costs

b) Differentiate between CPM & PERT. **07**

Seat No.	

Set **Q**

T. Y. (B.Tech.) (Computer Science & Engineering) (Semester - I) (New) (CBCS) Examination: March/April – 2026
Operation Research (MECHMDM-03B)

Day & Date: Saturday, 30-05-2026 Max. Marks: 70
Time: 10:00 AM To 01:00 PM

Instructions: 1) Q. No. 1 is compulsory. It should be solved in the first 30 minutes in Answer Book Page no 03 (Starting page of the Answer Book). Each question carries one mark.
2) Don't forget to Mention question paper set (P/Q/R/S) on top on page.
3) Figures to the right indicates full marks.
4) Assume additional suitable data if necessary and state it clearly.

MCQ/Objective Type Questions

Duration: 30 Minutes Marks:14

Q.1 Multiple Choice Questions. **14**

1) In applying Vogel's approximation method to a profit maximization problem, row and column penalties are determined by _____.
a) finding the smallest unit cost in each row or column
b) finding the sum of the unit costs in each row or column
c) finding the difference between the two lowest unit costs in each row and column
d) finding the difference between the two highest unit costs in each row and column

2) Which of the following is NOT a characteristic of a queuing system?
a) Customer population b) Arrival process
c) Service mechanism d) None of the above

3) In a M/M/1 queuing system, what does the first "M" represent?
a) The number of servers
b) The arrival process distribution
c) The service time distribution
d) The maximum queue length

4) The objective of sequencing problem is _____.
a) To find the order in which jobs are to be made
b) To find the time required for completing all the jobs on hand
c) To find the sequence in which jobs on hand are to be processed to minimize the total time required for processing the jobs
d) To maximize the effectiveness

5) The time required for printing of four books *A, B, C* and *D* is 5, 8, 10 and 7 hours. While its data entry requires 7, 4, 3 and 6 hours respectively. The sequence time that minimizes total elapsed time is _____.

a) ACBD b) ABCD
c) ADCB d) CBDA

6) In a project network, the critical path _____.

a) may be the shortest path b) is the longest path
c) may be longest path d) is the shortest path

7) Network models help in project management for _____.

a) Planning b) Scheduling
c) Controlling d) All of the above

8) Operations research approach is _____.

a) Qualitative managerial skill
b) Operational management skill
c) Scientific approach to decision making
d) Quantitative management skills

9) OR is said to be _____.

a) Only art b) Only science
c) Art as well as science d) None of these

10) Linear programming model which involves funds allocation of limited investment is classified as _____.

a) ordination budgeting model b) capital budgeting models
c) funds investment models d) funds origin models

11) As for maximization in assignment problem, the objective is to maximize the _____.

a) profit b) optimization
c) cost d) None of the above

12) _____ is one of the fundamental combinatorial optimization problems.

a) Assignment Problem b) Transportation Problem

Operation Research (MECHMDM-03B)

Day & Date: Saturday, 30-05-2026 Max. Marks: 70
Time: 10:00 AM To 01:00 PM

Instructions: 1) Q. No. 1 is compulsory. It should be solved in the first 30 minutes in Answer Book Page no 03 (Starting page of the Answer Book). Each question carries one mark.
2) Don't forget to Mention question paper set (P/Q/R/S) on top on page.
3) Figures to the right indicates full marks.
4) Assume additional suitable data if necessary and state it clearly.

MCQ/Objective Type Questions

Duration: 30 Minutes Marks:14

Q.1 Multiple Choice Questions. **14**

1) Operations research approach is _____.
a) Qualitative managerial skill
b) Operational management skill
c) Scientific approach to decision making
d) Quantitative management skills

2) OR is said to be _____.
a) Only art b) Only science
c) Art as well as science d) None of these

3) Linear programming model which involves funds allocation of limited investment is classified as _____.
a) ordination budgeting model b) capital budgeting models
c) funds investment models d) funds origin models

4) As for maximization in assignment problem, the objective is to maximize the _____.
a) profit b) optimization
c) cost d) None of the above

5) _____ is one of the fundamental combinatorial optimization problems.
a) Assignment Problem b) Transportation Problem
c) Optimization Problem d) None of the above

6) A feasible solution is called a basic feasible solution if the number of non-negative allocations is equal to _____.
a) $m - n + 1$ b) $m - n - 1$
c) $m + n - 1$ d) None of the above

7) Which method usually gives a very good solution to the assignment problem?
   a) Northwest corner rule
   b) Vogel's approximation method
   c) MODI method
   d) Stepping-stone method

8) In applying Vogel's approximation method to a profit maximization problem, row and column penalties are determined by _____.
   a) finding the smallest unit cost in each row or column
   b) finding the sum of the unit costs in each row or column
   c) finding the difference between the two lowest unit costs in each row and column
   d) finding the difference between the two highest unit costs in each row and column

9) Which of the following is NOT a characteristic of a queuing system?
   a) Customer population
   b) Arrival process
   c) Service mechanism
   d) None of the above

10) In a M/M/1 queuing system, what does the first "M" represent?
   a) The number of servers
   b) The arrival process distribution
   c) The service time distribution
   d) The maximum queue length

11) The objective of sequencing problem is _____.
   a) To find the order in which jobs are to be made
   b) To find the time required for completing all the jobs on hand
   c) To find the sequence in which jobs on hand are to be processed to minimize the total time required for processing the jobs
   d) To maximize the effectiveness

12) The time required for printing of four books *A, B, C* and *D* is 5, 8, 10 and 7 hours. While its data entry requires 7, 4, 3 and 6 hours respectively. The sequence time that minimizes total elapsed time is _____.
   a) ACBD
   b) ABCD
   c) ADCB
   d) CBDA

13) In a project network, the critical path _____.
   a) may be the shortest path
   b) is the longest path
   c) may be longest path
   d) is the shortest path

14) Network models help in project management for _____.
   a) Planning
   b) Scheduling
   c) Controlling
   d) All of the above

Seat No.	

Set P

T. Y. (B.Tech.) (Electrical Engineering) (Semester - I) (New) (CBCS) Examination: March/April – 2026
Operation Research (MECHMDM-03B)

Day & Date: Saturday, 30-05-2026 Max. Marks: 56
Time: 10:00 AM To 01:00 PM

Instructions: 1) Solve any two questions from Section – I and Section – II
2) Figures to the right indicates full marks.
3) Assume additional suitable data if necessary and state it clearly.
4) Use of scientific calculator is allowed.

SECTION – I

Q.2 a) Explain O.R. Models and their applications. **06**

b) Solve the following linear programming problem using graphical method. **08**

Maximize $Z = 6X_1 + 8X_2$
Subject to $5X_1 + 10X_2 \leq 60$
$4X_1 + 4X_2 \leq 40$
$X_1 \ \& \ X_2 \geq 0$

Q.3 a) A company has a team of four salesmen and there are four districts where the company wants to start its business. After taking into account the capabilities of salesman & the nature of districts the company estimates that the profit per day in rupees for each salesman in each district is as below. **07**

	I	II	III	IV
A	16	10	14	11
B	14	11	15	15
C	15	15	13	12
D	13	12	14	15

Find the assignment of salesmen to various districts which will yield maximum profit.

b) Solve the following problem by using NWCM and VAM Method. **07**

		DISTRIBUTER				
Company		P	Q	R	S	Supply
	A	2	3	11	7	6
	B	1	0	6	1	1
	C	5	8	15	9	10
Requirement		7	5	3	2	

Q.4 a) Solve the following transportation problem by using NWCM and VAM method. **07**

		Warehouses				
		W1	W2	W3	W4	Supply
Factories	A	19	30	50	10	7
	B	70	30	40	60	9
	C	40	8	70	20	18
Requirement		5	8	7	14	

b) Solve the following Assignment problem (Assign the jobs to the operators) so as to minimize the cost. **07**

		Jobs			
		I	II	III	IV
Operators	A	5	7	11	6
	B	8	5	9	6
	C	4	7	10	7
	D	10	4	8	3

SECTION – II

Q.5 Attempt the following questions.

a) There are five jobs, each of which has to go through Machine A and Machine B & Machine C in the order ABC. Processing time in hours are as given below: **07**

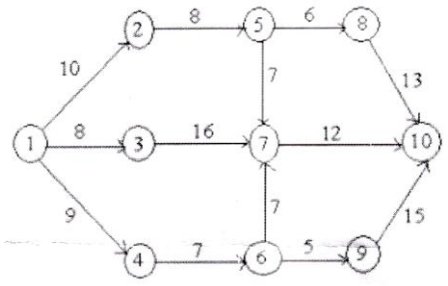
Job	1	2	3	4	5
M/C A	8	10	6	7	11
M/C B	5	6	2	3	4
M/C C	4	9	8	6	5

Determine sequence of jobs that will minimize total elapsed time, Ideal time for job.

b) Explain uniform series factors in detail. **07**

Q.6 Attempt the following questions.

a) Determine the earliest and latest timings in respect of all node points and identify critical path for the following network **07**



b) Explain in detail with example about steps for sequencing of n jobs which are being processed on three machines? **07**

Q.7 Attempt the following questions. **07**

a) Explain in details about:

i) Types of interests

ii) Types of costs

b) Differentiate between CPM & PERT. **07**

Seat No.	

Set **Q**

Q.5 Attempt the following questions.

a) There are five jobs, each of which has to go through Machine A and Machine B & Machine C in the order ABC. Processing time in hours are as given below: **07**

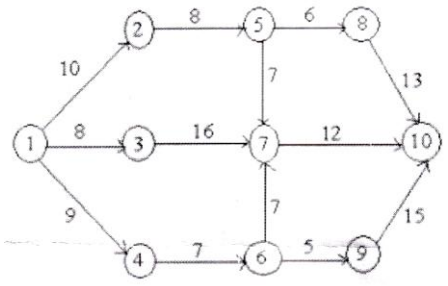
Job	1	2	3	4	5
M/C A	8	10	6	7	11
M/C B	5	6	2	3	4
M/C C	4	9	8	6	5

Determine sequence of jobs that will minimize total elapsed time, Ideal time for job.

b) Explain uniform series factors in detail. **07**

Q.6 Attempt the following questions.

a) Determine the earliest and latest timings in respect of all node points and identify critical path for the following network **07**



b) Explain in detail with example about steps for sequencing of n jobs which are being processed on three machines? **07**

Q.7 Attempt the following questions. **07**

a) Explain in details about:

i) Types of interests

ii) Types of costs

b) Differentiate between CPM & PERT. **07**

T. Y. (B.Tech.) (Electronics & Telecommunication Engineering) (Semester - I) (New) (CBCS) Examination: March/April – 2026
Operation Research (MECHMDM-03B)

Day & Date: Saturday, 30-05-2026 Max. Marks: 70
Time: 10:00 AM To 01:00 PM

Instructions: 1) Q. No. 1 is compulsory. It should be solved in the first 30 minutes in Answer Book Page no 03 (Starting page of the Answer Book). Each question carries one mark.
2) Don't forget to Mention question paper set (P/Q/R/S) on top on page.
3) Figures to the right indicates full marks.
4) Assume additional suitable data if necessary and state it clearly.

MCQ/Objective Type Questions

Duration: 30 Minutes Marks:14

Q.1 Multiple Choice Questions. **14**

1) Operations research approach is _____.
a) Qualitative managerial skill
b) Operational management skill
c) Scientific approach to decision making
d) Quantitative management skills

2) OR is said to be _____.
a) Only art b) Only science
c) Art as well as science d) None of these

3) Linear programming model which involves funds allocation of limited investment is classified as _____.
a) ordination budgeting model b) capital budgeting models
c) funds investment models d) funds origin models

4) As for maximization in assignment problem, the objective is to maximize the _____.
a) profit b) optimization
c) cost d) None of the above

5) _____ is one of the fundamental combinatorial optimization problems.
a) Assignment Problem b) Transportation Problem
c) Optimization Problem d) None of the above

6) A feasible solution is called a basic feasible solution if the number of non-negative allocations is equal to _____.
a) $m - n + 1$ b) $m - n - 1$
c) $m + n - 1$ d) None of the above

7) Which method usually gives a very good solution to the assignment problem?
   a) Northwest corner rule
   b) Vogel's approximation method
   c) MODI method
   d) Stepping-stone method

8) In applying Vogel's approximation method to a profit maximization problem, row and column penalties are determined by _____.
   a) finding the smallest unit cost in each row or column
   b) finding the sum of the unit costs in each row or column
   c) finding the difference between the two lowest unit costs in each row and column
   d) finding the difference between the two highest unit costs in each row and column

9) Which of the following is NOT a characteristic of a queuing system?
   a) Customer population
   b) Arrival process
   c) Service mechanism
   d) None of the above

10) In a M/M/1 queuing system, what does the first "M" represent?
   a) The number of servers
   b) The arrival process distribution
   c) The service time distribution
   d) The maximum queue length

11) The objective of sequencing problem is _____.
   a) To find the order in which jobs are to be made
   b) To find the time required for completing all the jobs on hand
   c) To find the sequence in which jobs on hand are to be processed to minimize the total time required for processing the jobs
   d) To maximize the effectiveness

12) The time required for printing of four books *A, B, C* and *D* is 5, 8, 10 and 7 hours. While its data entry requires 7, 4, 3 and 6 hours respectively. The sequence time that minimizes total elapsed time is _____.
   a) ACBD
   b) ABCD
   c) ADCB
   d) CBDA

13) In a project network, the critical path _____.
   a) may be the shortest path
   b) is the longest path
   c) may be longest path
   d) is the shortest path

14) Network models help in project management for _____.
   a) Planning
   b) Scheduling
   c) Controlling
   d) All of the above

Set **P**

T. Y. (B.Tech.) (Electronics & Telecommunication Engineering) (Semester - I) (New) (CBCS) Examination: March/April – 2026
Operation Research (MECHMDM-03B)

Day & Date: Saturday, 30-05-2026 Max. Marks: 56
Time: 10:00 AM To 01:00 PM

Instructions: 1) Solve any two questions from Section – I and Section – II
2) Figures to the right indicates full marks.
3) Assume additional suitable data if necessary and state it clearly.
4) Use of scientific calculator is allowed.

SECTION – I

Q.2 a) Explain O.R. Models and their applications. **06**

b) Solve the following linear programming problem using graphical method. **08**

Maximize $Z = 6X_1 + 8X_2$
Subject to $5X_1 + 10X_2 \leq 60$
$4X_1 + 4X_2 \leq 40$
$X_1 \ \& \ X_2 \geq 0$

Q.3 a) A company has a team of four salesmen and there are four districts where the company wants to start its business. After taking into account the capabilities of salesman & the nature of districts the company estimates that the profit per day in rupees for each salesman in each district is as below. **07**

	I	II	III	IV
A	16	10	14	11
B	14	11	15	15
C	15	15	13	12
D	13	12	14	15

Find the assignment of salesmen to various districts which will yield maximum profit.

b) Solve the following problem by using NWCM and VAM Method. **07**

		DISTRIBUTER				
Company		P	Q	R	S	Supply
	A	2	3	11	7	6
	B	1	0	6	1	1
	C	5	8	15	9	10
Requirement		7	5	3	2	

Q.4 a) Solve the following transportation problem by using NWCM and VAM method. **07**

		Warehouses				
		W1	W2	W3	W4	Supply
Factories	A	19	30	50	10	7
	B	70	30	40	60	9
	C	40	8	70	20	18
Requirement		5	8	7	14	

b) Solve the following Assignment problem (Assign the jobs to the operators) so as to minimize the cost. **07**

		Jobs			
		I	II	III	IV
Operators	A	5	7	11	6
	B	8	5	9	6
	C	4	7	10	7
	D	10	4	8	3

SECTION – II

Q.5 Attempt the following questions.

a) There are five jobs, each of which has to go through Machine A and Machine B & Machine C in the order ABC. Processing time in hours are as given below: **07**

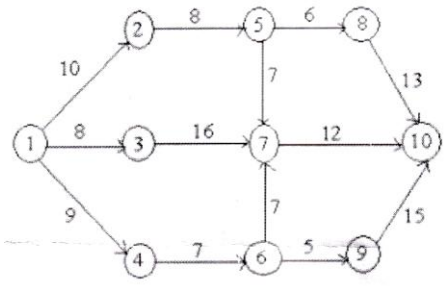
Job	1	2	3	4	5
M/C A	8	10	6	7	11
M/C B	5	6	2	3	4
M/C C	4	9	8	6	5

Determine sequence of jobs that will minimize total elapsed time, Ideal time for job.

b) Explain uniform series factors in detail. **07**

Q.6 Attempt the following questions.

a) Determine the earliest and latest timings in respect of all node points and identify critical path for the following network **07**



b) Explain in detail with example about steps for sequencing of n jobs which are being processed on three machines? **07**

Q.7 Attempt the following questions. **07**

a) Explain in details about:

i) Types of interests

ii) Types of costs

b) Differentiate between CPM & PERT. **07**

	C	4	7	10	7
	D	10	4	8	3

SECTION – II

Q.5 Attempt the following questions.

a) There are five jobs, each of which has to go through Machine A and Machine B & Machine C in the order ABC. Processing time in hours are as given below: **07**

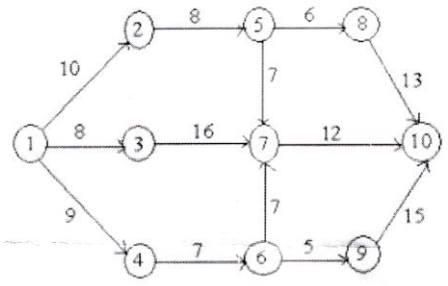
Job	1	2	3	4	5
M/C A	8	10	6	7	11
M/C B	5	6	2	3	4
M/C C	4	9	8	6	5

Determine sequence of jobs that will minimize total elapsed time, Ideal time for job.

b) Explain uniform series factors in detail. **07**

Q.6 Attempt the following questions.

a) Determine the earliest and latest timings in respect of all node points and identify critical path for the following network **07**



b) Explain in detail with example about steps for sequencing of n jobs which are being processed on three machines? **07**

Q.7 Attempt the following questions. **07**

a) Explain in details about:

i) Types of interests

ii) Types of costs

b) Differentiate between CPM & PERT. **07**

T. Y. (B.Tech.) (Mechanical Engineering) (Semester - I) (New) (CBCS) Examination: March/April – 2026
Operation Research (MECHMDM-03B)

Day & Date: Saturday, 30-05-2026 Max. Marks: 70
Time: 10:00 AM To 01:00 PM

Instructions: 1) Q. No. 1 is compulsory. It should be solved in the first 30 minutes in Answer Book Page no 03 (Starting page of the Answer Book). Each question carries one mark.
2) Don't forget to Mention question paper set (P/Q/R/S) on top on page.
3) Figures to the right indicates full marks.
4) Assume additional suitable data if necessary and state it clearly.

MCQ/Objective Type Questions

Duration: 30 Minutes Marks:14

Q.1 Multiple Choice Questions. **14**

1) Operations research approach is _____.
a) Qualitative managerial skill
b) Operational management skill
c) Scientific approach to decision making
d) Quantitative management skills

2) OR is said to be _____.
a) Only art b) Only science
c) Art as well as science d) None of these

3) Linear programming model which involves funds allocation of limited investment is classified as _____.
a) ordination budgeting model b) capital budgeting models
c) funds investment models d) funds origin models

4) As for maximization in assignment problem, the objective is to maximize the _____.
a) profit b) optimization
c) cost d) None of the above

5) _____ is one of the fundamental combinatorial optimization problems.
a) Assignment Problem b) Transportation Problem
c) Optimization Problem d) None of the above

6) A feasible solution is called a basic feasible solution if the number of non-negative allocations is equal to _____.
a) $m - n + 1$ b) $m - n - 1$
c) $m + n - 1$ d) None of the above

7) Which method usually gives a very good solution to the assignment problem?
   a) Northwest corner rule
   b) Vogel's approximation method
   c) MODI method
   d) Stepping-stone method

8) In applying Vogel's approximation method to a profit maximization problem, row and column penalties are determined by _____.
   a) finding the smallest unit cost in each row or column
   b) finding the sum of the unit costs in each row or column
   c) finding the difference between the two lowest unit costs in each row and column
   d) finding the difference between the two highest unit costs in each row and column

9) Which of the following is NOT a characteristic of a queuing system?
   a) Customer population
   b) Arrival process
   c) Service mechanism
   d) None of the above

10) In a M/M/1 queuing system, what does the first "M" represent?
   a) The number of servers
   b) The arrival process distribution
   c) The service time distribution
   d) The maximum queue length

11) The objective of sequencing problem is _____.
   a) To find the order in which jobs are to be made
   b) To find the time required for completing all the jobs on hand
   c) To find the sequence in which jobs on hand are to be processed to minimize the total time required for processing the jobs
   d) To maximize the effectiveness

12) The time required for printing of four books *A, B, C* and *D* is 5, 8, 10 and 7 hours. While its data entry requires 7, 4, 3 and 6 hours respectively. The sequence time that minimizes total elapsed time is _____.
   a) ACBD
   b) ABCD
   c) ADCB
   d) CBDA

13) In a project network, the critical path _____.
   a) may be the shortest path
   b) is the longest path
   c) may be longest path
   d) is the shortest path

14) Network models help in project management for _____.
   a) Planning
   b) Scheduling
   c) Controlling
   d) All of the above

Set P

T. Y. (B.Tech.) (Mechanical Engineering) (Semester - I) (New) (CBCS) Examination: March/April – 2026
Operation Research (MECHMDM-03B)

Day & Date: Saturday, 30-05-2026 Max. Marks: 56
Time: 10:00 AM To 01:00 PM

Instructions: 1) Solve any two questions from Section – I and Section – II
2) Figures to the right indicates full marks.
3) Assume additional suitable data if necessary and state it clearly.
4) Use of scientific calculator is allowed.

SECTION – I

Q.2 a) Explain O.R. Models and their applications. **06**

b) Solve the following linear programming problem using graphical method. **08**

Maximize $Z = 6X_1 + 8X_2$
Subject to $5X_1 + 10X_2 \leq 60$
$4X_1 + 4X_2 \leq 40$
$X_1 \ \& \ X_2 \geq 0$

Q.3 a) A company has a team of four salesmen and there are four districts where the company wants to start its business. After taking into account the capabilities of salesman & the nature of districts the company estimates that the profit per day in rupees for each salesman in each district is as below. **07**

	I	II	III	IV
A	16	10	14	11
B	14	11	15	15
C	15	15	13	12
D	13	12	14	15

Find the assignment of salesmen to various districts which will yield maximum profit.

b) Solve the following problem by using NWCM and VAM Method. **07**

		DISTRIBUTER				
Company		P	Q	R	S	Supply
	A	2	3	11	7	6
	B	1	0	6	1	1
	C	5	8	15	9	10
Requirement		7	5	3	2	

Q.4 a) Solve the following transportation problem by using NWCM and VAM method. **07**

		Warehouses				
		W1	W2	W3	W4	Supply
Factories	A	19	30	50	10	7
	B	70	30	40	60	9
	C	40	8	70	20	18
Requirement		5	8	7	14	

b) Solve the following Assignment problem (Assign the jobs to the operators) so as to minimize the cost. **07**

		Jobs			
		I	II	III	IV
Operators	A	5	7	11	6
	B	8	5	9	6
	C	4	7	10	7
	D	10	4	8	3

SECTION – II

Q.5 Attempt the following questions.

a) There are five jobs, each of which has to go through Machine A and Machine B & Machine C in the order ABC. Processing time in hours are as given below: **07**

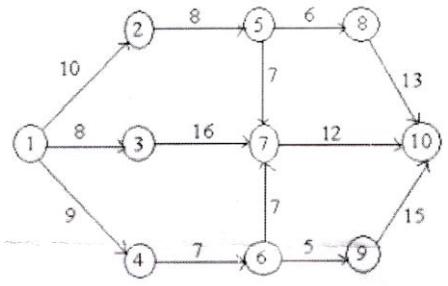
Job	1	2	3	4	5
M/C A	8	10	6	7	11
M/C B	5	6	2	3	4
M/C C	4	9	8	6	5

Determine sequence of jobs that will minimize total elapsed time, Ideal time for job.

b) Explain uniform series factors in detail. **07**

Q.6 Attempt the following questions.

a) Determine the earliest and latest timings in respect of all node points and identify critical path for the following network **07**



b) Explain in detail with example about steps for sequencing of n jobs which are being processed on three machines? **07**

Q.7 Attempt the following questions. **07**

Q.4 a) Solve the following transportation problem by using NWCM and VAM method. **07**

		Warehouses				
		W1	W2	W3	W4	Supply
Factories	A	19	30	50	10	7
	B	70	30	40	60	9
	C	40	8	70	20	18
Requirement		5	8	7	14	

b) Solve the following Assignment problem (Assign the jobs to the operators) so as to minimize the cost. **07**

		Jobs			
		I	II	III	IV
Operators	A	5	7	11	6
	B	8	5	9	6
	C	4	7	10	7
	D	10	4	8	3

SECTION – II

Q.5 Attempt the following questions.

a) There are five jobs, each of which has to go through Machine A and Machine B & Machine C in the order ABC. Processing time in hours are as given below: **07**

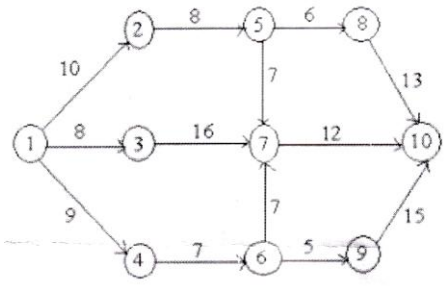
Job	1	2	3	4	5
M/C A	8	10	6	7	11
M/C B	5	6	2	3	4
M/C C	4	9	8	6	5

Determine sequence of jobs that will minimize total elapsed time, Ideal time for job.

b) Explain uniform series factors in detail. **07**

Q.6 Attempt the following questions.

a) Determine the earliest and latest timings in respect of all node points and identify critical path for the following network **07**



b) Explain in detail with example about steps for sequencing of n jobs which are being processed on three machines? **07**

Q.7 Attempt the following questions. **07**

a) Explain in details about:

i) Types of interests

ii) Types of costs

b) Differentiate between CPM & PERT. **07**

T. Y. (B.Tech.) (Civil Engineering) (Semester - I) (New) (CBCS)
Examination: March/April - 2026
PIC Microcontroller (ENTMDM-03A)

Day & Date: Saturday, 30-05-2026 Max. Marks: 70
Time: 10:00 AM To 01:00 PM

Instructions: 1) Q. No. 1 is compulsory. It should be solved in the first 30 minutes in Answer Book Page no 03 (Starting page of the Answer Book). Each question carries one mark.
2) Don't forget to Mention question paper set (P/Q/R/S) on top of page.
3) Figures to the right indicate full marks.

MCQ/Objective Type Questions

Duration: 30 Minutes Marks:14

Q.1 Choose the correct alternatives. **14**

1) PIC16F877A has a _____ bit architecture.
a) 8-bit b) 16-bit
c) 32-bit d) 4-bit

2) PIC16F877A uses which type of memory for program storage?
a) ROM b) EPROM
c) Flash d) EEPROM

3) The STATUS register in PIC is used for _____.
a) Arithmetic flag status b) Control of peripherals
c) Interrupt enable d) I/O configuration

4) PIC16F877A has how many I/O ports?
a) 3 b) 4
c) 5 d) 6

5) The oscillator section in PIC provides _____.
a) Timing and synchronization b) Power control
c) Data transfer d) Interrupt control

6) The instruction set of PIC16F877A is _____.
a) 33 instructions b) 35 instructions
c) 37 instructions d) 40 instructions

7) C programming for PIC requires which compiler?
a) MPLAB XC8 b) Turbo C
c) Code::Blocks d) Visual Studio

8) The CLRWDT instruction is used to _____.
   a) Clear Watchdog Timer b) Clear Working Register
   c) Clear RAM d) Clear Program Counter

9) The ADCON0 register controls _____.
   a) ADC channel selection and conversion
   b) Oscillator
   c) Timers
   d) Interrupts

10) CCP stands for _____.
   a) Capture/Compare/PWM b) Control/Command/Power
   c) Counter/Compare/Power d) Capture/Count/Phase

11) The MSSP module supports _____.
   a) SPI and I^2C b) UART only
   c) PWM d) ADC

12) LEDs are interfaced to PIC through _____.
   a) Output ports b) Input ports
   c) Serial ports d) ADC ports

13) LCD display commonly used with PIC is _____.
   a) 16×2 b) 4×4
   c) 8×2 d) 20×4

14) Automation refers to _____.
   a) Control with minimal human intervention
   b) Manual control
   c) Mechanical control
   d) None

Time: 10:00 AM To 01:00 PM

Instructions: 1) All questions are compulsory.
2) Figures to the right indicate full marks.

SECTION – I

Q.2 Attempt Any Four from the following. **16**

a) Draw & explain memory organization of PIC16F877 in detail.

b) Explain different I/O ports available in PIC 16F877.

c) Describe the functional any 4 pin description of PIC 16F877.

d) Interpret the functions of following SFR using suitable diagram.
i) STATUS
ii) OPTION_REG

e) Explain timer 0 operation in PIC 16F877.

Q.3 Attempt Any Two from following. **12**

a) Draw & explain architecture of PIC 16F877 microcontroller.

b) Write a C or assembly language program to perform addition & subtraction of two numbers(0×35,0×12) & send result of addition to PORT B & subtraction to PORT D in PIC 16F877.

c) What is interrupt? List out types of interrupts in PIC 16F877A.

SECTION – II

Q.4 Attempt Any Four from the following. **16**

a) Explain the SFR ADCON0 and ADCON1 Resistor.

b) Explain the serial communication using USART.

c) Explain capture module in PIC 16F877A in detail.

d) Describe interfacing of DC motor with PIC 16F877

e) Explain how LED's are interfaced with PIC 16F877.

Q.5 Attempt Any Two from following. **12**

a) Explain interfacing of 7 Segment with PIC Microcontroller.

b) Explain any one Master Synchronous Serial Port (MSSP) module.

c) Explain interfacing of LCD 16×2 with PIC 16f877.

   c) Flash
   d) EEPROM

10) The STATUS register in PIC is used for _____.
   a) Arithmetic flag status
   b) Control of peripherals
   c) Interrupt enable
   d) I/O configuration

11) PIC16F877A has how many I/O ports?
   a) 3
   b) 4
   c) 5
   d) 6

12) The oscillator section in PIC provides _____.
   a) Timing and synchronization
   b) Power control
   c) Data transfer
   d) Interrupt control

13) The instruction set of PIC16F877A is _____.
   a) 33 instructions
   b) 35 instructions
   c) 37 instructions
   d) 40 instructions

14) C programming for PIC requires which compiler?
   a) MPLAB XC8
   b) Turbo C
   c) Code::Blocks
   d) Visual Studio

Set Q

T. Y. (B.Tech.) (Computer Science & Engineering) (Semester - I) (New) (CBCS) Examination: March/April - 2026
PIC Microcontroller (ENTMDM-03A)

Day & Date: Saturday, 30-05-2026 Max. Marks: 56
Time: 10:00 AM To 01:00 PM

Instructions: 1) All questions are compulsory.
2) Figures to the right indicate full marks.

SECTION – I

Q.2 Attempt Any Four from the following. **16**

a) Draw & explain memory organization of PIC16F877 in detail.

b) Explain different I/O ports available in PIC 16F877.

c) Describe the functional any 4 pin description of PIC 16F877.

d) Interpret the functions of following SFR using suitable diagram.
i) STATUS
ii) OPTION_REG

e) Explain timer 0 operation in PIC 16F877.

Q.3 Attempt Any Two from following. **12**

a) Draw & explain architecture of PIC 16F877 microcontroller.

b) Write a C or assembly language program to perform addition & subtraction of two numbers(0×35,0×12) & send result of addition to PORT B & subtraction to PORT D in PIC 16F877.

c) What is interrupt? List out types of interrupts in PIC 16F877A.

SECTION – II

Q.4 Attempt Any Four from the following. **16**

a) Explain the SFR ADCON0 and ADCON1 Resistor.

b) Explain the serial communication using USART.

c) Explain capture module in PIC 16F877A in detail.

d) Describe interfacing of DC motor with PIC 16F877

e) Explain how LED's are interfaced with PIC 16F877.

Q.5 Attempt Any Two from following. **12**

a) Explain interfacing of 7 Segment with PIC Microcontroller.

b) Explain any one Master Synchronous Serial Port (MSSP) module.

c) Explain interfacing of LCD 16×2 with PIC 16f877.

T. Y. (B.Tech.) (Computer Science & Engineering) (Semester - I) (New) (CBCS) Examination: March/April - 2026
PIC Microcontroller (ENTMDM-03A)

Day & Date: Saturday, 30-05-2026 Max. Marks: 70
Time: 10:00 AM To 01:00 PM

Instructions: 1) Q. No. 1 is compulsory. It should be solved in the first 30 minutes in Answer Book Page no 03 (Starting page of the Answer Book). Each question carries one mark.
2) Don't forget to Mention question paper set (P/Q/R/S) on top of page.
3) Figures to the right indicate full marks.

MCQ/Objective Type Questions

Duration: 30 Minutes Marks:14

Q.1 Choose the correct alternatives. **14**

1) The MSSP module supports _____.
a) SPI and I^2C b) UART only
c) PWM d) ADC

2) LEDs are interfaced to PIC through _____.
a) Output ports b) Input ports
c) Serial ports d) ADC ports

3) LCD display commonly used with PIC is _____.
a) 16×2 b) 4×4
c) 8×2 d) 20×4

4) Automation refers to _____.
a) Control with minimal human intervention
b) Manual control
c) Mechanical control
d) None

5) PIC16F877A has a _____ bit architecture.
a) 8-bit b) 16-bit
c) 32-bit d) 4-bit

6) PIC16F877A uses which type of memory for program storage?
a) ROM b) EPROM
c) Flash d) EEPROM

7) The STATUS register in PIC is used for _____.
- a) Arithmetic flag status
- b) Control of peripherals
- c) Interrupt enable
- d) I/O configuration

8) PIC16F877A has how many I/O ports?
- a) 3
- b) 4
- c) 5
- d) 6

9) The oscillator section in PIC provides _____.
- a) Timing and synchronization
- b) Power control
- c) Data transfer
- d) Interrupt control

10) The instruction set of PIC16F877A is _____.
- a) 33 instructions
- b) 35 instructions
- c) 37 instructions
- d) 40 instructions

11) C programming for PIC requires which compiler?
- a) MPLAB XC8
- b) Turbo C
- c) Code::Blocks
- d) Visual Studio

12) The CLRWDT instruction is used to _____.
- a) Clear Watchdog Timer
- b) Clear Working Register
- c) Clear RAM
- d) Clear Program Counter

13) The ADCON0 register controls _____.
- a) ADC channel selection and conversion
- b) Oscillator
- c) Timers
- d) Interrupts

14) CCP stands for _____.
- a) Capture/Compare/PWM
- b) Control/Command/Power
- c) Counter/Compare/Power
- d) Capture/Count/Phase

3) The CLRWDT instruction is used to _____.
a) Clear Watchdog Timer b) Clear Working Register
c) Clear RAM d) Clear Program Counter

4) The ADCON0 register controls _____.
a) ADC channel selection and conversion
b) Oscillator
c) Timers
d) Interrupts

5) CCP stands for _____.
a) Capture/Compare/PWM b) Control/Command/Power
c) Counter/Compare/Power d) Capture/Count/Phase

6) The MSSP module supports _____.
a) SPI and I^2C b) UART only
c) PWM d) ADC

7) LEDs are interfaced to PIC through _____.
a) Output ports b) Input ports
c) Serial ports d) ADC ports

8) LCD display commonly used with PIC is _____.
a) 16×2 b) 4×4
c) 8×2 d) 20×4

9) Automation refers to _____.
a) Control with minimal human intervention
b) Manual control
c) Mechanical control
d) None

10) PIC16F877A has a _____ bit architecture.
a) 8-bit b) 16-bit
c) 32-bit d) 4-bit

11) PIC16F877A uses which type of memory for program storage?
a) ROM b) EPROM
c) Flash d) EEPROM

12) The STATUS register in PIC is used for _____.
a) Arithmetic flag status b) Control of peripherals
c) Interrupt enable d) I/O configuration

13) PIC16F877A has how many I/O ports?
a) 3 b) 4
c) 5 d) 6

14) The oscillator section in PIC provides _____.
a) Timing and synchronization b) Power control
c) Data transfer d) Interrupt control

T. Y. (B.Tech.) (Electrical Engineering) (Semester - I) (New) (CBCS) Examination: March/April - 2026
PIC Microcontroller (ENTMDM-03A)

Day & Date: Saturday, 30-05-2026 Max. Marks: 56
Time: 10:00 AM To 01:00 PM

Instructions: 1) All questions are compulsory.
2) Figures to the right indicate full marks.

SECTION – I

Q.2 Attempt Any Four from the following. **16**

a) Draw & explain memory organization of PIC16F877 in detail.

b) Explain different I/O ports available in PIC 16F877.

c) Describe the functional any 4 pin description of PIC 16F877.

d) Interpret the functions of following SFR using suitable diagram.
i) STATUS
ii) OPTION_REG

e) Explain timer 0 operation in PIC 16F877.

Q.3 Attempt Any Two from following. **12**

a) Draw & explain architecture of PIC 16F877 microcontroller.

b) Write a C or assembly language program to perform addition & subtraction of two numbers(0×35,0×12) & send result of addition to PORT B & subtraction to PORT D in PIC 16F877.

c) What is interrupt? List out types of interrupts in PIC 16F877A.

SECTION – II

Q.4 Attempt Any Four from the following. **16**

a) Explain the SFR ADCON0 and ADCON1 Resistor.

b) Explain the serial communication using USART.

c) Explain capture module in PIC 16F877A in detail.

d) Describe interfacing of DC motor with PIC 16F877

e) Explain how LED's are interfaced with PIC 16F877.

Q.5 Attempt Any Two from following. **12**

a) Explain interfacing of 7 Segment with PIC Microcontroller.

b) Explain any one Master Synchronous Serial Port (MSSP) module.

c) Explain interfacing of LCD 16×2 with PIC 16f877.

PIC Microcontroller (ENTMDM-03A)

Day & Date: Saturday, 30-05-2026 Max. Marks: 70
Time: 10:00 AM To 01:00 PM

Instructions: 1) Q. No. 1 is compulsory. It should be solved in the first 30 minutes in Answer Book Page no 03 (Starting page of the Answer Book). Each question carries one mark.
2) Don't forget to Mention question paper set (P/Q/R/S) on top of page.
3) Figures to the right indicate full marks.

MCQ/Objective Type Questions

Duration: 30 Minutes Marks:14

Q.1 Choose the correct alternatives. **14**

1) PIC16F877A has a _____ bit architecture.
a) 8-bit b) 16-bit
c) 32-bit d) 4-bit

2) PIC16F877A uses which type of memory for program storage?
a) ROM b) EPROM
c) Flash d) EEPROM

3) The STATUS register in PIC is used for _____.
a) Arithmetic flag status b) Control of peripherals
c) Interrupt enable d) I/O configuration

4) PIC16F877A has how many I/O ports?
a) 3 b) 4
c) 5 d) 6

5) The oscillator section in PIC provides _____.
a) Timing and synchronization b) Power control
c) Data transfer d) Interrupt control

6) The instruction set of PIC16F877A is _____.
a) 33 instructions b) 35 instructions
c) 37 instructions d) 40 instructions

7) C programming for PIC requires which compiler?
a) MPLAB XC8 b) Turbo C
c) Code::Blocks d) Visual Studio

8) The CLRWDT instruction is used to _____.
   a) Clear Watchdog Timer b) Clear Working Register
   c) Clear RAM d) Clear Program Counter

9) The ADCON0 register controls _____.

Day & Date: Saturday, 30-05-2026 Max. Marks: 70
Time: 10:00 AM To 01:00 PM

Instructions: 1) Q. No. 1 is compulsory. It should be solved in the first 30 minutes in Answer Book Page no 03 (Starting page of the Answer Book). Each question carries one mark.
2) Don't forget to Mention question paper set (P/Q/R/S) on top of page.
3) Figures to the right indicate full marks.

MCQ/Objective Type Questions

Duration: 30 Minutes Marks:14

Q.1 Choose the correct alternatives. **14**

1) The CLRWDT instruction is used to _____.
a) Clear Watchdog Timer b) Clear Working Register
c) Clear RAM d) Clear Program Counter

2) The ADCON0 register controls _____.
a) ADC channel selection and conversion
b) Oscillator
c) Timers
d) Interrupts

3) CCP stands for _____.
a) Capture/Compare/PWM b) Control/Command/Power
c) Counter/Compare/Power d) Capture/Count/Phase

4) The MSSP module supports _____.
a) SPI and I^2C b) UART only
c) PWM d) ADC

5) LEDs are interfaced to PIC through _____.
a) Output ports b) Input ports
c) Serial ports d) ADC ports

6) LCD display commonly used with PIC is _____.
a) 16×2 b) 4×4
c) 8×2 d) 20×4

7) Automation refers to _____.
   a) Control with minimal human intervention
   b) Manual control
   c) Mechanical control
   d) None

8) PIC16F877A has a _____ bit architecture.
   a) 8-bit
   b) 16-bit
   c) 32-bit
   d) 4-bit

9) PIC16F877A uses which type of memory for program storage?
   a) ROM
   b) EPROM
   c) Flash
   d) EEPROM

10) The STATUS register in PIC is used for _____.
   a) Arithmetic flag status
   b) Control of peripherals
   c) Interrupt enable
   d) I/O configuration

11) PIC16F877A has how many I/O ports?
   a) 3
   b) 4
   c) 5
   d) 6

12) The oscillator section in PIC provides _____.
   a) Timing and synchronization
   b) Power control
   c) Data transfer
   d) Interrupt control

13) The instruction set of PIC16F877A is _____.
   a) 33 instructions
   b) 35 instructions
   c) 37 instructions
   d) 40 instructions

14) C programming for PIC requires which compiler?
   a) MPLAB XC8
   b) Turbo C
   c) Code::Blocks
   d) Visual Studio

Set Q

T. Y. (B.Tech.) (Mechanical Engineering) (Semester - I) (New) (CBCS) Examination: March/April - 2026
PIC Microcontroller (ENTMDM-03A)

Day & Date: Saturday, 30-05-2026 Max. Marks: 56
Time: 10:00 AM To 01:00 PM

Instructions: 1) All questions are compulsory.
2) Figures to the right indicate full marks.

SECTION – I

Q.2 Attempt Any Four from the following. **16**

a) Draw & explain memory organization of PIC16F877 in detail.

b) Explain different I/O ports available in PIC 16F877.

c) Describe the functional any 4 pin description of PIC 16F877.

d) Interpret the functions of following SFR using suitable diagram.
i) STATUS
ii) OPTION_REG

e) Explain timer 0 operation in PIC 16F877.

