Set Q

T.Y. (B.Tech.) (Electronics & Telecommunication Engineering) (Semester - I) (New) (CBCS) Examination: March/April – 2026
Digital Signal Processing (ENTPCC-08)

Day & Date: Tuesday, 05-05-2026 Max. Marks: 56
Time: 10:00 AM To 01:00 PM

Instructions: 1) All questions are compulsory.
2) Figures to the right indicate full marks.
3) Assume suitable data if necessary.

SECTION – I

Q.2 Attempt Any Four of the following question. 16

a) Perform circular convolution for $x_1(n) = \{1,3,2,5\}$ and $x_2(n) = \{1,2,3,4\}$

b) Differentiate between DFT and FFT.

c) Derive Multiplication in time domain DFT Property?

d) Compute four point DFT of a sequence $x(n) = \{5,2,3,1\}$

e) Compute IDFT of $X(k) = \{7, -1 + j, -1, -1 - j\}$

Q.3 Attempt Any Two of the following question. 12

a) Find the DFT of a sequence $x(n) = \{2,2,2,2,2,2,0,0\}$ using DIT FFT algorithm.

b) Find the output value of a filter whose impulse response is $h(n) = \{1,2\}$ and input signal is $x(n) = \{1, -1,2,3,4,5,6, -1,0,2,1,5,1\}$ using overlap add method.

c) Find circular convolution of the following sequences $x(n) = \{1,8,2,10\}$; $h(n) = \{1,1,1,1\}$ using DFT and IDFT method.

SECTION – II

Q.4 Attempt Any Four of the following question. 16

a) Obtain the Cascade form realization for the system function given by

$$H(z) = \frac{1 + {}^{1}/_{4}\, z^{-1}}{\left(1 + {}^{1}/_{2}\, z^{-1}\right)\left(1 + {}^{1}/_{2}\, z^{-1} + {}^{1}/_{4}\, z^{-1}\right)}$$

b) Prove that

$$\Omega_c = \frac{\Omega_p}{\left(10^{0.1\alpha_p} - 1\right)^{1/2N}} = \frac{\Omega_s}{\left(10^{0.1\alpha_s} - 1\right)^{1/2N}}$$

c) Explain briefly the method of designing FIR filter using Fourier series?

d) What is warping effect? What is its effect on magnitude and phase response?

e) Explain the application of DSP in audio processing?

Q.5 Attempt Any Two of the following question. **12**

a) Design an ideal high pass filter with a frequency response

$Hd(e^{j\omega}) = 1$ for $\frac{\pi}{4} \leq |\omega| \leq \pi$

$= 0$ for $|\omega| \leq \frac{\pi}{4}$

Find the values of $h(n)$ for $N = 11$, Find frequency response $\bar{H}(e^{j\omega})$

b) Using bilinear transformation obtain $H(z)$ if $H(s) = \frac{1}{(S+1)^2}$ for T=0.1 sec

c) Apply impulse invariant method and find $H(z)$ for

$H(s) = \frac{s+a}{(s+a)^2 + b^2}$

Digital Signal Processing (ENTPCC-08)

Day & Date: Tuesday, 05-05-2026 Max. Marks: 70
Time: 10:00 AM To 01:00 PM

Instructions: 1) Q. No. 1 is compulsory. It should be solved in the first 30 minutes in answer book Page no 03 (Starring page of the Answer Book Each question carries one mark.
2) Don't forget to Mention question paper set (P/Q/R/S) on top of Page.
3) Figures to the right indicates full marks.
4) Assume suitable data if necessary.

MCQ/Objective Type Questions

Duration: 30 Minutes Marks:14

Q.1 Choose the correct alternatives from the options. 14

1) Specify the correct equation for Hanning window _____.
a) $\omega_R(n) = 1$
b) $\omega(n) = 0.5 + 0.5\cos\left({}^{2\pi n}/_{N-1}\right)$
c) $\omega(n) = 0.46 + 0.54\cos\left({}^{2\pi n}/_{N-1}\right)$
d) $\omega(n) = 0.54 + 0.46\cos\left({}^{2\pi n}/_{N-1}\right)$

2) To meet the magnitude response specification for a transition width, one has to _____.
a) select a proper window b) select a Kaiser window
c) select filter order d) select rectangular window

3) Given that $H(z)$ is a causal and stable IIR filter, if z in $H(z)$ is replaced by $-z$, the resulting filter will be _____.
a) neither stable nor causal b) stable but non causal
c) unstable but causal d) both stable & causal

4) Impulse invariant method will convert analog filter that has _____.
a) same frequency response as that of analog filter and stable
b) different frequency response and is unstable
c) same frequency response and is unstable
d) different frequency response and is stable

5) The direct evaluation DFT requires _____ complex additions.
a) $N(N-1)$ b) N^2
c) $N(N+1)$ d) $\frac{N(N-1)}{2}$

6) DFT is _____.
a) Discrete Fourier series
b) Discrete Fourier transform
c) Discrete time Fourier transform
d) Discrete time Fourier series

7) The fast Fourier transform is an algorithm used to compute the _____.
a) DFT b) FT
c) Convolution d) Circular Convolution

8) Circular convolution of the sequences $x(n) = \{1,2,3\}$ and $h(n) = \{1,1,1\}$ is _____.
a) $\{1,2,1\}$ b) $\{3,3,3\}$
c) $\{6,6,6\}$ d) $\{3,2,2\}$

9) The methods to calculate filtering of long duration sequences is _____.
a) Overlap save b) Overlap add
c) FIR and IIR d) Both a and b

10) IDFT of $Y(k) = \{4,4,4,4\}$ is _____.
a) $\{4,0,0,0\}$ b) $\{0,4,0,0\}$
c) $\{0,0,4,0\}$ d) $\{0,0,0,4\}$

11) The circular convolution of two sequences in time domain is equivalent to _____.
a) Multiplication of DFTs of two sequences
b) Summation of DFTs of two sequences
c) Difference of DFTs of two sequences
d) All above

12) If the impulse response of a system is over a finite duration, then it is _____.
a) a moving average system b) an auto regressive system
c) an ARMA system d) an IIR system

13) The impulse response of ideal filter is _____.
a) causal b) non causal
c) non-causal & finite d) None

14) IIR digital filters are of the nature _____.
a) Recursive b) non Recursive
c) Reversive d) non Reversive

MCQ/Objective Type Questions

Duration: 30 Minutes Marks:14

Q.1 Choose correct option from the following: **14**

1) The internal ROM memory of the 8051 is _____.
a) 4 Kbytes b) 8 Kbytes
c) 128 bytes d) 256 bytes

2) The o/p of program code will be _____
LOOP: MOV A,#0Ah
DEC A
JNZ LOOP

a) loop execute 10 times b) loop execute 01 time
c) gives error d) loop execute 0A times

3) Why is the flag bit TXIF tested or examined in the PIR1 register after shifting all the data bits during the initialization process of USART in asynchronous mode?
a) For ensuring the transmission of byte
b) For ensuring the reception of byte
c) For ensuring the on-chip baud rate generation
d) For ensuring the 9th bit as a parity

4) What is the address range of Register bank 1 in 8051?
a) 00h-07h b) 08h-0Fh
c) 08h-7Fh d) 08h-FFh

5) Which of the following commands will move the number 27H into the accumulator?
a) MOV A, #27 b) MOV A, #27h
c) MOV A, 27h d) MOV A, @27h

6) Vector address of INT0 interrupt is _____ h.
a) 0003 b) 0013
c) 000B d) 001B

7) Which of the following instructions will load the value A5H into the higher byte of Timer0?
a) MOV TH0,#0A5h b) MOV TH0,@A5h
c) MOV TH0,#A5h d) MOV T0,A5h

8) The 8-bit address bus allows access to an address range of _____.
a) 0000 to FFFF h b) 000 to FFF h
c) 00 to FF h d) 0000 to 0FFF h

9) PIC 16F877A is a _____ bit microcontroller.
a) 64 b) 4
c) 32 d) 8

10) Which flags are more likely to get affected in status registers by Arithmetic and Logical Unit (ALU) of PIC 16 FXXX on the basis of instructions execution?
a) Carry (C) Flags b) Zero (Z) Flags
c) Digit Carry (DC) Flags d) All of the above

11) Which status bits exhibit carry from 8^{th} bit during 8-bit addition?
a) Carry bit b) Digits Carry bit (DC)
c) Both a & b d) None of these

12) Which mode allows to deliver the contents of 16-bit timer into a SFR on the basis of rising/falling edge detection?
a) MSSP Mode b) Compare Mode
c) PWM Mode d) Capture Mode

13) Where does the comparison level occur for 16-bit contents in the compare mode operation?
a) Between CCPR1 register & TMR1
b) Between CCPR1 & CCPR2 registers
c) Between CCPR2 register & TMR1
d) Between CCPR2 register & TMR0

14) Program Memory (ROM), Data Memory (RAM) and Data Memory (EEPROM) for PIC 16F877 are _____ respectively.
a) 8K × 8, 368 × 8, 256 × 8 b) 14K × 8, 14K × 8, 256 × 8
c) 8K × 14, 368 × 16, 256 × 8 d) 8K × 14, 368 × 8, 256 × 8

2) Figures to the right indicate full marks.
3) Assume suitable data if required.

SECTION – I

Q.2 Attempt the following. (Any Four) **16**

a) Compare Von Neumann Architecture and Harvard architecture.

b) Explain any 4 Arithmetic instructions with examples.

c) Write ALP for delay 200ms; Use Timer 0 in Mode 1.

d) Write a short note on Memory organization in 8051.

e) What are the other functions of I/O pins of PORT3?

Q.3 Attempt the following. (Any Two) **12**

a) Write a Program to interface 16×2 LCD display with 8051 to send word “SOLAPUR”.

b) Draw and explain the External Memory Interfacing with 8051. Attach 4 KB RAM externally. Also find the starting and end address.

c) Write a short note on
i) PSW
ii) IE
iii) PCON

SECTION – II

Q.4 Attempt the following. (Any Four) **16**

a) Explain following instructions
i) DECF f,d
ii) RLF f,d
iii) ANDWF f,d
iv) MOVLW k

b) Explain various kinds of RESET in PIC.

c) Explain pin configuration for Arduino Uno board.

d) Brief about the SFRs associated with Interrupts in PIC 16F877.

e) Write a short note on features of Arduino Uno.

Q.5 Attempt the following. (Any Two) **12**

a) Explain in detail:
- i) PORTS
- ii) STATUS
- iii) OPTION_REG registers in PIC 16F877

b) Explain CCP module in PIC 16F877 with logical diagram.

c) Write a program to interface Ultrasonic sensor to Arduino Uno.

e) What are the other functions of I/O pins of PORT3?

Q.3 Attempt the following. (Any Two) **12**

a) Write a Program to interface 16×2 LCD display with 8051 to send word “SOLAPUR”.

b) Draw and explain the External Memory Interfacing with 8051. Attach 4 KB RAM externally. Also find the starting and end address.

c) Write a short note on
i) PSW
ii) IE
iii) PCON

SECTION – II

Q.4 Attempt the following. (Any Four) **16**

a) Explain following instructions
i) DECF f,d
ii) RLF f,d
iii) ANDWF f,d
iv) MOVLW k

b) Explain various kinds of RESET in PIC.

c) Explain pin configuration for Arduino Uno board.

d) Brief about the SFRs associated with Interrupts in PIC 16F877.

e) Write a short note on features of Arduino Uno.

Q.5 Attempt the following. (Any Two) **12**

a) Explain in detail:
- i) PORTS
- ii) STATUS
- iii) OPTION_REG registers in PIC 16F877

b) Explain CCP module in PIC 16F877 with logical diagram.

c) Write a program to interface Ultrasonic sensor to Arduino Uno.

T. Y. (B.Tech.) (Electronics & Telecommunication Engineering) (Semester - I) (New) (CBCS) Examination: March/April - 2026
Microcontrollers and Applications (ENTPCC-09)

Day & Date: Thursday, 07-05-2026 Max. Marks: 70
Time: 10:00 AM To 01:00 PM

Instructions: 1) Q. No. 1 is compulsory. It should be solved in the first 30 minutes in Answer Book Page no 03 (Starting page of the Answer Book). Each question carries one mark.
2) Don't forget to Mention question paper set (P/Q/R/S) on top of page.
3) Figures to right indicates full marks.
4) Assume suitable data if required.

MCQ/Objective Type Questions

Duration: 30 Minutes Marks:14

Q.1 Choose correct option from the following: **14**

1) Which status bits exhibit carry from 8^{th} bit during 8-bit addition?
a) Carry bit b) Digits Carry bit (DC)
c) Both a & b d) None of these

2) Which mode allows to deliver the contents of 16-bit timer into a SFR on the basis of rising/falling edge detection?
a) MSSP Mode b) Compare Mode
c) PWM Mode d) Capture Mode

3) Where does the comparison level occur for 16-bit contents in the compare mode operation?
a) Between CCPR1 register & TMR1
b) Between CCPR1 & CCPR2 registers
c) Between CCPR2 register & TMR1
d) Between CCPR2 register & TMR0

4) Program Memory (ROM), Data Memory (RAM) and Data Memory (EEPROM) for PIC 16F877 are _____ respectively.
a) 8K × 8, 368 × 8, 256 × 8 b) 14K × 8, 14K × 8, 256 × 8
c) 8K × 14, 368 × 16, 256 × 8 d) 8K × 14, 368 × 8, 256 × 8

5) The internal ROM memory of the 8051 is _____.
a) 4 Kbytes b) 8 Kbytes
c) 128 bytes d) 256 bytes

6) The o/p of program code will be _____

```
LOOP: MOV A,#0Ah
      DEC A
      JNZ LOOP
```

a) loop execute 10 times
b) loop execute 01 time
c) gives error
d) loop execute 0A times

7) Why is the flag bit TXIF tested or examined in the PIR1 register after shifting all the data bits during the initialization process of USART in asynchronous mode?

a) For ensuring the transmission of byte
b) For ensuring the reception of byte
c) For ensuring the on-chip baud rate generation
d) For ensuring the 9th bit as a parity

8) What is the address range of Register bank 1 in 8051?

a) 00h-07h
b) 08h-0Fh
c) 08h-7Fh
d) 08h-FFh

9) Which of the following commands will move the number 27H into the accumulator?

a) MOV A, #27
b) MOV A, #27h
c) MOV A, 27h
d) MOV A, @27h

10) Vector address of INT0 interrupt is _____ h.

a) 0003
b) 0013
c) 000B
d) 001B

11) Which of the following instructions will load the value A5H into the higher byte of Timer0?

a) MOV TH0,#0A5h
b) MOV TH0,@A5h
c) MOV TH0,#A5h
d) MOV T0,A5h

12) The 8-bit address bus allows access to an address range of _____.

a) 0000 to FFFF h
b) 000 to FFF h
c) 00 to FF h
d) 0000 to 0FFF h

13) PIC 16F877A is a _____ bit microcontroller.

a) 64
b) 4
c) 32
d) 8

14) Which flags are more likely to get affected in status registers by Arithmetic and Logical Unit (ALU) of PIC 16 FXXX on the basis of instructions execution?

a) Carry (C) Flags
b) Zero (Z) Flags
c) Digit Carry (DC) Flags
d) All of the above

Microcontrollers and Applications (ENTPCC-09)

Day & Date: Thursday, 07-05-2026 Max. Marks: 56
Time: 10:00 AM To 01:00 PM

Instructions: 1) All questions are compulsory.
2) Figures to the right indicate full marks.
3) Assume suitable data if required.

SECTION – I

Q.2 Attempt the following. (Any Four) **16**

a) Compare Von Neumann Architecture and Harvard architecture.

b) Explain any 4 Arithmetic instructions with examples.

c) Write ALP for delay 200ms; Use Timer 0 in Mode 1.

d) Write a short note on Memory organization in 8051.

e) What are the other functions of I/O pins of PORT3?

Q.3 Attempt the following. (Any Two) **12**

a) Write a Program to interface 16×2 LCD display with 8051 to send word “SOLAPUR”.

b) Draw and explain the External Memory Interfacing with 8051. Attach 4 KB RAM externally. Also find the starting and end address.

c) Write a short note on
i) PSW
ii) IE
iii) PCON

SECTION – II

Q.4 Attempt the following. (Any Four) **16**

a) Explain following instructions
i) DECF f,d
ii) RLF f,d
iii) ANDWF f,d
iv) MOVLW k

b) Explain various kinds of RESET in PIC.

c) Explain pin configuration for Arduino Uno board.

d) Brief about the SFRs associated with Interrupts in PIC 16F877.

e) Write a short note on features of Arduino Uno.

Q.5 Attempt the following. (Any Two) **12**

a) Explain in detail:
- i) PORTS
- ii) STATUS
- iii) OPTION_REG registers in PIC 16F877

b) Explain CCP module in PIC 16F877 with logical diagram.

c) Write a program to interface Ultrasonic sensor to Arduino Uno.

Day & Date: Saturday, 09-05-2026 Max. Marks: 70
Time: 10:00 AM To 01:00 PM

Instructions: 1) Q. No. 1 is compulsory. It should be solved in the first 30 minutes in Answer Book Page no 03 (Starting page of the Answer Book). Each question carries one mark.
2) Don't forget to Mention question paper set (P/Q/R/S) on top of page.
3) Figures to the right indicates full marks.
4) Assume suitable data wherever necessary and mention it clearly.

MCQ/Objective Type Questions

Duration: 30 Minutes Marks:14

Q.1 MCQ type question, all Compulsory. **14**

1) A full subtracter circuit requires _____.
a) two inputs and two outputs b) three inputs and one output
c) two inputs and three outputs d) three inputs and two outputs

2) A decoder converts _____.
a) non coded information into coded form
b) coded information into non coded form
c) HIGHs to LOWs
d) LOWs to HIGHs

3) While obtaining minimal sum of products expression _____.
a) All don't cares are ignored
b) All don't cares are treated as logic 1's
c) All don't cares are treated as logic 0's
d) Only such don't cares that help minimization are treated as logic 1's

4) In positive logic _____.
a) a HIGH = 1, a LOW = 0 b) a LOW = 1, a HIGH = 0
c) only HIGHs are present d) only LOWs are present

5) Grouping on a K-map always results in the elimination of _____.
a) variables within the loop that appear only in their uncomplemented form
b) variables that remain unchanged within the loop
c) variables within the loop that appear only in their complemented form
d) variables within the loop that appear in both complemented and uncomplemented form

6) A full-adder has a $C_{in} = 0$. What are the sum $(\sum)$ and the carry (C_{out}) when $A = 1$ and $B = 1$?

a) $\sum = 0, C_{out} = 0$ b) $\sum = 0, C_{out} = 1$

c) $\sum = 1, C_{out} = 0$ d) $\sum = 1, C_{out} = 1$

7) The following number system is used for K-map representation?

a) Binary b) BCD

c) Gray d) Hexadecimal

8) The MOD number of counter is _____.

a) The max. possible number of states

b) The actual number of states in a sequence

c) The number of flip-flops

d) None of these

9) What is the largest number of data inputs which a data selector with two control inputs can handle?

a) 2 b) 8

c) 4 d) 16

10) The terminal count of modulus-11 binary counter is _____.

a) 1010 b) 1001

c) 1000 d) 1100

11) A BCD counter is a _____.

a) binary counter b) full-modulus counter

c) decade counter d) divide-by-09 counter

12) A modulus-16 ring counter requires _____ flip-flops.

a) 10 b) 4

c) 16 d) 2

13) State reduction gives _____.

a) Reduction in number of flip-flops

b) Number of flip-flops remain same

c) a or b

d) None of these

14) To operate correctly, starting a ring shift counter requires _____.

a) clearing all the flip-flops

b) clearing one flip-flop and presetting all others

c) presetting all the flip-flops

d) pre-setting one flip-flop and clearing all others

Digital Logic Design (ENTPEC – 01A)

Day & Date: Saturday, 09-05-2026 Max. Marks: 56
Time: 10:00 AM To 01:00 PM

Instructions: 1) All questions are compulsory.
2) Figures to the right indicate full marks.
3) Assume suitable data wherever necessary and mention it clearly.

Section – I

Q.2 Attempt Any Four of the following. **16**

a) Write short note on characteristics of Logic Families.

b) Describe types of hazards in detail.

c) Design and explain 1 - Bit Comparator.

d) Implement half adder using 3:8 Decoder.

e) Implement the following function using NAND gates
$F(A, B, C, D) = \sum m(0, 1, 2, 3, 5, 7, 8, 9, 10, 11)$

Q.3 Attempt Any Two of the following. **12**

a) Implement the following function using single 4:1 Multiplexer:
$F(P, Q, R, S) = \sum m(0, 1, 3, 4, 8, 9, 11, 12, 13, 14, 15)$

b) Explain Master-Slave JK flip-flop in detail

c) Draw Logical diagram of SR flip-flop. Also write the characteristic table, characteristic equation and excitation table of JK flip-flop.

Section – II

Q.4 Answer Any Four of the following. **16**

a) What is shift register. Explain various types of shift registers.

b) Differentiate between Synchronous and Asynchronous sequential circuits.

c) Differentiate between Moore and Mealy state Machines.

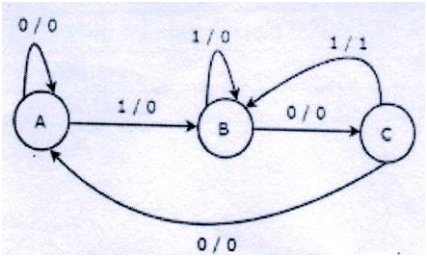
d) Design mod-6 asynchronous counter using T flip-flop.

e) Design mod-7 counter using IC 7490.

Q.5 Answer Any Two of the following. **12**

a) Design 4-bit synchronous counter using T flip-flop.

b) Design a sequential circuit using T-flip-flop for the given state diagram.



c) Design a sequential circuit with two D flip flops A and B, one input X. When X = 0, the state remains same. When X = 1 then Circuit passes through state transitions from 00 to 01 to 11 to 10 and back to 00 and repeats.

   a) a HIGH $= 1$, a LOW $= 0$
   b) a LOW $= 1$, a HIGH $= 0$
   c) only HIGHs are present
   d) only LOWs are present

9) Grouping on a K-map always results in the elimination of _____.
   a) variables within the loop that appear only in their uncomplemented form
   b) variables that remain unchanged within the loop
   c) variables within the loop that appear only in their complemented form
   d) variables within the loop that appear in both complemented and uncomplemented form

10) A full-adder has a $C_{in} = 0$. What are the sum $(\sum)$ and the carry (C_{out}) when $A = 1$ and $B = 1$?
   a) $\sum = 0, C_{out} = 0$
   b) $\sum = 0, C_{out} = 1$
   c) $\sum = 1, C_{out} = 0$
   d) $\sum = 1, C_{out} = 1$

11) The following number system is used for K-map representation?
   a) Binary
   b) BCD
   c) Gray
   d) Hexadecimal

12) The MOD number of counter is _____.
   a) The max. possible number of states
   b) The actual number of states in a sequence
   c) The number of flip-flops
   d) None of these

13) What is the largest number of data inputs which a data selector with two control inputs can handle?
   a) 2
   b) 8
   c) 4
   d) 16

14) The terminal count of modulus-11 binary counter is _____.
   a) 1010
   b) 1001
   c) 1000
   d) 1100

Set **R**

T. Y. (B.Tech.) (Electronics & Telecommunication Engineering) (Semester - I) (New) (CBCS) Examination: March/April - 2026
Digital Logic Design (ENTPEC – 01A)

Day & Date: Saturday, 09-05-2026 Max. Marks: 56
Time: 10:00 AM To 01:00 PM

Instructions: 1) All questions are compulsory.
2) Figures to the right indicate full marks.
3) Assume suitable data wherever necessary and mention it clearly.

Section – I

Q.2 Attempt Any Four of the following. **16**

a) Write short note on characteristics of Logic Families.

b) Describe types of hazards in detail.

c) Design and explain 1 - Bit Comparator.

d) Implement half adder using 3:8 Decoder.

e) Implement the following function using NAND gates
$F(A, B, C, D) = \sum m(0, 1, 2, 3, 5, 7, 8, 9, 10, 11)$

Q.3 Attempt Any Two of the following. **12**

a) Implement the following function using single 4:1 Multiplexer:
$F(P, Q, R, S) = \sum m(0, 1, 3, 4, 8, 9, 11, 12, 13, 14, 15)$

b) Explain Master-Slave JK flip-flop in detail

c) Draw Logical diagram of SR flip-flop. Also write the characteristic table, characteristic equation and excitation table of JK flip-flop.

Section – II

Q.4 Answer Any Four of the following. **16**

a) What is shift register. Explain various types of shift registers.

b) Differentiate between Synchronous and Asynchronous sequential circuits.

c) Differentiate between Moore and Mealy state Machines.

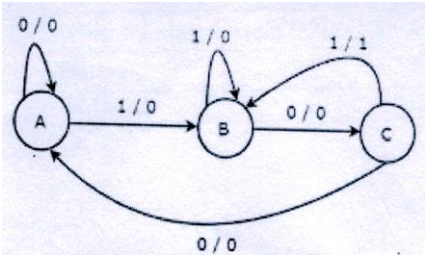
d) Design mod-6 asynchronous counter using T flip-flop.

e) Design mod-7 counter using IC 7490.

Q.5 Answer Any Two of the following. **12**

a) Design 4-bit synchronous counter using T flip-flop.

b) Design a sequential circuit using T-flip-flop for the given state diagram.



c) Design a sequential circuit with two D flip flops A and B, one input X. When X = 0, the state remains same. When X = 1 then Circuit passes through state transitions from 00 to 01 to 11 to 10 and back to 00 and repeats.

T. Y. (B.Tech.) (Electronics & Telecommunication Engineering) (Semester - I) (New) (CBCS) Examination: March/April - 2026

Digital Logic Design (ENTPEC – 01A)

Day & Date: Saturday, 09-05-2026 Max. Marks: 70
Time: 10:00 AM To 01:00 PM

Instructions: 1) Q. No. 1 is compulsory. It should be solved in the first 30 minutes in Answer Book Page no 03 (Starting page of the Answer Book). Each question carries one mark.
2) Don't forget to Mention question paper set (P/Q/R/S) on top of page.
3) Figures to the right indicates full marks.
4) Assume suitable data wherever necessary and mention it clearly.

MCQ/Objective Type Questions

Duration: 30 Minutes Marks:14

Q.1 MCQ type question, all Compulsory. **14**

1) A full-adder has a $C_{in} = 0$. What are the sum $(\sum)$ and the carry (C_{out}) when $A = 1$ and $B = 1$?
a) $\sum = 0, C_{out} = 0$ b) $\sum = 0, C_{out} = 1$
c) $\sum = 1, C_{out} = 0$ d) $\sum = 1, C_{out} = 1$

2) The following number system is used for K-map representation?
a) Binary b) BCD
c) Gray d) Hexadecimal

3) The MOD number of counter is _____.
a) The max. possible number of states
b) The actual number of states in a sequence
c) The number of flip-flops
d) None of these

4) What is the largest number of data inputs which a data selector with two control inputs can handle?
a) 2 b) 8
c) 4 d) 16

5) The terminal count of modulus-11 binary counter is _____.
a) 1010 b) 1001
c) 1000 d) 1100

6) A BCD counter is a _____.
a) binary counter b) full-modulus counter
c) decade counter d) divide-by-09 counter

7) A modulus-16 ring counter requires _____ flip-flops.
a) 10 b) 4
c) 16 d) 2

8) State reduction gives _____.
a) Reduction in number of flip-flops
b) Number of flip-flops remain same
c) a or b
d) None of these

9) To operate correctly, starting a ring shift counter requires _____.
a) clearing all the flip-flops
b) clearing one flip-flop and presetting all others
c) presetting all the flip-flops
d) pre-setting one flip-flop and clearing all others

10) A full subtracter circuit requires _____.
a) two inputs and two outputs b) three inputs and one output
c) two inputs and three outputs d) three inputs and two outputs

11) A decoder converts _____.
a) non coded information into coded form
b) coded information into non coded form
c) HIGHs to LOWs
d) LOWs to HIGHs

12) While obtaining minimal sum of products expression _____.
a) All don't cares are ignored
b) All don't cares are treated as logic 1's
c) All don't cares are treated as logic 0's
d) Only such don't cares that help minimization are treated as logic 1's

13) In positive logic _____.
a) a HIGH = 1, a LOW = 0 b) a LOW = 1, a HIGH = 0
c) only HIGHs are present d) only LOWs are present

14) Grouping on a K-map always results in the elimination of _____.
a) variables within the loop that appear only in their uncomplemented form
b) variables that remain unchanged within the loop
c) variables within the loop that appear only in their complemented form
d) variables within the loop that appear in both complemented and uncomplemented form

Day & Date: Saturday, 09-05-2026 Max. Marks: 70
Time: 10:00 AM To 01:00 PM

Instructions: 1) Q. No. 1 is compulsory. It should be solved in the first 30 minutes in Answer Book Page no 03 (Starting page of the Answer Book). Each question carries one mark.
2) Don't forget to Mention question paper set (P/Q/R/S) on top of page.
3) Figures to the right indicates full marks.
4) Assume suitable data wherever necessary and mention it clearly.

MCQ/Objective Type Questions

Duration: 30 Minutes Marks:14

Q.1 MCQ type question, all Compulsory. **14**

1) The first step in a digital image processing system is _____.
a) Image enhancement b) Image acquisition
c) Image restoration d) Image segmentation

2) The spatial resolution of an image refers to _____.
a) Number of bits per pixel
b) Number of pixels per unit area
c) Contrast level of an image
d) Gray-level distribution

3) Power-law transformation is commonly known as _____.
a) Gamma correction b) Log correction
c) Histogram equalization d) Contrast stretching

4) Contrast stretching improves _____.
a) Spatial resolution
b) Dynamic range of gray levels
c) Noise removal
d) Histogram equalization

5) The Discrete Fourier Transform (DFT) is mainly used in image processing to _____.
a) Compress an image
b) Transform an image from spatial domain to frequency domain
c) Remove colors from an image
d) Convert binary image to grayscale

6) The main drawback of Ideal High Pass Filtering is _____.
a) Smooth output
b) Ringing artifacts due to sharp cutoff
c) Low contrast
d) Loss of phase information

7) Canny, Sobel, and Prewitt operators are used for _____.
a) Thresholding b) Edge detection
c) Region merging d) Smoothing

8) Watershed segmentation is based on the concept of _____.
a) Histogram equalization b) Topographic interpretation
c) Frequency domain filtering d) KL transform

9) In region splitting and merging, segmentation starts with _____.
a) Single pixel b) Entire image
c) Histogram of image d) Edge map

10) DCT (Discrete Cosine Transform) is widely used in _____.
a) Image restoration b) Image compression (JPEG)
c) Image segmentation d) Medical imaging

11) KL Transform is also known as _____.
a) Hotelling Transform b) Discrete Fourier Transform
c) Cosine Transform d) Laplace Transform

12) DCT uses _____.
a) Cosine basis functions only b) Sine basis functions only
c) Complex exponentials d) Random functions

13) Histogram specification is also known as _____.
a) Histogram stretching b) Histogram matching
c) Histogram equalization d) Histogram scaling

14) Medical image processing applications include _____.
a) Tumor detection b) Disease classification
c) 3D visualization of organs d) All of the above

SECTION – I

Q.2 Solve any four of the following. **16**

a) What is sampling and quantization in image processing?

b) Explain RGB color Model.

c) What are the basic gray level transformations?

d) Explain smoothing filters.

e) What is digital negative? Give an application for it. Find the digital Negative of the image $f(x,y)$.

$$f(x,y) = \begin{matrix} 4 & 3 & 2 & 1 \\ 3 & 1 & 2 & 4 \\ 5 & 1 & 6 & 2 \\ 2 & 3 & 5 & 6 \end{matrix}$$

Q.3 Solve any two of the following. **12**

a) Explain with block diagram components of the Image processing system.

b) Explain Gaussian and Butterworth filters for smoothening and sharpening.

c) Explain with neat diagram gray level slicing & bit plane slicing.

SECTION – II

Q.4 Answer any four of the following. **16**

a) Explain Point, line and edge detection.

b) Write a mask of Roberts operator, Sobel operator and Prewitt operator.

c) Explain Discrete Cosine Transform.

d) What is the global threshold for segmentation? Give algorithm for obtaining threshold value.

e) Define histogram and explain histogram equalization.

Q.5 Answer any two of the following. **12**

a) Explain Fourier Transform: Discrete and Continuous and Give Properties of Fourier Transform.

b) Explain Dilation & erosion with Example.

c) Explain fingerprint recognition as an application in image processing.

Q.4 Answer any four of the following. **16**

a) Explain Point, line and edge detection.

b) Write a mask of Roberts operator, Sobel operator and Prewitt operator.

c) Explain Discrete Cosine Transform.

d) What is the global threshold for segmentation? Give algorithm for obtaining threshold value.

e) Define histogram and explain histogram equalization.

Q.5 Answer any two of the following. **12**

a) Explain Fourier Transform: Discrete and Continuous and Give Properties of Fourier Transform.

b) Explain Dilation & erosion with Example.

c) Explain fingerprint recognition as an application in image processing.

T.Y. (B.Tech.) (Electronics & Telecommunication Engineering) (Semester - I) (New) (CBCS) Examination: March/April – 2026
Creativity and Design Thinking (AEC-02)

Day & Date: Tuesday, 12-05-2026 Max. Marks: 50
Time: 10:00 AM To 01:00 PM

Instructions: 1) All questions are compulsory.
2) Figures to the right indicate full marks.
3) Mention Question Paper Set (P/Q/R/S) on Top of Page.
4) Use of non-programmable calculators is allowed.

Answer

Q.1 Multiple Choice Questions.

1) Innovation mainly focuses on _____.
a) Generating ideas only b) Implementing creative ideas
c) Copying others d) Marketing

2) Creativity and Innovation together lead to _____.
a) Routine performance b) Problem discovery
c) Practical novelty d) Mechanical repetition

3) A characteristic of a creative person is _____.
a) Rigidity b) Curiosity
c) Fearfulness d) Passivity

4) Which of the following represents a major *barrier* to creativity?
a) Time pressure b) Risk-taking
c) Playfulness d) Flexibility

5) The “Ideate” stage in design thinking focuses on _____.
a) Understanding users b) Generating solutions
c) Testing ideas d) Building prototypes

6) Design thinking is fundamentally _____.
a) User-centered b) Manager-centered
c) Engineer-centered d) Cost-centered

7) Which of these helps to *overcome* creative blocks?
a) Collaboration b) Fear of mistakes
c) Over-planning d) Isolation

8) A design thinker empathizes to _____.
a) Know customer feelings and needs
b) Find product cost
c) Estimate profit
d) Collect market data

9) The *Define* phase results in _____.
a) Problem statement b) Prototype
c) Survey d) Marketing plan

10) Barriers to creativity can be removed through _____.
a) Open communication b) Discouragement
c) Repetition d) Judgmental thinking

11) The last phase of design thinking is _____.
a) Prototype b) Test
c) Ideate d) Define

12) Which term best describes the ability to see connections between unrelated ideas?
a) Fluency b) Flexibility
c) Originality d) Association

13) One of the benefits of design thinking is _____.
a) Focusing on user-friendly solutions
b) Ignoring customers
c) Cost reduction only
d) Quick fixes

14) Divergent and convergent thinking together ensure _____.
a) Balance between idea generation and selection
b) Faster production
c) Market analysis
d) Less creativity

15) In brainstorming, criticism should be ____.
a) Encouraged b) Postponed
c) Ignored d) Repeated

16) SCAMPER is mainly used for _____.
a) Modifying existing ideas b) Market study
c) Testing materials d) Estimating cost

17) In mind mapping, central themes are _____.
a) Placed at center with branches outward
b) At the edges
c) Hidden
d) Random

18) TRIZ encourages _____.
a) Systematic innovation through contradictions
b) Copying existing patents
c) Brainstorm blocking
d) Linear analysis

19) Which is a creative ideation technique?
a) Storyboarding b) Checklist creation
c) Prototype testing d) Quality audit

20) Concept sketching helps _____.
a) Express ideas visually b) Replace written reports
c) Perform tests d) Manage finance

21) In SCAMPER, “C” stands for _____.
a) Combine b) Copy
c) Create d) Classify

22) The purpose of divergent thinking is to _____.
a) Explore many possibilities b) Select one answer
c) Limit imagination d) Finalize design

23) Which of the following tools is best suited for *organizing ideas?*
a) Mind map b) Pie chart
c) Spreadsheet d) Histogram

24) “Storytelling” in concept development helps designers _____.
a) Communicate user experiences effectively
b) Draw detailed schematics
c) Analyze budget
d) Fix prototypes

25) The last step of concept development is _____.
a) Visualization of ideas b) Brainstorming
c) TRIZ analysis d) Market feedback

26) Prototyping in design helps _____.
a) Convert abstract ideas into tangible models
b) Replace manufacturing
c) Finalize budgets
d) Avoid testing

27) Which prototype type is *cheapest* and fastest?
a) Low-fidelity b) High-fidelity
c) Final d) Medium

28) High-fidelity prototypes allow _____.
a) User interaction and realism
b) Concept only
c) Paper sketching
d) Cost saving only

29) The iterative approach focuses on _____.
a) Refining design through repeated feedback
b) Making single model
c) Reducing creativity
d) Avoiding testing

30) The first step in rapid prototyping is _____.
a) 3D CAD modeling b) Final assembly
c) Testing d) Polishing

31) Which tool is commonly used in rapid prototyping?
a) 3D printer b) Spreadsheet
c) CNC lathe d) Mind map

32) User testing is most crucial in which stage?
a) Prototype evaluation b) Ideation
c) Definition d) Empathize

33) A real-life application of creative design is _____.
a) Smart wearable devices b) Paper waste
c) Redundant designs d) Manual data entry

34) Brainstorming during prototype improvement helps _____.
a) Generate alternative solutions
b) Restrict ideas
c) Delay work
d) Stop iteration

35) Which of the following prototypes allows early visualization?
a) Sketch model b) CAD simulation
c) Clay model d) Flowchart

36) Customer-driven design ensures _____.
a) Meeting user needs b) Reducing quality
c) Ignoring testing d) Increasing cost

37) The final output of iterative design is _____.
a) Optimized product meeting specifications
b) Initial draft
c) Prototype sketch
d) Raw material

38) The goal of sustainable design is _____.
a) Minimize negative environmental impact
b) Increase short-term gain
c) Use non-renewable resources
d) Ignore life cycle

39) Which phase is crucial for sustainability decisions?
a) Design stage b) Disposal
c) Marketing d) Sales

40) Product life-cycle assessment includes _____.
a) Raw material to end-of-life impact
b) Only production cost
c) Marketing only
d) Storage cost

41) A product designed for durability supports _____.
a) Longevity principle b) Obsolescence
c) Short-term use d) High waste

42) Eco-friendly design considers _____.
a) Material selection and energy efficiency
b) Only packaging
c) Advertisement
d) Color

43) “Design for reuse” aims to _____.
a) Extend product life b) Destroy waste
c) Limit recycling d) Increase cost

44) Agile development in design allows _____.
a) Rapid response to change b) Strict stepwise control
c) No feedback d) Delayed iterations

45) Spiral model combines _____.
a) Prototyping and risk management
b) Linear and agile stages
c) Testing and marketing
d) Sales and production

46) The staged (waterfall) model is _____.
a) Sequential b) Iterative
c) Flexible d) Rapid

47) Case studies in sustainable design show _____.
a) Application of eco-friendly materials
b) Ignoring user needs
c) Over-production
d) Energy waste

48) The most important sustainability factor in manufacturing is _____.
a) Resource efficiency
b) Advertisement
c) Branding
d) Design color

49) Which practice promotes a circular economy?
a) Recycling and remanufacturing
b) Landfilling
c) Burning waste
d) Exporting scrap

50) Sustainable engineering mainly targets _____.
a) Balance between economy, society, and environment
b) Maximizing output only
c) Technological monopoly
d) Short-term gains

3) Which of the following tools is best suited for *organizing ideas?*
a) Mind map b) Pie chart
c) Spreadsheet d) Histogram

4) "Storytelling" in concept development helps designers _____.
a) Communicate user experiences effectively
b) Draw detailed schematics
c) Analyze budget
d) Fix prototypes

5) The last step of concept development is _____.
a) Visualization of ideas b) Brainstorming
c) TRIZ analysis d) Market feedback

6) Prototyping in design helps _____.
a) Convert abstract ideas into tangible models
b) Replace manufacturing
c) Finalize budgets
d) Avoid testing

7) Which prototype type is *cheapest* and fastest?
a) Low-fidelity b) High-fidelity
c) Final d) Medium

8) High-fidelity prototypes allow _____.
a) User interaction and realism
b) Concept only
c) Paper sketching
d) Cost saving only

9) The iterative approach focuses on _____.
a) Refining design through repeated feedback
b) Making single model
c) Reducing creativity
d) Avoiding testing

10) The first step in rapid prototyping is _____.
a) 3D CAD modeling b) Final assembly
c) Testing d) Polishing

11) Which tool is commonly used in rapid prototyping?
a) 3D printer b) Spreadsheet
c) CNC lathe d) Mind map

12) User testing is most crucial in which stage?
a) Prototype evaluation b) Ideation
c) Definition d) Empathize

13) A real-life application of creative design is _____.
a) Smart wearable devices b) Paper waste
c) Redundant designs d) Manual data entry

14) Brainstorming during prototype improvement helps _____.
a) Generate alternative solutions
b) Restrict ideas
c) Delay work
d) Stop iteration

15) Which of the following prototypes allows early visualization?
a) Sketch model b) CAD simulation
c) Clay model d) Flowchart

16) Customer-driven design ensures _____.
a) Meeting user needs b) Reducing quality
c) Ignoring testing d) Increasing cost

17) The final output of iterative design is _____.
a) Optimized product meeting specifications
b) Initial draft
c) Prototype sketch
d) Raw material

18) The goal of sustainable design is _____.
a) Minimize negative environmental impact
b) Increase short-term gain
c) Use non-renewable resources
d) Ignore life cycle

19) Which phase is crucial for sustainability decisions?
a) Design stage b) Disposal
c) Marketing d) Sales

20) Product life-cycle assessment includes _____.
a) Raw material to end-of-life impact
b) Only production cost
c) Marketing only
d) Storage cost

21) A product designed for durability supports _____.
a) Longevity principle b) Obsolescence
c) Short-term use d) High waste

22) Eco-friendly design considers _____.
a) Material selection and energy efficiency
b) Only packaging
c) Advertisement
d) Color

23) "Design for reuse" aims to _____.
a) Extend product life b) Destroy waste
c) Limit recycling d) Increase cost

24) Agile development in design allows _____.
a) Rapid response to change b) Strict stepwise control
c) No feedback d) Delayed iterations

25) Spiral model combines _____.
a) Prototyping and risk management
b) Linear and agile stages
c) Testing and marketing
d) Sales and production

26) The staged (waterfall) model is _____.
a) Sequential b) Iterative
c) Flexible d) Rapid

27) Case studies in sustainable design show _____.
a) Application of eco-friendly materials
b) Ignoring user needs
c) Over-production
d) Energy waste

28) The most important sustainability factor in manufacturing is _____.
a) Resource efficiency b) Advertisement
c) Branding d) Design color

29) Which practice promotes a circular economy?
a) Recycling and remanufacturing
b) Landfilling
c) Burning waste
d) Exporting scrap

30) Sustainable engineering mainly targets _____.
a) Balance between economy, society, and environment
b) Maximizing output only
c) Technological monopoly
d) Short-term gains

31) Innovation mainly focuses on _____.
a) Generating ideas only b) Implementing creative ideas
c) Copying others d) Marketing

32) Creativity and Innovation together lead to _____.
a) Routine performance b) Problem discovery
c) Practical novelty d) Mechanical repetition

33) A characteristic of a creative person is _____.
a) Rigidity b) Curiosity
c) Fearfulness d) Passivity

34) Which of the following represents a major *barrier* to creativity?
a) Time pressure b) Risk-taking
c) Playfulness d) Flexibility

35) The “Ideate” stage in design thinking focuses on _____.
a) Understanding users b) Generating solutions
c) Testing ideas d) Building prototypes

36) Design thinking is fundamentally _____.
a) User-centered b) Manager-centered
c) Engineer-centered d) Cost-centered

37) Which of these helps to *overcome* creative blocks?
a) Collaboration b) Fear of mistakes
c) Over-planning d) Isolation

38) A design thinker empathizes to _____.
a) Know customer feelings and needs
b) Find product cost
c) Estimate profit
d) Collect market data

39) The *Define* phase results in _____.
a) Problem statement b) Prototype
c) Survey d) Marketing plan

40) Barriers to creativity can be removed through _____.
a) Open communication b) Discouragement
c) Repetition d) Judgmental thinking

41) The last phase of design thinking is _____.
a) Prototype b) Test
c) Ideate d) Define

42) Which term best describes the ability to see connections between unrelated ideas?
a) Fluency b) Flexibility
c) Originality d) Association

43) One of the benefits of design thinking is _____.
a) Focusing on user-friendly solutions
b) Ignoring customers
c) Cost reduction only
d) Quick fixes

44) Divergent and convergent thinking together ensure _____.
a) Balance between idea generation and selection
b) Faster production
c) Market analysis
d) Less creativity

45) In brainstorming, criticism should be ____.
a) Encouraged b) Postponed
c) Ignored d) Repeated

46) SCAMPER is mainly used for _____.
a) Modifying existing ideas b) Market study
c) Testing materials d) Estimating cost

47) In mind mapping, central themes are _____.
a) Placed at center with branches outward
b) At the edges
c) Hidden
d) Random

48) TRIZ encourages _____.

a) Systematic innovation through contradictions
b) Copying existing patents
c) Brainstorm blocking
d) Linear analysis

49) Which is a creative ideation technique?

a) Storyboarding
b) Checklist creation
c) Prototype testing
d) Quality audit

50) Concept sketching helps _____.

a) Express ideas visually
b) Replace written reports
c) Perform tests
d) Manage finance

c) Over-planning d) Isolation

18) A design thinker empathizes to _____.
a) Know customer feelings and needs
b) Find product cost
c) Estimate profit
d) Collect market data

19) The *Define* phase results in _____.
a) Problem statement b) Prototype
c) Survey d) Marketing plan

20) Barriers to creativity can be removed through _____.
a) Open communication b) Discouragement
c) Repetition d) Judgmental thinking

21) The last phase of design thinking is _____.
a) Prototype b) Test
c) Ideate d) Define

22) Which term best describes the ability to see connections between unrelated ideas?
a) Fluency b) Flexibility
c) Originality d) Association

23) One of the benefits of design thinking is _____.
a) Focusing on user-friendly solutions
b) Ignoring customers
c) Cost reduction only
d) Quick fixes

24) Divergent and convergent thinking together ensure _____.
a) Balance between idea generation and selection
b) Faster production
c) Market analysis
d) Less creativity

25) In brainstorming, criticism should be ____.
a) Encouraged b) Postponed
c) Ignored d) Repeated

26) SCAMPER is mainly used for _____.
a) Modifying existing ideas b) Market study
c) Testing materials d) Estimating cost

27) In mind mapping, central themes are _____.
a) Placed at center with branches outward
b) At the edges
c) Hidden
d) Random

28) TRIZ encourages _____.
a) Systematic innovation through contradictions
b) Copying existing patents
c) Brainstorm blocking
d) Linear analysis

29) Which is a creative ideation technique?
a) Storyboarding b) Checklist creation
c) Prototype testing d) Quality audit

30) Concept sketching helps _____.
a) Express ideas visually b) Replace written reports
c) Perform tests d) Manage finance

31) In SCAMPER, "C" stands for _____.
a) Combine b) Copy
c) Create d) Classify

32) The purpose of divergent thinking is to _____.
a) Explore many possibilities b) Select one answer
c) Limit imagination d) Finalize design

33) Which of the following tools is best suited for *organizing ideas?*
a) Mind map b) Pie chart
c) Spreadsheet d) Histogram

34) "Storytelling" in concept development helps designers _____.
a) Communicate user experiences effectively
b) Draw detailed schematics
c) Analyze budget
d) Fix prototypes

35) The last step of concept development is _____.
a) Visualization of ideas b) Brainstorming
c) TRIZ analysis d) Market feedback

36) Prototyping in design helps _____.
a) Convert abstract ideas into tangible models
b) Replace manufacturing
c) Finalize budgets
d) Avoid testing

37) Which prototype type is *cheapest* and fastest?
a) Low-fidelity b) High-fidelity
c) Final d) Medium

38) High-fidelity prototypes allow _____.
a) User interaction and realism
b) Concept only
c) Paper sketching
d) Cost saving only

39) The iterative approach focuses on _____.
a) Refining design through repeated feedback
b) Making single model
c) Reducing creativity
d) Avoiding testing

40) The first step in rapid prototyping is _____.
a) 3D CAD modeling b) Final assembly
c) Testing d) Polishing

41) Which tool is commonly used in rapid prototyping?
a) 3D printer b) Spreadsheet
c) CNC lathe d) Mind map

42) User testing is most crucial in which stage?
a) Prototype evaluation b) Ideation
c) Definition d) Empathize

a) Smart wearable devices b) Paper waste
c) Redundant designs d) Manual data entry

44) Brainstorming during prototype improvement helps _____.
a) Generate alternative solutions
b) Restrict ideas
c) Delay work
d) Stop iteration

45) Which of the following prototypes allows early visualization?
a) Sketch model b) CAD simulation
c) Clay model d) Flowchart

46) Customer-driven design ensures _____.
a) Meeting user needs b) Reducing quality
c) Ignoring testing d) Increasing cost

47) The final output of iterative design is _____.
a) Optimized product meeting specifications
b) Initial draft
c) Prototype sketch
d) Raw material

48) The goal of sustainable design is _____.

a) Minimize negative environmental impact
b) Increase short-term gain
c) Use non-renewable resources
d) Ignore life cycle

49) Which phase is crucial for sustainability decisions?

a) Design stage b) Disposal
c) Marketing d) Sales

50) Product life-cycle assessment includes _____.

a) Raw material to end-of-life impact
b) Only production cost
c) Marketing only
d) Storage cost

b) Concept only
c) Paper sketching
d) Cost saving only

19) The iterative approach focuses on _____.
a) Refining design through repeated feedback
b) Making single model
c) Reducing creativity
d) Avoiding testing

20) The first step in rapid prototyping is _____.
a) 3D CAD modeling b) Final assembly
c) Testing d) Polishing

21) Which tool is commonly used in rapid prototyping?
a) 3D printer b) Spreadsheet
c) CNC lathe d) Mind map

22) User testing is most crucial in which stage?
a) Prototype evaluation b) Ideation
c) Definition d) Empathize

23) A real-life application of creative design is _____.
a) Smart wearable devices b) Paper waste
c) Redundant designs d) Manual data entry

24) Brainstorming during prototype improvement helps _____.
a) Generate alternative solutions
b) Restrict ideas
c) Delay work
d) Stop iteration

25) Which of the following prototypes allows early visualization?
a) Sketch model b) CAD simulation
c) Clay model d) Flowchart

26) Customer-driven design ensures _____.
a) Meeting user needs b) Reducing quality
c) Ignoring testing d) Increasing cost

27) The final output of iterative design is _____.
a) Optimized product meeting specifications
b) Initial draft
c) Prototype sketch
d) Raw material

28) The goal of sustainable design is _____.
a) Minimize negative environmental impact
b) Increase short-term gain
c) Use non-renewable resources
d) Ignore life cycle

29) Which phase is crucial for sustainability decisions?
a) Design stage b) Disposal
c) Marketing d) Sales

30) Product life-cycle assessment includes _____.
a) Raw material to end-of-life impact
b) Only production cost
c) Marketing only
d) Storage cost

31) A product designed for durability supports _____.
a) Longevity principle b) Obsolescence
c) Short-term use d) High waste

32) Eco-friendly design considers _____.
a) Material selection and energy efficiency
b) Only packaging
c) Advertisement
d) Color

33) “Design for reuse” aims to _____.
a) Extend product life b) Destroy waste
c) Limit recycling d) Increase cost

34) Agile development in design allows _____.
a) Rapid response to change b) Strict stepwise control
c) No feedback d) Delayed iterations

35) Spiral model combines _____.
a) Prototyping and risk management
b) Linear and agile stages
c) Testing and marketing
d) Sales and production

36) The staged (waterfall) model is _____.
a) Sequential b) Iterative
c) Flexible d) Rapid

37) Case studies in sustainable design show _____.
a) Application of eco-friendly materials
b) Ignoring user needs
c) Over-production
d) Energy waste

38) The most important sustainability factor in manufacturing is _____.
a) Resource efficiency b) Advertisement
c) Branding d) Design color

39) Which practice promotes a circular economy?
a) Recycling and remanufacturing
b) Landfilling
c) Burning waste
d) Exporting scrap

40) Sustainable engineering mainly targets _____.
a) Balance between economy, society, and environment
b) Maximizing output only
c) Technological monopoly
d) Short-term gains

41) Innovation mainly focuses on _____.
a) Generating ideas only b) Implementing creative ideas
c) Copying others d) Marketing

42) Creativity and Innovation together lead to _____.
a) Routine performance b) Problem discovery
c) Practical novelty d) Mechanical repetition

43) A characteristic of a creative person is _____.
a) Rigidity b) Curiosity
c) Fearfulness d) Passivity

44) Which of the following represents a major *barrier* to creativity?
a) Time pressure b) Risk-taking
c) Playfulness d) Flexibility

45) The “Ideate” stage in design thinking focuses on _____.
a) Understanding users b) Generating solutions
c) Testing ideas d) Building prototypes

46) Design thinking is fundamentally _____.
a) User-centered b) Manager-centered
c) Engineer-centered d) Cost-centered

47) Which of these helps to *overcome* creative blocks?
a) Collaboration b) Fear of mistakes
c) Over-planning d) Isolation

48) A design thinker empathizes to _____.

a) Know customer feelings and needs
b) Find product cost
c) Estimate profit
d) Collect market data

49) The *Define* phase results in _____.

a) Problem statement
b) Prototype
c) Survey
d) Marketing plan

50) Barriers to creativity can be removed through _____.

a) Open communication
b) Discouragement
c) Repetition
d) Judgmental thinking

T.Y. (B.Tech.) (Electronics & Telecommunication Engineering) (Semester - I) (New) (CBCS) Examination: March/April - 2026
Honors in Artificial Intelligence and Machine Learning
Machine Learning (ENTHON-03A)

Day & Date: Thursday, 14-05-2026 Max. Marks: 70
Time: 10:00 AM To 01:00 PM

Instructions: 1) Q. No. 1 is compulsory. It should be solved in the first 30 minutes in Answer Book Page no 03 (Starting page of the Answer Book). Each question carries one mark.
2) Don't forget to Mention question paper set (P/Q/R/S) on top of page.
3) Figures to the right indicates full marks.

MCQ/Objective Type Questions

Duration: 30 Minutes Marks:14

Q.1 Choose the correct alternatives from the options. **14**

1) How can you handle missing or corrupted data in a dataset?
a) Drop missing rows or columns
b) Assign a unique category to missing values
c) Replace missing values with mean/median/mode
d) All of the above

2) What is machine learning?
a) Selective acquisition of knowledge through the use of manual programs
b) Selective acquisition of knowledge through the use of computer programs
c) Autonomous acquisition of knowledge through the use of manual programs
d) Autonomous acquisition of knowledge through the use of computer programs

3) Machine learning algorithms build a model based on sample data, known as _____.
a) Training Data b) Transfer Data
c) Data Training d) None of the above

4) _____ is the machine learning algorithms that can be used with labeled data.
a) Regression algorithms b) Clustering algorithms
c) Association algorithms d) All of the above

5) _____ is used as an input to the machine learning model for training and prediction purposes.
a) Feature
b) Feature Vector
c) Both a and b
d) None of the above

6) _____ is the scenario when the model fails to decipher the underlying trend in the input data.
a) Overfitting
b) Underfitting
c) Both a and b
d) None of the above

7) The term machine learning was coined by _____.
a) James Gosling
b) Arthur Samuel
c) Guido van Rossum
d) None of the above

8) Which of the following is not a supervised learning?
a) PCA
b) Naive Bayesian
c) Linear Regression
d) Decision Tree

9) The most common issue when using ML is _____.
a) Lack of skilled resources
b) Inadequate Infrastructure
c) Poor Data Quality
d) None of these

10) _____ is a widely used and effective machine learning algorithm based on the idea of bagging.
a) Regression
b) Classification
c) Decision Tree
d) Random Forest

11) Real-Time decisions, Game Al, Learning Tasks, Skill acquisition, and Robot Navigation are applications of _____.
a) Reinforcement Learning
b) Supervised Learning: Classification
c) Unsupervised Learning: Regression
d) None of the above

12) _____ is a disadvantage of decision trees.
a) Decision trees are robust to outliers
b) Decision trees are prone to be overfit
c) Both a and b
d) None of the above

13) _____ is a part of machine learning that works with neural networks.
a) Artificial intelligence
b) Deep learning
c) Both a and b
d) None of the above

14) Which machine learning models are trained to make a series of decisions based on the rewards and feedback they receive for their actions?
a) Supervised learning
b) Unsupervised learning
c) Reinforcement learning
d) All of the above

Instructions: 1) All questions are compulsory.
2) Figures to the right indicate full marks.

SECTION – I

Q.2 Attempt Any Four Questions. **16**

a) Explain data processing steps for ML in brief.

b) Explain Binary Classification with examples.

c) Explain concept of perceptron with neat diagram.

d) Explain Supervised type of learning with examples.

e) Explain the type of regression. Illustrate K means clustering algorithm with an example.

Q.3 Attempt Any Two Questions. **12**

a) Distinguish between supervised learning and Reinforcement learning. Illustrate with an example.

b) Compare Classification with regression with an example.

c) Explain overfitting and underfitting. How it can affect model generalization.

SECTION – II

Q.4 Attempt Any Four Questions. **16**

a) Explain Feed Forward Network & Back Propagation Algorithm.

b) Explain naive bayes classification in brief.

c) Explain the terms: Gini Index.

d) Describe the random forest algorithm in brief.

e) What is ANN? Explain different types of ANN.

Q.5 Attempt Any Two Questions. **12**

a) Explain Self driving cars as Machine Learning application in brief.

b) Discuss decision tree algorithm with example. Mention its advantages and disadvantages.

c) Differentiate between Deep learning vs Machine Learning.

4) Assume suitable data wherever necessary and mention it clearly.

MCQ/Objective Type Questions

Duration: 30 Minutes Marks:14

Q.1 Choose the correct Answer. **14**

1) Which coordinate system is most suitable for analyzing points in a sphere?
a) Cartesian b) Cylindrical
c) Polar d) Spherical

2) The differential volume dv in a cylindrical coordinate system is?
a) $dxdydz$ b) $\rho d\rho d\phi dz$
c) $\rho^2 d\rho d\phi dz$ d) $d\rho d\phi dz$

3) $\bar{a}_r . \bar{a}_\Phi =$
a) 1 b) zero
c) $\bar{a}_\theta$ d) None

4) Which of the following is false for Coulomb's Law, where Q1 and Q2 - point charges?
a) Force is proportional to Q1.Q2
b) Force is inversely proportional to square of distance between Q1 and Q2
c) Direction is along the direction of line joining point charges Q1 and Q2
d) Depends on permeability of the media

5) The Coulomb constant $\left(\frac{1}{4\pi\varepsilon}\right) =$ _____.
a) 9×10^{-9} b) 9×10^{-8}
c) 9×10^{9} d) 9×10^{8}

6) According to Gauss's law, the electric flux through a closed surface is _____.
a) Directly proportional to the charge enclosed
b) Independent of the charge enclosed
c) Dependent on the shape of the surface
d) Equal to the charge outside the surface

7) Inside a good conductor, the electric field (E) is _____.
a) Infinite
b) Maximum
c) Zero
d) Dependent on voltage

8) The term (dD/dt) in the Maxwell law represents _____.
a) Conduction current
b) Magnetization current
c) Displacement current
d) Convection current

9) Maxwell's equation $\nabla \times \vec{E} = -\frac{\partial \vec{B}}{\partial t}$ is based on _____.
a) Faraday's law of induction
b) Ampere's Law
c) Gauss's Law
d) Ohm's Law

10) In free space (vacuum) for EM wave equation, which of the following is true?
a) $\rho = 0, \vec{J} = 0$
b) $\rho = \epsilon_0, \vec{J} = 0$
c) $\rho = 0, \vec{J} = \mu_0$
d) $\rho = \rho_0, \vec{J} = \vec{J}_0$

11) What is the time-harmonic form of Maxwell's Equation $\left(\nabla \times E = -\frac{\partial B}{\partial t}\right)$?
a) $\nabla \times E = \omega B$
b) $\nabla \times E = -j\omega B$
c) $\nabla \times E = j\omega B$
d) $\nabla \times E = B/j\omega$

12) For a Transmission line with characteristic impedance $Z_0 = 100\Omega$ and a load impedance is $Z_L = 300 + j300\Omega$ the normalized load impedance is _____.
a) $1 + j1$
b) $2 + j2$
c) $3 + j1$
d) $3 + j3$

13) What is the characteristic impedance (Z_0) of a lossless transmission line?
a) $\sqrt{L/C}$
b) $\sqrt{C/L}$
c) $1/\sqrt{LC}$
d) $\sqrt{R/G}$

14) For a lossless line, what are the conditions for the primary constants?
a) $R = 0, G = 0$
b) $R = 0, L = 0$
c) $G = 0, C = 0$
d) $G = 0, L = 0$

Time: 10:00 AM To 01:00 PM

Instructions: 1) All questions are compulsory.
2) Figures to the right indicate full marks.
3) Assume suitable data wherever necessary and mention it clearly.

Section – I

Q.2 Attempt the Any Four. **16**

a) Find a force on charge Q1 $= 3\mu$C due to charge Q2 $= 30\ \mu$C, where Q1 is at point (0,2,1) and Q2 at (2,1,0).

b) Transform the vector $\bar{a}_x$ to Cylindrical Coordinate system at a point (ρ =4, Φ=120°, z=2).

c) Explain Cylindrical Coordinate system in detail with suitable diagram.

d) By using Gauss's law, explain point to point electric field intensity for single spherical shell carrying charge Q with radius R meters.

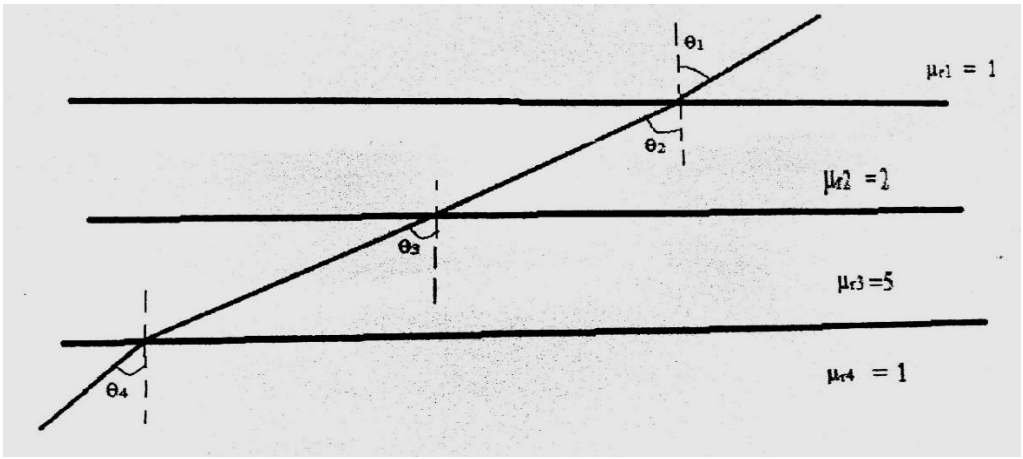
e) Prove $\bar{E} = -\bar{W}$

Q.3 Attempt Any Two. **12**

a) Derive the expression for electric dipole.

b) State and derive for Biot Savart's Law.

c) Two Infinite slabs of magnetic materials are located in a free space. Let unit vector $\hat{a}_z$ is directed upwards. If region 1 is represented by $H = \hat{a}_x - 2\hat{a}_y + 3\hat{a}_z$ KA/m. Determine angle between H and $\hat{a}_z$ in region $1, 2, 3, 4$ as shown in Figure below with permeability's $\mu_{r1} = 1, \mu_{r2} = 2, \mu_{r3} = 5$ and $\mu_{r4} = 1$ respectively.



Section – II

Q.4 Attempt Any Four. **16**

a) Give the Maxwell's Equation of static field.

b) Explain Harmonically Varying Field.

c) State and explain Maxwell's equations in point and Integral form.

d) Explain Transmission line equation with suitable diagram.

e) Derive Continuity equation.

Q.5 Attempt Any Two. **12**

a) State and Explain Poynting theorem with suitable diagram.

b) A lossless transmission line with characteristics impedance 300 Ω is terminated in a load 300 + j 300 Ω. Using Smith chart, find the

i) VSWR
ii) Magnitude and angle of reflection coefficient at the load
iii) Load admittance
iv) Reflection coefficient at distance of $\lambda/4$ from load.

c) Derive EM wave equation.

Q.1 Choose the correct Answer. **14**

1) The term (dD/dt) in the Maxwell law represents _____.
a) Conduction current b) Magnetization current
c) Displacement current d) Convection current

2) Maxwell's equation $\nabla \times \vec{E} = -\frac{\partial \vec{B}}{\partial t}$ is based on _____.
a) Faraday's law of induction b) Ampere's Law
c) Gauss's Law d) Ohm's Law

3) In free space (vacuum) for EM wave equation, which of the following is true?
a) $\rho = 0, \vec{J} = 0$ b) $\rho = \epsilon_0, \vec{J} = 0$
c) $\rho = 0, \vec{J} = \mu_0$ d) $\rho = \rho_0, \vec{J} = \vec{J}_0$

4) What is the time-harmonic form of Maxwell's Equation $\left(\nabla \times E = -\frac{\partial B}{\partial t}\right)$?
a) $\nabla \times E = \omega B$ b) $\nabla \times E = -j\omega B$
c) $\nabla \times E = j\omega B$ d) $\nabla \times E = B/j\omega$

5) For a Transmission line with characteristic impedance $Z_0 = 100\Omega$ and a load impedance is $Z_L = 300 + j300\Omega$ the normalized load impedance is _____.
a) $1 + j1$ b) $2 + j2$
c) $3 + j1$ d) $3 + j3$

6) What is the characteristic impedance (Z_0) of a lossless transmission line?
a) $\sqrt{L/C}$ b) $\sqrt{C/L}$
c) $1/\sqrt{LC}$ d) $\sqrt{R/G}$

7) For a lossless line, what are the conditions for the primary constants?

a) $R = 0, G = 0$ b) $R = 0, L = 0$

c) $G = 0, C = 0$ d) $G = 0, L = 0$

8) Which coordinate system is most suitable for analyzing points in a sphere?

a) Cartesian b) Cylindrical

c) Polar d) Spherical

9) The differential volume dv in a cylindrical coordinate system is?

a) $dxdydz$ b) $\rho d\rho d\phi dz$

c) $\rho^2 d\rho d\phi dz$ d) $d\rho d\phi dz$

10) $\bar{a}_r . \bar{a}_\Phi =$

a) 1 b) zero

c) $\bar{a}_\theta$ d) None

11) Which of the following is false for Coulomb's Law, where Q1 and Q2 - point charges?

a) Force is proportional to Q1.Q2

b) Force is inversely proportional to square of distance between Q1 and Q2

c) Direction is along the direction of line joining point charges Q1 and Q2

d) Depends on permeability of the media

12) The Coulomb constant $\left(\frac{1}{4\pi\varepsilon}\right) =$ _____.

a) 9×10^{-9} b) 9×10^{-8}

c) 9×10^{9} d) 9×10^{8}

13) According to Gauss's law, the electric flux through a closed surface is _____.

a) Directly proportional to the charge enclosed

b) Independent of the charge enclosed

c) Dependent on the shape of the surface

d) Equal to the charge outside the surface

14) Inside a good conductor, the electric field (E) is _____.

a) Infinite b) Maximum

c) Zero d) Dependent on voltage

Set **Q**

T.Y. (B.Tech.) (Electronics & Telecommunication Engineering) (Semester - I) (New/Old) (CBCS) Examination: March/April – 2026
Electromagnetic Field Theory (BTN06501)

Day & Date: Saturday, 02-05-2026 Max. Marks: 56
Time: 10:00 AM To 01:00 PM

Instructions: 1) All questions are compulsory.
2) Figures to the right indicate full marks.
3) Assume suitable data wherever necessary and mention it clearly.

Section – I

Q.2 Attempt the Any Four. **16**

a) Find a force on charge Q1 $= 3\mu$C due to charge Q2 $= 30\ \mu$C, where Q1 is at point (0,2,1) and Q2 at (2,1,0).

b) Transform the vector $\bar{a}_x$ to Cylindrical Coordinate system at a point (ρ =4, Φ=120°, z=2).

c) Explain Cylindrical Coordinate system in detail with suitable diagram.

d) By using Gauss's law, explain point to point electric field intensity for single spherical shell carrying charge Q with radius R meters.

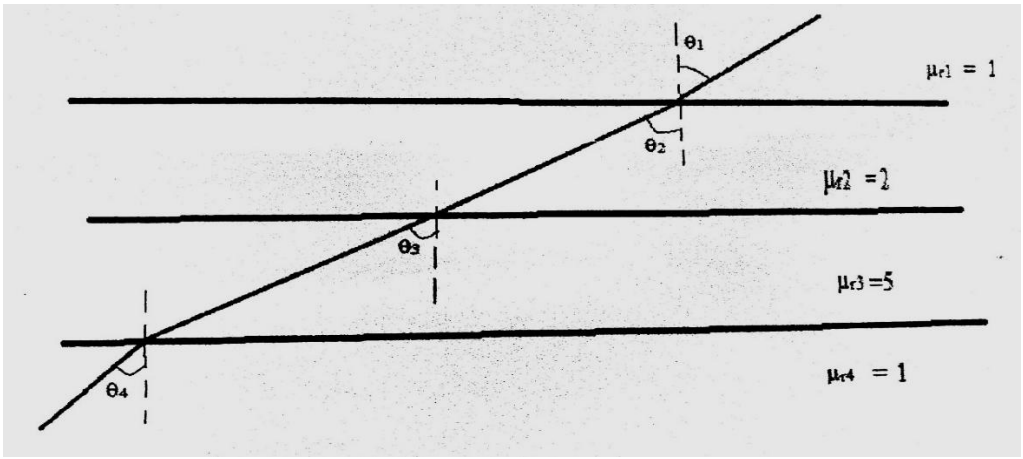
e) Prove $\bar{E} = -\bar{W}$

Q.3 Attempt Any Two. **12**

a) Derive the expression for electric dipole.

b) State and derive for Biot Savart's Law.

c) Two Infinite slabs of magnetic materials are located in a free space. Let unit vector $\hat{a}_z$ is directed upwards. If region 1 is represented by $H = \hat{a}_x - 2\hat{a}_y + 3\hat{a}_z$ KA/m. Determine angle between H and $\hat{a}_z$ in region $1, 2, 3, 4$ as shown in Figure below with permeability's $\mu_{r1} = 1, \mu_{r2} = 2, \mu_{r3} = 5$ and $\mu_{r4} = 1$ respectively.



Section – II

Q.4 Attempt Any Four. **16**

a) Give the Maxwell's Equation of static field.

b) Explain Harmonically Varying Field.

c) State and explain Maxwell's equations in point and Integral form.

d) Explain Transmission line equation with suitable diagram.

e) Derive Continuity equation.

Q.5 Attempt Any Two. **12**

a) State and Explain Poynting theorem with suitable diagram.

b) A lossless transmission line with characteristics impedance 300 Ω is terminated in a load 300 + j 300 Ω. Using Smith chart, find the

i) VSWR
ii) Magnitude and angle of reflection coefficient at the load
iii) Load admittance
iv) Reflection coefficient at distance of $\lambda/4$ from load.

c) Derive EM wave equation.

T.Y. (B.Tech.) (Electronics & Telecommunication Engineering) (Semester - I) (New/Old) (CBCS) Examination: March/April – 2026 Electromagnetic Field Theory (BTN06501)

Day & Date: Saturday, 02-05-2026 Max. Marks: 70
Time: 10:00 AM To 01:00 PM

Instructions: 1) Q. No. 1 is compulsory. It should be solved in the first 30 minutes in Answer Book Page no 03 (Starting page of the Answer Book). Each question carries one mark.
2) Don't forget to Mention question paper set (P/Q/R/S) on top of page.
3) Figures to the right indicates full marks.
4) Assume suitable data wherever necessary and mention it clearly.

MCQ/Objective Type Questions

Duration: 30 Minutes Marks:14

Q.1 Choose the correct Answer. 14

1) What is the time-harmonic form of Maxwell's Equation $\left(\nabla \times E = -\frac{\partial B}{\partial t}\right)$?

a) $\nabla \times E = \omega B$ b) $\nabla \times E = -j\omega B$
c) $\nabla \times E = j\omega B$ d) $\nabla \times E = B/j\omega$

2) For a Transmission line with characteristic impedance $Z_0 = 100\Omega$ and a load impedance is $Z_L = 300 + j300\Omega$ the normalized load impedance is _____.

a) $1 + j1$ b) $2 + j2$
c) $3 + j1$ d) $3 + j3$

3) What is the characteristic impedance (Z_0) of a lossless transmission line?

a) $\sqrt{L/C}$ b) $\sqrt{C/L}$
c) $1/\sqrt{LC}$ d) $\sqrt{R/G}$

4) For a lossless line, what are the conditions for the primary constants?

a) $R = 0, G = 0$ b) $R = 0, L = 0$
c) $G = 0, C = 0$ d) $G = 0, L = 0$

5) Which coordinate system is most suitable for analyzing points in a sphere?

a) Cartesian b) Cylindrical
c) Polar d) Spherical

6) The differential volume dv in a cylindrical coordinate system is?

a) $dxdydz$ b) $\rho d\rho d\phi dz$
c) $\rho^2 d\rho d\phi dz$ d) $d\rho d\phi dz$

7) $\bar{a}_r . \bar{a}_\Phi =$

a) 1 b) zero

c) $\bar{a}_\theta$ d) None

8) Which of the following is false for Coulomb's Law, where Q1 and Q2 - point charges?

a) Force is proportional to Q1.Q2

b) Force is inversely proportional to square of distance between Q1 and Q2

c) Direction is along the direction of line joining point charges Q1 and Q2

d) Depends on permeability of the media

9) The Coulomb constant $\left(\frac{1}{4\pi\varepsilon}\right) =$ _____.

a) 9×10^{-9} b) 9×10^{-8}

c) 9×10^{9} d) 9×10^{8}

10) According to Gauss's law, the electric flux through a closed surface is _____.

a) Directly proportional to the charge enclosed

b) Independent of the charge enclosed

c) Dependent on the shape of the surface

d) Equal to the charge outside the surface

11) Inside a good conductor, the electric field (E) is _____.

a) Infinite b) Maximum

c) Zero d) Dependent on voltage

12) The term (dD/dt) in the Maxwell law represents _____.

a) Conduction current b) Magnetization current

c) Displacement current d) Convection current

13) Maxwell's equation $\nabla \times \vec{E} = -\frac{\partial \vec{B}}{\partial t}$ is based on _____.

a) Faraday's law of induction b) Ampere's Law

c) Gauss's Law d) Ohm's Law

14) In free space (vacuum) for EM wave equation, which of the following is true?

a) $\rho = 0, \vec{J} = 0$ b) $\rho = \epsilon_0, \vec{J} = 0$

c) $\rho = 0, \vec{J} = \mu_0$ d) $\rho = \rho_0, \vec{J} = \vec{J}_0$

MCQ/Objective Type Questions

Duration: 30 Minutes Marks:14

Q.1 Choose the correct alternative from the options. 14

1) The internal RAM memory of the 8051 is _____.
a) 4 Kbytes b) 6 Kbytes
c) 128 bytes d) 256 bytes

2) This program code will be executed continuously _____.
```
LOOP: MOV A,#03h
      DEC A
      JNZ LOOP
```
a) TRUE b) FALSE
c) gives error d) loop execute 3 times

3) After reset the stack pointer in microcontroller 8051 is initialized to _____.
a) 70 H b) FF H
c) 00 H d) 07 H

4) Vector address of timer /counter 1 interrupt is _____ h.
a) 0003 b) 0013
c) 000B d) 001B

5) Program status word register of 8051 is _____.
a) Only bit addressable
b) Only byte addressable
c) Bit addressable as well as byte addressable
d) None of these

6) What is the address range of Register bank 0 in 8051?
a) 00h-07h b) 00h-FFh
c) 80h-7Fh d) 80h-FFh

7) Which of the following instructions will load the value 25H into the lower byte of Timer0?

a) MOV TL0,#25h
b) MOV TL0,25h
c) MOV T0,#25h
d) MOV T0,25h

8) The contents of the accumulator after this operation
MOV A,#0CH
ANL A,#0CH
will be _____.

a) 00001100
b) 00001101
c) 11111111
d) 11000000

9) PIC 16F877A is a _____ bit microcontroller.

a) 8
b) 4
c) 32
d) 64

10) Which flags are more likely to get affected in status registers by Arithmetic and Logical Unit (ALU) of PIC 16 FXXX on the basis of instructions execution?

a) Carry (C) Flags
b) Zero (Z) Flags
c) Digit Carry (DC) Flags
d) All of the above

11) Which status bits exhibit carry from lower 4 bits during 8-bit addition and are especially beneficial for BCD addition?

a) Carry bit
b) Digits Carry bit (DC)
c) Both a & b
d) none of these

12) FLASH program memory, Data Memory (RAM) and Data Memory (EEPROM) for PIC 16F877 are _____.

a) 8K × 8, 368 × 8, 256 × 8
b) 14K × 8, 14 K × 8, 256 × 8
c) 8K × 14, 368 × 16, 256 x 8
d) 8K × 14, 368 × 8, 256 × 8

13) Which command enables the PIC to enter into the power down mode during the operation of watchdog timer (WDT)?

a) SLEEP
b) RESET
c) STATUS
d) CLR

14) Where is the result stored after an execution of increment and decrement operations over the special - purpose registers in PIC?

a) File Register
b) Working Register
c) Both a & b
d) None of the above

Microcontrollers and Applications (BTN06502)

Day & Date: Tuesday, 05-05-2026 Max. Marks: 56
Time: 10:00 AM To 01:00 PM

Instructions: 1) All questions are compulsory.
2) Figures to the right indicate full marks.
3) Assume suitable data wherever necessary.

SECTION – I

Q.2 Attempt Any Four questions. **16**

a) State functional difference between Microprocessor & Microcontroller.

b) Explain different Addressing modes with example in 8051.

c) Write ALP for delay 200ms; Use Timer 0 in Mode 1.

d) Explain different features of 8051.

e) Explain the multifunction facility of port-3 in 8051.

Q.3 Attempt Any Two questions. **12**

a) Draw and explain the External Memory Interfacing with 8051. Attach 8KB RAM externally. Also find the starting and end address.

b) Write a Program to interface the 3×3 matrix keypad as input and 7-segment display as output with 8051.

c) Write a short note on:
i) TMOD
ii) SCON
iii) SBUF

SECTION – II

Q.4 Attempt Any Four questions. **16**

a) Explain following instructions
- i) SWAF
- ii) RRF
- iii) INCFSZ
- iv) BTFSC

b) Compare features of 8051 and PIC16F877.

c) Explain STATUS register of 16F877.

d) Brief about the SFRs associated with Timers in PIC 16F877

e) Write a short note on:
- i) BOR
- ii) WDT in PIC 16F877.

Q.5 Attempt Any Two questions. **12**

a) Explain in detail
- i) PORTS
- ii) PCON
- iii) OPTION_REG in PIC 16F877

b) Explain A/D conversion in PIC 16F877 with logical diagram.

c) Explain the USART modules in PIC 16F877.

MCQ/Objective Type Questions

Duration: 30 Minutes Marks:14

Q.1 Choose the correct alternative from the options. **14**

1) The contents of the accumulator after this operation
MOV A,#0CH
ANL A,#0CH
will be _____.
a) 00001100 b) 00001101
c) 11111111 d) 11000000

2) PIC 16F877A is a _____ bit microcontroller.
a) 8 b) 4
c) 32 d) 64

3) Which flags are more likely to get affected in status registers by Arithmetic and Logical Unit (ALU) of PIC 16 FXXX on the basis of instructions execution?
a) Carry (C) Flags b) Zero (Z) Flags
c) Digit Carry (DC) Flags d) All of the above

4) Which status bits exhibit carry from lower 4 bits during 8-bit addition and are especially beneficial for BCD addition?
a) Carry bit b) Digits Carry bit (DC)
c) Both a & b d) none of these

5) FLASH program memory, Data Memory (RAM) and Data Memory (EEPROM) for PIC 16F877 are _____.
a) 8K × 8, 368 × 8, 256 × 8 b) 14K × 8, 14 K × 8, 256 × 8
c) 8K × 14, 368 × 16, 256 x 8 d) 8K × 14, 368 × 8, 256 × 8

6) Which command enables the PIC to enter into the power down mode during the operation of watchdog timer (WDT)?
a) SLEEP b) RESET
c) STATUS d) CLR

7) Where is the result stored after an execution of increment and decrement operations over the special - purpose registers in PIC?

a) File Register
b) Working Register
c) Both a & b
d) None of the above

8) The internal RAM memory of the 8051 is _____.

a) 4 Kbytes
b) 6 Kbytes
c) 128 bytes
d) 256 bytes

9) This program code will be executed continuously _____.

```
LOOP: MOV A,#03h
      DEC A
      JNZ LOOP
```

a) TRUE
b) FALSE
c) gives error
d) loop execute 3 times

10) After reset the stack pointer in microcontroller 8051 is initialized to _____.

a) 70 H
b) FF H
c) 00 H
d) 07 H

11) Vector address of timer /counter 1 interrupt is _____ h.

a) 0003
b) 0013
c) 000B
d) 001B

12) Program status word register of 8051 is _____.

a) Only bit addressable
b) Only byte addressable
c) Bit addressable as well as byte addressable
d) None of these

13) What is the address range of Register bank 0 in 8051?

a) 00h-07h
b) 00h-FFh
c) 80h-7Fh
d) 80h-FFh

14) Which of the following instructions will load the value 25H into the lower byte of Timer0?

a) MOV TL0,#25h
b) MOV TL0,25h
c) MOV T0,#25h
d) MOV T0,25h

Seat No.	

Set **Q**

T.Y. (B.Tech.) (Electronics & Telecommunication Engineering) (Sem - I) (New/Old) (CBCS) Examination: March/April – 2026
Microcontrollers and Applications (BTN06502)

Day & Date: Tuesday, 05-05-2026 Max. Marks: 56
Time: 10:00 AM To 01:00 PM

Instructions: 1) All questions are compulsory.
2) Figures to the right indicate full marks.
3) Assume suitable data wherever necessary.

SECTION – I

Q.2 Attempt Any Four questions. **16**

a) State functional difference between Microprocessor & Microcontroller.

b) Explain different Addressing modes with example in 8051.

c) Write ALP for delay 200ms; Use Timer 0 in Mode 1.

d) Explain different features of 8051.

e) Explain the multifunction facility of port-3 in 8051.

Q.3 Attempt Any Two questions. **12**

a) Draw and explain the External Memory Interfacing with 8051. Attach 8KB RAM externally. Also find the starting and end address.

b) Write a Program to interface the 3×3 matrix keypad as input and 7-segment display as output with 8051.

c) Write a short note on:
i) TMOD
ii) SCON
iii) SBUF

SECTION – II

Q.4 Attempt Any Four questions. **16**

a) Explain following instructions
- i) SWAF
- ii) RRF
- iii) INCFSZ
- iv) BTFSC

b) Compare features of 8051 and PIC16F877.

c) Explain STATUS register of 16F877.

d) Brief about the SFRs associated with Timers in PIC 16F877

e) Write a short note on:
- i) BOR
- ii) WDT in PIC 16F877.

Q.5 Attempt Any Two questions. **12**

a) Explain in detail
- i) PORTS
- ii) PCON
- iii) OPTION_REG in PIC 16F877

b) Explain A/D conversion in PIC 16F877 with logical diagram.

c) Explain the USART modules in PIC 16F877.

Seat No.	

Set **R**

T.Y. (B.Tech.) (Electronics & Telecommunication Engineering) (Sem - I) (New/Old) (CBCS) Examination: March/April – 2026
Microcontrollers and Applications (BTN06502)

Day & Date: Tuesday, 05-05-2026 Max. Marks: 70
Time: 10:00 AM To 01:00 PM

Instructions: 1) Q. No. 1 is compulsory. It should be solved in the first 30 minutes in Answer Book Page no 03 (Starting page of the Answer Book). Each question carries one mark.
2) Don't forget to Mention question paper set (P/Q/R/S) on top of page.
3) Figures to the right indicates full marks.

MCQ/Objective Type Questions

Duration: 30 Minutes Marks:14

Q.1 Choose the correct alternative from the options. 14

1) Which status bits exhibit carry from lower 4 bits during 8-bit addition and are especially beneficial for BCD addition?
a) Carry bit b) Digits Carry bit (DC)
c) Both a & b d) none of these

2) FLASH program memory, Data Memory (RAM) and Data Memory (EEPROM) for PIC 16F877 are _____.
a) 8K × 8, 368 × 8, 256 × 8 b) 14K × 8, 14 K × 8, 256 × 8
c) 8K × 14, 368 × 16, 256 x 8 d) 8K × 14, 368 × 8, 256 × 8

3) Which command enables the PIC to enter into the power down mode during the operation of watchdog timer (WDT)?
a) SLEEP b) RESET
c) STATUS d) CLR

4) Where is the result stored after an execution of increment and decrement operations over the special - purpose registers in PIC?
a) File Register b) Working Register
c) Both a & b d) None of the above

5) The internal RAM memory of the 8051 is _____.
a) 4 Kbytes b) 6 Kbytes
c) 128 bytes d) 256 bytes

6) This program code will be executed continuously _____.

```
LOOP: MOV A,#03h
      DEC A
      JNZ LOOP
```

a) TRUE b) FALSE
c) gives error d) loop execute 3 times

7) After reset the stack pointer in microcontroller 8051 is initialized to _____.
a) 70 H b) FF H
c) 00 H d) 07 H

8) Vector address of timer /counter 1 interrupt is _____ h.
a) 0003 b) 0013
c) 000B d) 001B

9) Program status word register of 8051 is _____.
a) Only bit addressable
b) Only byte addressable
c) Bit addressable as well as byte addressable
d) None of these

10) What is the address range of Register bank 0 in 8051?
a) 00h-07h b) 00h-FFh
c) 80h-7Fh d) 80h-FFh

11) Which of the following instructions will load the value 25H into the lower byte of Timer0?
a) MOV TL0,#25h b) MOV TL0,25h
c) MOV T0,#25h d) MOV T0,25h

12) The contents of the accumulator after this operation
MOV A,#0CH
ANL A,#0CH
will be _____.
a) 00001100 b) 00001101
c) 11111111 d) 11000000

13) PIC 16F877A is a _____ bit microcontroller.
a) 8 b) 4
c) 32 d) 64

14) Which flags are more likely to get affected in status registers by Arithmetic and Logical Unit (ALU) of PIC 16 FXXX on the basis of instructions execution?
a) Carry (C) Flags b) Zero (Z) Flags
c) Digit Carry (DC) Flags d) All of the above

3) Figures to right indicates full marks.
4) Assume suitable data if necessary.

MCQ/Objective Type Questions

Duration: 30 Minutes Marks:14

Q.1 Choose the correct Answer. **14**

1) Correlation is basically used to _____.
a) Add two signals b) Subtract two signals
c) Compare Two signals d) None

2) If the sequence x(n) is real and even its corresponding DFT values are _____.
a) Imaginary and odd b) Imaginary and even
c) Real and even d) None

3) The size of input data blocks in overlap add method is _____.
a) L b) $L+M$
c) $L+M-1$ d) $L+M+1$

4) Transform domain is used as it _____.
a) Enhance the signal b) Compress the signal
c) Reduces data points d) Increases data points

5) For DIF FFT algorithm _____.
a) Input sequence is natural order
b) Input sequence is in bit reversal order
c) Output sequence is in natural order
d) Both input and output sequence are in bit reversal order

6) Linear convolution of two real sequences with P and Q points, respectively can be converted to circular convolution by appending extra zeros to every sequence until its length is _____.
a) $P+Q$ b) $P+Q+1$
c) $P+Q-1$ d) $P-Q-1$

7) Circular convolution of the sequence $x(n) = \{1,2,1\}$ and $h(n) = \{1,-2,2\}$ is _____.

a) $\{3,2,-1\}$ b) $\{-1,2,3\}$

c) $\{2,3,-1\}$ d) $\{3,2,-2\}$

8) Which of the following has linear Phase?

a) IIR Filter b) FIR Filter

c) LP Filter d) None

9) The frequency Sampling structure are efficient because _____.

a) Sample Points are less

b) Some Sampled DFT coefficients are zero when filter is narrow band.

c) Some Sampled Values are assumed zero

d) Parallel structures are efficient

10) Goertzel algorithm evaluates the _____.

a) DTFT coefficients b) DFT coefficients

c) Z transform d) FT coefficients

11) FIR filer is also known as _____ filter.

a) Cascade structure b) Transversal

c) ARMA d) AR

12) The approximate width of the main lobe in Hanning window of Length M is _____.

a) $8\,\pi/M$ b) $4\,\pi/M$

c) $12\,\pi/M$ d) $16\,\pi/M$

13) Kaiser window has an adjustable parameter that controls _____.

a) stop band width b) main lobe width

c) stop band attenuation d) None of these

14) IIR filter design is based on _____ filter design.

a) Analog b) discrete time

c) Digital d) None

Seat No.	

Set **P**

T. Y. (B.Tech.) (Electronics & Telecommunication Engineering) (Semester - I) (New/Old) (CBCS) Examination: March/April – 2026
Digital Signal Processing (BTN06503)

Day & Date: Thursday, 07-05-2026 Max. Marks: 56
Time: 10:00 AM To 01:00 PM

Instructions: 1) All questions are compulsory.
2) Figures to the right indicate full marks.
3) Assume suitable data if necessary.