Q.3 Attempt Any Two from following. **12**

a) Draw & explain architecture of PIC 16F877 microcontroller.

b) Write a C or assembly language program to perform addition & subtraction of two numbers(0×35,0×12) & send result of addition to PORT B & subtraction to PORT D in PIC 16F877.

c) What is interrupt? List out types of interrupts in PIC 16F877A.

SECTION – II

Q.4 Attempt Any Four from the following. **16**

a) Explain the SFR ADCON0 and ADCON1 Resistor.

b) Explain the serial communication using USART.

c) Explain capture module in PIC 16F877A in detail.

d) Describe interfacing of DC motor with PIC 16F877

e) Explain how LED's are interfaced with PIC 16F877.

Q.5 Attempt Any Two from following. **12**

a) Explain interfacing of 7 Segment with PIC Microcontroller.

b) Explain any one Master Synchronous Serial Port (MSSP) module.

c) Explain interfacing of LCD 16×2 with PIC 16f877.

MCQ/Objective Type Questions

Duration: 30 Minutes Marks:14

Q.1 Choose the correct alternatives. **14**

1) The MSSP module supports _____.
a) SPI and I^2C b) UART only
c) PWM d) ADC

2) LEDs are interfaced to PIC through _____.
a) Output ports b) Input ports
c) Serial ports d) ADC ports

3) LCD display commonly used with PIC is _____.
a) 16×2 b) 4×4
c) 8×2 d) 20×4

4) Automation refers to _____.
a) Control with minimal human intervention
b) Manual control
c) Mechanical control
d) None

5) PIC16F877A has a _____ bit architecture.
a) 8-bit b) 16-bit
c) 32-bit d) 4-bit

6) PIC16F877A uses which type of memory for program storage?
a) ROM b) EPROM
c) Flash d) EEPROM

7) The STATUS register in PIC is used for _____.
- a) Arithmetic flag status
- b) Control of peripherals
- c) Interrupt enable
- d) I/O configuration

8) PIC16F877A has how many I/O ports?
- a) 3
- b) 4
- c) 5
- d) 6

9) The oscillator section in PIC provides _____.
- a) Timing and synchronization
- b) Power control
- c) Data transfer
- d) Interrupt control

10) The instruction set of PIC16F877A is _____.
- a) 33 instructions
- b) 35 instructions
- c) 37 instructions
- d) 40 instructions

11) C programming for PIC requires which compiler?

MCQ/Objective Type Questions

Duration: 30 Minutes Marks:14

Q.1 Answer the following Objective Type Questions. 14

1) Which component is part of the perception/sensing layer?
a) ADC (Analog to Digital Converter)
b) Wi-Fi Router
c) Dashboard
d) Data Center

2) What is the key feature of Level 1 IoT system?
a) Uses multiple nodes
b) Sends data to the cloud
c) Local sensing and processing in a single node
d) Requires coordinator node

3) What technique is used to combine data from multiple sensors for accuracy?
a) Cloud Storage b) Sensor Fusion
c) Encryption d) MQTT Protocol

4) Which design best reduces power use in IoT wearables?
a) Continuous cloud link b) High sampling
c) Always-on sensors d) Sleep-wake cycles

5) Which of the following challenges is specific to physical design rather than logical design of IoT?
a) Protocol & API integration
b) Data flow management
c) Cloud integration
d) Hardware selection and power management

6) The first step in IoT design is _____.
a) Security planning
b) Choosing communication protocols
c) Understanding user needs
d) Creating cloud dashboards

7) An IoT application requires low-latency, bi-directional communication between client and server. Which communication API is most suitable?
a) REST API
b) WebSocket API
c) CoAP API
d) MQTT API

8) In a DDoS attack, compromised IoT devices are collectively called _____.
a) Botnets
b) Nodes
c) Clients
d) Servers

9) Which programming environment is directly supported by ThingSpeak for data analysis?
a) Python
b) MATLAB
c) R
d) C++

10) Which of the following is a characteristic of TCP?
a) Unreliable delivery
b) No sequencing
c) Connection-oriented and reliable
d) Only supports broadcast

11) Which protocol ensures end-to-end addressing in IoT devices?
a) UDP
b) TCP
c) IP
d) Zigbee

12) In IoT, end-to-end encryption ensures _____.
a) Only sender and receiver can read data
b) Data can be modified in transit
c) Data is compressed
d) Data is accessible to routers

13) Firmware updates are important because they _____.
a) Reduce power consumption
b) Fix security vulnerabilities
c) Increase memory
d) Change MAC address

14) How does IoT improve bridge maintenance compared to traditional inspection methods?
a) Reduces human involvement and enables real-time monitoring
b) Completely eliminates all maintenance needs
c) Makes bridges self-repairing
d) Only tracks traffic volume

T.Y. (B.Tech.) (Civil Engineering) (Semester - I) (New) (CBCS)
Examination: March/April - 2026
IoT Networks and Security (ENTMDM-03B)

Day & Date: Saturday, 30-05-2026 Max. Marks: 56
Time: 10:00 AM To 01:00 PM

Instructions: 1) All questions are compulsory.
2) Figures to the right indicate full marks.

SECTION – I

Q.2 Attempt Any Four Questions. **16**

a) Evaluate how design challenges affect IoT performance. Suggest solutions for each challenge.

b) Explain with neat diagram the four-layer IoT architecture with the role and key components of each layer.

c) Write short notes on Wireless Sensor Networks (WSN) and their role in IoT.

d) Differentiate between Physical Design & Logical Design of IOT based on following points: Purpose, Security Concern, Components & Connectivity.

e) Explain IaaS, PaaS, and SaaS in Cloud Computing with examples relevant to IoT.

Q.3 Attempt Any Two Questions. **12**

a) Describe Level 2 IoT system. How is it different from Level 1 in terms of data storage and analysis?

b) Define Internet of Everything (IoE). How is it different from IoT? Explain the four core elements of IoE with examples.

c) Explain the four IoT communication models — Request-Response, Publish-Subscribe, Push-Pull, and Exclusive Pair.

SECTION – II

Q.4 Attempt Any Four Questions. **16**

a) Discuss the workflow of Participatory Sensing in IoT with neat diagram.

b) Explain the concept of Confidentiality, Integrity, and Availability (CIA) in IoT.

c) Compare IPv4 and IPv6 addressing in IOT (Any 4 Points).

d) Describe different types of IoT attacks with examples.

e) Illustrate the components of Automotive IoT and discuss their role in connected vehicles.

Q.5 Attempt Any Two Question. **12**

a) Define M2M communication and list its key features. Also explain the role of sensors and communication networks in M2M architecture.

b) Evaluate the suitability of UDP & TCP in IoT applications with example.

c) The frequent breakdown of college buses due to overheating and poor maintenance has caused safety issues and delays. As an IoT engineer, design a Vehicle Health Monitoring System that detects and reports the engine temperature, battery status, Tyre pressure, fuel level, GPS location etc. in real time.

Time: 10:00 AM To 01:00 PM

Instructions: 1) All questions are compulsory.
2) Figures to the right indicate full marks.

SECTION – I

Q.2 Attempt Any Four Questions. **16**

a) Evaluate how design challenges affect IoT performance. Suggest solutions for each challenge.

b) Explain with neat diagram the four-layer IoT architecture with the role and key components of each layer.

c) Write short notes on Wireless Sensor Networks (WSN) and their role in IoT.

d) Differentiate between Physical Design & Logical Design of IOT based on following points: Purpose, Security Concern, Components & Connectivity.

e) Explain IaaS, PaaS, and SaaS in Cloud Computing with examples relevant to IoT.

Q.3 Attempt Any Two Questions. **12**

a) Describe Level 2 IoT system. How is it different from Level 1 in terms of data storage and analysis?

b) Define Internet of Everything (IoE). How is it different from IoT? Explain the four core elements of IoE with examples.

c) Explain the four IoT communication models — Request-Response, Publish-Subscribe, Push-Pull, and Exclusive Pair.

SECTION – II

Q.4 Attempt Any Four Questions. **16**

a) Discuss the workflow of Participatory Sensing in IoT with neat diagram.

b) Explain the concept of Confidentiality, Integrity, and Availability (CIA) in IoT.

c) Compare IPv4 and IPv6 addressing in IOT (Any 4 Points).

d) Describe different types of IoT attacks with examples.

e) Illustrate the components of Automotive IoT and discuss their role in connected vehicles.

Q.5 Attempt Any Two Question. **12**

a) Define M2M communication and list its key features. Also explain the role of sensors and communication networks in M2M architecture.

b) Evaluate the suitability of UDP & TCP in IoT applications with example.

c) The frequent breakdown of college buses due to overheating and poor maintenance has caused safety issues and delays. As an IoT engineer, design a Vehicle Health Monitoring System that detects and reports the engine temperature, battery status, Tyre pressure, fuel level, GPS location etc. in real time.

Set **S**

T.Y. (B.Tech.) (Civil Engineering) (Semester - I) (New) (CBCS)
Examination: March/April - 2026
IoT Networks and Security (ENTMDM-03B)

Day & Date: Saturday, 30-05-2026 Max. Marks: 70
Time: 10:00 AM To 01:00 PM

Instructions: 1) Q. No. 1 is compulsory. It should be solved in the first 30 minutes in Answer Book Page no 03 (Starting page of the Answer Book). Each question carries one mark.
2) Don't forget to Mention question paper set (P/Q/R/S) on top of page.
3) Figures to the right indicate full marks.

MCQ/Objective Type Questions

Duration: 30 Minutes Marks:14

Q.1 Answer the following Objective Type Questions. **14**

1) The first step in IoT design is _____.
a) Security planning
b) Choosing communication protocols
c) Understanding user needs
d) Creating cloud dashboards

2) An IoT application requires low-latency, bi-directional communication between client and server. Which communication API is most suitable?
a) REST API b) WebSocket API
c) CoAP API d) MQTT API

3) In a DDoS attack, compromised IoT devices are collectively called _____.
a) Botnets b) Nodes
c) Clients d) Servers

4) Which programming environment is directly supported by ThingSpeak for data analysis?
a) Python b) MATLAB
c) R d) C++

5) Which of the following is a characteristic of TCP?
a) Unreliable delivery
b) No sequencing
c) Connection-oriented and reliable
d) Only supports broadcast

6) Which protocol ensures end-to-end addressing in IoT devices?
a) UDP b) TCP
c) IP d) Zigbee

7) In IoT, end-to-end encryption ensures _____.
   a) Only sender and receiver can read data
   b) Data can be modified in transit
   c) Data is compressed
   d) Data is accessible to routers

8) Firmware updates are important because they _____.
   a) Reduce power consumption
   b) Fix security vulnerabilities
   c) Increase memory
   d) Change MAC address

9) How does IoT improve bridge maintenance compared to traditional inspection methods?
   a) Reduces human involvement and enables real-time monitoring
   b) Completely eliminates all maintenance needs
   c) Makes bridges self-repairing
   d) Only tracks traffic volume

10) Which component is part of the perception/sensing layer?
   a) ADC (Analog to Digital Converter)
   b) Wi-Fi Router
   c) Dashboard
   d) Data Center

11) What is the key feature of Level 1 IoT system?
   a) Uses multiple nodes
   b) Sends data to the cloud
   c) Local sensing and processing in a single node
   d) Requires coordinator node

12) What technique is used to combine data from multiple sensors for accuracy?
   a) Cloud Storage
   b) Sensor Fusion
   c) Encryption
   d) MQTT Protocol

13) Which design best reduces power use in IoT wearables?
   a) Continuous cloud link
   b) High sampling
   c) Always-on sensors
   d) Sleep-wake cycles

14) Which of the following challenges is specific to physical design rather than logical design of IoT?
   a) Protocol & API integration
   b) Data flow management
   c) Cloud integration
   d) Hardware selection and power management

Day & Date: Saturday, 30-05-2026 Max. Marks: 70
Time: 10:00 AM To 01:00 PM

Instructions: 1) Q. No. 1 is compulsory. It should be solved in the first 30 minutes in Answer Book Page no 03 (Starting page of the Answer Book). Each question carries one mark.
2) Don't forget to Mention question paper set (P/Q/R/S) on top of page.
3) Figures to the right indicate full marks.

MCQ/Objective Type Questions

Duration: 30 Minutes Marks:14

Q.1 Answer the following Objective Type Questions. 14

1) Which component is part of the perception/sensing layer?
a) ADC (Analog to Digital Converter)
b) Wi-Fi Router
c) Dashboard
d) Data Center

2) What is the key feature of Level 1 IoT system?
a) Uses multiple nodes
b) Sends data to the cloud
c) Local sensing and processing in a single node
d) Requires coordinator node

3) What technique is used to combine data from multiple sensors for accuracy?
a) Cloud Storage b) Sensor Fusion
c) Encryption d) MQTT Protocol

4) Which design best reduces power use in IoT wearables?
a) Continuous cloud link b) High sampling
c) Always-on sensors d) Sleep-wake cycles

5) Which of the following challenges is specific to physical design rather than logical design of IoT?
a) Protocol & API integration
b) Data flow management
c) Cloud integration
d) Hardware selection and power management

6) The first step in IoT design is _____.
a) Security planning
b) Choosing communication protocols
c) Understanding user needs
d) Creating cloud dashboards

7) An IoT application requires low-latency, bi-directional communication between client and server. Which communication API is most suitable?
a) REST API
b) WebSocket API
c) CoAP API
d) MQTT API

8) In a DDoS attack, compromised IoT devices are collectively called _____.
a) Botnets
b) Nodes
c) Clients
d) Servers

9) Which programming environment is directly supported by ThingSpeak for data analysis?
a) Python
b) MATLAB
c) R
d) C++

10) Which of the following is a characteristic of TCP?
a) Unreliable delivery
b) No sequencing
c) Connection-oriented and reliable
d) Only supports broadcast

11) Which protocol ensures end-to-end addressing in IoT devices?
a) UDP
b) TCP
c) IP
d) Zigbee

12) In IoT, end-to-end encryption ensures _____.
a) Only sender and receiver can read data
b) Data can be modified in transit
c) Data is compressed
d) Data is accessible to routers

13) Firmware updates are important because they _____.
a) Reduce power consumption
b) Fix security vulnerabilities
c) Increase memory
d) Change MAC address

14) How does IoT improve bridge maintenance compared to traditional inspection methods?
a) Reduces human involvement and enables real-time monitoring
b) Completely eliminates all maintenance needs
c) Makes bridges self-repairing
d) Only tracks traffic volume

Seat No.	

Set **P**

T.Y. (B.Tech.) (Electrical Engineering) (Semester - I) (New) (CBCS) Examination: March/April - 2026
IoT Networks and Security (ENTMDM-03B)

Day & Date: Saturday, 30-05-2026 Max. Marks: 56
Time: 10:00 AM To 01:00 PM

Instructions: 1) All questions are compulsory.
2) Figures to the right indicate full marks.

SECTION – I

Q.2 Attempt Any Four Questions. **16**

a) Evaluate how design challenges affect IoT performance. Suggest solutions for each challenge.

b) Explain with neat diagram the four-layer IoT architecture with the role and key components of each layer.

c) Write short notes on Wireless Sensor Networks (WSN) and their role in IoT.

d) Differentiate between Physical Design & Logical Design of IOT based on following points: Purpose, Security Concern, Components & Connectivity.

e) Explain IaaS, PaaS, and SaaS in Cloud Computing with examples relevant to IoT.

Q.3 Attempt Any Two Questions. **12**

a) Describe Level 2 IoT system. How is it different from Level 1 in terms of data storage and analysis?

b) Define Internet of Everything (IoE). How is it different from IoT? Explain the four core elements of IoE with examples.

c) Explain the four IoT communication models — Request-Response, Publish-Subscribe, Push-Pull, and Exclusive Pair.

SECTION – II

Q.4 Attempt Any Four Questions. **16**

a) Discuss the workflow of Participatory Sensing in IoT with neat diagram.

b) Explain the concept of Confidentiality, Integrity, and Availability (CIA) in IoT.

c) Compare IPv4 and IPv6 addressing in IOT (Any 4 Points).

d) Describe different types of IoT attacks with examples.

e) Illustrate the components of Automotive IoT and discuss their role in connected vehicles.

Q.5 Attempt Any Two Question. **12**

a) Define M2M communication and list its key features. Also explain the role of sensors and communication networks in M2M architecture.

b) Evaluate the suitability of UDP & TCP in IoT applications with example.

c) The frequent breakdown of college buses due to overheating and poor maintenance has caused safety issues and delays. As an IoT engineer, design a Vehicle Health Monitoring System that detects and reports the engine temperature, battery status, Tyre pressure, fuel level, GPS location etc. in real time.

   c) Always-on sensors
   d) Sleep-wake cycles

12) Which of the following challenges is specific to physical design rather than logical design of IoT?
   a) Protocol & API integration
   b) Data flow management
   c) Cloud integration
   d) Hardware selection and power management

13) The first step in IoT design is _____.
   a) Security planning
   b) Choosing communication protocols
   c) Understanding user needs
   d) Creating cloud dashboards

14) An IoT application requires low-latency, bi-directional communication between client and server. Which communication API is most suitable?
   a) REST API
   b) WebSocket API
   c) CoAP API
   d) MQTT API

Set **Q**

T.Y. (B.Tech.) (Electronics & Telecommunication Engineering) (Semester - I) (New) (CBCS) Examination: March/April - 2026
IoT Networks and Security (ENTMDM-03B)

Day & Date: Saturday, 30-05-2026 Max. Marks: 56
Time: 10:00 AM To 01:00 PM

Instructions: 1) All questions are compulsory.
2) Figures to the right indicate full marks.

SECTION – I

Q.2 Attempt Any Four Questions. **16**

a) Evaluate how design challenges affect IoT performance. Suggest solutions for each challenge.

b) Explain with neat diagram the four-layer IoT architecture with the role and key components of each layer.

c) Write short notes on Wireless Sensor Networks (WSN) and their role in IoT.

d) Differentiate between Physical Design & Logical Design of IOT based on following points: Purpose, Security Concern, Components & Connectivity.

e) Explain IaaS, PaaS, and SaaS in Cloud Computing with examples relevant to IoT.

Q.3 Attempt Any Two Questions. **12**

a) Describe Level 2 IoT system. How is it different from Level 1 in terms of data storage and analysis?

b) Define Internet of Everything (IoE). How is it different from IoT? Explain the four core elements of IoE with examples.

c) Explain the four IoT communication models — Request-Response, Publish-Subscribe, Push-Pull, and Exclusive Pair.

SECTION – II

Q.4 Attempt Any Four Questions. **16**

a) Discuss the workflow of Participatory Sensing in IoT with neat diagram.

b) Explain the concept of Confidentiality, Integrity, and Availability (CIA) in IoT.

c) Compare IPv4 and IPv6 addressing in IOT (Any 4 Points).

d) Describe different types of IoT attacks with examples.

e) Illustrate the components of Automotive IoT and discuss their role in connected vehicles.

Q.5 Attempt Any Two Question. **12**

a) Define M2M communication and list its key features. Also explain the role of sensors and communication networks in M2M architecture.

b) Evaluate the suitability of UDP & TCP in IoT applications with example.

c) The frequent breakdown of college buses due to overheating and poor maintenance has caused safety issues and delays. As an IoT engineer, design a Vehicle Health Monitoring System that detects and reports the engine temperature, battery status, Tyre pressure, fuel level, GPS location etc. in real time.

Seat No.	

Set **R**

T.Y. (B.Tech.) (Electronics & Telecommunication Engineering) (Semester - I) (New) (CBCS) Examination: March/April - 2026
IoT Networks and Security (ENTMDM-03B)

Day & Date: Saturday, 30-05-2026 Max. Marks: 70
Time: 10:00 AM To 01:00 PM

Instructions: 1) Q. No. 1 is compulsory. It should be solved in the first 30 minutes in Answer Book Page no 03 (Starting page of the Answer Book). Each question carries one mark.
2) Don't forget to Mention question paper set (P/Q/R/S) on top of page.
3) Figures to the right indicate full marks.

MCQ/Objective Type Questions

Duration: 30 Minutes Marks:14

Q.1 Answer the following Objective Type Questions. **14**

1) Which protocol ensures end-to-end addressing in IoT devices?
a) UDP b) TCP
c) IP d) Zigbee

2) In IoT, end-to-end encryption ensures _____.
a) Only sender and receiver can read data
b) Data can be modified in transit
c) Data is compressed
d) Data is accessible to routers

3) Firmware updates are important because they _____.
a) Reduce power consumption
b) Fix security vulnerabilities
c) Increase memory
d) Change MAC address

4) How does IoT improve bridge maintenance compared to traditional inspection methods?
a) Reduces human involvement and enables real-time monitoring
b) Completely eliminates all maintenance needs
c) Makes bridges self-repairing
d) Only tracks traffic volume

5) Which component is part of the perception/sensing layer?
a) ADC (Analog to Digital Converter)
b) Wi-Fi Router
c) Dashboard
d) Data Center

6) What is the key feature of Level 1 IoT system?
a) Uses multiple nodes
b) Sends data to the cloud
c) Local sensing and processing in a single node
d) Requires coordinator node

7) What technique is used to combine data from multiple sensors for accuracy?
a) Cloud Storage
b) Sensor Fusion
c) Encryption
d) MQTT Protocol

8) Which design best reduces power use in IoT wearables?
a) Continuous cloud link
b) High sampling
c) Always-on sensors
d) Sleep-wake cycles

9) Which of the following challenges is specific to physical design rather than logical design of IoT?
a) Protocol & API integration
b) Data flow management
c) Cloud integration
d) Hardware selection and power management

10) The first step in IoT design is _____.
a) Security planning
b) Choosing communication protocols
c) Understanding user needs
d) Creating cloud dashboards

11) An IoT application requires low-latency, bi-directional communication between client and server. Which communication API is most suitable?
a) REST API
b) WebSocket API
c) CoAP API
d) MQTT API

12) In a DDoS attack, compromised IoT devices are collectively called _____.
a) Botnets
b) Nodes
c) Clients
d) Servers

13) Which programming environment is directly supported by ThingSpeak for data analysis?
a) Python
b) MATLAB
c) R
d) C++

14) Which of the following is a characteristic of TCP?
a) Unreliable delivery
b) No sequencing
c) Connection-oriented and reliable
d) Only supports broadcast

T.Y. (B.Tech.) (Mechanical Engineering) (Semester - I) (New) (CBCS)
Examination: March/April - 2026
IoT Networks and Security (ENTMDM-03B)

Day & Date: Saturday, 30-05-2026 Max. Marks: 70
Time: 10:00 AM To 01:00 PM

Instructions: 1) Q. No. 1 is compulsory. It should be solved in the first 30 minutes in Answer Book Page no 03 (Starting page of the Answer Book). Each question carries one mark.
2) Don't forget to Mention question paper set (P/Q/R/S) on top of page.
3) Figures to the right indicate full marks.

MCQ/Objective Type Questions

Duration: 30 Minutes Marks:14

Q.1 Answer the following Objective Type Questions. 14

1) The first step in IoT design is _____.
a) Security planning
b) Choosing communication protocols
c) Understanding user needs
d) Creating cloud dashboards

2) An IoT application requires low-latency, bi-directional communication between client and server. Which communication API is most suitable?
a) REST API b) WebSocket API
c) CoAP API d) MQTT API

3) In a DDoS attack, compromised IoT devices are collectively called _____.
a) Botnets b) Nodes
c) Clients d) Servers

4) Which programming environment is directly supported by ThingSpeak for data analysis?
a) Python b) MATLAB
c) R d) C++

5) Which of the following is a characteristic of TCP?
a) Unreliable delivery
b) No sequencing
c) Connection-oriented and reliable
d) Only supports broadcast

6) Which protocol ensures end-to-end addressing in IoT devices?
a) UDP b) TCP
c) IP d) Zigbee

7) In IoT, end-to-end encryption ensures _____.
   a) Only sender and receiver can read data
   b) Data can be modified in transit
   c) Data is compressed
   d) Data is accessible to routers

8) Firmware updates are important because they _____.
   a) Reduce power consumption
   b) Fix security vulnerabilities
   c) Increase memory
   d) Change MAC address

9) How does IoT improve bridge maintenance compared to traditional inspection methods?
   a) Reduces human involvement and enables real-time monitoring
   b) Completely eliminates all maintenance needs
   c) Makes bridges self-repairing
   d) Only tracks traffic volume

10) Which component is part of the perception/sensing layer?
   a) ADC (Analog to Digital Converter)
   b) Wi-Fi Router
   c) Dashboard
   d) Data Center

11) What is the key feature of Level 1 IoT system?
   a) Uses multiple nodes
   b) Sends data to the cloud
   c) Local sensing and processing in a single node
   d) Requires coordinator node

12) What technique is used to combine data from multiple sensors for accuracy?
   a) Cloud Storage
   b) Sensor Fusion
   c) Encryption
   d) MQTT Protocol

13) Which design best reduces power use in IoT wearables?
   a) Continuous cloud link
   b) High sampling
   c) Always-on sensors
   d) Sleep-wake cycles

14) Which of the following challenges is specific to physical design rather than logical design of IoT?
   a) Protocol & API integration
   b) Data flow management
   c) Cloud integration
   d) Hardware selection and power management

Seat No.	

Set **S**

T.Y. (B.Tech.) (Mechanical Engineering) (Semester - I) (New) (CBCS)
Examination: March/April - 2026
IoT Networks and Security (ENTMDM-03B)

Day & Date: Saturday, 30-05-2026 Max. Marks: 56
Time: 10:00 AM To 01:00 PM

Instructions: 1) All questions are compulsory.
2) Figures to the right indicate full marks.

SECTION – I

Q.2 Attempt Any Four Questions. **16**

a) Evaluate how design challenges affect IoT performance. Suggest solutions for each challenge.

b) Explain with neat diagram the four-layer IoT architecture with the role and key components of each layer.

c) Write short notes on Wireless Sensor Networks (WSN) and their role in IoT.

d) Differentiate between Physical Design & Logical Design of IOT based on following points: Purpose, Security Concern, Components & Connectivity.

e) Explain IaaS, PaaS, and SaaS in Cloud Computing with examples relevant to IoT.

Q.3 Attempt Any Two Questions. **12**

a) Describe Level 2 IoT system. How is it different from Level 1 in terms of data storage and analysis?

b) Define Internet of Everything (IoE). How is it different from IoT? Explain the four core elements of IoE with examples.

c) Explain the four IoT communication models — Request-Response, Publish-Subscribe, Push-Pull, and Exclusive Pair.

SECTION – II

Q.4 Attempt Any Four Questions. **16**

a) Discuss the workflow of Participatory Sensing in IoT with neat diagram.

b) Explain the concept of Confidentiality, Integrity, and Availability (CIA) in IoT.

c) Compare IPv4 and IPv6 addressing in IOT (Any 4 Points).

d) Describe different types of IoT attacks with examples.

e) Illustrate the components of Automotive IoT and discuss their role in connected vehicles.

Q.5 Attempt Any Two Question. **12**

a) Define M2M communication and list its key features. Also explain the role of sensors and communication networks in M2M architecture.

b) Evaluate the suitability of UDP & TCP in IoT applications with example.

c) The frequent breakdown of college buses due to overheating and poor maintenance has caused safety issues and delays. As an IoT engineer, design a Vehicle Health Monitoring System that detects and reports the engine temperature, battery status, Tyre pressure, fuel level, GPS location etc. in real time.

Examination: March/April - 2026
Machine Learning (CSEMDM-03A)

Day & Date: Saturday, 30-05-2026 Max. Marks: 70
Time: 10:00 AM To 01:00 PM

Instructions: 1) Q. No. 1 is compulsory. It should be solved in the first 30 minutes in Answer Book Page no 03 (Starting page of the Answer Book). Each question carries one mark.
2) Don't forget to Mention question paper set (P/Q/R/S) on top of page.
3) Figures to the right indicate full marks.

MCQ/Objective Type Questions

Duration: 30 Minutes Marks:14

Q.1 Choose the correct alternatives from the given options. 14

1) A well-posed learning problem is defined by _____.
a) Unclear inputs
b) Random outputs
c) Defined inputs, outputs, and success criteria
d) Infinite possibilities

2) Which of the following is not a category of machine learning?
a) Supervised learning b) Unsupervised learning
c) Reinforcement learning d) Complex learning

3) What is the purpose of the conditional probability in classification?
a) It reduces computation
b) It helps identify continuous variables
c) It estimates the likelihood of an event given evidence
d) It optimizes the cost function

4) Which algorithm is based on distance between data points?
a) Decision Tree b) k-Nearest Neighbors (k-NN)
c) Naïve Bayes d) Logistic Regression

5) What is entropy in the context of decision trees?
a) Data inconsistency b) Information gain
c) Measure of impurity d) Tree height

6) Which method randomly selects subsets of features and data samples?
a) Logistic Regression b) Random Forest
c) Decision Tree d) Naïve Bayes

7) In clustering, what does the “k” in k-means represent?
a) Number of data points
b) Number of clusters
c) Number of attributes
d) Number of iterations

8) Multiple linear regression has _____.
a) One independent variable
b) No dependent variable
c) Multiple dependent variables
d) Multiple independent variables

9) In association rules, A → B implies _____.
a) If A occurs, B never occurs
b) A and B are identical
c) If A occurs, B is likely to occur
d) A and B are unrelated

10) Which term describes a model performing well on training data but poorly on unseen data?
a) Underfitting
b) Overfitting
c) Regularization
d) Normalization

11) In Leave-One-Out Cross Validation (LOOCV), number of folds equals _____.
a) k
b) Size of dataset
c) Half of dataset
d) 10

12) What is hyperparameter tuning?
a) Adjusting test samples
b) Modifying model weights
c) Finding the best configuration settings for the model
d) Changing dataset

13) In reinforcement learning, the learning is driven by _____.
a) Labels
b) Direct instruction
c) Feedback in the form of rewards and punishments
d) Data clustering

14) Which model is generally easier to interpret?
a) Linear Regression
b) Deep Neural Networks
c) Random Forest
d) SVM

Time: 10:00 AM To 01:00 PM

Instructions: 1) All questions are compulsory.
2) Figures to the right indicate full marks.

SECTION – I

Q.2 Attempt Any Four. **16**

a) Describe the steps involved in building a classification model.

b) Explain Simple linear regression and multiple linear regression algorithm.

c) Discuss how we should improve accuracy of linear regression model.

d) Explain Logistic regression in details.

e) What is the conditional probability that it is raining, given that someone is carrying an umbrella? i.e P(Rain I Umbrella).
Suppose you observed 100 people over several days and noted whether it was raining and whether they carried an umbrella:

Situation	Count
Rain and Umbrella	30
Rain and No Umbrella	10
No Rain and Umbrella	10
No Rain and No Umbrella	50
Total	100

Q.3 Attempt Any Two. **12**

a) List and briefly explain assumptions of linear regression analysis.

b) Compare between Supervised learning, Unsupervised learning, and Reinforcement learning.

c) Predict whether a new customer will churn using KNN classification algorithm for following dataset.
New Customer to Classify: Call Minutes: 160, Support Tickets: 2, Monthly Charge: 45

Customer ID	Call Minutes	Support Tickets	Monthly Charge	Churn
C1	200	1	50	No
C2	300	0	70	No
C3	100	3	30	Yes
C4	150	2	40	Yes
C5	250	1	60	No

SECTION – II

Q.4 Attempt Any Four. **16**

a) List & explain future trends of Machine Learning.

b) Explain the concept of clustering and Clustering Techniques.

c) Explain concept of Hierarchical Clustering.

d) Explain the steps of "Training a Model" for a given machine learning problem.

e) Describe any four applications of unsupervised learning.

Q.5 Attempt Any Two. **12**

a) What is model evaluation in ML? Why it is important in ML?

b) Define cost function & explain its types in detail.

c) Explain following partitioning methods with example.

i) K-means

ii) K-medoids

MCQ/Objective Type Questions

Duration: 30 Minutes Marks:14

Q.1 Choose the correct alternatives from the given options. 14

1) A well-posed learning problem is defined by _____.
a) Unclear inputs
b) Random outputs
c) Defined inputs, outputs, and success criteria
d) Infinite possibilities

2) Which of the following is not a category of machine learning?
a) Supervised learning b) Unsupervised learning
c) Reinforcement learning d) Complex learning

3) What is the purpose of the conditional probability in classification?
a) It reduces computation
b) It helps identify continuous variables
c) It estimates the likelihood of an event given evidence
d) It optimizes the cost function

4) Which algorithm is based on distance between data points?
a) Decision Tree b) k-Nearest Neighbors (k-NN)
c) Naïve Bayes d) Logistic Regression

5) What is entropy in the context of decision trees?
a) Data inconsistency b) Information gain
c) Measure of impurity d) Tree height

6) Which method randomly selects subsets of features and data samples?
a) Logistic Regression b) Random Forest
c) Decision Tree d) Naïve Bayes

7) In clustering, what does the “k” in k-means represent?
a) Number of data points
b) Number of clusters
c) Number of attributes
d) Number of iterations

8) Multiple linear regression has _____.
a) One independent variable
b) No dependent variable
c) Multiple dependent variables
d) Multiple independent variables

9) In association rules, A → B implies _____.
a) If A occurs, B never occurs
b) A and B are identical
c) If A occurs, B is likely to occur
d) A and B are unrelated

10) Which term describes a model performing well on training data but poorly on unseen data?
a) Underfitting
b) Overfitting
c) Regularization
d) Normalization

11) In Leave-One-Out Cross Validation (LOOCV), number of folds equals _____.
a) k
b) Size of dataset
c) Half of dataset
d) 10

12) What is hyperparameter tuning?
a) Adjusting test samples
b) Modifying model weights
c) Finding the best configuration settings for the model
d) Changing dataset

13) In reinforcement learning, the learning is driven by _____.
a) Labels
b) Direct instruction
c) Feedback in the form of rewards and punishments
d) Data clustering

14) Which model is generally easier to interpret?
a) Linear Regression
b) Deep Neural Networks
c) Random Forest
d) SVM

Seat No.	

Set P

T. Y. (B.Tech.) (Computer Science & Engineering) (Semester - I) (New) (CBCS) Examination: March/April - 2026
Machine Learning (CSEMDM-03A)

Day & Date: Saturday, 30-05-2026 Max. Marks: 56
Time: 10:00 AM To 01:00 PM

Instructions: 1) All questions are compulsory.
2) Figures to the right indicate full marks.

SECTION – I

Q.2 Attempt Any Four. **16**

a) Describe the steps involved in building a classification model.

b) Explain Simple linear regression and multiple linear regression algorithm.

c) Discuss how we should improve accuracy of linear regression model.

d) Explain Logistic regression in details.

e) What is the conditional probability that it is raining, given that someone is carrying an umbrella? i.e P(Rain I Umbrella).
Suppose you observed 100 people over several days and noted whether it was raining and whether they carried an umbrella:

Situation	Count
Rain and Umbrella	30
Rain and No Umbrella	10
No Rain and Umbrella	10
No Rain and No Umbrella	50
Total	100

Q.3 Attempt Any Two. **12**

a) List and briefly explain assumptions of linear regression analysis.

b) Compare between Supervised learning, Unsupervised learning, and Reinforcement learning.

c) Predict whether a new customer will churn using KNN classification algorithm for following dataset.
New Customer to Classify: Call Minutes: 160, Support Tickets: 2, Monthly Charge: 45

Customer ID	Call Minutes	Support Tickets	Monthly Charge	Churn
C1	200	1	50	No
C2	300	0	70	No
C3	100	3	30	Yes
C4	150	2	40	Yes
C5	250	1	60	No

SECTION – II

Q.4 Attempt Any Four. **16**

a) List & explain future trends of Machine Learning.

b) Explain the concept of clustering and Clustering Techniques.

c) Explain concept of Hierarchical Clustering.

d) Explain the steps of "Training a Model" for a given machine learning problem.

e) Describe any four applications of unsupervised learning.

Q.5 Attempt Any Two. **12**

a) What is model evaluation in ML? Why it is important in ML?

b) Define cost function & explain its types in detail.

c) Explain following partitioning methods with example.

i) K-means

ii) K-medoids

Seat No.	

Set **Q**

T. Y. (B.Tech.) (Computer Science & Engineering) (Semester - I) (New) (CBCS) Examination: March/April - 2026
Machine Learning (CSEMDM-03A)

Day & Date: Saturday, 30-05-2026 Max. Marks: 70
Time: 10:00 AM To 01:00 PM

Instructions: 1) Q. No. 1 is compulsory. It should be solved in the first 30 minutes in Answer Book Page no 03 (Starting page of the Answer Book). Each question carries one mark.
2) Don't forget to Mention question paper set (P/Q/R/S) on top of page.
3) Figures to the right indicate full marks.

MCQ/Objective Type Questions

Duration: 30 Minutes Marks:14

Q.1 Choose the correct alternatives from the given options. **14**

1) Multiple linear regression has _____.
a) One independent variable
b) No dependent variable
c) Multiple dependent variables
d) Multiple independent variables

2) In association rules, A → B implies _____.
a) If A occurs, B never occurs
b) A and B are identical
c) If A occurs, B is likely to occur
d) A and B are unrelated

3) Which term describes a model performing well on training data but poorly on unseen data?
a) Underfitting b) Overfitting
c) Regularization d) Normalization

4) In Leave-One-Out Cross Validation (LOOCV), number of folds equals _____.
a) k b) Size of dataset
c) Half of dataset d) 10

5) What is hyperparameter tuning?
a) Adjusting test samples
b) Modifying model weights
c) Finding the best configuration settings for the model
d) Changing dataset

6) In reinforcement learning, the learning is driven by _____.
   a) Labels
   b) Direct instruction
   c) Feedback in the form of rewards and punishments
   d) Data clustering

7) Which model is generally easier to interpret?
   a) Linear Regression
   b) Deep Neural Networks
   c) Random Forest
   d) SVM

8) A well-posed learning problem is defined by _____.
   a) Unclear inputs

   d) Data clustering

7) Which model is generally easier to interpret?
   a) Linear Regression
   b) Deep Neural Networks
   c) Random Forest
   d) SVM

8) A well-posed learning problem is defined by _____.
   a) Unclear inputs
   b) Random outputs
   c) Defined inputs, outputs, and success criteria
   d) Infinite possibilities

9) Which of the following is not a category of machine learning?
   a) Supervised learning
   b) Unsupervised learning
   c) Reinforcement learning
   d) Complex learning

10) What is the purpose of the conditional probability in classification?
   a) It reduces computation
   b) It helps identify continuous variables
   c) It estimates the likelihood of an event given evidence
   d) It optimizes the cost function

11) Which algorithm is based on distance between data points?
   a) Decision Tree
   b) k-Nearest Neighbors (k-NN)
   c) Naïve Bayes
   d) Logistic Regression

12) What is entropy in the context of decision trees?
   a) Data inconsistency
   b) Information gain
   c) Measure of impurity
   d) Tree height

13) Which method randomly selects subsets of features and data samples?
   a) Logistic Regression
   b) Random Forest
   c) Decision Tree
   d) Naïve Bayes

14) In clustering, what does the “k” in k-means represent?
   a) Number of data points
   b) Number of clusters
   c) Number of attributes
   d) Number of iterations

Seat No.	

Set **Q**

T. Y. (B.Tech.) (Electrical Engineering) (Semester - I) (New) (CBCS) Examination: March/April - 2026
Machine Learning (CSEMDM-03A)

Day & Date: Saturday, 30-05-2026 Max. Marks: 56
Time: 10:00 AM To 01:00 PM

Instructions: 1) All questions are compulsory.
2) Figures to the right indicate full marks.

SECTION – I

Q.2 Attempt Any Four. **16**

a) Describe the steps involved in building a classification model.

b) Explain Simple linear regression and multiple linear regression algorithm.

c) Discuss how we should improve accuracy of linear regression model.

d) Explain Logistic regression in details.

e) What is the conditional probability that it is raining, given that someone is carrying an umbrella? i.e P(Rain I Umbrella).
Suppose you observed 100 people over several days and noted whether it was raining and whether they carried an umbrella:

Situation	Count
Rain and Umbrella	30
Rain and No Umbrella	10
No Rain and Umbrella	10
No Rain and No Umbrella	50
Total	100

Q.3 Attempt Any Two. **12**

a) List and briefly explain assumptions of linear regression analysis.

b) Compare between Supervised learning, Unsupervised learning, and Reinforcement learning.

c) Predict whether a new customer will churn using KNN classification algorithm for following dataset.
New Customer to Classify: Call Minutes: 160, Support Tickets: 2, Monthly Charge: 45

Customer ID	Call Minutes	Support Tickets	Monthly Charge	Churn
C1	200	1	50	No
C2	300	0	70	No
C3	100	3	30	Yes
C4	150	2	40	Yes
C5	250	1	60	No

SECTION – II

Q.4 Attempt Any Four. **16**

a) List & explain future trends of Machine Learning.

b) Explain the concept of clustering and Clustering Techniques.

c) Explain concept of Hierarchical Clustering.

d) Explain the steps of "Training a Model" for a given machine learning problem.

e) Describe any four applications of unsupervised learning.

Q.5 Attempt Any Two. **12**

a) What is model evaluation in ML? Why it is important in ML?

b) Define cost function & explain its types in detail.

c) Explain following partitioning methods with example.

i) K-means

ii) K-medoids

Machine Learning (CSEMDM-03A)

Day & Date: Saturday, 30-05-2026 Max. Marks: 70
Time: 10:00 AM To 01:00 PM

Instructions: 1) Q. No. 1 is compulsory. It should be solved in the first 30 minutes in Answer Book Page no 03 (Starting page of the Answer Book). Each question carries one mark.
2) Don't forget to Mention question paper set (P/Q/R/S) on top of page.
3) Figures to the right indicate full marks.

MCQ/Objective Type Questions

Duration: 30 Minutes Marks:14

Q.1 Choose the correct alternatives from the given options. 14

1) In Leave-One-Out Cross Validation (LOOCV), number of folds equals _____.
a) k b) Size of dataset
c) Half of dataset d) 10

2) What is hyperparameter tuning?
a) Adjusting test samples
b) Modifying model weights
c) Finding the best configuration settings for the model
d) Changing dataset

3) In reinforcement learning, the learning is driven by _____.
a) Labels
b) Direct instruction
c) Feedback in the form of rewards and punishments
d) Data clustering

4) Which model is generally easier to interpret?
a) Linear Regression b) Deep Neural Networks
c) Random Forest d) SVM

5) A well-posed learning problem is defined by _____.
a) Unclear inputs
b) Random outputs
c) Defined inputs, outputs, and success criteria
d) Infinite possibilities

6) Which of the following is not a category of machine learning?
a) Supervised learning b) Unsupervised learning
c) Reinforcement learning d) Complex learning

7) What is the purpose of the conditional probability in classification?
   a) It reduces computation
   b) It helps identify continuous variables
   c) It estimates the likelihood of an event given evidence
   d) It optimizes the cost function

   c) Measure of impurity
   d) Tree height

10) Which method randomly selects subsets of features and data samples?
   a) Logistic Regression
   b) Random Forest
   c) Decision Tree
   d) Naïve Bayes

11) In clustering, what does the “k” in k-means represent?
   a) Number of data points
   b) Number of clusters
   c) Number of attributes
   d) Number of iterations

12) Multiple linear regression has _____.
   a) One independent variable
   b) No dependent variable
   c) Multiple dependent variables
   d) Multiple independent variables

13) In association rules, A → B implies _____.
   a) If A occurs, B never occurs
   b) A and B are identical
   c) If A occurs, B is likely to occur
   d) A and B are unrelated

14) Which term describes a model performing well on training data but poorly on unseen data?
   a) Underfitting
   b) Overfitting
   c) Regularization
   d) Normalization

T. Y. (B.Tech.) (Electronics & Telecommunication Engineering) (Semester - I) (New) (CBCS) Examination: March/April - 2026
Machine Learning (CSEMDM-03A)

Day & Date: Saturday, 30-05-2026 Max. Marks: 56
Time: 10:00 AM To 01:00 PM

Instructions: 1) All questions are compulsory.
2) Figures to the right indicate full marks.

SECTION – I

Q.2 Attempt Any Four. **16**

a) Describe the steps involved in building a classification model.

b) Explain Simple linear regression and multiple linear regression algorithm.

c) Discuss how we should improve accuracy of linear regression model.

d) Explain Logistic regression in details.

e) What is the conditional probability that it is raining, given that someone is carrying an umbrella? i.e P(Rain I Umbrella).
Suppose you observed 100 people over several days and noted whether it was raining and whether they carried an umbrella:

Situation	Count
Rain and Umbrella	30
Rain and No Umbrella	10
No Rain and Umbrella	10
No Rain and No Umbrella	50
Total	100

Q.3 Attempt Any Two. **12**

a) List and briefly explain assumptions of linear regression analysis.

b) Compare between Supervised learning, Unsupervised learning, and Reinforcement learning.

c) Predict whether a new customer will churn using KNN classification algorithm for following dataset.
New Customer to Classify: Call Minutes: 160, Support Tickets: 2, Monthly Charge: 45

Customer ID	Call Minutes	Support Tickets	Monthly Charge	Churn
C1	200	1	50	No
C2	300	0	70	No
C3	100	3	30	Yes
C4	150	2	40	Yes
C5	250	1	60	No

SECTION – II

Q.4 Attempt Any Four. **16**

a) List & explain future trends of Machine Learning.

b) Explain the concept of clustering and Clustering Techniques.

c) Explain concept of Hierarchical Clustering.

d) Explain the steps of "Training a Model" for a given machine learning problem.

e) Describe any four applications of unsupervised learning.

Q.5 Attempt Any Two. **12**

a) What is model evaluation in ML? Why it is important in ML?

b) Define cost function & explain its types in detail.

c) Explain following partitioning methods with example.

i) K-means

ii) K-medoids

Seat No.	

Set **S**

Machine Learning (CSEMDM-03A)

Day & Date: Saturday, 30-05-2026 Max. Marks: 70
Time: 10:00 AM To 01:00 PM

Instructions: 1) Q. No. 1 is compulsory. It should be solved in the first 30 minutes in Answer Book Page no 03 (Starting page of the Answer Book). Each question carries one mark.
2) Don't forget to Mention question paper set (P/Q/R/S) on top of page.
3) Figures to the right indicate full marks.

MCQ/Objective Type Questions

Duration: 30 Minutes Marks:14

Q.1 Choose the correct alternatives from the given options. 14

1) Which method randomly selects subsets of features and data samples?
a) Logistic Regression b) Random Forest
c) Decision Tree d) Naïve Bayes

2) In clustering, what does the "k" in k-means represent?
a) Number of data points b) Number of clusters
c) Number of attributes d) Number of iterations

3) Multiple linear regression has _____.
a) One independent variable
b) No dependent variable
c) Multiple dependent variables
d) Multiple independent variables

4) In association rules, A → B implies _____.
a) If A occurs, B never occurs
b) A and B are identical
c) If A occurs, B is likely to occur
d) A and B are unrelated

5) Which term describes a model performing well on training data but poorly on unseen data?
a) Underfitting b) Overfitting
c) Regularization d) Normalization

6) In Leave-One-Out Cross Validation (LOOCV), number of folds equals _____.
a) k b) Size of dataset
c) Half of dataset d) 10

7) What is hyperparameter tuning?
   a) Adjusting test samples
   b) Modifying model weights
   c) Finding the best configuration settings for the model
   d) Changing dataset

8) In reinforcement learning, the learning is driven by _____.
   a) Labels
   b) Direct instruction
   c) Feedback in the form of rewards and punishments
   d) Data clustering

9) Which model is generally easier to interpret?
   a) Linear Regression
   b) Deep Neural Networks
   c) Random Forest
   d) SVM

10) A well-posed learning problem is defined by _____.
   a) Unclear inputs
   b) Random outputs
   c) Defined inputs, outputs, and success criteria
   d) Infinite possibilities

11) Which of the following is not a category of machine learning?
   a) Supervised learning
   b) Unsupervised learning
   c) Reinforcement learning
   d) Complex learning

12) What is the purpose of the conditional probability in classification?
   a) It reduces computation
   b) It helps identify continuous variables
   c) It estimates the likelihood of an event given evidence
   d) It optimizes the cost function

13) Which algorithm is based on distance between data points?
   a) Decision Tree
   b) k-Nearest Neighbors (k-NN)
   c) Naïve Bayes
   d) Logistic Regression

14) What is entropy in the context of decision trees?
   a) Data inconsistency
   b) Information gain
   c) Measure of impurity
   d) Tree height

Time: 10:00 AM To 01:00 PM

Instructions: 1) All questions are compulsory.
2) Figures to the right indicate full marks.

SECTION – I

Q.2 Attempt Any Four. **16**

a) Describe the steps involved in building a classification model.

b) Explain Simple linear regression and multiple linear regression algorithm.

c) Discuss how we should improve accuracy of linear regression model.

d) Explain Logistic regression in details.

e) What is the conditional probability that it is raining, given that someone is carrying an umbrella? i.e P(Rain I Umbrella).
Suppose you observed 100 people over several days and noted whether it was raining and whether they carried an umbrella:

Situation	Count
Rain and Umbrella	30
Rain and No Umbrella	10
No Rain and Umbrella	10
No Rain and No Umbrella	50
Total	100

Q.3 Attempt Any Two. **12**

a) List and briefly explain assumptions of linear regression analysis.

b) Compare between Supervised learning, Unsupervised learning, and Reinforcement learning.

c) Predict whether a new customer will churn using KNN classification algorithm for following dataset.
New Customer to Classify: Call Minutes: 160, Support Tickets: 2, Monthly Charge: 45

Customer ID	Call Minutes	Support Tickets	Monthly Charge	Churn
C1	200	1	50	No
C2	300	0	70	No
C3	100	3	30	Yes
C4	150	2	40	Yes
C5	250	1	60	No

SECTION – II

Q.4 Attempt Any Four. **16**

a) List & explain future trends of Machine Learning.

b) Explain the concept of clustering and Clustering Techniques.

c) Explain concept of Hierarchical Clustering.

d) Explain the steps of "Training a Model" for a given machine learning problem.

e) Describe any four applications of unsupervised learning.

Q.5 Attempt Any Two. **12**

a) What is model evaluation in ML? Why it is important in ML?

b) Define cost function & explain its types in detail.

c) Explain following partitioning methods with example.

i) K-means

ii) K-medoids

T.Y. (B.Tech.) (Civil Engineering) (Semester - I) (New) (CBCS)
Examination: March/April - 2026
Object Oriented Modeling and Design (CSEMDM-03B)

Day & Date: Saturday, 30-05-2026 Max. Marks: 70
Time: 10:00 AM To 01:00 PM

Instructions: 1) Q. No. 1 is compulsory. It should be solved in the first 30 minutes in Answer Book Page no 03 (Starting page of the Answer Book). Each question carries one mark.
2) Don't forget to Mention question paper set (P/Q/R/S) on top of page.
3) Figures to the right indicate full marks.

MCQ/Objective Type Questions

Duration: 30 Minutes Marks:14

Q.1 Choose the correct option from the following. **14**

1) Modeling as a design technique helps in _____.
a) Coding
b) Abstraction and system understanding
c) Testing
d) Debugging

2) Evidence for usefulness of Object-Oriented Development includes _____.
a) Reduced code size and increased reusability
b) Longer development time
c) Increased redundancy
d) Lower abstraction

3) In Functional Modeling, the system is represented using _____.
a) Class Diagrams
b) Data Flow Diagrams (DFDs)
c) Sequence Diagrams
d) State Charts

4) In OMT, Objects are _____.
a) Abstract ideas only b) Instances of classes
c) Data tables d) Functions

5) Generalization in OMT refers to _____.
a) Combining classes
b) Deriving subclasses from base classes
c) Deleting attributes
d) Creating packages

6) Concurrency in Dynamic Modeling refers to _____.
   a) Sequential processes
   b) Multiple events occurring simultaneously
   c) Reusing code
   d) Class dependencies

7) Nested State Diagrams are used for _____.
   a) Representing hierarchical states
   b) Showing inheritance
   c) Database schema
   d) Packages

8) The main purpose of a Package in UML is _____.
   a) To execute code
   b) To group related classes and interfaces
   c) To store data
   d) To compile modules

9) A Sequence Diagram depicts _____.
   a) Structural relationships
   b) Order of messages between objects
   c) Static classes
   d) System deployment

10) In UML, an Object Diagram shows _____.
   a) Static structure
   b) Dynamic structure
   c) Snapshot of system objects at a time
   d) Deployment structure

11) Collaboration Diagrams show _____.
   a) Object interaction and message flow
   b) Static class structure
   c) Use case scenarios
   d) Process flow

12) A Component in UML can be _____.
   a) Hardware device
   b) Reusable software module
   c) Test case
   d) Class object

13) The Deployment Diagram shows which UML element?
   a) Software design
   b) Physical nodes and their connections
   c) User roles
   d) Object associations

14) Frameworks in UML are designed for _____.

a) One-time use
b) Reusability and domain-specific development
c) Hardware mapping
d) Testing functions

SECTION – I

Q.2 Attempt Any Three. **12**

a) Explain Object-Oriented Development themes.

b) What is modeling? Explain modeling as a design technique.

c) Describe events, states, and operations with suitable examples.

d) Write a short note on object-oriented style and features of OO languages.

Q.3 Attempt for Any One. **08**

a) Explain the Object Model, Dynamic Model, and Functional Model of OMT.

b) Explain object, class, link, and association in OMT with examples.

Q.4 Compulsory Question. **08**

Draw and explain a DFD for a library management system. (Level 0, Level 1, Level 2).

SECTION – II

Q.5 Attempt Any Three. **12**

a) Define interfaces, types, and roles in UML.

b) Explain the use of packages in UML.

c) Explain components and deployment in UML.

d) Write a short note on *state machines.*

Q.6 Attempt for Any One. **08**

a) What are interaction diagrams and activity diagrams? Explain with suitable examples.

b) Draw a Deployment Diagram for a *Hospital Management System.*

T.Y. (B.Tech.) (Computer Science & Engineering) (Semester - I) (New) (CBCS) Examination: March/April - 2026
Object Oriented Modeling and Design (CSEMDM-03B)

Day & Date: Saturday, 30-05-2026 Max. Marks: 56
Time: 10:00 AM To 01:00 PM

Instructions: 1) All questions are compulsory.
2) Figures to the right indicate full marks.
3) Assume suitable data if required.

SECTION – I

Q.2 Attempt Any Three. **12**

a) Explain Object-Oriented Development themes.

b) What is modeling? Explain modeling as a design technique.

c) Describe events, states, and operations with suitable examples.

d) Write a short note on object-oriented style and features of OO languages.

Q.3 Attempt for Any One. **08**

a) Explain the Object Model, Dynamic Model, and Functional Model of OMT.

b) Explain object, class, link, and association in OMT with examples.

Q.4 Compulsory Question. **08**

Draw and explain a DFD for a library management system. (Level 0, Level 1, Level 2).

SECTION – II

Q.5 Attempt Any Three. **12**

a) Define interfaces, types, and roles in UML.

b) Explain the use of packages in UML.

c) Explain components and deployment in UML.

d) Write a short note on *state machines.*

Q.6 Attempt for Any One. **08**

a) What are interaction diagrams and activity diagrams? Explain with suitable examples.

b) Draw a Deployment Diagram for a *Hospital Management System.*

Q.7 Compulsory Question. **08**

Draw and explain a Component Diagram for an *Online Banking System.*

T.Y. (B.Tech.) (Computer Science & Engineering) (Semester - I) (New) (CBCS) Examination: March/April - 2026
Object Oriented Modeling and Design (CSEMDM-03B)

Day & Date: Saturday, 30-05-2026 Max. Marks: 70
Time: 10:00 AM To 01:00 PM

Instructions: 1) Q. No. 1 is compulsory. It should be solved in the first 30 minutes in Answer Book Page no 03 (Starting page of the Answer Book). Each question carries one mark.
2) Don't forget to Mention question paper set (P/Q/R/S) on top of page.
3) Figures to the right indicate full marks.

MCQ/Objective Type Questions

Duration: 30 Minutes Marks:14

Q.1 Choose the correct option from the following. **14**

1) Collaboration Diagrams show _____.
a) Object interaction and message flow
b) Static class structure
c) Use case scenarios
d) Process flow

2) A Component in UML can be _____.
a) Hardware device
b) Reusable software module
c) Test case
d) Class object

3) The Deployment Diagram shows which UML element?
a) Software design
b) Physical nodes and their connections
c) User roles
d) Object associations

4) Frameworks in UML are designed for _____.
a) One-time use
b) Reusability and domain-specific development
c) Hardware mapping
d) Testing functions

5) Modeling as a design technique helps in _____.
a) Coding
b) Abstraction and system understanding
c) Testing
d) Debugging

6) Evidence for usefulness of Object-Oriented Development includes _____.
   a) Reduced code size and increased reusability
   b) Longer development time
   c) Increased redundancy
   d) Lower abstraction

7) In Functional Modeling, the system is represented using _____.
   a) Class Diagrams
   b) Data Flow Diagrams (DFDs)
   c) Sequence Diagrams
   d) State Charts

8) In OMT, Objects are _____.
   a) Abstract ideas only
   b) Instances of classes
   c) Data tables
   d) Functions

9) Generalization in OMT refers to _____.
   a) Combining classes
   b) Deriving subclasses from base classes
   c) Deleting attributes
   d) Creating packages

____

10) Concurrency in Dynamic Modeling refers to _____.
   a) Sequential processes
   b) Multiple events occurring simultaneously
   c) Reusing code
   d) Class dependencies

11) Nested State Diagrams are used for _____.
   a) Representing hierarchical states
   b) Showing inheritance
   c) Database schema
   d) Packages

12) The main purpose of a Package in UML is _____.
   a) To execute code
   b) To group related classes and interfaces
   c) To store data
   d) To compile modules

13) A Sequence Diagram depicts _____.
   a) Structural relationships
   b) Order of messages between objects
   c) Static classes
   d) System deployment

14) In UML, an Object Diagram shows _____.

a) Static structure
b) Dynamic structure
c) Snapshot of system objects at a time
d) Deployment structure

T.Y. (B.Tech.) (Electrical Engineering) (Semester - I) (New) (CBCS) Examination: March/April - 2026
Object Oriented Modeling and Design (CSEMDM-03B)

Day & Date: Saturday, 30-05-2026 Max. Marks: 56
Time: 10:00 AM To 01:00 PM

Instructions: 1) All questions are compulsory.
2) Figures to the right indicate full marks.
3) Assume suitable data if required.

SECTION – I

Q.2 Attempt Any Three. **12**

a) Explain Object-Oriented Development themes.

b) What is modeling? Explain modeling as a design technique.

c) Describe events, states, and operations with suitable examples.

d) Write a short note on object-oriented style and features of OO languages.

Q.3 Attempt for Any One. **08**

a) Explain the Object Model, Dynamic Model, and Functional Model of OMT.

b) Explain object, class, link, and association in OMT with examples.

Q.4 Compulsory Question. **08**

Draw and explain a DFD for a library management system. (Level 0, Level 1, Level 2).

SECTION – II

Q.5 Attempt Any Three. **12**

a) Define interfaces, types, and roles in UML.

b) Explain the use of packages in UML.

c) Explain components and deployment in UML.

d) Write a short note on *state machines.*

Q.6 Attempt for Any One. **08**

a) What are interaction diagrams and activity diagrams? Explain with suitable examples.

b) Draw a Deployment Diagram for a *Hospital Management System.*

Q.7 Compulsory Question. **08**

Draw and explain a Component Diagram for an *Online Banking System.*

Set P

T.Y. (B.Tech.) (Electronics & Telecommunication Engineering) (Semester - I) (New) (CBCS) Examination: March/April - 2026
Object Oriented Modeling and Design (CSEMDM-03B)

Day & Date: Saturday, 30-05-2026 Max. Marks: 70
Time: 10:00 AM To 01:00 PM

Instructions: 1) Q. No. 1 is compulsory. It should be solved in the first 30 minutes in Answer Book Page no 03 (Starting page of the Answer Book). Each question carries one mark.
2) Don't forget to Mention question paper set (P/Q/R/S) on top of page.
3) Figures to the right indicate full marks.

MCQ/Objective Type Questions

Duration: 30 Minutes Marks:14

Q.1 Choose the correct option from the following. **14**

1) Modeling as a design technique helps in _____.
a) Coding
b) Abstraction and system understanding
c) Testing
d) Debugging

2) Evidence for usefulness of Object-Oriented Development includes _____.
a) Reduced code size and increased reusability
b) Longer development time
c) Increased redundancy
d) Lower abstraction

3) In Functional Modeling, the system is represented using _____.
a) Class Diagrams
b) Data Flow Diagrams (DFDs)
c) Sequence Diagrams
d) State Charts

4) In OMT, Objects are _____.
a) Abstract ideas only b) Instances of classes
c) Data tables d) Functions

5) Generalization in OMT refers to _____.
a) Combining classes
b) Deriving subclasses from base classes
c) Deleting attributes
d) Creating packages

6) Concurrency in Dynamic Modeling refers to _____.
   a) Sequential processes
   b) Multiple events occurring simultaneously
   c) Reusing code
   d) Class dependencies

7) Nested State Diagrams are used for _____.
   a) Representing hierarchical states
   b) Showing inheritance
   c) Database schema
   d) Packages

8) The main purpose of a Package in UML is _____.
   a) To execute code
   b) To group related classes and interfaces
   c) To store data
   d) To compile modules

9) A Sequence Diagram depicts _____.
   a) Structural relationships
   b) Order of messages between objects
   c) Static classes
   d) System deployment

10) In UML, an Object Diagram shows _____.
   a) Static structure
   b) Dynamic structure
   c) Snapshot of system objects at a time
   d) Deployment structure

11) Collaboration Diagrams show _____.
   a) Object interaction and message flow
   b) Static class structure
   c) Use case scenarios
   d) Process flow

12) A Component in UML can be _____.
   a) Hardware device
   b) Reusable software module
   c) Test case
   d) Class object

13) The Deployment Diagram shows which UML element?
   a) Software design
   b) Physical nodes and their connections
   c) User roles
   d) Object associations

14) Frameworks in UML are designed for _____.

a) One-time use
b) Reusability and domain-specific development
c) Hardware mapping
d) Testing functions

Examination: March/April - 2026
Object Oriented Modeling and Design (CSEMDM-03B)

Day & Date: Saturday, 30-05-2026 Max. Marks: 56
Time: 10:00 AM To 01:00 PM

Instructions: 1) All questions are compulsory.
2) Figures to the right indicate full marks.
3) Assume suitable data if required.

SECTION – I

Q.2 Attempt Any Three. **12**

a) Explain Object-Oriented Development themes.

b) What is modeling? Explain modeling as a design technique.

c) Describe events, states, and operations with suitable examples.

d) Write a short note on object-oriented style and features of OO languages.

Q.3 Attempt for Any One. **08**

a) Explain the Object Model, Dynamic Model, and Functional Model of OMT.

b) Explain object, class, link, and association in OMT with examples.

Q.4 Compulsory Question. **08**

Draw and explain a DFD for a library management system. (Level 0, Level 1, Level 2).

SECTION – II

Q.5 Attempt Any Three. **12**

a) Define interfaces, types, and roles in UML.

b) Explain the use of packages in UML.

c) Explain components and deployment in UML.

d) Write a short note on *state machines.*

Q.6 Attempt for Any One. **08**

a) What are interaction diagrams and activity diagrams? Explain with suitable examples.

b) Draw a Deployment Diagram for a *Hospital Management System.*

Q.7 Compulsory Question. **08**

Draw and explain a Component Diagram for an *Online Banking System.*

Seat No.	

Set R

T.Y. (B.Tech.) (Mechanical Engineering) (Semester - I) (New) (CBCS) Examination: March/April - 2026
Object Oriented Modeling and Design (CSEMDM-03B)

Day & Date: Saturday, 30-05-2026 Max. Marks: 70
Time: 10:00 AM To 01:00 PM

Instructions: 1) Q. No. 1 is compulsory. It should be solved in the first 30 minutes in Answer Book Page no 03 (Starting page of the Answer Book). Each question carries one mark.
2) Don't forget to Mention question paper set (P/Q/R/S) on top of page.
3) Figures to the right indicate full marks.

MCQ/Objective Type Questions

Duration: 30 Minutes Marks:14

Q.1 Choose the correct option from the following. **14**

1) Collaboration Diagrams show _____.
a) Object interaction and message flow
b) Static class structure
c) Use case scenarios
d) Process flow

2) A Component in UML can be _____.
a) Hardware device
b) Reusable software module
c) Test case
d) Class object

3) The Deployment Diagram shows which UML element?
a) Software design
b) Physical nodes and their connections
c) User roles
d) Object associations

4) Frameworks in UML are designed for _____.
a) One-time use
b) Reusability and domain-specific development
c) Hardware mapping
d) Testing functions

5) Modeling as a design technique helps in _____.
a) Coding
b) Abstraction and system understanding
c) Testing
d) Debugging

6) Evidence for usefulness of Object-Oriented Development includes _____.
   a) Reduced code size and increased reusability
   b) Longer development time
   c) Increased redundancy
   d) Lower abstraction

7) In Functional Modeling, the system is represented using _____.
   a) Class Diagrams
   b) Data Flow Diagrams (DFDs)
   c) Sequence Diagrams
   d) State Charts

8) In OMT, Objects are _____.
   a) Abstract ideas only
   b) Instances of classes
   c) Data tables
   d) Functions

9) Generalization in OMT refers to _____.
   a) Combining classes
   b) Deriving subclasses from base classes
   c) Deleting attributes
   d) Creating packages

____

10) Concurrency in Dynamic Modeling refers to _____.
   a) Sequential processes
   b) Multiple events occurring simultaneously
   c) Reusing code
   d) Class dependencies

11) Nested State Diagrams are used for _____.
   a) Representing hierarchical states
   b) Showing inheritance
   c) Database schema
   d) Packages

12) The main purpose of a Package in UML is _____.
   a) To execute code
   b) To group related classes and interfaces
   c) To store data
   d) To compile modules

13) A Sequence Diagram depicts _____.
   a) Structural relationships
   b) Order of messages between objects
   c) Static classes
   d) System deployment

14) In UML, an Object Diagram shows _____.

a) Static structure
b) Dynamic structure
c) Snapshot of system objects at a time
d) Deployment structure

MCQ/Objective Type Questions

Duration: 30 Minutes Marks:14

Q.1 Choose the correct alternatives from the options. 14

1) The term "hazard" refers to _____.
a) A potential source of harm b) An unexpected event
c) A rescue method d) A type of accident

2) Which of the following defines "safety"?
a) Elimination of all risks
b) Freedom from danger, risk, or injury
c) Absence of accidents
d) Working without supervision

3) Responsibility in safety means _____.
a) The power to take decisions
b) The right to punish
c) The duty to perform assigned tasks safely
d) Authority without work

4) I.E. Act stands for _____.
a) Indian Electricity Act b) Indian Engineering Act
c) Industrial Energy Act d) Internal Electrical Act

5) The main purpose of a machine foundation is to _____.
a) Increase machine speed
b) Support and absorb vibrations of the machine
c) Reduce current flow
d) Supply cooling water

6) Which factor is *most important* in designing a machine foundation?
a) Color of the floor
b) Type of soil and machine load
c) Lighting arrangement
d) Size of building

7) The foundation of a rotating machine should be _____.
a) Weak and flexible
b) Made of wood
c) Rigid and vibration-free
d) Above ground level

8) Static machines require foundation mainly for _____.
a) Reducing speed
b) Stability and load support
c) Increasing vibration
d) Decoration

9) Electric heating converts _____.
a) Mechanical energy into heat energy
b) Electrical energy into heat energy
c) Chemical energy into light energy
d) Heat energy into electrical energy

10) The most commonly used principle for electric heating is _____.
a) Faraday's law
b) Joule's law of heating
c) Lenz's law
d) Fleming's rule

11) Which of the following is not a type of electric heating?
a) Resistance heating
b) Induction heating
c) Arc heating
d) Conduction heating

12) The unit of luminous intensity is _____.
a) Lumen
b) Lux
c) Candela
d) Watt

13) The law which states that illumination is inversely proportional to the square of the distance is _____.
a) Lambert's Cosine Law
b) Ohm's Law
c) Inverse Square Law
d) Faraday's Law

14) The unit of illumination (E) is _____.
a) Lumen
b) Watt/m^2
c) Candela
d) Lux (Lumen/m^2)

Instructions: 1) All questions are compulsory.
2) Figures to the right indicate full marks.

SECTION – I

Q.2 Solve Any Four. **16**

a) Definition of terminology used in safety; safety, hazard, accident.

b) Explain I. E. Act & statutory regulations for safety of persons & equipment working with electrical installation.

c) Explain Procedure for rescuing the person who has received an electric shock.

d) Explain Factors involved in designing the machine foundation.

e) Explain procedure for leveling & alignment of two shafts of directly & indirectly coupled drives.

Q.3 Solve Any Two. **12**

a) Installation of rotating machines as per I.S.900-1992.

b) Explain Meaning & causes of electrical accidents factors on which severity of shock depends.

c) Explain methods of providing artificial respiration.

SECTION – II

Q.4 Solve Any Four. **16**

a) Explain laws of illumination.

b) Explain construction & Working mercury vapour lamp.

c) Comparison between tungsten filament lamps and fluorescent tubes.

d) Explain basic principles of light control.

e) Explain CFL & LED Lamps.

Q.5 Solve Any Two. **12**

a) Explain advantages, disadvantages of electrical heating.

b) Explain street lighting.

c) Explain Flood lighting.

Q.4 Solve Any Four. **16**

a) Explain laws of illumination.

b) Explain construction & Working mercury vapour lamp.

c) Comparison between tungsten filament lamps and fluorescent tubes.

d) Explain basic principles of light control.

e) Explain CFL & LED Lamps.

Q.5 Solve Any Two. **12**

a) Explain advantages, disadvantages of electrical heating.

b) Explain street lighting.

c) Explain Flood lighting.

T. Y. (B.Tech.) (Computer Science & Engineering) (Semester - I) (New) (CBCS) Examination: March/April – 2026
Electrical Installation and Utilization (EEMDM-03A)

Day & Date: Saturday, 30-05-2026 Max. Marks: 70
Time: 10:00 AM To 01:00 PM

Instructions: 1) Q. No. 1 is compulsory. It should be solved in the first 30 minutes in Answer Book Page no 03 (Starting page of the Answer Book). Each question carries one mark.
2) Don't forget to Mention question paper set (P/Q/R/S) on top of page.
3) Figures to the right indicate full marks.

MCQ/Objective Type Questions

Duration: 30 Minutes Marks:14

Q.1 Choose the correct alternatives from the options. 14

1) The term "hazard" refers to _____.
a) A potential source of harm b) An unexpected event
c) A rescue method d) A type of accident

2) Which of the following defines "safety"?
a) Elimination of all risks
b) Freedom from danger, risk, or injury
c) Absence of accidents
d) Working without supervision

3) Responsibility in safety means _____.
a) The power to take decisions
b) The right to punish
c) The duty to perform assigned tasks safely
d) Authority without work

4) I.E. Act stands for _____.
a) Indian Electricity Act b) Indian Engineering Act
c) Industrial Energy Act d) Internal Electrical Act

5) The main purpose of a machine foundation is to _____.
a) Increase machine speed
b) Support and absorb vibrations of the machine
c) Reduce current flow
d) Supply cooling water

6) Which factor is *most important* in designing a machine foundation?
a) Color of the floor
b) Type of soil and machine load
c) Lighting arrangement
d) Size of building

7) The foundation of a rotating machine should be _____.
a) Weak and flexible
b) Made of wood
c) Rigid and vibration-free
d) Above ground level

8) Static machines require foundation mainly for _____.
a) Reducing speed
b) Stability and load support
c) Increasing vibration
d) Decoration

9) Electric heating converts _____.
a) Mechanical energy into heat energy
b) Electrical energy into heat energy
c) Chemical energy into light energy
d) Heat energy into electrical energy

10) The most commonly used principle for electric heating is _____.
a) Faraday's law
b) Joule's law of heating
c) Lenz's law
d) Fleming's rule

11) Which of the following is not a type of electric heating?
a) Resistance heating
b) Induction heating
c) Arc heating
d) Conduction heating

12) The unit of luminous intensity is _____.
a) Lumen
b) Lux
c) Candela
d) Watt

13) The law which states that illumination is inversely proportional to the square of the distance is _____.
a) Lambert's Cosine Law
b) Ohm's Law
c) Inverse Square Law
d) Faraday's Law

14) The unit of illumination (E) is _____.
a) Lumen
b) Watt/m^2
c) Candela
d) Lux (Lumen/m^2)

Time: 10:00 AM To 01:00 PM

Instructions: 1) All questions are compulsory.
2) Figures to the right indicate full marks.

SECTION – I

Q.2 Solve Any Four. **16**

a) Definition of terminology used in safety; safety, hazard, accident.

b) Explain I. E. Act & statutory regulations for safety of persons & equipment working with electrical installation.

c) Explain Procedure for rescuing the person who has received an electric shock.

d) Explain Factors involved in designing the machine foundation.

e) Explain procedure for leveling & alignment of two shafts of directly & indirectly coupled drives.

Q.3 Solve Any Two. **12**

a) Installation of rotating machines as per I.S.900-1992.

b) Explain Meaning & causes of electrical accidents factors on which severity of shock depends.

c) Explain methods of providing artificial respiration.

SECTION – II

Q.4 Solve Any Four. **16**

a) Explain laws of illumination.

b) Explain construction & Working mercury vapour lamp.

c) Comparison between tungsten filament lamps and fluorescent tubes.

d) Explain basic principles of light control.

c) Candela d) Watt

3) The law which states that illumination is inversely proportional to the square of the distance is _____.
a) Lambert's Cosine Law b) Ohm's Law
c) Inverse Square Law d) Faraday's Law

4) The unit of illumination (E) is _____.
a) Lumen b) Watt/m^2
c) Candela d) Lux (Lumen/m^2)

5) The term "hazard" refers to _____.
a) A potential source of harm b) An unexpected event
c) A rescue method d) A type of accident

6) Which of the following defines "safety"?
a) Elimination of all risks
b) Freedom from danger, risk, or injury
c) Absence of accidents
d) Working without supervision

7) Responsibility in safety means _____.
a) The power to take decisions
b) The right to punish
c) The duty to perform assigned tasks safely
d) Authority without work

8) I.E. Act stands for _____.
a) Indian Electricity Act
b) Indian Engineering Act
c) Industrial Energy Act
d) Internal Electrical Act

9) The main purpose of a machine foundation is to _____.
a) Increase machine speed
b) Support and absorb vibrations of the machine
c) Reduce current flow
d) Supply cooling water

10) Which factor is *most important* in designing a machine foundation?
a) Color of the floor
b) Type of soil and machine load
c) Lighting arrangement
d) Size of building

11) The foundation of a rotating machine should be _____.
a) Weak and flexible
b) Made of wood
c) Rigid and vibration-free
d) Above ground level

12) Static machines require foundation mainly for _____.
a) Reducing speed
b) Stability and load support
c) Increasing vibration
d) Decoration

13) Electric heating converts _____.
a) Mechanical energy into heat energy
b) Electrical energy into heat energy
c) Chemical energy into light energy
d) Heat energy into electrical energy

14) The most commonly used principle for electric heating is _____.
a) Faraday's law
b) Joule's law of heating
c) Lenz's law
d) Fleming's rule

Set **R**

T. Y. (B.Tech.) (Electrical Engineering) (Semester - I) (New) (CBCS) Examination: March/April – 2026
Electrical Installation and Utilization (EEMDM-03A)

Day & Date: Saturday, 30-05-2026 Max. Marks: 56
Time: 10:00 AM To 01:00 PM

Instructions: 1) All questions are compulsory.
2) Figures to the right indicate full marks.

SECTION – I

Q.2 Solve Any Four. **16**

a) Definition of terminology used in safety; safety, hazard, accident.

b) Explain I. E. Act & statutory regulations for safety of persons & equipment working with electrical installation.

c) Explain Procedure for rescuing the person who has received an electric shock.

d) Explain Factors involved in designing the machine foundation.

e) Explain procedure for leveling & alignment of two shafts of directly & indirectly coupled drives.

Q.3 Solve Any Two. **12**

a) Installation of rotating machines as per I.S.900-1992.

b) Explain Meaning & causes of electrical accidents factors on which severity of shock depends.

c) Explain methods of providing artificial respiration.

SECTION – II

Q.4 Solve Any Four. **16**

a) Explain laws of illumination.

b) Explain construction & Working mercury vapour lamp.

c) Comparison between tungsten filament lamps and fluorescent tubes.

d) Explain basic principles of light control.

e) Explain CFL & LED Lamps.

Q.5 Solve Any Two. **12**

a) Explain advantages, disadvantages of electrical heating.

b) Explain street lighting.

c) Explain Flood lighting.

T. Y. (B.Tech.) (Electrical Engineering) (Semester - I) (New) (CBCS) Examination: March/April – 2026
Electrical Installation and Utilization (EEMDM-03A)

Day & Date: Saturday, 30-05-2026 Max. Marks: 70
Time: 10:00 AM To 01:00 PM

Instructions: 1) Q. No. 1 is compulsory. It should be solved in the first 30 minutes in Answer Book Page no 03 (Starting page of the Answer Book). Each question carries one mark.
2) Don't forget to Mention question paper set (P/Q/R/S) on top of page.
3) Figures to the right indicate full marks.

MCQ/Objective Type Questions

Duration: 30 Minutes Marks:14

Q.1 Choose the correct alternatives from the options. 14

1) Which factor is *most important* in designing a machine foundation?
a) Color of the floor
b) Type of soil and machine load
c) Lighting arrangement
d) Size of building

2) The foundation of a rotating machine should be _____.
a) Weak and flexible b) Made of wood
c) Rigid and vibration-free d) Above ground level

3) Static machines require foundation mainly for _____.
a) Reducing speed b) Stability and load support
c) Increasing vibration d) Decoration

4) Electric heating converts _____.
a) Mechanical energy into heat energy
b) Electrical energy into heat energy
c) Chemical energy into light energy
d) Heat energy into electrical energy

5) The most commonly used principle for electric heating is _____.
a) Faraday's law b) Joule's law of heating
c) Lenz's law d) Fleming's rule

6) Which of the following is not a type of electric heating?
a) Resistance heating b) Induction heating
c) Arc heating d) Conduction heating

7) The unit of luminous intensity is _____.
a) Lumen b) Lux
c) Candela d) Watt

8) The law which states that illumination is inversely proportional to the square of the distance is _____.
a) Lambert's Cosine Law b) Ohm's Law
c) Inverse Square Law d) Faraday's Law

9) The unit of illumination (E) is _____.
a) Lumen b) Watt/m^2
c) Candela d) Lux (Lumen/m^2)

10) The term "hazard" refers to _____.
a) A potential source of harm b) An unexpected event
c) A rescue method d) A type of accident

11) Which of the following defines "safety"?
a) Elimination of all risks
b) Freedom from danger, risk, or injury
c) Absence of accidents
d) Working without supervision

c) Arc heating
d) Conduction heating

12) The unit of luminous intensity is _____.
a) Lumen
b) Lux
c) Candela
d) Watt

13) The law which states that illumination is inversely proportional to the square of the distance is _____.
a) Lambert's Cosine Law
b) Ohm's Law
c) Inverse Square Law
d) Faraday's Law

14) The unit of illumination (E) is _____.
a) Lumen
b) Watt/m^2
c) Candela
d) Lux (Lumen/m^2)

T. Y. (B.Tech.) (Mechanical Engineering) (Semester - I) (New) (CBCS) Examination: March/April – 2026
Electrical Installation and Utilization (EEMDM-03A)

Day & Date: Saturday, 30-05-2026 Max. Marks: 56
Time: 10:00 AM To 01:00 PM

Instructions: 1) All questions are compulsory.
2) Figures to the right indicate full marks.

SECTION – I

Q.2 Solve Any Four. **16**

a) Definition of terminology used in safety; safety, hazard, accident.

b) Explain I. E. Act & statutory regulations for safety of persons & equipment working with electrical installation.

c) Explain Procedure for rescuing the person who has received an electric shock.

d) Explain Factors involved in designing the machine foundation.

e) Explain procedure for leveling & alignment of two shafts of directly & indirectly coupled drives.

Q.3 Solve Any Two. **12**

a) Installation of rotating machines as per I.S.900-1992.

b) Explain Meaning & causes of electrical accidents factors on which severity of shock depends.

c) Explain methods of providing artificial respiration.

SECTION – II

Q.4 Solve Any Four. **16**

a) Explain laws of illumination.

b) Explain construction & Working mercury vapour lamp.

c) Comparison between tungsten filament lamps and fluorescent tubes.

d) Explain basic principles of light control.

e) Explain CFL & LED Lamps.

Q.5 Solve Any Two. **12**

a) Explain advantages, disadvantages of electrical heating.

b) Explain street lighting.

c) Explain Flood lighting.

Set Q

T. Y. (B.Tech.) (Mechanical Engineering) (Semester - I) (New) (CBCS) Examination: March/April – 2026
Electrical Installation and Utilization (EEMDM-03A)

Day & Date: Saturday, 30-05-2026 Max. Marks: 70
Time: 10:00 AM To 01:00 PM

Instructions: 1) Q. No. 1 is compulsory. It should be solved in the first 30 minutes in Answer Book Page no 03 (Starting page of the Answer Book). Each question carries one mark.
2) Don't forget to Mention question paper set (P/Q/R/S) on top of page.
3) Figures to the right indicate full marks.

MCQ/Objective Type Questions

Duration: 30 Minutes Marks:14

Q.1 Choose the correct alternatives from the options. 14

1) Static machines require foundation mainly for _____.
a) Reducing speed b) Stability and load support
c) Increasing vibration d) Decoration

2) Electric heating converts _____.
a) Mechanical energy into heat energy
b) Electrical energy into heat energy
c) Chemical energy into light energy
d) Heat energy into electrical energy

3) The most commonly used principle for electric heating is _____.
a) Faraday's law b) Joule's law of heating
c) Lenz's law d) Fleming's rule

4) Which of the following is not a type of electric heating?
a) Resistance heating b) Induction heating
c) Arc heating d) Conduction heating

5) The unit of luminous intensity is _____.
a) Lumen b) Lux
c) Candela d) Watt

6) The law which states that illumination is inversely proportional to the square of the distance is _____.
a) Lambert's Cosine Law b) Ohm's Law
c) Inverse Square Law d) Faraday's Law

7) The unit of illumination (E) is _____.
a) Lumen b) Watt/m^2
c) Candela d) Lux (Lumen/m^2)

8) The term “hazard” refers to _____.
a) A potential source of harm b) An unexpected event
c) A rescue method d) A type of accident

9) Which of the following defines “safety”?
a) Elimination of all risks
b) Freedom from danger, risk, or injury
c) Absence of accidents
d) Working without supervision

10) Responsibility in safety means _____.
a) The power to take decisions
b) The right to punish
c) The duty to perform assigned tasks safely
d) Authority without work

11) I.E. Act stands for _____.
a) Indian Electricity Act b) Indian Engineering Act
c) Industrial Energy Act d) Internal Electrical Act

12) The main purpose of a machine foundation is to _____.
a) Increase machine speed
b) Support and absorb vibrations of the machine
c) Reduce current flow
d) Supply cooling water

13) Which factor is *most important* in designing a machine foundation?
a) Color of the floor
b) Type of soil and machine load
c) Lighting arrangement
d) Size of building

14) The foundation of a rotating machine should be _____.
a) Weak and flexible b) Made of wood
c) Rigid and vibration-free d) Above ground level

MCQ/Objective Type Questions

Duration: 30 Minutes Marks:14

Q.1 Choose the correct answer. **14**

1) In a full converter, how many thyristors are needed?
a) 1 b) 2
c) 3 d) 4

2) A full converter provides how many quadrant operations (voltage & current considered)?
a) One b) Two
c) Three d) Four

3) Dual converters enable how many quadrants operation?
a) One b) Two
c) Three d) Four

4) Choppers are what type of converters?
a) AC→DC b) DC→AC
c) DC→DC d) AC→AC

5) In V/f control, to maintain constant stator flux, the stator voltage must be varied proportionally with frequency.
a) True b) False

6) Closed-loop V/f control adjusts which parameter based on speed error?
a) Voltage amplitude b) Slip frequency
c) Stator resistance d) Rotor speed

7) CSI stands for _____.
a) Current Source Inverter b) Constant Slip Inverter
c) Common Source Inverter d) Cyclo-source inverter

8) Closed-loop VSI control adjusts voltage and frequency to track _____.
a) Torque b) Speed
c) Slip d) Current

9) FOC makes an induction motor behave like a DC motor by decoupling _____.
a) Voltage & current b) Flux & torque
c) Speed & torque d) Frequency & flux

10) In FOC, the d-axis current (Ids) controls _____.
a) Torque b) Flux
c) Speed d) Voltage

11) Direct vector control estimates flux using _____.
a) Rotor position sensor b) Flux estimator (feedback)
c) Pre-defined model d) Open-loop flux

12) The angle δ in the torque expression refers to the slip angle between stator and rotor flux vectors _____.
a) True b) False

13) DTC uses hysteresis controllers to maintain torque and flux within two separate bands _____.
a) True b) False

14) Optimal switching vector selection ensures torque and flux errors are driven back into hysteresis bands each cycle.
a) True b) False

Q.2 Solve Any Four. **16**

a) Draw and explain the operation of single-phase half-controlled converter fed DC series motor drive.

b) Describe the working principle of single-phase dual converter with neat diagram and waveforms.

c) Describe class B chopper drive with neat circuit diagram.

d) Explain stator voltage control method of an induction motor.

e) Explain the slip power recovery theory of an induction motor with neat diagram.

f) Explain variable frequency control method of an induction motor.