SECTION – I

Q.2 Attempt any four. **16**

a) Find Cross Correlation of two finite Length Sequences $x(n) = \{1,2,3,4,5\}\ y(n) = \{5,6,7,8,9\}$

b) Determine the 8 point DFT of the sequence $x(n) = \{1,1,1,1,1,1,0,0\}$

c) Find the IDFT of the sequences $x(n) = \{0, 2, 4, 6\}$

d) Compute Autocorrelation of the sequence $x(n) = \{1,2,3,4\}$

e) Give the relationship between DFT and Z transform.

Q.3 Attempt any two. **12**

a) What is DFT? What are the properties of DFT? Explain circular convolution properties of DFT.

b) Perform circular convolution of the following sequence $x(n) = \{1,1,2,1\}$ and $h(n) = \{1,2,3,4\}$

c) Input $x(n) = \{-1,4,7,3,-2,9,10,5,12,-5,8\}$. Let impulse response of filter $h(n) = \{3,2,1,1\}$. Use overlap adds method to find convolution.

SECTION – II

Q.4 Attempt any four. **16**

a) Explain Fourier series method for designing FIR filter?

b) Explain difference between FIR filter and IIR filter.

c) Explain steps of windowing technique for designing FIR filter.

d) For analog transfer function $H(s) = 1/(s+1)(s+2)$. Determine $H(z)$ using impulse invariant technique. (Assume T=1 sec with block diagram)

e) Determine the Direct form realization of system function.
$H(z) = 1 + 2z^{-1} - 3z^{-2} - 4z^{-3} - 4z^{-5}$

Q.5 Attempt any two. **12**

a) Convert the given analog transfer function into equivalent digital transfer function using impulse invariant transformation technique (T = 1 second/sample)

$$H_a(S) = \frac{s + 0.1}{(s + 0.1)^2 + 9}$$

b) Design an ideal High pass filter whose desired frequency response

$$H_d(e^{i\omega}) = 1 \quad \pi \geq |\omega| \geq \pi/3$$
$$0 \quad \text{otherwise}$$

Using Hamming Window,

i) Determine Impulse Response for $N = 9$

ii) Determine Transfer function at realizable filter

c) Explain the application of DSP in Audio Processing.

a) Analog b) discrete time
c) Digital d) None

5) Correlation is basically used to _____.
a) Add two signals b) Subtract two signals
c) Compare Two signals d) None

6) If the sequence x(n) is real and even its corresponding DFT values are _____.
a) Imaginary and odd b) Imaginary and even
c) Real and even d) None

7) The size of input data blocks in overlap add method is _____.
a) L b) $L+M$
c) $L+M-1$ d) $L+M+1$

8) Transform domain is used as it _____.
a) Enhance the signal
b) Compress the signal
c) Reduces data points
d) Increases data points

9) For DIF FFT algorithm _____.
a) Input sequence is natural order
b) Input sequence is in bit reversal order
c) Output sequence is in natural order
d) Both input and output sequence are in bit reversal order

10) Linear convolution of two real sequences with P and Q points, respectively can be converted to circular convolution by appending extra zeros to every sequence until its length is _____.
a) $P + Q$
b) $P + Q + 1$
c) $P + Q - 1$
d) $P - Q - 1$

11) Circular convolution of the sequence $x(n) = \{1,2,1\}$ and $h(n) = \{1, -2,2\}$ is _____.
a) $\{3,2, -1\}$
b) $\{-1,2,3\}$
c) $\{2,3, -1\}$
d) $\{3,2, -2\}$

12) Which of the following has linear Phase?
a) IIR Filter
b) FIR Filter
c) LP Filter
d) None

13) The frequency Sampling structure are efficient because _____.
a) Sample Points are less
b) Some Sampled DFT coefficients are zero when filter is narrow band.
c) Some Sampled Values are assumed zero
d) Parallel structures are efficient

14) Goertzel algorithm evaluates the _____.
a) DTFT coefficients
b) DFT coefficients
c) Z transform
d) FT coefficients

Seat No.	

Set **R**

T. Y. (B.Tech.) (Electronics & Telecommunication Engineering) (Semester - I) (New/Old) (CBCS) Examination: March/April – 2026
Digital Signal Processing (BTN06503)

Day & Date: Thursday, 07-05-2026 Max. Marks: 56
Time: 10:00 AM To 01:00 PM

Instructions: 1) All questions are compulsory.
2) Figures to the right indicate full marks.
3) Assume suitable data if necessary.

SECTION – I

Q.2 Attempt any four. **16**

a) Find Cross Correlation of two finite Length Sequences $x(n) = \{1,2,3,4,5\}$ $y(n) = \{5,6,7,8,9\}$

b) Determine the 8 point DFT of the sequence $x(n) = \{1,1,1,1,1,1,0,0\}$

c) Find the IDFT of the sequences $x(n) = \{0, 2, 4, 6\}$

d) Compute Autocorrelation of the sequence $x(n) = \{1,2,3,4\}$

e) Give the relationship between DFT and Z transform.

Q.3 Attempt any two. **12**

a) What is DFT? What are the properties of DFT? Explain circular convolution properties of DFT.

b) Perform circular convolution of the following sequence $x(n) = \{1,1,2,1\}$ and $h(n) = \{1,2,3,4\}$

c) Input $x(n) = \{-1,4,7,3,-2,9,10,5,12,-5,8\}$. Let impulse response of filter $h(n) = \{3,2,1,1\}$. Use overlap adds method to find convolution.

SECTION – II

Q.4 Attempt any four. **16**

a) Explain Fourier series method for designing FIR filter?

b) Explain difference between FIR filter and IIR filter.

c) Explain steps of windowing technique for designing FIR filter.

d) For analog transfer function $H(s) = 1/(s+1)(s+2)$. Determine $H(z)$ using impulse invariant technique. (Assume T=1 sec with block diagram)

e) Determine the Direct form realization of system function.
$H(z) = 1 + 2z^{-1} - 3z^{-2} - 4z^{-3} - 4z^{-5}$

Q.5 Attempt any two. **12**

a) Convert the given analog transfer function into equivalent digital transfer function using impulse invariant transformation technique (T = 1 second/sample)

$$H_a(S) = \frac{s + 0.1}{(s + 0.1)^2 + 9}$$

b) Design an ideal High pass filter whose desired frequency response

$$H_d(e^{i\omega}) = \begin{matrix} 1 & \pi \geq |\omega| \geq \pi/3 \\ 0 & \text{otherwise} \end{matrix}$$

Using Hamming Window,

i) Determine Impulse Response for $N = 9$

ii) Determine Transfer function at realizable filter

c) Explain the application of DSP in Audio Processing.

Digital Signal Processing (BTN06503)

Day & Date: Thursday, 07-05-2026 Max. Marks: 70
Time: 10:00 AM To 01:00 PM

Instructions: 1) Q. No. 1 is compulsory. It should be solved in the first 30 minutes in Answer Book Page no 03 (Starting page of the Answer Book). Each question carries one mark.
2) Don't forget to Mention question paper set (P/Q/R/S) on top of page.
3) Figures to right indicates full marks.
4) Assume suitable data if necessary.

MCQ/Objective Type Questions

Duration: 30 Minutes Marks:14

Q.1 Choose the correct Answer. **14**

1) Linear convolution of two real sequences with P and Q points, respectively can be converted to circular convolution by appending extra zeros to every sequence until its length is _____.
a) $P+Q$ b) $P+Q+1$
c) $P+Q-1$ d) $P-Q-1$

2) Circular convolution of the sequence $x(n)=\{1,2,1\}$ and $h(n)=\{1,-2,2\}$ is _____.
a) $\{3,2,-1\}$ b) $\{-1,2,3\}$
c) $\{2,3,-1\}$ d) $\{3,2,-2\}$

3) Which of the following has linear Phase?
a) IIR Filter b) FIR Filter
c) LP Filter d) None

4) The frequency Sampling structure are efficient because _____.
a) Sample Points are less
b) Some Sampled DFT coefficients are zero when filter is narrow band.
c) Some Sampled Values are assumed zero
d) Parallel structures are efficient

5) Goertzel algorithm evaluates the _____.
a) DTFT coefficients b) DFT coefficients
c) Z transform d) FT coefficients

6) FIR filer is also known as _____ filter.
a) Cascade structure b) Transversal
c) ARMA d) AR

7) The approximate width of the main lobe in Hanning window of Length M is _____.

a) $8\,\pi/M$ b) $4\,\pi/M$

c) $12\,\pi/M$ d) $16\,\pi/M$

8) Kaiser window has an adjustable parameter that controls _____.

a) stop band width b) main lobe width

c) stop band attenuation d) None of these

9) IIR filter design is based on _____ filter design.

a) Analog b) discrete time

c) Digital d) None

10) Correlation is basically used to _____.

a) Add two signals b) Subtract two signals

c) Compare Two signals d) None

11) If the sequence x(n) is real and even its corresponding DFT values are _____.

a) Imaginary and odd b) Imaginary and even

c) Real and even d) None

12) The size of input data blocks in overlap add method is _____.

a) L b) $L+M$

c) $L+M-1$ d) $L+M+1$

13) Transform domain is used as it _____.

a) Enhance the signal b) Compress the signal

c) Reduces data points d) Increases data points

14) For DIF FFT algorithm _____.

a) Input sequence is natural order

b) Input sequence is in bit reversal order

c) Output sequence is in natural order

d) Both input and output sequence are in bit reversal order

Managerial Economics (BTN06511)

Day & Date: Saturday, 09-05-2026 Max. Marks: 70
Time: 10:00 AM To 01:00 PM

Instructions: 1) Q. No. 1 is compulsory. It should be solved in the first 30 minutes in Answer Book Page no 03 (Starting page of the Answer Book). Each question carries one mark.
2) Don't forget to Mention question paper set (P/Q/R/S) on top of page.
3) Figures to the right indicates full marks.

MCQ/Objective Type Questions

Duration: 30 Minutes Marks:14

Q.1 Choose the correct Answer. **14**

1) In economics, desire backed by purchasing power is known as _____.
a) Utility b) Demand
c) Consumption d) Scarcity

2) Car and petrol are _____.
a) Complimentary goods b) Substitute goods
c) Supplementary goods d) Reserve goods

3) _____ means the total receipts from sales divided by the number of unit sold.
a) Average revenue b) Total revenue
c) Marginal revenue d) Incremental revenue

4) Law of demand shows the functional relationship between _____ and quantity demanded.
a) Supply b) Cost
c) Price d) Requirements

5) When the change in demand is exactly equal to the change in price, it is called _____.
a) Perfectly elastic demand b) Perfectly inelastic demand
c) Relative elastic demand d) Unitary elastic demand

6) _____ Method is also known as Sales-Force-Composite method or collective opinion method.
a) Opinion survey b) Expert opinion
c) Delphi method d) Consumer interview method

7) Functional relationship between input and output known as _____.
a) Conversion b) Production function
c) Work in progress d) Output function

8) Which one of the following is not an internal factor influencing pricing policy?

a) Cost
b) Objectives
c) Marketing mix
d) Demand

9) Unitary elasticity of demand mean _____.

a) $\mathrm{EP} => 1$
b) $\mathrm{EP} =< 1$
c) $\mathrm{EP} = 0$
d) $\mathrm{EP} = 1$

10) Analysis of long run and short run affects of decisions on revenue as well as costs is based on _____.

a) Principle of time perspective
b) Equi-marginal principle
c) Principle
d) None of these

11) A cost that has already been committed and cannot be recovered known as _____.

a) Sunk cost
b) Total cost
c) Full cost
d) Variable cost

12) Firms under perfectly competitive markets generally are _____.

a) Price makers
b) Price givers
c) Price taker
d) None of these

13) Variable costs are _____.

a) sunk costs
b) multiplies by fixed costs
c) costs that change with the level of production
d) defined as the change in total cost resulting from the production of an additional unit of output

14) The market with a single producer _____.

a) perfect competition
b) monopolistic competition
c) oligopoly
d) monopoly

2) Figures to the right indicate full marks.

SECTION – I

Q.2 Solve any Four. **16**

a) Explain scope of managerial economics for business decision.

b) State the difference between Microeconomics and Macroeconomics.

c) Explain the concept Price ceilings and Price floors.

e) Explain the concept price elasticity and cross elasticity of demand.

f) Explain Integration of economics to managerial decisions.

Q.3 Solve any Two. **12**

a) Explain cardinal and ordinal approach of consumer behaviour.

b) What is mean by determinants of demand? Explain.

c) Explain the following terms
i) Demand
ii) Utility
iii) Supply
iv) Market Equilibrium

SECTION – II

Q.4 Solve any Four. **16**

a) What is Demand Forecasting? Explain its objectives.

b) Describe Survey Methods for demand forecasting.

c) What is meant by Production? Distinguish between fixed and variable inputs.

d) Draw and explain break even analysis curve. What is profit margin of safety.

e) What is market? Explain four types of market structures.

Q.5 Solve any Two. **12**

a) What is Pricing? Explaining factors affecting pricing policy and decisions.

b) Explain the following costs of production:

i) Explicit & Implicit costs
ii) Short run & Long run costs
iii) Incremental & Sunk costs

c) What is Linear programming? Discuss usefulness of its application to practical business problems.

SECTION – II

Q.4 Solve any Four. **16**

a) What is Demand Forecasting? Explain its objectives.

b) Describe Survey Methods for demand forecasting.

c) What is meant by Production? Distinguish between fixed and variable inputs.

d) Draw and explain break even analysis curve. What is profit margin of safety.

e) What is market? Explain four types of market structures.

Q.5 Solve any Two. **12**

a) What is Pricing? Explaining factors affecting pricing policy and decisions.

b) Explain the following costs of production:

i) Explicit & Implicit costs
ii) Short run & Long run costs
iii) Incremental & Sunk costs

c) What is Linear programming? Discuss usefulness of its application to practical business problems.

T.Y. (B.Tech.) (Electronics & Telecommunication Engineering) (Sem - I) (New/Old) (CBCS) Examination: March/April - 2026
Project Management and Operation Research (BTN06512)

Day & Date: Saturday, 09-05-2026 Max. Marks: 70
Time: 10:00 AM To 01:00 PM

Instructions: 1) Q. No. 1 is compulsory. It should be solved in the first 30 minutes in Answer Book Page no 03 (Starting page of the Answer Book). Each question carries one mark.
2) Don't forget to Mention question paper set (P/Q/R/S) on top of page.
3) Figures to the right indicates full marks.
4) Assume suitable data if required.

MCQ/Objective Type Questions

Duration: 30 Minutes Marks:14

Q.1 Choose the correct Answer. **14**

1) Projects management is divided in _____ process groups.
a) 5 b) 7
c) 9 d) 11

2) The PERT in project management means program evaluation and _____ technique.
a) Resource b) Reconciliation
c) Reconsideration d) Review

3) "Risk" usually _____ as the project progresses.
a) Increases b) Reduces
c) Remains Same d) Becomes negligible

4) Assembling project team and assigning their responsibilities are done during which phase of a project management?
a) Initiation b) Planning
c) Execution d) Closure

5) Which of the following is NOT considered Risk Categorization?
a) Internal b) External
c) Technical d) Methodology

6) A hierarchical representation of risks according to their risk categories is called _____.
a) Risk Categorization b) Work Breakdown Structure
c) Risk Data Assessment d) Risk Reassessment

7) The earliest method used for planning of Project was _____.
a) CPM b) PERT
c) Bar chart d) Milestone Chart

8) Operations Research approach is _____.
a) Multidisciplinary b) Scientific
c) Intuitive d) Collect essential data

9) A mixed strategy game can be solved by _____.
a) Simplex Method b) Hungarian Method
c) Graphical method d) Degeneracy Method

10) OR has a characteristic that it is done by a team of _____.
a) Scientist b) Mathematicians
c) Academics d) All of the above

11) OR uses models to help the management to determine its _____.
a) Policies b) Actions
c) Both a) and b) d) None of the above

12) Feasible solution satisfies _____.
a) Only constraints b) only non-negative restriction
c) a) and b) both d) a), b) and optimum solution

13) In graphical representation the bounded region is known as _____ region.
a) Solution b) Basic Solution
c) Feasible Solution d) Optimal

14) In LPP the condition to be satisfied is _____.
a) Constraints have to be linear
b) Objective function has to be linear
c) None of the above
d) Both a) and b)

Project Management and Operation Research (BTN06512)

Day & Date: Saturday, 09-05-2026 Max. Marks: 56
Time: 10:00 AM To 01:00 PM

Instructions: 1) All questions are compulsory.
2) Figures to the right indicate full marks.
3) Assume suitable data if required.

SECTION – I

Q.2 Solve Any Four the following. **16**

a) Explain project life cycle concept.
b) Define is risk. Explain its categories.
c) Explain PERT in detail.
d) Compare qualitative and quantitative risk assessment.
e) Explain the characteristics of Project management.

Q.3 Solve Any Two the following. **12**

a) Explain case study on visualization process of GANTT chart.
b) Explain Top-down and Bottom-up budgeting.
c) What is risk identification? Explain in detail about risk register.

SECTION – II

Q.4 Solve Any Four the following. **16**

a) Explain the limitations of operation research.
b) Explain the applications of assignment model?
c) A manufacturing company is engaged in producing three types of products: A,B,C. the production department produces, each day, component sufficient to make 50 units of A, 25 units of B and 30 units of C. the management is confronted with the problem of optimizing the daily production of the assembly department, where only 100 man-hours are available daily for assembling the products. The following additional information is available:

Type of product	Profit contribution per unit product (Rs)	Assembly time per product (Hrs)
A	12	0.8
B	20	1.7
C	45	2.5

Company has daily order commitment 20 units of products A and 15 units of products B and C. Formulate this problem as an LPP model so as to maximize the total Profit.

d) Explain the procedure and techniques for selecting facility location.

e) What is replacement model? Explain categories of replacement Model.

Q.5 Solve Any Two questions. **12**

a) What is Operation Research? Explain in brief the models of Operation Research.

b) What is LPP? Give its applications and advantages of LPP.

c) Use the graphical method to solve the following LP problem.

Maximize $Z = 15x_1 + 10x_2$

Subject to constraints

i) $4x_1 + 6x_2 \leq 360$

ii) $3x_1 + 0x_2 \leq 180$

iii) $0x_1 + 5x_2 \leq 200$ and $x_1, x_2 \geq 0$

MCQ/Objective Type Questions

Duration: 30 Minutes Marks:14

Q.1 Choose the correct Answer. **14**

1) Who is known as the - Father of AI?
a) Fisher Ada b) Alan Turing
c) John McCarthy d) Allen Newell

2) Among the given options, which search algorithm requires highest memory?
a) Optimal Search b) Depth First Search
c) Breadth-First Search d) Linear Search

3) Among the given options, which is not the required property of Knowledge?
a) Inferential Efficiency b) Inferential Adequacy
c) Representational Verification d) Representational Adequacy

4) The exploration problem is where _____.
a) Agent contains the knowledge of State and actions
b) Agent does not contain the knowledge of State and actions
c) Only actions are known to the agent
d) None of the above

5) A hybrid Bayesian Network consist _____.
a) Discrete variables only
b) Discontinuous Variable
c) Both Discrete and Continuous variables
d) Continuous Variable only

6) The probabilistic reasoning depends upon ____.
a) Estimation
b) Observations
c) Likelihood
d) All of the above

7) Which of the given element improve the performance of AI agent so that it can make better decisions?
a) Changing
b) Performance Element
c) Learning Element
d) None of the above

8) Which is true for Decision theory?
a) Decision Theory = Probability theory + utility theory
b) Decision Theory = Inference theory + utility theory
c) Decision Theory = Uncertainty + utility theory
d) Decision Theory = Probability theory + preference

9) General algorithm applied on game tree for making decision of win/lose is _____.
a) DFS/BFS Search Algorithms
b) Heuristic Search Algorithms
c) Greedy Search Algorithms
d) MIN/MAX Algorithms

10) The statement comprising the limitations of FOL is/are _____.
a) Expressiveness Formalizing
b) Natural Languages
c) Many-sorted Logic
d) All of the mentioned

11) Translate the following statement into FOL. “For every a, if a is a philosopher, then a is a scholar” _____.
a) ∀ a philosopher(a) scholar(a)
b) ∃ a philosopher(a) scholar(a)
c) All of the mentioned
d) None of the mentioned

12) Which form is called as a conjunction of disjunction of literals?
a) Conjunctive normal form
b) Disjunctive normal form
c) Normal form
d) All of the mentioned

13) How the compactness of the Bayesian network can be described?
a) Locally structured
b) Fully structured
c) Partial structure
d) All of the mentioned

14) Knowledge may be _____.
I) Declarative
II) Procedural
III) Non- procedural
a) Only (I)
b) Only (II)
c) Only (III)
d) Both (I) and (II)

b) Only (II)
c) Only (III)
d) Both (I) and (II)

8) Who is known as the - Father of AI?

a) Fisher Ada
b) Alan Turing
c) John McCarthy
d) Allen Newell

9) Among the given options, which search algorithm requires highest memory?

a) Optimal Search
b) Depth First Search
c) Breadth-First Search
d) Linear Search

10) Among the given options, which is not the required property of Knowledge?

a) Inferential Efficiency
b) Inferential Adequacy
c) Representational Verification
d) Representational Adequacy

11) The exploration problem is where _____.

a) Agent contains the knowledge of State and actions
b) Agent does not contain the knowledge of State and actions
c) Only actions are known to the agent
d) None of the above

12) A hybrid Bayesian Network consist _____.

a) Discrete variables only
b) Discontinuous Variable
c) Both Discrete and Continuous variables
d) Continuous Variable only

13) The probabilistic reasoning depends upon ____.

a) Estimation
b) Observations
c) Likelihood
d) All of the above

14) Which of the given element improve the performance of AI agent so that it can make better decisions?

a) Changing
b) Performance Element
c) Learning Element
d) None of the above

Set **Q**

T. Y. (B.Tech.) (Electronics & Telecommunication Engineering) (Semester - I) (New/Old) (CBCS) Examination: March/April - 2026
Artificial Intelligence (BTN06515)

Day & Date: Tuesday, 12-05-2026 Max. Marks: 56
Time: 10:00 AM To 01:00 PM

Instructions: 1) All questions are compulsory.
2) Figures to the right indicate full marks.

SECTION – I

Q.2 Attempt Any Four. **16**

a) Explain the concept of reasoning with defaults.
b) Explain advantages of AI.
c) Explain AO* algorithm with suitable example.
d) Define agent. Explain learning-based agent in AI.
e) Explain different Types of knowledge in AI.

Q.3 Attempt Any Two. **12**

a) Explain AO* algorithm in detail with example in detail.
b) Explain objects, relations, events, actions, time, and space.
c) Define following term.
i) Problem reduction
ii) heuristic
iii) Constraint propagation
iv) Stochastic

SECTION – II

Q.4 Attempt Any Four. **16**

a) Explain probabilistic logic with example.
b) Explain the elementary game theory in AI.
c) Explain different learning forms in AI.
d) Explain decision theory and use of it in AI.
e) Explain scope of AI.

Q.5 Attempt Any Two. **12**

a) Explain Bayes' theorem in detail with example.
b) Explain with two applications in detail, the concept of decision making in AI.
c) Explain sequential decision problems of AI in detail.

T. Y. (B.Tech.) (Electronics & Telecommunication Engineering) (Semester - I) (New/Old) (CBCS) Examination: March/April - 2026
Artificial Intelligence (BTN06515)

Day & Date: Tuesday, 12-05-2026 Max. Marks: 70
Time: 10:00 AM To 01:00 PM

Instructions: 1) Q. No. 1 is compulsory. It should be solved in the first 30 minutes in Answer Book Page no 03 (Starting page of the Answer Book). Each question carries one mark.
2) Don't forget to Mention question paper set (P/Q/R/S) on top of page.
3) Figures to the right indicates full marks.

MCQ/Objective Type Questions

Duration: 30 Minutes Marks:14

Q.1 Choose the correct Answer. **14**

1) Translate the following statement into FOL. "For every a, if a is a philosopher, then a is a scholar" _____.
a) ∀ a philosopher(a) scholar(a) b) ∃ a philosopher(a) scholar(a)
c) All of the mentioned d) None of the mentioned

2) Which form is called as a conjunction of disjunction of literals?
a) Conjunctive normal form b) Disjunctive normal form
c) Normal form d) All of the mentioned

3) How the compactness of the Bayesian network can be described?
a) Locally structured b) Fully structured
c) Partial structure d) All of the mentioned

4) Knowledge may be _____.
I) Declarative
II) Procedural
III) Non- procedural
a) Only (I) b) Only (II)
c) Only (III) d) Both (I) and (II)

5) Who is known as the - Father of AI?
a) Fisher Ada b) Alan Turing
c) John McCarthy d) Allen Newell

6) Among the given options, which search algorithm requires highest memory?
a) Optimal Search b) Depth First Search
c) Breadth-First Search d) Linear Search

7) Among the given options, which is not the required property of Knowledge?
a) Inferential Efficiency b) Inferential Adequacy
c) Representational Verification d) Representational Adequacy

8) The exploration problem is where _____.
a) Agent contains the knowledge of State and actions
b) Agent does not contain the knowledge of State and actions
c) Only actions are known to the agent
d) None of the above

a) Discrete variables only
b) Discontinuous Variable
c) Both Discrete and Continuous variables
d) Continuous Variable only

10) The probabilistic reasoning depends upon ____.
a) Estimation b) Observations
c) Likelihood d) All of the above

11) Which of the given element improve the performance of AI agent so that it can make better decisions?
a) Changing b) Performance Element
c) Learning Element d) None of the above

12) Which is true for Decision theory?
a) Decision Theory = Probability theory + utility theory
b) Decision Theory = Inference theory + utility theory
c) Decision Theory = Uncertainty + utility theory
d) Decision Theory = Probability theory + preference

13) General algorithm applied on game tree for making decision of win/lose is _____.
a) DFS/BFS Search Algorithms
b) Heuristic Search Algorithms
c) Greedy Search Algorithms
d) MIN/MAX Algorithms

14) The statement comprising the limitations of FOL is/are _____.
a) Expressiveness Formalizing b) Natural Languages
c) Many-sorted Logic d) All of the mentioned

3) Figures to the right indicates full marks.

MCQ/Objective Type Questions

Duration: 30 Minutes Marks:14

Q.1 Choose the correct alternative from the options. **14**

1) In standardization, the features will be rescaled with _____.
a) Mean 0 and Variance 0 b) Mean 0 and Variance 1
c) Mean 1 and Variance 0 d) Mean 1 and Variance 1

2) Quantitative values can be converted to nominal or ordinal values. This process is called _____.
a) Discretization b) Normalization
c) Summarization d) Standardization

3) _____ approach has high computational complexity.
a) Wrapper b) Filter
c) Embedded d) Hybrid

4) What is the difference between supervised and unsupervised learning?
a) Supervised learning requires labeled data while unsupervised learning does not
b) Unsupervised learning requires labeled data while supervised learning does not
c) Supervised learning does not require data while unsupervised learning does
d) There is no difference between supervised and unsupervised learning

5) PCA is a _____.
a) Nonlinear method b) Linear method
c) Continuous method d) Repeated method

6) Which of the following are true about subset selection?
   a) Subset selection can substantially decrease the bias of support vector machines
   b) Ridge regression frequently eliminates some of the features
   c) Finding the true best subset takes exponential time
   d) Subset selection can reduce overfitting

7) Binning is a feature engineering technique used to convert Continuous data into categorical data.
   a) True b) False

8) What is the purpose of model evaluation in machine learning?
   a) To create new models
   b) To compare different models and select the best one
   c) To visualize the data
   d) To pre-process the data before training

9) What is model stacking in machine learning?
   a) A technique to combine multiple base models into a single model for better performance
   b) A method for visualizing high-dimensional data
   c) A process of converting categorical features into numerical representations
   d) A way to evaluate the performance of clustering algorithms

10) What is the primary goal of K-means clustering?
   a) Dimensionality reduction b) Classification
   c) Regression d) Partitioning data into clusters

11) What is the primary purpose of manual feature extraction techniques like SIFT and HOG in image processing?
   a) To convert images into grayscale
   b) To extract semantic features from images automatically
   c) To preprocess images before feeding them to deep learning models
   d) To extract distinctive and robust features from images for various computer vision tasks

12) The architecture of SIFT includes the following steps _____.
   a) Convolutional Layers, Pooling Layers, Fully Connected Layers
   b) Image Gradients, Gradient Orientation Histograms, Response Normalization Layers
   c) Rectified Linear Unit (ReLU) Transformation, Fully Connected Layers, Structure of AlexNet
   d) SIFT does not involve a specific architecture; it is a feature extraction technique

13) In the clustering algorithm the distance between cluster centroid to each object is calculated using _____ method.

a) Euclidean distance
b) Clustering distance
c) Central distance
d) Cluster

14) Which of the following layers in a deep neural network helps to handle variations in object position and scale in images?

a) Fully Connected Layers
b) Convolutional Layers
c) Pooling Layers
d) Response Normalization Layers

c) Finding the true best subset takes exponential time
d) Subset selection can reduce overfitting

2) Binning is a feature engineering technique used to convert Continuous data into categorical data.
a) True b) False

3) What is the purpose of model evaluation in machine learning?
a) To create new models
b) To compare different models and select the best one
c) To visualize the data
d) To pre-process the data before training

4) What is model stacking in machine learning?
a) A technique to combine multiple base models into a single model for better performance
b) A method for visualizing high-dimensional data
c) A process of converting categorical features into numerical representations
d) A way to evaluate the performance of clustering algorithms

5) What is the primary goal of K-means clustering?
a) Dimensionality reduction b) Classification
c) Regression d) Partitioning data into clusters

6) What is the primary purpose of manual feature extraction techniques like SIFT and HOG in image processing?
   a) To convert images into grayscale
   b) To extract semantic features from images automatically
   c) To preprocess images before feeding them to deep learning models
   d) To extract distinctive and robust features from images for various computer vision tasks

7) The architecture of SIFT includes the following steps _____.
   a) Convolutional Layers, Pooling Layers, Fully Connected Layers
   b) Image Gradients, Gradient Orientation Histograms, Response Normalization Layers
   c) Rectified Linear Unit (ReLU) Transformation, Fully Connected Layers, Structure of AlexNet
   d) SIFT does not involve a specific architecture; it is a feature extraction technique

8) In the clustering algorithm the distance between cluster centroid to each object is calculated using _____ method.
   a) Euclidean distance b) Clustering distance
   c) Central distance d) Cluster

9) Which of the following layers in a deep neural network helps to handle variations in object position and scale in images?
   a) Fully Connected Layers
   b) Convolutional Layers
   c) Pooling Layers
   d) Response Normalization Layers

10) In standardization, the features will be rescaled with _____.
   a) Mean 0 and Variance 0 b) Mean 0 and Variance 1
   c) Mean 1 and Variance 0 d) Mean 1 and Variance 1

11) Quantitative values can be converted to nominal or ordinal values. This process is called _____.
   a) Discretization b) Normalization
   c) Summarization d) Standardization

12) _____ approach has high computational complexity.
   a) Wrapper b) Filter
   c) Embedded d) Hybrid

13) What is the difference between supervised and unsupervised learning?

a) Supervised learning requires labeled data while unsupervised learning does not
b) Unsupervised learning requires labeled data while supervised learning does not
c) Supervised learning does not require data while unsupervised learning does
d) There is no difference between supervised and unsupervised learning

14) PCA is a _____.

a) Nonlinear method
b) Linear method
c) Continuous method
d) Repeated method

T.Y. (B.Tech.) (Electronics & Telecommunication Engineering) (Semester - I) (New/Old) (CBCS) Examination: March/April - 2026
Data Processing & Feature Engineering (BTN06516)

Day & Date: Tuesday, 12-05-2026 Max. Marks: 56
Time: 10:00 AM To 01:00 PM

Instructions: 1) All questions are compulsory.
2) Figures to the right indicate full marks.

SECTION – I

Q.2 Solve Any Four. **16**

a) What is discretization and why is it used?

b) What is data Quality and explain about it.

c) Explain in detail the four scales of measurements.

d) What are the Advantages and Disadvantages of Dimensionality Reduction?

e) What is the difference between PCA and LDA?

Q.3 Solve Any Two. **12**

a) Explain Linear Discriminant Analysis (LDA).

b) Explain the matrix decomposition procedure.

c) Explain the concept of Principal Component Analysis.

SECTION – II

Q.4 Solve Any Four. **16**

a) Explain with example Log Transform.

b) Explain the process of Binarization.

c) Explain some cases where k-Means clustering fails to give good results.

d) What is the pooling layer? State in brief with suitable diagrams.

e) Explain the Gradient Orientation Histogram.

Q.5 Solve Any Two. **12**

a) Explain the concept of Quantization or Binning.

b) Explain in detail SIFT Architecture with diagram.

c) Explain the convolution layer of Neural Network.

T.Y. (B.Tech.) (Electronics & Telecommunication Engineering) (Semester - I) (New/Old) (CBCS) Examination: March/April - 2026
Network Security and Secure Coding (BTN06519)

Day & Date: Tuesday, 12-05-2026 Max. Marks: 70
Time: 10:00 AM To 01:00 PM

Instructions: 1) Q. No. 1 is compulsory. It should be solved in the first 30 minutes in Answer Book Page no 03 (Starting page of the Answer Book). Each question carries one mark.
2) Don't forget to Mention question paper set (P/Q/R/S) on top of page.
3) Figures to the right indicates full marks.

MCQ/Objective Type Questions

Duration: 30 Minutes Marks:14

Q.1 Choose the correct option from the following. **14**

1) Sending fake messages to mislead a recipient falls under which category?
a) Interruption b) Interception
c) Fabrication d) Modification

2) A man-in-the-middle attack involves _____.
a) Intercepting communication between two parties
b) Overloading a network with traffic
c) Exploiting weak encryption
d) Redirecting DNS queries to a malicious server

3) The Diffie-Hellman algorithm is used for _____.
a) Encrypting messages b) Securely exchanging keys
c) Authenticating users d) Generating random numbers

4) Which of the following is a property of a secure hash function?
a) It must be invertible.
b) It must produce a fixed-length output for any input
c) It must use a symmetric key
d) It must encrypt data

5) Which factor enables TCP session hijacking?
a) Lack of encryption
b) Predictable sequence numbers
c) Absence of packet authentication
d) All of the above

6) Which of the following is an example of a public key cryptographic algorithm?
a) AES
b) RSA
c) DES
d) Blowfish

7) The private key in public key infrastructure (PKI) should be _____.
a) Kept confidential and never shared
b) Published in a certificate
c) Stored alongside the public key
d) Signed by the Certificate Authority

8) PGP uses which mechanism to ensure message integrity?
a) Digital certificates
b) Hash functions like SHA-1
c) Symmetric encryption
d) Public key cryptography

9) Which two modes are supported by IPsec for securing traffic?
a) Stream mode and block mode
b) Tunnel mode and transport mode
c) Authentication mode and encryption mode
d) Stateless mode and stateful mode

10) What is the purpose of combining SAs?
a) To improve packet transmission speed
b) To provide a mix of authentication and confidentiality
c) To enable secure DNS queries
d) To eliminate the need for encryption

11) S/MIME ensures email security through _____.
a) Symmetric encryption and hashing
b) Digital certificates and encryption
c) Asymmetric cryptography only
d) Hashing algorithms only

12) The Internet Key Exchange (IKE) protocol in IPsec is used for _____.
a) Generating random numbers
b) Establishing, negotiating, and maintaining Security Associations (SAs)
c) Encrypting IP packets directly
d) Authenticating email messages

13) Which of the following is a characteristic of trusted systems?
a) Mandatory access controls
b) Only encryption
c) Redundancy in hardware
d) Faster network communication

14) A buffer overflow attack occurs when _____.
a) A program terminates unexpectedly
b) More data is written to a buffer than it can hold
c) A memory address becomes invalid
d) The stack pointer is nullified

2) Figures to the right indicate full marks.

SECTION – I

Q.2 Attempt Any Four questions. **16**

a) Discuss the challenges in maintaining availability in the face of distributed denial-of- service (DDoS) attacks.

b) Explain the concept of format string vulnerabilities with an example.

c) Explain any two methods of key distribution in conventional encryption.

d) Describe the working of the CTR (Counter) mode and state its advantages over other modes.

e) List the main entities involved in the Kerberos authentication system.

Q.3 Attempt Any Two questions. **12**

a) Discuss in detail the various security services — confidentiality, authentication, integrity, nonrepudiation, access control, and availability.

b) Compare all cipher block modes (ECB, CBC, CFB, OFB, CTR) based on error propagation and parallelism.

c) Explain how Kerberos ensures mutual authentication between clients and servers.

SECTION – II

Q.4 Attempt Any Four questions. **16**

a) Differentiate between transport mode and tunnel mode in IPSec.

b) Explain how S/MIME provides authentication and confidentiality.

c) List the major improvements introduced in SNMPv3 over SNMPv1.

d) What is a *firewall?* State the main objectives of a firewall.

e) What is a *secure architecture?* List the main principles of secure architecture design.

Q.5 Attempt Any Two questions. **12**

a) Explain the architecture and working of Pretty Good Privacy (PGP) with a neat diagram.

b) Explain preventive measures and control mechanisms against malicious software.

c) Explain the importance of security by design and how it differs from security as an add-on.

4) Assume suitable data if necessary.

MCQ/Objective Type Questions

Duration: 30 Minutes Marks:14

Q.1 Choose the correct Answer. **14**

1) If the cluster size N = 12, then reuse ratio Q is _____.
a) 6 b) $\sqrt{12}$
c) $\sqrt{36}$ d) None of these

2) Grade of Service (GoS) is expressed as _____.
a) Signal power ratio b) Probability of call blocking
c) Delay time d) Throughput

3) If frequency doubles, free space path loss _____.
a) Decreases b) Remains same
c) Increases d) Becomes zero

4) Coherence bandwidth is inversely proportional to _____.
a) Delay spread b) Frequency
c) Power d) Distance

5) In MIMO-OFDM, OFDM handles _____.
a) Frequency selectivity b) Spatial diversity
c) Power control d) Antenna switching

6) Inter-carrier interference (ICI) in OFDM is caused by _____.
a) Perfect synchronization b) Loss of orthogonality
c) High bandwidth d) Low power

7) A 2×2 MIMO system ideally increases capacity by _____.
a) 2 times b) 4 times
c) No change d) 8 times

8) The channel bandwidth of IS-95 is _____.
a) 200 kHz b) 1.25 MHz
c) 5 MHz d) 20 MHz

9) LTE-Advanced is part of _____.
a) IMT-2000 b) IMT-Advanced
c) IMT-2020 d) GSM

10) LTE is based on which technology?
a) CDMA b) TDMA
c) OFDMA & SC-FDMA d) FDMA

11) 5G core is based on _____.
a) Service-based architecture (SBA)
b) Circuit switching
c) Analog switching
d) TDMA

12) Why is SC-FDMA used in uplink?
a) Increase interference b) Reduce PAPR
c) Increase bandwidth d) Reduce data rate

13) GSM signaling is based on _____.
a) TCP/IP b) FTP
c) HTTP d) SS7

14) GSM uses which speech coding technique?
a) PCM b) RPE-LTP
c) Delta modulation d) OFDM

Q.2 Solve Any Four. **16**

a) Explain different channel assignment strategies in cellular system.

b) What is small scale fading? What are its types? Explain in detail.

c) Explain the frequency reuse concept in cellular system.

d) What is diffraction? Explain knife edge diffraction.

e) Draw and explain working of MIMO in wireless communication system with advantages and disadvantages.

Q.3 Solve Any Two. **12**

a) What is OFDMA? What are its features? Explain in detail OFDMA with neat block diagram.

b) What are the different methods to improve the coverage and capacity of a cellular system? Explain in detail.

c) Explain two ray model in detail.

SECTION – II

Q.4 Solve Any Four. **16**

a) What is handoff? Explain different types of handoff in GSM.

b) Explain different channels & frame structure used in GSM.

c) Explain in detail forward channel of CDMA IS - 95.

d) What is E-UTRAN? Explain

e) Explain in detail radio interface, modulation, channels & features of 4G.

Q.5 Solve Any Two **12**

a) Give the detail comparison of IMT 2000, IMT Advanced and IMT 2020.

b) Explain the various services such as bearer services, tele services & supplementary services. Also features provided by GSM in detail.

c) Explain the features, advantages, disadvantages and applications of 5G.

Set **Q**

T.Y. (B.Tech.) (Electronics & Telecommunication Engineering) (Semester - II) (New) (CBCS) Examination: March/April - 2026
Advanced Mobile Communication (ENTPCC-10)

Day & Date: Friday, 15-05-2026 Max. Marks: 70
Time: 10:00 AM To 01:00 PM

Instructions: 1) Q. No. 1 is compulsory. It should be solved in the first 30 minutes in Answer Book Page no 03 (Starting page of the Answer Book). Each question carries one mark.
2) Don't forget to Mention question paper set (P/Q/R/S) on top of page.
3) Figures to the right indicates full marks.
4) Assume suitable data if necessary.

MCQ/Objective Type Questions

Duration: 30 Minutes Marks:14

Q.1 Choose the correct Answer. **14**

1) The channel bandwidth of IS-95 is _____.
a) 200 kHz b) 1.25 MHz
c) 5 MHz d) 20 MHz

2) LTE-Advanced is part of _____.
a) IMT-2000 b) IMT-Advanced
c) IMT-2020 d) GSM

3) LTE is based on which technology?
a) CDMA b) TDMA
c) OFDMA & SC-FDMA d) FDMA

4) 5G core is based on _____.
a) Service-based architecture (SBA)
b) Circuit switching
c) Analog switching
d) TDMA

5) Why is SC-FDMA used in uplink?
a) Increase interference b) Reduce PAPR
c) Increase bandwidth d) Reduce data rate

6) GSM signaling is based on _____.
a) TCP/IP b) FTP
c) HTTP d) SS7

7) GSM uses which speech coding technique?
a) PCM b) RPE-LTP
c) Delta modulation d) OFDM

8) If the cluster size N = 12, then reuse ratio Q is _____.
a) 6 b) $\sqrt{12}$
c) $\sqrt{36}$ d) None of these

9) Grade of Service (GoS) is expressed as _____.
a) Signal power ratio b) Probability of call blocking
c) Delay time d) Throughput

10) If frequency doubles, free space path loss _____.
a) Decreases b) Remains same
c) Increases d) Becomes zero

11) Coherence bandwidth is inversely proportional to _____.
a) Delay spread b) Frequency
c) Power d) Distance

12) In MIMO-OFDM, OFDM handles _____.
a) Frequency selectivity b) Spatial diversity
c) Power control d) Antenna switching

13) Inter-carrier interference (ICI) in OFDM is caused by _____.
a) Perfect synchronization b) Loss of orthogonality
c) High bandwidth d) Low power

14) A 2×2 MIMO system ideally increases capacity by _____.
a) 2 times b) 4 times
c) No change d) 8 times

4) Assume suitable data whenever necessary.

MCQ/Objective Type Questions

Duration: 30 Minutes Marks:14

Q.1 Choose the correct alternatives from the given options. 14

1) For input voltage range $0 - 2V$, $t2 = 2000$, required DVM display is _____.
a) 2 digit b) 3 digit
c) 3 ½ digit d) 3 ¾ digit

2) In reverse blocking mode of a SCR, junction _____.
a) J2 reverse & J1, J3 forward bias
b) J3 forward bias & J1, J2 reverse bias
c) J1, J3 reverse & J2 forward bias
d) J1, J2 forward & J3 reverse bias

3) A step-down chopper gives output voltage 60 V from 120 V input. Find duty cycle.
a) 0.25 b) 0.5
c) 0.75 d) 1

4) With reference to DIAC, which statement is wrong ____.
a) DIAC is bidirectional device
b) It's current can be controlled
c) It has two terminals
d) It triggers with positive/negative voltage

5) IC 74C926 can be used for programming measurement of _____.
a) Frequency b) Time Period
c) Event d) All of these

6) The IC XR 2240 consist of _____.
a) 8 bit Counter
b) 4-bit Counter
c) 8-digit Counter
d) 4-digit Counter

7) Which of the following temperature sensor has sensitivity 10 mV/°C?
a) LM35
b) J - type thermocouple
c) PT 100
d) None of above

8) The programmable delays of XR-2240 is _____.
a) 2RC to 16 RC
b) 0 RC to 255 RC
c) 1 RC to 100 RC
d) 1RC to 255 R

9) A single phase fully controlled bridge converter supplies an Inductive load. If $\propto = 0°$, then average dc voltage is _____.
a) Vm / π
b) $2Vm / \pi$
c) $Vm / \sqrt{2}$
d) $0.95Vm$

10) In Type-B chopper, power flow is _____.
a) Source to load
b) Load to source
c) No power flow
d) Bidirectional

11) Chopper is widely used in which of the following?
a) Radio receivers
b) Oscillators
c) Audio amplifiers
d) DC motor speed control

12) Time Ratio Control (TRC) controls output by varying _____.
a) Input voltage
b) Load resistance
c) Duty cycle
d) Current

13) In ON - OFF controller, error voltage (V_e) is given by _____.
a) $V_e = V_SP + V_PV$
b) $V_e = V_PV - V_SP$
c) $V_e = V_SP - V_PV$
d) $V_e = V_PV + V_SP$

14) Which of the following PNPN devices are bidirectional?
a) TRIAC
b) DIAC
c) SCR
d) both a) & b)

Set | P

T. Y. (B.Tech.) (Electronics &Telecommunication Engineering) (Semester - II) (New) (CBCS) Examination: Marh/April – 2026
Electronics System Design (ENTPCC-11)

Day & Date: Monday, 18-05-2026 Max. Marks: 56
Time: 10:00 AM To 01:00 PM

Instructions: 1) All Questions are compulsory.
2) Figures to the right indicate full marks.
3) Use of calculator and electronic component datasheet is allowed.

Section – I

Q.2 Attempt the following. (Any Four) **16**

a) Explain the working of IGBT with transfer characteristics.

b) Explain Turn ON & OFF methods of SCR.

c) Draw and explain AC power control using DIAC and TRIAC for lamp dimmer.

d) Define Chopper. Explain Control strategies of Chopper.

e) Sketch V-I characteristics of DIAC and explain its principal of working.

Q.3 Attempt the following. (Any Two) **12**

a) Draw VI characteristics of TRIAC and explain its working with mode of operations.

b) Draw and explain single phase controlled rectifier with centre tapped transformer and resistive load. Derive expression for average output voltage & rms load voltage.

c) Explain the operation of Class A & Class B type Chopper with waveform.

Section – II

Q.4 Attempt the following. (Any Four) **16**

a) Design a timer using XR 2240 to generate a delay of 15 seconds.

b) Design voltage to current converter to convert 0 to 10 V into 4 to 20 mA.

c) Explain the basics of a Programmable Logic Controller (PLC) with a neat block diagram.

d) Compare between ON - OFF controller and proportional controller.

e) Draw and explain ladder diagram for bottle filling plant system.

Q.5 Attempt the following. (Any Two) **12**

a) Design frequency measurement set up to measure frequency up to 100 KHz with 0.1 Hz accuracy. Use IC 74C926.

b) Design ON-OFF temperature controller to control temperature in range of 0 to 100 0 C. Set point is 60 0 C and required full scale output is 10 V.

c) Design 3 ½ digit DVM for measurement of $Vin = \pm 2V$. Use 1 MHz clock.

a) Frequency b) Time Period
c) Event d) All of these

10) The IC XR 2240 consist of _____.
a) 8 bit Counter b) 4-bit Counter
c) 8-digit Counter d) 4-digit Counter

11) Which of the following temperature sensor has sensitivity 10 mV/°C?
a) LM35 b) J - type thermocouple
c) PT 100 d) None of above

12) The programmable delays of XR-2240 is _____.
a) 2RC to 16 RC b) 0 RC to 255 RC
c) 1 RC to 100 RC d) 1RC to 255 R

13) A single phase fully controlled bridge converter supplies an Inductive load. If $\propto = 0°$, then average dc voltage is _____.
a) Vm / π b) $2Vm / \pi$
c) $Vm / \sqrt{2}$ d) $0.95Vm$

14) In Type-B chopper, power flow is _____.
a) Source to load b) Load to source
c) No power flow d) Bidirectional

Set R

T. Y. (B.Tech.) (Electronics &Telecommunication Engineering) (Semester - II) (New) (CBCS) Examination: Marh/April – 2026
Electronics System Design (ENTPCC-11)

Day & Date: Monday, 18-05-2026 Max. Marks: 56
Time: 10:00 AM To 01:00 PM

Instructions: 1) All Questions are compulsory.
2) Figures to the right indicate full marks.
3) Use of calculator and electronic component datasheet is allowed.

Section – I

Q.2 Attempt the following. (Any Four) **16**

a) Explain the working of IGBT with transfer characteristics.

b) Explain Turn ON & OFF methods of SCR.

c) Draw and explain AC power control using DIAC and TRIAC for lamp dimmer.

d) Define Chopper. Explain Control strategies of Chopper.

e) Sketch V-I characteristics of DIAC and explain its principal of working.

Q.3 Attempt the following. (Any Two) **12**

a) Draw VI characteristics of TRIAC and explain its working with mode of operations.

b) Draw and explain single phase controlled rectifier with centre tapped transformer and resistive load. Derive expression for average output voltage & rms load voltage.

c) Explain the operation of Class A & Class B type Chopper with waveform.

Section – II

Q.4 Attempt the following. (Any Four) **16**

a) Design a timer using XR 2240 to generate a delay of 15 seconds.

b) Design voltage to current converter to convert 0 to 10 V into 4 to 20 mA.

c) Explain the basics of a Programmable Logic Controller (PLC) with a neat block diagram.

d) Compare between ON - OFF controller and proportional controller.

e) Draw and explain ladder diagram for bottle filling plant system.

Q.5 Attempt the following. (Any Two) **12**

a) Design frequency measurement set up to measure frequency up to 100 KHz with 0.1 Hz accuracy. Use IC 74C926.

b) Design ON-OFF temperature controller to control temperature in range of 0 to 100 0 C. Set point is 60 0 C and required full scale output is 10 V.

c) Design 3 ½ digit DVM for measurement of $Vin = \pm 2V$. Use 1 MHz clock.

Day & Date: Monday, 18-05-2026 Max. Marks: 70
Time: 10:00 AM To 01:00 PM

Instructions: 1) Q. No. 1 is compulsory. It should be solved in the first 30 minutes in Answer Book Page no 03 (Starting page of the Answer Book). Each question carries one mark.
2) Don't forget to Mention question paper set (P/Q/R/S) on top of page.
3) Figures to the right indicates full marks.
4) Assume suitable data whenever necessary.

MCQ/Objective Type Questions

Duration: 30 Minutes Marks:14

Q.1 Choose the correct alternatives from the given options. 14

1) The IC XR 2240 consist of _____.
a) 8 bit Counter b) 4-bit Counter
c) 8-digit Counter d) 4-digit Counter

2) Which of the following temperature sensor has sensitivity 10 mV/°C?
a) LM35 b) J - type thermocouple
c) PT 100 d) None of above

3) The programmable delays of XR-2240 is _____.
a) 2RC to 16 RC b) 0 RC to 255 RC
c) 1 RC to 100 RC d) 1RC to 255 R

4) A single phase fully controlled bridge converter supplies an Inductive load. If $\propto = 0°$, then average dc voltage is _____.
a) Vm / π b) $2Vm / \pi$
c) $Vm / \sqrt{2}$ d) $0.95Vm$

5) In Type-B chopper, power flow is _____.
a) Source to load b) Load to source
c) No power flow d) Bidirectional

6) Chopper is widely used in which of the following?
a) Radio receivers b) Oscillators
c) Audio amplifiers d) DC motor speed control

7) Time Ratio Control (TRC) controls output by varying _____.
a) Input voltage b) Load resistance
c) Duty cycle d) Current

8) In ON - OFF controller, error voltage (V_e) is given by _____.

a) $V_e = V_SP + V_PV$ b) $V_e = V_PV - V_SP$

c) $V_e = V_SP - V_PV$ d) $V_e = V_PV + V_SP$

9) Which of the following PNPN devices are bidirectional?

a) TRIAC b) DIAC

c) SCR d) both a) & b)

10) For input voltage range $0 - 2V$, $t2 = 2000$, required DVM display is _____.

a) 2 digit b) 3 digit

c) 3 ½ digit d) 3 ¾ digit

11) In reverse blocking mode of a SCR, junction _____.

a) J2 reverse & J1, J3 forward bias

b) J3 forward bias & J1, J2 reverse bias

c) J1, J3 reverse & J2 forward bias

d) J1, J2 forward & J3 reverse bias

12) A step-down chopper gives output voltage 60 V from 120 V input. Find duty cycle.

a) 0.25 b) 0.5

c) 0.75 d) 1

13) With reference to DIAC, which statement is wrong ____.

a) DIAC is bidirectional device

b) It's current can be controlled

c) It has two terminals

d) It triggers with positive/negative voltage

14) IC 74C926 can be used for programming measurement of _____.

a) Frequency b) Time Period

c) Event d) All of these

Time: 10:00 AM To 01:00 PM

Instructions: 1) Q. No. 1 is compulsory. It should be solved in the first 30 minutes in Answer Book Page no 03 (Starting page of the Answer Book). Each question carries one mark.
2) Don't forget to Mention question paper set (P/Q/R/S) on top of page.
3) Figures to the right indicates full marks.

MCQ/Objective Type Questions

Duration: 30 Minutes Marks:14

Q.1 Choose the correct alternatives from the given options. 14

1) Numerical Aperture (NA) of optical fiber is given by _____.
a) $\sqrt{({n_2}^2 - {n_1}^2)}$ b) $\sqrt{({n_1}^2 - {n_2}^2)}$
c) $n_1 + n_2$ d) none of these

2) Critical angle occurs when light travels from _____.
a) Air to glass b) Vacuum to air
c) Cladding to core d) Core to cladding

3) Mode theory deals with _____.
a) Power loss b) Frequency change
c) Light paths in fiber d) Voltage

4) Rayleigh scattering is _____.
a) Nonlinear b) Linear
c) Zero d) Infinite

5) Threshold current in laser depends on _____.
a) Temperature b) Pressure
c) Voltage only d) Frequency only

6) Absorption occurs when _____.
a) Photon energy > bandgap b) Photon energy < bandgap
c) Equal energy d) Zero energy

7) Cutoff wavelength is inversely proportional to _____.
a) Voltage b) Frequency
c) Power d) Bandgap

8) OTDM multiplexes signals in _____.
a) Frequency domain b) Time domain
c) Space domain d) Power domain

9) Topology used for FDDI is _____.
a) Bus b) Star
c) Ring d) Mesh

10) If core and cladding refractive indices become equal, fiber will _____.
a) Work normally b) Increase efficiency
c) Fail to guide light d) Become laser

11) If quantum efficiency = 1, then _____.
a) No electrons generated b) One electron per photon
c) Infinite electrons d) Zero photons

12) Attenuation is measured in _____.
a) Watt b) dB/km
c) Volt d) Ohm

13) Phototransistor gain is high due to _____.
a) Base amplification b) Collector action
c) Thermal effect d) Reflection

14) Noise in receiver mainly arises from _____.
a) Fiber b) Detector
c) Source d) Connector

Instructions: 1) All questions are compulsory.
2) Figures to the right indicate full marks.

SECTION – I

Q.2 Attempt Any Four. **16**

a) Differentiate between step index and graded index fiber.

b) What is dispersion? Explain intramodal dispersion.

c) Define LASER and explain concept of stimulated emission in details.

d) For a 30 km long fiber attenuation 0.8 dB/km at 1300 nm. If a 200 μ W power is launched into the fiber, find the output power.

e) With the help of neat sketch explain concept of semiconductor injection LASER.

Q.3 Attempt Any Two. **12**

a) Derive expression for Numerical Aperture and acceptance angle.

b) What is fiber bending loss? Explain types of fiber bending loss with neat sketch.

c) Explain LED structure and its characteristics in detail.

SECTION – II

Q.4 Attempt Any Four. **16**

a) Explain the principle of working of optical detectors in detail.

b) Write short note on Optical Ethernet

c) With the help of block diagram explain basic structure of optical receiver

d) Draw and explain the dual ring architecture of FDDI

e) Compare PN, PIN and APD photodiodes

Q.5 Attempt Any Two. **12**

a) Derive expression for responsivity and quantum efficiency.

b) Explain SONET/SDH architecture and its working with proper labeled diagram.

c) With the help of neat sketch describe working of WDM in detail. Also explain its advantages and applications.

MCQ/Objective Type Questions

Duration: 30 Minutes Marks:14

Q.1 Choose the correct option from the following. **14**

1) Which block in verilog executes continuously?
a) initial b) always
c) begin d) fork

2) Rising edge in Verilog is represented by _____.
a) negedge b) posedge
c) level d) edge

3) Which block is used for combinational logic?
a) always @(posedge clk) b) always @(*)
c) initial d) fork

4) Full adder sum expression is _____.
a) $a \,\&\, b$ b) $a \mid b$
c) $a \wedge b \wedge$ cin d) $\sim(a + b)$

5) Which assignment is used in always block?
a) assign b) $=$
c) $<=$ d) wire

6) Which sensitivity list is correct for flip-flop?
a) always @(a or b) b) always @(*)
c) always @(posedge clk) d) always @(data)

7) Which code shows asynchronous reset?
a) always @(posedge clk)
b) always @(posedge clk or posedge rst)
c) always @(*)
d) always @(rst)

8) Which assignment is non-blocking?
a) = b) ==
c) <= d) =>

9) Gate of MOSFET is made of _____.
a) Metal/Polysilicon b) Silicon dioxide
c) Aluminum oxide d) Copper

10) Accumulation occurs when _____.
a) Positive voltage applied to nMOS gate
b) Negative voltage applied to nMOS gate
c) Zero voltage
d) High temperature

11) Channel length modulation is a _____.
a) First-order effect b) Second-order effect
c) Noise effect d) Thermal effect

12) Altera MAX7000 belongs to _____.
a) FPGA b) CPLD
c) ASIC d) DSP

13) Routing in FPGA is ____.
a) Fixed b) Programmable
c) Static d) Manual

14) In complementary CMOS, PMOS network is _____.
a) Pull-down network b) Pull-up network
c) Input network d) Output network

Set **P**

T. Y. (B.Tech.) (Electronics & Telecommunication Engineering) (Semester - II) (New) (CBCS) Examination: March/April – 2026
VLSI Design (ENTPEC - 02A)

Day & Date: Friday, 22-05-2026 Max. Marks: 56
Time: 10:00 AM To 01:00 PM

Instructions: 1) All Questions are compulsory.
2) Figures to the right indicate full marks.
3) Assume suitable data if required.

Section – I

Q.2 Attempt the following. (Any Four) **16**

a) Define a Verilog module and explain its basic structure.

b) List and explain different data types in Verilog.

c) Differentiate between blocking $(=)$ and non-blocking $(<=)$ assignments.

d) Write a behavioral Verilog code for a half adder.

e) Write the behavioral description of a JK flip-flop using an always block.

Q.3 Attempt the following. (Any Two) **12**

a) Discuss styles of description in Verilog with examples.

b) Write the behavioral model of 3:8 decoder.

c) Write the behavioral model of mod-10 counter.

Section – II

Q.4 Attempt the following. (Any Four) **16**

a) Explain the physical structure of a MOS transistor with neat labeling.

b) Explain CMOS implementation of NOR gate.

c) Explain power dissipation in dynamic CMOS.

d) Explain FPGA architecture in brief.

e) Explain ratioed logic and pass transistor logic in brief.

Q.5 Attempt the following. (Any Two) **12**

a) Explain MOS transistor operation in accumulation, depletion, and inversion modes with diagrams.

b) Explain implementation of Boolean expression $F = \overline{(A.B) + (C.D)}$ using CMOS.

c) Explain static behavior of CMOS inverter with voltage transfer characteristics.

Set Q

T. Y. (B.Tech.) (Electronics & Telecommunication Engineering) (Semester - II) (New) (CBCS) Examination: March/April – 2026
VLSI Design (ENTPEC - 02A)

Day & Date: Friday, 22-05-2026 Max. Marks: 70
Time: 10:00 AM To 01:00 PM

Instructions: 1) Q. No. 1 is compulsory. It should be solved in the first 30 minutes in Answer Book Page no 03 (Starting page of the Answer Book). Each question carries one mark.
2) Don't forget to Mention question paper set (P/Q/R/S) on top of page.
3) Figures to the right indicates full marks.
4) Assume suitable data whenever necessary.

MCQ/Objective Type Questions

Duration: 30 Minutes Marks:14

Q.1 Choose the correct option from the following. **14**

1) Which assignment is non-blocking?
a) = b) ==
c) <= d) =>

2) Gate of MOSFET is made of _____.
a) Metal/Polysilicon b) Silicon dioxide
c) Aluminum oxide d) Copper

3) Accumulation occurs when _____.
a) Positive voltage applied to nMOS gate
b) Negative voltage applied to nMOS gate
c) Zero voltage
d) High temperature

4) Channel length modulation is a _____.
a) First-order effect b) Second-order effect
c) Noise effect d) Thermal effect

5) Altera MAX7000 belongs to _____.
a) FPGA b) CPLD
c) ASIC d) DSP

6) Routing in FPGA is ____.
a) Fixed b) Programmable
c) Static d) Manual

7) In complementary CMOS, PMOS network is _____.
a) Pull-down network b) Pull-up network
c) Input network d) Output network

8) Which block in verilog executes continuously?
a) initial b) always
c) begin d) fork

9) Rising edge in Verilog is represented by _____.
a) negedge b) posedge
c) level d) edge

10) Which block is used for combinational logic?
a) always @(posedge clk) b) always @(*)
c) initial d) fork

11) Full adder sum expression is _____.
a) $a \,\&\, b$ b) $a \mid b$
c) $a \wedge b \wedge$ cin d) $\sim(a + b)$

12) Which assignment is used in always block?
a) assign b) $=$
c) $<=$ d) wire

13) Which sensitivity list is correct for flip-flop?
a) always @(a or b) b) always @(*)
c) always @(posedge clk) d) always @(data)

14) Which code shows asynchronous reset?
a) always @(posedge clk)
b) always @(posedge clk or posedge rst)
c) always @(*)
d) always @(rst)

MCQ/Objective Type Questions

Duration: 30 Minutes Marks:14

Q.1 Choose the correct option from the following: **14**

1) Which is NOT a design metric?
a) Cost b) Performance
c) Color d) Power

2) The ARM7TDMI-S supports _____, _____ and _____ data types.
a) char, int, float b) char, int, byte
c) byte, half-word, word d) int, char, word

3) When there is a failed attempt to memory access then processor enters _____ mode.
a) Abort b) Supervisor
c) User d) Fast Interrupt Request

4) Each instruction in ARM machine is encoded into _____.
a) 2 byte b) 3 byte
c) 4 byte d) 8 byte

5) In LPC2148 _____ pin select register is used to configure port pins P0.16 to P0.31.
a) PINSEL0 b) PINSEL1
c) PINSEL2 d) IO0DIR

6) The on-chip ADC'S of LPC 2148 has ____ bit resolution and _____ conversion time.
a) 8, 2.44 μ sec b) 10, 2.44 μ sec
c) 12, 1.14 μ sec d) 10, 1.44 μ sec

7) The sequence of three stage pipeline includes _____.
   a) Fetch, Execute, Decode
   b) Decode, Fetch, Execute
   c) Fetch, Write, Execute
   d) Fetch, Decode, Execute

8) The force logic '1' on port pin P0.15, _____ register is used in LPC 2148.
   a) IOSET0
   b) IOSET1
   c) IOCLR0
   d) IODIR3

9) Which of the following interrupt request has the highest priority?
   a) vectored interrupt request
   b) non-vectored interrupt request
   c) FIQ
   d) IRQ

10) If External frequency = 12 MHz, CCLK= 60MHz and PCLK = 60MHz then PLLCFG and VPBDIV values are _____.
   a) 0×23 and 0×01
   b) 0×24 and 0×02
   c) 0×24 and 0×01
   d) 0×24 and 0×00

11) Which is the core of OS?
   a) Kernel
   b) Semaphore
   c) Shell
   d) Scheduler

12) When the processor is executing in thumb state, then all instructions are _____ wide.
   a) 8 bits
   b) 16 bits
   c) 32 bits
   d) 64 bits

13) NRE cost can be defined by _____.
   a) The one-time monetary cost of designing the system
   b) Life time cost of system
   c) Depends upon embedded systems
   d) None of the these

14) Which embedded component is critical in digital cameras for image processing?
   a) ADC only
   b) DSP or image processor
   c) Timer
   d) UART

Time: 10:00 AM To 01:00 PM

Instructions: 1) All questions are compulsory.
2) Figures to the right indicate full marks.
3) Assume suitable data wherever necessary and mention it clearly.

Section – I

Q.2 Attempt Any Four of the following. **16**

a) Explain design challenges in embedded system design & how to meet these challenges?

b) Explain Time-to-Market design metrics in detail

c) Explain Bus architecture in ARM7.

d) Draw and explain CPSR format.

e) Explain the features of LPC2148.

Q.3 Attempt Any Two of the following. **12**

a) Draw and explain the data flow model of ARM core.

b) Describe the operation with example of following ARM instructions.
i) MOV
ii) ADC
iii) MLA
iv) BLX
v) STR
vi) MRS

c) Explain the following on chip peripherals of ARM 2148 in detail.
I/O ports, RTC, DAC

Section – II

Q.4 Answer Any Four of the following. **16**

a) What is Embedded C? Write an embedded C program to blink LED continuously.

b) Explain concept of semaphore with example.

c) Differentiate between RTOS and traditional operating systems with any two points.

d) Draw and explain the basic architecture of an RTOS.

e) Explain the basic working of a digital camera as an embedded system. Mention any two components used.

Q.5 Answer Any Two of the following. **12**

a) Write a program to interface a switch (push button) is interfaced with LPC 2148. Also describe the concept of pull-up and pull-down resistors.

b) Explain the concept of task scheduling in RTOS. Also define Thread, Process, and ISR with suitable examples.

c) Explain the architecture of a smart card-based ATM system. How does it improve security compared to traditional ATM systems?

   d) IO0DIR

10) The on-chip ADC'S of LPC 2148 has ____ bit resolution and _____ conversion time.
   a) 8, 2.44 μ sec
   b) 10, 2.44 μ sec
   c) 12, 1.14 μ sec
   d) 10, 1.44 μ sec

11) The sequence of three stage pipeline includes _____.
   a) Fetch, Execute, Decode
   b) Decode, Fetch, Execute
   c) Fetch, Write, Execute
   d) Fetch, Decode, Execute

12) The force logic '1' on port pin P0.15, _____ register is used in LPC 2148.
   a) IOSET0
   b) IOSET1
   c) IOCLR0
   d) IODIR3

13) Which of the following interrupt request has the highest priority?
   a) vectored interrupt request
   b) non-vectored interrupt request
   c) FIQ
   d) IRQ

14) If External frequency = 12 MHz, CCLK= 60MHz and PCLK = 60MHz then PLLCFG and VPBDIV values are _____.
   a) 0×23 and 0×01
   b) 0×24 and 0×02
   c) 0×24 and 0×01
   d) 0×24 and 0×00

Set **R**

T. Y. (B.Tech.) (Electronics & Telecommunication Engineering) (Semester - II) (New) (CBCS) Examination: March/April – 2026
Embedded Systems (ENTPEC – 03A)

Day & Date: Monday, 25-05-2026 Max. Marks: 56
Time: 10:00 AM To 01:00 PM

Instructions: 1) All questions are compulsory.
2) Figures to the right indicate full marks.
3) Assume suitable data wherever necessary and mention it clearly.

Section – I

Q.2 Attempt Any Four of the following. **16**

a) Explain design challenges in embedded system design & how to meet these challenges?

b) Explain Time-to-Market design metrics in detail

c) Explain Bus architecture in ARM7.

d) Draw and explain CPSR format.

e) Explain the features of LPC2148.

Q.3 Attempt Any Two of the following. **12**

a) Draw and explain the data flow model of ARM core.

b) Describe the operation with example of following ARM instructions.
i) MOV
ii) ADC
iii) MLA
iv) BLX
v) STR
vi) MRS

c) Explain the following on chip peripherals of ARM 2148 in detail.
I/O ports, RTC, DAC

Section – II

Q.4 Answer Any Four of the following. **16**

a) What is Embedded C? Write an embedded C program to blink LED continuously.

b) Explain concept of semaphore with example.

c) Differentiate between RTOS and traditional operating systems with any two points.

d) Draw and explain the basic architecture of an RTOS.

e) Explain the basic working of a digital camera as an embedded system. Mention any two components used.

Q.5 Answer Any Two of the following. **12**

a) Write a program to interface a switch (push button) is interfaced with LPC 2148. Also describe the concept of pull-up and pull-down resistors.

b) Explain the concept of task scheduling in RTOS. Also define Thread, Process, and ISR with suitable examples.

c) Explain the architecture of a smart card-based ATM system. How does it improve security compared to traditional ATM systems?

T. Y. (B.Tech.) (Electronics & Telecommunication Engineering) (Semester - II) (New) (CBCS) Examination: March/April - 2026
Embedded Systems (ENTPEC – 03A)

Day & Date: Monday, 25-05-2026 Max. Marks: 70
Time: 10:00 AM To 01:00 PM

Instructions: 1) Q. No. 1 is compulsory. It should be solved in the first 30 minutes in Answer Book Page no 03 (Starting page of the Answer Book). Each question carries one mark.
2) Don't forget to Mention question paper set (P/Q/R/S) on top of page.
3) Figures to the right indicate full marks.
4) Assume suitable data if required.

MCQ/Objective Type Questions

Duration: 30 Minutes Marks:14

Q.1 Choose the correct option from the following: **14**

1) The on-chip ADC'S of LPC 2148 has ____ bit resolution and _____ conversion time.
a) 8, 2.44 μ sec
b) 10, 2.44 μ sec
c) 12, 1.14 μ sec
d) 10, 1.44 μ sec

2) The sequence of three stage pipeline includes _____.
a) Fetch, Execute, Decode
b) Decode, Fetch, Execute
c) Fetch, Write, Execute
d) Fetch, Decode, Execute

3) The force logic '1' on port pin P0.15, _____ register is used in LPC 2148.
a) IOSET0
b) IOSET1
c) IOCLR0
d) IODIR3

4) Which of the following interrupt request has the highest priority?
a) vectored interrupt request
b) non-vectored interrupt request
c) FIQ
d) IRQ

5) If External frequency = 12 MHz, CCLK= 60MHz and PCLK = 60MHz then PLLCFG and VPBDIV values are _____.
a) 0×23 and 0×01
b) 0×24 and 0×02
c) 0×24 and 0×01
d) 0×24 and 0×00

6) Which is the core of OS?
a) Kernel
b) Semaphore
c) Shell
d) Scheduler

7) When the processor is executing in thumb state, then all instructions are _____ wide.
a) 8 bits b) 16 bits
c) 32 bits d) 64 bits

8) NRE cost can be defined by _____.
a) The one-time monetary cost of designing the system
b) Life time cost of system
c) Depends upon embedded systems
d) None of the these

9) Which embedded component is critical in digital cameras for image processing?
a) ADC only b) DSP or image processor
c) Timer d) UART

10) Which is NOT a design metric?
a) Cost b) Performance
c) Color d) Power

11) The ARM7TDMI-S supports _____, _____ and _____ data types.
a) char, int, float b) char, int, byte
c) byte, half-word, word d) int, char, word

12) When there is a failed attempt to memory access then processor enters _____ mode.
a) Abort b) Supervisor
c) User d) Fast Interrupt Request

13) Each instruction in ARM machine is encoded into _____.
a) 2 byte b) 3 byte
c) 4 byte d) 8 byte

14) In LPC2148 _____ pin select register is used to configure port pins P0.16 to P0.31.
a) PINSEL0 b) PINSEL1
c) PINSEL2 d) IO0DIR

3) Figures to the right indicate full marks.
4) Assume suitable data whenever necessary.

MCQ/Objective Type Questions

Duration: 30 Minutes Marks:14

Q.1 Choose the correct options. **14**

1) The main tasks of an Al agent are _____.
a) Input and Output
b) Moment and Humanly Actions
c) Perceiving, thinking, and acting on the environment
d) None of the above

2) The main function of problem-solving agent is to _____.
a) Solve the given problem and reach the goal
b) Find out which sequence of action will get it to the goal state
c) Both a) & b)
d) None of these

3) The inference engine works on _____.
a) Forward Chaining b) Backward Chaining
c) Both a) and b) d) None of these

4) Web Crawler is an example of _____.
a) Intelligent Agent b) Problem-solving Agent
c) Simple reflex Agent d) Model-based Agent

5) The component of an Expert system is _____.
a) Knowledge Base b) Inference Engine
c) User Interface d) All of these

6) Which of the given statement is true for Conditional Probability?
   a) Conditional Probability gives 100% accurate results.
   b) Conditional Probability can be applied to a single event.
   c) Conditional Probability has no effect or relevance on independent events.
   d) None of the above

7) The probabilistic reasoning depends upon _____.
   a) Estimation
   b) Observations
   c) Likelihood
   d) All of these

8) Who is known as the – "Father of Al"?
   a) Fisher Ada
   b) Alan Turing
   c) John McCarthy
   d) Allen Newell

9) Which term describes the common-sense of the judgmental part of problem-solving?
   a) Values-based
   b) Critical
   c) Analytical
   d) Heuristic

10) Artificial Intelligence is about _____.
   a) Playing a game on Computer
   b) Making a machine Intelligent
   c) Programming on Machine with your own Intelligence
   d) Putting your intelligence in Machine

11) An Al agent perceives and acts upon the environment using _____.
   a) Sensors
   b) Perceiver
   c) Actuators
   d) Both a) and c)

12) Which Al technique enables the computers to understand the associations and relationships between objects and events?
   a) Heuristic Processing
   b) Cognitive Science
   c) Relative Symbolism
   d) Pattern Matching

13) A technique that was developed to determine whether a machine could or could not demonstrate the artificial intelligence known as the _____.
   a) Boolean Algebra
   b) Turing Test
   c) Logarithm
   d) Algorithm

14) If a robot is able to change its own trajectory as per the external conditions, then the robot is considered as the _____.
   a) Mobile
   b) Non-Servo
   c) Open Loop
   d) Intelligent

T. Y. (B.Tech.) (Electronics & Telecommunication Engineering) (Semester - II) (New/Old) (CBCS) Examination: March/April - 2026
Antenna & Wave Propagation (BTN06601)

Day & Date: Friday, 15-05-2026 Max. Marks: 70
Time: 10:00 AM To 01:00 PM

Instructions: 1) Q. No. 1 is compulsory. It should be solved in the first 30 minutes in Answer Book Page no 03 (Starting page of the Answer Book). Each question carries one mark.
2) Don't forget to Mention question paper set (P/Q/R/S) on top of page.
3) Figures to the right indicates full marks.

MCQ/Objective Type Questions

Duration: 30 Minutes Marks:14

Q.1 Choose the correct alternatives from the options. 14

1) To create radiation there must be a _____.
a) Direct current b) Time Varying current
c) Induced current d) all of above

2) A radiator having equal radiation in all direction is referred to as _____ radiator.
a) Directional b) isotropic
c) guided d) non-directional

3) The ratio of 4 Pi over the beam solid angle is defined the _____.
a) Gain b) Directivity
c) Efficiency d) Aperture

4) The input impedance of Lambda/2 dipole, with an idealized sinusoidal current distribution _____.
a) $73 + j42.5$ b) $50 + j100$
c) $25 + j50$ d) $36 + j42.5$

5) To achieve Broadside radiation from a uniform linear array, the phasing between elements must be _____.
a) 90 b) 45
c) 0 d) 120

6) A monopole antenna is considered as _____.
a) Traveling wave b) surface wave
c) sky wave d) Resonant

7) Primary modes of radiation of helical antenna are _____.
a) Normal mode only b) Axial mode only
c) Both normal and axial mode d) none

8) As the number of turns in helical antenna approaches to infinity then the axial ration become _____.
a) Unity b) infinity
c) two d) four

9) For a dipole Log Periodic Antenna all the dimensions change by the _____.
a) same scaling factor b) Log of scaling factor
c) Tangent of scaling factor d) None

10) Horn antennas are derivatives of _____.
a) coaxial lines b) slots
c) microstrips d) waveguides

11) A microstrip antenna usually classified as _____.
a) Narrow band b) medium band
c) Broadband d) base band

12) Smart antenna is combining _____ technology.
a) Digital signal processing b) smart technology
c) android d) All of above

13) Space wave propagation is the type of _____.
a) Surface wave propagation b) Ground wave propagation
c) Sky wave propagation d) Radio wave propagation

14) Product of frequency and wavelength is called as _____.
a) speed of light b) constant
c) variable d) does not having meaning

T. Y. (B.Tech.) (Electronics & Telecommunication Engineering) (Semester - II) (New/Old) (CBCS) Examination: March/April - 2026
Antenna & Wave Propagation (BTN06601)

Day & Date: Friday, 15-05-2026 Max. Marks: 56
Time: 10:00 AM To 01:00 PM

Instructions: 1) All questions are compulsory.
2) Figures to the right indicate full marks.

SECTION – I

Q.2 Attempt (Any Three). **12**

a) What is antenna. Explain about radiation mechanism of antenna.

b) Draw the current distribution for short dipole, half dipole, monopoledipole antenna.

c) Explain the microstrip antenna and it's any four applications.

d) What is array factor and explain significance of it?

Q.3 Attempt (Any Two). **16**

a) Define antenna beam width, antenna bandwidth, antenna beam efficiency, antenna beam area, polarization with one example.

b) Using pattern multiplication find the radiation pattern for the broadside array of 4 elements, spacing between each element is lambda/2.

c) Compare half wave dipole antenna and quarter wave dipole antenna with an example.

SECTION – II

Q.4 Attempt (Any Three). **12**

a) Explain the different types of Horn antenna.

b) Explain the concept of Smart antenna with analogy.

c) What is duct propagation and multi hope propagation?

d) Explain the concept of Active antenna with the help of block diagram.

Q.5 Attempt (Any Two). **16**

a) Explain the working of Spiral and log periodic antenna with the help of suitable diagrams.

b) Explain the concept of reconfigurable antennas in detail.

c) What is the structure of atmosphere? explain each layer, significance of all.

MCQ/Objective Type Questions

Duration: 30 Minutes Marks:14

Q.1 Choose the correct option from the following. 14

1) ARM7 has _____ type of architecture.
a) CISC (Complex Instruction Set Computing)
b) RISC (Reduced Instruction Set Computing)
c) VLIW (Very Long Instruction Word)
d) EPIC (Explicitly Parallel Instruction Computing)

2) Which ARM instruction is used for subtracting one register from another and updating the condition codes?
a) SUB b) SBC
c) CMP d) MUL

3) Which type of memory is used for data storage in the LPC2148?
a) SRAM b) Flash
c) EEPROM d) ROM

4) An embedded system must have _____.
a) hard disk
b) processor and memory
c) operating system
d) processor and input-output unit

5) What is the resolution of the ADC in LPC2148?
a) 8-bit b) 10-bit
c) 12-bit d) 16-bit

6) How many UART modules are present in LPC2148?
a) 1 b) 2
c) 3 d) 4

7) What is the function of the RTC in LPC2148?
a) Communication with external devices
b) Power management
c) Keeping track of real-time clock and calendar
d) Generating high-frequency signals

8) In LPC2148 _____ pin select register is used to configure port pins P0.0 to P0.15.
a) PINSEL0 b) PINSEL1
c) PINSEL2 d) IOθDIR

9) What does the 'MSR' instruction do in the ARM7 instruction set?
a) Move a value to the status register
b) Move a value to a special register
c) Multiply and store the result in memory
d) Modify stack registers

10) If External frequency = 12 MHz, CCLK=60MHz and PCLK=30MHz then PLLCFG and VPBDIV values are _____.
a) 0x23 and 0x01 b) 0x24 and 0x02
c) 0x23 and 0x02 d) 0x24 and 0x00

11) How would you interface an analog sensor with LPC2148?
a) Through UART b) Using the ADC pins
c) Through GPIO pins d) Using PWM

12) Which of the following is a key advantage of using an RTOS?
a) Reduced power consumption
b) Faster hardware access
c) Predictable timing behaviour
d) Increased data throughput

13) What does the term "context switching" mean in RTOS?
a) Switching between kernel modes
b) Saving and restoring the state of a task
c) Executing tasks simultaneously
d) Switching between memory banks

14) The _____ is the part of the kernel responsible for determining which task will run next.
a) Scheduler b) Semaphore
c) Mailbox d) Mutex

T. Y. (B.Tech.) (Electronics & Telecommunication Engineering) (Semester - II) (New/Old) (CBCS) Examination: March/April - 2026
Embedded System (BTN06602)

Day & Date: Monday, 18-05-2026 Max. Marks: 70
Time: 10:00 AM To 01:00 PM

Instructions: 1) Q. No. 1 is compulsory. It should be solved in the first 30 minutes in Answer Book Page no 03 (Starting page of the Answer Book). Each question carries one mark.
2) Don't forget to Mention question paper set (P/Q/R/S) on top of page.
3) Figures to right indicates full marks.
4) Assume suitable data if required.

MCQ/Objective Type Questions

Duration: 30 Minutes Marks:14

Q.1 Choose the correct option from the following. **14**

1) How would you interface an analog sensor with LPC2148?
a) Through UART b) Using the ADC pins
c) Through GPIO pins d) Using PWM

2) Which of the following is a key advantage of using an RTOS?
a) Reduced power consumption
b) Faster hardware access
c) Predictable timing behaviour
d) Increased data throughput

3) What does the term "context switching" mean in RTOS?
a) Switching between kernel modes
b) Saving and restoring the state of a task
c) Executing tasks simultaneously
d) Switching between memory banks

4) The _____ is the part of the kernel responsible for determining which task will run next.
a) Scheduler b) Semaphore
c) Mailbox d) Mutex

5) ARM7 has _____ type of architecture.
a) CISC (Complex Instruction Set Computing)
b) RISC (Reduced Instruction Set Computing)
c) VLIW (Very Long Instruction Word)
d) EPIC (Explicitly Parallel Instruction Computing)

6) Which ARM instruction is used for subtracting one register from another and updating the condition codes?
a) SUB b) SBC
c) CMP d) MUL

7) Which type of memory is used for data storage in the LPC2148?
a) SRAM b) Flash
c) EEPROM d) ROM

8) An embedded system must have _____.
a) hard disk
b) processor and memory
c) operating system
d) processor and input-output unit

9) What is the resolution of the ADC in LPC2148?
a) 8-bit b) 10-bit
c) 12-bit d) 16-bit

10) How many UART modules are present in LPC2148?
a) 1 b) 2
c) 3 d) 4

11) What is the function of the RTC in LPC2148?
a) Communication with external devices
b) Power management
c) Keeping track of real-time clock and calendar
d) Generating high-frequency signals

12) In LPC2148 _____ pin select register is used to configure port pins P0.0 to P0.15.
a) PINSEL0 b) PINSEL1
c) PINSEL2 d) IOθDIR

13) What does the 'MSR' instruction do in the ARM7 instruction set?
a) Move a value to the status register
b) Move a value to a special register
c) Multiply and store the result in memory
d) Modify stack registers

14) If External frequency = 12 MHz, CCLK=60MHz and PCLK=30MHz then PLLCFG and VPBDIV values are _____.
a) 0x23 and 0x01 b) 0x24 and 0x02
c) 0x23 and 0x02 d) 0x24 and 0x00

Set R

T. Y. (B.Tech.) (Electronics & Telecommunication Engineering) (Semester - II) (New/Old) (CBCS) Examination: March/April - 2026
Embedded System (BTN06602)

Day & Date: Monday, 18-05-2026 Max. Marks: 56
Time: 10:00 AM To 01:00 PM

Instructions: 1) All questions are compulsory.
2) Figures to the right indicate full marks.
3) Assume suitable data if required.

Section – I

Q.2 Attempt Any Four questions. **16**

a) What are the challenges in embedded system design & how to meet these challenges?

b) Explain time-to-Market design metrics in detail.

c) Explain the features of LPC 2148?

d) Explain three stage pipeline of ARM7 in detail.

e) With the suitable diagram explain ARM core data flow model.

Q.3 Attempt Any Two questions. **12**

a) Define embedded system. What are the components of embedded system Hardware? Explain with neat block diagram.

b) Explain the following on chip peripherals of ARM 2148 in detail.
I/O ports, PLL, timers / counters.

c) Explain with examples load- store multiple instructions of ARM 7 along with its addressing modes.

Section – II

Q.4 Attempt Any Four questions. **16**

a) Write different features of RTOS.

b) Explain task states associated with RTOS.

c) Explain concept of semaphore with example.

d) Draw and explain the block diagram of Smart Card System based ATM.

e) Draw Interfacing diagram of LED to LPC2148 and write an embedded C program to blink LED continuously.

Q.5 Attempt Any Two questions. **12**

a) Explain the following kernel objects in RTOS.
   i) Thread
   ii) Mailbox
   iii) Events

b) List the types of scheduling algorithm. Explain any two types of scheduling algorithm in RTOS.

c) Draw interfacing diagram of 7 segment with LPC2148. Write an embedded C program to display 0 to 9 number on 7 segment.

MCQ/Objective Type Questions

Duration: 30 Minutes Marks:14

Q.1 Select the appropriate option: **14**

1) The time period of IC 2240 is given as _____.
a) T = RC b) T = 0.67 RC
c) T = 0.7 RC d) None of the above

2) 3 1/2 digit DVM required _____.
a) 12 bit ADC b) 13 bit ADC
c) 10 bit ADC d) 11 bit ADC

3) Instrumentation amplifier is used in controller to give _____.
a) High level Amplification b) LOW CMRR
c) Low input impedance d) Low level amplification

4) Resistance of PT 100 at 100°C is _____.
a) $100\ \Omega$ b) $200\ \Omega$
c) $138.5\ \Omega$ d) $50\ \Omega$

5) The system having steady state error are removed by _____.
a) Integral Controller b) Derivative Controller
c) Pro. Controller d) ALL

6) Cycling in ON-OFF controller decreases as _____.
a) Decrease in deadband b) Increase in deadband
c) Increase in setpoint d) Decrease in set point

7) In PLC Which of the following provides the connections to the equipment to be controlled?
a) Relay b) Input/ Output Module
c) Power Supply Unit d) Moderator

8) _____ is an efficient method of turning ON of SCR.
a) Gate Triggering
b) Application of High Voltage
c) Temperature rise
d) High dv/dt

9) TRIAC and SCR both are controlled devices.
a) True
b) False

10) The turn ON time of SCR is consisting of _____.
a) Delay time, Rise time
b) Delay time, rise time, spread time
c) Rise time, Spread Time
d) Delay time, Spread Time

11) To transfer the power from load to source in case of inductive load, what should be the firing angle _____.
a) equal to 45°
b) equal to 90°
c) less than 90°
d) greater than 90°

12) For single phase Half wave-controlled rectifier with resistive load V_{DCmax} is _____.
a) V_m/π
b) V_m
c) $V_m/2\pi$
d) $V_m/3\pi$

13) Determine capture range Fc of the VCO in PLL565, if free running frequency is 500KHZ and supply voltage is+/-10V _____.
a) $+/-200\text{KHz}$
b) $+/-500\text{KHz}$
c) $+/-250\text{KHz}$
d) $+/-1000\text{KHz}$

14) IC 1596 can be used as _____.
a) Amplitude Modulator
b) As a Double balanced Modulator
c) High Frequency Mixer
d) All of these

Time: 10:00 AM To 01:00 PM

Instructions: 1) All questions are compulsory.
2) Figures to the right indicate full marks.
3) Assume suitable data if required.
4) Use of calculator and electronic component datasheet is allowed.

SECTION – I

Q.2 Attempt the following. (Any Four) **16**

a) Describe Turn ON time of SCR with the help of waveforms in detail.

b) Explain TRIAC construction & V-I characteristics of it.

c) Explain the application of PLL as FSK demodulator.

d) Explain AC power control circuit using TRIAC.

e) Explain with circuit diagram the AM modulator using IC1596.

Q.3 Attempt the following. (Any Two) **12**

a) Explain internal block diagram of PLL 565. Also explain the design steps to determine Centre frequency, capture range and lock range.

b) Explain Bridge full wave controlled rectifier with resistive load. Derive the expression for DC voltage, RMS voltage.

c) Differentiate between SCR and BJT. Explain the following terms. Latching current, Holding current, Commutation Circuit, Breakover voltage.

SECTION – II

Q.4 Attempt the following. (Any Four) **16**

a) Draw and explain block diagram of PLC.

b) Explain advantages and disadvantages of thermocouple.

c) What is dead band and why dead band is require in ON-OFF controller.

d) Design floating load I to V converter where input current range is 4 mA to 20 mA and output voltage required is 0 to 10V.

e) Draw and explain block diagram of IC74926.

Q.5 Attempt the following. (Any Two) **12**

a) Design timer using XR2240 to generate a delay of 1hr in section.

b) What is ladder diagram? Design ladder diagram for elevator controlling.

c) Design ON-OFF controller to control temperature in the range of 0°C to 100°C. Set point is 40°C.