Q.3 Solve Any Two. **12**

a) Draw and explain the operation of three phase fully controlled converter fed DC motor drive. Also draw the related voltage and current waveforms.

b) Explain four quadrant operation of class E chopper drive with neat diagram.

c) Compare CSI and VSI fed induction motor drives.

SECTION – II

Q.4 Solve Any Four. **16**

a) Explain direct field-oriented control scheme with neat diagram.

b) Explain the working principle of Field Oriented Control (FOC) of induction machine.

c) Describe indirect field-oriented control method of induction motor with neat diagram.

d) Explain the principle of Space Vector Modulation control technique used in FOC.

e) Explain the DTC strategy to control the torque and flux of an Induction Machine.

f) Describe optimum switching vector selection in direct torque control.

Q.5 Solve Any Two. **12**

a) Explain the working principle of Field Oriented Control (FOC) of induction machine. Also state its advantages over standard control methods.

b) Discuss the torque ripple reduction methods in Induction motor drives.

c) Derive the torque expression with stator and rotor fluxes in DTC.

Examination: March/April – 2026
Electric Vehicle Controls (EEMDM-03B)

Day & Date: Saturday, 30-05-2026 Max. Marks: 70
Time: 10:00 AM To 01:00 PM

Instructions: 1) Q. No. 1 is compulsory. It should be solved in the first 30 minutes in Answer Book Page no 03 (Starting page of the Answer Book). Each question carries one mark.
2) Don't forget to Mention question paper set (P/Q/R/S) on top of page.
3) Figures to the right indicate full marks.

MCQ/Objective Type Questions

Duration: 30 Minutes Marks:14

Q.1 Choose the correct answer. **14**

1) Closed-loop V/f control adjusts which parameter based on speed error?
a) Voltage amplitude b) Slip frequency
c) Stator resistance d) Rotor speed

2) CSI stands for _____.
a) Current Source Inverter b) Constant Slip Inverter
c) Common Source Inverter d) Cyclo-source inverter

3) Closed-loop VSI control adjusts voltage and frequency to track _____.
a) Torque b) Speed
c) Slip d) Current

4) FOC makes an induction motor behave like a DC motor by decoupling _____.
a) Voltage & current b) Flux & torque
c) Speed & torque d) Frequency & flux

5) In FOC, the d-axis current (Ids) controls _____.
a) Torque b) Flux
c) Speed d) Voltage

6) Direct vector control estimates flux using _____.
a) Rotor position sensor b) Flux estimator (feedback)
c) Pre-defined model d) Open-loop flux

7) The angle δ in the torque expression refers to the slip angle between stator and rotor flux vectors _____.
a) True b) False

8) DTC uses hysteresis controllers to maintain torque and flux within two separate bands _____.

a) True b) False

9) Optimal switching vector selection ensures torque and flux errors are driven back into hysteresis bands each cycle.

a) True b) False

10) In a full converter, how many thyristors are needed?

a) 1 b) 2
c) 3 d) 4

11) A full converter provides how many quadrant operations (voltage & current considered)?

a) One b) Two
c) Three d) Four

12) Dual converters enable how many quadrants operation?

a) One b) Two
c) Three d) Four

13) Choppers are what type of converters?

a) AC→DC b) DC→AC
c) DC→DC d) AC→AC

14) In V/f control, to maintain constant stator flux, the stator voltage must be varied proportionally with frequency.

a) True b) False

2) Figures to the right indicate full marks.

SECTION – I

Q.2 Solve Any Four. **16**

a) Draw and explain the operation of single-phase half-controlled converter fed DC series motor drive.

b) Describe the working principle of single-phase dual converter with neat diagram and waveforms.

c) Describe class B chopper drive with neat circuit diagram.

d) Explain stator voltage control method of an induction motor.

e) Explain the slip power recovery theory of an induction motor with neat diagram.

f) Explain variable frequency control method of an induction motor.

Q.3 Solve Any Two. **12**

a) Draw and explain the operation of three phase fully controlled converter fed DC motor drive. Also draw the related voltage and current waveforms.

b) Explain four quadrant operation of class E chopper drive with neat diagram.

c) Compare CSI and VSI fed induction motor drives.

SECTION – II

Q.4 Solve Any Four. **16**

a) Explain direct field-oriented control scheme with neat diagram.

b) Explain the working principle of Field Oriented Control (FOC) of induction machine.

c) Describe indirect field-oriented control method of induction motor with neat diagram.

d) Explain the principle of Space Vector Modulation control technique used in FOC.

e) Explain the DTC strategy to control the torque and flux of an Induction Machine.

f) Describe optimum switching vector selection in direct torque control.

Q.5 Solve Any Two. **12**

a) Explain the working principle of Field Oriented Control (FOC) of induction machine. Also state its advantages over standard control methods.

a) True b) False

8) In a full converter, how many thyristors are needed?
a) 1 b) 2
c) 3 d) 4

9) A full converter provides how many quadrant operations (voltage & current considered)?
a) One b) Two
c) Three d) Four

10) Dual converters enable how many quadrants operation?
a) One b) Two
c) Three d) Four

11) Choppers are what type of converters?
a) AC→DC b) DC→AC
c) DC→DC d) AC→AC

12) In V/f control, to maintain constant stator flux, the stator voltage must be varied proportionally with frequency.
a) True b) False

13) Closed-loop V/f control adjusts which parameter based on speed error?
a) Voltage amplitude b) Slip frequency
c) Stator resistance d) Rotor speed

14) CSI stands for _____.
a) Current Source Inverter b) Constant Slip Inverter
c) Common Source Inverter d) Cyclo-source inverter

Set Q

T.Y. (B.Tech.) (Electrical Engineering) (Semester - I) (New) (CBCS) Examination: March/April – 2026
Electric Vehicle Controls (EEMDM-03B)

Day & Date: Saturday, 30-05-2026 Max. Marks: 56
Time: 10:00 AM To 01:00 PM

Instructions: 1) All questions are compulsory.
2) Figures to the right indicate full marks.

SECTION – I

Q.2 Solve Any Four. **16**

a) Draw and explain the operation of single-phase half-controlled converter fed DC series motor drive.

b) Describe the working principle of single-phase dual converter with neat diagram and waveforms.

c) Describe class B chopper drive with neat circuit diagram.

d) Explain stator voltage control method of an induction motor.

e) Explain the slip power recovery theory of an induction motor with neat diagram.

f) Explain variable frequency control method of an induction motor.

Q.3 Solve Any Two. **12**

a) Draw and explain the operation of three phase fully controlled converter fed DC motor drive. Also draw the related voltage and current waveforms.

b) Explain four quadrant operation of class E chopper drive with neat diagram.

c) Compare CSI and VSI fed induction motor drives.

SECTION – II

Q.4 Solve Any Four. **16**

a) Explain direct field-oriented control scheme with neat diagram.

b) Explain the working principle of Field Oriented Control (FOC) of induction machine.

c) Describe indirect field-oriented control method of induction motor with neat diagram.

d) Explain the principle of Space Vector Modulation control technique used in FOC.

e) Explain the DTC strategy to control the torque and flux of an Induction Machine.

f) Describe optimum switching vector selection in direct torque control.

Q.5 Solve Any Two. **12**

a) Explain the working principle of Field Oriented Control (FOC) of induction machine. Also state its advantages over standard control methods.

b) Discuss the torque ripple reduction methods in Induction motor drives.

c) Derive the torque expression with stator and rotor fluxes in DTC.

Seat No.	

Set | **R**

T.Y. (B.Tech.) (Electrical Engineering) (Semester - I) (New) (CBCS) Examination: March/April – 2026
Electric Vehicle Controls (EEMDM-03B)

Day & Date: Saturday, 30-05-2026 Max. Marks: 70
Time: 10:00 AM To 01:00 PM

Instructions: 1) Q. No. 1 is compulsory. It should be solved in the first 30 minutes in Answer Book Page no 03 (Starting page of the Answer Book). Each question carries one mark.
2) Don't forget to Mention question paper set (P/Q/R/S) on top of page.
3) Figures to the right indicate full marks.

MCQ/Objective Type Questions

Duration: 30 Minutes Marks:14

Q.1 Choose the correct answer. **14**

1) Direct vector control estimates flux using _____.
a) Rotor position sensor b) Flux estimator (feedback)
c) Pre-defined model d) Open-loop flux

2) The angle δ in the torque expression refers to the slip angle between stator and rotor flux vectors _____.
a) True b) False

3) DTC uses hysteresis controllers to maintain torque and flux within two separate bands _____.
a) True b) False

4) Optimal switching vector selection ensures torque and flux errors are driven back into hysteresis bands each cycle.
a) True b) False

5) In a full converter, how many thyristors are needed?
a) 1 b) 2
c) 3 d) 4

6) A full converter provides how many quadrant operations (voltage & current considered)?
a) One b) Two
c) Three d) Four

7) Dual converters enable how many quadrants operation?
a) One b) Two
c) Three d) Four

8) Choppers are what type of converters?
a) AC→DC b) DC→AC
c) DC→DC d) AC→AC

9) In V/f control, to maintain constant stator flux, the stator voltage must be varied proportionally with frequency.
a) True b) False

10) Closed-loop V/f control adjusts which parameter based on speed error?
a) Voltage amplitude b) Slip frequency
c) Stator resistance d) Rotor speed

11) CSI stands for _____.
a) Current Source Inverter b) Constant Slip Inverter
c) Common Source Inverter d) Cyclo-source inverter

12) Closed-loop VSI control adjusts voltage and frequency to track _____.
a) Torque b) Speed
c) Slip d) Current

13) FOC makes an induction motor behave like a DC motor by decoupling _____.
a) Voltage & current b) Flux & torque
c) Speed & torque d) Frequency & flux

14) In FOC, the d-axis current (Ids) controls _____.
a) Torque b) Flux
c) Speed d) Voltage

b) Explain four quadrant operation of class E chopper drive with neat diagram.

c) Compare CSI and VSI fed induction motor drives.

SECTION – II

Q.4 Solve Any Four. **16**

a) Explain direct field-oriented control scheme with neat diagram.

b) Explain the working principle of Field Oriented Control (FOC) of induction machine.

c) Describe indirect field-oriented control method of induction motor with neat diagram.

d) Explain the principle of Space Vector Modulation control technique used in FOC.

e) Explain the DTC strategy to control the torque and flux of an Induction Machine.

f) Describe optimum switching vector selection in direct torque control.

Q.5 Solve Any Two. **12**

a) Explain the working principle of Field Oriented Control (FOC) of induction machine. Also state its advantages over standard control methods.

b) Discuss the torque ripple reduction methods in Induction motor drives.

c) Derive the torque expression with stator and rotor fluxes in DTC.

T.Y. (B.Tech.) (Mechanical Engineering) (Semester - I) (New) (CBCS) Examination: March/April – 2026
Electric Vehicle Controls (EEMDM-03B)

Day & Date: Saturday, 30-05-2026 Max. Marks: 70
Time: 10:00 AM To 01:00 PM

Instructions: 1) Q. No. 1 is compulsory. It should be solved in the first 30 minutes in Answer Book Page no 03 (Starting page of the Answer Book). Each question carries one mark.
2) Don't forget to Mention question paper set (P/Q/R/S) on top of page.
3) Figures to the right indicate full marks.

MCQ/Objective Type Questions

Duration: 30 Minutes Marks:14

Q.1 Choose the correct answer. **14**

1) In a full converter, how many thyristors are needed?
a) 1 b) 2
c) 3 d) 4

2) A full converter provides how many quadrant operations (voltage & current considered)?
a) One b) Two
c) Three d) Four

3) Dual converters enable how many quadrants operation?
a) One b) Two
c) Three d) Four

4) Choppers are what type of converters?
a) AC→DC b) DC→AC
c) DC→DC d) AC→AC

5) In V/f control, to maintain constant stator flux, the stator voltage must be varied proportionally with frequency.
a) True b) False

6) Closed-loop V/f control adjusts which parameter based on speed error?
a) Voltage amplitude b) Slip frequency
c) Stator resistance d) Rotor speed

7) CSI stands for _____.
a) Current Source Inverter b) Constant Slip Inverter
c) Common Source Inverter d) Cyclo-source inverter

8) Closed-loop VSI control adjusts voltage and frequency to track _____.
a) Torque b) Speed
c) Slip d) Current

9) FOC makes an induction motor behave like a DC motor by decoupling _____.
a) Voltage & current b) Flux & torque
c) Speed & torque d) Frequency & flux

10) In FOC, the d-axis current (Ids) controls _____.
a) Torque b) Flux
c) Speed d) Voltage

11) Direct vector control estimates flux using _____.
a) Rotor position sensor b) Flux estimator (feedback)
c) Pre-defined model d) Open-loop flux

12) The angle δ in the torque expression refers to the slip angle between stator and rotor flux vectors _____.
a) True b) False

13) DTC uses hysteresis controllers to maintain torque and flux within two separate bands _____.
a) True b) False

14) Optimal switching vector selection ensures torque and flux errors are driven back into hysteresis bands each cycle.
a) True b) False

MCQ/Objective Type Questions

Duration: 30 Minutes Marks:14

Q.1 Choose the correct alternatives from the given options. 14

1) Product development mainly focuses on _____.
a) Product disposal
b) Creating and improving products
c) Advertising only
d) Cost reduction only

2) Product lifecycle includes _____.
a) Introduction b) Growth
c) Decline d) All of the above

3) Market segmentation helps in _____.
a) Reducing product quality b) Identifying target customers
c) Increasing production waste d) Eliminating testing

4) Voice of Customer (VOC) is used to _____.
a) Estimate profit
b) Understand customer expectations
c) Reduce manufacturing cost
d) Manage inventory

5) Quality Function Deployment (QFD) primarily converts _____.
a) Customer needs into engineering characteristics
b) Cost into profit
c) Ideas into patents
d) Materials into products

6) House of Quality (HoQ) is associated with _____.
a) Marketing b) Product costing
c) QFD methodology d) Testing methods

7) TRIZ methodology is used for _____.
a) Financial analysis b) Creative problem solving
c) Market research d) Product packaging

8) Morphological methods are useful for _____.
a) Material testing
b) Generating design alternatives
c) Product branding
d) Cost reduction

9) Pugh Matrix is used for _____.
a) Product testing b) Concept selection
c) Reliability analysis d) Cost estimation

10) Modular product architecture provides _____.
a) Increased complexity
b) Ease of maintenance and flexibility
c) Higher production waste
d) Lower usability

11) Human-centered design emphasizes _____.
a) Machine convenience only b) User needs and usability
c) Cost reduction only d) Industrial safety only

12) Activity-based costing helps in _____.
a) Product packaging
b) Accurate allocation of overhead costs
c) Product branding
d) Market segmentation

13) Rapid prototyping is mainly used for _____.
a) Product visualization and testing
b) Final packaging
c) Advertising

a) Reducing product quality b) Identifying target customers
c) Increasing production waste d) Eliminating testing

8) Voice of Customer (VOC) is used to _____.
a) Estimate profit
b) Understand customer expectations
c) Reduce manufacturing cost
d) Manage inventory

9) Quality Function Deployment (QFD) primarily converts _____.
a) Customer needs into engineering characteristics
b) Cost into profit
c) Ideas into patents
d) Materials into products

10) House of Quality (HoQ) is associated with _____.
a) Marketing b) Product costing
c) QFD methodology d) Testing methods

11) TRIZ methodology is used for _____.
a) Financial analysis b) Creative problem solving
c) Market research d) Product packaging

12) Morphological methods are useful for _____.
a) Material testing
b) Generating design alternatives
c) Product branding
d) Cost reduction

13) Pugh Matrix is used for _____.
a) Product testing b) Concept selection
c) Reliability analysis d) Cost estimation

14) Modular product architecture provides _____.
a) Increased complexity
b) Ease of maintenance and flexibility
c) Higher production waste
d) Lower usability

Set R

T.Y. (B.Tech.) (Civil Engineering) (Semester - II) (New) (CBCS)
Examination: March/April – 2026
New Product Development (CIVMDM-04A)

Day & Date: Saturday, 30-05-2026 Max. Marks: 56
Time: 03:00 PM To 06:00 PM

Instructions: 1) All questions are compulsory.
2) Figures to the right indicate full marks.
3) Use of non-programmable calculators is allowed.

SECTION – I

Q.2 Answer the following questions. **10**

a) Explain phases of product development with suitable examples.

b) Describe Quality Function Deployment (QFD) and House of Quality (HoQ).

Q.3 Answer the following questions. (Any Three) **18**

a) Discuss the importance of engineering design in product development.

b) Explain market segmentation and market research techniques.

c) Describe methods used for identifying customer needs.

d) Explain TRIZ methodology and its applications in product design.

e) Discuss creative thinking methods used in concept generation.

SECTION – II

Q.4 Answer the following questions. **10**

a) Explain concept selection methods using Pugh Matrix and Weighted Decision Matrix.

b) Discuss design for manufacturing and sustainability.

Q.5 Answer the following questions. (Any Three) **18**

a) Explain utility theory and decision trees in product design decision-making.

b) Describe modularity and product architecture development steps.

c) Discuss methods of cost estimation and value analysis in product costing.

d) Explain rapid prototyping techniques and reliability testing.

e) Discuss IPR, patenting, and branding strategies in product commercialization.

Examination: March/April – 2026
New Product Development (CIVMDM-04A)

Day & Date: Saturday, 30-05-2026 Max. Marks: 70
Time: 03:00 PM To 06:00 PM

Instructions: 1) Q. No. 1 is compulsory. It should be solved in the first 30 minutes in Answer Book Page no 03 (Starting page of the Answer Book). Each question carries one mark.
2) Don't forget to Mention question paper set (P/Q/R/S) on top of page.
3) Figures to the right indicate full marks.

MCQ/Objective Type Questions

Duration: 30 Minutes Marks:14

Q.1 Choose the correct alternatives from the given options. 14

1) House of Quality (HoQ) is associated with _____.
a) Marketing b) Product costing
c) QFD methodology d) Testing methods

2) TRIZ methodology is used for _____.
a) Financial analysis b) Creative problem solving
c) Market research d) Product packaging

3) Morphological methods are useful for _____.
a) Material testing
b) Generating design alternatives
c) Product branding
d) Cost reduction

4) Pugh Matrix is used for _____.
a) Product testing b) Concept selection
c) Reliability analysis d) Cost estimation

5) Modular product architecture provides _____.
a) Increased complexity
b) Ease of maintenance and flexibility
c) Higher production waste
d) Lower usability

6) Human-centered design emphasizes _____.
a) Machine convenience only b) User needs and usability
c) Cost reduction only d) Industrial safety only

7) Activity-based costing helps in _____.
a) Product packaging
b) Accurate allocation of overhead costs
c) Product branding
d) Market segmentation

8) Rapid prototyping is mainly used for _____.
a) Product visualization and testing
b) Final packaging
c) Advertising
d) Sales forecasting

9) Intellectual Property Rights (IPR) protect _____.
a) Customer complaints
b) Innovative ideas and inventions
c) Product waste
d) Raw materials

10) Product development mainly focuses on _____.
a) Product disposal
b) Creating and improving products
c) Advertising only
d) Cost reduction only

11) Product lifecycle includes _____.
a) Introduction b) Growth
c) Decline d) All of the above

12) Market segmentation helps in _____.
a) Reducing product quality b) Identifying target customers
c) Increasing production waste d) Eliminating testing

13) Voice of Customer (VOC) is used to _____.
a) Estimate profit
b) Understand customer expectations
c) Reduce manufacturing cost

MCQ/Objective Type Questions

Duration: 30 Minutes Marks:14

Q.1 Choose the correct alternatives from the given options. 14

1) Morphological methods are useful for _____.
a) Material testing
b) Generating design alternatives
c) Product branding
d) Cost reduction

2) Pugh Matrix is used for _____.
a) Product testing b) Concept selection
c) Reliability analysis d) Cost estimation

3) Modular product architecture provides _____.
a) Increased complexity
b) Ease of maintenance and flexibility
c) Higher production waste
d) Lower usability

4) Human-centered design emphasizes _____.
a) Machine convenience only b) User needs and usability
c) Cost reduction only d) Industrial safety only

5) Activity-based costing helps in _____.
a) Product packaging
b) Accurate allocation of overhead costs
c) Product branding
d) Market segmentation

6) Rapid prototyping is mainly used for _____.
a) Product visualization and testing
b) Final packaging
c) Advertising
d) Sales forecasting

7) Intellectual Property Rights (IPR) protect _____.
a) Customer complaints
b) Innovative ideas and inventions
c) Product waste
d) Raw materials

8) Product development mainly focuses on _____.
a) Product disposal
b) Creating and improving products
c) Advertising only
d) Cost reduction only

9) Product lifecycle includes _____.
a) Introduction b) Growth
c) Decline d) All of the above

10) Market segmentation helps in _____.
a) Reducing product quality b) Identifying target customers
c) Increasing production waste d) Eliminating testing

11) Voice of Customer (VOC) is used to _____.
a) Estimate profit
b) Understand customer expectations
c) Reduce manufacturing cost
d) Manage inventory

12) Quality Function Deployment (QFD) primarily converts _____.
a) Customer needs into engineering characteristics
b) Cost into profit
c) Ideas into patents
d) Materials into products

13) House of Quality (HoQ) is associated with _____.
a) Marketing b) Product costing
c) QFD methodology d) Testing methods

14) TRIZ methodology is used for _____.
a) Financial analysis b) Creative problem solving
c) Market research d) Product packaging

Seat No.	

Set **Q**

T.Y. (B.Tech.) (Electrical Engineering) (Semester - II) (New) (CBCS) Examination: March/April – 2026
New Product Development (CIVMDM-04A)

Day & Date: Saturday, 30-05-2026 Max. Marks: 56
Time: 03:00 PM To 06:00 PM

Instructions: 1) All questions are compulsory.
2) Figures to the right indicate full marks.
3) Use of non-programmable calculators is allowed.

SECTION – I

Q.2 Answer the following questions. **10**

a) Explain phases of product development with suitable examples.

b) Describe Quality Function Deployment (QFD) and House of Quality (HoQ).

Q.3 Answer the following questions. (Any Three) **18**

a) Discuss the importance of engineering design in product development.

b) Explain market segmentation and market research techniques.

c) Describe methods used for identifying customer needs.

d) Explain TRIZ methodology and its applications in product design.

e) Discuss creative thinking methods used in concept generation.

SECTION – II

Q.4 Answer the following questions. **10**

a) Explain concept selection methods using Pugh Matrix and Weighted Decision Matrix.

b) Discuss design for manufacturing and sustainability.

Q.5 Answer the following questions. (Any Three) **18**

a) Explain utility theory and decision trees in product design decision-making.

b) Describe modularity and product architecture development steps.

c) Discuss methods of cost estimation and value analysis in product costing.

d) Explain rapid prototyping techniques and reliability testing.

e) Discuss IPR, patenting, and branding strategies in product commercialization.

Seat No.	

Set **R**

T.Y. (B.Tech.) (Electrical Engineering) (Semester - II) (New) (CBCS) Examination: March/April – 2026
New Product Development (CIVMDM-04A)

Day & Date: Saturday, 30-05-2026 Max. Marks: 70
Time: 03:00 PM To 06:00 PM

Instructions: 1) Q. No. 1 is compulsory. It should be solved in the first 30 minutes in Answer Book Page no 03 (Starting page of the Answer Book). Each question carries one mark.
2) Don't forget to Mention question paper set (P/Q/R/S) on top of page.
3) Figures to the right indicate full marks.

MCQ/Objective Type Questions

Duration: 30 Minutes Marks:14

Q.1 Choose the correct alternatives from the given options. 14

1) Human-centered design emphasizes _____.
a) Machine convenience only b) User needs and usability
c) Cost reduction only d) Industrial safety only

2) Activity-based costing helps in _____.
a) Product packaging
b) Accurate allocation of overhead costs
c) Product branding
d) Market segmentation

3) Rapid prototyping is mainly used for _____.
a) Product visualization and testing
b) Final packaging
c) Advertising
d) Sales forecasting

4) Intellectual Property Rights (IPR) protect _____.
a) Customer complaints
b) Innovative ideas and inventions
c) Product waste
d) Raw materials

5) Product development mainly focuses on _____.
a) Product disposal
b) Creating and improving products
c) Advertising only
d) Cost reduction only

6) Product lifecycle includes _____.
a) Introduction b) Growth
c) Decline d) All of the above

7) Market segmentation helps in _____.
a) Reducing product quality b) Identifying target customers
c) Increasing production waste d) Eliminating testing

8) Voice of Customer (VOC) is used to _____.
a) Estimate profit
b) Understand customer expectations
c) Reduce manufacturing cost
d) Manage inventory

9) Quality Function Deployment (QFD) primarily converts _____.
a) Customer needs into engineering characteristics
b) Cost into profit
c) Ideas into patents
d) Materials into products

10) House of Quality (HoQ) is associated with _____.
a) Marketing b) Product costing
c) QFD methodology d) Testing methods

11) TRIZ methodology is used for _____.
a) Financial analysis b) Creative problem solving
c) Market research d) Product packaging

12) Morphological methods are useful for _____.
a) Material testing

T.Y. (B.Tech.) (Mechanical Engineering) (Semester - II) (New) (CBCS) Examination: March/April – 2026
New Product Development (CIVMDM-04A)

Day & Date: Saturday, 30-05-2026 Max. Marks: 70
Time: 03:00 PM To 06:00 PM

Instructions: 1) Q. No. 1 is compulsory. It should be solved in the first 30 minutes in Answer Book Page no 03 (Starting page of the Answer Book). Each question carries one mark.
2) Don't forget to Mention question paper set (P/Q/R/S) on top of page.
3) Figures to the right indicate full marks.

MCQ/Objective Type Questions

Duration: 30 Minutes Marks:14

Q.1 Choose the correct alternatives from the given options. 14

1) Product development mainly focuses on _____.
a) Product disposal
b) Creating and improving products
c) Advertising only
d) Cost reduction only

2) Product lifecycle includes _____.
a) Introduction b) Growth
c) Decline d) All of the above

3) Market segmentation helps in _____.
a) Reducing product quality b) Identifying target customers
c) Increasing production waste d) Eliminating testing

4) Voice of Customer (VOC) is used to _____.
a) Estimate profit
b) Understand customer expectations
c) Reduce manufacturing cost
d) Manage inventory

5) Quality Function Deployment (QFD) primarily converts _____.
a) Customer needs into engineering characteristics
b) Cost into profit
c) Ideas into patents
d) Materials into products

6) House of Quality (HoQ) is associated with _____.
a) Marketing b) Product costing
c) QFD methodology d) Testing methods

7) TRIZ methodology is used for _____.
a) Financial analysis b) Creative problem solving
c) Market research d) Product packaging

8) Morphological methods are useful for _____.
a) Material testing
b) Generating design alternatives
c) Product branding
d) Cost reduction

9) Pugh Matrix is used for _____.
a) Product testing b) Concept selection
c) Reliability analysis d) Cost estimation

10) Modular product architecture provides _____.
a) Increased complexity
b) Ease of maintenance and flexibility
c) Higher production waste
d) Lower usability

11) Human-centered design emphasizes _____.
a) Machine convenience only b) User needs and usability
c) Cost reduction only d) Industrial safety only

12) Activity-based costing helps in _____.
a) Product packaging
b) Accurate allocation of overhead costs
c) Product branding
d) Market segmentation

13) Rapid prototyping is mainly used for _____.
a) Product visualization and testing
b) Final packaging
c) Advertising
d) Sales forecasting

14) Intellectual Property Rights (IPR) protect _____.
a) Customer complaints
b) Innovative ideas and inventions
c) Product waste
d) Raw materials

T.Y. (B.Tech.) (Mechanical Engineering) (Semester - II) (New) (CBCS) Examination: March/April – 2026
New Product Development (CIVMDM-04A)

Day & Date: Saturday, 30-05-2026 Max. Marks: 56
Time: 03:00 PM To 06:00 PM

Instructions: 1) All questions are compulsory.
2) Figures to the right indicate full marks.
3) Use of non-programmable calculators is allowed.

SECTION – I

Q.2 Answer the following questions. **10**

a) Explain phases of product development with suitable examples.

b) Describe Quality Function Deployment (QFD) and House of Quality (HoQ).

Q.3 Answer the following questions. (Any Three) **18**

a) Discuss the importance of engineering design in product development.

b) Explain market segmentation and market research techniques.

c) Describe methods used for identifying customer needs.

d) Explain TRIZ methodology and its applications in product design.

e) Discuss creative thinking methods used in concept generation.

SECTION – II

Q.4 Answer the following questions. **10**

a) Explain concept selection methods using Pugh Matrix and Weighted Decision Matrix.

b) Discuss design for manufacturing and sustainability.

Q.5 Answer the following questions. (Any Three) **18**

a) Explain utility theory and decision trees in product design decision-making.

b) Describe modularity and product architecture development steps.

c) Discuss methods of cost estimation and value analysis in product costing.

d) Explain rapid prototyping techniques and reliability testing.

e) Discuss IPR, patenting, and branding strategies in product commercialization.

MCQ/Objective Type Questions

Duration: 30 Minutes Marks:14

Q.1 Choose the correct alternatives from the options. 14

1) In technical terms, 'Risk' is often mathematically expressed as ____.
a) Risk = Hazard + Vulnerability
b) Risk = Hazard × Vulnerability × Exposure
c) Risk = Disaster / Mitigation
d) Risk = Capacity − Vulnerability

2) Land-use zoning is a form of _____ mitigation.
a) Structural b) Non-structural
c) Financial d) Immediate

3) A system used to alert people before a hazard strike is _____.
a) NDMA b) EWS
c) GIS d) GPS

4) Which sphere of the Earth is associated with earthquakes?
a) Hydrosphere b) Atmosphere
c) Lithosphere d) Biosphere

5) Biological disasters are mainly caused by _____.
a) Geological processes b) Microorganisms
c) Mechanical failure d) Climate change

6) Major cause of road accidents in India is _____.
a) Flood b) Over-speeding
c) Earthquake d) Landslide

7) Mount Vesuvius is located in _____.
a) India b) Italy
c) Japan d) USA

8) Indian Ocean tsunami (2004) was primarily triggered by _____.
a) Cyclone b) Earthquake
c) Fire d) Landslide

9) Which factors heavily influence the habitation pattern and damage during a disaster?
a) Social status and climate b) Global trade
c) Stock market d) Export volume

10) What primarily dictates the selection of mitigation and preparation measures in a region?
a) Area and accessibility b) Space data
c) Currency rates d) Export volumes

11) Effective dissemination of information during a crisis relies on ____.
a) Withholding data b) Mass media and DMIS
c) Individual secrets d) Rumors

12) What is the primary purpose of 'feedback' in a disaster information system?
a) Blaming victims
b) To improve future information accuracy and flow
c) Revenue generation
d) Blocking channels

13) Which technology is reliable when standard networks fail?
a) HAM Radio b) Optical fiber
c) Home Wi-Fi d) Postal mail

14) GIS and Remote Sensing are applied in Disaster Management for _____.
a) Entertainment
b) Spatial hazard mapping and tracking
c) Interior design
d) Weather control

Instructions: 1) All questions are compulsory.
2) Figures to the right indicate full marks.

SECTION – I

Q.2 Answer Any Four. **20**

a) What are different types of disasters?

b) Write a short note on 'Flood.'

c) Elaborate 'Tsunami' as a natural disaster.

d) Explain the concept of biological disasters. Discuss their causes, modes of transmission, and preventive measures with suitable examples.

e) Discuss the major causes of road accidents in India. Suggest effective engineering, enforcement, and awareness-based measures to reduce road accident risks.

f) Is Pollution a manmade disaster? and explain its sources, effects on human health and environment, and control measures.

g) Describe the Indian Ocean Earthquake (2004) and resulting tsunami. Explain its causes, impacts, and the disaster management measures taken at national and international levels.

Q.3 Answer Any Two. **08**

a) What is Disaster? Explain along with Hazard & Vulnerability.

b) Explain the Disaster Management Cycle in details.

c) Explain 'Earthquake' as a geological disaster.

SECTION – II

Q.4 Answer Any Four. **20**

a) Explain the importance of Early Warning Systems (EWS). Describe the working mechanism of the Tsunami or Cyclone warning system in India.

b) Write a detailed note on Community Based Disaster Management (CBDM). Why is the community considered the first responder?

c) Explain the application of Geographic Information Systems (GIS) and Remote Sensing in Disaster Management (Hazard Zonation mapping).

d) Discuss the role of modern technologies like Drones (UAVs) and Artificial Intelligence (Al) in disaster damage assessment.

e) Write a note on the Sendai Framework for Disaster Risk Reduction (2015-2030). What are its four priorities for action?

f) Discuss the Psycho-social impacts of disasters on victims (PTSD). Why is mental health care crucial during the recovery phase?

g) Differentiate between Relief, Rehabilitation, and Reconstruction phases of disaster recovery.

Q.5 Answer Any Two. **08**

a) Differentiate between Structural and Non-Structural mitigation measures with three examples of each.

b) Explain the concept of the "Golden Hour". Discuss the role of the National Disaster Response Force (NDRF) in search and rescue operations.

c) Discuss the relationship between Climate Change and the increasing frequency of natural disasters. How can sustainable development reduce this risk?

2) What is the primary purpose of 'feedback' in a disaster information system?
a) Blaming victims
b) To improve future information accuracy and flow
c) Revenue generation
d) Blocking channels

3) Which technology is reliable when standard networks fail?
a) HAM Radio b) Optical fiber
c) Home Wi-Fi d) Postal mail

4) GIS and Remote Sensing are applied in Disaster Management for _____.
a) Entertainment
b) Spatial hazard mapping and tracking
c) Interior design
d) Weather control

5) In technical terms, 'Risk' is often mathematically expressed as ____.
a) Risk = Hazard + Vulnerability
b) Risk = Hazard × Vulnerability × Exposure
c) Risk = Disaster / Mitigation
d) Risk = Capacity − Vulnerability

6) Land-use zoning is a form of _____ mitigation.
a) Structural b) Non-structural
c) Financial d) Immediate

7) A system used to alert people before a hazard strike is _____.
a) NDMA b) EWS
c) GIS d) GPS

8) Which sphere of the Earth is associated with earthquakes?
a) Hydrosphere b) Atmosphere
c) Lithosphere d) Biosphere

9) Biological disasters are mainly caused by _____.
a) Geological processes b) Microorganisms
c) Mechanical failure d) Climate change

10) Major cause of road accidents in India is _____.
a) Flood b) Over-speeding
c) Earthquake d) Landslide

11) Mount Vesuvius is located in _____.
a) India b) Italy
c) Japan d) USA

12) Indian Ocean tsunami (2004) was primarily triggered by _____.
a) Cyclone b) Earthquake
c) Fire d) Landslide

13) Which factors heavily influence the habitation pattern and damage during a disaster?
a) Social status and climate b) Global trade
c) Stock market d) Export volume

14) What primarily dictates the selection of mitigation and preparation measures in a region?
a) Area and accessibility b) Space data
c) Currency rates d) Export volumes

T.Y. (B.Tech.) (Civil Engineering) (Semester - II) (New) (CBCS)
Examination: March/April – 2026
Disaster Management and Mitigation (CIVMDM-04B)

Day & Date: Saturday, 30-05-2026 Max. Marks: 56
Time: 03:00 PM To 06:00 PM

Instructions: 1) All questions are compulsory.
2) Figures to the right indicate full marks.

SECTION – I

Q.2 Answer Any Four. **20**

a) What are different types of disasters?

b) Write a short note on 'Flood.'

c) Elaborate 'Tsunami' as a natural disaster.

d) Explain the concept of biological disasters. Discuss their causes, modes of transmission, and preventive measures with suitable examples.

e) Discuss the major causes of road accidents in India. Suggest effective engineering, enforcement, and awareness-based measures to reduce road accident risks.

f) Is Pollution a manmade disaster? and explain its sources, effects on human health and environment, and control measures.

g) Describe the Indian Ocean Earthquake (2004) and resulting tsunami. Explain its causes, impacts, and the disaster management measures taken at national and international levels.

Q.3 Answer Any Two. **08**

a) What is Disaster? Explain along with Hazard & Vulnerability.

b) Explain the Disaster Management Cycle in details.

c) Explain 'Earthquake' as a geological disaster.

SECTION – II

Q.4 Answer Any Four. **20**

a) Explain the importance of Early Warning Systems (EWS). Describe the working mechanism of the Tsunami or Cyclone warning system in India.

b) Write a detailed note on Community Based Disaster Management (CBDM). Why is the community considered the first responder?

c) Explain the application of Geographic Information Systems (GIS) and Remote Sensing in Disaster Management (Hazard Zonation mapping).

d) Discuss the role of modern technologies like Drones (UAVs) and Artificial Intelligence (Al) in disaster damage assessment.

e) Write a note on the Sendai Framework for Disaster Risk Reduction (2015-2030). What are its four priorities for action?

f) Discuss the Psycho-social impacts of disasters on victims (PTSD). Why is mental health care crucial during the recovery phase?

g) Differentiate between Relief, Rehabilitation, and Reconstruction phases of disaster recovery.

Q.5 Answer Any Two. **08**

a) Differentiate between Structural and Non-Structural mitigation measures with three examples of each.

b) Explain the concept of the "Golden Hour". Discuss the role of the National Disaster Response Force (NDRF) in search and rescue operations.

c) Discuss the relationship between Climate Change and the increasing frequency of natural disasters. How can sustainable development reduce this risk?

Disaster Management and Mitigation (CIVMDM-04B)

Day & Date: Saturday, 30-05-2026 Max. Marks: 56
Time: 03:00 PM To 06:00 PM

Instructions: 1) All questions are compulsory.
2) Figures to the right indicate full marks.

SECTION – I

Q.2 Answer Any Four. **20**

a) What are different types of disasters?

b) Write a short note on 'Flood.'

c) Elaborate 'Tsunami' as a natural disaster.

d) Explain the concept of biological disasters. Discuss their causes, modes of transmission, and preventive measures with suitable examples.

e) Discuss the major causes of road accidents in India. Suggest effective engineering, enforcement, and awareness-based measures to reduce road accident risks.

f) Is Pollution a manmade disaster? and explain its sources, effects on human health and environment, and control measures.

g) Describe the Indian Ocean Earthquake (2004) and resulting tsunami. Explain its causes, impacts, and the disaster management measures taken at national and international levels.

Q.3 Answer Any Two. **08**

a) What is Disaster? Explain along with Hazard & Vulnerability.

b) Explain the Disaster Management Cycle in details.

c) Explain 'Earthquake' as a geological disaster.

SECTION – II

Q.4 Answer Any Four. **20**

a) Explain the importance of Early Warning Systems (EWS). Describe the working mechanism of the Tsunami or Cyclone warning system in India.

b) Write a detailed note on Community Based Disaster Management (CBDM). Why is the community considered the first responder?

c) Explain the application of Geographic Information Systems (GIS) and Remote Sensing in Disaster Management (Hazard Zonation mapping).

d) Discuss the role of modern technologies like Drones (UAVs) and Artificial Intelligence (Al) in disaster damage assessment.

e) Write a note on the Sendai Framework for Disaster Risk Reduction (2015-2030). What are its four priorities for action?

f) Discuss the Psycho-social impacts of disasters on victims (PTSD). Why is mental health care crucial during the recovery phase?

g) Differentiate between Relief, Rehabilitation, and Reconstruction phases of disaster recovery.

Q.5 Answer Any Two. **08**

a) Differentiate between Structural and Non-Structural mitigation measures with three examples of each.

b) Explain the concept of the "Golden Hour". Discuss the role of the National Disaster Response Force (NDRF) in search and rescue operations.

c) Discuss the relationship between Climate Change and the increasing frequency of natural disasters. How can sustainable development reduce this risk?

Disaster Management and Mitigation (CIVMDM-04B)

Day & Date: Saturday, 30-05-2026 Max. Marks: 70
Time: 03:00 PM To 06:00 PM

Instructions: 1) Q. No. 1 is compulsory. It should be solved in the first 30 minutes in Answer Book Page no 03 (Starting page of the Answer Book). Each question carries one mark.
2) Don't forget to Mention question paper set (P/Q/R/S) on top of page.
3) Figures to the right indicate full marks.

MCQ/Objective Type Questions

Duration: 30 Minutes Marks:14

Q.1 Choose the correct alternatives from the options. 14

1) In technical terms, 'Risk' is often mathematically expressed as ____.
a) Risk = Hazard + Vulnerability
b) Risk = Hazard × Vulnerability × Exposure
c) Risk = Disaster / Mitigation
d) Risk = Capacity − Vulnerability

2) Land-use zoning is a form of _____ mitigation.
a) Structural b) Non-structural
c) Financial d) Immediate

3) A system used to alert people before a hazard strike is _____.
a) NDMA b) EWS
c) GIS d) GPS

4) Which sphere of the Earth is associated with earthquakes?
a) Hydrosphere b) Atmosphere
c) Lithosphere d) Biosphere

5) Biological disasters are mainly caused by _____.
a) Geological processes b) Microorganisms
c) Mechanical failure d) Climate change

6) Major cause of road accidents in India is _____.
a) Flood b) Over-speeding
c) Earthquake d) Landslide

7) Mount Vesuvius is located in _____.
a) India b) Italy
c) Japan d) USA

8) Indian Ocean tsunami (2004) was primarily triggered by _____.
a) Cyclone b) Earthquake
c) Fire d) Landslide

9) Which factors heavily influence the habitation pattern and damage during a disaster?
a) Social status and climate b) Global trade
c) Stock market d) Export volume

10) What primarily dictates the selection of mitigation and preparation measures in a region?
a) Area and accessibility b) Space data
c) Currency rates d) Export volumes

11) Effective dissemination of information during a crisis relies on ____.
a) Withholding data b) Mass media and DMIS
c) Individual secrets d) Rumors

12) What is the primary purpose of 'feedback' in a disaster information system?
a) Blaming victims
b) To improve future information accuracy and flow
c) Revenue generation
d) Blocking channels

13) Which technology is reliable when standard networks fail?
a) HAM Radio b) Optical fiber
c) Home Wi-Fi d) Postal mail

14) GIS and Remote Sensing are applied in Disaster Management for _____.
a) Entertainment
b) Spatial hazard mapping and tracking
c) Interior design
d) Weather control

Day & Date: Saturday, 30-05-2026 Max. Marks: 70
Time: 03:00 PM To 06:00 PM

Instructions: 1) Q. No. 1 is compulsory. It should be solved in the first 30 minutes in Answer Book Page no 03 (Starting page of the Answer Book). Each question carries one mark.
2) Don't forget to Mention question paper set (P/Q/R/S) on top of page.
3) Figures to the right indicate full marks.

MCQ/Objective Type Questions

Duration: 30 Minutes Marks:14

Q.1 Choose the correct alternatives from the options. **14**

1) Indian Ocean tsunami (2004) was primarily triggered by _____.
a) Cyclone b) Earthquake
c) Fire d) Landslide

2) Which factors heavily influence the habitation pattern and damage during a disaster?
a) Social status and climate b) Global trade
c) Stock market d) Export volume

3) What primarily dictates the selection of mitigation and preparation measures in a region?
a) Area and accessibility b) Space data
c) Currency rates d) Export volumes

4) Effective dissemination of information during a crisis relies on ____.
a) Withholding data b) Mass media and DMIS
c) Individual secrets d) Rumors

5) What is the primary purpose of 'feedback' in a disaster information system?
a) Blaming victims
b) To improve future information accuracy and flow
c) Revenue generation
d) Blocking channels

6) Which technology is reliable when standard networks fail?
a) HAM Radio b) Optical fiber
c) Home Wi-Fi d) Postal mail

7) GIS and Remote Sensing are applied in Disaster Management for _____.
   a) Entertainment
   b) Spatial hazard mapping and tracking
   c) Interior design
   d) Weather control

8) In technical terms, 'Risk' is often mathematically expressed as ____.
   a) Risk = Hazard + Vulnerability
   b) Risk = Hazard × Vulnerability × Exposure
   c) Risk = Disaster / Mitigation
   d) Risk = Capacity − Vulnerability

9) Land-use zoning is a form of _____ mitigation.
   a) Structural
   b) Non-structural
   c) Financial
   d) Immediate

10) A system used to alert people before a hazard strike is _____.
   a) NDMA
   b) EWS
   c) GIS
   d) GPS

11) Which sphere of the Earth is associated with earthquakes?
   a) Hydrosphere
   b) Atmosphere
   c) Lithosphere
   d) Biosphere

12) Biological disasters are mainly caused by _____.
   a) Geological processes
   b) Microorganisms
   c) Mechanical failure
   d) Climate change

13) Major cause of road accidents in India is _____.
   a) Flood
   b) Over-speeding
   c) Earthquake
   d) Landslide

14) Mount Vesuvius is located in _____.
   a) India
   b) Italy
   c) Japan
   d) USA

Set Q

T.Y. (B.Tech.) (Electronics & Telecommunication Engineering) (Semester - II) (New) (CBCS) Examination: March/April – 2026
Disaster Management and Mitigation (CIVMDM-04B)

Day & Date: Saturday, 30-05-2026 Max. Marks: 56
Time: 03:00 PM To 06:00 PM

Instructions: 1) All questions are compulsory.
2) Figures to the right indicate full marks.

SECTION – I

Q.2 Answer Any Four. **20**

a) What are different types of disasters?

b) Write a short note on 'Flood.'

c) Elaborate 'Tsunami' as a natural disaster.

d) Explain the concept of biological disasters. Discuss their causes, modes of transmission, and preventive measures with suitable examples.

e) Discuss the major causes of road accidents in India. Suggest effective engineering, enforcement, and awareness-based measures to reduce road accident risks.

f) Is Pollution a manmade disaster? and explain its sources, effects on human health and environment, and control measures.

g) Describe the Indian Ocean Earthquake (2004) and resulting tsunami. Explain its causes, impacts, and the disaster management measures taken at national and international levels.

Q.3 Answer Any Two. **08**

a) What is Disaster? Explain along with Hazard & Vulnerability.

b) Explain the Disaster Management Cycle in details.

c) Explain 'Earthquake' as a geological disaster.

SECTION – II

Q.4 Answer Any Four. **20**

a) Explain the importance of Early Warning Systems (EWS). Describe the working mechanism of the Tsunami or Cyclone warning system in India.

b) Write a detailed note on Community Based Disaster Management (CBDM). Why is the community considered the first responder?

c) Explain the application of Geographic Information Systems (GIS) and Remote Sensing in Disaster Management (Hazard Zonation mapping).

d) Discuss the role of modern technologies like Drones (UAVs) and Artificial Intelligence (Al) in disaster damage assessment.

e) Write a note on the Sendai Framework for Disaster Risk Reduction (2015-2030). What are its four priorities for action?

f) Discuss the Psycho-social impacts of disasters on victims (PTSD). Why is mental health care crucial during the recovery phase?

g) Differentiate between Relief, Rehabilitation, and Reconstruction phases of disaster recovery.

Q.5 Answer Any Two. **08**

a) Differentiate between Structural and Non-Structural mitigation measures with three examples of each.

b) Explain the concept of the "Golden Hour". Discuss the role of the National Disaster Response Force (NDRF) in search and rescue operations.

c) Discuss the relationship between Climate Change and the increasing frequency of natural disasters. How can sustainable development reduce this risk?

c) Japan d) USA

12) Indian Ocean tsunami (2004) was primarily triggered by _____.
a) Cyclone b) Earthquake
c) Fire d) Landslide

13) Which factors heavily influence the habitation pattern and damage during a disaster?
a) Social status and climate b) Global trade
c) Stock market d) Export volume

14) What primarily dictates the selection of mitigation and preparation measures in a region?
a) Area and accessibility b) Space data
c) Currency rates d) Export volumes

T.Y. (B.Tech.) (Mechanical Engineering) (Semester - II) (New) (CBCS) Examination: March/April – 2026
Disaster Management and Mitigation (CIVMDM-04B)

Day & Date: Saturday, 30-05-2026 Max. Marks: 56
Time: 03:00 PM To 06:00 PM

Instructions: 1) All questions are compulsory.
2) Figures to the right indicate full marks.

SECTION – I

Q.2 Answer Any Four. **20**

a) What are different types of disasters?

b) Write a short note on 'Flood.'

c) Elaborate 'Tsunami' as a natural disaster.

d) Explain the concept of biological disasters. Discuss their causes, modes of transmission, and preventive measures with suitable examples.

e) Discuss the major causes of road accidents in India. Suggest effective engineering, enforcement, and awareness-based measures to reduce road accident risks.

f) Is Pollution a manmade disaster? and explain its sources, effects on human health and environment, and control measures.

g) Describe the Indian Ocean Earthquake (2004) and resulting tsunami. Explain its causes, impacts, and the disaster management measures taken at national and international levels.

Q.3 Answer Any Two. **08**

a) What is Disaster? Explain along with Hazard & Vulnerability.

b) Explain the Disaster Management Cycle in details.

c) Explain 'Earthquake' as a geological disaster.

SECTION – II

Q.4 Answer Any Four. **20**

a) Explain the importance of Early Warning Systems (EWS). Describe the working mechanism of the Tsunami or Cyclone warning system in India.

b) Write a detailed note on Community Based Disaster Management (CBDM). Why is the community considered the first responder?

c) Explain the application of Geographic Information Systems (GIS) and Remote Sensing in Disaster Management (Hazard Zonation mapping).

d) Discuss the role of modern technologies like Drones (UAVs) and Artificial Intelligence (Al) in disaster damage assessment.

e) Write a note on the Sendai Framework for Disaster Risk Reduction (2015-2030). What are its four priorities for action?

f) Discuss the Psycho-social impacts of disasters on victims (PTSD). Why is mental health care crucial during the recovery phase?

g) Differentiate between Relief, Rehabilitation, and Reconstruction phases of disaster recovery.

Q.5 Answer Any Two. **08**

a) Differentiate between Structural and Non-Structural mitigation measures with three examples of each.

b) Explain the concept of the "Golden Hour". Discuss the role of the National Disaster Response Force (NDRF) in search and rescue operations.

c) Discuss the relationship between Climate Change and the increasing frequency of natural disasters. How can sustainable development reduce this risk?

Disaster Management and Mitigation (CIVMDM-04B)

Day & Date: Saturday, 30-05-2026 Max. Marks: 70
Time: 03:00 PM To 06:00 PM

Instructions: 1) Q. No. 1 is compulsory. It should be solved in the first 30 minutes in Answer Book Page no 03 (Starting page of the Answer Book). Each question carries one mark.
2) Don't forget to Mention question paper set (P/Q/R/S) on top of page.
3) Figures to the right indicate full marks.

MCQ/Objective Type Questions

Duration: 30 Minutes Marks:14

Q.1 Choose the correct alternatives from the options. **14**

1) Major cause of road accidents in India is _____.
a) Flood b) Over-speeding
c) Earthquake d) Landslide

2) Mount Vesuvius is located in _____.
a) India b) Italy
c) Japan d) USA

3) Indian Ocean tsunami (2004) was primarily triggered by _____.
a) Cyclone b) Earthquake
c) Fire d) Landslide

4) Which factors heavily influence the habitation pattern and damage during a disaster?
a) Social status and climate b) Global trade
c) Stock market d) Export volume

5) What primarily dictates the selection of mitigation and preparation measures in a region?
a) Area and accessibility b) Space data
c) Currency rates d) Export volumes

6) Effective dissemination of information during a crisis relies on ____.
a) Withholding data b) Mass media and DMIS
c) Individual secrets d) Rumors

7) What is the primary purpose of 'feedback' in a disaster information system?
   a) Blaming victims
   b) To improve future information accuracy and flow
   c) Revenue generation
   d) Blocking channels

8) Which technology is reliable when standard networks fail?
   a) HAM Radio
   b) Optical fiber
   c) Home Wi-Fi
   d) Postal mail

9) GIS and Remote Sensing are applied in Disaster Management for _____.
   a) Entertainment
   b) Spatial hazard mapping and tracking
   c) Interior design
   d) Weather control

10) In technical terms, 'Risk' is often mathematically expressed as ____.
   a) Risk = Hazard + Vulnerability
   b) Risk = Hazard × Vulnerability × Exposure
   c) Risk = Disaster / Mitigation
   d) Risk = Capacity − Vulnerability

11) Land-use zoning is a form of _____ mitigation.
   a) Structural
   b) Non-structural
   c) Financial
   d) Immediate

12) A system used to alert people before a hazard strike is _____.
   a) NDMA
   b) EWS
   c) GIS
   d) GPS

13) Which sphere of the Earth is associated with earthquakes?
   a) Hydrosphere
   b) Atmosphere
   c) Lithosphere
   d) Biosphere

14) Biological disasters are mainly caused by _____.
   a) Geological processes
   b) Microorganisms
   c) Mechanical failure
   d) Climate change

Time: 03:00 PM To 06:00 PM

Instructions: 1) Q. No. 1 is compulsory. It should be solved in the first 30 minutes in Answer Book Page no 03 (Starting page of the Answer Book). Each question carries one mark.
2) Don't forget to Mention question paper set (P/Q/R/S) on top of page.
3) Figures to the right indicate full marks.
4) Assume suitable data if required & state it clearly.

MCQ/Objective Type Questions

Duration: 30 Minutes Marks:14

Q.1 Choose the correct alternatives from the options. 14

1) What is the main environmental benefit of using renewable energy?
a) Increased deforestation
b) Increased air pollution
c) Decreased greenhouse gas emissions
d) Depletion of natural resources

2) Which of the following is not a type of primary resource?
a) Crude Oil b) Coal
c) Sunlight d) Hydrogen Energy

3) Which country is the largest producer of wind energy?
a) India b) United States
c) China d) Germany

4) _____ is produced by blending of vegetable oil.
a) CNG b) Methane gas
c) Biogas d) Biodiesel

5) Availability of Solar energy on the earth surface is _____ MW.
a) 190 billion b) 178 billion
c) 150 billion d) 250 billion

6) In wind turbine gear box is used to _____.
a) Step up the speed b) Reduce the speed
c) shut down d) None of these

7) OTEC stands for _____.
a) Ocean thermal energy conversion
b) Ocean thermal energy Component
c) Ocean thermal energy contact
d) Ocean thermodynamic energy conversion

8) What is the primary need for designing a battery pack in electric vehicles?
a) To reduce weight
b) To increase the speed
c) To store and manage electrical energy safely and efficiently
d) To reduce emissions

9) Which of the following instruments is used to measure global solar radiation?
a) Pyrheliometer
b) Pyranometer
c) Pyrometer
d) Sunshine Recorder

10) What is the primary cause of wind formation?
a) Earth's rotation
b) Uneven heating of the Earth's surface by the sun
c) Gravitational pull of the moon
d) Ocean currents

11) Which energy storage method is best suited for stabilizing short-term fluctuations in power supply?
a) Pumped hydroelectric storage
b) Flywheel energy storage
c) Biomass storage
d) Compressed air storage

12) Which turbine is best suited for high-head hydroelectric plants?
a) Kaplan turbine
b) Francis turbine
c) Pelton wheel turbine
d) Cross-flow turbine

13) What is the efficiency range of tidal power plants?
a) 20-30%
b) 35-45%
c) 70-80%
d) 85-90%

14) Which component of a fuel cell allows only specific ions to pass through?
a) Electrolyte
b) Anode
c) Cathode
d) Separator

Time: 03:00 PM To 06:00 PM

Instructions: 1) Solve any two questions from each Section.
2) Use of nonprogrammable calculators is allowed.
3) Figures to the right indicate full marks.
4) Assume additional suitable data if necessary and state it clearly.

SECTION – I

Q.2 Attempt the following.

a) What are the renewable energy sources? Write its advantages and obstacles to implement these sources. **05**

b) Explain construction and working of Horizontal axis wind mill. **05**

c) How renewable energy is different from Conventional one? Discus Indian and global energy scenario. **04**

Q.3 Attempt the following.

a) Explain Construction and Working of Flat Plate Collector. **05**

b) Explain the construction and working of Solar distillation (Solar Still) with the help of neat sketch. **05**

c) Explain in brief Biomass Gasification. **04**

Q.4 Attempt the following.

a) Explain the working of Pyrometer with the help of neat sketch. **05**

b) Describe with neat sketch working of wind energy system with main components. **05**

c) Write a short note on: **04**
i) Internet of Energy
ii) Photosynthesis process

SECTION – II

Q.5 Attempt the following.

a) Explain with neat sketch working of pumped hydroelectric storage system. **05**

b) Explain working of lead acid battery. **05**

c) Discuss the need of energy storage devices. **04**

Q.6 Attempt the following.

a) Describe with a schematic diagram medium head hydro power plant. **05**

b) Explain compressed air energy storage with neat sketch and describe its working principle. **05**

c) Explain the factors to be considered for the selection of site for a hydroelectric power plant. **04**

Q.7 Attempt the following.

a) Describe construction & working of single basin Tidal Power plant. **05**

b) Describe construction & working of close cycle Ocean Thermal power plant. **05**

c) Write a short note on: **04**

i) Tidal barrage power system

ii) Flywheel energy storage

Q.6 Attempt the following.

a) Describe with a schematic diagram medium head hydro power plant. **05**

b) Explain compressed air energy storage with neat sketch and describe its working principle. **05**

c) Explain the factors to be considered for the selection of site for a hydroelectric power plant. **04**

Q.7 Attempt the following.

a) Describe construction & working of single basin Tidal Power plant. **05**

b) Describe construction & working of close cycle Ocean Thermal power plant. **05**

c) Write a short note on: **04**

i) Tidal barrage power system

ii) Flywheel energy storage

Set P

T.Y. (B.Tech.) (Computer Science & Engineering) (Semester - II) (New) (CBCS) Examination: March/April – 2026
Renewable Energy Resources (MECHMDM-04A)

Day & Date: Saturday, 30-05-2026 Max. Marks: 70
Time: 03:00 PM To 06:00 PM

Instructions: 1) Q. No. 1 is compulsory. It should be solved in the first 30 minutes in Answer Book Page no 03 (Starting page of the Answer Book). Each question carries one mark.
2) Don't forget to Mention question paper set (P/Q/R/S) on top of page.
3) Figures to the right indicate full marks.
4) Assume suitable data if required & state it clearly.

MCQ/Objective Type Questions

Duration: 30 Minutes Marks:14

Q.1 Choose the correct alternatives from the options. 14

1) What is the main environmental benefit of using renewable energy?
a) Increased deforestation
b) Increased air pollution
c) Decreased greenhouse gas emissions
d) Depletion of natural resources

2) Which of the following is not a type of primary resource?
a) Crude Oil b) Coal
c) Sunlight d) Hydrogen Energy

3) Which country is the largest producer of wind energy?
a) India b) United States
c) China d) Germany

4) _____ is produced by blending of vegetable oil.
a) CNG b) Methane gas
c) Biogas d) Biodiesel

5) Availability of Solar energy on the earth surface is _____ MW.
a) 190 billion b) 178 billion
c) 150 billion d) 250 billion

6) In wind turbine gear box is used to _____.
a) Step up the speed b) Reduce the speed
c) shut down d) None of these

7) OTEC stands for _____.
a) Ocean thermal energy conversion
b) Ocean thermal energy Component
c) Ocean thermal energy contact
d) Ocean thermodynamic energy conversion

8) What is the primary need for designing a battery pack in electric vehicles?
a) To reduce weight
b) To increase the speed
c) To store and manage electrical energy safely and efficiently
d) To reduce emissions

9) Which of the following instruments is used to measure global solar radiation?
a) Pyrheliometer
b) Pyranometer
c) Pyrometer
d) Sunshine Recorder

10) What is the primary cause of wind formation?
a) Earth's rotation
b) Uneven heating of the Earth's surface by the sun
c) Gravitational pull of the moon
d) Ocean currents

11) Which energy storage method is best suited for stabilizing short-term fluctuations in power supply?
a) Pumped hydroelectric storage
b) Flywheel energy storage
c) Biomass storage
d) Compressed air storage

12) Which turbine is best suited for high-head hydroelectric plants?
a) Kaplan turbine
b) Francis turbine
c) Pelton wheel turbine
d) Cross-flow turbine

13) What is the efficiency range of tidal power plants?
a) 20-30%
b) 35-45%
c) 70-80%
d) 85-90%

14) Which component of a fuel cell allows only specific ions to pass through?
a) Electrolyte
b) Anode
c) Cathode
d) Separator

Set **P**

T.Y. (B.Tech.) (Computer Science & Engineering) (Semester - II) (New) (CBCS) Examination: March/April – 2026
Renewable Energy Resources (MECHMDM-04A)

Day & Date: Saturday, 30-05-2026 Max. Marks: 56
Time: 03:00 PM To 06:00 PM

Instructions: 1) Solve any two questions from each Section.
2) Use of nonprogrammable calculators is allowed.
3) Figures to the right indicate full marks.
4) Assume additional suitable data if necessary and state it clearly.

SECTION – I

Q.2 Attempt the following.

a) What are the renewable energy sources? Write its advantages and obstacles to implement these sources. **05**

b) Explain construction and working of Horizontal axis wind mill. **05**

c) How renewable energy is different from Conventional one? Discus Indian and global energy scenario. **04**

Q.3 Attempt the following.

a) Explain Construction and Working of Flat Plate Collector. **05**

b) Explain the construction and working of Solar distillation (Solar Still) with the help of neat sketch. **05**

c) Explain in brief Biomass Gasification. **04**

Q.4 Attempt the following.

a) Explain the working of Pyrometer with the help of neat sketch. **05**

b) Describe with neat sketch working of wind energy system with main components. **05**

c) Write a short note on: **04**
i) Internet of Energy
ii) Photosynthesis process

SECTION – II

Q.5 Attempt the following.

a) Explain with neat sketch working of pumped hydroelectric storage system. **05**

b) Explain working of lead acid battery. **05**

c) Discuss the need of energy storage devices. **04**

Q.6 Attempt the following.

a) Describe with a schematic diagram medium head hydro power plant. **05**

b) Explain compressed air energy storage with neat sketch and describe its working principle. **05**

c) Explain the factors to be considered for the selection of site for a hydroelectric power plant. **04**

Q.7 Attempt the following.

a) Describe construction & working of single basin Tidal Power plant. **05**

b) Describe construction & working of close cycle Ocean Thermal power plant. **05**

7) Which component of a fuel cell allows only specific ions to pass through?
a) Electrolyte b) Anode
c) Cathode d) Separator

8) What is the main environmental benefit of using renewable energy?
a) Increased deforestation
b) Increased air pollution
c) Decreased greenhouse gas emissions
d) Depletion of natural resources

9) Which of the following is not a type of primary resource?
a) Crude Oil b) Coal
c) Sunlight d) Hydrogen Energy

10) Which country is the largest producer of wind energy?
a) India b) United States
c) China d) Germany

11) _____ is produced by blending of vegetable oil.
a) CNG b) Methane gas
c) Biogas d) Biodiesel

12) Availability of Solar energy on the earth surface is _____ MW.
a) 190 billion b) 178 billion
c) 150 billion d) 250 billion

13) In wind turbine gear box is used to _____.
a) Step up the speed b) Reduce the speed
c) shut down d) None of these

14) OTEC stands for _____.
a) Ocean thermal energy conversion
b) Ocean thermal energy Component
c) Ocean thermal energy contact
d) Ocean thermodynamic energy conversion

Set Q

T.Y. (B.Tech.) (Electrical Engineering) (Semester - II) (New) (CBCS) Examination: March/April – 2026
Renewable Energy Resources (MECHMDM-04A)

Day & Date: Saturday, 30-05-2026 Max. Marks: 56
Time: 03:00 PM To 06:00 PM

Instructions: 1) Solve any two questions from each Section.
2) Use of nonprogrammable calculators is allowed.
3) Figures to the right indicate full marks.
4) Assume additional suitable data if necessary and state it clearly.

SECTION – I

Q.2 Attempt the following.

a) What are the renewable energy sources? Write its advantages and obstacles to implement these sources. **05**

b) Explain construction and working of Horizontal axis wind mill. **05**

c) How renewable energy is different from Conventional one? Discus Indian and global energy scenario. **04**

Q.3 Attempt the following.

a) Explain Construction and Working of Flat Plate Collector. **05**

b) Explain the construction and working of Solar distillation (Solar Still) with the help of neat sketch. **05**

c) Explain in brief Biomass Gasification. **04**

Q.4 Attempt the following.

a) Explain the working of Pyrometer with the help of neat sketch. **05**

b) Describe with neat sketch working of wind energy system with main components. **05**

c) Write a short note on: **04**
i) Internet of Energy
ii) Photosynthesis process

SECTION – II

Q.5 Attempt the following.

a) Explain with neat sketch working of pumped hydroelectric storage system. **05**

b) Explain working of lead acid battery. **05**

c) Discuss the need of energy storage devices. **04**

Q.6 Attempt the following.

a) Describe with a schematic diagram medium head hydro power plant. **05**

b) Explain compressed air energy storage with neat sketch and describe its working principle. **05**

c) Explain the factors to be considered for the selection of site for a hydroelectric power plant. **04**

Q.7 Attempt the following.

a) Describe construction & working of single basin Tidal Power plant. **05**

b) Describe construction & working of close cycle Ocean Thermal power plant. **05**

c) Write a short note on: **04**

i) Tidal barrage power system

ii) Flywheel energy storage

Seat No.	

Set **R**

T.Y. (B.Tech.) (Electrical Engineering) (Semester - II) (New) (CBCS) Examination: March/April – 2026
Renewable Energy Resources (MECHMDM-04A)

Day & Date: Saturday, 30-05-2026 Max. Marks: 70
Time: 03:00 PM To 06:00 PM

Instructions: 1) Q. No. 1 is compulsory. It should be solved in the first 30 minutes in Answer Book Page no 03 (Starting page of the Answer Book). Each question carries one mark.
2) Don't forget to Mention question paper set (P/Q/R/S) on top of page.
3) Figures to the right indicate full marks.
4) Assume suitable data if required & state it clearly.

MCQ/Objective Type Questions

Duration: 30 Minutes Marks:14

Q.1 Choose the correct alternatives from the options. 14

1) Which energy storage method is best suited for stabilizing short-term fluctuations in power supply?
a) Pumped hydroelectric storage b) Flywheel energy storage
c) Biomass storage d) Compressed air storage

2) Which turbine is best suited for high-head hydroelectric plants?
a) Kaplan turbine b) Francis turbine
c) Pelton wheel turbine d) Cross-flow turbine

3) What is the efficiency range of tidal power plants?
a) 20-30% b) 35-45%
c) 70-80% d) 85-90%

4) Which component of a fuel cell allows only specific ions to pass through?
a) Electrolyte b) Anode
c) Cathode d) Separator

5) What is the main environmental benefit of using renewable energy?
a) Increased deforestation
b) Increased air pollution
c) Decreased greenhouse gas emissions
d) Depletion of natural resources

6) Which of the following is not a type of primary resource?
a) Crude Oil b) Coal
c) Sunlight d) Hydrogen Energy

7) Which country is the largest producer of wind energy?
a) India b) United States
c) China d) Germany

8) _____ is produced by blending of vegetable oil.
a) CNG b) Methane gas
c) Biogas d) Biodiesel

9) Availability of Solar energy on the earth surface is _____ MW.
a) 190 billion b) 178 billion
c) 150 billion d) 250 billion

10) In wind turbine gear box is used to _____.
a) Step up the speed b) Reduce the speed
c) shut down d) None of these

11) OTEC stands for _____.
a) Ocean thermal energy conversion
b) Ocean thermal energy Component
c) Ocean thermal energy contact
d) Ocean thermodynamic energy conversion

12) What is the primary need for designing a battery pack in electric vehicles?
a) To reduce weight
b) To increase the speed
c) To store and manage electrical energy safely and efficiently
d) To reduce emissions

13) Which of the following instruments is used to measure global solar radiation?
a) Pyrheliometer b) Pyranometer
c) Pyrometer d) Sunshine Recorder

14) What is the primary cause of wind formation?
a) Earth's rotation
b) Uneven heating of the Earth's surface by the sun
c) Gravitational pull of the moon
d) Ocean currents

SECTION – II

Q.5 Attempt the following.

a) Explain with neat sketch working of pumped hydroelectric storage system. **05**

b) Explain working of lead acid battery. **05**

c) Discuss the need of energy storage devices. **04**

Q.6 Attempt the following.

a) Describe with a schematic diagram medium head hydro power plant. **05**

b) Explain compressed air energy storage with neat sketch and describe its working principle. **05**

c) Explain the factors to be considered for the selection of site for a hydroelectric power plant. **04**

Q.7 Attempt the following.

a) Describe construction & working of single basin Tidal Power plant. **05**

b) Describe construction & working of close cycle Ocean Thermal power plant. **05**

c) Write a short note on: **04**

i) Tidal barrage power system

ii) Flywheel energy storage

Set | S

T.Y. (B.Tech.) (Electronics & Telecommunication Engineering) (Semester - II) (New) (CBCS) Examination: March/April – 2026
Renewable Energy Resources (MECHMDM-04A)

Day & Date: Saturday, 30-05-2026 Max. Marks: 70
Time: 03:00 PM To 06:00 PM

Instructions: 1) Q. No. 1 is compulsory. It should be solved in the first 30 minutes in Answer Book Page no 03 (Starting page of the Answer Book). Each question carries one mark.
2) Don't forget to Mention question paper set (P/Q/R/S) on top of page.
3) Figures to the right indicate full marks.
4) Assume suitable data if required & state it clearly.

MCQ/Objective Type Questions

Duration: 30 Minutes Marks:14

Q.1 Choose the correct alternatives from the options. **14**

1) In wind turbine gear box is used to _____.
a) Step up the speed b) Reduce the speed
c) shut down d) None of these

2) OTEC stands for _____.
a) Ocean thermal energy conversion
b) Ocean thermal energy Component
c) Ocean thermal energy contact
d) Ocean thermodynamic energy conversion

3) What is the primary need for designing a battery pack in electric vehicles?
a) To reduce weight
b) To increase the speed
c) To store and manage electrical energy safely and efficiently
d) To reduce emissions

4) Which of the following instruments is used to measure global solar radiation?
a) Pyrheliometer b) Pyranometer
c) Pyrometer d) Sunshine Recorder

5) What is the primary cause of wind formation?
a) Earth's rotation
b) Uneven heating of the Earth's surface by the sun
c) Gravitational pull of the moon
d) Ocean currents

6) Which energy storage method is best suited for stabilizing short-term fluctuations in power supply?
a) Pumped hydroelectric storage b) Flywheel energy storage
c) Biomass storage d) Compressed air storage

7) Which turbine is best suited for high-head hydroelectric plants?
a) Kaplan turbine b) Francis turbine
c) Pelton wheel turbine d) Cross-flow turbine

8) What is the efficiency range of tidal power plants?
a) 20-30% b) 35-45%
c) 70-80% d) 85-90%

9) Which component of a fuel cell allows only specific ions to pass through?
a) Electrolyte b) Anode
c) Cathode d) Separator

10) What is the main environmental benefit of using renewable energy?
a) Increased deforestation
b) Increased air pollution
c) Decreased greenhouse gas emissions
d) Depletion of natural resources

11) Which of the following is not a type of primary resource?
a) Crude Oil b) Coal
c) Sunlight d) Hydrogen Energy

12) Which country is the largest producer of wind energy?
a) India b) United States
c) China d) Germany

13) _____ is produced by blending of vegetable oil.
a) CNG b) Methane gas
c) Biogas d) Biodiesel

14) Availability of Solar energy on the earth surface is _____ MW.
a) 190 billion b) 178 billion
c) 150 billion d) 250 billion

T.Y. (B.Tech.) (Electronics & Telecommunication Engineering) (Semester - II) (New) (CBCS) Examination: March/April – 2026
Renewable Energy Resources (MECHMDM-04A)

Day & Date: Saturday, 30-05-2026 Max. Marks: 56
Time: 03:00 PM To 06:00 PM

Instructions: 1) Solve any two questions from each Section.
2) Use of nonprogrammable calculators is allowed.
3) Figures to the right indicate full marks.
4) Assume additional suitable data if necessary and state it clearly.

SECTION – I

Q.2 Attempt the following.

a) What are the renewable energy sources? Write its advantages and obstacles to implement these sources. **05**

b) Explain construction and working of Horizontal axis wind mill. **05**

c) How renewable energy is different from Conventional one? Discus Indian and global energy scenario. **04**

Q.3 Attempt the following.

a) Explain Construction and Working of Flat Plate Collector. **05**

b) Explain the construction and working of Solar distillation (Solar Still) with the help of neat sketch. **05**

c) Explain in brief Biomass Gasification. **04**

Q.4 Attempt the following.

a) Explain the working of Pyrometer with the help of neat sketch. **05**

b) Describe with neat sketch working of wind energy system with main components. **05**

c) Write a short note on: **04**
i) Internet of Energy
ii) Photosynthesis process

SECTION – II

Q.5 Attempt the following.

a) Explain with neat sketch working of pumped hydroelectric storage system. **05**

b) Explain working of lead acid battery. **05**

c) Discuss the need of energy storage devices. **04**

Q.6 Attempt the following.

a) Describe with a schematic diagram medium head hydro power plant. **05**

b) Explain compressed air energy storage with neat sketch and describe its working principle. **05**

c) Explain the factors to be considered for the selection of site for a hydroelectric power plant. **04**

Q.7 Attempt the following.

a) Describe construction & working of single basin Tidal Power plant. **05**

b) Describe construction & working of close cycle Ocean Thermal power plant. **05**

c) Write a short note on: **04**

i) Tidal barrage power system

MCQ/Objective Type Questions

Duration: 30 Minutes Marks:14

Q.1 Choose the correct answers from the given options. 14

1) Project is a _____ endeavour.
a) Perpetual b) Permanent
c) None of the above d) Temporary

2) Which of the following is NOT a characteristic of a project?
a) Unique output b) Defined timeline
c) Infinite duration d) Specific objective

3) An activity which consumes no resources is called _____.
a) Zero Activity b) Critical Activity
c) Dummy Activity d) End Activity

4) With respect to PERT and CPM, slack time is _____.
a) Total project time b) Idle resource
c) Delay time d) Extra time available

5) Payback period method considers _____.
a) Cash recovery time b) Profit only
c) Time value of money d) Risk only

6) IRR is defined as _____.
a) Profit ratio b) Cost ratio
c) Risk factor d) Rate at which NPV = 0

7) Bottom-up estimating is _____.
a) Estimation from top level
b) Detailed estimation of individual tasks
c) Rough estimation
d) Random estimation

8) Analogous estimating is based on _____.
a) Historical data
b) Random data
c) Assumptions only
d) Risk analysis

9) Monte Carlo simulation is used for _____.
a) Cost reduction
b) Risk and uncertainty analysis
c) Scheduling only
d) Resource allocation

10) In the initial stage of the project the probability of completing the project is _____.
a) Zero
b) Low
c) High
d) Medium

11) Critical path is _____.
a) Shortest path
b) Longest duration path
c) Random path
d) Optional path

12) PERT is mainly used when _____.
a) Time is deterministic
b) Cost is fixed
c) Time is uncertain
d) No scheduling needed

13) Gantt chart represents _____.
a) Time schedule
b) Cost
c) Risk
d) Profit

14) Baseline in MS Project is used for _____.
a) Future planning
b) Deleting tasks
c) Comparing planned vs actual
d) Risk management

Set **P**

T.Y. (B.Tech.) (Civil Engineering) (Semester - II) (New) (CBCS)
Examination: March/April – 2026
Project Management (MECHMDM-04B)

Day & Date: Saturday, 30-05-2026 Max. Marks: 56
Time: 03:00 PM To 06:00 PM

Instructions: 1) Solve any Two questions from each section.
2) Figures to the right indicates full marks.
3) Assume suitable data if required.

Section – I

Q.2 **a)** Define a project. Explain the key characteristics of a project with suitable examples. How projects are classified? **07**

b) Describe the role and responsibilities of a project manager in successful **07**

Q.3 **a)** Describe Internal Rate of Return (IRR) and its significance in project. **07**

b) Explain Payback Period and Net Present Value (NPV) methods with advantages and limitations. **07**

Q.4 **a)** Explain Project Budgeting in detail. **07**

b) Describe bottom-up and analogous estimating methods. **07**

Section – II

Q.5 **a)** Explain the concept and importance of Work Breakdown Structure (WBS). **07**

b) A R & D project has a list of tasks to be performed whose time estimates are given in the Table as follows. **07**

- Construct a project network
- Perform forward and backward passes
- State the critical path
- Determine Project completion time

Activity	Predecessor	Duration
A	-	5
B	A	4
C	A	5
D	B	6
E	C	3
F	D,E	4

Q.6	**a)**	What is Project Controlling? Explain Project Control Process.	**07**
	b)	Describe Project Management Information System (PMIS) and its importance.	**07**
Q.7	**a)**	Explain features and applications of MS Project in project management.	**07**
	b)	Write a short note on Gantt chart.	**07**

Seat No.	

Set **Q**

T.Y. (B.Tech.) (Civil Engineering) (Semester - II) (New) (CBCS)
Examination: March/April – 2026
Project Management (MECHMDM-04B)

Day & Date: Saturday, 30-05-2026 Max. Marks: 70
Time: 03:00 PM To 06:00 PM

Instructions: 1) Q. No. 1 is compulsory. It should be solved in the first 30 minutes in Answer Book Page no 03 (Starting page of the Answer Book). Each question carries one mark.
2) Don't forget to Mention question paper set (P/Q/R/S) on top on page.
3) Figures to the right indicate full marks.
4) Assume suitable data if necessary.

MCQ/Objective Type Questions

Duration: 30 Minutes Marks:14

Q.1 Choose the correct answers from the given options. 14

1) Analogous estimating is based on _____.
a) Historical data b) Random data
c) Assumptions only d) Risk analysis

2) Monte Carlo simulation is used for _____.
a) Cost reduction b) Risk and uncertainty analysis
c) Scheduling only d) Resource allocation

3) In the initial stage of the project the probability of completing the project is _____.
a) Zero b) Low
c) High d) Medium

4) Critical path is _____.
a) Shortest path b) Longest duration path
c) Random path d) Optional path

5) PERT is mainly used when _____.
a) Time is deterministic b) Cost is fixed
c) Time is uncertain d) No scheduling needed

6) Gantt chart represents _____.
a) Time schedule b) Cost
c) Risk d) Profit

7) Baseline in MS Project is used for _____.
a) Future planning
b) Deleting tasks
c) Comparing planned vs actual
d) Risk management

8) Project is a _____ endeavour.
a) Perpetual
b) Permanent
c) None of the above
d) Temporary

9) Which of the following is NOT a characteristic of a project?
a) Unique output
b) Defined timeline
c) Infinite duration
d) Specific objective

10) An activity which consumes no resources is called _____.
a) Zero Activity
b) Critical Activity
c) Dummy Activity
d) End Activity

11) With respect to PERT and CPM, slack time is _____.
a) Total project time
b) Idle resource
c) Delay time
d) Extra time available

12) Payback period method considers _____.
a) Cash recovery time
b) Profit only
c) Time value of money
d) Risk only

13) IRR is defined as _____.
a) Profit ratio
b) Cost ratio
c) Risk factor
d) Rate at which NPV = 0

14) Bottom-up estimating is _____.
a) Estimation from top level
b) Detailed estimation of individual tasks
c) Rough estimation
d) Random estimation

3) Assume suitable data if required.

Section – I

Q.2 **a)** Define a project. Explain the key characteristics of a project with suitable examples. How projects are classified? **07**

b) Describe the role and responsibilities of a project manager in successful **07**

Q.3 **a)** Describe Internal Rate of Return (IRR) and its significance in project. **07**

b) Explain Payback Period and Net Present Value (NPV) methods with advantages and limitations. **07**

Q.4 **a)** Explain Project Budgeting in detail. **07**

b) Describe bottom-up and analogous estimating methods. **07**

Section – II

Q.5 **a)** Explain the concept and importance of Work Breakdown Structure (WBS). **07**

b) A R & D project has a list of tasks to be performed whose time estimates are given in the Table as follows. **07**

- Construct a project network
- Perform forward and backward passes
- State the critical path
- Determine Project completion time

Activity	Predecessor	Duration
A	-	5
B	A	4
C	A	5
D	B	6
E	C	3
F	D,E	4

Q.6	**a)**	What is Project Controlling? Explain Project Control Process.	**07**
	b)	Describe Project Management Information System (PMIS) and its importance.	**07**
Q.7	**a)**	Explain features and applications of MS Project in project management.	**07**
	b)	Write a short note on Gantt chart.	**07**

Seat No.	

Set **S**

T.Y. (B.Tech.) (Computer Science & Engineering) (Semester - II) (New) (CBCS) Examination: March/April – 2026
Project Management (MECHMDM-04B)

Day & Date: Saturday, 30-05-2026 Max. Marks: 70
Time: 03:00 PM To 06:00 PM

Instructions: 1) Q. No. 1 is compulsory. It should be solved in the first 30 minutes in Answer Book Page no 03 (Starting page of the Answer Book). Each question carries one mark.
2) Don't forget to Mention question paper set (P/Q/R/S) on top on page.
3) Figures to the right indicate full marks.
4) Assume suitable data if necessary.

MCQ/Objective Type Questions

Duration: 30 Minutes Marks:14

Q.1 Choose the correct answers from the given options. 14

1) IRR is defined as _____.
a) Profit ratio b) Cost ratio
c) Risk factor d) Rate at which NPV = 0

2) Bottom-up estimating is _____.
a) Estimation from top level
b) Detailed estimation of individual tasks
c) Rough estimation
d) Random estimation

3) Analogous estimating is based on _____.
a) Historical data b) Random data
c) Assumptions only d) Risk analysis

4) Monte Carlo simulation is used for _____.
a) Cost reduction b) Risk and uncertainty analysis
c) Scheduling only d) Resource allocation

5) In the initial stage of the project the probability of completing the project is _____.
a) Zero b) Low
c) High d) Medium

6) Critical path is _____.
a) Shortest path b) Longest duration path
c) Random path d) Optional path

7) PERT is mainly used when _____.
a) Time is deterministic b) Cost is fixed
c) Time is uncertain d) No scheduling needed

8) Gantt chart represents _____.
a) Time schedule
b) Cost
c) Risk
d) Profit

9) Baseline in MS Project is used for _____.
a) Future planning
b) Deleting tasks
c) Comparing planned vs actual
d) Risk management

10) Project is a _____ endeavour.
a) Perpetual
b) Permanent
c) None of the above
d) Temporary

11) Which of the following is NOT a characteristic of a project?
a) Unique output
b) Defined timeline
c) Infinite duration
d) Specific objective

12) An activity which consumes no resources is called _____.
a) Zero Activity
b) Critical Activity
c) Dummy Activity
d) End Activity

13) With respect to PERT and CPM, slack time is _____.
a) Total project time
b) Idle resource
c) Delay time
d) Extra time available

14) Payback period method considers _____.
a) Cash recovery time
b) Profit only
c) Time value of money
d) Risk only

Set **Q**

T.Y. (B.Tech.) (Electronics & Telecommunication Engineering) (Semester - II) (New) (CBCS) Examination: March/April – 2026
Project Management (MECHMDM-04B)

Day & Date: Saturday, 30-05-2026 Max. Marks: 70
Time: 03:00 PM To 06:00 PM

Instructions: 1) Q. No. 1 is compulsory. It should be solved in the first 30 minutes in Answer Book Page no 03 (Starting page of the Answer Book). Each question carries one mark.
2) Don't forget to Mention question paper set (P/Q/R/S) on top on page.
3) Figures to the right indicate full marks.
4) Assume suitable data if necessary.

MCQ/Objective Type Questions

Duration: 30 Minutes Marks:14

Q.1 Choose the correct answers from the given options. 14

1) Analogous estimating is based on _____.
a) Historical data b) Random data
c) Assumptions only d) Risk analysis

2) Monte Carlo simulation is used for _____.
a) Cost reduction b) Risk and uncertainty analysis
c) Scheduling only d) Resource allocation

3) In the initial stage of the project the probability of completing the project is _____.
a) Zero b) Low
c) High d) Medium

4) Critical path is _____.
a) Shortest path b) Longest duration path
c) Random path d) Optional path

5) PERT is mainly used when _____.
a) Time is deterministic b) Cost is fixed
c) Time is uncertain d) No scheduling needed

6) Gantt chart represents _____.
a) Time schedule b) Cost
c) Risk d) Profit

7) Baseline in MS Project is used for _____.
a) Future planning
b) Deleting tasks
c) Comparing planned vs actual
d) Risk management

8) Project is a _____ endeavour.
a) Perpetual
b) Permanent
c) None of the above
d) Temporary

9) Which of the following is NOT a characteristic of a project?
a) Unique output
b) Defined timeline
c) Infinite duration
d) Specific objective

10) An activity which consumes no resources is called _____.
a) Zero Activity
b) Critical Activity
c) Dummy Activity
d) End Activity

11) With respect to PERT and CPM, slack time is _____.
a) Total project time
b) Idle resource
c) Delay time
d) Extra time available

12) Payback period method considers _____.
a) Cash recovery time
b) Profit only
c) Time value of money
d) Risk only

13) IRR is defined as _____.
a) Profit ratio
b) Cost ratio
c) Risk factor
d) Rate at which NPV = 0

14) Bottom-up estimating is _____.
a) Estimation from top level
b) Detailed estimation of individual tasks
c) Rough estimation
d) Random estimation

Set **Q**

T.Y. (B.Tech.) (Electronics & Telecommunication Engineering) (Semester - II) (New) (CBCS) Examination: March/April – 2026
Project Management (MECHMDM-04B)

Day & Date: Saturday, 30-05-2026 Max. Marks: 56
Time: 03:00 PM To 06:00 PM

Instructions: 1) Solve any Two questions from each section.
2) Figures to the right indicates full marks.
3) Assume suitable data if required.