MCQ/Objective Type Questions

Duration: 30 Minutes Marks:14

Q.1 Select the appropriate option: **14**

1) Cycling in ON-OFF controller decreases as _____.
a) Decrease in deadband b) Increase in deadband
c) Increase in setpoint d) Decrease in set point

2) In PLC Which of the following provides the connections to the equipment to be controlled?
a) Relay b) Input/ Output Module
c) Power Supply Unit d) Moderator

3) _____ is an efficient method of turning ON of SCR.
a) Gate Triggering b) Application of High Voltage
c) Temperature rise d) High dv/dt

4) TRIAC and SCR both are controlled devices.
a) True b) False

5) The turn ON time of SCR is consisting of _____.
a) Delay time, Rise time
b) Delay time, rise time, spread time
c) Rise time, Spread Time
d) Delay time, Spread Time

6) To transfer the power from load to source in case of inductive load, what should be the firing angle _____.
a) equal to 45° b) equal to 90°
c) less than 90° d) greater than 90°

7) For single phase Half wave-controlled rectifier with resistive load V_{DCmax} is _____.

a) V_m/π b) V_m

c) $V_m/2\pi$ d) $V_m/3\pi$

8) Determine capture range Fc of the VCO in PLL565, if free running frequency is 500KHZ and supply voltage is+/-10V _____.

a) $+/-200\text{KHz}$ b) $+/-500\text{KHz}$

c) $+/-250\text{KHz}$ d) $+/-1000\text{KHz}$

9) IC 1596 can be used as _____.

a) Amplitude Modulator
b) As a Double balanced Modulator
c) High Frequency Mixer
d) All of these

10) The time period of IC 2240 is given as _____.

a) T = RC b) T = 0.67 RC

c) T = 0.7 RC d) None of the above

11) 3 1/2 digit DVM required _____.

a) 12 bit ADC b) 13 bit ADC

c) 10 bit ADC d) 11 bit ADC

12) Instrumentation amplifier is used in controller to give _____.

a) High level Amplification b) LOW CMRR

c) Low input impedance d) Low level amplification

13) Resistance of PT 100 at 100°C is _____.

a) $100\ \Omega$ b) $200\ \Omega$

c) $138.5\ \Omega$ d) $50\ \Omega$

14) The system having steady state error are removed by _____.

a) Integral Controller b) Derivative Controller

c) Pro. Controller d) ALL

Set S

T. Y. (B.Tech.) (Electronics & Telecommunication Engineering) (Semester - II) (New/Old) (CBCS) Examination: March/April - 2026
Electronic System Design (BTN06603)

Day & Date: Wednesday, 20-05-2026 Max. Marks: 56
Time: 10:00 AM To 01:00 PM

Instructions: 1) All questions are compulsory.
2) Figures to the right indicate full marks.
3) Assume suitable data if required.
4) Use of calculator and electronic component datasheet is allowed.

SECTION – I

Q.2 Attempt the following. (Any Four) **16**

a) Describe Turn ON time of SCR with the help of waveforms in detail.

b) Explain TRIAC construction & V-I characteristics of it.

c) Explain the application of PLL as FSK demodulator.

d) Explain AC power control circuit using TRIAC.

e) Explain with circuit diagram the AM modulator using IC1596.

Q.3 Attempt the following. (Any Two) **12**

a) Explain internal block diagram of PLL 565. Also explain the design steps to determine Centre frequency, capture range and lock range.

b) Explain Bridge full wave controlled rectifier with resistive load. Derive the expression for DC voltage, RMS voltage.

c) Differentiate between SCR and BJT. Explain the following terms. Latching current, Holding current, Commutation Circuit, Breakover voltage.

SECTION – II

Q.4 Attempt the following. (Any Four) **16**

a) Draw and explain block diagram of PLC.

b) Explain advantages and disadvantages of thermocouple.

c) What is dead band and why dead band is require in ON-OFF controller.

d) Design floating load I to V converter where input current range is 4 mA to 20 mA and output voltage required is 0 to 10V.

e) Draw and explain block diagram of IC74926.

Q.5 Attempt the following. (Any Two) **12**

a) Design timer using XR2240 to generate a delay of 1hr in section.

b) What is ladder diagram? Design ladder diagram for elevator controlling.

c) Design ON-OFF controller to control temperature in the range of 0°C to 100°C. Set point is 40°C.

T. Y. (B.Tech.) (Electronics & Telecommunication Engineering) (Semester - II) (New/Old) (CBCS) Examination: March/April - 2026
Optical Fiber Communication (BTN06609)

Day & Date: Friday, 22-05-2026 Max. Marks: 70
Time: 10:00 AM To 01:00 PM

Instructions: 1) Q. No. 1 is compulsory. It should be solved in the first 30 minutes in Answer Book Page no 03 (Starting page of the Answer Book). Each question carries one mark.
2) Don't forget to Mention question paper set (P/Q/R/S) on top of page.
3) Figures to the right indicates full marks.
4) Assume suitable data if required.

MCQ/Objective Type Questions

Duration: 30 Minutes Marks:14

Q.1 Choose the correct alternatives from the given options. 14

1) Which is an advantage of optical communication links over using transmission lines or waveguides?
a) Small size
b) Extremely wide bandwidths
c) Immunity to Electromagnetic Interference (EMI)
d) All of above

2) In an optical fibre, the inner core is _____ the cladding.
a) Denser than b) Less dense than
c) Both have same density d) None of above

3) LASER works on _____ principle.
a) Absorption b) Stimulated emission
c) Spontaneous emission d) Both b) and c)

4) Attenuation is expressed in _____.
a) Decibel b) Ampere
c) Watts d) None of these

5) Edge emitting LED has _____ temperature dependence then surface emitting LED.
a) Greater b) Lesser
c) Equal d) None of above

6) Insertion loss technique is to measure _____.
a) Diameter b) Dispersion
c) Field d) Attenuation

7) The requirements of detector is _____.
a) High fidelity b) Larger size
c) More numerical aperture d) All of above

8) _____ is the semiconductor photodiode with internal gain.
a) PN photodiode b) PIN photodiode
c) Avalanche photodiode d) Ge photodiode

9) A photodiode has a quantum efficiency of 65% when photons of energy 1.5×10^{-19}J are incident upon it, then the responsivity of the photodiode is _____.
a) 0.69 b) 0.72
c) 0.75 d) 0.55

10) The output from Laser is monochromatic, this mean that it is____.
a) Polarized b) Single frequency
c) Narrow Beam d) None of above

11) SONET stands for _____.
a) synchronous optical network
b) synchronous operational network
c) stream optical network
d) shell operational network

12) SONET sends _____ frames per second.
a) 1000 b) 2000
c) 4000 d) 8000

13) FDDI stands for _____.
a) Fiber distributed date interface
b) Fiber derived data interface
c) Fiber Distributed data interface
d) None of above

14) _____ is the advantages of DWDM.
a) Handling higher data rate
b) Increasing the channel bandwidth capacity
c) Both a) & b)
d) None of above

Instructions: 1) All questions are compulsory.
2) Figure to the right indicate full marks.
3) Assume suitable data if required.

SECTION – I

Q.2 Attempt the following. (Any Four) **16**

a) With Block diagram, Explain optical fiber communication system briefly.

b) With energy state diagram explain working of laser.

c) Explain the following terms:
i) Quantum Efficiency
ii) Responsivity

d) Comparison between step index fiber and graded index fiber.

e) An optical fiber has a numerical aperture of 0.20 and a cladding refractive index of 1.59.
Determine
i) The acceptance angle for the fiber in water which has a refractive index of 1.33
ii) The critical angle at the core-cladding interface.

Q.3 Attempt the following. (Any Two) **12**

a) Write a note on Edge emitting LED.

b) Explain the principle of p-i-n photodiode.

c) Explain extrinsic absorption mechanism in fiber optic.

SECTION – II

Q.4 Attempt the following. (Any Four) **16**

a) Explain OTDM.

b) The phototransistor has a collector current 15 mA when the incident optical power at wavelength of 1.26 μm is 125 μW. Estimate optical gain of device, the common emitter current gain if the quantum efficiency of the base-collector photodiode at a wavelength of 1.26 μm is 40%.

c) Explain the concept of silicon reach through Avalanche Photodiode.

d) Explain the various parameters affecting the speed of response of detectors.

e) Write a short note on WDM.

Q.5 Solve Any Two. **12**

a) The radiative and non-radiative recombination lifetimes of the minority carriers in the active region of a double-heterojunction LED are 60 ns and 100 ns respectively. Determine the total carrier recombination lifetime and the power internally generated within the device when the peak emission wavelength is 0.87 μm at a drive current of 40 mA.?

b) Explain the Noise equivalent model of receiver.

c) Explain types of Optical Amplifiers.

3) Figures to the right indicate full marks.
4) Assume suitable data whenever needed and mention it clearly.

MCQ/Objective Type Questions

Duration: 30 Minutes Marks:14

Q.1 Choose the correct alternatives. **14**

1) In 4-neighbours of a pixel p, how far are each of the neighbours located from p?
a) one pixel apart b) four pixels apart
c) alternating pixels d) none of the Mentioned

2) Which of the following image processing approaches is the fastest, most accurate, and flexible?
a) Photographic b) Electronic
c) Digital d) Optical

3) Which of the following is the abbreviation of JPEG?
a) Joint Photographic Experts Group
b) Joint Photographs Expansion Group
c) Joint Photographic Expanded Group
d) Joint Photographic Expansion Group

4) Which of the following is/are considered as type(s) of lowpass filters?
a) Ideal b) Butterworth
c) Gaussian d) All of the mentioned

5) Which of the following operation is done on the pixels in sharpening the image, in the spatial domain?
a) Differentiation b) Median
c) Integration d) Average

6) Dilation followed by erosion is called _____.
a) opening b) Closing
c) blurring d) Translation

7) (A.B).B is equal to _____.
a) A .B b) A+B
c) A o B d) A*B

8) Gaussian noise is referred to as _____.
a) red noise b) Blacknoise
c) White noise d) Normal Noise

9) Streaming stored audio/video, files are compressed and stored on _____.
a) IP b) Server
c) Domain d) Internet

10) What are the method for estimation of optical flow?
a) Bayesian method
b) Gibbs random field motion estimation
c) Optical flow equation and Second order derivatives of optical flow field
d) All of above

11) Scanner incorporates a special sort of camera which is made up of _____.
a) sensor b) chip
c) laser light d) charged coupled device

12) Purpose of restoration is to gain _____.
a) degraded image b) original image
c) pixels d) coordinates

13) In geometric mean filters when alpha is equal to 1 then it works as _____.
a) notch filter b) bandpass filter
c) Weiner filter d) inverse filter

14) 2-D motion, also called _____.
a) Rejected motion b) Projected motion
c) Optical flow motion d) None

Set P

T. Y. (B.Tech.) (Electronics & Telecommunication Engineering) (Semester - II) (New/Old) (CBCS) Examination: March/April – 2026
Image and Video Processing (BTN06610)

Day & Date: Friday, 22-05-2026 Max. Marks: 56
Time: 10:00 AM To 01:00 PM

Instructions: 1) All questions are compulsory.
2) Figure to the right indicate full marks.
3) Assume suitable data whenever needed and mention it clearly.

SECTION – I

Q.2 Attempt the following. (Any Four) **16**

a) Explain in detail sampling and quantization.

b) Explain with neat diagram contrast stretching & thresholding.

c) Explain hit or miss transform, thinning and thickening with Example.

d) Explain Discrete Cosine Transform.

e) Explain Point, line and edge detection.

Q.3 Attempt the following. (Any Two) **12**

a) Explain high pass filters and high boost filters.

b) Explain boundary extraction on binary images with example.

c) Explain Histogram equalization and histogram specification in detail.

SECTION – II

Q.4 Attempt the following. (Any Four) **16**

a) What are the types of noise models?

b) Explain method of Digital video quality measure.

c) Explain optimization method.

d) Draw General formulation in Multi resolution Motion Estimation and explain.

e) Explain in detail Required sampling rates.

Q.5 Attempt the following. (Any Two) **12**

a) Explain restoration using Weiner filters and Inverse filters.

b) Explain in detail with one example sampling in two dimensions and three dimensions.

c) Difference between 2-D motion Vs optical flow.

Set Q

T. Y. (B.Tech.) (Electronics & Telecommunication Engineering) (Semester - II) (New/Old) (CBCS) Examination: March/April – 2026
Image and Video Processing (BTN06610)

Day & Date: Friday, 22-05-2026 Max. Marks: 70
Time: 10:00 AM To 01:00 PM

Instructions: 1) Q. No. 1 is compulsory. It should be solved in the first 30 minutes in Answer Book Page no 03 (Starting page of the Answer Book). Each question carries one mark.
2) Don't forget to Mention question paper set (P/Q/R/S) on top of page.
3) Figures to the right indicate full marks.
4) Assume suitable data whenever needed and mention it clearly.

MCQ/Objective Type Questions

Duration: 30 Minutes Marks:14

Q.1 Choose the correct alternatives. **14**

1) Gaussian noise is referred to as _____.
a) red noise b) Blacknoise
c) White noise d) Normal Noise

2) Streaming stored audio/video, files are compressed and stored on _____.
a) IP b) Server
c) Domain d) Internet

3) What are the method for estimation of optical flow?
a) Bayesian method
b) Gibbs random field motion estimation
c) Optical flow equation and Second order derivatives of optical flow field
d) All of above

4) Scanner incorporates a special sort of camera which is made up of _____.
a) sensor b) chip
c) laser light d) charged coupled device

5) Purpose of restoration is to gain _____.
a) degraded image b) original image
c) pixels d) coordinates

6) In geometric mean filters when alpha is equal to 1 then it works as _____.

a) notch filter
b) bandpass filter
c) Weiner filter
d) inverse filter

7) 2-D motion, also called _____.

a) Rejected motion
b) Projected motion
c) Optical flow motion
d) None

8) In 4-neighbours of a pixel p, how far are each of the neighbours located from p?

a) one pixel apart
b) four pixels apart
c) alternating pixels
d) none of the Mentioned

9) Which of the following image processing approaches is the fastest, most accurate, and flexible?

a) Photographic
b) Electronic
c) Digital
d) Optical

10) Which of the following is the abbreviation of JPEG?

a) Joint Photographic Experts Group
b) Joint Photographs Expansion Group
c) Joint Photographic Expanded Group
d) Joint Photographic Expansion Group

11) Which of the following is/are considered as type(s) of lowpass filters?

a) Ideal
b) Butterworth
c) Gaussian
d) All of the mentioned

12) Which of the following operation is done on the pixels in sharpening the image, in the spatial domain?

a) Differentiation
b) Median
c) Integration
d) Average

13) Dilation followed by erosion is called _____.

a) opening
b) Closing
c) blurring
d) Translation

14) (A.B).B is equal to _____.

a) A .B
b) A+B
c) A o B
d) A*B

MCQ/Objective Type Questions

Duration: 30 Minutes Marks:14

Q.1 Choose the correct Answer. **14**

1) Highest capacity in an optical disc can be obtained by using laser beam of _____ Light.
a) Green b) Red
c) Blue d) Infrared

2) From where is the laser beam not reflected in video disc?
a) From a flat b) From a pit
c) From a land d) From a glass

3) The most common compression technique that is used to create CD quality audio is based on perceptual encoding technique is called _____.
a) JPEG b) H.323
c) SIP d) Predictive encoding

4) In Audio and Video compression, each frame is divided into small grids called picture element or _____.
a) Frame b) Packet
c) Pixel d) Mega pixel

5) Encoding of colour and modulation of audio carrier use the following modulation techniques in SECAM system of France _____.
a) A.M. for both
b) F.M. for both
c) F.M. for colour and A.M. for audio
d) A.M. for colour and F.M. for audio

6) Value of sub carrier in PAL system is _____.
a) 3.58 MHz b) 4.43 MHz
c) 5 MHz d) 7 MHz

7) What is the number of fields per second in India?
a) 25 b) 50
c) 625 d) 15625

8) The value of Kell factor is about _____.
a) 0.3 b) 0.5
c) 0.7 d) 0.9

9) Moving Picture Experts Group (MPEG) is used to compress _____.
a) Frames b) Images
c) Audio d) Video

10) The outdoor unit is connected to indoor DTH received by _____.
a) Wave Guide b) Coaxial cable
c) Twin flat feeder d) Optical fiber

11) Which of the following TV uses CCFL as back lighting?
a) LCD b) LED
c) OLED d) CRT

12) Compact disc surface doesn't wear out because the sensor is _____.
a) Electric b) Magnetic
c) Mechanical d) Optical

13) What is the rotational speed (rpm) of the compact disc at the Center?
a) 200 b) 500
c) 800 d) 100

14) I signal in NTSC colour TV system is located at 57° with respect to _____.
a) Colour burst b) R – Y
c) B – Y d) G – Y

2) Figures to the right indicate full marks.

SECTION – I

Q.2 Attempt the following. (Any Four) **16**

a) Explain working of video detector stage in T.V. receiver.

b) Explain MPEG 2 in detail.

c) Explain the term Kell factor and aspect ratio.

d) What is interlaced scanning? What are its advantages?

e) Compare LCD Vs LED.

Q.3 Attempt the following. (Any Two) **12**

a) Draw a block diagram of SECAM transmitter and explain function of each block.

b) What is DTH (Direct to Home) & what are the specifications of DTH trainer.

c) Explain Video IF amplifier and video detector of color TV system.

SECTION – II

Q.4 Attempt the following. (Any Four) **16**

a) Compare between DVD and CD.

b) What is DVD? State its advantages and types.

c) What is Nyquist Theorem?

d) What is Arithmetic Coding? Explain it in detail.

e) State the various audio video standards.

Q.5 Attempt the following. (Any Two) **12**

a) What do you mean by lossy and lossless compression?

b) Explain digital video 4: 2: 2 format and 4: 2: 0 format in detail.

c) What are different video compression techniques? Compare between them.

SECTION – II

Q.4 Attempt the following. (Any Four) **16**

a) Compare between DVD and CD.

b) What is DVD? State its advantages and types.

c) What is Nyquist Theorem?

d) What is Arithmetic Coding? Explain it in detail.

e) State the various audio video standards.

Q.5 Attempt the following. (Any Two) **12**

a) What do you mean by lossy and lossless compression?

b) Explain digital video 4: 2: 2 format and 4: 2: 0 format in detail.

c) What are different video compression techniques? Compare between them.

T. Y. (B.Tech.) (Electronics & Telecommunication Engineering) (Semester - II) (New/Old) (CBCS) Examination: March/April - 2026
Multimedia Communication Technology (BTN06611)

Day & Date: Friday, 22-05-2026 Max. Marks: 70
Time: 10:00 AM To 01:00 PM

Instructions: 1) Q. No. 1 is compulsory. It should be solved in the first 30 minutes in Answer Book Page no 03 (Starting page of the Answer Book). Each question carries one mark.
2) Don't forget to Mention question paper set (P/Q/R/S) on top of page.
3) Figures to the right indicates full marks.

MCQ/Objective Type Questions

Duration: 30 Minutes Marks:14

Q.1 Choose the correct Answer. **14**

1) Value of sub carrier in PAL system is _____.
a) 3.58 MHz b) 4.43 MHz
c) 5 MHz d) 7 MHz

2) What is the number of fields per second in India?
a) 25 b) 50
c) 625 d) 15625

3) The value of Kell factor is about _____.
a) 0.3 b) 0.5
c) 0.7 d) 0.9

4) Moving Picture Experts Group (MPEG) is used to compress _____.
a) Frames b) Images
c) Audio d) Video

5) The outdoor unit is connected to indoor DTH received by _____.
a) Wave Guide b) Coaxial cable
c) Twin flat feeder d) Optical fiber

6) Which of the following TV uses CCFL as back lighting?
a) LCD b) LED
c) OLED d) CRT

7) Compact disc surface doesn't wear out because the sensor is _____.
a) Electric b) Magnetic
c) Mechanical d) Optical

8) What is the rotational speed (rpm) of the compact disc at the Center?

a) 200 b) 500
c) 800 d) 100

9) I signal in NTSC colour TV system is located at 57° with respect to _____.

a) Colour burst b) R – Y
c) B – Y d) G – Y

10) Highest capacity in an optical disc can be obtained by using laser beam of _____ Light.

a) Green b) Red
c) Blue d) Infrared

11) From where is the laser beam not reflected in video disc?

a) From a flat b) From a pit
c) From a land d) From a glass

12) The most common compression technique that is used to create CD quality audio is based on perceptual encoding technique is called _____.

a) JPEG b) H.323
c) SIP d) Predictive encoding

13) In Audio and Video compression, each frame is divided into small grids called picture element or _____.

a) Frame b) Packet
c) Pixel d) Mega pixel

14) Encoding of colour and modulation of audio carrier use the following modulation techniques in SECAM system of France _____.

a) A.M. for both
b) F.M. for both
c) F.M. for colour and A.M. for audio
d) A.M. for colour and F.M. for audio

Time: 10:00 AM To 01:00 PM

Instructions: 1) All questions are compulsory.
2) Figures to the right indicate full marks.

SECTION – I

Q.2 Attempt the following. (Any Four) **16**

a) Explain working of video detector stage in T.V. receiver.

b) Explain MPEG 2 in detail.

c) Explain the term Kell factor and aspect ratio.

d) What is interlaced scanning? What are its advantages?

e) Compare LCD Vs LED.

Q.3 Attempt the following. (Any Two) **12**

a) Draw a block diagram of SECAM transmitter and explain function of each block.

b) What is DTH (Direct to Home) & what are the specifications of DTH trainer.

c) Explain Video IF amplifier and video detector of color TV system.

SECTION – II

Q.4 Attempt the following. (Any Four) **16**

a) Compare between DVD and CD.

b) What is DVD? State its advantages and types.

c) What is Nyquist Theorem?

d) What is Arithmetic Coding? Explain it in detail.

e) State the various audio video standards.

Q.5 Attempt the following. (Any Two) **12**

a) What do you mean by lossy and lossless compression?

b) Explain digital video 4: 2: 2 format and 4: 2: 0 format in detail.

c) What are different video compression techniques? Compare between them.

MCQ/Objective Type Questions

Duration: 30 Minutes Marks:14

Q.1 Choose the correct alternatives from the given options. 14

1) The water contents in any material are called as ____.
a) Conductivity b) Sensitivity
c) Moisture d) Dryness

2) The resistance range measured by the Wheatstone bridge is?
a) 10 kΩ to a few mega ohms b) 1MΩ to 100 mega ohms
c) 1Ω to few mega ohms d) None of these

3) _____ is the ability of the sensor to indicate the same output over a period of time for a constant input.
a) Stability b) Rectification
c) Impedance d) Dead Zone

4) Why is digital data not easily affected by noise?
a) High power transmission
b) High frequency transmission
c) Low frequency transmission
d) Cannot easily change binary 1 to 0

5) _____ does not requires any additional energy source and directly generates an electrical signal in response to an input stimulus.
a) Active Sensor b) Dead Sensor
c) Passive Sensor d) None of the mentioned

6) The initial response when tune output is not equal to input is called _____.
a) Transient response b) Error response
c) Dynamic response d) None of these

7) Capacitance of a parallel plate air capacitor depends on _____.
   a) Charge on the conducting plates
   b) Area of the conducting plates
   c) Distance of separation between the conducting plates
   d) All of these

8) What is Raspberry Pi?
   a) A Mobile phone
   b) A Gaming Console
   c) A Single Board Computer (CPU)
   d) None of these

9) What is Arduino?
   a) PCB Layout software
   b) Image Editing Software
   c) Open-Source Electronics platform
   d) Text Editor

10) Arduino Mega uses _____ microcontroller.
   a) 8051 b) PIC16F877
   c) Atmega 2560 d) LPC2148

11) Which component of Raspberry Pi allows it to connect to the internet wirelessly?
   a) Ethernet Port b) Wi-Fi Module
   c) Bluetooth Module d) USB Port

12) Raspberry Pi-3 supports inbuild _____.
   a) HDMI connector b) USB Connectors
   c) Micro SD Slot d) All of the mentioned

13) What is the purpose of the Raspberry Pi GPIO pins?
   a) To control external devices and sensors
   b) To connect to the internet
   c) To provide power to the Raspberry Pi
   d) None of these

14) Which programming language is commonly used with Raspberry Pi?
   a) C Programming b) Keil
   c) Python d) Assembly

Sensors and Applications (BTN06605)

Day & Date: Monday, 25-05-2026 Max. Marks: 56
Time: 10:00 AM To 01:00 PM

Instructions: 1) All questions are compulsory.
2) Figures to the right indicate full marks.

Section – I

Q.2 Attempt the following. (Any Four) **16**

a) Define Transducer. Explain various types of transducers with examples.

b) Compare Analog sensors with Digital sensors.

c) Describe various types of batteries used in embedded products.

d) Explain dynamic characteristics of sensor.

e) Explain fundamental properties of capacitor with necessary diagrams. How capacitor is capable to measure physical quantity?

Q.3 Attempt the following. (Any Two) **12**

a) How data transmission carried out using
i) Two-Wire Sensing
ii) Four-Wire Sensing
iii) Six-Wire Sensing

b) Explain Temperature sensitivity, Moisture sensitivity & Strain sensitivity. Define specific resistivity of material with formula.

c) Describe Hall effect and Piezoelectric effect with necessary diagrams.

Section – II

Q.4 Attempt the following. (Any Four) **16**

a) Compare Arduino with Raspberry Pi. State various features associated with Arduino UNO board.

b) Draw pin diagram of Raspberry Pi board. State functions of various pins associated with Raspberry Pi.

c) Write a code to interface alcohol sensor with Arduino. Draw necessary connection diagram.

d) Write a code to blink two LED's alternatively using Raspberry Pi. Draw appropriate interfacing diagram with input output pins.

e) Write sort note on temperature sensor, capacitive sensor & gas sensor with their output format.

Q.5 Attempt the following. (Any Two) **12**

a) Write a program to indicate high temperature above set value with indicating LED and draw connection diagram to interface temperature sensor with Arduino/Raspberry Pi board. State ADC resolution in Arduino.

b) Design circuit and write a program to detect obstacle using Arduino/Raspberry Pi. Compare Arduino w.r.t. microcontrollers.

c) Define pressure. Design a circuit and write a code to interface pressure sensor with Arduino/Raspberry Pi.

MCQ/Objective Type Questions

Duration: 30 Minutes Marks:14

Q.1 Choose the correct answer. **14**

1) What is the role of system administrators in managing the operating system software?
a) Developing new software applications
b) Testing hardware compatibility
c) Ensuring software updates and patches are applied
d) Designing user interfaces

2) What are common kernel management tasks performed by system administrators?
a) Managing user accounts
b) Installing software packages
c) Monitoring system performance
d) Configuring network settings

3) Which open source software license is known for its permissive nature and allows for more flexibility in using and distributing the software?
a) BSD License
b) GNU Lesser General Public License (LGPL)
c) Eclipse Public License
d) Mozilla Public License

4) Which task is primarily associated with system administrators in managing jobs in an open source operating system?
a) Installing new software
b) Managing user accounts
c) Monitoring system performance
d) Scheduling and controlling the execution of processes

5) Which of the following best describes the concept of open source software?
a) Software that can only be used for non-commercial purposes
b) Software that is freely available and allows users to view, modify, and distribute its source code
c) Software that is developed exclusively by large corporations
d) Software that is restricted to a specific operating system

6) Which widely used open source software license is commonly associated with the Apache Software Foundation?
a) Apache License
b) GNU General Public License (GPL)
c) MIT License
d) Eclipse Public License

7) Which command-line utility is commonly used for basic file system management tasks in Linux?
a) ls
b) cp
c) mv
d) fdisk

8) Which directory in the Linux file system hierarchy contains user home directories?
a) /var
b) /usr
c) /home
d) /root

9) Which server is responsible for translating domain names into IP addresses in a network?
a) DNS server
b) DHCP server
c) FTP server
d) Mail server

10) Which utility is commonly used for managing IP tables and configuring firewall rules in an open source operating system?
a) iptables
b) ifconfig
c) netstat
d) ping

11) What is the main function of the GNU Privacy Guard (GPG) in an open source operating system?
a) Configuring network services
b) Managing cryptographic keys and encryption
c) Monitoring system performance
d) Hosting web applications

12) What is the primary purpose of executing a shell script in an open source operating system?
a) To compile source code
b) To run system commands
c) To create user accounts
d) To configure network settings

13) In shell scripting, how can data be parsed from a downloaded web page?

a) Using regular expressions
b) Using JSON parsing libraries
c) Using SQL queries
d) Using XML processing tools

14) Which of the following is a cloud-based solution for Git repositories?

a) Github
b) Gitlab
c) BitBucket
d) All of the above

Set **P**

T. Y. (B.Tech.) (Electronics & Telecommunication Engineering) (Semester - II) (New/Old) (CBCS) Examination: March/April - 2026
Open Source Technologies (BTN06606)

Day & Date: Monday, 25-05-2026 Max. Marks: 56
Time: 10:00 AM To 01:00 PM

Instructions: 1) All questions are compulsory.
2) Figures to the right indicate full marks.

Section – I

Q.2 Answer the following. (Any Four) **16**

a) List and explain the advantages of using open source software.

b) Discuss the VI editor in Linux, including its basic usage, navigation, and editing commands.

c) Explain the concept of sed (stream editor) in Linux and how it can be used for text manipulation tasks.

d) What is FTP? How can FTP servers be configured in Linux? Discuss key FTP server software options and their security implications.

e) What is a DNS server? How can DNS servers be configured in Linux? Discuss different DNS server software options and their key features.

Q.3 Answer the following. (Any Two) **12**

a) Explain the importance of community involvement and collaboration in the development and maintenance of open source software projects.

b) What is a DHCP server? How can DHCP servers be configured in Linux? Explain how DHCP can be used to automate IP address assignment and configuration for network devices.

c) How can user, group, and permission settings be managed in Linux? Discuss key commands and tools for creating, modifying, and deleting user accounts, groups, and file permissions.

Section – II

Q.4 Answer the following. (Any Four) **16**

a) What are control structures in Bash shell scripts? How can if statements, for loops, and while loops be used to control program flow?

b) What are the steps involved in obtaining and installing Git on your system? Are there any specific requirements or considerations?

c) What are the different ways to remove files in Git? How does “git reset” remove staged files, and how does “git rm” remove committed files?

d) How can you list and view existing branches in a Git repository? What is the command used to accomplish this?

e) Explain the process of committing files in Git. What does the “git commit” command do, and why is it important in version control?

Q.5 Answer the following. (Any Two) **12**

a) Define and explain the key terminology associated with Git, such as clone, working tree, checkout, staging area, add, commit, push, pull, and stash?

b) How can functions be created and used in Bash shell scripts? Discuss different types of functions, including library functions and user-defined functions.

c) What is the process of checking out a branch in Git? How does it switch the working directory to a different branch and what are the implications of this action?

Seat No.

T. Y. (B.Tech.) (Electronics & Telecommunication Engineering) (Semester - II) (New/Old) (CBCS) Examination: March/April - 2026
Open Source Technologies (BTN06606)

Day & Date: Monday, 25-05-2026 Max. Marks: 70
Time: 10:00 AM To 01:00 PM

Instructions: 1) Q. No. 1 is compulsory. It should be solved in the first 30 minutes in Answer Book Page no 03 (Starting page of the Answer Book). Each question carries one mark.
2) Don't forget to Mention question paper set (P/Q/R/S) on top of page
3) Figures to the right indicate full marks.

MCQ/Objective Type Questions

Duration: 30 Minutes Marks:14

Q.1 Choose the correct answer. **14**

1) Which directory in the Linux file system hierarchy contains user home directories?
a) /var b) /usr
c) /home d) /root

2) Which server is responsible for translating domain names into IP addresses in a network?
a) DNS server b) DHCP server
c) FTP server d) Mail server

3) Which utility is commonly used for managing IP tables and configuring firewall rules in an open source operating system?
a) iptables b) ifconfig
c) netstat d) ping

4) What is the main function of the GNU Privacy Guard (GPG) in an open source operating system?
a) Configuring network services
b) Managing cryptographic keys and encryption
c) Monitoring system performance
d) Hosting web applications

5) What is the primary purpose of executing a shell script in an open source operating system?
a) To compile source code
b) To run system commands
c) To create user accounts
d) To configure network settings

6) In shell scripting, how can data be parsed from a downloaded web page?
   a) Using regular expressions
   b) Using JSON parsing libraries
   c) Using SQL queries
   d) Using XML processing tools

7) Which of the following is a cloud-based solution for Git repositories?
   a) Github
   b) Gitlab
   c) BitBucket
   d) All of the above

8) What is the role of system administrators in managing the operating system software?
   a) Developing new software applications
   b) Testing hardware compatibility
   c) Ensuring software updates and patches are applied
   d) Designing user interfaces

9) What are common kernel management tasks performed by system administrators?
   a) Managing user accounts
   b) Installing software packages
   c) Monitoring system performance
   d) Configuring network settings

10) Which open source software license is known for its permissive nature and allows for more flexibility in using and distributing the software?
   a) BSD License
   b) GNU Lesser General Public License (LGPL)
   c) Eclipse Public License
   d) Mozilla Public License

11) Which task is primarily associated with system administrators in managing jobs in an open source operating system?
   a) Installing new software
   b) Managing user accounts
   c) Monitoring system performance
   d) Scheduling and controlling the execution of processes

12) Which of the following best describes the concept of open source software?
   a) Software that can only be used for non-commercial purposes
   b) Software that is freely available and allows users to view, modify, and distribute its source code
   c) Software that is developed exclusively by large corporations
   d) Software that is restricted to a specific operating system

13) Which widely used open source software license is commonly associated with the Apache Software Foundation?

a) Apache License
b) GNU General Public License (GPL)
c) MIT License
d) Eclipse Public License

14) Which command-line utility is commonly used for basic file system management tasks in Linux?

a) ls
b) cp
c) mv
d) fdisk

MCQ/Objective Type Questions

Duration: 30 Minutes Marks:14

Q.1 Choose the correct alternatives from the given options. 14

1) The term machine learning was coined by _____.
a) James Gosling b) Arthur Samuel
c) Guido van Rossum d) None of the above

2) Which of the following is not a supervised learning?
a) PCA b) Naive Bayesian
c) Linear Regression d) Decision Tree

3) Real-Time decisions, Game Al, Learning Tasks, Skill acquisition, and Robot Navigation are applications of _____.
a) Reinforcement Learning
b) Supervised Learning: Classification
c) Unsupervised Learning: Regression
d) None of the above

4) _____ is a disadvantage of decision trees.
a) Decision trees are robust to outliers
b) Decision trees are prone to be overfit
c) Both a) and b)
d) None of the above

5) _____ is a part of machine learning that works with neural networks.
a) Artificial intelligence b) Deep learning
c) Both a) and b) d) None of the above

6) Which machine learning models are trained to make a series of decisions based on the rewards and feedback they receive for their actions?
a) Supervised learning b) Unsupervised learning
c) Reinforcement learning d) All of the above

7) The most common issue when using ML is _____.
a) Lack of skilled resources b) Inadequate Infrastructure
c) Poor Data Quality d) None of the above

8) _____ is a widely used and effective machine learning algorithm based on the idea of bagging.
a) Regression b) Classification
c) Decision Tree d) Random Forest

9) What is machine learning?
a) Selective acquisition of knowledge through the use of manual programs
b) Selective acquisition of knowledge through the use of computer programs
c) Autonomous acquisition of knowledge through the use of manual programs
d) Autonomous acquisition of knowledge through the use of computer programs

10) How can you handle missing or corrupted data in a dataset?
a) Drop missing rows or columns
b) Assign a unique category to missing values
c) Replace missing values with mean/median/mode
d) All of the above

11) Machine learning algorithms build a model based on sample data, known as _____.
a) Training Data b) Transfer Data
c) Data Training d) None of the above

12) _____ is the machine learning algorithms that can be used with labeled data.
a) Regression algorithms b) Clustering algorithms
c) Association algorithms d) All of the above

13) _____ is used as an input to the machine learning model for training and prediction purposes.
a) Feature b) Feature Vector
c) Both a) and b) d) None of the above

14) _____ is the scenario when the model fails to decipher the underlying trend in the input data.
a) Overfitting b) Underfitting
c) Both a) and b) d) None of the above

T. Y. (B.Tech.) (Electronics & Telecommunication Engineering) (Semester - II) (New/Old) (CBCS) Examination: March/April - 2026
AI/MI - Machine Learning (BTN06612)

Day & Date: Wednesday, 27-05-2026 Max. Marks: 56
Time: 10:00 AM To 01:00 PM

Instructions: 1) All questions are compulsory.
2) Figures to the right indicate full marks.

SECTION – I

Q.2 Attempt Any Four. **16**

a) Explain feature construction and transformation in brief.

b) Explain Multiclass Classification with examples.

c) Explain concept of perceptron with neat diagram.

d) Explain Unsupervised type of learning with examples.

e) Explain regression. Illustrate K means clustering algorithm with an example.

Q.3 Attempt Any Two. **12**

a) Distinguish between supervised learning and Reinforcement learning. Illustrate with real life examples.

b) Compare Classification with regression with an example.

c) Distinguish between overfitting and underfitting. How it can affect model generalization?

SECTION – II

Q.4 Attempt Any Four. **16**

a) Explain Feed Forward Network & Back Propagation Algorithm.

b) Explain naïve bayes classification in brief.

c) Describe activation function. Explain different types of activation functions in brief.

d) Describe the Decision Tree algorithm in brief.

e) What is ANN? Explain architecture of ANN in brief.

Q.5 Attempt Any Two. **12**

a) Explain Self driving cars as Machine Learning application in brief.

b) Discuss Random Forest algorithm with example. Mention its advantages and disadvantages.

c) Differentiate between Deep learning vs Machine Learning.

Set **R**

T. Y. (B.Tech.) (Electronics & Telecommunication Engineering) (Semester - II) (New/Old) (CBCS) Examination: March/April - 2026
AI/MI - Machine Learning (BTN06612)

Day & Date: Wednesday, 27-05-2026 Max. Marks: 70
Time: 10:00 AM To 01:00 PM

Instructions: 1) Q. No. 1 is compulsory. It should be solved in the first 30 minutes in Answer Book Page no 03 (Starting page of the Answer Book). Each question carries one mark.
2) Don't forget to Mention question paper set (P/Q/R/S) on top of page.
3) Figures to the right indicate full marks.

MCQ/Objective Type Questions

Duration: 30 Minutes Marks:14

Q.1 Choose the correct alternatives from the given options. 14

1) Machine learning algorithms build a model based on sample data, known as _____.
a) Training Data b) Transfer Data
c) Data Training d) None of the above

2) _____ is the machine learning algorithms that can be used with labeled data.
a) Regression algorithms b) Clustering algorithms
c) Association algorithms d) All of the above

3) _____ is used as an input to the machine learning model for training and prediction purposes.
a) Feature b) Feature Vector
c) Both a) and b) d) None of the above

4) _____ is the scenario when the model fails to decipher the underlying trend in the input data.
a) Overfitting b) Underfitting
c) Both a) and b) d) None of the above

5) The term machine learning was coined by _____.
a) James Gosling b) Arthur Samuel
c) Guido van Rossum d) None of the above

6) Which of the following is not a supervised learning?
a) PCA b) Naive Bayesian
c) Linear Regression d) Decision Tree

7) Real-Time decisions, Game AI, Learning Tasks, Skill acquisition, and Robot Navigation are applications of _____.
a) Reinforcement Learning
b) Supervised Learning: Classification
c) Unsupervised Learning: Regression
d) None of the above

8) _____ is a disadvantage of decision trees.
a) Decision trees are robust to outliers
b) Decision trees are prone to be overfit
c) Both a) and b)
d) None of the above

9) _____ is a part of machine learning that works with neural networks.
a) Artificial intelligence
b) Deep learning
c) Both a) and b)
d) None of the above

10) Which machine learning models are trained to make a series of decisions based on the rewards and feedback they receive for their actions?
a) Supervised learning
b) Unsupervised learning
c) Reinforcement learning
d) All of the above

11) The most common issue when using ML is _____.
a) Lack of skilled resources
b) Inadequate Infrastructure
c) Poor Data Quality
d) None of the above

12) _____ is a widely used and effective machine learning algorithm based on the idea of bagging.
a) Regression
b) Classification
c) Decision Tree
d) Random Forest

13) What is machine learning?
a) Selective acquisition of knowledge through the use of manual programs
b) Selective acquisition of knowledge through the use of computer programs
c) Autonomous acquisition of knowledge through the use of manual programs
d) Autonomous acquisition of knowledge through the use of computer programs

14) How can you handle missing or corrupted data in a dataset?
a) Drop missing rows or columns
b) Assign a unique category to missing values
c) Replace missing values with mean/median/mode
d) All of the above

MCQ/Objective Type Questions

Duration: 30 Minutes Marks:14

Q.1 Choose the correct alternatives from the options. 14

1) India's first passenger train from Bori Bunder (Mumbai) to Thane was run on which of the following gauge?
a) Meter gauge b) Standard gauge
c) Broad gauge d) Narrow gauge

2) Which signal gives permission to the train for leaving the platform?
a) Semaphore Signal b) Warner Signal
c) Starter signal d) None of these

3) In locomotives Faults are logged in _____.
a) Non-Volatile Memory b) Volatile Memory
c) Flash Memory d) Stack

4) India uses ____ AC traction on its electrified tracks.
a) 25 kV 50 Hz b) 30 kV 50 Hz
c) 26 kV 50 Hz d) 230V 50 Hz

5) Which of the following is the most important strategic reason for the construction of a new railway line?
a) For creating jobs
b) Because of absence of a railway line
c) To increase tourists
d) To make movement of defense forces easier in case of emergency

6) Which of following is function of Data loggers?
a) Monitor and record b) Documentation
c) Analyze and validate d) All of the Above

7) Which of the following element is not used in an automatic control system?
   a) Final control element
   b) Sensor
   c) Oscillator
   d) Error detector

8) Liquid level control system is the example of _____.
   a) Open loop
   b) Closed loop
   c) SISO
   d) MIMO

9) What is Control System?
   a) Control system is a system in which the output is controlled by varying the input
   b) Control system is a device that will not manage or regulate the behaviour of other devices using control loops.
   c) Control system is a feedback system that can be both positive and negative
   d) Control System is a system in which the input is controlled by varying the output

10) Which of the following is not the feature of a modern control system?
   a) Correct power level
   b) No oscillation
   c) Quick response
   d) Accuracy

11) Indian Railways National Train Enquiry System (NTES) NOT provides information v about _____.
   a) Train schedule
   b) Live stations
   c) Trains B/W stations
   d) Reservations

12) What should be the nature of bandwidth for a good control system?
   a) Small
   b) Medium
   c) Large
   d) All of the mentioned

13) In a stable control system backlash can cause which of the following?
   a) Overdamping
   b) Low-level oscillations
   c) Underdamping
   d) Poor stability at reduced values of open loop gain

14) The input signals to control systems are not known fully ahead of time, the characteristics of control system which suddenly strain a control system are _____.
   a) Constant velocity and acceleration
   b) Sudden shock
   c) Sudden change
   d) All of the mentioned

c) Broad gauge
d) Narrow gauge

11) Which signal gives permission to the train for leaving the platform?
a) Semaphore Signal
b) Warner Signal
c) Starter signal
d) None of these

12) In locomotives Faults are logged in _____.
a) Non-Volatile Memory
b) Volatile Memory
c) Flash Memory
d) Stack

13) India uses ____ AC traction on its electrified tracks.
a) 25 kV 50 Hz
b) 30 kV 50 Hz
c) 26 kV 50 Hz
d) 230V 50 Hz

14) Which of the following is the most important strategic reason for the construction of a new railway line?
a) For creating jobs
b) Because of absence of a railway line
c) To increase tourists
d) To make movement of defense forces easier in case of emergency

T. Y. (B.Tech.) (Electronics & Telecommunication Engineering) (Semester - II) (New/Old) (CBCS) Examination: March/April- 2026
Applications of IT and Control Engineering in Railway (BTN06615)

Day & Date: Wednesday, 27-05-2026 Max. Marks: 56
Time: 10:00 AM To 01:00 PM

Instructions: 1) All questions are compulsory.
2) Figures to the right indicate full marks.

SECTION – I

Q.2 Attempt Any Four. **16**

a) What is FOIS? Give Details

b) What is typical arrangement of PRS Terminals?

c) What are Basic requirements of UTS Network?

d) What is mean by freight operations? Explain.

e) Which Network topologies used in FOIS? Give Details.

Q.3 Attempt Any Two. **12**

a) Explain RMS and TMS.

b) Give Application of Information Technology in Railways.

c) What is Public Address System? Explain

SECTION – II

Q.4 Attempt Any Four. **16**

a) Write a short note on Auxiliary Warning System.

b) Explain application of control system in Liquid Level system.

c) Give Any four rules of block diagram reduction.

d) Give the transfer function of a closed-loop system with proper equation.

e) What is Train Protection & Warning System (TPWS)? Explain.

Q.5 Attempt Any Two. **12**

a) What is mean by data logger? Give its applications.

b) Explain Train Traffic Control Data Communications and Networking.

c) Write note on Robotic control system.

Cyber Security - Cyber Forensic (BTN06616)

Day & Date: Wednesday, 27-05-2026 Max. Marks: 70
Time: 10:00 AM To 01:00 PM

Instructions: 1) Q. No. 1 is compulsory. It should be solved in the first 30 minutes in Answer Book Page no 03 (Starting page of the Answer Book). Each question carries one mark.
2) Don't forget to Mention question paper set (P/Q/R/S) on top of Page.
3) Figures to the right indicate full marks.

MCQ/Objective Type Questions

Duration: 30 Minutes Marks:14

Q.1 Choose the correct alternatives from the given options. 14

1) What does cyber security protect?
a) Cyber security protects criminals
b) Cyber security protects internet-connected systems
c) Cyber security protects hackers
d) None of the mentioned

2) Which of the following do cyber attackers commonly target for fetching the IP address of a victim user?
a) IP tracker b) Emails
c) Websites d) Web pages

3) Password cracking is a major part of which hacking methodology?
a) System hacking b) Social engineering
c) Network mapping d) Data mining

4) Which of the following is true about Trojan horse?
a) They replicate themselves
b) They disguise themselves as legitimate software to perform malicious actions
c) They are always detected by antivirus software
d) They only affect mobile devices

5) What is an SQL Injection attack?
a) Injecting viruses into a database
b) Inserting malicious SQL statements into an entry field to manipulate a database
c) Encrypting SQL databases
d) Deleting all SQL databases

6) What is the primary reason cybercrime poses a unique challenge for law enforcement?
   a) It is always committed by minors
   b) it requires no technical knowledge
   c) It often crosses international borders and involves complex technology
   d) It only happens in developed countries

7) What is the purpose of a digital signature under the Indian IT Act?
   a) To encrypt emails only
   b) To authenticate the origin and ensure the integrity of electronic documents
   c) To block websites
   d) To create viruses

8) Which of the following best describes digital forensics science?
   a) The study of computer programming languages
   b) The process of identifying, preserving, analyzing, and documenting digital evidence
   c) The creation of new encryption algorithms
   d) The management of physical crime scenes

9) Which of the following is the correct order of the digital forensics life cycle?
   a) Identification, Preservation, Collection, Examination, Analysis, Presentation, Documentation
   b) Collection, Analysis, Identification, Preservation, Documentation, Presentation, Examination
   c) Documentation, Collection, Identification, Analysis, Examination, Preservation, Presentation
   d) Analysis, Collection, Documentation, Examination, Identification, Presentation, Preservation

10) Why is preparation and authorization important before starting a network forensic investigation?
   a) To ensure legal compliance and proper access to data
   b) To speed up the process
   c) To avoid documentation
   d) To delete irrelevant logs

11) What are “class characteristics” in network forensic evidence?
   a) Features unique to a single device
   b) General attributes shared by a group of devices or data packets
   c) Only timestamps
   d) Passwords

12) Which of the following is NOT typically included in mobile device forensics?
a) Acquiring deleted SMS messages
b) Recovering call logs
c) Designing new mobile operating systems
d) Extracting geolocation data

13) Why is mobile forensics increasingly important for investigators?
a) Mobile devices rarely store user data
b) Mobile devices are now central to communication and often contain critical evidence
c) Mobile devices are not used in crimes
d) Mobile devices cannot be analyzed

14) What is a major technical challenge in mobile device forensics?
a) All devices use the same file system and connectors
b) Rapidly changing device models, operating systems, and storage methods
c) Devices are never encrypted
d) All data is always accessible

Instructions: 1) All questions are compulsory.
2) Figures to the right indicate full marks.

SECTION – I

Q.2 Attempt Any Four. **16**

a) Differentiate between cyber-dependent and cyber-enabled crimes.

b) What is social engineering, and how is it used in planning cybercrimes?

c) What is a proxy server? State two uses of proxy servers in cyber security.

d) What is a keylogger? How can it be used in cybercrime?

e) Briefly describe the role of international legal frameworks in combating cybercrime.

Q.3 Attempt Any Two. **12**

a) Analyze the evolution of cybercriminal profiles from early hackers to modern cybercrime syndicates.

b) Explain the role of backdoors in targeted attacks and discuss methods to detect and prevent them.

c) Discuss with examples how cyber law protects individuals and organizations in India.

SECTION – II

Q.4 Attempt Any Four. **16**

a) State the motivations for computer intrusion or theft of information in contemporary society.

b) What is digital evidence? Give two examples.

c) List any two challenges faced by forensic investigators when handling digital evidence.

d) Differentiate between class and individual characteristics in network evidence.

e) List any four key hardware or software characteristics of modern cell phones relevant to forensics.

Q.5 Attempt Any Two. **12**

a) Explain the need for computer forensics in combating cybercrime, with examples.

b) Explain the differences between computer forensics and network forensics in terms of data focus and investigation approach.

c) Discuss how the proliferation of smartphones has influenced the field of digital forensics.

3) Figures to right indicates full marks.

MCQ/Objective Type Questions

Duration: 30 Minutes Marks:14

Q.1 Choose correct option. **14**

1) What is the term known as on which the machine learning algorithms build a model based on sample data?
a) Data training b) Training data
c) Transfer data d) None of the above

2) Which of the following machine learning algorithm is based upon the idea of bagging?
a) Decision tree b) Classification
c) Regression d) Random Forest

3) What is called the average squared difference between classifier predicted output and actual output?
a) Mean relative error b) Mean squared error
c) Mean absolute error d) Root mean squared error

4) In following type of feature selection method we start with empty feature set _____.
a) Forward feature selection b) Backward feature selection
c) Both a) and b) d) None of the above

5) A feature F1 can take certain value: A, B, C, D, E, & F and represents grade of students from a college. Here feature type is _____.
a) Nominal b) Ordinal
c) Categorical d) Boolean

6) _____ is the machine learning algorithms that can be used with labeled data.
a) Regression algorithms b) Clustering algorithms
c) Association algorithms d) All of the above

7) Which of the following is FALSE about Deep Learning and Machine Learning algorithms?
   a) Deep learning algorithms work efficiently on a high amount of data
   b) Feature Extraction needs to be done manually in both ML and DL algorithms
   c) Deep Learning algorithms are best suited for unstructured data
   d) Deep Learning algorithms require high computational power

8) When performing regression or classification which of the following is the correct way to preprocess the data?
   a) Normalize the data ---PCA ---Training
   b) PCA --- Normalize PCA output ---Training
   c) Normalize the data --- PCA --- Normalize PCA output ---Training
   d) None of the Above

9) The most widely used metrics and tools to access a classification model are _____.
   a) Confusion Matrix
   b) Cost Sensitive accuracy
   c) Area under the ROC curve
   d) All of the above

10) What is over fitting?
   a) Poor result in Training and poor result in test
   b) Great result in Training and poor result in test
   c) Great result in Training and Great result in test
   d) Poor result in Training and Great result in test

11) What is Perceptron?
   a) A single layer feed-forward neural network with pre-processing
   b) A neural network that contains feedback
   c) A double layer auto-associative neural network
   d) An auto-associative neural network

12) What is back propagation?
   a) It is another name given to the curvy function in the Perceptron
   b) It is the transmission of error back through the network to allow weights to be adjusted so that the network can learn
   c) Both a) and b)
   d) None of the above

13) Which of the following is the disadvantage of Decision Tree?
   a) Factor Analysis
   b) Decision tree are robust to outliers
   c) Decision tree are prone to be over fit
   d) None of the above

14) Disadvantages of Naïve Bayes Classifier _____.

a) Naive Bayes assumes that all features are independent or unrelated, so it cannot learn the relationship between
b) It performs well in Multi-class predictions as compared to the other
c) Naïve Bayes is one of the fast and easy ML algorithms to predict a class of
d) It is the most popular choice for text classification problems

T. Y. (B.Tech.) (Electronics & Telecommunication Engineering) (Semester - II) (New/Old) (CBCS) Examination: March/April – 2026
Data Science Machine Learning (BTN06613)

Day & Date: Wednesday, 27-05-2026 Max. Marks: 56
Time: 10:00 AM To 01:00 PM

Instructions: 1) All questions are compulsory.
2) Figures to the right indicate full marks.

SECTION – I

Q.2 Solve Any Four of the following. **16**

a) What is Machine Learning? Give examples of Machine Learning Problem.

b) Explain Predictive and descriptive tasks.

c) Explain Reinforcement learning with examples.

d) Explain Feature construction and Transformation.

e) What is hypothesis space and inductive bias?

Q.3 Solve Any Two of the following. **12**

a) Differentiate between Machine Learning and Deep Learning.

b) Explain in detail about accessing Performance of Regression and Classification.

c) What is the Linear Regression Algorithm? How does Linear Regression work?

SECTION – II

Q.4 Solve Any Four of the following. **16**

a) What are Neural network Elements? Explain Basic Perceptron.

b) Explain the types of activation functions in ANN.

c) What is Deep learning? Explain about it.

d) Explain nearest neighbor classification with Examples.

e) What is the Association rule in ML explain with an example?

Q.5 Solve Any Two of the following. **12**

a) Explain Feed forward Network and Back Propagation Algorithm with examples.

b) Explain Image and Speech Recognition.

c) Explain the two Hierarchical Clustering techniques.

Set Q

T. Y. (B.Tech.) (Electronics & Telecommunication Engineering) (Semester - II) (New/Old) (CBCS) Examination: March/April - 2026
Data Science Machine Learning (BTN06613)

Day & Date: Wednesday, 27-05-2026 Max. Marks: 70
Time: 10:00 AM To 01:00 PM

Instructions: 1) Q. No. 1 is compulsory. It should be solved in the first 30 minutes in Answer Book Page no 03 (Starting page of the Answer Book). Each question carries one mark.
2) Don't forget to Mention question paper set (P/Q/R/S) on top of page.
3) Figures to right indicates full marks.

MCQ/Objective Type Questions

Duration: 30 Minutes Marks:14

Q.1 Choose correct option. **14**

1) When performing regression or classification which of the following is the correct way to preprocess the data?
a) Normalize the data ---PCA ---Training
b) PCA --- Normalize PCA output ---Training
c) Normalize the data --- PCA --- Normalize PCA output ---Training
d) None of the Above

2) The most widely used metrics and tools to access a classification model are _____.
a) Confusion Matrix b) Cost Sensitive accuracy
c) Area under the ROC curve d) All of the above

3) What is over fitting?
a) Poor result in Training and poor result in test
b) Great result in Training and poor result in test
c) Great result in Training and Great result in test
d) Poor result in Training and Great result in test

4) What is Perceptron?
a) A single layer feed-forward neural network with pre-processing
b) A neural network that contains feedback
c) A double layer auto-associative neural network
d) An auto-associative neural network

5) What is back propagation?
a) It is another name given to the curvy function in the Perceptron
b) It is the transmission of error back through the network to allow weights to be adjusted so that the network can learn
c) Both a) and b)
d) None of the above

6) Which of the following is the disadvantage of Decision Tree?
   a) Factor Analysis
   b) Decision tree are robust to outliers
   c) Decision tree are prone to be over fit
   d) None of the above

7) Disadvantages of Naïve Bayes Classifier _____.
   a) Naive Bayes assumes that all features are independent or unrelated, so it cannot learn the relationship between
   b) It performs well in Multi-class predictions as compared to the other
   c) Naïve Bayes is one of the fast and easy ML algorithms to predict a class of
   d) It is the most popular choice for text classification problems

8) What is the term known as on which the machine learning algorithms build a model based on sample data?
   a) Data training
   b) Training data
   c) Transfer data
   d) None of the above

9) Which of the following machine learning algorithm is based upon the idea of bagging?
   a) Decision tree
   b) Classification
   c) Regression
   d) Random Forest

10) What is called the average squared difference between classifier predicted output and actual output?
   a) Mean relative error
   b) Mean squared error
   c) Mean absolute error
   d) Root mean squared error

11) In following type of feature selection method we start with empty feature set _____.
   a) Forward feature selection
   b) Backward feature selection
   c) Both a) and b)
   d) None of the above

12) A feature F1 can take certain value: A, B, C, D, E, & F and represents grade of students from a college. Here feature type is _____.
   a) Nominal
   b) Ordinal
   c) Categorical
   d) Boolean

13) _____ is the machine learning algorithms that can be used with labeled data.
   a) Regression algorithms
   b) Clustering algorithms
   c) Association algorithms
   d) All of the above

14) Which of the following is FALSE about Deep Learning and Machine Learning algorithms?

a) Deep learning algorithms work efficiently on a high amount of data
b) Feature Extraction needs to be done manually in both ML and DL algorithms
c) Deep Learning algorithms are best suited for unstructured data
d) Deep Learning algorithms require high computational power

MCQ/Objective Type Questions

Duration: 30 Minutes Marks:14

Q.1 Choose the correct option. 14

1) The dominant mode in rectangular waveguide is _____.
a) TE10 b) TE11
c) TE01 d) TE12

2) The waveguide can be considered as _____.
a) low pass filter b) high pass filter
c) band pass filter d) notch filter

3) E-plane Tee is called _____.
a) Current divider b) Power device
c) 3 dB splitter d) Reciprocal device

4) Circulator and Isolator works on the principle of _____.
a) Faraday's rod b) Faraday's Rotation
c) Reciprocity theorem d) None of these

5) In case of directional coupler amount of coupling is decided by _____.
a) Hole dimensions b) Number of holes
c) Both of these d) None of these

6) Due to _____ property of microwaves it can be used in radar.
a) heating b) absorption
c) penetration d) directive

7) In reflex klystron as repeller voltage is increases output power _____.
a) remains constant b) increases
c) decreases d) None of these

8) PIN diode is _____ type solid state device.
a) Non-linear reactance
b) Non-linear resistance
c) Controllable impedance
d) Negative resistance

9) High power measurement can be done by _____ technique.
a) Balometer
b) Thermister
c) Special load
d) Calorimetric wattmeter

10) In TWT electron beam is _____ and RF field is _____.
a) Travelling, Stationary
b) Stationary, Stationary
c) Travelling, Travelling
d) Stationary, Travelling

11) In case of 2 cavity Klystron at the output cavity _____ modulation takes place.
a) Velocity
b) Current
c) Bunching
d) Catching

12) The _____ attenuation measurement technique is more accurate.
a) Power Ratio Method
b) Double minima method
c) Using Slotted line
d) RF substitution method

13) In a negative resistance of TED's the current and voltage are _____.
a) Out of phase
b) In phase
c) Out of phase by 180 deg.
d) None of these

14) Reflex klystron is _____ microwave generator.
a) single cavity variable freq.
b) single cavity constant freq.
c) two cavity variable freq.
d) two cavity constant freq.

Section – I

Q.2 Attempt any THREE. **12**

a) Given rectangular waveguide 3×1cm operating at 9GHz. Calculate cut off wavelength and guide wavelength for TE10 mode.

b) Draw and explain Faraday's four port circulator.

c) Draw a neat diagram of magic TEE. Explain it's working.

d) What is significance of S matrix? List properties of S matrix.

Q.3 Attempt any TWO. **16**

a) What is Faraday's rotation? Explain working of Isolator with a neat phasor diagram.

b) Derive 'S' matrix for H plane tee. Explain why it is called 3dB splitter.

c) An air-filled rectangular waveguide has dimensions 2.5 × 5 cm. The signal wavelength is 4.5cm. Compute the following for TE10 mode.
i) Cut-off frequency
ii) Wavelength in the waveguide
iii) Phase velocity in the waveguide
iv) Group velocity in the waveguide

Section – II

Q.4 Answer any THREE. **12**

a) With the help of block diagram explain phase shift measurement technique.

b) With the help of two valley theory explain in detail Gunn diode.

c) In two cavity Klystron explain velocity modulation process.

d) Write similarities and differences between two cavity Klystron and TWT.

Q.5 Answer any TWO. **16**

a) With the help of block diagram explain power ratio method for measurement of attenuation. What are the limitations of this method? Also explain RF substitution method for measurement of attenuation.

b) What are TEDs? Explain IMPATT and TRAPATT diodes.

c) With the help of neat diagram explain zero mode and pi mode of magnetron.

4) Assume suitable data if necessary.

MCQ/Objective Type Questions

Duration: 30 Minutes Marks:14

Q.1 Choose the correct option. 14

1) In case of 2 cavity Klystron at the output cavity _____ modulation takes place.
a) Velocity b) Current
c) Bunching d) Catching

2) The _____ attenuation measurement technique is more accurate.
a) Power Ratio Method b) Double minima method
c) Using Slotted line d) RF substitution method

3) In a negative resistance of TED's the current and voltage are _____.
a) Out of phase b) In phase
c) Out of phase by 180 deg. d) None of these

4) Reflex klystron is _____ microwave generator.
a) single cavity variable freq. b) single cavity constant freq.
c) two cavity variable freq. d) two cavity constant freq.

5) The dominant mode in rectangular waveguide is _____.
a) TE10 b) TE11
c) TE01 d) TE12

6) The waveguide can be considered as _____.
a) low pass filter b) high pass filter
c) band pass filter d) notch filter

7) E-plane Tee is called _____.
a) Current divider b) Power device
c) 3 dB splitter d) Reciprocal device

8) Circulator and Isolator works on the principle of _____.
a) Faraday's rod
b) Faraday's Rotation
c) Reciprocity theorem
d) None of these

9) In case of directional coupler amount of coupling is decided by _____.
a) Hole dimensions
b) Number of holes
c) Both of these
d) None of these

10) Due to _____ property of microwaves it can be used in radar.
a) heating
b) absorption
c) penetration
d) directive

11) In reflex klystron as repeller voltage is increases output power _____.
a) remains constant
b) increases
c) decreases
d) None of these

12) PIN diode is _____ type solid state device.
a) Non-linear reactance
b) Non-linear resistance
c) Controllable impedance
d) Negative resistance

13) High power measurement can be done by _____ technique.
a) Balometer
b) Thermister
c) Special load
d) Calorimetric wattmeter

14) In TWT electron beam is _____ and RF field is _____.
a) Travelling, Stationary
b) Stationary, Stationary
c) Travelling, Travelling
d) Stationary, Travelling

Set **R**

Fourth. Y. (B.Tech.) (Electronics & Telecommunication Engineering) (Semester - I) (New) (CBCS) Examination: March/April – 2026
Microwave Engineering (BTN06701)

Day & Date: Saturday, 02-05-2026 Max. Marks: 56
Time: 03:00 PM To 06:00 PM

Instructions: 1) All questions are compulsory.
2) Figures to the right indicate full marks.
3) Assume suitable data if necessary.

Section – I

Q.2 Attempt any THREE. **12**

a) Given rectangular waveguide 3×1cm operating at 9GHz. Calculate cut off wavelength and guide wavelength for TE10 mode.

b) Draw and explain Faraday's four port circulator.

c) Draw a neat diagram of magic TEE. Explain it's working.

d) What is significance of S matrix? List properties of S matrix.

Q.3 Attempt any TWO. **16**

a) What is Faraday's rotation? Explain working of Isolator with a neat phasor diagram.

b) Derive 'S' matrix for H plane tee. Explain why it is called 3dB splitter.

c) An air-filled rectangular waveguide has dimensions 2.5 × 5 cm. The signal wavelength is 4.5cm. Compute the following for TE10 mode.
i) Cut-off frequency
ii) Wavelength in the waveguide
iii) Phase velocity in the waveguide
iv) Group velocity in the waveguide

Section – II

Q.4 Answer any THREE. **12**

a) With the help of block diagram explain phase shift measurement technique.

b) With the help of two valley theory explain in detail Gunn diode.

c) In two cavity Klystron explain velocity modulation process.

d) Write similarities and differences between two cavity Klystron and TWT.

Q.5 Answer any TWO. **16**

a) With the help of block diagram explain power ratio method for measurement of attenuation. What are the limitations of this method? Also explain RF substitution method for measurement of attenuation.

b) What are TEDs? Explain IMPATT and TRAPATT diodes.

c) With the help of neat diagram explain zero mode and pi mode of magnetron.

MCQ/Objective Type Questions

Duration: 30 Minutes Marks:14

Q.1 Choose correct option. **14**

1) While displaying a web-page, the application layer uses the _____ protocol.
a) HTTP b) FTP
c) SMTP d) None

2) In CRC generator polynomial act as _____.
a) The divisor b) The quotient
c) The dividend d) The remainder

3) A subnet mask separates _____.
a) Network ID and Host ID b) Work group from each other
c) Host ID d) All of these

4) TCP is _____ type of protocol.
a) Connection oriented b) Connectionless
c) Control d) None

5) IP Multicast uses _____ address.
a) Class A b) Class B
c) Class D d) None

6) Which is IPv4 address?
a) 311s.Parkst b) 00076A:01A5bba7ff6
c) 199.165.217.45 d) 01:A5:BB:A7:FF:60

7) The _____ layer adds a header to the packet coming from upper layer that includes the logical addresses of the sender and receiver.
a) Data-link b) Network
c) Physical d) None

8) The _____ layer enables the users to access the network.
a) Application b) Physical
c) Data-link d) Transport

9) We add r redundant bits to each block to make the length $n = k + r$. The resulting n-bits blocks are called _____.
a) Codeword b) Dataword
c) Blockword d) None of above

10) _____ does not carry any sequence no in HDLC.
a) I-frame b) U-frame
c) S-frame d) None

11) In Stop-And-Wait protocol waiting is for _____.
a) Data b) Acknowledge
c) Either a) or b) d) Neither a) or b)

12) In OSI model, which of the following is an application layer services?
a) Network virtual terminal b) File Transfer
c) Mail Services d) All the above

13) In FTP the password is send to the server using _____ command.
a) PASS b) PASSWD
c) PASSWORD d) None of these

14) IP header size is _____ long.
a) 20 to 60 bytes b) 20 bytes
c) 60 bytes d) None

Section – I

Q.2 Solve Any Four of the following. **16**

a) Draw and explain block diagram of MODEM.

b) Explain HDLC frame format.

c) Explain in detail any two network topologies along with its advantages and disadvantages.

d) Explain difference between Switch and Hub.

e) Explain IEEE 802.3 header format in detail.

Q.3 Solve Any Two of the following. **12**

a) Explain Pure ALOHA and Slotted ALOHA Protocol in detail.

b) Explain in brief each layer in OSI model with neat diagram.

c) Describe Stop and Wait protocol in detail with its advantages and disadvantages.

Section – II

Q.4 Solve Any Four of the following. **16**

a) Explain with suitable diagram IPV6 and compare it with IPV4.

b) Write a short note on ARP and RARP protocol.

c) Explain ICMP along with its four different message types.

d) Explain TCP header format in detail.

e) Write a short note on SMTP.

Q.5 Solve Any Two of the following. **12**

a) Write a shot note on.
i) DNS
ii) TELNET

b) Describe TCP connection establishment using Three way handshake.

c) Explain Distance vector routing with its limitations.

MCQ/Objective Type Questions

Duration: 30 Minutes Marks:14

Q.1 Choose the correct alternatives from the options. 14

1) Verilog it is a _____.
a) hardware description language
b) software description language
c) hardware decision language
d) software decision language

2) Which operator is commonly used in Verilog to assign values conditionally?
a) = b) :=
c) ?: d) →

3) What is the primary purpose of a flip-flop?
a) Add numbers b) Store and synchronize data
c) Perform logical operations d) Shift data

4) What is the purpose of the LOAD input in a counter?
a) To perform subtraction b) To reset the counter
c) To load a specific value d) To enable counting

5) What is the purpose of a sequence detector?
a) Count clock cycles b) Detect a specific pattern
c) Store data d) Perform arithmetic operations

6) What is the primary function of a multiplexer?
a) Addition b) Subtraction
c) Data selection d) Data encoding

7) In a decoder module, how many outputs are there for a 2-bit input?
a) 1 b) 2
c) 4 d) 8

8) What does MOS stand for in MOS transistor?
   a) Metal Oxide Semiconductor
   b) Monolithic Operational System
   c) Microscopic Organic Structure
   d) Metal Oxide Semidevice

9) In the inversion mode of a MOS transistor, what type of carriers dominates in the channel?
   a) Holes
   b) Electrons
   c) Ions
   d) Photons

10) What is the primary advantage of using complementary CMOS logic?
   a) Low power consumption and high noise margins
   b) High speed and low cost
   c) Simple implementation of complex functions
   d) Large fan-out capability

11) How can a NOR gate be implemented using CMOS logic?
   a) Series nMOS followed by parallel pMOS
   b) Parallel nMOS followed by series pMOS
   c) Only with nMOS transistors
   d) Only with pMOS transistors

12) In ratioed logic, what is the primary role of transistors?
   a) To provide logic inversion
   b) To form a resistive divider
   c) To control fan-out
   d) To implement complex functions

13) What does CPLD stand for?
   a) Complex Programmable Logic Device
   b) Central Processing and Logic Device
   c) Configurable Program Logic Device
   d) Centralized Programmable Logic Device

14) What is the basic building block of an FPGA?
   a) Logic Cell
   b) Look-up Table (LUT)
   c) Configurable Gate (CG)
   d) Configurable Logic Block (CLB)

Set **P**

Fourth. Y. (B.Tech.) (Electronics & Telecommunication Engineering) (Semester - I) (New) (CBCS) Examination: March/April – 2026
VLSI Design (BTN06703)

Day & Date: Thursday, 07-05-2026 Max. Marks: 56
Time: 03:00 PM To 06:00 PM

Instructions: 1) All questions are compulsory.
2) Figures to the right indicate full marks.

SECTION – I

Q.2 Attempt Any Four of the following. **16**

a) Explain Verilog Operators with suitable examples.

b) Explain the following.
i) Inertial Delay Effects
ii) Pulse Rejection

c) Explain Structure of Combinational Verilog HDL Program.

d) Write Verilog code for clocked D Flip Flop.

e) Write a Verilog code for Full subtractor.

Q.3 Attempt Any Two of the following. **12**

a) Explain the terms “Inertial delay” and “Transport delay” with suitable examples.

b) Write a Verilog code along with testbench for:
i) Half Adder
ii) Full Adder

c) Explain Behavioral description of Encoder using Verilog HDL Code.

SECTION – II

Q.4 Attempt Any Four of the following. **16**

a) What is accumulation, depletion & enhancement mode of E MOSFET?

b) Explain CMOS invertor with transfer characteristics.

c) Explain PUN & PDN in CMOS logic design.

d) Implement the Boolean expression using CMOS
Y = bar ((A.B.C) + (A+B+C))

e) Explain Altera Max-7000.

Q.5 Attempt Any Two of the following. **12**

a) With neat diagram explain working principal of n type CMOS transistor.

b) Explain rational and pass transistor logic. What are advantages of rational logic?

c) Explain difference between CPLD and FPGA architecture.

Seat No.	

Set **Q**

Fourth. Y. (B.Tech.) (Electronics & Telecommunication Engineering) (Semester - I) (New) (CBCS) Examination: March/April – 2026
VLSI Design (BTN06703)

Day & Date: Thursday, 07-05-2026 Max. Marks: 70
Time: 03:00 PM To 06:00 PM

Instructions: 1) Q. No. 1 is compulsory. It should be solved in the first 30 minutes in Answer Book Page no 03 (Starting page of the Answer Book). Each question carries one mark.
2) Don't forget to Mention question paper set (P/Q/R/S) on top of page.
3) Figures to right indicates full marks.

MCQ/Objective Type Questions

Duration: 30 Minutes Marks:14

Q.1 Choose the correct alternatives from the options. **14**

1) What does MOS stand for in MOS transistor?
a) Metal Oxide Semiconductor
b) Monolithic Operational System
c) Microscopic Organic Structure
d) Metal Oxide Semidevice

2) In the inversion mode of a MOS transistor, what type of carriers dominates in the channel?
a) Holes b) Electrons
c) Ions d) Photons

3) What is the primary advantage of using complementary CMOS logic?
a) Low power consumption and high noise margins
b) High speed and low cost
c) Simple implementation of complex functions
d) Large fan-out capability

4) How can a NOR gate be implemented using CMOS logic?
a) Series nMOS followed by parallel pMOS
b) Parallel nMOS followed by series pMOS
c) Only with nMOS transistors
d) Only with pMOS transistors

5) In ratioed logic, what is the primary role of transistors?
a) To provide logic inversion b) To form a resistive divider
c) To control fan-out d) To implement complex functions

6) What does CPLD stand for?
   a) Complex Programmable Logic Device
   b) Central Processing and Logic Device
   c) Configurable Program Logic Device
   d) Centralized Programmable Logic Device

7) What is the basic building block of an FPGA?
   a) Logic Cell
   b) Look-up Table (LUT)
   c) Configurable Gate (CG)
   d) Configurable Logic Block (CLB)

8) Verilog it is a _____.
   a) hardware description language
   b) software description language
   c) hardware decision language
   d) software decision language

9) Which operator is commonly used in Verilog to assign values conditionally?
   a) =
   b) :=
   c) ?:
   d) →

10) What is the primary purpose of a flip-flop?
   a) Add numbers
   b) Store and synchronize data
   c) Perform logical operations
   d) Shift data

11) What is the purpose of the LOAD input in a counter?
   a) To perform subtraction
   b) To reset the counter
   c) To load a specific value
   d) To enable counting

12) What is the purpose of a sequence detector?
   a) Count clock cycles
   b) Detect a specific pattern
   c) Store data
   d) Perform arithmetic operations

13) What is the primary function of a multiplexer?
   a) Addition
   b) Subtraction
   c) Data selection
   d) Data encoding

14) In a decoder module, how many outputs are there for a 2-bit input?
   a) 1
   b) 2
   c) 4
   d) 8

Seat No.

MCQ/Objective Type Questions

Duration: 30 Minutes Marks:14

Q.1 Choose the correct Answer. **14**

1) What does NEMA define a PLC as?
a) An analog operating electronic apparatus for relay control
b) A mechanically switched system for sequencing
c) A digitally operating electronic apparatus using programmable memory for internal storage of instructions to control machines or processes
d) A solid-state device used exclusively for arithmetic operations

2) A Fixed/Compact PLC is typically used for which scale of applications?
a) Small-scale applications such as a washing machine or coffee vending machine
b) Medium-scale processes with over 2048 I/Os
c) Large-scale industrial processes
d) Safety-critical systems requiring extensive memory expansion

3) Why would a manufacturer choose a PLC over a relay panel, specifically considering the ease of modifying the control logic?
a) Relays are more flexible
b) PLCs require complex rewiring to change the logic, which is easier
c) Changing the logic in a PLC does not require panel rewiring, unlike a relay logic system
d) PLCs have a slower response time

4) What is the typical input voltage range for PLC power supplies?
a) 24 V DC / 220 V AC b) 5 V DC only
c) 12 V AC only d) 48 V AC only

5) Analog output modules can control _____.
a) Lights ON/OFF b) Variable speed motors
c) Relays d) Push buttons

6) _____ is used to detect very small changes in resistance of strain gauges.
a) Maxwell's bridge
b) Wheatstone bridge
c) Anderson bridge
d) Schering Bridge

7) Which one of the following is a basic component of pneumatic power system?
a) Air tank
b) Compressor
c) Valves
d) All of the above

8) In PLC input logic, an NO push button is used for _____.
a) Turn
b) Reset
c) Stop operation
d) Start operation

9) Limit switches are used to _____.
a) Measure temperature
b) Detect motion or position
c) Measure current
d) Count pulses

10) What are the main components of an industrial automation system?
a) Sensors, actuators, and a control system
b) Robots, conveyors, and a control system
c) PLC, HMI and a control system
d) All of the above

11) What is the primary function of an industrial controller?
a) Data storage
b) Data transmission
c) Process control
d) Data visualization

12) Which of the following is not a PLC programming method?
a) Ladder Diagram
b) Instruction List
c) Flowchart Programming
d) Boolean Algebra

13) Which standard defines PLC programming languages?
a) ISO 9001
b) IEC 61131-3
c) ANSI C
d) IEEE 802.15

14) Which of the following is PLC software by Siemens?
a) GX Developer
b) Zelio Soft
c) TIA Portal
d) RSLogix 500

SECTION – I

Q.2 Answer any Four. **16**

a) Define a PLC. Explain the purpose of a PLC in industrial automation.

b) Explain construction & working of IR sensor.

c) Explain the key parameters to consider when choosing a PLC for industrial applications.

d) List and explain key PLC specifications and their significance in automation applications.

e) Explain Two wire & Three wire system in RTD.

Q.3 Answer any Two. **12**

a) State need of PLC. List & explain different applications of PLC.

b) What are the suitable materials for piezo electric sensor? What is piezo electric effect? Explain working of piezoelectric Sensor.

c) Describe sinking and sourcing concept in DC input modules of PLC.

SECTION – II

Q.4 Answer any Four. **16**

a) Explain the construction and working of a stepper motor.

b) Explain the working principle of a servo motor with block diagram.

c) List & explain key features of Industrial Controllers.

d) Draw and explain ladder diagrams for AND and OR logic operations.

e) Differentiate between timers and counters in PLC.

Q.5 Answer any Two. **12**

a) Describe the construction and working of a limit switch. & solenoid valves.

b) Explain the working of a PLC-based bottle filling system with block and ladder diagram.

c) List Comparison instruction used in PLC. Explain any two instructions in detail.

MCQ/Objective Type Questions

Duration: 30 Minutes Marks:14

Q.1 Choose the correct Answer. **14**

1) What is the primary function of an industrial controller?
a) Data storage b) Data transmission
c) Process control d) Data visualization

2) Which of the following is not a PLC programming method?
a) Ladder Diagram b) Instruction List
c) Flowchart Programming d) Boolean Algebra

3) Which standard defines PLC programming languages?
a) ISO 9001 b) IEC 61131-3
c) ANSI C d) IEEE 802.15

4) Which of the following is PLC software by Siemens?
a) GX Developer b) Zelio Soft
c) TIA Portal d) RSLogix 500

5) What does NEMA define a PLC as?
a) An analog operating electronic apparatus for relay control
b) A mechanically switched system for sequencing
c) A digitally operating electronic apparatus using programmable memory for internal storage of instructions to control machines or processes
d) A solid-state device used exclusively for arithmetic operations

6) A Fixed/Compact PLC is typically used for which scale of applications?
a) Small-scale applications such as a washing machine or coffee vending machine
b) Medium-scale processes with over 2048 I/Os
c) Large-scale industrial processes
d) Safety-critical systems requiring extensive memory expansion

7) Why would a manufacturer choose a PLC over a relay panel, specifically considering the ease of modifying the control logic?
a) Relays are more flexible
b) PLCs require complex rewiring to change the logic, which is easier
c) Changing the logic in a PLC does not require panel rewiring, unlike a relay logic system
d) PLCs have a slower response time

8) What is the typical input voltage range for PLC power supplies?
a) 24 V DC / 220 V AC
b) 5 V DC only
c) 12 V AC only
d) 48 V AC only

9) Analog output modules can control _____.
a) Lights ON/OFF
b) Variable speed motors
c) Relays
d) Push buttons

10) _____ is used to detect very small changes in resistance of strain gauges.
a) Maxwell's bridge
b) Wheatstone bridge
c) Anderson bridge
d) Schering Bridge

11) Which one of the following is a basic component of pneumatic power system?
a) Air tank
b) Compressor
c) Valves
d) All of the above

12) In PLC input logic, an NO push button is used for _____.
a) Turn
b) Reset
c) Stop operation
d) Start operation

13) Limit switches are used to _____.
a) Measure temperature
b) Detect motion or position
c) Measure current
d) Count pulses

14) What are the main components of an industrial automation system?
a) Sensors, actuators, and a control system
b) Robots, conveyors, and a control system
c) PLC, HMI and a control system
d) All of the above

Set **R**

Fourth. Y. (B.Tech.) (Electronics & Telecommunication Engineering) (Semester - I) (New) (CBCS) Examination: March/April - 2026
PLC and Industrial Controllers (BTN06707)

Day & Date: Saturday, 09-05-2026 Max. Marks: 56
Time: 03:00 PM To 06:00 PM

Instructions: 1) All questions are compulsory.
2) Figures to the right indicate full marks.

SECTION – I

Q.2 Answer any Four. **16**

a) Define a PLC. Explain the purpose of a PLC in industrial automation.

b) Explain construction & working of IR sensor.

c) Explain the key parameters to consider when choosing a PLC for industrial applications.

d) List and explain key PLC specifications and their significance in automation applications.

e) Explain Two wire & Three wire system in RTD.

Q.3 Answer any Two. **12**

a) State need of PLC. List & explain different applications of PLC.

b) What are the suitable materials for piezo electric sensor? What is piezo electric effect? Explain working of piezoelectric Sensor.

c) Describe sinking and sourcing concept in DC input modules of PLC.

SECTION – II

Q.4 Answer any Four. **16**

a) Explain the construction and working of a stepper motor.

b) Explain the working principle of a servo motor with block diagram.

c) List & explain key features of Industrial Controllers.

d) Draw and explain ladder diagrams for AND and OR logic operations.

e) Differentiate between timers and counters in PLC.

Q.5 Answer any Two. **12**

a) Describe the construction and working of a limit switch. & solenoid valves.

b) Explain the working of a PLC-based bottle filling system with block and ladder diagram.

c) List Comparison instruction used in PLC. Explain any two instructions in detail.

MCQ/Objective Type Questions

Duration: 30 Minutes Marks:14

Q.1 Choose the correct Answer. **14**

1) Actual radio coverage of a cell is called _____.
a) Fingerprint b) Footprint
c) Imprint d) Matrix

2) What is the drawback of dynamic channel assignment?
a) Decrease channel utilization
b) Increase probability of blocked call
c) Cross talk
d) Increase storage and computational load on system

3) Dwell time is the time for _____.
a) A call within the cell b) Hand off
c) Waiting for channel allocation d) None of these

4) Which of the following technology distributes the coverage of the cell and extends the cell boundary to hard-to-reach places?
a) Cell splitting b) Scattering
c) Sectoring d) Micro cell zone concept

5) Propagation model that characterizes rapid fluctuation is called _____.
a) Hata model
b) Fading model
c) Large scale propagation model
d) Okumura model

6) Apparent shift in frequency in multipath wave is caused due to relative motion between _____.
a) Base station and MSC
b) Mobile and surrounding objects
c) Mobile and MSC
d) Mobile and base station

7) The bandwidth of FDMA channel is _____.
a) Wide b) Narrow
c) Large d) Zero

8) Why is a cyclic prefix required in an OFDMA?
a) To ensure symbol time is an integer number
b) To help overcome multipath and ISI
c) To maintain orthogonality
d) To make OFDMA scalable

9) Global Positioning System uses _____.
a) CDMA b) TDMA
c) SDMA d) FDMA

10) Which of the following is a CDMA standard of second generation network?
a) IS-95 b) IS-136
c) ETACS d) EDGE

11) What type of handovers is supported by LTE?
a) Hard handover only
b) Soft handover only
c) Hard and soft handover
d) Hard, soft and softest handover

12) What is the average uploading speed of 4G LTE network?
a) 1-3 Gbps b) 2-5 Gbps
c) 1-3 Mbps d) 2-5 Mbps

13) Which of the following are ways in which a subscriber can be identified in 5G?
a) Permanent Identity b) Concealed Identity
c) Temporary Identity d) Hidden Identity

14) Which of the following characteristics best describe 4G Internet?
a) High speed, low latency, and high capacity
b) Low speed, high latency, and low capacity
c) High speed, high latency, and low capacity
d) Low speed, low latency, and low capacity

2) Figures to the right indicate full marks.

SECTION – I

Q.2 Answer any four. **16**

a) Explain Co-channel interference in detail.

b) What is Handoff? Explain different types of Handoffs?

c) What is diffraction? Explain Knife edge diffraction

d) What is Sectoring and Splitting? Explain.

e) Explain frequency reuse technique in cellular system.

Q.3 Answer any two. **12**

a) Explain Umbrella Cell approach & cell dragging problems in handoff considerations.

b) Explain practical link budget design equation using path-loss model in detail.

c) Give comparison between FDMA, TDMA, CDMA & SDMA.

SECTION – II

Q.4 Answer any four. **16**

a) Explain call origination procedure in GSM.

b) Explain in short different GSM channels.

c) Explain Mobility & Radio Resource management in IS 95.

d) What are the key aspects of 4G technology?

e) Give classification of signaling relays.

Q.5 Answer any two. **12**

a) Draw & explain GSM network architecture.

b) Write detailed note on IMT 2020 & its capabilities.

c) Explain LTE architecture in detail.

Q.1 Choose the correct options. **14**

1) Artificial Intelligence is about _____.
a) Playing a game on Computer
b) Making a machine Intelligent
c) Programming on Machine with your own Intelligence
d) Putting your intelligence in Machine

2) The main tasks of an Al agent are _____.
a) Input and Output
b) Moment and Humanly Actions
c) Perceiving, thinking, and acting on the environment
d) None of the above

3) The main function of problem-solving agent is to _____.
a) Solve the given problem and reach the goal
b) Find out which sequence of action will get it to the goal state
c) Both a) & b)
d) None of these

4) The component of an Expert system is _____.
a) Knowledge Base b) Inference Engine
c) User Interface d) All of these

5) The inference engine works on _____.
a) Forward Chaining b) Backward Chaining
c) Both a) and b) d) None of these

6) Web Crawler is an example of _____.
a) Intelligent Agent b) Problem-solving Agent
c) Simple reflex Agent d) Model-based Agent

7) Which of the given statement is true for Conditional Probability?
a) Conditional Probability gives 100% accurate results
b) Conditional Probability can be applied to a single event
c) Conditional Probability has no effect or relevance on independent events
d) None of the above

8) If a robot is able to change its own trajectory as per the external conditions, then the robot is considered as the _____.
a) Mobile b) Non-Servo
c) Open Loop d) Intelligent

9) The probabilistic reasoning depends upon _____.
a) Estimation b) Observations
c) Likelihood d) All of these

10) Who is known as the Father of Al"?
a) Fisher Ada b) Alan Turing
c) John McCarthy d) Allen Newell

11) Which term describes the common-sense of the judgmental part of problem-solving?
a) Values-based b) Critical
c) Analytical d) Heuristic

12) An Al agent perceives and acts upon the environment using _____.
a) Sensors b) Perceiver
c) Actuators d) Both a) and c)

13) Which Al technique enables the computers to understand the associations and relationships between objects and events?
a) Heuristic Processing b) Cognitive Science
c) Relative Symbolism d) Pattern Matching

14) A technique that was developed to determine whether a machine could or could not demonstrate the artificial intelligence known as the _____.
a) Boolean Algebra b) Turing Test
c) Logarithm d) Algorithm

Fourth. Y. (B.Tech.) (Electronics & Telecommunication Engineering) (Semester - I) (New) (CBCS) Examination: March/April – 2026
AI Applications (BTN06710)

Day & Date: Monday, 11-05-2026 Max. Marks: 56
Time: 10:00 AM To 01:00 PM

Instructions: 1) All questions are compulsory.
2) Figures to the right indicate full marks.

SECTION – I

Q.2 Answer Any Four. **16**

a) State & explain different types of Intelligent Agents.
b) Explain the various Branches of Al in brief.
c) Explain Man Vs Computers in brief.
d) Explain the Visual perception in Al in brief.
e) Explain the Pattern Recognition in brief.

Q.3 Answer Any Two. **12**

a) Explain the major components of Intelligent System.
b) Explain the Knowledge, acquisition, Expert system tools in brief.
c) Explain the Basic architecture of an Expert system.

SECTION – II

Q.4 Answer Any Four. **16**

a) Explain the Language Models of NLP in brief.
b) Explain the Planning Uncertain in Robotics.
c) Explain the Augmented Grammars and Semantic in brief.
d) Discuss the Robotic Perception in brief.
e) Explain the Passive Reinforcement Learning in brief.

Q.5 Answer Any Two. **12**

a) Explain the Speech Recognition and Machine Translation in NLP in detail.
b) Explain the Robotic Software Architectures in brief.
c) Explain the Applications of Reinforcement Learning in brief.

Set **Q**

Fourth. Y. (B.Tech.) (Electronics & Telecommunication Engineering) (Semester - I) (New) (CBCS) Examination: March/April – 2026
AI Applications (BTN06710)

Day & Date: Monday, 11-05-2026 Max. Marks: 70
Time: 10:00 AM To 01:00 PM

Instructions: 1) Q. No. 1 is compulsory. It should be solved in the first 30 minutes in Answer Book Page no 03 (Starting page of the Answer Book). Each question carries one mark.
2) Don't forget to Mention question paper set (P/Q/R/S) on top of page.
3) Figures to the right indicates full marks.