Section – I

Q.2 **a)** Define a project. Explain the key characteristics of a project with suitable examples. How projects are classified? **07**

b) Describe the role and responsibilities of a project manager in successful **07**

Q.3 **a)** Describe Internal Rate of Return (IRR) and its significance in project. **07**

b) Explain Payback Period and Net Present Value (NPV) methods with advantages and limitations. **07**

Q.4 **a)** Explain Project Budgeting in detail. **07**

b) Describe bottom-up and analogous estimating methods. **07**

Section – II

Q.5 **a)** Explain the concept and importance of Work Breakdown Structure (WBS). **07**

b) A R & D project has a list of tasks to be performed whose time estimates are given in the Table as follows. **07**

- Construct a project network
- Perform forward and backward passes
- State the critical path
- Determine Project completion time

Activity	Predecessor	Duration
A	-	5
B	A	4
C	A	5
D	B	6
E	C	3
F	D,E	4

Q.6	**a)**	What is Project Controlling? Explain Project Control Process.	**07**
	b)	Describe Project Management Information System (PMIS) and its importance.	**07**
Q.7	**a)**	Explain features and applications of MS Project in project management.	**07**
	b)	Write a short note on Gantt chart.	**07**

c) Scheduling only d) Resource allocation

5) In the initial stage of the project the probability of completing the project is _____.
a) Zero b) Low
c) High d) Medium

6) Critical path is _____.
a) Shortest path b) Longest duration path
c) Random path d) Optional path

7) PERT is mainly used when _____.
a) Time is deterministic b) Cost is fixed
c) Time is uncertain d) No scheduling needed

8) Gantt chart represents _____.
a) Time schedule
b) Cost
c) Risk
d) Profit

9) Baseline in MS Project is used for _____.
a) Future planning
b) Deleting tasks
c) Comparing planned vs actual
d) Risk management

10) Project is a _____ endeavour.
a) Perpetual
b) Permanent
c) None of the above
d) Temporary

11) Which of the following is NOT a characteristic of a project?
a) Unique output
b) Defined timeline
c) Infinite duration
d) Specific objective

12) An activity which consumes no resources is called _____.
a) Zero Activity
b) Critical Activity
c) Dummy Activity
d) End Activity

13) With respect to PERT and CPM, slack time is _____.
a) Total project time
b) Idle resource
c) Delay time
d) Extra time available

14) Payback period method considers _____.
a) Cash recovery time
b) Profit only
c) Time value of money
d) Risk only

Seat No.		Set	S

T.Y. (B.Tech.) (Mechanical Engineering) (Semester - II) (New) (CBCS) Examination: March/April – 2026
Project Management (MECHMDM-04B)

Day & Date: Saturday, 30-05-2026 Max. Marks: 56
Time: 03:00 PM To 06:00 PM

Instructions: 1) Solve any Two questions from each section.
2) Figures to the right indicates full marks.
3) Assume suitable data if required.

Section – I

Q.2 **a)** Define a project. Explain the key characteristics of a project with suitable examples. How projects are classified? **07**

b) Describe the role and responsibilities of a project manager in successful **07**

Q.3 **a)** Describe Internal Rate of Return (IRR) and its significance in project. **07**

b) Explain Payback Period and Net Present Value (NPV) methods with advantages and limitations. **07**

Q.4 **a)** Explain Project Budgeting in detail. **07**

b) Describe bottom-up and analogous estimating methods. **07**

Section – II

Q.5 **a)** Explain the concept and importance of Work Breakdown Structure (WBS). **07**

b) A R & D project has a list of tasks to be performed whose time estimates are given in the Table as follows. **07**

- Construct a project network
- Perform forward and backward passes
- State the critical path
- Determine Project completion time

Activity	Predecessor	Duration
A	-	5
B	A	4
C	A	5
D	B	6
E	C	3
F	D,E	4

Q.6	**a)**	What is Project Controlling? Explain Project Control Process.	**07**
	b)	Describe Project Management Information System (PMIS) and its importance.	**07**
Q.7	**a)**	Explain features and applications of MS Project in project management.	**07**
	b)	Write a short note on Gantt chart.	**07**

T.Y. (B.Tech.) (Civil Engineering) (Semester - II) (New) (CBCS)
Examination: March/April – 2026
Advanced Microcontrollers (ENTMDM-04A)

Day & Date: Saturday, 30-05-2026 Max. Marks: 70
Time: 03:00 AM To 06:00 PM

Instructions: 1) Q. No. 1 is compulsory. It should be solved in the first 30 minutes in Answer Book Page no 03 (Starting page of the Answer Book). Each question carries one mark.
2) Don't forget to Mention question paper set (P/Q/R/S) on top of page.
3) Figures to the right indicate full marks.

MCQ/Objective Type Questions

Duration: 30 Minutes Marks:14

Q.1 Choose the correct alternatives from the options. 14

1) ARM processors use how many general purpose registers?
a) 8 b) 13
c) 16 d) 32

2) Which header file is used in Embedded C?
a) stdio.h b) reg51.h
c) math.h d) string.h

3) DC motor converts?
a) Electrical to mechanical b) Mechanical to electrical
c) Heat to motion d) None

4) LM35 output is proportional to?
a) Current b) Voltage
c) Resistance d) Power

5) Digital camera uses embedded system for?
a) Image processing b) Gaming
c) Networking d) None

6) Common anode display means?
a) Common positive b) Common negative
c) Floating d) Grounded

7) Total digital I/O pins in UNO?
a) 10 b) 12
c) 14 d) 16

8) Bootloader is used for?
a) Programming b) Power supply
c) Reset d) Clock

9) Which pin is used for PWM?
a) Analog
b) Digital
c) PWM marked pins
d) Vcc

10) setup() function runs?
a) Continuously
b) Once
c) Twice
d) Never

11) PIR sensor detects?
a) Heat motion
b) Sound
c) Light
d) Gas

12) MQ sensors are?
a) Gas sensors
b) Light sensors
c) Pressure sensors
d) Motion sensors

13) Capacitive sensor senses?
a) Pressure
b) Touch
c) Sound
d) Heat

14) Bluetooth HC-05 uses?
a) I2C
b) SPI
c) UART
d) USB

Set **P**

T.Y. (B.Tech.) (Civil Engineering) (Semester - II) (New) (CBCS)
Examination: March/April – 2026
Advanced Microcontrollers (ENTMDM-04A)

Day & Date: Saturday, 30-05-2026 Max. Marks: 56
Time: 03:00 AM To 06:00 PM

Instructions: 1) All questions are compulsory.
2) Figures to the right indicate full marks.
3) Assume suitable data if necessary.

SECTION – I

Q.2 Attempt the following. (Any Four) **16**

a) Explain the fundamentals and key features of ARM processors. Discuss why ARM architecture is preferred in embedded systems.

b) Analyze the ARM register organization and illustrate the role of CPSR in processor operation with suitable examples.

c) Examine the ARM pipeline mechanism and compare it with non-pipelined execution in terms of performance.

d) Explain the basic structure of an Embedded C program for LPC2148. Describe the role of header files, special function registers, GPIO configuration, and delay routines with a suitable example.

e) Develop an Embedded C program to interface LEDs and push buttons with LPC2148 such that the LED glows based on button status. Illustrate the pin connections and explain the logic used.

Q.3 Attempt the following. (Any Two) **12**

a) Describe the architecture of the ARM7TDMI core with the help of a neat block diagram. Explain the function of each major block.

b) Implement an Embedded C program to interface a DC motor or stepper motor with LPC2148. Evaluate the advantages of stepper motor control over DC motor control in precision applications.

c) Design an interfacing circuit for a 7-segment display with LPC2148 and demonstrate how numerical digits (0-9) can be displayed using Embedded C programming.

SECTION – II

Q.4 Attempt the following. (Any Four) **16**

a) Explain the introduction and key features of Arduino. Describe how Arduino differs from traditional microcontroller development boards.

b) Identify and classify the pins of Arduino UNO.
Demonstrate the use of digital, analog, power, and communication pins with suitable examples.

c) Develop an Arduino program to control an LED or buzzer. Evaluate the importance of Arduino IDE and libraries in rapid prototyping.

d) Install and configure the Arduino IDE on a computer/laptop. Analyze common errors during installation and suggest suitable troubleshooting methods.

e) Illustrate the interfacing of a Bluetooth module with Arduino and describe how wireless data communication is established for device control.

Q.5 Attempt the following. (Any Two) **12**

a) Illustrate the architecture of Arduino UNO with a neat block diagram. Explain the role of microcontroller, clock circuit, power supply, and communication interfaces.

b) Design and develop an Arduino-based security system using PIR and IR sensors, and evaluate its effectiveness in motion detection.

c) Design and implement a smart agriculture monitoring system using LDR and Soil Moisture Sensor interfaced with Arduino and justify the choice of sensors.

MCQ/Objective Type Questions

Duration: 30 Minutes Marks:14

Q.1 Choose the correct alternatives from the options. **14**

1) Bootloader is used for?
a) Programming b) Power supply
c) Reset d) Clock

2) Which pin is used for PWM?
a) Analog b) Digital
c) PWM marked pins d) Vcc

3) setup() function runs?
a) Continuously b) Once
c) Twice d) Never

4) PIR sensor detects?
a) Heat motion b) Sound
c) Light d) Gas

5) MQ sensors are?
a) Gas sensors b) Light sensors
c) Pressure sensors d) Motion sensors

6) Capacitive sensor senses?
a) Pressure b) Touch
c) Sound d) Heat

7) Bluetooth HC-05 uses?
a) I2C b) SPI
c) UART d) USB

8) ARM processors use how many general purpose registers?
a) 8 b) 13
c) 16 d) 32

9) Which header file is used in Embedded C?
a) stdio.h b) reg51.h
c) math.h d) string.h

10) DC motor converts?
a) Electrical to mechanical b) Mechanical to electrical
c) Heat to motion d) None

11) LM35 output is proportional to?
a) Current b) Voltage
c) Resistance d) Power

12) Digital camera uses embedded system for?
a) Image processing b) Gaming
c) Networking d) None

13) Common anode display means?
a) Common positive b) Common negative
c) Floating d) Grounded

14) Total digital I/O pins in UNO?
a) 10 b) 12
c) 14 d) 16

Seat No.	

Set **Q**

T.Y. (B.Tech.) (Computer Science & Engineering) (Semester - II) (New) (CBCS) Examination: March/April – 2026
Advanced Microcontrollers (ENTMDM-04A)

Day & Date: Saturday, 30-05-2026 Max. Marks: 56
Time: 03:00 AM To 06:00 PM

Instructions: 1) All questions are compulsory.
2) Figures to the right indicate full marks.
3) Assume suitable data if necessary.

SECTION – I

Q.2 Attempt the following. (Any Four) **16**

a) Explain the fundamentals and key features of ARM processors. Discuss why ARM architecture is preferred in embedded systems.

b) Analyze the ARM register organization and illustrate the role of CPSR in processor operation with suitable examples.

c) Examine the ARM pipeline mechanism and compare it with non-pipelined execution in terms of performance.

d) Explain the basic structure of an Embedded C program for LPC2148. Describe the role of header files, special function registers, GPIO configuration, and delay routines with a suitable example.

e) Develop an Embedded C program to interface LEDs and push buttons with LPC2148 such that the LED glows based on button status. Illustrate the pin connections and explain the logic used.

Q.3 Attempt the following. (Any Two) **12**

a) Describe the architecture of the ARM7TDMI core with the help of a neat block diagram. Explain the function of each major block.

b) Implement an Embedded C program to interface a DC motor or stepper motor with LPC2148. Evaluate the advantages of stepper motor control over DC motor control in precision applications.

c) Design an interfacing circuit for a 7-segment display with LPC2148 and demonstrate how numerical digits (0-9) can be displayed using Embedded C programming.

SECTION – II

Q.4 Attempt the following. (Any Four) **16**

a) Explain the introduction and key features of Arduino. Describe how Arduino differs from traditional microcontroller development boards.

b) Identify and classify the pins of Arduino UNO.
Demonstrate the use of digital, analog, power, and communication pins with suitable examples.

c) Develop an Arduino program to control an LED or buzzer. Evaluate the importance of Arduino IDE and libraries in rapid prototyping.

d) Install and configure the Arduino IDE on a computer/laptop. Analyze common errors during installation and suggest suitable troubleshooting methods.

e) Illustrate the interfacing of a Bluetooth module with Arduino and describe how wireless data communication is established for device control.

Q.5 Attempt the following. (Any Two) **12**

a) Illustrate the architecture of Arduino UNO with a neat block diagram. Explain the role of microcontroller, clock circuit, power supply, and communication interfaces.

b) Design and develop an Arduino-based security system using PIR and IR sensors, and evaluate its effectiveness in motion detection.

c) Design and implement a smart agriculture monitoring system using LDR and Soil Moisture Sensor interfaced with Arduino and justify the choice of sensors.

T.Y. (B.Tech.) (Computer Science & Engineering) (Semester - II) (New) (CBCS) Examination: March/April – 2026
Advanced Microcontrollers (ENTMDM-04A)

Day & Date: Saturday, 30-05-2026 Max. Marks: 70
Time: 03:00 AM To 06:00 PM

Instructions: 1) Q. No. 1 is compulsory. It should be solved in the first 30 minutes in Answer Book Page no 03 (Starting page of the Answer Book). Each question carries one mark.
2) Don't forget to Mention question paper set (P/Q/R/S) on top of page.
3) Figures to the right indicate full marks.

MCQ/Objective Type Questions

Duration: 30 Minutes Marks:14

Q.1 Choose the correct alternatives from the options. 14

1) PIR sensor detects?
a) Heat motion b) Sound
c) Light d) Gas

2) MQ sensors are?
a) Gas sensors b) Light sensors
c) Pressure sensors d) Motion sensors

3) Capacitive sensor senses?
a) Pressure b) Touch
c) Sound d) Heat

4) Bluetooth HC-05 uses?
a) I2C b) SPI
c) UART d) USB

5) ARM processors use how many general purpose registers?
a) 8 b) 13
c) 16 d) 32

6) Which header file is used in Embedded C?
a) stdio.h b) reg51.h
c) math.h d) string.h

7) DC motor converts?
a) Electrical to mechanical b) Mechanical to electrical
c) Heat to motion d) None

8) LM35 output is proportional to?
a) Current b) Voltage
c) Resistance d) Power

9) Digital camera uses embedded system for?
- a) Image processing
- b) Gaming
- c) Networking
- d) None

10) Common anode display means?
- a) Common positive
- b) Common negative
- c) Floating
- d) Grounded

11) Total digital I/O pins in UNO?
- a) 10
- b) 12
- c) 14
- d) 16

12) Bootloader is used for?
- a) Programming
- b) Power supply
- c) Reset
- d) Clock

13) Which pin is used for PWM?

Demonstrate the use of digital, analog, power, and communication pins with suitable examples.

c) Develop an Arduino program to control an LED or buzzer. Evaluate the importance of Arduino IDE and libraries in rapid prototyping.

d) Install and configure the Arduino IDE on a computer/laptop. Analyze common errors during installation and suggest suitable troubleshooting methods.

e) Illustrate the interfacing of a Bluetooth module with Arduino and describe how wireless data communication is established for device control.

Q.5 Attempt the following. (Any Two) **12**

a) Illustrate the architecture of Arduino UNO with a neat block diagram. Explain the role of microcontroller, clock circuit, power supply, and communication interfaces.

b) Design and develop an Arduino-based security system using PIR and IR sensors, and evaluate its effectiveness in motion detection.

c) Design and implement a smart agriculture monitoring system using LDR and Soil Moisture Sensor interfaced with Arduino and justify the choice of sensors.

T.Y. (B.Tech.) (Electrical Engineering) (Semester - II) (New) (CBCS) Examination: March/April – 2026
Advanced Microcontrollers (ENTMDM-04A)

Day & Date: Saturday, 30-05-2026 Max. Marks: 70
Time: 03:00 AM To 06:00 PM

Instructions: 1) Q. No. 1 is compulsory. It should be solved in the first 30 minutes in Answer Book Page no 03 (Starting page of the Answer Book). Each question carries one mark.
2) Don't forget to Mention question paper set (P/Q/R/S) on top of page.
3) Figures to the right indicate full marks.

MCQ/Objective Type Questions

Duration: 30 Minutes Marks:14

Q.1 Choose the correct alternatives from the options. 14

1) Common anode display means?
a) Common positive b) Common negative
c) Floating d) Grounded

2) Total digital I/O pins in UNO?
a) 10 b) 12
c) 14 d) 16

3) Bootloader is used for?
a) Programming b) Power supply
c) Reset d) Clock

4) Which pin is used for PWM?
a) Analog b) Digital
c) PWM marked pins d) Vcc

5) setup() function runs?
a) Continuously b) Once
c) Twice d) Never

6) PIR sensor detects?
a) Heat motion b) Sound
c) Light d) Gas

7) MQ sensors are?
a) Gas sensors b) Light sensors
c) Pressure sensors d) Motion sensors

8) Capacitive sensor senses?
a) Pressure b) Touch
c) Sound d) Heat

9) Bluetooth HC-05 uses?
a) I2C b) SPI
c) UART d) USB

10) ARM processors use how many general purpose registers?
a) 8 b) 13
c) 16 d) 32

11) Which header file is used in Embedded C?
a) stdio.h b) reg51.h
c) math.h d) string.h

12) DC motor converts?
a) Electrical to mechanical b) Mechanical to electrical
c) Heat to motion d) None

13) LM35 output is proportional to?
a) Current b) Voltage
c) Resistance d) Power

14) Digital camera uses embedded system for?
a) Image processing b) Gaming
c) Networking d) None

Set | S

T.Y. (B.Tech.) (Electrical Engineering) (Semester - II) (New) (CBCS) Examination: March/April – 2026
Advanced Microcontrollers (ENTMDM-04A)

Day & Date: Saturday, 30-05-2026 Max. Marks: 56
Time: 03:00 AM To 06:00 PM

Instructions: 1) All questions are compulsory.
2) Figures to the right indicate full marks.
3) Assume suitable data if necessary.

SECTION – I

Q.2 Attempt the following. (Any Four) **16**

a) Explain the fundamentals and key features of ARM processors. Discuss why ARM architecture is preferred in embedded systems.

b) Analyze the ARM register organization and illustrate the role of CPSR in processor operation with suitable examples.

c) Examine the ARM pipeline mechanism and compare it with non-pipelined execution in terms of performance.

d) Explain the basic structure of an Embedded C program for LPC2148. Describe the role of header files, special function registers, GPIO configuration, and delay routines with a suitable example.

e) Develop an Embedded C program to interface LEDs and push buttons with LPC2148 such that the LED glows based on button status. Illustrate the pin connections and explain the logic used.

Q.3 Attempt the following. (Any Two) **12**

a) Describe the architecture of the ARM7TDMI core with the help of a neat block diagram. Explain the function of each major block.

b) Implement an Embedded C program to interface a DC motor or stepper motor with LPC2148. Evaluate the advantages of stepper motor control over DC motor control in precision applications.

c) Design an interfacing circuit for a 7-segment display with LPC2148 and demonstrate how numerical digits (0-9) can be displayed using Embedded C programming.

SECTION – II

Q.4 Attempt the following. (Any Four) **16**

a) Explain the introduction and key features of Arduino. Describe how Arduino differs from traditional microcontroller development boards.

b) Identify and classify the pins of Arduino UNO.
Demonstrate the use of digital, analog, power, and communication pins with suitable examples.

c) Develop an Arduino program to control an LED or buzzer. Evaluate the importance of Arduino IDE and libraries in rapid prototyping.

d) Install and configure the Arduino IDE on a computer/laptop. Analyze common errors during installation and suggest suitable troubleshooting methods.

e) Illustrate the interfacing of a Bluetooth module with Arduino and describe how wireless data communication is established for device control.

Q.5 Attempt the following. (Any Two) **12**

a) Illustrate the architecture of Arduino UNO with a neat block diagram. Explain the role of microcontroller, clock circuit, power supply, and communication interfaces.

b) Design and develop an Arduino-based security system using PIR and IR sensors, and evaluate its effectiveness in motion detection.

c) Design and implement a smart agriculture monitoring system using LDR and Soil Moisture Sensor interfaced with Arduino and justify the choice of sensors.

e) Develop an Embedded C program to interface LEDs and push buttons with LPC2148 such that the LED glows based on button status. Illustrate the pin connections and explain the logic used.

Q.3 Attempt the following. (Any Two) **12**

a) Describe the architecture of the ARM7TDMI core with the help of a neat block diagram. Explain the function of each major block.

b) Implement an Embedded C program to interface a DC motor or stepper motor with LPC2148. Evaluate the advantages of stepper motor control over DC motor control in precision applications.

c) Design an interfacing circuit for a 7-segment display with LPC2148 and demonstrate how numerical digits (0-9) can be displayed using Embedded C programming.

SECTION – II

Q.4 Attempt the following. (Any Four) **16**

a) Explain the introduction and key features of Arduino. Describe how Arduino differs from traditional microcontroller development boards.

b) Identify and classify the pins of Arduino UNO.
Demonstrate the use of digital, analog, power, and communication pins with suitable examples.

c) Develop an Arduino program to control an LED or buzzer. Evaluate the importance of Arduino IDE and libraries in rapid prototyping.

d) Install and configure the Arduino IDE on a computer/laptop. Analyze common errors during installation and suggest suitable troubleshooting methods.

e) Illustrate the interfacing of a Bluetooth module with Arduino and describe how wireless data communication is established for device control.

Q.5 Attempt the following. (Any Two) **12**

a) Illustrate the architecture of Arduino UNO with a neat block diagram. Explain the role of microcontroller, clock circuit, power supply, and communication interfaces.

b) Design and develop an Arduino-based security system using PIR and IR sensors, and evaluate its effectiveness in motion detection.

c) Design and implement a smart agriculture monitoring system using LDR and Soil Moisture Sensor interfaced with Arduino and justify the choice of sensors.

Set **Q**

T.Y. (B.Tech.) (Mechanical Engineering) (Semester - II) (New) (CBCS) Examination: March/April – 2026
Advanced Microcontrollers (ENTMDM-04A)

Day & Date: Saturday, 30-05-2026 Max. Marks: 70
Time: 03:00 AM To 06:00 PM

Instructions: 1) Q. No. 1 is compulsory. It should be solved in the first 30 minutes in Answer Book Page no 03 (Starting page of the Answer Book). Each question carries one mark.
2) Don't forget to Mention question paper set (P/Q/R/S) on top of page.
3) Figures to the right indicate full marks.

MCQ/Objective Type Questions

Duration: 30 Minutes Marks:14

Q.1 Choose the correct alternatives from the options. **14**

1) Bootloader is used for?
a) Programming b) Power supply
c) Reset d) Clock

2) Which pin is used for PWM?
a) Analog b) Digital
c) PWM marked pins d) Vcc

3) setup() function runs?
a) Continuously b) Once
c) Twice d) Never

4) PIR sensor detects?
a) Heat motion b) Sound
c) Light d) Gas

5) MQ sensors are?
a) Gas sensors b) Light sensors
c) Pressure sensors d) Motion sensors

6) Capacitive sensor senses?
a) Pressure b) Touch
c) Sound d) Heat

7) Bluetooth HC-05 uses?
a) I2C b) SPI
c) UART d) USB

8) ARM processors use how many general purpose registers?
a) 8 b) 13
c) 16 d) 32

9) Which header file is used in Embedded C?
a) stdio.h b) reg51.h
c) math.h d) string.h

10) DC motor converts?
a) Electrical to mechanical b) Mechanical to electrical
c) Heat to motion d) None

11) LM35 output is proportional to?
a) Current b) Voltage
c) Resistance d) Power

12) Digital camera uses embedded system for?
a) Image processing b) Gaming
c) Networking d) None

13) Common anode display means?
a) Common positive b) Common negative
c) Floating d) Grounded

14) Total digital I/O pins in UNO?
a) 10 b) 12
c) 14 d) 16

MCQ/Objective Type Questions

Duration: 30 Minutes Marks:14

Q.1 Choose the correct alternatives from the options and rewrite the sentence. **14**

1) What is the main characteristic that differentiates IIoT from IoT?
a) Use of social media integration
b) Focus on consumer applications
c) Emphasis on industrial automation and reliability
d) Limited use of sensors

2) Which component is a key part of the IIoT structure?
a) Entertainment systems
b) Industrial sensors and actuators
c) Mobile gaming platforms
d) Social networking tools

3) In Industry 4.0, smart factories mainly rely on _____.
a) Manual labor only
b) Paper-based communication
c) Cyber-physical systems and real-time data
d) Isolated machines

4) What is the primary function of a sensor in an industrial IoT system?
a) To control machines directly
b) To convert physical parameters into electrical signals
c) To store large amounts of data
d) To transmit power

5) Actuators in industrial processes are used to _____.
a) Measure environmental conditions
b) Analyze data
c) Convert electrical signals into physical action
d) Store sensor data

6) Which network is specifically designed for connecting multiple sensors in an IoT environment?
   a) LAN
   b) MAN
   c) Sensor Network (WSN)
   d) PAN

7) In IoT-based process automation, data acquisition refers to _____.
   a) Manual data entry
   b) Collection of data from sensors in real time
   c) Deleting unwanted data
   d) Data encryption only

8) What is the main role of an IoT Gateway?
   a) To manufacture sensors
   b) To connect IoT devices with cloud and perform protocol conversion
   c) To store data permanently
   d) To replace sensors

9) Predictive maintenance using IIoT technology helps to _____.
   a) Increase unexpected machine failures
   b) Perform maintenance only after breakdown
   c) Predict equipment failures using data analytics
   d) Eliminate need of sensors

10) Real-time dashboards in IoT systems are used for _____.
   a) Manual data recording
   b) Offline data storage only
   c) Visual monitoring and analysis of live data
   d) Controlling power supply

11) Why is IIoT security critical in the manufacturing industry?
   a) To increase manual operations
   b) To protect industrial systems from cyber-attacks and data breaches
   c) To reduce use of automation
   d) To eliminate sensors

12) Which of the following is a major security concern in IIoT systems?
   a) High power consumption
   b) Unauthorized access to devices and data
   c) Low storage capacity
   d) Limited connectivity

13) Secure remote access for IIoT devices is typically achieved using _____.

a) Open public networks without protection
b) VPNs and encrypted communication protocols
c) Only physical access
d) No authentication methods

14) Process automation in IIoT helps in _____.

a) Increasing manual intervention
b) Reducing efficiency
c) Improving productivity and accuracy
d) Eliminating all sensors

c) Low storage capacity
d) Limited connectivity

3) Secure remote access for IIoT devices is typically achieved using _____.
a) Open public networks without protection
b) VPNs and encrypted communication protocols
c) Only physical access
d) No authentication methods

4) Process automation in IIoT helps in _____.
a) Increasing manual intervention
b) Reducing efficiency
c) Improving productivity and accuracy
d) Eliminating all sensors

5) What is the main characteristic that differentiates IIoT from IoT?
a) Use of social media integration
b) Focus on consumer applications
c) Emphasis on industrial automation and reliability
d) Limited use of sensors

6) Which component is a key part of the IIoT structure?
   a) Entertainment systems
   b) Industrial sensors and actuators
   c) Mobile gaming platforms
   d) Social networking tools

7) In Industry 4.0, smart factories mainly rely on _____.
   a) Manual labor only
   b) Paper-based communication
   c) Cyber-physical systems and real-time data
   d) Isolated machines

8) What is the primary function of a sensor in an industrial IoT system?
   a) To control machines directly
   b) To convert physical parameters into electrical signals
   c) To store large amounts of data
   d) To transmit power

9) Actuators in industrial processes are used to _____.
   a) Measure environmental conditions
   b) Analyze data
   c) Convert electrical signals into physical action
   d) Store sensor data

10) Which network is specifically designed for connecting multiple sensors in an IoT environment?
   a) LAN
   b) MAN
   c) Sensor Network (WSN)
   d) PAN

11) In IoT-based process automation, data acquisition refers to _____.
   a) Manual data entry
   b) Collection of data from sensors in real time
   c) Deleting unwanted data
   d) Data encryption only

12) What is the main role of an IoT Gateway?
   a) To manufacture sensors
   b) To connect IoT devices with cloud and perform protocol conversion
   c) To store data permanently
   d) To replace sensors

13) Predictive maintenance using IIoT technology helps to _____.
   a) Increase unexpected machine failures
   b) Perform maintenance only after breakdown
   c) Predict equipment failures using data analytics
   d) Eliminate need of sensors

14) Real-time dashboards in IoT systems are used for _____.

a) Manual data recording
b) Offline data storage only
c) Visual monitoring and analysis of live data
d) Controlling power supply

Seat No.	

Set **R**

T.Y. (B.Tech.) (Civil Engineering) (Semester - II) (New) (CBCS)
Examination: March/April - 2026
Industrial IoT (ENTMDM-04B)

Day & Date: Saturday, 30-05-2026 Max. Marks: 56
Time: 03:00 PM To 06:00 PM

Instructions: 1) All questions are compulsory.
2) Figures to the right indicate full marks.
3) Use of non-programmable calculator is allowed.

SECTION – I

Q.2 Attempt the following. (Any Four) **16**

a) Define IIoT and explain the structure of IIoT with its key components.

b) Differentiate between IoT and IIoT. Explain the role of IoT and IIoT in industrial applications.

c) What is Industry 4.0? Explain its key features, support systems, and the concept of smart factories.

d) Explain sensors and actuators used in industrial processes. Describe their roles with suitable examples.

e) What is an IoT Hub system? Explain its functions and importance in IoT architecture.

Q.3 Attempt the following. (Any Two) **12**

a) Describe wireless sensor nodes in detail. Explain the working and comparison of Bluetooth, WiFi, and LoRa protocols, and discuss the role of IoT Hub systems in managing connected devices and data.

b) What is a sensor network? Explain process automation and data acquisition on an IoT platform with a neat block diagram.

c) What are smart factories? Explain their features, advantages, and working mechanism.

SECTION – II

Q.4 Attempt the following. (Any Four) **16**

a) What is an IoT Gateway? Explain its functions in an IoT system.

b) Explain cloud computing in IoT. How is it used for real-time dashboard data monitoring.

c) Explain the role of IIoT in the manufacturing industry with suitable examples.

d) Explain secure remote access for IIoT devices and its importance in industry.

e) What is predictive maintenance? Explain its benefits using IIoT technology.

Q.5 Attempt the following. (Any Two) **12**

a) Explain data analytics in IIoT. Discuss predictive maintenance and its importance in industrial applications.

b) Describe secure remote access for IIoT devices. Explain the methods and importance of ensuring secure communication.

c) Discuss different types of industrial needs for IoT security with suitable examples.

Industrial IoT (ENTMDM-04B)

Day & Date: Saturday, 30-05-2026 Max. Marks: 70
Time: 03:00 PM To 06:00 PM

Instructions: 1) Q. No. 1 is compulsory. It should be solved in the first 30 minutes in Answer Book Page no 03 (Starting page of the Answer Book). Each question carries one mark.
2) Don't forget to Mention question paper set (P/Q/R/S) on top of page.
3) Figures to the right indicates full marks.

MCQ/Objective Type Questions

Duration: 30 Minutes Marks:14

Q.1 Choose the correct alternatives from the options and rewrite the sentence. **14**

1) Which network is specifically designed for connecting multiple sensors in an IoT environment?
a) LAN b) MAN
c) Sensor Network (WSN) d) PAN

2) In IoT-based process automation, data acquisition refers to _____.
a) Manual data entry
b) Collection of data from sensors in real time
c) Deleting unwanted data
d) Data encryption only

3) What is the main role of an IoT Gateway?
a) To manufacture sensors
b) To connect IoT devices with cloud and perform protocol conversion
c) To store data permanently
d) To replace sensors

4) Predictive maintenance using IIoT technology helps to _____.
a) Increase unexpected machine failures
b) Perform maintenance only after breakdown
c) Predict equipment failures using data analytics
d) Eliminate need of sensors

5) Real-time dashboards in IoT systems are used for _____.
a) Manual data recording
b) Offline data storage only
c) Visual monitoring and analysis of live data
d) Controlling power supply

6) Why is IIoT security critical in the manufacturing industry?
   a) To increase manual operations
   b) To protect industrial systems from cyber-attacks and data breaches
   c) To reduce use of automation
   d) To eliminate sensors

7) Which of the following is a major security concern in IIoT systems?
   a) High power consumption
   b) Unauthorized access to devices and data
   c) Low storage capacity
   d) Limited connectivity

8) Secure remote access for IIoT devices is typically achieved using _____.
   a) Open public networks without protection
   b) VPNs and encrypted communication protocols
   c) Only physical access
   d) No authentication methods

9) Process automation in IIoT helps in _____.
   a) Increasing manual intervention
   b) Reducing efficiency
   c) Improving productivity and accuracy
   d) Eliminating all sensors

10) What is the main characteristic that differentiates IIoT from IoT?
   a) Use of social media integration
   b) Focus on consumer applications
   c) Emphasis on industrial automation and reliability
   d) Limited use of sensors

11) Which component is a key part of the IIoT structure?
   a) Entertainment systems
   b) Industrial sensors and actuators
   c) Mobile gaming platforms
   d) Social networking tools

12) In Industry 4.0, smart factories mainly rely on _____.
   a) Manual labor only
   b) Paper-based communication
   c) Cyber-physical systems and real-time data
   d) Isolated machines

13) What is the primary function of a sensor in an industrial IoT system?
   a) To control machines directly
   b) To convert physical parameters into electrical signals
   c) To store large amounts of data
   d) To transmit power

d) Controlling power supply

6) Why is IIoT security critical in the manufacturing industry?
   a) To increase manual operations
   b) To protect industrial systems from cyber-attacks and data breaches
   c) To reduce use of automation
   d) To eliminate sensors

7) Which of the following is a major security concern in IIoT systems?
   a) High power consumption
   b) Unauthorized access to devices and data
   c) Low storage capacity
   d) Limited connectivity

8) Secure remote access for IIoT devices is typically achieved using _____.
   a) Open public networks without protection
   b) VPNs and encrypted communication protocols
   c) Only physical access
   d) No authentication methods

9) Process automation in IIoT helps in _____.
   a) Increasing manual intervention
   b) Reducing efficiency
   c) Improving productivity and accuracy
   d) Eliminating all sensors

10) What is the main characteristic that differentiates IIoT from IoT?
   a) Use of social media integration
   b) Focus on consumer applications
   c) Emphasis on industrial automation and reliability
   d) Limited use of sensors

11) Which component is a key part of the IIoT structure?
   a) Entertainment systems
   b) Industrial sensors and actuators
   c) Mobile gaming platforms
   d) Social networking tools

12) In Industry 4.0, smart factories mainly rely on _____.
   a) Manual labor only
   b) Paper-based communication
   c) Cyber-physical systems and real-time data
   d) Isolated machines

13) What is the primary function of a sensor in an industrial IoT system?
   a) To control machines directly
   b) To convert physical parameters into electrical signals
   c) To store large amounts of data
   d) To transmit power

14) Actuators in industrial processes are used to _____.

a) Measure environmental conditions
b) Analyze data
c) Convert electrical signals into physical action
d) Store sensor data

Set | S

T.Y. (B.Tech.) (Computer Science & Engineering) (Semester - II) (New) (CBCS) Examination: March/April - 2026
Industrial IoT (ENTMDM-04B)

Day & Date: Saturday, 30-05-2026 Max. Marks: 56
Time: 03:00 PM To 06:00 PM

Instructions: 1) All questions are compulsory.
2) Figures to the right indicate full marks.
3) Use of non-programmable calculator is allowed.

SECTION – I

Q.2 Attempt the following. (Any Four) **16**

a) Define IIoT and explain the structure of IIoT with its key components.

b) Differentiate between IoT and IIoT. Explain the role of IoT and IIoT in industrial applications.

c) What is Industry 4.0? Explain its key features, support systems, and the concept of smart factories.

d) Explain sensors and actuators used in industrial processes. Describe their roles with suitable examples.

e) What is an IoT Hub system? Explain its functions and importance in IoT architecture.

Q.3 Attempt the following. (Any Two) **12**

a) Describe wireless sensor nodes in detail. Explain the working and comparison of Bluetooth, WiFi, and LoRa protocols, and discuss the role of IoT Hub systems in managing connected devices and data.

b) What is a sensor network? Explain process automation and data acquisition on an IoT platform with a neat block diagram.

c) What are smart factories? Explain their features, advantages, and working mechanism.

SECTION – II

Q.4 Attempt the following. (Any Four) **16**

a) What is an IoT Gateway? Explain its functions in an IoT system.

b) Explain cloud computing in IoT. How is it used for real-time dashboard data monitoring.

c) Explain the role of IIoT in the manufacturing industry with suitable examples.

d) Explain secure remote access for IIoT devices and its importance in industry.

e) What is predictive maintenance? Explain its benefits using IIoT technology.

Q.5 Attempt the following. (Any Two) **12**

a) Explain data analytics in IIoT. Discuss predictive maintenance and its importance in industrial applications.

b) Describe secure remote access for IIoT devices. Explain the methods and importance of ensuring secure communication.

c) Discuss different types of industrial needs for IoT security with suitable examples.

Industrial IoT (ENTMDM-04B)

Day & Date: Saturday, 30-05-2026 Max. Marks: 70
Time: 03:00 PM To 06:00 PM

Instructions: 1) Q. No. 1 is compulsory. It should be solved in the first 30 minutes in Answer Book Page no 03 (Starting page of the Answer Book). Each question carries one mark.
2) Don't forget to Mention question paper set (P/Q/R/S) on top of page.
3) Figures to the right indicates full marks.

MCQ/Objective Type Questions

Duration: 30 Minutes Marks:14

Q.1 Choose the correct alternatives from the options and rewrite the sentence. **14**

1) What is the main characteristic that differentiates IIoT from IoT?
a) Use of social media integration
b) Focus on consumer applications
c) Emphasis on industrial automation and reliability
d) Limited use of sensors

2) Which component is a key part of the IIoT structure?
a) Entertainment systems
b) Industrial sensors and actuators
c) Mobile gaming platforms
d) Social networking tools

3) In Industry 4.0, smart factories mainly rely on _____.
a) Manual labor only
b) Paper-based communication
c) Cyber-physical systems and real-time data
d) Isolated machines

4) What is the primary function of a sensor in an industrial IoT system?
a) To control machines directly
b) To convert physical parameters into electrical signals
c) To store large amounts of data
d) To transmit power

5) Actuators in industrial processes are used to _____.
a) Measure environmental conditions
b) Analyze data
c) Convert electrical signals into physical action
d) Store sensor data

6) Which network is specifically designed for connecting multiple sensors in an IoT environment?
   a) LAN
   b) MAN
   c) Sensor Network (WSN)
   d) PAN

7) In IoT-based process automation, data acquisition refers to _____.
   a) Manual data entry
   b) Collection of data from sensors in real time
   c) Deleting unwanted data
   d) Data encryption only

8) What is the main role of an IoT Gateway?
   a) To manufacture sensors
   b) To connect IoT devices with cloud and perform protocol conversion
   c) To store data permanently
   d) To replace sensors

9) Predictive maintenance using IIoT technology helps to _____.
   a) Increase unexpected machine failures
   b) Perform maintenance only after breakdown
   c) Predict equipment failures using data analytics
   d) Eliminate need of sensors

10) Real-time dashboards in IoT systems are used for _____.
   a) Manual data recording
   b) Offline data storage only
   c) Visual monitoring and analysis of live data
   d) Controlling power supply

11) Why is IIoT security critical in the manufacturing industry?
   a) To increase manual operations
   b) To protect industrial systems from cyber-attacks and data breaches
   c) To reduce use of automation
   d) To eliminate sensors

12) Which of the following is a major security concern in IIoT systems?
   a) High power consumption
   b) Unauthorized access to devices and data
   c) Low storage capacity
   d) Limited connectivity

13) Secure remote access for IIoT devices is typically achieved using _____.

a) Open public networks without protection
b) VPNs and encrypted communication protocols
c) Only physical access
d) No authentication methods

14) Process automation in IIoT helps in _____.

a) Increasing manual intervention
b) Reducing efficiency
c) Improving productivity and accuracy
d) Eliminating all sensors

   a) Increase unexpected machine failures
   b) Perform maintenance only after breakdown
   c) Predict equipment failures using data analytics
   d) Eliminate need of sensors

10) Real-time dashboards in IoT systems are used for _____.
   a) Manual data recording
   b) Offline data storage only
   c) Visual monitoring and analysis of live data
   d) Controlling power supply

11) Why is IIoT security critical in the manufacturing industry?
   a) To increase manual operations
   b) To protect industrial systems from cyber-attacks and data breaches
   c) To reduce use of automation
   d) To eliminate sensors

12) Which of the following is a major security concern in IIoT systems?
   a) High power consumption
   b) Unauthorized access to devices and data
   c) Low storage capacity
   d) Limited connectivity

13) Secure remote access for IIoT devices is typically achieved using _____.

a) Open public networks without protection
b) VPNs and encrypted communication protocols
c) Only physical access
d) No authentication methods

14) Process automation in IIoT helps in _____.

a) Increasing manual intervention
b) Reducing efficiency
c) Improving productivity and accuracy
d) Eliminating all sensors

Set **P**

T.Y. (B.Tech.) (Electronics & Telecommunication Engineering) (Semester - II) (New) (CBCS) Examination: March/April - 2026
Industrial IoT (ENTMDM-04B)

Day & Date: Saturday, 30-05-2026 Max. Marks: 56
Time: 03:00 PM To 06:00 PM

Instructions: 1) All questions are compulsory.
2) Figures to the right indicate full marks.
3) Use of non-programmable calculator is allowed.

SECTION – I

Q.2 Attempt the following. (Any Four) **16**

a) Define IIoT and explain the structure of IIoT with its key components.

b) Differentiate between IoT and IIoT. Explain the role of IoT and IIoT in industrial applications.

c) What is Industry 4.0? Explain its key features, support systems, and the concept of smart factories.

d) Explain sensors and actuators used in industrial processes. Describe their roles with suitable examples.

e) What is an IoT Hub system? Explain its functions and importance in IoT architecture.

Q.3 Attempt the following. (Any Two) **12**

a) Describe wireless sensor nodes in detail. Explain the working and comparison of Bluetooth, WiFi, and LoRa protocols, and discuss the role of IoT Hub systems in managing connected devices and data.

b) What is a sensor network? Explain process automation and data acquisition on an IoT platform with a neat block diagram.

c) What are smart factories? Explain their features, advantages, and working mechanism.

SECTION – II

Q.4 Attempt the following. (Any Four) **16**

a) What is an IoT Gateway? Explain its functions in an IoT system.

b) Explain cloud computing in IoT. How is it used for real-time dashboard data monitoring.

c) Explain the role of IIoT in the manufacturing industry with suitable examples.

d) Explain secure remote access for IIoT devices and its importance in industry.

e) What is predictive maintenance? Explain its benefits using IIoT technology.