MCQ/Objective Type Questions

Duration: 30 Minutes Marks:14

Q.1 Choose the correct options. **14**

1) If a robot is able to change its own trajectory as per the external conditions, then the robot is considered as the _____.
a) Mobile b) Non-Servo
c) Open Loop d) Intelligent

2) The probabilistic reasoning depends upon _____.
a) Estimation b) Observations
c) Likelihood d) All of these

3) Who is known as the Father of Al"?
a) Fisher Ada b) Alan Turing
c) John McCarthy d) Allen Newell

4) Which term describes the common-sense of the judgmental part of problem-solving?
a) Values-based b) Critical
c) Analytical d) Heuristic

5) An Al agent perceives and acts upon the environment using _____.
a) Sensors b) Perceiver
c) Actuators d) Both a) and c)

6) Which Al technique enables the computers to understand the associations and relationships between objects and events?
a) Heuristic Processing b) Cognitive Science
c) Relative Symbolism d) Pattern Matching

7) A technique that was developed to determine whether a machine could or could not demonstrate the artificial intelligence known as the _____.
   a) Boolean Algebra
   b) Turing Test
   c) Logarithm
   d) Algorithm

8) Artificial Intelligence is about _____.
   a) Playing a game on Computer
   b) Making a machine Intelligent
   c) Programming on Machine with your own Intelligence
   d) Putting your intelligence in Machine

9) The main tasks of an Al agent are _____.
   a) Input and Output
   b) Moment and Humanly Actions
   c) Perceiving, thinking, and acting on the environment
   d) None of the above

10) The main function of problem-solving agent is to _____.
   a) Solve the given problem and reach the goal
   b) Find out which sequence of action will get it to the goal state
   c) Both a) & b)
   d) None of these

11) The component of an Expert system is _____.
   a) Knowledge Base
   b) Inference Engine
   c) User Interface
   d) All of these

12) The inference engine works on _____.
   a) Forward Chaining
   b) Backward Chaining
   c) Both a) and b)
   d) None of these

13) Web Crawler is an example of _____.
   a) Intelligent Agent
   b) Problem-solving Agent
   c) Simple reflex Agent
   d) Model-based Agent

14) Which of the given statement is true for Conditional Probability?
   a) Conditional Probability gives 100% accurate results

MCQ/Objective Type Questions

Duration: 30 Minutes Marks:14

Q.1 Choose the correct Answer. **14**

1) What is the primary goal of Business Intelligence (BI)?
a) Data storage
b) Effective and timely decision-making
c) Software testing
d) Network security

2) Which of the following is a key component of BI architecture?
a) Compiler b) Data Warehouse
c) Operating System d) Firewall

3) OLAP stands for _____.
a) Online Logical Application Processing
b) Online Analytical Processing
c) Offline Analytical Programming
d) Online Algorithm Processing

4) Which ethical issue is related to Business Intelligence?
a) Data privacy b) Hardware installation
c) Computer assembly d) Printer sharing

5) A Decision Support System (DSS) mainly helps in _____.
a) Gaming b) Decision-making
c) Web designing d) Virus removal

6) Which model is commonly used for decision-making in DSS?
a) Mathematical model b) Waterfall model
c) Spiral model d) Network model

7) A Data Warehouse is mainly used for _____.
a) Transaction processing b) Animation
c) Programming d) Data storage and analysis

8) Data mining is the process of _____.
a) Collecting hardware devices
b) Deleting unnecessary files
c) Discovering useful patterns from data
d) Managing computer networks

9) Business reporting mainly helps organizations to _____.
a) Play games
b) Communicate information for decision-making
c) Design hardware
d) Write programs

10) Which of the following is commonly used for data visualization?
a) Flowchart b) Graphs and charts
c) Compiler d) Firewall

11) A dashboard in Business Intelligence is used to _____.
a) Store data permanently b) Monitor business performance
c) Develop software d) Control hardware

12) Balanced Scorecard is mainly used for _____.
a) Employee attendance b) Performance measurement
c) Database creation d) Network security

13) Six Sigma focuses on _____.
a) Increasing defects
b) Quality improvement and process control
c) Computer networking
d) Web design

14) Relational marketing mainly emphasizes _____.
a) Building long-term customer relationships
b) Manufacturing products
c) Computer repair
d) Coding applications

d) Virus removal

10) Which model is commonly used for decision-making in DSS?
a) Mathematical model
b) Waterfall model
c) Spiral model
d) Network model

11) A Data Warehouse is mainly used for _____.
a) Transaction processing
b) Animation
c) Programming
d) Data storage and analysis

12) Data mining is the process of _____.
a) Collecting hardware devices
b) Deleting unnecessary files
c) Discovering useful patterns from data
d) Managing computer networks

13) Business reporting mainly helps organizations to _____.
a) Play games
b) Communicate information for decision-making
c) Design hardware
d) Write programs

14) Which of the following is commonly used for data visualization?
a) Flowchart
b) Graphs and charts
c) Compiler
d) Firewall

Fourth. Y. (B.Tech.) (Electronics & Telecommunication Engineering) (Semester - I) (New) (CBCS) Examination: March/April – 2026
Data Science- Business Intelligence (BTN06713)

Day & Date: Monday, 11-05-2026 Max. Marks: 56
Time: 10:00 AM To 01:00 PM

Instructions: 1) All questions are compulsory.
2) Figures to the right indicate full marks.
3) Assume suitable data if necessary.

SECTION – I

Q.2 Answer Any Four. **16**

a) Explain the concept of Business Intelligence (BI). Discuss the role of BI in effective and timely decision-making.

b) Describe the architecture of a Data Warehouse with a neat diagram. Explain the role of OLAP in Business Intelligence.

c) Discuss the role of mathematical models in decision-making systems with suitable examples.

d) Define Data Warehouse. Explain the architecture and characteristics of a Data Warehouse.

e) Explain evolution of information system in detail.

Q.3 Answer Any Two. **12**

a) Explain OLAP operations in detail. Compare OLAP with traditional database systems used in organizations.

b) Explain the components and characteristics of a Decision Support System with suitable examples.

c) Explain multidimensional analysis using data cubes. Discuss its advantages in business analysis and reporting.

SECTION – II

Q.4 Answer Any Four. **16**

a) Describe Business reporting concept in detail.

b) Explain Relational marketing in detail.

c) Illustrate Supply chain optimization of logistic and production models.

d) Write short note on performance dashboards.

e) Define balanced scorecards and its parameters.

Q.5 Answer Any Two. **12**

a) Explain different types of charts and graphs in detail.

b) What is revenue management system? Explain it in detail.

c) Describe case studies of marketing models in details.

Seat No.		Set	S

Fourth. Y. (B.Tech.) (Electronics & Telecommunication Engineering) (Semester - I) (New) (CBCS) Examination: March/April – 2026
Data Science- Business Intelligence (BTN06713)

Day & Date: Monday, 11-05-2026 Max. Marks: 70
Time: 10:00 AM To 01:00 PM

Instructions: 1) Q. No. 1 is compulsory. It should be solved in the first 30 minutes in Answer Book Page no 03 (Starting page of the Answer Book). Each question carries one mark.
2) Don't forget to Mention question paper set (P/Q/R/S) on top of page.
3) Figures to the right indicates full marks.
4) Assume suitable data if necessary.

MCQ/Objective Type Questions

Duration: 30 Minutes Marks:14

Q.1 Choose the correct Answer. **14**

1) Which model is commonly used for decision-making in DSS?
a) Mathematical model b) Waterfall model
c) Spiral model d) Network model

2) A Data Warehouse is mainly used for _____.
a) Transaction processing b) Animation
c) Programming d) Data storage and analysis

3) Data mining is the process of _____.
a) Collecting hardware devices
b) Deleting unnecessary files
c) Discovering useful patterns from data
d) Managing computer networks

4) Business reporting mainly helps organizations to _____.
a) Play games
b) Communicate information for decision-making
c) Design hardware
d) Write programs

5) Which of the following is commonly used for data visualization?
a) Flowchart b) Graphs and charts
c) Compiler d) Firewall

6) A dashboard in Business Intelligence is used to _____.
a) Store data permanently b) Monitor business performance
c) Develop software d) Control hardware

7) Balanced Scorecard is mainly used for _____.
a) Employee attendance b) Performance measurement
c) Database creation d) Network security

8) Six Sigma focuses on _____.
a) Increasing defects
b) Quality improvement and process control
c) Computer networking
d) Web design

9) Relational marketing mainly emphasizes _____.
a) Building long-term customer relationships
b) Manufacturing products
c) Computer repair
d) Coding applications

10) What is the primary goal of Business Intelligence (BI)?
a) Data storage
b) Effective and timely decision-making
c) Software testing
d) Network security

11) Which of the following is a key component of BI architecture?
a) Compiler b) Data Warehouse
c) Operating System d) Firewall

12) OLAP stands for _____.
a) Online Logical Application Processing
b) Online Analytical Processing
c) Offline Analytical Programming
d) Online Algorithm Processing

13) Which ethical issue is related to Business Intelligence?
a) Data privacy b) Hardware installation
c) Computer assembly d) Printer sharing

14) A Decision Support System (DSS) mainly helps in _____.
a) Gaming b) Decision-making
c) Web designing d) Virus removal

3) Figures to the right indicates full marks.

MCQ/Objective Type Questions

Duration: 30 Minutes Marks: 14

Q.1 Choose the correct option from the following. **14**

1) The CIA model was first used primarily in which sector?
a) Financial b) Healthcare
c) Military and government d) Education

2) Security policies and procedures are examples of which type of control?
a) Technical b) Physical
c) Preventive d) Administrative

3) Which of the following is an example of a technical security policy?
a) Password change frequency
b) Physical security of data centers
c) Incident response roles
d) Role-based access control (RBAC) implementation

4) ISO/IEC 27001 focuses on _____.
a) IT hardware specifications
b) Environmental sustainability
c) Information Security Management Systems (ISMS)
d) Financial risk management

5) Which cryptographic technique is used in digital signatures?
a) Symmetric encryption
b) Hashing with private key encryption
c) Base64 encoding
d) XOR operation

6) A company suffered a ransomware attack because an employee clicked on a phishing email. What policy was likely weak or missing?
a) Backup policy
b) Internet access control
c) Email usage and security awareness training
d) Data retention policy

7) A common best practice in physical security is _____.
a) Using cloud backups
b) Placing security guards at entry points
c) Implementing encryption
d) Disabling USB ports

8) In IT governance, the structure refers to _____.
a) The size of the IT department
b) How responsibilities, rights, and accountabilities are distributed
c) The number of data centres
d) Network topology

9) A company wants to align its IT objectives with its business goals while ensuring risk is managed and performance is monitored. Which framework is best suited?
a) Scrum
b) COBIT
c) DevOps
d) PRINCE2

10) The term “audit trail” refers to _____.
a) A backup log
b) A record of all financial transactions
c) A chronological record of system activities
d) A list of employees in IT

11) Which type of audit involves ethical hackers simulating an attack?
a) Compliance audit
b) Procedural audit
c) Penetration testing audit
d) Financial audit

12) Which is typically the first phase in a security audit?
a) Reporting
b) Evidence collection
c) Planning and scoping
d) Risk mitigation

13) Audit costs increase significantly when _____.
a) Audits are unplanned and lack scope definition
b) Employees are trained
c) Firewalls are configured
d) Antivirus is updated

14) What is a common budgeting mistake for audits?
a) Including contingency for re-audit
b) Underestimating post-audit remediation costs
c) Including software licenses
d) Hiring experienced consultants

Advanced Communication and Modern Signaling in Railway
(BTN06717)

Day & Date: Monday, 11-05-2026 Max. Marks: 70
Time: 10:00 AM To 01:00 PM

Instructions: 1) Q. No. 1 is compulsory. It should be solved in the first 30 minutes in Answer Book Page no 03 (Starting page of the Answer Book). Each question carries one mark.
2) Don't forget to Mention question paper set (P/Q/R/S) on top of page.
3) Figures to the right indicates full marks.

MCQ/Objective Type Questions

Duration: 30 Minutes Marks:14

Q.1 Choose the correct alternatives from the options. **14**

1) In railways, the disc signals are provided for the purpose of _____.
a) dead slow movement b) indicating busy platform
c) possible danger ahead d) shunting

2) What is the full form of SCRA?
a) Special Commercial Railway Apprentice
b) Special Class Railway Association
c) Super Class Railway Apprentice
d) None of these

3) Which is the first engine less Train in India?
a) Train 16 b) Train 18
c) Train 20 d) Train 22

4) Minimum speed restriction to be imposed for Track renewal is _____.
a) Stop dead & 10 Kmph b) 10 Kmph
c) 15 Kmph d) 20 Kmph

5) The reception signal is _____.
a) outer signal only
b) starter only
c) neither (outer signal) nor (starter)
d) Both (outer signal) and (starter)

6) Where is the headquarter of IRCTC _____.
a) New Delhi b) Mumbai
c) Kolkata d) Chennai

7) Shunting signals are known as _____.
a) Routing signals b) Starter signals
c) Ground signals d) Warner signals

8) In railways the signal that also acts as a routing signal is _____.
a) home signal b) advance starter signal
c) outer signal d) starter signal

9) IT tools and business systems in IR are _____.
a) Mobile Ticketing b) Web Ticketing
c) Kiosk-based Ticketing d) All of above

10) How many zones are there in Indian Railways?
a) 16 b) 18
c) 20 d) 22

11) The stations which do not have any signal are known as _____.
a) A-class stations b) B-class stations
c) Crossing stations d) Terminal stations

12) Which country has the longest railway network?
a) China b) United State
c) India d) Nepal

13) When the driver does not obey signal, in which system there are arrangements to display stop signals automatically in advance and to bring the train to a stop?
a) Absolute Block b) Automatic Block
c) Centralized Traffic Control d) Automatic Train Control

14) Intermediate Block Signaling using MSDAC system consists of the following component _____.
a) Axle Detectors b) Electronics Field Units
c) Central Evaluator d) All of the above

Fourth. Y. (B.Tech.) (Electronics & Telecommunication Engineering) (Semester - I) (New) (CBCS) Examination: March/April - 2026
Railway Engineering
Advanced Communication and Modern Signaling in Railway (BTN06717)

Day & Date: Monday, 11-05-2026 Max. Marks: 56
Time: 10:00 AM To 01:00 PM

Instructions: 1) All questions are compulsory.
2) Figures to the right indicate full marks.

SECTION – I

Q.2 Attempt Any Four. **16**

a) What is railway signaling system?

b) What is Intermediate Block Signaling using MSDAC? Explain.

c) Why is safety important in signaling?

d) Write a note on Telecommunication for Train Operation.

e) Write note on Windows NT.

Q.3 Attempt Any Two. **12**

a) Give the Role of the Signaling & Telecommunications Department in Railways.

b) What is Future Railway Mobile Communications System? Give details.

c) Explain Modern Signaling Systems.

SECTION – II

Q.4 Attempt Any Four. **16**

a) What is Automatic Train Protection (ATP)? Give details.

b) What is Networked PA (Public address) System in railway? Explain.

c) What is the difference between VHF and UHF?

d) Explain IP based Video Surveillance System (VSS) on Indian Railways.

e) Give Safety Slogans for Signal Department.

Q.5 Attempt Any Two. **12**

a) What is Software based Embedded Systems for Railway Signaling Applications? Explain.

b) What is Railway Signal and Track Control System? Explain.

c) Explain trains through two-way satellite communication.

Seat No.	

Set **Q**

Fourth. Y. (B.Tech.) (Electronics & Telecommunication Engineering) (Semester - I) (New) (CBCS) Examination: March/April - 2026
Railway Engineering
Advanced Communication and Modern Signaling in Railway (BTN06717)

Day & Date: Monday, 11-05-2026 Max. Marks: 70
Time: 10:00 AM To 01:00 PM

Instructions: 1) Q. No. 1 is compulsory. It should be solved in the first 30 minutes in Answer Book Page no 03 (Starting page of the Answer Book). Each question carries one mark.
2) Don't forget to Mention question paper set (P/Q/R/S) on top of page.
3) Figures to the right indicates full marks.

MCQ/Objective Type Questions

Duration: 30 Minutes Marks:14

Q.1 Choose the correct alternatives from the options. **14**

1) In railways the signal that also acts as a routing signal is _____.
a) home signal b) advance starter signal
c) outer signal d) starter signal

2) IT tools and business systems in IR are _____.
a) Mobile Ticketing b) Web Ticketing
c) Kiosk-based Ticketing d) All of above

3) How many zones are there in Indian Railways?
a) 16 b) 18
c) 20 d) 22

4) The stations which do not have any signal are known as _____.
a) A-class stations b) B-class stations
c) Crossing stations d) Terminal stations

5) Which country has the longest railway network?
a) China b) United State
c) India d) Nepal

6) When the driver does not obey signal, in which system there are arrangements to display stop signals automatically in advance and to bring the train to a stop?
a) Absolute Block b) Automatic Block
c) Centralized Traffic Control d) Automatic Train Control

7) Intermediate Block Signaling using MSDAC system consists of the following component _____.
   a) Axle Detectors
   b) Electronics Field Units
   c) Central Evaluator
   d) All of the above

8) In railways, the disc signals are provided for the purpose of _____.
   a) dead slow movement
   b) indicating busy platform
   c) possible danger ahead
   d) shunting

9) What is the full form of SCRA?
   a) Special Commercial Railway Apprentice
   b) Special Class Railway Association
   c) Super Class Railway Apprentice
   d) None of these

10) Which is the first engine less Train in India?
   a) Train 16
   b) Train 18
   c) Train 20
   d) Train 22

11) Minimum speed restriction to be imposed for Track renewal is _____.
   a) Stop dead & 10 Kmph
   b) 10 Kmph
   c) 15 Kmph
   d) 20 Kmph

12) The reception signal is _____.
   a) outer signal only
   b) starter only
   c) neither (outer signal) nor (starter)
   d) Both (outer signal) and (starter)

13) Where is the headquarter of IRCTC _____.
   a) New Delhi
   b) Mumbai
   c) Kolkata
   d) Chennai

14) Shunting signals are known as _____.
   a) Routing signals

MCQ/Objective Type Questions

Duration: 30 Minutes Marks:14

Q.1 Choose the correct Answer. **14**

1) An image, perception or concept that is capable of measurement is called _____.
a) Scale b) Hypothesis
c) Type d) Variable

2) Which type of research is typically conducted to solve practical problems or address specific issues?
a) Applied research b) Fundamental research
c) Descriptive research d) Analytical research

3) In order to pursue the research, which of the following is priory required?
a) Developing a research design
b) Formulating a research question
c) Deciding about the data analysis procedure
d) Formulating a research hypothesis

4) What is a hypothesis in research?
a) A conclusion drawn from data analysis
b) A summary of research findings
c) A measurement of data accuracy
d) A statement of predicted relationship between variables

5) How to judge the depth of any research?
a) By research title
b) By research duration
c) By research objectives
d) By total expenditure on research

6) A complete list of all the sampling units is called _____.
a) Sampling design
b) Sampling frame
c) Population frame
d) Cluster

7) Which feature is essential for a good research design?
a) Completing the research quickly
b) Simplicity and ease of execution
c) Relying solely on secondary data
d) Ignoring ethical considerations

8) What is the difference between a quantitative and qualitative research design?
a) The type of data collected
b) The methods used for data collection
c) The methods used for data analysis
d) All of the above

9) ANOVA is _____.
a) A government body which collects social statistics
b) The name of a statistical software package
c) A one-way analysis of variance
d) A two-way analysis of variance

10) What is the purpose of research design?
a) To develop a hypothesis
b) To select a sample
c) To determine the methods for data collection and analysis
d) All of the above

11) Which of the following is not one of the seven major parts to the research report?
a) Results
b) Abstract
c) Method
d) Footnotes

12) Which of the following is not a type of research design?
a) Experimental design
b) Descriptive design
c) Correlational design
d) Probability design

13) Which type of report aims to provide an overview of a specific topic, often for decision-makers?
a) Research report
b) Technical report
c) Feasibility report
d) Progress report

14) Which basic ethical principle involves telling the truth and avoiding deception in research?
a) Objectivity
b) Honesty
c) Efficiency
d) Accuracy

   c) A measurement of data accuracy
   d) A statement of predicted relationship between variables

9) How to judge the depth of any research?
   a) By research title
   b) By research duration
   c) By research objectives
   d) By total expenditure on research

10) A complete list of all the sampling units is called _____.
   a) Sampling design
   b) Sampling frame
   c) Population frame
   d) Cluster

11) Which feature is essential for a good research design?
   a) Completing the research quickly
   b) Simplicity and ease of execution
   c) Relying solely on secondary data
   d) Ignoring ethical considerations

12) What is the difference between a quantitative and qualitative research design?
   a) The type of data collected
   b) The methods used for data collection
   c) The methods used for data analysis
   d) All of the above

13) ANOVA is _____.
   a) A government body which collects social statistics
   b) The name of a statistical software package
   c) A one-way analysis of variance
   d) A two-way analysis of variance

14) What is the purpose of research design?
   a) To develop a hypothesis
   b) To select a sample
   c) To determine the methods for data collection and analysis
   d) All of the above

Fourth. Y. (B.Tech.) (Electronics & Telecommunication Engineering) (Semester - I) (New) (CBCS) Examination: March/April - 2026
Research Methodology (BTN06704)

Day & Date: Wednesday, 13-05-2026 Max. Marks: 56
Time: 10:00 AM To 01:00 PM

Instructions: 1) All questions are compulsory.
2) Figures to the right indicate full marks.
3) Assume suitable data if necessary.

Section – I

Q.2 Solve any Four the followings. **16**

a) Write a short note on objective of research.

b) Explain the Criteria for good Research.

c) Distinguish between research methods and research methodology.

d) Briefly describe the different steps involved in Research process.

e) What are the different strategic for good sample design?

Q.3 Solve any Two of the following. **12**

a) Explain the meaning and significance of Research design - Basic Principles.

b) What are different types of research. Explain Descriptive *vs.* Analytical research in detail.

c) What is a research problem? Define the main issues which should receive the attention of the researcher in formulating the research problem. Give suitable examples to elucidate your points.

Section – II

Q.4 Solve any Four of the following. **16**

a) Explain the collection of primary data by Observation method.

b) Explain Plagiarism and Citation in brief.

c) Explain Data Processing in Research.

d) Explain the Research and Publication ethics.

e) Discuss interview as a technique as a data collection.

Q.5 Solve any Two of the followings. **12**

a) Write in brief note on different types of data Analysis strategies using Chi-Square, ANOVA.

b) Write about Honestly, Objectivity, Efficiency and Accuracy of research.

c) Explain the significance of a research report and narrate the various steps involved in writing such reports.

Research Methodology (BTN06704)

Day & Date: Wednesday, 13-05-2026 Max. Marks: 70
Time: 10:00 AM To 01:00 PM

Instructions: 1) Q. No. 1 is compulsory. It should be solved in the first 30 minutes in Answer Book Page no 03 (Starting page of the Answer Book). Each question carries one mark.
2) Don't forget to Mention question paper set (P/Q/R/S) on top of page.
3) Figures to the right indicates full marks.
4) Assume suitable data if necessary.
5) Use of nonprogrammable calculator is allowed.

MCQ/Objective Type Questions

Duration: 30 Minutes Marks:14

Q.1 Choose the correct Answer. **14**

1) A complete list of all the sampling units is called _____.
a) Sampling design b) Sampling frame
c) Population frame d) Cluster

2) Which feature is essential for a good research design?
a) Completing the research quickly
b) Simplicity and ease of execution
c) Relying solely on secondary data
d) Ignoring ethical considerations

3) What is the difference between a quantitative and qualitative research design?
a) The type of data collected
b) The methods used for data collection
c) The methods used for data analysis
d) All of the above

4) ANOVA is _____.
a) A government body which collects social statistics
b) The name of a statistical software package
c) A one-way analysis of variance
d) A two-way analysis of variance

5) What is the purpose of research design?
a) To develop a hypothesis
b) To select a sample
c) To determine the methods for data collection and analysis
d) All of the above

6) Which of the following is not one of the seven major parts to the research report?
a) Results
b) Abstract
c) Method
d) Footnotes

7) Which of the following is not a type of research design?
a) Experimental design
b) Descriptive design
c) Correlational design
d) Probability design

8) Which type of report aims to provide an overview of a specific topic, often for decision-makers?
a) Research report
b) Technical report
c) Feasibility report
d) Progress report

9) Which basic ethical principle involves telling the truth and avoiding deception in research?
a) Objectivity
b) Honesty
c) Efficiency
d) Accuracy

10) An image, perception or concept that is capable of measurement is called _____.
a) Scale
b) Hypothesis
c) Type
d) Variable

11) Which type of research is typically conducted to solve practical problems or address specific issues?
a) Applied research
b) Fundamental research
c) Descriptive research
d) Analytical research

12) In order to pursue the research, which of the following is priory required?
a) Developing a research design
b) Formulating a research question
c) Deciding about the data analysis procedure
d) Formulating a research hypothesis

13) What is a hypothesis in research?
a) A conclusion drawn from data analysis
b) A summary of research findings
c) A measurement of data accuracy
d) A statement of predicted relationship between variables

14) How to judge the depth of any research?
a) By research title
b) By research duration
c) By research objectives
d) By total expenditure on research

MCQ/Objective Type Questions

Duration: 20 Minutes Marks: 10

Q.1 Multiple Choice Questions. (1 x 10) 10

1) What are the application areas of WSN?
a) Asset Management b) Automobile
c) Healthcare d) All

2) Network of WSN is _____ centric but not _____ centric.
a) data, node b) node, data
c) information, data d) node, mode

3) A WSN is designed to collect information from _____ environment.
a) Logical b) Physical
c) both a) and b) d) None

4) The challenges we faced in designing WSN system and applications including _____.
a) Limited hardware b) limited support for network
c) Scalability d) All of these

5) This mode of WSN will communication directly with each other ____.
a) Digital b) Physical
c) ad-hoc d) Infrastructure

6) EMC stands for _____.
a) Electric Measurements and Components
b) Electromagnetic Compatibility
c) Electric and Mechanical Components
d) None

7) The principle behind backscatter communication is _____ of radio waves.

a) Refraction b) Reflection
c) ionization d) back propagation

8) Which RFID Tag has don't have its own power supply _____.

a) Active b) Passive
c) Semi-Passive d) All

9) Malware means _____.

a) small software b) Instruction
c) block diagram d) None

10) RFID stands for _____.

a) Radio Frequency Identification Device

2) Don't forget to Mention question paper set (P/Q/R/S) on top of page.
3) Figures to the right indicates full marks.
4) Assume if any data required to solve the problems.

MCQ/Objective Type Questions

Duration: 20 Minutes Marks: 10

Q.1 Multiple Choice Questions. **10**

1) The Height of Geostationary satellite is _____.
a) 35930 Km b) 45930
c) 55930 d) None of above

2) Apogee?
a) The point farthest from earth
b) The point nearest from earth
c) The point smallest from earth
d) None of the above

3) A television (TV) transmission is an example of which type of transmission?
a) Simplex b) Half duplex
c) Full duplex d) None of the above

4) Atmospheric drag has negligible effect on _____.
a) geostationary satellites b) MEO
c) LEO d) None of the above

5) For an elliptical orbit?
a) $e < 0$ b) $0 < e < 1$
c) $e = 1$ d) None of the above

6) Calculate the radius of a circular orbit for which the period is 1 day?
a) 42.241 Km b) 42.241 m
c) 4.241 Km d) 2.241 Km

7) Ascending node?
- a) The point longest from earth
- b) The point closest approach to earth
- c) The point where the orbit crosses the equatorial plane going from south to north
- d) None of the above

8) The period of a satellite, the time required for a satellite to make a complete trip around the Earth, is determined by _____ law.
- a) Ohm's
- b) Kepler's
- c) Newton's
- d) Both a) and b)

9) What is sideral time?
- a) Sideral time is time measured relative to the fixed stars. It will be seen that one complete rotation sideral time relative to the sun. This is because the earth moves in its orbit around the sun
- b) Sideral time is time measured relative to the variable stars. It will be seen that one complete rotation sideral time relative to the sun. This is because the earth moves in its orbit around the sun
- c) Sideral time, is time measured relative to the fixed stars. It will be seen that one complete rotation sideral time relative to the moon. This is because the earth moves in its orbit around the moon
- d) None of above

10) The signal fed to the indoor unit is normally a wideband signal covering the range _____.
- a) 12.2 to 12.7 GHz
- b) 12-GHz
- c) Both a) and b)
- d) 950 to 1450 MHz

4) What is sideral time?
a) Sideral time is time measured relative to the fixed stars. It will be seen that one complete rotation sideral time relative to the sun. This is because the earth moves in its orbit around the sun
b) Sideral time is time measured relative to the variable stars. It will be seen that one complete rotation sideral time relative to the sun. This is because the earth moves in its orbit around the sun
c) Sideral time, is time measured relative to the fixed stars. It will be seen that one complete rotation sideral time relative to the moon. This is because the earth moves in its orbit around the moon
d) None of above

5) The signal fed to the indoor unit is normally a wideband signal covering the range _____.

a) 12.2 to 12.7 GHz
b) 12-GHz
c) Both a) and b)
d) 950 to 1450 MHz

6) The Height of Geostationary satellite is _____.

a) 35930 Km
b) 45930
c) 55930
d) None of above

7) Apogee?

a) The point farthest from earth
b) The point nearest from earth
c) The point smallest from earth
d) None of the above

8) A television (TV) transmission is an example of which type of transmission?

a) Simplex
b) Half duplex
c) Full duplex
d) None of the above

9) Atmospheric drag has negligible effect on _____.

a) geostationary satellites
b) MEO
c) LEO
d) None of the above

10) For an elliptical orbit?

a) $e < 0$
b) $0 < e < 1$
c) $e = 1$
d) None of the above

Seat No.	

Set **Q**

Fourth Y. (B.Tech.) (Electronics & Telecommunication Engineering) (Semester - II) (New) (CBCS) Examination: March/April - 2026
Satellite Communication (BTN06803)

Day & Date: Thursday, 14-05-2026 Max. Marks: 40
Time: 03:00 PM To 05:00 PM

Instructions: 1) All Questions are compulsory.
2) Figures to the right indicate full marks.

SECTION – I

Q.2 Solve Any Two of the following. **08**

a) Explain the Three Kepler Law of motion.

b) Define the following:
i) Apogee and Perigee
ii) Line of Apsides
iii) Ascending and Descending Nodes
iv) Line of Nodes

c) Explain the Antenna look angles for satellite with a neat diagram.

Q.3 Solve Any Two of the following. **12**

a) Explain in details Polar orbiting satellite?

b) Write short notes on -
i) Limits of Visibility
ii) Sun Transit Outages

c) Explain the different Launching orbits of ISRO?

SECTION - II

Q.4 Solve Any Two of the following. **08**

a) With the help of Block diagram explain working of transponder.

b) Write a note on different Transmission Losses.

c) What is significant of Carrier to noise ratio in Link budget design explain in brief?

Q.5 Solve Any Two of the following. **12**

a) Explain how to calculate the Link Power Budget for both uplink and downlink.

b) Write a brief note on TT&C Sub-system of satellite.

c) Explain the Master Antenna TV system with block diagram.

Set R

Fourth Y. (B.Tech.) (Electronics & Telecommunication Engineering) (Semester - II) (New) (CBCS) Examination: March/April - 2026
Satellite Communication (BTN06803)

Day & Date: Thursday, 14-05-2026 Max. Marks: 50
Time: 03:00 PM To 05:00 PM

Instructions: 1) Q. No. 1 is compulsory. It should be solved in the first 20 minutes in Answer Book Page no 03 (Starting page of the Answer Book). Each question carries one mark.
2) Don't forget to Mention question paper set (P/Q/R/S) on top of page.
3) Figures to the right indicates full marks.
4) Assume if any data required to solve the problems.

MCQ/Objective Type Questions

Duration: 20 Minutes Marks: 10

Q.1 Multiple Choice Questions. **10**

1) What is sideral time?
a) Sideral time is time measured relative to the fixed stars. It will be seen that one complete rotation sideral time relative to the sun. This is because the earth moves in its orbit around the sun
b) Sideral time is time measured relative to the variable stars. It will be seen that one complete rotation sideral time relative to the sun. This is because the earth moves in its orbit around the sun
c) Sideral time, is time measured relative to the fixed stars. It will be seen that one complete rotation sideral time relative to the moon. This is because the earth moves in its orbit around the moon
d) None of above

2) The signal fed to the indoor unit is normally a wideband signal covering the range _____.
a) 12.2 to 12.7 GHz b) 12-GHz
c) Both a) and b) d) 950 to 1450 MHz

3) The Height of Geostationary satellite is _____.
a) 35930 Km b) 45930
c) 55930 d) None of above

4) Apogee?
a) The point farthest from earth
b) The point nearest from earth
c) The point smallest from earth
d) None of the above

5) A television (TV) transmission is an example of which type of transmission?
a) Simplex
b) Half duplex
c) Full duplex
d) None of the above

6) Atmospheric drag has negligible effect on _____.
a) geostationary satellites
b) MEO
c) LEO
d) None of the above

7) For an elliptical orbit?
a) $e < 0$
b) $0 < e < 1$
c) $e = 1$
d) None of the above

8) Calculate the radius of a circular orbit for which the period is 1 day?
a) 42.241 Km
b) 42.241 m
c) 4.241 Km
d) 2.241 Km

9) Ascending node?
a) The point longest from earth
b) The point closest approach to earth
c) The point where the orbit crosses the equatorial plane going from south to north
d) None of the above

10) The period of a satellite, the time required for a satellite to make a complete trip around the Earth, is determined by _____ law.
a) Ohm's
b) Kepler's
c) Newton's
d) Both a) and b)

MCQ/Objective Type Questions

Duration: 20 Minutes Marks:10

Q.1 Choose the correct alternative from the given options. 10

1) A Plug-in Hybrid EV is different from Conventional Hybrid EV because it has _____.
a) Built in Battery Charger b) Li Ox battery
c) more batteries d) Bigger motor generator

2) EV and HEV has following components common except _____.
a) Battery
b) ECU
c) Generator
d) Internal Combustion Engine

3) EVSE stands for _____.
a) Electrical Vehicle supply Equipment
b) Could be AC or DC
c) Used for charging
d) All

4) Electric Vehicles are generally powered by _____.
a) Aluminum batteries b) Lead-acid batteries
c) Sodium batteries d) Magnesium batteries

5) This battery is not suitable for EVs _____.
a) Li ion battery b) Na Ni Cl battery
c) NaS battery d) Lead Acid Battery

6) What affect do petrol and diesel engines have on the environment?
   a) They help deplete natural resources and contribute to increasing CO2 emissions
   b) They help deplete natural resources and reduce CO2 emissions
   c) They contribute to increasing CO2 emissions but help reduce global warming
   d) None all of above

7) There are _____ methods of battery charging.
   a) Three
   b) Two
   c) One
   d) Four

8) Which of the following is common voltage of Battery _____.
   a) 2 V
   b) 10V
   c) 12 V
   d) 25V

9) Active Safety includes _____.
   a) Anti-Lock Breaking System (ABS)
   b) Air bags
   c) Headrest
   d) All

10) Which of the following is provided to charge the battery constantly ____.
   a) Generator

1) Which of the following is NOT a key element of a Mechatronic system?
a) Sensors and Actuators b) Mechanical Systems
c) Software Systems d) Biological Systems

2) Which of the following is an example of a Mechatronic system?
a) Mechanical Clock b) Automatic Camera
c) Simple Lever d) Steam Engine

3) In modern automobiles, ABS stands for _____.
a) Anti-Braking System b) Automated Braking System
c) Anti-lock Braking System d) Auto-Balancing System

4) Industry 4.0 is mainly based on _____.
a) Manual operations
b) Digitalization and loT integration
c) Steam power and mechanization
d) Mass production with labor-intensive work

5) PLC stands for _____.
a) Programmable Logic Controller
b) Process Level Control
c) Programmable Level Counter
d) Process Logic Calculator

6) In PLC architecture, the CPU performs which function?
   a) Power conversion
   b) Data processing and logic execution
   c) Communication with sensors only
   d) None of the above

7) MEMS devices are generally made using _____.
   a) Steel sheets
   b) Silicon micromachining techniques
   c) Plastic molding
   d) Magnetic laminations

8) Electrostatic actuators in MEMS operate based on _____.
   a) Magnetic field
   b) Electric field force
   c) Fluid pressure
   d) Thermal expansion

9) A stepper motor converts _____.
   a) Electrical energy into continuous rotation
   b) Electrical pulses into discrete mechanical steps
   c) Mechanical energy into electrical energy
   d) None of these

10) A gyroscope is mainly used to measure _____.
   a) Linear velocity
   b) Angular velocity or orientation
   c) Pressure
   d) Temperature

Set P

Fourth Y. (B.Tech.) (Electronics & Telecommunication Engineering) (Semester - II) (New) (CBCS) Examination: March/April - 2026 Mechatronics (BTN06806)

Day & Date: Monday, 18-05-2026 Max. Marks: 40
Time: 03:00 PM To 05:00 PM

Instructions: 1) All questions are compulsory.
2) Figures to the right indicate full marks.

Section - I

Q.2 Solve Any Two of the following. **08**

a) Define Mechatronics. Explain its key elements and interdisciplinary nature.

b) Draw and explain the architecture of a PLC.

c) Write a Short note on Industry 4.0.

Q.3 Solve Any Two of following. **12**

a) Explain any three examples of Mechatronic systems with suitable diagrams.

b) Compare between PLC & PC Based control systems.

c) State Different PLC instruction, and explain any two Logical Instructions.

Section - II

Q.4 Solve Any Two of the following. **08**

a) Write a short note on source current and sink current.

b) Compare between sensors & actuators.

c) Describe different types of actuators used in Mechatronic systems with example.

Q.5 Solve Any Two of following. **12**

a) Write a note on Variable frequency drive motors.

b) Describe the operation of Gyroscope with Proper diagram. Also State its applications.

c) Write short Note on Capacitive Micro-machined Ultrasonic Transducers.

Set Q

Fourth Y. (B.Tech.) (Electronics & Telecommunication Engineering) (Semester - II) (New) (CBCS) Examination: March/April - 2026 Mechatronics (BTN06806)

Day & Date: Monday, 18-05-2026 Max. Marks: 50
Time: 03:00 PM To 05:00 PM

Instructions: 1) Q. No. 1 is compulsory. It should be solved in the first 20 minutes in answer book Page no 03 (Starting page of the Answer Book). Each question carries one mark.
2) Don't forget to Mention question paper set (P/Q/R/S) on top of page.
3) Figures to the right indicate full marks.

MCQ/Objective Type Questions

Duration: 20 Minutes Marks: 10

Q.1 Choose the correct alternatives from the give options. 10

1) In PLC architecture, the CPU performs which function?
a) Power conversion
b) Data processing and logic execution
c) Communication with sensors only
d) None of the above

2) MEMS devices are generally made using _____.
a) Steel sheets
b) Silicon micromachining techniques
c) Plastic molding
d) Magnetic laminations

3) Electrostatic actuators in MEMS operate based on _____.
a) Magnetic field b) Electric field force
c) Fluid pressure d) Thermal expansion

4) A stepper motor converts _____.
a) Electrical energy into continuous rotation
b) Electrical pulses into discrete mechanical steps
c) Mechanical energy into electrical energy
d) None of these

5) A gyroscope is mainly used to measure _____.
a) Linear velocity b) Angular velocity or orientation
c) Pressure d) Temperature

6) Which of the following is NOT a key element of a Mechatronic system?
a) Sensors and Actuators b) Mechanical Systems
c) Software Systems d) Biological Systems

7) Which of the following is an example of a Mechatronic system?
a) Mechanical Clock
b) Automatic Camera
c) Simple Lever
d) Steam Engine

8) In modern automobiles, ABS stands for _____.
a) Anti-Braking System
b) Automated Braking System
c) Anti-lock Braking System
d) Auto-Balancing System

9) Industry 4.0 is mainly based on _____.
a) Manual operations
b) Digitalization and loT integration
c) Steam power and mechanization
d) Mass production with labor-intensive work

10) PLC stands for _____.
a) Programmable Logic Controller
b) Process Level Control
c) Programmable Level Counter
d) Process Logic Calculator

MCQ/Objective Type Questions

Duration: 20 Minutes Marks: 10

Q.1 Choose correct answer. **10**

1) A major challenge in measuring living systems is _____.
a) High cost of instruments
b) Biological variability and dynamic nature of tissues
c) Complexity of coding software
d) Poor hospital infrastructure

2) Engineers play a key role in healthcare facilities by _____.
a) Designing fashion equipment
b) Performing surgeries
c) Developing and maintaining medical instruments
d) Prescribing medications

3) Which system is primarily responsible for oxygen exchange in the human body?
a) Nervous system b) Cardiovascular system
c) Respiratory system d) Auditory system

4) Which of the following is an example of a biomedical signal?
a) ECG b) MRI image
c) X-ray image d) Ultrasound image

5) The main goal of feature extraction is _____.
a) Reduce signal noise
b) Compress the signal
c) Store images in a database
d) Extract important characteristics for analysis

6) ENG (Electroneurogram) is used to record _____.
   a) Nerve electrical activity b) Muscle activity
   c) Heart activity d) Eye movements

7) Clinical laboratory instruments for biomedical signals/images are mainly used for _____.
   a) Diagnosis and monitoring of diseases
   b) Entertainment
   c) Data storage
   d) None of the above

8) Action potentials are _____.
   a) Slow changes in tissue potential
   b) Rapid electrical impulses in neurons
   c) Heart sounds
   d) Muscle vibrations

9) Artificial heart valves are categorized as _____.
   a) Prosthetic devices b) Therapeutic devices
   c) Rehabilitation devices d) Monitoring systems

10) Rehabilitation devices primarily help in _____.
   a) Diagnosing diseases
   b) Monitoring blood sugar only
   c) Imaging tissues

Fourth Y. (B.Tech.) (Electronics & Telecommunication Engineering) (Semester - II) (New) (CBCS) Examination: March/April - 2026
Biomedical Instrumentation (BTN06807)

Day & Date: Monday, 18-05-2026 Max. Marks: 40
Time: 03:00 PM To 05:00 PM

Instructions: 1) All questions are compulsory.
2) Figures to the right indicate full marks.

Section - I

Q.2 Attempt Any Two of the following. **08**

a) Define biomedical signal processing and explain its significance in healthcare and medical research.

b) Describe feature extraction techniques in biomedical signal processing.

c) Write short note on Biological neurons and different biological systems.

Q.3 Attempt Any Two of following. **12**

a) Describe the anatomical and physiological mechanisms of the human respiratory system.

b) Discuss case studies of biomedical signal processing for noise removal and feature extraction.

c) Discuss the regulation of blood pressure and blood flow by the autonomic nervous system and hormonal factors.

Section - II

Q.4 Attempt Any Two of the following. **08**

a) Explain therapeutic devices with examples and clinical applications.

b) Explain the different types of transducers used in biomedical signal acquisition.

c) Describe the fundamental concepts of Computed Tomography (CT) scans and Positron Emission Tomography (PET) in the context of biomedical imaging.

Q.5 Attempt Any Two of following. **12**

a) Explain patient monitoring systems, their types, and clinical relevance.

b) Describe electrode placement techniques for ECG, EEG, and EMG recordings.

c) Describe 2D biomedical signals/images with examples: X-ray, CT scan, MRI/fMRI, PET, Ultrasonic images.

SLR-QH-563

Seat No.		Set	P

T.Y. (B.Tech.) (Electrical Engineering) (Semester - I) (New) (CBCS)
Examination: March/April - 2026
Electromagnetic Engineering (EEPCC-07)

Day & Date: Saturday, 02-05-2026 Max. Marks: 70
Time: 10:00 AM To 01:00 PM

Instructions: 1) Q. No. 1 is compulsory. It should be solved in the first 30 minutes in Answer Book Page no 03 (Starting page of the Answer Book). Each question carries one mark.
2) Don't forget to Mention question paper set (P/Q/R/S) on top of page.
3) Figures to the right indicates full marks.
4) Assume suitable data whenever necessary.

MCQ/Objective Type Questions

Duration: 30 Minutes Marks: 14

Q.1 Choose the correct option. **14**

1) If dot product of two vectors is zero then vectors are _____.
a) Perpendicular b) Parallel
c) Oblique d) None of these

2) The differential volume (dv) in cylindrical coordinate system is given by _____.
a) $drd\Phi dz$ b) $rdrd\Phi dz$
c) $rdrd\Phi$ d) $rd\Phi dz$

3) Unit vector is having _____.
a) Direction with one magnitude
b) Magnitude is one but not direction
c) Not both
d) None of these

4) To convert spherical coordinate into Cartesian 'x' coordinate, we have relation _____.
a) $x = r\sin\theta\cos\varphi$ b) $x = r\sin\theta\sin\varphi$
c) $x = r\cos\theta\cos\varphi$ d) $x = \sin\theta\cos\varphi$

5) The relation between field intensity and potential is _____.
a) $E = \nabla V$ b) $E = -\nabla V$
c) $V = \nabla \times E$ d) $V = -(\nabla \times E)$

6) The unit of Electric field intensity is _____.
a) A/m^2 b) V/m^2
c) V/m d) A/sec

7) The electric field intensity is defined a _____.
a) Force per unit charge
b) Force on a test charge
c) Force per unit charge on a test charge
d) Product of force and charge

8) Relation between electric field intensity and permittivity is given by _____.
a) $D = \varepsilon E$ b) $E = DE$
c) $D = E/E$ d) $E = E/d$

9) Unit of current density is _____.
a) Cm b) A/m
c) A/m^2 d) C/m^3

10) Capacitance increases with _____.
a) increase in plate area and decrease in distance between the plates
b) increase in plate area and distance between the plates
c) decrease in plate area and value of applied voltage
d) reduction in plate area and distance between the plates

11) The product of no. of turns and the flux is called _____.
a) Field linkage b) Magnetic field
c) Flux linkage d) Area linkage

12) Ampere's circuital law in differential form is _____.
a) $\nabla \times H = J$ b) $\nabla . H = J$
c) $\nabla \times H = I$ d) $\nabla . H = I$ Gauss's law

13) Energy stored in an inductor is _____.
a) $\frac{1}{2}LI^2$ b) $\frac{1}{2}L^2I$
c) $\frac{1}{4}LI^2$ d) None of these

14) Maxwell's first equation is based on _____.
a) Ampere's Law b) Faraday's Law
c) Lenz Law d) Both b) and c)

Seat No.	

Set P

T.Y. (B.Tech.) (Electrical Engineering) (Semester - I) (New) (CBCS)
Examination: March/April - 2026
Electromagnetic Engineering (EEPCC-07)

Day & Date: Saturday, 02-05-2026 Max. Marks: 56
Time: 10:00 AM To 01:00 PM

Instructions: 1) All questions are compulsory.
2) Figures to the right indicate full marks.
3) Assume suitable data whenever necessary.

Section – I

Q.2 Attempt Any Four. **16**

a) Prove that $\nabla.(\nabla \times \mathrm{V}) = 0$

b) State and Explain the Coulomb's Law in vector form.

c) Derive Poisson's and Laplace's equation with necessary conditions.

d) Parallel plate capacitor has conducting plates of area $0.04\ \mathrm{m}^2$. The plates are separated by a dielectric material whose relative permittivity is 2 with plate separation of 1 cm.
Find:
i) Its capacitance
ii) Charge on plates if $V = 10V$

e) Transform $A = 4a_x - 2a_y - 4a_z$ to cylindrical coordinate at the point $(2, 3, 5)$

Q.3 Attempt Any Two. **12**

a) State Gauss law with mathematical expression and it's any two applications in detail.

b) Derive an expression of Electric Field intensity due to infinite sheet charge.

c) Uniform line charges of $5\ nC/m$ are located in free space at $x = 1, z = 1$ and $y = 1, z = 0$. Obtain an expression for D in Cartesian coordinates at $P(0, 0, 8)$.

Section – II

Q.4 Attempt Any Four. **16**

a) A current filament of $5.0\ A$ in a_y direction is parallel to y axis at $x = 2, z = -2$. Find H at the origin.

b) Derive an expression for inductance of toroidal coil having rectangular cross section.

c) State and prove Ampere's circuital law in point form.

d) Derive Maxwell's equation in point and integral form from Gauss law for static electric field.

e) Explain the nature of magnetic material.

Q.5 Attempt Any Two. **12**

a) Evaluate both sides of Stroke's theorem for the field.

$$H = \left(\frac{y^2 z}{x}\right) a_x + \left(\frac{0.5 y^2 z^2}{x^2}\right) a_z$$

and find current in a_y direction crossing the square surface in the plane $y = 2$, bounded by $x = z = 1$ and $x = z = 2$.

b) Derive expression for boundary conditions in magnetic field.

c) Write word statement of all maxwell's equations.

T.Y. (B.Tech.) (Electrical Engineering) (Sem - I) (New) (CBCS)
Examination: March/April – 2026
Power System Analysis (EEPCC-08)

Day & Date: Tuesday, 05-05-2026 Max. Marks: 70
Time: 10:00 AM To 01:00 PM

Instructions: 1) Q. No. 1 is compulsory. It should be solved in the first 30 minutes in Answer Book Page no 03 (Starting page of the Answer Book). Each question carries one mark.
2) Don't forget to Mention question paper set (P/Q/R/S) on top of page.
3) Figures to the right indicates full marks.
4) Make suitable assumptions if necessary and state them clearly.

MCQ/Objective Type Questions

Duration: 30 Minutes Marks:14

Q.1 Choose the correct alternatives from the options and rewrite the sentences. **14**

1) If the P U impedance of circuit is x then, if the Base KV and Base MVA doubled then the PU impedance become _____.
a) x b) $x/2$
c) $2x$ d) $4x$

2) Impedance diagram is used for analysis of _____.
a) Load flow b) Alternator
c) Fault d) Transmission Line

3) What is the relation between percentage value and per unit value?
a) 100 times b) 10 times
c) 1000 times d) 500 times

4) Which among the following reactance have a greater value?
a) Sub transient reactance
b) Transient reactance
c) Synchronous reactance
d) All of these
e) None of these

5) For limiting the short circuit current _____.
a) Reactors are used b) Resistors are used
c) Capacitors are used d) Any of above

6) A transformer rated at 11KV/0.4 KV, 500 KVA, 5% Reactance. What is the Shirt Circuit MVA of circuit breaker when it is connected to infinite bus?
a) 15 MVA
b) 5 MVA
c) 10 MVA
d) 20 MVA

7) A balanced 3-phase system consist of _____.
a) zero sequence currents only
b) positive sequence currents only
c) negative sequence currents only
d) zero, positive and negative sequence currents only

8) What is the value of $(1 + a + a^2)$?
a) ∞
b) 1
c) -1
d) 0

9) The three phase SC MVA to be interrupted by a circuit breaker in a power system is given by _____.
a) $\sqrt{3} \times$ post fault line voltage in kV $\times$ SC current in kA
b) $3 \times$ pre fault line voltage in kV $\times$ SC current in kA
c) $\sqrt{3} \times$ pre fault line voltage in kV $\times$ SC current in kA
d) $(1/\sqrt{3}) \times$ pre fault line voltage in kV $\times$ SC current in kA

10) What happens if the neutral is not grounded in case of the single line to ground fault?
a) Only the zero sequence impedance will be zero
b) The zero sequence impedance will be infinite
c) Fault current will be zero
d) Both (b) and (c)
e) All of these

11) For accurate load flow calculations on large power systems, the best method is _____.
a) Fast Decoupled Newton method
b) Gauss-seidel method
c) Newton Raphson method
d) None of these

12) Which among the following quantities are specified at the voltage controlled bus generator Bus.
a) P & Q
b) P & |V|
c) Q & |V|
d) P & δ
e) None of the above

13) A 50hz, 4 pole alternator rated at 20MVA, 13.2KV has an inertia constant H = 4KW.sec/KVA. The K.E. stored in the rotor at synchronous speed is _____.

a) 80 KJ
b) 80 MJ
c) 40 MJ
d) 20 MJ

14) Equal area criterion is used to study _____.

a) load flow analysis
b) fault analysis
c) stability analysis
d) None of these

T.Y. (B.Tech.) (Electrical Engineering) (Sem - I) (New) (CBCS)
Examination: March/April - 2026
Power System Analysis (EEPCC-08)

Day & Date: Tuesday, 05-05-2026 Max. Marks: 56
Time: 10:00 AM To 01:00 PM

Instructions: 1) All questions are compulsory.
2) Figures to the right indicate full marks.
3) Make suitable assumptions if necessary and state them clearly.

Section – I

Q.2 Attempt any Four. **16**

a) Explain per unit system (PU) and state the merits and demerits of PU system.

b) $\mathrm{G}: 300\mathrm{MVA}, 20\mathrm{kV}, \mathrm{X}'' = 1.2\Omega$
$\mathrm{T1}: 350\mathrm{MVA}, 230\mathrm{V\ Y}/20\mathrm{kV}\ \Delta, \mathrm{X} = 15.2\ \Omega/\mathrm{ph}$
$\mathrm{T2}: 300\mathrm{MVA}, 230\mathrm{V\ Y}/13.2\mathrm{kV}\ \Delta, \mathrm{X} = 16\ \Omega/\mathrm{ph}$
$\mathrm{TL}: 1 = 64\mathrm{km}, \mathrm{XTL} = 0.5\ \Omega/\mathrm{km}$
$\mathrm{M1}: 200\mathrm{MVA}, 13.2\mathrm{kV}, \mathrm{X}'' = 1.6\ \Omega$
$\mathrm{M2}: 100\mathrm{MVA}, 13.2\mathrm{kV}, \mathrm{X}'' = 1.6\ \Omega$
Draw the Single line diagram for above data.

c) Describe any two methods of short circuit current control with neat circuit diagram also state merits and demerits of each.

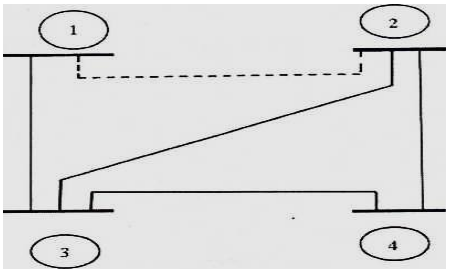
d) With the help of sample power system, describe step by step method for formation of Y bus using mutual inspection method.

e) Derive an expression for Short Circuit KVA of Circuit Breaker, discuss the selection of short circuit KVA of circuit Breaker.

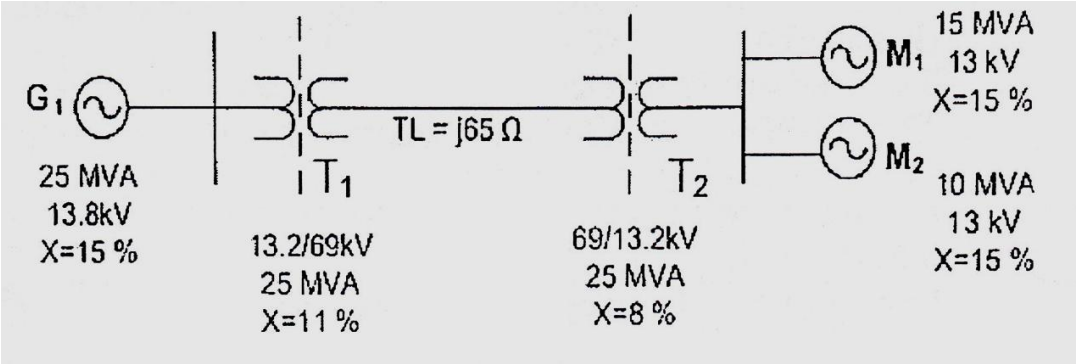
Q.3 Attempt any Two. **12**

a) The one-line diagram of a simple four bus system shown in below fig. Table below gives the line impedances identified by the buses on which these terminate. The shunt admittance at all buses are negligible. Determine the Y Bus Matrix assuming that the line shown in dotted is not connected.

Line	R1 P.U.	X1 P.U.
1-2	0.05	0.15
1-3	0.10	0.30
2-3	0.15	0.45
2-4	0.10	0.30
3-4	0.05	0.15



b) Determine the reactance of the various power system network components shown in the fig. the ratings of the components are $\mathrm{G}: 25\ \mathrm{MVA}, 13.8\ \mathrm{KV}, \mathrm{X}'' = 15\%, \mathrm{T1} = 25\ \mathrm{MVA}, 13.2\ \mathrm{KV}/69\ \mathrm{KV}$, $\mathrm{X} = 11\%, \mathrm{T2} = 25\ \mathrm{MVA}, 69\ \mathrm{KV}/13.2\ \mathrm{KV}, \mathrm{X} = 11\%, \mathrm{M1} = 15\ \mathrm{MVA}$, $13\ \mathrm{KV}, \mathrm{X}'' = 15\%$, and $\mathrm{M2} = 10\ \mathrm{MVA}, 13\ \mathrm{KV}, \mathrm{X}'' = 15\%, \mathrm{XTL} = \mathrm{j}\ 65\mathrm{ohm}$. Draw the reactance diagram.



c) Explain how an unbalanced set of three phase voltages (V_a, V_b, V_c,) can be represented by three sets of symmetrical components (V_{a1}, V_{a2}, V_{a0}).

Section – II

Q.4 Attempt any Four. **16**

a) Describe various types of buses in power system and their significance in brief.

b) What is mean by, Enlist and Describe in brief different types of stability in case of Synchronous generator system.

c) Derive power flow equation in rectangular form for the load flow analysis.

d) The line currents in a 3-ph 4-wire system are Ia = 25 < 65 A, Ib = 50 < 30 A and Ic = 30 < 180. Find the symmetrical components of fault current and the neutral current.

e) In a three phase four wire system the currents in the lines a, b and c under abnormal condition of loading were as follows: V_{a1} = 200 < 30 V, V_{a2} = 150 < 60 V, V_{a0} = 180 < 110 V. Calculate the per phase voltages.

Q.5 Attempt any Two. **12**

a) Derive the necessary equation to determine the fault current for single line to ground fault. Draw a diagram showing the interconnections of sequence networks.

b) Explain rotor dynamics and derive expression for swing equation.

c) State Equal Area Criterion (EAC). What are the assumptions made in applying EAC? Discuss its applications of it.

T.Y. (B.Tech.) (Electrical Engineering) (Sem - I) (New) (CBCS)
Examination: March/April – 2026
Power System Analysis (EEPCC-08)

Day & Date: Tuesday, 05-05-2026 Max. Marks: 70
Time: 10:00 AM To 01:00 PM

Instructions: 1) Q. No. 1 is compulsory. It should be solved in the first 30 minutes in Answer Book Page no 03 (Starting page of the Answer Book). Each question carries one mark.
2) Don't forget to Mention question paper set (P/Q/R/S) on top of page.
3) Figures to the right indicates full marks.
4) Make suitable assumptions if necessary and state them clearly.

MCQ/Objective Type Questions

Duration: 30 Minutes Marks:14

Q.1 Choose the correct alternatives from the options and rewrite the sentences. **14**

1) What is the value of $(1 + a + a^2)$?
a) ∞ b) 1
c) -1 d) 0

2) The three phase SC MVA to be interrupted by a circuit breaker in a power system is given by _____.
a) $\sqrt{3}$ × post fault line voltage in kV × SC current in kA
b) 3 × pre fault line voltage in kV × SC current in kA
c) $\sqrt{3}$ × pre fault line voltage in kV × SC current in kA
d) $(1/\sqrt{3})$ × pre fault line voltage in kV × SC current in kA

3) What happens if the neutral is not grounded in case of the single line to ground fault?
a) Only the zero sequence impedance will be zero
b) The zero sequence impedance will be infinite
c) Fault current will be zero
d) Both (b) and (c)
e) All of these

4) For accurate load flow calculations on large power systems, the best method is _____.
a) Fast Decoupled Newton method
b) Gauss-seidel method
c) Newton Raphson method
d) None of these

5) Which among the following quantities are specified at the voltage controlled bus generator Bus.
a) P & Q
b) P & $|V|$
c) Q & $|V|$
d) P & δ
e) None of the above

6) A 50hz, 4 pole alternator rated at 20MVA, 13.2KV has an inertia constant H = 4KW.sec/KVA. The K.E. stored in the rotor at synchronous speed is _____.
a) 80 KJ
b) 80 MJ
c) 40 MJ
d) 20 MJ

7) Equal area criterion is used to study _____.
a) load flow analysis
b) fault analysis
c) stability analysis
d) None of these

8) If the P U impedance of circuit is x then, if the Base KV and Base MVA doubled then the PU impedance become _____.
a) x
b) $x/2$
c) $2x$
d) $4x$

9) Impedance diagram is used for analysis of _____.
a) Load flow
b) Alternator
c) Fault
d) Transmission Line

10) What is the relation between percentage value and per unit value?
a) 100 times
b) 10 times
c) 1000 times
d) 500 times

11) Which among the following reactance have a greater value?
a) Sub transient reactance
b) Transient reactance
c) Synchronous reactance
d) All of these
e) None of these

12) For limiting the short circuit current _____.
a) Reactors are used
b) Resistors are used
c) Capacitors are used
d) Any of above

13) A transformer rated at 11KV/0.4 KV, 500 KVA, 5% Reactance. What is the Shirt Circuit MVA of circuit breaker when it is connected to infinite bus?
a) 15 MVA
b) 5 MVA
c) 10 MVA
d) 20 MVA

14) A balanced 3-phase system consist of _____.

a) zero sequence currents only
b) positive sequence currents only
c) negative sequence currents only
d) zero, positive and negative sequence currents only

$\mathrm{T1}: 350\mathrm{MVA}, 230\mathrm{V\ Y}/20\mathrm{kV}\ \Delta, \mathrm{X} = 15.2\ \Omega/\mathrm{ph}$
$\mathrm{T2}: 300\mathrm{MVA}, 230\mathrm{V\ Y}/13.2\mathrm{kV}\ \Delta, \mathrm{X} = 16\ \Omega/\mathrm{ph}$
$\mathrm{TL}: 1 = 64\mathrm{km}, \mathrm{XTL} = 0.5\ \Omega/\mathrm{km}$
$\mathrm{M1}: 200\mathrm{MVA}, 13.2\mathrm{kV}, \mathrm{X}'' = 1.6\ \Omega$
$\mathrm{M2}: 100\mathrm{MVA}, 13.2\mathrm{kV}, \mathrm{X}'' = 1.6\ \Omega$
Draw the Single line diagram for above data.

c) Describe any two methods of short circuit current control with neat circuit diagram also state merits and demerits of each.

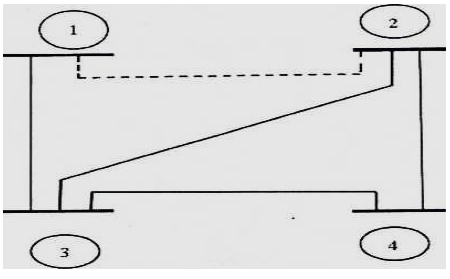
d) With the help of sample power system, describe step by step method for formation of Y bus using mutual inspection method.

e) Derive an expression for Short Circuit KVA of Circuit Breaker, discuss the selection of short circuit KVA of circuit Breaker.

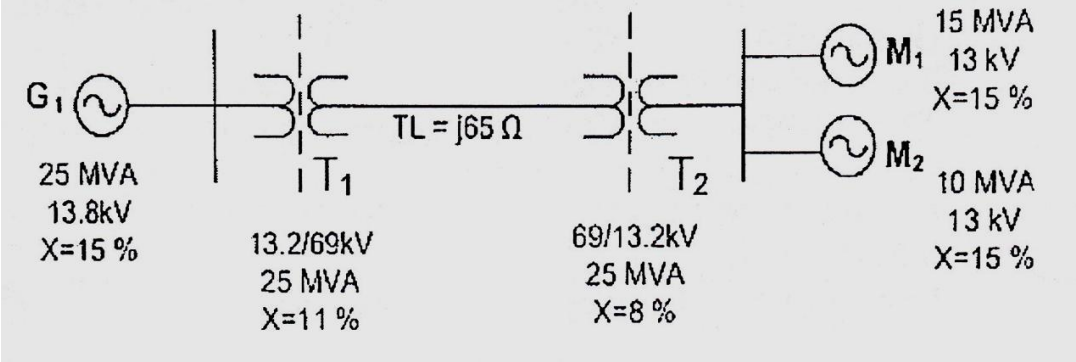
Q.3 Attempt any Two. **12**

a) The one-line diagram of a simple four bus system shown in below fig. Table below gives the line impedances identified by the buses on which these terminate. The shunt admittance at all buses are negligible. Determine the Y Bus Matrix assuming that the line shown in dotted is not connected.

Line	R1 P.U.	X1 P.U.
1-2	0.05	0.15
1-3	0.10	0.30
2-3	0.15	0.45
2-4	0.10	0.30
3-4	0.05	0.15



b) Determine the reactance of the various power system network components shown in the fig. the ratings of the components are $\mathrm{G}: 25\ \mathrm{MVA}, 13.8\ \mathrm{KV}, \mathrm{X}'' = 15\%, \mathrm{T1} = 25\ \mathrm{MVA}, 13.2\ \mathrm{KV}/69\ \mathrm{KV}$, $\mathrm{X} = 11\%, \mathrm{T2} = 25\ \mathrm{MVA}, 69\ \mathrm{KV}/13.2\ \mathrm{KV}, \mathrm{X} = 11\%, \mathrm{M1} = 15\ \mathrm{MVA}$, $13\ \mathrm{KV}, \mathrm{X}'' = 15\%$, and $\mathrm{M2} = 10\ \mathrm{MVA}, 13\ \mathrm{KV}, \mathrm{X}'' = 15\%, \mathrm{XTL} = \mathrm{j}\ 65\mathrm{ohm}$. Draw the reactance diagram.



c) Explain how an unbalanced set of three phase voltages (V_a, V_b, V_c,) can be represented by three sets of symmetrical components (V_{a1}, V_{a2}, V_{a0}).

Section – II

Q.4 Attempt any Four. **16**

a) Describe various types of buses in power system and their significance in brief.

b) What is mean by, Enlist and Describe in brief different types of stability in case of Synchronous generator system.

c) Derive power flow equation in rectangular form for the load flow analysis.

d) The line currents in a 3-ph 4-wire system are Ia = 25 < 65 A, Ib = 50 < 30 A and Ic = 30 < 180. Find the symmetrical components of fault current and the neutral current.

e) In a three phase four wire system the currents in the lines a, b and c under abnormal condition of loading were as follows: V_{a1} = 200 < 30 V, V_{a2} = 150 < 60 V, V_{a0} = 180 < 110 V. Calculate the per phase voltages.

Q.5 Attempt any Two. **12**

a) Derive the necessary equation to determine the fault current for single line to ground fault. Draw a diagram showing the interconnections of sequence networks.

b) Explain rotor dynamics and derive expression for swing equation.

c) State Equal Area Criterion (EAC). What are the assumptions made in applying EAC? Discuss its applications of it.

Examination: March/April – 2026
Linear Control System (EEPCC-09)

Day & Date: Thursday, 07-05-2026 Max. Marks: 70
Time: 10:00 AM To 01:00 PM

Instructions: 1) Q. No. 1 is compulsory. It should be solved in the first 30 minutes in Answer Book Page no 03 (Starting page of the Answer Book). Each question carries one mark.
2) Don't forget to Mention question paper set (P/Q/R/S) on top on page.
3) Figures to the right indicates full marks.
4) Make suitable assumptions if necessary and state them clearly.

MCQ/Objective Type Questions

Duration: 30 Minutes Marks:14

Q.1 Choose the correct answers from the given options. 14

1) In a control system the comparator compares the output response and reference input and actuates the _____.
a) Transducer b) Signal Conditioner
c) Control element d) Primary sensing element

2) A good control system has all the following features except _____.
a) good stability b) slow response
c) good accuracy d) sufficient power handling capacity

3) _____ is a closed loop system.
a) Auto-pilot for an aircraft b) Direct current generator
c) Car starter d) Electric switch

4) In force-voltage analogy, reciprocal of capacitance is analogous to _____.
a) spring stiffness b) co-efficient of friction
c) rate of change of velocity d) rate of change of displacement

5) A take-off point in a block diagram is used to _____.
a) Split signal b) Add signal
c) Delay signal d) Multiply signal

6) A loop in a signal flow graph is a path that _____.
a) Starts and ends at different nodes
b) Has no gain
c) Starts and ends at the same node
d) Has only one node

7) The gain of a forward path is the product of _____
a) All node values
b) All loop gains
c) All branch gains along the path
d) All feedback gains

8) The transient response, with feedback system, _____.
a) rises slowly
b) rises quickly
c) decays slowly
d) decays quickly

9) The percentage overshoot in a second-order system depends on _____.
a) Natural frequency
b) Damping ratio
c) Gain
d) Time constant

10) Steady-state error is calculated using _____.
a) Initial value theorem
b) Final value theorem
c) Laplace transform
d) Fourier transform

11) The root loci of a system have three asymptotes; the system can have _____.
a) five poles and two zeros
b) four poles and one zero
c) three poles
d) All of the above

12) The frequency at which the phase angle is 180° is called the _____ frequency.
a) Cut off
b) Break
c) Phase cross over
d) Critical

13) The bandwidth of a system is the range of frequencies over which _____
a) Output is zero
b) Gain is constant
c) System responds effectively
d) Phase is constant

14) Which of the following is not a frequency domain specification?
a) Gain margin
b) Phase margin
c) Bandwidth
d) Rise time

T.Y. (B.Tech.) (Electrical Engineering) (Semester - I) (New) (CBCS)
Examination: March/April – 2026
Linear Control System (EEPCC-09)

Day & Date: Thursday, 07-05-2026 Max. Marks: 56
Time: 10:00 AM To 01:00 PM

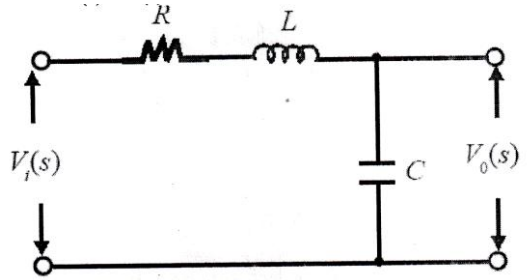
Instructions: 1) All questions are compulsory.
2) Figures to the right indicates full marks.
3) Assume suitable data if required.
4) Draw neat diagrams whenever necessary.

Section – I

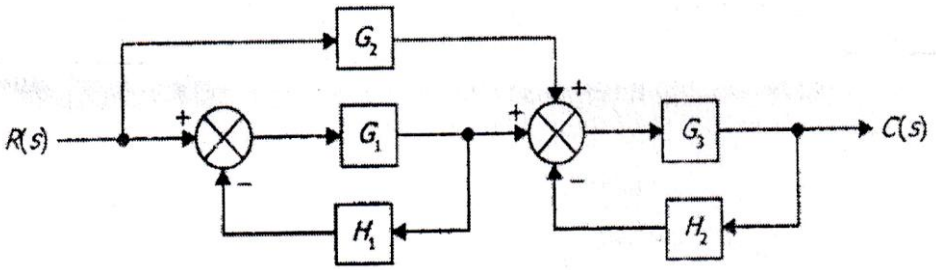
Q.2 Attempt any Four. **16**

a) Explain the different classification of control systems in detail.

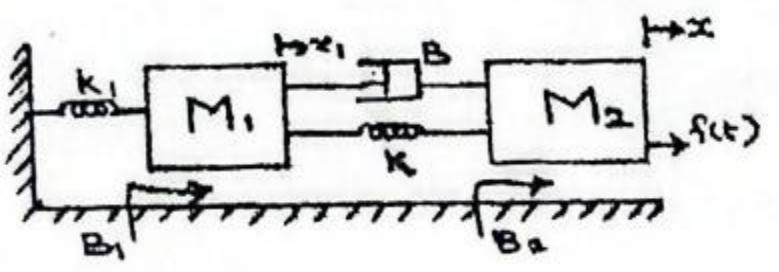
b) Derive the transfer function $V_0(s) / V_i(s)$ for the electrical system shown below



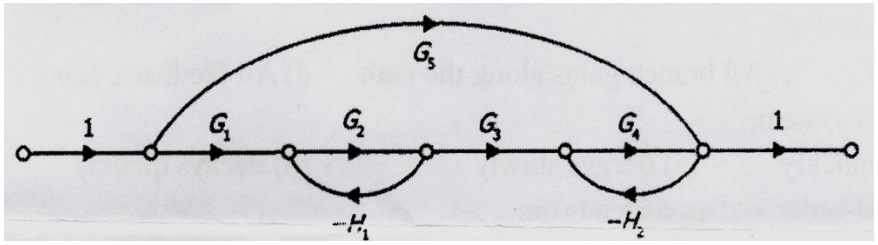
c) Determine the transfer function of the following block diagram:



d) Write the differential equations governing the mechanical translational system as shown in figure and determine the transfer function X(s)/F(s).

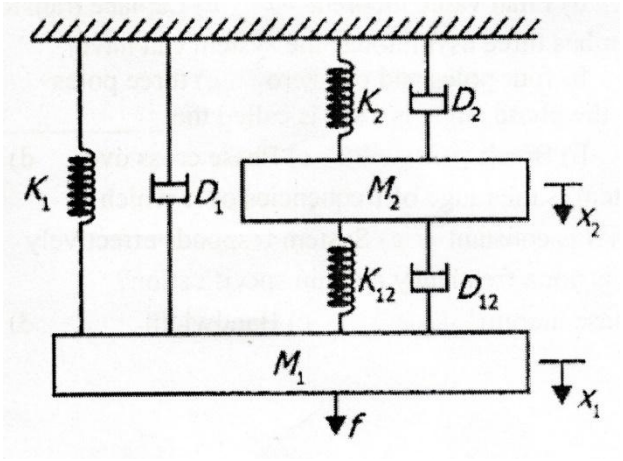


e) Derive the transfer function for the SFG shown.

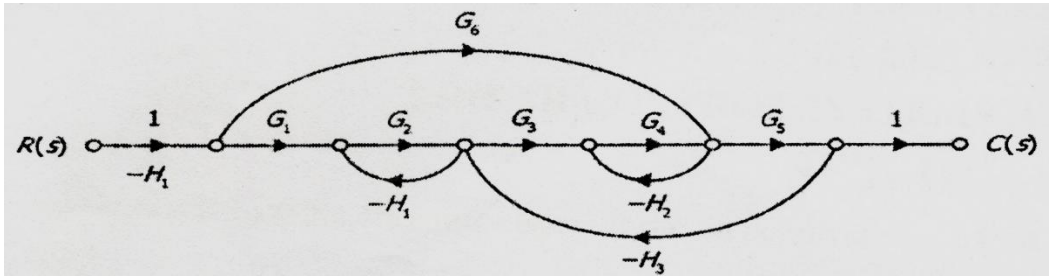


Q.3 Attempt the following questions. **12**

a) Find the system equation of the mechanical system shown in Fig. Also find the force-voltage (F-V) and force-current (F-I) analogy.

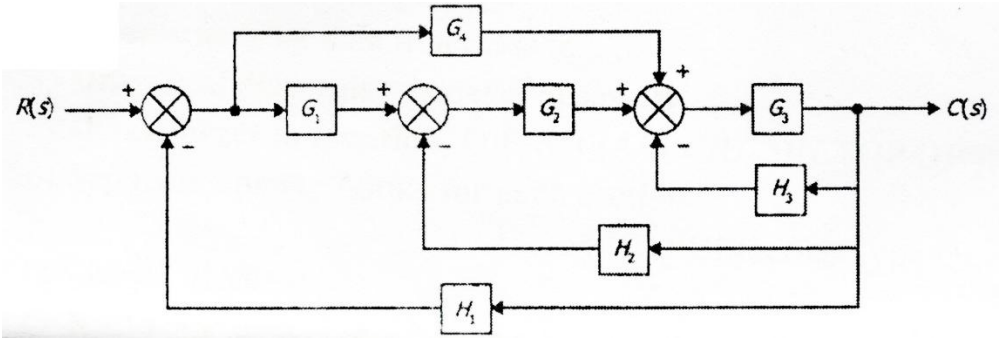


b) Derive the Transfer Function using Masson's gain formula.



OR

b) Derive the Transfer Function using block, diagram reduction technique.



Section – II

Q.4 Attempt any Four. **16**

a) Explain in detail about the types of controllers used in control systems with their advantages and disadvantages.

b) Derive the rise time and peak time for a second-order underdamped system with unit step input.

c) How stability is related to the location of the pole? Explain in detail the different cases of step input.

d) Explain the frequency domain specifications.

e) The open-loop transfer function of a unity feedback system is given by $G(s) = \frac{25}{s(s+5)}$. Calculate

i) Peak time
ii) Percent overshoot
iii) Settling time
iv) Rise time

Q.5 Attempt any Two. **12**

a) For the system with equation $F(s) = s^4 + 2s^3 + 10s^2 + 20s + 5 = 0$ Determine stability and the number of roots lying in the right half of s-plane.

b) Draw the root locus for the unity feedback system whose OLTF is

$$G(s) = \frac{k}{s(s+2)(s+3)}$$

c) Construct the BODE plot for system below whose open loop transfer function is

$$G(s)H(s) = \frac{80}{s(s+2)(s+20)}$$

Determine the

i) Gain margin
ii) Phase margin
iii) ω_{gc} & ω_{pc}
iv) Comment on the stability

MCQ/Objective Type Questions

Duration: 30 Minutes Marks:14

Q.1 Choose the correct answer. **14**

1) Which of the following correctly differentiates between a microprocessor and a microcontroller?
a) Microprocessor has on-chip peripherals, microcontroller doesn't
b) Microcontroller has built-in memory and peripherals
c) Both are same in structure
d) Microprocessor is only used in washing machines

2) The main purpose of a K-map is _____.
a) Data storage
b) Minimization of Boolean functions
c) Encoding data
d) Decoding data

3) In 8051 microcontroller, how many input/output ports are available?
a) Two b) Three
c) Four d) Five

4) The smallest building blocks of combinational logic are _____.
a) Logic gates b) Multiplexers
c) Adders d) Counters

5) Flip-flops are used to store _____.
a) Single bit b) Multiple bits
c) Decimal numbers d) Hexadecimal numbers

6) The 8051 operates typically at a clock frequency of _____.
a) 1 MHz b) 6 MHz
c) 12 MHz d) 24 MHz

7) The data pointer (DPTR) is _____.
a) 8-bit b) 16-bit
c) 32-bit d) Variable size

8) Which addressing mode is used in instruction: MOV A, #25H?
a) Direct b) Indirect
c) Immediate d) Register

9) The purpose of the TMOD register in 8051 is to _____.
a) Control timer operation modes
b) Enable serial communication
c) Store interrupt priorities
d) Reset microcontroller

10) Which category does ANL A, R1 belong to?
a) Data transfer b) Arithmetic
c) Logical d) Branch

11) RET is used for _____.
a) Returning from a subroutine b) Resetting the 8051
c) Reloading DPTR d) Enabling interrupts

12) External program memory in 8051 can be up to _____.
a) 4 KB b) 8 KB
c) 32 KB d) 64 KB

13) Port 0 in 8051 serves as _____.
a) Control bus
b) Multiplexed lower address/data bus
c) Serial port
d) Timer output

14) PWM stands for _____.
a) Pulse Width Modulation b) Power With Motor
c) Pulse Wave Measurement d) Power Wave Modulation

Seat No.	

Set **P**

T.Y. (B.Tech.) (Electrical Engineering) (Semester - I) (New) (CBCS)
Examination: March/April – 2026
Advanced Microcontroller Systems (EEPEC – 01A)

Day & Date: Saturday, 09-05-2026 Max. Marks: 56
Time: 10:00 AM To 01:00 PM

Instructions: 1) All questions are compulsory.
2) Figures to the right indicate full marks.

SECTION – I

Q.2 Solve any Four. **16**

a) Implement 4:1 multiplexer using a logic gates.

b) Explain the diagram of SISO shift register with figure & transition table.

c) Explain the feature of 8051 Microcontroller.

d) What is full adder? Explain with example.

e) Explain different addressing mode of 8051.

Q.3 Solve any Two. **12**

a) Draw the block diagram of microcontroller. Explain.

b) Explain the memory organization of 8051.

c) Implement the K-map using SOP,
$f(A,B,C,D) = \sum m\,(1,3,4,7,11,15) + d(0,2,5)$
Reduce it, write equation.

SECTION – II

Q.4 Solve any Four. **16**

a) What semiconductor memory? Explain with classification in details.

b) Explain servo motor interfacing with 8051 in details with sketch.

c) What is IDE (Integral Development Environment)?
Define:
i) Simulator
ii) Assembler
iii) Compiler

d) What are the types of instruction groups? Explain.

e) Explain C data types used in microcontroller.

Q.5 Solve any Two. **12**

a) Draw the interfacing diagram for 16 × 2 LCD display with 8051 microcontroller and write an ALP to display “PUNYASHLOK” on LCD display.

b) Draw the interfacing diagram of stepper motor with 8051. Write an ALP to rotate the stepper motor one revolution in clockwise direction and then stop.

c) Design a microcontroller System to connect 4kb of ROM to microcontroller, starting address should be 0000h.

Seat No.	

Set **Q**

T.Y. (B.Tech.) (Electrical Engineering) (Semester - I) (New) (CBCS)
Examination: March/April – 2026
Advanced Microcontroller Systems (EEPEC – 01A)

Day & Date: Saturday, 09-05-2026 Max. Marks: 70
Time: 10:00 AM To 01:00 PM

Instructions: 1) Q. No. 1 is compulsory. It should be solved in the first 30 minutes in Answer Book Page no 03 (Starting page of the Answer Book). Each question carries one mark.
2) Don't forget to Mention question paper set (P/Q/R/S) on top of page.
3) Figures to the right indicates full marks.

MCQ/Objective Type Questions

Duration: 30 Minutes Marks:14

Q.1 Choose the correct answer. **14**

1) Which addressing mode is used in instruction: MOV A, #25H?
a) Direct b) Indirect
c) Immediate d) Register

2) The purpose of the TMOD register in 8051 is to _____.
a) Control timer operation modes
b) Enable serial communication
c) Store interrupt priorities
d) Reset microcontroller

3) Which category does ANL A, R1 belong to?
a) Data transfer b) Arithmetic
c) Logical d) Branch

4) RET is used for _____.
a) Returning from a subroutine b) Resetting the 8051
c) Reloading DPTR d) Enabling interrupts

5) External program memory in 8051 can be up to _____.
a) 4 KB b) 8 KB
c) 32 KB d) 64 KB

6) Port 0 in 8051 serves as _____.
a) Control bus
b) Multiplexed lower address/data bus
c) Serial port
d) Timer output

7) PWM stands for _____.
   a) Pulse Width Modulation b) Power With Motor
   c) Pulse Wave Measurement d) Power Wave Modulation

8) Which of the following correctly differentiates between a microprocessor and a microcontroller?
   a) Microprocessor has on-chip peripherals, microcontroller doesn't
   b) Microcontroller has built-in memory and peripherals
   c) Both are same in structure
   d) Microprocessor is only used in washing machines

9) The main purpose of a K-map is _____.
   a) Data storage
   b) Minimization of Boolean functions
   c) Encoding data
   d) Decoding data

10) In 8051 microcontroller, how many input/output ports are available?
   a) Two b) Three
   c) Four d) Five

11) The smallest building blocks of combinational logic are _____.
   a) Logic gates b) Multiplexers
   c) Adders d) Counters

12) Flip-flops are used to store _____.
   a) Single bit b) Multiple bits
   c) Decimal numbers d) Hexadecimal numbers

13) The 8051 operates typically at a clock frequency of _____.
   a) 1 MHz b) 6 MHz
   c) 12 MHz d) 24 MHz

14) The data pointer (DPTR) is _____.
   a) 8-bit b) 16-bit
   c) 32-bit d) Variable size

MCQ/Objective Type Questions

Duration: 30 Minutes Marks:14

Q.1 Choose the correct Answer. **14**

1) Which of the following is NOT a component of EV?
a) Battery b) Electric motor
c) Radiator d) Motor controller

2) A primary benefit of EVs is _____.
a) Higher emissions b) Low noise & pollution
c) Higher fuel consumption d) None of the above

3) Electric vehicles have maximum torque at _____.
a) Low RPM b) High RPM
c) Idle RPM d) 2000 RPM

4) Air drag force increases with _____.
a) $Speed^2$ b) Speed
c) Constant d) Weight

5) Tractive effort is _____.
a) Braking force
b) Force at wheels to move vehicle
c) Battery charging force
d) None

6) Fuel cell EV uses _____.
a) Hydrogen b) Petrol
c) Methanol d) Ethanol

7) PHEV can be charged by _____.
a) Plug-in charger b) Regenerative braking
c) On-board engine d) All

8) A Motor Generator (MG) is essential for driving hybrid vehicles because _____.
   a) it generates electricity
   b) it serves as the main power source when starting driving a vehicle
   c) it assists the engine during acceleration
   d) all of above

9) For modern electric vehicles, which type of motor is often favored due to its high efficiency and power density?
   a) DC Series Motor
   b) 3-phase Induction Motor
   c) Permanent Magnet Synchronous Motor (PMSM)
   d) DC Shunt Motor

10) Which is the electrolyte used in Li-ion battery?
   a) Lead dioxide
   b) Lithium-based gel
   c) Sulfur dioxide
   d) Cobalt

11) Cells are connected in parallel to _____.
   a) increase the voltage output
   b) increases the internal resistance
   c) decreases the current capacity
   d) increases the current capacity.

12) A BMS helps maintain battery performance by preventing _____.
   a) Consistent optimal operating temperatures
   b) Overcharging and undercharging of individual cells
   c) Balanced charge and discharge of the battery pack
   d) Accurate voltage and current monitoring

13) What does the BMS perform to ensure each cell contributes equally to the battery pack's overall capacity and lifespan?
   a) Overcurrent protection
   b) Cell balancing
   c) Isolation resistance monitoring
   d) Thermal management

14) Which of the following component is formed on the positive plate after the discharged reaction in a lead-acid battery?
   a) Sulphuric acid
   b) Lead peroxide
   c) Lead sulphate
   d) Spongy lead

2) Figures to the right indicate full marks.
3) Assume suitable data if necessary.
4) Draw neat diagrams whenever necessary.

Section – I

Q.2 Attempt the following. (Any Four) **16**

a) Explain the historical evolution of electric vehicles.

b) Compare EV and ICE vehicles in terms of powertrain and efficiency.

c) Discuss advantages of solar power for EV.

d) Define rolling resistance and explain its effect on EV motion.

e) Explain photovoltaic-based EV systems.

f) Compare electric vs fuel-based vehicles in terms of efficiency & emissions.

Q.3 Attempt the following. (Any Two) **12**

a) Define EV classification and electrification levels with examples.

b) Explain tractive effort and torque calculation with an example.

c) Draw EV architecture and explain components.

Section – II

Q.4 Attempt the following. (Any Four) **16**

a) Explain the requirement of electric motors for Electric vehicle.

b) Explain various components of electric motor controller used in electric vehicle.

c) Explain with chemical reactions discharging process of a lead acid battery.

d) Explain with chemical reactions charging process of a NiMH battery.

e) Explain the need of Battery Management System (BMS) in case of EVs.

f) What are different types of electric motors used in electric vehicle. Explain one with characteristics.

Q.5 Attempt the following. (Any Two) **12**

a) Explain with chemical reactions charging & discharging process of Lithium-ion Battery.

b) Explain with block diagram Software based high level supervisory control System in Battery Management System (BMS) of EVs.

c) Explain in detail factors of selection of electric motors for Electric vehicle.

Day & Date: Saturday, 09-05-2026 Max. Marks: 70
Time: 10:00 AM To 01:00 PM

Instructions: 1) Q. No. 1 is compulsory. It should be solved in the first 30 minutes in Answer Book Page no 03 (Starting page of the Answer Book). Each question carries one mark.
2) Don't forget to Mention question paper set (P/Q/R/S) on top of page.
3) Figures to the right indicates full marks.
4) Assume suitable data if required.

MCQ/Objective Type Questions

Duration: 30 Minutes Marks:14

Q.1 Choose the correct Answer. **14**

1) Cells are connected in parallel to _____.
a) increase the voltage output
b) increases the internal resistance
c) decreases the current capacity
d) increases the current capacity.

2) A BMS helps maintain battery performance by preventing _____.
a) Consistent optimal operating temperatures
b) Overcharging and undercharging of individual cells
c) Balanced charge and discharge of the battery pack
d) Accurate voltage and current monitoring

3) What does the BMS perform to ensure each cell contributes equally to the battery pack's overall capacity and lifespan?
a) Overcurrent protection
b) Cell balancing
c) Isolation resistance monitoring
d) Thermal management

4) Which of the following component is formed on the positive plate after the discharged reaction in a lead-acid battery?
a) Sulphuric acid b) Lead peroxide
c) Lead sulphate d) Spongy lead

5) Which of the following is NOT a component of EV?
a) Battery b) Electric motor
c) Radiator d) Motor controller

6) A primary benefit of EVs is _____.
a) Higher emissions b) Low noise & pollution
c) Higher fuel consumption d) None of the above

7) Electric vehicles have maximum torque at _____.
a) Low RPM
b) High RPM
c) Idle RPM
d) 2000 RPM

8) Air drag force increases with _____.
a) $Speed^2$
b) Speed
c) Constant
d) Weight

9) Tractive effort is _____.
a) Braking force
b) Force at wheels to move vehicle
c) Battery charging force
d) None

10) Fuel cell EV uses _____.
a) Hydrogen
b) Petrol
c) Methanol
d) Ethanol

11) PHEV can be charged by _____.
a) Plug-in charger
b) Regenerative braking
c) On-board engine
d) All

12) A Motor Generator (MG) is essential for driving hybrid vehicles because _____.
a) it generates electricity
b) it serves as the main power source when starting driving a vehicle
c) it assists the engine during acceleration
d) all of above

13) For modern electric vehicles, which type of motor is often favored due to its high efficiency and power density?
a) DC Series Motor
b) 3-phase Induction Motor
c) Permanent Magnet Synchronous Motor (PMSM)
d) DC Shunt Motor

14) Which is the electrolyte used in Li-ion battery?
a) Lead dioxide
b) Lithium-based gel
c) Sulfur dioxide
d) Cobalt

Seat No.	

Set **R**

T.Y. (B.Tech.) (Electrical Engineering) (Sem - I) (New) (CBCS)
Examination: March/April – 2026
Hybrid Electrical Vehicle Design (EEPEC-01C)

Day & Date: Saturday, 09-05-2026 Max. Marks: 56
Time: 10:00 AM To 01:00 PM

Instructions: 1) All questions are compulsory.
2) Figures to the right indicate full marks.
3) Assume suitable data if necessary.
4) Draw neat diagrams whenever necessary.

Section – I

Q.2 Attempt the following. (Any Four) **16**

a) Explain the historical evolution of electric vehicles.

b) Compare EV and ICE vehicles in terms of powertrain and efficiency.

c) Discuss advantages of solar power for EV.

d) Define rolling resistance and explain its effect on EV motion.

e) Explain photovoltaic-based EV systems.

f) Compare electric vs fuel-based vehicles in terms of efficiency & emissions.

Q.3 Attempt the following. (Any Two) **12**

a) Define EV classification and electrification levels with examples.

b) Explain tractive effort and torque calculation with an example.

c) Draw EV architecture and explain components.

Section – II

Q.4 Attempt the following. (Any Four) **16**

a) Explain the requirement of electric motors for Electric vehicle.

b) Explain various components of electric motor controller used in electric vehicle.

c) Explain with chemical reactions discharging process of a lead acid battery.

d) Explain with chemical reactions charging process of a NiMH battery.

e) Explain the need of Battery Management System (BMS) in case of EVs.

f) What are different types of electric motors used in electric vehicle. Explain one with characteristics.

Q.5 Attempt the following. (Any Two) **12**

a) Explain with chemical reactions charging & discharging process of Lithium-ion Battery.

b) Explain with block diagram Software based high level supervisory control System in Battery Management System (BMS) of EVs.

c) Explain in detail factors of selection of electric motors for Electric vehicle.

MCQ/Objective Type Questions

Duration: 30 Minutes Marks:14

Q.1 Choose the correct Answer. **14**

1) Fuel cell EV uses _____.
a) Hydrogen b) Petrol
c) Methanol d) Ethanol

2) PHEV can be charged by _____.
a) Plug-in charger b) Regenerative braking
c) On-board engine d) All

3) A Motor Generator (MG) is essential for driving hybrid vehicles because _____.
a) it generates electricity
b) it serves as the main power source when starting driving a vehicle
c) it assists the engine during acceleration
d) all of above

4) For modern electric vehicles, which type of motor is often favored due to its high efficiency and power density?
a) DC Series Motor
b) 3-phase Induction Motor
c) Permanent Magnet Synchronous Motor (PMSM)
d) DC Shunt Motor

5) Which is the electrolyte used in Li-ion battery?
a) Lead dioxide b) Lithium-based gel
c) Sulfur dioxide d) Cobalt

6) Cells are connected in parallel to _____.
   a) increase the voltage output
   b) increases the internal resistance
   c) decreases the current capacity
   d) increases the current capacity.

7) A BMS helps maintain battery performance by preventing _____.
   a) Consistent optimal operating temperatures
   b) Overcharging and undercharging of individual cells
   c) Balanced charge and discharge of the battery pack
   d) Accurate voltage and current monitoring

8) What does the BMS perform to ensure each cell contributes equally to the battery pack's overall capacity and lifespan?
   a) Overcurrent protection
   b) Cell balancing
   c) Isolation resistance monitoring
   d) Thermal management

9) Which of the following component is formed on the positive plate after the discharged reaction in a lead-acid battery?
   a) Sulphuric acid
   b) Lead peroxide
   c) Lead sulphate
   d) Spongy lead

10) Which of the following is NOT a component of EV?
   a) Battery
   b) Electric motor
   c) Radiator
   d) Motor controller

11) A primary benefit of EVs is _____.
   a) Higher emissions
   b) Low noise & pollution
   c) Higher fuel consumption
   d) None of the above

12) Electric vehicles have maximum torque at _____.
   a) Low RPM
   b) High RPM

Creativity and Design Thinking (AEC-02)

Day & Date: Tuesday, 12-05-2026 Max. Marks: 50
Time: 10:00 AM To 01:00 PM

Instructions: 1) All questions are compulsory.
2) Figures to the right indicate full marks.
3) Mention Question Paper Set (P/Q/R/S) on Top of Page.
4) Use of non-programmable calculators is allowed.

Answer

Q.1 Multiple Choice Questions.

1) Innovation mainly focuses on _____.
a) Generating ideas only b) Implementing creative ideas
c) Copying others d) Marketing

2) Creativity and Innovation together lead to _____.
a) Routine performance b) Problem discovery
c) Practical novelty d) Mechanical repetition

3) A characteristic of a creative person is _____.
a) Rigidity b) Curiosity
c) Fearfulness d) Passivity

4) Which of the following represents a major *barrier* to creativity?
a) Time pressure b) Risk-taking
c) Playfulness d) Flexibility

5) The “Ideate” stage in design thinking focuses on _____.
a) Understanding users b) Generating solutions
c) Testing ideas d) Building prototypes

6) Design thinking is fundamentally _____.
a) User-centered b) Manager-centered
c) Engineer-centered d) Cost-centered

7) Which of these helps to *overcome* creative blocks?
a) Collaboration b) Fear of mistakes
c) Over-planning d) Isolation

8) A design thinker empathizes to _____.
a) Know customer feelings and needs
b) Find product cost
c) Estimate profit
d) Collect market data

9) The *Define* phase results in _____.
a) Problem statement b) Prototype
c) Survey d) Marketing plan

10) Barriers to creativity can be removed through _____.
a) Open communication b) Discouragement
c) Repetition d) Judgmental thinking

11) The last phase of design thinking is _____.
a) Prototype b) Test
c) Ideate d) Define

12) Which term best describes the ability to see connections between unrelated ideas?
a) Fluency b) Flexibility
c) Originality d) Association

13) One of the benefits of design thinking is _____.
a) Focusing on user-friendly solutions
b) Ignoring customers
c) Cost reduction only
d) Quick fixes

14) Divergent and convergent thinking together ensure _____.
a) Balance between idea generation and selection
b) Faster production
c) Market analysis
d) Less creativity

15) In brainstorming, criticism should be ____.
a) Encouraged b) Postponed
c) Ignored d) Repeated

16) SCAMPER is mainly used for _____.
a) Modifying existing ideas b) Market study
c) Testing materials d) Estimating cost

17) In mind mapping, central themes are _____.
a) Placed at center with branches outward
b) At the edges
c) Hidden
d) Random

18) TRIZ encourages _____.
a) Systematic innovation through contradictions
b) Copying existing patents
c) Brainstorm blocking
d) Linear analysis

19) Which is a creative ideation technique?
a) Storyboarding b) Checklist creation
c) Prototype testing d) Quality audit

20) Concept sketching helps _____.
a) Express ideas visually b) Replace written reports
c) Perform tests d) Manage finance

21) In SCAMPER, "C" stands for _____.
a) Combine b) Copy
c) Create d) Classify

22) The purpose of divergent thinking is to _____.
a) Explore many possibilities b) Select one answer
c) Limit imagination d) Finalize design

23) Which of the following tools is best suited for *organizing ideas?*
a) Mind map b) Pie chart
c) Spreadsheet d) Histogram

24) "Storytelling" in concept development helps designers _____.
a) Communicate user experiences effectively
b) Draw detailed schematics
c) Analyze budget
d) Fix prototypes

25) The last step of concept development is _____.
a) Visualization of ideas b) Brainstorming
c) TRIZ analysis d) Market feedback

26) Prototyping in design helps _____.
a) Convert abstract ideas into tangible models
b) Replace manufacturing
c) Finalize budgets
d) Avoid testing

27) Which prototype type is *cheapest* and fastest?
a) Low-fidelity b) High-fidelity
c) Final d) Medium

28) High-fidelity prototypes allow _____.
a) User interaction and realism
b) Concept only
c) Paper sketching
d) Cost saving only

29) The iterative approach focuses on _____.
a) Refining design through repeated feedback
b) Making single model
c) Reducing creativity
d) Avoiding testing

30) The first step in rapid prototyping is _____.
a) 3D CAD modeling b) Final assembly
c) Testing d) Polishing

31) Which tool is commonly used in rapid prototyping?
a) 3D printer b) Spreadsheet
c) CNC lathe d) Mind map

32) User testing is most crucial in which stage?
a) Prototype evaluation b) Ideation
c) Definition d) Empathize

33) A real-life application of creative design is _____.
a) Smart wearable devices b) Paper waste
c) Redundant designs d) Manual data entry

34) Brainstorming during prototype improvement helps _____.
a) Generate alternative solutions
b) Restrict ideas
c) Delay work
d) Stop iteration

35) Which of the following prototypes allows early visualization?
a) Sketch model b) CAD simulation
c) Clay model d) Flowchart

36) Customer-driven design ensures _____.
a) Meeting user needs b) Reducing quality
c) Ignoring testing d) Increasing cost

37) The final output of iterative design is _____.
a) Optimized product meeting specifications
b) Initial draft
c) Prototype sketch
d) Raw material

38) The goal of sustainable design is _____.
a) Minimize negative environmental impact
b) Increase short-term gain
c) Use non-renewable resources
d) Ignore life cycle

39) Which phase is crucial for sustainability decisions?
a) Design stage b) Disposal
c) Marketing d) Sales

40) Product life-cycle assessment includes _____.
a) Raw material to end-of-life impact
b) Only production cost
c) Marketing only
d) Storage cost

41) A product designed for durability supports _____.
a) Longevity principle b) Obsolescence
c) Short-term use d) High waste

42) Eco-friendly design considers _____.
a) Material selection and energy efficiency
b) Only packaging
c) Advertisement
d) Color

43) “Design for reuse” aims to _____.
a) Extend product life b) Destroy waste
c) Limit recycling d) Increase cost

44) Agile development in design allows _____.
a) Rapid response to change b) Strict stepwise control
c) No feedback d) Delayed iterations

45) Spiral model combines _____.
a) Prototyping and risk management
b) Linear and agile stages
c) Testing and marketing
d) Sales and production

46) The staged (waterfall) model is _____.
a) Sequential b) Iterative
c) Flexible d) Rapid

47) Case studies in sustainable design show _____.
a) Application of eco-friendly materials
b) Ignoring user needs
c) Over-production
d) Energy waste

48) The most important sustainability factor in manufacturing is _____.
a) Resource efficiency
b) Advertisement
c) Branding
d) Design color

49) Which practice promotes a circular economy?
a) Recycling and remanufacturing
b) Landfilling
c) Burning waste
d) Exporting scrap

50) Sustainable engineering mainly targets _____.
a) Balance between economy, society, and environment
b) Maximizing output only
c) Technological monopoly
d) Short-term gains

3) Which of the following tools is best suited for *organizing ideas?*
a) Mind map b) Pie chart
c) Spreadsheet d) Histogram

4) "Storytelling" in concept development helps designers _____.
a) Communicate user experiences effectively
b) Draw detailed schematics
c) Analyze budget
d) Fix prototypes

5) The last step of concept development is _____.
a) Visualization of ideas b) Brainstorming
c) TRIZ analysis d) Market feedback

6) Prototyping in design helps _____.
a) Convert abstract ideas into tangible models
b) Replace manufacturing
c) Finalize budgets
d) Avoid testing

7) Which prototype type is *cheapest* and fastest?
a) Low-fidelity b) High-fidelity
c) Final d) Medium

8) High-fidelity prototypes allow _____.
a) User interaction and realism
b) Concept only
c) Paper sketching
d) Cost saving only

9) The iterative approach focuses on _____.
a) Refining design through repeated feedback
b) Making single model
c) Reducing creativity
d) Avoiding testing

10) The first step in rapid prototyping is _____.
a) 3D CAD modeling b) Final assembly
c) Testing d) Polishing

11) Which tool is commonly used in rapid prototyping?
a) 3D printer b) Spreadsheet
c) CNC lathe d) Mind map

12) User testing is most crucial in which stage?
a) Prototype evaluation b) Ideation
c) Definition d) Empathize

13) A real-life application of creative design is _____.
a) Smart wearable devices b) Paper waste
c) Redundant designs d) Manual data entry

14) Brainstorming during prototype improvement helps _____.
a) Generate alternative solutions
b) Restrict ideas
c) Delay work
d) Stop iteration

15) Which of the following prototypes allows early visualization?
a) Sketch model b) CAD simulation
c) Clay model d) Flowchart

16) Customer-driven design ensures _____.
a) Meeting user needs b) Reducing quality
c) Ignoring testing d) Increasing cost

17) The final output of iterative design is _____.
a) Optimized product meeting specifications
b) Initial draft
c) Prototype sketch
d) Raw material

18) The goal of sustainable design is _____.
a) Minimize negative environmental impact
b) Increase short-term gain
c) Use non-renewable resources
d) Ignore life cycle

19) Which phase is crucial for sustainability decisions?
a) Design stage b) Disposal
c) Marketing d) Sales

20) Product life-cycle assessment includes _____.
a) Raw material to end-of-life impact
b) Only production cost
c) Marketing only
d) Storage cost

21) A product designed for durability supports _____.
a) Longevity principle b) Obsolescence
c) Short-term use d) High waste

22) Eco-friendly design considers _____.
a) Material selection and energy efficiency
b) Only packaging
c) Advertisement
d) Color

23) “Design for reuse” aims to _____.
a) Extend product life b) Destroy waste
c) Limit recycling d) Increase cost

24) Agile development in design allows _____.
a) Rapid response to change b) Strict stepwise control
c) No feedback d) Delayed iterations

25) Spiral model combines _____.
a) Prototyping and risk management
b) Linear and agile stages
c) Testing and marketing
d) Sales and production

26) The staged (waterfall) model is _____.
a) Sequential b) Iterative
c) Flexible d) Rapid

27) Case studies in sustainable design show _____.
a) Application of eco-friendly materials
b) Ignoring user needs
c) Over-production
d) Energy waste

28) The most important sustainability factor in manufacturing is _____.
a) Resource efficiency b) Advertisement

a) Rigidity b) Curiosity
c) Fearfulness d) Passivity

14) Which of the following represents a major *barrier* to creativity?
a) Time pressure b) Risk-taking
c) Playfulness d) Flexibility

15) The “Ideate” stage in design thinking focuses on _____.
a) Understanding users b) Generating solutions
c) Testing ideas d) Building prototypes

16) Design thinking is fundamentally _____.
a) User-centered b) Manager-centered
c) Engineer-centered d) Cost-centered

17) Which of these helps to *overcome* creative blocks?
a) Collaboration b) Fear of mistakes
c) Over-planning d) Isolation

18) A design thinker empathizes to _____.
a) Know customer feelings and needs
b) Find product cost
c) Estimate profit
d) Collect market data

19) The *Define* phase results in _____.
a) Problem statement b) Prototype
c) Survey d) Marketing plan

20) Barriers to creativity can be removed through _____.
a) Open communication b) Discouragement
c) Repetition d) Judgmental thinking

21) The last phase of design thinking is _____.
a) Prototype b) Test
c) Ideate d) Define

22) Which term best describes the ability to see connections between unrelated ideas?
a) Fluency b) Flexibility
c) Originality d) Association

23) One of the benefits of design thinking is _____.
a) Focusing on user-friendly solutions
b) Ignoring customers
c) Cost reduction only
d) Quick fixes

24) Divergent and convergent thinking together ensure _____.
a) Balance between idea generation and selection
b) Faster production
c) Market analysis
d) Less creativity

25) In brainstorming, criticism should be ____.
a) Encouraged b) Postponed
c) Ignored d) Repeated

26) SCAMPER is mainly used for _____.
a) Modifying existing ideas b) Market study
c) Testing materials d) Estimating cost

27) In mind mapping, central themes are _____.
a) Placed at center with branches outward
b) At the edges
c) Hidden
d) Random

28) TRIZ encourages _____.
a) Systematic innovation through contradictions
b) Copying existing patents
c) Brainstorm blocking
d) Linear analysis

29) Which is a creative ideation technique?
a) Storyboarding b) Checklist creation
c) Prototype testing d) Quality audit

30) Concept sketching helps _____.
a) Express ideas visually b) Replace written reports
c) Perform tests d) Manage finance

31) In SCAMPER, "C" stands for _____.
a) Combine b) Copy
c) Create d) Classify

32) The purpose of divergent thinking is to _____.
a) Explore many possibilities b) Select one answer
c) Limit imagination d) Finalize design

33) Which of the following tools is best suited for *organizing ideas?*
a) Mind map b) Pie chart
c) Spreadsheet d) Histogram

34) "Storytelling" in concept development helps designers _____.
a) Communicate user experiences effectively
b) Draw detailed schematics
c) Analyze budget
d) Fix prototypes

35) The last step of concept development is _____.
a) Visualization of ideas b) Brainstorming
c) TRIZ analysis d) Market feedback

36) Prototyping in design helps _____.
a) Convert abstract ideas into tangible models
b) Replace manufacturing
c) Finalize budgets
d) Avoid testing

37) Which prototype type is *cheapest* and fastest?
a) Low-fidelity b) High-fidelity
c) Final d) Medium

38) High-fidelity prototypes allow _____.
a) User interaction and realism
b) Concept only
c) Paper sketching
d) Cost saving only

39) The iterative approach focuses on _____.
a) Refining design through repeated feedback
b) Making single model
c) Reducing creativity
d) Avoiding testing

40) The first step in rapid prototyping is _____.
a) 3D CAD modeling b) Final assembly
c) Testing d) Polishing

41) Which tool is commonly used in rapid prototyping?
a) 3D printer b) Spreadsheet
c) CNC lathe d) Mind map

42) User testing is most crucial in which stage?
a) Prototype evaluation b) Ideation
c) Definition d) Empathize

43) A real-life application of creative design is _____.
a) Smart wearable devices b) Paper waste
c) Redundant designs d) Manual data entry

44) Brainstorming during prototype improvement helps _____.
a) Generate alternative solutions
b) Restrict ideas
c) Delay work
d) Stop iteration

45) Which of the following prototypes allows early visualization?
a) Sketch model b) CAD simulation
c) Clay model d) Flowchart

46) Customer-driven design ensures _____.
a) Meeting user needs b) Reducing quality
c) Ignoring testing d) Increasing cost

47) The final output of iterative design is _____.
a) Optimized product meeting specifications
b) Initial draft
c) Prototype sketch
d) Raw material

48) The goal of sustainable design is _____.

a) Minimize negative environmental impact
b) Increase short-term gain
c) Use non-renewable resources
d) Ignore life cycle

49) Which phase is crucial for sustainability decisions?

a) Design stage b) Disposal
c) Marketing d) Sales

50) Product life-cycle assessment includes _____.

a) Raw material to end-of-life impact
b) Only production cost
c) Marketing only
d) Storage cost

T.Y. (B.Tech.) (Electrical Engineering) (Semester - I) (New) (CBCS)
Examination: March/April – 2026
Creativity and Design Thinking (AEC-02)

Day & Date: Tuesday, 12-05-2026 Max. Marks: 50
Time: 10:00 AM To 01:00 PM

Instructions: 1) All questions are compulsory.
2) Figures to the right indicate full marks.
3) Mention Question Paper Set (P/Q/R/S) on Top of Page.
4) Use of non-programmable calculators is allowed.

Answer

Q.1 Multiple Choice Questions.

1) The last phase of design thinking is _____.
a) Prototype b) Test
c) Ideate d) Define

2) Which term best describes the ability to see connections between unrelated ideas?
a) Fluency b) Flexibility
c) Originality d) Association

3) One of the benefits of design thinking is _____.
a) Focusing on user-friendly solutions
b) Ignoring customers
c) Cost reduction only
d) Quick fixes

4) Divergent and convergent thinking together ensure _____.
a) Balance between idea generation and selection
b) Faster production
c) Market analysis
d) Less creativity

5) In brainstorming, criticism should be ____.
a) Encouraged b) Postponed
c) Ignored d) Repeated

6) SCAMPER is mainly used for _____.
a) Modifying existing ideas b) Market study
c) Testing materials d) Estimating cost

7) In mind mapping, central themes are _____.
a) Placed at center with branches outward
b) At the edges
c) Hidden
d) Random

8) TRIZ encourages _____.
a) Systematic innovation through contradictions
b) Copying existing patents
c) Brainstorm blocking
d) Linear analysis

9) Which is a creative ideation technique?
a) Storyboarding b) Checklist creation
c) Prototype testing d) Quality audit

10) Concept sketching helps _____.
a) Express ideas visually b) Replace written reports
c) Perform tests d) Manage finance

11) In SCAMPER, “C” stands for _____.
a) Combine b) Copy
c) Create d) Classify

12) The purpose of divergent thinking is to _____.
a) Explore many possibilities b) Select one answer
c) Limit imagination d) Finalize design

13) Which of the following tools is best suited for *organizing ideas?*
a) Mind map b) Pie chart
c) Spreadsheet d) Histogram

14) “Storytelling” in concept development helps designers _____.
a) Communicate user experiences effectively
b) Draw detailed schematics
c) Analyze budget
d) Fix prototypes

15) The last step of concept development is _____.
a) Visualization of ideas b) Brainstorming
c) TRIZ analysis d) Market feedback

16) Prototyping in design helps _____.
a) Convert abstract ideas into tangible models
b) Replace manufacturing
c) Finalize budgets
d) Avoid testing

17) Which prototype type is *cheapest* and fastest?
a) Low-fidelity b) High-fidelity
c) Final d) Medium

18) High-fidelity prototypes allow _____.
a) User interaction and realism
b) Concept only
c) Paper sketching
d) Cost saving only

19) The iterative approach focuses on _____.
a) Refining design through repeated feedback
b) Making single model
c) Reducing creativity
d) Avoiding testing

20) The first step in rapid prototyping is _____.
a) 3D CAD modeling b) Final assembly
c) Testing d) Polishing

21) Which tool is commonly used in rapid prototyping?
a) 3D printer b) Spreadsheet
c) CNC lathe d) Mind map

22) User testing is most crucial in which stage?
a) Prototype evaluation b) Ideation
c) Definition d) Empathize

23) A real-life application of creative design is _____.
a) Smart wearable devices b) Paper waste
c) Redundant designs d) Manual data entry

24) Brainstorming during prototype improvement helps _____.
a) Generate alternative solutions
b) Restrict ideas
c) Delay work
d) Stop iteration

25) Which of the following prototypes allows early visualization?
a) Sketch model b) CAD simulation
c) Clay model d) Flowchart

26) Customer-driven design ensures _____.
a) Meeting user needs b) Reducing quality
c) Ignoring testing d) Increasing cost

27) The final output of iterative design is _____.
a) Optimized product meeting specifications
b) Initial draft
c) Prototype sketch
d) Raw material

28) The goal of sustainable design is _____.
a) Minimize negative environmental impact
b) Increase short-term gain
c) Use non-renewable resources
d) Ignore life cycle

29) Which phase is crucial for sustainability decisions?
a) Design stage b) Disposal
c) Marketing d) Sales

30) Product life-cycle assessment includes _____.
a) Raw material to end-of-life impact
b) Only production cost
c) Marketing only
d) Storage cost

31) A product designed for durability supports _____.
a) Longevity principle b) Obsolescence
c) Short-term use d) High waste

32) Eco-friendly design considers _____.
a) Material selection and energy efficiency
b) Only packaging
c) Advertisement
d) Color

33) “Design for reuse” aims to _____.
a) Extend product life b) Destroy waste
c) Limit recycling d) Increase cost

34) Agile development in design allows _____.
a) Rapid response to change b) Strict stepwise control
c) No feedback d) Delayed iterations

35) Spiral model combines _____.
a) Prototyping and risk management
b) Linear and agile stages
c) Testing and marketing
d) Sales and production

36) The staged (waterfall) model is _____.
a) Sequential b) Iterative
c) Flexible d) Rapid

37) Case studies in sustainable design show _____.
a) Application of eco-friendly materials
b) Ignoring user needs
c) Over-production
d) Energy waste

38) The most important sustainability factor in manufacturing is _____.
a) Resource efficiency b) Advertisement
c) Branding d) Design color

39) Which practice promotes a circular economy?
a) Recycling and remanufacturing
b) Landfilling
c) Burning waste
d) Exporting scrap

40) Sustainable engineering mainly targets _____.
a) Balance between economy, society, and environment
b) Maximizing output only
c) Technological monopoly
d) Short-term gains

41) Innovation mainly focuses on _____.
a) Generating ideas only b) Implementing creative ideas
c) Copying others d) Marketing

42) Creativity and Innovation together lead to _____.
a) Routine performance b) Problem discovery
c) Practical novelty d) Mechanical repetition

43) A characteristic of a creative person is _____.
a) Rigidity b) Curiosity
c) Fearfulness d) Passivity

44) Which of the following represents a major *barrier* to creativity?
a) Time pressure b) Risk-taking
c) Playfulness d) Flexibility

45) The “Ideate” stage in design thinking focuses on _____.
a) Understanding users b) Generating solutions
c) Testing ideas d) Building prototypes

46) Design thinking is fundamentally _____.
a) User-centered b) Manager-centered
c) Engineer-centered d) Cost-centered

47) Which of these helps to *overcome* creative blocks?
a) Collaboration b) Fear of mistakes
c) Over-planning d) Isolation

48) A design thinker empathizes to _____.

a) Know customer feelings and needs
b) Find product cost
c) Estimate profit
d) Collect market data

49) The *Define* phase results in _____.

a) Problem statement b) Prototype
c) Survey d) Marketing plan

50) Barriers to creativity can be removed through _____.

a) Open communication b) Discouragement
c) Repetition d) Judgmental thinking

T.Y. (B.Tech.) (Electrical Engineering) (Semester - I) (New) (CBCS)
Examination: March/April – 2026
Honors in Electrical Vehicle
Energy Management System for Electric Vehicle (EEHn-03A)

Day & Date: Thursday,14-05-2026 Max. Marks: 70
Time: 10:00 AM To 01:00 PM

Instructions: 1) Q. No. 1 is compulsory. It should be solved in the first 30 minutes in Answer Book Page no 03 (Starting page of the Answer Book). Each question carries one mark.
2) Don't forget to Mention question paper set (P/Q/R/S) on top of page.
3) Figures to the right indicates full marks.
4) Assume data wherever necessary.

MCQ/Objective Type Questions

Duration: 30 Minutes Marks:14

Q.1 Choose the correct Answer. **14**

1) Which process describes the conversion of chemical energy into electrical energy in cells and batteries?
a) Electrolysis
b) Ionization
c) Oxidation-reduction reaction
d) Electromagnetic induction

2) Which variables are commonly used to characterize battery operating conditions?
a) Nickel b) Lead
c) Lithium d) Zinc

3) Which type of battery is commonly used in portable electronic devices due to its high energy density?
a) Nickel-based Battery b) Sodium-based Battery
c) Lead Acid Battery d) Lithium-based Battery

4) Which process describes the conversion of chemical energy into electrical energy in cells and batteries?
a) Electrolysis b) Ionization
c) Oxidation-reduction reaction d) Electromagnetic induction

5) Which variables are commonly used to characterize battery operating conditions?
a) Voltage and current
b) Temperature and pressure
c) Capacity and charge/discharge rate
d) Color and shape

6) Battery specifications typically include which of the following characteristics?
   a) Chemical composition
   b) Weight and dimensions
   c) Internal resistance
   d) All of the above

7) What is a common approach to modeling batteries?
   a) Using only theoretical equations
   b) Utilizing experimental data exclusively
   c) Combining theoretical equations and experimental data
   d) Ignoring both theory and experimentation

8) Which type of battery is known for its high energy density and stable voltage characteristics?
   a) Lead-acid battery
   b) Nickel-metal hydride (NiMH) battery
   c) Rechargeable lithium-ion (Li-ion) battery
   d) Nickel-cadmium (NiCd) battery

9) What is a key advantage of using simulation models for batteries?
   a) Simulation models are always more accurate than experimental testing
   b) Simulation models are less time-consuming than experimental testing
   c) Simulation models require less computational power than experimental testing
   d) Simulation models cannot be used for predictive analysis

10) Which factor is most crucial in the selection of batteries for Electric Vehicles (EVs) and Hybrid Electric Vehicles (HEVs)?
   a) Voltage output
   b) Energy density
   c) Resistance to overcharging
   d) Cycle life

11) What is a primary consideration in traction battery pack design for EVs and HEVs?
   a) Minimizing weight
   b) Maximizing voltage output
   c) Reducing energy density
   d) Optimizing internal resistance

12) Why is battery monitoring essential in EVs and HEVs?
   a) To increase battery lifespan
   b) To reduce vehicle speed
   c) To decrease energy efficiency
   d) To eliminate battery overheating

13) What is a critical consideration for ensuring cell safety and battery design?
   a) Voltage output
   b) Material properties
   c) Color of the casing
   d) Number of charging cycles

14) Which testing method is commonly used to evaluate the safety and performance of batteries?
   a) Accelerated life testing
   b) Visual inspection
   c) Listening for sounds
   d) Taste testing

T.Y. (B.Tech.) (Electrical Engineering) (Semester - I) (New) (CBCS)
Examination: March/April – 2026
Honors in Electrical Vehicle
Energy Management System for Electric Vehicle (EEHn-03A)

Day & Date: Thursday,14-05-2026 Max. Marks: 56
Time: 10:00 AM To 01:00 PM

Instructions: 1) All questions are compulsory.
2) Figures to the right indicate full marks.
3) Assume data wherever necessary.

SECTION – I

Q.2 Attempt Any Four of the following. **16**

a) Explain with chemical reactions discharging process of a lead acid battery.

b) Explain with application operation of Metal air battery.

c) Explain charging and discharging current with characteristics of a battery.

d) Explain in short nominal parameters of a battery.

e) Explain general approach to modeling of batteries.

f) Define battery efficiency and how it is calculated.

Q.3 Attempt Any Two of the following. **12**

a) Explain following regarding performance criteria for Electric Vehicles batteries.
i) Vehicle propulsion factors
ii) Power and energy requirements of batteries

b) Develop a step-by-step explanation of the simulation model for a rechargeable Li-ion battery.

c) Explain the working principle of ultra-capacitors with suitable diagrams.

d) Describe the components and functioning of a flywheel energy storage system.

SECTION – II

Q.4 Attempt Any Four of the following. **16**

a) Explain requirements of battery monitoring in electric vehicles and hybrid electric vehicles.

b) Explain the fundamentals of battery pack design.

c) Describe the types of battery cell equalization methods.

d) Explain the chemical properties for cell safety of EV batteries.

e) Describes the EV Battery testing methods.

f) Describe the causes and consequences of gas generation in batteries.

Q.5 Attempt Any Two of the following. **12**

a) Explain the limitations and regulations related to the transport and storage of cells and batteries.

b) Explain the recycling, disposal, and second use of EV batteries.

c) Describes the State of Charge (SOC) estimation methods.

d) Describe the voltage sensing in the battery Management System (BMS).

a) Minimizing weight
b) Maximizing voltage output
c) Reducing energy density
d) Optimizing internal resistance

7) Why is battery monitoring essential in EVs and HEVs?

a) To increase battery lifespan
b) To reduce vehicle speed
c) To decrease energy efficiency
d) To eliminate battery overheating

8) What is a critical consideration for ensuring cell safety and battery design?

a) Voltage output
b) Material properties
c) Color of the casing
d) Number of charging cycles

9) Which testing method is commonly used to evaluate the safety and performance of batteries?

a) Accelerated life testing
b) Visual inspection
c) Listening for sounds
d) Taste testing

10) Which process describes the conversion of chemical energy into electrical energy in cells and batteries?

a) Electrolysis
b) Ionization
c) Oxidation-reduction reaction
d) Electromagnetic induction

11) Which variables are commonly used to characterize battery operating conditions?

a) Nickel
b) Lead
c) Lithium
d) Zinc

12) Which type of battery is commonly used in portable electronic devices due to its high energy density?

a) Nickel-based Battery
b) Sodium-based Battery
c) Lead Acid Battery
d) Lithium-based Battery

13) Which process describes the conversion of chemical energy into electrical energy in cells and batteries?

a) Electrolysis
b) Ionization
c) Oxidation-reduction reaction
d) Electromagnetic induction

14) Which variables are commonly used to characterize battery operating conditions?

a) Voltage and current
b) Temperature and pressure
c) Capacity and charge/discharge rate
d) Color and shape

T.Y. (B.Tech.) (Electrical Engineering) (Semester - I) (New) (CBCS)
Examination: March/April – 2026
Honors in Electrical Vehicle
Energy Management System for Electric Vehicle (EEHn-03A)

Day & Date: Thursday,14-05-2026 Max. Marks: 56
Time: 10:00 AM To 01:00 PM

Instructions: 1) All questions are compulsory.
2) Figures to the right indicate full marks.
3) Assume data wherever necessary.

SECTION – I

Q.2 Attempt Any Four of the following. **16**

a) Explain with chemical reactions discharging process of a lead acid battery.

b) Explain with application operation of Metal air battery.

c) Explain charging and discharging current with characteristics of a battery.

d) Explain in short nominal parameters of a battery.

e) Explain general approach to modeling of batteries.

f) Define battery efficiency and how it is calculated.

Q.3 Attempt Any Two of the following. **12**

a) Explain following regarding performance criteria for Electric Vehicles batteries.
i) Vehicle propulsion factors
ii) Power and energy requirements of batteries

b) Develop a step-by-step explanation of the simulation model for a rechargeable Li-ion battery.

c) Explain the working principle of ultra-capacitors with suitable diagrams.

d) Describe the components and functioning of a flywheel energy storage system.

SECTION – II

Q.4 Attempt Any Four of the following. **16**

a) Explain requirements of battery monitoring in electric vehicles and hybrid electric vehicles.

b) Explain the fundamentals of battery pack design.

c) Describe the types of battery cell equalization methods.

d) Explain the chemical properties for cell safety of EV batteries.

e) Describes the EV Battery testing methods.

f) Describe the causes and consequences of gas generation in batteries.

Q.5 Attempt Any Two of the following. **12**

a) Explain the limitations and regulations related to the transport and storage of cells and batteries.

b) Explain the recycling, disposal, and second use of EV batteries.

c) Describes the State of Charge (SOC) estimation methods.

d) Describe the voltage sensing in the battery Management System (BMS).

Time: 10:00 AM To 01:00 PM

Instructions: 1) Q. No. 1 is compulsory. It should be solved in the first 30 minutes in Answer Book Page no 03 (Starting page of the Answer Book). Each question carries one mark.
2) Don't forget to Mention question paper set (P/Q/R/S) on top of page.
3) Figures to the right indicates full marks.
4) Assume suitable data if necessary and mention it clearly.

MCQ/Objective Type Questions

Duration: 30 Minutes Marks:14

Q.1 Choose correct answer. **14**

1) Distribution management systems _____.
a) Radial system b) Tree system
c) Ring mains system d) All are equally reliable

2) The energy strategies of companies have the principle of _____.
a) restoring and preserving the environment
b) reducing wastes and pollutants
c) reducing people about energy conservation
d) All of these

3) Energy management is a key component of _____.
a) Environmental management b) Carbon management
c) Nitrogen management d) Water management

4) In passive potential energy strategies, _____.
a) There is no systematic planning
b) Measures with low profitability are not considered
c) One should have high knowledge of the energy price
d) All of these

5) The area of cross-section of the neutral in a 3-wire D.C. system is generally _____ the area of cross section of the main conductor.
a) same as b) One-fourth
c) One-half d) Double

6) Which of the following is formed at the graphite electrode during the charging process of a battery when the lithium-ion moves through the separator?

a) Water
b) Graphite
c) Lithium hydroxide
d) Lithium carbide

7) In a distribution system, major cost is that of _____.

a) Earthing system
b) Distribution transformer
c) Conductors
d) Metres

8) The flywheel is accelerated when _____.

a) Driving torque > Load torque
b) Driving torque < Load torque
c) Driving torque = Load torque
d) Any of the above

9) For the same conductor length, same amount of power, same losses and maximum voltage to earth, which system requires minimum conductor area?

a) 3-wire AC
b) 2-wire AC
c) 2-wire DC
d) Single phase

10) Cloud base energy management system provides the ability to _____.

a) Remotely control HVAC
b) Collect real-time data
c) Generate intelligent, specific and real-time guidance
d) All of these

11) The null point of a uniformly loaded distributor feed at the equal voltage at both ends lies at _____.

a) Midpoint
b) Either end
c) Two-thirds distance from one end
d) One-fourth distance from one end

12) Why is compressed air in a storage system cooled before storage?

a) Prevent heat loss during storage
b) Improve turn-around efficiency
c) Reduces storage volume
d) Helps in a hybrid system

13) What is the permissible limit of voltage variations allowed in the distribution systems?

a) ± 2%
b) ± 5%
c) ± 10%
d) ± 6%

14) As compared to cables, the disadvantages of transmission lines is ____.

a) inductive interference between power and communication circuits
b) exposure to lightning
c) exposure to atmospheric hazards like smoke, ice, etc.
d) All of the above

Q.2 Answer the following. (Any Four) **16**

a) Write a short note on the security and reliability of distributed generation.

b) Discuss different integration issues in distributed generation.

c) Write a short note on the protection of DGs.

d) Explain the impact on transmission and generation systems on DG.

e) Write a short note on large-scale storage for grid stability.

Q.3 Answer the following. (Any Two) **12**

a) Explain different Forecasting methods and their applications.

b) What are the Regulatory challenges in the interconnection of DGS to the power systems?

c) Explain in detail the types of DG plants.

SECTION – II

Q.4 Answer the following. (Any Four) **16**

a) Write a short note on Loss reduction and Investment reduction.

b) Explain the role of microgrids in Energy Reliability.

c) Discuss allocation of losses in distribution networks with DG.

d) Write a short note on DGs in distribution networks.

e) What are alternative frameworks for distribution tariff development?

Q.5 Answer the following. (Any Two) **12**

a) Discuss energy storage's role in Energy Security.

b) Explain the Virtual Power Plant in detail.

c) Explain the types of energy storage systems.

MCQ/Objective Type Questions

Duration: 30 Minutes Marks:14

Q.1 Choose the Correct Alternatives from the Options and Rewrite the Sentence. **14**

1) Which among the following quantities are specified at the generator Bus?
a) P & Q
b) P & |V|
c) Q & |V|
d) P & δ

2) The three phase SC MVA to be interrupted by a circuit breaker in a power system is given by _____.
a) $\sqrt{3}\times$ post fault line voltage in kV $\times$ SC current in kA
b) $3\times$ pre fault line voltage in kV $\times$ SC current in kA
c) $\sqrt{3}\times$ pre fault line voltage in kV $\times$ SC current in kA
d) $(1/\sqrt{3})\times$ pre fault line voltage in kV $\times$ SC current in kA

3) Under line-to-line fault zero sequence component of fault current will be _____.
a) Very Large
b) Zero
c) Negligible
d) Both b & c

4) In load flow studies of a power system, a voltage control bus is specified by _____.
a) Real power and reactive power
b) Reactive power and voltage magnitude
c) Voltage and voltage phase angle
d) Real power and voltage magnitude

5) What is the value of $(1+a+a^2)$?
a) ∞
b) 1
c) -1
d) 0

6) What are the common assumptions made for the equal area criterion?
a) The transmission line and machine resistances are neglected.
b) Rotor speed of the machine is constant
c) Mechanical input remains constant.
d) All of these

7) Equal area criterion is used to study _____.
a) Load flow analysis b) Fault analysis
c) Stability analysis d) None of these

8) Reactance diagram contains which of the following?
a) Resistance of Alternator
b) Resistance of transformer winding
c) Induction motor's equivalent circuit
d) Inductive reactance of transmission lines

9) Impedance diagram is used for analysis of _____.
a) Load flow b) Alternator
c) Fault d) Transmission Line

10) Fault level means _____.
a) Voltage at the point of fault b) fault current
c) Fault power factor d) fault MVA

11) The magnitude of p.u. impedance of a transformer determined from the HT side and LT side of transformer are _____.
a) Unequal
b) Equal
c) Depends on the turns ratio
d) None of above

12) The most common buses in power system are _____.
a) slack bus b) generator bus
c) load bus d) a and b

13) A transformer rated at 11KV/0.4 KV, 500 KVA, 5% Reactance. What is the Shirt Circuit MVA of transformer when it is connected to infinite bus?
a) 15 MVA b) 5 MVA
c) 10 MVA d) 20 MVA

14) _____ is a series type unbalanced faults occurs in power system.
a) L-L b) L-L-G
c) L-L-L d) Open Conductor Fault

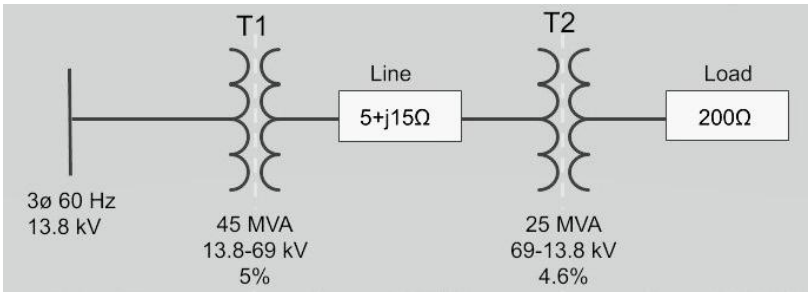
Q.2 Attempt any four. **16**

a) Explain Per Unit System with merits and demerits.

b) $\mathrm{G}: 300\mathrm{MVA}, 20\mathrm{kV}, \mathrm{X}'' = 1.2\ \Omega$
$\mathrm{T1}: 350\mathrm{MVA}, 230\mathrm{V\ Y}/20\mathrm{kV}\ \Delta, \mathrm{X} = 15.2\ \Omega/\mathrm{ph}$
$\mathrm{T2}: 300\mathrm{MVA}, 230\mathrm{V\ Y}/13.2\mathrm{kV}\ \Delta, \mathrm{X} = 16\ \Omega/\mathrm{ph}$
$\mathrm{TL}: 1 = 64\mathrm{km}, \mathrm{XTL} = 0.5\ \Omega/\mathrm{km}$
$\mathrm{M1}: 200\mathrm{MVA}, 13.2\mathrm{kV}, \mathrm{X}'' = 1.6\ \Omega$
$\mathrm{M2}: 100\mathrm{MVA}, 13.2\mathrm{kV}, \mathrm{X}'' = 1.6\ \Omega$
Draw the Single line diagram for above data.

c) Calculate Per Unit Impedance line and per unit impedance of load. If base impedance for line is 115.8 Ω and base impedance for load is 5.232 Ω



d) With the help of sample power system, describe step by step method for formation of Y bus using inspection method.

e) Write short note on selection of circuit breaker.

Q.3 Attempt Any Two. **12**

a) Describe any two methods of short circuit current control with neat circuit diagram also state merits and demerits of each.

b) The primary and secondary sides of a single phase 1 MVA, 4kV / 2kV transformer have a leakage reactance of 2 Ω each. Find the p.u reactance of the transformer referred to the primary and secondary side.

c) Explain how an unbalanced set of three phase voltages (V_a, V_b, V_c,) can be represented by three sets of symmetrical components (V_{a1}, V_{a2}, V_{a0}).

Section – II

Q.4 Attempt Any Four. **16**

a) Derive power flow equation in rectangular form for the load flow analysis.

b) Explain rotor dynamics and derive expression for swing equation.

c) Describe various types of buses in power system and their significance in brief.

d) Explain with sequence network various open conductor fault on power system.

e) Derive an expression for single line to ground fault on an unloaded synchronous generator.

Q.5 Attempt Any Two. **12**

a) Derive the necessary equation to determine the fault current for single line to ground fault. Draw a diagram showing the interconnections of sequence networks.

b) Derive an expression for load flow analysis by Gauss-Siedel method.

c) State Equal Area Criterion (EAC). What are the assumptions made in applying EAC? Discuss its applications.

T. Y. (B.Tech.) (Electrical Engineering) (Semester - I) (New/Old) (CBCS) Examination: March/April – 2026
Power System - III (BTN07501)

Day & Date: Saturday, 02-05-2026 Max. Marks: 70
Time: 10:00 AM To 01:00 PM

Instructions: 1) Q. No. 1 is compulsory. It should be solved in the first 30 minutes in Answer Book Page no 03 (Starting page of the Answer Book). Each question carries one mark.
2) Don't forget to Mention question paper set (P/Q/R/S) on top of Page.
3) Figures to the right indicate full marks.

MCQ/Objective Type Questions

Duration: 30 Minutes Marks:14

Q.1 Choose the Correct Alternatives from the Options and Rewrite the Sentence. **14**

1) Reactance diagram contains which of the following?
a) Resistance of Alternator
b) Resistance of transformer winding
c) Induction motor's equivalent circuit
d) Inductive reactance of transmission lines

2) Impedance diagram is used for analysis of _____.
a) Load flow b) Alternator
c) Fault d) Transmission Line

3) Fault level means _____.
a) Voltage at the point of fault b) fault current
c) Fault power factor d) fault MVA

4) The magnitude of p.u. impedance of a transformer determined from the HT side and LT side of transformer are _____.
a) Unequal
b) Equal
c) Depends on the turns ratio
d) None of above

5) The most common buses in power system are _____.
a) slack bus b) generator bus
c) load bus d) a and b

6) A transformer rated at 11KV/0.4 KV, 500 KVA, 5% Reactance. What is the Shirt Circuit MVA of transformer when it is connected to infinite bus?

a) 15 MVA
b) 5 MVA
c) 10 MVA
d) 20 MVA

7) _____ is a series type unbalanced faults occurs in power system.

a) L-L
b) L-L-G
c) L-L-L
d) Open Conductor Fault

8) Which among the following quantities are specified at the generator Bus?

a) P & Q
b) P & $|V|$
c) Q & $|V|$
d) P & δ

9) The three phase SC MVA to be interrupted by a circuit breaker in a power system is given by _____.

a) $\sqrt{3}\times$ post fault line voltage in kV $\times$ SC current in kA
b) $3\times$ pre fault line voltage in kV $\times$ SC current in kA
c) $\sqrt{3}\times$ pre fault line voltage in kV $\times$ SC current in kA
d) $(1/\sqrt{3})\times$ pre fault line voltage in kV $\times$ SC current in kA

10) Under line-to-line fault zero sequence component of fault current will be _____.

a) Very Large
b) Zero
c) Negligible
d) Both b & c

11) In load flow studies of a power system, a voltage control bus is specified by _____.

a) Real power and reactive power
b) Reactive power and voltage magnitude
c) Voltage and voltage phase angle
d) Real power and voltage magnitude

12) What is the value of $(1+a+a^2)$?

a) ∞
b) 1
c) -1
d) 0

13) What are the common assumptions made for the equal area criterion?

a) The transmission line and machine resistances are neglected.
b) Rotor speed of the machine is constant
c) Mechanical input remains constant.
d) All of these

14) Equal area criterion is used to study _____.

a) Load flow analysis
b) Fault analysis
c) Stability analysis
d) None of these

MCQ/Objective Type Questions

Duration: 30 Minutes Marks:14

Q.1 Give the correct option for the following questions. 14

1) By which of the following the control action is determined when a man walks along a path?
a) Brain b) Hands
c) Legs d) Eyes

2) In an open loop system, the control action _____.
a) depends on the input signal
b) depends on system variables
c) depends on size of the system
d) is independent of the output

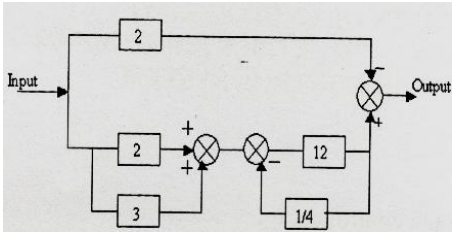
3) In force-Voltage analogy mass is analogous to _____.
a) Inductance b) Current
c) Voltage d) Capacitance

4) Main difference between servomotor and standard motor is that _____.
a) Servomotor has low inertia and higher starting torque
b) Servomotor has low inertia low starting torque
c) Servomotor has high inertia and high starting torque
d) None of these

5) Effect of feedback on sensitivity is minimum in _____.
a) Open loop control system b) Closed loop control system
c) None of the mentioned d) Both of the mentioned

6) Signal flow graphs _____.
- a) They apply to linear systems
- b) The equation obtained may or may not be in the form of cause or effect
- c) Arrows are not important in the graph
- d) They cannot be converted back to block diagram

7) The gain of given system is, _____.



a) 31 b) 13
c) 17 d) 6

8) Integral error compensation in a control system _____.
- a) minimizes steady state error
- b) increases steady-state error
- c) does not have any effect on steady state error
- d) None of the above

9) A type I system under steady state will have position error when there is _____.
- a) step displacement input
- b) ramp input
- c) either of a or b above
- d) None of the above

10) If overshoot is excessive, then the damping ratio is _____.
- a) Equal to 0.4
- b) Less than 0.4
- c) More than 0.4
- d) Infinity

11) The system with characteristics equation $s^4 + 3s^3 + 6s^2 + 9s + 12 = 0$.
- a) stable
- b) unstable
- c) marginally stable
- d) None of the above

12) Routh Hurwitz criterion gives _____.
- a) roots in right half of s-plane
- b) roots in the left half of s-plane
- c) roots in right half of s-plane and/ or roots on imaginary axes
- d) roots in the left half of the s-plane and/or roots on the imaginary axis.

13) In a root locus plot, the increase in K will _____.

a) Increase damping ratio
b) Decrease damping ratio
c) Not change damping ratio
d) None of these

14) The octave frequency range is specified by _____.

a) $\frac{w2}{w1} = 1$
b) $\frac{w2}{w1} = 2$
c) $\frac{w2}{w1} = 6$
d) $\frac{w2}{w1} = 8$

Instructions: 1) All Questions are compulsory.
2) Figures to the right indicates full marks.
3) Assume suitable data if necessary.
4) Draw neat diagrams whenever necessary.

SECTION – I

Q.2 Solve Any Four. **16**

a) Explain the different classification of control systems in detail.

b) For the mechanical system shown in fig. 1.
i) Draw the mechanical equivalent network
ii) Write the system differential equations
iii) Determine the transfer function

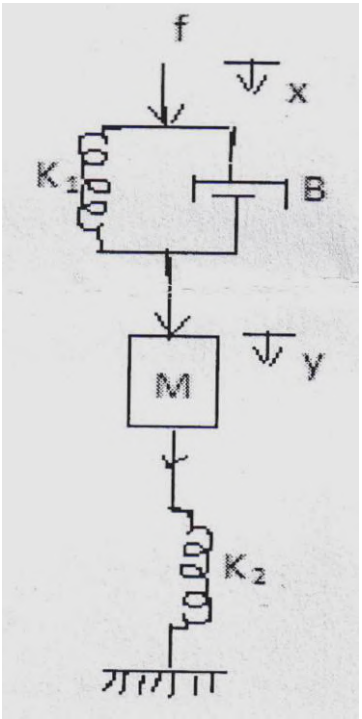

Fig. 1

c) Determine the T.F. for the electric network given in fig.2.

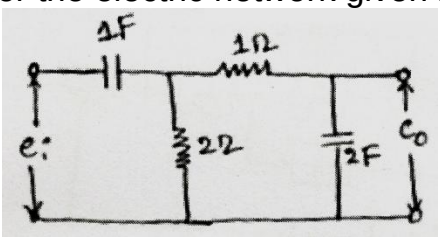

Fig. 2

d) Consider the block diagram shown in fig.3. Find C/R using block diagram reduction technique.

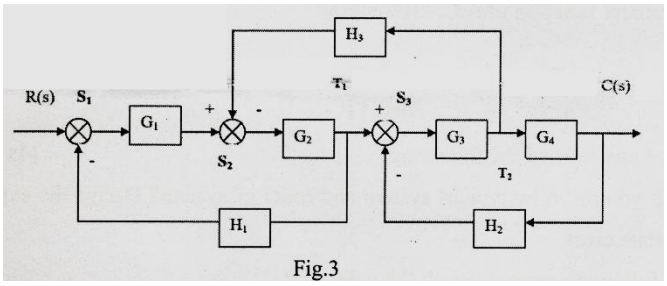

Fig.3

e) Obtain the T.F. C/R using SFG shown in fig.4.

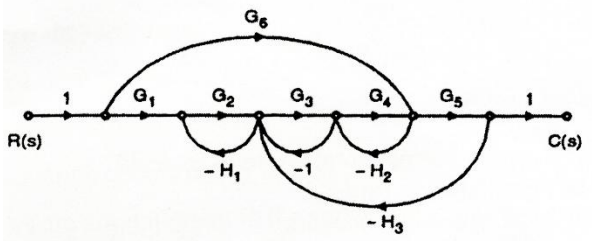

Fig. 4

Q.3 Solve Any Two. **12**

a) Write the differential equations governing the mechanical system shown in fig.5. Also draw F-V and F-I analogous circuit.

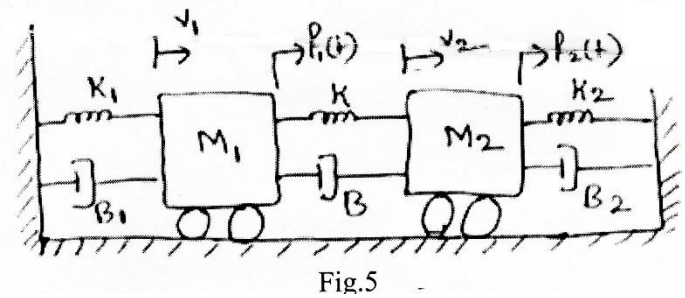

Fig.5

b) Draw a SFG and find the closed loop transfer function of system as shown in fig. 6 below.

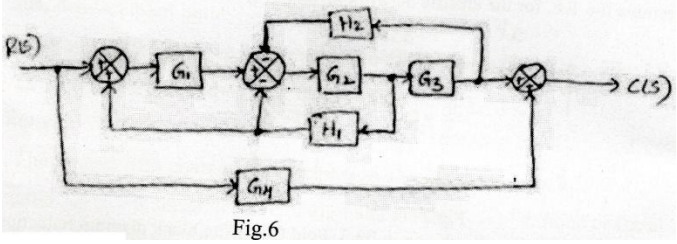

Fig.6

c) Derive the transfer of A.C. servomotor.

SECTION – II

Q.4 Attempt Any Four. **16**

a) What do you mean by type of system and order of system? Derive the expression for steady-state error.

b) For the following system sketch the polar plot.

$$G(s)H(s) = \frac{100}{s(s+2)(s+10)}$$

c) With the help of neat sketches and mathematical expression explain:

i) PI controller
ii) PD controller
iii) PID controller

d) The characteristic equation of a feedback control system is $s^4 + 4s^3 + 13s^2 + 36s + k = 0$, determine the range of k for the system to be stable.

e) Explain the frequency domain specifications.

f) The open-loop transfer function of a unity feedback system is given by $G(s) = 25 \,/\, s(s+6)$. Calculate

i) Peak time
ii) Percent overshoot
iii) Settling time
iv) Rise time

Q.5 Solve Any two. **12**

a) Draw the root locus for the unity feedback system whose OLTF is

$$G(s) = \frac{k(s+4)}{(s+2)(s+3)}$$

b) Construct the BODE plot for the system below whose open loop transfer function is

$$G(S)H(S) = \frac{80}{s(s+2)(s+20)}$$

Determine the

i) Gain margin
ii) Phase margin
iii) wgc & wpc
iv) Comment on the stability

c) Derive an expression for the time response of an underdamped second-order system when subjected to a unit step input.

Linear Control System (BTN07502)

Day & Date: Tuesday, 05-05-2026 Max. Marks: 70
Time: 10:00 AM To 01:00 PM

Instructions: 1) Q. No. 1 is compulsory. It should be solved in the first 30 minutes in Answer Book Page no 03 (Starting page of the Answer Book). Each question carries one mark.
2) Don't forget to Mention question paper set (P/Q/R/S) on top of page.
3) Figures to the right indicates full marks.
4) Assume suitable data if necessary.
5) Draw neat diagrams whenever necessary.

MCQ/Objective Type Questions

Duration: 30 Minutes Marks:14

Q.1 Give the correct option for the following questions. 14

1) Integral error compensation in a control system _____.
a) minimizes steady state error
b) increases steady-state error
c) does not have any effect on steady state error
d) None of the above

2) A type I system under steady state will have position error when there is _____.
a) step displacement input
b) ramp input
c) either of a or b above
d) None of the above

3) If overshoot is excessive, then the damping ratio is _____.
a) Equal to 0.4 b) Less than 0.4
c) More than 0.4 d) Infinity

4) The system with characteristics equation $s^4 + 3s^3 + 6s^2 + 9s + 12 = 0$.
a) stable b) unstable
c) marginally stable d) None of the above

5) Routh Hurwitz criterion gives _____.
a) roots in right half of s-plane
b) roots in the left half of s-plane
c) roots in right half of s-plane and/ or roots on imaginary axes
d) roots in the left half of the s-plane and/or roots on the imaginary axis.

6) In a root locus plot, the increase in K will _____.
a) Increase damping ratio
b) Decrease damping ratio
c) Not change damping ratio
d) None of these

7) The octave frequency range is specified by _____.
a) $\frac{w2}{w1} = 1$
b) $\frac{w2}{w1} = 2$
c) $\frac{w2}{w1} = 6$
d) $\frac{w2}{w1} = 8$

8) By which of the following the control action is determined when a man walks along a path?
a) Brain
b) Hands
c) Legs
d) Eyes

9) In an open loop system, the control action _____.
a) depends on the input signal
b) depends on system variables
c) depends on size of the system
d) is independent of the output

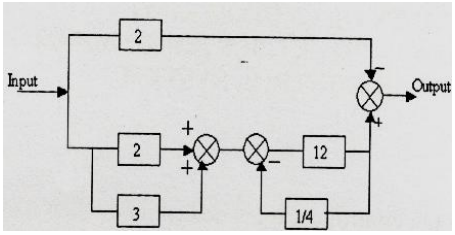
10) In force-Voltage analogy mass is analogous to _____.
a) Inductance
b) Current
c) Voltage
d) Capacitance

11) Main difference between servomotor and standard motor is that _____.
a) Servomotor has low inertia and higher starting torque
b) Servomotor has low inertia low starting torque
c) Servomotor has high inertia and high starting torque
d) None of these

12) Effect of feedback on sensitivity is minimum in _____.
a) Open loop control system
b) Closed loop control system
c) None of the mentioned
d) Both of the mentioned

13) Signal flow graphs _____.
a) They apply to linear systems
b) The equation obtained may or may not be in the form of cause or effect
c) Arrows are not important in the graph
d) They cannot be converted back to block diagram

14) The gain of given system is, _____.



a) 31
b) 13
c) 17
d) 6

Seat No.	

Set **Q**

T. Y. (B.Tech.) (Electrical Engineering) (Sem - I) (New/Old) (CBCS)
Examination: March/April – 2026
Linear Control System (BTN07502)

Day & Date: Tuesday, 05-05-2026 Max. Marks: 56
Time: 10:00 AM To 01:00 PM

Instructions: 1) All Questions are compulsory.
2) Figures to the right indicates full marks.
3) Assume suitable data if necessary.
4) Draw neat diagrams whenever necessary.

SECTION – I

Q.2 Solve Any Four. **16**

a) Explain the different classification of control systems in detail.

b) For the mechanical system shown in fig. 1.
i) Draw the mechanical equivalent network
ii) Write the system differential equations
iii) Determine the transfer function

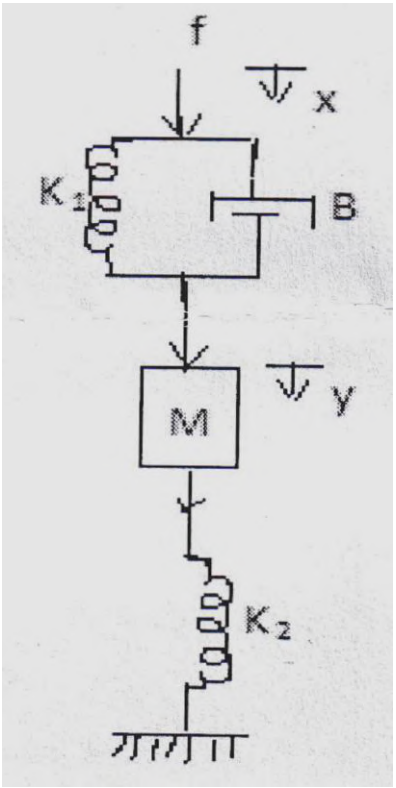


Fig. 1

c) Determine the T.F. for the electric network given in fig.2.

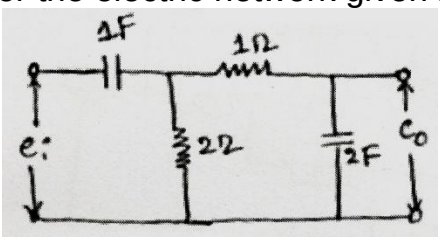

Fig. 2

d) Consider the block diagram shown in fig.3. Find C/R using block diagram reduction technique.

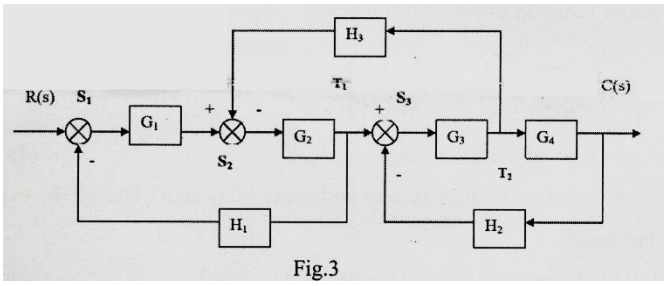

Fig.3

e) Obtain the T.F. C/R using SFG shown in fig.4.

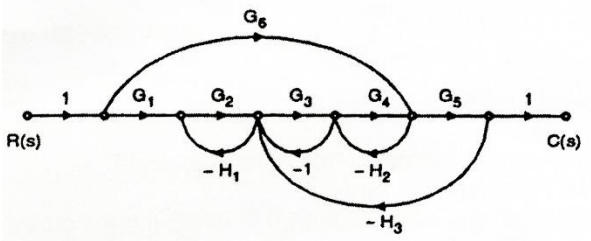

Fig. 4

Q.3 Solve Any Two. **12**

a) Write the differential equations governing the mechanical system shown in fig.5. Also draw F-V and F-I analogous circuit.

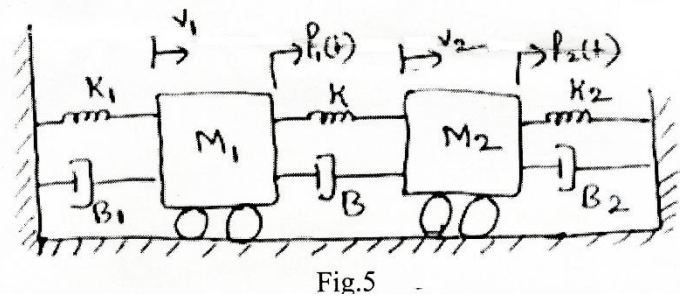

Fig.5

b) Draw a SFG and find the closed loop transfer function of system as shown in fig. 6 below.

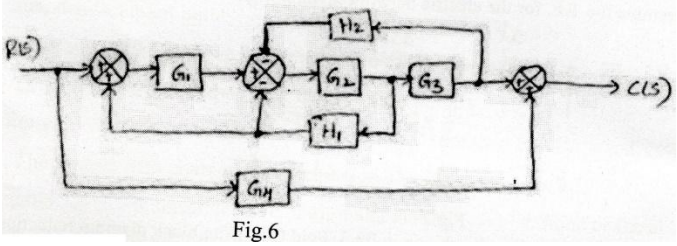

Fig.6

c) Derive the transfer of A.C. servomotor.

SECTION – II

Q.4 Attempt Any Four. **16**

a) What do you mean by type of system and order of system? Derive the expression for steady-state error.

b) For the following system sketch the polar plot.

$$G(s)H(s) = \frac{100}{s(s+2)(s+10)}$$

c) With the help of neat sketches and mathematical expression explain:

i) PI controller
ii) PD controller
iii) PID controller

d) The characteristic equation of a feedback control system is $s^4 + 4s^3 + 13s^2 + 36s + k = 0$, determine the range of k for the system to be stable.

e) Explain the frequency domain specifications.

f) The open-loop transfer function of a unity feedback system is given by $G(s) = 25 \,/\, s(s+6)$. Calculate

i) Peak time
ii) Percent overshoot
iii) Settling time
iv) Rise time

Q.5 Solve Any two. **12**

a) Draw the root locus for the unity feedback system whose OLTF is

$$G(s) = \frac{k(s+4)}{(s+2)(s+3)}$$

b) Construct the BODE plot for the system below whose open loop transfer function is

$$G(S)H(S) = \frac{80}{s(s+2)(s+20)}$$

Determine the

i) Gain margin
ii) Phase margin
iii) wgc & wpc
iv) Comment on the stability

c) Derive an expression for the time response of an underdamped second-order system when subjected to a unit step input.

MCQ/Objective Type Questions

Duration: 30 Minutes Marks:14

Q.1 Choose the correct alternatives from the options. **14**

1) Internal pull up resisters are not available for _____.
a) port 0 b) port 1
c) port 2 d) port 3

2) The 8051 microcontroller has _____ bytes of on-chip ROM.
a) 256 b) 1K
c) 4K d) 8K

3) The PSW (Program Status Word) register contains: _____.
a) Address of program b) Arithmetic flags
c) Stack pointer value d) Memory address

4) The default value of stack pointer after reset is: _____.
a) 00H b) 07H
c) 08H d) FFH

5) The assembler translates: _____.
a) C code to object code
b) Assembly code to machine code
c) Binary to hexadecimal
d) None of these

6) The instruction SJMP LABEL is used for: _____.
a) Short jump (within -128 to +127 bytes)
b) Long jump
c) Call subroutine
d) None

7) Address lines are required for accessing the data if memory capacity is 8KB bytes.

a) 10 b) 11
c) 12 d) 13

8) In 8051 C programming, while (1) is used for: _____.

a) Infinite loop b) One-time execution
c) Delay d) Interrupt

9) The RS pin of an LCD is used to: _____.

a) Reset LCD
b) Select command/data register
c) Send enable signal
d) Clear display

10) In PIC 16F877 Port C and D are _____ & _____ bits wide respectively.

a) 6, 3 b) 3, 8
c) 8, 8 d) 6, 8

11) The IC commonly used to drive stepper motors with 8051 is: _____.

a) ULN2003 b) MAX232
c) ADC0808 d) LM35

12) PIC 16F877 A consists of _____ KB flash program memory.

a) 2 b) 4
c) 8 d) None of these

13) LM35 has how many pins?

a) 2 b) 1
c) 3 d) 4

14) A typical servo motor rotates: _____.

a) 0°-90° b) 0°-180°
c) 0°-270° d) Unlimited rotation

SECTION – II

Q.4 Attempt any Four. **16**

a) Draw the interfacing diagram for 16×2 LCD display with 8051 microcontroller.

b) Draw the interfacing diagram for relay with 8051 microcontroller.

c) Explain the architecture of ARM Processor.

d) Draw and explain Status Register of PIC 16F877A.

e) Draw the interfacing diagram of LM35 with 8051 Microcontroller.

Q.5 Attempt any Two. **12**

a) Draw the interfacing diagram of 4KB ROM with 8051 microcontroller also mention starting and ending addresses of interfaces memory.

b) Draw the interfacing diagram of stepper motor with 8051. Write an ALP to rotate the stepper motor one revolution in counter clockwise direction and then stop.

c) Draw the interfacing diagram of ADC 0809 with 8051 microcontroller and also explain the functions of ADC pins
i) SOC ii) EOC iii) ALE

T. Y. (B.Tech.) (Electrical Engineering) (Semester - I) (New/Old) (CBCS) Examination: March/April – 2026
Advanced Microcontroller System (BTN07503)

Day & Date: Thursday, 07-05-2026 Max. Marks: 70
Time: 10:00 AM To 01:00 PM

Instructions: 1) Q. No. 1 is compulsory. It should be solved in the first 30 minutes in Answer Book Page no 03 (Starting page of the Answer Book). Each question carries one mark.
2) Don't forget to Mention question paper set (P/Q/R/S) on top of page.
3) Figures to the right indicates full marks.

MCQ/Objective Type Questions

Duration: 30 Minutes Marks:14

Q.1 Choose the correct alternatives from the options. 14

1) The IC commonly used to drive stepper motors with 8051 is: _____.
a) ULN2003 b) MAX232
c) ADC0808 d) LM35

2) PIC 16F877 A consists of _____ KB flash program memory.
a) 2 b) 4
c) 8 d) None of these

3) LM35 has how many pins?
a) 2 b) 1
c) 3 d) 4

4) A typical servo motor rotates: _____.
a) 0°-90° b) 0°-180°
c) 0°-270° d) Unlimited rotation

5) Internal pull up resisters are not available for _____.
a) port 0 b) port 1
c) port 2 d) port 3

6) The 8051 microcontroller has _____ bytes of on-chip ROM.
a) 256 b) 1K
c) 4K d) 8K

7) The PSW (Program Status Word) register contains: _____.
a) Address of program b) Arithmetic flags
c) Stack pointer value d) Memory address

8) The default value of stack pointer after reset is: _____.
a) 00H b) 07H
c) 08H d) FFH

9) The assembler translates: _____.
   a) C code to object code
   b) Assembly code to machine code
   c) Binary to hexadecimal
   d) None of these

10) The instruction SJMP LABEL is used for: _____.
   a) Short jump (within -128 to +127 bytes)
   b) Long jump
   c) Call subroutine
   d) None

11) Address lines are required for accessing the data if memory capacity is 8KB bytes.
   a) 10 b) 11
   c) 12 d) 13

12) In 8051 C programming, while (1) is used for: _____.
   a) Infinite loop b) One-time execution
   c) Delay d) Interrupt

13) The RS pin of an LCD is used to: _____.
   a) Reset LCD
   b) Select command/data register
   c) Send enable signal
   d) Clear display

14) In PIC 16F877 Port C and D are _____ & _____ bits wide respectively.
   a) 6, 3 b) 3, 8
   c) 8, 8 d) 6, 8

MCQ/Objective Type Questions

Duration: 30 Minutes Marks:14

Q.1 Give the correct option for the following questions. **14**

1) If dot product of two vectors is zero then vectors are _____.
a) Perpendicular b) Parallel
c) Oblique d) None of these

2) In Dot product of unit vector in cylindrical and rectangular coordinate system for $a_y \, . a_\varphi$ is _____.
a) $-\cos\varphi$ b) $-\sin\varphi$
c) $\sin\varphi$ d) $\cos\varphi$

3) The unit of electric field intensity E is _____.
a) $\mathrm{N/C}$ b) $\mathrm{J/C}$
c) $\mathrm{N.M/C}$ d) $\mathrm{V/M}$

4) The electric field due to electric dipole is _____.
a) proportional to distance from dipole
b) proportional to square of distance from dipole
c) proportional to inverse square of distance from dipole
d) proportional to inverse cube of distance from dipole

5) Vectors $A = -3a_x + 2a_y + a_z$ and $B = 5a_x + 6a_y + 3a_z$ are _____.
a) Parallel b) Perpendicular
c) At an angle 35° d) None of these

6) The force between two charges is $120\ \mathrm{N}$. If the distance between the charge is doubled. Then force will be _____.
a) $60\ \mathrm{N}$ b) $30\ \mathrm{N}$
c) $40\ \mathrm{N}$ d) $240\ \mathrm{N}$

7) The relative permittivity of free space is given by _____.
a) 1 b) 10
c) 100 d) 1000

8) Work done in electric field is _____.
a) $\mathrm{W} = \mathrm{Q}/\mathrm{V}$ b) $\mathrm{W} = \mathrm{V}/\mathrm{Q}$
c) $\mathrm{W} = \mathrm{QV}$ d) None of the above

9) The units of capacitance are _____.
a) volts/coulomb b) coulombs/volt
c) ohms d) henry/Wb

10) Relation between electric field intensity and permittivity is given by ____.
a) $D = \epsilon E$ b) $E = D\epsilon$
c) $D = E/\epsilon$ d) $E = \epsilon/d$

11) Magnetic vector potential for volume current is expressed as _____.
a) $B = \nabla \times A$ b) $A = \nabla \times B$
c) $B = \nabla . A$ d) $A = \nabla . B$

12) The Stoke's theorem can be used to find which of the following?
a) Area enclosed by a function in the given region
b) Volume enclosed by a function in the given region
c) Linear distance
d) Curl of the function

13) Lorentz force equation is _____.
a) $F = Q \times [E + V \times B]$ b) $F = Q\,[E + V \times B]$
c) $F = Q\,V + E \times B$ d) $F = Q\,[B + V \times E]$

14) Magnetic boundary condition is that the normal component of magnetic flux density is _____ across the boundary.
a) Unity b) Zero
c) Non-continuous d) Continuous

Q.2 Attempt Any Four. **16**

a) Show that $\nabla . D = \rho_V$.

b) If $\emptyset = 3x^2y - y^3\, z^2$ find the gradient of $\emptyset$ at a point $(1, -2, 1)$.

c) Derive Laplace and Poisson Equations from Gauss' law.

d) Parallel plate capacitor has conducting plates of area 0.04m^2. The plates are separated by a dielectric material whose relative permittivity is 2 with plate separation of 1 cm.
Find:
i) Its capacitance
ii) Charge on plates if $\text{V} = 10\text{V}$.

e) Find force on $100\ \mu\text{C}$ charge at $(0, 0, 3)$ m if four like charges of $20\ \mu\text{C}$ are located on x and y axis at ± 4 m.

Q.3 Solve Any Two. **12**

a) If $D = 4xy\ a_x + 2(x^2 + z^2)a_y + 4yz\ a_z\ \text{C/m}^2$. Evaluate surface integral to find total charge enclosed in the rectangular parallelepiped $0 < x < 2, 0 < y < 3, 0 < z < 5$ m.

b) State Gauss law with mathematical expression and it's any two applications in detail.

c) Three-point charges $Q_1 = 10^{-6}\text{C}, Q_2 = 10^{-6}\text{C}, Q_3 = 0.5 \times 10^{-6}\text{C}$, are located at corners of equilateral triangle of 50 cm side. Determine magnitude and direction of force on Q_3.

SECTION – II

Q.4 Attempt Any Four. **16**

a) A current filament of $3a_x$ lies along x axis. Find H component at $P(-1,3,2)$.

b) Derive an expression for inductance of toroid.

c) State and explain Biot-Savart law.

d) Derive the Maxwell's equation from Faraday's law for static field in integral and point form.

e) Derive an expression for energy density in magnetic field.

Q.5 Attempt Any Two. **12**

a) Derive expression for boundary conditions in magnetic field.

b) Evaluate both sides of Stroke's theorem for the field $H = (y^2z/x)a_x + (0.5y^2z^2/x^2)az$ and find current in a_y direction crossing the square surface in the plane $y = 2$, bounded by $x = z = 1$ and $x = z = 2$.

c) Derive the Maxwell's equation from Ampere's law for static and harmonically varying field's in integral and point form.

b) If $\emptyset = 3x^2y - y^3\ z^2$ find the gradient of $\emptyset$ at a point $(1, -2, 1)$.

c) Derive Laplace and Poisson Equations from Gauss' law.

d) Parallel plate capacitor has conducting plates of area 0.04m^2. The plates are separated by a dielectric material whose relative permittivity is 2 with plate separation of 1 cm.
Find:
i) Its capacitance
ii) Charge on plates if $\text{V} = 10\text{V}$.

e) Find force on $100\ \mu\text{C}$ charge at $(0, 0, 3)$ m if four like charges of $20\ \mu\text{C}$ are located on x and y axis at ± 4 m.

Q.3 Solve Any Two. **12**

a) If $D = 4xy\ a_x + 2(x^2 + z^2)a_y + 4yz\ a_z\ \text{C/m}^2$. Evaluate surface integral to find total charge enclosed in the rectangular parallelepiped $0 < x < 2, 0 < y < 3, 0 < z < 5$ m.

b) State Gauss law with mathematical expression and it's any two applications in detail.

c) Three-point charges $Q_1 = 10^{-6}\text{C}, Q_2 = 10^{-6}\text{C}, Q_3 = 0.5 \times 10^{-6}\text{C}$, are located at corners of equilateral triangle of 50 cm side. Determine magnitude and direction of force on Q_3.

SECTION – II

Q.4 Attempt Any Four. **16**

a) A current filament of $3a_x$ lies along x axis. Find H component at $P(-1,3,2)$.

b) Derive an expression for inductance of toroid.

c) State and explain Biot-Savart law.

d) Derive the Maxwell's equation from Faraday's law for static field in integral and point form.

e) Derive an expression for energy density in magnetic field.

Q.5 Attempt Any Two. **12**

a) Derive expression for boundary conditions in magnetic field.

b) Evaluate both sides of Stroke's theorem for the field $H = (y^2z/x)a_x + (0.5y^2z^2/x^2)az$ and find current in a_y direction crossing the square surface in the plane $y = 2$, bounded by $x = z = 1$ and $x = z = 2$.

c) Derive the Maxwell's equation from Ampere's law for static and harmonically varying field's in integral and point form.

Electromagnetic Engineering (BTN07504)

Day & Date: Saturday, 09-05-2026 Max. Marks: 70
Time: 10:00 AM To 01:00 PM

Instructions: 1) Q. No. 1 is compulsory. It should be solved in first 30 Minutes in Answer Book Each question carries one mark.
2) All questions are compulsory.
3) Figures to the right indicates full marks.

MCQ/Objective Type Questions

Duration: 30 Minutes Marks:14

Q.1 Give the correct option for the following questions. 14

1) The force between two charges is $120\ \mathrm{N}$. If the distance between the charge is doubled. Then force will be _____.
a) $60\ \mathrm{N}$ b) $30\ \mathrm{N}$
c) $40\ \mathrm{N}$ d) $240\ \mathrm{N}$

2) The relative permittivity of free space is given by _____.
a) 1 b) 10
c) 100 d) 1000

3) Work done in electric field is _____.
a) $\mathrm{W} = \mathrm{Q}/\mathrm{V}$ b) $\mathrm{W} = \mathrm{V}/\mathrm{Q}$
c) $\mathrm{W} = \mathrm{QV}$ d) None of the above

4) The units of capacitance are _____.
a) volts/coulomb b) coulombs/volt
c) ohms d) henry/Wb

5) Relation between electric field intensity and permittivity is given by ____.
a) $D = \epsilon E$ b) $E = D\epsilon$
c) $D = E/\epsilon$ d) $E = \epsilon/d$

6) Magnetic vector potential for volume current is expressed as _____.
a) $B = \nabla \times A$ b) $A = \nabla \times B$
c) $B = \nabla . A$ d) $A = \nabla . B$

7) The Stoke's theorem can be used to find which of the following?
a) Area enclosed by a function in the given region
b) Volume enclosed by a function in the given region
c) Linear distance
d) Curl of the function

8) Lorentz force equation is _____.

a) $F = Q \times [E + V \times B]$ b) $F = Q\ [E + V \times B]$

c) $F = Q\ V + E \times B$ d) $F = Q\ [B + V \times E]$

9) Magnetic boundary condition is that the normal component of magnetic flux density is _____ across the boundary.

a) Unity b) Zero

c) Non-continuous d) Continuous

10) If dot product of two vectors is zero then vectors are _____.

a) Perpendicular b) Parallel

c) Oblique d) None of these

11) In Dot product of unit vector in cylindrical and rectangular coordinate system for $a_y \ .a_\varphi$ is _____.

a) $-\cos\varphi$ b) $-\sin\varphi$

c) $\sin\varphi$ d) $\cos\varphi$

12) The unit of electric field intensity E is _____.

a) $\mathrm{N/C}$ b) $\mathrm{J/C}$

c) $\mathrm{N.M/C}$ d) $\mathrm{V/M}$

13) The electric field due to electric dipole is _____.

a) proportional to distance from dipole

b) proportional to square of distance from dipole

c) proportional to inverse square of distance from dipole

d) proportional to inverse cube of distance from dipole

14) Vectors $A = -3a_x + 2a_y + a_z$ and $B = 5a_x + 6a_y + 3a_z$ are _____.

a) Parallel b) Perpendicular

c) At an angle 35° d) None of these

MCQ/Objective Type Questions

Duration: 30 Minutes Marks:14

Q.1 Choose the correct answer. **14**

1) In BLDC motor field winding is kept on _____.
a) Stator b) Rotor
c) Can be placed anywhere d) Absent

2) In BLDC motor driver module, we do not require _____.
a) SCRs b) Power transistors
c) FETs d) Transistors

3) Typical brushless motor doesn't have _____.
a) Commutator b) Permanent magnet
c) Electronic controller d) Fixed armature

4) The speed of a BLDC motor can be controlled by _____.
a) Changing input DC voltage b) Changing temperature
c) Changing wind direction d) Cannot be controlled

5) The low-torque synchronous cannot be used for _____.
a) torque transmission b) error detection
c) instrument servos d) robot arm positioning

6) For torque transmission over a long distance with the help of electrical wires only, which of the following two synchronous are used?
a) CX and CT b) CX and CR
c) CX and CD d) CT and CD

7) Which of the following synchronous are used for error detection in a servo control system?
a) control transmitter b) control transformer
c) control receiver d) Both (a) and (b)

8) What is the angle between stator direct axis and quadrature axis?
a) 90° b) 0°
c) 45° d) 60°

9) Space angle, θr is measured between stator d-axis and _____.
a) quadrature axis b) direct d-axis
c) long rotor axis d) None of the mentioned

10) A reluctance motor _____.
a) is self-starting b) is constant speed motor
c) needs no d.c. excitation d) All of the above

11) For which of the applications a reluctance motor is preferred _____.
a) electric shavers b) refrigerators
c) signaling and timing devices d) lifts and hoists

12) A variable reluctance stepper motor is constructed of _____ material with salient poles.
a) Paramagnetic b) Ferromagnetic
c) Diamagnetic d) Non-magnetic

13) If a hybrid stepper motor has a rotor pitch of 36° and a step angle of 9°, the number of its phases must be _____.
a) 4 b) 2
c) 3 d) 6

14) A stepping motor is a _____ device.
a) Mechanical b) Electrical
c) Analogue d) Incremental

2) Figures to the right indicate full marks.
3) Assume suitable data if necessary.
4) Draw neat diagrams whenever necessary.

SECTION – I

Q.2 Attempt Any Four the following. **16**

a) With the help of neat diagram explain the construction and working of a synchronous reluctance motor.

b) Draw and explain the torque-speed characteristics of synchronous reluctance motor.

c) What are the merits and demerits of stepper motor?

d) Explain the Static and Dynamic characteristics of stepper motor.

e) With the help of neat diagram explain the construction and working of a switched reluctance motor.

Q.3 Attempt Any Two the following. **12**

a) Explain the power semiconductor switching circuits of switched reluctance motor and state the advantages and disadvantages switched reluctance motor.

b) Explain the construction and working of multi-stack variable reluctance stepper motor.

c) With the help of neat labeled diagram, explain the construction and working of variable reluctance stepper motor. Also state the applications of this motor.

SECTION – II

Q.4 Attempt Any Four the following. **16**

a) Explain the Power and control circuit of permanent magnet BLDC motor.

b) Explain with neat diagram Microprocessor based control for permanent magnet synchronous motor.

c) Derive torque equation of permanent magnet BLDC motor.

d) Explain the construction of permanent magnet BLDC motor.

e) State advantages, disadvantages and applications of permanent magnet BLDC motor.

Q.5 Attempt Any Two the following. **12**

a) Draw and explain torque-speed characteristics permanent magnet synchronous motor, also explain phasor diagram.

b) Explain self-control and vector control of permanent magnet synchronous motor.

c) Explain classification of permanent magnet BLDC motor.

MCQ/Objective Type Questions

Duration: 30 Minutes Marks:14

Q.1 Conventional MCQ: **14**

1) _____ refers to the long term maintenance of systems.
a) Sustainability b) Globalization
c) Ethical Theories d) Morality

2) The moral principles, standards of behaviour, or set of values that guide a person's actions in the workplace is called _____.
a) Office place ethics b) factory place ethics
c) behavioural ethics d) work place ethics

3) Most companies begin the process of establishing organizational ethics programs by developing _____.
a) ethics training programs
b) code of conduct
c) ethics enforcement mechanisms
d) hidden agendas

4) _____ is concerned with the study of morality and the application of reason to elucidate specific rules and principles that determine morally acceptable courses of action.
a) Morality b) Ethical theories
c) Ethics d) All of the above

5) Sustainability can be regarded as comprising components _____.
a) environmental b) economic
c) social d) all of the above

6) In _____ ethical theories, different societies have different moral standards.
a) Descriptive b) Normative
c) Contemporary d) None of these

7) When we are referring to an individual's moral strength, which is determined by observing their pattern of actions over time is called _____.

a) Organizational factors b) Individual factors
c) Ethical issue intensity d) Opportunity

8) The degree to which corporate decisions, policies, activities, and impacts are acknowledged and made visible to relevant stakeholders is called as _____.

a) corporate transparency b) corporate accountability
c) corporate ethics d) none

9) Relevant information is made available in a timely and accessible manner, means _____.

a) accuracy b) faith
c) disclosure d) clarity

10) _____ means a worker's ability to control information about them and how it is used and shared.

a) Discrimination b) Health Testing
c) Fair wages d) Employee Privacy

11) Giving employees a larger scope for deciding how to organize their work is _____.

a) Job enlargement b) Job enrichment
c) both a) & b) d) None of the above

12) Social value creation is aim of _____.

a) Corporation b) Social enterprise
c) Civil society organization d) None

13) Ozone depletion, acid rains etc are outcomes of _____.

a) water pollution b) land pollution
c) sound pollution d) air pollution

14) Interviews, observation, focus groups and _____ are ways to do data collection.

a) forms and questionnaires b) testing
c) research d) analysis

T. Y. (B.Tech.) (Electrical Engineering) (Semester - I) (New/Old) (CBCS) Examination: March/April – 2026
Business Ethics (BTN07514)

Day & Date: Tuesday, 12-05-2026 Max. Marks: 56
Time: 10:00 AM To 01:00 PM

Instructions: 1) All Questions are compulsory.
2) Figures to the right indicates full marks.

SECTION – I

Q.2 Solve Any Four. **16**

a) What is business ethics? Why it is important.

b) Define morality, ethics and ethical theory.

c) What is Social Accounting? Explain Social Accounting process with diagram.

d) Which are the Components of Business Ethics Management?

e) Explain in detail concept of Corporate citizenship.

f) Write a note on corporate accountability and transparency.

Q.3 Solve Any Two. **12**

a) What is globalization. Explain three issues of globalization.

b) Explain Context related factors in detail.

c) What is the nature of corporate social responsibilities?

SECTION – II

Q.4 Solve Any Four. **16**

a) Define the Rights of employees as stakeholders of the firm.

b) Differentiate between sectional CSO and promotional CSO.

c) What are the limitations of Business - CSO collaboration?

d) What are different types of environmental pollution?

e) Explain moral significance of Information Technology to business.

f) What are ethical issues in the relation between business and government?

Q.5 Solve Any Two. **12**

a) Discuss the ethical challenges of globalization and consumers at the global marketplace.

b) What are different purposes for boycotts in CSO tactics?

c) Write note on IT code of conduct.

3) Figures to the right indicates full marks.

MCQ/Objective Type Questions

Duration: 30 Minutes Marks:14

Q.1 Choose the correct answer. **14**

1) Which of the following is the best definition of managerial economics? Managerial economics is _____.
a) a distinct field of economic theory
b) a field that applies economic theory and the tools of decision science
c) a field that combines economic theory and mathematics
d) none of the above

2) Which of the following is defined as the study of the aggregate economy studied as a whole?
a) Mathematical economics b) Econometrics
c) Macroeconomics d) Microeconomics

3) Managerial economics generally refers to the integration of economic theory with business _____.
a) Ethics b) Management
c) Practice d) All of the above

4) Which of the following would NOT be a determinant of demand?
a) the price of related goods
b) income
c) tastes
d) the prices of the inputs used to produce the good

5) Other things equal, when the price of a good rises, the quantity supplied of the good also rises. This is the _____.
a) law of increasing costs b) law of diminishing returns
c) law of supply d) law of demand

6) When the price is higher than the equilibrium price, _____.
   a) a shortage will exist
   b) buyers desire to purchase more than is produced
   c) sellers desire to produce and sell more than buyers wish to purchase
   d) quantity demanded equals quantity supplied

7) If the price elasticity of demand for a good is 0.75 i.e. (less than one), the demand for the good can be described as _____.
   a) normal
   b) elastic
   c) inferior
   d) inelastic

8) A positive cross elasticity of demand coefficient indicates that _____.
   a) a product is an inferior good
   b) a product is a normal good
   c) two products are substitute goods
   d) two products are complementary goods

9) Time series patterns that repeat themselves after a period of days or weeks are called _____.
   a) random variation
   b) trend
   c) cycles
   d) seasonality

10) In time series, which of the following cannot be predicted?
   a) large increases in demand
   b) technological trends
   c) seasonal fluctuations
   d) random fluctuations

11) Short run is a period of time over which at least one factor must _____.
   a) Remain flexible
   b) Remain fixed
   c) Variable
   d) None of the above

12) If the short-run average variable costs of production for a firm are rising, then this indicates that _____.
   a) average total costs are at a maximum
   b) average fixed costs are constant
   c) marginal costs are above average variable costs
   d) average variable costs are below average fixed costs

13) Perfectly competitive firms are price takers because _____.
   a) each firm is very large
   b) there are no good substitutes for their goods
   c) many other firms produce identical products
   d) their demand curves are downward sloping

14) The demand curve faced by a monopolistically competitive firm is _____.
   a) Perfectly elastic
   b) Elastic
   c) Unit elastic
   d) Inelastic

2) If the short-run average variable costs of production for a firm are rising, then this indicates that _____.
a) average total costs are at a maximum
b) average fixed costs are constant
c) marginal costs are above average variable costs
d) average variable costs are below average fixed costs

3) Perfectly competitive firms are price takers because _____.
a) each firm is very large
b) there are no good substitutes for their goods
c) many other firms produce identical products
d) their demand curves are downward sloping

4) The demand curve faced by a monopolistically competitive firm is _____.
a) Perfectly elastic b) Elastic
c) Unit elastic d) Inelastic

5) Which of the following is the best definition of managerial economics? Managerial economics is _____.
a) a distinct field of economic theory
b) a field that applies economic theory and the tools of decision science
c) a field that combines economic theory and mathematics
d) none of the above

6) Which of the following is defined as the study of the aggregate economy studied as a whole?
a) Mathematical economics
b) Econometrics
c) Macroeconomics
d) Microeconomics

7) Managerial economics generally refers to the integration of economic theory with business _____.
a) Ethics
b) Management
c) Practice
d) All of the above

8) Which of the following would NOT be a determinant of demand?
a) the price of related goods
b) income
c) tastes
d) the prices of the inputs used to produce the good

9) Other things equal, when the price of a good rises, the quantity supplied of the good also rises. This is the _____.
a) law of increasing costs
b) law of diminishing returns
c) law of supply
d) law of demand

10) When the price is higher than the equilibrium price, _____.
a) a shortage will exist
b) buyers desire to purchase more than is produced
c) sellers desire to produce and sell more than buyers wish to purchase
d) quantity demanded equals quantity supplied

11) If the price elasticity of demand for a good is 0.75 i.e. (less than one), the demand for the good can be described as _____.
a) normal
b) elastic
c) inferior
d) inelastic

12) A positive cross elasticity of demand coefficient indicates that _____.
a) a product is an inferior good
b) a product is a normal good
c) two products are substitute goods
d) two products are complementary goods

13) Time series patterns that repeat themselves after a period of days or weeks are called _____.
a) random variation
b) trend
c) cycles
d) seasonality

14) In time series, which of the following cannot be predicted?
a) large increases in demand
b) technological trends
c) seasonal fluctuations
d) random fluctuations

T. Y. (B.Tech.) (Electrical Engineering) (Semester - I) (New/Old) (CBCS) Examination: March/April – 2026
Managerial Economics (BTN07515)

Day & Date: Tuesday, 12-05-2026 Max. Marks: 56
Time: 10:00 AM To 01:00 PM

Instructions: 1) All Questions are compulsory.
2) Figures to the right indicates full marks.

SECTION – I

Q.2 Solve Any Four. **16**

a) Explain the concept economics and managerial economics.

b) State & explain the law of demand and law of supply.

c) Explain economics contribution to managerial decision.

d) Explain the concept Price ceilings and Price floors.

e) Explain the concept elasticity of demand in detail.

f) Explain the concept income elasticity of demand.

Q.3 Solve Any Two. **12**

a) Explain the following terms:
i) Microeconomics
ii) Macroeconomics

b) Explain demand utility and consumer demand analysis.

c) Explain the impact of price elasticity on total revenue and marginal revenue.

SECTION – II

Q.4 Solve Any Four. **16**

a) Describe Survey Methods for demand forecasting.

b) Explain linear Regression method for demand forecasting.

c) What is production? Explain the concept of production function.

d) Explain breakeven analysis. Also state the limitations of breakeven analysis.

e) What is market? Explain the various types of market.

f) Explain the concept supply side of market.