Q.5 Attempt the following. (Any Two) **12**

a) Explain data analytics in IIoT. Discuss predictive maintenance and its importance in industrial applications.

b) Describe secure remote access for IIoT devices. Explain the methods and importance of ensuring secure communication.

c) Discuss different types of industrial needs for IoT security with suitable examples.

Seat No.	

Set **Q**

T.Y. (B.Tech.) (Electronics & Telecommunication Engineering) (Semester - II) (New) (CBCS) Examination: March/April - 2026
Industrial IoT (ENTMDM-04B)

Day & Date: Saturday, 30-05-2026 Max. Marks: 70
Time: 03:00 PM To 06:00 PM

Instructions: 1) Q. No. 1 is compulsory. It should be solved in the first 30 minutes in Answer Book Page no 03 (Starting page of the Answer Book). Each question carries one mark.
2) Don't forget to Mention question paper set (P/Q/R/S) on top of page.
3) Figures to the right indicates full marks.

MCQ/Objective Type Questions

Duration: 30 Minutes Marks:14

Q.1 Choose the correct alternatives from the options and rewrite the sentence. **14**

1) What is the main role of an IoT Gateway?
a) To manufacture sensors
b) To connect IoT devices with cloud and perform protocol conversion
c) To store data permanently
d) To replace sensors

2) Predictive maintenance using IIoT technology helps to _____.
a) Increase unexpected machine failures
b) Perform maintenance only after breakdown
c) Predict equipment failures using data analytics
d) Eliminate need of sensors

3) Real-time dashboards in IoT systems are used for _____.
a) Manual data recording
b) Offline data storage only
c) Visual monitoring and analysis of live data
d) Controlling power supply

4) Why is IIoT security critical in the manufacturing industry?
a) To increase manual operations
b) To protect industrial systems from cyber-attacks and data breaches
c) To reduce use of automation
d) To eliminate sensors

5) Which of the following is a major security concern in IIoT systems?
a) High power consumption
b) Unauthorized access to devices and data
c) Low storage capacity
d) Limited connectivity

6) Secure remote access for IIoT devices is typically achieved using _____.
   a) Open public networks without protection
   b) VPNs and encrypted communication protocols
   c) Only physical access
   d) No authentication methods

7) Process automation in IIoT helps in _____.
   a) Increasing manual intervention
   b) Reducing efficiency
   c) Improving productivity and accuracy
   d) Eliminating all sensors

8) What is the main characteristic that differentiates IIoT from IoT?
   a) Use of social media integration
   b) Focus on consumer applications
   c) Emphasis on industrial automation and reliability
   d) Limited use of sensors

9) Which component is a key part of the IIoT structure?
   a) Entertainment systems
   b) Industrial sensors and actuators
   c) Mobile gaming platforms
   d) Social networking tools

10) In Industry 4.0, smart factories mainly rely on _____.
   a) Manual labor only
   b) Paper-based communication
   c) Cyber-physical systems and real-time data
   d) Isolated machines

11) What is the primary function of a sensor in an industrial IoT system?
   a) To control machines directly
   b) To convert physical parameters into electrical signals
   c) To store large amounts of data
   d) To transmit power

12) Actuators in industrial processes are used to _____.
   a) Measure environmental conditions
   b) Analyze data
   c) Convert electrical signals into physical action
   d) Store sensor data

13) Which network is specifically designed for connecting multiple sensors in an IoT environment?
   a) LAN
   b) MAN
   c) Sensor Network (WSN)
   d) PAN

14) In loT-based process automation, data acquisition refers to _____.

a) Manual data entry
b) Collection of data from sensors in real time
c) Deleting unwanted data
d) Data encryption only

MCQ/Objective Type Questions

Duration: 30 Minutes Marks:14

Q.1 Choose the correct alternatives from the options and rewrite the sentence. **14**

1) Why is IIoT security critical in the manufacturing industry?
a) To increase manual operations
b) To protect industrial systems from cyber-attacks and data breaches
c) To reduce use of automation
d) To eliminate sensors

2) Which of the following is a major security concern in IIoT systems?
a) High power consumption
b) Unauthorized access to devices and data
c) Low storage capacity
d) Limited connectivity

3) Secure remote access for IIoT devices is typically achieved using _____.
a) Open public networks without protection
b) VPNs and encrypted communication protocols
c) Only physical access
d) No authentication methods

4) Process automation in IIoT helps in _____.
a) Increasing manual intervention
b) Reducing efficiency
c) Improving productivity and accuracy
d) Eliminating all sensors

5) What is the main characteristic that differentiates IIoT from IoT?
a) Use of social media integration
b) Focus on consumer applications
c) Emphasis on industrial automation and reliability
d) Limited use of sensors

6) Which component is a key part of the IIoT structure?
   a) Entertainment systems
   b) Industrial sensors and actuators
   c) Mobile gaming platforms
   d) Social networking tools

7) In Industry 4.0, smart factories mainly rely on _____.
   a) Manual labor only
   b) Paper-based communication

   c) To store large amounts of data
   d) To transmit power

12) Actuators in industrial processes are used to _____.
   a) Measure environmental conditions
   b) Analyze data
   c) Convert electrical signals into physical action
   d) Store sensor data

13) Which network is specifically designed for connecting multiple sensors in an IoT environment?
   a) LAN
   b) MAN
   c) Sensor Network (WSN)
   d) PAN

14) In loT-based process automation, data acquisition refers to _____.

a) Manual data entry
b) Collection of data from sensors in real time
c) Deleting unwanted data
d) Data encryption only

Seat No.	

Set **Q**

T.Y. (B.Tech.) (Mechanical Engineering) (Semester - II) (New) (CBCS) Examination: March/April - 2026
Industrial IoT (ENTMDM-04B)

Day & Date: Saturday, 30-05-2026 Max. Marks: 56
Time: 03:00 PM To 06:00 PM

Instructions: 1) All questions are compulsory.
2) Figures to the right indicate full marks.
3) Use of non-programmable calculator is allowed.

SECTION – I

Q.2 Attempt the following. (Any Four) **16**

a) Define IIoT and explain the structure of IIoT with its key components.

b) Differentiate between IoT and IIoT. Explain the role of IoT and IIoT in industrial applications.

c) What is Industry 4.0? Explain its key features, support systems, and the concept of smart factories.

d) Explain sensors and actuators used in industrial processes. Describe their roles with suitable examples.

e) What is an IoT Hub system? Explain its functions and importance in IoT architecture.

Q.3 Attempt the following. (Any Two) **12**

a) Describe wireless sensor nodes in detail. Explain the working and comparison of Bluetooth, WiFi, and LoRa protocols, and discuss the role of IoT Hub systems in managing connected devices and data.

b) What is a sensor network? Explain process automation and data acquisition on an IoT platform with a neat block diagram.

c) What are smart factories? Explain their features, advantages, and working mechanism.

SECTION – II

Q.4 Attempt the following. (Any Four) **16**

a) What is an IoT Gateway? Explain its functions in an IoT system.

b) Explain cloud computing in IoT. How is it used for real-time dashboard data monitoring.

c) Explain the role of IIoT in the manufacturing industry with suitable examples.

d) Explain secure remote access for IIoT devices and its importance in industry.

e) What is predictive maintenance? Explain its benefits using IIoT technology.

Q.5 Attempt the following. (Any Two) **12**

a) Explain data analytics in IIoT. Discuss predictive maintenance and its importance in industrial applications.

b) Describe secure remote access for IIoT devices. Explain the methods and importance of ensuring secure communication.

c) Discuss different types of industrial needs for IoT security with suitable examples.

Seat No.	

Set **R**

T.Y. (B.Tech.) (Mechanical Engineering) (Semester - II) (New) (CBCS) Examination: March/April - 2026
Industrial IoT (ENTMDM-04B)

Day & Date: Saturday, 30-05-2026 Max. Marks: 70
Time: 03:00 PM To 06:00 PM

Instructions: 1) Q. No. 1 is compulsory. It should be solved in the first 30 minutes in Answer Book Page no 03 (Starting page of the Answer Book). Each question carries one mark.
2) Don't forget to Mention question paper set (P/Q/R/S) on top of page.
3) Figures to the right indicates full marks.

MCQ/Objective Type Questions

Duration: 30 Minutes Marks:14

Q.1 Choose the correct alternatives from the options and rewrite the sentence. **14**

1) Why is IIoT security critical in the manufacturing industry?
a) To increase manual operations
b) To protect industrial systems from cyber-attacks and data breaches
c) To reduce use of automation
d) To eliminate sensors

2) Which of the following is a major security concern in IIoT systems?
a) High power consumption
b) Unauthorized access to devices and data
c) Low storage capacity
d) Limited connectivity

3) Secure remote access for IIoT devices is typically achieved using _____.
a) Open public networks without protection
b) VPNs and encrypted communication protocols
c) Only physical access
d) No authentication methods

4) Process automation in IIoT helps in _____.
a) Increasing manual intervention
b) Reducing efficiency
c) Improving productivity and accuracy
d) Eliminating all sensors

5) What is the main characteristic that differentiates IIoT from IoT?
a) Use of social media integration
b) Focus on consumer applications
c) Emphasis on industrial automation and reliability
d) Limited use of sensors

6) Which component is a key part of the IIoT structure?
   a) Entertainment systems
   b) Industrial sensors and actuators
   c) Mobile gaming platforms
   d) Social networking tools

7) In Industry 4.0, smart factories mainly rely on _____.
   a) Manual labor only
   b) Paper-based communication
   c) Cyber-physical systems and real-time data
   d) Isolated machines

8) What is the primary function of a sensor in an industrial IoT system?
   a) To control machines directly
   b) To convert physical parameters into electrical signals
   c) To store large amounts of data
   d) To transmit power

9) Actuators in industrial processes are used to _____.
   a) Measure environmental conditions
   b) Analyze data
   c) Convert electrical signals into physical action
   d) Store sensor data

10) Which network is specifically designed for connecting multiple sensors in an IoT environment?
   a) LAN
   b) MAN
   c) Sensor Network (WSN)
   d) PAN

11) In IoT-based process automation, data acquisition refers to _____.
   a) Manual data entry
   b) Collection of data from sensors in real time
   c) Deleting unwanted data
   d) Data encryption only

12) What is the main role of an IoT Gateway?
   a) To manufacture sensors
   b) To connect IoT devices with cloud and perform protocol conversion
   c) To store data permanently
   d) To replace sensors

13) Predictive maintenance using IIoT technology helps to _____.
   a) Increase unexpected machine failures
   b) Perform maintenance only after breakdown
   c) Predict equipment failures using data analytics
   d) Eliminate need of sensors

14) Real-time dashboards in IoT systems are used for _____.

a) Manual data recording
b) Offline data storage only
c) Visual monitoring and analysis of live data
d) Controlling power supply

Instructions: 1) Q. No. 1 is compulsory. It should be solved in the first 30 minutes in Answer Book Page no 03 (Starting page of the Answer Book). Each question carries one mark.
2) Don't forget to Mention question paper set (P/Q/R/S) on top of page.
3) Figures to the right indicate full marks.

MCQ/Objective Type Questions

Duration: 30 Minutes Marks:14

Q.1 Choose the correct answer. **14**

1) Predictive analytics mainly focuses on _____.
a) Describing past events
b) Explaining why something happened
c) Predicting future outcomes using historical data
d) Storing business data

2) In healthcare, predictive analytics is commonly used for _____.
a) Designing buildings
b) Disease risk prediction
c) Writing prescriptions manually
d) Managing payroll

3) In online marketing, predictive analytics helps to _____.
a) Reduce internet speed
b) Predict customer buying behavior
c) Manufacture products
d) Design office furniture

4) Target marketing focuses on _____.
a) Selling to everyone equally
b) Identifying specific customer segments
c) Ignoring customer data
d) Increasing product cost

5) Which of the following is a structured data type?
a) Text documents b) Images
c) Relational database tables d) Videos

6) Predictive analytics is closely related to _____.
   a) Literature
   b) Statistics and Machine Learning
   c) Architecture
   d) Geography

7) Which of the following is a challenge due to constantly changing data?
   a) Data remains static
   b) Data becomes outdated quickly
   c) Data size decreases
   d) Data cannot be stored

8) Exploration of raw data means _____.
   a) Deleting original data
   b) Encrypting the data
   c) Analyzing data before processing
   d) Storing data in files

9) In Data Modelling, a simulation is used to _____.
   a) Store Data Permanently
   b) Represent Real-world Processes over time
   c) Delete Unwanted data
   d) Compress Large datasets

10) The Target Store Case study is related to _____.
   a) Disease Prediction
   b) Weather Prediction
   c) Customer Behavior Analysis
   d) Network Security

11) In document Processing, a Term- document Matrix represents _____.
   a) Images in documents
   b) Numbers of Users
   c) Document size only
   d) Frequency of terms in documents

12) Association Rule Mining is Mainly Used to _____.
   a) Find relationships between data items
   b) Detect hardware faults
   c) Improve Network Speed
   d) Encrypt Messages

13) Which of the following is a technique for predicting a continuous target variable?
   a) Classification
   b) Regression
   c) Clustering
   d) Dimensionality Reduction

14) Which of the following is a technique for grouping similar data points together?

a) Classification
b) Regression
c) Clustering
d) Dimensionality Reduction

Instructions: 1) All questions are compulsory.
2) Figures to the right indicate full marks.

SECTION – I

Q.2 Solve the following. (Any Four) **16**

a) What is Predictive Analytics? Explain Advantages and strategies of predictive Analytics.

b) Write a short note on: Surveying Marketplace

c) Explain Predictive modelling lifecycle.

d) Explain Online marketing and retail.

e) Compare Business Intelligence Vs. Big Data Analytics

Q.3 Answer the following. (Any Two) **12**

a) Explain Business value of predictive analytics Key applications in healthcare, finance.

b) Explain connecting to related disciplines in statistics, data mining and machine learning.

c) Explain complexities in searching your data. And discuss how data growth can affects the complexities in data system.

SECTION – II

Q.4 Solve the following. (Any Four) **16**

a) Explain Healthcare analytics case studies: Google flu trends, Cancer survivability predictors.

b) Explain Data Clustering in detail.

c) Explain KNN Algorithm with example.

d) Explain Twitter-based predictors of earthquakes.

e) Explain Markov model with example.

Q.5 Answer the following. (Any Two) **12**

a) Define Modelling of Data. Explain Models, Simulation and Categories with Examples.

b) Explain in brief Data Classification. How it can be introduced in Business?

c) Explain structuring the data: extracting, transforming and loading the data.

1) Predictive analytics is closely related to _____.
a) Literature
b) Statistics and Machine Learning
c) Architecture
d) Geography

2) Which of the following is a challenge due to constantly changing data?
a) Data remains static
b) Data becomes outdated quickly
c) Data size decreases
d) Data cannot be stored

3) Exploration of raw data means _____.
a) Deleting original data
b) Encrypting the data
c) Analyzing data before processing
d) Storing data in files

4) In Data Modelling, a simulation is used to _____.
a) Store Data Permanently
b) Represent Real-world Processes over time
c) Delete Unwanted data
d) Compress Large datasets

5) The Target Store Case study is related to _____.
a) Disease Prediction b) Weather Prediction
c) Customer Behavior Analysis d) Network Security

6) In document Processing, a Term- document Matrix represents _____.
   a) Images in documents
   b) Numbers of Users
   c) Document size only
   d) Frequency of terms in documents

7) Association Rule Mining is Mainly Used to _____.
   a) Find relationships between data items
   b) Detect hardware faults
   c) Improve Network Speed
   d) Encrypt Messages

8) Which of the following is a technique for predicting a continuous target variable?
   a) Classification
   b) Regression
   c) Clustering
   d) Dimensionality Reduction

9) Which of the following is a technique for grouping similar data points together?
   a) Classification
   b) Regression
   c) Clustering
   d) Dimensionality Reduction

10) Predictive analytics mainly focuses on _____.
   a) Describing past events
   b) Explaining why something happened
   c) Predicting future outcomes using historical data
   d) Storing business data

11) In healthcare, predictive analytics is commonly used for _____.
   a) Designing buildings
   b) Disease risk prediction
   c) Writing prescriptions manually
   d) Managing payroll

12) In online marketing, predictive analytics helps to _____.
   a) Reduce internet speed
   b) Predict customer buying behavior
   c) Manufacture products
   d) Design office furniture

13) Target marketing focuses on _____.
   a) Selling to everyone equally
   b) Identifying specific customer segments
   c) Ignoring customer data
   d) Increasing product cost

14) Which of the following is a structured data type?
   a) Text documents
   b) Images
   c) Relational database tables
   d) Videos

Seat No.	

Set **S**

T.Y. (B.Tech.) (Civil Engineering) (Semester - II) (New) (CBCS)
Examination: March/April – 2026
Predictive Analytics (CSEMDM-04A)

Day & Date: Saturday, 30-05-2026 Max. Marks: 56
Time: 03:00 PM To 06:00 PM

Instructions: 1) All questions are compulsory.
2) Figures to the right indicate full marks.

SECTION – I

Q.2 Solve the following. (Any Four) **16**

a) What is Predictive Analytics? Explain Advantages and strategies of predictive Analytics.

b) Write a short note on: Surveying Marketplace

c) Explain Predictive modelling lifecycle.

d) Explain Online marketing and retail.

e) Compare Business Intelligence Vs. Big Data Analytics

Q.3 Answer the following. (Any Two) **12**

a) Explain Business value of predictive analytics Key applications in healthcare, finance.

b) Explain connecting to related disciplines in statistics, data mining and machine learning.

c) Explain complexities in searching your data. And discuss how data growth can affects the complexities in data system.

SECTION – II

Q.4 Solve the following. (Any Four) **16**

a) Explain Healthcare analytics case studies: Google flu trends, Cancer survivability predictors.

b) Explain Data Clustering in detail.

c) Explain KNN Algorithm with example.

d) Explain Twitter-based predictors of earthquakes.

e) Explain Markov model with example.

Q.5 Answer the following. (Any Two) **12**

a) Define Modelling of Data. Explain Models, Simulation and Categories with Examples.

b) Explain in brief Data Classification. How it can be introduced in Business?

c) Explain structuring the data: extracting, transforming and loading the data.

T.Y. (B.Tech.) (Computer Science & Engineering) (Semester - II) (New) (CBCS) Examination: March/April – 2026
Predictive Analytics (CSEMDM-04A)

Day & Date: Saturday, 30-05-2026 Max. Marks: 70
Time: 03:00 PM To 06:00 PM

Instructions: 1) Q. No. 1 is compulsory. It should be solved in the first 30 minutes in Answer Book Page no 03 (Starting page of the Answer Book). Each question carries one mark.
2) Don't forget to Mention question paper set (P/Q/R/S) on top of page.
3) Figures to the right indicate full marks.

MCQ/Objective Type Questions

Duration: 30 Minutes Marks:14

Q.1 Choose the correct answer. **14**

1) Predictive analytics mainly focuses on _____.
a) Describing past events
b) Explaining why something happened
c) Predicting future outcomes using historical data
d) Storing business data

2) In healthcare, predictive analytics is commonly used for _____.
a) Designing buildings
b) Disease risk prediction
c) Writing prescriptions manually
d) Managing payroll

3) In online marketing, predictive analytics helps to _____.
a) Reduce internet speed
b) Predict customer buying behavior
c) Manufacture products
d) Design office furniture

4) Target marketing focuses on _____.
a) Selling to everyone equally
b) Identifying specific customer segments
c) Ignoring customer data
d) Increasing product cost

5) Which of the following is a structured data type?
a) Text documents b) Images
c) Relational database tables d) Videos

6) Predictive analytics is closely related to _____.
   a) Literature
   b) Statistics and Machine Learning
   c) Architecture
   d) Geography

7) Which of the following is a challenge due to constantly changing data?
   a) Data remains static
   b) Data becomes outdated quickly
   c) Data size decreases

c) Delete Unwanted data
d) Compress Large datasets

3) The Target Store Case study is related to _____.
a) Disease Prediction b) Weather Prediction
c) Customer Behavior Analysis d) Network Security

4) In document Processing, a Term- document Matrix represents _____.
a) Images in documents
b) Numbers of Users
c) Document size only
d) Frequency of terms in documents

5) Association Rule Mining is Mainly Used to _____.
a) Find relationships between data items
b) Detect hardware faults
c) Improve Network Speed
d) Encrypt Messages

6) Which of the following is a technique for predicting a continuous target variable?
a) Classification b) Regression
c) Clustering d) Dimensionality Reduction

7) Which of the following is a technique for grouping similar data points together?
   a) Classification
   b) Regression
   c) Clustering
   d) Dimensionality Reduction

8) Predictive analytics mainly focuses on _____.
   a) Describing past events
   b) Explaining why something happened
   c) Predicting future outcomes using historical data
   d) Storing business data

9) In healthcare, predictive analytics is commonly used for _____.
   a) Designing buildings
   b) Disease risk prediction
   c) Writing prescriptions manually
   d) Managing payroll

10) In online marketing, predictive analytics helps to _____.
   a) Reduce internet speed
   b) Predict customer buying behavior
   c) Manufacture products
   d) Design office furniture

11) Target marketing focuses on _____.
   a) Selling to everyone equally
   b) Identifying specific customer segments
   c) Ignoring customer data
   d) Increasing product cost

12) Which of the following is a structured data type?
   a) Text documents
   b) Images
   c) Relational database tables
   d) Videos

13) Predictive analytics is closely related to _____.
   a) Literature
   b) Statistics and Machine Learning
   c) Architecture
   d) Geography

14) Which of the following is a challenge due to constantly changing data?
   a) Data remains static
   b) Data becomes outdated quickly
   c) Data size decreases
   d) Data cannot be stored

Seat No.	

Set **Q**

T.Y. (B.Tech.) (Electrical Engineering) (Semester - II) (New) (CBCS) Examination: March/April – 2026
Predictive Analytics (CSEMDM-04A)

Day & Date: Saturday, 30-05-2026 Max. Marks: 56
Time: 03:00 PM To 06:00 PM

Instructions: 1) All questions are compulsory.
2) Figures to the right indicate full marks.

SECTION – I

Q.2 Solve the following. (Any Four) **16**

a) What is Predictive Analytics? Explain Advantages and strategies of predictive Analytics.

b) Write a short note on: Surveying Marketplace

c) Explain Predictive modelling lifecycle.

d) Explain Online marketing and retail.

e) Compare Business Intelligence Vs. Big Data Analytics

Q.3 Answer the following. (Any Two) **12**

a) Explain Business value of predictive analytics Key applications in healthcare, finance.

b) Explain connecting to related disciplines in statistics, data mining and machine learning.

c) Explain complexities in searching your data. And discuss how data growth can affects the complexities in data system.

SECTION – II

Q.4 Solve the following. (Any Four) **16**

a) Explain Healthcare analytics case studies: Google flu trends, Cancer survivability predictors.

b) Explain Data Clustering in detail.

c) Explain KNN Algorithm with example.

d) Explain Twitter-based predictors of earthquakes.

e) Explain Markov model with example.

Q.5 Answer the following. (Any Two) **12**

a) Define Modelling of Data. Explain Models, Simulation and Categories with Examples.

b) Explain in brief Data Classification. How it can be introduced in Business?

c) Explain structuring the data: extracting, transforming and loading the data.

Seat No.	

Set **R**

T.Y. (B.Tech.) (Electrical Engineering) (Semester - II) (New) (CBCS) Examination: March/April – 2026
Predictive Analytics (CSEMDM-04A)

Day & Date: Saturday, 30-05-2026 Max. Marks: 70
Time: 03:00 PM To 06:00 PM

Instructions: 1) Q. No. 1 is compulsory. It should be solved in the first 30 minutes in Answer Book Page no 03 (Starting page of the Answer Book). Each question carries one mark.
2) Don't forget to Mention question paper set (P/Q/R/S) on top of page.
3) Figures to the right indicate full marks.

MCQ/Objective Type Questions

Duration: 30 Minutes Marks:14

Q.1 Choose the correct answer. **14**

1) In document Processing, a Term- document Matrix represents _____.
a) Images in documents
b) Numbers of Users
c) Document size only
d) Frequency of terms in documents

2) Association Rule Mining is Mainly Used to _____.
a) Find relationships between data items
b) Detect hardware faults
c) Improve Network Speed
d) Encrypt Messages

3) Which of the following is a technique for predicting a continuous target variable?
a) Classification
b) Regression
c) Clustering
d) Dimensionality Reduction

4) Which of the following is a technique for grouping similar data points together?
a) Classification
b) Regression
c) Clustering
d) Dimensionality Reduction

5) Predictive analytics mainly focuses on _____.
a) Describing past events
b) Explaining why something happened
c) Predicting future outcomes using historical data
d) Storing business data

6) In healthcare, predictive analytics is commonly used for _____.
   a) Designing buildings
   b) Disease risk prediction
   c) Writing prescriptions manually
   d) Managing payroll

7) In online marketing, predictive analytics helps to _____.
   a) Reduce internet speed
   b) Predict customer buying behavior
   c) Manufacture products
   d) Design office furniture

8) Target marketing focuses on _____.
   a) Selling to everyone equally
   b) Identifying specific customer segments
   c) Ignoring customer data
   d) Increasing product cost

9) Which of the following is a structured data type?
   a) Text documents b) Images
   c) Relational database tables d) Videos

10) Predictive analytics is closely related to _____.
   a) Literature
   b) Statistics and Machine Learning
   c) Architecture
   d) Geography

11) Which of the following is a challenge due to constantly changing data?
   a) Data remains static
   b) Data becomes outdated quickly
   c) Data size decreases
   d) Data cannot be stored

12) Exploration of raw data means _____.
   a) Deleting original data
   b) Encrypting the data
   c) Analyzing data before processing
   d) Storing data in files

13) In Data Modelling, a simulation is used to _____.
   a) Store Data Permanently
   b) Represent Real-world Processes over time
   c) Delete Unwanted data
   d) Compress Large datasets

14) The Target Store Case study is related to _____.
   a) Disease Prediction b) Weather Prediction
   c) Customer Behavior Analysis d) Network Security

d) Compress Large datasets

5) The Target Store Case study is related to _____.
a) Disease Prediction b) Weather Prediction
c) Customer Behavior Analysis d) Network Security

6) In document Processing, a Term- document Matrix represents _____.
   a) Images in documents
   b) Numbers of Users
   c) Document size only
   d) Frequency of terms in documents

7) Association Rule Mining is Mainly Used to _____.
   a) Find relationships between data items
   b) Detect hardware faults
   c) Improve Network Speed
   d) Encrypt Messages

8) Which of the following is a technique for predicting a continuous target variable?
   a) Classification
   b) Regression
   c) Clustering
   d) Dimensionality Reduction

9) Which of the following is a technique for grouping similar data points together?
   a) Classification
   b) Regression
   c) Clustering
   d) Dimensionality Reduction

10) Predictive analytics mainly focuses on _____.
   a) Describing past events
   b) Explaining why something happened
   c) Predicting future outcomes using historical data
   d) Storing business data

11) In healthcare, predictive analytics is commonly used for _____.
   a) Designing buildings
   b) Disease risk prediction
   c) Writing prescriptions manually
   d) Managing payroll

12) In online marketing, predictive analytics helps to _____.
   a) Reduce internet speed
   b) Predict customer buying behavior
   c) Manufacture products
   d) Design office furniture

13) Target marketing focuses on _____.
   a) Selling to everyone equally
   b) Identifying specific customer segments
   c) Ignoring customer data
   d) Increasing product cost

14) Which of the following is a structured data type?
   a) Text documents
   b) Images
   c) Relational database tables
   d) Videos

Seat No.		Set	S

T.Y. (B.Tech.) (Electronics & Telecommunication Engineering) (Semester - II) (New) (CBCS) Examination: March/April – 2026
Predictive Analytics (CSEMDM-04A)

Day & Date: Saturday, 30-05-2026 Max. Marks: 56
Time: 03:00 PM To 06:00 PM

Instructions: 1) All questions are compulsory.
2) Figures to the right indicate full marks.

SECTION – I

Q.2 Solve the following. (Any Four) **16**

a) What is Predictive Analytics? Explain Advantages and strategies of predictive Analytics.

b) Write a short note on: Surveying Marketplace

c) Explain Predictive modelling lifecycle.

d) Explain Online marketing and retail.

e) Compare Business Intelligence Vs. Big Data Analytics

Q.3 Answer the following. (Any Two) **12**

a) Explain Business value of predictive analytics Key applications in healthcare, finance.

b) Explain connecting to related disciplines in statistics, data mining and machine learning.

c) Explain complexities in searching your data. And discuss how data growth can affects the complexities in data system.

SECTION – II

Q.4 Solve the following. (Any Four) **16**

a) Explain Healthcare analytics case studies: Google flu trends, Cancer survivability predictors.

b) Explain Data Clustering in detail.

c) Explain KNN Algorithm with example.

d) Explain Twitter-based predictors of earthquakes.

e) Explain Markov model with example.

Q.5 Answer the following. (Any Two) **12**

a) Define Modelling of Data. Explain Models, Simulation and Categories with Examples.

b) Explain in brief Data Classification. How it can be introduced in Business?

c) Explain structuring the data: extracting, transforming and loading the data.

T.Y. (B.Tech.) (Mechanical Engineering) (Semester - II) (New) (CBCS) Examination: March/April – 2026
Predictive Analytics (CSEMDM-04A)

Day & Date: Saturday, 30-05-2026 Max. Marks: 70
Time: 03:00 PM To 06:00 PM

Instructions: 1) Q. No. 1 is compulsory. It should be solved in the first 30 minutes in Answer Book Page no 03 (Starting page of the Answer Book). Each question carries one mark.
2) Don't forget to Mention question paper set (P/Q/R/S) on top of page.
3) Figures to the right indicate full marks.

MCQ/Objective Type Questions

Duration: 30 Minutes Marks:14

Q.1 Choose the correct answer. **14**

1) Predictive analytics mainly focuses on _____.
a) Describing past events
b) Explaining why something happened
c) Predicting future outcomes using historical data
d) Storing business data

2) In healthcare, predictive analytics is commonly used for _____.
a) Designing buildings
b) Disease risk prediction
c) Writing prescriptions manually
d) Managing payroll

3) In online marketing, predictive analytics helps to _____.
a) Reduce internet speed
b) Predict customer buying behavior
c) Manufacture products
d) Design office furniture

4) Target marketing focuses on _____.
a) Selling to everyone equally
b) Identifying specific customer segments
c) Ignoring customer data
d) Increasing product cost

5) Which of the following is a structured data type?
a) Text documents b) Images
c) Relational database tables d) Videos

6) Predictive analytics is closely related to _____.
   a) Literature
   b) Statistics and Machine Learning
   c) Architecture
   d) Geography

7) Which of the following is a challenge due to constantly changing data?
   a) Data remains static
   b) Data becomes outdated quickly
   c) Data size decreases
   d) Data cannot be stored

8) Exploration of raw data means _____.
   a) Deleting original data
   b) Encrypting the data
   c) Analyzing data before processing
   d) Storing data in files

9) In Data Modelling, a simulation is used to _____.
   a) Store Data Permanently
   b) Represent Real-world Processes over time
   c) Delete Unwanted data
   d) Compress Large datasets

10) The Target Store Case study is related to _____.
   a) Disease Prediction
   b) Weather Prediction
   c) Customer Behavior Analysis
   d) Network Security

11) In document Processing, a Term- document Matrix represents _____.
   a) Images in documents
   b) Numbers of Users
   c) Document size only
   d) Frequency of terms in documents

12) Association Rule Mining is Mainly Used to _____.
   a) Find relationships between data items
   b) Detect hardware faults
   c) Improve Network Speed
   d) Encrypt Messages

13) Which of the following is a technique for predicting a continuous target variable?
   a) Classification
   b) Regression
   c) Clustering

Management Information System (CSEMDM-04B)

Day & Date: Saturday, 30-05-2026 Max. Marks: 70
Time: 03:00 PM To 06:00 PM

Instructions: 1) Q. No. 1 is compulsory. It should be solved in the first 30 minutes in Answer Book Page no 03 (Starting page of the Answer Book). Each question carries one mark.
2) Don't forget to Mention question paper set (P/Q/R/S) on top of page.
3) Figures to the right indicate full marks.

MCQ/Objective Type Questions

Duration: 30 Minutes Marks:14

Q.1 Choose the correct alternatives from the options. **14**

1) What is the main goal of social business tools?
a) Replace meetings b) Enhance collaboration
c) Automate payroll d) Reduce staff

2) How do information systems transform business processes?
a) By increasing paperwork b) By automating workflows
c) By stopping data growth d) By removing all software

3) What is a major challenge when implementing strategic information systems?
a) Lowering costs b) System integration
c) Faster decisions d) Increasing revenue

4) EBay is an example of _____.
a) click-and-mortar business b) C2C electronic commerce
c) B2C electronic commerce d) an online exchange

5) An enterprise is a group of people with _____.
a) common goal
b) separate goal for each department
c) multiple goals
d) two or more goal

6) A Decision Support System (DSS) is an application for information systems that helps in _____.
a) System Design b) System Analysis
c) Decision making d) All of the mentioned above

7) If a university sets up a web-based information system that faculty could access to record student grades and to advise students, that would be an example of a/an _____.

a) CRM
b) Intranet
c) ERP
d) Extranet

8) DBMS have a data definition language to do all of the following except _____.

a) Define the characteristics of the fields in each table
b) Add, change, delete, and retrieve data in the database
c) Specify the structure of the content of the database
d) Specify the creation of the database tables

9) Permission given with the knowledge of all the facts needed to make a rational decision is called _____.

a) Informed consent
b) Liability
c) Responsibility
d) Due process

10) The principles and standards that guide our behaviour toward other people are collectively called _____.

a) Intellectual property
b) Copyright
c) Ethics
d) Fair Use Doctrine

11) What is a core capability of a Database Management System (DBMS)?

a) Selling hardware
b) Managing data access
c) Translating languages
d) Replacing managers

12) How do databases support business decisions?

a) By hiding data
b) By providing analytical insights
c) By deleting old records
d) By restricting user access

13) Which of the following is a key security management tool?

a) Firewalls
b) Paper logs
c) Public passwords
d) Open cables

14) What is the goal of defending against a Denial of Service (DoS) attack?

a) Increasing traffic
b) Maintaining availability
c) Encrypting databases
d) Monitoring emails

SECTION – I

Q.2 Attempt the following. (Any Four) **16**

a) Explain how information systems are transforming contemporary business operations and changing the overall competitive landscape.

b) What is Management Information System? What is the role of Information System in business?

c) Discuss the economic and behavioural theories that explain how information systems change organizational structures and flatten traditional hierarchies.

d) Explain the structure of an organization.

e) What are the Ethical, Social, political issues raised by information systems?

Q.3 Attempt the following. (Any Two) **12**

a) Discuss how advanced data profiling and analytics pose severe challenges to the protection of individual privacy and intellectual property rights today.

b) Explain the challenges to protection of individual's privacy and intellectual property.

c) What are different features of an organization? And explain each feature in detail.

SECTION – II

Q.4 Attempt the following. (Any Four) **16**

a) Define IT infrastructure and describe the major hardware and software components required to build an enterprise-level computing environment.

b) Discuss the primary management issues and governance challenges involved in scaling and handling technological obsolescence in infrastructure investments.

c) What are the issues related to building e-commerce?

d) Explain Management Issues related to Information system.

e) How to improve business performance & decision making?

Q.5 Attempt the following. (Any Two) **12**

a) Detail the role of security monitors and formal security codes of conduct in establishing comprehensive monitoring and regulatory safety inside an organization.

b) Explain the Role of M-commerce in business & its applications.

c) Discuss the function of firewalls and encryption mechanisms as essential network tools for defending digital enterprise assets.

5) How do databases support business decisions?
a) By hiding data
b) By providing analytical insights
c) By deleting old records
d) By restricting user access

6) Which of the following is a key security management tool?
a) Firewalls b) Paper logs
c) Public passwords d) Open cables

7) What is the goal of defending against a Denial of Service (DoS) attack?
a) Increasing traffic
b) Maintaining availability
c) Encrypting databases
d) Monitoring emails

8) What is the main goal of social business tools?
a) Replace meetings
b) Enhance collaboration
c) Automate payroll
d) Reduce staff

9) How do information systems transform business processes?
a) By increasing paperwork
b) By automating workflows
c) By stopping data growth
d) By removing all software

10) What is a major challenge when implementing strategic information systems?
a) Lowering costs
b) System integration
c) Faster decisions
d) Increasing revenue

11) EBay is an example of _____.
a) click-and-mortar business
b) C2C electronic commerce
c) B2C electronic commerce
d) an online exchange

12) An enterprise is a group of people with _____.
a) common goal
b) separate goal for each department
c) multiple goals
d) two or more goal

13) A Decision Support System (DSS) is an application for information systems that helps in _____.
a) System Design
b) System Analysis
c) Decision making
d) All of the mentioned above

14) If a university sets up a web-based information system that faculty could access to record student grades and to advise students, that would be an example of a/an _____.
a) CRM
b) Intranet
c) ERP
d) Extranet

T.Y. (B.Tech.) (Civil Engineering) (Semester - II) (New) (CBCS)
Examination: March/April – 2026
Management Information System (CSEMDM-04B)

Day & Date: Saturday, 30-05-2026 Max. Marks: 56
Time: 03:00 PM To 06:00 PM

Instructions: 1) All questions are compulsory.
2) Figures to the right indicate full marks.

SECTION – I

Q.2 Attempt the following. (Any Four) **16**

a) Explain how information systems are transforming contemporary business operations and changing the overall competitive landscape.

b) What is Management Information System? What is the role of Information System in business?

c) Discuss the economic and behavioural theories that explain how information systems change organizational structures and flatten traditional hierarchies.

d) Explain the structure of an organization.

e) What are the Ethical, Social, political issues raised by information systems?

Q.3 Attempt the following. (Any Two) **12**

a) Discuss how advanced data profiling and analytics pose severe challenges to the protection of individual privacy and intellectual property rights today.

b) Explain the challenges to protection of individual's privacy and intellectual property.

c) What are different features of an organization? And explain each feature in detail.

SECTION – II

Q.4 Attempt the following. (Any Four) **16**

a) Define IT infrastructure and describe the major hardware and software components required to build an enterprise-level computing environment.

b) Discuss the primary management issues and governance challenges involved in scaling and handling technological obsolescence in infrastructure investments.

c) What are the issues related to building e-commerce?

d) Explain Management Issues related to Information system.

e) How to improve business performance & decision making?

Q.5 Attempt the following. (Any Two) **12**

a) Detail the role of security monitors and formal security codes of conduct in establishing comprehensive monitoring and regulatory safety inside an organization.

b) Explain the Role of M-commerce in business & its applications.

c) Discuss the function of firewalls and encryption mechanisms as essential network tools for defending digital enterprise assets.

Day & Date: Saturday, 30-05-2026 Max. Marks: 70
Time: 03:00 PM To 06:00 PM

Instructions: 1) Q. No. 1 is compulsory. It should be solved in the first 30 minutes in Answer Book Page no 03 (Starting page of the Answer Book). Each question carries one mark.
2) Don't forget to Mention question paper set (P/Q/R/S) on top of page.
3) Figures to the right indicate full marks.

MCQ/Objective Type Questions

Duration: 30 Minutes Marks:14

Q.1 Choose the correct alternatives from the options. 14

1) A Decision Support System (DSS) is an application for information systems that helps in _____.
a) System Design b) System Analysis
c) Decision making d) All of the mentioned above

2) If a university sets up a web-based information system that faculty could access to record student grades and to advise students, that would be an example of a/an _____.
a) CRM b) Intranet
c) ERP d) Extranet

3) DBMS have a data definition language to do all of the following except _____.
a) Define the characteristics of the fields in each table
b) Add, change, delete, and retrieve data in the database
c) Specify the structure of the content of the database
d) Specify the creation of the database tables

4) Permission given with the knowledge of all the facts needed to make a rational decision is called _____.
a) Informed consent b) Liability
c) Responsibility d) Due process

5) The principles and standards that guide our behaviour toward other people are collectively called _____.
a) Intellectual property b) Copyright
c) Ethics d) Fair Use Doctrine

6) What is a core capability of a Database Management System (DBMS)?
a) Selling hardware b) Managing data access
c) Translating languages d) Replacing managers

7) How do databases support business decisions?
a) By hiding data
b) By providing analytical insights
c) By deleting old records
d) By restricting user access

8) Which of the following is a key security management tool?
a) Firewalls
b) Paper logs
c) Public passwords
d) Open cables

9) What is the goal of defending against a Denial of Service (DoS) attack?
a) Increasing traffic
b) Maintaining availability
c) Encrypting databases
d) Monitoring emails

10) What is the main goal of social business tools?
a) Replace meetings
b) Enhance collaboration
c) Automate payroll
d) Reduce staff

11) How do information systems transform business processes?
a) By increasing paperwork
b) By automating workflows
c) By stopping data growth
d) By removing all software

12) What is a major challenge when implementing strategic information systems?
a) Lowering costs
b) System integration
c) Faster decisions
d) Increasing revenue

13) EBay is an example of _____.
a) click-and-mortar business
b) C2C electronic commerce
c) B2C electronic commerce
d) an online exchange

14) An enterprise is a group of people with _____.
a) common goal
b) separate goal for each department
c) multiple goals
d) two or more goal

Set **S**

T.Y. (B.Tech.) (Computer Science & Engineering) (Semester - II) (New) (CBCS) Examination: March/April – 2026
Management Information System (CSEMDM-04B)

Day & Date: Saturday, 30-05-2026 Max. Marks: 56
Time: 03:00 PM To 06:00 PM

Instructions: 1) All questions are compulsory.
2) Figures to the right indicate full marks.

SECTION – I

Q.2 Attempt the following. (Any Four) **16**

a) Explain how information systems are transforming contemporary business operations and changing the overall competitive landscape.

b) What is Management Information System? What is the role of Information System in business?

c) Discuss the economic and behavioural theories that explain how information systems change organizational structures and flatten traditional hierarchies.

d) Explain the structure of an organization.

e) What are the Ethical, Social, political issues raised by information systems?

Q.3 Attempt the following. (Any Two) **12**

a) Discuss how advanced data profiling and analytics pose severe challenges to the protection of individual privacy and intellectual property rights today.

b) Explain the challenges to protection of individual's privacy and intellectual property.

c) What are different features of an organization? And explain each feature in detail.

SECTION – II

Q.4 Attempt the following. (Any Four) **16**

a) Define IT infrastructure and describe the major hardware and software components required to build an enterprise-level computing environment.

b) Discuss the primary management issues and governance challenges involved in scaling and handling technological obsolescence in infrastructure investments.

c) What are the issues related to building e-commerce?

d) Explain Management Issues related to Information system.

e) How to improve business performance & decision making?