Q.5 Solve Any Two. **12**

a) Explain Linear Programming (LP). Also state the advantages and limitations of LP Techniques.

b) State and explain the characteristics of market structure.

c) Explain following costs of Production:

i) Incremental Costs and Sunk Costs

ii) Historical and Replacement Costs

iii) Private and Social Costs

Managerial Economics (BTN07515)

Day & Date: Tuesday, 12-05-2026 Max. Marks: 70
Time: 10:00 AM To 01:00 PM

Instructions: 1) Q. No. 1 is compulsory. It should be solved in the first 30 minutes in Answer Book Page no 03 (Starting page of the Answer Book). Each question carries one mark.
2) Don't forget to Mention question paper set (P/Q/R/S) on top of page.
3) Figures to the right indicates full marks.

MCQ/Objective Type Questions

Duration: 30 Minutes Marks:14

Q.1 Choose the correct answer. **14**

1) When the price is higher than the equilibrium price, _____.
a) a shortage will exist
b) buyers desire to purchase more than is produced
c) sellers desire to produce and sell more than buyers wish to purchase
d) quantity demanded equals quantity supplied

2) If the price elasticity of demand for a good is 0.75 i.e. (less than one), the demand for the good can be described as _____.
a) normal b) elastic
c) inferior d) inelastic

3) A positive cross elasticity of demand coefficient indicates that _____.
a) a product is an inferior good
b) a product is a normal good
c) two products are substitute goods
d) two products are complementary goods

4) Time series patterns that repeat themselves after a period of days or weeks are called _____.
a) random variation b) trend
c) cycles d) seasonality

5) In time series, which of the following cannot be predicted?
a) large increases in demand b) technological trends
c) seasonal fluctuations d) random fluctuations

6) Short run is a period of time over which at least one factor must _____.
a) Remain flexible
b) Remain fixed
c) Variable
d) None of the above

7) If the short-run average variable costs of production for a firm are rising, then this indicates that _____.
a) average total costs are at a maximum
b) average fixed costs are constant
c) marginal costs are above average variable costs
d) average variable costs are below average fixed costs

8) Perfectly competitive firms are price takers because _____.
a) each firm is very large
b) there are no good substitutes for their goods
c) many other firms produce identical products
d) their demand curves are downward sloping

9) The demand curve faced by a monopolistically competitive firm is _____.
a) Perfectly elastic
b) Elastic
c) Unit elastic
d) Inelastic

10) Which of the following is the best definition of managerial economics? Managerial economics is _____.
a) a distinct field of economic theory
b) a field that applies economic theory and the tools of decision science
c) a field that combines economic theory and mathematics
d) none of the above

MCQ/Objective Type Questions

Duration: 30 Minutes Marks:14

Q.1 Choose the correct alternatives from the options and rewrite the sentence. **14**

1) Smart grids primarily differ from conventional grids due to _____.
a) Higher transmission voltage
b) Bidirectional flow of power and information
c) Use of only renewable sources
d) More distribution transformers

2) Which of the following is a key technology in next-generation smart grids?
a) Manual metering
b) SCADA and communication networks
c) Mechanical relays
d) Oil-cooled circuit breakers

3) Decision-making tools in smart grids are mainly used for _____.
a) Manual switching only
b) Estimation, scheduling, and management
c) Increasing losses
d) Disconnecting consumers

4) Which is NOT a type of energy storage medium?
a) Pumped hydro b) Flywheel
c) Supercapacitor d) Diesel generator

5) Demand Side Management (DSM) focuses on _____.
a) Increasing peak demand
b) Reducing system efficiency
c) Shaping consumer load profiles
d) Increasing generation capacity only

6) Demand Response is mainly related to _____.
a) Increasing electricity price permanently
b) Automatic customer disconnection
c) Changing load behavior based on pricing signals
d) Installing more substations

7) Which technique is widely used for forecasting in SEMS?
a) Manual charting
b) Optimization algorithms
c) Mechanical analysis
d) Oil testing

8) Grid computing in smart grids is used for _____.
a) Soil testing
b) Security, reliability, and market analysis
c) Manual billing
d) Cable insulation

9) From passive to active distribution grids means _____.
a) Only increasing conductor size
b) Adding distributed generation and automation
c) Decreasing the number of loads
d) Replacing transformers with capacitors

10) ToU, RTP, and CPP are _____.
a) Transformer cooling system
b) Tariff structures for metering
c) Protection schemes
d) Voltage regulation techniques

11) AMI stands for _____.
a) Automatic Meter Indicator
b) Advanced Metering Infrastructure
c) Automatic Machine Intelligence
d) Advanced Monitoring Interface

12) PHEV refers to _____.
a) Public High-Energy Vehicle
b) Plug-in Hybrid Electric Vehicle
c) Peak Hour Energy Voltage
d) Partial Home Energy Voltage

13) Smart city components do NOT include _____.
a) Smart parking
b) Smart payments
c) Smart vending
d) Manual metering

14) Smart home systems mainly help in _____.
a) Increasing energy wastage
b) Automating appliances and improving energy efficiency
c) Disconnecting loads permanently
d) Replacing distribution transformers

Instructions: 1) All Questions are compulsory.
2) Figures to the right indicates full marks.

SECTION – I

Q.2 Attempt Any Four of the following. **16**

a) Define a smart grid. List any four key components of a smart grid.

b) Explain the role of communication technologies in smart grid operation.

c) Write short notes on:
i) Scheduling in smart grids
ii) Grid estimation

d) Differentiate between Transmission and Distribution network modeling.

e) Write a short note on Demand Response (DR) and its importance.

f) Explain data mining techniques used in Smart Energy Management Systems.

Q.3 Attempt Any Two of the following. **12**

a) Describe the various types of storage mediums and compare distribution-level and grid-scale storage.

b) Explain Demand Side Management (DSM) in detail. Discuss tools, rules, and DSM practices.

c) Explain the operating principles and models of smart grid components with suitable diagrams.

d) Discuss the key technologies used in generation, networks, and loads in next-generation smart grids.

SECTION – II

Q.4 Attempt Any Four of the following. **16**

a) Explain the importance of metering for industrial customers.

b) Write a short note on Plug-in Hybrid Electric Vehicles (PHEV) in smart grids.

c) Describe the role of smart lighting systems used in smart homes.

d) What is the difference between passive and active distribution networks?

e) Describe substation automation.

f) Write short notes on Time-of-Use (ToU), Real-Time Pricing (RTP), and Critical Peak Pricing (CPP)

Q.5 Attempt Any Two of the following. **12**

a) Explain distribution grid characteristics including assets, topology, and transition from passive to active grids.

b) Describe Advanced Metering Infrastructure (AMI) and smart meters with a detailed block diagram.

c) Explain demand response and demand-side management applications at the DSO (Distribution System Operator) level.

d) Explain various components of smart cities and describe integrated approaches for smart city energy management.

d) Differentiate between Transmission and Distribution network modeling.

e) Write a short note on Demand Response (DR) and its importance.

f) Explain data mining techniques used in Smart Energy Management Systems.

Q.3 Attempt Any Two of the following. **12**

a) Describe the various types of storage mediums and compare distribution-level and grid-scale storage.

b) Explain Demand Side Management (DSM) in detail. Discuss tools, rules, and DSM practices.

c) Explain the operating principles and models of smart grid components with suitable diagrams.

d) Discuss the key technologies used in generation, networks, and loads in next-generation smart grids.

SECTION – II

Q.4 Attempt Any Four of the following. **16**

a) Explain the importance of metering for industrial customers.

b) Write a short note on Plug-in Hybrid Electric Vehicles (PHEV) in smart grids.

c) Describe the role of smart lighting systems used in smart homes.

d) What is the difference between passive and active distribution networks?

e) Describe substation automation.

f) Write short notes on Time-of-Use (ToU), Real-Time Pricing (RTP), and Critical Peak Pricing (CPP)

Q.5 Attempt Any Two of the following. **12**

a) Explain distribution grid characteristics including assets, topology, and transition from passive to active grids.

b) Describe Advanced Metering Infrastructure (AMI) and smart meters with a detailed block diagram.

c) Explain demand response and demand-side management applications at the DSO (Distribution System Operator) level.

d) Explain various components of smart cities and describe integrated approaches for smart city energy management.

T. Y. (B.Tech.) (Electrical Engineering) (Semester - I) (New/Old) (CBCS) Examination: March/April – 2026
Electric Motors and Controls for Electric Vehicle (BTN07517)

Day & Date: Thursday, 14-05-2026 Max. Marks: 70
Time: 10:00 AM To 01:00 PM

Instructions: 1) Q. No. 1 is compulsory. It should be solved in the first 30 minutes in Answer Book Page no 03 (Starting page of the Answer Book). Each question carries one mark.
2) Don't forget to Mention question paper set (P/Q/R/S) on top of page.
3) Figures to the right indicates full marks.
4) Assume suitable data if necessary and mention it clearly.

MCQ/Objective Type Questions

Duration: 30 Minutes Marks:14

Q.1 Choose correct answer. **14**

1) In a Switched Reluctance Motor (SRM), the stator is designed with _____ poles to facilitate efficient operation.
a) Salient b) Smooth
c) Permanent Magnet d) Non-Salient

2) Which component is responsible for detecting the rotor position in a BLDC motor?
a) Commutator b) Hall Effect Sensor
c) Rotor Windings d) Stator

3) What does the principle of phase control in DC motors involve?
a) Varying the armature resistance
b) Adjusting the field current
c) Controlling the phase angle of the AC supply
d) Modulating the PWM signal

4) For continuous conduction of single phase fully controlled rectifier the firing angle will be?
a) greater than 90-degree b) less than 90-degrees
c) equal to 120 degree d) at any angle

5) Stator voltage control for speed control of induction motors is suitable for _____.
a) Fan and pump drives b) Drive of a crane
c) Running it as generator d) Constant load drive

6) In the speed control of slip ring IM using slip power recovery scheme _____.
a) the efficiency increases but power factor decreases
b) the efficiency improves but power remains constant
c) Power factor improves but efficiency decreases
d) Both power factor and efficiency improve

7) CSI are suitable for supplying power to _____.
a) R-L Load
b) Inductive load
c) Capacitive load
d) None of the above

8) _____ method relies on keeping V/f ratio constant so as to maintain air gap flux at constant value.
a) Scalar Control
b) Vector Control
c) Torque Control
d) None of the above

9) _____ is a technique that allows you to instantaneously control the motor magnetic flux and its electromagnetic torque in a decoupled way.
a) Scalar Control
b) Vector Control
c) Direct Torque Control
d) None of the above

10) Space vector modulation is responsible for generating pulse width modulated signals to control the switches of an inverter _____.
a) generating pulse width modulated signals to control the switches of an inverter
b) generating pulse width modulated signals only
c) control the switches of an inverter only
d) None of the above

11) _____ analysis of an IM allows decoupled analysis where the flux and torque component can be independently controlled?
a) Scalar Control
b) Vector Control
c) V/F Control
d) None of the above

12) The Field Oriented Control (FOC) enables the induction machine being controlled alike the _____.
a) Separately excited DC Machine
b) Permanent magnet DC Machine
c) Switched reluctance machine
d) Stepper motor

13) Power split mode of hybrid electric vehicle control uses _____.
a) Series & Parallel control topology
b) Only Series control topology
c) Only Parallel control topology
d) None of the above

14) Which of the following control loops used by Direct torque control _____.

a) speed control loop
b) torque control loop
c) Both a & b
d) None of the above

T. Y. (B.Tech.) (Electrical Engineering) (Semester - I) (New/Old) (CBCS) Examination: March/April – 2026
Electric Motors and Controls for Electric Vehicle (BTN07517)

Day & Date: Thursday, 14-05-2026 Max. Marks: 56
Time: 10:00 AM To 01:00 PM

Instructions: 1) All Questions are compulsory.
2) Figures to the right indicates full marks.
3) Assume suitable data if necessary and mention it clearly.

SECTION – I

Q.2 Attempt (Any Four). **16**

a) Discuss the challenges in designing a Switched Reluctance Motor for automotive applications.

b) Discuss the Semi converter controller for DC motor drive.

c) Describe Mechanical coupling in Parallel HEDT and its impact on Drive Train performance.

d) Define V/f control and explain its significance in induction motor operation.

e) Analyze the requirement for slip and stator voltage compensation in induction motors.

f) Explain the concept of Peak Power Source (PPS) in Series HEDT and its significance.

Q.3 Attempt (Any Two). **12**

a) Explain the concept of a dual converter in DC motor drives with neat sketches.

b) What is BLDC Motor, how it is different from Conventional DC Motor? Explain significance of Back emf.

c) Compare and contrast the performance characteristics of Class C and Class D choppers when used to control a DC motor.

SECTION – II

Q.4 Attempt Any Four of the following. **16**

a) Explain in detail Indirect/Feed forward vector control of induction machine.

b) Explain principle of direct vector control of induction machine.

c) Explain Vehicle supervisory control in detail.

d) Describe the torque expression with stator and rotor fluxes in case of Direct Torque control of Induction machine.

e) Explain the hybrid mode of control of electric vehicle.

f) Describe space vector modulation control in case of induction machine.

Q.5 Attempt Any Two of the following. **12**

a) Explain different mode selection strategy of control of electric vehicle.

b) Explain in detail theory and dc drive analogy of field-oriented control of Induction Machine.

c) Explain with block diagram Direct Torque of induction motor.

MCQ/Objective Type Questions

Duration: 20 Minutes Marks:10

Q.1 Choose the correct alternatives from the given options. 10

1) The most fundamental economic problem is _____.
a) Security
b) European countries buy more goods from foreigners than supply to foreigners
c) health
d) Scarcity

2) Money supply increases when inflation rises in the economy _____.
a) No change b) Decrease
c) Increase d) None of the these

3) The mix of inflation and stagnation is called _____.
a) Demand-pull inflation b) Cost-push inflation
c) Devaluation d) Stagflation

4) Which of the following is defined as the study of individual units in an economy?
a) Microeconomics
b) Macroeconomics
c) Income and employment theory
d) None of the above

5) Which of the following statements gives a true picture of the central problem of an economy?
a) How to produce
b) How to distribute the produced goods
c) What to produce
d) All of the above

6) Which of the following activities is not included in the calculation of the national income of a country?
   a) A maid working for a family on a full-time basis
   b) A lawyer conducting their law practice
   c) A housewife performing housework chores
   d) A dispensary rendering medical services

7) Which of the following statements is accurate about the relation between indirect taxes and subsidies?
   a) If the factor cost is greater than the market price, then indirect taxes are less than subsidies
   b) If the factor cost is greater than the market price, then indirect taxes are greater than subsidies
   c) If the factor cost is greater than the market price, then indirect taxes are equal to subsidies
   d) None of the above

8) Which of the following statements are true about the study of macroeconomics?
   a) It is a study of economics that deals with households, government, firms and demand-supply
   b) It is a study of economics that deals with households, government, firms and the external sector
   c) It is a study of economics that deals with price levels, profit, expenditure and cost
   d) None of the above

9) Which of the following is the relation that the law of demand defines?
   a) Income and price of a commodity
   b) Price and quantity of a commodity
   c) Income and quantity demanded
   d) Quantity demanded and quantity supplied

10) Which of the following measures are adopted to take care of inflation in an economy?
   a) Decrease in transfer payments along with a reduction in taxation
   b) Increase in transfer payments along with an increase in taxation
   c) Decrease in government expenditure along with an increase in taxation
   d) Increase in government expenditure along with a decrease in taxation

c) If the factor cost is greater than the market price, then indirect taxes are equal to subsidies
d) None of the above

3) Which of the following statements are true about the study of macroeconomics?
a) It is a study of economics that deals with households, government, firms and demand-supply
b) It is a study of economics that deals with households, government, firms and the external sector
c) It is a study of economics that deals with price levels, profit, expenditure and cost
d) None of the above

4) Which of the following is the relation that the law of demand defines?
   a) Income and price of a commodity
   b) Price and quantity of a commodity
   c) Income and quantity demanded
   d) Quantity demanded and quantity supplied

5) Which of the following measures are adopted to take care of inflation in an economy?
   a) Decrease in transfer payments along with a reduction in taxation
   b) Increase in transfer payments along with an increase in taxation
   c) Decrease in government expenditure along with an increase in taxation
   d) Increase in government expenditure along with a decrease in taxation

6) The most fundamental economic problem is _____.
   a) Security
   b) European countries buy more goods from foreigners than supply to foreigners
   c) health
   d) Scarcity

7) Money supply increases when inflation rises in the economy _____.
   a) No change
   b) Decrease
   c) Increase
   d) None of the these

8) The mix of inflation and stagnation is called _____.
   a) Demand-pull inflation
   b) Cost-push inflation
   c) Devaluation
   d) Stagflation

9) Which of the following is defined as the study of individual units in an economy?
   a) Microeconomics
   b) Macroeconomics
   c) Income and employment theory
   d) None of the above

10) Which of the following statements gives a true picture of the central problem of an economy?
   a) How to produce
   b) How to distribute the produced goods
   c) What to produce
   d) All of the above

Introduction to Sociology (BTN07508)

Day & Date: Sunday, 10-05-2026 Max. Marks: 50
Time: 10:00 AM To 12:00 PM

Instructions: 1) Q. No. 1 is compulsory. It should be solved in the first 20 minutes in Answer Book Page no 03 (Starting page of the Answer Book). Each question carries one mark.
2) Don't forget to Mention question paper set (P/Q/R/S) on top of page.
3) Figures to the right indicates full marks.

MCQ/Objective Type Questions

Duration: 20 Minutes Marks:10

Q.1 Choose the correct Answer. **10**

1) Name of state having highest percentage of literacy level.
a) West Bengal b) Panjab
c) Kerala d) Maharashtra

2) Functions of Social Institutes is _____.
a) To meet fundamental needs of society
b) To improve the Society
c) To meet the needs of Family
d) None of above

3) Social change is change in _____.
a) Society b) Community
c) Individual d) Education

4) Which is recognised as one of the first environmental movements in country?
a) Chipko Movement b) Kisan Movement
c) Loksatta Movement d) Narmada Bachao Andolan

5) Science that deals with the relationship between living organism with their physical environment and each other is called _____.
a) Ecosystem b) Biodiversity
c) Environment d) Ecology

6) The major component of demography are _____.
a) Mortality b) Fertility
c) Migration d) All of these

7) The word sociology is made up of two words. These are _____.
a) Societies and logy
b) Societia and logistia
c) Socious and logos
d) Socia and logos

8) Who is the father of Sociology?
a) Karl Max
b) Herbert Spencer
c) Auguste Comte
d) Charles Darwin

9) In which year the term sociology was coined?
a) 1798
b) 1815
c) 1839
d) 1857

10) India occupies _____ rank among the population of the different countries of world.
a) Third
b) First
c) Forth
d) Second

MCQ/Objective Type Questions

Duration: 20 Minutes Marks:10

Q.1 Multiple Choice Questions. **10**

1) The adrenal glands responsible to produce harmones in response to stress are located _____.
a) in the brain
b) at the top of the kidneys
c) in the stomach
d) to the left of the heart

2) The fight or flight response is instigated by the _____.
a) hypothalamus
b) hippocampus
c) cerebellum
d) pons

3) Which of the following statements is true?
a) The stress response is nonspecific
b) Different kinds of stressors produce exactly the same response
c) Different people respond to the same stressor differently
d) All of the above

4) When is a person more likely to have difficulty in coping with a stressful situation?
a) When he is over the age of fifty
b) When he expects a positive outcome
c) When he thinks he does not have control over the situation
d) When he has a good social support network

5) Anxiety, Depression, Exhaustion, Irritability are _____.
a) Physical symptoms of stress
b) Emotional symptoms of stress
c) Behavioural symptoms of stress
d) Cognitive symptoms of stress

6) Which of the following causes positive stress?
a) Illness
b) Loss of Family Member
c) Getting promotion at workplace
d) All of the above

7) Which of the following are the physical symptoms of anxiety?
a) Racing heart
b) Sweaty palms
c) Flushed cheeks
d) All of the above

8) _____ skills are very important in managing the effects of stress.
a) Interpersonal
b) Time Management
c) Communication
d) Problem solving

9) Taking care of and supporting yourself during stressful times include all of the following except _____.
a) Talking with someone about the stress
b) Providing some downtime for yourself
c) Suppressing true feelings
d) Creating an emotional outlet

10) Which one is not considered as Environmental stressors?
a) Weather
b) Traffic
c) Financial problems
d) Substandard housing

MCQ/Objective Type Questions

Duration: 30 Minutes Marks:14

Q.1 Choose the correct alternatives from the options. 14

1) A train is required to maintain a high schedule speed between two stations with frequent stops. Which of the following traction characteristics is most desirable?
a) Low acceleration and high retardation
b) High acceleration and high retardation
c) Low acceleration and low retardation
d) Constant speed only

2) In a trapezoidal speed-time curve, the area under the curve represents _____.
a) Distance traveled b) Acceleration
c) Energy consumed d) Power output

3) The term specific energy consumption in traction is defined as ____.
a) Energy per unit time b) Energy per unit mass
c) Energy per tonne-km d) Energy per distance

4) The main drawback of DC series motor in traction is _____.
a) Low starting torque
b) Poor speed control at no load
c) High efficiency
d) Simple construction

5) In bridge transition**,** the purpose is to _____.
a) Increase voltage
b) Smooth transition between series and parallel connections
c) Reduce braking
d) Increase load

6) Energy Conservation means _____.
   a) Producing more energy
   b) Reducing wastage of energy
   c) Storing electricity only
   d) Using energy without control

7) For textile industries**,** motors are generally selected based on _____.
   a) Variable speed requirement and smooth operation
   b) High starting torque only
   c) No speed control
   d) High noise

8) Machine tools require motors with _____.
   a) Fixed speed only
   b) Wide speed control and precision
   c) Low efficiency
   d) High vibration

9) Induction heating works on the principle of _____.
   a) Resistance heating
   b) Radiation
   c) Chemical reaction
   d) Eddy current generation

10) Which heating method is best suited for uniform heating of non-conducting materials?
   a) Resistance heating
   b) Induction heating
   c) Dielectric heating
   d) Arc heating

11) In electric welding, the major advantage is _____.
   a) Low efficiency
   b) High precision and strength of joints
   c) Slow process
   d) High fuel consumption

12) The maintenance factor in illumination accounts for _____.
   a) Voltage variation
   b) Lamp aging and dirt accumulation
   c) Power loss
   d) Current fluctuation

13) Mercury vapor lamps are preferred because _____.
   a) Low life
   b) Low illumination
   c) High cost only
   d) High efficiency and long life

14) The primary objective of energy conservation in industries is to ____.
   a) Increase energy use
   b) Reduce production
   c) Increase manpower
   d) Minimize energy losses and cost

Electric Traction & Utilization (EEPCC-10)

Day & Date: Friday, 15-05-2026 Max. Marks: 56
Time: 10:00 AM To 01:00 PM

Instructions: 1) All questions are compulsory.
2) Figures to the right indicate full marks.

SECTION – I

Q.2 Solve Any Four. **16**

a) Draw and explain speed time curve for main line services.
b) Desirable characteristic of traction motors.
c) Explain regenerative breaking system in traction system.
d) Write short note on motor selection in textile industries.
e) Explain Al application in Traction.

Q.3 Solve Any Two. **12**

a) Derive an expression for Trapezoidal Speed-Time Curve.
b) Explain series-parallel control of traction motors.
c) Write note on motor selection in sugar mills.

SECTION – II

Q.4 Solve Any Four. **16**

a) Comparison between tungsten filament lamps and fluorescent tubes.
b) State advantages and disadvantages electrical welding.
c) Explain Al application in utilization.
d) Explain factors to be considered for the design of illumination scheme.
e) Write a note on need of Energy Conservation.

Q.5 Solve Any Two. **12**

a) Describe with the help of a neat diagram the construction and working of a high-pressure mercury vapour lamp.
b) Explain Energy Conservation in Industries.
c) Explain direct resistance and indirect resistance heating.

Seat No.	

Set **Q**

T.Y. (B.Tech.) (Electrical Engineering) (Sem - II) (New) (CBCS)
Examination: March/April – 2026
Electric Traction & Utilization (EEPCC-10)

Day & Date: Friday, 15-05-2026 Max. Marks: 70
Time: 10:00 AM To 01:00 PM

Instructions: 1) Q. No. 1 is compulsory. It should be solved in the first 30 minutes in Answer Book Page no 03 (Starting page of the Answer Book). Each question carries one mark.
2) Don't forget to Mention question paper set (P/Q/R/S) on top of page.
3) Figures to the right indicates full marks.
4) Assume suitable data if necessary.

MCQ/Objective Type Questions

Duration: 30 Minutes Marks:14

Q.1 Choose the correct alternatives from the options. **14**

1) Machine tools require motors with _____.
a) Fixed speed only
b) Wide speed control and precision
c) Low efficiency
d) High vibration

2) Induction heating works on the principle of _____.
a) Resistance heating b) Radiation
c) Chemical reaction d) Eddy current generation

3) Which heating method is best suited for uniform heating of non-conducting materials?
a) Resistance heating b) Induction heating
c) Dielectric heating d) Arc heating

4) In electric welding, the major advantage is _____.
a) Low efficiency
b) High precision and strength of joints
c) Slow process
d) High fuel consumption

5) The maintenance factor in illumination accounts for _____.
a) Voltage variation
b) Lamp aging and dirt accumulation
c) Power loss
d) Current fluctuation

6) Mercury vapor lamps are preferred because _____.
   a) Low life
   b) Low illumination
   c) High cost only
   d) High efficiency and long life

7) The primary objective of energy conservation in industries is to ____.
   a) Increase energy use
   b) Reduce production
   c) Increase manpower
   d) Minimize energy losses and cost

8) A train is required to maintain a high schedule speed between two stations with frequent stops. Which of the following traction characteristics is most desirable?
   a) Low acceleration and high retardation
   b) High acceleration and high retardation
   c) Low acceleration and low retardation
   d) Constant speed only

9) In a trapezoidal speed-time curve, the area under the curve represents _____.
   a) Distance traveled
   b) Acceleration
   c) Energy consumed
   d) Power output

10) The term specific energy consumption in traction is defined as ____.
   a) Energy per unit time
   b) Energy per unit mass
   c) Energy per tonne-km
   d) Energy per distance

11) The main drawback of DC series motor in traction is _____.
   a) Low starting torque
   b) Poor speed control at no load
   c) High efficiency
   d) Simple construction

12) In bridge transition**,** the purpose is to _____.
   a) Increase voltage
   b) Smooth transition between series and parallel connections
   c) Reduce braking
   d) Increase load

13) Energy Conservation means _____.
   a) Producing more energy
   b) Reducing wastage of energy
   c) Storing electricity only
   d) Using energy without control

14) For textile industries**,** motors are generally selected based on _____.
   a) Variable speed requirement and smooth operation
   b) High starting torque only
   c) No speed control
   d) High noise

MCQ/Objective Type Questions

Duration: 30 Minutes Marks:14

Q.1 Choose the correct alternative from the options. 14

1) SCR is mainly used for _____.
a) Signal amplification b) High-frequency oscillation
c) Power control d) Data storage

2) A TRIAC can be turned on with _____.
a) Positive voltage at the gate terminal
b) Negative voltage at the gate terminal
c) Either a) or b)
d) None of the above

3) Thyristor can be protected from over voltages by using _____.
a) Voltage clamping device b) Fuse
c) Heat sink d) Snubber circuit

4) Which circuit gives inherent freewheeling action?
a) Half wave converter b) Semi converter
c) Full converter d) None of the above

5) Phase control in rectifiers is achieved by varying _____.
a) Supply voltage b) Load resistance
c) Firing angle of SCR d) Frequency

6) The output of a single-phase half-bridge inverter on R load is ideally _____.
a) A sine wave b) A square wave
c) A triangular wave d) Constant dc

7) Which inverter is commonly used in UPS systems?
a) Current source inverter b) Voltage source inverter
c) Resonant inverter d) Cycloconverter

8) During regenerative braking mode, back emf is _____supply voltage.
a) Less than b) Greater than
c) Equal to d) None of the above

9) When motor torque is greater than load torque, the motor will _____.
a) Stop b) Run at constant speed
c) Decelerate d) Accelerate

10) Speed control of a DC motor in a DC drive is achieved by controlling _____.
a) Armature voltage b) Field current
c) Armature resistance d) All of the above

11) Which converter is required for four-quadrant DC drive operation?
a) Half-wave rectifier b) Single-quadrant chopper
c) Dual converter d) Diode bridge

12) Which braking method dissipates energy as heat?
a) Regenerative braking b) Dynamic braking
c) Plugging d) Regenerative and plugging

13) For variable speed application the suitable motor is _____.
a) Squirrel cage I.M. b) Slip ring I.M.
c) Both a) and b) d) None of the above

14) Speed control of an induction motor in AC drives is mainly achieved by controlling _____.
a) Voltage only b) Frequency only
c) Voltage and frequency d) Rotor resistance

Instructions: 1) All Questions are compulsory.
2) Figures to the right indicate full marks.

Section – I

Q.2 Solve. (Any Four) **16**

a) Explain turn-on methods of SCR.

b) Draw and explain characteristics of DIAC and TRIAC.

c) Draw and explain single phase full wave-controlled rectifier with 'RL' load with proper waveform.

d) Draw and explain two-quadrant chopper with modes of operation.

e) Draw and explain single phase full bridge inverter with 'RL' load with proper wave.

f) Explain the on-off type AC voltage controller.

Q.3 Solve. (Any Two) **12**

a) Draw and explain static V-I characteristics of SCR. Define latching and holding current.

b) Draw and explain three phase fully controlled rectifier with R load with proper waveform.

c) Draw and explain the 120 degree conduction mode of three phase inverter with proper wave.

Section – II

Q.4 Solve. (Any Four) **16**

a) Draw the block diagram of the electric drive system and describe each block in detail.

b) Describe the different types of electrical drives.

c) Draw and explain closed loop speed control of dc motor drives.

d) Explain stator voltage control of three phase induction motor.

e) Explain PWM inverter fed induction motor drive with waveforms.

f) Differentiate between AC Drives and DC Drives.

Q.5 Solve. (Any Two) **12**

a) Explain the dynamics of electrical drives with the fundamental torque equation.

b) Describe in detail the different types of electrical braking system used in DC drives.

c) Describe in detail V/f control methods used in three phase induction motor drives.

c) Draw and explain single phase full wave-controlled rectifier with 'RL' load with proper waveform.

d) Draw and explain two-quadrant chopper with modes of operation.

e) Draw and explain single phase full bridge inverter with 'RL' load with proper wave.

f) Explain the on-off type AC voltage controller.

Q.3 Solve. (Any Two) **12**

a) Draw and explain static V-I characteristics of SCR. Define latching and holding current.

b) Draw and explain three phase fully controlled rectifier with R load with proper waveform.

c) Draw and explain the 120 degree conduction mode of three phase inverter with proper wave.

Section – II

Q.4 Solve. (Any Four) **16**

a) Draw the block diagram of the electric drive system and describe each block in detail.

b) Describe the different types of electrical drives.

c) Draw and explain closed loop speed control of dc motor drives.

d) Explain stator voltage control of three phase induction motor.

e) Explain PWM inverter fed induction motor drive with waveforms.

f) Differentiate between AC Drives and DC Drives.

Q.5 Solve. (Any Two) **12**

a) Explain the dynamics of electrical drives with the fundamental torque equation.

b) Describe in detail the different types of electrical braking system used in DC drives.

c) Describe in detail V/f control methods used in three phase induction motor drives.

Examination: Marh/April – 2026
Power Electronics & Industrial Drives (EEPCC-11)

Day & Date: Monday, 18-05-2026 Max. Marks: 70
Time: 10:00 AM To 01:00 PM

Instructions: 1) Q. No. 1 is compulsory. It should be solved in the first 30 minutes in Answer Book Page no 03 (Starting page of the Answer Book). Each question carries one mark.
2) Don't forget to Mention question paper set (P/Q/R/S) on top of page.
3) Figures to the right indicates full marks.
4) Assume suitable data whenever necessary.

MCQ/Objective Type Questions

Duration: 30 Minutes Marks:14

Q.1 Choose the correct alternative from the options. 14

1) The output of a single-phase half-bridge inverter on R load is ideally _____.
a) A sine wave b) A square wave
c) A triangular wave d) Constant dc

2) Which inverter is commonly used in UPS systems?
a) Current source inverter b) Voltage source inverter
c) Resonant inverter d) Cycloconverter

3) During regenerative braking mode, back emf is _____supply voltage.
a) Less than b) Greater than
c) Equal to d) None of the above

4) When motor torque is greater than load torque, the motor will _____.
a) Stop b) Run at constant speed
c) Decelerate d) Accelerate

5) Speed control of a DC motor in a DC drive is achieved by controlling _____.
a) Armature voltage b) Field current
c) Armature resistance d) All of the above

6) Which converter is required for four-quadrant DC drive operation?
a) Half-wave rectifier b) Single-quadrant chopper
c) Dual converter d) Diode bridge

7) Which braking method dissipates energy as heat?
a) Regenerative braking b) Dynamic braking
c) Plugging d) Regenerative and plugging

8) For variable speed application the suitable motor is _____.
a) Squirrel cage I.M. b) Slip ring I.M.
c) Both a) and b) d) None of the above

9) Speed control of an induction motor in AC drives is mainly achieved by controlling _____.
a) Voltage only b) Frequency only
c) Voltage and frequency d) Rotor resistance

10) SCR is mainly used for _____.
a) Signal amplification b) High-frequency oscillation
c) Power control d) Data storage

11) A TRIAC can be turned on with _____.
a) Positive voltage at the gate terminal
b) Negative voltage at the gate terminal
c) Either a) or b)
d) None of the above

12) Thyristor can be protected from over voltages by using _____.
a) Voltage clamping device b) Fuse
c) Heat sink d) Snubber circuit

13) Which circuit gives inherent freewheeling action?
a) Half wave converter b) Semi converter
c) Full converter d) None of the above

14) Phase control in rectifiers is achieved by varying _____.
a) Supply voltage b) Load resistance
c) Firing angle of SCR d) Frequency

3) Figures to the right indicates full marks.

MCQ/Objective Type Questions

Duration: 30 Minutes Marks:14

Q.1 Choose the correct Answer. **14**

1) Assertion (A): The zeroes on the real axis near the origin are generally avoided in design.
Reason (R): In a sluggish system, the introduction of zeroes can improve the transient response.
a) Both A and R are true, and R is the correct explanation of A
b) Both A and R are true, but R is not the correct explanation of A
c) A is true, but R is false
d) A is false, but R is true

2) Maximum phase lead occurs at frequency _____.
a) $\omega = \frac{1}{T}$ b) $\omega = \frac{1}{\alpha T}$
c) $\omega = \frac{1}{\sqrt{\alpha} T}$ d) $\omega = \alpha T$

3) The phase lag-lead network is introduced in the output _____.
a) lag at all frequencies
b) lag at high frequencies and lead at low frequencies
c) lag at low frequencies and lead at high frequencies
d) None of the above

4) Due to which of the following reasons, excessive bandwidth in the control system should be avoided _____.
a) It leads to a slow speed of response
b) It leads to low relative stability
c) Noise is proportional to bandwidth
d) None of the above

5) For a lead compensator with $\alpha = 0.1$, the maximum phase lead is approximately _____.
a) 20° b) 30°
c) 45° d) 65°

6) In phase-plane analysis, trajectories represent _____.
a) Time response
b) State variables
c) Frequency response
d) Gain

7) A saddle point is _____.
a) Stable
b) Unstable
c) Marginal
d) May be stable or unstable

8) An observer is used to _____.
a) Control input
b) Estimate unmeasured states
c) Increase gain
d) Reduce noise

9) The transfer function $Y(s)/U(s)$ of a system described by the state equations $dx/dt = -2x + 2u$ and $y(t) = 0.5x$ is _____.
a) $0.5/(s-2)$
b) $1/(s-2)$
c) $0.5/(s+2)$
d) $1/(s+2)$

10) The transfer function of a zero-order hold is _____.
a) $1 - e^{Ts}$
b) $1 - e^{-Ts}$
c) $\frac{1-e^{Ts}}{s}$
d) $\frac{1-e^{-Ts}}{s}$

11) For pole at $z = 1.2 \rightarrow$ system is _____.
a) Stable
b) Unstable
c) Marginal
d) Oscillatory

12) Juri's test is a discrete equivalent of _____.
a) Nyquist
b) Routh-Hurwitz
c) Bode
d) Root locus

13) If the rank of the controllability matrix $= 1$ for a 2nd order system, the system is _____.
a) Controllable
b) Not controllable
c) Observable
d) Stable

14) For a unity feedback system, the origin of the s-plane is mapped in the z-plane by the transformation $z = e^{sT}$ to which one of the following?
a) Origin
b) $1 + j0$
c) $-1 + j0$
d) $0 + j1$

Seat No.	

Set **P**

Time: 10:00 AM To 01:00 PM

Instructions: 1) All questions are compulsory.
2) Figures to the right indicate full marks.
3) Draw neat diagrams whenever necessary.
4) Assume suitable data if necessary.

Section – I

Q.2 Attempt the following. (Any Four) **16**

a) Derive the realization of a lag-lead compensator for an active circuit.

b) Write down the steps to design a lag compensator using root locus.

c) Write the design procedure for the lead compensator using the Bode plot method.

d) Explain the jump resonance phenomenon in nonlinear control systems

e) Determine the kind of singularity for the following differential equation.

$$\ddot{Y} - 0.3\,\dot{Y} + Y = 0$$

Q.3 Attempt the following. (Any Two) **12**

a) The forward path TF of a unity feedback control system is given by $G(s) = \frac{K}{s(s+2)(s+8)}$. Design a suitable lag compensator so that the system meets the following specifications.

i) Percentage overshoot $\leq 16\%$ for unit step input,

ii) Steady state error ≤ 0.125 for unit ramp input.

b) Design a lead compensator for a unity feedback system with OLTF $G(s) = \frac{K}{s(s+1)(s+5)}$ to satisfy the following specifications.

i) Kv $\geq$ 50

ii) Phase Margin $\geq$ 20°

c) Explain the stability of a non-linear control system.

Section – II

Q.4 Solve the following. (Any Four) **16**

a) The closed-loop poles (Eigen values) are to be located at $s = -3$, $s = -7$. Design a state variable feedback.
Given that $A = \begin{bmatrix} 0 & 1 \\ -20 & -9 \end{bmatrix}$ and $B = \begin{bmatrix} 0 \\ 1 \end{bmatrix}, C = [1 \quad 0]$

b) Consider a system having state model
$\begin{bmatrix} \dot{x}_1 \\ \dot{x}_2 \end{bmatrix} = \begin{bmatrix} -2 & -3 \\ 4 & 2 \end{bmatrix} \begin{bmatrix} x_1 \\ x_2 \end{bmatrix} + \begin{bmatrix} 3 \\ 5 \end{bmatrix} u(t)$ & $Y = [1 \quad 1] \begin{bmatrix} x_1 \\ x_2 \end{bmatrix}$
with $D = 0$. Obtain the Transfer Function.

c) Determine the controllability of the system with state model

$$\begin{bmatrix} \dot{x}_1 \\ \dot{x}_2 \\ \dot{x}_3 \end{bmatrix} = \begin{bmatrix} 0 & 1 & 0 \\ 0 & 0 & 1 \\ 0 & -2 & -3 \end{bmatrix} \begin{bmatrix} x_1 \\ x_2 \\ x_3 \end{bmatrix} + \begin{bmatrix} 0 \\ 0 \\ 10 \end{bmatrix} u$$

d) Describe Direct Substitution method for the evaluation of state feedback gain matrix.

e) Derive the pulse transfer function of closed loop system.

Q.5 Solve the following. (Any Two) **12**

a) A system is described by $\begin{bmatrix} \dot{x}_1 \\ \dot{x}_2 \\ \dot{x}_3 \end{bmatrix} = \begin{bmatrix} 0 & 1 & 0 \\ 0 & 0 & 1 \\ -1 & -5 & -6 \end{bmatrix} \begin{bmatrix} x_1 \\ x_2 \\ x_3 \end{bmatrix} + \begin{bmatrix} 0 \\ 0 \\ 1 \end{bmatrix} u(t)$
Using state feedback control $u = -Kx$, it is desired to have closed poles are at $(-1 + j2), (-1 - j2), (-10)$.

Find the state feedback matrix using Ackermann's formula.

b) Obtain state transition matrix for the following system matrix
$A = \begin{bmatrix} 0 & 1 \\ -6 & -5 \end{bmatrix}$

c) Examine the stability of following characteristic equation:
$P(z) = z^4 - 1.2z^3 + 0.07z^2 + 0.3z - 0.08 = 0$

Seat No.

MCQ/Objective Type Questions

Duration: 30 Minutes Marks:14

Q.1 Choose the correct Answer. **14**

1) An observer is used to _____.
a) Control input
b) Estimate unmeasured states
c) Increase gain
d) Reduce noise

2) The transfer function $Y(s)/U(s)$ of a system described by the state equations $dx/dt = -2x + 2u$ and $y(t) = 0.5x$ is _____.
a) $0.5/(s-2)$ b) $1/(s-2)$
c) $0.5/(s+2)$ d) $1/(s+2)$

3) The transfer function of a zero-order hold is _____.
a) $1 - e^{Ts}$ b) $1 - e^{-Ts}$
c) $\frac{1-e^{Ts}}{s}$ d) $\frac{1-e^{-Ts}}{s}$

4) For pole at $z = 1.2 \rightarrow$ system is _____.
a) Stable b) Unstable
c) Marginal d) Oscillatory

5) Juri's test is a discrete equivalent of _____.
a) Nyquist b) Routh-Hurwitz
c) Bode d) Root locus

6) If the rank of the controllability matrix $= 1$ for a 2nd order system, the system is _____.
a) Controllable b) Not controllable
c) Observable d) Stable

7) For a unity feedback system, the origin of the s-plane is mapped in the z-plane by the transformation $z = e^{sT}$ to which one of the following?

a) Origin
b) $1 + j0$
c) $-1 + j0$
d) $0 + j1$

8) Assertion (A): The zeroes on the real axis near the origin are generally avoided in design.
Reason (R): In a sluggish system, the introduction of zeroes can improve the transient response.

a) Both A and R are true, and R is the correct explanation of A
b) Both A and R are true, but R is not the correct explanation of A
c) A is true, but R is false
d) A is false, but R is true

9) Maximum phase lead occurs at frequency _____.

a) $\omega = \frac{1}{T}$
b) $\omega = \frac{1}{\alpha T}$
c) $\omega = \frac{1}{\sqrt{\alpha} T}$
d) $\omega = \alpha T$

10) The phase lag-lead network is introduced in the output _____.

a) lag at all frequencies
b) lag at high frequencies and lead at low frequencies
c) lag at low frequencies and lead at high frequencies
d) None of the above

11) Due to which of the following reasons, excessive bandwidth in the control system should be avoided _____.

a) It leads to a slow speed of response
b) It leads to low relative stability
c) Noise is proportional to bandwidth
d) None of the above

12) For a lead compensator with $\alpha = 0.1$, the maximum phase lead is approximately _____.

a) 20°
b) 30°
c) 45°
d) 65°

13) In phase-plane analysis, trajectories represent _____.

a) Time response

$$\begin{bmatrix} \dot{x}_1 \\ \dot{x}_2 \\ \dot{x}_3 \end{bmatrix} = \begin{bmatrix} 0 & 1 & 0 \\ 0 & 0 & 1 \\ 0 & -2 & -3 \end{bmatrix} \begin{bmatrix} x_1 \\ x_2 \\ x_3 \end{bmatrix} + \begin{bmatrix} 0 \\ 0 \\ 10 \end{bmatrix} u$$

d) Describe Direct Substitution method for the evaluation of state feedback gain matrix.

e) Derive the pulse transfer function of closed loop system.

Q.5 Solve the following. (Any Two) **12**

a) A system is described by $\begin{bmatrix} \dot{x}_1 \\ \dot{x}_2 \\ \dot{x}_3 \end{bmatrix} = \begin{bmatrix} 0 & 1 & 0 \\ 0 & 0 & 1 \\ -1 & -5 & -6 \end{bmatrix} \begin{bmatrix} x_1 \\ x_2 \\ x_3 \end{bmatrix} + \begin{bmatrix} 0 \\ 0 \\ 1 \end{bmatrix} u(t)$
Using state feedback control $u = -Kx$, it is desired to have closed poles are at $(-1 + j2), (-1 - j2), (-10)$.

Find the state feedback matrix using Ackermann's formula.

b) Obtain state transition matrix for the following system matrix
$A = \begin{bmatrix} 0 & 1 \\ -6 & -5 \end{bmatrix}$

c) Examine the stability of following characteristic equation:
$P(z) = z^4 - 1.2z^3 + 0.07z^2 + 0.3z - 0.08 = 0$

Set **S**

T.Y. (B.Tech.) (Electrical Engineering) (Semester - II) (New) (CBCS)
Examination: March/April – 2026
Advanced Control System (EEPCC-12)

Day & Date: Wednesday, 20-05-2026 Max. Marks: 70
Time: 10:00 AM To 01:00 PM

Instructions: 1) Q. No. 1 is compulsory. It should be solved in the first 30 minutes in Answer Book Page no 03 (Starting page of the Answer Book). Each question carries one mark.
2) Don't forget to Mention question paper set (P/Q/R/S) on top of page.
3) Figures to the right indicates full marks.

MCQ/Objective Type Questions

Duration: 30 Minutes Marks:14

Q.1 Choose the correct Answer. **14**

1) In phase-plane analysis, trajectories represent _____.
a) Time response b) State variables
c) Frequency response d) Gain

2) A saddle point is _____.
a) Stable b) Unstable
c) Marginal d) May be stable or unstable

3) An observer is used to _____.
a) Control input
b) Estimate unmeasured states
c) Increase gain
d) Reduce noise

4) The transfer function $Y(s)/U(s)$ of a system described by the state equations $dx/dt = -2x + 2u$ and $y(t) = 0.5x$ is _____.
a) $0.5/(s-2)$ b) $1/(s-2)$
c) $0.5/(s+2)$ d) $1/(s+2)$

5) The transfer function of a zero-order hold is _____.
a) $1 - e^{Ts}$ b) $1 - e^{-Ts}$
c) $\frac{1-e^{Ts}}{s}$ d) $\frac{1-e^{-Ts}}{s}$

6) For pole at $z = 1.2 \rightarrow$ system is _____.
a) Stable b) Unstable
c) Marginal d) Oscillatory

7) Juri's test is a discrete equivalent of _____.
a) Nyquist b) Routh-Hurwitz
c) Bode d) Root locus

8) If the rank of the controllability matrix $= 1$ for a 2nd order system, the system is _____.

a) Controllable
b) Not controllable
c) Observable
d) Stable

9) For a unity feedback system, the origin of the s-plane is mapped in the z-plane by the transformation $z = e^{sT}$ to which one of the following?

a) Origin
b) $1 + j0$
c) $-1 + j0$
d) $0 + j1$

10) Assertion (A): The zeroes on the real axis near the origin are generally avoided in design.
Reason (R): In a sluggish system, the introduction of zeroes can improve the transient response.

a) Both A and R are true, and R is the correct explanation of A
b) Both A and R are true, but R is not the correct explanation of A
c) A is true, but R is false
d) A is false, but R is true

11) Maximum phase lead occurs at frequency _____.

a) $\omega = \frac{1}{T}$
b) $\omega = \frac{1}{\alpha T}$
c) $\omega = \frac{1}{\sqrt{\alpha} T}$
d) $\omega = \alpha T$

12) The phase lag-lead network is introduced in the output _____.

a) lag at all frequencies
b) lag at high frequencies and lead at low frequencies
c) lag at low frequencies and lead at high frequencies
d) None of the above

13) Due to which of the following reasons, excessive bandwidth in the control system should be avoided _____.

a) It leads to a slow speed of response
b) It leads to low relative stability
c) Noise is proportional to bandwidth
d) None of the above

14) For a lead compensator with $\alpha = 0.1$, the maximum phase lead is approximately _____.

a) 20°
b) 30°
c) 45°
d) 65°

Set **S**

T.Y. (B.Tech.) (Electrical Engineering) (Semester - II) (New) (CBCS)
Examination: March/April – 2026
Advanced Control System (EEPCC-12)

Day & Date: Wednesday, 20-05-2026 Max. Marks: 56
Time: 10:00 AM To 01:00 PM

Instructions: 1) All questions are compulsory.
2) Figures to the right indicate full marks.
3) Draw neat diagrams whenever necessary.
4) Assume suitable data if necessary.

Section – I

Q.2 Attempt the following. (Any Four) **16**

a) Derive the realization of a lag-lead compensator for an active circuit.

b) Write down the steps to design a lag compensator using root locus.

c) Write the design procedure for the lead compensator using the Bode plot method.

d) Explain the jump resonance phenomenon in nonlinear control systems

e) Determine the kind of singularity for the following differential equation.

$$\ddot{Y} - 0.3\,\dot{Y} + Y = 0$$

Q.3 Attempt the following. (Any Two) **12**

a) The forward path TF of a unity feedback control system is given by $G(s) = \frac{K}{s(s+2)(s+8)}$. Design a suitable lag compensator so that the system meets the following specifications.

i) Percentage overshoot $\leq 16\%$ for unit step input,

ii) Steady state error ≤ 0.125 for unit ramp input.

b) Design a lead compensator for a unity feedback system with OLTF $G(s) = \frac{K}{s(s+1)(s+5)}$ to satisfy the following specifications.

i) Kv $\geq$ 50

ii) Phase Margin $\geq$ 20°

c) Explain the stability of a non-linear control system.

Section – II

Q.4 Solve the following. (Any Four) **16**

a) The closed-loop poles (Eigen values) are to be located at $s = -3$, $s = -7$. Design a state variable feedback.
Given that $A = \begin{bmatrix} 0 & 1 \\ -20 & -9 \end{bmatrix}$ and $B = \begin{bmatrix} 0 \\ 1 \end{bmatrix}, C = [1 \quad 0]$

b) Consider a system having state model
$\begin{bmatrix} \dot{x}_1 \\ \dot{x}_2 \end{bmatrix} = \begin{bmatrix} -2 & -3 \\ 4 & 2 \end{bmatrix} \begin{bmatrix} x_1 \\ x_2 \end{bmatrix} + \begin{bmatrix} 3 \\ 5 \end{bmatrix} u(t)$ & $Y = [1 \quad 1] \begin{bmatrix} x_1 \\ x_2 \end{bmatrix}$
with $D = 0$. Obtain the Transfer Function.

c) Determine the controllability of the system with state model

$$\begin{bmatrix} \dot{x}_1 \\ \dot{x}_2 \\ \dot{x}_3 \end{bmatrix} = \begin{bmatrix} 0 & 1 & 0 \\ 0 & 0 & 1 \\ 0 & -2 & -3 \end{bmatrix} \begin{bmatrix} x_1 \\ x_2 \\ x_3 \end{bmatrix} + \begin{bmatrix} 0 \\ 0 \\ 10 \end{bmatrix} u$$

d) Describe Direct Substitution method for the evaluation of state feedback gain matrix.

e) Derive the pulse transfer function of closed loop system.

Q.5 Solve the following. (Any Two) **12**

a) A system is described by $\begin{bmatrix} \dot{x}_1 \\ \dot{x}_2 \\ \dot{x}_3 \end{bmatrix} = \begin{bmatrix} 0 & 1 & 0 \\ 0 & 0 & 1 \\ -1 & -5 & -6 \end{bmatrix} \begin{bmatrix} x_1 \\ x_2 \\ x_3 \end{bmatrix} + \begin{bmatrix} 0 \\ 0 \\ 1 \end{bmatrix} u(t)$
Using state feedback control $u = -Kx$, it is desired to have closed poles are at $(-1 + j2), (-1 - j2), (-10)$.

Find the state feedback matrix using Ackermann's formula.

b) Obtain state transition matrix for the following system matrix
$A = \begin{bmatrix} 0 & 1 \\ -6 & -5 \end{bmatrix}$

c) Examine the stability of following characteristic equation:
$P(z) = z^4 - 1.2z^3 + 0.07z^2 + 0.3z - 0.08 = 0$

4) Assume suitable data if necessary.

MCQ/Objective Type Questions

Duration: 30 Minutes Marks:14

Q.1 Solve the following: **14**

1) A synchronous capacitor can supply _____.
a) lagging vars only
b) leading vars only
c) both leading and lagging vars
d) neither leading vars nor lagging vars

2) The principle of incremental costs is used.
a) to decide the total plant capacity to be operated
b) to decide the load allocation between units in operation
c) to decide the sequence of adding units
d) all the above

3) A generating unit in a power system is generating 100 MW. It is known that transfer of 100 MW from this unit to the load centre causes a transmission loss of 15 MW. The penalty factor for this unit is _____.
a) 0.7 b) 0.85
c) 1.15 d) 1.43

4) The time required for a thermal unit to be brought online from a cold state is called _____.
a) Start-up time b) Shut-down time
c) Minimum up-time d) Banking time

5) Two alternators A and B are operating in parallel. If excitation of A is increased _____.
a) reactive power of A is increased while that of B is decreased
b) reactive power of A is increased while that of B is remains unchanged
c) reactive power of A is decreased
d) both real and reactive power of A are increased

6) A system has two sources having plant loadings P_1 and P_2. The transmission loss P_L is _____.

a) $P_1^2B_{11} + P_1P_2B_{12} + P_2^2B_{22}$ b) $2P_1^2B_{11} + P_1P_2B_{12} + 2P_2^2B_{22}$

c) $P_1^2 B_{11} + 2P_1P_2B_{12} + P_2^2B_{22}$ d) None of the above

7) The units for heat rate are _____.

a) k cal/k Wh b) k Wh/k cal

c) k cal/hour d) kW

8) The primary purpose of Load Frequency Control (LFC) is to maintain _____.

a) Voltage b) Constant frequency

c) Reactive power d) Line current

9) Var flows in a circuit _____.

a) from a point of higher voltage to that of lower voltage

b) from a point of lower voltage to that of higher voltage

c) without any effect on the voltage of terminals

d) none of these

10) In economic dispatch including transmission losses, the effect of increased penalty factor is to _____.

a) increase load on that generator

b) decrease load on that generator

c) keep the load on that generator constant

d) either a) or b)

11) In economic dispatch, the condition for optimum generation allocation neglecting line losses is that all units must operate at equal _____.

a) Fuel cost b) Incremental fuel cost

c) Efficiency d) Rated capacity

12) Automatic generation control (AGC) _____.

a) always requires a special and separate computer

b) can be provided by a special program in the SCADA master unit computer

c) cannot include transmission losses

d) cannot be relied in some cases

13) The voltage drop across a series capacitor bank is proportional to _____.

a) line current b) line voltage

c) size of conductor d) both line current and voltage

14) Security analysis is executed _____.

a) real time analysis b) pre contingency analysis

c) post contingency analysis d) None of them

T.Y. (B.Tech.) (Electrical Engineering) (Semester - II) (New) (CBCS)
Examination: March/April – 2026
Power System Operation and Control (EEPEC – 02A)

Day & Date: Friday, 22-05-2026 Max. Marks: 56
Time: 10:00 AM To 01:00 PM

Instructions: 1) All questions are compulsory.
2) Figures to the right indicate full marks.
3) Assume suitable data if necessary.

SECTION – I

Q.2 Attempt the following. (Any Four) **16**

a) Define the Unit Commitment. What are the constraints of Unit Commitment.

b) Derive the expression for the transmission loss in optimum scheduling.

c) State the necessity of maintaining a constant frequency for stable power system operation.

d) Write a short note on 'Automatic Load Dispatching'.

e) Explain the merits of the interconnection of power system network.

Q.3 Attempt the following. (Any Two) **12**

a) The fuel inputs F_1 and F_2 in kcal/hour for two units having output P_1 and P_2 MW are as under:

$F_1 = P_1 + 0.02P_1^2 + 20$

$F_2 = 1.2P_2 + 0.015P_2^2 + 10$

The maximum and minimum loads on the two units are 250 MW and 25 MW respectively. Find and pot the variation of load on each unit as a function of the total load which varies from 50 MW to 500 MW. Also plot incremental cost against total load.

b) Discuss the dynamic programming method to solar unit commitment program.

c) Derive the thermal heat terminology for the optimal scheduling and cost scheduling.

SECTION – II

Q.4 Attempt the following. (Any Four) **16**

a) Draw a block diagram, with illustrative transfer functions, of a single area load frequency control system.

b) Explain the system state classifications in power system security.

c) Explain the mechanism of load frequency control.

d) What is Voltage collapse? List out the different reasons and explain.

e) Explain the effect of rotor angle on voltage stability.

Q.5 Attempt the following. (Any Two) **12**

a) Describe the effect of thyristor-controlled static shunt compensation to meet the reactive power requirement in the power system.

b) Write a short note on security analysis and sensitivity factors.

c) Express the mathematical formulation of Voltage stability problem.

Q.1 Solve the following: **14**

1) A system has two sources having plant loadings P_1 and P_2. The transmission loss P_L is _____.
a) $P_1^2B_{11} + P_1P_2B_{12} + P_2^2B_{22}$ b) $2P_1^2B_{11} + P_1P_2B_{12} + 2P_2^2B_{22}$
c) $P_1^2 B_{11} + 2P_1P_2B_{12} + P_2^2B_{22}$ d) None of the above

2) The units for heat rate are _____.
a) k cal/k Wh b) k Wh/k cal
c) k cal/hour d) kW

3) The primary purpose of Load Frequency Control (LFC) is to maintain _____.
a) Voltage b) Constant frequency
c) Reactive power d) Line current

4) Var flows in a circuit _____.
a) from a point of higher voltage to that of lower voltage
b) from a point of lower voltage to that of higher voltage
c) without any effect on the voltage of terminals
d) none of these

5) In economic dispatch including transmission losses, the effect of increased penalty factor is to _____.
a) increase load on that generator
b) decrease load on that generator
c) keep the load on that generator constant
d) either a) or b)

6) In economic dispatch, the condition for optimum generation allocation neglecting line losses is that all units must operate at equal _____.
a) Fuel cost b) Incremental fuel cost
c) Efficiency d) Rated capacity

7) Automatic generation control (AGC) _____.
   a) always requires a special and separate computer
   b) can be provided by a special program in the SCADA master unit computer
   c) cannot include transmission losses
   d) cannot be relied in some cases

8) The voltage drop across a series capacitor bank is proportional to _____.
   a) line current
   b) line voltage
   c) size of conductor
   d) both line current and voltage

9) Security analysis is executed _____.
   a) real time analysis
   b) pre contingency analysis
   c) post contingency analysis
   d) None of them

10) A synchronous capacitor can supply _____.
   a) lagging vars only
   b) leading vars only
   c) both leading and lagging vars
   d) neither leading vars nor lagging vars

11) The principle of incremental costs is used.
   a) to decide the total plant capacity to be operated
   b) to decide the load allocation between units in operation
   c) to decide the sequence of adding units
   d) all the above

12) A generating unit in a power system is generating 100 MW. It is known that transfer of 100 MW from this unit to the load centre causes a transmission loss of 15 MW. The penalty factor for this unit is _____.
   a) 0.7
   b) 0.85
   c) 1.15
   d) 1.43

13) The time required for a thermal unit to be brought online from a cold state is called _____.
   a) Start-up time
   b) Shut-down time
   c) Minimum up-time
   d) Banking time

14) Two alternators A and B are operating in parallel. If excitation of A is increased _____.
   a) reactive power of A is increased while that of B is decreased
   b) reactive power of A is increased while that of B is remains unchanged
   c) reactive power of A is decreased
   d) both real and reactive power of A are increased

Set **S**

T.Y. (B.Tech.) (Electrical Engineering) (Semester - II) (New) (CBCS)
Examination: March/April – 2026
Power System Operation and Control (EEPEC – 02A)

Day & Date: Friday, 22-05-2026 Max. Marks: 56
Time: 10:00 AM To 01:00 PM

Instructions: 1) All questions are compulsory.
2) Figures to the right indicate full marks.
3) Assume suitable data if necessary.

SECTION – I

Q.2 Attempt the following. (Any Four) **16**

a) Define the Unit Commitment. What are the constraints of Unit Commitment.

b) Derive the expression for the transmission loss in optimum scheduling.

c) State the necessity of maintaining a constant frequency for stable power system operation.

d) Write a short note on 'Automatic Load Dispatching'.

e) Explain the merits of the interconnection of power system network.

Q.3 Attempt the following. (Any Two) **12**

a) The fuel inputs F_1 and F_2 in kcal/hour for two units having output P_1 and P_2 MW are as under:

$F_1 = P_1 + 0.02P_1^2 + 20$

$F_2 = 1.2P_2 + 0.015P_2^2 + 10$

The maximum and minimum loads on the two units are 250 MW and 25 MW respectively. Find and pot the variation of load on each unit as a function of the total load which varies from 50 MW to 500 MW. Also plot incremental cost against total load.

b) Discuss the dynamic programming method to solar unit commitment program.

c) Derive the thermal heat terminology for the optimal scheduling and cost scheduling.

SECTION – II

Q.4 Attempt the following. (Any Four) **16**

a) Draw a block diagram, with illustrative transfer functions, of a single area load frequency control system.

b) Explain the system state classifications in power system security.

c) Explain the mechanism of load frequency control.

d) What is Voltage collapse? List out the different reasons and explain.

e) Explain the effect of rotor angle on voltage stability.

Q.5 Attempt the following. (Any Two) **12**

a) Describe the effect of thyristor-controlled static shunt compensation to meet the reactive power requirement in the power system.

b) Write a short note on security analysis and sensitivity factors.

c) Express the mathematical formulation of Voltage stability problem.

Examination: Marh/April – 2026
Electrical Machine Design (EEPEC – 02B)

Day & Date: Friday, 22-05-2026 Max. Marks: 70
Time: 10:00 AM To 01:00 PM

Instructions: 1) Q. No. 1 is compulsory. It should be solved in the first 30 minutes in Answer Book Page no 03 (Starting page of the Answer Book). Each question carries one mark.
2) Don't forget to Mention question paper set (P/Q/R/S) on top of page.
3) Figures to the right indicates full marks.
4) Assume suitable data whenever necessary.

MCQ/Objective Type Questions

Duration: 30 Minutes Marks:14

Q.1 Choose the correct alternative from the options. 14

1) Power transformers are designed to have maximum efficiency at _____.
a) Full load b) 50% load
c) 80% load d) no load

2) Maximum temperature limit for class B insulation is _____.
a) 105°C b) 120°C
c) 130° d) 155°C

3) The Major Consideration is to evolve a good Design is _____.
a) Compliance with performance laid down in Specification
b) Cost
c) Durability
d) All of above

4) Area of the window is _____ the window space factor.
a) Directly proportional to b) Inversely proportional to
c) Equal to d) None of the above

5) In transformer making yoke section about 15-20% larger than the limb section has an effect of _____.
a) Reducing yoke flux density b) Reducing the iron losses
c) both a) and b) above d) none of the above

6) The Output of a d.c machine is limited by _____.
a) peripheral velocity b) temperature rise
c) frequency of flux reversals d) Commutator

7) The electric loading in a DC machine is typically represented as _____.
a) Total flux per pole
b) Total ampere-conductors per meter of armature periphery
c) Flux density in the air gap
d) Number of armature slots

8) Compared to induction motors the air gap in d.c machine is _____.
a) Large
b) Small
c) Very small
d) Equal

9) Which type of slots are normaly used in induction motor _____?
a) Open
b) Semi enclosed
c) closed
d) Round

10) Slip ring are usually made of _____.
a) Copper
b) Carbon
c) Phosphors Bronze
d) Aluminium

11) The speed of a synchronous machine _____.
a) Increase with increase in load
b) Decrease with increase in load
c) Always remains constant
d) varies with power factor

12) Usual range of SCR for turbo generator is _____.
a) 1.0 to 1.5
b) 0.8 to 0.9
c) 0.5 to 0.6
d) 0.2 to 0.3

13) An induction motor will draw _____ magnetizing current for a _____ air gap length.
a) small, large
b) large, small
c) large, large
d) None of the above

14) A turbo machine is usually running at a speed of _____.
a) 15000 rpm
b) 1500 rpm
c) 5000 rpm
d) 3000 rpm

Q.2 Solve. (Any Four) **16**

a) Derive the Expression for output equation for single phase core type transformer.

b) Describe the Classification of Insulating Materials.

c) Distinguish between core type and shell type transformer.

d) A 350 kw, 500V, 450 rpm, 6 pole dc generator is built with an armature diameter of 0.87m and a core length of 0.32m the lap wound armature has 660 conductor calculate the specific electric and magnetic loading.

e) Three phase, oil cooled core type transformer has following dimensions: distance between core centres 0.2m, height of window 0.24m, diameter of circumscribing circle 0.14m, the flux density in core 1.25wb/m^2, and current density in the conductor is 2.5A/mm^2 Estimate the KVA rating Assume a window space factor of 0.2 and core area factor 0.56, the core is two stepped.

Q.3 Solve. (Any Two) **12**

a) Derive the Expression for output equation for DC machine.

b) Derive an expression two stepped core.

c) A 5KW, 250V, 4 pole, 1500 rpm, shunt generator is designed to have a square pole face the loading are: average flux density in the gap is 0.42 wb/m^2, ampere conductor per metre 15000 find the main dimensions of the machine Assume full load efficiency 0.87 and ratio of pole arc to pole pitch is 0.66

Section – II

Q.4 Solve. (Any Four) **16**

a) Derive the output equation of three phase induction motor.

b) Explain the choice of specific magnetic loading for synchronous machine.

c) Derive an expression for rotor bars for three phase induction motor.

d) Find the current in the bars and end rings of a cage rotor of a 6 pole, three phase induction motor having 72 stator slots with 15 conductor in each slot if the stator current per phase is 20A and rotor slots are 55 hence find the suitable size of cage bars and end rings.

e) Estimate the KVA rating of a three phase, 50Hz, 2 pole, turbo machine having are length 160cm, peripheral speed 140m/sec ac = 525 per cm and Bav = 0.52 wb/m^2 Assume uniformly distributed winding Assume kw = 0.955

Q.5 Solve. (Any Two) **12**

a) Derive an expression for output equation of turbo alternator.

b) In the design of a 30HP, 3 phase, 440V, 960 RPM, 50 HZ delta connected induction motor, assume the specific electric loading of 25000ac/m, specific magnetic loading of 0.46 wb/m^2 full load efficiency 86%, P.f. 0.87 and estimate the following:

i) Stator Core Dimensions
ii) Number of stator slots and winding turns

c) A 500 KVA, 3.3KV, 50HZ, 600rpm, three phase salient pole stator connection alternator has 180 turns phase Estimate the length of air gap, if the average flux density is 0.54wb/m^2, the ratio of pole arc to pole pitch 0.65, the short circuit ratio 1.2 and gap extension coefficient 1.15 the mmf required for gap is 80% of no load field mmf winding factor 0.955

a) Compliance with performance laid down in Specification
b) Cost
c) Durability
d) All of above

13) Area of the window is _____ the window space factor.
a) Directly proportional to b) Inversely proportional to
c) Equal to d) None of the above

14) In transformer making yoke section about 15-20% larger than the limb section has an effect of _____.
a) Reducing yoke flux density b) Reducing the iron losses
c) both a) and b) above d) none of the above

Electrical Machine Design (EEPEC – 02B)

Day & Date: Friday, 22-05-2026 Max. Marks: 56
Time: 10:00 AM To 01:00 PM

Instructions: 1) All Questions are compulsory.
2) Figures to the right indicate full marks.
3) Assume suitable data if necessary.

Section – I

Q.2 Solve. (Any Four) **16**

a) Derive the Expression for output equation for single phase core type transformer.

b) Describe the Classification of Insulating Materials.

c) Distinguish between core type and shell type transformer.

d) A 350 kw, 500V, 450 rpm, 6 pole dc generator is built with an armature diameter of 0.87m and a core length of 0.32m the lap wound armature has 660 conductor calculate the specific electric and magnetic loading.

e) Three phase, oil cooled core type transformer has following dimensions: distance between core centres 0.2m, height of window 0.24m, diameter of circumscribing circle 0.14m, the flux density in core 1.25wb/m^2, and current density in the conductor is 2.5A/mm^2 Estimate the KVA rating Assume a window space factor of 0.2 and core area factor 0.56, the core is two stepped.

Q.3 Solve. (Any Two) **12**

a) Derive the Expression for output equation for DC machine.

b) Derive an expression two stepped core.

c) A 5KW, 250V, 4 pole, 1500 rpm, shunt generator is designed to have a square pole face the loading are: average flux density in the gap is 0.42 wb/m^2, ampere conductor per metre 15000 find the main dimensions of the machine Assume full load efficiency 0.87 and ratio of pole arc to pole pitch is 0.66

Section – II

Q.4 Solve. (Any Four) **16**

a) Derive the output equation of three phase induction motor.

b) Explain the choice of specific magnetic loading for synchronous machine.

c) Derive an expression for rotor bars for three phase induction motor.

d) Find the current in the bars and end rings of a cage rotor of a 6 pole, three phase induction motor having 72 stator slots with 15 conductor in each slot if the stator current per phase is 20A and rotor slots are 55 hence find the suitable size of cage bars and end rings.

e) Estimate the KVA rating of a three phase, 50Hz, 2 pole, turbo machine having are length 160cm, peripheral speed 140m/sec ac = 525 per cm and Bav = 0.52 wb/m^2 Assume uniformly distributed winding Assume kw = 0.955

Q.5 Solve. (Any Two) **12**

a) Derive an expression for output equation of turbo alternator.

b) In the design of a 30HP, 3 phase, 440V, 960 RPM, 50 HZ delta connected induction motor, assume the specific electric loading of 25000ac/m, specific magnetic loading of 0.46 wb/m^2 full load efficiency 86%, P.f. 0.87 and estimate the following:

i) Stator Core Dimensions
ii) Number of stator slots and winding turns

c) A 500 KVA, 3.3KV, 50HZ, 600rpm, three phase salient pole stator connection alternator has 180 turns phase Estimate the length of air gap, if the average flux density is 0.54wb/m^2, the ratio of pole arc to pole pitch 0.65, the short circuit ratio 1.2 and gap extension coefficient 1.15 the mmf required for gap is 80% of no load field mmf winding factor 0.955

Extra High Voltage AC Transmission (EEPEC – 03B)

Day & Date: Monday, 25-05-2026 Max. Marks: 70
Time: 10:00 AM To 01:00 PM

Instructions: 1) Q. No. 1 is compulsory. It should be solved in the first 30 minutes in Answer Book Page no 03 (Starting page of the Answer Book). Each question carries one mark.
2) Don't forget to Mention question paper set (P/Q/R/S) on top of page.
3) Figures to the right indicate full marks.

MCQ/Objective Type Questions

Duration: 30 Minutes Marks:14

Q.1 Choose the correct answer. **14**

1) Third mode of propagation is called as _____.
a) Line to ground b) Phase to phase
c) Homopolar d) Inter-phase

2) The positive sequence reactance per phase in ohms/km in 750 kV transmission line is _____.
a) 0.272 b) 0.227
c) 0.722 d) None of these

3) The function of steel wire in an ACSR conductor is to _____.
a) Compensate for skin effect
b) Take care of surges
c) Provide additional mechanical strength
d) Reduce inductance

4) Operating 750 KV line gives AN at a level of _____.
a) 50 dB b) 55.4 dB
c) 52 dB d) 58.5 dB

5) Which type of corona discharge gives interference to radio broadcast?
a) Pulse type b) Pulse less type
c) Glow corona d) None of the above

6) The crest time of pulse properties for positive cycle is _____.
a) 20 ns b) 30 ns
c) 40 ns d) 50 ns

7) Refraction coefficient of voltage (KT) for open ended line _____.
a) $+2$ b) 1
c) -1 d) 0

8) With the single frequency transients, the ratio of peak restriking voltage/time between voltage zero and peak voltage is known as _____.
   a) Recovery voltage
   b) Restriking voltage
   c) Rate of rise restriking voltage
   d) Active recovery voltage

9) On a lightly loaded transmission line _____.
   a) Receiving end voltage can exceed sending end voltage
   b) Receiving end voltage can't exceed sending end voltage
   c) Capacitive charging current is reduced
   d) None of these

10) System which suffers from maximum voltage fluctuations is _____.
   a) Ring type
   b) Mesh type
   c) Radial type
   d) None of these

11) For the same voltage boost, the reactive power capacity is more for a _____.
   a) Shunt capacitor
   b) Series capacitors
   c) It is same for both series and shunt
   d) None of these

12) If the shunt admittance of the transmission line is neglected, the maximum power will occur when torque angle _____.
   a) 45°
   b) -90^0
   c) 90°
   d) 180^0

13) Which among these is/are the fundamental economical principles that influence/s the design of transmission lines?
   a) Economic choice of conductor size
   b) Economic choice of transmission voltage
   c) Both a) and b)
   d) Economic choice of transmission line length

14) Air blast circuit breakers for 400 kV power system are design to operate in _____.
   a) 5 sec
   b) 0.5 sec
   c) 0.1 sec
   d) 50 milliseconds

Instructions: 1) All questions are compulsory.
2) Figures to the right indicate full marks.

Section – I

Q.2 Solve the following. (Any Four) **16**

a) Explain in detail advantages and disadvantages of high voltage.

b) Explain the relation between temperature rise and current carrying capacity of EHVAC line.

c) Explain the charge potential relations of multi-conductor lines.

d) Explain attenuation of travelling waves on transmission line.

e) Explain reflection and refraction of travelling waves.

f) Derive differential equations and solutions for general case in travelling waves.

Q.3 Solve the following. (Any Two) **12**

a) Explain the different mechanical considerations in EHV line performance.

b) Derive the expression $P_c = \frac{1}{2}KC(V_m^2 - V_0^2)$ for the energy loss from charge-voltage diagram.

c) What is standing wave? Derive equation for open ended line double exponential response.

Section – II

Q.4 Solve the following. (Any Four) **16**

a) Explain sinusoidal excitation lumped parameter circuit.

b) Explain ferro-resonance over voltages.

c) Explain the term power circle diagram and its use.

d) Describe static reactive compensating system.

e) Explain the factors under steady state in design of EHV lines.

f) Explain line insulation design based upon transient overvoltage in detail.

Q.5 Solve the following. (Any Two) **12**

a) Explain the methods used for reduction of switching surge over voltages in EHV systems.

b) A 100 MV A 230kV 50 Hz transformer has $X_t = 12\%$ and is connected to a line 200 km long which has an inductance of 1 mH/km. The filter, connected to the LV 33 kV side of the transformer, is required to suppress the 5th harmonic generated by the TCR to 1% of I_n. Calculate the value of filter capacitor if the filter inductance used is 2mH.

c) Describe conductor-tower, conductor-ground and conductor-conductor clearances.

MCQ/Objective Type Questions

Duration: 30 Minutes Marks:14

Q.1 Choose the correct alternative from the options. **14**

1) The main purpose of an Energy Storage System (ESS) in power systems is to _____.
a) Increase transmission line length
b) Store excess electrical energy for later use
c) Reduce power factor
d) Increase generator speed

2) Which of the following is a key general consideration while selecting an ESS?
a) Color of Battery b) Brand Name
c) Shape of Storage Device d) Energy Density

3) Which ESS type stores energy in the form of kinetic energy?
a) Battery storage b) Pumped hydro storage
c) Flywheel energy storage d) Hydrogen storage

4) TES improves power plant performance by _____.
a) Increasing peak load demand
b) Allowing load shifting and peak shaving
c) Increasing transmission losses
d) Stopping generation during peak hours

5) The main purpose of Thermal Energy Storage (TES) is _____.
a) Increase fuel consumption
b) Store heat or cold for later use
c) Generate electricity directly
d) Reduce turbine speed

6) The electrolyte used in a lead-acid battery is _____.
a) Sulfuric acid
b) Potassium hydroxide
c) Sodium chloride
d) Distilled water

7) In flow batteries, energy is stored in _____.
a) Solid electrodes only
b) Flywheel
c) Compressed air
d) Liquid electrolytes stored in tanks

8) The electrolyte in a battery is used to _____.
a) Store electrons
b) Provide mechanical support
c) Allow ion movement
d) Increase voltage

9) SoC represents _____.
a) Total capacity
b) Remaining charge
c) Maximum voltage
d) Internal resistance

10) Supercapacitors store energy using _____.
a) Electrostatic field
b) Chemical reaction
c) Magnetic field
d) Heat

11) Storage is needed in isolated systems due to _____.
a) Constant generation
b) Intermittent renewable sources
c) Low voltage
d) High current

12) In pumped hydro, energy is stored as _____.
a) Electrical energy
b) Chemical energy
c) Gravitational potential energy
d) Thermal energy

13) Isolated systems are also called _____.
a) Grid systems
b) Standalone systems
c) Hybrid systems
d) Central systems

14) Main function of Virtual Power Plant (VPP) is _____.
a) Increase losses
b) Coordinate distributed energy resources
c) Stop renewable integration
d) Manual operation

Set **P**

T.Y. (B.Tech.) (Electrical Engineering) (Semester - II) (New) (CBCS)
Examination: March/April – 2026
Energy Storage System (EEPEC – 03C)

Day & Date: Monday, 25-05-2026 Max. Marks: 56
Time: 10:00 AM To 01:00 PM

Instructions: 1) All questions are compulsory.
2) Figures to the right indicate full marks.
3) Assume suitable data if necessary.

Section – I

Q.2 Solve the following. (Any Four) **16**

a) List and explain briefly any four types of energy storage systems.

b) Explain the term Power Transformation System (PTS) and Central Store (CS) in energy storage systems.

c) Explain Pumped Hydro Compressed Air Mechanical energy storage system.

d) Describe general considerations for thermal energy storage system.

e) What are flow batteries? Mention their key features.

f) Explain SMES (Superconducting Magnetic Energy Storage).

Q.3 Solve the following. (Any Two) **12**

a) Explain the concept of energy and power balance in a storage unit with suitable equations.

b) Explain in detail hydrogen to synthetic methane energy storage system.

c) Explain in detail the construction and working of a Lead-acid battery.

Section – II

Q.4 Solve the following. (Any Four) **16**

a) What is a supercapacitor? State two advantages and two limitations of supercapacitors.

b) Define isolated and grid-connected renewable power system.

c) Explain the role of storage in solar photovoltaic systems.

d) Define and explain in brief power quality and stability in renewable energy systems.

e) Explain Grid to Vehicle (G2V) and Vehicle to Grid (V2G) concept with one application.

f) Define Hybrid Energy Storage System (HESS) and advantages of hybrid energy storage over single storage systems.

Q.5 Solve the following. (Any Two) **12**

a) Explain in detail the following battery parameters: C-rating, SoC, DoD, Specific Energy, Specific Power.

b) Discuss the challenges and importance of storage in tidal and wave energy systems.

c) Explain various parameters and control strategies used in Battery SCADA.

Set Q

T.Y. (B.Tech.) (Electrical Engineering) (Semester - II) (New) (CBCS)
Examination: March/April – 2026
Energy Storage System (EEPEC – 03C)

Day & Date: Monday, 25-05-2026 Max. Marks: 70
Time: 10:00 AM To 01:00 PM

Instructions: 1) Q. No. 1 is compulsory. It should be solved in the first 30 minutes in Answer Book Page no 03 (Starting page of the Answer Book). Each question carries one mark.
2) Don't forget to Mention question paper set (P/Q/R/S) on top of page.
3) Figures to the right indicate full marks.

MCQ/Objective Type Questions

Duration: 30 Minutes Marks:14

Q.1 Choose the correct alternative from the options. **14**

1) The electrolyte in a battery is used to _____.
a) Store electrons
b) Provide mechanical support
c) Allow ion movement
d) Increase voltage

2) SoC represents _____.
a) Total capacity b) Remaining charge
c) Maximum voltage d) Internal resistance

3) Supercapacitors store energy using _____.
a) Electrostatic field b) Chemical reaction
c) Magnetic field d) Heat

4) Storage is needed in isolated systems due to _____.
a) Constant generation
b) Intermittent renewable sources
c) Low voltage
d) High current

5) In pumped hydro, energy is stored as _____.
a) Electrical energy
b) Chemical energy
c) Gravitational potential energy
d) Thermal energy

6) Isolated systems are also called _____.
a) Grid systems b) Standalone systems
c) Hybrid systems d) Central systems

7) Main function of Virtual Power Plant (VPP) is _____.
   a) Increase losses
   b) Coordinate distributed energy resources
   c) Stop renewable integration
   d) Manual operation

8) The main purpose of an Energy Storage System (ESS) in power systems is to _____.
   a) Increase transmission line length
   b) Store excess electrical energy for later use
   c) Reduce power factor
   d) Increase generator speed

9) Which of the following is a key general consideration while selecting an ESS?
   a) Color of Battery
   b) Brand Name
   c) Shape of Storage Device
   d) Energy Density

10) Which ESS type stores energy in the form of kinetic energy?
   a) Battery storage
   b) Pumped hydro storage
   c) Flywheel energy storage
   d) Hydrogen storage

11) TES improves power plant performance by _____.
   a) Increasing peak load demand
   b) Allowing load shifting and peak shaving
   c) Increasing transmission losses
   d) Stopping generation during peak hours

12) The main purpose of Thermal Energy Storage (TES) is _____.
   a) Increase fuel consumption
   b) Store heat or cold for later use
   c) Generate electricity directly
   d) Reduce turbine speed

13) The electrolyte used in a lead-acid battery is _____.
   a) Sulfuric acid
   b) Potassium hydroxide
   c) Sodium chloride
   d) Distilled water

14) In flow batteries, energy is stored in _____.
   a) Solid electrodes only
   b) Flywheel
   c) Compressed air
   d) Liquid electrolytes stored in tanks

MCQ/Objective Type Questions

Duration: 30 Minutes Marks:14

Q.1 Choose the correct Answer. **14**

1) The signal $x(t) = 1$ for $t > 0$,
$= -1$ for $t < 0$ and
$= 0$ for $t = 0$, then the signal $x(t)$ is _____ function.

a) Unit step b) Unit Ramp
c) Impulse d) Signum

2) A signal is called causal if _____.

a) It exists only for $t < 0$ b) It exists only for $t \geq 0$
c) It is periodic d) It is odd

3) The derivative of the unit step signal $u(t)$ is _____.

a) Ramp signal b) Exponential signal
c) Unit impulse signal d) Sinusoidal signal

4) Which of the following systems is non-causal?

a) $y[n] = x[n] + x[n-1]$ b) $y[n] = x[n-2]$
c) $y[n] = x[n+1]$ d) $y[n] = 3x[n]$

5) $y(t) = x(t) + x(t-2)$, this system is _____.

a) Static and non-causal b) Dynamic and causal
c) Static and causal d) Dynamic and non-causal

6) A CT-LTI system is BIBO stable if _____.

a) $\int_{-\infty}^{\infty} |h(t)| dt < \infty$ b) $\int_{-\infty}^{\infty} h(t) dt = 0$
c) $h(t) = 1$ d) $h(t) = u(t)$

7) DT LTI system stability condition is _____.

a) $\sum h\,[n] = 0$ b) $\sum |h[n]| < \infty$

c) $h[n] = 1$ d) $h[n] = \delta[n]$

8) The region of convergence (ROC) of a Z-transform is _____.

a) Set of values where $X(z) = 0$

b) Set of values of z or which the Z-transform converges

c) Set of poles only

d) Set of zeros only

9) The linearity property of Z-transform states _____.

a) $Z\{ax_1[n] + bx_2[n]\} = aX_1(z) + bX_2(z)$

b) $Z\{x_1[n]x_2[n]\} = X_1(z) + X_2(z)$

c) $Z\{x[n-k]\} = z^{-k}X(z)$

d) $Z\{nx[n]\} = nX(z)$

10) The Fourier Transform of a continuous-time signal $x(t)$ is defined as _____.

a) $X(\omega) = \int_{-\infty}^{\infty} x\,(t)e^{-j\omega t}\,dt$ b) $X(\omega) = \sum_{n=-\infty}^{\infty} x\,[n]e^{-j\omega n}$

c) $X(s) = \int_{0}^{\infty} x\,(t)e^{-st}\,dt$ d) $X(z) = \sum_{n=-\infty}^{\infty} x\,[n]z^{-n}$

11) Parseval's theorem relates _____.

a) Time shifting and frequency shifting

b) Signal energy in time domain and frequency domain

c) Convolution and multiplication

d) Linearity and scaling

12) DTFT can be obtained by evaluating Z-transform at _____.

a) $z = 0$ b) $z = e^{j\omega}$

c) $z = 1$ d) $z = \infty$

13) Fourier Transform exists if _____.

a) Signal is absolutely integrable b) Signal is periodic

c) Signal is random d) Signal is causal

14) FFT algorithms include _____.

a) Radix-2 b) Laplace

c) Z-transform d) Sampling

Time: 10:00 AM To 01:00 PM

Instructions: 1) All questions are compulsory.
2) Figures to the right indicate full marks.
3) Assume suitable data if necessary.

SECTION – I

Q.2 Attempt the following. (Any Four) **16**

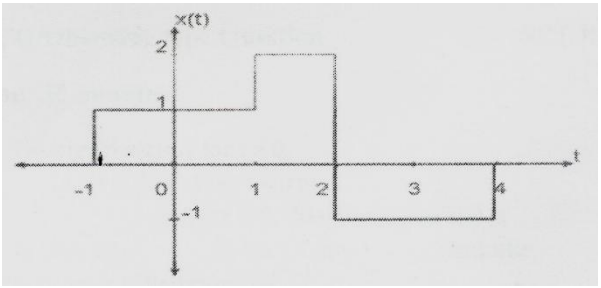
a) Explain the following signals
i) Periodic and aperiodic
ii) Even and odd

b) The impulse response of a LTI system is $h(n) = \{1,2,1,-1\}$ determine the response of the system to the input $x(n) = \{-1,2,1\}$

c) Explain
i) Linear and nonlinear system
ii) Time variant and time invariant system

d) Determine whether the signal $x(t) = e^{-3t}\,u(t)$ is power or energy signal.

e) Find the Even and Odd Part of the signal.



Q.3 Attempt the following. (Any Two) **12**

a) Find the convolution of the sequences $x_1(n) = \{1,-1,2,3\}$, $x_2(n) = \{1,-2,3,-1\}$ by matrix and tabular method.

b) For a DT sequence $X[n] = \{1,1,2,2,-1,1,-2\}$ perform the following operations
i) $[n+2]$
ii) $[-n+3]$
iii) $X[3n-3]$

c) Explain properties of CT-LTI system.

SECTION – II

Q.4 Attempt the following. (Any Four) **16**

a) Find the IDFT of sequence $x[k] = \{1, 1 - j2, -1, 1 + j2\}$

b) Find the Fourier Transform of the signal $\delta(t)$.

c) Explain the properties of region of convergence.

d) Evaluate the 4-point DFT of a sequence $x[n] = \{0, 2, 4, 6\}$

e) Find the Z-Transform and ROC for the signal $x(n) = a^n.u(n)$

Q.5 Attempt the following. (Any Two) **12**

a) Find the inverse Z transform by using long division method $X(Z) = Z + 1/Z^{2-}3Z + 2$

i) if $x(n)$ is causal

ii) $x(n)$ is anticausal

b) Explain following properties for Continuous Time Fourier Transform.

i) Linearity

ii) Frequency shifting

iii) Time shifting

c) Find 8 Point DFT of the sequence $x(n) = \{1, 2, 1, 2\}$

a) Signal is absolutely integrable b) Signal is periodic
c) Signal is random d) Signal is causal

7) FFT algorithms include _____.
a) Radix-2 b) Laplace
c) Z-transform d) Sampling

8) The signal $x(t) = 1$ for $t > 0$,
$= -1$ for $t < 0$ and
$= 0$ for $t = 0$, then the signal $x(t)$ is _____ function.
a) Unit step b) Unit Ramp
c) Impulse d) Signum

9) A signal is called causal if _____.
a) It exists only for $t < 0$ b) It exists only for $t \geq 0$
c) It is periodic d) It is odd

10) The derivative of the unit step signal $u(t)$ is _____.
a) Ramp signal b) Exponential signal
c) Unit impulse signal d) Sinusoidal signal

11) Which of the following systems is non-causal?
a) $y[n] = x[n] + x[n-1]$ b) $y[n] = x[n-2]$
c) $y[n] = x[n+1]$ d) $y[n] = 3x[n]$

12) $y(t) = x(t) + x(t-2)$, this system is _____.
a) Static and non-causal b) Dynamic and causal
c) Static and causal d) Dynamic and non-causal

13) A CT-LTI system is BIBO stable if _____.
a) $\int_{-\infty}^{\infty} |h(t)| dt < \infty$ b) $\int_{-\infty}^{\infty} h(t) dt = 0$
c) $h(t) = 1$ d) $h(t) = u(t)$

14) DT LTI system stability condition is _____.
a) $\sum h[n] = 0$ b) $\sum |h[n]| < \infty$
c) $h[n] = 1$ d) $h[n] = \delta[n]$

Seat No.	

Set **Q**

T.Y. (B.Tech.) (Electrical Engineering) (Semester - II) (New) (CBCS)
Examination: March/April - 2026
Signal & System (EEPEC – 03D)

Day & Date: Monday, 25-05-2026 Max. Marks: 56
Time: 10:00 AM To 01:00 PM

Instructions: 1) All questions are compulsory.
2) Figures to the right indicate full marks.
3) Assume suitable data if necessary.

SECTION – I

Q.2 Attempt the following. (Any Four) **16**

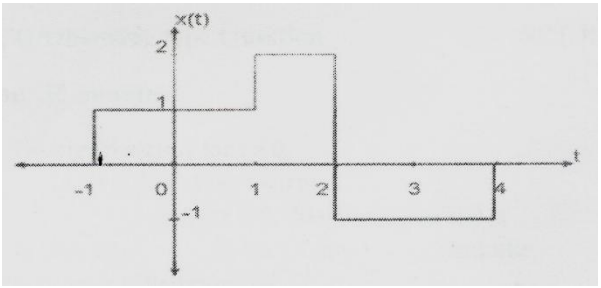
a) Explain the following signals
i) Periodic and aperiodic
ii) Even and odd

b) The impulse response of a LTI system is $h(n) = \{1,2,1,-1\}$ determine the response of the system to the input $x(n) = \{-1,2,1\}$

c) Explain
i) Linear and nonlinear system
ii) Time variant and time invariant system

d) Determine whether the signal $x(t) = e^{-3t}\,u(t)$ is power or energy signal.

e) Find the Even and Odd Part of the signal.



Q.3 Attempt the following. (Any Two) **12**

a) Find the convolution of the sequences $x_1(n) = \{1,-1,2,3\}$, $x_2(n) = \{1,-2,3,-1\}$ by matrix and tabular method.

b) For a DT sequence $X[n] = \{1,1,2,2,-1,1,-2\}$ perform the following operations
i) $[n+2]$
ii) $[-n+3]$
iii) $X[3n-3]$

c) Explain properties of CT-LTI system.

SECTION – II

Q.4 Attempt the following. (Any Four) **16**

a) Find the IDFT of sequence $x[k] = \{1, 1 - j2, -1, 1 + j2\}$

b) Find the Fourier Transform of the signal $\delta(t)$.

c) Explain the properties of region of convergence.

d) Evaluate the 4-point DFT of a sequence $x[n] = \{0, 2, 4, 6\}$

e) Find the Z-Transform and ROC for the signal $x(n) = a^n.u(n)$

Q.5 Attempt the following. (Any Two) **12**

a) Find the inverse Z transform by using long division method $X(Z) = Z + 1/Z^{2-}3Z + 2$

i) if $x(n)$ is causal

ii) $x(n)$ is anticausal

b) Explain following properties for Continuous Time Fourier Transform.

i) Linearity

ii) Frequency shifting

iii) Time shifting

c) Find 8 Point DFT of the sequence $x(n) = \{1, 2, 1, 2\}$

Seat No.	

Set **R**

T.Y. (B.Tech.) (Electrical Engineering) (Semester - II) (New) (CBCS)
Examination: March/April – 2026
Signal & System (EEPEC – 03D)

Day & Date: Monday, 25-05-2026 Max. Marks: 70
Time: 10:00 AM To 01:00 PM

Instructions: 1) Q. No. 1 is compulsory. It should be solved in the first 30 minutes in Answer Book Page no 03 (Starting page of the Answer Book). Each question carries one mark.
2) Don't forget to Mention question paper set (P/Q/R/S) on top of page.
3) Figures to the right indicates full marks.
4) Assume suitable data if required.

MCQ/Objective Type Questions

Duration: 30 Minutes Marks:14

Q.1 Choose the correct Answer. **14**

1) Parseval's theorem relates _____.
a) Time shifting and frequency shifting
b) Signal energy in time domain and frequency domain
c) Convolution and multiplication
d) Linearity and scaling

2) DTFT can be obtained by evaluating Z-transform at _____.
a) $z = 0$ b) $z = e^{j\omega}$
c) $z = 1$ d) $z = \infty$

3) Fourier Transform exists if _____.
a) Signal is absolutely integrable b) Signal is periodic
c) Signal is random d) Signal is causal

4) FFT algorithms include _____.
a) Radix-2 b) Laplace
c) Z-transform d) Sampling

5) The signal $x(t) = 1$ for $t > 0$,
$= -1$ for $t < 0$ and
$= 0$ for $t = 0$, then the signal $x(t)$ is _____ function.
a) Unit step b) Unit Ramp
c) Impulse d) Signum

6) A signal is called causal if _____.
a) It exists only for $t < 0$ b) It exists only for $t \geq 0$
c) It is periodic d) It is odd

7) The derivative of the unit step signal $u(t)$ is _____.

a) Ramp signal
b) Exponential signal
c) Unit impulse signal
d) Sinusoidal signal

8) Which of the following systems is non-causal?

a) $y[n] = x[n] + x[n-1]$
b) $y[n] = x[n-2]$
c) $y[n] = x[n+1]$
d) $y[n] = 3x[n]$

9) $y(t) = x(t) + x(t-2)$, this system is _____.

a) Static and non-causal
b) Dynamic and causal
c) Static and causal
d) Dynamic and non-causal

10) A CT-LTI system is BIBO stable if _____.

a) $\int_{-\infty}^{\infty} |h(t)| dt < \infty$
b) $\int_{-\infty}^{\infty} h(t) dt = 0$
c) $h(t) = 1$
d) $h(t) = u(t)$

11) DT LTI system stability condition is _____.

a) $\sum h[n] = 0$
b) $\sum |h[n]| < \infty$
c) $h[n] = 1$
d) $h[n] = \delta[n]$

12) The region of convergence (ROC) of a Z-transform is _____.

a) Set of values where $X(z) = 0$
b) Set of values of z or which the Z-transform converges
c) Set of poles only
d) Set of zeros only

13) The linearity property of Z-transform states _____.

a) $Z\{ax_1[n] + bx_2[n]\} = aX_1(z) + bX_2(z)$
b) $Z\{x_1[n]x_2[n]\} = X_1(z) + X_2(z)$
c) $Z\{x[n-k]\} = z^{-k}X(z)$
d) $Z\{nx[n]\} = nX(z)$

14) The Fourier Transform of a continuous-time signal $x(t)$ is defined as _____.

a) $X(\omega) = \int_{-\infty}^{\infty} x(t) e^{-j\omega t} dt$
b) $X(\omega) = \sum_{n=-\infty}^{\infty} x[n] e^{-j\omega n}$
c) $X(s) = \int_{0}^{\infty} x(t) e^{-st} dt$
d) $X(z) = \sum_{n=-\infty}^{\infty} x[n] z^{-n}$

Seat No.

MCQ/Objective Type Questions

Duration: 30 Minutes Marks:14

Q.1 Choose the correct Answer. **14**

1) Vehicles having at least four wheels and used for the carriage of passengers, this category of vehicle is _____.
a) L b) M
c) N d) O

2) What is vehicle homologation?
a) The process of vehicle design
b) The process of certifying a vehicle's compliance with regulations and standards
c) The process of manufacturing a vehicle
d) The process of selling a vehicle

3) What is the primary purpose of Hardware-in-the-Loop (HiL) testing in the context of EVs and HEVs?
a) Testing physical hardware components of vehicles
b) Simulating vehicle behavior in a virtual environment
c) Charging the vehicle's battery
d) Conducting emissions testing

4) Rear view mirrors in a vehicle are mainly intended to _____.
a) Improve vehicle aesthetics
b) Reduce aerodynamic drag
c) Provide visibility of rear traffic
d) Support lane changing sensors

5) External projections on vehicles are regulated to _____.
   a) Increase vehicle styling options
   b) Improve crashworthiness
   c) Prevent injury to pedestrians
   d) Reduce vehicle weight

6) What is running resistance of the vehicle?
   a) Rolling resistance
   b) Aerodynamic resistance
   c) Sum of rolling and aerodynamic resistance
   d) Traction force

7) The skidding of vehicles, while sudden brakes are applied, is avoided through _____.
   a) antilock braking system
   b) engine management system
   c) automatic car parking system
   d) driving system

8) What is the primary purpose of a demist test in a vehicle?
   a) To evaluate the vehicle's audio system
   b) To assess the effectiveness of the demisting system in clearing condensation and fog from the windshield
   c) To measure the vehicle's fuel efficiency
   d) To check the tire pressure

9) Fuel tank testing for metallic and plastic tanks ensures _____.
   a) Improved fuel quality
   b) Resistance to leakage, impact, and pressure
   c) Attractive design
   d) Reduced fuel cost

10) Toughened safety glass differs from laminated glass because it _____.
   a) Does not break at all
   b) Breaks into small, blunt pieces
   c) Cracks but remains intact
   d) Is used only in windscreens

11) Safety belt assemblies are tested primarily for _____.
   a) Color and texture
   b) Tensile strength and locking performance
   c) Weight reduction
   d) Comfort level

12) Safety requirements of traction batteries mainly focus on _____.
a) Battery color
b) Electrical, thermal, and mechanical safety
c) Weight reduction
d) Cost effectiveness

13) Hybrid Electric Vehicles (HEVs) in M and N category are primarily tested for _____.
a) Aesthetic design
b) Structural strength only
c) Emission, safety and electrical performance
d) Color and body finish

14) Electric propulsion kits used for vehicle conversion must comply with _____.
a) Building codes
b) Vehicle safety and electrical standards
c) Telecom standards
d) Consumer electronics rules

Instructions: 1) Q. No. 1 is compulsory. It should be solved in the first 30 minutes in Answer Book Page no 03 (Starting page of the Answer Book). Each question carries one mark.
2) Don't forget to Mention question paper set (P/Q/R/S) on top of page.
3) Figures to the right indicates full marks.
4) Assume suitable data if required.

MCQ/Objective Type Questions

Duration: 30 Minutes Marks:14

Q.1 Choose the correct Answer. **14**

1) Safety belt assemblies are tested primarily for _____.
a) Color and texture
b) Tensile strength and locking performance
c) Weight reduction
d) Comfort level

2) Safety requirements of traction batteries mainly focus on _____.
a) Battery color
b) Electrical, thermal, and mechanical safety
c) Weight reduction
d) Cost effectiveness

3) Hybrid Electric Vehicles (HEVs) in M and N category are primarily tested for _____.
a) Aesthetic design
b) Structural strength only
c) Emission, safety and electrical performance
d) Color and body finish

4) Electric propulsion kits used for vehicle conversion must comply with _____.
a) Building codes
b) Vehicle safety and electrical standards
c) Telecom standards
d) Consumer electronics rules

5) Vehicles having at least four wheels and used for the carriage of passengers, this category of vehicle is _____.

a) L b) M
c) N d) O

6) What is vehicle homologation?

a) The process of vehicle design
b) The process of certifying a vehicle's compliance with regulations and standards
c) The process of manufacturing a vehicle
d) The process of selling a vehicle

7) What is the primary purpose of Hardware-in-the-Loop (HiL) testing in the context of EVs and HEVs?

a) Testing physical hardware components of vehicles
b) Simulating vehicle behavior in a virtual environment
c) Charging the vehicle's battery
d) Conducting emissions testing

8) Rear view mirrors in a vehicle are mainly intended to _____.

a) Improve vehicle aesthetics
b) Reduce aerodynamic drag
c) Provide visibility of rear traffic
d) Support lane changing sensors

9) External projections on vehicles are regulated to _____.

a) Increase vehicle styling options
b) Improve crashworthiness
c) Prevent injury to pedestrians
d) Reduce vehicle weight

10) What is running resistance of the vehicle?

a) Rolling resistance
b) Aerodynamic resistance
c) Sum of rolling and aerodynamic resistance
d) Traction force

11) The skidding of vehicles, while sudden brakes are applied, is avoided through _____.

a) antilock braking system
b) engine management system
c) automatic car parking system
d) driving system

12) What is the primary purpose of a demist test in a vehicle?
a) To evaluate the vehicle's audio system
b) To assess the effectiveness of the demisting system in clearing condensation and fog from the windshield
c) To measure the vehicle's fuel efficiency
d) To check the tire pressure

13) Fuel tank testing for metallic and plastic tanks ensures _____.
a) Improved fuel quality
b) Resistance to leakage, impact, and pressure
c) Attractive design
d) Reduced fuel cost

14) Toughened safety glass differs from laminated glass because it _____.
a) Does not break at all
b) Breaks into small, blunt pieces
c) Cracks but remains intact
d) Is used only in windscreens

Seat No.	

Set **R**

T.Y. (B.Tech.) (Electrical Engineering) (Semester - II) (New) (CBCS)
Examination: March/April – 2026
Honors in Electrical Vehicle
Testing and Certification of Electric and Hybrid Vehicles (EEHn-04A)

Day & Date: Wednesday, 27-05-2026 Max. Marks: 56
Time: 10:00 AM To 01:00 PM

Instructions: 1) All questions are compulsory.
2) Figures to the right indicate full marks.
3) Assume suitable data if necessary.

Section – I

Q.2 Solve the following. (Any Four) **16**

a) Define homologation. Explain the Process of Vehicle Homologation in India.

b) Explain M, N, and O layouts of vehicle classification.

c) Describe rear view mirror installation process.

d) Describe the electric vehicle safety norms in-detail.

e) Explain the Hood Latch test of vehicle.

f) Describe dynamic testing of vehicle. Explain the factors affecting dynamic testing.

Q.3 Solve the following. (Any Two) **12**

a) Explain following regulations of vehicle in detail:
i) Automotive Industry Standards (AIS)
ii) Central Motor Vehicles Rules (CMVR)

b) Explain the arrangement of foot controls for M1 type vehicle.

c) Describe requirements of brake performance with anti-lock braking system.

Section – II

Q.4 Solve the following. (Any Four) **16**

a) Describe the horn testing process.

b) Describe tire & wheel rim test of vehicle.

c) Explain crash test with dummies.

d) Discuss accelerator control system test of vehicle.

e) State and explain hybrid electric vehicles tests (M and N category).

f) Explain tests for Hybrid Electric System Intended for Retro-fitment on Vehicles of M and N Category (GVW < 3500 kg).

Q.5 Solve the following. (Any Two) **12**

a) Discuss about the various interior fittings of a vehicle and its testing.

b) Explain Seat anchorages & head restraints test of vehicle.

c) Describe the requirements of Electric Vehicle Conductive AC charging system.

MCQ/Objective Type Questions

Duration: 30 Minutes Marks:14

Q.1 Choose the correct alternatives from the options and rewrite the sentence. **14**

1) Multi stepped core is used in a transformer to _____.
a) increase output b) increase efficiency
c) decrease cost of copper d) All of the above

2) The value of specific electric loading of induction motor is in the range of _____.
a) 40 to 400 amps. Cond./m
b) 400 to 4000 amp. Cond./m
c) 5000 to 45000 amp. Cond./m
d) 30000 to 100,000 amp. Cond./m

3) With what component is the output equation of DC machines related to?
a) Power b) Voltage
c) Current d) Losses

4) What can be found out using the output equation of the DC machine?
a) Main dimensions b) Angle of rotation
c) Losses d) Efficiency

5) What are the components of the main dimensions of output equation of DC machine?
a) Diameter b) Length
c) Diameter and Length d) Pole Pitch

6) What is the range of frequency during the selection of number of poles?
a) 20−50 Hz b) 25−40 Hz
c) 25−50 Hz d) >50 Hz

7) What is the ratio of the net core area to the area of the circumscribing circle in square cores?
a) 0.58 b) 0.64
c) 0.70 d) 0.80

8) Which type of core construction uses more iron in construction?
a) Core type b) Shell type
c) Both a & b d) None of the above

9) Which is not limitation on electrical machine Design?
a) Saturation b) Current Density
c) Temperature d) None of the Above

10) Which is Major Consideration in electrical machine design?
a) Saturation b) Temperature
c) Insulation d) All of the above

11) Which is not a design problem of electrical machines?
a) Electromagnetic design b) Dielectric design
c) Thermal Design d) None of the above

12) The ratio of effective iron (Core) area to overall iron (Core) area is usually _____.
a) less than 1.0 b) greater than 1.0
c) equal to 1.0 d) None of the above

13) In the design of I.M. to incorporate the design feature of good power factor what should be the ratio of core length to pole pitch?
a) 1.5 to 2.0 b) 1.3−1.8
c) 1.0−1.25 d) 1.1−1.6

14) The area of circumscribing circle is more effectively utilized by _____.
a) decreasing the number of steps
b) rectangular core
c) increasing the number of steps
d) None of the above

Seat No.

Electrical Machine Design (BTN07601)

Day & Date: Friday, 15-05-2026 Max. Marks: 56
Time: 10:00 AM To 01:00 PM

Instructions: 1) All Questions are compulsory.
2) Figures to the right indicates full marks.

Section – I

Q.2 Attempt Any Four. **16**

a) What are the electrical machine design limitations? Explain it in brief.

b) For square core transformer show that Ai = 0.45d^2

c) Explain in brief various factors normally consider in the design of electrical machine.

d) In case transformer, show that $Et = K\sqrt{Q}$ where, $Et = emf$ per turn, $Q = KVA$ rating of transformer, State what are the factors on which value of K depends?

e) Determine the dimension of core and yoke for a 200 kVA, 50 Hz, 1 phase core type transformer. A cruciform core is used with distance between adjacent limbs equal to 1.6 times the width of core lamination. Assume voltage per turn 14 V, maximum flux density 1.1 Wb/m^2, window space factor = 0.32, current density 3A/mm^2 and stacking factor = 0.9. The net iron area is 0.56 d^2 in a cruciform core where 'd' is the diameter of circumscribing circle. Also, the width of largest stamping is 0.85 d.

Q.3 Attempt Any Two. **12**

a) Design an adequate cooling arrangement for a 1250 KVA 6600/400 V, 50 Hz, 3 phase Delta/Star, oil immersed natural cool transformer with following data:
i) Winding temperature not to exceed 40 degrees centigrade
ii) Total loss at full load is 13.1 Kw.
iii) Tank dimensions, length × width × height = (0.65×1.55×1.85) m
sketch the diagram to shows the tube arrangement.

b) Determine the dimension of core and yoke for a 200 KVA, 50Hz, 1 phase core type transformer, a cruciform core is used with distance between adjacent limbs equal to 1.6 times the width of core lamination. Assume voltage per turn 14 V, maximum flux density 1.1 Wb/m^2, window space factor = 0.32, current density 3A/mm^2 and stacking factor = 0.9. The net iron area is 0.56 d^2 where 'd' is the diameter of circumscribing circle. Also, the width of largest stamping is 0.85 d.

c) Find the suitable values diameter and length armature of the core for 200Kw, 250V, 6 pole, 1000 r.p.m., D.C. generator having 91% efficiency. Assume an average flux density in the air of about 0.87 Wb/m^2 and amp. Cond. Per meter to be 31000. The ratio of core length to pole pitch is 0.75. and the ratio of pole arc to pole pitch is 0.67.

Section – II

Q.4 Attempt Any Four. **16**

a) Discuss the effect of air gap length of 3-ph induction motor on following factor.

i) Power factor
ii) Overload capacity
iii) Pulsation loss and noise
iv) Unbalanced magnetic pull

b) Discuss the choice of specific electric loading and specific magnetic loading of Induction machine.

c) Calculate the length of air gap of a 15 kW, 400 V, 50 Hz, delta connected 1440 r.p.m., induction motor having both full load efficiency and power factor as 0.88 each. Assume Bav 0.45 Tesla, ac = 23000 amp. Cond. Per meter, ratio of pole arc to pole pitch = 0.85.

d) Determine the D and L of a 70 HP, 415V. 3 phase 50Hz star connected, 6 pole induction motor for which ac = 30,000 amp. lond / m and Bav = 0.51 Wb/m2. Take n = 90% and p.f = 0.91. Assume T = L. Estimate the number of stator conductors required for a winding in which the conductors are connected in 2 parallel paths. Choose a suitable number of conductors per slot, so that the slot loading does not exceed 750 amp. conductors.

e) Explain the separation of D & L for Synchronous Machine.

Q.5 Attempt Any Two. **12**

a) A 11 KW 3Phase, 6 Pole 50Hz, 220VStar Connected Induction Motor has 54 slots each containing 9 conductors calculate bar and end current. If the no. of rotor bars is 64, if the machine has efficiency of 0.85, the rotor mmf is assumed as 85 percent of stator mmf, also find, bar and end ring cross section if the current density of 5 A/mm^2

b) Find the main dimensions of a 100 MVA, 11 KV, 50 Hz, 40 pole salient pole generator. Assume specific magnetic loading 0.65 Wb/m^2 specific electric loading 40000 Ac/m. the peripheral speed should not exceed 60 m/s.

c) Derive the output equation of Synchronous machine. Also state output coefficient, state factors affecting on size of Synchronous machine.

c) increasing the number of steps
d) None of the above

5) Multi stepped core is used in a transformer to _____.
a) increase output b) increase efficiency
c) decrease cost of copper d) All of the above

6) The value of specific electric loading of induction motor is in the range of _____.
a) 40 to 400 amps. Cond./m
b) 400 to 4000 amp. Cond./m
c) 5000 to 45000 amp. Cond./m
d) 30000 to 100,000 amp. Cond./m

7) With what component is the output equation of DC machines related to?
a) Power b) Voltage
c) Current d) Losses

8) What can be found out using the output equation of the DC machine?
a) Main dimensions b) Angle of rotation
c) Losses d) Efficiency

9) What are the components of the main dimensions of output equation of DC machine?
a) Diameter b) Length
c) Diameter and Length d) Pole Pitch

10) What is the range of frequency during the selection of number of poles?
a) 20−50 Hz b) 25−40 Hz
c) 25−50 Hz d) >50 Hz

11) What is the ratio of the net core area to the area of the circumscribing circle in square cores?
a) 0.58 b) 0.64
c) 0.70 d) 0.80

12) Which type of core construction uses more iron in construction?
a) Core type b) Shell type
c) Both a & b d) None of the above

13) Which is not limitation on electrical machine Design?
a) Saturation b) Current Density
c) Temperature d) None of the Above

14) Which is Major Consideration in electrical machine design?
a) Saturation b) Temperature
c) Insulation d) All of the above

Set **R**

T. Y. (B.Tech.) (Electrical Engineering) (Semester - II) (New/Old) (CBCS) Examination: March/April – 2026
Electrical Machine Design (BTN07601)

Day & Date: Friday, 15-05-2026 Max. Marks: 56
Time: 10:00 AM To 01:00 PM

Instructions: 1) All Questions are compulsory.
2) Figures to the right indicates full marks.

Section – I

Q.2 Attempt Any Four. **16**

a) What are the electrical machine design limitations? Explain it in brief.

b) For square core transformer show that Ai = 0.45d^2

c) Explain in brief various factors normally consider in the design of electrical machine.

d) In case transformer, show that $Et = K\sqrt{Q}$ where, $Et = emf$ per turn, $Q = KVA$ rating of transformer, State what are the factors on which value of K depends?

e) Determine the dimension of core and yoke for a 200 kVA, 50 Hz, 1 phase core type transformer. A cruciform core is used with distance between adjacent limbs equal to 1.6 times the width of core lamination. Assume voltage per turn 14 V, maximum flux density 1.1 Wb/m^2, window space factor = 0.32, current density 3A/mm^2 and stacking factor = 0.9. The net iron area is 0.56 d^2 in a cruciform core where 'd' is the diameter of circumscribing circle. Also, the width of largest stamping is 0.85 d.

Q.3 Attempt Any Two. **12**

a) Design an adequate cooling arrangement for a 1250 KVA 6600/400 V, 50 Hz, 3 phase Delta/Star, oil immersed natural cool transformer with following data:
i) Winding temperature not to exceed 40 degrees centigrade
ii) Total loss at full load is 13.1 Kw.
iii) Tank dimensions, length × width × height = (0.65×1.55×1.85) m
sketch the diagram to shows the tube arrangement.

b) Determine the dimension of core and yoke for a 200 KVA, 50Hz, 1 phase core type transformer, a cruciform core is used with distance between adjacent limbs equal to 1.6 times the width of core lamination. Assume voltage per turn 14 V, maximum flux density 1.1 Wb/m^2, window space factor = 0.32, current density 3A/mm^2 and stacking factor = 0.9. The net iron area is 0.56 d^2 where 'd' is the diameter of circumscribing circle. Also, the width of largest stamping is 0.85 d.

c) Find the suitable values diameter and length armature of the core for 200Kw, 250V, 6 pole, 1000 r.p.m., D.C. generator having 91% efficiency. Assume an average flux density in the air of about 0.87 Wb/m^2 and amp. Cond. Per meter to be 31000. The ratio of core length to pole pitch is 0.75. and the ratio of pole arc to pole pitch is 0.67.

Section – II

Q.4 Attempt Any Four. **16**

a) Discuss the effect of air gap length of 3-ph induction motor on following factor.

i) Power factor
ii) Overload capacity
iii) Pulsation loss and noise
iv) Unbalanced magnetic pull

b) Discuss the choice of specific electric loading and specific magnetic loading of Induction machine.

c) Calculate the length of air gap of a 15 kW, 400 V, 50 Hz, delta connected 1440 r.p.m., induction motor having both full load efficiency and power factor as 0.88 each. Assume Bav 0.45 Tesla, ac = 23000 amp. Cond. Per meter, ratio of pole arc to pole pitch = 0.85.

d) Determine the D and L of a 70 HP, 415V. 3 phase 50Hz star connected, 6 pole induction motor for which ac = 30,000 amp. lond / m and Bav = 0.51 Wb/m2. Take n = 90% and p.f = 0.91. Assume T = L. Estimate the number of stator conductors required for a winding in which the conductors are connected in 2 parallel paths. Choose a suitable number of conductors per slot, so that the slot loading does not exceed 750 amp. conductors.

e) Explain the separation of D & L for Synchronous Machine.

Q.5 Attempt Any Two. **12**

a) A 11 KW 3Phase, 6 Pole 50Hz, 220VStar Connected Induction Motor has 54 slots each containing 9 conductors calculate bar and end current. If the no. of rotor bars is 64, if the machine has efficiency of 0.85, the rotor mmf is assumed as 85 percent of stator mmf, also find, bar and end ring cross section if the current density of 5 A/mm^2

b) Find the main dimensions of a 100 MVA, 11 KV, 50 Hz, 40 pole salient pole generator. Assume specific magnetic loading 0.65 Wb/m^2 specific electric loading 40000 Ac/m. the peripheral speed should not exceed 60 m/s.

c) Derive the output equation of Synchronous machine. Also state output coefficient, state factors affecting on size of Synchronous machine.

T. Y. (B.Tech.) (Electrical Engineering) (Semester - II) (New/Old) (CBCS) Examination: March/April – 2026
Electrical Machine Design (BTN07601)

Day & Date: Friday, 15-05-2026 Max. Marks: 70
Time: 10:00 AM To 01:00 PM

Instructions: 1) Q. No. 1 is compulsory. It should be solved in the first 30 minutes in Answer Book Page no 03 (Starting page of the Answer Book). Each question carries one mark.
2) Don't forget to Mention question paper set (P/Q/R/S) on top of page.
3) Figures to the right indicates full marks.
4) Make suitable assumptions if necessary and state them clearly.

MCQ/Objective Type Questions

Duration: 30 Minutes Marks:14

Q.1 Choose the correct alternatives from the options and rewrite the sentence. **14**

1) What is the range of frequency during the selection of number of poles?
a) 20−50 Hz b) 25−40 Hz
c) 25−50 Hz d) >50 Hz

2) What is the ratio of the net core area to the area of the circumscribing circle in square cores?
a) 0.58 b) 0.64
c) 0.70 d) 0.80

3) Which type of core construction uses more iron in construction?
a) Core type b) Shell type
c) Both a & b d) None of the above

4) Which is not limitation on electrical machine Design?
a) Saturation b) Current Density
c) Temperature d) None of the Above

5) Which is Major Consideration in electrical machine design?
a) Saturation b) Temperature
c) Insulation d) All of the above

6) Which is not a design problem of electrical machines?
a) Electromagnetic design b) Dielectric design
c) Thermal Design d) None of the above

7) The ratio of effective iron (Core) area to overall iron (Core) area is usually _____.

a) less than 1.0 b) greater than 1.0
c) equal to 1.0 d) None of the above

8) In the design of I.M. to incorporate the design feature of good power factor what should be the ratio of core length to pole pitch?

a) 1.5 to 2.0 b) 1.3−1.8
c) 1.0−1.25 d) 1.1−1.6

9) The area of circumscribing circle is more effectively utilized by _____.

a) decreasing the number of steps
b) rectangular core
c) increasing the number of steps
d) None of the above

10) Multi stepped core is used in a transformer to _____.

a) increase output b) increase efficiency
c) decrease cost of copper d) All of the above

11) The value of specific electric loading of induction motor is in the range of _____.

a) 40 to 400 amps. Cond./m
b) 400 to 4000 amp. Cond./m
c) 5000 to 45000 amp. Cond./m
d) 30000 to 100,000 amp. Cond./m

12) With what component is the output equation of DC machines related to?

a) Power b) Voltage
c) Current d) Losses

13) What can be found out using the output equation of the DC machine?

a) Main dimensions b) Angle of rotation
c) Losses d) Efficiency

14) What are the components of the main dimensions of output equation of DC machine?

a) Diameter b) Length
c) Diameter and Length d) Pole Pitch

Q.2 Attempt Any Four. **16**

a) What are the electrical machine design limitations? Explain it in brief.

b) For square core transformer show that Ai = 0.45d^2

c) Explain in brief various factors normally consider in the design of electrical machine.

d) In case transformer, show that $Et = K\sqrt{Q}$ where, $Et = emf$ per turn, $Q = KVA$ rating of transformer, State what are the factors on which value of K depends?

e) Determine the dimension of core and yoke for a 200 kVA, 50 Hz, 1 phase core type transformer. A cruciform core is used with distance between adjacent limbs equal to 1.6 times the width of core lamination. Assume voltage per turn 14 V, maximum flux density 1.1 Wb/m^2, window space factor = 0.32, current density 3A/mm^2 and stacking factor = 0.9. The net iron area is 0.56 d^2 in a cruciform core where 'd' is the diameter of circumscribing circle. Also, the width of largest stamping is 0.85 d.

Q.3 Attempt Any Two. **12**

a) Design an adequate cooling arrangement for a 1250 KVA 6600/400 V, 50 Hz, 3 phase Delta/Star, oil immersed natural cool transformer with following data:
i) Winding temperature not to exceed 40 degrees centigrade
ii) Total loss at full load is 13.1 Kw.
iii) Tank dimensions, length × width × height = (0.65×1.55×1.85) m
sketch the diagram to shows the tube arrangement.

b) Determine the dimension of core and yoke for a 200 KVA, 50Hz, 1 phase core type transformer, a cruciform core is used with distance between adjacent limbs equal to 1.6 times the width of core lamination. Assume voltage per turn 14 V, maximum flux density 1.1 Wb/m^2, window space factor = 0.32, current density 3A/mm^2 and stacking factor = 0.9. The net iron area is 0.56 d^2 where 'd' is the diameter of circumscribing circle. Also, the width of largest stamping is 0.85 d.

c) Find the suitable values diameter and length armature of the core for 200Kw, 250V, 6 pole, 1000 r.p.m., D.C. generator having 91% efficiency. Assume an average flux density in the air of about 0.87 Wb/m^2 and amp. Cond. Per meter to be 31000. The ratio of core length to pole pitch is 0.75. and the ratio of pole arc to pole pitch is 0.67.

Section – II

Q.4 Attempt Any Four. **16**

a) Discuss the effect of air gap length of 3-ph induction motor on following factor.

i) Power factor
ii) Overload capacity
iii) Pulsation loss and noise
iv) Unbalanced magnetic pull

b) Discuss the choice of specific electric loading and specific magnetic loading of Induction machine.

c) Calculate the length of air gap of a 15 kW, 400 V, 50 Hz, delta connected 1440 r.p.m., induction motor having both full load efficiency and power factor as 0.88 each. Assume Bav 0.45 Tesla, ac = 23000 amp. Cond. Per meter, ratio of pole arc to pole pitch = 0.85.

d) Determine the D and L of a 70 HP, 415V. 3 phase 50Hz star connected, 6 pole induction motor for which ac = 30,000 amp. lond / m and Bav = 0.51 Wb/m2. Take n = 90% and p.f = 0.91. Assume T = L. Estimate the number of stator conductors required for a winding in which the conductors are connected in 2 parallel paths. Choose a suitable number of conductors per slot, so that the slot loading does not exceed 750 amp. conductors.

e) Explain the separation of D & L for Synchronous Machine.

Q.5 Attempt Any Two. **12**

a) A 11 KW 3Phase, 6 Pole 50Hz, 220VStar Connected Induction Motor has 54 slots each containing 9 conductors calculate bar and end current. If the no. of rotor bars is 64, if the machine has efficiency of 0.85, the rotor mmf is assumed as 85 percent of stator mmf, also find, bar and end ring cross section if the current density of 5 A/mm^2

b) Find the main dimensions of a 100 MVA, 11 KV, 50 Hz, 40 pole salient pole generator. Assume specific magnetic loading 0.65 Wb/m^2 specific electric loading 40000 Ac/m. the peripheral speed should not exceed 60 m/s.

c) Derive the output equation of Synchronous machine. Also state output coefficient, state factors affecting on size of Synchronous machine.

MCQ/Objective Type Questions

Duration: 30 Minutes Marks:14

Q.1 Give the correct option for the following questions. 14

1) Overload capacity of diesel engines is usually restricted to _____.
a) 1% b) 10%
c) 25% d) 50%

2) Power supply frequency for 25 kV single phase system is _____.
a) 161 b) 25
c) 50 d) 60

3) The coefficient of adhesion is highest when _____.
a) The rails are dry b) The rails are oiled
c) The rails ark wet with dew d) The rails are dusty

4) Method of speed control used on 25 kV, 50 Hz single phase traction is _____.
a) Tap changing control of transformer
b) Reduced current method
c) Series parallel operation of motors
d) Any of the above

5) Quadrilateral speed-time curve is the closer approximation for _____.
a) Main line service b) Suburban service
c) Urban service d) Urban and suburban

6) Which motor has relatively wider range of speed control?
a) D.C. shunt motor b) Synchronous motor
c) Slip ring I.M. d) Squirrel cage I.M.

7) Heating of non-conducting materials can be done by _____.
a) Arc heating
b) Induction heating
c) Dielectric heating
d) Resistance heating

8) The welding transformer used in resistance welding will _____.
a) Step up current
b) Step down current
c) Step up voltage
d) Step up power

9) In case of induction heating, which of the following parameter is of high value?
a) Frequency
b) Current
c) Voltage
d) Capacitance

10) For arc heating, the electrodes are made of _____.
a) Copper
b) Aluminum
c) Graphite
d) ACSR conductor

11) One lumen per square meter is the same as _____.
a) One lux
b) One candela
c) One foot candle
d) One lumen meter

12) Which of the following lamp gives nearly monochromatic light?
a) Sodium vapor lamp
b) GLS lamp
c) Tube light
d) Mercury vapor lamp

13) Which of the following is an example of Renewable Energy source?
a) Coal
b) Petrol
c) LPG
d) Wind

14) Which type of energy is used by wind turbines to make electricity?
a) Potential energy
b) Chemical energy
c) Kinetic energy
d) Geothermal energy

Time: 10:00 AM To 01:00 PM

Instructions: 1) Q. No. 1 is compulsory. It should be solved in the first 30 in Answer Book Page no 03 (Starting page of the Answer Book). Each question carries one mark.
2) Don't forget to Mention question paper set (P/Q/R/S) on top of page.
3) Figures to the right indicates full marks.

MCQ/Objective Type Questions

Duration: 30 Minutes Marks:14

Q.1 Give the correct option for the following questions. 14

1) Which motor has relatively wider range of speed control?
a) D.C. shunt motor b) Synchronous motor
c) Slip ring I.M. d) Squirrel cage I.M.

2) Heating of non-conducting materials can be done by _____.
a) Arc heating b) Induction heating
c) Dielectric heating d) Resistance heating

3) The welding transformer used in resistance welding will _____.
a) Step up current b) Step down current
c) Step up voltage d) Step up power

4) In case of induction heating, which of the following parameter is of high value?
a) Frequency b) Current
c) Voltage d) Capacitance

5) For arc heating, the electrodes are made of _____.
a) Copper b) Aluminum
c) Graphite d) ACSR conductor

6) One lumen per square meter is the same as _____.
a) One lux b) One candela
c) One foot candle d) One lumen meter

7) Which of the following lamp gives nearly monochromatic light?
a) Sodium vapor lamp b) GLS lamp
c) Tube light d) Mercury vapor lamp

8) Which of the following is an example of Renewable Energy source?
a) Coal b) Petrol
c) LPG d) Wind

9) Which type of energy is used by wind turbines to make electricity?
a) Potential energy b) Chemical energy
c) Kinetic energy d) Geothermal energy

10) Overload capacity of diesel engines is usually restricted to _____.
a) 1% b) 10%
c) 25% d) 50%

11) Power supply frequency for 25 kV single phase system is _____.
a) 161 b) 25
c) 50 d) 60

12) The coefficient of adhesion is highest when _____.
a) The rails are dry b) The rails are oiled
c) The rails ark wet with dew d) The rails are dusty

13) Method of speed control used on 25 kV, 50 Hz single phase traction is _____.
a) Tap changing control of transformer
b) Reduced current method
c) Series parallel operation of motors
d) Any of the above

14) Quadrilateral speed-time curve is the closer approximation for _____.
a) Main line service b) Suburban service
c) Urban service d) Urban and suburban

Electrical Utilization (BTN07602)

Day & Date: Monday, 18-05-2026 Max. Marks: 56
Time: 10:00 AM To 01:00 PM

Instructions: 1) All Questions are compulsory.
2) Figures to the right indicates full marks.

SECTION – I

Q.2 Solve Any Four. **16**

a) Define dead weight, accelerating weight and adhesive weight.

b) Desirable characteristic of traction motors.

c) Explain shunt and bridge transition, electrical breaking system.

d) Write short note on motor selection in Cranes and Lifts.

e) Write short note on metro system.

Q.3 Solve Any Two. **12**

a) Derive an expression for quadrilateral speed time curve.

b) Explain control equipment and auxiliary equipment in traction system.

c) Write note on motor selection in textile industries.

SECTION – II

Q.4 Solve Any Four. **16**

a) Explain factors to be considered for design of illumination scheme.

b) State advantages and disadvantages electrical heating.

c) Describe with the help of a neat diagram the construction and working of a high-pressure Sodium vapour lamp.

d) Explain the basic principles of light control.

e) Explain the principles of Energy Conservation.

Q.5 Solve Any Two. **12**

a) Explain Energy Conservation in Transport and Agriculture.

b) Explain Energy Conservation in Industries.

c) Explain resistance welding and its types.

MCQ/Objective Type Questions

Duration: 30 Minutes Marks:14

Q.1 Choose the correct alternatives from the options and rewrite the sentence. **14**

1) The minimum current below which SCR can turn off is called _____.
a) Trigger current b) Holding current
c) Junction current d) Break over current

2) Power electronics converters used to _____.
a) Control the speed b) Control the power
c) Control the current d) None

3) The output voltage of AC voltage regulators can be _____.
a) Variable b) Constant
c) Either of a) or b) d) None of these

4) The load voltage of a chopper can be controlled by varying the ____.
a) Duty cycle b) Firing angle
c) Reactor position d) Extinction angle

5) The angle at which SCR turns on is called _____.
a) On angle b) Conduction angle
c) Firing angle d) Extinction angle

6) Single-phase half-bridge inverters require _____.
a) Two-wire ac supply b) Two wire dc supply
c) Three-wire ac supply d) Three-wire dc supply

7) In a single-phase half-wave thyristor circuit with R load & Vs=Vmsinωt, the maximum value of the load current can be given by _____.
a) Vm/R b) Vs/R
c) Vm/2 d) Vs/2

8) In BLDC Motors the Hall effect sensor is used _____.
a) As rotor Voltage sensor b) As rotor position sensor
c) As rotor current sensor d) All of the above

9) Type E Chopper is used for obtaining which type of operating mode?
a) Reverse motoring mode b) Motoring Mode
c) Reverse regenerative mode d) None of these

10) In the multi-quadrant operation of a hoist, Reverse motoring is at _____ quadrant.
a) First b) Second
c) Third d) Four

11) Electrical Drives includes _____.
a) Power Electronics b) Electrical Machines
c) Control Systems d) All of the above

12) Construction of Brushless DC Motor is exactly similar to the _____.
a) Conventional DC motor
b) Trapezoidal Permanent Magnet A C motor
c) Permanent magnet synchronous motor
d) Totally different construction

13) _____ duty cycle consists of frequent on-load and off-load periods.
a) Continuous Duty with constant Load
b) Continuous Duty with Variable Load
c) Short Time duty
d) Intermittent duty

14) An elevator drive is required to operate in _____.
a) One quadrant only b) Two quadrant
c) Three quadrant d) Four quadrant

Power Electronics & Industrial Drives (BTN07603)

Day & Date: Wednesday, 20-05-2026 Max. Marks: 56
Time: 10:00 AM To 01:00 PM

Instructions: 1) All Questions are compulsory.
2) Figures to the right indicates full marks.
3) Draw neat diagrams whenever necessary.

SECTION – I

Q.2 Attempt the following. (Any Four) **16**

a) Describe in details turn on methods of SCR.

b) Draw and explain single phase half wave-controlled rectifier with 'RL' load with proper wave form.

c) Draw the static V-I characteristics of SCR. Explain effect of gate current on anode current.

d) Draw and explain step down chopper with proper wave form?

e) What are the types of AC controllers? Explain the phase angle control regulator.

f) A single phase fully controlled converter connected a resistive load of 12 ohm, has an average output voltage of 220 volts at firing angle of 0 deg. Calculate the average output voltage and average output current at a firing angle of 30 deg.

Q.3 Attempt the following. (Any Two) **12**

a) Draw and explain three phases fully controlled rectifier with R Load with proper waveform.

b) Draw and explain three-phase bridge inverters with R Load with 120 conduction modes.

c) Draw and explain buck/boost regulator with waveform

SECTION – II

Q.4 Attempt the following. (Any Four) **16**

a) Write the comparison between AC Drives and DC Drives.

b) Draw the block diagram of the Electrical Drive system and explain each block.

c) Write factors on which the choice of electric drive depends.

d) Explain different types of torques in drives

e) Explain the chopper-fed DC separately excited motor in motoring mode.

f) With neat diagram explains the stator voltage control of an induction motor.

Q.5 Attempt the following. (Any Two) **12**

a) With the help of a neat sketch, explain multi-quadrant operation chopper-controlled dc drives.

b) With a neat sketch explain the VSI feed induction motor drive also draw a block diagram for closed-loop control.

c) With neat sketch & waveform explain single phase fully controlled rectifier fed separately excited D.C. motor drive

MCQ/Objective Type Questions

Duration: 30 Minutes Marks:14

Q.1 Choose the correct answer. **14**

1) The transfer function is $\frac{1+0.5s}{1+s}$. It represents a _____.

a) lead network b) lag network
c) lag-lead network d) proportional controller

2) A lead compensator improves primarily _____.

a) Steady-state accuracy b) Stability
c) Transient response d) Low-frequency gain

3) For a lag compensator network, the pole lies _____.

a) Left of zero b) Right of zero
c) At zero d) None

4) In state-space analysis, state vector represents _____.

a) Output variables b) Input variables
c) Energy storage variables d) Control inputs

5) A state model of a system is given by $\dot{x} = \begin{bmatrix} 0 & 1 \\ -2 & -3 \end{bmatrix}\begin{bmatrix} x_1 \\ x_2 \end{bmatrix} + \begin{bmatrix} 0 \\ 1 \end{bmatrix} u(t), Y = [1 \quad 0]x$. The Transfer function G(s) is _____.

a) $\frac{1}{s^2+3s+2}$ b) $\frac{s+3}{s^2+2s+1}$
c) $\frac{s+1}{s^2+3s+2}$ d) $\frac{1}{s+2}$

6) If the characteristic equation of matrix A is $s^3 + 5s^2 + 6s + 4 = 0$ then eigenvalues correspond to _____.

a) Zeros of transfer function
b) System poles
c) Zeros of A matrix
d) Gain constants

7) A system is completely controllable if _____.

a) det(Controllability matrix) = 0
b) Rank = n
c) Eigenvalues are positive
d) A matrix is diagonalizable

8) The eigen values of the matrix (A-BK) are called _____.

a) open loop poles
b) open loop zeros
c) regulator poles
d) None of these

9) The Ackermann's formula is used for finding _____.

a) Observability
b) Controllability
c) Feedback gain matrix
d) State vector

10) In state feedback control, state variable feedback affects _____.

a) Only output response
b) Pole locations of system
c) Input gain
d) Error constant

11) The describing function method is applied for _____.

a) Linear continuous systems
b) Nonlinear systems under sinusoidal input
c) Time-varying systems
d) Digital systems

12) The most common physical nonlinearity in control systems is _____.

a) Friction
b) Dead zone
c) Relay
d) All of these

13) For a discrete system to be stable, poles of F(z) should lie _____.

a) Inside the unit circle
b) On real axis
c) Outside unit circle
d) On imaginary axis

14) The transfer function of zero order hold is _____.

a) $1 - e^{Ts}$
b) $1 - e^{-Ts}$
c) $\frac{1 - e^{Ts}}{s}$
d) $\frac{1 - e^{-Ts}}{s}$

Day & Date: Friday, 22-05-2026 Max. Marks: 56
Time: 10:00 AM To 01:00 PM

Instructions: 1) All Questions are compulsory.
2) Figures to the right indicates full marks.
3) Draw neat diagrams whenever necessary
4) Assumes suitable data if necessary.

SECTION – I

Q.2 Attempt the following. (Any Four) **16**

a) Derive the realization of lag compensator circuit using passive network.

b) Explain the procedure to design lead compensator using bode plot technique.

c) Explain the procedure to design lag-lead compensator using root locus method.

d) A feedback system is having the closed loop transfer function $T(s) = \frac{s^2+3s+3}{s^3+2s^2+3s+1}$ Construct a state model for the system.

e) Find the State transition matrix $\phi(t)$ using Laplace Transform method.

$$\begin{bmatrix} \dot{x}_1 \\ \dot{x}_2 \end{bmatrix} = \begin{bmatrix} 0 & -3 \\ 1 & -4 \end{bmatrix} \begin{bmatrix} x_1 \\ x_2 \end{bmatrix}$$

Q.3 Attempt the following. **12**

a) The forward path TF of a unity feedback control system is given by $G(s) = \frac{k}{s(s+2)(s+8)}$. Design a suitable lag compensator so that the system meets the following specifications.
i) Percentage overshoot $\leq 16\%$ for unit step input,
ii) steady state error ≤ 0.125 for unit ramp input

b) Design a lead compensator for a unity feedback system with OLTF $G(s) = \frac{k}{s(s+1)(s+5)}$ to satisfy the following specifications
i) $Kv \geq 50$
ii) Phase Margin $\geq 20°$

OR

b) Check the controllability and observability of the state model given below:

$$\begin{bmatrix}\dot{X}_1\\ \dot{X}_2\\ \dot{X}_3\end{bmatrix}=\begin{bmatrix}-1 & -2 & -2\\ 0 & -1 & 1\\ 1 & 0 & -1\end{bmatrix}\begin{bmatrix}X_1\\ X_2\\ X_3\end{bmatrix}+\begin{bmatrix}2\\ 0\\ 1\end{bmatrix}u(t) \text{ and } y=\begin{bmatrix}1 & 1 & 0\end{bmatrix}\begin{bmatrix}X_1\\ X_2\\ X_3\end{bmatrix}$$

SECTION – II

Q.4 Attempt the following. (Any Four) **16**

a) Determine the kind of singularity for the following differential equation.

$\ddot{Y}+3\dot{Y}+2Y=0$

b) Explain the limit cycle phenomenon in the nonlinear control systems.

c) Derive the pulse transfer function of the closed loop system.

d) A linear system is described by the state model.

$\begin{bmatrix}\dot{X}_1\\ \dot{X}_2\end{bmatrix}=\begin{bmatrix}0 & 1\\ 0 & -2\end{bmatrix}\begin{bmatrix}X_1\\ X_2\end{bmatrix}+\begin{bmatrix}0\\ 4\end{bmatrix}u(t)$ and $y=\begin{bmatrix}1 & 0\end{bmatrix}\begin{bmatrix}X_1\\ X_2\end{bmatrix}$. Calculate the observer gain matrix so that the observer poles are at $s1,2=-8,-8$.

e) Explain the mapping between the s-plane and the Z-plane.

Q.5 Attempt the following. (Any Two) **12**

a) It is desired to place the closed-loop poles of the following system at $s=-1,-2,-2$ by a state feedback controller with the control $u=-kx$. Determine the state feedback gain matrix K.

$$\begin{bmatrix}\dot{X}_1\\ \dot{X}_2\\ \dot{X}_3\end{bmatrix}=\begin{bmatrix}0 & 1 & 0\\ 0 & 0 & 1\\ 1 & 0 & 0\end{bmatrix}\begin{bmatrix}X_1\\ X_2\\ X_3\end{bmatrix}+\begin{bmatrix}0\\ 0\\ 1\end{bmatrix}u(t)$$

b) Derive the describing function of the relay with dead-zone nonlinearity.

c) Test the stability of the polynomial.

$F(z)=z^5+2.6z^4-0.56z^3-2.05z^2+0.0775z+0.35$.

Develop Jury's Table $[(2n-3)$ rows$]$.

T. Y. (B.Tech.) (Electrical Engineering) (Semester - II) (New/Old) (CBCS) Examination: March/April – 2026
Advanced Control Systems (BTN07604)

Day & Date: Friday, 22-05-2026 Max. Marks: 70
Time: 10:00 AM To 01:00 PM

Instructions: 1) Q. No. 1 is compulsory. It should be solved in the first 30 minutes in Answer Book Page no 03 (Starting page of the Answer Book). Each question carries one mark.
2) Don't forget to Mention question paper set (P/Q/R/S) on top of page.
3) Figures to the right indicates full marks.
4) Assume suitable data if necessary.

MCQ/Objective Type Questions

Duration: 30 Minutes Marks:14

Q.1 Choose the correct answer. **14**

1) The eigen values of the matrix (A-BK) are called _____.
a) open loop poles b) open loop zeros
c) regulator poles d) None of these

2) The Ackermann's formula is used for finding _____.
a) Observability b) Controllability
c) Feedback gain matrix d) State vector

3) In state feedback control, state variable feedback affects _____.
a) Only output response b) Pole locations of system
c) Input gain d) Error constant

4) The describing function method is applied for _____.
a) Linear continuous systems
b) Nonlinear systems under sinusoidal input
c) Time-varying systems
d) Digital systems

5) The most common physical nonlinearity in control systems is _____.
a) Friction b) Dead zone
c) Relay d) All of these

6) For a discrete system to be stable, poles of F(z) should lie _____.
a) Inside the unit circle b) On real axis
c) Outside unit circle d) On imaginary axis

7) The transfer function of zero order hold is _____.

a) $1 - e^{Ts}$ b) $1 - e^{-Ts}$

c) $\frac{1 - e^{Ts}}{s}$ d) $\frac{1 - e^{-Ts}}{s}$

8) The transfer function is $\frac{1+0.5s}{1+s}$. It represents a _____.

a) lead network b) lag network

c) lag-lead network d) proportional controller

9) A lead compensator improves primarily _____.

a) Steady-state accuracy b) Stability

c) Transient response d) Low-frequency gain

10) For a lag compensator network, the pole lies _____.

a) Left of zero b) Right of zero

c) At zero d) None

11) In state-space analysis, state vector represents _____.

a) Output variables b) Input variables

c) Energy storage variables d) Control inputs

12) A state model of a system is given by $\dot{x} = \begin{bmatrix} 0 & 1 \\ -2 & -3 \end{bmatrix} \begin{bmatrix} x_1 \\ x_2 \end{bmatrix} + \begin{bmatrix} 0 \\ 1 \end{bmatrix} u(t), Y = [1 \quad 0]x$. The Transfer function G(s) is _____.

a) $\frac{1}{s^2 + 3s + 2}$ b) $\frac{s + 3}{s^2 + 2s + 1}$

c) $\frac{s + 1}{s^2 + 3s + 2}$ d) $\frac{1}{s + 2}$

13) If the characteristic equation of matrix A is $s^3 + 5s^2 + 6s + 4 = 0$ then eigenvalues correspond to _____.

a) Zeros of transfer function b) System poles

c) Zeros of A matrix d) Gain constants

14) A system is completely controllable if _____.

a) det(Controllability matrix) = 0 b) Rank = n

c) Eigenvalues are positive d) A matrix is diagonalizable

Q.2 Attempt the following. (Any Four) **16**

a) Derive the realization of lag compensator circuit using passive network.

b) Explain the procedure to design lead compensator using bode plot technique.

c) Explain the procedure to design lag-lead compensator using root locus method.

d) A feedback system is having the closed loop transfer function $T(s) = \frac{s^2+3s+3}{s^3+2s^2+3s+1}$ Construct a state model for the system.

e) Find the State transition matrix $\phi(t)$ using Laplace Transform method.

$$\begin{bmatrix} \dot{x}_1 \\ \dot{x}_2 \end{bmatrix} = \begin{bmatrix} 0 & -3 \\ 1 & -4 \end{bmatrix} \begin{bmatrix} x_1 \\ x_2 \end{bmatrix}$$

Q.3 Attempt the following. **12**

a) The forward path TF of a unity feedback control system is given by $G(s) = \frac{k}{s(s+2)(s+8)}$. Design a suitable lag compensator so that the system meets the following specifications.
i) Percentage overshoot $\leq 16\%$ for unit step input,
ii) steady state error ≤ 0.125 for unit ramp input

b) Design a lead compensator for a unity feedback system with OLTF $G(s) = \frac{k}{s(s+1)(s+5)}$ to satisfy the following specifications
i) $Kv \geq 50$
ii) Phase Margin $\geq 20°$

OR

b) Check the controllability and observability of the state model given below:

$$\begin{bmatrix}\dot{X}_1\\ \dot{X}_2\\ \dot{X}_3\end{bmatrix}=\begin{bmatrix}-1 & -2 & -2\\ 0 & -1 & 1\\ 1 & 0 & -1\end{bmatrix}\begin{bmatrix}X_1\\ X_2\\ X_3\end{bmatrix}+\begin{bmatrix}2\\ 0\\ 1\end{bmatrix}u(t) \text{ and } y=\begin{bmatrix}1 & 1 & 0\end{bmatrix}\begin{bmatrix}X_1\\ X_2\\ X_3\end{bmatrix}$$

SECTION – II

Q.4 Attempt the following. (Any Four) **16**

a) Determine the kind of singularity for the following differential equation.

$\ddot{Y}+3\dot{Y}+2Y=0$

b) Explain the limit cycle phenomenon in the nonlinear control systems.

c) Derive the pulse transfer function of the closed loop system.

d) A linear system is described by the state model.

$\begin{bmatrix}\dot{X}_1\\ \dot{X}_2\end{bmatrix}=\begin{bmatrix}0 & 1\\ 0 & -2\end{bmatrix}\begin{bmatrix}X_1\\ X_2\end{bmatrix}+\begin{bmatrix}0\\ 4\end{bmatrix}u(t)$ and $y=\begin{bmatrix}1 & 0\end{bmatrix}\begin{bmatrix}X_1\\ X_2\end{bmatrix}$. Calculate the observer gain matrix so that the observer poles are at $s1,2=-8,-8$.

e) Explain the mapping between the s-plane and the Z-plane.

Q.5 Attempt the following. (Any Two) **12**

a) It is desired to place the closed-loop poles of the following system at $s=-1,-2,-2$ by a state feedback controller with the control $u=-kx$. Determine the state feedback gain matrix K.

$$\begin{bmatrix}\dot{X}_1\\ \dot{X}_2\\ \dot{X}_3\end{bmatrix}=\begin{bmatrix}0 & 1 & 0\\ 0 & 0 & 1\\ 1 & 0 & 0\end{bmatrix}\begin{bmatrix}X_1\\ X_2\\ X_3\end{bmatrix}+\begin{bmatrix}0\\ 0\\ 1\end{bmatrix}u(t)$$

b) Derive the describing function of the relay with dead-zone nonlinearity.

c) Test the stability of the polynomial.

$F(z)=z^5+2.6z^4-0.56z^3-2.05z^2+0.0775z+0.35$.

MCQ/Objective Type Questions

Duration: 30 Minutes Marks:14

Q.1 Choose the correct alternatives from the given options. 14

1) The amount of energy available in the wind at any instant is proportional to _____ of the wind speed.
a) Square root power of two b) Square root power of three
c) Square power d) Cube power

2) Compared to the fixed-dome model of a biogas plant, a floating drum-type plant is _____.
a) more efficient b) less efficient
c) equally efficient d) very cheap

3) _____ is called as the bio gas.
a) Bio ethanol b) Bio methane
c) Bio diesel d) Bio butanol

4) The geothermal energy is the _____ from the earth.
a) Heat b) Light
c) Photons d) Protons

5) In most hydrothermal fields, hot spots occur at a depth of about _____.
a) 10 km b) 10 m
c) 2 to 3 km d) 30 km ___

6) Small hydro plants (SHPs) have _____.
a) High head and small capacity
b) low head and small capacity
c) low head and large capacity
d) large head and large capacity

7) The minimum temperature difference between source and sink in an ocean required by a practical heat engine is _____.
a) 540°C b) 120°C
c) 10°C d) 20°C

8) Two-basin tidal schemes _____.
a) Are more economical than single basin schemes
b) Operate on ebb cycles in both basins
c) Produce less uniform power
d) Produce more uniform power

9) The standard value of solar constant is _____.
a) 1 KW/m^2 b) 1.367 KW/m^2
c) 1.5 KW/m^2 d) 5 KW/m^2

10) The radiation we receive on the earth's surface is _____.
a) terrestrial b) extra-terrestrial
c) diffuse d) beam

11) A solar thermal collector _____.
a) Collects the solar energy and reflects it back
b) Absorbs the solar radiation and dissipates it to the ambient
c) Collects and converts the solar energy in to electrical energy
d) Collects and converts the solar energy in to thermal energy and delivers it to the next stage of the system.

12) Which of the following is true for the renewable energy sources?
a) Highly polluting b) High waste disposal cost
c) Unreliable supply d) High running cost

13) Which statement is not true for FPC _____.
a) it utilizes beam
b) it diffuse radiation for heating
c) high water temperature is achieved
d) require less maintenance

14) The range of wind speed suitable for wind power generator is _____.
a) 0 to 5 m/s b) 5 to 25 m/s
c) 25 to 50 m/s d) 50 to 75 m/s

Seat No.	

Set **P**

T. Y. (B.Tech.) (Electrical Engineering) (Semester - II) (New/Old) (CBCS) Examination: March/April – 2026
Renewable Energy Sources (BTN07607)

Day & Date: Monday, 25-05-2026 Max. Marks: 56
Time: 10:00 AM To 01:00 PM

Instructions: 1) All Questions are compulsory.
2) Figures to the right indicates full marks.
3) Assume suitable data if necessary.

Section – I

Q.2 Attempt the following. (Any Four) **16**

a) Explain the working principle of solar pond. Also state the applications of solar pond.

b) Brief the components of wind energy conversion system.

c) Explain physics of the sun with neat diagram.

d) Describe the working of pyrheliometer with neat diagram.

e) Explain the difference between concentrating collectors and flat plate type collectors.

f) State the types of advanced solar collectors. Explain any one.

Q.3 Attempt the following. (Any Two) **12**

a) Draw and explain the performance characteristics of wind mill.

b) Explain terrestrial and extra-terrestrial solar radiation with neat diagram.

c) Draw and explain any two types of concentrating solar collectors.

Section – II

Q.4 Attempt the following. (Any Four) **16**

a) Draw and describe the general layout of small hydro plant (SHP).

b) What is DEC? Explain the need for DEC.

c) Explain Aerobic and Anaerobic digestion.

d) Distinguish between fixed dome type & floating drum type biogas plant.

e) What is geothermal energy? State the selection criteria for geothermal power plant.

f) Describe the working of open cycle OTEC system.

Q.5 Attempt the following. (Any Two) **12**

a) Explain tidal energy conversion system with neat diagram. Also state the advantages and disadvantages of tidal power.

b) Draw & explain double chamber biogas plant.

c) Draw and describe dry steam geothermal power plant.

Seat No.	

Set **Q**

T. Y. (B.Tech.) (Electrical Engineering) (Semester - II) (New/Old) (CBCS) Examination: March/April – 2026
Renewable Energy Sources (BTN07607)

Day & Date: Monday, 25-05-2026 Max. Marks: 70
Time: 10:00 AM To 01:00 PM

Instructions: 1) Q. No. 1 is compulsory. It should be solved in the first 30 minutes in Answer Book Page no 03 (Starting page of the Answer Book). Each question carries one mark.
2) Don't forget to Mention question paper set (P/Q/R/S) on top of page.
3) Figures to the right indicate full marks.

MCQ/Objective Type Questions

Duration: 30 Minutes Marks:14

Q.1 Choose the correct alternatives from the given options. 14

1) Two-basin tidal schemes _____.
a) Are more economical than single basin schemes
b) Operate on ebb cycles in both basins
c) Produce less uniform power
d) Produce more uniform power

2) The standard value of solar constant is _____.
a) 1 KW/m^2 b) 1.367 KW/m^2
c) 1.5 KW/m^2 d) 5 KW/m^2

3) The radiation we receive on the earth's surface is _____.
a) terrestrial b) extra-terrestrial
c) diffuse d) beam

4) A solar thermal collector _____.
a) Collects the solar energy and reflects it back
b) Absorbs the solar radiation and dissipates it to the ambient
c) Collects and converts the solar energy in to electrical energy
d) Collects and converts the solar energy in to thermal energy and delivers it to the next stage of the system.

5) Which of the following is true for the renewable energy sources?
a) Highly polluting b) High waste disposal cost
c) Unreliable supply d) High running cost

6) Which statement is not true for FPC _____.
a) it utilizes beam
b) it diffuse radiation for heating
c) high water temperature is achieved
d) require less maintenance

7) The range of wind speed suitable for wind power generator is _____.
a) 0 to 5 m/s b) 5 to 25 m/s
c) 25 to 50 m/s d) 50 to 75 m/s

8) The amount of energy available in the wind at any instant is proportional to _____ of the wind speed.
a) Square root power of two b) Square root power of three
c) Square power d) Cube power

9) Compared to the fixed-dome model of a biogas plant, a floating drum-type plant is _____.
a) more efficient b) less efficient
c) equally efficient d) very cheap

10) _____ is called as the bio gas.
a) Bio ethanol b) Bio methane
c) Bio diesel d) Bio butanol

11) The geothermal energy is the _____ from the earth.
a) Heat b) Light
c) Photons d) Protons

12) In most hydrothermal fields, hot spots occur at a depth of about _____.
a) 10 km b) 10 m
c) 2 to 3 km d) 30 km ___

13) Small hydro plants (SHPs) have _____.
a) High head and small capacity
b) low head and small capacity
c) low head and large capacity
d) large head and large capacity

14) The minimum temperature difference between source and sink in an ocean required by a practical heat engine is _____.
a) 540°C b) 120°C
c) 10°C d) 20°C

MCQ/Objective Type Questions

Duration: 30 Minutes Marks:14

Q.1 Choose the correct alternatives from the given options. 14

1) Optical modulators are widely used with superior performance _____.
a) Only Laboratory
b) Including optical communications, signal processing, and optical measurements
c) Time Measurement
d) None of the above

2) Optical fiber is the technology associated with data transmission using _____.
a) Air
b) Light pulses
c) Waves
d) Both a) & c)

3) Optical fiber is used by telecommunications companies to transmit ____.
a) Telephone signals
b) Telephone signals, Internet communication and cable television signals
c) Internet communication and cable television signals
d) None of the above

4) How do you measure bending losses in optical fiber _____.
a) By taking the logarithmic ratio of input power (P_i) to the output power (P_o).
b) By taking the logarithmic of Output power (P_o)
c) By taking the logarithmic of input power (P_i)
d) Only Power

5) DWDM Means _____.
   a) Data wavelength-division multiplexing
   b) Dense wavelength-division multiplexing
   c) Dense wavelength-diverted multiplexing
   d) Dense wavelength-division manager

6) A light-emitting diode (LED) is a semiconductor device that emit light when _____.
   a) Output reaches saturation level
   b) Current flows through it
   c) Output will be a sine waveform
   d) Output will be a non-sinusoidal waveform

7) Fiber optic Ethernet transmits data signals over _____.
   a) Fiber cables rather than the copper cables of traditional Ethernet wiring
   b) Copper cables
   c) Wired Cable
   d) All of the mentioned

8) In an optical network, which topologies are used?
   a) Ring
   b) Star
   c) Bus
   d) All of the above

9) Dense wavelength division multiplexing (DWDM) is a _____.
   a) Wired communication technique
   b) Fiber-optic transmission technique
   c) Mixing techniques
   d) Protocol

10) A major consideration with all types of fiber, fiber connection is the _____.
   a) optical loss encountered at the interface
   b) air loss
   c) hest loss
   d) None of the above

11) Fiber splicing is the process of _____.
   a) Temporary joining of two fibers
   b) Permanently joining two fibers together
   c) Permanent and temporary joint
   d) None of the above

12) An optical amplifier is a device that amplifies _____.
   a) Electrical signal
   b) an optical signal
   c) Both a) and b)
   d) None of the above

13) Wavelength division multiplexing (WDM) is a _____.
   a) Technique of multiplexing multiple ray
   b) Technique of multiplexing multiple optical carrier signals
   c) Both a) & b)
   d) None of the above

14) A LASER means _____.
   a) Light amplification some emit radiation
   b) Light activated stimulated emission of radiation
   c) Both a) & b)
   d) Light amplification by stimulated emission of radiation

Instructions: 1) All questions are compulsory.
2) Figures to the right indicates full marks.

Section – I

Q.2 Answer the following. (Any Four) **16**

a) Write any 8 application of Optical Fiber communication.

b) Write down the types of optical fiber. Explain any one in details.

c) Write a short note on fiber alignment & joint losses.

d) What is fiber splices? Explain.

e) Explain shortly fiber coupler & fiber connector.

Q.3 Answer the Following. (Any Two) **12**

a) Write down the type of dispersion in optical fiber communication. Explain in details.

b) What are semiconductor injection laser and their structure?

c) Explain mode theory (Ray Theory) of Optical Fiber.

Section – II

Q.4 Answer the following. (Any Four) **16**

a) Explain wavelength division modulation (WDM).

b) Explain requirement of optical detector.

c) Explain phototransistor in optical detectors.

d) Explain SONET/SDH rings.

e) Draw LED characteristics. Explain.

Q.5 Answer the Following. (Any Two) **12**

a) Explain the performance parameter of detector in details.

b) Explain optical network in details.

c) Explain avalanche photodiodes in details.

Set Q

T. Y. (B.Tech.) (Electrical Engineering) (Semester - II) (New/Old) (CBCS) Examination: March/April – 2026
Fiber Optic Communication (BTN07608)

Day & Date: Monday, 25-05-2026 Max. Marks: 56
Time: 10:00 AM To 01:00 PM

Instructions: 1) All questions are compulsory.
2) Figures to the right indicates full marks.

Section – I

Q.2 Answer the following. (Any Four) **16**

a) Write any 8 application of Optical Fiber communication.

b) Write down the types of optical fiber. Explain any one in details.

c) Write a short note on fiber alignment & joint losses.

d) What is fiber splices? Explain.

e) Explain shortly fiber coupler & fiber connector.

Q.3 Answer the Following. (Any Two) **12**

a) Write down the type of dispersion in optical fiber communication. Explain in details.

b) What are semiconductor injection laser and their structure?

c) Explain mode theory (Ray Theory) of Optical Fiber.

Section – II

Q.4 Answer the following. (Any Four) **16**

a) Explain wavelength division modulation (WDM).

b) Explain requirement of optical detector.

c) Explain phototransistor in optical detectors.

d) Explain SONET/SDH rings.

e) Draw LED characteristics. Explain.

Q.5 Answer the Following. (Any Two) **12**

a) Explain the performance parameter of detector in details.

b) Explain optical network in details.

c) Explain avalanche photodiodes in details.

T. Y. (B.Tech.) (Electrical Engineering) (Semester - II) (New/Old) (CBCS) Examination: March/April – 2026
Fiber Optic Communication (BTN07608)

Day & Date: Monday, 25-05-2026 Max. Marks: 70
Time: 10:00 AM To 01:00 PM

Instructions: 1) Q. No. 1 is compulsory. It should be solved in the first 30 minutes in Answer Book Page no 03 (Starting page of the Answer Book). Each question carries one mark.
2) Don't forget to Mention question paper set (P/Q/R/S) on top of page.
3) Figures to the right indicate full marks.

MCQ/Objective Type Questions

Duration: 30 Minutes Marks:14

Q.1 Choose the correct alternatives from the given options. 14

1) Fiber splicing is the process of _____.
a) Temporary joining of two fibers
b) Permanently joining two fibers together
c) Permanent and temporary joint
d) None of the above

2) An optical amplifier is a device that amplifies _____.
a) Electrical signal b) an optical signal
c) Both a) and b) d) None of the above

3) Wavelength division multiplexing (WDM) is a _____.
a) Technique of multiplexing multiple ray
b) Technique of multiplexing multiple optical carrier signals
c) Both a) & b)
d) None of the above

4) A LASER means _____.
a) Light amplification some emit radiation
b) Light activated stimulated emission of radiation
c) Both a) & b)
d) Light amplification by stimulated emission of radiation

5) Optical modulators are widely used with superior performance _____.
a) Only Laboratory
b) Including optical communications, signal processing, and optical measurements
c) Time Measurement
d) None of the above

6) Optical fiber is the technology associated with data transmission using _____.
   a) Air
   b) Light pulses
   c) Waves
   d) Both a) & c)

7) Optical fiber is used by telecommunications companies to transmit ____.
   a) Telephone signals
   b) Telephone signals, Internet communication and cable television signals
   c) Internet communication and cable television signals
   d) None of the above

8) How do you measure bending losses in optical fiber _____.
   a) By taking the logarithmic ratio of input power (P_i) to the output power (P_o).
   b) By taking the logarithmic of Output power (P_o)
   c) By taking the logarithmic of input power (P_i)
   d) Only Power

9) DWDM Means _____.
   a) Data wavelength-division multiplexing
   b) Dense wavelength-division multiplexing
   c) Dense wavelength-diverted multiplexing
   d) Dense wavelength-division manager

10) A light-emitting diode (LED) is a semiconductor device that emit light when _____.
   a) Output reaches saturation level
   b) Current flows through it
   c) Output will be a sine waveform
   d) Output will be a non-sinusoidal waveform

11) Fiber optic Ethernet transmits data signals over _____.
   a) Fiber cables rather than the copper cables of traditional Ethernet wiring
   b) Copper cables
   c) Wired Cable
   d) All of the mentioned

12) In an optical network, which topologies are used?
   a) Ring
   b) Star
   c) Bus
   d) All of the above

13) Dense wavelength division multiplexing (DWDM) is a _____.
   a) Wired communication technique
   b) Fiber-optic transmission technique
   c) Mixing techniques
   d) Protocol

14) A major consideration with all types of fiber, fiber connection is the _____.

a) optical loss encountered at the interface
b) air loss
c) hest loss
d) None of the above

MCQ/Objective Type Questions

Duration: 30 Minutes Marks:14

Q.1 Choose the correct alternatives from the given options. 14

1) Which of the following is NOT a characteristic of an ideal sensor?
a) Linearity b) High sensitivity
c) Infinite drift d) Fast response

2) The output of a piezoelectric sensor is proportional to _____.
a) Pressure b) Strain rate
c) Electric field d) Magnetic field

3) Hall Effect sensors are primarily used to measure _____.
a) Pressure b) Magnetic field
c) Temperature d) Humidity

4) The capacitance of a capacitive sensor changes mainly due to _____.
a) Variation in dielectric constant
b) Variation in resistance
c) Voltage change
d) Frequency variation

5) A thermistor is a type of _____ sensor.
a) Pressure b) Temperature
c) Position d) Magnetic

6) In signal conditioning, an instrumentation amplifier is mainly used for _____.
a) Frequency modulation
b) Voltage regulation
c) Differential signal amplification
d) Filtering

7) Bridge circuits are commonly used with _____ sensors.
a) Strain gauge b) Hall Effect
c) Capacitive d) Ultrasonic

8) Which of the following sensors is used for humidity measurement?
a) Capacitive b) Piezoelectric
c) Thermocouple d) Inductive

9) Nanotechnology is mainly used in sensors to _____.
a) Increase size
b) Reduce sensitivity
c) Improve performance and miniaturization
d) Increase power consumption

10) Which type of sensor detects motion based on infrared radiation?
a) PIR sensor b) Ultrasonic sensor
c) LVDT d) Thermistor

11) Which material property is essential for piezoelectric sensors?
a) Ferromagnetic
b) Semiconductor
c) Non-centrosymmetric crystal structure
d) Conductivity

12) The main function of an actuator is to _____.
a) Sense the environment
b) Convert electrical energy into mechanical motion
c) Amplify signals
d) Store data

13) An electromechanical actuator converts _____.
a) Electrical energy to mechanical energy
b) Thermal energy to electrical energy
c) Pressure to current
d) Light to voltage

14) Micro and nano actuators are primarily used in _____ applications.
a) Heavy machinery b) Micro-robotics and MEMS
c) Power generation d) HVAC systems

e) Explain analog to digital converter with diagram.

Q.3 Attempt the following. (Any Two) **12**

a) Explain the types of batteries used for low power sensors.

b) Describe the dynamic models of sensor element.

c) Explain the hall effect with necessary diagram.

Section – II

Q.4 Attempt the following. (Any Four) **16**

a) What are occupancy detector & motion detector? Explain.

b) Explain the wet etching MEMS Technology.

c) Write the Selection criteria of Actuators.

d) Why & where LVDT sensor used?

e) State different types of excitation circuits and explain any one of them in details.

Q.5 Attempt the following. (Any Two) **12**

a) State and explain the principle of operation of micro and nano actuator with advantages and disadvantages.

b) State the different types of material used for fabrication of sensor and explain any one of them.

c) Explain rotary velocity sensor (Tachometer) in details.

T. Y. (B.Tech.) (Electrical Engineering) (Semester - II) (New/Old) (CBCS) Examination: March/April- 2026
Electrical Safety (BTN07611)

Day & Date: Wednesday, 27-05-2026 Max. Marks: 50
Time: 10:00 AM To 12:00 PM

Instructions: 1) Q. No. 1 is compulsory. It should be solved in the first 20 minutes in Answer Book Page no 03 (Starting page of the Answer Book). Each question carries one mark.
2) Don't forget to Mention question paper set (P/Q/R/S) on top of page.
3) Figures to the right indicate full marks.
4) Make suitable assumptions if necessary and state them clearly.

MCQ/Objective Type Questions

Duration: 20 Minutes Marks:10

Q.1 Give the correct option for the following questions. 10

1) Avoid working in _____ conditions.
a) Cold b) Dry
c) Sunny d) Wet

2) _____ all electrical equipment before use.
a) Clean b) Inspect
c) Label d) Organize

3) _____ gives a stray current somewhere to go and keeps workers from becoming part of the circuit.
a) De-energizing b) Energizing
c) Grounding d) Guarding

4) Class-A fire consists of fire due to _____.
a) Wood b) Oil
c) Transformer d) Chemical

5) Specially designed PPE for electrical work includes _____ insulating gloves, matting, blankets, and covers.
a) Plastic b) Rubber
c) Steel d) Wood

6) _____ use caution when working near electricity.
a) Always b) Never
c) Rarely d) Sometimes

7) The minimum distance provided between two conducting points by air/gas/oil is known as _____.

a) Clearances
b) Creepages
c) Clearances and Creepages
d) All of these

8) _____ workers have little or no training working on or near electricity.

a) Pipeline
b) Qualified
c) Rescue
d) Unqualified

9) Electrical hazards include shock, electrical arcs and blasts, and _____ or faulty equipment.

a) Broken
b) Double-insulated
c) Polished
d) Secure

10) _____ is a measurement of how much energy you are using each second.

a) Distance
b) Power
c) Volume
d) Weight

MCQ/Objective Type Questions

Duration: 20 Minutes Marks:10

Q.1 Choose the correct answer. 10

1) What is the smallest unit of a solar photovoltaic system?
a) Solar Cell b) Solar Array
c) Solar module d) Solar Panel

2) In P-N Junction solar cell, P-type semiconductor is connected to _____.
a) Cathode b) Anode
c) Triode d) Diode

3) What is the function of an inverter?
a) Conversion of AC to DC b) Conversion of DC to AC
c) Amplifying the sound d) Step up the voltage

4) What is MPPT?
a) Maximum Photo Power Tracer
b) Maximum Power Point Tracer
c) Multi Point Power Tracer
d) None of the above

5) Turn around efficiency of battery energy storage system is around _____.
a) 75 percent b) 50 percent
c) 25 percent d) 10 percent

6) Certain metals become super-conducting when cooled below _____.
a) Melting point b) Transition temperature
c) 00 K d) 00 C

7) What is the maximum possible output of a solar array?

a) 300 W/m^2 b) 100 W/m^2

c) 250 W/m^2 d) 500 W/m^2

8) In solar thermal conversion systems, the solar heat is transferred to _____.

a) Water-steam b) Liquid metals

c) Molten salts d) Any of the above

9) The current density of a photo voltaic cell range from _____.

a) 10-20 mA/cm^2 b) 40 - 50 mA/cm^2

c) 20 - 40 mA/cm^2 d) 60 - 100 mA/cm

Day & Date: Wednesday, 27-05-2026 Max. Marks: 70
Time: 03:00 PM To 06:00 PM

Instructions: 1) Q. No. 1 is compulsory. It should be solved in the first 30 minutes in Answer Book Page no 03 (Starting page of the Answer Book). Each question carries one mark.
2) Don't forget to Mention question paper set (P/Q/R/S) on top of page.
3) Figures to the right indicates full marks.
4) Assume suitable data if necessary.

MCQ/Objective Type Questions

Duration: 30 Minutes Marks:14

Q.1 Choose the correct answer: **14**

1) Sodium Chloride batteries have _____ electrolytes.
a) One b) Three
c) Two d) Four

2) How can a higher voltage be obtained from a cell _____.
a) By connecting multiple cells in series
b) By increasing its thickness
c) By connecting multiple cells in parallel
d) By decreasing its thickness

3) Advantages of lithium batteries _____.
a) Light weight b) Compact
c) Low maintenance d) All of the above

4) Which quantity among the following increases when cells are connected in parallel?
a) Voltage b) internal resistance
c) Amp Hours d) current

5) If the Capacity of battery is 400mAh, it can supply 4A current for _____.
a) 120min b) 240min
c) 60min d) 30min

6) Factors related to EV battery selection criteria.
a) Identify and select battery chemistry
b) Depth of discharge and Capacity
c) C-rating
d) All of the above

7) Which method is employed to connect the batteries?
a) parallel b) direct
c) series d) reverse

8) In EVs, what is the purpose of a traction battery pack?
a) To control the vehicle's steering
b) To provide power for propulsion
c) To manage climate control
d) To regulate tire pressure

9) What is the primary function of a Battery Management System (BMS)?
a) Entertainment control
b) Tire pressure monitoring
c) Regulating engine temperature
d) Monitoring and managing battery health and performance

10) What does battery cell equalization aim to achieve?
a) Balancing the state of charge among cells
b) Increasing the weight of the battery
c) Improving the battery's color consistency
d) Reducing the overall battery capacity

11) What is the primary role of the protection interface in EV batteries?
a) Enhance entertainment features
b) Ensure safety by preventing overcharging and over-discharging
c) Maximize fuel efficiency
d) Optimize tire wear

12) Which method for State of Charge (SOC) estimation is based on integrating current over time?
a) Coulomb counting b) Voltage-based methods
c) Temperature sensing d) Impedance spectroscopy

13) What factors can contribute to thermal runaway in batteries?
a) High discharge rates, short circuits, and charging
b) Low discharge rates and optimal charging
c) Lack of safety vents and low temperatures
d) Ignoring explosive potential

14) What is an important consideration in preventing battery leakage?
a) Maximizing leakage rates b) Ignoring leakage paths
c) Controlling gas generation d) Encouraging rupture events

Set | P

T. Y. (B.Tech.) (Electrical Engineering) (Semester - II) (New/Old) (CBCS) Examination: March/April – 2026
Energy Management System for Electric Vehicle (BTN07614)

Day & Date: Wednesday, 27-05-2026 Max. Marks: 56
Time: 03:00 PM To 06:00 PM

Instructions: 1) All Questions are compulsory.
2) Figures to the right indicates full marks.
3) Assume suitable data if necessary.

Section – I

Q.2 Solve Any Four. **16**

a) Explain in detail flywheel energy storage element.

b) Explain Parameterization of NiCd battery model.

c) Explain about Lithium Based Batteries in Energy Storage System.

d) Explain how chemical energy can converted into electrical energy.

e) Describe battery Specifications and characterize to battery operating conditions.

f) Differentiate between Cell and batteries.

Q.3 Solve Any Two. **12**

a) Describe the Battery Energy Storage based System in Hybrid Electric Vehicles.

b) Explain following regarding performance criteria for Electric Vehicles batteries:
i) Vehicle propulsion factors
ii) Power and energy requirements of batteries

c) Explain General approach to modeling of batteries.

Section – II

Q.4 Solve Any Four. **16**

a) Explain the fundamentals of battery pack design.

b) Describes any one State of Charge (SOC) estimation methods.

c) Explain with neat diagram the Battery Management System (BMS).

d) Describes any one EV Battery testing methods.

e) Describe the causes and consequences of gas generation in batteries.

f) Explain the role of safety vents in preventing and managing cell ruptures.

Q.5 Solve Any Two. **12**

a) Write a short note on Battery Thermal Management system.

b) Describes the Battery cell equalization methods.

c) Explain the recycling, disposal, and second use of EV batteries.

MCQ/Objective Type Questions

Duration: 30 Minutes Marks:14

Q.1 Choose the correct alternative. **14**

1) Power Quality mainly deals with _____.
a) Power factor only
b) Quality of voltage and current
c) Transmission losses
d) Generation of power

2) Which device is used to control voltage sag and swell?
a) Resistor b) Relay
c) FACTS device d) Transformer

3) The CBEMA curve is used to study _____.
a) Power factor b) Load current
c) Voltage tolerance d) Temperature rise

4) Harmonics are mainly produced due to _____.
a) Resistive loads b) Balanced loads
c) Non-linear loads d) Linear loads

5) The fall form of THD is _____.
a) Total High Deviation b) True Harmonic Deviation
c) Total Harmonic Distortion d) Total Heat Distortion

6) Which one is a passive filter element?
a) SCR b) Diode
c) IGBT d) Inductor

7) Power quality problems can cause _____.
a) Higher efficiency
b) Energy saving
c) Equipment damage
d) Smooth operation of equipment

8) SVC is mainly used to control _____.
a) Load torque
b) Temperature
c) Reactive power
d) Frequency

9) STATCOM stands for _____.
a) Static Controlled Machine
b) Static Series Converter
c) Static Synchronous Compensator
d) Static Compensation Machine

10) FACTS devices help to improve _____.
a) Insulation
b) Lighting
c) Cooling
d) Transmission capability

11) TCSC is a type of _____ compensator.
a) None
b) Parallel
c) Series
d) Shunt

12) UPFC is a combination of _____.
a) SVC and TCR
b) TCSC and SSSC
c) STATCOM and SSSC
d) SVC and STATCOM

13) The main function of a series capacitor is to _____.
a) Produce harmonics
b) Increase voltage drop
c) Reduce line reactance
d) Increase resistance

14) IPFC stands for _____.
a) Interphase Flow Controller
b) Integrated Phase Flow Compensator
c) Internal Power Flow Converter
d) Interline Power Flow Controller

Time: 03:00 PM To 06:00 PM

Instructions: 1) Q. No. 1 is compulsory. It should be solved in the first 30 minutes in Answer Book Page no 03 (Starting page of the Answer Book). Each question carries one mark.
2) Don't forget to Mention question paper set (P/Q/R/S) on top of page.
3) Figures to the right indicates full marks.
4) Assume suitable data if necessary.

MCQ/Objective Type Questions

Duration: 30 Minutes Marks:14

Q.1 Choose the correct alternative. **14**

1) TCSC is a type of _____ compensator.
a) None b) Parallel
c) Series d) Shunt

2) UPFC is a combination of _____.
a) SVC and TCR b) TCSC and SSSC
c) STATCOM and SSSC d) SVC and STATCOM

3) The main function of a series capacitor is to _____.
a) Produce harmonics b) Increase voltage drop
c) Reduce line reactance d) Increase resistance

4) IPFC stands for _____.
a) Interphase Flow Controller
b) Integrated Phase Flow Compensator
c) Internal Power Flow Converter
d) Interline Power Flow Controller

5) Power Quality mainly deals with _____.
a) Power factor only
b) Quality of voltage and current
c) Transmission losses
d) Generation of power

6) Which device is used to control voltage sag and swell?
a) Resistor b) Relay
c) FACTS device d) Transformer

7) The CBEMA curve is used to study _____.
a) Power factor b) Load current
c) Voltage tolerance d) Temperature rise

8) Harmonics are mainly produced due to _____.
a) Resistive loads b) Balanced loads
c) Non-linear loads d) Linear loads

9) The fall form of THD is _____.
a) Total High Deviation b) True Harmonic Deviation
c) Total Harmonic Distortion d) Total Heat Distortion

10) Which one is a passive filter element?
a) SCR b) Diode
c) IGBT d) Inductor

11) Power quality problems can cause _____.
a) Higher efficiency
b) Energy saving
c) Equipment damage
d) Smooth operation of equipment

12) SVC is mainly used to control _____.
a) Load torque b) Temperature
c) Reactive power d) Frequency

13) STATCOM stands for _____.
a) Static Controlled Machine
b) Static Series Converter
c) Static Synchronous Compensator
d) Static Compensation Machine

14) FACTS devices help to improve _____.
a) Insulation b) Lighting
c) Cooling d) Transmission capability

Seat No.	

Set **R**

Fourth. Y. (B.Tech.) (Electrical Engineering) (Semester - I) (New) (CBCS) Examination: March/April - 2026
Power Quality and FACTS (BTN07701)

Day & Date: Saturday, 02-05-2026 Max. Marks: 56
Time: 03:00 PM To 06:00 PM

Instructions: 1) All questions are compulsory.
2) Figures to the right indicate full marks.
3) Make suitable assumptions if necessary and state them clearly.

Section – I

Q.2 Answer any FOUR of the following. **16**

a) Define and explain various power quality indices.
b) Explain voltage sags and swells with causes and effects.
c) Discuss methods of locating harmonic sources in a distribution system.
d) Explain different types of transients affecting power quality.
e) Write short note on International Power Quality Standards. (IEEE/IEC).

Q.3 Answer any TWO of the following. **12**

a) Describe the principle and working of active and passive filters for harmonic mitigation.
b) Explain the process and instrumentation used for power quality monitoring.
c) With suitable diagrams, explain harmonic distortion evaluation procedure.

Section – II

Q.4 Answer any FOUR of the following. **16**

a) Explain the objectives and classification of FACTS controllers.
b) Compare V-I and V-Q characteristics of SVC and STATCOM.
c) Explain the concept and operation of TCR and TSC.
d) Write short note on midpoint voltage regulation using shunt compensation.
e) Explain the role of FACTS in enhancement of system stability.

Q.5 Answer any TWO of the following. **12**

a) Describe the operating principle and control structure of UPFC with neat block diagram.
b) Explain different types of series compensators such as TSSC, TCSC, and SSSC.
c) Discuss the operation and applications of IPFC in multi-line compensation.

MCQ/Objective Type Questions

Duration: 30 Minutes Marks:14

Q.1 Multiple Choice Questions. **14**

1) Mathematically unit step is an integral of _____.
a) Unit step b) Unit ramp
c) Unit parabola d) Unit Impulse

2) Convolution of two unequal width rectangular signals will give resultant as _____.
a) Trapezoidal b) Square
c) Triangular d) None of the above

3) If $x[4 - n]$ is derived from the $x[n]$ by which transformation _____.
a) reversal and shift b) reversal only
c) scaling d) scaling and shifting

4) With $u[n]$ as unit step function, $u[n] - u[n-2]$ is, _____.
a) $\delta[n]$ b) $\delta[n] + \delta[n-1]$
c) $\delta[n] - \delta[n-2]$ d) $\delta[n] + \delta[n+1]$

5) For energy signal, the energy will be finite and the average power will be _____.
a) infinite b) finite
c) zero d) cannot be defined

6) Which of the following signal is causal signal?
a) $x(t) = A$ b) $x(t) = t$
c) $x(t) = u(t)$ d) $x(t) = e^{-at}$

7) An LTI system is stable, if the impulse response is _____.

a) $\sum_{n=-\infty}^{\infty} |h(n)| = 0$ b) $\sum_{n=-\infty}^{\infty} |h(n)| < \infty$

c) $\sum_{n=-\infty}^{\infty} |h(n)| \neq 0$ d) Either a or b

8) Fourier series of any periodic signal $x(t)$ can only be obtained if, _____.

a) finite number of discontinuities within finite time interval, T
b) finite number of positive and negative maxima in the period, T
c) well defined at infinite number of points
d) both (a) and (b)

9) Fourier transform of the signum function, $x(t) = sgn(t)$ is _____.

a) $\frac{2}{\omega}$ b) $\frac{2}{j\omega}$

c) $\frac{2}{(j\omega)^2}$ d) $-\frac{2}{j\omega}$

10) If all the poles of the system function H(z) have magnitude smaller than 1, then the system will be, _____.

a) stable b) unstable
c) BIBO stable d) a and c

11) If $x(n)$ and $X(k)$ are an N-point DFT pair, then the value of $X(k + N)$ ____

a) $X(-k)$ b) $-X(k)$
c) $X(k)$ d) None of the above

12) If Fourier transform of $x(t)$ is $X(\omega)$, then Fourier Transform of $e^{-j\omega_0 t}x(t)$ is _____.

a) $\frac{X(\omega)}{\omega_0}$ b) $X(\omega - \omega_0)$

c) $X(\omega + \omega_0)$ d) $\omega_0 X(\omega)$

13) Bit reversing is required for both DIT and DIF algorithms _____.

a) DIT b) DIF
c) Both DIT and DIF d) None of these

14) The Z-transform is a, _____.

a) finite series b) infinite power series
c) geometric series d) both a and c

Seat No.

3) Consider data whenever necessary.

SECTION – I

Q.2 Attempt Any Four. **16**

a) Explain basic properties of the LTI system.

b) Perform the convolution of the following signals
$x(t) = u(t)$ and $h(t) = e^{-5t}u(t)$

c) Draw following discrete time signal in graphical form
$x(-3) = -1, x(-2) = 2, x(-1) = 0, x(0) = 1, x(1) = 2, x(2) = 3, x(3) = 2$

d) Check the causality of the system defined as,
$y(t) = x^2(t) + x(t-2)$

e) Explain the terms Time-Invariant and Time-Variant System, with examples.

f) Find the even and odd signal of signal defined as,
$x(t) = \cos(t) + \sin(t) + \cos(t)\sin(t)$

Q.3 Attempt Any Two. **12**

a) Define the following related to systems- Continuous and discrete system. Lumped parameter and distributed parameter system, static and dynamic system, causal and non-causal system, linear and non-liner system, stable and unstable system.

b) State whether the system $y(t) = x^2(t - t_0) + 2$ is linear, causal, time variant and dynamic.

c) A continuous time signal is defined as, $x(t) = \begin{cases} t; & 0 \le t \le 3 \\ 0; & t > 3 \end{cases}$

Sketch the waveform of
i) $-x(t)$
ii) $x(-t)$
iii) $x(2-3t)$

SECTION – II

Q.4 Attempt Any Four. **16**

a) Explain following properties for Continuous Time Fourier Transform.
   i) Linearity
   ii) Time shifting
   iii) Time scaling

b) Represent the discrete time signal in terms of impulse.

c) Find 4 points DFT for a signal defined as, $x[n] = \{1,2,3,4\}$

d) Explain Linearity and Time shifting Property for Z transform.

e) Give the Property of Region of Conversion.

f) Find Z-Transform of the signal $x[n] = (a)^n\, u(n)$.