Q.5 Attempt the following. (Any Two) **12**

a) Detail the role of security monitors and formal security codes of conduct in establishing comprehensive monitoring and regulatory safety inside an organization.

b) Explain the Role of M-commerce in business & its applications.

c) Discuss the function of firewalls and encryption mechanisms as essential network tools for defending digital enterprise assets.

T.Y. (B.Tech.) (Electronics & Telecommunication Engineering) (Semester - II) (New) (CBCS) Examination: March/April – 2026
Management Information System (CSEMDM-04B)

Day & Date: Saturday, 30-05-2026 Max. Marks: 70
Time: 03:00 PM To 06:00 PM

Instructions: 1) Q. No. 1 is compulsory. It should be solved in the first 30 minutes in Answer Book Page no 03 (Starting page of the Answer Book). Each question carries one mark.
2) Don't forget to Mention question paper set (P/Q/R/S) on top of page.
3) Figures to the right indicate full marks.

MCQ/Objective Type Questions

Duration: 30 Minutes Marks:14

Q.1 Choose the correct alternatives from the options. **14**

1) DBMS have a data definition language to do all of the following except _____.
a) Define the characteristics of the fields in each table
b) Add, change, delete, and retrieve data in the database
c) Specify the structure of the content of the database
d) Specify the creation of the database tables

2) Permission given with the knowledge of all the facts needed to make a rational decision is called _____.
a) Informed consent b) Liability
c) Responsibility d) Due process

3) The principles and standards that guide our behaviour toward other people are collectively called _____.
a) Intellectual property b) Copyright
c) Ethics d) Fair Use Doctrine

4) What is a core capability of a Database Management System (DBMS)?
a) Selling hardware b) Managing data access
c) Translating languages d) Replacing managers

5) How do databases support business decisions?
a) By hiding data
b) By providing analytical insights
c) By deleting old records
d) By restricting user access

6) Which of the following is a key security management tool?
a) Firewalls b) Paper logs
c) Public passwords d) Open cables

7) What is the goal of defending against a Denial of Service (DoS) attack?
a) Increasing traffic
b) Maintaining availability
c) Encrypting databases
d) Monitoring emails

8) What is the main goal of social business tools?
a) Replace meetings
b) Enhance collaboration
c) Automate payroll
d) Reduce staff

9) How do information systems transform business processes?
a) By increasing paperwork
b) By automating workflows
c) By stopping data growth
d) By removing all software

10) What is a major challenge when implementing strategic information systems?
a) Lowering costs
b) System integration
c) Faster decisions
d) Increasing revenue

11) EBay is an example of _____.
a) click-and-mortar business
b) C2C electronic commerce
c) B2C electronic commerce
d) an online exchange

12) An enterprise is a group of people with _____.
a) common goal
b) separate goal for each department
c) multiple goals
d) two or more goal

13) A Decision Support System (DSS) is an application for information systems that helps in _____.
a) System Design
b) System Analysis
c) Decision making
d) All of the mentioned above

14) If a university sets up a web-based information system that faculty could access to record student grades and to advise students, that would be an example of a/an _____.
a) CRM
b) Intranet
c) ERP
d) Extranet

T.Y. (B.Tech.) (Mechanical Engineering) (Semester - II) (New) (CBCS) Examination: March/April – 2026
Management Information System (CSEMDM-04B)

Day & Date: Saturday, 30-05-2026 Max. Marks: 56
Time: 03:00 PM To 06:00 PM

Instructions: 1) All questions are compulsory.
2) Figures to the right indicate full marks.

SECTION – I

Q.2 Attempt the following. (Any Four) **16**

a) Explain how information systems are transforming contemporary business operations and changing the overall competitive landscape.

b) What is Management Information System? What is the role of Information System in business?

c) Discuss the economic and behavioural theories that explain how information systems change organizational structures and flatten traditional hierarchies.

d) Explain the structure of an organization.

e) What are the Ethical, Social, political issues raised by information systems?

Q.3 Attempt the following. (Any Two) **12**

a) Discuss how advanced data profiling and analytics pose severe challenges to the protection of individual privacy and intellectual property rights today.

b) Explain the challenges to protection of individual's privacy and intellectual property.

c) What are different features of an organization? And explain each feature in detail.

SECTION – II

Q.4 Attempt the following. (Any Four) **16**

a) Define IT infrastructure and describe the major hardware and software components required to build an enterprise-level computing environment.

b) Discuss the primary management issues and governance challenges involved in scaling and handling technological obsolescence in infrastructure investments.

c) What are the issues related to building e-commerce?

d) Explain Management Issues related to Information system.

e) How to improve business performance & decision making?

Q.5 Attempt the following. (Any Two) **12**

a) Detail the role of security monitors and formal security codes of conduct in establishing comprehensive monitoring and regulatory safety inside an organization.

b) Explain the Role of M-commerce in business & its applications.

c) Discuss the function of firewalls and encryption mechanisms as essential network tools for defending digital enterprise assets.

T.Y. (B.Tech.) (Mechanical Engineering) (Semester - II) (New) (CBCS) Examination: March/April – 2026
Management Information System (CSEMDM-04B)

Day & Date: Saturday, 30-05-2026 Max. Marks: 70
Time: 03:00 PM To 06:00 PM

Instructions: 1) Q. No. 1 is compulsory. It should be solved in the first 30 minutes in Answer Book Page no 03 (Starting page of the Answer Book). Each question carries one mark.
2) Don't forget to Mention question paper set (P/Q/R/S) on top of page.
3) Figures to the right indicate full marks.

MCQ/Objective Type Questions

Duration: 30 Minutes Marks:14

Q.1 Choose the correct alternatives from the options. 14

1) A Decision Support System (DSS) is an application for information systems that helps in _____.
a) System Design b) System Analysis
c) Decision making d) All of the mentioned above

2) If a university sets up a web-based information system that faculty could access to record student grades and to advise students, that would be an example of a/an _____.
a) CRM b) Intranet
c) ERP d) Extranet

3) DBMS have a data definition language to do all of the following except _____.
a) Define the characteristics of the fields in each table
b) Add, change, delete, and retrieve data in the database
c) Specify the structure of the content of the database
d) Specify the creation of the database tables

4) Permission given with the knowledge of all the facts needed to make a rational decision is called _____.
a) Informed consent b) Liability
c) Responsibility d) Due process

5) The principles and standards that guide our behaviour toward other people are collectively called _____.
a) Intellectual property b) Copyright
c) Ethics d) Fair Use Doctrine

6) What is a core capability of a Database Management System (DBMS)?
a) Selling hardware b) Managing data access
c) Translating languages d) Replacing managers

7) How do databases support business decisions?
a) By hiding data
b) By providing analytical insights
c) By deleting old records
d) By restricting user access

8) Which of the following is a key security management tool?
a) Firewalls
b) Paper logs
c) Public passwords
d) Open cables

9) What is the goal of defending against a Denial of Service (DoS) attack?
a) Increasing traffic
b) Maintaining availability
c) Encrypting databases
d) Monitoring emails

10) What is the main goal of social business tools?
a) Replace meetings
b) Enhance collaboration
c) Automate payroll
d) Reduce staff

11) How do information systems transform business processes?
a) By increasing paperwork
b) By automating workflows
c) By stopping data growth
d) By removing all software

12) What is a major challenge when implementing strategic information systems?
a) Lowering costs
b) System integration
c) Faster decisions
d) Increasing revenue

13) EBay is an example of _____.
a) click-and-mortar business
b) C2C electronic commerce
c) B2C electronic commerce
d) an online exchange

14) An enterprise is a group of people with _____.
a) common goal
b) separate goal for each department
c) multiple goals
d) two or more goal

MCQ/Objective Type Questions

Duration: 30 Minutes Marks:14

Q.1 Choose the correct answer. **14**

1) A key environmental benefit of electric vehicles is _____.
a) Increased fuel consumption b) Zero tailpipe emissions
c) Higher noise levels d) Use of fossil fuels

2) One major challenge limiting widespread EV adoption is _____.
a) Excessive vehicle noise b) Long refueling times
c) Limited driving range d) High exhaust emissions

3) Which battery type is most commonly used in modern electric vehicles?
a) Lead-acid b) Nickel-cadmium
c) Lithium-ion d) Zinc-air

4) Many governments support EV adoption by offering _____.
a) Higher vehicle taxes b) Fuel subsidies
c) Tax incentives and rebates d) Import restrictions

5) In a battery, the anode is where _____.
a) Reduction occurs
b) Oxidation occurs
c) Electrons are absorbed
d) Energy is generated mechanically

6) The electrolyte in a battery _____.
a) Stores electrical energy permanently
b) Conducts ions between electrodes
c) Produces fuel for combustion
d) Absorbs heat from the environment

7) A major limitation of lead-acid batteries is _____.
   a) High toxicity and heavy weight
   b) Fast charging capability
   c) Long cycle life
   d) High energy density

8) Among lead-acid, NiMH, and Li-ion batteries, the one with the highest energy density is _____.
   a) Lead-acid
   b) NiMH
   c) Li-ion
   d) All are the same

9) Connecting battery cells in series results in _____.
   a) Increased voltage, same capacity
   b) Increased capacity, same voltage
   c) Increased both voltage and capacity
   d) Decreased voltage and capacity

10) A hybrid battery configuration combines _____.
   a) Series and parallel connections
   b) Only series connections
   c) Only parallel connections
   d) Lithium and lead-acid cells in one pack

11) Which of the following is a key component of a BMS?
   a) Cooling fan
   b) Voltage, current, and temperature sensors
   c) Fuel pump
   d) Gearbox

12) The main function of a TMS in an EV battery pack is to _____.
   a) Reduce battery voltage
   b) Maintain optimal operating temperature
   c) Increase battery size
   d) Generate electricity

13) Which of the following is a risk of mechanical damage to EV batteries?
   a) Improved energy efficiency
   b) Increased capacity
   c) Loss of structural integrity and short circuits
   d) Lower weight

14) Durability testing of EV batteries typically includes _____.
   a) Cycle life testing, thermal cycling, and vibration tests
   b) Only visual inspection
   c) Ignoring environmental conditions
   d) Only cost analysis

   d) All are the same

9) Connecting battery cells in series results in _____.
   a) Increased voltage, same capacity
   b) Increased capacity, same voltage
   c) Increased both voltage and capacity
   d) Decreased voltage and capacity

10) A hybrid battery configuration combines _____.
   a) Series and parallel connections
   b) Only series connections
   c) Only parallel connections
   d) Lithium and lead-acid cells in one pack

11) Which of the following is a key component of a BMS?
   a) Cooling fan
   b) Voltage, current, and temperature sensors
   c) Fuel pump
   d) Gearbox

12) The main function of a TMS in an EV battery pack is to _____.
   a) Reduce battery voltage
   b) Maintain optimal operating temperature
   c) Increase battery size
   d) Generate electricity

13) Which of the following is a risk of mechanical damage to EV batteries?
   a) Improved energy efficiency
   b) Increased capacity
   c) Loss of structural integrity and short circuits
   d) Lower weight

14) Durability testing of EV batteries typically includes _____.
   a) Cycle life testing, thermal cycling, and vibration tests
   b) Only visual inspection
   c) Ignoring environmental conditions
   d) Only cost analysis

Set **P**

T.Y. (B.Tech.) (Computer Science & Engineering) (Semester - II) (New) (CBCS) Examination: March/April – 2026
Electric Vehicle Battery Systems (EEMDM-04B)

Day & Date: Saturday, 30-05-2026 Max. Marks: 56
Time: 03:00 PM To 06:00 PM

Instructions: 1) All questions are compulsory.
2) Figures to the right indicate full marks.

Section – I

Q.2 Attempt the following. (Any Four) **16**

a) Explain the different types of batteries used in electric vehicles.

b) Discuss the basic Principle of Battery Chemistry & explain the Key Materials used in Batteries.

c) Describe the characteristics, advantages, and limitations of lead-acid batteries.

d) Identify and explain the major challenges faced by electric vehicles in mass adoption.

e) Explain how Key Performance Parameters Affected by electrochemistry.

Q.3 Attempt the following. (Any Two) **12**

a) Describe the industry outlook, government policies, and technological advancements for electric vehicles.

b) Compare lead-acid, NiMH, and Li-ion batteries based on different battery chemistries?

c) Describe the characteristics, advantages, and limitations of Nickel-metal hydride (NiMH) batteries.

Section – II

Q.4 Attempt the following. (Any Four) **16**

a) Explain Battery system architecture by series battery configuration.

b) Discuss hazards & risks in EV battery systems.

c) Describe the reliability and durability of EV battery systems.

d) Explain the role of wiring and connectors in battery systems.

e) Describe the principles, materials, and applications of Sodium-ion batteries.

Q.5 Attempt the following. (Any Two) **12**

a) Describe the Battery management system in details.

b) Explain Testing and validation of EV battery systems.

c) Discuss modelling & performance testing of EV battery packs.

Seat No.	

Set **Q**

T.Y. (B.Tech.) (Computer Science & Engineering) (Semester - II) (New) (CBCS) Examination: March/April – 2026
Electric Vehicle Battery Systems (EEMDM-04B)

Day & Date: Saturday, 30-05-2026 Max. Marks: 70
Time: 03:00 PM To 06:00 PM

Instructions: 1) Q. No. 1 is compulsory. It should be solved in the first 30 minutes in Answer Book Page no 03 (Starting page of the Answer Book). Each question carries one mark.
2) Don't forget to Mention question paper set (P/Q/R/S) on top of page.
3) Figures to the right indicate full marks.
4) Assume suitable data if required.

MCQ/Objective Type Questions

Duration: 30 Minutes Marks:14

Q.1 Choose the correct answer. **14**

1) Among lead-acid, NiMH, and Li-ion batteries, the one with the highest energy density is _____.
a) Lead-acid b) NiMH
c) Li-ion d) All are the same

2) Connecting battery cells in series results in _____.
a) Increased voltage, same capacity
b) Increased capacity, same voltage
c) Increased both voltage and capacity
d) Decreased voltage and capacity

3) A hybrid battery configuration combines _____.
a) Series and parallel connections
b) Only series connections
c) Only parallel connections
d) Lithium and lead-acid cells in one pack

4) Which of the following is a key component of a BMS?
a) Cooling fan
b) Voltage, current, and temperature sensors
c) Fuel pump
d) Gearbox

5) The main function of a TMS in an EV battery pack is to _____.
a) Reduce battery voltage
b) Maintain optimal operating temperature
c) Increase battery size
d) Generate electricity

6) Which of the following is a risk of mechanical damage to EV batteries?
a) Improved energy efficiency
b) Increased capacity
c) Loss of structural integrity and short circuits
d) Lower weight

7) Durability testing of EV batteries typically includes _____.
a) Cycle life testing, thermal cycling, and vibration tests
b) Only visual inspection
c) Ignoring environmental conditions
d) Only cost analysis

8) A key environmental benefit of electric vehicles is _____.
a) Increased fuel consumption
b) Zero tailpipe emissions
c) Higher noise levels
d) Use of fossil fuels

9) One major challenge limiting widespread EV adoption is _____.
a) Excessive vehicle noise
b) Long refueling times
c) Limited driving range
d) High exhaust emissions

10) Which battery type is most commonly used in modern electric vehicles?
a) Lead-acid
b) Nickel-cadmium
c) Lithium-ion
d) Zinc-air

11) Many governments support EV adoption by offering _____.
a) Higher vehicle taxes
b) Fuel subsidies
c) Tax incentives and rebates
d) Import restrictions

12) In a battery, the anode is where _____.
a) Reduction occurs
b) Oxidation occurs
c) Electrons are absorbed
d) Energy is generated mechanically

13) The electrolyte in a battery _____.
a) Stores electrical energy permanently
b) Conducts ions between electrodes
c) Produces fuel for combustion
d) Absorbs heat from the environment

14) A major limitation of lead-acid batteries is _____.
a) High toxicity and heavy weight
b) Fast charging capability
c) Long cycle life
d) High energy density

c) Loss of structural integrity and short circuits
d) Lower weight

4) Durability testing of EV batteries typically includes _____.
a) Cycle life testing, thermal cycling, and vibration tests
b) Only visual inspection
c) Ignoring environmental conditions
d) Only cost analysis

5) A key environmental benefit of electric vehicles is _____.
a) Increased fuel consumption b) Zero tailpipe emissions
c) Higher noise levels d) Use of fossil fuels

6) One major challenge limiting widespread EV adoption is _____.
a) Excessive vehicle noise
b) Long refueling times
c) Limited driving range
d) High exhaust emissions

7) Which battery type is most commonly used in modern electric vehicles?
a) Lead-acid
b) Nickel-cadmium
c) Lithium-ion
d) Zinc-air

8) Many governments support EV adoption by offering _____.
a) Higher vehicle taxes
b) Fuel subsidies
c) Tax incentives and rebates
d) Import restrictions

9) In a battery, the anode is where _____.
a) Reduction occurs
b) Oxidation occurs
c) Electrons are absorbed
d) Energy is generated mechanically

10) The electrolyte in a battery _____.
a) Stores electrical energy permanently
b) Conducts ions between electrodes
c) Produces fuel for combustion
d) Absorbs heat from the environment

11) A major limitation of lead-acid batteries is _____.
a) High toxicity and heavy weight
b) Fast charging capability
c) Long cycle life
d) High energy density

12) Among lead-acid, NiMH, and Li-ion batteries, the one with the highest energy density is _____.
a) Lead-acid
b) NiMH
c) Li-ion
d) All are the same

13) Connecting battery cells in series results in _____.
a) Increased voltage, same capacity
b) Increased capacity, same voltage
c) Increased both voltage and capacity
d) Decreased voltage and capacity

14) A hybrid battery configuration combines _____.
a) Series and parallel connections
b) Only series connections
c) Only parallel connections
d) Lithium and lead-acid cells in one pack

Set **R**

T.Y. (B.Tech.) (Electrical Engineering) (Semester - II) (New) (CBCS) Examination: March/April – 2026
Electric Vehicle Battery Systems (EEMDM-04B)

Day & Date: Saturday, 30-05-2026 Max. Marks: 56
Time: 03:00 PM To 06:00 PM

Instructions: 1) All questions are compulsory.
2) Figures to the right indicate full marks.

Section – I

Q.2 Attempt the following. (Any Four) **16**

a) Explain the different types of batteries used in electric vehicles.

b) Discuss the basic Principle of Battery Chemistry & explain the Key Materials used in Batteries.

c) Describe the characteristics, advantages, and limitations of lead-acid batteries.

d) Identify and explain the major challenges faced by electric vehicles in mass adoption.

e) Explain how Key Performance Parameters Affected by electrochemistry.

Q.3 Attempt the following. (Any Two) **12**

a) Describe the industry outlook, government policies, and technological advancements for electric vehicles.

b) Compare lead-acid, NiMH, and Li-ion batteries based on different battery chemistries?

c) Describe the characteristics, advantages, and limitations of Nickel-metal hydride (NiMH) batteries.

Section – II

Q.4 Attempt the following. (Any Four) **16**

a) Explain Battery system architecture by series battery configuration.

b) Discuss hazards & risks in EV battery systems.

c) Describe the reliability and durability of EV battery systems.

d) Explain the role of wiring and connectors in battery systems.

e) Describe the principles, materials, and applications of Sodium-ion batteries.

Q.5 Attempt the following. (Any Two) **12**

a) Describe the Battery management system in details.

b) Explain Testing and validation of EV battery systems.

c) Discuss modelling & performance testing of EV battery packs.

Seat No.

Electric Vehicle Battery Systems (EEMDM-04B)

Day & Date: Saturday, 30-05-2026 Max. Marks: 70
Time: 03:00 PM To 06:00 PM

Instructions: 1) Q. No. 1 is compulsory. It should be solved in the first 30 minutes in Answer Book Page no 03 (Starting page of the Answer Book). Each question carries one mark.
2) Don't forget to Mention question paper set (P/Q/R/S) on top of page.
3) Figures to the right indicate full marks.
4) Assume suitable data if required.

MCQ/Objective Type Questions

Duration: 30 Minutes Marks:14

Q.1 Choose the correct answer. **14**

1) The electrolyte in a battery _____.
a) Stores electrical energy permanently
b) Conducts ions between electrodes
c) Produces fuel for combustion
d) Absorbs heat from the environment

2) A major limitation of lead-acid batteries is _____.
a) High toxicity and heavy weight
b) Fast charging capability
c) Long cycle life
d) High energy density

3) Among lead-acid, NiMH, and Li-ion batteries, the one with the highest energy density is _____.
a) Lead-acid b) NiMH
c) Li-ion d) All are the same

4) Connecting battery cells in series results in _____.
a) Increased voltage, same capacity
b) Increased capacity, same voltage
c) Increased both voltage and capacity
d) Decreased voltage and capacity

5) A hybrid battery configuration combines _____.
a) Series and parallel connections
b) Only series connections
c) Only parallel connections
d) Lithium and lead-acid cells in one pack

6) Which of the following is a key component of a BMS?
a) Cooling fan
b) Voltage, current, and temperature sensors
c) Fuel pump
d) Gearbox

7) The main function of a TMS in an EV battery pack is to _____.
a) Reduce battery voltage
b) Maintain optimal operating temperature
c) Increase battery size
d) Generate electricity

8) Which of the following is a risk of mechanical damage to EV batteries?
a) Improved energy efficiency
b) Increased capacity
c) Loss of structural integrity and short circuits
d) Lower weight

9) Durability testing of EV batteries typically includes _____.
a) Cycle life testing, thermal cycling, and vibration tests
b) Only visual inspection
c) Ignoring environmental conditions
d) Only cost analysis

10) A key environmental benefit of electric vehicles is _____.
a) Increased fuel consumption
b) Zero tailpipe emissions
c) Higher noise levels
d) Use of fossil fuels

11) One major challenge limiting widespread EV adoption is _____.
a) Excessive vehicle noise

Instructions: 1) Q. No. 1 is compulsory. It should be solved in the first 30 minutes in Answer Book Page no 03 (Starting page of the Answer Book). Each question carries one mark.
2) Don't forget to Mention question paper set (P/Q/R/S) on top of page.
3) Figures to the right indicate full marks.
4) Assume suitable data if required.

MCQ/Objective Type Questions

Duration: 30 Minutes Marks:14

Q.1 Choose the correct answer. **14**

1) A key environmental benefit of electric vehicles is _____.
a) Increased fuel consumption b) Zero tailpipe emissions
c) Higher noise levels d) Use of fossil fuels

2) One major challenge limiting widespread EV adoption is _____.
a) Excessive vehicle noise b) Long refueling times
c) Limited driving range d) High exhaust emissions

3) Which battery type is most commonly used in modern electric vehicles?
a) Lead-acid b) Nickel-cadmium
c) Lithium-ion d) Zinc-air

4) Many governments support EV adoption by offering _____.
a) Higher vehicle taxes b) Fuel subsidies
c) Tax incentives and rebates d) Import restrictions

5) In a battery, the anode is where _____.
a) Reduction occurs
b) Oxidation occurs
c) Electrons are absorbed
d) Energy is generated mechanically

6) The electrolyte in a battery _____.
a) Stores electrical energy permanently
b) Conducts ions between electrodes
c) Produces fuel for combustion
d) Absorbs heat from the environment

7) A major limitation of lead-acid batteries is _____.
   a) High toxicity and heavy weight
   b) Fast charging capability
   c) Long cycle life
   d) High energy density

8) Among lead-acid, NiMH, and Li-ion batteries, the one with the highest energy density is _____.
   a) Lead-acid
   b) NiMH
   c) Li-ion
   d) All are the same

9) Connecting battery cells in series results in _____.
   a) Increased voltage, same capacity
   b) Increased capacity, same voltage
   c) Increased both voltage and capacity
   d) Decreased voltage and capacity

10) A hybrid battery configuration combines _____.
   a) Series and parallel connections
   b) Only series connections
   c) Only parallel connections
   d) Lithium and lead-acid cells in one pack

11) Which of the following is a key component of a BMS?
   a) Cooling fan
   b) Voltage, current, and temperature sensors
   c) Fuel pump
   d) Gearbox

12) The main function of a TMS in an EV battery pack is to _____.
   a) Reduce battery voltage
   b) Maintain optimal operating temperature
   c) Increase battery size
   d) Generate electricity

13) Which of the following is a risk of mechanical damage to EV batteries?
   a) Improved energy efficiency
   b) Increased capacity
   c) Loss of structural integrity and short circuits
   d) Lower weight

14) Durability testing of EV batteries typically includes _____.
   a) Cycle life testing, thermal cycling, and vibration tests
   b) Only visual inspection
   c) Ignoring environmental conditions
   d) Only cost analysis

Set **P**

T.Y. (B.Tech.) (Mechanical Engineering) (Semester - II) (New) (CBCS) Examination: March/April – 2026
Electric Vehicle Battery Systems (EEMDM-04B)

Day & Date: Saturday, 30-05-2026 Max. Marks: 56
Time: 03:00 PM To 06:00 PM

Instructions: 1) All questions are compulsory.
2) Figures to the right indicate full marks.

Section – I

Q.2 Attempt the following. (Any Four) **16**

a) Explain the different types of batteries used in electric vehicles.

b) Discuss the basic Principle of Battery Chemistry & explain the Key Materials used in Batteries.

c) Describe the characteristics, advantages, and limitations of lead-acid batteries.

d) Identify and explain the major challenges faced by electric vehicles in mass adoption.

e) Explain how Key Performance Parameters Affected by electrochemistry.

Q.3 Attempt the following. (Any Two) **12**

a) Describe the industry outlook, government policies, and technological advancements for electric vehicles.

b) Compare lead-acid, NiMH, and Li-ion batteries based on different battery chemistries?

c) Describe the characteristics, advantages, and limitations of Nickel-metal hydride (NiMH) batteries.

Section – II

Q.4 Attempt the following. (Any Four) **16**

a) Explain Battery system architecture by series battery configuration.

b) Discuss hazards & risks in EV battery systems.

c) Describe the reliability and durability of EV battery systems.

d) Explain the role of wiring and connectors in battery systems.

e) Describe the principles, materials, and applications of Sodium-ion batteries.

Q.5 Attempt the following. (Any Two) **12**

a) Describe the Battery management system in details.

b) Explain Testing and validation of EV battery systems.

c) Discuss modelling & performance testing of EV battery packs.

MCQ/Objective Type Questions

Duration: 30 Minutes Marks:14

Q.1 Choose the correct alternatives from the options. 14

1) In the railway, the yellow light indicates _____.
a) Stop b) Proceed
c) Proceed cautiously d) Proceed at high speed

2) Which of the following is the most important strategic reason for the construction of a new railway line?
a) For creating jobs
b) Because of absence of a railway line
c) To increase tourists
d) To make movement of defense forces easier in case of emergency

3) Which of the following is not the feature of a modern control system?
a) Correct power level b) No oscillation
c) Quick response d) Accuracy

4) IT tools and business systems in IR are _____.
a) Mobile Ticketing b) Web Ticketing
c) Kiosk-based Ticketing d) All of above

5) Which of following is NOT the function of Event loggers?
a) train speed, time, distance record
b) direction of motion
c) brake applications and operations
d) Display of Data

6) What is the characteristic of a good control system?
   a) Insensitive to the parameter variation but sensitive to the input commands
   b) Neither sensitive to parameter variations nor sensitive to input commands
   c) Insensitive to the input command
   d) Sensitive to parameter variation

7) The safety in Railway in India is looked after by _____.
   a) Ministry of Railways
   b) Commission of Railway Safety
   c) Railway Board
   d) Headquarter Office

8) In a stable control system backlash can cause which of the following?
   a) Overdamping
   b) Low-level oscillations
   c) Underdamping
   d) Poor stability at reduced values of open loop gain

9) Which channel or mode of communication is used in Railway traffic?
   a) OFC
   b) Wired
   c) Wireless
   d) Public Address System

10) IoT in railways implies establishing connections between sensors that are present _____.
   a) In trains
   b) At tracks
   c) Platforms
   d) All of the Above

11) In a temperature control system, what conversion in signal takes place?
   a) Error to Digital
   b) Error to Analog
   c) Digital to Analog
   d) Analog to Digital

12) The output of the feedback control system must be a function of _____.
   a) Output and feedback signal
   b) Input and feedback signal
   c) Reference input
   d) Reference

13) What should be the nature of bandwidth for a good control system?
   a) Small
   b) Medium
   c) Large
   d) All of the mentioned

14) In a control system the output of the controller is given to _____.
   a) Amplifier
   b) Sensor
   c) Final control element
   d) Comparator

a) Give difference between closed loop and open loop control system.

b) What is Linear control system and Non-linear control system? Explain.

c) What are Sensors? Give types of sensors used in railway.

d) Explain Liquid level control system.

e) Give the transfer function of a closed-loop system with proper equation.

Q.5 Attempt. (Any Two) **12**

a) Compare Microprocessors and Micro-controllers.

b) Write note on Telephones Used in Control Working in railways.

c) What is Train Protection & Warning System? Explain.

T.Y. (B.Tech.) (Electronics &Telecommunication Engineering) (Semester - I) (New) (CBCS) Examination: March/April - 2026
Honors in Applications of IT and Control Engineering in Railway (ENTHON-03)

Day & Date: Thursday, 14-05-2026 Max. Marks: 70
Time: 10:00 AM To 01:00 PM

Instructions: 1) Q. No. 1 is compulsory. It should be solved in the first 30 minutes in Answer Book Page no 03 (Starting page of the Answer Book). Each question carries one mark.
2) Don't forget to Mention question paper set (P/Q/R/S) on top of page.
3) Figures to the right indicates full marks.

MCQ/Objective Type Questions

Duration: 30 Minutes Marks:14

Q.1 Choose the correct alternatives from the options. 14

1) In a temperature control system, what conversion in signal takes place?
a) Error to Digital b) Error to Analog
c) Digital to Analog d) Analog to Digital

2) The output of the feedback control system must be a function of _____.
a) Output and feedback signal b) Input and feedback signal
c) Reference input d) Reference

3) What should be the nature of bandwidth for a good control system?
a) Small b) Medium
c) Large d) All of the mentioned

4) In a control system the output of the controller is given to _____.
a) Amplifier b) Sensor
c) Final control element d) Comparator

5) In the railway, the yellow light indicates _____.
a) Stop b) Proceed
c) Proceed cautiously d) Proceed at high speed

6) Which of the following is the most important strategic reason for the construction of a new railway line?
a) For creating jobs
b) Because of absence of a railway line
c) To increase tourists
d) To make movement of defense forces easier in case of emergency

7) Which of the following is not the feature of a modern control system?
a) Correct power level
b) No oscillation
c) Quick response
d) Accuracy

8) IT tools and business systems in IR are _____.
a) Mobile Ticketing
b) Web Ticketing
c) Kiosk-based Ticketing
d) All of above

9) Which of following is NOT the function of Event loggers?
a) train speed, time, distance record
b) direction of motion
c) brake applications and operations
d) Display of Data

10) What is the characteristic of a good control system?
a) Insensitive to the parameter variation but sensitive to the input commands
b) Neither sensitive to parameter variations nor sensitive to input commands
c) Insensitive to the input command
d) Sensitive to parameter variation

11) The safety in Railway in India is looked after by _____.
a) Ministry of Railways
b) Commission of Railway Safety
c) Railway Board
d) Headquarter Office

12) In a stable control system backlash can cause which of the following?
a) Overdamping
b) Low-level oscillations
c) Underdamping
d) Poor stability at reduced values of open loop gain

13) Which channel or mode of communication is used in Railway traffic?
a) OFC
b) Wired
c) Wireless
d) Public Address System

14) IoT in railways implies establishing connections between sensors that are present _____.
a) In trains
b) At tracks
c) Platforms
d) All of the Above

Time: 10:00 AM To 01:00 PM

Instructions: 1) All questions are compulsory.
2) Figures to the right indicate full marks.

SECTION – I

Q.2 Attempt. (Any Four) **16**

a) What is FOIS? Explain.

b) Differentiate between PRS and UTS in terms of scope and functionality.

c) What are the Basic requirements of UTS Network.

d) Give the benefits of Freight Operations Information System.

e) How does PRS ensure passenger convenience and ticket availability across the country?

Q.3 Attempt. (Any Two) **12**

a) Explain. Write a note on Public Address System.

b) Give Details Explain Introduction of IOT in Indian Railways.

c) What are Data Loggers and Event Loggers?

SECTION – II

Q.4 Attempt. (Any Four) **16**

a) Give difference between closed loop and open loop control system.

b) What is Linear control system and Non-linear control system? Explain.

c) What are Sensors? Give types of sensors used in railway.

d) Explain Liquid level control system.

e) Give the transfer function of a closed-loop system with proper equation.

MCQ/Objective Type Questions

Duration: 30 Minutes Marks:14

Q.1 Choose the correct option from the following. 14

1) FRMCS is intended to replace which existing railway communication system?
a) Wi-Fi b) GSM-R
c) ISDN d) Satellite Communication

2) FRMCS is primarily based on which technology?
a) 2G b) 3G
c) LTE / 5G d) WiMAX

3) The main objective of FRMCS is to provide _____.
a) Entertainment services
b) Voice-only communication
c) Integrated voice and data communication
d) Satellite navigation

4) Which satellite orbit provides lower latency for broadband services?
a) GEO b) MEO
c) LEO d) HEO

5) VoIP based TCCS primarily uses _____.
a) Circuit switching b) Packet switching
c) Manual switching d) Analog switching

6) The main advantage of IP-based VSS over analog CCTV is _____.
a) Lower video quality
b) No need of storage
c) Remote monitoring and scalability
d) Higher power consumption

7) A network PA system in railways mainly uses _____.
a) Analog amplifiers only
b) IP-based audio transmission
c) Satellite communication
d) GSM SMS alerts

8) IoT in railways mainly helps in _____.
a) Manual signaling
b) Predictive maintenance and monitoring
c) Reducing train speed
d) Increasing paperwork

9) UHF handheld radios are mainly used for _____.
a) Long-distance data transmission
b) Voice communication among staff
c) Video streaming
d) Train control

10) ATP stands for _____.
a) Automatic Traction Power
b) Advanced Train Processor
c) Automatic Train Protection
d) Automatic Track Position

11) Which signaling system is commonly associated with NextGen ATP?
a) Mechanical signaling
b) ETCS Level-2 / CBTC
c) Token block
d) Absolute block

12) ETCS Level-2 mainly uses which communication technology?
a) Optical fiber
b) GSM-R / LTE based radio communication
c) Satellite communication
d) Microwave link

13) LTE based communication in railways mainly provides _____.
a) Voice only
b) Data only
c) High speed data and voice communication
d) Telegraph communication

14) Intermediate Block Signaling is introduced to _____.
a) Increase train speed only
b) Increase line capacity
c) Reduce ticket price
d) Improve station building

Examination: March/April – 2026
Robotics and Artificial Intelligence (197041703)

Day & Date: Wednesday, 13-05-2026 Max. Marks: 70
Time: 10:00 AM To 01:00 PM

Instructions: 1) Q. No. 1 is compulsory. It should be solved in the first 30 minutes in Answer Book Page no 03 (Starting page of the Answer Book). Each question carries one mark.
2) Don't forget to Mention question paper set (P/Q/R/S) on top of page.
3) Figures to the right indicates full marks.

MCQ/Objective Type Questions

Duration: 30 Minutes Marks:14

Q.1 Objective Question. **14**

1) The term AGV stands for _____.
a) Automatic Guided Vehicle
b) Autonomous Guided Vehicle
c) Automated Guided Vehicle
d) Alternative Guided Vehicle

2) What is the function of frame grabber?
a) Sensing the object b) digitizing
c) storing d) none of these

3) The term "Robotics" was coined by _____.
a) Karel Capek b) Aurther C. Clarke
c) Leonardo Da Vinci d) none of these

4) Which are the following external state sensor?
a) Strain gauge b) ultrasonic sensor
c) potentiometer d) all the above

5) Work envelope generated by SCARA arm robot is _____.
a) Sphere b) cylinder
c) rectangular box d) triangle

6) What is the function of an Artificial Intelligence "Agent"?
a) Mapping of goal sequence to an action
b) Work without the direct interference of the people
c) Mapping of precept sequence to an action
d) Mapping of environment sequence to an action

7) Which one of the following statements is TRUE?
   a) Dextrous workspace of a manipulator is a subset of its reachable workspace
   b) Reachable workspace of a manipulator is a subset of its dextrous workspace
   c) No relationship exists between dextrous and reachable workspaces
   d) Summation of dextrous and reachable workspaces of a manipulator gives rise to its total workspace

8) Degree(s) of freedom of a four - bar mechanism is/are found to be equal to _____.
   a) 1 b) 2
   c) 3 d) none of these

9) The total number of recognition in artificial intelligence are _____.
   a) 3 b) 4
   c) 2 d) 1

10) The outline boundary of an object within an image is equivalent to identify image is known as _____.
   a) smoothing b) region growing
   c) edge detection d) none of these

11) On which Artificial Neural Network is based on which type of approach?
   a) Cognitive approach b) Applied approach
   c) Weak approach d) Strong approach

12) Which of the following drives used for control the robots?
   a) Hydraulic b) pneumatic
   c) electrical d) solenoid

13) Which of the following are tactile sensors?
   a) Magnetic sensor b) piezoelectric
   c) encoder d) range sensor

14) Which of the following is an advantage of artificial intelligence?
   a) Reduces the time taken to solve the problem
   b) Helps in providing security
   c) Have the ability to think hence makes the work easier
   d) All of the above

Seat No.	

Set **P**

Fourth. Y. (B.Tech.) (Mechanical Engineering) (Sem - I) (New) (CBCS)
Examination: March/April – 2026
Robotics and Artificial Intelligence (197041703)

Day & Date: Wednesday, 13-05-2026 Max. Marks: 56
Time: 10:00 AM To 01:00 PM

Instructions: 1) In Section – I, Q. 5 is compulsory and attempt any two questions from the remaining questions.
2) In Section – II, Q. 6 is compulsory and attempt any two questions from the remaining questions.
3) Figures to the right indicate full marks.

Section - I

Q.2 **a)** Explain following industrial automation. **05**
i) Fixed automation
ii) Programmable automation
iii) Flexible automation

b) What are the different configurations of robot? Which of these would be the most suitable for the following? **04**
i) Spray painting
ii) Welding
iii) Inserting peg into hole
Explain your choice

Q.3 **a)** What is an AGV? Discuss are the different navigation techniques used for industrial AGVs. **05**

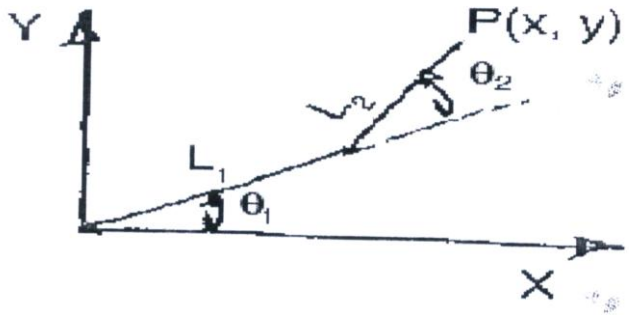
b) Name five different types of robots end effectors. Explain any two **04**

Q.4 **a)** Define the following. **04**
i) Work envelope
ii) Work cell
iii) Degrees of freedom
iv) Servomechanism

b) What are the tactile sensors? Explain how they are operated? **05**

Q.5 **a)** What do you understand by DH conversion Explain in detail **04**

b) Consider the forward transformation of the three joint manipulator as shown in the fig. **06**
Given that the length of joint - 1 L1 = 12 inch, the length of joint 2, L2 = 10 inch, the angle $\ominus 1 = 30°$ and angle $\ominus 2 = 45°$ compute the coordinate position (x, & y co-ordinate) for the end of the arm P.



Section – II

Q.6	**a)**	Distinguish between CCD & CMOS cameras.	**06**
	b)	What is thresholding? Why is it necessary?	**04**
Q.7	**a)**	Explain segmentation process of image processing with neat sketch.	**05**
	b)	Explain Genetic Algorithm (GA). With neat sketch.	**04**
Q.8	**a)**	Discuss the construction and working of stepper motors. List its advantages, disadvantages and applications.	**05**
	b)	What are the different robot programming languages.	**04**
Q.9	**a)**	Compare online and offline programming.	**05**
	b)	Discuss the application of the wheeled robot.	**04**

Seat No.	

Set **Q**

Fourth. Y. (B.Tech.) (Mechanical Engineering) (Sem - I) (New) (CBCS)
Examination: March/April – 2026
Robotics and Artificial Intelligence (197041703)

Day & Date: Wednesday, 13-05-2026 Max. Marks: 70
Time: 10:00 AM To 01:00 PM

Instructions: 1) Q. No. 1 is compulsory. It should be solved in the first 30 minutes in Answer Book Page no 03 (Starting page of the Answer Book). Each question carries one mark.
2) Don't forget to Mention question paper set (P/Q/R/S) on top of page.
3) Figures to the right indicates full marks.

MCQ/Objective Type Questions

Duration: 30 Minutes Marks:14

Q.1 Objective Question. **14**

1) Degree(s) of freedom of a four - bar mechanism is/are found to be equal to _____.
a) 1 b) 2
c) 3 d) none of these

2) The total number of recognition in artificial intelligence are _____.
a) 3 b) 4
c) 2 d) 1

3) The outline boundary of an object within an image is equivalent to identify image is known as _____.
a) smoothing b) region growing
c) edge detection d) none of these

4) On which Artificial Neural Network is based on which type of approach?
a) Cognitive approach b) Applied approach
c) Weak approach d) Strong approach

5) Which of the following drives used for control the robots?
a) Hydraulic b) pneumatic
c) electrical d) solenoid

6) Which of the following are tactile sensors?
a) Magnetic sensor b) piezoelectric
c) encoder d) range sensor

7) Which of the following is an advantage of artificial intelligence?
a) Reduces the time taken to solve the problem
b) Helps in providing security
c) Have the ability to think hence makes the work easier
d) All of the above

8) The term AGV stands for _____.
   a) Automatic Guided Vehicle
   b) Autonomous Guided Vehicle
   c) Automated Guided Vehicle
   d) Alternative Guided Vehicle

9) What is the function of frame grabber?
   a) Sensing the object b) digitizing
   c) storing d) none of these

10) The term "Robotics" was coined by _____.
   a) Karel Capek b) Aurther C. Clarke
   c) Leonardo Da Vinci d) none of these

11) Which are the following external state sensor?
   a) Strain gauge b) ultrasonic sensor
   c) potentiometer d) all the above

12) Work envelope generated by SCARA arm robot is _____.
   a) Sphere b) cylinder
   c) rectangular box d) triangle

13) What is the function of an Artificial Intelligence “Agent”?
   a) Mapping of goal sequence to an action
   b) Work without the direct interference of the people
   c) Mapping of precept sequence to an action
   d) Mapping of environment sequence to an action

14) Which one of the following statements is TRUE?
   a) Dextrous workspace of a manipulator is a subset of its reachable workspace
   b) Reachable workspace of a manipulator is a subset of its dextrous workspace
   c) No relationship exists between dextrous and reachable workspaces