Q.5 Attempt Any Two. **12**

a) Explain magnitude and phase spectrum for Fourier Transform.

b) Find the inverse Z-Transform of the $X(z) = \frac{1+2z+3z^2}{2+3z+z^2}$ using partial fraction method.

c) Determine the Fourier Transform of Gaussian Pulse $x(t) = e^{-b^2t^2}$

Fourth. Y. (B.Tech.) (Electrical Engineering) (Semester - I) (New) (CBCS) Examination: March/April - 2026
Signals and System (BTN07702)

Day & Date: Tuesday, 05-05-2026 Max. Marks: 70
Time: 03:00 PM To 06:00 PM

Instructions: 1) Q. No. 1 is compulsory. It should be solved in the first 30 minutes in Answer Book Page no 03 (Starting page of the Answer Book). Each question carries one mark
2) Don't forget to Mention question paper set (P/Q/R/S) on top on page.
3) Figures to the right indicates full marks.
4) Consider data whenever necessary.

MCQ/Objective Type Questions

Duration: 30 Minutes Marks:14

Q.1 Multiple Choice Questions. **14**

1) Which of the following signal is causal signal?
a) $x(t) = A$ b) $x(t) = t$
c) $x(t) = u(t)$ d) $x(t) = e^{-at}$

2) An LTI system is stable, if the impulse response is _____.
a) $\sum_{n=-\infty}^{\infty} |h(n)| = 0$ b) $\sum_{n=-\infty}^{\infty} |h(n)| < \infty$
c) $\sum_{n=-\infty}^{\infty} |h(n)| \neq 0$ d) Either a or b

3) Fourier series of any periodic signal $x(t)$ can only be obtained if, _____.
a) finite number of discontinuities within finite time interval, T
b) finite number of positive and negative maxima in the period, T
c) well defined at infinite number of points
d) both (a) and (b)

4) Fourier transform of the signum function, $x(t) = sgn(t)$ is _____.
a) $\frac{2}{\omega}$ b) $\frac{2}{j\omega}$
c) $\frac{2}{(j\omega)^2}$ d) $-\frac{2}{j\omega}$

5) If all the poles of the system function H(z) have magnitude smaller than 1, then the system will be, _____.
a) stable b) unstable
c) BIBO stable d) a and c

6) If $x(n)$ and $X(k)$ are an N-point DFT pair, then the value of $X(k + N)$ _____

a) $X(-k)$ b) $-X(k)$

c) $X(k)$ d) None of the above

7) If Fourier transform of $x(t)$ is $X(\omega)$, then Fourier Transform of $e^{-j\omega_0 t}x(t)$ is _____.

a) $\frac{X(\omega)}{\omega_0}$ b) $X(\omega - \omega_0)$

c) $X(\omega + \omega_0)$ d) $\omega_0 X(\omega)$

8) Bit reversing is required for both DIT and DIF algorithms _____.

a) DIT b) DIF

c) Both DIT and DIF d) None of these

9) The Z-transform is a, _____.

a) finite series b) infinite power series

c) geometric series d) both a and c

10) Mathematically unit step is an integral of _____.

a) Unit step b) Unit ramp

c) Unit parabola d) Unit Impulse

11) Convolution of two unequal width rectangular signals will give resultant as _____.

a) Trapezoidal b) Square

c) Triangular d) None of the above

12) If $x[4 - n]$ is derived from the $x[n]$ by which transformation _____.

a) reversal and shift b) reversal only

c) scaling d) scaling and shifting

13) With $u[n]$ as unit step function, $u[n] - u[n-2]$ is, _____.

a) $\delta[n]$ b) $\delta[n] + \delta[n-1]$

c) $\delta[n] - \delta[n-2]$ d) $\delta[n] + \delta[n+1]$

14) For energy signal, the energy will be finite and the average power will be _____.

a) infinite b) finite

c) zero d) cannot be defined

Fourth. Y. (B.Tech.) (Electrical Engineering) (Semester - I) (New) (CBCS) Examination: March/April - 2026
Signals and System (BTN07702)

Day & Date: Tuesday, 05-05-2026 Max. Marks: 56
Time: 03:00 PM To 06:00 PM

Instructions: 1) All questions are compulsory.
2) Figures to the right indicate full marks.
3) Consider data whenever necessary.

SECTION – I

Q.2 Attempt Any Four. **16**

a) Explain basic properties of the LTI system.

b) Perform the convolution of the following signals
$x(t) = u(t)$ and $h(t) = e^{-5t}u(t)$

c) Draw following discrete time signal in graphical form
$x(-3) = -1, x(-2) = 2, x(-1) = 0, x(0) = 1, x(1) = 2, x(2) = 3, x(3) = 2$

d) Check the causality of the system defined as,
$y(t) = x^2(t) + x(t-2)$

e) Explain the terms Time-Invariant and Time-Variant System, with examples.

f) Find the even and odd signal of signal defined as,
$x(t) = \cos(t) + \sin(t) + \cos(t)\sin(t)$

Q.3 Attempt Any Two. **12**

a) Define the following related to systems- Continuous and discrete system. Lumped parameter and distributed parameter system, static and dynamic system, causal and non-causal system, linear and non-liner system, stable and unstable system.

b) State whether the system $y(t) = x^2(t - t_0) + 2$ is linear, causal, time variant and dynamic.

c) A continuous time signal is defined as, $x(t) = \begin{cases} t; & 0 \le t \le 3 \\ 0; & t > 3 \end{cases}$

Sketch the waveform of
i) $-x(t)$
ii) $x(-t)$
iii) $x(2-3t)$

SECTION – II

Q.4 Attempt Any Four. **16**

a) Explain following properties for Continuous Time Fourier Transform.
   i) Linearity
   ii) Time shifting
   iii) Time scaling

b) Represent the discrete time signal in terms of impulse.

c) Find 4 points DFT for a signal defined as, $x[n] = \{1,2,3,4\}$

d) Explain Linearity and Time shifting Property for Z transform.

e) Give the Property of Region of Conversion.

f) Find Z-Transform of the signal $x[n] = (a)^n\, u(n)$.

Q.5 Attempt Any Two. **12**

a) Explain magnitude and phase spectrum for Fourier Transform.

b) Find the inverse Z-Transform of the $X(z) = \frac{1+2z+3z^2}{2+3z+z^2}$ using partial fraction method.

c) Determine the Fourier Transform of Gaussian Pulse $x(t) = e^{-b^2t^2}$

Switchgear and Protection (BTN07703)

Day & Date: Thursday, 07-05-2026 Max. Marks: 70
Time: 03:00 PM To 06:00 PM

Instructions: 1) Q. No. 1 is compulsory. It should be solved in the first 30 minutes in Answer Book Page no 03 (Starting page of the Answer Book). Each question carries one mark.
2) Don't forget to Mention question paper set (P/Q/R/S) on top on page.
3) Figures to the right indicates full marks.
4) Make suitable assumptions if necessary and state them clearly.

MCQ/Objective Type Questions

Duration: 30 Minutes Marks:14

Q.1 Choose the correct answers. **14**

1) Relay gets its operating energy from _____.
a) transformer b) alternator
c) overhead lines d) C.T. & P.T.

2) Back up protection is needed for _____.
a) over voltage b) short circuits
c) over current d) all of these

3) Protection by fuses is generally not used beyond _____.
a) 20 A b) 50 A
c) 100 A d) 200 A

4) H.R.C. fuses provide best protection against _____.
a) overload b) reverse current
c) open-circuits d) short-circuits

5) Directional relays are based on flow of _____.
a) power b) current
c) voltage wave d) all of the above

6) Admittance relay is _____.
a) Non-directional relay b) Directional relay
c) Differential relay d) All of the above

7) Relays are used for phase faults on long line _____.
a) Impedance b) Reactance
c) Either of the above d) None of the above

8) Over fluxing protection is recommended for _____.
a) Distribution transformer
b) Generator transformer of the power plant
c) Auto-transformer of the power plant
d) Station transformer of the power plant

9) To limit short-circuit current in a power system are used _____.
a) Earth wires
b) Isolators
c) H.R.C. fuses
d) Reactors

10) Recovery voltage is the value of rms voltage that reappears across the poles of a circuit breaker before _____.
a) Restriking voltage
b) Final arc extinction
c) Rise of voltage
d) All of the above

11) How is the restriking voltage measured?
a) RMS value
b) Peak value
c) Instantaneous value
d) Average value

12) What is the main purpose of oil in oil circuit breakers?
a) Provide insulation
b) Quenching arc
c) Provide cooling of contacts
d) None of the above

13) What is the most important property which makes the SF_6 very efficient medium for circuit breaking?
a) It is nontoxic and non-inflammable
b) Has a high dielectric constant
c) Has a high breakdown strength
d) It is highly electronegative gas

14) The over-voltage surges in power systems may be caused by _____.
a) Lightning
b) Switching
c) Resonance
d) Any of the above

SECTION – I

Q.2 Solve any Four. **16**

a) What do you mean by zones of protection? Explain primary and backup protection?

b) Explain microprocessor based relay with block diagram.

c) Discuss the overcurrent protective scheme for radial and ring main feeder.

d) What different types of fuse? Explain construction and operation of HRC fuse with neat diagram?

e) Explain now impedance relay is used for distance protection with its characteristics.

f) Describe microprocessor based reactance relay with block diagram and flow chart to realize its characteristics.

Q.3 Solve any Two. **12**

a) Derive torque equation for induction relay in detail.

b) Explain microprocessor based overcurrent relay with block diagram.

c) Describe microprocessor based impedance relay with block diagram with its flow chart in detail.

SECTION – II

Q.4 Solve any Four. **16**

a) Explain differential protection of bus bar with neat diagram.

b) Briefly describe MCB and MCCB with neat diagram.

c) Explain the phenomenon of capacitive current interruption with suitable waveforms.

d) What are the causes of over voltages in power system?

e) Explain different methods of testing of circuit breaker.

f) Explain protection of induction motor for different faults.

Q.5 Attempt any Two. **12**

a) With neat sketch explain construction & operation of air blast circuit breaker with their types.

b) Derive an expression of Restriking voltage & RRRV in terms of system voltage, inductance and capacitance.

c) Explain the protection of generator against
- i) Motoring action
- ii) Overheating
- iii) Excitation failure

MCQ/Objective Type Questions

Duration: 30 Minutes Marks:14

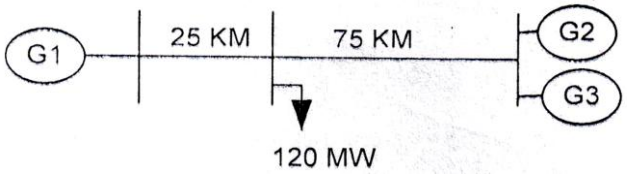
Q.1 Choose the correct alternatives from the option: **14**

1) A load Centre of 120 MW derives power from two power stations connected by 220 KV transmission lines of 25 KM and 75 Km as shown in the figure below



The generators G1, G2 & G3 are of 100 MW capacity each and have identical fuel cost characteristics. The minimum loss generation schedule for supplying the 120 MW load is

a) P1 = 80 MW + Losses; P2 = 20 MW; P3 = 20 MW
b) P1 = 60 MW; P2 = 20 MW; P3 = 40 MW + Losses
c) P1 = 40 MW; P2 = 40 MW; P3 = 40 MW + Losses
d) P1 = 30 MW + Losses; P2 = 45 MW; P3 = 45 MW

2) Unit of λ (Lagrange Multiplier) and B (loss coefficient) are _____.

a) Rs/Kwhr, Unitless
b) Rs/Kwhr, KW^{-1}
c) Rs/Kg, KW^{-1}
d) Rs/hr, KW^{-1}

3) If Kinetic energy of generator reduces _____.

a) Power decreases
b) Speed falls
c) Frequency Reduces
d) All of the above

4) Balance of real power maintains steady _____.

a) Voltage
b) Cost
c) Frequency
d) Voltage and frequency

5) Spinning reserve is defined as _____.
   a) [Total generation output of all synchronized units at a particular time] + [load at that time + losses at that time]
   b) [Total generation output of all synchronized units at a particular time] − [load at that time − losses at that time]
   c) [Total generation output of all synchronized units at a particular time] − [load at that time + losses at that time]
   d) None of these

6) In the DP method, the cost function $F_N(X)$ Represents _____.
   a) Minimum cost in Rs/hr of Generation of N MW by X number of units.
   b) Minimum cost in Rs/hr of Generation of X MW by N number of units.
   c) Minimum cost in Rs/hr of Generation of N MW by X^{th} unit.
   d) Minimum cost in Rs/hr of Generation of X MW by N^{th} unit.

7) In synchronous condensers, leading VARS are produced by _____.
   a) Increasing Field Current
   b) Decreasing Field Current
   c) Increasing speed of the machine
   d) Decreasing speed of the machine

8) KVAR is equal to _____.
   a) $\mathrm{KW}\sin\theta$
   b) $\mathrm{KW}\cos\theta$
   c) $\mathrm{KVA}\cos\theta$
   d) $\mathrm{KW}\tan\theta$

9) A Unit when scheduled for connection to the system is said to be _____.
   a) Loaded
   b) Disconnected
   c) Hot reserve
   d) Committed

10) Rating of Compensator is given in _____.
   a) MW
   b) KVAr
   c) pf
   d) None of these

11) In Contingency Ranking, the severest fault will be ranked _____.
   a) 1
   b) Last
   c) Will depend on type of fault
   d) Will depend on duration of fault

12) In a network with 4 generators and 25 lines, the number of generations shift factors are _____.
   a) 4
   b) 25
   c) 100
   d) 96

13) Voltage stability in power systems refers to _____.
   a) The ability of the system to maintain steady voltages at all buses
   b) The ability of the system to generate power continuously
   c) The efficiency of transmission lines
   d) The reduction of system losses

14) Which factor can significantly affect voltage stability?

a) Load demand
b) Generator output
c) Transmission line reactance
d) All of the above

Set | P

Fourth. Y. (B.Tech.) (Electrical Engineering) (Semester - I) (New) (CBCS) Examination: March/April – 2026
Power System and Operation Control (BTN07707)

Day & Date: Saturday, 09-05-2026 Max. Marks: 56
Time: 03:00 PM To 06:00 PM

Instructions: 1) All Questions are compulsory.
2) Figures to the right indicates full marks.
3) Assume the suitable data whenever necessary.

SECTION – I

Q.2 Attempt any Four. **16**

a) Explain with mathematical formulation the economic load dispatch including transmission losses.

b) Write short note incremental production cost on thermal power plant.

c) Explain the priority list method for unit commitment with suitable example.

d) Discuss the importance of short-term hydro thermal co-ordination.

e) List the advantages of interconnected operation of power system.

f) Explain Speed regulation parameter with neat sketches.

Q.3 Solve Any Two. **12**

a) In a system with two plants the incremental fuel cost are given by $dF_1/dP_1 = 0.01\ P_1 + 20$ Rs./MW-hour & $dC_2/dP_2 = 0.015P_2 + 22.5$ Rs./MW-hour. The system is running under an optimal schedule with $P_1 = P_2 = 100$ MW. If $dP_L/P_2 = 0.22$. Find Penalty Factor and dP_L/dP_1.

b) Explain with illustrative transfer function of the load frequency control of two area system.

c) Define the unit commitment & explain the following concepts with reference to unit commitment.
i) Minimum up time and Minimum down time
ii) Fuel constraint
iii) Must Run
iv) Hydro constraint

SECTION – II

Q.4 Attempt Any Four. **16**

a) What is line compensation? Why is it necessary?

b) Explain power system voltage stability.

c) Write a short note on sensitivity factor.

d) Explain Series Compensator and draw phasor diagram.

e) Give the explanation of system state classification.

f) Explain Security Analysis.

Q.5 Attempt Any Two. **12**

a) Name the sources of reactive power. Discuss the sources of reactive power. Discuss any two of these sources in detail.

b) Write a short note on with reference to voltage stability
   i) State of art
   ii) Future trends and challenges

c) What are the classification system state security? Explain in brief Contingency Analysis.

Fourth. Y. (B.Tech.) (Electrical Engineering) (Semester - I) (New) (CBCS) Examination: March/April - 2026
Power System and Operation Control (BTN07707)

Day & Date: Saturday, 09-05-2026 Max. Marks: 70
Time: 03:00 PM To 06:00 PM

Instructions: 1) Q. No. 1 is compulsory. It should be solved in first 30 Minutes in Answer Book Each question carries one mark.
2) All questions are compulsory.
3) Figures to the right indicates full marks.
4) Assume suitable data whenever necessary.

MCQ/Objective Type Questions

Duration: 30 Minutes Marks:14

Q.1 Choose the correct alternatives from the option: 14

1) KVAR is equal to _____.
a) $\mathrm{KW}\sin\theta$ b) $\mathrm{KW}\cos\theta$
c) $\mathrm{KVA}\cos\theta$ d) $\mathrm{KW}\tan\theta$

2) A Unit when scheduled for connection to the system is said to be _____.
a) Loaded b) Disconnected
c) Hot reserve d) Committed

3) Rating of Compensator is given in _____.
a) MW b) KVAr
c) pf d) None of these

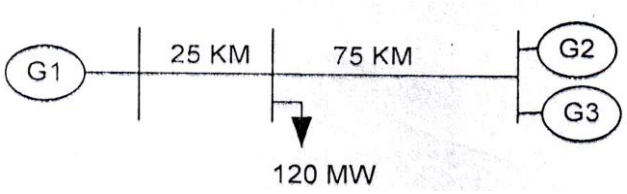
4) In Contingency Ranking, the severest fault will be ranked _____.
a) 1 b) Last
c) Will depend on type of fault d) Will depend on duration of fault

5) In a network with 4 generators and 25 lines, the number of generations shift factors are _____.
a) 4 b) 25
c) 100 d) 96

6) Voltage stability in power systems refers to _____.
a) The ability of the system to maintain steady voltages at all buses
b) The ability of the system to generate power continuously
c) The efficiency of transmission lines
d) The reduction of system losses

7) Which factor can significantly affect voltage stability?
a) Load demand b) Generator output
c) Transmission line reactance d) All of the above

8) A load Centre of 120 MW derives power from two power stations connected by 220 KV transmission lines of 25 KM and 75 Km as shown in the figure below



The generators G1, G2 & G3 are of 100 MW capacity each and have identical fuel cost characteristics. The minimum loss generation schedule for supplying the 120 MW load is

a) P1 = 80 MW + Losses; P2 = 20 MW; P3 = 20 MW
b) P1 = 60 MW; P2 = 20 MW; P3 = 40 MW + Losses
c) P1 = 40 MW; P2 = 40 MW; P3 = 40 MW + Losses
d) P1 = 30 MW + Losses; P2 = 45 MW; P3 = 45 MW

9) Unit of λ (Lagrange Multiplier) and B (loss coefficient) are _____.

a) Rs/Kwhr, Unitless
b) Rs/Kwhr, KW^{-1}
c) Rs/Kg, KW^{-1}
d) Rs/hr, KW^{-1}

10) If Kinetic energy of generator reduces _____.

a) Power decreases
b) Speed falls
c) Frequency Reduces
d) All of the above

11) Balance of real power maintains steady _____.

a) Voltage
b) Cost
c) Frequency
d) Voltage and frequency

12) Spinning reserve is defined as _____.

a) [Total generation output of all synchronized units at a particular time] + [load at that time + losses at that time]
b) [Total generation output of all synchronized units at a particular time] − [load at that time − losses at that time]
c) [Total generation output of all synchronized units at a particular time] − [load at that time + losses at that time]
d) None of these

13) In the DP method, the cost function $F_N(X)$ Represents _____.

a) Minimum cost in Rs/hr of Generation of N MW by X number of units.
b) Minimum cost in Rs/hr of Generation of X MW by N number of units.
c) Minimum cost in Rs/hr of Generation of N MW by X^{th} unit.
d) Minimum cost in Rs/hr of Generation of X MW by N^{th} unit.

14) In synchronous condensers, leading VARS are produced by _____.

a) Increasing Field Current
b) Decreasing Field Current
c) Increasing speed of the machine
d) Decreasing speed of the machine

2) Don't forget to Mention question paper set (P/Q/R/S) on top of page.
3) Figures to the right indicates full marks.

MCQ/Objective Type Questions

Duration: 30 Minutes Marks:14

Q.1 Choose the correct Alternatives. **14**

1) WAMS is _____.
a) Wide area Automation and Management System
b) Wide Area Measurement System
c) Wide Area Management System
d) West Automatic Management System

2) The main responsibility of Application layer in TCP/IP protocol architecture is _____.
a) Routing packets from source to destination across multiple layers
b) Allow users to access network resources
c) Transmits raw bits as signals between nodes
d) Provides reliable and application independent process to process delivery of Messages

3) Power quality is the ability of a system _____.
a) To operate causing disturbance or damage to loads and components
b) To operate without causing disturbance or damage to loads and components
c) To lose synchronism of the synchronous machines
d) None of the above

4) Which statement from the following is not true for OMS, _____?
   a) Prediction of location of transformer, fused, recloses or breaker that opened upon failure.
   b) Prioritizing restoration efforts and managing resources based upon criteria such as locations of emergency facilities, size of outages, and duration of outages.
   c) Providing information on extent of outages and number of customers impacted to management, media and regulators.
   d) It is a networking system using mesh topology to interact with consumers and utilities.

5) _____ supply the required data for the smart grid which helps the grid in providing an automated response.
   a) Smart meters
   b) Sensors
   c) Actuators
   d) PLC

6) Power quality is a major concern because of the _____.
   a) Sensitivity of digital and modern control equipment to distortion/PQ deterioration
   b) It does not cause disturbance or damage to loads and components
   c) Synchronous machines operate in synchronism
   d) Bus voltages are maintained

7) Which of the following is not a property associated with power quality of smart grids _____.
   a) Self-healing
   b) Frequency monitoring and control
   c) Load forecasting
   d) Asset management

8) Fiber optic is an example for _____.
   a) Home Area Networks
   b) Industry Area Networks (IAN)
   c) Wide Area Networks (WAN)
   d) Neighborhood Area Networks

9) In smart grid PLM means _____.
   a) Peak Load Management
   b) Plant Load Management
   c) Power Leakage Management
   d) Plant Leakage Management

10) The boundaries of the customer domain typically consider which type of meters _____.
   a) Energy services load
   b) Energy services interface
   c) Energy services demand
   d) Wattmeter

11) The conversion efficiency of a photo crystalline silicon solar cell is _____.

a) 12.5 to 15%
b) 11 to 14%
c) 10 to 13%
d) 9 to 12%

12) The following Type of inverter may not be suitable for grid connected mode?

a) Grid feeding converters
b) Grid Forming converters
c) Grid supporting Converters
d) None of the above

13) The unit where the meter signals are collected prior to onward transmission to the Central Monitoring Station (CMS) is called _____.

a) Data Control Unit
b) Data Monitoring Unit
c) Data Concentrator Unit
d) Data Processing Unit

14) The concept of national grid is based on maintaining _____.

a) Demand-supply relationship
b) Generation-supply relationship
c) Demand-generation relationship
d) None of the above

Set **Q**

Fourth. Y. (B.Tech.) (Electrical Engineering) (Sem - I) (New) (CBCS)
Examination: March/April – 2026
Smart Grid Technology (BTN07721)

Day & Date: Saturday, 09-05-2026 Max. Marks: 70
Time: 03:00 PM To 06:00 PM

Instructions: 1) Q. No. 1 is compulsory. It should be solved in the first 30 minutes in Answer Book Page no 03 (Starting page of the Answer Book). Each question carries one mark.
2) Don't forget to Mention question paper set (P/Q/R/S) on top of page.
3) Figures to the right indicates full marks.

MCQ/Objective Type Questions

Duration: 30 Minutes Marks:14

Q.1 Choose the correct Alternatives. **14**

1) Fiber optic is an example for _____.
a) Home Area Networks
b) Industry Area Networks (IAN)
c) Wide Area Networks (WAN)
d) Neighborhood Area Networks

2) In smart grid PLM means _____.
a) Peak Load Management
b) Plant Load Management
c) Power Leakage Management
d) Plant Leakage Management

3) The boundaries of the customer domain typically consider which type of meters _____.
a) Energy services load b) Energy services interface
c) Energy services demand d) Wattmeter

4) The conversion efficiency of a photo crystalline silicon solar cell is _____.
a) 12.5 to 15% b) 11 to 14%
c) 10 to 13% d) 9 to 12%

5) The following Type of inverter may not be suitable for grid connected mode?
a) Grid feeding converters
b) Grid Forming converters
c) Grid supporting Converters
d) None of the above

6) The unit where the meter signals are collected prior to onward transmission to the Central Monitoring Station (CMS) is called _____.

a) Data Control Unit
b) Data Monitoring Unit
c) Data Concentrator Unit
d) Data Processing Unit

7) The concept of national grid is based on maintaining _____.

a) Demand-supply relationship
b) Generation-supply relationship
c) Demand-generation relationship
d) None of the above

8) WAMS is _____.

a) Wide area Automation and Management System
b) Wide Area Measurement System
c) Wide Area Management System
d) West Automatic Management System

9) The main responsibility of Application layer in TCP/IP protocol architecture is _____.

a) Routing packets from source to destination across multiple layers
b) Allow users to access network resources
c) Transmits raw bits as signals between nodes
d) Provides reliable and application independent process to process delivery of Messages

10) Power quality is the ability of a system _____.

a) To operate causing disturbance or damage to loads and components
b) To operate without causing disturbance or damage to loads and components
c) To lose synchronism of the synchronous machines
d) None of the above

11) Which statement from the following is not true for OMS, _____?

a) Prediction of location of transformer, fused, recloses or breaker that opened upon failure.
b) Prioritizing restoration efforts and managing resources based upon criteria such as locations of emergency facilities, size of outages, and duration of outages.
c) Providing information on extent of outages and number of customers impacted to management, media and regulators.
d) It is a networking system using mesh topology to interact with consumers and utilities.

12) _____ supply the required data for the smart grid which helps the grid in providing an automated response.

a) Smart meters
b) Sensors
c) Actuators
d) PLC

13) Power quality is a major concern because of the _____.

a) Sensitivity of digital and modern control equipment to distortion/PQ deterioration
b) It does not cause disturbance or damage to loads and components
c) Synchronous machines operate in synchronism
d) Bus voltages are maintained

14) Which of the following is not a property associated with power quality of smart grids _____.

a) Self-healing
b) Frequency monitoring and control
c) Load forecasting
d) Asset management

Examination: March/April – 2026
Smart Grid Technology (BTN07721)

Day & Date: Saturday, 09-05-2026 Max. Marks: 56
Time: 03:00 PM To 06:00 PM

Instructions: 1) All questions are compulsory.
2) Figures to the right indicate full marks.

SECTION – I

Q.2 Solve Any Four. **16**

a) What is the need of Smart Grid? What will be the components of Smart Grid?

b) What are smart energy meters? Explain its function in smart grid.

c) Explain role of AMI in Smart Grid.

d) What is Geographic Information System (GIS)? Explain the components of GIS.

e) Explain functions of smart grid components.

Q.3 Solve Any Two. **12**

a) What is the Smart Grid? Overview of how Indian power market is organized.

b) Explain EMC and its importance in smart grid.

c) Explain how automatic meter reading can make the system Smarter.

SECTION – II

Q.4 Solve Any Four. **16**

a) Explain the concept of Power Quality and EMC in Smart Grid.

b) Describe web Based Power Quality Monitoring.

c) What is difference between STATCOM and DSTATCOM?

d) Describe the power quality issues of grid connected renewable energy resources.

e) What are the Visualization Techniques used in Smart Grid system.

Q.5 Solve Any Two. **12**

a) Explain Voltage source converters and Current source converters.

b) What is distribution system state the function of the distribution system? What are the methods of energy management?

c) Where are power electronic converters used? Why power electronics technology is important in the grid connected system?

MCQ/Objective Type Questions

Duration: 30 Minutes Marks:14

Q.1 Choose the correct alternatives from the given options. 14

1) What is the modern trend in electric power generation?
a) To have a large number of small size thermal plants located at different places
b) To have large size thermal plants near load centre
c) To have large size thermal plants located near coal fields
d) None of the above

2) Planning for power systems is essentially a projection of _____.
a) how the system should grow over a specific period of time
b) judgment about the future loads and the size of investment in generating capacity additions
c) transmission facilities expansion and reinforcements
d) All above

3) Transmission efficiency of line increases with the _____.
a) Decrease in power factor and voltage
b) Increase in power factor and voltage
c) Increase in power factor but Decrease in voltage
d) Increase in Voltage but Decrease in power factor

4) The main problem in implanting Distribution Automation in metros is _____.
a) RTUs b) Communication
c) D.A.S. d) control computers

5) The correlation technique relates system load to _____.
a) Various demographic factors b) Economic factors
c) Both a) and b) d) None of the above

6) Load forecasting method are _____.
a) Extrapolation b) Correlation
c) Combination of a) and b) d) All of the above

7) The load forecasting is method to predict _____.
a) Past loads b) Present loads
c) Future loads d) None of these

8) Transmission efficiency of line increases with the _____.
a) Decrease in power factor and voltage
b) Increase in power factor and voltage
c) Increase in power factor but decrease in voltage
d) Increase in Voltage but decrease in power factor

9) Energy conservation means _____.
a) Using Energy more efficiently
b) Reducing wastage of Energy
c) New investment in more efficient equipment
d) All above

10) Load flow study is carried out for _____.
a) Fault calculations b) Stability studies
c) System planning d) Frequency control

11) The objective of energy management includes _____.
a) Minimising energy costs
b) Minimising waste
c) Minimising environmental degradation
d) All the above

12) The reduction of utility load primarily during peak demand is known as _____.
a) Peak clipping b) Load shifting
c) Valley filling d) MTP analysis

13) The demand side management can be achieved by the technique of _____.
a) Time of day pricing and metering
b) Multi - utility power exchange model
c) Load management
d) All of these

14) Power factor of a load can be improved by using _____.
a) Static capacitors b) Synchronous condenser
c) Phase advancer d) All of the above

8) The main problem in implanting Distribution Automation in metros is _____.
   a) RTUs
   b) Communication
   c) D.A.S.
   d) control computers

9) The correlation technique relates system load to _____.
   a) Various demographic factors
   b) Economic factors
   c) Both a) and b)
   d) None of the above

10) Load forecasting method are _____.
   a) Extrapolation
   b) Correlation
   c) Combination of a) and b)
   d) All of the above

11) The load forecasting is method to predict _____.
   a) Past loads
   b) Present loads
   c) Future loads
   d) None of these

12) Transmission efficiency of line increases with the _____.
   a) Decrease in power factor and voltage
   b) Increase in power factor and voltage
   c) Increase in power factor but decrease in voltage
   d) Increase in Voltage but decrease in power factor

13) Energy conservation means _____.
   a) Using Energy more efficiently
   b) Reducing wastage of Energy
   c) New investment in more efficient equipment
   d) All above

14) Load flow study is carried out for _____.
   a) Fault calculations
   b) Stability studies
   c) System planning
   d) Frequency control

Fourth. Y. (B.Tech.) (Electrical Engineering) (Semester - I) (New) (CBCS) Examination: March/April – 2026
Power System Planning (BTN07711)

Day & Date: Monday, 11-05-2026 Max. Marks: 56
Time: 10:00 AM To 01:00 PM

Instructions: 1) All questions are compulsory.
2) Figures to the right indicate full marks.

SECTION – I

Q.2 Solve Any Four. **16**

a) Define the term load forecasting. Categorize loads in power system.

b) Describe different methodologies used for load forecasting.

c) Elaborate weather load model and explain how to get peak demand forecasting.

d) Write a short note on generation sources.

e) What do you mean by Distribution Automation? Explain tools of distribution automation.

Q.3 Solve Any Two. **12**

a) Explain generation system model and Cost analysis.

b) Explain what do you mean by system planning. State the objectives of system planning.

c) Explain Long term Planning.

SECTION – II

Q.4 Solve Any Four. **16**

a) Explain the Data required for Composite System Reliability and quality.

b) Write short note on listing of energy conservation opportunities (ECOs).

c) What do you mean by Demand Side Management?

d) Explain the objectives of Transmission Planning.

e) Discuss the steps involved in DSM planning and implementation.

Q.5 Solve Any Two. **12**

a) Describe the following terms of load control:

i) Peak clipping
ii) Valley filling
iii) Load shedding
iv) Strategic energy conservation

b) Explain New algorithms and methods relating to Demand Side Management.

c) Discuss the possibilities of energy conservation in various sectors.

MCQ/Objective Type Questions

Duration: 30 Minutes Marks:14

Q.1 Choose the correct alternatives from the given options. 14

1) Load forecasting method are _____.
a) Extrapolation b) Correlation
c) Combination of a) and b) d) All of the above

2) The load forecasting is method to predict _____.
a) Past loads b) Present loads
c) Future loads d) None of these

3) Transmission efficiency of line increases with the _____.
a) Decrease in power factor and voltage
b) Increase in power factor and voltage
c) Increase in power factor but decrease in voltage
d) Increase in Voltage but decrease in power factor

4) Energy conservation means _____.
a) Using Energy more efficiently
b) Reducing wastage of Energy
c) New investment in more efficient equipment
d) All above

5) Load flow study is carried out for _____.
a) Fault calculations b) Stability studies
c) System planning d) Frequency control

6) The objective of energy management includes _____.
a) Minimising energy costs
b) Minimising waste
c) Minimising environmental degradation
d) All the above

7) The reduction of utility load primarily during peak demand is known as _____.
   a) Peak clipping
   b) Load shifting
   c) Valley filling
   d) MTP analysis

8) The demand side management can be achieved by the technique of _____.
   a) Time of day pricing and metering
   b) Multi - utility power exchange model
   c) Load management
   d) All of these

9) Power factor of a load can be improved by using _____.
   a) Static capacitors
   b) Synchronous condenser
   c) Phase advancer
   d) All of the above

10) What is the modern trend in electric power generation?
   a) To have a large number of small size thermal plants located at different places
   b) To have large size thermal plants near load centre
   c) To have large size thermal plants located near coal fields
   d) None of the above

11) Planning for power systems is essentially a projection of _____.
   a) how the system should grow over a specific period of time
   b) judgment about the future loads and the size of investment in generating capacity additions
   c) transmission facilities expansion and reinforcements
   d) All above

12) Transmission efficiency of line increases with the _____.
   a) Decrease in power factor and voltage
   b) Increase in power factor and voltage
   c) Increase in power factor but Decrease in voltage
   d) Increase in Voltage but Decrease in power factor

13) The main problem in implanting Distribution Automation in metros is _____.
   a) RTUs
   b) Communication
   c) D.A.S.
   d) control computers

MCQ/Objective Type Questions

Duration: 30 Minutes Marks:14

Q.1 Choose the correct Answer. **14**

1) The function of steel wire in an ACSR conductor is to _____.
a) Compensate for skin effect
b) Take care of surges
c) Provide additional mechanical strength
d) Reduce inductance

2) First mode of propagation is called as _____.
a) Line to ground b) Line to line
c) Homopolar d) Both a) & c)

3) The measurement of electrostatic field of an e.h.v. line is done by _____.
a) Dipole b) Spherical Dipole
c) Parallel plate d) All of the above

4) In lossless transmission line theoretically have _____.
a) $r = 1 = 0$ b) $1 = g = 0$
c) $g = c = 0$ d) $r = g = 0$

5) The most accurate and versatile method of achieving reactive power compensation is by using _____.
a) Switched capacitors
b) Fixed capacitor with controlled reactor
c) Saturable reactor with capacitor bank
d) Switched capacitor with controlled reactor

6) Which of the following method may be used to inject reactive power in the transmission line?
a) Series capacitor b) Synchronous capacitors
c) Both a) and b) d) None of these

7) The conductors of an EHV line is selected on the basis of _____.
a) Current carrying capacity
b) Corona and RI performance
c) Line voltage
d) None of these

8) Operating 750 KV line gives AN at a level of _____.
a) 50 dB
b) 55.4 dB
c) 52 dB
d) 58.5 dB

9) For Aeolian vibration the frequency of vibration is usually limited to _____ Hz and the amplitudes less than ____ cm.
a) 20 Hz, 2.5 cm
b) 25 Hz, 2.5 cm
c) 50 Hz, 2.5 cm
d) 50 Hz, 3.5 cm

10) Voltage gradient on a transmission line conductor is highest _____.
a) at the surface of the conductor
b) at the centre of the conductor
c) at the distance of one radius from the surface
d) None of these

11) Refraction coefficient of voltage (K_T) for open ended line _____.
a) +2
b) 1
c) -1
d) 0

12) The over-voltage surges in power systems may be caused by _____.
a) lightning
b) Switching
c) resonance
d) any of the above

13) The dimensions of constants B and C are respectively _____and _____.
a) Ohm, Siemens
b) Mho, Siemens
c) Both are dimensionless
d) Siemens, Ohm

14) Insulation of the modern EHV lines is designed based on _____.
a) Lighting voltage
b) Switching voltage
c) Corona
d) RI

Q.2 Solve Any Four. **16**

a) Explain the need of extra high voltage for transmission system.

b) Explain limits for radio interference.

c) Explain reflection and refraction of travelling waves.

d) Explain the concept attenuation of travelling waves on transmission line.

e) How the audible noise is generated and what are its characteristics?

f) Derive differential equations and solutions for general case in travelling waves.

Q.3 Solve Any Two. **12**

a) Explain the different mechanical considerations in EHV line performance?

b) Derive the expression $P_c = \frac{1}{2} KC(V_m^2 - V_0^2)$ for the energy loss from charge-voltage diagram.

c) Derive the expression for open ended line double exponential response.

SECTION – II

Q.4 Solve Any Four. **16**

a) Explain in detail ferro-resonance over voltages.

b) Explain conductor-tower, conductor-ground and conductor-conductor clearances.

c) Describe static reactive compensating system.

d) State and explain the causes of over voltages.

e) Explain the term power circle diagram and its use.

f) What are the factors considered under steady state in design of EHV lines?

Q.5 Solve Any Two. **12**

a) Explain line insulation design based upon transient over voltages in detail.

b) Explain in detail sinusoidal excitation lumped parameter circuit.

c) A 100 MVA 230kV 50 Hz transformer has x_t = 12% and is connected to a line 200 km long which has an inductance of 1 mH/km. The filter, connected to the LV 33 kV side of the transformer, is required to suppress the 5^{th} harmonic generated by the TCR to 1% of I_n. Calculate the value of filter capacitor if the filter inductance used is 2mH.

Q.3 Solve Any Two. **12**

a) Explain the different mechanical considerations in EHV line performance?

b) Derive the expression $P_c = \frac{1}{2} KC(V_m^2 - V_0^2)$ for the energy loss from charge-voltage diagram.

c) Derive the expression for open ended line double exponential response.

SECTION – II

Q.4 Solve Any Four. **16**

a) Explain in detail ferro-resonance over voltages.

b) Explain conductor-tower, conductor-ground and conductor-conductor clearances.

c) Describe static reactive compensating system.

d) State and explain the causes of over voltages.

e) Explain the term power circle diagram and its use.

f) What are the factors considered under steady state in design of EHV lines?

Q.5 Solve Any Two. **12**

a) Explain line insulation design based upon transient over voltages in detail.

b) Explain in detail sinusoidal excitation lumped parameter circuit.

c) A 100 MVA 230kV 50 Hz transformer has x_t = 12% and is connected to a line 200 km long which has an inductance of 1 mH/km. The filter, connected to the LV 33 kV side of the transformer, is required to suppress the 5^{th} harmonic generated by the TCR to 1% of I_n. Calculate the value of filter capacitor if the filter inductance used is 2mH.

Fourth. Y. (B.Tech.) (Electrical Engineering) (Semester - I) (New) (CBCS) Examination: March/April – 2026
Advanced Electrical Drives (BTN07714)

Day & Date: Monday, 11-05-2026 Max. Marks: 70
Time: 10:00 AM To 01:00 PM

Instructions: 1) Q. No. 1 is compulsory. It should be solved in the first 30 minutes in Answer Book Page no 03 (Starting page of the Answer Book). Each question carries one mark.
2) Don't forget to Mention question paper set (P/Q/R/S) on top of page.
3) Figures to the right indicates full marks.

MCQ/Objective Type Questions

Duration: 30 Minutes Marks:14

Q.1 Choose the correct Answer. **14**

1) The operating speed of a synchronous motor can be changed to new fixed value by _____.
a) Changing the load
b) Changing the supply voltage
c) Changing frequency
d) Using brakes

2) A four quadrant operation requires _____.
a) Two full converters in series
b) Two full converters connected in parallel
c) Two full converter connected in back to back
d) Two semi converters connected in back to back

3) For high frequency choppers the device that is preferred is _____.
a) Thyristor b) TRIAC
c) Transistor d) GTO

4) During the starting of a slip ring induction motor using rotor resistance starter, the insertion of resistance in the rotor circuit causes _____.
a) Stator current to increase and torque to decrease
b) Stator current to decrease and torque to increase
c) Stators current to increase and power factor to decrease
d) Power factor to decrease and torque to increase

5) Which duty cycle is preferred if the load requires a constant power for short period of time and rest for sufficient longer duration?
a) Short Time duty
b) Intermittent duty
c) Intermittent duty with starting
d) Intermittent duty with starting and braking

6) The slip of an induction motor normally does not depend on _____.
a) rotor speed
b) synchronous speed
c) shaft torque
d) core loss component

7) Efficiency by using rotor resistance control in IM is _____.
a) High
b) Low
c) Very high
d) Very low

8) Speed control by variation of field flux results in _____.
a) Constant power drive
b) Constant torque drive
c) Variable power drive
d) None of the above

9) Full-converter can be used in DC motor for regenerative braking in _____.
a) Constant Operation
b) Variable Operation
c) Inversion Operation
d) Opposite Operation

10) Reluctance motor is a _____.
a) Variable torque motor
b) Low torque variable speed motor
c) Self starting type synchronous motor
d) Low noise, slow speed motor

11) Cycloconverter drive has applications in _____.
a) Low power and low speed operations
b) High power and high speed operations
c) Low power and high speed operations
d) High power and low speed operations

12) Applications of dc motor is restricted to a few load speed applications because of _____.
a) cost of motor is high
b) mechanical commutation problems
c) maintenance problem
d) all of above

13) Stepper motor is popular for _____.
a) Speed control
b) Position control
c) Torque control
d) Both a) and b)

14) Which of the following method is employed when regenerative braking is necessary?
a) DC Chopper
b) Variable Resistor
c) Inverter Rectifier
d) Motor-generator

Q.2 Solve Any Four **16**

a) Describe in details dynamics of Electric Drives?

b) Describe in details Characteristics of DC motors.

c) Explain the working of phase controlled converter fed DC drives.

d) Explain stator voltage control of an induction motor with speed torque characteristics.

e) Explain the chopper fed DC separately excited motor in motoring mode.

Q.3 Solve Any Two. **12**

a) Derive fundamental torque equations and components of load torque.

b) Explain the static Kramer method and static Schrebius method of speed control of three phase induction motor.

c) Describe in details dual-converter control of DC drive.

SECTION – II

Q.4 Solve Any Four. **16**

a) Explain Losses in electrical drive system.

b) Draw and explain variable frequency control for synchronous motors.

c) Explain with circuit diagram converter circuit for switched reluctance motor.

d) Describe in details Energy efficient operation of drives.

e) Explain drive circuit for stepper motor with neat sketch.

Q.5 Solve Any Two. **12**

a) Describe in details improvement of power factor and quality of supply.

b) With neat sketch explain VSI feed induction motor drive also draw block diagram for closed loop control.

c) Draw a neat diagram & explain the Cycloconverter control for synchronous motors.

MCQ/Objective Type Questions

Duration: 30 Minutes Marks:14

Q.1 Multiple choice questions: 14

1) In a forced or active solar water heating system, how is water circulated through the collector and storage tank?
a) By natural convection b) Using a pump or circulator
c) Through a heat exchanger d) Through a photovoltaic panel

2) In a passive solar heating system, what is the role of south-facing windows?
a) To minimize solar heat gain b) To maximize solar heat gain
c) To provide ventilation d) To generate electricity

3) In a box-type dryer, what role does the fan play in the drying process?
a) Temperature control b) Humidity regulation
c) Air circulation d) Product color enhancement

4) What is Net Metering in the context of solar PV systems?
a) Meter reading at night
b) Exchanging old meters for new ones
c) Billing method that credits excess energy back to the grid
d) Meter calibration process

5) To prevent freezing in a solar water heating system, what type of fluid is often used in the collector loop?
a) Water b) Antifreeze solution
c) Oil d) Air

6) In a Solar Vapour Compression Refrigeration system, what is the role of the compressor?
a) To absorb heat from the surroundings
b) To generate solar energy
c) To pressurize the refrigerant, making it hot
d) To circulate cold air

7) Which factor is crucial for determining the efficiency of a solar PV rooftop system?
a) Roof color
b) Panel orientation
c) Building height
d) Local population density

8) What is Triethylene Glycol primarily used for?
a) As a refrigerant to cool the air
b) As a fuel to generate heat
c) As an absorbent to capture heat from the solar collectors
d) As a coolant for the solar panels

9) What is the role of the desiccant material?
a) To heat the incoming air
b) To absorb and remove moisture from the incoming air
c) To cool the indoor air
d) To filter the air

10) How does a wick-type solar still function?
a) By using mirrors to concentrate sunlight
b) By absorbing sunlight with photovoltaic cells
c) By using a wick to transport water for evaporation
d) By converting sunlight into heat directly

11) In food processing, hot air is often used for _____.
a) Freezing
b) Sterilization
c) Fermentation
d) Dehydration

12) In industrial processes, hot air is commonly used for _____.
a) Electricity generation
b) Water purification
c) Space heating
d) Metal casting

13) Which factor is crucial for determining the efficiency of a solar PV rooftop system?
a) Roof color
b) Panel orientation
c) Building height
d) Local population density

14) In a passive solar building, what is the primary purpose of shading devices?
a) To block all sunlight from entering the building
b) To reduce glare
c) To control heat gain and prevent overheating
d) To create a dark interior environment

c) Oil
d) Air

13) In a Solar Vapour Compression Refrigeration system, what is the role of the compressor?
a) To absorb heat from the surroundings
b) To generate solar energy
c) To pressurize the refrigerant, making it hot
d) To circulate cold air

14) Which factor is crucial for determining the efficiency of a solar PV rooftop system?
a) Roof color
b) Panel orientation
c) Building height
d) Local population density

Set **Q**

Fourth. Y. (B.Tech.) (Electrical Engineering) (Semester - I) (New) (CBCS) Examination: March/April – 2026
Advanced Applications in Solar Energy Technology (BTN07715)

Day & Date: Monday, 11-05-2026 Max. Marks: 56
Time: 10:00 AM To 01:00 PM

Instructions: 1) All questions are compulsory.
2) Figures to the right indicate full marks.

SECTION – I

Q.2 Attempt Any Three. **12**

a) Explain
i) Freezing
ii) Scaling

b) Describe the “Direct Gain” in passive solar design.

c) Explain the concept of “Solar Vapour Compression Refrigeration.”

d) Discuss with neat diagram working of Thermal storage wall.

Q.3 Attempt Any Two. **16**

a) Explain
i) Natural circulation water heating
ii) Forced circulation water heating

b) Explain any two methods of passive cooling of building.

c) What is Intermittent absorption refrigeration system?

SECTION – II

Q.4 Attempt Any Three. **12**

a) Explain simple solar still.

b) Describe Box type solar dryer.

c) What is net metering in rooftop system?

d) Discuss material problems in solar still.

Q.5 Attempt Any Two. **16**

a) Explain concept of wick type solar still & active solar still.

b) Explain Bin type grain dryer & solar timber drying.

c) Describe the concept of solar water pumping system with its advantages.

Seat No.	

Set **R**

Fourth. Y. (B.Tech.) (Electrical Engineering) (Semester - I) (New) (CBCS) Examination: March/April – 2026
Advanced Applications in Solar Energy Technology (BTN07715)

Day & Date: Monday, 11-05-2026 Max. Marks: 70
Time: 10:00 AM To 01:00 PM

Instructions: 1) Q. No. 1 is compulsory. It should be solved in the first 30 minutes in Answer Book Page no 03 (Starting page of the Answer Book). Each question carries one mark.
2) Don't forget to Mention question paper set (P/Q/R/S) on top of page.
3) Figures to the right indicates full marks.

MCQ/Objective Type Questions

Duration: 30 Minutes Marks:14

Q.1 Multiple choice questions: **14**

1) In food processing, hot air is often used for _____.
a) Freezing b) Sterilization
c) Fermentation d) Dehydration

2) In industrial processes, hot air is commonly used for _____.
a) Electricity generation b) Water purification
c) Space heating d) Metal casting

3) Which factor is crucial for determining the efficiency of a solar PV rooftop system?
a) Roof color b) Panel orientation
c) Building height d) Local population density

4) In a passive solar building, what is the primary purpose of shading devices?
a) To block all sunlight from entering the building
b) To reduce glare
c) To control heat gain and prevent overheating
d) To create a dark interior environment

5) In a forced or active solar water heating system, how is water circulated through the collector and storage tank?
a) By natural convection b) Using a pump or circulator
c) Through a heat exchanger d) Through a photovoltaic panel

6) In a passive solar heating system, what is the role of south-facing windows?
a) To minimize solar heat gain b) To maximize solar heat gain
c) To provide ventilation d) To generate electricity

7) In a box-type dryer, what role does the fan play in the drying process?
a) Temperature control
b) Humidity regulation
c) Air circulation
d) Product color enhancement

8) What is Net Metering in the context of solar PV systems?
a) Meter reading at night
b) Exchanging old meters for new ones
c) Billing method that credits excess energy back to the grid
d) Meter calibration process

9) To prevent freezing in a solar water heating system, what type of fluid is often used in the collector loop?
a) Water
b) Antifreeze solution
c) Oil
d) Air

10) In a Solar Vapour Compression Refrigeration system, what is the role of the compressor?
a) To absorb heat from the surroundings
b) To generate solar energy
c) To pressurize the refrigerant, making it hot
d) To circulate cold air

11) Which factor is crucial for determining the efficiency of a solar PV rooftop system?
a) Roof color
b) Panel orientation
c) Building height
d) Local population density

12) What is Triethylene Glycol primarily used for?
a) As a refrigerant to cool the air
b) As a fuel to generate heat
c) As an absorbent to capture heat from the solar collectors
d) As a coolant for the solar panels

13) What is the role of the desiccant material?
a) To heat the incoming air
b) To absorb and remove moisture from the incoming air
c) To cool the indoor air
d) To filter the air

14) How does a wick-type solar still function?
a) By using mirrors to concentrate sunlight
b) By absorbing sunlight with photovoltaic cells
c) By using a wick to transport water for evaporation
d) By converting sunlight into heat directly

MCQ/Objective Type Questions

Duration: 30 Minutes Marks:14

Q.1 Choose the correct answer. **14**

1) What is an Automobile?
a) self-propelled vehicle
b) used for carrying passengers and goods on the ground
c) contains the power source for its propulsion
d) All of the mentioned

2) Gradient resistance for a vehicle depends on which of the following factors?
a) Weight of the vehicle b) Size of the vehicle
c) Width of tyres d) Speed of the vehicle

3) What does the 'ply rating' refer to?
a) Aspect ratio
b) Rated strength
c) Recommended inflation pressure
d) The actual number of plies

4) What is the function of the Electronic control unit in Anti-lock braking system?
a) Monitoring the speed of the wheel
b) Decreases the stopping distance
c) Provides electronic stability control
d) Maintaining the tractive force

5) A vehicle driving performance is usually evaluated by _____.
a) Acceleration time b) Maximum speed
c) Gradeability d) All of the above

6) An under-inflated tyre will wear the tread most _____.
- a) Near the centre
- b) Near the edges
- c) In the lateral direction
- d) In the cross direction

7) The capacity of a battery is usually expressed in terms of _____.
- a) Volts
- b) Amperes
- c) Weight
- d) Ampere hours

8) When the front wheels of a vehicle are locked during braking, then _____.
- a) Stopping distance becomes extremely long
- b) Front tyres skid across the road surface, and the vehicle spins around
- c) Rear tyres skid across the road surface, and the vehicle spins around
- d) Driver loses control over the steering, and the vehicle continues moving in its current direction

9) What is the primary purpose of a demist test in a vehicle?
- a) To evaluate the vehicle's audio system
- b) To assess the effectiveness of the demisting system in clearing condensation and fog from the windshield
- c) To measure the vehicle's fuel efficiency
- d) To check the tire pressure

10) What is the typical outcome of a successful type approval process?
- a) The product is eligible for warranty coverage
- b) The product can be sold in the market legally
- c) The product's price is regulated by the government
- d) The product must be recalled from the market

11) In noise testing, which instrument is used to measure sound levels and frequencies?
- a) Voltmeter
- b) Tachometer
- c) Sound level meter
- d) Spectrometer

12) What is the advantage of using HiL testing for EVs/HEVs?
- a) It is more cost-effective than physical testing
- b) It eliminates the need for vehicle prototypes
- c) It can simulate a wide range of operating conditions and scenarios
- d) It speeds up the charging process

13) What is the primary purpose of tell-tales (warning lights) in a vehicle's dashboard?
- a) To enhance the vehicle's aesthetics
- b) To provide ambient lighting in the cabin
- c) To communicate important vehicle information and warnings
- d) To control the vehicle's entertainment system

14) What is the full form of CMVR in the context of Indian road transport?

a) Central Motor Vehicle Rules
b) Central Ministry for Vehicle Regulation
c) Comprehensive Motor Vehicle Report
d) Central Motor Vehicle Registry

1) An under-inflated tyre will wear the tread most _____.
a) Near the centre b) Near the edges
c) In the lateral direction d) In the cross direction

2) The capacity of a battery is usually expressed in terms of _____.
a) Volts b) Amperes
c) Weight d) Ampere hours

3) When the front wheels of a vehicle are locked during braking, then _____.
a) Stopping distance becomes extremely long
b) Front tyres skid across the road surface, and the vehicle spins around
c) Rear tyres skid across the road surface, and the vehicle spins around
d) Driver loses control over the steering, and the vehicle continues moving in its current direction

4) What is the primary purpose of a demist test in a vehicle?
a) To evaluate the vehicle's audio system
b) To assess the effectiveness of the demisting system in clearing condensation and fog from the windshield
c) To measure the vehicle's fuel efficiency
d) To check the tire pressure

5) What is the typical outcome of a successful type approval process?
a) The product is eligible for warranty coverage
b) The product can be sold in the market legally
c) The product's price is regulated by the government
d) The product must be recalled from the market

6) In noise testing, which instrument is used to measure sound levels and frequencies?
   a) Voltmeter
   b) Tachometer
   c) Sound level meter
   d) Spectrometer

7) What is the advantage of using HiL testing for EVs/HEVs?
   a) It is more cost-effective than physical testing
   b) It eliminates the need for vehicle prototypes
   c) It can simulate a wide range of operating conditions and scenarios
   d) It speeds up the charging process

8) What is the primary purpose of tell-tales (warning lights) in a vehicle's dashboard?
   a) To enhance the vehicle's aesthetics
   b) To provide ambient lighting in the cabin
   c) To communicate important vehicle information and warnings
   d) To control the vehicle's entertainment system

9) What is the full form of CMVR in the context of Indian road transport?
   a) Central Motor Vehicle Rules
   b) Central Ministry for Vehicle Regulation
   c) Comprehensive Motor Vehicle Report
   d) Central Motor Vehicle Registry

10) What is an Automobile?
   a) self-propelled vehicle
   b) used for carrying passengers and goods on the ground
   c) contains the power source for its propulsion
   d) All of the mentioned

11) Gradient resistance for a vehicle depends on which of the following factors?
   a) Weight of the vehicle
   b) Size of the vehicle
   c) Width of tyres
   d) Speed of the vehicle

12) What does the ‘ply rating’ refer to?
   a) Aspect ratio
   b) Rated strength
   c) Recommended inflation pressure
   d) The actual number of plies

13) What is the function of the Electronic control unit in Anti-lock braking system?
   a) Monitoring the speed of the wheel
   b) Decreases the stopping distance
   c) Provides electronic stability control
   d) Maintaining the tractive force

14) A vehicle driving performance is usually evaluated by _____.

a) Acceleration time
b) Maximum speed
c) Gradeability
d) All of the above

Seat No.		Set	S

Fourth. Y. (B.Tech.) (Electrical Engineering) (Semester - I) (New) (CBCS) Examination: March/April – 2026
Testing & Certification of Electric & Hybrid vehicles (BTN07719)

Day & Date: Wednesday, 13-05-2026 Max. Marks: 56
Time: 10:00 AM To 01:00 PM

Instructions: 1) All questions are compulsory.
2) Figures to the right indicate full marks.

SECTION – I

Q.2 Solve Any Four. **16**

a) Describe M, N & O categories of vehicle.

b) Describe various performance parameters of vehicle.

c) Explain the arrangement of foot controls for M1 type vehicle.

d) Explain Energy consumption calculation of electric vehicle.

e) What is dynamic testing of vehicle? Explain the factors affecting dynamic testing.

f) Explain the procedure of constant speed fuel consumption test of vehicle.

Q.3 Solve Any Two. **12**

a) State the required instruments for testing of vehicles. Also explain any four types of test tracks.

b) Explain the requirement of temporary cabin for Drive-Away-Chassis.

c) Explain grade ability test of vehicle.

SECTION – II

Q.4 Solve Any Four. **16**

a) Describe hinges and latches test of vehicle.

b) Explain drivers field of vision.

c) Explain the tests for safety requirements of traction batteries.

d) Explain fuel tank test of vehicle.

e) Describe the requirements of Electric Vehicle Conductive DC Charging System.

f) State and explain hybrid electric vehicles tests (M and N category).

Q.5 Solve Any Two. **12**

a) Describe windscreen laminated and toughened safety glass test of vehicle.

b) Tests for Hybrid Electric System Intended for Retro-fitment on Vehicles of M and N Category (GVW < 3500 kg).

c) Describe the requirements of Electric Vehicle Conductive AC Charging System.

Fourth Y. (B.Tech.) (Electrical Engineering) (Semester - II) (New) (CBCS) Examination: March/April – 2026
Electrical Estimation, Installation, and Testing (BTN07802)

Day & Date: Thursday, 14-05-2026 Max. Marks: 50
Time: 03:00 PM To 05:00 PM

Instructions:1) Q. No. 1 is compulsory. It should be solved in the first 20 minutes in Answer Book Page no 03 (Starting page of the Answer Book). Each question carries one mark.
2) Don't forget to Mention question paper set (P/Q/R/S) on top of page.
3) Figures to the right indicates full marks.
4) Make suitable assumptions (if necessary and state them clearly).

MCQ/Objective Type Questions

Duration: 20 Minutes Marks:10

Q.1 Choose the correct Answer. 10

1) In fire extinguisher we use _____.
a) CO_2 b) SO_2
c) O_2 d) H_2O

2) Do's and Don'ts are observed carefully in safety precautions as per _____.
a) IS 5216-1962 b) IS 5216-1964
c) IS 5216-1966 d) IS 5216-1969

3) What should be the insulation resistance in case of PVC wires?
a) 12.5 MΩ / number of outlet b) 82.5 MΩ/ number of outlet
c) 2.5 MΩ / number of outlet d) 10.5 MΩ/ number of outlet

4) Polarization index is greater than _____ for class A insulation.
a) 1 b) 1.5
c) 2 d) 2.5

5) Brake test is _____ method of testing machine.
a) Regenerative b) Direct
c) Indirect d) All of these

6) The torque of induction motor is _____.
a) Directly proportional to V b) Directly proportional to V^2
c) Inversely proportional to V d) Inversely proportional to V^2

7) When motor arranged in the same line as that of driven machine this coupling is also called as _____.
a) Direct coupling b) Indirect coupling
c) Both a) and b) d) None of these

8) Depth of foundation is dependent on _____.

a) Cost of equipment
b) Frequency
c) H.P. rating
d) None of these

9) Which of the following factors affects on life of insulating material ____.

a) Temperature
b) Deposition of dust
c) Impurities
d) All of these

10) In insulation resistance test of 132 kv transformer, minimum insulation resistance is _____.

a) 250MΩ
b) 500MΩ
c) 750MΩ
d) 1000MΩ

MCQ/Objective Type Questions

Duration: 20 Minutes Marks:10

Q.1 Choose the correct alternatives from the options. 10

1) Mechatronics is the integration of which of the following engineering fields?
a) Mechanical, Electrical, and Civil Engineering
b) Mechanical, Electrical, and Computer Engineering
c) Civil, Chemical, and Electrical Engineering
d) Electrical, Civil, and Marine Engineering

2) In the Mechatronic design process, the first step is _____.
a) System integration b) Conceptual design
c) Problem identification d) Detailed design

3) Which of the following is a correct pair of design type and example?
a) Original design - Modifying an existing machine
b) Adaptive design - Creating a new invention
c) Redesign - Improving an existing system for better performance
d) Original design - Copying an existing system

4) What is the main purpose of modeling in Mechatronic systems?
a) To build the hardware directly
b) To represent and analyze the behavior of a real system
c) To increase production speed
d) To design mechanical parts only

5) Which of the following tools is commonly used for model simulation in Mechatronics?
a) AutoCAD b) MATLAB/Simulink
c) MS Word d) Photoshop

6) Simulator coupling is used to _____.
   a) Increase motor speed
   b) Reduce mechanical vibrations
   c) Connect different simulation software for co-simulation
   d) Convert analog signals to digital signals

7) The main function of a DAQ (Data Acquisition) card is to _____.
   a) Provide mechanical movement to actuators
   b) Convert electrical signals from sensors into digital data
   c) Control power supply to motors
   d) None of the above

8) In Mechatronics, an Ethernet switch is mainly used for _____.
   a) Connecting mechanical components
   b) Providing high-speed data networking between devices
   c) Converting analog signals to digital
   d) Reducing electrical noise

9) The purpose of a Man-Machine Interface (MMI) is to _____.
   a) Enable interaction between human operators and machines
   b) Control electrical circuits directly
   c) Increase motor efficiency
   d) Convert digital signals into analog form

10) The autofocus mechanism in modern cameras mainly works on the principle of _____.
   a) Measuring distance using sound waves
   b) Detecting image sharpness and adjusting lens position
   c) Increasing image brightness
   d) Controlling shutter speed manually

Time: 03:00 PM To 05:00 PM

Instructions: 1) Q. No. 1 is compulsory. It should be solved in the first 20 minutes in answer book Page no 03 (Starting page of the Answer Book). Each question carries one mark.
2) Don't forget to Mention question paper set (P/Q/R/S) on top of page.
3) Figures to the right indicate full marks.

MCQ/Objective Type Questions

Duration: 20 Minutes Marks:10

Q.1 Choose the correct alternatives from the options. 10

1) The purpose of a Man-Machine Interface (MMI) is to _____.
a) Enable interaction between human operators and machines
b) Control electrical circuits directly
c) Increase motor efficiency
d) Convert digital signals into analog form

2) The autofocus mechanism in modern cameras mainly works on the principle of _____.
a) Measuring distance using sound waves
b) Detecting image sharpness and adjusting lens position
c) Increasing image brightness
d) Controlling shutter speed manually

3) Mechatronics is the integration of which of the following engineering fields?
a) Mechanical, Electrical, and Civil Engineering
b) Mechanical, Electrical, and Computer Engineering
c) Civil, Chemical, and Electrical Engineering
d) Electrical, Civil, and Marine Engineering

4) In the Mechatronic design process, the first step is _____.
a) System integration b) Conceptual design
c) Problem identification d) Detailed design

5) Which of the following is a correct pair of design type and example?
a) Original design - Modifying an existing machine
b) Adaptive design - Creating a new invention
c) Redesign - Improving an existing system for better performance
d) Original design - Copying an existing system

6) What is the main purpose of modeling in Mechatronic systems?
a) To build the hardware directly
b) To represent and analyze the behavior of a real system
c) To increase production speed
d) To design mechanical parts only

7) Which of the following tools is commonly used for model simulation in Mechatronics?
a) AutoCAD
b) MATLAB/Simulink
c) MS Word
d) Photoshop

8) Simulator coupling is used to _____.
a) Increase motor speed
b) Reduce mechanical vibrations
c) Connect different simulation software for co-simulation
d) Convert analog signals to digital signals

9) The main function of a DAQ (Data Acquisition) card is to _____.
a) Provide mechanical movement to actuators
b) Convert electrical signals from sensors into digital data
c) Control power supply to motors
d) None of the above

10) In Mechatronics, an Ethernet switch is mainly used for _____.
a) Connecting mechanical components
b) Providing high-speed data networking between devices
c) Converting analog signals to digital
d) Reducing electrical noise

Fourth Y. (B.Tech.) (Electrical Engineering) (Semester - II) (New) (CBCS) Examination: March/April – 2026
Mechatronics (BTN07803)

Day & Date: Thursday, 14-05-2026 Max. Marks: 40
Time: 03:00 PM To 05:00 PM

Instructions: 1) All questions are compulsory.
2) Figures to the right indicate full marks.

SECTION – I

Q.2 Attempt Any Five questions. **20**

a) Explain the key elements of a Mechatronic system.

b) Differentiate between Traditional design and Mechatronic design.

c) Write the steps involved in the Mechatronic design process.

d) Explain different types of design in Mechatronics.

e) Define modeling and explain its importance in Mechatronic systems.

f) Explain the process of model development.

SECTION– II

Q.3 Attempt Any Five questions. **20**

a) Explain the functions and importance of a DAQ (Data Acquisition) card.

b) What is an Ethernet switch? Why is it used in Mechatronic systems?

c) Explain the function and components of an Engine Management System (EMS).

d) Describe temperature control using a PID controller.

e) Describe the components and operation of a pH control system.

f) Write short notes on micro-robots and their applications.

MCQ/Objective Type Questions

Duration: 20 Minutes Marks:10

Q.1 Choose the Correct Alternatives from the Options. 10

1) What is the average power per unit area of solar radiation received outside the Earth's atmosphere?
a) Solar constant b) Solar radiation geometry
c) Spectral distribution d) Extraterrestrial radiation

2) What empirical equations are commonly used to predict the availability of solar radiation?
a) Newton's laws b) Maxwell's equations
c) Beer-Lambert law d) Solar radiation model

3) What is the term used to describe the process of adjusting the operating point of a photovoltaic (PV) system to maximize power output?
a) Solar tracking
b) Peak power point operation
c) MPPT control
d) PV efficiency optimization

4) In which type of PV system application would you expect to find the highest demand for energy storage solutions?
a) Residential b) Commercial
c) Industrial d) Off-grid

5) What statistical data are used to assess wind speed characteristics at a specific location?
a) Wind speed statistics b) Turbine selection criteria
c) Site evaluation reports d) Wind farm simulations

6) Which factor is essential for the design of a wind turbine rotor?
a) Blade color b) Blade length
c) Blade material d) Blade weight

7) Which biomass conversion technology involves the breakdown of organic matter in the absence of oxygen to produce biogas?

a) Anaerobic digestion
b) Ethanol fermentation
c) Biomass gasification
d) Biodiesel production

8) Which type of waste can be used for power generation from municipal solid waste (MSW)?

a) Organic waste
b) Glass waste
c) Plastic waste
d) Metal waste

9) What are grid codes?

a) Regulations that govern the operation of electrical grids
b) Standards for the design of renewable energy systems
c) Guidelines for optimizing grid reliability
d) Protocols for grid maintenance

10) What does life cycle costing involve in the context of renewable energy systems?

a) Calculating the total cost of ownership of a renewable energy system over its entire lifespan
b) Estimating the potential lifespan of a renewable energy system
c) Analyzing the environmental impact of renewable energy technologies
d) Comparing the costs of renewable energy systems with those of fossil fuel-based systems

Instructions: 1) All questions are compulsory.
2) Figures to the right indicate full marks.

SECTION – I

Q.2 Attempt (Any Two) **08**

a) Write Short note on concentrating solar power (CSP) plants.

b) What are the advantages and limitations of using parabolic dish technology in CSP systems?

c) Describe the role of maximum power point tracking (MPPT) in optimizing the performance of solar energy systems.

Q.3 Attempt (Any Two) **12**

a) Discuss the key concepts related to solar radiation at the Earth's surface.

b) Discuss the key differences in the design considerations for photovoltaic (PV) systems in residential, commercial, and industrial applications.

c) Explain the concept of power contained in wind and how it is converted into usable energy in wind turbine systems.

SECTION – II

Q.4 Attempt (Any Two) **08**

a) Discuss the power-speed characteristics and torque-speed characteristics of wind turbines.

b) Discuss the factors affecting biogas production in biogas technologies.

c) What is co-generation? How co-generation leads to energy conservation.

Q.5 Attempt (Any Two) **12**

a) Discuss the classification of biomass and the different types of biomass resources available for energy production. What are the factors influencing their energy potential?

b) Describe the different types of biomass gasifiers, what are their advantages, disadvantages, and applications?

c) Discuss the challenges and benefits of integrating renewable energy sources (RES) with the existing electrical grid.

MCQ/Objective Type Questions

Duration: 20 Minutes Marks: 10

Q.1 Choose the correct alternatives from the options. 10

1) In the given options, the non-commercial source of energy is _____.
a) Coal b) Lignite
c) Firewood d) Refined petroleum products

2) One unit of electricity is equivalent to _____ kcal heat units.
a) 800 b) 860
c) 400 d) 680

3) In Cogeneration, the system efficiencies can go up to _____.
a) 70 b) 80
c) 90 d) 60

4) Non-contact speed measurements can be carried out by _____.
a) Tachometer b) Stroboscope
c) Oscilloscope d) Speedometer

5) Sankey diagram shows in graphics _____.
a) Energy input b) Energy output
c) Energy balance d) All of the above

6) The support for energy management is expressed in a formal written declaration of commitment. This is called _____.
a) Company policy b) Management policy
c) Energy policy d) Energy efficiency

7) The force field analysis in energy action planning deals with barrier having _____.
a) Positive force only
b) Negative force only
c) Both negative and positive force
d) No force

8) Energy manger should be well versed with _____.
   a) Manufacturing and processing skills
   b) Managerial and technical skills
   c) Technical and marketing skills
   d) Managerial and Commercial Skills

9) The judicious and effective use of energy to maximize profits and enhance competitive positions". This can be the definition of _____.
   a) Energy conservation
   b) Energy management
   c) Energy policy
   d) Energy Audit

10) Demand Side Management is required to _____.
   a) Reduce overall cost of installed capacity
   b) Reduce needs of peaking station
   c) Ensure quality and equity of supply
   d) All of the above

Time: 03:00 PM To 05:00 PM

Instructions: 1) All questions are compulsory.
2) Figures to the right indicate full marks.

Section – I

Q.2 Attempt Any Two. **08**

a) What are the necessary skills of Energy Manager?

b) What is the energy conservation and it's important?

c) Define the following terms in Details:
i) Primary and Secondary Energy
ii) Commercial and Non-Commercial

Q.3 Attempt Any Two. **12**

a) Write a short note on solar thermal technology as energy source.

b) What are the duties and responsibilities of Energy Manager?

c) Explain the Indian Electricity Act, 2003.

Section – II

Q.4 Attempt Any Two. **08**

a) Write a note on Simple Payback Period.

b) Explain the need of Energy Audit.

c) What is co-generation? How co-generation leads to energy conservation?

Q.5 Attempt Any Two. **12**

a) Explain various instruments with function of each used to carryout Energy Audit.

b) Explain the various types of Energy Audit.

c) Explain the opportunities for energy conservation in illumination.

Fourth Y. (B.Tech.) (Electrical Engineering) (Semester - II) (New) (CBCS) Examination: March/April – 2026
Electrical Energy Audit and Management (BTN07805)

Day & Date: Monday, 18-05-2026 Max. Marks: 50
Time: 03:00 PM To 05:00 PM

Instructions: 1) Q. No. 1 is compulsory. It should be solved in the first 20 minutes in answer book Page no 03 (Starting page of the Answer Book). Each question carries one mark.
2) Don't forget to Mention question paper set (P/Q/R/S) on top of page.
3) Figures to the right indicates full marks.

MCQ/Objective Type Questions

Duration: 20 Minutes Marks: 10

Q.1 Choose the correct alternatives from the options. 10

1) The support for energy management is expressed in a formal written declaration of commitment. This is called _____.
a) Company policy b) Management policy
c) Energy policy d) Energy efficiency

2) The force field analysis in energy action planning deals with barrier having _____.
a) Positive force only
b) Negative force only
c) Both negative and positive force
d) No force

3) Energy manger should be well versed with _____.
a) Manufacturing and processing skills
b) Managerial and technical skills
c) Technical and marketing skills
d) Managerial and Commercial Skills

4) The judicious and effective use of energy to maximize profits and enhance competitive positions". This can be the definition of _____.
a) Energy conservation b) Energy management
c) Energy policy d) Energy Audit

5) Demand Side Management is required to _____.
a) Reduce overall cost of installed capacity
b) Reduce needs of peaking station
c) Ensure quality and equity of supply
d) All of the above

6) In the given options, the non-commercial source of energy is _____.
a) Coal b) Lignite
c) Firewood d) Refined petroleum products

7) One unit of electricity is equivalent to _____ kcal heat units.
a) 800 b) 860
c) 400 d) 680

8) In Cogeneration, the system efficiencies can go up to _____.
a) 70 b) 80
c) 90 d) 60

9) Non-contact speed measurements can be carried out by _____.
a) Tachometer b) Stroboscope
c) Oscilloscope d) Speedometer

10) Sankey diagram shows in graphics _____.
a) Energy input b) Energy output
c) Energy balance d) All of the above

Fourth Y. (B.Tech.) (Electrical Engineering) (Semester - II) (New) (CBCS) Examination: March/April – 2026
Electrical Energy Audit and Management (BTN07805)

Day & Date: Monday, 18-05-2026 Max. Marks: 40
Time: 03:00 PM To 05:00 PM

Instructions: 1) All questions are compulsory.
2) Figures to the right indicate full marks.

Section – I

Q.2 Attempt Any Two. **08**

a) What are the necessary skills of Energy Manager?

b) What is the energy conservation and it's important?

c) Define the following terms in Details:
i) Primary and Secondary Energy
ii) Commercial and Non-Commercial

Q.3 Attempt Any Two. **12**

a) Write a short note on solar thermal technology as energy source.

b) What are the duties and responsibilities of Energy Manager?

c) Explain the Indian Electricity Act, 2003.

Section – II

Q.4 Attempt Any Two. **08**

a) Write a note on Simple Payback Period.

b) Explain the need of Energy Audit.

c) What is co-generation? How co-generation leads to energy conservation?

Q.5 Attempt Any Two. **12**

a) Explain various instruments with function of each used to carryout Energy Audit.

b) Explain the various types of Energy Audit.

c) Explain the opportunities for energy conservation in illumination.

MCQ/Objective Type Questions

Duration: 20 Minutes Marks:10

Q.1 Choose the correct alternatives from the options. 10

1) The rating of monopolar HVDC system is _____ to that of bipolar HVDC system.
a) $1/2$ b) $\sqrt{2}$
c) 2 d) $\sqrt{3}$

2) The two conductor in the Homo polar HVDC system is _____.
a) Positive polarity b) Negative polarity
c) Same polarity d) Any of the above

3) The main advantage of HVDC-VSC schemes is _____.
a) both active and reactive powers can be controlled
b) does not require DC filters
c) can be used for very high power more than 1500 MW
d) All of the above

4) A thyristor valve conducts when _____.
a) anode is positive
b) anode is negative
c) anode is positive with positive gate pulse
d) anode is positive with negative gate pulse

5) In HVDC link with CC control _____.
a) power loss is more
b) short circuit current is limited
c) both (a) and (b)
d) None of the above

6) In which type of HVDC system, only one pole is used?
a) Monopolar b) Bipolar
c) Homopolar d) Both (a) and (b)

7) Modern HVDC systems are all _____.
a) 3-pulse converters b) 6-pulse converters
c) 24-pulse converters d) 12-pulse converters

8) A thyristor valve is fabricated using _____.
a) SCRs connected in series (all)
b) SCRs connected in parallel (all)
c) SCRs connected in series and parallel as modules
d) All of the above

9) In 12-pulse connections, transformers are connected _____.
a) Delta/Delta (both)
b) Star/Star (both)
c) Star/Delta (both)
d) One Star/Star and other Star/Delta

10) IGBT converters operate on the principle of _____.
a) voltage source converter b) current source converter
c) power source converter d) either (a) or (b)

MCQ/Objective Type Questions

Duration: 30 Minutes Marks:14

Q.1 Multiple Choice questions: **14**

1) Which of the following is the correct definition of an optimization problem?
a) Maximizing or minimizing an objective function subject to constraints
b) Solving differential equations
c) Performing statistical analysis
d) Evaluating integrals

2) In optimization, the objective function represents _____.
a) Constraints on the system
b) The variable to be optimized
c) The method of solving the problem
d) The search algorithm

3) Which of the following is a bracketing method in single-variable optimization?
a) Newton-Raphson method b) Golden section search
c) Variable metric method d) Powell's method

4) The bound phase method is used to _____.
a) Determine the initial feasible interval containing the minimum
b) Compute gradients of a function
c) Solve discrete variable problems
d) Reduce global optima to local optima

5) Multi-objective optimization involves _____.
   a) Optimizing a single objective only
   b) Simultaneously optimizing two or more conflicting objectives
   c) Solving only linear problems
   d) Ignoring constraints

6) Evolutionary optimization is suitable for _____.
   a) Smooth, convex problems only
   b) Problems with discontinuities and multimodal functions
   c) Single-variable functions only
   d) Linear programming only

7) Integer programming is used when _____.
   a) All decision variables are continuous
   b) Some or all decision variables must be integers
   c) Derivatives are unavailable
   d) Only one variable exists

8) Integer programming problems can be solved using _____.
   a) Simplex method with branch and bound
   b) Golden section search
   c) Newton-Raphson method
   d) Fibonacci search

9) Which is a primary difference between GAs and traditional optimization methods?
   a) GAs require gradient information
   b) GAs are population-based and stochastic
   c) Traditional methods are always faster
   d) GAs cannot handle constraints

10) Selection in GA is used to _____.
   a) Choose better solutions for reproduction
   b) Mutate the population
   c) Evaluate the objective function
   d) Reduce dimensionality

11) Which is a similarity between GAs and traditional methods?
   a) Both search for optimal solutions
   b) Both require derivatives
   c) Both are population-based
   d) Both are stochastic

12) Reducing the size of an optimization problem involves _____.
   a) Eliminating dependent or negligible variables
   b) Increasing the number of constraints
   c) Ignoring the objective function
   d) Using random search

13) Fast reanalysis techniques are used for _____.

a) Quickly evaluating changes in the objective function after modifications
b) Solving only linear problems
c) Gradient computation
d) Generating random solutions

14) Multilevel optimization is used when _____.

a) A system has hierarchical design variables and objectives
b) Single-variable optimization is sufficient
c) Gradient methods fail
d) Problem is unconstrained

Seat No.		Set	P

T. Y. (B.Tech.) (Civil Engineering) (Semester - I) (New) (CBCS)
Examination: March/April – 2026
Design Optimization (CIVMDM-03A)

Day & Date: Saturday, 30-05-2026 Max. Marks: 56
Time: 10:00 AM To 01:00 PM

Instructions: 1) All questions are compulsory.
2) Figures to the right indicate full marks.
3) Use of non-programmable calculators is allowed.

SECTION – I

Q.2 Answer the following questions. **10**

a) Define optimization and explain the general procedure for solving an optimization problem.

b) Use the Exhaustive Search Method to find the minimum of $f(x) = x^2 - 6x + 10$ over $[0, 6]$ with 4 equal intervals.

Q.3 Answer Any Three of the following questions. **18**

a) Using the Newton-Raphson Method, find the root of $f(x) = x^2 - 5x + 6$ starting with $X_0 = 2.5$ Perform two iterations.

b) Using the Bisection Method, find the root of $f(x) = x^3 - 4x + 1$ in the interval $[0, 2]$ up to three iterations.

c) Apply the Fibonacci Search Method to minimize $f(x) = (x - 2)^2 + 1$ in $[0, 5]$ for $n = 5$ function evaluations.

d) Explain with an example the importance of optimization in engineering design.

e) $f(x_1, x_2) = x_1 - x_2 + 2x_1^2 + 2x_1x_2 + x_2^2$ Using Newton Method Minimize by taking the starting point as $x(0) = (0,0)$.

SECTION – II

Q.4 Answer the following questions. **10**

a) Write a note on Operators of genetic algorithm.

b) Describe fast reanalysis techniques and their significance in structural optimization.

Q.5 Answer Any Three of the following questions. **18**

a) Explain the concept of reduction of size of an optimization problem and mention its importance in engineering design.

b) Solve the Integer Programming Problem:
Maximize $Z = 5x_1 + 4x_2$
subject to $x_1 + x_2 \leq 5, 3x_1 + 2x_2 \leq 12,\ x_1, x_2 \geq 0$ and integers.

c) What is meant by sensitivity of optimum solution to problem parameters? Why is it important?

d) Discuss the practical approaches to reduce computational effort in optimization problems.

e) Difference between Genetic Algorithm and Traditional Techniques.

Time: 10:00 AM To 01:00 PM

Instructions: 1) Q. No. 1 is compulsory. It should be solved in the first 30 minutes in Answer Book Page no 03 (Starting page of the Answer Book). Each question carries one mark.
2) Don't forget to Mention question paper set (P/Q/R/S) on top of page.
3) Figures to the right indicates full marks.
4) Use of non-programmable calculators is allowed.

MCQ/Objective Type Questions

Duration: 30 Minutes Marks:14

Q.1 Multiple Choice questions: **14**

1) Integer programming problems can be solved using _____.
a) Simplex method with branch and bound
b) Golden section search
c) Newton-Raphson method
d) Fibonacci search

2) Which is a primary difference between GAs and traditional optimization methods?
a) GAs require gradient information
b) GAs are population-based and stochastic
c) Traditional methods are always faster
d) GAs cannot handle constraints

3) Selection in GA is used to _____.
a) Choose better solutions for reproduction
b) Mutate the population
c) Evaluate the objective function
d) Reduce dimensionality

4) Which is a similarity between GAs and traditional methods?
a) Both search for optimal solutions
b) Both require derivatives
c) Both are population-based
d) Both are stochastic

5) Reducing the size of an optimization problem involves _____.
   a) Eliminating dependent or negligible variables
   b) Increasing the number of constraints
   c) Ignoring the objective function
   d) Using random search

6) Fast reanalysis techniques are used for _____.
   a) Quickly evaluating changes in the objective function after modifications
   b) Solving only linear problems
   c) Gradient computation
   d) Generating random solutions

7) Multilevel optimization is used when _____.
   a) A system has hierarchical design variables and objectives
   b) Single-variable optimization is sufficient
   c) Gradient methods fail
   d) Problem is unconstrained

8) Which of the following is the correct definition of an optimization problem?
   a) Maximizing or minimizing an objective function subject to constraints
   b) Solving differential equations
   c) Performing statistical analysis
   d) Evaluating integrals

9) In optimization, the objective function represents _____.
   a) Constraints on the system
   b) The variable to be optimized
   c) The method of solving the problem
   d) The search algorithm

10) Which of the following is a bracketing method in single-variable optimization?
   a) Newton-Raphson method
   b) Golden section search
   c) Variable metric method
   d) Powell's method

11) The bound phase method is used to _____.
   a) Determine the initial feasible interval containing the minimum
   b) Compute gradients of a function
   c) Solve discrete variable problems
   d) Reduce global optima to local optima

12) Multi-objective optimization involves _____.
   a) Optimizing a single objective only
   b) Simultaneously optimizing two or more conflicting objectives
   c) Solving only linear problems
   d) Ignoring constraints

13) Evolutionary optimization is suitable for _____.
   a) Smooth, convex problems only
   b) Problems with discontinuities and multimodal functions
   c) Single-variable functions only
   d) Linear programming only

14) Integer programming is used when _____.
   a) All decision variables are continuous
   b) Some or all decision variables must be integers
   c) Derivatives are unavailable
   d) Only one variable exists

Time: 10:00 AM To 01:00 PM

Instructions: 1) Q. No. 1 is compulsory. It should be solved in the first 30 minutes in Answer Book Page no 03 (Starting page of the Answer Book). Each question carries one mark.
2) Don't forget to Mention question paper set (P/Q/R/S) on top of page.
3) Figures to the right indicates full marks.
4) Use of non-programmable calculators is allowed.

MCQ/Objective Type Questions

Duration: 30 Minutes Marks:14

Q.1 Multiple Choice questions: **14**

1) Integer programming problems can be solved using _____.
a) Simplex method with branch and bound
b) Golden section search
c) Newton-Raphson method
d) Fibonacci search

2) Which is a primary difference between GAs and traditional optimization methods?
a) GAs require gradient information
b) GAs are population-based and stochastic
c) Traditional methods are always faster
d) GAs cannot handle constraints

3) Selection in GA is used to _____.
a) Choose better solutions for reproduction
b) Mutate the population
c) Evaluate the objective function
d) Reduce dimensionality

4) Which is a similarity between GAs and traditional methods?
a) Both search for optimal solutions
b) Both require derivatives
c) Both are population-based
d) Both are stochastic

5) Reducing the size of an optimization problem involves _____.
   a) Eliminating dependent or negligible variables
   b) Increasing the number of constraints
   c) Ignoring the objective function
   d) Using random search

6) Fast reanalysis techniques are used for _____.
   a) Quickly evaluating changes in the objective function after modifications
   b) Solving only linear problems
   c) Gradient computation
   d) Generating random solutions

7) Multilevel optimization is used when _____.
   a) A system has hierarchical design variables and objectives
   b) Single-variable optimization is sufficient
   c) Gradient methods fail
   d) Problem is unconstrained

8) Which of the following is the correct definition of an optimization problem?
   a) Maximizing or minimizing an objective function subject to constraints
   b) Solving differential equations
   c) Performing statistical analysis
   d) Evaluating integrals

9) In optimization, the objective function represents _____.
   a) Constraints on the system
   b) The variable to be optimized
   c) The method of solving the problem
   d) The search algorithm

10) Which of the following is a bracketing method in single-variable optimization?
   a) Newton-Raphson method
   b) Golden section search
   c) Variable metric method
   d) Powell's method

11) The bound phase method is used to _____.
   a) Determine the initial feasible interval containing the minimum
   b) Compute gradients of a function
   c) Solve discrete variable problems
   d) Reduce global optima to local optima

12) Multi-objective optimization involves _____.
   a) Optimizing a single objective only
   b) Simultaneously optimizing two or more conflicting objectives
   c) Solving only linear problems
   d) Ignoring constraints

13) Evolutionary optimization is suitable for _____.
   a) Smooth, convex problems only
   b) Problems with discontinuities and multimodal functions
   c) Single-variable functions only
   d) Linear programming only

14) Integer programming is used when _____.
   a) All decision variables are continuous
   b) Some or all decision variables must be integers
   c) Derivatives are unavailable
   d) Only one variable exists

Seat No.	

Set **Q**

T. Y. (B.Tech.) (Computer Science & Engineering) (Semester - I) (New) (CBCS) Examination: March/April – 2026
Design Optimization (CIVMDM-03A)

Day & Date: Saturday, 30-05-2026 Max. Marks: 56
Time: 10:00 AM To 01:00 PM

Instructions: 1) All questions are compulsory.
2) Figures to the right indicate full marks.
3) Use of non-programmable calculators is allowed.

SECTION – I

Q.2 Answer the following questions. **10**

a) Define optimization and explain the general procedure for solving an optimization problem.

b) Use the Exhaustive Search Method to find the minimum of $f(x) = x^2 - 6x + 10$ over $[0, 6]$ with 4 equal intervals.

Q.3 Answer Any Three of the following questions. **18**

a) Using the Newton-Raphson Method, find the root of $f(x) = x^2 - 5x + 6$ starting with $X_0 = 2.5$ Perform two iterations.

b) Using the Bisection Method, find the root of $f(x) = x^3 - 4x + 1$ in the interval $[0, 2]$ up to three iterations.

c) Apply the Fibonacci Search Method to minimize $f(x) = (x - 2)^2 + 1$ in $[0, 5]$ for $n = 5$ function evaluations.

d) Explain with an example the importance of optimization in engineering design.

e) $f(x_1, x_2) = x_1 - x_2 + 2x_1^2 + 2x_1x_2 + x_2^2$ Using Newton Method Minimize by taking the starting point as $x(0) = (0,0)$.

SECTION – II

Q.4 Answer the following questions. **10**

a) Write a note on Operators of genetic algorithm.

b) Describe fast reanalysis techniques and their significance in structural optimization.

Q.5 Answer Any Three of the following questions. **18**

a) Explain the concept of reduction of size of an optimization problem and mention its importance in engineering design.

b) Solve the Integer Programming Problem:
Maximize $Z = 5x_1 + 4x_2$
subject to $x_1 + x_2 \leq 5, 3x_1 + 2x_2 \leq 12,\ x_1, x_2 \geq 0$ and integers.

c) What is meant by sensitivity of optimum solution to problem parameters? Why is it important?

d) Discuss the practical approaches to reduce computational effort in optimization problems.

e) Difference between Genetic Algorithm and Traditional Techniques.

Seat No.	

Set **R**

T. Y. (B.Tech.) (Computer Science & Engineering) (Semester - I) (New) (CBCS) Examination: March/April – 2026
Design Optimization (CIVMDM-03A)

Day & Date: Saturday, 30-05-2026 Max. Marks: 70
Time: 10:00 AM To 01:00 PM

Instructions: 1) Q. No. 1 is compulsory. It should be solved in the first 30 minutes in Answer Book Page no 03 (Starting page of the Answer Book). Each question carries one mark.
2) Don't forget to Mention question paper set (P/Q/R/S) on top of page.
3) Figures to the right indicates full marks.
